Brown, Samuel Robbins, 1810–80, American missionary and educator, b East Windsor, Conn grad Yale, 1832, and studied at Columbia (S C) Theological Seminary and at Union Theological Seminary As missionary (1839–47) to China, he took charge of a school founded by the Morrison Educational Association When he returned (1847) to the United States, three students accompanied him, the first Chinese to come to America to be educated Brown had an important part in the founding of Elmira College From 1859 to 1879 he was a missionary to Japan

Brown, Solyman, 1790–1876, American dentist, writer, and clergyman, b Litchfield, Conn He is noted in the history of dentistry for his part in organizing the first dental associations, local and national —the Society of Surgeon Dentists of the City and State of New York and the American Society of Dental Surgeons He wrote on dentistry and was promoter and editor of the *American Journal of Dental Science*

Brown, Thomas Edward, 1830–97, British poet, b Isle of Man, educated at King William's College, Isle of Man, and at Oriel College, Oxford He was headmaster of the Crypt School, Gloucester, and for 30 years after 1864 was second master at Clifton College Brown wrote, in Manx dialect, a number of narrative and lyric poems, which are collected in the volumes *Fo'c'sle Yarns* (1881), *The Doctor and Other Poems* (1887), and *The Manx Witch and Other Poems* (1889) "My Garden" is frequently quoted His complete works appeared in 1900

Brown, Walter Folger, 1869–, American cabinet officer, b Massillon, Ohio, grad Harvard, 1892 A lawyer of Toledo, Ohio, he became prominent in Republican politics and was (1927–29) Assistant Secretary of Commerce As Postmaster General (1929–33) under President Herbert Hoover, Brown secured a reduction of air-mail rates and a consolidation of air-mail routes—policies which aided the development of commercial aviation in the United States

Brown, William, U S banker see BROWN, family,

Brown, William Hill, 1765–93, American writer; son of a celebrated Boston clockmaker, Gawen Brown. He wrote poems, essays, two plays (one of them a tragedy, *West Point Preserved*), and a short novel, *Ira and Isabella*, but he is notable only as the probable author of the first American novel, *The Power of Sympathy* (1789) Because an episode in the book reflected a scandal which involved Perez Morton and his sister-in-law Frances Theodora Apthorp, the novel was long ascribed to Sarah Wentworth MORTON, who was a neighbor of Brown The novel had little circulation, and a well-authenticated story has it that the Mortons and Apthorps, with the author's consent, bought up the copies and suppressed the book See Emily Pendleton and Milton Ellis, *Philenia the Life and Works of Sarah Wentworth Morton* (1931)

Browne, Charles Farrar see WARD, ARTEMUS

Browne, Francis Fisher, 1843–1913, American magazine editor, b South Halifax, Vt He served in the Civil War and later studied law at the Univ of Michigan In Chicago he edited the *Lakeside Monthly*, 1869–74 The *Dial*, which he founded in 1880, was the leading literary monthly until his death, it was noted, as he was, for analytical criticism He edited several anthologies of poetry and wrote *The Everyday Life of Abraham Lincoln* (1886) and the poems *Volunteer Grain* (1895)

Browne, Hablot Knight, pseud **Phiz,** 1815–82, English illustrator Early apprenticed to the engraver Finden, Browne soon showed his preference for the freer arts of drawing and water color At 21 he was chosen by Charles Dickens to illustrate *Pickwick Papers* His success was immediate, and in due course he illustrated many of Dicken's novels as well as works of Harrison Ainsworth and Charles Lever Among his best are the illustrations for *Dombey and Son*, *A Tale of Two Cities*, *Bleak House*, and *Martin Chuzzlewit* Browne also contributed popular cartoons to *Punch* See studies by F G Kitton (1882) and D C Thomson (1884), Edgar Browne, *Phiz and Dickens* (1913)

Browne, Robert, c 1550–c 1633, English clergyman and leader of a group of early separatists popularly known as Brownists He early arrived at the belief that those who lived Christian lives made up the true church Preaching without a license, Browne advocated nonconformity, he gathered a congregation at Norwich c 1580 In 1581 he and his followers sought refuge in Holland There he published (1582) several treatises which are generally regarded as the first expression of the principles of CONGREGATIONALISM Circulation in England of these tracts was punishable by death Upon his return to England in 1584, Browne was imprisoned and later was excommunicated But by 1586 he had yielded to the terms of the Church in such wise as to be made master of the Stamford grammar school, and in 1591 he submitted to episcopal ordination and became rector of Achurch, Northamptonshire See biographies by Champlin Burrage (1906) and F J Powicke (1910)

Browne, Sir Thomas, 1605–82, English author and physician, educated at Oxford and abroad, knighted by Charles II (1671) Browne's *Religio Medici* was composed as a private confession of faith (c 1635), a pirated edition (1642) was followed by the authorized edition (1643) *Hydriotaphia, Urne-Buriall* (1658), probably his finest work, is a solemn reflection on death and immortality He also wrote *Pseudodoxia Epidemica*, commonly known as *Vulgar Errors* (1646), *The Garden of Cyrus* (published with *Hydriotaphia*), *A Letter to a Friend* (1690) and *Christian Morals* (1716) He is considered one of the greatest stylists of English prose See edition of his works (1928–31) and bibliography (1924) by Geoffrey Keynes, studies by Sir Edmund Gosse (1905), Robert Sencourt (1925), and Oliver Leroy (1931)

Browne, Thomas, d. 1825, Loyalist commander in the American Revolution A resident of Augusta, Ga , he was the victim of patriot violence in 1775, when he was tarred and feathered for ridiculing the Continental Congress Later he organized (1778) a Loyalist troop in Florida and raided settlements in S Georgia In 1780 he captured Augusta, in 1781 he was forced to surrender to Andrew Pickens and Henry Lee, and after his exchange he was a colonel in the Queen's Rangers in South Carolina, to be defeated (May, 1782) by Anthony Wayne long after the major fighting of the war had ended at Yorktown Browne, who was fiercely hated by the patriots, escaped and lived out his life in the British West Indies.

Browne, Thomas Alexander, pseud **Rolf Boldrewood,** 1826–1915 Australian author, b London His father was one of the founders of Melbourne, and Browne, brought up there, lived as a squatter, a magistrate, and a commissioner in the gold fields and produced some 30 books of adventure in Australia These included *Old Melbourne Memories* (1884), *Robbery under Arms* (1888), and *The Miner's Right* (1890).

Browne, William (William Browne of Tavistock) (tăv'lstŏk), 1591?–1645?, English poet An imitator of Spenser, he did his finest work in pastoral poetry, of which *Britannia's Pastorals* (1613–16) and *The Shepherd's Pipe* (with George Wither and others, 1614) are the best examples.

Browne, William George, 1768–1813, English traveler. He traveled in Egypt, Darfur, and Asia Minor (1792–98) and published an account in his *Travels in Africa, Egypt, and Syria* (1799) After a visit to Turkey and the Levant (1800–1802), he set out (1812) through Asia Minor and Armenia to Persia, he was murdered en route to Teheran.

Brownell, William Crary, 1851–1928, American literary critic and author, b New York city, grad Amherst, 1871 For 40 years a literary adviser to Charles Scribner's Sons, he was one of the foremost humanistic American critics of life and letters The variety of his interests is shown by his titles—*French Traits* (1889), *French Art* (1892), *Victorian Prose Masters* (1901), *American Prose Masters* (1909), *Criticism* (1914), *Standards* (1917), and *Democratic Distinction in America* (1927) See biography by his wife, Gertrude Hall Brownell (1933)

Brownfield, town (1940 pop 4,009, 1947 estimated pop 6,000), co seat of Terry co , NW Texas, SW of Lubbock and near Sulphur Draw on the Llano Estacado, inc 1926 Cattle raising, farming, processing plants large trade, and especially new chemical plants have speeded the town's growth

brown hematite · see LIMONITE

Brownian movement, the zigzag, irregular movement which minute particles of solid matter exhibit when suspended in a fluid The motion is continuous and of a vibratory nature and has no relation to disturbances outside the liquid It was first established in 1827 by Robert Brown, the botanist, after whom it was named This phenomenon is held to be a substantiation of the kinetic molecular theory of matter, which states that matter is composed of extremely minute particles (see MOLECULE) in constant vibratory motion Therefore, any particle of matter (not too big) when suspended in a fluid is buffeted by the molecules of the liquid and driven at random through the liquid The smallest particles visible under the highest power microscope exhibit such motion (see COLLOID), and the velocity of particles so held in a fluid appears to increase as their size diminishes J B Perrin has used these movements as a basis for experimentation in work on the kinetic theory

brownie, in Celtic folklore, friendly goblin of farmsteads and country dwellings The brownies helped with churning and other household labors at night Scottish legend made the brownie a "tall, dark fellow," but the children's books by Palmer Cox popularized in the United States a conception of the brownie as diminutive

Browning, Elizabeth Barrett, 1806–61, English poet, b Durham, wife of Robert BROWNING Elizabeth had been a delicate and precocious child, in her early womanhood the bursting of a blood vessel in her lungs led to years of invalidism In 1838 her first volume of poems, *The Seraphim*, was published In 1838 also the Barretts moved to 50 Wimpole St London, where Robert Browning carried on the ardent courtship which finally won Elizabeth to marry him secretly in defiance of her tyrannical father and to go with him to Italy (1846) Most of the Brownings' married life was spent in Italy, there the one son was born and there Mrs Browning threw herself into the cause of Italian liberation from Austria Their home in Florence, "Casa Guidi," is preserved as a memorial Mrs Browning's health improved in Italy, and her work gained in strength and significance Her greatest poetry, *Sonnets from the Portuguese* (1850), was inspired by her own love story *Casa Guidi Windows* (1851), on Italian liberty, and *Aurora Leigh* (1856), a novel in verse, followed See *The Letters of Robert Browning and Elizabeth Barrett Browning, 1845–46* (1899), L S Bons, *Elizabeth Barrett Browning* (1930), Rudolph Besier, *The Barretts of Wimpole Street* (1930), a dramatic version of the Brownings' love story in which Katharine Cornell played Elizabeth Barrett, Virginia Woolf, *Flush a Biography* (1933), Jeannette Marks, *The Family of the Barretts* (1938)

Browning, John Moses, 1855–1926, American inventor, b Ogden, Utah His father was a gunsmith, and Browning at 13 invented his first gun in his father's shop After obtaining a patent on a breech-loading rifle in 1879, he became a small-arms designer for the Winchester arms company Later he worked for other manufacturers, notably the Colt firm, and still later was in an independent concern. He invented a repeating rifle (1884), a box-magazine rifle (1885), and three weapons—the Browning automatic pistol, the Browning machine gun, and the Browning automatic rifle—which were standard equipment for the U S army in the First World War.

Browning, Orville Hickman, 1806–81, U S Secretary of the Interior (1866–69), b Harrison co , Ky He moved to Illinois in 1831, practiced law at Quincy, and was a Whig member of the legislature One of the organizers of the Republican party in Illinois, Browning helped secure his friend Lincoln's nomination for President in 1860, but later, as U S. Senator from Illinois (1861-63), he opposed Lincoln on the emancipation question After Lincoln's assassination Browning supported Andrew Johnson's Reconstruction policy in opposition to the radical Republicans He joined Johnson's cabinet in Sept , 1866, and was one of the

President's closest friends and advisers during the impeachment struggle. His diary, edited by T. C Pease and J G. Randall (2 vols , 1927-33), is an important and detailed source for the Lincoln and Johnson administrations.

Browning, Robert, 1812–89, English poet, son of a London bank clerk of independent means Browning's broad and sound education was primarily the work of his artistic and scholarly parents Undecided which of the arts he preferred, he was perhaps influenced by reading Shelley Browning's anonymous *Pauline* appeared in 1833 In 1834, 1838, and 1844 he visited Italy, which became his second homeland The poem *Paracelsus* (1835) is set in Italy, and his much later poem "An Italian in England" was to be a favorite with Mazzini His plays *Strafford* (1837), suggested by William Macready, and *A Blot in the 'Scutcheon* (1843) were performed with Macready acting in both They were not well adapted to the stage, although they and his other plays read well In his historical narrative poem, *Sordello* (1840), Browning attempted compression and elision to a degree which his readers found obscure In later works he developed a literary form in which he has not been surpassed, the dramatic monologue—a character reveals himself solely through his own words "Fra Lippo Lippi," "Andrea del Sarto," and "The Bishop Orders His Tomb at Saint Praxed's Church" are poems of this kind In 1846, after a romantic courtship, Browning married the poet Elizabeth Barrett (see BROWNING, ELIZABETH BARRETT) and took her to Italy for 15 happy years until her death He had written *Bells and Pomegranates* (8 parts, 1841–46) and in Italy wrote *Men and Women* (1855) *Dramatis Personae* (1864) followed His masterpiece, *The Ring and the Book* (1868–69), is a murder story presented in a series of 10 dramatic monologues, with an introduction and a conclusion in which the poet speaks Browning had gained recognition slowly, but was now acclaimed as a great poet and ethical leader His later works include *Dramatic Idyls* (2 vols , 1879–80) and *Asolando* (1889) Today he is noted for his psychological portraits in verse and his craftsmanship, though his persistent optimism seems to alienate some readers Browning died in Venice and was buried in Westminster Abbey See variously published volumes of his letters, biographical sketch by H E Scudder in the Cambridge edition (1895) of his works, standard biography by W H Griffin and H. C Minchin (rev ed , 1938), W C De Vane, *A Browning Handbook* (1935)

Browning, town (pop 1,825), NW Mont , NW of Great Falls, inc 1920 Near Glacier National Park, it has the agency of the Blackfeet Indian Reservation

Brownists see BROWNE, ROBERT

Brownlow, William Gannaway (broun'lō), 1805–77, known as the "fighting parson," governor of Tennessee (1865–69), b. Wythe co , Va He became an itinerant Methodist preacher, noted for his powers of vituperation, and won a large following in E Tennessee by his speeches on public questions He edited the Jonesboro *Whig* for 10 years and after 1849 made the Knoxville *Whig* one of the most influential papers in the state Though not opposing slavery, Parson Brownlow strongly opposed secession and shared with Andrew Johnson, whom he despised, the Unionist leadership of E Tennessee. His paper continued to express views violently hostile to the Confederacy until Oct 24, 1861, when it was suppressed Brownlow fled to the mountains, but was taken, imprisoned for a month, and afterward kept under guard until March 3, 1862, when he was sent within Union lines He then made an extensive and highly successful speaking tour of the North and also wrote his *Rise, Progress, and Decline of Secession* (1862), which contained a narrative of his experiences Early in 1865, Tennessee having been completely conquered by Union forces, he was elected governor and instituted his own version of Reconstruction. He disfranchised those who had served in the Confederate army, used the state guards against the Ku Klux Klan, and proclaimed martial law in the most turbulent areas. He was reelected in 1867, and when his term ended, Tennessee was a broken, impoverished state He was a U S Senator from 1869 to 1875. See biography by E M Coulter (1937)

Brownsburg, village (pop 3,105), S Que , NW of Lachute. Originally a lumber town, it now makes ammunition

Brownsburg, town (pop. 1,136), Hendricks co , central Ind , WNW of Indianapolis

Brown-Séquard, Charles Édouard (broun'-sākär', -sākwar'), 1817–94, physiologist, b Mauritius, of French and American parents He was professor at Harvard Univ (1864–68) and at the Collège de France (from 1878) and practiced medicine in New York city (1873–78) He was an authority on the nervous system, on animal heat, and on blood and was a pioneer in the study of internal secretions and of rejuvenation

Brownson, Orestes Augustus, 1803–76, American author and clergyman, b. Stockbridge, Vt Largely self-taught, he became a vigorous and influential writer on social and religious questions. He was a Presbyterian, but left that church to become first a Universalist and then a sort of free-lance minister, working for such socialistic schemes as the short-lived Workingmen's party Later he was a Unitarian minister until in 1836 he started his own church, the Society for Christian Union and Progress As founder and editor of the *Boston Quarterly Review* (1838–42) and as editor of the *Democratic Review* (1842–44), he condemned social inequalities At this time he was one of the transcendentalists and was so interested in Brook Farm as to send his son there He entered the Roman Catholic Church in 1844, and soon, as editor of the new *Brownson's Quarterly Review*, he not only attacked non-Catholic beliefs, but displeased many Catholics by his attempts to liberalize the social policies of the Church Among his books are *New Views of Christianity, Society, and the Church* (1836), two autobiographical novels, *Charles Elwood, or, The Infidel Converted* (1840) and *The Convert* (1857), *The American Republic* (1865) See biography by his son, H F Brownson (3 vols , 1898–1900), who also edited his works, and biographies by A M Schlesinger, Jr (1939), and Theodore Maynard (1943).

Brown University, at Providence, R I , nonsectarian, for men, chartered 1764 as Rhode Island College by Baptists at Warren, opened 1765 It moved to Providence in 1770 and was renamed for Nicholas BROWN in 1804 It has courses in liberal arts and sciences and in engineering Pembroke College for women undergraduates, organized in 1891, has its own campus The John Hay Library is especially rich in books on American, Rhode Island, and Napoleonic history, American poetry and drama, international law, and Lincoln The nucleus of the John Carter Brown Library of Americana was bequeathed by John Carter BROWN Brown has always led in freedom of teaching and curriculum reform.

Brownville, town (pop 1,914), central Maine, on both sides of Pleasant River and NNW of Bangor, between Sebec and Schoodic lakes, inc 1824 Maine's oldest roofing-slate quarries are here, wooden products and machine parts are made

Brownwood, city (1940 pop 13,398, 1947 estimated pop 21,000), co seat of Brown co , central Texas, WNW of Waco, settled 1856, inc 1876 A hustling industrial town, Brownwood has small factories, railroad shops, and plants processing peanuts, cotton, oil, and other products of the region It has two coeducational colleges, Howard Payne (Baptist) and Daniel Baker (a branch of Southern Methodist Univ) Near-by Lake Brownwood is a large reservoir used for irrigation, fishing, and boating, on its north shore a military camp was active in the Second World War.

Bruant, Libéral (lēbārāl' brüā'), c 1635–1697, best-known member of a French family of architects He is said to have made the original plans for the Place Vendôme, Paris, which later was designed by J H. Mansart. Among his works in Paris are the large asylum of La Salpêtrière and the Hôtel des Invalides, Louis XIV's vast project of a hospital for disabled soldiers. He also designed the Church of the Invalides, to which Mansart later added the Dôme des Invalides.

Bruce, celebrated Scottish family descended from an 11th-century Norman duke, Robert de Brus He aided William I in his conquest of England and was given lands in England His son was granted fiefs in Scotland, and accordingly the family rendered homage in both kingdoms In the Scottish dynastic struggle which followed the death of MARGARET MAID OF NORWAY in 1290, the Bruces claimed succession to the throne as a result of the marriage of Robert the Bruce, lord of Annandale, to Isobel, daughter of David, earl of Huntingdon, who was brother of WILLIAM THE LION of Scotland In 1290 the son of that marriage, Robert the Bruce, was a claimant to the throne, rivaled by John de BALIOL, a great-grandson of David of Huntingdon through another daughter. A son of this Robert the competitor was Robert, earl of Carrick, whose son was the famous Robert Bruce or Robert the Bruce—ROBERT I of Scotland The brother of Robert I, Edward Bruce, was crowned king of Ireland in 1316, but was killed in 1318 The young son of Robert I succeeded his father as DAVID II and was in turn succeeded by his nephew, ROBERT II, son of Robert I's daughter Marjory and the first king of Scotland of the house of STUART

Bruce, Charles Granville, 1866–1939, British mountaineer, b Wales As a British army officer he had a distinguished record in N India and was widely respected by the natives, some of whom he commanded during the First World War He led the Mt Everest expeditions of 1922 and 1924

Bruce, Sir David, 1855–1931, British bacteriologist, b Melbourne, Australia He discovered the bacterium of Malta fever (1887), and the cause and mode of transmission of nagana (a disease of horses and cattle) and of African sleeping sickness (with David N Nabarro and Sir Aldo Castellani) He was head of the Royal Society's commission to study sleeping sickness in Uganda (1903, 1908–10) and Malta fever in Malta (1904–6)

Bruce, Edward, d 1318, Scottish king of Ireland, brother of ROBERT I of Scotland He aided his brother in subduing Scotland and helped to defeat the English at Bannockburn In 1315 he was declared heir to Robert's throne in Scotland He then with Robert's approval invaded Ulster, to which he had some hereditary claim He was crowned king of Ireland in 1316 and found many Irish allies against the Anglo-Irish rulers, but he failed to consolidate his gains, even when Robert in 1317 joined him Edward was killed in battle in Oct , 1318

Bruce, James, 1730–94, Scottish explorer in Africa He examined Roman ruins in North Africa (1755) from Tunis to Tripoli and visited Crete, Rhodes, and Asia Minor In 1768 he traveled down the Red Sea as far as the straits of Bab el Mandeb From Massawa he struck inland for Gondar, then the capital of Ethiopia He rediscovered (1770) the source of the Blue Nile, which he followed (1771) to its confluence with the White Nile He wrote *Travels to Discover the Source of the Nile, 1768–73* (3d ed , 1813) For his travels in Barbary, see R L Playfair, *Travels in the Footsteps of Bruce* (1877)

Bruce, James, 8th **earl of Elgin.** see ELGIN, JAMES BRUCE, 8TH EARL OF.

Bruce, Stanley Melbourne (mĕl'burn), 1883 , Australian statesman, b Melbourne Educated at Cambridge Univ , he was called to the bar (1906) in England, then returned to Australia to become a Melbourne businessman After service in the First World War, he entered the commonwealth legislature in 1918, was treasurer (1921–23) in the cabinet of W. M Hughes, and served as prime minister (1923–29) He was notable for promoting the closest relations of Australia with the empire compatible with Australian self-government, and he also advocated international cooperation Bruce was (1921, 1932–33) Australian delegate to the League of Nations and in 1936 president of the council From 1933 to 1945 he was high commissioner for Australia in London In 1947 he was made Viscount Bruce of Melbourne

Bruckner, Anton (än'tōn brōōk'nur), 1824–96, Austrian composer While extremely proficient as an improviser at the organ, he composed mainly massive orchestral works He wrote nine symphonies, several Masses and a *Te Deum* for chorus and orchestra, and one string quintet He took great pains to acquire formal theoretic study and later taught at the Vienna Conservatory In his simple piety, he dedicated a symphony to God See studies by Werner Wolff (1942) and Dika Newlin (1947)

Brudenell, James Thomas. see CARDIGAN, JAMES THOMAS BRUDENELL, 7TH EARL OF

Bruegel, Brueghel, or **Breughel** (all brū'gŭl), famous family of Flemish genre and landscape painters The foremost, **Pieter Bruegel** (pē'tur), the elder, c 1525–1569, called Peasant Bruegel, studied in Antwerp with his future father-in-law, Pieter Coeck van Aelst, but was influenced primarily by Bosch In 1551 he became a member of the Antwerp Academy He visited Italy and undoubtedly profited from the liberating and humanistic ideas of the Renaissance However, he imitated neither the great Italians nor the Flemish mystics but employed his native powers of minute observation in depicting the whole living world of field and forest and the sturdy race of peasants at work and play therein In his lifetime he witnessed the horrors of the Inquisition Several of his pictures record them His *Massacre of the Innocents* (Brussels) is a Flemish village in the dead of winter with cavalry cutting down the simple folk His *Carrying the Cross* (Vienna) depicts the tortures applied to humble men in his own day Nevertheless all his work exhales a robust, invincible gaiety His splendid landscapes, warm in tone and vibrant in color are full of life and animation and a wholesome but compelling poetry Bruegel worked principally in Antwerp and Brussels, producing many admirable drawings and some etchings in addition to his oils Famous among the latter are *The Blind* (Naples), *Adoration of the Magi* (National Gall , London), *Peasants Dancing* (Louvre), *Winter*, and *Tower of Babel* (Vienna) The Metropolitan Museum has a large and characteristic painting, *The Harvesters* See study by Gustav Glück (1937) A son, **Pieter Bruegel,** the younger, 1564–1637, was known as Hell Bruegel because of his pictures of the infernal regions He also painted rural scenes His brother, **Jan Bruegel** (yän), called Velvet Bruegel, 1568–1625, was a better painter His work has been confused with that of his father, whose popularity he shared He was a friend of Rubens and sometimes collaborated with him There are fine landscapes in the galleries of Madrid and in the Metropolitan Museum

Bruges (brōōzh, brōō'jĭz, Fr brüzh), Flemish *Brugge* (brū'gŭ), city (pop 52,698), capital of West Flanders, NW Belgium It is a rail and canal junction connected by canal with ZEEBRUGGE Once the greatest and busiest port of N Europe, it is now a quiet city, famed for its medieval architecture, with lace manufactures, breweries, and a printing industry Bruges was first fortified in the 9th cent , it was situated on a now silted inlet of the North Sea By the late 12th cent it had become the chief port and one of the chief wool-manufacturing centers of FLANDERS Ghent and Ypres were its chief industrial—and hence also political—rivals In the 14th cent the HANSEATIC LEAGUE made Bruges its chief entrepôt, and the city became one of the great commercial hubs of the world New ports were founded to accommodate the increasing trade, notably SLUIS An early and typical COMMUNE of the Low Countries, Bruges held extensive political privileges and often played a decisive part in the chronic struggle among England, France, and the counts of Flanders Its government, first in patrician hands, gradually passed to its chief guilds, the weavers, fullers, shearers, and dyers When, in 1301, Philip IV of France annexed Flanders, Bruges led the rebellion against him. The French garrison was massacred (1302), and shortly afterward the citizens of Bruges led in defeating Philip at Courtrai in the BATTLE OF THE SPURS Despite frequent political disturbances Bruges continued to increase in prosperity until foreign competition caused the decline of the Flemish wool industry in the early 15th cent The ports of Bruges silted up, and the Hanseatic League and the English merchants adventurers moved their headquarters from Bruges to Antwerp By the beginning of the 16th cent , Antwerp had taken almost all the trade away from Bruges Bruges became the cradle of FLEMISH ART during the rule (14th–15th cent) of the Burgundian dukes in Flanders The Hospital of St John (12th cent) contains several masterpieces of Hans Memling Gérard David, Jan van Eyck, and many other masters are richly represented in the churches, public buildings, and several small museums of the city The charm of Bruges is due as much to its numerous canals, crossed by more than 50 bridges, as to the beauty of its architecture Its many Gothic buildings include the market hall, sometimes called Cloth Hall (13th cent , rebuilt 16th cent), with a famous belfry and carillon, the town hall (14th cent), the Church of Notre Dame (12th–13th cent), containing the tombs of Charles the Bold and Mary of Burgundy, the Cathedral of Saint-Sauveur, and the Chapel of the Precious Blood (12th–15th cent), a major place of pilgrimage The medieval aspect of Bruges is heightened by its ecclesiastic character, Bruges is an episcopal see and has numerous convents

Brugmann, Karl (kärl' brōōk'man), 1849–1919, German philologist A professor at Leipzig, he was one of the school holding that scientific rules of linguistics do not admit of exceptions With the help of others, notably Hermann Osthoff, Wilhelm Scherer, and Berthold Delbrück, he did much work in Indo-European linguistics and issued a large comparative grammar of Indo-European languages

Brugsch, Heinrich Karl (hīn'rĭkh kärl' brōōksh'), 1827–94, German philologist An Egyptologist, he deciphered the demotic and compiled a demotic-hieroglyphic dictionary

Brühl, Heinrich, Graf von (hīn'rĭkh gräf' fŭn brül'), 1700–1763, Saxon statesman The favorite of AUGUSTUS III, king of Poland and elector of Saxony, Brühl as prime minister (1746–63) had virtually dictatorial power in directing the disastrous policy of Saxony in the Seven Years War He amassed an immense fortune through fraud

bruise, superficial injury or contusion in which the skin is not broken, although there is an extravasation of blood from the capillaries into the subcutaneous tissues The skin is discolored, changing from bluish red to yellow because of the presence of dead red blood cells The pain and swelling accompanying a bruise are relieved by immediate cold applications, followed later by hot compresses Purpura, a condition associated with blood disease, is also characterized by extravasation of blood into the skin and mucous membrane

Brulé, Étienne (ātyĕn' brülā'), c 1592–1632, French explorer in North America He arrived (1608) in the New World with Samuel de Champlain, who sent him in 1610 into the wilderness to learn about the Indians and the land He lived with the Huron Indians and c 1612 accompanied a group of them to Georgian Bay of Lake Huron In 1612 he guided Champlain to that lake, and on the return journey they were (so far as is known) the first white men to see Lake Ontario Brulé was then sent to the headwaters of the Susquehanna and followed that river to Chesapeake Bay On his way back he was captured by the Iroquois and tortured, but escaped (1618) He once more lived with the Huron, making many explorations of which no definite record remains He probably visited Lake Superior and thus saw all the Great Lakes except Lake Michigan —the first white man to do so In 1629 he piloted the English vessels that captured his old commander, Champlain Then he retired to live an increasingly dissolute life among the Huron He was killed in an Indian quarrel, and his remains were eaten See C W Butterfield, *History of Brulé's Discoveries and Explorations, 1610–1626* (1898)

Brumaire (brümâr'), second month of the FRENCH REVOLUTIONARY CALENDAR The coup d'état of 18 (actually 18–19) Brumaire (Nov 9–10, 1799), engineered chiefly by Sieyes, overthrew the DIRECTORY and established the CONSULATE under Napoleon It nearly failed because of Napoleon's inept conduct at the Council of Five Hundred, but the situation was saved by his brother Lucien BONAPARTE

Brummagem (brŭ'mujum), [colloquial form of Birmingham, England], name given to a counterfeit coin first made in Birmingham (17th cent) Hence it is applied to anything not genuine, as to the "sham Protestants" supporting the Exclusion Bill in England in 1680

Brummell, George Bryan (brŭ'mul), 1778–1840, Englishman of wealth, called Beau Brummell After a brief career at Oxford and in the army he became known as a man of fashion especially notable for the exquisite finery of his clothes He was the intimate of the prince regent (later George IV) Reckless gambling and heavy debt caused his flight to Calais, and there he struggled on for 14 years. He then held (1830–32) a sinecure consulate at Caen, where he died in a hospital for the insane *Male and Female Costume* is a treatise on dress supposedly written by him (ed by Eleanor Parker, 1932) See biography by Willard Connely (1940).

Brunanburh, battle of (brōō'nunbŭrg), A D 937, won by ATHELSTAN, king of Wessex, over a combination of Irish, Scots, and Strathclyde Britons The site is on the west coast of England, between Chester and Dumfries. A poem in the *Anglo-Saxon Chronicle* celebrating the battle has been often translated See edition by Alistair Campbell (1938)

Brundidge, town (pop 1,909), SE Ala , SE of Montgomery near Troy, in a farm area.

Brundisium: see BRINDISI, Italy

Brunehaut: see BRUNHILDA

Brunei (brōōnī'), sultanate (c 2,225 sq mi ; pop 40,670), NW BORNEO, under British protection since 1888 Its two parts are both enclosed by Sarawak Its capital and port, also called Brunei (estimated pop 13,500), consists almost entirely of houses built on piles in the Brunei river, it has fisheries and some trade in rubber and sago

Brunel, Sir Marc Isambard (brōōnĕl'), 1769–1849, English engineer and inventor Born in France, he was a royalist refugee to America in 1793 He became chief engineer of New York city, built the old Bowery theater (burned in 1821), constructed a canal between Lake Champlain and the Hudson, and carried out other projects In 1799 he went to England, where he patented machinery for making ships' blocks He invented many other mechanical labor-saving devices In 1825 he began the construction of the Thames Tunnel (the first in which a shield was used, see TUNNEL) In 1841 he was knighted See Richard Beamish, *Memoirs of Sir Marc Isambard Brunel* (1862) In the work on the tunnel Sir Marc was assisted by his son, **Isambard Kingdom Brunel,** 1806–59, English civil engineer and an authority on railway traction and steam navigation He was engineer of the Great Western Railway, building bridges and docks Later he constructed railways in Italy and was a consulting engineer in Australia and India He is best known, however, for his designing and construction of the three ocean steamships, the *Great Western* (1838), which was the first transatlantic steam vessel, the *Great Britain* (1845), the first ocean screw steamship, and the *Great Eastern* (1858), the largest steam vessel of its time See biography by his son (1870), Celia Brunel Noble, *The Brunels Father and Son* (1938)

Brunelleschi, Filippo (fēlēp'pō brōōnĕl-lĕs'kē), 1377–1446, the first great architect of the Italian Renaissance, a Florentine by birth Trained as sculptor and bronze founder, he designed a pair of bronze doors for the Florence baptistery , his design was placed second to that of Lorenzo GHIBERTI Brunelleschi then journeyed to Rome, where, for four years, he devoted himself to the study of classical buildings The small and beautiful PAZZI chapel in Florence, which he built in 1420, exhibits the first definite emergence of the Renaissance spirit in architecture In 1420 Brunelleschi, in competition, won the commission to build the dome for the cathedral in Florence This octagonal ribbed dome is one of the most celebrated and original domical constructions in architectural history Brunelleschi's other works include the churches of San Lorenzo and Santo Spirito and the Pitti Palace, all in Florence His designs exhibit beauty of detail and elegance, as well as mastery of construction See Leader Scott, *Filippo di Ser Brunelleschi* (1901)

Brunet, Jacques Charles (zhäk' shärl' brünā'), 1780–1867, French bibliographer, author of the standard bibliographical dictionary *Manuel du libraire et de l'amateur de livres* (1st ed , 1810, 5th ed , 1860–65)

Brunetière, Ferdinand (fĕrdēnä' brünŭtyĕr'), 1849–1906, French literary critic, opponent of naturalism He developed a theory of the evolution of fixed literary forms analogous to the evolution of species. His vast learning is evident in the masterly *Manuel de l'histoire de la littérature française* (1897) and in the history of French literature from 1515, most of which was published (1904–17) posthumously from notes by his pupils He also wrote in defense of Catholicism See Elton Hocking, *Ferdinand Brunetière the Evolution of a Critic* (1936)

Brunhild (brōōn'hĭld), or **Brünnehilde** (brün'ühĭld'dŭ), or **Brynhild** (brĭn'hĭld), in Germanic mythology, mighty female warrior Stories about her vary even in the large pattern, but she is always associated with SIEGFRIED In the NIBELUNGENLIED she is the heroic queen of Iceland, whom Siegfried defeats in combat and wins for his brother-in-law, Gunther Hating Siegfried, Brunhild contrives his death at the hands of Hagen In the VOLSUNGA-SAGA, as Brynhild, she is chief of the Valkyries Sigurd saves her from an enchanted stronghold and loves her, but GUDRUN makes him forget Brynhild and takes him as her husband Sigurd then wins Brynhild for his brother-in-law, Gunnar The Valkyrie brings about Sigurd's death and destroys herself on his funeral pyre Wagner in his opera cycle, *The Ring of the Nibelungs*, in which she is Brünnehilde, makes her a Valkyrie who defies her father, the god Wotan, to help the lovers Siegmund and Sieglinde Wotan puts her sleeping on a fire-surrounded mountaintop, from which she is rescued by Siegfried He is by magic made to forget

her, and for his unfaithfulness she brings about his death, her own death on his pyre, and the burning of Valhalla

Brunhilda (brŭnhĭl'dŭ) or **Brunehaut** (brūnō'), 534?–613, Frankish queen, wife of SIGEBERT I of Austrasia; daughter of King Athanagild of Spain She was a chief participant in the bloody war (567–613) against Neustria that followed the murder of her sister Galswintha, wife of Sigebert's brother Chilperic I of Neustria, and Chilperic's marriage to his mistress Fredegunde The struggle continued between Brunhilda and Fredegunde after the deaths of Sigebert and Chilperic Throughout the reigns of her son, Childebert II, and of two grandsons, Brunhilda was the actual ruler of Austrasia and, later, of Burgundy, when that country was united with Austrasia after the death of King GUNTRAM (593) She was endowed with the gifts of a great statesman, but her unscrupulousness in the execution of her plans earned her the fierce hatred of the nobles She was finally betrayed by them to Fredegunde's son, CLOTAIRE II of Neustria, who put her to a horrible death (613)

Brünig Pass (brü'nĭkh), ancient route between the Forest Cantons and the Bernese Alps, Switzerland It is crossed by a highway and a railroad

Brüning, Heinrich (hīn'rĭkh brü'nĭng), 1885–, German statesman A leader of the Catholic Center party, he was appointed (1930) chancellor of the Reich to put German finances in order The Reichstag, which soon failed to support him, was dissolved (1930), and new elections were ordered The new Reichstag, in which the National Socialists represented a large minority, was equally unable to produce a working majority, but Brüning continued to govern by decree His drastic deflationary measures were very unpopular In 1932 Brüning dissolved Hitler's storm troops, but shortly afterward he was abruptly dismissed by President Hindenburg, who appointed Franz von Papen as the new chancellor Brüning left Germany in 1934 and in 1937 was appointed professor of political science at Harvard Univ

Brünn, Czechoslovakia see BRNO

Brünnehilde see BRUNHILD

Brunner, Arnold William, 1857-1925, American architect and expert on city planning, grad Massachusetts Institute of Technology He practiced in New York The Pennsylvania capitol building and grounds in Harrisburg, the Cleveland Civic Center, and the Albany water front were his chief group achievements The Spanish and Portuguese Synagogue in New York is one of his best individual buildings See biography by R I Aitken (1926)

Brunner, Emil (ā'mĭl brōōn'ur), 1889–, Swiss Protestant theologian, professor of theology at the Univ of Zurich In 1938-39 and again in 1946 he visited and lectured in the United States The Bible is regarded by Brunner as the source of divine revelation, thereby limiting the revelation of God to the Hebrew-Christian tradition Faith alone is the agent of revelation, and the man who has fallen from God's grace cannot redeem himself by good works Brunner's position in theological circles is closely associated with that of Karl BARTH The two men split, however, over the question of natural revelation, Brunner refusing to separate theology completely from the general process of culture His more important works include *Die Mystik und das Wort* (2d ed , 1928), *Das Gebot und die Ordnungen* (1932, Eng tr , *The Divine Imperative*, 1937), and *Wahrheit als Begegung* (1938, Eng tr , *The Divine-Human Encounter*, 1943) See Cornelius Van Til, *The New Modernism* (1946)

Bruno, Saint (Saint Bruno the Great), d 965, German churchman and statesman, brother of Emperor OTTO I He was made (953) archbishop of Cologne and held much power, both ecclesiastic and lay He served as chancellor, was his brother's chief adviser, and exercised administration over Lower Lorraine and, as archchancellor, in Italy He organized the civil service, led the revival of learning in the period, and reformed the monasteries along the lines of the reforms of Cluny

Bruno, Saint (d 1009) see BONIFACE, SAINT

Bruno, Saint, c 1030–1101, German monk, founder of the CARTHUSIANS, b Cologne He studied and taught at Rheims In 1084 he took six companions and founded a little monastery in the Alps, which became the mother house of the Carthusian order (see CHARTREUSE, GRANDE) In 1090 URBAN II, whom Bruno had taught, called him to Rome as a counselor He died in Italy in retirement at a monastery he had founded. Feast Oct 6

Bruno, Giordano (jôrdä'nō brōō'nō), 1548–1600, Italian philosopher, b Nola He entered the Dominican order in his early youth but was accused of heresy and fled (c 1576) to take up a career of study and travel He taught briefly at Toulouse, Paris, Oxford, and Wittenberg, but, personally restless and in constant opposition to the traditional schools, he found no permanent post His major metaphysical works, *De la causa, principio, et uno* and *De l'infinito, universo, et mondi* (both 1584), were published in France. Further works appeared in England and Germany. A man of considerable talent, Bruno also wrote satire and some poetry. In 1591 he returned to Venice, where he was accused of heresy by the Inquisition and, after imprisonment, was burned to death Bruno challenged all dogmatism, including that of the Copernican cosmology whose main tenets, however, he upheld He believed that our perception of the world is relative to the position in space and time from which we view it and that there are as many possible modes of viewing the world as there are possible positions Therefore we cannot postulate absolute truth or any limit to the progress of knowledge He pictured the world as composed of individual elements of being, governed by fixed laws of relationship These elements, called monads, were ultimate and irreducible and were based on a pantheistic infinite principle, or cause, or Deity, manifest in us and in all the world He was the first to state what has now become the cosmic theory Bruno's influence on later philosophy, especially that of Spinoza and Leibniz, was profound See biography by J L McIntyre (1903), A O Lovejoy, *The Dialectic of Bruno and Spinoza* (1904), W T Fontaine, *Fortune, Matter, and Providence* (1939)

Bruno the Great, Saint: see BRUNO, SAINT (d 965)

Brunswick, dukes of. see CHARLES WILLIAM FERDINAND, FERDINAND, FREDERICK WILLIAM

Brunswick (brŭnz'wĭk), Ger *Braunschweig* (broun'shvĭk), former German state (1939 area 1,379 sq mi , 1939 pop 602,873), central Germany, consisting of several separate territories surrounded by the former Prussian provinces of Saxony, Hanover, and Westphalia The larger part (1,182 sq mi , 1946 pop , 782,950) was included after 1945 in the British-occupied state of Lower Saxony , the rest, in Russian-occupied Saxony-Anhalt Brunswick (the capital), Goslar, Helmstedt, and Wolfenbüttel are the chief towns The region is situated on the North German plain and in the northern foothills of the Harz, where silver, copper, lead, and iron are mined Grain, sugar beets, and potatoes are the main crops The duchy of Brunswick emerged from the remnants of the domains of Henry the Lion, to whom Emperor Frederick I left only the territories of Brunswick and Lüneburg (roughly modern Brunswick and Hanover) The Guelphic house repeatedly divided into several branches, the main ones being Brunswick-Wolfenbüttel and Brunswick-Lüneburg In 1692 the duke of Brunswick-Lüneburg became elector of HANOVER The Brunswick-Wolfenbüttel line (itself a cadet branch of the Lüneburg line since 1634) ruled over Brunswick and had, among its dukes, the famous generals Charles William Ferdinand and Frederick William Frederick William recovered (1813) the duchy, which Napoleon I had incorporated (1806) in the kingdom of Westphalia The line became extinct in 1884, and Brunswick was ruled by regents until 1913, when Ernest Augustus, grandson of King George V of Hanover, was made duke A member of the North German Confederation after 1866 and of the German Empire after 1871, Brunswick became a republic in 1918 and then joined the Weimar Republic

Brunswick, Ger *Braunschweig*, city (pop 181,375), formerly capital of Brunswick state, central Germany, on the Oker It has iron, steel, machinery, and brewery plants and is an active trade center Chartered (12th cent) by Henry the Lion, it was (14th cent) an important member of the Hanseatic League In 1753 the residence of the dukes of Brunswick was shifted here from Wolfenbüttel The picturesque old city suffered heavy bomb damage in the Second World War The cathedral, begun (1173) by Henry the Lion, contains his tomb, it is less damaged than the churches of St Andrew and St Catherine (12th cent), the Magnikirche and the Petrikirche (13th cent), the medieval town hall, and the famous fountain (built 1408) representing Till Eulenspiegel, who lived here Many of the splendid medieval guild houses were also damaged The art museum, now in the former Richmond Palace, has several paintings by Rembrandt, Rubens, Vermeer, and Lucas van Leyden

Brunswick. **1** City (pop 15,035), co seat of Glynn co , SE Ga , on the Atlantic coast Founded in 1771–72, it was named for George III of the house of Brunswick The city is a port of entry, and its sheltered harbor is used by coastal freighters and a shrimping fleet, lumber and lumber products, canned shrimp, fertilizer, chemicals, and cotton are exported Brunswick and the coastal islands offshore (see SEA ISLANDS) are popular resorts **2** Town (pop 8,658), S Maine, on the Androscoggin and W of Bath. Settled as a trading post in 1628, it was several times raided by the Indians, and Fort Andros (1688, destroyed by Indians a few years later) and Fort George (1715, dismantled in 1737) were built for protection The town was incorporated in 1739 Brunswick is the seat of BOWDOIN COLLEGE Canning and textile (rayon) and paper milling are important The resort trade developed in the 20th cent Harriet Beecher Stowe here wrote *Uncle Tom's Cabin*, Hawthorne's first novel, *Fanshawe* (1828), was printed here A house that dates from 1808 was once the home of Longfellow. **3** Railroad town (pop 3,856), NW Md , on the Potomac and SW of Frederick; laid out c.1787 **4** City (pop 1,749), N central Mo , on the Grand River near the Missouri and W of Moberly, in a livestock & grain area It was laid out c 1837 on the Missouri river, which later changed its course Near by the site of Fort Orleans, established by the French in 1723.

Brunton, Sir Thomas Lauder, 1844–1916, Scottish physician He was a lecturer at St Bartholomew's, London, from 1875 to 1904 He specialized in the action of drugs on the heart Among his works are a *Textbook of Pharmacology* (1885), *The Action of Medicines* (1897), and *Collected Papers on the Circulation and Respiration* (1906)

Brusa, Turkey see BURSA

Brusasorci, see RICCIO, DOMENICO

Brush, Charles Francis, 1849–1929, American scientist and inventor, b Euclid, Ohio, grad. Univ of Michigan (M E , 1869) Among the many devices invented by him, the most important was the Brush electric arc light, which was widely adopted for street lighting

Brush, George de Forest, 1855–1941, American painter, b Shelbyville, Tenn , pupil of GÉRÔME in Paris. His paintings of the North American Indian attracted notice in 1883, but he later devoted himself to figure compositions of children and family groups and to portraits His wife and children were usually the models He lived for many years in Dublin, N.H Among the best known of his works are the Indian pictures, *The Broken Silence*, *The Sculptor and the King*, and *Moose Chase* (National Gall , Washington, D C), *Mother and Child* (Mus of Fine Arts, Boston), *In the Garden* and a portrait of Henry George (Metropolitan Mus), *Mother and Children* (Pa Acad of the Fine Arts), *Mother and Child* (Corcoran Gall), *The Young Violinist* (Worcester Art Mus), and *Family Group* (Art Inst of Chicago)

Brush, shipping town (pop 2,481), NE Colo , on Beaver Creek near the South Platte river and NE of Denver, in a farm area, inc 1884 A beet-sugar factory is here

brush, implement used in applying liquids or paste and for removing dirt Materials include bristles, horsehair, soft hair, wire, feathers, whalebone, nylon, and vegetable fibers About 90 percent of brushes are made from bristles, largely produced in China and Russia Bristle is especially suitable for paintbrushes because the tip has a split end (flag), with a capacity for holding paint, and is tapered, providing elasticity Artists' brushes are made of soft hair derived, except for ox hair, from fur-bearing animals Camel's-hair brushes are made from the tail hair of Siberian squirrel Vegetable fiber, used in many cleaning brushes, includes istle (or Tampico) fiber from Mexican cactus plants, palmetto and palm fibers, the Southern American bahia, and rice root from Central America Brooms are long-handled brushes, usually made by securing the bleached and sorted twigs of the broomcorn about the end of a stick, then flattening the mass and stitching it to hold it in place Brushes are classified as simple, when composed of one tuft of material, and compound, when they consist of a series of tufts Tufts may be set in a cementing material or in vulcanized rubber, they are sometimes drawn through holes in the back, and the ends secured with wire or thread or dipped in pitch and tied, or they may be inserted into a handle and held by tying or by the contraction of the previously soaked handle Also known as a brush is a device made of carbon, copper, or some other conducting material which carries an electric current to and from a commutator or other rotating part of a motor or a generator

Brusilov, Aleksey Alekseyevich (ŭlyĭksyā' ŭlyĭksyĕ'yĭvĭch brōōsē'lŭf), 1853-1926, Russian general A commander in the First World War, he won victories in Galicia In 1916 the "Brusilov offensive" successful at first, exacted a heavy toll Brusilov was briefly commander in chief under the Kerensky regime (1917) and in 1920 commanded Soviet troops against Poland

Brussa, Turkey see BURSA

Brussels (brŭ'sulz), Flemish *Brussel* (brü'sul), *Bruxelles* (brüsĕl', brŭksĕl'), city (with suburbs pop c 960,000), capital of Belgium and of Brabant prov The core of the city is the commune of Brussels (pop 187,039), the other communes include Anderlecht, Ixelles, and Schaarbeek Brussels is officially bilingual (French and Flemish) Situated on the Senne, a tributary of the Dyle, and at the junction of the Charleroi-Brussels and Willebroek canals, Brussels is an important commercial, industrial, and cultural center Among its varied manufactures that of lace is the oldest and best known Brussels has a university (founded 1834), academies of arts, science, and medicine, a famous conservatory, and splendid art collections. Enclosed walled in the 10th cent , Brussels became, by the 13th cent , a center of the wool industry and in the 15th cent was made the capital of Brabant Emperor Charles V made Brussels the seat of Spanish (after 1714 Austrian) governors of the Netherlands. In 1561 the Willebroek Canal, connecting Brussels with the sea, was completed Renowned in the Middle Ages for the luxury and gaiety of its life, Brussels became in the late 16th cent. the grim center of the duque de Alba's re

of terror. The city was repeatedly besieged and taken in the wars of the 16th, 17th, and 18th cent. that were largely fought in the Low Countries. In 1789 it became the center of rebellion against Austrian rule in the Netherlands. Brussels was taken by the French under Dumouriez in 1792, evacuated in 1793, and retaken in 1794, during the Waterloo campaign (1815) it was Wellington's headquarters. In 1819 Brussels was made, with the Hague, the alternate meeting place of the Netherlands parliament, in 1830 it became the capital of independent Belgium. Brussels was occupied by the Germans from 1914 until the armistice of 1918 and from 1940 until its liberation by British troops in Sept., 1944. In both world wars it was cruelly oppressed by the occupation forces. The heroic stand of Cardinal Mercier and the help extended by the American minister, Brand Whitlock, during the First World War will long be remembered. Physically, Brussels suffered no damage in either war. The center and historical nucleus of the city is the celebrated Grand' Place. On it are the city hall (14th–17th cent.), the *Maison du roi* or *Broodhuis* (Renaissance), meeting place of the old States-General, the royal palace (18th cent., rebuilt 1904–12), and the parliament building (*Palais de la Nation*, 18th cent.). In its ensemble the Grand' Place is one of the finest monuments of medieval and Renaissance architecture. The Gothic Church of St Gudule was founded in the 11th cent. and rebuilt, after a fire, in the 13th, 14th, and 15th cent. Most of Brussels is modern, with broad boulevards circling the city along the former successive ramparts. However, numerous Renaissance and 18th-century mansions, guild houses, and churches have survived.

Brussels carpet see CARPET AND RUGS

Brussels lace see LACE

Brussels sprouts, variety of CABBAGE producing small edible heads, or sprouts, along the stem late in the growing season. It is cultivated like cabbage and has the same insect pests.

Brut, Brute (both brōōt), or **Brutus** (brōō'tŭs), a Trojan, legendary first king of Britain, descendant of Aeneas. His story appears in NENNIUS and in GEOFFREY of MONMOUTH, and his name gives the titles to long poems by WACE and LAYAMON.

Bruttium (brŭ'tēŭm), ancient region, S Italy, roughly occupying the present CALABRIA, the "toe" of the Italian peninsula. It faces Sicily across the Strait of Messina. Inhabited in the interior by Bruttii (whose chief town was Consentia) and by the Lucani, it was settled (8th cent. B.C.) along the coast by Greek colonists. SYBARIS and CROTONA were among the most prosperous towns of MAGNA GRAECIA. The Romans conquered Bruttium in the 3d cent. B.C. RHEGIUM and VIBO VALENTIA were important Roman cities of Bruttium. The region passed later to Byzantium and came to be Calabria.

Brutus (brōō'tŭs), in ancient Rome, a surname of the Junian gens. The name is said to have been given first to **Lucius Junius Brutus,** fl. 510 B.C., who feigned idiocy to escape death at the hands of Lucius Tarquinius Superbus (see TARQUIN). Roman historians tell how he led the Romans in expelling the Tarquins after the rape of Lucrece, how he became one of the first praetors (there were no consuls), and how he executed his sons for plotting a Tarquinian restoration. He was thus the founder of the Roman republic. **Decimus Junius Brutus Gallaecus** (dĕ'sĭmŭs, gălē'kŭs), fl. 138 B.C., consul, consolidated the province of Farther Spain (now S Spain) and stopped the inroads of Lusitanian tribesmen. **Marcus Junius Brutus,** d. c. 77 B.C., was a partisan of LEPIDUS in the struggle with CATULUS; POMPEY had him murdered. His wife Servilia was half sister of Cato of Utica. Their son **Marcus Junius Brutus,** 85 B.C.–42 B.C., was the principal assassin of Julius CAESAR. He sided with Pompey, but after PHARSALA, Caesar pardoned him, made him governor of Cisalpine Gaul (46 B.C.), and, in 44 B.C., urban praetor. Nevertheless, when CASSIUS was engineering his plot, he found Brutus a willing confederate. After the murder of Caesar, Brutus went east and, in the republican cause, joined Cassius and held Macedonia with him. Late in 42 B.C., Octavian (later AUGUSTUS) and Antony arrived, and a battle was fought at Philippi. When it went against the republicans, Brutus committed suicide. Brutus' wife Portia was daughter of Cato of Utica. Brutus had a contemporary reputation as a Stoic philosopher. His admirers regard him as a second Cato, driven reluctantly to commit murder in order to save the republic. His detractors, on the other hand, consider his unsavory reputation as a money lender and his friendship with the self-seeking Cassius as indicative of his true character. A lesser member of the conspiracy was **Decimus Junius Brutus,** d. 43 B.C., a partisan of Caesar against Pompey and a favorite of the dictator. Caesar gave him command in Gaul and appointed him to be his heir in case of Octavian's death. After Caesar's death, Brutus took the legions Caesar had given him and made good his appointment by Caesar as governor of Cisalpine Gaul. In 43 B.C., Antony, to whom the senate had assigned the province, besieged Brutus at Mutina (modern Modena). He tried to escape and was killed.

Brüx, Czechoslovakia see MOST.

Bruyn, Barthel Bartholomaeus (bür'tŭl bärtōlōmā'ōōs broin'), 1493–1555, the last important German painter of the school of Cologne. His early work is in the Flemish tradition, but he later adopted an Italianate style. Among his best works are *Woman with the Necklace* and *Adoration of the Magi*. His portraits are generally preferred to his religious paintings.

Bruyn, Cornelis de (kôr'nā"lĭs dŭ), 1652–1726?, Dutch portrait painter and traveler. He painted for some years in Italy, where he was known, in Rome, as Adonis. He is remembered chiefly for the records of his extensive travels in Egypt, Persia, India, and other lands, illustrated with his own designs.

Bry, Théodore de (tāōdôr' dŭ brē', brĭ'), 1528–98, Flemish engraver and publisher, b. Liége. He spent most of his life in Frankfurt-am-Main. He visited London, where he executed a series of 12 plates, *The Procession of the Knights of the Garter*, and another of 34 plates, *The Funeral of Sir Philip Sidney*. The British geographer Hakluyt assisted him in obtaining materials for an illustrated collection of voyages and travels, *Collectiones peregrinationum* (1590–1634). Bry also published a series of portraits of famous men and illustrated the works of Thomas Hariot and J. J. Boissard. His son **John Théodore de Bry,** 1561–1623, assisted him and continued or completed several of his works.

Bryan, Charles Wayland, 1867–1945, American politician, b. Salem, Ill. Educated at the Univ. of Chicago and Illinois College, he was for many years political secretary and business agent for his brother, William Jennings Bryan. He was publisher and associate editor of the *Commoner* (1901–23), mayor of Lincoln, Nebr. (1915–17, 1935–37), and governor of Nebraska (1923–25, 1931–35). In 1924 he ran for Vice President on the Democratic ticket headed by John W. Davis.

Bryan, William Jennings, 1860–1925, American political leader, b. Salem, Ill., grad. Illinois College, 1881, and Union College of Law, Chicago, 1883. He practiced at Jacksonville, Ill., until removing, in 1887, to Lincoln, Nebr. Bryan was a U.S. Representative from 1891 to 1895 but was defeated for the U.S. Senate in 1894. The next two years he spent as editor in chief of the Omaha *World-Herald*. Having ardently identified himself with the silver forces in Congress, he became their most popular speaker in a preconvention drive to control the Democratic national convention at Chicago in 1896. There were quiet plans and hopes to nominate him for President. At the convention his famous "Cross of Gold" speech so swayed the delegates that his nomination was assured, even though he was only 36 years old. The POPULIST PARTY also nominated him, but the conservative, gold Democrats ran John M. Palmer. The chief issue of the campaign was Bryan's proposal for free and unlimited comage of silver, which he thought would remedy the economic evils then plaguing farmers and workers. Bryan in strenuous tours extending over 18,000 mi made some 600 speeches for the silver cause, but lost to the Republican William McKINLEY, whose campaign was cleverly managed by Marcus A. HANNA. He turned to the Chautauqua platform and afterwards spent a season on the road nearly every year, appealing for reforms and causes close to his heart. He controlled the Democratic convention in 1900 and saved the silver plank from removal by the East, though agreeing to put the campaign emphasis on anti-imperialism. Defeated again by McKinley, Bryan in 1901 started the *Commoner*, a weekly which was circulated and quoted widely and kept him before the people. His reduced party power in 1904 resulted in the compromise nomination of Alton B. PARKER, a conservative New Yorker, upon a platform dictated by Bryan. Parker, however, disavowed the silver plank and Bryan unwillingly acquiesced. Parker's overwhelming defeat by Theodore Roosevelt turned the Democrats again to Bryan, who in 1908 was nominated a third time. Issues were confused, and the country elevated Roosevelt's candidate, William H. TAFT, to the presidency. The last Democratic convention in which Bryan played a dominant role was that of 1912, when, because Eastern money interests supported Champ CLARK, he switched his support to Woodrow WILSON, who thereby won the nomination. Upon his election Wilson named Bryan Secretary of State. Bryan was influential in holding the Democrats together for enacting the reform measures of the first 18 months of Wilson's administration. He had little previous experience in foreign affairs but studied international questions conscientiously. With some 30 nations he negotiated treaties providing for investigation of all disputes. They featured a war-delaying plan of his own devising, which, however, was disrupted without a fair test by the First World War. He wanted the plan applied to the American dispute with Germany over the *Lusitania* incident, but Wilson, supported by the rest of his cabinet, sidetracked it as a weak policy. Anti-war leanings made Bryan more conciliatory than Wilson toward Germany. His policies in Latin America caused a good deal of friction, particularly the plans in Nicaragua. Disliking the warlike tone of the second *Lusitania* note, drafted by Wilson, he resigned on June 9, 1915, rather than sign it. However, he supported Wilson in the 1916 election and after war was declared. In the 1920 Democratic convention at San Francisco he fought in vain for a prohibition plank and in 1924 at New York city he supported William G. McAdoo against Alfred E. Smith, but he was no longer the party's leader. In his later years Bryan, a Presbyterian, devoted himself to the defense of FUNDAMENTALISM in characteristic loyalty to the religious beliefs on which he had been nurtured. His militancy was one reason for the increased popular attention given to the modernist-fundamentalist controversy, which subsided soon after his death. He addressed legislatures urging measures against teaching evolution and appeared for the prosecution in the famous SCOPES TRIAL in Tennessee, where such a law had been passed. With Clarence Darrow as attorney for the defense, the proceedings attracted nationwide attention. Five days after the trial, Bryan died in his sleep. Although the nation consistently rejected Bryan for the presidency, it eventually adopted many of the reforms he urged—the income tax, popular election of Senators, woman suffrage, public knowledge of newspaper ownership, and prohibition. In his prime a handsome man, personally charming, and with a voice that made him the greatest orator of his day, he was idolized by the masses (especially in the West), for whom he truly spoke. Conservatives held him in contempt while fearing his popular appeal. Yet he was no demagogue. He advocated only causes, whatever their merit, which he himself believed in and none other. Had it not been for this deep-rooted integrity he may well have been President. See the memoirs (1925), begun by Bryan and finished by his widow, biographies by J. C. Long (1928), M. R. Werner (1929), Paxton Hibben (1929), and W. C. Williams (1936), C. M. Rosser, *The Crusading Commoner* (1937).

Bryan. **1** City (pop. 5,404), co. seat of Williams co., NW Ohio, NNW of Defiance, in a trade and industrial area, laid out 1840, inc. as a village 1841, as a city 1941. Lubricating equipment and advertising novelties are made here. **2** City (1940 pop. 11,842, 1947 estimated pop. 17,000), co. seat of Brazos co., E central Texas, NW of Houston. Founded in 1865 in a region of big plantations, it was long a cotton center. Now alfalfa, truck, dairy, and poultry farms occupy much land. Bryan processes cotton and lumber and makes insecticides. Allen Academy, a military school for boys, is here, and College Station (with the Agricultural and Mechanical College of Texas) is near by.

Bryansk (brĭänsk'), city (pop. 87,473), capital of Bryansk oblast, W European RSFSR, on the Desna river and 210 mi SW of Moscow. It is a center of river and rail transportation and forms an important industrial district with near-by BEZHITSA. There are foundries, ironworks, sawmills, and other plants. Originally named Debryansk, the city was first mentioned in 1146. It was for a time the capital of a principality, later passed to Lithuania, and in the 16th cent. was annexed to Muscovy. In the Second World War, Bryansk and Vyazma were anchor points of a huge German "pincer movement," designed to trap several Russian armies. The operation (Oct., 1941) was only partially successful. Bryansk was retaken by Russian troops in 1943.

Bryant, William Cullen, 1794–1878, American poet and newspaper editor, b. Cummington, Mass. Admitted to the bar in 1815 after a year at Williams College and private study, he practiced law in Great Barrington, Mass., until in 1825 he went to New York. He was already known as a nature poet because of his "Thanatopsis," written in 1811 and published in the *North American Review* in 1817, his "To a Waterfowl," "Inscription for the Entrance to a Wood," and "The Yellow Violet," all written before he was 21. He became associate editor of the New York *Evening Post* in 1826, and from 1829 to his death he was part owner and editor in chief, assisted by John Bigelow, Parke Godwin, and others. His paper, famous for literary correctness, was a leading free-trade, antislavery journal. The busy editor also traveled widely, made many public speeches, and wrote such well-known poems as "The Death of the Flowers," "To the Fringed Gentian," and "The Battle-field." His blank-verse translation of the *Iliad* came out in 1870, and of the *Odyssey* in 1872. The selection from his works edited by Tremaine McDowell (1945) contains a critical bibliography. See biographies by Parke Godwin (1883), John Bigelow (1890), and W. A. Bradley (1905), Allan Nevins, *The Evening Post* (1922).

Bryaxis (brĭăk'sĭs), 4th cent. B.C., Greek sculptor. With Scopas, Leochares, and Timotheus, he was employed, c. 350 B.C., upon the sculptures of the Mausoleum at Halicarnassus. Among other works attributed to him were several statues, including one of Apollo in the grove of Daphne, near Antioch. In 1891 at Athens his signature was discovered on a base for a tripod. The base is sculptured in relief with figures of horsemen.

Bryce, David, 1803–76, Scottish architect Foremost architect of his time in Scotland, he designed important buildings in most of the larger towns His earlier works, such as the Bank of Scotland in Edinburgh, were chiefly in the Palladian manner, but he later devoted himself to that variety of the Gothic style which he naturalized under the name Scottish Baronial and in which he executed many country houses and such public buildings as Fettes College and the Royal Infirmary at Edinburgh

Bryce, James Bryce, Viscount, 1838–1922, English historian, statesman, diplomat, and jurist, b Belfast, Ireland After his education at the Univ of Glasgow and at Trinity College, Oxford, he practiced law in London for a short time before becoming professor of civil law at Oxford The breadth of his knowledge and the diversity of his interests were remarkable not only for his own but also for any time He was able to write monumental works in several fields and at the same time to live a life that was distinguished for achievements in action and for a host of rewarding friendships The first of his monumental works was his *History of the Holy Roman Empire* (1888), which synthesized a thousand years of history in one volume so competently and accurately that the book is still widely used He entered on a political career and became one of the leaders (both in thought and action) of the Liberal party He occupied a variety of posts, including the presidency of the Board of Trade and the chief secretaryship of Ireland His interest in politics ran deep into sociology and philosophy, and no better proof of his great understanding could be found than the second of his great treatises, *The American Commonwealth* (2 vols., 1888), a classic that is still read and used because the principles of democracy and the fundamental concepts of the American way of life were so clearly and judiciously set forth that the events of more than a half century have not altered their truth It is small wonder that as ambassador to the United States (1907–13) he was one of the most popular ever to be in Washington, since his knowledge of the weakness and the strength of the Americans was profound Another thoroughgoing study of modern political ideas was his *Modern Democracies* (2 vols , 1921) In law, his *Studies in History and Jurisprudence* (1901) is a major work because it also has the wide view of liberal principle Even his leisure-time activities yielded fruit, and his accounts of travel and mountain climbing, such as *Transcaucasia and Ararat* (1877), *Impressions of South Africa* (1897), and *South America* (1912), have a charm lacking in his weightier volumes See biography by H A L Fisher (1927); *Bryce's American Commonwealth Fiftieth Anniversary* (commemorative essays, 1939)

Bryce Canyon National Park. see NATIONAL PARKS AND MONUMENTS (table).

Bryhtnoth: see BYRHTNOTH

Brymner, William, 1855-1925, Canadian figure and landscape painter, b Scotland, studied in Paris He went to Canada with his parents in 1857 He was president of the Royal Canadian Academy from 1909 to 1918 and was headmaster of the Montreal Art Association Schools

Brynhild: see BRUNHILD

Bryn Mawr (brĭnmär'), unincorporated village (pop 4,777), SE Pa , a residential suburb of Philadelphia Harcum Junior College is here **Bryn Mawr College** (nonsectarian, for women, chartered 1880) was opened by Quakers in 1885 with a large bequest from Joseph W Taylor of Burlington, N J It opened with a group curriculum plan modeled on Johns Hopkins and with a pioneer graduate school for women Social economics and social research have always been stressed M. Carey THOMAS was a noted president (1894–1922)

Bryson, Lyman, 1888–, American educator, b Valentine, Nebr , grad Univ of Michigan (B A , 1910, M A , 1915) He taught there from 1913 to 1917 From 1918 to 1924 he was active in Red Cross work. He was appointed professor at Teachers College, Columbia Univ , in 1935 after serving one year as a visiting professor, and during the Second World War he worked in the Office of War Information. Consultant on public affairs for the Columbia Broadcasting System, he has been instrumental in popularizing such forms of adult education as the public forum Among his books are *Adult Education* (1936), *Which Way America?* (1939), *The New Prometheus* (1941), and *Science and Freedom* (1946)

Bryson City, town (pop 1,612), co seat of Swain co., extreme W N C , in the Great Smoky region, WSW of Asheville and on the Tuckasegee near the Tenn. line It is a tourist center, with lumbering, mining, and farming in the region

Brythonic (brĭthŏn'ĭk), group of Celtic languages of the Indo-European family It includes Welsh and Breton and the extinct Cornish. See LANGUAGE (table).

Bryusov, Valery Yakovlevich (vŭlyĕ'rē yä'kŭvlyĭvĭch brĭōō'sŭf), 1873–1924, Russian poet, novelist, critic, and translator He was the spearhead of the symbolist movement and the mentor of Bely and Blok Of his poetry, *Stephanos* (1906) is perhaps best known. *The Fiery Angel* (1903) and *Altar of Victory* (1913) are novels *The Republic of the Southern Cross and Other Stories* (1918) contains translations of some of his short stories For translations of his poems, see Babette Deutsch, *Russian Poems* (1927)

Brzeg, Silesia see BRIEG

Brzesc nad Bugiem: see BREST, Belorussia

Bubastis (bōō'băs'tĭs), ancient city, NE Egypt, near the modern Zagazig Capital of Egypt in the XXII and XXIII dynasties, it early reached its full glory under Sheshonk I Its decline became ruinous after the second Persian conquest (343 B C) Bubastis was the center of the worship of the lion-headed (or cat-headed) goddess Bast In the time of Herodotus it had an annual saturnalia As Pi-beseth, Bubastis is mentioned in Ezek 30.17. Excavations were made in 1886 and 1887.

bubonic plague · see PLAGUE

Buçaco, Portugal see BUSSACO

Bucaramanga (bōō"karamäng'gä), city (1938 pop 41,714), N central Colombia Founded in 1622 in the eastern highlands of the Andes, Bucaramanga developed after 1880 as a coffee center Cacao, tobacco, and cotton are raised in the region at lower altitudes Textiles and straw hats are manufactured A railroad to the Magdalena river and highways linking the city with the chief highland towns between Bogotá, the capital, and Venezuela have made Bucaramanga a leading commercial center

Bucareli y Ursúa, Antonio María (äntō'nyō märē'ä bōōkärā'lē ē ōōrsōō'ä), 1717–79, Spanish colonial administrator He served in the army and as governor of Cuba before succeeding the marqués de CROIX as viceroy of New Spain (1771–79) His administration, one of the most popular in Mexico, brought peace and prosperity

buccaneer: see PIRACY

Bucephalus (būsĕf'ŭlus), horse ridden by Alexander the Great Stories are told of his fire and speed and of Alexander's devotion to him Bucephalus died at the age of 30

Bucer or Butzer, Martin (bōō'sûr, bōōt'sûr), 1491–1551, German Protestant reformer His original name was Kuhhorn [cow's horn], of which Bucer is a Greek translation At 14 years of age he joined the Dominican order, and he studied at Heidelberg, where he heard (1518) Luther in his public disputation on the doctrine of free will Influenced by the reformist thought, Bucer left the order and accepted a pastorate at Landstuhl In 1523 he entered upon the work of the Reformation in Strasbourg—preaching, writing, and helping to lay the foundations of the Protestant educational system Many of his activities were devoted to attempts to reconcile the differences in regard to the Eucharist (see LORD'S SUPPER) which divided the Lutherans from the Swiss and South German reformers Bucer's position was close to that of the Swiss leader, Zwingli, and in this as in other doctrinal matters he is credited with a spiritual kinship to Calvin In spite of his desire for unity Bucer rejected the Augsburg Confession (see CREED), drawn up in 1530 in the hope of achieving religious peace It was not until a personal meeting with Luther in 1536 that, in the Wittenberg Concord, Bucer was successful in securing agreement on the Eucharist among himself, Luther, and the reformers of S Germany. When Bucer failed to subscribe to the Augsburg Interim (1548), a compromise between Catholics and Protestants proposed by Charles V, he found it expedient to accept the invitation of Cranmer and moved to England There, highly honored, he taught at Cambridge and tutored Edward VI, at whose request he wrote *De regno Christi* See Hastings Eells, *Martin Bucer* (1931), Constantin Hopf, *Martin Bucer and the English Reformation* (1946)

Buch, Christian Leopold, Freiherr von (krĭs'tyän lā'ōpōlt frī'hĕr fŭn bōōkh'), 1774–1853, German geologist and paleontologist A student of A G Werner at the mining academy in Freiberg, he became one of the most influential geologists of his age He is noted especially for his study of the role of volcanic activity in the formation of the earth's surface. He made (1826) a valuable geological map of Germany

Buchan, Alexander (bū'kun, -khun), 1829–1907, Scottish meteorologist Educated at Edinburgh, he taught from 1848 to 1860, his works include *The Handy Book of Meteorology,* (1867) In 1878 Buchan became curator of the library and museum of the Royal Society of Edinburgh He was responsible for founding the observatory on Ben Nevis (1883)

Buchan, Elspeth (Simpson), 1738–91, Scottish religious enthusiast, founder of a small sect called Buchanites Leaving her husband, Robert Buchan, in 1781, she went to Irvine, where Hugh White, a minister, and several others accepted her claims to be a prophetess and adopted (1783) her fantastic religious views In 1784 they were expelled from the town A company numbering 46, they settled on a farm at New Cample. Mrs Buchan was called "spiritual mother" and professed that she could bestow the Holy Spirit by breathing upon candidates. The last Buchanite died in 1848 See Joseph Train, *The Buchanites from First to Last* (1846).

Buchan, John, 1st Baron Tweedsmuir (twēdz'mûr), 1875–1940, Scottish author and statesman He was educated at Glasgow Univ and Oxford and became a lawyer A member of the publishing firm of Thomas Nelson & Sons and director of Reuters news service, he was director of information in the First World War, of which he wrote a four-volume history (1921–22) He wrote biographies of Montrose (1913), Scott (1923), Cromwell (1934), and Augustus (1937) and many adventure novels, including *The Thirty-nine Steps* (1915), *Greenmantle* (1916), *The Three Hostages* (1924), and *John Macnab* (1925) A member of Parliament for the Scottish universities from 1927, he was appointed governor general of Canada in 1935 and was raised to the peerage His administration was popular, and he promoted good relations with the United States He died in office See his autobiographical *Pilgrim's Way* (1940)

Buchan (bū'khun, -kun), district along the rocky coast of E Scotland, in Aberdeenshire and Banffshire, between the Deveron and the Ythan Buchan Ness is the easternmost promontory of Scotland The Bullers (boilers) of Buchan is a well-like stone formation of the coast, into which the ocean rushes with the flow of the tide and for which a near-by coast village is named

Buchanan, Franklin (būkă'nŭn), 1800–1874, American naval officer, b Baltimore Appointed a midshipman in 1815, Buchanan rose to be a commander in 1841 He was chief adviser to Secretary of the Navy George BANCROFT in planning the U S Naval Academy at Annapolis and was its first superintendent (1845–47), resigning to fight in the Mexican War He commanded the *Susquehanna,* flagship of Matthew C Perry, in the expedition to Japan (1852–54) Buchanan was a captain in the U S. navy when he resigned in April, 1861 In September he took the same rank in the Confederate navy With his flagship the ironclad *Virginia* (formerly the *Merrimac*) he attacked and destroyed two of the wooden vessels of the Union blockading squadron in Hampton Roads (March 8, 1863) He was wounded in that engagement and had no part in the epochal battle of the MONITOR AND MERRIMAC the next day Promoted admiral, Buchanan was ranking officer in the Confederate navy With the ironclad ram *Tennessee* as his flagship he fought heroically against David G FARRAGUT in the battle of Mobile Bay (Aug 5, 1864), but was finally forced to surrender After the war he was for a time president of Maryland Agricultural College See biography by C. L. Lewis (1929)

Buchanan, George, 1506–82, Scottish humanist He lectured at Bordeaux and Coimbra and, returning to Scotland in 1561, tutored Queen Mary in languages He enjoyed her favor until the murder of Darnley, when he repudiated the queen and joined the opposite party From 1570 he was tutor for James VI and also for several years was keeper of the privy seal His works include Latin poems, plays, and many treatises His most important works are *De jure regni apud Scotos* (1579) and *Rerum Scotticarum historia* (1582) See biographies by David Irving (1805) and P Hume Brown (1890)

Buchanan, James, 1791–1868, 15th President of the United States (1857–61), b near Mercersburg, Pa , grad Dickinson College, 1809 He was the only bachelor and the only Pennsylvanian to be President He read law at Lancaster, Pa , where he afterward practiced From law he went into state politics, then entered the national scene as Congressman (1821–31), and was later minister to Russia (1832–34) and Senator (1834–45) Early a Federalist, he was later a conservative mainstay of the Democratic party He served (1845–49) as Secretary of State under J K Polk, and though Polk exercised a strong personal hand in foreign affairs, Buchanan ably seconded his efforts The quarrel with Great Britain over OREGON was settled peacefully That with Mexico after the annexation of Texas led, after the failure of the mission of John SLIDELL, to the Mexican War and the Treaty of Guadalupe Hidalgo (1848) Under President Franklin Pierce, Buchanan was (1853–56) minister to Great Britain He collaborated with Pierre SOULÉ, minister to Spain, and John Y MASON, minister to France, in drawing up the OSTEND MANIFESTO (1854), which was promptly repudiated by the U S Dept of State His open advocacy of acquiring Cuba (which would presumably have come into the Union as a slave state) won him the hatred of the ABOLITIONISTS, whom he in turn despised as impractical troublemakers He was nominated as a Democratic candidate for the presidency in 1856, with John C BRECKINRIDGE as his running mate, and he won the election over John C Frémont, the candidate of the young Republican party, and Millard Fillmore, candidate of the Whig and Know-Nothing parties Buchanan did not have the majority of the popular vote, and his moderate views were disliked and mistrusted by extremists both in the North and in the South Though he attempted to keep the "sacred balance" between proslavery and antislavery factions, in his administration the United States plunged down through conflict toward the armed strife of the Civil War. Buchanan, who disapproved of slavery

as morally wrong, felt that under the Constitution slavery had to be protected where it was established and that the inhabitants of a new territory should decide whether that territory should be free or slave. He angered many in the North by renewed efforts to purchase Cuba and by favoring the pro-slavery Lecompton Constitution in KANSAS As his administration drew to a close, after the election (1860) of Abraham Lincoln to succeed him as President, Buchanan was faced with the secession of the Southern states Very learned in constitutional law, he maintained that no state had the right to secede but he held, on the other hand, that he had no power to coerce the erring states He believed that the Federal government was authorized to use force only in protecting Federal property and in collecting customs Therefore the question of the Federal forts in Southern states became of great importance Buchanan tried desperately to keep peace and promised South Carolina Congressmen that no hostile moves would be made as long as negotiations were in progress When Major Robert Anderson moved U S troops from Fort Moultrie to Fort Sumter, there was an outcry from South Carolina that the President's promise had been broken Buchanan defended Anderson but, reluctant to act, sent supplies to Fort Sumter only belatedly He was battered with criticism from North and South, and shortly after his administration ended, gunfire at Fort Sumter commenced the war All Buchanan's efforts were lost Many recent historians consider Buchanan's constitutional views as sound, and all admire his sincerity and his valiant efforts for peace The home outside Lancaster, "Wheatland," occupied by Buchanan and by his niece, Harriet Lane, who was also his White House hostess, was made a public shrine in 1937 John Bassett Moore edited his works (12 vols, 1909–11) See biography by G T Curtis (1883).

Buchanan, Robert Williams, 1841–1901, English novelist, poet, and dramatist, b Staffordshire, educated in Glasgow Although his *London Poems* (1866) established his reputation, much of his best work was in the Celtic vein of *North Coast Poems* (1868) In 1871 he attacked the pre-eminence of the Pre-Raphaelites in an article, "The Fleshly School of Poetry," but was later reconciled to Dante Gabriel Rossetti Of Buchanan's many successful plays, several were dramatizations of his novels, such as *The Shadow of the Sword* (1876)

Buchanan, 1 City (pop 4,056), SW Mich, near the Ind line, platted 1837, inc as a village 1863, as a city 1929 Automobile parts are made here Numerous Indian village sites and mounds are near by 2 Village (pop 1,600), SE N Y, in Westchester co, near Peekskill, inc 1928

Buchans, town (1945 pop 1,399), N F, in the interior, W of Grand Falls It has a large mine yielding lead, silver, zinc, and copper

Bucharest (bo͞o'kŭrĕst, bū'–), Rumanian *Bucuresti* (bo͞okō͞orĕsht'), city (pop 886,110, with suburbs 1,041,807), capital and largest city of Rumania, in Walachia, on the Dambovita, a tributary of the Danube It is the chief commercial and manufacturing center of Rumania and the seat of the patriarch of the Rumanian Orthodox Church It has a university, founded in 1864, and several academies and scientific institutes Of obscure origin, the city rose to importance in the 14th cent, when it became a residence of the Walachian princes It became the capital of Walachia in the 19th cent only Bucharest was occupied (1916–18) by the Central Powers in the First World War After the Rumanian surrender to the Allies (Aug, 1944) in the Second World War, the capital was severely bombed by German planes, Russian troops entered on Aug. 31 A city of contrasts, Bucharest was famous in the late 19th and early 20th cent for its palatial public buildings, theaters, and hotels, standing side by side with destitute hovels, and for the gilded vice that flourished amid the misery of the polyglot populace

Buchenwald (bo͞o'khənvält"), forest, Thuringia, central Germany, near Weimar It was the site of a CONCENTRATION CAMP set up by the Hitler regime

Buchholtz, Johannes, 1882–1940, Danish novelist, noted for his stories of small-town life His books include *Egholm's God* (1915), *The Saga of Frank Dover* (1933, Eng tr, 1938), and *Vanda Wenzel* (1939)

Buchman, Frank Nathan Daniel (bo͞ok'mən), 1878–, American evangelist, b Pennsburg, Pa, grad Muhlenberg College, 1899 The internationally known movement of which he is leader is variously called First Century Christian Fellowship, Oxford Group, Moral Re-Armament (often known as MRA), and Buchmanism Buchman was ordained in the Lutheran ministry in 1902 He was in charge (1905–15) of religious work at Pennsylvania State College. In 1921 Buchman, after five years of extension lecturing for the Hartford Theological Foundation, visited England There he preached "world-changing through life-changing" among the students at Oxford Univ, hence the name Oxford Group. In 1938 he instituted a campaign known as Moral Re-Armament The work of evangelism for personal and national spiritual reconstruction is conducted informally and intimately in groups gathered in educational institutions, in church congregations, or in homes "House parties" take the place of conferences, and religious experiences are shared in personal confessions The evangelists stress absolute honesty, purity, love, and unselfishness The work has spread to more than 50 countries; a world assembly for Moral Re-Armament was held in 1948 See Buchman's *Remaking the World* (1949 ed), C. I Benson, *The Eight Points of the Oxford Group* (1936); Emil Brunner, *The Church and the Oxford Group* (1937), A W Ester, *Drawing-Room Conversion* (1950)

Buchner, Eduard (ā'dōōärt bo͞okh'nûr), 1860–1917, German chemist He taught at Berlin, Breslau, and, from 1911, at Würsburg He discovered (1896) that alcoholic fermentation of sugars is caused by yeast enzymes and not by the cells themselves Zymase, part of the enzyme system causing fermentation, was discovered by him in 1903 For this work he received the 1907 Nobel Prize in Chemistry.

Büchner, Georg (gā'ôrk bükh'nûr), 1813–37, German dramatic poet He was a student of medicine and natural sciences but was concerned with political agitation Dying at 24, he left a powerful drama, *Danton's Death* (1835), a comedy, *Leonce and Lena* (1879), the fragments of a tragedy, *Wozzeck* (1879), from which Alban Berg derived his opera, and a *Novelle, Lenz* [spring], which is an analysis of his disturbed mental state His three plays were published in English in 1928

Büchner, Ludwig (lo͞ot'vĭkh), 1824–99, German philosopher and physician After being forced to leave his position as instructor at Tübingen because of his philosophical views, he devoted himself to medicine and writing His doctrine was an extreme materialism developed in protest to idealistic metaphysics Among his works were *Kraft und Stoff* (1855, Eng tr, *Force and Matter*, 1864), *Natur und Geist* [nature and spirit] (1857), and *Darwinismus und Socialismus* (1894)

Buck, Carl Darling, 1866–, American philologist, b Orlando, Maine, grad Yale (B A, 1886, Ph D, 1889) He taught at the Univ of Chicago from 1892 to 1933 His *Grammar of Oscan and Umbrian* (1904) is still authoritative

Buck, Dudley, 1839–1909, American composer, organist, and teacher, b Hartford, Conn He was organist of various churches in Hartford, Chicago, Boston, and New York He had great influence on American church music, through his organ recitals, his *Motette Collection* (1864), his technical manual, *Illustrations in Choir Accompaniment* (1877), and his compositions, effective but not difficult, including a midnight service for New Year's Eve, the 46th Psalm, cantatas, and anthems Secular choral works include *The Nun of Nidaros* (1879) and *King Olaf's Christmas* (1881), based on *The Saga of King Olaf* by Longfellow, *Scenes from the Golden Legend* (1879), also from Longfellow, and two settings from works of Washington Irving He also composed organ music and a symphonic overture (1880) to Scott's *Marmion*

Buck, Leffert Lefferts, 1837–1909, American civil engineer, b Canton, N Y, grad St Lawrence Univ, 1863 He designed many notable bridges, including the Verrugas viaduct near Lima, Peru; two bridges at Niagara Falls, the Columbia river railroad bridge at Pasco, Wash, and the Williamsburg Bridge in New York city

Buck, Pearl (Sydenstricker), 1892–, American novelist, b Hillsboro, W Va, grad. Randolph-Macon Woman's College, 1914 Until 1934 she lived largely in China, where she, her parents, and her first husband, John Lossing Buck (from whom she was later divorced), were missionaries Her first novel, *East Wind West Wind* (1930), was followed by *The Good Earth* (1931), which won the Pulitzer Prize *The Exile* (1936) and *Fighting Angel* (1936) are biographies of her mother and her father In 1935 she married Richard J Walsh Recipient of the 1938 Nobel Prize in Literature, she has continued writing novels, such as *The Patriot* (1939), *Dragon Seed* (1942), and *Peony* (1948) Her work has contributed to racial tolerance and Western understanding of Oriental customs and problems See biography by Cornelia Spencer, *The Exile's Daughter* (1944)

bucket shop, primarily an organization posing as a commission brokerage house, dealing in stocks, grain, cotton, and similar commodities, the trades ostensibly made are not actually executed, and prices charged and payments made are based only on current quoted prices It is thus strictly a gambling institution Unlike reputable firms, the bucket shop keeps the total amount of the interest it charges customers for purchases on margin, avoids the cost of agents or representatives on the floor of the exchange, and may also manipulate purchase and sale prices to its advantage in various ways "Bucketing" was especially prevalent in the depression of 1921–22, but has largely disappeared with increased regulation of stock-exchange practices. See S S Huebner, *The Stock Market* (1939)

Buckeye, town (pop 1,305), S central Ariz, W of Phoenix, in an irrigated farm area, inc 1929

buckeye, any of several trees or shrubs of the genus *Aesculus*, native to the Northern Hemisphere Although the leaves and seeds are poisonous, the large, round, eyelike nuts were used for food by Indians after thorough roasting or leaching A buckeye nut is still carried by some rural people as a good-luck charm or a folk cure for certain ailments The wood is light, weak, and soft, but is used for many purposes, including woodenware, pulp, and lumber Ohio is called the Buckeye State from the prevalence of the Ohio buckeye, *Aesculus glabra*. Buckeyes usually have five leaflets, as distinguished from the closely related horse chestnut, which normally has seven

Buckhannon (bŭk"hăn'un), city (pop 4,450), co seat of Upshur co, N W Va, on the Buckhannon river and S of Clarksburg, in a cattle and mineral region, settled 1770 West Virginia Wesleyan College (coeducational) is here

Buckholdt, Johann: see JOHN OF LEIDEN

Buckie, burgh (pop 8,689), Banffshire, Scotland, on the south shore of Moray firth W of Banff It is an important fishing center, especially for herring

Buckingham, dukes of (Stafford line) see STAFFORD

Buckingham, George Nugent Temple Grenville, 1st **marquess of** see GRENVILLE

Buckingham, George Villiers, 1st **duke of** (vĭl'yûrz bŭ'kĭng-um), 1592–1628, English nobleman He arrived at the English court (1614) as James I was tiring of his favorite, Robert Carr, earl of Somerset Villiers was made a gentleman of the bedchamber (1615) and after Somerset's disgrace rose rapidly, becoming earl of Buckingham (1617), marquess (1618), and lord high admiral (1619) In 1620 he married Lady Katherine Manners, who was daughter of the earl of Rutland and was inclined to Roman Catholicism By this time Buckingham dispensed the king's patronage, when Parliament in 1621 protested the abuses of monopolies by his brothers and followers, Buckingham agreed in the censure but prevented possible punishment—a service he was unable to perform for his friend Francis BACON When negotiations dragged for the proposed marriage of Charles, prince of Wales, and the Infanta Maria of Spain, Buckingham, who favored the match, went to Spain with the prince incognito There they found Spanish demands impossible to meet, and on their return Buckingham was a hero in England for having prevented the unpopular marriage and was made a duke He promoted war with Spain and persuaded James to disregard Parliament's religious restrictions on the proposed match of Charles with Henrietta Maria, sister of Louis XIII of France In support of FREDERICK THE WINTER KING, he hired Graf von Mansfeld to lead troops against the emperor in the Palatinate in the Thirty Years War, but then did not supply him adequately and was held responsible for the expedition's utter failure After the accession of Charles I, Buckingham was still the favorite, and the virtual dictator of English affairs Parliament resented his power, and after the complete failure of an expedition against Cádiz, Buckingham was impeached, and Charles dissolved Parliament to prevent his trial After the disastrous failure (1627) of Buckingham's attempted relief of the Huguenots on the Isle of Ré off La Rochelle, Charles had to prorogue his 1628 Parliament to still the remonstrance against the duke Buckingham was at Portsmouth preparing to sail again for La Rochelle when he was killed by John Felton, a discontented naval officer The romantic aspects of the duke's career figure largely in Alexander Dumas's historical novel, *The Three Musketeers* See biographies by C R Cammell (1939) and Hugh Ross Williamson (1940)

Buckingham, George Villiers, 2d **duke of,** 1628–87, English courtier, son of the 1st duke Brought up with the royal family and educated at Cambridge, he was a strong royalist in the civil war He took part in the royalist rising of 1648 and escaped to the Continent, where he was a privy councilor of the exiled Charles II. He fought for the king in the defeat at Worcester (1651) but later intrigues with Cromwell's government estranged him from Charles Buckingham's estates were confiscated in 1651 In 1657 he returned to England and married Mary, the daughter of the Puritan lord and general, Thomas FAIRFAX, and was consequently imprisoned until 1659 He served with Fairfax against John Lambert in 1660, but after the Restoration he regained the favor of Charles II and was one of the most powerful courtiers of the reign His career was still adventurous and troubled, disturbed by his own quarrelsome temper, recklessness, and dissoluteness of life He was a member of the CABAL (1667–73), was furious when he was kept in ignorance of the secret provisions of the Treaty of Dover (1670) with Louis XIV, and was even more offended by the loss of his military command in 1673 Parliament reprimanded him for his open liaison with the countess of Shrewsbury, and in 1674 Charles dismissed him He opposed the duke of York (later James II) and joined vigorously in the cry against the Catholic victims of the Titus Oates plot (though he had earlier been much in favor of religious tolerance), but he managed not to vote for exclusion of the duke of York from succession to the throne and in 1684 was restored to favor He showed the good

as well as the bad aspects of the Restoration courtier· he patronized science and learning, had exquisitely refined tastes, and wrote poetry, religious tracts, and plays He was the chief author of a celebrated satire on heroic drama, *The Rehearsal* (1671, ed by Montague Summers, 1914), directed in its later version against John Dryden See biography by Lord Burghclere (1903)

Buckingham (bŭ'kĭnghăm, bŭ'kĭng-ŭm), town (pop 4,516), SW Que , on the Lièvre river and E of Ottawa.

Buckingham (bŭ'kĭng-ŭm), municipal borough (pop 3,083), Buckinghamshire, England Stowe School (1923), a public school for boys, occupies the seat of the former dukes of Buckingham

Buckingham Palace (bŭ'kĭng-um), London residence of British sovereigns from 1837, adjacent to St James's Park Built (1703) by the duke of Buckingham on the site of a mulberry grove, it was purchased (1761) by George III and was remodeled (1825) by John Nash, the eastern façade was added by Edward Blore in 1847 The great ballroom was added in 1856, and in 1913 Sir Aston Webb designed a new front The palace contains a collection of paintings, including many royal portraits, by noted artists Damage was done by air raids in 1940-41 and by a robot bomb in 1944

Buckinghamshire (bŭ'kĭng-ŭmshĭr), **Buckingham,** or **Bucks,** inland county (749 sq mi , 1931 pop 271,586, 1948 estimated pop 372,085), S central England The county town is Aylesbury The chief rivers are the Thames, which forms the southern boundary, the Ouse, and the Thame In the southern part of the county are the chalky Chiltern Hills with their beech forests, and to the north lies the fertile Vale of Aylesbury The region is chiefly agricultural Cattle and sheep are raised There are miscellaneous small manufactures Roman and pre-Roman remains are extensive, the ancient Icknield Street and Watling Street crossed the county The region was part of the Anglo-Saxon kingdom of Mercia, but the boundaries of the modern shire were definitely established by the time of the Norman Conquest There are numerous literary associations at Stoke Poges, Thomas Gray is buried in the country churchyard that inspired his "Elegy," Milton had a cottage for a time at Chalfont St Giles, and William Cowper lived for many years at Olney See the *Victoria History of Buckinghamshire* (4 vols , 1905–27), Arthur Mee, *Buckinghamshire* (1940)

Buckland, Francis Trevelyan, 1826–80, English naturalist, son of William Buckland An authority on fish culture, he was inspector of fisheries in England and Scotland (1867–80) and installed a collection in the South Kensington Museum He wrote on various branches of natural history

Buckland, William, 1784 1856, English geologist He was dean of Westminster from 1845 He was the first to note in England the action on rocks of glacial ice, and his researches did much to bring physical and natural science into high repute He wrote *Reliquiae Diluvianae* (1823) and *Geology and Mineralogy Considered with Reference to Natural Theology* (1836) Francis T Buckland was his son

Buckland, town (pop 1,527), NW Mass , in hills W of Greenfield, inc 1779 Mary Lyon was born in Buckland and taught school here

Buckle, Henry Thomas, 1821–62, English historian He used his inherited wealth for wide travel on the Continent and for intensive self-education Contemptuous of the history writing of his day with its intense concern with politics, wars, and heroes, he undertook the breathtakingly ambitious plan of writing a history of civilization, of all men in their relation with each other and with the natural world about them At the time of his early death he had completed only two volumes of his panoramic *History of Civilization in England* (1857–61, new ed in one volume, 1904) These were only introductory, but they caused a sensation, thoroughly disturbing the dovecotes of the historians Trying to make history a genuine science, Buckle by an inductive process arrived at various "laws" of history. It is easy to point out that these "laws"—e g , the law of climate, by which he demonstrated that only in Europe could men reach high levels of civilization—were to a large extent only rationalisations of his own progressive and liberal views Yet the effect that the book had in shaping English liberal thought was immediate and huge More important still were its long-range effects in historiography; it profoundly influenced later scientific historians, and it helped to fasten attention on masses rather than individuals, on the wide levels of all life rather than on politics, and on the interrelations of man and nature rather than man and morals

Buckley, James Monroe, 1836–1920, American Methodist clergyman, b Rahway, N J For 32 years, beginning in 1880, he was editor of the *Christian Advocate* His numerous writings include a history of the Methodist Church (1912)

Buckley, town (pop 1,170), W Wash , near the White River E of Tacoma, in a farming, mining, and lumbering region, settled 1888, inc 1890.

Bucknell University see LEWISBURG, Pa

Buckner, Simon Bolivar, 1823–1914, Confederate general, b Hart co , Ky , grad West Point, 1844 After serving in the Mexican War, he resigned from the army (1855) and entered business, ultimately settling in Louisville In 1860 Buckner, fearing war, prepared and secured the passage of a bill creating a large Kentucky militia and, as inspector general, trained it When Kentucky announced its neutrality in May, 1861, Buckner stationed the troops to prevent invasion and unsuccessfully tried to get Lincoln to recognize the neutrality declaration The legislature became strongly Unionist and assumed control of the state's military affairs, so Buckner resigned and in Sept , 1861, was commissioned a Confederate brigadier general At Fort DONELSON (Feb , 1862), he surrendered to Grant and was taken prisoner Soon exchanged and promoted major general, he commanded a division in Bragg's invasion of Kentucky and fought at Perryville (Oct , 1862) He fortified Mobile (Dec , 1862–April, 1863), commanded the Dept of East Tennessee (May-Aug , 1864), fought around Chattanooga (Sept , 1863), and from 1864 until the end of the war commanded in Louisiana Returning to Kentucky in 1868, Buckner became editor of the Louisville *Courier* and was later governor of the state (1887–91) See biography by Arndt M Stickles (1940)

Bucks, England see BUCKINGHAMSHIRE

Bucksport, town (pop 2,927), S Maine, on the Penobscot below Bangor, settled 1762, inc 1792 Bucksport grew as a port The Old Jed Prouty Tavern dates from 1804 The British burned part of Bucksport in 1779 and again in the War of 1812 A large paper mill was built in 1930 The granite walls of Fort Knox (1846) are across the river

buckthorn, name for shrubs and small trees of the genus *Rhamnus* They are often thorny, and some species are evergreen The common buckthorn (*R cathartica*) is a hedge plant native to Europe and Asia but naturalized in E North America It has medicinal properties and yields a yellow dye CASCARA SAGRADA is obtained from *R purshiana*, a Western buckthorn Coffee berry, Indian cherry, redberry, and Avignon berry are other names for some species of *Rhamnus*

buckwheat, tender annual plant (*Fagopyrum esculentum*), native to Asia and grown in Europe from the Middle Ages for its three-cornered fruit Buckwheat is used as a feed for poultry and stock and as forage for bees It makes a good cleaning crop for hard and weedy lands In the United States buckwheat flour is used for pancakes Three varieties of the grain common in the United States are the Japanese, Silver Hull, and common gray Tartarian buckwheat is a related species

bucolics (būkŏl'ĭks) [Gr ,=belonging to the herdsman's life], PASTORAL poems, from which bucolics are not really distinguishable by definition The name was used of the *Eclogues* of VERGIL, modeled after the *Idylls* of THEOCRITUS

Bucyrus (būsī'rŭs), city (pop 9,727), co seat of Crawford co , N central Ohio, on the Sandusky river and NE of Marion, settled 1819, laid out 1822 It is a trade and industrial center and has varied manufactures, including highway-construction machinery and copper kettles

bud, in the lower plants and animals a protuberance from which a new organism develops, in seed plants, a growing point containing the rudiments of flowers, of leaves and shoots, or of all three Most trees and shrubs of colder climates have bud scales which protect the tender young bud The buds of each species of tree are nearly always characteristic enough to provide a means of identification in the winter, particularly those at the tips of the branches, called terminal buds Buds are utilized in bud grafting or BUDDING and in propagating by a CUTTING—it is a bud which grows into the new plant The "eyes" of an Irish potato are undeveloped buds and from them practically all food potato plants have been grown

Budaeus see BUDÉ, GUILLAUME

Budapest (bōō'dupĕst'), city (pop 1,164,963), N central Hungary, the national capital, on both banks of the Danube It was formed in 1873 by the union of Buda (Ger *Ofen*) and Obuda (Hung *Óbuda*, Ger *Alt-Ofen*) on the right bank with Pest on the left bank The Roman capital of Lower Pannonia, Aquincum, was near the modern Obuda, and Pest developed about another Roman town Both cities were destroyed by Mongols in 1241, but in the 13th cent King Bela IV built a fortress (Buda) on a hill here, and in the 14th cent Emperor Sigismund built a palace for the Hungarian rulers Under MATTHIAS CORVINUS, Buda was an intellectual center of Central Europe Buda and Pest fell in 1541 to the Turks, who held them until 1686, when Charles V of Lorraine conquered them for the Hapsburgs Because they had lost most of the original population they were resettled, Pest with Serbs, Buda with Germans Buda, a free royal town after 1703, had a renaissance under Maria Theresa, who built a royal palace and in 1777 transferred to Buda the university founded in 1635 by Peter Pazmany at Nagyszombat The university was moved in 1784 to Pest, which in the 19th cent, throve with commerce and was, after the flood of 1838, rebuilt on modern lines Buda became the residential sector The united city was by 1917 the leading center of grain trade and flour milling in Europe, already ringed by industrial suburbs After the First World War, industries increased, notably in machines, chemicals, and textiles Budapest was not only a metropolis but a beautiful city famed for its literary, theatrical, and musical life, it attracted tourists by its mineral springs, its historic buildings, and its parks, notably the large municipal park and the show place of Margaret Island (Hung *Margit Sziget*), in the Danube, where St Margaret, daughter of Bela IV, had lived in a convent Budapest suffered greatly in the Second World War Hitlerian German domination reduced the number of Jews from 200,000 to c 116,000 Later air raids and a 14-week siege by the Russians wrought devastation Almost 70 percent of Buda was destroyed or heavily damaged, including the royal palace and the Romanesque Coronation Church All seven bridges between Buda and Pest were struck, including the Szechenyi suspension bridge (built 1840-49) In Pest the Corso (promenade) along the Danube was damaged and the buildings in Calvin Square and the art gallery in the municipal park were destroyed

Budaun (budoun'), town (pop 52,077), W central United Provs , India It was an important northern military post under the Mogul empire The Great Mosque (the Jama Masjid) here dates from 1223 There is much trade in grain

Buddha (bōō'dŭ) [Sanskrit,=the enlightened one], usual title given to the Indian religious leader who founded BUDDHISM The story of his life is incrusted with legend, but it is generally said that he was born c 563 B C and died in 483 B C He was of noble family of the Kshatrvia caste, son of a wealthy ruler of a territory north of the present Benares, near Nepal His family name was Gautama (or Gotama), his given name Siddhartha He led a sheltered life of ease and had married and fathered a son before, at the age of 29, he learned of human misery Renouncing his luxury he became a hermit and a wanderer Under a bo tree (i e , a pipal tree) at Buddh Gaya he was rewarded for his holy asceticism by "the great enlightenment" There he learned the principles on which Buddhism is based He became a teacher, gathered disciples, who were the first Buddhist monks, and spread the results of his vision abroad His old age is said to have been disturbed by a quarrel with his cousin Devadatta, which he surmounted by the holy detachment which had caused him to be called Bhagava [Sanskrit,=lord], Tathagata [Sanskrit,=he who has come], and the Buddha Near the spot traditionally called his birthplace a commemorative stele was found in 1896, and an urn was found in 1898 Both come from before 250 B C , and the urn purportedly contains his relics

Buddh Gaya or **Bodh Gaya** (both bōōd' gu'yu), village, W central Bihar state, India Buddha according to tradition received enlightenment under a pipal tree (bo tree) here There are extensive relics of Buddhist sculpture, dating from the 8th to the 12th cent A D

Buddhism (bōō'dĭzm, bŭ'dĭzm), philosophy and system of ethics, one of the great Oriental religions Today it numbers many millions of adherents in Ceylon, Nepal, China, Japan, Tibet Thailand, Burma, and Indo-China Buddhism arose from the teachings of the BUDDHA in India in the 6th and 5th cent B C The lines of caste at that time were becoming fixed, agriculture and political life were more or less static, and though Brahmanism was officially supported, in the villages and remote areas "salvation" religions arose Of these the greatest was Buddhism, another was JAINISM Buddhism was in its foundations closely related to Brahman beliefs (see HINDUISM) It taught that sufferings is inherent in life and that the greatest good is release from life and suffering The individual man is only a link in the chain of being, made up of parts that have always been existent, and his death is the separation of those parts, which may be united again in a somewhat similar way (see TRANSMIGRATION OF SOULS) What happens after his death is determined in part by what he has done in all his previous existence—by his *karma* [Sanskrit,=making] Since all existence is bound up with pain, the ultimate end of religious man is to escape into blissful nonexistence—nirvana (nĭrvu'nŭ) [Sanskrit,=annihilation] There are various stages of the approach to nirvana To attain a higher stage one must live by the teachings of the Buddha. The "four noble truths" revealed to the Buddha in "the great enlightenment" are that existence is suffering, that the origin of suffering is desire, that suffering ceases when desire ceases, and that the way to attain cessation of desire is "the noble eightfold path" This "noble eightfold path" comprises right belief, right resolve (to renounce sensual pleasure, to harm no living creature, and ultimately to reach nirvana), right speech, right conduct, right occupation of living, right effort (to keep the mind free from evil and devoted to good), right contemplation or right-mindedness, and right ecstasy (to achieve by trancelike meditation selfless contemplation) The emphasis was on gentleness, self-denial, and compassion Under the Mogul empire,

Buddhism reached a great height in India with the reigns of Asoka (3d cent B C) and his son Mahendra, who introduced Buddhism to Ceylon. It later was established in central Asia but disappeared, as it did in India proper It entered China in the 1st cent A D, and from China spread (c 552) to Japan through Korea In Tibet it developed into Lamaism In Ceylon and in Burma it persisted in its purer, simpler form, the Hinayana [Sanskrit, =small vehicle], but in the north (notably in China and Japan) it developed into the Mahayana [Sanskrit, =great vehicle] The doctrine of reincarnation and the belief that a holy man might by self-sanctification become a Buddha made possible the acceptance of a number of Buddhas and bodhisattvas (potential Buddhas), and Northern or Later Buddhism developed a whole galaxy of divine beings and borrowed heavily from local religions Many small, but not conflicting, sects of Buddhism grew up with hierarchical priesthoods and elaborate monasticism It is out of this welter of beliefs that most of what we know as Buddhist art and iconography grew, with such elaborate symbolism as that of the lotus The classic early writings of Buddhism are the great works of Pali literature The three *Pitakas* [Sanskrit *pitaka*=basket] are compilations—the *Suttapitaka*, parables, sermons, and discourses of the Buddha, written down, according to tradition, by the Buddha's disciple Ananda, the *Vinayapitaka*, monastic rules, with an account of their formulation, and the *Abhidhammapitaka*, commentaries on doctrine The jatakas are also in Pali, and there are other important works in the large body of Buddhist scriptures including the *Dhammapada* (a sort of abstract of the *Pitakas*) and the *Avadana* (stories to illustrate karma) The writings of Northern Buddhism are mainly in Sanskrit The story of Buddha came to the medieval West dimly through the story of Barlaam and Josaphat See T W Rhys Davids, *Buddhism Its History and Literature*, C N E Eliot, *Hinduism and Buddhism* (3 vols, 1921) and *Japanese Buddhism* (1935), A B Keith, *Buddhist Philosophy in India and Ceylon* (1923), Alice Getty, *Gods of Northern Buddhism* (2d ed, 1928), C A Davids, *Outlines of Buddhism* (1937), J G Jennings, ed, *Vedantic Buddhism of the Buddha* (1947)

budding, type of grafting, in which a plant bud is inserted under the bark of the stock (usually not more than a year old) It is best done when the bark will peel easily and the buds are mature, as in spring, late summer, or early autumn Budding is a common means of propagating roses and most fruit trees in nurseries

Budé, Guillaume (gēvōm' büdā'), 1467–1540, French scholar, known also by the Latinized form of his name, Budaeus (büdē'us) One of the greatest of humanists and one of the greatest French scholars of all time, he was a towering figure of the Renaissance He was secretary to Francis I, was busy about royal affairs, and persuaded the king to found the Collège de France His commentaries on the Pandects virtually introduced textual criticism in the study of Roman law His treatises on linguistics helped to establish the discipline of philology He translated and commented on Greek literature and fostered the revival of Greek learning in France Budé's voluminous writings also dealt with Greek and Roman numismatics, with political and economic theories, and with various other subjects

Bude (büd), town (pop 1,207), SW Miss, ESE of Natchez and on the Homochitto, in a timber area, inc 1912

Budejovice, Czechoslovakia see Budweis

Budenny, Semyon Mikhailovich (bōōdĕn'ĭ, Russ sĭmyôn' mēkhī'luvĭch bōōdyô'nĭ), 1883–, Russian general A Don Cossack and a sergeant in the tsarist army, he joined the Communist party in 1919, organized the Red Cavalry, and won dashing victories over the counterrevolutionists in the civil war Made a marshal, he held a command in the war against Finland (1940) In the Second World War he commanded (July–Oct, 1941) in the south against the Germans, was severely defeated at Kiev, and was shifted to the rear to train new armies

Bude-Stratton (büd'–), urban district (1931 pop 3,836, 1943 estimated pop 5,598), Cornwall, England Stratton village, with a 14th-century church, is near the scene of a parliamentarian defeat in the Puritan Revolution

Budge, Sir Ernest Alfred Wallis, 1857–1934, English archaeologist, an authority on ancient Egypt and Assyria He was keeper (1893–1924) of Egyptian and Assyrian antiquities at the British Museum

Budge, John Donald (Don Budge), 1915–, American tennis player, b Oakland, Calif He was the American and British champion (1937–38) and a member of the U S team that won (1937) the Davis Cup from Great Britain In 1938 he scored the "grand slam" of tennis by winning the American, Australian, French, and British singles championships. He turned professional in 1939 He wrote *How Lawn Tennis Is Played* (1937) and *On Tennis* (1939)

Budgell, Eustace (büj'ĕl), 1686–1737, English essayist and pamphleteer He was a cousin of Addison, through whose aid he obtained several public offices Budgell contributed to the *Tatler*, the *Spectator*, the *Guardian*, and afterwards the *Craftsman* He lost a fortune in the collapse of the South Sea Bubble and later was accused of forging a will He is mentioned in Pope's *Dunciad*.

budget, inclusive list of proposed expenditures and expected receipts of any person, enterprise, or government, for a definite period, usually one year Budget estimates are based on the expenditures and receipts of a similar previous period, modified by any expected changes The governmental budget originated in England In the United States, the President annually submits to Congress a budget which shows the condition of the Treasury at the end of the last completed fiscal year, its estimated condition at the end of the current fiscal year, and its estimated condition at the end of the ensuing year if the budget proposals are carried out, the revenues and expenditures during the last completed year and the estimates thereof for the current year, recommendations of provisions for meeting the revenue and expenditure for the ensuing year, and any other data considered helpful to Congress in its determination of the government's financial policy No other administrative officer is allowed to make revenue recommendations unless asked to do so by Congress or one of its houses To help the President, the Bureau of the Budget was created (1921), under the Treasury Dept, to receive, compile, and criticize estimates of expenditure needs submitted by the various governmental services and to study in detail all government services and recommend to the President any changes therein that will increase their economy and efficiency The bureau was transferred in 1939 to the executive office of the President All the states have some form of budget system See A E Buck, *Public Budgeting* (1929), F A Bland, *Budget Control* (4th ed, 1946)

Budweis (büd'wīs, Ger bōōt'vīs), Czech *Ceské Budějovice* (chĕs'kĕ bōō'dyĕyôvĭtsĕ), city (pop 38,194), SW Bohemia, Czechoslovakia, on the Moldau Beer is its best-known product, but its pencils and enamelware are economically more important Founded in the 13th cent, Budweis has kept its old inner city, with an arcaded square, as well as an old castle

Buel, Jesse (bū'ĕl), 1778–1839, American journalist and agriculturist, b Coventry, Conn He published the Kingston *Plebeian* (1803–14) and the Albany *Argus* (1813–20) He wrote tirelessly on agriculture, in his newspapers, in his reports as secretary of the state board of agriculture, and, after 1834, as editor of the *Cultivator*, one of the earliest farm journals to become widely popular In the sandy land near Albany after 1821 he developed by scientific practices a model farm which yielded him large financial returns He served several terms in the legislature, where he worked for a state agricultural school He was defeated for governor by William L Marcy in 1836 His *Farmer's Companion* (1847), passed through many editions See *Jesse Buel, Agricultural Reformer Selections from His Writings* (ed by H J Carman, 1947)

Buell, Abel (bū'ĕl), 1742–1822, American silversmith, engraver, and type founder, b Killingworth, Conn He engraved a number of maps, including maps of the Florida coast and a large wall map of the United States, the first produced in America after the Treaty of Paris in 1783 He experimented in type founding, cast the first font of native-made American type (1769), and later supplied type to Connecticut printers He invented machinery for cutting and polishing precious stones, invented a machine for coining money and for a period produced copper coins for the state, established in 1795, at New Haven, one of the first cotton mills in the country, which, however, soon failed, and was interested in many other projects All this time he was producing silver and jewelry See L C Wroth, *Abel Buell of Connecticut* (1926)

Buell, Don Carlos, 1818–98, Union general in the Civil War, b near Marietta, Ohio, grad West Point, 1841 Before the outbreak of the Civil War, he had served with distinction in the Seminole and Mexican wars Buell was appointed brigadier general of volunteers (May, 1861), helped to organize the Army of the Potomac, and was placed in command of the Dept of the Ohio (Nov, 1861) When Grant moved up the Tennessee and Cumberland rivers, Buell supported him by marching on Bowling Green, and after the fall of Fort Donelson he pursued the retreating Confederates to Nashville In March, 1862, he was placed under Gen H W Halleck and made major general, commanding the Army of the Ohio Halleck ordered him to advance on Savannah, Tenn, and Buell came up just in time to save the day at Shiloh After accompanying Halleck to Corinth, he was ordered to proceed with four divisions to Chattanooga, but Braxton Bragg reached there before him When Buell concentrated his forces at Murfreesboro, Bragg marched around his left and headed for Louisville Buell's rapid marching and Bragg's delay enabled the Union general to reach Louisville first He fought Bragg at Perryville on Oct 8, 1862, and on the next day the Confederates retreated from Kentucky Buell advanced to Nashville, but the administration, dissatisfied with his campaign, removed him in favor of Gen W S Rosecrans A military investigation was held (Nov, 1862–May, 1863), and, after a year, Buell was discharged as major general of volunteers He thereupon resigned his regular commission and withdrew from the war See James B Fry, *The Army under Buell* (1886)

Buenaventura (bwā"nävĕntōō'rä), city (pop 14,515), W Colombia, a port on the Pacific Founded c 1540, it was burned by the Indians at the end of the 16th cent The present port on Cascajal Island in Buenaventura Bay was more recently settled It is the port of the Cauca valley, and since the completion (1914) of the railroad to Cali and the opening of the Panama Canal, it has become increasingly important, exporting coffee, platinum, gold, and hides

Buena Vista (bwā'nŭ vĭs'tŭ), locality just S of Saltillo, Coahuila, where a battle of the Mexican War was fought, Feb 22–23, 1847 Gen Zachary Taylor, disobeying orders from the U S government, had advanced here Santa Anna, having gathered a Mexican army, came north by heroic marches and, attacking Taylor's forces furiously, outflanked them The fighting was hard and at the end of the second day seemed a drawn battle, but on the night of Feb 23 the Mexican army withdrew, leaving Taylor in control of the north of Mexico Among the U S officers Gen John E Wool distinguished himself by his command at Buena Vista

Buena Vista (bŭ'nŭ vĭs'tŭ) **1** City (pop 1,161), co seat of Marion co, W Ga, SE of Columbus, in a farm and lumber area, settled 1830 **2** City (pop 4,335), western Va, in the Blue Ridge E of Lexington, founded 1889, inc 1891 It has silk and paper mills and brick kilns A girls' junior college is here Buena Vista is at the edge of the George Washington National Forest

Buen Ayre, Dutch West Indies see Curaçao

Buenos Aires (bwā'nŭs ī'rēz, â'rēs, Span bwā'nōs ī'räs), city (pop 3,000,371), capital of Argentina, in the federal district, N Argentina, on the right bank of the Río de la Plata The largest city of Latin America, Buenos Aires is the chief port and the financial, industrial, and social center of the republic, on the eastern edge of the Pampa, it is also the distributing center for that vast region A city of great wealth, it is modern and well built, with spacious parks, excellent buildings, and some fine streets, such as the Avenida de Mayo Among the numerous educational, scientific, and cultural institutions are the Univ of Buenos Aires and the National Library Buenos Aires was first founded in 1536 by Pedro de Mendoza, but the settlement was abandoned in 1541 by order of Domingo Martínez de Irala, the colonists moving to Asunción A permanent settlement was planted in 1580 by Juan de Garay, but it did not become of paramount importance until the latter part of the colonial period The growth of Buenos Aires, however, was greatly enhanced by the development of trade, much of it contraband In 1617, at the instance of Hernando Arias de Saavedra, the province of Buenos Aires or Río de la Plata was separated from the administration of Asunción, with Buenos Aires as the seat of the new provincial government It became the capital of the viceroyalty of the Río de la Plata in 1776 and shortly afterward was made an open port by Charles III From that time on it had the hegemony of S South America In 1806 the city was captured by British troops and was recaptured by Jacques de Liniers, in 1807 a second British attack was repulsed The British invasion was significant in its effect on the peoples of Buenos Aires, it helped to prepare the way for the revolt against Spain, in which Buenos Aires played an important part In May, 1810, the *cabildo* deposed the viceroy and established a junta The winning of independence was followed by a period of confusion and strife in Argentina The unitarians, strongest in Buenos Aires prov, advocated a centralized government dominated by the city of Buenos Aires, the federalists supported provincial autonomy and resented the economic and political dominance of the city and the province of Buenos Aires over the other provinces. A long conflict was waged between the two forces The dictator Juan Manuel de Rosas ostensibly rejected the unitarian system, but he maintained the dominance of Buenos Aires and in effect his regime was centralistic. Although an attempt was made by Justo José de Urquiza to establish a federal government, it was under Bartolomé Mitre, the champion of the city, that national political unity was finally achieved The bitterness between Buenos Aires and the province continued, however, until 1880, when the city was detached from the province and federalized The spectacular economic rise of Argentina in the second half of the 19th cent attracted to Buenos Aires capital and immigration from all over the world. The improvement of the harbor and the construction of extensive port facilities aided development, and the port became one of the busiest in the world, exporting chiefly the Pampa yield—meat, meat products, and grain Industry developed on the basis of processing those products—

meat packing, grain milling, preparation of dairy products—and then expanded to include many other plants Not only are most of the industrial plants of the nation located in Buenos Aires, but the city also has trade facilities of great value It developed into an important publishing center during the civil war in Spain The province of Buenos Aires (118,752 sq mi., pop 4,408,373) is the richest and most populous of Argentina It forms a part of the Pampa and is essentially an agricultural and pastoral country, with beef, mutton, wheat, corn, flax, oats, and barley as the principal products The capital is LA PLATA, other important cities are Avellaneda, Bahía Blanca, Chivilcoy, Mar del Plata, and Tandil Dairying is carried on, and fruits and vegetables are grown near the city of Buenos Aires The chief industries are meat packing and grain milling In the south several low mountain ranges are an important source of granite, quartzite, and limestone

Buer, Germany see GELSENKIRCHEN

Buffalo. **1** Village (pop 1,695), co seat of Wright co, E Minn, WNW of Minneapolis, in a lake region, settled c 1855, inc 1887 **2** City (pop 575,901), co seat of Erie co, W N Y, on Lake Erie and the Niagara river It is a port of entry and one of the principal Great Lakes ports Joseph Ellicott laid out a village here for the HOLLAND LAND COMPANY in 1803 Almost destroyed by fire (1813) in the War of 1812, Buffalo was slow in rebuilding until the opening of the Erie Canal in 1825, when it began growing rapidly and by 1832 was incorporated as a city Transportation was the primary factor in its early growth, and it became one of the largest grain-distributing ports in the United States and an important railroad focus Among its many important industries are flour milling, iron and steel manufacture, meat packing, the production of rubber, linseed oil, and gypsum goods, and the operation of automotive and aviation plants Its educational institutions include the Univ of Buffalo (see BUFFALO, UNIVERSITY OF), a state teachers college, Canisius College (Jesuit, mainly for men, 1870), and D'Youville College (for women) The Grosvenor Library is an important reference library In Delaware Park are the Albright Art Gallery and a zoo Humboldt Park has a science museum and botanical gardens Notable buildings include the city hall (1932), the Prudential Building (1894) designed by Louis Sullivan, and the Larkin office building designed by Frank Lloyd Wright A state mental hospital and a state institute for the study of malignant diseases are here Grover Cleveland became mayor of Buffalo in 1881 Here in 1901 McKinley was assassinated at the time of the Pan-American Exposition, and Theodore Roosevelt took the presidential oath Millard Fillmore's home was in Buffalo **3** Town (pop 1,209), co seat of Harper co, NW Okla, in a farm and stock-raising area, founded 1907, inc 1908 **4** City (pop 2,302), co seat of Johnson co, N Wyo, SSE of Sheridan and on Clear Creek, founded c 1879, inc 1884 Eastern gateway to the Bighorn National Forest, it is the trade center for a ranch, farm, and resort area Near by is the soldiers' and sailors' home, and to the north lies Lake De Smet

buffalo, name commonly applied to the American BISON, but correctly restricted to certain related oxlike mammals of Asia and Africa The Asiatic water Buffalo or Indian buffalo stands 5 ft or more at the shoulder Its widely spread horns project from the sides of the head and curve backward For many centuries it has been domesticated as a draft animal and as a source of milk, but wild forms still exist The anoa or pygmy buffalo is the wild ox of the Celebes The fierce Cape buffalo is found in South Africa

Buffalo, University of, at Buffalo, N Y, nonsectarian, private, coeducational, chartered and opened 1846 A medical school until 1886, it is now a general university

buffalo berry, hardy North American shrub (*Shepherdia argentea*), somewhat thorny, having silvery foliage and, on the female plants, profuse yellow or scarlet berries used in making tart-flavored jellies and conserves Another species, the Canadian buffalo berry, is thornless with unpalatable fruits Both are sometimes cultivated The name comes from the Indian custom of eating the berries with buffalo meat

Buffalo Bill, 1846–1917, American plainsman, scout, and showman, b near Davenport, Iowa. His real name was William Frederick Cody His family moved (1854) to Kansas, and on the death of his father (1857) he set out to earn the family living, working for supply trains and a freighting company. In 1859 he went to the Colorado gold fields, and in the Civil War he was an army scout on the Western border His adventures then and later as a buffalo hunter for railroad construction camps on the Great Plains were the basis for the stories later told of him Ned BUNTLINE in 1872 persuaded him to appear on the stage, and except for a brief period of scouting against the Sioux in 1876, he was thereafter connected with show business. In 1883 he organized Buffalo Bill's Wild West Show, and he toured with it over America and Europe for many years. It was imitated by many other wild West shows. Wyoming granted him a stock ranch, on which the town of Cody was laid out. He died in Denver and was buried on Lookout Mt near Golden, Colo. The exploits attributed to him in the dime novels of Buntline and Prentice Ingraham are only slightly more imaginative than his own autobiography (1920) See R. J Walsh and M S Salsbury, *The Making of Buffalo Bill* (1928), biography by D S Garst (1948), Dan Muller, *My Life with Buffalo Bill* (1948)

buffalo bur, straggly, prickly weed (*Solanum rostratum*), related to the potato and once serving as the food of the COLORADO POTATO BEETLE before the advent of the cultivated potato in its vicinity The plant, an annual, bears yellow flowers and burlike fruits It is sometimes called SANDBUR.

buffalo clover see BLUEBONNET

buffalo fish, name for several fish of the sucker family found chiefly in the rivers and lakes of the Mississippi valley Although the flesh is generally bony and coarse, the fish are commercially important as food They are often 3 ft long Included in the group are the bigmouth or common buffalo fish, the smallmouth buffalo fish, and the black or mongrel buffalo fish

buffalo grass, low perennial grass (*Buchloë dactyloides*) of the plains regions, sod forming and one of the most important range grasses Other grasses, such as grama, are sometimes called buffalo grass

Buffalo National Park, 197 5 sq mi, E Alta, near Wainwright, a dominion government enclosure, est 1908 It was formerly the home of the dominion government buffalo herd of more than 5,000, but the animal population was withdrawn, chiefly to Elk Island National Park, and the area was used largely for military purposes during the Second World War In 1947 the park was abolished

Buffon, Georges Louis Leclerc, comte de (zhôrzh' lwē' lukl'rk' kôt' du bŭfô'), 1707–88, French naturalist and author From 1739 he was keeper of the Jardin du Roi (now the Jardin des Plantes) in Paris He devoted his life to his monumental *Histoire naturelle* (44 vols, 1749–1804), a popular and brilliantly written compendium of data on natural history interspersed with Buffon's own speculations and theories (some of which foreshadow Darwin) Of this work, two volumes—*Théorie de la terre* (1749) and *Époques de la nature* (1779)—are of especial interest Buffon's famous *Discours sur le style* was delivered (1753) on his reception into the French Academy

buffoon. see FOOL.

Buford, John (bū'furd), 1826–63, Union general in the Civil War, b Woodford co, Ky, grad West Point, 1848 His operations in the GETTYSBURG CAMPAIGN were particularly notable

Buford, city (pop. 4,191), N Ga, NE of Atlanta, in a farm area, inc 1872 It has a tannery, established in 1873

Bug (bo͞og, bŭg, Rus bo͞ok), river, 487 mi long, rising E of Lvov, flowing north along the Polish-Ukrainian border past Brest, then northwestward through Poland to join the Narew It is largely navigable and connected by canal with the Dnieper It is sometimes called the Western Bug

Bug or **Southern Bug,** Rus *Yuzhny Bug* (yo͞o'zhnē bo͞ok'), river, 520 mi long, in the Ukraine, known to the ancients as Hypanis It rises NW of Proskurov, which it passes, and flows SE past Vinnitsa, Pervomaisk, and Nikolayev into the Black Sea It is navigable (March–Dec.) for 65 mi. and is used for grain transport

bug, name applied correctly only to insects of the order Hemiptera A beaklike structure on the front of the head is adapted for piercing and sucking Those having wings have two pairs The metamorphosis is gradual, the young resembling the adults when they hatch from the egg Included in the group are the leaf bug, the flower bug, the assassin bug, the squash bug, the bedbug, the water strider, the giant water bug, and the water boatman

Buganda see UGANDA

Bugayev, Boris Nikolayevich see BELY, ANDREI

bugbane: see BLACK SNAKEROOT

Bugeaud de la Piconnerie, Thomas Robert (tômä' rôbĕr' bŭshô' dù là pēkônurē'), 1784–1849, marshal of France, duke of Isly, general and administrator in Algeria He served in Napoleon's Imperial Guard and in 1815 retired to devote himself to scientific agriculture, but after the Revolution of 1830 he returned to public life, becoming a deputy In 1836 he undertook the pacification of Algeria, which proved a long and difficult task. His military skill finally enabled him to break the power of ABDU-L-KADIR and to win a celebrated victory at Isly (1844) As governor general of Algeria (1840–47), he attempted to cooperate with the Arabs and promote military colonization and encouraged large-scale immigration of French settlers He wrote on subjects of colonial, military, and economic import

Bugenhagen, Johann (yō'hän bo͞o'gunhä'gun), 1485–58, German Protestant reformer. Born in Pomerania, he is sometimes called Dr Pomeranus. An ordained priest, he was attracted to the reform movement by Martin Luther's writings. In 1521 he went to Wittenberg and entered upon a lasting friendship with Luther and Melanchthon; he officiated at Luther's marriage and preached Luther's funeral sermon. He was a lecturer in the university and pastor of the principal church in Wittenberg Much of Bugenhagen's attention was devoted to ecclesiastical and educational organization in Brunswick, Hamburg, Lübeck, Pomerania, and Denmark Bugenhagen helped Luther in his translation of the Bible Of his own literary works the most important is *Interpretatio in librum Psalmorum* (1523) See biography by W. M Ruccius (1924).

Bugge, Sophus (sō'fo͞os bo͞o'gu), 1833–1907, Norwegian philologist He made a notable edition of the Old Norse runes, and his was the first critical edition (1881–89, 2d series, 1896) of the poems of the *Eddas*

buginvillaea: see BOUGAINVILLAEA

bugle, brass wind musical instrument consisting of a conical tube coiled once upon itself, capable of producing five or six harmonics It is usually in B flat Its principal use is for naval and military bugle calls, such as taps, reveille, and mess, and, in earlier times, for hunting calls In the 19th cent, keyed bugles and then valve bugles, of greater compass than ordinary bugles, were made The term *bugle* is occasionally used for a family of instruments which includes the tuba and the ophicleide

Buhl, André Charles: see BOULLE, ANDRÉ CHARLES

Buhl (būl) **1** City (pop 2,414), S Idaho, near the Snake river, W of Twin Falls, in a reclaimed farming and dairying area, founded 1906, inc 1909 In 1937 a landslip created a great hole near by **2** Village (pop 1,600), NE Minn, between Virginia and Hibbing on the Mesabi iron range

buhrstone (bûr'–), any hard, rough-surfaced, porous, siliceous rock which can be shaped and used as a millstone for grinding cereals, paint pigments, or other materials. The finest variety is a cellular quartz from the Tertiary strata near Paris, coarser buhrstones are quarried in the E United States

building, in architecture, the practical activities connected with furnishing structural materials and assembling them into a completed unit conforming to the plans and directions of architect or engineer The architect was not always distinct from the builder, prior to the 18th cent the two merged in the person of the "master builder," who exercised the creative as well as the practical functions in even the most complex structures, such as the medieval cathedrals The history of building extends as far back as that of civilization itself Behind the essential need for shelter has always been the basic factor of available structural materials, and the history of building is only an account of the processes, activities, and techniques developed to convert these raw materials into structures of maximum utility Where there have been facilities for transporting materials from a distance (e g, the use of the Nile for transporting granite blocks), the range of structural possibilities has been that much expanded, modern transportation has all but eliminated any restrictions imposed by remoteness of materials Primitive building required practically no implements and depended upon the mere piling up of stones or sun-dried bricks for walls and the weaving of branches for roofs The invention of flint axes permitted the hewing of stones and cutting of timbers The later use of finer tools, with the transition to bronze, is marked by the Egyptian pyramids and temples, while the coming of the Iron Age brought implements which made possible the fine and accurate stonecutting of Hellenic architecture and the development of CARPENTRY Most of the building of antiquity was based upon the trabeated (or column and beam) method of construction The Romans adopted and developed the systems of the Greeks and the Etruscans and the vaults and domes of the East and added to these their own distinctive materials (such as concrete) and numerous mechanical inventions Their structures anticipated the intricacy of modern building both in their efficient organizing and in the wide variety of materials called into play After the decline of Rome there was a halt in the development of building until Western Europe emerged from the Dark Ages to resume construction in stone GOTHIC ARCHITECTURE brought to the arts of building an amazing vitality, producing masterworks in all the countries of the West Building was in the hands of organized guilds of highly skilled craftsmen, who, with their slow, conscientious industry, reared great edifices into which went the cooperation and pride of whole communities The Renaissance epoch chiefly produced architectural and decorative effects in which the craft of building showed little creative vitality of its own. The early 19th cent ushered in new materials, and the middle of the century, with the use of steam and electricity, saw profound changes in the entire range of building Iron was being used as a structural material by 1840, and the steel skeleton was first used in the erection of the 10-story building for the Home Insurance Company in Chicago in 1883 The first cement in the United States was manufactured in 1818, and by 1900 American engineers had developed the technique of reinforced concrete, the material which is the distinctive contribution of the 20th cent. to building. Each new invention has given birth to still others, and there has been an

ever-increasing need to integrate into an economical and perfected system the many elements of new labor conditions, hosts of new materials, changed technique, and insistent demand for speed of operation The modern building is designed by an architect who calls to his assistance consulting and technical services for the various mechanical and engineering factors which must enter into it. The builder chosen for the construction work enters, in most cases, into a contract undertaking the entire operation at a fixed cost with completion of the structure assured for a certain date. The builders of skyscrapers and other enormous contemporary projects are highly organized firms which purchase materials, employ labor, and control contributing trades and services under one centralized unit, from the signing of the contract till the delivery of the finished building to the owner Both the design and the construction processes are subject, in most American communities, to a variety of legal ordinances which have power to enforce the safety, sanitation, and stability of each separate structure Taken as a whole, modern building constitutes an imposing and vital element of national industry with almost numberless ramifications Now that numerous technical problems of 20th-century construction have been solved, the great problem and opportunity still ahead of building is properly to align its resources with the vital aspects of community life and to help satisfy such urgent social needs as minimum-cost housing and the elimination of excessive city congestion

Buisson, Ferdinand Édouard (fĕrdēnā' ādwär' büēsō'), 1841–1932, French educator He studied at the Sorbonne and later taught (1866–70) in Switzerland After 1870 he served in the department of education, first as an inspector of schools and later as a director, resigning in 1886 to become professor of pedagogy at the Sorbonne He produced the *Dictionnaire de pédagogie* (1882–93) From 1902 to 1914 and again from 1919 to 1924, he was a member of the chamber of deputies and was also active in working for civil rights An ardent pacifist, he attended (1867) the first congress of the International Peace League, with Ludwig Quidde he received the 1927 Nobel Peace Prize

Buitenzorg (bo͞i'tənsôrkh) [Dutch, =free from care], Malay *Bogor*, town (pop 65,431), on W Java, Indonesia, S of Batavia At the foot of two volcanoes, it is a summer resort, known chiefly for its magnificent botanical gardens (laid out 1817) Tea is grown in the surrounding highlands, automobile tires and textiles are manufactured

Bukhara (bo͞okä'rù), city (pop 50,382), capital of Bukhara oblast, W Uzbek SSR The name is also spelled Bokhara Processing of karakul and spinning of silk are among the industries, and Bokhara rugs are named after the city Dating from the early centuries A D , it was long capital of the emirate of Bukhara and a center of Islamic culture, there are splendid mosques and palaces dating from the 9th to the 17th cent When in the 19th cent a spur of the Trans-Caspian RR reached Bukhara, the station, by request of the emir, was built at a distance (8 mi to the southeast) from the city Around the station grew New Bukhara, renamed (c 1930) Kagan Kagan (pop c 10,000) produces cotton textiles and cottonseed oil

Bukhara, emirate of, former state, central Asia, in TURKISTAN It bordered in the south on Afghanistan Ancient Sogdiana, the region was conquered (4th cent B C) by Alexander the Great, came under Arab rule (7th-9th cent A D), flourished (10th cent) under the Samanid princes of Khurasan, passed (12th cent) to the rulers of Khiva, and was conquered by Jenghis Khan (1220) and Tamerlane Early in the 16th cent the Usbeks occupied the territory The rule of the emirs was spectacularly cruel and oppressive Russian arms forced (1868) the emir to recognize Russian suzerainty, but his power remained absolute until his deposition and flight in 1920 At first a Soviet republic, the region was divided (1924) among Uzbekistan, Tadzhikistan, and Turkmenistan

Bukhari (Mohammed ibn Ismail al-Bukhari) (bo͞okhär'ē'), d 870, Arabic scholar and Moslem saint, b Bukhara He traveled widely over Moslem lands and made a tremendous collection of the traditional sayings of the Prophet It is regarded in ISLAM as the commentary par excellence and the law book second only to the Koran

Bukharin, Nikolai Ivanovich (nyĭkülī' ēvä'nuvĭch bo͞okhä'rĭn), 1888–1938, Russian Communist. In 1916 he edited in New York the revolutionary paper *Novy Mir* Joining Lenin in the Bolshevist Revolution, he became, after Lenin's death, the chief party theoretician, member of the Politburo, and editor of *Izvestia*. Implicated by testimony in the public treason trial of 1936, he was exonerated, but he was arrested in 1937, confessed to counter-revolutionary plots in the treason trial of 1938, and was executed He wrote and translated numerous works on economics and political science.

Bukki (bŭk'ī) [Heb , =wasting from God]. 1 Descendant of Aaron 1 Chron. 6 5,51; Ezra 7.4 2 Danite. Num. 34 22

Bukkiah (bŭkī'ù) [Heb , =wasting from God], Levite. 1 Chron. 25.4,13.

Bukovina (bo͞okōvē'nù), Rumanian *Bucovina*, region, E Europe, in W Ukraine and NE Rumania Traversed by the Carpathians and by the upper Pruth and Sereth rivers, it is heavily forested and produces timber as well as grain and livestock Chernovtsy, in the Ukraine, is the chief center The population includes Rumanians, Ukrainians, Russians, Hungarians, Jews, and Germans. Bukovina was the nucleus of the old principality of Moldavia, which had its first capital at Suceava, in Bukovina Ceded (1775) by the Ottoman Empire to Austria, it was at first a district of Galicia, but in 1848 it was made an autonomous province It was transferred to Rumania in 1919 By a treaty of June, 1940, Rumania ceded, along with Bessarabia, the northern part of Bukovina (1,708 sq mi , pop c 600,000) to Russia From 1941 to 1944 Rumanian troops again occupied all Bukovina, but the Rumanian peace treaty of 1947 confirmed N Bukovina in possession of the USSR The remainder (2,322 sq mi , pop 300,751) forms one of the historical provinces of Rumania

Bulawayo (bo͞olùwä'yō), city (pop 62,737), W Southern Rhodesia, founded 1893 It is the main railroad center of the country, and it is linked by rail with Capetown, Salisbury, and Beira There are light manufactures, and food products are traded

bulb [Gr], thickened, fleshy plant bud, usually formed under the surface of the soil, which carries the plant over from one blooming season to another In form it may be either layered, as in the onion and hyacinth, or scaly, as in some lilies Many popular outdoor and house plants, such as the tulip, the narcissus, the scilla, and the Madonna lily, are grown from bulbs, some of them out of their usual season by forcing Not true bulbs, but often so called, are the CORM of the crocus and the gladiolus, the TUBER of the dahlia and the potato, and the RHIZOME of certain irises and other plants See J H McFarland, R M Hatton, and D S Foley, *Garden Bulbs in Color* (1938), F F Rockwell, *The Book of Bulbs* (rev ed , reissue, 1946), C H Mueller, *Bulbs for Beauty* (1947)

bulbul (bo͞ol'bo͞ol) [Persian, =nightingale], name for a number of species of thrushlike birds of Africa and Asia The bulbul of Persian poetry was probably a nightingale

Bulfinch, Charles, 1763–1844, American architect, b Boston A member of the Boston board of selectmen in 1791, he was chosen chairman in 1799—an office equivalent to mayor and held by Bulfinch for 19 years Of the numerous structures which he designed in Boston, the greater number have long been demolished, including the Federal Street Theater (1794), the first theater in New England His chief monumental works remain—the statehouse in Boston (1799), University Hall at Harvard Univ (1815), and the Massachusetts General Hospital (1820) From 1818 to 1830 Bulfinch carried to completion the CAPITOL at Washington, of his own contributions there remains the west portico, with the terraces and steps forming the approach to it In this work and in the Massachusetts statehouse he evolved an architectural composition which has been used for state capitols throughout the country He designed a memorial column on Beacon Hill (1789), Massachusetts State Prison (1803), a number of Massachusetts courthouses, and Franklin Crescent in Boston (1793) The last was a long curved row of 16 residences, inspired by the continuous block of houses which had been erected by Robert Adam and others in England The First Church of Christ in Lancaster, Mass (1816–17), one of the few remaining churches of the many which he designed, is one of his finest productions While Bulfinch's works fall into the general category of "early American" architecture, they yet bear a distinctive stamp of his own Their elegance, repose, and refinement of detail rank them among the best products of the nation's early years See C A Place, *Charles Bulfinch* (1925)

Bulfinch, Thomas, 1796–1867, American author, b Newton, Mass , grad Harvard, 1814 He wrote a series of works popularizing fable and legend—*The Age of Fable* (1855), *The Age of Chivalry* (1858), *Legends of Charlemagne* (1863), and *Oregon and Eldorado* (1866)

Bulgakov, Mikhail Afanasyevich (mĕkhīl' ĭfŭnä'syĭvĭch bo͞olga'kŭf), 1891–1940, Russian novelist and playwright He was the author of satirical stories (*The Devilsad*, 1925) and comedies (*Zoe's Apartment*, 1926) and of the long novel *The White Guard* (1925), in which a Kievan family hostile to the revolution is sympathetically portrayed This was dramatized as *The Days of the Turbins* (1926, Eng tr., 1934)

Bulgari: see BULGARS, EASTERN

Bulgaria (bŭlgâ'rēù), republic (42,795 sq mi , pop 7,022,206), SE Europe, on the Balkan Peninsula. It is bounded on the east by the Black Sea, on the north by Rumania, on the west by Yugoslavia, on the south by Greece, and in the southeast by European Turkey The capital is SOFIA, and other cities are Plovdiv, Varna (main port of Bulgaria), and Ruse. Traversed by ranges of the BALKANS, Bulgaria is a land of slopes and of fertile valleys The Danube, the Maritsa, and the Struma are the principal rivers Bulgaria is largely agricultural, yielding grain, tobacco, and roses, and the chief industrial products are cotton textiles and tobacco Production of attar of roses, once the distinctive industry of Bulgaria, has greatly declined since c 1930 From the many mineral deposits only coal, iron, and salt are mined in considerable quantity. The population consists chiefly of Bulgars (88 percent) and of Turks (8 percent); 85 percent belong to the Orthodox Eastern Church, and 13 percent are Moslems Ancient THRACE and MOESIA, which modern Bulgaria occupies, were settled (6th cent A D) by Slavic tribes These were subjugated (660) by the Bulgars, a nomadic, probably Finnic, people (for the Bulgars of the Volga, see BULGARS, EASTERN) The Bulgar khan Krum in 809 captured Sofia from the Byzantines, defeated (811) Emperor Nicephorus I, besieged Constantinople, and withdrew only after obtaining yearly tribute from the Byzantines BORIS I introduced (865) Christianity His son, SIMEON I, vastly increased Bulgarian territories and took the title tsar The Bulgars had in the meantime merged with the Slavs and adopted their speech OLD SLAVONIC LITERATURE began to flourish under Simeon I, and at the same time the heresy of the BOGOMILS began to spread from Bulgaria In the 10th cent , Bulgaria crumbled under the attacks of a reinvigorated Byzantium, and in 1018 it was annexed by Emperor BASIL II Byzantine domination was weakened by the invasions of the PECHENEGS and CUMANS and by internal disorders at Constantinople In 1186 a new Bulgarian empire rose when Ivan Asen (Ivan I) was crowned tsar at TRNOVO His son, Kaloyan, crowned in 1204 with the approval of the pope, defeated (1205) Emperor Baldwin I of Constantinople The height of Bulgar power was reached under IVAN II (Ivan Asen), whose rule extended over nearly the whole Balkan Peninsula save Greece, but it soon collapsed In 1330 Bulgaria became tributary to Serbia and after the battles of KOSSOVO (1389) and NIKOPOL (1396) was absorbed into the Ottoman Empire Turkish rule was particularly oppressive in Bulgaria, and rebellions were frequent After many centuries the administration (1864–69) of MIDHAT PASHA made Bulgaria briefly a model province, but by then Bulgarian nationalism was powerful, it was increased by the unpopular hold of the PHANARIOTS over the Bulgarian church In 1875 a rebellion, led by Stefan STAMBULOV, broke out The subsequent Turkish reprisals, famous as the "Bulgarian atrocities," served as occasion for the Russians to liberate (1877–78) their Slavic brothers (see RUSSO-TURKISH WARS) The Treaty of SAN STEFANO was so favorable to Bulgaria that a European congress was called for its revision (see BERLIN, CONGRESS OF) By the revised terms, N Bulgaria became a tributary principality under Turkish suzerainty, while S Bulgaria—then called Eastern Rumelia—and MACEDONIA remained under direct Turkish rule ALEXANDER (Alexander of Battenberg), first prince of Bulgaria, annexed (1885) E RUMELIA and repulsed a consequent Serbian attack His successor, Prince FERDINAND of Saxe-Coburg-Gotha, profiting from the revolution of the Young Turks in 1908, proclaimed Bulgaria independent with himself as tsar Bulgarian claims to Macedonia precipitated the BALKAN WARS of 1912–13, in which Bulgaria at first won and ultimately lost wide conquests In 1915 Bulgaria entered the First World War on the side of Germany and Austria-Hungary, and with the war's end the government collapsed, Ferdinand fled, and BORIS III succeeded (1918) In the peace (see NEUILLY, TREATY OF) Bulgaria lost its outlet to the Aegean Sea to Greece, S DOBRUJA to Rumania, and some territory to Yugoslavia The Agrarian party cabinet established (1919) by Premier STAMBULISKI held power until overthrown (1923) by a militarist coup d'état A more liberal regime succeeded in 1926 and ended in 1934, when Kimon Georgiev became premier with the help of the army In 1935 Boris III established his personal dictatorship Bulgaria saw in the Second World War an opportunity to satisfy its territorial claims In 1940 Rumania was forced to restore S Dobruja In 1941 Bulgaria joined the AXIS, allowed German troops to enter its territory, occupied parts of Yugoslavia and Greece, and declared war on England and the United States—but not on Russia On the mysterious death (1943) of Boris III, the infant SIMEON II succeeded Russia declared war on Bulgaria in Sept , 1944, and the opposition forces (Communists, Agrarians, and the pro-Russian army officers), headed by Kimon Georgiev, seized power immediately. An armistice followed, after Bulgaria declared war on Germany Soon the Communists succeeded, by maneuvers which were fruitlessly protested by the Western powers, in taking over the government The monarchy was abolished, and Georgi DIMITROV became premier in 1946 Industry was nationalized, resistance to collectivization of farms was broken by the execution (1947) of the Agrarian leader, Nikola Petkov, and one-party government was imposed in 1948. The peace treaty with Bulgaria, ratified in 1947, allowed Bulgaria to keep S

Dobruja Bulgaria adhered strictly to the COMINFORM in its quarrel with Yugoslavia See W S Monroe, *Bulgaria and Her People* (1914), F Schevill, *History of the Balkan Peninsula* (1922)

Bulgarian, Slavic language (Indo-European) See LANGUAGE (table).

Bulgarian literature. For early ecclesiastical writings, see OLD SLAVONIC LITERATURE Modern Bulgarian literature stems from the work of Father Paisi, who in 1762 began his history of the Slav Bulgarians, written to inspire national feeling and to stimulate the use of the Bulgarian language There was not at that time even a printing press in Bulgaria His imitators continued the effort to make Bulgarian a literary language, but the period of struggle (1840–75) for political and ecclesiastical independence saw the real beginnings of a literature To this time belonged the poets Sava Rakovski (1821–67) and Petko Rachev Slaveykov (1827–95), the story writer Lyuben Karavelov (1837–79), the dramatist Vasil Drumev (1841–1901), and the great national poet Khristo Botev, who died fighting the Turks Ivan Vazov was the first to make literature his profession After Bulgaria's liberation from Turkish rule in 1876, its literature became less didactic and revolutionary A group of regional writers of the late 19th cent included Todor Genchov Vlaykov (1865–), Georgi P Stamatov (1869–), Anton Strashimirov (1872–), the satirist Stoyan Mikhaylovski (1850–1927), and Aleko Konstantinov (1863–97), whose humorous *Bay-Ganyu* is one of the most popular of Bulgarian novels The poet Pencho Slaveykov (1866–1912), a son of P R Slaveykov, led in introducing other European literatures and literary trends into Bulgaria, his *Song of Blood* (1911–13) is an epic of the struggle against the Turks in 1876 Others of his period were the symbolist poet Peyo Kracholov Yavorov (1878–1914), the poet and dramatist Petko Y Todorov (1879–1916) and the story writer Elin Pelin (1878–) Bulgaria's losses in the Balkan Wars and the First World War gave rise to a poetry whose chief characteristic was mysticism, these poets include Ivan Grozev (1872–), Nikolay Raynov (1888–), Todor Trayanov (1882–), Nikolay Liliev (1885–), Dora Gabe (1886–), Elisaveta Bagryana, and especially Dimcho Debelyanov (1887–1916), a victim of the First World War Among the prose writers of the 20th cent are the novelists of peasant life Iordan Iovkov (1884–1938) and Dobri Nemirov (1892–) and the psychological novelist Georgi Raychev (1882–) The leading literary journals in Bulgaria of long standing are *Hyperion* and *Golden Horn* See Dimitri Shushmanov, *A Survey of Bulgarian Literature* (Eng tr, 1932)

Bulgarin, Faddey Venediktovich (fŭdyā'vĭnyudyēk'tûvĭch bōōlgā'rēn), 1789–1859, Russian journalist and novelist He was born Tadeusz Bulharyn, a Pole With Nicholas Grech in 1825 he founded the influential political daily the *Northern Bee*, which he employed against other and more inspired writers than himself, notably Pushkin He was the author of several historical novels, of which *Ivan Vyzhigin* (1830) is available in English (1831)

Bulgars, Eastern, people, probably speaking a Finnic language, who possessed a powerful state (8th–13th cent.) at the confluence of the Volga and the Kama, E European Russia Another branch of the same people moved west into present Bulgaria, where they merged with the Slavs The Eastern Bulgars accepted Islam in the 10th cent They were conquered by the Mongols in 1236 Their capital, Bulgari or Bolgari, was near Kazan The modern Chuvash, who now occupy the region, may be descended from the Eastern Bulgars

Bulge, Battle of the see BATTLE OF THE BULGE

Bulkley, Lucius Duncan, 1845–1928, American dermatologist, b New York city, M D College of Physicians and Surgeons, 1869 He was a founder and faculty member of the New York Post-Graduate Medical School, a founder of the New York Skin and Cancer Hospital, and author of a standard *Manual of Diseases of the Skin* (1882) and several works on cancer In his later years he became a crusader for the nonsurgical treatment of cancer He founded and edited the *Archives of Dermatology* and the journal *Cancer* See his autobiography, *Ebeneser Notes on a Busy Life* (1926)

Bulkley, river of central British Columbia, 120 mi long, a tributary of the Skeena river

Bull, Ephraim Wales, 1806–95, American horticulturist At his vineyard in Concord, Mass, he originated several grape varieties, including, in 1849, the Concord, which became the dominant grape in the E United States

Bull, Ole Bornemann (ō'lŭ bôr'numan), 1810–80, Norwegian violinist After his debut in Paris (1832) he toured in Europe and in America, playing mostly his own compositions and Norwegian folk music Very nationalistic, he founded a theater for national drama at Bergen (1850), and he attempted to found a Norwegian settlement in Pennsylvania See biography by Mortimer Smith (1943).

Bull, the see TAURUS

bull [Latin *bulla*=leaden seal], solemn official pronouncement of the pope Formerly the word was used for analogous edicts by other persons (e g, various Golden Bulls) The papal bull is the most solemn kind of pontifical utterance It was formerly sealed with lead, and it begins with the name of the pope and his title as *servus servorum Dei* [servant of the servants of God]. It is distinguished formally from an encyclical (ĕnsĭk'lĭkŭl), a letter to all the bishops in the world (rarely, the bishops of a country), and from a brief, a short letter, but the distinction tends to be blurred in practice All papal edicts are normally known by their first word or words Famous papal bulls, briefs, and encyclicals include *Laudabiliter*, c 1156, by ADRIAN IV (perhaps spurious), *Clericis laicos*, 1296, *Auscultа fili*, 1301, and *Unam sanctam*, 1302, all by BONIFACE VIII against PHILIP IV of France, the Bull of Demarcation, 1493, by ALEXANDER VI, *Exsurge Domine*, 1520, by LEO X against MARTIN LUTHER, *Unigenitus*, 1713, by CLEMENT XI against JANSENISM, *Dominus ac Redemptor*, 1773, by CLEMENT XIV, suppressing the Jesuits, *Mirari vos*, 1832, by GREGORY XVI, against LAMENNAIS, *Quanta cura*, 1864, by PIUS IX, introducing the *Syllabus errorum*, *Pastor aeternus*, 1871, by PIUS IX, on papal infallibility, a whole series of encyclicals by LEO XIII reorienting Catholic life in the modern world, among them *Aeterni Patris*, 1879, *Immortale Dei*, 1885, and *Rerum novarum*, 1891, *Pascendi*, 1907, by PIUS X on MODERNISM, *Quadragesimo anno* [in the 40th year, i e, since *Rerum novarum*], 1931, by PIUS XI, and two by Pius XI not written in Latin—*Non abbiamo bisogno*, 1931, against Italian Fascism, and *Mit brennender Sorge*, 1937, against the National Socialist regime in Germany Pius XII continued the practice of Leo XIII and Pius XI of using the encyclical form for important sermons to the Catholic world

Bullard, Robert Lee (bo͝ol'ûrd), 1861–1947, American general, b Alabama, studied at Alabama Agricultural and Mechanical College (now Alabama Polytechnic Institute), grad West Point, 1885 He saw varied military service—against the Apaches, in the Spanish-American War, and in the Philippines—and in the First World War was a major general commanding in France He retired in 1925 Bullard wrote *American Soldiers Also Fought* (with Earl Reeves, 1944)

bullbaiting, 17th-century amusement, particularly popular in England, in which trained dogs (bulldogs) attacked a tethered bull John Evelyn described (1670) it in his diary as a "rude and dirty pastime" Bullbaiting, along with bull-running (in which the bull was run down and killed by humans), bearbaiting, cockfighting, and dogfighting, was prohibited in England by an act of Parliament in 1835

bull bat. see NIGHTHAWK

bull bay see MAGNOLIA

bulldog, smooth-haired dog which probably originated in the British Isles The English bulldog has a heavy, low-slung body, broad chest, large skull, undershot jaw, and wrinkled face The front legs, which are shorter than the hind legs, give the appearance of being bowed, but the bones should not be curved In color the dog may be brindle, solid white, solid red, fawn, or piebald It developed into a dog of great courage and ferocity as a result of centuries of being bred for bullbaiting (until 1835, when bullbaiting and dogfighting became illegal) Afterward it was bred to eliminate the ferociousness, and the present breed is generally good-natured, gentle, and courageous The French bulldog, an intelligent and affectionate pet, is believed to have originated from crosses of a small variety of English bulldog with some other breeds It is a smaller dog (weighing from 19 lb to a maximum of 28 lb), its sleek coat may be brindle, fawn, white, or brindle and white The skull is flat between the ears and somewhat domed between the eyes, the ears are of a form known as bat ears, being broad at the base, elongated, and rounded at the top, and they are held erect See Enno Meyer, *The Bulldog* (1948)

Bullen, Anne: see BOLEYN, ANNE

Buller, Charles (bo͝ol'ûr), 1806–48, British statesman, b Calcutta, studied at Edinburgh under Thomas Carlyle and at Cambridge (B A Trinity College, 1828) He was a member of Parliament from 1830 until his death In 1838 he was secretary to Lord Durham, governor general of Canada, and he is credited by some with having drawn up Durham's report on the condition of the colony and the need for responsible government See E M Wrong, *Charles Buller and Responsible Government* (1926)

Buller, Sir Redvers Henry, 1839–1908, British general His military career began in China, and he later took part in campaigns against the Kafirs (1878–79), the Zulus (1879), the Boers (1881), and the Mahdists (1884–85) He served in Ireland and was quartermaster general and commander at Aldershot, before he took command of troops in the South African War in 1899 There his failure to relieve Ladysmith caused him to be superseded by Lord Roberts of Kandahar See memoir by Lewis Butler (1907), biography by Charles Henderson Melville (2 vols, 1923)

Bullet, Pierre (pyĕr' bülā'), 1639–1716, French architect, assistant to François Blondel in the construction of the Porte Saint-Denis, Paris (1672). His works in Paris include the Porte Saint-Martin (1674), the Church of St Thomas d'Aquin (1682), the high altar of the church of the Sorbonne (1675), and a number of private houses. He published a plan of the city in 1676

bullfighting, the national sport of Spain, popular also in Mexico and other parts of Latin America. A bullfight is conducted in a *plaza de toros*, an arena into which, on the occasion of a fight, comes a gorgeous procession of those who are to take part in it —matadors (who are to kill the bulls), *banderilleros* (who carry bright-streamered barbed darts with which to enrage the bull), picadors (who, riding worthless horses, are to infuriate the bull with lances), and *toreros* (who are to distract the bull by waving red flags) The matador to be successful must have enormous skill as well as great daring, there is a whole vocabulary of terms to describe the technical maneuvers of the skilled bullfighter There is grace and poetry as well as blood and sand in the arena Popular and successful matadors such as Juan Belmonte and Manolete also reap immense rewards of praise and money When the first bull has been dragged out, the arena is prepared for the second, and the process is repeated, five or six bulls, and perhaps twice as many horses, being killed during an afternoon The bulls are specially bred and are carefully selected for their strength and spirit A type of bullfighting was practiced by the Minoans, the Greeks, and the Romans The sport was introduced into Spain probably by the Moors It has never been popular in modern times except in Spanish-speaking countries and has been generally rejected as brutal In Portugal there developed a type of bullfighting in which the bulls are not killed See Ernest Hemingway, *Death in the Afternoon* (1932), Tom Lea, *The Brave Bulls* (1949), a novel

bullfinch, any of several European songbirds of the FINCH family, often caged The common species is a woodland bird, with plumage of blue gray above and tile red below It can be taught to whistle tunes Cassin's bullfinch occasionally visits Alaska

bullfrog, largest North American frog, an aquatic form with fully webbed toes The common bullfrog is found in the United States E of the Rocky Mts It utters deep bass croaks and sometimes a piercing cry It can close its nostrils and lie at the bottom of a pond for some time Bullfrog tadpoles require two or three years to become adults Of the edible frogs, the legs of the bullfrog are the only ones marketed in quantity in the United States

bullhead, name for several species of the genus *Ameiurus* of the catfish family, found in sluggish waters The brown bullhead or horned pout is the commonest It is usually not more than a foot long but may reach 18 in Others are the black and the yellow bullheads They eat animal and vegetable matter Also called bullheads are some species of the sculpin family, a group of large-headed, toothed fish with naked or partially scaled bodies There are some marine and some fresh-water forms in both hemispheres

Bullinger, Heinrich (hīn'rĭkh bo͝ol'lĭngur), 1504–75 Swiss Protestant reformer After the death of Zwingli in 1531, Bullinger became pastor of the principal church in Zurich and a leader of the reformed party in Switzerland He played an important part in compiling the first Helvetic Confession (1536), a creed based largely on Zwingli's theological views as distinct from Lutheran doctrine In 1549 the Consensus Tigurinus, drawn up by Bullinger and Calvin, marked the departure of Swiss theology from Zwinglian to Calvinist theory His later views were embodied in the second Helvetic Confession (1566), which was accepted in Switzerland, France, Scotland, and Hungary and became one of the most generally accepted creeds of the reformed churches He wrote a life of Zwingli and edited the great reformer's complete works

Bullitt, William Christian (bo͝ol'ĭt), 1891–, American diplomat, b Philadelphia, grad Yale, 1912 A newspaperman, he was made a member of the peace delegation at the end of the First World War and was sent on a secret mission to the USSR He resigned from service when his report favoring recognition of Russia was disregarded After 12 years of private life, he was made special assistant to Cordell Hull and served (1933–36) as first U S ambassador to the USSR Later he was ambassador to France (1936–41), ambassador at large in the Middle East (1941–42), and special assistant to the Secretary of the Navy (1942–43) He enlisted in the French army and served (1944–45) as a major

Bull Moose party see PROGRESSIVE PARTY

Bulloch, James Dunwoody (bo͝ol'uk), 1823–1901, Confederate naval agent in Europe, b near Savannah, Ga A former officer in the U S navy, Bulloch superintended the building, equipping, and dispatching of the *Florida*, the *Alabama*, and most of the other CONFEDERATE CRUISERS He was the author of *The Secret Service of the Confederate States in Europe* (1883).

Bullock, William A. (bo͝ol'uk), 1813–67, American inventor, b Greenville, N Y He became an expert mechanic and patented various implements before 1850, when he began working on the printing press that bore his name It was the first to feed auto-

matically from a continuous roll of paper, to print both sides of the sheet in the same operation, and to cut the paper at proper intervals It revolutionized the printing and journalism

Bull Run, small stream, NE Va , c 30 mi SW of Washington, D C Here were fought two important battles of the Civil War, July 21, 1861, and Aug. 29–30, 1862 The **first battle of Bull Run** (or first battle of Manassas) was the first major engagement of the war On July 16, 1861, the Union army under Gen Irvin McDowell began to move on the Confederate force under Gen P G T Beauregard at Manassas Junction Gen Robert Patterson's force at Martinsburg, which was to prevent the Confederate army under Gen J E Johnston at Winchester from uniting with Beauregard, failed, and by July 20 part of Johnston's army had reached Manassas On July 21 McDowell, turning Beauregard's left, attacked the Confederates near the stone bridge over Bull Run and drove them back to the Henry House Hill There Confederate resistance, with Gen T J Jackson standing "like a stone wall," checked the Union advance, and the arrival of Gen E Kirby Smith's brigade turned the tide against the Federal forces The retreat of the unseasoned Union volunteers became a rout, they fled to the defenses of Washington The equally inexperienced Confederates were in no condition to make an effective pursuit The South rejoiced at the result, while the North was spurred to greater efforts to win the war The **second battle of Bull Run** (or second battle of Manassas) was also a victory for the Confederates In July, 1862, the Union Army of Virginia under Gen John Pope threatened Gordonsville, a railroad junction between Richmond and the Shenandoah Valley Gen R E Lee sent Stonewall Jackson to protect the town, and on Aug 9, 1862, Jackson defeated N P Banks's corps, the vanguard of Pope's army, in the battle of Cedar Mt (or Cedar Run) When McClellan's army was gradually withdrawn from Harrison's Landing on the James river (where it had remained after the Seven Days battles) to reinforce Pope, Lee concentrated his whole army at Gordonsville He planned to strike before Pope could be reinforced Pope withdrew to the north side of the Rappahannock river Lee followed to the south side and on Aug 25 boldly divided his army By Aug 28 Jackson had marched to the Union right and rear, destroyed Union communications and supplies, and stationed his troops just west of the first Bull Run battlefield, where he awaited the arrival of James Longstreet with the rest of Lee's army Pope was attacking Jackson when Longstreet came up on Aug 29 The attack was repulsed, but Pope, mistaking a re-formation of Jackson's lines for a retreat renewed it the next day After the Federals were again driven back, Lee ordered Longstreet to counterattack That general, supported by Jackson, swept Pope from the field The Union forces retreated across Bull Run, badly defeated Lee's pursuit ended at Chantilly, where the Federals stopped Jackson on Sept 1, 1862 Pope then withdrew to Washington Both battlefields are included in Manassas National Battlefield Park (1,604 57 acres, est 1940)

bulls and bears. In speculative markets, a "bear" is a speculator who sells what he does not own in the hope that, before he has to deliver, he will be able to buy back at a lower price, thus making a profit He thus sells in the hope that prices will fall Though the risks are great, the profits are often great, because stocks tend to decrease in value faster than they rise in value, a falling market spreads fear, and hope is less suddenly contagious than fear A "bull" is the opposite of a bear A bull tries to force prices up, a bear to force them down, hence, it is said, the names—a bull tossing his victim up, a bear knocking him down.

bull terrier see terrier

Bulnes, Manuel (manwĕl' bo͞ol'nās), 1799–1866, president of Chile (1841–51) He served in the revolt against Spain and commanded the victorious Chilean forces at the battle of Yungay (1839), where the Peru-Bolivian confederation of Andrés Santa Cruz was destroyed Bulnes, a conservative, was elected president and, through stern and repressive measures, fostered economic and educational progress

Bülow, Bernhard Heinrich Martin, Fürst von (bĕrn'hart hĭn'rĭkh mär'tĭn fürst' fŏn bü'lō), 1849–1929, German statesman He held many diplomatic posts before he became, through the influence of Friedrich August von Holstein, foreign minister in 1897 and succeeded Hohenlohe-Schillingsfürst as chancellor in 1900 By his failure to gain the friendship of England and by his aggressive foreign policy, especially toward France in the Moroccan crisis and toward Russia in the Bosnian crisis of 1908, he increased German isolation and strengthened the Triple Entente (see Triple Alliance and Triple Entente) Having lost the confidence of Emperor William II and the majority of the Reichstag, he resigned in 1909 He later (1914–15) was ambassador to Italy. See his memoirs (Eng tr , 4 vols , 1931–32)

Bülow, Friedrich Wilhelm, Freiherr von (frē'drĭkh vĭl'hĕlm frī'hĕr), 1755–1816, Prussian general in the Napoleonic Wars. After his victories (1813) over the French under Marshal Ney at Gross Beeren and Dennewitz he was created count of Dennewitz In 1815 he played a conspicuous part in the Waterloo campaign

Bülow, Hans Guido von (hăns' go͞o'dō), 1830–94, German pianist and conductor Upon hearing *Lohengrin* in 1850 at Weimar under Liszt's direction, he abandoned his legal education for a musical one, studied piano with Liszt, and later conducted the premières of several of Wagner's operas. In 1857 he married Liszt's daughter Cosima, who left him in 1869 and later became the wife of Wagner While retaining his admiration for Wagner's music, Bülow became Brahms's most ardent champion, the most persistent of his aphorisms was his exaltation of Bach, Beethoven, and Brahms as the three B's of music *Possessing a prodigious memory* and a vast repertoire, Bülow was one of the first 19th-century pianists to play Bach's *Well-tempered Clavier* He made critical and interpretive editions of the works of many composers The first of the modern virtuoso conductors, he achieved his greatest distinction as conductor (1880–85) of the ducal orchestra at Meiningen

Bülow, Karl von, 1846–1921, German field marshal In 1914 he commanded an army in France and Belgium

bulrush, any sedge of the genus *Scirpus*, widely distributed grasslike or rushlike plants with terminal scaly clusters of small flowers (spikelets) Some bulrushes have grasslike leaves, in others the leaves are reduced until they are not recognizable as leaves Bulrushes grow in shallow water or wet soil and are sometimes cultivated in aquatic gardens Certain bulrushes are woven for chair seats and mats Bulrushes are often called club rush, other somewhat similar plants are sometimes called bulrush The bulrush in which the infant Moses was hidden (Ex 2 3) was the papyrus

Bulwer, Sir Henry (William Henry Lytton Earle Bulwer) (bo͞ol'wur, lĭ'tun), 1801–72, English author and diplomat, eldest brother of the novelist Edward Bulwer-Lytton Though he sat in Parliament for some years (1830–37, 1868–71), most of his long life was spent in diplomatic work, interspersed with writing As secretary of the embassy in Constantinople (1837–38) he secured a commercial treaty with Turkey When he was ambassador to Spain (1843–45), he negotiated peace between Spain and Morocco, but offended the dictator, Ramón Narváez, and was ordered to leave, his conduct was endorsed in England As minister to Washington (1849–52) he concluded the important Clayton-Bulwer Treaty of 1850 Among his later diplomatic posts were Florence and Bucharest In Constantinople again (1858–65), he carried out Palmerston's Near Eastern policy In 1871 he was created Baron Dalling and Bulwer His rather pleasant writings include *An Autumn in Greece* (1826), *France Social, Literary, and Political* (1834–36), *Historical Characters* (1867), and biographies of Byron (1835) and Palmerston (1870–74, unfinished).

Bulwer-Lytton, Edward George Earle Lytton, 1st **Baron Lytton,** 1803–73, English novelist and dramatist, grad Trinity College, Cambridge, 1826, son of Gen William Bulwer and Elizabeth Barbara Lytton Known earlier as Bulwer, he assumed the name Bulwer-Lytton in 1843 when he inherited the Lytton estate "Knebworth " He was created Baron Lytton of Knebworth in 1866 Bulwer's marriage in 1827 to Rosina Wheeler displeased his mother, who cut off his allowance He turned to writing for an income, and his novels rapidly won popularity His prolific output of the next few years included *Falkland* (1827), *Pelham* (1828), a novel in which contemporary figures appear thinly disguised, *Paul Clifford* (1830), *Eugene Aram* (1832), and *The Last Days of Pompeii* (1834) and *Rienzi* (1835), the most popular of his historical novels He was editor (1831–32) of the *New Monthly* Bulwer's marriage became increasingly unhappy, and he and his wife were legally separated in 1836 During his early political career (he was a member of Parliament, 1831–41) Bulwer was a reformer, but he was returned to Parliament in 1852 as a conservative In 1858 he was appointed colonial secretary The best known of Bulwer-Lytton's plays (*The Duchesse de la Vallière*, 1836, *The Lady of Lyons*, 1838, *Richelieu*, 1838, *Money*, a comedy, 1840) have been often revived Among the later novels still read are *The Last of the Barons* (1843), *Harold* (1848), *The Caxtons* (1849), and *Kenelm Chillingly* (1873) See biography by T H S Escott (1910), Michael Sadleir, *Bulwer and His Wife* (1933, issued as *Bulwer a Panorama*, Part I, 1931)

Bulwer-Lytton, Edward Robert, 1st **earl of Lytton,** pseud **Owen Meredith,** 1831–91, English diplomat and poet, son of the novelist, Bulwer-Lytton He was in the diplomatic service from 1850 to 1875, when Disraeli appointed him viceroy of India, for his services in the Afghan wars he was created an earl (1880). He was ambassador to France from 1887 His poems, written under his pseudonym, include *Clytemnestra and Other Poems* (1855), *The Wanderer* (1858), *Lucile* (1860), a popular novel in verse, *Chronicles and Characters* (1868), *Fables in Song* (1874); *After Paradise* (1887), and *King Poppy* (1892). He also wrote a biography of his father (2 vols , 1883) See his *Selected Poems* (1906) and *Letters to Robert and Elizabeth Barrett Browning* (ed by A B and J L Harlan, 1937), Lady Betty Balfour, *Lord Lytton's Indian Administration* (1899), A B Harlan, *Owen Meredith* (1940)

Bunau-Varilla, Philippe Jean (fēlēp' zhăⁿ' bünōvärēyä'), 1859–1940, French engineer, prominent in the Panama Canal controversy An engineer after 1884 in the original French company for building the canal, he was chief engineer before the company went bankrupt in 1889 and was the organizer and promoter of the new company that took over the rights of the old in 1894 Unable to develop his plans in France, he undertook to sell the company to the United States The attention of the U S government had been riveted on the alternative canal route through Nicaragua, but Bunau-Varilla, arriving in 1901, soon had converted Mark Hanna and President McKinley to the Panama scheme He persuaded the French directors to reduce the price of the company to $40,000,000 President Theodore Roosevelt was converted to Panama When difficulties arose with the Colombian government, the resourceful Bunau-Varilla conspired with insurrectionists in Panama and touched off (1903) the revolution The revolution was successful (see Panama Canal), and Bunau-Varilla as minister from the new republic to the United States negotiated the Hay–Bunau-Varilla Treaty, which gave the United States control of the Panama Canal He wrote *Panama the Creation, Destruction, and Resurrection* (1913) and *From Panama to Verdun* (1940)

Bunce, Oliver Bell, 1828–90, American author and publisher, b New York city Of his several successful plays which were produced, the best was *Love in '76*, of Revolutionary times, played by Laura Keene at her New York theater in 1857 But dramatic success brought him no money, and he turned to publishing At D Appleton & Company he edited *Appleton's Journal* and produced a series of very profitable illustrated books edited by William Cullen Bryant—*Picturesque America* (1872–74) *Picturesque Europe* (1875–79), and *Picturesque Palestine* (1881–84) *The Opinions and Disputations of Bachelor Bluff* (1882) was the best known of his own later books

Bunce, William Gedney, 1840–1916, American landscape painter, b Hartford, Conn , studied in New York, Düsseldorf, and Antwerp He is known especially for his decorative Venetian scenes Among his best-known pictures are *Evening View in Venice* and *Early Morning* (Metropolitan Mus); *Venice* (Montclair, N J , Art Mus), *Venetian Landscape* (Osborne House, England), and *On the Lagoon* (R I School of Design, Providence)

bunchberry or **dwarf cornel,** low North American and Asiatic perennial wild flower (*Cornus canadensis* or *Chamaepericlymenum canadense*), related to the dogwood The small flowers are encircled by white, petallike bracts simulating a single blossom above the whorl of leaves The bunched red berrylike fruits are edible

Bunche, Ralph Johnson, 1904–, American government official and United Nations mediator, b Detroit, grad Univ of California, 1927, and Harvard (M A , 1928, Ph D , 1934) After study at Northwestern Univ and the London School of Economics, he did world-wide research in colonial administration and race relations and taught at Howard Univ after 1928 In government service after 1941, he worked under the joint chiefs of staff and became chief research analyst in the OSS (1942–44) The first Negro to be a division head in the Dept of State (July–Oct , 1945), he entered the United Nations in 1946 as director of the Trusteeship Division He became (Dec , 1947) principal secretary of the UN Palestine Commission and helped to bring peace to the Holy Land.

bungalow [Anglo-Indian from Hindu, =Bengaleso (house)], dwelling built in a style developed from that of a form of rural house in India The original bungalow typically has one story, few rooms, and a maximum of cross drafts, with high ceilings, unusually large window and door openings, and verandas on all sides to shade the rooms from the intense light and tropical heat The verandas are included under the slope of the one roof, which is generally constructed of bamboo and covered with a thick thatch of woven maize The heavy walls are of masonry, and, because of the destructiveness of termites, the use of wood is avoided wherever possible The kitchen, servants' quarters, and other adjuncts occupy a detached building in a space enclosed by a wall and known as the compound Dwellings of this general type became popular in S California, with numerous differences in

plan and materials, and were termed bungalows. The word thus came to be used for a cottage or for any small house with verandas covered by low, wide eaves

Bunin, Ivan Alekseyevich (bo͞o'nĭn, Rus ĭvan' ŭlyĭksyā'yĭvĭch bo͞o'nyĭn), 1870–, Russian novelist, short-story writer, and poet He was awarded the 1933 Nobel Prize in Literature In his youth he belonged to Gorki's group of young realists but avoided political activities His early works were poems and translations, among the latter one of *Hiawatha* He attracted notice in 1910 with *The Village* (Eng tr , 1923), a novel in the Turgenev tradition depicting the ugliness of peasant life before the 1905 revolution Many other works, prose and verse, followed in the same vein, of which the story "Dry Valley" (1911–12) is available in English (in *The Elaghin Affair*, 1935). Although a poet of distinction, Bunin is perhaps best known for his short stories, especially "The Man from San Francisco" (1916, Eng tr in *The Man from San Francisco and Other Stories*, 1923), and for his autobiographical novel *The Well of Days* (1930, Eng tr., 1933), a work Tolstoyan in stature Bunin opposed the revolution and after 1919 resided abroad

bunion (bŭn'yŭn), an enlargement of the metatarsal joint of the large or small toe caused by pressure on the FOOT in such a way that the bursae in these regions become inflamed Later there are changes in the bone Corrective shoes and, in some cases, operation may be used to treat bunions Bunions may be painful from the joint changes or because of the presence of a CORN Correct footwear is the method of prevention

Bunker Hill, city (pop 1,082), SW Ill , NE of Alton, inc. 1857 A tornado in March, 1948, destroyed much of the town.

Bunker Hill, battle of, in the American Revolution, June 17, 1775. Detachments of colonial militia under Artemas WARD, Nathanael GREENE, John STARK, and Israel PUTNAM laid siege to Boston shortly after the battles of Lexington and Concord, but Thomas GAGE, British commander in the city, made no attempt to break it until he was reinforced (in May) by troops led by William Howe, Sir Henry Clinton, and John Burgoyne The Continental forces learned of the British plan to take the heights of Dorchester and Charlestown, and William Prescott was sent to occupy Bunker Hill outside Charlestown. Prescott instead chose the neighboring Breed's Hill to the southeast The fight which ensued is often called the battle of Bunker Hill Howe was ordered to take the position, and after two slaughterous failures a third charge dislodged the Americans, who had run out of powder The British victory failed to break the siege, and gallant American defense heightened the colonial morale and resistance In March, 1776, Washington ordered Dorchester Heights fortified, and Howe's position became so untenable that he evacuated (March 17, 1776) his troops and many Loyalists from Boston to Halifax See John Jennings, *Boston, Cradle of Liberty* (1947)

Bunkie, town (pop 3,575), central La , SE of Alexandria, in a cotton and sugar-cane area, founded 1882

Bunnell, town (pop 1,030), co seat of Flagler co , NE Fla , S of St Augustine, in a timber and potato area

Bunner, Henry Cuyler, 1855–96, American journalist, poet, and story writer, b Oswego, N Y He became famous as the editor of *Puck*, 1877–96, and as a writer of *vers de société* in *Puck* He collected some of his poems in *Airs from Arcady and Elsewhere* (1884), and his popular short stories were collected in *Zadok Pine* (1891), *Short Sixes* (1891), and other volumes His novels were less successful See biography by G E Jensen (1940)

Bunni (bŭn'ī), Levitical name mentioned in confusing passages. Neh 10 15, 11.15 Once the name seems to be an alternative of BINNUI 1.

Bunsen, Christian Karl Josias, Baron von (krĭs'tyan kärl' yōsĕ'ĭas bärōn' fŭn bo͞on'sun), 1791–1860, Prussian diplomat and scholar, usually called the Chevalier von Bunsen He was resident minister (1827–38) at Rome, then ambassador at Berne (1839–41) He carried on an intimate correspondence with Frederick William IV and urged liberal ideas upon him In 1841 he negotiated an agreement about an Anglo-Prussian bishopric at Jerusalem. Bunsen was appointed to the London embassy, where he made a great reputation He was very learned and wrote on language, literature, history, law, and religion

Bunsen, Robert Wilhelm (bŭn'sŭn, Ger rō'bĕrt vĭl'hĕlm bo͞on'sun), 1811–99, German scientist, educated at the Univ of Göttingen, where he received his doctorate in 1830. He served on the faculties of several universities and was at Heidelberg from 1852 to 1889 His investigation of certain organic compounds of arsenic brought his first important contribution to chemistry. He studied the gases issuing from the blast furnace and evolved a method of gas analysis. Using the SPECTROSCOPE, in association with Kirchhoff at Heidelberg, he discovered the elements cesium and rubidium by spectrum analysis He invented an electric CELL, the Bunsen cell. With Roscoe, he did important work in photochemistry. Besides many articles he wrote *Gasometrische Methoden* (1857) and, with Kirchhoff, *Chemische Analyse durch Spektralbeobachtungen* (1861). He is known for his invention (1855) of the **Bunsen burner,** a gas burner commonly used in scientific laboratories. The principle involved is also applied to common gas stoves and lamps, it consists essentially of a hollow, cylindrical tube which is fitted vertically around the flame and which has an opening at the base to admit air A smokeless, nonluminous flame of high temperature is produced

bunt see SMUT

bunting, small, plump bird of the FINCH family Among the American buntings are the INDIGO BUNTING, the painted bunting or nonpareil, a red, blue, and green bird, the snow bunting, and the dickcissel The vesper sparrow is called the bay-winged bunting European buntings include the corn bunting, the snow bunting, the yellowhammer the cirl bunting, and the ortolan

Buntline, Ned, pseud of **Edward Zane Carroll Judson,** b 1822 or 1823, d 1886, American adventurer and writer Little is known of his early life except that he was born in either Stamford, N Y , or Philadelphia He ran away to sea as a boy, served as a midshipman, and resigned *Ned Buntline's Own*, a sensational magazine he founded in Nashville in 1845, was interrupted in 1846 when he was lynched for a murder, but he was secretly cut down alive and released, the magazine was resumed in New York There he led a mob in the Astor Place riot of 1849 against the English actor Macready and was fined and imprisoned He turned up in St Louis in the '50s as an organizer of the Know-Nothing movement. In 1864 he was dishonorably discharged from the Union army After the war he met W F Cody (Buffalo Bill) and persuaded him to act in a Buntline play, *The Scouts of the Plains* (1872), and so started Cody on his stage career Since 1846 Buntline had been writing trashy novels, forerunners of the worst sort of dime novels, among them *Cruisings Afloat and Ashore* (1848), *The Mysteries and Miseries of New York* (1848), and *Stella Delorme, or, The Comanche's Dream* (1860) See biography by F. E Pond (1919)

bunya-bunya (bŭn'yŭ), large coniferous tree (*Araucaria bidwillii*) of Australia with seeds used by native tribes as a staple food Each tribe and each family own a certain number of trees by inheritance, and they return to them, sometimes from long distances, when the trees bear in abundance, which occurs every three years In other countries the tree is grown as an ornamental pot plant

Bunyan, John, 1628–88, English author, b Elstow, Bedfordshire, son of a tinker After a brief period at the village free school, Bunyan was set to learn the tinker's trade, which he followed intermittently throughout the rest of his life Drafted into the parliamentary army in 1644, he served until 1647 and then married The reading of several pious books owned by his wife awakened Bunyan's religious sense, constant study of the Bible completed his conversion, and in 1653 he began acting as lay preacher for a congregation of Baptists in Bedford In this capacity he came into conflict with the Quakers led by George Fox and turned to writing in defense of his beliefs In 1660 agents of the restored monarchy arrested him for unlicensed preaching, and he remained in prison for the next 12 years During this period he wrote nine books, the most famous of which is *Grace Abounding to the Chief of Sinners* (1666), a fervent spiritual autobiography Soon after his release in 1672 he was reimprisoned briefly and wrote the first part of *The Pilgrim's Progress from This World to That Which Is to Come*, published in 1678 This allegory recounts how Christian journeyed from the City of Destruction through the Slough of Despond, the Valley of Humiliation, the Valley of the Shadow of Death, Vanity Fair, the Delectable Mountains, the House Beautiful, and Beulah Land to the Celestial City A second part—describing the way in which Christian's wife, Christiana, makes the same pilgrimage—appeared in 1684 *Pilgrim's Progress* is remarkable for its simple, biblical style, for its vivid presentation of character and incident, and for its universal applicability It is one of the world's great books and has been translated into many languages By the time Bunyan was released from his second imprisonment, he had become a hero to the members of his sect, and he continued preaching and writing until his death The principal works of these latter years are *The Life and Death of Mr Badman* (1680) and *The Holy War or, The Losing and Taking Again of the Town of Mansoul* (1682), allegorical works well characterized by their titles Bunyan's great and continued popularity rests on the spiritual fervor which permeates his works and on the compelling style in which they are written, his prose unites the eloquence of the Bible and the vigorous realism of common speech. See John Brown, *John Bunyan. His Life, Times, and Work* (revised by F M. Harrison, 1928); W. Y. Tindall, *John Bunyan, Mechanick Preacher* (1934).

Bunyan, Paul, in American lumber-camp legend, hero of a series of "tall tales" current through the timber country from Michigan westward. He is said to have ruled his Gargantuan lumber camp between the winter of the blue snow and the spring that came up from China. His prized possession was Babe the Blue Ox, which measured 42 ax handles and a plug of tobacco between the horns Paul Bunyan may have been based on a doughty fighter of the Papineau rebellion in Canada in 1837 The stories have been set down in Esther Shephard, *Paul Bunyan* (1924), James Stevens, *Paul Bunyan* (1925) and *The Saginaw Paul Bunyan* (1932), Glen Rounds, *Ol' Paul, the Mighty Logger* (1936), and Wallace Wadsworth, *Paul Bunyan and His Great Blue Ox* (1926, school ed , 1937) Tony Beaver is the legendary figure of Southern lumber camps See M P Montague, *Up Eel River* (1928).

Bunzlau (bo͞on'tslou) or **Bolesławiec,** Pol *Bolesławiec* (bôlĕswä'vyĕts), town (pop 3,145, 1939 pop 22,455), Lower Silesia, on the Bober It was transferred to Polish administration in 1945 (see SILESIA) Bunzlau was the scene (1813) of a Prussian victory over the French, and it was the birthplace of the poet Martin Opitz Chiefly a trade center, Bunzlau also produces pottery

Buoninsegna, Duccio di see DUCCIO DI BUONINSEGNA

Buononcini, Italian musicians see BONONCINI

buoy (boi, bo͞o'ĭ), **float** anchored in navigable waters to mark channels and indicate dangers to navigation (isolated rocks, mine fields, cables, and the like) A buoy (mooring buoy) may also be used for the anchoring of ships The shape, the color, the number, and the marking of the buoy are significant, but unfortunately the significance varies in different countries, and the system devised by the International Maritime Conference at Washington in 1889 and based on color was not adopted Generally large buoys are of steel or iron, though the spar buoys (upright posts) used in northern latitudes are of wood Nun buoys have conical tops, can buoys flat tops Buoys may be fitted with bells or whistles (usually operated by motion of the waves) and light buoys (equipped with electric batteries) are much used, radio buoys came into use in 1939

bur, popular name for fruits that have barbed, pointed, or rough outgrowths, by clinging to the fur or hair of animals and the clothing of man they are transported from the parent plant Some common burs include those of the chestnut, burdock, bur marigold, and cocklebur Burs are particularly obnoxious to sheep growers because of the difficulty of removing them from wool

Burano (bo͞ora'nō), village, NE Italy, built on four islets in the lagoon of Venice It has been famous for its lace since the 15th cent

Burbage, James (bûr'bĭj), d 1597, English actor One of the earl of Leicester's players in 1574, he leased land in Finsbury Fields in 1576 and erected the first permanent theater in London, called The Theatre The structure of this theater was removed to Bankside, c 1598, and set up as the GLOBE THEATRE, which burned down in 1613 Burbage was a builder and an owner of the Blackfriars Theatre in 1596

Burbage, Richard, 1567?–1619, English actor The son of James Burbage, he inherited a share in the Blackfriars Theatre and an interest in the Globe, where, in 1603, he was with Shakspere in the Lord Chamberlain's company Unrivaled at either theater, he appeared in many of the original productions of Beaumont and Fletcher, Jonson, and Shakspere His most celebrated roles were Richard III, Hamlet, Lear, and Othello, and he played leading parts in Jonson's *Sejanus* and *Every Man in His Humour* He had an excellent talent as a painter, and the Felton portrait of Shakspere, in oils, is attributed to his hand

Burbank, Luther, 1849–1926, American plant breeder, b Lancaster, Mass. He experimented with thousands of varieties of plants and developed many new ones, including new varieties of prunes, plums, raspberries, blackberries, apples, peaches, and nectarines Besides the Burbank potato, he produced new tomato, corn, squash, pea, and asparagus forms, a spineless cactus useful in cattle feeding, and many new flowers, especially lilies and the famous Shasta daisy His methods and results are described in his books—*How Plants Are Trained to Work for Man* (8 vols , 1921) and, with Wilbur Hall, *Harvest of the Years* (1927), and *Partner of Nature* (1939)—and in his descriptive catalogues, *New Creations*. After 1875 his work was done at Santa Rosa, Calif See D S Jordan and Vernon Kellogg, *The Scientific Aspects of Luther Burbank's Work* (1909), E B Beeson, *The Early Life and Letters of Luther Burbank* (1927), W L Howard, *Luther Burbank* (1945)

Burbank, city (1940 pop. 34,337, 1947 special census pop 72,588), in Glendale township, S Calif , N of Los Angeles, laid out 1887, inc 1911. Its industries include moving-picture production and aircraft manufacture

Burchell, William John (bûr'chŭl), 1782?–1863, English explorer and scientist He was schoolmaster (under the East India Company) at St. Helena (1805–10), whence he sailed for South Africa. His journey (1811–15) across the Karroo desert to

Griqualand and Bechuanaland is described in his *Travels in the Interior of Southern Africa* (1822–24). His African collections comprised 63,000 natural objects and much astronomical and meteorological material He traveled in Brazil (1825–29), visiting São Paulo Many animal and plant species discovered by him bear his name

Burchfield, Charles, 1893–, American water-color painter, b Ashtabula Harbor, Ohio After high school he became an accountant, but in 1912 won a scholarship and went to the Cleveland School of Art His work was exhibited in New York in 1916, but he developed his characteristic style only after some months in an army training camp in 1918 He is widely known as a painter of Victorian mansions, false-front stores, and other relics of the late 19th cent still prominent in the Middle Western landscape These somber subjects are painted with a slightly ironic realism, clarity, and vigor Burchfield's color is subtle, cool, and luminous From 1921 to 1929 he worked also as a wallpaper designer He won awards in water-color exhibits in Cleveland and Philadelphia, and his work is to be seen in many prominent American galleries His *False Front* (Metropolitan Mus) and *Freight Cars under a Bridge* (Detroit Inst of Arts) are characteristic water colors He paints also in oil and gouache

Burckhardt, Jacob Christoph (yä'kôp krīs'tôf bo͝ork'härt), 1818–97, Swiss historian, one of the founders of cultural history He studied under Ranke at the Univ of Berlin and taught (1844–53, 1858–93) history and art history at the university of his native Basel, refusing the offer (1872) to succeed Ranke in his chair at Berlin His best-known work is *Die Kultur der Renaissance in Italien* (1860, *The Civilization of the Renaissance in Italy*, available in several English editions) It remains one of the great classics on the subject, although its primarily esthetic view of the Renaissance period, which Burckhardt considered the product of conscious creativeness, has been attacked by later historians Burckhardt profoundly influenced his friend Nietzsche, who taught at Basel at the same time, J A Symonds acknowledged his debt to Burckhardt He also wrote *Die Zeit Konstantins des Grossen* (1852, Eng tr , *The Age of Constantine the Great*, 1949), a work of profound scholarship and great literary merit, *Cicerone* (1855), a guide to Italian art, and other works on history and art His *Weltgeschichtliche Betrachtungen* (Eng tr , *Force and Freedom Reflections on History*, 1943) and his *Griechische Kulturgeschichte* [history of Greek culture] were published posthumously Burckhardt foresaw, with apprehension, that the spiritual and esthetic values of man were doomed to be eclipsed by the increasing requirements of the state, by large-scale wars, and by industrialization

Burckhardt, John Lewis (bûrkhärt), 1784–1817, explorer,b Switzerland, educated in Germany He was supported in exploration by an English association for promoting African discovery He traveled in Syria and Egypt (1809–13), rediscovered PETRA (1812), then, posing as a learned Moslem, was the first Christian to reach Medina A notable description of Mecca is included in his *Travels in Arabia* (1829) He died while preparing to set out from Upper Egypt for his original goal, the Niger His journals, published by the African Association, include *Travels in Nubia* (1819), *Travels in Syria and the Holy Land* (1822), *Notes on the Bedouin and Wahábys* (1830), and *Arabic Proverbs* (1830)

Burckmair, Hans see BURGKMAIR, HANS

Burdett-Coutts, Angela Georgina Burdett-Coutts, Baroness (bûrdet'-kōōts'), 1814–1906 English philanthropist Her multitudinous charitable works ranged from the building of model tenements in London to the endowment of colonial bishoprics She became famous for her benevolence, hospitality, and fortune and in 1871 was made a peeress by Queen Victoria Among her many noted friends was Charles Dickens, whose letters to her have been published

Burdette, Robert Jones, 1844–1914, American humorist, b Greensboro, Pa He became famous for his humorous column in the Burlington, Iowa, *Daily Hawkeye* In *The Rise and Fall of the Moustache and Other Hawkeyetems* (1877) are reprinted some of his popular columns and his lectures After 1888 he became a well-known Baptist preacher See biography by C B Burdette (1922)

burdock, any plant of the genus *Arctium*, coarse Old World biennials, mostly weedy in North America They have composite flowers, usually purple, followed by roundish, many-seeded burs The great burdock (*Arctium lappa*) has been used medicinally and (in Japan) cultivated as a vegetable called gobo The common burdock is *Arctium minus* The cocklebur is sometimes confused with burdock

Burdwan or Bardwan (both bûrdwän'), town (pop 62,910), S West Bengal state, India A group of 108 Siva linga temples (1788) is near by. Vegetable oils and cutlery are manufactured.

bureaucracy, widely speaking, the body of officeholders of the executive arm of government The term usually carries a suggestion of reprobation and implies incompetency and parasitism among the functionaries Bureaucracy existed in imperial Rome and China and in the national monarchies of Europe The revolutions of the 17th and 18th cent emphasized the rule of the national legislatures, but in modern states complex industrial and social legislation has called for a vast growth of administrative functions of government The power of permanent and nonelective officials to apply and even initiate measures of control over the national administration and economy has raised the bureaucracy to critical importance in the life of the state Modern governments are usually administered by honest and capable experts, but critics object that bureaucracy is dangerously powerful and largely unresponsive to control by the people's elected representatives See CIVIL SERVICE See J D Kingsley, *Representative Bureaucracy an Interpretation of the British Civil Service* (1944)

Bureya (bo͝orā'ä), mountain range, SW Khabarovsk Territory, RSFSR, in E Siberia, extending into N China as the Lesser KHINGAN range It rises to 7,275 ft and yields gold, tungsten, molybdenum, iron, and coal The Bureya river, 480 mi long, rises in the N Bureya range and flows southwest to join the Amur at Blagoveshchensk

Burgas (bo͝or'gəs'), city (pop 43,684), E Bulgaria, a Black Sea port There are manufactures of foodstuffs, cotton textiles, machinery, and radios

Burgaw (bûr'gô), town (pop 1,476), co seat of Pender co , SE N C , N of Wilmington, in a diversified farm area noted for strawberries

Burgdorf (bo͝ork'dôrf), Fr *Berthoud* (bĕrtōō'), town (pop 10,197), Bern canton, Switzerland, on the Emme river It has an old castle in which Pestalozzi held his first school (1799–1804) There is diversified industry

Burgenland (bûr'gənländ, Ger bo͝or'gənlänt), autonomous province or *Bundesland* (1,526 sq mi , pop 274,078), E Austria It is a long, narrow, hilly area bordering on Hungary and indented by the NEUSIEDLER LAKE The capital is Eisenstadt Winegrowing is the chief occupation The territory was transferred from Hungary by the treaties of Saint-Germain (1919) and Trianon (1920) SOPRON, its leading town, was returned (1921) to Hungary after a plebiscite

Bürger, Gottfried August (gôt'frēt ou'gōōst bûr'gûr), 1747–94, German poet, best known for his revival of the German ballad His most famous work in this form, *Lenore* (1773), was translated into English and other languages and had a far-reaching influence He edited and wrote for the Göttingen *Musenalmanach* and was one of the Göttingen poetical brotherhood For a time he was considered the author of the Munchausen stories, which he translated into German from the English edition of 1786 His irregular and unhappy life was embittered at the end by Schiller's severe criticism Among his other better-known works is the ballad "The Wild Huntsman" (1786) For a list of translations, see Bayard Q Morgan, *Critical Bibliography of German Literature in English* (1938)

Burges, William (bûr'jĭs), 1827–81, English architect An ardent devotee of medievalism, he was prominent in the Gothic revival He is known for his design of Cork Cathedral (1862), the rebuilding of Cardiff Castle (1865), and his writings and designs in the decorative arts

Burgess, Charles Frederick (bûr'jĭs), 1873–1945, American chemical engineer, b Oshkosh, Wis , grad Univ of Wisconsin, 1895 He was on the faculty at the Univ of Wisconsin from 1895 to 1913 He developed various iron alloys and invented a process for the electrolytic purification of iron and made improved types of dry cells

Burgess, Gelett (Frank Gelett Burgess), 1866–, American humorist, b Boston, grad Massachusetts Institute of Technology, 1887 His ability as an illustrator led him into magazine work, and he was soon writing humorous articles and stories to accompany his illustrations His poem "The Purple Cow" brought him instant fame Among his books some of the better known are *Goops and How to Be Them* (1900), *Are You a Bromide?* (1907), *The Maxims of Methuselah* (1907), and *Why Men Hate Women* (1927)

Burgess, George Kimball, 1874–1932, American physicist, b Newton, Mass , grad Massachusetts Institute of Technology, 1896 An authority on metallurgy and pyrometry, he was with the Bureau of Standards from 1903 (as director from 1923)

Burgess, John William, 1844–1931, American educator and political scientist, b middle Tennessee He served in the Union army in the Civil War and after the war graduated at Amherst (1867) He was admitted to the Massachusetts bar in 1869, but did not practice That same year he joined the faculty of Knox College In 1871 he went to Germany, where he studied at the universities of Göttingen, Leipsig, and Berlin He returned in 1873 to teach history and political science at Amherst In 1876 began his long connection with Columbia Univ (then Columbia College), he was professor of political science and constitutional law until 1912 Burgess, with Nicholas Murray BUTLER, was a major influence in the creation (1880) of a faculty and school of political science, the first faculty organized for graduate work in the country and the chief step in changing Columbia College into a university. He was dean of the Faculty of Political Science from 1890 until his retirement. In 1905–6 he served as first Roosevelt professor at the Univ of Berlin Burgess's fundamental political philosophy was expressed in *Political Science and Comparative Constitutional Law* (1890–91), the more permanently valuable portions of which were republished as *The Foundations of Political Science* (1933) In line with his theories there set forth, he interpreted American history in *The Middle Period, 1817–1858, The Civil War and the Constitution, 1859–1865*, and *Reconstruction and the Constitution, 1866–1876*, a trilogy published between 1897 and 1902, to which was added *The Administration of Rutherford B Hayes* (1915) In *Recent Changes in American Constitutional Theory* (1923) he protested against the encroachment of the Federal government upon state and individual rights and immunities He founded the *Political Science Quarterly* See his autobiography, *The Reminiscences of an American Scholar* (1934)

Burgettstown (bûr'jĭts–), borough (pop 2,497), SW Pa , near the W Va border W of Pittsburgh, laid out 1795, inc 1881

Burgh, Hubert de see HUBERT DE BURGH

Burgh, Ulick de, earl and marquess of Clanricarde. see CLANRICARDE, ULICK DE BURGH, 5TH EARL OF

Burghers (bûr'gurs), a party of the Secession Church of Scotland, or Associate Synod, resulting from one of the "breaches" in the history of Presbyterianism To qualify as a burgess in certain burghs one was required to take an oath accepting the "true religion presently professed within this realm" Opinion differed as to whether this referred to Protestant religion in general or to the Established Church Those in the Secession Church who understood the oath in the latter sense refused to take it and were called "Anti-Burghers" Theirs was the General Associate Synod Opposed to them were the "Burghers," of the Associate Synod The two bodies mutually excluded each other in 1747 By the end of the century both divisions were further split apart into "Old Light Anti-Burghers"and "Old Light Burghers" and "New Lights" in each division, over questions of civil magistracy In 1820 Old Lights and New Lights were brought together again in the United Secession Church

Burghley or **Burleigh, William Cecil, 1st Baron** (both bûr'lē), 1520–98, English statesman He first rose to power in 1548 when Edward Seymour, duke of Somerset, was protector, and he served as secretary of state (1550–53) during the duke of Northumberland's ascendancy He was not in the favor of Mary I, but was reappointed to office by Elizabeth, whom he served faithfully for 40 years He became her principal adviser and one of the most powerful men in the kingdom In 1572 he was made lord high treasurer His was the policy of national aggrandizement that helped growing industry and commerce Cautious, as was Elizabeth, he could, nevertheless, act with decision He took the responsibility for the execution of Mary Queen of Scots and was largely responsible for the solidification of Protestantism in England Burghley's advice was not always followed, but his hand can be seen in most important policies of Elizabeth's reign He was as ruthless in destroying personal enemies as he was in smiting enemies of the state See biographies by M A Hume (1898) and Alan Smith (1935)

Burgis, William (bûr'jĭs), fl 1717–31, American engraver and publisher of maps and views, b London His name appears as publisher on the views *South Prospect of ye Flourishing City of New York* (1717, copy, N Y Historical Society), *The New Dutch Church in New York City, A Prospect of the Colledges in Cambridge in New England* (only known copy, Massachusetts Historical Society, Boston), *A South East View of the Great Town of Boston*, and *Plan of Boston in New England* (copy, Library of Congress, Washington, D C) The mezzotint *The Boston Light House* is the only plate which contains Burgis's name as engraver (copy, U S Lighthouse Board, Washington, D C)

Burgkmair or **Burckmair, Hans** (both hänz' bo͝ork'mûr), 1473–1531, German engraver and painter of Augsburg His work shows the influence of his friend Dürer, whose enthusiasm for the Italian Renaissance he shared Among his well-known paintings are *Coronation of the Virgin* (cathedral, Augsburg) and the portrait of himself and his wife (Vienna) Burgkmair also produced some 700 wood engravings of great originality Famous examples of these include *Triumphs of Maximilian I* (a series of 57 prints), *Death the Exterminator*, and *Seven Deadly Sins*

burglary, according to common-law definition, the breaking and entering of a dwelling house of another at night with the intent to commit a FELONY, whether the intent is carried out or not This definition has been generally adopted with some modifications in the criminal law of the various states of the United States At common law burglary is an offense primarily against the security of habitation, not against the property as such, but today by statute burglary usually includes breaking into places other than dwellings Breaking as well as entering is essential to commission of the crime; to constitute a breaking, the use of physical force is

necessary and sufficient, though the use of force may be slight, e g , turning a key, opening an entirely closed window, pushing out a window pane Entry through FRAUD (as by posing as a guest), through THREAT, or through CONSPIRACY with servants is deemed by the law equivalent to breaking and is called "constructive breaking" By statute most states do not restrict burglary to action at night, as the common law does Burglary under common law requires that the intent be to commit a felony, but some statutes declare that the intent need only be "to commit some crime "

Bürglen (burk'lən), village (pop 2,527), Uri canton, Switzerland, near Altdorf It is the legendary birthplace of William Tell

Burgos (bōōr'gōs), city (pop 51,177), capital of Burgos prov , N Spain, in Old Castile, on a mountainous plateau Founded c 885, it was the seat of the county of Castile under the kings of Leon and became the capital of the kingdom of Castile under Ferdinand I (1035) The royal residence was moved (1087) to Toledo, and Burgos lost some of its cultural and economic importance The Cid lived and is buried here In the civil war of 1936–39 Burgos was the capital of Franco's regime The cathedral of white limestone, founded in 1221, is one of the finest Gothic buildings in S Europe Other landmarks are the castle, the Gothic Church of San Estebán, and the Arco de Santa Maria, a 16th-century gateway

Burgoyne, John (bûrgoin'), 1722–92, British general and statesman In the Seven Years War, his victory over the Spanish in storming Valencia de Alcántara in Portugal (1762) made him the toast of London He was elected to Parliament (1768) and helped to reform the East India Company's rule of India As the American Revolution was beginning, he arrived (1775) with the reinforcement sent to General Gage at Boston Burgoyne witnessed the battle of Bunker Hill and returned home in disgust (Nov , 1775) He joined (1776) Sir Guy CARLETON in Canada and served at Crown Point, but, critical of Sir Guy's inaction, Burgoyne returned to England to join Lord George Germain in laying the plans that resulted in the SARATOGA CAMPAIGN Burgoyne began (June, 1777) the ill-fated expedition with an army poorly equipped, untrained for frontier fighting, and numbering far less than he had requested After minor initial success, stiffened American resistance coupled with the failure of Barry St LEGER and Sir William HOWE to reach Albany led to his surrender at Saratoga (Oct 17, 1777) He returned to England, was given (1782) a command in Ireland, and managed the impeachment of Warren HASTINGS Burgoyne wrote several plays, of which *The Heiress* (1786) is best known See F J Hudleston, *Gentleman Johnny Burgoyne* (1927)

Burgundians, in French medieval history see ARMAGNACS AND BURGUNDIANS

Burgundii · see BURGUNDY

Burgundy (bûr'gundē), Fr *Bourgogne* (bōōrgô'nyu), region, E France The name also applied to two successive kingdoms and to a duchy, all of which embraced large territories outside the present region, which is identical with the province of Burgundy of the 17th and 18th cent Burgundy is now administratively divided into four departments—Yonne, Côte-d'Or, Saône-et-Loire, and Ain Burgundy W of the Saône river is generally hilly, in the southeast it includes the southern spurs of the Jura mts , the center is a lowland, extending south almost to the junction of the Saône and Rhone rivers (see BRESSE) A rich agricultural country, Burgundy is especially famous for the WINE grown in the CHABLIS region, the mountains of the CÔTE-D'OR, and the SAÔNE and RHONE valleys DIJON is the historical capital, other cities are Autun, Auxerre, Beaune, Bourg-en-Bresse, Chalon-sur-Saône, and Mâcon The territory, conquered by Julius Caesar in the GALLIC WARS, was divided among the Roman provinces of Upper Germany, Lugdunensis, and Narbonensis (see GAUL) In the 5th cent the Burgundii, a Germanic tribe, settled here peacefully, accepted Christianity, and soon established the **First Kingdom of Burgundy,** which comprised SE France and reached as far south as Arles and W Switzerland Conquered (534) by the FRANKS, it was throughout the Merovingian era subjected to numerous partitions It nevertheless survived as a political concept, and after the partitions of the Carolingian empire, two new Burgundian kingdoms were founded, Cisjurane Burgundy or PROVENCE in the south (879) and Transjurane Burgundy in the north (888) These two were united (933) in the **Second Kingdom of Burgundy** (see ARLES, KINGDOM OF) A smaller area, corresponding roughly to present Burgundy, was created as the **duchy of Burgundy** by Emperor Charles II in 877 Early in the 11th cent King Robert II of France made good his claim to the duchy, but his son, Henry I, gave it as a fief to his brother Robert Robert's line died out in 1361. The golden age of Burgundy began when (1363) JOHN II of France bestowed the fief on his son, PHILIP THE BOLD Philip and his successors, JOHN THE FEARLESS, PHILIP THE GOOD, and CHARLES THE BOLD, acquired—by conquest, treaty, and marriage—vast territories including most of the present Netherlands and Belgium, the then extensive duchy of Luxembourg, Picardy, Artois, Lorraine, S Baden and Alsace, the FRANCHE-COMTÉ, Nivernais, and Charolais In the early 15th cent the dukes of Burgundy, through their partisans in France, dominated French politics (see ARMAGNACS AND BURGUNDIANS) England, at first supported by Burgundy in the HUNDRED YEARS WAR, suffered a crucial setback when Philip the Good withdrew that support in the Treaty of Arras (1435) A great power, Burgundy at that time had the most important trade, industries, and agriculture of Western Europe Its court, a center of the arts, was second to none Yet the ambitions of Charles the Bold, opposed by the determination and resourcefulness of Louis XI of France, came crashing down with his defeats by the Swiss at Grandson, Morat, and Nancy (1476–77) At Nancy, Charles lost his life His daughter, MARY OF BURGUNDY, by marrying Emperor Maximilian I, brought most of the Burgundian possessions (but not the French duchy) to the house of Hapsburg The duchy itself was seized by Louis XI, who incorporated it in the French crownlands as a province, to which Gex, Bresse, and Charolais were added later by Henry IV and Louis XIV See Arthur Kleinclausz, *Histoire de Bourgogne* (1909), Otto Cartellieri, *The Court of Burgundy* (1929)

Burgundy, Free County of see FRANCHE-COMTÉ

Burgundy Gate: see BELFORT, France

Burgundy mixture or **sal soda Bordeaux** (bôr'dō'), colorless copper FUNGICIDE used where LIME SULPHUR or BORDEAUX MIXTURE would leave a stain or sediment It is useful in spraying small fruits and other vegetation resistant to its burning action It is made of copper sulphate, sal soda (sodium carbonate), and water

Burgundy pitch, reddish or yellowish-brown, hard, brittle, resinous substance with an aromatic odor, obtained from the stem of the Norway spruce (*Picea excelsa* or *P abies*) It is used in preparing pitch plaster, a counterirritant

Burhanpur (bûr'hənpōōr'), town (pop 53,987), W Madhya Pradesh, India, founded 1400 There is a partly ruined palace (c 1610) of Akbar The town was formerly noted for brocades and gold- and silver-wire ornaments Today cotton is the chief article of commerce

burial. Methods of disposing of a corpse are many, ranging from its simple discard, as among the Masai of Africa, to cremation and disposal of its ashes Burial, however, is usually in a GRAVE Secondary burial frequently occurs to terminate a socially observed period of mourning and the obligations toward the deceased Tree burials, wherein the body is suspended rolled in a mat or hammock, occurred in ancient times and among the North American Indians, and commonly preceded later interment Sea burials are known in Oceania Communal burials may indicate that retainers or members of the family were slain to accompany the deceased or simply that pits or ossuaries were unsealed for later accommodation The disposition of the spirit rather than of the corpse is more often the major concern of peoples, as evidenced in their FUNERAL CUSTOMS Since patterns of burial are distinctive for each society, their study is highly significant to the ethnologist and the archaeologist

Buriat-Mongolia see BURYAT-MONGOL AUTONOMOUS SOVIET SOCIALIST REPUBLIC

Buridan, Jean (byōō'rĭdun, Fr zhā' bürēdā'), fl 1328, French scholastic philosopher Rector of the Univ of Paris, he was a follower of William of Occam and a nominalist His theory of the will was that choice is determined by the greater good and that the freedom man possesses is the power to suspend choice and reconsider motives for action Traditionally but almost certainly erroneously he is supposed to have used the simile of "Buridan's ass"—an unfortunate animal midway between two identical bundles of hay and starving to death for want of power to choose between them

Burin (bû'rĭn), town, S N F , on the southwest coast of Placentia Bay Burin Peninsula lies between Fortune Bay and Placentia Bay

Burkburnett (bûrkburnĕt'), city (pop 2,814), N Texas, N of Wichita Falls and near the Red River, settled 1907, inc 1913 An oil strike in 1918 brought a boom that was one of the wildest, roughest, and richest of them all The city also handles farm produce and cattle

Burke, Edmund, 1729–97, British statesman and political writer, b Dublin, grad Trinity College at Dublin, 1748 The son of a Protestant father and a Catholic mother and himself a Protestant, he never ceased to criticize the stupidity of the Irish administration and the galling discriminations against Catholics He began the study of law in London but abandoned it for the life of letters His satirical *Vindication of Natural Society* (1756) confuted Viscount Bolingbroke's political rationalism, and his *Philosophical Enquiry into the Origin of Our Ideas of the Sublime and Beautiful* (1756) was a study in the aesthetics of romanticism In 1759 he started the *Annual Register,* to which he contributed until 1788. Burke was a member of Samuel Johnson's intimate circle His real political career began in 1765 when he became secretary to the marquess of Rockingham (prime minister, 1765–66) and formed a lifelong friendship with that Whig leader He was elected to Parliament in 1766 and there defended Rockingham's repeal of the Stamp Act (1766) and strove for a wiser treatment of the American colonies The Whig party was split into two factions, and when William Pitt, earl of Chatham, became prime minister, Burke was the most influential member of the Whig opposition. His famous speeches on American taxation (1774) and on conciliation with the colonies (1775) were only the best known of his efforts to oppose the king's course in America Burke aimed at limiting the patronage of the crown by his economic-reform bill, which was passed in the short Whig ministry of Rockingham in 1782, and by the India bill, drafted by Burke and presented by Charles James Fox, which did not pass Under the Tory ascendancy of William Pitt the younger, Burke instigated the impeachment and long trial (1785–94) of Warren HASTINGS, and though Hastings was not convicted, Burke's speeches made for an awareness of the responsibilities of empire and the injustices in India unknown before in England Though he championed many liberal and reform causes, Burke believed that political, social, and religious institutions represented the wisdom of the ages, he feared political reform beyond limiting the power of the crown Consequently, his *Reflections on the Revolution in France* (1790) made him the spokesman of European conservatives His stand on the French Revolution—and, by implication, against parliamentary reform—caused him to break with Fox and his Whigs in 1791 Burke's *Appeal from the New to the Old Whigs* (1791) shows how closely he allied himself with Pitt's Tory position As an advocate of practical reforms, Burke foreshadowed Jeremy Bentham He withdrew from political life in 1795, broken in spirit by the death of his son Richard See biographies by Sir James Prior (1824), John Morley (1867, 1879), A P I Samuels (1923), R H Murray (1931), and P M Magnus (1939), John MacCunn, *The Political Philosophy of Burke* (1913), A A Baumann, *Burke the Founder of Conservatism* (1929), T W Copeland, *Our Eminent Friend Edmund Burke* (1949)

Burke, John, 1787–1848, Irish genealogist After trying literary work in London, he in 1826 issued *A Genealogical and Heraldic Dictionary of the Peerage and Baronetage of the United Kingdom* He published this guide irregularly until 1847, since then it has been an annual, commonly called *Burke's Peerage* This was edited from 1847 to 1892 by his son, **Sir John Bernard Burke,** 1814–92, who was made Ulster king-of-arms, knighted (1854), and appointed (1855) keeper of the state papers in Ireland As a companion to *Burke's Peerage,* he established the regular issuance of another work begun by his father, commonly called *Burke's Landed Gentry* Sir Bernard wrote other works, including *The Romance of the Aristocracy* (1855) and *Vicissitudes of Families* (1883)

Burke, Robert O'Hara, 1820–61, Irish explorer of Australia After service in the Belgian and Austrian armies he went as inspector of police to Melbourne (1853) In 1860, with W J Wills and eight other whites, he left Menindee, on the Darling river, to cross the continent Dissensions broke up the party, but the leaders reached the estuary of the Flinders river, in the Gulf of Carpentaria On the return journey both Burke and Wills died from famine and exposure Though the geographical achievements of the expedition were few, relief parties seeking it added much to the knowledge of central Australia See C G D Roberts, *Discoveries and Explorations in the Century* (1906)

Burke, Victor, 1882–, American bacteriologist, b Kent, Wash , grad Stanford (B A , 1907) He taught at Washington State College from 1921 (as professor and head of the department of bacteriology from 1925) He was editor of bacteriology of *Webster's New International Dictionary* (2d ed 1934)

Burkesville, city (pop 1,092), co seat of Cumberland co , S Ky , on the Cumberland river and near the Tenn line, inc as a town 1810, as a city 1926 It is a resort in the Cumberland foothills Near by is the site of an early oil well, accidentally tapped (while drilling for salt) in 1829

Burlamaqui, Jean Jacques (zhā' zhāk' burlămakē'), 1694–1748, Swiss jurist His chief works are *Principes du droit naturel* [principles of natural law] (1747) and *Principes du droit politique* [principles of political law] (1751) He attempted to demonstrate the reality of natural law by tracing its existence in God's rule and in human reason and moral instinct He believed that both international and domestic law were adumbrations of natural law in their separate fields.

Burleigh, Harry Thacker (bûr'lē), 1866–1949, American Negro baritone and composer, b Erie, Pa , pupil of Dvorak at the National Conservatory, New York, where he later taught He was soloist at St George's Church, New York, from 1894 to 1946 and also at Temple Emanu-El for 25 years. His concert arrangements of Negro spirituals such as

Deep River, employing chromatic harmonies in the style of art songs, are widely used

Burleigh, William Cecil, 1st **Baron**. see BURGHLEY.

Burleson, Albert Sidney (bûr'lusun), 1863–1937, U S Postmaster General (1913–21), b San Marcos, Texas, grad Baylor Univ, 1881, and Univ of Texas law school, 1884 A grandson of Edward Burleson, he was a lawyer of Austin, Texas, and a member of the House of Representatives (1899–1913) before resigning to take a cabinet post under President Wilson His methods of administering communications in the First World War waked the ire of businessmen, who charged him with inefficiency and interference with private business, of labor unions, because he forbade strikes of postal employees, and of liberals, whose anti-war periodicals he banned from the mails Burleson continued to exercise strict control and to advocate government ownership of communications His political experience was of value to Wilson

Burleson, Edward, 1798–1851, pioneer of Texas, b Buncombe co, N C After living in Tennessee and serving under Andrew Jackson in the war against the Creek Indians (1813–14), he moved to Texas He distinguished himself in the Texas Revolution and was later (1840) successful commander in the warfare against the Cherokee in East Texas He was a senator, then vice president of the Texas republic, but was defeated for the presidency in 1844 He also served in the Mexican War

burlesque (bûrlĕsk') [Ital ,=mockery], form of entertainment differing from comedy or farce in that it achieves its effects through caricature, ridicule, and distortion It differs from satire in that it is devoid of any ethical element The word first came into use in the 16th cent in an opera of the Italian Francesco Berni, who called his work *burlesche* Chaucer's *Rhyme of Sir Thopas*, Butler's *Hudibras*, Beaumont and Fletcher's *Knight of the Burning Pestle*, Gay's *Beggar's Opera*, Fielding's *Shamela*, and Sheridan's *Critic* may be classed as literary and dramatic burlesque Cervantes's *Don Quixote* is a burlesque on chivalry and knighthood American stage burlesque is a variety show which is characterized by vulgar dialogue and broad comedy Burlesque theaters in New York city were refused a renewal of their licenses in 1937 and were closed by fiat For history of the literary burlesque, see R P Bond, *English Burlesque Poetry, 1700–1750* (1932), and A B Shepperson, *The Novel in Motley* (1936)

Burley, city (pop 5,329), co seat of Cassia co, S Idaho, on the Snake, founded 1905, inc 1906 Burley, in the MINIDOKA PROJECT, is a center of irrigated farms and has beet-sugar, alfalfa-meal, and potato-flour mills It is the headquarters of Minidoka National Forest

Burlin, Natalie Curtis, 1875–1921, American writer and musician, b New York city, studied music in France and Germany She was one of the leading transcribers of the primitive music of America and Africa, and it was through her efforts that Indian music was encouraged, rather than forbidden by law, in government schools She visited the Navaho, Zuñi, Hopi, and other Indian tribes, recording words and music with fidelity Songs of African tribes and American Negroes are also included in her works—*Songs of Ancient America* (1905), *The Indians' Book* (1907), *Hampton Series Negro Folk-Songs* (4 vols, 1918–19), and *Songs and Tales from the Dark Continent* (1920)

Burlingame, Anson (bûr'ling-gām), 1820–70, American diplomat, b New Berlin, N Y, grad Univ of Michigan After studying law at Harvard, he became a lawyer in Boston and later (1855–61) a Congressman Defeated for reelection, he was made (1861) minister to China By his tact and understanding of Chinese opposition to the autocratic methods of foreigners in the treaty ports, he won a place as adviser to the Chinese government China sent (1867) him as head of a mission to visit foreign lands in order to secure information and sign treaties of amity He visited Washington, London, and capitals on the Continent One result was a treaty between China and the United States, supplementary to the 1858 treaty This, usually called the **Burlingame Treaty**, was signed in 1868 It was a treaty of friendship based on Western principles of international law One clause encouraged Chinese immigration—laborers were then much in demand in the West, later the heavy influx of Chinese under its provisions caused friction on the West Coast and led to the exclusion of Chinese immigrants (see CHINESE EXCLUSION). See biography by F W Williams (1912)

Burlingame, Edward Livermore, 1848–1922, American editor, b Boston, grad Univ of Heidelberg (Ph D, 1869) He was secretary to his father, Anson Burlingame, when the latter was minister to China and, later, ambassador extraordinary of China In 1879 the son became literary adviser to Charles Scribner's Sons, and when *Scribner's Magazine* was started in 1886, he edited it until 1914. *Art Life and Theories of Richard Wagner* (1875), the first book on Wagner published in America, was translated by Burlingame

Burlington, town (pop 3,815), S Ont, on Lake Ontario NE of Hamilton, in a fruitgrowing area

Burlington. **1** Town (pop 1,280), co seat of Kit Carson co, E Colo, near the Kansas line, in a grain area, inc 1888 **2** Town (pop 1,246), central Conn, W of Hartford, settled 1740, inc 1806 It has a state trout hatchery **3** City (pop 25,832), co seat of Des Moines co, SE Iowa, on four hills overlooking the Mississippi (spanned here by a toll bridge) Platted in 1833, on the sites of an Indian village (Sho-quo-quon, 1820) and a trading post (1829), it was named Burlington in 1834, incorporated as a town in 1838, and chartered as a city in 1838 It is a shipping and manufacturing center with railroad shops, docks, basket factories, and manufactures of wood In the Second World War a huge munitions plant was built Burlington was the temporary capital of Wisconsin Territory (1837) and of Iowa Territory (1838–40) One of the oldest newspapers in the state, the Burlington *Hawkeye*, is still published The city has a junior college and is the site of the Tri-State Fair (held in August) Near by is Flint Hills State Park In 1942 there was an explosion in the munitions plant **4** City (pop 2,379), co seat of Coffey co, E Kansas, S of Topeka, inc 1870 It is the trade center of a farming and dairying region **5** Rural town (pop 2,275), E Mass, NW of Boston, settled 1641, inc 1799 Its pre-Revolutionary meetinghouse, remodeled, still stands **6** City (pop 10,905), W N J, on the Delaware between Trenton and Camden, settled 1677 by Friends, inc 1733 It grew mainly as a port, it was capital of West Jersey from 1681 until the union of East and West Jersey (1702), and thereafter until 1790 alternate capital with Perth Amboy It was on a Philadelphia–New York coach line, and railroad tracks were laid down Broad St in 1834 G W Doane, long rector of old St Mary's (built 1703), founded St Mary's Hall for girls here (1837) The newer St Mary's church was designed by Richard Upjohn Burlington is the birthplace of James Fenimore Cooper and of James Lawrence The first colonial money was printed here by Benjamin Franklin in 1726, and the first newspaper in New Jersey appeared in 1777 The Friends' school (1792, now the Y W C A) and meetinghouse (1784) still exist Typewriter and iron products are made here **7** Industrial city (1940 pop 12,198, 1944 special census pop 21,830), N N C E of Greensboro and on the Haw river, inc 1887 It manufactures tobacco, textiles and wood products Elon College (coeducational, 1889) is near by **8** City (pop 27,686), co seat of Chittenden co, NW Vt, largest city in the state, overlooking Lake Champlain, chartered by New Hampshire 1763, settled 1773 It is the seat of the Univ of Vermont (see VERMONT, UNIVERSITY OF) and of Trinity College (Roman Catholic) for women After the Revolution it became an important lake port, shipping mainly lumber and potash It is today a port of entry Ira Allen built ironworks, a shipyard, and a sawmill in this vicinity Ethan Allen spent his last years N of Burlington village (part of his farm is included in Ethan Allen Park), and he is buried in Greenmount Cemetery The Burlington *Free Press*, founded in 1827 and made a daily in 1848, was Vermont's first daily paper The first Unitarian church (1810) was organized here, and the first Roman Catholic church in the state was built here (1831) J Q A Ward designed the Lafayette statue in University Park Industries include the making of wood and metal products, tools, and textiles and of maple syrup and other food products John Dewey was born in Burlington See Elin L Anderson, *We Americans* (1938) **9** Trading city (pop 1,632), NW Wash, SE of Bellingham, in a rich farm area, settled 1882, inc 1902 **10** City (pop 4,414), SE Wis, WSW of Racine and on the Fox, settled 1835, inc as a village 1896, as a city 1900 Dairy products are made A Mormon colony was near here (1844–49)

Burma, Union of, republic (260,000 sq mi, pop 16,823,796), SE Asia, on the Indo-Chinese peninsula The capital is RANGOON Burma is bounded on the west by the Bay of Bengal, Bengal, and Assam, on the north by Tibet, and on the east by Yunnan prov (China), Laos, and Thailand The most densely populated part of the country—Burma proper—is the valley of the Irrawaddy river with its vast delta, one of the main rice-growing areas of the world The valley is surrounded by a chain of mountains stemming from the Eastern Himalayas and spreading roughly in the shape of a giant horseshoe, the ranges and the river valleys of the Chindwin, the Sittang, and the Salween trend from north to south In the high mountains N of Myitkyina (rising more than 19,000 ft) and along the India-Burma frontier (from 8,000 to 10,000 ft) live various Mongoloid tribes, of which the most important are the Nagas, who still practice headhunting, the Kachins (in KACHIN STATE), and the Chins (in the CHIN HILLS) These tribes raise rice and millet and cut teak in the forests Gems (notably rubies and sapphires) are found near Mogok, and since the 13th cent, Burma has exported to China the jade that is mined in the Hukawng valley and in the Jade Mines Tract (a central mountain range) Arakan, a narrow coastal plain between the Bay of Bengal and the hills of the Arakan Yoma, produces rice and rubber, it centers around the port and capital, Akyab To the east on the Shan Plateau is the SHAN STATE, the home of the Shans (Thai race closely linked to the Siamese) The Bawdwin mines near Lashio, worked by the Chinese since the 15th cent, produce much iron, as well as lead, silver, and zinc South of the Shan States is the mountainous KARENNI STATE, the KARENS are of Thai-Chinese origin, and many are converts to Christianity The Mawchu mines there are an important source of tin and wolfram Cut off from Karenni by the Salween river is TENASSERIM The Dry Zone (annual rainfall 20–40 in) lies north of the hills of Pegu and is centered around MANDALAY and the Irrawaddy river It is the home of the Burmese proper, a Mongoloid race who came down from Tibet before the 9th cent and settled in the fertile plains which today produce rice (one third of the area is under paddy), groundnuts, cotton, tobacco, and sesamum Out of a total of 8,500,000 Burmese, 4,500,000 are found here Most of them are farmers Their early history was mainly the story of their struggle with the Mons or Talaings (of Mon-Khmer origin, now assimilated) In 1044 Anawratha established Burmese supremacy over the Irrawaddy delta and Thaton (capital of the Talaing kingdom) He introduced Hinayana Buddhism, which is today the prevalent religion Pagodas, monasteries, and temples are to be found in most communities, and Buddhism has made the rate of literacy high Anawratha's capital PAGAN, "the city of a thousand temples," was the seat of his dynasty until the Mongol invasion of 1287 After the Mongols withdrew, Burma split into petty states ruled by Shan chieftains The Shans were gradually displaced by new Burmese dynasties, the chief having their seats at Ava, Pegu, and Toungoo In the 16th cent the country was again reunited under the Toungoo dynasty (which, however, fixed its seat at Pegu and later at Ava) and began a series of wars against Siam, which came to an end only in the 19th cent In the 18th cent the Talaings of the Irrawaddy delta threw off the rule of Ava and even invaded the Dry Zone, by 1760 Alaungpaya, founder of the last line of Burmese kings, had crushed the Talaings for good Besides extending his rule over Tenasserim and Tavoy, Alaungpaya carried raids into India, so did his successors, of whom one took Arakan (1784), bringing the Burmese kingdom to its greatest extent The first Europeans to come to Burma in any number were Portuguese traders and adventurers in the 16th cent They were followed (17th cent) by English and Dutch merchants In the 18th cent the French and British were rivals for Burmese trade, but the British abandoned official relations with Burma in 1760, and the French gave up their activities not long afterward The expansionism of the Alaungpaya dynasty brought Burma into frontier conflicts with the British The first Anglo-Burmese war (1824–26) resulted in the annexation by the British East India Company of Arakan and Tenasserim, in the second (1852), the British took the province of Pegu (Lower Burma), in the third (1885), Upper Burma was annexed Under the British the natural resources of the country were developed The rice crop in the delta was increased to a point where 7,000,000 tons were grown yearly and over 3 000,000 tons were exported, mainly through Rangoon Rubber, sugar cane, and cotton were introduced Over 2,000 mi of railroads were built Exploitation of the rich oil deposits of Yenangyaung in central Burma began in 1871 Burma was administered as a part of India till 1937, when it obtained, as far as internal affairs were concerned, the equivalent of dominion status In the Second World War, the country was invaded and occupied early in 1942 by the Japanese who set up an "independent" Burmese regime In the north British and U S troops raided enemy lines (see STILWELL, JOSEPH WARREN), and in Dec 1944, four allied armies, including Chinese forces, started a drive down the central plains, and in May, 1945, they captured Rangoon After the war, Burma obtained complete independence from Britain On Jan 4, 1948, the Union of Burma was set up as a republic with a president and a bicameral legislature, less-developed areas outside Burma proper were made autonomous states (with representatives in parliament) and national territories The strongly socialistic Anti-Fascist People's Freedom League, which maintained a precarious hold on the government in a confused political situation, was soon faced with armed risings of the Communists and of the Karen tribesmen In 1949 the Karen rebels forced the government to offer a larger degree of autonomy See R T Kelly, *Burma* (2d ed., 1933), J S Furnivall, *An Introduction to the Political Economy of Burma* (1937) and *Colonial Policy and Practice* (1948), J L Christian, *Modern Burma* (1942), *Burma Handbook* (1943), D G E Hall, *Europe and Burma* (1945), F. T. Jesse, *The Story of Burma* (1946),

G E Harvey, *British Rule in Burma, 1824–1942* (1946), J Russell Andrus, *Burmese Economic Life* (1947), E J Jacoby, *Agrarian Unrest in Southeast Asia* (1949)

Burman or **Burmese,** Indo-Chinese language. See LANGUAGE (table).

bur marigold or **sticktight,** any species of *Bidens,* a genus of chiefly weedy American plants with two- to four-pronged burlike fruits (achenes) that have gained various species such additional names as beggar-ticks, Spanish needles, tickseed, and bootjacks The plants are composite flowered, a few showy yellow ones are occasionally cultivated

Burma Road, from Lashio, Burma, to Kunming, Yünnan prov , China Its construction through extremely rough mountain country was a remarkable engineering feat Undertaken by the Chinese after the outbreak of the Sino-Japanese war in 1937 and completed in 1938, it carried war supplies landed at Rangoon and shipped by railroad to Lashio This traffic increased in importance to China after the Japanese took effective control of the Chinese coast and of Indo-China. It was interrupted briefly in 1940 (July 17–Oct 17), when Japanese pressure compelled the British to close the road, and again in 1942–45, while the Japanese occupied Burma in the Second World War The Ledo Road (later called the Stilwell Road) was begun in Dec , 1942, from Ledo, India, into Burma In 1944, after the N Burma campaign of Chinese and American troops under Stilwell, the Ledo Road reached Myitkyina and was joined to the Burma Road Supplies began to move over this route in Jan , 1945 The end of the war substantially reduced the importance of the road

Burmese or **Burman,** Indo-Chinese language See LANGUAGE (table)

Burne-Jones, Sir Edward, 1833–98, English painter and decorator, b Birmingham Intended for the church, he went to Exeter College, Oxford, where he met his lifelong friend, William Morris He left Oxford to study painting with Rossetti in London His early work shows Rossetti's strong influence, which is replaced in his later work by that of Botticelli Burne-Jones and Rossetti in their choice of medieval and fantastic subjects were not following the precepts of Pre-Raphaelitism, of which, however, they were leading exponents Burne-Jones rose to success in 1877 with the opening of the Grosvenor Gallery, where he displayed his *Mirror of Venus, Days of Creation,* and *Beguiling of Merlin* Other well-known paintings are *King Cophetua and the Beggar Maid* (Tate Gall , London), *Depths of the Sea,* and *Star of Bethlehem* (Birmingham Gall) His designs for stained glass, executed by Morris and Company, may be seen in churches throughout England His popularity has waned, although many still admire his delicate and poetic work See Lady Burne-Jones, *Memorial of Edward Burne-Jones* (1904)

Burnes, Sir Alexander, 1805–41, British traveler in India As an army officer in India, he studied Oriental languages In 1832 he left Lahore in Afghan dress and traveled via Peshawar and Kabul across the Hindu Kush to Balkh and thence by Bukhara, Asterabad, and Teheran to Bushire On his return to England (1833) he was honored In 1839 he was appointed political resident at Kabul, where he was assassinated two years later See his *Narrative of a Visit to the Court of Scinde* (1830), *Travels into Bokhara* (1834), and *Cabool* (1842)

Burnet, David Gouverneur (bûr'nĭt, burnēt'), 1788–1870, provisional president of Texas (1836), b Newark, N J , son of William Burnet (1730–91) A Cincinnati lawyer, he joined the expedition (1806) of Francisco de Miranda against the Spanish in Venezuela, and later (c 1817) he went to Texas His law training enabled him there to speak for the American settlers as trouble with the Mexican government grew He drew up the petition (1833) asking that the consolidation of Texas with Coahuila be dissolved Though appointed (1834) a district judge, he opposed the measures of the Mexican president, SANTA ANNA, was gradually led to favor the independence of Texas from Mexico, and drew up (1836) the declaration of independence at the convention at Washington-on-the-Brazos, where he was made president ad interim of Texas His eight-month administration in the chaotic times during and after the revolution (see TEXAS) was not effective He quarreled bitterly with Sam HOUSTON and thereafter opposed him in politics Burnet was vice president under Mirabeau B LAMAR, was defeated by Houston for the presidency in 1841, was secretary of state (1846–47) after Texas had been annexed to the United States, and was chosen in 1866 (because he had opposed secession) U S Senator from Texas in the Reconstruction era but was denied his seat

Burnet, Gilbert (bûr'nĭt), 1643–1715, British bishop and writer He studied abroad, held (1665–69) the living of Saltoun in Scotland, and was appointed (1669) professor of divinity at Glasgow Univ (1669) In London in 1673 he was well received by Charles II and was lecturer at St. Clements until his defense of his friend Lord William Russell made it unsafe for him in England after the Rye House Plot executions During James II's reign Burnet's anti-Catholic writing and preaching kept him from court, and he found favor and friendship with William of Orange at The Hague Accompanying William to England, he was a trusted adviser to William III and Mary (and later to Queen Anne) and was made bishop of Salisbury His celebrated *History of My Own Times* (published only in 1723–24, ed by M J Routh, 6 vols , 1833) is partisan, fiercely biased against James II, but it is also the most informative contemporary source for the period Burnet made a translation of Sir Thomas More's *Utopia* He also wrote a *History of the Reformation in England* (3 vols , 1679–1714, abridged ed , 1719) and many lesser works on history and theology William Burnet, the colonial American governor, was one of his sons See biography by T E S Clarke and H C Foxcroft (1907)

Burnet, John, 1863–1928, Scottish scholar, b Edinburgh His works on Greek philosophy are standard and include *Early Greek Philosophy* (1892), *Greek Philosophy Thales to Plato* (1914), and an edition (1899) of Aristotle's *Ethics*

Burnet, William, 1688–1729, British colonial governor in America, son of Gilbert Burnet As governor of New York and New Jersey (1720–28), he advocated extending the trade with the Indians, seeking to bind the Iroquois to the British and keep them from French influence—a move which was to be of great significance in the French and Indian Wars He had the first English fort on the Great Lakes built at Oswego His efforts to regulate the trade were opposed by Albany merchants who made great profit in selling English goods to French traders Burnet was embroiled with the assembly in arguments over policies and finance After he dissolved the assembly in 1728, he was transferred to govern Massachusetts and New Hampshire

Burnet, William, 1730–91, American Revolutionary patriot, b near the present Elizabeth, N J , grad College of New Jersey (now Princeton), 1749, father of David G Burnet A doctor of Newark, Burnet was chairman of the Revolutionary committee of safety there He set up (1775) a military hospital and helped to furnish troops and supplies for the patriot forces He became surgeon general of the army for the eastern district and was also a member of the Continental Congress

Burnet (bûr'nĭt), town (pop 1,945), co seat of Burnet co , central Texas, NW of Austin, inc 1885 It grew about Fort Croghan, a frontier military post established in 1849 The courthouse and other buildings are made of the granite for which the county is famous (see MARBLE FALLS) Burnet has limestone quarries, ships wool and mohair and cattle, and has a tourist trade, enhanced by the reservoirs made by near-by Buchanan Dam and Roy Inks Dam in the Colorado river Longhorn Cavern is also a tourist attraction

burnet (bûr'nĭt), hardy perennial herb of temperate regions, usually with white or greenish flowers The European species are sometimes cultivated for the leaves, which are used in salads and for flavoring They were formerly applied to wounds in an effort to stop the bleeding, hence the botanical name, *Sanguisorba* [from Latin,=sucking in blood]

Burnett, Frances Eliza Hodgson (-nĕt'), 1849–1924, American author, b Manchester, England She came to Knoxville, Tenn , in 1865 with her family In 1898 she divorced Dr Swan M Burnett and in 1900 married Dr Stephen Townsend, retaining her former husband's name for professional use She is famous for her children's books, particularly *Little Lord Fauntleroy* (1886), which used her youngest son as a model and which she dramatized in 1888 Other stories for children are *Sara Crewe* (1888) and *The Secret Garden* (1909) See her autobiography, *The One I Knew Best of All* (1893), Vivian Burnett, *The Romantick Lady* (1927)

Burnett, James see MONBODDO, JAMES BURNETT, LORD

Burney, Charles, 1726–1814, English musician His *General History of Music* (4 vols , 1776–89) and Sir John Hawkins's *General History of the Science and Practice of Music* (5 vols , 1776) were the first important histories of music in English He was a friend of the principal literary figures of his day His daughter Frances wrote his biography (3 vols , 1832) See P A Scholes, *The Great Dr Burney* (2 vols , 1948)

Burney, Frances (Fanny Burney), later **Madame D'Arblay** (därblā'), 1752–1840, English novelist, daughter of Charles Burney Her first novel, *Evelina, or, The History of a Young Lady's Entrance into the World* (1778), was published anonymously When it was well received, she acknowledged it and was welcomed into the society of Johnson, Burke, Garrick, and Reynolds *Evelina* was followed by *Cecilia* (1782) and *Camilla* (1796), also novels of the social scene Miss Burney's novels are celebrated for acuteness of characterization and even caricature She spent five unhappy years (1786–91) as a member of Queen Charlotte's household In 1793 she married General D'Arblay, a French émigré Her diary and letters provide invaluable information about the history of English culture and society from 1768 to 1840 See A. B Tourtellot, *Be Loved No More* (1938), Emily Hahn, *A Degree of Prudery, a Biography of Fanny Burney* (1950)

Burnham, Clara Louise (Root) (bûrn'əm), 1854–1927, American novelist, b. Newton, Mass Her work, important for its Christian Scientist's point of view, includes *The Right Princess* (1902), *The Inner Flame* (1912), and *The Lavarons* (1925)

Burnham, Daniel Hudson, 1846–1912, American architect and city planner, b Henderson, N.Y , d. Heidelberg, Germany. He was trained in architects' offices in Chicago. With John W Root he established in Chicago a partnership to which were assigned many of the most important architectural commissions of the day. The Chicago works included the Monadnock Building, the 20-story Masonic Temple Building (1892), the first important skeleton skyscraper, and the "Rookery" offices, the first suitably planned modern office building Other works were the Flatiron Building and the Wanamaker store in New York, the Union Passenger Station in Washington, and buildings in Cleveland, Buffalo, and San Francisco Burnham and Root designed the general plan for the Columbian Exposition at Chicago (1893), exerting through it an enormous influence upon contemporaneous civic design In 1901 Burnham served with C F McKim, F L. Olmsted, Jr , and Augustus Saint-Gaudens on the Senate Park Commission in planning for the future beautification of Washington, D C With E H Bennett he created a civic improvement plan of great importance for Chicago (1907), much of which has since been put into execution. He also prepared plans for Baltimore, Duluth, and San Francisco and was commissioned by the U S government to design plans for Manila and for other cities in the Philippines, including Baguio, the summer capital.

Burnham, Sherburne Wesley, 1838–1921, American astronomer, b Thetford, Vt. After serving as observer at Dearborn Observatory, Chicago (1877–81, 1882–84), and as astronomer at Lick Observatory (1888–92), he was from 1893 astronomer at Yerkes Observatory and professor of astronomy at the Univ of Chicago Although his interest in astronomy had begun with amateur observations, he became outstanding in the field, especially through his discoveries of double stars He wrote *General Catalogue of Double Stars* (1906) and *Measures of Proper Motion Stars* (1913)

Burnham, borough (pop 2,997), S central Pa , a suburb of Lewistown, inc 1911 Metal products are made here

burning bush or **wahoo,** handsome deciduous shrub (*Euonymus atropurpureus*) It is a North American EUONYMUS, reported poisonous, with roots that have been used medicinally, yellow autumnal foliage, and four-lobed smooth purple pods with scarlet centers Other plants are sometimes called burning bush The related *Euonymus americanus,* a similar but red- and warty-fruited shrub, is sometimes called burning bush but more often strawberry bush The scriptural burning bush not consumed by fire (Ex 3 2) is sometimes associated with a bramble or thorn and was adopted by the Presbyterian Church as an emblem of its early persecution

Burnley, county borough (1931 pop 98,258, 1947 estimated pop 84,390), Lancashire, England, near the junction of the Brun or Burn with the Calder N of Manchester It is a manufacturing place for metal and textiles, with cotton factories, iron foundries, and engineering works There are coal mines in the vicinity

Burns, John, 1858–1943, British socialist and member of Parliament He began working in a factory when he was 10 He worked as an engineer and spent a year in West Africa as foreman of an engineering project His education was chiefly from his reading and that led him to socialism He became one of the most popular of socialist orators, having a fine voice and ready wit Several times arrested and accused of inciting mobs to violence, he was usually acquitted In 1889 he was leader, with Ben Tillett and Tom Mann, of the London dock strike He was a Radical member of Parliament (1892–1918) and a cabinet member (1903–14) but retired from the cabinet at the outbreak of the First World War. See biography by G D H Cole (1943).

Burns, Otway, c 1775–1850, American privateer, b Onslow co , N C. At the outbreak of the War of 1812, he outfitted the Baltimore clipper *Snap-Dragon* as a privateer and began one of the most spectacular privateering careers in American history He destroyed and captured millions of dollars worth of British shipping and had a $50,000 price set on his head by the crown After the war, Burns turned to shipbuilding and later served (1821–35) in the North Carolina legislature. See biography by W. F Burns (1905)

Burns, Robert, 1759–96, Scottish poet He was born at Alloway, near Ayr, the son of an unusually intelligent and overworked farmer Burns was the oldest of seven children, all of whom had to help in the work on the farm—work so arduous that it left Burns with a permanently damaged heart which eventually caused his death. Although always hard pressed financially, the elder Burns, until his death in 1784, found time to help his sons with their education. As a result of this paternal interest, Burns as a boy not only read the Scottish

poetry of Ramsay and the collections compiled by Hailes and Herd, but also the works of Pope, Locke, and Shakspere By 1781 Burns had tried his hand at several agricultural jobs, and, a success at none of them, he had already begun to indulge in the habits of loose living which were to earn him so much censure He had begun writing, and his poems were circulated widely in manuscript None were published, however, until 1786 Then, discouraged, poor, and involved simultaneously with Elizabeth Patron, Mary Campbell, and Jean Armour, he decided to marry Mary Campbell, and migrate to Jamaica To help finance the journey, he published at Kilmarnock *Poems, Chiefly in the Scottish Dialect*, (1786), which was an immediate success Mary Campbell died, and Burns changed his mind about migration, he toured the Highlands, brought out a second edition of his poems at Edinburgh in 1787, and for two winters was a figure of social prominence in the Scottish city Probably in 1788 he married Jean Armour, who had borne him four children, and retired to a farm at Ellisland By 1791 Burns had failed as a farmer, and he moved to near-by Dumfries, where he held a position as an exciseman He died at 37 Burns is supreme in songs such as "Flow Gently, Sweet Afton," "My Heart's in the Highlands," and "John Anderson My Jo" Two collections contain 268 of his songs— George Thomson's *Select Collection of Original Scottish Airs for the Voice* (6 vols , 1793–1811) and James Johnson's *Scots Musical Museum* (5 vols , 1787–1803) Some of these, such as "Auld Lang Syne" and 'Comin thro' the Rye," are among the most familiar and best-loved poems in the English language But his talent was not confined to song, and two descriptive pieces, "Tam o' Shanter" and "The Jolly Beggars," are among his masterpieces Burns had a fine sense of humor which he used with equal skill for satire, description, and plain wild fun His great popularity with the Scots lies in his ability to depict with loving accuracy the life of his fellow rural Scots, as he did in "The Cotter's Saturday Night" Burns's use of dialect brought a stimulating, much needed freshness and raciness into English poetry, but Burns's greatness extends beyond the limits of dialect His poems are written about Scots, but, in tune with the rising humanitarianism of his day, they apply to man's universal problems In its simplicity, its genuine emotion, and its spontaneity, Burns's poetry bears the hallmark of great art See his poems (ed by C S Dougall, 1927) and letters (ed by DeLancey Ferguson, 2 vols , 1931), biography by F B Snyder (1932)

Burns, city (pop 2,566), co seat of Harney co , SE Oregon, SE of Bend, inc 1899 The livestock center of Oregon, it also has lumber mills and is the seat of Harney Branch Experiment Station of Oregon State College

burns and scalds Burns may be caused by electricity, X-ray irradiation, chemicals (e g , acids and alkalis), and fire or heat Scalds are caused by moist heat Burns are classified, according to depth of damage to tissues, as first-, second-, and third-degree burns Third-degree burns are the most severe Systemic reactions include shock, extreme pain, loss of fluid from the blood into the tissues around the burned area, and loss of body heat Toxemia may result Because of the destruction of the protective layer of skin, bacteria may easily invade the underlying tissues, causing infection, a serious complication The basic pattern for the treatment of burns includes the use of morphine to alleviate pain, transfusions of plasma or blood to overcome shock, drugs and tetanus antitoxin to prevent infection, and rest Skin grafts from other portions of the patient's body are used to replace deeply scarred areas Former methods of treatment, e g , debridement (scraping away of sloughed tissue), and the use of local application of ointments have been generally discarded See also BURNBURN

Burnside, Ambrose Everett, 1824–81, Union general in the Civil War, b Liberty, Ind , grad West Point, 1847 He saw brief service in the Mexican War and remained in the army until 1853, when he entered business in Rhode Island In the Civil War, Burnside commanded a brigade at the first battle of Bull Run and was made (Aug , 1861) a brigadier general of volunteers His expedition to the North Carolina coast (1862), resulting in the capture of Roanoke Island, New Bern, Beaufort, and Fort Macon, won him a major generalcy and much prestige He commanded under G B McClellan in the ANTIETAM CAMPAIGN and shortly afterwards succeeded that general in command of the Army of the Potomac After his bad defeat at the battle of Fredericksburg (see FREDERICKSBURG, BATTLE OF) in Dec , 1862, Burnside asked the President either to sustain him in dismissing several generals who opposed his plans or to remove Burnside himself Lincoln, relieved him in favor of Joseph HOOKER As commander of the Dept of the Ohio (March–Dec , 1863), he occupied E Tennessee, took Knoxville, and repulsed Longstreet's attempt to recapture the town In 1864 he commanded under Meade and Grant in Virginia Held partially responsible for the mine fiasco at PETERSBURG, he was relieved Burnside was elected governor of Rhode Island in 1866 and was reelected in 1867 and 1868 From 1875 to his death he was a U S Senator See biography by B P Poore (1882)

Burntisland (bûrntĭ'lănd, brûntĭ'–), burgh (pop 5,389), Fifeshire, Scotland, on the Firth of Forth opposite Edinburgh It is a seaport and resort Historic Rossend Castle is here

Burr, Aaron, 1756–1836, American political leader, b Newark, N J , grad College of New Jersey (now Princeton Univ), 1772 After making a stunningly brilliant record at college, he studied law but interrupted his study to serve the patriot cause in the American Revolution He proved himself an able soldier on the disastrous Quebec campaign, in the battle of Long Island, through the winter of Valley Forge, and in the battle of Monmouth In 1779 ill-health forced him to resign from the army He continued the study of law, and in 1782 he was admitted to the bar In that same year he married Theodosia Bartow Prevost Settling (1783) in New York, the handsome and gifted Burr was soon a leading lawyer and politician He served as state attorney general (1789–91), U S Senator (1791–97), and a member (1797–99) of the New York assembly. He was defeated for reelection largely because of popular disapproval of the establishment of a bank under the charter of the Manhattan Company—the second bank in New York city He set about organizing the Republican (see DEMOCRATIC PARTY) element in New York city for the election of 1800 with a thoroughness never previously employed in political campaigns, for the first time making use of the Tammany Society for political purposes The result was an unexpected victory for the Republicans, who gained control of the state legislature Since the legislature named the presidential electors and New York was the pivotal state, Burr's victory insured the election of a Republican President The intention of the party was to make Jefferson President and Burr Vice President, but confusion in the electoral college resulted in a tie vote This threw the election into the House of Representatives, where the Federalists, led by Alexander HAMILTON, dictated the result Burr made no attempt to bargain to secure election, and on the 36th ballot Jefferson was chosen, Burr becoming Vice President Jefferson's suspicions that Burr had intrigued for the presidency were never allayed, and they motivated his subsequent mistrust and opposition to Burr The latter presided over the Senate with a dignity and impartiality that won commendation from both sides His friends nominated him for the governorship of New York in 1804, but he had lost much of his old support, and Hamilton's control of the Federalist vote prevented Burr from winning Hamilton had particularly aroused Burr's anger by several letters in which he called Burr "a dangerous man" and one of whom he entertained "a still more despicable opinion" Burr demanded an explanation and, when Hamilton answered evasively, challenged him to a duel They met at 10 paces at Weehawken, N J , and Hamilton was mortally wounded The killing of the Federalist leader brought Burr's political career to an end After presiding over the impeachment proceedings against Justice Samuel Chase in the Senate, he left Washington on a journey down the Ohio and the Mississippi to New Orleans, his active mind busy with new projects and possibilities To everyone in the Southwest war with Spain seemed impending, and Burr wished to be on hand With Gen James WILKINSON he made plans for that eventuality, Burr did not know Wilkinson was in the pay of Spain He finally settled on a colonization plan and with money secured from Harman BLENNERHASSETT made the first payments on the Bastrop grant on Washita river He then began to assemble colonists to undertake its settlement In case of war the settlers could at once be led into Spanish territory The rendezvous was at Blennerhassett Island in the Ohio, and others joined at various points until the expedition numbered about 60 men Burr's previous trip down the river had aroused suspicion, and the air was filled with rumors Wilkinson, now commander in Louisiana, turned against Burr, fanned the rumors, and sent accusations of treason to the government at Washington Burr was arrested He was tried on charge of treason in the U S Circuit Court at Richmond, Va , Chief Justice John MARSHALL presiding Though Burr was found not guilty, popular opinion condemned him To escape from odium and from numerous creditors, he left for England. He remained abroad from 1808 to 1812, busy with fruitless schemes to recoup his finances and with new plans for expeditions to foment revolution in Mexico His daughter, Theodosia Burr, exerted herself to make possible his return from exile The relations between father and daughter were very tender, and Burr never recovered from grief over her loss at sea He practiced law in New York In 1835 he married the wealthy Mme JUMEL, but they soon separated See letters of Aaron and Theodosia Burr (ed by Mark Van Doren, 1929); biographies by S. H Wandell and Meade Minnigerode (1925), Holmes Alexander (1937), and Nathan Schachner (1937)

Burr, Theodosia, 1783–1813, beautiful and accomplished daughter of Aaron Burr, b Albany, N Y She was educated under her father's strict and competent tutelage and after her mother's death became the admired social mistress of the Burr home at Richmond Hill on Manhattan island In 1801 she married Joseph Alston, a prominent South Carolinian She made frequent visits to her father's home in the North, and when his name was under a cloud after the duel with Hamilton she stood loyally by him. She smoothed the way for his return from exile in Europe, but the ship on which she took passage from Charleston northward to meet him was never again heard from See Gamaliel Bradford, *Wives* (1925), biography by Anne Colver (1941)

Burr, William Hubert, 1851–1934, American civil engineer, b Watertown, Conn , grad Rensselaer Polytechnic Institute, 1872 Professor of civil engineering at Columbia Univ (1893–1916), he served on many important engineering commissions, including those for the Isthmian Canal (see PANAMA CANAL) and for the Port of New York Authority His works include *Ancient and Modern Engineering and the Isthmian Canal* (1902) and *Suspension Bridges, Arch Ribs, and Cantilevers* (1913)

Burra (bûr'u), town (pop 1,520), South Australia, N of Adelaide, in a pastoral and agricultural area Marble and mineral pigments are obtained in the vicinity It was the mining center (1844–78) of the Burra Burra copper field

Burrell, George Arthur (bû'rul), 1882–, American chemical engineer, b Cleveland, Ohio, grad Ohio State Univ (Chem E , 1918) A specialist in petroleum engineering and the discoverer of helium in Texas, he invented the Burrell gas detector and the Burrell pipette and wrote *Handbook of Gasoline* (1917) and *Extraction of Gasoline from Natural Gas* (1925)

Burrill, Thomas Jonathan (bûr'ĭl), 1839–1916, American botanist, horticulturist, and one of the first of the modern microscopists He was a pioneer in the study of bacterial diseases of crop plants For an appraisal of his work, see E F Smith, *Bacterial Diseases of Plants* (1920)

Burrillville, town (pop 8,185), N W R I , N of Gloucester, set off from Gloucester and inc 1806 There are several small mill villages, Harrisville is administrative center The state tuberculosis sanatorium is near by The town's woolen industry began c 1800

Burritt, Elihu, 1810–79, American worker for world peace, "the learned blacksmith," b New Britain, Conn While an apprentice and workman at the forge, he studied mathematics, languages, and geography and amassed a great store of knowledge Profoundly idealistic, he supported many reform causes—antislavery, temperance, and self-education—and he pleaded for them when he edited (1844–51) the weekly *Christian Citizen* at Worcester, Mass Most of all, however, he worked for the promotion of peace and the abolition of war He aided Anglo-American friendship in the days of the Oregon crisis, and he tried to avert the Civil War by a scheme of compensated emancipation Burritt organized the League of Universal Brotherhood in 1846, brought about the peace congress at Brussels in 1848, supported William LADD in his plans for international organization, and was an officer of the American Peace Society He argued for cheaper international postal rates and greater intellectual exchange among nations Among his much-read books were *Sparks from the Anvil* (1846)and *Ten Minute Talks* (1873) See Merle Curti, *The Learned Blacksmith* (1937).

burro: see ASS

Burroughs, John (bûr'ōz), 1837–1921, American naturalist and author, b Roxbury, N Y , son of a farmer He became in turn a journalist, a treasury clerk in Washington, and a bank examiner and in 1874 settled on a farm near Esopus, N Y , where he devoted his time to fruit culture and literature In his first book, *Walt Whitman, Poet and Person* (1867), he was the first to give adequate recognition to the genius of his poet friend In the bulk of his prose he made widely popular the type of nature essay which Thoreau had written His best-known books are *Wake Robin* (1871), *Locusts and Wild Honey* (1879), *Fresh Fields*, a travel book (1884), *Signs and Seasons* (1886), and his one volume of poems, *Bird and Bough* (1906) A growing interest in philosophy and in science is evident in *Time and Change* (1912), *The Summit of the Years* (1913), *The Breath of Life* (1915), and *Accepting the Universe* (1922) "The Sage of Slabside" became the friend of John Muir, Theodore Roosevelt, Edison, Ford, and other important men of his day Though attached to his farm home, he traveled to the Pacific coast, the South, the West Indies, Europe, and (with the Harriman expedition) Alaska, observing natural phenomena everywhere and recording them in simple, expressive prose See Clara Barrus, *The Life and Letters of John Burroughs* (1925)

Burrows, Julius Caesar, 1837–1915, American legislator, b Erie co , Pa He taught school before becoming (1861) a lawyer at Kalamazoo, Mich. In the Civil War he served as an infantry captain A Republican member of Congress (1873–75, 1879–83, and 1885–95), Burrows was in 1894 elected U S

Senator, serving until defeated for reelection in 1910 See W D Orcutt, *Burrows of Michigan* (1917)

burrstone see BURRSTONE

Bursa (bo͝or'sä), city (pop 85,919), NW Turkey, S of Mudania, its port on the Sea of Marmara Founded by King Prusias, ancient Prusa was a flourishing city of Bithynia It rose again to temporary importance under the Ottoman Turks, whose capital it was from its capture by Orkhan in 1326 until the transfer of the capital to Adrianople (1423) Tamerlane sacked it in 1402 Bursa is noted for its silks and carpets There are several fine mosques and the tombs of the early sultans The name appears also as Brusa or Brussa

Burschenschaft (bo͝or'shənshäft), student organization in the German universities The first was founded at Jena in 1815 to foster patriotism and to improve student morals, and the idea spread rapidly to other universities Soon the nationalist ideals of Friedrich JAHN became the creed of the Burschenschaften At the Wartburg festival (Oct 18, 1817), delegates of 14 universities created a united national organization, the Allgemeine Deutsche Burschenschaft, and adopted as their colors the black, red, and gold of the Holy Roman Empire After the murder (1819) of KOTZEBUE by a student, the Burschenschaften were dissolved by the CARLSBAD DECREES Although they were reorganized as secret nationalistic societies, their influence on the Revolution of 1848 was minor By 1849 all government restrictions had been lifted The Burschenschaften continued as purely social organizations, devoted for the most part to dueling, drinking, and other "manly" pursuits They were dissolved in 1935 Burschenschaften also existed in Austria

Bursaem (bûrz'ləm), part (since 1910) of STOKE-ON-TRENT, Staffordshire, England, in the Potteries district It is the birthplace of Josiah Wedgwood and the site of the Wedgwood Institute

Burt, John, 1814–86, American surveyor, son of William A Burt Trained by his father, he surveyed the northern peninsula of Michigan and was influential in developing the iron mines, ironworking, lumbering, and other industries of N Michigan

Burt, William Austin, 1792–1858, American surveyor and inventor, b Petersham, Mass He settled in Michigan Territory in 1824 From 1833 to 1855 he was U S deputy surveyor, spending much of his time on the frontiers, surveying in Iowa, Wisconsin, and the Upper Peninsula of Michigan He completed the geological survey of the Upper Peninsula started by Douglass Houghton and was the discoverer of iron ore in the region He was the inventor (1836) of the solar compass His typographer, patented in 1829, was America's first writing machine, ancestor of the American typewriter Later he invented the equatorial sextant He wrote *Key to the Solar Compass* (8th ed , 1909) Of five sons whom he trained as surveyors, John Burt became the most famous

Burton, Ernest DeWitt, 1856–1925, American biblical scholar, b Granville, Ohio, grad Denison Univ , 1876, and Rochester Theological Seminary, 1882 From 1892 to 1923 he served as professor of New Testament literature and interpretation at the Univ of Chicago, of which he became president in 1923 Burton was editor or associate editor (1892–1920) of the *Biblical World* and managing editor (1907–15) of the *American Journal of Theology* He wrote *A Short Introduction to the Gospels* (revised by H R Willoughby, 1926), with E J Goodspeed, *Harmony of the Synoptic Gospels* (1917) and *Harmony of the Synoptic Gospels in Greek* (1920), and, with Shailer Mathews, *The Life of Christ* (rev ed , 1927) See biography by T W Goodspeed (1926).

Burton, Frederick Russell, 1861–1909, American composer and musicologist, b Jonesville, Mich He composed the cantatas *Hiawatha* (1882–98) and *The Legend of Sleepy Hollow* (1900) and an ode for President McKinley's inauguration (1901), more important, however, is his book *American Primitive Music* (pub 1909), containing the results of his researches in Indian music He also was a journalist and wrote several novels

Burton, Harold Hitz, 1888–, Associate Justice of the U S Supreme Court (1945–), b Jamaica Plain (now part of Boston), grad Bowdoin College, 1909, and Harvard Law School, 1912 A prosperous Cleveland lawyer and a law instructor (1923–25) at Western Reserve Univ , he served as a representative (1929–31) in Ohio and as reform mayor (1935–40) of Cleveland He was (1941–45) U S Senator before he succeeded Owen J Roberts on the Supreme Court bench

Burton, Sir Richard Francis, 1821–90, English explorer, writer, and linguist He joined (1842) the service of the East India Company and, while stationed in India, acquired a thorough knowledge of the Persian, Afghan, Hindustani, and Arabic languages In 1853, in various Moslem disguises, he made a famous journey to Mecca and Medina, about which he wrote the vivid *Personal Narrative of a Pilgrimage to El-Medinah and Meccah* (3 vols , 1855–56) With John Speke he took a party to Somaliland, he alone, disguised as an Arab merchant, made the journey to Harar, Ethiopia, where he talked with the local ruler. In 1856 he went with Speke to E central Africa to discover the source of the Nile, he found Lake Tanganyika (1858), but abandoned the attempt to reach Lake Nyasa While Burton rested at Tabora, Speke pushed northward and found the Victoria Nyanza After a visit to America, Burton published an account of the Mormon settlement at Utah in his *City of the Saints* (1861) While consul (1861–65) at Fernando Po, off W Africa, he explored the Bight of Biafra and conducted a mission to Dahomey, Benin, and the Gold Coast He explored Santos, in Brazil, while consul (1865) there, and after crossing the continent wrote *Explorations of the Highlands of the Brazil* (1869) After a short period (1869–71) as consul at Damascus he was consul (1872–90) at Trieste, where he died. His last years were devoted chiefly to literature He published remarkable literal translations of Camões and of the *Arabian Nights* (16 vols , 1885–88) See biographies by Lady Burton (1893), G M Stisted (1896), and Seton Dearden (1937) and biography of his wife by Jean Burton (1941)

Burton, Robert, 1577–1640, English clergyman and scholar, whose great work, *The Anatomy of Melancholy,* appeared in 1621 under the pen name Democritus Junior Several times enlarged and revised before his death, this treatise ranges over a wide field of life and thought, citing a wealth of quotations from many literatures Steine, Lamb, Milton, and other writers have been indebted to it See *The Anatomy* (ed by A R Shilleto, 1893, by Floyd Dell and P Jordan-Smith, 1927), Bergen Evans and G J Mohr, *The Psychiatry of Robert Burton* (1944)

Burton, Theodore Elijah, 1851–1929, American statesman, b Jefferson, Ohio, grad Oberlin (B A , 1872, M A , 1875) A Cleveland lawyer and Republican leader, he was a U S Representative (1889–91, 1895–1909), a Senator (1909–15), and once more a Representative (1921–29) He was elected to the Senate again in 1928 and was also appointed to fill (1928–29) a seat left vacant by death Deeply devoted to the causes of peace, international cooperation, and disarmament, he was president of the American Peace Society (1911–15, 1925–29) Burton was an authority on monetary matters He wrote several books, among them a biography of John Sherman (1906) and *The Constitution of the United States* (1923)

Burton-on-Trent, county borough (1931 pop 49,486, 1947 estimated pop 49,200), Staffordshire, England It is known for its breweries There are remains of a Benedictine abbey founded in 1002

Burton-Opitz, Russell (-ō'pĭts), 1875–, American physiologist, b Fort Wayne, Ind , M D Rush Medical College, 1895 He was associated with Columbia Univ from 1902 His special studies included viscosity of the blood, blood pressure, and vasomotor nerves He wrote *Text Book of Physiology* (1920) and *Elementary Manual of Physiology* (5th ed , 1936)

Buru or **Boeroe** (both bo͞o'ro͞o), island (3,668 sq mi , pop 19,625), East Indonesia, in the Moluccas It is W of Ceram The terrain is wooded and mountainous, rising to 7,874 ft in the northwest Cajuput oil, resin, and copra are products

Burujird or **Burujerd** (both bo͞or'o͞ojĕrd'), city (1947 estimated pop 45,715), W Iran Capital of the former province of Luristan, it is now included in the Sixth Prov The Trans-Iranian RR passes through near-by Dorood Burujird has a textile industry

Burwell, village (pop 1,412), co seat of Garfield co , central Nebr , NNW of Grand Island, in grazing country, platted 1883

Bury, John Bagnell (bāg'nŭl bĕ'rē), 1861–1927, Irish historian, one of the foremost modern authorities on the East Roman Empire He was professor at the Univ of Dublin from 1893 to 1902 and at Cambridge from 1902 Among his chief works on late Roman and Byzantine history are *History of the Later Roman Empire from Arcadius to Irene, 395 A D to 800 A D* (2 vols , 1889), *History of the Eastern Empire from the Fall of Irene to the Accession of Basil I, A D 802–867* (1912), *History of the Later Roman Empire from the Death of Theodosius I to the Death of Justinian, A D 395 to A D 565* (2 vols , 1923), and his masterly edition of Gibbon's *Decline and Fall* Bury also wrote authoritatively on ancient Greece in his *History of Greece to the Death of Alexander the Great* (rev ed , 1913) and *Ancient Greek Historians* (1909) His interests ranged widely, and he left a *History of Freedom of Thought* (1913), *The Idea of Progress* (1920), and a scholarly *Life of St Patrick* (1905) He also edited Pindar's Nemean and Isthmian odes

Bury, Richard de see RICHARD DE BURY

Bury (bĕ'rē), county borough (1931 pop 56,182, 1947 estimated pop 56,740), Lancashire, England, on the Irwell and connected by canal with Bolton and Manchester A textile city since the time of Edward III, when wool weaving was introduced by the Flemings, it now has factories for the spinning, weaving, and bleaching of cotton Sir Robert Peel and John Kay were born here

Buryat-Mongol Autonomous Soviet Socialist Republic (bo͞oryät'-mông'gōl, -gul), autonomous republic (135,290 sq mi , pop 542,170), RSFSR, in SE Siberia. It is a largely mountainous and heavily forested area N of Mongolia, and it extends E from Lake Baikal to the Yablonovy range Towns, industries, and cultivation are largely concentrated in the valley of the Selenga, which empties into Lake Baikal. The Trans-Siberian RR crosses the Selenga at ULAN-UDE, the capital of the republic The mountains are rich in rare metals (tungsten, molybdenum, gold, silver) and also in tin, mercury, and iron Livestock raising (horses, cattle, sheep) is an important occupation among the Buryat-Mongols (see MONGOLS), who form about half the population, the rest being Russians Annexed by Russia in the 17th cent , Buryat-Mongolia was formed into an autonomous republic in 1923 In 1937 two small districts—now constituted as the Aga Buryat-Mongol National Okrug (9,380 sq mi , pop c 30,000) and the Ust-Ordyn Buryat-Mongol National Okrug—were detached from the autonomous republic and incorporated with Chita oblast, RSFSR The name also appears as Buriat-Mongolia

Bury Saint Edmunds, municipal borough (pop 16,708), Suffolk West, England It is a center for the surrounding rich farming region In 903 the remains of King Edmund were interred here in a monastery, founded c 630, which later became a famous shrine and Benedictine abbey

bus [from *omnibus,* Latin, =for all], public conveyance A horse-drawn urban omnibus was introduced in Paris in 1662 by Blaise Pascal and his associates, but it was operated for only a few years The omnibus reappeared c 1812 in Bordeaux, France, and in Paris c 1827, London in 1829, and New York in 1830 It often carried passengers both inside and on the roof Buses were motorized early in the 20th cent , motorbus transportation increased rapidly and is now used in most countries A number of railroad companies operate subsidiary lines A network of bus lines links all parts of the United States In 1928 the first bus from Los Angeles to New York made the trip of 3,433 mi in 5 days and 14 hr , in the same year, in England, a bus equipped with berths made the first overnight run of its kind from London to Liverpool Buses are used also for vacation and sight-seeing tours and for transporting children to and from school See *Bus Facts,* issued annually by the National Association of Motor Bus Operators, M D Winn, *The Macadam Trail* (1931)

Busaco, Portugal see BUSSACO

Busch, Adolf (ä'dôlf bo͝osh'), 1891–, German-Swiss violinist, studied at the Cologne Conservatory In 1919 he organized the Busch string quartet, and in 1935 the Busch Chamber Players, both outstanding in the performance of chamber music He toured the United States with Toscanini in 1931 With his brother Hermann Busch (hĕr'man), cellist, and his son-in-law Rudolf Serkin, pianist, he has given many trio recitals Early in his career he toured with his friend Max Reger, whose influence may be noted in his compositions, which are numerous and in various forms Another brother, **Fritz Busch,** 1890–, is an outstanding conductor He was musical director of the opera in Stuttgart (1918–22) and in Dresden (1922–28), afterward conducting in Stockholm, Buenos Aires, New York, and Copenhagen and at the Glyndebourne Festivals in England

Busch, Wilhelm (vĭl'hĕlm bo͝osh'), 1832–1908, German cartoonist, painter, and poet After studying at the academies of Antwerp, Düsseldorf, and Munich, he joined the staff of the *Fliegende Blätter,* to which he contributed highly popular humorous drawings from 1858 to 1871 Busch invented the comic strip and remains one of its most famous protagonists His humorous, illustrated poems for children, such as *Max and Moritz* (1865, Eng tr by Christopher Morley, 1932), are classics

Büsching, Anton Friedrich (an'tôn frē'drĭkh büshing), 1724–93, German geographer and educator He was professor of philosophy in Gottingen, was a Protestant minister, and was director of a Gymnasium in Berlin The most important of his many works is *Neue Erdbeschreibung* (10 vols , 1754–92, Vol XI was written after his death), six volumes of which, describing the geography of Europe, were translated into English as *A New System of Geography* (1762)

Bush, Vannevar, 1890–, American electrical engineer and physicist, b Everett, Mass , grad Tufts College (B S , 1913) He went to Massachusetts Institute of Technology in 1919, there he was professor (1923–32) and vice president and dean of engineering (1932–38) In 1939 he became president of the Carnegie Institution, and in 1941 he was made director of the Office of Scientific Research and Development He designed calculating devices, including a differential analyzer, conducted work in power transmission, and wrote *Principles of Electrical Engineering* (with W H Timbie, 1922) and *Operational Circuit Analysis* (1929)

bushido (bo͝o'shĕdō, bo͝oshĕdō') [way of the warrior], the code of honor and conduct of Japanese nobility It grew out of the old feudal bond, which required unwavering loyalty on the part of the vassal even to giving up wife, child, and life to protect the honor of the obligation. It was not in early days touched

with religious significance, nor was it in very early times even called bushido Thus feudal ideal (honored sometimes more in the breach than in the observance) of the SAMURAI was in the 17th and 18th cent formulated into a full code of conduct, which emphasized the military virtues but applied to all nobility It borrowed heavily from Confucianism and Zen Buddhism The emphasis was upon loyalty, honor dependent on loyalty, and self-sacrifice for one's superior and for one's honor After the Meiji restoration, it was the basis of the intense loyalty to the emperor cultivated in modern Japan

Bushire (bŏŏshēr'), city (1947 estimated pop 19,045), SW Iran, W of Shiraz A port on the Persian Gulf, it was in the 19th cent very prosperous, but it has a shallow, roadstead and has sunk somewhat in importance The climate is hot and humid The name formerly sometimes appeared as Abushehr

bushmaster, largest venomous snake of the New World, member of the pit VIPER family, found in the tropics of Central and South America Unlike the related rattlesnakes, it lays eggs It reaches a length of from 8 to 12 ft

Bushmen, a people of the southern part of Africa related to the Pygmies and speaking a language related to that of the HOTTENTOTS Bushmen of pure blood are seldom over 5 ft in height, are yellowish brown in color, and have broad noses, flat ears, bulging foreheads, prominent cheekbones, and small cranial capacity They are nomadic hunters, their favorite weapon being the poisoned arrow The social unit is the small hunting band, larger organizations are loose and temporary Caves and rock shelters are used as dwellings Though the Bushmen are in some ways among the most primitive of men, they have a rich folklore, are skilled in drawing, and have a remarkably complex language See D F Bleek, *Naron a Bushman Tribe of Central Kalahari* (1928) and *Comparative Vocabularies of Bushman Languages* (1929), A L Kroeber, *Anthropology* (rev ed, 1948)

Bushnell, Horace (bŏŏsh'nul), 1802–76, American Congregational minister b Bantam, Conn, grad Yale, 1827 He became (1833) pastor of the North Church, Hartford, Conn He wrote *Christian Nurture* (1847) and *God in Christ* (1849) Because of certain views of the Trinity which he was alleged to have expressed in the latter, unsuccessful attempts were made to bring him to trial for heresy Bushnell's dignified reply was made in *Christ in Theology* (1851) His views concerning the austerity of Calvinism, the importance of intuition in theological knowledge, and the presence of the divine in humanity and nature had profound influence in shaping modern religious thought Ill-health obliged him to retire from the active ministry in 1859, but he continued to write His works include *The Vicarious Sacrifice* (1866), *Sermons on Living Subjects* (1872), and *Forgiveness and Law* (1874) See the *Life and Letters* (ed by his daughter, Mrs M B Cheney, 1902), biography by T T Munger (1899), A J W Myers, *Horace Bushnell and Religious Education* (1937)

Bushnell, city (pop 2,900), W Ill, WSW of Peoria, inc 1865 It is a rail center in a farm and stock-raising area

bushrangers, men following lawful or unlawful pursuits in the wild lands of Australia, but more particularly bandits who terrorized rural areas in the 19th cent The first bushrangers (c 1806–1844) were mainly escaped convicts who fled to the bush and soon organized gangs Their crimes were checked effectively by various Bushranging Acts passed after 1830 With the discovery of gold, however, bushrangers of a new type appeared and flourished (c 1850 1870)—largely free-born adventurers who attacked gold convoys The last of the bushrangers were the men of the Kelly gang This band of desperados was exterminated in 1880, when three members were killed defending a hotel at Glenrowan, Victoria, and Edward (Ned) Kelly was hanged at Melbourne

business cycle see CRISIS, ECONOMIC

Buskerud (bŏŏs'kurŏŏd), county (5,728 sq mi, pop 149,948), SE Norway It comprises the agricultural valleys, Numedal and Hallingdal, in the northwest and is forested in the southeast Drammen, at the head of the Drammen river, is the county seat

Busoni, Ferruccio Benvenuto (fĕr-rōōt'chō bānvānnōō'tō bōōzō'nē), 1866–1924, Italian pianist and composer, pupil of his mother At the age of nine he gave a concert in Vienna, which was followed by many appearances as a child prodigy His style of playing was similar to that of Liszt, whom he greatly admired He taught at the conservatories in Helsinki and Moscow and from 1891 to 1894 at the New England Conservatory of Music He transcribed for piano many of the organ works of Bach His own compositions, in a neoclassic, Mozartian style, include piano pieces, a piano concerto, a violin concerto, and operas, his greatest work was his unfinished opera *Doktor Faust*, completed by his pupil Jarnach and performed in Dresden in 1925. See his letters to his wife (Eng tr, 1938), biography by E J. Dent (1933).

Busra, Iraq see BASRA.

Bussaco or **Busaco,** Port *Buçaco* (all bōōsa'kō), locality, W Portugal, near Coimbra and around Bussaco Mt It was a place of seclusion and penitence for monks, and there are many small chapels, mostly ruined The area is now a summer resort Here British and Portuguese troops under Wellington decisively defeated (1810) the French under Masséna in the Peninsula War.

Bussora, Iraq see BASRA

Bustamante, Anastasio (anasta'syō bōōstamān'tā), 1780–1853, Mexican general and president (1830–32, 1837–41) He served in the royalist army against HIDALGO y COSTILLA and MORELOS y PAVÓN, but in 1821 adhered to the Plan of IGUALA in support of Agustín de ITURBIDE Vice president under Vicente GUERRERO, he engineered a successful revolution (1829–30) with the help of SANTA ANNA, but fell from power himself through a revolution (1832) led by his erstwhile confederate He returned from exile after the failure to crush the Texas Revolution had destroyed Santa Anna's power temporarily, and was again president His reactionary administration was hampered by revolutions, by trouble with France—the so-called Pastry War and the blockade of Veracruz (1838)—and by the recovery of popularity by Santa Anna Bustamante later served in the Mexican War

Bustamante, Antonio Sánchez de (antō'nyō sān'chās dā), 1865–, Cuban authority on international law Professor of international law at the Univ of Havana, he was a member of the Hague Tribunal (Permanent Court of Arbitration), a delegate to the Paris Peace Conference, and president of the Pan American Congress in 1928 His project of a code of international private law was approved by the Pan American Congress

Bustanai ben Chaninai see BOSTANAI BEN CHANINAI

Busto Arsizio (bōōs'stō ärsē'tsyō), city (pop 32,820), Varese prov, Lombardy, N Italy It is an important center of the Italian cotton industry The Church of Santa Maria in Piazza was designed by Bramante

Busuanga (bōōswang'a), island (343 sq mi, 1939 pop 10,109), largest of the Calamian Islands, Philippines, SW of Mindoro Manganese is mined

Butades of Sicyon (bū'tudēz, sĭ'shēŏn), c 600 B C, Greek sculptor, supposed to have been the first to model in clay

Buteritari, Gilbert Islands see MAKIN

Butcher, Samuel Henry, 1850–1910, British classical scholar, b Dublin, grad Cambridge Univ He taught at Oxford and for 21 years at the Univ of Edinburgh Among his standard works on Greek civilization are a translation of the *Odyssey* (with Andrew Lang, 1879), *Aristotle's Theory of Poetry and Fine Art* (with a critical text and a translation, 1895), and *Some Aspects of Greek Genius* (1891)

butcher bird: see SHRIKE

Bute, John Stuart, 3d earl of (būt), 1713–92, English prime minister He succeeded his father, the 2d earl, in 1723 and lived in Scotland until 1745, when he went to England His friendship with Frederick, prince of Wales, began in 1747, and he soon became a favorite at the prince's court After Frederick's death his importance as a friend of the princess and of her son increased The young prince of Wales trusted Bute exclusively and, when he had become George III, elevated Bute to the rank of privy councilor and first gentleman of the bedchamber George III's policies of destroying the Whig monopoly of political power, of making the monarch supreme over Parliament, and of ending the war with France were also Bute's After the forced resignation of William Pitt in 1761, Bute was made prime minister His already great unpopularity was increased when he had to declare war on Spain in 1762 and swelled more when he failed (1763) to secure in the Treaty of Paris the advantages the English expected He forced approval of the treaty in Commons by bribery He resigned in April, 1763, and despite rumors of later backstairs influence, his personal friendship with the king seems to have ended in 1765, in the ministry of his successor, George Grenville See biography by J A Lovat Fraser (1912), Romney Sedgewick, ed, *Letters from George III to Lord Bute, 1756–1766* (1936)

Bute, island and county, Scotland see BUTESHIRE

Bute Inlet (būt), arm of the Strait of Georgia, SW British Columbia It extends over 50 mi from the north end of the strait

Butenandt, Adolf (ä'dôlf bōō'tunänt), 1903–, German biochemist He determined the chemical structure of the female sex hormone progestin and later, in 1931, isolated and named the male sex hormone androsterone Because of a Nazi decree he declined the 1939 Nobel Prize in Chemistry awarded to him jointly with Leopold Ruzicka

Buteshire (būt'shĭr) or **Bute** (būt), insular county (218 sq mi, 1931 pop 18,823, 1948 estimated pop 19,974), W Scotland, in the Firth of Clyde ARRAN and Bute are the largest islands Bute, though the smaller of the two, is the more important and has the county town, Rothesay Agriculture (potatoes, oats, and barley), the chief occupation of the county, is chiefly concentrated in the less hilly southern and central portions of Bute Cattle and sheep are raised, and fishing (herring and whitefish) is of some importance The islands are popular with tourists for their scenery and for the bracing climate

Butler, Alban, 1710–73, English Roman Catholic priest, educated at Douai He was president of the English seminary at Saint-Omer His monumental work, *The Lives of the Fathers, Martyrs, and Principal Saints* (4 vols in 7, 1756–59), is a good popular reference work See the much-enlarged recent edition, *The Lives of the Saints* (ed by Herbert Thurston, S J, Donald Attwater, and Nora Leeson, 12 vols, 1926–38)

Butler, Benjamin Franklin, 1795–1858, American political leader and cabinet officer, b Columbia Co, N Y Butler, like his former law partner, Martin VAN BUREN, was a member of the ALBANY REGENCY, and he devoted himself and his considerable power to reform politics He was Attorney General (1833–38) and Secretary of War (1836–37) under Andrew Jackson and Attorney General (1837) under Van Buren but refused later cabinet appointments He helped to revise (1825) the New York state statutes and organized what is today the law school of New York Univ

Butler, Benjamin Franklin, 1818–93, American politician and Union general in the Civil War, b Deerfield, N H, grad Waterville (now Colby) College, 1838 He moved to Lowell, Mass, when a youth and later practiced law there and in Boston Butler was a Democrat but a strong Unionist At the beginning of the Civil War his contingent of Massachusetts militia was one of the first to reach Washington He restored order (May, 1861) in secessionist Baltimore and was given command at Fort Monroe A force under his general command was defeated by J B Magruder at BIG BETHEL in June, but Butler successfully led a combined naval and land force against the forts of the Hatteras Inlet, N C, in August He commanded the troops that accompanied Admiral Farragut in taking New Orleans and was made military governor of the city There his highhanded rule (May–Dec, 1862) infuriated the people of New Orleans and the South The government, severely criticized both at home and abroad for his actions, finally removed him in May, 1864, as commander of the Army of the James. Butler advanced on Richmond while Grant engaged Lee in the Wilderness campaign Beauregard defeated him at DRÉWRYS BLUFF and then had him bottled up at Bermuda Hundred until Grant crossed the James in June After he failed to take FORT FISHER in Dec, 1864, he was relieved of further active command From 1867 to 1875 Butler, now a rabid radical Republican, was in Congress He was one of the House managers who conducted the impeachment proceedings against President Johnson, and he ardently advocated the party's Reconstruction policy He was said to have great influence with Grant Butler was (1877–79) an independent Greenbacker in Congress After several unsuccessful attempts to secure the governorship of Massachusetts, he was elected by the Greenbackers and Democrats in 1882 In 1884 he received the nominations of the Antimonopoly and Greenback parties for President An unprincipled demagogue of great ability, Butler aroused intense antagonisms and was nearly always in controversy See his autobiography, *Butler's Book* (1892)

Butler, Charles, 1750–1832, English Roman Catholic polemicist, nephew of Alban Butler The first Catholic admitted (1791) to the bar in England after 1688, he strongly defended his faith and worked for the Catholic Emancipation He also wrote biographies and legal works

Butler, Elbis Parker, 1869–1937, American humorist, b Muscatine, Iowa He is famous for his sketch, *Pigs Is Pigs* (1906)

Butler, Howard Crosby, 1872–1922, American archaeologist, b near Brewster, N Y, grad Princeton, 1892 He was professor of art and archaeology at Princeton from 1901 to 1922 His archaeological investigations in Syria were described in part in *Architecture and Other Arts* (1903), and his excavations at Sardis were recorded in his elaborate volumes *Sardis the Excavations* (1922) and *The Temple of Artemis* (1925) See the memorial volume, *Howard Crosby Butler* (1923), which contains a biography and complete bibliography

Butler, James see ORMONDE, JAMES BUTLER, 12TH EARL AND 1ST DUKE OF

Butler, John, 1728–96, Loyalist commander in the American Revolution, b New London, Conn He served in the French and Indian War and distinguished himself especially by leading the Indians in the successful British attack (1759) under Sir William Johnson against Niagara Electing the British side after the Revolution broke out, he became a deputy to Guy Johnson at Niagara and worked to keep the Indians friendly to the British In the Saratoga campaign (1777) he and Indian troops accompanied Gen Barry St Leger in the unsuccessful expedition down the Mohawk valley Later he organized a Loyalist troop called Butler's Rangers, and with them he and his son, Walter BUTLER, attacked the frontier settlements John Butler in 1778 raided the Wyoming Valley, defeated Zebulon BUTLER took Forty Fort, and then was unable to keep his Indian allies from perpe-

trating the Wyoming Valley massacre. Later that year Walter Butler and Joseph Brant led a similar raid on Cherry Valley, and this also ended in a massacre The name of Butler was thereafter anathema to the patriots John Butler was defeated (1779) by the expedition of Gen John SULLIVAN at Newtown near the present Elmira, N Y, and later in the war he joined with Sir John JOHNSON in frontier raids See Howard Swiggett, *War Out of Niagara* (1933)

Butler, Joseph, 1692–1752, English bishop and theologian He was preacher (1719–26) at the Rolls Chapel, London, his tenure there produced the noted *Fifteen Sermons* (1726). While rector of Stanhope (1725–40) he was also prebendary of Salisbury and, later, of Rochester In 1738 he was made bishop of Bristol and in 1740 became dean of St Paul's In 1750 he was translated to the see of Durham, one of the richest in England He also served as clerk of the closet to Queen Caroline and later to King George II Bishop Butler did not devote to his own use the benefits he received as a pluralist but gave generously It is as a writer that he is chiefly remembered His great book, *The Analogy of Religion, Natural and Revealed, to the Constitution and Course of Nature* (1736), was aimed to combat the influence of deism in England Of the editions of Butler's works, that published by W E Gladstone (2 vols, 1896) is noteworthy See also E C Mossner, *Bishop Butler and the Age of Reason* (1936), W J Norton, *Bishop Butler, Moralist and Divine* (1940)

Butler, Josephine Elizabeth (Grey), 1828–1906, English social reformer With the help of her husband, George Butler, she began rescue work for prostitutes, establishing a home in Liverpool for them In 1869 she began to agitate for the repeal of the "contagious diseases acts" which legalized and quarantined brothels, the acts were condemned by Parliament in 1883 and repealed in 1886 Mrs Butler, with the aid of W T Stead, also secured action (1885) for the repression of white-slave traffic Among her numerous publications devoted to the causes of vice control and of education for women are *The Constitution Violated* (1871) and *Personal Reminiscences of a Great Crusade* (1896) See biographies by W T Stead (1888) and M G Fawcett and E M Turner (1928)

Butler, Matthew Calbraith, 1836–1909, Confederate general and U S Senator, b near Greenville, S C When the Civil War began he became a cavalry captain in the Hampton Legion and later earned distinction as a cavalry commander in many battles and was promoted major general in 1864 He had a foot shot off (1863) in the battle of Brandy Station After the war he was prominent in Reconstruction politics in South Carolina, at first as a "fusion" man, cooperating with the pro-Union forces, but in the days of "radical Reconstruction" after 1870 as a Democrat His star rose with that of Wade HAMPTON, and he served in the U S Senate from 1877 until 1895, when he, like Hampton, was ousted by the forces of Benjamin TILLMAN Butler was a major general of volunteers in the Spanish-American War See U R Brooks, *Butler and His Cavalry* (1909)

Butler, Nicholas Murray, 1862–1947, American educator, president of COLUMBIA UNIVERSITY (1902–45), b Elizabeth N J, grad Columbia (B A, 1882, Ph D, 1884) Holding a Columbia fellowship, he studied at Paris and Berlin, specializing in philosophy He was made successively assistant, tutor, and adjunct professor in philosophy at Columbia He became (1886) president of the Industrial Education Association, reshaped it into what is today Teachers College of Columbia Univ, and was (1889–91) the institution's first president He was intimately associated with John W BURGESS in the struggle to integrate a university organization and was largely responsible for the expansion of Columbia College into Columbia Univ In 1890 he became professor of education and dean of the Faculty of Philosophy and in 1901 acting president of Columbia The next year he formally succeeded Seth Low He instituted the Summer Session, University Extension (now the School of General Studies), the School of Journalism, the Medical Center, and other units which have contributed to the magnitude of present-day Columbia An advocate of peace through education, he helped to establish the Carnegie Endowment for International Peace, of which he was a trustee and later (1925–45) president His efforts in behalf of disarmament and international peace won him international prestige, and he shared with Jane Addams the 1931 Nobel Peace Prize. Prominent in national, state, and New York city politics, he remained a regular Republican party member despite differences with its platforms. Though a close friend of Theodore Roosevelt, he refused to join the Progressive movement of 1912 and that year received the Republican electoral votes for Vice President after the death of the regularly nominated candidate He later was the leading Republican advocate of the repeal of the Eighteenth Amendment, urged economy in government, and supported local reform movements Honors and decorations were bestowed on him by many governments He was (1928–41) president of the American Academy of Arts and Letters His books include *Education in the United States* (1910), *The International Mind* (1913), *The Meaning of Education* (rev ed, 1915), *Scholarship and Service* (1921), *The Faith of a Liberal* (1924), *The Path to Peace* (1930), *Looking Forward* (1932), *Between Two Worlds* (1934), and *The World Today* (1946) See his autobiography, *Across the Busy Years* (1939); see also *Bibliography of Nicholas Murray Butler, 1872–1932* (1934)

Butler, Pierce, 1866–1939, Associate Justice of the U S Supreme Court (1923–39), b Dakota co, Minn, grad Carleton College, 1887 Admitted (1888) to the bar, he practiced in St Paul, specialized in railroad law, and became an expert in railroad-valuation cases, serving (1913–22) both the U S and Canadian governments His opinions in the Supreme Court generally opposed New Deal legislation

Butler, Samuel, 1612–80, English poet and satirist, b Strensham, Worcestershire During the Puritan Revolution, Butler served in the family of Sir Samuel Luke, a Puritan and a lieutenant of Cromwell, but after the Restoration he enjoyed some court patronage Butler achieved permanent fame by his long mock romance *Hudibras* (1663–78), a satire on the hypocrisy of the Puritans, in which Sir Hudibras is modeled on Sir Samuel Luke Many of its biting, octosyllabic couplets are as quotable as proverbs A R Waller edited *Hudibras* in 1905 See E A Richards, *Hudibras in the Burlesque Tradition* (1937)

Butler, Samuel, 1835–1902, English author, grad St John's College, Cambridge, 1858, son and grandson of eminent clergymen Refusing to be ordained, in 1859 he went to New Zealand, where he established a sheep farm and in a few years made a modest fortune While there he began contributing articles to the press After his return to England in 1864, he devoted himself to art, music, biology, and literature Besides exhibiting (1868–76) at the Royal Academy, he composed several works in collaboration with Henry Festing Jones, among them the Handelian *Narcissus a Dramatic Cantata* (1888) His version of Utopia is *Erewhon, or, Over the Range* (1872), a "nowhere" (though the scenes resemble New Zealand), where crime is a disease to be cured and disease a crime to be punished *Erewhon Revisited* came in 1901 He opposed his friend Darwin's explanation of evolution, although not the theory itself, in his *Evolution Old and New* (1879), *Unconscious Memory* (1880), and *Luck or Cunning as the Main Means of Organic Modification?* (1887) In his single novel, *The Way of All Flesh* (1903), an attack upon the Victorian pattern of life, the hero Ernest Pontifex, like Butler himself, rebels against the ecclesiastical environment in which he is reared His other works are *Alps and Sanctuaries of Piedmont* (1881) and a biography of his grandfather (1896) His notebooks were published in 1912 See biographical and critical studies by H F Jones (1919), C E M Joad (1924), C G Stillman (1932), Malcolm Muggeridge (1936), and G D H Cole (1947), bibliography by A J Hoppé (1925)

Butler, Smedley Darlington, 1881–1940, U S Marine Corps general, b West Chester, Pa He entered the Marine Corps in 1899 and served in the U S occupation of VERACRUZ, Mexico, in 1914 and with the marines in Haiti, and in most other marine campaigns He was a commander in France in the First World War and retired in 1931 as a major general He was out of the service nearly a year to direct the cleanup of vice in Philadelphia (1924) General Butler was notable for his violent opinions and flamboyant quarrels and, after his retirement, for his campaign against war and for isolationism His autobiography, *Old Gimlet Eye*, as told to Lowell Thomas, appeared in 1933.

Butler, Thomas: see OSSORY, THOMAS BUTLER, EARL OF

Butler, Walter, 1752?–1781, Loyalist officer in the American Revolution, b New York state; son of John BUTLER "Young Walter Butler," as he is called to distinguish him from his grandfather, a patrician pioneer, was an officer in his father's Loyalist troops, Butler's Rangers He was captured (1777) by the patriots and sentenced to death, but the sentence was commuted He escaped, and in 1778 he led the Rangers in a raid This ended with the Cherry Valley massacre (1778), for which his Indian commander, Joseph BRANT, blamed Butler Walter Butler was killed by a patriot troop under Marinus Willett See Howard Swiggett, *War Out of Niagara* (1933).

Butler, William Orlando, 1791–1880, American general and political leader, b Carrollton, Ky, grad Transylvania Univ, 1812 He served in the War of 1812, was wounded at the battle on Raisin river, served under Andrew Jackson in the taking of Pensacola, and distinguished himself in the battle of New Orleans His career as lawyer and officeholder—he was a Congressman from 1839 to 1843—was interrupted by the Mexican War. He was a major general of volunteers and was second in command to Zachary Taylor at Monterrey, where he was wounded. After the fighting was over he succeeded Winfield Scott as commander in chief and superintended the evacuation of the U. S soldiers from Mexico In 1848 he was vice presidential candidate on the unsuccessful ticket with Lewis Cass Though a slaveholder, he opposed secession and supported the Union cause in the Civil War

Butler, Zebulon, 1731–95, American colonial leader, b Ipswich, Mass After serving in the French and Indian Wars, Butler led a group of Connecticut settlers to the WYOMING VALLEY in N Pennsylvania He was military leader of the Connecticut settlers in the PENNAMITE WARS and served as director of the SUSQUEHANNA COMPANY Butler represented (1774–76) the Wyoming Valley in the Connecticut assembly A colonel in the Revolution, he was defeated (1778) by Loyalists under John Butler and fled to Forty Fort, the Wyoming Valley massacre followed Butler escaped and later was military commandant of the region

Butler. **1** Town (pop 1,093), co seat of Taylor co, W central Ga., SW of Macon, in a farm area, inc 1854 **2** Town (pop 1,794), NE Ind, near Auburn It is a rural trading center **3** City (pop 2,958), co seat of Bates co, W Mo, NE of Fort Scott, Kansas, founded in the 1850s It is known for its livestock auctions and annual horse show **4** Borough (pop 3,351), N N J, NW of Paterson, settled 1695, inc 1901 St Anthony's Monastery (Franciscan) is here The chief industry is a factory for rubber products **5** City (pop 24,477), co seat of Butler co, W Pa, N of Pittsburgh, settled c 1800, inc as a borough 1803, as a city 1917 Rich in coal, gas, oil, and limestone, its manufactures include glass, metal products, and automobile trailers

Butler University, at Indianapolis, coeducational, chartered 1850, opened 1855 by the Disciples of Christ Church. The Arthur Jordan Conservatory of Music and the John Herron Art Institute are affiliated

Buto (bū'tō), ancient city, N Egypt, in the Nile delta The precise location is unknown Capital of Lower Egypt in prehistoric times (before 3400 B C), it had a temple dedicated to the goddess Buto

Bütschli, Otto (ō'tō büch'lē), 1848–1920, German zoologist He was professor of zoology at the Univ of Heidelberg His researches on invertebrate animals advanced knowledge of the development of gastropod mollusks, insects, and some other forms, the structure of nematode worms, and processes of division of the nucleus and cell A significant contribution was his theory (1878) of the structure of protoplasm, which suggested that it is alveolar or foamlike, he helped to establish that it is fluid in nature

Butt, Dame Clara, 1873–1936, English contralto, of rich and powerful voice She made her debut (1892) as Orpheus in the opera by Gluck, but was principally heard in concerts and oratorios She was made Dame of the Empire in 1920. See biography by Winifred Ponder (1928)

Butte (būt), city (pop 37,081, alt 5,775 ft), co seat of Silver Bow co, SW Mont, largest city in the state, founded 1864, laid out 1867, inc 1879 First a gold-mining town, then a silver-boom center, Butte gained its real importance when copper was discovered (c 1880) and Marcus Daly with his Anaconda Copper Mining Company began to exploit what was boastfully called the "richest hill on earth" Butte, which acquired a reputation as a wide-open town, has ever since been dominated by the mining industry (zinc, silver, manganese, gold, lead, and arsenic, as well as copper) with consequent periods of prosperity and depression and labor troubles Columbia Gardens recreational area was given to the city by William A Clark The Montana School of Mines is here

butte, an isolated hill with steep sides and a flat top, left by the more rapid erosion of the surrounding areas. Buttes are characteristic of the plains of the W United States and are common in the Badlands

butter, dairy product obtained by agitating cream or milk to unite the fat globules In America and England the milk of cows is generally the basis, but elsewhere that of goats, sheep, and mares has been used Butter was known by 2,000 B C, though it was anciently used less as a food than as an ointment for the bath, a medicine, or an illuminating oil At first it was rudely churned from milk in skin pouches thrown back and forth or swung over the backs of trotting horses. Later, as butter became a staple food, various sorts of hand churns were devised, including rotating, swinging, and rocking barrels or boxes and cylindrical vessels operated by dashers or plungers Buttermaking requires immaculate cleanliness of all utensils and a cool temperature, often provided on the farm by a milk house with a spring or running water Formerly the daily milk was set to cool in pans, and the cream, rising to the top because of the low specific gravity of the fat globules, was skimmed off, left to ripen by natural fermentation, and churned until small granules of butter appeared. The BUTTERMILK was drained off and the butter washed, usually salted, and worked into a smooth mass with wooden paddles. Exclusively farm made until c.1850, butter has become increasingly a factory product. The

centrifugal cream SEPARATOR, introduced into the United States c.1880, and a method, devised in 1890 by S M BABCOCK, to determine the butterfat content of milk and cream gave impetus to large-scale production. The application of principles of chemistry and bacteriology facilitates the making of butter of uniform quality. Most cream is inoculated with a starter culture of bacteria which convert lactose to lactic acid and of other organisms which attack citric acid to produce volatile oils and diacetyl for imparting desirable butter flavors. The percentage of fat extraction and the time required for churning depend on the composition of the butterfat (see FATS AND OILS), the temperature, acidity, richness, and viscosity of the cream, the speed and motion of the churn, and the size of the fat globules. Butter should contain at least 80 percent of fat and not more than 15 percent of water, the body should be close, firm, and waxy; the color uniform. Sweet-cream butter is made from cream to which no starter was added. Sweet, or unsalted, butter is favored in Europe, but other markets prefer at least 2 percent salt. Renovated or process butter is made from rancid or inferior butter, melted and refined, then rechurned. Whey butter, made from cream separated from whey, is usually oily and of inferior quality. The natural color of butter, derived from the carotene of green plant fodder, ranges from pale yellow to deep gold. Artificial coloring, commonly the oil of the annatto seed, carotene extract, or harmless coal-tar derivatives, is used to keep the tint uniform throughout the year. Butter made from pasteurized cream may be stored for several months with little deterioration, thus augmenting the winter supply with butter made around the peak season (June in the Northern Hemisphere). The United States, Russia, Denmark, Australia, Canada, New Zealand, and Belgium are the leading producers, Denmark, New Zealand, and Australia, the chief exporters, and the United Kingdom, a heavy importer. Although butter is made in every state of the United States, production centers in the northern Middle West, especially Minnesota, Iowa, and Wisconsin. Clarified butter, butterfat separated by heat, is useful in cooking and has good keeping qualities. It is made in quantity in Egypt and in India, where it is known as GHEE. The high dietary value of butter is due to its large proportion of easily digested fat and to its vitamin A content. See C. C. Totman and others, *Butter* (4th ed., 1939), C. H. Eckles and others, *Milk and Milk Products* (3d ed., 1943).

butter-and-eggs or **toadflax**, perennial wayside plant (*Linaria vulgaris*), introduced from Eurasia and now weedy. It has small snapdragonlike flowers of yellow and orange that bloom through the summer. A decoction was formerly used as a fly poison. Other similarly colored plants have been called butter-and-eggs.

buttercup or **crowfoot**, any of a number of species of the genus *Ranunculus*, plants widely distributed and in the wild mostly characterized by glossy yellow flowers and deeply cut leaves. Buttercups are often of a weedy nature and contain an acrid juice which makes some of them unpalatable for livestock and in some cases poisonous (unless dried or boiled), the poisonous species (e.g., *Ranunculus acris*) are capable of raising blisters. Some buttercups, however, are cultivated for garden and cut flowers, particularly the Persian or turban buttercup, valued for the variety of colors and large double blossoms. Another species sometimes cultivated is the creeping buttercup. There are also aquatic buttercups.

Butterfield, John, 1801–69, American stagecoach proprietor and expressman, b. near Albany, N.Y. Beginning as a stage driver out of Albany, he rose to ownership of a large network of stage lines. He helped to merge his express company with others to form the American Express Company. In 1857, when Congress established the overland mail route to Los Angeles, Butterfield was given the mail contract. He organized the service on the 2,800-mile southern route efficiently and continued it until 1861, when the stages were moved to the central route. He also promoted the development of telegraph lines and railroads, and in 1865 he was elected mayor of Utica, N.Y.

butterfly, any of a large group of insects found in all parts of the world which, with the MOTH group, comprises the order Lepidoptera. Members of this order have broad, membranous wings covered with scales which come off as dust if the insect is handled. Red, yellow, black, and white pigments are found in the scales. Blues, greens, and the metallic, iridescent hues, found especially in the tropical species, are caused chiefly by refraction. Butterflies can be distinguished from moths in several ways: the antennae of the butterfly are enlarged at the tip, while those of the moth almost never have terminal knobs but are often threadlike or feathery; the butterfly is chiefly diurnal, the moth largely nocturnal; when at rest most butterflies hold the wings vertically, most moths hold them horizontally; the body of a butterfly is more slender and usually smoother than that of the moth. The life history is divided into four stages, egg, larva, pupa, and adult. The eggs, which hatch in from 2 to 30 days, are usually laid on a plant which the larva (caterpillar) uses for food. After the last of several molts the butterfly larva forms the pupa case, or chrysalis, inside which its body changes to the adult form. Except in those species which winter in the pupa stage, the adult usually emerges from the chrysalis in two or three weeks. Some winter in the egg stage, others as larvae or as adults. Those which migrate usually travel toward the equator in the fall and away from it in the spring. Examples of MIMICRY and of protective coloration are found among butterflies. Among the most beautiful are the swallowtails, which are found all over the world, the North American monarch, and the peacock and the tortoise-shell butterflies. See W. J. Holland, *The Butterfly Book* (1931).

butterfly flower, fringeflower, or **poor-man's-orchid**, any of the showy plants of the genus *Schizanthus*, native to Chile but grown elsewhere as garden or greenhouse annuals. The flowers resemble butterflies and come in a variety of colors, usually mottled.

butterfly weed or **pleurisy root**, handsome MILKWEED (*Asclepias tuberosa*) native to the United States and sometimes cultivated. Through the summer it bears mostly terminal clusters of bright orange flowers particularly attractive to butterflies. The root, once an official diaphoretic and expectorant but now seldom used, was eaten for lung and throat ailments and was applied to wounds by the Indians, who also utilized the plant for fiber and food, although it is reported toxic.

Butterick, Ebenezer, 1826–1903, American inventor of standardized paper patterns for dressmaking, b. Sterling, Mass. He was a tailor and shirtmaker, and c. 1859 he or his wife conceived the idea of graded shirt patterns to simplify their work, making it possible to cut the garments on a large scale. In 1863 the first pattern, cut from stiff paper, was placed on the market. Patterns for children's clothes and later for women's followed. Beginning in 1864 these were made of tissue paper. In 1869 a factory was established in Brooklyn and a fashion magazine, later the *Delineator*, was started. Branches were established in London, Paris, Berlin, and Vienna.

buttermilk, milk or cream from which butter has been removed by churning. Milk solids and lactic acid give it a high food value. About 1½ lb. are produced for each pound of butter. Formerly wasted or used as livestock feed, it is increasingly condensed or dried for use in chick rations and in the preparation of food, especially ice cream and bakery products. The so-called cultured buttermilk is a FERMENTED MILK.

butternut see WALNUT.

Butterworth, Hezekiah, 1839–1905, American poet, editor, and writer of juvenile stories, b. Warren, R.I. He was editor (1870–94) of the *Youth's Companion*, making it a leading juvenile periodical. Besides three volumes of poetry, he wrote popular books for children. *The Story of the Hymns* (1875) won him a prize.

buttons, knoblike appendages used on wearing apparel either for ornament or for fastening. In China they are worn on the hat as a sign of rank. Although sometimes used by Greeks and Romans as fasteners, they first became important when fitted garments came into use in the 10th cent., and their use has varied with the changes in fashion. In the 16th cent. they became magnificent and were classed among the vanities, many Puritans fastening their clothing with hooks and eyes, as the Amish people still do. Buttons have been made of a large variety of materials—metal, porcelain, paste, wood, ivory, horn, bone, pearl, glass, fabric, paper, composition, jewels, and coins. They became important to English industry in Elizabeth's reign. There are two main types, those made with holes and those with shanks. The former, of bone, pearl, wood, and the like, are cut with a tubular saw, and the holes are pierced. The shank buttons, of metal, composition, and glass, have a loop of metal let in through a hole or soldered into place. Fresh-water-pearl button making began in the United States in 1891 with the discovery of suitable shells in the Mississippi river at Muscatine, Iowa. The increasing popularity of the button-collecting hobby has resulted in a multiplicity of clubs, shows, and books. See P. D. S. Crummett, *Button Collecting* (1939).

button snakeroot see BLAZING STAR.

buttonwood see PLANE TREE.

buttress, mass of masonry built against a wall to add strength to the wall itself or to counteract the pressure from a vault or an arch bearing upon the wall at that particular location. The especial need for buttresses exists in a structural system based upon vaulting, and consequently the ancient architectures which used pier-and-lintel construction show no examples of them. The Romans were the first to employ buttresses, which sometimes projected from the exteriors of the walls and were then left as mere piles of masonry, without architectural treatment. But in the large structures, such as basilicas and baths, the buttresses which received the thrusts from the main vaulting were confined to the interior of the building, where they served also as partition walls. The basilica of Constantine in Rome (A.D. 312) exemplifies this arrangement. In the medieval church, the groined vaults, concentrating their great lateral thrusts at points along the exterior walls, required buttresses as an essential element to achieve stability. Beginning with Romanesque architecture about A.D. 1000, a steady evolution of buttresses can be traced, from the simple, slightly projecting piers of the 11th cent. to the bold and complex Gothic examples of the 13th, 14th, and 15th cent. Builders in England, Germany, and N. France achieved striking architectural effects. They devised the flying buttress, an arch of masonry abutting against the wall of the nave, the thrust of the nave vault could thus be received and transferred to the vertical buttress built against the outside walls of the side aisles. These flying arches, at first concealed beneath the roofs, began to be exposed outside the roofs in the mid-12th cent. Later they were enriched with gables, stone tracery, and sculpture and were topped with pinnacles to give them extra weight. They constitute, especially in such French cathedrals as Amiens, Beauvais, and Notre Dame de Paris, the true expression upon the exterior of the building of the elasticity and equilibrium which were the basic principles of the Gothic structural system.

Butyl rubber: see RUBBER, SYNTHETIC.

Butzer, Martin see BUCER, MARTIN.

Buxar or **Baxar** (both bŭksär'), village, W. Bihar state, India. Here in 1764 a British victory over the Nawab of Oudh assured British control of the Bengal area.

Buxtehude, Dietrich (dē'trĭkh bo͝oks"to͞oə'dŭ), 1637–1707, Swedish organist of St. Mary's Church in Lübeck. There his *Abendmusiken* attracted many musicians, among them J. S. Bach, who journeyed afoot to hear him play. He composed organ music in various forms and sacred cantatas.

Buxton, Sydney Charles, 1st **Earl Buxton** (bŭk'stŭn), 1853–1934, British statesman, grandson of Sir Thomas Fowell Buxton. He entered Parliament in 1883 as a Liberal and was undersecretary for the colonies (1892–95). When postmaster general (1905–10) he introduced penny-postage exchange with the United States. He was president of the Board of Trade (1910–14) and, receiving an earldom (1914), became governor general of the Union of South Africa (1914–20). He wrote books on current political questions and a biography of Louis Botha (1924).

Buxton, Sir Thomas Fowell, 1786–1845, English social reformer. As a member of Parliament (1818–37) he began his reform activities immediately with the publication of *An Inquiry Whether Crime and Misery Are Produced or Prevented by Our Present System of Prison Discipline*, this led to the establishing of the Society for the Reformation of Prison Discipline. An abolitionist, Buxton succeeded William Wilberforce as leader of the anti-slavery group. His efforts resulted in the passage of an act (1833) abolishing slavery in the British colonies. He wrote *The African Slave Trade* (1839) and *The Remedy* (1840). See his memoirs (ed. by his son Charles Buxton, 1872).

Buxton, municipal borough (1931 pop. 15,349, 1943 estimated pop. 17,118), Derbyshire, England, on the Wye and in the Peak district. It is c. 1,000 ft. high, and the "old town" is on a hill above it. Buxton is a year-round resort, with mineral springs and baths, and is the site of the Devonshire Hospital. Poole's Hall, a stalactite cave, is near.

Buxton, town (pop. 1,708), SW Maine, near the Saco and W of Portland, settled 1740, inc. 1772.

Buxtorf, Johann (yō'hän bo͝oks'tôrf), the elder, 1564–1629, German Hebraist, first of a celebrated family of scholars who through four generations occupied the chair of Hebrew at the Univ. of Basel. He entered his professorship there in 1591 and was recognized as the foremost student of rabbinical literature among Protestants. He defended the original text of the Old Testament as the most reliable authority. Among his works was a great rabbinical Bible. Two others, left unfinished, were a concordance to the Hebrew Bible and a Chaldaic, Talmudic, and Rabbinic lexicon, both afterward completed and edited by his son, **Johann Buxtorf,** the younger, 1599–1664, Orientalist. He succeeded his father at Basel in 1630 and from 1654 held in addition the chair of Old Testament exegesis. Besides editing and publishing some of his father's writings, he produced several controversial treatises and other learned works.

Buys-Ballot, Christoph Heinrich Diedrich (krĭs'tôf hīn'rĭkh dē'drĭkh bois'-bŭlō'), 1817–90, Dutch meteorologist. He was after 1854 director of the Dutch Royal Meteorological Institute. He strove to organize and standardize a system for representing meteorological findings and formulated Buys-Ballot's law: if one stands with his back to the wind, the area of low pressure is to his left. This is true in the Northern Hemisphere, the reverse is true in the Southern Hemisphere. The explanation lies in the deflection, caused by the earth's rotation, in the movement of air from areas of high to areas of lower pressure. Ferrel's law (see FERREL, WILLIAM) is related.

Buysse, Cyriel (sīrēl' boi'sŭ), 1859–1932, Flemish novelist. He first wrote naturalistic novels and

later (and more successfully) sketches and stories With Vermeylen he was a leader in the literary revival In 1932 he was made Baron van Deurle

Buz (bŭz) [Heb ,=contempt] **1** Son of Nahor and Milcah Gen 22 21 He was apparently eponym of an Arabian tribe Jer 25 23 The term Buzite is probably derived from his name Job 32 2 **2** Gadite 1 Chron 5 14

Buzau (bōzŭ'ōō), town (pop 43,365), SE Rumania, in Walachia, on the Buzau river, an affluent of the Siret There are oil refineries, foundries, and flour mills Long the residence of an Orthodox bishop, it has a 16th-century church, restored in 1740

Buzi (bū'zī), father of Ezekiel Ezek 1 3

buzzard, name applied to a number of hawks and vultures The turkey VULTURE or turkey buzzard and the black vulture or black buzzard are found in the S United States The red-tailed, the red-shouldered, and the broad-winged hawks are called buzzards In the Old World are the common buzzard of the genus *Buteo* and the honey buzzard of the genus *Pernis*, which feeds on insects, the larvae of wasps and bumblebees, and small reptiles

Buzzards Bay, inlet of the Atlantic, 30 mi long and 5 to 10 mi wide, SE Mass , connected with Cape Cod Bay by the Cape Cod Canal and bounded on the southeast by the Elizabeth Islands Its shores are very irregular New Bedford is near the head of one of the larger inlets The village of **Buzzards Bay** (pop 993), seat of Cape Cod Canal administration, is in Bourne town

By, John, 1781-1836, British military engineer, educated at the Royal Military Academy, Woolwich He was stationed in Canada from 1802 to 1811 and was sent there as a colonel in 1826 to construct the RIDEAU CANAL A village grew up around his headquarters which was called Bytown and is now Ottawa By returned to England in 1832

Byblos (bĭb'lŭs), ancient city, Phoenicia, a port not far from the present Beyrouth, Syria The principal city of Phoenicia in the centuries of the 2d millennium B C , it retained its importance as a port under the Persians Byblos was the chief center of the worship of Adonis It also because of its papyri, was the source of the Greek word for book and, hence, of the name of the Bible Ruins of the city have been studied, especially after 1922 The name of the modern town Jebail preserves the form Gebal, the name given the city in the Old Testament Ezek 27 9 The inhabitants are called Gibhites Joshua 13 5 The Gebal of Ps 83 7 is almost certainly not the same city, it is otherwise unknown

Bydgoszcz (bĭd'gôshch), Ger *Bromberg* (brōm'bĕrk), city (pop 134,614), capital of Pomorze prov , NW Poland, on the Brda, a tributary of the Vistula It passed to Prussia in 1772 and was restored to Poland in 1919 During the Second World War, in which it suffered relatively little damage, Bydgoszcz was annexed to Germany It is chiefly a trade center shipping much timber There are lignite deposits and salt domes in the vicinity The Bydgoszcz Canal (constructed 1773-74), which begins at Bydgoszcz, connects the Brda and Notec rivers and is part of the Vistula-Oder waterway

Byelo-. For some Russian names beginning thus, see BELO-

Byesville (bīz'vĭl), village (pop 2,418), E Ohio, near Cambridge Coal mining is its chief industry

Byles, Mather, 1707-88, American clergyman, poet, and wit, b Boston, grad Harvard (B A , 1725, M A , 1728) Famous minister of the Hollis St Congregational Church, Boston, from 1732, he was dismissed after the British evacuation of Boston for his Tory sympathies From his uncle, Cotton Mather, he inherited a curious and valuable library and was a collector himself His poetry, imitative but witty, appeared in *Poems on Several Occasions* (1744) and other volumes, his prose includes sermons and *The Flourish of Annual Spring* (1741) See A W H Eaton, *The Famous Mather Byles* (1914)

bylina (bĭlē'nē) [Russ ,=those that have been], Russian term applied to the great body of narrative and heroic poems which, after being handed down in Russia by word of mouth for centuries (some from the 11th cent), finally in the 18th cent began to be collected and studied Before this time the first to write down a poem of the *bylina* type was an Englishman, Richard James, in 1619, while serving as a chaplain in Moscow The *bylina* occur in cycles, the largest of which is that originating around Kiev and having for its hero Prince Vladimir, the Little Sun Here the favorite character is the Old Cossack warrior Ilya of Murom Of importance also is the Novgorod cycle, concerned with the adventures of the merchant-prince Sadko and Vasily Buslayevich To a third cycle of Older Heroes belongs the strong plowman Mikula The characters of the *bylina* all possess supernatural powers Though modified by foreign borrowings—Scandinavian, Byzantine, Oriental—*bylina* are typically and strikingly Russian and have had an enriching influence on Russian literature, music, and art See N K Chadwick, *Russian Heroic Poetry* (1932), Helen Muchnic, *Introduction to Russian Literature* (1947)

Byng, George see TORRINGTON, GEORGE BYNG, VISCOUNT

Byng, John, 1704-57, British admiral, son of George Byng, Viscount Torrington When he was sent (1756) to relieve the British garrison at Minorca, he was defeated by the French and abandoned his task He was court-martialed, convicted of neglect of duty, and shot The severe, though lawful, sentence awoke popular indignation See *Byng Papers* (ed by Brian Tunstall, 1931).

Byng, Julian Hedworth George, 1st **Viscount Byng of Vimy,** 1862-1935, British general He served in India and South Africa and had several commands in the First World War The Canadians in April, 1917, stormed Vimy Ridge under his orders For his distinguished service he was made a baron and, in 1926, a viscount He was governor general of Canada from 1921 to 1926

Bynkershoek, Cornelius van (kôrnā'lĭŭs văn bĭng'-kŭnshōōk), 1673-1743, Dutch writer on international law *De dominio maris* (1702, Eng tr , 1923) is a classic on maritime law, and he also wrote on diplomatic rights and, in *Quaestiones juris publici* (1737), on public law He was the judge presiding over the court of appeals of Holland, Zeeland, and West Friesland from 1724 to 1743

Bynner, Witter (bĭ'nŭr), 1881-, American poet, b Brooklyn, N Y , grad Harvard, 1902 His first significant book of verse was *Grenstone Poems* (1917), followed by the equally lyric *Canticle of Pan* (1920) A musician as well as a poet, Bynner has a remarkable facility in catching the cadences of other writers and cultures Under the pseudonym Emanuel Morgan he collaborated with Arthur Davison Ficke in writing *Spectra* (1916), a satiric literary hoax *The Jade Mountain* (1929) is a translation with Kiang Kang-hu of 300 Chinese poems He reproduced the quality of Southwestern primitive life in *Indian Earth* (1929) Other volumes include several plays, essays, *Selected Poems* (ed by Robert Hunt, 1943), and later poems in *Take Away the Darkness* (1947)

Byrd, Harry Flood (bûrd), 1887-, U S Senator from Virginia (1933), b Martinsburg, W Va , brother of Richard E Byrd Educated at Shenandoah Academy in Winchester, Va , he became publisher of the Winchester *Star* and was a figure in state politics His administration as governor (1926-30) was marked by development of the state highway system As Senator in succession to Claude A Swanson, Byrd took the lead among conservative Democrats, opposed the New Deal, and advocated government economy He also is the owner of very large apple orchards

Byrd, Richard Evelyn, 1888-, American aviator and polar explorer, b Winchester, Va , grad Annapolis, 1912 He took up aviation in 1917, and after the First World War he gained great note in the air he commanded the naval air unit with the arctic expedition of D B MACMILLAN in 1925, he and Floyd BENNETT flew from Spitsbergen to the North Pole and back in 1926, and in 1927 he and three companions made one of the spectacular flights across the Atlantic His record of flight was presented in *Skyward* (1928) Two years later he led a well-equipped and efficiently organized expedition to Antarctica Establishing a base at LITTLE AMERICA, he discovered the Rockefeller Range and Marie Byrd Land, and late in 1929 he and Bernt BALCHEN flew to the South Pole and back The large party gathered much scientific information In 1930 Byrd was promoted rear admiral, and his *Little America* was published His second large expedition was organized in 1933, and headquarters were established at Little America again As winter approached, he established an advance base 123 mi closer to the South Pole and there stayed alone for several months making observations *Discovery* (1935) and *Alone* (1938) were records of this fruitful expedition In 1939-40 he was again in the antarctic commanding a government expedition, and in 1946-47 he headed the U S navy expedition, the largest yet sent to the region (see ANTARCTICA) *Exploring with Byrd* (1937) is made up of selections from his first three books

Byrd, Byrde, or **Bird, William** (all bûrd), b 1542 or 1543, d 1623, English composer, organist at Lincoln Cathedral and, jointly with Tallis, at the Chapel Royal Although Roman Catholic, he composed English anthems and services in addition to his great Roman Masses and Latin motets He was highly esteemed by his contemporaries and was favored by Queen Elizabeth, who, in 1575, granted to Byrd and Tallis a patent for the exclusive printing and selling of music Byrd also composed music for the virginal and other instruments See E H Fellowes, *William Byrd* (1936)

Byrd, William, 1652-1704, British planter in early Virginia He came to America as a youth and took up lands he inherited on both sides of the James, including the site of later Richmond In 1691 he moved to "Westover," long famous as the Byrd family home His landed fortune was increased by his interest in trade, and wealth, culture, and character made him almost the ideal tidewater aristocrat He was the father of William Byrd (1674-1744). J S Bassett edited his writings (1901).

Byrd, William, 1674-1744, American colonial writer, planter, and government official, son of William Byrd (1652-1704) He served in the house of burgesses and was made auditor (1702) and receiver general (1706) of Virginia Twice he spent years (1697-1705, 1715-26) in England as colonial agent From 1709 to his death he was a member of the council William Byrd of Westover, as he is often styled, increased the lands (he ultimately owned 179,000 acres) and the wealth he inherited from his father and was the able spokesman of the large planters against Gov Alexander SPOTSWOOD, who tried to reduce their power On one of his estates he caused (1737) the city of Richmond to be laid out His service in 1728 as one of the commissioners to survey the boundary between North Carolina and Virginia and his many trips into the backwoods provided the material for his writings, *A History of the Dividing Line, A Journey to the Land of Eden,* and *A Progress to the Mines,* all based on his diaries These were extracted in 1841 from the collection called the Westover MSS Since that time they have been much republished, and admiration for the limpid prose, the crisp wit, and the almost incongruously urbane tone he displays have won more and more admirers He is generally considered one of the foremost of colonial authors He wrote secret diaries in shorthand, of which two have been deciphered and published (1941, 1942), they offer intimate glimpses of early Virginia Byrd's wide intellectual and artistic interests were also shown in his library of more than 4,000 volumes and his collection of paintings See biography by R C Beatty (1932)

Byrde, William see BYRD, WILLIAM (b 1542 or 1543)

Byrhtnoth (bĭrkht'nōth) or **Bryhtnoth** (brĭkht'nōth), d 991, alderman of the East Saxons Leader of the English forces in the battle of MALDON, he was killed in the battle, and was buried at Ely

Byrne, Donn (Brian Oswald Donn-Byrne) (bûrn), 1889-1928, Irish-American novelist and short-story writer, b Brooklyn, N Y , grad University College Dublin He was living in New York when his novel *Messer Marco Polo* (1921) had its great success He wrote other romantic Irish tales—including *Blind Raftery* (1924) and *Hangman's House* (1926)—and also several volumes of short stories—*Stories without Women* (1915), *The Changelings* (1923), *Destiny Bay* (1928), and others See study by Thurston Macauley (1929)

Byrnes, James Francis, 1879-, U S Secretary of State (July, 1945 Jan 1947), b Charleston, S C He studied law while working (1900-1908) as court reporter, owned and edited a newspaper in Aiken S C , and represented (1911-25) South Carolina in the House As Senator (1931-41), Byrnes, a Southern Democrat, became budgetary expert for the New Deal He served (1941-42) as Associate Justice of the Supreme Court but resigned and became director of economic stabilization (1942) and later (1943) director of war mobilization As Secretary of State, he tried to mend post-war differences with the USSR He was succeeded by George C MARSHALL Byrnes is the author of *Speaking Frankly* (1947)

Byrom, John, 1692-1763, English shorthand expert and poet, educated at Trinity College, Cambridge He devised an early shorthand system and taught it in Manchester *The Universal English Shorthand* was posthumously published He was a great admirer of William Law, and much information about Law is found in Byrom's *Private Journal and Literary Remains* (1854-57) He wrote *Seasonably Alarming and Humbuling Truths in a Metrical Version of Certain Select Passages Taken from the Works of William Law* (1774) and other facilely rhyming, rather eccentric religious verse

Byron, George Gordon Noel Byron, 6th **Baron** (bī'-rŭn), 1788-1824, English poet, son of "Mad Jack" Byron and Catherine Gordon of Gight His father died in 1791 and Byron, lame from birth, was alternately subjected to the excessive tenderness and to the violent temper of his mother His contempt for her was in later years directed toward all women In 1798, after years of poverty, Byron succeeded to the title and took up residence at the family seat, Newstead Abbey. He subsequently attended Dulwich school and Harrow (1801-5) and then matriculated at Trinity College, Cambridge His first volume, *Fugitive Pieces* (1806), was suppressed, revised and expanded, it appeared in 1807 as *Poems on Various Occasions* This was followed by *Hours of Idleness* (1807), which provoked such severe criticism from the *Edinburgh Review* that Byron replied with *English Bards and Scotch Reviewers* (1809), a satire in heroic couplets which immediately shot him to fame He left England this same year for a grand tour through Spain, Portugal, Italy, and the Balkans He returned in 1811 with Cantos I and II of *Childe Harold* (1812), which made him the social lion of London. It was followed by the verse tales *The Giaour* (1813), *The Bride of Abydos* (1813), *The Corsair* (1814), *Lara* (1814), *The Siege of Corinth* (1816), and *Parisina* (1816) Byron's name at this time was linked with those of several ladies, notably, Lady Caroline Lamb, in 1815 he married Anne Isabella Milbanke In 1816, however, she secured a separation for obscure reasons A theory advanced by Harriet Beecher Stowe was that Lady Byron discovered the exist-

ence of improper relations between Byron and his half sister, Mrs. Augusta Leigh. At any rate, Byron, a social outcast, left England and passed some time with Shelley in Switzerland, writing Canto III of *Childe Harold* and *The Prisoner of Chillon*. Settling in Venice (1817), he led, for a time, a life of dissipation, but produced Canto IV of *Childe Harold* (1818), *Beppo* (1818), and *Mazeppa* (1819) and began *Don Juan*. In 1819 he formed a liaison with the Countess Teresa Guiccioli, who remained his acknowledged mistress for the rest of his life. In 1823 Byron was induced to interest himself in the cause of the Greeks. He accordingly sailed for Missolonghi, where he arrived in 1824. He worked unsparingly with Mavrocordatos to unify the divergent Greek forces, but died as a result of exposure. Byron's poetry covers a wide range. In *English Bards and Scotch Reviewers* and in *The Vision of Judgment* (1822), his counterblast to Southey's adulatory poem on George III), he wrote true 18th-century satire. He created the 'Byronic hero" who appears in the Faustian tragedy *Manfred* (1817)—a mysterious, lonely, defiant figure whose past hides some great crime. *Cain* (1821) raised a storm of abuse for its skeptical attitude towards religion. The verse tale *Beppo* is in the *ottava rima* which Byron later used for his acknowledged masterpiece *Don Juan* (1819–24), an epic-satire combining Byron's art as a storyteller, his lyricism, his cynicism, and his detestation of convention. See biographies by Harold Nicolson (1924), E. C. Mayne (1924), John Drinkwater (1925), André Maurois (1930), and Peter Quennell (1935, 1941).

Byron, John, 1723–86, British vice admiral and explorer. Sailing in 1740 with Admiral George Anson on a voyage around the world, he was shipwrecked off Chile. His *Narrative of Great Distresses on the Shores of Patagonia* (1768) is said to have been used by his grandson, the poet Byron, in writing *Don Juan*. His own circumnavigation of the globe (1764–66) resulted in the British claim to the Falkland Islands. Byron served (1769–72) as governor of Newfoundland. After being appointed (1778) to command a squadron he lost his only major engagement, to Admiral d'Estaing off Grenada (1779).

Byron, city (pop. 1,114), N Ill., SW of Rockford, in a farm area, founded 1835, inc. 1904.

Bystrom, John Niklas (bü'strŭm), 1783–1848, Swedish sculptor. He spent part of his life in Rome. He made colossal statues of kings of Sweden for Stockholm, but he was most successful in portraying women and children.

Bytom, Upper Silesia: see BEUTHEN.

Bytown, Ont.: see OTTAWA.

Byzantine architecture, (bĭ'zuntēn, -tīn, bĭgăn'tĭn), style of building which grew up in the Mediterranean area from Italy eastward after Constantine had made Byzantium (Constantinople) the capital of the Roman Empire (A.D. 330). Crystallizing in Ravenna and Constantinople, it spread through Greece and the Balkans to Asia Minor, Armenia, parts of Syria, and ultimately to Russia, Italy, Sicily, and even more distant regions. In general the style was the product of Roman methods of construction modified by new aesthetic theories expressed in strikingly colorful materials and methods of adornment, which, though often considered Eastern, are in fact the logical outgrowth of trends already apparent in Roman imperial buildings of the first three centuries A.D. Though the changes throughout this evolution were gradual, a distinct style of building had emerged within two centuries after the reign of Constantine to a point where any obvious similarity to Roman architecture had largely disappeared. Under the reign of Justinian (527–65), the Byzantine architectural vocabulary attained its first definitive expression in a number of great buildings, chief among them the octagonal Church of San Vitale at Ravenna and the world-renowned HAGIA SOPHIA (532–37), the masterpiece of the first phase of the style, designed as the cathedral church of the imperial capital. In true Roman fashion, the Byzantines formed their walls and vaults of thin bricks laid with mortar joints as thick as the bricks themselves. A powerful carcass or shell was thus created, upon the interior of which richly colored materials were incrusted as a frankly decorative veneer. Ornamental carving was in low, flat relief, its pattern achieved by incision rather than by the relief modeling of classical ornament and its special character depending on the use of the drill rather than the chisel. Structurally these buildings show a distinctive system of thrusts, acting one against another and concentrated upon selected points in the plan, much as in the great vaulted basilicas and baths of the pagan Roman period. Like the latter, also, their exteriors exhibit broad wall surfaces, rarely broken by moldings or detail but diversified above by the boldly swelling shapes of vaults and domes roofed with sheets of lead. The second or middle phase of Byzantine architecture, in which Eastern influences became apparent, is represented by SAINT MARK'S CHURCH at Venice, completed c.1071 but modified and embellished in succeeding centuries and generally considered the greatest achievement of the style after Hagia Sophia. In its final stylistic phase, realized in the 13th and following centuries in Greece, Constantinople, S Italy, the Balkans, and Russia, Byzantine architecture assumed more ornate and exotic forms of design and decoration, particularly on exteriors, and the churches themselves became progressively smaller. The preferred plan is that of a cross inscribed in a square, the crossing crowned by a dome on an elaborate towerlike cylindrical drum pierced by narrow arched windows, with similar subordinate domes grouped around it picturesquely at lower levels. To the present day this is the accepted style of the Greek Church. Among examples in Greece is the tiny metropolitan cathedral at Athens (13th cent.) and the Church of the Holy Apostles at Salonica, the latter noted for its beautifully patterned exterior brickwork. In Armenia at this time and earlier a distinctly local interpretation was developed, with cut stone used as the chief material instead of brick. In Russia also, Byzantine factors were remolded to a national manner, e.g., in the cathedrals of Moscow, Kiev, and Novgorod, where the exterior false domes assume a pointed bulbous form, and interior decoration—as in most late Byzantine churches—is realized largely in fresco. Aside from churches, remaining examples of Byzantine architecture are chiefly monasteries, e.g., the Meteora and Mt. Athos, a few ruined castles and town sites, e.g., Malvasia and Mistra (all the foregoing in Greece), baptisteries, and city gates and walls, as at Constantinople. Little is left to testify to minor and domestic work.

Byzantine art, an art blended of Hellenistic and Oriental traditions which flourished in Constantinople and Alexandria throughout the course of the Byzantine Empire. Having begun its development in the 2d and 3d cent. A.D., it reached its first Golden Age c.330. In the pre-Justinian and Justinian periods experimentation with a new style culminated in a characteristic Byzantine art. The iconoclastic period, set in motion by Emperor Leo III (717–40), caused an almost complete artistic standstill. The ban on pictorial and sculptural representation of religious subjects (see ICONOCLASM) drove many Byzantine artists to Italy and N France. It is due to this exodus that Byzantine characteristics are found in the pre-Renaissance art of Europe. Iconoclasm ended in the majority of Michael III and with the Macedonian dynasty. Byzantine art entered its second Golden Age, which lasted until the sack (1204) of Constantinople. During this period a twofold art was in evidence, monastic on the one hand, secular and imperialistic on the other, the increasing dominance of the monastic party introduced further Christian iconography. The last period of Byzantine art, from the restoration until the fall (1453) of Constantinople, was one of decline and deterioration. Having found their way into the Balkans and Russia, elements of the Byzantine style survived there into the 20th cent. From the Orient, Byzantine art took its emphasis on decorativeness and dazzling ornamentation as well as its neglect of plasticity in favor of flat-line harmony. Christianity having become the official religion in 325, these principles were applied to Christian iconography. Mosaics, composed of glass tesserae, were at their highest point in the first Golden Age. Examples may be found in the cathedrals at Ravenna, dating from the 6th cent. Gold, silver, and purple predominate in these brightly colorful representations of saints and rulers. In the second Golden Age mosaics became more emotional and religious, by the 14th cent. they all but disappeared. Sculpture was at all times characterized by even, flat relief, concentrating more on producing decorative effects of light and dark than on achieving realistic gradations of shading. Much of the sculpture of the first Golden Age was destroyed during the iconoclastic period, and only a few tomb ornamentations remain. These are very much in the Hellenistic tradition. The second Golden Age and the 14th cent. produced almost no sculpture. Stone carving in Byzantine art was always more prevalent in capitals and pilasters rather than in round figures. Such carvings existed in all periods and are of a delicate, lacy design, taking their models from fruits and flowers. Carving in ivory was also a popular art. During the first Golden Age little ivory diptychs were produced to tell such news as the election of a new consul. In the second Golden Age ivory carving was done on boxes and caskets, a few frescoes remain from this period. The illustration of manuscripts with miniature paintings, which was already much practiced in the first Golden Age, reached a new elaborateness in the second Golden Age. Among the minor arts, enameled icons and gold ornaments again exhibit the decorative, dainty workmanship characteristic of Byzantine art. After the introduction of silk weaving into the Byzantine Empire in the 6th cent., tapestries were also produced. See O. M. Dalton, *Byzantine Art and Archaeology* (1911), Hayford Peirce and Royall Tyler, *Byzantine Art* (1926), David Talbot Rice, *Byzantine Art* (1935), Parker Lesley, *Early Christian, Byzantine, and Romanesque Art* (1939).

Byzantine Empire, successor state to the Roman Empire (see under ROME), also called Eastern Empire and East Roman Empire. It was named after Byzantium, which Emperor CONSTANTINE I rebuilt (A.D. 330) as CONSTANTINOPLE and made the capital of the entire Roman Empire. A division into Eastern and Western empires became permanent after the accession (395) of HONORIUS in the West and ARCADIUS in the East, but the permanent split was not foreseen at the time. Throughout the eleven and a half centuries of its existence the Byzantine Empire was subject to important changes of its ill-defined boundaries. The core of the empire consisted of the Balkan Peninsula (i.e., THRACE, MACEDONIA, EPIRUS, GREECE proper, the Greek isles, and ILLYRIA) and of Asia Minor. Greek was the prevalent language but Latin long continued in official use. The characteristic Oriental influence began with Constantine I, who also introduced Christianity. Orthodoxy triumphed over ARIANISM under Arcadius' predecessor, THEODOSIUS I, but violent religious controversy was chronic until the end of the empire. The reigns (395–527) of Arcadius, THEODOSIUS II, MARCIAN, LEO I, Leo II, ZENO, ANASTASIUS I, and JUSTIN I were marked by the invasions of the Visigoths under ALARIC I, of the Huns under ATTILA, and of the AVARS, the SLAVS, the Bulgars (see BULGARIA), and the Persians. Italy, Gaul, and Spain were, after the Western Empire fell (476) to ODOACER, theoretically united under Zeno but actually dominated by, respectively, the Ostrogoths, the Franks, and the Visigoths, while Africa was under the Vandals. In the same period arose the heresies of NESTORIANISM and MONOPHYSITISM and the political parties of BLUES AND GREENS to divide the Byzantines. Yet under the rule (527–65) of JUSTINIAN I and THEODORA, Byzantine power experienced an amazing revival. Their two great generals, BELISARIUS and NARSES, checked the Persians, repressed political factions, and recovered Italy and Africa, while TRIBONIAN helped the emperor to codify ROMAN LAW. During Justinian's reign a great revival of Hellenism took place in literature, Byzantine art and Byzantine architecture entered their most glorious period. Much was lost again under his successors. The LOMBARDS conquered most of Italy. However, Ravenna and the PENTAPOLIS, Rome, Sardinia, Corsica, Liguria, and the coasts of S Italy and Sicily long remained under Byzantine rule, and the exarchs governed until 751 at RAVENNA. The Persians, under KHOSRU I, made great gains, though Emperor MAURICE temporarily checked them in 591. HERACLIUS I (610–41) defeated the Persians but was barely able to save Constantinople from the AVARS. Moslem conquests soon afterward wrested SYRIA, Palestine, Egypt, Africa, and Sicily from the empire. Heraclius' attempt to reconcile Monophysitism and Orthodoxy merely led to the new heresy of MONOTHELETISM. CONSTANS II (642–68) reorganized the administration of the provinces (*themes*) on a military basis, and CONSTANTINE IV (668–85) saved Constantinople from Arab attack. The 7th cent. was marked by increasing Hellenization of the empire, outwardly symbolized by the adoption of the Greek title Basileus by the emperors. The church, under the PATRIARCH of Constantinople, assumed increasing importance in public affairs. Theology, cultivated by emperors and monks alike, was pushed to extremes of subtlety; literature and art became chiefly religious. Under JUSTINIAN II and his self-made successors the empire was again menaced by Arabs and Bulgars, but the Isaurian emperors LEO III (717–40) and CONSTANTINE V stopped the Arab advance and recovered Asia Minor. The grave issue of ICONOCLASM, which they precipitated, led to the loss of Rome. In 800, during the reign of IRENE, the Frank CHARLEMAGNE was crowned emperor of the West at Rome. Thus ended even the theoretical primacy of Byzantium over Europe. The political division of East and West was paralleled by the religious schism, originating with the patriarch PHOTIUS, between the Roman and the ORTHODOX EASTERN CHURCH. In all aspects the Byzantine Empire, having lost its claim to universality, became definitely an Oriental state, though Constantinople was the repository of Greek and Roman civilization. Compared with its savants, artists, writers, and artisans, those of Western Europe were crude and barbarous, though more vigorous and original. Yet Byzantine court history is a story of absolute despotism and barbarous cruelty not exceeded at any Asiatic court. Rulers acceded to the throne by blinding or murdering their predecessors, often their closest blood relations. Treason, intrigue, and violence were normal political instruments. Eunuchs and slaves became generals and ministers, court ceremonial was an almost religious rite, vice, corruption, and perversion had lost the power to shock. Yet moral decay did not prevent such emperors as BASIL I, founder of the Macedonian dynasty, and his successors (notably LEO VI, ROMANUS I, CONSTANTINE VII, NICEPHORUS II, JOHN I, and BASIL II) from giving the empire a period of splendor and power (867–1025). The eastern frontier was pushed to the Euphrates, the Bulgars subjugated, and the Balkan Peninsula recovered. Russia, converted to Christianity, became an outpost of Byzantine culture.

In the unceasing struggle between the great landowners and the small peasantry the emperors consistently favored the peasants Economic prosperity was paralleled by a new golden age in science, philosophy, and architecture With the rule of Zoë (1028–55) anarchy and decline set in The Seljuk Turks began their attacks, and with the defeat (1071) of Romanus IV at Manzikert most of Asia Minor was permanently lost The Normans under Robert Guiscard and Bohemond seized S Italy and attacked the Balkans, Venice ruled the Adriatic, and the Bulgars and Serbs reasserted their independence Alexius I (1081–1118) took advantage of the First Crusade (see under Crusades) to recover some territory in Asia Minor and to restore Byzantine prestige, but his successors of the Comnenus dynasty were able at best to postpone the disintegration of the empire After the death (1185) of Manuel I the Angelus dynasty precipitated the cataclysm of the Fourth Crusade In 1204, the crusaders and the Venetians sacked Constantinople and set up a new empire (see Constantinople, Latin Empire of) in Thrace, Macedonia, and Greece The remainder of the empire broke into independent states, notably the empires of Nicaea and of Trebizond and the despotat of Epirus The Nicaean emperor Michael VIII in 1261 conquered most of the tottering Latin empire and reestablished the Byzantine Empire under the Palaeologus family (1261–1453) The reconstructed empire was soon attacked from all sides, notably by Charles I of Naples, by Venice, by the Ottoman Turks, by the new kingdoms of Serbia and Bulgaria, and by Catalonian adventurers under Roger de Flor The Turks eventually encircled the empire and reduced it to Constantinople and its environs Manuel II and John VIII vainly asked the West for aid, and in 1453 Constantinople fell to Sultan Mohammed II after a last desperate defense under Constantine XI This is one of the dates conventionally accepted as the beginning of the modern age The collapse of the empire opened the way for the expansion of the Ottoman Empire to the gates of Vienna and also enabled Ivan III of Russia, son-in-law of Constantine XI, to claim a theoretical succession to the imperial title Among the many excellent Byzantine historians were Procopius, Emperor Constantine VII, Princess Anna Comnena, Nicetas Acominatus, John Cinnamus, George Acropolita, and Emperor John VI. The classic work on Byzantine history is Gibbon's *Decline and Fall*. More recent standard works are those of J B. Bury, Charles Diehl, and A A Vasiliev See also *Cambridge Mediaeval History*, Vols II and IV

Byzantine music was long thought to be only a further development of ancient Greek musical practice In the 20th cent, however, it has come to be regarded as an independent musical culture, with elements derived from Syrian and Hebrew as well as Greek sources Its beginnings are dated by some scholars as in the 4th cent, after the founding of the Eastern Empire by Constantine I The Greek kithara and aulos were used, but the principal instrument of Byzantium was the organ No purely instrumental music is extant, however, and the exact nature of the instrumental accompaniment of vocal music is not certain The eight *echoi* correspond roughly to the eight modes (see mode) of plain song, but were melody types, rather than scale patterns The Byzantine music which survives is all sacred, with the exception of some acclamations for the emperor Byzantine chant was monodic, in free rhythm, and often attempted to depict melodically the meaning of the words. The language was Greek The Byzantine hymn, of which there were three types, was the greatest contribution of this culture The *troparion* was inserted between the verses of the Psalms, and eventually the *troparia* overshadowed the Psalms. The *kontakion* was important in the 6th and 9th cent Its origin is ascribed to Romanus, active during the reign of Anastasius I It consists of 18 or 24 strophes all in similar meter, with a contrasting introductory strophe The subject matter is usually biblical Often an acrostic is formed from the first letter of each stanza The time of Romanus and of Sergius (fl. early 7th cent.) is called the golden age of Byzantine music. In the 8th cent. the outstanding hymn writer was St. John of Damascus, and the chief type of hymn was the *kanon*, a series of odes, theoretically nine but often only eight in number, referring to the nine canticles of the Old and New Testaments. Until the 9th cent., poet and composer were always one; later, hymns were set to already existing melodies With the codification of the Greek liturgy in the 11th cent there was a general decline in hymnody Musical activity ceased with the fall of Constantinople (1453). Russian chant, the chant of the modern Greek Orthodox Church, and to a smaller extent Gregorian chant all owe something to Byzantine chant Byzantine notation was originally only a system of *ekphonetic* symbols serving to remind a singer of a melody he already knew. Neumes derived from the ekphonetic notation were in use from c 950 until 1200 From 1110 to 1450 a staffless notation indicating the *echos*, starting note, and subsequent intervals of a melody was in use It is largely decipherable today Signs were added to it in the centuries which followed, but the modern notation used in the Greek church today was devised in the 19th cent by Chrysanthus, a Greek archimandrite, because of the confusion in deciphering the manuscripts of early Byzantine music See H J W Tillyard *Byzantine Music and Hymnography* (1923), Gustave Reese, *Music in the Middle Ages* (1940), Egon Wellesz, *A History of Byzantine Music and Hymnography* (1949).

Byzantium (bĭsăn'shēŭm, -shum, -tēum), ancient city, on the site of the present Istanbul Founded by Greeks from Megara in 658 B C , it early rose to importance because of its position on the Bosporus In the Peloponnesian War it was captured and recaptured In A D 196 it was taken by Roman Emperor Severus Constantine I in A D 330 ordered a new city built here, this was Constantinople, later the capital of the Byzantine Empire and now the city of Istanbul in Turkey

C

C, third letter of the alphabet In position and form, but not in meaning, it corresponds to Greek gamma (see G) In English it is used variously, e g , in *can, cent, church*, and *loch* In musical notation it symbolizes a note in the scale In chemistry it represents the element carbon It is the Roman numeral for 100

Ca, chemical symbol of the element calcium.

Caaba: see Kaaba

Cabal (kŭbăl'), secret group of advisers of Charles II of England Their initials form the word (which is, however, of older origin)—Clifford of Chudleigh, Ashley (Lord Shaftesbury), Buckingham (George Villiers), Arlington (Henry Bennet), and Lauderdale (John Maitland). Although they were never a working ministry, one or more of this group dominated court policy from 1667 to 1674

cabala or **cabbala** (both kă'bŭlu), esoteric system of interpretation of the Scriptures based on the assumption that every word, letter, number, and even accent in them has an occult meaning The system, oral at first, claimed great antiquity, but was really the product of the Middle Ages, arising in the 7th cent and lasting into the 18th It was popular chiefly among Jews, but spread to Christians as well In origin it was an attempt to spiritualize the religion of Judaism which had become formal, rigid, and legalistic It incorporated Neoplatonic elements, elaborately blended with Judaistic theology It taught that God is the source from which emanates the entire objective world Evil is the result of the distance of certain of the emanations from their divine source, the distance causing them to lose their divine qualities Man's soul exists from eternity and is independent of the body, its entrance into a body is a misfortune, if pure it has supremacy over evil forces and may penetrate mysteries and foretell the future If impure it must undergo metempsychosis All the writings of the Scriptures contain hidden divine mysteries, especially the names of God, which are agencies by which to do miracles Each letter of the divine name was believed to be potent, and cabalistic signs and writings were used as amulets The cabala was supposed to contain some Christian doctrines, such as that of the Trinity and the atonement, so it was taken up by Christian scholars in the 15th cent. In reality it contained pagan elements which were contradictory to the spirit of both Judaism and Christianity, and it gradually degenerated into juggling with letters and formulas, the basis of much medieval magic The system still has a few adherents among the Jews of Central Europe and in the older settlements in Palestine The two principal sources of the cabalists are the *Sefer Yezirah* (Eng tr., *Book of Creation*, 1877) and the *Zohar*. The first evolves, in a series of monologues supposedly delivered by Abraham, a system of numerical interpretation and the doctrine of emanation It was probably written in the 6th cent The *Zohar* (the "Cabalistic Bible") develops further the doctrines set forth in the *Sefer Yezirah* in the form of a mystical commentary on the Pentateuch This book was written by Moses de Leon (13th cent) but attributed by him to Simon ben Yohai, the great scholar of the 2d cent. See Bernhard Pick, *The Cabala Its Influence on Judaism and Christianity* (1913), S A Hirsch, *The Cabbalists* (1922)

Caballero, Fernán (fĕrnän' käbälyā'rō), pseud. of **Cecilia Böhl de Faber**, 1796–1877, Spanish novelist and folklorist The daughter of a German who was a Spanish scholar, Johan Nikolas Bohl von Faber, she was born in Switzerland but spent most of her adult life in Andalusia, which is the setting for her stories Her novels, very sentimental, are interesting for their regional quality The first, *La Gaviota* [the sea gull], was written in French and translated (1849) into Spanish Others are *La familia de Alvareda* (1856), *Lágrimas* (tears) (1858), and *Clemencia* (1862) Some of her Andalusian folk tales were translated as *Spanish Fairy Tales* (1920)

Cabanel, Alexandre (alĕksā'dru käbänĕl'), 1823–89, French painter, popular in his day He is represented in the Luxembourg, Corcoran, and Metropolitan museums

Cabanis, Pierre Jean Georges (pyĕr' zhă' zhôrzh' kabanēs'), 1757–1808, French physician and philosopher He was professor of hygiene, legal medicine, and medical history in Paris Active in politics as a revolutionist, he was a member of the Council of Five Hundred He wrote *Rapports du physique et du moral de l'homme* (1802). See study by François Labrousse (1903, in French)

Cabano (käbänō'), village (pop 2,031), E Que , on the shore of Lake Temiscouata near the mouth of the Cabano river and E of Rivière du Loup

Cabat, Louis (lwē' kabä'), 1812–93, French painter, one of the earliest realistic landscape painters in France Characteristic are his *Pool of Ville d'Avray* and *Autumn Evening*, both in the Louvre Cabat became director of the Académie de France à Rome in 1879.

cabbage, leafy garden vegetable of many widely dissimilar varieties, all probably descended from the wild, or sea, cabbage (*Brassica oleracea*) of the coasts of Europe. It is used for food for man and stock. Well-known varieties include the common white and red cabbage, borecole or kale, Brussels sprouts, cauliflower, broccoli, and kohlrabi. See W W. Robbins, *The Botany of Crop Plants* (1931 ed)

cabbage palm, popular name for several species of palm yielding edible central buds, which are cooked as vegetables They include the cocoo palm, the royal palm, and the Sabal palmetto palm.

cabbala: see cabala

Cabbon (kăb'ŏn), town, SW Palestine Joshua 15 40

Cabell, Branch (James Branch Cabell (kă'bul), 1879–, American novelist, b Richmond, Va A graduate of William and Mary College, in 1896–97 he was an instructor there in French and Greek After various experiences in journalism and in the coal mines of West Virginia, he began writing fiction of a highly individual kind Early novels in which he derided conventional history were *Gallantry* (1907), *Chivalry* (1909), and *The Rivet in Grandfather's Neck* (1915) He invented a country of medieval fantasy called Poictesme and there set many of his novels, the best known of which is *Jurgen* (1919), others are *The Cream of the Jest* (1917) and *The Silver Stallion* (1926) After 1930 he wrote as Branch Cabell and continued his ironic novels as late as 1940 with *Hamlet Had an Uncle* His nonfictional writing includes *Beyond Life* (1919), *Straws and Prayer-Books* (1924), *The St Johns* (with A. J Hanna, "Rivers of America" series, 1943), and *Here Let Me Lie* (1947) See Carl Van Doren, *James Branch Cabell* (rev ed , 1932)

Cabell, Joseph Carrington, 1778–1856, promoter of education in Virginia, b Nelson co , Va , grad William and Mary, 1798 A member of the house of burgesses (1808–10, 1831–35) and of the state senate (1810–29), he vigorously supported all measures to further popular education He also helped through legislation and fund raising to found the Univ. of Virginia

Cabet, Étienne (ātyĕn' kabā'), 1788–1856, French utopian socialist and reformer He was elected deputy in 1831, but his bitter attacks on the government resulted in exile (1834–39) In England he was influenced by Robert Owen, and there he developed his communism as expressed in the famous *Voyage en Icarie* (1840), this described an ideal society in which an elected government controlled all economic activity and supervised social affairs, the family remaining the only other independent unit The book was extremely popular, and Cabet gathered many disciples. A group of them attempted unsuccessfully to found an Icarian community on the Red River in Texas (1848). The next year Cabet established a temporary colony at the old Mormon town of Nauvoo, Ill , but serious dissension arose in 1856, and he was not reelected president He died soon after in St Louis Most of the Icarians moved to lands they had bought near Corning, Iowa, where branch communities survived until 1898. Works by Cabet include *Histoire populaire de la Révolution française* (4 vols , 1839–40), *Colonie icarienne aux États-Unis d'Amérique* (1856), and *Le Vrai Christianisme suivant Jésus Christ* (1846). See Albert Shaw, *Icaria, a Chapter in the History of Communism* (1884); Jules Prudhommeaux, *Icarie et son fondateur* (1907, in French).

Cabeza de Vaca, Álvar Núñez (äl'vär nōō'nyāth käbä'thä dā vä'kä), c.1490–c.1557, Spanish explorer in the American Southwest Cabeza de Vaca [cow's head] was not truly a surname but a title hereditary in his mother's family; he is frequently called simply Álvar Núñez. He came to the New World as treasurer in the expedition of Pánfilo de Narváez that left Spain in 1527 and reached Florida (probably Tampa Bay) in 1528 When that expedition was dissolved by hardship and Indian hostility, Cabeza de Vaca was one of the survivors whose barges were shipwrecked on an island on the Texas coast Later scholars have argued much over the identification of that island, but Galveston Island and Mustang Island are popular candidates Cleve Hallenbeck, who in his *Álvar Núñez Cabeza de Vaca the Journal and Route of the First European to Cross the Continent of North America, 1534–1536* (1940) gives a concise summary of various theories and arguments about the place of the final shipwreck and the route of the later journey, favors Galveston Island The story is one of the most remarkable in the annals of exploration After much suffering as slaves of the Indians, Cabeza de Vaca and three other survivors escaped and started a long journey overland His companions were Alonso del Castillo Maldonado, Andrés Dorantes, and Estevanico (an Arab or possibly a Negro) They gained great repute among the Indians as healers since remarkable cures were attributed to their Christian prayers The route that they followed westward is disputed as much as the island of the shipwreck, but after much wandering they did get to W Texas, probably into New Mexico and Arizona, and possibly (some argue) even to California before, turning south, they emerged into the full glare of history again as they told their story to Spaniards in Culiacán in Mexico They were almost certainly the first white men to see the buffalo, and their stories about the Pueblo Indians gave rise to the legend of the Seven Cities of Cíbola, later magnified by Fray Marcos de Niza, and brought explorers in search of El Dorado Cabeza de Vaca's own account, *Los naufragios* [the shipwrecked men] (1542), is the chief document of the startling adventures of his party This has been translated into English by Thomas Buckingham Smith (1851, reedited by J G Shea, 1871, republished with notes in F W Hodge, *Spanish Explorers in the Southwestern United States*, 1907) and by Fanny Bandelier (1905) After returning to Spain, Cabeza de Vaca was appointed governor of the Río de la Plata region and reached Asunción after an overland journey from the Brazilian coast in 1542 His South American career was sadly different from that in North America He got into much trouble with the popular Domingo Martínez de Irala After he returned from a journey up the Paraná river to Bolivia, he was arrested, accused of highhanded practices, imprisoned for two years, and sent back to Spain There he was found guilty but was pardoned by the king North American historians tend to exonerate him, South American historians tend to blame him Cabeza de Vaca wrote his own account of South American events in his *Comentarios* (1555) Hamel Long's *Interlinear to Cabeza de Vaca* (1936, later reprinted as *Power within Us*) is primarily a study of the cures worked by Cabeza de Vaca and his companions See the book of Hallenbeck cited above, Morris Bishop, *The Odyssey of Cabeza de Vaca* (1933)

cabildo (käbēl'dō), municipal corporation, lowest administrative unit in Spanish government In the American colonies it was the only institution in which creoles could participate Composed usually of councilors and magistrates, the *cabildo* distributed lands, imposed taxes, provided police service, and the like In discussions of major importance the *cabildo abierto* [open cabildo] was formed by including prominent citizens In theory, membership in the *cabildo* was elective, in practice, it became appointive, proprietary, and hereditary Corruption and inefficiency were common The degree of local autonomy at first granted by the crown was soon hedged in by increasing centralization of power in higher authorities Nevertheless, when the movement toward independence took root, the *cabildo* was the only self-perpetuating institution around which new forces could rally The *cabildo* could in case of emergency choose a governor, lieutenant governor, or captain general (e g , Hernán Cortés) The first *cabildo* in the Americas was that of Asunción, founded by Domingo Martínez de Irala

Cabinda (kŭbĭn'dŭ, kŭbēn'dŭ), region, 2,920 sq mi., W Africa, detached from, but part of, Angola, on the Atlantic Ocean. It lies between Belgian Congo and French Equatorial Africa There are exports of hardwoods, rubber, cacao, coffee, and palm-oil products The name formerly sometimes appeared as Kabinda

cabinet, group of advisers to the head of the state who themselves are usually the heads of the administrative government departments Its nature differs widely in various countries In Great Britain, where the cabinet system originated, it was at first a committee of the privy council and rose to its present status only after parliamentary sovereignty had been clearly established by the Revolution of 1688 and the emergence of party governments in the 18th cent Since the time of Robert Walpole the British cabinet has usually been a body of ministers drawn from the party possessing a majority in the House of Commons, responsible to the House for the conduct of the administration The cabinet is chosen by the prime minister, who is guided by the necessity of choosing a group that will represent the disparate elements in his party and who must fill certain posts with commoners rather than peers Overthrow of the cabinet follows a division of the House of Commons or a general election adverse to the administration In France and other continental countries the selection of cabinet members from the legislature is less the rule, and cabinet members may speak in either legislative house In the United States the members of the cabinet are not members of either house of Congress and are responsible, individually and not as a body, solely to the President, who appoints them with the approval of the Senate and may remove them at will The United States cabinet member may not speak in Congress, though he is often called before Congressional committees The order of seniority in the U S cabinet is according to the creation of the respective government departments, beginning with the Dept of State and followed by the Secretaries of the Treasury and War (until 1948), the Attorney General, the Postmaster General, and the Secretaries of the Navy (until 1948), the Interior, Agriculture, Commerce, Labor, and Defense (1948) In case of the death or disability of both the President and the Vice President, the succession to the presidency falls to the speaker of the House of Representatives rather than, as before 1947, to the Secretary of State See W I Jennings, *Cabinet Government* (1936)

cabinetmaking, the production of fine woodwork, differentiated from carpentry by more expert workmanship In the United States the term includes not only the making of furniture, both mobiliary and built-in, and the finer sorts of interior wall paneling and wood trim, but also the interior wood finish of boats, railway cars, and airships The harder woods such as mahogany, walnut, and oak are chiefly used Pieces are joined by gluing and by mortise-and-tenon, tongue-and-groove, mitered, and dovetailed joints, rather than by butt-joining and nailing as in carpentry Cabinetmaking includes the processes involved in marquetry, inlaying, wood carving, veneering, and finishing Since the latter part of the 19th cent , machinery has been used for practically all operations Prior to that time, however, cabinetmaking was purely a craft, with notably high traditions of workmanship It has in all periods produced fine furniture and in its best manifestations has approached the level of a fine art In the 18th cent , considered the golden age of cabinetmaking in Europe and America, master craftsmen such as Thomas Chippendale in England, J H Riesener in France, and Duncan Phyfe in America produced pieces which were triumphs of design and technique Many leading craftsmen of the period signed their pieces and some deeply influenced contemporary taste

Cabira see Sivas, Turkey

Cabiri (kubē'rī), in Greek religion, beneficent nature deities, possibly of Phrygian origin Knowledge of their legends is scant and confused They were connected with fertility rites and were particularly worshiped at Samothrace with mysteries Sometimes in late legend they are linked with Demeter, Hephaestus, or Hermes and are then like the Corybantes and Curetes They were also patrons of navigation and, again in late legend, are sometimes fused with the Dioscuri

Cable, George Washington, 1844–1925, American author, b New Orleans A Confederate soldier in the Civil War, he studied engineering and was a warehouse clerk when he first wrote for the New Orleans *Picayune* His short stories began to appear in *Scribner's Monthly* in 1873, and their collection in *Old Creole Days* (1879) established him as the recorder of the romantic atmosphere of New Orleans culture *The Grandissimes* (1880) is his best novel of Louisiana and was followed by *Madame Delphine* (1881) He lived in Northampton, Mass , after 1884, his fiction declined in vividness, and he devoted himself to social reform See biography by L L Cable Bikle (1928), M Cable Dennis, *The Tail of the Comet* (1937)

cable. Originally the word was used for a fibrous rope The term has come to be used in several ways—for a cablegram or message transmitted across the ocean by telegraph, for a line with an insulated and protected core of several strands of wire twisted together, used for the transmission of messages by telephone and telegraph, for the chain, heavy rope, or group of twisted wires used to anchor or moor a ship or for a towing, for the twisted wire rope used in engineering for many purposes, such as the support of a suspension bridge, and for the usually insulated wire conveyor of electricity for power or light from source to consumer. In 1845 France and England were first successfully connected by marine telegraphic cable The first permanent transatlantic cable was laid in 1866 by Cyrus West Field, although successful demonstrations had been made in 1858 A coaxial cable was first installed in 1935 between New York city and Philadelphia, and in 1936 the first transmission of a telephone message was made over it The coaxial cable consists of a copper tube through the center of which extends a copper wire held in place by insulating disks spaced a few inches apart A number of such conducting units are held together by a covering of insulating material By means of the coaxial cable, telegraph and telephone messages and television images can be transmitted A large number of signals can be transmitted simultaneously over each cable

Cabochiens (kabōshyĕ'), popular faction in Paris in the early 15th cent Composed largely of small tradespeople and members of the butchers' and skinners' guilds, it was named after one of the leaders, Simon Lecoustellier, called Caboche, a skinner Chafing at the ruinous and corrupt fiscal practices of the government and the extravagance of the court, they espoused the cause of John the Fearless of Burgundy in the civil war (1411–13) between Armagnacs and Burgundians In 1413 they got out of control, seized the government of Paris, and promulgated the so-called *ordonnance cabochienne*, containing radical reforms They were soon suppressed by the victorious Armagnacs

Cabool (kŭbōōl'), city (pop 1,069), S Mo , ESE of Springfield, in a farm and timber area, inc 1906 A state poultry experiment station is near by

Cabot, George (kă'but), 1752–1823, American merchant and politician, b Salem, Mass , educated at Harvard He went to sea and became captain of one of the ships owned by his brothers John and Andrew Cabot of Beverley, who in 1777 took him into their firm Cabot also helped develop the family's cotton mills in Beverley A Federalist, he was (1791–96) one of Alexander Hamilton's most trusted followers in the U S Senate Made a director of the Bank of the United States in 1793, he became president of its Boston branch in 1803 In the Federalist discontent at the beginning of the 19th cent , Cabot was a leader of the Essex Junto and presided over the Hartford Convention See biography by his grandson, Henry Cabot Lodge (1877)

Cabot, John, fl 1461–98, English explorer, probably b Genoa, Italy He became a naturalized citizen of Venice in 1476 and engaged in the Eastern trade of that city This experience, it is assumed, was the stimulus of his later explorations Like Columbus (though there is no evidence either influenced the other), he apparently believed the riches of the Far East might be more easily reached by sailing west He went to England, probably in the 1480s, and resided chiefly at Bristol, a port then promising as a base for discovery Under a patent granted by Henry VII (March 5, 1496), Cabot sailed from Bristol in 1497 and discovered the North American coast at a point usually thought to be Cape Breton Island In 1498 he again sailed for America to explore the coast The fate of the expedition is unknown, though there is presumptive evidence it reached America and some of its members returned The English claims in North America were based on his discovery His son was Sebastian Cabot See H Harrisse, *John Cabot, the Discoverer of North-America, and Sebastian, His Son* (1896), G P Winship, *Cabot Bibliography* (1900), H P Biggar, *The Precursors of Jacques Cartier* (1911), J A Williamson, *The Voyages of the Cabots* (1929)

Cabot, Richard Clarke, 1868–1939, American physician and educator, b Brookline, Mass , M D Harvard, 1892 He was associated with the Massachusetts General Hospital (1898–1921) and with Harvard, where he taught in the medical school (1899–1933) and was professor of social ethics (1920–34) His works include *Physical Diagnosis* (with F D Adams, 1901, 13th ed , 1942), *Social Service and the Art of Healing* (1909), *Differential Diagnosis* (2 vols , 1911–15), *Social Work* (1919), *Adventures on the Borderlands of Ethics* (1926), and *Christianity and Sex* (1937)

Cabot, Sebastian, b 1483–86?, d 1557?, explorer in Spanish service, son of John Cabot It is unknown whether or not he accompanied his father on the 1497 or the 1498 voyage For several centuries Sebastian was given the credit for his father's achievements, but 19th-century scholars, finding discrepancies in the Sebastian stories, branded him an impostor and usurper and applied his accounts to the 1498 voyage of John Cabot Recent research indicates that the Sebastian narratives relate to a later voyage made by him, probably in 1508–9, in search of the Northwest Passage He may have reached Hudson Bay. In 1512 he entered the Spanish service and in 1518 was appointed chief pilot After the return of Magellan's ship *Victoria*, he sailed (1526) from Sanlúcar de Barrameda with the ostensible purpose of loading spices in the Moluccas, but probably bearing secret instructions from Emperor Charles V to explore the Río de la Plata country He spent several years along the Plata and Paraná rivers, but the hostility of the Indians and the scarcity of food forced him to

leave the country He returned to Spain in 1530, distrusted and discredited He carried on his duties as chief pilot, however, until 1548, when he reentered the English service In 1553 he became governor of a joint-stock company, later known as the MUSCOVY COMPANY, which was organized to seek a Northeast Passage and open trade with India Under his instructions an expedition under Stephen Borough sailed the same year and reached the White Sea A commercial treaty was negotiated with Russia This, breaking the Hanseatic League's monopoly, was a substantial achievement See H. Harrisse, *John Cabot, the Discoverer of North-America, and Sebastian, His Son* (1896), G P Winship, *Cabot Bibliography* (1900), J T Medina, *El veneciano Sebastián Caboto* (1908); J. A. Williamson, *The Voyages of the Cabots* (1929)

Cabral, Pedro Alvares (pā'drō äl'vŭrĭsh kubrahl'), c 1460–1526?, Portuguese navigator A friend of Vasco da Gama, he was sent out by Manuel I as head of a fleet destined for India in 1500 Bartholomew Dias was one of his officers Cabral went far west of his course and reached the coast of Brazil, which he claimed for Portugal Proceeding onward, he reached Madagascar and Mozambique At Calicut, he got into great trouble over establishing a post for trade and for converting the Mohammedans and ended by arousing all the natives against him He bombarded the city and had to leave to get his East Indian cargo elsewhere The ships came back to Portugal with rich cargoes, but his methods of diplomacy were severely criticized The old story was that Cabral discovered Brazil because he had been driven off his course to avoid storms This has been much questioned in recent days, and it has been urged that even before the Spanish Vicente Yáñez Pinzon saw the Brazilian coast Portuguese navigators had been there and that Portugal, wishing to obtain the land, had managed to secure a revision of the pope's original demarcation of the world into Spanish and Portuguese zones of exploration Certainly the Treaty of Tordesillas (1594) did adjust the former line and put Brazil in the Portuguese zone, but the truth of the matter is still being argued

Cabrera, Manuel Estrada see ESTRADA CABRERA

Cabrera, Ramón (rämōn' kubrā'ra), 1810?–77, Spanish Carlist general, count of Morella He was noted for valor and for his extreme cruelty in the war against the royalists Refusing to accept the Carlist defeat in 1839, he continued the war in Valencia and Catalonia until driven into France in 1840 After a brief reappearance as Carlist leader in Catalonia in 1847, he returned to France and then went to England. In 1875 he recognized Alfonso XII as king

Cabrillo, Juan Rodríguez (hwan rōdhrē'gāth kabrē'lyō), Port *João Rodrigues Cabrilho*, d 1543, Spanish conquistador and discoverer of California, b Portugal In 1520 he landed in Mexico with Pánfilo de Narváez and joined in the conquests of Mexico and Guatemala Accompanying Pedro de ALVARADO up the west coast of Mexico, he assumed command of the expedition and continued the voyage after Alvarado's death He discovered San Diego Bay (Sept 28, 1542), landing at Point Loma Head, now in Cabrillo National Monument He then sailed on to Northwest Cape beyond San Francisco Bay, which he did not find Returning to winter on San Miguel Island off the Santa Barbara coast, he died Jan 3,1543, probably from an infection contracted after breaking an arm three weeks earlier

Cabrillo National Monument see NATIONAL PARKS AND MONUMENTS (table)

Cabrini, Saint Frances Xavier (zä'vyur kubrē'nē), 1850–1917, American nun, founder of the Missionary Sisters of the Sacred Heart of Jesus, b near Lodi, Italy In Italy she founded her order, an association for charitable and religious work among the very poor She came to America in 1889 and lived mainly in New York and Chicago, directing the establishment of hospitals, orphanages, nurseries, and schools in the United States and in Latin America. Her sanctity, highly regarded in her lifetime, became famous after her death She was beatified by Pope Pius XI in 1938 and canonized in 1946 by Pius XII. Mother Cabrini was the first U S. citizen to be canonized Her principal shrine is the Mother Cabrini High School, New York city, where she is buried Feast Dec 22

Cabul (kä'bŭl), town, NW Palestine, SE of Acre Joshua 19 27, 1 Kings 9 13.

ca' canny: see SABOTAGE

cacao (kukä'ō), tropical tree (*Theobroma cacao*), moderate in size, with large undivided leaves and pinkish-yellow flowers It bears directly from the axes of old leaf scars on trunk and larger branches a cucumber-shaped fruit or pod with a thick, ridged rind This pod encloses five rows of almond-shaped seeds or "beans" embedded in a light-colored sweetish pulp These are the cocoa beans of commerce The tree is native to the tropical parts of America, where it is extensively cultivated, cocoa beans were articles of commerce among pre-Columbian Indians It has been introduced into some parts of Asia and Africa When under cultivation, the trees are kept at a height of 15 to 20 ft They begin to bear in 4 or 5 years, attain full vigor in 12 years, and yield two crops a year. Two pounds of cocoa per tree per annum is estimated to be an average crop Methods of preparing the cacao fruit for market vary somewhat in different localities, but the essential stages are alike. The pods are cut from the trees with knives mounted on bamboo poles, cut open, and the seeds removed. The seeds are fermented to eliminate their bitter, astringent quality They are then carefully dried on a brick or cement floor or, in the more primitive factories, on coconut fiber or wooden platforms The seeds are screened, roasted, and skinned, and the clean kernels are known as cocoa nibs The shells may be infused like tea for a beverage and are sold for that purpose and to flavor cattle food The nibs are manufactured into various products As they are over 50 percent fat, much of this may be removed by pressure and sold as cocoa butter, a pale yellow solid fat, in demand for fine soap and cosmetics and in medicine for emollients and suppositories The residue of the nib, ground and boxed, is known as cocoa and is made, with milk or water, into a beverage CHOCOLATE is a product in bar form with the cocoa butter retained Cacao is exported mainly from British West Africa, South and Central America, and the West Indies, and the greatest markets are at New York, Hamburg, London, and Liverpool Cacao products have a high food value because of the large proportion of fat, carbohydrates, and protein

Caccini, Giulio (jōō'lyō kat-chē'nē), c 1558–c 1618, Italian composer and singer He and PERI were the composers of *Dafne* (c 1597), the first actual opera on record He also composed a setting of Ottavio Rinuccini's *Euridice* (1600), the earliest opera of which the music is extant *Nuove musiche* (1601), a collection of his madrigals and arias, contains the earliest extant examples of monodic style

Cáceres, Andrés Avelino (ändrās' ävālē'nō ka'sārās), 1836?–1923, president of Peru (1886–90, 1894) He was a commander in the war with Chile (see PACIFIC, WAR OF THE) and continued to wage guerrilla warfare long after Peru had been conquered Bitterly opposed to the peace made by the government of Manuel IGLESIAS, Cáceres attempted to seize control in 1884, but failed Gathering more troops, he entered Lima in 1885 and forced Iglesias to hold an election Cáceres was chosen president His administration was a time of ruin and reconstruction In 1894 his party forced congress to elect him president, but Nicolás de PIÉROLA soon overthrew the new government Cáceres later held important diplomatic posts

Cáceres (kä'thārās), city (27,463), capital of Cáceres prov, W Spain, in Estremadura It manufactures cork and leather goods The medieval town, atop a hill, has walls, gates, and towers of Roman and Arabic origin, a Gothic church, and several 16th-century palaces The new town lies below Limestone is mined in the vicinity and is shipped from Cáceres

Cache (kăsh), river, 213 mi long, rising in the hills of SE Missouri and flowing SE into E central Arkansas, where it joins the White River at Clarendon

Cache Bay, town (pop 1,004), S Ont, on Lake Nipissing and W of North Bay It is a lumbering and fishing center

Cachin, Marcel (marsĕl' kăshē'), 1869–, French Communist leader Long the leader of the Communist party in the chamber of deputies and editor of the Communist daily *Humanité*, he was elected a senator in 1935 and after 1944 resumed active politics His opposition to French participation in the Second World War created a stir

cactus, any plant of the family Cactaceae, a large group of succulents found almost entirely in the New World A cactus plant is conspicuous for its fleshy green stem, which performs the functions of leaves (commonly insignificant or absent), and for the spines (not always present) of various colors, shapes, and arrangements Cactus flowers are notably delicate in appearance though usually large and showy, they are commonly yellow, white, or shades of red Fruits of cacti, often colorful, are frequently edible, as are the stems (see PRICKLY PEAR) Cacti are sometimes used as a substitute for wood, as stock feed, and for hedges The plants vary from small round globes to epiphytes, vines, and large treelike forms The reduced leaf surface and the enlarged fleshy stem, which is well fitted to store water and to retain it, make the plant peculiarly adapted to regions of high temperature and long dry periods. Cacti are not restricted to desert regions, however, for in America they range from the tropics into Canada. A cactus plant appears on the coat of arms of Mexico, and the giant cactus or saguaro blossom is the state flower of Arizona In horticulture cacti are propagated by seeds, cuttings, and grafts Grafting is used also for producing novelty forms Some of the better-known cacti include the prickly pear, NIGHT-BLOOMING CEREUS, Christmas cactus (a popular house plant), cholla (used in making souvenirs), PEYOTE, and nopal (formerly cultivated as a host for the cochineal) The Cactus and Succulent Society of America promotes the cultivation of the plants See E B. Higgins, *Our Native Cacti* (1931), S. E Haselton, *Cacti for the Amateur* (1938).

Cadalso Vázquez, José de (hōsā' dā kädhäl'sō väth'käth), 1741–82, Spanish poet, critic, and satirist At the death of his beloved, the actress María Ignacia Ibáñez, his despair drove him to try to disinter her body. He is considered a precursor of the Spanish romantic movement for his book of poems, *Noches lugubres* (1798), adapted from Edward Young's *Night Thoughts* He is best known, however, for his prose works, *Los eruditos a la violeta* (1772), a satire on pedantry, and *Cartas marruecas* [Moroccan letters] (1793), an analysis of Spanish psychology He died in the battle of Gibraltar

Cadamosto or **Cada Mosto, Luigi da** (lwē'jē dä kadamō'stō), 1432?–1480?, Venetian navigator in the service of Prince Henry the Navigator of Portugal He seems to have entered Portuguese service in 1454, and he left a record of a voyage in 1455 which is valuable for the information it gives concerning Portuguese activity in the Canary Islands He and the Genoese, Antonio de Noli, also in Prince Henry's service, went down the African coast to the Gambia river In 1456 or 1457 Cadamosto reached the Cape Verde Islands, but the question of discovery of the islands is not settled They may have been sighted by the Portuguese years before, they may have been discovered just a year before, they may have been first visited by Cadamosto His name also appears as Alvise da Cadamosto

Cadbury, Dame Elizabeth Mary (Taylor), 1858–1935, English social worker and philanthropist, studied in France and Germany, wife of George Cadbury Becoming interested in social service, especially education, housing, and peace, she was active in many organizations working for improvement in these fields She served on the Birmingham Education Committee after 1911, was a member of the International Council of Women, a president of the National Union of Women Workers, city councilor of Birmingham (1919–24), president (1925) of the National Council of Evangelical Free Churches, and a justice of the peace (1926) In 1918 she was awarded the Order of the British Empire and in 1934 was made Dame Commander of the Order in recognition of her services as a social worker

Cadbury, George, 1839–1922, English manufacturer and social reformer In 1861 Cadbury and his brother Richard assumed control of their father's Birmingham cocoa factory Interested in housing problems, Cadbury moved the plant in 1879 to Bournville, where he laid out a garden village The successful venture influenced European model housing and town-planning projects Agitation for national old-age pensions and insurance was financed by Cadbury, who also attempted to rid industry of sweated labor See biography by A G Gardiner (1923)

Caddo (kă'dō), North American Indian tribe, one of a number speaking Caddoan languages The tribe gave its name not only to the linguistic stock but also to the Caddo confederacy, a loose federation of tribes occupying lands from the Red River valley in Louisiana to the Brazos valley in Texas and N into Arkansas and Kansas The Wichita, the Caddo themselves, and the Waco were the best-known members Some of the others were the Anadarko, the Nacogdoches, and the Nachitoches The culture of the various tribes was similar They were generally sedentary, living in villages of conical huts, though they were also raisers of horses They practiced tatooing and nose piercing and had distinctive feather mantles for ritual They were bound together by religious rather than political ties

Caddoan (kă'dōun), linguistic family of North American Indians (see LANGUAGE, table) It included the Arikara in the north, the Pawnee in Kansas and Nebraska, and the Wichita, the Caddo, and many others in the south It has been suggested that the family is related to the Iroquoian See also HOKAN

Cade, Jack, d 1450, English rebel Of his life very little is known. He may have been of Irish birth, he himself claimed the name of John Mortimer and cousinship to Richard, duke of York In 1450 he appeared as the leader of a well-organized uprising in the south of England, principally in Kent, known usually as Jack Cade's Rebellion The protests were mainly political, not social, although the Statute of Laborers was among the grievances Others were the loss of royal lands in France, the extravagance of the court, the corruption of favorites, and the breakdown of the administration of justice The rebels defeated the royal army at Sevenoaks, entered London, executed the ex-minister accused of responsibility for the losses in France, and sacked several houses The government then offered pardon to Cade's men and so dispersed them Cade himself was captured and executed See George Kriehn, *The English Uprising in 1450* (1892)

cadence, in music, the close of a phrase, section, or composition. In the 14th and 15th cent a cadence consisted of a melodic formula, of which there were several types. With the development of harmony, the cadence became a chord formula. Final ca-

dences, those ending with the tonic chord, are called authentic if the dominant chord precedes the tonic Cadences which give a feeling of suspension rather than finality are called deceptive if the dominant leads to some chord other than the expected tonic, the semicadence is the progression of the tonic chord to the dominant See Alfredo Casella, *The Evolution of Music throughout the History of the Perfect Cadence* (1924)

Cader Idris (kă'dûr ĭ'drĭs) [chair of Idris], mountain ridge, 2,927 ft high and c 7 mi long, Merionethshire, Wales, near Dolgelley

cadi; see KADI

Cadillac, Antoine de la Mothe (kă'dĭlăk, Fr ătwän' dû lă môt' kădêyăk'), c 1658–1730, French colonial governor in North America, founder of DETROIT Of the minor Gascon nobility, he came to America in 1683 to seek his fortune and lived for a time at Port Royal (now Annapolis Royal, N S) and then on a grant of land in present Maine He became a favorite of the governor of New France, Frontenac, and in 1694 he was placed in charge of the frontier post at MACKINAC In 1699 Cadillac went to France to push plans for a post on the Detroit river, which he felt would offer a better strategic position against the English than Mackinac Receiving a grant of land, trade privileges, and command of the new post, he set out with a band of colonists Detroit was founded in 1701 Cadillac attracted many of the Western Indian tribes to settle near the new colony In 1711 he was appointed to the governorship of the vast territory of Louisiana He reached his new post in 1713 to begin an administration that was remarkable only for the frequency and fierceness of internal quarrels He was recalled in 1716 and spent his last years in Gascony See biography by Agnes C Laut (1931)

Cadillac (kă'dĭlăk), resort city (pop 9,855), co seat of Wexford co., N Mich , SE of Traverse City and on Lake Cadillac, in a farm area, settled c 1871, inc as a village 1875, as a city 1877 A trading post was established here by Antoine de la Mothe Cadillac Varied products of the city include rubber goods and heating equipment Cadillac is headquarters of the Manistee and Huron national forests There are Indian mounds near by To the west is a winter sports area

Cádiz (kă'dĭz, kudĭz', Span kä'dēth), city (pop 87,630), capital of Cádiz prov , SW Spain, in Andalusia, on the Bay of Cádiz Picturesquely situated on a promontory (joined to the Isla de Leon, just off the mainland), it is a fortress, a naval base, and the main Atlantic port of S Spain, exporting wine, olive oil, fruit, fish, and minerals The Phoenicians founded (c 1100 B C) here the port of Gadir which became a market for the tin of the Cassiterides and the silver of Tarshish It was taken (c 500 B C) by the Carthaginians and passed late in the 3d cent B C to the Romans, who called it Gades It flourished until the fall of Rome, but suffered from the barbarian invasions and declined further under the Moors After its conquest (1262) by Alfonso X of Castile, its fortifications were rebuilt The discovery of America revived its prosperity In 1587 Sir Francis Drake burnt a Spanish fleet in its harbor, and in 1596 Essex attacked and partly destroyed the city Cádiz prospered again after 1718 when its port was opened to traffic with the New World, but the loss of the American colonies ruined it once more, and it never recovered its former importance During the siege by the French—which Cádiz resisted for two years (1810–12) until relieved by Wellington—the Cortes assembled here and issued the famous liberal constitution for Spain (March, 1812) The city has few old buildings The 13th-century cathedral, originally Gothic, was rebuilt in Renaissance style The new cathedral dates from 1722 There are several museums, the church of the former Capuchin convent contains the *Marriage of St Catherine* by Murillo, who was at work on this painting when he fell from a scaffold to his death

Cadiz 1 (kă'dĭz) City (pop 1,228), co seat of Trigg co , S Ky , W of Hopkinsville near the Cumberland river It is a trade and shipping center for a tobacco, grain, livestock, and timber area Near by are the Brelsford Caves and a national wildlife refuge 2 (kăd'ĭz, kă'dĭz) Village (pop 2,808), co , seat of Harrison co , E Ohio, SW of Steubenville, laid out 1803–4, inc 1818 It is the trading and marketing center of a farm area

Cadman, Charles Wakefield, 1881–1946, American composer, b Johnstown, Pa Although he is known to the public principally for two songs—*From the Land of the Sky-blue Water*, based on an Indian theme, and *At Dawning* (1906)—he has composed much in larger forms Outstanding are his Indian operas *Shanewis* (New York, 1918) and *The Sunset Trail* (Denver, 1925) and his most successful opera, *A Witch of Salem* (Chicago, 1926), orchestral music, including *Hollywood Suite* (1932) and *Dark Dancers of the Mardi Gras* (1937), and piano music He gave many lecture-recitals on Indian culture

Cadman, Samuel Parkes (pärks), 1864–1936, American Congregational minister, b England From 1901 he was pastor of the Central Congregational Church, Brooklyn, N Y. In 1928 he was chosen as the official radio minister of the Federal Council of Churches of Christ in America. The broadcasting of his sermons and addresses made him nationally known He wrote a number of books on religious subjects

cadmium (kăd'mĭum) [from *cadmia*, a Latin name for *calamine*, with which cadmium is found associated], metallic element (symbol=Cd, for physical constants, see ELEMENT, table) White, lustrous, very malleable, and ductile, in physical properties it is somewhat like tin but is harder, in chemical properties it resembles zinc When ignited, it burns in the air, forming the oxide. It is grouped with magnesium, calcium, zinc, barium, mercury, and radium in the periodic system It forms a brownish oxide, a hydroxide, a carbonate, a chloride, and a sulphide, the last is used as a pigment (cadmium yellow) The element itself is employed in making certain alloys of low melting point, as Wood's metal Cadmium does not occur free in nature, but in compounds, such as greenockite (a rare sulphide of cadmium), and in zinc ores in the form of a carbonate or a sulphide It is obtained as a by-product in the extraction of zinc from its ores The cadmium is distilled off first, since it is more volatile The element was discovered in 1817, Friedrich Stromeyer was the principal pioneer student of cadmium

Cadmus, in Greek legend, son of Agenor and founder of Thebes, honored also as the inventor of the alphabet Misfortune followed his family because he killed a dragon sacred to ARES Cadmus sowed the dragon's teeth, and from these sprang the warring men who were the ancestors of the Thebans He was the father by HARMONIA of Polydorus, SEMELE, Agave, INO, and AUTONOË

Cadogan, William Cadogan, 1st **Earl** (kudû'gun), 1675 1726, British general and diplomat, remembered chiefly as the faithful friend and brilliant subordinate of the duke of MARLBOROUGH The able commander of the dragoons called Cadogan's Horse, he took distinguished part in the many victories of Marlborough in the War of the SPANISH SUCCESSION His early political career was also hinged to that of Marlborough, and he fell when the duke fell in 1711 In exile in the Netherlands he conducted dealings with Hanover for the English Whigs, and after George I ascended (1714) the British throne, he won new commands and honors He helped to suppress the JACOBITES in 1715, was created earl in 1718, and was made commander in chief of the army after Marlborough's death in 1722 He also had high diplomatic duties in the resettlements among Great Britain, France, the Netherlands, the Holy Roman Empire, and Spain in the years 1714–20

Cadorna, Luigi (lwē'jē kadôr'na), 1850 1928, Italian field marshal His father, Raffaele Cadorna, was a general in the wars of the Risorgimento and took Rome in 1870 Luigi Cadorna, a count, had a brilliant career and became the head of the army general staff He reorganized the Italian army before the First World War, during which he was in fact commander of military operations, King Victor Emmanuel III being nominally commander in chief Cadorna took Gorizia in 1916, but after the rout at Caporetto he was replaced (1917) by Armando Diaz He wrote two military works on the First World War and a biography of his father

Cadoudal, Georges (zhôrzh' kadôdal'), 1771–1804, French royalist conspirator A commander of the CHOUANS, he was perhaps the most capable leader of the counterrevolutionists in the VENDÉE He fled to England in 1801 but returned in 1803 in a plot, financed by England, to drive Napoleon Bonaparte from power and restore the French monarchy General PICHEGRU participated in the plot, and Gen Jean Victor MOREAU at least knew of it Insurrections were planned in Paris and in the provinces, but the conspiracy was uncovered in time by FOUCHÉ Cadoudal was executed, and the duc d'ENGHIEN, unjustifiably linked with the plot, was kidnaped and summarily shot The conspiracy was exaggerated in report and was used as a pretext for making the Consulate into Napoleon's empire

caduceus (kudû'sēûs), wing-topped staff, with two snakes winding about it, carried by HERMES, given to him (according to one legend) by Apollo The symbol of two intertwined snakes appeared early in Babylonia and is related to other serpent symbols of fertility, of sun-gods, of wisdom, and of healing This staff of Hermes was carried by Greek heralds and ambassadors and became a Roman symbol for truce, neutrality, and noncombatant status By regulation, it has since 1902 been the insignia of all personnel of the medical branch of the U S army The caduceus is much used as a symbol of commerce, postal service, and ambassadorial positions and has since the 16th cent replaced the one-snake symbol of Asclepius as a symbol of medicine

Cadwaladr or **Cadwallader** (both kădwä'lûdur), semilegendary British king, leader against the Anglo-Saxons in the 7th cent Later bards made him a national hero, and Welsh tradition deems him the last king of the Cymry to wear the crown of Britain.

Cædmon (kăd'mŏn), fl 670, first English Christian poet and first English poet whose name is known He was a herdsman and became a lay brother in the abbey of Whitby Bede in his *Ecclesiastical History* tells how Cædmon composed his first work, a brief hymn, by divine inspiration, he gives a Latin version of this poem and describes others composed by Cædmon Nothing further is known of the poet In 1655 Francis us Junius, a Dutch scholar, published the text of Old English poems which agreed with Bede's description and which Junius believed to be by Cædmon These are the poems "Genesis," "Exodus," "Daniel," and "Christ and Satan" Linguistic evidence proves that they are not of Cædmon's region and that they are of later date, but they are believed to have some connection with his work, at least to have been in part inspired by it See translation of the Cædmon poems by C W Kennedy (1916), *The Junius Manuscript* (ed by G P Krapp, 1931), E V K Dobbie, *Cædmon's Hymn and Bede's Death Song* (1937)

Caelian Hill: see *Rome before Augustus* under ROME

Caelius (Marcus Caelius Rufus) (sē'lĭus), 82 B C – 48 B C , Roman politician He was an intimate friend of CICERO, in whose collected correspondence many of Caelius' letters are preserved In 56 B C Caelius' mistress, Clodia, sister of CLODIUS, accused him of attempting to murder her He was acquitted by Cicero's defense in one of the better-known orations, *Pro Caelio* In the civil war Caelius sided with Julius CAESAR, who made him peregrine praetor in 48 B C Later that year, dissatisfied with Caesar's moderate measures to clear debts, MILO and Caelius made a suicidal attempt at revolt in S Italy Caelius was apparently a close friend of CATULLUS, who was an earlier lover of Clodia

Caen (kā), town (pop 47,835), capital of Calvados dept , N France, in Normandy, on the Orne It is the commercial center of the rich CALVADOS region and has a large textile industry (especially lacemaking) Its importance dates from the time when William I of England (William the Conqueror) made it a favorite residence The town, an architectural gem, was largely destroyed in the fighting which raged around it (June–July, 1944) during the NORMANDY CAMPAIGN of the Second World War The Abbaye aux Hommes [men's abbey], burial place of William the Conqueror, who founded it, was preserved, so were the Abbaye aux Dames [women's abbey], founded by Queen Matilda, and the church of St Nicholas All three are outstanding examples of 11th-century NORMAN ARCHITECTURE The 14th-century Church of St Peter's lost its famous spire (255 ft high) The castle of William the Conqueror, the university (founded 1432), and the town hall (17th cent) were destroyed beyond repair

Caere (sē'rē), ancient city of Etruria, c 30 mi N of Rome There seems to have been a city there before the Etruscans made it and its connecting port Agylla a center of very prosperous trade The cemeteries have been excavated, and the monumental tumuli have revealed much about Etruscan civilization and yielded vases, pottery, and other art objects The modern town here is called Cerveteri

Caerleon (kärlē'un), urban district (1931 pop 2,327, 1943 estimated pop 3,449), Monmouthshire, England, on the Usk river and NE of Newport At Caerleon are extensive remains of the Roman fortress Isca, including an amphitheater, soldiers' quarters, walls, and baths Numerous articles have been collected in a museum The village is also famed for its connection with the ARTHURIAN LEGEND, it is often identified with CAMELOT

Caermarthen or **Carmarthen** (both kurmär'dhun) municipal borough (1931 pop 10,310, 1943 estimated pop 10,950), co seat of Caermarthenshire, Wales, on the right bank of the Towy near its mouth on Caermarthen Bay, one of the largest of the Bristol Channel bays It is the site of the Roman town Maridunum The old castle was the headquarters of Welsh chieftains and was because of its key position the object of several sieges The parish church of St Peter is noteworthy Caermarthen is a cattle market and dairy center, with flour mills and farm-machinery works

Caermarthenshire or **Carmarthenshire**, maritime county (920 sq mi , 1931 pop 179,100, 1948 estimated pop 170,200), S Wales The county town is Caermarthen, site of the Roman town and road center of Maridunum Largest of the Welsh counties, it is mostly hilly, with lower land along the coast (Caermarthen Bay, off the Bristol Channel) and in the fertile valley of the Towy The county is generally devoted to agriculture and grazing, but the industrial S Wales coal fields extend into the southeast corner of the county around Llanelly Coal, iron, copper, and lead are mined Metals and textiles are manufactured The shire was given its modern boundaries in 1536 See J. E Lloyd, *History of Caermarthenshire* (1935)

Caernarvon or **Carnarvon** (both kurnär'vun, kär–), municipal borough (pop 8,469), county town of Caernarvonshire, Wales It is a seaport on Menai Strait with slate exports It has woolen mills and manufactures chemicals and farm machinery The castle, begun by Edward I c 1284, is a fine example

of a medieval fortress The prince of Wales is invested here The site of the Roman Segontium is near by

Caernarvonshire or **Carnarvonshire**, maritime county (569 sq. mi., 1931 pop. 120,829, 1948 estimated pop. 124,607), NW Wales The county town is Caernarvon The region is largely mountainous except for the Lleyn peninsula which forms the northern boundary of Cardigan Bay Snowdon (3,560 ft.) is the highest mountain in England and Wales. The Conway, chief river of the county, flows along Caernarvonshire's eastern boundary, separating it from Denbighshire Agriculture (sheep farming), quarrying (granite and the fine Penrhyn slate), and mining (lead, zinc, and manganese) are the chief industries Historical remains include evidences of considerable Roman occupation. The county has been important from medieval times as a route to Ireland It was organized as a shire by Edward I of England

Caerphilly (kärfĭ'lē), urban district (1931 pop. 35,768, 1947 estimated pop 32,580), Glamorganshire, Wales In a coal area, it is also a market center and is noted for its cheese Its 13th-century castle is the largest in Wales

Caer Went see WINCHESTER, Hampshire, England

Caerwent (karwĕnt'), town, Monmouthshire, England It is the site of the Roman city Venta Silurum, of which there remain walls, gates, hypocausts, and parts of an amphitheater and temple

Caesalpinus, Andreas (ăn'drēəs sēsălpī'nus), Latinized from **Andrea Cesalpino** (andrā'ä chāzälpē'nō), 1519–1603, Italian botanist and physiologist He was physician to Pope Clement VIII He described, in part and as a theory only, the circulation of the blood His chief work, *De plantis* (1583), contains the first classification of plants according to their fruits, based on a comparative study of his large collection Linnaeus considered him the first true systematist

Caesar (sē'zur), ancient Roman patrician family of the Julian gens There are separate articles on its two most distinguished members, Julius Caesar and Augustus Another distinguished member of the family was **Lucius Julius Caesar** (lo͞o'shəs), d 87 B C, consul (90 B C) He proposed a law extending Roman citizenship to Roman allies which had not joined in the Social War against Rome (90 B C) He was killed in the beginning of the civil war by partisans of MARIUS His brother **Caius Julius Caesar Strabo Vopiscus** (strā'bō vŏpĭ'skŭs), d 87 B C, is mentioned as an orator in Cicero's *De oratore* He fell with his brother The son of L Julius Caesar was **Lucius Julius Caesar,** d after 43 B C, one of Julius Caesar's legates in Gaul (52 B C) He accompanied the dictator into Italy in the civil war After the assassination of Julius Caesar he was allied with Marc ANTONY, whose mother, Julia, was his sister In 43 B C he and Antony fell out, and only the pleas of Julia to her son saved her brother in the proscription When Octavius (AUGUSTUS) was adopted into the Julian gens (44 B C), he took the name Caesar, and his successors as emperors took the name Caesar until HADRIAN, who kept the title Augustus for the emperor and allowed the heir apparent to be called Caesar Thus became the custom afterwards The imperial use of the name Caesar was perpetuated in the German *Kaiser* and the Russian *tsar*

Caesar, Julius (Caius Julius Caesar), 102? B C – 44 B C, Roman statesman and general He is one of the most controversial characters of history His admirers from his own day to the present have seen in him the defender of his own rights and the rights of the people against an oligarchy determined to keep power His detractors have seen him as an ambitious demagogue, bribing, smiling, and forcing his way to dictatorial powers and becoming the destroyer of the republic. That he was gifted there can be little doubt. He was extraordinarily versatile He excelled in war, in politics, in statesmanship, in letters, in oratory, and in social grace. He was born of the Julian gens, one of the oldest families in Rome, but Caesar was always a member of the democratic or popular party, probably as a result of the example and patronage of the husband of his father's sister, Caius MARIUS. He made the most of this relationship, strengthening its political implications when he married the wealthy Cornelia, daughter of Lucius Cornelius CINNA, Marius' colleague (83 B C) He had already come into the public eye through his appointment by Marius as *flamen Dialis* [priest of Jove] in 87 B C In 82 B.C., Lucius Cornelius SULLA, in power again, ordered Caesar to divorce Cornelia. When he refused, he was proscribed, his property was confiscated, Cornelia's dowry was taken, and he was shorn of his priesthood. He fled Rome The vestal virgins obtained his pardon, but Caesar, knowing that Rome was not safe, went to serve in the army in Asia (81 B C.). On Sulla's death Caesar returned to Rome and began his political career (78 B C) One of his first acts was to prosecute Cn Cornelius Dolabella, a senatorial governor, for extortion in Macedonia The cause was unsuccessful, but it gained Caesar popularity with his party and great repute for oratory Soon after this (76 B.C) he went to Rhodes to study oratory. In 74 B C. he went into Asia to repulse a Cappadocian army His part now was that of the rising young statesman, agitating for the reform of the government on popular lines and helping Pompey, who had become virtual head of the popular party Caesar was made military tribune before 70 B C In 67 B C or 68 B.C., when he was quaestor, Caesar lost his aunt and his wife At the funerals his orations were panegyrics of Marius, the Julian gens, and Cinna In 64 B C or 65 B C, when he was curule aedile, Caesar had the trophies and statue of Marius set up secretly one night in the Capitol. These two incidents made him the darling of the people and earned him the hatred of the senate Meanwhile Caesar had been, as quaestor, in Farther Spain and had made himself even more helpful to Pompey, by aiding him to get the supreme command for the war in the East He continued to support the enactment of popular measures and to prosecute senatorial extortionists, and in Pompey's absence he was becoming recognized head of the popular party In 63 B C he was elected pontifex maximus, allegedly by heavy bribes He then undertook the reform of the CALENDAR with the help of Sosigenes, the result was one of his greatest contributions to history, the Julian calendar. In Dec., 63 B C, Caesar advocated mercy for CATILINE and the conspirators and thus increased the enmity of the senatorial party and its leaders, CATO THE YOUNGER and Q Lutatius Catulus (see CATULUS, family) In 62 B C, Clodius (P Clodius Pulcher) and Caesar's second wife, Pompeia, were involved in a scandal concerning the violation of the secret rites of Bona Dea, and Caesar obtained a divorce, saying, "Caesar's wife must be above suspicion" In 59 B C he married the admirable CALPURNIA He was praetor in that year The next year in Farther Spain he was successful in putting down guerrilla warfare and banditry He returned to Rome in 60 B C, ambitious for the consulate Against senatorial opposition he achieved a brilliant stroke—he organized the First Triumvirate, made up of POMPEY, commander in chief of the army, M Licinius Crassus, richest man in Rome, and Caesar himself Pompey and Crassus were jealous of each other, but Caesar by force of personality kept the arrangement going As consul in 59 B C he secured passage of an agrarian law providing Campanian lands for 20,000 poor citizens and veterans, in spite of the opposition of his senatorial colleague, M Calpurnius BIBULUS Caesar also helped the capitalistic equites to get a reduction in their tax contracts in Asia This made him the guiding power in a coalition between people and plutocrats, headed by Pompey and Crassus He got himself assigned the rule of Cisalpine and Transalpine Gaul and Illyricum with four legions for five years (58 B C–54 B C) The divergence of Pompey and Crassus grew, and Caesar again (56 B C) moved to patch matters up, arriving at an agreement that the two should be consuls in 55 B C and that their proconsular provinces should be Spain and Syria respectively From the arrangement he drew an extension of his command in Gaul to 49 B C In the years 58 B C – 49 B C, he firmly established his reputation in the GALLIC WARS He started by compelling the Helvetii to abandon the plans of their leader, Orgetorix, defeating them soundly at Bibracte Then at the summons of the Aedui he drove Ariovistus out of Gaul He investigated Britain in 55 B C and invaded the island the next year, defeating Cassivellaunus and establishing Roman power in Britain He then put down the revolt of Vercingetorix and had all Gaul reduced to Roman control These campaigns proved him one of the greatest commanders of all time; in them he revealed his consummate military genius, characterized by a quick, sure judgment and an indomitable energy. His campaigns also developed the most significant element in his later career, the personal devotion of the legions to Caesar His charm and ready sympathy, his personal interest in the men (he knew them all by name), his willingness to undergo every hardship, his bravery in battle, all made him the idol of the army In 54 B C, occurred the death of Caesar's daughter Julia, Pompey's wife since 59 B C., she had been the principal personal tie between them. As the years had passed with Caesar in Gaul, Pompey had been gradually tending more and more toward the senatorial party The tribunate of CLODIUS (58 B C,) had aggravated conditions in Rome; Pompey's real sympathies were never with the popular party, and Caesar's military successes could hardly fail to arouse Pompey's jealousy. Crassus' death in Parthia set Pompey and Caesar face to face (53 B.C.). The senate began to take interest in Pompey, and in 52 B C he was made sole consul. Caesar's term was to expire at the end of 49 B.C. He had become a military hero as well as champion of the people. The senate feared him—with some reason—and wished him to give up his army, knowing that he hoped to be consul In Dec., 50 B C., Caesar, who was in quarters in Ravenna (the town nearest Rome in the province), wrote the senate that he would give up his army if Pompey, also a proconsular governor, would give up his The senate heard the letter with fury and at the instance of Q. Caecilius Metellus Pius Scipio (see SCIPIO, family) demanded that Caesar disband his army at once or be declared an enemy of the people— an illegal bill, for Caesar was entitled to keep his army until his term was up Two tribunes faithful to Caesar, Marc ANTONY and CASSIUS (Q Cassius Longinus), vetoed the bill and were expelled quickly from the senate They fled to Caesar, who assembled his army and asked for the support of the soldiers against the senate The army called for action, and on Jan. 19, 49 B C., Caesar crossed the Rubicon, the stream bounding his province, to enter Italy. Civil war had begun. His march to Rome was a triumphal progress The senate fled to Capua Caesar stopped to besiege, capture, and pardon some members of the senatorial party and proceeded to Brundisium, where he besieged Pompey until Pompey escaped with a fleet to Greece (March, 49 B C) Caesar set out at once for Spain, which Pompey's legates were holding, and pacified that province Pompey, having collected troops and money in Africa, went to Greece Caesar held the dictatorship for 11 days in 49 B C, long enough to get himself elected consul, and set out in December for Greece He had collected a small army and fleet at Brundisium—so small, in fact, that Bibulus, waiting with a much larger fleet to prevent his crossing to Epirus, did not bother to watch him, and Caesar slipped across the strait Caesar set out to take the coast of Epirus and met Pompey at Dyrrhachium, but was forced to fall back He began a long retreat southward, with Pompey in pursuit At the plain of PHARSALA in Thessaly, he camped in one of the most favorable positions in the peninsula Pompey with a far larger army attacked Caesar and was routed Pompey fled to Egypt and was killed. Caesar, having pursued Pompey to Egypt, remained there for some time, living with CLEOPATRA, taking her part against her brother and husband Ptolemy XII, and establishing her firmly on the throne From Egypt he went to Syria and Pontus, where he defeated Pharnaces II with such ease that he reported his victory in the words "Veni, vidi, vici" [I came, I saw, I conquered] In the same year he put down, singlehanded, a mutiny of his army and set out for Africa to end the senatorial opposition under Cato On his return to Rome, where he was now tribune of the people for life and dictator, he had four great triumphs, distributed largess, and pardoned all his enemies He was master of Rome It should be noted that he had, however, destroyed an oligarchy, not a democracy, to establish his dictatorship In 44 B C he refused the title of king He set about reforming the social condition of the people by agrarian laws and by building in the city He also drew up the elaborate plans (which Augustus later used) for consolidating the empire and establishing it securely In the winter of 46 B C–45 B C he was in Spain putting down the last of the senatorial party under Pompey's son He returned to Rome in Sept., 45 B C He was elected to his fifth consulship and dictatorship in 44 B C, and he set about planning a campaign against Parthia, the only real menace to Rome's borders. His dictatorial powers had, however, awakened great resentment. He was bitterly criticised by his enemies, who accused him of all manner of vices and made much of his supposed epilepsy. When a conspiracy was formed against him, however, it was made up of his friends and protégés, among them Cimber, Casca, CASSIUS (C Cassius Longinus), and M. Junius BRUTUS On the eve of his departure, on March 15 (the Ides of March), 44 B.C., he was stabbed to death in the senate house His will left everything to his 18-year-old grand-nephew Octavius (later Augustus), who had not known his fortune It is a curious fact that Caesar probably knew of the conspiracy against him and made no attempt to defend himself Caesar made the Roman Empire possible by uniting the state after a century of disorder, by establishing an autocracy instead of the oligarchy, and by pacifying Italy and the provinces. His success in his dealings with other persons is a testimony to his social gifts, and Cicero (who hated Caesar) said that he would rather spend an evening in conversation with Caesar than in any other way Caesar's literary works are highly esteemed. Of them his commentaries on the Gallic Wars (seven books) and on the civil war (three books) survive They are masterpieces of clear, beautiful, concise Latin, and they are among the most reliable histories of antiquity They are also classic military documents. His lost works included one on the Latin language, one on astronomy, and collections of poems and two dramas He was indefatigable in his reading and writing, whether at home or on campaign A literary classic on Caesar is Shakspere's tragedy, *Julius Caesar*. Plutarch is the most famous ancient source For bibliography, see *Rome before Augustus* under ROME. See biographies by G. W. Botsford (1918), John Buchan (1932), and Guglielmo Ferrero (Eng. tr., 1933), C. W. C. Oman, *Seven Roman Statesmen* (1934).

Caesar, Lucius Julius: see CAESAR, family.

Caesarea (sĕsûrē'ŭ, sēzû-, sēzŭ-), ancient city of Mauretania. In later Roman days it was a large and very handsome city, with flourishing trade and arts. It declined after sack by the Vandals in the 5th cent. The modern Cherchel, Algeria, is here.

Caesarea Libani, ancient city of Lebanon: see ARKITE.

Caesarea Mazaca (măz'zŭkŭ), ancient city of Asia Minor, called also Caesarea of Cappadocia. As Mazaca it was the residence of the Cappadocian kings. It has continued down the ages as a trade center and is today KAYSERI, Turkey.

Caesarean section or **Cesarean section** (both sēzā'rēŭn), in surgery, the removal of the child from the uterus through an abdominal incision when normal birth is impossible. The operation is of ancient origin, a Roman law having permitted the fetus to be delivered in this way if the mother died in the last four weeks of pregnancy. The story that Julius Caesar was born thus is probably legendary. The possibility of saving the mother by such an operation was slight until the improved technique of Eduardo Porro, Max Sänger, and others was evolved in the late 19th cent. Caesarean section can be performed more than once on the same patient. Need for the operation is sometimes indicated if the pelvis is abnormally small, if pelvic tumors are present, in case of accident causing hemorrhage, and in cases where there is doubt as to survival of the infant.

Caesarea Palestinae (sĕsurē'u păl'ĭstī'nē, sēzû-, sēzŭ-), old city, S Palestine, c 20 mi. S of Mt. Carmel. It was taken by Alexander Jannaeus, leader of the Maccabees, and later was the capital of Herod the Great. The Jewish citizens were massacred by the Romans in A.D. 66. In recent years it has been made into a Jewish colony of Israel, especially for fishing.

Caesarea Philippi (fĭlĭp'pī), former city, N Palestine, at the foot of Mt. Hermon. It was built by Philip the Tetrarch. Jesus was once in the vicinity (Mat. 16:13). It is perhaps the same as Baal-gad.

Caesarion: see PTOLEMY XV.

Caesarius of Arles, Saint (sēzā'rēus, ărl), 470?–543?, theologian, bishop of Arles from 530. He was concerned for his diocese, which was recently converted, and he was known for simple, appealing sermons, which still survive. His rules for the monastic life formed the basis for subsequent ones. He fought Semi-Pelagianism, and he was head of the synod of Orange (529). Feast, Aug. 27.

caesium see CESIUM.

cafeteria see RESTAURANT.

Caffa, RSFSR: see FEODOSIYA.

caffeine, colorless, crystalline substance composed of the elements carbon, hydrogen, oxygen, and nitrogen. It is an alkaloid found in coffee, in tea (when it is known as theine), in the kola nut, and, in small amounts, in cocoa. It can be prepared synthetically from uric acid. Caffeine is a stimulant to the nervous system and a diuretic. When used in moderation it is generally believed to be harmless to adults unless they have certain diseases or idiosyncracies. Tea leaves have a higher caffeine content than have coffee beans, but the beverages usually contain about the same percentage since more coffee is used to make a beverage.

Caffery, Jefferson (kă'fûrē), 1886–, American diplomat, b. Lafayette, La., educated at Catholic Univ. A lawyer, he entered on a diplomatic career in 1911 and held many posts over the world, notably in Latin America. In the administration of F. D. Roosevelt, Caffery served as Assistant Secretary of State for a time, was a delegate to the Pan American Conference at Montevideo in 1933, replaced Sumner WELLES as U.S. Dept. of State observer in Cuba in 1933, and became ambassador there in 1934. He was appointed ambassador to Brazil in 1937 and ambassador to France in 1944. He has been much criticized by his opponents as a representative of capitalists, much praised by his admirers for his astute and flexible diplomacy.

Caffieri (Fr. kăfyārē', Ital. kăf-fyā'rē), French family of artists. Philippe Caffieri (1634–1716) left Italy to enter the service of Louis XIV at the Gobelin plant. He and a son, Jacques Caffieri (1678–1755), were employed by the architect Le Brun to make metal adornments for the palace and gardens at Versailles. Jacques's superb creations were chiefly in the rococo style. His son, Philippe Caffieri III (1714–74), who worked with him, adopted in his later years the Louis XVI manner. Father and son produced an immense volume of metalwork, including sumptuous ormolu mountings for furniture, adornments for several of the royal palaces, e.g., Fontainebleau and Choisy, and casings for clocks—notably a celebrated astronomical clock presented to Louis XV. Another son of Jacques, Jean Jacques Caffieri (1725–92), was a sculptor noted for statues and portrait busts.

Caffin, Charles Henry, 1854–1918, Anglo-American writer on art, b. England. After some years of educational and theatrical work he came to the United States in 1892 and was engaged by the decoration department at the Chicago exposition. In 1897 he settled in New York, becoming art critic successively on *Harper's Weekly,* the *Evening Post,* the *Sun,* the *American,* and the *International Studio.* He also wrote many popular books on art.

Cagayan (kăgī'ŭn, kăgāyăn') or **Rio Grande de Cagayan,** river rising in central Luzon, Philippine Islands, and flowing 220 mi. N to the Pacific at Aparri. It is navigable by small sea-going vessels for 13 mi.

Cagliari (kă'lyārē), city (pop. 78,632), capital of Sardinia and of Cagliari prov., Italy, a port on a bay on the south coast of the island. A Carthaginian and later a Roman town, it was a Pisan stronghold during the wars with Genoa (11th–14th cent.). There are Roman remains and a medieval castle. Minerals and salt are the chief exports. The port was heavily bombarded in the Second World War.

Cagliostro, Alessandro, Conte (älĕs-sän'drō kōn'tā kälyŏ'strō), 1743–95, famous Italian adventurer, magician, and alchemist, whose real name was Giuseppe Balsamo. After early misadventures in Italy he traveled in Greece, Arabia, Persia, and Egypt. Back in Italy, he married Lorenza Feliciani, who became his assistant on his trips to the cities of Europe, where he posed as a physician, alchemist, mesmerist, necromancer, and Freemason. He claimed the secret of the philosopher's stone and of miraculous philters and potions. As the Grand Copt of the order of Egyptian Masonry he organized many lodges. His reputation was amazing, particularly at the court of Louis XVI. Implicated in the Affair of the DIAMOND NECKLACE, he was acquitted but banished. Cagliostro returned to Rome in 1789, where the Inquisition charged him with heresy and sorcery and condemned him to die. The sentence was commuted to life imprisonment, and he died in a dungeon. Cagliostro has fascinated later generations as well as his contemporaries, and he appears in many works of literature. See biographies by W. R. H. Trowbridge (1910) and Frank King (1929).

Cagniard de la Tour, Charles (shärl' kanyär' du la tōōr'), 1777–1859, French physicist. He was the inventor of a *sirène* used in determining the frequency of sound waves.

Caguas (kä'gwäs, kä'wəs), city (pop. 24,377), E Puerto Rico. Largest of the inland cities, it leads in dairy products and produces sugar and tobacco.

Cahaba (kuhō'bŭ), deserted village, SW central Ala., near the Cahaba river 10 mi. SW of Selma. It was the state capital from 1819 to 1826.

Cahaba, river rising in the mountains NE of Birmingham, Ala., and flowing c. 200 mi. SW and S to the Alabama river near Selma.

Cahan, Abraham (kän), 1860–, American journalist, Socialist leader, and author, b. Vilna. He came to New York city in 1882, entered journalism, and helped found (1897) the *Jewish Daily Forward,* of which he was editor in chief after 1902, making it the most influential Jewish daily in America. He was a founder of the Social Democratic party in 1897 and since 1902 has been a supporter of the Socialist party. Active in spreading socialist teachings among Jewish workers, he encouraged the unionization of East Side garment workers and supported them in their strikes. His writings in English, particularly *Yekl a Tale of the New York Ghetto* (1896), *The Imported Bridegroom and Other Stories* (1898), and *The Rise of David Levinsky* (1917), have a high place in immigrant literature. He also wrote, in Yiddish, *Blätter von mein Leben* (5 vols., 1926–31), an autobiography.

Cahokia (kuhō'kēu), village (pop. 465), SW Ill., on the Mississippi just below East St. Louis, inc. 1927. The first permanent settlement in the state, it was named for a tribe of the ILLINOIS INDIANS who, with the kindred Tamaroa, were served by a French mission established here in 1699. Around the mission grew a fur-trading post, and Cahokia became, with Kaskaskia, one of the chief centers of French influence in the upper Mississippi valley. It was taken by the British in 1765 and by American troops in 1778 under George Rogers Clark. The town has several buildings dating from the 18th cent. See C. W. Alvord, ed., *Cahokia Records, 1778–1790* (1907) and *The Illinois Country, 1673–1818* (1920).

Cahokia Mounds, Indian earthworks near East St. Louis, Ill. There are more than 85 mounds, of which the largest is Monks' Mound (so called from Trappist monks who were settled here early in the 19th cent.), which is 100 ft. high and has a base covering some 17 acres. Considerable excavation has still not settled all questions about the mound builders who constructed these. They were village dwellers and probably made the mounds as bases for temples and the houses of the chiefs. They belonged to the Middle Mississippi culture (c. 1300–c. 1700), and it is probable that the largest mounds were erected after Columbus had reached America.

Cahors (kăôr'), city (pop. 12,706), capital of Lot dept., S central France, on the Lot river. It was an important town under the Romans and early became an episcopal see. Ruled by its bishops until the 14th cent., Cahors was the capital of QUERCY. Ecclesiastic rule did not prevent medieval Cahors from being one of the major banking centers of Europe. The Cahorsin money lenders rivaled the Jews and the Lombards. The university of Cahors, founded in 1322 by Pope John XXII (who was born here), was united in 1751 with that of Toulouse. The old part of Cahors is of great architectural interest. Part of the medieval fortifications, including a fortified bridge, still stand. The Cathedral of St. Étienne (12th–13th cent.), with Byzantine cupolas, and the palace of John XXII are among its numerous historic buildings. Clément Marot and Gambetta were born here.

Caiaphas (Joseph Caiaphas) (kā'yufus), high priest of the Jews from before A.D. 26 until A.D. 36 or 37, a Sadducee, son-in-law of Annas. He presided at the council which condemned Jesus to death. Later he joined in the examination of Peter and John (Mat. 26:57–68, John 11:47–54, 18:24, Acts 4:6). See also Mark 14:53–65 and Luke 22:66–71.

Caibarién (kībärĭyān'), city (pop. 19,815), N central Cuba. A seaport, it is a shipping point for the agricultural products of the region, chiefly sugar.

Caicos Islands see TURKS AND CAICOS ISLANDS.

Caillaux, Joseph (zhōzĕf' kāyō'), 1863–1944, French statesman. He became finance minister in the Waldeck-Rousseau cabinet (1899) and in the Clemenceau cabinet (1906), winning considerable unpopularity by introducing the income tax. As premier in 1911, he reached a peaceful settlement of the crisis over Morocco with Germany. However, he was so severely attacked by the nationalists that his cabinet fell in 1912. In 1913 he again became minister of finance. He resigned in 1914 after his wife had shot dead Gaston Calmette, editor of the *Figaro,* who had attacked his private life. Mme Caillaux was acquitted. Caillaux freely expressed his pacifist sentiments during the First World War, was arrested (1917) for conspiracy with the enemy, and sentenced (1920) to three years imprisonment for correspondence with the enemy. Restored to citizenship in 1924 under the general amnesty, he reentered politics and served as finance minister under Painlevé (1925) and Briand (1926). Both times, a hostile chamber of deputies forced his resignation. He was subsequently elected to the senate. He left several apologetic writings.

Caillié, René (runā' kāyā'), 1799–1838, French explorer in Africa. He was the first white man to visit Timbuktu and survive. The son of poor French peasants, he was obsessed by the idea of seeing Timbuktu and spent 11 years preparing for the journey. Successfully disguising himself as a Moslem trader, he reached the desert city and remained there two weeks. See Galbraith Welch, *The Unveiling of Timbuctoo the Astounding Adventures of Caillié* (1938).

Cain. 1 Eldest son of Adam and Eve, a tiller of the soil. In jealousy, he killed his brother Abel and became a fugitive (Gen. 4). **2** City, W Palestine (Joshua 15:57).

Cainan (kā'năn), in the Gospel genealogy. **1** The same as KENAN. **2** Son of Arphaxad (Luke 3:36).

Caine, Hall (Sir Thomas Henry Hall Caine), 1853–1931, British novelist. After a boyhood on the Isle of Man, he studied architecture and later joined the staff of the Liverpool *Mercury.* Caine lived with Dante Gabriel Rossetti from 1881 until the poet's death and wrote *Recollections of Rossetti* (1882). His novels, some of Manx life, others on biblical themes, include *The Shadow of a Crime* (1885), *A Son of Hagar* (1887), *The Deemster* (1887), *The Manxman* (1894), *The Christian* (1897), *The Prodigal Son* (1904), and *The Master of Man* (1921), his *Life of Christ* (1938) was published posthumously. See his autobiography, *My Story* (1908).

cairn, a pile of stones, usually conical in shape, raised as a landmark or a memorial. In prehistoric times they were often over a burial. A BARROW built primarily of stone is often called a cairn.

Cairnes, John Elliot (kārnz), 1823–75, Irish economist, a follower of John Stuart Mill. His *Slave Power* (1862), a defense of the North in the American Civil War, made a great impression in England. Among his works are *The Character and Logical Method of Political Economy* (1857) and *Some Leading Principles of Political Economy Newly Expounded* (1874).

Cairngorm, group of mountains forming part of the Grampians, Scotland, on the southwestern border of Aberdeenshire and of Banffshire and the eastern border of Inverness-shire and between the Dee and the upper Spey. The name cairngorm is given to an ornamental yellow or brown quartz found in the mountains. The group includes the peaks Ben Macdhui (4,296 ft.), Braeriach (4,248 ft.), and Cairngorm (4,084 ft.).

Cairns, city (pop. 16,641), Queensland, Australia, on Trinity Bay. It is the principal sugar port of Australia.

Cairn terrier see TERRIER.

Cairo (kī'rō), Arabic *El Kahirah* [the victorious], city (pop. 2,100,486), capital of Egypt. It is on the Nile at the head of the delta. Near this site was the Roman fortress city of Babylon, and almost directly across the river was Memphis, an ancient Egyptian capital. Cairo, now the largest city of Africa, was founded in 969 by the Fatimite general Jauhar to be the capital of Egypt in place of nearby Fostat. In the 12th cent. it was unsuccessfully attacked by Crusaders, and c.1179, to defend the city, Saladin erected the citadel, which still stands.

Cairo throve under the MAMELUKES (13th–early 16th cent), who added many buildings, but the period (1517–1798) of Ottoman rule saw a decline Napoleon occupied the city from 1798 to 1801 In the 19th cent it grew in size and commercial importance The British occupation began in 1882 and did not end until 1936, when Egypt was restored to full independence Part of Cairo is a modern city laid out in wide streets, but it is in the older sections—Arab, Jewish, and Coptic—that the famed mosques, palaces, and city gates are found. The mosques of Amur (7th cent), Ibn Tulun (9th cent), Hasan (1356), and Kait Bey (15th cent) are especially noted for bold design The Mosque of El Azhar houses what is deemed the most important orthodox Moslem university in the world, founded in 972 and now having some 10,000 students Khedive Ismail's palace on Gezira Island is a noted 19th-century structure Cairo has a museum of antiquities devoted to objects from the ancient period, an Arab museum, and the royal library with a large collection of valuable manuscripts of the Koran The Nilometer, a graduated column used for over a century to measure the Nile water level, is on Roda Island, where the infant Moses is believed to have been found in the bulrushes Cairo is the business center of Egypt, and most of its wealth is derived from the transit trade along the Nile and along the railroad, which parallels the river to Aswan The city's manufactures include clothing and processed foods See Stanley Lane-Poole, *Cairo* (1902)

Cairo (kā'rō, kā'rō) **1** City (pop 4,653), co seat of Grady co, SW Ga, near the Fla line and 15 mi W of Thomasville, in a fertile farm area, settled 1866, inc 1870 It ships quantities of cane sugar and syrup and also processes or ships the area's yield of tung nuts, tobacco, pecans, and truck **2** Residential and industrial city (pop 14,407), co seat of Alexander co, extreme S Ill, on a levee-protected tongue of land between the Mississippi and Ohio rivers, inc 1818, reinc 1837 A center for shipping by rail, highway, and river, it is the distributing point for a large farm area, popularly called Egypt because of the fertility of the soil and the delta-like geographical similarity Among Cairo's manufactures are cottonseed products, lumber, drugs, and soft drinks It was a strategic point during the Civil War and was used as a depot by the Federal government MOUND CITY, 5 mi to the north, was a naval base The Ohio River Highway Bridge connects Cairo with Kentucky, and the Mississippi Highway Bridge extends to Missouri The city has often been endangered by floods

Cairo Conference, Nov 22–25, 1943, meeting of U S President F D Roosevelt, British Prime Minister Winston Churchill and Generalissimo Chiang Kai-shek of China at Cairo, Egypt, during the Second World War A joint declaration pledged continuation of the war against Japan until unconditional Japanese surrender, forswore any territorial gains, and promised to strip Japan of all territory acquired since 1895, notably Korea, which was to receive independence "in due course" The TEHERAN CONFERENCE followed immediately after the Cairo Conference.

Cairoli, Benedetto (bānādĕt'tō kīrō'lē), 1826–89, Italian patriot and statesman, one of five brothers all noted as heroes of the Risorgimento The only brother to survive the wars, Benedetto took part in the expedition of GARIBALDI to Sicily in 1860 and later became a leftist member of parliament, advocating, with Mazzini, the occupation of Rome He held several important posts and was premier in 1878 and 1879–81

caisson (kā'sun, -sŏn) [Fr, =big box], in engineering, a chamber, usually of steel but sometimes of wood or reinforced concrete, used in the construction of foundations or piers in or near a body of water There are several types The open caisson is a cylinder or box of size and shape to suit the projected foundation, with a cutting edge around the bottom Thus is sunk by its own weight and by excavation and then filled with concrete Pneumatic caissons are usually used in river-bed work or where quicksand is present In this type the cylinder or box has an airtight deck high enough above the cutting edge to permit men to work underneath The air in this chamber beneath the deck is kept under pressure great enough to prevent the entrance of water Shafts through the deck permit the passage of men, equipment, and excavated material between the bottom and the surface At the top of each shaft is an air lock to permit communication with the outside without altering the air pressure in the working chamber As the working chamber moves down, the caisson above the deck and about the shafts is filled with concrete, and when a sufficient depth or bed rock is reached, the working chamber itself is filled, so that there is a solid block of concrete from base to top A type of caisson often called a camel, used to raise sunken vessels, consists of a cylinder filled with water This is sunk, attached to the vessel, and emptied by pump or compressed air, so that its buoyancy assists in raising the vessel Caissons are also sometimes used for closing the entrance to dry docks or instead of gates in canal locks Workers leaving a caisson after hours of labor under high pressure are given special treatment to accustom them to the lower atmospheric pressure and thus to prevent caisson disease.

caisson disease. Men engaged in work under water or underground in a chamber where the pressure is three to four times that of the atmosphere suffer from various disturbances when they return to normal or atmospheric pressure The condition is also called the bends particularly when it affects the joints and muscles Dizziness, difficulty in breathing, and paralysis often occur, and death may follow The disturbances last from hours to weeks and are owing to the injury to tissue by bubbles of nitrogen gas which are released from solution by the pressure change. Divers may suffer in the same way Preventive treatment consists in placing the workers in a decompression chamber where the pressure is gradually reduced to that of the atmosphere If symptoms have developed, the worker should be put in a chamber of increased pressure and later subjected to gradual decrease in pressure

Caithness (kāth'nĕs, kāthnĕs'), county (686 sq mi; 1931 pop 25,656, 1948 estimated pop 23,664), N Scotland, northernmost county of the mainland The county town is Wick, an important center for herring fishing The coast line is rocky, and much of the area of the county is treeless moorland Relatively little of the land is cultivated There are evidences of Pictish, Norse, and Danish occupation of the county

Caius, John (kē'z), 1510–73, English physician, studied at Gonville Hall, Cambridge, and at Padua He practiced in London, where he was court physician After returning to Cambridge he enlarged and endowed Gonville, renaming it Gonville and Caius College He promoted the study of anatomy See his works (with memoir by John Venn, 1912) and *A Boke or Counsell against the Disease Called the Sweate* (1552, facsimile ed, 1937)

Cajal, Santiago Ramón y see RAMÓN Y CAJAL

Cajamarca (kähnämär'kä), city (pop 15,553), N Peru At an altitude of 9,022 ft, Cajamarca has a cool, dry climate Grains and alfalfa are raised in the region, and from neighboring mines come gold, silver, and copper Local industries produce straw hats, textiles, and leather goods The town was important in Inca times, and it was here Francisco Pizarro captured ATAHUALPA and broke the power of the Inca

Cajetan (kā'jutăn, ka"ē'tun') [Latin, =from Gaeta], 1470–1534, Italian prelate, cardinal of the Roman Church, b Gaeta His original name was Giacomo de Vio He joined the Dominicans (c 1486), became general of his order (1508), and was given (1517) the red hat As papal legate in Germany in 1518 and 1519 he attempted unsuccessfully to compose the differences of Martin Luther with the Church He also strongly opposed the divorce of Henry VIII of England from KATHARINE OF ARAGON Cardinal Cajetan was thus opposed to the reformers who separated from the Church though he ardently desired reform within the Church Always a student, he translated parts of the Bible, and his commentaries are published with the *Summa* of St THOMAS AQUINAS in the pontifical edition of that theological masterpiece

Cajuns see ACADIA

Cakchiquel see QUICHÉ

cake, originally a small mass of dough baked by turning, in present usage a dessert or sweet made of flour, sugar, shortening (preferably butter), eggs, seasonings, and usually some leavening and liquid besides the eggs The early method of making sweet cake or "fancy bread" was by adding other ingredients to a portion of bread dough Some cakes, such as fruitcake or poundcake, called for many eggs and for wine, brandy, or sack, these ingredients supplying the leavening agent Modern cakes are generally raised with baking powder or with baking soda or beaten eggs Cakes are classed as butter cakes or as cakes made without shortening and depending mainly on beaten eggs for leavening (e g, spongecake and angel cake)

Calabar (kălubär', kă'lubur), town (pop 16,653), SE Nigeria There is palm-oil processing

calabash see PIPE, TOBACCO

Calabrese, Il (ēl kalabrā'zā), 1613–99, Neapolitan painter, whose real name was Mattia Preti He studied in Rome and with Guercino at Cento and won a reputation by his decorations for public buildings in Venice and Bologna He painted the frescoes of St John the Baptist in the cathedral at Malta, for which he was knighted by Pope Urban VIII His best-known works are the frescoes in Sant' Andrea della Valle, Rome, *Christ Blessing the Children* (Brera, Milan), *Martyrdom of St. Andrew* (Louvre), and *Return of the Prodigal Son* (Naples)

Calabria (kulā'brēu, Ital. kälä'brēä), region (5,828 sq mi.; pop. 1,771,651), S Italy A mountainous peninsula projecting between the Tyrrhenian Sea and the Ionian Sea, it forms the "toe" of the Italian boot Reggio di Calabria is the capital The southern tip of Calabria is separated from Sicily by the narrow Strait of Messina. Calabria is divided into the provinces of Catanzaro, Cosenza, and Reggio di Calabria, named after their chief cities Agriculture, grazing, fruitgrowing, and the cultivation of silkworms are the chief occupations There are several large hydroelectric plants The ancient BRUTTIUM, the region came to be named Calabria in the early Middle Ages (under the Romans, Calabria designated the present S APULIA) Conquered (11th cent) by ROBERT GUISCARD, Calabria became part of the Norman kingdom of Sicily and (after 1282) of the kingdom of Naples (see NAPLES, KINGDOM OF) It was conquered by Garibaldi in 1860 Feudal landholding conditions prevailed until modern times These, added to malaria, frequent earthquakes, droughts, and poor communications, have encouraged large-scale emigration and have held up the social and economic development of the region Reforms and public works have been in progress since the beginning of the 20th cent

caladium (kulā'dēŭm), name for certain tropical American plants with thin leaves of various colors Two species are commonly cultivated in the United States, only in the far South can they be grown out of doors The commoner species *Caladium bicolor* appears in many varied patterns and colors and is known by a number of different names The almost transparent leaves have spots or other markings of white, purple, rose, and other colors *Caladium picturatum* is similar but appears in less variety Sometimes the caladiums are confused with the species *Colocasia* (see TARO), a common name for *Colocasia* is elephant's-ear, and this name too, is often mistakenly applied to the caladiums

Calah (kā'lu) or **Kalakh** (kā'lukh), ancient city of Assyria, S of Nineveh and therefore S of present Mosul, Iraq It was long the Assyrian capital, it seems in very early times to have been superseded by Nineveh and was restored (c 880) to its old position by Ashurnasirpal III, whose great palace there has been excavated It continued to be a royal residence even after Assur and Nineveh became the political capitals It contained inscriptions of Tiglath-pileser III and Esar-Haddon Calah is mentioned in Gen 10 11,12

Calahorra (kälaô'rä), city (pop 12,647), Logroño prov, NE Spain, in Old Castile It is an agricultural center in a region noted for its pimiento Here, in ancient Calagurris, Pompey unsuccessfully besieged the rebel Sertorius in 76 B C There are a few Roman ruins and an 11th-century cathedral Quintilian was born here

Calais (kă'lā, kălā', Fr kalĕ'), city (1936 pop 59,102, 1946 pop 41,536), Pas-de-Calais dept, N France, in Picardy, a seaport opposite Dover on the Strait of Dover A fishing village until the 10th cent it was fortified (13th cent) by the counts of Boulogne In 1347, after a siege of 11 months, Calais fell to Edward III of England A bronze group by Auguste RODIN commemorates the famous sacrifice of the six burghers of Calais, as related in Froissart's chronicle Edward III had promised to spare the town if six prominent citizens offered their lives, the mayor, Eustache de Saint-Pierre, and five other burghers voluntarily appeared before the king, barefoot, in shirts, and with halters around their necks, but Edward spared them and the city when his queen, Philippa, interceded Calais remained in English hands until it was recovered by the French under François de Guise in 1558 It was the scene of much fighting (1940, 1944) in the Second World War and was partly destroyed

Calais (kā'lis), city (pop 5,161), SE Maine, on the St Croix opposite St Stephen, N B, with which it forms practically a single community, inc as a town 1809, as a city 1850 On St Croix, or Dochet, Island in the St Croix below Calais the sieur de Monts and Champlain planted a settlement in 1604 Permanent settlement was made in 1779 The city is a port of entry, and woodworking and fruit and dairy processing are carried on

calamander wood (kăl'-), extensively used cabinet wood procured from a tree of the ebony family, of the same genus as the persimmon—*Diospyros* It is native to India and Ceylon The wood is brown striped with black, or of varied shades of brown The name "variegated ebony" is also sometimes given to calamander wood

Calamatta, Luigi (lwē'jē kalamat'tä), 1802–69, Italian engraver He went to Paris in 1822, studied with Ingres, and became one of the leading engravers in France He was appointed professor of the École des Beaux-Arts, Brussels, in 1837 and subsequently taught at Brera Academy, Milan Calamatta's principal works include *Bayazet and the Shepherd, The Death Mask of Napoleon* after the mask by Dr Antommarchi, Napoleon's physician; *Madonna di Foligno* after Raphael, *The Vow of Louis XIII*, and portraits of Ingres and Paganini after Ingres

Calame, Alexandre (alĕksä'dru kalam'), 1810–64, Swiss landscape painter. His best work depicts Alpine scenery. Good examples are *The Four Seasons* (Geneva), *Lake of the Four Cantons* (Victoria and Albert Mus.); and *Wetterhorn* (Basel). Among his lithographs are *Landscapes of the Alps* and *Views of Lauterbrunnen.*

Calamian Islands (kälämyän′) or **Calamianes** (kalämyä′näs), Philippines, between Mindoro and Palawan BUSUANGA and CULION are the largest islands

Calamis (kă′lumĭs), 5th cent B C , Greek sculptor of Athens in the period of transition from archaic sculpture to that of Phidias

Calamity Jane, c 1852–1903, American frontier character, b Princeton, Mo Her maiden name was Martha Jane Canary, and the origin of her nickname is obscure Little is known of her early life beyond the fact that she moved with her parents to Virginia City, Mont , in 1865 and that she grew up in mining camps and rough frontier communities In 1876 she appeared in Deadwood, S Dak , dressed in men's clothes, boasting of her marksmanship and of her exploits as a pony-express rider and as a scout with Custer's forces In her later years she toured the West in a burlesque show and appeared at the Pan-American Exposition in Buffalo, N Y She peddled her autobiography and portraits of herself, but she died in poverty and obscurity in Deadwood, where she is buried beside Wild Bill Hickok See biographies by Duncan Aikman (1927) and Ethel Hueston (1937), R J Casey, *The Black Hills and Their Incredible Characters* (1949)

calamus · see SWEET FLAG

Calamy, Edmund (kă′lumĭ), 1600–1666, English Presbyterian preacher For 10 years he was lecturer at Bury St Edmunds until in 1636 his opposition to the observance of certain church ceremonies forced him to withdraw and so identify himself with the Puritan party He was pastor (1639–62) of the Church of St Mary Aldermanbury, London A leader among the Presbyterians, Calamy was a member of the Westminster Assembly (1643) and one of the five authors whose initials compose *Smectymnuus*, the name under which answer was made to Bishop Joseph Hall's assertion of the divine right of episcopacy Opposed to the execution of Charles I, Calamy was among those sent to meet Charles II in Holland At the Restoration, he was made a chaplain to the king, but declined a bishopric Ejected under the Act of Uniformity (1662), he was imprisoned for a short time for having preached after ejection A number of his sermons were published His grandson, **Edmund Calamy,** 1671–1732, nonconformist minister in London, also published many sermons, but he is particularly remembered for his *Account of the Ministers Ejected by the Act for Uniformity* (1702), edited by A G Matthews as *Calamy Revised* (1934) His autobiography appeared in 1829

Calan, Abraham see CALOVIUS, ABRAHAM

Calatayud (kä″latīyōdh′), city (pop 15,116), Saragossa prov , NE Spain, in Aragon It is today an agricultural center with important sugar refineries Founded (8th cent) by the Moors and conquered (1120) by Alfonso I of Aragon, it retains a Moorish castle and the collegiate Church of Santo Sepulcro, once the main church of the Knights Templars in Spain Near Calatayud stood ancient Bilbilis, birthplace of Martial There are cave dwellings in the vicinity

Calatrava (käläträ′vä), ruined village, Ciudad Real prov , central Spain, in New Castile It gave its name to, and was the original seat of, the **Knights of Calatrava,** oldest Spanish military order Founded by the Cistercians in 1158 as a defense against the Moors, the order was very powerful and held large possessions until the 13th cent , but later declined The title of grand master passed (1499) to the Castilian and thence to the Spanish crown

Calcar, Kalkar, or **Kalcker, Jan Stephen von** (all fŭn käl′kär), 1499–c 1546, Italian painter, b Kalkar, Germany He was a pupil of Titian and is chiefly noted for his successful imitations of the portraits of Titian and Raphael, difficult to distinguish from the originals He illustrated Vesalius' *De humani corporis fabrica* (1543)

calcareous rock · see LIMESTONE and MARBLE

calcareous soils, formed largely of the skeletons of marine animals—shells and bones crumbled to powder ages ago They usually contain chalk, marl, and limestone and frequently a large amount of phosphates They are often very fertile, as in the case of the buckshot soils of the South Sometimes they are flinty, thin, and dry They often form a large part of the soil of deserts, which may appear sterile, but which prove very fertile when sufficient moisture for crops is applied

Calcasieu (kăl′kusō͞), river rising in W central Louisiana and flowing S through Lake Charles and the large Calcasieu Lake (20 mi long) to the Gulf of Mexico It is partly navigable and connects with the Intracoastal Waterway

calceolaria (kăl″sēōlâr′ēu) [Latin,=slipperlike] or **slipperwort,** any of several South American species of the genus *Calceolaria*, herbs and shrubby plants valued for their profusion of showy, usually spotted, pouch-shaped flowers They are grown in conservatories and are considered difficult to cultivate

Calchas (kăl′kăs), in Greek legend, priest whose prophecies aided the Greeks in the TROJAN WAR In medieval romances, he is the father of Cressida

calcination (kălsĭnā′shŭn), in metallurgy, heating a substance to a high temperature in a furnace or kiln, an important first step in the preparation of many metals from their ores It may result in the loss of moisture or of volatile substances or in oxidation or reduction When oxidation occurs the process is called roasting The term *calcination* was applied originally to the method by which lime was obtained from limestone by treating it with heat and driving off carbon dioxide

calcite (kăl′sīt), very widely distributed mineral, commonly white or colorless, but appearing in a great variety of colors owing to impurities Chemically it is calcium carbonate, but it frequently contains manganese, iron, or magnesium in place of the calcium It crystallizes in the hexagonal system, its crystals being characterized by highly perfect cleavage Calcite also occurs in a number of massive forms, in which it may be coarsely to finely granular (as in marble), compact (as in limestone), powdery (as in chalk), or fibrous One crystalline form, called dogtooth spar because of its dogtooth appearance, exhibits faces of perfect scalene triangles Another form, satin spar, is finely fibrous and has a satin luster ICELAND SPAR is nearly pure calcite Other important forms of the mineral are LIMESTONE, MARBLE, CHALK, MARL, STALACTITE AND STALAGMITE formations, TRAVERTINE, and Oriental ALABASTER Among the places where calcite is mined are New York and Missouri in the United States, Guanajuato, Mexico, Iceland, Andreasburg, Germany, and the counties of Cumberland, Derbyshire, Devonshire, Durham, and Lancashire in England

calcium (kăl′sēum) [from Latin,=lime], silvery-white, relatively soft metallic element (symbol= Ca, for physical constants, see ELEMENT, table) In chemical activity it resembles strontium and barium and is classed with these two as a metal of the ALKALINE EARTHS Calcium is an active element It tarnishes rapidly when exposed to air and burns with a bright flame when heated It reacts directly with water, forming the hydroxide It combines with several elements, e g , with oxygen, carbon, hydrogen, chlorine, fluorine, arsenic, phosphorus, and sulphur, forming numerous compounds Although calcium metal is of little commercial importance, calcium compounds are widely and diversely used The element is a constituent in LIME, bleaching powder or CHLORIDE OF LIME, MORTAR, plaster, CEMENT, CONCRETE, WHITING, putty, precipitated CHALK, GYPSUM, and plaster of Paris Calcium carbide, a compound of the element and carbon, is used to prepare ACETYLENE and also calcium cyanamide, which is employed as a fertilizer The phosphate (composed of calcium, phosphorus, and oxygen) is a major constituent of bone ash The arsenate (composed of calcium, arsenic, and oxygen) and the cyanide (composed of calcium, carbon, and nitrogen) are used as insecticides Calcium does not occur by itself in nature, but is found in its widely distributed compounds, e g , ICELAND SPAR, MARBLE, LIMESTONE, FELDSPAR, APATITE, CALCITE, DOLOMITE, FLUORITE, GARNET, and LABRADORITE It is a constituent of most plant and animal matter Calcium is essential to the formation and maintenance of strong bones and teeth In the human adult the bone calcium is chiefly in the form of the carbonate and phosphate salts A sufficient store of vitamin D in the body is necessary to the proper utilization of the calcium Calcium also functions in the regulation of the heart beat and in the conversion of prothrombin to thrombin, a necessary step in the clotting of blood As the CARBONATE it is a cause of temporary hardness in water, and as the sulphate, of permanent hardness Calcium metal is usually prepared by the electrolysis of a salt, usually the chloride Sir Humphry Davy is credited with its discovery in 1808 Calcium compounds, in general, when held in the Bunsen burner flame, show an orange or yellow-red color

Calcol (kăl′kŏl), Judahite 1 Chron 2 6 Chalcol 1 Kings 4 31

calculating machine, device for performing various kinds of mathematical processes Early devices used by man to aid calculation include the ABACUS and the counting rods or "bones" of John NAPIER Much used for simple calculations is the SLIDE RULE Blaise Pascal in 1642 devised models, probably the first, of a simple adding machine using geared wheels An improved mechanism for performing multiplication by the process of repeated addition was devised (c 1672) by G W von Leibniz This type of mechanism, sometimes known as the stepped drum or stepped wheel, is still used in some machines, although it has been modified to reduce its bulk The stepped drum is a cylinder with nine teeth parallel to the long axis, the length of the teeth is graduated in proportion to the numbers from 1 to 9 By means of a cogwheel arrangement the desired number of teeth on the drum are engaged and the adding wheel is rotated through a corresponding number of places, thus adding each number to the one before it. A machine using the Leibniz mechanism was the first to be successfully produced on a commercial scale Devised (1820) by C X Thomas of Colmar, it could be used for adding, subtracting, multiplying, and dividing A mechanism permitting construction of a more compact machine than the stepped drum was incorporated in a machine patented by F S Baldwin in the United States in latter part of the 19th cent , later the machine was redesigned by Baldwin and W J R Monroe W T Odhner of Russia constructed a machine using the same device as Baldwin's at about the same time This mechanism is commonly used in modern machines of the barrel or cylinder type and consists of a wheel with nine retractable pins or teeth In the cover plate of the barrel are nine curved slots, each numbered from 1 to 9 The end of a setting lever projects from the wheel through each curved slot The lever, set at the desired number, causes a corresponding number of teeth to project from the wheel within the machine, and a series of gear actions results in the turning of a number wheel through the required rotations Some adding machines have, instead of the setting levers, a keyboard with nine rows of keys, in each column numbered from 1 to 9, in the simpler forms there are only 10 keys, numbered from 0 to 9 Adding machines can be used also to perform multiplication, division, and subtraction Some machines are operated by hand levers and others by electricity Machines that perform the calculation and record the items and the result on paper are constructed around what is known as a key-set mechanism, after the keys are pressed a second motion—operating a handle or setting the motor in operation—causes the numbers to be recorded Those that perform the calculation without recording it on paper have a key-driven mechanism which requires only the one motion of pressing the keys The first key-driven machine was patented in 1850, and in 1887 D E Felt patented a key-driven calculator which developed into the comptometer In 1888 W S Burroughs was granted a patent on a key-set adding machine with a crank In recent years great advances have been made in the development of machines for performing long and highly complex calculations Forerunner of these was one which Charles Babbage designed in the 1830s, although he worked on it for years he was unable to complete it because certain materials and skills essential to its construction were not developed until the 20th cent A mechanically operated differential analyzer was designed by Vannevar Bush and completed by him in 1930, a later machine, completed in 1942, could be operated either mechanically or electrically A machine known as the Complex Computer, based on the principle of the telephone switchboard, was completed in 1940, other machines were fashioned after the same principle and used by government agencies during the Second World War Also among the early complex machines were the Automatic Sequence-Controlled Calculator, completed in 1944, the Electronic Numerical Integrator and Calculator, completed in 1946, the first to use electronic tubes for calculating, and the Selective Sequence Electronic Calculator, completed in 1947 In addition to performing ordinary mathematical calculations in small fractions of seconds, electronic machines can perform long sequences of operations Instructions are given to the machines in various ways, e g , by means of cards or tape with punched holes representing certain information, by setting dial switches, or by means of a teletypewriter keyboard on which a human operator types the information and directions Within the machines are thousands of electronic tubes, relays, and many miles of wire Over the circuits travel the messages in the form of numbers, directions, and signals Of great importance is a part of the machine which provides for storing information, the system varying in different machines, in some it makes possible the holding in reserve of many thousands of words or numbers (representing intermediate results in a calculation) which can be picked up and used according to the directions given to the machine In some machines the solutions obtained as a result of the operations are typed on sheets by electric typewriters, and some record the results on punch cards or tapes Uses for calculating machines are constantly increasing in many fields of research and industry See E C Berkeley, *Giant Brains* (1949), D R Hartree, *Calculating Instruments and Machines* (1949)

calculus (kăl′kyulus) [Latin,=a pebble used in counting and computing], in higher mathematics, any advanced method, using a system of notation peculiar to itself, for solving various problems The two most familiar calculi are differential and integral, they are sometimes referred to as infinitesimal calculus The differential calculus provides a means of computing the rate at which a FUNCTION is changing with respect to its independent variable This is done by working with the increment (difference between two succeeding values) of the independent variable and the corresponding increment of the function When the increment of the independent variable is made to approach zero, the ratio of the increment of the function to the increment of the variable approaches a constant figure This constant value is called the derivative of the function and is, of course, its rate of change or, so to speak, speed Formulas are thus worked

out for obtaining the derivatives of various commonly occurring functions The process is called differentiation With the derivatives obtained one may find tangents, minimum and maximum values, and the like The integral calculus is the opposite Through integration one starts with a given derivative and finds its function (the integral) Integration has been found useful in computing the area of irregular figures, volume, pressure, moment, and the like See E T Bell, *The Development of Mathematics* (1940), Edward Kasner and James Newman, *Mathematics and the Imagination* (1940), W A Granville and others, *Elements of the Differential and Integral Calculus* (rev ed , 1941), Moses Richardson, *Fundamentals of Mathematics* (1941)

calculus or stone, in medicine, accumulation of mineral salts deposited in various parts of the body in the form of a hard concretion of stone Common sites for such stony deposits are the gall bladder, kidney, urinary bladder, joints, and salivary ducts Gall stones are composed of varying amounts of calcium salts, bile pigments, and cholesterin, they vary in size and number Stones forming in the gall bladder may cause inflammation of the bladder wall, infection, increased secretion of bile, and obstruction of the duct Blockage of the bile duct may result in acute attacks of COLIC and JAUNDICE, in addition to indigestion Small stones may pass through the bile ducts into the digestive tract, surgery is indicated, however, in the case of larger concretions Accumulations of small stones (gravel) in the kidney may cause extreme pain when passing through the ureter Vesical (urinary bladder) calculi may form as a result of urinary retention and infection Dental calculus (tartar) is usually deposited around the necks of the teeth, pulp stones are often found in the pulp chambers of the teeth

Calcutta (kălkŭ'tŭ), city (pop 2,070,619), capital of West Bengal state, India It is a port on the Hooghly river 86 mi from the Bay of Bengal Calcutta was founded (1690) by the British East India Company, and within a century it assumed its present position as the chief port of E India In 1756 the nawab of Bengal, Siraj-ud-daula, captured Calcutta and killed most of the garrison by imprisoning it overnight in a small, stifling room, the notorious "black hole " Robert Clive retook the city in 1757 From 1772 to 1911 it was the capital of India Calcutta, which constitutes, with the neighboring cities (especially Howrah), one of the major manufacturing areas of India, produces textiles and finished jute It exports the products of E India, including rice, vegetable oil, jute, and shellac, and it imports manufactured goods It contains the Univ of Calcutta, several unaffiliated colleges, and the Indian Museum, which has one of the world's outstanding natural history collections The Maidan, a large river-front park surrounded by government buildings, is the most attractive section A gigantic banyan tree with foliage extending some 300 ft in diameter is in another park

Caldecott, Randolph (kôl'dŭkut), 1846–86, English artist and illustrator He is famous for his drawings of contemporary English country life and for his charming and humorous illustrations, including those for Washington Irving's *Old Christmas* and *Bracebridge Hall*, Blackburn's *Breton Folk*, and *Some of Aesop's Fables with Modern Instances* Perhaps his best are the colored illustrations for a series of 16 children's picture books, including *John Gilpin* and *The Grand Panjandrum Himself* See study by Mary Gould Davis (1946)

Calder, Alexander Stirling (kôl'dur), 1870–1945, American sculptor He contributed the *Triumph of Energy* and other large groups to the Panama-Pacific Exposition, where he was acting chief sculptor In buildings, parks, and gardens in many parts of the country his decorative sculptures may be seen, and his work is in various museums Notable examples in Philadelphia are the heroic figures on the Presbyterian Building, the Lea Memorial, Laurel Cemetery, the Shakspere memorial, *Tragedy and Comedy*, and the Swann Memorial He is further represented by a group in relief on the Washington Arch, New York, and by the Depew Fountain (Indianapolis), *The Man Cub* (Metropolitan Mus), and the *Dancing Naiad* His son, **Alexander Calder,** 1898–, abstract sculptor, was educated as an engineer His ingenious and entertaining figures, which he calls "mobiles" and "stabiles," are made of wire or twisted metal See study by J J Sweeney (1944)

Calder, Sir Robert, 1745–1818, British admiral In command of a blockading squadron in the Napoleonic Wars, he intercepted (1805) French and Spanish ships under Admiral Villeneuve at Cape Finisterre, but after an indecisive battle let him escape Court-martialed for not continuing the battle, he was censured, but was exonerated of charges of cowardice

Calderon, Philip Hermogenes, 1833–98, English historical and genre painter, b Poitiers, France, of Spanish descent Among Calderon's best-known works are the popular *Broken Vows*, *After the Battle*, *Her Most High, Noble, and Puissant Grace* (Leeds), and his masterpiece, *The Renunciation* (Tate Gall , London)

Calderón Bridge (käldārōn'), site of the decisive battle in the Mexican revolution against Spain, fought on the Lerma river E of Guadalajara, Jalisco, MEXICO On Jan 17, 1811, insurgents commanded by HIDALGO Y COSTILLA met the royalists under CALLEJA DEL REY On the point of victory, Hidalgo's men were stampeded by the explosion of an ammunition wagon, which set fire to a field of dry grass Their flight led to collapse of the independence movement under Hidalgo

Calderón de la Barca, Pedro (pā'dhrō käldārōn' dā la bar'kä), 1600–1681, Spanish dramatist, last important figure of the Golden Age, b Madrid Educated at a Jesuit school and the Univ of Salamanca, he turned from theology to poetry and was a court poet from 1622 His plays were carefully contrived, subtle, and rhetorical, the earlier ones, of the cloak-and-sword school, include *La dama duende* [the lady fairy] and *Casa con dos puertas mala es de guardar* [the house with two doors is impossible to guard] He excelled in a series of *autos sacramentales* (one-act religious plays), among which the most famous are *El divino Orfeo*, *Pequis y Cupido*, and *A Dios por razón de estado* [to God for reasons of state] Of his philosophical dramas the best known are *El mágico prodigioso* [the wonderful magician], *El alcalde de Zalamea*, and *La vida es sueño* [life is a dream], one of the masterpieces of the Spanish theater Calderón took holy orders in 1651 and thereafter wrote few plays except the *autos*, of which he supplied two a year for the Corpus Christi festival Eight of his plays were translated by Edward Fitzgerald (new ed , 1906) See study by E J Hasell (1912); Salvador Madariaga, *Shelley and Calderón* (1935).

Caldwell, Erskine (kôld'wul), 1903–, American author, b White Oak, Ga His realistic novels of the rural South include *Tobacco Road* (1932, a dramatized version ran for over seven years on Broadway), *God's Little Acre* (1933), *Tragic Ground* (1944), and *This Very Earth* (1948) *Jackpot* (1940) is a collection of stories He collaborated on several books with the photographer, Margaret Bourke-White, who was his wife from 1939 to 1942

Caldwell 1 City (pop 7,272), co seat of Canyon co , SW Idaho, on the Boise river and W of Boise, founded 1883, inc 1889 On the site of an Oregon Trail camping ground, the city is now a shipping point for a farm, dairy, and livestock area in the BOISE PROJECT Its producers' and consumers' cooperatives are notable The College of Idaho (1891), Caxton Printers, Ltd , and an agricultural experiment station are here 2 City (pop 1,962), S Kansas, S of Wichita near the Okla line, in an agricultural and grazing area and near oil fields, laid out 1871, inc 1879 An important point on the old Chisholm Trail, it boomed in the 1880s 3 Borough (pop 4,932), NE N J , near Montclair, settled before 1785, inc 1892 Airplane propellers are made here The Presbyterian parsonage in which Grover Cleveland was born is preserved 4 Village (pop 1,705), co seat of Noble co , SE Ohio, on Duck Creek and S of Cambridge, laid out 1857. Coal mining is its chief industry 5 Town (pop 2,165), co seat of Burleson co , S central Texas, ENE of Austin, in a farm area

Caleb (kā'lĕb) [Heb , =dog], principal spy sent into Canaan He is characterized in the narrative by his faithfulness to God, a virtue for which he was rewarded. Num 13 6, 14, 32 12, Joshua 14 6–14 The name is mentioned elsewhere frequently, apparently connected with a tribe inhabiting S Palestine 1 Sam 30 14, 1 Chron 2 18,19,42,46,48,49 Chelubai 1 Chron 2 9 The name **Caleb-ephratah** (ĕf'rutu) at 1 Chron 2 24 is due undoubtedly to a textual error

Caledonia (kă'lĭdō'nēŭ), Roman name for that part of the island of Britain which lies N of the Firths of Clyde and Forth The name occurs in the works of Lucan (1st cent A D) and is still used rhetorically, usually to mean all of Scotland.

Caledonia, village (pop 1,401), S Ont , on the Grand River and SSW of Hamilton, founded 1843 It is an industrial and mining (gypsum) center

Caledonia. 1 Village (pop 1,985), co seat of Houston co , extreme SE Minn , near the Iowa line, settled c 1855. It is a trade and manufacturing center in a farm area A federal soil conservation project is here 2 Village (pop. 1,226), W central N Y , SW of Rochester, in a farm and dairy region, inc 1887 A large state fish hatchery and gypsum and limestone quarries are here Farm machinery is made

Caledonian Canal, waterway, 60½ mi long, cutting across Scotland from Moray Firth to Loch Linnhe and following the Great Glen of Scotland It is formed by 23 mi of artificial canal and Lochs Ness, Oich, and Lochy Begun by Thomas Telford in 1803, it was finally opened in 1847 Owing to the small capacity of the 29 locks, the canal is little used now.

Calef, Robert (kă'luf), 1648–1719, author of *More Wonders of the Invisible World* (1700). A Boston cloth merchant, probably born in England, he bitterly attacked Cotton MATHER for his part in the witchcraft delusion. The book, published in London because no Boston printer would accept it, generally condemned the view of witchcraft then prevailing and had a salutary effect throughout New England It is reprinted in G. L Burr, ed., *Narratives of the Witchcraft Cases, 1648–1706* (1914)

calendar [Latin, from Kalends], system of reckoning time, devised especially to make the naming of a day possible and convenient There are two obvious recurrent cycles in nature the cycle of the seasons (i e , of the sun) and the cycle of the moon The earth completes its orbit in 365 days 5 hr 48 min 46 sec , the length of the solar year. The moon passes through its phases in about 29½ days, so that 12 lunar months (called a lunar year) come to more than 354 days 8 hr 48 min The problem of the calendar has usually been to harmonize solar and lunar reckonings The fact that months and years cannot be divided exactly by days and that years cannot be divided exactly by months has led to the device of intercalation In its simplest form this is seen in the frequent series of months in ancient calendars alternating 29 and 30 days, because the mean month is about 29½ days, hence two months of 30 and 29 days equal two mean months of 29½ days Similarly the year of about 365¼ days, if taken four times, will give the same as three years of 365 days and one of 366, hence the leap year with an intercalary day The surplus of the solar over the lunar year (365 over 354) can be somewhat rectified in three years by adding a month of 33 days This is an intercalary month The development of the calendar was accurate in Mesopotamia but reached a high point in ancient Egypt, with its 12 months of 30 days each and 5 extra days a year and an extra day every four years The calendar now most widely used is an evolution of the Roman calendar In its most primitive form this apparently had 10 months, which were (using the English forms where possible) March (31), April (29), May (31), June (29), Quintilis (31), Sextilis (29), September (29), October (31), November (29), December (29) To fill out the year a blank number of days or occasional intercalary months were used Later, January (29) and February (28) were added to the end of the year In the early republic the year of Numa was used, probably in an effort to harmonize the Roman calendar with the Greek calendars This provided a cycle of four years The first year had four months of 31 days and seven of 29, February having 28, in the second year February had 23 days, and an intercalary month of 27 days was inserted, the third year of the cycle was like the first, the fourth year was intercalary like the second except that February had 24 days The chief trouble with this system was that in a four-year cycle there were four days too many What was worse, the pontifex maximus was given the power (soon after 200 B C) to regulate the calendar, and the practice grew up of using the intercalations for political ends to lengthen or shorten an official's term By the time of Julius CAESAR the calendar had been so abused that January was falling in autumn, and by his authority as pontifex maximus, with the advice of the astronomer Sosigenes, he borrowed from the methods of the Egyptian calendar and added to the year 46 B C 90 days (67 between November and December and 23 at the end of February) This caused the spring of 45 B C to begin in March, to retain the correct position he reformed the length of the months by adding 2 days each to January, to Sextilis (subsequently named August for AUGUSTUS), and to December, giving them 31 days apiece, and one day each to April, June, September, and November, giving them 30 days, February was 28 days long, except that in every fourth year a day was inserted between the 23d and 24th of the month. March, May, Quintilis (subsequently named July for Caesar), and October he left as they were. There is another account given of alterations in the lengths of months to suit Augustus' vanity, but it is probably legendary This reform created the Julian calendar, still in use under a slight modification, made by GREGORY XIII, hence the rectified Julian calendar is called the Gregorian calendar The Julian year is 365 days 6 hr , hence a little too long By the 16th cent the accumulation of the surplus had displaced the vernal equinox to March 11 from the date in the 4th cent. (March 21) Gregory suppressed 10 days in 1582 and ordained that thereafter the years ending in hundreds should not be leap years unless they are divisible by 400 The Gregorian reform was accepted in most Roman Catholic countries, but only gradually by Protestants. The year 1600 was a leap year under both systems, but 1700, 1800, and 1900 were leap years only in the unreformed calendar It was not until 1752, when England was 11 days different from the Continent, that England adopted the reformed calendar. The Gregorian is called the New Style (N S), and the Julian the Old Style (O S.) New Style years begin Jan 1, but Old Style years began usually March 25 Thus Feb 22, 1732 (N S), Washington's birthday, is Feb. 11, 1731 (O.S), since 1732 began March 25 A usual method of writing the date to show this Old Style and New Style variation is 1731/32 or 1731/2 In the Eastern Church the Julian was retained unchanged until the 20th cent , but now the reform has been generally adopted. The technical

name of the Julian intercalary year is bissextile In the Roman computation in the month three days were used to count from the Kalends (first day of the month), the Nones (the seventh day in March, May, July, and October, the fifth in other months), and the Ides (the 15th day in March, May, July, and October, the 13th day in other months) The days were counted before, not after, the Kalends, Nones, or Ides, e g , Jan 10 was the fourth day before the Ides of January, or the fourth of the Ides of January, because the Romans counted inclusively, Jan 25 was the eighth of the Kalends of February, Feb 3 was the third of the Nones of February, and Feb 23 was the seventh of the Kalends of March Now Feb 23 was always the seventh of the Kalends of March, in spite of intercalations, hence in leap year, when a day was inserted between Feb 23 and Feb 24, there were two days counted as the sixth of the Kalends of March The leap year is thus bissextile [Latin,= twice sixth] The ecclesiastical calendar of Christianity is an interesting example of a harmony of several different systems The key to it is the reconciliation of the seven-day week with the Roman calendar The resurrection of Jesus was always reckoned as having taken place on a Sunday (first day of the week), hence its annual memorial (EASTER) should fall on Sunday Since the Jewish Passover is on the evening of the 14th (eve of the 15th) Nisan, it may fall on any day of the week, hence Easter must fall on a Sunday near the 14th Nisan Anciently some Eastern Christians held Easter on the 14th Nisan, these were called *Quartodecimans* [Latin,=fourteenth] In 325 the First Council of Nicæa determined that Easter should fall on the Sunday following the full moon next after the vernal equinox, the full moon being theoretically the 14th day, and Nisan beginning with a new moon in March The vernal equinox was considered by the Church to fall on March 21. The paschal, or Easter, moon is the moon the 14th day of which falls next after (not on) March 21 Today Easter is calculated mathematically according to a system not taking all factors in the lunar period into consideration, hence it nearly always varies somewhat from what it should be according to true astronomical calculation There have been several different systems used for determining Easter, thus, some Eastern churches use a different one from that of the West In the 6th and 7th cent in England there was a great dispute between Christians who derived their rite from the Celts and those who had been converted by the mission of St AUGUSTINE The dispute over Easter arose because the Celts retained a computation for Easter based on a lunar cycle of 84 years, while the Romans had given up the 84-year cycle in the 5th cent for a 532-year cycle The dispute was settled at the Synod of Whitby in favor of the Roman system For a conventional means of computing Easter, see the Book of Common Prayer and other prayer books The Jewish calendar is today an adjustment of a lunar calendar to the solar year The months are Tishri (30), Marheshvan (29 or 30), Kislev (29 or 30), Tebet (29), Sebat or Shebat (30), Adar (29), Nisan (30), Iyar (29), Sivan (30), Tammuz (29), Ab (30), and Elul (29) The intercalary month of 30 days is added after Adar, Nisan being anciently the first month The intercalation is arranged to take place seven times in 19 years The Jewish year begins about the autumnal equinox The Moslem calendar is the only widely used purely lunar calendar, its year varying from 354 to 355 days Hence the seasons and months have no connection, and there are about 33 Moslem years to every 32 of ours The months are Muharram (30), Safar (29), 1st Rabia (30), 2d Rabia (29), 1st Jumada (30), 2d Jumada (29), Rajab (30), Shaban (29), Ramadan (the fast, 30), Shawwal (29), Dhu-l-Kada (30), and Dhu-l-Hijja (month of the pilgrimage, 29 or 30) The Chinese calendar was devised to have six 60-day cycles, each cycle having 10-day periods and three such periods going to make up a month By the 5th cent B C the solar year was calculated at 365 2444 solar days and the solar month at 29 5.3059 days The difference between solar time and the cycles was adjusted by intercalary months and shorter intercalary periods The years were arranged in major cycles of 60 years with minor cycles of 5 years each An interesting calendar is that of the MAYA, who used a year of 365 days divided into 18 20-day periods, with a 5-day period at the end A recurrent series of 20 days was used also, like our week A remarkable feature was that the year was never readjusted to the error in its length, instead, the feasts and dates were adjusted to the calendar The Aztec calendar was very similar Many attempts have been made to devise new calendars, adjusting the months more regularly to the solar year, discarding the week, making the months equal in length, and the like, but they have never been widely adopted The most celebrated is the FRENCH REVOLUTIONARY CALENDAR In the 20th cent the movement toward calendar reform has been strong, the aim being not to abandon but to refine the intercalary system of the Julian-Gregorian calendar. For the method of computing years from a fixed point (e g , the birth of Christ and the hegira), see ERA The adoption of such era systems has made computation of time much easier The Athenian system of identifying years by archons, the Roman system of identifying them by the consuls, and the system used both earlier and later of reckoning by the year of the reign of certain kings offers enormous difficulties, and the establishment of chronology is one of the major problems in ancient and medieval history The classic work on chronology is that of the Benedictines, first published in 1750, *L'Art de vérifier les dates des faits historiques* See M P Nilsson, *Primitive Time Reckoning* (Eng tr , 1920), Reginald L Poole, *Studies in Chronology and History* (1934), P W. Wilson, *The Romance of the Calendar* (1937)

calendering, a finishing process by which paper, rubber, or textiles are smoothed, glazed, polished, or given a *moiré* or embossed surface The material is passed through a series of cylinders, usually of metal or of compressed paper or cotton The resulting surface depends on the pressure exerted by the cylinders, their temperature, composition, and surface designs and the type of coating or glaze previously applied to the material to be calendered

calendula (kulĕn'dūlu), any species of the genus *Calendula*, composite-flowered Old World plants The common calendula, annual, with yellow to deep orange flower heads produced through a long blooming season, was a popular garden flower in Shakspere's time—his marigold The dried florets of this have been used as a coloring and flavoring for foodstuffs, whence the name pot marigold; they have also been long used medicinally

Calera (kulĕr'ŭ), rural town (pop 1,092), central Ala , S of Birmingham, settled in the mid-19th cent It has lime kilns

Calexico (kulĕk'sĭkō), city (pop 5,415), SE Calif , opposite Mexicali, Mexico, S of the Salton Sea; inc 1908 It is a port of entry in the IMPERIAL VALLEY

calf, golden, idol erected by the Israelites on several occasions Aaron made one while Moses was on Mt Sinai Ex 32 Jeroboam placed one at Bethel and another at Dan 1 Kings 12 26–32 Hosea denounced one in Samaria Hosea 8 5,6 The calf (or bull) probably represented God The use of such a cult recalls Apis in Egypt and the Minotaur in Crete

Calgary (kăl'gurē), city (1941 pop 88,904, 1946 pop 100,044), S Alta , on the Bow river and near the foothills of the Rocky Mts Calgary is a wholesale center for a wide region of plains and mountain valleys A provincial normal school and an institute of technology and art are here The city began (1875) as a fort of the Northwest Mounted Police, named after a town in Scotland

Calhoun, John Caldwell (kălʹhōōnʹ), 1782–1850, American statesman and political philosopher, b near Abbeville, S C , grad Yale, 1804 He studied law under Tapping Reeve at Litchfield, Conn , and began (1808) his public career in the South Carolina legislature Frontier born, he acquired a large plantation by marrying (1811) his cousin, Floride Calhoun Later he came to represent the interests of the Southern planter aristocracy A Congressman (1811–17) and acting chairman of the House Committee on Foreign Affairs, Calhoun was one of the leading "war hawks," who whipped up enthusiasm for the War of 1812 He remained a nationalist for some time after the war, speaking for a strong army and navy, for encouragement of manufacturing, for internal improvements, and for a national bank, many of these causes he later opposed Calhoun was an efficient Secretary of War (1817–25) under President James Monroe and was Vice President (1825–29) under John Quincy ADAMS Throughout Adams's administration he opposed the President and supported the measures advocated by Andrew JACKSON An able constitutional lawyer, he made an imposing figure skillfully presiding over the Senate When the Jacksonians finally triumphed in 1828, Calhoun was again elected Vice President, and it was widely assumed that he would succeed Jackson in office But relations between the two men soon cooled Calhoun, largely prodded by his wife, and his supporters offended the President in the Eaton affair (see O'NEILL, MARGARET) The NULLIFICATION issue further irritated Jackson, who finally became furious when he discovered that years before Calhoun had privately denounced Jackson's conduct in Florida while publicly giving the impression that he had supported the general Primarily, however, Jackson and Calhoun had come to disagree on the nature of the Union As the preeminent spokesman for the South, Calhoun tried to reconcile the preservation of the Union with the fact that under the Union the South's dominant agricultural economy was being neglected and even injured at the expense of the ever-increasing commercial and industrial power of the North When a still higher tariff replaced (1832) the Tariff of Abominations of 1828, Calhoun maintained that the Constitution, rightly interpreted, gave a state the power to nullify Federal legislation inimical to its interests He returned to South Carolina, had a state convention called, and directed the passage of the famous ordinance of nullification. In Dec , 1832, he quit the vice presidency after being elected to the Senate and there eloquently defended his STATES' RIGHTS principles in dramatic debates with Daniel WEBSTER The firmness of Andrew Jackson and the compromise tariff proposed by Henry CLAY resolved the nullification crisis in 1833, but the larger issue of states' rights persisted, leading ultimately to SECESSION and the Civil War Meanwhile, Martin VAN BUREN, Calhoun's bitter political enemy, held the vice presidency in Jackson's second term and went on to succeed Jackson in the office Calhoun had long coveted As the abolitionists grew stronger in the North, Calhoun became an outspoken apologist for slavery and bent every effort to maintain the delicate balance between North and South in the Senate by opposing the prohibition of slavery in newly admitted states Thus serving briefly (1844–45) as Secretary of State under John Tyler, he completed negotiations for the admission of Texas as a slave state, but later tried to avert war with Mexico Again (1845–50) in the Senate, he advocated compromise in the Oregon boundary dispute but opposed the admission of California as a free state in the debates over the COMPROMISE OF 1850 In rejecting the WILMOT PROVISO, Calhoun set forth the theory that all territories were held in common by the states and that the Federal government merely served as a trustee of the lands His *Disquisition on Government* and *Discourse on the Constitution and Government of the United States*, both published posthumously, crystallized his political philosophy The Constitution, he stated, established a government of concurrent majorities composed of two elements —the state governments and the Federal government Hence the states enjoy the power of veto, or nullification, and the right of secession results necessarily from the origin of the Union as a compact among the sovereign parties His theories attempted to formulate democracy in terms of protection for a minority, specifically, the South, and they were later embodied in the Confederate constitution Because they are associated with an institution—slavery—offensive to the idealism of most Americans, Calhoun has never been a popular figure in U S history He was, however, the intellectual giant of political life in his day, and although many of his contemporaries found him arrogant and overbearing, he was not lacking in warm, human qualities Calhoun's plantation, with his house, Fort Hill, is now the campus of Clemson (S C) Agricultural College See his works (ed by R K Crallé, 6 vols , 1851–55), C M Wiltse, *John C Calhoun Nationalist, 1782–1828* (1944) and *John C Calhoun Nullifier, 1829–1839* (1949), Margaret L Coit, *John C Calhoun American Portrait* (1950)

Calhoun, city (pop 2,955), co seat of Gordon co , NW Ga , NNW of Atlanta, on the Oostanaula river, inc 1852 It was destroyed by General Sherman in the Civil War Near by is a bronze statue of Sequoyah, near the site of New Echota, once the capital of the Cherokee

Calhoun City, rail and lumber town (pop 1,171), N central Miss , NW of Columbus, inc 1905

Calhoun Falls, textile-mill town (pop 1,832), W S C , near the Savannah S of Anderson

Cali (kaʹlē), city (pop 88,366), W Colombia Founded by Benalcázar in 1536 in the upper Cauca valley, Cali (alt c 3,200 ft) has become the commercial center of the entire region A railroad connects it with BUENAVENTURA, rail lines and highways tie it with the cities of the cordilleras to the northeast and with Quito (Ecuador) to the south It ships out livestock, minerals, lumber, and farm products In the revolution against Spain, Cali was patriot in sympathy and was of some prominence

Caliari, Paolo see VERONESE, PAOLO

calico The cotton cloth of India was mentioned by historians before the Christian era and praised by early travelers for its fine texture and beautiful colors Block-printed cottons from Calicut imported into England c 1630 were called calicuts The name calico was soon applied to all Oriental cottons having an equal number of warp and weft threads, then to all plain-weave cottons In the United States the term is now applied specifically to narrow-width, inferior cottons mainly used for house dresses and aprons

calico printing, general term including the various processes by which fabrics are printed in colored designs Although the time and place of origin are uncertain, examples of Egyptian block-printed fabrics of the 10th cent B C and of Javanese batik of c 1200 B C are extant India exported block prints to the Mediterranean region in the 5th cent B C , and Indian CHINTZ was imported into Europe during the Renaissance and widely imitated France became a leading center and was noted especially for her *toile de Jouy* manufactured at Jouy from 1760 to 1811 Early forms of calico printing are stencil work, highly developed by Japanese artists and much used today on sisal and kraft fiber rugs, and block printing In this method a block of wood, copper, or other material bearing a design in intaglio with the dye paste applied to the surface is pressed on the fabric and struck with a mallet A separate block is used for each color, and pitch

pins at the corners guide the placing of the blocks to assure accurate repeating of the pattern The process is still employed where freedom of expression and avoidance of mechanical perfection are desirable In cylinder or roller printing, invented in 1785 by Thomas Bell of Lancaster, the fabric is carried on a rotating central cylinder and pressed by one to 16 rollers each bearing one color The design is engraved on the copper rollers by hand or machine pressure or etched by pantograph or photoengraving methods, and the color paste is applied through feed rollers rotating in a color box to the copper rollers, from the smooth portion of which the color is scraped off with knives Modern machines turn out as much as 100 yd per minute New printing processes include screen printing, a hand method especially suitable for large patterns with soft outlines, in which screens, one for each color, are placed on the fabric and the color paste pressed through by a wooden squeegee, spray printing, in which a spray gun forces the color through a screen, and electrocoating, used to apply a patterned pile Color may be applied by the various processes directly, by the discharge method, which uses chemicals to destroy a portion of a previously dyed ground, or by the resist, or reserve, method, which prevents the development of a subsequently applied color to a portion of the fabric treated with a chemical or with a mechanical resist such as the wax used for BATIK See Zelma Bendure and Gladys Pfeiffer, *America's Fabrics* (1947)

Calicut (kă'lĭkŭt", -kŭt), city (pop 126,352), W Madras state, India, a port on the Arabian Sea It was (1498) Vasco de Gama's first Indian port of call Mysore ceded it to Great Britain in 1792 Pepper, timber, and rubber are exported The term *calico* was first applied to Calicut cotton cloth, which is still an important manufacture

California (kălĭfôr'nyu), state (156,803 sq mi , 1940 pop 6,907,387, 1949 estimated pop 10,665,000), W United States, admitted 1850 as the 31st state (a free state) The capital is SACRAMENTO The largest cities and major seaports are LOS ANGELES, SAN FRANCISCO, OAKLAND, and SAN DIEGO California is bounded on the north by Oregon, on the east by Nevada and Arizona, from which it is separated by the Colorado river, on the south by Mexico, and on the west by the Pacific Ocean Second largest of the states, it has diversified topography and climate Along the 1,300-mile coast extends a series of low mountains known loosely as the Coast Range, a region which from San Francisco south is subject to tremors and sometimes to severe earthquakes caused by the San Andreas fault Receiving heavy rainfall in the north, where the giant cathedral-like redwood forests prevail, the Coast Range is considerably drier in S California, and S of the Golden Gate no major rivers reach the ocean Behind the coastal ranges lie the long alluvial valleys of central California, the Central Valley, meaning properly the area drained by the Sacramento and San Joaquin rivers, is sometimes used to mean all the intermontane region In the south lie vast wastes, notably the MOJAVE DESERT Rising as an almost impenetrable granite barrier E of the Central Valley and S of the Cascade Range in the northeast is the SIERRA NEVADA range, within which are Mt Whitney, SEQUOIA NATIONAL PARK, and YOSEMITE NATIONAL PARK East of the S Sierra Nevada is DEATH VALLEY NATIONAL MONUMENT The coastal region, with a dense but relatively backward native population and no immediate lure of gold, did not attract the conquistadors The first voyage to Alta California [Upper California], as the region N of Baja California [Lower California] came to be known, was that commanded by Juan Rodríguez CABRILLO in 1542 His report stirred little interest, but the voyage of Sir Francis Drake in 1579 forced the Spanish crown to take notice of the British threat to its claim Still, it was not until 1602 that another voyage, under Sebastián VIZCAÍNO, was made More than 160 years later the encroachments of England and Russia stirred up Spanish colonizing expeditions, the first that of Gaspar de PORTOLÁ in 1769 Portolá reached San Francisco Bay There a presidio was built (1776) after the coming of Juan Bautista de ANZA Already Father Junípero SERRA and other Franciscans had founded a string of missions, some of these are today historic shrines The early colonists, called the Californios, lived a fairly easy, pastoral life They were not much molested by the central government of New Spain and later of Mexico, but they did indulge in strenuous local politics and in quarrels with the governors (see ALVARADO, JUAN BAUTISTA) Many of the Indians were gathered about the missions, but these were broken up under the Mexican republic, and degradation of the Indians began, culminating, after the Americans came, in the abuses pictured by Helen Hunt Jackson in her novel *Ramona* The Californians offered little opposition to the infiltration of the early Yankee traders or the penetration of the Russians as far south as Fort Ross (1812), though official disapproval of the foreigners did develop after Jedediah S. Smith and other fur traders penetrated California from the east More settlers came across the mountains to join the Yankees who had already come from the coast Outstanding was John Augustus SUTTER, who on a vast tract in the Sacramento valley established his "kingdom" of New Helvetia He did much for the overland American immigrants, who began to arrive in large numbers in 1841 Events moved swiftly in the next few years After briefly asserting the independence of California in 1836, the Californios drove out the last Mexican governor in 1845 Under the influence of John C FRÉMONT the Americans set up (1846) a republic at Sonoma under the Bear Flag The news of war between the United States and Mexico reached California soon afterward On July 7 Commodore John D Sloat captured Monterey, the capital, and claimed California for the United States, in 1847 Stephen W Kearny defeated the Californios in the south By the treaty of Guadalupe Hidalgo (1848) Mexico formally ceded the territory The most significant event in California history occurred also in that year while establishing a sawmill for Sutter near Coloma, James W Marshall discovered gold and touched off the California gold rush The forty-niners came in droves, a few met success, a few like the DONNER PARTY found suffering and tragedy The fabulous riches of the MOTHER LODE brought to the roaring camps such writers as Bret Harte and Mark Twain San Francisco grew fast as a boom city, and its roisterous and lawless Barbary Coast caused the rise of the VIGILANTES In 1849 the battle for statehood was begun, and after heated debate California came into the Union by the COMPROMISE OF 1850 By 1854 the great bonanza had slackened, and the economy of the new state was shakily founded as the first transcontinental railroad was completed to tie California firmly to the Atlantic seaboard Chinese were brought in for the railroad work, and later, under the Burlingame Treaty, became much more numerous They and the Japanese became a conspicuous part of the California population. Considerable opposition to the Orientals led to the acts for Chinese exclusion and to much friction A new wave of overland immigrants began with the railroad-rate war of 1884, and in 1885 promoters fostered a boom in real estate After another collapse, the economy took root again, and in the first decade of the 20th cent another influx of people was attracted by the development of petroleum, citrus fruits, hydroelectric power, and industrial expansion Successive waves of immigration came—settlers brought by the real-estate boom of the 1920s, the Dust Bowl emigrants (1936-38) whose aimless wandering as migratory workers caused profound dislocation in the economy, and well over 1,000,000 warworkers and service personnel in the Second World War (many of them later settlers) The agricultural and industrial economy, the resources, the water supply, and transportation, public utilities, and educational facilities could not be developed at a pace to keep up with the staggering increase of inhabitants The basic industry is still farming, most of the produce is from small farms, but the characteristic of California agriculture is the big-business handling, mostly through cooperative associations, of the fruits, grains, wine, nuts, dairy products, and truck The labor of gathering and packing the produce is done to a large extent by the seasonal migrant farm worker, and one of the major California social problems is improvement of his condition Much of the state's manufacturing depends upon the processing of the farm produce (milling, canning, and packing) and some depends on other natural resources—petroleum, metals, borax, quarries, and forests In recent years more diversified and heavier industry has increased astoundingly—notably in metalwork, aircraft, machinery, and textiles In the manufacture of moving pictures California leads the world Most acute of the state's problems is the need for, and control of, water supply The once fertile Owens valley is now arid, its waters tapped by Los Angeles 175 mi away, and water is brought to the coast from the Colorado river 200 mi across the Mojave In the IMPERIAL VALLEY, irrigation is controlled by the All-American Canal, also drawing water from the Colorado Far to the north in the Central Valley the problem is not one of too little water but of bad distribution—an imbalance being lessened by the vast CENTRAL VALLEY PROJECT The state flourished after the Second World War, and the most important item in the consideration of the economy and welfare remained the continuing abnormal increase in population California has a great many institutions of higher learning Among the more prominent are the Univ of California at Berkeley and the Univ of California at Los Angeles, the Univ of Southern California, Stanford Univ , the California Institute of Technology, Mills College, and Claremont College See C E Chapman, *History of California the Spanish Period* (1921), and R G Cleland, *History of California. the American Period* (1922), Cleland, *From Wilderness to Empire* (1944) and *California in Our Time, 1900-1940* (1947), Federal Writers Project, *California. a Guide to the Golden State* (1939).

California. **1** City (pop 2,525), co seat of Monteau co , central Mo , WNW of Jefferson City, founded 1845, inc. 1857. Stock, dairy, and grain farms are in the area **2** Borough (pop. 2,614), SW Pa., S of Pittsburgh, laid out c 1850, inc c 1863 A state teachers college is here.

California, Gulf of, arm of the Pacific, c 700 mi long and c 100 mi wide, NW Mexico It separates the peninsula of Lower California on the west from Sonora and Sinaloa on the east The Colorado river flows in at the head of the gulf, and several large rivers empty into it from W Mexico Because the gulf has the largest tidal bore in the Pacific and the winds are tricky, exploration and shipping have been risky Among early adventurers in the dangerous waters were Francisco de ULLOA and Hernando de Alarcón Pearl fishing is important on the shores, and the gulf has some of the finest deep-sea fishing in NE Pacific coastal waters

California, Lower. see LOWER CALIFORNIA

California, University of, mainly at Berkeley and Los Angeles, with branches at San Francisco and elsewhere, land-grant and state supported, coeducational It was chartered in 1868 and opened in 1869 as successor to the private College of California The Univ of California at Los Angeles, founded in 1881 as a normal school, was incorporated in 1919 At various sites are colleges of applied arts, agriculture, business administration, chemistry, commerce, dentistry, engineering, law (Hastings), letters and science, mining, and pharmacy, schools of architecture, education, jurisprudence, librarianship, nursing, medicine (with a hospital and Hooper Foundation), and veterinary medicine, and curriculums in optometry, public health, and social service The California School of Fine Arts at San Francisco is affiliated The agricultural college has forestry work, an agricultural economics foundation, a school of tropical agriculture, and an institute of animal husbandry There are bureaus of governmental research, international relations, and public administration, institutes of biology, child welfare, and social sciences, museums of anthropology, paleontology, and vertebrate zoology, a herbarium, valuable art collections, a large film library, a university press, a U S Bureau of Mines experiment station, Lick Observatory, and Scripps Institution of Oceanography The libraries have notable collections in art, English, French, and German literature, Jewish history, Oriental documents, Spanish and Western American history (see BANCROFT, HUBERT H), and viticulture

California Institute of Technology, at Pasadena, nonsectarian, for men, chartered and opened 1891 by Amos G Throop as Throop Polytechnic Institute, called Throop College of Technology 1913-20 A technical school of university grade, it emphasizes research and has divisions of engineering, humanities, industrial design, and science It uses the residential college plan A marine biological laboratory is near by The astrophysics department, with Mt Palomar Observatory, cooperates with Mt Wilson Observatory Arthur A Noyes and Robert A Millikan helped to establish the reputation of the school

California Joe, 1829-76, American frontiersman and scout, whose real name was Moses Embree Milner, b Stanford, Ky He went to California in the gold rush, later moving into the Oregon country He was a sharpshooter during the Civil War, after which he became a scout in the Indian campaigns, serving under George A Custer and Philip H Sheridan, both of whom commended him in reports Custer once appointed him chief of scouts, but California Joe got so drunk within a few hours that he had to be demoted In 1875 he guided the government expedition led by W P Jenny to investigate the mineral resources of the Black Hills He was shot in a private quarrel See J E. Milner and E. R Forrest, *California Joe* (1935)

California laurel, beautiful evergreen tree (*Umbellularia californica*) native to the moister regions of California, where it is very abundant It has fragrant flowers, pungent and aromatic leaves, and an aromatic and volatile essential oil The thin-shelled and nearly spherical kernels of the fruit were used generally by the Indians for food—either raw or roasted and eaten with clover The leaves were used medicinally in various ways and for flavoring soups and puddings The wood is employed in boatbuilding, etc , and branches are sometimes used for warding off insects— as in chicken houses, where the poles are said to keep away fleas Other names for this tree are California bay, pepperwood, and Oregon myrtle

California poppy or **eschscholtzia** (ĕsh-shōl'tsēu) [for J F von Eschscholtz], perennial wild flower (*Eschscholtzia californica*) of the West Coast, cultivated elsewhere usually as an annual and naturalized in parts of the Old World The finely cut gray-green leaves have been used medicinally and were cooked for greens by the Indians The blossom, commonly yellow and similar to the related poppy, is the state flower of California Other plants, particularly of the same genus, are also called California poppy

Caligula (kŭlĭg'yōōlu), A D 12-A D 41, Roman emperor (A D. 37-A D 41) His real name was Caius Caesar Germanicus, and he was the son of GERMANICUS and AGRIPPINA When he was a small child with his parents on the Rhine he wore mili-

tary boots, whence his nickname [*caligula*=little boots] After the death of his brother, Drusus, he and Tiberius' grandson, Tiberius Gemellus, were the heirs apparent On the death of TIBERIUS the army helped make Caligula emperor He had a severe illness, and there is a widely accepted belief that he was thereafter insane At any rate he earned a name for ruthless and cruel autocracy Torture and execution were the order of the day One story has it that he said he regretted that all the people had not one neck, which he could sever with a single blow He is also reported to have made his horse a consul and a member of a priestly college The nightmare of his reign ended when the tribune of a Praetorian cohort, Chaerea, assassinated him CLAUDIUS I succeeded

Calpatria (kălpāt'rēu), city (pop 1,799), SE Calif, SE of the Salton Sea in the IMPERIAL VALLEY, inc 1919

caliphate (kā'lĭfāt", -ĭt), the headship of ISLAM Islam is, theoretically, a theocracy, and its caliph the vicegerent of God When Mohammed the Prophet died, a caliph [Arabic, =successor] was chosen to rule in his place This was ABU BAKR He was succeeded by OMAR, OTHMAN, and ALI These are the Orthodox caliphs After Ali's death there was a division in Islam The members of the OMAYYAD dynasty became caliphs, chiefly by force of arms Their capital was Damascus But the SHIITE sect continued to recognize the descendants of Ali and in 750 won the caliphate for them, massacring the members of the Omayyad family These caliphs were of the ABBASID family Their caliphate is sometimes called the Caliphate of Baghdad One Omayyad escaped the general massacre of his family and fled to Spain, there the emirate of Córdoba was set up in 780 This later became the Caliphate of Córdoba or the Western Caliphate and persisted until 1031 A third contemporaneous caliphate was established by the Fatimites (see FATIMITE) in Africa and lasted from 909 to 1171 After the fall of Baghdad to the Mongols in 1258, the Abbasids fled to Egypt From this date the caliphate was virtually ended, since the Abbasids in Egypt had not the slightest power The Ottomans captured Egypt in 1517, Selim I assumed the title of caliph (by a very flimsy right) The Ottoman sultans then kept the title until the last, Mohammed VI, was deposed Briefly he was succeeded by a cousin, but in 1924 the caliphate was abolished altogether See Sir William Muir, *The Caliphate* (2d ed, 1915), Alfred von Kremer, *Orient under the Caliphs* (Eng tr, 1920), T W Arnold, *The Caliphate* (1924), Philip K Hitti, *History of the Arabs* (3d ed, 1943)

Calippus of Cyzicus see CALLIPPUS OF CYZICUS

calisthenics see GYMNASTICS

Calistoga (kălstō'gu), city (pop 1,124), W Calif, at the head of the Napa valley N of San Francisco, laid out 1859 by Samuel Brannan, inc as a town 1886, as a city 1937 Grapes, prunes, and walnuts are grown in the area The city is a health resort with hot mineral springs and geysers near Mt St Helena and a petrified redwood forest are also near by

Calixtines see UTRAQUISTS

Calixtus I, Callixtus I (both kulĭk'stus), or **Callistus I, Saint** (kull'stus), c 160–c 222, pope (c 217–c 222), a Roman, successor of St Zephyrinus and predecessor of St Urban I As archdeacon to Zephyrinus he established the famous Calixtus Cemetery, where all the popes of the 3d cent except Calixtus himself are buried His election to the papacy was opposed by HIPPOLYTUS (later antipope), who accused him of monarchianism and of laxness in disciplining repentant sinners The decree of Calixtus on penance, which completely rejected Montanism, clarified the doctrine of absolution for his successors Calixtus died in the reign of Alexander Severus and is accounted a martyr Feast Oct 14

Calixtus II, Callixtus II, or **Callistus II,** d 1124, pope (1119–24), a Burgundian named Guy, successor of GELASIUS II and predecessor of HONORIUS II He was made archbishop of Vienne (1088), and he convened at Vienne a synod (1112) to excommunicate the emperor HENRY V for his treatment of PASCHAL II in the INVESTITURE controversy To oppose Gelasius, Henry raised up an antipope, Gregory VIII Calixtus, going to Rome after his election as pope, captured and imprisoned Gregory He came to agreement with Henry in the Concordat of Worms (1122, see WORMS, CONCORDAT OF) In 1123 Calixtus convoked the First LATERAN COUNCIL (ecumenical), which confirmed the concordat

Calixtus III, Callixtus III, or **Callistus III,** 1378–1458, pope (1455–58), a Spaniard (b Játiva) named Alonso de Borja (Ital *Alfonso Borgia*), successor of Nicholas V and predecessor of Pius II He acted as arbitrator between his friend Alfonso V of Aragon and the papacy, and for this he received the red hat (1444) Calixtus was elected soon after the fall of Constantinople, and he promptly proclaimed a crusade against the Turks He spared nothing to aid John HUNYADI, who won a victory with St JOHN CAPISTRAN at Belgrade (1456) In 1457 Calixtus turned to SCANDERBEG, in Albania, sent him money, and named him captain general of the crusade Calixtus' reign was embittered by a quarrel with Alfonso, who expected returns, notably the march of Ancona, for his friendship The pope would not give away church lands and resented Alfonso's failure to help the crusade Calixtus' nepotism gave the Borgia family its position in Italy Calixtus was, like other Borgias, an able administrator

Calixtus, Georgius (jôr'jĕus), 1586–1656, German theologian, whose original name was Georg Callisen He extended the influence of MELANCHTHON, advocating syncretism, he sought a basis, such as the Apostles' Creed, for uniting Christian churches Because he tended to minimize the differences in doctrine and to emphasize the importance of Christian living, he was charged by some of the Lutherans with favoring Roman Catholic dogmas and by others with pro-Calvinism He failed to win the Lutherans to his support at the Conference of Thorn (1645)

Call, Richard Keith, 1791–1862, territorial governor of Florida (1836–39, 1841–44), b Prince George co, Va He moved to Kentucky as a youth and served with Andrew Jackson at Pensacola and New Orleans in the War of 1812 Resigning from the army in 1821, he studied law, began practice in Pensacola, and in 1823 was sent to Congress as territorial delegate In his first term as governor Call led the campaign against the SEMINOLE INDIANS, commanding at the battles of Wahoo Swamp in Nov, 1836 A dispute with the War Dept led to his being superseded in command and to his losing the governorship He then turned Whig and, aiding greatly in the election of W H Harrison, was rewarded by being appointed governor again Call was a leader in the movement for statehood, but was defeated for the governorship in 1845 Although a slaveholder he bitterly opposed secession

call In banking, "call money" is money deposited with a bank or loaned by it and, in either case, returnable when called for With reference to stocks, call money may be an installment of capital for a new concern whose stock has not yet been fully paid up or may be capital for an old concern to cover part of a new issue of shares Call money may also be a contribution by the shareholders demanded by the person who is liquidating a concern or an option to buy certain stocks at a certain price at a certain date In this latter sense a "call" is a contract by which one person promises to buy these stocks, while a "put" is a similar promise to sell A "straddle" or "spread eagle" is a combined option of both calling and putting Financial call loans are made for an undefined period and are returnable on the demand of the lender To secure such loans, collateral is usually required Most of such loans are made to brokers to enable them to pay for stock which they have bought on margin for customers Domestic banks use call money for secondary reserves, foreign banks for the employment of international balances, and corporations for investing surplus cash Thus to a lender call money is a way of employing funds temporarily idle, while still having the money available for other uses, to a borrower it is a way of adjusting his indebtedness to the daily fluctuations in his needs for funds New York is the largest call-money market See R N Owens and C O Hardy, *Interest Rates and Stock Speculation* (1925)

calla (kăl'u), any plant of the genus *Zantedeschia*, South African tender perennials of the arum family The small true flowers are enclosed in a showy spathe —white in the common calla or calla lily, yellow or pink in others The **wild calla** or water arum (*Calla palustris*) is a perennial of bogs in the North Temperate Zone It resembles a small calla lily and belongs to the same family

Callao (kīyou'), port, W Peru, just W of Lima It is a department in itself (14 sq mi, pop 84,434) One of the best Pacific anchorages in South America, it became a port when Francisco Pizarro founded Lima Natural protection from prevailing southwesterly winds and waves is afforded by an island and small peninsula, modern dock facilities are sheltered by breakwaters The key to Lima, Callao has frequently been attacked from the time of the buccaneers, including Sir Francis Drake, through the revolution against Spain, to later foreign wars It was severely damaged by earthquake in 1940

Calleja del Rey, Félix María (fā'lēks mārē'ä kälyä'hä dĕl rā'), 1750–1828?, Spanish general, viceroy of New Spain (1813–16), conde de Calderón In command of the post of San Luis Potosí when the revolution under HIDALGO Y COSTILLA broke out, he led a large force into the field and defeated Hidalgo at Aculco and at Calderón Bridge and besieged MORELOS Y PAVÓN in Cuautla (1812) As viceroy Calleja continued to repress revolution, and when he left Mexico most of the insurrectionists were defeated After his return to Spain he held several high posts

Calles, Plutarco Elías (plōō'tär'kō älē'äs kä'yäs), 1877–1945, Mexican statesman, president (1924–28) One of the outstanding figures in Mexico after the revolution of 1910, he emerged in 1913 from the obscurity of schoolteaching to fight with Álvaro OBREGÓN and Venustiano CARRANZA against Victoriano HUERTA In 1920 he joined Obregón and Adolfo de la HUERTA in the revolution that overthrew Carranza Calles, as minister of government under Obregón, displayed ability and great force of character and was chosen as the presidential nominee of the administration Adolfo de la Huerta, disgruntled, revolted (Dec, 1923), but in the spring of 1924 Obregón and Calles established their supremacy by force Calles became president His administration was firm, and revolutionary reforms were advanced apace Agrarian reform was prosecuted with vigor The organization of labor was encouraged and fostered The spread of education was given special attention Material improvements and public works, such as irrigation projects and roads, were undertaken The struggle between Church and state reached a new extreme of bitterness, culminating in open warfare in 1926–27 Land and petroleum legislation caused a serious dispute with the United States, but relations between the two countries improved greatly when Dwight W MORROW was appointed ambassador and the oil question was temporarily settled Calles, even before he became president, had commenced to create a national army and to destroy the private armies that menaced internal peace Above all, his contribution to the revolution was the establishment of order, not only in unifying the government and defining the objectives to be gained, but also in molding the National Revolutionary party into the dominant force of Mexican politics Obregón was reelected to succeed Calles but was assassinated before taking office, and PORTES GIL was chosen provisional president Calles announced his intention of permanent retirement but later returned to public affairs at various times With the passing years, as the poor schoolteacher developed into the landowner and financier, he lost more and more his radical tinge The administrations of Portes Gil, ORTIZ RUBIO, and Abelardo RODRIGUEZ were increasingly conservative, and Calles, as the champion of conservatism, supported them and openly opposed the radical policies of LÁZARO CÁRDENAS in 1935 but was defeated in the contest and in 1936 was exiled He was allowed to return under an amnesty in 1941

Calleva Atrebatum see SILCHESTER, England

Callias (kă'lēus), fl 449 B C, Athenian statesman He was sent to Susa to negotiate for peace (449 B C The result of his work was an agreement usually called the Peace or Treaty of Callias, by it ARTAXERXES I agreed to respect the independence of the Delian League and its members and to send no warships into Greek waters, in return Athens agreed not to interfere with Persian "influence" in Asia Minor and Cyprus Some doubt has been cast on the historicity of this treaty If it did exist, it was one of the most fortunate arrangements ever made by a Greek city, for peace between the Great King and the cities of Greece lasted until the end of the century According to ancient historians, when Callias returned to Athens, he was fined 50 talents for betraying the city

Callias, d c 370 B C, Athenian leader, one of the generals of the Peloponnesian War He was one of the ambassadors sent to Sparta to arrive at a peace treaty in 371 B C The resultant treaty is sometimes called the Treaty of Callias or Peace of Callias It was ineffective because trouble between EPAMINONDAS of Thebes and AGESILAUS II of Sparta became acute Callistratus was Callias' colleague

Callicrates (kullĭ'krutēz), 5th cent B C, Greek architect In association with Ictinus he built the Parthenon at Athens (447–432 B C) At Athens also he designed the Temple of the Wingless Victory (438 B C)

Callimachus (kullĭm'ukus), 2d half of 5th cent B C, Greek sculptor of Athens, disciple of Calamis He was famous as the maker of the gold lamp in the Erechtheum He reputedly originated the Corinthian capital and invented the running drill used for simulating the folds of drapery in marble

Callimachus, b 330? B C, Hellenistic Greek poet and critic, b Cyrene He was educated at Athens and taught school at Eleusis, a suburb of Alexandria, before obtaining work in the Alexandrian library He drew up a catalogue, with such copious notes that it was a full literary history He also wrote criticism and other works in prose, but is most notable as a poet His works were extraordinarily numerous, it is said that he wrote more than 800 Of these six hymns (meant only for reading, with no religious use), a number of epigrams, and fragments of other poems survive His greatest work was the *Aetia*, a collection of legends strung together Other longer poems of which fragments survive are *The Lock of Berenice*, *Hecale*, and *Tambi* His poetry is notable for polish, wit, learning, and inventiveness in form His literary quarrel with his former pupil, Apollonius of Rhodes, is famous

Callinus (kŭlī'nŭs), fl 7th cent B C, Greek poet He is the earliest of known elegiac poets An excerpt from a patriot exhortation to his fellow Ephesians survives

Calliope (kullī'ōpē) [Gr, =beautiful of voice], in Greek mythology, greatest of the MUSES, patron of epic poetry and eloquence. She was the mother of ORPHEUS by APOLLO

calliope (kulĭ'ŭpē, kă'lēōp; of the Muse's name), in music, an instrument sometimes called steam organ or steam piano in which steam is forced through a series of whistles controlled by a keyboard It is usually played mechanically, and its harsh music is a familiar accompaniment of circus parades

calliopsis· see COREOPSIS

Callippus of Cyzicus (sĭ'zĭkus), fl c 330 B C , Greek astronomer For the Metonic cycle (19 years) he substituted a cycle of 76 years, known as the Callippic cycle, formed by quadrupling the Metonic cycle and subtracting one day His name is also spelled Calippus

Callirrhoë (kulĭr'ŏē), in Greek legend, daughter of ACHELOUS and wife of ALCMAEON She wanted the robe and necklace of HARMONIA, and in trying to obtain these treasures her husband was killed

Callisthenes (kălĭs'thĭnēz), c 360 B C –c 328 B C , Greek historian of Olynthus, relative of Aristotle He accompanied ALEXANDER THE GREAT into Asia, but, having become one of his principal critics for the Orientalizing manners of the court, he was suspected of complicity in a conspiracy against Alexander and put to death. His histories of contemporary affairs in Greece are lost Callisthenes' fame rests largely on a work of much later date that was attributed to him It was the standard biography of Alexander in medieval times.

Callisto (kulĭ'stō), in Greek legend, an attendant of Artemis. She bore a son, Arcas, to Zeus She was transformed into a bear, either by Artemis as punishment for her unchastity or by Hera out of jealousy Arcas was out hunting and about to kill her when Zeus intervened and transferred them both to the heavens, Callisto becoming Ursa Major [great bear] and Arcas becoming Arcturus

Callistratus (kulĭ'strutus), d c 360 B C , Athenian statesman and orator Believing Thebes to be more dangerous to Athens than Sparta, he favored a peace with Sparta He and CALLIAS were the delegates who negotiated an ineffective peace. His failure to check Thebes led to his impeachment in 366 B C , but his brilliant defense saved him—an oration that is supposed to have inspired Demosthenes to study rhetoric Later with new failure he fled Athens and was condemned in his absence for having urged Athens to allow Thebes to occupy Oropus When he returned, he was put to death

Callistus· see CALIXTUS.

Callixtus: see CALIXTUS

Calloc'h, Jean Pierre (zhäʼ pyĕr' kălôkhʼ), 1888–1917, Breton poet, a native of Groix, small island of fishermen S of Lorient He was killed in action in the First World War His poetry and literary prose (in Breton of the Vannes dialect) reveal a peculiar association of innocent simplicity with a sense of artistic form. His foremost idea is of Brittany revived, but his burning piety is never far away The love of the sea and the fascination of death are strong forces in the poetry of Calloc'h, regarded by some as Brittany's finest poet His poems, collected posthumously, have been translated into French and studied by L. Palaux

Callot, Jacques (zhäk' kălōʼ), 1592–1635, French engraver and etcher, b Nancy At the age of 12 he was already drawing and he attempted to run away to Italy At 16 he was permitted to go to Rome, where he studied engraving Soon, however, he abandoned this technique for the more rapid and congenial process of etching, at which he became a master He was the first etcher to use hard grounds, a technique still much favored For some years he was in the service of Cosimo II de' Medici in Florence On Cosimo's death he returned to Nancy and under the patronage of the ducal court achieved a wide reputation He was commissioned by the Infanta Isabella of Brussels to engrave the siege of Rochelle and the island of Ré Famous also are his series *Vues of Paris* executed for Louis XIII Too independent for court favor and deeply impressed by the scenes of carnage he had witnessed in the service of the great, he retired to Nancy, where he produced his splendid series *Misères of War*. Callot produced over 1,500 plates, the best of which are etchings He was unsurpassed in his ability to group a large number of people in a small space, giving life and character to each. See study by Édouard Méaume (1860, in French)

Calmar, Sweden· see KALMAR

Calmet, Augustin (ôgüstăʼ kälmāʼ), 1672–1757, French biblical scholar, a Benedictine abbot at Nancy and Senones. His critical commentaries were much studied until the higher criticism changed the technique of biblical criticism in the 19th cent He also wrote a valuable history of Lorraine

Calmette, Léon Charles Albert (lāōʼ shärl' ălbĕr' kälmĕtʼ), 1863–1933, French physician and bacteriologist He was founder and director of the Pasteur institutes at Saigon and at Lille From 1917 he was affiliated with the Pasteur Institute in Paris He discovered a serum for snake bite, studied bubonic plague at Oporto, and with Alphonse Guérin introduced a vaccine (B-C-G) which is a preventive for tuberculosis. He wrote *Recherches expérimentales sur la tuberculose* (1907–14), *Tuberculose chez l'homme et chez les animaux* (1920, Eng. tr., 1923), and *La Vaccination preventive . par le BCG* (1927)

Calneh (kălʼnē) **1** Place, perhaps in lower Mesopotamia Gen 10 10 **2** Unidentified city, named with places of N Syria. Amos 6 2 This is perhaps the same as **Calno** (kălʼnō), named with Carchemish Isa 10 9 Some identify it with Canneh

calomel (kăʼlumĕl", –mūl), white crystalline substance or powder Chemically it is mercurous chloride, a compound of mercury and chlorine having one atom of each element in its molecule It is used in medicine as a purgative and in the elimination of parasitic worms It has a stimulating effect upon organs which yield secretions (e g , the liver) It is usually prepared by sublimation from a mixture of mercury, mercuric sulphate, and common salt or by heating a mixture of mercury and the extremely poisonous corrosive sublimate (bichloride of mercury) Calomel gradually reverts to the poisonous sublimate upon exposure to sunlight

Calonne, Charles Alexandre de (shärl' ălĕksăʼdrù du kălōnʼ), 1734–1802, French statesman, controller general of finances (1783–87) Faced with a huge public debt and with a steadily deteriorating financial situation, Calonne adopted a spending policy to inspire the confidence needed to obtain new loans A short prosperity was followed by a ruinous collapse The only escape seemed to lie in a revision of taxes and the end of the privileges of the nobles and clergy Calonne had King Louis XVI call an Assembly of Notables with this end in view, but the Assembly (1787) refused to consider his proposals and criticized him bitterly Dismissed and replaced by LOMÉNIE DE BRIENNE, Calonne fled to England (1787), where he stayed until 1802 Many of Calonne's official papers have been published and two general works on politics have been translated into English, *Considerations on the Present and Future State of France* (1791) and *The Political State of Europe* (1796).

calorie, the unit measurement of heat quantity in the metric system The small calorie, called also the gram-calorie or therm, is the quantity of heat required to raise the temperature of one gram of water at its maximum density one degree centigrade The large calorie, or kilogram-calorie (1000 small calories), is the quantity of heat required to raise the temperature of one kilogram of water at the temperature of maximum density one degree centigrade In physics and chemistry, the term *calorie* is generally employed to indicate the small calorie or gram-calorie The quantity of heat (given in calories) required to raise the temperature of one gram of any substance one degree centigrade is called the specific heat of that substance The specific heat of water is, therefore, 1 Since the specific heat of water varies slightly at different temperatures, the calorie is often more accurately defined in terms of the exact temperature rise, e g , when the measurement represents the amount of heat required to raise the temperature of one gram of water from 15°C to 16°C , it is called the 15° calorie In food chemistry, the kilogram-calorie (large calorie) is often used for convenience The heat content of food, i e , the amount of heat energy which a specific food can yield, is stated as being so many calories or kilogram-calories The value is easily calculated since the amount of heat given up by food when burned as a fuel is the same as the amount of heat evolved by it when undergoing OXIDATION in the body Calorie values of foods are important in dietetics One 15° calorie is equivalent to the following 0 003968 B T U , 4 185 joules, 3 087 foot-pounds (value varies inversely with value of acceleration of gravity), $1\ 162 \times 10^{-6}$ kilowatt-hours The apparatus used to determine the amount of heat (in calories) given off by a substance in combustion or in some other chemical reaction is called a **calorimeter** (kălurĭ'mutŭr) Commonly, it depends for the measurement it gives upon the number of degrees in temperature that a given quantity of water (or other liquid) is raised by the heat generated in the activity under observation, since the amount of heat required to raise one gram of water one degree centigrade is one calorie (and that required for any other liquid is a definite fraction of a calorie). The amount of heat given off by the combustion of a fuel can be determined very accurately in the so-called bomb calorimeter, which consists essentially of a combustion chamber (bomb) set in another chamber filled with water Upon combustion, the fuel generates heat which is transmitted to the water, raising its temperature The temperature rise of the water indicates the number of calories given off by the combustion, since the amount of water affected is accurately known. The calorie content of food is tested in this way Some calorimeters are based upon the principle that ice requires a specific quantity of heat per gram to melt it and are called consequently ice calorimeters. The respiration calorimeter measures the amount of heat generated in animal respiration

Calovius, Abraham (kŭlōʼvēŭs), 1612–86, German Lutheran theologian, whose original name was Kalau or Calau He was (1637–43) a professor of theology at Königsberg, then pastor at Danzig, and after 1650 teacher, general superintendent, and finally dean of the theological faculty at Wittenberg In his many tracts he defended the strict orthodox party against Catholic, Socinian, Arminian, and other views. He particularly attacked the syncretistic doctrines of Georgius CALIXTUS

Calpe (kălʼpē), ancient name, possibly Phoenician in origin, of GIBRALTAR It is one of the Pillars of Hercules, at the east end of the Strait of Gibraltar.

Calpurnia (kălpûrʼnēŭ), d after 44 B C Roman matron The daughter of Piso (L Calpurnius Piso Caesoninus), she was married to Julius Caesar in 59 B C. She was loyal to him despite his many infidelities and his neglect The picture of her in Shakspere's *Julius Caesar* is drawn mainly from Plutarch

Calpurnius (Titus Calpurnius Siculus) (kălpûrʼnēŭs), fl 1st cent A D , Roman poet His *Eclogues* (seven pastorals) imitate Vergil with grace and charm

Caltagirone (kălʼtäjērōʼnā), rural city (pop 31,028), S Sicily, Italy, of ancient origin It has been noted for its majolica since the Arab occupation, terra cotta figures also are made here

Caltanissetta (kălʼtänēs-sĕtʼtä), city (pop 37,463), capital of Caltanissetta prov , central Sicily, Italy. It is the most important center of the sulphur industry in the island

Calumet (kălʼūmĕt), village (pop 1,460), Keweenaw peninsula, extreme N Mich , in a copper region, inc 1875 as Red Jacket, renamed 1929 It grew mainly after the development of the Calumet and Hecla copper mine (see AGASSIZ, ALEXANDER) A state park is near by

calumet [Fr , =reed], the "peace pipe," a long, feathered stem, with or without pipe bowl, which figured in numerous North American Indian ceremonials Such shafts possessed the highest sacred powers, offering media of communion with the animate powers of the universe and embodying the honor and the source of power of the tribe who possessed them Every item of their fashioning and decoration was symbolic and varied from tribe to tribe They were particularly used at the conclusion of peace treaties and in ceremonies of adoption They served as ambassadors' credentials and were passports of safe-conduct wherever recognized They were principally used by the Siouan and Algonquian peoples of the Great Plains and in the SE United States Among the Iroquois, their function was supplanted by wampum The concept of the "peace pipe" properly belongs to calumet-using groups However, pipes were used through most of North America, and communal smoking, wherever found, usually carried the guarantees of amity, granted with food sharing In the Middle West PIPESTONE was much used in making them

Calumet City, city (pop 13,241), NE Ill , south suburb of Chicago near the Ind line, in an industrial area; inc 1911 Its name was changed from West Hammond in 1924 Lake Calumet, just north, is connected with Lake Michigan

Calumet Park, village (pop 1,593), NE Ill , south suburb of Chicago, inc 1912 Its name was changed from Burr Oak in 1925

Calvados (kalvadōsʼ), department (2,198 sq mi , pop 400,026), N France, on the English Channel It is the most fertile part of NORMANDY and home of Camembert cheese and Calvados apple brandy The best-known towns are CAEN (the capital), DEAUVILLE, and BAYEUX The region was hard hit by the NORMANDY CAMPAIGN of 1944

Calvaert, Denis (kälʼvart), 1540–1619, Flemish painter in Italy, where he was known as Il Fiammingo He studied in Antwerp and later in Bologna under Prospero Fontana While a student he assisted in the execution of frescoes in the Vatican. On returning to Bologna he established a school, counting among his pupils Guido Reni and Domenichino Most of his work remains in the churches of Bologna The Uffizi contains his *Assumption*.

Calvary (kălʼvurē) [Latin, =a skull] or **Golgotha** (gōlʼgŭthu) [Heb , =a skull], place, where Jesus was crucified, outside the wall of Jerusalem. Its location is not certainly known Mat 27 33, Mark 15 22, Luke 23 33, John 19.17–20 For the Crucifixion, see JESUS and GOOD THIEF The traditional identification of the site of Calvary was made by St Helena, when she found the supposed relic of the Cross (see CROSS) The spot is within the Church of the Holy Sepulchre In the 19th cent a spot near the Damascus Gate was proposed, notably by Charles G. Gordon, as the site, this is called the Garden Tomb or Gordon's Calvary

Calvé, Emma (kalvāʼ), 1866–1942, French operatic soprano, pupil of Mme Marchesi She sang in the principal opera houses of Europe and between 1893 and 1904 sang often at the Metropolitan Opera, New York, where her portrayal of Carmen was especially acclaimed See her autobiography (1922)

Calverley, Charles Stuart, 1831–84, English barrister, poet, and wit Expelled from Oxford for minor offenses, Calverley took a distinguished degree from Christ's College, Cambridge He became famous for the wit and erudition of his light verse, particularly parodies His published works include *Verses and Translations* (1862), *Translations into English and Latin* (1866), *Theocritus Translated into English Verse* (1869), and *Fly Leaves* (1872).

Calvert, Cecilius, 2d **Baron Baltimore** (kăl'vûrt), c.1605–1675, proprietor of the colony of MARYLAND. He received the province in 1632 as a grant from the king, in place of his father, George Calvert, who died as the charter was being issued. Cecilius Calvert never visited the province himself, but governed it by deputies until his death, his last deputy being his only son, Charles Calvert. See C. C. Hall, *The Lords Baltimore and the Maryland Palatinate* (1902).

Calvert, Charles, 3d **Baron Baltimore,** 1637–1715, proprietor of Maryland. He was sent over as deputy governor of that province in 1661 by his father, Cecilius Calvert, and at his father's death in 1675 succeeded to the proprietorship. A Catholic faced by an overwhelming Protestant population, he ruled arbitrarily, restricting the suffrage, and filling the offices with his partisans. At the time of BACON'S REBELLION in Virginia there was a similar rebellion in Maryland, which was quickly suppressed. He became involved in a bitter dispute with William PENN over the northern boundary of his grant and in 1684 went to England to defend himself in the controversy. He never returned. His charter was overthrown by a Protestant revolt in 1689, and in 1692 a royal government was established. See C. C. Hall, *The Lords Baltimore and the Maryland Palatinate* (1902).

Calvert, Edward, 1799–1883, English painter and engraver. He was a great admirer of William Blake, to whose work Calvert's has been likened. Among his works are the woodcuts *Christian Ploughing the Last Furrow of Life* and *Cider Press*.

Calvert, George, 1st **Baron Baltimore,** c.1580–1632, colonizer, grad. Trinity College, Oxford, 1597. In 1606 he became private secretary to Sir Robert Cecil, then a secretary of state. His advance was rapid. In 1609 he became a member of Parliament, in 1613 clerk of the privy council, and in 1619 secretary of state and a member of the privy council. He defended the measures of James I in Parliament until his resignation in 1625, when he announced himself a Catholic. The king then created him Baron Baltimore. Calvert had been a member of the Virginia Company and a member of the council of the New England Company, but, wishing to found his own colony, he was granted in 1623 the peninsula of Avalon in Newfoundland. He spent much money on a colony which was established there, but it did not prosper, and in 1629 Baltimore petitioned for a grant farther south where the weather was less severe. In 1632 the king granted him the territory N of the Potomac river which became the province of Maryland. Baltimore prepared the charter of his proposed colony, but died before it could be accepted. The grant passed to his son, Cecilius Calvert. See C. C. Hall, *The Lords Baltimore and the Maryland Palatinate* (1902).

Calvert, city (pop. 2,366), E central Texas, in the Brazos valley and SE of Waco. This center of bottomlands farming and grazing was settled near by c.1840, removed to the railroad and renamed in 1869, and incorporated in 1896. It early adopted the commission form of government.

Calvin, John, 1509–64, French Protestant theologian of the Reformation, b. Noyon, Picardy. Calvin's early education was in theology, he was given at 12 a chaplaincy to an altar in the cathedral of Noyon (1521), and later he obtained positions at St. Martin de Martheville (1527) and at Pont l'Evêque (1529). His opinions gradually turned to disagreement with the Roman position, and a demonstrated ability at disputation led him, at his father's instance, to study law at Orléans and Bourges. After his father's death in 1531 he went to Paris, where he indulged in deep study of the classics and Hebrew and became interested in the growing rebellion against conservative theology. In 1533 he underwent what he termed a "sudden conversion." Leaving behind the influences of classical and Catholic training, he turned to the cause of the Reformation. As a persecuted Protestant, Calvin found it necessary to travel from place to place, and at Angoulême in 1534 he began the work of systematizing Protestant thought in his *Institutes of the Christian Religion*, one of the great theological works of all time. Completed in 1536 and later frequently revised and supplemented, the original work contained the basic Calvinist theology. In the *Institutes* Calvin diverged from Catholic doctrine in the rejection of papal authority and in acceptance of justification by faith alone, but many of his other positions, including the fundamental doctrine of predestination, had been foreshadowed by Catholic reformers and by the Protestant thought of Martin Luther and Martin Bucer. In 1536 Calvin was persuaded by Guillaume Farel to devote himself to the work of the Reformation at Geneva, and there Calvin instituted the most thoroughgoing development of his doctrine. At first the Genevans were unable to accept the austere reforms and departures from established church customs, and in 1538 the Libertines were successful in banishing Farel and Calvin from the city. Calvin went to Basel and then to Strasbourg, where he spent three fruitful years preaching and writing. By 1541 the Genevans welcomed Calvin, and he immediately set himself to the task of constructing a government based on the subordination of the state to the Church. Once the Bible is accepted as the sole source of God's law, the duty of man is to interpret it and preserve the orderly world which God has ordained. This end Calvin set out to achieve through the establishment of ecclesiastical discipline, in which the magistrates had the task of enforcing the religious teachings of the Church as set forth by the synod. The Genevan laws and constitution were recodified, regulation of conduct was extended to all areas of life. Ecclesiastical discipline was supplemented by a systematized theology, with the sacraments of baptism and the Lord's Supper given to unite man into the fellowship of Christ. On all these theological matters Calvin wrote extensively in powerful and well-modulated prose. Among many controversies were his violent opposition to the Anabaptists, his disagreement with the Lutherans over the LORD'S SUPPER, which resulted in the separation of the Evangelical Church into Lutheran and Reformed, and his condemnation of the anti-Trinitarian views of Michael SERVETUS, which ended in the notorious trial and burning of Servetus in 1553. The extension of Calvinism to all spheres of human activity was extremely important to a world emerging from agrarian, medieval economy into a commercial, industrial era. Unlike Luther, who desired a return to primitive simplicity, Calvin accepted the newborn capitalism and encouraged trade and production, at the same time rigorously suppressing the abuses of exploitation and self-indulgence. The development of a successful industrial economy was stimulated by the Christian virtues of thrift, industry, sobriety, and responsibility which Calvin preached as essential to the achievement of the reign of God on earth. The influence of Calvinism spread throughout the entire Western world, realizing its purest forms through the influence of John KNOX in Scotland and through the clergymen and laymen of the Puritan Revolution in England and the Puritan moralists in New England. See R. H. Tawney, *Religion and the Rise of Capitalism* (1922), Georgia Harkness, *John Calvin the Man and His Ethics* (1931), Stephen Zweig, *The Right to Heresy* (1936), W. C. Northcott, *John Calvin* (1946), A. T. Davies, *John Calvin and the Influence of Protestantism on National Life and Character* (1946).

Calvin College see GRAND RAPIDS, Mich.

Calvinism, term used in several different senses. It may indicate the teachings expressed by John Calvin himself, it may be extended to include all that developed from his doctrine and practice in Protestant countries in social, political, and ethical as well as theological aspects of life and thought, or it may be employed as the name of that system of doctrine accepted by "the Reformed churches" (see PRESBYTERIANISM), i.e., the Protestant churches called Reformed in distinction from those professing Lutheran doctrines. Calvinism differs theologically from Lutheranism chiefly in the doctrine of PREDESTINATION and from Catholicism in its whole treatment of GRACE (see also ATONEMENT). Man's redemption, in Calvin's view, must be accomplished through regeneration by the work of the spirit of God "in the souls of the elect and of them alone." A free gift of God's grace is made to those predestined to receive it, and if unmerited by them, it cannot be won by good works. These are, rather, the result and fruition of grace. The doctrines of Calvinism, founded in part upon those of Augustine, became an essential factor in the life of the Covenanters of Scotland, where John KNOX implanted them, the Puritans of England, and the Huguenots of France. Through all of these and other Protestants from Holland, Calvinism passed to North America, where Jonathan EDWARDS was one of the exponents of a modified form known as the New England theology.

Calvinistic Methodist Church, Protestant Christian denomination, closely allied to PRESBYTERIANISM. It originated in Wales (1735–36) with the evangelistic preaching of Howell Harris, Daniel Rowlands, and others. In Wales it is considered to be the only denomination distinctly Welsh in origin, and it has developed into the most important of the Welsh nonconformist churches. The "Methodist" societies which evolved under the Welsh revivalists were so organized as to prevent any break with the Established Church. They were for a time associated with the Methodists of England, for some six years, from c.1742, George WHITEFIELD was the leader of the Welsh Calvinists. Those in England who accepted his views, as opposed to the Arminian doctrines taught by John WESLEY, either remained within the Church of England, joined the "Connexion" of the countess of HUNTINGDON, or in time became affiliated with the Congregationalists or Independents. The Welsh Calvinistic Methodists, however, held their own vigorously and grew in numbers. Thomas CHARLES of Bala, who joined them in 1784, was a leader of wide influence in religious and educational work. In 1811 they separated from the Established Church and set up a new church, Presbyterian in polity. In 1823 a confession of faith was adopted. Later, theological schools were founded at Bala and at Trevecca. The Calvinistic Methodist Church was introduced (c. 1826) in the United States by Welsh settlers in central New York state, in 1920 it united with the Presbyterian Church in the United States of America.

Calvo, Carlos (kär'lōs käl'vō), 1824–1906, Argentine diplomat and historian. He spent much of his life in diplomatic service abroad. He edited a collection of Latin American treaties and did other historical work but was most important as a writer on international law, and although influenced by Henry WHEATON, his development of international doctrines broke new paths. His best-known work is *Derecho internacional teórico y práctico de Europa y América* (Paris, 1868, greatly expanded in subsequent editions, which were published in French). In this he expressed the principle known as the **Calvo Doctrine,** which would prohibit diplomatic intervention as a method for enforcing private claims before local remedies have been exhausted. It is wider in scope than the DRAGO DOCTRINE, which grew out of it. The **Calvo Clause,** found in constitutions, treaties, statutes, and contracts, is the concrete application of the doctrine. Used chiefly in concession contracts, the clause attempts to give local courts final jurisdiction and to obviate any appeal to diplomatic intervention.

Calvus: see LICINIUS.

Calydon (kăl'ĭdŏn), ancient city of S Aetolia, Greece, near the Evenus river and the Gulf of Calydon (Gulf of Patras). It is famous as the scene of the legendary **Calydonian hunt** (kăl'ĭdō'nēun), led by MELEAGER, prince of Calydon, against a wild boar sent by ARTEMIS to destroy the city for the neglect of a sacrifice. Among those who joined the hunt were JASON, CASTOR AND POLLUX, THESEUS, PELEUS, NESTOR, and ATALANTA. Meleager succeeded in killing the boar.

Calymna, island: see KALYMNOS.

Calypso (kŭlĭp'sō), nymph, in Homer's *Odyssey*. She lived on the island Ogygia and there entertained Odysseus for seven years. She offered to make him immortal if he would remain, but he spurned the offer and continued his journey.

calyx (kā'lĭks), the outer ring of parts in a typical flower. It is composed of sepals, these are sometimes leaflike and separate, sometimes united into a tube. The calyx is commonly green, but when the COROLLA is missing it is usually colored (e.g., the buttercup), sometimes both calyx and corolla are indistinguishable except by position, as in the tulip. In composite flowers (see FLOWER) the series of green bracts is not a calyx.

Cam or **Granta,** river rising in Essex, England, and flowing c.40 mi. northward, E past Cambridge, then NE to the Ouse S of Ely. It is called the Granta until it is joined by the Rhee above Cambridge.

cam, mechanical device for producing a reciprocating motion, usually from a rotating shaft. A simple form of cam is a circular disk which is set eccentrically on a shaft in order to induce (when the shaft rotates) a rising and falling motion in a rod or some other moving part held against its edge. There are cams of many diverse shapes, such as oval, elliptical, and scalloped-edged. Each is designed to induce some particular kind of motion required in a moving part, and they are widely used in many different kinds of machines.

Camacho, Manuel Ávila. see ÁVILA CAMACHO, MANUEL.

Camagüey (kamägwā', kämäwā'), city (pop. 78,458), E central Cuba. Formerly called Puerto Príncipe, it is an important commercial crossroads on the main east-west and north-south railroads and highways. The rich agricultural region surrounding Camagüey produces cattle and sugar cane. Still a sleepy, tropical city, it has retained much of its Spanish colonial atmosphere.

Camargue (kamärg'), island, SE France, in the Rhone delta. Once a sterile marshland, it has been reclaimed and now is used for intensive cattle raising. The Camargue is the nearest French equivalent to the ranches of the W United States.

Camas (kăm'ŭs), city (pop. 4,433), SW Wash., on the Columbia and E of Vancouver, inc. 1906. Large lumber and paper mills are here.

camass or **camas** (both kăm'ŭs), any species of the genus *Camassia* (or *Quamasia*), hardy plants chiefly of moist places in the Far West, where their abundance has given rise to various place names. Often cultivated in gardens, camass has a stalk of several blue (sometimes white) blossoms and usually narrow leaves. The bulbs of the common camass (*Camassia quamash*) were a staple food of Northwestern Indians. An eastern camass is called wild hyacinth. The poisonous death camass (*Zygadenus venenosus*), with whitish flowers, is similar in appearance but distinguishable by its three styles.

Cambacérès, Jean Jacques Régis de (zhäN'zhäk' räshĕs' du kôbäsārĕs'), 1753–1824, French revolutionist, primarily important as a legislator. He held moderate opinions and was chiefly interested in developing the principles of revolutionary jurisprudence while he acted as deputy to the National Convention, president of the Committee of Public Safety, member of the Council of Five Hundred, second consul under Napoleon (1799–1804), and archchancellor of the empire. He played a major

part in the preparation of the CODE NAPOLÉON In 1808 Cambacérès was made duke of Parma Minister of justice in the Hundred Days (1815), he was exiled in the Restoration until 1818

Cambay (kămbā′), town (pop 34,941), NW Bombay state, India Silting of the harbor has made the once great port useless Agate, carnelian, and onyx carvings are made The town was the capital of the former native state of Cambay which joined Bombay in 1948 The Gulf of Cambay, an arm of the Arabian Sea, lies between Bombay state and Saurashtra

Cambert, Robert (rôbĕr′ käbĕr′), c 1628–1677, French composer His *Pomone* (1671) was the first French opera

Camberwell (kăm′bur wul, -wĕl), metropolitan borough (1931 pop 251,294, 1948 estimated pop 178,200) of S London, England, S of the Thames It is largely a residential and park section The South London Art Gallery is here

Cambiaso, Luca (lōō′kä kämbyä′zō), 1527–85, Italian painter and sculptor of the Genoese school, known also as Luchetto da Genova, son and pupil of Giovanni Cambiaso, a fresco painter His inventiveness and facile execution in both oil and fresco won him early recognition His best works are in churches and palaces of Genoa and vicinity In 1583 he went to Spain, where he painted the colossal and celebrated *Paradise*, in the Escorial

Cambio, Arnolfo di see ARNOLFO DI CAMBIO

cambium (kăm′bēum), thin layer of tissue lying between the bark and the WOOD of a stem, best developed in trees The cambium, by producing new layers of bark on the outside and wood on the inside, is responsible for the increase in diameter of plant stems The annual rings seen in a cross section of wood are due to the contrast between the large wood elements produced in the spring and the smaller ones formed in summer The destruction of the cambium when a tree is "ringed" causes the death of the tree

Cambodia (kămbō′dēu), Fr *Cambodge* (käbôj′), state (c 67,000 sq mi, pop c 3,700,000), Indo-China The capital is PNOM PENH A saucer-shaped alluvial plain drained by the Mekong river, it is shut off by mountain ranges from Thailand (Siam) on the west and north, Laos on the north, and Annam on the east To the southeast it merges into the plain of Cochin China, to the south is the Gulf of Siam The northeast and southwest monsoons govern the dry and the wet seasons, respectively The vegetation is tropical, in the jungles are found elephants, tigers, and buffaloes Near Pnom Penh the Mekong receives the waters of the Great Lake or TONLE SAP, important for its fisheries West of the lake is a fertile RICE-growing area Pepper is grown on the southern coastal plains, cotton and tobacco on the banks of the Mekong Most of the Cambodians are farmers, the only industries are sericulture and the weaving of silk and cotton Besides the Cambodians, the population includes large minorities of Chinese and Annamese, plus Chams, Malays, and hill tribesmen The official religion is Buddhism, popular beliefs take in, besides, elements of Hinduism and worship of local gods Dominant in Indo-China during the period of the KHMER EMPIRE, Cambodia from the 15th cent was the prey of stronger neighbors To pressure from Siam on the western frontier was added in the 17th cent pressure from ANNAM on the east, the kings of Siam and the lords of Hué alike asserted overlordship and claims to tribute In the 18th cent Cambodia lost three western provinces to Siam and the provinces of present-day COCHIN CHINA to the Annamese Intrigue and wars on Cambodian soil continued into the 19th cent, and in 1854 the king of Cambodia appealed for French intervention A French protectorate was formally established in 1863, and French influence was consolidated by a treaty of 1884 Cambodia became part of the Union of Indo-China in 1887 In 1907 a French-Siamese treaty restored Cambodia's western provinces In the Second World War, under Japanese occupation, Cambodia again briefly lost these provinces to Siam After the war, France granted Cambodia a greater degree of self-government within the Federation of Indo-China There were minor disturbances, but widespread resistance to French rule (like the Annamese struggle over the independence of VIET NAM) did not appear

Cambodian art. Little is known of the pre-Khmer period (before the 7th cent), but remains of shrines at Sambor and Kompong Thom and such sculpture as the *Harihara* of Andet, in the Musée Albert Sarraut, Pnom Penh, reveal marked influence of Indian Gupta art With the establishment of the autonomous Khmer kingdom, Cambodian art assumed a national character in its classical period (8th-13th cent) A highly symbolic art was evolved, in which Hindu and Buddhist iconography was modified in terms of native cults based on deification of the king and his royal ancestors Extensive ruins of great temple complexes at Angkor Wat and Angkor Thom represent the highest achievement of the culture The temples comprised an accretion of shrines and courts, joined by narrow corridors, in step-pyramid arrangement. Both the architectural plan and the profuse decorative sculpture were involved in symbolisation of the "world mountain" Characteristic of the sculpture was a sensuous subtlety of modeling and a suggestion of individualization of features in the cult images, which were traditionally represented with closed or half-closed eyes and full broad lips set in a slow smile of distinctive sweetness After the decline of the Khmer kingdom in the 14th cent, Cambodian culture became absorbed by that of Siam Distinctive national forms survived, however, in music, dance, and the minor arts See A K Coomaraswamy, *History of Indian and Indonesian Art* (1927)

Cambon, Jules Martin (zhul′ martăⁿ′ käbōⁿ′), 1845–1935, French diplomat, brother of Pierre Paul Cambon In 1897 he was made ambassador at Washington, where he mediated the peace preliminaries of the Spanish-American War He was ambassador at Madrid (1902–7) and at Berlin (1907–14), and from 1920 to 1922 he was chairman of the Council of Ambassadors He wrote *France and the United States* (1903), *The Diplomatist* (1931), and other political works See biography by Geneviève Tabouis (Eng tr, 1938)

Cambon, Pierre Joseph (pyĕr′ zhôzĕf′), 1756–1820, French financier and revolutionist A merchant of Montpellier, he became a member of the Legislative Assembly and the Convention, and he guided the financial policy of the Revolution from Oct, 1791, to April, 1795 He consolidated the old debt with the new, converting the floating debt into a funded debt Advocating war to "free" Europe, Cambon favored the policy of exploiting conquered territory His fiscal program, which failed to halt inflation, was attacked by Robespierre, whose fall was partly caused by Cambon's countercharges Cambon was distrusted by the Thermidorians, and his career ended after a brief triumph He was exiled after the Bourbon restoration

Cambon, Pierre Paul (pôl), 1843–1924, French diplomat, brother of Jules Martin Cambon As ambassador to England (1898–1920) he helped to create the Entente Cordiale (1904) and the Anglo-Russian agreement of 1907, and he encouraged England to enter the First World War (see TRIPLE ALLIANCE AND TRIPLE ENTENTE) He was one of the ablest diplomats France ever had

Camborne-Redruth (kăm′bôrn,-bûrn,rĕd′rōōth), urban district (1931 pop 24,064, 1947 estimated pop 35,080), Cornwall, England The former urban districts of Camborne (1931 pop 14,160) and Redruth (1931 pop 9,904), situated 3 mi apart and midway between Truro and Penzance, were combined in the early 1930s Camborne mines tin, copper, tungsten, and arsenic and is the site of Dolcoath Mine, once the largest in Cornwall but now idle Redruth mines tin and copper John Wesley preached to outdoor gatherings near the present mines At the summit of Carn Brea hill are prehistoric remains

Cambrai (kämbrā′, Fr käbrĕ′), city (pop 24,558), Nord dept, N France, on the Escaut (Scheldt) river It has long been known for its fine textiles and has given its name to cambric, first manufactured here An episcopal see since the 4th cent and seat of an archdiocese since the 16th cent, Cambrai and the surrounding county of Cambrésis were ruled by the bishops under the Holy Roman Empire until they were seized by Spain (1595) and by France (1677) Fénelon was archbishop of Cambrai from 1695 to 1715 The original cathedral was destroyed in 1793 Cambrai suffered devastation in both world wars

Cambrai, League of, 1508–10, alliance formed by Emperor Maximilian I, Louis XII of France, Pope Julius II, Ferdinand V of Aragon, and Ferrara, Mantua, and others against Venice to check its territorial expansion The republic was soon on the verge of ruin Its army was defeated by the French at Agnadello (1509), most of the territories it had occupied were lost, and Maximilian entered Venetia The republic had to make concessions to the pope and to Ferdinand In 1510 the pope became reconciled to Venice and began forming the HOLY LEAGUE against France The republic emerged from the war having suffered serious losses, but by no means crushed

Cambrai, Treaty of, called the **Ladies' Peace,** treaty negotiated and signed in 1529 by Louise of Savoy, representing her son Francis I of France, and Margaret of Austria, representing her nephew Emperor Charles V The treaty renewed the Treaty of Madrid (see FRANCIS I), but it did not exact the surrender of Burgundy to Charles

Cambreleng, Churchill Caldom (kăm′burlĕng), 1786–1862, U S Representative (1821–39), b Washington, N C He moved to New York city in 1802 and became a highly successful businessman, though later, as a Congressman, he was opposed by the mercantile interests Under Presidents Andrew Jackson and Martin Van Buren, Cambreleng was an influential administration leader in the House, particularly able on economic questions Defeated for reelection in 1838, he went abroad and by appointment of his close friend Van Buren served as minister to Russia (1840–41) He was prominent in the New York constitutional convention of 1846 and in 1847 presided over the state convention of the BARNBURNERS See A M. Schlesinger, Jr, *The Age of Jackson* (1945)

Cambria (kăm′brēu) [from Welsh *Cymry*=Welshmen], ancient name of Wales

Cambrian Mountains, name sometimes given the mountain system of Wales

Cambrian period (kăm′brēun, kām′-) [from Wales (*Cambria*), where Cambrian beds were early identified, named by Adam SEDGWICK], first period of the PALEOZOIC ERA of geologic time During the Cambrian period large areas of North America, Europe, and Asia lay under shallow seas, and the Cambrian rocks are predominantly sedimentary—conglomerate, sandstone, shale, and limestone In the United States, Lower Cambrian or Waucobian formations are found chiefly in the Appalachian and Cordilleran regions, which were then arms of the sea, the most notable deposits being the sandstone near Waucoba Springs, S Calif, and the conglomerate and sandstone of Georgia, Tennessee, and North Carolina, from 9,000 to 13,000 ft thick Middle Cambrian or Albertan or Acadian formations are rare in the Appalachian region, which was above water in the Middle Cambrian, though they are found near Braintree, Mass, in New Brunswick, and throughout the Cordilleran region In the Upper Cambrian or Croixian epoch, the shallow seas spread over a great part of the continent, depositing, among other formations, the St Croix sandstone of Wisconsin and the upper Mississippi valley, some of the Arbuckle limestone of Oklahoma, and the Potsdam sandstone on the northern slope of the Adirondacks and elsewhere The Cambrian rocks are notable as being the first to contain many easily recognizable fossils The known Cambrian fauna—all marine—includes representatives of every phylum of invertebrates, and the possibility of definitely vertebrate fossils being found cannot be excluded The dominant animal was the TRILOBITE, of which genera are so numerous that the various rock series can be distinguished according to the type of trilobite they contain Brachiopods, snails, and sponges were also common The seemingly abrupt appearance of such a highly developed and diversified fauna can best be explained by the assumption that more primitive forms, lower in the scale of evolution, flourished during the interval between the close of the PROTEROZOIC ERA and the beginning of the Cambrian, of which all geologic record has been destroyed by erosion

Cambridge (kām′-), municipal borough (1931 pop 66,789, 1943 estimated pop 77,000), co seat of Cambridgeshire, England, on the Cam (or Granta) river It is an ancient market town, famous as the seat of CAMBRIDGE UNIVERSITY Originally a Roman fort (Camboritum), it became the Grantebrycge of the Saxons, the Cantebrigge (Latin *Cantabrigia*) of the Normans, and the Cambridge of the later English, finally evolving its present name Here William the Conqueror built a castle, which has now disappeared, the town's importance grew with the advent of monks from near-by Ely, who gave it a scholastic and ecclesiastical reputation in the 12th cent and who formed the nucleus of the university foundations The present town still maintains much of its medieval atmosphere and appearance There are many old inns, hostels, and houses and winding streets and narrow passages which have not altered greatly with time Cambridge abounds in medieval churches, the most important of which are St Benedict's, the oldest, dating back to the Saxon 10th cent, St Edward's (13th cent), where Latimer preached, and the Church of the Holy Sepulchre, one of the four Norman round churches in England The guildhall, of modern construction, looks down upon the old market square, which attracts many farmers from the surrounding countryside on market days

Cambridge 1 Village (pop 1,312), co seat of Henry co, NW Ill, SE of Rock Island, in a farm area, inc 1861 **2** Town (pop 10,102), co seat of Dorchester co, Eastern Shore, Md, on the Choptank river, across Chesapeake Bay, SE of Annapolis, in a farming area, founded 1684 The town is a port of entry, a fishing and yachting port, and a canning center for sea food and vegetables Oysters, terrapin, muskrat pelts, and crabs are its leading exports A state hospital is near by **3** City (pop 110,879), a co seat of Middlesex co, E Mass, on the Charles and NW of Boston, settled 1630 as New Towne, inc as a town 1636, as a city 1846 It is the seat of HARVARD UNIVERSITY, RADCLIFFE COLLEGE, and MASSACHUSETTS INSTITUTE OF TECHNOLOGY It was the birthplace and home of James Russell Lowell Longfellow's home is a memorial Cambridge was a gathering place for colonial troops, here, July 3, 1775, Washington took command Longfellow, Lowell, Phillips Brooks, and many other notable people are buried in Mt Auburn Cemetery The first printing press in America was established here by Stephen DAYE An industrial as well as an educational center, Cambridge manufactures machinery, chemicals, and rubber A city manager–council government was adopted in 1942 **4** Village (pop 1,592), co seat of Isanti co, E Minn, N of Minneapolis and on the Rum river, in a farm area A colony for epileptics was opened

here in 1925 **5** Village (pop 1,084), S Nebr , on the Republican and SW of Kearney, in a grazing area, founded 1874 **6** Village (pop 1,572), E N Y , E of Saratoga Springs and near the Vt line, settled c 1761, inc 1866 Its weekly *Washington County Post* was founded in 1787 Cambridge is a farm trade center, and hinges and silk underwear are manufactured **7** Industrial city (pop 15,044), co seat of Guernsey co , E central Ohio, NE of Zanesville, in a coal, gas, and clay area, settled 1798, laid out 1806, inc 1837 Its chief industries include steel, glass, plastics, and pottery **8** Town (pop 1,383), N Vt , NW of Mt Mansfield, on the Lamoille in the western foothills of the Green Mts , settled 1783 The town early became a maple-sugar producing center

Cambridge Bay, Canadian government post and weather station, on the southeast shore of Victoria Island, Northwest Territories In the arctic military training maneuvers of 1946 Cambridge Bay was the northernmost point involved

Cambridge City, town (pop 2,207), SE Ind , on the Whitewater river and W of Richmond. Prehistoric earthworks have been found here

Cambridge Platform, declaration of principles of church government and discipline, forming in fact a constitution of the Congregational churches It was adopted (1648) by a church synod at Cambridge, Mass , and remains the basis of the temporal government of the churches It had little to do with matters of doctrine and belief The Congregationalists of Connecticut later subscribed (1708) in the Saybrook Platform to a more centralized church government, resembling Presbyterianism See also CONGREGATIONALISM

Cambridge Platonists, school of philosophy, centered at Cambridge Univ in the latter half of the 17th cent In reaction to the mechanical philosophy of Hobbes this school revived the Platonic theory of ideas and particularly the belief that moral ideas are innate in men Although the intuitive derivation of morals tended to mysticism, the Cambridge Platonists stressed the importance of reason, maintaining that faith and reason differ only in degree Robert Grenville is credited with being the forerunner of this school, and Ralph CUDWORTH, Henry More, and John Norris were closely associated with it See F J Powicke, *The Cambridge Platonists* (1925)

Cambridgeshire or **Cambridge,** inland county (492 sq mi , excluding the Isle of Ely, 1931 pop 140,004, 1948 estimated pop 165,940, 864 sq mi , including the Isle of Ely, 1931 pop 217,702, 1948 estimated pop 253,553), E England The county town is Cambridge The northern section of Cambridgeshire is known as the Isle of Ely and is an administratively separate county Most of the area is alluvial fenland, rising to the low chalky East Anglian range in the south, with the Gogmagog Hills near Cambridge their most conspicuous feature The main rivers are the Ouse, the Cam or Granta, the Lark, and the Nene Efforts to reclaim the fens date back, apparently, to the days of Roman occupation, but in the subsequent periods of invasions by Danes, Saxons, and Normans the efforts were abandoned Cornelius Vermuyden, a Dutchman, completed a vast drainage project in 1653 Since that time the region has been known primarily for its agriculture (fruits, grain, and vegetables) Ely, with its famous cathedral, has been important as an ecclesiastical center from Anglo-Saxon days, when the county was disputed territory between East Anglia and Mercia and the city was isolated and secure among the fens Cambridge Univ , famous for its beautiful buildings as well as its scholars, dates from the early 12th cent See the *Victoria History of Cambridgeshire and the Isle of Ely* (2 vols , 1938–49), Arthur Mee, *Cambridgeshire* (1939)

Cambridge Springs, borough (pop 1,807), NW Pa , c 20 mi from Lake Erie It is a farming and resort center Alliance College is here

Cambridge University, at Cambridge, England, one of the two ancient universities of England Although legends place it earlier, it probably had its beginnings in the 12th cent It is mentioned in a writ of Henry III in 1231 By the end of the 13th cent it had attained what is an essential feature of both Cambridge and Oxford, the residences, presided over by a principal The residences or colleges came to be named for the church to which they were attached or for the saint to which they were dedicated They are, with their dates of founding, Peterhouse or St Peter's College (1284), Clare (1326), Pembroke (1347), Gonville and Caius (1348), Trinity Hall (1350), Corpus Christi (1352), King's (1441), Queens' (1448), St Catharine's (1473), Jesus (1496), Christ's (1505), St John's (1511), Magdalene (1542, pronounced môd'lĭn), Trinity (1546), Emmanuel (1584), Sidney Sussex (1596), and the modern colleges, Downing (1800) and Selwyn (1882) The two colleges for women are Girton (1869) and Newnham (1873), women students were not, however, admitted to a full degree until 1947. The university has faculties of classics, divinity, English, fine arts, modern and medieval languages, Oriental languages, music, economics and politics, history, law, moral science, engineering, geography and geology, mathematics, physics and chemistry, agriculture, archaeology and anthropology, biology, and medicine Cambridge has led in the fields of science and modern literature Its famous Cavendish Laboratory of experimental physics was opened in 1873, although the Cavendish professorship had been established two years earlier The Cavendish professors have been outstanding names in physics, they are James Clerk Maxwell (1871–79), Lord Rayleigh (1879–84), Sir Joseph John Thomson (1884–1919), Ernest Rutherford (1919–37), Sir William Lawrence Bragg (1938), James Chadwick was at the Cavendish Laboratory when he discovered the neutron The University Library, the Fitzwilliam Museum, and the botanic gardens are notable features of the university The Cambridge Univ Press dates from the early 16th cent Like OXFORD UNIVERSITY, Cambridge has a system of instruction by lecturers and tutors, at Cambridge, however, the tutors are called supervisors The B A degree is awarded upon passing the tripos examination (equivalent to the honors examination at Oxford) after nine terms of continuous residence The university has its own two representatives in Parliament See M A R Tuker, *Cambridge* (1907), Hastings Rashdall, *The Universities of Europe in the Middle Ages* (new ed , 3 vols , 1936), Alexander Wood, *The Cavendish Laboratory* (1946), J W Clark, *A Concise Guide to the Town and University of Cambridge* (1947), F A Keynes, *By-Ways of Cambridge History* (1947), *Universities Yearbook*

Cambronne, Pierre Jacques Étienne (pyĕr' zhak' äty*e*n' käbrôn'), 1770–1842, French general A commander of the Old Guard at Waterloo (1815), he reportedly answered a British invitation to surrender with a vulgarism, which later became famous as the *mot de Cambronne* According to an expurgated version, he replied, "The Old Guard dies, but never surrenders " Wounded and captured, he returned from England and was exonerated by a court-martial (1816)

Cambuluc, China see PEIPING

Cambuskenneth, abbey, Stirlingshire, Scotland, near Stirling It was founded in 1147 by David I and was once one of the richest abbeys in Scotland James III and Margaret of Denmark are buried here, a monument to them was erected by Queen Victoria

Cambuslang, parish (pop 27,129), Lanarkshire, Scotland, near the Clyde river It is a southeastern suburb of Glasgow and owes its development to the coal mines and steel industry of the region

Cambyses (kămbī'sēz), d 521 B C , king of ancient Persia (529–521 B C), son and successor of CYRUS THE GREAT He disposed of his brother Smerdis to have unchallenged rule He invaded Egypt, defeating (525 B C) Psamtik at Pelusium and sacking Memphis He planned further expeditions in Africa, but they ran into difficulty, and at home an imposter claiming to be SMERDIS raised a revolt Cambyses died, possibly by suicide, when he was putting down the insurrection Darius I succeeded

Camden, Charles Pratt, 1st earl of. see PRATT, CHARLES

Camden, William, 1551–1623, English scholar He was the chief historian and antiquary of Elizabethan times His two chief works are *Britannia* (1586) and *Annales rerum Anglicarum et Hibernicarum regnante Elizabetha* [annals of affairs in England and Ireland in the reign of Elizabeth] He was a conscientious scholar in writing history, in editing old manuscripts, and in collecting materials of antiquarian interest He was also a teacher (1575–97) and head master (1593–97) at Westminster School and helped to revive the study of Anglo-Saxon He also wrote a Greek grammar long popular in English secondary schools He aided Sir Robert Cotton in collecting materials The Camden Society, organized for the publication of historical documents, was named in his honor

Camden. 1 City (pop 8,975), co seat of Ouachita co , S Ark , on the Ouachita river, settled 1824, inc 1847 A rail and river shipping point, it has furniture, paper, and pottery manufactures **2** Resort town (pop 3,554), S Maine, in a beautiful hilly country bordered on the east by Penobscot Bay, settled 1769, inc 1791 Woolen and sport clothes and boats are made here **3** City (pop 117,536), co seat of Camden co , W N J , on the Delaware (here crossed by a bridge, 1926, designed by Modjeski) opposite Philadelphia, settled 1681, laid out 1773, inc 1828 The Camden and Amboy RR was built in 1834, and the city developed as a commercial, shipbuilding, and manufacturing center Richard Esterbrook in 1858 opened a steel-pen factory, the Campbell canned-foods company originated in 1869, later phonograph and radio making became important The city preserves Walt Whitman's home, and the poet is buried in the city where he lived from 1873 The Joseph Cooper House (1726) forms part of the county historical society establishment See Paul F Cranston, *Camden County, 1681–1931* (1931) **4** Village (pop 2,021), central N Y , NW of Rome, in a farm and dairy area, inc 1834 Furniture and copper wire are made **5** City (pop 5,747), co seat of Kershaw co , N central S C , near the Wateree NE of Columbia, settled c 1735, inc 1791. In a longleaf pine and farm area, it is a trade and processing center, with textile and lumber mills Since the 1880s Camden has become a winter resort, it has beautiful estates and is well known for hunting, polo, and riding An annual cotton festival is held There are a number of fine antebellum houses In the CAROLINA CAMPAIGN of the American Revolution, the battles of Camden (Aug 16, 1780) and Hobkirks Hill (April 25, 1781) were fought in the neighborhood The city was practically destroyed by fire when the British evacuated it on May 8, 1781 In the Civil War, when it was taken (Feb 24, 1865) by a part of Sherman's army, it was again partially burned See T J Kirkland and R M Kennedy, *Historic Camden* (1905)

camel, hoofed mammal of the family Camelidae There are two genera, the true camels, genus *Camelus* of Asia, and the South American genus *Lama*, which includes the wild guanaco and vicuña and the domesticated alpaca and llama The two species of camel are the single-humped Arabian camel or dromedary, *Camelus dromedarius*, a domesticated animal used in Arabia and North Africa, and the Bactrian two-humped camel (*C bactrianus*) of central Asia Some wild Bactrian camels exist in Turkistan and Mongolia The humps are storage places for fat Camels range in color from dirty white to dark brown and have long necks, small ears, tough-skinned lips and powerful teeth, some of which are sharply pointed The camel uses the mouth in fighting Adaptations to desert life include broad, flat, thick-soled cloven hoofs which do not sink into the sand, the ability to go without drinking for several days, and for longer if juicy plants are available, and valvular nostrils lined with hairs for protection against flying sand Horny pads help to protect the chest, knees, and thigh joints against injury from the hard surfaces on which the camel sleeps Strong camels usually carry about 500 to 600 lb and cover c 30 mi a day Some Bactrian camels can transport 1,000 lb A light, fleet breed of the Arabian camel or dromedary is used for riding and not for bearing heavy loads The name dromedary was formerly applied to any swift riding camel Geologic findings indicate that the camel originated in North America, that one group migrated to Asia and the other to South America, and that both became extinct in North America probably after the glacial period

Camelford, rural district (pop 7,550) and village, Cornwall, England, on the Camel river and SE of Tintagel Head Like several other places, it has been identified with CAMELOT

camellia (–mēl'–, –mĕ'–) [for G J Kamel, S J], name for several Asiatic evergreen trees or shrubs of the genus *Camellia* (or *Thea*), cultivated outdoors in the S United States or in greenhouses farther north Camellia blossoms are white or shades of red, single or double, and sometimes fragrant, they are occasionally gardenialike but have alternate rather than opposite leaves The leaves are usually glossy dark green, as in the common species (*Camellia japonica*) sometimes called japonica Camellias are closely related to the tea plant, and *Camellia sasanqua* yields tea-seed oil The Azalea and Camellia Society of America has headquarters at Macon, Ga

Camelot (kăm'ulŏt), in ARTHURIAN LEGEND, the seat of King Arthur's court It has been variously located at Cadbury Camp, Somerset, WINCHESTER, CAMELFORD, Cornwall, and CAERLEON, Wales

Camembert cheese (kă'mŭmbâr, Fr kamäbĕr'), unpressed rennet cheese, drained on straw mats and mold-ripened to a creamy consistency Made since the late 18th cent near Camembert village, NW France, it is exported in considerable quantity

Camenae (kumē'nē), in Roman religion, water nymphs, gifted in prophecy, identified with the Muses

cameo (kă'mēō), small relief carving, usually on striated precious or semiprecious stones or on shell The design, often a portrait head, is commonly cut in the light-colored vein, and the dark one is left as the background Glass of two colors in layers may be cameo-cut, a famous Roman example is the PORTLAND VASE The art originated in Asia as a decoration on the reverse of seals The Greeks were noted for their exquisite designs and cutting on jewelry and on decorations for jewel caskets, vases, cups, and candelabra The Romans were adept cutters, and Rome remains a center of artist experts The art was revived during the Renaissance, and cameo jewelry was a vogue of the Victorian era Antique pieces are sought by collectors

camera, in PHOTOGRAPHY, a light-proof container holding a lens which focuses the image of an object upon either a photographic plate or a film enclosed within A shutter when opened permits the entrance of light which exposes the photographic film One of the simplest forms is the box camera, consisting of a simple boxlike container, a single lens, a single-speed shutter, a finder, and a diaphragm (adjustable in some cameras) Roll film is usually employed in the box camera Many variations are

possible in the size, shape, and construction of the parts and attachments of the camera The folding roll-film camera is usually equipped with an extensible bellows or other means of adjusting the lens position The miniature or candid camera usually utilizes 35-millimeter film in cartridges and contains a high-speed lens A hand camera fitted with ground-glass focusing and a coupled range-finder and direct-vision finder is often used by press photographers It is usually equipped with a synchronizer for timing the flash of the flash lamp to the opening of the shutter A view camera, which has a long bellows extension and is designed for use on a tripod, and a camera similar to the view camera but larger and heavier are generally used by professional photographers A pinhole camera consists of an opaque box in which a tiny aperture takes the place of a lens In the usual moving-picture camera the film moves intermittently from one spool to another in such a way that the film is at rest during the actual exposure A rotating shutter exposes the film The **camera lucida** (lōō'sĭdŭ) is an optical instrument which causes a virtual image of an external object to appear upon a plane surface, so that the outline may be traced It is usually used with the microscope, as an attachment to the eyepiece The **camera obscura** (ŏbskyōō'rŭ) consists of a light-tight box or chamber with a convex lens at one end and a screen, on which an image is produced, at the other It is sometimes used for making drawings and is the prototype of the modern photographic camera

Camerarius, Rudolph Jacob (kămŭrâ'rēŭs, Ger rōō'dôlf yä'kôp kamŭra'rĕōōs), 1665-1721, German botanist, a physician The first to present a clear and definite picture of sex in plants, he based his conclusions on careful experiments and observations In his account of the work he described the stamen as the male organ and the ovary as the female organ and emphasized their relationship to the formation of seeds He became a professor at the Univ of Tübingen in 1688

Cameron, Andrew Carr, 1834-90, American labor leader, b Berwick-on-Tweed, England He worked as a printer in Chicago, where he became interested in the labor movement In the *Workingmen's Advocate*, which he edited from 1864 to 1877, he strongly advocated independent political action by labor He helped found the National Labor Union in 1866 and was its delegate to the convention of the International Workingmen's Association in Basel in 1869 He was president of the Chicago Trade Association, the Grand Eight Hour League, and the Illinois State Labor Association

Cameron, Sir David Young, 1865-1945, Scottish artist, best known for his paintings and etchings of the Scottish Highlands He is represented in the National Galleries of Scotland and Ottawa His *Sunrise on Badenoch Hills* is in the Metropolitan Museum He was knighted in 1924

Cameron, Donald, c 1695-1748, Scottish chieftain, known as the Gentle Lochiel He assisted Charles Edward Stuart, the Young Pretender, in the unsuccessful rising of the Jacobites in 1745 and was wounded at Falkirk and Culloden He is remembered because his humanity mitigated the savagery of the insurgents

Cameron, Sir Ewen or **Evan,** 1629-1719, chief of the highland clan of Cameron after 1647, called the Cameron of Lochiel or just Lochiel On behalf of Charles II he led his clan against the parliamentarians in 1653, and only in 1658 did he submit to the Puritan general, George Monck He accompanied Monck to London in 1660 and was knighted by Charles II at the Restoration A supporter of James II and later one of the leading Jacobites, he brought his clan to the aid of John Graham, Viscount Dundee, in the royalist victory at Killiecrankie (1690) and sent it again to aid the Jacobite rebellion of 1715 Lochiel was a romantic warrior of great strength, and from one of his feats Sir Walter Scott drew his description of the fight between Roderick Dhu and Fitz James in *The Lady of the Lake*

Cameron, James Donald, 1833-1918, American politician and capitalist, b Middletown, Pa, educated at Princeton (B A, 1852, M A, 1855) He entered business, gradually taking over the interests of his father, Simon CAMERON In 1867 he managed his father's successful campaign for U S Senator His father influenced Grant to appoint "Don" Secretary of War in 1876, but Hayes refused to retain him Simon Cameron then resigned from the Senate, and his son inherited both his seat (1877-97) and his Pennsylvania Republican machine

Cameron, John, c 1579-1625, Scottish scholar and theologian As teacher, lecturer, and preacher at Bordeaux, Saumur, and other cities on the Continent, he became celebrated for his learning and ability In 1622 he was appointed by James I of England principal of the Univ of Glasgow, but his belief in the divine right of kings and his stand for passive obedience made it impossible for him to remain long Returning to France after less than a year, he became (1624) professor of divinity at Montauban, but not long afterward he was injured by an enemy of the doctrine of passive obedience and died as a result of the attack

"Walking library" is the title bestowed upon Cameron by Sir Thomas Urquhart. His writings, in Latin and French, were largely concerned with his views on man's free will and the grace of God Those who held the same opinions are sometimes known as Cameronites Theirs was a moderate form of Calvinism Cameron's collected works were published in 1642, with a memoir by Louis Cappel

Cameron, Richard, d 1680, Scottish leader of the COVENANTERS Converted by the field preachers, he was licensed as one of them and became known for his eloquence After about two years in Holland, he returned (1680), he opposed the measures aimed at reestablishing the Episcopal Church in Scotland and took the lead of a small company who, in the Sanquhar Declaration, disowned the royal authority of Charles II A price was set on his head, within a short time he and a little band of supporters were overtaken by royal troops Cameron and many of his group were killed Later (1743) the Cameronians, growing in numbers, formed a presbytery, taking the name Reformed Presbyterians This denomination is still represented by congregations in Scotland, the north of Ireland, and North America, but the greater number united (1876) with the Free Church of Scotland A body of Cameronians formed the nucleus (1689) of the celebrated Cameronian regiment of the British army See biography by John Herkless (1896)

Cameron, Simon, 1799-1889, American politician and capitalist, b Lancaster co, Pa He began his career as a printer's apprentice, rose to be a newspaper publisher, and branched out into canal and road construction, railroad promotion, banking, and iron and steel manufacturing All these private interests were admirably served by his talent for politics, and, in fact, they were responsible for the only principle that Cameron was ever known to advocate sincerely and consistently—the protective tariff At first a Democrat, he was long associated in Pennsylvania with James Buchanan, who later called him "an unprincipled rascal" Cameron was elected (1845) to Buchanan's vacated seat in the U S Senate but, defeated for reelection, served only until 1849 In 1856, having joined the new Republican party, he was returned to the Senate when three Democratic legislators also voted for him To Cameron is attributed that famous definition of an "honest politician" as one who, "when bought, stays bought" At the Republican national convention in Chicago in 1860 he was a candidate for the nomination for President, but after the first ballot supported Abraham Lincoln, first exacting from Lincoln's managers, however, the promise of a cabinet post Lincoln reluctantly recognized the bargain, made without his knowledge, and Cameron resigned from the Senate to serve (March, 1861-Jan, 1862) as Secretary of War The President's worst fears were realized as notorious corruption in army contracts and appointments aroused the nation Lincoln eased him out gracefully by appointing him minister to Russia, but Cameron resigned that post in Nov, 1862 The House of Representatives passed (April, 1862) a resolution of censure against him, but Cameron, never a sensitive man, bounded back in 1867, when, in defeating Andrew H Curtin for the Senate, he became absolute Republican boss of Pennsylvania Although he retired from the Senate and from active participation in politics in 1877, the machine he created, later run by his son, James Donald CAMERON, Matthew S QUAY, Boies PENROSE, William S VARE, and Joseph R Grundy successively, so dominated Pennsylvania that it was not until Franklin D Roosevelt's victory in 1936 that the Democrats carried the state in a national election See L F Crippen, *Simon Cameron: Ante-Bellum Years* (1942), B J Hendrick, *Lincoln's War Cabinet* (1946)

Cameron, Thomas Fairfax, 3d **Baron Fairfax of:** see FAIRFAX, THOMAS

Cameron, Verney Lovett, 1844-94, British traveler in Africa A naval officer, he served in the British expedition (1868) against Ethiopia and assisted in the suppression of the East African slave trade He was sent (1873) by the Royal Geographical Society to relieve Livingstone but, finding him dead, recovered his papers, explored and mapped Lake Tanganyika, and proceeded to the Atlantic, the first European to cross equatorial Africa His expedition was recorded in *Across Africa* (1877) In 1882 he explored the Gold Coast with Sir Richard Burton and was co-author with him of *To the Gold Coast for Gold* (1883)

Cameron. 1 City (pop 3,615), NW Mo, E of St Joseph, platted 1855 It is a railroad and trade center in a farm region 2 City (pop 5,040), co seat of Milam co, E central Texas, S of Waco, in a diversified farming area, founded 1846, inc. 1888 3 City (pop 1,998), W Va, in the Northern Panhandle SE of Moundsville, in a rich farm area, settled 1788.

Cameroon Mountain (kă'mûrōōn), volcanic peak, 13,353 ft high, British Cameroons; the greatest elevation of W Africa The first ascent was made (1861) by Richard Burton

Cameroons, Fr. *Cameroun*, Ger *Kamerun*, former German colony, W Africa, on the Gulf of Guinea and extending N to Lake Chad It is bordered by Nigeria on the west, by French Equatorial Africa on the east and south, and by Spanish Sahara on the south Germany's penetration of the area started c.1885, and by 1902 its possession was recognized. Territory of French Equatorial Africa was added in 1911 In the First World War, French and British troops occupied the Cameroons After the war the territory ceded in 1911 was rejoined to French Equatorial Africa, and in 1919 the remainder of Cameroons was divided into French and British zones, which became mandates under the League of Nations In 1946 the mandates were made trust territories of the United Nations **British Cameroons** (31,150 sq mi, pop. 778,352) consists of two detached sections lying on the eastern border of Nigeria, the more southerly extends to the coast This territory is administered with NIGERIA **French Cameroons** (166,489 sq mi, pop 2,816,000) is administered as a separate territory with the capital at Yaoundé It is mainly a low plateau Along the coast there are mangroves, and in the interior are savannas The leading products and exports are peanuts, cacao, coffee, palm oil, and cotton See Harry Rudin, *Germans in the Cameroons* (1938)

Camiguin (kämēgēn'), island (96 sq mi, 1939 pop 40,805), N of Mindanao, in the Philippine Islands Its central volcano (4,370 ft high), dormant for 75 years, erupted violently in 1948, forcing the entire population to leave the island

Camilla (kumĭl'u), city (pop 2,588), co seat of Mitchell co, SW Ga, S of Albany, in a farm and lumber area, inc 1858

Camille (kumēl'), title given the English translation of the play *La Dame aux camélias* by Alexander Dumas fils The play, made from a novel by the same title, was first presented in Paris in 1852 It was presented in English (1853) in New York city as *Camille, or, The Fate of a Coquette* It has been variously adapted, and its popularity was long continued The part of Marguerite was a favorite vehicle of many great actresses, including Modjeska, Bernhardt, and Duse

Camillus (Marcus Furius Camillus) (kumĭ'lŭs), d 365? B C, Roman hero He was a patrician who, the Roman historians say, was elected dictator five times (396, 390, 386, 368, and 367 B C) and on each occasion won a signal victory He captured Veii, saved Rome from the Gauls, defeated the Aequi and Volsci, took Praeneste, and defeated the Gauls at Alba Longa Modern historians do not accept in full the traditional account of Camillus' victories

Camillus, village (pop 1,133), central N Y, W of Syracuse, in a farm and dairy area, inc 1852 Pocket knives and cutlery are made

Caminha, Pedro Vaz de (pā'drō vazh' du kumē'nyu), fl 1500, Portuguese explorer He sailed in the expedition of Pedro Alvares Cabral and wrote a letter to King Manuel I giving a detailed account of the voyage

Camisards (kămēsar, kăm'ĭsärdz), Protestant peasants of the Cévennes region of France who in 1702 rebelled against the persecutions which followed the revocation (1685) of the Edict of Nantes (see NANTES, EDICT OF) The name was probably given them because of the shirts which they wore in night raids Led by the young Jean CAVALIER and Roland LAPORTE, the Camisards met the ravages of the royal army with guerrilla methods and withstood superior forces in several battles In 1704 Marshal Villars, the royal commander, offered Cavalier vague concessions to the Protestants and the promise of a command Cavalier's acceptance broke the revolt, though some Camisards, including Roland Laporte, refused to submit, and scattered fighting went on until 1710 See A E Bray, *The Revolt of the Protestants of the Cévennes* (1870), H M Baird, *Huguenots and the Revocation of the Edict of Nantes* (1895)

Cammaerts, Émile (ämēl' kă'märts), 1878-, Belgian poet In 1908 he settled in England, becoming a professor at the Univ of London in 1933 He began his literary work by translating the works of Ruskin into French and by 1917 had produced two plays, *Les Deux Bossus* and *La Veillée de Noël* He is best known for his poetry of the First World War, which appeared in French in periodicals and was translated and collected in *Belgian Poems* (1915) and *New Belgian Poems* (1916) Later works, in English, include *Upon This Rock* (1943), a poignant character sketch of the son killed in the war, *The Flower of Grass* (1944), and *Flemish Painting* (1945)

Camões or **Camoens, Luís de** (both lōōēsh' dû kûmõ'ĭsh), 1524?-1580, Portuguese poet, unquestionably the greatest figure of Portuguese literature Born of a poor family of the minor nobility, he studied at the Univ of Coimbra and gained wide familiarity with classic literature He left, however, without finishing, and his life was turbulent In Lisbon he fell deeply in love—probably with one of the queen's ladies in waiting, Dona Caterina de Ataíde—and wrote for his beloved love poems that are fiery and almost flawless Some offense,

probably born of his impetuosity, caused him to be banished from court in 1546 The next year he served as an ordinary soldier in a campaign against Ceuta in Africa and lost an eye Back in Lisbon, he led a riotous life that ended with imprisonment (1552) for wounding a court official He was released in 1553 with the understanding that he would go to serve in India To India he went, over the same route that Vasco da Gama had traveled Apparently he had already begun his most celebrated work, *The Lusiads* [Port *Os Lusiadas*=sons of Lusus, i e , the Portuguese], but this journey may have caused him to make the voyage of Vasco da Gama the central theme of his epic In India he fought in the incessant wars, and then he was given an official post at Macao in China On his way there he spent more than a year in the Moluccas, and after he reached Macao he was in trouble again In 1558 charges were brought against him for maladministration, and he was put aboard a vessel for Goa in India He was shipwrecked but reached Goa in 1561 and was imprisoned briefly He was later again imprisoned for a little while for debt In 1567 he was on his way back to Portugal, but stopped at Mozambique for some time, arriving in Portugal only in 1570—and with the help of friends He brought back with him the manuscript of *The Lusiads*, published in 1572 This won him a royal pension, which was meager and sometimes long delayed in payment His last years were impoverished and were saddened by the fate of King Sebastian In 1580 he died in obscurity His epic had, however, begun to enjoy world-wide fame By 1655 it had appeared in English in a version by Sir Richard Fanshawe Modeled on Vergil and showing the influence of Ariosto, it is deeply indebted to neither and is one of the few great epics of world literature The noble beauty of its poetry is enlivened by vigorous and realistic narrative that embraces not only the voyage of Vasco da Gama but also most of the familiar episodes of Portuguese history, there is a fanciful section describing the reception of Gama and his men on Venus' Isle of Love Apart from *The Lusiads*, however, his sonnets and lyrics would have won him lasting fame J D M Ford edited *The Lusiads* with excellent English notes to accompany the Portuguese text (1946) Many translations of the epic have been made from Fanshawe down through Sir Richard Burton and beyond Camões's exquisite and subtly musical lyrics have, however, largely defied translation

camomile or **chamomile** (both kăm'ümil) [Gr ,= ground apple], name for various related plants, especially the European perennial *Anthemis nobilis*, the English or Roman camomile It has an apple-like aroma and resembles the feverfew, sometimes it has yellow flower heads "Camomile tea," made from the dried flower heads which also contain a volatile oil, has long been valued medicinally, particularly as a tonic, it is now most commonly used as a hair rinse German or wild camomile (*Matricaria chamomilla*), a similar but annual European plant, has had much the same use as the English camomile, both are cultivated for ornament, the *Anthemis* also as a ground cover

Camon (kä'mŏn) [Heb ,=standing place], unidentified place Judges 10 5

Camorra (kumô'ru), Italian secret criminal association in Naples and Sicily Of controversial, probably Spanish, origin, it first came to light in 1830 Its activities were extended by intimidation, blackmail, and bribery until Naples was completely controlled by the organization In 1901 Neapolitan citizens formed an Honest Government League and succeeded in breaking the power of the Camorra, which was finally dissolved after the trial and conviction of 40 members in 1911 Up to that time the Camorra had frequently terrorized Italian immigrants in the United States

camouflage (kă'müflăsh), in warfare, the disguising of objects with artificial aids, especially for the purpose of making them blend into their surroundings or of deceiving the observer as to the location of strategic points The principle, of course, is very old, men crossing sandy deserts or snowy wastes have long known the practice of wearing white or light colors for concealment The development of scientific camouflage was, however, largely a product of the First World War The French, in particular, began using elaborate devices to conceal not only forts but also industrial plants and other military objectives Wire screens were used as a foundation for foliage, and whole false landscapes were created, great care being taken to avoid suspicious shadows that would show in photographs Ships were dazzle-painted to deceive the eyes of the observer as to their course by distortion of perspective In the Second World War these principles were further developed, and camouflage was used on a very large scale by all the major countries at war. The extensive use of aerial bombing made it particularly important to conceal industrial plants, airfields, and military installations All the devices of modern science were employed to conceal real objectives and to create decoy airfields and dummy towns, to make factories look from the air like grainfields, and to make open fields look like factories. There could be, of course, no real calculation of waste of bombs on false objectives when the German air force was attacking Great Britain and when the Allied air forces attacked Germany, but the loss has been estimated as very large The extent of camouflage may be gauged from the report that U S army experts in camouflage spent more than $22,000,000 to camouflage 37 war plants The use of old devices such as dummy guns and protective coloration was also carried to great lengths and reputedly played a large part in some of the major actions of the war

Camp, Walter Chauncey, 1859–1925, American football expert, b New Britain, Conn , grad Yale, 1880 He was a prominent athlete at Yale, where he was football coach after 1888 He later became athletic director Often called the father of American football, Camp had a leading role in developing the game and shaping its rules He originated (1889) the practice of choosing an All-American football team In the First World War he adapted for use in training camps the calisthenics known as the daily dozen He wrote *Foot-Ball How to Coach a Team* (1886), *American Football* (1891), *Training for Sports* (1921), *The Daily Dozen* (1925), and books for boys See biography by H W H Powel (1926)

Campagna di Roma (kämpä'nyä dē rō'ma), lowlying region surrounding the city of Rome, central Italy Mostly abandoned for centuries because of its malarial climate and the lack of water for cultivation, the area has greatly benefited from reclamation works in the 19th and 20th cent Flocks of grazing sheep are a familiar sight, remains of Roman aqueducts and tombs give the landscape a special charm

Campagnola, Domenico (dōmā'nēkō kämpanyō'la), c 1490–c 1564, Italian painter and engraver He was a pupil of Giulio Campagnola and of Titian, whom he assisted in the decorating of the Scuola del Santo, Padua He painted chiefly in the churches of Padua His best-known works are three frescoes in the Scuola del Carmine of Padua, *Four Prophets* (Venice Acad), and *Holy Family* (Pitti Palace) Campagnola is celebrated also for his engravings, woodcuts, and masterly pen-and-ink drawings, which resemble Titian's Examples are in the Uffizi and in the British Museum

Campagnola, Giulio (jōō'lyō), b c 1482, d after 1513, Italian painter and engraver He painted miniatures and altarpieces, but is best known for his finely executed engravings, many of them after the works of Giovanni Bellini and Giorgione

campaign, political, organized effort to secure nomination and election of candidates for government offices or to obtain specific political, economic, or social reforms In the United States, political campaigns center about the nomination and election of candidates for the offices of President and Vice President In each political party such nominations are made every four years at a national CONVENTION preceding the presidential election The contending parties are organized with a national chairman at the top of an elaborate system of national, state, and local committees The size and diversity within each of the two major American parties make the campaign for the presidency the chief effective function of each party, and the campaign manager of the successful candidate is usually Postmaster General in the subsequent cabinet Every available means of publicity is enlisted on behalf of a presidential candidate, with radio and, in 1948, television coverage of the candidate's chief speeches Financial contributions by corporations, individuals, and Federal officeholders are restricted by law Presidential campaigns overshadow and in part determine the outcome of concurrent state and local elections to lesser offices Local campaigns are administered and waged along the same general lines as the presidential In England, the nature of parliamentary government permits the overthrow of the cabinet at any time and necessitates a stronger permanent party organization, since an imminent election is always theoretically possible English parliamentary and local elections are never held concurrently, campaigns are short and intensive, and party expenditures are very moderate and are fixed by law Political campaigns for specific reforms have also been common outside the framework of parties Examples of such campaigns are the agitation for the repeal of the CORN LAWS in 19th-century Britain and the prohibitionist movement in the United States While seeking to bring pressure on political parties, such movements depend primarily on widespread propaganda to bring about a change in public opinion in favor of the desired reform See F R Kent, *The Great Game of Politics* (1930), E M Sait, *American Parties and Elections* (1942)

Campan, Jeanne Louise Henriette (Genest) (zhän' lwēz' ärēĕt' kāpä'), 1752–1822, French educator and author She served as a reader to Louis XV's daughters and as lady in waiting to Marie Antoinette. In 1792 she founded a school for girls at Saint-Germain, which Hortense de Beauharnais attended, and directed it until her appointment (1806) as principal of the academy established by Napoleon at Écouen. She retired in 1814 Among her works, published posthumously, are *Mémoires sur la vie privée de Marie Antoinette* (1823), *Journal anecdotique* (1824), and *Correspondance inédite avec la reine Hortense* (1835).

Campaña, Pedro. see KEMPENER, PIETER DE.

Campanella, Tommaso (tōm-ma'zo kampänĕl'lä), 1568–1639, Italian Renaissance philosopher and poet He entered the Dominican order at the age of 15, and though he was frequently in trouble with the authorities, he never left the Church Imprisoned in 1599 on the grounds that he was plotting against the Spanish rule of Naples, he was released in 1626 on the representation of the pope His best-known work is *Civitas solis* (1623, Eng tr , *The City of the Sun*), an account of a communistic utopian society which closely follows the pattern of Plato's *Republic* Though he retained much of scholasticism and insisted on the preeminence of faith in matters of theology, he emphasized perception and experiment as the media of science His importance, like that of Francis Bacon and Bruno, depends largely on his anticipation of what came to be the scientific attitude of empiricism For his *Civitas solis*, see Henry Morley, ed , *Ideal Commonwealths* (1890)

Campania (kämpa'nya), region (5,250 sq mi , pop 3,696,632), S Italy, extending between the Apennines and the Tyrrhenian Sea from the Garigliano river to the Gulf of Policastro Naples is the capital Including several small islands, the region is divided into the provinces of Avellino, Benevento, Caserta, Naples, and Salerno, all named after their chief cities The coast, mostly high and rocky, is broken by the Bay of Naples and the Gulf of Salerno The plains of Campania have been famous since ancient times for their fertility the hills are covered with vineyards and orange, lemon, and olive groves Industries are on a small scale and are mostly centered around Naples They include tomato and fish canneries and the manufacture of macaroni, soap, chemicals, leather goods, and musical instruments The tourist industry is important about the Bay of Naples Various Italic tribes, Greek colonists, Etruscans, and Samnites lived here before the Roman conquest (4th-2d cent B C) After the fall of Rome the Goths and Byzantines occupied the region, which later became part of the Lombard duchy of Benevento (except Naples and Amalfi) In the 11th cent the Normans conquered it, and in the 12th it became part of the kingdom of Sicily Naples soon rose to prominence, and after the Sicilian Vespers (1282) became the capital of a separate kingdom For the later history of Campania under this regime, see NAPLES, KINGDOM OF

campanile (kämpunē'lē, Ital kampänē'lā) [Ital from Late Latin,= bell tower], Italian form of bell tower, constructed chiefly during the Middle Ages Built in connection with a church or a town hall, it served as a belfry and watch tower and often functioned as a civic or commemorative monument The campanile generally stands as a detached unit At the top is the bell platform, where is concentrated the main architectural emphasis, generally a group of arched openings Originating in the 6th cent , the campaniles were the earliest church towers in Europe and were generally circular in shape, examples of this type remain at Ravenna Beginning with the 8th cent , the square plan became the most usual, being constructed in all parts of Italy The Lombardy section produced the richest development of the campanile Brick is the material most used, often combined with stone for the cornices and string courses, the latter surrounding the tower at each story level in the Roman examples The celebrated campanile of Florence, known as Giotto's campanile (1334), is entirely faced in marble and ornamented with sculptures Also of marble is the leaning tower at PISA The campanile of St. Mark's in Venice, originally built in 888, collapsed in 1902 and was rebuilt in 1905 according to its original design

campanula see BELLFLOWER

Campbell, Alexander (kăm'bul), 1788–1866, clergyman, cofounder with his father, Thomas Campbell (1763–1854), of the DISCIPLES OF CHRIST OF Scotch lineage, both were born in Ireland and educated at the Univ of Glasgow Both were Anti-Burgher Presbyterians, a division opposed to the arbitrary discipline of the main church In 1807 the father went to America, where he was welcomed among the Scotch-Irish in SW Pennsylvania His habit of asking all Presbyterians to join his church members in the communion service was contrary to a ruling of the Anti-Burgher synod in which he was preaching, and his action was condemned by his prebytery Although his synod upheld him, the atmosphere remained so hostile that he and his followers, who were popularly called Campbellites (kăm'bŭlīts, kă'mu-), withdrew In 1809 they formed the Christian Association of Washington, Pa , setting forth its purposes in a "Declaration and Address" which is considered the most important document of the Disciples body In that year Campbell was joined in America by his son, Alexander, and the other members of his family. In 1813, having accepted the doctrine of immersion, the Campbells and their followers were invited to

join the Baptists, until 1830 they were nominally Baptists, but there were differences which caused trouble. Alexander Campbell, who had by this time assumed the leadership, advocated a return to scriptural simplicity in organization and doctrine; his followers became known as Reformers. He founded the *Christian Baptist* (1823) to promote his views and traveled throughout the new Western states, addressing large audiences He edited the *Millennial Harbinger* (from 1830), wrote *The Christian System* (1839), and in 1840 founded Bethany College in West Virginia and became its president Meanwhile, the Reformers had seceded or been forced out of many Baptist churches, and Campbell suggested that they form congregations and call themselves Disciples of Christ Many of the "Christians," led chiefly by Barton Warren STONE, joined congregations of the Disciples, in 1832 the two leaders agreed to unite their efforts See Robert Richardson, *Memoirs of Alexander Campbell* (2 vols , 1868–70)

Campbell, Archibald, 1st **duke of Argyll,** d 1703, Scottish nobleman, eldest son of the 9th earl of Argyll To recover his father's forfeited estates, he supported first James II (even to the point of embracing Catholicism) and later William III He is chiefly remembered for his part in instigating, organizing, and carrying out (under John Campbell, earl of Breadalbane) the horrible massacre of the Macdonalds at Glencoe (1692) He was given several offices and made a duke (1701)

Campbell, Archibald, 3d **duke of Argyll,** 1682–1761, Scottish nobleman As lord high treasurer of Scotland (1705) and commissioner for the union (1706), he aided in joining the kingdoms and was created earl of Islay (1705) He also succeeded his brother John as duke of Argyll and served as a Scottish peer in the united Parliament until his death Unlike his brother, he supported Robert Walpole He held high offices in Scotland and promoted consistently the trade, industry, and schools of his native land

Campbell, Archibald, 5th **earl of Argyll,** 1530–73, Scottish statesman He and Lord James Stuart (later 1st earl of Murray, the half brother of Mary Queen of Scots) became followers of John Knox in 1556 and led troops of the Scottish reformers against those of the regent, Mary of Guise Won by Mary Queen of Scots when she arrived in Scotland (1561), he turned from Knox to her until she proposed marrying Lord Darnley He then tried to enlist Queen Elizabeth's aid against Mary Failing, he returned to Mary's party and is thought to have had some part in the murder of Darnley He was in command of Mary's soldiers when they were defeated at Langside in 1568 by the soldiers under Murray, now regent, but he was reconciled with Murray the next year Becoming a supporter of James VI, he was rewarded with the office of lord high chancellor in 1572

Campbell, Archibald, 8th **earl of Argyll** and 1st **marquess of Argyll,** 1607–61, Scottish statesman He became chief of his powerful clan at his father's death (1638). Charles I attempted to win his support, but he stood firmly for Presbyterianism, and at the Pacification of Berwick (1639) he insisted that the "lords of the articles" be chosen by the estates, not by the king This greatly increased the influence of the Scottish Parliament Still eager for his support, Charles made him a marquess in 1641, but in the civil war Argyll took the field with the Covenanters and was defeated (1645) by royalists under James Graham, 5th earl of Montrose, at Inverlochy and Kilsyth After Montrose's defeat a few months later and after the surrender of Charles to the Scots (1646), Argyll was the mediator between the king and the two Parliaments, attempting to secure a Presbyterian settlement in England He later supported Oliver Cromwell but suffered a serious loss of influence because of the revulsion of feeling in Scotland at the king's execution Hoping that Charles II could be restored as a Presbyterian king, he turned from Cromwell and crowned (1651) Charles II in Scotland, but Scottish opinion was so at odds about his action that Argyll lost all real power He was executed for treason at the Restoration The most powerful Presbyterian leader in Scotland, he pursued, like Cromwell, a practical, if not wholly consistent policy. His *Instructions to a Son* (1661) were written during his imprisonment See biography by John Willcocks (1903)

Campbell, Archibald, 9th **earl of Argyll,** 1629?–1685, Scottish nobleman, son of the 8th earl An ardent and active royalist and a Protestant, he opposed extreme measures against the COVENANTERS and so incurred the enmity of the duke of York (later James II), who was in 1680 high commissioner of Scotland Argyll was accused of treason and sentenced to death in 1681 He escaped to Holland, was a leader of the rebellion in favor of the duke of MONMOUTH, was captured, and was beheaded

Campbell, Colin, Baron Clyde, 1792–1863, British general He fought in the Peninsular Wars, commanded troops in various parts of the empire, and was prominent in the Crimean War. For his services as commander in chief in India in suppressing the Sepoy Rebellion he was created baron in 1858 He was made a field marshal in 1862 See biography by Lawrence Shadwell (2 vols , 1881)

Campbell, George Washington, 1817–98, American horticulturist and grape breeder, living most of his life at Delaware, Ohio Though he did not originate the Delaware grape, he rediscovered its worth and was so influential in disseminating it that it received its present name He originated many grape varieties, including the important Campbell early grape His lectures and papers had a marked influence on the development of viticulture in the United States

Campbell, John, 2d **duke of Argyll** and **duke of Greenwich** (grĭn'ĭj), 1678–1743, Scottish general He entered the army at 16 and became (1703) colonel of the Scottish house guards For his ardent support of the union of England and Scotland he was created (1705) earl of Greenwich He served under Marlborough in the War of the Spanish Succession, in spite of his jealousy of his superior, and rose to be commander in chief in Spain in 1711 On his return to Scotland he actively supported the succession of George I, commanded the army in Scotland which put down the rebellion of the JACOBITES in 1715, and was made duke of Greenwich in 1719 His ambitions brought him high political offices, but he was tactless and too forthright, and his later career was uneven

Campbell, John, 1st **earl of Breadalbane** (brudôl'bĭn, brĕd–), c 1635–1717, Scottish chieftain He took part in the royalist rising of 1654 and helped General Monck to further the Restoration In 1689 he took the oath to William III and was authorized to receive the submission of the clans The Macdonalds of Glencoe were unavoidably detained in taking the oath, and Campbell, with the authorization of Sir John Dalrymple, used the delay as a pretext for the brutal massacre at Glencoe (1692), destroying that clan to wipe out old scores under the cloak of official action He was elected to the united Parliament in 1713, but joined in the Jacobite rebellion of 1715

Campbell, John, 1st **earl of Loudoun** (lou'dun), 1598–1663, Scottish statesman A member of the moderate covenanting party (see COVENANTERS), he supported Alexander HENDERSON at the general assembly of 1638 He was lord chancellor of Scotland (1641–60) and was in 1653 defeated by General Monck in the royalist rising

Campbell, John, 4th **earl of Loudoun,** 1705–82, British general He was commander in chief in America (1756–58) and was censured for withdrawing (1757) without attack on an expedition against Louisburg in the French and Indian Wars He was probably lucky to escape from the larger French naval force without disaster

Campbell, John, 1st **Baron Campbell,** 1779–1861, English jurist and statesman He became lord chief justice (1850) and lord chancellor (1859) As head of the Real Property Commission he made valuable reports on the real estate laws of England, and he sat in Parliament as a Whig from 1830 to 1849 It was partly upon his advice that England recognized the Confederacy as a belligerent in the American Civil War He wrote *Lives of the Lord Chancellors* (1845–47) and *Lives of the Chief Justices* (1849–57)

Campbell, John, 1653–1728, American editor, b Scotland Emigrating to Boston, he became postmaster of the city in 1702 and began writing newsletters for regular patrons In 1704 he started printing these as a weekly half sheet, devoted mostly to foreign news, entitled the Boston *News-Letter* Sold to Bartholomew Green in 1722, it was the first successfully established paper in America in spite of a small circulation

Campbell, John Archibald, 1811–89, American jurist, b Washington, Ga After graduating at 14 from Franklin College (now the Univ of Georgia), he studied at West Point but had to leave after his father's death and at 18 was, with Robert Toombs, admitted to the bar by special act of the legislature He moved to Alabama, gained a reputation as a lawyer, was a conspicuous figure in the Nashville Convention (1850), and was in 1853 appointed an Associate Justice of the U S Supreme Court, where he generally favored strict construction of the Constitution He was anxious to avoid the outbreak of the Civil War and dealt, on behalf of Secretary of War William H Seward, with the Confederate commissioners, assuring them of what he thought was the truth—that the Federal troops would evacuate Fort Sumter When, instead, it was provisioned, he was accused of bad faith He resigned in 1862, was a Southern delegate at the unsuccessful Hampton Roads Peace Conference, and was an official in the Confederate government He was imprisoned for four months after the war, then went to New Orleans and reestablished his reputation as a lawyer there He was one of the lawyers in the SLAUGHTERHOUSE CASES See biography by Henry G Conner (1920)

Campbell, John Charles, 1867–1919, American educator, b La Porte, Ind , grad Williams, 1892. He taught in mountain communities of the South and for many years was director of the Southern Highlands division of the Russell Sage Foundation He wrote *The Southern Highlander and His Homeland* (1921) Campbell cherished the idea of folk schools for Southern mountaineers modeled after the Danish FOLK SCHOOL After his death, his wife, **Olive Dame Campbell,** 1882–, visited Denmark to study the folk schools there and in 1925, with Marguerite Butler, founded at Brasstown, SW N C , the John C Campbell Folk School, on a mountain farm given by a member of the community There are no credits or examinations, emphasis being placed on the education of the individual student (18–30 years old) and the development of the community The school admits both day and boarding students and is nondenominational It has been active in the development of cooperative enterprises, including a farmer's association, a creamery, a savings and loan association, a craft guild, and a public-health nursing service Mrs Campbell wrote *The Danish Folk School* (1928) and, in collaboration with Cecil SHARP, collected a book of *English Folk Songs from the Southern Appalachians* (1932)

Campbell, John Francis, 1822–85, Scottish Gaelic scholar He is known for *Popular Tales of the West Highlands* (4 vols , 1860–62) and *Leabhar na Feinne* [book of the Feinians] (1872), a collection of native Ossianic songs A meteorologist also, he invented an instrument to record the intensity of sunshine

Campbell, Sir Malcolm, 1885–1949, English automobile racer, b Kent A racing enthusiast from boyhood, Campbell set many speed records driving motorcycles, airplanes, and automobiles and in 1931 was knighted for his accomplishments. Driving his famed automobile *Bluebird* at Bonneville Flats, Utah, in 1935, Sir Malcolm was the first to reach the 300 mi per hour mark Four years later he topped the existing speedboat record

Campbell, Olive Dame. see CAMPBELL, JOHN CHARLES

Campbell, Mrs Patrick, 1865–1940, English actress, whose maiden name was Beatrice Stella Tanner She made a London debut in 1888 but achieved her first success in 1893 in the title role of Pinero's *Second Mrs Tanqueray* She appeared with Beerbohm Tree (1894–95) in Ibsen's *Little Eyolf* and with Forbes-Robertson (1895–98) as Juliet, Lady Macbeth, and Ophelia In 1901 she made the first of her numerous tours to the United States, playing Pinero roles and Sudermann's *Magda* In 1904 she gave memorable performances as Mélisande to the Pelléas of Sarah Bernhardt in Maeterlinck's play, and in 1912 she was a great success when she created the role of Eliza Doolittle in Shaw's *Pygmalion* See her *My Life and Some Letters* (1922)

Campbell, Reginald John, 1867–, English clergyman At first a Congregationalist, he was pastor (1903–15) of the City Temple, London Wide discussion followed his *New Theology* (1907) Leaving the Congregational ministry, he was ordained (1916) a priest in the Church of England He was chancellor of Chichester Cathedral from 1930 to 1946 Among his many publications are *A Faith for Today* (1900), *Christianity and the Social Order* (1908), *The Call of Christ* (1933), and *The Peace of God* (1936)

Campbell, Robert· see ROB ROY

Campbell, Robert, 1804–79, American fur trader and merchant, one of the mountain men, b Ireland He came to the United States c 1824 and settled in St Louis Having been advised to lead an outdoor life on account of his lungs, he joined William Henry Ashley's fur trapping expedition of 1825 He trapped and traded in the Rocky Mts in association with Thomas Fitzpatrick, Jedediah Smith, James Bridger, and the Sublette brothers until 1832, when he and William Sublette formed a partnership, which offered competition to the American Fur Company Sublette and Campbell suffered reverses, after which they confined their activities to the mountain territory The partnership was dissolved in 1842, and Campbell returned to St Louis, where he amassed a fortune in merchandising, real estate, and banking In 1851 and again in 1869 he served as Indian commissioner

Campbell, Robert, 1808–94, Canadian fur trader and explorer, b Scotland In 1832 he was employed by the Hudson's Bay Company, which sent him in 1834 to the Mackenzie river region, where he remained until 1852 He discovered the Pelly river in 1840, descending it in 1843 to its confluence with the Lewes to form the Yukon Here he established Fort Selkirk Later (1850–51) he followed the Yukon to its junction with the Porcupine at Fort Yukon In 1852 he went to London to assist in preparing maps of the Canadian Northwest, afterward returning to Canada, serving as chief factor of the Saskatchewan district until his retirement in 1870 He wrote *The Discovery and Exploration of the Pelly River* (1883)

Campbell, Roy, 1901–, British poet, b South Africa, studied at Oxford His first volume of poetry, *The Flaming Terrapin* (1924), was sensationally successful, later ones, including the satires *Wayzgoose* (1928) and *The Georgiad* (1931), did not equal it An avowed fascist, he lived in Spain and fought with Franco's army in the Spanish civil war, writing meanwhile *Mithraic Emblems* (1936) and *Flowering Rifle* (1936) He was in the British army in the Second World War Among his later works is

Talking Bronco (1946) See his autobiography, *Broken Record* (1934)

Campbell, Thomas, 1763–1854, American clergyman, a founder of the DISCIPLES OF CHRIST See CAMPBELL, ALEXANDER, his more famous son

Campbell, Thomas, 1777–1844, Scottish poet *The Pleasures of Hope* (1799), a didactic poem, established his reputation, which was great in his life but later declined sharply Among his other poems were "Lord Ullin's Daughter," "Hohenlinden," "The Battle of the Baltic," "Ye Mariners of England," and the verse tales *Gertrude of Wyoming* (1809) and *Theodric* (1824) From his works come many familiar lines for example, "distance lends enchantment to the view" (*Pleasures of Hope*) and "coming events cast their shadows before" ("Lochiel's Warning") Campbell edited *Specimens of the British Poets* (7 vols , 1819) He was editor (1820–30) of the *New Monthly Magazine* and one of the founders of the Univ of London

Campbell, Wilfred (William Wilfred Campbell), 1861?–1918, Canadian author, b Berlin (now Kitchener), Ont , educated at the Univ of Toronto and Harvard He entered the Episcopal ministry in 1885 but resigned six years later and thereafter was a civil servant in the dominion archives bureau at Ottawa Although he wrote several historical novels and poetic dramas and published several volumes of verse, his fame rests mainly on his *Lake Lyrics* (1889), a volume of nature poetry His *Collected Poems* appeared in 1905 He also edited the *Oxford Book of Canadian Verse* (1913) See *The Poetical Works of Wilfred Campbell* (with a memoir by W J Sykes, 1923), study by C F Klinck (1942)

Campbell, William, 1745 81, patriot officer in the American Revolution, b Augusta co , Va , brother-in-law of Patrick Henry He fought in Lord Dunmore's War (1774) and helped expel the royal governor from Williamsburg in 1776 Campbell and his group of Virginia riflemen in 1780 joined Sevier and Shelby at Kings Mt (see CAROLINA CAMPAIGNS), where he was in command Later Campbell saw action at Guilford Courthouse, at Eutaw Springs, and in the Yorktown campaign

Campbell, William Wallace, 1862–1938, American astronomer From 1891 to 1930 he was at Lick Observatory, Mt Hamilton, Calif , of which he became director in 1901 From 1923 until his retirement in 1930 he was president of the Univ of California His works include *Stellar Motions* (1913)

Campbell 1 City (pop 1,786), SE Mo , SE of Poplar Bluff near the Ark line, inc 1900 It has cotton gins and a sawmill **2** City (pop 13,785), NE Ohio, near Youngstown, called East Youngstown until 1926, when it was incorporated as a city Steel is made here

Campbell-Bannerman, Sir Henry, 1836–1908, British statesman He entered Parliament as a Liberal (1868) was secretary of state for Ireland (1880–85), and was knighted (1895) He was secretary of state for war (1886, 1892–95) and became party leader (1898) in succession to Sir William Harcourt In 1905 on the resignation of Arthur Balfour, Conservative, he became prime minister Before ill-health caused his retirement in 1908 he had furthered many Liberal measures, including that of autonomy for the Transvaal and the Orange Free State

Campbellford, town (pop 3,018), S Ont , in the valley of the Trent river and NW of Belleville

Campbellites see CAMPBELL, ALEXANDER, and DISCIPLES OF CHRIST

Campbellsport, village (pop 1,094), E Wis , SE of Fond du Lac, inc 1902

Campbellsville (kăm'bulzvĬl), city (pop 2,488), co seat of Taylor co , central Ky , SSW of Lexington, in an area of farms, timber, and limestone A junior college (coeducational) is here

Campbellton (kăm'bultŭn), town (pop 6,748), N N B , on the Restigouche river near the head of Chaleur Bay It is a starting point for canoe, fishing (salmon and trout), and hunting trips into the forested interior Across the river, at Mission Point, is Micmac village

Campbeltown (kăm'bultun, -toun), burgh (pop 6,309), Argyllshire, Scotland, on the eastern side of S Kintyre peninsula Having a fine harbor, it early became an important seaport and fishing center It has whisky distilleries There is a 12th-century granite cross

Camp Borden, largest military training establishment in Canada, S Ont , NNW of Toronto It covers an area of 20,000 acres and has also an armored-vehicle range at Meaford, 60 mi to the northwest

Campeche (kămpā'chĕ, Span kampā'chā), state (19,672 sq mi , 1946 estimated pop 106,498), SE Mexico, on the Gulf of Campeche Comprising most of the western half of the YUCATAN peninsula, it lies in hot, humid, and unhealthful lowlands Rainfall in the southwestern sector is heavy Much of the state is extensively forested, and logwood (called *campeche* in Spanish) is one of the chief exports Agriculture (especially the growing of henequen) and stock raising are important, and some minerals are exploited From Campeche as a base Francisco de MONTEJO led (1531–35) expeditions against the Maya The coast was a hide-out for pirates from the 17th cent to the 19th The principal ports are Campeche and Carmen (pop 7,687) which is on an island at the entrance to the Laguna de Términos **Campeche,** the capital (pop 23,277), was founded (1540) by the younger Montejo Backed by low hills, it is picturesque, with many impressive colonial ruins It was sacked several times by English buccaneers The port is shallow, and vessels anchor far out, but some logwood, cotton, hides, tobacco, salt, and cigars are exported Crossing the state from north to south, a single rail line connects the capital with Mérida, Yucatan, and the eastern panhandle of Tabasco

Campeggio, Lorenzo (lōrĕnt'sō kampĕ'djō), 1472–1539, Italian churchman and diplomat, cardinal of the Roman Church He had wide repute as a jurist when the death of his wife turned him to the Church (c 1510) In 1512 he became bishop of Feltre, and in 1513 cardinal He was chosen as legate for the most delicate missions In 1518 he went to England to secure the adherence of HENRY VIII to an alliance against Turkey He did not succeed, but he received (1524) the bishopric of Salisbury from Henry, which he held *in absentia* until 1534 In 1528 Cardinal Campeggio went again to England to act with Cardinal WOLSEY as judge in the divorce of KATHARINE OF ARAGON He followed his instructions to temporize and adjourned the hearing Cardinal Campeggio was sent to Germany in 1524 to attempt a pacification of the Lutherans, but except for a promise from Charles V to enforce the Edict of Worms he obtained nothing He was ardently desirous for the reformation of the Church, especially of the papal court and of all the organs of central administration at the Holy See

Camperdown (kăm'purdoun"), Dutch *Kamperduin* (kăm'purdoin") [Dutch,=the dune of Kamp], locality near the village of Kamp, North Holland prov , NW Netherlands, on the North Sea Here in 1797 the British defeated the Dutch, then allies of the French, in a naval battle

Camp Fire Girls, American organization for girls from 7 to 18 years old It was founded (1910) by Luther Halsey Gulick (1865 1918) and other educators "to perpetuate the spiritual ideals of the home" and "to stimulate and aid in the formation of habits making for health and character" The seven crafts of its program are those of the home, the creative arts, the outdoors, frontiers (of science), business, sports and games, and citizenship The Camp Fire members are divided into three age groups—Blue Birds (7 to 10), Camp Fire Girls (10 to 15), and Horizon Clubs (15 to 18) The official organ of the organization is the *Camp Fire Girl* (a monthly magazine)

Camphausen, Ludolf (lōō'dōlf kamp'houzun), 1803–90, Prussian statesman He headed the liberal ministry of 1848 and was an important figure at the Frankfurt Parliament

Camp Hill 1 Town (pop 1,147) E central Ala , NE of Montgomery, in a farm area, inc 1907 **2** Residential borough (pop 3,630), S Pa , across the Susquehanna from Harrisburg, founded 1756 It has a state industrial school

camphor, white, crystalline solid with a characteristic odor and taste, a compound of carbon, hydrogen and oxygen, melting at 176°C and boiling at 204°C The natural variety, Japan camphor, is obtained by distillation (using steam) of the wood of the camphor tree (*Cinnamomum camphora*) native to China, Japan, and Formosa (its chief source) It is also prepared synthetically from oil of turpentine. Camphor is used in the manufacture of celluloid, being mixed with pyroxylin, of some perfumes, of disinfectants, of explosives, of some lacquers, and as a moth preventive It is used in medicine as a stimulant, a diaphoretic, and an inhalant Camphor ice is a mixture, containing principally camphor and wax, used for external application Camphor is practically insoluble in water but soluble in alcohol, ether, chloroform, and other solvents The alcoholic solution is known as spirits of camphor The camphor tree is now cultivated in the S United States

Camphuysen, Dirk Rafelszoon (dĬrk' ra'fĕlsōn kămp"hoi'zŭn), 1586–1627, Dutch painter and poet, author of short religious poems of great merit A preacher, he was dismissed and persecuted as a Remonstrant Most of the small, exquisitely drawn and colored interiors and landscapes hitherto ascribed to him are now believed to have been painted by his nephew, **Raphael Camphuysen** (ra'faĕl), 1598–1657, and his son, **Govert Camphuysen** (gō'vĬrt), 1624–1674?, who was a court painter at Stockholm and executed landscapes with animals in the style of Paul Potter

Campi, Giulio (jōō'lyō kăm'pē), c 1500–c 1572, Italian painter and architect, founder of a school of painters at Cremona He was a pupil of his father, Galeazzo Campi (c 1475-1536), a well-known painter, and of Giulio Romano and studied the works of Correggio and Raphael Giulio produced many excellent altarpieces and frescoes in Milan, Mantua, and Cremona, the frescoes in the Church of Santa Margherita, Cremona, being entirely his work Among his pupils were his two brothers, **Cavaliere Antonio Campi** (kävalyā'rā ăntō'nyō), b before 1536, d 1591, painter, architect, and historian of Cremona, and **Vincenzo Campi** (vēnchān'tsō), 1532–91, whose works consist principally of portraits and still life Another brother was **Bernardino Campi** (bĕrnärdē'nō), 1522–c 1590, a painter of great skill with a vigorous and original style, excelling in fresco painting and portraiture Bernardino's most important work is the series of biblical frescoes in the cupola of San Sigismondo, Cremona, a work of colossal dimensions admirably executed

Campian, Thomas see CAMPION, THOMAS

Campin, Robert (kăm'pĬn), 1375–1444, Flemish painter of the school of Tournay He is usually identified with the Master of Flémalle, whose *Annunciation* (Brussels) and *Good Thief* (a fragment from an altarpiece in the Stadel Inst , Frankfurt) are famous Also attributed to Campin are *Virgin and Child* (National Gall , London), *God Manifesting the Dead Christ, Virgin and Child with Angels* (Metropolitan Mus), two heads (Johnson Coll , Philadelphia), and two panels representing *Heinrich Werle* and *St Barbara* respectively (Prado) The work of Campin has only recently been distinguished from that of his celebrated pupil, Roger van der Weyden

Campina (kŭm'pēnä), town (pop 16,963), S central Rumania, in Walachia, NW of Ploesti It is a major petroleum center

Campinas (kămpē'nŭsh), city (pop 77 779), E São Paulo, Brazil Not long ago one of the greatest coffee centers of the world, Campinas suffered from depletion of the soil in the surrounding area and from the falling price of coffee Now the region has diversified farming which produces cotton, fruit, sugar, and dairy products and has processing plants, including cotton and silk mills There is an agricultural experiment station The musician Antonio Carlos Gomes was born here

Campine (kămpēn', Fr kāpēn'), Flemish *Kempen* (kĕm'pun), region in Limburg prov and Antwerp prov , NE Belgium, and in North Brabant prov , S Netherlands It is a coal-mining area Once covered by moors and marshes, it has been partially reclaimed Turnhout and Hasselt are the chief towns

Campion, Edmund (kăm'pĕun), c 1540–1581, English Jesuit martyr, educated at St Paul's School and St John's College, Oxford As a fellow at Oxford he earned the admiration of his colleagues and his students and the favor of Queen Elizabeth by his brilliance and oratorical ability He went (1569) to Dublin to help in the proposed restoration of the university there Though he had reluctantly taken orders as a Protestant, he had open Roman Catholic leanings and fled in disguise (1571) to England and then to the Continent, where he studied at Douai, joined (1573) the Society of Jesus, and was ordained (1578) In 1580 he and another Jesuit, Robert PERSONS, were sent as Jesuit missionaries to England Campion's travels were marked by many conversions and did much to guarantee the persistence of Roman Catholicism in England Copies of his secretly printed pamphlet, *Decem rationes* [10 reasons] against the Protestants, appeared at Oxford in 1581 The long pursuit by the government ended (July, 1581) with the taking of Campion He was racked three times, but though his body was broken he conducted debates with Protestant theologians brilliantly and won more converts He defended himself ably against trumped-up charges of sedition but was nevertheless condemned and hanged, drawn, and quartered He was beatified in 1886 See biography by Evelyn Waugh (1935)

Campion or **Campian, Thomas,** 1567–1620, English poet, composer, and lutanist, a physician by profession He wrote Latin poetry and masques for the English court, but he is most important for his fresh, varied lute songs, published in *A Book of Ayres* (1601) and in four similar collections He also wrote *Observations of the Art of English Poesie* (1602), in which he developed the practice of rhyming, and *A New Way of Making Fowre Parts in Counterpoint* (1613)

camp meeting, outdoor religious meeting held usually in the summer and lasting for several days The camp meeting was a prominent institution of the American frontier It originated under the preaching of James McGREADY in Kentucky early in the course of a religious revival (c 1800) and spread into the West as that movement extended its influence Either no meetinghouses existed or they were too small to hold the immense crowds that flocked to hear the noted revivalist preachers People from a distance brought bedding and provisions in order to camp on the grounds As the meetings developed they were directed by a number of preachers who relieved each other in carrying on the services or who preached simultaneously in different parts of the camp grounds Shouting,

shaking, and rolling upon the ground frequently accompanied the tremendous emotional release which followed upon "conversion," though these extravagances were opposed and discouraged by conservative ministers Camp meetings were usually held by evangelical sects, such as the Methodists and Baptists, and by the Cumberland Presbyterians, Christians, and other newer denominations which developed out of the religious revival In modified form they continued to be a feature of social and religious life in the region between the Alleghenies and the Mississippi river until comparatively recent times, in a sense, they survive in summer conferences and assemblies, such as the Chautauqua Institution and the Ocean Grove Camp Meeting Association

Campoamor, Ramón de (ramōn' dā kämpōämōr'), 1817–1901, Spanish poet One of the most popular poets of his time in Spain and Spanish America, he created types of short poems exemplified in the titles *Doloras* (1846), *Pequeños poemas* (1872–74), and *Humoradas* (1886–88) They are written in simple language and are sentimental and humorous His somewhat prosaic approach to poetry, embodied in his poems, is expressed also in his *Poética* (1883) Less known are his two long poems, *Colón* [Columbus] (1853) and *El drama universal* (1869) Some of his poems are translated in Thomas Walsh, *Hispanic Anthology* (1919), and James Fitzmaurice-Kelly, *Some Masters of Spanish Verse* (1924)

Campobasso (käm"pōbas'sō), town (pop 17,043), capital of Campobasso prov, Abruzzi e Molise region, S central Italy, in Molise It is an agricultural center with cement, soap, and cutlery manufactures There is a medieval castle

Campobello (käm"pōbĕ'lō), island (pop 1,181), c 8 mi long and 3 mi wide, in Passamaquoddy Bay, between Maine and New Brunswick The village of Campobello on the island's west coast is only 3 mi E of Eastport, Maine The island passed to Canada by the Convention of 1817 It was originally granted by Governor Campbell of Nova Scotia to Admiral William Owen in 1767 and was held by his descendants till 1880 A syndicate of Boston and New York businessmen then purchased it and made it into a summer resort James Roosevelt, father of President Franklin D Roosevelt, was one of the first to build a summer cottage there The shores are irregular, rocky, and picturesque, and the interior is covered with a dense forest of fir and spruce In May, 1866, the island was attacked by some hundreds of Fenians under Gen Dorian Killian, but the attempt was frustrated by British and American war vessels

Campo Formio, Treaty of (kam'pō fôr'myō), Oct, 1797, peace treaty between France and Austria, signed near Campo Formio, a village near Udine, NE Italy, then in Venetia It generally ratified the preliminary Peace of Leoben, signed at the conclusion of Bonaparte's Italian campaign (see NAPOLEON I) Bonaparte signed for France, Count Cobenzl for Austria Austria ceded its possessions in the Low Countries (the modern Belgium) to France and secretly promised the left bank of the Rhine The republic of Venice, invaded despite its attempts to maintain neutrality, was dissolved and partitioned all Venetia E of the Adige, Istria, and Dalmatia passed to Austria, the present provinces of Bergamo and Brescia went to the newly founded CISALPINE REPUBLIC, the IONIAN ISLANDS went to France Emperor Francis II undertook to summon a congress at RASTATT to settle the affairs of the Holy Roman Empire

Camulodunum · see COLCHESTER, England

Camus, Albert (albĕr' kämü'), 1913–, French writer His first published work was *Noces* (1939), sketches of his native Algiers In the Second World War he was one of those responsible for *Combat*, a newspaper of the resistance Influenced by Kafka, Camus's later works have much in common with existentialism, although he does not identify himself with this group *Le Mythe de Sisyphe* (1942) is a philosophic essay, his novels *L'Étranger* (1942, Eng tr, *The Stranger*, 1946) and *La Peste* (1947, Eng tr, *The Plague*, 1948) express the contemporary feeling of the absurdity of human life As a journalist he is lucid and courageous Of his plays, *Caligula* (1944) and *Le Malentendu* (1944) appeared in English translation as *Caligula and Cross Purpose* (1948)

Cana (kā'nŭ), ancient town of Galilee Here Jesus performed His first miracle by turning water into wine at a wedding John 2 1,11, 4 46,54, 21 2 Two modern towns claim to be the Old Cana—Kefr Kenna, NE of, and close to, Nazareth, and Kana-el-Jelil, N of Nazareth

Canaan (kā'nun) **1** Son of Ham and the eponymous ancestor of the Canaanites Gen 9 20–27, 10 6,15, 19 **2** Name given by the Hebrews to Palestine before they occupied it It is the country lying between the Jordan, the Dead Sea, and the Mediterranean It was the promised land of the Israelites, and after their delivery from Egypt they subjugated it Gen 12 5, Ex 3 8, Num 13 17,29, 14 45, 21 3, Joshua 22 11,32 Judges 1 The Canaanites are the inhabitants of Canaan except in Mark 3 18, where the name signifies one of the ZEALOTS Chanaan is a variant of Canaan

Canaan **1** Unincorporated village (pop 1,215) in North Canaan town, NW Conn, in the Taconics It is the shopping center and railroad station of a large resort area The village of East Canaan has magnesium deposits The town of Canaan lying south includes Falls Village at the falls of the Housatonic **2** Town (pop 1,377), W central N H, E of Lebanon, settled 1766, inc 1770 A resort, it also produces lumber

Canachus (kā'nŭkŭs), fl 6th cent B C, Greek sculptor of Sicyon, known for his great statues of Apollo He executed one in bronze for Miletus and one in cedar for Thebes

Canada (kā'nŭdu), nation (3,847,597 sq mi, 1950 estimated pop 13,707,000), N North America, member of the British Commonwealth of Nations The population in 1941 (excluding Newfoundland) was 11,506,655 The capital is OTTAWA Canada occupies all the continent N of the United States except for the U S -owned Alaska in the far northwest and the tiny French islands of St Pierre and Miquelon in the Atlantic It consists of 10 provinces —NEWFOUNDLAND (which voted only in 1948 to join Canada), NOVA SCOTIA, NEW BRUNSWICK, PRINCE EDWARD ISLAND, QUEBEC, ONTARIO, MANITOBA, SASKATCHEWAN, ALBERTA, and BRITISH COLUMBIA—and includes the NORTHWEST TERRITORIES and the territory of YUKON The provinces form a union that controls the territories Canada is an entirely autonomous political unit, although the nominal head of its government is the king of Great Britain and Northern Ireland, his official acts regarding Canada and those of his representative, the governor general, are completely determined by the Canadian ministers, who are responsible to the Canadian Parliament The government draws its authority from the British North America Act of 1867, which is the Canadian constitution, it is in general outline much like the Constitution of the United States, the most striking difference being that in Canada the powers not expressly granted to the provincial governments are reserved to the government of the confederation of provinces The provinces have power to administer and legislate on matters of property and civil rights, education, and local affairs generally The Canadian Parliament, consisting of a House of Commons and a Senate, has the general powers of legislation and government The nation is commonly called the dominion of Canada, but the title is not official or even quite correct, and since the Statute of Westminster set up the British Commonwealth of Nations, the term *dominion* has tended to fall into disuse. The huge nation sprawls across the continent from the Atlantic, where it is deeply indented by the Gulf of St Lawrence, to the Pacific, where the mountains run into the sea. In the south it is separated from the United States by a long-stretching border, the line marked in part by the Great Lakes, but for most of its length a land border, much adjusted in the past Canada fronts in the north on the long coast of the Arctic Ocean from the border of Alaska eastward Boothia Peninsula and the forbidding islands of the ARCTIC ARCHIPELAGO thrust far into the Arctic, and Canada has at least nominal sovereignty to the North Pole in this quadrant In the east Ellesmere Island all but touches the coast of Greenland high in the arctic regions The north coast of Canada is deeply cut by gigantic Hudson Bay, which offers the shortest route to the great interior of the continent, but not an easy way because the bay and rivers are ice-locked for much of the year The extreme northeast edge of the continent is also very cold, where the Labrador Current sweeps down along the inhospitable shore of Labrador Just to the south it meets and mingles with the warm Gulf Stream, giving birth to the incessant fogs of Newfoundland The provinces about the Gulf of St Lawrence and on the coast south to the international boundary with Maine—the Maritime Provs of Nova Scotia (with Cape Breton Island), Prince Edward Island, and New Brunswick—have the narrowing northern end of the Atlantic coastal plain of North America Here too in the mountains of New Brunswick and the Gaspé Peninsula (of Quebec prov) the Appalachian Mts end S of the St Lawrence river The Maritime Provs with their forests, their deep-cut coves, and the many rivers of a rainy land offer entrancing scenery that has grown more famous with the passing of time The old standard occupation of the region is fishing, and it is possible that Europeans were coming to the Grand Banks of Newfoundland—one of the most notable fisheries of the world—before Columbus reached America Fishing was later supplemented by lumbering, and today the forest yields also the pulp for paper mills The rivers have been harnessed for hydroelectric power, and projects have been advanced for using the phenomenally high tides of the Bay of Fundy (between Nova Scotia and New Brunswick) for practical purposes HALIFAX is one of the great ports of the Atlantic seaboard, and SAINT JOHN, N B, has been of some prominence particularly for shipbuilding The minerals of the Maritime Provs have also been put to some use, and farming has been productive in limited areas since first the French settled ACADIA The heart of Old Canada (or rather of New France) was, however, farther to the west in the present province of Quebec Here the St Lawrence river opens a way from the Atlantic to the huge North American central plains E of, and about, the Great Lakes, which lie on the border with the United States Here in S Quebec and in SE Ontario the French established their habitant civilization, with settled farmsteads under the feudalistic seigneurial regime on the St Lawrence Here are the two great cities of Quebec prov, QUEBEC itself and MONTREAL, from which once fur traders and adventurers went out to pierce the continent and to which now the rich produce of the interior comes to the sea Quebec prov is still the home and fortress of the French Canadians, while Ontario shows more the mark of the long British heritage The cities of Ontario, like those of Quebec, have developed much industry TORONTO, HAMILTON, LONDON, and WINDSOR, in the region of the E Great Lakes, are tied together and tied to the West by rail and road and are busy with commerce and with industries, ranging from simple food processing to the manufacture of automobiles and heavy machinery Like S Quebec, SE Ontario also has much diversified agriculture, including orchards, tobacco fields, and dairy farms At the western end of the Great Lakes are the twin lake ports of Port Arthur and Fort William, for shipment of produce from the Western prairies Settlement in the provinces of Quebec and Ontario is, however, concentrated in the south, for N of the St. Lawrence and its tributary, the Ottawa, rises the Laurentian Plateau (also called the Pre-Cambrian Shield or the Canadian Shield), a great barrier stretching from the Atlantic around Hudson Bay and its deeper indentation, James Bay, westward across Ontario and into the Prairie Provs of Manitoba and Saskatchewan It comes down to the St Lawrence at the Thousand Islands, and the lower St Lawrence is held between it and the Appalachian highlands The plateau is a land of rocks, small mountain ranges, and rolling country reaching in the north to the BARREN GROUNDS It is in large part heavily forested and is interrupted by many lakes and streams. To a large extent this north country is still a land of the fur trader, and the old ports of Rupert House, Fort Albany, York Factory, Port Nelson, and Churchill persist, in the southern part there are regions attracting the sportsman and the vacationer Especially of late its mineral possibilities have been explored (aluminum, nickel, gold, silver, copper, and platinum), and its forests have yielded lumber. A strip of clay soil S of James Bay

has proved of agricultural value. To the west of the Great Lakes lie the Prairie Provs, Manitoba, Saskatchewan, and Alberta. They are one of the great wheatgrowing regions of the world. The plains, separated from those of the United States only by an imaginary line, rise more or less rapidly to the Great Plains and then through foothills to the great barrier of the Rocky Mts, which separates Alberta from British Columbia. The provinces have many lakes and rivers. Those in the east, such as Lake Winnipeg, Lake Manitoba, and the others linked with them, the Red River of the North, the Saskatchewan, and the Hayes, Nelson, and Churchill rivers, are connected with Hudson Bay, those of NW Alberta, notably the Athabaska and the Peace, are connected through Lake Athabaska, the Slave river, and Great Slave Lake with the northern system of the Mackenzie. A few in the south are part of the Missouri drainage. The first agricultural settlement in the Prairie Provs was the RED RIVER SETTLEMENT in the region where the metropolis, WINNIPEG, now stands. Real development came to this domain of the fur trader only after the Canadian Pacific Railway reached the area. Cattle raising was superseded by wheat farming, which is still dominant, though the hard times of the droughts caused a recession in the late 1920s and the 1930s and now there is more of a trend to diversified farming with some cattle raising. Settlement has been centered in the south (with the notable exception of the Peace river valley), and the larger cities (Winnipeg, REGINA, SASKATOON, EDMONTON, and CALGARY) are in the south half. Agricultural production in this "breadbasket of the world" is supplemented by other resources. Alberta has vast coal reserves (now being exploited) and booming oil fields. The cities in this part of the Canadian West have in recent years, particularly in the Second World War, seen a tremendous increase in industrial plants devoted to food processing and oil refining with some metalworking and machinery plants. The Rockies of Alberta are notable for majestic beauty and have much-frequented beauty spots. These are, however, but summer resorts. Across the mountains in S British Columbia the mild climate has helped to draw many year-round residents, not a few from the Prairie Provs themselves. British Columbia for the most part is a land of peaks and of tumbling mountain rivers. The Rockies seam most of the east, and in the south the young Columbia river loops around the Selkirk Mts. In the west the Coast Mts come down to the sea in slopes of breath-taking but inaccessible beauty. Not only the Columbia but other systems have headwaters in British Columbia—the Mackenzie (especially in the Peace) and the Yukon (in the Lewes)—and there are various rivers running directly to the Pacific (among them the Fraser). Yet, though most of the state is wooded wilderness, in the south and more particularly in the southwest around the coast and on Vancouver Island there is one of the heaviest concentrations of population in Canada. The Pacific fisheries, lumbering, agriculture (notably fruit orchards), and mining have all contributed to the wealth of the region. Its cities, VANCOUVER, VICTORIA, and NEW WESTMINSTER, have developed industries on the basis of these resources. In the north fur trappers still gather pelts and Indians lead their relatively undisturbed lives. This region is not unlike that of neighboring Yukon, which is still largely undeveloped mountain country though its name (and that of the river draining it) has been world known since the Klondike gold strike of 1896. The few settlements are on the rivers, and transportation—as in most of the north country—depends on the airplane, though Yukon has one railroad (White Horse to Skagway) and is reached by the Alaska Highway. Another highway was built in the period of abortive oil development in the 1940s. The Northwest Territories are seeing the long-delayed beginnings of development. The westernmost of its three districts, Mackenzie district (named for the great river that drains its western part) has oil wells and a refinery at Norman and has pitchblende silver mines on one of its two enormous lakes, Great Bear Lake (the other is Great Slave Lake), since pitchblende yields uranium, its importance in the atomic age is obvious. The region is, however, still not thoroughly explored. This is particularly true of the arctic tundra and the mountains, although a trader, Samuel Hearne, had crossed overland to the Coppermine river as early as 1771. The situation is perhaps still more true of Keewatin district to the east and Franklin district to the north (the arctic islands). All this region is still frontier, with scattered posts and with the forces of law represented by the Royal Canadian Mounted Police, known extensively if inaccurately through moving pictures. The climate of Canada shows as wide a range as its topography, though because of the latitude the winters are generally cold; the central plains have a continental climate with very cold winters and very hot summers, the north, of course, belongs to the ARCTIC REGIONS, and about the Great Lakes the winters are temperate. The peoples of Canada show less variation but the problems of adjustment of varying cultures have been enormous. The Indians have had a more potent effect on the culture in Canada than in the United States, partly because, despite the vigorous part they took in early Indian wars, the Canadian settlers were less ruthless in destroying the native peoples than were the U S settlers. The natives of Canada varied greatly from the Algonquian-speaking peoples of E and central Canada (including the Micmac, the Abnaki, the Ottawa, the Ojibwa, the Cree, and other well-known tribes) to the Athapascan-speaking peoples of W Canada (including the Chipewyan among others) and the variegated tribes of the Pacific coast. In the northern sections there are also many Eskimo. From the very beginning of the activities of the white man (if the somewhat shadowy activities of the vikings after A D 1000 are ignored), the signs of imperial rivalry appeared—a rivalry that was to dominate the history of Canada until 1760. The man who made the Canadian coast widely known to Europe was John CABOT, who in British service reached the coast in 1497. In 1534 the Frenchman Jacques CARTIER planted a cross on the Gaspé Peninsula. The first settlement, founded in 1604 by the sieur de Monts and Samuel Champlain, was soon removed to Port Royal (Annapolis Royal, N S), and a little later Champlain founded (1608) Quebec. The pattern of French conquest of Canada was quite unlike that of British conquest of the present United States, the British were hemmed in by the mountains, but the St Lawrence beckoned the French inland, with its connecting waterways that made it possible, with only short portages, to reach all the Great Lakes and the heart of the continent. Within a few years Étienne Brulé had seen all the Great Lakes except Lake Michigan, which was seen by Jean Nicolet in 1634, just a few years after Massachusetts Bay colony was founded. The temptation to the French was to establish an enormous but thinly settled empire, as opposed to the relatively dense settlements of the British on the Atlantic coast to the south. Champlain also established the French policy of supporting the Huron Indians against their traditional enemies, the Iroquois—a policy that almost brought the French colony to extinction when later in the 17th cent the Iroquois demolished the Huron and almost demolished the French with them. Before that time, however, the English had moved to support their claims under Cabot's discoveries. Sir Samuel Argall had attacked the Port Royal settlement in 1614 (New State), and in 1629 the English captured Quebec and Champlain. Quebec was restored in 1632, and the French administration under the Company of One Hundred Associates (established 1627) sought to exploit the fur trade and establish settlements. Exploration went on, and the missionary efforts of French Catholic priests among the Indians were involved in the Huron-Iroquois warfare. Isaac Jogues, Jean de Brébeuf, and other Jesuits were martyred, but the firm foundation of the Church in Canada came only later when French settlement advanced. The unsuccessful rule of the Company of One Hundred Associates ended in 1663, and French royal government was established. The three important rulers of the colony under this system were the royal governor, the intendant, and the bishop. The force that these three officers had may be seen in the careers of the man who was perhaps the greatest of the colonial governors, Louis de Buade, comte de FRONTENAC, of the first and greatest of the intendants, Jean TALON, and of the overpowering first bishop of Quebec, François Xavier de LAVAL. There was constant trouble among the rulers, particularly over the treatment of the Indians, the religious viewed them as possible converts, the governor saw them as means of trade. Meanwhile both missionaries, such as Jacques MARQUETTE, and traders, such as RADISSON and Groseilliers, were widening the scope of French knowledge and influence. They sometimes went hand in hand, as Louis JOLLIET with Marquette and Father HENNEPIN with Michel Aco. The greatest of all the empire builders in the West was Robert Cavelier, sieur de LA SALLE, who went to the mouth of the Mississippi and envisioned the great empire in the West that was made a reality by men like DULUTH, BIENVILLE, IBERVILLE, and CADILLAC and by the many *coureurs de bois* and diligent missionaries. New France with Louisiana was a vast colony. The French did not, however, go unchallenged in possession. The British kept returning to claims on Acadia (the British Nova Scotia), and the Hudson's Bay Company in 1670 began from its posts on Hudson Bay to vie for the lucrative fur trade of the West. When the long series of wars between Britain and France broke out in Europe, it was paralleled in North America by the FRENCH AND INDIAN WARS. The French settlers in Acadia with their diked lands and the French seigneuries on the St Lawrence were constantly threatened. The virtues of the seigneurial system, first established in Canada in 1598, are debatable. Under it large grants were made to seigneurs, who made other grants to settlers, the actual farmers owed some quasi-feudal dues and could sell the property only by paying a large duty to the seigneur. By the middle of the 18th cent the St Lawrence valley was well settled and was a prize for British conquerors, but perhaps even more alluring was the trade of the interior. Knowledge of the lands to the west and the far north had been expanded by explorations such as those of the French LA VÉRENDRYE family and Englishmen such as Henry KELSEY, and many of its riches as well as its limitations were known. The imperial contest came to an end after Gen James WOLFE defeated MONTCALM on the Plains of Abraham, bringing about the fall of Quebec in 1759. Montreal fell the next year, and the Treaty of Paris in 1763 ended New France and established British rule. The resultant conflict between the deep-rooted and Roman Catholic French Canadians and the newly come Protestant British was to leave a legacy of antagonism that has persisted, though in diminishing force, to the present day. It was one of the causes of PONTIAC'S REBELLION, and it brought on the great resentment occasioned by the Proclamation of 1763, which relegated all the West to the Indians. Under the influence of Sir Guy CARLETON the administrative act was replaced by the Quebec Act of 1774, which granted large concessions to the French and infuriated the residents of the Thirteen Colonies, who were soon to revolt and become the United States. In the American Revolution, despite persistent wooing by the patriots, the Canadians remained loyal to the British crown, and the effort to take Canada by arms for the revolutionary cause failed dismally in the QUEBEC CAMPAIGN. Loyalists from the colonies in revolt (see UNITED EMPIRE LOYALISTS) fled to Canada and did much to advance Canada—especially in the Maritime Provs but also farther to the west. The period was one of expansion marked by such signal events as the journey of Alexander Mackenzie to the Arctic Ocean and his epoch-making overland voyage to the Pacific in 1793. Mariners were also reaching the Pacific Northwest and such men as Capt James COOK, John MEARES, and George VANCOUVER secured for Britain a firm hold on what is now British Columbia. The rivalry of the North West Company and the Hudson's Bay Company for the Western fur trade grew, and the enterprising Nor'westers, exemplified in Simon Fraser, David Thompson, and Alexander Henry, came also into rivalry with the American John Jacob Astor's traders on the Pacific. (see ASTORIA, Oregon) and came off successful, partly because of the War of 1812. That war, in which the Canadians and the British soldiers in Canada acquitted themselves with great credit, did not change the general situation but did permanently settle the U S -Canadian boundary about the Great Lakes. The New Brunswick boundary (see AROOSTOOK WAR) and the boundary to the west of the Great Lakes were to be subjected to long dispute, but since the War of 1812, except for minor flurries, the long Canadian-U S border has been a line of peace. The internal struggle for control between the North West Company and the Hudson's Bay Company rose to bloodshed in the Red River Settlement and was settled by amalgamation of the companies in 1821. The Hudson's Bay Company then held undisputed sway over RUPERT'S LAND, and the Canadian Pacific West under such men as Dr John MCLOUGHLIN, Sir George SIMPSON, and Sir James DOUGLAS, until U S immigrants challenged the British hold over OREGON and obtained the present boundary line. In the east the Canada Act of 1791 had divided Lower Canada (present Quebec) from Upper Canada (present Ontario). Both, as well as the Maritime Provs, enjoyed much growth from the increase of immigration after 1815, most of the newcomers were from the British Isles—Scots and Irishmen. The currents of democracy began to flow strong, and the 1830s saw a strong move toward responsible government (i e, democratic control of the colonial governments by the colonials) and the overthrow of the ruling groups (the Family Compacts). In Nova Scotia the movement led by Joseph HOWE gained some initial success, and in New Brunswick also concessions were made, but in the two Canadas it was not until the groups led by Louis J PAPINEAU in Lower Canada and William Lyon MACKENZIE in Upper Canada had reached separate futile rebellions in 1837–38 that the British government acted. The earl of DURHAM was sent to Canada in 1838 and made a report in which he urged the granting of responsible government. He also urged the union of the two Canadas for the express purpose of making the French Canadians a minority and Anglicizing them. Responsible government was not won effectively until 1849 after strenuous efforts by leaders in the different provinces, notably Robert BALDWIN and Louis H LAFONTAINE in the Canadas. There was, however, no nation, only a string of provinces in the East and the Hudson's Bay Company domain (Rupert's Land, British Columbia, and Vancouver Island) in the West. The movement for confederation was forwarded in the 1860s by the need for common defense (the Northerners in the U S Civil War were naturally anti-British and made threatening gestures), the desire for some common

government to forward railroads and other transportation, and the necessity for some new solution in the two Canadas (now Canada East and Canada West) where rival parties led by John A MACDONALD and George BROWN had reached an impasse The rival leaders in 1864 agreed to seek confederation of the provinces, which would allow local separation of the Canadas under a common dominion government Already the Maritime Provs were seeking union among themselves Their Charlottetown Conference in 1864 was broadened to admit delegates from the Canadas Two more conferences convened—the Quebec Conference later in 1864 and the London Conference held in 1866 in the mother country—before the British North America Act in 1867 made confederation a fact There was much opposition, and Nova Scotia and New Brunswick were brought to accept the union only through the efforts of Sir Charles TUPPER and Sir Samuel L TILLEY and the fear and indignation roused by the invasion of Canada by Fenians from the United States in 1866 Prince Edward Island did not join until 1873, Newfoundland did not enter until after the election of 1948 The new nation gained Rupert's Land from the Hudson's Bay Company in 1869, and in 1871 British Columbia agreed to come into the Union largely on the promise of a transcontinental railroad Pushing through the CANADIAN PACIFIC RAILWAY was one of the main achievements of the long administration of Macdonald and his Conservative administration (to 1891, with an interruption from 1873 to 1878 when the Reform party was in power) Objection in the West to being summarily taken over by the East led to two rebellions led by Louis RIEL in 1869–70 and 1885, but the West was opened Manitoba was made a province in 1870 Macdonald in 1879 adopted what was called the National Policy, a program for building up Canada, partly through protective tariffs Under the long administration (1896 1911) of the Liberal party under Wilfrid LAURIER, immigration to the Prairie Provs, already begun, was greatly forwarded by Clifford Sifton, who was minister of the interior from 1896 to 1905, the newcomers were drawn from many lands, and W Canada today shows the contributions of peoples from Central and Eastern Europe (notably Germans and Ukrainians) as well as smaller somewhat more exotic groups, such as Japanese and Chinese (who had come to the Pacific coast earlier), Icelanders, and Sikhs The prairie agricultural empire bloomed Saskatchewan and Alberta were made provinces in 1905 Mining also changed the West, for the Klondike discovery in 1896 loosed in 1897–98 one of the wildest gold rushes of all time Other mines were opened also, notably in the Laurentian Plateau Large-scale development of hydroelectric resources helped to forward the growth of industry and urbanization Laurier's fall in 1911 was at least partly due to his proposed reciprocal trade treaty with the United States which many thought would destroy their newly built industries These as well as the man power and resources of Canada were of immense aid to the Allies as Canada under the premiership of Robert L Borden joined the British side in the First World War Canada won a place on the imperial war council, and the war contributions of the dominions helped bring about the declaration of equality of the members of the British Commonwealth in the Statute of Westminster of 1931 The war, however, had one very serious effect in Canada, for the struggle over military conscription deepened the cleavage between French Canadians and other Canadians The development of air transportation and roads helped to weld Canada together after the war, and the nation had strength to withstand the assaults of the depression beginning in 1929 and the droughts that shriveled the wheat fields The farmers, who had resorted to political means in the short depression immediately after the war, now developed huge cooperatives (very thoroughgoing in Nova Scotia, very large scale in the Prairie Provs) and also took to radical political means—notably SOCIAL CREDIT and the Socialistic CO-OPERATIVE COMMONWEALTH FEDERATION The nation was again of vital importance in the Second World War, when under the premiership of W L Mackenzie KING, Canada took the side of the Allies in 1939 The war caused strains, though the struggle over conscription was not so severe as in the First World War, strict control over resources, prices, and wages was instituted Despite the difficulties, Canada emerged from the war with enhanced prestige as one of the major nations of the world, actively concerned in the affairs of the United Nations and taking part in all the confusing problems of the peace Classic works on early Canada are those of Francis PARKMAN Three large works on Canadian history are *Canada and Its Provinces* (ed by Adam Shortt and A G Doughty, 23 vols, 1913–17), *Chronicles of Canada* (ed by G M Wrong, 32 vols, 1914–16), and *Makers of Canada* (ed by W L Grant under the direction of A G Doughty, new ed, 12 vols, 1926) See G M Wrong, *The Rise and Fall of New France* (1928) and *The Canadians* (1938), George W. Brown, *Building the Canadian Nation* (1942), Donald G Creighton, *Dominion of the North* (1944), J Bart Brebner, *The North Atlantic Triangle* (1945), A R M Lower, *Colony to Nation* (1946), Mason Wade, *The French-Canadian Outlook* (1946), Edgar McInnis, *Canada a Political and Social History* (1947), George W Brown, ed, *Canada* (1950)

Canada, Lower see QUEBEC, province

Canada balsam (bôl'sum), yellow, oily, resinous exudation from the balsam fir (*Abies balsamea*) of Canada and the NE United States It is an oleoresin and a true turpentine, having a pleasant odor but a bitter taste It is transparent and adhesive when fluid and retains these properties upon solidification, which occurs when it is exposed to the air It is used in the preparation of slides for microscopic work to cement the glass covering the specimen to the slide upon which that material has been fixed It is used also in paints and polishes

Canada Company, founded by the novelist, John GALT, and chartered in England in 1826 for the purpose of making settlements Its lands were along the Lake Huron side of the S Ontario peninsula, and its headquarters at GUELPH The type of immigrant obtained by Galt was high, and the company's prices were reasonable, although the directors were reluctant to invest money in improvements The first road from Lake Ontario across the Huron tract to Lake Huron was, however, built by the company, and in general the Canada Company was one of the most successful colonizing schemes of the period See Robina Lizars and K L Lizars, *In the Days of the Canada Company* (1896)

Canada First movement, party that appeared in Canada soon after confederation (1867) The purpose was to encourage the growth of nonpartisan loyalty to the new dominion of Canada In Toronto, in 1874, it founded the *Nation* and the National Club and entered the political field as the Canadian National Association Although its official career was short-lived, the party's ideals were expressed by Canadian poets and other writers and were absorbed by the older political parties In this way the Canada First movement had an effect on the development of Canadian nationalism

Canada rice see WILD RICE

Canadian, town (pop 2,151), co seat of Hemphill co, extreme N Texas, on the Canadian river and NE of Amarillo, inc 1908 Founded with the coming of the railroad to this ranching country in 1887, it was, and still is, primarily a railroad and cattle town

Canadian, river rising in E New Mexico in the high plains and flowing E across the Texas Panhandle and most of Oklahoma It is joined by the North Canadian in E Oklahoma near Eufaula and enters the Arkansas a little farther northeast

Canadian art An outstanding early colonial art was French-Canadian wood carving, chiefly of saints and retables for the churches This art flourished from 1675 (when Mgr Laval established an École des Arts et Métiers) until c 1850 The art perhaps reached its height after the separation from France when, freed from the French Renaissance tradition, it developed a local character beautifully exemplified in such work as that in the Church of the Sainte Famille on Orléans Island and in the Musée provinciale at Quebec Before 1880 almost the only paintings and drawings produced in Canada were those of the colonial topographers many of them English army officers While much of this work is purely documentary, a few men produced interesting and imaginative scenes Paul Kane, who painted Indians, and Cornelius Kreighoff, who depicted the life of the habitants, were the earliest genre painters J A Fraser, known for his views of the Rockies, was instrumental in founding (1876) the Ontario College of Art, at Toronto In 1880 the Royal Canadian Academy of Arts (at Montreal) and the National Gallery of Canada (at Ottawa) were founded The National Gallery has since 1910 played an active part in Canadian life through its traveling exhibits Its collection is the finest in Canada Today there are art schools and galleries in Montreal, Quebec, Ottawa, Toronto, Hamilton, Edmonton, Winnipeg Vancouver, and other cities In the late 19th cent the outstanding names were those of the landscapists Daniel Fowler, F M Bell-Smith, and Robert Hagen, the portrait painter Robert Harris, and two great cartoonists, J W Bengough and Henri Julien They were followed by numerous fine painters, including George A Reid, Franklin Brownell, Henry Sandham, Robert Holmes, Edmund Morris, Florence Carlyle, F McG Knowles, Horatio Walker, Homer Watson, A De Lévy Suzor-Coté, William Brymner, Mortimer Lamb, Tom Thomson, and J W Morrice, who is perhaps the most celebrated of Canadian landscapists In 1919 Frank Carmichael, Lawren Harris, A Y Jackson, Franz H Johnston, Arthur Lismer, J E H MacDonald, and F Horsman Varley formed the Group of Seven, dedicated to painting the Canadian scene, and traveled and painted all over the dominion Their movement did much to awaken the interest of the country at large, and while their school of painting with its emphasis on flat design eventually tended toward the posterlike, they did some excellent work After the decline of the French-Canadian wood carver, little sculpture was produced until 1900 Louis Philippe Hébert, Suzor-Coté, Alfred Laliberté, Phimister Proctor, Tait McKenzie, and Walter Allward are well-known sculptors Among the later sculptors, Emanuel Hahn, Elizabeth Wyn Wood, and Henri Hébert are notable See A H Robson, *Canadian Landscape Painters* (1932), Graham McInnes, *A Short History of Canadian Art* (1939)

Canadian literature, English, although it began as an imitative colonial literature, has steadily developed into a regional but independent branch of American letters Because of the huge immigrations, first of New England Puritans from 1760 on and later of American Loyalists during the Revolution, Canadian literature followed that of the United States almost until the confederation in 1867 Until after 1800 the rigors of pioneering left little time for writing, and the only notable works were journals, such as that of Jacob Bailey, and the recorded travels of explorers, such as Samuel Hearne and Sir Alexander Mackenzie The first novelist was John Richardson, whose *Wacousta* (1832) popularized the genre of the national historical novel In 1836 with *The Clockmaker* T C Haliburton began his humorous series on Sam Slick the Yankee peddler Important historical novelists writing c 1900 included William Kirby, author of *The Golden Dog* (1877), and Sir Gilbert Parker, author of *The Seats of the Mighty* (1896) Sara Jeannette Duncan's novels such as *A Social Departure* (1890) contained both satire and humor, and *Anne of Green Gables* (1908) became the most famous of the novels for girls by L M Montgomery The Rev C W Gordon (Ralph Connor) began with *Black Rock* (1898) a series of novels on pioneer life in W Canada Animal stories became popular in the works of Sir C G D Roberts, Ernest Thompson Seton, and Margaret Marshall Saunders Since 1900 Canadian novels have tended toward stricter realism but have remained predominantly regional Among the most prominent authors have been Mazo de la Roche, well known for her series on the Whiteoaks of Jalna, Frederick P Grove, author of *Settlers of the Marsh* (1925), novel of farm life, and Laura Salverson and Nellie McClung, novelists of immigrant and rural life in W Canada Popular younger novelists are Morley Callaghan, Gwethalyn Graham (*Earth and High Heaven*, 1944), and Hugh Maclennan (*Two Solitudes*, 1945, and *The Precipice*, 1948) Stephen Leacock has been a perennial favorite for his humorous essays as well as a respected scholar, other notable essayists include Sir Andrew Macphail, Archibald MacMechan, and Lorne Pierce Genuinely Canadian poetry was late in developing In the 18th cent Puritan hymnists such as Henry Alline and refugee Tory satirists such as Jonathan Odell took their models from American colonial or English neoclassical literature Until after the confederation of 1867 the only poets of note were Charles Sangster, the first to make use of native material, and Charles Heavysege, whose long poetic drama *Saul* stirred the admiration of contemporary American poets Starting c 1880, the "Confederation school"—C G D Roberts, Archibald Lampman, Bliss Carman, and Duncan Campbell Scott—began producing a large body of romantic poetry, describing natural landscapes and rural life In 1905, long after her death in 1887, Isabella V Crawford was recognized as a genuine poet and was followed by Emily Pauline Johnson and Marjorie Pickthall Other poets of the early part of the century included Wilfred Campbell, W H Drummond, Francis Sherman, John McCrae, and, less skillful and more popular, Robert W Service In 1926 Edwin J Pratt began his imaginative, heroic poems Among many recent poets following the strong, native tradition of Pratt have been Kenneth Leslie, Earle Birney, W W E Ross, Dorothy Livesay, and Anne Marriott Others sharing the modern cosmopolitan tradition of America and Western Europe have been F R Scott, L A MacLean, A J M Smith, A M Klein, and R K Page See R P Baker, *History of English-Canadian Literature to the Confederation* (1920), J D Logan and D G French, *Highways of Canadian Literature* (1924), V B Rhodenizer, *Handbook of Canadian Literature* (1930), Clara Thomas, *Canadian Novelists, 1920–1945* (1946), E K Brown, *On Canadian Poetry* (2d ed revised, 1945), A J M Smith, ed, *The Book of Canadian Poetry* (rev ed, 1948)

Canadian literature, French Except for the narratives of French explorers and missionaries, no notable writing was produced before the conquest of 1759 Since that time the inspiration of almost all Canadian writing in French has been the passionate concern of French Canadians to preserve their identity in a country which is dominated by the English language and cultural tradition and by the Protestant religion There has been little contact between the two literatures The French literature has found its models mainly in writers of France and its themes in nationalism, the simple lives and folkways of the habitants, the devotion to the Catholic Church, and the tie to mother France.

This "racial" impulse was slow in being articulated, however, and its first artistic expression was F X Garneau's *Histoire du Canada* (1845–48, 2d ed, with added material, 1852) Still the classic of French Canadian nationalism, it was reprinted in 1946 It inspired the first nationalist poet, Octave Crémazie, and the Quebec school of poets, novelists, and historians who began a deliberate effort in 1801 to create a national literature, with such French authors as Hugo and Lamartine as their chief models The group included Philippe Aubert de Gaspé, J B A Ferland, L H Fréchette, Léon Le May, H R Casgrain, Antoine Gérin-Lajoie, and Benjamin Sulte There developed c 1900 a new group of writers, chiefly in Montreal, who tried to achieve the stricter technique and keener artistic perceptions of their models, the Parnassians of France Some poets such as Émile Nelligan and Paul Morin abandoned the national note and chose exotic subjects, others such as Albert Lozeau and Albert Ferland found inspiration in Canadian nature Also about this time men of letters such as Adjutor Rivard began a movement to preserve the purity of the French language in Canada The poet Gonsalve Desaulniers was one of many who celebrated the loyalty to old France Félicité Angers (Laure Conan) set her fiction in the early Quebec settlements A more realistic fiction took its impetus from Louis Hémon's *Maria Chapdelaine* (1913), a study of the peasants in the Lake St John country There has followed a stream of fiction, much of it excellent, on habitant life in the backwoods, on the farms, and in the villages, by such native Canadians as Robert Choquette, F A Savard, Roger Lemelin, Gabrielle Roy, and Germaine Guèvremont Although some novels have been set in cities and a notable author such as Robert Charbonneau has explored the psychological defeatism of his characters, the realistic regional novel about the simple Catholic community has persisted strongly Some of the important poets since 1914 include Clément Marchand, whose inspiration is often religious, Alfred DesRochers, who writes of the life of the soil, and Robert Choquette and Roger Brien, whose lyrics are in the romantic tradition but eloquently individualistic Lionel Groulx has done much research into the sufferings of the people of Quebec in the early days of the British regime and has turned his material to a nationalist purpose with great eloquence Maurice Barbeau has written many volumes on the folklore and traditions of both French and Indian Canada Édouard Montpetit, primarily an economist, has written eloquent essays on social subjects See annual reviews of current French Canadian literature in the *University of Toronto Quarterly*, Ian F Fraser, *The Spirit of French Canada* (1939), Berthelot Brunet, *La Littérature canadienne-française* (1946), Guy Sylvestre *Anthologie de la poésie canadienne d'expression française* (1913), J Paul-Crouzet, *Poesie au Canada* (1946)

Canadian Mounted Police see ROYAL CANADIAN MOUNTED POLICE

Canadian National Railways, government owned and operated transportation system in Canada, extending from coast to coast with many branch lines in each province The system is an amalgamation of several separate enterprises The Intercolonial Railway, always a government property, was opened in 1876, to link the Maritime Provs with the St Lawrence The Grand Trunk Railway, the oldest large system in Canada, extending from Portland, Maine, to Sarnia, Ont, remained in private hands until it was acquired by the dominion government by arbitration in 1921, its extensions, the Grand Trunk Pacific and National Transcontinental, having been already taken over The Canadian Northern Railway another privately owned transcontinental line, which had been built in sections from 1896 to 1914, was taken over in 1917 Except for the original Grand Trunk, these privately owned lines were almost wholly financed by government-guaranteed bond issues and were never able to meet their interest charges They were unified in 1923 under a single management, and a considerable part of the original mileage was abandoned See L T Fournier, *Railway Nationalization in Canada* (1935)

Canadian Pacific Railway, transcontinental transportation system in Canada and extending into the United States, privately owned and operated in competition with the Canadian National Railways The construction of a railroad crossing the continent in Canadian territory was one of the conditions on which British Columbia entered the confederation in 1871 After many difficulties and a political scandal, the contracts were awarded in 1880, and the line from Montreal to the Pacific coast was completed on Nov 7, 1885 See J M Gibbon, *Steel of Empire* (1935)

Canadian Shield see LAURENTIAN PLATEAU

canaigre see DOCK

Canajoharie (kăˌnəjōhăˈrē, -hăˈlē), village (pop 2,577), E central N Y, on the Mohawk and the Barge Canal and W of Amsterdam, settled c 1730 by Dutch and Germans, inc 1829 The Van Alstyne House (1749) contains historical papers and relics Food packing is the chief industry

Canal, Antonio: see CANALETTO

canal. Canals were dug for irrigation probably almost as long ago as agriculture began, traces of them have been found in Egypt and in other regions of ancient civilization The Indians of SW North America irrigated their fields by canals, parts of which still exist in Arizona and New Mexico Canals for transportation came somewhat later and for long were level or provided with inclines up which barges or boats had to be hauled from one level to the next, locks (see LOCK, CANAL) were first built in Europe, in Italy or Holland The Grand Canal of China (completed 1289) is the most notable of the early canals The countries of France, Belgium, Holland, and Germany developed inland waterway systems, connecting their rivers by canals, and thereby furthered their economic and commercial progress Russia built canals to connect the Baltic with the Black and Caspian seas by a great system of rivers, lakes, and canals, and the Soviet Union built a canal between the White Sea and the Baltic England, before the building of railroads, had an elaborate network of much-used canals, in the United States the ERIE CANAL was important A sea voyage often can be shortened or made less dangerous by the building of a canal for this purpose the SUEZ CANAL, the PANAMA CANAL, and the KIEL CANAL were built When falls interrupt transportation, as in the Columbia, the Niagara (see WELLAND SHIP CANAL), and the Congo, or when there are shoals a canal may be built Drainage may be accomplished by means of a canal—a notable example is the Chicago Drainage Canal (see CHICAGO, river), reclamation of land through drainage canals has been practiced in many countries, as in the drainage of the Florida swamps, the fens of England, and the Zuider Zee in the Netherlands See T C Bridges, *Great Canals* (1930)

Canale, Antonio see CANALETTO

Canalejas y Méndez, José (hōsāˈ kənälēˈhəs ē mānˈdāth), 1854-1912, Spanish statesman He was a member of the Cortes held several cabinet posts, and was premier from 1910 to 1912, when he was assassinated He founded a more democratic group within the liberal party and advocated curbing the power of the religious orders and breaking up the large estates He was also a notable jurist

Canaletto (kənälăˈtō), 1697-1768 Venetian painter, whose real name was Antonio Canale or Canal He studied with his father Bernardo Canale, a scene painter, and spent several years in Rome Returning to Venice, he devoted himself to the painting of the Venetian scenes upon which his fame chiefly rests From 1746 to 1753 he lived in England and produced many fine landscapes, notably those of Eton College Examples of his works are in most of the large European collections as well as in the National Gallery of Art, Washington D C, the Art Institute of Chicago the Museum of Fine Arts in Boston, and the Metropolitan Museum Canaletto is unsurpassed as an architectural painter Among his best works are *View on the Grand Canal* and *Regatta on the Grand Canal* (National Gall London), *Church of Santa Maria della Salute* (Louvre), *View of Venice* (Uffizi), and *The Piazzetta, Venice* (Metropolitan Mus) His nephew and pupil Bernardo Bellotto (bĕrnärˈdō bāl-lōtˈtō) (c 1724–1780), Venetian architectural and landscape painter was also called Canaletto His paintings, resembling those of Antonio though inferior in quality, are very numerous and may be seen in most of the leading European galleries They usually depict scenes in the cities in which Bellotto resided In 1747 he was appointed court painter at Dresden, and in 1770 painter to Stanislaus II at Warsaw

Canal Fulton, village (pop 1,115), NE Ohio, on the Tuscarawas and NW of Canton It is a trading center for a wheat and dairying area

Canal Winchester, village (pop 1,046), S central Ohio, on the Ohio and Erie Canal and SE of Columbus Glass products are made here

Canal Zone see PANAMA CANAL ZONE

Cananean (kănumēˈən), epithet of St SIMON

Canandaigua (kănəndāˈgwə), city (pop 8,321), co seat of Ontario co, W central N Y, in the Finger Lakes region, at the north end of Canandaigua Lake and SL of Rochester, settled 1789, inc 1813 It is a resort and farm trade center with various industries The Pickering treaty with the Six Nations was signed (1794) here The county historical society museum contains valuable historical documents The courthouse was the scene of the trial (1873) of Susan B Anthony for voting There is a U S veterans' hospital here

Canandaigua Lake, 15 mi long, W central N Y, one of the FINGER LAKES Squaw Island in the lake is a state reservation

Canarese (kănurēzˈ), variant spelling of Kanarese, which is a language of the Dravidian family See LANGUAGE (table)

Canaris or **Kanaris, Constantine** (both kənaˈrēs), 1790-1877, Greek admiral He distinguished himself in the Greek war for independence, notably by destroying (1822) the flagship of the Turkish admiral In 1862 he was a leader in the revolution which put George I on the Greek throne He was twice premier (1864-65, 1877)

Canaris, Wilhelm (känäˈrĭs), d 1944, German admiral, of Greek origin He was one of the chief figures in the German intelligence service in the First World War, and in the Second World War he headed the Abwehr (the espionage and counter-espionage system of the regular armed forces) An anti-Nazi, he was in touch with the Allies and was a key figure in the plot of 1944 on Hitler's life When that failed, he was put to death

Canarsee Indians (kənarˈsē), North American Indian tribe of Algonquian linguistic stock They occupied the western part of Long Island, N Y, and sold the site of Brooklyn to the Dutch They paid tribute to the Mohawk, and when they stopped paying and defied the Mohawk, they were almost wiped out They were probably not included in the Manhattan Indians

canary, familiar bird of the FINCH family introduced into Europe in the late 15th or early 16th cent and descended from either the wild serin finch or from the very similar wild canary, both native to the Canary Islands, Madeira, and the Azores The wild birds are chiefly gray or green Breeders have developed both plain and variegated birds, with yellow and buff the principal colors, although some are greenish Scientific training to perfect singing ability has long been carried on in Germany, where the finest singers, the Harzer and the St Andreasberg canaries, originated The birds are trained by listening to selected birds of superior ability or to musical instruments The song of the roller canaries is a series of "tours," a complex set of rolling trills delivered with the bill almost closed Choppers sing with the bill open Canaries breed readily in captivity and may live 15 years or more

Canary Islands, Span *Islas Canarias*, group of seven islands (2,807 sq mi, pop 680,294), off Spanish Sahara, in the Atlantic Ocean They comprise two provinces of Spain Santa Cruz de Tenerife (1,329 sq mi, pop 359,770) includes Tenerife, Palma, Gomera, and Hierro Las Palmas (1,565 sq mi, pop 320,524) includes Grand Canary, Lanzarote, and Fuerteventura The islands, of volcanic origin, are rugged, the highest point is Mt Teide (12,190 ft) on Tenerife Pliny mentions an expedition to the Canaries in c 40 B C, and they may have been the Fortunate Islands of later classical writers They were occasionally visited by Arabs and by European travelers in the Middle Ages Jean de Béthencourt, a Norman, settled at Lanzarote in 1402 and, with the support of Castile, became its king in 1404 The Guanches, the native inhabitants of the islands, were conquered by 1496, and Spanish dominion was recognized The Canaries were frequently raided by pirates and privateers Las Palmas beat off Francis Drake in 1595, but it was ravaged by the Dutch in 1599 In the French Revolutionary Wars, Horatio Nelson was repulsed in 1797 at Santa Cruz Wine was the main export of the Canaries until the grape blight of 1853 Its place was taken by cochineal until aniline dyes came into general use, sugar cane then became the chief commercial crop The leading exports are now bananas, tomatoes, and potatoes, grown where irrigation is possible Fishing on the open sea employs many The ports are of great importance as coaling stations See A S Brown, *Madeira, Canary Islands, and Azores* (14th rev ed, 1932)

canary wood or **canary whitewood,** name applied to the timber of the TULIP TREE in some parts of the United States and to an Australian eucalyptus, the Indian mulberry, and two species of *Persea*

canasta see RUMMY

Canastota (kănəstōˈtə), village (pop 4,150), central N Y, ENE of Syracuse, in a farm region, inc 1835 Silverware is made here

Canaveral, Cape (kənăvˈərəl), E Fla, on the Atlantic coast, SE of Titusville There has been a lighthouse here since 1854

Canberra (kănˈbərə), city (pop 15,156), capital of the Commonwealth of Australia in the Australian Capital Territory, SW of Sydney and W of Jervis Bay It is the seat of the Duntroon Military College, Canberra University College (1929), and the National Museum of Australian Zoology The site of the city was chosen in 1908 Founded in 1913 Canberra became the second capital (succeeding Melbourne) of the commonwealth, the Parliament first met here in 1927 During the Second World War the capital was temporarily shifted back to Melbourne The city was planned by Walter Burley Griffin of Chicago

Canby, Edward Richard Sprigg, 1817-73, Union general in the Civil War, b Kentucky, grad West Point, 1839 He fought in the Seminole War and was twice brevetted for gallantry in the Mexican War In the Civil War, Canby commanded the Dept of New Mexico, where he thoroughly repelled the Confederate invasion led by Gen Hopkins H Sibley (1862) He was made a brigadier general of volunteers in March, 1862, and was on special duty in the War Dept in Washington from Jan, 1863 to March, 1864, except for four months as the efficient commander of New York city during the DRAFT RIOTS of 1863 Canby was promoted major general in May, 1864, and assigned to command the Military Division of West Mississippi

He captured Mobile in April, 1865, and in May received the surrender of the last Confederate armies After the war Canby held various commands in the South until 1870, when he was sent to the Dept of the Columbia on the Pacific coast He was killed when he went on a peaceable mission to the Modoc Indians

Canby, Henry Seidel, 1878 -, American editor and critic, b. Wilmington, Del , grad Yale, 1899 He taught at Yale from 1900, achieving professorial rank in 1922 He established and edited (1920–24) the *Literary Review* of the New York *Evening Post*, afterwards joining with others to found and edit (1924–36) the *Saturday Review of Literature;* his *Seven Years' Harvest* (1936) is an intellectual diary culled from its files His critical and literary works include *Definitions* (1st series, 1922; 2d series, 1924) and *Classic Americans* (1931) His biography of Thoreau appeared in 1939 *American Memoirs* (1947), which contains condensations of *The Age of Confidence* (1934) and *Alma Mater* (1936), is a personal, but not strictly autobiographical, memoir

Canby, city (pop 2,099), SW Minn , W of Granite Falls near the S Dak line, platted 1876, inc as a village 1879, as a city 1905 It is a trade center for farm cooperatives

Cancer [Latin, = the crab], in astronomy, a northern constellation which contains the star cluster Præsepe (sometimes known as the "bee hive" and the "manger") The Tropic of Cancer takes its name from this constellation, which marks the northernmost point of the ecliptic and therefore the time of the summer solstice in the Northern Hemisphere Cancer, the Crab, is the fourth sign of the zodiac, and the constellation is a zodiacal constellation

cancer or **carcinoma** (kärsinō'mu), malignant growth of epithelial cells, a malignant tumor The disease attacks not only man and animals, but also plant life The cause is unknown Epithelial cells undergo a pathologic change, growing wildly, extending into surrounding tissues, and spreading by way of the lymphatics and blood stream to other parts of the body The separation of malignant cells from the original growth and their distribution to other parts of the body, where they form new growths, is known as metastasis, a characteristic of malignancy (see TUMOR) Although all cancer arises from epithelial cells, tumors differ in the site of origin (e g , skin, glands, or ducts of glands), in pigmentation, and in the rapidity of metastasis Certain factors seem to influence the onset of some malignant tumors, e g , chemical irritation (by means of coal-tar products), irritating chronic inflammation (as in erosion of the cervix), or mechanical irritation (as in cancer of the lip in pipe smokers) The first sign of cancer is a slight thickening of the tissue, which may be palpated Cancer of the gastrointestinal tract is more difficult to diagnose in the early stages Certain signs, however, may be indicative of pathology, e g , alternating diarrhea and constipation, tarry stool, and loss of weight from an obscure cause Later, bleeding from the rectum occurs, this may be mistaken for bleeding from hemorrhoids Other conditions, e g , sores or ulcers which fail to heal, bleeding from the nipple, or unusual menstrual bleeding, warrant examination by a physician Pain is not an early symptom Any lump, ulcer, or post-menopausal bleedings should be examined to rule out cancer The diagnosis of suspected malignancy is based on a thorough examination of the patient which includes a careful history and, depending upon location of the lesion, X-ray and fluoroscopic examination, laboratory analyses of blood, urine, and vaginal secretions, and biopsy of suspected tissue Treatment consists of surgery, the use of X ray or radium, and a combination of surgery and radiation Information about cancer is offered by the American Society for the Prevention of Cancer. Cancer-prevention clinics now exist in many cities.

Candace (kăn'dusē, kăndā'sē), name of several queens of ancient Ethiopia One of them made war (c 22 B C) on the Roman governor of Egypt, who defeated her and destroyed Napata, her capital Another Candace is mentioned in the Bible as the queen of the eunuch converted by Philip. Acts 8.27–39

Candahar, Afghanistan see KANDAHAR

candelabrum (kăn"dulā'brŭm) [Latin], primarily a support for candles, designed in the form of a turned baluster or a tapered column, also a branched CANDLESTICK or a lampstand Though most used and developed during the Renaissance, its origins are from Etruria and Rome Candelabra of bronze are found in Etruscan and Pompeian ruins From ancient Rome, also, are the tall and monumental candelabra of bronze or marble terminating in a bowl, used for holding illuminating oil or incense With these as inspiration, Italian Renaissance artists produced numbers of superb candelabra in richest materials for altars, chapels, and processions In this period the distinctive form of the candelabrum came also to be a ubiquitous decorative motive, used freely in architectural ornament, tapestry borders, stained glass windows, and furniture It was even converted, especially in Lombardy, into a definite architectural element, taking the place of a column or colonette, as in windows of the Certosa at Pavia. See F W Robins, *The Story of the Lamp* (*and the Candle*) (1939)

Candia (kăn'dēŭ), Gr *Herakleion* (ērā'klēōn), city (pop 42,557), on the island of Crete, Greece It is a port on the Gulf of Candia, an arm of the Aegean Sea, and is the largest city of the island, which formerly was also called Candia Founded (9th cent) by the Saracens, it was conquered (961) by the Byzantine emperor Nicephorus II and in the 13th cent became a Venetian colony The Venetians fortified the city and improved the port In 1669, after a long siege, they were forced to abandon Candia to the Turks In the Second World War, Candia suffered heavy damage The city has a unique museum of Minoan antiquities, which were discovered at ancient Cnossus, just outside Candia Among its historic monuments are a cathedral, several mosques, and remains of old walls and fortifications

Candish, Thomas. see CAVENDISH, THOMAS

candle. The evidence of ancient writings is not conclusive as to the history of the candle, words translated "candle" may have meant "torch" or "lamp" and the "candlestick" was probably a stand for one of these lights The candle probably evolved from wood, rushes, or cords dipped in fat or pitch It competed with the lamp in Roman times and was more commonly used in Western civilizations during the Middle Ages Tallow, beeswax, and vegetable wax such as bayberry in the American colonies, candleberry in the East, and waxberry in South America were supplemented by spermaceti in the late 18th cent , by stearine c 1825, and by paraffin c 1850 Twisted strands for wicks were replaced by the plaited wick invented c 1825 Candles were commonly made by repeated dipping in melted tallow, by pouring tallow or wax into molds, or by pouring beeswax over the wicks Most modern candles are machine-made by a molding process In literature, art, and religion the candle has had a wide range of symbolism, it commonly represents joy, reverence for the divine, and sacrifice (since the candle spends itself) Candles are used in rites especially of the Roman Catholic Church and are blessed on Candlemas Day The very large paschal candle stands at the Gospel side of the altar, it is blessed and lighted during the Exsultet in the vigil of Easter and is relighted at important ceremonies until Ascension Day See F W Robins, *The Story of the Lamp* (*and the Candle*) (1939), W W Klenke, *Candlemaking* (1946)

candleberry see BAYBERRY

candlefish, fish of the smelt family found on the Pacific coast from Oregon to Alaska Large catches are made when the fish migrate from the sea to the mouths of rivers and streams to spawn in late winter and early spring The flesh is delicately flavored It was named candlefish because the oily body when dried and equipped with a wick will burn It is also called eulachon

Candlemas, Feb 2, in the Roman Catholic and the Anglican churches the feast of the Purification of the Blessed Virgin In the Eastern Church it is called the feast of the Presentation of Christ in the Temple The name Candlemas is derived from the procession of candles, inspired by the words of Simeon "a light to lighten the Gentiles" (Luke 2 3) In the Roman Catholic Church the candles for use in the ensuing year are blessed on this day An old superstition claims that the weather is foretold by the ground hog (see WOODCHUCK) on Candlemas

candle power see PHOTOMETRY

candlestick, support for one or more candles, often with a rim or cup to catch the drip In early forms such as the Etrurian, the candle was held on a spike or pricket, but the Romans generally used a socket support When the use of candles was revived in the Middle Ages, the pricket holder was developed in several forms— the single candlestick, the CANDELABRUM, and the corona, a wheellike holder supported on a stand or suspended from the ceiling The socket candlestick became common in the 16th cent except in churches, some of which still use pricket holders, as do many Eastern nations The symbolical holder with seven branches probably originated as the Jewish tabernacle lampstand of Bible times and was represented as a candelabrum on the Arch of Titus in Rome. Candles passed into the Christian service and symbolism, and the church candleholder became an elaborate and richly wrought device The chandelier, a suspended multiple holder, was derived from the medieval corona Wall candlesticks include brackets and sconces

Candlewood Lake, large artificial body of water, W Conn , N of Danbury Made in 1926 by a power dam in the Rocky River near its mouth in the Housatonic, it is 15 mi long and covers 6,000 acres

Candlish, Robert Smith, 1806–73, Scottish theologian and preacher, one of the founders of the Free Church of Scotland He was minister (1834–73) of St. George's, Edinburgh, and had a leading part in the movement within the Established Church which resulted in the disruption of 1843, after which he was associated with Thomas CHALMERS in organizing the Free Church. Upon the death of Dr Chalmers in 1847, Candlish was the real leader in the movement. In 1862 he was chosen principal of New College, Edinburgh.

Cando (kăn'dō), city (pop 1,282), co seat of Towner co , NE N Dak , NW of Devils Lake, named 1884, inc 1901. It is a trade center in a farm area

Candolle, Augustin Pyramus de (ōgustē' pērămŭs' du kădôl'), 1778–1841, Swiss botanist, who materially advanced the natural system of classification by his *Théorie élémentaire de la botanique* (1813) He was the author of a number of papers and did much of his work in France He started the *Prodromus systematis naturalis* which was finished after his death by others, among them his son, **Alphonse Louis Pierre Pyramus de Candolle** (alfōs' lwē' pyĕr'), 1806–93

Candy, Ceylon see KANDY

candy see CONFECTIONERY

candytuft, any plant of the genus *Iberis*, low-growing plants of the Old World A number of half-hardy annuals and evergreen perennials are cultivated—chiefly in borders and rock gardens—for the flat-topped or elongated clusters of flowers of various colors

cane, name for the hollow or woody, usually slender and jointed stems of plants (particularly RATTAN) and for various tall grasses, e g , SUGAR CANE, sorghum, and also other grasses used in the S United States for fodder The large or giant cane (*Arundinaria macrosperma* or *gigantea*), a bamboo grass native to the United States, often forms impenetrable thickets 15 to 25 ft high—the canebrakes of the South The stalks are used locally for fishing poles and other purposes, and the young shoots are sometimes eaten as a potherb

Canea (kunē'ä), ancient Gr *Cydonia* (sīdō'nēu), modern Gr *Khania* (khānyä'), city (pop 28,213), on the island of Crete, Greece In W Crete, it is the capital of Crete and a port on the Gulf of Canea, an arm of the Aegean Sea One of the oldest Cretan cities, it was conquered (69 B C) by the Romans, and in A D 826 fell under Arab rule Reconquered (961) by the Byzantines, it became (13th cent) a Venetian colony. The Turks took it in 1645 Canea suffered from air and naval bombardments in the Second World War The city has a cathedral and several mosques Among its historic sights is the old Venetian arsenal

canella (kunĕl'u) [ultimately from Late Latin, = little cane, cinnamon], small ornamental evergreen tree (*Canella winterana*), growing in the West Indies and S Florida, sometimes called wild cinnamon It reaches a height of 10 to 50 ft , with a straight stem branching at the top The leaves are laurellike, shining, and thick, the small flowers extremely fragrant The canella of commerce is the inner bark of young shoots, dried in long quills and sometimes called whitewood bark or white cinnamon It is a light yellowish brown, with a fragrance between cinnamon and cloves and with a warm, pungent taste It has stimulant qualities, was formerly considered a cure for scurvy, and is now used mainly with other drugs

cane sugar. see SUCROSE

Caney (kā'nē), city (pop 2,629), SE Kansas, W of Coffeyville at the Okla line, near oil fields, founded 1871, inc 1887

Caney, El (ĕl kanā'), mountain village, SE Cuba, NE of Santiago de Cuba It was the scene of a hard-fought attack (July, 1898) in the Spanish-American War, in which U S and Cuban troops dislodged the Spanish

Canfield, Dorothy see FISHER, DOROTHY CANFIELD

Canfield, Richard Albert, 1855–1914, American gambler, b New Bedford, Mass A well-known gambling operator in Providence, R I , Dick Canfield in the 1880s came to New York, where his gambling establishment became famous The place was closed in 1904 largely through the efforts of District Attorney W T JEROME. Canfield was a noted art collector The solitaire game Canfield was named for him See biography by Alexander Gardiner (1930)

Canfield, village (pop 1,141), NE Ohio, SW of Youngstown, surveyed 1798 It is a trade center for a mine, farm, and timber area

Can Grande della Scala. see SCALA, CAN FRANCESCO DELLA.

Canicatti (känēkät'tē), city (pop 28,775), S Sicily, Italy It is an agricultural center with sulphur mines near by.

Canisius, Peter see PETER CANISIUS, SAINT

Canisius College see BUFFALO, N Y

Canisteo (kănĭstē'ō), village (pop 2,550), S N Y , at the junction of the Canisteo river and Bennett Creek SE of Hornell, in a farm area, settled before 1790, inc 1873

cankerworm, name for the destructive larvae, also called *measuring worms*, of two geometrid moths Both species (fall and spring cankerworms) pupate in the ground In the fall cankerworm the majority of the adult moths emerge in the fall or winter, those of the spring cankerworm usually hatch in the late winter or spring The wingless females lay their eggs on the bark of trees, on the leaves of which the larvae feed. Spraying the trees

soon after the leaves appear and putting sticky bands on the tree trunks are methods of control See *Cankerworms* (U S Dept of Agriculture, Leaflet 183).

Canlaon, Mount (känläōn'), or **Malaspina** (mäläspē'nä), active volcano, 8,088 ft high, on N central Negros, Philippine Islands

canna [Latin, =cane], any plant of the genus *Canna*, tropical and subtropical perennials, grown in temperate regions in parks and gardens for the large foliage and spikelike, usually red or yellow blossoms Most cultivated cannas are hybrids, but two species are found wild in the S United States, one called Indian shot because of the hard shotlike seeds *Canna edulis* is cultivated in the tropics for its rootstalk, which yields *tous-les-mois*, a commercial arrowroot starch

Cannabis: see HEMP and MARIJUANA

Cannae (kăn'ē), ancient village, Apulia, S Italy, scene in 216 B C of Hannibal's crushing defeat of the Romans.

Cannanore (kănənōr'), town (pop 34,649), W Madras prov, India, a port on the Arabian Sea The Portuguese, who established (1505) a fort here, were succeeded (1656) by the Dutch, and the Dutch were succeeded (1784) by the British Cotton is exported

Canneh (kăn'ē), unidentified city, apparently in N Syria Ezek 27 23 See CALNEH 2

cannel coal see COAL

Cannelton (kăn'ultun), city (pop 2,240), co seat of Perry co, S Ind, on the Ohio and E of Evansville, laid out 1835 Coal mining is done on an extensive scale here The area also yields clay

Cannes (kănz, kän, Fr kän), town (pop 36,647), Alpes-Maritimes dept, SE France It is a fashionable resort on the French RIVIERA and is known for its lavish carnival (Mardi Gras) season, particularly the traditional "battle of flowers" Napoleon I landed near by on his return (1815) from Elba

cannibalism (kă'nĭbulĭzm) [Span *canibal*, referring to the Carib Indians] The practice of eating the flesh of one's own species is generally condemned as abhorrent, but it has persisted in many parts of the world from earliest times Split marrow bones of humans, found in the caves of *Sinanthropus*, may indicate that cannibalism existed among precursors of modern man Stories of *anthropophagi*, or "man-eaters," are recorded by ancient writers who viewed such peoples as human monsters Starvation is probably the least common motivation for the practice, although frontier history has many tales and some recorded instances of men driven by hunger to eat human flesh Most widespread is ritual cannibalism, wherein partaking of human flesh or of blood is held to be supernaturally significant It may afford gain of power or prestige, provide a spiritual bond among those sharing the experience, or simply be the means of ingesting magic In Tibet, Micronesia, and elsewhere, the dead are honored by eating part of the corpse Cannibalism may also serve merely to satisfy an acquired appetite

Canning, Charles John Canning, Earl, 1812–62, British statesman, third son of George CANNING Succeeding to the peerage conferred on his mother, he took his seat as Viscount Canning in the House of Lords (1837) and served as Robert Peel's undersecretary of state for foreign affairs (1841–46) and the earl of Aberdeen's postmaster general (1853) Governor general of India in the SEPOY REBELLION, he was nicknamed "Clemency Canning" for his efforts to restrain retribution against the natives In 1858 he became India's first viceroy, after the power of government was transferred from the East India Company to the crown, was created earl in 1859, and retired in 1862 See H S Cunningham, *Earl Canning and the Transfer of India* (1892)

Canning, Elizabeth, 1734–73, London servant girl, subject of a famous mystery She disappeared Jan 1, 1753, and returned home, cold, dirty, and half starved, after 28 days She said she had been seized and confined in a garret A gypsy woman was identified as one of her captors and was sentenced to hang At the second trial, Elizabeth herself was accused of perjury and was banished to America, but her conviction was debated throughout England See B R Wellington, *The Mystery of Elizabeth Canning* (1940), Lillian de la Torre, *Elizabeth Is Missing* (1945).

Canning, George, 1770–1827, English statesman Canning was converted to Toryism by the French Revolution, became a disciple of William Pitt, and was his undersecretary for foreign affairs (1796–99). To bring ridicule upon English radicals and liberals he managed the publication of the *Anti-Jacobin* (1797–98) During the war against Napoleon I he served as treasurer of the navy (1804–6) and was foreign minister (1807–9) He greatly influenced military affairs, planned the seizure of the Danish fleet at Copenhagen (1807), and supported the Peninsular War He resigned (1809) when he fought a duel with Robert Stewart, Viscount CASTLEREAGH, because of political disagreement and charges of deception He undertook (1814) a special mission to Lisbon, and from 1816 to 1820 he was president of the board of control for India A friend of Queen Caroline, he resigned when the government attacked her status. He was about to take up the governor generalship of India, when he was recalled, after Castlereagh's suicide, to take over (1822) the foreign office Recognizing England's advantage in the free trade of small independent states, Canning refused to cooperate in the suppression of European revolutions He protested at the decisions of the Congress of Verona (1822), opposed French intervention in Spain, foiled joint intervention in Portugal, and by recognizing the independence of the Spanish colonies in America made possible the promulgation of the MONROE DOCTRINE He arranged the French-Russian-British agreement, which, after his death, resulted in Greek independence In domestic affairs Canning favored Catholic Emancipation and relaxation of trade restrictions After the death of Lord Liverpool, he was prime minister (April–Aug, 1827) See biographies by H W V Temperley (1905), Dorothy Marshall (1938), and C A Petrie (2d ed, 1946); J A R Marriott, *George Canning and His Times* (1903)

Canning, Stratford see STRATFORD DE REDCLIFFE, STRATFORD CANNING, VISCOUNT

canning The process of hermetically sealing cooked food for future use was discovered about the beginning of the 19th cent by a Frenchman, Nicolas APPERT The process proved moderately successful and was put into practice in France, England, and Ireland A patent was taken out in New England c 1815 by Ezra Daggett for the canning of oysters, salmon, lobsters, pickles, jams, and sauces In 1820 a Boston firm made pickles, jellies, and jam and canned some quinces, currants, and cranberries About 1847 a large quantity of tomatoes were put up for the use of students at Lafayette College, Easton, Pa During the Civil War considerable amounts of canned meat and of canned tomatoes and other vegetables were in use The canning of sea food at Eastport, Maine, began in 1843 Salmon was canned on the Columbia river in 1866 and in Alaska in 1872 Today a great variety of fish products are packed, Maine, Massachusetts, Washington, Oregon, California, and Alaska lead in this branch of the industry Highly specialized machinery, knowledge of bacteriology and food chemistry, and more efficient processes of cooking now combine to make the commercial canning of food an important feature of modern life The range of products preserved has increased enormously and may be grouped as meat and poultry, fruits and vegetables, fish, oysters, clams, and other shell fish, milk, and preserves, jams, jellies, pickles, and sauces To these might be added another large class of miscellaneous edibles, such as steamed puddings and brown bread, cooked spaghetti, and the like, the demand for which arises from the phenomenal increase of the small apartment and of part-time housewifery The emphasis given to the vitamin and other valuable qualities of fruit and some vegetable juices has led to extensive canning The general principles of commercial and domestic canning are the same, but in the factory more accurate control of procedures is practiced and highly specialized machinery is available Successful canning requires rapid handling of sound, clean raw material to prevent loss of vitamins, bacterial spoilage, and enzyme changes causing deterioration in the appearance, flavor, and texture of foods Some foods, especially vegetables, are blanched (scalded) to remove respiratory gases from cell tissue and to facilitate packing By the hot-seal method or by mechanical means the air is exhausted from the containers, which are then sealed and processed for the time and at the temperature required to cook the food and to attain commercial sterility (destruction of all microorganisms except for some spores) Glass containers were used at first but proved bulky, costly, and brittle Peter Durand, an Englishman, patented in 1810 the first tin canister, and in 1825 the first American patent was obtained Early canmaking was slow and expensive, sheets of tin were cut with shears, bent around a block, and the seams heavily soldered A good tinsmith made only about 100 cans a day The industry began to assume importance with the invention in 1847 of the stamp can A machine for shaping and soldering was exhibited in 1876 at the Centennial Exposition at Philadelphia The open-top can of the 20th cent with a soldered lock seam and double-seamed ends permits easy cleaning and filling Body blanks are stamped from tin-plated steel Cans used for foods which react with metals, causing discoloration (usually harmless), may be coated with a lacquer film The belief that food must not be left in an opened can is a fallacy Distension of the ends of cans may indicate dangerous bacterial food spoilage or may result from chemical or physical causes such as improper filling See A W Bitting, *Appertizing; or, The Art of Canning* (1937), E C May, *The Canning Clan* (1937), J G Baumgartner, *Canned Food* (2d ed, 1946)

Canning Dam, SW Western Australia, in the Canning river, SE of Perth It is 218 ft high, with a reservoir 24 mi in circumference

Canizzaro, Stanislao (stänēsla'ō kan-nēt-tsä'rō), 1826–1910, Italian chemist From 1861 he was professor at Palermo and from 1871 at Rome, where he was also a member of the senate and of the council of public instruction He is known for his discovery of cyanamide, for carrying forward the work of Avogadro in distinguishing between molecular and atomic weights, and for obtaining alcohols from aldehydes, by Cannizzaro's reaction

Cannock, urban district (1931 pop 34,585, 1947 estimated pop 40,260), Staffordshire, England, NNW of Birmingham It is a mining town dependent upon the rich coal deposits of Cannock Chase, an infertile moorland near here

Cannon, Annie Jump, 1863–1941, American astronomer, b Dover, Del, grad Wellesley (B S 1884, M A, 1907) In 1897 she became an assistant in the Harvard College Observatory, where from 1911 to 1938 she was astronomer and curator of astronomical photographs In the course of her photographic work she discovered 300 variable stars, five new stars, one spectroscopic binary, and many stars with bright lines or variable spectra She made a bibliography of variable stars which includes about 200,000 references and completed a catalogue of some 300,000 stellar spectra, besides preparing many papers on the subject

Cannon, George Quayle 1827–1901, Mormon apostle, b Liverpool, England He and his parents were converted to Mormonism in 1840, two years later they emigrated to Nauvoo, Ill, and in 1847 to Utah In 1850 Cannon founded a Mormon mission in Hawaii He became an apostle in 1859 and was assigned to England, where for four years he edited the *Millennial Star* and supervised missionary work He served as a member of the Utah territorial council and as private secretary to Brigham Young, of whose will he was an executor In 1867 he became editor of the influential *Deseret News* Cannon was elected (1872) territorial delegate from Utah to Congress, but in 1882 he was refused his seat, under the Edmunds antipolygamy law, later he suffered imprisonment as a violator of the law From 1880 he was first councilor in the Council of Apostles

Cannon, Joseph Gurney, 1836–1926, speaker of the U S House of Representatives (1903–11), b Guilford co, N C He moved to Indiana as a boy, attended Cincinnati Law School, and was admitted to the Illinois bar in 1858 Danville, Ill, ultimately became his home town Cannon served in Congress from 1873 to 1923, except for the years 1891–93 and 1913–15, when first the Populists and then the Progressives turned him out As speaker he carried the traditional power of his office to appoint all legislative committees to its ultimate arbitrary extremes, dictatorially ruling the House in the interest of his fellow "Old Guard" Republicans and suppressing minority groups In March, 1910, insurgent Republicans, led by George W NORRIS and supported by all the Democrats, passed a resolution which, by providing that the House itself should appoint the important Committee on Rules with the speaker ineligible for membership, broke Cannon's power See C R Atkinson, *The Committee on Rules and the Overthrow of Speaker Cannon* (1911), L W Busbey, *Uncle Joe Cannon* (1927)

Cannon, Walter Bradford, 1871–1945, American physician and physiologist, b Prairie du Chien, Wis, M D Harvard, 1900 He was professor of physiology at Harvard from 1906 to 1942 He studied the mechanics of digestion (by means of X rays) and the relation of hormones to emotions Among his works are *Bodily Changes in Pain, Hunger, Fear, and Rage* (1915, rev ed, 1929), *Traumatic Shock* (1923), *Digestion and Health* (1936), *Autonomic Neuro-effector Systems* (with Arturo Rosenblueth, 1937), and *The Way of an Investigator* (1945) His wife, **Cornelia James Cannon,** 1876–, has written novels and books for boys and girls.

Cannon Falls, city (pop 1,544), SE Minn, at falls of the Cannon and S of Hastings It is a farm trade center

Cano, Alonso (dōn'sō ka'nō), 1601 67, Spanish painter, sculptor, and architect He served as court painter and architect to Philip IV and as canon and chief architect of the cathedral at Granada, the façade of which was his architectural masterpiece For his monumental altarpieces he executed the carvings and sculptures as well as the paintings His best paintings are in the cathedral at Granada, the Prado, and the Louvre *Christ Blessing the Children* is in the Metropolitan Museum Cano's sculptures are both vigorous in treatment and delicate, among them are various statuettes and busts in Granada in the cathedral

Cano, Juan Sebastián del (hwän' sāvästyän' dĕl), d 1526, Spanish navigator, the first to circumnavigate the globe Under Magellan he commanded the *Conception* and after Magellan's death in the Philippines took command of the expedition. From the Philippines to the Moluccas islands, Cano sailed new waters, arriving in Spain with the *Victoria* and 18 men Sept 6, 1522 He set out on a second voyage to the Moluccas by Magellan's route in 1525, but died while crossing the Pacific

canoe (kunōō') The canoe is the craft of most primitive peoples using waterways and varies in material according to locality and in design accord-

ing to the use which is to be made of it In North America, where the natives were without horses and where the interlocking river systems were unusually favorable, the canoe in its various types was highly developed Where large logs were available, it took the form of the hollowed-out log or dugout This type was used especially on the N Pacific coast, where immense trees grew at the water's edge, where an intricate archipelago invited navigation in ocean waters, and where the tribes came to depend to a large extent upon sea life for their food supply A semiseafaring culture developed here, and the great canoes of the Haida and Tlingit tribes, with high, decorated prows, capable of carrying 30 to 50 Indians, began to resemble in appearance the boats of the viking culture On the northern fringe of the American forest where smaller tree trunks were found and where the rapid rivers and many portages favored a lighter craft, the bark canoe dominated, reaching its highest development in the birch-bark canoe Indians living outside the birch belt used inferior kinds of bark Seams and holes were gummed with melted rosin White cedar was most satisfactory for the frame, and cedar also often provided the sewing fibers At portages such light canoes could be lifted on one's shoulders and easily transported A third type of canoe is that made from skins, found where trees are lacking The bullboat of the Plains Indian, little more than a round tub, made of buffalo hides stretched over a circular frame, was its crudest form A much finer form is the kayak of the Eskimo, made of sealskin stretched over a frame constructed of driftwood or whalebone It is comparatively small and light and is completely covered over except for the "well" or manhole in which the single paddler sits He wears a waterproof skin shirt which fits down over the manhole and makes the boat waterproof even if turned over In these boats the Eskimo make journeys of hundreds of miles in the ocean Dugouts are still much used on the Amazon and were used on other rivers of South America by Indians in earlier days Other types of canoes were also used in South America In the South Seas canoes were developed for use on long voyages from island to island across the open sea Some of these large canoes were very beautiful The carvings in Maori war canoes were particularly noteworthy In the South Seas also ingenious outriggers were developed to give stabilization to the canoe The natives of Africa also used canoes for journeys far out from shore and developed elaborate forms The canoe has continued in use in backlands until the present day, although now its usefulness in remote lands has been somewhat impaired by the airplane The French in North America were peculiarly fortunate not only in arriving where the St Lawrence river opened a wide waterway into the continent but also in finding there Indians who knew the use of the birch-bark canoe It was the canoe that carried such men as Marquette and Alexander Mackenzie and David Thompson on their journeys, and it was the canoe that carried fur traders out with their goods for the Indians and back with furs, thus it played an important part in early history With thickening of settlement, canoeing became less of a means of travel and more of a sport in the better-settled regions The sport was extremely popular in the late 19th and early 20th cent , and many canoeing clubs were founded The popularity waned somewhat later, but wherever possible today summer camps lay emphasis on canoeing A sort of combination of sport and necessity is the use of canoes by guides in the north woods for taking sportsmen to hunt and fish Vacation trips in canoes are especially popular in N Maine, the Adirondack region, N Wisconsin, and N Minnesota, but in any town on a favorable river there are likely to be enthusiastic canoeists The double-bladed paddle—used among North American natives only by the Eskimo—has come into use and shows certain advantages on wide bodies of water affected by wind and tide The substitution of canvas for birch bark in making canoes is credited to the Oldtown or Penobscot Indians in Maine, and the type is sometimes called the Oldtown canoe All-wood canoes made of basswood or cedar, very popular in Canada, are sometimes called Peterborough canoes after a canoe-making center

canon (kă'nun), in Christendom, term of several meanings Decrees of church councils are usually called canons, since the Council of Trent the expression is especially reserved to dogmatic pronouncements of ecumenical councils The body of ratified conciliar canons are a large part of the legislation of CANON LAW A canon is also an official list, as in canonization, i e , enrollment among the saints, and in the names of books of the Bible accepted by the Church (see OLD TESTAMENT, NEW TESTAMENT, APOCRYPHA, PSEUDEPIGRAPHA) The central mainly invariable part of the MASS is the canon The term is also applied in the Western Church to certain persons There are canons regular, priests living in community under a rule but not cloistered like monks, the Austin, or Augustinian, canons and the Premonstratensians are the best known of these The priests attached to a cathedral or large church are sometimes organized into a group, or college, and called canons secular, a church having such a group is a collegiate church Cathedral canons often have diocesan charges or pastoral duties apart from the cathedral Canons of the Church of England are mostly cathedral canons

canon, in music, a type of counterpoint employing the strictest form of imitation All the voices of a canon have the same melody, beginning at different times Successive entrances may be all at the same pitch or at different pitches One of the earliest known canons is SUMER IS ICUMEN IN In the 14th and 15th cent , retrograde motion was employed to make what is known as crab canon, or canon cancrizans, wherein the original melody is turned backward to become the second voice Mensuration canons were frequently written in the 15th and 16th cent The voices begin at tonic and dominant intervals, usually as in a fugue Each voice has the same melodic pattern written in different note values Canons of the 17th cent , especially those of the Elizabethan composers, often had several possible solutions Bach made noteworthy use of canon, particularly in *The Art of the Fugue* Beethoven, Mozart, Haydn, Schumann, and Brahms wrote canons, and Franck used the device in the last movement of his violin sonata. A simple, popular type of canon is the ROUND

Canonchet see PHILIP (King Philip)

Canon City (kăn'yun), city (pop 6,690, alt c 5,300 ft), co seat of Fremont Co , S central Colo , on the Arkansas river above Pueblo, in a fruitgrowing area, laid out 1859 at the site of a blockhouse built (1807) by Zebulon M PIKE, inc 1872 Coal and gold mines are near by The city has a museum of archaeology and natural history and is the seat of the state penitentiary Canon City is at the entrance to the ROYAL GORGE

Canonge, Louis Placide (lwē' plasēd' kanōzh'), 1822 93, Creole journalist and playwright, b New Orleans, educated in Paris He wrote essays and criticism for French papers in Paris and New Orleans and had several of his romantic plays produced He was a lawyer, a state official, and a professor of French at the Univ of Louisiana

Canoncus (kunō'nĭkus), c 1565–1647, American Indian chief, who ruled the Narragansett tribe when the Pilgrims landed in New England He later granted Rhode Island to Roger WILLIAMS and because of Williams's influence remained friendly to the whites, despite their aggressive ways See H M Chapin, *Sachems of the Narragansetts* (1931)

canonization (kă"nunīzā'shun), in the Roman Catholic Church, process by which the name of a person is enrolled among the saints It is now performed at Rome alone, although in the Middle Ages and earlier bishops everywhere used to canonize Canonization is not necessary for martyrs, who are considered to be enrolled among the saints on their death, but in recent years the Church has approved the cult of canonized persons only The process of canonization is a trial (or cause), at which the saint is said to be defended by the Church, a prosecutor is appointed to attack all evidence alleged in favor of canonization The prosecutor is popularly called *advocatus diaboli* [devil's advocate], his opponent the *advocatus Dei* [God's advocate] This evidence consists primarily of the proof of four miracles attributable to the saint and proof that the saint's life was exemplary Beatification, by which a person is called blessed and his cult is approved for localities and orders, requires two miracles Miracles attributed to saints are considered probable or pious opinions, and Catholics are not required to believe in them Beatification is generally a step to canonization, but canonization by no means necessarily follows The fact that a person has not been formally canonized is no argument he was not a saint, some of the greatest of the saints have never received formal canonization A great deal of time does not need to elapse between the death of a saint and canonization, e g , St Theresa of LISIEUX, St Bernadette, and St Frances Xavier Cabrini The first solemn canonization seems to have been that of St Ulrich late in the 10th cent The method of formal canonization was set by the enactments of Urban VIII that came into force in 1634

canon law (kă'nun), in the Roman Catholic Church, the body of law based on the legislation of the councils (both ecumenical and local) and the popes, as well as the bishops (for diocesan matters) It is the law of the church courts and is to be distinguished from other parts of ecclesiastical law, such as liturgical law However, when liturgical law overlaps with canon law, the great body of canon law, promulgated in the *Codex juris canonici* [code of canon law] in 1917 (and effective since 1918), prevails, though exceptions to this rule are noted in the code The code itself, the culmination of centuries of legal growth, consists of 2,414 canons, with an analytical index (at the beginning) and nine appended documents, it superseded all previous compilations It does not contain all of canon law, which is a living organism, but it is the base of the present-day law, and the study of canon law consists mainly in mastering the code and its application It lays down rules for the governance and regulation of the clergy and the Church, including such matters as the qualifications, duties, and discipline of the clergy and the administration of the sacraments (more particularly the laws regarding holy orders and the sacrament of marriage) Canon law embraces both general laws applicable in the church universal, such as those on requirements for the priesthood and those on marriage, and local laws applicable only in certain dioceses The early law grew particularly from the letters of the bishop of Rome that settled matters of ecclesiastical government and discipline from the end of the 1st cent. A D Such papal letters and pronouncements are the decretals Joined to them are the canons of the councils of the Church regarding church discipline and governance From the 4th cent this legislation grew profuse, and attempts to collect and correlate the laws began early These collections were not authorized and were sometimes not genuine, as in the case of the FALSE DECRETALS It was not until the middle of the 12th cent that the great genius of the common law, GRATIAN, following after Ivo of Chartres, applied the methods of Roman law in bringing order out of the chaos of conflicting and uncoordinated legislation His *Concordantia discordantantium canonum* (c 1140) or *Decretum Gratiani*, called in English *Gratian's Decree*, became the basis for future compilations of the law Important among the later additional works were the collections of decretals under Gregory IX, called the *Extravagantes* or *Extra* because they were outside *Gratian's Decree*, the collection issued (1298) by Boniface VIII and called *Liber sextus* [the sixth book] because it added to the five books of decretals promulgated by Gregory, the collection promulgated (1317) by John XXII, drawn mostly from the constitutions of Clement V at the Council of Vienne and called the *Clementinae*, the work commonly called *Corpus juris canonici*, which in 1500 combined all the preceding with the *Extravagantes* of John XXII and the *Extravagantes communes* (decretals from Boniface VIII through Sixtus IV) and was to be the fundamental work in canon law for centuries The Council of Trent (1545–63, with interruptions) by its decrees concerning the Church and church discipline was a landmark in canon law Legislation in the Church went on later and arrived again at considerable confusion, which was resolved in 1904 when Pius X announced the undertaking of the *Codex juris canonici* This was drafted by a commission of cardinals headed by Cardinal Gasparri, all the resources of the Church were used to produce the *Codex juris canonici* In 1917, when the code was finished, a permanent commission of cardinals was set up to interpret it Study of canon law is based on the code and the interpretations issued by the commission, the *Canon Law Digest* brings decisions up to date Canon law has had profound influence not only among the faithful but also in the law of countries where the Roman Catholic Church has been the state church In the Middle Ages the church courts had very wide jurisdiction—e g , in England, control of the law of personal property—and because they were well regulated, they tended to attract many borderline cases that might have been the business of developing royal courts (see BENEFIT OF CLERGY) This conflict of courts was one of the major causes of dispute between HENRY II of England and Thomas à Becket The term "canon law" is also used for ecclesiastical law in the Anglican and Protestant Episcopal churches The Anglican *Constitutions and Canons Ecclesiastical* (1603) was a collection of ecclesiastical rulings, not based on the old canon law, but given equal force with the canon law See T Lincoln Bouscaren and Adam C Ellis, *Canon Law* (1946), A G Cicognani, *Canon Law* (rev ed , 1949)

Canonsburg, borough (pop 12,599), SW Pa , SW of Pittsburgh, settled 1773, laid out 1787, inc 1802 It is a coal-mining center with metal plants and potteries A gram of radium produced here was presented to Mme Curie in 1921, and the town was visited by her Log Academy (1780), oldest school building W of the Alleghenies, is here Black Horse Tavern (1794) was the site of the precipitation of the Whisky Rebellion Roberts House (1804) is an example of the W Pennsylvania manor type

Canopus (kunō'pŭs), ancient city, N Egypt, of which there are ruins near the modern ABOUKIR The Canopic (westernmost) mouth of the Nile, named for the city, has long been silted up Canopus, the pilot of Menelaus, is supposed to have been buried here Vases capped with the figure of a human head, called Canopic vases, were used to hold the viscera of embalmed bodies The Decree of Canopus, issued here and found at Tanis, was of value in promoting modern study of the ancient Egyptian language

Canopus, second brightest star in the heavens It is the brightest star in Carina, a part of a Southern Hemisphere constellation called Argo Navis, and is known as Alpha Carinae or Alpha Argus The star is not visible north of lat 37° N Only Sirius is brighter than Canopus, but since Canopus is many times more distant it is probably thousands of times greater in mass.

Canora, town (pop 1,205), E Sask , ESE of Saskatoon and near the Whitesand river

Canosa di Puglia (känō'sä dē pōō'lyä), Latin *Canusium*, rural city (pop 28,163), Apulia, S Italy It flourished under the Romans and was noted for its wool and its fine vases, many of which were found in tombs near by The Roman army fled to Canusium after the disastrous defeat at Cannae (216 B C) There are remains of Roman walls, of an amphitheater, and of a gate The 11th-century cathedral has fine sculptured bronze doors and contains the tomb of Bohemond

Canossa (kunō'sa, Ital känō'sä), hamlet, N central Italy, near Reggio nell' Emilia, in the Apennines There are ruins of the castle of the powerful feudal family which took its name from the place In the 10th and 11th cent they ruled over much of Tuscany and Emilia MATILDA, countess of Tuscany, was the last of the family In Jan 1077, the castle was the scene of penance done by Emperor HENRY IV to obtain from Pope Gregory VII the withdrawal of the excommunication against him The pope was Matilda's guest at the castle, and Henry is said to have stood three days barefoot in the snow before being admitted to the pope's presence Henry was absolved, but peace between him and the pope was short-lived This episode had wide political implications Bismarck coined the phrase "to go to Canossa" (i e , to submit to the demands of the Roman Catholic Church) in the Kulturkampf

Canova, Antonio (äntō'nyō känō'va), 1757–1822, Italian sculptor He is regarded as the leader of the classical revival in Italy His influence upon the art of his time was extensive, and his numerous works are graceful and polished He received commissions from other European countries and from the United States In France he made statues of Napoleon and his family His statue of George Washington for the statehouse at Raleigh, N C (destroyed by fire in 1831), was dressed in Roman armor and had an Italian inscription Among his best-known works are two groups of *Cupid and Psyche* (Louvre), a statue of Pauline Borghese (Borghese Villa, Rome), *Perseus with the Head of Medusa* (Vatican), *Three Graces* (Hermitage, Leningrad), and monuments to Clement XIII and Clement XIV in Rome

Cánovas del Castillo, Antonio (äntō'nyō kä'nōvas dĕl kästē'lyō), 1828–97, Spanish conservative statesman, historian, and man of letters After the restoration of Alfonso XII, which he had strongly advocated, he was repeatedly premier and introduced, with the liberal leader Sagasta, the system of 'turns'' of the conservative and liberal parties in the government He was assassinated by an anarchist The editor of *Historia general de España* (18 vols , 1891–99), he also wrote several historical and critical works

Canrobert, François Certain (frāswȧ' sĕrtē' kärôbĕr'), 1809-95, marshal of France After service in Africa, he returned (1850) to Paris and aided in the coup d'état of Louis Napoleon (1851) He served in the Crimean War, for a time in command, distinguished himself at Magenta in the Italian War of 1859, and participated with honor in the battle of Gravelotte in the Franco-Prussian War He also held political and diplomatic posts, becoming a senator of the republic

Canso, fishing town (pop 1,418), E N S , near the entrance to Chedabucto Bay and near Cape Canso, the easternmost point of Nova Scotia peninsula proper Canso is the western terminus of a number of ocean cables The harbor was much used by fishing fleets in colonial times and was fortified by the British in 1720 The Gut, or Strait, of Canso, scarcely a mile wide in places, separates Nova Scotia peninsula proper from the large island of Cape Breton The strait is much used by sailing vessels and coast steamers There are fishing villages along its hilly, wooded shores

Cantabrian Mountains (käntā'brēən), N Spain, extending c 300 mi along the Bay of Biscay from the Pyrenees to Cape Finisterre The highest peaks are the Peña de Cerredo (8,687 ft) and the Peña Vieja (8,573 ft) in the Europa group in the central section The mountains are rich in minerals, especially coal and iron

Cantabriga. see CAMBRIDGE, England

Cantacuzene (kăn"tăkōōzē'nō), or **Cantacuzino** (kăn"tăkōōzē'nō), noble Rumanian family of Greek origin, tracing its descent from the Byzantine emperor JOHN VI (John Cantacuzene) Under Ottoman rule members of the family were among the PHANARIOTS who governed Walachia and Moldavia, late in the 16th cent one branch settled in Walachia A Russian branch of the family held high positions in the army and as governors of Bessarabia **Serban Cantacuzene,** 1640–88, hospodar of Walachia (1679–88), took part in the Turkish siege of Vienna (1683), he probably was poisoned because of his open pro-Austrian feelings During his rule Rumanian was substituted for Slavonic as the liturgical language, and the first Rumanian Bible was printed (1688) under his auspices **George Cantacuzene,** 1837–1913, was head of the Rumanian conservatives and was (1905–7) premier.

Cantacuzene, John see JOHN VI, emperor.

Cantal (käntäl'), department (2,231 sq mi , pop 186, 843), SE central France, in AUVERGNE Aurillac is the capital The **Plomb du Cantal** (plō" dü käntäl'), an extinct volcano, is the highest peak (6,096 ft) of the Cantal mountain group

cantaloupe see MELON.

Cantarini, Simone (sēmō'nā käntärē'nē), 1612–48, Italian painter and etcher, called Il Pesarese and Simone da Pesaro His principal paintings include *Transfiguration* (Brera, Milan), *Assumption* and a portrait of Guido Reni (Bologna), and *Magdalene* (Pesaro)

cantata (kuntä'tŭ) [Ital ,=sung], composite musical form which grew up in Italy in the baroque period alongside the opera and, somewhat later, the oratorio It was a short dramatic composition in monodic style, originally consisting of strophic variations on a recurrent bass By the middle of the 17th cent it was beginning to take the form of recitative and aria The secular or chamber cantata was the earlier form and was more prevalent in Italy and France In Germany the church cantata prevailed, and the form became more elaborate with the addition of choral and instrumental sections Buxtehude wrote a great many cantatas for all the seasons of the church year, as did J S Bach, who also adopted the practice of employing chorale melodies and texts in his sacred cantatas After Bach the cantata became, in general, a diminutive form of the oratorio

Canterbury, county borough (1931 pop 24,446, 1947 estimated pop 24,850), Kent, England, on the Stour river at the foot of the North Downs It was the Durovernum of the Romans and the Cantwaraburh (O E ,=fort of the Kentish militia) of the Saxons It has long been the spiritual center of England In 597 St Augustine arrived from Rome to convert the island peoples to Christianity He was consecrated at Arles as "bishop of the English," founded an abbey at Canterbury, and became the first archbishop of Canterbury and primate of all England The early cathedral was several times burned and rebuilt (1011, 1067, 1174) After the murder of THOMAS À BECKET (1170) and the penance of Henry II, Canterbury became famous throughout Europe as the object of great pilgrimage, and the *Canterbury Tales* of CHAUCER are based upon the stories of these travelers The present cathedral is a magnificent structure, its architecture embodying the work of several periods and various men (notably Lanfranc and Anselm) Notable are the great 15th-century tower (235 ft high), the long transepts, the screen separating the raised choir from the Perpendicular nave, the east chapel (called the Corona or Becket's Crown), which contains the marble chair in which the archbishops are enthroned, Trinity Chapel, where the shrine of St Thomas was until 1538, when Henry VIII ordered it destroyed and the accumulated wealth confiscated, the chapel in which French Protestants worshiped in the 16th cent and where services are still held in the French tongue, the northwestern transept (where a plaque commemorates the exact site of Thomas à Becket's murder), and the tombs of Henry IV and Edward the Black Prince In the Second World War the cathedral was the object of severe German reprisal raids (June, 1942), which resulted in the destruction of the comparatively new library and many other surrounding buildings, but the cathedral itself received no direct hits The city of Canterbury is also of great historical interest, having remains of the ancient city walls and gate, St Martin's Church (established before St Augustine's arrival and known as the Mother Church of England), St Augustine's Abbey (on the site of the original monastery), and the old pilgrims' hostel called the Hospital of St Thomas, as well as several fine old inns Christopher Marlowe was born at Canterbury and was educated at King's School here (of very ancient origin) before going to Cambridge

Canterbury, farming town (pop 992), E Conn , on the Quinebaug, settled c 1690, inc 1703 The site of Moses Cleaveland's birthplace is marked Prudence CRANDALL had a school for Negro girls here

Canterbury bells see BELLFLOWER

cantharides (kănthă'rudēz) or **Spanish fly,** bright green or bluish beetle, *Lytta* (formerly *Cantharis*) *vesicatoria*, found chiefly in S Europe and sometimes in England This insect and others of the same family are often called blister beetles because of the irritating effect they have on the skin By crushing the dried bodies of the beetles the drug **cantharidin** is obtained It is sometimes used in plasters as an external irritant Taken internally, cantharidin may cause fatal poisoning, in even minute quantities it causes severe inflammation and great distress

Canticles, another name of the SONG OF SOLOMON

Cantigny (kätēnyĕ'), village (pop 102), Somme dept , N France, W of Noyon Captured by the 1st Division of the U S army in May, 1918, Cantigny is the site of a monument commemorating the first offensive operation by American forces in the First World War See J C Wise, *The Turn of the Tide* (1920).

cantilever (kăn'tĭlēvur), a beam supported rigidly at one end to carry a load along the free arm or at the free end. A slanting beam fixed at the base is often used to support the free end, as in a common bracket The diving board is a simple cantilever beam and the cantilever design is often used for canopies, for balconies, for the sidewalks outside the trusses of bridges, and for large cranes such as those used in shipyards By the use of cantilever trusses, obstructing columns are eliminated in theaters Sometimes the great steel BRIDGE of modern times is constructed on the cantilever principle

Cantinflas (kän'tēnflas"), 1911–, Mexican moving-picture actor, whose real name is MARIO MORENO Called Mexico's Charlie Chaplin, he has appeared in such comedies as *Ni sangre ni arena*, *Agente desconocido*, *Los tres mosqueteros*, and *Romeo y Julieta*

Cantire, Argyllshire, Scotland see KINTYRE

Canton, John, 1718–72, English physicist He is known for his experiments in magnetism and electricity (verifying Franklin's results) and for producing Canton's phosphorus (phosphorescent calcium sulphide), obtained by calcining oyster shells with sulphur

Canton (kăn"tŏn', kän'tŏn"), Mandarin *Kuangchou*, city (pop 1,413,460), capital of Kwangtung prov , China, on the Canton delta of the Canton river It became a part of China in the 3d cent B C Foreign trade has been carried on here for more than a thousand years Early Arab traders built a mosque and minaret which still stand In 1511 Portugal secured a trade monopoly, but the British, French, and Dutch were later admitted also Trading, however, was under onerous restrictions until 1834 The Treaty of Nanking ending the Opium War made the city a treaty port Following a disturbance, French and British forces occupied Canton in 1856 Later the island of Shameen was ceded to them for business and residential purposes, and this reclaimed sandbank with its broad avenues, gardens, and fine buildings is now one of the most attractive sections, it was wholly restored to China in 1946 In 1921 the city walls of Canton were torn down and replaced by wide boulevards The river is crowded with boats housing much of the population Canton was the seat of the revolutionary movement in 1911 While it is now eclipsed in commercial importance by Shanghai, as the terminus of the Canton-Hankow RR it is still the main collecting and distributing point of S China Canton is a determined but still unsuccessful rival of Hong Kong for the foreign trade of the region It is the educational center of the south There are various industries, including food processing, ebony and ivory carving, pottery making, and silk weaving Canton was captured by the Japanese Oct 21, 1938, and held by them until the end of the Second World War It fell to the Communists in Oct , 1949

Canton **1** Town (pop 2,769), N central Conn , NW of Hartford, settled 1737, inc 1806 Its edge-toolmaking industry dates from 1826. **2** Industrial town (pop 2,651), co seat of Cherokee co , N Ga , N of Atlanta and on the Etowah river, in an area of farms and marble quarries, inc 1833 **3** City (pop 11,577), W central Ill , SW of Peoria, in the Illinois corn belt, founded 1825, inc 1849 It is a trade and industrial center for a coal and farm area Among its manufactures are agricultural implements and lumber products **4** Textile town (pop 6,381), E Mass , SSW of Boston, inc 1797 Paul Revere operated a copper and brass foundry here A state hospital school for the physically handicapped is here **5** City (pop 6,011), co seat of Madison co , W central Miss , NNE of Jackson, inc 1836 It is a trade and processing center in a cotton, truck, and timber area There are a number of fine old ante-bellum houses **6** City (pop 2,125), NE Mo , on the Mississippi above Hannibal, settled 1827 It is the seat of CULVER-STOCKTON COLLEGE A U S dam and lock are near by **7** Village (pop 3,018), co seat of St Lawrence co , N N Y , on the Grass river and SE of Ogdensburg, settled 1799, inc 1845 It is the seat of St Lawrence Univ (coeducational, 1856) and of a state agricultural school Frederic Remington was born here **8** Industrial town (pop 5,017), W N C , SW of Asheville In a lumber area, it has pulp and paper mills **9** City (pop 108,401), co seat of Stark co , NE Ohio, on Nimishillen Creek and E of Massillon, laid out 1806, inc as a town 1822, as a city 1854 In an important iron and steel area, the city's varied products include roller bearings and chemicals William McKinley lived and was buried here **10** Industrial borough (pop 2,040), NE Pa , SW of Towanda, settled c 1796, inc 1864 Its manufactures include machinery, paper boxes, and clothes hangers **11** City (pop 2,518), co seat of Lincoln co , SE S Dak , on the Big Sioux river and S of Sioux Falls, founded 1860 It is a trade center and shipping point for a farm region

Canton, river, Kwangtung prov , S China, of which the Tung river is an eastern tributary The Canton flows past the cities of Canton and Whampoa The estuary is Boca Tigris Although short, the river is one of the most important waterways of China The Chinese name is Chu-kiang or Chukong, Mandarin *Chu-chang* [all=pearl river]

Canton Island, atoll (3 5 sq mi , pop 81), central Pacific, one of the Phoenix Islands. It is c 2,000

mi SW of Honolulu Canton was claimed for the United States by American guano companies under the terms of the Guano Act (1856) In 1937 the British also claimed it and built a radio station here In 1938 the island was formally claimed by the United States and placed under the Dept of the Interior. In that year, both British and American colonists were brought to Canton. Because of the island's importance as a transoceanic air base, the two countries agreed (1939) on joint control of Canton and near-by ENDERBURY ISLAND for a period of 50 years

Cantor, Georg (gä'ôrk kän'tôr), 1845–1918, German mathematician, b St Petersburg He studied under Karl Weierstrass and was professor (1869–1913) at the Univ of Halle He is known for his work on the theory of numbers and for introducing the term "transfinite numbers," on which he wrote three memoirs translated under the title *Transfinite Numbers* (1941)

Cantor, Moritz Benedikt (mô'rĭts bā'nädĭkt), 1829–1920, German mathematician He taught (1863–1913) at the Univ of Heidelberg and was author of a four-volume history of mathematics (1880–1908)

cantor [Latin, = singer], a singer or chanter, especially one who performs the solo chants of a church service The office of cantor, at first an honorary one, originated in the Jewish synagogues, in which it was early the custom to appoint a lay member to represent the congregation in prayer The cantillation of prayers, and later of parts of the scriptures, was transmitted by oral tradition, which early became rigid among Oriental Jews. The notation of the chants was forbidden The cantor's musical position became more important, as did the quality of his voice, preferably a tenor, the professional cantor appeared about the 6th cent The early Christian church adopted the idea of the cantor See also PRECENTOR

Canusium: see CANOSA DI PUGLIA.

Canute (kənōōt', kənūt'), c 995–1035, king of England, Norway, and Denmark The younger son of SWEYN of Denmark, Canute accompanied his father in the invasion of England in 1013 which forced ÆTHELRED to take refuge in Normandy When Sweyn died (1014), the Danes in England swore fealty to Canute, but he withdrew with them to Denmark, where his older brother, Harold, was king With allies Canute invaded England in 1015, conquered most of Wessex, harried the Danelaw, and conquered Northumbria When EDMUND IRONSIDE succeeded (1016) his father, Æthelred, he reconquered Wessex, but failed to regain London, and after the battle of Assandun, the kings divided England When Edmund died, later that year, Canute was accepted as sole king He gave England peace and strove to continue English traditions by restoring the Church to high place and codifying English law To forestall dynastic quarrels he put away his wife Ælfgifu (whose son was Sweyn) and married Emma, the widow of Æthelred His son by Emma was Harthacanute He maintained a military household of his followers and gave English lands to many Danes, among them Godwin of Wessex and Siward of Northumbria In 1018 he succeeded to the throne of Denmark and was forced to lead several expeditions to assert his rights there and in the Danish provinces in Norway In 1026 he won a signal victory, and in 1028 he drove out Olaf II of Norway, thus becoming ruler of the three kingdoms He made his son Harthacanute king of Denmark, and in 1029 he made his son Sweyn king of Norway, with Sweyn's mother, Ælfgifu as regent Ælfgifu never was a successful ruler, she and Sweyn were driven out by 1035, and Olaf's son, Magnus, ruled Norway Canute established friendly relations with the Holy Roman Empire and attended the coronation of Conrad II in Rome in 1027 At the end of his reign Canute led an army into Scotland to stop Scottish invasions under Malcolm II Canute was succeeded by Ælfgifu's son, Harold Harefoot, then by Harthacanute See biography by L M Larson (1912)

Canute the Saint, d 1086, king (1080–86) and patron saint of Denmark He built churches and cathedrals and raised the bishops to the rank of princes In 1085 he attempted, unsuccessfully, to invade England Feast Day Jan 19

canvas, strong, coarse cloth of cotton, flax, hemp, or other fibers, early used as SAILCLOTH Made in natural color, bleached, or dyed, it has a wide variety of uses, as for game, duffel, sport, mail and nose bags, tennis shoes, covers, tents, and awnings Waterproofed with tar, paint, or the like it is called tarpaulin and used to protect boats, hatches, and machinery Duck is a fine light quality used for summer clothing, awnings, and sails Artists' canvas is a light, smooth, single-warp texture, specially treated to receive paint. Art or embroidery canvas is an open-mesh type, usually linen, for working in crewels and for needlepoint

canvasback see DUCK

Canyon, city (pop 2,622), co seat of Randall co., extreme N Texas, S of Amarillo in the Panhandle; settled 1892, inc 1906. Near Canyon, Palo Duro Creek and Tierra Blanca Creek form the Prairie Dog Fork of the Red River just above Palo Duro Canyon The canyon itself, a brilliant gash in the dun plateau of the Llano Estacado, today is viewed by many visitors It was probably seen by Coronado and was known centuries later to Charles GOODNIGHT and other cattlemen. Canyon is proud of its past as a cow town and handles cattle and wheat today West Texas State College (coeducational, 1910) has a museum featuring relics of the ranching past.

Canyon de Chelly National Monument. see NATIONAL PARKS AND MONUMENTS (table)

canzone (känzō'nā) or **canzona** (känzō'nä), in literature, oldest form of Italian lyric, developed in the 13th cent, probably from Provençal sources Petrarch wrote in this form, and in the 19th and 20th cent canzoni have been written by Giacomo Leopardi, GIOSUÈ Carducci, and D'Annunzio

canzone or canzona, in music, instrumental form of musical composition created in the late 15th cent by the Flemish school in imitation of the polyphonic French chanson It was often called *canzone francese* The organists of the Venetian school in the 16th cent. adopted the form, first as highly ornamented transcriptions of vocal chansons and then as independent compositions having contrasted contrapuntal and chordal sections with a middle section in triple meter This type of canzone was the forerunner of the ensemble *canzone da sonar* of the late 16th and 17th cent and led to the baroque sonata The more highly contrapuntal organ canzone was a forerunner of the fugue See H E Ulrich, *Chamber Music* (1948)

caoutchouc see RUBBER

cap, close-fitting head covering, usually distinguished from a HAT by having no brim It preceded the hat, being worn in early times by royalty and dignitaries, with variations in shape and material to indicate rank or profession The cap has come to have ceremonial and symbolic meanings It was the earliest headgear of British women as well as men and boys Called a bonnet in Scotland, it is traditionally worn there by men Early caps of the nobility were made of rich material lined with fur A 16th-century gold coin of Scotland, the bonnet piece, shows James V wearing a cap instead of a crown The cap of maintenance, also called the cap of dignity, indicating high rank, figures in heraldry and was used ceremonially in coronations of English sovereigns The judge in some courts puts on his cap before pronouncing the death sentence The forked cap of ecclesiastical dignity is the miter The biretta is worn by clergy and by some advocates The college cap, or mortarboard, is an evolution from an early soft square cap, called in Scottish universities the John Knox cap A cap may have a lay religious significance, as the FEZ of the Turk The Romans gave a conical cap to their emancipated slaves, the pointed cap with bells is the emblem of the FOOL or jester An English law of 1571, passed for the benefit of the cappers' trade, required males over six years old, unless of the higher classes, to wear on holidays the cloth "statute" cap which came to indicate a tradesman The Phrygian cap, with the point bent forward and with long flaps, was adopted by Byzantine officers and by the doges of Venice

Capablanca, José Raoul (hōsä' räōōl käpäblang'kä), 1888–1942, Cuban chess player, b Havana Champion of Cuba at the age of 12, he won the world's championship from Emanuel LASKER in 1921, retaining his title until he was defeated by ALEKHINE in 1927 His game was almost free from false interpretations of position, and his technique, though facile, was highly refined See his *My Chess Career* (1920) and *Chess Fundamentals* (1931); *Capablanca's Hundred Best Games*, (ed by H Golombek, with a memoir by J Du Mont, 1947)

Capaneus (käpunē'ŭs), in Greek legend, one of the SEVEN AGAINST THEBES He defied ZEUS to prevent him from scaling the wall of the city, and Zeus killed him with a bolt of lightning

Cap Chat (käp' shä'), town (pop 1,329), E Que , on the north shore of the Gaspé Peninsula and N of Campbellton

Cap de la Madeleine (käp' dù lä mädlĕn'), city (pop. 11,961), S Que , on the north bank of the St Lawrence river just N of TROIS RIVIÈRES It has large industries

Cape Breton Island (brĕ'tun), c 3,600 sq mi , forming the northeastern part of Nova Scotia prov and separated from the main part of the province by the Gut of CANSO. The easternmost point is called Cape Breton The center of the island is occupied by the Bras d'Or salt lakes. Gently sloping in the south, the island rises to rugged hills (Ingonish Mt , 1,392 ft) in the wilder northern part. The inhabitants are mainly of Scottish Highlander descent. There are many summer resorts on the lakes and fishing villages on the coast In the northeast are the extensive Sydney coal fields on which the important steelworks are dependent. The Cabot Trail, a road for motorists, commemorates the traditional discovery of Cape Breton Island in 1497 by John Cabot By the Peace of Utrecht (1713) the French retained Cape Breton, and many Acadians migrated here from Nova Scotia, which was ceded to the English. They renamed the island Ile Royale and at LOUISBURG established their strong fortress. With the final cession of Canada to the British (1763), Cape Breton was attached to Nova Scotia. It was again independent from 1784 to 1820, with Sydney as its capital Cape Breton Highlands National Park (some 390 sq mi) was established in 1936 See Arthur Walworth, *Cape Breton* (1948)

Cape Charles, town (pop 2,299), E Va , a port of entry on Chesapeake Bay near the tip of the Eastern Shore peninsula, founded 1884 in a region settled much earlier, inc. 1886 It was occupied by Federal forces in the Civil War

Cape Coast, town (pop 23,061), capital of the Gold Coast, a port on the Gulf of Guinea. In the 17th cent it was occupied successively by Portugal, Sweden, Denmark, Holland, and Great Britain There are fisheries

Cape Cod, sandy peninsula of glacial origin, 65 mi long and 1 to 20 mi. wide, SE Mass , comprising Barnstable co. It is bounded by Cape Cod Bay, the Atlantic, Nantucket and Vineyard sounds, and Buzzards Bay. Its soil is sandy, and huge quantities of cranberries are produced, fishing and the summer trade are other sources of income Its towns include Provincetown, Barnstable, Falmouth, and Bourne The name Cape Cod is attributed to Gosnold, who visited these shores in 1602 The Pilgrims put in at the site of Provincetown in Nov , 1620 Fishing towns were founded, and shipping, whaling, and saltmaking were practiced The 8-mile-long Cape Cod Canal, built in 1909–14 and improved by the Federal government in 1927, connects Cape Cod Bay and Buzzards Bay, crossing Bourne town Much has been written of the people, history, lore, and scenery of the cape See Thoreau, *Cape Cod* (1865), the many works of Joseph C Lincoln, H C Kittredge, *Cape Cod* (1930), Katharine Dos Passos and Edith Shay, *Down Cape Cod* (rev ed , 1947)

Cape Colony see CAPE PROVINCE

Cape Elizabeth, farming and resort town (pop 3,172), SW Maine, S of Portland, along SW Casco Bay, settled c 1630, set off from Falmouth 1765

Cape Fear River, formed in central North Carolina by the junction of the Deep and Haw rivers and flowing southeasterly across the piedmont and coastal plains to the Atlantic immediately N of Cape Fear Wilmington is at the head of its estuary, and Southport at its mouth Elizabethtown and Fayetteville are on the river

Cape Girardeau (jĭrär'dō, jĕrurdō'), city (pop 19,426), SE Mo , SSE of St Louis and overlooking the Mississippi, founded 1793 as a trading post, chartered 1843 Its position on the river, near the confluence of the Ohio, early made it an important port During the Civil War it was a fort Today an industrial and trade center, it produces and ships shoes, cement, and tobacco and lumber products The city is connected with Illinois by a highway bridge Southeast Missouri State College is here Fort D (1861) and other old buildings are among the points of interest

Cape jasmine, see GARDENIA

Capek, Josef, Czech *Čapek* (chä'pĕk), 1887–1945, Czech dramatist and painter He collaborated with his brother Karel on the drama *Adam the Creator* (1927, Eng tr , 1929) and *The Insect Play* (1921, Eng tr , 1923), a satire produced as *The World We Live In*, and wrote a play of his own, *The Land of Many Names* (1923, Eng tr., 1926) His moving *Poems from a Concentration Camp* (1946) were composed in the notorious Belsen camp He illustrated some of his brother's books As a painter he developed a style of primitiveness

Capek, Karel, Czech *Čapek*, 1890–1938, Czech playwright, novelist, and essayist He is best known as the author of two brilliant satirical plays—*R U R (Rossum's Universal Robots*, 1921, Eng tr , 1923), which introduced the word *robot* into the English language, and, written with his brother Josef, *The Insect Play* (1921, Eng tr , 1923, pub in the United States as *The World We Live In*). Also noted are the plays *The Makropoulos Secret* (1923, Eng tr , 1925), an inquiry on the desirability of longevity, and *Power and Glory* (1937, Eng tr , 1938), in which dictators are held up to condemnation He also wrote travel sketches (e g , *Travels in the North*, Eng tr , 1939), fanciful romances such as *The Absolute at Large* (1922, Eng tr , 1927) and *Krakatit* (1924, Eng tr , 1925), and essays (*Letters from England*, 1923, Eng tr , 1925) His three volumes of conversations with Thomas G. Masaryk (1928–35, Eng tr , 1934, 1938) form an outstanding biography, and the three psychological novels *Hordubal* (1934, Eng tr , 1934), *Meteor* (1934, Eng tr., 1935), and *An Ordinary Life* (1935, Eng tr , 1936) are a worthy climax to a notable career Capek died on the eve of the occupation of his country by Germany before the Second World War. Almost all of his works are available in English

Capell, Edward (kă'pl), 1713–81, English Shakesperian scholar. His 10-volume edition of Shakspere (1768) was the first to incorporate exact collations of all available old texts. He followed this with a commentary, *Notes and Various Readings to Shakespeare* (1775–83) He was also the editor of a collection of old English ballads and poems, *Prolusions* (1760).

Capella, Martianus (märshĕă'nŭs kŭpĕ'lŭ), fl. 5th cent.?, Latin writer, b Carthage. His one famous work, *The Marriage of Mercury and Philology*, called also the *Satyricon* and *Dissplinae*, is a long allegory about the liberal arts. Philology as here presented is love of learning, and the allegory surveys the seven branches of medieval learning (the seven bridesmaids in the allegory) grammar, dialectic, and rhetoric (the trivium) and geometry, arithmetic, astronomy, and music (the quadrivium). Its popularity in medieval schools was universal. The author is known also as Felix Capella and may have lived in the 4th cent.

Capelle, Eduard von (ā'dōōärt fŭn kăpĕ'lu), 1855–1931, German admiral. As secretary for the navy (1916–18) he inaugurated (1917) unrestricted submarine warfare.

Capello, Bianca (byäng'kä käpĕl'lō), 1548–87, grand duchess of Tuscany. Of a noble Venetian family, she eloped (1563) with the Florentine, Pietro Bonaventuri. She later became first the mistress, then (1579) the wife, of Francesco de' MEDICI. After a banquet the grand duke and his duchess died suddenly, supposedly of poison.

Cape May, city (pop 2,583), S N J., at the end of Cape May peninsula, settled in the 17th cent., inc. 1869. It became a popular resort in the mid-19th cent. **Cape May,** southern extremity of New Jersey, has a lighthouse on the point at the entrance to Delaware Bay, c 3 mi. above the point the cape is bisected by a canal 12 ft. deep and 100 ft. wide constructed by the Federal government in 1942–43 as a war emergency measure to eliminate the longer and hazardous route around the cape. The canal is part of the projected New Jersey Intracoastal Waterway. **Cape May Court House,** NNE of Cape May city, laid out in 1703, is the county seat of Cape May co. and site of a historical museum.

Cape of Good Hope Province see CAPE PROVINCE.

Cape Province, officially **Cape of Good Hope Province** (277,169 sq. mi., pop. 4,045,805), Union of South Africa, on the Atlantic Ocean and the Indian Ocean. The capital is Capetown. Cape Prov. is bordered on the north by South-West Africa, Bechuanaland, and Basutoland, and it occupies the southern tip of Africa, including the Cape of Good Hope, the south spur (840 ft. high) of Table Mt., for which it is named. Elevations increase rapidly away from the coast, and irregular hills and mountains occupy most of the province, especially KAFFRARIA in the east. Parts of the interior (e.g., the KARROO) are, however, quite level and are used for sheep raising, one of the chief activities of the province. Crops are raised wherever river water is available to supplement the inadequate rainfall, notably in the basin of the Orange River. Grains, citrus fruits, tobacco, and grapes (for wine) are grown. The mining of diamonds, copper, and coal brings much wealth. Industries include automobile assembly and textile manufacture. Cape Prov. is served by an excellent road net and by several rail lines which connect its ports, including Capetown, Port Elizabeth, and East London, with the interior. Before European penetration, South Africa was inhabited mainly by Bushmen and Hottentots. The search for a sea route to the East brought the region to European notice. Bartholomew Diaz, a Portuguese navigator, was the first to round the Cape of Good Hope; the complete journey to India by that route was first made (1497–99) by his countryman Vasco da Gama. A Dutch victualing station, established in 1652 at Table Bay (near the Cape) by Jan van Riebeeck was the earliest permanent settlement, it grew into Capetown. In the late 17th cent. there was extensive migration of French Huguenots, besides more Dutch settlers. Great Britain temporarily (1795–1803) occupied the Dutch settlements in South Africa, and in 1806 it annexed the territory. Opposition to British rule led many of the Boer (Dutch) farmers to migrate north (see TREK). Today the population is predominantly British in origin. In the South African War important engagements were fought in the colony at Kimberley and Mafeking, and toward the end of the war there was much guerrilla activity. The colony became a province with the establishment (1910) of the Union of South Africa.

caper, straggling white-flowered shrub (*Capparis spinosa*) of the Mediterranean region. It is cultivated in S Europe for the flower buds—capers—which are pickled and used in flavoring meat sauces and salads. The plant is occasionally grown in the United States.

Cape River: see SEGOVIA, river.

Capernaum (kupûr'nāŭm) or **Capharnaum** (kŭfär'nāŭm), town, NE Palestine, on the Sea of Galilee, closely associated with Jesus' ministry. See John 2.12, 6 59, Mat. 11 23; 8, 9, Mark 1; 2, Luke 4, 5. Capernaum has been located W of the Jordan river near the sea. An interesting 2d-century synagogue has been excavated and partially restored.

Cape Sable Island (sā'bŭl), 7 mi. long and 3 mi. wide, SW Nova Scotia, SW of Shelburne and separated from the mainland by Barrington Passage. Clarkes Harbour (pop. 887), a fishing port, is on the west coast.

Capetians (kŭpē'shŭnz), royal house of FRANCE, which ruled continuously from 987 to 1328. The first historical ancestor was ROBERT THE STRONG, count of Anjou and of Blois. His son, EUDES, count of Paris, was elected (888) king after the deposition of Charles III (Charles the Fat). From 893 to 987 the crown passed back and forth between CAROLINGIANS and Capetians. Eudes's brother, ROBERT I, was chosen king in 922, but died in 923. The title, waived by his son, HUGH THE GREAT, passed to Robert's son-in-law, RAOUL, duke of Burgundy. In 987 Hugh's son, HUGH CAPET (kā'plt, kă'plt), whose nickname gave the house its appellation, became king. His direct descendants remained on the throne till the death (1328) of Charles IV, when it passed to the related house of VALOIS. The successors of Hugh Capet were Robert II, Henry I, Philip I, Louis VI, Louis VII, Philip II, Louis VIII, Louis IX, Philip III, Philip IV, Louis X, John I, Philip V, and Charles IV. After the fall of the monarchy (1792), Louis XVI and Marie Antoinette were called Capet (Citizen Capet and Widow Capet). See F. Funck-Brentano, *Earliest Times* (Vol. I of *National History of France*).

Capetown or **Cape Town,** city (pop. 383, 891), Cape Prov., legislative capital of the Union of South Africa, a port on the Atlantic Ocean. The city is beautifully situated at the foot of Table Mt. and overlooking Table Bay. Its large port has extensive docking facilities and accommodates much shipping. The railroad on which Capetown is situated is intended as a link in the projected Cape-to-Cairo line. The city was founded in 1652 by Jan van Riebeeck as a victualing station for Dutch ships traveling between Europe and the East. It was temporarily occupied (1795–1803) by the British, who seized it from the Dutch in 1806. Its development was especially rapid in the late 19th cent. and in the 20th cent. Capetown still retains many of the qualities of a Dutch city. It is a warm-weather resort with an equable climate and fine beaches. Perhaps the leading cultural center of South Africa, it has art galleries, three colleges, and a university. Distinguished structures include the Parliament building (enlarged 1910) and the Cecil Rhodes memorial on the slopes of Table Mt.

Cape Verde Islands (vûrd), Port. *Ilhas do Cabo Verde,* archipelago (1,557 sq. mi., pop. 181,286), in the Atlantic Ocean c 375 mi. W of Dakar, French West Africa. It is a Portuguese possession. The capital is Praia. The possession comprises 10 main islands, of which the largest are Santo Antão and São Tiago. The islands (especially São Vicente) are used as coaling stations. Tropical crops, including coffee, oranges, and sugar cane, are grown. Portugal acquired the islands in the late 15th cent., probably on the basis of discovery (see CADAMOSTO, LUIGI DA).

Cape Vincent, village (pop. 931), N N Y., on the St. Lawrence and NW of Watertown, inc. 1853. It is a port of entry and a center for the Thousand Islands resort area. There is a U S. fish hatchery.

Cape York Peninsula, N Queensland, Australia, between the Gulf of Carpentaria and the Coral Sea. It is largely tropical jungle.

Capgrave, John (kăp'grāv), 1393–1464, English Augustinian friar, a man of unusual erudition for his time. The work that made him famous, *Nova legenda Angliae* [new legends of England], is really a rewriting of a work by a monk of Tynemouth. It is, at any rate, the first notable collection of lives of English saints. Other well-known works he wrote were *De illustribus Henricis* [on illustrious men named Henry] and a chronicle of England.

Cap-Haïtien (käp"-hā'shun, -hā'tēun, Fr. käpāĕsyĕ'), city (pop. c 25,000), N Haiti. It is an important port, the second largest city in Haiti, and the metropolis of the north. Founded by the French in 1670, it was until 1770 the capital of colonial Haiti, owing its eminence to a good harbor and the development of large sugar plantations in the surrounding lowlands—the Plaine-du-Nord. Le Cap was also the capital of the kingdom ruled by HENRI CHRISTOPHE. In spite of earthquakes (especially severe in 1842), bombardments, and almost continual civil strife, it retains some picturesque colonial charm. Cap-Haïtien is a commercial and distributing center and exports coffee, cacao, sugar, woods, and sisal.

Capharnaum (kufär'nāum), the same as CAPERNAUM.

Caphtor (kă'fˈtôr), home of the Philistines before they came to Canaan. Its inhabitants are called Caphtorims. Some identify Caphtor with Crete, some with Cilicia. Gen. 10 4, Deut. 2 23, 1 Chron. 1 12, Jer. 47 4, Amos 9 7.

capillarity (kăpulă'rĭtē), causes that part of the liquid's surface in contact with a solid to be elevated above or depressed below that part of the surface not in contact with the solid. For example, the surface of water in a glass jar is seen to be not level but slightly higher around the edges where the water and the glass are in contact. The reverse is true of mercury, the edges of the surface being depressed. This phenomenon receives its name from the fact that when one end of an open tube of extremely small diameter (called a capillary tube from the Latin *capillus* meaning a hair) is placed perpendicularly in a liquid, the liquid rises in the tube to a level above the level outside (as in the case of water) or is depressed (as in the case of mercury). The forces acting to bring about this elevation of the surface in seeming contradiction to the law of gravity are adhesion, since the liquid rises only if it wets, i.e., sticks or adheres to, the solid, but is depressed if it does not wet, cohesion, for the liquid does not break apart, and SURFACE TENSION. One of the causes for the rise of water upward in the soil is capillarity.

capillary (kă'pŭlĕ"rē), unit of the blood circulatory system. Capillaries are minute vessels, connecting the arterioles (smallest arteries) and venules (smallest veins), found in the form of a network throughout the body. The oxygen of the red blood cells, the nutriment of the blood, and the white blood corpuscles pass through the thin walls of the capillaries into the body tissues, and the tissues discharge carbon dioxide and other waste products into the capillaries.

Capistrano, John of. see JOHN CAPISTRAN, SAINT.

capital [Latin, = of the head], the crowning member of a column, pilaster, or pier. It acts as the bearing member beneath the lintel or arch supported by the shaft and has a spreading contour appropriate to its function. The most primitive type, of which examples were found in the Beni Hassan tombs, Egypt, consisted of a square block. In later forms the capital had three well-defined parts, the necking, where it joins the shaft, the echinus, or spreading member above it, and the abacus, or block at the top. In Egypt such types were developed as early as 1500 B C. papyrus buds, the lotus, and the palm leaf were used as motives of ornamentation. The Greeks perfected three types belonging to three separate orders of architecture—the Doric, the Ionic, and the Corinthian. The simplest is the Doric, characterized by its spreading cushionlike echinus. The Ionic has the scroll shape, probably derived from special forms in nature (nautilus shell or horns of a ram). The Corinthian has the inverted bell shape, with ornaments deriving from the acanthus leaves. These three general types were adopted and later modified by the Romans. The Roman Doric and Corinthian, in turn, inspired Romanesque and Gothic designers, who used, however, a new and rich variety of forms, such as grotesque heads, birds, and animals. The architects of the Renaissance returned to the ancient Roman capitals as basic inspiration for their own free and graceful designs. They are currently found in the classic phases of traditional architecture.

capital As originally used in business, capital denoted money that bears interest, but the word now includes the entire stock of goods from which an income is derived. Tools, machines, stores of merchandise, houses, means of transportation, lands, and such paper as stocks and bonds—any materials used to extract, transport, create, or alter goods—can be called capital. Marketable intangibles, as credits, good will, promises, patents, and franchises, are also included by some economists. Capital goods provide for future wants, while consumers' goods provide only for the present. Distinction is also made between capital stocks or circulating capital (raw materials, goods in process, finished goods, and sometimes wages) and capital instruments or fixed capital (machines, tools, railways, factories). Capital may be classed as specialized, such as railway equipment, or unspecialized, such as raw materials having many uses. Capital is thought to arise and accumulate from savings from incomes, scarcity of natural materials, presence of monopolies, previous profits, speculation, and recapitalization. A revolutionary new concept was offered by Karl Marx in *Das Kapital.* For more conservative views, see Irving Fisher, *Nature of Capital and Income* (1906), H. G. Moulton, *The Formation of Capital* (1935), J. R. Hicks, *Value and Capital* (1939), F. A. von Hayek, *The Pure Theory of Capital* (1941).

capitalism, the economic system characterized by private ownership of property, production of goods for profit, and the institution of bank credit. The vagueness of the term is increased by the ethical aspect of socialist criticism. Capitalism has existed in at least partial form in the economies of all civilizations, but its modern importance dates from the Industrial Revolution of the 18th cent., when bankers, merchants, and industrialists began to displace landowners in social, political, and economic importance, particularly in Great Britain. Capitalism stresses freedom of individual economic enterprise, but even when, as in the early 19th cent., the economy was least restricted, the ultimate right of the state to supervise and regulate industry and trade was questioned by few. In the 19th and the early 20th cent. the profit motive called into being vast credit, manufacturing, and distributing institutions, and the social and economic effects of capitalism largely transformed world culture, but in the 20th cent., social and industrial reforms in democratic states and the action of totalitarian governments circumscribed the previously free capitalist system. See J. A. Schumpeter, *Capitalism, Socialism, and Democracy* (1942).

capital levy, form of taxation by which the state takes part of the capital of any person or business, as distinguished from a tax which takes a part of personal or business income. It is usually applied

to all capital above a certain minimum and may be set aside for a specific purpose, such as the sinking of the public debt. It was used by several European nations in financial contingencies arising from the armaments race and the First World War and has been advocated as a measure of social welfare and a deterrent to war profits Opponents of the capital levy stress the implied penalty to saving. In the Second World War, Great Britain and the United States resorted to tremendous direct taxation to accomplish many of the aims of the capital levy See Hugh Dalton, *The Capital Levy Explained* (1923).

capital punishment, putting to death by the state Originally used to appease an offended deity because of a grave religious offense, it was later imposed for homicide, treason, heresy, robbery, and even petty crimes Since the 18th cent , when such men as Beccaria pleaded against it, use of the death penalty has decreased It has been practically abolished in some countries in accordance with modern treatment of criminals, which stresses rehabilitation rather than punishment, in other countries only murder and treason are punished by death Modern methods of capital punishment include hanging, electrocution, gassing, shooting, and guillotining See also CORPORAL PUNISHMENT See E C Calvert, *Capital Punishment in the Twentieth Century* (5th ed , 1936), J E Johnsen, comp , *Capital Punishment* (1939)

Capito, Wolfgang Fabricius (kă'pĭtō, Ger vôlf'gang fäbrē'tsyōōs kă'pētō), 1479–1541, German Lutheran reformer, whose original family name was Köpfel As a well-known humanist, he brought about communication between Erasmus and Luther Capito worked with Martin Bucer in an attempt to unify the Evangelical churches of Germany, France, and Switzerland

Capitol, seat of the U S government at Washington, D C It is the city's dominating monument, built on an elevated site which was chosen by George Washington in consultation with Major L'Enfant The building as it now stands took many years in erection and is the result of the work of several architects In 1792 a competition was held to select an architect, but William Thornton gained the President's approval with a plan separately submitted and was appointed In 1793 the President set the cornerstone, with Masonic rites, and the building was begun Later three additional architects were employed—E S Hallet, George Hadfield, and James Hoban In 1814 the uncompleted building was burned by the British, and B H Latrobe, who had been appointed (1803) surveyor of public buildings, undertook its restoration He was succeeded in 1818 by Charles Bulfinch, who brought the design to completion in 1830 The building proved inadequate and was greatly enlarged (1851-65) by T U Walter, who added the extensive House and Senate wings at either end and the imposing dome, c 288 ft in height, which dominates the composition The building proper is over 725 ft long and c 185 ft wide See I T Frary, *They Built the Capitol* (1940)

Capitol, in Rome see Capitoline Hill

Capitol Heights, town (pop 2,036), W central Md , a surburb of Washington, D C

Capitoline Hill or **Capitol**, highest of the seven hills of ancient Rome, historic and religious center of the city The great temple of Jupiter Capitolinus, on its southern summit, was dedicated in 509 B C , it was foremost among the temples and altars of Rome Its main cella was consecrated to Jupiter, the two lateral cellae were devoted to the cult of Juno and of Minerva Twice destroyed by fire, it was last rebuilt by Domitian On the northern summit of the Capitol was the citadel (arx) On the side overlooking the Forum stood the Tabularium, where the state archives were kept From the Tarpeian Rock, on the steep south face of the hill, state criminals were hurled to their death until the 1st cent A D In the Middle Ages the Capitol remained the political center of Rome The senatorial palace, built over the Tabularium, was the seat of the senators and a true fortress, the center of municipal government in Rome is still on the same location In the 16th cent Michelangelo designed the present plan A flight of steps leads to the fine square on top of the hill, on one side of the square is the Palazzo dei Conservatori, on the other, the Capitoline Museum Both buildings now house collections of antiquities In the center of the square is the ancient equestrian bronze statue of Emperor Marcus Aurelius

Capitol Reef National Monument see NATIONAL PARKS AND MONUMENTS (table)

capitularies (kupĭ'chōōlĕ"rēz), decrees and written commands of the Merovingian and Carolingian kings of the Franks Both legislative and administrative, they were the chief written instrument of royal authority The ordinances were issued sometimes by the king alone, sometimes by the king and his counselors Additions to, and alterations of, the customary Germanic laws required the consent of the tribes concerned or of their representatives Several capitularies—such as the exemplary *Capitulare de villis*—dealt with the administration of the royal domains, others dealt with the Church. Most important were those which Charlemagne addressed to his officers, the *missi dominici*. These contained instructions for the administration of the empire and instituted far-reaching reforms. Capitularies issued in the late Carolingian period foreshadowed the feudal system. The name capitularies is also applied to similar documents in other fields The recognized modern edition is in the *Monumenta Germaniae historica*

Capiz (kä'pēs), municipality (1948 pop. 32,353), capital of Capiz prov , N Panay, Philippine Islands It has rice and sugar mills

Capo d'Istria, Giovanni Antonio, Count (kä"pō dē'strēä), Gr *Joannes Antonios Capodistrias* or *Kapodistrias*, 1776–1831, Greek and Russian statesman, b Corfu After administrative work in the Ionian Islands he entered (1809) the Russian service and was Russian foreign minister (1820–22) He refused leadership of the Greek uprising in 1821 but brought Russian influence to bear in favor of the Greeks In 1827 the Greek national assembly elected him president of Greece. His preference for the aristocratic class and his Russian affiliations caused popular resentment and led to his assassination

Capodistria (käpudl'strēä, Ital käpōdē'strēä), town (pop 7,105), Free Territory of Trieste, on a small island in the Gulf of Trieste It is joined to the mainland by a bridge From the 13th cent until 1797 it was the capital of Istria under Venetian rule, it preserves the typical aspect of a Venetian town In the main square are the Romanesque cathedral (restored 16th cent) and campanile, a Gothic loggia, and the pinnacled town hall

cap of maintenance see CAP

Capone, Al (Alfonso or Alphonse Capone) (kŭpō'-nē), 1899–1947, American gang leader, b Naples, Italy Al Capone was reared in New York city, where he became connected with organized crime and was twice involved in murder investigations In 1920 he moved to Chicago and became a lieutenant to John Torrio, one of the most feared gangsters of the city They established numerous "speakeasies" in Chicago in the prohibition era and expanded their operations After several of his enemies were murdered and Torrio fled the city, "Scarface" Capone took control He became implicated in brutal murders and was known to have received tribute from businessmen and politicians His crime syndicate—which terrorized Chicago in the 1920s and controlled gambling and vice there—was estimated by the Federal Bureau of Internal Revenue to have taken in $105,000,000 in 1927 alone Capone was indicted (1931) by a Federal grand jury for evasion of income-tax payments and was sentenced to an 11-year prison term In 1939, physically and mentally shattered, Capone was released See biography by F D Pasley (1930)

Caporetto (käpurĕ'tō, Ital käpōrāt'tō), village of Slovenia, NW Yugoslavia, on the Isonzo river Until 1945 it was in Italy Here in 1917 the Italians were severely defeated by the Austrians

Cappadocia (käpŭdō'shŭ), ancient region of Asia Minor, watered by the Halys river (the modern Kizil Irmak), in present E central Asiatic Turkey The name was applied at various times to territories of varying size At its greatest extent it stretched from the Halys valley E to the Euphrates, from the Black (Euxine) Sea in the north to the heights of the Taurus and Anti-Taurus ranges in the south Mostly a high plateau, interrupted by mountains and isolated in winter by snow in the mountain passes, it was largely devoted to grazing and was famous for its horses and its fat-tailed sheep The inhabitants were sometimes called White Syrians Aided by the inaccessibility of the land, they maintained a good deal of independence Cappadocia was conquered by the Persians, and an Iranian ruling class was installed but did not have all local power Cappadocia did not yield fully to the conquest of Alexander the Great, and after his time it gradually developed as an independent kingdom in the 3d cent B C Pontus, which had been first cut off in Persian times, now became completely separated from Cappadocia The kings had their capital at Mazaca (later Caesarea Mazaca), the only other important cities were Tyana and Melitene, though Iconium was at times in Cappadocian In the 2d cent and 1st cent B C the Cappadocian dynasty maintained itself largely by siding with Rome The king was, however, disloyal to Rome in the Parthian invasion, at the time of Julius Caesar Later Rome installed a new king, then in A D 17 annexed the region as a province Cappadocia became prosperous Christianity was introduced early (1st cent A D), and the name appears in the Bible, though its importance as a separate region was already declining and later disappeared.

Cappel, Switzerland see Kappel.

Capper, Arthur, 1865–, American journalist and political leader, b Garnett, Kansas He did reporting on Kansas and New York city newspapers and later became publisher of the Topeka *Daily Capital* and directed several farm journals He was (1915–19) governor of Kansas and from 1919 until he retired in 1949 he served in the U S. Senate An important member of the Republican party and a leader of the farm bloc, Capper fathered much legislation beneficial to the farmer, was a staunch isolationist, and generally opposed the New Deal. He wrote *The Agricultural Bloc* (1922)

Capponi, Gino (jē'nō käp-pō'nē), 1792–1876, Italian historian, a marquis He played an important part in the spiritual movement of the Risorgimento. He was for a short time president of the constitutional government in Tuscany (1848) and became a senator after the annexation (1860) of Tuscany to the kingdom of Sardinia Of his writings, the *Storia della repubblica di Firenze* (1875) is the most important

Capponi, Piero (pyä'rō), c 1446–1496, Florentine nobleman and diplomat He served Lorenzo and Piero de' Medici and later the Florentine republic. His firm and courageous attitude toward Charles VIII of France, who wanted to impose harsh terms on the republic, induced the king to grant more equitable conditions (1494)

Capra, Frank (kă'pru), 1897–, American moving-picture director, b Palermo, Sicily He entered the moving-picture industry in 1921 and worked for Mack Sennett Gently witty and satirical, his later films include *It Happened One Night*, *Mr. Deeds Goes to Town*, *Lost Horizon*, *You Can't Take it with You*, and *Mr Smith Goes to Washington*. Capra directed the *Why We Fight* series for the U S army in 1943

Capreol, town (pop 1,641), S Ont , N of Sudbury.

Caprera (kaprā'ra), small island, off the northeast coast of Sardinia, Italy, in the Strait of Bonifacio It was the residence of Garibaldi, who is buried here

Capri (kä'prē), Latin *Capreae*, small, rocky island (pop 7,984), S Italy, near the entrance to the Bay of Naples It is celebrated for its striking scenery, delightful climate, and luxurious vegetation The Blue Grotto is the most famous of the many caves along its high, precipitous coast Monte Solaro, the highest point (1,932 ft), commands a magnificent view The Roman emperors Augustus and Tiberius built here fine villas, of which there are remains The local architecture has Roman, Norman, and Moorish features There are two small towns, Capri and Anacapri, both much-visited tourist centers A dry white wine is produced on the island

Capricornus (kăprĭkō'nus) [Latin,=goat horn], in astronomy, an inconspicuous constellation of the Southern Hemisphere lying between Sagittarius and Aquarius It has been depicted from earliest times either as a goat or as a figure with its fore part like that of a goat and its hind part like the tail of a fish The Tropic of Capricorn takes its name from this constellation, which marks the southernmost part of the ecliptic and therefore the winter solstice in the Northern Hemisphere Capricornus is the name of the 10th sign of the zodiac, the Goat, and the constellation is one of the zodiacal constellations

caprific see FIG

Caprivi, Leo, Graf von (lā'ō gräf' fŭn kaprē'vē), 1831–99, German statesman, whose full name was Georg Leo, Graf von Caprivi de Caprara de Montecuculi He succeeded (1890) Bismarck as chancellor Favoring industrial over agrarian interests, he negotiated (1892–94) a series of reciprocal trade agreements Agrarian opposition caused his dismissal (1894) Prince Hohenlohe-Schillingsfürst succeeded as chancellor

Caprivi Zipfel (kaprē'vē tslp' ful) [Ger *Zipfel*=tip, point] or **Caprivi Strip**, territory, 300 mi long and 50 mi wide, extending along the northern border of Bechuanaland W to the Zambezi river A part of South-West Africa, it is named for the German chancellor Graf von Caprivi, who obtained it from Great Britain to give the former German colony access to the Zambezi

Capron, Horace (kā'prŭn), 1804–85, American agriculturist and scientific farmer b Attleboro, Mass He held several government offices in the United States and was appointed adviser in agriculture to the Japanese government, in which capacity he introduced scientific farming methods in Japan While commissioner (1867–71) of the U S Dept of Agriculture, he established a system of exchanging seeds with foreign countries.

Capsian culture see Gafsa

Captivity, Exile, or **Babylonian captivity**, in the history of Israel, the period from the fall of Jerusalem (586 B C) to the foundation in Palestine of a new Hebrew organization After the capture of the city some thousands were deported to Mesopotamia, probably selected for their prosperity and importance Such deportations were commonplace in Assyrian and Babylonian policy. The exiles kept up close connections with their kinsmen at home, as is clear from Ezekiel, the prophet of the early years of the Exile In 538 B.C , Cyrus, the new master of the empire, brought in a new attitude toward the nations and decreed the restoration of worship at Jerusalem The century following this decree was critical in the history of the Jews, for it is the time of their reintegration into a national and religious unit For parts of the period, Ezra and Nehemiah are the best sources The prophesied 70 years of captivity were fulfilled when the new Tem-

ple was completed in 516 B C. Jer. 25 11, Dan 9.2; Zech 7 5 For the "Babylonian captivity" of the popes at Avignon, see PAPACY

Capua (kă'pūu, Ital kä'pwä), town (pop 10,128), Campania, S Italy, on the Volturno river. It occupies the site of ancient CASILINUM Ancient Capua (which was 3 mi to the southeast, where Santa Maria Capua Vetere now stands) was a strategic Roman town on the Appian Way In 216 B C it opened its gates to Hannibal, retaken by the Romans, it became the most important center of S Italy There are remains of an amphitheater and of a triumphal arch Capua was destroyed (841) by the Arabs, the inhabitants moved to Casilinum and founded modern Capua Strongly fortified to defend Naples, Capua suffered various sieges, the last one by the Piedmontese (1860) The ancient cathedral was severely damaged in the Second World War

Capuana, Luigi (lwē'jē käpwa'nä), 1839–1915, Italian critic and novelist. He led a full and varied life, his activities including teaching, scientific study, and politics He wrote in almost every genre, but his reputation rests upon his naturalistic novels and his excellent criticism Among his best works are the short stories in *Paesane* [peasants] (1894), the novel *Il marchese di Roccaverdina* (1901), and his *Studi sulla letteratura contemporanea* (1879–82) His stories for children which have appeared in English are *Nimble Legs* (1903, Eng tr, 1927) and *Once upon a Time* (1882, Eng tr, 1892)

Capuchins (kă'pūchĭnz) [Ital, =hooded ones], Roman Catholic religious order of friars, one of the independent orders of FRANCISCANS, officially the Friars Minor Capuchin It was founded (1525–28) in central Italy as a reform within the Observants, led by Matteo di Bascio It is one of the largest orders Born, like the Jesuits, at the beginning of the Catholic Reform, the Capuchins became a key feature in church activity, especially in preaching and missions With the Jesuits they did much to revive Catholicism among populations of Europe in which Protestantism had prevailed The Capuchins have been very important in foreign missions, they were early in French Canada They are conspicuous among Roman Catholic clergy for their beards See Father Cuthbert, *The Capuchins* (1928)

Capulin Mountain National Monument. see NATIONAL PARKS AND MONUMENTS (table)

Capus, Alfred (älfrĕd' käpü'), 1858–1922, French journalist, novelist, and playwright Most successful at comedy, he also wrote problem plays

capybara (kăpĭbä'ru), mammal of Central and much of South America It is the largest living member of the order of rodents, reaching a length of 4 ft and a weight of 75 to 100 lb Its brownish hair flecked with yellow is coarse and scanty, and its tail rudimentary The feet are partially webbed, and there are four thick-nailed toes on the front feet and three on the hind feet It is semiaquatic, an expert swimmer and diver It eats vegetation and sometimes damages crops It is hunted for food, its hide is made into gloves, and its bristles are used in brushes It is also called water hog and carpincho

caracal (kă'rukal) or **Persian lynx**, mammal of the cat family, native to Asia and Africa By some it is considered a link between the true cats and the true lynxes It is reddish brown with black-tufted ears From the nose to the tip of the tail it is about 3¼ ft It preys on small deer, hares, birds, and other animals and in some regions is trained to capture such game for man

Caracalla (kărukă'lu), 188-217, Roman emperor (211–17), son of Septimius SEVERUS His real name was Marcus Aurelius Antoninus, and he was called Caracalla because he wore a Gallic tunic He was made Caesar in 196 and Augustus in 198, but he resented having to share these honors with his brother Geta and he early showed his true character by bringing about the downfall of his father-in-law, the political leader Plautianus, through false reports After Septimius Severus died, leaving the empire to his two sons, Caracalla murdered (212) the much more popular Geta and had a general massacre of Geta's followers and sympathizers (including the jurist Papinian) He thus ushered in a reign infamous for cruelty and blood Caracalla, however, pacified the German frontier He extended Roman citizenship to all free inhabitants of the empire, not presumably out of generosity but to increase his income from taxes to meet staggering expenses Part of his money went to shower gifts on the soldiers He tried to buy popularity with them and planned an ambitious campaign to extend his father's conquests into old Persia When he was leading an expedition in Asia he was murdered by MACRINUS, who succeeded him but was in turn shortly succeeded by Heliogabalus. Caracalla's name is familiar because of the famous Baths of Caracalla, erected in his reign

Caracas (kŭrä'kŭs, kŭrä'–, Span, kärä'käs), city (pop. 269,030), N Venezuela, the capital and largest city of Venezuela, in a mountain valley near the Caribbean. It was founded in 1567 as Santiago de León de Caracas by Diego de Losada With an elevation of c 3,100 ft, Caracas has a healthful and pleasant climate, a factor that made it rather than VALENCIA the economic and political center of Spanish colonization in Venezuela. The older parts of the city are picturesque, the newer sections developed in the recent rapid expansion are modern and prosperous With air, rail, and highway connections to La GUAIRA, to W Venezuela, and S to Ciudad Bolívar by road and air, Caracas is the commercial center for much of the country's produce. Industrial activities include cotton mills, breweries, shoe and cigarette factories, sugar refineries, and dairy and meat-packing plants Key to control of Venezuela, Caracas assumed a leading role in the revolution against Spain Here independence was advocated in April, 1810, and formally declared in July, 1811 Its almost complete destruction by earthquake on March 26, 1812, did much to blight the revolution led by Francisco de MIRANDA In Aug, 1813, Simón BOLÍVAR recaptured Caracas, but abandoned it after a crushing defeat in June, 1814 Finally, after his victory at Carabobo (1821), he made a triumphal entry in June, 1821

Caracci, family of Italian painters see CARRACCI

Caracciolo, Francesco (frănchä'skō kärät'chōlō), 1752–99, Neapolitan admiral He served with the British in the American Revolution He fled with King Ferdinand IV of Naples to Sicily in Dec, 1798, but soon returned and took command of the small fleet of the French-sponsored Parthenopean Republic When the Bourbons recaptured Naples (1799), Lord Nelson ordered his immediate execution

Caractacus (kurăk'tukus) or **Caradoc** (kură'duk), fl A D 50, British chieftain, son of Cymbeline He fought for nine years against the Romans, was captured, and was taken to Rome for a triumph Claudius, admiring his courage, spared his life

Caragiali, Ion Luca (yōn' lōōkä' käräjä'lē), 1853–1912, Rumanian author and theatrical manager After the production of several of his own comedies, he became (1888) director of the Bucharest National Theater Among his comedies satirizing Rumanian society are *The Lost Letter* (1884) and *Carnival Adventures* (1885) *False Accusation* (1889) is a tragedy Caragiali also wrote short stories and novels

Caraglio, Giovanni Jacopo (jōvän'nē yä'kōpō karal'yō), c 1500–c 1570, Italian engraver and designer, known also as Jacobus Parmensis and Jacobus Veronensis He was a pupil of Raimondi and achieved distinction as an engraver on copper and, later, as a designer of medals and engraver of gems His plates, about 70 in number, are chiefly reproductions of works of the great Italian masters—Raphael, Titian, Michelangelo, and others.

Caraites see KARAITES

Caraman, Turkey see KARAMAN

Caran d'Ache (karä' dăsh'), pseud of **Emmanuel Poiré** (ĕmänüĕl' pwarä'), 1858–1909, French caricaturist and illustrator The work which best shows his humor and originality appears in *Album Caran d'Ache*, *Bric-à-brac*, and other albums

Carausius (kurô'shēus), d 293, Gallo-Roman military commander He was stationed in Gaul, but Emperor Maximian, suspecting him of conspiracies with the Germans, condemned him to death Carausius fled to Britain and established his rule there, defying attempts to conquer him Diocletian and Maximian finally (c 289) recognized him as coemperor, and he established his rule in NE Gaul as well as in Britain In 293, however, Constantius (later Constantius I) defeated him, and he was murdered by one of his own men

Caravaca (karäva'kä), city (pop 9,629), Murcia prov, SE Spain, in Murcia, on the Caravaca river It is an agricultural center and has liquor and textile manufactures The miraculous Cross of Caravaca was formerly kept in the Church of the Most Holy Cross (1617)

Caravaggio, Michelangelo Amerighi da (mēkälän'jälō ämärē'gē da karavvid'jō), or **Merighi da Caravaggio** (märē'gē da), 1565–1609, Italian painter His surname Caravaggio came from his birthplace After studies in Milan and Venice he achieved an overwhelming success as the founder of the naturalistic school in Rome, but his violent nature involved him in constant broils which forced him to flee to Naples and later to Sicily and Malta and led eventually to his early death Caravaggio abandoned the idealized types of the preceding Italian masters, emphasizing the character of his models, often taken from the lowest walks of life He was one of the earliest masters of that extreme form of chiaroscuro in which the subject is seen in violent light and shade against a dark background, a manner which he transmitted to Ribera and the Spanish school. Often somewhat brutally emphatic, he retained the traditional forms of monumental composition and achieved an art of great dramatic power Among his early genre paintings, *The Card Players* and *Gypsy Fortune Teller* are famous His large and celebrated religious compositions include *The Entombment* (Vatican), *The Supper at Emmaus* (National Gall, London), and *Martyrdom of St Sebastian* (Capitol, Rome) In the Louvre are his portrait of the grand master of the Knights of Malta and his *Death of the Virgin*

Caravaggio, Polidoro Caldara da (pōlēdō'rō käldä'rä), c 1492–1543, Italian painter His surname, Caravaggio, came from his birthplace As apprentice to Raphael he executed notable friezes in the Vatican and assisted in producing façade decorations in sgraffito for Roman palaces Today these works are known only through engravings His best-known surviving painting is the celebrated *Christ Bearing the Cross* (Naples)

caravan, group of travelers or merchants banded together and organized for mutual assistance and defense while traveling long distances through unsettled or hostile country Caravan trade is associated with the history of the Near East as far back as records of ancient civilizations extend and seems to have been well developed before sea commerce began It is evident that all trade from one fertile area to another in this region had to be organized from the first, since long distances of desert trail separated settled parts and since local governments could not guarantee protection against barbaric tribes eager to loot and pillage Caravans were always tempting because the conditions of the trade, demanding the highest value in proportion to weight, required that they be richly laden Such small but valuable wares as jewels, spices, perfumes, dyes, metals, rare woods, ivory, oils, and textiles are associated with the trade Camels were the chief beasts of burden from Egypt to Mesopotamia and throughout the Arabian peninsula They were introduced into North Africa and the Sahara region in the 3d cent A D Donkeys were used in Asia Minor Trade naturally prospered in the period of the great empires when the caravan routes could be controlled and protected, and it was to secure control of such routes that many wars were fought and conquests made in ancient times An empire provided for the establishment of caravansaries for the accommodation of travelers along the way Such improvements facilitated the movement of troops to protect the routes Cities rose and fell in ancient times in proportion to the rise and fall in the trade of the caravan routes upon which they were located Basically the trade underwent little change until challenged in modern times by the motor truck and the airplane Travelers having occasion to cross the desert spaces usually accompanied merchant caravans Since the advent of Islam, the pilgrimage of the devout to Mecca has given rise to the long pilgrim caravans which are a feature of the pilgrimage season each year The closest approach to caravan trade in the New World was the wagon-train commerce which developed over the Santa Fe Trail See Mikhail Rostovtzev, *Caravan Cities* (1932), E W Bovill, *Caravans of the Old Sahara* (1933)

caravel (kă'rŭvĕl") or **carvel** (kär'vul), sailing ship, generally square-rigged, with three masts It usually had a roundish hull with high bow and stern and was a light ship with small displacement The term "carvel-built" (see BOAT) was derived from this construction The change from bulkier ships to caravels enabled the Portuguese in the 15th cent to make much more rapid progress in opening up the African coast to the Western World Thus, the caravel was of primary importance in the era of expansion and exploration The *Santa María*, the celebrated flagship of Christopher Columbus, was a typical caravel

caraway (kăr'uwā), biennial plant (*Carum carvi*), growing in N and central Europe and Asia and cultivated in Europe and America for its aromatic seeds It has a tapering fleshy root, a branching stem 1 to 2 ft high, finely divided leaves, and close heads of white or pinkish flowers The fruits or seeds are small and ovate, with a pleasant spicy flavor, and are used as a condiment, as seasoning of cakes, sweetmeats, and some kinds of cheese and bread and as flavoring for certain liqueurs (as kummel) In medicine the volatile oil expressed from the seeds is a stimulant and a carminative

Carberry Hill, near Edinburgh, Scotland, scene of an encounter on June 15, 1567, between the troops of MARY QUEEN OF SCOTS and those of the rebel Scottish lords Mary surrendered here and remained a virtual prisoner the rest of her life

carbide, any one of a group of compounds consisting of carbon and one other element, either a metal or a nonmetal (However, a compound composed only of carbon and hydrogen is known as a HYDROCARBON and one composed only of carbon and oxygen is an OXIDE) In general, carbides are produced in the electric furnace, calcium carbide and SILICON CARBIDE, which is known commonly as carborundum, are two important examples They are formed when carbon, at the extremely high temperatures obtained, combines separately with the elements of the oxide to give the carbide and carbon monoxide Although some carbides, e g, chromium carbide and silicon carbide, are not affected by water, many are decomposed by it and yield a gas For example, calcium carbide produces acetylene and is an important commercial source of this gas Barium carbide also yields acetylene On the other hand, aluminum carbide reacts to form methane, which is used in treating certain steels Iron car-

bide is present in steel, cast iron, and some other iron alloys

Carbo, Cneius Papirius (nē'ŭs pŭpēr'ēŭs kär'bō), d 82 B C , Roman political leader. He was consul in 85 B.C , 84 B C , and 82 B C He was one of the leaders of the party of MARIUS, and after the death of Marius he and his colleague, CINNA, gathered an army to oppose SULLA in Italy in 84 B C. After the murder of Cinna, Carbo was chief commander Sulla gathered strength as he came slowly N through Italy, and much of Carbo's force deserted He was defeated at Faventia (modern Faenza) by Q. Caecilius Metellus Pius (see METELLUS, family) and fled to Africa He later crossed to Sicily, where he was captured, condemned, and executed by Pompey

carbohydrate (kärbōhī'drāt), any one of a number of organic compounds of carbon, hydrogen, and oxygen, having (in general) the hydrogen and oxygen in the same atomic ratio as in water (2 1) The carbohydrates are an important group of foods, they supply heat energy and are involved in fat production In various forms, the carbohydrates are used in industry and commerce Three main subdivisions of the group are recognized The monosaccharides include the sugars FRUCTOSE and GLUCOSE The disaccharides include LACTOSE, MALTOSE, and sucrose or cane sugar (see SUGAR) The polysaccharides are represented by such substances as CELLULOSE, DEXTRIN, GLYCOGEN, and STARCH

carbolic acid or **phenol** (fē'–), colorless (when pure), crystalline solid, melting at 41°C and boiling at 182°C , a compound of carbon, hydrogen, and the hydroxyl (OH) radical Although it resembles the alcohols in structure and forms esters with acid anhydrides, it exhibits weak ACID properties With strong alkalies, salts called phenolates are formed Carbolic acid dissolves in many organic solvents such as alcohol and ether, but in water it is only moderately soluble It is corrosive and poisonous (for antidote and treatment, see POISONING, table) In medicine it is used as an antiseptic and disinfectant In industry it is important in the production of certain artificial resins such as BAKELITE, explosives such as PICRIC ACID, and certain dyes It is prepared by the distillation of coal tar and also from wood alcohol (methyl) by oxidation Carbolic acid is the simplest member of a group of compounds called phenols which are derived from such aromatic hydrocarbons as benzene Those derived from toluene are called cresols and are used in commercial antiseptics

carboloy (kär'bŭloi) [portmanteau word from carbon and alloy], an alloy containing cobalt, tungsten, and carbon The tungsten is first combined with the carbon to form the carbide and the cobalt is then added This alloy is extremely hard, harder than steel, it is used to cut steel, porcelain, quartz, and other materials Its hardness is not affected by great heat, it retains a sharp cutting edge even at red heat

carbon, nonmetallic element (symbol=C, for physical constants, see ELEMENT, table), one of the most widely distributed and abundant of all the elements The DIAMOND and GRAPHITE are two crystalline forms (see ALLOTROPY) In the so-called amorphous carbon, such as CHARCOAL (including both the animal charcoal, or bone black, and wood charcoal), COAL, COKE, lampblack, PEAT, and LIGNITE, it is partly free and partly combined It is a constituent of all organic material (Organic chemistry is the study of carbon compounds found in natural matter and also those produced synthetically) Combined with hydrogen, the element forms the extensive class of HYDROCARBON compounds, with oxygen and hydrogen together, CARBOHYDRATE compounds Perfumes, drugs, animal and plant secretions, foods, textiles, wood, paper, and many other common things contain carbon Fuels (e.g , natural gas), marsh gas, and the gases resulting from the combustion of fuels (e g , CARBON MONOXIDE and CARBON DIOXIDE) are compounds of carbon With oxygen and a metallic element, carbon forms many important carbonates, such as calcium carbonate (limestone) and sodium carbonate (soda). It is combined with other elements singly in the carbides When carbon is added to iron, STEEL is produced Carbon electrodes are widely used in electrical apparatus The "lead" of the ordinary lead pencil is graphitic carbon The great variety of uses to which the element is put is seen in the great number and variety of its useful compounds

Carbon, Mount, peak, 14,259 ft high, W central Colo , highest summit in the Elk Mts of the Rockies It is sometimes referred to as Castle Peak

Carbonari (kärbōnä'rē) [Ital , =charcoal burners], members of a secret society which flourished in Italy, Spain, and France early in the 19th cent Possibly derived from Freemasonry, the society originated in the kingdom of Naples in the reign of Murat and drew its members from all stations of life, particularly from the army It was closely organized, with a ritual, a symbolic language, and a hierarchy Beyond advocacy of political freedom its aims were vague The Carbonari were partially responsible for uprisings in Spain (1820), Naples (1820), and Piedmont (1821) After 1830 the Italian Carbonari gradually were absorbed by the Risorgimento movement, elsewhere they disappeared.

carbonate, any one of a group of chemical compounds, either a salt of carbonic acid or, in the case of the organic carbonates, an ester of this acid The carbonate RADICAL consists of one atom of carbon and three of oxygen ($-CO_3$) Normal carbonates are formed when equivalent amounts of carbonic acid and a base react The majority are precipitated since, except for ammonium, potassium, and sodium carbonates, they are all insoluble in water This property serves as a test for carbonates as well as for carbon dioxide When heated, most carbonates decompose to yield carbon dioxide and the oxide of the metal They react also with dilute acids to form, as final products, carbon dioxide and water With carbonic acid, they turn to bicarbonates, or acid carbonates These compounds do not, however, behave as acids but are weakly alkaline, being called acid carbonates only because of their formation when an excess of carbonic acid is used Carbonates occur widely distributed in nature Some are barium carbonate, commonly called witherite, which is used for the preparation of other barium compounds, calcium carbonate, which occurs in the shells of animals and as ICELAND SPAR, LIMESTONE, and MARBLE and in commerce as whiting and putty, iron carbonate, a ferrous compound, known as SIDERITE, which is the important source of iron in England, Scotland, and Wales, and magnesium carbonate, occurring as MAGNESITE and, when combined with calcium carbonate, as DOLOMITE Potassium carbonate constitutes POTASH or pearlash Sodium carbonate, or SODA, is found in nature, but is usually prepared for commercial use by the SOLVAY PROCESS which has replaced the LEBLANC PROCESS in the United States Other carbonates are strontium carbonate and zinc carbonate, which is the ore of zinc known as smithsonite Lead carbonate in combination with lead hydroxide, the whole being known as basic lead carbonate, is the WHITE LEAD of paints, a basic carbonate of copper is the mineral MALACHITE Of the bicarbonates, calcium bicarbonate, which causes "hardness" in water and which by changing to the insoluble calcium carbonate produces the STALACTITE AND STALAGMITE formations of limestone caves, and sodium bicarbonate (baking soda or bicarbonate of soda) are especially important

Carbondale. 1 City (pop 8,550), S Ill , N of Cairo, in a coal-mining and farm area, founded 1852, inc 1869 It is a railroad division point with shops and is the seat of Southern Illinois Univ (coeducational) Giant City State Park, in the Illinois extension of the Ozarks, lies to the south **2** Industrial city (pop 19,371), NE Pa , on the Lackawanna river and c 15 mi NE of Scranton, inc 1851. Its important activities are anthracite mining and railroad tank car and glass manufactures Terence Powderly, labor leader, was born here.

carbon dioxide, colorless, almost odorless, gaseous compound of carbon and oxygen, an oxide of carbon, the molecule consisting of one atom of carbon and two atoms of oxygen Carbon dioxide is one and one-half times heavier than air, it neither burns nor supports combustion, is soluble in water volume for volume, and can be liquefied without difficulty under pressure (critical temperature= 31 1°C) Because its aqueous solution exhibits weak acid properties (CARBONIC ACID), the gas is often known in commerce as carbonic acid gas DRY ICE, called also carbon dioxide snow, is carbon dioxide in the solid, or "frozen" state The chokedamp (see DAMP) of mines, pits, or old, unused wells (as well as afterdamp) is largely this gas Carbon dioxide occurs free in nature It is a constituent of the ATMOSPHERE, being usually more abundant in the air of cities than in that of the country It results from the combustion of carbon or carbonaceous materials such as coal, wood, and fuel oil The hydrocarbons, used widely as fuels, burn in air, yielding carbon dioxide and water. Carbon dioxide is produced also when a CARBONATE is decomposed by heat or acids The gas is a product of respiration in animals and plants, and it is given off in some other processes such as alcoholic FERMENTATION brought about by the action of yeast It is used by green plants in PHOTOSYNTHESIS In various parts of the world, as in Italy, Java, and the Yellowstone National Park in the United States, it is formed in the ground and issues from fissures Dissolved in water under pressure, it gives the "sparkle," or effervescence, to natural mineral waters, such as Vichy water When the pressure is released, the excess gas collects in bubbles and passes upward through the water. The same condition obtains in the common "charged" water of the soda fountain. Carbon dioxide finds varied use. Formed by the action of yeast or BAKING POWDER, it causes the rising of bread dough Certain fire extinguishers depend for their effectiveness upon the production of carbon dioxide, which is expelled from a nozzle and, settling upon the flame, smothers it In one kind of apparatus, the gas is produced by the action of an acid, e.g., sulphuric, upon a carbonate, the two being brought into contact by inverting the extinguisher Another method produces a foam in which bubbles of carbon dioxide gas are caught and held to prevent diffusion. The gas is used in the SOLVAY PROCESS for the preparation of sodium bicarbonate. The standard test for carbon dioxide is given in its action with limewater (calcium hydroxide) which, in its presence, becomes cloudy, because of the formation of an insoluble carbonate

Carbonear (kärbŭnēr'), town (1945 pop. 3,468), E N F , on the west coast of Conception Bay, W of St. John's. It is the commercial center of the region In 1762 the town was captured by the French, it was later recaptured by the English.

Carbon Hill, city (pop 2,555), NW Ala , NW of Birmingham, in a coal area, inc 1891.

carbonic acid, weak acid known only in solution, formed when carbon dioxide is dissolved in water Its molecule is composed of two atoms of hydrogen and the carbonate radical, which consists of an atom of carbon and three of oxygen ($-CO_3$), the salts of this acid (see CARBONATE) contain this radical Carbonic acid contributes the sharp taste to a carbonated beverage.

carbonic acid gas. see CARBON DIOXIDE

Carboniferous period (kärbŭnĭ'fŭrŭs) [Latin,=coal making], fifth period of the PALEOZOIC ERA of geologic time The Carboniferous period saw the formation of the greater part of the world's supply of COAL and the beginning of a succession of changes in the earth's surface which, continuing into the PERMIAN PERIOD, were to bring the Paleozoic to a close The events of the Carboniferous fall naturally into two divisions; in America the break in sequence is so sharp that each division is considered by most geologists as an independent period In the Lower Carboniferous or Mississippian period, the interior of North America was several times submerged by shallow seas, and the interior formations are limestone, shale, and sandstone In the Appalachian region, especially in Pennsylvania, great deposits of sandstone and shale were laid down by the erosion of sand and gravel from the eastern coastal highlands In the Far West the Rocky Mt region was covered by a flood which deposited the Madison limestone and the Redwall limestone of the Grand Canyon The Lower Carboniferous in Europe, as in America, was a period of submergence In the British Isles and adjacent areas the mountain limestone was formed, E of the Rhine, the culm shale, sandstone, and conglomerate, in Russia, the Coal Measures characteristic of the Upper Carboniferous in Western Europe and in North America The close of the Lower Carboniferous was marked by mountain making in New Brunswick, Nova Scotia, the southern Appalachian region, the SW United States, and Europe The Lower Carboniferous was a time of great volcanic activity. In the Upper Carboniferous or Pennsylvanian period, there was at least one great flood, the sea level, however, oscillated, and conditions were favorable to the formation of great marshes in which grew extensive vegetation, later to be transformed by chemical action into coal The early Pennsylvanian in the E United States saw the formation of great deltas of sediments, now represented by the Pottsville conglomerate In Kansas, Nebraska, Arkansas, and Texas, the Pennsylvanian flood deposited chiefly shale and sandstone, with coal, over the Cordilleran region, marine limestone, with little coal, on the Pacific coast from California to Alaska, limestone and shale The Carboniferous coal fields of North America are as follows the anthracite field of E Pennsylvania, the Appalachian field, from Pennsylvania to Alabama, the Michigan field, the eastern interior field of Indiana, Illinois, Kentucky, the western interior and southwestern field, stretching from Iowa to Texas, the Rhode Island field, and the Acadian field of SE Canada In the Upper Carboniferous of Western Europe, the Millstone Grit, equivalent to the Pottsville conglomerate, is followed by the Coal Measures, which include the Welsh, English, Belgian, Westphalian, and Saar Basin fields In the Mediterranean region and in Russia, the Upper Carboniferous resembles that of W North America The Upper Carboniferous was a period of marked earth disturbances In Europe the Paleozoic Alps were thrust up, in Asia, the Altai and Tien Shan, in North America, the Arbuckle and Wichita mts and the ancestral southern Rockies. The plant life of the Carboniferous was extensive and luxuriant, especially in the Pennsylvanian It included fern and fernlike trees, giant horsetails, called calamites, club mosses or lycopods, such as LEPIDODENDRON and SIGILLARIA, seed ferns, and cordaites or primitive conifers Land animals included primitive amphibians, reptiles (which first appeared in the Upper Carboniferous), spiders, thousand-legs, land snails, scorpions, enormous dragonflies, and over 800 kinds of cockroaches The land waters were inhabited by fishes, clams, and various crustaceans, the oceans by mollusks, crinoids, sea urchins, and one-celled limemaking Foraminifera.

carbonite see COKE

carbon monoxide, poisonous, colorless, odorless, tasteless, gaseous compound of carbon and oxygen. It is an oxide of carbon, the molecule consisting of one atom of carbon and one of oxygen. Carbon

monoxide is lighter than air, is practically insoluble in water, and, under normal pressure, liquefies at −190°C and solidifies at −207°C. It burns in air with a characteristic blue flame, forming carbon dioxide. It is used as a fuel, being a constituent of both PRODUCER GAS and WATER GAS Carbon monoxide is an unstable compound combining readily with oxygen to form carbon dioxide It removes oxygen from many compounds and is used consequently in industry as a reducing agent in obtaining certain metals, such as iron (see BLAST FURNACE), from their ores The gas is formed by the combustion of carbon or carbonaceous substances in an insufficient supply of air (incomplete combustion). It is present in the exhaust of gasoline engines (as in automobiles), is a constituent of illuminating gas, and is generated in ordinary coal stoves and furnaces when there is insufficient air owing to faulty draft Its common occurrence and its poisonous properties—it is fatal to man in even extremely small quantities—make it dangerous, especially since its presence cannot easily be detected Poisoning may occur from the exhaust fumes of an automobile or other fuel engine running in a closed room or from coal gas released by a furnace Carbon monoxide when inhaled combines with the red coloring matter (hemoglobin) of the blood and prevents it from taking up and distributing oxygen The nervous system is quickly affected, causing paralysis, a failure of the respiratory apparatus, and sickness or death Providing fresh air and performing artificial respiration are first-aid measures

Carborundum. see SILICON CARBIDE

carbuncle, in geology see GARNET

carbuncle (kär'bŭng-kul), in medicine, inflammatory skin reaction to invading bacteria, usually *Staphylococcus aureus* Carbuncles may become extremely dangerous, especially in individuals suffering from diabetes and nephritis Early treatment, employing incision and drainage, is indicated Antiseptic solutions, e g , Dakin's solution, are employed to aid in the separation of sloughs

carburetor (kär'byurātur) **1** An essential part of a gasoline engine, a device in which liquid fuel is converted into a vapor and mixed with a regulated amount of air for combustion in the cylinders The earlier surface type of carburetor, in which air is led across the surface of oil in a chamber, has been superseded by the spray type In this carburetor there are two chambers, the float chamber and the mixing chamber The gasoline enters the float chamber through a needle valve which opens and closes as a float rises and falls with the level of the liquid The gasoline passes from the float chamber through a tube and is sprayed into the mixing chamber Here it is vaporized upon being mixed with air drawn into the chamber through another opening The mixture of gasoline vapor and air then passes over the throttle —a valve which is regulated by the accelerator of the automobile and controls the amount of explosive mixture leaving the carburetor—and into the intake manifold of the cylinders (see INTERNAL-COMBUSTION ENGINE) **2** Another type of carburetor is used to enrich coal gas and water gas It varies in size from 4 to 11 ft in diameter and from 14 to 18 ft in height and is lined with brick In it oil or other mixtures of hydrocarbons are mixed with the gas until the desired richness is obtained The illuminating power of the gas is increased by this carburetion

Carcas (kär'kŭs), king's chamberlain Esther 1 10

Carcassonne (kärkasôn'), city (pop 31,752), capital of Aude dept , S France, in Languedoc It is one of the architectural marvels of Europe The old city, atop a hill and divided from the new city by the Aude river, is a medieval walled city, entirely restored by VIOLLET-LE-DUC A stronghold of the ALBIGENSES, it was taken by Simon de Montfort in 1209 The "new city," a trade center manufacturing clothes, was founded in the 13th cent

Carchemish (kär'kĭmĭsh, kärkē'mĭsh), city of ancient Syria, NE of the modern Alep It was the great southern city of the Hittites before it was taken (early 15th cent. B C) by the Egyptians, who held it for some time It may possibly have succeeded Boghaskeui as Hittite capital, and after the fall of the Hittite state, Carchemish became the head of one of the successor states and was prominent from the late 12th cent through the 9th cent B C. It was absorbed by the Assyrian Empire, but Carchemish continued important as a trade center Here in 605 B.C , Nebuchadnezzar defeated Necho 2 Chron 35 20, Jer 46 2, Isa 10 9. The name also appears as Charchemish

carcinoma: see CANCER

cardamom (kär'dŭmŏm"), plant (*Elettaria cardamomum*) native to India and Ceylon, having a seed with a strong, spicy, and aromatic odor due to the constituents of an essential oil which it contains These seeds, when ground, are used extensively in the East for spices and curries and are also often chewed with betel nuts. In Europe they are sometimes used in place of cinnamon or as condiments A tincture is used in medicine to relieve flatulence and as a stimulant. Minute quantities are sometimes mixed in eau de Cologne.

Cardamom Hills, range, Travancore-Cochin, India, named from the cardamom growing on its slopes Tea is the chief product.

Cardano, Geronimo (jārō'nēmō kärdä'nō), 1501–76, Italian physician, mathematician, and astrologer His works in mathematics include treatises on arithmetic and algebra He also wrote the encyclopedic *De subtilitate rerum* (1550) and *De rerum varietate* (1557) and the autobiographical *De propria vita* (1575, Eng tr , 1930) See study by Henry Morley (1854)

Cárdenas, García López de (gärthä'ē lō'pĕth dā kär'dänäs), fl 1540, Spanish explorer in the Southwest A member of the 1540 expedition, he was selected by Francisco Vásques de CORONADO to lead a party from Cibola (the Zuni country in New Mexico) to find the river of which the Indians had spoken After 20 days' march they came upon (1540) the GRAND CANYON of the Colorado and were the first white men to see it A few months earlier Hernando de ALARCÓN had discovered the lower river They then returned to Coronado Later he is said to have returned to Spain

Cárdenas, Lázaro (lä'särō kär'dänäs), 1895–, president of Mexico (1934–40) He joined the revolutionary forces in 1913 and rose to become a general He was governor (1928–32) of his native state, Michoacán, and held other political posts before he was, with the support of Plutarco E CALLES, elected president Cárdenas, in a test of political strength in 1935, forced Calles into exile and organized a vigorous campaign of reform based on the constitution of 1917 Large land holdings were broken up and distributed on the EJIDO system to small farmers, many foreign-owned properties were expropriated, and modernization of Mexico was begun Himself a mestizo, he won the love of the Indians and was a hero of the Mexican working classes He relinquished his office at the end of his term—thus acting in consonance with his desire for democratic and orderly constitutional processes and thus paving the way for his successors, Manuel ÁVILA CAMACHO and Miguel ALEMÁN Cárdenas was recalled to public service as minister of national defense (1942–45)

Cárdenas, city (pop 37,059), W Cuba, a port on Cárdenas Bay It processes and exports sugar and sisal and has a fishing fleet The old city has relics of its colonial past Narciso López landed here on his filibustering expedition of 1850

Cardiff (kär'dĭf), county borough (1931 pop 223,589, 1947 estimated pop 234,580) and city, co seat of Glamorganshire, Wales, on the Taff 2 mi from its mouth on Bristol Channel One of the greatest coal-shipping ports in the world, Cardiff has grown largely since the construction of docks by the 2d marquess of Bute in 1839 There are now more than 5 mi of quays, the port of Cardiff includes the docks at Penarth and Barry Rail connections with the interior (especially the coal fields) are excellent, and there is a canal to Merthyr Tydfil, with a branch to Aberdare Besides the export of immense quantities of coal, Cardiff has important ironworks and steelworks, flour mills, and a fishing industry Cardiff Castle, now the residence of the marquess of Bute, was built in 1090 on the site of a Roman fort—Cardiff's strategic situation was early of importance Robert II, duke of Normandy, was imprisoned (1108–34) in the castle Owen Glendower partly destroyed it in 1404 In Cathays Park the group of public buildings includes the Welsh National Museum, the law courts, the city hall, the University College of South Wales and Monmouthshire (one of the four constituent colleges of the Univ of Wales), and Glamorgan county hall The parish church of St John dates partly from the 13th and partly from the 15th cent The city and suburbs suffered damage in concentrated air raids in 1941 See A M Thompson, *Cardiff* (1930)

Cardigan, James Thomas Brudenell, 7th **earl of** (kär'dĭgun), 1797–1868, British general In the Crimean War he led the disastrous cavalry charge at Balaklava (1854) which Tennyson immortalized in *The Charge of the Light Brigade* The charge was made on a misunderstood order, and the brigade was destroyed Quarrels with his officers showed him a vain and contentious man The cardigan jacket was named for him

Cardigan (kär'dĭgun), municipal borough (pop 3,069), county town of Cardiganshire, Wales, on the Teifi river near its mouth on Cardigan Bay There are ruins of a castle Farm machinery is manufactured

Cardiganshire or **Cardigan,** maritime county (677 sq mi , 1931 pop 55,184, 1948 estimated pop 53,632), SW Wales, on Cardigan Bay, off St George's Channel. The county town is Cardigan, but Aberystwyth is of greater importance The region is largely one of pleasant, rolling hills, with fertile valleys and a narrow coastal plain The chief rivers are the Teifi and the Ystwyth The principal industries are agriculture (notably cattle raising), lead mining, and some manufacture of woolen articles The county long resisted English influence, and the Welsh language and Welsh customs are preserved here to a large degree. The modern boundaries were established in 1536.

Cardinal, village (pop 1,645, S Ont , on the St Lawrence at the foot of the Galops rapids and S of Ottawa.

cardinal [Latin, =belonging to the hinge], in the Roman Catholic Church, a member of the highest body of the Church below the pope This, the sacred college of cardinals of the Holy Roman Church, is the electoral college of the PAPACY Its members are appointed by the pope to a maximum of 70, a number rarely attained There are three classes Cardinal bishops (maximum now 6) are the bishops of seven sees around Rome (Ostia, Velletri, Porto and Santa Rufina, Albano, Frascati, Palestrina, and Sabina), the first of these in order of creation is dean of the college and ex officio bishop of Ostia in addition to his other see Cardinal priests (maximum now 50) are mostly archbishops outside the Roman province, the title "cardinal archbishop"—often applied to these men—simply represents the union of the two dignities in one man Cardinal deacons (maximum now 14) are priests with functions in the papal government Cardinal priests and cardinal deacons have titles corresponding to churches of the Roman diocese A cardinal's insignia resemble those of a bishop, except for the characteristic red, broad-brimmed, tasseled hat which is conferred by the pope but not subsequently worn Cardinals are styled "Eminence" Apart from papal elections, the cardinals have great importance as the privy council of the pope Hence those who are not bishops away from Rome must live at Rome They meet with the pope in consistories, public and secret, but most of the business they transact is done in their various jurisdictional capacities Thus the cardinals in residence at Rome make up a cabinet for the pope, directing the work of the Curia Romana, as the papal administration is called This is made up of standing committees and courts, the departments of administration divided among them Since there is no division of powers in the headship of the Church, most organs of the Curia have power to judge, to command, and to legislate The acts of these bodies are validated by papal approbation, and they therefore bind Roman Catholics as direct pontifical acts Only the pope himself can speak finally in matters of faith and morals (see INFALLIBILITY) The Curia may be divided into Roman congregations, Roman tribunals, curial offices, and secretariats A Roman congregation consists of a group of cardinals, headed by a prefect, together with two staffs which transact most of the business—the *congresso* of major officials and a staff of minor officials chosen by competitive examination and assigned to less important affairs The congregation proper, i e , the cardinals, makes all major decisions The following are the Roman congregations (founded by Sixtus V in 1588 and reorganized by Pius X in 1908) Congregation of the Holy Office (see INQUISITION **3**), of which the pope is prefect, Congregation of the Consistory, of which the pope is prefect, for the preparation of agenda for consistories and the regulation of dioceses of the Western Church not under the Propaganda, Congregation of the Sacraments, for legislation on administration of the sacraments and for dispensations concerning them, Congregation of the Council, for the regulation of councils and of benefices, properties, and the like, for dispensations from the commandments of the Church, and for the maintenance of the shrine of Loreto; Congregation of Religious, for all concerns of all seculars and regulars, of both sexes, Congregation for the Propagation of the Faith (the Propaganda), for all concerns of the MISSIONS of the Latin rite, Congregation of the Eastern Church, for all concerns of the Oriental rites in communion with the pope and of every person involved, except for the Russian Catholics, who are under a separate commission, Congregation of Sacred Rites, for all public worship of the Latin rite, for canonizations, liturgical books, and the like, Congregation of the Ceremonial, for liturgical ceremonies involving the pope and the sacred college, Congregation for Extraordinary Ecclesiastical Affairs, virtually a board of assistants to the secretariat of state, Congregation of Studies, for the administration of education, of seminaries, and of ecclesiastical research, Congregation of the Fabric, for the maintenance of St Peter's Church Of the Roman congregations, the two whose influence is felt most deeply throughout the Church are probably the Holy Office and the Propaganda The Roman tribunals are three secret courts, the highest of the Church, each is headed by a cardinal, and its work is handled by trained canonists They are the Apostolic Penitentiaria, for all cases of conscience appealed by any Catholic to the pope and for the regulation of indulgences, the Apostolic Signatura, the court of final appeal of the Church, considering only cases involving the members of, or appealed from, the Rota, the Sacred Roman Rota, the court of appeal from diocesan courts and the lower court of Vatican City, hearing all cases requiring trial and evidence, except cases of conscience, cases of canonization, and cases involving sovereigns of states (reserved to the pope in person) The curial offices are now to a large extent unimportant and honorary. They are the Apostolic Chancery, to issue

bulls of foundations and the like, the Apostolic Datarıa, to handle matter concerning candidates for papal benefices, pensions, and the like, the Apostolic Camera, headed by the chamberlain of the Holy Roman Church, to administer the property (except revenue) of the Holy See, notably in the vacancy of the papal see The secretariats are the secretariat of state, headed by the cardinal secretary of state, who has charge of all matters involving relations with political governments and has for his aid a large staff and the Congregation of Extraordinary Ecclesiastical Affairs, and the secretariat of briefs, in charge of the official Latin correspondence of the pope Besides these permanent departments there are always some special commissions of cardinals, e g , for the Russian Church, for the revision of the Vulgate, for biblical study, and for sacred art The term *cardinal* was formerly applied to important clergymen of all sorts and countries, but in the Middle Ages it was officially restricted to the Roman province The college of cardinals is the modern derivative of the advisory board of clergymen of the diocese of Rome, used by the pope for advice and transaction of detail, similar advisory boards have always been used by bishops This papal council long consisted of the pastors of the Roman churches and of the deacons (overseers of the poor) of the various districts of the city The local functioning of the cardinals is recalled by the titles of the cardinal priests and cardinal deacons The decisive event in fixing the number and organization of the college was the act of Nicholas II in 1059, restricting to the cardinals alone the right to elect the pope (see PAPAL ELECTION) This necessitated the determination of rules, qualifications for membership, and close organization of the group The numbers and duties of the cardinals have varied greatly since then, the most important recent legislation is the fixing by Sixtus V of the full complement at 70 See Michael Williams and Julia Kernan, *The Catholic Church in Action* (1934), for a non-Catholic point of view, George Seldes, *The Vatican* (1934)

cardinal or **redbird**, North American songbird of the FINCH family The eastern cardinal has the most northerly range, from the Gulf Coast to New York and west to Iowa. The male is a bright scarlet, with black throat and face, the female is brown with patches of red Both sexes have stout, conical red bills, and crested heads The song is rich and melodious Other cardinals—the Arizona, the gray-tailed, the Louisiana, and the San Lucas—frequent the S United States and Mexico

cardinal flower see LOBELIA

carding, process by which fibers are opened, cleaned, and straightened preparatory to spinning The fingers were first used, then a tool of wood or bone shaped like a hand, then two flat pieces of wood (cards) covered with skin set with thorns or teeth Primitive cards, rubber covered and toothed with bent wires, are still employed by Navaho women Modern carding dates from the use of revolving cylinders patented in 1748 by Lewis Paul A mechanical apron feed was devised in 1772, and Richard Arkwright added a funnel which contracted the carded fiber into a continuous sliver See COMBING

Cardington, village (pop 1,304), central Ohio, SE of Marion; founded 1822

Cardozo, Benjamin Nathan (kärdō'zō), 1870–1938, American jurist, Associate Justice of the U S Supreme Court (1932–38), b New York city, grad Columbia (B A , 1889, M A , 1890) He was admitted to the bar (1891) and practiced law until he was elected (1913) to the New York supreme court on the Fusion ticket Cardozo was appointed (1914) to the court of appeals, was elected (1914) for a 14-year term, and in 1916 was elected chief justice of the court He was prominent in the efforts of the American Law Institute to restate and simplify the law, and he advocated a permanent agency to function between the courts and legislatures to aid in framing effective legislation He was active in a number of Jewish movements He was appointed by President Hoover to the Supreme Court to succeed Oliver Wendell Holmes Cardozo's approach to law was from the view of its effects on society rather than from hair-splitting logic. His books, *The Nature of the Judicial Process* (1921), *The Growth of Law* (1924), and *The Paradoxes of Legal Science* (1928), dynamically analyse the fundamentals in legal philosophy and practice See Beryl H Levy, ed , *Cardozo and Frontiers of Legal Thinking* (1938), biographies by J P Pollard (1935) and G S Hellman (1940)

cards, playing: see PLAYING CARDS

Cardston, town (pop 2,334), SW Alta , SW of Lethbridge and near the U S boundary It was established in the middle of the 19th cent by Mormons from Utah under the leadership of Charles Ora Card, son-in-law of Brigham Young The chief Mormon temple of Canada is here There are coal mines and stone quarries in the vicinity

Carducci or **Carducho, Bartolomeo** (bärtōlōmā'ō kärdōōt'chē, kärdōō'kō), 1560–1608, Italian painter, sculptor, and architect in Spain He studied with Federigo Zuccaro, whom he accompanied to the court of Madrid He assisted Tibaldi in decorating the library ceiling of the Escorial and executed some of the cloister frescoes. His masterpiece, *Descent from the Cross*, is in San Felipe el Real, Madrid His brother **Vincenzo Carducci** (vēnchän'tsō), c 1578–1633, succeeded him as court painter to Philip III In Madrid are his 54 paintings of the *Life of St Bruno* (National Mus) and his scenes from the *Life of the Virgin* (Prado). He is the author of the famous *Dialogos de las excelencias de la pintura* (1633)

Carducci, Giosuè (jōsōō'ā'), 1835–1907, Italian poet He was professor of literature at the Univ of Bologna from 1860 to 1904 He was a scholar, an editor, an orator, a critic, and a patriot, although his defection from republicanism brought him into disfavor even with his students He was awarded the 1906 Nobel Prize in Literature Carducci ranks with the greatest Italian poets, his verse is classic in design, with a deep and wide range of emotion His chief works include *Rime* (1857), *Inno a Satano* (hymn to Satan) (1865), *Decennali* (1971), *Nuove poesie* (1873), *Odi barbari* (1877, 1882, 1889), and *Rime nuove* (1889, Eng tr , *New Rhymes*, 1916) For translations, see G L Bickersteth, *Carducci a Selection of His Poems* (1913), Lorna de' Lucchi, *An Anthology of Italian Poems* (1922), Maud Holland, *Poems by Giosuè Carducci* (1927) For biography and criticism, see Orlo Williams, *Giosuè Carducci* (1914), R S Phelps, *Italian Silhouettes* (1924), John Bailey, *Carducci* (1926)

Carducho, Bartolomeo. see CARDUCCI, BARTOLOMEO

Cardwell, Edward Cardwell, Viscount, 1813–86, British statesman He entered Parliament as a supporter of Robert Peel (1842), under whom he was secretary of the treasury (1845) and president of the Board of Trade (1852–55) Under Palmerston he was Irish secretary (1859–61) and chancellor of the duchy of Lancaster (1861–64), while colonial secretary (1864–66) he worked toward federation in Canada As war secretary (1868–74) under Gladstone, he reformed the British army, abolishing the purchase of commissions, shortening the term of enlistment, and creating a reserve.

Careah (kâr'ē'ù), variant of KAREAH

Carême, Marie Antoine (mȧrē' ätwan' karĕm'), 1784–1833, celebrated French cook and gastronomist He was chef of Talleyrand, Tsar Alexander I, George IV, and Baron Rothschild His writings on the culinary art include *La Cuisine française* (1833)

Carew, George, Baron Carew of Clopton and earl of Totnes (kurōō', klŏp'tun, tŏt'nĭs), 1555-1629, English statesman Variously a military and naval officer in Ireland and diplomat for Queen Elizabeth, he was (1600) as lord president of Munster a great aid to the lord lieutenant, Lord Montjoy, in defeating Hugh O'Neill, earl of Tyrone Under James I, Carew was unable to save his friend, Sir Walter Ralegh, but himself received honors, including his earldom in 1626 An antiquarian, he collected material on the history of Ireland, used later by his secretary, Sir Thomas Stafford, to prepare the important *Pacata Hibernia, or, A History of the Late Wars in Ireland* (1633).

Carew, Thomas (kurōō'), 1595?–1639?, English poet He was educated at Merton College, Oxford, and after a short diplomatic career on the Continent, he returned to England and became a favorite of Charles I and a court official Ben Jonson was his friend, and John Donne's works greatly influenced Carew's writings His masque, *Coelum Britannicum* (1634), his "Elegy on the Death of Dr Donne," and even the daring and finely wrought love poem, "A Rapture," are not so well known as his courtly, amorous lyrics, such as "Ask me no more where Jove bestows" and "He that loves a rosy cheek " The most consciously artistic of the CAVALIER POETS, Carew has a permanent place in the history of English poetry

Carey, Henry, c 1690–1743, English poet and musician He was a writer of burlesques and farces, and his most successful production was *Chrononhotonthologos* (1734), which he characterized as "the most tragical tragedy that was ever tragedized " *The Dragon of Wantley* (1737), a comic opera, was also successful, but Carey is most familiar as the author of the words and music of *Sally in Our Alley*

Carey, Henry Charles, 1793–1879, American economist, son of Mathew CAREY In 1835 he retired from publishing, where he had done notable work, to devote himself to economics His *Principles of Political Economy* (3 vols , 1837–40) and *Principles of Social Science* (3 vols , 1858–59) were among the first important American works in the field Carey opposed the dominant English political economy of the day, particularly the "pessimism" of Ricardo and Malthus, and led in the theoretical development of American economic nationalism He advocated the protective tariff but believed generally in laissez faire See study by A D H Kaplan (1931)

Carey, Joseph Maull, 1845–1924, American legislator, b Milton, Del , grad Univ of Pennsylvania (LL.B , 1864) Admitted (1867) to the bar, Carey practiced law in Philadelphia and after he removed (1869) to Wyoming became a cattleman and real-estate agent He served as U S. attorney (1869–71) of Wyoming Territory and as mayor (1881–85) of Cheyenne before he was (1885–90) territorial delegate to the U.S Congress. He promoted extensive irrigation projects in Wyoming, and as Republican Senator (1890–95) from the newly created state, he was author of the CAREY LAND ACT He then resumed law practice and in 1910 was elected governor of Wyoming. He was influential in the Progressive movement in 1912 His son, **Robert Davis Carey,** 1878–1937, b Cheyenne, Wyo , grad Yale, 1900, was governor (1919–23) of Wyoming and served (1930–36) in the U S Senate.

Carey, Lucius see FALKLAND, LUCIUS CARY, 2D VISCOUNT.

Carey, Mathew, 1760–1839, American publisher, bookseller, and economist, b. Dublin After spending a month in Newgate prison for his attacks on Parliament in his Dublin journal, Carey emigrated to Philadelphia in 1784 There a gift from Lafayette enabled him to establish (1785) the *Pennsylvania Herald* From Jan , 1787, to Dec , 1792, he edited and published the *American Museum*, making it the leading American magazine of the period Carey began his career as bookseller and publisher on a large scale c 1790 Through his publication of many American authors and through his wide distribution of books, he stimulated the growth of American letters Although many of his own political pamphlets were controversial, the most famous, *The Olive Branch* (1814), was written during the War of 1812 in an effort to unite the Republican and Federalist parties in support of the war His copious writings advocating the American protective system were influential and are valuable documents in American economic history The economist Henry Charles CAREY was his son See E L. Bradsher, *Mathew Carey* (1912)

Carey, Robert Davis see CAREY, JOSEPH MAULL.

Carey, William, 1761–1834, English Baptist missionary and Orientalist, one of the first Protestant missionaries to India He helped found the Baptist Missionary Society in 1792 and shortly thereafter went to India Carey did most of the work in publishing the Bible in many Indian vernaculars, he wrote grammars of the vernaculars and several dictionaries He became a professor of Sanskrit at Fort William College, Calcutta See biography by S P Carey (8th ed , revised, 1934)

Carey, village (pop 2,984), NW Ohio, near Upper Sandusky, platted 1843, inc 1858 It is a trade and shipping center for a truck-farming area Chemicals and rubber products are made The Shrine of Our Lady of Consolation is in the village.

Carey Land Act, written by Sen Joseph M CAREY and passed by the U S Congress in 1894 The act provided for the donation of U S -owned desert lands to Western states on condition they be irrigated Settlers were permitted to buy up to 160 acres of this land at 50 cents an acre plus the cost of water rights

Cargill, Donald (kär'gĭl), 1619?–1681, Scottish Covenanter He was a minister in Glasgow from c 1655 to 1662, when he was expelled for denouncing the Restoration and resisting the establishment of the episcopacy in Scotland After escaping wounded from the battle of Bothwell Bridge (1679), he joined Richard Cameron in the Sanquhar Declaration (1680) against Charles II Cargill, having excommunicated the king, the duke of York, and others, was arrested and executed

Caria (kā'rēu), ancient region of SW Asia Minor, S of the Maeander river (the modern Menderes), which separated it from Lydia The territory is in present SW Asiatic Turkey Native princes governed a thriving state from their capital at Halicarnassus until Caria was absorbed in the growth of Lydia and was later taken by the Persian Empire The relations with the Ionian Greeks were strong, for Caria had both Dorian and Ionian colonies Cnidus, Caunus, and Miletus were in the region, and Caria was a center of the Ionian revolt which in the early 5th cent B C was a prelude to the Persian Wars Some of the communities joined the Delian League In the 4th cent the region was again united under a dynasty of princes, of whom the most celebrated was Mausolus Alexander the Great conquered the region, which changed hands often in the wars after his death It was made a Roman province (part of the province of Asia) in 125 B C

Carías Andino, Tiburcio (tēbōōr'syō kärē'as ändē'nō), 1876–, president of Honduras (1933–48). The national congress twice extended his term, and he ruled as a strong-handed dictator Some improvements were made in communication and education, and holdings by foreign companies increased In 1948 Carías Andino announced his intention of retiring In the elections that autumn —widely denounced by the opponents of the government—the government-backed candidate, Juan Manuel Gálves, won He took office on Jan. 1, 1949.

Caribbean Sea (kă"rĭbē'ăn, kŭrl' bēun), part of the Atlantic Ocean It is closed on the west and the south by Central America and N South America and marked off on the north and east from the Gulf of Mexico and the Atlantic proper by the Yucatan peninsula of Mexico and the chain of islands of the West Indies.

Caribbees (kă'rĭbēz), name sometimes applied to the islands of the Caribbean or even to all the West Indies More specifically the Caribbees are the Lesser Antilles and include the LEEWARD ISLANDS, the WINDWARD ISLANDS, and the VIRGIN ISLANDS

Carib Indians (kă'rĭb), native people formerly inhabiting the Lesser Antilles, West Indies They seem to have overrun the Lesser Antilles and to have driven out the ARAWAK about a century before the arrival of Columbus The original name, Calinago or Caino, was corrupted by Columbus to Caribales and is the origin of the English word *cannibal* Extremely warlike and ferocious, they practiced cannibalism and took pride in scarification and fasting Fishing, agriculture, and basket-making were the chief domestic activities, they were expert sailors in their pirogues and small canoes. After European colonization began in the 17th cent, they were all but exterminated A group remaining on St Vincent mingled with Negro slaves who escaped from a shipwreck in 1675 This group was transferred (1795) by the British to Roatán island off the coast of Honduras They have gradually migrated north along the coast into Guatemala A few Caribs survive in a reservation on Dominica The Carib, or Cariban, languages are a separate family They have spread since the arrival of the Spanish and are found in N Honduras, British Honduras, and N South America In the past they extended even to Florida. The languages are thought to have begun expansion from a region between the Xingú and Tapajós rivers in Brazil In their spreading the Cariban languages seem to have been accompanied by Arawakan languages, which are an unrelated stock

Cariboo Mountains (kă'rĭbōō), range, 200 mi long, E British Columbia Its axis is northwest-southeast, roughly parallel with the main Rocky Mt range to the northeast, from which it is separated by the Rocky Mt trench, here occupied by the Fraser river It reaches its greatest altitude probably in Mt Titan (c 11,750 ft) In the foothills to the westward is the Cariboo dist, scene of the famous Cariboo gold rush of 1860 Many camps sprang up in the region and in the next six years about $20,000,000 in gold was taken out, but afterwards the diggings declined Many stayed on in the region, and today there are several thousand who make their living by a combination of mining, hunting, and farming The Cariboo wagon road, built (1862–65) by the government, facilitated the settlement of the interior of the province It started from Yale on the Fraser, at the head of navigation, and ended in the Cariboo dist nearly 400 mi to the north See Agnes Laut, *The Cariboo Trail* (1916)

Caribou (kă'rĭbōō), town (pop 8,218), NE Maine, on the Aroostook and N of Presque Isle, inc 1859 It is a port of entry for planes, a center for winter sports, and the shipping point of a potato-growing region There are minor manufactures

caribou (kă'rĭbōō), name in America for a mammal of the deer family found in arctic and subarctic regions It belongs to the genus (*Rangifer*) of the Old World REINDEER, the only genus in which both sexes of some forms have antlers The broad hoofs support the animal on boggy land or snow and have sharp edges which enable it to traverse rocks and frozen or slushy surfaces In North America there are two main types, the barren-ground caribou of Alaska and N Canada, which are the most migratory, and the larger woodland caribou found in coniferous forests and in bogs from Newfoundland to British Columbia

caricature, an exaggerated or satirical drawing, plastic representation or description which makes its subject appear ridiculous It is probably as old as art Modern caricature in drawing goes back to the 16th cent when Holbein, Breughel, Bosch, and the school of the Carracci were notable exponents of the art It was expanded to include political and social, as well as personal, satire, and its tradition was continued by such masters as Callot, Hogarth, Rowlandson, Goya, Daumier, Gillray, and Cruikshank The first American caricaturist of note, William Charles, lampooned England in 1812 The next, Thomas Nast, pilloried Tammany and the Tweed Ring, inventing the symbols of the tiger and the donkey which persist to this day Periodicals of caricature, such as *Charivari* (which appeared in France in 1832), were followed by *Punch* in England and *Puck*, *Life*, and *Judge* in the United States Boardman Robinson, Art Young, Rollin Kirby, J N (Ding) Darling, Daniel Fitzpatrick, John T McCutcheon, and others have developed caricature in the American daily press, while James Thurber, Peter Arno, William Steig, and others have enlivened the pages of the *New Yorker* See also CARTOON

Carignan-Salières regiment (karēnyă-salyĕr'), French regiment, the largest body of troops ever sent to New France The regiment, which arrived in Canada in 1665, was over 1,000 strong and had a distinguished record, it was charged with the task of rendering the lower St. Lawrence valley safe from Indian raids With its mission completed, it was ordered back to France several years later, but about half its members, persuaded by offers of land, remained as settlers near Montreal

carillon, in music see BELL

Carillon, Fort: see TICONDEROGA

Carinthia (kurĭn'thēŭ), Ger *Kärnten* (kĕrn'tun), autonomous province or *Bundesland* (3,681 sq mi, pop 482,886), S Austria In the north, at the Tyrol frontier, rises the highest point in Austria, the Grossglockner Predominantly a mountainous region, Carinthia has well-developed mines (lead, iron, and zinc) and an active tourist trade Klagenfurt, the capital, lies in the fertile Drava plain In 976 Carinthia, which then included ISTRIA, CARNIOLA, and STYRIA, was detached from BAVARIA and created an independent duchy Acquired (1269) by Ottocar II of Bohemia, it fell to RUDOLF I of Hapsburg in 1276 and became an Austrian crownland After 1919 it lost some minor territories to Italy and Yugoslavia There is a Slovene minority in S Carinthia

Carinus (Marcus Aurelius Carinus) (kurī'nŭs), d. 285, Roman emperor (283-85) He was the son of CARUS, who left Carinus as ruler in the West when he went to the East on a campaign against the Parthians On the death of Carus, Carinus succeeded in the West, his brother Numerianus succeeded in the East After the murder of Numerianus, DIOCLETIAN was chosen by the soldiers emperor in the East Carinus set out to defeat the new claimant and met him in battle At the moment of victory, however, Carinus was murdered by one of his own soldiers, and Diocletian became sole emperor

Carisbrooke (kă'rĭzbrŏōk), village, on the Isle of Wight, England, near Newport There are vestiges of Roman settlement and ruins of a castle in which Charles I and his children were imprisoned

Carissimi, Giacomo (jä'kōmō karēs'sēmē), 1605–74, Italian composer His Latin oratorios are the earliest examples of true oratorio extant and set the style for later composers He also wrote cantatas and excelled in choral composition

Carlen, Emilie Smith Flygare- see FLYGARE-CARLEN

Carleton. see COFFIN, CHARLES CARLETON

Carleton, Guy, 1st Baron Dorchester, 1724–1808, governor of Quebec and British commander in the American Revolution He came to America in 1758 and gave distinguished service in the French and Indian War, at Louisburg and Quebec, and in the attack on Havana After 1766, as lieutenant governor, acting governor, and governor of Quebec, he proved to be a very able administrator He is given major credit for the QUEBEC ACT of 1774, which was designed to better relations between the British and the French Canadians and was successful, the loyalty of the French Canadians to the British in the American Revolution was at least partly the result of it On the other hand, it infuriated the colonists in the present United States and helped bring on the war When Thomas GAGE resigned as commander in chief of British forces in America, the command was divided, Sir Guy Carleton had command in Canada, and Sir William Howe had command farther south When the patriots in the American Revolution launched their QUEBEC CAMPAIGN, Carleton had few men and had to abandon Montreal, which fell to the forces under Richard Montgomery Withdrawing to Quebec, Carleton there threw back (Dec 31, 1774) an attack led by Montgomery and Benedict Arnold and withstood a long winter siege British reinforcements in the spring enabled him to push the American forces out of Canada to Crown Point, which he took in the autumn of 1776 Disagreements with Lord George Germain led to his being replaced as commander by Gen John Burgoyne in 1777 Carleton resigned as governor, but he could not leave Canada until 1778, when he was succeeded by Sir Frederick Haldimand In Feb, 1782, after the Yorktown campaign had already effectively ended the American Revolution, Carleton replaced Sir Henry Clinton as commander in chief of the British forces His delicate task was to suspend hostilities, withdraw the forces from the New York and Vermont frontiers, and protect the Loyalists—both those who were emigrating to Canada and those who were attempting to reestablish themselves in their old homes His tact, persistence, firmness, and ability to mingle threat with promise accomplished more than seemed possible He was again governor of Quebec from 1786 to 1796 High-principled, gentlemanly, and able, Carleton was perhaps the most admirable British colonial commander in America in his time

Carleton, Mark Alfred, 1866–1925, American botanist, b Monroe co, Ohio He was a graduate of Kansas State College of Agriculture His later experiments on grain rusts at the agricultural experiment station there won attention and resulted in his being placed in charge of grain investigations of the U S Bureau of Plant Industry in 1894 His world-wide search for drought-resisting and rust-resisting wheats led to the introduction of many new varieties, of which the Kubanka durum wheat and the red Kharkov winter wheat, both from Russia, proved exceptionally hardy and found wide favor with Western farmers

Carleton, Will, 1845–1912, American poet, b Hudson, Mich, grad Hillsdale College, 1869 He is best known for his poems of rural life, his most famous being "Over the Hill to the Poorhouse" Among his works are *Farm Ballads* (1873), *Farm Legends* (1875), and *City Ballads* (1885) See biography by A E Corning (1917)

Carleton, William, 1794–1869, Irish novelist His native country was his material, and *Traits and Stories of Irish Peasantry* (5 vols, 1830–33) portrays his own rural youth This was followed by *Tales of Ireland* (1834), *Fardorougha the Miser* (1839), and *The Black Prophet* (1847) See Rose Shaw, *Carleton's Country* (1930)

Carleton College, at Northfield, Minn, coeducational, chartered 1866 It emphasizes individualized study The Kellogg Foundation (international relations) and Goodsell Observatory are here

Carleton Place, town (pop 4,305), S Ont, on the Mississippi (tributary of the Ottawa) and SW of Ottawa It is a junction, with railway shops

Carlile, Richard (-īl'), 1790–1843, English journalist, reformer, and freethinker For his radical writings and efforts to secure the freedom of the press, he spent over nine years in prison He republished suppressed works by Southey, William Hone, and others, brought out his own *Political Litany* (1817), and while he was imprisoned kept his weekly, the *Republican*, going (1819–26) with the help of his wife and sister See biography by C A Aldred (1923), T C Campbell, *The Battle of the Press* (1899)

Carlinville, city (pop 4,965), co seat of Macoupin co, S central Ill, SW of Springfield, in a coal, natural-gas, and farm area, settled c 1829, inc 1837 It has an elaborate courthouse built in 1867–70 and is the seat of Blackburn College (junior, coeducational, opened 1855)

Carlisle, Charles Howard, 1st earl of see HOWARD, CHARLES

Carlisle, Frederick Howard, 5th earl of see HOWARD, FREDERICK

Carlisle, John Griffin (kärlīl'), 1835–1910, American statesman, b Campbell (now Kenton) co, Ky Admitted to the bar in 1858, he began practice at Covington, served in both houses of the Kentucky legislature, and was (1871–75) lieutenant governor In 1877 he entered the U S House of Representatives and was one of its few great speakers (1883–89) Carlisle was a prominent tariff reformer and strongly championed the Mills Bill in 1888 He resigned from the House in 1890 to serve (1890–93) in the U S Senate In 1893 he became Secretary of the Treasury, holding office throughout Grover Cleveland's second term, made difficult by the Panic of 1893 and the falling gold reserve Carlisle's measures to replenish the reserve made him, like the President, unpopular among silver Democrats, who had once counted him one of their own In 1896 he supported John M Palmer, presidential candidate of the gold Democrats He later practiced law in New York city See biography by J A Barnes (1931)

Carlisle (kärlīl'), county borough (1931 pop 57,304, 1943 estimated pop 60,220) and city, Cumberland, England, near the junction of the Caldew, Eden, and Petteril rivers and near the Scottish border It is an important rail center with textile factories and other industries The Roman station Luguvallum (near Hadrian's Wall) which was here was destroyed by the Danes in 875 The Carlisle castle, built by William Rufus in 1092, withstood siege by Robert the Bruce, was taken by the parliamentarians in the civil wars, was again besieged in 1745, and is now used as a barracks Mary Queen of Scots was imprisoned here in 1568 The cathedral was founded early in the 12th cent and was preceded by an Augustinian priory church

Carlisle (kärlīl', kă'līl) **1** Town (pop 1,080), central Ark, E of Little Rock, in an area producing rice, cotton, and dairy goods, founded 1871 A large cheese plant is here **2** City (pop 1,414), co seat of Nicholas co (formed 1799), N Ky, NE of Lexington, in a tobacco region **3** Industrial borough (pop 13,984), co seat of Cumberland co, S Pa, SW of Harrisburg, settled by Scotch-Irish, laid out c 1751, inc 1782 Its manufactures include leather goods, clothing, furniture, and carpets The Pennsylvania Turnpike begins here Molly PITCHER, heroine of the battle of Monmouth, is buried in the Old Graveyard here In the French and Indian War the Forbes (1758) and Bouquet (1763) expeditions were organized at Carlisle A munitions depot during the Revolution, the borough was a headquarters for Washington during the Whisky Rebellion It was a stop on the Underground Railroad and was attacked in the Civil War by Gen Fitzhugh Lee It became the seat of a military medical station in the First World War DICKINSON COLLEGE is here, as was the **Carlisle Indian School** (Federal) from 1879 to 1918, when it closed It was successful until the retirement in 1904 of its founder, Richard Henry PRATT

Carlists, partisans of Don CARLOS (1788–1855) and his successors, who claimed the Spanish throne under the SALIC LAW of succession, introduced (1713) by Philip V The law (forced on Philip by the War of the Spanish Succession to avoid a union of the French and Spanish crowns) was abrogated by Ferdinand VII in favor of his daughter, who

succeeded him (1833) as ISABELLA II Ferdinand's brother, Don Carlos, refused to recognise Isabella and claimed the throne A civil war followed, and in the hope of autonomy most of the Basque Provs and Catalonia supported Carlos The Carlists' reactionary and clericalist tendencies gave the originally dynastic conflict a political character, and the war was marked by extreme cruelty on both sides In 1839 the Carlist commander yielded to Isabella's general, ESPARTERO, but in Catalonia the Carlists under Ramón CABRERA continued the struggle until 1840 In 1860 Don Carlos's son, Don Carlos, conde de Montemolín (1818–61), attempting a rising, landed in Catalonia but failed and renounced his claims These were revived by his nephew, Don Carlos, duque de Madrid (1848–1909), after the deposition (1868) of Isabella Two insurrections (1869, 1872) failed, but after the abdication (1873) of King AMADEUS and the proclamation of the Spanish republic, the Carlists seized the Basque Provs , Catalonia, and parts of Aragon and Valencia The ensuing chaos and brutal warfare ended in 1876, a year after ALFONSO XII, son of Isabella, was proclaimed king Don Carlos escaped to France His claim passed to his son, Don Jaime (1870–1931), who renounced it in favor of Alfonso XIII At Jaime's death, however, some members of the house of BOURBON disavowed his renunciation The Carlists, essentially an ultra-reactionary political group, embraced the Insurgent cause in the Spanish civil war of 1936–39 but no longer found support among the Basques and Catalans

Carl Junction, city (pop. 1,039), SW Mo , near Joplin Explosives are made here

Carloman, 751–71, younger brother of CHARLEMAGNE

Carloman (kär'lōmän″), d 880, king of Bavaria, Carinthia, Pannonia, and Moravia (876–79) and of Italy (877–79), son of LOUIS THE GERMAN and father of Emperor Arnulf He failed (875) to prevent the assumption of the imperial crown by his uncle, Charles II (Charles the Bald) In 879 he was incapacitated by a paralytic stroke and transferred his realm to his brothers Carloman was the first German king to become king of Italy

Carloman, d 884, French king, son of LOUIS II (Louis the Stammerer) He became joint ruler with his brother Louis III in 879 His reign was disturbed by revolts in Burgundy and Provence and by an invasion of the Normans Defeated by Louis at Saucourt (881), the Normans returned to France after Louis's death, but Carloman checked them at the Aisne, they had agreed to withdraw when he died. He was succeeded as French king by Emperor Charles III (Charles the Fat)

Carloman, d 754, mayor of the palace in the kingdom of Austrasia after the death (741) of his father, Charles Martel With his brother, PEPIN THE SHORT, he carried on successful wars against Hunald of Aquitaine, the Saxons, the Swabians, and the Bavarians and reorganized the Frankish church In 747 he retired into a monastery

Carlos For Spanish and Portuguese kings thus named, see CHARLES

Carlos, 1545–68, prince of the Asturias, son of Philip II of Spain and Maria of Portugal Don Carlos, who seems to have been mentally unbalanced, was imprisoned by his father in 1568, on the eve of a projected flight into the Netherlands He died shortly afterward Friedrich von Schiller deliberately idealized his character in his tragedy, *Don Carlos*, making him a champion of liberalism and unhappily in love with his stepmother, ELIZABETH OF VALOIS

Carlos (Carlos María Isidoro de Borbón), 1788–1855, second son of Charles IV of Spain He was the first Carlist pretender After his father's abdication he was, with the rest of his family, held a prisoner in France until 1814 A conservative and a devout Catholic, he was supported by the clerical party when he refused to recognize Isabella, daughter of his brother, King FERDINAND VII, as successor to the Spanish throne When his niece became queen (1833) as ISABELLA II, Don Carlos took up arms Defeated in 1839, he escaped to France and renounced his claim in favor of his son, Don Carlos, conde de Montemolín See CARLISTS

Carlotta (kärlō'tä) Span *Carlota* (kärlō'ta), 1840–1927, empress of Mexico, daughter of Leopold I of Belgium, christened Marie Charlotte Amélie She married MAXIMILIAN, archduke of Austria, on July 27, 1857, and accompanied him when he went to Mexico as emperor (1864) After Napoleon III decided to withdraw the French troops from Mexico and the fate of the empire became apparent, she went to Europe (1866) and sought the aid of Napoleon III and the pope Her pleas were in vain, and her overwrought mind gave way under the strain. The Mexican empire ended with the execution of Maximilian in 1867, but the unhappy empress survived it 60 years

Carlow (kar'lō), inland county (346 sq mi , pop 34,081), Leinster prov , Ireland. The chief towns are Carlow, the county town, Bagenalstown, on the Barrow, which forms much of the western boundary of the county, and Tullow, on the Slaney, which crosses the county from north to south. The granitic uplands of the southeast are a conspicuous feature in an otherwise fertile lowland region Cattle raising, farming, and dairying are the occupations of the region There are some coal deposits in the west Organized as a county in the early 13th cent , Carlow was strategically situated on the southern edge of the English Pale. These are remains of medieval castles and ecclesiastical establishments.

Carlow, urban district (pop 7,465), county town of Co Carlow, Ireland, on the Barrow river and SW of Dublin It is an agricultural market in a dairy region with sugar refining, flour milling, brewing, and shoe manufacturing It has a 12th-century castle and is the seat of the Roman Catholic cathedral of the diocese of Kildare and Leighlin Of strategic importance, Carlow was burned in 1405 and in 1577, in 1778 it saw a fierce street battle fought by insurgent United Irishmen

Carlsbad or **Karlsbad** (both kärls'bäd, Ger. kärls'bät), Czech *Karlovy Vary* (kär'lôvĭ vä'rĭ), city (pop 17,187), NW Bohemia, Czechoslovakia, one of the most-visited watering places of Europe Its hot mineral water is taken particularly for digestive diseases The city was chartered in the 14th cent by Emperor Charles IV, who is said to have discovered its springs

Carlsbad (kärls'bäd), city (pop 7,116), co seat of Eddy co , SE N Mex , on the Pecos river, settled 1888, organized 1889 The region has grazing lands and irrigated farms that produce cotton and alfalfa The Carlsbad U S reclamation project serves more than 20,000 acres. Mining and refining of potash began in 1931 In the Second World War, Carlsbad expanded greatly and in 1946 had an estimated population of 17,000 Near by is Carlsbad Caverns National Park

Carlsbad Caverns National Park, 45,526 59 acres, SE N Mex , in the foothills of the Guadalupe Mts , est as a national monument 1923, as a national park 1930 These limestone caves, with remarkable stalactite and stalagmite formations and tremendous chambers, were discovered in 1901 and have been only partially explored Three main levels have been found, the lowest is 1,100 ft. below the surface Seven miles of trail are electrically lighted The Big Room, 4,000 ft long and 625 ft wide, is reached by elevator as well as by the natural entrance Millions of bats inhabit the caves, supplying guano, valuable for fertilizer The park is open all year

Carlsbad Decrees, 1819, resolutions of a conference of the ministers of German states, convened and dominated by Prince METTERNICH, the occasion being the murder of KOTZEBUE They provided for uniform press censorship and close supervision of the universities, with the aim of suppressing all liberal agitation against the reactionary governments of Germany, particularly in the student organizations (see BURSCHENSCHAFT) The resolutions, ratified by the diet of the German Confederation, remained in force until 1848

Carlscrona, Sweden see KARLSKRONA

Carlsen, Emil, 1853–1932, American painter, b Copenhagen He came to the United States in 1872 Carlsen is best known as a luminous colorist whose landscapes and marines won him many awards He is represented in leading museums throughout the country His *Open Sea* (Metropolitan Mus) is characteristic

Carlson, Evans Fordyce, 1896–1947, American marine officer, b Delaware co., N Y Enlisting at 16 in the army, he served in the Philippines, in Hawaii, and in France In the U S Marine Corps after 1922, he saw service in Cuba, Nicaragua, Japan, and especially China, where in 1937 he studied guerrilla warfare intensively Angered by censorship of his reports, he resigned, but in 1941 he applied for recommissioning After Pearl Harbor he organized and commanded Carlson's Raiders In 1946 he was promoted brigadier general and retired from service He wrote *The Chinese Army* (1940) and *Twin Stars of China* (1940)

Carlsruhe, Germany see KARLSRUHE

Carlstadt, Karlstadt (both karl'shtät), or **Karolostadt** (kä'rôlōshtät″), c 1480–1541, German Protestant reformer, whose original name was Andreas Rudolf Bodenstein As early as 1516 Carlstadt presented theses denying the doctrine of free will and asserting the doctrine of salvation by divine grace alone In 1518 he supported Luther against the attacks of Johann Maier von ECK by maintaining the supremacy of the Holy Scriptures, and in 1519 he appeared against ECK in the public disputation at Leipzig While Luther was in retirement at the Wartburg (1521–22), Carlstadt became the Protestant leader at Wittenberg, where he exhibited iconoclastic fervor in the abolition of accepted practices Upon Luther's return the practices were restored, and Carlstadt was in disfavor In 1524 he obtained a pastorate, only to incur removal by Elector Frederick III (Frederick the Wise) of Saxony when he instituted such reforms as abolition of the sacraments and the Mass When accused of participation in the PEASANTS' WAR, he fled to Switzerland, where he found protection and work through the intercession of the Zurich preachers. He became professor of theology at Basel.

Carlstadt (kärl'stät), industrial borough (pop, 5,644), NE N.J., NE of Newark; inc. 1894

Carlton, urban district (1931 pop 22,325, 1947 estimated pop 33,650), Nottinghamshire, England Home of a Conservative organization, Carlton Club in London (damaged in an air raid in 1940) was named after Carlton House, built here by Lord Carlton in 1709 Once the residence of George IV while he was prince of Wales, the house was destroyed early in the 19th cent

Carlyle, Jane Baillie Welsh, 1801–66, wife of Thomas Carlyle, whom she met through her tutor, Edward IRVING, and married in 1826. She possessed a genius for letter writing, manifest in the volumes of her published correspondence edited by J. A Froude (3 vols , 1883), D G Ritchie (1899), Alexander Carlyle and Sir J Crichton-Browne (1903), Alexander Carlyle (1909), Leonard Huxley (1924), and Townsend Scudder (1931). See biographies by E. A Drew (1928) and Townsend Scudder (1939)

Carlyle, Thomas, 1795–1881, British man of letters, b Ecclefechan, Scotland He studied (1809–14) at the Univ of Edinburgh, but left when his doubts became too strong for him to continue preparing for the ministry. After teaching mathematics at Annan and Kirkcaldy, he returned to Edinburgh to study law, with no income but his savings and earnings from tutoring and hack writing Law gave way to reading in German literature and transcendental philosophy, which in turn led to his "conversion" of 1822, really a revulsion from 18th-century rationalism, to belief in the immanent and friendly God of an orderly universe, postulated by Kant, Goethe, and Fichte Carlyle set about interpreting German romantic thought to English readers with his *Life of Schiller* (in the *London Magazine*, 1823–24) and his translation (1824) of Goethe's *Wilhelm Meister*, both written while he was acting as tutor (1822–24) to the Buller family In 1826 he married Jane Baillie Welsh, to whom his friend Edward Irving had introduced him in 1821, it was a marriage of equal minds, differing temperaments, and great devotion, made difficult by Carlyle's ill-health and bouts of overwork To economize they moved to Jane's farm at Craigenputtock in 1828, where he continued writing for periodicals There he wrote *Sartor Resartus* (*Fraser's Magazine*, 1833–34, book form, 1838), in which, under the name Herr Diogenes Teufelsdröckh, he had his spiritual autobiography, his literary figure of the material world as mere clothing for the spiritual one was taken from Jonathan Swift's *Tale of a Tub*, but his social criticism and his transcendental philosophy were Carlyle's own In 1832 Ralph Waldo Emerson came to Craigenputtock and began the friendship continued in their famous correspondence In 1834 the Carlyles, urged by their friend John Stuart Mill, moved to London to be near necessary works of reference for the projected *French Revolution* The first volume, completed in 1835, was accidentally destroyed while in the hands of Mill's friend Mrs Taylor Finally completed in Jan , 1837, the book was rewarded with tremendous popularity It is not a factual history, but conveys the spirit of its subject, it is vivid, dramatic, and grimly satiric and warns unmistakably that English social reforms were overdue Carlyle's impatience with laissez-faire theories and his belief in the necessity for strong, paternalistic government had their roots in his intense pity for the wrongs of the poor and his conviction that society does change and must do so intelligently, directed by its best men, its "heroes " The last of a series of lectures he gave on his beliefs was published as *On Heroes, Hero-Worship, and the Heroic in History* (1841), and his other works expanded his thesis—*Chartism* (1840), *Past and Present* (1843), contrasting the disorder of modern society with the feudal order of 12th-century England, *Oliver Cromwell's Letters and Speeches* (1845), *Latter-Day Pamphlets* (1850), and a massive biography of a hero-king, Frederick the Great, on which he spent the years 1852–65 In 1851 he had written the most important of his noncontroversial works, the restrained and sympathetic *Life of John Sterling* (1851) In 1866 his wife died, and the loss saddened the rest of his life The leading social critic of his day, Carlyle influenced also men of a younger generation, among them Matthew Arnold and Ruskin His style, one of the most tortuous yet effective in English literature, was a compound of biblical phrases, colloquialisms, Teutonic twists, and his own comings, arranged in unexpected sequences. See his *Reminiscences* (ed by J A Froude, 1881) and numerous collections of his letters and his wife's, biographies by J A Froude (1882, 1884), D A Wilson (6 vols , 1923–34, Vol VI finished by D W. MacArthur), and Emery Neff (1932)

Carlyle, city (pop. 2,591), co seat of Clinton co , S Ill , on the Kaskaskia river and E of St Louis, in a farm and coal area, laid out 1818, inc 1837. A state fish hatchery is near by.

Carmagnola, Francesco Bussone da (franchäs'kō bōōs-sō'nā dä kärmänyō'lä), c 1380?–1432, Italian *condottiere*. He rendered conspicuous services to Filippo Maria Visconti, duke of Milan, but later fell out with him, entered the service of Venice, and assumed (1425) command of Florentine and Vene-

tian forces against Milan. His irresolute conduct of the war led the Venetians to suspect him of treason. He was summoned to Venice, tried by the Council of Ten, and executed

Carman, Bliss (kär'mun), 1861–1929, Canadian poet and journalist, b Fredericton, N B He studied at the universities of New Brunswick and Edinburgh and at Harvard While at Harvard (1886–88) he began to write poetry, and his friendship there with Richard Hovey later resulted in their joint publication of the series *Songs from Vagabondia* (1894, 1896, 1901) Among numerous volumes of his verse are *Behind the Arras* (1895), the series *Pipes of Pan* (1902–5), and *Echoes from Vagabondia* (1912) The best of these and other poems are collected in *Later Poems* (1921) and *Ballads and Lyrics* (1923) Meanwhile he had edited *The Chap-Book* (1894–98) and supported himself by other editorial work and by his popular lectures in the United States and Canada. His *Talks on Poetry and Life*, lectures on Canadian literature, was published in 1926 Although he was recognized as a major Canadian poet, he maintained his home in New Canaan, Conn Carman's reputation rests on the melodic quality of his verse and his sensuous pleasure in nature See biography by Odell Shepard (1924), James Cappon, *Bliss Carman and the Literary Currents and Influences of His Time* (1930)

Carman, Harry James, 1884–, American historian and educator, b Greenfield, Saratoga co , N Y , grad Syracuse Univ (Ph B , 1909, M A and Pd B , 1914), Ph D Columbia, 1919 He was a grade school teacher and a high school principal before becoming an instructor and then an assistant professor at Syracuse Univ (1914–17) In 1918 he came to Columbia Univ , where he attained professorial rank in 1931 From 1925 to 1931 he was assistant to the dean of Columbia College, and from 1943 to 1950 he was dean He was appointed a member of the Board of Higher Education of New York city in 1938 and of the New York State Board of Mediation in 1941 Among other works he has written *Social and Economic History of the United States* (2 vols , 1930–32), his most important work, *A History of the United States* (with Samuel McKee, Jr , 1931), and *Lincoln and the Patronage* (with Reinhard H Luthin, 1943) He has also edited several works concerning early American agriculture, on which he is a leading authority—Jared Eliot's *Essays upon Field Husbandry in New England* (with Rexford G Tugwell, 1934), *American Husbandry* (1939), and *Jesse Buel, Agricultural Reformer. Selections from His Writings* (1947) Carman is editor, with Herbert J Lahne, of the "Labor in Twentieth Century America" series

Carman, town (pop 1,555) S Man , on the Boyne river and SW of Winnipeg It is the center of a farm area

Carmel, unincorporated resort village (pop 1,315), co seat of Putnam co , SE N Y , NE of Peekskill Daniel Drew, born in Carmel, founded Drew Seminary (for girls) here

Carmel, Mount [Heb ,=garden land], mountain, NW Israel It extends c 12 mi NW from the plain of Esdraelon to the Mediterranean Sea, where it ends in a promontory marking the southern limit of the Bay of Acre It is one of the most striking physical features of the country and was long an object of veneration In biblical times it was associated with the lives of the prophets Elijah and Elisha Isa 35 2, Amos 9 3, 1 Kings 18 From the mountainside vineyards comes the renowned Mt Carmel wine On its slopes are situated a Bahaist garden shrine with the tombs of Bab-ed-din and of Abdul Baha and a 19th-century Carmelite monastery

Carmel-by-the-Sea or **Carmel** (kärmĕl'), city (pop 2,837), S Calif , on Carmel Bay and S of Monterey, inc 1916 It is an art, literary, and recreation center. The bay was named in 1602 Mission San Carlos Borromeo, where Father Junípero Serra is buried, is near by

Carmelites (kär'mulīts), Roman Catholic order of mendicant friars They first appear as hermits on Mt Carmel, Palestine, they were apparently Europeans when their supervision was taken over (c 1150) by St Berthold In 1238 they moved to Cyprus, and thence to Western Europe St Simon Stock (d 1265), an Englishman, was their second founder, he transformed them into an order of friars resembling Dominicans and Franciscans and founded convents at Oxford, Cambridge, Paris, and Bologna They rapidly became prominent in university life An enclosed order of Carmelite nuns was established. The Carmelites, like other orders, decayed in the 15th cent They were revived by St THERESA (of Ávila) and St JOHN OF THE CROSS in 16th-century Spain These great contemplatives gave the order a special orientation toward mysticism. Their reformed branch is the Discalced (or Barefoot) Carmelites; it is now more numerous than the Carmelites of the Old Observance A famous modern Carmelite is St Theresa of Lisieux. In the United States there have been Carmelites since 1790, when Bishop Carroll sponsored a convent of nuns near Port Tobacco, Md , they moved to Baltimore in 1831 There are several communities of women Carmelite tertiaries in the Church Carmelites are called White Friars, the habit is brown with a white mantle. See E Allison Peers, *Spanish Mysticism* (1924), Titus Brandsma, *Carmelite Mysticism* (1936)

Carmona, Antonio Oscar de Fragoso (antô'nyô ôshkär' du frägô'sô karmô'nu), 1868–, Portuguese marshal and political leader He entered the army at 19 and won a reputation as an able soldier, rising to the rank of general When Gen Manuel de Oliveira Gomes da Costa led a successful revolution in 1926, Carmona was made foreign minister in the new government A little more than a month later he overthrew Gomes da Costa In Nov , 1926, he was elected interim president, in 1928 president He was reelected in 1935, 1942, and 1949 The regime he established was dictatorial, dominated after 1928 by Antonio de Oliveira SALAZAR

Carmona (kärmô'nä), city (pop 21,037), Seville prov , SW Spain, in Andalusia There are imposing ruins of an alcazar and a Moorish and a Renaissance city gate A Roman necropolis was discovered near by in 1881 Ferdinand III of Castile took Carmona from the Moors in 1247 It is now an agricultural center

Carnac (kärnäk'), village (pop 1,754), Morbihan dept , NW France, in Brittany, at the foot of the Quiberon peninsula It is the site of remarkable MEGALITHIC MONUMENTS, particularly MENHIRS The menhirs, some of them 20 ft high, extend along the coast in 11 parallel rows 1,100 yd long They probably antedate the DRUIDS, to whom they were formerly ascribed

Carnaim (kär'nāĭm), the same as ASHTEROTH KARNAIM

Carnarvon, George Edward Stanhope Molyneux Herbert, 5th **earl of** (kärnä'vŭn), 1866–1923, English Egyptologist His excavations in the Valley of the Kings with Howard Carter, from 1906 to 1922, resulted in the discovery of many important tombs of the XII and XVIII dynasties The final and most famous of the discoveries was the tomb of Tut-ankh-amen Lord Carnarvon died before it was thoroughly explored He was collaborator in the report *Five Years' Explorations at Thebes* (1912)

Carnarvon, Henry Howard Molyneux Herbert, 4th **earl of,** 1831–90, British statesman As colonial secretary (1866–67) under the earl of Derby he promoted the bill for confederation of the North American colonies and in the same office (1874–78) under Disraeli attempted federation in South Africa He was lord lieutenant of Ireland (1885–86) but resigned after a dispute with Parnell

Carnarvon, Wales see CAERNARVON

Carnatic (kärnă'tĭk), region, SE India, extending c 600 mi between the Eastern Ghats and the Malabar coast The earliest European settlements in India, those of Portugal, were established here During the 18th cent Great Britain defeated the French forces in the Carnatic after a long struggle

carnation, a species of PINK (*Dianthus caryophyllus*), in America cultivated in greenhouses and valued for the spicy fragrance of most kinds, in Europe it is grown as a garden flower In over 2,000 years of cultivation the carnation has given rise to about 2,000 varieties, all derived from the single-flowered, flesh-colored clove pink, known in Elizabethan times as the gillyflower and formerly added to wine and beer as a flavoring The double-flowered forms of carnation are the most common, with white and shades of red the prevailing colors The red carnation is the state flower of Ohio The American Carnation Society promotes cultivation of the plant

Carnavalet (kärnävälā'), municipal museum of Paris, housed in a mansion built by Bullant and by Goujon, who sculptured its beautiful façade Situated in the once fashionable Marais, the mansion was bought (1578) by a Breton named Kernevenoy, whose name was corrupted into Carnavalet It later was the home of Mme de Sévigné

Carneades (kärnē'ŭdēz), 213–129 B C , Greek philosopher, b Cyrene He studied at Athens under Diogenes the STOIC, but reacted from Stoicism and joined the ACADEMY, where he taught a skepticism similar to that of Pyrrho He held that truth is unattainable, for every proof demands another proof of the validity of the premises, and so we have an infinite regress Hence for the philosopher the proper attitude is suspense of judgment This being impossible in practice, we must act upon probability, of which he recognized three degrees, according to the extent to which an idea might be found congruent with all relevant experience

Carnegie, Andrew (kärnā'gē), 1835–1919, American industrialist and philanthropist, b Dunfermline, Scotland His father, a weaver, finding it increasingly difficult to get work in Scottish factories, brought (1848) his family to Allegheny (now Pittsburgh), Pa Andrew first worked in a cotton mill as a bobbin boy, then advanced himself as a telegrapher, and became (1859) a superintendent for the Pennsylvania RR He resigned (1865) his railroad position to give personal attention to the investments he had made (1864) in iron manufactures By 1873, recognizing America's need for steel, he concentrated on steel production He controlled firms which were later consolidated into the Carnegie Steel Company Carnegie's success was due in part to efficient business methods, to his able lieutenants, and to close alliances with railroads. Another factor was his partnership with Henry C FRICK The HOMESTEAD STRIKE of 1892 evidenced their uncompromising hostility to labor unions Carnegie further expanded his plants and consolidated his hold in the depression of 1893–97 By 1900 the Carnegie Steel Company was producing one quarter of all the steel in the United States and controlled iron mines, coke ovens, ore ships, and railroads It was in these circumstances that the U S Steel Corp was formed to buy Carnegie out He had long been willing to sell—at his own price—and in 1901 he transferred possession for $250,000,000 in bonds and retired from business He lived a large part of each year after 1887 in Scotland on his great estate on Dornoch Firth His essay "The Gospel of Wealth" (1889) set forth his idea that rich men are "trustees" of their wealth and should administer it for the good of the public His benefactions totaled about $350,000,000 Most of it was given for Carnegie Hall (1892) in New York city, the Carnegie Institution of Washington (1902), the Carnegie Hero Fund Commission (1904), the Carnegie Foundation for the Advancement of Teaching (1905), the Carnegie Endowment for International Peace (1910), and for over 2,800 libraries See his autobiography (1920), biography by Burton J Hendrick (1932), *A Manual of the Public Benefactions of Andrew Carnegie* (1919)

Carnegie, 1 (kär'nĭgē) Town (pop 1,740), SW Okla , on the Washita river and SW of Oklahoma City 2 (kärnā'gē) Industrial borough (pop 12,663), SW Pa , SW of Pittsburgh, inc 1894 A steel town, it also manufactures metal products, bedding, and beer The Neville House was the home of Gen John Neville, an officer in the French and Indian and Revolutionary wars The borough was named for Andrew Carnegie

Carnegie Corporation, established 1911 under the laws of New York state It was the chief depository of Andrew Carnegie's wealth, expected by him to continue his gifts after his death He gave it $125,000 000 outright and left it his residuary estate It spends only its income and is governed by a self-perpetuating board of 15 trustees, five of whom are presidents of other Carnegie foundations Until the Second World War the recipients of grants were chiefly educational institutions and libraries During the war large grants were made to the Red Cross and other agencies devoted to the welfare of the armed services See R M Lester, *Forty Years of Carnegie Giving* (1942)

Carnegie Endowment for International Peace, established 1910 by a gift of $10,000,000 from Andrew Carnegie Its purpose is to promote international peace It has financed international undertakings and the publication and distribution of books

Carnegie Foundation for the Advancement of Teaching, established 1905 by an endowment of $10,000,000 from Andrew Carnegie and chartered by Congress in 1906 An additional endowment of $17,000,000 was made subsequently The chief purpose of the foundation has been the establishment of retirement allowances for teachers in nonsectarian institutions of higher learning in the United States and Canada In 1913 Carnegie added a division for educational research

Carnegie Institute of Technology, at Pittsburgh, nonsectarian, partly coeducational, opened 1905 with funds from Andrew Carnegie, chartered 1912 It has colleges of fine arts (with architecture) and of engineering and science, Margaret Morrison Carnegie College (for women, includes social work), a library school (opened 1901 as part of Carnegie Library), and a division of general studies It had the first collegiate department of drama (opened 1914) and pioneered also in social relations courses for engineers There are coal and metals research laboratories

Carnegie Institution of Washington, D C , chartered 1902 and 1904, organized 1904, endowed by Andrew Carnegie and the Carnegie Corp to encourage investigation, research, and discovery Its projects directed by eminent scientists, include astronomy (with Mt Wilson Observatory), terrestrial and biological sciences, and historical research It has units at Baltimore, Boston, Cold Spring Harbor, N Y , and Stanford Univ., Calif

carnelian (kärnē'lyun) or **cornelian** (kôr-, kur-), variety of red CHALCEDONY, used as a gem It is distinguished from SARD by the shade of red, carnelian being bright red and sard brownish The red coloring is apparently caused by iron oxide

Carniola (kärnēō'lù), Croatian *Kranj* (kra'nyù), Ger. *Krain* (krīn), region, Slovenia, NW Yugoslavia, formerly an Austrian crownland (3,845 sq mi , 1910 pop 525,995) It is a mountainous and little productive area with an overwhelmingly Slovenian population Ljubljana is the chief city The march or margraviate of Carniola was established in the 10th cent and was later raised to a duchy It passed (13th cent) to Ottocar II of Bohemia, then to the Hapsburgs After the First World War it was divided between Italy and Yugoslavia, but the Italian part passed to Yugoslavia in 1947

Carnion (kär'nēōn), the same as ASHTEROTH KARNAIM

carnivorous plants. see BLADDERWORT, PITCHER PLANT, VENUS'S-FLYTRAP

Carnot, Hippolyte (ēpôlēt' kärnō'), 1801–88, French statesman, son of Lazare Carnot He shared his father's exile after 1815 and returned to France in 1823 Imbued with the teachings of Claude Henri de Saint-Simon, he took part in the radical agitation that led to the Revolution of 1848 and became minister of education in the provisional government In 1864 he entered the *corps législatif* and took part in the liberal opposition to Napoleon III, after whose downfall he became a member of the constituent assembly (1871) and then a senator for life

Carnot, Lazare Nicolas Marguerite (lazär' nēkôlä' märgurēt'), 1753–1823, French revolutionist, called the great Carnot A military engineer by training, Carnot became the military genius of the Revolution and was chiefly responsible for the success of the French in the FRENCH REVOLUTIONARY WARS A member of the Legislative Assembly, the Convention, and the Committee of Public Safety, he made himself almost indispensable through his military knowledge After the fall of Robespierre he managed to avoid punishment for his own part in the Terror and became a member of the DIRECTORY As a director he urged the appointment of Napoleon to command the army in Italy The coup d'état of 18 Fructidor (1797) caused Carnot to flee abroad He returned in 1799 and served as minister of war (1800) and in the Tribunate under Napoleon In the early years of the century he wrote several works on mathematics and military engineering, in 1810 appeared his masterpiece, *De la défense des places fortes*, long considered the classic work on fortification Carnot was the best-known advocate of the principle of active defense In the disastrous year of 1814 he returned to active service and conducted the defense of Antwerp In the Hundred Days he served as minister of the interior and after the second Restoration he was exiled See Huntley Dupre, *Lazare Carnot, Republican Patriot* (1940)

Carnot, Nicolas Léonard Sadi (nēkôlä' lāônär' sädē'), 1796-1832, French physicist, a founder of modern thermodynamics, son of Lazare N M Carnot His famous work on the motive power of heat (*Réflexions sur la puissance motrice du feu*, 1824) is concerned with the relation between heat and mechanical energy Carnot devised an ideal engine in which a gas is allowed to expand to do work, absorbing heat in the process, and is expanded again without transfer of heat but with a temperature drop The gas is then compressed, heat being given off, and finally it is returned to its original condition by another compression, accompanied by a rise in temperature This series of operations he termed a cycle (Carnot's cycle) He also proved that the cycle was reversible His work anticipated that of Joule, Kelvin, and others

Carnot, Sadi, 1837–94, French statesman, third president of the Third Republic (1887–94), son of Hippolyte Carnot Although he was minister of public works from 1880 to 1885 and of finance (1886), he was untainted by the financial scandals of the time His presidency was disturbed by the agitation for General Boulanger and by the Panama Canal scandal He was assassinated by an Italian anarchist

Caro, Annibale (än-nē'bälā ka'rō), 1507–66, Italian poet, friend of Cellini, Varchi, and Bembo He is best known for his translation of the *Aeneid* and for his sonnet on the death of Charles V, one of the finest of Italian poems A translation of it is given by Richard Garnett in *A History of Italian Literature* (1898).

Caro or Karo, Joseph ben Ephraim, 1488–1575, eminent Jewish codifier of law, b. Toledo, Spain, d Safed, Palestine His literary works rank among the masterpieces of rabbinical literature. Chief among them are *Bet Yosef* [house of Joseph] and *Shulhan Aruk* [the table set], parts of which are still used as the authoritative code for orthodox religious and legal disputes This code owes its fame and popularity as much to the opposition it aroused and the many commentaries it inspired as it does to its merits

Caro (kā'rō), village (pop 3,070), co seat of Tuscola co , S Mich , 8E of Bay City and on the Cass river; settled 1867, inc 1871 It is a farm trade center and produces beet sugar and canned goods

carob (kā'rub), leguminous evergreen tree (*Ceratonia siliqua*) native to Mediterranean regions but cultivated in other warm climates including Florida and California It is called also algaroba and St -John's-bread, the latter from the belief that it may have been the "locust" eaten by John the Baptist in the wilderness (Mark 1 6) The large red pods have been used for food for animal and man since prehistoric times It has been claimed that the seeds were the original of the carat, weight of measure for precious jewels and metals

Carol I, 1839–1914, prince (1866–81) and first king (1881–1914) of Rumania, of the house of Hohenzollern-Sigmaringen He is also called Charles I After service as a Prussian officer, he was elected to succeed the deposed Alexander John Cuza as prince of Rumania He reformed the Rumanian constitution and, siding with Russia in the war of 1877–78 against Turkey, obtained at the Congress of Berlin (see BERLIN, CONGRESS OF) full independence for Rumania, which he declared a kingdom in 1881 Exploitation of Rumanian oil fields began in his reign In 1869 Carol married Princess ELIZABETH of Wied He was succeeded by his nephew, Ferdinand

Carol II, 1893–, king of Rumania, son of King Ferdinand. While crown prince, he contracted a morganatic marriage with Mme Zizi Labrino but divorced her to marry (1921) Princess Helen of Greece He soon formed a liaison with Mme Magda LUPESCU, with whom he lived in Paris after being forced (1925) to renounce his right of succession Thus, on the death (1927) of King Ferdinand, Carol's son MICHAEL became king, but Carol, having divorced Queen Helen in 1928, returned to Rumania in 1930, supplanted his son, and had himself proclaimed king *de jure* since 1927 A turbulent period began (see RUMANIA) In 1938, when Carol did not get the results he desired from elections, he constituted a royal dictatorship on the basis of an oral and hasty plebiscite A contest between the king and the Fascist Iron Guard was then fought out by assassinations and massacres on both sides Forced at last to call on Ion ANTONESCU to form a government (1940), Carol was deposed and fled abroad with Mme Lupescu Michael once more became king In 1947, in Brazil, Carol married Mme Lupescu He is sometimes called Charles II

carol, popular hymn, of joyful nature, in celebration of an occasion such as May Day, Easter, or especially Christmas The earliest date from the 15th cent Carols exist in all Christian nations, many may be from pagan sources Despite the folk-song character of true carols, many Christmas hymns composed in the 19th cent have been called carols The oldest printed carol is the *Boar's Head Carol*, printed in 1521 by Wynkyn de Worde Carols of French origin are called also noels See Edmonstoune Duncan, *The Story of the Carol* (1911), Percy Dearmer, Ralph Vaughan Williams, and Martin Shaw, *The Oxford Book of Carols* (1928), R L Greene, *The Early English Carols* (1936)

Carolan, Turlough see O'CAROLAN, TURLOUGH

Carolina, North and South see NORTH CAROLINA and SOUTH CAROLINA

Carolina campaign, 1780–81, of the American Revolution After Sir Henry Clinton had captured CHARLESTON, he returned to New York, leaving a British force under Cornwallis to subordinate the Carolinas to British control Cornwallis swept north and capped his success in the battle of Camden on Aug 16, 1780 The American force was completely routed, the gallant Baron de Kalb was mortally wounded, and the American commander, Horatio Gates, fled from the field, outdistancing officers and men in retreat Patriot defense was broken in the Carolinas, where only the swift and secretly moving guerrilla bands of Francis Marion, Thomas Sumter, and Andrew Pickens harassed the invaders The American cause spurted upward, however, with the remarkable battle of Kings Mt (Oct 7, 1780), where bands of frontier riflemen under Isaac Shelby, John Sevier, and William Campbell surrounded a British raiding party under Patrick Ferguson, the British commander fell, and his men surrendered This victory prefaced the campaign fought in North Carolina by Gen Nathanael Greene (who had been appointed to succeed Gates) and his lieutenants, notably Light-Horse Harry Lee and Daniel Morgan It was Morgan who at the head of a raiding party met and all but annihilated Cornwallis's raiders under Banastre Tarleton at Cowpens (Jan 17, 1781) Cornwallis pushed north and at Guilford Courthouse (March 15, 1781) won over Greene a Pyrrhic victory, the British had technically won but had to retreat to British-held Wilmington, N C , and then to Virginia Greene then joined the guerrilla leaders in freeing South Carolina Again the Americans were defeated—by Lord Rawdon at Hobkirks Hill (April 25, 1781) and by Col Alexander Stewart at Eutaw Springs (Sept 8, 1781)—and again the British had to retreat, returning to Charleston The campaign was a British failure and was the more a triumph for the patriots because it set the stage for the YORKTOWN CAMPAIGN

Carolina jasmine: see JASMINE.

Caroline, Fort, settlement near the mouth of the St Johns river, Fla., established by French Huguenots under René de LANDONNIÈRE in 1564 On Sept 21, 1565, Pedro MENÉNDEZ DE AVILÉS attacked the fort and killed most of the colonists This slaughter and Menéndes's subsequent massacre of Jean RIBAUT and his men was avenged in 1568 by Dominique de GOURGUES, who wiped out the garrison of San Mateo (as the Spanish had renamed Fort Caroline)

Caroline Affair. In 1837 a group of men led by William Lyon MACKENZIE broke into rebellion in Upper Canada (now Ontario), demanding a more democratic government There was much sympathy for their cause in the United States, and a small steamer, the *Caroline*, owned by U S citizens, carried men and supplies from the U S side of the Niagara river to the Canadian rebels on Naval Island just above Niagara Falls On the night of Dec 29, 1837, a small group of British and Canadians loyal to the Upper Canadian government crossed the river to the U S side where the *Caroline* was moored, loosed her, set fire to her, and sent her over the falls One American was killed in the incident Americans on the border were filled with intense anti-British feeling, and soldiers under Gen Winfield Scott were rushed to the scene to prevent violent American action The affair passed over, though it had an aftermath, when one of the men who had taken part in the attack boasted of that fact when he was in the United States and was arrested as a criminal That matter, too, was smoothed over, but the Caroline Affair and the Aroostook War helped to make relations with Great Britain very tense in the years before the Webster-Ashburton Treaty

Caroline Islands, group (525 sq mi , pop 35,190), W Pacific, 2,500 mi SW of Honolulu, included in 1947 in the U S Trust Territory of the Pacific Islands under United Nations trusteeship The group comprises two single volcanic islands (Kusaie and PONAPE), three major island groups (PALAU, TRUK, and YAP), some 30 atolls, and numerous islets The islands are fertile and produce coconuts, sugar cane, and tapioca There are deposits of phosphate, bauxite, and iron The chief exports are dried bonito, copra, and tapioca Most of the natives are Micronesians, and a few are Polynesians Discovered by Spaniards in 1526, the islands were under Spanish rule from 1886 to 1899, when they were sold to Germany In 1914 they were occupied by the Japanese, who in 1922 were given a mandate over them Japan claimed sovereignty over the group in 1935 In the Second World War the large naval and air bases on Palau, Truk, and Yap were heavily bombed by U S forces, but Palau and ULITHI, taken in 1944, were the only strongholds to be invaded

Caroline of Anspach (ans'pak), 1683–1737, queen consort of George II of England, daughter of the margrave of Brandenburg-Ansbach She married George in 1705 while he was electoral prince of Hanover and bore him three sons and five daughters After his accession she gave active support to Robert Walpole Her influence over the king lasted until her death See biographies by R L Arkell (1939) and Peter Quennell (1940)

Caroline of Brunswick, 1768–1821, consort of GEORGE IV of England She was the daughter of Charles William Ferdinand, duke of Brunswick, and her marriage to George (then prince of Wales) in 1795 forced him to put away Mrs Fitzherbert, his first wife and a commoner The princess bore him one daughter (Charlotte, 1796–1818), but the couple separated in 1796, and Caroline, deprived of her child, lived in retirement for several years and spent some years abroad Reports to her discredit occasioned a commission of inquiry (1806), which found her innocent but imprudent On the accession of George IV (1820) she refused to abdicate her rights as queen, and the government instituted proceedings against her in the House of Lords for divorce on the grounds of adultery Though she was frivolous and unstable, her persecution by a profligate husband aroused popular sympathy for her, and the bill was dropped See biographies by E A Parry (1930) and H S Coxe (1939), W D Bowman, *The Divorce Case of Queen Caroline* (1930).

Carolingians (kărulĭn'jĭnz), dynasty of Frankish rulers, founded in the 7th cent by PEPIN OF LANDEN, who, as mayor of the palace, ruled Austrasia for Dagobert I His descendants, PEPIN OF HÉRISTAL, CHARLES MARTEL, CARLOMAN, and PEPIN THE SHORT, continued to govern the territories united under the nominal kingship of the MEROVINGIANS In 751 Pepin the Short deposed Childeric III and became sole Frankish king The family was at its height when represented by Pepin's son, CHARLEMAGNE, who was crowned emperor in 800 His empire was divided by the Treaty of Verdun (843) after the death of his son, Emperor LOUIS I, among Louis's three sons LOTHAIR I inherited the imperial title and the middle part of the empire LOUIS THE GERMAN founded a dynasty that ruled in Germany till 911, his successors being CHARLES III (Charles the Fat), ARNULF, and LOUIS THE CHILD. Louis's third son, CHARLES II (Charles

the Bald), founded the French Carolingian dynasty, which ruled, with interruptions, till 987. Rulers were LOUIS II (Louis the Stammerer), LOUIS III, CARLOMAN, CHARLES III (Charles the Simple), LOUIS IV (Louis d'Outremer), LOTHAIR, and LOUIS V. See F. Funck-Brentano, *Earliest Times* (Vol I of *National History of France*)

Carolus-Duran (kärôlüs'-dürä'), whose real name was **Charles Auguste Émile Durand** (shärl' ôgüst' āmēl' dürā'), 1838?–1917, French portrait and genre painter, b Lille He studied in Lille and Paris and in 1861 won a pension and traveled in Italy and Spain His first great success was *The Assassinated* (Lille), but he is best known for his portraits His *Lady with the Glove* (Luxembourg Mus, Paris) is an excellent example of his portraiture Carolus-Duran was the teacher of many famous painters. He became director of the Académie de France à Rome in 1905

Carondelet, Francisco Luis Hector, barón de (kurôndulēt', Span fränthē'skō lwēs' ĕktôr bärōn' dā kärôndālāt'), c 1748–1807, governor of Louisiana and West Florida (1791–97), b Noyelles, Flanders He married into the Las Casas family, prominent in Spanish colonial affairs He came to New Orleans from the governorship of Salvador and was unfortunately not well informed as to Louisiana problems Rumors of American hostility were given too great weight, and Carondelet became convinced in 1792 that the Americans were planning to invade Louisiana With unwarranted aggressiveness, he stirred up the Indians of the Southwest, concluding an alliance with the four great tribes and establishing Spanish posts in their territory He revived intrigues with Kentucky frontiersmen looking toward the establishment of an independent state in the West Relations between Spain and the United States were severely taxed After Carondelet was replaced by Manuel GAYOSO DE LEMOS, he was made president of the *audiencia* and governor general of Quito See A P Whitaker, *The Spanish-American Frontier, 1783–1795* (1927)

Carossa, Hans (hans' kärô'sä), 1878–, German poet and novelist The grace and clarity of his style make delightful reading in his autobiographical *Childhood* (1922, Eng tr, 1930), its sequel *Boyhood and Youth* (1928, Eng tr, 1930), and *A Roumanian Diary* (1924, Eng tr, 1929) His novel *Doctor Gion* (1931, Eng tr, 1933) studies some post-war lives His collected poems (*Gesammelte Gedichte*, 1938) are also of high quality

Caroto or **Carotto, Giovanni Francesco** (jōvan'nē frānchās'kō kärō'tō, karōt'tō), c 1480–c 1555, Italian painter of the Veronese school, pupil of Liberale da Verona and of Mantegna in Mantua He was a skillful imitator of the works of Leonardo da Vinci, Raphael, and Mantegna Among his best works in Verona are the frescoes *History of Tobias* (Santa Eufemia), the altarpiece *Virgin with St Anne and Saints* (San Fermo Maggiore), and *St Ursula* (San Giorgio in Braida) Other examples are in the Uffizi and Pitti galleries and in the Castello, Milan His brother **Giovanni Caroto,** 1488–c 1555, with whom he is sometimes confused, was a painter and architect

carp, hardy fresh-water fish native to Asia and introduced into Europe and America The common American carp (*Cyprinus carpio*) is the European carp, of which many variations in color and form have developed There are four barbels around the mouth, and the thick-scaled body is dark greenish or brown, sometimes yellowish or silvery, with red on some of the fins Carp reach more than 3 ft in length and 25 lb in weight They feed chiefly on aquatic plants but also on insects and other small animals A large female (15 to 20 lb) may produce 2,000,000 eggs In Europe, where the carp is more valued as food than in America, it is bred and raised in ponds In America it sometimes becomes a pest by destroying vegetation and stirring up the mud, making the water unsuitable for native game fish

Carpaccio, Vittore (vēt-tō'rā karpät'chō), c 1450–c 1522, Venetian painter, pupil of Lazaro Bastiani and follower of Giovanni Bellini His fanciful, narrative paintings reflect the pageantry of 15th-century Venice They are notable for their rich color, luminosity, and wealth of detail Among the best are the series of nine paintings of the life of St Ursula, the *Presentation in the Temple*, and the St George series (Venice Acad), four paintings of the life of St Stephen (Milan Mus and Louvre), *Supper at Emmaus* (Church of St Salvatore, Venice), *Meditation on the Passion* (Metropolitan Mus), *A Lady Reading* (National Gall of Art, Washington, D C) See biography by P G Molmenti and Gustave Ludwig (Eng tr, 1907)

Carpathian Russia see RUTHENIA.

Carpathians (kärpā'thēünz) or **Carpathian Mountains,** chain of Central Europe, forming an arc, c 900 mi long, which encloses the Danubian plain in the north and the east The foothills (Little Carpathians and White Carpathians) rise in Slovakia, N of the Danube at Bratislava, and extend northeast to the Polish-Czechoslovak border The Northern Carpathians, comprising the BESKIDS and the TATRA, run east along the Polish-Czechoslovak frontier and southeast through RUTHENIA; in Rumania and TRANSYLVANIA they are continued by the Southern Carpathians The Transylvanian Alps prolong the chain, extending SE to the Danube at the Iron Gate The highest peaks are the Stalin Peak (8,735 ft.) in the Tatra and Mt Negoiul (8,346 ft) in the Transylvanian Alps Heavily wooded, the Carpathians are rich in minerals and mineral spas

Carpathian Ukraine see RUTHENIA

Carpathus: see KARPATHOS

Carpeaux, Jean Baptiste (shā' batēst' kärpō'), 1827–75, French sculptor, son of a mason He studied with François Rude, won the PRIX DE ROME, and rose to fame with his *Ugolino* (Tuileries), done in Italy under the inspiration of Michelangelo A favorite of the Second Empire, he received many commissions Best known is *The Dance* on the façade of the Opéra, Paris His *Neapolitan Shell-Fisher* and his portrait busts of Napoleon III, Dumas fils, Gérôme, and Empress Eugenie are in the Louvre The work of Carpeaux has freedom, grace, and a quivering life and movement which save it from the banality of his period

Carpentaria, Gulf of (karpuntā'rēu), arm of the Arafura Sea, indenting the north coast of Australia, between Arnhem Land peninsula and Cape York Peninsula It has an average length of 350 mi

Carpenter, Edward, 1844–1929, English author, educated at Cambridge In 1869 he was ordained, but renounced all religion in 1874 He called himself a Fabian socialist for the rest of his life and lectured, traveled, and lived among the working people of English industrial cities A friendly, unconventional man, he attracted many admirers Among his works on social reform are *Towards Democracy* (1883–1902), a long unrhymed poem revealing the influence of his friend Walt Whitman, *England's Ideal* (1887), *Civilization Its Cause and Cure* (1889), and *Love's Coming of Age* (1896) See the autobiographical *My Days and Dreams* (1916), study by Tom Swan (1929 ed), *Edward Carpenter in Appreciation* (ed by Gilbert Beith, 1931)

Carpenter, Francis Bicknell, 1830–1900, American portrait painter, b Homer, N Y He painted portraits of Presidents Fillmore, Pierce, and Lincoln and of Horace Greeley Carpenter lived at the White House while he painted *The Emancipation Proclamation* (Capitol, Washington, D C) See his *Six Months at the White House* (1866)

Carpenter, George Rice, 1864–1909, American educator, b Labrador, grad Harvard, 1886 After study abroad, he returned to teach at Harvard (1888–90) and Massachusetts Institute of Technology (1890–93) From 1893 he was professor of rhetoric at Columbia Univ He wrote a number of textbooks on literature and rhetoric and biographies of Longfellow, Whittier, and Walt Whitman

Carpenter, John Alden, 1876–, American composer, b Park Ridge, Ill, pupil of J K Paine at Harvard and of Elgar His music, refined and skillfully written, influenced by French impressionism, often depicts the spirit and the scenes of American life, in such works as the orchestral suite *Adventures in a Perambulator* (1914) and the ballets *Krazy Kat* (Chicago, 1921) and *Skyscrapers* (New York, 1926) A Spanish flavor and jazz, frequently elements in his music, are both found in *Patterns* (1932) for orchestra Other important compositions are his ballet *The Birthday of the Infanta* (Chicago, 1919), a violin concerto (1937), a concertino for piano and orchestra (1915), as well as songs, symphonies, and chamber music

Carpenter, Mary, 1807–77, English educator She devoted her life to the establishment of schools and institutions and the promotion of educational reforms In 1835 she organized the Working and Visiting Society, in 1846 opened a "ragged school," and in 1852 founded a juvenile reformatory (see her *Juvenile Delinquents Their Condition and Treatment*, 1852) Her agitation for reformatory and industrial schools contributed to the passage of the Youthful Offenders Act (1854) and of the Industrial Schools Act (1857) and furthered the movement for free day schools She made four visits to India after 1866, interesting herself in Indian education, and also lectured in the United States See J E Carpenter, *The Life and Works of Mary Carpenter* (1879)

carpenter's square see SQUARE, STEEL

Carpentersville, village (pop 1,289), NE Ill, on the Fox river and NW of Chicago, settled 1834, platted 1851, inc 1887 Iron products are made here

Carpentras (kärpätrās'), town (pop 11,044), Vaucluse dept, SE France, NE of Avignon. It was an episcopal see from the third cent until the French Revolution and the capital of the Comtat VENAISSIN from 1229 until 1791 At Carpentras met the long conclave which elected Pope JOHN XXII

carpentry, the trade concerned with constructing either a wood building or the wooden portions of any building It comprises the larger and more structural aspects of woodwork, rather than the delicate assembling which is the field of cabinetmaking and joinery The craft dates from the earliest use of tools Though no actual examples of carpentry survive from antiquity, many remains of the earliest known stone architecture exhibit forms which are undoubtedly imitative of still earlier constructions in wood This is especially apparent in most Asiatic architecture, and certain details of Greek temples are suggestive of carpentry prototypes Some monumental wood buildings of the 7th cent. still stand in Japan, a country where intricate and beautiful carpentry has prevailed throughout its history In the United States, expert carpentry has existed ever since the construction of dwellings by the colonists in the first half of the 17th century Rough carpentry refers to the "framing" of a wood building, namely, the erection of the structural frame or skeleton composed of the vertical members or studs, the horizontal members of foundation sills, floor joists, and the like, the inclined members or rafters for the roof, and the diagonal members for bracing Finished carpentry is the setting in place, over the rough frame, of all finishing members both of exterior and interior, such as sheathing, siding, stairs, the casings of doors and windows, flooring, wainscoting, and trim In the United States the two traditional types of house framing, frequently combined into one, are the braced frame and balloon frame The latter, which is the most used, employs continuous vertical studs running from the foundation to the roof plate, is assembled entirely with nails, and can be erected rapidly The braced frame is the older method In it the studs are only one story in height, the corners are braced everywhere, and the fitting together is done by mortising and pinning, after which whole sections are raised into place See also CENTERING See Gilbert Townsend, *Carpentry* (2d ed, 1945)

carpet and rugs, thick fabrics, usually woolen, mainly for floor coverings They were formerly woven to protect the body from cold, to spread on a dais or before a seat of honor, to cover a table, couch, or wall, or to form the curtains of a tent All carpet divides into two classes—handmade and machine made There is considerable evidence of the existence of hand-woven carpets in antiquity On the rock tombs of Beni Hassan, Egypt, of c 2500 B C, men are depicted with the implements of rug weaving Other evidence of the early use of rugs is seen in the drawings on the ancient palace walls of Nineveh In that mountainous region of the East stretching from Turkey through Persia and central Asia into China where the fleece of the sheep and the hair of the camel and goat grow long and fine, the art of carpet weaving reached its height early in the 16th cent The Oriental artist works on a rude hand loom consisting essentially of two horizontal beams on which the warp is stretched, on the lower one the finished carpet is rolled, while the warp unrolls from the upper one The yarn for the pile, spun and dyed by hand, is cut in lengths of about 2 in and is knotted about the warp threads, one tuft at a time, after one of the two established ways of tying called the Ghiordes, or Turkish, knot and the Senna, or Persian, knot When a row of knots has been placed across the width of the loom, two or more weft threads of cotton or flax are woven in and beaten into place with a heavy beater or comb The tufts or pile thus appears only on the face of the fabric, which when completed is sheared to perfect smoothness The wool of the sheep, the camel, and the goat was used in the weaving of Oriental rugs, but at least half the warps and wefts and a very large percentage of the pile were of sheep's wool Beautiful silk rugs interwoven with gold thread were made in the 16th and 17th cent The quality of the carpet depends on the materials used and the number of knots to the square inch of surface, which may vary from 40 to 1,000 In America the Navahos and other Indian tribes have for generations produced substantial rugs, without pile, woven somewhat in the manner of TAPESTRY on primitive hand looms In the palaces of Montezuma were found remarkable floor coverings which utilized the plumage of birds The primitive use of rushes or straw has survived in the form of Chinese and Japanese mattings In 1608 King Henry IV of France established weavers in the Louvre In 1631 an old soap works, the Savonnerie, near Paris, was converted to carpet weaving, and its name remains attached to one of the finest handmade carpets now made at the Gobelin works Tapestries for walls and floors were made at Aubusson at an early date In 1685 the revocation of the Edict of Nantes scattered skilled carpetmakers (mostly Protestants) over Europe Centers of weaving were established in England, first at Kidderminster (1735), then at Wilton and Axminster Cheaper, more easily manufactured floor covering soon came into demand, and the making of ingrain began at Kidderminster The weavers of Flanders had made a loom which produced a pile by looping the worsted warp threads, and this loom, although guarded, was copied by a Kidderminster weaver, soon many looms in England were making Brussels carpet Axminster was England's headquarters for imitation Oriental or tufted-pile carpet Up to 1839 all carpets were made on hand looms with such devices and improvements as could be operated by hand or foot power, then Erastus Bigelow's power loom

(first used in 1841) revolutionized the industry and made the carpet a commodity for the many instead of the few. A few distinctive types include all carpets both antique and modern—Oriental, European hand-woven, Brussels, Wilton, velvet, Axminster, chenille, ingrain, rag, hooked, straw, fiber To the first class belong not only the genuine antique Orientals now rare, but also the modern reproductions These are dyed with aniline instead of vegetable dyes, much of the yarn being spun and dyed in Europe and shipped to the East to be woven Many are washed in chlorine solutions to give an effect of age or in glycerine to simulate the luster of fine wool Commercial methods have somewhat standardized and debased the characteristic ancient patterns, but the modern Orientals are commercially important Some of the traditional beauties still remain—the deep, rich color and intricate patterns of Persia, the brighter hues and conventionalized figures of Asiatic Turkey, the naïve designs and primitive colorings of Turkistan and the Caucasus, and the symbolic ornament of China European hand-woven carpets, both Aubussons (tapestry) and Savonneries (pile), are now made in the major Western countries, mostly to special order Modern commercial carpets are woven on complex and highly specialized machines, a development from Bigelow's power loom Brussels carpet has a warp and weft of linen, with a pile of worsted yarn drawn into loops by means of wires It is called 3, 4, or 5 "frame" depending on the number of bobbins carrying different colored warp threads, which make the pattern Tapestry Brussels is a cheap single-frame sort, either yarn printed or piece printed Wilton is made on the same principle, except that the loops which form the pile are cut as they are woven into place Velvet is an equivalent of tapestry Brussels with the pile cut Axminster (formerly called moquette), similar in effect to Oriental, uses unlimited colors in design made on machines which loop the tufts, one color at a time, and then interlock the weft about them Chenille, or chenille Axminster, is made in two stages, first the chenille thread or "fur" is made and then is folded and ironed so that the woolen fibers are like a fringe along a cotton or linen chain This "fur" is then woven into a strong backing of linen with the nap on the surface Chenille has a pile often ⅝ of an inch deep and woven up to 30 ft in width Ingrain, no longer widely used, is a plain-weave fabric, of two- or three-ply woolen weft on a concealed cotton warp Rag carpet, first made on household looms, of used rags sewn together for warp, became commercially important in the last years of the 19th cent Hooked rugs are made of narrow strips of woolen cloth drawn by a pointed hook through a canvas foundation on which a design is indicated Carpetmaking began in the United States in the colonial period The first important factory was started at Philadelphia in 1791 In 1804 another was opened at Worcester, Mass, followed by others in New York and New Jersey See G Griffin Lewis, *The Practical Book of Oriental Rugs* (1920), W A Hawley, *Oriental Rugs, Antique and Modern* (1913), M P Taylor, *How to Make Hooked Rugs* (1930), A M Hicks, *The Craft of Handmade Rugs* (1936)

carpetbaggers, epithet used in the South after the Civil War to describe the Northern adventurers who flocked to the South to make money and seize political power in the RECONSTRUCTION period A few of them were substantial citizens bent on settling in the community, but most were men of the unstable future symbolized by the carpetbags in which they carried their possessions They came as agents of the FREEDMEN'S BUREAU and other Reconstruction organizations, or they individually sought speculative and commercial openings. After the disenfranchisement of the ex-Confederates, the carpetbaggers, in collusion with their Southern counterparts, the scalawags, dominated the Republican state governments through their control of the Negro vote Their record of large-scale, open-faced political corruption has rarely been equaled in U S history

Carpini, Giovanni de Piano (jōvän'nē dā pyä'nō kärpē'nē), 13th cent, Italian traveler and Franciscan monk In 1245 he was sent by Pope Innocent IV to the court of the great khan of Tartary. With a Pole, Friar Benedict, as interpreter he started from Lyons, went to Kiev, then across the Dnieper to the Don and the Volga and across central Asia to Karakorum in Mongolia; a journey of c 3,000 mi was accomplished on horseback in about 100 days The importance of Carpini's journey lies in the information he brought of the countries and peoples visited His account is known as *Liber Tartarorum* See C R Beazley, ed., *The Texts and Versions of John de Plano Carpini and William de Rubruquis* (1903)

Carpinteria (kär'pĭntûrē'ù), unincorporated town (pop 1,389), S Calif, on the coast E of Santa Barbara It was established in 1863, on the site of an Indian village visited by Gaspar de Portolá in 1769 It is in a lemon-producing area.

Carpocrates (kärpŏk'rùtēz), fl. c.130–c 150, Alexandrian philosopher, founder with his son Epiphanes of a Hellenistic sect related to Gnosticism. Epiphanes wrote a treatise, *On Justice*, which advocated communal ownership of property, including women, he died, aged 17, at Cephalonia and was long worshiped as a deity there The Carpocratians believed that men had formerly been united with the Absolute, had been corrupted, and would, by despising creation, be saved in this life or else later through successive transmigrations Jesus, they held, was but one of several wise men who had achieved deliverance The sect was notoriously immoral

Carpus [Gr, =fruit], man of Troas 2 Tim 4 13.

Carr, Emma Perry, 1880–, American chemist, b Holmes co, Ohio, grad Univ of Chicago (B.S, 1905) She taught chemistry at Mt. Holyoke from 1905 to 1946 (as professor from 1913) She has made significant absorption-spectra studies on the structure of organic molecules, especially of the hydrocarbons, and studies of the energy relationships of the hydrocarbons

Carr, Eugene Asa, 1830–1910, American general, b Concord, Erie co, N Y, grad West Point, 1850 In the Civil War he distinguished himself at Wilson Creek (1861) and Pea Ridge (1862), was made (March, 1862) a brigadier general of volunteers, and fought in the campaigns against Vicksburg (1863) and Mobile (1865) After the war Carr was a well-known cavalry leader and Indian fighter in the West Promoted brigadier general in 1892, he was retired in 1893

Carr, Robert see SOMERSET, ROBERT CARR, EARL OF

Carrabelle, city (pop 1,019), NW Fla, on the Gulf coast and SSW of Tallahassee It is a port of entry and a resort and fishing center, shipping shrimp, oysters, and fish

Carracci or **Caracci** (kärät'chē), family of Italian painters of the Bolognese school, founders of the Eclectic school of painting **Lodovico Carracci** (lōdōvē'kō), 1555–1619, a pupil of Tintoretto in Venice, was influenced by Correggio and Titian He studied also in Bologna, Padua, and Parma With his nephews, Agostino and Annibale, and with Anthony de la Tour he established in Bologna an academy of painting which sought to unite in one system the preeminent characteristics of each of the great masters The Eclectic school rapidly became one of the outstanding schools in Italy, Lodovico remaining at its head until his death Its noted pupils include Guido Reni, Francesco Albani, and Domenichino Excelling as a teacher, Lodovico was also a painter of talent and energy Excellent examples of his art abound in the churches of Bologna and elsewhere Among the best are *Sermon of John the Baptist* (Pinacoteca, Bologna) and *Vision of St Hyacinth* (Louvre) His nephew **Agostino Carracci** (ägōstē'nō), 1557–1602, left the goldsmith's trade and studied painting with Prospero Fontana and engraving, in which he excelled and to which he devoted most of his time, with Domenico Tibaldi and Cornelis Cort After several years' study in Parma and Venice, he joined his uncle and his brother in the founding of the Eclectic school and in the execution of numerous joint painting commissions In 1600 he went to Rome and collaborated with Annibale in the decorating of the gallery of the Farnese Palace, Agostino painting the admirable frescoes *Triumph of Galatea* and *Rape of Cephalus* (cartoons in the National Gall London) He died in Parma just after completing his great work, *Celestial, Terrestrial, and Venal Love*, in the Casino Other notable examples of his art are *The Last Communion of St Jerome* (Pinacoteca, Bologna), *Adulteress before Christ*, and the masterly engraving of Tintoretto's *Crucifixion* His brother **Annibale Carracci** (an-nē'bälā), 1560–1609, a pupil of his uncle, Lodovico Carracci, was a painter of unusual skill and versatility He spent seven years studying the works of the masters, particularly those of Correggio and Parmigiano, in Venice and Parma Returning to Bologna, he aided in the conducting of the Eclectic school until 1600, when he went to Rome to assist in the decorating of the Farnese gallery Among his paintings there are *Juno before Jupiter*, *The Triumph of Bacchus*, and *Diana and Endymion*, which show his fine technique and color Well known among his numerous works are *Christ and the Woman of Samaria* (Brera, Milan), *The Dead Christ* (Louvre), and *The Temptation of St Anthony* (National Gall, London).

carrageen see IRISH MOSS

Carrantuohill (kä'runtōō'ul), mountain, 3,414 ft high, Co. Kerry, Ireland, in Macgillicuddy's Reeks; highest peak in Ireland

Carranza, Venustiano (kürän'zù, Span. vānōōstyä'nō kärän'sä), 1859–1920, Mexican statesman. He supported Francisco I MADERO in the revolution against Porfirio DÍAZ (1911). When Victoriano HUERTA overthrew (1913) Madero, Carranza promptly took the field against Huerta He was joined by other revolutionists in the north, notably Francisco VILLA and Álvaro OBREGÓN; in the south the revolt was led by Emiliano ZAPATA Soon the entire country was aflame. The United States and A.B.C. Powers attempted to bring order to Mexico, but Carranza refused mediation. Huerta was forced to resign (July, 1914), and Carranza took over the executive power (Aug., 1914). Chaos now took hold of the nation. Obregón and Villa fell out Villa and Zapata refused to recognize Carranza, and Zapata forced (Nov., 1914) Carranza to retire to Veracruz. Zapata and Villa were driven (Jan., 1915) from Mexico city by Carranza's ally, Obregón, but Zapata again held (March–July, 1915) the capital until forced out by Carranza and again occupied it later (July–Aug., 1915). The United States recognized the Carranza regime in Oct, 1915 The Villa raids caused Wilson to send a punitive expedition into Mexico, much friction between the two governments resulted Carranza's hostility to the United States was apparent in Mexico's sympathy toward Germany in the First World War The dominant feature in internal affairs was the reform program enunciated by Carranza in Dec, 1914, and embodied in the constitution of 1917 The provision affirming national ownership of subsoil deposits (affecting oil and mineral holdings) and that restoring the EJIDO (affecting landowners) were fruitful of trouble with the United States and other powers Ecclesiastical reforms brought Church and government into conflict The labor provisions theoretically marked a radical advance; actually, Carranza repressed labor reforms The constitution was never really in force, and there was little pretense of democratic control. In 1920, when Carranza attempted to prevent Obregón from succeeding as president, Obregón revolted Carranza was defeated and was murdered.

Carranza de Miranda, Bartolomé de (bärtōlōmä' dā kärän'thā dā mērän'dä), 1503–76, Spanish churchman He joined the Dominicans (1520) and taught at Valladolid. He was investigated by the Spanish Inquisition c 1530, but he was later its censor In 1540 he declined episcopal honors He was active in the first part of the Council of Trent, where he distinguished himself for his vigorous support of the rule that bishops must be resident in their sees In 1554 Philip II of Spain sent him to England to aid in the restoration of Catholicism In 1558 he was made archbishop of Toledo (primate of Spain), the same year he attended the dying Charles V His commentary on the catechism appeared in 1558, and it was apparently from passages in this that he was accused of heresy He was arrested in 1558 (with King Philip's permission), his case dragged on in Spain until 1564, when the archbishop appealed to Rome, where there was more delay At length, in 1576, he was found not guilty of heresy but was compelled to abjure certain propositions

Carrara (kurä'ru, Ital kär-rä'rä), city (pop. 25,259), Tuscany, central Italy, 4 mi from the Ligurian Sea It is the center of the Italian marble industry The famous Carrara MARBLE is quarried in the near-by Alpi Apuane There are over 400 quarries, and one third of the population is occupied in the industry With MASSA, the city constituted the duchy of Massa and Carrara Carrara has a fine 12th-century cathedral, the former ducal palace now houses the Fine Arts Academy.

Carrboro (kär'buru), textile-mill town (pop 1,455), central N C, just W of Chapel Hill

Carrel, Alexis (kä'rul), 1873–1944, American surgeon and experimental biologist, b near Lyons, France, M D Univ of Lyons, 1900 Coming to the United States in 1905, he joined the staff of the Rockefeller Institute in 1906 and served as a member from 1912 to 1939 For his work in suturing blood vessels, in transfusion, and in transplantation of organs, he received the 1912 Nobel Prize in Physiology and Medicine In the First World War he developed with Dakin a method of treating wounds by irrigation with a sodium hypochlorite solution With Charles A Lindbergh he invented an artificial, or mechanical, heart—a sterile glass chamber through which is pumped a fluid containing food materials and oxygen—by means of which he kept alive a number of different kinds of tissue and organs He kept alive for 32 years bits of tissue from a chicken's heart In 1939 he returned to France He wrote *Man the Unknown* (1935) and, with Lindbergh, *The Culture of Organs* (1938)

Carreño, Teresa (tārā'sä kärä'nyō), 1853–1917, Venezuelan pianist, pupil of L M Gottschalk and Anton Rubinstein Her debut was made in New York in 1862 She appeared as an opera singer for a brief period, but, returning to the piano in 1889, she became known as the greatest woman pianist of her time She composed a festival hymn for the Bolívar centenary, 1883 She was married to Eugen d'Albert, 1892–95. See biography by Marta Milinowski (1940)

Carreño de Miranda, Juan (hwän' kärä'nyō dā mērän'dä), 1614–85, Spanish painter. He was a protégé of Velázquez, whom he succeeded as painter to the Spanish court. He is best known for his admirable portraits, of which that of the queen mother, Marie Anne (Prado), is a fine example Carreño also painted numerous religious pictures and frescoes for the churches and palaces of Madrid, Segovia, and Toledo

Carrera, José Miguel (hōsā' mēgĕl' kärä' rä), 1785–1821, Chilean revolutionist. With his brothers, Juan José and Luis, he overthrew the revolutionary

junta headed by Martínez de Rosas and dominated Chile until replaced by Bernardo O'Higgins in 1813. He again seized control in 1814, precipitating a civil war which facilitated Spanish reconquest of Chile. Later he was forbidden by José de San Martín to reenter Chile San Martín and O'Higgins ordered the execution at Mendoza of his brothers. Involving Argentina in civil turmoil, Carrera was on the point of invading Chile when he too was captured and beheaded at Mendoza.

Carrera, Rafael (räfäĕl'), 1814–65, president of Guatemala, a *caudillo* He led the revolution against the anticlerical liberal government of Guatemala, and his ultimate success in 1840 helped to destroy completely the Central American Federation. Illiterate and of mixed blood, he received unquestioned support from the Indian masses, a conservative devoted to the Church, he recalled the Jesuits and restored the power of the Church in the state. Until his death Carrera dominated Guatemala and was the most powerful figure in Central America, intervening to strengthen, restore, or install conservative governments in the other Central American countries

Carrera Andrade, Jorge (hôr'hä kärä'rä ändrä'dhā), 1903–, Ecuadorean poet His early neo-Indian poems reflected his interest in the social revolution in his country, but as he matured, his poetry became more purely esthetic He employs free verse and, at times, surrealist technique, and he achieves unity through a great variety of image associations Among his works are *Latitudes* (1934, essays), *Registro del mundo* (1940), and *Rol de la manzana* (1935) The volume *Three Spanish American Poets* (1942) has translations by Lloyd Mallan, and *12 Spanish American Poets* (1943) by H R Hays

Carrère, John Merven (kŭrâr'), 1858–1911, American architect, b Rio de Janeiro After graduating from the École des Beaux-Arts, Paris, he worked under McKim, Mead, and White in New York, and from 1886 until his death he practiced in partnership with Thomas Hastings The best-known works of Carrère and Hastings are the New York Public Library (completed 1911), which they were awarded in a competition, the Century Theater and the architectural approaches of the Manhattan Bridge, New York, and the office buildings of the Senate and the House and the Carnegie Institution, Washington, D C

Carrhae (kä'rē), Roman name for the ancient Mesopotamian city of Haran The name Carrhae is best known because of the battle of Carrhae in 53 B C. M Licinius Crassus (see Crassus, family) was defeated by the Parthians, who by their archery routed the Roman force

carriage, a wheeled vehicle, in modern usage restricted to passenger vehicles Carriages date from the Bronze Age, early forms include the two-wheel cart and four-wheel wagon for goods The early passenger carriage was a chariot, but Roman road-building activity encouraged the development of other forms From the fall of Rome, horses and litters were used exclusively until the 12th cent, when goods carts and wagons were gradually reintroduced The coach, a closed four-wheel carriage with two inside seats and an elevated outside seat for the driver, is believed to have been developed in Hungary and to have spread among the royalty and nobility of Europe in the 16th cent The hackney coach was introduced in London c.1605 During the 17th cent, coaches became lighter and less ornate and in England the public stagecoach became common France developed the two-wheel forerunner of the chaise, the sulky, and the Cuban *volante* A variety of forms developed in the 18th cent, include the chariot, a closed carriage with one seat, the landau, a coach whose top folded back from the center in two sections, the barouche coach with a folding hood fixed at the back, and the phaeton, usually with low sides The hansom cab, patented by J. A Hansom in 1834, was a closed carriage with an elevated driver's seat in back Lord Brougham based the carriage known by his name on the hansom The victoria, popular after 1850, was similar to the phaeton but had only one seat for passengers In the American colonies few carriages were used because of the poor roads The carriage-building trade became firmly established in the United States after the War of 1812, the most distinctive model was a light four-wheel buggy with open sides and a folding top Solid rubber tires were used in the late 1880s See Ralph Straus, *Carriages and Coaches* (1912), James Reid, *The Evolution of Horse-drawn Vehicles* (1933)

Carrickfergus (kărĭkfûr'gŭs), urban district (pop 4,399), Co. Antrim, Northern Ireland, a fishing port on the north shore of Belfast Lough NE of Belfast It has linen and rayon mills, and rock salt is mined There are remains of a 12th-century castle, of the walls of the old town, a gateway is still standing John Paul Jones fought (1778) a victorious battle offshore from Carrickfergus The father of Andrew Jackson emigrated from here

Carrick-on-Shannon, town (pop. c.1,000), county town of Co. Leitrim, Ireland It is a farm market.

Carrick-on-Suir (shŏr), urban district (pop. 4,851), Co. Tipperary, Ireland, E of Clonmel and on the Suir, here crossed by a very old bridge. It is a market town and has a castle built in 1309 and remains of a 14th-century abbey.

Carrier, Jean Baptiste (zhäʼ bätēstʼ kärēäʼ), 1756–94, French revolutionist An extreme Jacobin, he demanded the establishment of a revolutionary tribunal and made himself notorious in the Reign of Terror. Sent as a revolutionary representative to Nantes, he instituted noyades and committed other atrocities Though he was denounced to the Convention and recalled to Paris, he temporarily escaped punishment through the fall of Robespierre (July, 1794), but was arrested in November and executed.

Carriera, Rosalba (rōzälʼbä kär-rēäʼrä), 1675–1757, Italian portrait and miniature painter, one of the greatest of her day At 24 she had achieved a reputation throughout Italy and abroad for her miniatures and crayon portraits In 1703 she was elected to the Academy of St Luke (Rome), the Academy of Bologna, and Florence Academy In 1720 she visited Paris, where she painted the portraits of the young Louis XV, the regent, and other court figures Returning to Italy, she visited the courts of Modena, Parma, and Vienna, receiving honors and commissions wherever she went Her portraits are delicate in color and vivacious, but sometimes marred by defective drawing. She is well represented in most of the European galleries *Muse Crowned with Laurel* is in the Louvre

Carrière, Eugène (ûzhôn' käryĕr'), 1849–1906, French painter and lithographer, b Gournay He was best known for his spiritual interpretations of maternity and family life A student of Cabanel, he developed a highly personal style His figures and heads are shrouded in a grayish penumbra from which only the expression (usually one of deep melancholy) seems to emerge Characteristic are his *Young Mother* (Avignon) and *Crucifixion* and *Maternity* (both Luxembourg Mus, Paris) He also painted some large canvases for the Sorbonne and the Hôtel de Ville, Paris, and was the author of many notable portraits See studies (in French) by Gabriel Séailles (rev ed, 1911) and Gustave Geffroy (rev ed, 1911)

Carrier Mills, coal-mining village (pop 2,360), S Ill, SW of Harrisburg, inc 1894

Carrington, Henry Beebee, 1824–1912, U S army officer and historian, b Wallingford, Conn, grad Yale, 1845, and afterwards studied at Yale Law School He became a prominent lawyer and Republican leader in Columbus, Ohio Carrington ably reorganized the Ohio state militia and subsequently became adjutant general In the Civil War he helped to save West Virginia for the Union by sending Ohio militia there He was made (May, 1861) a colonel in the regular army and was commissioned (Nov., 1862) a brigadier general of volunteers As chief mustering officer of Indiana, he sent over 100,000 men to the war and was instrumental in quelling the operations of the Sons of Liberty, a secret society of Southern sympathizers After the war, as commander of the Mountain Dist of the Dept of the Platte, he led the force which in 1866 attempted to open and guard the Bozeman Trail route to Montana. He planned and built Forts C F Smith and Phil Kearney on this route He was blamed for the Fetterman massacre but was later exonerated Retired from the army in 1870, he was (1869–78) professor of military science at Wabash College His *Battles of the American Revolution* (1878), supplemented by a volume of maps (1881), is a standard work *Ab-sa-ra-ka, Home of the Crows* (1868, 3d ed, revised and enlarged, 1878), written by his first wife, deals with his life on the Plains

Carrington, Richard Christopher, 1826–75, English astronomer After spending several years as observer at the Univ of Durham, he established a private observatory at Redhill, Surrey Some of the results of his labors are recorded in *A Catalogue of 3735 Circumpolar Stars Observed at Redhill* (1857) and *Observations of the Spots on the Sun from 1853 to 1861* (1863)

Carrington, city (pop 1,850), co seat of Foster co, E central N Dak, NNW of Jamestown, in a farm and dairy region, laid out 1882, inc 1900

Carrizo Springs (kərēʼsō, -rīʼsō), city (pop 2,494), co seat of Dimmit co, SW Texas, SW of San Antonio, settled 1862, inc 1910 Formerly a cow town, it is now the center of an irrigated winter-garden area producing spinach and other truck

Carrizozo (kărĭsōʼsō), town (pop 1,457, alt 5,425 ft.), co seat of Lincoln co, S central N Mex, WNW of Roswell, laid out 1899 It is a railroad division point, with shops, and the trade and shipping center of a livestock and farm area

Carroll, Anna Ella, 1815–93, alleged adviser to Abraham Lincoln in the Civil War A member of the Protestant branch of the Carroll family of Maryland, she was a press agent for the Know-Nothing movement in the 1850s In *My Dear Lady* (1940), Marjorie Barstow Greenbie says that Miss Carroll was the "great, unrecognized member of Lincoln's Cabinet," responsible, it is said, for the successful Union strategy of the early Western campaigns and for numerous other decisions on high policy She is also the subject of Hollister Noble's novel, *Woman with a Sword* (1948)

Carroll, Charles, 1737–1832, American Revolutionary patriot, signer of the Declaration of Independence, b Annapolis, Md After completing his education in France and England, he returned (1765) and his father gave him a large estate near Frederick, Md., known as Carrollton Manor, he was afterwards styled Charles Carroll of Carrollton As leader of the Roman Catholic element, he attacked support of the established Anglican church in a series of articles written for the *Maryland Gazette* He threw himself boldly into revolutionary activities, though he was an extremely wealthy man. In 1776 the Continental Congress appointed him, together with Benjamin Franklin and Samuel Chase, to obtain Canadian support for the Continental cause His journal is one of chief sources of information on this vain mission Carroll served (1776–78) in the Continental Congress, and although he supported the Constitution he refused to attend the Federal Constitution Convention (1787) He was, however, one of Maryland's first U S Senators, serving from 1789 until 1792 Carroll, the last surviving signer of the Declaration of Independence, played an active role in early canal and railroad building See biographies by K. M Rowland (1898), Joseph Gurn (1932), and Ellen Hart Smith (1942)

Carroll, James, 1854–1907, American bacteriologist and army surgeon, b Woolwich, England, M D Univ of Maryland, 1891 He went to Canada at 15 and later joined the U S army A member of the Yellow Fever Commission under Walter Reed, he voluntarily submitted to the bite of an infected mosquito, contracted yellow fever, and recovered This was the first experimental case of the disease, and the mosquito was thus shown to be the carrier Carroll also proved that the infectious agent is a filterable virus

Carroll, John, 1735–1815, American Roman Catholic churchman, b Maryland He studied as a child with Jesuits at Bohemia, Md, later at Saint-Omer in Flanders, since Catholic secondary education was not allowed in Maryland He joined the Jesuits in 1753, studied at Liége, and was ordained in 1769 After the suppression of the Jesuits he returned to America and traveled about, ministering to the scattered Catholics He had a private chapel, for Catholic churches were forbidden by law. He ardently supported the American Revolution and accompanied Benjamin Franklin (always his good friend) on the vain mission to Quebec (1776) to persuade the Canadians to join the Revolutionary cause Seeing that American Roman Catholics should be free of supervision by the vicar apostolic of London, he led in petitioning Rome for the appointment of a priest with some episcopal powers In 1784 Father Carroll was made superior of the missions in the United States In the same year he published a controversial pamphlet, *An Address to the Roman Catholics of the United States of America*, to combat a paper impugning the loyalty of Catholics In 1790 he was consecrated bishop of Baltimore He invited the Sulpicians, who opened a seminary at Baltimore, and he founded Georgetown University He encouraged many communities and patronized schools throughout his diocese In 1808 he became archbishop, with suffragans at Boston, New York, Philadelphia, and Bardstown, Ky His last years were somewhat clouded by misunderstandings with the Catholics in Philadelphia and New York. See John G Shea, *Life and Times of the Most Rev John Carroll* (1888)

Carroll, John, 1892–, American painter, b Wichita, Kansas, where his parents were stopping en route to California. He studied engineering at the Univ. of California and art under Duveneck in Cincinnati. He served in the navy during the First World War After some years of varied occupations he won a prize at the Pennsylvania Academy of the Fine Arts in 1924 and went to Europe On his return he taught at the Art Students League of New York In 1927 he returned to Europe as a Guggenheim fellow and in 1930 became head of the department of painting of the Society of Arts and Crafts, Detroit He is best known for his imaginative and delicate interpretations of young women

Carroll, Lewis, pseud of **Charles Lutwidge Dodgson,** 1832–98, English writer and mathematician, b Daresbury, Cheshire Educated at Christ Church College, Oxford, he lectured in mathematics there until 1881; he was ordained a deacon in 1861 Among his mathematical works, now almost forgotten, is *Euclid and His Modern Rivals* (1879). He is now remembered as the author of *Alice's Adventures in Wonderland* (1865) and *Through the Looking-Glass and What Alice Found There* (1872) Both of these, together known popularly as *Alice in Wonderland*, were published under his pseudonym and both were illustrated by Sir John Tenniel Developed from stories told to the children of Dean Liddell, one of whom was named Alice, they were from the beginning popular children's books, and the mingling of fantastic absurdity with familiar details of everyday life has made Alice a perennial delight to adults. Many of the characters—the Mad Hatter, the March Hare, the White Rab-

but, the Red Queen, and the White Queen—have become familiar figures in literature and speech; numerous satiric and serious meanings can be read into the ludicrous chronicle, but the true value of the book is independent of these Also as Lewis Carroll, Dodgson wrote humorous verses—the most popular of them being *The Hunting of the Snark* (1876)—and several less important works His collected verse was published in 1932 See S H Williams and Falconer Madan, *A Handbook of the Literature of the Rev. C L Dodgson (Lewis Carroll)* (1931; supplement, 1935); selected letters (ed. by E. M Hatch, 1933), biography, with letters, by S D Collingwood (1898), Walter de la Mare, *Lewis Carroll* (1932), H M Ayres, *Carroll's Alice* (1936), biography by F B Lennon, *Victoria through the Looking-Glass* (1945)

Carroll, city (pop 5,389), co seat of Carroll co , W Iowa, W of Boone, inc 1869 Farm equipment is manufactured Carroll has a Franciscan hospital. Swan Lake State Park is near

Carson, Edward Henry Carson, Baron, 1854–1935, North Irish politician, b Dublin He was a member of Parliament (1892–1921), a prominent trial lawyer, and solicitor general (1900–1905) He had long opposed home rule for Ireland, and in 1911 he organized military resistance in Ulster against an English attempt to impose it He was diverted only by the First World War, in which he served in two coalition governments He was made baron in 1921 He violently denounced the creation of the Irish Free State in 1921 but approved the new government of Northern Ireland. See biography by Edward Marjoribanks and Ian Colvin (3 vols , 1932–37)

Carson, Kit (Christopher Carson), 1809–68, American frontiersman and guide, b Madison co , Ky. In 1811 he moved with his family to the Missouri frontier Orphaned at an early age, he was apprenticed to a saddler in Old Franklin, an outfitting point on the Santa Fe Trail, but in 1826 he ran away, joining a caravan for Santa Fe and continuing on to Taos, N Mex , which became his home and his headquarters For the next 14 years he made his living as a teamster, cook, guide, and hunter for exploring parties, notably those of Ewing Young to California and Thomas Fitzpatrick to the Rocky Mts From 1840 to 1842 he was employed as a hunter to supply meat to Bent's Fort In 1842, while returning from St. Louis by boat up the Missouri, he met J. C. Frémont, who employed him as a guide for his Western expeditions of 1842, 1843–44, and 1845. He became famous as a result of Frémont's reports of his skill and courage, and in the Mexican War after the taking of Los Angeles in 1846, he was ordered to Washington with dispatches. In New Mexico he met Gen Stephen Kearny's troops, and Kearny commanded him to guide his forces to California When Kearny's men were surrounded in California, Carson, E F Beale, and an Indian made their way by night through enemy lines to secure aid from San Diego In 1847 and again in 1848, Carson was sent east with dispatches He determined to retire to a sheep ranch near Taos, but depredations by Indians compelled him to continue as an Indian fighter In 1853 he was appointed U S. Indian agent, with headquarters at Taos, a position he filled with notable success. At the outbreak of the Civil War he helped organize and commanded the 1st New Mexican Volunteers, who engaged in campaigns against the Apache, Navaho, and Comanche Indians in New Mexico and Texas At the end of the war he was made a brigadier general, in command (1866–67) of Fort Garland, Colo. See his autobiography (ed by Blanche C Grant, 1926, ed by M M. Quaife, 1935), biography by Stanley Vestal (1928), E L Sabin, *Kit Carson Days* (rev ed , 1935)

Carson City. 1 Village (pop. 1,112), S Mich , on Fish Creek and NW of Lansing, in a farm area, settled 1854, inc 1887 2 [for Kit CARSON] City (pop 2,478), state capital, and co seat of Ormsby co , W Nev , in the Carson valley S of Reno, inc 1875 Laid out in 1858 on the site of Eagle Station, a trading post established (1851) on the emigrant trail from Salt Lake City to California, it served as a supply station for miners in the valley, achieved importance with the discovery (1859) of the COMSTOCK LODE, and later became the terminus of the railroad carrying ore In 1861, when the Territory of Nevada was created, the city was made the capital and in 1867 became the seat of a U S mint—both largely through the efforts of William Morris STEWART State and Federal offices and the headquarters of the Carson Indian Agency are here

Carson Sink, swampy area, c 100 sq mi , W Nev , NE of Fallon It is a remnant of ancient Lake Lahontan, and in it the Carson river is dispersed The river's course was followed by California-bound travelers in the 1850s and 1860s Lahontan Dam (completed 1915) now conserves most of the river's flow in Lahontan Reservoir for the NEWLANDS PROJECT

Carstares or **Carstairs, William,** 1649–1715, Scottish statesman and divine While studying theology at Utrecht, he became a friend of William of Orange He was imprisoned in Edinburgh (1675–79) for alleged co-authorship of *An Account of Scotland's Grievances* and imprisoned and tortured in London (1682) as a suspect in the RYE HOUSE PLOT Shortly before 1688 he was made chaplain to William of Orange (WILLIAM III), later accompanied him to England, and became so powerful in his efforts to reconcile the new king and the Scottish church and to frustrate the Episcopalian Jacobites that he was nicknamed "the Cardinal" His influence continued under Queen Anne as he worked for the union of England and Scotland, served as principal of the Univ of Edinburgh from 1703, and was four times moderator of the assembly of the Church of Scotland See biography by R H Story (1874)

Carstens, Asmus Jacob (äs'mōōs yä'kōp kär'stuns), 1754–98, Danish historical painter and engraver, b Schleswig, studied in Copenhagen and in Italy. He was influenced by the work of Giulio Romano Carstens lived chiefly in Rome and in Germany, where he was a popular professor at the Berlin Academy (1787). Through such pupils as Peter von Cornelius he had a great influence on German historical painting *Homer Singing* is a characteristic work

Carstensz, Mount (kär'stūnz), group of peaks in the Nassau Mts , on W central New Guinea, in Netherlands New Guinea The highest peak, c 16,400 ft , is the highest on the island

Cartagena (kärtŭjĕ'nŭ, Span kärtähä'nä), city (pop 73,190), N Colombia, a Caribbean port Founded in 1533 by Pedro de Heredia on an excellent harbor, which had been visited by the Spanish much earlier, Cartagena became the treasure city of the Spanish Main, where precious stones and minerals brought down the Magdalena awaited transshipment to Spain The harbor was guarded by 29 stone forts, and the city was encircled by a high wall of coral. Nevertheless, buccaneers swooped down on the city, which was sacked in 1544, 1560, and 1586 (this time by Sir Francis Drake). In 1741, in the War of the Austrian Succession, Cartagena heroically withstood a three-month siege commanded by the British under Edward Vernon, who was forced to retire after heavy losses from fighting and disease With the coming of independence, Cartagena was the first of the cities of Colombia and Venezuela to declare (Nov. 11, 1811) absolute independence from Spain. The republic of Cartagena captured SANTA MARTA in 1813, but lost it to royalist forces toward the end of the year. In 1815 it was besieged by the Spanish under Pablo MORILLO and, after a magnificent 106-day defense, surrendered A large part of the population died from the warfare, starvation, and disease. Many more fled After proclaiming an amnesty, Morillo executed hundreds of the survivors. The city was recaptured by patriot forces on Oct 1, 1821 The revolution cost Cartagena its supremacy Later a natural side channel of the Magdalena, the Canal de Dique, silted up, and river traffic began to go to BARRANQUILLA. Some of the former importance was regained by Cartagena in the 20th cent. when a railroad was built to Calamar on the river and an oil pipeline laid to the fields in the Magdalena basin Considerable trade comes from the ATRATO valley Besides oil, exports include gold, platinum, and tagua nuts Sugar, cotton, and cattle are raised in the district E of Cartagena

Cartagena (kärtŭjĕ'nŭ, Span kärtähä'nä), Latin *Carthago Nova,* city (pop 43,104), Murcia prov , SE Spain, on the Mediterranean An important seaport and naval base, it has a fine natural harbor, protected by forts, and has a naval arsenal. There are cordage, liquor, and other manufactures Lead, iron, and zinc are mined near by, though the rich silver mines exploited by Carthaginians and Romans are now practically exhausted Founded by Hasdrubal c 225 B C , the city soon became the chief Carthaginian base in Spain and a flourishing port Captured (209 B C.) by Scipio Africanus Major, it continued to flourish under the Romans The Moors, who took it in the 8th cent , later included it in MURCIA Cartagena was sacked (1585) by Sir Francis Drake and figured later in wars with the British No traces remain of the ancient city The medieval Castillo de la Concepción commands a fine view

Cartago (kärtä'gō), city (1944 estimated pop 12,933), central Costa Rica. Founded in 1563 at the eastern extremity of the central plateau, in a rich coffee-growing region, Cartago was the political center of Costa Rica until liberal dominance after 1821 established SAN JOSÉ as capital Cartago remained a conservative stronghold Destroyed by an eruption (1723) of IRAZÚ volcano, it was also severely damaged by earthquakes in 1822, 1841, and 1910 To withstand shock most buildings are low and massive Cartago's principal church is the scene of annual pilgrimages Although many colonial traditions survive in the gracious old city, Cartago's former glory has vanished

Carte, Richard D'Oyly (dō'lĭ kärt'), 1844–1901, English impresario In 1875 he produced *Trial by Jury,* the first operetta of Sir William Schwenck GILBERT and Sir Arthur Sullivan, and subsequently produced all their other works In 1881 he built the Savoy Theatre, which the operettas made famous

cartel, national or international organization of manufacturers or traders allied by agreement to fix prices, limit supply, divide markets, or fix quotas for sales, manufacture, or division of profits among the member firms In that it may have international scope the cartel is broader than the TRUST, and in that it carries on manufacture it differs from the speculative CORNER or ring Of German origin, the cartel achieved prominence in the world depression of the 1870s, which coincided with the unification of Germany and the growth of its economy The existence of cartels is in opposition to classic theories of economic competition and the free market, and they are forbidden by law in many nations In Germany, however, by the outset of the Second World War nearly all industry was controlled by cartels closely supervised by the government Participation by American firms in German cartel agreements has been prosecuted by the U. S government as constituting restraint of trade Foes of cartels have alleged that they have driven competing firms out of existence, reduced volume of trade, operated to harm consumers, and benefited German aggression by furnishing markets, profits, and technical data to Germany before the Second World War Apologists for cartels claim that they protect the weaker participating firms, do away to an extent with limitations on trade resulting from high tariffs, distribute risks and profits equitably, stabilize markets, reduce costs, and hence protect consumers The U S government legalized export associations in 1918 and has itself participated in agreements regulating production and international trade in foodstuffs, rubber, and other commodities. The International Trade Organization formed at the end of the Second World War has opposed cartels, but many factors limit its authority Because they infer the agreement of several governments, cartels in international trade are usually felt to be less harmful than those which tend to establish monopolies in the domestic market for participants. See TRUST See Joseph Borkin and C. A. Welsh, *Germany's Master Plan* (1943); E S. Mason, *Controlling World Trade, Cartels, and Commodity Agreements* (1946), G. W. Stocking and M. W. Watkins, *Cartels or Competition?* (1948).

Carter, Elizabeth, 1717–1806, English poet and translator; daughter of a clergyman. Under the pen name Eliza she contributed for years to the *Gentleman's Magazine*. Known as a Greek scholar, she translated Epictetus (1758). She was a friend of Johnson, friend and correspondent of Richardson, Burke, Reynolds, Richard Savage, and Horace Walpole, and one of the BLUESTOCKINGS. Her *Poems upon Particular Occasions* appeared in 1738, *Sir Isaac Newton's Philosophy Explained for the Use of the Ladies*, a translation of Algarotti, in 1739, in 1762 she brought out a new volume of *Poems on Several Occasions*. See her memoirs (1807) and *Letters to Mrs Montagu* (1817), Alice C C Gaussen, *A Woman of Wit and Wisdom* (1906)

Carter, Henry Rose, 1852–1925, American sanitarian, b Caroline co, Va, M D Univ of Maryland, 1879. He entered the Marine Hospital Service, and in the campaign to keep yellow fever out of the Southern states he completely reorganized the Federal quarantine service. He organized similar departments in Cuba after the Spanish-American War and in the Panama Canal Zone in 1904. His *Yellow Fever* was posthumously published in 1931

Carter, Howard, 1873–1939, English Egyptologist. His early experience was gained under Flinders Petrie, Édouard Naville, and Gaston Maspero. He served with the Egyptian Exploration Fund and as inspector general of the antiquities department of Egypt. He later helped to reorganize the antiquities administration of Upper Egypt. During his association (1906–23) with Lord Carnarvon, he excavated many fine tombs in the Valley of the Kings before the amazing discovery of the sepulcher of Tut-ankh-amen in 1922. Included in his writings is *The Tomb of Tut-ankh-amen* (Vols I–II, 1923, Vol III, 1933)

Carter, Mrs. Leslie, 1862–1937, American actress, b Lexington, Ky. Her maiden name was Caroline Louise Dudley. After she was divorced by her first husband, Leslie Carter, she went on the stage. Trained by Belasco, she was presented by him in 1890 in *The Ugly Duckling*. Her real recognition came with his *Heart of Maryland* (1895), and afterwards he successfully adapted *Zaza* (1899) and *Du Barry* (1901) for her. Their association reached a peak with *Adrea* (1905) and ended with Mrs Carter's second marriage in 1906, after which her stage popularity somewhat diminished

Carter, Nick, a fictional detective character in dime novels said to have been created by J R Coryell in the 1880s. The firm of Street & Smith, New York, published over 1,000 stories about Nick Carter, written variously by F V R Dey, E T Sawyer, G C Jenks, and others. The name Nicholas Carter was used as a pseudonym by many authors of dime novels

Carter, Samuel Powhatan, 1819–91, American naval officer and Union general in the Civil War, b Elizabethton, Tenn, grad Annapolis, 1846. In the Civil War he was transferred from the navy to the War Dept, sent to organize Union troops in East Tennessee, made brigadier general of volunteers (May, 1862), and given command of the cavalry division of the Army of the Ohio. Mustered out as brevet major general (1866), he returned to the navy. In 1882 he was made a rear admiral on the retired list. Carter is said to have been the only American who was both a major general and a rear admiral

Carteret, Sir George (kär'tərĭt, -rĕt), c 1610–1680, proprietor of East Jersey (see NEW JERSEY). He served in the British navy, fought for the royalists, and became (1643) lieutenant governor of his native island of Jersey. In 1663, with several others, he was granted the proprietorship of Carolina and in 1664, in conjunction with Lord Berkeley, was granted part of New Jersey. His widow sold his claim to 12 purchasers who joined with 12 others as the 24 proprietors of East New Jersey

Carteret, John. see GRANVILLE, JOHN CARTERET, 1ST EARL OF

Carteret, Philip, 1639–82, first colonial governor of NEW JERSEY. Carteret arrived in the province in 1665 and soon was faced with rebellion against quitrents and confused land titles. After the division of New Jersey in 1676, he was made governor of East Jersey. Mounting difficulties with Sir Edmund ANDROS over the right to collect customs duties led to Carteret's imprisonment by Andros and his eventual restoration by the duke of York (later JAMES II)

Carteret, Philip, d 1796, English admiral. He commanded the *Swallow* (under Samuel Wallis, commanding the *Dolphin*) in a voyage around the world (1766–69). After the vessels became separated near the Straits of Magellan, Carteret discovered Pitcairn Island, rediscovered the Santa Cruz group, and arrived at New Britain (near which he found New Ireland), passing thence by the Admiralty Islands to the East Indies.

Carteret (kärtûrĕt'), borough (pop 11,976), NE N.J., on Arthur Kill opposite Staten Island; inc 1906. It has metal industries and machinery manufacture

Cartersville, city (pop 6,141), co seat of Bartow co., NW Ga., NW of Atlanta and on the Etowah river, in a piedmont mining area; inc. 1850. Rubber products are made here. Artifacts and other archaeological items of interest have been excavated from the near-by Etowah Indian mounds.

Carterville. 1 City (pop 2,893), S Ill, SW of Herrin, in a farm and coal area; inc 1892. 2 City (pop 1,582), SW Mo, near Joplin, laid out 1875. Its lead-mining activities have declined

Cartesian coordinates (kärtē'zhən) [for René Descartes], values representing the location of a point in relation to two straight lines. The two straight lines are known as axes, the horizontal can be called the x axis and the vertical the y axis, and the point is located by measuring its distance from each line along a parallel to the other line. In terms of present-day mathematics Descartes used both rectangular (perpendicular) and oblique axes. This work on analytic geometry, or the application of algebra to geometry, was embodied in his *La Géométrie*, one of three sections appended to his essays on the method of science (1637). His was the first published presentation of the fact that a curve can be represented by means of an equation giving the relation between the coordinates (x, y) of a point on the curve. Descartes advanced generality in mathematics by showing that an infinity of curves can be referred to one system of coordinates. Others, including Pierre de Fermat and Thomas Harriot, developed similar concepts. A common application of coordinate geometry is in the making of graphs. See Descartes's *Geometry* (Eng tr by D E Smith and M L Latham, 1924)

Cartesian philosophy. see DESCARTES, RENÉ

Carthage (kär'thĭj), ancient city, on the northern shore of Africa, on a peninsula in the Bay of Tunis and near modern Tunis. The Latin name, Carthago or Cartago, was derived from the Phoenician name, which meant "new city" (the old city being Utica). It was founded (traditionally by DIDO) from Tyre in the 9th cent B C, the date is usually conventionally set at either 850 B C or 814 B C. The city-state built up trade and in the 6th and 5th cent B C began to acquire dominance in the W Mediterranean. Merchants and explorers went out across the seas. HANNO in the early 5th cent is supposed to have gone down the African coast as far as Sierra Leone. The wide net of trade brought back great wealth to Carthage. The state was tightly built under an aristocracy of nobles and wealthy merchants. Though a council and a popular assembly existed, these early lost power to oligarchical institutions, and practical power was in the hands of the judges and two elected magistrates. The greatest weakness of Carthage lay in the rivalry of the leading families, who traditionally backed opposing policies. The most important division was between those favoring land expansion and those favoring sea power. The maritime faction was generally in control and about the beginning of the 5th cent B C the Carthaginians established themselves on Sardinia, Malta, and the Balearic Islands, while MAGO arrived at treaties with the Etruscans, the Romans, and some of the Greeks. Sicily, however, which lay almost at the front door of Carthage, was never brought completely under Carthaginian control. The move against the island, begun by settlements in W Sicily, was brought to a halt when the Carthaginian leader, Hamilcar (a name which recurred in the powerful Carthaginian family usually called the Barcas), was defeated by Gelon, tyrant of Syracuse, in the battle of Himera (480 B C), and the Greek city-states of Magna Graecia were preserved. The Carthaginian threat continued, however, and grew with the steadily increasing power of Carthage. Hamilcar's grandson, Hannibal (another name much used in the family), and his colleague, Himilco, destroyed Acragas (see AGRIGENTO) c 406 B C. SYRACUSE resisted the conquerors, and a century later its tyrant AGATHOCLES even took (310–307? B C) the warfare to the shores of Africa, but after his death (289 B C) Carthage had practically complete control over all the W Mediterranean. Rome challenged that control in the 3d cent B C in the PUNIC WARS (so called after the Roman name for the Carthaginians, Poeni, i.e., Phoenicians). The first of these (264–241 B C) cost Carthage all hold on Sicily. Though Rome and Carthage still seemed more or less evenly matched, the dependence on mercenary troops and the fatal division in the state were shown clearly when the actions of another HANNO, a rival of the Barcas, brought on a great uprising of the mercenaries (240–238 B C) soon after the war. HAMILCAR BARCA put down the revolt and compensated for the Sicilian losses by undertaking conquest in Spain, a conquest continued by Hasdrubal. This growth of power again activated trouble with Rome, and the second of the Punic Wars took place from 218 to 201 B.C. Though the Carthaginian general was HANNIBAL, one of the greatest commanders the world has ever seen, Carthage was gloriously defeated, partly by the Roman generals, FABIUS and especially SCIPIO AFRICANUS MAJOR, and partly by the fatal division in Carthage itself, which prevented Hannibal from receiving proper supplies. After Scipio had won (202 B.C.) the battle of Zama, Carthage sued for peace and lost all its warships and its possessions outside Africa but was allowed to continue and expand the lucrative commerce. Even this, however, Rome (and particularly CATO THE ELDER) felt to be a threat, and the third of the Punic Wars (149–146 B C) ended with the total destruction of Carthaginian power and the razing of the city itself by SCIPIO AFRICANUS MINOR. Romans later undertook to build a new city on the spot in 122 B.C., but the project failed. Julius Caesar did found a new city, which under Augustus became an important center of Roman administration. Carthage was later (A D 439–533) the capital of the Vandals and was briefly recovered (533) for the Byzantine Empire by Belisarius. The Arab Hasan ibn Numan practically destroyed the city in 698, though the place was populated for many centuries afterward. There are few remains of the ancient Carthage; those which are found are of the Roman city, including a large aqueduct of Hadrian. Louis IX of France (St Louis) died here when on crusade. A chapel in his honor stands on the hill which is traditionally identified as Byrsa Hill, site of the ancient citadel. The Lavigerie Museum is also here. Carthage today, a suburb of Tunis, is chiefly important for this religious connection

Carthage 1 City (pop 2,575), co seat of Hancock co, W Ill, near the Mississippi and E of Keokuk, Iowa, laid out 1833, inc 1837. It is a farm trade center. Carthage College (Lutheran, coeducational, 1870) is here. In 1844 Joseph Smith, Mormon leader, and his brother were killed in the city jail by a mob. The old jail, now the property of the Mormon church, is regarded as a shrine by the many Mormons who annually visit it. 2 Town (pop 1,766), co seat of Leake co, central Miss., near the Pearl NE of Jackson, in a farm and timber area, named Leakville until 1834. 3 City (pop. 10,585), co seat of Jasper co, SW Mo, on the Spring river and near Joplin, in a lead, zinc, and marble area, founded 1842, inc 1873. It is a shipping center for farm and dairy products. Shoes and clothing are among the city's manufactures. Carthage was the scene of a Confederate victory in the Civil War, July 5, 1861. George Washington Carver was born at near-by Diamond. 4 Village (pop 4,207), N N.Y., on the Black River and E of Watertown, settled before 1801, inc 1841. Paper milling is the chief industry. 5 Town (pop 1,381), co seat of Moore co, central N C, SW of Raleigh, in a farm and tobacco area, settled in the 18th cent. 6 Town (pop 1,512), co seat of Smith co, central Tenn, on the Cumberland river and E of Nashville, founded 1804. It is a tobacco center and produces cheese. The Cordell Hull Bridge crosses the river here. 7 City (pop 2,178), co seat of Panola co, E Texas, SW of Shreveport, La, near the Sabine, founded 1848. The pine-woods region yields natural gas, oil, and lumber and has diversified farms

Carthusians (kärthōō'zhənz), small order of monks of the Roman Catholic Church. They were founded by St BRUNO at La Grande CHARTREUSE in France in 1084. The Carthusians are peculiar among orders of Western MONASTICISM in cultivating a nearly eremitical life each monk lives by himself with cell and garden and, apart from their public worship, scarcely meets the others. No order is more austere. The Carthusian enclosure is called charterhouse in English, and its architecture differs necessarily from that of the Benedictine ABBEY. The Charterhouse of London was famous, and the Certosa at Pavia, Italy, is an architectural monument. The Carthusians are devoted mainly to contemplation and had influence on religious life in medieval England. The chief sources of revenue of the order is derived from the sale of chartreuse, a liqueur made from a secret formula

Cartier, Sir Georges Étienne (sôrsh'ätyĕn'kärtyā'), 1814–73, Canadian statesman, b Quebec prov. He was called to the bar of Lower Canada (now Quebec) in 1835. A man of fiery and impetuous temperament, he took part in the rebellion of 1837 and was forced to flee to the United States, but he returned to Canada in 1838. In 1848 he was elected to the legislative assembly of Canada, where he became a leader of the French Canadians. With Sir John A. MACDONALD, his ally in Upper Canada, he formed the Macdonald-Cartier ministry (1857–62). He was the leading French Canadian advocate of confederation, played a prominent role in the Charlottetown Conference and Quebec Conference of 1864, and was mainly influential in persuading his compatriots to accept the federation proposals. On the other hand, in order to protect the French Canadians, he had insisted on a federal system as against a more centralized form of government. As one of Macdonald's most trusted colleagues, Cartier became minister of militia in the first dominion government. In 1868 he went to England with William McDougall to arrange for the purchase of the Hudson's Bay Company territory, and he was created baronet that year. He also had an important part in the projection of the Grand Trunk and Canadian Pacific railroads. See biographies by John Boyd (1914) and A. D. DeCelles (in "Makers of Canada" series, Vol. V, 1926).

Cartier, Jacques (zhäk), 1491–1557, French navigator, first explorer of the Gulf of St Lawrence and

discoverer of the St. Lawrence river. He made three voyages to the region, the first two (1534, 1535–36) directly at the command of Francis I and the third (1541–42) under the sieur de Roberval in a colonization scheme that failed On the first voyage he entered by the Strait of Belle Isle, skirted its barren north coast for a way, and then coasted along the west shore of Newfoundland to Cape Anguille From there he discovered the Magdalen Islands and Prince Edward Island and, going to the coast of New Brunswick, explored Chaleur Bay, continued around the Gaspé Peninsula, and landed at Gaspé to take possession for France Continuing to Anticosti island, he turned back with the approach of autumn storms. Hitherto the region had been considered cold and forbidding, interesting only because of the Labrador and Newfoundland fisheries, but Cartier's reports of a warmer, more fertile region in New Brunswick and on the Gaspé and of an inlet of unknown extent stimulated the king to dispatch him on a second expedition On this voyage he ascended the river to the site of modern Quebec and, leaving part of his men to prepare winter quarters, continued to the Indian village of Hochelaga, on the site of the present city of Montreal, and there climbed Mt Royal to survey the fertile valley and see the Lachine Rapids and Ottawa river On his return he explored Cabot Strait, ascertaining Newfoundland to be an island. His *Bref Récit et succinte narration* (1545), a description of this voyage, was his only account to be published during his life On his third trip he penetrated again to the Lachine Rapids and wintered in the same region, but gained little new geographical information Roberval did not appear until Cartier was on his way home, and Cartier refused to join him Although Cartier's discoveries were of major geographical importance and the claims of the French to the St Lawrence valley were based on them, he failed in his primary object, the discovery of the Northwest Passage and natural resources, and the region remained virtually untouched until the time of Champlain The best edition of the voyages is H. P. Biggar, *The Voyages of Jacques Cartier* (1924)

cartilage (kär'tĭlĭj), firm, elastic material of pearly appearance that forms part of the supporting system or SKELETON It is present in the fetus before bone is formed In many of the bones it remains in the growing ends until after puberty Cartilage is present in the adult on the surfaces of joints and in the nose, larynx, and windpipe It is a connective tissue of solid fibrous material, in which he cartilage cells Cartilage is subject to injury and is involved in diseases of the joints

cartoon, a full-size preliminary drawing for a decorative work such as stained glass, mosaic, mural painting, or tapestry Glass and mosaic are cut exactly by the patterns taken from the cartoons In tapestry the cartoon is inserted beneath the warp to serve as a guide In fresco painting the lines of the cartoon are perforated and transferred to the plaster by pouncing. In every case it is essential that the dimensions of the cartoon should be the same as those of the completed work The Italian Renaissance painters developed their designs for fresco and tapestry in full detail in the cartoons, and such works as Raphael's cartoons for the tapestries of the Sistine Chapel (Victoria and Albert Mus.) are treasured masterpieces The term is also used of a wide variety of satirical and humorous drawings, or caricatures, characteristically employing distortion for emphasis, particularly those appearing in newspapers and periodicals Great artists, including Goya, Hogarth, Daumier, and Rowlandson, have produced such works, and Thomas Nast, John Leech, Wilhelm Busch, Sir John Tenniel, Art Young, Charles Dana Gibson, and George Gross are a few of the many famous draughtsmen who contributed to the art The cartoon has often had far-reaching social and political importance A late 19th-century development of the cartoon, now an outstanding feature of the modern newspaper, is the comic strip in which stories of every kind are told in a sequence of drawings and are continued from day to day Sidney Smith, Percy Crosby, Clare Briggs, Chester Gould, and Fontaine Fox are a few among the many comic strip artists who have delighted the American public. The ANIMATED CARTOON of the film, as perfected by Walt DISNEY, has delighted the entire world

Cartouche (kärtōōsh'), 1693–1721, nickname of Louis Dominique Bourguignon, French criminal His band terrorized the Paris region until his capture He was broken on the wheel. Cartouche's daring exploits have been celebrated in stories, dramas, ballads, and popular prints.

Cartwright, Edmund, 1743–1823, English inventor and clergyman He was the inventor of an imperfect power loom which, when finally patented (1785), became the parent of the modern loom. It was the first machine to make practical the weaving of wide cotton cloth. A few of Cartwright's many other inventions were a wool-combing machine (1789), a machine for ropemaking (1792), and a fuel alcohol engine (1797). He cooperated with Fulton on his experiments with steam navigation. For 37 years he was prebendary of Lincoln Cathedral

Cartwright, John, 1740–1824, English reformer and pamphleteer; brother of Edmund Cartwright, inventor of the power loom. Cartwright had an early career in the navy (1758–70). He declined to fight the American colonists and wrote *American Independence: the Glory and Interest of Great Britain* (1774) A major in the Nottinghamshire militia (1775–92), he was deprived of his commission in the hysteria at the time of the French Revolutionary Wars He came to be called the father of reform for his advocacy of vote by ballot, parliamentary reform, abolition of slavery, and army reform In 1820 he was fined for sedition.

Cartwright, Peter, 1785–1872, American Methodist preacher, b. Virginia. He was a circuit rider in Kentucky, Tennessee, Indiana, Ohio, and Illinois for nearly 50 years In 1846 he was defeated for Congress by Abraham Lincoln An interest in education led Cartwright to aid in founding Illinois Wesleyan Univ. and Illinois Conference Female Academy (now MacMurray College for Women). The methods and experiences of the pioneer preacher are vividly recorded in his autobiography (1857) and other books See biography by H H Grant (1931)

Cartwright, Sir Richard John, 1835–1912, Canadian politician, b Kingston, Ont., educated at Trinity College, Dublin He was elected as a Conservative to the legislative assembly of Canada (1863) and to the first dominion House of Commons (1867), but he later joined the Liberals He was minister of finance (1873–78) in Alexander Mackenzie's administration As minister of trade and finance (1896–1911) in Sir Wilfrid Laurier's government, Cartwright was acting prime minister on several occasions He entered the Senate in 1904 A noted public speaker, he was the Liberal party's spokesman on financial matters and an earnest advocate of trade reciprocity with the United States See his reminiscences (1912)

Cartwright, William, 1611?–1643, English author, a royalist divine Educated at Christ Church, Oxford (M A , 1635), he was appointed succentor at Salisbury (1642) and a proctor of the university (1643) Cartwright was one of the followers of Ben Jonson and in his day had a high reputation both as preacher and as author Several of his works appeared in his life, but they are known chiefly through the collected edition of 1651 Of his plays, the best known are *The Ordinary*, a comedy, and *The Royal Slave* His poems, which had a lower place in the estimation of the day, are now almost entirely forgotten

Carty, John Joseph, 1861–1932, American electrical engineer, b Cambridge, Mass Associated with the Bell Telephone system from 1879, he was the inventor of numerous improvements in telephony

Carucci, Jacopo. see PONTORMO, JACOPO DA

Carus (Marcus Aurelius Carus) (kā'rus), d 283, Roman emperor (282–83) Praetorian prefect under PROBUS, he was made emperor by the soldiers after the murder of Probus. Leaving his son CARINUS in command of the West, Carus and another son, Numerianus, went on a campaign in the East He defeated the Sarmatians, successfully attacked the Parthians, and took Ctesiphon Soon afterward he died mysteriously

Carus, Paul, 1852–1919, American philosopher, born and educated in Germany For many years he was editor of the *Open Court* and the *Monist*, periodicals devoted to philosophy and religion His philosophy was monistic, seeking to establish religion on a scientific basis Among his many works were *Fundamental Problems* (1889), *The Religion of Science* (1893), *The Gospel of Buddha* (1900), *The History of the Devil* (1900), and *The Principle of Relativity* (1913)

Caruso, Enrico (kurōō'sō, Ital. ānrē'kō karōō'sō), 1873–1921, Italian operatic tenor His Italian debut was in 1895 He made his debuts in London (1902) and New York (1903) as the duke in *Rigoletto*, after which he appeared regularly at the Metropolitan Opera, New York, until his death His repertoire included over 50 roles in such operas as *La Bohème*, *Rigoletto*, and *Pagliacci*, roles both serious and comic The unusual quality and range of his voice made him world famous See biographies by P. van R. Key and Bruno Zirato (1922) and D. B. Caruso (1945)

Caruthersville (kŭrŭ'dhŭrsvĭl), city (pop 6,612), co seat of Pemiscot co , extreme SE Mo , on the Mississippi, in a cotton, farm, and timber area, laid out 1857 It is a cotton-ginning and shipping point, its products include shoes and sand and gravel

Carvajal, Francisco de (fränthē'skō dā kärvähäl'), 1464?–1548, Spanish conquistador For 40 years he fought in European wars before going to Mexico and subsequently to Peru, where he aided Francisco Pizarro. He grew rich from the tributary labor of Indians, thousands of whom died in his mines at Potosí He supported (1542) VACA DE CASTRO against the revolt of Diego de Almagro the younger, but when the New Laws to protect the Indians were promulgated in Peru (1544), he joined the revolt of Gonsalo PIZARRO. He was captured with Gonsalo Pizarro and was executed.

carvel: see CARAVEL and BOAT.

Carver, George Washington, 1864?–1943, American Negro agricultural chemist, b. near Carthage, Mo., grad. Iowa State College (B.S., 1894) He went, in 1896, to Tuskegee Institute, where his work in agricultural research won him international repute. His efforts to improve the economy of the South included the teaching of soil improvement and of diversification of crops. He discovered hundreds of uses for the peanut, the sweet potato, and the soybean and thus stimulated the culture of these crops He devised many products from cotton waste and extracted blue, purple, and red pigments from local clay. From 1935 he was a collaborator of the Bureau of Plant Industry. Carver contributed his life savings to a foundation for research at Tuskegee See studies by Rackham Holt (1943) and Shirley Graham and G. D Lipscomb (1944).

Carver, John, c.1576–1621, first governor of Plymouth Colony. A native of either Nottinghamshire or Derbyshire, he won considerable wealth as a London merchant. In 1609 he emigrated to Holland, where he soon joined the Pilgrims at Leiden His excellent character and his fortune, of which he gave liberally to the congregation, made him a leader. Carver, the chief figure in arranging for the Pilgrim migration to America, secured the backing of merchant friends in London, enlisted a number of capable settlers who came directly from England, and hired and provisioned the *Mayflower* for the journey After the signing of the Mayflower Compact he was elected (1620) governor for one year and was probably responsible for the choice of the site at Plymouth On his death, William BRADFORD succeeded him See G F. Willison, *Saints and Strangers* (1945)

Carver, Jonathan, 1710–80, American explorer, b Weymouth, Mass He served in the French and Indian War and in 1766 was hired by Robert ROGERS, then commanding at Mackinac, to undertake a journey to some of the Western tribes for promoting the fur trade, increasing geographical knowledge, and extending the influence of the English He journeyed by the Fox-Wisconsin route to the Mississippi and up that river to a point several days' journey above the present site of Minneapolis He wintered among the Sioux on the Minnesota river, learning much of their language and customs In the spring of 1767 he returned to Prairie du Chien, where by Rogers's orders he joined the expedition to search out the "Western Ocean." Their journey northwestward by the upper Mississippi being prevented by war between the Sioux and Chippewa, they ascended the Chippewa river and crossed to Lake Superior, the coast of which they followed to the Grand Portage Carver went to London in 1769 with the intention of publishing a narrative of his travels and of pressing claims for compensation for his services, for Rogers, having exceeded his authority in employing Carver, could not pay him After nine years of struggle and poverty, Carver in 1778 published the first edition of his *Travels through the Interior Parts of North America in the Years 1766, 1767, and 1768* (1778). The popularity of this book, the first English account of the upper Great Lakes and Mississippi region, is attested by the 32 editions, or more, through which it passed

Carver, rural town (pop 1,469), SE Mass , SW of Plymouth, settled c 1660, inc 1790

Carville, town SE La , on the Mississippi between Baton Rouge and New Orleans. Carville is the site of the National Leprosarium

carving, the art of cutting or abrading designs or figures in relief or in the round in stone (see CAMEO), wood, metal, bone, ivory, and other materials The tools commonly used in carving include a wide variety of gouges, drills, points, hammers, chisels, and saws. Carving is to be clearly distinguished from such other techniques of the sculptor as modeling or casting, which presuppose a readily malleable material or one which can be liquefied True carving is always a process of subtraction

Cary, Alice, 1820–71, and **Phoebe Cary,** 1824–71, American poets, sisters Both were born near Cincinnati Their first success came with *Poems of Alice and Phoebe Cary* (1849), after which they moved to New York and became popular in the circle of Horace Greeley Alice wrote prose as well as verse, including *Clovernook Papers* (1852), *Clovernook Children* (1855), and *Snow-Berries* (1867) Phoebe's poems were published as *Poems and Parodies* (1854) and *Poems of Faith, Hope, and Love* (1868) Among her hymns is the well-known "One Sweetly Solemn Thought"

Cary, Henry Francis, 1772–1844, English writer, a clergyman He made many good translations of classic works. His blank-verse rendering (1814) of Dante's *Divine Comedy* is a standard translation

Cary, Lucius: see FALKLAND, LUCIUS CARY, 2D VISCOUNT.

Cary, Phoebe: see CARY, ALICE.

Cary, town (pop. 1,141), central N C , W of Raleigh, in a farm area, founded 1852, inc. 1870. It is the birthplace of Walter Hines Page. The state fairgrounds are near.

caryatid (kărēă'tĭd) [Gr.,=maid of Caryae, 15 mi. N of Sparta; i e., dancer at Artemis' shrine there], a sculptured female figure serving as an ornamental support in place of a column or pilaster. It was a frequently used motive in architecture, furniture, and garden sculpture during the Renaissance, the 18th cent., and, notably, the CLASSIC REVIVAL of the 19th cent, when caryatids were popular as mantelpiece supports The motive appeared in Egyptian and Greek architecture; the most celebrated example extant is the Porch of the Caryatids, forming part of the ERECHTHEUM Here six beautifully sculptured figures, acting as columns, support an entablature on their heads They are considered the only faultless examples of a form which ranks as somewhat questionable architecturally Caryatids were used also in two small treasuries (6th cent B C) at Delphi.

Casa, Giovanni della (jōvän'nē dĕl'lä kä'sä), 1503–56, Italian cleric and poet He was archbishop of Benevento and papal nuncio to Venice. He wrote lyric verse, a life of Bembo, and a treatise on etiquette, the *Galateo* (1560, Eng tr , 1576). His verse is often of great dignity and formal beauty See Lorna de' Lucchi, *An Anthology of Italian Poems* (1922)

casaba melon: see MELON

Casablanca, Louis (kä"sublĕng'ku, kä"zu–, Span kä"säblăng'kä), Arabic *Dar el Beida*, city (pop 551,322), French Morocco, a port on the Atlantic Ocean It is on the site of Anfa, a prosperous town which the Portuguese destroyed in 1468; they resettled it briefly in 1515 under its present name Almost destroyed by an earthquake in 1755, Casablanca was rebuilt by Mohammed XVI, who fostered its commerce By 1900 it was one of the most important ports of North Africa, and it was occupied by the French in 1907 (see MOROCCO) The port, its facilities greatly improved, handles over two thirds of Morocco's commerce It exports cereals, leather, wool, and phosphates, and it shelters large fishing fleets In the Second World War it was the scene of one of the three major allied landings in North Africa (Nov , 1942) and of a conference between Winston Churchill and F D Roosevelt (Jan , 1943) About one fifth of the population is European

Casablanca Conference, Jan 14–26, 1943, meeting of U S President F D Roosevelt and British Prime Minister Winston Churchill at Casablanca, French Morocco It resulted in the declaration that the Second World War would end only with the unconditional surrender of the Axis states Through the mediation of Churchill and Roosevelt the rival French generals, Henri H Giraud and Charles de Gaulle, also met at Casablanca and agreed to unite their forces

Casadesus, Robert (kasädāsüs'), 1899–, French pianist, studied at the Paris Conservatoire He became director of the American Conservatory at Fontainebleau in 1935, the year of his first visit to the United States, where he took up residence in 1940 A highly distinguished pianist, particularly as a player of French music, he is the composer of concertos, piano pieces, and symphonies He has often appeared in two-piano recitals with his wife, Gaby Casadesus, a fellow student of the Conservatoire whom he married in 1922

Casa Fuerte, Juan de Acuña, marqués de see ACUÑA, JUAN DE

Casa Grande (kä'sä grän'dā), town (1940 pop 1,545, 1946 special census pop 2,706), S Ariz , near the Casa Grande Mts SSE of Phoenix It is an irrigated farming community and is named for the excavated Indian pueblo (see NATIONAL PARKS AND MONUMENTS, table), some 20 mi east, near the town of Coolidge The U S resettlement community, Casa Grande Farms, is also near Coolidge

Casal, Julián del (hōōlyän' dĕl käsäl'), 1863–93, Cuban poet, a friend of Rubén Darío and a leader in *modernismo* He was thoroughly imbued with the French Parnassian movement Afflicted with a painful form of tuberculosis, he wrote verse expressing deep pessimism, but he escaped reality by choosing subjects from antiquity and far-off lands, especially Japan His best-known collections are *Hojas al viento* [leaves in the wind] (1890) and *Bustos y rimas* [busts and rimes] (1893)

Casale or **Casale Monferrato** (käsä'lā mônfĕr-rä'tō), city (pop 25,485), Piedmont, NW Italy, on the Po It became the capital of the marquisate of MONTFERRAT in 1435 and was strongly fortified. In 1703 it passed to the house of Savoy The 15th-century citadel is now a barracks Much wine is produced in the region and there are important cement industries

Casals, Pablo (pä'blō käsäls'), 1876–, Spanish cellist and conductor He began his career as a cellist in 1898 and as a conductor in 1920, when the Orquestra Pau Casals, Barcelona, gave its first concert. He often played trios with Jacques Thibaud and Alfred Cortot. In 1897 he joined the faculty of the Barcelona Conservatory, and after 1901 he made many concert appearances in the United States. See biography by Lillian Littlehales (rev ed , 1948).

Casanova, Giovanni Battista (jōvän'nē bät-tēs'tä käsänō'vä), c 1722–1795, Italian painter, studied in Dresden In 1752 he went to Rome, where as a co-worker of Anton Mengs he became known as a draughtsman of exceptional ability He is remembered principally for his designs for Winckelmann's work on ancient monuments In 1764 he was appointed a professor and later director of the Dresden Academy His brother **Francesco Giuseppe Casanova** (fränchās'kō jōōzĕp'pā), 1727–c 1802, b London, was a painter and engraver He studied in Venice, in Dresden, and in Paris, where he exhibited regularly at the Académie royale de Peinture et de Sculpture until his return to Italy in 1783

Casanova de Seingalt, Giovanni Giacomo (käsänō'vä, Ital jōvän'nē jä'kōmō käsänō'vä dă sängält'), 1725–98, Venetian adventurer and author His first name also appears as Jacopo He studied for the church but was expelled from school for immorality A life of adventure took him over Europe from Constantinople to Madrid and London He supported himself by gambling, spying, writing, and, especially, by his power to seduce women, and his personal charm affected the foremost persons of his time Arrested (1755) in Venice, he accomplished the notable feat of escaping from the "leaden roofs" of the state prison (1756) In Paris, where he enjoyed the favor of Marie Antoinette, he became director of the lottery After 1774 Casanova retired to the castle of Dux, Bohemia, where his friend, Count Waldstein, employed him as librarian A man of learning and taste, with interests ranging from theology, mathematics, poetry and literary and musical criticism to commercial and political projects, Casanova left behind a large number of writings His memoirs, written in French (1st ed , 12 vols , 1826–38), became world-famous Accurate as to history, they probably contain much invented personal matter Other papers, in prose and verse, were released in 1930 See biographies by Édouard Maynial (Eng tr , 1911) and Guy Endore (1929), Stefan Zweig, *Adepts in Self-Portraiture* (Eng tr , 1928)

Casas, Bartolomé de las see LAS CASAS

Casaubon, Isaac (ēzăk' käzōbō'), 1559–1614, French classical scholar and theologian, b Geneva He became professor of Greek at Geneva and at Montpellier and attracted by his learning the notice of Henry IV, who made him royal librarian Both Catholics and Protestants sought to win Casaubon's support, and both denounced him when he joined the Church of England In 1610 James I of England made him prebendary at Canterbury and Westminster He spent the rest of his life in England and was buried in Westminster Abbey Casaubon's great works are his editions of the classics, particularly Athenaeus and the *Characters* of Theophrastus Casaubon's diary, *Ephemerides*, was edited by his son, **Florence Étienne Méric Casaubon** (flōrās' ātyĕn' mārĕk'), 1599–1671, who was also a classical scholar

Casca (Publius Servilius Casca Longus) (kă'sku), d c 42 B C , Roman politician, one of the assassins of Julius CAESAR While Cimber grasped Caesar, Casca was the first to stab him in the back He died (presumably by suicide) soon after the battle of Philippi

Cascade. 1 Village (pop 1,029), co seat of Valley co , W Idaho, on the North Fork of the Payette and N of Boise, founded 1912–13 by combination of three settlements, inc 1917 Cascade Dam of the BOISE PROJECT is here 2 Town (pop 1,376), E Iowa, on the North Fork of the Maquoketa river and SW of Dubuque, in a fertile farm area, settled 1834, platted 1842, inc 1881.

Cascade Range, northern continuation of the Sierra Nevada extending c 500 mi through N California, Oregon, and Washington into British Columbia, paralleling the Pacific coast (and the Coast Ranges) 100 to 150 mi inland The range shows evidence of volcanic activity in the later geological periods, and all the highest summits are volcanic cones covered with snow fields and glaciers Some of the most magnificent and better-known peaks are Mt Shasta (Calif), Mt Thielsen, Mt Jefferson, and Mt Hood (Oregon), Mt St Helens, Mt Adams, Mt Rainier—the highest, with an altitude of 14,408 ft —and Mt Baker (Wash) The slopes are clothed with fir, pine, and cedar forests, large areas of which are held as national reserves Three rivers, the Klamath, the Columbia, and the Fraser, cut across the range to the Pacific See R O Case and Victoria Case, *Last Mountains* (1945), Roderick Peattie, ed , *The Cascades* (1949)

cascara sagrada (käskä'rä sŭgrä'du), dried bark of a buckthorn (*Rhamnus purshiana*) native to North America from S British Columbia to N California and Montana The extract prepared from the cured bark is used in medicine both as a laxative and as a tonic.

Casco Bay (käs'kō), inlet of the Atlantic, S Maine, with its principal harbor at Portland. Its shores and many islands are irregular in outline, hilly, and beautifully wooded; hundreds of summer estates and resorts are here.

case, in Latin INFLECTION, one of the several possible forms of a given noun Theoretically each noun has 10 cases, five singular and five plural, each singular form having a corresponding plural The five are called NOMINATIVE, GENITIVE, DATIVE, ACCUSATIVE, and ABLATIVE Some nouns have a sixth singular case, the VOCATIVE Each Latin noun or adjective must occur in some case The term *case* is used in many languages for Latinlike phenomena, it is especially useful in many languages of the Indo-European, Semitic, and Finno-Ugric families The meanings of the cases in one language have no sure correspondence with the meanings in another, and the use of similar terminology has often obscured differences Indo-European languages at an early stage had eight cases, nominative, accusative, INSTRUMENTAL, dative, ablative, genitive, LOCATIVE, and vocative Many English nouns have two cases, e g , *man* and *man's*, and a few pronouns have three, e.g., *he, him, his.*

casehardening see HARDENING

casein (kā'sēĭn), the chief PROTEIN of milk, constituting about 80 per cent of its total protein content Casein is a complex substance containing besides the protein material a phosphorus compound and is known, therefore, as a phosphoprotein It constitutes the curd of milk and is precipitated by the action of rennin, an enzyme. It is important in cheese making and is used in certain paints and glues and in making woolen fabrics Hardened by the action of formaldehyde, it is employed in the waterproofing of paper receptacles. Many articles are commonly manufactured from plastics prepared by this reaction of casein and formaldehyde

Case Institute of Technology, at Cleveland, nonsectarian, for men, chartered 1880, opened 1881 with a bequest from Leonard Case, called Case School of Applied Science until 1947 It is a school of science and engineering of university grade Warner and Swasey Observatory is here

Casella, Alfredo (älfrā'dō käsĕl'lä), 1883–1947, Italian composer, pianist, conductor, and writer on music, pupil of Faure at the Paris Conservatoire He taught piano at the Paris Conservatoire (1911–15) and at the St Cecilia Conservatory, Rome (1916–23) In 1917 he organized a society, reorganized (1923) with Malipiero and D'Annunzio as Corporazione delle Nuove Musiche, to promote the recognition of contemporary music He is the author of *L'evoluzione della musica a traverso la storia della cadenza perfetta* (1919) His best-known compositions are the ballets *Il convento veneziano* (1912) and *La Giara* (New York, 1925) Other works are piano pieces, songs, chamber music, orchestral works, and concertos

Casement, Roger David, 1864–1916, Irish rebel. In the course of British consular service (1895–1913) he exposed the atrocious conditions imposed on gatherers of wild rubber in the Congo and in the Putumayo river district in South America and was knighted (1911) for his services Though his background was Ulster Protestantism, Casement was an ardent Irish nationalist He went to Germany to gain aid for the rebellion of 1916 in Ireland He was arrested on his return to Ireland when he landed from a German submarine He was convicted in London of high treason, deprived of his knighthood, and hanged He is regarded by the Irish as a martyr patriot See biographies by Denis Gwynn (1930) and Geoffrey Parmiter (1936)

Caserta (kazĕr'ta), city (pop 30,910), capital of Caserta prov , Campania, S Italy It is noted for its sumptuous royal palace (built 1752–74) and **park**, called the Versailles of Naples The surrender of German forces in Italy to the Allies was signed here on April 29, 1945

Case School of Applied Science see CASE INSTITUTE OF TECHNOLOGY

Casey (kā'sē, kăs'ē), city (pop 2,543), E Ill , SW of Terre Haute, Ind , in a farm area, inc 1896

Casgrain, Henri Raymond (ärē' rämō' käsgrĭ'), 1831–1904, French Canadian historian, a priest educated at the Quebec seminary Ordained in 1856, he devoted himself to literature after 1874 His *Légendes canadiennes* in 1861 had won him an audience He was an enthusiast, fired by Garneau's history of the French Canadians and by the writers of French romanticism His *Pélerinage au pays d'Evangeline* (1887) was crowned by the French Academy *Histoire de la Mère Marie de l'Incarnation* (1864), *Les Promoters canadiens* (1876), *Montcalm et Lévis* (1891), and *Montcalm and Wolfe* ("Makers of Canada" series, 1905, rev ed , 1926) are selected titles of a long list, for he was an indefatigable worker Casgrain also collected and edited Lévis's papers (12 vols , 1889–96) He helped found the French Canadian periodicals *Les Soirées canadiennes* (1861) and *Le Foyer canadien* (1863).

cash, popular term for ready MONEY In commerce and banking the term is used in contradistinction to commercial paper To "cash" such paper means to convert it into currency In bookkeeping terms like petty cash and cashbook, the word has the same meaning "Cash payment" is opposed to

"credit," though cash payment may be made in coin, in notes, or by check

Cashel (kă'shŭl) [Irish, =castle], urban district (pop. 3,072), Co Tipperary, Ireland, ENE of Tipperary An agricultural market now, it was the ancient capital of the kings of Munster and was the stronghold of Brian Boru The Rock of Cashel, rising 300 ft in the center of the town, has the ruins of the 14th-century St Patrick's Cathedral, a round tower (10th cent.), an ancient cross, and Cormac's Chapel (12th cent.). Below the Rock are the ruins of Hore Abbey (1272) Cashel is the seat of a Roman Catholic archbishop and of an Anglican bishop

cashew (kŭshōō', kăsh'ōō), tropical American tree (*Anacardium occidentale*), valued chiefly for the cashew nut of commerce The tree is of spreading growth, reaching a height of 20 to 40 ft, and is characterized by a white, acrid juice, which turns black on exposure to the air and is used in making a varnish that protects woodwork and books from insects The fruit is kidney-shaped, about an inch in length, and has a double shell The kernel, which is sweet, oily, and nutritious, is much used for food in the tropics after being roasted to destroy the caustic juice It yields a light-colored oil said to be the equal of olive oil and is utilized in various culinary ways by the natives In the West Indies it is used to flavor wine, particularly Madeira, and is imported into Great Britain for this purpose The nut grows on the end of a fleshy, pear-shaped stalk, called the cashew apple, which is white, yellow, or red, juicy and slightly acid, and is eaten by the native people or fermented to make wine

Cashmere, India see KASHMIR

Cashmere, farm trading town (pop 1,465), central Wash., on the Wenatchee river and near Wenatchee, settled 1889, inc 1904

cashmere see SHAWL

Casilear, John William (kăs'ĭlēr'), 1811–93, American engraver and painter, b New York city, studied with A B Durand and in Europe His *Sibyl* is a masterpiece of line engraving His landscapes in oil, in their minute and careful finish, reflect his training as an engraver Among his best-known pictures are *Distant View of the Catskills* and *Lake George* (Metropolitan Mus.), *River Scene, Catskill* (N Y Public Library), *Scene in New Hampshire,* and *Genesee Meadows*

Casilinum (kăsĭlī'nŭm), ancient town, Campania, S Italy Founded (c 600 B C) probably by the Etruscans, it became (5th cent B C) the capital of the Samnites. Under the Romans it was an important military station controlling the bridge of the Appian Way over the Volturno river It was destroyed by the Saracens in the 9th cent, the inhabitants of near-by CAPUA moved here soon after and changed its name from Casilinum to Capua

Casimir I (Casimir the Restorer) (kă'sĭmēr), Pol *Kazimierz Odnowiciel,* c 1015–1058, Polish ruler, duke of Poland (1040–58), son of MIESZKO II He extricated Poland from the chaos of his father's reign but was never crowned king His son and successor was Boleslaus II

Casimir II, 1138–94, Polish ruler (1177–94), youngest son of Boleslaus III He drove his brother, Mieszko III, from power at Cracow in 1177, thus gaining the principal of the four duchies created by their father and the throne of Poland, which went with it At the Congress of Leczyca (1180) the nobility and clergy, in return for privileges he had granted them, vested hereditary rights as rulers of Cracow in Casimir's descendants (see PIAST) Casimir II himself was never crowned king

Casimir III (Casimir the Great), Pol *Kazimierz Wielki,* 1310–70, king of Poland (1333–70), son of Ladislaus I and last of the PIAST dynasty He brought comparative peace to Poland In 1335 he recognized the suzerainty of John of Luxemburg, king of Bohemia, over the Silesian branch of the Piasts, in return, John renounced his claim to the Polish throne. By the Treaty of Kalisz (1343) with the Teutonic Knights, Casimir consolidated his territories, and later he acquired most of the duchy of Galich-Vladimir (see GALICH) Casimir strengthened the royal power at the expense of the nobles and the clergy, codified Polish law in the Statute of Wislica, alleviating the lot of the peasants (hence he was called "king of the peasants"), improved the condition of the Jews, encouraged industry, commerce, and agriculture, and founded the Univ of Cracow Casimir was succeeded by his nephew, King Louis I of Hungary

Casimir IV, 1427–92, king of Poland (1447–92) He succeeded his brother LADISLAUS III as ruler of Poland and Lithuania The two nations he united more closely by placing them on an equal footing With the Second Peace of TORUN (1466) he ended a 14-year war with the Teutonic Knights His successors were his sons John I (1492–1501), Alexander I (1501–5), and Sigismund I (1506–48).

Casimir-Perier (kăzēmēr'-pĕryā'), name assumed after 1873 by **Auguste Casimir Victor Laurent Périer** (ōgüst', vĕktōr' lōrā'), 1811–78, French statesman, son of Casimir PÉRIER He was minister of the interior (1871–72) His son **Jean Paul Pierre Casimir-Perier** (zhă' pōl' pyĕr'), 1847–1907, succeeded (1894) Sadi Carnot as president of France. A moderate republican, he was attacked by the increasingly important left-wing parties and resigned early in 1895 Félix Faure succeeded him.

casino or **cassino** (both kŭsē'nō), card game played with a full deck by two to four players. Four cards are dealt to each player, and four open cards are dealt to the table A player takes in cards by matching his cards with cards of corresponding indices on the table or by "building"—adding two or more cards to total the index value of one in the hand. One may also "build" in the same value, e g, by putting a 4 on a 4 and picking both up with a third 4 Aces count as one, face cards only have matching value The game ends after all the cards of the deck are dealt in successive hands of four cards each The object is to take the greatest number of cards (counting 3 points) and the greatest number of spades (1 point), the 10 of diamonds or big casino (2 points), the 2 of spades or little casino (1 point), and the aces (counting 1 point each) Casino probably originated in Italy See R L Frey, ed., *The New Complete Hoyle* (1947).

Casiphia (kăsĭf'ēu, kăsĭfī'ŭ), place, on the way from Babylon to Jerusalem Ezra 8 17

Casiquiare (käsēkyä'rā), river, c 100 mi long, S Venezuela Also called the Canal Casiquiare or BRAZOS Casiquiare, it is formed by a dividing in the course of the Orinoco It flows SW to the Río Negro, thus linking the Orinoco and Amazon basins

Casket Letters see MARY QUEEN OF SCOTS

Caskets or **Casquets,** group of dangerous rocky isles in the English Channel near Alderney

Caslon, William (kăz'lun), 1692–1766, English type founder He worked first in London as an engraver of gunlocks The use of the "old-style" types designed by him was discontinued for many years while "modern" types of John BASKERVILLE and others were preferred, but the merits of Caslon's types were rediscovered, and their standing is registered in the printers' maxim, "When in doubt, use Caslon" The individual letters are less impressive than those of Baskerville and Giambattista BODONI, but they have the merit of combining marvelously into legible words and pages in which no detail of line or variation in "color" distracts a reader's attention from an author's meaning In Caslon's "old-style" type, the contrast of light and heavy lines is not stressed as in "modern" type, and the serifs are inconspicuous, and at the tops of roman lowercase letters they are sloping, they are not decorations, but are mere aids to the eye in recognizing the letters

Casluhim (kăs'lūhĭm, kăslū'–), ancient unidentified tribe Gen 10 14, 1 Chron 1 12

Caspar. see WISE MEN OF THE EAST

Casper, city (pop 17,964), co seat of Natrona co, E central Wyo, on the North Platte river, founded 1888 with the coming of the railroad, inc 1889 It is a rail, distributing, and processing center in an oil and livestock area The first well was tapped at Salt Creek field (1890), the Teapot Dome and Big Muddy fields followed, and Casper boomed Wells in the Lost Soldier field of Sweetwater co brought another boom in 1948 The city is also the center of a large wool-shipping district At this fording place on the Oregon Trail the Mormons in 1847 established a ferry, which was in the 1850s superseded by Platte Bridge A junior college and a state home for dependent children are here Near by are Hell's Half Acre, an eroded area Independence Rock, a granite landmark on the Oregon Trail, the site of old Fort Caspar (a clerk's error accounts for the later spelling of the name), and Casper Mt, c 8,000 ft high, with a recreational area Near Casper the Kendrick project of the Bureau of Reclamation comprises 66,000 acres The project has two dams in the North Platte—Seminoe Dam (est 1939), 295 ft high and 525 ft long, with a power plant and storage reservoir, and Alcova Dam (est 1938), 265 ft high and 763 ft long—and also uses water from Pathfinder Reservoir (see NORTH PLATTE PROJECT) Kortes Dam (begun 1946), between Seminoe and Pathfinder, is part of the MISSOURI RIVER BASIN PROJECT See A J Mokler, *History of Natrona County, Wyoming, 1888 1923* (1922)

Caspian, village (pop 1,797), SW Upper Peninsula, N Mich., near the Wis line and S of L'Anse, in a lake region, inc 1918

Caspian dialects, related Western Iranian dialects of the Indo-Iranian subfamily of Indo-European languages See LANGUAGE (table)

Caspian Gates see DERBENT, RSFSR

Caspian Sea, Latin *Mare Caspium* or *Mare Hyrcanum,* salt lake, area c 163,800 sq mi, USSR and Iran, between Europe and Asia, the largest inland body of water in the world. The larger part lies in Soviet territory, only the southern shore belongs to Iran The Caspian Sea is at 92 ft. below sea level, it reaches its maximum depth (c 3,200 ft) in the south The Caucasus rises from its southwestern shore, and the Elburz mts, parallel its southern coast It receives the Volga, Ural, Kura, and Terek rivers, but it has no outlet. Evaporation has a particularly high rate in the eastern inlet called KARA-BOGAZ-GOL, which is exploited for its salt. Variation in evaporation accounts for the great changes in the size of the sea in the course of history. Large projects are under way for raising its level, which has sunk 7 ft since 1936. The chief ports on the Caspian are BAKU, the oil center, and ASTRAKHAN, at the mouth of the Volga. Oil is shipped across the Caspian from Baku to Astrakhan, from where it continues on the Volga. The Caspian is also of great importance for its fisheries and sealeries The northern part of the sea is the chief source of black caviar

Casquets, in the English Channel see CASKETS

Cass, Lewis, 1782–1866, American statesman, b Exeter, N.H He established (1802) himself as a lawyer in Zanesville, Ohio, and was U.S marshal for Ohio from 1807 to 1812 In the War of 1812 Cass's command was included against his will in the forces which Gen William HULL surrendered to the British at Detroit in Aug., 1812 He was made a colonel in the regular army and a major general of volunteers before his release from parole in Jan., 1813, and fought with distinction at the battle of the Thames (Oct 5, 1813) Left in command at Detroit, Cass was also appointed governor of Michigan Territory, a post he filled ably for 18 years (1813–31). Made Secretary of War in 1831, he favored removal of the Indians beyond the Mississippi and supported President Andrew Jackson in the nullification crisis He was minister to France (1836–42) and U S Senator from Michigan (1845–48, 1849–57) Cass was the Democratic candidate for President in 1848, but because of the defection of the antislavery Democrats led by Martin Van Buren, who became the candidate of the Free-Soil party, he lost the election to the Whig candidate, Zachary Taylor President James Buchanan made Cass his Secretary of State, but Cass resigned in Dec., 1860, in protest against the decision not to reinforce the forts of Charleston, S C It is said that he was willing to withdraw his resignation, but Buchanan let it stand See biography by A C McLaughlin (1891), P C Auchampaugh, *James Buchanan and His Cabinet on the Eve of Secession* (1926)

Cassaba see KASSABA

Cassander (kŭsăn'dur), 354?–297 B C, king of Macedon, one of the chief figures in the wars of the DIADOCHI The son of Antipater, he was an officer under Alexander the Great, but there was ill feeling between them Cassander engaged after his father's death in vigorous warfare against Antipater's successor as regent, Polyperchon He was successful and by 318 B C had a preponderant influence in Macedonia and Greece Alexander's mother, Olympias, challenged this, putting Cassander's brother and many of his friends to death Cassander pursued her, crushed her army, and killed her (316 B C) Later, to strengthen his claim to the throne, he married Alexander's half sister, Thessalonica, and in 311 he murdered Alexander's widow, Roxana, and Alexander's son He resisted the efforts of Antigonus I to rebuild the empire and was one of the coalition that defeated Antigonus and Demetrius at Ipsus in 301 B C Thereafter he was secure in his possession of Macedon Potidaea was refounded by him and was renamed Cassandreia

Cassandra (kusăn'dru), in Greek legend, Trojan princess, daughter of PRIAM and HECUBA She learned the art of prophecy from Apollo, but because she would not accept him as a lover, her knowledge was changed to a curse—she was never believed She was violated by the Locrian AJAX and after the Trojan War was the slave of AGAMEMNON, whose wife, CLYTEMNESTRA, killed her

Cassandre, Adolphe Mouron (ädôlf' mōōrō' kăsă'drŭ), 1901–, French poster artist, b Russia Though he studied in the academic art schools of Paris, he considers himself self-taught His first poster was published in 1922, by 1923 he was well known as the artist of *Bûcheron* [woodcutter], a poster made for a cabinetmaker Later posters included designs for tennis matches, fairs, magazines, wines, shoes, horse races, steamships, and railways Cassandre's originality and clarity have made his designs classics of advertising and have influenced the development of the graphic arts.

Cassandreia, Greece see POTIDAEA

Cassano d'Adda (kăsă-sä'nō dad'dä), village, N Italy, 16 mi. NE of Milan and on the Adda. Here the French under Vendôme defeated the imperialists under Eugene of Savoy in 1705 (see SPANISH SUCCESSION, WAR OF THE) It was also the site of the victory (1799) of the French general Moreau over the Russians under Suvarov.

Cassatt, Alexander Johnston (kusăt'), 1839–1906, American railroad executive, b Pittsburgh, grad Rensselaer Polytechnic Institute, 1859. He entered (1861) the service of the Pennsylvania RR as a rodman and served (1880–82) as first vice president before he retired Recalled (1899) to the railroad as president, A J. Cassatt sponsored the "community of interest" plan, by which railway companies bought enough stock from one another to coordinate management against competitive rebate and the domination of big shipping firms Cassatt's administration was one of successful expansion, and he began the tunnel under the Hudson river and the terminal in New York city which brought the Pennsylvania RR to the heart of the city He was the brother of Mary Cassatt.

Cassatt, Mary (kŭsăt'), 1845–1926, American figure painter and etcher, b. Pittsburgh Most of her life was spent in France, where she was greatly influenced by her great French contemporaries, particularly Manet and Degas, whose friendship and esteem she enjoyed She early allied herself with the impressionists Motherhood was her favorite subject Her pictures are notable for their simplicity and originality, firm and vigorous treatment, and pleasing color She excelled also as a pastelist and etcher, and her dry points and color prints are greatly admired She is well represented in the public and private galleries of the United States Her best-known works include *The Young Mother*, a pastel (Luxembourg Mus., Paris), several versions of *Mother and Child* (in the Metropolitan Mus., Mus of Fine Arts, Boston, Worcester, Mass., Art Mus), *Lady at the Tea-Table* (Metropolitan Mus), *Modern Women*, a mural painted for the Women's Building of the Chicago exposition, and a fine portrait of the artist's mother See Forbes Watson, *Mary Cassatt* (1932)

cassava (kŭsä'vŭ) or **manioc** (mă'nēŏk), any plant of the genus *Manihot* having roots which yield cassava starch, a much-used nutritious food In South America it is roasted, boiled, baked into bread, fermented to an intoxicating beverage, or fed to animals, elsewhere it is used chiefly in the form of TAPIOCA or Brazilian arrowroot There are two kinds of cassava—the bitter and the sweet The bitter cassava, most commonly used, contains hydrocyanic acid in sufficient quantities to be deadly poisonous This poison is dispelled by heat, so that the roots are edible after cooking and are often prepared as a starch or flour The sweet cassava contains such a small quantity of the poison as to be edible when raw and is often used for fodder, for which it is grown in subtropical regions of the United States In Brazil, where it is native, cassava has long been a staple food In the tropics it is a shrubby perennial, easily cultivated and similar in appearance to the castor-oil plant, with clusters of large roots

Cass City, village (pop 1,362), S Mich, E of Bay City and on the Cass river, settled 1866, inc 1883 It is a farm trade center

Cassel, Gustav (gōs'tăf kä'sul), 1866–1945, Swedish economist, an authority on international financial problems He was a delegate to many world economic conferences, concerning himself especially with problems of reparations and the gold standard His books include *The Theory of Social Economy* (1918; Eng tr, 1923), *Money and Foreign Exchange after 1914* (1922), *Fundamental Thoughts on Economics* (1925), and *On Quantitative Thinking in Economics* (1935)

Cassel (kăsĕl'), town (pop 1,794), Nord dept, N France, near Dunkirk Here in 1328 PHILIP VI of France defeated the Flemings Here also the French defeated (1677) William of Orange (later William III of England) in the Dutch Wars

Cassel, Germany see KASSEL

Casselman, village (pop 1,021), SE Ont, on the South Nation river and SE of Ottawa

Casselton, city (pop 1,358), SE N Dak, W of Fargo, inc 1883 It is a commercial center in a grain-raising and dairy region

cassia see CINNAMON

Cassian (kă'shun), 360–435, leader in monasticism in the West, named John Cassian He settled at Marseilles (415) and established religious houses for men and for women He was attacked for Semi-Pelagianism (see PELAGIANISM), but he was trusted in Rome His *Collations*, spiritual writings for monks, had critical influence on the thought of St Benedict, St Gregory, and hence on all Benedictines, in matters touching ascetic and mystical life

Cassiar Mountains, range, N British Columbia, at the head of the Stikine river

Cassin, John, 1813–69, American ornithologist, b near Media, Pa He studied ornithology at the Academy of Natural Sciences, Philadelphia Though occupied with engraving and lithography, he arranged and identified, with the use of the Academy library, 26,000 specimens which Dr Thomas B Wilson had collected His classification and description of the Du Chaillu West African collection, appearing in the *Proceedings* of the Academy, was one of his most significant publications. He also wrote *Illustrations of the Birds of California, Texas, Oregon, British and Russian America* (1856) and, with others, *The Birds of North America* (1860)

Cassini (kăs-sē'nē), family of French astronomers and topographers, of Italian origin Four generations in succession were heads of the observatory at Paris, their combined periods in office covering 122 years **Giovanni Domenico Cassini** (jōvan'nē dōmā'nēkō), 1625–1712, b near Nice, was called by Louis XIV to take charge of the new observatory Naturalized soon after he took up his labors there in 1671, he organized the activities of the observatory He discovered four of the satellites of Saturn and described the structure of Saturn's ring and noted the division in the ring, determined the rotation of Mars; cooperated in determining the solar parallax; and is claimed to have made the earliest systematic observation of zodiacal light. **His son, Jacques Cassini** (shăk), 1677–1756, succeeded him in charge of the Paris Observatory in 1712 He had early achieved distinction in scientific circles The results of his principal labors are given in his published works, *Traité de la grandeur et de la figure de la terre* (1720) and *Éléments d'astronomie* (1740) His son, **César François Cassini** (sāzăr' frăswă'), known as Cassini de Thury, 1714–84, followed him as the head of the observatory In 1771 this ceased to be a dependency of the Academy of Sciences, and the post of director was created The most important works of César François are *Description géométrique de la terre* (1775) and *Description géométrique de la France* (1784). In 1744 he undertook the construction of a 'great topographical map of France which was completed by his son, **Jacques Dominique, comte de Cassini** (dōmēnēk' kōt' du), 1748–1845, his successor in the directorship of the observatory Opposed by the National Assembly, he resigned his post in 1793.

Cassino (kăs-sē'nō), town (1936 pop 9,208), Latium, central Italy, in the Apennines, on the Rapido river At the end of 1943 the town and the abbey of MONTE CASSINO on a near-by hill were the key defenses of the Germans blocking the Allied advance to Rome Despite repeated concentrated ground attacks started in Jan, 1944, despite the Allied attempt to divert German troops from here by landings at ANZIO, and despite the virtual destruction of town and abbey through aerial and ground shelling in February, the German positions held out until May 18, 1944

cassino see CASINO

Cassiodorus (Flavius Magnus Aurelius Cassiodorus Senator) (kăshōdō'rus), c 480–c 575, Roman statesman and author He held high office under Theodoric the Great and the succeeding Gothic rulers of Italy, who charged him with putting into appropriate official Latin their state papers and correspondence These he later collected as *Variae epistolae* Having retired to his estate, he founded two monasteries In one of these the leisure time of the monks was devoted to the copying of old manuscripts, which were thus preserved from otherwise certain loss Among his works were his *History of the Goths*, preserved in the abridgment of JORDANES, and a treatise on orthography His *Variae epistolae* have been condensed and translated by Thomas Hodgkin (1886)

Cassiopeia, in Greek legend see ANDROMEDA

Cassiopeia, in astronomy, a prominent northern constellation, visible above the horizon throughout the night Five bright stars in the constellation form a rough W in the sky Some see in this formation the shape of a chair known as Cassiopeia's Chair

Cassirer, Ernst (ĕrnst' kasĕr'ŭr), 1874–1945, German philosopher He was a professor at the Univ of Hamburg from 1919 until 1933, when he became a lecturer at Oxford Univ Cassirer was regarded as the leading representative of the Neo-Kantian Marburg school His detailed study of science and its relation to philosophy has extended the inquiries in both fields *Substanzbegriff und Funktionsbegriff* (1910), his best-known work, and *Zur Einstein'schen Relativitätstheorie* (1921) appeared in English as *Substance and Function and Einstein's Theory of Relativity* (1923) He has also written *Philosophie der symbolischen Formen* (1923–29), *Sprache und Mythos* (1925, Eng tr, *Language and Myth*, 1946), and *The Myth of the State* (1946), written in English

Cassius (kă'shus), Roman gens There were a number of well-known members **Spurius Cassius Viscellinus** (spyōō'rēus, vĭsul'nus), d c 485 B C, seems to have been consul several times In 493 B C he negotiated a treaty between Rome and the Latin cities on terms of equality In 486 B C he proposed that land be distributed equally among the Roman and the Latin poor (see AGRARIAN LAWS). It is said that the patricians, outraged at the suggestion, accused Cassius of royal aspirations and had him executed There are many legends concerning the man A descendant, **Quintus Cassius Longinus** (kwĭn'tus, lŏnjī'nus), d 45 B C, won a reputation for greed and corruption when a quaestor in Spain in 54 B C Five years later he was a tribune He and ANTONY, also a tribune, vetoed the attempts of the senate to deprive Julius CAESAR of his army When the senate overrode the tribunes on Jan 7, 49 B C, Cassius and Antony fled to Caesar, who crossed the Rubicon and commenced the civil war After Caesar's triumph, Cassius was given (47 B C) a post in Farther Spain There was a rebellion against him, and Caesar had to come from Italy to put it down. Cassius died in a shipwreck Best known of all was **Caius Cassius Longinus** (kā'ŭs, kī'ŭs), d 42 B C, leader in the successful conspiracy to assassinate Julius Caesar He fought as quaestor under M. Licinius Crassus (see CRASSUS, family) at CARRHAE in 53 B.C., saving what was left of the army after the battle He supported Pompey against Caesar, but was pardoned after the battle of PHARSALA He was made (44 B C) peregrine praetor, and Caesar had promised to make him governor of Syria. Before the premise could be fulfilled Cassius was a ringleader in the plot to kill Caesar. The plot involved more than 60 men (including M. Junius Brutus, Decimus Junius Brutus, C Cassius Parmensis, P. Servilius Casca, L Tillius Cimber, and C. Tribonius) and was successfully accomplished in the senate on the Ides of March in 44 B.C. When the people had been roused by Antony against the conspirators, Cassius went to Syria He managed to capture DOLABELLA at Laodicea and coordinated his own movements with those of Brutus Antony and Octavian (later AUGUSTUS) met them in battle at Philippi In the first engagement Cassius, thinking the battle lost, committed suicide In the second engagement Brutus was thoroughly defeated Another of the conspirators was **Caius Cassius Parmensis** (pärmĕn'sĭs), d 30 B C, a close relative of C Cassius Longinus He fought at Philippi and later with Sextus Pompeius After the defeat of Sextus Pompeius, Cassius remained away from Rome He later sided with Antony at Actium and was killed by order of Octavian

Cassius Dio Cocceianus, see DION CASSIUS

Cassivellaunus (kă"sĭvĭlō'nŭs), fl 54 B C, British chief, recognized as leader in the struggle against the invasion of Julius Caesar in 54 B C Caesar crossed the Thames into Cassivellaunus' home country, and, aided by the defection of certain British tribes (especially the Trinobantes), he attacked Cassivellaunus in his strong fort in the marshes and drove the Britons out with heavy losses After an unsuccessful attack against the Roman ship camp, Cassivellaunus sued for peace, which Caesar granted in return for hostages and annual tribute

Cass Lake, village (pop 1,904), N central Minn, on the west shore of Cass Lake, in a lumbering, dairying, and lake resort region, inc 1899 It was named for Lewis Cass, who explored this region in 1820 The Ojibwa Indian agency is here A forest experiment station and tree nursery are near by

cassone (kas-sō'nā), the Italian term for CHEST or coffer, usually a bridal or dower chest, highly ornate and given prominence in the home No piece of furniture of the Middle Ages and the Renaissance received more lavish decoration, the talent of such great artists as Donatello and Botticelli being freely employed for the carving and the painting which made the cassone a real work of art This chest was often of such size that two or three persons could conceal themselves in it

Cassopolis (kŭsŏ'pulĭs), resort village (pop 1,488), co seat of Cass co, SW Mich, on Stone Lake and NE of South Bend, Ind, in a farm area, settled 1831, inc 1863 The vicinity has Indian garden beds and mounds

cassowary (kăs'uwär"ē), flightless, swift-running, pugnacious forest bird of Australia and the Malay Archipelago, smaller than the related ostrich and emu The plumage is dark and glossy and the head and neck unfeathered, wattled, and brilliantly colored, with variations in the coloring in different species The head bears a horny protrusion

Cassville, city (pop 1,214), co seat of Barry co, SW Mo, SE of Joplin, platted 1845 A resort and fishing center in the Ozarks, it is also a shipping point for the fruits, dairy products, and poultry of the region

Castagno, Andrea del (ändrā'a dĕl kästä'nyō), d c 1457, Florentine painter His frescoes, best seen in the monastery of Sant' Apollonia, Florence, reveal him as one of the best of the Florentine realists of his period The equestrian portrait in fresco of Niccolò da Tolentino (cathedral, Florence), remarkable for its use of perspective and foreshortening, is one of his last works.

Castaigne, André (ädrā' kästăn'), 1861–, French illustrator and painter In 1890 he visited the United States, became director of an art school in Baltimore, and made many fine illustrations of Western subjects for *Century*, *Scribner's*, and other periodicals

Castaldi, Pamfilo (pämfē'lō kästal'dē), c 1398–c 1490, Italian humanist He is credited by some, on insufficient evidence, with the invention of printing See GUTENBERG, JOHANN

Castalia (kästā'lyu), spring near DELPHI, on the slopes of Mt PARNASSUS, sacred to Apollo and the Muses Consultants of the oracle had to wash in the spring

Castalion or **Castellio, Sébastien** (kästāl'yun, kăstĕl'yō), 1515–63, French Protestant theologian Castalion was with Calvin at Strasbourg and Geneva until, after doctrinal conflicts, he moved to Basel He obtained a chair of Greek literature in the university there Castalion is known for his defense of religious toleration in the preface to his Latin translation of the Bible (1551) An anonymous work on the execution of Servetus, *Concerning Heretics*, often attributed to Castalion, has appeared in English translation (1935) The name also appears as Castellion and Châtillon See Stefan Zweig, *Right to Heresy* (1936).

castanets, percussion instruments known to the ancient Egyptians and Greeks, possibly of Oriental origin They consist of two small concave pieces of hard wood or ivory, attached with strings to the fingers of the player and beaten together between the palm and the fingers. They are generally

used in pairs (one in each hand) to accompany Spanish dances and music.

Castaños, Francisco Javier (fränthĕ'skō hävyĕr' kästä'nyōs), 1756–1852, Spanish general. In the Peninsular War he defeated (1808) the French at BAILÉN and was created duke of Bailén

caste, a hereditary social class The caste is a closed group whose members are severely restricted in their choice of occupation and in degree of social participation Marriage outside the caste is prohibited. Social status is determined by the caste of one's birth and may not be transcended, as it may among social classes Certain religious minorities may voluntarily constitute a quasi-class within a society, less apt to be characterized by cultural distinctiveness than by their self-imposed social segregation A specialized labor group may operate as a caste within a society otherwise free of such distinctions In general, caste functions as a mechanism for maintaining *status quo* in a society Nowhere is caste better exemplified by degree of complexity and systematic operation than in India There are four chief castes (each having many subdivisions and its own rites and rules) the Brahmans, or priests, said, in the Vedas, to have sprung from the head of Brahma, the Kshatriyas, or soldiers, from his arms, the Vaisyas, farmers and merchants, from his belly, and the Sudras, or laborers, from his feet The PARIAH is of very low caste The castes are rigidly differentiated and reinforced by rituals and taboos pervading all thought and conduct. So widely do castes at social extremes differ in habits of everyday life and of worship, that only the close intergrading of intervening castes and the intercaste language communities serve to hold them within the single framework of Indian society The explanation that Indian castes were originally based on color lines to preserve the racial and cultural purity of conquering groups is inadequate historically to account for the physical and cultural variety of such groups Castes may reflect distinctiveness of religious practice, occupation, locale, culture status, or tribal affiliation, either exclusively or in part Divergence within a caste on any of these lines will tend to produce a subcaste which in time may form a separate caste Every type of social group as it appears may be fitted into this system of organizing society The introduction of new trades in recent times has in particular added to the increasing segmentation of Indian society On the other hand, there are strong leveling tendencies in modern India, derived from its growing Westernization and from the reform leadership of such men as Gandhi See J H Hutton, *Caste in India* (1946)

Castelar y Ripoll, Emilio (ämē'lyō kästälär' ē rēpō'lyu), 1832–99, Spanish statesman and author. A professor of history and philosophy at the Univ of Madrid and an active republican leader, he was foreign minister (1873–74) in the short-lived republic that followed the abdication of King Amadeus Under Alfonso XII he was a member of the Cortes He left historical, political, and literary works

Castel Gandolfo (kästĕl' gändōl'fō), village, Latium, central Italy, in the Alban Hills and 12 mi SE of Rome Overlooking Lake Albano, it possibly occupies the site of ancient Alba Longa Castel Gandolfo is the papal summer residence The papal palace (17th cent), its magnificent gardens, and the Villa Barberini enjoy extraterritorial rights

Castellammare di Stabia (kästĕl'lämä'rā dē stä'bya), city (pop 36,469), Campania, S Italy, beautifully situated on the Bay of Naples It has mineral springs used since Roman times and is also a commercial and industrial center, with navy yards founded in 1783 Ancient Stabiae, near here, was a favorite resort of the Romans, it was buried in the eruption of Mt. Vesuvius in A.D 79 The royal villa, Quisisana, built in 1310 and rebuilt in 1820, is now a hotel

Castellani, Sir Aldo, 1877–, British-Italian bacteriologist, b Florence, Italy He demonstrated the cause and mode of transmission of sleeping sickness (with Sir David Bruce and David Nabarro, 1903), discovered the spirochete of yaws (1905), and did other original work in bacteriology and in parasitic diseases of the skin He also lectured in tropical medicine in London and Ceylon, organized the school of tropical medicine at Tulane Univ and at Louisiana State Univ, and founded in Rome the Royal Institute for Tropical Diseases With A J Chalmers he wrote a standard history of tropical medicine. He was knighted in 1928

Castellio or Castellion, Sébastien: see CASTALION, SÉBASTIEN.

Castello or Castelli, Bernardo (bĕrnär'dō kästĕl'lō, -tĕl'lē), 1557–1629, Italian painter of the Genoese school, pupil of Cambiaso, whose style he imitated He was the friend of Tasso and made the designs for *Jerusalem Delivered*, some of which were subsequently engraved by Agostino Carracci Castello executed numerous works in the churches of Genoa His son, **Valerio Castello** (välär'yō), 1625–69, painter of historical scenes, was influenced by Procaccini and Correggio, but created a fine style of his own, particularly in the painting of battle scenes. He also executed many frescoes of high merit for the churches and monasteries of Genoa His best-known painting is *The Rape of the Sabines* (Palazzo Brignole, Genoa). *Moses Striking the Rock* is in the Louvre

Castello, Giovanni Battista (jōvän'nē bät-tēs'tä kästĕl'lō), c.1500–c 1569, Italian historical painter and architect of the Genoese school He was born near Bergamo and hence was called *Il Bergamasco* In 1567 he was summoned to Spain by Philip II and assisted in building the Escorial

Castello, Valerio: see CASTELLO, BERNARDO.

Castello-Branco, Camillo. see CASTELO BRANCO, CAMILO

Castellón de la Plana (kästĕlyōn' dā lä plä'nä), city (pop 42,324), capital of Castellón de la Plana prov, E Spain, in Valencia, 3 mi from its Mediterranean port of Grao Great quantities of oranges, lemons, grain, and wine are exported

Castelnau, Michel de (mēshĕl' du kastĕlnō'), c 1520–1592, French diplomat and soldier He early attracted the favorable notice of the cardinal of Lorraine (Charles de Guise) and performed important services for Anne, duc de Montmorency, and King Henry II In the religious wars he went on missions to England, Scotland, the Netherlands, and Savoy, and fought in the royal army, from 1575 to 1585 he served as ambassador to England Upon his return he fell out with the Guises and rendered valuable services against the LEAGUE to Henry III and Henry IV Although a Catholic, he favored a policy of moderation toward the Huguenots He left valuable memoirs

Castelo Branco, Camilo (kämē'lō kästĕ'lō bräng'kō), 1825–90, Portuguese novelist His tempestuous life was filled with incidents almost as improbable as those in his profuse, sentimental novels His highly colored, romantic stories are saved from being worthless by the singular poetic purity of his style Among the numerous books typical are *Os mysterios de Lisboa* (1854), *Romance de um homen rico* (1861), *Amor de perdiçao* (1862), and *Amor de salvaçâo* (1864). They were extremely popular. He spelled his name in the old form Camillo Castello-Branco, and he was vis onde de Correia Botelho

Castel Sant' Angelo (kästĕl' santän'jĕlō), **Hadrian's Mausoleum**, or **Hadrian's Mole**, massive construction on the right bank of the Tiber in Rome Originally built (A D 135–39) by Emperor Hadrian as a MAUSOLEUM for himself and his successors, it was completely changed through the centuries Frequently a place of refuge for the popes, it was connected to the Vatican by a secret passage It was used as a fortress and prison until 1870

Castiglione, Baldassare, Conte (bäldus-sä'rā kōn'tā kastĕlyō'nā), 1478–1529, Italian statesman attached to the court of the duke of Milan and later in the service of the duke of Urbino His famous *Libro del cortegiano* (1518, Eng tr, *The Courtier*, 1561), a treatise on etiquette, social problems, and intellectual accomplishments, is one of the great books of its time It gives a picture of 15th- and 16th-century court life See Ralph Roeder, *The Man of the Renaissance* (1933)

Castiglione, Giovanni Benedetto (jōvän'nē bänädĕt'tō), 1616–70, Italian painter and engraver of the Genoese school, called Il Grechetto or Il Benedetto He ranks as the greatest animal painter of Italy after Bassano In his later years Castiglione was court painter at Mantua He is best known for his landscapes and rural scenes with animals, but he also painted portraits and religious works, such as the *Nativity* (Genoa) His pictures are full of life and movement, the color rich and glowing Notable examples are *Noah and the Animals Entering the Ark*, a favorite subject (versions in Vienna and in the Uffizi), *A Caravan*; *Jacob with His Herds* (Madrid), and *Expulsion from the Temple* (Louvre) Castiglione's etchings, numbering about 70 and reflecting the influence of Rembrandt, are among the best produced in Italy during his century. The treatment of light and shade, as in his paintings, is particularly fine.

Castiglione delle Stiviere (kastĕlyō'nā dĕl'lā stēvyä'rā), small town, N Italy, 22 mi. NW of Mantua. Here Napoleon Bonaparte defeated the Austrians in 1796

Castile (kästēl'), Span *Castilla* (kastē'lya), region and former kingdom, central and N Spain, traditionally divided into Old Castile (Span. *Castilla la Vieja*), in the north, and New Castile (Span *Castilla la Nueva*), in the south. Old Castile (19,390 sq mi, pop 1,577,135) comprises the provinces of Ávila, Burgos, Logroño, Santander, Segovia, and Soria, named after their chief cities New Castile (27,933 sq mi; pop 3,129,270) comprises the provinces and cities of Ciudad Real, Cuenca, Guadalajara, Madrid, and Toledo In Castile is most of the high plateau of central Spain, while the Sierra de Gredos and the Sierra Guadarrama separate the two parts of the region The upper Duero, the Tagus, and the Guadiana rivers form the chief basins The soil of Castile is poor, and the climate severe Old Castile is given over to grain growing and sheep raising, and the bare, arid tableland has deteriorated much in use In more fertile areas, especially in New Castile, olive oil and grapes are produced. Agricultural methods are primitive, and irrigation, begun by the Moors, has made little progress since their time. Of the industries which flourished in the 14th and 15th cent. (particularly wool and silk manufactures) few have survived Mineral resources, however, include the rich mercury mines of ALMADÉN and coal and lead deposits The name Castile is derived from the numerous castles built here by the Christian nobles early in the reconquest from the Moors (8th–9th cent) Old Castile at first was a county of the kingdom of LEON, with Burgos its capital. Its independent-minded nobles, notably FERNÁN GONZÁLEZ, secured virtual autonomy by the 10th cent Sancho III of Navarre, who briefly annexed the county, made it into a kingdom for his son, FERDINAND I, in 1035 Leon was first united with Castile in 1037, but complex dynastic conflicts delayed the permanent union of the two realms, which was achieved under FERDINAND III in 1230 The Castilian kings played a leading role in the fight against the Moors, from whom they wrested New Castile At the same time they had to struggle against the turbulent nobles and were involved in dynastic disputes which plunged the country into civil war (see ALFONSO X and PETER I) Peter I limited the vast privileges of the nobles, but they were permanently curbed only late in the 15th cent. In 1479, after ISABELLA I had defeated the dynastic pretensions of JUANA LA BELTRANEJA, a personal union of Castile and Aragon was established under Isabella and her husband, Ferdinand II of Aragon (FERDINAND V of Castile). The union was made permanent with the accession (1516) of their grandson, Charles I (later Emperor Charles V), to the Spanish kingdoms Charles, who nominally shared the rule of Castile with his insane mother, JOANNA, until her death in 1555, suppressed the uprisings of the COMUNIDADES of Castile (1519–21, see CHARLES V, emperor). Castile became the core of the Spanish monarchy, centralized in Madrid, its capital after the 16th cent Its dialect became the standard literary language of Spain, and its history was merged with that of Spain

Castilla, Ramón (rämōn' kastē'ya), 1797–1867, president of Peru (1845–51, 1855–62) He fought under Antonio José de Sucre in the revolution against Spain (1821–24) in Peru and took part in the civil wars that followed An army general, energetic and resolute, he twice eliminated his rivals by armed force to become president He developed the guano, saltpeter, and nitrate industries, helped to reorganize finances, abolished slavery in Peru, and promulgated (1860) a new constitution which became the basis of future Peruvian government Although he overlooked considerable administrative corruption, Castilla brought unwonted order and a measure of prosperity to the republic

Castillejo, Cristóbal de (krēstō'bal dā kastēlya'hō), c 1490–1550, Spanish poet of the Renaissance As secretary to the king of Bohemia, brother of Emperor Charles V, he visited Vienna and other European cities His poems are grouped under the titles *Obras de amores* [works of love] and *Obras morales y de devoción* [moral and devotional works] He is considered the champion of the traditional Spanish as against the Italian verse form

Castillo de San Marcos National Monument: see SAINT AUGUSTINE, Fla

Castillon (kästēyō'), town (pop 2,737), Gironde dept, SW France, E of Bordeaux Here in 1453 the French defeated the English in the final great battle of the Hundred Years War

Castine (kästēn'), town (pop 662), S Maine, on a peninsula in Penobscot Bay, inc 1796 It includes Castine and North Castine villages Plymouth Colony had a trading post near the present Castine village after 1626, a few years later the French, who had had a mission here, seized the post, and thereafter the valuable site, known as Penobscot, changed hands several times between French, British, Dutch, and Americans A French adventurer called Baron Jean Vincent St Castin or Castine "ruled" it for 30 years after 1667. The British, whose permanent settlement began in 1760, held it in the Revolution and in the War of 1812. Part of the British-built Fort George (1779) is preserved, the site of the French Fort Pentagoet is marked, Fort Madison (1811, rebuilt in the Civil War) still stands, and there are interesting old houses. Wilson Museum has good collections

Castle, Vernon, 1887–1918, English dancer and aviator, whose real name was Vernon Castle Blythe. He studied civil engineering, but turned to the stage and made his debut in 1907. In 1911 he married Irene Foote (1893–, b New Rochelle, N.Y.), and in Paris (1912) their versions of such dances as the "Texas Tommy" and the "Grizzly Bear" brought them fame. The team originated the "Castle walk," the one-step, and "hesitation" waltzing, and Mrs Castle introduced bobbed hair and the slim, boyish figure to the ballroom and the world of fashion Vernon Castle was killed in an airplane accident while instructing a Canadian flying-corps contingent stationed in Texas

castle, type of fortified dwelling characteristic of the Middle Ages. Its twofold function of residence

and fortress developed because of the conditions of medieval life, in which war was endemic. The site of the castle was preferably a defensible eminence England and France, in general, did not afford such inaccessible locations as did the Rhine valley in Germany. The castle of Western Europe was a Norman creation, an outgrowth of the 10th- and 11th-century mound castle, which consisted of a great artificial mound of earth, the *motte*, surrounded by a dry ditch, or *fosse*, and surmounted by a wooden blockhouse and its encircling palisade With such structures the Normans repelled the Hungarian invasion and also maintained their supremacy in England Until well into the 12th cent, the only English development was the occasional substitution of a massive masonry keep inside the palisade—a form typified in the Tower of London Great changes soon took place as the science of siegecraft was evolved, provisions were made for an aggressive defense A type which became the model for many English and Norman castles was the formidable castle built at Arques in Normandy by William, uncle of the Conqueror A square donjon, or keep, was set against the strong outer walls of masonry; the entrance was protected by a double gate, two flanking round towers, and advanced earthworks The place enclosed by the outer circuit of walls was divided into two courts, or baileys, by a palisade Subterranean passages made detection of mining operations easy Before the close of the 12th cent the influence of the Crusaders was felt throughout the Continent and the British Isles In the East the Crusaders had discovered the value of double circuits of outer walls, the superiority of curved walls, and the advantages of flanking towers, preferably round, to protect each section of wall Thus early in the 13th cent the medieval castle, a mixture of Norman, English, and Byzantine elements, reached its full flower, as typified in the Château Gaillard on the Seine in France and Alnwick and the Conisborough in England In general, the castle was planned for security, the living quarters being rude, poorly lighted, and without provisions for comfort The keep contained the living quarters of the lord and his family, the rooms of state, and the prison cells Two independent systems of walls, each a fortress in itself, extended around the keep, the sections of the walls were flanked by towers, usually round, and the principal entrance was protected by strong gate towers, the massive gateway, with its portcullis and drawbridge, and the barbican, or advanced outwork The defenders operated from galleries at the tops of walls and from the flat roofs of towers, whose battlements were provided with embrasures and machicolations for shooting and dropping missiles on the attackers The fully developed castle was thus marked by successive series of defenses, the fall of the outer works did not necessarily mean the loss of the entire castle With the perfection of artillery and more settled political conditions, the castle lost its military importance The manor house replaced the castle as the residence of the wealthy landowner, but the architectural influence of the castle has persisted even to the present day, when crenelations and towers are still found in country houses See Eugène Viollet-le-Duc, *An Essay on Military Architecture of the Middle Ages* (Eng tr, 1860); G T Clark, *Medieval Military Architecture of England* (1884), C W C Oman, *The Art of War in the Middle Ages* (1885); Hugh Brown, *The English Castle* (1936)

Castlebar, Irish *Caisleán an Bharraigh*, urban district (pop 4,939), co seat of Co Mayo, Ireland It is the market for a cattle-raising and potato-growing area. Battles were fought here in 1641 and 1798

Castlebay, village, on Barra, Outer Hebrides, Scotland It is a fishing center

Castle Pinckney, fortification at the harbor entrance of Charleston, S C Built in 1797 when war with France seemed imminent, it was named for Charles Cotesworth Pinckney In 1924 it was made a national monument (3 5 acres)

Castlereagh, Robert Stewart, 2d **Viscount** (kă'sŭlrā), 1769–1822, British statesman, b Dublin. Entering the Irish Parliament in 1791 and the British Parliament in 1793, he was made chief secretary for Ireland by the Tory leader, William Pitt, in 1797 In Ireland he was largely responsible for suppressing the rebellion of 1793 despite French aid to the rebels Having worked for the Act of Union of England and Ireland (1800) he resigned with Pitt in 1801 when George III refused to allow Catholic Emancipation President of the India board of control after 1802, he was later (1805, 1807–9) secretary of war. In that office during the crisis of Great Britain's struggle with Napoleon I, he planned the reorganization of the army, the Peninsular War against the French, and the effective coordination of British land and sea power, and after early disasters he succeeded in putting Arthur Wellesley (later duke of Wellington) in command. Differences with his colleague, George CANNING, flared into a serious political betrayal by Canning which Castlereagh discovered just after an ineptly commanded expedition against Walcheren had failed. They fought a duel in which Canning was wounded, and both resigned As foreign secretary (1812–22) under Lord Liverpool, Castlereagh helped to organize the successful coalition against Napoleon I, partly by secret treaties promising territorial changes Going himself to Chaumont (1814), he obtained that "concert of Europe" later confirmed by the QUADRUPLE ALLIANCE (1815) He was the constant advocate of moderate terms for France at the peace conference in Paris (1815) and in the Congress of Vienna (see VIENNA, CONGRESS OF) and agreed with Prince Metternich's policy of maintaining a balance of power and the ascendancy of conservative governments as the best way to assure peace, which he regarded as the most immediate necessity Though his main concern was still with foreign affairs, he was chiefly blamed for repressive measures used to put down unrest in England He attempted in 1818 (at the conference held in Aachen) and later to curb the desire of the reactionary powers to intervene in the domestic affairs of other nations to prevent revolutions, and he was about to go to the Congress at Verona to protest again when he committed suicide He became 2d marquess of Londonderry on his father's death in 1821 One of the foremost statesmen of his time, Castlereagh was cold in personality and lacked ability as an orator, he never gained easy popularity Only since the end of the First World War has his importance as a European diplomat been fully and generally recognized See biography by J D R Marriott (1936)

Castle Rock, farm trade town (pop 1,182), SW Wash, on the Cowlitz river and N of Longview, settled in the 1880s, inc 1890

Castle Shannon, borough (pop 3,970), SW Pa, c 5 mi S of Pittsburgh, inc 1919

Castleton, village, Derbyshire, England, in the Peak district On a near-by hill is the Castle of the Peak, or Peveril Castle, built by William Peveril, natural son of William the Conqueror The castle is the scene of part of Scott's *Peveril of the Peak* The Norman village church contains an old library In the vicinity are Peak Cavern, Speedwell Mine, the Blue John Mine (in which fluor spar is obtained), and other caverns

Castleton, town (pop 1,601), W Vt, W of Rutland in the Lake Bomoseen summer resort area, chartered 1761, settled 1770 Zadock Remington came in 1770, at his tavern the Ticonderoga recruits of Ethan Allen and Seth Warner met in 1775 The town is the seat of a state teachers college

Castleton-on-Hudson, village (pop 1,515), E N Y, on the east bank of the Hudson and S of Albany, settled c 1630 by Dutch, inc 1827 Paper boxes are made here

Castletown, seaport, on the southeast coast of the Isle of Man, Great Britain It is an old town, formerly capital of the island, and is the site of a 14th-century castle and of King William's College

Castor and Pollux, in Greek and Roman religion, twin heroes called the Dioscuri [Gr, =youths of Zeus] Pollux is a Latin form of the Greek name Polydeuces They were the sons of LEDA by Zeus or by Tyndareus, one legend makes Castor the son of Tyndareus and Pollux the son of Zeus The two were gigantic and gifted in battle When Theseus carried off their sister Helen, they recovered her They took part in the CALYDONIAN HUNT and in the ARGONAUT expedition When Castor was killed, Zeus made the brothers into the constellation GEMINI According to the story that Pollux alone was the son of Zeus, Pollux asked that Castor share his immortality, and the request was granted, the brothers being allowed to spend half their time below the earth, half the time above They were said to appear in battle to aid the side they had chosen, the most famous apparition being in aid of the Romans against the Latins in the battle of Lake Regillus (traditionally c 496 B C) They were highly honored in Rome especially by the knights (the equites). Castor was particularly notable for training horses, Pollux as a boxer They were together patrons of sailors, and the phenomenon of St Elmo's fire was known to ancients and still sometimes today, particularly if double, as Castor and Pollux

castor oil, oil expressed from the seed of the castor bean or castor oil plant (*Ricinus communis*), probably native to tropical Africa The plant now grows both wild and under cultivation in most temperate and tropical regions In the tropics it is treelike, but in colder areas it is an annual often grown for its decorative effect The leaves are palmately compound with from 5 to 12 dentate or serrated lobes The oil content of the seeds varies from about 25 to 50 percent After the hulls are removed the seeds are cold-pressed Medicinal castor oil is prepared from the yield of the first pressing Oil obtained from the second pressing and by solvent extraction is used as a lubricant for airplane motors and other machinery, as a softening agent in making artificial leather, in the dressing of genuine leather, in brake fluids, in the production of Turkey-red oil, in paint, and in a plastic material The seeds contain a poison, ricin Formerly the oil meal could be used only for fertilizer, but the discovery of a process for removing the poison makes the residue usable as cattle feed

Castracani, Castruccio (kästrōōt'chō kästräkä'nē), 1281–1328, duke of Lucca His early life was spent in exile After his return he was made captain (1316) then lord of Lucca for life He was the leader of the Ghibellines of all Tuscany, waged long wars against Florence, and conquered Volterra, Pistoia, and the Lunigiana Emperor Louis IV recognized him as duke of Lucca (1327) After recovering Pistoia, which had rebelled, he was threatening Florence itself when he died. His principality disappeared with him

Castren, Matthias Alexander, Swed *Castrén* (mätt'äs älĕksän'dûr kästrān'), 1813–52, Finnish philologist, one of the first scholars to study the Finno-Ugric languages He was long a professor at the Univ of Helsingfors (now Helsinki)

Castries (kä'strēz, kä'strēs, kästrē'), town (pop c 7,000), capital of SAINT LUCIA, British West Indies It has an excellent landlocked harbor.

Castriota, George. see SCANDERBEG

Castro, Cipriano (sēprēn'nō kä'strō), 1858?–1924, president of Venezuela (1901–8), called by his followers the Lion of the Andes In 1899 he overthrew President Andrade and set up his own government Castro's administration is notable because of the financial claims (see VENEZUELA CLAIMS) made by several foreign powers and his defiance of them A stern and arbitrary *caudillo* acting for his own advantage, Castro yet worked for the material advancement of his country Briefly in 1906 he retired because of ill-health in favor of Vice President Juan Vicente GÓMEZ, but after differences of opinion Castro again assumed power In 1908 he went to Europe for medical attention Hardly had he set sail before congress deposed him and Gómez took control Castro died in exile

Castro, Inés de, or **Inez de Castro** (both I'nĕs dŭ kä'strō, Port ēnāsh' dŭ käsh'trō), d 1355, Galician noblewoman, chief character in a romantic tragedy of real life She was celebrated for her beauty and was called *Colo de Garça* [heron throat] for her grace She came (1340) to Portugal as a lady in waiting to Constance of Castile, who was married to the heir to the Portuguese throne, Dom Pedro (later PETER I) He fell in love with her Though his father, Alfonso IV, banished her from court, the prince continued to see her After Constance died (1345), he established a household with her at Coimbra, where they lived an idyllic life, and she bore him four children Her brothers, however, gained political influence through the prince and awakened the opposition of powerful advisers of Alfonso IV Three of those advisers persuaded the king that Inés must be removed It is said that the king himself went with the purpose of destroying her but was moved by the pleas of her children (the king's grandchildren) The three advisers, unmoved, later shook the king's determination and with his permission returned and murdered Inés The prince was overcome with grief and anger and led a rebellion Peace was restored, and the prince promised to forgive the murderers, but when he became king (1357), he set out to hunt them down Two he recovered from Castile and executed horribly, the third escaped He announced that he had been secretly married to Inés and had two tombs made and installed at Alcobaça showing the life story of Inés in marble It is probably not true that he had her disinterred and crowned as queen, but that story was immortalized in a drama of Juan Ruiz de Alarcón The romantic story of the love affair has been a favorite theme of Portuguese writers and has been much used by Spanish and other writers also

Castro, Vaca de see VACA DE CASTRO, CRISTÓBAL

Castrogiovanni, Italy see ENNA

Castroville, unincorporated town (pop c 700), SW Texas, W of San Antonio Settled in 1844 by Alsatians and other Europeans brought by Henry Castro (Henri, comte de Castro), it is remarkable for preserving Old World customs and architecture

Castro y Bellvís, Guillén de (gōlyän' dā kas'trō ē bĕlvēs'), 1569–1631, Spanish dramatist, best known of the Valencian group of playwrights of the Golden Age Some of his plays are *El Narciso en su opinión*, *Los malcasados de Valencia*, *La fuerza de la costumbre*, *Pagar en propia moneda*, and *La piedad en la justicia* *Las mocedades del Cid*, considered his masterpiece, is a historical drama which furnished Corneille with the material for his play *Le Cid* An edition of his comedies was published in 1618, there may have been an earlier one in 1614

casuistry (kăzh'ōōistrē), application of general moral rules to particular problems, especially when the decision to be made involves a conflict of rules Strictly, any thoughtful ethical decision exemplifies casuistry However, the conflict of rules sometimes leads to involved legalisms and subtleties, with consequent apparent hairsplitting and rationalization Where laws, ethical or civil, are codified

and interpreted by a specially-designated group of persons, complicated schools of interpretation are almost sure to develop. Those who hold that the individual conscience is the major arbiter of ethics frequently exhibit scorn for the practice of casuistry

cat, small domestic carnivorous mammal, related to the lion, tiger, leopard, jaguar, and puma Retractile claws and acute senses—including eyesight which functions in very dim light—are important in its success as a destroyer of rats and mice, its small size, cleanliness, and amiability contribute to its popularity as a pet Cat breeds may be classified as long-haired and short-haired, the short-haired being in general slenderer and more active than the long-haired Black, white, blue, red, cream, smoke, chinchilla, and shaded silver cats are known, as well as red, brown, or silver tabbies—marked with darker stripes, as in watered silk—and tortoise-shells, with patches of red, black, and yellow Some colors are commoner among short-haired than among long-haired cats, or among males than among females, or vice versa Among long-haired cats raised in Europe and America, Persians and Angoras were long distinguished, but interbreeding has made such distinctions unsafe, and the name Persian is now the generally accepted one The Manx cat is a tailless, short-haired cat, coming in historic times from the Isle of Man, but perhaps originating, as a legend has it, in the East, where there are other tailless cats The Siamese cat is a fawn-colored short-haired breed with seal brown or blue markings Among other breeds are the sacred cat of Burma and the Tibetan temple cat (both long-haired), Abyssinian (short-haired), Paraguayan (extremely small), and Mexican hairless (rare) The common short-haired cat probably counts the tame cat of ancient Egypt and European wildcats among its forebears Long-haired cats seem to have originated in Asia See Evelyn Buckworth-Herne-Soame, *Cats* (1934), E B Simmons, *Cats* (1935), Carl van Vechten, *The Tiger in the House* (new ed , 1936), I M Mellen, *A Practical Cat Book* (1939) and *The Science and Mystery of the Cat* (1940), Doris Bryant, *Care and Handling of Cats* (1944 ed), L H Fairchild and H G Fairchild, *Cats and All about Them* (rev ed , 1947), M G Delinger, *Complete Book of the Cat* (1948)

catacombs (kăt'-), burial places of the early Christians, arranged in extensive subterranean vaults and galleries They served incidentally for refuge from persecution and for religious services Catacombs exist at Rome, Naples, Chiusi, Syracuse, and Paris, at Alexandria and Susa in N Africa, and in Asia Minor and other areas inhabited by the early Christians Those at Rome are the most important and extensive Though among Greeks and Romans cremation was the rule, there was no bar against burial for Christians, and the catacombs were not constructed in secrecy Ordinances forbade interment within the city precincts, and all the Roman catacombs consequently are outside the city gates They lie from 22 to 65 ft beneath ground level and occupy a space estimated at more than 600 acres, though much of this is in several levels, one above another The oldest remains date from the 1st cent A D , and construction continued till the early 5th cent Excavated exclusively in those places where the subsoil tufa or soft rock possessed the suitable granular structure, they consisted primarily of narrow passages, generally about 3 ft. wide Excavated from the rock, and lining the walls of these passages, are the *loculi*, or recesses, of the proper depth to contain the bodies These niches, arranged one above another in tiers, were sealed after the burials with slabs of marble or terra cotta which bore painted or incised inscriptions Some passages gave access to separate chambers or *cubicula*, usually about 12 ft square but sometimes circular or polygonal, which were privately owned family vaults or contained the tomb of a martyr In these the bodies were often in carved sarcophagi which stood within arched niches, and the rooms were used for the liturgy, that is, they became underground churches The walls and ceilings were plastered, and sometimes open shafts for lighting extended to the ground above In some catacombs are seen larger rooms and even rooms arranged in groups, in the catacombs of Sant' Agnese such a group forms a miniature church In addition, the intricate underground corridors undoubtedly served as the best possible refuges from anti-Christian violence. The spreading of the catacombs, the joining together of separate areas, and the cutting of passages, one above the other, in as many as five successive levels, eventually produced burial places of labyrinthine character The walls and ceilings of plaster were customarily painted with fresco decorations, and in these can be studied the actual beginnings of Christian art. Religious subjects started to appear in the 2d cent , and the earlier frescoes confined themselves to the use of symbols. In Rome the remains of Jewish catacombs also are found Even after official recognition of Christianity in 313 burials continued, through a desire for interment near the martyrs, in addition the catacombs became shrines of pilgrimage The invasions of Goths, Vandals, Lombards, and Saracens meant the plundering of the catacombs and the robbing of their graves for the bones of saints. Several popes worked at restoring these sacred places and revived worship at the tombs of the martyrs, but by the 8th cent the bodies had been mainly transferred to churches; by the 10th cent the catacombs, filled with debris, were well forgotten. In 1578 they were rediscovered Their preservation and maintenance have since been under control of the papacy In the Roman liturgy the requirement that Mass be said in the presence of lighted candles and over martyrs' relics is a conscious reminiscence of worship in the catacombs Exhaustive publications on the catacombs were produced by the archaeologist G B de Rossi (d 1894)

Catalan art. In Catalonia and the territories of the counts of Barcelona, art flowered early in the Middle Ages and continued to flourish through the Renaissance Some of the finest surviving altar-panel paintings of the Romanesque period are Catalan Many of these are preserved in the Museo del Parque, Barcelona, together with numerous frescoes transferred from the apses of Romanesque churches The small churches, often bare of sculptural ornament, were elaborately painted throughout, although usually only the decoration of the apse has survived A fine example from Santa María del Mar, Barcelona, is in the Museum of Fine Arts, Boston Superb examples of architectural sculpture also exist in many Catalan churches of the period Also Romanesque is the famous illuminated Bible from the abbey of Farfa, now in the Vatican Catalan art shares most of the characteristics of the international Romanesque style. A more obviously regional character is found in the Catalan painting of the 14th cent. and in the work of Ferrer Bassa and Jaime Serra, although Sienese influence is noteworthy With the 15th cent particularly in the paintings of Jaime Huguet, of Jaime, Rafael, and Pablo Vergós, and of other masters, the school reached its maturity in a profuse and highly decorative religious art of great beauty Only with Luis Dalmáu in the middle of the century did direct Flemish influence appear, and it never gained ascendancy The great period of Catalan painting as such closed with the 15th cent , although the province has never ceased to produce great individual artists See Chandler R Post, *A History of Spanish Painting* (9 vols in 14 parts, 1930–47), Vol VII

Catalan language, one of the Romanic languages of the Italic subgroup of Indo-European languages See LANGUAGE (table)

catalepsy (kă'tŭlĕpsē) [Gr , =seizure], neurosis characterized by a psychogenic fit Voluntary motion and sensibility are suspended, the muscles become rigid, the body is cold and pale, the respiration and pulse are slow, and the individual is speechless, the corneal reflex, however, remains active Attacks are of varying duration, from several minutes to days

Catalina Island: see SANTA CATALINA

catalogue, descriptive list of names or items, such as an alphabetical list on cards or in a book of the books in a library Assur-bani-pal's library at Nineveh was catalogued on shelves of slate The first known subject catalogue was compiled by Callimachus at the Alexandrian Library in the 3d cent B C The library at Pergamum also had a catalogue Early in the 9th cent A D the catalogues of the libraries of the monastery at Reichenau and of the abbey at Saint-Riquier, N France, had summaries of works catalogued In 1472 the monastic library at Clairvaux was recatalogued and one of the earliest union catalogues was made —of the contents of 160 Franciscan monastery libraries in England In 1475 the Vatican librarian, Platina, catalogued that library's 2,527 volumes About 1660 Clement, librarian of the Bibliothèque du Roi under Louis XV, compiled a subject catalogue and inventory of manuscripts The printing of the British Museum catalogue was begun by Panizzi as keeper (1837–56) of the printed books Charles A Cutter devised the modern dictionary catalogue (with author, title, and subject arranged in one alphabet) for the Boston Athenaeum library In 1901 the Library of Congress began the practice of printing their catalogue on cards 3 by 5 in and distributing them for a small amount Although many schemes have been proposed for cooperative cataloguing, this service has been more successful than any other. Many treatises on the technique of cataloguing have been issued See American Library Association, *Catalog Rules* (2d ed , 1941), Margaret Mann, *Introduction to Cataloging and the Classification of Books* (2d ed., 1943).

Catalonia (kătulō'nēu), Span *Cataluña* (kätälōō'nyä), region (12,332 sq mi , pop. 2,890,974), NE Spain, stretching from the Pyrenees at the French border southward along the Mediterranean It comprises four provinces, named after their capitals, BARCELONA, GERONA, LÉRIDA, and TARRAGONA. Barcelona is the historical capital Mostly hilly, the region produces cereals, olive oil, and one third of the wines of Spain The hydroelectric power furnished by the Ebro, Segre, and Cinca rivers have helped to industrialize Barcelona and Gerona provs. Textiles are the chief industrial products. Trade has been active along the Catalan coast since Greek and Roman times. The history of medieval Catalonia (which took its name from its many castles) is that of the counts of Barcelona, who emerged (9th cent.) as the chief lords in the Spanish March founded by Charlemagne United (1137) with ARAGON through the marriage of Count RAYMOND BERENGAR IV with Petronella of Aragon, Catalonia nevertheless preserved its own laws, its cortes, and its own language (akin to Provençal) CATALAN ART flourished in the Middle Ages In the cities, notably Barcelona, the burgher and merchant classes grew very powerful Catalan traders rivaled those of Genoa and Venice, and their maritime code was widely used in the 14th cent. Catalan merchants, and adventurers such as Roger de FLOR, were largely responsible for the expansion of the house of ARAGON up to the 15th cent Catalonia failed in its rebellion (1461–72) against JOHN II of Aragon, and after the union (1479) of Aragon and Castile, Catalonia declined because of the centralizing policy of the Spanish kings, the shifting of trade routes, and the expulsion of the Jews Agitation for autonomy was always strong In the Thirty Years War, Catalonia rose with French help against PHILIP IV, and in the War of the Spanish Succession it sided with Archduke Charles against Philip V, who in reprisal deprived it of all its privileges In the 19th and 20th cent it consistently supported the CARLISTS and all other movements which opposed the central government After the Spanish revolution of 1931 the Catalans established a separate government, first under Francisco MACIA, then under Luis COMPANYS, which in 1932 won autonomy from the Spanish Cortes. A revolution (1934) for complete independence failed, but in 1936 autonomy was restored In the civil war of 1936–39 Catalonia sided with the Loyalists and suffered heavily Barcelona was for a time the Loyalist capital The fall of Catalonia to Francisco Franco was ended by Feb , 1939, and it was fully incorporated into his centralized state

catalpa (kŭtă'lpu), name for any species of the genus *Catalpa* Two very similar species of catalpa are native to the United States, one to the South and one to the Middle West, but both have been widely planted and naturalized The frilly white blossoms are borne in the spring in large clusters and make the tree valued as an ornamental as well as a shade tree. The leaves are large and heart shaped, and the fruits are long, slender beanlike pods that have gained the tree the additional names of Indian bean, cigar tree, and Indian cigar tree Catalpa wood is resistant to decay and hence is used for fence posts, poles, and railroad ties

catalysis (kută'lŭsĭs), the changing of the speed of a chemical reaction The change is brought about by the introduction of some substance, called variously the **catalyst,** catalytic agent, or contact agent Positive catalysts increase the speed of a reaction and negative catalysts decrease the speed It is now believed that the catalyst takes some part in the chemical reaction, but after the reaction is completed the catalyst can be recovered unchanged chemically, although its physical properties may be somewhat altered Water acts in some cases as a catalyst since many substances, which when dry do not react, will enter into chemical reaction when in solution The temperature at which a reaction takes place can be lowered by the use of a catalyst When potassium chlorate is heated to its melting point, oxygen is not evolved, but when a catalyst, manganese dioxide, is introduced, oxygen is immediately and plentifully given off In the contact process, a commercial process for the preparation of sulphuric acid, a catalyst (usually either finely divided platinum or ferric oxide) is used to speed up the reactions involved Platinum (gauze) is used as a catalyst in the preparation of nitric acid by the oxidation of ammonia Hydrogen and nitrogen are combined to form ammonia in the Haber process using finely divided iron as a catalyst Various other substances, such as copper and nickel, exhibit catalytic action in other processes Enzymes act as catalysts in the digestion of food and in other processes, causing chemical changes to take place in their presence Certain poisons apparently retard a reaction, acting as negative catalysts Other substances prevent the decomposition of compounds at ordinary temperatures, acting thus as negative catalysts The exact way in which catalysts act is little understood

Catamarca (kätämär'kä), city (estimated pop 22,000), NW Argentina. Founded in 1683, it is an agricultural (wine, alfalfa, figs, and cotton), stock-raising, and mining center The city has a well-known shrine to Our Lady.

catamount: see PUMA

Catanduanes (katandwä'näs), island (552 sq mi , 1939 pop 99,976), off SE Luzon, in the Philippines Hemp and coconuts are grown, and there are manganese and copper mines The capital is Virac

Catania (kută'nēä, Ital kätä'nyä), city (pop 241,462), capital of Catania prov., E Sicily, Italy. It is a seaport and the second largest city of the island It lies at the foot of Mt Etna, in the plain of

Catania, a fertile agricultural region. Founded (8th cent. B.C.) by Chalcidian colonists, it was a flourishing Greek town and later a Roman colony. Catania suffered from several eruptions of Mt. Etna (especially in 1669, when the city was ringed by lava) and from earthquakes (notably in 1169 and in 1693), but it survived and is now a busy port and an important commercial and industrial center (flour mills, sulphur refineries, asphalt factories) It was heavily damaged in the Second World War Greek and Roman remains are few. There is a fine cathedral (12th and 18th cent.), a castle built by Emperor Frederick II, a university (founded 1444), and an observatory

Catanzaro (kätändzä'rō), city (pop 27,907), Calabria, S Italy, beautifully situated on a hill 12 mi from the Ionian Sea Founded (10th cent) by the Byzantines, it was famous until the 17th cent for its velvets and damasks

catapult (kă'tupŭlt″), machine used in medieval warfare It was in effect a giant crossbow operated by a windlass, and in the siege of castles, walled cities, or other fortifications it was employed to throw large stones against the walls or over them Another similar machine, the ballista, was used to throw smaller stones a greater distance Arrows could also be shot in rapid succession from a type of catapult (see BOW AND ARROW), and flaming arrows could be used to do great damage Catapults were also used in the ancient world at least as early as the 5th cent B C They passed into disuse after the use of gunpowder became common, and artillery was developed

cataract, in medicine Any condition that leads to opacity of the lens of the eye or of its capsule results in a cataract The cause may be faulty development before birth, mechanical injuries, heat, infections, toxic states (i e , ergot poisoning and diabetes), or senility The senile type usually affects both eyes There is gradual loss of vision The treatment consists of surgical removal of the lens and the use of strong glasses to compensate for the absence of the lens

Catargiu, Lascar (kätärjōō'), 1823–99, Rumanian statesman, of an ancient Walachian family He was unsuccessful as Conservative candidate (1859) against Alexander John Cuza for the rule of Moldavia and became leader of the opposition He was twice premier of Rumania (1871–76, 1891–95) and effected financial and agrarian reforms

catarrh (kutär'), inflammation of the mucous membranes accompanied by discharge It affects especially the respiratory tract, alimentary canal, genitourinary organs, and the conjunctiva Irritation by gases, dusts, or a mild degree of bacterial infection produces catarrh

Catasauqua (kătusô'kwu), borough (pop 4,764), E Pa , on the Lehigh river and near Allentown; inc c 1853 In 1914 the 75th anniversary of the use of anthracite in iron furnaces was celebrated here

catastrophism (kutăs'trŏfĭzm), in geology, the doctrine that at intervals in the earth's history all living things have been destroyed by cataclysms, e g , floods or earthquakes, and replaced by an entirely different population The theory, popularly accepted from the earliest times, was attacked in the 18th cent , notably by James Hutton, who may be regarded as the precursor of the opposite doctrine of uniformism Catastrophism, however, was more easily correlated with religious doctrines, e g , the Mosaic account of the Flood, and remained for some time the interpretation of the earth's history accepted by the great majority of geologists It was systematized and defended by Cuvier, whose position as the greatest geologist of his day easily overbore all opposition In the 19th cent. it was attacked by George Poulett Scrope and especially by Sir Charles Lyell, under whose influence the contrary doctrine gradually became more popular

Catatumbo (kätätōōm'bō) river flowing from the Colombian Andes E across NW Venezuela to Lake MARACAIBO Navigable in its lower course and with a railroad from the head of navigation to CÚCUTA, it is the chief outlet for the upper Maracaibo basin and NE Colombia Numerous oil wells are along the river

Catawba, river see WATEREE, river

Catawba Indians (kŭtô'bŭ), North American Indian tribe of Siouan stock, occupying a region in South Carolina A large and powerful group, they waged incessant but unsuccessful war against the Cherokee and the tribes of the Ohio river valley, sending war parties great distances Fighting and epidemics of smallpox reduced them to a small group in the 18th cent A few survivors are on a reservation in South Carolina

Catawissa (kătŭwĭs'ŭ), industrial borough (pop 2,053), E Pa , near the Susquehanna river S of Bloomsburg, laid out 1787, inc 1892 Shoes and textiles are made here

catbird, common North American bird related to the mockingbird It is slate gray, with black on the crown and tail and chestnut under tail coverts. It nests in briar tangles and shrubbery. Although it eats small fruits, it is of benefit in destroying insects. It is an expert singer and mimic. When alarmed or angry it utters a harsh mew. Its sly progress through bushes is also catlike. Some Australian bower birds are called catbirds

catch crop, any quick-growing crop sown between seasons of regular planting to make use of temporary idleness of the soil or to compensate for the failure of a main crop It may be such rapid-maturing vegetables as radishes, onions grown from sets, or spinach (planted between rows of slower-growing crops) or an annual legume, such as the soybean, which is valuable as fodder or, when plowed under, increases the soil's fertility and improves its physical condition See also COVER CROP

catchment area or **drainage basin**, area drained by a stream or other body of water The limits of a given catchment area are the heights of land—often called watersheds—separating it from neighboring drainage systems The amount of water reaching the river, reservoir, or lake from its catchment area depends upon the size of the area, the amount of precipitation, and the loss through evaporation (determined by temperature, winds, and other factors and varying with the season) and through absorption by the earth or by vegetation, absorption is greater, of course, when the soil or rock is permeable than when it is impermeable A permeable layer over an impermeable layer may act as a natural reservoir, supplying the river or lake in very dry seasons The catchment area is one of the primary considerations in the planning of a reservoir for water-supply purposes

Cateau, Le (lŭ kătō'), town (pop 7,682), Nord dept., N France It was formerly known as Le Cateau-Cambrésis In the First World War the town was the scene of heavy fighting during the British retreat from Mons in 1914, and again in 1918, when American, British, and French forces drove the Germans from strongly fortified posts

Cateau-Cambrésis, Treaty of (kătō'-kābrāsē'), 1559, concluded at Le Cateau, France, by representatives of HENRY II of France, PHILIP II of Spain, and ELIZABETH of England It put an end to the 60-year conflict between France and Spain begun with the ITALIAN WARS, in which HENRY VIII and later MARY I of England had intermittently sided against France The terms were a triumph for Spain France restored Savoy, except Saluzzo, to Duke EMMANUEL PHILIBERT, acknowledged Spanish hegemony over Italy, and consented to a rectification of its border with the Spanish Netherlands CALAIS, however, was confirmed in French possession by England Henry II's sister, Margaret, was given in marriage to Emmanuel Philibert of Savoy, Henry's daughter, Elisabeth of Valois, was given to Philip II of Spain

catechism (kă'tŭkĭzm) [Gr , =oral instruction], a series of questions and answers written for the purpose of teaching a religious system, especially to the young Among the earliest catechisms were those of Martin Luther (1520 and 1529), for the use of the people The greatest Calvinistic catechism was the Heidelberg Catechism (1563), revised at Dort (1619), used in the Dutch and German Reformed churches Other Calvinistic catechisms are the Longer and Shorter Catechisms of 1647 and 1648, drawn up to supplement the Westminster Confession, they are used in the Presbyterian churches The Anglican catechism in the Book of Common Prayer is comparatively short A catechism long in use in the Roman Catholic Church was that prepared by the Jesuit Peter Canisius, it appeared in 1556 The catechism of the Council of Trent, a document of high authority issued in 1566, is not really a catechism but a manual of instruction for use by the clergy The best-known Catholic catechism in England is the Penny Catechism, adopted by the bishops of England and Wales, that in the United States is the Baltimore Catechism

catechu (kă'tŭchōō) or **cutch**, extract from *Acacia catechu*, a native tree of India and Burma, containing catechutannic acid, catechuic acid, and decomposition products of these materials Black catechu is obtained by boiling wood chips from the tree into a thick syrup, which is evaporated and cast into solid blocks It appears as a dark solid, lustrous, very brittle, and having a sweet astringent taste It is soluble in caustic, alcohol, and boiling water Pale catechu, the terra japonica or gambier of commerce, is an extract from the leaves of a Malayan plant, *Uncaria gambier*, and is obtained by boiling the leaves and treating the resulting juice as in the preparation of black catechu This makes blocks of yellow or pale brown Both varieties are used in dyeing, giving brown and olive colors, in tanning, and to treat fishing lines and nets which are to be exposed to salt water. Sail canvas so treated is called tanned canvas Both varieties, because of their astringent properties, are used in medicine in certain intestinal disorders and hemorrhage

categorical imperative. see KANT, IMMANUEL

category, in formal logic, the basis of predication Thus an object may be described under various categories, as size, color, causality Aristotle set up 10 categories as determinations of being. Kant postulated 12 categories of understanding—ways in which mind grasps the phenomenal world. Other philosophers have used other organizations. Since a system of categories is the way in which a particular philosopher organizes what he believes to be knowledge, the formulation of that system varies from man to man and from period to period.

Catena, Vincenzo di Biagio (vēnchän'tsō dē byä'jō kătä'nä), c 1470–1531, Venetian painter. His earlier work reflects the influence of Giovanni Bellini —the *Madonna and Child* (Walker Gall , Liverpool) and *Madonna with Saints* (Venice Acad). In his later period Catena followed closely the style of Giorgione. With Giorgione and Titian, he was ranked by his contemporaries as one of the three great painters of the day The best works of this period are *Knight Adoring the Christ Child* (National Gall , London), *The Doge Leonardo Loredan Kneeling before the Madonna* (ducal palace, Venice); his masterpiece, *The Martyrdom of St Christina* (Church of Santa Maria Mater Domini, Venice), *Christ Giving the Keys to St Peter* (Gardner Mus , Boston), and two portraits and *Christ and the Samaritan Woman* (National Gall of Art, Washington, D C)

Caterham and Warlingham (kă'turum, wôr'lĭngum), urban district (1931 pop 19,512, 1943 estimated pop 27,100), Surrey, England, S of London. It has a military station

caterpillar see LARVA

catfish, fish characterized generally by having barbels around the mouth, an adipose fin, and a tough, scaleless skin which in some South American forms contains bony plates There are a number of Old and New World families Most of the larger species are good food fish. The largest in North America is the blue or Mississippi catfish, which usually weighs about 20 lb but sometimes reaches 150 lb. Stings can be inflicted by some forms, e g , the stone and tadpole catfishes and the mad tom, by means of a pectoral spine with a poison gland The wels or sheatfish of Central and Eastern Europe sometimes reaches a weight of 400 lb. An African form produces electricity (see ELECTRIC FISH) Some catfish make nests for their eggs, some males carry the developing eggs in their mouths, and in others the eggs become embedded in the underside of the female During dry seasons in the tropics catfish may burrow underground or make overland journeys in search of water They produce sounds with the aid of the air bladder Omnivorous feeders, they are valuable as scavengers

catgut or **gut**, cord made from the intestines of various animals (sheep and horses especially, but not cats) The membrane is chemically treated, and slender strands are woven together into cords of great strength, which are used for stringing musical instruments (such as the violin and the harp). Roman strings, imported from Italy, are considered the best for musical instruments Catgut is used also for stringing tennis rackets and for some surgical sutures

Cathari (kă'thurī) [Gr , =pure], generic name for the widespread dualistic religious movement of the Middle Ages Carried from the Balkans to Western Europe, it flourished in the 11th and the 12th cent. as far north as England, and it was known by various names and in various forms, e g , the BOGOMILS and the ALBIGENSES Catharism was descended from GNOSTICISM and MANICHAEISM and echoed many of the ideas of MARCION The Cathari tended to reject not only the outward symbols of Catholicism, such as the sacraments and the hierarchy, but also the basic relationship between God and man as taught by CHRISTIANITY. Instead, the Cathari believed in a dualistic universe, in which the God of the New Testament who reigned over spiritual things was in conflict with the evil god (or Satan) who ruled over matter Asceticism, absolute surrender of the flesh to the spirit, was to be cultivated as the means to perfection There were two classes of the Cathari, the believers and the Perfect. The believers passed to the ranks of the Perfect on acceptance of the *consolamentum* Thus, a sort of sacrament, was a laying on of hands The Catharist concept of Jesus resembled modalistic MONARCHIANISM in the West and ADOPTIONISM in the East Persecution, such as that by the INQUISITION, and the efforts of popes like Innocent III wiped out Catharism by the 15th cent

Cathay (kăthā'), medieval name for China, derived from the Khitai, the founders of the Liao dynasty. It was first used by Marco Polo and usually applied only to China N of the Yangtse river

Cathcart, William Schaw Cathcart, 1st **Earl**, 1755–1843, British general and diplomat. He served in both the American Revolution and the French Revolutionary Wars He performed his greatest service, as ambassador to Russia (1813–21), in organizing the last coalition against Napoleon (1813) He was created earl in 1814. It has been thought by some that he was involved in the alleged withdrawal of Alexander I at the time the emperor is supposed to have died

cathedral (–thē'drl) [Gr , =seat, i e , episcopal throne], the church in which a bishop presides The designation is not dependent upon the size or magnificence of a church edifice but is entirely a matter of its assignment as the church in which the bishop shall officiate The movement for cathedral construction had its inception in France, but was practically simultaneous over all of Europe, reaching a

peak in the early 13th cent. The great structures of the 13th and 14th cent. are the culminating expression of GOTHIC ARCHITECTURE By its mass and its lofty towers, the cathedral was often the most conspicuous structure of a city, and it served as a center, not only for the religious life, but in many cases for the more important matters of secular life. Great cathedrals have been built in modern times, modern in their planning and construction but generally adhering closely to medieval styles of architecture Among these are the Cathedral of St. John the Divine, New York city, originally designed by G. L. Heins and C. Grant La Farge, but redesigned in the Gothic style by Ralph Adams Cram, St Patrick's Cathedral, New York city, designed by James Renwick, the cathedral in Washington, D C., by Frohman, Robb, and Little, and the cathedral in Liverpool, England, by Sir Giles Gilbert Scott Among the most important medieval cathedrals are the following *France.* Amiens, Beauvais, Bourges, Chartres, Le Mans, Paris, Rouen, Rheims, Strasbourg, *England* Canterbury, Durham, Ely, Lincoln, Peterborough, Salisbury, Wells, Westminster Abbey, Winchester, York; *Germany* Bonn, Cologne, Ulm, Worms, *Belgium:* Antwerp, Brussels, Louvain, Ypres, *Italy:* Como, Florence, Milan, Monreale, Orvieto, Pisa, Siena; *Spain* Avila, Burgos, Barcelona, Salamanca, Seville, Toledo, *Sweden* Lund, Uppsala See Sartell Prentice, *The Heritage of the Cathedral* (1936); Harry Batsford and Charles Fry, *The Greater English Church of the Middle Ages* (1940).

Cathelineau, Jacques (shäk' kätulēnō'), 1759–93, French counterrevolutionary general, one of the leaders of the Catholic and royalist insurrection in the VENDÉE A capable commander, he gained several notable successes but was killed when making an entry into Nantes

Cather, Willa Sibert (kă'thûr), 1876–1947, American writer, b Winchester, Va., grad Univ of Nebraska, 1895 Successively newspaperwoman and English teacher in Pittsburgh, she traveled in France in her vacations She went to New York in 1904 and was an editor of *McClure's Magazine* from 1906 to 1912. *April Twilights* (1903, 1923), poems, and *The Troll Garden* (1905), short stories, were relatively unnoticed, and she first won attention with *O Pioneers!* (1913) This and other novels of Midwestern prairie life—*The Song of the Lark* (1915) and *My Ántonia* (1918)—and *A Lost Lady* (1923) are perhaps her most notable works, written with deceptively simple artistry and profound understanding Three short novels, vivid evocations of brief intervals in history, are *Death Comes for the Archbishop* (1927), priestly pioneers in New Mexico, *Shadows on the Rock* (1931), 17th-century Quebec, and *Sapphira and the Slave Girl* (1940), Virginia in the 1850s Among her other novels are *One of Ours* (1922), awarded the Pulitzer Prize although it is not one of her best works, and *The Professor's House* (1925) *Youth and the Bright Medusa* (1920), *Obscure Destinies* (1932), and the posthumous *The Old Beauty and Others* (1948) contain distinguished short stories *Not under Forty* (1936) is a book of essays on literary affairs and people Miss Cather's works were collected in a limited edition (13 vols, 1937–41)

Catherine: see also KATHARINE. There are other spellings of the name, such as Catharine, Katherine, and Kathryn.

Catherine, Saint, 4th cent ?, Alexandrian virgin martyr Nothing certain is known of her According to tradition she was learned Condemned to die on the wheel and miraculously saved, she was beheaded Her principal shrine is the great monastery of Mt Sinai. Attributes sword, crown, palm, wheel, and book The marriage of St Catherine with Christ, popular with Renaissance artists, represents symbolically the dedication of her virginity Feast Nov. 25

Catherine I, 1684?–1727, empress and tsarina of Russia (1725–27). Of Lavonian peasant origin, Martha Skavronskaya was a domestic when she was captured (1702) by Russian soldiers As mistress of Aleksandr D. MENSHIKOV she met Emperor Peter the Great, who made her his mistress After her conversion from the Lutheran to the Orthodox Church (when she changed her name from Martha to Catherine), Peter, who had divorced his first wife, married her (1711) In 1724 he had her crowned empress and joint ruler Her loyalty and devotion to her difficult husband were remarkable When Peter died without naming a successor, Menshikov and the guards raised Catherine to the throne. Her policy, dominated by Menshikov, was pacific and conciliatory. Peter II succeeded her, her daughter Elizabeth became empress in 1741.

Catherine II or **Catherine the Great,** 1729–96, empress and tsarina of Russia (1762–96), daughter of Christian Augustus, prince of Anhalt-Zerbst. She emerged from the obscurity of her relatively modest background when, in 1744, Empress Elizabeth of Russia, partly on the recommendation of Frederick II of Prussia, chose her as the wife of the future PETER III Accepting the Orthodox faith, she changed her original name, Sophie, to Catherine. Her successful effort to become completely Russian made her as popular as her eccentric husband was detested. Neglected by the tsarevich, Catherine read widely, especially in Voltaire and Montesquieu, informed herself of Russian conditions, and secretly headed a court faction aimed at the displacement of Peter in favor of her son, Paul. In Jan., 1762, however, Peter succeeded to the throne, of which he immediately proved himself utterly unworthy. In June, 1762, a group of conspirators headed by Grigori ORLOV, Catherine's lover, proclaimed Catherine autocrat, and shortly afterward Peter died in dubious circumstances. Catherine's internal policy began with great projects of reform. She drew up a document (*Instruction*), based largely on the writings of BECCARIA and Montesquieu, to serve as guide for a new and enlightened code of laws, the code, however, was never completed. The formidable peasant revolt under PUGACHEV (1773–75) turned Catherine toward greater conservatism, and the French Revolution made her an outspoken reactionary Relying heavily on her bureaucracy, she reorganized (1775) the provincial administration, creating a large number of "governments" or provinces, subdivided into circles—a system which endured until 1917. A charter issued (1785) to the nobility recognized it, as a corporate body, immune from taxation and gave the nobles ownership over their land and absolute power over their peasantry Another charter, issued to the towns, proved of little value to them Thus Catherine, despite her enlightened philosophy, left the serfs in worse condition than she found them and increased social inequalities in Russia Her foreign policy was decidedly imperialistic After placing (1763) her lover, Stanislaus Poniatowski, on the Polish throne as STANISLAUS II, she established a virtual protectorate over Poland Eventually, she secured the lion's share in the successive partitions of Poland among Russia, Prussia, and Austria (1772, 1793, 1795, see POLAND, PARTITIONS OF). Her ambition to break up the Ottoman Empire met with only partial success Her first war with Turkey (1768–74; see RUSSO-TURKISH WARS) ended with the Treaty of Kuchuk Kainarji, which established Russia as the chief power in the Near East (see ABDU-L-HAMID I) In 1783 she annexed the Crimea, and in 1787 she began her triumphal tour of S Russia, accompanied by POTEMKIN, her favorite and chief instrument in her Eastern policy This provoked Turkey into renewing warfare (1787–92); Emperor Joseph II joined Catherine as ally in 1788 The Treaty of Jassy (1792) confirmed that of Kuchuk Kainarji as well as the annexation of the Crimea In dealing with the Western powers Catherine, virtually unaided, planned and carried out a skillfully diplomatic foreign policy Her main interest was in the East, and she kept out of the wars that accompanied the American and French revolutions From Catherine's reign also dates the Russian colonization of ALASKA Much of Catherine's glorious reputation was due to the adulation bestowed on her by Voltaire, with whom she corresponded copiously She herself wrote extensively (memoirs, comedies, and stories), mainly in French but also in Russian, and greatly furthered RUSSIAN LITERATURE Diderot spent some time at her court Catherine's morals were extremely lax However, though her lovers were legion, only Orlov and Potemkin had any appreciable influence on her One of the most remarkable rulers of modern times, Catherine immensely increased the outward prestige of Russia She was succeeded by her son, Paul I See biographies by Kazimierz Waliszewski (Eng tr, 1894) and Katharine Anthony (1925).

Catherine de' Medici (dĭ mĕd'ĭchē, dā mā'dēchē), 1519–89, queen of France, daughter of Lorenzo II de' Medici She was married (1533) to the duke of Orléans, later King Henry II Neglected during the reign of her husband and that of her eldest son, Francis II, she became regent for her second son, Charles IX, in 1560 In the conflicts of the time, with the aid of her chancellor Michel de L'HÔPITAL, she at first adopted a conciliatory policy towards the Huguenots The outbreak of the Wars of RELIGION (1562) led her to an alliance with the Catholic party under François de Guise and to negotiations with Philip II of Spain. When the growing influence of COLIGNY over Charles IX began to threaten her power, she plotted Coligny's assassination. The attempt having failed, she took part in planning the massacre of SAINT BARTHOLOMEW'S DAY (1572) After the accession of her third son, HENRY III, she vainly tried to revive her old conciliatory policy See Edith Sichel, *Catherine de' Medici and the French Reformation* (1905) and *The Later Years of Catherine de' Medici* (1908); Paul Van Dyke, *Catherine de Médicis* (1922); Ralph Roeder, *Catherine de' Medici and the Lost Revolution* (1937).

Catherine Howard, queen of England: see HOWARD, CATHERINE

Catherine of Braganza (brŭgăn'zŭ), 1638–1705, queen consort of Charles II of England, daughter of John IV of Portugal. She was married to Charles II in 1662. As part of her dowry England secured Bombay and Tangier. She lived apart from the court, alienated by the king's infidelities and thwarted by her childlessness. In 1678 she was accused by Titus OATES of a plot to poison the king, but was protected by Charles himself. After William III's accession she returned to Portugal, where she supported the commercial Treaty of Methuen with England, and in 1704 she acted as regent for her brother, Peter II. See M. B. Jones, *Restoration Carnival* (1937).

Catherine of Siena, Saint (sē'nȧ), 1347–80, Italian mystic and diplomat, a member of the third order of the Dominicans The daughter of a Sienese dyer, Giacomo Benincasa, Catherine from early childhood had mystic visions and practiced austerities; she also showed the self-sacrificing devotion to others and the winning and sanctified charm that were to characterize her life When she was about 19, Catherine devoted herself to the poor and the sick, not sparing her own frail health in her efforts to help others In 1370, in response to a vision, she began to take part in the public life of her time, sending letters to the great of the day She went to Avignon and, though a powerless, modest nun, exerted the decisive influence in inducing Pope GREGORY XI to end the "Babylonian captivity" of the papacy and return to Rome in 1376. As papal ambassador to Florence, she succeeded in bringing about peace between Florence and the Holy See In the Great Schism, she adhered to the Roman claimant and helped to advance his cause. Her life was one of great pain, which she bore with great rejoicing In 1375 the stigmata appeared upon her She was the center of a spiritual revival about Siena. Her mysticism has much of overwhelming love for humanity as well as love for God. Though she never learned to write, she dictated hundreds of letters and a notable mystic work, commonly called in English *The Dialogue of Saint Catherine of Siena* or *A Treatise on Divine Providence* (or both as title and subtitle), which has been much used in devotional literature She was unquestionably one of the greatest figures of the Middle Ages Feast April 30 The accounts of her life gathered by her followers were used in the biography by Fra Raimondo da Capua (1398) See *Saint Catherine as Seen in Her Letters* (ed by Vida D. Scudder, 1905), biographies by E G Gardiner (1907), Robert Fawtier (1921–30, in French), and Johannes Jorgenson (Eng. tr., 1938)

Catherine of Valois (vȧl'wȧ, Fr vȧlwȧ'), 1401–37, queen consort of Henry V of England She is also called Catherine of France She was the daughter of Charles VI of France She was married in 1420 and bore to Henry a son who was to be HENRY VI Catherine later married the Welsh Owen TUDOR From them the Tudor kings of England were descended

Catherine Parr, queen of England: see PARR, CATHERINE

Catherine Tekakwitha (tĕk"ȧkwĭth'ȧ), 1656–80, American Indian holy woman, b Auriesville, N Y Her name is sometimes given as Kateri She was a Mohawk and was a Roman Catholic from childhood Piety led her to the severest asceticism In the 1930s a movement was begun toward her beatification, and data was collected concerning her life and virtues and supposed miracles attributed to her intercession.

Catherine the Great see CATHERINE II.

Catherwood, Mary Hartwell (kă'thûrwo͝od), 1847–1902, American novelist, b Licking co, Ohio, grad Granville Female College, 1868 Her books, historically accurate, reveal an intimate knowledge of French Canadian life and French Middle Western pioneers She wrote *The Romance of Dollard* (1889), *Old Kaskaskia* (1893), and *Heroes of the Middle West* (1898).

cathode ray: see ELECTRON and X RAY.

Catholic Apostolic Church, religious community originating in England c 1831 and extending later to Germany and the United States. It was founded under the influence of Edward IRVING, its members are sometimes called Irvingites Because of their prophetic gifts, 12 apostles (including Henry Drummond) were in 1835 set aside as officers, the last of them died in 1901 Over each congregation is an angel, or bishop, assisted by elders, deacons, and others The ministry is not professional Symbolism and mystery of worship characterize the elaborate liturgy Much emphasis is given to the second coming of Christ See P. E. Shaw, *The Catholic Apostolic Church* (1946).

Catholic Church, the universal and established body of Christians, living and dead, considered as an organization It is common for Christian groups to identify their particular churches (exclusively or not) as the Catholic Church. In speaking of the time before the Reformation, Catholic is technically used to mean orthodox (i.e., those accepting the decrees of Leo I and the Council of Chalcedon) Today in English it usually means the Roman Catholic Church. See ORTHODOX EASTERN CHURCH, ENGLAND, CHURCH OF; OXFORD MOVEMENT. OLD CATHOLICS

Catholic Emancipation, term applied to the process by which Roman Catholics in the British Isles were relieved in the late 18th and early 19th cent. of the civil disabilities. They had been under oppressive regulations placed by various statutes dating as far back as the time of Henry VIII (see PENAL LAWS). This process of removing the disabilities culmi-

nated in the Catholic Emancipation Act of 1829 (and some subsequent provisions), but it had begun a number of years before. In 1778 English Catholics were relieved of the restrictions on land inheritance and purchase, and in general priest hunting came to an end A savage reaction to these concessions produced the Gordon riots (see GORDON, LORD GEORGE) of 1780, and the whole history of Catholic Emancipation is one of struggle against great resistance. In 1791 the Roman Catholic Relief Act repealed most of the disabilities in Great Britain, provided Catholics took an oath of loyalty, and in 1793 the army, the NAVY, the universities, and the judiciary were opened to Catholics, though seats in Parliament and some offices were still denied The attempt of William PITT to secure a general repeal of the Penal Laws was thwarted by George III Pope Pius VII consented to a royal veto on episcopal nominations if the Penal Laws were repealed, but the move failed. In Ireland relief from the penal land restrictions (see IRISH LAND QUESTION) began in 1771, the compulsory oath was dropped in 1774, and the repeal of POYNINGS'S LAW (1782) was followed by an act (1792) of the Irish Parliament relaxing the marriage and education laws and an act (1793) allowing Catholics to vote and hold most offices The threat to English and Protestant domination from growing agitation in Ireland caused the Act of Union (1800) whereby the Irish Parliament was destroyed and Ireland given representation in the English Parliament Irish agitation, headed by Daniel O'CONNELL and his Catholic Association, now worked to secure the admission of Catholics to Parliament In 1828 the TEST ACT was repealed, and O'Connell, though still ineligible to sit, secured his election to Parliament from Co Clare Alarmed by the growing tension in Ireland, the duke of WELLINGTON, the prime minister, allowed the Catholic Emancipation Bill, sponsored by Sir Robert PEEL, to pass (1829) Catholics were now on the same footing as Protestants except for a few restrictions, most of which were removed in 1866, 1891, and 1926 The Act of SETTLEMENT is still in force, however, and Catholics are excluded from the throne, from the offices of regent, lord chancellor, and keeper of the great seal, from offices connected with the Established Church, and from a few university places See E H Burton, *The Life and Times of Bishop Challoner, 1691–1781* (2 vols, 1909), Bernard Ward, *The Eve of Catholic Emancipation* (3 vols, 1911), Denis Gwynn, *The Struggle for Catholic Emancipation, 1750–1829* (1928) and *A Hundred Years of Catholic Emancipation, 1829–1929* (1929)

Catholic League, in French history see LEAGUE

Catholic University of America, at Washington, D C, controlled by the Catholic hierarchy, the only U S pontifical university, for men and women, chartered 1887, opened 1889 It is supported by contributions from all parishes It includes a college of arts and sciences, schools of canon law, engineering and architecture, law, nursing education, philosophy, sacred theology, and social science, the Catholic Sisters College, and the National Catholic School of Social Service There are institutes for Christian Oriental research and of Ibero-American studies

Catiline (Lucius Sergius Catilina) (kă'tĭlĭn), c 108 B C–62 B C, Roman politician and conspirator At first a conservative and a partisan of SULLA, he was praetor in 68 B C and governor of Africa in 67 B C. The next year he was barred from candidacy for the consulship by accusations of malfeasance in office, charges which later proved false Feeling with some justice that he had been cheated, he got up a harebrained plot to murder the consuls He and the other conspirators were acquitted (65 B C) Catiline became more bitter than ever against the conservatives and began to advocate popular demagogic proposals So, when in 63 B C he ran again for consul, he found CICERO, the incumbent, and the conservative party ready to prevent his election at any cost Catiline was defeated, but this time he decided to try for the consulship by force. He sent money for troops in Etruria and spread lavish promises in Rome Cicero became alarmed and on Nov 8, with facts gained from Catiline's mistress, accused him in the senate (*First Oration against Catiline*). Catiline fled. The conspirators remaining in the city did not cease activities, but even approached the ambassadors of the Allobroges The ambassadors reported the whole plot to Cicero, who arrested the conspirators and arraigned them in the senate on Dec. 3. On Dec. 5 they were condemned to death and executed, in spite of a most eloquent appeal from Julius CAESAR to use moderation Cicero's haste and summary behavior was illegal, and it was on a charge (by CLODIUS) of executing these Roman citizens without due process of law that he was exiled. Catiline did not surrender, he fell in battle at Pistoia a month later. It is to be borne in mind that the prime sources for Catiline's conspiracy are Cicero's four orations against him and Sallust's biography of him. Both of these are prejudiced and unreliable. Catiline's treason may be partly explained, though not condoned, by the ruthless and devious means used against him. The affair did little credit to any concerned, except for the honest and patriotic Cato the Younger and possibly for Julius Caesar, who made a daring plea to a vindictive and ruthless majority that hated him on behalf of a group of wretches whom he scorned See E S. Beesly, *Catiline, Clodius, and Tiberius* (1878); E G Hardy, *The Catilinarian Conspiracy* (1924); William Bolitho, *Twelve against the Gods* (1929)

Catinat, Nicolas (nēkōlä' kătēnä'), 1637–1712, marshal of France The son of a magistrate, he was conspicuous in his age for winning promotion by merit rather than by wealth or descent In the War of the Grand Alliance he commanded against Victor Amadeus II of Savoy, whom he defeated in N Italy at Staffarda (1690) and at Marsaglia (1693) Early in the War of the Spanish Succession, he opposed Prince Eugene in Italy, but after reverses he was replaced by Villeroi

Cat Island, one of the BAHAMA ISLANDS It was formerly thought to be SAN SALVADOR, the island on which Christopher Columbus landed in 1492

Catlettsburg, city (pop 4,524), co seat of Boyd co, E Ky, on the Ohio at the mouth of the Big Sandy and near Ashland It was settled as a trading post in 1808

Catlin, George, 1796–1872, American traveler and artist, b Wilkes-Barre, Pa He was educated as a lawyer and practiced in Philadelphia for two years but turned to art study and became a portrait painter in New York city In 1832 he went west to study and paint the Indians, and after executing numerous portraits and tribal scenes he took his collection to Europe in 1840 The following year he published *Manners, Customs, and Condition of the North American Indians*, in two volumes, with about 300 engravings In 1844 he published 25 plates, entitled *Catlin's North American Indian Portfolio*, and, in 1848, *Eight Years' Travels and Residence in Europe*. From 1852 to 1857 he traveled through South and Central America and later returned for further exploration in the Far West The record of these later years is contained in *Last Rambles amongst the Indians of the Rocky Mountains and the Andes* (1868) and *My Life among the Indians*. Of his 470 full-length portraits of Indians and tribal scenes, the greater part constitutes the Catlin Gallery of the National Museum, Washington, D C, while some 700 sketches are in the American Museum of Natural History, New York city His medical training helped him in his observations of the Indians He was the first white man to see the Minnesota pipestone quarries, and pipestone is also called catlinite See Lloyd Haberly, *Pursuit of the Horizon* (1948)

catlinite see PIPESTONE

catmint or **catmint,** strong-scented perennial mint (*Nepeta cataria*) native to Europe and Asia but naturalized in the United States Catmint has scallop-margined leaves and clusters of small whitish or pale purple flowers A tea of the leaves has long been a domestic remedy for various ailments Catmint is best known for its attraction for cats

Cato, Dionysius (dīŏnĭ'shŭs kā'tō), supposed author of a collection of precepts This, the *De moribus* [on customs], was very popular as a school book in the Middle Ages It may date from the 3d cent

Catoche, Cape (kătō'chā), extremity of Yucatan peninsula, SE Mexico It was the first Mexican land seen by the Spanish (1517).

Cato Street Conspiracy. see THISTLEWOOD, ARTHUR

Cato the Elder (kā'tō) or **Cato the Censor,** Latin *Cato Major* or *Cato Censorius*, 234–149 B C, Roman statesman and moralist, whose full name was Marcus Porcius Cato He fought in the Second Punic War and later went through the course of honors, serving as quaestor (204 B C), aedile (199 B C), praetor (198 B C), consul (195 B C), and censor (184 B C) He was renowned for his devotion to the old Roman ideals—simplicity of life, honesty, unflinching courage, loyalty to family and to Rome, sexual morality, and ability to endure hardship He inveighed against luxury, extravagance, and new customs He was thus both conservative and puritanical, but his policy was not designed at repression but at reform and rebuilding of Roman life He sought to put down luxury and to restrict seats in the senate to the worthy, and he undertook much building, including repair of the city sewers Sent on an official visit to Carthage in his old age, he returned stern with disapproval of Carthaginian ways, and he ended every speech he made in the senate with the words, "Carthage must be destroyed!" He thus helped to bring on the Third Punic War, in which Carthage was destroyed Probably his detestation of luxury and "cultivated" ways inspired the deep hatred he had for the Scipio family. He himself deliberately affected a rustic appearance and rustic manners to emphasize his belief in austerity and simplicity Cato thus exemplified the old Roman virtues It must be admitted that he also exemplified some of the old Roman shortcomings. His complacent acceptance of class division led him to cruel harshness toward his servants, and his hatred of extravagance made him miserly He wrote many works, most of them now lost. Probably the most influential was his history of early Rome, the first Roman historical work worthy of the name. His *De agri cultura* or *De re rustica*, translated as *On Farming*, is a practical treatise which offers valuable information on agricultural methods and country life in his day

Cato the Younger or **Cato of Utica,** Latin *Cato Minor* or *Cato Uticensis*, 95 B C–46 B C, Roman statesman, whose full name was Marcus Porcius Cato, great-grandson of Cato the Elder He was brought up by his uncle M Livius DRUSUS and early showed intransigent devotion to the austere piety of the early republic. He had one of the greatest reputations for honesty and incorruptibility of any man in ancient times His Stoicism put him above the graft and bribery of his day. He was, however, deep in politics as one of the more reactionary of the conservative senators His reputation and his stiff-necked refusal to compromise made him not too popular with his colleagues. He was from the first a violent opponent of Julius CAESAR and, outdoing CICERO in vituperation of the conspiracy of CATILINE, tried to implicate Caesar in that plot, though maintaining his fairness to all He and his party supported POMPEY after the break with Caesar He accompanied Pompey across the Adriatic and held Dyrrhachium (modern Durazzo) for him until after the defeat at Pharsala. Then he and Q C Metellus Pius Scipio (see SCIPIO, family) went to Africa and continued the struggle against Caesar there. Cato was in command at Utica After Caesar crushed (46 B C) Scipio at THAPSUS, Cato committed suicide, bidding his people make their peace with Caesar Cicero and M, Junius BRUTUS (Cato's son-in-law) wrote eulogies of him, and the noble tragedy of his death has been the subject of many dramas. He became the symbol of probity in public life

Cats, Jacob (yä'kŏp käts'), 1577–1660, Dutch poet He was a lawyer and held important magistracies His poems are didactic and moralising and deal with aspects of home life, from the ethics of marriage to table manners He has little repute as a poet, but he has enjoyed a great popularity as teacher and spokesman of Dutch Calvinistic culture, in the Netherlands he is familiarly called Father Cats

cat's-eye, name given to two different green gem stones, both characterized, when properly cut, by a line of light running across the stone This effect, called chatoyancy, is caused by the presence in the stone of a number of light-reflecting parallel fibers similar to those of asbestos The harder, more valuable cat's-eye is a variety of CHRYSOBERYL, found chiefly in Ceylon, and the less valuable is a variety of QUARTZ

Catskill (kăt'skĭl), village (pop 5,429), co seat of Greene co, SE N Y, on the Hudson at the mouth of Catskill Creek and S of Albany, settled in the 17th cent by Dutch, inc 1806 Connected with Hudson, N Y, by the Rip Van Winkle Bridge, it is a gateway to Catskill Mt resorts and to the Catskill Forest Preserve Its manufactures include liqueurs and cement products

Catskill Aqueduct, SE N Y, carrying water to New York city from the Esopus and Schoharie watersheds in the Catskill Mts It was planned in 1905, and the first part of the project was completed in 1917 The waters of Schoharie Creek (impounded at Schoharie Reservoir by Gilboa Dam) are sent via the 18-mile Shandaken Tunnel (opened 1924) to Esopus Creek Some 15 mi below the south end of the tunnel, at Ashokan Reservoir (created by Olive Bridge Dam in Esopus Creek), the 92-mile Catskill Aqueduct begins It delivers water to Kensico Reservoir near White Plains and to Hillview Reservoir in Yonkers, whence it is distributed to the boroughs of New York through tunnels cut in solid rock Kensico and Hillview reservoirs also receive water from the Delaware river project, which was started in 1937 and placed (1944) in partial emergency use The Catskill Aqueduct passes under the Hudson river at Storm King mt at a depth of 1,114 ft The Narrows of New York Bay are crossed by a steel pipe to Silver Lake, Staten Island, a distance of 120 mi from the beginning of the aqueduct at Ashokan Reservoir

Catskill Mountains, range of the Appalachian Mts, SE N Y, chiefly in Greene and Ulster counties and just W of the Hudson, to which they descend abruptly in places The region, which is well wooded and rolling, with some deep gorges and many beautiful waterfalls, is drained by the headstreams of the Delaware river and Esopus, Schoharie, and Catskill creeks The summits are generally c 3,000 ft above sea level, Slide Mt (4,204 ft) and Hunter Mt (4,025 ft) are the highest Accessible to New York city, the area is a popular summer and winter resort Ashokan Reservoir here is a source of the metropolitan area's water supply Catskill Forest Preserve (232,423 acres) embraces some of the finest scenery of the range, including the region of the Rip Van Winkle legend

Catt, Carrie (Lane) Chapman, 1859–1947, American suffragist and peace advocate, b Ripon, Wis, grad Iowa State College, 1880. She was superintendent of schools, Mason City, Iowa, in 1883–84 In 1885 she married Lee Chapman, a journalist (d. 1886), and in 1890, George Catt, an engineer

(d 1905). From 1890 to 1900 an organizer for the National American Woman Suffrage Association, she became its president in 1900, being chosen by Susan B Anthony as her successor. She led the campaign to win suffrage through a Federal amendment to the Constitution rather than state by state After the ratification of the Nineteenth Amendment (1920), she organized the League of Women Voters for the education of women in politics At the Berlin convocation of the International Council of Women she helped organize the International Woman Suffrage Alliance, of which she was president from 1904 to 1923 After 1923 she devoted her efforts chiefly to the peace movement. With Nettie R Shuler she wrote *Woman Suffrage and Politics* (1923) See biography by M G Peck (1944)

cattail or **reed mace,** any plant of the genus *Typha*, widely distributed marsh perennials characterized by a creeping rootstock, long, narrow leaves, and a brown cylindrical spike of flowers on a tall, stout stem The plant has been variously utilized, the leaves woven into chair seats and the young shoots eaten like asparagus, while the starchy rootstock was ground into meal by the Indians, who are said to have applied the down of the seeds to wounds Cattails, sometimes called club rush, are cultivated around ponds, though they often become weedy, the flowering spikes are used in winter bouquets

Cattaraugus (kătŭrô'gŭs), village (pop 1,145), W N Y , SE of Buffalo, settled 1851 with the coming of the Erie RR, inc 1882 The Cattaraugus Indian Reservation is near by

Cattaro, Yugoslavia see KOTOR

Cattell, James McKeen (kutĕl'), 1860–1944, American psychologist, b Easton, Pa , grad Lafayette College, 1880 He studied with Wilhelm Wundt at Leipsig and was professor of psychology at the Univ of Pennsylvania (1888–91) and at Columbia Univ (1891–1917), he was a pioneer in many branches of psychological research His dismissal in 1917 for alleged unpatriotic statements aroused widespread protest Besides writing numerous books and articles, Cattell established and edited the *Psychological Review* (founded with J M Baldwin), *American Men of Science*, and *Leaders in Education*, he edited the *American Naturalist* (from 1907) and *School and Society* (from 1915) and was owner and editor of *Science* (from 1894) and *Scientific Monthly* (from 1900)

Cattermole, George, 1800-1868, English watercolor painter and illustrator He painted a wide variety of subjects with notable success and was equally successful as an illustrator He was a close friend of Dickens, Thackeray, and Browning Cattermole is represented in most of the important British galleries.

cattle, domestic animals of the bovine genus probably descended from the AUROCHS, which is believed to have been first domesticated in Asia It is thought that in ancient times in Europe crosses between the aurochs and a smaller breed produced cattle from which modern breeds originated Cattle were first brought to the Western Hemisphere by Columbus on his second voyage They are closely related to the bison, buffalo, and yak Wealth has sometimes consisted chiefly of cattle and has been measured by them, the word *pecuniary* is derived from the Latin *pecus*, cattle, and the words *cattle*, *chattel*, and *capital* are related Breeding for improvement of beef, dairy, and dual-purpose breeds has been notably successful since the middle of the 18th cent The principal beef breeds include the ABERDEEN ANGUS and HEREFORD The principal dairy breeds include the AYRSHIRE, BROWN SWISS, DUTCH BELTED, GUERNSEY, HOLSTEIN-FRIESIAN, and JERSEY The principal dual-purpose breeds include the DEVON, POLLED DURHAM, RED POLLED, and SHORTHORN Associations have been formed by breeders interested in improving the various breeds See also BEEF and DAIRYING See publications of the U S Dept of Agriculture, P I Wellman, *The Story of the Cattle Range in America the Trampling Herd* (1939)

cattle plague. see RINDERPEST

Catullus (Caius Valerius Catullus) (kŭtŭ'lŭs), 84? B C –54? B C , Roman poet, b Verona He is generally considered one of the greatest lyric poets of all time. A wealthy young man, he went (c 62 B C) from Transpadane Gaul to Rome, where he entered literary and fashionable circles He fell deeply in love, probably with CLODIA, and wrote to his beloved, addressed as Lesbia (to recall Sappho of Lesbos), a series of superb little poems that run from early passion and tenderness to the hatred and disillusionment that overwhelmed him after his mistress was faithless. Of the 116 extant poems attributed to him, three are almost certainly spurious They include, besides the Lesbia poems, epigrams, ranging from the genial to the obscenely derisive, elegies, a few long poems (notably *Attis* and an epithalamium on Thetis and Peleus), and various short pieces His satire is vigorous and flexible, his light poems gay and full-bodied He was influenced by the Alexandrians and drew much on the Greeks for form and meter, but his genius outran all models Many of his poems are well loved today by those who know them, two of the most popular being the 10-line poem, touching and simple, which ends, "frater ave atque vale" [hail, brother, and farewell], and "On the Death of Lesbia's Sparrow " See Tenney Frank, *Catullus and Horace* (1928); E A Havelock, *The Lyric Genius of Catullus* (1939).

Catulus (kă'chōlŭs), family of ancient Rome, of the Lutatian gens **Caius Lutatius Catulus** (kā'ŭs, kt'ŭs, lōtā'shus) was consul in 242 B C. He won the great Roman naval victory over Carthage off the Aegates (modern Aegadian Isles) that ended the First Punic War **Quintus Lutatius Catulus** (kwĭn'tŭs), d 87 B C , was consul in 102 B C His colleague in the consulship was MARIUS, and the two of them went north to oppose a Germanic invasion He had to retreat before the Cimbri until Marius returned from Gaul. The two then defeated the Cimbri at the Raudine Fields (just S of Vercelli) in 101 B C He later opposed Marius in the Social War and favored Sulla Proscribed by the Marians, he either committed suicide or was killed He was the patron of a literary circle and was himself a writer and a philosopher Cicero praises his oratory His son, also **Quintus Lutatius Catulus,** d c 60 B C , was consul in 78 B C. He opposed the constitutional changes sought by his colleague, LEPIDUS, and when Lepidus, disgruntled, led a revolt, Catulus and Appius CLAUDIUS defeated him Catulus was censor in 65 B C He was the leader of the arch conservative group He led the minority opposing the conferring of unusual powers on Pompey by the Manilian Law in 66 B C , and he was one of the bitterest opponents of Julius Caesar

Cauca (kou'kä), river, c 600 mi long, rising near Popayán, W Colombia, and flowing N to the Magdalena through the Colombian Andes It is navigable in its lower course and drains a fertile valley, a superb agricultural region, which also has minerals

Caucasia see CAUCASUS

Caucasian: see RACE

Caucasian Gates see DARYAL

Caucasus (kô'kŭsŭs), Rus *Kavkaz* (kŭfkäs'), mountain system, USSR, between Europe and Asia It extends c 750 mi from the mouth of the Kuban river on the Black Sea SE to the Apsheron peninsula on the Caspian Sea The main range, called the Greater Caucasus, is a majestic chain of snow-capped peaks, including Mt ELBRUS (18,481 ft), the Dykh-Tau (17,050 ft), and Mt KAZBEK (16,541 ft) The Greater Caucasus is crossed by several passes, notably the MAMISON and the DARYAL, and by the GEORGIAN MILITARY ROAD and the OSSETIAN MILITARY ROAD, which connect North Caucasia with Transcaucasia, as the region S of the Greater Caucasus is called The only rail lines connecting Transcaucasia with the rest of the USSR follow the coasts of the Black Sea and the Caspian The valleys of the KURA and RION rivers have for centuries served as the main thoroughfare of Transcaucasia, between the Black Sea and the Caspian, and they are now followed by a rail line To the south of the Kura rises the Lesser Caucasus, which is an extension of the Iranian Plateau North Caucasia, which slopes down to the Kuban steppe and the MANYCH DEPRESSION, is part of the RSFSR The main administrative divisions are the KRASNODAR TERRITORY (including the ADYGE AUTONOMOUS OBLAST), the STAVROPOL TERRITORY (including the CHERKESS AUTONOMOUS OBLAST), the KABARDIAN ASSR, the North Ossetian ASSR (see OSSETIA), GROZNY oblast, and the DAGESTAN ASSR Transcaucasia is occupied by the GEORGIAN SSR (including the ABKHAZ ASSR, the ADZHAR ASSR, and the South Ossetian Autonomous Oblast), the AZERBAIJAN SSR (including the NAKHICHEVAN ASSR and the MOUNTAIN-KARABAKH Autonomous Oblast), and the ARMENIAN SSR. The administrative complexity of Caucasia reflects the diversity of its ethnic composition Caucasia possesses very rich mineral resources, notably oil at Baku, Grozny, and Maikop and manganese at Chiatura Stock raising is the chief occupation in the higher reaches, agriculture, fruitgrowing, and vineyards predominate in the valleys The mountain slopes are covered with dense pine and deciduous forests, and there is plentiful game Among the numerous health and mineral resorts, particularly in the N Caucasus, are PYATIGORSK and KISLOVODSK Among the most important cities are DZAUDZHIKAU (formerly Vladikavkas), TIFLIS, ERIVAN, BAKU, Kirovabad, Leninakan, Batum, and Kutais The Caucasus was known to the ancient Greeks, in whose legends it is mentioned, it was on a Caucasian mountain that Prometheus was chained, and Jason and his Argonauts sought the Golden Fleece in COLCHIS The numerous invasions and migrations that swept over the Caucasus have resulted in its ethnic and linguistic complexity There are four unconnected language families the North Caucasian, which includes CHECHEN, Ingush, Adyge, Kabardin, and Abkhasian, the South Caucasian or Kartvelian, which includes Georgian, Mingrelian, and Svanetian, the Indo-European, represented chiefly by Ossetic, and the Turkic, represented by the Azerbaijani Turks. Christianity is the chief religion in Georgia and Armenia; Islam, in Azerbaijan, Dagestan, and the historic region of CIRCASSIA. Many of the Moslem mountain people stubbornly resisted the Russian penetration of the Caucasus in the 19th cent. and were pacified only after the collapse of the SHAMYL uprising. The romantic beauty of the Caucasus has inspired many Russian poets and writers, notably LERMONTOV and Tolstoy. Tolstoy's novels *The Cossacks* and *Hadji Murad* contain probably the most masterly descriptions of life on the Caucasian frontier in the 19th cent

Caucasus Indicus: see HINDU KUSH.

Cauchon, Pierre (pyĕr' kōshō'), d 1442, bishop of Beauvais, France, president of the ecclesiastic court that convicted JOAN OF ARC at Rouen (1431). His violent partisanship for the English made a fair trial impossible His procedure was repudiated by the Church in the rehabilitation trial (1456) of Joan. See W P Barrett, *The Trial of Jeanne d'Arc* (1931)

Cauchy, Augustin Louis, Baron (ôgŭstĕ' lwē' bărō' kōshē'), 1789–1857, French mathematician. He was professor simultaneously (1816–30) at the École polytechnique, the Sorbonne, and the Collège de France in Paris While a political exile (1830–38) he taught at the Univ of Turin. He returned to the Sorbonne in 1848 Besides his influential work in every branch of mathematics (especially the theory of functions, integral and differential calculus, and algebraic analysis) he contributed to astronomy, optics, hydrodynamics, and other fields Among his nearly 800 publications are works on the theory of waves (1815), algebraic analysis (1821), infinitesimal calculus (1823, 1826–28), differential calculus (1827), and the dispersion of light (1836)

caucus, political party gathering or standing party organization The word is of New England origin, deriving perhaps either from an Algonquian word meaning "to talk" or from "caulkers," who were of Revolutionary sympathies in New England and in whose place of business one of the Boston Revolutionary committees held meetings in colonial times In the United States, legislative caucuses at one time nominated presidential and other candidates for office, but this practice gave way, with the rise of popular government and an increased franchise, to the nominating convention and primary William Harris Crawford was the last presidential nominee of the congressional caucus (1824) The caucus has continued, in Congress and other legislative bodies, as an instrument to aid in the formulation of policy by a political party and to make the party's nominations for committee posts In Great Britain the term was applied to a standing party organization, such as that developed by the Radical Joseph Chamberlain in the 1870s, and has usually carried an opprobrious connotation In Australia the term refers to groups of Labour members in federal and state parliaments who cooperate with trade councils to control the government when the Labour party is in power In New Zealand and France it is applied to meetings of any legislative group

Cauda see CLAUDA

caudillo (kôdēl'yō, Span koudhē'yō, -dhē'lyō), term applied to a type of Hispanic American political leader who arose with the wars of independence Though *caudillos* have varied greatly in character, methods, and aims, certain characteristics generally predominate The *caudillo* is usually a mestizo, whose political platform is of little consequence but whose sentimental appeal and strong personality command the blind allegiance of the Indian and mestizo masses He is unusually daring and skilled in military matters, possesses traditional virtues, and identifies himself with his followers in leading a simple existence The bond between him and his people is personal and patriarchal and has nothing to do with ideologies Although he eventually becomes an oligarch himself, he usually champions the rights of the masses by opposing the entrenched wealthy white classes and generally also the power of the Church He is regarded as almost messianic, capable of all manner of unusual accomplishments for his people Although he rules with an iron hand and imposes strict discipline, his only law is that of his own making and has nothing to do with constitutional rights Among the more famous *caudillos* have been Juan Manuel de Rosas and Facundo Quiroga of Argentina, Francisco Solano López of Paraguay, Rafael Carrera of Guatemala, Porfirio Díaz of Mexico, Juan Vicente Gómes of Venezuela, and Gabriel García Moreno of Ecuador.

Caudine Forks (kô'dīn), narrow passes in the Apennines, S Italy, on the road from Capua to Beneventо Here in 321 B C the Samnites routed a Roman army and forced it to pass under a yoke

Caughnawaga (kă'nawā"gŭ), village, S Que , on the St Lawrence opposite Lachine. It was founded (1667) as a refuge for the Iroquois converts to the Christian faith It is still an Iroquois village, though in 1890 it abandoned government by tribal chief in favor of municipal law

Caulaincourt, Armand Augustin Louis, marquis de (ärmä' ôgŭstĕ' lwē' märkē' dŭ kōlăkōōr'), b 1772 or 1773, d. 1827, French diplomat and general, created duke of Vicenza by Napoleon As ambassador to Russia (1807–11), he opposed Napoleon's

war policy. He accompanied the emperor as aide-de-camp in the Russian campaign and on his two-week dash from Russia to Paris (1812). Caulaincourt was foreign minister when Napoleon abdicated in 1814 and again during the Hundred Days His remarkable memoirs of the years 1812–15 were first published in 1933 and appeared in English as *With Napoleon in Russia* (1935) and *No Peace with Napoleon!* (1936)

cauliflower (kô'lĭ–), variety of CABBAGE, with an edible head of condensed flowers and flower stems In cultivation it is the most exacting cabbage variety, but a profitable garden crop Cooperative marketing by such organizations as the Long Island Cauliflower Growers' Association and the California Vegetable Growers' Union has facilitated commercial handling

Caupolicán (koupōlēkän'), d 1558, leader of the Araucanian Indians who fiercely resisted the Spanish conquest of Chile. He attempted to carry on the reconquest begun by LAUTARO and won a victory over Pedro de Valdivia After a magnificently heroic but futile battle to keep the Spanish from recapturing ruined Concepción, Caupolicán was forced to retreat into the forest Here he was surprised, captured, tortured, and killed His fame rests partly on *La Araucana*, the epic poem of Ercilla y Zúñiga

Caus or **Caux, Salomon de** (both sälōmō' du kō'), 1576–1626, French engineer and physicist, educated in England From 1614 to 1620 he was engineer to the Elector Palatine Frederick at Heidelberg Because of his *Les Raisons des forces mouvantes avec diverses machines* (1615), an early exposition of the principle of steam motivation, he has been considered the originator of the steam engine

causality, relationship between the cause and its effect The scientific conception that given stimuli under controlled conditions must inevitably produce standard results is generally accepted by philosophers Systems vary, however, in the degree of emphasis which they place on the role of chance in changing a situation Hume felt that in causal relations we have no evidence of any power exerted by the cause on the effect Kant thought the notion of cause a fundamental category of understanding, while others argue a strictly mechanical theory of causality A modern interpretation is that cause and effect are parts of the same field of force, and their relation is dynamic rather than strictly causal

Causapscal (kōsapskäl'), village (pop 1,545), E Que , SW of Lake Matapedia

caustic, substance which acts upon organic material, burning or corroding it Caustic SODA (sodium hydroxide), as well as caustic POTASH (potassium hydroxide), is a caustic ALKALI Silver nitrate, called caustic silver or lunar caustic, is commonly used in medicine

Cauterets (kōturā'), mountain resort (permanent pop 1,012), Hautes-Pyrénées dept , SW France It has celebrated hot sulphur springs

Cautley, Sir Proby Thomas (kôt'lē), 1802–71, English engineer and paleontologist He was chief engineer of the Doab and the Ganges canals in India, and he collected fossils in the Siwalik Hills there He wrote many works on canal engineering and paleontology

Cauvery or **Kavery** (both kô'vurē) river, c 475 mi long, rising in Coorg, India, in the Western Ghats It is a sacred river Scenic falls near Sivasamudram, Mysore, furnish hydroelectric power Below Srirangam, Madras, the river divides into several channels (most important the Coleroon), which empty into the Bay of Bengal

Caux, Salomon de. see CAUS, SALOMON DE

Cavaignac, Jacques Marie Eugène Godefroy (shäk' mərē' üzhĕn' gôdfrwä' kavänyäk'), 1853–1905, French minister of war (1895–98), son of Louis Eugène Cavaignac He played a decisive role in convicting Dreyfus (see DREYFUS AFFAIR)

Cavaignac, Louis Eugène (lwē'), 1802–57, French general In Algeria he held Tlemcen and Cherchel against the Arabs and was promoted (1840) colonel of the Zouaves After the outbreak of revolution in Feb , 1848, he became governor general Elected to the assembly, he returned to Paris and was appointed minister of war He used his dictatorial powers to quell the threatened rising of the working classes in a fierce 70-hour struggle known as the JUNE DAYS In the presidential election he was badly defeated by Louis Napoleon (later Napoleon III) Arrested after the coup d'état of 1851, he was soon released but, refusing to swear allegiance to Napoleon III, held no further office

Cavalcanti, Guido (gwē'dō kavalkän'tē), d 1300, Italian poet, friend of Dante He belonged to the White faction in the struggle of the Guelphs in Florence and was exiled to Sarzana. There he fell ill and died soon after his recall Much of his best verse is in the *Canzone d'amore* [songs of love] For translations, see his *Sonnets and Ballate*, tr. by Ezra Pound (1912) and Lorna de' Lucchi, *An Anthology of Italian Poems* (1922)

Cavalcaselle, Giovanni Battista (jōvän'nē bät-tēs'tä kävälkäsël'lä), 1820–97, Italian art critic and writer. He studied painting at the Academy of Venice and in Munich and traveled extensively through Tuscany studying its art treasures. He participated in the Revolution of 1848 and escaped to England, where he remained for several years While in England, he produced in collaboration with Joseph A. Crowe their first joint work, *Early Flemish Painters* (1857). Cavalcaselle returned to Italy in 1857 and subsequently served as inspector of the National Museum in Florence and director general of fine arts in Rome The writings of Crowe and Cavalcaselle include the monumental *History of Painting in Italy* (5 vols , 1864–71), several times revised.

Cavalier, Jean (zhäⁿ' kävēlyā'), 1679?–1740, a leader of the CAMISARDS From his home in the Cévennes region, France, he fled to Geneva (1701) when persecution of the Protestants became intolerable, but he returned when he knew that the Protestants were about to rebel As chief leader of the Camisards, he showed remarkable military genius and successfully withstood the French commanders sent to subdue the uprising In 1704 he made peace with Marshal Villars and received from Louis XIV a commission as colonel and a pension, the peace was repudiated by his followers Distrustful of the king, Cavalier fled from France He fought for the duke of Savoy and later for England in Spain against the French His later years were spent in Great Britain, where he was given a pension, made major general, and appointed governor of the isle of Jersey The *Memoirs of the Wars of the Cévennes*, published in 1726 and dedicated to Lord Carteret, is attributed to Cavalier

Cavalier (kăvulēr'), city (pop 1,105), co seat of Pembina co , extreme NE N Dak , NNW of Grand Forks, in a farm area, founded 1875, inc 1885

cavalier, in general, an armed horseman In the English civil war the supporters of Charles I were called Cavaliers in contradistinction to the ROUNDHEADS, the followers of Parliament The royalists used the designation until it was replaced by TORY

Cavaliere, Emilio del (āmē'lyō dĕl kävälyā'rā), c 1550–1602, Italian composer of *La rappresentazione di anima e di corpo* (Rome, 1600), a sacred dramatic work, a forerunner of oratorio His recitatives were the first monodies His name also appears as Emilio de' Cavalieri

Cavalieri, Francesco Bonaventura (fränchā'skō bōnävəntōō'rä kävälyā'rē), 1598–1647, Italian mathematician, a Jesuit priest Professor at Bologna from 1629, he invented the method of indivisibles (1635) which foreshadowed integral calculus

Cavalieri, Lina (lē'nä), 1874–1944, Italian operatic soprano After her debut in Lisbon in 1900 she achieved great success throughout Europe and in the United States in the lyric French and Italian roles, renowned as much for her great beauty and fiery temperament as for her light pleasant voice She sang with the Metropolitan Opera Company (1906–8) and with Oscar Hammerstein's Manhattan Opera Company (1909–10)

Cavalier poets, group of secular poets at the court of Charles I Perfectionists in matters of form, they wrote finely finished verses on courtly themes Beauty, love, and loyalty expressed with wit characterized their poetry In his poems, Robert Herrick, the finest artist of the group, showed the debt of the Cavalier poets to Jonson Richard Lovelace, Sir John Suckling, and Thomas Carew were the other leading writers of the group

Cavalli, Pietro Francesco (pyā'trō fränchā'skō kaval'lē), 1602–76, Italian composer, whose real name was Caletti-Bruni, pupil of Monteverdi, whom he succeeded as choirmaster of St Mark's, Venice His 42 operas were very popular—especially *Dulone* (1641), in which the *bel canto* aria is fully developed He also composed church music

Cavallini, Pietro (pyā'trō kavəl-lē'nē), c 1250–c 1330, Italian painter, mosaicist, and sculptor His influence on Cimabue and Giotto was important He is known to have executed several frescoes for the Church of St Francis in Assisi Notable frescoes by Cavallini, in the Church of Santa Cecilia in Trastevere, Rome, were uncovered in 1901

Cavallotti, Felice (flē'chā kävälôt'tē), 1842–98, Italian politician and dramatist He fought under Garibaldi, was a deputy to the parliament, and persistently attacked the government in fiery speeches and writings

cavalry (kă'vulrē), mounted troops trained to fight from horseback Cavalry was used by the ancient Egyptians, but it was more extensively employed by the ancient Assyrians, Babylonians, and Persians Some of the Greek city-states had mounted troops as early as the 8th cent B C , but the typical Greek force was the phalanx Since saddles were not introduced until the time of Constantine I and stirrups seem to have been a contribution of the Franks, cavalry was at a disadvantage against well-disciplined infantry at the time when Rome reached the height of greatness, though the Romans did use regiments of horsemen Cavalry was particularly useful in scouting and in pursuing a routed enemy The first wide and expert use of cavalry in Europe was that of the invaders from the East, the Huns, Avars, Magyars, Cumans, and Mongols In medieval Europe the mounted knight became the typical warrior, and cavalry dominated in the incessant small wars. Armor was developed not only for the knight himself but also for his horse Mobility was the chief advantage of the mounted fighters With the reintroduction of mass fighting, infantry came to the fore again, notably in the trained companies of English bowmen such as those who won at Crécy in 1346 The use of gunpowder and hand firearms did much more to enhance the importance of infantry Cavalry, however, was still of great value because of its mobility, its rapid striking power, and its usefulness in clearing the field of a beaten enemy The mounted infantrymen also became prominent, such forces as the dragoons used horses for mobility but fought on foot Cavalry was prominent in the armies of Louis XIV and of Frederick II (Frederick the Great), and particularly with Napoleon the cavalryman became the elite of the fighting forces, though actual reliance in fighting was rather upon the infantry Gaily uniformed cuirassiers, dragoons, hussars, lancers, and the like were features of European armies of the 19th cent , and most of these forces were recruited from the nobility and the better families They were of great value in the fighting on imperial frontiers, as in India and in Africa, but were of steadily diminishing worth on the battlefields of Europe Cavalry was also the indispensable arm for the U S frontier, where mobility was essential in fighting the Indians, and as Indian fighters cavalrymen were paramount to the end of the 19th cent when those wars ended Cavalry was much used in the American Civil War, and some of the best known of the commanders were cavalrymen, notably Philip H Sheridan, J E B Stuart, and N B Forrest Their value was, however, on the wane, and it is an ironic fact that the Rough Riders of the Spanish-American War did their fighting on foot In the First World War cavalry was again useful in the open fighting on the plains of Eastern Europe and in Palestine, but was not usable in the major theaters, where trench warfare prevailed The development of motorized, mechanized, and armored forces and of air warfare had made cavalry obsolete by the time of the Second World War, as was abundantly proved by the pitiful showing of the Polish cavalry in the brief campaign of Sept , 1939 The Russians did make some efficient use of cavalry in small movements in winter, when the heavy snows stalled mechanized units, but the cavalry forces on the plains of the Ukraine fared badly, and victory depended rather on foot soldiers, artillerymen, and airplanes The tank and the armored car had definitely replaced the horse in warfare In 1946 the U S army abolished cavalry as a separate arm of service, merging what remained of it into the armored forces

Cavan (kă'vun), inland county (730 sq mi , pop 70,323), Ulster prov , Ireland The county town is Cavan It is a hilly region of lakes (Lough Oughter chief among them) and bogs, and the climate is extremely damp and cool Most of the soil is clay The Erne is the principal river, and the Shannon has its source in Cavan Although agriculture is the chief occupation, less than a third of the area is under cultivation, and that mostly in very small farms Manufactures are negligible Cavan was organized as a shire of Ulster in 1584

Cavan, urban district (pop 3,479), co seat of Co Cavan, Ireland It is a farm market and the seat of the Roman Catholic bishop of Kilmore

Cavazzola (kavät-tswô'la) or **Cavazzuola** (kavat-tswô'-lä), 1486–1522, Italian painter He decorated many churches in Verona with his frescoes His five scenes from the Passion (Verona) are well known His real name was Paolo Morando

Cave, Edward, 1691–1754, English editor and publisher He was the founder of the *Gentleman's Magazine* This was the first magazine in the present sense of the word and the first to give the miscellaneous writer an honest literary opportunity Samuel Johnson published his parliamentary reports, "Debates in the Senate of Magna Lilliputia," in this periodical (1741–44)

cave, a hollow, either above or below ground. Caves may be formed by the chemical and mechanical action of a stream upon soluble or soft rock, of rain water seeping through soluble rock to the groundwater level, or of waves dashed against a rocky shore Volcanic action (either through the formation of gas pockets in lava or through the melting of ice under lava) and earthquakes or other earth movements are also sources of cave formation Limestone regions almost invariably have caves, some of these are notable for their beauty of STALACTITE and STALAGMITE formation or for their magnitude and strangeness Some caves were the means of preserving both the remains of prehistoric man and animals and indications of man's early culture Special scientific studies of the living plants and animals in caves contribute to knowledge of adaptation and evolution Some cave animals lack sight, and both plants and animals living where light is excluded show loss of pigment Famous caves are those in CARLSBAD CAVERNS NATIONAL PARK (N Mex), MAMMOTH CAVE NATIONAL PARK (Ky), and Wind Cave National Park (Black Hills, S Dak), LURAY CAVERNS (Va); and

WYANDOTTE CAVE (Ind.). In Europe there are celebrated caves in Belgium, in the Pyrenees (see ALTAMIRA and AURIGNAC), in the DORDOGNE, in Dalmatia, Gibraltar, and Sicily, at POSTOJNA, and in England (KENT'S CAVERN and Kirkdale), FINGAL'S CAVE in the basalt of the Hebrides off Scotland is one of the many caves about which there are legends The caves of Iceland and Hawaii are volcanic. See also CAVE DWELLER

cave art. Cave paintings and engravings have been preserved since Paleolithic times The earliest beginnings of the art are unknown, but by the Upper Paleolithic, during the Magdalenian phase, its techniques were highly perfected Paintings show a vigorous realism, combining an economy of line with effective polychrome techniques The early cave artists were also competent users of foreshortening and shadowing Engraving is common, and some cave surfaces were utilised to show relief Animals are the chief subject matter, the accuracy of portrayal in such details as hoofs and trunk lobation have provided invaluable evidence for paleozoologists. Brushes apparently were used Colors were derived from iron and manganese oxides and iron carbonates, burnt bone provided black The motivations for this art were not aesthetic, but most probably magico-religious Many paintings are found in nearly inaccessible passages where the artist could have worked only under most awkward conditions by inadequate artificial illumination The subject matter suggests that these drawings served to induce sympathetic magic as an aid in hunting The first discovery of Paleolithic paintings was made in 1879 when the celebrated bulls on the walls of the Altamira caves in Spain were brought to light Many famous examples have later been found in the Dordogne regions, in the central Pyrenees, and in lower Italy Traces of a Neolithic cave art in North Africa show strong resemblances to the Bushman rock paintings of recent times The murals of the Ajanta caves of Hyderabad in India, dating from 200 B C to A D 600, are among the most striking examples of Buddhist art

Cave City, town (pop 960), S Ky , NE of Bowling Green It is a center for visitors to the famous limestone cave region of the state Mammoth Cave National Park, the Diamond Caverns, and other caves are near by

Cavedone, Jacopo (yä'kōpō kavādō'nā), 1577–1660, Italian painter, of the Bolognese school He assisted Guido Reni in Rome, but his reputation as a master of color and composition was won through his paintings in the churches of Bologna.

cave dweller. Caves and rock shelters, wherever found, are apt to be utilized by man, but they have not been widely used for human habitation either in prehistoric times or among primitive peoples of today Cave sites favor the preservation of human remains and have provided most of the known data on man during the PALEOLITHIC PERIOD These indicate most frequent occupation during periods of severe climate, such as the Mousterian, when Neanderthal man flourished The need to hunt animals in the Alpine region was probably an important factor in the choice of many such sites They are widespread in Europe, the Dordogne region of France, the Pyrenees, and S Italy contain many famous caves with notable examples of the Paleolithic CAVE ART Stone-using peoples were not the only ones to exploit caves, not until the 2d and 3d cent A D , during the Iron Age, did cave dwelling find its greatest development in Britain The troglodytes, known to classical writers, are assumed to have dwelt in caves along the Red Sea

Cavell, Edith (kă'vŭl), 1865–1915, British nurse She was matron of the Berkendael Medical Institute in Brussels, which became a Red Cross Hospital upon the outbreak of the First World War Nurse Cavell was arrested by the German authorities and pleaded guilty to a charge of harboring and aiding Allied prisoners and assisting some 130 to cross the Dutch frontier She was shot Oct. 11, 1915, despite the efforts of Brand Whitlock, U S minister to Belgium, to secure a reprieve. See biography by Helen Judson (1941).

Cavendish (kă'vŭndĭsh), pseud of **Henry Jones,** 1831–99, English card-game expert, b London Jones studied medicine, practiced in London, and retired in 1868. He became a leading authority on card games and was the first man to formulate a system of playing whist He was the author of *Principles of Whist: Stated and Explained by "Cavendish"* (1862) and later wrote books on billiards, lawn tennis, and croquet

Cavendish, George, 1500–1561?, English writer, gentleman-usher to Cardinal Wolsey His biography of Wolsey, written in 1557, remained in manuscript until 1641 and first appeared in entirety in Christopher Wordsworth's *Ecclesiastical Biography* (1810). One of the great books of the English Renaissance, this work was long attributed to Cavendish's brother William, but in 1814 Joseph Hunter clearly established its authorship. See S. W. Singer, ed , *The Life of Cardinal Wolsey* (1825).

Cavendish, Henry, 1731–1810, English physicist and chemist, b Nice. He was the son of Lord Charles Cavendish and grandson of the 2d duke of Devonshire. A recluse, whose writings were published chiefly after his death, his great contributions to science are found in the results of his many and accurate experiments in divers fields. His conclusions were remarkably original. His chief researches were on heat, in which he determined the specific heats for a number of substances (although these heat constants were not recognised or so called until later), on the composition of air, on the nature and properties of a gas which he isolated and described as "inflammable air" and which was later called by LAVOISIER HYDROGEN, and on the composition of water, which he showed to consist of oxygen and his "inflammable air" In his *Electrical Researches* (pub 1879) he anticipated some of the discoveries of Coulomb and Faraday His experiments to determine the density of the earth led him to give it a value stated as 5 448 times that of water His *Scientific Papers* were collected in two volumes (*Electrical Researches* and *Chemical and Dynamical*) in 1921.

Cavendish or **Candish, Thomas,** 1555?–1592, English navigator He commanded a ship in the flotilla under Sir Richard Grenville sent (1585) by Sir Walter Ralegh to establish the first colony in Virginia In command of three vessels he sailed from England (1586) on a voyage round the world (the third to be made), crossing from the coast of W Africa to Patagonia, where he discovered a fine harbor he named Port Desire (after his own ship) He ravaged Spanish towns and shipping on the west coast of South America and thence continued his journey by way of the Marianas, East Indies, and Cape of Good Hope, returning to England in 1588 after a voyage of two years and 50 days A second circumnavigation which commenced in 1591 ended disastrously; his fleet of five ships was dispersed, and he died at sea.

Cavendish, William: see NEWCASTLE, WILLIAM CAVENDISH, DUKE OF

Cavendish, town (pop 1,398), SE Vt , E of Ludlow, crossed by the Black River, settled 1769 on the Crown Point military road It includes PROCTORSVILLE and Cavendish villages

Cavendish Laboratory: see CAMBRIDGE UNIVERSITY

Caventou, Joseph Bienaimé (shôsôf' byĕnāmā' kävätōō'), 1795–1877, French chemist He was professor at the École de Pharmacie, Paris With P J Pelletier he isolated strychnine, brucine, and quinine (from cinchona bark)

caviar or **caviare** (kă'vēär) [Turkish], the roe of various species of sturgeon prepared as a piquant table delicacy, especially in Russia The ovaries, when removed from the fish, are beaten to loosen the eggs, which are then freed from fibers, fat, and membrane by being passed through a sieve The liquor is pressed off, and the eggs are salted and sealed in small tins or kegs "Fresh" caviar made in winter from high-grade eggs, mildly salted, is scarce and expensive Less choice varieties are cured with 10 percent salt The eggs, black, green, brown, and the rare yellow or gray, may be tiny grains or the size of peas The Russian caviar comes from the vicinity of the Black and Caspian seas, from the Danube provinces, and elsewhere In the United States an imitation of sturgeon caviar is produced from the roe of other fish, such as paddlefish, whitefish, and cod

Cavite (kävē'tä), city (1948 pop 35,052), on SW Luzon, capital of Cavite prov , Philippine Islands, SW of Manila on a narrow peninsula in Manila Bay After the Spanish-American War in 1898, the United States established a major naval base at Sangley Point just opposite the city proper It was agreed in 1947 that the United States would retain the base as a limited operational area

Cavour, Camillo Benso, conte di (kämēl'lō bān'sō kōn'tā dē kävōōr'), 1810–61, Italian statesman, premier of Sardinia (1852–59, 1860–61). The active force behind KING VICTOR EMMANUEL II, he was more than any other man responsible for the unification of Italy under the house of Savoy (see RISORGIMENTO) Of noble Piedmontese family, he early entered the army but resigned in 1831 and devoted himself to politics In 1847 he founded the Liberal daily, *Risorgimento,* in which he pressed King Charles Albert to grant a constitution and to make war on Austria A member of parliament after 1848, he became minister of agriculture and commerce and (1852) premier. He reorganized the administration and finances, reformed the army, and won for Sardinia a place among the powers through participation in the CRIMEAN WAR In 1858, by an agreement reached at Plombières, he won the support of Napoleon III for a war against Austria, promising in exchange to cede Savoy and Nice to France Austria was maneuvered into declaring war (1859), but Cavour refused to accept the separate armistice of VILLAFRANCA DI VERONA between France and Austria and resigned He returned to office in 1860 In that year Tuscany, Parma, Modena, and the Romagna voted for annexation to Sardinia, and Giuseppe GARIBALDI overran the Two Sicilies. Cavour met the delicate situation boldly and by his superior statesmanship avoided foreign intervention in favor of the dispossessed dukes and of the pope. Sardinian troops were sent into the Papal States, which, with the exception of Latium and Rome, were annexed to Sardinia. With the abdication (1861) of Francis II of the Two Sicilies the annexation (1860) of that kingdom was consummated. Cavour's labors were crowned two months before his death, when the kingdom of Italy was proclaimed under Victor Emmanuel II. See Pietro Orsi, *Cavour and the Making of Modern Italy* (1914); W. R. Thayer, *The Life and Times of Cavour* (2 vols., 1911).

cavy (kā'vē), name of the GUINEA PIG and of a number of related South American rodents The wild cavies are generally of uniform color, usually some shade of brown, and are without tails. They are herbivorous. One of the large species is the Patagonian cavy, a long-legged, harelike animal which reaches a length of about 2½ ft. Other forms are the Bolivian cavy, the Peruvian cavy (said to have been domesticated by the Incas), the restless cavy of Brasil, and the CAPYBARA. Some cavies are hunted for food in South America.

Cawdor (kô'dur), parish (pop. 767), Nairnshire, Scotland, SW of Nairn Cawdor Castle, built in 1454 and later, is represented by Shakspere, following tradition, as the scene of the slaying of Duncan by Macbeth, which occurred in 1040.

Cawnpore (kôn'pôr"), city (pop 487,324), SW United Provs , India, on the Ganges river It was a village until its cession (1801) to the British by the Nawab of Oudh During the Sepoy Rebellion (1857), Nana Sahib, whose claim to a pension had been rejected, slaughtered the entire British garrison, including women and children. Cawnpore today is a rail junction and great distributing and manufacturing center Sugar, woolens, and cotton thread and cloth are its main products.

Caxton, William, c 1421–1491, English printer. He served apprenticeship as a mercer, became a member of the Company of Mercers of London, and from 1463 to 1469 was at Bruges as governor of the Merchants Adventurers in the Low Countries He learned printing in Cologne in 1471–72, and at Bruges in 1475 he and Colard Mansion printed *The Recuyell of the Historyes of Troye,* the first book printed in English In 1476 he returned to England, and at Westminster in 1477 he printed *Dictes or Sayengis of the Philosophres,* the first dated book printed in England He printed three books in Bruges and many in Westminster He was the translator, from French, Latin, and Dutch, of some of the books that he printed, and for some he wrote original prologues, epilogues, and additions One of the type faces used by Caxton is the original Old English type The size of this type of Caxton's (14 point) is known as English WYNKYN DE WORDE, his successor as a printer, was his assistant at Westminster, and the printers Richard Pynson and Robert Copland refer to Caxton (possibly figuratively) as their master See William Blades, *The Biography and Typography of William Caxton* (1877), H R Plomer, *William Caxton, 1424–1491* (1925), N S Aurner, *Caxton* (1926), G P Winship, *William Caxton and His Work* (1938)

Cayce, town (pop 1,476), central S C , just S of Columbia, in a cotton and corn area

Cayenne (kīĕn',kän'), city (pop 11,704), capital of French GUIANA, at the mouth of the Cayenne river Cayenne was founded by the French as early as 1643, but was wiped out by an Indian massacre and not permanently settled until 1664 Built on Cayenne island, it has a shallow harbor, and deep-draft ships must anchor some distance out The chief export is gold Long the center of French penal settlements in Guiana, it has a population partially made up of descendants of prisoners It gave its name to Cayenne pepper, a very sharp condiment made from the fruit of plants of the genus *Capsicum,* which flourishes on the island in profusion

Cayes, Haiti see AUX CAYES

Cayey (kīā'), town (pop 5,622), SE Puerto Rico It is a sugar center, and outside the town is the U S. military reservation, Henry Barracks. The mountain chain, Sierra de Cayey (syĕ'rä dā), makes the climate cool and pleasant

Cayley, Arthur (kā'lē), 1821–95, English mathematician. He was called to the bar in 1849 In 1863 he was appointed first Sadlerian professor of mathematics at Cambridge. His researches, which covered the field of pure mathematics, included especially the theory of matrices and the theory of invariants. His collected papers were published in 14 volumes (1889–98)

Caylus, Anne Claude Philippe de Tubières, comte de (än' klōd' fēlĕp' du tübyĕr' kōt' du kälüs'), 1692–1765, French archaeologist and collector of antiquities He traveled in Europe and Asia and became known as an etcher and as a patron of the arts His collections are in the Louvre. Among his writings is *Recueil d'antiquities égyptiennes, étrusques, grecques, romaines, et gauloises* (7 vols , 1752–67) He claimed that he had rediscovered the method of encaustic painting on WAX.

Caylus, Marie Marguerite Le Valois de Villette de Murçay, comtesse de (märē' märgürĕt' lû välwä' dû vēlĕt' dû mürsā' kōtĕs' du), 1673–1729, French writer; niece of Mme de Maintenon. She was a notable beauty. Her *Souvenirs,* first edited by Voltaire in 1770, is a series of vivid portraits of

figures at the court of Louis XIV. Racine wrote for her a special prologue to his tragedy *Esther*, in which she acted at Saint-Cyr

Cayman Islands (kā'mən, kīmān'), archipelago (c 90 sq. mi.; estimated pop 9,625), British West Indies, NW of Jamaica. They are a dependency of Jamaica and consist of three islands, Grand Cayman, Little Cayman, and Cayman Brac. The population is largely Negro. The islanders build ships for local use and export such items as green turtles and turtle shells and shark skins.

Cayuga (kīyōō'gə), town (pop 1,126), Vermilion co., W Ind., N of Terre Haute

Cayuga Indians: see IROQUOIS INDIANS

Cayuga Lake (kīyōō'gə, kĭ-, kū-), 38 mi. long and 1 to 3½ mi. wide, W central N.Y., longest of the FINGER LAKES. The lake is connected by canal and the Seneca river with the Barge Canal to the north. Cornell Univ. and Wells College overlook Cayuga with its clifflike banks, near the southern end are Taughannock Falls, 215 ft. high

cayuse: see MUSTANG

Cayuse Indians (kīōōs'), North American Indian tribe, occupying W Oregon and W Washington. They were of Waulatpuan linguistic stock, and the mission established among them by Marcus WHITMAN was called Waiilatpu. In 1847 the Cayuse, apparently blaming the missionaries for an outbreak of smallpox, attacked the mission and killed the Whitmans and their helpers. The white settlers then declared war and subdued the Cayuse. They were placed on reservation in 1855. A small horse bred by them gave the name cayuse to all Indian ponies

Cazenovia (kăzənō'vēə), resort village (pop 1,689), central N.Y., on Cazenovia Lake SE of Syracuse, settled 1793, inc. 1810. It is the seat of Cazenovia Junior College (1824)

Cazin, Jean Charles (zhäN' shärl' käzĕ'), 1841–1901, French painter, noted for his figure compositions in landscape, pupil of Lecoq de Boisbaudran. An ardent student of the old masters, he made many journeys to Italy and the Low Countries. In England he painted several portraits and earned his living as a ceramist. Not until 1876 did he begin to show at the salons, where his *Ismaël* (Luxembourg Mus., Paris) received a first medal and was acquired by the state. Characteristic works depict a quiet, humble countryside in evening light with figures also suggesting melancholy and repose. In his biblical scenes the characters are dressed in the French peasant costumes of his day. He is well represented in the Luxembourg, Art Institute of Chicago, and Metropolitan Museum. See study by Léonce Bénédite (1902, in French)

Cb, chemical symbol of the element columbium (see NIOBIUM)

C battery see BATTERY, ELECTRIC

Cd, chemical symbol of the element CADMIUM

Ce, chemical symbol of the element CERIUM

Ceán Bermúdez, Juan Agustín (hwän' āgōōstēn' thāän' bĕrmōō'dāth), 1749–1829, Spanish art historian and painter. He is esteemed chiefly for his important contributions to the history of Spanish art. These include *Diccionario histórico de los más ilustres profesores de las bellas artes en España* (6 vols., 1800), *Descripción artística de la catedral de Sevilla* (1804), and other works on architecture, painting, and Roman antiquities in Spain. Bermúdez was almost the first to apply critical methods to the history of Spanish art and his *Diccionario* is still a valuable source of biographical material. He was a member of two royal academies and founder of an academy of fine arts in Seville

Ceará (sēōrä'), state (59,168 sq. mi., 1940 pop. 2,091,032, 1949 estimated pop. 2,524,266), NE Brazil. FORTALEZA, formerly sometimes also called Ceará, is the capital. Like other states of NE Brazil, Ceará has an Atlantic coastal plain producing cotton, sugar, coffee, and some rice. The semiarid uplands of the interior (the *sertão*) are usable only for raising cattle and goats, with some agriculture under irrigation. The droughts of the interior have been extremely severe, and after the disastrous seasons of 1877–79, there was an exodus of the population to Amazonia, which increased in the following years with the Amazon rubber boom. Many others went to SE Brazil. Some of the people of the interior spend the dry season on the coast. Recently the government has made vigorous efforts to reclaim the interior by irrigation projects. Ceará was part of the region occupied by the Dutch in the 17th cent. It shared in the Brazilian sugar-growing hegemony, and much of the population is descended from Negroes brought in as slaves. Slavery was abolished here, however, long before national emancipation

Ceará, city, Brazil: see FORTALEZA

Cebu (sābōō'), island (1,702 sq. mi.; 1939 pop. 947,309), one of the Visayan Islands, in the Philippine Islands. It is between Leyte and Negros. Primarily agricultural, it produces corn, coconuts, sugar cane, hemp, and tobacco. Coal and oil are exploited. The capital and chief port is Cebu (1948 pop. 167,503) on the east coast, with a harbor sheltered by Mactan island. Founded by López de Legaspi in 1565 as San Miguel, Cebu was the capital of the Philippine Islands until 1571. It has a bishop's palace and a cathedral, and its principal exports are hemp and copra. The city was severely damaged in the Second World War

Cecco d'Ascoli (chāk'kō dä'shkōlē), 1257–1327, Italian astrologer, mathematician, and poet, a physician, whose real name was Francesco degli Stabili, b. Ascoli. A teacher of astrology at several institutions in Italy, he was professor of mathematics and astrology at the Univ. of Bologna (1322–24). Accused of heresy, largely because of an attack on Dante's *Divine Comedy*, he was burned at the stake. His chief work was *L'acerba*, an allegorical didactic poem of encyclopedic range

Cecere, Gaetano (chĕchĕ'rē), 1894–, American sculptor, b. New York city, studied at the American Academy in Rome. His works include the John Stevens monument, Summit, Mont., war memorials in Astoria, L.I., Princeton, N.J., Plainfield, N.J., and Audenarde, Belgium, and medals for Princeton Univ. and the U.S. army.

Čech, Svatopluk, Czech *Čech* (svä'tôplŏōk chĕkh'), 1846–1908, Czech poet and novelist. Because of his strong Pan-Slavonic feeling, inspired by Kollar's *Daughter of Slava*, he was the most popular poet of his day. This feeling animates all his writings, from *The Adamites* (1874) and *Slavia* (1882) to the *Songs of a Slave* (1897). He wrote lyrics (e.g., *In the Shade of the Linden Tree*, 1879), epics based on Czech history (*Zizka*, 1879, *Vaclav of Michalovce*, 1880) and on Czech country life (*The Smith of Lesetin*, 1889), and satirical novels, including the various "Excursions of Mr. Broucek" (*To the Moon* and *To the Fifteenth Century*, both 1888). See Paul Selver, *Anthology of Czechoslovak Literature* (1929)

Cecil, Edgar Algernon Robert, 1st **Viscount Cecil of Chelwood** (sĭ'səl), 1864–, British statesman, known in his earlier life as Lord Robert Cecil, third son of the 3d marquess of Salisbury. A Conservative who held several ministerial posts, Cecil gained fame largely through untiring advocacy of internationalism. He collaborated with President Woodrow Wilson and Gen. J. C. Smuts in drafting the League of Nations Covenant. His efforts for international peace were recognized by the 1937 Nobel Peace Prize. See his autobiography, *A Great Experiment* (1941)

Cecil, Robert: see SALISBURY, ROBERT CECIL, 1ST EARL OF

Cecil, Robert Arthur Talbot Gascoyne-: see SALISBURY, ROBERT ARTHUR TALBOT GASCOYNE-CECIL, 3D MARQUESS OF

Cecil, William: see BURGHLEY, WILLIAM CECIL, 1ST BARON

Cecilia, Saint, 2d or 3d cent., Roman virgin martyr. She is remembered daily in the Mass. An ancient and famous account of her life is factually valueless. As patroness of music she is represented at the organ. St. Cecilia is the subject of one of the *Canterbury Tales*, of a song by Dryden, and of an ode by Pope. Cecily is an English form of her name. Feast: Nov. 22

Cecrops (sē'krŏps), in Greek mythology, first king of Athens. He was half man and half serpent (the serpent was an ancient symbol of the life-giving earth). He established monogamy and the first principles of law and religion

Cedar, river rising in SE Minnesota and flowing c. 300 mi. southeast across Iowa to join the Iowa river at Columbus Junction. It drains a fertile agricultural region, passing Charles City, Cedar Falls, Waterloo, and Cedar Rapids

cedar, name for a number of trees, mostly coniferous evergreens. For the northern white cedar and the western red cedar, see ARBORVITAE, for the red cedar, see JUNIPER. The southern white cedar (*Chamaecyparis thyoides*) is native to the Atlantic and Gulf coastal swamps from Maine to Florida and Louisiana. It resembles the northern white cedar in appearance and in wood, which is light, soft, and weak, but resistant to decay. It is used mostly for making boats, woodenware, railway ties, and posts. The cedar of Lebanon (*Cedrus libani*), a native to Asia Minor and North Africa, is famous for the historic grove on Mt. LEBANON and is frequently mentioned in the Bible. The wood used in building the Temple and the house of Solomon (I Kings 5, 6, and 7) may, however, have been that of a similar and closely related tree, the deodar cedar (*Cedrus deodara*), native to the Himalayas but cultivated elsewhere. It has fragrant wood, durable and fine grained, and is venerated by the Hindus, who call it Tree of God

Cedar Breaks National Monument: see NATIONAL PARKS AND MONUMENTS (table)

Cedarburg, city (pop 2,245), E Wis., N of Milwaukee and on the Milwaukee river, settled 1842, inc. 1885. It is a farm trade center

Cedar City, town (pop 4,695, alt 5,805 ft.), SW Utah, on Dry Coal Creek near the Iron Mts., inc. 1868. Founded in 1851 by the Mormon "iron mission" sent to develop coal and iron deposits, it later became a center of ranching and of tourist trade. Zion National Park, Bryce Canyon National Park, and Cedar Breaks National Monument are near by. Cedar City has a junior branch of the Utah State Agricultural College

Cedar Creek, small tributary of the North Fork of the Shenandoah river and N of Strasburg, Va. It was the scene of a Civil War battle (Oct. 19, 1864) in which P. H. SHERIDAN defeated J. A. EARLY

Cedar Crest College: see ALLENTOWN, Pa.

Cedar Falls, city (pop 9,349), NE Iowa, on the Cedar river just above Waterloo, settled 1845, laid out 1851, inc. 1857. With the coming of the railroad (1861), it developed as a milling center. It manufactures pumps, machines, barn equipment, and wool. It is the seat of Iowa State Teachers College (1876) and of the Evangelical Campgrounds, scene of annual assemblies, including the Interdenominational Bible Conference.

Cedar Grove. **1** Township (pop. 5,208), NE N.J., in the Watchung Mts. N of Montclair. A rural community, it is about 50 min. from New York city. A hospital for the insane is here. **2** Town (pop. 1,411), S W Va., on the Kanawha river and SE of Charleston, in a coal-mining region, settled 1773. The site of Booker T. Washington's boyhood home is near by

Cedarhurst, residential village (pop 5,463), on SW Long Island, SE N.Y., SE of Jamaica, inc. 1910

Cedar Key, city (pop 988), NW Fla., off the Gulf coast near the mouth of the Suwannee. Now a fishing center, it was a busy port and railroad station in the mid-19th cent., and in the late 19th cent. there were several cedar mills here

Cedar Mountain: see BULL RUN, SECOND BATTLE OF

Cedar Rapids, city (pop 62,120), co. seat of Linn co., E Iowa, on the Cedar river and NW of Davenport, settled 1838, laid out 1841 as Rapids City, renamed and inc. as a town 1849, as a city 1856. One of the state's principal commercial and industrial cities, it is a distributing and rail center for an extensive agricultural area. The city has railroad shops, is supplied with power by the Cedar river, and has manufactures of cereals (particularly "Quaker Oats"), starch, meat products, and radio equipment. Coe College (coeducational, 1881), a large Masonic library (1844), an art gallery (with paintings by Grant Wood), and the landscaped Municipal Island (site of the courthouse and a neoclassic war memorial building) are here. Czechs came early (1852) to the city and compose about one-third of its population

Cedar Springs, village (pop 1,101), S Mich., NE of Grand Rapids, settled 1859, inc. 1871. It is a farm and resort trade center

Cedartown, industrial city (pop 9,025), co. seat of Polk co., NW Ga., WNW of Atlanta near the Ala. line, in the piedmont region, inc. 1854. A Cherokee settlement was here earlier. Cedartown's main industrial growth stems from the establishment of textile and tire-cordage plants here in the 1920s. Chemicals are also made

Cedarville, village (pop 1,034), SW Ohio, near Xenia, settled 1805. It is a college town, seat of Cedarville College

cedar waxwing: see WAXWING

Cedron (sē'-) **1** Same as KIDRON. **2** Place, near Jamnia, fortified against the Maccabees. 1 Mac. 15:39–41, 16:9

Cefalù (chäfälōō'), town (pop. 9,654), N Sicily, Italy, on the Tyrrhenian coast. Its famous cathedral, started in 1131 by Roger II, king of Sicily, is one of the finest examples of Norman architecture in Sicily

Cegled, Hung. *Cegléd* (tsā'glād), city (pop. 38,872) central Hungary, SE of Budapest. It is a trading center for grain and fruit. The name formerly was Czegled

Ceiba, La (lä sā'bä), city (pop. 12,185), N Honduras, a port on the Caribbean. Headquarters of the Standard Fruit and Steamship Company in Honduras, La Ceiba exports bananas and also some hides, coconuts, and rubber.

ceiling, the overhead enclosing surface of a room. It may consist of the actual structural members supporting a room or roof above and left exposed, or it may be a covering formed in plaster, wood, or other finishing material. In modern ceilings there is customarily no exposed construction. A universal type is the "hung" ceiling, generally consisting of plaster applied to a surface of metal lath which is suspended from the structural beams. This permits concealment of all rough structure and also provides space for pipes, wiring, and ducts. Before the Renaissance the ceiling of exposed structure was the prevailing type. In ancient architecture the members were embellished either with color, as in the polychromed stone lintels and coffers of Egyptian and Greek temples, or with reliefs, as in the Roman masonry vaults with their modeled stucco embellishments of figures, foliage, and conventional pattern, of which fine examples remain at Pompeii. BYZANTINE ARCHITECTURE produced the vaulted ceiling entirely veneered with glass mosaics, as in the church of St. Mark's, Venice, the ceiling composed of wood or plaster stalactites was a feature of Moslem architecture. In medieval ceilings the structural members in themselves were exploited for maximum effect, in both their forms and their arrangement. Of wood construction were the Spanish and Italian elaborately polychromed beamed ceilings, as well as the English open-timber roofs richly carved with angel figures and Gothic tracery. In masonry the development of the organic support-

ing rib led to decorative vaults of many compartments and ultimately to the intricate traceried FAN VAULT of English Gothic With the Renaissance, the ceiling, whether flat or vaulted, became a field for pure adornment, concealing the structure and designed independently of it. Wood carving, gilding, and fresco painting were all coordinated for bold and gorgeous effects in the lofty rooms of the Renaissance and baroque periods in Italy The paintings were often executed by such masters as Michelangelo, Raphael, and Pinturicchio Inigo Jones and Christopher Wren introduced into England plaster ceilings of bold panel work and high-relief ornament Robert and James Adam, however, banished these in the late 18th cent by popularizing low-relief classic ornament of extreme delicacy, laid out in oval, circular, and fan patterns These were inspired by the Pompeian plaster vaults and came into wide imitation especially in American colonial interiors

Celaenae (sĭlē'nē), ancient city of Asia Minor, in Phrygia, near the headwaters of the Maeander river (now the Menderes) in present W central Asiatic Turkey In the time of the Persian Empire, Cyrus the Great had a palace here and Xerxes I built a fort Alexander the Great conquered it in 333 B C Seleucus I removed the inhabitants to neighboring Apanoa Modern Dinar is on the site

Celaeno (sĭlē'nō), in Greek religion 1 One of the PLEIADES 2 A HARPY

Celakovsky, Frantisek, Czech *František Čelakovský* (frän'tĭshĕk chĕ'lakôfskĭ), 1799–1852, Czech folklorist and poet A disciple of Herder and a romantic Pan-Slavist, he collected (1822–27) Slavic popular poetry and later imitated this in his own verses, *Echoes of Russian Song* (1829) and *Echoes of Czech Song* (1830) He held from 1841 at Breslau the first professorship of Slavic languages in a Central European university

celandine (sĕl'ĭndĭn) [ultimately from Gr ,=of the swallow], Old World biennial plant (*Chelidonium majus*), naturalized in E North America and called also greater celandine, swallowwort, and wartweed It was formerly considered efficacious in removing warts and in restoring failing eyesight (swallows were said to cure their blinded young with this plant) It contains an irritant, is related to the poppy, and has small yellow flowers The lesser celandine and a celandine poppy native to North America belong to other genera

Celano, Thomas of: see THOMAS OF CELANO

Celaya (sälī'yä), city (pop 22,760), Guanajuato, central Mexico Founded as Zelaya in 1570, it is on a depressed plain near the Laja river and is surrounded by good farming country There are numerous industries A native son, Francisco Eduardo de Tresguerras, built (1803–7) the Church of Nuestra Señora del Carmen [Our Lady of Mt Carmel], an unusual structure showing Persian influence, the interior he decorated with his own murals and sculpture Often involved in Mexican wars, Celaya was the first city to be captured (Sept 28, 1810) by insurrectionary forces under HIDALGO Y COSTILLA In 1915 Francisco VILLA, defeated at Celaya by Álvaro OBREGÓN, began his long retreat northward

Celebes (sĕ'lubēz), island (71,695 sq mi , pop including offshore islands 3,996,679), largest island of East Indonesia, E of Borneo, from which it is separated by Macassar Strait Extremely irregular in shape, it is comprised of four large peninsulas separated by three gulfs—Tomini on the northeast, Tolo on the southeast, and Boni on the south The terrain is almost wholly mountainous, with the highest peak Mt Rantemario (11,286 ft) on the south peninsula There are numerous lakes, of which Towuti (30 mi long and 15 mi wide) is the largest, and Tondano, with its waterfall, the most beautiful In the interior are large forests of valuable timber Animals include the babirusa (resembling swine) and the small wild ox called anoa, found only in the Celebes Among the natural resources are gold, silver, diamonds, coal, nickel, and iron There are trepang and mother-of-pearl fisheries, and in the coastal areas are grown copra, coffee, and sago Timber is the chief export The inhabitants are Malayan, except for the semicivilized tribes (sometimes called Alfuros) in the interior, who have certain Negroid characteristics Among the Malayan tribes are the Bugis, who are known as seafaring traders, and the Macassars, both groups are Moslem In the north are the Minahassa, who are Christians The Portuguese first visited the Celebes in 1512 and settled in Macassar in 1625 In 1660 they were expelled by the Dutch, who governed the island as part of the Netherlands East Indies until 1946, when the state of East Indonesia (including Celebes) was founded, with the capital at Macassar The **Celebes Sea** is north of the island, between it and the Philippine Islands

Céleron de Blainville, Jean Baptiste (zhäN'bätēst' sälurôN' dù blĕvēl'), 1693–1759, French Canadian soldier, b Montreal He was commandant at Michilimackinac (1734–42), Detroit (1742–43, 1750–53), Niagara (1744–46), and Crown Point (1746–47) In 1739–40 he led a detachment south to what is now Tennessee to cooperate with BIENVILLE in a campaign against the Chickasaw Indians and was decorated for his conduct. His most famous service was as leader of the expedition sent by the governor of New France in 1749 to take official possession of the Ohio valley and warn English traders to leave An English translation of his Ohio journal is in the *Collections* of the State Historical Society of Wisconsin, XVIII (1908), 36–58.

celery [Ital from Gr ,=parsley], biennial plant (*Apium graveolens*) of wide distribution in the wild state throughout the north temperate Old World and much cultivated as a salad plant By BLANCHING and cultivation, the acridity of the stalks is reduced and they are made more tender and delicate Celeriac is a variety cultivated chiefly in N Europe for the large edible, turniplike root Celery is closely related to the parsnip, carrot, dill, and caraway

celesta (sĭlĕ'stù), keyboard musical instrument patented in 1886 by Auguste Mustel of Paris It consists of a set of steel bars fastened over resonators The bars are struck by hammers operated from a keyboard The compass is four octaves upward from middle C Its tone is delicate and ethereal Tchaikovsky, in his *Nutcracker Suite*, was one of the first composers to write for it, Richard Strauss made effective use of it with wood winds in *Der Rosenkavalier*

Celestina, La (la thälästĕ'nä), Spanish novel written in dramatic form It is known to have been published in 1499 as *Comedia de Calisto y Melibea* but was probably first published earlier Later it came to be called *La Celestina*, the name of the principal character, an old woman whose artful devices make it possible for Calisto and Melibea to meet against the will of the girl's parents Although for a long time only part of the novel was ascribed to Fernando de ROJAS, he is now usually recognized as the author of the whole book It was translated into English c 1527 by James Rastell and in 1631 by James Mabbe The book is a relentless picture of human passion and weakness

Celestine I, Saint (sĕ'lustĭn), d 432, pope (422–32), an Italian, successor of St Boniface I and predecessor of St Sixtus III The opposition of St CYRIL of Alexandria to NESTORIANISM inspired both sides to write to the pope, who judged that Nestorius should be excommunicated if he refused to retract To the Council of Ephesus Celestine sent legates with orders not to discuss, but to judge Celestine also advanced orthodoxy in the West by suppressing semi-Pelagianism in Gaul and by sending GERMANUS OF AUXERRE to Britain Feast July 27

Celestine III, 1106?–1198, pope (1191–98), a Roman named Giacinto Bobone, successor of Clement III and predecessor of INNOCENT III He was the first member of the Orsini family to become pope Celestine was 85 when elected and could not cope with the ambitious emperor, HENRY VI Henry paid no attention whatever to the claims of the Church, treating bishops as he would and ravaging Italy in annexing Sicily Celestine tried to secure the release of RICHARD I of England but was unwilling to use strong measures Innocent III, who succeeded him, was his complete antithesis

Celestine V, Saint, 1215–96, pope (elected July 5, resigned Dec 13, 1294), an Italian (b Isernia) named Pietro del Murrone, successor of Nicholas IV and predecessor of BONIFACE VIII From youth he was an ascetic, dwelling in the mountains of the Abruzzi About him there gradually collected a number of monks, whom Pietro governed These, later called Celestines, were part of a great visionary movement popularizing millenarian ideas and spreading ascetic practices From before 1290 Pietro lived as a hermit deep in the mountains After the death of Nicholas (1292) there was a two-year delay in holding an election because of faction and intrigue among the cardinals, at length, in desperation, they elected Pietro, knowing his popularity and confident of their ability to control him The election was not favored by Cardinal Caetani, the only cardinal independent of the main factions Pietro was at Aquila and was promptly attended by Charles II of Naples, who took over the government of the Church For months the old man was a puppet, then, as he was going into an Advent retreat, he abdicated rather than name a regency, as Charles suggested The independent Caetani was promptly elected, as Boniface VIII, and Celestine showed awareness of his failure by asking Boniface to cancel most of his (Celestine's) papal acts The disappointed ruler of Naples and the extremist monks and friars spread rumors for years alleging fraud, illegality, even heresy against Boniface. There is no lack of evidence about Celestine's intentions, and no cogent argument has ever been advanced that a pope may not resign Boniface kept Celestine in custody because of the danger of schism should the former pope fall into the hands of the Neapolitans. St. Celestine's canonization by Clement V (1313) was promoted by Philip IV as a gesture of hatred against Boniface, but it was acceptable to the Church because of Celestine's exemplary life —he was canonized under his Christian, not his regnal, name. Feast: May 19.

celestite (sĕ'lustīt) **or celestine** (sĕ'lustĭn, -tēn), a mineral appearing in blue-tinged or white orthorhombic crystals or in fibrous masses. The natural sulphate of strontium, it is important as a source of strontium and of certain of its compounds, e g , strontium hydroxide, used in refining beet sugar, and strontium nitrate, used in red signal flares. It occurs in England, in Sicily, and in the United States on islands in Lake Erie and also in Pennsylvania

celibacy (sĕ'lĭbusē), voluntary refusal to enter the married state, with abstinence from sexual activity It is one of the typically Christian forms of ASCETICISM In ancient Rome the VESTAL virgins were celibates, and successful MONASTICISM has everywhere been accompanied by celibacy as an ideal Among ancient Jews the ESSENES were celibates. In the Judaism of postexilic times sexual activity in the married state was lawful and good; otherwise it was unlawful This rule remained in Christianity But Christian tradition from the start has interpreted the Gospels and Epistles as teaching that voluntary celibacy, especially virginity, is peculiarly meritorious. 1 Cor 7 In the Eastern churches, monks and nuns are celibates, but the ordinary parish clergy are married, generally they must be married to be ordained and may not remarry Eastern bishops are widowers or celibates, hence they are usually from monasteries rather than parishes In the West, celibacy has been common among the parish clergy since the 3d cent , and as time passed, the Holy See became the bulwark of celibacy of the secular clergy The chief problem of reformers in the early Middle Ages was to end concubinage among them—marriage of the clergy had fallen into disrepute, and violations were of the laws of chastity rather than of marriage In the 11th cent the most stringent laws were made, and by the time of the Reformation popular opinion tolerated neither concubinage nor marriage in the clergy The Roman Catholic Church in the Roman rite allows no sacerdotal marriage, but the clergy of Eastern rites united with the pope are often married before ordination Protestants have rejected voluntary celibacy as an ideal A standard apologetic explanation of the Western discipline of celibacy for parish priests is that marriage would prevent the priest from giving his complete attention to his parish

Celina (sulī'nu), village (pop 4,841), co seat of Mercer co , W Ohio, SW of Lima, settled 1834 Furniture is manufactured

Céline, Louis Ferdinand (lwē' fĕrdēnā' sālēn'), 1894–, French author, whose real name is Louis Ferdinand Destouches A practicing physician, Céline wrote sensationally misanthropic novels, the first of which, *Voyage au bout de la nuit* (1932, Eng tr , *Journey to the End of Night*, 1934), was followed by *Mort à crédit* (1936, Eng tr , *Death on the Installment Plan*, 1938) *Mea Culpa* (1937, Eng tr , 1937) is his refutation of Communism His later works were all fascistic

Celje (tsĕ'lyĕ), city (pop 22,048), Slovenia, NW Yugoslavia Founded (1st cent A D) by Emperor Claudius, it was the seat (1333–1456) of the powerful Slovenian counts of Celje (or Cilli) A castle and ruins of an earlier castle remain The city now has a light-metal industry, ceramics manufacture, and breweries

cell, in biology, the unit of structure and function of which animals and plants are composed Cells are microscopic although some of the largest can be detected with the naked eye The living matter of the cell, the PROTOPLASM, is differentiated into the nucleus and the cytoplasm Within the nucleus of nearly all cells is a nucleolus, a small, rounded mass of dense material On the outer boundary of the cytoplasm a delicate plasma membrane develops Plant cells are surrounded in addition to the membrane by a cell wall usually composed chiefly of cellulose secreted by the cytoplasm In both plant and animal cells the nucleus plays a major role in the process of cell division. Embedded in the nuclear sap, the fluid within the nucleus, is a network of material known as the reticulum The thinner portion of this is sometimes called the linin, and the dark-staining portion is the chromatin During cell division this chromatin forms the chromosomes (see MITOSIS) The functions of the cell, other than reproduction, are performed by the cytoplasm, but are controlled by the nucleus There are a number of cell inclusions or differentiated portions of the cytoplasm Of particular importance are the chloroplasts of plant cells (see CHLOROPHYLL and PHOTOSYNTHESIS) Other plastids are the chromoplasts, which contain pigments producing most of the red and yellow colors in plants. In typical mature plant cells a vacuole containing cell sap (water with sugars, organic acids, and other materials in solution) fills most of the central part of the cell, this fluid helps to maintain turgidity of the cell. Most purple and blue colors in plants are caused by pigments dissolved in the cell sap In cells containing such large vacuoles the cytoplasm forms a thin layer between the vacuole and the cell wall and sometimes extends in strands through the cell. In typical animal cells the cytoplasm fills most of the

cell, and in some, e.g., the amoeba, the cytoplasm includes a clear portion, the ectoplasm, near the boundary of the cell and a more granular inner portion, the endoplasm. Other cytoplasmic bodies include the centrosome, which is involved in cell division, and the Golgi bodies and chondriosomes the functions of which are not definitely determined. In unicellular plants and animals all the essential life functions are performed by a single cell In some colonial forms of unicellular individuals each cell functions separately, while in others there is some specialization of certain cells for particular functions Multicellular plants and animals are composed of specialized cells which are united to form various tissues Among those who contributed to early knowledge of cells are Anton von Leeuwenhoek, Robert HOOKE, Robert BROWN, Nehemiah Grew, Marcello Malpighi, Matthias J SCHLEIDEN, Theodor SCHWANN, Max J. S Schultze, and Hugo von Mohl The science of the study of the cell is cytology See E. B Wilson, *The Cell in Development and Heredity* (3d ed , 1925), L. W Sharp, *Fundamentals of Cytology* (1943).

cell, in electricity, a source of electric current, in which the flow of current is caused by chemical action resulting in the conversion of chemical energy to electrical energy A cell consists essentially of two dissimilar substances (a positive ELECTRODE and a negative electrode) which conduct electricity and a third substance (an ELECTROLYTE) which acts chemically upon one of the electrodes A group of several such cells connected together is called a battery. One simple form of cell consists of a glass jar (battery jar) containing a dilute solution of sulphuric acid into which are introduced the electrodes of the cell, here a strip of copper and a strip of zinc When the two electrodes are connected externally by a conductor, such as a piece of copper wire, a current of electricity flows through the wire The explanation of this phenomenon lies in the activity within the cell The sulphuric acid and zinc react, the zinc plate diminishing in size as the action proceeds, the copper is unaffected, but clinging to it and escaping into the air around it are bubbles of a gas (hydrogen). The bubbles, collecting rapidly in great numbers, form a protective covering over the copper plate and interfere with the cell's action—a condition called polarisation In the chemical action, the hydrogen of the acid is displaced by the zinc, negative charges (see ELECTRON) being left on the zinc plate The hydrogen ions migrate to the copper plate, where, each ION receiving an electron, they become atoms and join in pairs to form the hydrogen molecules given off The electrons received by the hydrogen ions at the copper plate have traveled through the external conductor (the wire) from the zinc to the copper It is apparent, then, that the electrons flow through the wire from the negative (zinc) plate to the positive (copper) plate or in a direction opposite to that of the conventional "electric current" There are several kinds of cells differing in electrode material and electrolyte The voltage or electromotive force (abbreviated emf) depends upon the activity of the substances used, but is not affected by the size of electrode or quantity of electrolyte The cells made by Alessandro Volta and by Galvani are of historic significance The Bunsen cell is a double-fluid cell having electrodes of zinc (-) and carbon (+), solutions of sulphuric acid and fuming nitric acid, and an emf of 1 94 volts The chromate cell (double fluid also) uses zinc (-) and carbon (+) for electrodes, a solution of sulphuric acid and one of potassium dichromate and sulphuric acid, and an emf of 2 volts The Daniell cell (double fluid) has zinc (-) and copper (+) electrodes, a solution of sulphuric acid and a saturated solution of copper sulphate, and an emf of 1 06 volts (variations in voltage are obtainable with other solutions) The Grove cell (one type) uses zinc (-) and platinum (+) electrodes, a solution of sulphuric acid and one of fuming nitric acid, and an emf of 1 93 volts (other types range down to 1 61 volts) The Leclanché cell is a single-fluid cell having zinc (-) and carbon (+) electrodes, a solution of ammonium chloride, and an emf of 1 46 volts Similar to the Leclanché cell is the common dry cell, so called because the electrolyte is in the form of a paste The cell consists of a zinc (-) cylinder closed at one end and lined throughout with a layer of absorbent material, a central core of carbon (+), and a closely packed mixture of carbon granules and manganese dioxide, which is saturated with a solution of ammonium chloride (sal ammoniac) The open end of the zinc cylinder is sealed off with pitch The emf of the cell is about 1 5 volts The Weston normal cell is the legal standard of emf. It consists of an electrode of cadmium amalgam (-) in a saturated cadmium sulphate solution and a mercury electrode (+) in a paste of mercurous sulphate and cadmium sulphate It has an emf of 1.0183 volts at 20° C. See also ELECTRIC CIRCUIT

cella (sĕ'lə), that portion of a Roman temple which was enclosed within walls, as distinct from the open colonnaded porticoes which formed the rest of it. It corresponds to the NAOS in Greek temples. The cella housed the statue of the deity to whom the temple was dedicated and was also used as a treasury Sometimes it extended the whole width of the building, instead of being kept entirely within free-standing colonnades The cella was generally a single chamber, but there were sometimes two chambers, or even three, as in the temple of Jupiter, on the Capitoline Hill

Celle (tsĕ'lə), city (pop 52,281), in the former Hanover prov , N Germany, on the Aller river. It has oil refineries and manufactures machinery and soap Celle was chartered in 1294 Its castle was the residence of the dukes of Brunswick-Lüneburg until 1705 The modern section of the city was damaged in the Second World War

Cellini, Benvenuto (chĕlē'nē, Ital bānvānōō'tō chāl-lē'nē), 1500-1571, Italian sculptor, metalworker, and author. His remarkable autobiography reveals one of the most spectacular and singular careers in the history of art Possessed of great talent and vast energy, he produced a prodigious number of beautiful objects, despite a lifetime of escapades and enmities and repeated banishments He was born in Florence, the son of a musician, he studied music until his 15th year, when he was apprenticed to a goldsmith Banished from Florence after fighting a duel, he went from town to town working for local goldsmiths and in 1519 went to Rome Under the patronage of Pope Clement VII he became known as the most skillful worker in metals of his day, producing medals, jewel settings, caskets, vases, candlesticks, metal plates, and ornaments Imprisoned on false charges, on his release he worked at the court of Francis I at Paris He returned to Florence in 1545 and remained until his death in 1571 The decorative quality of his work, its intricate and exquisite detail and workmanship, are typical of the best of the period Unfortunately, most of his works have perished The famous gold and enamel saltcellar of Francis I and the gold medallion of *Leda and the Swan* (both in the Vienna Mus) and two gold cups in the Metropolitan Museum are perhaps the best examples of those remaining His sculptures, most of them executed in the later Florentine period, include the colossal bronze bust of Cosimo I (Bargello), the bronze bust of Altoviti (Gardner Mus , Boston), the *Nymph of Fontainebleau* (Louvre), the life-size *Crucifixion*, a white marble Christ on a black cross (Escorial), and the renowned *Perseus with the Head of Medusa* (Loggia dei Lanzi, Florence), a beautifully wrought bronze statue surmounting a marble pedestal lavishly adorned with statuettes and carvings See translation of the autobiography by J A Symonds (1888, many later editions)

cello or **'cello**: see VIOLONCELLO

cellophane (sĕ'ləfān), proprietary name for the thin, transparent, flexible sheeting used for wrapping a great variety of articles It is a CELLULOSE product made by the VISCOSE PROCESS A glycerin bath imparts flexibility, a dye bath, color, if desired Cellophane is not poisonous, is moistureproof, is not more inflammable than paper, and exhibits transparency to ultraviolet light The process for its manufacture was discovered (c 1900) by J E Brandenberger, a French textile worker, but was not perfected for several years

celluloid [from *cellulose*], transparent, colorless substance made synthetically by treating cellulose nitrate with camphor and alcohol The paste thus obtained is rolled into sheets of any desired thickness or molded into any form and is often colored Celluloid is employed widely as a substitute for more expensive substances, as ivory, amber, horn, and tortoise shell It is used to make combs, brush handles, soap dishes, and other toilet articles, billiard balls, knife handles, ornaments, toys, transparent rulers, eye shades, buttons, and other useful and common things It is used also for photographic film, but its inflammability represents a danger Celluloid was formerly called xylonite

cellulose, a firm substance, chemically a carbohydrate, which is formed by the cytoplasm of plant cells and makes up the bulk of the cell wall It appears almost pure as absorbent cotton, jute, linen (flax), and the filter paper used commonly in laboratories It constitutes the greater part of paper, wood, and wood pulp Cellulose is insoluble in water and other ordinary solvents but exhibits marked properties of absorption It is very inert chemically When treated with strong acids, however, its behavior is that of an alcohol, i e , esters are formed For example, a mixture of sulphuric and nitric acids reacts with cotton to form nitrocellulose (cellulose trinitrate), an ester, commonly called guncotton A mixture of cellulose nitrates (called pyroxylin) treated with camphor yields celluloid When dissolved in alcohol and ether, this mixture produces collodion. Cellulose acetate results from the reaction of cellulose and acetic acid and is used in the manufacture of certain plastics and lacquers Noninflammable photographic film is made from it The manufacture of artificial silk or RAYON from cellulose esters, or directly from cellulose itself, is of great importance in the textile industry (see VISCOSE PROCESS). CELLOPHANE is a cellulose product. See Mark Plunguian, *Celluloses Chemistry* (1943); Emil Heuser, *Chemistry of Celluloses* (1944); Emil Ott, ed , *Cellulose and Cellulose Derivatives* (2d revised printing, 1947).

Celman, Miguel Juárez. see JUÁREZ CELMAN.

Celoron, village (pop 1,349), W N Y , on Chautauqua Lake near Jamestown, inc 1896.

Celsius, Anders (ăn'dûrs sĕl'sēûs), 1701–44, Swedish astronomer While professor of astronomy in the Univ. of Uppsala (1730–44), he traveled through Germany, France, and Italy, visiting great observatories At Nuremberg in 1733 he published a collection of 316 observations of the aurora borealis which had been made by himself and others While in Paris he was instrumental in bringing about an expedition organized by the French Academy for the measurement of an arc of the meridian in Lapland, in 1736 Celsius was a member of the expedition He supervised the building of an observatory at Uppsala in 1740 and became its director In 1742 he invented the centigrade (or Celsius) thermometer His works include *De observationibus pro figura telluris determinanda* (1738)

Celsius, Olaf (ō'lăf), 1670–1756, Swedish botanist and Orientalist He wrote a two-volume work, *Hierobotanicon*, on the plants of the Bible (many of which, to his day, had been known only by their Hebrew names), and compiled a catalogue of the plants of Sweden His greatest contribution to science, perhaps, was the aid and encouragement he gave Linnaeus Anders Celsius was his nephew

Celsus (sĕl'sŭs), 2d cent , Roman philosopher, an aggressive antagonist of Christianity His works have been lost, but the substance of his *True Discourse* is given by Origen in his *Against Celsus* Celsus cynically offers a scandalous story as a substitute for the Incarnation He suggests that Jesus' reputation as a wonder-worker was due to his having learned the art of jugglery in Egypt He ridicules the idea that God has, as it were, awakened but lately from sleep and resolved to save a few of mankind, while the majority go down to hell He urges that all that is worth while in Christianity is found already in the pagan philosophers See J A Froude, *Origen and Celsus* (1883)

Celsus, Aulus Cornelius, fl A D 147, Latin encyclopedist His only extant work consists of eight books on medicine, *De re medicina*, believed to have been written A D c 30 Pope Nicholas V rediscovered the manuscript, and it was printed in Florence in 1478 The work was translated by James Grieve in 1756 and by W G Spencer in 1935 Celsus' first name is also spelled Aurelius

Celt (sĕlt) or **Kelt** (kĕlt) **1** One who speaks a Celtic language or who derives his ancestry from an area where a Celtic language is, or recently was, spoken, i e , one from Ireland, the Scottish Hebrides and Highlands, the Isle of Man, Wales, Cornwall, or Brittany See LANGUAGE (table) **2** A member of a group of peoples first identified early in the 2d millennium B C in SW Germany and E France They appear to be a fusion of diverse stocks, united probably by a common language and by mastery of bronze-working techniques By 1200 B C , they had grown in power, and within a few centuries they spread across Central Europe in a broad band that reached Denmark and Britain, and they crowded the Iberian and Italic tribes to the southern peninsulas They were quick to adopt the newly developed iron industries, and their wealth from trade and from raiding helped to maintain their dominance of Central Europe during the Iron Age The LA TÈNE culture is almost entirely Celtic The secondary Celtic expansion, from c 700 to c 400 B C , completed their conquest of Gaul and the central Danube valley, threatened Italy, penetrated Spain, and brought another invasion to Britain Greek influences which stimulated Celtic culture included the introduction of the chariot and, somewhat later, of writing Art flourished in richly ornamented styles The Celts lived in semifortified villages, with a tribal organization that became increasingly hierarchical as wealth was acquired Priests, nobles, craftsmen, and peasants were clearly distinguished, and the powers of the chief became kinglike They believed in a daemonic universe, recognizing no idols, but relying on the ministry of the DRUIDS The colorful Western European folklore is derived mainly from the Celts By the 4th cent B C , they could no longer withstand the encroaching Germanic tribes, and they lost most of their holdings in the north and in W Germany From this time on, Celtic history becomes confused with that of the many unsettled tribes in Europe Celtic language and culture were variously dispersed among peoples of little historical identity, and both ancient and modern writers have obscured the very important differences among these groups by merely naming them Celts More confusion has resulted from the designation of a Celtic subrace This type of light-eyed, dark-haired or red-haired, longheaded individual is most common in Celtic speaking countries, but markedly more common among the non-Celtic speakers in those areas It is assumed that this physical type came to the British Isles by sea from the W Mediterranean or from Spain, perhaps as early as 2000 B C The later Celtic invasions left far less effect on the actual population

than on British culture. "Celtic" is a misnomer except to imply a cultural continuum maintained through many centuries of common history within the same general area It has served to unify the traditions of a people proud to call themselves Celts See Henri Hubert, *The Rise of the Celts* (1934).

Celtes (tsĕl'tēs), pseud of **Konrad Pickel** (kŏn'rät pĭ'kŭl), 1459–1508, German scholar and humanist He traveled from place to place preaching the importance of the classics, lectured at various universities, and established several humanist societies He was created (1487) the first poet laureate of Germany and was professor of rhetoric and poetry at Ingolstadt (1492–97) and Vienna (1497–1508) and librarian to Maximilian I. Celtes discovered the works of the nun HROSWITHA He wrote of his travels and amorous experiences in elegiac verses imitating the *Amores* of Ovid.

Celtic languages, subfamily of the Indo-European languages, spoken on the British Isles and in Brittany See LANGUAGE (table).

Cement, town (pop 1,039), SW Okla , S of the Washita river, in hill country

cement, a powder composed of lime, silica, and aluminum heated at a high temperature It is mixed with water and gravel or sand to form CONCRETE In ancient Rome a volcanic product found at Pozzuoli on the Bay of Naples (hence called pozzuolana) was used in building, notably in the Pantheon Cement was little used in building in the Middle Ages In the 18th cent John Smeaton in rebuilding the Eddystone lighthouse found that pure limestone was not as good for a building that must stand in water as limestone mixed with clay. Both Joseph Packer in 1791 and Edgar Dobbs in 1810 were granted patents in England for manufacturing cement made of lime and clay. The invention of PORTLAND CEMENT by Joseph Aspdin c 1820 led to a much greater use of concrete for hydraulic structures, such as dams and bridges. A few years later, on the Rondout Creek, New York, a limestone was discovered which made a cement even stronger than Portland. This Rosendale cement was made and shipped from kilns near Kingston for many years; it was used in building the Brooklyn Bridge and the Croton Dam The quicker drying quality of Portland cement finally killed the demand for Rosendale Bituminous cements are made from natural asphalt or bituminous distillation residues When mixed with small stones they afford a very durable paving and road material Adhesive cements are numerous and varied Gypsum cement or plaster of Paris is commonly employed in making casts and in the interior of buildings. Various forms of cement have been used since very ancient times

cemetery, place for burying the dead Most societies set apart such a place. With the rise of the settled, urban populations, it became expedient to designate tracts of ground outside city walls or limits for this purpose The word *cemetery* was first applied to the early Christian burials in the Roman catacombs and found general usage in the 15th cent Belief in resurrection made consecrated ground desirable for burials, but the overcrowding of chapel crypts and churchyards made such places seem doubtfully permanent repositories, except for the elite Guarantees of perpetual care and the surroundings provided by modern cemetery associations fulfill, for the most part, the religious and the sentimental requirements of people today Ancient as well as contemporary cemeteries often reflect the familial and class groupings of their living society Among the many beautiful and historic cemeteries of Europe are the Père-Lachaise of Paris and the Campo Santo of Pisa in Italy Noteworthy American cemeteries are Arlington Cemetery, outside Washington, D C , which contains the Tomb of the Unknown Soldier, Mt Auburn in Cambridge, Mass , one of the earliest municipal cemeteries in the United States, and the elaborately designed Forest Lawn Memorial Park of Glendale, Calif See also BURIAL and GRAVE

Cenchrea (sĕn'krēu) or **Cenchreae** (–krē-ē'), port of Corinth, on the Saronic Gulf ESE of Corinth Acts 18 18; Rom 16.1

Cenci, Beatrice (bāntrē'chā chän'chē), 1577–99, Italian noblewoman, tragic figure of the late Renaissance. Her father, Francesco Cenci (1549–98), was a Roman noble noted for his viciousness In 1595 he imprisoned Beatrice and her stepmother Lucrezia in a lonely castle, his cruel treatment finally led Beatrice, with the complicity of her stepmother, her brothers, and her lover, to procure his murder. After a famous trial (1599) the conspirators were put to death This tragedy, often cited as an example of the corruption of 16th-century Rome, is the subject of, among other works, Guerrazzi's novel *Beatrice Cenci* and Shelley's tragedy *The Cenci*. In the Barberini Palace, Rome, is a picture by Guido Reni said to represent her. See Corrado Ricci, *Beatrice Cenci* (Eng. tr., 1925).

Cenis, Mont (mō sānē'), Ital *Moncenisio* (mōnchānē'zyō), Alpine pass, 6,835 ft. high, on the French-Italian border, one of the great invasion routes in Italian history. Napoleon I built a new road here in 1810. The railroad tunnel (e.8 mi. long) was built in 1871 and connects Turin, Italy, with Chambéry, France, via Modane, France; though 13 mi. southwest of the pass, it is usually called the Mont Cenis Tunnel.

Cennini, Cennino (chän-nē'nō chän-nē'nē), c 1365–1440, Florentine painter. His book, *Trattato della pittura* (written 1437, pub. 1821; Eng tr , *A Treatise on Painting*, 1844), preserves a record of the technical processes of the immediate followers of Giotto.

Cenozoic era (sēnūsō'ĭk, sē–) [Gr , =recent life], fifth grand division of geologic time. As a result of the disturbances of the late MESOZOIC ERA, the geography of North America at the beginning of the CENOZOIC was substantially the same as in historic times, the only areas liable to marine flooding being the Atlantic and Gulf coasts and a small area on the Pacific coast. The events of the Cenozoic era include all those of human history The life of the Cenozoic has been dominated by the mammals, but they were most numerous in the TERTIARY PERIOD and have declined, with the exception of a few specialized types, in the QUATERNARY PERIOD. The elapsed portion of the Cenozoic is about 60,000,000 years, less than half the estimated duration of the Mesozoic See also GEOLOGY

censor (sĕn'sûr), title of two magistrates of ancient Rome (from c 443 B C to the time of the emperors). They took the census, by which they assessed taxation, they regulated public behavior, and they filled vacancies among the senators and knights. A *nota censoria* on the roll of citizens was a mark against the name of a citizen failing to maintain a standard of civic duty They gave out tax-collecting rights to the tax farmers (the publicans) and had charge of public works. CATO THE ELDER was the most famous of all the censors.

Censorinus (sĕnsōrī'nŭs), fl c 238, Roman grammarian He wrote *De die natali* [on the day of birth], an essay partly astrological, partly chronological, which affords much information on ancient ways of reckoning time

censorship, official restriction of any public expression believed to threaten the governing authority or the social and moral order Censorship has been applied to the press, the drama, the mails, speech, dress, art, photography, and the moving picture. Censorship falls under two general classifications, preventive and punitive, according to whether it is exercised before or after the issuance of the material in question Censorship of writings was practiced in Greece and later in Rome Church censorship, beginning in the 1stcent of the Christian era, became more strict after the invention of printing, and the first INDEX of prohibited books was made at the time of the Catholic Reform (16th cent Protestant nations also instituted censorship in the Reformation era Totalitarian governments generally have censored the press on political grounds, but in democracies government censorship has largely ceased, save on moral grounds or during wartime In the United States a few editors were jailed under the Sedition Act of 1798, and Southern postmasters exercised effective censorship of abolitionist literature before the Civil War The usual restraints imposed by the laws of libel apply. Obscene literature and art are barred from the mails, several states have provisions against indecent publications Moving pictures are censored by trade organizations and by state and Federal authorities. The drama in most countries usually falls under local police censorship, whether preventive or punitive in effect In England plays are censored by the lord chamberlain, but a movement is under way to deprive him of this power See M. L Ernst and Alexander Lindey, *The Censor Marches On* (1940)

census, periodical official count of the numbers of persons and the resources of a country In ancient times, as with the Jews and Romans, such enumeration was mainly for taxation and conscription purposes The introduction of the modern census — a periodic and thorough statistical review — is variously claimed by French Canada (1665), Sweden (1749), the United States (1790), and others. The first English census was taken in 1801. The Belgian census of 1846, directed by QUETELET, was the most influential in its time Most Westernized countries now take one every 5 or every 10 years Scientific census taking in the United States began with the decennial census of 1850, when the scope and methods were greatly improved. In 1902 the permanent Bureau of the Census was established in the Dept. of Commerce

centaur (sĕn'tôr), in Greek religion, descendant of IXION, a creature half man and half horse. Centaurs were uncouth and savage, but some, like CHIRON became friends and teachers of men. Their home was in Thessaly, especially on Mt. Pelion They were followers of DIONYSUS.

Centaurus (sĕntô'rŭs), constellation of the Southern Hemisphere It is known especially for its star Alpha Centauri, which is visually the third brightest star in the sky (only Sirius and Canopus are brighter). Alpha Centauri is one of the two stars nearest to our solar system. Its distance is about 4.3 light-years. Proxima Centauri, a faint star in Centaurus, is about the same distance away.

Centenary College of Louisiana: see SHREVEPORT.

Centennial Exposition, International, held in Philadelphia from May to Nov., 1876, to celebrate the 100th anniversary of the Declaration of Independence. The buildings, in Fairmount Park, included the Main Building, covering 20 acres, Machinery Hall, Agricultural Hall, Horticultural Hall, and Memorial Hall, many state buildings, and buildings of 37 foreign countries The total number of those attending in 159 days was 9,910,966 This was the first of a series of world's fairs which the United States was to hold, and it set a high standard. Particularly did it exhibit in graphic manner the technical advances and industrial growth of the nation Memorial Hall, a Renaissance structure of granite, became part of the Pennsylvania Museum of Art

Center. 1 Town (pop. 1,515; alt c.7,600 ft), S Colo , NW of Alamosa, in a farm area, inc. 1907 2 City (pop. 3,010), co seat of Shelby co , E Texas, NE of Nacogdoches and near the Sabine; founded 1866, inc. as a city 1903. In the pine woods, it has lumber mills

center, in politics, a party following a middle course The term was first used in France in 1789, when the moderates of the National Assembly sat in the center of the hall. The Catholic group in Prussia assumed the name Center in 1859, also because of the location of its seats, and a similar Center party was formed after the foundation of the German Empire in 1871.

Centerdale, R I . see NORTH PROVIDENCE.

centering, the framework of wood or of wood and steel built to support a masonry arch or vault during its construction It is removed after the mortar has hardened and the arch or vault has thus become self-sustaining. Arches of steep rise may sometimes be built without centering; Brunelleschi is said to have dispensed with it in constructing the steep dome of the cathedral at Florence (1420) The Romans built vast domes and vaults of concrete with the aid of wood centerings and of integral brick ribs within the vault itself The Romanesque and Gothic builders employed stone ribs in vaults, both to break the vault surfaces into more manageable areas and to support the temporary wood centering Centering is constructed of equally spaced supporting ribs conforming in contour to the proposed under face of the vault with planking laid over them to form the supporting surface for the masonry—stone, brick, concrete, or tile The centering itself must be rigidly supported, either by posts from the ground or by trusses when piers are available to receive their ends. After the centering is built, the setting of the masonry proceeds equally from the separate ends or sides toward the central point, where the keystone of the arch or the crowning blocks of the vault are wedged into position

Center Line, residential city (pop 3,198), SE Mich , near Detroit; inc as a village 1925, as a city 1935

Centerville. 1 Residential town (pop 1,162), E Ind , W of Richmond It has pre-Civil War homes 2 City (pop 8,413), co. seat of Appanoose co , S Iowa, SW of Ottumwa, in a coal area, platted 1846, inc 1855 It has varied manufactures A junior college is here Near by is Sharon Bluffs State Park 3 Town (pop 1,141), co seat of Queen Annes co , Eastern Shore, Md , S of Chestertown, in an agricultural area, laid out 1792. There are several vegetable canneries here 4 Agricultural borough (pop 6,317), SW Pa , on the Monongahela and S of Pittsburgh, settled 1766, laid out 1821, inc 1895 Coal mining is done here 5 City (pop 1,046), SE S Dak , on the Vermillion river, SSW of Sioux Falls, founded 1883 It is a farm trade and shipping center 6 Town (pop 1,030), co. seat of Hickman co , central Tenn , on the Duck river and SW of Nashville, in a farm and phosphate-mining area

centigrade scale: see TEMPERATURE

centipede (sĕn'tŭpēd) [Latin, =hundred-footed (creature)], flattened, segmented, wormlike, chiefly nocturnal animal of the phylum Arthropoda and related to the insects. It has long antennae and numerous, but not 100, jointed legs, one pair on each segment The first pair has poison claws with which it paralyses its prey of insects and worms Most centipedes are 1 to 8 in long, but some tropical species may reach 18 in and can inflict painful bites. The majority are found outdoors in damp places The house centipede eats roaches, clothes moths, and other insects Unlike the MILLIPEDE, the centipede does not eat plants.

Centlivre, Susannah (sĕntlĭv'ûr, –lē'–), 1667?–1723, English actress and dramatist. Born Freeman, she married, in 1706, Joseph Centlivre, Queen Anne's cook, who was her third husband. After a brief career as an actress, she turned to playwriting and wrote 18 plays, chiefly comedies, which include *The Busybody* (1709), *The Wonder! A Woman Keeps a Secret* (1714), one of Garrick's best comedy parts, and *A Bold Stroke for a Wife* (1718).

Central. 1 Unincorporated village (pop. 1,764), SW N.Mex , near Silver City, in a mine area. Fort Bayard U S. veterans' hospital is near by. 2 Town (pop 1,496), NW S.C , WSW of Greenville, in a farming area. Wesleyan Methodist College (junior) is here.

Central America, narrow strip of land between North America proper and the Isthmus of Panama,

which separates the continent from South America. Central America lies between the Isthmus of Tehuantepec and the Isthmus of Panama. Though geographically it includes the Mexican states Campeche, Chiapas, Tabasco, Yucatan, and the territory Quintana Roo, the term generally applies to five republics, COSTA RICA, GUATEMALA, HONDURAS, NICARAGUA, SALVADOR, and one colony, BRITISH HONDURAS, PANAMA is often included.

Central American Federation or **Central American Union**, political confederation (1825–38) of the republics of Central America—Costa Rica, Guatemala, Honduras, Nicaragua, and Salvador United under a captaincy general in Spanish colonial times, they gained independence in 1821 and were briefly annexed to the Mexican empire formed by Agustín de ITURBIDE. Subsequently they joined in a loose federal state, appointing as first president (1825–29) Manuel José ARCE, who was succeeded by the liberal leader, Francisco MORAZÁN (1830–38) Political and personal rivalries between liberals and conservatives, poor communication, and the fear of the hegemony of one state over another led to dissolution of the congress (1838) and the defeat (1839) of Morazán's forces by Rafael CARRERA In 1842 Morazán made an abortive attempt to reestablish the federation from Costa Rica Later efforts by Nicaragua, Honduras, and Salvador failed. The attempts of Justo Rufino BARRIOS (1885) and José Santos ZELAYA (1895) only increased existing enmities At the Central American Conference of 1922–23 the U S recommendation of a union was not favorably received, partly because of earlier U S policies in Panama and Nicaragua. Nevertheless, geography, history, and practical expedience are factors that constantly foster the plan of union.

Central Asiatic Railroad: see TRANS-CASPIAN RAILROAD.

Central Australia see NORTHERN TERRITORY

central bank. Although the term was hardly known before 1900, the concept of central banking is at least 200 years older The BANK OF ENGLAND, founded in 1694, gradually became the prototype of later central banks Another early central bank was the Swedish Riksbank The weakness of state banks in the United States after the lapse of the BANK OF THE UNITED STATES gradually caused the evolution of central banking practices here The National Banking Act of 1863 led to the abolition of note issues of state banks, the FEDERAL RESERVE SYSTEM established in 1914 forced uniform practices on member banks and furnished a central reserve Every civilized nation today possesses the equivalent of a central bank with the general purpose of acting as fiscal agent of the government and of constituting the "lender of last resort" for the banking system of the country Among the subsidiary functions of central banks are the creation of money and the regulation of its use and volume, regulation of the discount rate and advances to commercial banks, purchase and sale of government obligations, check clearances among the member banks, regulation of the ratio of reserves to deposits in member banks, partial or total monopoly of note issue and correspondence with central banks of other nations The Federal Reserve System's governing board is charged with regulation of the rate of margin in stock-market trading, it may exert considerable control over the extension of consumer credit by commercial banks Generally, central banks do not exercise the usual functions of commercial banks towards depositors See M H de Kock, *Central Banking* (1939)

Central City. **1** Town (pop 706, alt c 8,560 ft), co seat of Gilpin co., N central Colo, in Clear Creek Canyon W of Denver, inc 1886 It boomed after the discovery of gold in 1859 Now a "ghost town," it annually revives the past with a summer play and music festival in the stone opera house (opened 1878, owned since 1931 by the Univ of Denver), where in its heyday nearly every noted player of the time appeared The Teller House (1872), famous frontier hostelry, is next door **2** Town (pop 1,562), S Ill, E of St Louis and adjoining Centralia, inc 1857 **3** Town (pop 4,199), W Ky, S of Owensboro, settled as Morehead's Horse Mill, renamed after 1870 with the arrival of the railroad. It is the trade center of a coal, oil, timber, and farm area **4** City (pop. 2,460), co seat of Merrick co., E central Nebr., on the Platte and WNW of Lincoln; platted 1864 Near by was the site, in 1858, of Lone Tree Ranch, stopping place on the Overland Trail **5** Borough (pop 2,083), SW Pa., SE of Johnstown, inc. 1918

Central College: see FAYETTE, Mo

Central Falls, industrial city (pop 25,248), NE R I, on the Blackstone and adjoining Pawtucket; inc 1895. Glass, textiles, and wire are among its products Many of its citizens are of French Canadian descent.

Centralia (sĕntrā'lēə). **1** City (pop 16,343), S Ill., E of St Louis; platted 1853, inc. 1859 It is an industrial and shipping center of a fruit, farm, coal, and oil area. The city has railroad repair shops, meat-packing plants, and a foundry; its manufactures include metal and food products A junior college is here. A mine explosion (1947), with the loss of 111 lives, led to state and national investigations in an attempt to fix responsibility for the disaster. Certain mines were declared unsafe. **2** City (pop. 1,996), N central Mo, SE of Moberly; laid out 1857 Grain is the principal crop of the area **3** Borough (pop 2,449), E Pa, S of Bloomsburg, inc 1866 Anthracite is mined here **4** City (pop. 7,414), SW Wash., near the Chehalis river, settled 1866, inc 1886 It is a railroad junction and farm trading center with large lumber industries A junior college and the county fairgrounds are in Centralia A violent clash between organized lumber workers and townspeople occurred here, Nov 11, 1919

centralization, the administration of a local political unit by the larger political unit which includes it, or the closer union under a central authority of a confederation of semi-independent states The centralized government of Rome gave way to extreme DECENTRALIZATION during the Middle Ages Centralization was revived with the struggle for nationhood The Industrial Revolution, with its tendency toward organization in larger units, made for increased centralization in the 19th and 20th cent, though in France, most centralized of modern democratic states, the process of centralization was completed before the Industrial Revolution In England the Parliament only occasionally concerned itself with local affairs until the passage of the Municipal Corporation Act of 1835 In the United States there has been a twofold movement toward centralization—that of the Federal government at the expense of the states and that of the states at the expense of local government The first was strengthened by the adoption of the Federal Constitution, by the series of Supreme Court decisions centering about John Marshall, by continued broad interpretation of the Constitution, and by the Fourteenth, Sixteenth, and Eighteenth amendments State centralization began after the Civil War The enactment of economic and social legislation on a nation-wide scale in recent years has increased the tendency towards centralization See U S Library of Congress *List of References on Centralization* (1920), Walter Thompson, *Federal Centralization* (1923)

Central Park, 840 acres, largest park on Manhattan island, New York city, between 59th and 110th streets and Fifth and Eighth avenues The land was acquired by the city in 1856 and improved after the plans of F L Olmsted and Calvert Vaux, 185 acres were devoted to lakes and ponds, extensive planting was done, and bridle paths, walks, and roads were laid out There are a number of playgrounds and other recreational facilities The Metropolitan Museum of Art stands in the park, other points of interest include the formal conservatory garden, a zoo, an Egyptian obelisk popularly known as "Cleopatra's Needle," the Mall (where concerts are given by Edwin Franko Goldman's band), the arsenal (built 1848 and now park department headquarters), the reservoir, and a blockhouse dating from the War of 1812

Central Powers, in the First WORLD WAR, the coalition of Germany, Austria-Hungary, Bulgaria, and the Ottoman Empire

Central Provinces and Berar. see MADHYA PRADESH

Central Valley project, central Calif., for utilization of water resources of the region State engineers had entered upon plans earlier, but the program of the U S Bureau of Reclamation was initiated after congressional authorization in 1935 The general scheme is to use the abundant waters of the Sacramento river in the north to benefit the abundant farmlands of the San Joaquin Valley in the south The program has as its purposes flood control, improvement of navigation, development of hydroelectric power, irrigation, supply of water for cities and industries, and protection of lands in the Sacramento delta region from the seawater that threatens to make them useless for farms Among the items in the initial stage of the program are SHASTA DAM and the smaller Keswick Dam in the Sacramento, FRIANT DAM and its reservoir, Millerton Lake, in the San Joaquin, the Madera Canal (in operation along its entire length in 1945) northward 36 mi from Friant Dam, the Friant-Kern Canal (construction begun in 1945) southward c 150 mi from Friant Dam, the Delta Cross Channel, to use the water of the Sacramento to fight soil salinity in the delta, the Contra Costa Canal (completed 1947) taking Sacramento water 48 mi to a reservoir at Martinez and supplying water to the farms and industries of Contra Costa co in the delta, a pumping plant at Tracy to take water from the Delta Cross Channel and supply the Delta-Mendota Canal, the Delta-Mendota Canal to take the water c 120 mi roughly parallel to the San Joaquin and supply to that river at the Mendota pool; and a steam power plant at Antioch The program in its entirety embraces other numerous dams, reservoirs, and power plants, not yet constructed The U S Corps of Engineers has contributed much to development by such units as the Pine Flat Dam (commenced 1947) on Kings river in the southern part of the Central Valley. See Robert de Roos, *The Thirsty Land* (1949)

Centre, town (pop. 1,012), co seat of Cherokee co., NE Ala., NE of Gadsden, in a farm region, settled c 1840

Centre College of Kentucky: see DANVILLE

Centreville, town (pop. 1,163), SW Miss., just N of the La. line, inc 1880

centrifugal force and centripetal force: see FORCE.

centrifuge (sĕn'trufūj), device based upon the principle of centrifugal FORCE It is used commonly for the separation of substances of different density, e g, two liquids of different weight or a liquid and a solid It consists of a base or frame and a rotating part in which the mixture is placed and which is turned by means of a crank or motor One type is widely used for the separation of the solid and the liquid parts of blood The blood is put in test tubes which are then set in the rotating part in holders so arranged that when the rotary motion begins the test tubes can swing into a horizontal position with the open ends toward the inside, the heavier solid part of the blood is thrown into the bottom of the tube and the lighter liquid part comes to the top In the same way other mixtures of substances of different weights, including mixtures in which the differences are very small, can be separated into their components Another common type of centrifuge is the cream SEPARATOR

centumviri (sĕntŭm'vĭrī) [Latin,=a hundred men], in ancient Rome, a court of a varying number of men which heard civil cases having to do with land and land claims Each Roman tribe was represented in it Under the empire the centumviri had chiefly to deal with inheritance.

century plant. see AGAVE

Ceos. see KEOS

cephalic index (sufā'lĭk) [Gr.,=head], the numerical ratio of the breadth of the head to its length Expressed as a percental number, it provides the simplest description of the geometric relation of two dimensions The index is obtained by dividing the maximum width of the cranium by its maximum length and multiplying by 100 In ANTHROPOMETRY, the cephalic index has been the favored measurement and has sometimes been overvalued, particularly when used as a basis for race classification It has been shown that the physical and mechanical conditions which control the relationship of the parts measured are not in themselves stable, and the significance of cephalic indexes must depend on correlation with other factors An index up to 74 9 is considered dolicocephalic or long-headed, while 80 or more indicates the broad-headed or brachycephalic type The middle range is termed mesocephalic The cranial index is a ratio of the length of the skull to its width

Cephalonia (sĕfŭlō'nyu), Gr *Kephallenia* (kĕfälēnē'a), island (289 sq mi, pop 57,384), Greece, the largest of the IONIAN ISLANDS It has an irregular coastline and is largely mountainous, rising to 5,314 ft in Mt Aenos, which was formerly crowned by a temple to Zeus Argostoli, a port, is its chief town and exports the local products—currants, wine, and olive oil Sheep raising and fishing are important occupations An ally of Athens in the Peloponnesian War and later a member of the Aetolian League, it passed under Roman rule in 189 B C After the division of the Roman Empire, Cephalonia was held by Byzantium until its occupation (1126) by Venice It subsequently was ruled by various Italian families, was seized by the Turks (1479), and was ceded (1499) to Venice, which held it until the Treaty of Campo Formio (1797) Its subsequent history is that of the Ionian Islands There are many ancient ruins

cephalopod see MOLLUSK

Cephas (sē'fəs), Jesus' nickname for St PETER

Cepheus (sē'fūs), in Greek legend, king of Ethiopia, husband of Cassiopeia and father of ANDROMEDA

Cepheus, in astronomy, constellation of the Northern Hemisphere, lying partly in the Milky Way on the side of the pole star diametrically opposite Ursa Major It is an inconspicuous constellation, lines connecting the principal stars would form a rough square and an isosceles triangle with one side of the square as its base Notable stars in the constellation are a deep red star called by Sir William Herschel the "garnet" star and two double stars, one of which is also a variable star. From this variable star (visible to the naked eye) a class of stars, the Cepheid variables, derive their name

Cephisodotus (sĕfĭsō'dutus), fl 4th cent B C, two Greek sculptors The elder, the master and probably the father or the brother of Praxiteles, is noted for a statue, *Irene and Plutus* (*Peace and Wealth*) The original was erected in Athens, c 370 B C, presumably to mark the peace following the battle of Naxos in 376 B C A Megalopolis group, c 370 B C, is attributed to the younger, who was probably the son of Praxiteles

Cephissus (sĭfĭ'səs), Gr *Kephisos* (kĕfēsŏs'), name of Greek rivers **1** Rising in the Parnassus and flowing 75 mi ESE through central Greece into the N Euboic Gulf **2** Rising in Mt. Pentelikon and flowing S through central Greece past Athens into the Saronic Gulf

Ceram (sĕrăm'), island (7,191 sq mi, pop. including offshore islands 100,029), East Indonesia, one of the Moluccas It is W of New Guinea. Traversed

by a central mountain range rising to more than 10,000 ft, the island is 210 mi long and 40 mi wide Its inhabitants are like those of the Celebes. Copra and resin are the major commercial products. Oil is exploited in the northeast, and sago is grown extensively. Variants of the name are Seran and Serang.

Ceramic Gulf: see CERAMICUS SINUS.

ceramics (sûrà'mĭks) includes all forms of POTTERY, from crude EARTHENWARE to the finest PORCELAIN The term is especially used for handmade objects, such as figurines, animals, or flowers

Ceramicus Sinus (sĕrŭmĭ'kŭs sĭ'nŭs) or **Ceramic Gulf** (surà'mĭk), ancient name of the Gulf of Kos or of Kerme, SW Turkey, an inlet of the Aegean Sea On it was the celebrated city of Halicarnassus, capital of Cappadocia

Ceraunian Mountains (sĭrô'nĭăn), coastal range, S Albania, in Epirus It rises to c 4,800 ft and ends in ACROCERAUNIA, a cape, the whole range is sometimes called the Acroceraunian Mts

Cerberus (sûr'bŭrŭs), in Greek religion, many-headed dog with a mane and a tail of snakes, offspring of TYPHON and Echidna He watched the gate of Hades The honey cake which the Greeks buried with the dead was intended to quiet Cerberus One of the 12 labors of HERCULES was to capture him

Cerdic (kûr'dĭk, sûr'–), d. 534?, traditional founder of the kingdom of Wessex A Saxon, he and his son Cynry are said to have landed on the southern border of Hampshire and Wiltshire in 495 Little is certain about him save that later West Saxon kings traced their descent from him through his son Cynry and his grandson Ceawlin.

cereal, any GRAIN that is used for food, either whole or ground up into flour or meal In the United States the word is often used to mean any one of the breakfast foods made from grain

Cerealia: see CERIALIS

cerebellum see BRAIN

cerebrospinal meningitis: see MENINGITIS

cerebrum see BRAIN

Ceredo (sĕr'ĭdō), town (pop 1,212), W W Va, near Huntington, in a farm area, founded 1857

Ceres (sĕr'ēz), in Roman religion, goddess of grain and agriculture, daughter of Saturn and Ops She was identified by the Romans with the Greek DEMETER Her worship was connected with that of Tellus Mater, the earth-goddess, and involved not only fertility rites but also rites for the dead Her chief festival was the Cerealia, celebrated on April 19, and her most famous cult was that of the temple on the Aventine Hill, where she was associated with LIBER and Libera There is much argument about the origins and nature of her cults

Ceres (sĕr'ēz), city (1940 pop 1,332, 1947 special census pop 2,293), central Calif, near Modesto, in a fruitgrowing area, inc 1918

cereus, night-blooming see NIGHT-BLOOMING CEREUS

Cerialis or **Cerealis** (Petilius Cerialis or Petilius Cerealis) (both sĭrēăl'ĭs), fl A D 70, Roman general, a partisan of Vespasian against Vitellius Vespasian sent him in A D 70 to put down the revolt of Gauls and Germans under CIVILIS In 71 he went to Britain as governor

Cerignola (chārēnyō'lä), town (pop 37,163), Apulia, S Italy. Near by, in 1503, the Spanish under Gonzalo Fernández de Córdoba defeated the French under Louis XII (see ITALIAN WARS)

Cerinthus (sĭrĭn'thŭs), fl A D c 100?, an Ephesian religious leader, possibly of Jewish origin He held tenets influenced by Gnosticism and similar to those of the Ebionites He taught that the Christ descended into Jesus at His baptism and left Him again before the Passion

cerium (sĕr'ĭŭm) [for the planetoid Ceres], one of the more common metallic elements of the RARE EARTHS (symbol=Ce, for physical constants, see ELEMENT, table) resembling iron in color but much less hard It is ductile and malleable It does not tarnish in dry air, but is affected by moisture When heated it burns with a brilliant flame to form the oxide (ceria) which exhibits incandescence and is used in making lamp mantles (see WELSBACH MANTLE). Certain compounds of cerium are used in medicine, e g, cerium oxalate, which is commonly employed as an antiemetic in seasickness The element forms alloys with other metals, the alloy of cerium (70 percent) and iron (30 percent), for example, being used in cigar and gas lighters Minute particles of this alloy ignite in the air when scratched from the surface of the larger mass The element is prepared by the electrolysis of the chloride Recognized in 1803 in the oxide (ceria) as a new metal by M H Klaproth and by J J Berzelius and Wilhelm Hisinger, it was obtained in a very impure state by C G Mosander and by Friedrich Wöhler some 30 years later, and not until 1875 was the nearly pure metal obtained by W F Hillebrand and T H Norton.

Cernauti: see CHERNOVTSY, Ukraine

Cernuschi, Henri (chĕrnōō'skē), 1821–96, Italian politician and economist A strong republican, he led in the revolt of 1848 in Milan and supported Garibaldi In 1850 he went to France, where he became a director of the Bank of France Cernuschi vigorously advocated bimetallism and is said to have coined the word. He wrote many pamphlets on the subject, notably *Silver Vindicated* (1876).

Cerré, Jean Gabriel (shä' gäbrēĕl' sĕrā'), 1734–1805, frontiersman and trader in the American Midwest, b Montreal, Canada. By 1755 he had established a fur-trading post at Kaskaskia, Ill, where for many years he was a prominent and powerful figure. He outfitted many traders and hunters for the Missouri region and maintained close relations with the Indians The British made efforts to gain his support in the American Revolution, but he allied himself with the patriots and gave George Rogers Clark provisions and financial aid Later he moved to St Louis, where his influence was maintained until his death One of his daughters married Auguste CHOUTEAU.

Cerro de Pasco (sĕ'rō dā pä'skō, Span sĕ'rô dā pa'skô), city (pop 19,187), central Peru Cerro de Pasco, at an altitude of 13,973 ft, is one of the highest cities in the world It is as bleak and unattractive as its barren environs, but the fabulous silver mines, discovered according to tradition in 1630, have made it world renowned When silver deposits declined late in the 19th cent, the exploitation of other minerals, especially copper, again made Cerro de Pasco Peru's leading mining center From the near-by Minasraga mines, over 16,500 ft high, comes about 80 percent of the world's supply of vanadium Almost incredible obstacles had to be overcome in building the highway and the railroad (built by Henry MEIGGS) to connect the city with Lima.

Cerro Gordo, village (pop 1,016), central Ill, E of Decatur, in a farm area, inc 1873

Cerro Gordo (sĕ'rō gôr'dhō), mountain pass, E Mexico, on the road between Veracruz and Jalapa Here was fought, April 17–18, 1847, a decisive battle of the Mexican War Santa Anna, having established himself firmly at and behind the pass, attempted to halt the advance of Gen Winfield SCOTT from Veracruz to Mexico city Though the Mexicans thought their position impregnable, the Americans were able to turn the unfortified left flank and take the pass from the rear The Mexicans were routed and Jalapa occupied Taking part in the battle were Capt R E Lee (who scouted out a route for the flanking movement) and Lt U S Grant In the hard fighting to take the hill El Telégrafo, William S Harney particularly distinguished himself

Certosa di Pavia (chārtō'zä dē pavē'ä) [Ital, =Carthusian monastery of Pavia, like La Grande Chartreuse], former Carthusian abbey One of the most magnificent of all monastic structures, it has been maintained as a national monument since 1866 The church forming its nucleus was begun in the style of the Italian Gothic in 1396 by Gian Galeazzo Visconti, duke of Milan Hardly more than the nave was executed in this style, since the Renaissance, diffusing its new taste, quickly dominated the design of the edifice The façade seems to have been commenced in 1481 by a group of architects and sculptors, under the leadership of Giovanni Antonio Amadeo, it was finished early in the 16th cent Built of rich marbles and profusely ornamented with fine sculptural decorations, it is one of the masterpieces of Renaissance decorative design The two large arcaded cloisters are of richly ornamented terra cotta, the design of Rinaldo di Stauris

cerussite (sĕr'ŭsīt), colorless to white or gray mineral, sometimes yellowish or greenish, transparent to opaque, very brittle, crystallizing in the orthorhombic system and occurring also in granular and massive form It is a carbonate of lead formed by the action of carbonate and bicarbonate solutions on galena It is an important ore of lead widely distributed throughout Europe and the United States and found associated with galena and other lead minerals

Cervantes Saavedra, Miguel de (sûrvăn'tēz, Span mēgĕl' dā thĕrvän'tās sa"ävē'dhrä), 1547–1616, Spanish novelist, dramatist, and poet, b Alcalá de Henares, of a family which came from Córdoba Little is known of his youth or education. He went to Italy in 1569, served for a time in the household of Cardinal Aquaviva and in 1570 enlisted in the army as a private At the battle of Lepanto (1571) he was wounded and as a result lost the use of his left arm Returning to Spain on leave, Cervantes was captured (1575) by Moors and taken to Algiers as a slave In the five years of his captivity he aided others to escape and tried to escape himself but was retaken In 1580, ransomed by his family to their financial ruin, he returned to Spain After seeing service in Portugal, he retired from the army in 1582 He married in 1584 His life was a struggle against debt, for which he was sometimes imprisoned His first published work was *La Galatea* (1585), a pastoral romance in prose and verse Between 1585 and 1588 he wrote and produced more than 20 plays, of which only two survive, *La Numancia* and *El trato de Argel*. His longest poem is the *Viaje del Parnaso* (1614). Cervantes was 58 years old when the first part was published of his masterpiece, DON QUIXOTE DE LA MANCHA (1605) Part II appeared in 1615, a year after the publication of a spurious sequel to the first part. He wrote two other works of fiction in his last years—*Novelas ejemplares* (1613) and *Los trabajos de Persiles y Sigismunda* (1617). Cervantes, unselfish and brave, never prospering, has been compared to his own great hero. See biographies by A F Calvert (1905), James Fitzmaurice-Kelly (1913), Rudolph Schevill (1919), and Aubrey F G Bell (1947).

Cervera y Topete, Pascual (päskwäl' thĕrvā'rä ē tōpā'tā), 1839–1909, Spanish admiral At the outbreak of the SPANISH-AMERICAN WAR (1898) he was given command of the Atlantic fleet. He reached the harbor of Santiago de Cuba, where he was blockaded by the American fleet under Admiral Sampson and Commodore Schley from May until July 3. Then, in an attempt to run the blockade, he was utterly defeated and captured

Cervetri, Italy see CAERE.

Cervin, Mont, or **Monte Cervino:** see MATTERHORN

Cerynean hind (sĕrĭnē'ŭn), in Greek mythology, golden-horned hind sacred to ARTEMIS One of the 12 labors of HERCULES was to capture the hind

Cesalpino, Andrea see CAESALPINUS, ANDREAS.

Cesarean section: see CAESAREAN SECTION

Cesari, Giuseppe, Cavaliere d'Arpino (jōōzĕp'pā chä'zärē kävälyā'rā därpē'nō), 1568?–1640, Italian painter (Cesari's best works are the frescoes in the Capitol and in the Borghese Chapel, Church of Santa Maria Maggiore, Rome Other works are *Adam and Eve Expelled from Paradise* (Louvre), a self-portrait (Uffizi); and *Perseus and Andromeda* (Metropolitan Mus)

Cesena (chāzā'nä), city (pop 20,043), Emilia-Romagna, N central Italy, in Romagna, 17 mi NW of Rimini It flourished under the Malatesta family (1379–1465) who built the beautiful library (now containing almost 400 manuscripts) and the cathedral

Cesis (tsä'sĭs, –sēs), Ger *Wenden* (vĕn'dŭn), town (1935 pop 8,748), N Latvia It is an agricultural center with paper mills Long the seat of the LIVONIAN KNIGHTS, it passed to combined Lithuania-Poland in 1561 Attacked (1577) by Ivan the Terrible, the fortress was blown up by its own garrison Cesis went to Sweden in 1629, to Russia in 1721 Here, in 1919, the Latvians defeated a German free corps under Rüdiger von der Goltz Ancient castles give the town a romantic air Variant spellings are Tsesis and Zehsis

cesium (sĕ'zĭŭm) [from Latin, =bluish-gray], rare, silver-white, soft-as-wax, metallic element (symbol =Cs, for physical constants, see ELEMENT, table), most active of the metals It tarnishes so quickly and actively in air that it must be kept in kerosene It is a member of the ALKALI METALS, resembling especially rubidium and potassium and forming similar compounds—with bromine, chlorine, and iodine and with the sulphate, carbonate, and nitrate radicals It reacts with water to form a hydroxide which is a very strong BASE Because of its chemical activity, cesium is never found free in nature but is always combined with other elements in compounds It is a constituent of pollux, or pollucite, a rare mineral occurring in the United States in Maine and on the island of Elba Combined with chlorine as a chloride, it is widely distributed—but in minute quantities—in mineral springs The element is prepared by electrolysis and from the hydroxide and the chloride It is used in radio tubes and the electric eye In 1860 Bunsen and Kirchhoff discovered the element (the first to be discovered by the use of the SPECTROSCOPE) and named it for the two bright blue lines of its spectrum

Ceska Lipa, Czech *Česká Lípa* (chĕ'ska lē'pä), Ger *Böhmisch-Leipa* (bû'mĭsh-lī'pä), town (pop 11,991), N Bohemia, Czechoslovakia There are textile, metalworking, and woodworking industries

Ceske Budejovice, Czechoslovakia see BUDWEIS.

Céspedes, Carlos Manuel de (kär'lōs manwĕl' dā sā'spädhās), 1819–74, Cuban revolutionist, b Bayamo He completed his education in Spain and there took part (1843) in a revolution led by Juan Prim On returning to Cuba he raised the standard of revolt by proclaiming the demands of Cuban liberals in the so-called *grito de Yara* (1868) The TEN YEARS WAR followed He was elected president by the revolutionists (1869), but other leaders, notably Ignacio Agramonte, disagreed with him, discontent increased, and he was deposed (1873) He was killed, probably by Spanish soldiers

Céspedes, Carlos Manuel de, 1871–1939, president of Cuba (1933), b New York city, son of Carlos Manuel de Céspedes (1819–74) He actively participated in the revolution of 1895 and the Spanish-American War and subsequently held numerous diplomatic and governmental posts He was minister to the United States (1913–22). When Gerardo MACHADO was overthrown in Aug, 1933, Céspedes became provisional president, but was forced to resign after a coup (Sept 5) by a student junta supporting Ramón GRAU SAN MARTÍN

Céspedes, Pablo de (pä'blō dā thäs'pädhās), 1538–1608, Spanish artist, poet, and scholar, in Italy called Cedaspe. He studied for the priesthood and subsequently studied painting with Federigo Zuccaro in Rome. There he spent some 20 years and won a considerable reputation as painter, architect, and sculptor. On his return to Spain he was ap-

pointed canon of the Córdoba Cathedral, where the best of his surviving works remain, including his famous *Last Supper*. Céspedes was noted for his proficiency in Oriental and classical languages. He was the author of a comparison of ancient and modern painting, of a work on the Córdoba Cathedral, and of treatises on perspective He also wrote a notable poem (only partly preserved) on the art of painting

cesspool, a cistern dug or built to receive sewage. Cesspools may be of watertight construction or of the leaching type and in either case should be emptied frequently When watertight they should not be located nearer than 150 ft from any surface well or spring or less than 60 ft from any cistern or drinking-water supply The vault or pit should be kept as dark as possible, and the sides should extend sufficiently above the ground to prevent the access of vermin or small animals It should also be flyproof Cesspools are sometimes connected with a drain through which the liquid is dispersed in the adjoining ground, while the solid sewage is retained A leaching cesspool is constructed so that the sides, ends, and bottom readily allow the liquid material to soak through Leaching cesspools always represent a danger where wells are used for the water supply

cestus or **caestus**: see BOXING

Cetatea-Alba see BELGOROD-DNESTROVSKI, Ukraine

Cetewayo, Cetywayo (both sĕtĭwā'ō, -wī'ō, kĕ-), or **Ketchwayo** (kĕchwī'ō), c 1836–1884, king of the Zulu Cetewayo gained ascendancy in 1856, when he defeated in battle and killed his younger brother, who was the favorite of their father, Umpanda. On his father's death in 1872 Cetewayo assumed rule directly He was determined to resist European advances in his territory, and in Dec , 1878, he rejected a demand of Sir Henry Frere, the British high commissioner for South Africa, that he disband his troops The British attacked in 1879, and after losing two engagements they utterly defeated Cetewayo After a period of exile he was reinstated in rule over part of his former territory

Cetinje (tsĕ'tĭnyĕ), small town, Montenegro, Yugoslavia, near the Adriatic It grew around a monastery founded in 1485, and it was until 1916 the capital of Montenegro The monastery, the burial place of the Montenegrin princes, and the former royal palace (now a museum) remain

Ceto (sē'tō), Greek sea-goddess, daughter of Gaea and Pontus, wife of Phorcus, and mother of the Gorgon monsters, the Graeae, Scylla, and the dragon who guarded the apples of the Hesperides

Cette, France see SÈTE

Cetywayo see CETTWAYO

Ceuta (sōō'tu, Span thāōō'tä), city (pop 59,115), Spanish Morocco, on the Mediterranean coast almost opposite Gibraltar It is administered as part of the Spanish province of Cádiz Beyond it extends a headland, Jebel Musa, one of the PILLARS OF HERCULES Built on the site of a Phoenician colony, the city was held successively by Romans, Vandals, Byzantines, and Arabs (711) Taken by Portugal (the first permanent European conquest in Africa, 1415), it passed (1580) to Spain and has remained Spanish despite several attacks, notably a prolonged siege (1694–1720) by the Sultan Moulay Ismail Ceuta, with its large harbor and ample wharves, is an important port of call and a fishing port

Cévennes (sāvĕn'), mountain range, S France, limiting the Massif Central toward the south and east The Cévennes proper occupy the central section of a mountainous arc (average height 3,000 ft), swinging generally NE from the Montagne Noire (NE of Toulouse) to Mont Pilat in VIVARAIS (SW of Lyons) Between the Cévennes proper and the Montagne Noire are the Causses—barren limestone plateaus intersected by deep chasms and ravines The Loire, Allier, Lot, Tarn, Avevron, Hérault, Gard, and Ardèche rivers all radiate from the Cévennes or the Causses Mont Lozère (5,584 ft) is the highest peak of the Cévennes proper, Mont Mézenc, in Vivarais, rises to 5,755 ft The cultivation of silkworms, silk manufacture, and, in the Alès basin, coal mining are the chief industries along the southern slope, which has a Mediterranean climate Intensive sheep raising in the interior has worsened erosion There are no large towns The population of the Cévennes, then largely Protestant, long resisted the revocation (1685) of the Edict of Nantes (see CAMISARDS)

Ceylon (sēlŏn'), anc. *Taprobane*, island (25,332 sq mi , pop 6,657,339), in the Indian Ocean, SE of India It is a dominion of the British Commonwealth of Nations with its capital at Colombo and an official name, Lanka More or less pear-shaped, Ceylon lies close to India, to which it is almost connected by ADAM'S BRIDGE, a chain of shoals The island comprises a level low-lying plain, which occupies the north and a broad band around the entire coast, and a mountainous section (with large deposits of semiprecious stones) in the south Ceylon has a subtropical climate Rain, largely carried by the monsoon, is adequate without irrigation except in the north. Coconuts are cultivated along the coast, rice in the level inland sections, and rubber and tea on the arable hill slopes. The economy of Ceylon depends primarily upon the export of agricultural products in exchange for finished goods. Although coastal lagoons provide many sheltered harbors, only S Ceylon lies on the main world shipping routes, and its port of Colombo, on which the country's railroads and, to some extent, its road system, converge, handles most of the foreign trade The most ancient of the inhabitants of Ceylon may have been the ancestors of the Veddas, a primitive folk now living in remote mountainous areas They were conquered in the 6th cent B C by the Singhalese, who were originally from N India. About two thirds of the inhabitants (mainly those who are Buddhists) claim descent from this group The Singhalese established (437 B C) their capital at ANURADHAPURA, which with the introduction of Buddhism from India in the 3d cent B C became one of the chief centers of that religion in the world The Chola of S India for a short time in the 11th cent subjugated the Singhalese, who, however, from their center at POLLONARRUA continued resistance There were numerous invasions from S India, and, as a consequence, today one fifth of the population (the Tamils) is Hindu Another strain was contributed by the Moslem Arab traders, who before European penetration of the Far East controlled most of Ceylon's overseas trade. Portugal, attracted by the island's rich spice crop (especially its cinnamon), conquered the coastal areas in the early 16th cent and implanted the Roman Catholic religion The Dutch East India Company coveted the island, and by the mid-17th cent the Dutch had wrested away the Portuguese possessions The British expelled the Dutch in 1795 Great Britain was the first foreign power to conquer the whole island, and in 1833 the central area, previously under the rule of the king of KANDY, was joined into one colony with the coastal possessions Under the British, Ceylon was modernized and an educational system developed, including a university There was discontent, especially in the 20th cent , as well as demands that the British grant the colony self-rule In response to the repeated insistence that the people of Ceylon would not be satisfied if their representatives were confined to little more than a consultative role without full administrative and legislative powers, Great Britain agreed to form the dominion of Ceylon The new state, with a cabinet government and a two-chamber parliament, was formally constituted on Feb 4, 1948 See C M Enriquez, *Ceylon Past and Present* (1927), L A Mills, *Ceylon under British Rule, 1795–1932* (1933)

Ceylon moss see AGAR

Ceyx, see HALCYONE

Cézanne, Paul (pôl' sāzan'), 1839–1906, French painter, an outstanding figure in modern French art, b Aix, in Provence, son of a banker He studied at the École suisse with Pissarro Cézanne's earliest work shows the influence of Delacroix and of the old Italian masters, particularly Tintoretto, and exhibits few of the distinctive features of his later style From Pissarro he received his first methodical training, particularly in the study of nature, and through him too came in contact with Manet and the impressionists He exhibited at the impressionist show of 1874, but became dissatisfied with both the academicians and the impressionists He divided his time between Provence and the environs of Paris until his retirement to Aix in 1899 He developed a highly original style which has had a profound influence upon later artists, although Cézanne's importance as an innovator and leader was not definitely established until the exhibition of his works in 1904 The main characteristics of his painting are the use of very vivid color, but with a striving for depth in shadows and outlines, and an attempt to unite the best tendencies of impressionism with the noble art of the past He worked in oil and water color with equal success and excelled both in landscapes (particularly of his native Provence, many with nudes, admirably executed) and in still lifes, which in color and feeling have rarely been surpassed, his portraits are forceful and masterly Fine specimens of Cézanne's work are to be found in the Louvre Some excellent examples also are in the Metropolitan Museum See biographies by Ambroise Vollard (Eng tr , 1923), Julius Meier-Graefe (Eng tr , 1927), Roger Fry (1927), and Gerstle Mack (1935)

Chabanel, Noël (St Noël Chabanel) (nôĕl' shäbänĕl'), 1613–49, French missionary in North America, a Jesuit He entered the Society of Jesus in 1630, came as a missionary to New France in 1643, and labored among the Huron Indians He was captured by the Iroquois and put to death. Chabanel was with other missionaries (including Isaac Jogues and Jean de Brébeuf) and laymen canonized in 1930 They are as a group known as the Martyrs of North America Feast Sept 26 or (among the Jesuits) March 16

Chabannes, Antoine de, comte de Dammartin (ätwän' dù shäbän' kôt' dù dämmärtăn'), c 1411–1488, French general in the Hundred Years War, brother of Jacques de Chabannes He served with Joan of Arc, fought as a captain of ÉCORCHEURS, and took part in the PRAGUERIE revolt (1440) Pardoned by Charles VII, he was appointed to various offices and presided over the committee that procured the conviction of Jacques CŒUR After the accession of Louis XI (1461) he was imprisoned He escaped and joined (1465) the League of the Public Weal against LOUIS XI, but was pardoned once more and became one of the king's most trusted officers

Chabannes, Jacques de (shäk), c 1400–1453, French general in the Hundred Years War. With his brother, Antoine de Chabannes, he served under Joan of Arc and took part in the PRAGUERIE revolt (1440) Pardoned by Charles VII, he distinguished himself in the expulsion of the English from Normandy and Guienne.

Chabas, Paul Émile (pôl' ämēl' shäbäs'), 1869–1937, French painter He is remembered chiefly for his nude, *September Morn*, which created a sensation when it was exhibited in 1912 It was sold to a Russian, hidden during the Russian Revolution, and in 1935 rediscovered in a private collection in Paris

Chablis (shäblē'), village (pop. 1,748), Yonne dept , central France, near Auxerre, famous for the white Burgundy WINE of the region There is a remarkable early Gothic church (12th cent).

Chabot, Philippe de (fēlēp' du shäbō'), also known as **Admiral de Brion** (ädmērăl' du brĕō), 1480–1543, count of Charny and of Buzançois, admiral of France After a successful campaign in Savoy (1536), he was, through the intrigues of Anne, duc de MONTMORENCY, accused and convicted (1541) of misconduct in office but was pardoned by King Francis I Chabot is credited with having originated the project of a French colony in Canada

Chabrias (kā'brēus), d 357 B C , Athenian general, one of the principal commanders of the Delian League He saw service not only for Athens, but also for Evagoras of Cyprus and the kings of Egypt in their wars on the Persians He was, however, particularly notable for a naval victory of the Athenians over Sparta at Naxos in 376 B C He was involved with Callistratus in the negotiations allowing the Thebans to occupy the Athenian city Oropus, but he was acquitted of blame in 366 B C , though rumors of bribery were rife He was killed on the punitive expedition sent against Chios when Chios tried to withdraw from the Delian League

Chabrier, Alexis Emmanuel (älĕksēs' ĕmänüĕl' shäbrēā'), 1841–94, French composer, largely self-taught His best-known works are an opera, *Le Roi malgre lui* (1887) an orchestral rhapsody, *España*, and numerous piano pieces He strongly influenced later composers

Chaco (chä'kō) or **Gran Chaco** (grän), extensive lowland plain, central S America, sparsely populated, divided among Paraguay, Bolivia, and Argentina Some of the highest temperatures in the southern continent are reached here. To the north of the Pilcomayo river and to the west of the Paraguay is the section known as the Chaco Boreal, most of which belongs to Paraguay This is arid desert land, dotted with swamps in the rainy season and with stretches of dense forest in which the QUEBRACHO abounds The Chaco Central, in Argentina S of the Pilcomayo, has much the same aspect The plains grow increasingly arid toward the west, but the eastern part—the Chaco Austral and the region W of the Paraguay river—is the only habitable section of the Chaco The discovery of oil in a narrow strip of the barren section of the Chaco Boreal, at the foot of the Bolivian Andes, precipitated the **Chaco War**, 1932–35, between Bolivia and Paraguay This territory of the Chaco had been disputed since 1810 Technically the Chaco was intended to be part of Bolivia since it had been part of the *audiencia* of Charcas, but Bolivia paid little attention to this wasteland and Paraguayan settlers opened up the region while Paraguayan soldiers pushed back the wild Indians Thousands of Paraguayan colonists brought wealth to Paraguay by gathering quebracho and raising cattle Paraguay was not disposed to give up the lands, and Bolivia needed access to the Paraguay river to ship oil to the sea, a clash was inevitable and disastrous A million lives were lost, and the war was concluded in 1935 only when both sides were exhausted After three years of negotiation following the end of hostilities, the six mediating nations (Argentina, Brazil, Chile, Peru, Uruguay, and the United States) presented a treaty which was signed by Paraguay and Bolivia in 1938 Three quarters of the disputed Chaco Boreal went to Paraguay, at the same time Bolivia was granted a corridor to the Paraguay river, the privilege of using Puerto Casado, and the right to construct a Bolivian port

Chaco Canyon National Monument. see NATIONAL PARKS AND MONUMENTS (table)

Chaco War: see CHACO

Chad, French overseas territory: see FRENCH EQUATORIAL AFRICA

Chad, Lake (chăd, chäd), central Africa It is bordered by French Equatorial Africa, French West Africa, the French Cameroons, and Nigeria The size varies from 5,000 to 9,000 sq mi according to season, but the lake was formerly much larger

It was known by report to the ancient Greeks, but it was not reached by Europeans until the early 19th cent. The Shari river is the chief affluent of Lake Chad, which has no outlets.

Chadbourn, town (pop 1,576), S N C, near the S.C. line W of Wilmington, inc 1883 It is noted for its strawberries and makes berry crates

Chadderton, urban district (1931 pop 27,450, 1947 estimated pop 31,490), Lancashire, England In the cotton-mill district, it also manufactures pharmaceuticals.

Chadds Ford. see BRANDYWINE, BATTLE OF

Chadron (shă'drŭn), city (pop 4,262), co seat of Dawes co, NW Nebr, near the S Dak line, in livestock and grain country in the Great Plains region, founded 1885 It is a railroad division point and has factories A state teachers college is here

Chadwick, Sir Edwin, 1800–1890, English social reformer For many years an assistant to Jeremy Bentham, Chadwick applied his utilitarianism to the reform (1834) of the Poor Law and, with more success, to the development of public health measures He was largely responsible for the passage of the Public Health Act of 1848 which established a board of health His chief writings have been collected and edited by B W Richardson as *The Health of Nations* (2 vols, 1887) See biography by D D Jones (1931)

Chadwick, French Ensor, 1844–1919, U S naval officer and historian, b Morgantown, Va (now W Va) After graduating from the U S Naval Academy (then at Newport, R I) in 1864, he saw varied service both at sea and ashore before serving (1882–89) as naval attaché (the first American so designated) at London His investigations into European naval practices as a representative of the new Office of Naval Intelligence were influential in the rebuilding of the U S navy He commanded the cruiser *Yorktown* (1889–91) and was chief of the Office of Naval Intelligence (1892–93) and of the Bureau of Equipment (1893–97) Made commander of the cruiser *New York* in 1897, Chadwick, as chief of staff to Capt William T SAMPSON, commander in chief of the N Atlantic squadron, was cited for his conduct in the battle of Santiago in the Spanish-American War He was president of the Naval War College (1900–1903), was promoted rear admiral in 1903, and became commander in chief of the S Atlantic squadron in 1905 Most important of the historical writings he produced after his retirement in 1906 are *Causes of the Civil War, 1859–1861* ("American Nation" series, 1906) and *Relations of the United States with Spain* (3 vols., 1909–11)

Chadwick, George Whitefield, 1854–1931, American composer, b Lowell, Mass, studied with Horatio Parker and in Europe In 1882 he joined the faculty of the New England Conservatory of Music, of which he was director from 1897 until his death His chief compositions are the overtures *The Miller's Daughter* (1884) and *Rip Van Winkle* (1879), a symphonic ballad, *Tam O'Shanter* (1917), and the opera *Judith* (1901)

Chadwick, Sir James, 1891–, English physicist, grad Manchester Univ, 1908 He worked at Manchester under Ernest Rutherford on radioactivity. He was assistant director of radioactive research in the Cavendish Laboratory, Cambridge (1923–35), and became professor of physics at the Univ. of Liverpool in 1935 For his discovery of the NEUTRON in 1932 he received the 1935 Nobel Prize in Physics In 1945 he was knighted

Chaeronea (kĕrŭnē'ŭ), ancient town of Boeotia, Greece, in the Cephissus river valley and WNW of Thebes. It was the birthplace of Plutarch In 338 B.C the Athenians and Boeotians were defeated here by the Macedonians under Philip II and his son, Alexander the Great The colossal lion placed on the battlefield as a monument to the Boeotians and mentioned by Pausanias has been reerected. Here in 86 B C., Sulla defeated the army of Mithridates VI of Pontus under Archelaus

Chaffee, Adna Romanza (chă'fē), 1842–1914, U S army officer, b. Orwell, Ohio. In 1861 he enlisted in the 6th Cavalry of the regular army and served with it through the Civil War, becoming a first lieutenant There followed more than 20 years of service with this same unit in garrison duty and Indian campaigns in the Southwest By 1897 Chaffee had risen to be lieutenant colonel of cavalry At the opening of the Spanish-American War he was advanced to brigadier general of volunteers and sent to Cuba with a brigade of H W Lawton's division In the attack on El Caney, Chaffee's command bore the brunt of the action and distinguished itself. He became a major general of volunteers and chief of staff of the military governor of Cuba, holding this position until May, 1900 He then led the American contingent of the joint expedition against Peking in the BOXER REBELLION and afterward commanded in the Philippines. In 1904 he was advanced to lieutenant general and made chief of staff of the army. He retired in 1906. His son, Adna Romansa Chaffee (1884–1941), served in the cavalry in the First World War and did outstanding work organizing mechanized units during defense preparations before the Second World War. He rose to be a major general. See biography of the elder Chaffee by W. H. Carter (1917)

Chaffee (chă'fē), city (pop 3,049), SE Mo, SW of Cape Girardeau, laid out 1837, inc 1906 It is a trade center, with small industries, in a farm and timber area.

chaffinch (chăf'ĭnch), European songbird of the FINCH family, often caged for its clear, melodious song. The male has a bluish-gray crown, a chestnut back, reddish under parts, black tail, and almost black wings with white markings.

Chagall, Marc (märk' shŭgäl'), 1889–, Russian painter, whose name is also spelled Shagall. In 1907 he left his native Vitebsk for St. Petersburg, where he studied under L. N Bakst Going to Paris in 1910, he began to assimilate several cubist characteristics into his expressionistic style. He is considered the forerunner of surrealism After serving in the First World War he was for a time minister of arts of Vitebsk prov His main subject matter is drawn from Jewish life and folklore, in his pictures he employs flower and animal symbols He came to the United States in 1941 Among his better-known works are *I and My Village* (1911, Mus of Modern Art, New York) and *The Rabbi of Vitebsk* (Art Inst, Chicago) He designed the sets for the ballets *Aleko* and *Firebird* His autobiography, *Ma Vie* (1930), was published in Paris See studies by Lionello Venturi (1945) and J. J. Sweeney (1946).

Chagres (chä'grŭs, chă'–, Span chä'grās), small river of Panama, used to make Gatun Lake for the Panama Canal

Chagrin Falls (shŭgrĭn', shăg'rĭn), residential village (pop 2,505), NE Ohio, on the Chagrin river and SE of Cleveland Pharmaceuticals are made here

Chahar (chä'här), Mandarin *Ch'a-ha-erh*, province (109,527 sq mi, pop 2,035,957), N China It is bordered on the north and the west by the Mongolian People's Republic The capital is Changkiakow Chahar was a part of Inner MONGOLIA The Chinese, who constitute a majority of the population, are concentrated in the southern tip of the province, which contains the capital and lies between two sections of the Great Wall This area, economically the most important, includes the eastern terminus of the main motor road to the Mongolian People's Republic and is connected by rail with Peiping and Tientsin Kaoliang, wheat, and corn are raised in its fertile loess soil The rest of the province, mainly inhabited by Mongolian nomads, is a high, almost barren plateau, where livestock raising and animal trapping are the chief economic activities, horses, hides, fur, and wool are exported

Chaillé-Long, Charles (shāyā'-lông'), 1842–1917, American soldier and African explorer, b Princess Anne, Md He served in the Civil War and in 1869 received an appointment in the Egyptian army under Gen C G GORDON Because of his explorations on the Victoria Nile, he was awarded a medal by the American Geographical Society In 1875 he explored the Congo-Nile divide and crossed over to the Bahr-el-Ghazal region. He returned to America, graduated from the Columbia Law School (1880), and was consul general and secretary to the legation in Korea (1887–89) His travel narratives in English include *The Three Prophets* (1884), *My Life in Four Continents* (1912), and *Central Africa Naked Truths of Naked People* (1876) He also wrote in French—*Les Sources du Nile* (1891), *L'Egypte et ses provinces perdues* (1892), and *La Corée ou Chosen* (1894)

Chaillu, Paul Belloni du see DU CHAILLU

Chain, Ernst Boris, 1906–, English biochemist, b Germany In 1933 he left Germany and went to England, where he carried on research at Cambridge from 1933 to 1935 and at Oxford from 1935 For his work on PENICILLIN he shared with Sir Alexander Fleming and Sir Howard Florey the 1945 Nobel Prize in Physiology and Medicine.

chain. Chains are classed as open-link and stud-link In the stud-link chain a stud, or bar, crosses the link and tends to prevent the chain from kinking Chains for the transmission of power usually consist of a series of rollers mounted on bushings and secured by rivets The spacing (pitch) of the rollers is adjusted to the teeth of the sprocket wheel over which they operate Block chains, suitable for light machine drives, are formed of steel blocks connected by side links, or plates. Chains for commercial uses are generally made of wrought iron, mild steel, or cast steel A Gunter's chain (surveyor's chain), a measure of length, is 66 ft long. An engineer's chain consists of 100 links, each link a foot long

chain gang: see CONVICT LABOR.

chain store. see STORE

chair. Until the Renaissance, chairs were reserved for lords and dignitaries—a use from which arose such terms as *chairman, addressing the chair,* and *the chair of* (a professorship). Benches and stools were the common seats Egyptian chairs of rectilinear construction, some with seats and backs curved to fit the figure, have been preserved. Curving lines were characteristic of Greek chairs. Imperial Rome used massive forms in marble and bronze. The Roman curule chair was the ancestor of the folding chair, highly developed in Italy during the Renaissance. Gothic chairs had very high backs, often canopied, and were intricately carved The variety of chairs was much increased during the 17th cent; upholstery replaced loose cushions, chairs without arms became common. In England the curved lines, cabriole legs, and splat backs of the Queen Anne style were followed in the 18th cent. by a succession of fashions set by designers and cabinetmakers CHIPPENDALE used square contours and decorative openwork backs; the Adam brothers introduced classicism, HEPPLEWHITE favored curvilinear backs, and SHERATON emphasized straight lines and delicate reedings The neoclassicism of the 19th cent resulted in chairs based more or less freely on Greek and Roman models In America, English designs were followed throughout the 17th and 18th cent Especially popular was the Windsor chair, whose many variants include the bow-back and comb-back types The rocking chair, an exclusively American form known from c 1760, was made at first from the straight chair by the addition of rockers From c.1800 a number of rocking chairs were designed as such, e.g., the Boston rocker In chairs of contemporary design, ornament has been laid aside and emphasis placed on simple structural masses and functional form See W A Dyer and E S Fraser, *The Rocking Chair* (1928), Carl Drepperd, *Handbook of Antique Chairs* (1948)

Chalcedon (kăl'sĭdŏn, –dŭn, kălsē'dŭn), ancient Greek city of Asia Minor, on the Bosporus It was founded on the shore opposite Byzantium in 685 B C Taken by the Persians and recovered by the Greeks, it was later a possession of the kings of Bithynia, from whom it passed (74 B C) to Rome The Council of Chalcedon was held here in A D 451 The site is now occupied by suburbs of Istanbul

Chalcedon, Council of, fourth ecumenical council, convened in 451 by Pulcheria and Marcian, empress and emperor of the East, to settle the scandal of the Robber Synod and to discuss Eutychianism (see EUTYCHES) It deposed the principals in the Robber Synod and destroyed the Eutychian party *Its great work,* however, was its *Definition,* the last pronouncement of the Catholic Christological position Jesus Christ, second Person of the Trinity, is both true God and true man, his divine and human natures are distinct without confusion and inseparably united to concur in one person The *Definition,* which has been called an elaboration of the Nicene Creed, is essentially the statement which Pope St LEO I made in his famous *Tome* and crowned his efforts to unify Christendom The Roman Catholic Church has, however, never admitted a decree of the council that made the patriarch of Constantinople single head of the Church in Eastern Europe

chalcedony (kălsĕ'dŭnē, kălsŭdō'nē) [from Chalcedon], a form of quartz the crystals of which are so minute that its crystalline structure cannot be seen except with the aid of a microscope Chalcedony has a waxy luster and is translucent to transparent. The name chalcedony is applied more specifically to white, gray, blue, and brown varieties Some varieties differing in color because of the presence of impurities are AGATE, BLOODSTONE, CARNELIAN, CHRYSOPRASE, JASPER, ONYX, SARD, and SARDONYX

Chalcidice (kălsĭ'dĭsē, Gr *Chalkidike* or *Khalkidiki* (both khälkēdhē'kē), peninsula, NE Greece, projecting into the Aegean Sea from SE Macedonia Its southern extremity terminates in three peninsulas—Kassandra (anc Gr *Pallene*) in the west, Sithonia in the middle, and ATHOS in the east The Athos peninsula was cut by a canal built by Xerxes I, of which evidences remain OLYNTHUS and POTIDAEA were the chief towns in antiquity, Polygyros is the present administrative center The region is largely mountainous, dry, and agricultural Olive oil, wine, wheat, and tobacco are its chief products In antiquity it was famous for its timber. It was named for Chalcis, which established colonies here in the 7th and 6th cent B C In the 4th cent B C it was conquered by Philip II of Macedon, and in the 2d cent B C by Rome The subsequent history of Chalcidice is essentially that of the city of SALONICA

Chalcis (kăl'sĭs), Gr *Chalkis* or *Khalkis* (both khälkēs'), city (pop 21,820), Greece, on the island of EUBOEA opposite the mainland The port trades in local products The chief city of ancient Euboea, it established (8th–7th cent B C) colonies in Sicily and in Chalcidice Chalcis led the revolt of Euboea against Athens in 446 B C., was defeated, and was made tributary to Athens till 411 In 338 B.C it came under Macedonian domination. Aristotle died here. In the Middle Ages it was named Negropont by the Venetians There are several medieval buildings erected by the Venetians and the Turks

Chalcol (kăl'kŏl), same as CALCOL

chalcopyrite (kăl'kŭpĭ'rīt, kăl'kōpĭ'rīt) or **copper pyrites** (pĭrĭ'tēz, pū–), brass-yellow mineral with iridescent and black streaks. It is a sulphide of copper and iron, sometimes containing gold and

silver and also selenium and thallium. It crystallises in the tetragonal system but is usually found in the massive form. Chalcopyrite is of primary origin and occurs in igneous and metamorphic rock. It is an important ore of copper and is widely distributed in the United States, Canada, South America, Africa, and Europe

Chaldaea or **Chaldea** (both: kăldē'ŭ), properly the southernmost portion of the valley of the Tigris and the Euphrates Sometimes it is extended to include Babylonia and thus comprises all S Mesopotamia, as in the Bible (e.g., Gen 11 28, Jer. 50 10) The name is derived from the people who invaded the region in the 11th cent. B.C., and the restored kingdom of Babylonia is sometimes called the Chaldaean Empire (see BABYLONIA). The study of astrology was much developed in this period, and Chaldaean came to mean simply "astrologer," as in Dan 1 4 and among the Romans. The term is also understood in the Bible to mean Aramaean

Chaldee (kăldē'), Biblical Aramaic language, in the Aramaic group of Semitic languages. For related groups, see LANGUAGE (table)

chalet (shălā', shă'lē), [Fr.], the type of indigenous dwelling of timber construction found in the Alpine regions of Europe Examples over 300 years old are found there. The traditions of chalet building originated, however, earlier and are continued to the present. The earlier chalets were of ponderous construction, their walls being of tree trunks laid horizontally, one upon the other, and notched together at the corners, as in the early American log cabins However, the characteristic chalet is of lighter construction, with a framework of vertical posts and horizontal floor beams, covered externally with heavy planks The most conspicuous feature of the chalet is the single, large roof which spans not only the entire dwelling, but sometimes also the barns and stables Its pitch is usually low, so that the winter snows may accumulate and act as insulation from the cold The upper floors generally project beyond the lower wall and are supported by elaborate brackets Balconies are numerous, occurring either at the ends or at the sides In the latter case they are protected by the enormous projection of the roof eaves, which sometimes overhang as much as 10 ft The chalet shows its medieval origin both in the carved enrichments which retain a Romanesque character and in its thoroughly organic use of timbers Posts, braces, floor beams, and roof supports are all openly emphasized and produce in themselves, with the aid of ornamental carvings, the decorative scheme for the building In the adornment of the wood-sheathed walls of the chalet interiors, the arts of carving and color decoration are utilized The various districts of the Alps exhibit local styles of chalet design See W. S B Dana, *Swiss Chalet Book* (1913).

Chaleur Bay (shulōr'), inlet of the Gulf of St Lawrence, between New Brunswick and the Gaspé Peninsula It is c 85 mi long and 15 to 25 mi wide and is a submerged valley of the Restigouche river, which enters at its head The bay is a famous fishing ground—cod, herring, mackerel, and salmon—and there are many Acadian fishing villages on both coasts The headlands are high and bold and the scenery is romantic The bay was discovered and named by Cartier in 1534

Chalfant, borough (pop 1,372), SW Pa., near Pittsburgh

Chalfont (chă'fŭnt, chăl'fŭnt), borough (pop 670), SE Pa., near Doylestown It is the traditional burial place of the Delaware Indian chief Tamanend or Tammany

Chalfont Saint Giles (chăl'fŭnt sānt jīlz', chă'fŭnt), village, Buckinghamshire, England, N of Beaconsfield Here are the cottage in which Milton lived at the time of the great plague and, in a Quaker cemetery, the grave of William Penn

Chalgrin, Jean François (shă' frāswa' shălgrē'), 1739–1811, French architect He studied under Servandoni and in Italy as a winner of the Grand Prix de Rome (1758). He rebuilt (1777) part of the Church of St Sulpice in Paris, built the Church of St Philippe-du-Roule, reintroducing a basilica plan to French ecclesiastical architecture, enlarged the buildings of the Collège de France, and altered the palace of the Luxembourg, after the Revolution, to serve as headquarters for the Directory In 1806 he was commissioned by Napoleon to design a commemorative arch to the victorious armies of France, and the executed scheme for the ARC DE TRIOMPHE DE L'ÉTOILE was chiefly Chalgrin's, though he died soon after the actual construction was started

Chalgrove (chăl'grōv), village, Oxfordshire, England The royalists under Prince Rupert here defeated the parliamentarians (1643) John Hampden was mortally wounded in this battle

Chaliapin, Feodor Ivanovich (fyô'dŭr ēvă'nuvĭch shŭlyă'pēn), 1873–1938, Russian bass, studied and sang in Russia until 1901. He sang at the Metropolitan Opera, New York, in 1907 and from 1921 until 1929 He was an excellent actor, his most famous characterizations were the title roles in Boito's *Mefistofele*, Moussorgsky's *Boris Godunov*, and Rimsky-Korsakov's *Ivan the Terrible* See his autobiographies, *Pages from My Life* (Eng.tr., 1927) and *Man and Mask* (Eng. tr., 1935).

chalice (chă'lĭs) [Latin, =cup], ancient name for a drinking cup, retained for the eucharistic or Communion cup. Early chalices were of vase-shaped form with two handles. Celebrated examples are the Great Chalice of Antioch (Syriac), of embossed silver, excavated there in 1910 and attributed to the first century, and an elaborately ornamented chalice found in 1868 at Ardagh, Ireland, and believed to be Celtic work of the 9th or 10th cent The chalice was gradually modified in form and became a standing cup with straight or flared sides, usually undecorated, on a baluster stem rising from a broad base. In the Roman Catholic Church the cup must be of gold or silver, or if of baser metal, with the cup gilded inside See GRAIL, HOLY

chalk, a calcium carbonate mineral, similar in composition to limestone, but softer It is characteristically a marine formation and sometimes occurs in great thickness, the chief constituents of these chalk deposits are the shells of minute foraminifera Chalk has been laid down in all periods of geologic time, but most of the best-known deposits, e.g., the cliffs of the English Channel, date from the Cretaceous period Chalk is used in the manufacture of putty, plaster, cement, quicklime, mortar, and rubber goods and also for blackboard crayons Harder forms are used as building stones Soils containing an excessive proportion of clay are frequently dressed with chalk

Chalkley, Thomas (chô'klē), 1675–1741, Quaker mariner and missionary preacher, b England He made his home after 1701 in Philadelphia, Pa., but was absent much of the time on trading voyages or missionary tours He traded chiefly with the West Indies, navigating his own ship Between times he made preaching tours up and down the colonies from New England to the Carolinas and through England, Scotland, and Wales as well His journal (1747), simple in style and elevated in thought, was widely read by many generations of Quakers.

Chalk River, government research establishment, S Ont., on the south shore of the Ottawa river and W of Ottawa It is operated by the National Research Council of Canada for the Atomic Energy Control Board Its chief feature, a large heavy-water atomic pile, was brought into operation in 1947

Challener, Frederick Sproston (chă'lĭnûr), 1869–, Canadian painter, b England He emigrated to Canada in 1883, studied at the Ontario College of Arts (where he afterwards taught) and with G A Reid in Toronto, and later went abroad His mural decorations are in the Russell Theatre, Ottawa; the King Edward Hotel and the Royal Alexandra Theatre, Toronto, the Savoy Theatre, Hamilton, Ont; and the Princess Theatre, Montreal *Departure of Convoy 1st Contingent C E F from Gaspé Bay, 1914* was painted for the Canadian War Memorials Challener is represented by *Workers of the Fields* and *A Song at Twilight* in the National Gallery, Ottawa, by *The Milkmaid* and *When Lights Are Low* in the Provincial Art Gallery, Toronto, and by *Fathers of the Confederation* in the Ontario Parliament buildings, Toronto Challener became a member of the Royal Canadian Academy in 1899

Challenger expedition, 1872–76, British scientific expedition in charge of Professor C Wyville Thomson In the corvette *Challenger* it cruised 68,900 nautical mi., making physical and biological surveys of the Atlantic and Pacific oceans The results were published in 50 volumes of *Reports* (1880–95) See H N Moseley, *A Naturalist on the "Challenger"* (1879), Sir C Wyville Thomson, *Voyage of the "Challenger"* (1877)

Challoner, Richard (chă'lŭnûr), 1691–1781, English Roman Catholic prelate Brought up a Protestant, he became a Roman Catholic in his teens He was ordained in 1716. In 1730 he returned from Douai to England, where he worked among his coreligionists and was widely known for the number of conversions he made In 1738 he had to leave England because he published an open reply to an anti-Catholic pamphlet by an Anglican In 1739 Challoner was appointed coadjutor of the vicar apostolic in London He was consecrated bishop of Debra *in partibus infidelium* in 1741 The rest of his life he spent working among his people (after 1758 as vicar apostolic) in the face of great difficulties From 1765 to 1780 a series of efforts was set afoot to molest English Catholics, and Bishop Challoner was involved; he succeeded in obtaining the release of one of his priests sentenced to life imprisonment for being a priest, but in the Gordon riots (1780) he had to flee London for his life He was an indefatigable writer He revised the Douay version of the Bible, his revision being the one chiefly used by English-speaking Catholics since His chief learned works are on English Catholicism since the Reformation; they did much to preserve the memory of English Catholics *Memoirs of Missionary Priests* and *Britannia Sancta* Best known is his *Garden of the Soul*, a manual of devotion. His first work, *Think Well on't*, and his *Meditations* were also very popular devotional works Bishop Challoner's translations of Thomas à Kempis's *Imitation of Christ* and of the Catechism of the Council of Trent were standard. His name has been highly revered by English Catholics.

Chalmers, Thomas (chă'mûrs, chô–), 1780–1847, Scottish preacher, theologian, and philanthropist, leader of the Free Church of Scotland His preaching and his interest in philanthropic work during his ministry (1815–23) in Glasgow brought wide recognition In 1823 Chalmers became professor of moral philosophy at St Andrews Univ., in 1828, professor of theology at Edinburgh. His Bridgewater treatise (1833) *On the Adaptation of External Nature to the Moral and Intellectual Constitution of Man* brought him a number of honors. Chalmers took a leading part (1843) in organizing the Free Church of Scotland, formed when, after much friction between Church and state and trouble over patronage, 470 clergymen withdrew from the Established Church His foresight had planned for the rapid organizing of the Free Church of Scotland, of which he was the first moderator He was principal (1843–47) of the New College (Free Church) at Edinburgh His published works fill 34 volumes See biographies by M O. W Oliphant (1893), Adam Philip (1929), and Hugh Watt (1943)

Chalmette National Historical Park: see NATIONAL PARKS AND MONUMENTS (table)

Châlons-sur-Marne (shălō'-sûr-märn'), town (pop 28,251), capital of Marne dept., NE France, in Champagne, on the Marne river Here the Huns under Attila were defeated by Aetius in 451 Châlons, an industrial center processing wool, wine, and beer, was badly damaged in the Second World War

Chalon-sur-Saône (–sōn'), town (pop 29,851), Saône-et-Loire dept., E central France, on the Saône and the Canal Central It is an inland shipping center with a large wine and grain trade and with machine manufactures Dating from pre-Roman times, it was the capital of King Guntram of Burgundy (6th cent.) and the scene of several church councils, notably the council convoked by Charlemagne in 813

chalybite · see SIDERITE

Cham (kăm), pseud of **Amédée, comte de Noé** (ämādā' kōt dŭ nō'), 1819–79, French caricaturist and lithographer Abandoning a military career for art, he studied under Delaroche and Charlet He contributed to *Le Charivari* and produced during his lifetime a vast number of caricatures and sketches of French and Algerian life and political cartoons, most of them under the pseudonym Cham His vivacity, wit, and talent for the grotesque made his works popular

Chamalhari (chamălhă'rē, –hŭ'rē) or **Chomo Lhari** (chŏmōlhŭ'rē, chōmulhă'rē), peak, 23,930 ft high, on the border of Bhutan and Tibet, in the Himalayas

Chamavi: see GERMANS

Chambal (chŭm'bul), river, c 650 mi long, rising in Madhya Bharat, India It flows northeast and then southwest to join the Jumna

Chambellan, René Paul (chăm'bĕlŋ), 1893–, American architectural sculptor, b West Hoboken, N J., studied with Gutzon Borglum and at Julien's academy, Paris Among his many sculptured decorations of public buildings are those for the theater foyer at Radio City, New York, the *News* building, New York, New York state office buildings, Buffalo, *Tribune* building, Chicago, and state building, Nashville, Tenn

chambered nautilus. see NAUTILUS

Chamberlain, Arthur Neville: see CHAMBERLAIN, NEVILLE

Chamberlain, Sir Austen (Sir Joseph Austen Chamberlain), 1863–1937, English statesman, son of Joseph CHAMBERLAIN and half brother of Neville CHAMBERLAIN He entered upon a 45-year parliamentary career in 1892 He was chancellor of the exchequer (1903–6), secretary of state for India (1915–17), a member of the war cabinet (from April, 1918), and again (1919–21) chancellor of the exchequer During his tenure in the latter office he secured parliamentary assent to the policy of imperial tariff preference first advocated by his father He succeeded Bonar Law as conservative leader in 1921 and helped negotiate the treaty with the Irish Free State From 1924 to 1929 he held his most important post, as foreign secretary The Locarno Pact of 1925, which provided, among other things, German admittance to the League of Nations, was largely his work The same year (in conjunction with Charles G Dawes) he was awarded the Nobel Peace Prize He last held a cabinet position in 1931, but continued influential in Commons until his death. See his *Down the Years* (1935), *Politics from Inside* (1936), and *Seen in Passing* (1937), Sir Charles Petrie, *Life and Letters of Sir Austen Chamberlain* (1939–40)

Chamberlain, Charles Joseph, 1863–1943, American botanist, b Sullivan, Ohio, grad Oberlin (B.A., 1888) and Univ of Chicago (Ph D., 1897). From 1911 until 1929 he taught at the Univ of Chicago He is the author of *The Living Cycads* (1919), *Methods in Plant Histology* (5th ed, 1932), *Elements of Plant Science* (1930), *Gymnosperms Structure and Evolution* (1935), and, with J M. Coulter, *Morphology of Gymnosperms* (rev ed, 1917)

Chamberlain, George Earle, 1854–1928, American legislator, b near Natchez, Miss, grad. Washington and Lee Univ, 1876 He removed (1876) to Oregon, was admitted (1878) to the bar, and

served as U S. attorney (1884–86, 1900–1902) and as state attorney general (1891–94) He was (1903–9) governor of Oregon, and as U S Senator (1909–21) Chamberlain, a Democrat, was chairman of the Committee on Public Lands and of the Committee on Military Affairs He played a major role in pushing measures for selective service, war appropriations, and food control through Congress in the First World War He later was appointed (1920) to the U S Shipping Board, retired (1923) to law practice, and was counsel for the state of Oregon

Chamberlain, Houston Stewart, 1855–1927, Anglo-German writer Born in England the son of a British admiral, he was educated in France and Germany and settled in Germany, marrying Richard Wagner's daughter and becoming a German citizen His chief work is *Die Grundlagen des neunzehnten Jahrhunderts* (1899, Eng tr , *Foundations of the Nineteenth Century*, 1910), one of the important documents of racist doctrine, a glorification of the achievements of the Teutons, to whom he attributed all modern achievements. He was strongly aristocratic and violently anti-Semitic His insistence upon "race" won him many followers, and his ideas gained much currency, culminating in their use by Adolf Hitler and the National Socialists

Chamberlain, Joseph, 1836–1914, British imperialist statesman After a successful business career, he entered local politics and won distinction as reform mayor of Birmingham (1873–76) He served under Gladstone as a Liberal president of the Board of Trade (1880–85), but in 1886 he resigned and joined the Liberal-Unionists who opposed Home Rule for Ireland In 1887 as commissioner to the United States, he settled the fisheries dispute between that country and Canada He became leader of the Liberal-Unionists in the House of Commons in 1891 Here and as colonial secretary (1895–1903) he advocated social reforms at home and in the colonies and a vigorous colonial policy aimed at expansion of empire, cooperation, and consolidation His negotiations with President Kruger of the Transvaal republic failed, and he was unjustly blamed for the aggressive acts that precipitated the South African War (1899–1902) He was foremost in reconciling the Boers after the war, even going to Africa for that purpose Since England's ancient commercial monopoly had been destroyed mainly by German and American competition, Chamberlain advocated a tariff giving preference to imperial products. He resigned in 1903 to spend three years trying, through the Tariff Reform League, to "educate" England His proposal to abandon England's traditional free trade split his Liberal-Unionist-Conservative bloc, resulting in its defeat in the elections of 1906 Ill-health ended his public life in 1906, but his tariff policy was adopted (1919 and 1932) within the lifetime of his sons Austen and Neville See E E Gulley, *Joseph Chamberlain and English Social Politics* (1926), biography by J L Gawin (3 vols , 1932–34, to 1900 only), W L Strauss, *Joseph Chamberlain and the Theory of Imperialism* (1942)

Chamberlain, Sir Joseph Austen · see CHAMBERLAIN, SIR AUSTEN

Chamberlain, Joshua Lawrence, 1828–1914, Union general in the Civil War, b Brewer, Maine, grad Bowdoin, 1852, and Bangor Theological Seminary, 1855 He taught at Bowdoin from 1855 to 1862, when he became lieutenant colonel in the 20th Maine Infantry. Chamberlain was awarded the Congressional Medal of Honor for his defense of Little Round Top at Gettysburg (1863), and in June, 1864, Grant promoted him brigadier general of volunteers on the field for his gallantry before Petersburg He was governor of Maine (1867–71) and president of Bowdoin (1873–81) He wrote *The Passing of the Armies* (1915), which deals with the final campaigns in the East.

Chamberlain, Neville (Arthur Neville Chamberlain), 1869–1940, English statesman, son of Joseph CHAMBERLAIN and half brother of Sir Austen CHAMBERLAIN He studied commerce, metallurgy, and engineering design as a young man, and after seven years on his father's sisal plantation in the Bahamas, he returned to Birmingham to enter upon a business career In 1911 he was elected to the Birmingham city council and during the First World War served for a time as director general of labor recruiting In 1918, in his 50th year, he was elected to the House of Commons. In 1923 he became chancellor of the exchequer and later (1924–29) served as minister of health. In the crisis of 1931 he resumed his position as chancellor of the exchequer, a position he held until he succeeded Stanley Baldwin as prime minister on May 28, 1937 The period of "appeasement" of the Axis Powers which followed became symbolized by Chamberlain and his ever-present umbrella That policy reached its apogee on Sept 30, 1938, when, after long negotiations, he signed the MUNICH PACT. Continued German aggression and the invasion of Czechoslovakia the following March brought a stiffening of British policy. Chamberlain continued in office after the outbreak of war, but the British debacle in Norway in April, 1940, forced Chamberlain, who was confronted with increasing Conservative and unanimous Labour opposition, to resign (May 10) He continued in Winston Churchill's government as lord president of the council until ill-health forced his resignation on Oct 3. He died a few weeks thereafter. See biography by Keith Feiling (1946)

Chamberlain, William Isaac, 1837–1920, American agriculturist, b Sharon, Conn. He helped Ohio agriculture by organizing farmers' institutes and issuing monthly crop reports, and he obtained the passing of a fertiliser law. He wrote *Tile Drainage* (1891) and many contributions to agricultural journals based on his own experience

Chamberlain, city (pop 1,626), co seat of Brule co , S S Dak , SE of Pierre and on the Missouri; platted 1880, inc 1881 An early ferrying point for passengers and freight on the river, the city has become a trade center in a farm area.

Chamberlin, Thomas Chrowder, 1843–1928, American geologist, b Mattoon, Ill , grad Beloit College, 1866 He was professor at Beloit (1873–82), president of the Univ of Wisconsin (1887–92), and professor at the Univ of Chicago (1892–1919) He also served the geological survey of Wisconsin (1873–82) and the U S Geological Survey (1882–1907) He founded the *Journal of Geology* His study of glaciation and of climates in past geologic time brought his attention to defects in Laplace's NEBULAR HYPOTHESIS and led him to formulate, with F R Moulton, the PLANETESIMAL HYPOTHESIS Chamberlin wrote *The Geology of Wisconsin* (1873–82), *A Contribution to the Theory of Glacial Motion* (1904), *A General Treatise on Geology* (with Rollin D Salisbury, 1906), *The Origin of the Earth* (1916), and *Two Solar Families* (1928) *The General Treatise*, in various editions and abridgments, is standard in schools and colleges His son, **Rollin Thomas Chamberlin,** 1881–1948, geologist, made a special study of gases in rocks, and he was an authority on structural and dynamic geology He taught at the Univ of Chicago from 1912 to 1947, when he became professor emeritus From 1928 he edited the *Journal of Geology*

chamber music, ensemble music for small groups of instruments, with only one player to each part Such music was originally performed by amateurs, in courts or aristocratic circles, and because of its intimate nature is less effective when played in a large hall Concerts of chamber music by professional musicians were an innovation of the 19th cent In a broad sense, chamber music was cultivated in the Middle Ages, although until the 17th cent it was usually music wherein the voice and various instruments were freely substituted for one another Music for small instrumental ensembles was composed in the early 17th cent , and the later baroque period developed the trio sonata, usually in four movements, for three instruments, one of which was usually a keyboard instrument In the compositions of Haydn and Mozart, the string quartet became the principal chamber-music form In this form Beethoven wrote some of his greatest music Of great importance also are the quartets of Schubert and Brahms The quartet, from its conception until the present has been employed in the expression of every style of composition Its limited coloristic possibilities and its clarity of texture make it an ideal medium for absolute music See W W Cobbett, *Cyclopedic Survey of Chamber Music* (1929–30), D F Tovey, *Essays in Musical Analysis Chamber Music* (1944), H E Ulrich, *Chamber Music* (1948)

chamber of commerce, local association of businessmen organized to promote the welfare of their community, especially its commercial interests Usually each chamber of commerce has a board of directors elected by the members, and work is done through committees Among the activities frequently carried on by these committees are industrial surveys and efforts to attract new industries to the city, housing surveys, efforts to provide parking space and promote safety, and advertising the advantages of the city to tourists and to organizations for possible conventions The *chambre de commerce* of Marseilles (1599) was the first organization to use the name, the idea spread through France in the 17th and 18th cent The first to be formed in Great Britain was on the island of Jersey in 1768 In America the first was the Chamber of Commerce of the State of New York, organized in 1768 By 1870 there were 40 in U S cities The local chambers are federated in the Chamber of Commerce of the United States (founded 1912), which maintains at its Washington, D C., headquarters a technical staff and lobbies in the interests of its member organizations Its organ is the *Nation's Business* The International Chamber of Commerce has its headquarters at Paris. See also TRADE ASSOCIATION.

Chambers, Sir Edmund Kerchever, 1866–, English literary critic, educated at Oxford For many years he was in the Education Dept of the government. He is famous as a Shakesperian scholar and for his useful books *The Mediaeval Stage* (1903), *The Elizabethan Stage* (1923), and *Arthur of Britain* (1927) Among his other works are studies of S. T. Coleridge and Matthew Arnold.

Chambers, Ephraim, c.1680–1740, English encyclopedist, whose *Cyclopedia* (2 vols., 1728) in French translation inspired the French encyclopedists. See ENCYCLOPEDIA.

Chambers, Robert: see CHAMBERS, WILLIAM.

Chambers, Sir William, 1726–96, English architect, b. Stockholm. He traveled extensively in the East Indies and in China, where he made many drawings of gardens and buildings, afterwards published He studied architecture in Italy and France and in 1755 established himself in England He designed decorative architecture for Kew Gardens and achieved a reputation by his *Treatise on the Decorative Part of Civil Architecture* (1759), which became a standard and influential work on classic design The foremost English architect of his day, he was a proponent of the Inigo JONES traditions of Palladian design. His chief work is Somerset House, commenced in 1776, an extensive block of government offices. He also had charge of various alterations at Trinity College, Dublin, and designed additions to Blenheim Palace, the observatory in Richmond Park, and casinos in many of the parks of the nobility. He became private architect to King George III and in 1782 was made surveyor general Chambers was interred in Westminster Abbey See biography by A T Edwards (1924)

Chambers, William, 1800–1883, and **Robert Chambers,** 1802–71, Scottish authors and publishers Their firm of W and R Chambers is best known for *Chambers's Edinburgh Journal*, which William started in 1832 and for which both brothers wrote, and *Chambers's Encyclopaedia* (10 vols , 1859–68, new ed , 1922–27) Robert wrote several books on history and geology, including the anonymous *Vestiges of Creation* (1844), a forerunner of Darwin's *Origin of Species* William, always interested in public improvement, was lord provost of Edinburgh, 1865–69 See his *Memoir of Robert Chambers with Autobiographic Reminiscences* (1872, enl ed , 1884)

Chambersburg, industrial borough (pop 14,852), co seat of Franklin co , S Pa , SW of Harrisburg, settled 1730, laid out 1764, inc 1803 A trading center for a fertile agricultural area, it manufactures silk and woolen goods Caledonia State Park is near by Chambersburg was the headquarters of the militant abolitionist John Brown in 1859, and the town was burned by the Confederates under Harry GILMOR (1864) It is the seat of Penn Hall Junior College (for women) and Wilson College (Presbyterian, for women, 1869)

Chambéry (shäbārē'), city (pop 26,641), capital of Savoie dept , E France, the historical capital of Savoy and an archiepiscopal see It was damaged in the Second World War Near by is the house (the Charmettes) made famous by the sojourn of J J Rousseau and Mme de Warens

Chambezi, river see CONGO

Chambiges (shäbēzh'), family of French architects or master masons of the 15th and 16th cent **Martin Chambiges** (märtē'), d 1532, took part in the designing of three great cathedrals—Sens (from 1489 to 1499), Troyes (its west front), and Beauvais, where he was employed on the choir (1506), remaining in charge of its construction until his death In these works he was assisted by his son, **Pierre Chambiges** (pyĕr'), d 1544, whose most important work is the château of Saint-Germain-en-Laye Pierre also worked upon the Hôtel de Ville, Paris (1533–34), assisted in the construction of the château of Fontainebleau, and was employed in rebuilding the château of Chantilly

Chamblee (chămblē'), city (pop 1,081), NW Ga., N of Atlanta, inc as a city 1922

Chambly (shäblē'), group of villages, S Que , on the Richelieu river and E of Montreal It comprises three separate municipalities, Chambly Bassin (pop 1,423), Chambly Canton (pop 1,185), and the parish of Chambly (pop 1,132) First built in 1665, **Fort Chambly** became a strategic point in the defense of New France against the English and the Iroquois It was captured by the invading Americans in 1775 and burned when they retired in 1776 In 1880 the Canadian government undertook its restoration

Chambord, Henri Charles Ferdinand Marie Dieudonné, comte de (ärē' shärl' fĕrdēnä' märē' dyŭdônā' kōt' də shäbôr'), 1820–83, claimant to the French throne, posthumous son of Charles Ferdinand, duc de BERRY His original title was duke of Bordeaux His grandfather, Charles X, abdicated in his favor in 1830, and he is known to the legitimists as Henry V, though he never held the throne He accompanied Charles into exile and spent most of the rest of his life at Frohsdorf, Austria In 1832 his mother, Caroline de BERRY, made an unsuccessful attempt to overthrow Louis Philippe Efforts to reconcile his claims with those of the Orleanist pretender, Louis Philippe Albert d'ORLÉANS, after the Revolution of 1848, met with little success In 1871, after the fall of the Second Empire, Chambord's prospects improved, and in 1873 the Orleanist pretender relinquished his claims in Chambord's favor. However, his stubborn adherence to the Bourbon flag and to ultraroyalist principles destroyed his chance of recognition. He died without issue, and his claims passed to the house of Bourbon-Orléans

Chambord (shäbôr'), village (pop. 1,029), S Que., on the south shore of Lake St. John and W of Chicoutimi.

Chambord, village, Loir-et-Cher dept., N central France, on the Cosson, a tributary of the Loire, between Blois and Orléans. Its huge Renaissance château was built by Francis I. Particularly remarkable is the central stairway, built in two separate overlapping spirals so that a person mounting the stairs would not meet a person descending them. The château was used by Louis XIV and by Stanislaus I of Poland. Louis XV gave it in gratitude to Maurice de Saxe, and Napoleon I gave it to Marshal Berthier. In 1821 Chambord was presented, by national subscription, to the duke of Bordeaux, who later took the title count of Chambord. In 1932 it was bought back by the state.

chameleon (kumē'lyun), small, slow-moving, arboreal lizard of Africa and S Asia. Changes in the color of its skin are not governed by the color of its background but largely by its feelings and by variations in light intensity and temperature. These factors cause changes in the arrangement of pigment in dermal skin cells either by direct action or indirectly through hormones and nerves. Chameleons are covered with granular scales, the tail is prehensile, and the digits are opposable so that the feet are efficient grasping organs. The sticky tongue can be shot far out to catch passing insects. The eyes can move independently and are covered with thick lids with a small opening to see through. The American chameleon is a much smaller lizard of another family which can change its skin color.

Chamfort, Sébastien Roch Nicolas (säbästyē' rôk' nēkôlä' shäfôr'), 1740–94, French writer of maxims and epigrams, whose real name was Sébastien Roch Nicolas. His acute observations on literature, morals, and politics made him popular at court and gained him a pension. Although a republican of long standing, in the Reign of Terror he was denounced, and committed suicide.

Chamillard, Michel (mēshēl' shamēyär'), 1651–1721, French statesman. He was named controller general of finances (1699), minister of state (1700), and minister of war (1701). To raise funds Chamillard resorted to the sale of offices and titles, loans, lotteries, manipulation of the currency, and anticipation of revenues. To these means he added a wartime capitation tax, imposed in 1695–98 and again after 1701, but he could not meet the mounting expenses of the government, especially after the War of the Spanish Succession began. The deficit and the national debt grew huge, and Vauban censured the disorder of the tax system. Chamillard resigned the finances to Nicolas Desmarets in 1708 and gave up his post as the minister of war in 1709.

Chaminade, Cécile Louise Stéphanie (sāsēl' lwēz' stāfānē' shamēnäd'), 1857?–1944, French composer and pianist, pupil of Godard in composition. She composed graceful, pleasant songs and piano pieces (e.g., the *Scarf Dance*) and a highly successful ballet, *Callirrhoé* (Marseilles, 1888).

Chamisso, Adelbert von (Louis Charles Adelaide de Chamisso) (a'dulbĕrt fŭn shä'mēsō, shumē'sō), 1781–1838, German poet and botanist, b. France. His parents fled to Germany on the outbreak of the French Revolution. Chamisso served as page to William II and in the Prussian army and was later keeper of the royal botanical collections at Berlin. He became famous as a lyric poet, his cycle *Frauenliebe und Leben* was set to music by Schumann. His symbolical tale of the man who sold his shadow, *Peter Schlemihls wunderbare Geschichte* (1814), is known everywhere and has virtually passed into legend.

chamois (shä'mē), hollow-horned hoofed mammal related to the antelope and found in the mountains of Europe and the E Mediterranean countries. It is about the size of a large goat, is light brown in color, and has a black tail, a black back stripe, and black markings on its face. The erect horns have terminal hooks pointed backward. Its hoofs cling to rocky surfaces, and it leaps with agility. It ranges to the snow line in summer. The skin was the original chamois leather, but the name is now also applied to leather made from the skins of other animals. The chamois has been introduced into New Zealand.

chamomile, see CAMOMILE.

Chamonix (shämônē'), village (pop. 2,654), Haute-Savoie dept., E France, at the foot of Mont Blanc, in the beautiful Chamonix valley. It is the principal base for the ascent of Mont Blanc and for visiting the Mer de Glace and is a popular summer and winter resort.

Chamorro, Emiliano (ämēlyä'nō chämô'rô), 1871–, president of Nicaragua (1917–20, 1926). A conservative and an army chief, Chamorro supported the revolution (1909) against José Santos Zelaya. The United States was unfriendly to his candidacy for the presidency in 1913, and he was unsuccessful, but he secured the office in 1917. He was a signer of the Bryan-Chamorro Treaty (1916) granting the United States an option on the Nicaragua Canal. His political career continued stormy. He opposed all the liberal regimes, including that of Anastasio Somosa.

Champa, the kingdom of the Chams, which flourished in Indo-China from the 2d cent. A.D. till the 17th cent. At its greatest extent it occupied present-day Annam as far north as the Porte d'Annam. Its capital was first Indrapura, in the neighborhood of Hué, and the later capital was Vijaya, farther south. Champa repeatedly made war on its stronger neighbor, Annam, it was sometimes allied and sometimes opposed to the Khmer Empire. In the 12th cent. the Chams invaded Cambodia and sacked Angkor; subsequently they fell for a time under Khmer rule. Decisively defeated by the Annamese in 1472, the Chams were forced to yield most of their territory N of Tourane. In the 17th cent. the rest of the Cham kingdom fell to the Annamese, and the remnants of the people were scattered. Chams still form small, impoverished minorities in Annam, Cochin China, and Cambodia. Although most of those in Annam worship Hindu gods, those of Cambodia are Mohammedans. The culture of Champa showed strong Indian influence. Ruins of Cham temples, adorned with bas-reliefs and with statues, are found in S Annam.

Champagne (shämpän', Fr. shäpä'nyu), region, NE France, consisting mainly of the departments Aube, Marne, Haute-Marne, Ardennes, and part of Yonne. The region is almost, but not fully, coextensive with the former province of Champagne and Brie. Abutting in the west on the Paris basin, Champagne is a generally arid, chalky plateau, cut by the Aisne, Marne, Seine, Aube, and Yonne rivers. Agriculture, except in the Ardennes dept., is mostly confined to the valleys. The plateau is cut from northwest to southeast by crests into several areas. Farthest east, bordering on Lorraine, is the so-called Champagne Humide [wet Champagne], largely agricultural, and the Langres Plateau. In the center is the Champagne Pouilleuse (Champagne badlands), a bleak and eroded plain, traditionally used for sheep grazing. Troyes and Châlons-sur-Marne, its principal towns, are located in fertile valleys and are centers of the wool industry. A narrow strip along the westernmost crest is extremely fertile, and the small area around Rheims and Épernay furnishes virtually all the champagne wine exported by France. Other fertile districts are around Rethel and Sens. The central and open situation of Champagne has made it a major European battlefield from the invasion by Attila's Huns, whom Aetius defeated at Châlons in 451, to the First World War, which left vast areas scorched. Yet the same geographic position gave the towns of Champagne a commercial prosperity in direct contrast to the bleakness of the countryside. The county of Champagne passed to the counts of Blois in the 11th cent. After 1152 the main branch of the house held Champagne, which had been considerably increased, upon the counts large parts of France, including Blois, Touraine, and Chartres, were dependent. In 1234 Thibaut IV inherited the crown of Navarre from his uncle Sancho VII, Navarre remained in the family until the death (1305) of Joan of Navarre, who married King Philip IV of France in 1286. Her son, who inherited Champagne, incorporated it into the royal domain in 1314, when he became king of France as Louis X. The bishoprics of Rheims and Langres were added later. During the rule of the counts Champagne was a virtually independent state. At the Fairs of Champagne, held at Troyes, Provins, Lagny-sur-Marne, and Bar-sur-Aube, merchants from England, the Low Countries, France, Burgundy, and Italy met six times each year. Special laws regulated the trade and had a profound influence on later commercial customs throughout Europe—the troy weight for precious metals still is used. Prosperity in the capital, Troyes, and the other towns, was accompanied by cultural brilliance, culminating in the work of Chrestien de Troyes and in the cathedral at Rheims. With its incorporation into France, Champagne declined in prosperity, but the sudden and continuing popularity of its sparkling wine, which began in the 18th cent., restored it somewhat. More recently efforts have been made to reforest the area and to reclaim it from erosion.

champagne (shämpän'), celebrated sparkling white wine made from grapes grown in the old French province of Champagne. The best champagne is from that part of the Marne valley whose apex is Rheims, the center of the industry. Champagne was reputedly developed by a monk, Dom Pérignon, in the 17th cent. It is a blend of grapes from different vineyards, hence is named for the vintners and shippers responsible for each blend. The small, slightly acid grapes are laboriously cultivated. After the first fermentation the wine is blended; it undergoes a secondary fermentation, then is drawn off into bottles reinforced to withstand high internal pressure, and is sweetened to induce further fermentation. The carbonic acid retained in the bottle after the final fermentation renders champagne sparkling. The wine is matured in the labyrinthine tunnels of the old chalk quarries of Rheims. The sediment formed is collected on the cork by tilting the bottle neck downward and frequently rotating it by hand. The wine in the neck of each bottle is then frozen, the cork removed, and the sediment, in a small piece of ice, is blown out. The space left is filled with the proper "dosage" of cane sugar dissolved in wine and usually fortified with cognac. *Brut* champagne is theoretically not sweetened, extra dry champagne, very lightly. Dry champagne is served as a dinner wine, the sweet, as a dessert wine.

Champaign (shämpän'), city (pop. 23,302), E central Ill., ENE of Springfield and adjoining Urbana, with which it is an economic and social unit, founded 1854, inc. 1861. It is a railroad (with repair shops), commercial, and industrial center in a rich farm area. The campus of the Univ. of Illinois (see Illinois, University of) lies between Champaign and Urbana, adding distinction to both.

Champaigne or **Champagne, Philippe de** (both fēlēp' du shäpä'nyu), 1602–74, French painter, b. Brussels, of Flemish parents. In 1621 he went to Paris, where he worked with Poussin on the Luxembourg Palace. In 1628 he became painter to the queen, Marie de' Medici. For her and for Richelieu he executed many religious paintings, still to be seen in French churches, and numerous fine portraits. From 1640 on he became absorbed in religion and has been called the painter of Port-Royal. His work is characterized by sober realism, simplicity, and piety. His best-known paintings include his frescoes at Vincennes and in the Tuileries and his portrait of his daughter, a nun at Port-Royal, and that of Richelieu (both in the Louvre). The New York Historical Society and the Museum of Fine Arts, Boston, contain examples of his work.

Champ-de-Mars (shä-du-märs'), former parade ground of Paris, between the École militaire and the Seine. Here, at the Fête de la Fédération (July 14, 1790), Louis XVI took an oath to uphold the new constitution. On its vast grounds several expositions were held, notably that of 1889, when the Eiffel Tower was erected here.

Champeaux, William of, see William of Champeaux.

champion, team or individual recognized as the best in any sport or game by a certified supervisory body. Champions generally obtain their titles by eliminating all rival claimants either in successive individual contests or in general elimination tournaments. In some sports a time limit is placed on the championship title (e.g., professional baseball), while in others (e.g., professional boxing) a champion is under obligations to defend his title against any qualified challenger. For the medieval institution of the champion in trial by battle, see ordeal.

Championnet, Jean Étienne (zhä' ätyĕn' shāpyônā'), 1762–1800, French general in the French Revolutionary Wars. In command of the Army of Rome, he captured Naples from the Second Coalition in 1799 and set up the Parthenopean Republic. However, he got into trouble with the Directory and was recalled in disgrace. Subsequently he commanded the Army of the Alps, unable to win success with this badly organized group, he resigned and a little later died.

Champlain, Samuel de (shämplän', Fr. sämüĕl' du shāplē'), 1567–1635, French explorer, the chief founder of New France. After serving in France under Henry of Navarre (King Henry IV) in the religious wars of the period, he was given command of a Spanish fleet sailing to the West Indies, Mexico, and the Isthmus of Panama. He described this three-year tour to the French king in a *Bref Discours* (first published in 1859). In 1603 he made his first voyage to New France as a member of a fur-trading expedition. With a pinnace he explored the St. Lawrence river as far as the rapids at Lachine, and after his return to France he described his voyage in *Des sauvages* (1603). With the sieur de Monts, who had a monopoly of the trade of the region, Champlain returned in 1604 to found a colony, which was landed at the mouth of the St. Croix river. In 1605 the colony transferred across the Bay of Fundy to Port Royal (now Annapolis Royal, N.S.), and in the next three years Champlain explored the New England coast S to Martha's Vineyard, discovering Mt. Desert Island and most of the larger rivers of Maine, he for the first time charted the coast in detail. With the revocation of the sieur de Monts's privileges, the colony had to be abandoned, and through the efforts of Champlain a new one was established on the St. Lawrence river. In 1608, in the ship *Le Don de Dieu*, he brought his colonists to the site of Quebec, where they started what was to be the capital of a great colony. In the spring of 1609 accompanying a war party of Huron Indians against the Iroquois, Champlain discovered the lake which bears his name, and near Crown Point, N.Y., the Iroquois were met and routed by French firearms. This incident is believed responsible for the later hatred of the French by the Iroquois. In 1612 he returned to France, where he received a new grant of the fur-trade monopoly. Returning in 1613, he set off on a journey to the Western lakes. He reached only Allumette Island in the Ottawa river that year, but in 1615 he went with Étienne Brulé and a party of Huron Indians to Georgian Bay on Lake Huron, returning southeastward by way of Lake Ontario. Accompanying another Huron war party to an attack on an

Onondaga village in present New York, Champlain was wounded and forced to spend the winter with the Indians. Thereafter he made no more explorations, but devoted all his time to the welfare of the colony, of which he was the virtual governor He helped to persuade Richelieu to found the Company of One Hundred Associates, which was to take over the interests of the colony In 1629 Quebec was suddenly captured by the English, and Champlain was carried away to four years of exile in England, there he prepared the third edition of his *Voyages de la Nouvelle France* (1632) When New France was restored to France in 1632, Champlain returned In 1634 he sent Jean Nicolet into the West, thus extending the French explorations and claims as far as Wisconsin. He died on Christmas Day, 1635, and was buried in Quebec His works were issued by the Champlain Society (1922–27) with English and French texts See C W Colby, *The Founder of New France* (1915); biographies by Ralph Flenley (1924), L. H. Sharp (1944), and Morris Bishop (1948)

Champlain (shămplān'), village (pop. 1,354), extreme NE N Y , near Lake Champlain, settled 1789, inc. 1873 Close to the Quebec line, it is a port of entry.

Champlain, Lake, 107 mi long and ½ mi to 14 mi wide, forming part of the N Y –Vt. border and extending into Quebec It lies in a broad valley between the Adirondacks and the Green Mts A link in the Hudson–St Lawrence waterway, the lake is connected with the Hudson (at Fort Edward) by the Champlain division of the Barge Canal, the Richelieu river connects the lake with the St Lawrence Lake George drains into it through a narrow channel, and many islands dot its surface, including Grand Isle, Isle La Motte, and Valcour Island The region is noted for its beautiful scenery and has many resorts, Plattsburg, N Y , and Burlington, Vt , are the largest cities on the lake's shores. The lake, discovered by Samuel de Champlain in 1609, was the scene of battles in the French and Indian War and the American Revolution at Crown Point and Ticonderoga, of a naval engagement in 1776, and of the important American victory of Thomas Macdonough in 1814 See Walter Hill Crockett, *A History of Lake Champlain a Record of More than Three Centuries, 1609–1930* (1937), Frederic F Van de Water, *Lake Champlain and Lake George* (1946)

Champney, Benjamin, 1817–1907, American landscape painter, b New Ipswich, N H , studied in Boston, Paris, and Italy His colossal panorama of the Rhine, widely exhibited, was destroyed in the Crystal Palace fire in New York Champney's best-known pictures are scenes from Switzerland and the White Mts He lived at North Conway, N H , after 1850

Champney, James Wells, 1843–1903, American painter, illustrator, and engraver, b Boston His illustrations include a series of over 500 for Edward King's *Great South* (1875) He painted portraits in pastel of John Bigelow, H M Stanley, and others

Champollion, Jean François (shā' frăswā' shāpôlyō'), 1790–1832, French Egyptologist Though he died while still young, he accomplished much and is considered the founder of the science of Egyptology. When he was 24 his two-volume work on the geography of ancient Egypt appeared In 1821 by use of the Rosetta stone he established the principles for deciphering the Egyptian hieroglyphics He became director of the Egyptian museum at the Louvre and professor of the Collège de France He is sometimes called Champollion le Jeune to distinguish him from his elder brother, who gave him his early training **Jean Jacques Champollion-Figeac** (shāk', -fēshak'), 1778–1867, was an archaeologist, a professor at Grenoble, a curator of manuscripts at the Bibliothèque nationale, a professor of paleography at the École des Chartes, and librarian at the Palace of Fontainebleau.

Champs Elysées (shā zālēzā'), avenue of Paris, leading from the Place de la Concorde to the Arc de Triomphe It is celebrated for its tree-lined beauty, its commodious breadth, the elegance of its cafés, theaters, and shops, and the fountain display at its center The avenue, built and named by Louis XV, led through open country until the early 19th cent

Chanaan (kā'ən), variant of Canaan 2

Chanakkale (khănäk'kälā), town and fort (pop 22,869), NW Turkey, on the Asiatic shore of the Dardanelles. It was formerly called Kale Sultamiye and Chanak Here Xerxes I crossed to Greece on a bridge of boats. The fort was bombarded by the British in the attack on Gallipoli in 1915. The town is known for its pottery. The name also appears as Canakkale

chance, in mathematics. see probability.

chancel [Latin, =latticework], primarily that part of the church close to the altar and used by the officiating clergy. In the early churches it was separated from the nave by a low parapet or open railing (*cancellus*), its name being thus derived. San Clemente at Rome is one of the few preserved examples With the development of the choir, additional space was taken, between the sanctuary and the nave, for the accommodation of the canons and singers The chancel rail was moved forward, and the entire space then became known as the choir, though it is also termed the chancel; there is no strict differentiation in the usage of the two words. In the Middle Ages the chancel rail was replaced by lofty choir screens, especially in English cathedrals and in monastic churches.

Chancellor, Richard, d. 1556, English navigator. When, largely under the inspiration of Sebastian Cabot, a group of men in England undertook to finance a search for the Northeast Passage to Asia, Chancellor was chosen as one of the commanders of the three ships sent out, he seems to have been senior commander, the others being Sir Hugh Willoughby and Stephen Borough They sailed in 1553, and Borough and Chancellor managed to get through dangerous arctic waters to the White Sea Chancellor then traveled overland across Russia to Moscow at the invitation of Ivan IV His negotiations prepared the way for trade with Russia, but he was shipwrecked and perished off the coast of Scotland on his way back to England Since Willoughby had earlier come to grief, it was Stephen Borough who continued the work of opening the northern route to Russia for the Muscovy Company.

Chancellorsville, battle of, in the Civil War, May 2–4, 1863 Late in April, 1863, Joseph Hooker, commanding the Army of the Potomac, moved against R E Lee, whose Army of Northern Virginia (less than half the size of Hooker's) had remained entrenched on the S side of the Rappahannock river after the battle of Fredericksburg Hooker, with four corps, crossed the river above Fredericksburg and advanced beyond Chancellorsville, a locality 10 mi W of Fredericksburg, John Sedgwick, with two corps, crossed below Fredericksburg Although outflanked, Lee did not retreat but, leaving 10,000 men under Jubal A Early to watch Sedgwick, moved on Hooker, who fell back to a strong defensive position in the Wilderness around Chancellorsville. Lee attacked on May 2 T J (Stonewall) Jackson led his 2d Corps on a brilliant 15-mile flanking movement against the Union right, while Lee, with his small remaining force, feinted along the rest of the line. Jackson fell upon and routed the surprised Federals but, unfortunately for the South, was mortally wounded The next day the Confederate wings united (J E.B Stuart succeeded Jackson) and drove Hooker back further Hooker called for Sedgwick, who drove Early from Marye's Heights (May 3) and reached Salem Church, 5 mi W of Fredericksburg There part of Lee's force joined Early and repulsed Sedgwick, May 3–4 Sedgwick and Hooker then withdrew across the river Chancellorsville, Lee's last great victory, led to his invasion of the North in the Gettysburg campaign. See John Bigelow, *The Campaign of Chancellorsville* (1910)

chancery. see equity

Chanchan (chän'chän'), ruins of an ancient Indian city near Trujillo, N Peru The city was probably begun in the period A D. 800–1000, and it is estimated that it once contained 200,000 people Chanchan is accepted generally as the capital of the Chimu, a pre-Inca civilization It is on a large plain of the coastal desert, which was made arable by ambitious and extensive irrigation works Covering c 11 sq mi. and built largely of adobe brick, the city comprised at least 10 self-contained, walled-in units

chancre see syphilis

Chandernagor (chŭn"durnugôr'), town (pop 38,284), India, a port on the Hooghly river and N of Calcutta A French possession, it was of great commercial importance until the 19th cent In July, 1949, it was announced that Chandernagor was to be ceded by the French and incorporated into West Bengal state, India

Chandler, Albert Benjamin, 1898–, U S baseball commissioner (1945–), b Corydon, Henderson co , Ky , grad Transylvania College, 1921, and Univ of Kentucky law school, 1924 A lawyer of Versailles, Ky , "Happy" Chandler went into politics and served as lieutenant governor (1931–35), governor (1935–39), and U.S Senator (1939–45).

Chandler, Charles Frederick, 1836–1925, American chemist, b Lancaster, Mass , educated at Harvard and at the Univ of Göttingen (Ph D , 1856). He was professor of chemistry at Union College, Schenectady (1857–64) In 1864, with Thomas Egleston, he established the Columbia Univ. School of Mines, serving there as professor of chemistry (until 1911) and as dean (1864–97) Chandler was also associated with the College of Pharmacy of the City of New York, serving as vice president (1894–99, 1904–22) and president (1900–1904), and with the College of Physicians and Surgeons (professor, 1876–97). A founder and twice president of the American Chemical Society, he was one of America's first great industrial chemists and was a specialist in sugar refining and petroleum refining As the first public-health chemist of the New York city board of health (1867–73) and as president of the board (1873–83) he inaugurated far-reaching reforms Chandler was influential in establishing the state board of health

Chandler, Raymond Thornton, 1888–, American detective-story writer, b. Chicago, educated in England. He fought with the Canadian forces in the First World War and in 1919 returned to the United States. He engaged in several businesses in California and wrote for magazines before the publication of *The Big Sleep* (1939). With *Farewell, My Lovely* (1940) he was recognised as the originator of a new type of "tough" detective fiction, well written and shrewdly plotted. After *The High Window* (1942) and *The Lady in the Lake* (1943) he wrote moving-picture scenarios for several years *The Little Sister* (1949) was somewhat less successful than his earlier stories. The private detective Philip Marlowe appears in all.

Chandler, William Eaton, 1835–1917, American politician, b. Concord, N.H., grad. Harvard Law School, 1854 He practiced law at Concord and was a state legislator before becoming solicitor and judge advocate general of the Dept. of the Navy in March, 1865 Chandler was First Assistant Secretary of the Treasury (1865–67), served as secretary of the Republican National Committee in U S Grant's successful presidential campaigns of 1868 and 1872, and had a large hand in Rutherford B Hayes's accession to the presidency after the disputed election of 1876 He was Secretary of the Navy (1882–85) under President Chester A Arthur and U S Senator from New Hampshire (1887–1901). See biography by L. B. Richardson (1940)

Chandler, Zachariah, 1813–79, U S. Senator from Michigan (1857–75) and Secretary of the Interior (1875–77), b Bedford, N H He moved to Detroit in 1833 and through merchandising, land speculation, and banking became a millionaire Mayor of Detroit (1851–52), he helped organize and was long the boss of the Republican party in Michigan Old Zack, as he was called, was an able and uncompromising abolitionist, also distinguished for his uncouth manners. A leading radical Republican, most closely associated with Benjamin F Wade, he was a member of the congressional committee on the conduct of the war and violently opposed Lincoln's Reconstruction program, later adopted by Andrew Johnson With the radicals victorious over Johnson, he remained a powerful figure in the Senate until he was turned out by the Democratic landslide of 1874 He then entered the cabinet, a typical Grant appointee, and was also chairman of the Republican National Committee in the disputed election of 1876 See biography by W C Harris (1917); T H Williams, *Lincoln and the Radicals* (1941), B J Hendrick, *Lincoln's War Cabinet* (1946)

Chandler, village (pop 1,858), E Que , on the Gaspé Peninsula at the mouth of the Grand Pabos

Chandler. 1 Town (pop 1,239), S central Ariz , in the Salt River Valley, inc 1920 2 City (pop 2,738), co seat of Lincoln co , central Okla , NE of Oklahoma City, settled 1891 It is a trade center for a farm area noted especially for pecans; cottonseed oil is made here

Chandos, Sir John, d. 1370, English soldier and administrator of English territories in France A friend of Edward the Black Prince, he won distinction in the Hundred Years War by his performance at Poitiers (1356) and by his capture (1364) of Bertrand du Guesclin at Auray In the Spanish campaign of the Black Prince he again defeated and captured (1367) Du Guesclin at Navarete He was mortally wounded in a battle with Gascon nobles at Lussac

Chandragupta, name of two Indian emperors See Sandracottus and Gupta

Chaney, Lon (chā'nē), 1883–1930, American moving-picture actor, b Colorado Springs, Colo Some of the many horror films in which he demonstrated his mastery of the art of make-up were *The Hunchback of Notre Dame*, *The Monster*, *The Phantom of the Opera*, and *London after Midnight*

Changan, China· see Sian

Changarnier, Nicolas (nēkôlä' shägärnyā'), 1793–1877, French general and politician He served in Algeria and was made (1848) governor general of Algeria, succeeding Cavaignac Elected to the national assembly, he very shortly resigned his governorship to take command of the national guard after the June Days of 1848 A moderate republican, he at first supported Louis Napoleon, but differences soon arose and Changarnier was exiled after the coup d'état of 1851 He returned in 1859 and took part in the defense of Metz (1870) in the Franco-Prussian War. Elected to the national assembly in 1871, he opposed a republic He was made a senator in 1875.

Changchun or **Ch'ang-ch'un** (both. chäng'-chōōn'), city (pop 605,276), SW Kirin prov , China It is a railroad junction, with manufacture and export of soy-bean products As Hsinking [Chinese, =new capital], the city was the capital of the former state of Manchukuo (1932–45)

changeling, in popular superstition, a fairy child, left in place of a stolen human baby. The changeling was peevish and sickly. Babies that had been baptized could not be stolen by fairies.

change of life: see menopause.

change ringing: see bell.

Chang Hsueh-liang (chäng' shüē'-lyäng'), 1898–, Chinese general. On the death (1928) of his father, Chang Tso-lin, he succeeded as military governor

of Manchuria. He was then called Chang Hsiao-liang but later changed his name He supported the central government against a rebellious northern army in 1929–30 and was made vice commander in chief of all Chinese forces and a member of the central political council Ousted by the Japanese from Manchuria, he suffered loss of prestige In 1936 Chang had Generalissimo Chiang kidnaped at Sian, allegedly to compel cooperation between the Kuomintang and the Communists and to force a declaration of war against Japan The generalissimo was released unconditionally a few weeks later Chang was deprived of his rank and positions and dropped from notice

Changkiakow (chäng'jyä'kou'), Mandarin *Chang-chia-k'ou*, city (pop 151,234), capital of Chahar prov , N China It is in the southern part of the province, near a section of the Great Wall Changkiakow, connected by rail with Peiping and situated on the main motor road to Mongolia, is a major commercial center Flour, rubber products, varnish, and porcelain are important manufactures The city is also known by its Mongolian name Kalgan Wanchuan was its former Chinese name

Changkufeng (chängkōō'fĕng'), hill, USSR, near the intersection of borders of the Mongolian People's Republic, China, and Korea, also called *Zaozernaya* Hill It was the scene of heavy border fights between Japanese and Russians in 1938–39

Changpai or **Ch'ang-pai** (both chäng'bī'), mountain range, NE Antung prov , China, near the Korean border The tallest peaks reach an altitude of some 8,000 ft

Changsha or **Ch'ang-sha** (both chäng'shä'), city (pop 421,616), capital of Hunan prov , China, on the Siang river An important stop on the Peiping-Canton RR, it was a major military objective in the Second World War and was captured by the Japanese in 1942 In the civil strife after the war it fell to the Communists in Aug , 1949

Changteh or **Ch'ang-tê** (both chäng'dŭ'), city and county (pop 554,988), N Hunan prov , China The city is a trading center on the Yuan river

Chang Tso-lin (chäng' tsō'-lĭn', jäng'), 1873–1928, Chinese general Chang was of humble birth As the leader of a group of Manchurian brigands, he assisted (1904–5) the Japanese in the Russo-Japanese War He occupied various military posts under the Chinese republic From his appointment (1918) as inspector general of Manchuria to his death he controlled Manchuria, and from 1920 on he constantly warred to extend his rule southward, his most formidable rival for power was Wu Pei-fu Chang died when the train in which he was retreating to Mukden before the Kuomintang army was bombed His son, CHANG HSUEH-LIANG, succeeded to control of Manchuria

Chankiang (chän'jyäng'), Mandarin *Chan-chiang*, official Chinese name for the former French territory of Kwangchowan (325 sq mi , pop 220,000) on Kwangchow Bay, S Kwangtung prov , China It was leased from China in 1898 for 99 years but was returned in 1945

Channel, town (1945 pop 1,309), SW N F , on the coast near the southwestern extremity of the island and on the harbor with Port aux Basques

Channel Islands or **Norman Isles**, Fr *Îles Normandes*, archipelago (75 sq mi , 1931 pop 93,205, 1949 estimated pop 105,000), off the coast of Normandy, France, in the English Channel The main islands are JERSEY, GUERNSEY, ALDERNEY and SARK, and there are a number of smaller islands, including Herm and Jethou, all belonging (except the small French Minquiers and the Chausey group) to Great Britain They are divided into two administrative bailiwicks One of them, Jersey, has more than half the total population and the chief town of the islands, St Helier The other, Guernsey, includes all the islands except Jersey Each bailiwick has its own lieutenant governor appointed by the crown, its own chief magistrate, and its own judicature The inhabitants are mostly of Norman descent, but in Alderney the stock is mainly English The English language is spoken everywhere and is coming to supersede French as the official language A Norman patois and Norman customs are still maintained by the natives Christianization took place in the 6th cent , largely through the efforts of St Helier and St Sampson In the 10th cent, the isles were granted to the duke of Normandy At the Norman Conquest they were joined to the English crown and remained loyal to King John and England in 1204 when Philip II of France confiscated the duchy of Normandy The French made unsuccessful attempts to reestablish control in the 14th cent and later The mild and sunny climate (35–40 in rainfall a year) and the fertile soil have made the islands chiefly agricultural and pastoral. Large quantities of vegetables, fruits, and flowers are shipped to English markets. The famous breeds of cattle are kept pure by local laws The islands are a favorite resort of tourists and vacationers In the Second World War, after the evacuation of some 10,000 military and civilian personnel, the islands were occupied (June, 1940) by German forces, who surrendered to the British after the end of the war on May 9, 1945.

Channel Islands National Monument, Calif.: see NATIONAL PARKS AND MONUMENTS (table).

Channing, Edward, 1856–1931, American historian, b Dorchester, Mass ; son of William Ellery Channing (1818–1901). Educated at Harvard (B A , 1878, Ph D., 1880), he was a notable teacher there from 1883 until his retirement in 1929, holding a professor's rank from 1897 Channing wrote *English History for American Readers* (with Thomas W Higginson, 1893); *The United States of America, 1765–1865* (1896; 2d ed , 1930, reprinted 1941), *Guide to the Study and Reading of American History* (with Albert B. Hart, 1896; revised and augmented ed by Channing, Hart, and Frederick J Turner, 1912), an excellent brief bibliography of American history; *Students' History of the United States* (1898, 5th ed , revised, 1924), and *The Jeffersonian System, 1801–1811* ("American Nation" series, 1906) Most of these books were, however, either incidental to, or preparation for, the great work to which Channing devoted most of his life—*A History of the United States* (6 vols , 1905–25), embracing the years from 1000 to 1865. Based throughout on the author's extensive knowledge of the sources, remarkably accurate in fact, and excellently written, it is generally considered the finest history of the United States ever produced by one man

Channing, William Ellery, 1780–1842, American Unitarian minister and author, b Newport, R I , grad Harvard, 1798, and later studied theology there At 23 he was ordained minister of the Federal St Congregational Church in Boston, which he served until his death He was a leader among those who were turning from Calvinism, and his sermon at Jared Sparks's ordination in Baltimore (1819) earned him the name "the apostle of Unitarianism " In 1820 he organized the Berry St Conference of Ministers, which in 1825 formed the American Unitarian Association Channing's plea was for humanitarianism and tolerance in religion rather than for a new creed Not only a great preacher but a lucid writer, Channing influenced many American authors, including Emerson and other transcendentalists and Holmes and Bryant Channing was not by nature a controversialist and never allied himself with the abolitionists, but his writings on slavery helped prepare for emancipation In his denunciations of war, his discussion of labor problems, and his views on education, he was in advance of his time His works (6 vols , 1841–43) passed through at least 17 editions See his *Life ... with Extracts from His Correspondence* (ed by W H Channing, 3 vols , 1848), biography by J W Chadwick (1903)

Channing, William Ellery, 1818–1901, American author and poet, b Boston, son of Dr Walter Channing and nephew of the more famous William Ellery Channing After deserting college for a log hut in Illinois, he returned to journalism in the East, married Margaret Fuller's sister, and lived in Concord He was a friend of Hawthorne and Thoreau and a contributor to the *Dial* His poems, which Thoreau characterized as "sublimo-slipshod," were published in *Poems* (1843), *The Woodman* (1849), *John Brown* (1886), and other volumes, but perhaps his most successful work was the biography *Thoreau, the Poet-Naturalist* (1873)

Channing, William Henry, 1810–84, American Unitarian clergyman and author, b Boston, grad Harvard, 1829, son of Francis Dana Channing and nephew of William Ellery Channing (1780–1842) His chief work is the biography of his uncle (3 vols , 1848) Idealistic and impractical, he tried one scheme of social or religious reform after another, including Brook Farm In the 1840s he was a prominent Fourierite and edited two socialist papers The latter part of his life, after 1854, he spent as a Unitarian minister in England See memoir by O B Frothingham (1886)

chansons de geste (shäsō' du shĕst') [Fr , =songs of deeds], a group of epic poems of medieval France which flourished from the 11th to the 13th cent Varying in length from 1,000 to 20,000 lines, assonanced or (in the 13th cent) rhymed, the poems were composed by trouvères and were grouped in cycles about some great central figure such as Charlemagne Although the chansons passed as real history to their medieval listeners, most of the material was legendary The origin of the form is still in dispute, but probably the first chansons were composed after the year 1000 by the joint efforts of clerks and jongleurs (see JONGLEUR) to attract pilgrims to shrines where heroes of the chansons were supposedly buried Sung by the wandering jongleurs to the accompaniment of a primitive violin, they spread to England, Germany, Italy, and Iceland The oldest extant chanson, as well as the best and most famous, is the *Chanson de Roland* (c 1098–1100, see ROLAND), others are *Raoul de Cambrai*, *Huon de Bordeaux*, *Aliscans*, and *Renaud de Montauban* See U T Holmes, *A History of Old French Literature* (1937)

chant, sacred song in which one tone may sustain any number of syllables The chant of Roman Catholic and Orthodox Christianity is called PLAIN SONG. Anglican chant developed during the English Reformation. It first consisted of Gregorian melodies adapted to English texts and harmonized The texts are from the Book of Common Prayer, and the rhythm of the chant is that of the spoken word Many Protestant churches use Anglican chant, and Anglican churches make some use of plain song See Winfred Douglas, *Church Music in History and Practice* (1937)

Chantaburi (chän"tŭbōō'rē') or **Chantabun** (chän"tŭbōō'n'), town (pop 6,711), SE Thailand, on the Gulf of Siam It was formerly a center of gem mining and is still an important market town for gems and other products The chief crops of the area are pepper and rice Chantaburi was occupied by French forces from 1893 to 1905

chanter see BAGPIPE.

chantey or **shanty** (both shăn'tē), work song with marked rhythm, particularly one sung by a group of sailors while pulling ropes or pushing the capstan Often it has stanzas sung by a leader, with a chorus repeated after each by the whole group Similar songs are also sung by shore gangs and lumbermen See R R Terry, *The Shanty Book* (1921–26), D W Bone, *Capstan Bars* (1932), J C Colcord, *Songs of American Sailormen* (1938)

Chantilly (shäntĭ'lē', Fr shätēvē'), town (pop 5,105), Oise dept , N France, NE of Paris It has famous lace manufactures The château, rebuilt in the 19th cent , contains an art museum Chantilly is a fashionable horse-racing center

Chantilly (shăntĭ'lē), locality, NE Va , scene of a Civil War battle (Sept 1, 1862), in which Union troops, retreating after the second battle of BULL RUN, checked Stonewall Jackson

Chantrey, Sir Francis Legatt, 1781–1841, English sculptor, famous for his portrait busts and statues Among his many well-known works are equestrian statues of Wellington and George IV (London), statues of George Washington (statehouse, Boston), George III, and Pitt, and an exquisite tomb *The Sleeping Children* (Lichfield Cathedral) He bequeathed to the Royal Academy £150,000 for the purchase of works of art done in Great Britain See biography by A J Raymond (1904)

Chanukah see HANUKKAH

Chanute, Octave (shōōnōt'), 1832–1910, American civil engineer, pioneer glider experimenter, b Paris He was brought to America in 1838 and received a secondary education in New York city He entered railroad construction work, becoming an iron-bridge builder of note After 1889 he devoted himself to scientific study and experimentation in gliding He found a five-plane glider of his own design more trustworthy than the Lilienthal glider His later biplane design with the new principle of shifting surfaces instead of weight was used by the Wright brothers, whom he helped both personally and by reason of his pioneer studies in air-current strengths He published *Aerial Navigation* (1891) *Progress in Flying Machines* (1894), and "Recent Progress in Aviation" (in *Annual Report of the Smithsonian Institution*, 1910)

Chanute, city (pop 10,142), SE Kansas, on the Neosho and WNW of Pittsburg, settled c 1870, formed by the consolidation of four contiguous towns and inc 1872 A market center in a rich agricultural region, it has railway repair shops, oil refineries, and cement works Near by is the site of a mission (1824–29), the first in Kansas

Chany (chŭnē'), salt water lake, 1,280 sq mi , RSFSR, in the Baraba Steppe, SW Siberia It abounds with fish and plankton

Chanzy, Antoine Eugène Alfred (ätwän' ŭzhĕn' älfrĕd' shäzē'), 1823–83, French general After service in Algeria, Italy, and Syria, he was refused the command of a brigade in the FRANCO-PRUSSIAN WAR, but soon after the downfall of the empire he was put in command of the Army of the Loire and opposed the Prussians with much skill He was elected to the national assembly Captured by the Commune of Paris in 1871, he had to be ransomed by the government He was governor general of Algeria from 1873 until 1879 and ambassador to Russia for two years (1880–81) Chanzy was made senator for life in 1875 and received a large vote in the presidential election of 1879 though nominated without his own approval

Chaoan or **Ch'ao-an** (both chou'än'), city (pop 59,486), Kwangtung prov , China, on the Han river, 20 mi N of Swatow It was formerly Chaochow Pottery is an important manufacture

Chaochow, China see CHAOAN

Chaos (kā'ŏs), in Greek religion, originally a vacant, unfathomable space out of which arose all things, earthly and divine Later the word came to mean an abyss with a confusion of matter from which a supreme being created all life From Chaos came GAEA, Tartarus (see HELL), and EROS

Chapais, Jean Charles (zhă' shärl' shäpā'), 1811–85, Canadian statesman, b Quebec prov , educated at Nicolet College and the Quebec seminary He entered the Canadian legislative assembly in 1851 A firm believer in Canadian union, he attended the Quebec Conference on confederation in 1864 and served (1864–67) as commissioner of public works in the coalition government In the first dominion government under Sir John Macdonald, Chapais was minister of agriculture (1867–69) and receiver general (1868–73), in 1868 he was appointed to the Canadian Senate Sir Thomas Chapais was his son

Chapais, Sir Thomas, 1858–1946, Canadian politician and historian, b Quebec prov, grad Laval Univ; son of Jean Charles Chapais Thomas Chapais became professor of history at Laval Univ. He was appointed to the legislative council of Quebec in 1892, becoming speaker in 1895 In 1896 he was president of the executive council In 1919 he was appointed to the Canadian Senate, and in 1930 he represented Canada in the Assembly of the League of Nations He was a leader in the newer school of French Canadian historians, his most notable works being his biographies *L'Intendant Talon* (1904), *The Great Intendant* ("Chronicles of Canada" series, 1914), and *Montcalm* (1911), and his *Cours d'histoire du Canada* (8 vols, 1919–34) He was knighted in 1935

Chapala (chäpä'lä), lake, c 50 mi long and 8 mi wide, W Mexico, mostly in Jalisco but partly in Michoacán It is the largest lake in the country Set in a huge land depression, Lake Chapala is fed by the Lerma river, which flows into it from the east, and is drained by the Santiago, which flows out by the northeastern corner It is a popular scenic resort Fishing is an important native occupation

chaparral (chăpûrăl'), type of plant community in which shrubs are dominant It occurs usually in regions having from 10 to 20 in of rainfall annually and is therefore drier than forest regions and less dry than deserts Generally chaparral country has most of its rainfall in the winter Where the rate of evaporation is high, chaparral is found sometimes where the rainfall is well above 20 in The vegetation includes both evergreen and deciduous forms, the dominant species varying in different areas Chaparral is well exemplified in parts of the W and SW United States, although similar growth is found in many parts of the world Climax areas see ECOLOGY) are well represented by the largely deciduous growths in Colorado, E Utah, and N New Mexico A subclimax area extends from South Dakota to Texas and through part of the Great Basin Among the chief species of plants in these regions are Gambel oak (*Quercus utahensis*), mountain mahogany (*Cercocarpus parvifolius*), the squawbush (*Rhus trilobata*), the western chokeberry (*Prunus demissa*), the western serviceberry (*Amelanchier alnifolia*), and mesquite (*Prosopis glandulosa*) Evergreen shrubs are characteristic of the chaparral found in the southern half of California, especially near the coast, and extending into Nevada and Arizona Among the dominant forms are several species of buckthorn (*Ceanothus*), manzanita (*Arctostaphylos tomentosa* and *A pungens*), and the holly-leaved cherry (*Prunus ilicifolia*) A species of scrub oak (*Quercus dumosa*) is the chief deciduous form Chaparral growth is sometimes so dense that it is almost impenetrable

chapbook, one of the pamphlets formerly sold in Europe and America by itinerant agents, or "chapmen" The price of a chapbook was low—in England often a penny Like the broadside, the chapbook was usually anonymous and undated The text commonly was addressed to such readers as those who purchase tabloid newspapers Students of the popular taste of the 16th, 17th, and 18th cent find source material in the chapbooks

Chapei. see SHANGHAI

chapel, subsidiary place of worship It is either an alcove or chamber within a church, a separate building, or a room set apart for the purpose in a secular building A movable shrine containing the *cappa*, or cloak, of St Martin was first called a *cappella*, hence a sanctuary which could not be called a church Though the churches of the early Middle Ages possessed only the single altar of the apse, chapels became necessary with the increase of relics and of devotions at altars sacred to numerous saints At first they appeared as minor apses, flanking the main apse and terminating the side aisles After the 10th cent, the side aisle was continued back of the high altar to form a processional aisle, with a series of radiating chapels projecting from it. These formed the *chevet* of the great continental cathedrals, especially notable in France In the 13th cent, side chapels were added, projecting from the side-aisle bays of choir and nave In England the strongly projecting transepts provided the favored space for a relatively small number of chapels In France the Lady Chapel (dedicated to the Virgin) is the central chapel of the *chevet* and is sometimes larger than the others, while in England it occurs directly behind the high altar. Peculiar to English cathedrals are the small chantry chapels, mostly of the 14th and 15th cent, either built and endowed by individuals for their private Masses or serving to enclose the tombs of bishops and other churchmen From earliest times, the right to an independent private chapel was possessed by royalty. Such are the separate building of the Sainte-Chapelle, Paris, St. George's Chapel at Windsor, and Henry VII's magnificent chapel at Westminster, London In addition, there were royal mortuary chapels, the most celebrated being that of Charlemagne (796–814), at Aachen, since converted into a cathedral. Numerous lords of medieval castles and manor houses established private chapels, over which episcopal jurisdiction was enforced as completely as possible. The two main chapels at the Vatican are the Pauline Chapel (1540), designed by Sangallo for Paul III, and the Sistine Chapel (1473), built by Sixtus IV and celebrated for its great fresco decorations by Michelangelo and other masters

Chapelain, Jean (shă' shäplē'), 1595–1674, French poet His *Pucelle* (1656) was a poem on Joan of Arc He was a founding member of the French Academy, for which he composed the paper attacking *Le Cid* of Pierre Corneille

Chapel Hill, university town (pop 3,654), central N C, NW of Raleigh, at the edge of the piedmont, founded 1792 It is the seat of the Univ of North Carolina (see North Carolina, University of).

Chapin, Roy Dikeman (chă'pĭn), 1880–1936, U S Secretary of Commerce (1932–33), b Lansing, Mich He was identified with automobile business after 1901 Chapin was appointed to the cabinet by President Hoover

Chaplin, Charles Spencer (Charlie Chaplin), 1889–, American moving-picture actor, director, writer, and producer, b London, England At an early age he appeared in London music halls and in 1910 joined Fred Karno's pantomime troupe, where he performed in such skits as *A Night in an English Music Hall* Karno's troupe toured the United States in 1913, and Chaplin's skill at pantomime attracted the attention of Mack Sennett, who was then directing films for the Keystone Company It was in such Keystone films as *Kid's Auto Races* and *Tillie's Punctured Romance* that the famous figure with the trick derby, minute mustache, baggy trousers, oversized shoes, awkward walk, and bamboo cane first became known With Essanay Films (1915–16) he made *The Tramp* and *Carmen*, and with Mutual Films (1916–17) *The Count*, *Easy Street*, *The Cure*, and *The Immigrant* In 1918 Chaplin entered independent production and under the imprint of First National Films acted in *A Dog's Life*, *Shoulder Arms*, and *The Kid*, all of which he wrote and directed In 1923 he was a cofounder of United Artists, there he produced *A Woman of Paris*, which he directed but did not appear in, *The Gold Rush*, *The Circus*, *City Lights*, *Modern Times*, *The Great Dictator*, the first film in which he spoke, and *Monsieur Verdoux* Chaplin's art is the most universal that the moving picture has elicited See his book, *My Trip Abroad* (1922), Gerith von Ulm, *Charlie Chaplin* (1940), Parker Tyler, *Chaplin, Last of the Clowns* (1948)

Chapman, Alvan Wentworth, 1809–99, American botanist and physician His *Flora of the Southern United States* (1860) was long the standard manual for that region

Chapman, Frank Michler, 1864–1945, American ornithologist, b Englewood, N J At the American Museum of Natural History, where he was associate curator of ornithology and mammalogy (1888–1908) and curator of ornithology (from 1908), he created a new type of bird habitat display He wrote *Handbook of Birds of Eastern North America* (1895) and many other books on birds and was a founder and editor of *Bird Lore* See his *Autobiography of a Bird-Lover* (1933)

Chapman, George, 1559?–1634, English dramatist and poet Little is known of his life His great poetic version of the *Iliad* was completed in 1612, and of the *Odyssey* in 1614–15 Although they follow perhaps more his spirit than the letter of Homer, Chapman's translations have become English classics (see Keats's sonnet, "On First Looking into Chapman's Homer") Chapman translated other Greek and Latin poets, finished Marlowe's poem *Hero and Leander* (1598), and wrote metaphysical poetry, beginning with *The Shadow of Night* (1594) Among Chapman's best plays are the tragedies *Bussy D'Ambois* (1607) and *The Revenge of Bussy D'Ambois* (1613) and the comedies *All Fools* (1605) and *Eastward Ho!* (1605), the last written with Ben Jonson and John Marston See Chapman's poems (ed by P B Bartlett, 1941), study by Havelock Ellis (1934)

Chapman, John, 1774–1847, American pioneer, more familiarly known as Johnny Appleseed, b Massachusetts From Pennsylvania—where he had sold or given saplings and apple seeds to families migrating westward—he descended (1806) the Ohio river with two canoes filled with bags of apple seeds and stopped at inviting places in the wilderness to plant orchards For 40 years Johnny Appleseed continued to wander up and down in Ohio, Indiana, and Illinois visiting his forest nurseries to prune and care for them and to aid hundreds of settlers to establish orchards of their own His ragged dress, eccentric ways, and religious turn of mind attracted attention, and he became a familiar figure to settlers Scores of legends were told of him after he died. However, it was verified that in the War of 1812 he sped 30 mi to summon American troops to Mansfield, Ohio, thus forestalling a raid by Indian tribes who were allied with the British. He died near Fort Wayne, Ind. See H. A Pershing, *Johnny Appleseed and His Time* (1930).

Chapman, John Gadsby, 1808–89, American painter, illustrator, and wood engraver, b. Alexandria, Va., studied at the Pennsylvania Academy of the Fine Arts and later in Rome and Florence *The Baptism of Pocahontas* is in the rotunda of the Capitol, Washington, D.C. His fine *American Drawing Book* (1847) went through many editions

Chapman, John Jay, 1862–1933, American essayist and poet, b New York city, grad. Harvard He was admitted to the bar in 1888 but after 10 years abandoned law for literature. A friend of William James and other Boston intellectuals of the time, Chapman was a fiery and pertinent observer of his environment He wrote *Emerson and Other Essays* (1898), *Memories and Milestones* (1915), *Greek Genius and Other Essays* (1915), *Songs and Poems* (1919), and *New Horizons in American Life* (1932) He also edited (1917) the letters of his son, Victor Chapman See biography by M A DeW Howe (1937)

Chapman, Maria (Weston), 1806–85, American abolitionist, b. Weymouth, Mass In 1834 she became a close associate of William Lloyd Garrison and for several years was treasurer of the Massachusetts Anti-Slavery Society She edited (1877) the autobiography of Harriet Martineau, a friend of long standing

Chapman, Victor Emmanuel, 1890–1916, American aviator b. New York city, son of John Jay Chapman He was a pilot of the Lafayette Escadrille In *Victor Chapman's Letters from France* (with memoir by his father, 1917), his flights and aerial combats are vividly and poetically described Going to the aid of three companions caught by German planes, June 23, 1916, he met his death

Chapman, town (pop 1,167), S central Ala., SSW of Montgomery, in a farm area

Chappaqua (chă'pukwô), unincorporated suburban village (pop 2,286), SE N Y, in Westchester co, N of White Plains Paper and twine are made here

Chappe, Claude (klōd' shăp'), 1763–1805, French engineer He was the inventor of an ocular telegraph first put into use between Paris and Lille in 1794, it was the immediate predecessor of the modern telegraph

Chappell (chă'pûl), village (pop 1,093), co seat of Deuel co, W Nebr, on a tributary of the South Platte, in a wheat-growing Great Plains area, platted 1884 It has a memorial art gallery

Chaptal, Jean Antoine (zhă' ătwăn' shătal'), 1756–1832, French chemist, statesman, and economist Professor of chemistry at Montpellier, he was minister of the interior (1800–1809) and director general of commerce and manufactures under Napoleon I, who created him the comte de Chanteloup He established the first French trade school, constructed an important network of canals and roads, and pioneered in the application of chemistry to industry

chapter house, a building in which the chapter of the clergy meets Its plan varies, the simplest being a mere rectangle At Worcester, the Norman builders created a circular chapter house (c 1100), with vaulting springing from a central pillar Subsequent examples, adopting this central support for their vaulted roofs and frequently polygonal in plan, are among the most distinctive achievements of the English Gothic builders Those at Salisbury, Wells, and Westminster Abbey (1250) are octagonal, while that at Lincoln is decagonal At York, the octagonal room (c 1300) exhibits a departure in that it dispenses with the central column and is covered with a vaulted wooden roof

Chapu, Henri (ărē' shapü'), 1833–91, French sculptor His style combines a fine realism with the repose of classic art He is best known for a kneeling *Joan of Arc*, in the Luxembourg, Paris, and a figure, *Youth*, on his monument to Henri Regnault

Chapultepec (chăpōōl"tāpĕk') [Aztec, =grasshopper hill], rocky eminence S of Mexico city It was occupied by Indians in early days, and in Aztec times aqueducts carried water from Chapultepec to supply Tenochtitlán The hill was developed as a playground for the last Aztec emperors, and late in the 18th cent a castle was built on the summit to serve as a summer home for the Spanish viceroys It became a regular residence of the rulers of Mexico It was also fortified and was the scene of spectacular fighting in the Mexican War Peace discussions after the American victory at Contreras had fallen through before Gen Winfield Scott ordered the storming of the Chapultepec stronghold on Sept. 12, 1847, in his advance on Mexico city The siege ended on Sept 13 with the fall of the fortress Santa Anna's blundering tantrums had hastened the bitter end of the hard fighting, but the war had been already almost lost The defeat became for Mexicans a symbol of glory because of the heroic courage of the defenders, particularly the "boy heroes" from the adjoining military college, who chose to die rather than surrender The way was then open for the conquerors to enter the capital on Sept 14 Chapultepec became a favorite residence of Emperor Maximilian, who beautified the grounds with formal gardens and furnished the castle in gilt elegance. A heavier elegance of the late 19th cent was introduced with the lavish alterations by Porfirio Díaz. In 1937 by decree of President Cárdenas the castle ceased being

the presidential palace and became a museum of colonial history and ethnography. The Inter-American Conference on the Problems of War and Peace, which met in Mexico city in 1945, is commonly called the Chapultepec Conference (see PAN-AMERICANISM).

Chapultepec, Act of: see PAN-AMERICANISM.

char: see TROUT

charade (shŭrād'), verbal, written, or acted representation of the syllables of a word from which a whole word is to be guessed Winthrop M. PRAED wrote many well-known charades, and a good description of the acted type is found in Thackeray's *Vanity Fair* In the United States a type of charade acted in dumb show (usually called simply "the game") had considerable popularity in the 1930s and 1940s

Charashim (kăr'ŭ-) [Heb ,=craftsmen, of Neh 11 35], unidentified valley, Palestine, probably near Lydda. 1 Chron 4 14

Charcas (chăr'kăs), Spanish colonial *audiencia* and presidency in South America, known also as Upper Peru and Chuquisaca Charcas roughly corresponded to modern Bolivia, but included parts of present Argentina, Chile, Peru, and Paraguay, a territorial jurisdiction leading to disputes and wars after independence had been won It was established in 1559 and was attached to the viceroyalty of Peru until joined (1776) to the newly created vice royalty of La Plata The city of SUCRE was sometimes called Charcas

Charchemish, ancient city see CARCHEMISH

charcoal, substance obtained by the destructive DISTILLATION chiefly of wood, but also of animal matter and sugar It is largely pure CARBON The most common variety, wood charcoal, was formerly obtained by piling wood into stacks, covering it with earth or turf, and setting it on fire, by this process the non-carbonaceous elements in the wood passed off as vapors into the air, some of the carbon was utilized as fuel, and the remaining carbon was converted into charcoal In factories the wood is raised to a high temperature in an iron retort, and the industrially important by-products —among them METHYL ALCOHOL, ACETONE, and ACETIC ACID— are saved, though synthetic production of acetic acid and methyl alcohol has largely replaced the distillation method Charcoal obtained from bones is called bone black, animal black, or animal charcoal Being almost pure carbon, charcoal yields a larger amount of heat in proportion to its volume than the corresponding amount of wood would yield, as a fuel, it has the further advantage of being smokeless It is used also in the manufacture of gunpowder Charcoal's porous structure makes it a highly efficient agent for the ABSORPTION of solids from solution and of gases, it is used in sugar refining, in water purification, and in the purification of factory air It is also useful in gas masks By special heating processes the adsorptive property can be greatly increased, charcoal so treated is known as activated charcoal

Charcot, Jean Baptiste (zhă' bătēst' sharkō'), 1867–1936, French explorer in the antarctic regions, son of Jean Martin Charcot In two voyages (1903–7, 1908–10) he surveyed the coast of Antarctica from Palmer Peninsula to Charcot Land, obtaining valuable scientific data He was exploring in the arctic when he went down with his ship, the *Pourquois Pas?*, off the coast of Iceland His antarctic voyages were recorded in his *Le Pourquois Pas? dans l'antarctique* (1910, Eng tr , *The Voyage of the Why Not? in the Antarctic*, 1911).

Charcot, Jean Martin (mārtē'), 1825–93, French neurologist. He developed at the Salpêtrière in Paris the greatest clinic of his time for diseases of the nervous system He made many important observations on these diseases, described the characteristics of the condition known as *tabes dorsalis*, differentiated multiple sclerosis and *paralysis agitans*, and wrote on many neurological subjects Charcot's insight into the nature of hysteria is credited by Sigmund Freud, his pupil, as having contributed to the early psychoanalytic formulations on the subject

chard. see ARTICHOKE and BEET

Chardin, Jean Baptiste (shă' bătēst' shărdĕ'), 1699–1779, French painter He is famous for the still lifes and domestic interiors which he painted directly from his own immediate surroundings Content with a modest success and a tranquil, bourgeois existence, Chardin nevertheless ranks as one of the greatest French colorists Well-known examples of his work are *The Buffet* and *Le Bénédicité* (both Louvre). He is represented in the National Gallery, London, the National Gallery of Art, Washington, D C , the Metropolitan Museum of Art, and the Museum of Fine Arts, Boston

Chardon (shăr'dŭn), village (pop 2,001), co seat of Geauga co , NE Ohio, NE of Cleveland, laid out c.1808 It is a maple syrup and sugar center.

Chardzhou (chŭrjŏō'), city (pop 54,739), capital of Chardzhou oblast, Turkmen SSR, on the Trans-Caspian RR and the Amu Darya river. It is an inland port and an industrial center with cotton, silk, and other manufactures.

Charente (shărăt'), department (2,306 sq mi ; pop. 311,137), W France. ANGOULÊME (the capital) and COGNAC are the chief cities

Charente, river rising W of Limoges, France, and winding 220 mi W to the Atlantic past Angoulême, Cognac, Saintes, and Rochefort Along its western course are the celebrated vineyards from which cognac is made

Charente-Maritime (-mărētēm'), department (2,-792 sq mi , pop 416,187), W France, on the Atlantic coast, formerly Charente-Inférieure It occupies the former provinces of SAINTONGE and AUNIS La Rochelle is the capital

Chares (kā'rēz, kă'-), 3d cent B C , Greek worker in bronze of Lindus, Rhodes, pupil of Lysippus He was sculptor of the COLOSSUS OF RHODES, and is said to have been founder of the Rhodian school of sculpture

Charette de la Contrie, François Athanase (frāswä' ătänäz' shărĕt' du là kōtrē'), 1763–96, French royalist and counterrevolutionary general in the VENDÉE Charette served with Cathelineau and La Rochejaquelein and was chief commander against the army of the republic He was captured by the republicans and shot

chargé d'affaires: see DIPLOMATIC SERVICE

Charing Cross (chăr'ĭng, chār'-), open space at the west end of the Strand, London, near Trafalgar Square One of the Eleanor Crosses (see ELEANOR OF CASTILE) was erected here Charing Cross station is one of London's busiest terminals Charing Cross Hospital is near by

chariot (chă'rēut), the earliest and simplest type of carriage and the chief vehicle of the ancients It was known among the Babylonians before the introduction of horses c 2000 B C , being drawn by asses in the early period The chariot and horse introduced into Egypt c 1700 B C by the Hyksos invaders doubtless contributed to their military success Simultaneously the use of the chariot spread over the Near East, chiefly, at first, as a war machine The Assyrians are charged with introducing chariots with scythes mounted on the wheels as weapons, a type later adopted by the Persians In Greece and Rome the chariot was never used to any extent in war, possibly because of generally unfavorable topography It was, however, prominent in games and processions, becoming in Rome the inevitable carriage of the triumphal procession Here also the chariot races of the circus were developed The ancient chariot was a very light vehicle, drawn by two or more horses hitched side by side The car was little else than a floor with a waist-high semicircular guard in front British chariots were open in front, had a curved wall behind, often had seats, and sometimes had scythes on the wheels

Charis (kā'rĭs) [Gr ,=grace], in Greek religion, beautiful goddess, wife of Hephaestus In late myths the **Charites** (kăr'ītēz) personify beauty and charm (see GRACES)

Charlton (shă'rltŭn), city (pop 5,754), co seat of Lucas co , S Iowa, W of Ottumwa, inc 1857 It is a farm trade and coal-mining center with railroad shops and various manufacturing plants Its public utilities are city owned Red Haw Hill State Park is near by

charity, public, organized relief of human disease, poverty, and misery Among the Greeks and Romans public charity was devoted chiefly to the citizens It was early connected with religion, as among the Hebrews and, from them, among the Christians and later the Mohammedans The Christian Church was the main dispenser of charity in the Middle Ages, supplemented by the guilds Later, national and lesser governmental agencies, as well as many private agencies, took over much of the charitable activity of the Church First of the state efforts was the Elizabethan POOR LAW of 1601, which attempted to classify dependents and provide special treatment for each group During the Industrial Revolution the entrepreneurs opposed state charity, while the rise of democracy favored it The charity organization movement was formed primarily to oppose state charity In 1909 the report of the British Poor Law Commission favored greater state administration of charity as a proper part of the state's functions In the United States public charity has come more and more under state and Federal control, although philanthropic agencies still play a major role in its distribution (see SOCIAL WORK) Modern charities may be listed as the care of destitute adults, the treatment of the defective, insane, feeble-minded, and criminal, the care of the sick in hospitals and dispensaries and through visiting nurses, the care of destitute, neglected, and delinquent children, the care and relief of needy families, and supervisory, educational, preventive, and constructive activity After the Second World War the care of REFUGEES was a burden assumed by international relief agencies such as the RED CROSS and especially by the Jewish welfare agencies See A C. Millspaugh, *Public Welfare Organization* (1935).

charity organization society, private, civic association for the relief and cure of poverty, also called associated charities, bureau of charities, and united charities. Developed out of the organized relief societies and the associations for improving the condition of the poor, such societies do not stress the giving of relief so much as the organization of relief in a plan which includes the work of all the relief societies in a city in order to prevent overlapping, duplication, and neglect. The first such society, formed in London in 1869, was known as the Society for Organizing Charitable Relief and Suppressing Mendicancy The first in the United States was organized at Buffalo in 1877

Charlemagne (shär'lumān) (Charles the Great or Charles I) [O Fr ,=Charles the great], 742–814, emperor of the West (800–814), Frankish king (768–814) The elder son of PEPIN THE SHORT and grandson of Charles Martel, he shared with his brother Carloman in the succession of his father's kingdom At Carloman's death (771), Charles was proclaimed sole king of the Franks War breaking out between DESIDERIUS, king of the Lombards, who had been persuaded to support the claims of Carloman's two young sons, and Pope ADRIAN I, who had refused support, Charles intervened on the side of the pope (773) At Rome, he received the title patrician of the Romans from the pope, and confirmed his father's donation to the Holy See Shortly afterwards he took Pavia and assumed the iron crowns of the Lombard kings In 778 he invaded Spain, he was repulsed by the Moors at Saragossa but kept Navarre and the "Spanish March," including Pamplona and Barcelona Charles's struggle with the pagan Saxons, whose greatest leader was WIDUKIND, lasted from 772 till 804 By dint of forced conversions, wholesale massacres, and the transportation of thousands of Saxons to the interior of the Frankish kingdom, Charles made his domination over Saxony complete He also warred successfully against the Avars and the Slavs, advancing as far east as Pomerania Meanwhile the new pope, LEO III, was threatened with deposition by the Romans and appealed to Charles (799). Charles hastened to Rome to support Leo, and on Christmas day, 800, was crowned emperor by the pope The pretext for his coronation was his refusal to recognize IRENE as empress of the East However, when he received *de facto* recognition of his imperial dignity from Emperor Michael I of the East (812), he implicitly recognized the division of the empire The occasion of the mutual recognition was the cession of Venice and Dalmatia to Charles The end of Charles's reign was troubled by the raids of Norse and Danish pirates (see NORSEMEN), and Charles took vigorous measures for the construction of a fleet, which his successors neglected His land frontiers he had already protected by the creation of marches In his government he continued and systematized the administrative machinery of his predecessors He left conquered peoples in possession of their own laws, which he codified when possible, and he issued many CAPITULARIES (gathered in the MONUMENTA GERMANIAE HISTORICA) A noteworthy achievement was the creation of a system by which he might personally supervise his administrators in even the most distant lands, his *missi dominici* were personal representatives with wide powers who regularly inspected their assigned districts His preoccupation with the welfare of the poor and the prevention of abuses is evident in numerous letters and instructions Charlemagne also held general consultative assemblies at least once a year and called religious councils to settle theological controversies He tried to purify the church and made his consent necessary to the election of bishops Military obligation he based on ownership of land, furthermore, he taxed movable goods and benefices Many were forced into bondage to escape this burden, which he later modified He stimulated foreign trade and entertained friendly relations with England and with Harun ar-Rashid In 813 Charlemagne designated his son LOUIS I as his imperial consort and successor and crowned him at Aachen, thus founding the Carolingian dynasty (see CAROLINGIANS) Charlemagne's court at AACHEN was the center of a considerable intellectual quickening The palace school, under the leadership of ALCUIN, became particularly famous, but of greater significance were the numerous schools established throughout the empire during Charles's reign for the instruction of children of all classes The preservation of classical literature was due almost entirely to his initiative Among the prominent figures of the Carolingian renaissance, other than Alcuin, were PAUL THE DEACON, EINHARD, and Peter of Pisa Charlemagne himself, though scarcely to be considered educated by later standards, showed great taste for learning and strove for purity in his Latin In his daily life, he affected the simple manners of his Frankish forebears, wore Frankish clothes, and led a frugal existence, except for his habit of keeping several wives and concubines He was beatified after his death and in some churches has been honored as a saint His physical appearance probably differed vastly from the bearded and patriarchal figure of the legend Indeed, Charlemagne's actual achievements and prestige were of such magnitude that later generations enlarged them to fantastic proportions. Surrounded by his legendary twelve peers, he became the central figure of a

cycle of romance At first, legend pictured him as the champion of Christendom, later he appeared as a vacillating old man, almost a comic figure. His characterization in the *Chanson de Roland* (see ROLAND) has impressed itself indelibly on the imagination of the Western world The vogue of the Charlemagne epic ebbed somewhat after the Renaissance, but was revived again in the 19th cent by Victor Hugo and other members of the Romantic school Charlemagne's creation (or re-creation) of an empire was the basis of the theory of the HOLY ROMAN EMPIRE, it was his example that Napoleon I had in mind when he tried to assume his succession in 1804 See the biography by Einhard, F Funck-Brentano, *Earliest Times* (Vol I of *National History of France*), Thomas Hodgkin, *Charles the Great* (1877) For the literary aspect, see Thomas Bulfinch, *Legends of Charlemagne* (1863), and J L Weston, *The Romance Cycle of Charlemagne and His Peers* (1901)

Charlemagne, village (pop 1,150), S Que, on the west shore of the St Lawrence N of Montreal

Charleroi (shärlûrwä'), town (pop 27,401), Hainaut prov, S central Belgium, on the Sambre river and on the Charleroi-Brussels Canal Today a coal-mining and steel-milling center, it was a village in the Middle Ages, but proximity to France gave it military importance; the Spanish fortified it in 1666, and it was prominent in the warfare of the 17th and 18th cent Here the Germans won a victory (1914) in the First World War

Charleroi (shärlûroi', shär'luroi), borough (pop 10,784), SW Pa, S of Pittsburgh and on the Monongahela; laid out 1890, inc 1892 It has glass-works and ironworks, and coal mining is done here

Charles I, emperor and Frankish king see CHARLEMAGNE.

Charles II or **Charles the Bald,** 823–77, emperor (875–77), king of the West Franks (843–77), son of Emperor LOUIS I by a second marriage The efforts of Louis to create a kingdom for Charles were responsible for the repeated revolts of Louis's elder sons which disturbed the latter part of his reign When LOTHAIR I attempted to reunite the empire after Louis's death, Charles and LOUIS THE GERMAN marched against their brother and defeated him at Fontenoy (841) Reaffirming their alliance in 842 (see STRASBOURG, OATH OF), they signed (843) with Lothar the Treaty of Verdun, dividing the empire into three parts The part roughly corresponding to modern France fell to Charles He was almost continuously at war with his brothers and their sons, with the Normans, and with rebellious subjects When Charles's nephew LOTHAIR, king of Lotharingia, died in 869, Charles seized his kingdom, but was forced by the Treaty of Mersen (870) to divide it with Louis the German In 875, at the death of his nephew Emperor Louis II, Charles secured the imperial crown His reign witnessed the growth of the power of the nobles at the expense of the royal power and thus marked the rise of feudalism Charles's chief adviser was Archbishop HINCMAR

Charles III or **Charles the Fat,** 839–88, emperor (881–87), king of Italy (879–87), king of France (885–87), son of LOUIS THE GERMAN, at whose death he inherited Swabia (876) In 886, when he went to relieve Paris, which was besieged by the Normans, he ransomed the city instead of fighting and allowed the Normans to ravage Burgundy He was deposed in 887 and was succeeded in France by EUDES and in Germany by ARNULF, while Italy remained in a state of anarchy

Charles IV, 1316–78, emperor (1355–78) and German king (1346–78), king of Bohemia (1346–78). The son of JOHN OF LUXEMBURG, he was educated at the French court and fought the English at Crécy, where his father's heroic death made him king of Bohemia Pope CLEMENT VI, to whom he had promised far-reaching concessions, helped secure his election (1346) as antiking to Emperor LOUIS IV Louis's death (1347), the popular desire for peace, which was fostered by the ravages of the Black Death, and the absence of a strong leader to unite the opposition enabled Charles to make good his claim to the crown by 1349 Germany being restored to peace (1354), he was crowned emperor in Rome on Easter Sunday, in 1355, by the papal legate (the pope was then residing at Avignon) In 1356 he promulgated the Golden Bull (see ELECTORS), by which the method of electing an emperor was fixed Charles rounded out his family possessions by acquiring, through skillful diplomacy, the margraviate of Brandenburg (1373) and by adding to his territories in Silesia and Lusatia Though he had virtually renounced imperial pretensions in Italy through his treaty with Clement VI, Charles supported the plans of Urban V to return the papacy from Avignon to Rome His intervention in Italy (1368), however, was chiefly a pretext for extorting tribute from the cities in exchange for their freedom To strengthen his dynasty, he had his son WENCESLAUS elected German king (1376) The election necessitated considerable bribing of the electors, contrary to the provisions of Charles's own Golden Bull, and led to a revolt of the Swabian cities, but Charles finally obtained peace by granting them large concessions Bohemia reached its greatest flowering under Charles's rule. He greatly embellished his capital, Prague, where many landmarks bear his name, founded (1348) the university at Prague (the oldest in Central Europe), and rebuilt the Cathedral of St Vitus. By introducing new agricultural methods and by expanding industries, he fostered the economic life in his crownlands He drew up a code of laws, the *Maiestas Carolina* (1350)—which was, however, rejected by the nobles—and he protected the lower classes by giving them courts in which to sue their overlords With the Church he always sought to maintain friendly relations As Holy Roman emperor, his reputation rests mainly on the Golden Bull, which, though it confirmed the weakness of the imperial power, provided a stable constitutional foundation for its exercise See biographies by G G Walsh (1924) and Bede Jarrett (with a translation of Charles's autobiography, 1935)

Charles V, 1500–1558, emperor (1519–58), and, as Charles I, king of Spain (1516–56), son of PHILIP I and JOANNA of Castile, grandson of Ferdinand V of Aragon, Isabella of Castile, Emperor Maximilian I, and Mary of Burgundy He inherited an empire on which "the sun never set" The Netherlands, Luxembourg, Artois, and Franche-Comté came to him on the death (1506) of his father Aragon, Navarre, Granada, Naples, Sicily, Sardinia, Spanish America, and joint kingship with his insane mother over Castile devolved upon him at the death (1516) of Ferdinand V, from his accession the Spanish kingdoms remained united On the death (1519) of Maximilian I he inherited the Hapsburg lands and was elected emperor Born and raised at Ghent, Charles was brought up as a Fleming His aunt, MARGARET OF AUSTRIA, was regent for him in the Netherlands She and his tutor, Adrian of Utrecht (later Pope ADRIAN VI), were the chief influences on the youth Arriving in Spain in 1517, Charles was distrusted as a foreigner His brusque dismissal of Cardinal JIMÉNEZ, his hasty appointments of Flemish favorites to high offices, and his departure (1520) for Germany to be crowned and to undertake his imperial duties heightened the resentment Moreover, Charles was beset from the start by financial difficulties In the imperial elections he had defeated his chief rivals, Francis I of France and Henry VIII of England, through the aid of the Swabian League and the Augsburg banking houses of FUGGER and WELSER, their enormous loans had enabled him to bribe the electors Shortly after his election he began his lifelong struggle with France (see FRANCIS I and HENRY II of France and ITALIAN WARS), which required immense expenditures In 1520 he signed with HENRY VIII the Treaty of Gravelines, which undid the results of the meeting on the FIELD OF THE CLOTH OF GOLD, and in 1521 he invaded N Italy, then controlled by France The fiscal onus rested on Spain and provoked violent reaction Toledo, Segovia, and other Castilian cities revolted in the brief war of the *comunidades* (1520–21) A bold program for limiting the royal power and violent class warfare marked the rising, which was put down by the battle of Villalar and by the execution of Juan de PADILLA and other leaders Charles later won the reliable loyalty of his Spanish subjects, whose national traits and religious zeal became his own In Germany, at the fateful Diet of WORMS (1521), Charles secured a satisfactory compromise regarding the REICHSREGIMENT, but unyieldingly opposed the doctrines of Martin LUTHER In his written opinion he declared himself ready to stake his dominions, friends, blood, life, and soul on the extinction of heresy Late in May, 1521, he signed the Edict of Worms, outlawing Luther and his followers, and entered a secret alliance with Pope LEO X In Italy, Charles seemed triumphant when Francis I, captured (1525) at Pavia, signed the humiliating Treaty of Madrid (1526) When Francis repudiated it and persuaded Pope CLEMENT VII to join the anti-imperial League of Cognac, Charles sent a German army, composed mostly of Lutherans, to Italy Its first commander, FRUNDSBERG, was succeeded by Charles de BOURBON, who led the semi-mutinous host to Rome (1527) The ensuing sack of Rome (the "German Fury") was disavowed by the emperor, who nevertheless profited from the outrage by extorting large sums from the pope The Treaty of CAMBRAI with France and the Peace of Barcelona with the pope (both in 1529) confirmed Charles's position in Italy and secured his coronation as emperor at Bologna (1530) Charles was the last German emperor to be crowned by the pope His brother Ferdinand, king of Bohemia and Hungary (later Emperor FERDINAND I), was elected king of the Romans in 1531 Charles, who had awarded him the Austrian duchies in 1521, delegated increasing authority to him in Germany, then torn by religious and social struggles The rebellion (1522–23) of Franz von SICKINGEN was followed by the more serious PEASANTS' WAR (1524–25), and the Swabian League in 1531 made way for the Lutheran SCHMALKALDIC LEAGUE. The REFORMATION progressed, and the breach between Catholics and Protestants widened. Before dealing with the religious problem, Charles had to make peace abroad. Francis I, allied with Sultan SULEIMAN I, having renewed warfare, Charles allied himself (1543) with Henry VIII and in 1544 forced Francis to make peace at CRÉPY. A truce with Turkey, however humiliating, gave Charles and Ferdinand some respite. At last the way opened for the Catholic REFORM, ardently desired by Charles and forwarded by St. Ignatius of Loyola, when the Council of Trent (see TRENT, COUNCIL OF) convened in 1545. Turning on the Protestant princes of Germany, Charles split their ranks by winning over MAURICE of Saxony and others, attacked the Schmalkaldic League in 1546, defeated JOHN FREDERICK of Saxony at Mühlberg (1547), and captured PHILIP OF HESSE He was at the summit of his power. At the Diet of Augsburg (1547) he secured the incorporation of the Netherlands into the Hapsburg hereditary possessions and forced through the Augsburg Interim (1548), the compromise profession of doctrine he now tried to impose on the Protestants with the help of Spanish troops In 1552 Maurice of Saxony changed sides again, called in Henry II of France, and even attempted to capture Charles at Innsbruck Balked in his efforts to recapture METZ from the French, and realising the necessity of compromising with Protestantism, Charles preferred to empower Ferdinand to treat and left Germany, never to return Ferdinand negotiated the religious Peace of AUGSBURG, but war with France ended only after Charles's death, with the Treaty of CATEAU-CAMBRÉSIS (1559), a triumph for Spain Charles now began a series of abdications which left the Hapsburg dominions divided between Austria and Spain In 1554 he gave Naples and Milan to his son Philip, whom he married to Queen MARY of England; in 1555 he turned over the Netherlands to Philip, and in 1556 he made him king of Spain and Sicily as Philip II In 1556 also he practically surrendered the empire to Ferdinand, and in 1558 he formally abdicated as emperor Though he retired (1556) to the monastery of Yuste, he took an active interest in politics until his death Two of his natural children were Don JOHN OF AUSTRIA and MARGARET OF PARMA During Charles's rule the Spanish Empire was tremendously expanded by the conquest of Mexico by CORTÉS and of Peru by Francisco PIZZARO and by the expeditions of DE SOTO, CORONADO, PONCE DE LEÓN, and Sebastian CABOT MAGELLAN circumnavigated the globe under Charles's auspices In Italy, Spanish power had become paramount Even England seemed about to fall to Spain through Philip's marriage, and Charles's own marriage with Isabella of Portugal brought the Portuguese crown to Philip in 1580 Yet in his chief purpose, the return of the Protestants to the Church, he failed utterly, and in the glory he brought to Spain the germs of its decay, through depopulation and a superabundance of gold, were concealed Charles's integrity, strength of will, and sense of duty were conspicuous His appearance has been made familiar by two portraits by TITIAN See biographies by W R Robertson (3 vols, 1857), Edward Armstrong (2 vols, 1902) and Karl Brandi (Eng tr, 1940), R B Merriman, *Rise of the Spanish Empire*, Vol III (1926)

Charles VI, 1685–1740, emperor (1711–40), king of Bohemia and, as Charles III, king of Hungary, brother and successor of Emperor Joseph I, last emperor of the direct Hapsburg line Before his accession he claimed the succession of CHARLES II of Spain, thus embroiling the empire in the War of the SPANISH SUCCESSION The treaties (1713–14) of Utrecht, Rastatt, and Baden (see UTRECHT, PEACE OF) gave Austria most of the Spanish possessions in the Low Countries and in Italy, but Spain itself remained with Charles's rival, PHILIP V Philip's attempts to overthrow the settlement resulted (1718) in the formation of the Quadruple Alliance of England, France, the Netherlands, and the emperor The Treaty of the Hague (1720) repeated the terms of 1713–14, except that Charles obtained Sicily from SAVOY in exchange for Sardinia The War of the POLISH SUCCESSION again involved Charles in war with France and Spain. The Treaty of Vienna (1738), in a complex exchange of territories, gave Sicily and Naples to Spain, Parma and Piacenza to the house of Austria, and Tuscany to Francis, duke of Lorraine (later Emperor FRANCIS I), who had married (1736) Charles's daughter, MARIA THERESA. Without male issue, Charles made his own succession the chief of his many dynastic preoccupations. His last years were consumed by efforts to secure European recognition of the PRAGMATIC SANCTION of 1724, by which he sought to insure the succession of his daughter to the Hapsburg lands Though the Pragmatic Sanction was guaranteed by the Treaty of Vienna, the succession was contested on his death (see AUSTRIAN SUCCESSION, WAR OF THE) In his early wars, Charles was well served by Prince EUGENE OF SAVOY. By the Treaty of Passarowitz (1718) Eugene won for Hungary the Banat and N Serbia from the Turks A less well-conducted campaign, begun in alliance with Russia in 1737, ended with the separate

Treaty of Belgrade (1739), which restored most of Eugene's conquest to the sultan. Charles was a patron of learning and the arts, particularly of music.

Charles VII, 1697–1745, emperor (1742–45) and, as Charles Albert, elector of Bavaria (1726–45). Having married a daughter of Emperor Joseph I, he refused to recognise the PRAGMATIC SANCTION by which Emperor Charles VI (his wife's uncle) reserved the succession to the Hapsburg lands for his daughter, MARIA THERESA On Charles VI's death (1740) he advanced his own claim and joined with Frederick II (of Prussia), France, Spain, and Saxony to attack Maria Theresa (see AUSTRIAN SUCCESSION, WAR OF THE) In 1742 he was elected emperor, but Bavaria was overrun by Austrian troops Shortly before his death he regained his territories Francis I, husband of Maria Theresa, was elected emperor to succeed him

Charles I, 1887–1922, last emperor of Austria and, as Charles IV, king of Hungary (1916–18), son of Archduke Otto and grandnephew and successor of Francis Joseph He married ZITA of Bourbon-Parma. The death (1914) of his uncle, FRANCIS FERDINAND, made Charles heir to the throne He showed skill as a commander in the First World War After his accession he put out peace feelers His correspondence with his brother-in-law, Prince SIXTUS OF BOURBON-PARMA, when published by the Allies, caused friction between Austria and Germany and diminished Charles's popularity Charles vainly tried to save the AUSTRO-HUNGARIAN MONARCHY by proclaiming (Oct 16, 1918) an Austrian federative state Within a few days Hungary and Czechoslovakia declared their independence, and on Nov 3 Charles had to consent to the unconditional surrender in the armistice concluded with General Armando DIAZ On Nov 11 Charles abdicated as emperor of AUSTRIA, and on Nov 13 as king of HUNGARY, early in 1919 he and his family went into exile in Switzerland The triumph of the monarchists in Hungary in 1920 encouraged him to attempt to regain that throne He arrived in Hungary in March, 1921, but he left again when the regent, HORTHY, and the premier, Stephen BETHLEN, refused their support In Oct, 1921, Charles tried again, landing in an airplane at Sopron and leading a small improvised force on Budapest Yugoslavia and Czechoslovakia ordered mobilization, and Horthy had Charles arrested Charles was exiled to Madeira, where he died of pneumonia His son, Archduke OTTO, inherited his claim to the throne See biography by Herbert Vivian (1932)

Charles I, 1600–1649 king of England, Scotland, and Ireland (1625–49), second son of James I and Anne of Denmark, b Dunfermline He was made the duke of Albany, became heir to the throne on the death of his brother Henry (1612), and was made prince of Wales in 1616 The negotiations for his marriage to the Spanish infanta were unpopular in England, and Charles himself turned against Spain after his unhappy visit to Madrid, in the company of George Villiers, duke of BUCKINGHAM (1623), when he tried to arrange the affair personally Aside from these negotiations, he took little part in politics before he succeeded his father as king (1625) He was popular at that time, but immediately offended English opinion by his marriage to the Catholic Henrietta Maria, sister of Louis XIII of France This French and Catholic influence not only brought him the ill will of his Protestant subjects, but probably contributed to the religious problems of his sons, Charles II and James II Charles's favorite, Buckingham, was unpopular, and the foreign ventures under Buckingham's guidance were unfortunate, particularly the unsuccessful expedition to Cádiz (1625) and the attempt to aid the French Protestants by sending a fleet to Ré (1627–28) Nor would Parliament willingly grant money for Charles's sister, Elizabeth of Bohemia, and the Protestants in the Thirty Years War The reign quickly resolved itself into the bitter struggle for supremacy between the king and Parliament that is called the PURITAN REVOLUTION (though religion was but one element in the controversy) The House of Commons, mainly representing wealthy merchants and country gentlemen, was largely Calvinist in sympathy, and many of the lords also were Puritans Charles was an advocate of episcopacy and supported his bishops Parliament had the whip hand in its control of money grants to the king, who was in his turn responsible for the defense of the realm and foreign relations, and Parliament refused grants until its grievances were redressed The Parliament of 1625 refused money, demanded ministers it could trust, and was soon dissolved by Charles That of 1626 was dissolved when it started impeachment proceedings against Buckingham Charles, to meet his needs for money, resorted to quartering troops upon the people and to a forced loan, which he attempted to collect by arbitrary prosecutions and imprisonments. Forced to call Parliament again in 1628, he was compelled to agree to the PETITION OF RIGHT, one of the most important of English constitutional documents. In violation of its spirit, Charles continued to collect taxes called tonnage and poundage, unauthorised by Parliament Although Buckingham was assassinated (1628), the parliamentary session of 1629 was bitter. It closed dramatically with a resolution condemning unauthorised taxation as well as attempts to change the existing church practices Charles then governed personally without Parliament for 11 years, which were marked by popular opposition to strict enforcement of the practices of the Established Church by Archbishop William LAUD and to the ingenious devices employed by the government to obtain funds Because of the royally controlled courts of high commission and Star Chamber, civil and religious liberties were at a low point, and large emigrations to America, of both Catholics and Puritans, took place. The trial (1637–38) of John HAMPDEN for refusal to pay ship money greatly increased public indignation. Meanwhile Charles's lieutenant in Ireland, Thomas Wentworth, earl of STRAFFORD, was pursuing his oppressive policy of "Thorough" Conditions in England reached a crisis when Charles attempted to force episcopacy upon the Scots, an attempt which was violently opposed by the COVENANTERS and which resulted in the first Bishops' War Unable to make war effectively, Charles summoned (1640) the so-called Short Parliament This body demanded redress of grievances before granting funds and was dissolved Another attempt to wage war without Parliament failed, in spite of vigorous efforts by Charles and Strafford, and the famous Long Parliament was summoned (1640) Under the leadership of John PYM, John Hampden, and Sir Henry VANE, Parliament secured itself against dissolution without its own consent and brought about the death of Strafford, the abolition of the courts of high commission and Star Chamber, and the end of arbitrary taxation In 1641 the Grand Remonstrance, aimed at religious and administrative reforms, was presented to the king Charles professed to accept the revolutionary legislation, but his queen was implicated in the army plot to get rid of Parliament, and Charles was, quite unjustly, suspected of complicity in the Irish massacre (1641) of Protestants in Ulster Hysterical fear of a militarist-royalist-Catholic reign of terror seems to have swept England, and Charles's unsuccessful attempt to seize five opposition members of Parliament in violation of traditional privilege was the fatal blunder that precipitated civil war There were no decisive victories until he was defeated at Marston Moor (1644) and Naseby (1645) In 1646 Charles gave himself up to the Scottish army and in 1647, left behind in England, fell into the hands of Parliament He ultimately was taken over by the English army leaders, who were now highly suspicious of both king and Parliament He escaped once to Carisbrooke, Isle of Wight, but was treated as a prisoner rather than king there His attempted coalition between royalists and Presbyterians was broken by the army He was tried by a high court of justice (see REGICIDES), specially constituted by the Rump Parliament for the purpose and controlled by his most powerful enemies, and was convicted of treason for levying war against Parliament He was beheaded, Jan 30, 1649 To the royalists he became the martyred king who wrote the EIKON BASILIKE By his opponents he was considered a double-dealing tyrant He had, however, lived in a period of intense religious passions and rapid political development which he proved unable to control Whether or not a straightforward and liberal policy toward Parliament and Puritans would have prevented the war, certainly such a policy was temperamentally impossible for Charles. His judgment and will were too feeble to protect him against unwise advice and dangerous halfway measures that undermined confidence in him His political necessities led him to violate a concept of constitutional government that was rapidly gaining ground in the minds of a powerful group of his subjects, although his own view of the constitution was by no means so indefensible as the 19th-century historians maintained See S. R Gardiner, *History of England*, 1603–1642 (10 vols, 1883–84) and *History of the Great Civil War* (4 vols, 1893); G. M Trevelyan, *England under the Stuarts* (rev ed, 1930), Geoffrey Davies, *The Early Stuarts* (1937).

Charles II, 1630–85, king of England, Scotland, and Ireland (1660–85), second son of Charles I and Henrietta Maria He was brought up in the care of several courtiers At the time of the Puritan Revolution, Charles was sent (1645) to the west of England with his council, which included Edward Hyde and Thomas Wriothesley, earl of Southampton. In 1646 Charles was forced to escape to France, where he stayed with his mother and was tutored by the philosopher Thomas Hobbes. In 1649 Charles vainly attempted to save his father by presenting to Parliament a signed sheet of paper for whatever terms might be put thereon After his father's execution (1649), Charles was proclaimed king in Scotland and in parts of England and Ireland He accepted the terms of the Scottish Covenanters and went to Scotland (1650), where he was crowned (1651), after agreeing to support Presbyterianism in England as well as in Scotland. Charles in 1651 marched into England but was defeated by Oliver Cromwell at the battle of Worcester, after which Charles made an adventurous escape to France There he lived in comparative poverty. The Anglo-French negotiations of 1654 forced Charles into Germany, but he removed to the Spanish Netherlands after he had concluded a treaty with Spain (1656) In 1660 the restoration of the king, engineered by General MONCK and aided by Charles's conciliatory Declaration of Breda, was effected Edward Hyde, the king's companion in exile, was created earl of CLARENDON and made first minister The REGICIDES, despite Charles's desire for leniency, were prosecuted Episcopacy was restored and nonconformity in religion was greatly weakened by the CLARENDON CODE. The foreign policy enacted by the Commonwealth government in the Navigation Act of 1651 was confirmed by Charles's government in its NAVIGATION ACTS of 1661 and 1662. The king's leanings toward Roman Catholicism led him to favor religious toleration, but this was strongly opposed, with the consequent branching-off of the nonconformists and dissenters, who formed an opposition that was later to develop into the WHIG party In 1662 he married Catherine of Braganza The year 1664 saw the outbreak of the second DUTCH WAR, followed by the great London plague of 1665 and the fire of 1666 The Dutch War ended indecisively with the Treaty of Breda in 1667, the year that saw the fall of Clarendon and the rise of the CABAL ministry Charles placed England in the Triple Alliance with Holland and Sweden (1668), although he sought the support of Louis XIV of France, with whom he negotiated the secret Treaty of Dover (1670), by this Charles was to adopt Catholicism and wage war against the Dutch, for which Louis was to advance £150,000 and 6,000 men The impending third Dutch War began in 1672, and though it established English naval supremacy, it proved unpopular at home Charles was forced to rescind his declaration of indulgence (1672) toward nonconformists, to approve the TEST ACT, and to make peace (1674) with the Dutch Thomas Osborne, earl of DANBY, became chief minister, and Charles, unable to secure supplies from Parliament, agreed (1676), in consideration of a large subsidy, not to contract foreign alliances without the consent of Louis XIV, although Charles feigned sympathy with the anti-French movement at home His alliance with Louis, however, was broken by the marriage of his niece Mary to William of Orange (later WILLIAM III) Charles intervened in the Popish Plot (see OATES, TITUS) affair only when the queen was accused The Exclusion Bill to bar the Catholic duke of York (later JAMES II) from the throne in favor of James Scott, duke of MONMOUTH, was brought forward by Anthony Cooper, earl of SHAFTESBURY, but was blocked by Charles's dissolution of Parliament (1681) Thenceforth Charles's rule was absolute Opposition Whigs unsuccessfully attempted to seize the king in the RYE HOUSE PLOT two years before Charles, professing the Roman Catholic faith, died and was succeeded by his brother James He had no legitimate offspring but several natural children by his various mistresses, who included Lucy WALTER, Barbara Villiers, duchess of CLEVELAND, Louise Keroualle, duchess of PORTSMOUTH, and Nell GWYNN His reign was marked by a gradual increase in parliamentary power, the rise of the great political parties, the advance of colonization and trade in India, America, and the East Indies, and the great progress of England as a sea power The pleasure-loving and immoral character of the king, as opposed to his political wisdom, set the tone of the brilliant RESTORATION period See contemporary accounts by Gilbert Burnet, John Evelyn, and Samuel Pepys, biographies by Osmund Airy (1904), Arthur Bryant (1931), and John Hayward (1933), G N Clark, *The Later Stuarts* (1934), David Ogg, *England in the Reign of Charles II* (2 vols, 1935).

Charles I, Frankish king see CHARLEMAGNE

Charles II, French king see CHARLES II, emperor

Charles III or **Charles the Fat,** French king see CHARLES III, emperor.

Charles III (Charles the Simple), 879–929, French king (893–923), son of Louis II (Louis the Stammerer) He was excluded from the succession at the death of Carloman (884) and at the deposition (887) of Emperor CHARLES III (Charles the Fat), but he was crowned by a party of nobles in 893 and became sole king at the death of EUDES in 898 He put an end to the Norse raids by ceding to the Norse leader Rollo part of the territory later known as Normandy in the Treaty of Saint-Clair-sur-Epte (911) In the same year he acquired Lorraine In 922 some of the barons revolted and crowned ROBERT I, brother of Eudes, king In 923, at the battle of Soissons, Robert was killed, but Charles was defeated Subsequently RAOUL of Burgundy was elected king, and Charles was imprisoned

Charles IV (Charles the Fair), 1294–1328, king of France, youngest son of Philip IV, brother and successor (1322) of Philip V. He continued his immediate predecessor's work of strengthening the

royal power and increased the royal revenues, notably by tampering with the coinage. In 1324 Pope John XXII, having declared Emperor Louis IV deposed, offered to support Charles for emperor, but the plan came to nothing. In 1324 Charles invaded Guienne, a possession of the English king, and in 1327 compelled England to cede to France the districts around Agen and Bazas and to pay a large indemnity. Charles, the last king of the Capetian dynasty, was succeeded by Louis VIII, of the Valois line.

Charles V (Charles the Wise), 1337–80, king of France (1364–80). During the captivity of his father, JOHN II, in England (1356–60, 1364), he was forced, as regent, to deal with the JACQUERIE, with the intrigues of CHARLES II of Navarre, and with the popular movement headed by Étienne MARCEL. Becoming king in 1364, he restored the stability of the coinage and took steps to rid France of the "free companies" (*écorcheurs*) of demobilized soldiers. With the aid of his great general, Bertrand DU GUESCLIN, Charles almost succeeded in driving the English from France. Charles and his ministers, the MARMOUSETS, strengthened the royal authority, replaced feudal military service with a standing army, built a powerful navy, and instituted fiscal reforms. A patron of the arts and of learning, he established the royal library, built the Bastille, and interested himself in the embellishment of the Louvre and the construction of the palace of Saint-Pol. However, his love of pomp and lack of economy put a severe economic burden on the country throughout his reign. His son, Charles VI, succeeded him.

Charles VI (Charles the Mad or Charles the Well Beloved), 1368–1422, king of France (1380–1422), son and successor of Charles V. He married ISABEAU OF BAVARIA. During his minority he was under the tutelage of his uncles, whose policies emptied the royal treasury and provoked popular uprisings in France and Flanders. Charles freed himself of this influence in 1388, took as his counselor his brother Louis, duc d'ORLÉANS, and recalled his father's ministers, the MARMOUSETS. After 1392 Charles was subject to frequent attacks of insanity and was not active in the government. The royal princes returned to power, and the Marmousets were dismissed. Charles's reign was disturbed by the war between ARMAGNACS AND BURGUNDIANS and the invasion of France by Henry V of England. It ended two years after he had signed the ignominious Treaty of TROYES, recognizing Henry as his successor.

Charles VII (Charles the Victorious or Charles the Well Served), 1403–61, king of France (1422–61), son and successor of Charles VI. During his reign the HUNDRED YEARS WAR ended, and the English were expelled from France. Charles had been excluded from the throne by the Treaty of TROYES, but he took the royal title after his father's death (1422) and ruled south of the Loire, while Henry VI of England controlled the north and Guienne. Vacillating in disposition and subject to the influence of corrupt favorites, he waged only perfunctory warfare against the English until he was prodded into action by such energetic followers as JOAN OF ARC, ARTHUR III, duke of Brittany, DUNOIS, and LA HIRE. After the capture of Orléans, Charles was crowned at Rheims (1429). In 1435, by the Treaty of ARRAS, he won Burgundy as an ally, in 1440 the PRAGUERIE was put down, and in 1444 a truce was signed with England. By the battle of Formigny and the capture of Cherbourg (1450) the English were expelled from Normandy, and the battle of Castillon (1453) resulted in their withdrawal from Guienne. In his later years Charles, though dominated by his mistress, Agnès SOREL, proved an able administrator. He reorganized the army, upheld justice, and restored French finances by an orderly and moderate fiscal policy. Charles issued the PRAGMATIC SANCTION of Bourges in 1438. In his reign French commerce was expanded by the enterprise of Jacques CŒUR. His last years were disturbed by the constant revolts of the dauphin, who later succeeded to the throne as LOUIS XI.

Charles VIII, 1470–98, king of France (1483–98), son and successor of Louis XI. He first ruled under the regency of his sister ANNE DE BEAUJEU. Soon after his marriage to ANNE OF BRITTANY (1491), he freed himself from the influence of his sister and her husband and began to prepare for the project of conquering Naples, to which his father had acquired a claim as heir of the last surviving descendant of Louis II of Naples. Urged by Lodovico SFORZA, he invaded Italy in 1494; after a triumphal march through Pavia, Florence, and Rome, he took Naples (Feb., 1495). A league being formed against him by Milan, Venice, Ferdinand V of Spain, Emperor Maximilian I, and Pope Alexander VI (March, 1495), he was forced to a hasty retreat, in the course of which he distinguished himself against odds at the battle of Fornovo (July, 1495). The troops he had left behind in Naples were defeated, but he was forming new plans of conquest at the time of his death. He had no male issue and was succeeded by his cousin Louis XII. The conflict of France and Spain in Italy marked the beginning of the ITALIAN WARS. Charles's expedition had the positive result of introducing the Italian Renaissance into France. The history of his reign has been recorded by his contemporary, COMINES. See also J. S. C. Bridge, *A History of France from the Death of Louis XI*, Vols. I–II (1922–24).

Charles IX, 1550–74, king of France. He succeeded (1560) his brother Francis II under the regency of his mother, CATHERINE DE' MEDICI. Turning from his mother's influence, he began to follow the advice of COLIGNY. His temperament, however, was so unstable that he was easily swayed to take part in the massacre of SAINT BARTHOLOMEW'S DAY. He was the patron of the PLÉIADE. Charles IX was succeeded by his brother Henry III.

Charles X, 1757–1836, king of France (1824–30), brother of Louis XVI and of Louis XVIII, whom he succeeded. As count of Artois he headed the reactionary faction at the court of Louis XVI, left France (July, 1789) at the outbreak of the French Revolution, and became a leading spirit of the ÉMIGRÉ party in England. After his lamentable failure to aid the VENDÉE insurrection, he stayed in England until the Bourbon restoration (1814). During the reign of LOUIS XVIII he headed the ultraroyalist opposition, which triumphed after the assassination (1820) of Charles's son, the duc de BERRY. The event caused the fall of the DECAZES ministry and the advent of VILLÈLE, who continued as chief minister after Charles's accession. Among the many attempts of Charles and Villèle to reestablish the *ancien régime*, the law (1825) indemnifying the émigrés for lands confiscated during the French Revolution met particular disapproval, especially because the middle class was hit by the consequent reduction of interest on government bonds. The rising capitalist forces and the liberal press joined in attacking the Villèle cabinet, which resigned in 1827. Its successor, under MARTIGNAC, vainly tried to steer a middle course, and in 1829 Charles appointed an uncompromising reactionary, Jules Armand de POLIGNAC, as chief minister. To divert attention from internal affairs Polignac initiated the French venture in ALGERIA. However, his dissolution (March, 1830) of the liberal chamber of deputies and his drastic July Ordinances resulted in the JULY REVOLUTION. Charles abdicated in favor of his grandson, the comte de CHAMBORD, but the duc d'Orléans, whom Charles appointed lieutenant general of France, was chosen "king of the French" as LOUIS PHILIPPE. Charles X lived out his life in England and Scotland. During his reign French romanticism reached its full flower.

Charles I (Charles Robert of Anjou), 1288–1342, king of Hungary (1308–42), grandson of Charles II of Naples, who had married a daughter of Stephen V of Hungary. He founded the ANGEVIN dynasty of Hungary. On the death (1301) of Andrew III, last of the Arpad dynasty, Charles was the candidate of Pope Boniface VIII for the crown of St. Stephen, but Wenceslaus III of Bohemia and Otto of Bavaria were elected (1301, 1305), in 1308 the Hungarian diet at last chose Charles, who was crowned in 1310. He reorganized the army on a feudal basis and imposed a direct land tax to pay military expenses. Silver and gold mines became state monopolies, and in 1338 gold became the accepted currency. Charles encouraged trade and increased the privileges of the cities. His foreign policy was dynastic, he married his second son to Joanna I of Naples and took as his second wife Elizabeth, daughter of King Ladislaus I of Poland. In 1339 he secured the succession to Casimir III of Poland for his eldest son, later also Louis I of Hungary.

Charles II, king of Hungary: see CHARLES III, king of Naples.

Charles III, king of Hungary: see CHARLES VI, emperor.

Charles IV, king of Hungary: see CHARLES I, emperor of Austria.

Charles I (Charles of Anjou), 1226–1285, king of Naples and Sicily (1266–85), count of Anjou and Provence, youngest brother of King Louis IX of France. He took part in Louis's crusades to Egypt (1248) and Tunisia (1270). After obtaining Provence by marriage (1246), he extended his influence into Piedmont. He became senator of Rome (1263, 1265–78) and undertook to champion the papal cause against MANFRED in the kingdom of Naples and Sicily. In reward, he was crowned (1266) by Pope Clement IV. Charles defeated Manfred (1266) at Benevento and defeated and executed CONRADIN in 1268. As leader of the Guelphs he gained political hegemony in Italy and won suzerainty over several cities in Tuscany, Piedmont, and Lombardy, but his intention of imitating the Hohenstaufen's policies led to a cooling of his relations with the papacy. Planning to conquer the Byzantine Empire, he allied himself with the deposed emperor, BALDWIN II, against MICHAEL VIII and fought for years in the Balkans. Corfu, Epirus, and Albania were taken. The crushing tax burden imposed by his wars and the appointment of arrogant French officials led in Sicily to the SICILIAN VESPERS (1282). The ensuing war against the rebels and PETER III of Aragon, whom they had chosen as king of Sicily, continued under his son and successor, Charles II. Charles I was the founder of the first ANGEVIN dynasty in Naples.

Charles II (Charles the Lame), 1248–1309, king of Naples (1285–1309), count of Anjou and Provence, son and successor of Charles I. In the war that followed the SICILIAN VESPERS he was captured (1284) in a naval battle by ROGER OF LORIA, but he was released a few years later and crowned (1289) king of Naples by Pope Nicholas IV. The war in Sicily against James, son and successor of Peter III, continued until James became king of Aragon as JAMES II and returned Sicily to the pope, recognising Charles II as king (1295). The Sicilians, however, set up James's brother, FREDERICK II, as king, and war was resumed. An expedition to Sicily under CHARLES OF VALOIS led to the Peace of Caltabellotta (1302), Charles II and Pope Boniface VIII agreed that Frederick II would remain king, but Sicily was to go to Charles or his heir on Frederick's death.

Charles III (Charles of Durazzo), 1345–86, king of Naples (1381–86) and, as Charles II, of Hungary (1385–86), great-grandson of Charles II of Naples. He was adopted as a child by JOANNA I of Naples and later lived at the court of Louis I of Hungary. In 1380 Pope Urban VI summoned Charles to dethrone Joanna, who supported Clement VII, the antipope, and Joanna repudiated Charles in favor of Louis of Anjou (see LOUIS I, king of Naples). Charles conquered Naples, was crowned (1381) by the pope, imprisoned Joanna, and probably had her killed the following year. He repulsed the attacks of Louis of Anjou. In 1385 he was elected king of Hungary over the claims of SIGISMUND, he was crowned but was assassinated shortly afterward. Charles was succeeded in Naples by his son, Lancelot, and in Hungary by Sigismund.

Charles II (Charles the Bad), 1332–87, king of Navarre (1349–87), count of Évreux. He carried on a long feud with his father-in-law, John II, king of France, procuring the assassination of John's favorite, Charles de la Cerda (1354), and forming an alliance with Edward III of England. In 1356 Charles was treacherously seized by John and imprisoned, but he was rescued after the capture of John at Poitiers. He helped to suppress the JACQUERIE (1358) and was chosen by Étienne MARCEL to defend Paris against the dauphin (later Charles V), only to betray his trust. He was involved until his death in quarrels with Charles V and with Castile and in intrigues with England.

Charles III (Charles the Good), 1361–1425, king of Navarre (1387–1425), count of Évreux, son and successor of Charles II. He settled (1404) his inherited differences with France and later tried to negotiate between the Armagnacs and Burgundians. His reign was peaceful and beneficent. His daughter Blanche and her husband John, later John II of Aragon, succeeded him.

Charles I, 1863–1908, king of Portugal (1889–1908), son and successor of Louis I. He came to the throne at a time when political stagnation and financial troubles inherited from the long civil wars made the problems of government excessively difficult. Republicanism and socialism had been steadily growing. A cultured and urbane man, accomplished in painting and music and learned in language and oceanography, Charles had little opportunity to display any gifts of administration. A crisis arose over the African empire, where Portuguese and British ambitions clashed, and on Jan. 11, 1890, Great Britain sent a memorandum, known to the Portuguese as the Ultimatum, demanding that Portugal cease all attempts to establish further influence on the borders of Mozambique and Angola. The Portuguese had to yield, but there was a strong burst of feeling against the British, the government, and the king. Affairs with Great Britain were patched up, but the position of Charles declined. Financial affairs went from bad to worse, and Germany sought to take advantage of them to get part of the Portuguese African empire. The attempt of the king to foster a dictatorship under João Franco, head of the Regenerator party, caused violent reaction. A revolution in Jan., 1908, failed, but before the end of the month the first regicide in Portuguese history took place. Charles and the heir apparent were shot in a public square in Lisbon. Manuel II succeeded to the throne.

Charles I and **Charles II**, kings of Rumania: see CAROL I and CAROL II.

Charles I, king of Spain: see CHARLES V, emperor.

Charles II, 1661–1700, king of Spain, Naples, and Sicily (1665–1700), son and successor of Philip IV. He was the last of the Spanish Hapsburgs. His mother, Mariana of Austria, was regent for him and continued to rule after his majority until forced into exile by Charles's illegitimate brother, JOHN OF AUSTRIA (1629–79). After John's death she regained much of her power. During Charles's reign Spain was weakened by the War of DEVOLUTION and the War of the GRAND ALLIANCE. Charles was childless. Negotiations regarding his successor did not prevent the outbreak of war after his death (see SPANISH SUCCESSION, WAR OF THE). The Bourbon candidate was allowed to accept the throne after the war when Philip V became king.

Charles III, 1716–88, king of Spain (1759–88) and of Naples and Sicily (1735–59), son of Philip V and Elizabeth Farnese. Recognised as duke of Parma and Piacenza in 1731, he relinquished the duchies to Austria after conquering (1734) Naples and Sicily in the War of the Polish Succession His reign in Naples was beneficent In 1759 he succeeded his half brother Ferdinand VI to the Spanish throne, Naples and Sicily passing to his third son, Ferdinand (later Ferdinand I of the Two Sicilies). Charles at first was neutral in the Seven Years War, but after concluding the Family Compact of 1761 with France he was drawn into the conflict By the Treaty of Paris of 1763 he ceded Florida to England but received Louisiana from France Territorial disputes with Portugal in the Río de la Plata region were settled by the Treaty of San Ildefonso (1777) with the help of Charles's chief minister, Floridablanca In the American Revolution, Charles entered (1779) the war on the American side and by the Treaty of Paris of 1783 regained Florida and Minorca Spain prospered during the reign of Charles, who is regarded as the greatest Bourbon king of Spain and one of the "enlightened despots" He expelled the Jesuits in 1767 His son, Charles IV, succeeded him

Charles IV, 1748–1819, king of Spain (1788–1808), second son of Charles III, whom he succeeded in place of his imbecile elder brother Unlike his father, Charles IV was reactionary and ineffective and in 1792 virtually surrendered the government to Godoy, his chief minister and the lover of Queen María Luisa Spain entered the French Revolutionary Wars in 1793, but in 1795 was forced by France, in the second Treaty of Basel, to withdraw from the First Coalition The Treaty of San Ildefonso (1796) allied Spain with France Having declared war on England late in 1804, Spain shared (1805) in the disaster of Trafalgar The convention of Fontainebleau (1806) precipitated the events leading to the Peninsular War French troops entered Spain in 1807 Discontent with Charles's disastrous policy led to the coup d'état at Aranjuez, the king was forced to abdicate in favor of his son, Ferdinand VII Napoleon I tricked both father and son into a meeting with him at Bayonne, France, and forced them to abdicate in turn The royal family was held captive in France until 1814, while Joseph Bonaparte was king of Spain Charles IV and his family have been pitilessly portrayed by Goya, who enjoyed their favor

Charles IX, 1550–1611, king of Sweden (1604–11), youngest son of Gustavus I He was duke of Södermanland, Narke, and Värmland before his accession During the reign of his brother, John III (1568–92), he opposed John's leanings toward Catholicism After John's death he acted as regent, summoned (1592) the Riksdag to Uppsala, and had it establish Lutheranism as the state religion This measure was passed in anticipation of the arrival (1594) of John III's Catholic son and heir, King Sigismund III of Poland, who was obliged to pledge himself to uphold Protestantism in Sweden Sigismund having left Sweden in the same year, Charles again summoned the Riksdag, was made regent against the king's wishes, and ousted all Catholic officials The Swedish nobles were loyal to Sigismund, but the people supported Charles Sigismund landed an army at Kalmar (1598), was defeated by Charles at Stångebro, and was deposed by the Riksdag in 1599 Charles accepted the Swedish throne only after Sigismund's brother, John, had renounced it (1604) As regent, Charles took severe measures against the nobility In 1600 he invaded Livonia and thus began the long Polish-Swedish wars which ended only with the Peace of Oliva in 1660 Charles's claim to Lapland involved him in the unsuccessful Kalmar War (1611–13) with Christian IV of Denmark He died before the conclusion of the war and was succeeded by his son, Gustavus II

Charles X (Charles Gustavus), 1622–60, king of Sweden (1654–60), nephew of Gustavus II (Gustavus Adolphus) The son of John Casimir, count palatine of Zweibrücken, he brought the house of Wittelsbach to the Swedish throne when his cousin, Queen Christina, abdicated in his favor Before his accession, Charles had gained both military and diplomatic experience, fighting under Torstensson in the Thirty Years War and serving under Chancellor Oxenstierna As king, Charles remedied Christina's alienation of crownlands by securing their restitution at the Riksdag of 1655 He reopened hostilities with Poland, taking Warsaw and Cracow in 1655, but Polish resistance became formidable after the miracle at Czestochowa Charles's position worsened quickly Tsar Alexis of Russia invaded Livonia, Frederick III of Denmark declared war (1657), and Frederick William of Brandenburg deserted his alliance with Sweden Charles hastened to Denmark, crossed the frozen sea to threaten Copenhagen, and forced the Danes to make peace By the Treaty of Roskilde (1658) Denmark ceded to Sweden the provinces of Skåne, Halland, Blekinge, and Bohuslän in S Sweden as well as Bornholm and part of Norway. Refusal of Denmark to renounce an alliance with the Netherlands caused Charles to resume the war in 1658. England, the Netherlands, and France intervened in favor of Denmark Charles, after concluding a truce with Russia (1658), began to negotiate for a general peace. He died suddenly before the negotiations were ended and was succeeded by his son, Charles XI. His wars were settled to the advantage of Sweden The Treaty of Copenhagen (1660) with Denmark left Sweden in possession of its four southern provinces (For the settlement with Poland, see Oliva, Peace of.) During Charles's reign Sweden lost New Sweden to the Dutch

Charles XI, 1655–97, king of Sweden (1660–97), son and successor of Charles X During his minority a regency successfully liquidated the wars with Poland and Denmark by the Treaty of Copenhagen and the Peace of Oliva (1660) and made peace with Russia (1661) on the basis of the *status quo* At home, the regency mismanaged affairs, but upon reaching his majority, Charles obtained from the Riksdag the restitution of alienated crownlands Sweden was involved in the third of the Dutch Wars as an ally of Louis XIV Charles was defeated at Fehrbellin (1675) by Frederick William of Brandenburg, who overran Swedish Pomerania Against Denmark, Charles was successful on land, particularly at Landskrona (1677) At the Treaty of Saint-Germain (1679) with Brandenburg, Charles —through the influence of Louis XIV—regained Pomerania The Peace of Lund (1679) with Denmark drew the Scandinavian nations closer together, and in 1680 Charles married Princess Ulrika of Denmark Turning to internal affairs, Charles set about increasing the royal power at the expense of the nobles The Riksdag of 1682 gave him absolute power, which he used efficiently He was succeeded by his son, Charles XII

Charles XII, 1682–1718, king of Sweden (1697–1718), son and successor of Charles XI The regency under which he succeeded was abolished in 1697 at the request of the Riksdag At the coronation Charles omitted the usual oath and crowned himself with his own hands The youth and inexperience of the king invited the coalition (1699) of Peter I of Russia, Augustus II of Poland and Saxony, and Frederick IV of Denmark against Sweden In the Northern War the allies soon were undeceived as to Charles's abilities In one of the most brilliant campaigns in history, Charles forced Denmark to make peace (Aug., 1700), defeated Peter I at the Narva (Nov., 1700), subjugated Courland (1701), invaded Poland, declared Augustus dethroned, and secured the election (1704) of Stanislaus I as Polish king In 1706 he invaded Saxony and forced Augustus to recognize Stanislaus as king of Poland, to end his alliance with Russia, and to surrender his adviser Patkul, whom Charles had broken on the wheel Charles now turned on his chief enemy, Peter I Securing the alliance of the Cossack hetman Mazeppa, he invaded Russia in 1708 But in June, 1709, he was disastrously defeated at Poltava and fled to Turkey, where he persuaded Sultan Ahmed III to declare war on Russia (1710) After the Peace of the Pruth (1711) between Russia and Turkey, Charles, who had taken residence near Bender in Bessarabia, became an increasingly unwelcome guest Requested to leave Turkey, Charles refused with the utmost obstinacy A whole Turkish army was ordered to dislodge him from his house (1713) Charles defended it with a handful of men for several hours until he was forced, by fire, to make a sortie Taken prisoner and detained near Adrianople, he simulated sickness for more than a year. Late in 1714 he unexpectedly arrived at Stralsund, which he defended against the Prussians and the Danes until 1715 At its fall he escaped to Sweden and proceeded (1716) to invade Norway While besieging the fortress of Fredriksten, Charles was killed in the Swedish trenches He was succeeded by his sister, Ulrica Leonora, during whose reign the Northern War came to an end in 1721 (For later successors, see Sweden.) Charles's amazing military ability, his grandiose ambitions, and his perseverance throughout the greatest hardships have made him one of the heroes of modern times His failure cost Sweden its rank as a great power The classic biography is Voltaire's *History of Charles XII* See also biographies by R N Bain (1895) and J A Gade (1916).

Charles XIII, 1748–1818, king of Sweden (1809–18) and Norway (1814–18) He became regent at the assassination of his brother Gustavus III (1792) He introduced some liberal policies, but these were abandoned at the end of his regency (1796) Called to the throne at the abdication of his nephew, Gustavus IV (1809), he accepted the new constitution which limited the monarch's power and signed the treaty ceding Finland to Russia and treaties with Denmark and France In 1810 he adopted the French marshal, Bernadotte (later King Charles XIV), as his heir, and thereafter left all affairs in his hands.

Charles XIV (Charles John; Jean Baptiste Jules Bernadotte) (shärl' bätēst' shül' bĕrnädôt'), 1764–1844, king of Sweden and Norway (1818–1844), French revolutionary general, b Pau, France Bernadotte rose from the ranks, served brilliantly under Bonaparte in the Italian campaign (1796–97), was French ambassador at Vienna (1798), and was minister of war (1799) His part in the victory of Austerlitz (1805) was prominent, and in 1806 Napoleon made him marshal of the empire and prince of Ponte Corvo His relations with the emperor were, however, cool While commanding in N Germany he had occasion to negotiate with the Swedes, who were impressed by the generous and manly conduct of their able adversary In 1809 Gustavus IV of Sweden abdicated and was then succeeded by his aged and childless uncle, Charles XIII Casting about for a suitable successor to Charles, the Swedish government turned to Bernadotte After receiving the support of Napoleon and joining the Lutheran Church the marshal accepted He was elected by the Riksdag and adopted by Charles XIII as Charles John The infirmity of the old king and the dissensions in the council of state put the reins of government in the hands of the crown prince He favored the acquisition of Norway from Denmark rather than the reconquest of Finland from Russia, and thus he threw his lot with Russia and England against Napoleon and Denmark His Swedish contingent played an important part in the battle of Leipzig (1813), and in 1814 the crown prince, having marched his army into Denmark, forced the Danes to cede Norway in the Treaty of Kiel Norway, which had declared its independence, was subdued, and by a majority vote of the Norwegian Storting (1814) the country was united with Sweden under a single king The Congress of Vienna confirmed the union but restored Ponte Corvo to the pope. Succeeding to the throne in 1818, Charles XIV maintained peace throughout his reign, which was marked by internal improvements, notably the completion of the Göta Canal and a reform of the school system However, his increasing opposition to the liberals made him unpopular toward the end of his reign The founder of the present Swedish dynasty, he was succeeded by his son, Oscar I See D P Barton, *Bernadotte the First Phase* (1914), *Bernadotte and Napoleon* (1920), and *Bernadotte, Prince and King* (1925), F D Scott, *Bernadotte and the Fall of Napoleon* (1935)

Charles XV, 1826–72, king of Sweden and Norway (1859–72), son and successor of Oscar I A liberal and popular ruler, he consented to many reforms, including the creation of a bicameral parliament He was succeeded by Oscar II

Charles (Charles Louis), 1771–1847, archduke of Austria, brother of Emperor Francis II He was the ablest Austrian commander in the French Revolutionary and Napoleonic wars, but he was handicapped by epilepsy and, in the early years, by unwise decisions imposed on him from Vienna Made minister of war in 1805, he reorganised the Austrian forces and headed the patriotic faction at court In 1809 he defeated Napoleon I at Aspern (May), but was beaten at Wagram (July) In both battles he exacted a heavy toll from the French Shortly afterward he retired because of political differences with Francis

Charles I, 953–92, duke of Lower Lorraine (977–91), younger son of Louis IV of France He claimed the French throne when his nephew, Louis V of France, died without issue (987), but he was set aside in favor of Hugh Capet Charles seized Laon (988) and Rheims (989), but was captured by treachery (991) and died in prison He was the last Carolingian claimant to the French crown.

Charles IV, 1604–75, duke of Lorraine He succeeded to the duchy in 1624 but was to lose it several times because of his anti-French policy. In 1633 French troops invaded Lorraine in retaliation for Charles's support of Gaston d'Orléans. Forced to make humiliating concessions to France, he abdicated (1634) in favor of his brother and entered the imperial service in the Thirty Years War He briefly recovered his lands in 1641 and 1644, but he was excluded from the Peace of Westphalia (1648) Though he joined the Spanish during the Fronde, he communicated with the French government and as a result was imprisoned by the Spanish (1654–59) In 1661, at the price of heavy concessions to Louis XIV, Charles recovered Lorraine and Bar Expelled once more by the French in 1670, Charles later helped to instigate the alliance of Spain and the emperor with the Dutch in the third of the Dutch Wars In 1675 he defeated Créquy at Konser Bruck

Charles V (Charles Leopold), 1643–90, duke of Lorraine, nephew of Charles IV Deprived of the rights of succession to the duchy, he was banished from France and entered the service of the emperor He was twice a candidate for the Polish crown (1669 and 1674) Although he took the ducal title in 1675, France still held Lorraine He was commander of the imperialist forces in the Dutch War At Nijmegen he refused (1678) to accept Lorraine on Louis XIV's terms. He took part in the defense of Vienna (1683) and in expelling the Turks from Hungary Charles V married Eleanora Maria, sister of Emperor Leopold I (1678)

Charles, Jacques Alexandre César (shärk' ălĕksä'drə sāzar' shärl'), 1746–1823, French physicist He confirmed Franklin's electrical experiments, became interested in aeronautics, and was the first

to use hydrogen gas in balloons. In this type of balloon, known as the *Charlière*, he made an ascent in 1783 of almost 2 mi He became professor of physics at the Conservatoire des Arts et Métiers, Paris. Inventor of a thermometric hydrometer, he also improved various devices, the Gravesande heliostat and Fahrenheit's aerometer among others, and anticipated Gay-Lussac's law of the expansion of gases For Charles's law, see GAS.

Charles, Thomas, 1755–1814, Welsh nonconformist preacher. Ordained a priest in the Church of England, he resigned his curacies in Somersetshire and returned to Bala, Wales, where in 1784 he joined the Calvinistic Methodists Gifted in working with children, he began (1785) to establish Welsh "circulating" schools and Sunday schools. He secured and distributed thousands of Welsh Bibles and helped to found the British and Foreign Bible Society (see BIBLE SOCIETIES) At Bala in 1803 Charles established a printing press for Welsh textbooks. See William Hughes, ed , *Life and Letters of the Rev. Thomas Charles* (1881)

Charles, William, 1776–1820, American etcher, engraver, and caricaturist, b Edinburgh, Scotland He worked in New York and Philadelphia It is believed that he came to America to avoid prosecution for his caricature *A Fallen Pillar of the Kirk* His best-known works are etched caricatures on the War of 1812 and on political subjects From his print shop in Philadelphia he issued an edition of Rowlandson's *Tour of Dr Syntax in Search of the Picturesque* and his *Vicar of Wakefield*

Charles, short river rising in E Massachusetts and winding its way past Cambridge and Boston to Boston Bay On it Harvard boat races take place. See A B Tourtellot, *The Charles* (1941)

Charles, Cape, E Va , the southern point of the Eastern Shore, which separates Chesapeake Bay from the ocean. Cape Charles is opposite Cape Henry at the entrance to the bay and has ferries to the Virginia mainland

Charles, Lake, SW La The CALCASIEU river is its inlet and its outlet The deepwater port LAKE CHARLES is on its shores and is connected by way of the Calcasieu with the Intracoastal Waterway and with the Gulf of Mexico.

Charles Albert, 1798–1849, king of Sardinia (1831–49), first king of the Savoy-Carignano line (see SAVOY, HOUSE OF) VICTOR EMMANUEL I, when deposed by the uprising of 1821, designated him regent pending the arrival of the new king, Charles Felix As a liberal and a nationalist, Charles Albert was expected by the leaders of the uprising (especially SANTAROSA) to uphold their cause, however, the regent obeyed the new king, a reactionary, and retired to Novara. After his accession, Charles Albert issued a new code and, to forestall a revolution, granted (1848) a constitution which was not formally abrogated till 1947. He twice declared war on Austria, fighting two campaigns (1848, 1849) of the RISORGIMENTO, Successful at first, he was routed (1849) at Novara and abdicated in favor of his son, Victor Emmanuel II

Charles Alexander, 1712–80, prince of Lorraine, younger brother of Emperor Francis I. He was governor of the Austrian Netherlands (1744–80) and a general in the War of the Austrian Succession and the Seven Years War

Charles Augustus, 1757–1828, duke and, after 1815, grand duke of Saxe-Weimar, friend and patron of GOETHE Though his duchy was small, he was important in German politics, helped FREDERICK II of Prussia form (1785) the *Fürstenbund*, fought with the Prussians in the French Revolutionary Wars, and held out against Napoleon I until 1806 In his rule Goethe made WEIMAR a center of literature, science, art, and liberal political thought

Charles Borromeo, Saint (bŏrŏmā'ō), 1538–84, Italian churchman, b near Lago Maggiore His uncle, PIUS IV, summoned Charles, a student at Pavia, to Rome (1560). He was made cardinal, administrator of the Papal States and of the archdiocese of Milan, and papal secretary of state. He was most zealous in encouraging reform in the Church and was largely responsible for reopening the Council of TRENT, of which he was the guiding spirit. He inclined toward asceticism, and despite a great private fortune he lived in rigorous simplicity. In 1563 he was ordained priest, consecrated bishop, and then received the pallium for the see of Milan, but he was unable to make his residence there until 1566, when he completed his affairs at Rome (he was 28 years old). At Milan he prosecuted vigorous reforms, especially in education. He was exceedingly strict with the clergy In 1569 some disaffected men tried to assassinate him He worked untiringly in the plague to alleviate suffering There is a huge statue of him near Lago Maggiore, and there is a monument to him in the cathedral at Milan, which he had completely redecorated. His feast· Nov. 4

Charlesbourg (shärl'bŏrg), village (pop. 2,789), S Que., overlooking the St. Charles river just N of Quebec city. One of the oldest parishes in Quebec, it comprises part of the seigniory first granted to the Jesuits in 1626 and was first settled in 1659. Its earlier name was Bourg Royal

Charles City, city (pop. 8,681), co. seat of Floyd co., NE Iowa, on the Cedar and NNW of Waterloo; settled 1850, inc. 1869. Farm machinery is made. Near-by Indian mounds have been excavated.

Charles Edward Stuart: see STUART, CHARLES EDWARD.

Charles Emmanuel I, 1562–1630, duke of Savoy (1580–1630), son and successor of Emmanuel Philibert In 1601 he tried, unsuccessfully, to reconquer Geneva by a surprise attack. However, he recovered Saluzzo from the French by the Treaty of Lyons (1601), giving up, in exchange, Bresse, Bugey, Gex, and Pinerolo He oscillated in his alliances between France and Spain and fought against Genoa and in the war involving the succession to MONTFERRAT. At the time of his death, his duchy was invaded by the French. He was succeeded by his son, Victor Amadeus I Though Charles Emmanuel was called the Great, his reign was less noteworthy for his deeds than for those of St FRANCIS OF SALES

Charles Martel (märtĕl') [O Fr ,=Charles the Hammer], 688?–741, Frankish ruler, natural son of PEPIN OF HÉRISTAL and grandfather of Charlemagne After the death of his father (714) he became mayor of the palace in Austrasia and Neustria, having previously crushed all opposition He extended his rule to Burgundy, Aquitaine, and Provence Having subjugated many of the German tribes across the Rhine, he encouraged the activities of St Boniface and other missionaries among them Charles Martel halted the Moslem invasion of Europe by his victory over the Moors of Spain in the battle of Tours or Poitiers (732), one of the decisive battles of the world's history Although he never assumed the title of king, he divided the Frankish lands, like a king, between his sons Pepin the Short and Carloman See F. Funck-Brentano, *Earliest Times* (Vol I of *National History of France*)

Charles Mound, hill, 1,241 ft. high, NW Ill , not far from Galena, highest point in the state

Charles of Blois (Charles of Châtillon) (blwä, shätēyô'), c.1319–1364, duke of Brittany, nephew of Philip VI of France. One of the chief participants in the War of the BRETON SUCCESSION, he was killed at the battle of Auray He has been beatified

Charles of Lorraine, see CHARLES ALEXANDER

Charles of Valois (välwä'), 1270–1325, French prince and military leader, third son of Philip III and father of Philip VI He was the dominating figure in France during the reign of his nephew, Louis X Charles married Margaret, a daughter of Charles II of Naples. On the excommunication (1283) of PETER III of Aragon, Pope Martin IV made Charles of Valois king of Aragon and Sicily Charles, however, was defeated and in 1291 had to renounce his claim He subsequently sought, unsuccessfully, to obtain the crowns of the Byzantine and the Holy Roman empires, of France, and of Arles Campaigning for Pope Boniface VIII in Italy, he took Florence (1301) and exiled Dante, who in return placed Charles in Purgatory

Charles of Viana (vēän'nä), 1421–61, Spanish prince, heir of Navarre, son of Blanche of Navarre and John (later JOHN II) of Aragon After his mother's death he ruled Navarre for his father, but serious differences between the two soon plunged the country into civil war He was twice imprisoned by his father and died shortly after an uprising in Catalonia had forced John to recognise him as his heir

Charles Robert of Anjou· see CHARLES I, king of Hungary

Charles the Bad. see CHARLES II, king of Navarre

Charles the Bold, Fr *Charles le Téméraire*, 1433–77, last reigning duke of Burgundy (1467–77), son and successor of PHILIP THE GOOD As the count of Charolais before his accession, he opposed LOUIS XI of France, whose program of unification he began to combat by joining the League of the Public Weal (1465) In 1468 he had Louis arrested during their interview at Péronne, compelled him to help in subduing Liége, where Louis had incited a revolt, and allied himself with England by marrying Margaret, the sister of Edward IV Master of the Low Countries and Luxembourg, in addition to the duchy of Burgundy and Franche-Comté, Charles dreamed of reestablishing the kingdom of Lotharingia and of securing the imperial crown In 1473 he met Emperor Frederick III at Trier to arrange a marriage between his daughter Mary and Frederick's son, the future Maximilian I, Charles was to have been crowned king of the Romans. Secretly won over by Louis's diplomacy, however, the emperor suddenly broke off negotiations, the marriage did not take place till after Charles's death, in 1477. Meanwhile, Charles continued to conquer the lands which separated his various possessions. His struggles with the Alsatian towns and his seizure of Lorraine (1475) alienated the Swiss cantons, which were allied with France Late in 1475 Charles attacked the Swiss, who routed him at Grandson and Morat (1476) An invasion of France by his ally, Edward IV, was bought off by Louis in 1475 Finally, at Nancy, Charles was utterly defeated and killed in battle by the Swiss and the Lorrainers. His heiress, MARY OF BURGUNDY, lost part of her possessions to France, the rest passing to the Hapsburgs through her marriage with Maximilian. Powerful Burgundy had ceased to exist as a state. Charles, who earned his surname through his impetuous gallantry, was a capable, though harsh, ruler; however, his plans were too fantastic to succeed against so expert a diplomat as Louis XI. See the chronicles of COMINES; biographies by J. F. Kirk (3 vols., 1864–68) and Ruth Putnam (1908).

Charles the Great, Frankish king, emperor: see CHARLEMAGNE.

Charleston. 1 City (pop. 8,197), co. seat of Coles co., E Ill., 8E of Decatur; inc. 1839. It is an industrial, rail, and trade center in an agricultural area Its manufactures include brooms, lumber, and shoes. A Lincoln-Douglas debate was held here, Sept. 8, 1858 Eastern Illinois State College is here Lincoln Log Cabin State Park (the site of Thomas Lincoln's farmhouse) lies to the south. 2 City (pop. 2,100), a co seat of Tallahatchie co., NW Miss , NNE of Greenwood, in a cotton, timber, and livestock area. 3 City (pop. 5,182), co seat of Mississippi co., SE Mo., SW of Cairo, Ill.; laid out 1837 In a farm and timber region, it is a cotton center and has shoe and stave factories 4 City (pop 71,275), co. seat of Charleston co., SE S.C., oldest and largest city in the state and one of the chief ports of entry in the SE United States It lies on a low, narrow peninsula between the Ashley and Cooper rivers at the head of the bay (c 7 mi long) formed by their confluence Bordering or in the bay are Sullivans Island, site of Fort Moultrie (see MOULTRIE, FORT), James Island, with a U.S. quarantine station, Morris Island, with a lighthouse, Fort Sumter (see SUMTER, FORT), and CASTLE PINCKNEY Many transportation lines converge at Charleston, and through its excellent, almost landlocked harbor an extensive coastwise and foreign trade is carried on. The region about the city is devoted largely to truck farming, and the adjacent waters abound in sea food Among its varied industries are large fertilizer and cigar factories, asbestos, paper and pulp, and chemical plants, and textile and steel mills Charleston is headquarters for the sixth naval district (there is a large navy yard here) and the southeast division of the U S Corps of Engineers The city dates from 1670, when the English under William Sayle settled at Albemarle Point, on the west bank of the Ashley river, c 7 mi from modern Charleston In 1680 the colonists moved to Oyster Point, where their capital, Charles Town, as it was first called, had been laid out The city, surviving Spanish and Indian threats, became the leading center of wealth and culture in the South Non-English immigrants, among whom the French Huguenots were most prominent, added a cosmopolitan touch In the American Revolution, after being successfully defended (1776, 1779) by William MOULTRIE, Charleston was surrendered (May 12, 1780) by Benjamin LINCOLN to the British under Sir Henry CLINTON, who held it until Dec. 14, 1782 The city, incorporated as Charleston in 1783, ceased to be the capital in 1788 after Columbia had been designated (1786) the seat of government The South Carolina ordinance of secession (Dec., 1860) was passed in Charleston, and the first hostile act of the Civil War, the firing on Fort Sumter (April 12, 1861), occurred here Under virtual siege by Union forces (1863–65), the city suffered partial destruction, but did not fall until Feb , 1865, after it had been isolated by Sherman's army. A violent earthquake on Aug 31, 1886, took many lives and made thousands homeless, and periodic hurricanes and tornadoes (one in 1938 was particularly severe) have also caused great damage. Despite these repeated devastations many of the charming colonial buildings survive, outstanding among them are St Michael's Episcopal Church (begun 1752), noted for its chimes, and the Miles Brewton, or Pringle, house The water front, called the Battery, and the Grace Memorial Bridge over the Cooper river are famous Charleston landmarks The old buildings and the history associated with them together with the climate, beaches, and beautiful gardens near by (especially Middleton Place, Magnolia Gardens, and Cypress Gardens) yearly attract thousands of visitors The annual azalea festival is an important event The city's many schools include The CITADEL and the Medical College of the State of South Carolina (opened 1824, coeducational since 1931) The College of Charleston (coeducational since 1918), chartered in 1785, was opened in 1790 and in 1837 became the first municipal college in the country See Mrs St Julien Ravenel, *Charleston: the Place and the People* (1906); Robert G Rhett, *Charleston: an Epic of Carolina* (1940), Robert Molloy, *Charleston a Gracious Heritage* (1947) 5 City (pop 67,914), state capital, and co seat of Kanawha co., W central W.Va., on the Kanawha river at the mouth of the Elk It is an important railroad and trading center for many adjacent "company towns" which manufacture chemicals, glass, and metal products The city grew up around the site of Fort Lee and was chartered as Charles Town in 1794. The capital was moved to Charleston from Wheeling in 1870 and returned to Wheeling in 1875. As the result of an election (1877) Charleston became permanent capital in 1885, Morris Harvey College and

Mason College are here. Near by is West Virginia State College.

Charlestown, town (pop. 1,437), on Nevis, British West Indies. It is a port, shipping its products to SAINT KITTS. Alexander Hamilton was born here

Charles Town, city (pop 2,926), co. seat of Jefferson co., W.Va., in the Eastern Panhandle SW of Harpers Ferry Charles Town was laid out in 1786 by George Washington's brother Charles, whose home, later called "Mordington," still stands. Charles Town is the trading center for the contiguous industrial town, Ranson, and for a farming and horse-breeding area Racing meets are held here John Brown was tried (1859) at the Jefferson co. courthouse and was hanged here. "Harewood," where Dolly Madison was married, is near the town.

Charlestown, 1 Town (pop 939), S Ind , NE of Jeffersonville; laid out 1808 It has large explosive works 2 Part of BOSTON, Mass , between the Mystic and Charles rivers It was settled in 1629 and included in Boston in 1874 The battle of Bunker Hill was fought here, June 17, 1775 3 Town (pop 1,753), SW N H , on the Connecticut and S of Claremont, settled 1740, inc 1753. It was defended by Phineas Stevens against French and Indians The broad elm-shaded main street has many colonial houses. 4 (chärlz'tŭn) Town (pop 1,199), SW R I , between Westerly and South Kingstown, in a farm and resort area; inc 1738 An Indian burial ground is preserved, and a bird sanctuary and game reservation are near by. The 1938 hurricane took many lives here

Charles University see PRAGUE, UNIVERSITY OF

Charles William Ferdinand, 1735-1806, duke of Brunswick (1780-1806), Prussian field marshal in the Seven Years War and commander in chief (1792-94) of the Austro-Prussian armies in the FRENCH REVOLUTIONARY WARS His arrogant manifesto (Aug , 1792), threatening the French with dire punishment if they failed to assist the invading armies, enraged the revolutionists and led to the arrest of Louis XVI and Marie Antoinette He was defeated at Valmy (1792), but in 1793 he routed the French at Kaiserslautern and Pirmasens Commanding the Prussian armies in 1806, he was defeated by Davout at Auerstedt He was blinded in the battle and died soon afterward His son was FREDERICK WILLIAM, duke of Brunswick

Charlet, Nicolas Toussaint (nēkôlä' tōōsĕ' shärlā'), 1792-1845, French lithographer and painter, famous for his lithographs depicting episodes from the Napoleonic Wars His lithographs number over 2,000, but he also worked successfully in oil, sepia, and water color

Charleville (shärlüvēl'), town (pop 19,454), Ardennes dept , NE France, on the Meuse opposite MÉZIÈRES (the two are twin cities) Charleville was founded by, and named for, Charles de Gonzague, duke of RETHEL It has important manufactures of firearms and metal goods

Charlevoix, Pierre François Xavier de (pyĕr' frāswä' zāvyā' du shärlûvwa'), 1682-1761, French Jesuit traveler and historian, educated at the Collège Louis le Grand in Paris From 1705 to 1709 he was in New France as professor of rhetoric at the Jesuit college at Quebec. In 1709 he returned to teach at the Collège Louis le Grand and later became prefect of the college In 1720 he set out again for America to explore the West and visit the Jesuit missions He voyaged up the St Lawrence, through the Great Lakes, and via the Illinois river to the Mississippi, which he descended to New Orleans After experiencing shipwreck in the Gulf of Mexico, he returned to France and resumed his teaching In 1744 he issued his *Histoire de la Nouvelle France* (Eng tr , 6 vols , 1900), which in an appendix contains a detailed journal of his trip, the only full account of the interior of America in the first third of the 18th cent

Charlevoix (shär'lĕvoi), city (pop 2,299), co. seat of Charlevoix co , N Mich , on Lake Michigan and NE of Traverse City, settled 1852, inc as a village 1879, as a city 1905 It is a summer resort, with fishing on Lake Charlevoix and other smaller lakes and a winter sports center A U S fish hatchery is here The vicinity is rich in Indian remains.

charlock: see MUSTARD.

Charlot, Jean (shä' shärlō'), 1898–, American painter, writer, and lithographer, b France He worked from 1921 to 1926 in Mexico, where his murals in the ministry of education and the preparatory school of Mexico city are well known Many of his expressive easel paintings, water colors, and lithographs portray the life of the Mexican Indian. After an archaeological expedition to Chichén Itzá (1926), he came to the United States He taught at the Art Students League of New York and later at the Univ of Georgia, where he decorated the fine arts and journalism buildings with large frescoes Charlot is also known for his illustrations and for his book *From the Mayans to Disney* (1939). He became an American citizen in 1939 See *The Charlot Murals in Georgia* (1945).

Charlotte (Charlotte Sophia), 1744–1818, queen consort of George III of England The niece of Frederick, duke of Mecklenburg-Strelitz, she was married to King George in 1761 and bore him 15 children. On the occasions of the king's mental illness in 1788 and 1810, she was given charge of his person and his household

Charlotte. 1 (shärlŏt', shärlōt') City (pop 5,544), co. seat of Eaton co , S Mich , SW of Lansing, settled before 1840, inc as a village 1863, as a city 1871 It manufactures radios, furniture, and electronic equipment. The Kellogg Foundation's county unit is in the city Indian trails crossed here 2 (shär'lŭt) City (pop 100,809), co. seat of Mecklenburg co , S N C , near the S C line, largest city of the state and the foremost commercial and industrial center of the piedmont region. It is a railroad hub and the market for a large area producing cotton, tobacco, and other farm crops With bountiful hydroelectric power from the Catawba river, the city has numerous textile mills and cottonseed-oil, chemical, and other industrial plants Charlotte was settled c 1750 and chartered in 1768 The citizens of the county were among the most outspoken in their opposition to the British government, and it was at Charlotte that the MECKLENBURG DECLARATION OF INDEPENDENCE was signed in May, 1775 In his brief occupation of the city (Sept.–Oct., 1780), Cornwallis gave it the appellative "hornets' nest" It is the seat of Queens College (Presbyterian, for women, 1857) and Johnson C Smith Univ (Negro, Presbyterian, coeducational, 1867) 3 (shär'lŭt) Town (pop 1,082), NW Vt , S of Burlington, bordered on the west by Lake Champlain, permanently settled 1784 It is a summer resort and fruitgrowing area

Charlotte Amalie (ämäl'yu), town (pop 9,801), capital of the VIRGIN ISLANDS OF THE UNITED STATES, on St Thomas Island Founded in 1673, Charlotte Amalie was a center of Danish colonial life It became important as a trading center during the American Civil War It was renamed St Thomas in 1921, but the former Danish name was restored in 1936 With an excellent, well-protected harbor, which has been developed as a naval base, it is the commercial center of the islands

Charlotte Elizabeth see ELIZABETH CHARLOTTE OF BAVARIA

Charlotte Harbor, large inlet of the Gulf of Mexico, SW Fla , with a string of islands extending across its mouth It receives the Myakka and Peace rivers.

Charlottenburg see BERLIN, Germany

Charlottesville (shär'lutsvĭl), city (pop 19,400), central Va , on the Rivanna river, in a piedmont farm region noted for its apples, founded 1762, chartered as a town 1851, as a city 1888 The courthouse of Albemarle co is here The city has textile mills and is the seat of the Univ of Virginia (see VIRGINIA, UNIVERSITY OF) Burgoyne's captured army was quartered near here in 1779–80, and in 1781 Tarleton raided the town Near by are MONTICELLO, home of Jefferson, "Ash Lawn," home of James Monroe, the birthplaces of Meriwether Lewis and George Rogers Clark, and a state hospital for the tubercular

Charlottetown, capital (pop 14,821), only city, and chief port of Prince Edward Island, on the south coast It has regular steamship service to Pictou, N S , to St John's, N F , to Montreal, and to small ports on the island itself It is the seat of the chief educational institution of the island, Prince of Wales College (1860), affiliated with Dalhousie Univ North of the city is St Dunstan's Univ , affiliated with Laval Univ There was, in the French period, a fort and settlement across the harbor, known as Port la Joie Charlottetown was laid out in 1768 and named for Queen Charlotte, consort of George III Its growth was slow until the middle of the 19th cent , when it became noted for the sailing vessels it built for fishing and lumber transport The **Charlottetown Conference** of the Maritime Provs (1864) was the first move in the direction of Canadian federation

Charlton, rural town (pop 2,557), S Mass , SW of Worcester, settled c 1735, inc 1755 Woolen goods are made here

charm, magical formula or INCANTATION, spoken or sung, for the purpose of securing blessing, good fortune, or immunity from evil It presupposes a belief in demons or malignant spirits The formula was frequently inscribed upon an AMULET, talisman, or trinket to be worn for protection

Charnwood, Godfrey Rathbone Benson, 1st **Baron,** 1864-1945, English biographer. An Oxford man, he served in Parliament (1892–95), was mayor of Lichfield (1909–11), and in 1911 was elevated to the peerage for his services to the Liberal party He wrote a well-known biography of Abraham Lincoln (1916) and one of Theodore Roosevelt (1923).

Charnwood Forest, wooded region, NW Leicestershire, England. There are coal mines and granite quarries

Charny (shär'nē), town (pop 2,831), S Que , S of Quebec city.

Charolais (shärôlā'), small region, E central France, named after Charolles, a small town now in Saône-et-Loire dept There is intensive cattle breeding The countship of Charolais was acquired (1390) by Duke Philip the Bold of Burgundy, and CHARLES THE BOLD was known as the count of Charolais before he became duke In 1477 the county passed to the Hapsburgs and from then on shared the fortunes of FRANCHE-COMTÉ until it was acquired from Spain by Louis XIV and incorporated into the province of Burgundy

Charon (kā'rŏn), in Greek mythology, ferryman of Hades, who bore the newly arrived dead across the STYX. In Greece the coin placed in the dead man's mouth was said to be Charon's fee He is usually represented as a brutal, avaricious old man The Etruscan form of Charon, very frequent on tombs, was that of a bestial man with tusks

Charondas (kərŏn'dus), 6th cent B C , Sicilian lawgiver, a native of Catana His laws were used by the cities of Chalcidian foundation in Sicily and Italy Aristotle admired them.

Charpentier, Gustave (güstav' shärpätyā'), 1860–, French composer, pupil of Massenet at the Paris Conservatoire His opera *Louise* (1900), reflecting Parisian bourgeois life, has been very popular He is known also for his orchestral suites, especially *Impressions d'Italie* (1892)

Charran (kär'ăn), variant of HARAN, the place Acts 7 2,4

Charron, Pierre (pyĕr' shärō'), 1541–1603, French theologian and philosopher, a Roman Catholic After practicing law for several years, he took orders and soon gained a reputation as an eloquent preacher He became chaplain to Marguerite, wife of Henry IV His *Traité des trois vérités* (1594) set forth proofs, first, that there is a God and that a true religion exists, second, that no other religion than that of the Christians is true, and, third, that in the Roman Catholic Church alone is salvation found. In 1600 he published a collection of 16 sermons In his most famous work, the *Traité de la sagesse* (1604), the influence of Montaigne appears In this he argued that man, in himself incapable of discerning the truth, must accept and endure his own limitations and that, basing his conduct upon a morality founded in reason, he should yield to the guidance of authority and seek to know what he can of himself and of God. The skepticism of this work awoke criticism and later a summary and apology, *Petit traité de la sagesse*, was published

chart, marine MAP representing some or all (according to its scale and specific purposes) of the following details useful to the navigator outline and nature of coast, with landmarks, true and magnetic directions, currents and undercurrents (both direction and force), winds; tides, location and type of lighthouses, buoys, beacons, and lightships, position of rocks, bars, reefs, shoals, wrecks, or other dangers; contour and nature of bottom (mud, sand, rock, or gravel), and depth The last, very important, is secured by SOUNDING and is indicated in great detail and very carefully in charts of harbors and shallow and intricate waterways Much of the other information is secured by ordinary methods of SURVEYING Most national governments publish charts of their coasts and harbors, the British admiralty has done the most work along these lines In the United States the Coast and Geodetic Survey and the Hydrographic Office of the Dept of the Navy issue charts

charter, document issued by a central government, especially a monarch, to a person, group of persons, corporation, municipality, local government, or entire population granting specific administrative, judicial, or legislative rights. The term can be widely and vaguely applied to various royal grants of rights in the Middle Ages The most famous political charters were the Great Charter or MAGNA CARTA of England and the Charter of 1814 issued by Louis XVIII of France Early American colonial charters established the first legislative assemblies, nourished feelings of political independence from British parliamentary control, and influenced American political thought towards a written rather than an informal constitution

chartered companies. Though the modern corporation receives its charter from the state, the term "chartered company" is now usually applied to a kind of association for foreign trade, (and for colonization schemes) which appeared with the formation of the European national states and their overseas expansion The association received its charter from the state and sometimes had state support In such a charter the rules of trading were prescribed, and the merchant members might use their capital separately or pool their resources. The long, expensive journeys, the large permanent investment, and the force of strong states finally made for the issuance of joint stock in such companies They were given a monopoly of trade or colonization in a certain region and customarily exercised lawmaking, military, and treaty-making functions, subject to the home government, besides other privileges The English Merchants Adventurers (1359) was more of a guild organization but foreshadowed such companies as the British Eastland (1404), Muscovy (1555), Levant (1581), British East India (1600, "the John Company," perhaps the greatest of them all), Hudson's Bay (1670), and Dutch East India companies Such colonizing companies as the Virginia Company (1606), the Massachusetts Bay Company (1629), the French Royal West Indian Company (1664–74), the Santo

Domingo Company (1698), and the Dutch West India Company were more quickly taken over by the government The later 19th-century colonizing and trading companies, such as the British North Borneo (1881), Royal Niger (1886), British South African (1888), and German East African (1884), did not last long and had more restricted powers, but the continuing significance of the chartered company was seen in them and in the South Manchurian Railway Company

Charterhouse (chär'turhous) [Fr =Chartreuse], in London, once a Carthusian monastery (founded 1371), later a hospital for old men and a school for boys, endowed by Thomas Sutton in 1611 The school, which became a large public school, was removed (1872) to Godalming, Surrey Thackeray, a pupil at the school, describes it in *The Newcomes*

Charter Oak, white oak tree which until 1856 stood in Hartford, Conn , and was thought to be 1,000 years old There is a tradition that when Sir Edmund Andros, as governor general of New England, demanded (1687) that the charter of Connecticut be surrendered by the colonists at Hartford, the document was hidden in a hollow of the tree

Charters Towers, city (pop 7,567), Queensland, Australia, SW of Townsville It is in a mining area producing copper, silver, and gold With the discovery of gold here in 1871–72, it was an important gold-mining town

Chartier, Alain (älĕ' shartyā'), b c 1385, d 1433 or before, French poet, secretary to Charles VII The conventional love poem *La Belle Dame sans mercy* (1424) provided Keats with a title An anti-English political pamphlet in prose, *Le Quadrilogue invectif* (1422), is his most original work

Chartism, workingmen's reform movement in Great Britain, 1838–48 The failure of the Reform Bill of 1832 to extend the vote to the laboring classes and the prevailing economic depression induced wide popular approval of the "People's Charter," a document drafted by William Lovett and Francis PLACE, advocating universal manhood suffrage and other political reforms The movement, which had the support of the trade unions and such leaders as Feargus O'CONNOR, represented the first attempt of the British working classes to gain political power During the period of its influence, some rioting occurred in industrial centers, the general strike was also used Though a number of parliamentary reforms were stimulated by Chartist activities, the movement died out, partly because of a schism between moderate and extreme factions and partly as a result of increasing general prosperity See Mark Hovell, *The Chartist Movement* (new ed , 1925), J L LeB Hammond and Barbara Hammond, *The Age of the Chartists* (1930), G D H Cole, *Chartist Portraits* (1941)

Chartres, Robert d'Orléans, duc de. see ORLÉANS, family

Chartres (shär'trŭ), city (pop 23,509), capital of Eure-et-Loire dept , N France, on the Eure river and SW of Paris Of great antiquity, Chartres was the probable site of the great assemblies of the DRUIDS The region, a county in the 10th cent , passed to the counts of Blois, who in 1286 sold it to the French crown, it became part of Orléanais prov Louis XIV gave Chartres as an appanage to his brother, Philippe I, duc d'Orléans, and made it a duchy Hence members of the house of Bourbon-Orléans have carried the title The fame of Chartres is due to its magnificent Cathedral of Notre Dame (12th–13th cent), remarkable for its two spires (375 ft and 350 ft), its STAINED GLASS windows, and its sculpture Henry Adams, in *Mont-Saint-Michel and Chartres*, made it a symbol of the medieval spirit Here St Bernard of Clairvaux preached the Second Crusade (1146), and Henry IV was crowned king of France (1594) The church of St Pierre (11th–13th cent) contains enamel paintings of the twelve apostles by Léonard Limousin Among buildings damaged in the Second World War was the 17th-century town hall, but many medieval and Renaissance houses survived Chartres is the grain-trading center of the Beauce region

chartreuse (shärtrûz', –trüz'), a LIQUEUR made exclusively by Carthusians at their monastery, La Grande Chartreuse, until their expulsion from France in 1903. The French distillery and trademark were sold, and the order set up a new plant in Tarragona, Spain The monks' product is identified by the name *Laqueur des Pères Chartreux* Readmitted to France in 1938, the Carthusians resumed manufacture there. Green chartreuse contains about 57 percent alcohol, the sweeter yellow variety, about 43 percent

Chartreuse, Grande (grād' shärtrûz'), mountainous massif (highest point 6,847 ft), SE France, in the Dauphiné Alps, N of Grenoble Here in a high valley St BRUNO founded (1084) the famous monastery, La Grande Chartreuse, the principal seat of the CARTHUSIANS until 1903, when the order was expelled from France and its seat transferred to Tarragona, Spain The convent was several times destroyed, the present buildings (now a museum) date mainly from the 17th cent

Charybdis (kŭrĭb'dĭs), in Greek legend, whirlpool inhabited by a greedy monster, near the rock of SCYLLA

Chase, Mary Ellen, 1887–, American educator and novelist, b Blue Hill, Maine, grad Univ. of Maine, 1909 She taught (1918–26) English at the Univ of Minnesota, where she received her Ph D in 1922, and went to Smith College in 1926 Her works set in Maine, excellent for their regional fidelity, include the novels *Mary Peters* (1934), *Silas Crockett* (1935), and *Windswept* (1941) and a biography, *Jonathan Fisher* (1948) *The Plum Tree*, a short novel of a home for the aged, was published in 1949 See her autobiographical *A Goodly Heritage* (1932) and *A Goodly Fellowship* (1939)

Chase, Philander, 1775–1852, American Episcopal bishop, b Cornish, N H., grad Dartmouth, 1796 After experience as a missionary in the West, he was elected (1818) first bishop of Ohio, where he founded Kenyon College in 1824 with funds which he secured largely in England In 1835 Chase became bishop of Illinois, from 1843 he was presiding bishop of the Church See his *Reminiscences* (1848), biography by L C Smith (1903)

Chase, Pliny Earle, 1820–86, American scientist, b Worcester, Mass , grad Harvard, 1839 From 1871 he was professor at Haverford College Besides arithmetic texts which were widely used for a generation, he wrote *Elements of Meteorology* (1884) and papers on meteorological, physical, and philosophical subjects

Chase, Salmon Portland, 1808–73, American statesman, b Cornish, N H For three years before entering the junior class at Dartmouth (grad 1826), he lived with his uncle, Philander Chase, first Episcopal bishop of Ohio He himself was also deeply religious, even puritanical In Washington, D C (1826–29), while running a "select classical seminary," he studied law under William Wirt, and after being admitted to the bar in 1829, he returned to Cincinnati to practice He defended runaway Negroes so often that he became known as "attorney general for fugitive slaves " Chase, prominent in the Liberty party and later in the Free-Soil party, was elected by a coalition of Free-Soilers and antislavery Democrats to the U S Senate, where (1849–55) he eloquently opposed such proslavery measures as the Compromise of 1850 and the Kansas-Nebraska Bill As zealous for public office as he was in the antislavery cause, Chase was elected governor of Ohio in 1855 by still another political combination, in which the Know-Nothings were dominant, but by 1857, when he was reelected, he was a leading member of the new Republican party Chase was a splendid figure of a man, a "sculptor's ideal of a President," and few Americans have ever gone after that high office with more determination —or less success He sought the Republican nomination in 1860, but since he lacked the full support of even his own state's delegation and since many considered him an extreme abolitionist, his chance passed quickly Again elected to the Senate, he served only two days in March, 1861, before resigning to become Lincoln's Secretary of the Treasury In that difficult position he took part in framing for Congress the new fiscal legislation necessitated by the Civil War, collected new taxes, placed unprecedentedly large loans with reluctant investors, and directed vast expenditures To assist in government financing and also to improve the status of the currency, he proposed the national bank system (established in Feb , 1863), which is generally considered his greatest achievement Although Lincoln had a high regard for his obvious abilities, Chase somewhat resented the President and completely disliked the idea of occupying a position second to William H SEWARD, the Secretary of State He and Secretary of War Edwin M STANTON had close relations with the anti-Lincoln radical Republicans of Congress. Meanwhile, with the large patronage at his disposal, he was busily at work to secure the presidential nomination in 1864 At least four times Chase had, for various reasons, offered his resignation, which was never accepted, and he thus considered himself indispensable to Lincoln But his next offer, made (June 29, 1864) after the President had overruled him on an important appointment, was promptly accepted, much to his astonishment and chagrin His campaign for the presidential nomination also collapsed Chase was still, however, an important national figure, and on Dec 6, 1864, after the death of Roger B Taney, Lincoln appointed him Chief Justice of the U S Supreme Court. He took a moderate stand in most of the important Reconstruction cases. His dissenting opinion in the SLAUGHTERHOUSE CASES subsequently became the accepted position of the courts as to the restrictive force of the Fourteenth Amendment. On the other hand, his decision (1870) in *Hepburn vs Griswold* (see LEGAL TENDER CASES) was soon reversed For his fairness in presiding over the Senate in the impeachment trial of President Andrew Johnson, he was furiously denounced by his old radical friends Chase, abetted by the beautiful and talented Katherine Chase Sprague, his devoted daughter by the second of his three wives (all of whom were short-lived), persisted in seeking the presidential will-o'-the-wisp. His daughter, a shrewd politician herself, worked hard, but neither the Democrats in 1868 nor the Liberal Republicans in 1872 were interested in her father See his diary and correspondence (1903), biography by A B. Hart (1899); D V Smith, *Chase and Civil War Politics* (1931); T H Williams, *Lincoln and the Radicals* (1941); B J Hendrick, *Lincoln's War Cabinet* (1946).

Chase, Samuel, 1741–1811, American Revolutionary patriot, signer of the Declaration of Independence, Associate Justice of the U S. Supreme Court, b. Somerset co , Md He studied law (1759–61) in Annapolis, became active in pre-Revolutionary activities, and was a delegate to the First and Second Continental Congresses. In 1776 he was appointed, together with Benjamin Franklin and Charles Carroll of Carrollton, to win Canada to the Revolution, but the plan failed Chase helped to swing Maryland to support of independence from Great Britain Although he vigorously opposed adoption of the U S Constitution, he later became a Federalist and in 1796 was appointed to the U S Supreme Court A series of brilliant and influential decisions established his leadership in the court until he was eclipsed by the rising genius of John Marshall The failure (1804) to convict him when he was impeached for alleged political partiality against Jeffersonians discouraged attempts to impeach justices for purely political reasons

Chase, Stuart, 1888–, American economist, b Somersworth, N H , studied (1907–8) at Massachusetts Institute of Technology, grad Harvard, 1910 He was a certified public accountant (1910–17) and later (1917–22) investigated the meat-packing industry for the Federal Trade Commission From 1922 to 1939 he was associated with Labor Bureau, Inc , as a research economist, and he served as a consultant with the National Resources Committee (1934), the Resettlement Administration (1935), the Securities Exchange Commission (1939), and the Tennessee Valley Authority (1940–41) He is the author of many articles and books on economics which have contributed greatly to a popular understanding of the "economy of abundance " Among his best-known works are *The Tragedy of Waste* (1925), *Your Money's Worth* (with F J Schlink, 1927), *Men and Machines* (1929), *Mexico a Study of Two Americas* (with Marian Tyler, 1931), *The Economy of Abundance* (1934), *Rich Land, Poor Land* (1936), *The Tyranny of Words* (1938), *Idle Money, Idle Men* (1940), and *The Proper Study of Mankind* (1948)

Chase, William Merritt, 1849–1916, American painter, b Williamsburg, Ind , studied in Indianapolis and in Munich under Piloty In 1878 he began his long career as an inspiring teacher at the Art Students League of New York and later established his own summer school of landscape painting in the Shinnecock Hills, L I Proficient in many media, Chase is best known for his spirited portraits and still lifes in oil His *Carmencita, Lady in Black*, and portrait of Whistler (all Metropolitan Mus) and *My Daughter Alice* (Cleveland Mus) are characteristic He was president of the Society of American Artists for 10 years and a member of the National Academy of Design Recipient of numerous awards, Chase is represented in many leading American galleries See K M Roof, *Life and Art of William M Chase* (1917)

Chase City, town (pop 1,896), S Va , SW of Petersburg between the Meherrin and Roanoke rivers, inc 1873 It is a tobacco market and trade center for a farm area

chasing, the art, employed from very ancient times, of ornamenting metal surfaces with indented lines formed by chasing tools struck with a flat-headed chasing hammer *Repoussé* work is usually finished with chasing on the face of the metal The Greeks excelled in chasing armor, jewelry, and the drapery on statuettes The goldsmiths of the Italian Renaissance were especially adept A fine example is Cellini's Rospighosi cup in the Metropolitan Museum of Art The term *chasing* is applied also to touching up a casting to remove roughness

Chaska (chăs'ku), city (pop 1,927), co seat of Carver co , E Minn , on the Minnesota and SW of Minneapolis, settled 1853, inc as a village 1871, as a city 1891 It is a shipping center for a farm and dairy area and has a beet-sugar factory In the city park are Indian mounds

Chaskoi: see ISTANBUL, Turkey.

Chassepot, Antoine Alphonse (ătwän' älfôs' shäspō'), 1833–1905, French inventor. He invented the Chassepot breech-loading rifle adopted by the French army in 1866 and used in the Franco-Prussian War.

Chassériau, Théodore (tāōdôr' shäsārēō'), 1819–56, French painter, b Santo Domingo, studied with Ingres in Rome At the age of 17 he gained immediate recognition with the exhibition of his *Cain, Cursed* and *Return of the Prodigal* These early works showed the classical influence of his master, but Chassériau soon developed a highly original style of great freedom Such works as *Two Sisters*, the portrait of Lacordaire, *Arabian Challenge*, and *Tepidarum* (all Louvre) brought him lasting fame as one of the great painters of his century. Even more important, perhaps, were his

mural decorations for the Church of St. Méry, Paris, and above all those for the Palais d'Orsay. The latter have been destroyed save for a few fragments preserved in the Louvre His untimely death cut short one of the most brilliant careers in the history of French painting.

Chassidim · see HASIDIM.

Chastelard, Pierre de Boscosel de (pyĕr' dŭ bôscōsĕl' dŭ shătŭlär'), c 1540–1563, French minor poet, famed for his connection with Mary Queen of Scots He accompanied Henri, comte de Damville (later duc de Montmorency), in Mary's cortege to Scotland in 1561 Madly in love with the queen, who exchanged verses with him, he hid in her bedchamber and was discovered and forgiven When he repeated the offense, he was executed This story is the subject of a drama by Algernon Charles Swinburne.

Chastellain, Georges (zhôrzh' shatŭlĕ'), c 1405–1475, French chronicler, historiographer to the dukes of Burgundy His *Grande Chronique*, covering the years 1419–70, is a valuable source

Chastellux, François Jean, marquis de (frăswä' zhă' markĕ' dŭ shătŭlŭ'), 1734–88, French author and soldier in the Seven Years War and the American Revolution He is chiefly known for his *Travels in North America in 1780, 1781, and 1782* (2 vols, 1786, Eng tr, 1787), a vivid and fairly accurate account of life in the United States He was elected to the French Academy in 1775 See J G Simcoe, *Remarks on the Travels of the Marquis of Chastellux* (1931)

chat, largest of the American warblers The yellow-breasted chat is a shy bird, nesting in dense thickets of the E United States and wintering in Mexico and Central America Its upper parts are olive green and its throat and breast bright yellow, fading to white below The eyes are rimmed with white, and the bill is large Its song of varied, imitative sounds is jerky and unmelodious In W North America is found the long-tailed chat In Europe the name chat is applied to several birds—the wheater, the whinchat, and the stonechat

château (shătō', Fr shatō'), royal or seigniorial residence and stronghold of medieval France—the counterpart of the English CASTLE of the period In such a fastness peasants of the surrounding country took refuge in time of war The early fortified château, called a *château-fort*, reached its culmination in the late 15th cent, when the magnificent feudal Pierrefonds was built near Compiègne The 16th-century château, with its gardens and outbuildings, was usually surrounded by a moat, but was only lightly fortified Notable châteaux of the transition period between the military château and the later country estate with extensive landed property are those of the Loire, Indre, and Cher valleys, such as Amboise, Blois, Chenonceaux, Azay-le-Rideau, and Chaumont

Chateaubriand, François René, vicomte de (frăswa' runä' vēkōt' du shătōbrē'), 1768–1848, French writer, b Saint-Malo He visited the United States in 1791 and afterward pretended to have searched for the Northwest Passage, although he apparently did not go beyond Niagara Falls He returned to France, but became an émigré and lived in England until 1800 In England he published his first book, *Essai historique, politique, et moral sur les révolutions* (1797) *The Genius of Christianity* (1802, Eng tr, 1856) and two extracts from it, *Atala* (1801, Eng tr, 1814) and *René* (1802), made him the most important author of his time in France In 1803 Napoleon appointed him secretary of the legation to Rome and minister to Valais, but in 1804, upon the execution of the duc d'Enghien, he resigned these posts and became a bitter anti-Bonapartist In 1806 he visited Greece, Jerusalem, and Spain He supported the Bourbons and became a peer in 1815, minister plenipotentiary at the Congress of Verona (1822), ambassador to London (1822), and minister of foreign affairs (1823–24), but in 1830 he abandoned political affairs He was for many years the friend of Mme Récamier His other works include *The Martyrs* (1809, Eng tr, 1812, 1859), which celebrated the victory of Christianity over paganism, *Itinéraire de Paris à Jerusalem* (1811); and *Les Aventures du dernier Abencérage* (1826), which has been compared, for its description of the Alhambra, with Washington Irving He devoted his last years to his *Mémoires d'outre-tombe*[memoirs from beyond the tomb] (1849–50) Chateaubriand was the true founder of romanticism in France, and his prose enriched the language His accounts of travel were plagiaristic and partly imaginary, but rich, noble, and moving See biographies by André Maurois (1938, Eng tr, 1938) and Joan Evans (1939).

Château d'If (shătō" dēf'), castle built in 1524 on the small rocky isle of If, off Marseilles, SW France Long used as a state prison, it has been made famous by Alexandre Dumas in his *Count of Monte Cristo*.

Château Gaillard (shătō' glär') [Fr, =castle saucy], fortress built (1196) by RICHARD I of England, in defiance of his treaty obligations, to protect Normandy from Philip II of France. Its ruins stand on a crag above the Seine near Les Andelys, France. It is one of the finest examples of medieval military architecture. Philip II, after a long siege, took it by assault in 1204 DAVID II of Scotland took refuge here in 1334, and it was the prison of CHARLES II of Navarre in 1356. In 1591 Henry IV of France had it dismantled.

Chateauguay (shă"tugā', shă"tugä'), village (pop 1,183), N N Y, NE of Malone; settled 1796, inc 1869 Near the Quebec line, it is a port of entry

Chateauguay, Fr *Châteauguay*, river rising in Chateaugay Lake in the Adirondacks, NE N Y, and flowing through Quebec to empty into the St Lawrence c 14 mi above Montreal and opposite the mouth of the Ottawa river In the War of 1812 the battle of Chateauguay was fought (1813) on this river in Quebec between an American invading force of 7,000 under Wade Hampton and some 750 Canadians and Indians The Americans, attempting to join the forces of Gen James Wilkinson, met with defeat, and the contemplated attack on Montreal was abandoned

Châteauguay (shatōgā'), town (pop 1,425), S Que, on the Châteauguay river and SW of Montreal

Château-Renault, François Louis Rousselet, marquis de (frăswa' lwē' rōōsulā' markĕ' du shătō'-runō'), 1637–1716, French vice admiral, marshal of France He escorted James II to Ireland (1689), fought at Beachy Head (1690), and commanded the Franco-Spanish fleet at VIGO (1702)

Châteauroux (shătōrōō'), town (pop 31,195), capital of Indre dept, central France, on the Indre river It has textile, metal, and tobacco manufactures

Château-Thierry (shătō-tyĕrē'), town (pop 7,283), Aisne dept, N France, in Champagne, on the Marne During the second battle of the Marne (1918), in which the last German offensive was stopped mainly by U S troops, Château-Thierry as well as the near-by town of La Fère-en-Tardenois, to the west, and BELLEAU WOOD, to the east, were focal points The imposing monument to the Americans, just outside the town, remained undamaged in the Second World War, but the monument to the U S 3d Division, in Château-Thierry, was destroyed The house where La Fontaine was born is now a museum

Châtelet, marquise du see DU CHÂTELET-LOMONT

Châtellerault (shatĕlrō'), town (pop 19,216), Vienne dept, W central France, on the Vienne river It has important manufactures of firearms and cutlery

Chatfield, farm trade city (pop 1,640), SE Minn, SE of Rochester, founded before 1856

Chatham, William Pitt, 1st **earl of** (chă'tum), 1708–78, English statesman He was the younger son of a country squire whose family wealth had been made in India Educated at Eton and at Oxford, he entered Parliament in 1735 Immediately he opposed the weak foreign policy of the Whig prime minister, Sir Robert Walpole, and supported the opposition party of Frederick, prince of Wales, against King George II His criticism of Walpole's conduct of the war with Spain (the War of the Austrian Succession) was largely responsible for Walpole's downfall in 1742 Though George II detested Pitt and the court circle distrusted him, the early disasters in the SEVEN YEARS WAR gave the Great Commoner such an opportunity to denounce government policies in his eloquent speeches that in 1756 Pitt was made a secretary of state and the next year he headed a coalition ministry with Thomas Pelham Holles, duke of Newcastle His subsidies to Frederick II of Prussia, his efficient handling of military supplies, his shrewd choice of commanders, his frankness, and his ability to raise English morale resulted in crushing the French power in India and in capturing the French provinces in Canada George III on coming to the throne (1760) forced him to resign, and as a result Pitt was to see some of the war's gains thrown away in the Treaty of Paris (1763) He joined the opposition in attacking the harsh American policy of the "king's friends" In 1766 he was recalled to office as lord privy seal and created earl of Chatham Soon forced out of public life (1767) by mental disorder, he returned in 1768 In his rare speeches in the House of Lords thereafter, he urged conciliation of the colonies, and after the outbreak of the American Revolution he favored any peace settlement short of granting the colonies independence On this issue he broke with the Whigs, and his last speech was a plea against the disruption of the empire he had done so much to build At its conclusion he collapsed and was carried home to die. Proud, dramatic, patriotic, Pitt excelled as a war minister, an orator, and a politician By his honest reports on the war to the nation when he was prime minister and by his demands for electoral reform and his insistence on the constitutional rights of Englishmen, he advanced England's progress toward democracy—an advance his son, William Pitt, was to carry on See biographies by Basil Williams (2 vols, 1913) and W. C. B. Tunstall (1938); C G Robertson, *Chatham and the British Empire* (new ed, 1948)

Chatham. **1** Town (pop 4,082), E N B, on the estuary of the Miramichi river. It has an excellent harbor with steamer communication to other river and coast points and has shipyards, pulp mills, and a large lumber trade; it is also a major fishing center There is a Roman Catholic cathedral The population is mainly Acadian French **2** City (pop 17,369), S Ont, E of Detroit, Mich, on the Thames river, which gives it connection with Lake St Clair and thus with the Great Lakes It is an industrial center, in a rich mixed farming and fruit-raising region The site was selected by Lieutenant Governor Simcoe in 1795, but settlement dates from c 1835

Chatham, municipal borough (1931 pop 42,999, 1947 estimated pop 41,360), Kent, England, on the Medway above its junction with the mouth of the Thames It is a great naval station, with a 3-mile river front, extensive well-equipped dockyards, dry docks, and shipbuilding and repairing equipment The borough is contiguous to ROCHESTER There are indications of Roman settlement The first dockyard here was established by Elizabeth in 1588

Chatham. **1** Resort and fishing town (pop 2,136), SE Mass, on S Cape Cod, settled 1665, inc 1712 The town has a lighthouse and a U S coast guard station Some 18th-century buildings remain **2** Residential suburban borough (pop 4,888), NE N J, on the Passaic and W of Newark, settled 1749, inc 1897 It has a pre-Revolutionary inn **3** Village (pop 2,254), E N Y, SE of Albany, inc 1869 It is a railroad junction with small manufactures **4** Town (pop 1,230), SW Va, N of Danville in the Blue Ridge foothills, inc 1852 The courthouse of Pittsylvania co is here Preparatory schools for girls and boys are in the town

Chatham Island · see SAVAII

Chatham Islands, group (373 sq mi, pop 505), S Pacific, c 400 mi E of New Zealand, to which it belongs The two largest islands are Chatham Island, containing a large central lagoon, and Pitt Island The inhabitants engage in sheep raising The islands were discovered in 1790 by the British

Châtillon, Sébastien, see CASTALION, SÉBASTIEN

Châtillon-sur-Seine (shătēyō'-sür-sĕn'), town (pop 1,857), Côte-d'Or dept, E France, on the Seine A residence of the early dukes of Burgundy, it has a 10th-century church The town was damaged in the Second World War Here Napoleon I and his opponents unsuccessfully sought a peace settlement (Feb–March, 1814)

Chatrian, Alexandre see ERCKMANN-CHATRIAN

Chatsworth, seat of the dukes of Devonshire, in Derbyshire, England, near the Derwent The famous Chatsworth House, on the site of a house built in the middle of the 16th cent, dates from 1688 Its gardens, libraries, picture galleries, and collections of sculpture are noted

Chatsworth. **1** City (pop 1,001), co seat of Murray co, NW Ga, near the Tenn line NE of Rome It is the center of a talc-mining area Near by are Fort Mountain State Park and the site of a Moravian mission (1802–33) **2** Farm town (pop 1,036), N central Ill, NE of Bloomington, laid out 1858, inc 1867

Chattahoochee (chătuhōō'chē), river rising in N Georgia, flowing generally south c 420 mi, and meeting the Flint at the Fla line to form the Apalachicola It is navigable to Columbus It forms part of the Georgia-Alabama and Georgia-Florida boundaries

Chattanooga (chătŭnōō'gu), city (pop 128,163), co seat of Hamilton co, E Tenn, on Moccasin Bend of the Tennessee near the Ga line, inc as a town 1841, as a city 1851 It is almost surrounded by mountains, including Missionary Ridge, Signal Mt, and Lookout Mt Settled in 1815 as a trading post called Ross's Landing, it was laid out in 1837 as Chattanooga A center first of salt shipping and then of cotton shipping on the river, the city expanded with the arrival of the railroads in the 1840s and '50s It was of great strategic importance in the Civil War (see CHATTANOOGA CAMPAIGN) Southeast and southwest of the city lies Chickamauga and Chattanooga National Military Park (in two distinct parts, 6,277 4 acres in Georgia, 1,849 76 acres in Tennessee, est 1890), embracing the battlefields of the campaign Adjacent to the southeast section of the park, in Georgia, is Fort Oglethorpe, a military post In the city itself are a Confederate cemetery and a national cemetery Chattanooga is now a port of entry and an important industrial, railroad, market, and resort center for a widespread area yielding coal and iron, farm produce, and timber The city's diversified manufactures include textiles, hosiery, chemicals, and iron and steel products Electric power, augmented in recent years by the TVA project, has played an important role in the city's development—Chickamauga Dam is near by—and various other factors have multiplied greatly the population of the metropolitan district (193,215 in 1940) The Univ of Chattanooga (Methodist, coeducational, 1889) and Chattanooga College of Law are in the city Adolph S Ochs owned the Chattanooga *Times* from 1878 until his death

Chattanooga campaign, Aug–Nov, 1863 In the Civil War, Chattanooga, which commanded Confederate communications between the East and the Mississippi river and was also the key to loyal East Tennessee, became an important Union objective as early as 1862 (see BUELL, DON CARLOS).

In 1863 ROSECRANS, commanding the Army of the Cumberland, obliged Braxton BRAGG to withdraw his Confederate army from middle Tennessee (June–Aug) and maneuvered him out of Chattanooga (Aug. 16–Sept 8) Bragg withdrew to Lafayette, Ga , c.24 mi south, and with reinforcements marched back and attacked Rosecrans at Chickamauga Creek, c 12 mi S of Chattanooga In the battle of Chickamauga (Sept 19–20), the Confederates routed the Union right but could not crush the left under George H THOMAS, who held off the enemy until Rosecrans ordered him to withdraw to Chattanooga Bragg then took up a position extending along Missionary Ridge across Chattanooga Valley to Lookout Mt and laid siege to the town An alarmed Federal administration at Washington called for U S GRANT, who arrived at Chattanooga on Oct 23, 1863. Generals W F SMITH and Joseph HOOKER executed a coup (Oct 26–29) that restored a sorely needed supply line on the Tennessee river, so Grant was ready to move by late November Sherman, who had brought up reinforcements from Vicksburg, commanded the right, Thomas, the center, and Hooker, with two corps from the Army of the Potomac, the left On Nov 24, Hooker drove the Confederates from Lookout Mt in the Battle above the Clouds On Nov 25, Sherman could make no headway against Missionary Ridge from its northern end, so Grant ordered the center to advance Thomas's men proceeded to carry Bragg's position at the top, where Hooker's forces joined them in routing the Confederates By nightfall Bragg was in full retreat to Georgia The victory left Chattanooga in Union hands for the rest of the war

chattel (chă'tŭl), in law, any property other than a FREEHOLD estate in land A chattel is treated as personal property rather than real property regardless of whether it is movable or immovable (see PROPERTY). Certain uses of the term (e g , chattel mortgage) refer only to movable property Otherwise the term also includes chattels real, i e , those estates in land which do not constitute a freehold

Chatterton, Thomas, 1752–70, English poet, posthumous son of a Bristol writing master At 12 Chatterton was already composing the "Rowley Poems," saying they were copies of 15th-century manuscripts at the Church of St. Mary Redcliffe, Bristol, where his grandfather had been sexton. In 1769 he sent some of these forgeries to Walpole, who was enthusiastic about them When he discovered the age of his correspondent, Walpole returned the poems to Chatterton—a crushing blow to the sensitive boy. Chatterton went to London in 1770. After four months of trying, with small success, to sell his poems to various magazines, he was on the point of starvation Too proud to borrow or beg, he poisoned himself and died at the age of 17 An original genius as well as an adept forger, Chatterton used 15th-century vocabulary, but his rhythms and his approach to poetry were much more modern The "Rowley Poems" were soon recognized as forgeries, but the vigor and medieval beauty of such poems as "Mynstrelles Songe" and "Bristowe Tragedy" established Chatterton as a precocious genius and later made him a hero to the romantic and Pre-Raphaelite poets. See his works (ed by H. D. Roberts, 2 vols , 1906), biography by W M Dixon (1930)

Chaucer, Geoffrey (jĕf'rē), c 1340–1400, English poet He is the most important figure in English literature before Shakspere The known facts of Chaucer's life are fragmentary and are based chiefly on official records He was born in London between 1340 and 1345, the son of John Chaucer, a vintner In 1357–58 he was a page in the household of Prince Lionel, and later he seems to have been in the service of John of Gaunt In 1359–60 he was with the army of Edward III in France, where he was captured by the French but ransomed In 1367 he is described as a valet of the king's household, and by this year he was firmly established in a career at court. In 1366 or earlier he had married Philippa (de Roet?), a lady-in-waiting to Queen Philippa. During the years 1370–78 Chaucer was frequently employed on diplomatic missions to the Continent, visiting Italy in 1372–73 and again in 1378. From 1374 on, he held a number of official positions, comptroller of the customs on wool and hides at the port of London (1374–86), comptroller of petty customs (1382–86), knight of the shire for Kent (1386), clerk of the king's works (1389–91). The traditional date of his death is Oct 25, 1400 Chaucer's literary activity can be divided into three periods. (1) From the beginning to c 1375, during which time his work was based on French models, primarily on the *Roman de la Rose* and Guillaume de Machaut Chaucer's chief works of this period are a partial translation of the ROMAN DE LA ROSE and the *Book of the Duchesse*, written on the death of Blanche, wife of John of Gaunt, in 1369. (2) From the time of Chaucer's introduction to Italian literature (through his two visits to Italy) until c.1385. The chief works of this period are the *House of Fame* and the *Parliament of Fowls*, in both of which the influence of Dante was strong, and the translation of Boethius' *De consolatione philosophiae*. (3) The period of Chaucer's full artistic power. *Troilus and Criseyde*, a poem in five books, based on Giovanni Boccaccio's story *Filostrato* (see TROILUS AND CRESSIDA), was written probably in 1385–86 The *Legend of Good Women*, a collection of stories of historic women noted for their constancy, with a charming prologue, was begun c.1385 but never finished, the poet's interest soon being absorbed by the *Canterbury Tales* The *Canterbury Tales* are a collection of stories represented as being told by the members of a pilgrims' party going from London to the shrine of St Thomas at Canterbury This narrative frame, presented in detail in the Prologue to the *Tales*, is similar to that of Boccaccio's *Decameron* and was a frequent device in medieval literature The *Canterbury Tales*, begun probably c 1387 and left unfinished at the poet's death, present a splendid pageant of English life in the Middle Ages Written mainly in heroic couplets, the whole work is about 17,000 lines long Probably between 1387 and 1391 Chaucer wrote his prose fragment *The Treatise on the Astrolabe* for his son Lewis Although Chaucer was by no means the "father of English poetry," as he has been called, a primary result of his work was to reestablish the prestige of the English language as a vehicle for literary expression His poetry is also a landmark in the history of English versification He was the first English poet to use the iambic PENTAMETER, since then a fundamental part of the equipment of English poets, and he introduced a number of elaborate stanza forms, chief of which was the seven-line stanza later called rhyme royal In the use of rhythmical variation within the line, he anticipated Spenser and later poets, Because of the changes which took place in the English language after 1400, Chaucer did not have the immediate influence he deserved upon English poetry, his metrical technique being incomprehensible to his successors, and though his fame as a narrative artist has always been secure, it is only in quite recent times that he has been recognized as one of the greatest of English metrists In the 15th and 16th cent it was only in Scottish literature that his genius was really understood and his influence properly felt The best editions of all the works are those by F N Robinson (1933) and W W Skeat (7 vols , 1894–1900), of the *Canterbury Tales* alone, those by J M Manly (1928) and J M Manly and Edith Rickert (8 vols , 1940) Important also is *The Sources and Analogues of Chaucer's Canterbury Tales*, edited by W F Bryan and Germaine Dempster (1941) There is a prose translation of the complete works by J S. P Tatlock and Percy MacKaye (1912), of the *Canterbury Tales* by R M. Lumiansky (1948), and a verse translation of *Troilus and Criseyde* by G P Krapp (1932) See also W W Skeat, *The Chaucer Canon* (1900), G L Kittredge, *Chaucer and His Poetry* (1915), J M Manly, *Some New Light on Chaucer* (1926), R D French, *A Chaucer Handbook* (1929), J L Lowes, *Geoffrey Chaucer and the Development of His Genius* (1934), H R Patch, *On Rereading Chaucer* (1939), biography by Marcette Chute (1946) For background see G C Coulton, *Chaucer and His England* (3d ed , 1921), Edith Rickert and others, *Chaucer's World* (1948),

Chaudière (shōdyĕr'), river, c 120 mi long, rising in SE Quebec immediately N of the Maine-Que boundary and flowing NW to the St Lawrence just above the city of Quebec It drains the east half of the so-called "Eastern Counties" of Quebec

Chaudière Falls, in the Ottawa river in the heart of the city of Ottawa, Ont The river is narrowed by rocky cliffs to a width of but 200 ft and drops about 50 ft Several bridges cross the river here, passing over the falls

Chauliac, Guy de (gē' du shōlyăk'), c 1300–c 1370, French surgeon Most of his life was spent at Avignon, where he was physician to Pope Clement VI and to two of his successors His *Chirurgia magna* (1363, pub 1478) was used as a manual by physicians for three centuries

chaulmoogra oil (chălmōō'gru), volatile oil from the seeds of an Asiatic tree, *Taraktogenos* (or *Hydnocarpus*) *kurzii*, which has been found efficacious in the treatment of leprosy and other skin diseases Derivatives, chiefly esters, of the oil are generally given by intramuscular injection The curative properties of chaulmoogra oil have long been known to natives of India and SE Asia, but not until recently was it used in Western medicine as a remedy for leprosy

Chaumette, Pierre Gaspard (pyĕr' gäspär' shōmĕt'), 1763–94, French revolutionist, an extremist and an agitator. A member of the CORDELIERS, he collaborated with HÉBERT in attempting to stamp out all royalists and in introducing (1793) the worship of Reason Chaumette was general prosecutor (1792–94) and principal leader of the Paris commune Though he instituted social and moral reforms in the city, his private life is reputed to have been not above reproach. When Robespierre turned upon the Hébertists, Chaumette vainly tried to escape execution by renouncing Hébert

Chaumonot, Joseph Marie (shōzĕf' mărē' shōmō-nō'), 1611–93, French Roman Catholic missionary to New France, a Jesuit. He arrived in 1639 in Quebec. He worked first with Brébeuf among the Huron near Georgian Bay until the massacres and destruction by the Iroquois (1649); he escaped and led 400 Huron to the reservation appointed for them on the Ile d'Orléans at Quebec He next went into central New York to preach to the Iroquois (1655–58) and then returned to Quebec, where he remained His autobiography is important, and his Huron grammar is unique.

Chaumont (shōmō'), town (pop. 15,068), capital of Haute-Marne dept , NE France, in Champagne It manufactures linen and cutlery, and there are quarries near by In the First World War, Chaumont served as American field headquarters. For the Treaty of Chaumont (1814), see QUADRUPLE ALLIANCE.

Chaun Bay (shōōn'), inlet of the Arctic Ocean, RSFSR, in NE Siberia, at lat 69° N It receives the Chaun river (c 100 mi. long).

Chauncey, Isaac, 1772–1840, American naval officer, b Black Rock, Conn He entered the navy (1799) and served in the hostilities with France and in the Tripolitan War. In the War of 1812 he was given command of Lake Erie and Ontario and established his headquarters at Sackets Harbor Chauncey assembled a formidable fleet In 1813 he defeated a British squadron under Sir James Yeo at York Bay and aided the army in taking York (now Toronto) and Fort George The next year he failed to support Gen. Jacob Brown in his York campaign and was relieved of his command He later (1816–18) commanded the Mediterranean squadron

Chauncey, village (pop 1,234), SE Ohio, N of Athens, in a coal-mining area

Chauncy, Charles, 1705–87, American Congregational clergyman, b Boston, grad Harvard (B.A , 1721, M A , 1724). He was ordained minister of the First Church, Boston, in 1727 and remained in this pulpit for 60 years Next to Jonathan EDWARDS, his great opponent, Chauncy was probably the most influential clergyman of his times in New England. As an intellectual he distrusted emotionalism and opposed the revivalist preaching of the GREAT AWAKENING in his *Seasonable Thoughts on the State of Religion in New England* (1743) and other pamphlets He became the chief leader of the "Old Lights" or liberals in theology in the doctrinal disputes following the Great Awakening He was also the leader in the opposition to the establishment of an Anglican bishopric in the American colonies, writing his *Compleat View of Episcopacy* (1771) and other works on the subject A firm believer in the patriot cause, he clearly set forth the political philosophy of the American Revolution in sermons and pamphlets during the period After the war he came out boldly as a Universalist in his *Salvation for All Men* (1782) and *The Mystery Hid from Ages and Generations* (1784). See Williston Walker, *Ten New England Leaders* (1901)

Chautauqua (shutôk'wu), resort village (pop c 300), W N Y , on the west shore of Chautauqua Lake Here is the site of the Chautauqua Institution, which since 1874 has offered popular summer lectures and concerts

Chautauqua Lake, 18 mi long and 1 to 3 mi wide, W N Y , near Lake Erie, in a resort area It lies at an altitude of 1,308 ft , in a region producing grapes and other fruits

Chautauqua movement, development in adult education somewhat similar to the LYCEUM movement It derives its name from the institution at Chautauqua, N Y There in 1873 John Heyl VINCENT and Lewis Miller proposed to the Methodist Episcopal camp meeting they were attending that secular as well as religious instruction be included in the summer Sunday-school institute. Established on that basis in 1874, the institute developed into an eight-week summer program, offering courses in arts, science, and humanities Thousands attend the institution each year For those who cannot attend, there are courses for home study groups, and lecturers are sent out to supplement the material furnished from the organization's publishing house Other communities were inspired to form local Chautauquas, and possibly two or three hundred were organized, though few were so successful as the original To lecture to their members these local groups brought authors, explorers, musicians, and political leaders, and a variety of entertainment was furnished The Chautauquas had something of the spirit of the revival meeting and something of the county fair In 1912 the movement was organized commercially, and lecturers and entertainers were furnished to local groups on a contract basis This commercial endeavor was extremely successful, persisting until c.1924, soon after that the circuits ended, although the assembly at Chautauqua continued. See J H Vincent, *The Chautauqua Movement* (1886), A E. Bestor, *Chautauqua Publications* (1934); Gay MacLaren, *Morally We Roll Along* (1938); Rebecca Richmond, *Chautauqua: an American Place* (1943), Victoria Case and R O Case, *We Called It Culture. the Story of Chautauqua* (1948).

Chautemps, Camille (kämē'yŭ shōtă'), 1885–, French politician, a Radical Socialist leader. He held numerous cabinet posts and was premier in 1930 and in 1933–39, when the STAVISKY AFFAIR (in which he was not directly implicated) caused

his resignation. **Chautemps was a member of the** first Popular Front cabinet under Léon Blum (1936–37) and headed the second, less radical, Popular Front cabinet (1937–38). In 1940 Chautemps came to the United States on a mission for the Vichy government, but he did not return and abandoned politics. In 1947 he was tried and convicted *in absentia* for his connection with the Vichy regime The fairness of the trial has been questioned

Chauveau, Pierre Joseph Olivier (pyĕr' shōzō' ōlēvyā' shōvō'), 1820–90, French Canadian politician, educator, and author, b Quebec, educated at the Quebec seminary In 1841 he was called to the bar He sat in the Canadian legislative assembly from 1844 to 1855 (serving as solicitor general and provincial secretary in the Hincks-Morin ministry and as provincial secretary in the MacNab-Morin ministry), but resigned (1855) to become superintendent of education in Lower Canada During his tenure of this post, normal schools were established and separate schools were created for English-speaking and French-speaking students With the achievement of confederation (1867) Chauveau became the first prime minister of the province of Quebec He remained premier until 1873 (holding the portfolios of minister of education and provincial secretary), when he was appointed to the Canadian Senate, of which he was speaker (1873–74) In 1878 he became professor of Roman law at Laval Univ Chauveau wrote the novel *Charles Guérin* (1852), several biographies, poetry, and essays, including *L'Instruction publique du Canada* (1876)

Chauveau-Lagarde, Claude François (klōd' frāswā' shōvō'-lägärd'), 1756–1841, French lawyer Having defended Brissot, Charlotte Corday, Marie Antoinette, and others before the Revolutionary Tribunal, he was imprisoned under the Terror but was saved through the overthrow of Robespierre (1794)

Chauvenet, William (shōvūnā'), 1820–70, American mathematician and astronomer, b Pike co , Pa , grad Yale, 1840 He held the post of professor of mathematics in the U S navy from 1841 to 1859 He was active in the establishment of the Naval Academy at Annapolis and became director of its observatory In 1859 he went to St Louis, Mo , as professor of mathematics and astronomy in Washington Univ , where he later became chancellor. His works include the *Treatise on Plane and Spherical Trigonometry* (1850) and *Manual of Spherical and Practical Astronomy* (1863)

Chauve-Souris see Baliieff, Nikita

chauvinism (shō'vŭnĭzm), word derived from the name of Nicolas Chauvin, a soldier of the First French Empire Used first for a passionate admiration of Napoleon, it now expresses exaggerated and aggressive nationalism As a social phenomenon, chauvinism is essentially modern, becoming marked in the era of acute national rivalries and imperialism during the 19th cent It has been fed by mass media of communication, originally the cheap newspaper Chauvinism exalts consciousness of nationality, spreads hatred of minorities and other nations, and is associated with militarism, imperialism, and racism The constant state of international crisis in the 20th cent has tended to make chauvinism endemic among large numbers in all nations See J. A Hobson, *Psychology of Jingoism* (1901)

Chaux-de-Fonds, La (lä shō-dŭ-fō'), town (pop 30,943), Neuchâtel canton, Switzerland A watchmaking industry was begun here c 1700

Chavannes, Puvis de see Puvis de Chavannes

Chávez, Carlos (kär'lōs chā'vās), 1899–, Mexican composer and conductor He established (1928) and was conductor of the Symphony Orchestra of Mexico and was director (1928–34) of the National Conservatory of Music, where he radically reformed the curriculum He has done much research in native Indian music and used Indian instruments in his *Xochipili Macuilxochitl* (1940). His works are strongly national and employ incisive rhythms In some the influence of Stravinsky is evident Important works are the ballet *El fuego nuevo* (1921), the first work of his mature period; the ballet-symphony *H P.* [horsepower] (1926–27); *Sinfonía Antígona* (1933), for Cocteau's version of Sophocles' drama; *Sinfonía india* (1935–36), composed in the United States, *La paloma azul* (1940), for chorus and orchestra, and a piano concerto (1941) His philosophy of music is presented in his book, *Toward a New Music* (Eng tr , 1937) See Aaron Copland, *Our New Music* (1941).

Chaykovsky, Nikolai Vasilyevich (nyĭkulī' vŭsē'lyŭvĭch chĭkŏf'skē), 1850–1926, Russian revolutionist Studying at St Petersburg, he helped to found the Chaykovsky circle, an idealistic socialist group which subsequently developed into the *Narodniki* [populists] movement He emigrated to the United States and established (1875) an agricultural communistic settlement in Kansas; the aim of its members was to "seek God in themselves " The experiment failed after two years Chaykovsky settled (1880) in London, but in 1905 returned to Russia, where he was a leader of the People's Socialist party. He opposed the Bolshevik Revolution of 1917, headed (1918–19) the counterrevolutionary government at Archangel under the auspices of the Allied expeditionary force, and joined (1920) General Denikin in the Crimea When the Bolsheviks gained full victory, he fled to Paris, where he died. The name may also be spelled Tchaikovsky.

Chazars: see Khazars.

Cheaha (chē'hô), peak, 2,407 ft. high, E Ala., in the Talladega Mts S of Anniston, highest point in Alabama. It is included in a state park

Cheapside [O E *cēap*=bargain], street in the City of London, the most important market center of medieval London It runs from St Paul's churchyard to the Bank of England Tournaments and occasionally executions took place here Some of its ancient guildhalls were destroyed or damaged in the Second World War. The Mermaid Tavern was in the district

Cheat, river formed at Parsons, N W Va., by the Shavers and Black forks and flowing c 78 mi. N to the Monongahela at Point Marion, Pa

Cheb, Czechoslovakia see Eger

Chebar (kĕ'bär), canal of Mesopotamia, on which captive Jews were settled. Ezek. 1 1,3; 3.15

Chebeague Island see Great Chebeague Island.

Cheboksary (chŏbŭksä'rē), city (pop 12,246), capital of Chuvash Autonomous SSR, E European RSFSR, on the Volga It is the center of an agricultural region and the site of a projected hydroelectric plant Founded in 1556, it has a 16th-century monastery, a 17th-century cathedral, and a Chuvash museum Its schools include an agricultural college and a teachers college

Cheboygan (shĭboi'gŭn), city (pop 5,673), co. seat of Cheboygan co , N Mich , on the south channel of the Straits of Mackinac at the mouth of the Cheboygan, settled 1857, inc as a village 1871, as a city 1889 Once an important lumber town, it is now a resort, farm trade center, commercial fishing port, and port of entry Among its manufactures are tissue paper and other wood products Near by is a large biological station of the state university.

Cheboygan, river rising in N Michigan, draining Mullett Lake, and flowing into Lake Huron at Cheboygan, on the Straits of Mackinac It was important during the lumbering era

Chechen (chĭchĕn'), Moslem people native to the northern slopes of the central Greater Caucasus, SE European RSFSR They speak a North Caucasian tongue (see Caucasus) During the first half of the 19th cent , particularly during the Shamyl rebellion, the Chechen fought ferociously against the Russian forces until 1859 In 1934 the Chechen, numbering c 400,000, and the closely related Ingush (c 90,000) were merged to form an autonomous oblast, made an autonomous republic (6,100 sq mi , pop 697,408) in 1936 In the Second World War the Chechen and Ingush collaborated with the German invaders. As a result the republic was dissolved (1944), most of it becoming part of Groźny oblast, the rest passing to Dagestan, the North Ossetian Autonomous SSR, and Georgia The Chechen and the Ingush were resettled elsewhere in Russia

check or cheque, a Bill of exchange drawn upon a bank or trust company or broker connected with a clearing house It calls for the payment to the bearer or to a specified person of a certain amount of cash on presentation to the bank or other drawee, payment to be made from the funds of the maker or drawer on deposit with the drawee It is intended for prompt presentation, rather than for use as a continuing currency When the check is presented, the drawee pays the designated sum to the holder and cancels the check, which is then returned to the drawer as his receipt To prevent fraud, checks are usually of tinted paper and are filled in with ink, the figures may be punched out of the paper or embossed But a check is good even if written in lead pencil on any kind of paper Many business houses use the check as their sole receipt Whether or not the check will be paid by the banker depends upon his recognition of the drawer's signature and upon the banker's confidence in the person presenting the check for payment A bank becomes primarily liable for payment only when it "certifies" on a check that the necessary funds are in the bank to the credit of the drawer However, a bank is usually responsible to its depositor for paying forged checks All checks accepted by a bank are turned over daily to a clearing house, which cancels checks due from and to all banks of a given neighborhood, the balances alone being paid in cash. Instead of cashing their incoming checks, business houses usually deposit them as received and draw their own checks for payment of their debts Checks were probably used in Italy in the 15th cent and in Holland in the 16th, whence their use spread to England and the American colonies in the 17th cent Their use to first place as a medium of exchange in industrialized nations took place in the 19th cent , their importance varying with differences in banking facilities, the density of population, and commercial activity. About 90 percent of all transactions in the United States and England are said to be effected by checks.

See W. E Spahr, *The Clearing and Collection of Checks* (1926).

checkerberry: see wintergreen

checkers, game for two players, known in England as draughts It is played on a square board, divided into 64 alternately colored—usually red and black or white and black—square spaces, identical with a chessboard Each player is provided with 12 pieces (in the form of disks) of his own color, and all play is conducted on the black squares Players sit on opposite sides of the board and move their pieces diagonally in a forward direction Upon reaching the last rank of the board, pieces are "crowned," and the kings may move both backwards and forwards diagonally. The object is to trap or eliminate from play the opponent's pieces by "jumping" them. The game has been played in Europe since the 16th cent , and a similar game was certainly known to the ancients See Edward Lasker, *Chess and Checkers the Way to Mastership* (1948)

Checotah (shŭkō'tŭ), city (pop. 2,126), E Okla., SW of Muskogee, settled 1872 It is the trade center of a farm and livestock area

Cheddar (chĕ'dur), village, Somerset, England, near the Mendip Hills SW of Bristol There is a famous gorge near, with cliffs, stalactite caves, and vestiges of prehistoric settlement

Cheddar cheese, hard rennet cheese For over two centuries a noted product of the vicinity of Cheddar, it was probably the first to be made by an exact recipe The method has been widely adopted especially in the United States, Canada, and Australia

Chedorlaomer (kĕd'urlā'ŏmur, -lāō'-), king of Elam With him were allied Amraphel, king of Shinar, Arioch, king of Ellasar, and Tidal, "king of nations." They attacked the Cities of the Plain and were pursued and slain by Abraham Gen 14 1–16

cheese, food known from ancient times and consisting of the curd of milk separated from the whey The milk of mares and goats was used by the ancient Greeks, camel's milk by the early Egyptians, the reindeer's by the Laplanders Sheep's milk and goat's milk are still used in Europe and Asia, in the Western Hemisphere cow's milk is most common The milk may be raw or pasteurized, sweet or sour, whole, skimmed, or with added cream The chief milk protein, casein, is curdled or coagulated by the enzyme action of rennet or pepsin, by lactic acid produced by bacterial action, or by a combination of both The draining off of the whey (milk serum) may be facilitated by heating, cutting, and pressing the curd The yield of cheese ranges from 8 to 16 lb per 100 lb of milk and is higher for the soft cheeses, which retain more moisture The numerous cheeses (often named for their place of origin) are of about 18 varieties and depend for their distinctive qualities on the kind and condition of the milk used, the processes of making, and the method and extent of curing They may be divided into two classes, hard cheeses, which improve with keeping under suitable conditions, and soft cheeses, intended for immediate consumption Hard cheeses include the very hard Cheddar, Edam and Gouda (Dutch), Emmental or Gruyère (Swiss), and Parmesan and the semihard Stilton, Roquefort, Gorgonzola, and American brick Soft cheeses are cottage cheese, cream cheese, Neufchâtel (French), and ripened Camembert, Brie, and Limburger (which originated in Belgium) Microorganisms introduced or permitted to develop in cheese, especially during the ripening process, impart distinctive flavors and textures Roquefort, Stilton, and Gorgonzola owe their bluish marbling to molds, Emmental and brick are ripened by bacteria which produce gas, entrapped in the curd to form holes; Limburger attains a creamy consistency through bacteria-ripening During the curing period the casein is broken down into more soluble and digestible form by enzyme action Cheese is valuable in the diet as a source of complete protein, fat, insoluble minerals (calcium, phosphorus, sulphur, and iron), and, when made from whole milk, vitamin A American cheddar, process cheese, and cottage cheese lead in the U S market, which also consumes considerable quantities of domestic Limburger, Roquefort (called blue cheese), cream, Neufchâtel, Swiss, brick, and Camembert, as well as some imported cheeses Process cheese is a blend of young and ripened cheeses or of different varieties, ground, heated with water and up to 3 percent of emulsifying salts, and poured into molds, usually loaf-shaped It is often homogenized and pasteurized Cheese, especially in the United States, is increasingly made in the factory by application of the principles of microbiology and chemistry Jesse Williams is credited with establishing in 1851 a cheesery in Oneida co , N Y Wisconsin has displaced New York state as the largest producer Whey, a by-product of cheese making, consists of water, lactose, albumin, soluble minerals, fats, and proteins Formerly wasted or used in livestock feeding, whey is now used for the preparation of milk sugar, lactic acid, glycerin, and alcohol, or is condensed and added to process cheese, or spray-dried. It may be made into cheese

such as the Scandinavian primost and mysost. See H C Sherman, *Food Products* (1933); A L Simon, *Catechism concerning Cheeses* (1936), C H. Eckles and others, *Milk and Milk Products* (2d ed , 1943).

cheetah (chē'tŭ) or **hunting leopard**, member of the cat family, native to Asia and Africa From early times it was tamed and used to hunt game, especially antelopes The common African cheetah (*Acinonyx jubatus*) is about the size of a leopard and has long legs and a tawny coat with round black spots. In India the cheetah is almost extinct

Chefoo, China see YENTAI

Chehalis (chĭhā'lĭs), city (pop 4,857), co seat of Lewis co , SW Wash , on the Chehalis river, inc 1890 Lumbering, food processing, and coal mining are carried on A state park and a state school for boys are here

Chehalis, river, c 115 mi long, rising in SW Washington near the Willapa Hills and flowing NW to Grays Harbor

Cheju (chĕ'jōō'), Jap *Saishu*, island (713 sq mi ; 1949 pop 254,589), Korea, in the East China Sea. It is an extinct volcano which rises to 6,398 ft There is agriculture, cattle raising, and fishing. It was formerly called Quelpart.

Cheka · see SECRET POLICE

Chekhov, Anton Pavlovich (chĕ'kôf, Rus ŭntôn' pāv'lŭvĭch chĕ'khŭf), 1860–1904, Russian short-story writer and dramatist His natural talent for writing found an outlet first in the comic magazines, for which as a university student he wrote quantities of brilliant, if trifling, potboilers He began serious writing in 1886 with the story "Mass for the Dead," published in the St Petersburg daily *New Times* In this as in all his hundreds of stories, the prevailing theme is man's essential loneliness and inevitable frustration A typical story is "The Chorus Girl" (1884, Eng tr in *Tales from Chekhov*, Vol VIII, 1920) Chekhov's style is simple and clear, his attitude toward his characters sympathetic yet realistic He never indulges in social criticism, yet none has portrayed with greater fidelity the dullness and stagnation of Russian life in his day In 1887 he turned to the drama with *Ivanov* (Eng tr , 1912) His success as a dramatist dates from the Moscow Art Theatre's performance in 1898 of a previously unsuccessful play, *The Sea Gull* (Eng tr , 1905) Many of Chekhov's stories and dramas have been translated, especially the short, humorous sketches and *Uncle Vanya* (1899), *The Three Sisters* (1901), and his masterpiece, *The Cherry Orchard* (1904), all of which were made available in 1923, at the time of the Moscow Art Theatre's visit to the United States See his *Letters to His Family and Friends* (Eng tr , 1920) and *Personal Papers* (Eng tr , 1948), Maxim Gorky, *Reminiscences of Tolstoy, Chekhov, and Andreev* (Eng tr , 1934), W H Bruford, *Chekhov and His Russia* (1948), biographies by W A Gerhardi (1923) and N. A. Toumanova (1937)

Chekiang (chĕ'kyäng'), Mandarin *Cheh-chiang*, province (39,632 sq mi , pop 21,157,009), SE China, on the China Sea The capital is Hangchow The province includes many islands, notably the Chusan Archipelago The coast is heavily indented, but the mountainous hinterland allows only a few breaks to the interior, chiefly at Ningpo and Wenchow There is extensive fishing Chekiang is fertile, particularly in the Yangtze delta plain in the north, where beans, rice, cotton, hemp, jute, and mulberry trees (for silk culture) are raised Tea is grown on the hill slopes The only important mineral resource is alum Manufactures of silk thread and satin cloth, chiefly at Hangchow, are the chief industries The Chientang and Wu rivers are the main communication routes

Chelal (kē'lăl) [Heb ,=perfection], Israelite of the return Ezra 10 30

Chelan (chĭlăn'), trading and tourist town (pop 1,738), central Wash , at the outlet of Lake Chelan near the Columbia, settled 1892, inc. 1902

Chelan, Lake, c 50 mi long and from ½ to 1½ mi. wide, in Chelan co , N central Wash , fed by streams from the Cascade Range Several resorts are here The **Chelan Mountains,** an eastern branch of the Cascades, run parallel to the lake on the west

Cheliuh (kē'lĭ'ŭ), Jew who had married a foreign wife Ezra 10 35

Chelm, Pol *Chełm* (khĕ'ŏŏm), Rus *Kholm* (khôlm), city (pop 23,329), SE Poland, E of Lublin Chiefly a trade center, it also has a metal industry Chelm became (13th cent) a bishopric of the Orthodox Eastern Church and is noted for its cathedral. It passed to Austria in 1795 and to the Russian Empire in 1815 and reverted to Poland in 1921 After the Second World War some of Chelm's Ukrainian population was evacuated to the USSR.

Chelmno, Pol. *Chełmno* (khĕ'ŏŏmnô), Ger. *Kulm* (kōōlm), town (pop 11,634), Pomorze prov , W Poland, near the Vistula Dating from the 10th cent , Chelmno was transferred (13th cent) to the Teutonic Knights, passed to Poland (15th cent), was included in Prussia (1772), and reverted to Poland in 1919 Mainly a trade center, it also produces foodstuffs Some historical structures remain. Napoleon I was defeated (1813) near by

Chelmsford, Frederic John Napier Thesiger, 1st Viscount (nā'pēur, thĕ'sĭjŭr, chĕms'fûrd), 1868–1933, British viceroy of India. After being governor of the states of Queensland and New South Wales in Australia (1905–13), he went to India, becoming viceroy in 1916. His regime was noteworthy for the Montagu-Chelmsford Report, which brought about a large measure of self-government for the Indians. The limitations of the reforms, however, were opposed by Mohandas GANDHI, and the resulting disorders culminated in serious disturbances at AMRITSAR. Lord Chelmsford returned to England in 1921 He served as first lord of the admiralty in the Labour government of 1924

Chelmsford, municipal borough (1931 pop 26,537; 1947 estimated pop 35,680), county town of Essex, England, at the junction of the Cann and the Chelmer, near the coast ENE of London It has a grammar school founded by Edward VI The town is a commercial and minor manufacturing center for an agricultural region

Chelmsford (chĕms'furd, chĕlms'-), town (pop. 8,077), NE Mass , SW of Lowell, settled 1633, inc. 1655 It has wool-processing plants

Chelsea (chĕl'sē), metropolitan borough (1931 pop 59,031, 1948 estimated pop 50,890) of W London, England, N of the Thames A literary and artistic quarter of London, Chelsea has associations with many famous persons, including Sir Thomas More, Carlyle, D G Rossetti, Whistler, Dickens, Charles Kingsley, and Oscar Wilde The district suffered great damage in the air raids of 1940–41 Chelsea Old Church, founded in the 12th cent , was completely destroyed, and the Royal Hospital for veteran soldiers, built (1682–92) by Wren, was badly damaged CHELSEA WARE was made here

Chelsea. **1** Town (pop 2,280), SW Maine, SE of Augusta, inc 1850 It is the site of a U S home for disabled soldiers **2** City (pop 41,259), E Mass , northeastern industrial and residential suburb of Boston, settled 1624, inc as a town 1739, as a city 1857 Textiles, shoes, and chemicals are among its products Chelsea has a naval hospital and a soldiers' home On April 12, 1908, fire destroyed much of the city **3** Village (pop 2,246), S Mich , near Ann Arbor, in a rich farm area, settled c 1850, inc before 1870, reinc 1889 Its products include hardware and flour **4** Oil city (pop 1,642), NE Okla , NE of Tulsa **5** Town (pop 1,013), co seat of Orange co , central Vt , SSE of Barre, crossed by the First Branch of the White River As Gageborough, it was granted by New York c 1770, in 1781 Bela Turner and others secured a Vermont charter to "Turnersburgh", the town was settled in 1784 and renamed in 1788

Chelsea ware, made in the early 18th cent at a factory in Chelsea, London, reputedly by John DWIGHT Up to 1745 the potter's mark was a triangle with the word *Chelsea* and the date The factory then came under the direction of Nicholas Spermont, who developed the finest ware made in England—the inspiration for the Sèvres porcelain in France. Spermont's mark was an anchor, sometimes with a dagger Besides a deep blue, gold-decorated type, there were characteristic figure subjects, miniatures for curtain tiebacks, scent bottles, dressing-table accessories, and toys The soft paste of which the china was made lent itself to both modeling and painting The plant was merged with the DERBY factory in 1770, and Chelsea ware is a collector's favorite

Cheltenham (chĕl'tnŭm), municipal borough (1931 pop 49,418, 1947 estimated pop 62,420), Gloucestershire, England, on the Chelt, a tributary of the Severn, and near the Cotswolds It has been a resort since 1716, when mineral springs were discovered here It is a hunting center Cheltenham College (for boys, 1841) is a well-known public school, Cheltenham Ladies' College was founded in 1853

Chelub (kē'lŭb) **1** Judahite 1 Chron 4 11. **2** Father of David's officer Ezri 1 Chron. 27 26

Chelubai (kĕlū'bī), same as CALEB.

Chelyabinsk (chĭlyä'bĭnsk), city (1926 pop 59,307; 1939 pop 273,127, 1946 est pop 450,000), capital of Chelyabinsk oblast, RSFSR, in W Siberia, in the southern foothills of the Urals and on the Miass river It is a rail center on the Trans-Siberian RR and one of the major metallurgical and industrial centers of the USSR It produces steel, pig iron, tractors, aircraft, agricultural machinery, and chemicals, and it processes zinc and bauxite Founded in 1658 as a Russian frontier stronghold, it was chartered in 1745 and developed as an agricultural and coal-trading town In the 19th cent Chelyabinsk became a major resettlement center for emigrants to Siberia Its industrial growth began (1928) with the building of its first metallurgical plant and was greatly stimulated in the Second World War because of the general relocation of Russian industries

Chelyuskin, Cape (chĭlyōō'skĭn), northernmost point (lat 77° 41′ N) of the Asiatic continent and of Taimyr peninsula, Krasnoyarsk Territory, RSFSR, in Siberia, named after an 18th-century Russian navigator, It is the site of a communications and observation post and an airfield Cape Severovostochny [northeast cape] is another name.

Chemarims (kĕm'ŭ-), Gentile priests, a term left untranslated at Zeph. 1.4 only.

chemical affinity: see CHEMICAL REACTION.

chemical engineering: see ENGINEERING.

chemical reaction. Changes in matter involving the internal structure of the molecule of a substance are classed as chemical changes; the action taking place in such a change is called a chemical reaction When, for example, water is decomposed, its molecules, each of which consists of one atom of oxygen and two of hydrogen, are broken down, the hydrogen atoms then combining in pairs to form hydrogen molecules and the oxygen atoms to form oxygen molecules In a chemical reaction, substances lose their characteristic properties Water, for example, a liquid which neither burns nor supports combustion, is decomposed to yield inflammable hydrogen and combustion-supporting oxygen In a chemical reaction there are also energy changes. For example, in some reactions heat is given off (exothermic reactions) and in others heat is absorbed (endothermic reactions) Furthermore, the new substances formed differ from the original substances in the energy they contain Chemical reactions are classified according to the kind of change that takes place When a compound substance is broken down into its constituents, the reaction is called simple decomposition When two compounds react with one another to form two new compounds, the reaction is one of double decomposition In so-called replacement reactions the place of one of the elements in a compound is taken by another element reacting with the compound When elements combine to form a compound, the reaction is termed chemical combination (see SYNTHESIS) OXIDATION AND REDUCTION reactions are extremely important Reversible reactions are those in which the chemical change taking place may be paralleled by another change back to the original substances The rates at which chemical reactions proceed depend upon various factors, e g , upon temperature, pressure, and the concentration of the substances involved and, sometimes, upon the use of a catalyst (see CATALYSIS) In some chemical reactions, as that for photographic film, light is an important factor The changes taking place in a chemical reaction are represented by an EQUATION The attractive force exerted between atoms (i e , the tendency of one element to react with another) causing them to enter into and remain in combination is called chemical affinity Elements differ from each other in this characteristic, and the atoms of a single element show varying degrees of affinity toward atoms of different elements

chemical warfare, in its widest sense, the application of chemical knowledge for offensive or defensive purposes in hostilities It has, however, been commonly used in recent times to refer primarily to the use of poison gases and the development of protection against them Chemical knowledge was, of course, employed in fighting long before there was any really organized study of chemistry Crude devices were used by the ancient Greeks and Romans, many of them dependent on fire (e g , the fumes from burning straw and fire from heated oil), and the use of Greek fire was reasonably extensive in flame-throwing devices among the Byzantines and among the Chinese The development of gunpowder was in itself an achievement of chemistry, and the principle of propulsion of a missile by the action of gases was learned in chemical experimentation Thus, chemistry is basic to the most fundamental factor in modern warfare Its wide effects in the modern world in general (e g , the creation of new processes and the development of synthetic substances) have also been felt constantly in warfare—increasingly so, as the days of nitrogen fixation and such products as synthetic rubber advance By the mid-19th cent the possibility of the use of poison gas as a weapon was already envisaged and was viewed by most men with a peculiar horror—a feeling that has persisted The Hague Conference in 1899 adopted regulations against its employment The first effective use of poison gas came in the First World War on April 22, 1915, when the Germans released chlorine gas against the Allies in the Ypres sector of the Western Front The success was immediate, but the attackers seemed to be as startled as the attacked and did not exploit their advantage Shortly afterward protective measures were introduced as both sides used gas more extensively and employed different types (see POISON GAS). The gas shell (much more usable than wind-blown gas) was introduced by the French Gas did not, however, have any dominant influence on the course of the war, though it did seem to point toward wide-scale use in future hostilities Despite the arguments of some scientists, popular horror of gas warfare persisted, and by the Geneva Convention of 1925 the major nations of the world agreed to ban its use That prohibition held, except for some employment of gas by the Italians in the war against Ethiopia in 1935–36 and by the Japanese against Chinese guerrillas. Despite the guarantee, most of the major nations had sections of their armed forces devoted to the study and development of chemicals in warfare, with emphasis on gas and protection against it. The U.S chemical warfare service was founded in 1920, and as the Second World War approached,

the activities at Edgewood Arsenal in Maryland and at other centers increased greatly. In the war the major combatants all had large stocks of poison gas but none was used—at least partially out of fear of retribution. In the war the Germans developed a new gas that reputedly is most effective in attacking the nerves of the victims, but the fears of the people of the world (reflected in wholesale distribution of gas masks to the civilian population) were not realized. Even more of a Sunday-supplement scare was the possibility of biological warfare—the spreading of deadly germs among the enemy population. This also did not come to pass, though it was revealed after the war that a deadly botulinus toxin had actually been prepared in minute quantities by the United States. Other aspects of chemical warfare, however, saw great developments in actual use. Flame throwers, used somewhat in the First World War, were much more commonly employed in the Second World War, and several types of thickened gasoline were devised for use in them. A chemical mortar was developed by the United States and effectively used. New types of incendiary bombs were devised. Most important of all was the use of nuclear fission and the invention of the atomic bomb. Atomic warfare does not preclude the use of poison gas, germs, and other chemical means in a new war, particularly if the warfare should be stationary like the First World War rather than mobile like the Second World War. The fear of such means has grown rather than diminished among the general public. A little ironically, however, the development of chemical warfare has had some indisputably beneficial results, not only in medicine (e.g., the use of BAL, the British-developed protection against the gas lewisite, to save patients afflicted with mercurial or other heavy-metal poisoning), but in various homely ways (e.g., development of insecticides, rat poisons, and weed killers).

Chemin des Dames (shmē dā dám'), road running along a crest between the Aisne and Ailette rivers, Aisne dept., N France. It was hotly contested in the First World War. The Germans, who commanded the road after 1914, were dislodged by the Allies in battles of 1917–18.

chemistry, the science dealing with the nature and composition of all kinds of matter and the changes which matter constantly undergoes. The characteristic appearance and behavior of the various substances are described in their physical and chemical properties, the changes which take place when substances react with one another are indicated by chemical equations. Matter is divided into two general categories—elements which are represented by symbols and compounds of which the composition is described by formulas. Some substances are mixtures of elements or compounds or both. The composition of compound substances is determined by analysis—the determination of the elements present (qualitative analysis) and the proportionate amount of each by weight (quantitative analysis). Some compounds are prepared by synthesis, the combination of the constituent elements according to their correct proportion by weight. The study of the carbon compounds is known as organic chemistry, and the study of elements and compounds of elements other than carbon (but including a few simple oxides of carbon and metallic carbonates) comprises inorganic chemistry. Each branch of applied chemistry is a specialized study of some specific part of the field. Industrial chemistry, chemical engineering, biochemistry, electrochemistry, and physical chemistry are among these branches. The study of the nature, composition, and activity of the various substances was pursued by the ancients. See also ALCHEMY and BIOCHEMISTRY. Among the more famous contributors to chemistry are DEMOCRITUS, Georg AGRICOLA, J. R. GLAUBER, Robert BOYLE, Joseph BLACK, Henry CAVENDISH, K. W. SCHEELE, Joseph PRIESTLEY, Antoine LAVOISIER, C. L. BERTHOLLET, John DALTON, J. L. GAY-LUSSAC, Amadeo AVOGADRO, Sir Humphry DAVY, J. J. BERZELIUS, D. I. MENDELEJEFF, R. W. BUNSEN, Lord RAYLEIGH, Sir William RAMSAY, A. H. ARRHENIUS, A. E. BECQUEREL, Marie CURIE, Sir Ernest RUTHERFORD, J. J. THOMSON, C. T. R. WILSON, W. H. BRAGG and W. L. BRAGG, Henry MOSELEY, and Friedrich WÖHLER. See Sir W. A. Tilden, *Famous Chemists* (1928) and *Chemical Discovery and Invention* (rev. ed., 1936), A. F. Collins, *The March of Chemistry* (1936), William Foster, *The Romance of Chemistry* (2d ed., 1936), E. E. Slosson, *Creative Chemistry* (rev. ed., 1942), J. N. Shreve, *Chemical Process Industries* (1945), S. S. Sadtler, *The Chemistry of Familiar Things* (8th ed., 1946), J. R. Partington, *Everyday Chemistry* (2d ed., 1947) and *A Short History of Chemistry* (2d ed., 1948); Alexander Findlay, *A Hundred Years of Chemistry* (2d ed., 1948); Bernard Jaffe, *Crucibles: the Story of Chemistry* (rev. ed., 1948); H. L. Riegel, *Industrial Chemistry* (rev. ed., 1949).

Chemnitz or **Kemnitz, Martin** (both kĕm'nĭts), 1522–86, German Lutheran theologian. He accepted and defended Lutheran doctrine, both in lecturing and in writing. Largely through his endeavors the Formula of Concord, one of the nine creeds of the Book of Concord, was adopted by the Lutherans of Saxony and Swabia. He wrote various polemical works.

Chemnitz (kĕm'nĭts), city (1939 pop. 337,657, 1947 pop. 250,188), Saxony, SE Germany, on the Chemnitz river. Near one of the world's largest open-pit lignite mines, Chemnitz is the leading industrial center of Saxony, with manufactures of machine tools, machinery, chemicals, and textiles. Of Wendish origin, it was chartered in 1143, when it was also granted a linen-weaving monopoly. It was devastated in the Thirty Years War, but the introduction (17th cent.) of cotton weaving restored its prosperity. Chemnitz was heavily bombed in the Second World War.

Chemosh (kē'mŏsh), god of the Moabites. Solomon erected an altar to him at Jerusalem, Josiah destroyed it. Num. 21:29, 1 Kings 11:7, 2 Kings 23:13, Jer. 48:7,13,46. See MILCOM.

Chemulpo (chă'mōōl'pŏ'), Jap. *Jinsen*, city (1946 pop. 215,784), S Korea, a port on the Yellow Sea with an ice-free harbor. It was opened to foreign trade in 1883. Steel, textiles, and flour are manufactured.

Chemung (shĭmŭng'), river formed in S New York by the junction of the Cohocton and Tioga rivers near Corning and flowing c.45 mi. SE past Elmira to the Susquehanna near Sayre, Pa. The Chemung valley was the scene of fighting in the Revolutionary campaign of John SULLIVAN, the battle of Newtown occurred in 1779 near the site of Elmira.

chemurgy (kĕ'mûrjē), branch of applied chemistry concerned with the preparation of industrial materials from agricultural products. Among such materials are BAKELITE, CELLULOSE, FURFURAL, and SOYBEAN products. See W. J. Hale, *Farmward March. Chemurgy Takes Command* (1939), Christy Borth, *Pioneers of Plenty* (1942 ed.).

Chenaanah (kēnā'ənŭ, –nā-ă'–) **1** Benjamite. 1 Chron. 7:10. **2** Father of Zedekiah, Ahab's false prophet. 1 Kings 22:11,24, 2 Chron. 18:10,23.

Chenab (chĕnŭb'), river, c.675 mi. long, rising in Punjab state, India, and flowing through Himachal Pradesh and Kashmir to join the SUTLEJ river in Punjab prov., Pakistan. The Chenab is one of the five rivers of the Punjab. It supplies water to important irrigation works.

Chenango (shĭnăng'gō), river rising in central New York SW of Utica and flowing c.90 mi. S and SW to the Susquehanna at Binghamton. It receives the Tioughnioga (tĭōōk"nēō'gŭ) at Chenango Forks.

Chenani (kēnā'nī), Levite. Neh. 9:4.

Chenaniah (kĕnənī'ə), Levite. 1 Chron. 15:22,26:29.

Cheney, John (chē'nē), 1801–85, American engraver and illustrator, b. Hartford co., Conn. He practiced engraving in Hartford and Boston and in 1830 went to Paris to study, supporting himself by engraving for American publishers. He was in great demand as an illustrator of annuals, his engravings, usually small, ranked high in his day for their delicacy, simplicity, and careful workmanship. The Pennsylvania Academy of the Fine Arts and the Museum of Fine Arts, Boston, possess collections of his works. See biography by E. D. Cheney (1889). His brother, **Seth Wells Cheney**, 1810–56, American engraver and crayon artist, b. Hartford co., Conn., studied painting with E. L. G. Isabey and Delaroche in Paris and practiced engraving with considerable success. *Mother and Child*, after Washington Allston, is his finest plate. After 1840, in his Boston studio, he won renown with his crayon portraits. Among his sitters were Theodore Parker, William Cullen Bryant, Ephraim Peabody, and James Russell Lowell. See biography by E. D. Cheney (1881); S. R. Koehler, *Catalogue of the Engraved and Lithographed Works of John Cheney and Seth Wells Cheney* (1891).

Cheney, John Vance (chē'nē), 1848–1922, American author, b. Groveland, N.Y. He was librarian of the San Francisco Public Library and later of the Newberry Library in Chicago. His writings comprise books of verse and several volumes of critical essays, notably *The Golden Guess* (1892) and *That Dome in Air* (1895).

Cheney, Seth Wells: see CHENEY, JOHN.

Cheney, city (pop. 1,551), E Wash., SW of Spokane, founded 1880, inc. 1883. A state teachers college is in Cheney.

cheng, Chinese stringed instrument similar to the zither. See also SHENG, for which the spelling *cheng* is occasionally used.

Chengchow, China: see CHENGHSIEN.

Chenghsien or **Cheng-hsien** (both chŭng'shyĕn), city and county (pop. 197,187), N Honan prov., China, on the Yellow River. The city is the junction of the Lung-Hai RR with the Peiping-Hankow RR. It is thus one of the chief rail centers of China. The city was formerly named Chengchow.

Chengteh or **Chêng-tê** (both chŭng'dŭ'), city (pop. 162,195), capital of Jehol prov., NE China, near the Lwan river. Chengteh is N of Peiping, with which it is connected by rail. The summer capital of the Ch'ing dynasty (1644–1911), Chengteh is surrounded by large parks with lakes, palaces, and pavilions. The most notable building is a Lamaist temple duplicating the main shrine in Lhassa, Tibet. Chengteh was formerly called Jehol. See Sven Hedin, *Jehol, City of Emperors* (1933).

Chengtu or **Ch'eng-tu** (both chŭng'dōō'), city (pop. 647,877), capital of Szechwan prov., SW China, a port on the Min river. It is the commercial center of the Chengtu plain, the main farming area of Szechwan.

Chénier, André Marie de (ādrā' mārē' dŭ shānyā'), 1762–94, French poet, by some critics considered the greatest in 18th-century France. He was born of a Greek mother at Constantinople, where his father was consul general, and was educated in France. From 1787 to 1790 he was attached to the French embassy in London. Horrified by Jacobin excesses in 1792, he contributed denunciatory pamphlets to the *Journal de Paris*, organ of moderate royalism. He was arrested in March, 1794, by order of Robespierre, and was guillotined only three days before the end of the Terror. Chénier vivified the old French classical tradition in his *Élegies* and *Bucoliques*. The *Iambes* are stirring political satires in verse. Most of his works were published after his death, *La Jeune Captive*, one of his most beautiful poems, appearing in 1795 and the first collected edition of his works in 1819. He inspired the opera *Andrea Chénier* by Umberto Giordano.

Chénier, Marie Joseph de (mārē' zhōzĕf'), 1764–1811, French poet and dramatist, b. Constantinople, brother of André de Chénier. A member of the Convention, the Council of Five Hundred, and the Tribunate, he also wrote a number of political and historical plays. Of these, *Charles IX* (1789) created the greatest stir and is still played. Besides the comprehensive *Tableau historique de l'état et des progrès de la littérature française depuis 1789* (1816), he is famous for his songs of the Revolutionary epoch, particularly the *Chant du départ*.

Chennault, Claire Lee (shĕ'nôlt"), 1890–, American general, b. Commerce, Texas, grad. Louisiana State Normal School. A high school teacher at first, he was commissioned in the First World War and pioneered in air pursuit tactics. Retired (1937) from the army, he went to China and organized air defenses for Chiang Kai-shek. He formed (1941) the American Volunteer Group (the "Flying Tigers"). Recalled (1942) to duty, he headed the U.S. air task force in China and retired (1945) as a major general.

Chenoa (shĭnō'ə), city (pop. 1,401), N central Ill., NE of Bloomington, in a fertile farm area, laid out 1856, inc. 1865.

Chenonceaux (shunōnsō'), village, central France, in Touraine, near Amboise. It is famous for its château, the residence of Diane de Poitiers and Catherine de' Medici. Philibert Delorme in 1560 added a wing which bridges the Cher river (about 200 ft. wide). Its style inclines toward classic simplicity.

Cheops: see KHUFU.

Chepachet, R.I.: see GLOCESTER.

Chephar-haammonai (kĕ'fär-hăăm'ənī) [Heb., =village of the Ammonites], town of Benjamin. Joshua 18:24.

Chephirah (kēfī'rə) [Heb., =village], town of Benjamin, now called Kefireh, WNW of Jerusalem. Joshua 9:17, 18:26, Ezra 2:25, Neh. 7:29.

Chephren: see KHAFRE.

Chepping Wycombe, England: see HIGH WYCOMBE.

Chepstow (chĕp'stō), urban district (pop. 4,302), Monmouthshire, England, a river port on the Wye near its influx into the Severn. The structure of the channel causes an unusually high tide or bore here. On a hill above the river are the ruins of a very old castle. Because of its location Chepstow was the site of forts throughout early English history. It is the scene of spring racing meets.

Chequamegon Bay (shĭkwa'məgun), arm of Lake Superior, N Wis. Ashland and Washburn are on the bay, which was visited by French explorers in the 17th cent. On its shore Father Allouez founded a mission in 1665.

cheque: see CHECK.

Cher (shĕr), department (2,820 sq. mi., pop. 286,070), central France, in BERRY, traversed by the Cher river. Bourges is the capital.

Cher, river, 200 mi. long, rising in the Massif Central and swinging N and NW across central France to join the Loire below Tours.

Cheran (kē'rän), Hosite. Gen. 36:26, 1 Chron. 1:41.

Cheraw (chĕ'rô), town (pop. 4,497), NE S.C., on the Pee Dee river and NE of Columbia, in a fertile farm area, settled in the mid-18th cent. by Welsh. Notable among the old buildings is St. David's Episcopal Church (1770–73).

Cherbourg (shĕrbōōr'), town (pop. 34,034), Manche dept., NW France, in Normandy, a seaport on the English Channel, at the tip of the Cotentin peninsula. Though dating from Roman times, it was insignificant until Louis XIV established a fortified naval station there. After the First World War it developed as a major transatlantic port. In the Second World War the German garrison added (1940–44) to the fortifications, but it capitulated to U.S. troops after a siege (June, 1944).

Cherbuliez, Victor (vĕktôr' shĕrbülyā'), 1829–99, French novelist and miscellaneous writer, b. Geneva. He contributed to the *Revue des Deux Mondes* from 1864 and wrote essays on politics, art, and literature, some under the pseudonym G. Valbert, as well as a long series of novels. He also wrote art

criticism for the *Tempa*. His fictional works have been praised for delicate humor and psychological insight. They include *Le Comte Kostia* (1863, Eng. tr., 1873), *Le Roman d'une honnête femme* (1866, Eng tr , *The Story of a Good Woman*, 1874), *Méta Holdenis* (1873; Eng tr , 1877), and *Samuel Brohl et Cie* (1877; Eng tr , 1888). In 1881 he was elected to the French Academy, which had crowned his novel *Samuel Brohl et Cie*

Cherchel or **Cherchell** (both shĕrshĕl'), town (1948 pop. 7,263), Algeria, a port of the Mediterranean W of Algiers. Early settled by Carthaginians, it became the capital of Mauretania before and during Roman times and was named Caesarea in 25 B.C It remained an important military and commercial port under the Romans. Taken by Barbarossa (1516), it became a corsair refuge Cherchel is rich in relics, especially of the Roman period.

Cheremiss, RSFSR. see MARI AUTONOMOUS SOVIET SOCIALIST REPUBLIC.

Cheremkhovo (chĕrĭmkô'vŭ), industrial city (pop. 65,907), RSFSR, in SE Siberia, 80 mi NW of Irkutsk, on the Trans-Siberian RR. Machinery, chemicals, flour and bricks are made, and meats are packed The city, of recent growth, is the center of the Cheremkhovo coal basin, a rich deposit extending 300 mi. NW from Lake Baikal

Cherepovets (chĕrĭpŭvyĕts', chĕrĭpô'vyĭts), city (pop 21,783), NW European RSFSR, on the Rybinsk Reservoir It is a rail and water transportation center of the MARIINSK SYSTEM, with a new steel industry being developed

Chéret, Jules (shūl' shārā'), 1836–1932, French painter and draughtsman He was the originator of the modern poster.

Cherethims (kĕr'ŭ-), the same as the Cherethites

Cherethites and Pelethites (kĕr'ŭthīts, pĕl'ŭthīts), David's praetorian guard 2 Sam. 8 18, 15 18, 20 7,23; 1 Kings 1.38,44, 1 Chron 18 17 The Cherethites, or Cherethims, are mentioned alone in 1 Sam. 30 14, Ezek 25 16, and Zeph 2 5 One theory makes them foreign mercenaries, the Cherethites connected possibly with Crete, the Pelethites with the Philistines.

Cheribon (chĕrĭbŏn'), town (pop 54,079), on N Java, Indonesia, a port on the Java Sea. Its exports are sugar, copra, and rice, textiles, chemicals, and cigars are manufactured. Southwest of Cheribon is the resort village of Langgajata, where in 1946 was drafted the Dutch-Indonesian agreement providing for the eventual establishment of the United States of Indonesia under the Dutch crown. The so-called Cheribon Agreement was signed a year later in Batavia

Cherith (kĕ'rĭth), wadi, where Elijah hid 1 Kings 17 3,5. Nothing is known of its location

Cherkassy (chĭrkä'sē), city (pop 39,511), central Ukraine, on the Dnieper ; it has sugar refineries, lumber mills, and other industries. It was the seat of the hetmans of the UKRAINE in the first half of the 17th cent

Cherkess Autonomous Oblast (chĭrkĕs'), district (c 1,600 sq mi ; pop c.150,000), SW Stavropol Territory, RSFSR, on the northern slopes of the Greater Caucasus Cherkessk is the capital. Drained by the Kuban, it is largely agricultural. The population is mainly Circassian (see CIRCASSIA), partly Turko-Tatar Created in 1928, the autonomous oblast absorbed (1944) parts of the former Karachai Autonomous Oblast

Cherkessk (chĭrkĕsk'), city (pop 78,646), capital of Cherkess Autonomous Oblast, Stavropol Territory, SE European RSFSR, on the Kuban river Founded in 1825 as Batalpashinsk, it has metalworking, chemical, and food-processing industries

Chernigov (chĭrnyĕ'gŭf), city (pop 67,356), capital of Chernigov oblast, N Ukraine, on the Desna river An agricultural center and a river port, it is one of the oldest cities of Russia and was (11th–12th cent) the capital of a powerful duchy. In the Second World War it was occupied by the Germans, who destroyed most of its ancient monuments, one was the Spaski Sobor, a Byzantine cathedral built in 1024, which was the oldest building in the USSR Near Chernigov there are numerous tumuli dating from the 10th cent

Chernov, Viktor (vĕk'tŭr chĭrnôf'), 1876–, Russian revolutionist One of the founders of the Socialist Revolutionary party, he served as minister of agriculture under Kerensky in 1917 He was president of the short-lived all-Russian constituent assembly at Samara (1918); after its fall he fled abroad. Chernov wrote *The Great Russian Revolution* (Eng tr , 1936)

Chernovtsy (chĭrnôf'tsĕ), Ger. *Czernowitz*, Rumanian *Cernauti*, city (1930 pop 112,427), W Ukraine, former capital of BUKOVINA, on the Pruth It rose to importance in the period after 1775 when under Austria Until recently, about half the population of this center of trade and industry were Germans and Jews, the surrounding population being largely Ukrainian

chernozem· see BLACK EARTH.

Chernyakhovsk, RSFSR· see INSTERBURG.

Chernyshevsky, Nikolai Gavrilovich (nyĭkŭlī' gŭvrē'lŭvĭch chĕrnĭshĕf'skĭ), 1828–89, Russian publicist. He was the leading disciple of Belinsky inside Russia, as Herzen was outside. From 1853 to 1857 he wrote for the radical journal *Contemporary*, instructing his readers in the principles laid down by Belinsky He himself expanded these principles Although powerfully influenced from abroad, he was an original thinker He advocated enlightenment and the strengthening of the village community, but unlike the Slavophiles, he did not overidealize this community. In 1862 he was imprisoned and later sent to Siberia. In prison he formulated his ideas in a novel, *What Is to Be Done?* (1863, Eng. tr., 1886) His name, once proscribed in Russia, is today revered there. See David Hecht, *Russian Radicals Look to America* (1947).

Cherokee (chĕr'ŭkē, chĕr'ŭkē'). 1 City (pop. 7,469), co seat of Cherokee co , NW Iowa, on the Little Sioux river and ENE of Sioux City; founded 1870, inc. 1873. It is a rail, trade, and industrial center for a farm, dairy, and livestock area A state hospital for the insane is here Near by is Pilot Rock, a large glacial boulder, which served as a landmark to the early settlers 2 City (pop 1,101), SE Kansas, SW of Pittsburg, laid out 1870, inc. 1874 3 City (pop. 2,553), co seat of Alfalfa co , NW Okla It is the trading and milling center for an area growing wheat, corn, alfalfa, and sorghum. The GREAT SALT PLAINS DAM, which is a Federal project, and a state fish hatchery are near

Cherokee Indians (chĕr'ŭkē), largest and most important single tribe in the SE United States, formerly occupying the mountain areas of North and South Carolina, Georgia, Alabama, and Tennessee The Cherokee language is of the Iroquoian family, and by the 16th cent they had a settled, advanced culture based on agriculture De Soto visited them in 1540 They were frequently at war with the Iroquois tribes of New York, but generally sided with the British against the French and proved valuable allies Soon after 1750, when they were at their height, they suffered a severe smallpox epidemic which destroyed almost half the tribe Formerly friendly with the Carolina settlers, the Cherokee in 1760 were provoked into war with the colonists, and two years of warfare followed before the Cherokee sued for peace In 1820 they adopted a form of government patterned after that of the whites and in 1827 established themselves as the Cherokee Nation under a constitution This instrument provided for an elective principal chief, a senate, and a house of representatives Much of their progress was due to the invention of a Cherokee syllabary or syllabic alphabet by SEQUOYAH, also known as George Guess Its 85 characters represented all the sounds in the Cherokee language and permitted the keeping of tribal records and, later, the publication of newspapers in the native tongue The discovery of gold in Cherokee territory resulted in pressure by the whites to obtain their lands A treaty was extracted from a small part of the tribe, which bound the whole tribe to remove beyond the Mississippi within three years Although the tribe overwhelmingly repudiated this document and the U.S Supreme Court upheld the nation's autonomy, the state of Georgia secured through Judge Augustine S. Clayton, of the superior court in Georgia, an order for their removal, which was accomplished by military force President Andrew Jackson refused to intervene, and in 1838 the tribe was deported to the Indian Territory (later in Oklahoma). Their leader at this time and until 1861 was Chief John Ross. Thousands died on the march or from subsequent hardships. They made their capital at Tahlequah, instituted a public school system, published newspapers, and were the most important of the Five Civilized Tribes In the Civil War their allegiance was divided between North and South, large contingents serving on each side By a new treaty at the close of the war they freed their Negro slaves and admitted them to tribal citizenship. In 1892 they sold their western territorial extension, known as the Cherokee Strip, and in 1906 disbanded as a tribe, becoming then U S citizens A small number of Cherokees are still in W North Carolina, the descendants of a few who successfully resisted removal or returned after the removal. See C. C Royce, *The Cherokee Nation*, 5th Annual Report of the Bureau of American Ethnology (1888), Grant Foreman, *Indian Removal* (1932) and *The Five Civilized Tribes* (1934), M L Wardell, *Political History of the Cherokee Nation, 1838–1907* (1938); M. L. Starkey, *The Cherokee Nation* (1946).

cheroot· see CIGAR AND CIGARETTE.

Cherrapunji (chĕr"ŭpôn'jē'), village (pop. under 5,000), W Assam state, India Its rainfall (c.500 in a year) is said to be the heaviest in the world.

cherry, name for several species of trees or shrubs of the genus *Prunus* (a few sometimes classed as *Padus*) and their fruits The cherry is one of the most commonly grown home-orchard fruits About 600 varieties are cultivated, practically all derived from two Old World species—*Prunus avium* (sweet cherries) and *Prunus cerasus* (sour cherries). Sour cherries are hardier and more easily grown than sweet cherries and are mostly self-fertile, while many sweet cherries must be cross-pollinated to bear well. Of the sour cherries there are two main kinds—amarelles and morellos; familiar varieties are the Early Richmond, a bright red early cherry, and the English Morello, late and dark red. Sweet cherries are of three types—massards, geans, and bigarreaus, dukes are usually considered hybrids. The fruit is popular raw, in preserves, and in pies, cherry cider and liqueurs (see MARASCHINO) are also made. Several species of the flowering cherry are cultivated as weeping or erect trees for their beautiful usually double flowers The Japanese make a national festival of cherry-blossom time; the city of Tokyo presented a number of trees to Washington, D.C , where they have become a popular spring attraction. The species of American wild cherry include the chokecherry, pin cherry, and wild black cherry These have smaller fruits than the cultivated kinds and are seldom used except for jelly The foliage of a number of native American cherries has been found to be poisonous to livestock under certain conditions, e.g., when wilted Wood of the wild black cherry, usually reddish in color, is fine grained. It takes a high polish and is prized for cabinetwork. See U. P. Hedrick, *Cherries of New York* (1915).

Cherryfield, town (pop. 1,046), SE Maine, between Machias and Ellsworth, settled c 1757, inc. 1816 It is a shipping point for blueberries.

cherry laurel· see LAUREL.

Cherryvale, city (pop 3,185), SE Kansas, NE of Independence, in an agricultural region; laid out 1871 by the railroad, inc 1880

Cherry Valley, village (pop. 704), E central N Y., W of Albany, in a farm region, settled c 1740, inc 1812. Chairs are made here. On Nov 11, 1778, Tories and Indians led by Walter Butler and Joseph Brant burned most of the village and massacred over 40 people. See Howard Swiggett, *War Out of Niagara* (1933).

Cherryville, town (pop 3,225), W N C , NW of Charlotte near the S C line, in a farm area.

Chersiphron (kûr'sĭfrŭn), Cretan architect. He was the traditional builder of the original archaic Ionic temple of Artemis (Diana) at Ephesus in Asia Minor (550 B C.). The temple was burned, restored or rebuilt, and then burned again in 356 B C The new temple, which was then built upon the site in 330 B C., ranked as one of the seven wonders of the ancient world

Cherso (kĕr'sô), Serbo-Croatian *Cres* (tsurĕs'), island, c 150 sq. mi , in the Adriatic, off Croatia, Yugoslavia It was ceded by Italy in 1947 Agriculture, fishing, and sheep raising are the chief occupations

Cherson· see SEVASTOPOL, RSFSR.

Chersonese (kûrsŏnēs') or **Chersonesus** (-nē'sus) [Gr ,=peninsula], name applied to several regions See CRIMEA (Chersonesus Taurica or Scythica), GALLIPOLI PENINSULA (Chersonesus Thracica), MALAY PENINSULA (Chersonesus Aurea), JUTLAND (Chersonesus Cimbrica)

Chertsey (chûrt'sē), urban district (1931 pop 17,133, 1943 estimated pop 22,500), Surrey, England, near the Thames, which is here crossed by a seven-arched bridge There is a 7th-century monastery. Charles James Fox lived near here The proximity to London has caused market gardening to develop

cherub (chĕr'ŭb), plural **cherubim** (-ŭbĭm), kind of ANGEL Cherubim were probably thought of, anciently, as composite creatures like the winged creatures of Assyria In Jewish tradition, they were usually beautiful young men, but late Christian art made plump children of them, as in Raphael's *Sistine Madonna* With the seraphim (see SERAPH) they are said to be in the very presence of God The color surrounding them is traditionally blue See Gen 3 24, Ex 25 18–22, 37.6–9, 1 Kings 6 23–28, Pss. 18 10, 80 1, Ezek 10.

Cherubini, Maria Luigi Carlo Zenobio Salvatore (märē'ä lwē'jē kärlō tsänō'byō salvätō'rā kärōbē'nē), 1760–1842, Italian composer, who lived in Paris after 1788. Before he was 16 he wrote Masses and other sacred works in the polyphonic Italian tradition. In Paris he composed many operas, among them *Les Deux Journées* (1800). The overtures to *Médée* (1797) and *Anacreon* (1803) are occasionally performed. His last important opera was produced in 1806 In 1809 he returned to the composition of church music He became professor of composition at the Paris Conservatoire in 1816 and was its director, 1821–41.

Chesalon (kĕs'ŭlŏn), town of Judah, called also Mt Jearim, probably the modern Kesla, W of Jerusalem. Joshua 15 10.

Chesaning (chĕs'ŭnĭng), village (pop. 1,807), S Mich., on the Shiawassee and SW of Saginaw The area was an Indian reservation from 1819 to 1837

Chesapeake (chĕs'ŭpēk), village (pop. 1,068), extreme S Ohio, on the Ohio river opposite Huntington, W Va ; inc 1908.

Chesapeake, U.S. frigate, famous for her role in the *Chesapeake* affair (June 22, 1807) and for her battle with the British ship *Shannon* (June 1, 1813) The *Chesapeake* cleared Norfolk for the Mediterranean under the command of James BARRON in June, 1807 Just outside of American territorial waters the British ship *Leopard* stopped her and demanded the right to search her for British deserters. Barron refused to allow this, and shortly afterwards the *Leopard* opened fire. Unprepared for action,

Barron was forced to submit and allow the impressment of four of his crew (two of which were American born). The incident caused intense indignation when the *Chesapeake* limped into port and war seemed imminent Britain disavowed the act in 1811 In this war the refitted *Chesapeake*, commanded by James LAWRENCE, engaged (June 1, 1813) the British ship *Shannon* outside Boston harbor. Lawrence lost control and became entangled with the enemy ship. He was mortally wounded, and his last command is reportedly the famous "Don't give up the ship!" The *Chesapeake* was, however, captured and sold in England.

Chesapeake and Delaware Canal, 19 mi long, connecting the head of Chesapeake Bay with the Delaware river below Delaware City Chesapeake City, Md , is at the western end The present canal (built 1824–29, another route, begun in 1804, had been abandoned) was bought by the Federal government in 1919 and was later enlarged and modernized.

Chesapeake and Ohio Canal, former waterway, c 185 mi. long, from Washington, D C , to Cumberland, Md , running along the left bank of the Potomac river The canal was originally planned by George Washington, and work was started by 1828, but financial difficulties proved so great that it was not completed to Cumberland until 1850 Much of its freight was coal from the mines near Cumberland, but the canal could not meet the competition of the Baltimore & Ohio RR Its busiest days were in the 1860s, but traffic was maintained until the canal was damaged by floods in 1924 It was purchased in 1938 by the U S government and is now included in the National Capital Parks

Chesapeake & Ohio Railway, U S transportation company, having 5,062 mi of railroad lines in six states, in Washington, D C , and in the province of Ontario, Canada Incorporated in 1878 under the laws of Virginia, the Chesapeake & Ohio Railway expanded its holdings over a period of years and in 1947 merged with the Pere Marquette Railway Company, to become one of the largest railroads in the United States

Chesapeake Bay, inlet of the Atlantic, 200 mi long and from 4 to 40 mi wide, cutting off the Eastern Shore of Maryland and a part of E Virginia It is entered from the Atlantic through a 12-mile gap between Cape Henry and Cape Charles, Va Six important rivers (Susquehanna, Patuxent, Potomac, Rappahannock, York, James), plus numerous smaller rivers and estuaries, enter it The important ports of Baltimore and Norfolk and the naval base at Hampton Roads are on its shores Chesapeake Bay is an important fishing ground famous for its oysters and crabs

Chesapeake City, town (pop 1,094), NE Md , S of Elkton It is the Maryland terminus of the CHESAPEAKE AND DELAWARE CANAL

Chesed (kē'–), nephew of Abraham Gen 22 22

Cheselden, William (chĕs'ŭldĭn), 1688–1752, English surgeon From 1718 he was a surgeon at St Thomas's Hospital, London, he was also affiliated with St George's and with Chelsea Hospital He is noted especially for his improved method of operation for kidney stone and for his treatises on anatomy (1713) and osteology (1733)

Chesha Bay (chĕ'shŭ), Rus *Cheshskaya Guba*, inlet, 70 mi. wide and 65 mi long, of the Barents Sea, Nenets National Okrug, RSFSR, E of Kanin peninsula It receives the small Chesha river

Cheshire (chĕ'shŭr) or **Chester,** maritime county (1,014 sq mi , 1931 pop 1,087,655, 1948 estimated pop 1,223,480), W central England. The county town is Chester, site of an important Roman camp and a city rich in medieval architectural survivals The county is generally low, flat, and fertile Its chief rivers are the Mersey, which forms the boundary between Cheshire and Lancashire, and the Dee, which separates Cheshire from Wales The estuaries of these two rivers as they flow into the Irish Sea form the sandy Wirral peninsula The county is important agriculturally and industrially It engages extensively in dairy farming, its most famous product being the Cheshire cheese The chief industries are salt mining (Northwich and elsewhere), coal mining (Macclesfield), shipbuilding (Birkenhead), and manufacture of railroad cars (Crewe) and of textiles and chemicals (Stockport) Communication by road, rail, canal (the Manchester Ship Canal) is excellent Cheshire was anciently under the sway of Northumbria and was added to Mercia by Egbert in the 9th cent , when it was already organized on a shire basis. It was made a palatinate by William I and maintained some of its privileges as such until the time of Henry VIII The numerous black-and-white-timbered manor houses point to the county's prosperity in the 16th and 17th cent In the last century the population of the county greatly increased with the growth of the Midlands industrial area. See Arthur Mee, *Cheshire* (1938).

Cheshire. **1** Town (pop 4,352), S central Conn., N of New Haven, settled before 1700, inc 1780 Metal products are made here. Cheshire Academy for boys was founded in 1794. A state reformatory is here. **2** Rural town (pop 1,708), NW Mass., on the Hoosic and NNE of Pittsfield; settled 1766, inc. 1793 Cheese and other dairy products have been made here from earliest times.

Cheshunt (chĕs'ŭnt), urban district (1931 pop 14,656; 1943 estimated pop 18,000), Hertfordshire, England. Near London, it has market gardens Cheshunt College, founded by the countess of Huntingdon in 1768, was here from 1792 to 1905, when it was transferred to Cambridge.

Chesil (kē'–), same as BETHEL 2.

Chesley, town (pop 1,701), S Ont , on the south branch of the Saugeen river and SSW of Owen Sound It was founded in 1859

Chesney, Francis Rawdon, 1789–1872, British soldier and explorer in Asia His examination of the route of the Suez Canal (1829) demonstrated its feasibility. In 1835 he commanded an expedition to survey N Syria and the Euphrates and Tigris He proved the navigability of the rivers and urged the adoption of a Euphrates route to India In 1856 and 1862 he was associated with the Euphrates valley railroad project, but the scheme fell through His works include *The Expedition for the Survey of the Rivers Euphrates and Tigris* (1850) and *Narrative of the Euphrates Expedition* (1868) See biography by his wife and his daughter (ed by Stanley Lane-Poole, 1885)

Chesnutt, Charles Waddell, 1858–1932, American Negro author, b Cleveland, Ohio He received most of his schooling in North Carolina In 1887 he was admitted to the Ohio bar. His *Conjure Woman* (1899) was probably the best work of fiction by a Negro writer in America up to that time It was made up of seven short stories, some of which had appeared in the *Atlantic Monthly*. He also wrote other and less good studies of Negro problems, a biography of Frederick Douglass (1899), and a few sociological essays See Vernon Loggins, *The Negro Author* (1931)

chess [from Persian *shah*=king], game for two players played on a square board, composed of 64 square spaces, alternately dark-colored and light in color The board is placed so that a light-colored square is in the corner to the right of each player, who is provided with 16 pieces, or chessmen, of his own color In the horizontal row of squares nearest each player, eight pieces, at the outset of the game, are set down, two rooks (or castles) in the corner squares, two knights in the adjoining squares, two bishops next to the knights, the queen on the remaining square which corresponds to her color, and the king on the other remaining center square One pawn is placed immediately in front of each of these pieces Each type of piece is moved according to specific rules and is removed from the board when it is displaced by the move of one of the opposing pieces into its square The object in chess is to trap, or checkmate, the opponent's king Chess has fascinated men for centuries, and there is evidence that a game similar to modern chess was played in the 6th and 7th cent It probably originated in India, spread to Persia, thence to the Levant, and may have been introduced into Europe by the Moslems By the 13th cent it was played all over Western Europe and had undergone little change from the game as played by the Persians The modern game of chess dates from the 15th cent The first modern international chess tournament was held in London in 1851, and since then these tournaments have been held annually The world champions of chess were 1851–58 and 1862–66, Adolph Anderssen of Germany, 1858–62, Paul C. Morphy of the United States, 1866–94, William Steinitz of Austria, 1894–1921, Emanuel Lasker of Germany; 1921–27, José R Capablanca of Cuba, 1927–35 and 1937–46, Alexander A Alekhine of the USSR, 1935–37, Max Euwe of the Netherlands, 1948–49, Mikhail Botvinnik of the USSR Chess has an extensive literature A good book for beginners is Capablanca's *A Primer of Chess* (1935) Lasker's *Manual of Chess* (1927) was written for more advanced players See H J R Murray, *The History of Chess* (1915), Jerome Salzmann, ed , *The Chess Reader* (1949).

chest, in anatomy see THORAX

chest, originally a large box with a hinged top, one of the earliest of furnishings, used for the storage and transportation of goods, as a seat, and sometimes as table or bed Household chests were commonly ornamented with paint, carving, or inlay, of these the most elaborate was the CASSONE of the Italian Renaissance period The accoutrement of knights was stored in the tilting chest, pirates hoarded their loot in metal-bound treasure chests The bahut had an arched top; the hutch usually had doors and often served as a food cupboard Reminiscent of the painted peasant chest is the Pennsylvania German dower chest The modern chest is often cedar lined as a protection against moths. Small chests were used as caskets for valuables and as writing boxes and Bible boxes. By the addition of drawers, doors, or stands, the chest gave rise to credences, cabinets, secretaries, and writing desks The Italian *cassapanca*, a chest with back and arms, was the prototype of the settle The tall chest of drawers raised on a high base became known as a highboy in America, where it attained its greatest popularity. The chest-on-chest generally consists of a smaller chest fitted above a larger one. The lowboy is a small raised chest used as a dressing table High chests are called tallboys, especially in England. The bureau, which became fashionable in the 19th cent , usually had a mirror as an integral part

Chester, county borough (1931 pop. 41,440; 1943 estimated pop 47,863) and city, Cheshire, England, on a sandstone height above the right bank of the Dee, SE of Liverpool It was occupied by the early Britons and is the Devana Castra or Deva of the Romans, the headquarters of the Roman 20th legion It was ravaged by Æthelfrith of Northumbria in 613 and by Danes in 894, was rebuilt by Æthelred and Æthelflæd of Mercia early in the 10th cent , and was taken by William the Conqueror in 1070 (the last place in England to surrender) when he made Hugh Lupus earl of Chester and the government of Cheshire became palatinate Parliamentarians took the town after a long siege in 1646. The modern Chester is of medieval aspect Interesting features are the red sandstone wall with a walk along the top, Caesar's Tower, which remains of the castle of Lupus, 16th-century timbered houses; the cathedral, with architecture of styles from Norman to Late Perpendicular, on the site of an abbey of St Werburgh; King's School, adjacent to the cathedral, St John's Church (formerly a cathedral), Grosvenor Museum; Grosvenor Park, and, across the Dee, Eaton Hall, the residence of the duke of Westminster. Characteristic of Chester are the Rows, formed by the projection of the second stories of the buildings along the main streets, in arcade fashion The Chester Plays (see MIRACLE PLAY) originated here.

Chester. **1** Town (pop 1,676), S Conn , on the Connecticut, settled 1692, inc 1836 **2** City (pop 5,110), co seat of Randolph co , S Ill , on the Mississippi below St Louis, founded 1819, inc 1835 It is a shipping center for a mine and quarry area Shoes, flour, and hosiery are made in Chester A branch of the state penitentiary is here Near by are Fort Kaskaskia State Park, the site of the old community of KASKASKIA, and Fort Chartres State Park **3** Town (pop 1,284), W Mass , in the Berkshires NW of Westfield; settled 1760, inc 1765 Emery and other minerals are produced here **4** Village (pop 1,140), SE N Y , SW of Newburgh, in a farm and horse-breeding region; inc 1892 HAMBLETONIAN was foaled here **5** City (pop 59,285), SE Pa , on the Delaware river and SW of Philadelphia; settled c 1644, laid out 1686, inc as a borough 1795, as a city 1866, reinc as a city 1889 Called Uppland by the Swedes at the time of settlement, it was renamed by William Penn for the home of one of his companions in England Chester is the oldest city in the state It is a port of entry and has a large shipbuilding industry, which began in 1872 Manufacturing plants include steel, paper, and glass factories and oil refineries William Penn convened the first assembly of the province at Chester in 1682 Penn's house, built in 1683, is still standing The courthouse was erected in 1724 Crozer Theological Seminary is here, as is Pennsylvania Military College **6** City (pop 6,392), co seat of Chester co , N S C , NNW of Columbia, settled in the late 18th cent , inc as a town 1849, as a city 1893 It has textile mills and is the processing center of a cotton and livestock area **7** Town (pop 1,740), Windsor co , SE Vt , on the Williams and W of Springfield It is a resort **8** Residential city (pop 3,805), W Va , in the industrial Northern Panhandle, on the Ohio river and N of Weirton, laid out 1896 Pottery is made

Chesterfield, Philip Dormer Stanhope, 4th **earl of,** 1694–1773, English statesman, orator, and author After a public career as ambassador to The Hague, lord high steward, lord lieutenant of Ireland, and secretary of state, he resigned in 1748 His literary reputation rests upon his letters to his natural son, Philip Stanhope, published under the title *Letters to His Son* (1774), and upon *Letters to His Godson* (ed by the earl of Carnarvon and pub 1890), which are filled with wit and worldly wisdom Johnson's letter to Chesterfield on the latter's belated tribute to the *Dictionary* is a masterpiece of rebuke See edition of his letters by Bonamy Dobrée (6 vols , 1932) and additional letters ed by S. L Gulick, Jr (1938), studies by Roger Coxon (1925) and Samuel Shellabarger (1935)

Chesterfield, municipal borough (1931 pop 64,160, 1947 estimated pop 68,100), Derbyshire, England It is the site of Stephenson Memorial Hall, of a 16th-century grammar school, and of a 14th-century church Its products include coal, iron, machinery, textiles, and pottery

Chesterfield, town (pop 1,263), co seat of Chesterfield co , NE S C , NE of Columbia and near the N C line, in a farm and timber area. The Craig House was built in 1798

Chesterfield Inlet, Canadian government post in the Keewatin dist , Northwest Territories, at the mouth of Chesterfield Inlet of Hudson Bay.

Chester-le-Street (-lē-), urban district (1931 pop 16,640, 1943 estimated pop. 17,100), Durham, England, N of Durham near the Wear It is in a region of coal and iron mining It was the site of a Roman station and was once the seat of the bishop of Bernicia.

Chester Plays: see MIRACLE PLAY.

Chesterton, Gilbert Keith, 1874–1936, English essayist and novelist, b London, educated at St. Paul's He was a convert to Roman Catholicism and its champion Chesterton has been called the "prince of paradox," and his works have a surface brilliance which often distracts from their basic idea He wrote studies of Browning (1903) and Dickens (1906); *The Man Who Was Thursday* (1908) and other novels, including crime fiction with the much-loved Father Brown as detective, many poems, collected in 1927, and his famous essays, collected in *Tremendous Trifles* (1909), *Come to Think of It* (1930), and other volumes He was a contributor to the *Illustrated London News* from 1905 to 1930 and the editor of *G K's Weekly*, an organ of the Distributist League, which advocated the small-holding system An amusing artist, he illustrated books by Hilaire BELLOC See his autobiography (1936), biography by Maisie Ward (1943).

Chesterton, town (pop 2,470), Porter co , NW Ind , E of Gary

Chestertown, town (pop 2,760), co. seat of Kent co , Eastern Shore, Md , on the Chester river, across Chesapeake Bay NE of Annapolis, laid out 1706 It is a trading center for a resort area and has canneries and fertilizer and clothing factories Washington College (coeducational; 1782) is here.

Chesterville, village (pop 1,067), SE Ont , SE of Ottawa.

chestnut, name for any species of the genus *Castanea*, deciduous trees widely distributed in the Northern Hemisphere They are characterised by thin-shelled, sweet, edible nuts borne in a bristly bur The common American chestnut is *Castanea dentata*, native E of the Mississippi but now nearly extinct because of the chestnut blight—a disease caused by the fungus *Endothia parasitica* Efforts are being made to breed a type resistant to the disease and suitable to replace the old chestnut forests, some of which are still standing as dead or "ghost" forests Chestnut wood is porous, but it is very durable in soil and has been popular for fence posts, railway ties, and beams, the tree is rich in tannin The CHINQUAPIN belongs to the same genus

Chestnut Hill, suburb of Boston, Mass , in Brookline and Newton towns, main seat of Boston College (Catholic, Jesuit, partly coeducational, 1863)

Chesulloth (kĕsŭl'ŏth) [Heb ,=loins], town, N Palestine, probably the same as CHISLOTH-TABOR Joshua 19 18

Chesuncook Lake (chĭsŭn'kŏk), 22 mi long and 1 to 4 mi wide, N central Maine, NE of Greenville The West Branch of the Penobscot flows through the lake, which is in a noted hunting and fishing region

Cheswick, residential borough (pop 1,241), SW Pa , on the Allegheny river and NE of Pittsburgh; inc 1902

Chetek (shūtĕk'), city (pop 1,227), NW Wis., on Chetek Lake and the Cedar river and N of Eau Claire, settled 1863, inc 1891

Chetopa (shĭtō'pŭ), city (pop 1,606), extreme SE Kansas, near the Okla line, settled 1857 on the site of an old Osage village, laid out 1868, inc 1870

Chevalier, Albert (shuvăl'yā, shă"vulēr'), 1861–1923, English actor and music-hall singer In 1877 he appeared under the Bancrofts at the Prince of Wales Theatre, London, and later played Pinero and Barrie roles He made his first great success in 1891 at the Pavilion Music Hall with his singing of dialect songs, the best of which were *My Dear Old Dutch*, *The Future Mrs 'Awkins*, and *The Coster's Serenade* The humor and pathos of his songs and sketches claimed the memory of several generations He appeared in the United States in 1896 See his reminiscences, *Before I Forget* (1901) and *Unmutated* (1906).

Chevalier, Guillaume Sulpice: see GAVARNI

Chevalier, Maurice (shuvăl'yā, Fr mōrēs' shuvălyā'), 1888–, French singer and comedian. He made his debut (1900) singing and dancing at the Casino de Tourelles, Paris As the dancing partner of Mistinguette at the Casino de Paris and in the Elsie Janis revue *Hello, America*, he won great success, and by 1928 his reputation was international Some of the films in which he has appeared are *The Innocents of Paris*, *Love Parade*, *The Smiling Lieutenant*, and *The Merry Widow* In 1947 he acted in a one-man show in New York, where he sang such favorites as *Valentine* and *Ma Pomme*

Chevalier, Michel (mēshĕl'), 1806–79, French economist. As a young man he was a Saint-Simonian He advocated and wrote on the development of industrialism and free trade and with Richard Cobden negotiated the Anglo-French trade treaty of 1860 His *Lettres sur l'Amérique du Nord* (1836) extols the United States.

Cheverus, Jean Louis Anne Madeleine Lefebvre de (shă' lwē' ăn' mădûlĕn' lûfĕvr' dŭ shûvrûs'), 1768–1836, French churchman, first Roman Catholic bishop of Boston (1810–23). He was ordained in France, and had to flee in the Revolution (1792). In England he lived by teaching until 1796, when he went to Boston He worked all over New England and was known for his labors with Indians in Maine. He was also highly esteemed as a physician. In 1810 he was consecrated bishop of Boston. At length his health began to fail, and he asked for a transfer to France. Catholics and Protestants in America begged him to remain, but he accepted translation to the see of Montauban (1823). In 1826 he became archbishop of Bordeaux and in 1835 cardinal He did much to extend the toleration of Roman Catholicism in America

Cheves, Langdon (chĭ'vĭs), 1776–1857, American statesman, b Abbeville District (now Abbeville co), S C Admitted to the bar in 1797, he became one of the leading lawyers of Charleston In the U S House of Representatives (1810–15) he was one of the "war hawks" who agitated for hostilities with Britain He also served as chairman of the ways and means committee and in 1814 succeeded Henry Clay as speaker In this capacity Cheves cast the deciding vote against Alexander J. Dallas's bill for establishing the Second Bank of the United States, but it was chartered anyway in 1816 The bank was badly mismanaged until Cheves, elected a director and president in 1819, restored its credit On his resignation in 1822, Nicholas Biddle took over the bank. Cheves had been a justice of the South Carolina court of appeals from 1816 to 1819, and in 1829 he returned to his native state A Unionist, he devoted his considerable oratorical talents to opposing the nullification movement

chevet (shuvĕ') (O Fr ,=head), eastern end of a Gothic church It represents the ultimate development from the simple apse termination of the early Christian basilica, by the addition of several vaulted bays between the apse and transept, continuing the one or more vaulted aisles of the nave around the choir, and projecting several chapels off the outer aisles to form a vast architectural complex rivaling the nave of the church in extent It is predominantly found in French cathedrals, as in Notre Dame de Paris and in the cathedrals of Amiens and Rheims

Cheviot (shĭv'ĕŭt, shĕv'-), city (pop 9,043), extreme SW Ohio, W of Cincinnati

Cheviot Hills (chĕv'ĕut, chĕv'-), range on the Scotland-England border, extending 35 mi northeast-southwest The highest point is the Cheviot (2,676 ft) The Tyne, the Coquet, and branches of the Tweed rise here The Cheviots have been the scene of much border strife They are celebrated in the ballad *Chevy Chase* A fine type of sheep is bred in this area

Chevreul, Michel Eugène (mēshĕl' ûzhĕn' shûvrûl'), 1786–1889, French chemist He studied under L N Vauquelin, was director of the Gobelin tapestry works, and from 1830 was professor, and from 1860 to 1879 director, at the natural history museum at Paris Noted for his researches in the composition of animal fats (by which he contributed to the development of the soap and candle industry), he discovered and named olein and stearin and wrote *Recherches sur les corps gras d'origine animale* (1823) He also worked and wrote on color contrasts

Chevreuse, Marie de Rohan-Montbazon, duchesse de (marē' du rōă'-mōbăzō' dushĕs' du shûvrûz'), 1600–1679, French beauty and politician, an intimate of Anne of Austria (queen of France) Her intrigues and her opposition to Richelieu caused her to be repeatedly banished from the court and to be twice exiled (1626–28, 1645–49) During her exiles she visited Spain, England, and Flanders In the FRONDE she at first opposed, but later became the ally of, Cardinal Mazarin

Chew, Benjamin, 1722–1810, American jurist, b Anne Arundel co., Md He read law in Philadelphia under Andrew Hamilton and was admitted (1746) to the bar After practicing law at New Castle and Dover, Del , Chew returned to Philadelphia, where he held several public offices and was attorney general (1755–69) He was chief justice of the Pennsylvania supreme court from 1774 until the outbreak of the American Revolution, when he was suspected of Loyalist sympathies. After his arrest he was soon discharged He later was (1791–1808) president of the high court of errors and appeals of Pennsylvania. See biography by B A Konkle (1932)

Chewelah (chĕwē'lu), industrial town (pop. 1,565), NE Wash , NW of Spokane, in a mining district, inc 1903

chewing gum. Prehistoric man is believed to have chewed resins Spruce resin was chewed as a thirst quencher by Indians, from whom American pioneers adopted the custom Later, refined paraffin was used and then chicle, which was probably first imported into the United States by the Mexican general Santa Anna A chicle gum was patented in 1869 by William and Semple In the modern factory, blocks of chicle are ground, melted, cleared in a whirling vat, sterilized, and beaten with sugar or corn syrup and flavorings, usually volatile mint oils, licorice, or fruits The gum is rolled through sheeting machinery and chopped into sticks or formed into candy-coated pellets. Insoluble plastics may be mixed with, or substituted for, the chicle. Although the United States is the major producer, exporter, and consumer, the industry has been established in Japan, Egypt, and Germany.

Cheyenne (shīăn', -ĕn'). **1** Town (pop. 1,070), co. seat of Roger Mills co., W Okla., near the Texas border; settled c.1892. The battle of the WASHITA took place near by. **2** City (pop 22,474, alt. c 6,000 ft), state capital, and co seat of Laramie co., SE Wyo , near the Colo. and Nebr. lines The Union Pacific RR selected this site for a division point in 1867. The city sprang up, was incorporated that year, and was made territorial capital in 1869. In the 1870s the development of the area as a cattle-ranching section and the opening of the Black Hills gold fields stimulated the city's growth Today it is a market for sheep and cattle ranches and a shipping center with railroad shops and yards and good air and highway connections Cheyenne revives its past annually with a Frontier Days celebration, first held in 1897 Landmarks include the state capitol and the supreme court building, housing the state historical museum and library. Near by are Fort Francis E Warren, U.S military post, a veterans' hospital, and a U S. horticultural station

Cheyenne, river, 527 mi long, rising in E Wyoming and flowing NE to the Missouri in central South Dakota, above Pierre The Belle Fourche is a tributary The Cheyenne basin is part of the MISSOURI RIVER BASIN PROJECT The Bureau of Reclamation has already established in the Cheyenne valley a project on the Belle Fourche, the Rapid Valley project near Rapid City, and Angostura Dam (begun 1946) on the Cheyenne itself

Cheyenne Indians, North American Indian tribe of the Algonquian linguistic family From territory that later became Minnesota, where they were found in the 17th cent , they migrated W along the Cheyenne river, stopped for several generations near the Black Hills, and then moved to the headwaters of the Platte river Here they divided (c 1830) into two bands, the northern Cheyenne, who are in Montana, and the southern Cheyenne, now in Oklahoma There is still much intercourse between the bands, and they are fully conscious of their close relationship In the early 19th cent they had a typical Plains culture Generally friendly to the whites up to 1861, the southern band that year began hostilities because treaties made by the United States had been continually violated The indiscriminate massacre (1864) of warriors, women, and children on Sandy Creek, Colo , by the U S army, aroused the Cheyenne to fury, and one of the bitterest Indian wars in the West followed In 1868 Custer attacked Black Kettle's camp on the Washita river and completely destroyed it, ending the war The northern Cheyenne took no part in these hostilities The Cheyenne speech is closer to the central Algonquian dialects than is that of the Blackfoot or the Arapaho (see LANGUAGE, table) See G B Grinnell, *The Fighting Cheyenne* (1915) and *The Cheyenne Indians* (2 vols , 1923), K N Llewellyn and E A Hoebel, *The Cheyenne Way* (1941)

Cheyne, Thomas Kelly (chā'nē), 1841–1915, English clergyman and biblical critic, educated at Oxford. While studying at Göttingen, he was influenced by Georg Ewald and gained a view of biblical criticism little known at the time in England From 1885 to 1908 he was Oriel professor of the interpretation of Scripture at Oxford as well as canon of Rochester He was the author of many books of biblical criticism, his most celebrated work was on the Major Prophets and on the Psalms He also wrote *Jewish Religious Life after the Exile* (1898) and *The Reconciliation of Races and Religions* (1914). With J. S. Black, Cheyne edited *Encyclopaedia Biblica* (4 vols , 1899–1903)

Chezib (kē'–), probably the same as ACHZIB **2**

Chiabrera, Gabriello (gabrē-ĕl'lō kyäbrā'rä), 1552–1637, Italian poet He was notable for his adaptation of the classic forms to Italian verse At 80 he wrote an autobiography

Chiang Kai-shek (chĕäng" kī"-shĕk', jyang"), 1886–, Chinese generalissimo and statesman Chiang studied at the Japanese academy for military cadets in 1907 In the revolution of 1911 he was a principal aide of Sun Yat-sen He was a banker in Shanghai from 1915 until 1923, when he became prominent in the Kuomintang party and led its victorious army northward from Canton, capturing Hankow, Shanghai, and Nanking. Chiang's original policy was to cooperate with the Chinese Communists and to accept Russian aid, but in 1927 he dramatically reversed himself, initiating the long civil war of the Kuomintang and the Communists. In 1928 he became chairman of the Nationalist government and commander in chief of all Chinese forces. Thereafter, under various titles and offices, he exercised virtually uninterrupted dictatorial power until 1948 In Dec , 1936, General CHANG HSUEH-LIANG kidnaped him at Sian, supposedly to force a declaration of war against Japan and the readmission of the Communists to the Kuomintang, but he was soon released unconditionally During the active fighting against Japan (1937–45) Chiang united most of China in resistance to Japan after entering upon a partial rapprochement with the Communists He was one of the most prominent of leaders in the Second World War and attended the Cairo Conference (1943) with F D. Roosevelt and Winston Churchill He and his wife, who had been Mei-ling or Mayling Soong (see SOONG, family),

were the international symbols of China at war, but Chiang was bitterly criticised by officers of the forces of his allies, notably Joseph W. Stilwell, and argument raged as to his internal policies and his conduct of the war After the war ended he did not achieve any settlement with the Communists, and civil war continued Chiang succeeded Lin Sen as provisional president in 1943, and in 1948 he was elected first constitutional president The new constitution, however, had little chance to function Chiang resigned after a few months but soon resumed leadership of the Kuomintang to oppose the Communists, who were sweeping into S China in strong military force and reducing the territories held by the Nationalists until, in late April, 1950, they retained only the island of Formosa Some of his speeches have appeared in English in *Collected Wartime Messages* (1946) and *China's Destiny* (1946) See biographies by H K Tong (1937) and Sven Hedin (1940), T H White and Annalee Jacoby, *Thunder Out of China* (1947)

Chiang Mai or **Chiengmai** (both chĕĕng'mī'), city (pop 26,062), N Thailand, on the Meping river near the Burmese border It is connected by rail with Bangkok The population is mostly Lao From the 11th cent, Chiang Mai was the center of a Lao kingdom, dominated in turn after the 14th cent by the Burmese and Siamese The Burmese invasions ceased in the 19th cent, and Chiang Mai was fully incorporated into Thailand

Chianti, Monti (mōn'tē kyän'tē), small range of the Apennines, Tuscany, central Italy, S of the Arno The celebrated wine produced on the slopes is called Chianti

Chiapas (chēä'päs), state (28,732 sq mi, 1946 estimated pop 769,406), S Mexico, on the Pacific, between the Isthmus of Tehuantepec and Guatemala Chiapas is crossed by a series of mountain ranges rising from the isthmus and extending SE into Guatemala They are separated by low, subtropical valleys Paralleling the tropical coastal plain is the Sierra Madre, a range reaching its greatest height in TACANÁ volcano The principal river valley of Chiapas is the GRIJALVA, and northeast of it lie the central highlands, populated predominantly by Indians of Mayan stock Again to the northeast, in the region known as El Desierto [the wilderness], are lower ranges, lakes, and valleys, falling away toward the USUMACINTA river and the jungle plains of Tabasco, almost uninhabited, but containing superb forests of dyewoods and hardwoods and many relics of the Maya (notably PALENQUE), the area is the retreat of the Lacandones, a gradually disappearing Indian group that lives much like the ancient Maya Rainfall, which is heavy, comes only during the wet season (June to Nov), except in the highlands the temperature becomes excessively high Subsistence crops are grown, and coffee, cattle, cacao, rubber, and henequen are of some importance in the economy In general, exploitation of the state's natural resources has been retarded because of remoteness and lack of communication, but there is a coastal railway from Veracruz to Tapachula, and airlines and the new INTER-AMERICAN HIGHWAY are linking the capital, TUXTLA, to the highland towns and opening the country Conquered with difficulty by the Spanish, Chiapas, as it was then called, was attached to the captain generalcy of Guatemala In early Spanish days Bartolomé de las Casas was bishop here Never ethnologically, geographically or politically a part of colonial Mexico, Chiapas nevertheless in the political anarchy following the collapse (1823) of the empire of ITURBIDE maintained a quasi-independence that separated it from the Central American states and oriented it toward Mexico

Chiarini, Giuseppe (jōōzĕp'pā kyärē'nē), 1833–1908, Italian poet, critic, and editor He translated Heine, edited the works of Foscolo and Carducci, and encouraged the young D'Annunzio Among his best poems are elegies on his son's death

chiaroscuro (kyärōskō'rō) [Ital, =light and dark], term once applied to an early method of printing woodcuts from several blocks and also to works in black and white or monotone Today it is used loosely to refer to the distribution of light and dark in painting Often, however, it refers more specifically to modeling in light and shade and to the design of the mass and shape produced by such modeling in a picture

Chiasso (kyä'sō) town (pop 5,625), Ticino canton, Switzerland A St Gotthard rail station on the Italian frontier, it has trade in wine and produces foodstuffs and tobacco

Chiatura (chēätōō'rä), city (pop c 10,000), W central Georgia, USSR It is the center of production of manganese, which is shipped by rail to Poti and Batum

Chiavenna (kyävĕn'nä), town (pop 3,803), Sondrio prov, Lombardy, N Italy. It has been historically a key point since it commands both the SPLÜGEN and MALOJA passes between Italy and Switzerland.

Chiba (chē'bä), city (1940 pop 92,061, 1947 pop. 122,066), capital of Chiba prefecture, central Honshu, Japan, on Tokyo Bay. It is a manufacturing center and has an 8th-century Buddhist temple

Chibcha (chĭb'chù), group of Indian tribes of the eastern cordillera of the Andes of Colombia. The two most important were those subject to the Zipa at Bogotá and to the Zaque at Tunja. Although trade with neighboring tribes was common, the Chibcha seem to have evolved their culture in comparative isolation. They were the most highly developed of the Colombian Indians, practicing agriculture (chiefly raising maize and potatoes), melting and casting gold and copper ornaments, mining emeralds, weaving textiles, and making pottery They evolved a stratified matrilineal society of overlords and vassals, in which private property was probably recognized and human sacrifice was practiced by the priesthood Probably because of the custom of gilding a new ruler, the source of the legend of EL DORADO is attributed to them The Chibcha were conquered by JIMÉNEZ DE QUESADA between 1536 and 1541 The Chibchan languages, a separate family, are spoken in Colombia and probably as far north as Nicaragua

Chicago (shĭkä'gō, shĭkô'gō), city (pop 3,396,808), co seat of Cook co, NE Ill, on the southwest shore of Lake Michigan Second among U S cities in size and importance, it is, in the words of Carl Sandburg,

> Hog Butcher for the World
> Tool Maker, Stacker of Wheat,
> Player with Railroads and the
> Nation's Freight Handler

A lake port and port of entry, it is more important as the hub of the railroads, air lines, and highways It stretches more than 20 mi on the lake front and is continued in the north by Evanston and other residential cities and in the south by industrial suburbs to the border of Indiana and beyond Its products are diverse Besides the meat-packing plants—the most famous in the world—and the huge grain mills and elevators, there are factories of all sorts, making, among other things, electric equipment, furniture, farm machinery, clothing, railroad cars and supplies (e g, in Pullman), iron and steel products, and musical instruments The city sprawls inland to the west, covering more than 200 sq mi Its vastness is tied together with boulevards built especially for speedy automobile communication and with a system of elevated railways (part of it a subway) The elevated lines come into the heart of the city to make a huge rectangle for convenience in transfer This is the celebrated Loop, which gives its name to the downtown section In or near the center of the city are the Chicago Public Library, housing a collection of more than 2,500,000 volumes, started by a gift from England after the great fire of 1871, the John Crerar Library of scientific books, the Chicago Board of Trade Building, and the Chicago Civic Opera La Salle St is the financial center, State St is known for its shops, and Randolph St has been celebrated for its theaters On the lake front (much of it man-made) is Grant Park, with the ART INSTITUTE OF CHICAGO, a planetarium, the Chicago Natural History Museum (formerly the Field Museum), and the John G Shedd Aquarium Near by is the huge stadium of Soldier Field To the north along the lake front runs Michigan Boulevard, going out of the region of towering skyscrapers past the rich hotels of the "gold coast" into the residential district of the north In this section lies Lincoln Park with the Chicago Historical Society building, the Chicago Academy of Sciences, the Chicago Natural History Museum, a zoological garden, a conservatory, and sculpture including the noted standing figure of Abraham Lincoln by Augustus Saint-Gaudens (1887) and the John P Altgeld memorial monument by Gutzon Borglum (1915) In the north there are a number of institutions of higher learning The largest of the universities is, however, on the south side This is the Univ of Chicago, with its imposing Gothic buildings and attractive spaciousness With nearby Jackson Park (with the Museum of Science and Industry) it is the center of a distinct and most attractive district that inherited some of the air of the great World's Columbian Exposition Most of the south side is, however, given over to industries and to poor residential areas including the homes of Chicago's large Negro population The Union Stock Yards, founded in 1865, are in the south, and the southern edge of the city is smoky with the enormous ironworks and steelworks The west side extends over a vast territory and is usually spoken of as a region of nationalities because there are many groups that live lives more or less isolated culturally, though crowded next to each other physically These neighborhoods grew up rapidly in the late 19th and early 20th cent In the west, too, are large industrial areas and two well-known parks, Garfield Park and Humboldt Park Here, too, is Hull House, the famous settlement house founded (1889) by Jane ADDAMS when immigration was reaching its peak The west runs out to a series of suburbs, both poor and well-to-do Other points of interest in Chicago are the Auditorium (designed by Louis H. Sullivan), St. Patrick's Church (dedicated 1856), and the ugly but beloved water tower that survived the great fire. Notable as dividing lines in the city are the two branches of the Chicago river. This was once a shallow prairie stream that flowed into the lake (now canalized, it flows away from the lake) In early days it was of great value because the narrow watershed between it and the DES PLAINES river (draining into the Mississippi through the Illinois river) offered an easy portage that led explorers, fur traders, and missionaries to the great central plains Here came Father Marquette and Louis Jolliet in 1673, and the spot was well known for a century before Jean Baptiste Point Sable (or Point du Sable) set up a trading post at the mouth of the river John Kinzie, who succeeded him as a trader, is usually called the father of Chicago The military post, Fort DEARBORN, was established in 1803 In the War of 1812 its garrison perished in one of the most famous tragedies of Western history Fort Dearborn was rebuilt in 1816, and the building of the Erie Canal in the next decade speeded the settling of the Middle West, and Chicago began to grow, it was platted in 1830 and incorporated as a village in 1833 Harbor improvements, lake traffic, and the peopling of the prairie farmlands boomed the town, which became a city in 1837 The Illinois and Michigan Canal was authorized by Congress in 1827 and was completed in 1848, just a few years before the railroads began to make canal traffic more or less obsolete By 1860 a number of lines connected Chicago with the rest of the nation, and the city was launched on its career as the great mid-continent shipping center Gurdon S Hubbard had also long since started it on a career as meat packer Grain and livestock created a huge, shambling city built of wood The great fire of 1871 (which legend says was started by MRS O'LEARY's cow, when she kicked over a lantern) wiped out that ill-built city One of the great disasters of U S history, the fire destroyed some $200,000,000 worth of property and killed several hundred people When the city was rebuilt, it was a place of stone and steel Industries sprang up, and the great inflow of immigrants started and climbed steadily Many nations have contributed to the modern city, including Germans, Scandinavians, Irish, Jews, Italians, Poles, Czechs, Lithuanians, Croats, Greeks, and Chinese With industry came troubles over labor that were highlighted by the HAYMARKET SQUARE RIOT of 1886 and the great strike at Pullman in 1894 (see DEBS, EUGENE V, and ALTGELD, JOHN P) The city was already proud of its reputation for brawling lustiness, but quietly it was also the center of Middle Western culture Theodore Thomas and his orchestra founded a great musical tradition Writing flourished, although it was not until the 20th cent that Chicago actually became a major leader in literature Such men as Eugene Field, Carl Sandburg, Edgar Lee Masters, Theodore Dreiser, and James T Farrell have given a considerable literary luster to Chicago's name Most notable in the development of American thought and taste in art was the WORLD'S COLUMBIAN EXPOSITION of 1893, the world's fair par excellence One of the architects at the exposition was the notable Louis H Sullivan, who together with D H Burnham, John W Root, and others made Chicago a leader in architecture It was in the prairie city that one of the distinctive U S contributions to architecture, the skyscraper, came into being Chicagoans have been from the beginning conscious of educational needs, and the city has many colleges and universities, including, besides the Univ of Chicago, De Paul Univ (Catholic, Vincentian, coeducational, 1898), George Williams College, ILLINOIS INSTITUTE OF TECHNOLOGY, LOYOLA UNIVERSITY, Mundelein College (Catholic; for women, 1929), parts of NORTHWESTERN UNIVERSITY, Roosevelt College, St Francis Xavier College for Women, and parts of the Univ of Illinois (see ILLINOIS, UNIVERSITY OF). There are a number of theological seminaries, schools of music, art, and law, and three junior colleges The first decade of the 20th cent saw the development of many agencies concerned with civic improvement, among them the City Club (1903), the Chicago Association of Commerce (1908), and the City Plan Commission (1909), which directs the development of the city The city between the First World War and 1933, however, earned an unenviable renown as the home grounds of gangsters, Al Capone and his ilk, and the reputation for gangster warfare still clings, long after the event. Despite the world-wide depression Chicago's new world fair, the Century of Progress Exposition (1933–34), proved how greatly Chicago had prospered and progressed In the Second World War all of the city's resources were taxed to the utmost in service to the nation, and the metropolitan area experienced considerable growth. See Lloyd Lewis and H J Smith, *Chicago the History of Its Reputation* (1929), H R Hamilton, *The Epic of Chicago* (1932), Milo M Quaife, *Chicagou from Indian Wigwam to Modern City, 1673–1835* (1933), B. L. Pierce, *A History of Chicago* (Vol. I, 1937, Vol. II, 1940), Harry Hansen, *The Chicago* (1942); Ernest Poole, *Giants Gone Men Who Made Chicago* (1942)

Chicago, river of NE Illinois formed in Chicago by the junction of its North and South branches and formerly flowing into Lake Michigan (first by its

original course, later by a channel to the north) The river now flows from the lake instead of into it; the current was reversed—and Chicago sewage taken away from the lake and carried to the Mississippi—when the Chicago Drainage Canal (built 1892–1900), later called the Chicago Sanitary and Ship Canal, was joined to the Des Plaines river at Lockport The Des Plaines and the Illinois have been improved and with the Chicago river and the canal are part of the Great Lakes to Gulf of Mexico waterway The old Illinois and Michigan Canal (completed 1848) to La Salle was the earlier shipping link and ran parallel to the present waterway

Chicago, Art Institute of: see ART INSTITUTE OF CHICAGO.

Chicago, University of, in Chicago, nonsectarian, private, coeducational, chartered 1891 (Baptist), opened 1892 with gifts from John D Rockefeller (see GATES, FREDERICK T.) It includes a degree-granting junior college, four divisions (humanities and biological, physical, and social sciences), and schools of business, divinity (with two affiliated theological schools), law, library science (graduate), social service administration, and medicine The noted education department (with laboratory schools) is now under the divisions Two observatories (Yerkes, at Williams Bay, Wis , and McDonald, with the Univ of Texas, at Mt Locke, Texas), the Oriental Institute, with a large archaeological museum, and the Institute for Nuclear Studies are notable There are paleontology and geography museums, a U S weather bureau, a seismograph, an art gallery, a radio station, a film library, a social settlement, a public-administration center, and psychiatric and other research institutes The library is especially rich in Lincolniana and American drama The campus is on the South Side, adjoining Jackson Park From its first years Chicago has been outstanding in research and graduate work. Its innovations include extension work, the quarter system, the junior college, and "general education." William R HARPER and Robert M HUTCHINS are among noted presidents The Univ of Chicago Press (1891), with its own printing plant, is one of the pioneers in the field See C. S. Boucher, *The Chicago College Plan* (1940 ed)

Chicago Heights, industrial city (pop 22,461), NE Ill , S of Chicago, settled in the 1830s, inc 1901 Its manufactures include iron and steel, railroad equipment, glass, chemicals, textiles, and paint

Chicago Natural History Museum, at Chicago, Ill , founded in 1893 through gifts of Marshall Field and others Chartered as the Columbian Museum of Chicago, it occupied until 1921 the fine arts building of the World's Columbian Exposition Soon after it was founded the name of the museum was changed to the Field Columbian Museum and later to the Field Museum of Natural History, the name by which it was known until 1943, when it became the Chicago Natural History Museum Especially notable are the lifelike exhibits of animals in their natural settings (largely the result of Carl Akeley's development of special methods of taxidermy and of preparation of habitat groups), the displays of plant life, and the anthropological and geological collections. The many expeditions sponsored by the museum have contributed largely to its collections Works of sculpture include Malvina Hoffman's portrayal of the races of mankind and Carl Akeley's group of African natives spearing lions and his fighting elephants Many educational opportunities are offered by the museum's library, the school-service department, and special programs

chicha (chē'chä), term commonly applied to any of various intoxicants made by South American Indians, particularly in Peru and Bolivia To make it, grains or berries are masticated and then allowed to ferment In the pre-Columbian period it was usually drunk in conjunction with religious ceremonies The ancient Inca government strictly controlled its use, but today consumption is unregulated.

Chichagof Island (chĭ'chŭgŏf), off SE Alaska, in the ALEXANDER ARCHIPELAGO Lying N of Baranof Island, it has fish canneries, gold mining, and wolfram deposits

Chichén Itzá (chēchān' ētsä'), city of the ancient MAYA, N central Yucatan, Mexico According to one system of dating it was founded A.D. c 514, probably by the ITZÁ, was abandoned in 692, was reoccupied c 928, and then at some time between 968 and 987 was chosen by Kulkulcán (see QUETZALCOATL) as his capital. After being defeated by Mayapán in 1194, the Itzá abandoned it for the last time. Spanning two great periods of Maya civilization, Chichén Itzá shows both Old Empire and New Empire architectural styles. The Old Empire style is massive, with heavy decorative sculpture and cramped interiors. The later buildings have plainer, more austere lines, and the sculpture (based on the Mexican feathered-serpent motif and columns) becomes more incidental and enhances architectural design Rare among Maya buildings is the round tower (41 ft high) called the Caracol [snail shell], built in the New Empire; it was probably an astronomical observatory. Into Chichén Itzá's sacred well, mecca of countless pilgrimages from Central America and the Mexican plateau, were thrown jade and metal offerings. Humans were also sacrificed.

Chicherin, Georgi Vasilyevich (gôôr'gē vŭsē'lyŭvĭch chĭchä'rĭn), 1872–1936, Russian statesman. Of noble origin, he entered the Russian foreign office but soon resigned after joining the Social Democratic party He was in London during the October Revolution of 1917 and was arrested by the British authorities, but he was released in exchange for the British ambassador to Russia. In 1918 he succeeded Trotsky as foreign commissar An able diplomat, Chicherin successfully prepared the recognition of Soviet Russia by the Great Powers, notably by the Treaty of Rapallo (see RAPALLO, TREATIES OF, and GENOA, CONFERENCE OF) in 1922. At the Conference of Lausanne (see LAUSANNE, CONFERENCE OF) in 1922, Chicherin refused to sign the convention concerning the Dardanelles Illness caused his resignation in 1930 Maxim Litvinov, long his assistant, succeeded him

Chichester (chĭ'chĭstûr), municipal borough (1931 pop 13,912; 1943 estimated pop 19,944) and city, Sussex West, England, on a plain between the South Downs and the sea The Regnum of the Romans, it was conquered by Ælla and his sons, who landed near by at Selsey in 477 and founded the kingdom of the South Saxons, they renamed the town Cissaceaster or Cissanceaster, after Ælla's son Cissa There is a promenade along the ancient city walls A Roman amphitheater was discovered outside the walls in 1935 The cathedral (12th–13th cent) has unusual features in its detached bell tower and its aisles The main streets of the town meet at a market cross (1500)

Chichucastenango (chē"chēkästĕnäng'gō), town (pop 1,167), SW Guatemala. In the heart of the highlands, Chichicastenango became the spiritual center of the QUICHÉ after their defeat by Pedro de ALVARADO Today the religious practices of the Quiché are a blend of Christian and pagan ceremony. The town's market is colorful and crowded

Chichu-jima (chĭchōō'-jē'mä'), volcanic island (9 5 sq mi , pop c 4,000), N Pacific, S of Tokyo, largest of the Bonin Islands. Omura, chief town of the Bonin Islands, is on Chichi-jima The island produces sugar cane, cocoa, and ornamental coral. In the Second World War the island was the site of a Japanese naval base at Port Lloyd (Futami-minato) Chichi-jima was formerly called Peel Island

Chichimec (chēchēmĕk') generic term applied to the culture and peoples of the Valley of Mexico between the Toltec ascendancy and the Aztec Before the TOLTEC abandoned Teotihuacán, about the 11th cent , the Chichimec were nomadic tribes on the northern fringes of the valley The AZTEC, wandering south about a century later, were linguistically and culturally related to the Chichimec, and the latter name is sometimes applied to them before they gained preeminence over other cities The Chichimec period (c 950–1300) was one of intertribal warfare and political confusion among the city-states of the valley, but it prepared the way for the unified culture of the Aztec.

chickadee (chĭk'ŭdē"), small North American bird related to the titmouse The black-capped chickadee is fearless, lively, and sociable and is a permanent resident over most of its range in E North America Both sexes have similar plumage, disheveled but attractive, with black caps, gray back and wings, and white to buff under parts Agile little gymnasts, they are often seen swinging on branches Insect pests form more than half of their diet They have a pleasing song and a call note like "phee-bee" in addition to the one which gives the bird its name There are several western species, one southern species, and a brown-capped northeastern species

Chickahominy (chĭkuhō'mĭnē), river of E Virginia, rising NW of Richmond and flowing southeast c 90 mi to the James In the Civil War there was heavy fighting along its banks (see PENINSULAR CAMPAIGN and SEVEN DAYS BATTLES)

Chickahominy Indians, North American Indian tribe of Algonquian linguistic stock. The tribe was a member of the Powhatan Confederacy and one of the first Indian peoples with whom the English settlers in Virginia were acquainted

Chickamauga (chĭk'ŭmô'gŭ), city (pop 1,665), NW Ga., S of Chattanooga, Tenn , inc 1891 It was the scene of a Civil War battle in the CHATTANOOGA CAMPAIGN. Chickamauga and Chattanooga National Military Park (in two distinct parts; 6,277.4 acres in Georgia, 1,849 76 acres in Tennessee, est. 1890) and Fort Oglethorpe (1903), U.S army post, are near.

Chickasaw Indians (chĭk'ŭsô), North American Indian tribe of Natchez-Muskogean linguistic stock, occupying N Mississippi. They were closely related in language and culture to the Choctaw. They warred constantly with the Choctaw and the related Creek Indians and were formidable opponents of the French After 1834 they moved, according to treaty arrangements, to Oklahoma, where they constituted one of the Five Civilized Tribes.

Chickasha (chĭk'ŭshä), city (pop. 14,111), co. seat of Grady co., SW central Okla., on the Washita river and SW of Oklahoma City, in a rich farm and ranch area which also produces oil and natural gas. The trade and processing of cotton (especially cottonseed oil), grain, poultry, and dairy goods are important. Oklahoma College for Women is here

chicken: see POULTRY.

chicken pox or **varicella** (vărĭsĕ'lŭ), contagious infectious disease of childhood, caused by a filterable virus. Two or three weeks after exposure to a case there is fever, and then a skin rash appears, starting on the trunk and spreading in successive crops for three or four days The red spots become blisters, and eventually dry, leaving a crust which falls off and is sometimes followed by a slight scar The disease is usually not serious, but infection may follow scratching The patient should be isolated until every sign of the active disease has disappeared Chicken pox may be confused with a mild case of smallpox

chick-pea, annual plant (*Cicer arietinum*), cultivated since antiquity for the somewhat pealike seeds much used as food in India, Italy, France, and Spanish-speaking countries The seeds are boiled or roasted and have been substituted for coffee Other names are *garbanzo*, *cece*, and gram.

chickweed, name for various plants, particularly those of the genus *Alsine* (or *Stellaria*), which are usually low herbs with white star-shaped flowers They are relished by birds The common chickweed, a weed often in bloom in winter, has been used for greens and for poultices The mouse-ear chickweeds, similar, are species of *Cerastium*.

Chiclayo (chēklä'yō), city (pop 32,646), NW Peru On the coastal desert between the Andes and the Pacific, Chiclayo for years at a time has no rainfall However, by utilizing short Andean streams to irrigate the alluvial fans, Chiclayo raises considerable sugar cane and a major part of the republic's rice

chicle (chĭ'kŭl), name for the gum obtained from the latex of the sapodilla tree, a tropical evergreen (*Achras sapota*, *A zapota*, or *Manikara zapotilla*) The tree, native to parts of Mexico and Central and South America, is also known as nasseberry and as sapodilla plum It is widely cultivated in tropical regions, including S Florida, for its fruit Chicle is yielded only during the rainy season and is obtained chiefly from wild trees Natives, called *chicleros*, cut zigzag gashes in the tree trunk and collect the sap in bags The collected material is boiled and when it reaches the correct thickness is poured off and molded into blocks These are exported, chiefly to the United States, for use in making CHEWING GUM

Chico (chē'kō), city (pop 9,287), N Calif , N of Sacramento, laid out 1860 by Gen John Bidwell, inc 1872 It lies in a fertile agricultural area, yielding fruits, almonds, alfalfa, and grain The city has flour mills, canneries, plants for drying and packing fruits, and railroad shops It is the seat of Chico State College (coeducational, 1887) and a Federal plant introduction station Lassen Volcanic National Park lies to the northeast

Chicopee (chĭ'kupē), industrial city (pop 41,664), SW Mass , at the confluence of the Chicopee and Connecticut rivers near Springfield, settled 1652, set off from Springfield 1848, inc as a city 1890 It includes the villages Chicopee, Chicopee Falls, and Willimansett Electrical apparatus, tires, and firearms are among its products The city has an important military air base Edward Bellamy was born and lived most of his life in Chicopee Falls The College of Our Lady of the Elms is in Chicopee

chicory or **succory,** European herb (*Cichorium intybus*), naturalized in North America, where the tall stalks of usually blue flowers are common along waysides and are known as blue-sailors It is extensively grown in Europe for its root, which, roasted and powdered, is used as a coffee substitute and adulterant Chicory is also used as a potherb and salad plant, the common type blanched for salads being called witloof or French endive True endive belongs to the same genus

Chicoutimi (shĭkōō'tĭmē"), city (pop 16,040), S Que , on the south bank of the Saguenay at the head of navigation and at the mouth of the Chicoutimi A Jesuit mission was established here in 1670, and the city is now the seat of a Roman Catholic bishop, with a cathedral, a seminary (affiliated with Laval Univ.), schools, and convents It has large pulp and lumber mills and furniture and other woodworking factories

Chicoutimi, river of S Quebec, rising in the Laurentian highlands and flowing N into Lake Kenogami, thence E into the Saguenay, dropping almost 500 ft in the last 18 mi with a 50-foot fall just above the city of Chicoutimi Its drainage area is heavily wooded and generally unsettled

Chidambaram (chĭdŭm'bŭrŭm"), town (pop. 26,212), SE Madras state, India Its temples, among the oldest examples of Dravidian art, include one to the dancing Siva which covers 39 acres.

Chidley, Cape, headland on the north coast of Labrador at the entrance to Hudson Strait, named by the explorer John Davis in 1587.

Chidon (kĭ'dŏn): see PEREZ-UZZA.

chief, a leader of a clan or tribe. A tribe may possess several chiefs, among whom the social, religious, and war functions are divided, or the group

may form a council of clan heads. Inherent qualities of leadership may help a man to attain chiefship, or he may succeed through the display of powers considered supernatural Hereditary chiefship is most common and helps to prevent the period of social disruption caused by suspension of authority before a successor is found for a dead chief. Among Scottish clans, the chief is considered the representative of the founder of the clan, "the sacred embodiment of the race".

Chiemsee (kēm'zā), lake, area 31 sq mi , Bavaria, SE of Munich. It is the largest lake in Bavaria On the largest of three islands is a palace built by Louis II in imitation of Versailles.

Chieng Mai, Thailand: see CHIANGMAI.

Ch'ien Lung (chyĕn' lôông'), 1711–99, fourth emperor (1736–96) of the Ch'ing dynasty, whose original name was Hung-li. During his vigorous reign, China attained its maximum territorial expanse. He resisted attempted Western encroachments and for a time forbade Christian missionary activity. He was a prolific, though ungifted, writer, and his court was a center for artists and scholars

Chientang: see TSIENTANG

Chiesa, Francesco (frănchĕs'skō kēā'zä), 1871–, Italian Swiss author. Born in the canton of Ticino, he wrote in Italian His novels and stories have little plot but are noted for their literary style and psychological insight, they include the stories *Istorie e favole* (1913) and *Racconti puerili* (1920) and the novels *Tempo di Marzo* (1925), *Valladorna* (1928), and *Racconti del mio orto* (1929). His poetry is marked by perfection of form

Chieti (kyā'tē), city (pop 17,575), capital of Chieti prov , Abruzzi e Molise, central Italy, near the Adriatic It occupies the site of the Roman Teate, of which ruins remain Chieti was in the duchy of Benevento (7th cent), fell to the Normans (1078), and thereafter was in the kingdom of Sicily and of Naples The order of the Theatine Brothers (founded 1524) takes its name from ancient Teate Chieti has a fine Romanesque cathedral (11th cent) and a noted music school

chigger, name for the minute, six-legged, reddish larvae of the harvest mite or red bug, found more abundantly in the S United States than in the North It has eight legs when adult and is an arachnid It attacks man and other warm-blooded animals as they pass the underbrush which it frequents Attaching itself to the skin, it gorges with blood It causes severe itching and sometimes fever, but it is much less harmful than the CHIGOE with which it is sometimes confused

Chigirin (chĭgĭrēn'), town (pop 7,954), W Ukraine Founded (1589) as a fortress, it rose to importance in the 17th cent when Bohdan Chmielnicki made it the capital of the Ukraine

Chignecto (shĭgnĕk'tō), isthmus connecting Nova Scotia with the Canadian mainland It is c 17 mi across at its narrowest point near Amherst, chief city of the isthmus See W R Bird, *A Century a Chignecto* (1928), J. C Webster, *The Forts of Chignecto* (1930)

Chignecto Bay, northernmost of two large arms of the Bay of Fundy It separates New Brunswick from Chignecto isthmus, N S

chigoe (chĭ'gō) or **jigger**, small flea of tropical America and the S United States, the female of which bores into the flesh, usually the feet or legs, of humans and of many wild and domestic animals The insect's abdomen swells to form a bladder or sack in which the eggs develop Sores which result from this irritation in the host's flesh are painful and may become seriously infected if untreated

Chigwell, village, Essex, England, near Woodford, and near Hainault Forest King's Head Inn is the Maypole Inn of Dickens's *Barnaby Rudge* William Penn attended the grammar school, which was founded in 1629

Chihli, China: see HOPEH.

Chihli, Gulf of: see POHAI.

Chihuahua (chĕwa'wä), state (94,831 sq. mi.; 1946 estimated pop, 737,768), N Mexico, S of New Mexico and SW of Texas. The capital is Chihuahua city. Largest of the Mexican states, Chihuahua is divided into two regions—the mountains of the Sierra Madre Occidental to the west and the vast, hot, cactus-and-greasewood desert basins, broken by scattered barren ranges, to the north and east. In extreme E Chihuahua and W Coahuila is a desolate basin, the Bolsón de Mapimí The mines of the Sierra Madre, such as those in the region of HIDALGO DEL PARRAL, yield silver, gold, copper, lead, and manganese and are the most valuable Chihuahuan industry. Cattle raising was increasingly important on the wide plains until it was halted by the depredations of Francisco VILLA, only in recent times has it revived. Long considered unsuitable for agriculture, the state has seen reclamation of river valleys—of the CONCHOS and of the rivers flowing from the Sierra Madre N to the Casas Grandes desert basin and W to Sinaloa. The newly irrigated areas and upland mountain valleys produce grains, cotton, sugar cane, and tropical fruits. Some timber is cut in the mountains. Chihuahua was first known to the Spanish through CABEZA DE VACA. After the settlement of Durango in 1562 by Francisco de IBARRA, Chihuahua and Durango were called Nueva Vizcaya. Chihuahua became a state after the revolution against Spain In the 19th cent , until mounting feeling caused their expulsion, many Chinese immigrated into Chihuahua. The Apache kept the inhabitants in a recurrent state of terror. Of considerable importance to its economic and political development was the westward expansion of the United States, during the 19th and early 20th cent foreign investment was considerable, with the border city of JUÁREZ as the commercial link. Chihuahua was occupied by American forces in the Mexican War and played a prominent part in the turbulent years following the revolution in 1910. Chihuahua, the capital (pop 56,805), lies near the center of the state in a valley almost encircled by hills. Founded in the early 18th cent., it prospered in spite of Indian raids. Agriculture is important, but the city depends chiefly on near-by mines It is the only large rail and commercial center of a vast northern area There are many American inhabitants Minor industries include smelting and other mining processes, breweries, and furniture making In Chihuahua the revolutionary HIDALGO Y COSTILLA was executed in 1911 It was occupied briefly by U S forces in 1846 and was for a time the headquarters of Benito JUÁREZ until taken by the French in 1865

Chihuahua, toy dog believed to have been developed from a breed prized as a pet by ancient Toltec tribes and later by the Aztec The modern Chihuahua, known for its intelligence and alertness, weighs from 1 to 6 lb The skull is rounded, the dark eyes set well apart, and the ears are large and erect There are smooth-haired and long-haired varieties In color they range from white, through shades of tan, to black, some are solid-colored and others are mixed

Chikamatsu, Monzaemon (mônzä'ämô chĭkä'mätsōō), 1653–1724, great Japanese dramatist, who wrote primarily for the puppet stage in the Tokugawa shogunate He vastly improved the *jorurı* (dramatic ballad) and in many ways influenced the development of the modern Japanese theater Among his best-known works is the *Kokusenyakassen*, which tells the adventures of a pirate captain See *Masterpieces of Chikamatsu* (tr. by Asataro Miyamori, 1926)

chilblains: see FROSTBITE

Chilcotin (chĭlkō'tĭn), river, 146 mi long, S British Columbia It is a tributary of the Fraser.

Child, Francis James, 1825–96, American scholar, b Boston, grad Harvard, 1846. Except for two years' study in Germany, 1849–51, he taught at Harvard the rest of his life, first as Boylston professor of rhetoric and oratory and after 1876 as professor of English literature He was an exemplary and inspiring teacher His great collection, *English and Scottish Popular Ballads* (5 vols in 10 parts, 1883–98), is famous, but also for years his edition of the *Poetical Works of Edmund Spenser* (5 vols , 1855) was standard, and his "Observations on the Language of Chaucer" in the *Memoirs of the American Academy of Arts and Sciences* (Vol VIII, 1863) led to modern methods of Chaucer study See his *Scholar's Letters to a Young Lady* (1920), Gamaliel Bradford, "Portrait of a Scholar," in *As God Made Them* (1929)

Child, Sir John, d. 1690, British governor of Bombay He was probably the first man given authority over most of British India, for the East India Company Opinions differ as to his success and title. In his wars and diplomacy against the natives he was supported by the chairman and virtual ruler of the company, his brother, **Sir Josiah Child**, 1630–99 A very wealthy man, Sir Josiah wrote on economics, his most famous work being *A New Discourse of Trade* (final form, 1693)

Child, Lydia Maria (Francis), 1802–80, American author and abolitionist, b Medford, Mass She edited (1826–34) the *Juvenile Miscellany*, a children's periodical She and her husband (David Lee Child, whom she married in 1828) were devoted to the antislavery cause, and Mrs Child wrote widely read pamphlets on the subject in addition to editing (1841–49) the *National Anti-Slavery Standard*, a New York weekly newspaper. Other writings include several historical novels and an unusually tolerant book on the history of religions Her *Frugal Housewife* (1829) went through many editions See her letters (with introduction by Whittier, 1883)

child. For child in law, see PARENT AND CHILD See also ADOLESCENCE, CHILD LABOR; CHILD WELFARE, INFANT. Useful books on children include L B Hohman, *As the Twig Is Bent* (1940), A T. Jersild, *Child Psychology* (1940), K C Garrison, *The Psychology of Exceptional Children* (revised printing, 1943); Arnold L Gesell and others, *The Infant and Child in the Culture of Today* (1943) and *The Child from Five to Ten* (1946), Angelo Patri, *How to Help Your Child Grow Up* (1948).

childbirth: see BIRTH.

Childebert I (chĭl'dŭbûrt), d. 558, Frankish king, son of CLOVIS I. His capital was at Paris. With his brothers CLOTAIRE I and THEODORIC I he divided their brother Clodomer's kingdom (524), with Clotaire he shared Burgundy and Provence (534) and fought unsuccessfully in Spain (542).

Childebert II, 570–96, Frankish king, son of Sigebert I and BRUNHILDA, king of Austrasia (575–96) and Burgundy (593–96) His mother actually ruled for him, and he was a mere pawn.

Childeric I (chĭl'dürĭk), c.436–481, Merovingian king of the Salian Franks (c 457–481), son of Meroveus and father of Clovis I Information on him is mostly legendary He fought the Visigoths (463) as an ally of the Roman general Aegidius, subsequently he defeated the Saxons and the Alemanni His tomb, filled with armor and ornaments, was discovered in 1653 near Tournai, Belgium

Childersburg (chĭl'dürsbûrg), town, N central Ala , on the Coosa and SE of Birmingham. Its 1940 population (515) was multiplied by the establishment (1941) here of a huge U S powder plant, sold after the Second World War to private interests. A newsprint mill was established in 1948

child labor, originally a term including only labor of very young children in English factories, but now used also of any labor even of older children. Child labor was first recognized as a social problem with the introduction of the factory system in late 18th-century England In the Eastern and Midwestern United States, child labor became a recognized problem after the Civil War, and in the South after 1910 Children had formerly been apprenticed or had worked in the family, but in the factory their employment soon constituted virtual slavery, especially among English orphans This was mitigated in England by acts of Parliament in 1802 and later Similar legislation followed on the Continent as countries became industrialized Legislation concerning child labor in other than industrial pursuits, e g , in agriculture, has lagged Nearly all member countries of the International Labor Office regulate the employment of children in industry, most also regulate commercial work, some, work in the street trades and public amusements, and a few, agricultural and household work By 1940 almost all European nations had laws limiting the working day for children to 6–8 hr. In the United States all but two states have adopted an age minimum of at least 14 for full-time employment in industry, and usually in some if not all other occupations, with 14 states prohibiting employment of children under 16 during school hours Congressional child labor laws were declared unconstitutional by the Supreme Court in 1918 and 1922 A constitutional amendment was passed in Congress in 1924 but was not approved by a sufficient number of the states In 1936 a conference of 20 American nations at Santiago supported a U S proposal for a 16-year age limit for the employment of children In 1937 in the United States, attempts were made to secure the adoption of a revised version of the 1924 constitutional amendment and to ban interstate commerce in goods produced by child labor, while the New York assembly prohibited the sale of such goods in the state Inspections and investigations are carried out by the Children's Bureau of the Dept of Labor The Fair Labor Standards Act of 1938 set a basic 16-year minimum age for employment of children producing for interstate or foreign commerce, with the exception of 14- and 15-year-olds engaged in non-mining and nonmanufacturing occupations, where such work does not interfere with their health and education The retroactive terms of the act also applied to children of 16 to 18 employed in hazardous occupations In 1941 the Supreme Court sustained the constitutionality of the act See U S. Children's Bureau, *Child Labor Facts and Figures* (1930), C D Lumpkin and D W. Douglas, *Child Workers in America* (1937), Grace Abbott, *The Child and the State* (1938)

Children, John George, 1777–1852, English scientist An authority on minerals, he discovered a way of extracting silver from ores without using mercury His experiments with a gigantic galvanic battery with plates 32 ft square won him the medal of the Royal Institution, London For 25 years he was librarian in the departments of antiquities and zoology of the British Museum He was a founder of the Entomological Society.

children, delinquent: see JUVENILE DELINQUENCY

children, dependent. Until the end of feudalism religious organizations provided the only care for children orphaned, deserted, or neglected by their parents (see FOUNDLING HOSPITAL) or born into such poverty that their parents could not support them In England the poor law (1601) of Elizabeth's reign recognized the state's obligation to the needy Under this law overseers of the poor could apprentice older children and provide for younger ones by farming them out, putting them in poorhouses, or giving outdoor relief. Until about the end of the 18th cent in both England and the English colonies in America, the chief methods were still indenture (binding the child out to a master who expected a return in labor for anything expended) or placing them in almshouses Children were sometimes indentured as mere infants and were not free until they were 21 years old or more. In poorhouses they were not separated from the adult inmates, some of whom were insane, and often no schooling was provided. About 1800 several philanthropic women

in New York organized an orphanage, the first of many in the United States, most of them under church auspices Although only a small percentage of these institutions have ever been publicly administered, they came later under city regulation In the 1850s the Children's Aid Society of New York began sending dependent children from Eastern cities to homes in the West One criticism of this emigration work—that it separated children permanently from their relatives—was later met by the foster-home system, in such homes can be placed children whose parents are temporarily unable to care for them, as well as children who are orphaned or deserted The tendency in orphanages has for some time been away from regimentation and institutionalism The newer ones are of the cottage type, in which comparatively few children are cared for under a housemother Ideally, the children are treated as individuals and allowed the freedom they would have in a good home Since the Missouri legislature in 1911 passed a law authorizing payments to needy mothers, many countries and most states of the United States have enacted such legislation The Social Security Act (1935) provided for Federal payments to match state aid for dependent children See U S Children's Bureau, *Foster-Home Care for Dependent Children* (1924), H W Thurston, *The Dependent Child* (1930), M B Sayles, *Substitute Parents* (1936), J W Polier, *Everyone's Children, Nobody's Child* (1941), Eva Burmeister, *Forty-Five in the Family* (1949)

children, diseases of. Diseases in children, especially up to seven years, differ in some important respects from those in adults The temperature is unstable and disturbances of the nervous system are common The physician must rely on the parents' observations concerning the changes in appetite, digestion, bowel action, evidence of pain, drowsiness, sweating, and convulsions Malformation before birth and injury at birth constitute some disorders of childhood Common malfunctions are digestive disturbances from errors in diet or from infection with bacteria, causing dysentery Pneumonia, kidney infection, and otitis media (middle-ear infection) are also common Older children are especially susceptible to the acute infectious diseases, such as MEASLES, SCARLET FEVER, DIPHTHERIA, and PNEUMONIA They are also subject to POLIOMYELITIS and epidemic MENINGITIS Infestation with worms is common Heart disease often starts in childhood Eczema and ringworm are the chief skin diseases See L E. Holt and John Howland, *The Diseases of Infancy and Childhood*, revised by L E Holt, Jr , and Rustin McIntosh (latest ed).

Children's Crusade · see CRUSADES

Childress (chĭl'drĭs, chīl'-), city (1940 pop 6,464; 1947 estimated pop 9,500), extreme N Texas, SE of Amarillo in the Panhandle, inc 1888 A railroad division point in old ranching country, the town is a prosperous market and processing center for an area producing wheat, cotton, poultry, and milk

child welfare. Foundling asylums for orphans and abandoned children were the earliest institutions for child care, usually under religious auspices Only in fairly recent times has there been an attempt to provide more than minimum subsistence In the late 18th cent a movement began to treat children as being something different from "small adults," and such educators as Rousseau, Pestalozzi, and Froebel were discussing children's special needs at the same time that the Industrial Revolution was exploiting CHILD LABOR In the 19th cent many institutions were organized, either under religious auspices or through private charity, to take care of children who were orphaned, or destitute (see CHILDREN, DEPENDENT), or handicapped The theory that it was the responsibility of the community to provide for children the advantages which their parents could not supply is a 20th-century development In this category are school lunches (often free), medical, dental, and psychiatric service and child guidance clinics in schools, playgrounds, children's courts, and special schools for handicapped children, and foster care in families for children of broken homes Infant and child clinics are often provided by municipalities Many welfare agencies finance summer camps both for healthy and for handicapped children In child-welfare legislation the British Children's Charter Act of 1908 and the Ohio Children's Code Commission of 1911 marked a new era In 1912 the Children's Bureau was established as part of the U S Dept. of Commerce and Labor (it is now under the Federal Security Agency), and since 1909 decennial child-welfare conferences have been held at the White House Under the Social Security Act (1935), the Federal government makes grants to states with approved plans of assistance to dependent children The UN International Children's Emergency Fund was established in 1946 to alleviate malnutrition and to help reestablish children's services destroyed in the war See Phyllis Blanchard, *The Child and Society* (1928); Grace Abbott, *The Child and the State* (1938), Hazel Fredericksen, *The Child and His Welfare* (1948); publications of the U.S. Children's Bureau, the Child Welfare League of America, and the National Child Labor Committee.

Chile (chĭ'lē, Span. chĕ'lā), republic (286,396 sq. mi ; pop 5,023,539), S South America, west of the continental divide of the Andes The capital is SANTIAGO Chile is a narrow strip of land, at no point more than 250 mi wide, between the Andes and the Pacific It stretches from about lat 16° S to Cape Horn, including at its southern extremity all of the Strait of Magellan (see MAGELLAN, STRAIT OF) and more than half of TIERRA DEL FUEGO. Outlying and well off the coast in the Pacific are EASTER ISLAND and the JUAN FERNÁNDEZ islands Chile has also recently asserted claims to the Falkland Islands and in Antarctica Continental Chile has several contrasting topographical and climatic zones In the far north are the heat-baked deserts, notably ATACAMA. In them are fabulously rich deposits of sodium nitrate and copper, exported from ANTAFOGASTA and ARICA Despite its bleak harshness the desert land has contributed much to Chile Between this and central Chile are semiarid lands that yield to irrigation and can be utilized for pasture In central Chile itself between the Andes and a low coastal range is a long central valley broken by rolling hills Here the population (about 65 percent predominantly Spanish mestizo, 30 percent pure white, and 5 percent pure Indian) is concentrated It is a relatively homogeneous group This central region, which stretches from COQUIMBO S to the Bío-Bío river, also has on the coast the important ports of VALPARAISO and VIÑA DEL MAR In the south the Andes approach the sea and finally enter into it, forming large islands and broken archipelagoes This coastland is very wet and heavily wooded—a complete contrast to the north MAGALLANES prov and its capital, PUNTA ARENAS, far to the south, are the centers of interest The Andes rise as they go northward, but still in the South they embrace a lovely and alpine area, the lake district between PUERTO MONTT and TEMUCO The lakes and neighboring mountains make this one of the finest vacation regions of the world The section has also been economically developed, to a good extent by German immigrants Farther north the Andes become an almost impassable barrier, a row of peaks on the Argentine border that are surpassed in height only by the Himalayas Greatest of them all is ACONCAGUA There are only a few routes across the bare, snow-capped mountains The most famous is USPALLATA PASS, used by the Transandine Railway There are in the north a number of extinct volcanoes, and in the south there are active ones The south also has many glaciers to feed the lakes that are cradled among the peaks Most of Chile is subject to earthquakes which have at times been very disastrous The land was not attractive to the conquistadors because the great barren deserts shut the Spanish in Peru away from the attractive central valley of Chile Furthermore, the inhabitants were the fierce and warlike ARAUCANIAN INDIANS, who offered extremely stout resistance to the conqueror Nevertheless, the conquest was undertaken early The first attempt by Diego de ALMAGRO in 1536 was a total failure, but in a few years a new attempt was made, this time (1540) by Pedro de VALDIVIA He founded Santiago in 1541 and later established La SERENA, Valparaíso, CONCEPCIÓN, and VALDIVIA Despite discouragement and the incessant warfare with the Indians the Spanish persevered and succeeded The Indians were pacified but not subdued, the Araucanians in fact remained hostile until near the end of the 19th cent Finding little of the precious metals they sought (the great copper deposits were discovered much later), the Spanish developed a pastoral society based on large haciendas worked by Indian labor During the long colonial era, the mestizos became a tenant-farmer class, called the *inquilinos* Though technically free, they lived so close to complete poverty that they became in practice generally bound to the soil These conditions persisted, and to some extent still persist, though the great hacienda has tended to disappear gradually, and some of the *inquilinos* have made the transition to become small independent farmers. A large part of the land is still given over to stock raising. While about one tenth is planted to wheat and other cereals, vegetables, and vineyards, the remainder lies fallow or is sown to alfalfa Dependence on minerals (which are found in central Chile as well as the north) and cattle made it necessary for Chile to import foodstuffs. During most of the colonial period Chile was a captaincy general dependent upon the viceroyalty of Peru, but in 1778 it became a separate division The territorial limits of the *audiencia* established at Santiago in 1565 and of the captaincy general were ill-defined and caused after independence was won long-drawn boundary disputes with Peru, Bolivia, and Argentina The movement toward independence began in 1810, notably under the leadership of Juan MARTÍNEZ DE ROSAS and Bernardo O'HIGGINS. The first phase (1810-14) ended in defeat at RANCAGUA, largely because of the rivalry of O'Higgins with José Miguel CARRERA and his brothers. In 1817 José de SAN MARTÍN, one of the great South American liberators, brought an army with incredible hardship over the Andes from Argentina to invade Chile. The following year he won the decisive battle of MAIPÚ. O'Higgins, who had been chosen supreme director, formally proclaimed Chile's independence Feb 12, 1818, at Talca and established a military autocracy that characterized the republic's politics until 1833. During this time the British Lord Cochrane, placed in command of the Chilean navy, cleared (1819–20) the coast of Spanish war vessels and shipping, and in 1826 Ramón Freire, then supreme director, drove the royalists from their last foothold (Chiloé island) on Chilean soil The revolutionary movement, led by the creole oligarchy, had accentuated a respect for force Of the three influential elements in this society—the colonial aristocracy, the clergy, and the army—the first two had been discredited by royalist actions in the war The army, then, plus a few intellectuals, was left to establish a government where colonial society was not adapted to democratic forms Yet with the strongly centralistic constitution of 1833, fashioned largely by Diego PORTALES on Chile's particular needs rather than being modeled from others, a foundation was laid for the gradual emergence of parliamentary government Between 1841 and 1861 (the administrations of Manuel BULNES and Manuel MONTT) the country experienced governmental reform and material progress In the war between Peru and Spain, which involved Chile, Valparaíso was bombarded by a Spanish squadron, an act that led the republic to fortify its coast and build a navy Chile had begun to demonstrate the busy enterprise which has made the fortunes of the country from its natural resources Chileans obtained the right to work nitrate fields in the desert lands which then belonged to Bolivia Trouble over the concessions led in 1879 to actual war (see PACIFIC, WAR OF THE) Chilean arms triumphed, and Chile was enlarged with new and valuable territories A long-standing quarrel also resulted, the TACNA-ARICA CONTROVERSY Chile was also involved in border troubles with Argentina because the crest of the Andes and the continental watershed did not agree It was as a sign and symbol of the end of this trouble that the CHRIST OF THE ANDES was dedicated in 1904 In the meantime the internal struggle between the executive and legislative branches of the government became intensified and resulted (1891) in the overthrow of President José BALMACEDA A congressional dictatorship replaced presidential dominance and continued almost uninterruptedly to hamstring executive action until the constitution of 1925 Nevertheless, with the exploitation of nitrate and copper by foreign capital, chiefly from the United States, material advancement and national prosperity continued The Transandine Railway was completed (1910), and many others were being built, another line across the Andes was begun in 1905 and completed in 1948 Industrialization, which has raised Chile to third place among South American nations, was begun Although mineral production—nitrates and the chemical by-products (iodine, nitrogen, and explosives), some gold, silver, and coal (Chile leads South America in actual production)—has dominated Chilean economy, there has recently been considerable industrial diversification Manufactures include newsprint and pulp, industrial alcohol, oil refining, textiles (cotton, wool, silk, rayon, and hemp and cordage), iron and steel products, food processing (flour, wines, meats, fruits, vegetables, fish, and dairy products), brewing, sugar refining, lumber, ceramics, tanning, and shoes Use of hydroelectric power is extensive Industrial growth, however, brought its own evils and danger The country, with its importation of food and its need to export minerals, became thoroughly dependent on world markets The population had continued to increase and was largely absorbed into work in the mines or the factories Therefore, when world economic depressions came, Chile was very hard hit Trouble was serious in the collapse after the First World War of the copper and nitrate markets, which brought large-scale unemployment The rise of the laboring class had been marked by unionization, and there were many advocates of thoroughgoing social reform after the Marxist pattern The struggle between the radical forces and the old conservative powers has led to a series of social experiments and to counter-attempts to suppress the radicals (especially the Communists) by force. A law of 1924 established a sort of national syndicalism, and President Arturo ALESSANDRI, elected for his second term after the great depression that began in 1929 had brought unparalleled suffering and discontent, sought to better working conditions and institute a sort of state capitalism, but he returned to repressive measures A democratic-leftist combination, the Popular Front, took power after the elections of 1938. Efforts to solve the problem of the industrial workers and farm laborers have continued. Economic stability, some nearer approach to self-sufficiency, betterment of labor conditions, and settlement or control of the Communist dif-

ficulties were the chief aims of the coalition administration of Gabriel Gonsáles Videla, who was elected president in 1946. Fascistic groups have also been active in Chile, which remained neutral in the Second World War. Nationalism of several brands has prospered. Chile is a member of the United Nations and active in international affairs. See Agustin Edwards, *My Native Land* (1928), *Peoples of Old* (1929), and *The Dawn* (1931); E. P. Hanson, *Chile: Land of Progress* (1941); Luis Galdames, *A History of Chile* (Eng. tr., 1941); J. R. Stevenson, *The Chilean Popular Front* (1942); Erna Fergusson, *Chile* (1943); Benjamin Subercaseaux, *Chile: Geographic Extravaganza* (Eng tr., 1943); P T Ellsworth, *Chile an Economy in Transition* (1945).

Chileab (kĭl'ēăb), son of David and Abigail. 2 Sam. 3.3. Daniel: 1 Chron 3 1.

chiliasm: see MILLENNIUM.

chili con carne (chĭ'lē kŏn kär'nē) [Span.,=chili with meat; chili is a Mexican word]. Mexican dish popular in the SW United States and now manufactured and canned commercially It consists mainly of beef, beans, chilies, garlic, and spices, though the ingredients may be varied

Chilion (kĭl'yŏn) [Heb.,=sickly], Ruth's brother-in-law Ruth 1 2,5, 4.9

Chilkoot Pass, c 3,500 ft. high, in the Coast Mts on the British Columbia–Alaska boundary The route through the pass between the Yukon river valley and the coast was long a monopoly of the Chilkoot Indians, and the first white man passed through it in 1878 After the great Klondike gold strike in 1896 the pass was crowded with gold seekers going from Skagway on Chilkoot Inlet to the Yukon, they suffered much from the difficulties of the route The alternative way to the gold fields was by way of WHITE PASS

chill, in medicine, a sudden trembling of the body, often accompanied by chattering of the teeth, caused by rhythmic contraction of voluntary muscles It is accompanied by a sensation of cold, described as chilliness and distinct from the chill. Chill results from exposure to cold or may be associated with fever, as in the onset of PNEUMONIA or during MALARIA and sepsis Gallstone colic may be accompanied by chills Warmth from external heat often gives relief, but the underlying cause must be treated

Chillán (chēyän'), city (pop 42,817), S central Chile, founded c 1580 In Chile's central valley, Chillán is a leading agricultural and commercial center It was destroyed by a combination of earthquake and flood (from the Chillán river) in 1751, but was rebuilt and played a prominent role in the revolution against Spain Bernardo O'Higgins was born here Destroyed with a loss of at least 10,000 lives by the earthquake of 1939, one of the world's worst recorded quakes, Chillán has again been rebuilt

chill hardening. see HARDENING

Chillicothe (chĭl"ĭkŏ'thē) **1** City (pop 2,303), N central Ill , on the Illinois river above Peoria, in a farm area, inc 1861 **2** City (pop 8,012), co seat of LIVINGSTON co , N Mo , near the Grand River NE of Kansas City; founded 1837 It is the trade center of a farm area, its manufactures include gloves and wood products A large business college and a state industrial school for girls are here **3** City (pop 20,129), co seat of Ross co , S central Ohio, on the Scioto river and Paint Creek and S of Columbus, settled 1796, inc 1802 In a productive farm area, it is a trade, shipping, and industrial center with several paper mills Shoes, canned goods, and furniture are also made It became the capital of the Northwest Territory in 1800 and was twice the capital of Ohio (1803–10, 1812–16, Zanesville was capital 1810–12) Near by are the Mound City Group (see NATIONAL PARKS AND MONUMENTS, table), a U S industrial reformatory, and a U S veterans' hospital **4** Town (pop 1,423), N Texas, WNW of Wichita Falls, settled 1886, inc 1907. It is S of the Red River in a wheat and cotton area. An agricultural experiment station is near by

Chillingworth, William, 1602–44, English theologian. He was converted to Roman Catholicism and went in 1630 to Douai to study Under the influence of his godfather, William Laud, he adjured that faith in 1634, he took holy orders (1638) in the Church of England In 1638 he published *The Religion of Protestants a Safe Way to Salvation*, a defense of the Protestant view that the Bible is the sole authority in matters of religion and that the right of interpretation is reserved to the individual. He served as chaplain in the king's army in the civil war, was taken prisoner (1643), and died in detention

Chilliwack (chĭl'ĭwăk), city (pop 3,675), SW British Columbia, on the south side of the Fraser river and E of New Westminster It is an agricultural, dairying, and logging center.

Chillon (shēlôn', shĭl'lŭn, Fr shēyō'), castle at the eastern end of the Lake of Geneva, built between the 9th and the 13th cent. The prison of François de BONNIVARD, it has frequently appeared in literature and art, notably in Byron's *Prisoner of Chillon*. It is now a museum.

Chilmad (kĭl'măd), city or state having relations with Tyre. Ezek 27.23. Nothing is known of it

Chiloé (chēlōā'), island, area 3,241 sq. mi., off S Chile. It is the largest of the Chilean islands. Because rainfall is so excessive that the dense evergreen forests cannot be burned off to provide acreage for tillage, it has little importance. The sparse population is scattered around the towns of Ancud and Castro. Wrested from the Indians by the Spanish in 1567, Chiloé was the last foothold of Spanish royalists in Chilé after the revolution, they were not driven out until 1826 Chiloé prov., which includes the island, is named after it.

Chilon (kī'lŏn), 6th cent. B C , one of the Seven Wise Men of Greece. He was a Spartan and is said to have founded the office of ephor and to have brought greater strictness to Spartan training He is also said to have died of joy when his son won at Olympia

Chilpancingo (chēl"pänsēng'gō), city (pop 8,834), capital of Guerrero, SW Mexico. Neighboring aboriginal ruins show that the town was once the center of a culture higher than that of the Aztec Its full name is Chilpancingo de los Bravos, in honor of its heroes of the war against Spain—three brothers, of whom Nicolás BRAVO was most prominent During the war the Congress of Chilpancingo, convened (1813) by MORELOS Y PAVÓN, briefly established a constitutional republic based on the reforms of HIDALGO Y COSTILLA

Chilperic I (chĭl'pûrĭk), d 584, Frankish king of Neustria (561–84), son of Clotaire I He attacked his brother SIGEBERT I, who had inherited Austrasia, their struggle became savage after Chilperic and his mistress and future wife, FREDEGUNDE, murdered (567) his wife, Galswintha Sigebert's wife, BRUNHILDA, was Galswintha's sister The feud was inherited by Chilperic's son and successor, CLOTAIRE II.

Chiltern Hills, range of chalk hills, 15 to 20 mi wide and 45 mi long, NW of London, England, extending NE from the Thames at Goring through Oxford, Buckingham, Bedford, and S Hertford counties to the Suffolk border. Its highest elevation is Coombe Hill (852 ft), SE of Aylesbury Roman works have been found in the hills See H. J Massingham, *The Chiltern Country* (1941)

Chiltern Hundreds, the administrative districts, or "hundreds," of Stoke, Burnham, and Desborough in Buckinghamshire, England The stewardship of the Chiltern Hundreds is an obsolete office with only a nominal salary It is, however, legally an office of profit under the crown and, as such, may not be held by a member of Parliament. Since members of Parliament may not resign, "applying for the Chiltern Hundreds" is the method by which a member gives up his seat Upon occasion the post has been granted to two persons successively on the same day

Chilton, city (pop 2,203), co seat of Calumet co , E Wis , E of Lake Winnebago and on a branch of the Manitowoc, settled 1847, inc 1877 It is a trade and processing center for a dairy and farm area

Chimay, princesse de. see TALLIEN, THÉRÉSA CABARRUS

Chimayó (chēmēō'), unincorporated town, N N Mex , N of Santa Fe The Tsimayó pueblo was here or near here Chimayó became notable as a center of weaving, especially in the early 19th cent The blankets were famous for their Indian designs and fine workmanship There is a small shrine (El Santuário) built in 1816

Chimborazo (chēmbōrä'sō), inactive volcano, 20,577 ft high, central Ecuador, the highest in the Ecuadorian Andes The peak is always capped with snow Alexander von Humboldt climbed it in 1802. Its name is frequently linked with that of COTOPAXI

chime, in music see BELL

Chimera (kīmēr'ə), in Greek legend, a monster, offspring of TYPHON and ECHIDNA It was part lion, part goat, and part dragon The Chimera was killed by BELLEROPHON.

Chimham (kĭm'-) [Heb.,=longing], Barzillai's son 2 Sam 19 37,38,40. The "habitation of Chimham" was a place near Bethlehem Jer 41 17

Chimkent (chĭmkyĕnt'), city (pop 74,185), capital of South Kazakhstan oblast, Kazakh SSR, on the Turksib RR, in a region growing cotton and fruit Industries include a large lead and zinc refinery, a chemical plant, and textile mills The old citadel was stormed by the Russians in 1864 Chimkent was once an important caravan center

Chimmesyan Indians see TSIMSHIAN INDIANS

chimney. In medieval Europe the burning woodpile in the center of the room with aperture or smoke louver in the roof was the ordinary means of heating until about the 12th cent , when the fireplace against a wall, a hood, and a hollow flue to the outer air were provided As fireplaces developed and multiplied, the visible portion of the chimney gradually became an important architectural feature In France, the 13th-century form—a simple hollow shaft of stone—grew larger and more elaborate as several flues were grouped together, until in the 15th cent. the chimney was often a massive and richly ornamented structure On the roofs of the châteaux of the Francis I period a complexity of chimneys, rich with cornices, pilasters, and heraldic devices, mingled with equally ornate dormers and turrets. In houses of Tudor England, as at Hampton Court, a distinctive type was developed —a cluster of shafts, treated in terra cotta, stone, or brick, molded, diapered, and twisted in fantastic forms, resting on a simple rectangular base. In the neoclassic styles, the chimney usually became an inconspicuous rectangular structure, although Georgian types were often decorated with brickwork panels, pilasters, and arches The early New England house was often literally built around the chimney, a great central clay-mortared mass with numerous fireplace openings which served as a support for the framework of the house Theoretically the action of the chimney depends upon the inequality in weight between a column of heated air and an equal column of cooler air, heated air will be forced upward by the pressure of the surrounding cooler air, forming an ascending current or draft, the velocity of flow varies with the square root of the chimney height In general, the requirements of good draft are met by a tall, straight, tight flue, smooth inside and extending well above adjoining roofs In modern practice, a separate flue, sheathed inside with a fire-clay lining of rectangular or round cross section, is provided for each combustor The area of a fireplace flue is commonly made at least 1/8 that of the fireplace opening

chimney swallow: see SWIFT

chimpanzee, anthropoid ape of the equatorial forests of central and W Africa Like the gorilla it is more manlike than the other apes It is generally considered the most intelligent and the most teachable ape After reaching maturity in captivity it often becomes savage Much smaller than the gorilla, the male adult chimpanzee measures between 4 and 5 ft and weighs about 150 to 200 lb Chimpanzees swing from branch to branch through the forest but do not leap On the ground they are quadrupedal

Chimu (chē'mōō), ancient Indian civilization on the desert coast of N Peru It may be divided into three periods—Mochica or Early Chimu (A D c 500–800), Middle Period, and Chimu or Late Chimu Mochica was highly developed, with an advanced social and political organization The people were skilled in ceramics, weaving, metallurgy, and irrigation Particularly in figure-modeled ceramics—stirrup jars and portrait jars—was individuality expressed in fantasy, humor, realism, and naturalism in men and animals, astonishing fidelity to human expression was achieved As the Mochica period declined, it was replaced by a transitional phase about which little is known but which shows marked TIAHAUNACO influence From this emerged (c 1200?) the Chimu, which in turn was affected by and ultimately absorbed into the civilization of the Inca, who conquered the Chimu in the 15th cent Chimu has left a monument to its culture in such cities as CHANCHAN

Ch'in (chĭn), dynasty of China, which ruled from 221 to 207 B C In 318 B C the border people of Ch'in moved into the rich plain of Szechwan from the northwest By 221 B C the army of Prince Cheng had forged an empire He became emperor and took the title Shih Hwang-ti [first emperor] He extended his empire from the GREAT WALL (which he built to keep out the Hsiung Nu or Huns) to the region of Fukien, Kwangtung, Kwansi, and Tongking He also built a canal which made transportation possible from the Yangtse to the Yellow River To create a unified culture he established the pyramidal governmental system which lasted till the 20th cent and tried to destroy all the literature of the past except for scientific works and his own genealogy He died in 210 His inept son was overthrown after three years

Chin, dynasty of China (265–420) see TSIN.

China, Mandarin *Chung Hua Min Kuo* [central glorious people's country, i e , republic], republic (3,290,926 sq mi , pop 462,277,637), E Asia The coast (c 2,150 mi long) fronts on the Yellow Sea, the East China Sea, and the South China Sea, and China is elsewhere bounded on the east by the USSR and Korea, on the north by the USSR and the Mongolian People's Republic, on the west by the USSR, and on the south by India, Tibet, Burma, and Indo-China China comprises 35 provinces (including Formosa) The greatest population density is in the coastal provinces of Kwangtung, Fukien, Chekiang, Kiangsu (with Nanking, the regular national capital), Shantung, and Hopeh They include the immensely fertile Yangtse and Canton river deltas The ports, Canton, Foochow, Shanghai (the largest), Tsingtao, and Tientsin handle a huge overseas trade Kiangsu prov may also be classed among the provinces of the E Yangtse valley with Anhwei and Hupeh, these three, with good rail and water communications, have considerable industry, especially in Shanghai, Wuchang, Hankow, and Hanyang Honan, Shensi, and Shansi provs are largely loess plateaus. Chahar, Suiyuan, and Ningsia provs , which comprise Inner Mongolia, and Kansu prov are mostly high barren wastes Tsinghai and Sikang provs contain sections of the Himalayas Yünnan, Kwangsi, and Kweichow provs have large aboriginal populations Szechwan, with the metropolis of Chungking, is the most prosperous province of W China Hunan

and Kiangsi provs supply the bulk of the country's mineral production. MANCHURIA, composed of Antung, Liaoning, Lisopei, Kirin, Nunkiang, Hinganan, Heilunkiang, Hokiang, and Sungkiang provs, constitutes, with Jehol prov, an area distinct from the rest of China. Foreign trade through the ports of Talien (or Dairen) and Port Arthur, agriculture in the Manchurian plain, mining in the southwest, and industry in Mukden, Harbin, and Changchun are well integrated by an extensive railroad system. SINKIANG prov in the far west is also a distinct region, with ethnic and economic affiliations with central Asia. TIBET, designated a "special area" of China, actually is independent. Farmers make up perhaps 80 percent of China's working force, and China may be divided approximately along the Yangtse river into a northern and southern agricultural zone. The south, with heavy rainfall and a subtropical or mild climate, raises two or more crops of rice a year. The north, with uncertain rainfall and winters frosty to severe, produces at most two crops, chiefly wheat, maize, millet, and soybeans. Extensive rough terrain and large arid areas (especially in the west and the northwest) limit cultivation to a quarter of the land surface. The needs of the dense population are not entirely met by maximal cultivation even if loss by soil depletion, erosion, and destruction of forests is not taken into account. The excess of workers and, except in Manchuria, the near-absence of agricultural machinery result in low labor productivity. Cereals, the most nutritious of foods, occupy about 90 percent of the acreage; fruits, tea, cotton, and mulberry trees (for silk culture) are important. Stock raising is practiced only where crops cannot be grown. Pigs and chickens are the chief domestic animals. Except for antimony and tungsten, which supply most of the world demand, China lacks metallic minerals. Coal and salt deposits are adequate for national needs. Cotton textiles and processed foods are the principal manufactures, though traditionally China is known for silks and porcelain. Modern industry occupies only about one percent of the working force. Insufficient transportation, except in the industrial zones, hinders commercial development and exposes N and W China to the threat of famine. Heavy food imports and the restricted classes of exports (chiefly minerals and soybean products) create a growing unfavorable trade balance, and China's continually worsening economy drives many emigrants to SE Asia and Indonesia. The life expectancy of the population, often poorly nourished and housed in unsanitary mud huts, is very low. In this ancient agricultural society, a strong patriarchal social organization persists outside the large cities. The extended family, with females subordinate and the oldest male its unquestioned head, is the unit of economy and village government. The continuity of the family line is reflected in the Chinese religious veneration of ancestors. Confucianism, Buddhism, and Taoism are the chief religions of China. They are generally practiced in an eclectic mixture, making varying appeals, thus, intellectuals may follow an elevated ethical system, while the uneducated peasant worships a pantheon of miracle-working local and nature deities. Islam, chiefly found in the southwest, is the largest monotheistic sect of China. Only c 3,000,000 Chinese are Christians (mostly Catholics), but missionaries who operate many schools (Yenching Univ at Peiping is notable) have contributed greatly to education. Despite its poverty, the national government has sponsored modern education on all levels. Increased elementary instruction and mass-education schemes, such as that of James YEN, have somewhat reduced China's widespread illiteracy, which results largely from the complex ancient system of ideographic characters. A movement to spell Chinese phonetically according to the official Mandarin pronunciation has failed. It fits the northern dialects closely and approximates those of central China, but it is useless in the south, where Cantonese, Hakka, Fukienese, and numerous tribal languages are spoken.

China to the Founding of the Ch'ing Dynasty. The fossils of *Sinanthropus pekinensis* (see MAN, PRIMITIVE) found in N China are the earliest discovered protohuman remains in NE Asia. About 20,000 years ago, after the last glacial period, modern man appeared in the Ordos desert region. Since the 2d millennium B.C. a fairly uniform culture has spread over almost the whole area of the Chinese republic. The substantial linguistic and ethnological diversity of the south and the far west result from their having been infrequently under the control of central government. China's history is traditionally viewed as a continuous development with certain repetitive tendencies. The area under political control tends to expand from the E Yellow and Yangtse river basins, the heart of Chinese culture, and then, under outside military pressure, to shrink back. Conquering barbarians from the north and the west supplant native dynasties, take over Chinese culture, and are expelled in a revulsion of national feeling. Following a disordered and anarchic period a new dynasty may arise. Its predecessor, by failing to keep up public works, engaging in excessive warfare, and tolerating corruption, has forfeited the right to rule—in the traditional view, has lost "the mandate of Heaven." Central authority is reestablished, public works constructed, taxation modified and equalised, and land redistributed. After a prosperous period disintegration reappears, inviting barbarian intervention or native revolt. Although traditionally supposed to have been preceded by the semilegendary HSIA dynasty, the SHANG dynasty (c.1523–c 1027 B.C.) is the first in documented Chinese history. During the succeeding, often turbulent, CHOU dynasty (c 1027–256 B.C.), CONFUCIUS, LAO-TZU, and MENCIUS lived, and the literature which until recently formed the basis of Chinese education was written. The use of iron was the main material advance. The semibarbarous CH'IN dynasty (221–207 B.C.) first established the centralized imperial system which was to govern China during stable periods. The native HAN dynasty period (202 B.C.–A.D. 220), traditionally deemed China's imperial age, is notable for long peaceable rule and great artistic achievement. The THREE KINGDOMS period (A.D. 220–65) opened four centuries of warfare among petty states and of invasions of the north by the barbarian Hsiung-nu (Huns). In this inauspicious time China experienced rapid cultural development. Buddhism, which had earlier entered from India, and Taoism, a native cult, grew and seriously endangered Confucianism. Indian advances in medicine, mathematics, astronomy, and architecture were adopted. Art, particularly figure painting and decoration of Buddhist grottoes, flourished. Feudalism partly revived under the TSIN dynasty (265-420) with the decay of central authority. Under the SUI (581–618) and the T'ANG (618–906) a vast domain, much of which had first been assimilated to Chinese culture in the preceding period, was unified. The civil-service-examination system based on the Chinese classics and a renascence of Confucianism were important accomplishments of this brilliant era. Its fresh and vigorous poetry is especially noted. The end of the T'ang was marked by a withdrawal from conquered border regions to the center of Chinese culture. The period of the Five Dynasties and the Ten Independent States (906–60) was chaotic and depraved. Authentication of the Confucian literary canon and the improvement of printing with movable types were advances. The SUNG dynasty (960–1279) was a time of scholarly studies and artistic progress. Its poetry was derivative, but a new popular literary form, the novel, first appeared. Neo-Confucianism developed systematically. While the Sung ruled central China, barbarians—the Khitai, the Jurchen, and the Tangut—created northern empires which were swept away by the MONGOLS under JENGHIZ KHAN. His grandson KUBLAI KHAN, founder of the YÜAN dynasty (1260–1368), tolerated Chinese institutions. The great realm of Kublai was described in all its richness by one of the most celebrated of all travelers, Marco Polo. Improved roads and canals were the dynasty's main contribution to China. The MING dynasty (1368–1644) set out to restore Chinese culture by a study of Sung life. Its initial territorial expansion was largely lost by the early 15th cent. European trade and European infiltration began with Portuguese settlement of Macao in 1557 but immediately ran into official Chinese antiforeign policy. Meanwhile the MANCHU peoples advanced steadily south in the 16th and the 17th cent. and ended with complete conquest of China by 1644 and with establishment of the CH'ING dynasty (1644–1912). K'ang HSI (emperor 1662–1722) and CH'IEN LUNG (emperor 1736–95) sponsored reforms, and China was perhaps at its most powerful.

Foreign Intervention in China. The Ch'ing opposition to foreign trade, at first even severer than the Ming, relaxed ultimately, and in 1834 Canton was opened to limited overseas trade. Great Britain, dissatisfied, provoked the OPIUM WAR (1839–42), obtained commercial concessions, and established EXTERRITORIALITY. Soon France, Germany, and Russia successfully put forward similar demands. The Ch'ing regime, weakened by European intervention, was more enfeebled by the TAI-PING REBELLION (1848–65) and Japan's success in the First Chino-Japanese War (1894–95). The United States promoted the Open Door policy—that all nations enjoy equal access to China's trade instead of seeking separate zones of influence; this was generally adopted by the foreign powers and may have saved the country from dismemberment, but Chinese resentment of foreigners was strong, and the BOXER REBELLION (1900), encouraged by Empress TZ'U HSI, was a last desperate effort to expel foreign influence. Long plotting, chiefly by SUN YAT-SEN, led in 1911 to a republican revolution and to the emperor's abdication in 1912. Sun, the first president, resigned early that year in favor of YUAN SHIH-KAI, who established a repressive military rule, which led Sun's followers to revolt sporadically. The Japanese threat to China, initiated by the First Chino-Japanese War, grew steadily larger. Early in the First World War, Japan presented the Twenty-one Demands—designed to make China a virtual protectorate, but the move was frustrated. The chief advantage that China obtained from entering (1917) the First World War on the Allied side was that Japan had to return the former German concession in SHANTUNG, which had been seized by the Japanese. China's international position was also improved by the Nine-Power Treaty, signed at the Washington Conference (1921–22), guaranteeing Chinese territorial integrity and the Open Door policy. After 1919 civil war raged between Sun's party, the Kuomintang, based in the south, and the national government with its "war lords" (semi-independent military commanders) in the north. The KUOMINTANG, under the virtual dictatorship of CHIANG KAI-SHEK, established (1928) a government in Nanking which obtained foreign recognition. Shortly before, a split had developed between the Kuomintang and its Communist wing. Soon the Communists were forced to retreat northward. Japan, taking advantage of China's dissension, renewed pressure on China and moved forward into the Second CHINO-JAPANESE WAR by occupying (1931) Manchuria and constituting (1932) it the puppet state of MANCHUKUO. While Japan moved southward Chiang preferred to campaign against the Communists. Early in 1937 Chiang and the Communists reached an agreement and thereafter cooperated against the Japanese, but the political truce was always somewhat shaky. Japanese creation of a puppet regime under WANG CHING-WEI in E China, however, did not gain popular support. When Japan's attack on U.S. and British bases (1941) merged the war in China with the Second World War, China received U.S. and British aid but not in sufficient quantity to prevent the Chinese losses to the Japanese from continuing. China was much weakened at the war's close. The abolition of exterritoriality and the erasing of the Japanese threat did not bring peace to China. The Russian occupation of Manchuria was prolonged, and the rift between Nationalists and Communists grew wide. The United States, alarmed at the prospect of full civil war and Communist advance, arranged through Ambassadors Patrick J. Hurley and George C. Marshall for conferences between Chiang and the Communist leader, MAO TSE-TUNG, but the breach was not healed. When the Russians evacuated Manchuria, the Communists took control. Civil war, barely interrupted by the efforts of the U.S. truce makers, raged through 1946. Late that year a national assembly, boycotted by the Communists, adopted a democratic constitution which was to go into effect late in 1947. Chiang's Nationalists were, with U.S. supplies, generally successful against the Communists through 1947, and early in 1948 the first elected legislature met, composed largely of Kuomintang members and including no Communists at all. Chiang Kai-shek was chosen as China's first constitutional president. The executive Yuan (the cabinet) for the first time since 1928 included minority party members. In the pressure of circumstances, however, democracy did not operate for long. The Communists had gained the upper hand in the fighting. Chiang was given emergency powers. In Aug., 1949, when little of the Chinese mainland remained to Chiang, the U.S. Dept. of State announced that no further aid would be given to his government. The Communists, from their capital at Peiping, proclaimed rule over all of China in September and proceeded to reorganize the provinces. By Jan., 1950, recognition had been extended to them by the USSR, Great Britain, India, and other nations. It was, however, refused by the United States, and U.S. protests were lodged about treatment of American diplomatic personnel and the seizure of consular property. In the United Nations, the demand of the USSR early in 1950 that Communists be seated in place of the Nationalists was rejected, and the USSR boycotted the meetings of agencies (including the Security Council) having Nationalist delegates. In late April, 1950, Chiang had only the island of Formosa in his possession and seemed doomed. For aspects of Chinese culture not treated in this article, see CHINESE ARCHITECTURE, CHINESE ART, CHINESE LITERATURE, CHINESE MUSIC. See G. B. Cressey, *China's Geographic Foundations* (1934), C. P. Fitzgerald, *China a Short Cultural History* (1935), Lin Yutang, *My Country and My People* (1935), H. G. Creel, *The Birth of China* (1936), L. Carrington Goodrich, *A Short History of the Chinese* (1943), K. S. Latourette, *The Chinese Their History and Culture* (3d ed., 1946), Martin C. Yang, *Chinese Village* (1946), F. L. K. Hsu, *Under the Ancestor's Shadow* (1948).

China, resort town (pop 1,252), S Maine, SE of Waterville, settled 1774, inc. 1818. It includes the little villages China and South China at opposite ends of China Lake.

China, Great Wall of, fortifications, c.1,500 mi. long, winding continuously across N China, from Kansu prov. to Chinwangtao, Hopeh prov. The wall, running mostly along the southern edge of the Mongolian plain, was erected to protect China from northern barbarians. It was first constructed in the Ch'in dynasty by Shih Hwang-ti (reigned 246–209 B.C.) but in its present form substantially dates from the Ming dynasty (A.D. 1368–1644). It averages 25 ft. in height and is 15 to 30 ft. wide

at the base, sloping to 12 ft. at the top. Guard stations and watchtowers are placed at regular intervals. In the eastern reaches the wall is built of earth and stone faced with brick, but in the west it is merely an earthen mound. Successive invasions of China from the north demonstrated that the Great Wall had little military utility.

China aster: see ASTER

china clay, one of the purest of the clays, composed chiefly of the mineral KAOLINITE Usage of the terms *china clay* and *kaolin* (kā'lĭn) is not well defined; sometimes they are used synonymously for a group of similar clays, and sometimes kaolin refers to those obtained in the United States and china clay to those that are imported Some authorities term as china clays only the more plastic of the kaolins China clays are much used in the ceramic industry, especially in fine porcelains, because they can be easily molded, have a fine texture, and are white when fired These clays are also used as a filler in making paper In the United States, deposits are found in Georgia, North Carolina, and Pennsylvania and in smaller quantities in some other states, in Europe they are found especially in England (in Cornwall) and in France.

China grass: see RAMIE

China Grove, textile-mill town (pop 1,567), W central N C , NNE of Charlotte

china marks, potter's trade-mark or signature, incised in the plastic clay before firing or printed before glazing on the bottom of the piece to identify it as his product The practice was adopted by pewterers and silversmiths for establishing the genuineness of their wares Books on pottery or porcelain usually include a list of the china marks of the important factories

China Sea, western part of the Pacific ocean. It is divided by the Formosa strait into the EAST CHINA SEA and the SOUTH CHINA SEA

chinaware, hard, white, translucent POTTERY with soft GLAZE, known as PORCELAIN It originated in China but is now produced in various countries. Its composition is of kaolin and petuntse

chinch bug, small hemipterous insect native to North America *Blissus leucopterus* causes great crop losses in the United States, especially in the valleys of the Mississippi, Missouri, and Ohio rivers It feeds on the sap of small grains, corn, and other grasses The adult has a black body about ⅛ in long, black and white wings, and reddish legs There are two generations a year Adults of the second generation winter in sheltered places, frequently in dry grasses At the time when the insects migrate on foot from one crop to another, creosote barriers and deep holes can be used to trap them The hairy chinch bug, *Blissus hirtus*, is a lawn pest in the NE United States See *How to Fight the Chinch Bug* (U S Dept of Agriculture, Farmers' Bul 1780)

chinchilla (chĭnchĭl'lu), small rodent of South America, where it lives in rocky burrows in the Andes of Bolivia, Chile, and Peru One of the costliest of all furs, its soft gray pelt has been valued since the days of the Incas The wild chinchilla was nearly exterminated before protective laws were passed (c 1920) Chinchillas are raised on farms in South America and the United States

Chinchón, Luis Jerónimo Fernández de Cabrera Bobadilla Cerda y Mendoza, conde de (lwēs' hārō'nē-mō fĕrnan'dās dā kăbrā'rä bōbädē'yä sĕr'dä ē mēndō'sa kōn'dā dā chēnchōn'), d 1647, viceroy of Peru (1629–39). He sent Cristóbal de ACUÑA on the Teixeira expedition down the Amazon Chinchón's wife, suffering from persistent fever, was treated with a native remedy, made from cunaquina bark. So became known to Europe the febrifuge qualities of quinine Linnaeus called the genus of quinine-producing trees *Cinchona* in her memory

chinchona: see CINCHONA.

Chincoteague (chĭng'kutēg), town (pop 2,142), on Chincoteague Island, E Va , inc 1908 The island, in the Atlantic Ocean near the Maryland line, is connected with the Eastern Shore peninsula by causeway and bridge It is noted for its wild ponies and its fisheries and is a popular hunting and fishing resort An azalea garden attracts visitors in the spring An annual "penning," or roundup, of the wild ponies is held, followed by an auction Chincoteague Bay, an inlet of the Atlantic, extends northward, separating Chincoteague and other islands from the Virginia-Maryland coast

Chindaswinth (chĭn'duswĭnth), d 653, Visigothic king of Spain (642–53) He began the compilation of the *Forum judicum*, which was completed by his son and successor, RECESWINTH

Chindwin (chĭn'dwĭn), river, c 550 mi long, rising in the northern hills of Burma and flowing into the Irrawaddy (of which it is the chief tributary) below Mandalay. The lower reaches are navigable during the rainy season.

Chinese architecture. As a result of wars and invasions, there are few existing buildings in China earlier than the Ming dynasty (1368–1644). The Horiuji temple in Japan, a work of the 7th cent , when Japanese architecture reflected the Chinese methods of the preceding century, evidences the antiquity of the Chinese use of wood, a material which still dominates. The indigenous aspect of China's architectural style has been steadily maintained through the varying religious influences of Buddhism and Mohammedanism Between religious and secular architecture no distinction is made; all follow a single fundamental type, being seldom higher than one story and consisting of a rectangular chamber elevated upon a stone platform as protection from dampness and covered by a single roof of richly colored glazed tiles or by several roofs, one above the other, producing height and adding horizontal emphasis Effects are created not by a single building but by various buildings and gateways so grouped as to combine with landscape and sculpture into reposeful spatial compositions Complete symmetry is achieved almost invariably The outside walls of the Chinese building have no supporting function and serve merely as enclosing screens The columns, arranged in bays in the interior, stand independent in the interior, stand independent of the walls and support a roof framing which is totally different in type from European construction Instead of utilizing diagonal members to form braced trusses, the roof loads transfer at various points to vertical uprights, which in turn rest upon horizontal crossbeams, these framing members being generally held together by wood tenons Such square-framed roofs have retained rigidity in structures centuries old At the eaves the roof, supported by carved and painted brackets, projects far beyond the face of the outside wall and is usually curved sharply upward to form a concave outline This protects the building against intense sunlight and heavy rains without darkening the rooms It is thought that the main features of Chinese architecture were fully developed as early as the Han period (202 B C–A D. 220) The introduction of Buddhism caused great building activity, but from the centuries between the Han and the T'ang periods only a few pagodas and cave temples remain The T'ang dynasty (A D 618–906) is China's classical period in building and in the arts, its downfall is considered the starting point for the modern period Few of the works of the Yuan period survive. The Ming period may be thought of as having the characteristics of the European baroque style. Little remains of the imperial palaces at Nanking, the capital of the Ming dynasty until 1421 Peking then became the capital, and its group of imperial buildings, known as the Forbidden City, remains a remarkable achievement Around its main courtyard and many smaller courts are grouped splendid halls, galleries, terraces, and gateways White marble, wall facings of glazed terra cotta, roofs of glazed and colored tiles, and woodwork finished with paint, lacquer, and gilding unite to form an exceptional richness Notable among these buildings is the group comprising the Temple of Heaven, including the Hall of the Annual Prayers (A D 1420), a circular structure on a triple platform, surmounted by a roof in three tiers covered with tiles of an intense blue glaze. The typical Chinese temple consists of three buildings parallel to each other and approached by monumental steps, gateways, and bridges The Buddhist temples have successive open courts and porticoes and include kitchens, refectories, and cells for the priests The PAGODA, the most distinctive Chinese structure, survives in great numbers The pailou, a memorial arch, is a post-and-lintel composition, usually of wood in the north, of stone in the south, in the form of a gateway with one or three openings, the lintels bearing inscriptions and the whole surmounted by upturned tile roofs supported on brackets Chinese dwelling houses, built chiefly of wood, brick, and tile, are enclosed and subdivided by wooden partitions and wood, marble, and silk screens Both the dimensions and the number of columns which may be used are governed by ancient regulations The more important town houses are groupings of pavilions laid out around numerous courts, often enclosing gardens or opening on the extensive surrounding gardens See D G Mirams, *A Brief History of Chinese Architecture* (1940)

Chinese art has its origins in remote antiquity Excavations in Kansu and Honan have revealed a Neolithic culture with painted pottery clearly related to some of that of the Shang dynasty Our knowledge of ancient Chinese art is largely limited to works in pottery, bronze, bone, and jade The founding of the Shang dynasty (c 1523 B C), possibly marks the transition from Stone Age to Bronze Age and the appearance of the first of the cast bronze ritual vessels which were used for religious rituals This art, utilising the sand-cast form of the cire-perdue method, reached an extreme elaboration and refinement, It constitutes the clearest extant record of stylistic development for the Shang, Chou, and Early Han dynasties It has been intensively studied by scholars, who have deciphered the ideographic inscriptions with which certain of the vessels are decorated, thus making it possible to date some of them. Over the long period of their development the decoration of the bronzes varies from the most meager incision to the most ornate plastic embellishment and from the most severely abstract to some naturalistic representation. The 1st cent A.D. marks the end of the development of this art, although highly decorated bronze continues in many minor arts, often with the addition of inlays of other metals and stone. Gradually the advent of Buddhism brought the need for arts of a different character Sculpture and painting (particularly in grottoes) and, later, architecture were used to serve the faith The human figure which appeared rarely and late in ancient Chinese art now became most important Sculpture as an isolated art prior to Buddhism survives chiefly in tomb carvings and monumental tomb guardians in stone and stucco With Buddhism, the representation of the Buddha and of bodhisattvas becomes the great theme of sculpture The forms of these figures came to China from the west, but in the 6th cent. A.D. the Chinese artists succeeded in developing a national style in sculpture This style reached its maximum clarity early in the T'ang dynasty Figures, beautiful in proportion and graceful in gesture, show great precision in rendering form and a predominance of linear rhythms. For about 600 years the art of Buddhist sculpture continued to flourish Gradually the restraint of the 7th cent gave way to more dramatic works. In the Ming dynasty, sculpture ceased to develop in style The origins of Chinese paintings are lost Centuries of development preceded the earliest extant work A tomb painting on brick in the Museum of Fine Arts, Boston, dating from the 1st cent A D shows an already highly developed art, but it is only from the 5th cent that we can trace a clear historical development In Tun-huang over a hundred caves contain Buddhist frescoes and scrolls dating from about the 5th to the 13th cent. They show, first, growing mastery of form and clarity, and, later, preoccupation with spatial unity. While Chinese painting never consistently followed the rigid laws of Western perspective, a highly organized system of representing objects together in space was evolved Representation of natural effects of light and shade are almost wholly absent in this art, which relies rather on its incomparable mastery of line and silhouette. The classic period of figure painting is the T'ang dynasty Little if anything remains of the work of such famous masters as Yen Li-pen and Wu Tao-tsu But such paintings of this period as survive show the perfection and clarity of form seen in the contemporary sculpture. The T'ang dynasty also saw the rise of the great art of Chinese landscape painting, Wang Wei and Li Ssu-hsün were notable In the Sung dynasty, landscape painting reached its peak Masterpieces were painted in Chinese ink, sometimes with white and color added, sometimes in monotone, on scrolls of absorbent silk or paper—the vertical hanging scroll (the *chih*) and the horizontal, panoramic scroll (the *heng*) With limited technical means a unique art of infinite suggestion was created Hundreds of painters, among them Ma Yüan, Ma Lin, Hsia Kuei, Li Ti, and Kuo Hsi, contributed to its glory This art is largely secular in subject, Buddhist and Taoist in spirit After the 12th cent more intimate subjects appear, and often a single bamboo spray or flower suffices Some of the quality of Sung painting persisted, but with the Ming dynasty a more worldly spirit appears Minute observation of natural detail is found in the work of Shih Jui (who influenced the Japanese Kano Motonobu, founder of the Kano school), Chou Ch'en, and others In this period works of highly decorative quality abound Innumerable artists of great proficiency flourished, and virtuosity reached its highest peak Under the Ch'ing dynasty a high level of technical competence was maintained, particularly in the applied arts, up to the 19th cent , when the output became much more limited But there was little in the way of new development in painting The famous four Wangs imitated the great Sung masters The fine art of Chinese pottery may be said to have followed somewhat the development of painting, reaching its highest perfection in the Sung dynasty and its extreme technical elaboration and decorative style in the Ming. The world owes an incalculable debt to China in almost all of the applied arts as well as the fine arts However great the influence of Western arts on contemporary China, it can hardly surpass the great and growing influence of her own arts on the West See Osvald Siren, *A History of Early Chinese Art* (4 vols , 1929–30), R L Binyon, *Chinese Art and Buddhism* (1937), Phyllis Ackerman, *Ritual Bronzes of Ancient China* (1945), Ludwig Bachofer, *A Short History of Chinese Art* (1946), Arnold Silcock, *Introduction to Chinese Art and History* (rev ed , 1948)

Chinese Eastern Railroad, 1,078 mi long (including its branches), extending across central Manchuria from Lupin to Suifen It is also the southern branch of the TRANS-SIBERIAN RAILROAD Financed by Russia, the Chinese Eastern RR was opened in 1903 A section which connects Changchun with Port Arthur was acquired by Japan after the Russo-Japanese War (1904–5) and became part of the South Manchuria RR Besides the termini, the chief cities served are Hailar,

Tsitsihar, and Harbin Manchukuo bought the rest of the line from the USSR in 1935, and at the end of the Second World War it was expropriated by China.

Chinese exclusion. Immediately after the United States acquired California, there began a large inflow of Chinese into the state Their coming was at first encouraged because of the need of cheap labor on the Pacific coast By 1867 there were some 50,000 Chinese in the state, most of them manual laborers They contributed largely to the building of the railroads, notably the Union Pacific When in 1868 Anson Burlingame signed a treaty with China, it included a clause recognizing the "inalienable right of man to change his home and allegiance" and thus guaranteed the right of Chinese immigration It did not, however, grant the right of naturalization In the following decades a great deal of feeling against the Chinese arose in California, and there were ugly incidents and a great outcry in favor of banning Chinese immigration altogether In 1876 a joint committee of both houses of Congress visited California The majority report favored restriction of Chinese immigration, and in 1878 Congress passed a bill to that effect. This President Rutherford B Hayes vetoed as contrary to the Burlingame Treaty In 1880 a new treaty was concluded, China yielded and allowed the United States some right to restrict, but not to prohibit, Chinese immigration The Chinese exclusion act in 1882 did, however, ban immigration of Chinese laborers for 10 years Some of the later acts (1888 and 1892) were flat violations of the 1880 treaty In 1894 a new treaty was signed, by which China agreed to exclusion of Chinese laborers for 10 years When that period was up, Congress continued the exclusion unilaterally until the new immigration arrangements in 1924 made the control automatic The question presented not only a serious problem in diplomacy but also a bitterly fought domestic issue in the United States

Chinese language, most important and most widely spoken of the Sino-Tibetan or Indo-Chinese languages See LANGUAGE (table).

Chinese literature. It is not known when the current system of writing Chinese first developed The oldest written records date from the Shang dynasty (c 1523–c 1027 B C), but the elaborate system of notation used even then argues an earlier origin From short inscriptions of a religious nature on tortoise shell and bronze, characters standing for individual words have been deciphered and are traceable through many mutations to modern forms The oldest surviving works of literature were probably not written until the later centuries of the Chou dynasty (c 1027–256 B C.) At this time was written most of what scholars of the Han dynasty (202 B C –A D 220) made into the canonical literature of CONFUCIANISM, although some authorities believe that the current versions of these works, traditionally classified as the *Wu Ching* [five classics] and the *Shih Shu* [four books], contain later interpolations The *Wu Ching*, traditionally attributed to CONFUCIUS either as author or compiler, comprises diverse books The *Shu Ching* [classic of history] records ancient traditions The *Ch'un Ch'iu* [spring and autumn annals] is an unadorned chronology of Lu, Confucius's native state The *I Ching* [classic of changes] explains, often in a mystifying way, a system of divination based upon the study of 64 hexagrams of whole and broken lines. The *Li Chi* [record of rites] describes ceremonials and a utopian state While some of these works contain verse, the main collection of poetry in the *Wu Ching* is the *Shih Ching* [classic of odes], comprising 305 poems supposedly selected by Confucius from some 1,000 Written in simple rhyming stanzas, they tell of the peasant's life and the wars of feudal states The *Shih Shu*, somewhat later than the *Wu Ching*, are early statements of Confucian doctrines They comprise the *Lun Yü* [analects of Confucius], the *Ta Hsüeh* [great learning], the *Chung Yung* [doctrine of the mean], and the *Book of Mencius* (see MENCIUS) Other important early books include the *Tao-teh-king* (mid-3d cent. B C), ascribed to LAO-TZE, and the work of CHUANG-TZE The early Chinese books originally appeared in the cumbersome form of strips of bamboo Silk was substituted as a writing material in the 2d cent B C , and the invention of paper (A D 105) was responsible for a great increase in books. In the 8th cent the method of printing whole pages from wooden blocks was devised, it permitted an enormous increase in the number of copies available of any book. In time the literary and vernacular languages diverged sharply Literary style was exceedingly concise, and it observed rigid antithesis Historical and literary allusions abounded and finally special dictionaries were required for their elucidation. In poetry, the freedom of the Chou period was followed by minutely prescribed forms The lines which rhymed had to be matched syllable by syllable in part of speech and in intonation In the T'ang dynasty (618–906) the prosodic rules still suited the spoken structure of the language; later they continued to be observed despite changes in pronunciation. It is generally agreed that most of China's great poetry was written in the T'ang dynasty. WANG WEI, LI PO, PO CHÜ-I, and TU FU are the masters of this period In the succeeding Sung dynasty (960–1279) SU TUNG-PO was the supreme poet. Translations of T'ang and Sung poetry have strongly influenced the modern imagist school in English Chinese poems are generally very short, unemphatic and quiet in manner, and limited to suggesting a mood or a scene by a few touches rather than painting a detailed picture Intellectual themes and narratives are comparatively rare Many varieties of learned prose have been written in China Notable for accuracy and objectivity are the series of dynastic histories produced since Han times, the earliest of these works is by Ssu-ma Ch'ien (1st cent B C) Chinese lexicography developed in response to the multiplication of characters The last of a great series of dictionaries (still standard) was produced in the reign of Kang Hsi (1662–1722). So-called encyclopedias, actually voluminous extracts from various books, have been occasionally produced, one such work of the Ming dynasty (1368–1664) ran to nearly 24,000 short volumes and appeared in three manuscript copies While the literati were cultivating polite literature, books of a popular character continually appeared They were written either in easy prose or in jingling couplets. Scholars regarded them with scorn; consequently no effort was made to preserve them and few prior to the Sung dynasty have survived The *San Kuo* [tale of three kingdoms] (13th cent ?) recounts the chivalrous and high-minded warfare of the Three Kingdoms period. *All Men Are Brothers* (Eng. tr , 1933) is a picaresque tale of men forced by the venality of officials to become bandits. *The Dream of the Red Chamber* (partial Eng. tr , 1929) tells of the economic decline of a gentle family It is superior in plot construction to earlier novels, and its method of characterization has been compared with Proust's *Remembrance of Things Past* Dramatic literature was also a popular art It included *ku shih* [drum songs], long narrative poems recited to the beating of a drum, as well as plays The Yüan dynasty (1260–1368) probably witnessed the establishment of the drama Chinese plays generally are sentimental stories of conflicting loyalties, e g , filial piety opposed to patriotism Performers (until the late 19th cent only men) are trained from early childhood in the highly stylized mummery, singing, dancing, and acrobatics which the play comprises There is no curtain, nor is any illusional effect sought Props are purely symbolic, e g , a flag represents an army Since the republican revolution of 1911 there has been a revulsion from the classical modes of composition, and many writers (notably HU SHIH and LUSIN) have advocated writing in the vernacular The change in Chinese education from preoccupation with the classic literature to scientific and technological subjects has reduced mastery of the traditional literary skills The use of characters instead of an alphabet has persisted, however, since it makes older writings accessible and permits the Chinese, who speak widely different dialects (even different languages), to communicate with one another. Translations of Western books frequently appear in China, and it seems likely that the tendency of Chinese writers to adopt Western genres will continue Among the distinguished translators of classical Chinese literature are Herbert Giles, James Legge, Ezra Pound, and Arthur Waley Anthologies of Chinese poetry include Arthur Waley, *Translations from the Chinese* (1941), Witter Bynner and Kiang Kang-hu, *The Jade Mountain* (1929); and Robert Payne, ed , *The White Pony* (1947). See Herbert Giles, *A History of Chinese Literature* (1901); R. F Johnston, *The Chinese Drama* (1921), Pearl Buck, *The Chinese Novel* (1939)

Chinese music can be traced back as far as the Shang dynasty Manuscripts and instruments from the early periods of its history are not extant, however, because in 212 B C Shih Hwang-ti of the Ch'in dynasty caused all the books and instruments to be destroyed and the practice of music to be stopped Certain outlines of ancient Chinese music can nevertheless be ascertained The single tone is of greater significance than melody, the tone is an important attribute of the substance which produces it Hence musical instruments are separated into eight classes according to the materials from which they are made—gourd (SHENG), bamboo (PANPIPES), wood (*chu*, a trough-shaped percussion instrument); silk (various types of zither, with silk strings), clay (globular flute), metal (bell), stone (sonorous stone), and skin (drum). Music was believed to have power over the elements Its cosmological and ethical connotations are comparable to those of Greek music The failure of a dynasty was ascribed to its inability to find the proper *huang chung*, or tone of absolute pitch The *huang chung* was produced by a bamboo pipe which roughly approximated the normal pitch of a man's voice. Other pipes were cut, their length bearing a definite mathematical ratio to it. Their tones were divided into two groups—six male tones and six female. These were the *lüs*, and their relationship approximated the Pythagorean cycle of fifths. Legend ascribes their origin to the song of a bird, six from the male and six from the female, and the tones of the two sets were always kept separate The *lüs* did not constitute a scale, however. The scale of Chinese music is pentatonic, roughly represented by the black keys on a piano From it several modes may be derived, by starting on different notes The melody of vocal music is limited by the fact that melodic inflection influences the meaning of a word Likewise quantitative rhythms are not easily adaptable to the Chinese language Several types of notation were used Singers used the syllabic symbols for the five notes of the pentatonic scale, as did players of pipes Players of the stone and bell chimes, which were tuned to the *lüs*, used symbols which represented the pitch names of the *lüs* Players of flutes and zithers used a kind of tablature. None of this notation indicated rhythms. The ancient Chinese hymns were slow and solemn and were accompanied by very large orchestras Chamber music was a highly developed art Chinese opera originated in the 14th cent as a serious and refined art Today little of the ancient musical practice survives Folk song, the music of religious ceremonies, Western jazz, and some small amount of European classical music constitute the principal musical practice of modern China See Curt Sachs, *The Rise of Music in the Ancient World* (1943)

Chinese Turkistan see SINKIANG

Chinese white: see ZINC WHITE

Ch'ing (chĭng) or **Manchu** (măn″chōō′, măn′chōō″), dynasty of China, which ruled from 1644 to 1912 It was established by the MANCHU, a people of N China, on their capture of Peking (now Peiping) All China was occupied and the remnants of the Ming dynasty destroyed by 1659, but disorders in the south were not finally suppressed until 1683 The Manchu introduced few important changes in China Notable, however, was the banning of Ming costume and the much-resented requirement that men shave most of the head and wear the remaining hair in a queue Under Emperor CH'IEN LUNG (reigned 1736–96) China attained its maximum territorial expanse In the north it extended beyond the Amur river, and it reached W to Turkistan and S through Indo-China Mongolia, Tibet, Nepal, and Burma were vassals China's known wealth and its luxury goods (notably silks and porcelains) soon attracted the notice of the European maritime powers, but the dynasty at first strongly maintained the traditional Chinese opposition to sea-borne foreign trade The Netherlands dispatched (1655–57) an unsuccessful trade mission, and Great Britain experienced (1793, 1816) like frustrations after its overtures In 1834, however, Canton was opened to overseas trade, but under restrictions which so irked the British that they precipitated the OPIUM WAR (1839–42) China's defeat resulted in the cession of Hong Kong, the opening of treaty ports, and the establishment of EXTERRITORIALITY for European nations. The country's weakness in the face of Western military power was aggravated by the domestic unrest which followed a partial collapse of the administrative system, especially by the TAIPING REBELLION (1850–65), which nearly brought the dynasty to an end European nations seized the opportunity to annex outlying parts of the country RUSSIA took over much of Turkistan and part of what is the present Maritime Prov of the RSFSR, France conquered Annam and Tonkin, and Great Britain took Burma and made Nepal a protectorate. The First Chino-Japanese War (1895) deprived China of its control over Korea, and it was followed by the establishment of foreign spheres of influence in the territory remaining to the dynasty The general agreement was that Great Britain should predominate in the Yangtze valley, France in the extreme south, and Russia in Manchuria After the Russo-Japanese War (1904–5), Japan assumed Russia's position The dismemberment of China was perhaps averted by the adoption of the Open Door policy recommended by the United States—i e , that all nations should participate equally in China's trade Desperately the dynasty strove to introduce reforms which would strengthen its position The efforts of Emperor KWANG HSÜ, however, were frustrated by the dowager empress TZ'U HSI, who supported the BOXER REBELLION (1900) in the vain hope of dislodging the foreign powers and reestablishing the imperial strength Opposition within the country, led by SUN YAT-SEN, eventuated in a successful revolution in 1911 and the emperor's abdication in 1912 With the Ch'ing collapse China permanently abandoned the monarchical system under which the country had been ruled since at least the 16th cent. B.C.

Ching, lake see TSING

Chingford, municipal borough (1931 pop. 22,053; 1943 estimated pop 45,000), Essex, England, near Epping Forest. A timbered house here is called Queen Elizabeth's Hunting Lodge.

Chinghai, province, China. see TSINGHAI.

Chin Hills (chĭn), mountain range, W Burma, along the boundary between Burma and Assam The Chin Hills district (10,377 sq. mi , pop 186,405) is inhabited by Chin tribes and before 1948 was ruled directly by a British governor. Since 1948 the Chins have had a large degree of autonomy, with a minister in the Burmese cabinet.

Chinnampo (chĕn'năm'pō'), city (1944 pop 82,162), N Korea, a port on Korea Bay Gold, iron, and magnesium are refined and rice and wheat are milled.

Chinnereth or **Chinneroth** (both kĭn'-, -rŏth) 1 See GALILEE, SEA OF 2 Unidentified town, near the Sea of Galilee Deut 3.17, Joshua 11 2; 19 35 Cinneroth 1 Kings 15 20

Chino (chē'nō), city (1940 pop 4,204, 1948 special census pop 5,452), S Calif , E of Los Angeles; founded 1887, inc 1910 It is the business and processing center of a diversified farming area Walnuts are raised in the region A state prison is here, and fine state game-bird farms are near by

chinoiserie (shēnwäzrē') [Fr , = Chinese things], decorative work produced under the influence of Chinese art, applied particularly to the more fanciful and extravagant manifestations Intimations of Eastern art reached Europe in the Middle Ages in the porcelains brought by returning travelers, Eastern trade was maintained during the intervening centuries, and the East India trading companies of the 17th and 18th cent imported Chinese lacquers and porcelains Holland, in her ceramics, quickly showed the influence of Chinese blue-and-white porcelains In the middle of the 18th cent the enthusiasm for Chinese objects affected practically every decorative art applied to interiors, furniture, tapestries, and *bibelots* and supplied craftsmen with fanciful motifs of scenery, human figures, pagodas, intricate lattices, and exotic birds and flowers In France the Louis XV style gave especial opportunities to *chinoiserie*, as it blended well with the established ROCOCO Whole rooms, such as those at Chantilly, were painted with compositions in *chinoiserie*, and Watteau and other artists brought consummate craftsmanship to the style Thomas Chippendale, its chief exponent in England, turned it to the production of a unique and decorative type of furniture The craze early reached the American colonies Chinese objects, particularly the fine wallpapers, played an important role in the adornment of rooms, and especially in Philadelphia the style had a pronounced effect upon design

Chino-Japanese War, First, 1894–95 CHINA and JAPAN were rivals for control of KOREA in the late 19th cent They agreed in 1885 that Chinese suzerainty over Korea should continue and that neither China nor Japan should station troops in Korea Nevertheless when a Korean revolt erupted in 1894 both did send troops, and Japan induced the Korean king to abrogate his recognition of Chinese overlordship The fighting which ensued between Chinese and Japanese forces ended with an easy victory for the better-equipped and better-trained Japanese army The Treaty of SHIMONOSEKI (1895) made Korea nominally independent and provided for the cession of Formosa, the Pescadores Islands, and the Liaotung peninsula by China to Japan China also had to pay an indemnity The war is also called the First Sino-Japanese War See Zenone Volpicelli, *The China-Japan War* (1896)

Chino-Japanese War, Second, 1931–45 The long-standing desire of Japan to dominate E Asia was advanced by the First Chino-Japanese War (1894–95), the RUSSO-JAPANESE WAR (1904–5), and the TWENTY-ONE DEMANDS on China in the First World War. That desire was not stilled, and the weakened condition of China, which was still suffering the effects of revolution and civil war, made possible a new Japanese advance Disorders in Manchuria led to reinforcement (1931) of the garrison Japan maintained ostensibly to protect Japanese property there Bombing of a Japanese troop train near Mukden led to prompt Japanese occupation of all Manchuria and the setting up of the puppet state of MANCHUKUO Japanese forces also attacked Shanghai and seized Jehol prov The Western powers generally refused to recognize Japan's position in Manchuria and when the League of Nations found (1932) that Japan had waged aggressive warfare, Japan resigned from the League In 1935 the Japanese occupied parts of Chahar and Hopeh. The situation was tense, and in 1937 incidents commenced full war A clash (July, 1937) between the soldiers of the Japanese garrison at Peiping and Chinese forces was the pretext for Japanese occupation of Peiping and Tientsin. The next month the killing of two Japanese at Shanghai precipitated war in earnest After a protracted struggle Shanghai and the national capital, Nanking, fell In 1938 Soochow, Amoy, Hankow, and Canton were taken Japanese strategy was aimed at taking the cities, the roads, and the railroads, gaining a net of control Thus, although the Japanese by 1940 had swept over the eastern coastal area, guerrilla fighting still went on in the conquered regions. Japanese efforts to take Changsha, an important station on the Peiping-Canton RR, were thwarted in 1939 and 1941 but succeeded early in 1942. The Chinese, driven back to a temporary capital at Chungking, struggled on with little help from outside Chinese resources were not adequate, and the supplies sent over the BURMA ROAD were not much more than a trickle The Chinese cause continued to decline despite vast and bloody fighting The Japanese bombing of Pearl Harbor merged the Chino-Japanese in the Second World War as China declared war on Japan, Germany, and Italy American and British loans and supplies, the establishment of military air bases in China, and the aid of an increasing number of U S and British officers and finally troops helped to reinforce the relief of China as Japan diverted armies elsewhere Nevertheless China's military position continued to deteriorate until April, 1945 In May the Chinese launched a successful offensive at Chihkiang, this lasted until Japanese capitulation on Aug 14 The Japanese troops in China formally surrendered Sept 9, 1945 The war is also called the Second Sino-Japanese War

Chinon (shēnō'), town (pop 4,312), Indre-et-Loire dept , central France, in Touraine Its castle, towering on a high rock over the Vienne river, is an oblong complex of buildings, actually three castles —the Château Saint-Georges, of which a few fortifications (13th cent) survive, the Château du Milieu (12th–15th cent), and the Château du Coudray, with a dungeon (13th cent) and several towers (12th–13th cent) There are also underground works It was a favorite residence of Henry II of England and Eleanor of Aquitaine, its strength resisted Philip II of France for a year (1204–5), and it saw JOAN OF ARC present herself to Charles VII surrounded by his court In La Devinière, a near-by hamlet, stands the house where Rabelais was born

Chinook (shĭnōōk'), town (pop 2,051), co seat of Blaine co , N Mont , on the Milk river and NE of Great Falls, inc 1901 Irrigated farms of the Milk river project supply sugar beets for a refinery

chinook (shĭnōōk', chĭ-), a warm, dry wind descending the eastern slopes of the Rocky Mts , so called by the early settlers because it blew from the direction of the Chinook Indian camps

Chinook Indians (shĭnōōk', chĭ-), North American Indian tribe of the Chinook linguistic stock Other tribes speaking Chinook languages are the Clatsop, Wasco, Wishram, and Clackama, all were in the Columbia river valley The Chinook themselves were on the lower extremity of the river and, with the Clatsop, comprised the Lower Chinook branch of the linguistic stock, now extinct (for relationships with other languages, see LANGUAGE, table, and PENUTIAN). The village was their chief social unit, though a wealthy chief might control several They lived in plank houses, were skilled with canoes, were noted traders, and practiced the custom of potlatch They lacked the totemic art and the secret societies of their neighbors They were well known to the traders on the Pacific coast in the late 18th cent

Chinook jargon, lingua franca of early traders on the Northwest Coast of the United States and Canada It included Chinook, Nootka, English, and French words, with various borrowings, and was a crude medium of communication.

chinquapin (chĭng'kupĭn) [Algonquian], name for certain species of the CHESTNUT genus and for a related species The common chinquapin is *Castanea pumila*, native to the E United States It has a sweet, edible nut borne in a bristly bur and sometimes marketed The wood is hard and strong, used for fences and railway ties The bush chinquapin is *C alnifolia* found in the S United States The golden-leaved chestnut or chinquapin is *Castanopsis chrysophylla*, which has evergreen foliage and is native to the West Coast of the United States Its fruit resembles that of the common chinquapin

chintz (chĭnts) [probably Hindustani, = variegated], originally a painted or stained calico from India. Esteemed for its gay colors and designs, it was used in Europe for bedcovers and draperies Reproductions of Indian designs and also original patterns were soon produced Especially noted was *toile de Jouy*, manufactured from 1700 to 1843 at Jouy, near Paris Both flower motifs and characteristic pictorial scenes are prized by collectors and imitated in modern prints Recent chintz fabrics, usually glazed, show great freedom of color and design and are popular for interior decoration

Chinwangtao (chĭn'wäng'dou'), Mandarin *Ch'in-huang-tao*, city, NE Hopeh prov , China, a port on the Pohai Coal is the chief export

Chioggia (kyōd'jä), city (pop 23,577), Venetia, NE Italy, on a small island in the Adriatic at the southern end of the Venetian lagoons It is connected with the mainland by a bridge The most important fishing port of Italy, it has a character all its own with its old houses and churches, canals, and sailboats. In 1378–80 several naval battles were fought off Chioggia in the war between Venice and Genoa. The liberation of the town from the Genoese turned the war in favor of Venice

Chios or **Khios** (both: kī'ŏs), island (322 sq. mi., pop 72,729), Greece, in the Aegean Sea, 5 mi. W of Asia Minor. It is mountainous, rising to 4,157 ft in Mt. Elias, and is famous for its scenic beauty and good climate It produces excellent wine, figs, citrus fruit, almonds, wheat, and MASTIC and has marble quarries, lignite deposits, and sulphur springs Colonized by Ionians, the island was held (494–479 B C) by the Persians, but recovered its independence Though repeatedly allied with Athens, it rebelled several times against Athenian ascendancy. Friendly toward Rome, it remained a free city of the Roman Empire until the reign of Vespasian From the Byzantine Empire, Chios passed (1204) to the Latin emperors of Constantinople and (1261) to the Genoese Turkey conquered it in 1566 and held it until the First Balkan War (1912), when it was taken by Greece An anti-Turkish rebellion resulted (1822) in a ruthless massacre of Chian Christians Chios claims to be the birthplace of Homer. The capital, **Chios**, is the chief town (pop 26,617) and seaport It is also called Kastro

Chipewyan (chĭpuwī'ŭn), trading post, NE Alta , at the west end of Lake Athabaska, famous in the history of NW Canada The old Fort Chipewyan, on the south shore (the present post is on the north shore), was built at the instigation of Alexander MACKENZIE in 1788 and formed the base from which Mackenzie set out on his expedition (1789) down the Mackenzie river to the Arctic Ocean and in 1792 across the mountains to the Pacific Ocean It was a collecting center for the Mackenzie river fur trade from that time forward

Chipewyan Indians, North American Indian people of Athapascan linguistic stock Scattered Chipewyan tribes ranged W Canada between Great Slave Lake and the Churchill river They were nomadic hunters in rivalry with the woodlands Cree Typical Chipewyan tribes were the Athabaska and the Yellowknife They are not to be confused with the Chippewa or OJIBWA INDIANS

Chipley, town (pop 2,167), co seat of Washington co , NW Fla , WNW of Tallahassee, founded 1882 with the railroad's coming It is a trade and shipping center for a farm and timber area Near by is the Florida national egg-laying experiment station

chipmunk, rodent of the squirrel family The chipmunk of the E United States and SE Canada is of the genus *Tamias* The body of the common Eastern chipmunk (*Tamias striatus*) is about 5 or 6 in long, the upper parts reddish brown or grayish brown with a median black stripe and two black stripes separated by a whitish band along each side The 4- or 5-inch tail is hairy and flattened Food is transported in the expansible cheek pouches Chipmunks make underground burrows, often with concealed entrances beneath stone walls or trees In its northern range the chipmunk goes underground about the end of October, but sleeps deeply only during the coldest period Food for the winter is stored in the burrow Chipmunks eat nuts, seeds, berries, and insects The chipmunks of W North America belong, like those of E Asia, to the genus *Eutamias*

Chippawa (chĭ'puwô), village (pop 1,385), S Ont , just above Niagara Falls It was first settled in 1794 and was the scene of a battle (1814) between the British and Americans in the War of 1812

Chippendale, Thomas, 1718–79, celebrated English cabinetmaker His designs were so widely followed that a whole general category of 18th-century English furniture is commonly grouped under his name He was the son of John Chippendale, a joiner, with whom in 1749 he opened his first workshop in London In 1753 he moved to St Martin's Lane, where until his death he remained in business, first with James Rannie as partner and later with Thomas Haig Chippendale's *Gentleman and Cabinet-Maker's Director*, an illustrated trade catalogue first published in 1754, was widely influential in England and America Among the numerous pieces stamped with his style, it is possible to assign unquestionably to his own workshop only those for which the original bills still remain, as in the case of Harewood House and Nostell Priory, whose furnishings were created by him While he based his work upon the general Queen Anne and Georgian characteristics of sober design and thoroughly fine construction, retaining many of the early 18th-century details, Chippendale's distinction was to introduce many fresh forms For these he used three outside inspirations—Chinese, Gothic, and contemporaneous French ROCOCO The first two resulted naturally from the general mid-18th-century enthusiasms for CHINOISERIE decoration and pseudo-Gothic architecture Chippendale's name is emphatically identified with the extensive variety of chair types which he developed, their geometrical, Chinese, lattice, or sumptuously carved and interlaced openwork backs replacing the comparatively simple splat and pierced backs of the early 18th cent , while the legs varied from a simple square type to a boldly curved cabriole covered with rich *rocaille* carving Chippendale's varied output also included desks, mirror frames, hanging bookshelves, settees, with which he was especially successful, china cabinets and bookcases, frequently with fretted cornices and latticework glazed doors, and tables with delicately fretted galleries and distinctive cluster-column legs of Gothic inspiration

His material was almost exclusively dark mahogany, always without inlays Chippendale's style, quickly imported to America, was followed by a number of expert cabinetmakers, including Gillingham in Philadelphia and Rivington in New York It also was reflected in ceiling ornamentation by plaster relief and the carvings of mantelpieces and overmantels Thomas Chippendale, 2d, one of Chippendale's 11 children, maintained his father's business and traditions at the St Martin's Lane workshop for many years, in partnership with Haig. See study by Oliver Brackett (1924).

Chippewa (chĭ'pəwā), river rising in several forks in the lake region of N Wisconsin and flowing S and SW to the Mississippi, which it enters at the foot of Lake Pepin Eau Claire, Chippewa Falls, and Durand are on its banks It was once important in the lumbering industry

Chippewa Falls, city (pop 10,368), co. seat of Chippewa co., W central Wis., on the Chippewa just NE of Eau Claire, in a lake region, settled 1837, inc as a village 1853, as a city 1869 It grew as a lumber town, it is now a commercial center for a dairy and farm area, with several industries The city's hydroelectric plant supplies power to a large area The state branch of the Farmers Union is at Chippewa Falls

Chippewa Indians: see OJIBWA INDIANS.

Chiputneticook Lakes (chĭpŏ'tnĕ'tĕkōōk'), chain on the Maine–N B border, forming the international boundary for 28 mi It includes North, Grand, Spednik, and Palfrey lakes It is the source of the St Croix river

Chiricahua Indians: see APACHE INDIANS

Chiricahua National Monument: see NATIONAL PARKS AND MONUMENTS (table)

Chirico, Giorgio de (jôr'jō dā kē'rē-kō), 1888–, Italian painter, b Volos, Greece He worked and exhibited in Paris from 1911 to 1915 His work of this period is characterized by the use of distorted perspective, mannequin figures, empty space, and forms used out of context to create an atmosphere of mystery and loneliness It exercised a considerable influence on early surrealist painting and has often been associated with that school In the late 1920s, however, Chirico broke with surrealism, and his subsequent work is more studied and less imaginative Chirico is known also as a stage designer and as the author of *Hebdomeros* (1929) and of some art criticism He is represented in leading modern galleries in Rome, Moscow, Chicago, Buffalo, and New York See J T Soby, *The Early Chirico* (1941)

Chirikov, Aleksey Ilich (ălyĭksyā'ĭ ĭl'yĭch chĭ'rĭkŭf), d 1748, Russian explorer He was the lieutenant of Vitus BERING on the notable voyage that led to the discovery of Alaska

Chiron (kī'rŏn), in Greek religion, a CENTAUR, son of the Titan CRONUS, ancestor of ACHILLES and AJAX He was a famous teacher, among his pupils were JASON, ASCLEPIUS, HERCULES, and Achilles When he received an incurable wound, he gave his immortality to PROMETHEUS He became the constellation SAGITTARIUS, the archer

chiropractic (kī"rŭprăk'tĭk) [Gr., =doing by hand], system of therapeutics based upon the theory that disease is caused by interference with nerve function The purpose of the treatments is to try to restore normal function of the nerve system by manipulation and treatment of the structures of the human body, especially those of the spinal column The method was originated by Daniel David Palmer in 1895 His system of treatment and his teachings were carried on by his son Bartlett Joshua Palmer There are a number of institutions for training students in the profession, which is legally recognized in the United States, in Alaska, in parts of Canada, and in some foreign countries See B J Palmer, *Text Book on the Palmer Technique of Chiropractic* (1920)

chisel, tool with a cutting edge at the end of a blade, used chiefly for making small or odd-shaped cuts and pushed by hand or struck with a mallet It is made in a variety of forms adapted to wood, stone, or metal and includes wood-carving tools and gouges (concave forms with a curved cutting edge) The chisel, like the SPADE, evolved from primitive stone and soft-metal tools pushed by hand and commonly used on wood which was first charred The PLANE is derived from the chisel See Thomas Hibben, *The Carpenter's Tool Chest* (1933), A P Morgan, *Tools* (1948).

Chishima: see KURILE ISLANDS

Chisholm (chĭz'ŭm), city (pop 7,487), NE Minn., on the Mesabi iron range and NE of Hibbing, settled 1898, inc 1901.

Chisholm Trail, route over which vast herds of cattle were driven from Texas to the railheads in Kansas after the Civil War It took its name from Jesse Chisholm, a half-breed Cherokee Indian trader who, in the spring of 1866, drove his wagon, heavily loaded with buffalo hides, through Indian territory which is now Oklahoma to his trading post near Wichita, Kansas, the wheels cutting deep ruts in the prairie These marked a route followed for almost two decades by traders and by drovers bringing cattle to shipping points and markets in Kansas Hundreds of thousands of Texas longhorns were driven over the trail annually, and it became celebrated in frontier lore and cowboy ballads. With the development of railroads and the introduction of wire fencing, the trail fell into disuse, although traces of it can still be seen along the line of the Santa Fe RR.

Chismaio, Italian Somaliland see KISMAYU.

Chisinau: see KISHINEV, Moldavian SSR.

Chision (kĭs'ĭŏn), Benjamite Num. 34 21.

Chisloth-tabor (kĭs'lŏth-tā'-) [Heb., =loins of Tabor], town, N Palestine, plausibly identified with Iksal, W of Mt. Tabor. Joshua 19.12. See also CHESULLOTH

Chistopol (chĕstô'pŭl), city (1939 estimated pop. 32,000), central Tatar ASSR, E European RSFSR, c 65 mi SE of Kazan and on the Kama river It is a grain-trading center, chartered in 1781

Chisum, John Simpson (chĭ'sum), 1824–84, American cattleman, b. Tennessee. In 1837 he moved with his family to Texas He had no formal education, but worked as a builder and contractor, building the first courthouse in Paris, Texas In 1854 he entered the cattle business, beginning in 1866, in partnership with Charles Goodnight, he drove herds into New Mexico, Colorado, and Wyoming, selling them to government food contractors for Indian reservations When, in 1883, he established his ranch near Roswell, N Mex., he became one of the first cattlemen in that region, and his became one of the largest herds Here he was a prominent figure in the Lincoln co. cattle war, and at one time Billy the Kid was in his employ, he cooperated with the authorities, however, to end lawlessness in the cattle business.

Chiswick, England see BRENTFORD AND CHISWICK

Chiswick Press. see WHITTINGHAM, CHARLES

Chita (chĕtä'), city (pop 102,555), capital of Chita oblast, RSFSR, in SE Siberia, on the Trans-Siberian RR and the Chita river It is a transportation and industrial center of a region rich in rare metals (tungsten, molybdenum, gold), as well as tin, iron, coal, lumber and cattle Founded in 1653, Chita has a regional museum and several technical schools

Chittagong (chĭ'tugông), town (pop 92,301), SE East Bengal prov., the principal port of Pakistan on the Bay of Bengal It imports piece goods, salt, and fuel oil and exports rice, tea, and hides

Chittenden, Hiram Martin (chĭ'tundŭn), 1858–1917, American civil engineer and historian, b Yorkshire, Cattaraugus co., N Y., grad West Point, 1884 He became an expert in water-control projects and wrote several books in the field, including *Flood Control* (1915) As engineer on road-construction projects in Yellowstone National Park (1891–93, 1899–1906), he became interested in the West and wrote *Yellowstone National Park* (1895) His masterpiece of Western history was *The American Fur Trade of the Far West* (3 vols., 1902, new ed., 1932) He also wrote *Early Steamboat Navigation on the Missouri River* (1903) and *The Life, Letters, and Travels of Father Pierre Jean de Smet* (with A T Richardson, 3 vols., 1905) He served as an engineer during the Spanish-American War

Chittenden, Russell Henry, 1856–1943, American physiological chemist, b New Haven, Conn., grad Yale (Ph B., 1875; Ph D., 1880) He was associated with Yale from 1874, as professor (1882–1922) and as director of the Sheffield Scientific School (1898–1922) He lectured at Columbia Univ (1898–1903) A specialist in the physiology of nutrition, he conducted important researches and wrote *The Nutrition of Man* (1907) and *Development of Physiological Chemistry in the United States* (1930)

Chittenden, Thomas, 1730–97, governor of Vermont, b East Guilford, Conn After moving to Vermont in 1774, he was active in the Windsor Convention, which declared (1777) Vermont independent He and Ira ALLEN drew up the constitution, and Chittenden was elected (1778) first governor He was steadily a member of the Allen party, and he held office (except 1789–90) through Vermont's period of independence and early statehood until a few weeks before his death

Chittim (kĭt'ĭm), variant of KITTIM

Chiun (kī'un), idol worshiped by the Hebrews in the wilderness Amos 5 26 Remphan Acts 7 43

Chiusi (kyōō'sē), Latin *Clusium*, Etruscan *Camars*, town (pop 2,534), Tuscany, central Italy, in the Apennines It was a powerful Etruscan town, its king LARS PORSENA marched from here against Rome Many Etruscan tombs (5th cent B C) were discovered here, some of the interesting objects found in them are housed in the municipal museum. There are also catacombs.

chivalry: see KNIGHTHOOD AND CHIVALRY

chive, hardy Eurasian bulbous herb of the same genus as the leek and the onion It has slender tubular leaves used for seasoning various foods, such as salads and stews. Chives are often planted in decorative borders for their low clusters of leaves and globular heads of lavender flowers

Chivers, Thomas Holley (chĭ'vûrs), 1809–58, American poet, b Washington, Ga., M.D Transylvania Univ, 1830 Through his association with Poe and their similarity of style he was accused of plagiarism. *The Lost Pleiad* (1845) is his best collection of poetry. See study by S F Damon (1930).

Chkalov (chkä'lŭf), *formerly* **Orenburg** (ô'rŭnbôrk, Rus. ŭryĭnbôrk'), city (pop. 172,925), capital of Chkalov oblast, E European RSFSR, on the right bank of the Ural river. It is a major flour-milling and agricultural-processing center and a railroad junction at the northern terminus of the Trans-Caspian RR. Founded in 1735 as a fortress against the Bashkirs and the Kazakhs, Orenburg resisted (1773–74) a siege by Pugachev It became the chief center for the Russian barter trade with the Kazakhs and a terminus of caravan routes to central Asia After the building (1905) of the Trans-Caspian RR, Orenburg expanded considerably It changed hands several times in the Russian civil war between 1917 and 1919, when it definitely fell to the Red Army. In 1938 the city was renamed for a Russian aviator

Chladni, Ernst Florens Friedrich (ĕrnst' flō'rĕns frā'drĭkh klad'nē), 1756–1827, German physicist An authority on acoustics, he made studies of the transmission of sound in various gases and of vibrating plates of glass and metal covered with sand, on which were formed the so-called Chladni figures or acoustic figures He invented a musical instrument which he called the euphonium

Chloe (klō'ē) [Gr., =tender herb], Corinthian woman in whose house there were Christians 1 Cor 1 11

Chloë: see DAPHNIS AND CHLOË

chloral, oily, colorless liquid, a compound of carbon, chlorine, hydrogen, and oxygen It results when absolute ethyl alcohol is treated with chlorine It reacts with water to form chloral hydrate, a habit-forming drug, white and crystalline, used in medicine to produce sleep

chlorate, any SALT of CHLORIC ACID, a compound of a metal and the chlorate radical The chlorates are all soluble in water in varying degrees Potassium chlorate (chlorate of potash) and sodium chlorate (chlorate of soda) are the most important and are representative of the group Potassium chlorate is a colorless, crystalline substance with a salty taste, has a density of 2 34 grams per cubic centimeter at about 20°C, and melts at 368°C It is an oxidizing agent, used in the manufacture of matches, fireworks, and explosives, especially in detonators Great care must be taken when working with it, since it is explosive when mixed with certain chemicals In the laboratory it serves as a source of oxygen, yielding this element when heated, the reaction takes place more actively and at lower temperatures in the presence of a catalyst It is prepared, as other chlorates are, in several ways by heating the hypochlorite to yield the chlorate and the chloride, the reaction being one of reduction and oxidation, by treating the base of the metal with chlorine, and, commercially, by the electrolysis of the chloride in solution

chloric acid, an acid appearing only as a colorless solution It is a compound of hydrogen, chlorine, and oxygen, which ionizes to hydrogen and the chlorate radical (one atom of chlorine and three of oxygen, $-ClO_3$) It is only moderately stable, not allowing a too concentrated solution and decomposing when heated over 40°C to form chlorine dioxide (an explosive gas) and perchloric acid (a colorless liquid violently explosive when hot and concentrated) Chloric acid is a strong oxidizing agent It is formed when a chlorate such as barium chlorate or potassium chlorate reacts with an acid such as sulphuric acid A salt of chloric acid is called a CHLORATE

chloride, compound of chlorine and some other element or radical It is a SALT formed either by the direct union of chlorine and the other element or by the reaction of hydrochloric acid with a base, a metal, or an oxide Common salt (sodium chloride) is an example, potassium chloride is very similar to it in appearance and chemical activity Most chlorides are easily soluble in water, exceptions are mercurous chloride (CALOMEL), silver chloride, and lead chloride, which, however, is soluble in hot water Certain other chlorides, e g, antimony and bismuth chloride, decompose in water, forming oxychlorides When heated, many chlorides fuse without decomposition The chlorides of gold and platinum are two important exceptions In solution or when fused, most chlorides conduct electricity and are decomposed (see ELECTROLYSIS) Chlorides find extensive use Calcium chloride is used as a drying agent and in refrigeration Zinc chloride is used as a drying agent also and to deter decomposition in wood exposed to the elements, as in railway ties The chloride of sulphur is used in vulcanizing caoutchouc Silver chloride is used in photography and, with barium and iron chlorides, in the laboratory Cobalt chloride is used as an indicator of the presence of moisture, which turns it from blue to pink Mercuric chloride (CORROSIVE SUBLIMATE), ammonium chloride (SAL AMMONIAC), carbon tetrachloride, ethyl chloride (see ETHYL), and methyl chloride (see METHYL) are important Hydrogen chloride, a colorless, irritating gas, extremely soluble in water, is called, when in aqueous solution, HYDROCHLORIC ACID. The presence of a chloride in some solution of unknown composition is tested by the addition of silver nitrate, the formation of a white precipitate (silver chloride) giving positive indication.

chloride of lime, white powder prepared by treating slaked lime with chlorine It is a strong bleaching agent and disinfectant, used in the preparation of bleaching powder and JAVELLE WATER. See lime under POISONING, table.

chlorine (klô'rēn, -rĭn) [Gr., =green], very active nonmetallic element (symbol=Cl, for physical constants, see ELEMENT, table) At ordinary temperatures it is a greenish-yellow poisonous gas with a disagreeable, suffocating odor, approximately two and one half times heavier than air It belongs to the HALOGEN family of elements, and only fluorine among the nonmetals is more active Chlorine is soluble in water, its aqueous solution is called chlorine water and consists of a mixture of chlorine, hydrochloric acid, and hypochloric acid, since only a part of the chlorine introduced actually goes into solution, the major part reacting chemically with the water Chlorine water has strong oxidising properties owing to the oxygen set free upon the breaking down of the unstable hypochlorous acid Chlorine unites with the hydrogen of compounds other than water to form hydrochloric acid, e g , with that of the carbon-hydrogen compound, turpentine It combines directly in the presence of moisture with certain metals, such as copper and iron, to form chlorides With metals and oxygen, chlorine forms several chlorates, and it combines also with many nonmetals and certain radicals SAL AMMONIAC is a compound of the ammonium radical and chlorine Because of its activity chlorine does not occur by itself in nature, but its compounds are numerous and abundant Sodium chloride (common salt) is present in sea water, in salt wells, and in large salt deposits Other chlorides are often found in association The chief commercial source of chlorine is sodium chloride, from which it is prepared by ELECTROLYSIS Other chlorides are sometimes employed It can also be prepared from hydrochloric acid by oxidation of hydrogen chloride (Deacon's process) and from bleaching powder Chlorine is used in water purification, as a DISINFECTANT and as an antiseptic (CORROSIVE SUBLIMATE), in the manufacture of bleaching powder (CHLORIDE OF LIME), of cleaning fluids such as carbon tetrachloride, of dyes, of fire extinguishers, and of explosives It is an important constituent of many poison gases It is used in medicine in such compounds as CALOMEL, CHLOROFORM, and CHLORAL HYDRATE Chlorine, discovered in 1774 by Scheele, was identified as an element by Davy in 1810

chloroform (klô'rŭfôrm) [quasi-abbreviation of *chlorine* and *formyl*], volatile, colorless, nonin-flammable liquid with a sweet taste and a pleasant odor A compound of carbon, hydrogen, and chlorine, it is known chemically as trichloromethane It is used as a general and local anesthetic and as a solvent for numerous organic compounds such as resins, fats, and wax It is a valuable antidote in cases of strychnine poisoning It is derived from methane by the action of chlorine in the presence of sunlight A substitution reaction occurs in which some hydrogen is replaced by chlorine to yield chloroform The compound is classed, therefore, among the halogen derivatives of the hydrocarbons It is obtained also by the reduction of carbon tetrachloride by hydrogen, by the action of alkali upon chloral hydrate, and commercially by the action of bleaching powder upon ethyl (grain) alcohol The discovery of chloroform (1831) is variously credited to Justus von Liebig, Eugene Soubeiran, and Samuel Guthrie It was first used as an anesthetic by Sir James Simpson in 1848

chloromycetin: see ANTIBIOTIC SUBSTANCES

chlorophyll (klô'rŭfĭl), substance that gives plants their green color and enables them to carry on the process of PHOTOSYNTHESIS Chemically, chlorophyll consists of two components designated as chlorophyll *a* and chlorophyll *b*, both contain carbon, hydrogen, oxygen, nitrogen, and magnesium but differ slightly in their proportions of hydrogen and oxygen, and both are very similar to the hemoglobin of blood except that they contain magnesium rather than the iron of blood Within the cells of plants the chlorophyll is contained in chloroplasts, small rounded or oval protoplasmic bodies Also associated with the chlorophyll in the chloroplasts are two yellow pigments or carotinoids called carotene and xanthophyll The two forms of chlorophyll and the carotinoids were first identified by Richard Willstatter Sunlight appears to be essential to the formation of chlorophyll; the pigment usually develops only in the parts of a plant which sunlight can reach, and blanching occurs in plants deprived of sunlight In variegated leaves the chlorophyll is sometimes masked by red pigments Plants which completely lack chlorophyll must obtain organic food by living either as parasites or saprophytes; among the plants without chlorophyll are bacteria, yeast, molds, and some other fungi and also a few higher plants, e g., Indian pipe. Chlorophyll is sometimes used medicinally in treating infections and has long been useful for coloring foods and drugs.

chloroplast: see CHLOROPHYLL.

chloroprene: see RUBBER, SYNTHETIC.

Chmielnicki or Khmelnitsky, Bohdan (both: bŭkhdän' khmĕlnĭt'skĭ), 1593–1657, hetman of the Ukraine The persecutions he suffered from the Polish nobility caused him to stir the Cossacks to revolt against the suzerainty of Poland (1648) Successful at first, he was defeated by King John II of Poland in 1651 and was forced to appeal to Tsar Alexis of Russia In 1654, at Pereyaslavl (recently renamed Pereyaslavl-Khmelnitski), the union of the Ukraine and Russia was voted His chief ambition, an independent Ukraine, remained thus unfulfilled. See G V. Vernadsky, *Bohdan, Hetman of Ukraine* (1941)

Choanes, river see KARKHEH

Choate, Joseph Hodges (chōt), 1832–1917, American lawyer and diplomat, b Salem, Mass , grad Harvard Law School, 1854; nephew of Rufus Choate He was admitted (1855) to the bar and removed to New York city in 1856 His legal career lasted over 50 years and included many famous cases, his brilliant presentation of cases won for him an unrivaled reputation Choate twice helped to arouse New York city to defeat Tammany Hall—in 1871, when the Tweed Ring was exposed, and again in 1894 In 1899 President William McKinley appointed him ambassador to Great Britain, and he served for six years with distinction, helping to promote Anglo-American friendship Not only did he settle boundary disputes between Canada and the United States, but he also aided in the negotiations of the HAY-PAUNCEFOTE TREATY, and he forwarded the Open Door policy in China In 1907 he headed the American delegation to the Second Hague Conference See his autobiography, *Boyhood and Youth* (1917), biographies by T G Strong (1917) and by E. S Martin (1920)

Choate, Rufus, 1799–1859, American lawyer and Congressman, b Essex, Mass , grad Dartmouth, 1819, uncle of Joseph Hodges Choate Admitted to the bar in 1822, Rufus Choate practiced law in Danvers, Mass , before he moved to Salem (1828) and to Boston (1834) He gained national reputation as a lawyer and as an orator He served (1830–34) in the U S House of Representatives and sat (1841–45) in the U S Senate, completing the unexpired term of Daniel Webster See biography by C M Fuess (1928)

Chocano, José Santos (hōsĕ' sän'tōs chōkä'nō), 1875–1934, Peruvian poet, one of the leaders of *modernismo* He gave an *indianista* (pro-Indian) slant to modernism, and his most popular volume, *Alma América* [the soul of America] (1906), led Rubén Darío himself to develop American themes Chocano was a revolutionist, he defended the Indian, exalted Spain, and protested against "Yankee imperialism " His poem *¿Quién sabe?* (1913) was a significant literary landmark in the systematic *indianista* movement Chocano, vigorous, eloquent, at times bombastic, did not restrict himself to *modernista* forms Well-known collections of his poetry are *Fiat Lux* (1908) and *Primicias de oro de Indias* [first fruits of gold from the Indies] (1934)

chocolate, preparation made from the seeds of the CACAO or chocolate tree and used for either a beverage or a sweet The flavor of chocolate depends not only on the quality of the cocoa nibs and the flavorings used but also on a complex process of grinding, heating, and blending The chocolate liquor formed in an intermediate stage may be used in the confectionery trade, or the process may be continued and the resulting smooth mass of chocolate molded, cooled, and packaged It should be hard enough to snap when broken, have a bland mellow flow when melting, be free from all signs of gritty particles, and have a rich, dark color and aromatic smell and flavor The making of chocolate confectionery is in itself a well-developed industry of considerable commercial importance, employing highly specialised processes and machinery A chocolate beverage was known to the Aztecs and through Spanish explorers found its way into Europe. In 1657 a shop was opened in London where chocolate was sold at luxury prices, sometimes as high as 15s a pound It became a fashionable drink, many shops sprang up to become centers of political discussion and grew into famous clubs, such as the Cocoa Tree Chocolate was first manufactured in the United States at Milton Lower Mills, near Dorchester, Mass , in 1765 About 1876, M D Peter of Vevey, Switzerland, perfected a process of making chocolate for eating by combining the cocoa nib, sugar, fat, and condensed milk Put up in cakes, chocolate is a valuable emergency food It is a popular ingredient in custards, puddings, pastry, cakes, mousses, ice creams, and sauces as well as in confectionery

Chocorua (shōkôr'ōōu), peak, 3,475 ft high, E N H , in the White Mountain National Forest, N of Lake Winnipesaukee Chocorua village is in Tamworth town, and Lake Chocorua is near by

Choctaw Indians (chŏk'tô), North American Indian tribe of Natchez-Muskogean linguistic stock, formerly occupying central and S Mississippi with some outlying groups in Alabama and Georgia Some migration took place in the 18th cent., with some tribes settling in Louisiana. Their culture was similar to that of the Creek Indians, with whom they warred The Choctaw were peacefully removed (1832) to the Indian Territory (now in Oklahoma) and were one of the Five Civilized Tribes

Chodowiecki, Daniel Nikolaus (dä'nyĕl nē'kōlous khôdôvyĕts'kē), 1726–1801, German painter and engraver, b Danzig He was the most popular illustrator of his day in Prussia His miniatures include the series *History of the Life of Christ*, which established his reputation *The Departure of Jean Calas* is his best-known painting In 1797 he was appointed director of the Berlin Academy It is as an engraver, however, that Chodowiecki is best known His book illustrations include designs for Schiller's *Räuber*, Cervantes's *Don Quixote*, Goldsmith's *Vicar of Wakefield*, Shakspere's works, and many others His plates number over 2,000 See Austin Dobson, *Eighteenth Century Vignettes* (1894).

Choerilus (kē'rĭlus), fl 500 B C , Athenian tragic poet, an older rival of Aeschylus

choir (kwīr) [O Fr] **1** A chorus, especially one organized for the performance of sacred music, usually in a church According to the *Motu proprio* (1903) of Pope Pius X, the only authorized liturgical choir of the Roman Catholic Church is composed of men and boys Choirs in Protestant churches generally include both men and women **2** That division of an organ usually used to accompany the singers, played from the lowest manual on the console **3** The instruments of any one type in the orchestra, as brass choir, wood wind choir **4** That part of a church reserved for the singers and the officiating clergy see STALL

choir stall: see STALL

Choiseul, César, comte du Plessis-Praslin, duc de (sāzär' kôt' dü plĕsē'-pralĕ dük' du shwäzûl'), 1598–1675, marshal of France and diplomat In the Fronde he sided with Mazarin and defeated Turenne at Rethel (1650) He negotiated the Anglo-French alliance of 1665

Choiseul, Étienne François, duc de (ātyĕn' frāswä'), 1719–85, French statesman After successful service in the army, he entered diplomacy. He favored the Austrian alliance and as minister of foreign affairs after 1758 negotiated the FAMILY COMPACT and the Treaty of Paris at the end of the Seven Years War, he annexed Lorraine (1766) and Corsica (1768) As minister of war and of finds navy (1761–70) he reorganized the fighting forces and introduced important reforms He supported the publication of the *Encyclopédie* and aided in the suppression of the Jesuits Choiseul owed his rise to Mme de POMPADOUR and his downfall to Mme du Barry See biography by R. H Soltau (1909)

chokecherry · see CHERRY.

chokedamp see DAMP

choking, strangulation resulting from a blocking of the windpipe Among the common causes are irritating fumes or gases and mechanical obstruction of the windpipe, either external or internal Foreign bodies in the air passage may be removed by the fingers or with the aid of special instruments (e g , the bronchoscope) A foreign body in the windpipe of a child may sometimes be dislodged by turning the child upside down In order to establish an airway in cases of suffocation which do not respond to ordinary treatment, surgical opening of the windpipe (tracheotomy) is an emergency procedure in order to prevent ASPHYXIA and death

Chola (chō'lä), ancient Tamil kingdom (c 600 B C – A D c 1200), S India Its chief capitals were at Trichinopoly, Conjeeveram, Arcot, and Tanjore The greatest architectural monument is a temple (1011) at TANJORE celebrating a military victory

cholera (kŏ'lĕrə) or **Asiatic cholera,** acute infectious disease *Vibrio cholerae* (or *V comma*), first isolated by Robert Koch, is the causative organism. The disease is transmitted by water or food polluted by cholera organisms from the excreta of cholera victims Symptoms are a watery diarrhea, vomiting, and collapse Loss of fluid is treated by intravenous injections of salt solution, and the acidosis and uremia by intravenous injections of sodium bicarbonate Administration of certain sulfa drugs kills the germs As a preventive measure in epidemics, vaccination is essential Hot foods and boiled water only are advisable since heat kills the vibrios Care must be taken to avoid contamination of the food and water after they have cooled Cholera, which often occurs in epidemic form in Asia, has appeared on the eastern coast of the United States and in the Mississippi valley The death rate is high See J S Chambers, *The Conquest of Cholera* (1938)

cholera infantum (ĭnfăn'tŭm) [Latin, =children's cholera], a condition in infants which appears to be caused by an overwhelming infection of the intestine with bacteria, rather than by one special bacterium It starts with severe vomiting and diarrhea The stools later resemble rice water, as in true cholera Because of the extreme loss of fluid and the absorption of toxic substances, there is shock or collapse, and there may be acidosis Enemas, to irrigate the intestine and remove the toxic substances, should be used early. Sterile alkaline solutions are given by hypodermic injec-

tion, as it is usually impossible to feed by mouth because of vomiting. Although there may be fever, the skin is cold, and the usual treatment of shock should be followed.

Cholet (shôlā'), town (pop 23,214), Maine-et-Loire dept, W France, S of Angers Destroyed during the wars of the Vendée (1793–95), it was rebuilt and now has large linen- and cotton-textile manufactures Here in 1793 the Vendeans suffered a bloody defeat

Cholon (shôlô'), city, Cochin China, on the right bank of the Saigon river, a tributary of the Dong Nai Founded in the late 18th cent by Chinese seeking to escape the civil disorders of Annam, it is still largely a Chinese city It forms part of metropolitan SAIGON

Cholula (chôlōō'lä), town (pop 8,424), Puebla, E central Mexico Site of a pre-Columbian pyramid of great antiquity, the town was an old Toltec city and, when the Spanish came, was an Aztec sacred city, devoted to the worship of QUETZALCOATL On suspicion of native insurrection, Cortés destroyed it A church was built on top of the pyramid With its own churches and many more dotting the surrounding valley, Cholula remains a place of pilgrimage

Chomutov (khô'mōōtôf), Ger *Komotau* (kō'mōtou), city (pop 26,697), N Bohemia, Czechoslovakia. There are ironworks and other industries

Chone (chō'nā), city (1944 estimated pop 21,834), W Ecuador, on the equatorial lowlands. Not far from the sea, to which it has access by rail, Chone is the leading Ecuadorian city in the manufacture of Panama hats. From the surrounding region come tagua nuts and some cacao for export

Chongjin or **Chungjin** (both chŭng'jĭn'), Jap. *Seishin*, city (1944 pop 184,301), N Korea, a port on the Sea of Japan There are fisheries and ironworks and steelworks

Choniates, Michael. see ACOMINATUS, MICHAEL

Choniates, Nicetas see ACOMINATUS, NICETAS

Chopin, Frédéric François (frādārēk' frāswa' shôpĕ'), 1810–49, composer for the piano, b near Warsaw, of French and Polish parentage After appearances as concert pianist in Munich and Vienna, he settled in Paris in 1831, where he lived the rest of his life There he knew most of the principal composers, artists, and literary figures of the time, and there, in 1836, he met George Sand, his unfortunate affair with her lasted until 1847 His art was inseparable from the piano, his only important compositions not for piano solo were the piano concertos in E minor (1833) and in F minor (1836), wherein the orchestra is completely dominated by the piano Polish nationalism is evident in his 15 polonaises and 55 mazurkas Chopin had a marked gift for improvisation, and many of his compositions have an improvisatory character Because of their extremely romantic quality, some of his works have become known by descriptive titles which he did not give them They were published simply as nocturnes, scherzos, ballades, waltzes, impromptus, fantasies, and the like Larger works include the sonatas in B flat minor (1840) and B minor (1845). The 24 preludes (1839), one in each major and each minor key, are short pieces, some of which are among his finest compositions Two sets of 12 études (1833, 1837) are more than technical studies, they are among his major works Chopin died of tuberculosis when he was only 39 See biographies by Frederick Niecks (1888), Franz Liszt (Eng tr, 1865), J G Huneker (1900), William Murdoch (1935), and Herbert Weinstock (1949)

Chopin, Kate O'Flaherty (shô'flăhĕrtē, pän'), 1851–1904, American author, b St Louis, grad Sacred Heart Convent, 1868 She wrote Creole stories, including *Bayou Folk* (1894), *A Night in Acadie* (1897), and *The Awakening* (1899) See biography by D S. Rankin (1932)

choragic monuments (kŭrăj'ĭk,-rā'jĭk, kō-) [Gr, = of the choragus, the chorus leader], small decorative structures erected in ancient Greece to commemorate the victory of the leader of a chorus in the competitive choral dances, an entire street in Athens having been lined with them Upon such a monument the prize, a tripod, was placed, and the date and the name of the performer were usually inscribed. The best known are that of Lysicrates (c 335 B C), still standing in Athens, a graceful circular structure showing one of the early uses of Corinthian columns, and that of Thrasyllus, on the slope of the Acropolis at Athens, also still standing in part

chorale or **choral** (both kŏrăl'), term used to denote a part of the Roman Mass, usually of biblical text, sung by more than one voice, or, more often, a Protestant congregational hymn of stately tempo, which developed in Germany at the time of the Reformation. It is of more varied and less regular structure than the English hymn.

Chor-ashan (kôr'-ă'shăn) [Heb, =furnace of smoke], one of David's haunts 1 Sam 30 30. See ASHAN.

Chorazin (kōrā'zĭn), vanished town of Palestine, denounced by Jesus Mat. 11 21, Luke 10 13

chord, in music, a group of tones of different pitch sounding simultaneously. The simplest chord is composed of three notes and is called a triad. See also HARMONY.

chorea (kōrē'ă, kŭ-) or **Saint Vitus's dance,** disease of the nervous system accompanied by involuntary and jerking movements, irritability, depression, and emotional instability. The condition affects females more often than males and is most commonly observed in children from 7 to 14 years of age, it rarely occurs after puberty. Chorea is a serious condition because of its relation to rheumatic heart disease Children with chorea should be removed from school and never punished or ridiculed Bed rest is important in the treatment of the disease, fever therapy has often been successful Huntington's chorea, a hereditary disease affecting adults, is not to be confused with St. Vitus's dance

Chorley, municipal borough (1931 pop. 30,796, 1947 estimated pop 32,090), Lancashire, England Its industries include cotton spinning and weaving, tanning, and flour milling Duxbury Hall is the birthplace of Miles Standish

Chorotega (chōrōtā'gä), ancient Indians of Honduras and Nicaragua The absence of large ruined cities and the destructive nature of the tropical climate have revealed little of the Chorotegans Contemporaneous with the Maya to the northwest, they inhabited principally the ULÚA river valley and the MOSQUITO COAST With other tribes to the south and the CHIBCHA of Colombia, they formed a cultural link between the peoples of the Andean area and those of Mexico Existing artifacts give evidence of fine craftsmanship and individualistic treatment

chorus. **1** Any group of singers who sing together In this sense the terms *chorus* and CHOIR are synonymous The group of performers who sing or dance together in a musical comedy is called a chorus Numerous choral societies grew up in England and the United States in the 18th and 19th cent A popular form in England is the GLEE club Festival choruses and such groups as the Huddersfield Choral Society (founded 1836) flourish in England today for the performance of the finest of choral music Of such groups in the United States, the oldest was founded by William BILLINGS, and an outstanding one is the BACH CHOIR of Bethlehem, Pa **2** In ancient Greece, the dithyrambic chorus became the dramatic chorus when Thespis, in the 6th cent B C, introduced the actor Aeschylus began with a chorus of 50, but the number was soon decreased to 12, Sophocles used a chorus of 15 In the 3d cent B C the comic chorus was only seven persons, and only four in the 2d cent B C, the tragic chorus having disappeared altogether The chorus had ceased to have a vital part in the drama, Euripides assigned to it lyrics not necessarily having anything to do with the action Some writers of comedy indicated points at which the chorus was to sing or dance, but wrote no specific part for it, ultimately it was dispensed with The chorus chanted its lines and also performed dances

Chorzow, Pol *Chorzów* (hô'zhôōf), formerly Pol *Królewska Huta* (krôōlĕf'ska hōō'ta), Ger. *Königshütte* (kû"nĭkhs-hü'tŭ), city (pop 110,675), Silesia prov, SW Poland It is a center of the KATOWICE mining and industrial region It passed from Germany to Poland in 1921 Hajduki Wielkie (Ger *Bismarckhütte*) is a suburb

Chosen, see KOREA

Choshi (chō'shē), city (1947 pop 69,543), Chiba prefecture, central Honshu, Japan, a fishing port on the Pacific at the mouth of the Tone river.

Chosroes. see KHOSRU

Choteau (shō'tō) [for Pierre Chouteau], city (pop 1,181), co seat of Teton co, N Mont, on the Teton river and NW of Great Falls, inc 1913 Primarily a center of a stock-raising area, the town also became the seat of an experiment in unified county planning in the 1920s

Chou (chou), dynasty of China, which ruled, according to traditional dates, from 1122 to c 256 B C or, according to some modern scholars, from c 1027 to 256 B C About 1027 B C the pastoral Chou moved into the Wei valley from the northwest (modern Shansi and Kansu) Their capital was near modern Sian At its height their empire extended from S Manchuria in the north to parts of the Yangtze valley in the south and from E Kansu in the west to the seacoast on the east The Chou rulers created feudal fiefs, and the nobles became strong enough to establish (c 800 B C) themselves in separate states, especially in the north and at the mouth of the Yangtze in the southwest Later the state of Ch'u came to control the lower Yangtze valley, while the border state of Ch'in grew in the northwest The Chou era was the classical age of China CONFUCIUS, Mo-ti, Yang Chu, LAO-TZE, and Chuang-tze lived then. Contemporary writings (especially *The Book of Odes*) and archaeological evidence picture the Chou culture. The use of iron implements was introduced from W and central Asia, oxen (water buffalo) were used in plowing. At the end of this era the house of Ch'in conquered the feudal states.

Chouans (shōō'uns, shwă) [from Norman French, =owls], peasants of Normandy and Brittany who rose against the French revolutionary government in 1793 Their first leader is said to have been Jean Cottereau (d.1794), traditionally nicknamed Jean Chouan, marquis de la Rouerie [John the Owl, marquess of Mischief], and they supposedly used the hoot of an owl as a signal. The movement, called Chouannerie, was rather disorganized and more religious than royalist in feeling, it became merged with the counterrevolutionary rising in the VENDÉE, but the name was preserved to describe the fierce guerrilla warfare that continued until it was quelled by Napoleon. Even then the so-called Petite Chouannerie persisted until 1815, and Napoleon was forced to divert troops from Waterloo to put it down Balsac's novel *Les Chouans* pictures the conditions of warfare vividly

Chou En-lai (jō' ĕn'-lī', chou'), 1898–, Chinese Communist leader. His youthful participation in radical movements brought him a year's imprisonment in Tientsin in 1919 After his release he studied (1920–24) in France and organized an overseas branch of the Communist movement among Chinese students. Chou returned (1924) to China and threw himself into the united struggle of the Kuomintang and the Communists to conquer the country He had little military experience, but in 1927 he carried out his assignment to organize an insurrection in Shanghai, which permitted Chiang Kai-shek to take the city Chou participated in the fighting (1927–33) against Chiang and in the "long march" (1934–36) of the Communist army to NW China During the partial Communist-Kuomintang rapprochement (1936–46) he was the chief Communist negotiator. In 1949, with the establishment of the People's Republic of China at Peiping, he became premier and foreign minister.

Chouteau, Auguste Pierre (ōgüst' pyĕr' shōōtō', shōtō'), 1786–1838, American fur trader, b St Louis, grad. West Point, 1806, son of Jean Pierre Chouteau He resigned from the army the following year to aid in the family fur trade and in 1809 became one of the members of the St Louis Missouri Fur Company, taking part in several of its expeditions In the War of 1812 he served as captain of the territorial militia While on a trading expedition to the upper Arkansas in 1817, he was captured by the Spanish and imprisoned at Santa Fe for several months After his release, he continued to trade with the Osage Indians He made his home at the present Salina, Okla, where he entertained many distinguished guests In 1832 he led a party, including Washington Irving from St Louis to his post, a journey described in Irving's *Tour of the Prairies* (1835)

Chouteau, Jean Pierre (zhă), 1758–1849, American fur trader, b New Orleans He came to St Louis in 1764 with his mother and entered the family business He traded chiefly with the Osage Indians, and he and René Auguste CHOUTEAU had a monopoly of their trade for some years When the monopoly expired, he sought a new post and visited (apparently in 1796) the site of the present Salina Okla There he established a post in 1802, and he persuaded many Osage Indians to move to that locality He had great influence over the Indians and was U S Indian agent In 1809 he was a member of the expedition up the Missouri river to return to his tribe a Mandan chief who had accompanied Lewis and Clark down the river, and in that same year he joined with Manuel LISA and others to form the St Louis Missouri Fur Company When this company was dissolved, he continued as an independent fur trader, with the aid of his son, Auguste Pierre Chouteau

Chouteau, Pierre, 1789–1865, American fur trader, merchant, and financier, b St Louis, son of Jean Pierre Chouteau He early entered his father's business as a clerk, accompanying him on several trading expeditions until 1813, when he with a partner engaged in general merchandising and trading In 1831 he became a member of Bernard Pratte and Company, which had the Western agency of the AMERICAN FUR COMPANY. He was one of the most powerful men in the West of that day. With the withdrawal of John Jacob Astor from the American Fur Company in 1834, Pratte, Chouteau, and Company bought all the Missouri river interests of the old company Reorganized (1838) as Pierre Chouteau, Jr, and Company, it carried on a tremendous business, extending from the Mississippi to the Rocky Mts and from Minnesota to Texas, until its dissolution in 1861 Chouteau's business activities expanded to include railroads, a rolling mill, and other industries, and he became one of the leading financiers of his time, living most of his later years in New York.

Chouteau, René Auguste (runā'), 1749–1829, American fur trader and a founder of St Louis, b New Orleans. Despite his youth, he in 1763 accompanied Pierre LACLEDE, a partner in the fur-trading firm of Maxent, Laclede, and Company, to establish a trading post in the Illinois country The site chosen was on the west bank of the Mississippi, below the mouth of the Missouri, where Chouteau was left (1764) with a party of men to build the post, which became the city of SAINT LOUIS He continued to serve as aide to Laclede until the latter's death in 1778, when he succeeded to the management of the business and, with his brother, Jean Pierre Chouteau, extended and developed it.

When Louisiana was added to the United States, he became a justice of the territorial court, and when St Louis was incorporated in 1809, he was chairman of the board of trustees He was so successful in dealing with the Indians that his aid was sought after the War of 1812 in negotiating treaties with several Indian tribes

chow or **chowchow** (chou'chou'), dog known from antiquity in the Orient, where it was long the chief hunting dog Its origin is not determined—by some it is considered one of the basic breeds and ancestor to the Eskimo dog, Samoyed, and some other related types, and by others it is thought to have been developed from crossing the Tibetan mastiff with the Samoyed It is a rather large, compact dog with a massive head, flat skull, broad, short muzzle, and small, pointed ears The tongue and the inside of the mouth are blue black The dense, rather coarse coat is of a solid color, usually reddish brown, black, or a slaty blue, the undercoat is soft and woolly. The ruffed neck gives the dog a somewhat lionlike appearance

Chowchilla (chouchil'ă), city (1940 pop 1,957, 1947 special census pop 3,393), central Calif , NW of Fresno in the San Joaquin Valley, inc 1923 It is a processing center in a farm area

chowder, a stew of fish or shellfish with potatoes, onions, and pork (usually salt pork), thickened with crumbled hard bread It has probably been known in some form to most fishing communities The name chowder seems to have originated from the Breton expression *faire la chaudière* The name was probably carried to the French Canadian coasts, from which it traveled to New England (noted for its clam chowder), and thence south Each locality on the eastern coast of the United States has its favorite recipe, based on the kinds of fish and vegetables available The name is extended to include a mixture of vegetables only

Chozeba (kōzē'-) see ACHZIB 2

Chrestien de Troyes or **Chrétien de Troyes** (both krătyĕ' dŭ trwă'), fl 1164, French poet, author of the first great literary treatments of the ARTHURIAN LEGEND His poetical romances were of a type popular in the polite circles of France and England His surviving works were first an imitation of Ovid and a sort of popular tale, *Guillaume d'Angleterre*, then followed the series of Arthurian poems—*Erec et Enide* (c 1160), *Cligès* (c 1164), *Lancelot, ou, Le Chevalier de la charette, Yvain, ou, Le Chevalier au lion* (Eng tr , *The Knight of the Lion*), and *Perceval; ou, Le Conte del Graal*, unfinished (see PARSIFAL) Chrestien died probably before 1190 All the Arthurian romances but *Perceval* appear in the translation of W W Comfort, *Arthurian Romances* (1913) See R S Loomis, *Arthurian Tradition & Chrétien de Troyes* (1949)

Chrisman (krĭs'mun), city (pop 1,112), E Ill , S of Danville, platted 1872, inc 1900 It is a farm trade center

Christ see JESUS

Christ, Wilhelm von (vĭl'hĕlm fŭn krĭst), 1831–1906, German Greek scholar A professor at the Univ of Munich, he wrote one of the best standard histories of Greek literature (1888)

Christadelphians (krĭs"tŭdĕl'fēunz) [Gr ,=brothers of Christ], name of a religious denomination founded in the late 1840s by John Thomas, an Englishman who had settled in the United States Their aim is to revive the simple apostolic faith of the 1st cent They believe the Scriptures infallible and hold that no others than themselves interpret them truly They expect the second coming of Christ on earth to establish a theocracy with its center at Jerusalem They believe that none but those who share their beliefs will rise from the dead and enjoy immortal life after judgment There is no ordained ministry Immersion is required for membership

Christchurch, municipal borough (1931 pop 9,190, 1943 estimated pop 16,408), Hampshire, England It is at the head of the Avon and Stour estuary, which forms a small harbor The Augustinian priory church (dating from the 11th cent) gave the town its name

Christchurch, city (pop 112,681, metropolitan pop 150,047), on the east coast of South Island, New Zealand, at the base of Banks Peninsula, founded 1850 Canterbury College (1873), the School of Arts (1882), and the Roman Catholic and Anglican cathedrals are here Hagley Park is the most extensive of its parks There are tanneries and meat-packing plants Its port, Lyttelton, is northwest Frances Alda was born at Christchurch

Christ Church College: see OXFORD UNIVERSITY.

christening: see BAPTISM

Christian I, 1426–81, king of Denmark (1448–81), of Norway (1450–81), and of Sweden (1457–64), count of Oldenburg, and founder of the Oldenburg dynasty of Danish kings In 1460 he also succeeded to Schleswig and Holstein A weak monarch despite the vastness of his lands, he made large concessions to the nobles, particularly in his German dominions, and had but a precarious hold over Sweden (see KALMAR UNION) His attempts to subdue Sweden ended in 1471 with his defeat at Brunkeberg, near Stockholm, by Sten STURE (the elder). He was succeeded by his son John.

Christian II, 1481–1559, king of Denmark and Norway (1513–23) and of Sweden (1520–23), son and successor of King John After several unsuccessful attempts, he asserted his claim to Sweden by arms However, his wholesale massacre of Swedish nobles at Stockholm (1520) alienated the Swedes, who raised Gustavus Vasa to the throne as GUSTAVUS I, thus ending the KALMAR UNION In Denmark, Christian won the hatred of the nobles and high clergy by thorough reforms in favor of the lower and middle classes, by calling Lutheran preachers to Copenhagen, and by placing Sigbrit, mother of his Dutch mistress, in charge of the finances of the realm In 1523 the nobles rebelled (particularly in Jutland), deposed Christian, and chose his uncle, Frederick I, as king Christian fled, but in 1532 he was captured while attempting to recover his throne He was imprisoned till his death A gifted and educated ruler, despite his despotic methods, Christian II did much to advance learning in Denmark

Christian III, 1503–59, king of Denmark and Norway (1534–59) He was elected king of Denmark one year after the death (1533) of his father, Frederick I With the help of Gustavus I of Sweden, Christian took possession of his lands in 1536 after defeating the forces of Lübeck, which had invaded Denmark His victory broke the power of the Hanseatic League and made the Danish fleet supreme in northern waters Christian established (1536) Lutheranism in Denmark and imposed it on Norway Never elected king by the Norwegians, he declared Norway a dependency of Denmark His son, Frederick II, succeeded him

Christian IV, 1577–1648, king of Denmark and Norway (1588–1648), son and successor of Frederick II After assuming (1596) personal rule, he devoted himself with energy to the upbuilding of the navy, industry, and commerce He rebuilt OSLO and renamed it Christiania. Aroused when CHARLES IX of Sweden asserted authority over Lapland, he made war on Sweden (the so-called KALMAR WAR, 1611–13) and largely dictated the peace In the THIRTY YEARS WAR, urged on by England, France, and the Netherlands, he invaded (1625) Germany as the champion of the Protestant cause Defeated (1626) by Tilly at Lutter, he was driven back in 1627 Schleswig, Holstein, and Jutland were overrun and Stralsund besieged by the imperial troops under WALLENSTEIN Christian, with the help of Gustavus II of Sweden, raised the siege of Stralsund, but in 1629 he signed a separate peace with the emperor His anti-Swedish policy brought on war with Sweden (1643–45), in which Christian lost the Norwegian provinces of Jamtland and Harjedalen His son Frederick III succeeded him

Christian V, 1646–99, king of Denmark and Norway (1670–99), son and successor of Frederick III His minister, GRIFFENFELD, who dominated Christian's reign until his fall (1676), made the monarchy absolute Christian fought an unsuccessful war with CHARLES XI of Sweden (1675–79) He was succeeded by his son Frederick IV

Christian VII, 1749–1808, king of Denmark and Norway (1766–1808), son and successor of Frederick V Shortly after his accession his mental illness made him dependent on his physician STRUENSEE, who in 1770 caused the fall of Johann Hartwig Ernst BERNSTORFF and in 1771 became all-powerful minister After the disgrace of Struensee (1772), Christian annulled his marriage with Caroline Matilda, sister of George III of England Andreas Peter BERNSTORFF was chief minister from 1773, and after 1784 Christian's son and successor, Frederick VI, acted as regent

Christian VIII, 1786–1848, king of Denmark (1839–48), nephew of Christian VII, successor of Frederick VI Earlier he had been governor and (May-Oct , 1814) king of Norway His reign brought prosperity to Denmark In 1846 he proclaimed SCHLESWIG-HOLSTEIN a part of Denmark, thus precipitating the war of 1848 His son Frederick VII, succeeded

Christian IX, 1818–1906, king of Denmark (1863–1906) Issued from the cadet line of Sonderburg-Glücksburg, he succeeded Frederick VII, last of the direct line of Oldenburg The London Conference of 1852 had settled on him the contested succession to the duchies of SCHLESWIG-HOLSTEIN, but Christian in 1863 annexed Schleswig to the Danish crown This precipitated (1864) the war with Prussia and Austria, in which Christian lost Schleswig, Holstein, and Lauenburg In 1866 the Danish constitution was revised, granting the upper chamber more power than the lower Liberal agitation for a more democratic constitution was constant during Christian's reign He was succeeded by his son Frederick VIII A younger son became king of Greece as George I

Christian X, 1870–1947, king of Denmark (1912–47) and of Iceland (1912–44), son and successor of Frederick VIII, brother of King Haakon VII of Norway He granted (1915) a new constitution, which included the enfranchisement of women During the German occupation (1940–45) of Denmark, the king chose self-imposed seclusion rather than yield to the German authorities, he became the symbol of national resistance. In 1944 the people of Iceland decided in a referendum to sever all ties with the Danish crown Christian X was succeeded by his son Frederick IX

Christiana, borough (pop 1,062), SE Pa., SE of Lancaster, settled 1691, laid out 1833, inc 1894. It produces canned goods and textiles It was a stop on the Underground Railroad, and antislavery riots occurred here in 1851

Christian Catholic Apostolic Church in Zion, religious organization founded (1896) by John Alexander DOWIE Its members are sometimes known as Zionites The church had its center in Chicago until ZION, Ill , was laid out Part of Dowie's teaching was belief in the healing of disease by prayer In addition to religious and educational activities in Zion, the founder started various industries on a cooperative basis, an undertaking that was built up by Wilbur Glenn Voliva, who became general overseer upon the deposition of Dowie in 1905 See Rolvix Harlan, *John Alexander Dowie and the Christian Catholic Apostolic Church in Zion* (1906)

Christian Church see CONGREGATIONALISM and DISCIPLES OF CHRIST

Christian Endeavor, an association for strengthening spiritual life and promoting Christian activities among young people The first Young People's Society of Christian Endeavor was started in 1881 by Dr Francis E CLARK in Portland, Maine Within a few years the organization had become not only interdenominational but international, and a world union was formed in 1895, with Clark as president Many denominations are represented in the association's membership

Christiania, Norway see OSLO.

Christianity, religion following Jesus Christ Among religions Christianity is unusual in its penchant for organization Christian groups, or churches, are of two types—"traditional," having an unbroken tradition since ancient times, and "reformed," aiming to restore a primitive state of Christianity (see CHURCH and CATHOLIC CHURCH) Of the first type are the two largest churches, the ROMAN CATHOLIC CHURCH and ORTHODOX EASTERN CHURCH, as well as the ARMENIAN CHURCH, Coptic Church (see COPT), JACOBITE CHURCH, and NESTORIAN CHURCH Most of the "reformed" churches originated in Western Christendom (see PROTESTANTISM), an Eastern example is the DUKHOBORS For the first three centuries of Christianity, history is dependent on apologetic and religious writings, there are no descriptions or chronicles (see PATRISTIC LITERATURE) Historians differ greatly on how far back the 4th-century picture of the Church (which is quite clear) can be projected, especially respecting organization by bishops (each bishop a monarch in the church of his city), celebration of a LITURGY entailing a sacrament and a sacrifice, and claims by the bishop of Rome to be head of all the churches (see PAPACY) There is evidence for these features in the 2d cent A first problem for Christians was how to resist attempts to interpret the new beliefs in old pagan terms (e g , Gnosticism) or to incorporate them in some inclusive system (e g , Manichaeism) The earliest sectarian deviations were those of Marcion and of Montanism (2d cent) They were handled resolutely by the Church, the teachers of novelty were expelled (excommunicated) For 250 years it was a martyrs' church, the persecutions were official, legally motivated by refusal of Christians to worship the state and emperor and by their claim to exclusive truth The chief persecutions were under Nero, Domitian, Trajan and the other Antonines, Maximin, Decius, Valerian, and Diocletian and Galerius In 313 Constantine I and Licinius announced toleration of Christianity in the Edict of Milan In the East the Church passed from persecution directly to imperial control (caesaropapism), inaugurated by Constantine, enshrined later in Justinian's laws, and always a curse for the Orthodox churches In the West the Church remained independent because of the weakness of the emperor and the well-established authority of the bishop of Rome For 300 years after A D 275 the Church in the East was occupied with controversies, Arianism, Nestorianism, Monophysitism, and Monotheletism They concerned the relation of Jesus Christ to God and to man, and the issue was Does a given new statement fit in with the teaching of the apostles as handed down? If yes, it was orthodox, if no, it was heretical Decisions were made at a series of general councils of bishops (see COUNCIL, ECUMENICAL), at them was composed the Nicene Creed, the official orthodox summary (see CREED) These centuries saw a series of Christian writers of unequaled influence (the Fathers of the Church) Origen, St Athanasius, St Basil the Great, St Gregory of Nyssa, St Gregory Nazianzen, St John Chrysostom, and Theodoret, writing in Greek, St Ambrose, St. Jerome, and St Augustine writing in Latin Origen and St Jerome had a special role in the Church's work of determining and preserving the text of the Bible From the 3d cent an element was MONASTICISM, first well organized by St. Basil In the West it was a central feature in the missionary work of St Martin (Gaul, 4th cent) and St Patrick (Ireland, 5th cent), and it received definitive shape from St. Benedict and St Gregory

the Great, who thereby generated an activity ever vital in the Roman Catholic Church. German invasions slowed the conversion of Western Europe (e g , that of England was recommenced in the 6th cent.). All the first invaders were Arian, but the Franks (with Clovis) adopted Catholicism, a fact which probably helped to consolidate their rule Out of this kingdom came Pepin and Charlemagne, who, by alliance with the papacy and proclamation of an empire (800), charted an ideal of the Middle Ages. In the 7th and 8th cent the Eastern Church lost to Islam all Asia except Asia Minor. Alienation from the West was encouraged by the bitter struggle over ICONOCLASM, ecclesiastical animosity between Rome and Constantinople came to a head in the schism of the 9th cent, and attained a sort of legal permanence in 1054 (see LEO IX, SAINT) Eastern and Western Christendom were already in the 9th cent two different cultures, their one common tie was the Christian doctrine—even worship and practices were very different From this time it is customary to distinguish Christian history in its Eastern and Western streams as that of the Orthodox Eastern and the Roman Catholic churches See Philip Hughes, *A History of the Church* (1935–, Roman Catholic), K S Latourette, *A History of the Expansion of Christianity* (1937–), Hans Lietzmann, *The Beginnings of the Christian Church* (Eng tr. by B L. Woolf, 1937), James Moffatt, *The First Five Centuries of the Church* (1939), Jules Lebreton and Jacques Zeiller, *The History of the Primitive Church* (Eng tr by E S Messenger, 1949, Roman Catholic)

Christian of Brunswick, 1599–1626, Protestant leader in the THIRTY YEARS WAR, titular bishop of Halberstadt (1616–23) The first important ally of Frederick the Winter King, he took up arms in defense of the Palatinate in 1621 Defeated by TILLY (1622), he went to the Netherlands, where he served with Maurice of Nassau Christian later advanced into Germany but was forced to retreat, and Tilly turned the retreat into a rout at Stadtlohn (1623) While serving with CHRISTIAN IV of Denmark, he was defeated a third time (1626)

Christian Reformed Church, denomination originating in a secession from the REFORMED CHURCH IN AMERICA in Michigan in 1857 Colonists from Holland who began settling in Michigan in 1846 generally became members of the Reformed (Dutch) church there A number of these immigrants, dissatisfied with the teachings and practices of that church, separated from it in 1857 and united in a new congregation at Holland, Mich. Later other congregations of this "True Holland Reformed Church" were formed in neighboring states Missionary work in Holland led many Dutch immigrants to join this church upon their arrival in the United States In 1882, by a new secession movement in the Reformed Church in America, caused by the General Synod's refusal to condemn FREEMASONRY, a considerable addition to the church was made In 1890 it adopted the name Christian Reformed Church, in that year it was joined by the True Reformed Dutch Church (1822) of New York and New Jersey Its constitution is an adaptation of that approved by the Synod of Dort in 1619 Its doctrines are mainly those of the Reformed Church in Holland

Christians, name taken by the followers of several evangelical preachers on the American frontier, notably James O'Kelley, Abner Jones, and Barton W STONE, all of whom were antisectarian The majority joined the DISCIPLES OF CHRIST, a body with a similar emphasis founded by Thomas and Alexander CAMPBELL, and the name Christians continued to be applied often to members of the Disciples' church Other congregations of Christians united as a separate body which ultimately took the name Christian Church, this was merged in 1931 with the Congregational Churches (see CONGREGATIONALISM) See also CHRISTIANITY

Christiansand, Norway see KRISTIANSAND.

Christiansburg, town (pop 2,299), SW Va., WSW of Roanoke, founded 1792, inc 1916 It has stockyards and processes vegetables and lumber The courthouse of Montgomery co is here

Christian Science, a religion founded upon principles and divine laws expressed in the acts and sayings of Jesus Christ as discovered and formulated by Mary Baker EDDY and practiced by the Church of Christ, Scientist. The occasion of Mrs. Eddy's discovery was her immediate recovery of life and health when in 1866 she read an account of healing by Jesus in the New Testament In 1875 her *Science and Health* (later published as *Science and Health, with Key to the Scriptures*), the only authorized textbook of Christian Science, was published. In 1879 Mrs Eddy established the Church of Christ, Scientist. In Boston in 1892 was organized the First Church of Christ, Scientist—the Mother Church, of which Christian Science churches over the world are branches. Each individual church is self-governing and self-supporting, but all accept the tenets framed by Mrs Eddy and incorporated in the *Church Manual*. Upon the passing of Mrs Eddy in 1910, the administrative power was assumed, as conferred in the *Manual*, by the Christian Science Board of Directors. During her life the founder had been the originator and guide of every step in the church's development Of the numerous publications issued the most important include the *Christian Science Monitor*, a daily newspaper; the *Christian Science Quarterly*; the *Christian Science Sentinel*; and the *Christian Science Journal* These are published by the Christian Science Publishing Society Other activities are conducted by a board of education and a board of lectureship Mrs Eddy was ordained "pastor" of the Mother Church, but hers was a spiritual pastorship The churches have no individual pastors Services are conducted by two readers, one reading from the Scriptures, the other from *Science and Health* All churches use the same lessons at the same time The teachings are drawn from the life and words of Jesus Christ "The starting-point of divine Science," Mrs Eddy states, "is that God, Spirit, is All-in-all, and that there is no other might nor Mind" "Spirit is immortal Truth, matter is mortal error Spirit is God, and man is his image and likeness. Therefore, man is not material, he is spiritual" All that is Eternal, indestructible, true, is real, all that is contrary to the nature of God, unreal Making application of the principle of Christian Science to all problems of human existence, its followers are working toward the salvation of mankind through the overthrowing of the temporary and unreal—evil, disease, death The healing of sin is required even more urgently than the healing of sickness To accomplish the aims in view, there must be unceasing prayer, with "the understanding of Truth and Love," and faith resting upon the assurance that no evil comes from God, who is infinite Good See *Science and Health;* Sibyl Wilbur, *Life of Mary Baker Eddy* (1929 ed)

Christiansen, Sigurd (sē'gōr krēs'tyänsŭn), 1891–1947, Norwegian novelist and dramatist. His novel *Two Living and One Dead* (1931; Eng. tr , 1932) received the grand prize in a 1931 Scandinavian competition Other books are *Our Own Life* (1917) and the drama *A Journey in the Night* (1930).

Christian socialism, term used in Great Britain and the United States for a kind of socialism growing out of the clash between Christian ideals and the effects of predatory business On the continent of Europe, it usually refers to a party or trade union directed by religious leaders in opposition to socialist unions and parties. The movement was begun in England in 1848, after the failure of Chartism Influenced by Carlyle, Southey, Coleridge, and the Fourierists, rather than by Marx, such men as John Ludlow, Frederick Denison MAURICE, and Charles KINGSLEY sought to encourage the laboring masses and the church to cooperate against ruthless capitalism They published periodicals and tracts, promoted workingmen's associations, founded (1854) a workingmen's college, and helped achieve some general reforms. Though their experiments in producers' cooperation finally failed, their traditions were carried on by the Fabian Society, by adherents of guild socialism, and by several Catholic groups The movement in the United States was organized with the formation (1889) of the Society of Christian Socialists, although there had been earlier activity, notably by Washington GLADDEN, Richard Theodore ELY, and George Davis HERRON Other church groups joined or aided the socialist movement, but within the churches the movement was concerned more with the application of social gospel to immediate industrial and social problems than with political socialism See C. E. Raven, *Christian Socialism, 1848–1854* (1920), James Dombrowski, *Early Days of Christian Socialism in America* (1935)

Christians of Saint John: see MANDAEANS

Christiansted (krĭs'chŭnstĕd"), town (pop. 4,495), on St. Croix island, a port of the VIRGIN ISLANDS OF THE UNITED STATES

Christiansund, Norway see KRISTIANSUND

Christie, Agatha (ā'gŭthu krĭ'stē), English detective-story writer Since the publication of *The Mysterious Affair at Styles* (1920), she has written many volumes, most of them featuring the same detective, Hercule Poirot Among these are *The Murder of Roger Ackrayd* (1926), famous for its unexpected ending, *Peril at End House* (1932), *Murder in the Calais Coach* (1934), *And Then There Were None* (1940), and *The Crooked House* (1949).

Christie, Sir William Henry Mahoney, 1845–1922, English astronomer. After serving under Sir George B. Airy as chief assistant at the Royal Observatory, Greenwich, from 1870, Christie succeeded him as astronomer royal in 1881 and served in that office until 1910. Under his direction a new building and improved apparatus were erected, and the work was enlarged. Important additions were the photographic and spectroscopic divisions His studies included observations of sunspots, the measurement of double stars, and observations of the planetoid Eros with the object of determining solar-system distances. His papers include several on the solar eclipses observed in Japan (1896), India (1898), and Portugal (1900). In 1875 his *Manual of Elementary Astronomy* was published.

Christie's, English firm of art auctioneers and appraisers, one of the largest clearinghouses in the world for art objects of all kinds. Since its founding in 1766 by James Christie, its name has been a symbol of luxury in the English-speaking world See M. C. Marillier, *Christie's, 1766–1925* (1926).

Christina, 1626–89, queen of Sweden, daughter and successor of Gustavus II (Gustavus Adolphus). From her father's death (1632) until 1644 she was under a regency headed by Chancellor Axel OXENSTIERNA. Her early devotion to state affairs soon gave place to other interests, especially a zeal for learning. She attracted many foreign artists and scholars—notably Descartes—to her court. On her favorites she lavished titles, lands, and money, and by the end of her reign, half of the crownlands had been given away. Her distaste for marriage caused her to designate her cousin Charles (later Charles X) as her successor. Weary of her duties and the growing unpopularity of her reign and attracted to Catholicism, Christina abdicated in 1654 She left Sweden attired as a man, was received into the Catholic Church at Innsbruck in 1655, and settled at Rome She visited Paris in 1656 and 1657 Her eccentricity and financial incompetence kept her affairs in continual disorder. On the death (1660) of Charles X, Christina returned to Sweden, she hoped to regain her throne but failed. She again went to Sweden in 1667 but was refused entrance into Stockholm because of her religion. She died in Rome and was buried at St Peter's. See biographies by F W Bain (1890), A M Harrison (1929), and Alfred Neumann (Eng. tr , 1935), M. L Goldsmith, *Christina of Sweden* (1933), a psychological study.

Christine de Pisan: see PISAN, CHRISTINE DE

Christmas [Christ's Mass], in the Christian calendar, feast of the nativity of Our Lord (Dec. 25). In liturgical importance it ranks after Easter, Pentecost, and Epiphany (Jan 6) The observance is not older than A D 200. The date was undoubtedly chosen for its nearness to Epiphany Christmas as the great popular festival of Western Europe dates from the Middle Ages In England after the Reformation the observance became a crux between Anglicans and other Protestants, and Christmas was suppressed in Scotland and not permitted in much of New England until the 19th cent The Yule log [*Yule*, from O E , = Christmas], the boar's head, the goose (in America the turkey), decoration with holly, hawthorn, and mistletoe, and the singing of carols (especially by WAITS) are all typically English (see CAROL) Gifts at Christmas are also English, elsewhere they are given at other times, as at Epiphany in Spain Christmas cards first appeared c 1846 Santa Claus first was popular in New York (see NICHOLAS, SAINT). Other American innovations are firecrackers and eggnog in the South. The Christmas tree was already a tradition in the German Middle Ages The crib (*crèche*) with the scene at Bethlehem was popularized by the Franciscans The light in the window, found widespread, probably came to America with the Irish Of the religious observances, one of the best loved is the Mass at midnight in Roman Catholic churches See ADVENT and TWELFTH NIGHT See *Book of Christmas* (ed. by H W Mabie, 1924)

Christmasberry or **toyon** (tō'yŏn), evergreen tree or shrub (*Heteromeles arbutifolia*) of the apple family, found in the Sierra Nevada Its white flowers are followed by bright red berries Also called California holly, it is used on the Pacific coast as a Christmas green.

Christmas Island (c.60 sq mi , pop 823), in the Indian Ocean, c.200 mi S of Java and belonging to the colony of Singapore The majority of the inhabitants are Chinese and Malays who work the extensive deposits of phosphate of lime

Christmas Island, largest atoll in the Pacific, area 95 sq. mi , near the equator, one of the Line Islands Discovered (1777) by Capt James Cook, it was claimed by the United States under the Guano Act (1856). In 1919 Great Britain added the island to the Gilbert and Ellice Islands colony

Christmas rose or **black hellebore** (hĕl'ŭ–), a HELLEBORE (*Helleborus niger*) popular for its evergreen leaves and often winter-blooming flowers that are chiefly white and wild-roselike It has long been used medicinally but is highly toxic

Christ of the Andes, statue of Christ commemorating a series of peace and boundary treaties between Argentina and Chile. Dedicated March 13, 1904, it stands in USPALLATA Pass, high in the Andes, on the Argentine-Chilean boundary A tablet (added in 1937) bears in Spanish the words· "Sooner shall these mountains crumble into dust than Argentines and Chileans break the peace sworn at the feet of Christ the Redeemer"

Christophe, Henri (ĭrē' krēstōf'), 1767–1820, Negro king of Haiti A freed slave, he aided TOUSSAINT L'OUVERTURE in the liberation of Haiti and was army chief under DESSALINES. He took part in the plot against the emperor and after his death (1806) was elected president of the republic. There followed a bitter and inconclusive struggle with Alexandre PÉTION, who retained control in the south In 1811 Christophe declared himself king as Henri I and entered upon an energetic but tyrannical reign, characterized by an expensive and sometimes ludicrous magnificence. Compulsory-labor laws en-

riched his kingdom. The pomp and splendor of his reign are still shown in the ruins of his great citadel of La Ferrière and the palace of Sans Souci at CAPE HAITIEN, his capital. In 1820, when he was suffering from partial paralysis, revolts broke out. In despair, Christophe committed suicide. See J. W. Vandercook, *Black Majesty* (1928).

Christopher, Saint [Gr ,=Christ bearer], 3d cent.?, martyr of Asia Minor. His characteristic legend is that one day when he was carrying a little child over a river, he felt the child's weight almost too great to bear The child was Jesus, and He carried the world in His hands Hence St Christopher is usually represented as a giant, with the Holy Child on his shoulder; he leans on a staff He is the patron of travelers, hence the popular use of his medal in automobiles Feast July 25

Christopher, city (pop 3,833), S Ill , N of Herrin, in a coal area, inc 1910

Christophsen, Pieter· see CHRISTUS, PETRUS.

Christopoulos, Athanasios (äthänē'sēŏs khrēstŏpŏō'-lŏs), 1772–1847, Greek poet and jurist, author of Anacreontic poems popular in Greece He codified the law of Walachia (Rumania), translated much from ancient into modern Greek, and composed a grammar of his language

Christ's College: see CAMBRIDGE UNIVERSITY

Christ's Hospital, originally a hospital founded in 1553 by Edward VI and housed in the monastery buildings of the Grey Friars, London It developed into a school, popularly known as the "bluecoat school" from the habit of the boys It was enlarged to include a school for girls and in 1902 was moved to Horsham, Sussex

Christ's-thorn, name for several Old World plants popularly said to have composed the crown of thorns, but most often applied to the Jerusalem thorn (*Paliurus spina-christi*), a spiny shrub or small tree with curious fruit resembling a miniature head with a wide-brimmed hat, and to a JUJUBE

Christus or **Christus, Petrus** (both pē'trŭs krĭ'stŭs), c 1400–1473, Flemish painter, known also as Pieter Christophsen (pē'tûr krĭ'stufsun), a follower and probably a pupil of the Van Eycks He became a free citizen of Bruges in 1444 and was admitted to the Guild of St Luke Among the paintings ascribed to him are the portrait of Edward Grimstone (Earl of Verulam Coll , England), *The Nativity* (National Gall of Art, Washington D C), *Pietà* (Brussels), *Deposition from the Cross* (Metropolitan Mus), and the portrait of Marco Barberigo (National Gall , London)

Christy, Edwin P., 1815–62, American showman, b Philadelphia He established c 1842 in Buffalo, N Y , a company of Negro minstrels which came to be known as Christy's Minstrels By no means the first to present this form of entertainment, Christy's company crystallized the characteristics which were expected of the minstrel show—the interlocutor, the semicircular arrangement of white performers in blackface, the end men, and the variety act For over 10 years he had great success all over the United States, and in England his minstrels had such a vogue that many English imitators appeared After he retired in 1854, the troupe continued under the direction of George N Harrington, who assumed the name Christy Some of the songs of Stephen Collins FOSTER were published with Christy as author and composer

Christy, Henry, 1810–65, British ethnologist With Edward Lartet he pioneered in the scientific exploration of the caves in the Périgord region of France His *Reliquiae Aquitanicae* (1865) gave significant impetus to the study of the Paleolithic period in Europe

Christy, Howard Chandler, 1873–, American illustrator and portrait painter, b Morgan co , Ohio, studied in New York at the National Academy of Design and the Art Students League The "Christy girl" of posters and magazine illustrations first brought him renown After 1921 he painted portraits of many celebrities His *Signing of the United States Constitution* (commissioned 1939) was hung in the Capitol in 1941

chromatic scale, in music see SCALE

chromium (krō'mēum) [New Latin from Gr ,=color], gray-white metallic element discovered by L N Vauquelin in 1797 (symbol=Cr, for physical constants, see ELEMENT, table), crystalline and very hard It is exceeded in hardness only by the elements carbon (diamond) and boron It does not tarnish in the air, but burns when heated, forming the green chromic oxide Combined with oxygen, besides yielding chromic oxide, which is used as a pigment, it forms chromic anhydride (the red trioxide and anhydride of chromic acid) With other metallic elements, e g , lead and potassium, together with oxygen, it forms the chromates and dichromates These compounds are salts of chromic acid and are used as pigments in paints, in dyeing, and in the tanning of leather Chrome yellow, a pigment, consists largely of lead chromate Other chrome colors are black, red, orange, and green In one process (chrome process) for tanning leather, a dichromate is used and chromium hydroxide, a basic compound of chromium, hydrogen, and oxygen, is precipitated and held in the leather The hydroxide is used also as a MORDANT in dyeing cloth. As a powerful agent for cleaning laboratory glassware, a mixture of potassium dichromate and sulphuric acid is used Chromium is a comparatively rare element, never occurring by itself in nature but always in compounds. Its chief source is the mineral chromite which is composed of iron, chromium, and oxygen and is found principally in Africa in Rhodesia, in the East Indies, and in the United States in California, Maryland, and Oregon The element, in the form of chromic oxide, gives the greenish tint to the emerald and the aquamarine Metallic chromium is prepared by reduction of the oxide by aluminum or by carbon It is used in PLATING other metals, because of its hardness and nontarnishing properties Its most important use is in the steel industry, where it is a constituent in several alloy steels, e g , chromium steel or chrome steel It is present sometimes as an impurity in ordinary steel It constitutes from 10 to 20 percent of stainless steel

chromosome (krō'mūsōm") [Gr ,=color body], form assumed by chromatin material of a cell nucleus during certain stages in its life In a resting cell the chromatin granules are scattered through the nucleus, but during the various stages of meiosis and MITOSIS the chromosomes appear in the form and number characteristic of the species Sometimes the chromosomes are slender filaments, at other times, e g , during the metaphase and anaphase of mitosis, they are more compact and somewhat cylindrical Chromosomes contain genes, the factors which determine the hereditary characteristics, and are therefore of primary importance in heredity, evolution, and mutation and in their controlling influence over the structural development and the multiplication of plants and animals A certain number of chromosomes is characteristic of each species of animal and plant, e g , humans have 48 chromosomes, and the fruit fly *Drosophila* has 8 Very large chromosomes found in the salivary glands of the fruit fly and some other insects furnish valuable material for study The numbers found most commonly among plants are 12, 14, 16, 18, and 24 All of these chromosome numbers are the so-called diploid numbers, i e , the numbers found in all the body cells except the sex cells Mature sex cells have, as a result of the process of meiosis or reduction division, the haploid number (one half the diploid) of chromosomes, when two sex cells unite in the process of fertilization, the number characteristic of the species is restored Determination of SEX is related to the chromosomes

chromosphere (krō'mŏs-) [Gr ,=color sphere], extensive layer or envelope of gases of slight density surrounding the body of the sun and lying outside the apparent surface of the sun, the PHOTOSPHERE At the base of the chromosphere is a layer c 100 or 200 mi thick known as the reversing layer The chromosphere, which has a thickness of from 5,000 to 7,500 mi (and during an eclipse may extend much farther) radiates a scarlet light This light, as well as that of the yet more rarefied corona extending beyond the chromosphere, is overwhelmed by the far greater brilliance of the photosphere above which they lie, until that is obscured by the moon during a total eclipse The red color is attributed to hydrogen, one of the principal gases composing the layer The other two chief components are helium and calcium Observers of total eclipses in the 18th cent noted scarlet streamers or projections fringing the rim of brightness seen around the lunar disk In 1860 these were shown to be connected with the sun, and in 1868 it became evident that they were caused by moving gases. They are called prominences and ordinarily can only be seen, even through the telescope, during total eclipse and then only along the margin of the sun A method of observing them by means of the spectroscope at any time when the sun is visible was discovered (1868) independently by P J C Janssen and Sir J N Lockyer Eruptive prominences burst from the surface of the chromosphere in great flaming jets and masses, as if caused by explosions Quiescent prominences occur on the sun's surface from one pole to the other In appearance they are cloudlike, and they often seem to remain almost unchanged for days

Chronicles or **Paralipomenon** (păr"ulĭpŏm'ĭnŏn) [Gr , =things left out], books of the Old Testament, a single work in the Hebrew canon, called 1 and 2 Chronicles in AV, where they occupy the 13th and the 14th place, and called 1 and 2 Paralipomenon in Greek versions and the Western canon The books are a history of the kingdom of David, i e , the reigns of David (1 Chron 10–29) and Solomon (2 Chron 1–9), and of the southern kingdom in its apostasies and reforms (2 Chron 10–36) They commence with a collection of genealogies (1 Chron 1–9) and end with the decree of Cyrus restoring the Jews (2 Chron 36 22–23) The historical material parallels (and supplements) part of the narrative of Samuel and Kings, but from the point of view of one who adheres strictly to the house of David and to the worship in the Temple Like Kings these books quote their sources constantly Chronicles may at first have formed one book with Ezra and Nehemiah For views of the higher criticism, see OLD TESTAMENT.

chronology: see CALENDAR and TIME.

chrysalis: see PUPA.

chrysanthemum (krĭsăn'thŭmŭm), name for a large number of annual or perennial horticultural plants of the genus *Chrysanthemum*, some cultivated in the Orient for at least 2,000 years A chrysanthemum is the floral emblem of the imperial family of Japan and, sharing the honor with the cherry blossom, the flower of Japan as well, where the highest officials are honored by orders of the chrysanthemum The Chrysanthemum Society of America encourages the culture of the plant The flower heads, mostly late blooming and of various colors except blue or purple, are composite in form and range from single daisylike to large rounded or shaggy heads Florists' varieties have been derived chiefly from the Asiatic *Chrysanthemum indicum* and *morifolium* The pyrethrum, feverfew, marguerite, and daisy belong to the same genus. See Alex Cumming, *Hardy Chrysanthemums* (1939)

Chrysaor (krĭsā'ôr) [Gr ,=gold-bearer], in Greek legend, son of Medusa and Poseidon, brother of Pegasus, and father of the monsters Echidna and Geryon

Chryseis (krĭsē'ĭs), in the *Iliad*, girl captured by Agamemnon. When ransom efforts failed, her father, the priest Chryses, appealed to Apollo, who promptly sent a plague to terrorize the Greek army, it continued until Chryseis was given up Agamemnon took BRISEIS from Achilles to replace Chryseis

chrysoberyl (krĭ'sōbĕr"ĭl) [Gr ,=golden beryl], a beryllium aluminate used as a gem It has a vitreous luster and is transparent to translucent The more valuable CAT'S EYE is a variety of chrysoberyl Another variety, alexandrite, was first discovered in the Ural Mts of Russia, on the birthday of Tsar Alexander II, for whom it was named It is remarkable in that it is green by daylight and raspberry red under artificial light It was popular in imperial Russia, both because of its association with the tsar and because red and green were the colors of the empire It is now found chiefly in Ceylon Yellow-green chrysoberyl from Ceylon and Brazil is commonly sold as CHRYSOLITE, another gem

chrysolite (krĭ'sulīt), yellowish-green to bottle-green mineral, known also, in its different varieties, as olivine and peridot The transparent chrysolite is used as a gem The name is sometimes applied to yellow-green CHRYSOBERYL

Chrysoloras, Manuel (krĭsŏlō'rŭs), c 1355–1415, Greek teacher and writer He introduced Greek literature into Florence and other Italian cities Among his works were a Greek grammar and translations of Plato and Homer

chrysoprase (krĭ'sŭprāz) [Gr ,=golden leek], apple-green variety of CHALCEDONY, used as a gem The color is caused by the presence of nickel oxide Silesia was long the chief source of chrysoprase More recently it has been obtained in California and Oregon

Chrysorrhoas see JOHN OF DAMASCUS, SAINT

Chrysostom· see JOHN CHRYSOSTOM, SAINT

Chuang-tze (chōōäng'-tsä'), fl 4th cent B C , Chinese philosopher He was a follower of Lao-tsu, whose doctrines he expounded in an original way with remarkable skill and charm An idealist and mystic, he opposed the more utilitarian teaching of Confucius Only 33 chapters of his work are preserved, and some of these are probably spurious His book is nevertheless one of the rarest of Chinese classics See TAOISM

Chub (chŭb), an African people Ezek 30 5 This may be a textual error for Lub (i e , LUBIM)

Chubut (chōōbōōt'), river, c 500 mi long, rising in the Andes of S Argentina and flowing E across Chubut territory to the Atlantic It is not navigable, but is used for irrigation

chuck-will's-widow, bird of the S United States allied to the nighthawk and the whippoorwill Its call has the sound of its name

Chufut-Kale (chōōfōōt'-kälyĕ') [Turkish, =Jews' city], ruined fortress and town, RSFSR, near Bakhchisarai, in S Crimea It was until the 18th cent the center of the Jewish sect of KARAITES Jewish inscriptions date back to 1203, and it is supposed that the region was the last refuge of the Crimean KHAZARS

Chugach Mountains (chōō'găk), continuation of the St Elias Mts , S Alaska, rising to more than 13,000 ft They border the north shore of Prince William Sound The Richardson Highway crosses them

Chukchi Peninsula (chōōk'chē), Rus *Chukotski Poluostrov* (chōōkōt'skĕ pŭlōōô'strŭf), northeastern extremity of Asia, Khabarovsk Territory, RSFSR, in NE Siberia, at the eastern end of the Anadyr range The name also occurs as Chukotsk It terminates in EAST CAPE It is included in the **Chukchi National Okrug** (274,520 sq mi , pop c 20,000), formed in 1930 The inhabitants are largely Chukchis, of the Hyperborean linguistic family (see LANGUAGE, table), with some Eskimo The area has tundra vegetation, and the means of livelihood are reindeer raising, fishing, and hunting for fur Coal is mined on the Anadyr Gulf.

Chu-kiang or **Chu-kong.** see CANTON, river.

Chukotsk: see CHUKCHI PENINSULA

Chulalongkorn (chōō'lälông'kôrn) or **Rama V** (rä'mä), 1853–1910, king of Siam (1868–1910) Educated in part by an English governess and an English tutor, he greatly advanced the Westernization of Siam begun by his father, King Mongkut He departed from tradition by traveling abroad—to Singapore, Java, and India in 1871and to Europe in 1897 He abolished slavery, simplified court etiquette, initiated the practice of sending young Siamese abroad for training, set up schools, reorganized the administration of justice, laid the foundations of a sound financial policy, and built public works He also was responsible for the centralization of Siamese administration that checked the independence of the hereditary provincial chieftains (1892) The total effect of Chulalongkorn's reforms and of the foreign policy he directed was to preserve Siam as an independent state at a time when the rest of SE Asia was falling subject to France and Great Britain

Chula Vista (chōō'lä), city (1940 pop 5,138, 1944 special census pop 11,081), S Calif , S of San Diego on San Diego Bay, inc 1911 The region produces citrus fruits, vegetables, and poultry

Chulym (chōōlĭm'), river, c 1,000 mi long, Krasnoyarsk Territory, RSFSR, in central Siberia It rises in the Kuznetski Ala-Tau at 6,500 ft and flows N and W into the Ob Its lower course is navigable Another Chulym river, 140 mi long, in SW Siberia, feeds Lake CHANY

Chumashan Indians (chōō'măshŭn), North American Indian group, formerly on the Pacific coast about Santa Barbara, Calif , and on the neighboring islands Their canoes were unique in the area, and their sea culture brought them prosperity Spanish missions were established among them in the late 18th cent Their deliberately practiced abortion added to the usual causes of decline under white rule, and they are now extinct except for a few of mixed blood They were sometimes called the Santa Barbara Indians See HOKAN.

Chun (kŭn), in the Bible see BEROTHAI

Chungjin, Korea, see CHONGJIN

Chungking (chōōng'king'), Mandarin *Ch'ung-ch'ing*, city (pop 1,000,101), in, but independent of, Szechwan prov , SW China, at the junction of the Kialing with the Yangtze river The commercial center of W China, it commands a large river trade Chungking was opened as a TREATY PORT in 1891 In Nov , 1938, just before the Japanese capture of Nanking in the Second World War, the capital of China was transferred to Chungking and remained there until the end of hostilities

Chuquicamata (chōō'kēkämä'tä), town (pop c 15,000), N Chile, on the western slopes of the Andes. At an elevation of 10,000 ft , Chuquicamata has the world's largest copper mines

Chuquisaca: see SUCRE, Bolivia

Chur (kōōr, Ger kōōr), Fr *Coire* (kwär), town (pop 17,060), capital of Grisons canton, Switzerland, on the Plessur river A Roman settlement (Curia Rhaetorum), it very early became an episcopal see The temporal power of its prince-bishops was limited c 1464 and ended altogether when the Reformation was accepted (1524–26) Outstanding buildings are a restored 8th-century church, the episcopal court, the cathedral (12th–13th cent), and the Rhaetian museum The town produces foodstuffs and metal goods The people are mainly German-speaking and Protestant

Church, Sir Arthur Herbert, 1834–1915, English chemist He was professor of chemistry (1879–1911) at the Royal Academy of Arts The mineral churchite, which he discovered, was named for him

Church, Benjamin, 1639–1718, New England colonial soldier in King Philip's War, b Plymouth He took a leading part in the Great Swamp Fight (Dec , 1675), W of Kingston, R I , and finally hunted PHILIP to death in Aug , 1676

Church, Frederick Edwin, 1826–1900, American landscape painter of the Hudson River school, b Hartford, Conn , studied with Thomas Cole at Catskill, N Y He traveled and painted in North and South America and Europe and excelled in panoramic scenes Church is represented in the Metropolitan Museum, the New York Public Library, the National Academy of Design, New York, and the Corcoran Gallery His *Niagara* (Corcoran Gall) is characteristic

Church, Frederick Stuart, 1842–1923, American painter, illustrator, and etcher, b Grand Rapids, Mich., studied at the National Academy of Design, New York. He first made a reputation with his illustrations and drawings of animals for *Harper's Magazine* As a painter he is best known for his decorative water colors such as *Moonrise* (Metropolitan Mus.).

Church, George Earl, 1835–1910, American civil engineer and explorer, b New Bedford, Mass. He helped build the Madeira-Mamoré RR on the Bolivia-Brazil boundary and spent many years exploring the Amazon He is the author of *Aborigines of South America* (1912)

Church, Sir Richard, 1784–1873, British army officer He fought with Greek troops in the Ionian Islands (1812–15), served as general in the Neapolitan army (1820), and in 1827 was made generalissimo of the Greek insurgents in the Greek War of Independence. He subsequently took part in the politics of Greece, where he died

Church, Richard William, 1815–90, English clergyman and author Born in Lisbon, Church spent his youth in S Europe and was educated at Oxford, where he became a follower of J H Newman and a friend of H P Liddon As dean of St Paul's (1871–90) he did much to disseminate High Church doctrine His *History of the Oxford Movement* (1851) was long the authoritative work on the subject See his life and letters (ed by his daughter, 1894).

Church [probably Gr ,=divine], aggregation of Christian believers The traditional belief concerning the Church held by Roman Catholics, Orthodox, and some others is that it is the community of believers, living and dead, headed by Jesus Christ, who founded it in the apostles This is the doctrine of the mystical body of Christ (Eph. 1 22–23) A famous division speaks of the church militant (the living), the church suffering (the dead in purgatory), and the church triumphant (the saints of heaven) The visible Church (i e , the society of the living) is said to be recognizable by four marks (as in the Nicene Creed) it is one (united), holy (producing holy lives), catholic (universal, supranational), and apostolic (having continuity with the apostles) In the old churches crucial importance attaches to the unbroken tradition, as handed down in purity through the help of the Holy Ghost, with the doctrine goes the apostolic power to administer grace through the sacraments (see SACRAMENT) The men of the Reformation rejected the idea that the Holy Ghost was protecting the Roman Catholic Church In fact, they swept away all the tradition but the Bible, from which they sought to discern the primitive state of Christianity, in order to reconstruct it Among Protestants, when the term is not referring to a certain denomination, "the Church" usually means the generality of believers in Christ See CATHOLIC CHURCH, CHRISTIANITY, ORTHODOX EASTERN CHURCH, PROTESTANTISM, ROMAN CATHOLIC CHURCH

church, in architecture, a building for Christian worship The earliest churches date from the late 3d cent , before that Christians, because of persecutions, worshiped in secret, especially in private homes In Rome and some other cities Christians worshiped at the martyrs' tombs in the underground cemeteries, or CATACOMBS The catacomb chapel influenced the furnishing of churches somewhat, but not the shape of the buildings In the West the normal type was the basilica, in the East this gave way to the square church of BYZANTINE ARCHITECTURE In all the Eastern churches the Byzantine style has prevailed The interior of the Eastern church is characterized by an image screen (*iconostasis*) rendering the sanctuary invisible to the lay worshipers, except that the ALTAR may be seen through the doors of the screen In the West, ramifications of the basilica developed in ROMANESQUE ARCHITECTURE and in GOTHIC ARCHITECTURE, which has been revived in the 20th cent The BAROQUE architecture was important in the 16th and 17th cent In America, Colonial architecture developed an especially beautiful type of church Churches differ in importance according to their constitution and the importance of their clergy The CATHEDRAL is the bishop's church, the ordinary church is that of the parish See also CHAPEL, ABBEY, articles on various important churches

Church and state The existence among the same Christian people of two institutions both claiming the people's loyalty seems bound to develop friction, especially when the spheres in which each claims loyalty overlap In the United States there is a minimum of friction between Church and state because of the sedulous avoidance of any but secular considerations in public life and because of the anxiety of the churches to escape conflict, yet the Society of Friends (Quakers) ignores the claims of the state when it makes war, and some of the more evangelistic sects have got into difficulty with state authorities concerning health regulations There have been several phases in the relationship between the Christian Church and the state. The uncompromising refusal of the Christians to accord the Roman emperor divine honors was the chief cause of the imperial persecutions of the Church The Church, if kept underground by the persecutions, had the satisfaction of maintaining sole control over itself This liberty it maintained for some time after CONSTANTINE I gave the Church official status, but during the 4th cent the emperor began to become more and more important in religious affairs In the East this tendency had its fruit in the 6th cent in Justinian, who was ruler of Church and state equally The ORTHODOX EASTERN CHURCH in the Byzantine Empire was thereafter in confirmed subservience to the wishes of the state. This domination of state over Church is called Erastianism after the theologian ERASTUS. When the empire began to fall apart, the power of the state in the Church declined; under the Ottoman sultans the patriarchs of Constantinople were given political power over the laymen of their churches. This delegation of political powers by the Sublime Porte to the religious heads of Christian groups is unique in the history of Christianity. In Russia the Orthodox Church was quite dominated by the state. In the West different factors were in play. After 400 there was no central imperial power in the West, but there was a central ecclesiastical power, the see of Rome, which had claimed primacy from the earliest times and had generally been accorded obedience by Western Europe at least since 300. The barbarian invasions and the ensuing anarchy resulted in the tremendous growth of power of the PAPACY. With the appearance of strong political powers in Europe, particularly the HOLY ROMAN EMPIRE and the kingdom of FRANCE, a struggle ensued between the papacy and the temporal rulers, complicated by the fact that the pope was also a temporal ruler himself The principal subject of contention was INVESTITURE, but underlying it was the violent disagreement as to the proper distribution of power, theories ranged from the belief that emperor or king, as ruling by divine right, should control Church as well as state (a theory sometimes called caesaropapism) to the belief that the pope, as vicar of God on earth, should have the right of supervision over the state The centuries-long struggle was high-lighted by such bitter conflicts as those of Pope Gregory VII against Emperor Henry IV, Pope Innocent III against Emperor Frederick II and King Philip II of France, and Pope Boniface VIII against King Philip IV of France The conflict of GUELPHS AND GHIBELLINES was in its beginning simply a part of the imperial-papal opposition The nearest the papacy ever came to Erastianism was in the Babylonian captivity of the popes at Avignon, beginning with CLEMENT V, during which the popes were virtually at the beck and call of the French king After the return of the papacy to Rome the pope generally maintained independence of temporal powers, though on occasion was either influenced or coerced by king or emperor The contest in England was perhaps no less bitter than on the Continent, but it was more sporadic LANFRANC and ANSELM contended against King WILLIAM II, St THOMAS À BECKET against HENRY II The REFORMATION introduced a great number of complicated factors into the situation of Church and state, especially by the multiplication of sects Different solutions have been found, few of them satisfactory to all In many countries a system of state financial aid to all churches but establishment of none was developed (as in modern Germany) Elsewhere particular churches were established by the state The most extreme form of Erastianism is to be seen in the Church of England (see ENGLAND, CHURCH OF) in which the king is supreme head of the Church It is notable that though some English dissenters wished to end the Established Church, most wished instead to capture it, and disestablishment was not one of the aims of the PURITAN REVOLUTION After the Stuart monarchs were restored in 1660, measures were taken against dissenters, but gradually the state took less and less interest in supervising the Church The connection is, however, still very real, e g , revisions of the BOOK OF COMMON PRAYER must be approved by the House of Commons John CALVIN tended to a view contrary to that of the reforming English monarchs, in Geneva he set up a virtual theocracy with the state subordinate to the Church The Presbyterian churches have, therefore, maintained a stand for freedom of the Church, and the Church of Scotland (see SCOTLAND, CHURCH OF) is much less under state control than is the Church of England The Presbyterians in the British North American colonies helped in the struggle against the institution of an established church, particularly in Virginia More important, however, was the broad principle of religious toleration forwarded by Roger WILLIAMS and others This principle fitted the heterogeneity of the colonies, where the possibility of removing to free lands elsewhere enabled a settler to exert his religious independence This principle ultimately triumphed against both the virtual theocracy of the New England Puritans and the conservative Established Church of the Southern colonists The American idea of separation of Church and state emerged—complete noninterference on both sides Therefore today even slight, local, and unofficial influence of a church in affairs of state causes in the United States a tremendous outcry, as does the attempt of a state to suppress religious schools. The regulations of a municipality interfering with the full rights of evangelists to proselytize become a matter of importance In Europe and in Latin America the concept of separation of Church and state is different, particularly in predominantly Catholic countries The wars of the Reformation produced in the Peace of Augsburg a formula of *cujus regio, cujus religio* [whoever has the rule determines the religion of a state], thus, the people under a prince had willy-nilly the religion of the prince. This compromise, curiously contrary to the idea of a universal Christian Church, even more curiously corresponded to the principle practiced in Asia (e.g., the Buddhism of Asoka) It more or less prevailed in Europe after the Thirty Years War and the Peace of Westphalia (1648). Religion thus in a certain sense became a national affair, par-

ticularly in Protestant countries. The internationalism of the Roman Catholic Church, however, prevented nationalization in Catholic countries, despite such movements as GALLICANISM in France. The Church, when recognized as the state church, exercised considerable influence on the government of the state More important, perhaps, was the fact that the Church and its religious orders owned much property and exerted considerable economic influence The CONCORDAT was used as a means of regulating the relation of Church and state and delimiting the spheres of respective influence. Of the modern concordats perhaps the most famous was Napoleon's Concordat of 1801 The opponents of clerical influence in the state, the anticlericals, in the 19th cent agitated for the removal of clerical influence To them the separation of Church and state meant the ending of the establishment of the Church and complete noninterference of the Church in affairs of state but not noninterference of the state in such matters as church property and religious education The clerical parties, on the other hand, fought to maintain establishment and property and (to some extent) the enforcement of ecclesiastical law by the civil arm One of the most bitter of these contests took place in France, where ultimately the anticlericals triumphed, notably in the *Lois des associations* (1905), which in effect placed the Church under subjection to the state The contests were also bitter in Latin America, particularly in Mexico, where the Church wielded an enormous influence This struggle led under Plutarco E Calles to the practical abolition of the Church in Mexico and the harrying of priests in the 1920s, since that time adjustments have been made, tending to an approximation of the complete noninterference rule prevalent in the United States In Germany the relations of Church and state reached a crucial point in the KULTURKAMPF of Otto von BISMARCK Adolf Hitler, though he signed a concordat, undertook to reduce both Catholic and Protestant churches to instruments of the National Socialist government In Italy, the LATERAN TREATY, agreed to by PIUS XI in 1929, ended the so-called Roman Question and secured recognition of the pope as a sovereign apart from the Italian government In the USSR the hostility of Karl MARX to religion in any form has had great influence, and particularly in the early days of the Soviet Union the Communist party fostered much antireligious propaganda A large percentage of the churches were closed The Constitution of 1936, however, guaranteed freedom of religious worship, and the Russian Orthodox Church has been revived In practice, this seems to be the limit of religious toleration, since practically all other Christian churches have been abolished Allegedly the Russian Church is under strong state influence The patterns of relation between Church and state are thus a living issue in today's society, and the final settlement rests upon the strength of Christian churches today and the strength of antireligious movements

Churches of Christ, conservative body of Protestant Christians with polity and doctrine similar to that of the DISCIPLES OF CHRIST, from which body they gradually withdrew They were first listed as a separate group in the U S census of religious bodies of 1906

Churches of God in North America, evangelical and orthodox Christian bodies, Arminian in faith, with certain Baptist doctrines Each local church has a council consisting of the pastor and of elders elected by the congregation Baptism by immersion and the Lord's Supper, with the attendant ceremony of foot washing, are the principal ordinances The Bible is the sole rule of faith and practice The movement originated during revivals held by John WINEBRENNER, of Harrisburg, Pa Opposition to his evangelistic methods led to his eventual exclusion in 1828 from the German Reformed Church In 1830 the General Eldership of the Church of God was organized by the independent congregations of Winebrenner's founding Later this became the General Eldership of the Churches of God in North America Originally in Maryland and Pennsylvania, the churches are now found elsewhere in the United States

Churchill, Charles, 1731–64, English poet and satirist. He took orders but soon gave up his curacy. His first poem, *The Rosciad* (1761), an immediate success, is a satire on the leading actors and actresses of the day, it remains his best work His other works include *An Epistle to William Hogarth* (1763), attacking Hogarth for his heartless portrait of John Wilkes, *Gotham* (1764), and many contributions to Wilkes's *North Briton* See W H Miner, *Charles Churchill, Vagabond Poet* (1907)

Churchill, John: see MARLBOROUGH, JOHN CHURCHILL, 1ST DUKE OF.

Churchill, Lord Randolph Henry Spencer, 1849–95, British statesman; son of John Churchill, 7th duke of Marlborough He entered the House of Commons as a Conservative in 1874 and there sought to create a democratic Tory party which would ask social and political reforms While he was secretary for Burma (1885–86), Burma was annexed. In 1886 he was chancellor of the exchequer and leader in the House of Commons, but resigned unexpectedly within a few months because he opposed high military expenditures and thereafter played only a minor part in politics. His wife, the American Jennie Jerome, whom he married in 1874, was a leader in London society. She was the author of *Reminiscences* (1908) and two plays, *Borrowed Plumes* (1909) and *The Bill* (1912) She died in 1921 See biography of Lord Randolph Churchill by their son, Winston L S Churchill (2d ed , 1907), René Kraus, *Young Lady Randolph* (1943)

Churchill, Winston, 1871–1947, American novelist, b St Louis, grad Annapolis, 1894 He wrote several popular historical novels, *Richard Carvel* (1899), concerning the American Revolution, *The Crisis* (1901), of the Civil War, and *The Crossing* (1904), of the Kentucky pioneers Later books reflect the interest in social problems which he showed as a member of the New Hampshire legislature in 1903 and 1905 and in his attacks on political bosses—*Coniston* (1906), *A Modern Chronicle* (1910), *The Inside of the Cup* (1913), *A Far Country* (1915), and *The Dwelling Place of Light* (1917) *The Uncharted Way* (1940), his last work, is a study of Christianity

Churchill, Winston Leonard Spencer, 1874–, British statesman, soldier, and author, son of Lord Randolph CHURCHILL Educated at Harrow and Sandhurst, he first saw active military service for the Spanish in Cuba in 1895 After two campaigns in the North-West Frontier Prov in India, he fought in 1898 at the battle of Omdurman, in the Sudan, under Kitchener While correspondent for the London *Morning Post* in the South African War, he was captured by the Boers and, escaping from Pretoria, became a combatant officer He was elected to Parliament as a Conservative in 1900 In 1906, having transferred his allegiance to the Liberal party, he was appointed under secretary for the colonies in the cabinet of Sir Henry Campbell-Bannerman He was president of the Board of Trade (1908–10), home secretary (1910–11), and first lord of the admiralty (1911–15) when the First World War broke out He accompanied a naval force in an ineffectual attempt to save Antwerp from the Germans Discredited by the failure of the Dardanelles campaign, which he had championed, he lost his cabinet post and served for a time with the army in France, but he returned to power in the government under David Lloyd George, serving as minister of munitions (1917) and secretary of state for war and for air (1918–21) Again as a Conservative he served as colonial secretary (1921) and, after two defeats at the polls, returned to the House of Commons and served (1924–29) as chancellor of the exchequer He held no cabinet position for the following 10 years, but his influence as a constant opponent of the "appeasement" of Germany forced Neville CHAMBERLAIN to appoint him (Sept 3, 1939) first lord of the admiralty on the outbreak of the Second World War The following May, when Chamberlain was forced to resign, Churchill became prime minister, undertaking the task, in one of his stirring speeches, with a promise only of "blood, toil, tears, and sweat" His position was threatened after the setbacks of 1941 and 1942, but he maintained the loyalty of the British people and became the symbol of their dogged resistance He met President Roosevelt at sea (see ATLANTIC CHARTER) before the entry of the United States into the war, twice addressed the U S Congress (Dec , 1941, May, 1942), twice went to Moscow (Aug , 1942, May, 1944), visited various battle fronts, and attended a long series of international conferences (see CASABLANCA CONFERENCE, QUEBEC CONFERENCE, CAIRO CONFERENCE, YALTA CONFERENCE, TEHERAN CONFERENCE, POTSDAM CONFERENCE) The nation supported the vigorous program of his coalition cabinet until after the surrender of Germany in May, 1945, when he reconstituted his cabinet without Labour party representatives and called for general elections in July Churchill maintained his popularity despite his pre-war reputation of antilabor sentiment but the Conservative party and its "slow" policies were roundly rejected at the polls Churchill returned from the Potsdam Conference, resigned as prime minister in favor of Clement Attlee, and became leader of the opposition in the House of Commons In 1946, on a visit to the United States, Churchill made a controversial speech at Westminster College, Fulton, Mo , suggesting a close fraternal alliance between the United States and England and decrying the expansive tendencies of the USSR Thereafter in England and on the Continent he called for a union of Western Europe His Conservative party showed increased strength at the polls in the general election of Feb , 1950, but failed narrowly to secure a majority He is a prolific writer. Among his more important early books are *Lord Randolph Churchill* (1906), *Roving Commission: My Early Life* (1930), and his thorough biography of his ancestor, *Marlborough* (4 vols , 1933–38). *World Crisis* (4 vols., 1923–29) is his story of the First World War The series is continued in volumes with the general title *The Second World War* and the subtitles *The Gathering Storm* (1948), *Their Finest Hour* (1949), and *The Grand Alliance* (1950) *Blood, Sweat, and Tears* (1941) is one of a number of volumes of collected speeches He also wrote *Painting as a Pastime* (1950) See biographies by René Kraus (1940), Philip Guedalla (1942), Lewis Broad (1945), and E C Wingfield-Stratford (1948)

Churchill, Man see CHURCHILL, river

Churchill, river issuing from Methy Lake, NW Sask , and flowing c 1,000 mi SE, E, and NE across N Saskatchewan and N Manitoba to Hudson Bay at Churchill Known to the natives as the Missinipi, the river courses through a wilderness region and traverses many lakes, among them Peter Pond, Churchill, and Snake in Saskatchewan and Granville and Southern Indian in Manitoba A famous route in fur-trade days, the Churchill was discovered in 1619 by Jens Munck, a Scandinavian sent out by Christian IV to hunt for the Northwest Passage He sailed up its estuary a few miles and planted cannon there At that spot the Hudson's Bay Company attempted in 1689 to found a trading post, and Henry Kelsey sought for Indian trade in the near-by barren grounds, but the fort was destroyed by fire during its construction, and the company abandoned its undertaking It was not until 1717 that the post was refounded by James Knight, Hudson's Bay Company governor of the Hudson Bay area Called Fort Churchill for the river, which was named for John Churchill (better known to history as the duke of Marlborough), the post soon came to be known as Fort Prince of Wales It was abandoned shortly after 1732, when the Hudson's Bay Company began construction (at the west side of the entrance to the Churchill river) of a massive stone fort, mounting 40 cannon, which was long the British stronghold of the region, though it was captured by the French under La Pérouse and held for a short time in 1782 After its return by the French the name Fort Churchill was permanently attached to the post, whose ruins are preserved in a national historic park Exploration of the upper reaches of the river was carried on by the Frobishers Peter Pond, and Alexander Henry, all of the North West Company The modern port of **Churchill,** at the mouth of the river on Hudson Bay, was selected (1927) as the terminus of the Hudson Bay Railway, and the line was completed in 1929 Here in the short summer navigation season, grain is shipped abroad The village is also the site of a military post, which tests Canadian army equipment under extreme cold-weather conditions See William McInnes *The Basins of Nelson and Churchill Rivers* (1913), *The Founding of Churchill* (the journal of James Knight, ed by J F Kenney, 1932)

Churchill Downs see LOUISVILLE, Ky

church music, music intended for performance as a part of services of worship For the forms which it includes, see ANTHEM, ANTIPHON, CANTATA, CAROL, CHANT, CHORALE, HYMN, MASS, MOTET, ORATORIO, PLAIN SONG See Edward Dickinson, *Music in the History of the Western Church* (1902), A T Davison, *Protestant Church Music in America* (1933), H W Davies and Harvey Grace, *Music and Worship* (1935), Winfred Douglas, *Church Music in History and Practice* (1937), J N Ashton, *Music and Worship* (1943), C H Phillips, *The Singing Church* (1945), E H Fellowes, *English Cathedral Music* (rev ed , 1946)

Church Point, town (pop 1,892), SW La , W of Baton Rouge, in rice-growing country

Churchyard, Thomas, 1520?–1604, English poet and miscellaneous writer In his youth he served the earl of Surrey, later took part in wars in Scotland and Ireland and on the Continent, and vainly sought preferment at court His works include various pieces in *A Mirrour for Magistrates* (2d quarto, 1563), *Wofull Warres in Flaundres* (1578), *A Generall Rehearsal of Warres* (1579), and *The Worthiness of Wales* (1587).

churn see BUTTER

Churriguera, José (chûr"ĭgär'ə, hōsā' chōōr-rēgā'rə), 1650–1725, Spanish architect and sculptor, foremost designer of the late Spanish baroque period A native of Salamanca, he went to Madrid in 1688 and won fame by his design of the great catafalque for Queen Maria Luisa His important architectural works include a portal of the Church of Santo Gayetano and the palace of Don Juan de Goyeneche, he also executed various altars and other works of sculpture Associated with him were his sons Geronimo and Nicolas The term **Churrigueresque** (chûr"ĭgurĕsk') describes the architecture of the late 17th and early 18th cent in Spain, marked by extravagance of design and capricious use of Renaissance motives, the architects of the period, which owes its name to Churriguera, used architectural forms to produce free and theatrical contrasts of line and surface with extreme richness and exuberance The façade of the cathedral at Murcia illustrates the style's full expression The Churrigueresque manner was an important influence on the Spanish colonial work in the SW United States and in Mexico, where the mission

buildings are frequently naïve examples of that style, much modified by lack of trained workmen.

Churubusco (chōōrōōbōōs'kō), residential town (pop 1,122), Whitley co., NE Ind., NNW of Fort Wayne

Churubusco, battle: see CONTRERAS

Chusan Archipelago (chōō'sän'), Mandarin *Choushan*, NE Chekiang prov., China, in the China Sea, named after the largest island in the group. The chief commercial activity is fishing. The best known of the islands is Puto or P'u-t'o, a sacred center of Buddhism, with many ancient temples

Chushan-rishathaim (kŭ'shän-rĭshŭthā'ĭm), Mesopotamian king, conqueror and oppressor of Israel. Judges 3 8–10

Chusovaya (chōōsŭvē'ŭ, chōōsō'vĭŭ), river, c 480 mi long, rising in the central Urals, RSFSR, and flowing northwest through a major industrial region to join the Kama at Molotov (Perm). It is navigable for c.250 mi

Chu Teh (jōō' dŭ'), 1886?–, Chinese Communist soldier. He was graduated (1911) from the Yünnan military academy and served in various positions with armies loyal to Sun Yat-sen. Chu's interest in Communism was first aroused in 1921. He was sent by his party to Germany, where he studied (1922–26) military tactics. In 1927, when Chiang Kai-shek purged the Communists from the Kuomintang, Chu led an uprising in Nanchang and fled with troops to S Kiangsi prov. He joined forces there with MAO TSE-TUNG. When the Communist position became untenable, Chu led his troops (1935–36) on the "long march" to Shensi and Shansi provs. In the Second Chino-Japanese War he was commander in chief of all Communist forces, a position he retained after the establishment (Sept., 1949) of the People's Republic of China in Peiping.

Chuvash Autonomous Soviet Socialist Republic (chōōväsh'), autonomous republic (7,100 sq mi., pop 1,077,614), E European RSFSR, in the middle Volga valley. Cheboksary, the capital, and Alatyr are the main cities. With a humid continental climate, it is chiefly agricultural. There also are extensive forests. The population consists of the Chuvash (80 percent), Russians (16 percent), Mordvinians, and Tatars. The Chuvash are a people of Finnic language and of Russian Orthodox religion. They were dominated by the Eastern BULGARS (8th–10th cent.) and by the Golden Horde (13th–15th cent.) and were colonized by the Russians in the 16th cent. The autonomous republic was created in 1925.

Chuzenji (chōōzān'jē), mountain lake, central Honshu, Japan, near Nikko. It is noted for its scenic beauty and its ancient Buddhist temple

Chuzu (kŭ'zu), steward of Herod Antipas. Luke 8 3.

Cialdini, Enrico (ānrē'kō chäldē'nē), 1811–92, Italian general and diplomat. In Sardinian service, he fought in the campaigns of 1848–49 and 1859 against Austria and, invading the Papal States in 1860, won at Castelfidardo. He led the siege of Gaeta and, after the surrender of Francis II of Naples in 1861, was made duke of Gaeta. Cialdini was civil and military commissioner of the former kingdom of Naples (1861–62), became a senator (1864), fought in Venetia (1866), and was ambassador to France (1876–81) until his retirement.

Ciano, Galeazzo (gälāät'tsō chä'nō), 1903–44, Italian politician and Fascist leader, son of Admiral Costanzo Ciano, who was created count of Cortellazzo. He entered on a diplomatic career after marrying Mussolini's daughter Edda (1930), Count Ciano quickly rose to prominence and became foreign minister in 1936. He helped to create the Rome-Berlin Axis and the military pact with Germany and was in part responsible for the attack on Greece in 1940. In 1943 he was dismissed and made ambassador to the Vatican. Ciano voted against Mussolini at the meeting of the Fascist Grand Council which was followed by Mussolini's fall (1943). He was arrested by the Germans, transferred to the Fascist authorities in N Italy, convicted of high treason, and executed. His diaries, first published in an American periodical in 1945, are a remarkable document of the Fascist era.

Cibber or **Cibert, Caius Gabriel** (both sĭ'bûr), 1630–1700, Danish-English sculptor. Son of the king's cabinetmaker, he was appointed carver to the king's closet for his services to William of Orange. He is best known for his statues *Melancholy* and *Raving Madness*, both in London. He also executed sculptures (destroyed) for the Royal Exchange and other works now at Chatsworth.

Cibber, Colley, 1671–1757, English actor and playwright, son of Caius Gabriel Cibber. In 1690 he joined the company at the Theatre Royal. A failure in tragedy, Cibber had success in comic roles (1692–94) and later was a leading actor of eccentric characters (1697–1732). His first play, *Love's Last Shift* (1696), is a landmark in the history of the theater and is regarded as the first sentimental comedy. Of his 30 dramas, *She Wou'd and She Wou'd Not* (1702), *The Careless Husband* (1704), and *The Nonjuror* (1717) are the most notable. From 1710 to 1740 he was manager of Drury Lane. He was appointed poet laureate in 1730 and was bitterly attacked by Pope, who made him the hero of the final version of *The Dunciad*. Cibber's *Apology* (1740) is a mine of information about the theater of this period. See R. H. Barker, *Mr. Cibber of Drury Lane* (1939). His son, **Theophilus Cibber,** 1703–58, was an actor, playing at the Haymarket and other theaters. He excelled as Pistol in *Henry IV* and appeared in many of his father's plays. The wife of Theophilus, **Susannah Maria (Arne) Cibber,** 1714–66, an actress and singer, sister of the composer Thomas Augustine Arne, sang in opera and appeared with great success in tragic roles. She played such Shaksperian characters as Lady Macbeth, Desdemona, and Ophelia and was Juliet to Spranger Barry's Romeo in a theatrical duel with Garrick and George Anne Bellamy. She was a favorite of Handel, who wrote for her the contralto arias in his *Messiah* and the part of Micah in *Samson*. She is buried in Westminster Abbey.

Cibola: see MARCOS DE NIZA and CORONADO, FRANCISCO VÁSQUEZ DE.

cicada (sĭkā'dŭ, sĭkä'dŭ), name for a homopterous insect with a wide, blunt head, prominent eyes, a rather large body, and two pairs of membranous wings. A widely known species is the periodical or 17-year (13-year in the South) cicada, often miscalled locust. Eggs are laid in twigs of trees which are punctured and sometimes seriously damaged in the process. In about six weeks the nymph hatches and buries itself in the ground where it feeds, for the number of years characteristic of the species, on the sap of roots. At the end of this period it digs its way out of the ground and sheds its skin, emerging as an adult which lives for a few weeks. Different broods mature at regular intervals so that one or more appear somewhere in the United States nearly every year. The dog-day cicada, or harvest fly, is also a common North American species. Male cicadas have a shrill song produced by the vibration of membranes near the abdomen

cicely: see SWEET CICELY.

Cicero (Marcus Tullius Cicero) (sĭ'sûrō) or **Tully,** 106 B.C.–43 B.C., greatest Roman orator, famous also as a politician and a philosopher. He studied law and philosophy at Rome, Athens, and Rhodes, one of his teachers was Molon. He was curule aedile (69 B.C.), praetor (66 B.C.), and consul (63 B.C.). He was always a member of the senatorial party, and as party leader he prosecuted CATILINE in his consulship. Cicero was entirely successful in his process, but later he was unable to prove that he had legal sanction to execute five members of Catiline's group, and on the charge of illegality he was in 58 B.C. exiled by his personal enemy, CLODIUS. He was recalled by Pompey the next year and was hailed as a hero. Strongly opposed to Julius CAESAR, Cicero was a leader of the party that threatened Caesar and caused him to convene (56 B.C.) the triumvirate at Lucca. In 51 B.C. he was governor of Cilicia, and on his return he joined Pompey against Caesar. Caesar received Cicero well after the civil war, and Cicero lived in honor at Rome under the dictatorship. He was not privy to the assassination, but he applauded it. He and Marc ANTONY bitterly hated each other, and Antony attacked him in the senate. Cicero replied in the *First Philippic* and the *Second Philippic* and sought to re-create the republic. When Octavian (later AUGUSTUS) took Rome, he allowed Antony to put Cicero's name among the proscriptions, and Cicero was put to death on Dec. 7, 43 B.C. To the modern reader probably the most interesting of Cicero's voluminous writings are his letters to Atticus, his best friend, to Quintus, his brother, to Brutus, the conspirator, to Caelius, another dear friend, and to miscellaneous persons. They reveal to us more of Roman life and political manners of the period than does any other source. His philosophical works, which make him appear more or less of a Stoic, include *De amicitia* [on friendship], his most delightful treatise, *De officiis* [on duty], a Stoic ethical essay; *De senectute* [on old age] or *Cato Major*, a dialogue in which Cato praises and discourses on age; *De finibus* [on ends], a dialogue on the good, *The Tusculan Disputations*, a Stoic treatise, and *De deorum natura* [on the nature of the gods], an attack on various philosophies, especially Epicureanism. His rhetorical works are of less general interest. *De oratore*, addressed to his brother, is a kind of handbook for the young orator, *Brutus* is an account of Roman oratory, and *Orator* is a discussion of the ideal orator. The most widely read of Cicero's works are his orations, which have become the standard of Latin. The most famous of these are the *Orations against Catiline*, on the occasion of the conspiracy, and the *Philippics* against Antony. Other famous speeches were *Against Verres*, *On the Manilian Law*, *On Behalf of Archias*, *On Behalf of Balbus*, and *On Behalf of Roscius*. His literary and oratorical style is of the greatest purity, and Cicero's reputation as the great master of Latin prose has never waned. In the Renaissance it was very strong, and every learned man spent much of his time imitating Cicero. See biographies and studies by J. L. Strachan-Davidson (1894), E. G. Sihler (1914), J. C. Rolfe (1923), H. J. Haskell (1942), and F. R. Cowell (1948).

Cicero, Quintus Tullius, c.102 B.C.–43 B.C., Roman general; brother of Cicero the orator. After service in Asia he accompanied Julius Caesar to Britain (55 B.C.); wintered in Gaul (54 B.C.), where he beat off the attacks of Ambiorix; and went to Cilicia (51 B.C.) as legate with his brother. He fought for Pompey in the battle of Pharsala. He was proscribed and killed with his brother.

Cicero, industrial town (pop. 64,712), NE Ill., contiguous to Chicago; founded 1857, inc. 1867. Among the products of its numerous industrial plants are electrical equipment, forgings, and building materials. Morton Junior College (coeducational) is in Cicero.

Cicognara, Leopoldo, Conte (lāōpō'ldō kōn'tā chēkōnyä'rä), 1767–1834, Italian archaeologist, diplomatist, and writer on art. He studied at Modena and Rome and traveled through Italy, gathering a remarkable knowledge of art and archaeology and acquiring a fine art library (now in the Vatican Library). He served as ambassador of the Cisalpine Republic to Turin and as councilor of state. In 1818 he became president of the Academy of Fine Arts in Venice. Cicognara is the author of several valuable works on art, including a history of sculpture.

Cid or **Cid Campeador** (sĭd' kămp'ēōdôr') [Span., = lord conqueror], d. 1099, Spanish soldier and national hero, whose real name was Rodrigo (or Ruy) Díaz de Vivar. A warrior of Burgos, he distinguished himself under Ferdinand I and Sancho II of Castile but was banished (1081) by Alfonso VI. Passing to the service of the Moorish king of Saragossa (a course not unusual among Castilian nobles of his time), he fought against Moors and Christians alike. In 1094 he conquered Valencia, which he ruled until his death. His widow Jimena held out against the Moors until 1102. The Cid's chivalry, courtesy, and generosity have made him a prototype of the noble Castilian warrior of the reconquest. His exploits, much romanticized, have been a favorite literary theme. *The Song of the Cid*, an anonymous Old Spanish work of the 12th cent., has served as basis for numerous treatments, notably the plays by Guillén de Castro (c 1612-13) and Pierre Corneille (1637).

Cidade dos Motores (sēdäd'dŭ dōzh mōtō'rĭsh) [Port., =city of motors], projected model city in Rio de Janeiro state, SE Brazil, not far from Rio de Janeiro. The land was acquired by the government in 1941, the swamps were drained, and construction began on a modern industrial city to be built according to scientific and artistic principles.

cider, in Europe, the fermented juice of apples; in the United States, unfermented apple juice, unless qualified as "hard" cider. Selected apples are grated in a mill, the juice expressed and, for hard cider, fermented and filtered. The commercial product is usually pasteurized or treated with preservatives and is frequently blended to balance the chief constituents, sugar, malic acid, and tannin. Sweet cider is in New England the beverage traditionally served with Thanksgiving dinner. In France cider is made principally in Normandy and Brittany and is there the "wine of the country." It is at its best after a year or two in cask. English cider from the southern and western counties is noted and rivals beer as a popular alcoholic beverage. Cider is popular also in Germany, Spain, and Switzerland. Perry is a similar beverage made from pears.

Ciego de Ávila (syā'gō dā ä'vēlä), city (pop. 29,130), central Cuba. Halfway between Santiago de Cuba and Havana, it is a commercial crossroads of importance in rail and highway transport. The region produces sugar.

Ciénaga (sēā'nägä), city (pop. 22,783), N Colombia, a Caribbean banana port S of Santa Marta.

Cienfuegos (syĕnfwā'gōs), city (pop. 49,452), central Cuba, a port on the Caribbean. Cienfuegos Bay is a large and beautiful harbor almost entirely enclosed. Sugar is the chief product.

Cierva, Juan de la (hwän' dā lä thyĕr'vä), 1895–1936, Spanish aeronautical engineer, inventor of the AUTOGIRO. He flew his first autogiro in 1923 and crossed the English Channel in an improved model in 1928. See his *Wings of Tomorrow* (1931).

Cieszyn: see TESCHEN.

Cieza de León, Pedro de (pā'dhrō dā thā'thā dā lāōn'), 1518?–1560, Spanish soldier and explorer in South America. His *Chronicle of Peru*, drawn from his experiences in the Spanish Conquest, is a valuable source.

cigar and cigarette. In pre-Columbian times, Indians of the West Indies and parts of Central and South America smoked TOBACCO and other plant products in the form of rolls similar to the modern cigar or cigarette. Spaniards carried the habit to Spain, whence it spread to other European countries. Spanish words such as *claro*, *colorado*, *maduro*, *panetela*, and *perfecto* are used to describe the color, shape, and quality of cigars. Cigars consist of filler leaves held in shape by binder leaves and covered with wrapper leaves applied spirally. Havana cigars made of fine Cuban leaf are highly esteemed. The United States and other countries also have large cigar industries. The stogie (stō'gē), a slender roll usually made without binder, is named for

Conestoga, Pa., or for the Conestoga wagon and is especially popular in Pittsburgh and Wheeling. The cheroot (shərōōt'), originally made in India and Manila, is of uniform thickness with both ends clipped. Cigars, except for very fine grades, have been made by machine since c 1902, cigarettes, since c 1876. The cigarette industry has increased phenomenally in the 20th cent, especially since the First World War Most American cigarettes are blends of about 50 percent flue-cured tobacco, 33 percent Burley, and some Oriental and Maryland, often sprayed with such flavorings as licorice and sugar. The shredded tobacco is usually rolled in flax paper or hemp paper which has replaced commercially the cornhusk wrappers of Indian cigarettes Turkish and Egyptian cigarettes are usually of oval cross section The Egyptian cigarette, originally manufactured in Egypt from imported Oriental leaf, is widely imitated

Cignani, Carlo, Conte (kär'lō kōn'tā chēnyä'nē), 1628–1719, Italian historical painter of the Bolognese school, pupil of Francesco Albani The influence of Guido Reni, Carracci, and particularly of Correggio is apparent in much of his fresco work His most important paintings are *The Entry of Paul III into Bologna* (painted for the palace at Bologna), *Pera and Cimon* (Vienna), *The Power of Love* (ducal palace, Parma), and his masterpiece, the remarkable *Assumption of the Virgin*, in the dome of the cathedral at Forlì On this colossal painting Cignani worked for 20 years

Cignaroli, Giovanni Bettino (jōvän'nē bĕt-tē'nō chēnyärō'lē), 1706–70, Italian historical painter, one of the best of the modern Venetian school He was a founder and director (1769) of Verona Academy Outstanding examples of his work are *Transfiguration* (cathedral, Verona), *Assumption of the Virgin* (Madrid), *Madonna with Saints* (Vienna), *Death of Rachel* (Venice), and his greatest painting, *The Flight into Egypt* (Parma)

Cilicia (sĭlĭsh'shə), region of SE Asia Minor, now in S Asiatic Turkey, between the Mediterranean and the Taurus range It included a high and unproductive plateau, Cilicia Trachea or Cilicia Trachea, and a very fertile plain, Cilicia Pedias. The area was under the domination of the Assyrian Empire before it became part of the Persian Empire Greek settlement on the coast was early, and Cilicia was much Hellenized In the Hellenistic period the region was disputed by the Seleucid kings of Syria and the Ptolemaic kings of Egypt Tarsus and Seleucia (not to be confused with the port of Antioch) were the principal cities They throve after the region became part of the Roman Empire (the first portion in 102 B C, but most of it only after Pompey's campaign against the pirates here in 67 B C) Later Cilicia was included in the Byzantine Empire and was in the 8th cent. invaded by the Arabs. In 1080 Prince Reuben set up an Armenian state here, which became a kingdom in 1098 and is generally called Little Armenia The Armenians cooperated with the rulers of the neighboring Latin Kingdom of Jerusalem They maintained themselves against the Turks until 1375, when the Mamelukes conquered them In later centuries, particularly in the 20th cent, the Armenians suffered greatly at the hands of the Turks, and most of them as well as the Greeks in Cilicia emigrated Cilicia is mentioned in the Bible, e g, Acts 6 9, 21 39, 22 3, Gal 1 21

Cilician Gates (sĭlĭ'shun), mountain pass, S Turkey, leading across the Taurus range Known to the ancients as the Pylae Ciliciae and in modern times as Gulek Bogaz, it is crossed by an ancient highway from Cappadocia to Cilicia

Cima, Giovanni Battista (jōvän'nē bat-tē'stä chē'mä), c 1459–c 1517, Venetian painter, called Cima da Conegliano His earlier work reflects the influence of Giovanni Bellini, whose pupil he supposedly was, his later work, that of Giorgione Many excellent Madonnas by Cima are in the leading European galleries, including the superb *Virgin and Child with Saints* (Parma) Other notable specimens of his work are *David and Jonathan* (National Gall, London), *Tobias with the Angels* (Venice), *The Baptist with Four Saints* (Santa Maria dell' Orte, Venice), and his masterpiece, *The Glorification of St Peter, Martyr* (Milan). See Bernhard Berenson, *The Venetian Painters of the Renaissance* (1894)

Cimabue, Giovanni (jōvän'nē chēmäbōō'ā), d c 1302, Florentine painter, whose real name was Cenni di Pepo He was master of mosaics at the cathedral in Pisa where a *St John* is attributed to him. Other attributions include a fresco, *Madonna with Saints and Angels* (lower church of St Francis in Assisi), frescoes representing the four evangelists, scenes from the lives of the Virgin and St Peter, scenes from the Apocalypse, and the Crucifixion (all in the upper church of St Francis in Assisi), and *Madonna Enthroned* (Uffizi). The works with which his name is associated constitute a transition in painting from the strictly formalized Byzantine style, hitherto prevalent in Italy, to the freer expression of the 14th cent. Cimabue retained most of the old conventions but introduced a little naturalism in his treatment of heads and faces and a new religious sentiment.

Cimarosa, Domenico (dōmä'nēkō chēmärō'zä), 1749–1801, Italian operatic composer; pupil of Sacchini His operas were good examples of pure *opera buffa*, of which *Il matrimonio segreto* (Vienna, 1792) is the best. He also wrote serious operas, church music, and instrumental music

Cimarron (sĭm"ərŏn'), city (pop 1,004), co seat of Gray co, SW Kansas, on the Arkansas river just W of Dodge City, in a Great Plains farm area, inc 1885

Cimarron, river, 692 mi. long, rising in NE New Mexico It flows generally eastward as it barely touches the Oklahoma Panhandle and SE Colorado and, entering Kansas, crosses and recrosses the Oklahoma line Finally it swings SE and E across Oklahoma to the Arkansas river, just W of Tulsa.

Cimarron, Territory of, now the Panhandle of Oklahoma It was proposed that the area should be a separate territory in 1887 It was settled by cattle ranchers, many of whom were squatters, and to protect their claims they attempted (1887) to create at Beaver, Okla., a territorial government Subsequent efforts in the U S Congress to establish the Territory of Cimarron failed, and in 1890 it became part of the Oklahoma Territory

Cimber (Lucius Tullius Cimber), d after 44 B.C., one of the assassins of Julius CAESAR He presented the petition used as a pretext to approach Caesar and held his hands or his toga as CASCA stabbed.

Cimbri: see GERMANS.

Cimmerians (sĭmēr'ēənz), ancient people of whom little is actually known. They are mentioned by Homer, but they emerge into history only in the 8th cent B C, when they left their former home in Crimea and came to the region around Lake Van In the early 7th cent B C they swept across Asia Minor, plundering Lydia and breaking the power of Phrygia They may be intended by the biblical GOMER, and they are mentioned in the inscriptions of the Assyrians, with whom they warred

Cimon (sī'mun), d 449 B.C, Athenian general and statesman, son of Miltiades He fought at Salamis and shared command (with Aristides) of the fleet sent to rescue Asiatic Greek cities from Persian domination He conquered Scyros, subdued Asia Minor, and defeated the Persian sea and land forces up the Eurymedon, in Pamphylia, in 468 B C He led the Athenian aristocratic and pro-Spartan party on the death of Aristides and was its chief statesman in succession to Themistocles He was later sent into exile, from which he was recalled (451 B C) to conclude a peace with Lacedaemon He died while besieging Citium, in Cyprus

cinchona (sĭngkō'nə) or **chinchona** (chĭngkō'nə), name for species of the genus *Cinchona*, evergreen trees native to the Andes of South America but cultivated elsewhere for the commercially valuable "Peruvian bark," the source of QUININE Several species yield quinine The trees were named in honor of the condesa de Chinchón who, in 1638, was cured of a fever by a preparation of the bark At her instigation the bark was collected for malaria sufferers and later exported to Spain Indians, however, had long used it for medicinal purposes It is sometimes called Jesuits' bark because of the part the Jesuits played in its dispersal So successful were the Dutch and English in transplanting cinchona to Java and India that until the Second World War these countries, and especially Java, grew practically the entire commercial supply of the bark South America is utilizing its wild trees and starting plantations, although a synthetic drug may largely take the place of the natural one Cinchonas are also the source of cinchonine and other alkaloids besides quinine See M L. Duran-Reynals, *The Fever Bark Tree* (1946)

Cincinnati (sĭnsĭnă'tē, -nă'tē), industrial city (pop 455,610), co seat of Hamilton co, extreme SW Ohio, on the Ohio opposite the mouth of the Licking, inc as a village 1802, as a city 1819 The second largest city in Ohio, it is the commercial and cultural center for an extensive area including numerous suburbs in Ohio and Kentucky It is a port of entry With a large river front and good transportation facilities (river, rail, highway, air), the city is an important manufacturing center Its industries include soapmaking, meat packing, and the manufacture of men's and boys' clothing, machine tools, printing inks, sheet iron, copper and tin, airplane engines, beer, shoes, chemicals, and paper Benjamin Stites and John Cleves Symmes founded (1788) the town as Losantiville, and in 1790 Arthur St. Clair renamed the place Cincinnati for the society of Revolutionary officers A busy transshipping center for early settlers, it developed as a shipping point for farm produce and meat after the opening of the Miami and Erie Canal. Settlers from strife-torn Germany (who made a definite impression on the life and culture of the city) and from famine stricken Ireland came here in the 1840s. It was an early abolitionist center and Underground Railroad station In the 1880s the city suffered greatly. a flood (1884) did much damage, a crime wave, the result of corrupt politics and lax law enforcement, provoked the Cincinnati riot (March 28–31, 1884), and G. B. Cox, political boss, gained firm control of the city. A reform movement culminated in the establishment (1924) of a city-manager government (see DYKSTRA, CLARENCE A, and SHERRILL, CLARENCE O) In 1937 Cincinnati had another disastrous flood It is the seat of the Univ of Cincinnati (see CINCINNATI, UNIVERSITY OF), Xavier Univ (Catholic, for men, 1831), Hebrew Union College, Mt St Mary of the West (at Norwood), the Cincinnati Conservatory of Music, the College of Music of Cincinnati, the College of Pharmacy, the Y M C A schools, Our Lady of Cincinnati College, and a Catholic teachers college The May Music Festival and Cincinnati Symphony Orchestra concerts are held in the Music Hall and Exposition Building William Howard Taft was born in Cincinnati, and the Taft family has long been prominent in the city Among the many landmarks here are the Taft House Museum; the large public library; Eden Park, with the city art museum and art academy, the Rookwood Potteries, the Ohio Mechanics Institute building, with an industrial and a natural-history museum, the zoological garden, in which summer opera is held, the Procter & Gamble Company plant, and numerous churches and cathedrals See C L de Chambrun, *Cincinnati: Story of the Queen City* (1939)

Cincinnati, Society of the [Latin plural of *Cincinnatus*], formed (1783) by officers of the Continental army just before their disbanding after the American Revolution The organization, with a constitution drafted by Gen Henry KNOX, was founded for fraternal, patriotic, and allegedly nonpolitical purposes George Washington was made president of the national society, and auxiliary state societies were organized Membership was limited to officers of the Continental army and their eldest male descendants The society provoked much opposition among the zealous Republicans of the time, who attacked it as the beginning of an aristocratic military nobility. The Tammany societies of New York, Philadelphia, and other cities were founded partly in opposition to it Beginning in 1893 a successful revival of many of the defunct state organizations was made, and the society is still active See W. S Thomas, *The Society of the Cincinnati, 1783–1935* (1935), E E Hume, ed., *General Washington's Correspondence concerning the Society of the Cincinnati* (1941)

Cincinnati, University of, at Cincinnati, municipal, coeducational, chartered 1870, opened 1873 The College of Engineering and Commerce, with the Institute of Scientific Research, pioneered in a work and study plan There are colleges of applied arts, business administration, engineering, home economics, law, liberal arts (McMicken), and medicine, a teachers college, and graduate schools of nursing and health and of arts and sciences Archaeological excavations by the university have been made at Troy The library has Americana collections and includes the library of the Historical and Philosophical Society of Ohio The College of Music of Cincinnati and the Cincinnati Conservatory of Music are affiliated

Cincinnatus (Lucius or Titus Quinctius Cincinnatus) (sĭnsĭnā'tŭs, -nă'tŭs), 5th cent B.C., Roman legendary patriot He was consul in 460 B C and dictator twice (458 and 439 B C) In his first dictatorship he came from his farm to defeat the Aequi and Volsci, who were threatening the city from the east and southeast He returned from battle, resigned his dictatorship, and went home to his farm In 439 B C he came out of retirement to put down the plebeians The separation of legend from history in Cincinnatus' story is impossible.

Cinderella, the poor drudge who is saved by a good fairy from her wicked stepmother and married to a prince She is found in the folklore of most peoples Both Charles Perrault and the Grimm brothers included the story in their collections.

cinema. see MOVING PICTURES

cineraria (sĭn"ərâr'-), pot plant popular for the compact daisylike heads of flowers borne in dense clusters above the large leaves Many horticultural kinds, in various colors, have been derived from the parent plant, a *Senecio* native to the Canary Islands. The name is occasionally used for related species, a genus of South African plants is called *Cineraria*

Cinna (Lucius Cornelius Cinna) (sĭ'nə), d 84 B C., Roman politician, consul (87 B C–84 B C), and leader of the popular party Shortly after Cinna's first election SULLA left Rome to fight against Mithridates VI of Pontus, having received from both consuls a promise to maintain his reforms When Sulla was safely out of Italy, Cinna revived the anti-Sullan proposal to apportion the new voters equally among the tribes of Rome As the result would be (the voting being by tribes) a complete and permanent overthrow of the conservatives, they opposed Cinna to the point of expelling him from the city Cinna promptly collected Roman soldiers and Italians in S Italy, called MARIUS from Africa, and returned to Rome, where a great slaughter of Sulla's followers took place After Marius' death Cinna remained consul, with various colleagues Sulla defeated Mithridates and set out for Rome, and Cinna and Cn Papirius CARBO raised an army to oppose him, but

before the civil war began, Cinna was murdered in a mutiny at Ancona. His daughter Cornelia was the first wife of Julius Caesar, who married her (83 B C) rather than a rich heiress and refused to divorce her at Sulla's express command For this defiance he lost his property and had to flee the city Only the pleas of his powerful relatives and of the vestal virgins to Sulla saved him from death Cinna's son, **Lucius Cornelius Cinna,** fl 44 B C , was praetor at the time of Caesar's assassination He was one of the conspirators against Caesar

Cinna (Caius Helvius Cinna), d 44 B C , Roman tribune At the funeral of Julius Caesar the mob mistook him for L Cornelius Cinna and killed him He was probably the same as the minor poet Cinna, a friend of Catullus and author of an epic *Smyrna* (of which fragments survive)

cinnabar (sĭ'nŭbär), a mineral, the sulphide of mercury Deep red in color, it is used as a pigment (see VERMILION), but principally it is a source of the metal mercury It occurs in Spain, Italy, and other European countries and in the United States in California The mercury is obtained from it by roasting, the sulphur combining with oxygen and passing off as sulphur dioxide
