Gobelins, Manufacture nationale des (gōbŭlĕ'), state-controlled tapestry manufactory in Paris It was founded as a dye works in the mid-15th cent by brothers, Gilles and Jehan Gobelin, and in 1601

a tapestry works operated by two Flemish weavers, Marc de Comans and François de la Planche, was added The establishment was controlled by the Gobelin family until its purchase in 1662 by Louis XIV Other tapestry works were united with it when it was reorganized in 1667 by Colbert as a royal tapestry and furniture works with Charles Le Brun as director and chief designer After 1697 the Gobelins specialized in tapestry, doing both low- and high-warp weaving until the 19th cent , then high warp only was done, since this was easier for the weaver to watch The Gobelins factory has always been noted for excellence of materials, dyes, and workmanship, it originated the exquisite Gobelin blue Famous tapestries from its looms include a set based on copies of Raphael's frescoes in the Vatican and 14 great pieces commemorating the achievements of Louis XIV

Gobi (gō'bē), Mandarin *Sha-mo*, sandy desert of China and Mongolia It covers some 500,000 sq mi , extending c 1,500 mi from the Great Khingan mts , Manchuria, to Sinkiang prov , China It is a plateau averaging c 3,000 ft in altitude Nearly all the soil has been stripped off by the prevailing northwesterly winds and deposited in N central China as loess The scanty grasslands support a small population, chiefly pastoral Mongols There are few roads, and most transportation is by camel caravan. Many paleontological finds, including dinosaur eggs, have been made in the Gobi See Mildred Cable and F L French, *The Gobi Desert* (1944)

Gobineau, Joseph Arthur, comte de (zhôzĕf' ärtür' kōt' dŭ gôbĕnō'), 1816–82, French man of letters and diplomat The chief early French exponent of the theory of Nordic supremacy, he was strongly antidemocratic and anti-Semitic His chief work was *Essai sur l'inégalité des races humaines* (1853–55, Eng tr , *The Inequality of Human Races*, 1915) He also wrote artistic short stories, of which the *Nouvelles asiatiques* (1876, Eng tr , *Five Oriental Tales*, 1925) are typical

goblin, in folklore, a misshapen dwarfed creature haunting dark places, of capricious or malevolent disposition He is of the same type as the elf

God, divinity of the three great monotheistic religions, Judaism, Christianity, and Islam In the Old Testament various names are used YHWH is the most celebrated of these, the Hebrews considered the name ineffable and substituted, in reading, the name *Adonai* [my Lord] The ineffable name, or tetragrammaton [Gr ,=four-letter form], is of unknown origin, the reconstruction *Jehovah* was based on a mistake, and the form Yahweh is not now regarded as reliable The name *Jah* occurring in names such as Elijah is a form of YHWH The commonest name for God in the Old Testament is *Elohim*, a plural form, but used as a singular when speaking of God, in some books a new singular of Elohim is used The name *El*, not connected with Elohim, is also used, especially in proper names, e g Elijah, it is connected etymologically with the name *Allah*, used by Arabs (Christians as well as Moslems) and all Moslems as the name of God The name *Shaddai*, used with other words and in names (e g , Zurishaddai), appears rarely Of these names only Adonai has a satisfactory etymology It is generally not possible to tell from English translations of the Bible what was the exact form of the name of God in the original The general conception of God may be said to be that of an infinite being (often a personality but not necessarily anthropomorphic) who is supremely good, who created the world, who knows all and can do all, who is transcendent over and immanent in the world, and who loves mankind By the majority of Christians He is believed to have lived on earth in the flesh as Jesus Christ (see Trinity) The Old Testament shows changing views of God The attitude of believers has generally been that God, unchanging, revealed Himself more and more to Israel Critics of the rational schools of the 19th cent developed a view of the Bible as a history of Judaism without benefit of divine intervention in the world They see a series of stages in which God was first held by the Jews as simply the head of a tribal pantheon, then gradually assumed all the attributes of His fellow divinities, but was still worshiped more or less idolatrously Gradually, according to these scholars, the Jews considered their God as more and more powerful until they made Him creator and ruler of all men but still preferring Israel as His special people His higher attributes of goodness, love, and mercy the critics consider as very late in this development Although the idea of God, through its long acceptance by Jews, Christians, and Moslems, has come to be associated with the concept of a good, infinite personality, in recent times the name has been extended to many principles of an utterly different sort, thus, a philosopher may speak of his unifying idea (e g , cosmic energy, mind, world soul, number) as God There are several famous demonstrations of the existence of God The argument from the First Cause maintains that since in the world every effect has its cause behind it (and every actuality its potentiality), the first effect (and first actuality) in the world must have had its cause (and potentiality), which was in itself both cause and effect (and potentiality and actuality), i e , God The cosmological argument maintains that since the world and all that is in it seem to have no necessary or absolute (nonrelative) existence, an independent existence (God) must be implied for the world as the explanation of its relations The teleological argument maintains that, since from a comprehensive view of nature and the world everything seems to exist according to a certain great plan, a planner (God) must be postulated The ontological argument maintains that since the human conception of God is the highest conception humanly possible and since the highest conception humanly possible must have existence as one attribute, God must exist Immanuel Kant believed that he refuted these arguments and the converse propositions (in his antinomies) He did not touch upon the empirical, nonscholastic contention that God has been claimed to have been perceived by so many persons of good credit that He must exist Mystics make this claim bluntly (see mysticism) See religion, animism, Babylonian religion, deists, Egyptian religion, Germanic religion, Greek religion, Hinduism, myth, pantheism, Roman religion

Godalming (gŏd'ŭlmĭng), municipal borough (1931 pop 10,401, 1943 estimated pop 13,040), Surrey, England, SW of London It is the site of Charterhouse, a public school founded in 1611 at London and removed to Godalming in 1872

Godard, Benjamin Louis Paul (bāzhamĕ' lwē' pôl' gôdär'), 1849–95, French composer and violinist, studied at the Paris Conservatoire He is remembered for the *Berceuse* from his opera *Jocelyn* (1888) His other compositions include symphonies, concertos, chamber music, and songs

Godavari (gōda'vurē), river, c 900 mi long, W India, rising in the Western Ghats, Bombay state It is sacred to Hindus It flows through Hyderabad state westward, then southwest along the border of Hyderabad and Madras state, and empties into the Bay of Bengal through the many channels of its delta in Madras state

Godbout, Joseph Adélard (zhôzĕf' ädälär' gŏdbōō'), 1892–, Canadian politician, b Quebec prov , educated at an agricultural school in Quebec and at Massachusetts Agricultural College (now the Univ of Massachusetts) Elected (1929) as a Liberal to the Quebec legislature, he was appointed (1930) minister of agriculture in the province, and in 1936 he served as premier but was defeated in the elections of that year Godbout again became premier in 1939 and held this post until 1944, when he yielded his premiership to Maurice Duplessis, leader of the Union Nationale

Goddard, Henry Herbert (gŏ'durd), 1866–, American psychologist, b Vassalboro, Maine, grad Haverford College, 1887 He was one of the first in America to make systematic hereditary studies of feeblemindedness, for which his chronicle *The Kallikak Family* (1912) is famous He was director of research (1906–18) at the Training School for Feeble-Minded Children, Vineland, N J , director (1918–22) of the Ohio State Bureau of Juvenile Research, and professor (1922–38) at Ohio State Univ His publications include *Feeble-Mindedness Its Causes and Consequences* (1914) and *The School Training of Gifted Children* (1927)

Goddard, John, 1724–85, maker of early American furniture, b Dartmouth, Mass He worked in Newport, R I , and is recognized as one of the finest cabinetmakers in early America Examples of his work are rare He is noted for his stately pieces, especially secretaries, on which he developed the block-front design, often surmounted by finely executed carvings in a shell motif

Goddard, Paul Beck, 1811–66, American physician and scientist, b Baltimore, grad Washington (now Trinity) College, Hartford, Conn (B A , 1828), M D , Univ of Pennsylvania, 1832 Later he became professor of anatomy at the Univ of Pennsylvania He wrote many illustrated medical works on the nerves and arteries and on genitourinary disorders After Daguerre's work in photography was made known, Goddard experimented with sun photography and in 1839 announced his discovery that a bromine vapor heightened the impression on silver plate The following year a similar announcement of this use of bromine was made independently by John Frederick Goddard in London

Goddard, Pliny Earle, 1869–1928, American ethnologist, b Lewiston, Maine, grad Earlham College, 1892 He became a missionary to the Hupa Indians of California His monographs, *Life and Culture of the Hupa* (1903) and *The Morphology of the Hupa Language* (1905), made him a recognized authority on the Athapascan stock After teaching anthropology at the Univ of California (1906–9), he was associated with the American Museum of Natural History as assistant curator and, from 1914, as curator of anthropology Among his other works are *Indians of the Northwest Coast* (1924) and *Indians of the Southwest* (1927)

Goddard College, see Barre, Vt

Godden, Rumer (gŏ'dŭn), 1907–, Anglo-Indian novelist, b Sussex She lived as a child in India and after schooling in England returned to open and run a dancing school in Calcutta After marriage to Laurence S Foster, she gave up the school and devoted herself to writing and to her family Her novels, notable often for their exotic backgrounds and always for their subtle characterization, include *Chinese Puzzle* (1936), *Black Narcissus* (1939), *Gypsy, Gypsy* (1940), *Breakfast with the Nikolides* (1942), and *The River* (1946) *A Candle for St Jude* (1948) is set in a ballet school, while *Take Three Tenses* (both novel and play forms, 1945, title in England, *A Fugue in Time*) is an experiment in technique. *In Noah's Ark* (1949) is a story in verse

Godefroy (gôdfruwä'), family of French scholars

Denis Godefroy (dünĕ'), 1549–1622, was a Calvinist who fled (c 1580) to Geneva and later became a professor of law at Strasbourg and Heidelberg He compiled an edition (1583) of the *Corpus Juris Civilis*, which may be called the first modern edition His son, **Théodore Godefroy** (tāôdôr'), 1580–1649, became a Catholic, was royal historiographer of France, and took part in the negotiation of the Peace of Westphalia Another son, **Jacques Godefroy** (zhäk), 1587–1622, was a Calvinist and professor of law at Geneva His edition of the Theodosian Code (1665) is one of the masterpieces of legal scholarship The commentary is still much used

Goderich (gŏd'rĭch, gōd'-), town (pop 4,557), S Ont , on Lake Huron and NW of London The largest shipping point on the Canadian side of the lake, the town is in a fruitgrowing, fishing, and farming area

Godesberg, Germany see Bad Godesberg

Godey, Louis Antoine (gō'dē), 1804–78, American publisher, b New York city He was joint founder in 1830 of the *Lady's Book*, known after his partner's withdrawal as *Godey's Lady's Book* He guided the policies of this first famous and successful woman's magazine and in 1837 made Mrs Sarah Josepha Hale its editor He was the sole owner until 1877

Godfrey, Thomas, 1704–49, American mathematician and glazier, b near Philadelphia He was a glazier's apprentice, and when a young man he glazed the windows of Independence Hall Without any formal education, he studied mathematics and astronomy and in 1730 improved Davis's mariner's quadrant His priority was disputed with John Hadley, who had made a similar invention in England, and the Royal Society settled the matter by rewarding both

Godfrey of Bouillon (bōōyôN'), c 1058–1100, Crusader, duke of Lower Lorraine He fought for Emperor Henry IV against Pope Gregory VII and against Rudolf of Swabia and was rewarded (c 1088) with the duchy, which he claimed in the right of his mother With his brother Baldwin, he was among the first to set out for Jerusalem on the First Crusade (1096) On the way to Constantinople, he allowed his army to pillage the countryside, but after his arrival he made peace with Alexius I (Jan , 1097) He played a minor role at Nicaea and Antioch, but achieved prominence in the siege of Jerusalem (1099) and was elected ruler of the city after its capture, having refused the title of king on religious grounds, he was designated advocate of the Holy Sepulchre He subsequently fought at the battle of Ascalon (1099) and laid several Syrian towns under tribute Godfrey was distinguished among the Crusaders for his piety and simplicity As the first Latin ruler of Jerusalem, he became the central figure of various legends, and his deeds were glorified in the chansons de geste His brother, Baldwin I, succeeded him as ruler of Jerusalem and took the title king

Godfrey of Strasbourg see Gottfried von Strassburg

Godfrey of Viterbo (vētĕr'bō), 12th cent , German or Italian writer He spent most of his life in Italy as a priest attached to the courts of Emperors Conrad III, Frederick I, and Henry VI He sided with them against the pope in their politico-ecclesiastical quarrels, but he was not a strong partisan His only work of any value today is a long Latin poem, *Gesta Friderici*, an account of Frederick from the point of view of an eyewitness His *Pantheon*, a universal history, was tremendously popular for the next two or three centuries, but it abounds in fable and fantasy

Godhavn (gôdh'houn), settlement (pop 319), W Greenland, a port on S Disko island and on Disko Bay It is the administrative center of Godhavn dist (pop 5,537) and of N Greenland It is a fishing base and has a radio station, a hospital, and a biological research station

Godin, Louis (lwē'gôdĕ'), 1704–60, French astronomer A member of a commission sent (1735) to Peru to measure an arc of the meridian, he remained there as professor of mathematics at Lima; he was later director of the naval academy at Cádiz He made seismological studies of earthquakes at Lima and at Lisbon

Godiva, Lady (gŏdī'vù), fl c 1040–1080, wife of Leofric, earl of Mercia and lord of Coventry Begun in medieval chronicle and surviving in several forms, the legend about her is that in order to obtain remission of excessive taxation of the people she obeyed her husband's mandate to ride naked through the town. All shutters were closed, and

the one man who looked out earned the name of Peeping Tom Michael Drayton (1613), Tennyson (1842), and others made her the subject of poems A bronze statue of her by Sir William Reid Dick was erected in Coventry in 1949

Godkin, Edwin Lawrence (gŏd'kĭn), 1831–1902, American editor, b Moyne, Ireland, of English parentage. His idealism found expression in his *History of Hungary and the Magyars* (1853) and won him the job of correspondent (1853–55) to the London *Daily News* during the Crimean War In 1856 he came to the United States and studied law, and during the Civil War he traveled in the South, sending letters to the *Daily News* In 1865 he established the *Nation* on stockholders' money but shortly after was compelled to buy the paper to maintain it In 1881 he became an editor of the New York *Evening Post* and in 1883 editor in chief, carrying the *Nation*, by then an influential critical weekly, with him as a weekly in connection with the *Post* He was absolutely independent politically and attacked the carpetbag regime, corruption under Grant, free silver, organized labor, and high tariffs His self-assurance and integrity gave his opinion weight among editors as well as readers He wrote *Problems of Modern Democracy* (1896) and *Unforeseen Tendencies of Democracy* (1898) See Rollo Ogden, *Life and Letters of Edwin Lawrence Godkin* (2 vols , 1907).

Godman, John Davidson, 1794–1830, American anatomist and naturalist, b Annapolis, Md , grad Univ of Maryland, 1818 After teaching at the Medical College of Ohio (1821), he became head of the Philadelphia School of Anatomy, where he wrote *Anatomical Investigations* (1824) In 1826 he became professor of anatomy at Rutgers Medical College, but resigned because of ill-health A naturalist by avocation, his *American Natural History* (3 vols , 1826–28) was a pioneer American work in this field. He also wrote *Rambles of a Naturalist* (1833)

Godolphin, Sidney Godolphin, 1st **earl of** (gŭdŏl'fĭn), 1645–1712, English statesman He served as lord treasurer at various times in the reigns of James II, William III, and Anne His son married Marlborough's daughter in 1698, the political fortunes of the two men were thereafter united, and Godolphin's financial ability supported the general's great military victories When Marlborough and his supporters lost popularity, Queen Anne dismissed Godolphin (1710)

Godoy, Manuel de (mänwāl' dā gōdoi'), 1767–1851, Spanish statesman An army officer, he won the favor of Queen MARÍA LUISA, whose lover he became, and rose rapidly at the court of CHARLES IV The king made him chief minister (1793) and heaped honors upon him Godoy favored war on revolutionary France (1793), but in 1795 he made peace (the second Treaty of Basel) and was awarded the title *príncipe de la Paz* [prince of the peace] Other titles held by him were duke of Alcudia, duke of Sueca, prince of Balsano, generalissimo, and admiral. After a brief eclipse, Godoy returned to power in 1801 His alliance (1805) with Napoleon I involved Spain in war with England and led to the Franco-Spanish defeat at Trafalgar The unpopularity of Godoy's corrupt government became acute after Godoy concluded the Convention of Fontainebleau (1807) with Napoleon (see PENINSULAR WAR). Prince Ferdinand (later FERDINAND VII) led the opposition and in 1808 was proclaimed king after Charles IV's first abdication Godoy, arrested (for his own safety from mob fury), was later allowed to go into exile He died at Paris. His memoirs (6 vols , 1836–38) have been translated into English

God Save the King (or **Queen**), English national anthem. Its words (of which there have been many versions) and its music are both of uncertain origin The tune has most often been ascribed to Henry Carey, but without substantiation Besides its association with the song AMERICA, the tune has inspired words in Danish, Dutch, German, Russian, and other languages In 1946, at the order of King George VI, the nationalistic second stanza was deleted and one written in the 19th cent by a clergyman, W. E Hockson, was substituted It is, in substance, a prayer for world peace See W H Cummings, *God Save the King* (1902), O G. Sonneck, *Report on "Star-spangled Banner," "Hail Columbia," "America," and "Yankee Doodle"* (1909); P A Scholes, *"God Save the King!" Its History and Romance* (1942).

Godthaab (gŏt'hôp), town (pop. 1,021), on SW Greenland, a port on the Godthaab Fjord It is the capital of Godthaab dist (pop 1,962) and of S Greenland Founded (1721) by Hans EGEDE, it was the first Danish colony in Greenland. The U.S and Canadian consulates in Greenland are located here Near by are the remains of Vesterbygd, a 10th-century Norse settlement.

Godunov, Boris (bŭrēs' gŭdōnôf'), c.1551–1605, tsar of Russia (1598–1605) A favorite of IVAN IV (Ivan the Terrible), he married his sister to Ivan's son and heir, Feodor At Ivan's death (1584) Boris became a member of the regency for the young Feodor I The "strong man" of the reign, he virtually acted as sole regent. The murder (1591) of Feodor's younger brother, the tsarevich DMITRI, is generally laid to Boris. Upon Feodor's death (1598), a *zemsky sobor* (popular assembly) chose Boris as successor. In his regency he had brought about important changes, Siberia was recolonized, land lost to Sweden was won back, the Muscovite church was organized as a separate patriarchate on equal footing with other Eastern churches, and the ukase of 1587 limited the right of the peasants to transfer themselves from one property owner to another Boris while tsar ruled with strength and judgment, but he lost popular support When the false Dmitri invaded Russia in 1604, he gained many adherents Boris died in the midst of the struggle, and his son, FEODOR II, was unable to defend his throne The career of Boris Godunov is the subject of a drama by Pushkin which became the basis of Moussorgsky's opera

Godwin or **Godwine** (both gŏd'wĭn), d 1053, English statesman His parentage is uncertain He became chief adviser to King Canute, was made earl of Wessex, and was given great wealth and lands After Canute's death Godwin and Queen Emma, Canute's widow, supported the claims to the throne of her son by Canute, HARTHACANUTE, against those of HAROLD HAREFOOT, Canute's son by Ælgifu of Northampton Godwin apparently permitted the murder of another claimant to the throne, Alfred Ætheling, son of Queen Emma by her first husband, Æthelred II, and brother of Edward (later Edward the Confessor) This brutality seems to have earned him the enmity of Harthacanute and of Edward, who succeeded Harthacanute Yet the king married Godwin's daughter (1045), and Godwin was the most powerful earl in England He, however, opposed the king's French favorites When Edward commanded Godwin to harry Dover because of bad treatment of EUSTACE II of Boulogne by the men of Dover, Godwin refused Edward seized the opportunity to exile Godwin and his sons (1051) However, in 1052, taking advantage of the popular dislike of the king's Norman friends, Godwin and his sons led an armed invasion of England, and the settlement they forced restored Godwin to his former importance and outlawed many of the French newcomers. Godwin was succeeded as earl of Wessex by his son HAROLD.

Godwin, Mary Wollstonecraft: see WOLLSTONECRAFT, MARY

Godwin, Parke, 1816–1904, American journalist, b. Paterson, N J , grad Princeton, 1834 He became associated on the New York *Evening Post* with William Cullen BRYANT, whose daughter he married He later published a biography of Bryant (1883) and edited his works (4 vols , 1883–84) He retained his connection with the *Post* nearly 45 years, following Bryant as editor in 1878, but, because of differences with the owners, he resigned in 1881 and became editor of the *Commercial Advertiser* Godwin was sympathetic with Brook Farm and with Fourierism, wrote *A Popular View of the Doctrines of Fourier* (1844), and for a time edited the *Harbinger*, the Fourierist magazine He translated part of Goethe's autobiography (1846–47) and other works from the German and collected many of his own numerous magazine articles into book form He was long prominent in the political, social, and literary life of New York city See Allan Nevins, *The Evening Post* (1922)

Godwin, William, 1756-1836, English author and political philosopher Son of a dissenting minister and in his youth a minister himself, he gave up preaching for a literary career. The materialism that pervaded his work is exemplified in *An Enquiry concerning the Principles of Political Justice and Its Influence on General Virtue and Happiness* (1793), an anarchistic polemic based on a psychology that assumes that experience is dominant in shaping character and that men are ultimately guided by reason, social distinction, marriage, and centralized government he thought should, ideally, be abolished These views he illustrated in his novel, *The Adventures of Caleb Williams* (1794), he retracted his views on marriage, however, in two later novels, *St Leon* (1799) and *Fleetwood, or, The New Man of Feeling* (1805) In 1797 Godwin married Mary Wollstonecraft, who died the same year giving birth to a daughter, Mary He remarried in 1801, and in 1805 established a small juvenile publishing business, his last years were an unceasing struggle against poverty and debt Godwin's works strongly influenced his younger contemporaries, particularly SHELLEY, whose elopement with Mary (1814) drew from Godwin an exhibition of sternness at variance with his earlier views, however, he was later reconciled to their marriage Godwin's other works include several more novels, *History of the Commonwealth of England* (4 vols , 1824–28), and some fables, essays, and unsuccessful plays See biography by F. K. Brown (1926), H. N Brailsford, *Shelley, Godwin, and Their Circle* (1913).

Godwin-Austen, Henry Haversham, 1834–1923, English topographer and geologist. An officer in the British army (1851–77), he was assigned to several government surveys in N India, especially in the Himalayas. He explored and surveyed the region around Mt. Godwin-Austen (in the Karakorum range), which was named for him.

Godwin-Austen, Mount, or **K2,** peak, 28,250 ft high, Kashmir, in the Karakorum range. After Mt. Everest it is the highest elevation in the world No expedition has succeeded in reaching the summit An American party in 1939 attained the greatest altitude, 27,500 ft.

Godwine: see GODWIN (d 1053).

Goebbels, Paul Joseph (poul' yōzĕf gŭ'buls), 1897–1945, German National Socialist propagandist A clubfoot kept him from war service He was graduated from the Univ. of Heidelberg (Ph D , 1921), began a journalistic career and wrote some novels, fell under the spell of Hitler, and early joined the National Socialist party In 1927 he founded the *Angriff*, chief organ of the party In 1928 he was elected to the Reichstag, in 1933 Hitler made him "minister of popular enlightenment," i e , propaganda minister This position gave him complete control over radio, press, cinema, and theater, later all German art was regimented in the "national chamber of culture," of which Goebbels was chairman Goebbels placed his undeniably brilliant intelligence and his insight into mass psychology entirely at the service of his party As an orator he was second only to Hitler in his ability to hypnotize his audience In his staging of mass meetings and parades he was unsurpassed Utterly cynical, he seems to have held no particular belief except the self-justification of power. By exploiting mob emotions to the maximum, by raising bald lying to an art, by employing all modern facilities for spreading untruth, Goebbels helped Hitler into power and popularized National Socialism abroad Goebbels was one of the few Nazi leaders who remained loyal to Hitler until the end In April, 1945, he and his family took poison while Berlin was falling to Russian troops See *The Goebbels Diaries* (1942–43, Eng. tr by L P Lochner, 1948), Curt Riess, *Joseph Goebbels: the Devil's Advocate* (1948)

Goering or **Göring, Hermann Wilhelm** (both hĕr'män vĭl'hĕlm gu'rĭng), 1893–1946, German National Socialist leader. In the First World War he was a hero of the German air force An early member of the Nazi party, he participated (1923) with Hitler and Ludendorff in the Munich "beer-hall putsch" and after its failure lived in Sweden until 1927 He was elected (1928) to the Reichstag and in 1932 became its president When Hitler came to power (1933) he made Goering air minister of Germany and prime minister of Prussia Until 1936 he headed the Gestapo (secret police), which he founded. He was implicated in the REICHSTAG fire trial by the defendants, who accused him of having instigated the fire himself in order to create a pretext for giving Hitler dictatorial powers Having obtained (1936) the directorship of the Four Year Plan, he supplanted Hjalmar SCHACHT in 1937 and was virtual dictator of German economy until 1943, when his economic powers were transferred to Walter Funk and Albert Speer Goering was responsible for the rearmament program which made the German war machine the most powerful in Europe His slogan, "guns instead of butter," became proverbial He deserves particular credit for the creation of the German air force In 1939 Hitler designated Goering as his successor and in 1940 made him marshal of the empire, a unique rank Goering was notorious for his love of high-sounding titles ("imperial master of the hunt" being one of them), of extraordinary uniforms and decorations of pageantry, pomp, and excessive hospitality, and of voluntary or enforced gifts Behind a façade of humor, which encouraged uncounted jokes on his spectacular weaknesses and corpulence, he hid a vindictive temperament He was a connoisseur of the arts and accumulated, by fair and foul means, a fabulous art collection His financial and industrial interests were wide and ramified Several years after the death of his Swedish wife, Karin, Goering married, with adequate fanfare, the actress Emmi Sonnemann In the Second World War he was responsible for the total air war waged by Germany, his immense popularity in Germany declined after the Allied air forces, despite Goering's emphatic predictions to the contrary, began to lay Germany waste He surrendered (May, 1945) to American troops and was the chief defendant at the Nuremberg trial for war crimes (1945–46) While imprisoned, he was cured of his addiction to drugs, which he had acquired in the First World War He defended himself with brilliant cynicism, but was convicted and sentenced to death. Two hours before his scheduled hanging, he committed suicide by swallowing a poison capsule which he had cleverly concealed from his captors

Goes, Hugo van der (hōō'gō vän dĕr gōōs'), d. 1482, painter of the Early Flemish school. He was probably of Dutch extraction, but seems to have early settled in Ghent, where he organized the festivities for the marriage of Charles the Bold and was dean of the painters' guild. In 1475 he retired to a monastery near Brussels. There many notables visited him to see his work or to have their portraits painted. His most important and only well-authenticated surviving work is the splendid altarpiece (Uffizi) painted c.1476 for Tommaso Portinari.

Less monumental than the work of the Van Eycks, it is painted with the same realism and richness of detail and with perhaps more intimacy. The central panel depicts an *Adoration of the Shepherds*, the wings containing portraits of the donor and his family with saints. Beautiful paintings attributed to Van der Goes are in the galleries of Vienna, Bruges, and New York. See studies by Joseph Destrée (1914) and Kurt Pfister (1923)

Goethals, George Washington (gō'thlz), 1858–1928, U S army engineer, b Brooklyn, N Y, grad West Point, 1880. After serving on various inland water projects (1882–1900), he had charge of the fortification of Narragansett Bay and New Bedford (1900–1905) When John F Stevens, chief engineer of the PANAMA CANAL, resigned (1907), Goethals was appointed in his place He found the difficulty of the work increased by the climate, yellow fever, labor troubles, unexpected complications in building the locks, and crumbling substrata in the Culebra Cut By taking intense personal interest in the men and expressing satisfaction in their individual achievements, he created an atmosphere of cooperation which aided materially in the success of the project, completed ahead of schedule He was governor of the Canal Zone (1914–16) In the First World War he was briefly (1917) general manager of the Emergency Fleet Corporation, then (Jan–April, 1918) head of the Bureau of Purchase and Supplies, and finally assistant chief of staff in charge of supplies See biography by J. B Bishop and Farnham Bishop (1930)

Goethe, Johann Wolfgang von (yō'hän vôlf'gäng fŭn gû'tu), 1749-1832, German poet, dramatist, novelist, and scientist His genius embraced most fields of human endeavor, his long and fruitful life was not the least of his accomplishments He was born at Frankfurt, the son of Imperial Councillor Johann Kaspar Goethe (1710–82), a wealthy dilettante, and of Katherina Elisabeth Textor Goethe (1731–1808), daughter of the mayor of Frankfurt Goethe himself describes his happy and sheltered childhood at Frankfurt in his autobiography His father, a rather unbending and slightly eccentric man, undertook his education, his mother the poet described as a warm and gay person, to whom he owed his "happy nature and delight in spinning tales." In 1765 Goethe went to Leipzig to study law There, besides indulging in dissipations which ended (1768) with a hemorrhage and a long period of convalescence at Frankfurt, Goethe also took lessons in drawing and painting, for which he was talented His early poetic attempts found little encouragement in Leipzig In 1770–71 he completed his law studies in Strasbourg, where the acquaintance of Herder and of protagonists of the STURM UND DRANG movement filled him with enthusiasm for Shakspere and for German's medieval past Here also he met Friederike Brion, daughter of the pastor of near-by Sesenheim, and here he composed some of his early lyric poems Among the lasting influences of Goethe's youth were those of J J Rousseau and of Spinoza Rousseau appealed to Goethe's innate love of nature, Spinoza's somewhat cold pantheism was transformed by Goethe into a mystic and poetical feeling for nature in its ever-changing aspects It was during this period that Goethe began his lifelong study of animals and plants and his research in biological morphology The year 1772, which Goethe spent as a lawyer at the imperial court of justice at Wetzlar, was crucial in his literary career. Here he completed the drama *Götz von Berlichingen* (see BERLICHINGEN, GÖTZ VON), a pure product of *Sturm und Drang*, by which he first attracted public notice Still more important was his unhappy love for Charlotte Buff, who was engaged to another man, Goethe, on the verge of suicide, left Wetzlar and overcame his despair by writing the epistolary novel *Die Leiden des jungen Werthers* [the sorrows of young Werther] (1774), which made him famous overnight and was soon translated into many languages, including Chinese. While the writing of *Werther* had helped Goethe back to stability, its effect on the public was precisely the opposite, for it encourated morbid sensibility After an unsettled existence in Germany and Switzerland, Goethe was invited (1775) to visit CHARLES AUGUSTUS, duke of Saxe-Weimar, at whose court he was to spend the rest of his life For 10 years Goethe was chief minister of state at Weimar and acquitted himself of his many duties in exemplary manner. Ennobled by the duke, he later retained only the directorship of the state theater and of the scientific institutions. A trip to Italy (1786–88) fired his enthusiasm for the classical ideal, its importance as a turning point in Goethe's aesthetic outlook has, however, been exaggerated, for Goethe had been attracted toward classicism before his journey, and his later manner was above the confines imposed by the labels "classic" and "romantic" Goethe recast (1787) his drama *Iphigenie auf Tauris*, originally written in prose (1779), and completed the psychological dramas *Egmont* (1788) and *Torquato Tasso* (1789). These and *Römische Elegien* (1788), the domestic epic *Hermann und Dorothea* (1797), *Winckelmann und sein Jahrhundert* [WINCKELMANN and his century] (1805), a work of aesthetic criticism, and the travel account, *Die italienische Reise* (1816–17), are the chief works of Goethe written under the classical impact. During the same period Goethe worked on the novel *Wilhelm Meisters Lehrjahre* [the apprenticeship of Wilhelm Meister], begun in 1777 and published in 1796, it was translated (1824) by Thomas Carlyle. This was destined to become the prototype of the German *Bildungsroman*, or novel of character development, just as his *Wahlverwandtschaften* [elective affinities] (1809) influenced the German psychological novel In 1792 Goethe accompanied Duke Charles Augustus as official historiographer in the allied campaign against revolutionary France Goethe's sense of justice and of historic evolution made him appreciate the principles involved in the French Revolution, but his love of order and his patrician respect for constituted authority caused him to condemn the methods of the revolutionists A reformer in his own small state, Goethe, wished to see revolutions accomplished from above Of a projected dramatic trilogy on the theme of revolution, Goethe completed only the first part, *Die natürliche Tochter* [the natural daughter] His chief production in 1794 was his epic version of Reynard the Fox [*Reineke Fuchs*] In the same year began his friendship with Friedrich von SCHILLER Schiller's death (1805) marked a definite break in Goethe's life In 1808 he published the first part of the work which occupied him from adolescence until old age, the dramatic poem FAUST The second part was published only after his death Goethe completely recast the traditional Faust legend and made it one of the greatest poetic and philosophic creations the world possesses His main departure from the original is no doubt the salvation of Faust, the erring seeker, in the mystic last scene of the second part. The first part, which derives its dramatic impact from the tragedy of Marguerite (Gretchen), cannot be considered separately from the less dramatic, more allegorical, and infinitely more elusive second part, for the entire drama, beginning with the wager between God and the devil in the prologue, leads up to Faust's redemption Of the many women who had passed through Goethe's life, probably the most intellectual was Charlotte von STEIN, his long liaison with her was ended with his departure for Italy After his return he established a household with Christiane Vulpius (1765–1816), who bore him (1789) a son, August (d 1830), but whom he married legally only in 1806 Goethe refused to share in the patriotic hysteria that swept Germany in the wars against Napoleon in 1813–15. Napoleon had met Goethe at Erfurt in 1808, and his remark, "Voilà un homme!" [there is a man!], aptly summed up Goethe's personality The poet's admiration for Napoleon found expression in his translation of Manzoni's ode on the death of Napoleon, *Il cinque maggio* Increasingly aloof from national, political, or even literary partisanship, he became more and more the Olympian divinity, to whose shrine at Weimar all Europe flocked His time was increasingly devoted to science His approach to science was one of sensuous experience and poetic intuition, his pantheistic outlook made him attach equal significance to outward form and inner substance "All things transitory are but symbols" (*Faust*, Part II) Goethe guessed at a common origin of all living matter and discovered (1784), as evidence of evolution, the rudiment of the intermaxillary bone in man Though he did not anticipate Darwin's theory of natural selection, he made it possible by corroborating the evolutionary theories of Buffon and Lamarck His admitted aversion toward mathematical physics caused him to attack, with stubborn violence, Newton's theory of light as inadequate (e g, in his *Zur Farbenlehre*, 1810) Goethe attached equal importance to his scientific and his poetic writings, and the two aspects of his creation cannot be viewed independently Youthfully creative to the end, Goethe continued to produce poetry and fiction *Dichtung und Wahrheit* [poetry and truth], his charming autobiography, covering the years up to 1775, was published from 1811 to 1833 *Westöstlicher Diwan* (1819), a collection of exquisite lyrics, strikes an entirely new note in Occidental poetry, due to Goethe's reading of the Persian poets, notably Hafiz His young friend Marianne von Willemer contributed several poems to the *Diwan*, in which she figures as Suleika. Goethe's unsuccessful marriage offer (1822) to 18-year-old Ulrike von Levetzow, whom he met at Marienbad, inspired his poems *Trilogie der Leidenschaft* [trilogy of passion], which were among his finest Finally, in 1829, appeared the last installment of *Wilhelm Meisters Wanderjahre* [the travel years of Wilhelm Meister], a somewhat disconnected series of short stories, and in 1831, very shortly before his death, the last line of Faust was finished Goethe is buried, beside Schiller, in the ducal crypt at Weimar. Goethe was an amateur cellist; he knew French, English, Italian, Latin, Greek, and Hebrew, and he translated works by Diderot, Voltaire, Benvenuto Cellini, Byron, and others, he was an accomplished horseman, swimmer, and skater, he had occupied himself, at various periods of his life, with theology, medicine, and archaeology, he acted, in his earlier years, on the Weimar stage, he edited various literary, artistic, and scientific periodicals, and he corresponded extensively, notably with the composer Zelter and with Schiller, Byron, Carlyle, and Manzoni. In his aim to make his life a concrete example of the fullest potentialities of man he succeeded as perhaps did no other In his appearance he was handsome in youth and imposing in old age The bulk of Goethe's work is immense, the most recent complete edition is the so-called Weimar edition (133 vols in 140, 1887-1919) Most of Goethe's best-known works have been translated into English, and many of his most popular poems are as familiar in English as in German—e g, "Nur wer die Sehnsucht kennt" [only the lonely heart], "Kennst du das Land" [know'st thou the land], and *Der Erlkönig* These and many others have often been set to music Goethe's lyric poems are unsurpassed in German literature, but many of the finest defy translation, such are the simple and moving "Über allen Gipfeln ist Ruh," "Wanderers Nachtlied," and "An den Mond" Among his ballads, *Der Erlkönig*, *Der König in Thule*, *Der Zauberlehrling* [the sorcerer's apprentice], and *Die Braut von Corinth* are deservedly the most celebrated The opinions of Goethe are recorded not only in his own writings, but also in conversations recorded by his faithful secretary J P. Eckermann and by others The literature on Goethe is vast, both his life and his work are too complex and—on the surface at least—too often inconsistent to allow an easy approach or a unanimous judgment Among biographies available in English are those by G H Lewes (2 vols, 1855), Abraham Hayward (1877), James Sime (1888), Albert Bielschowsky (Eng tr, 3 vols, 1905), Georg Brandes (Eng tr, 2 vols, 1924), and J G Robertson (1927) Among recent biographies in German that by Friedrich Gundolf (1916) must be mentioned Ludwig Lewisohn edited *Goethe the Story of a Man* (2 vols, 1949), told in selections from Goethe's own words and the words of his contemporaries, this is among the most valuable contributions to recent Goethe literature Literary and biographical studies are legion Among them are the well-known essays by Carlyle and Emerson The following works are, or contain, more recent appraisals George Santayana, *Three Philosophical Poets* (1910), Barker Fairley, *Goethe as Revealed in His Poetry* (1932) and *A Study of Goethe* (1947), André Gide, *Imaginary Interviews* (Eng tr, 1944), Ernst Cassirer, *Rousseau, Kant, Goethe* (Eng tr, 1945), Thomas Mann, *Essays of Three Decades* (Eng tr, 1947), Albert Schweitzer, *Goethe Four Studies* (Eng tr, 1949), Karl Vietor, *Goethe the Poet* (Eng tr, 1949), Ludwig Lewisohn, *The Magic Word* (1950), Rudolf Magnus, *Goethe as a Scientist* (Eng tr, 1949) Several English Goethe anthologies appeared on the occasion of the 200th anniversary of Goethe's birth Among them are *The Permanent Goethe* (ed by Thomas Mann, 1948), *Goethe's World* (ed by Berthold Biermann, 1949), *Goethe Wisdom and Experience* (selected by Ludwig Curtius, 1949)

Goff, Emmet Stull, 1852-1902, American economic botanist, b near Elmira, N Y from 1882 to 1889 he was horticulturist at the agricultural experiment station at Geneva, N Y, and from 1889 he was professor of horticulture at the Univ of Wisconsin, as well as horticulturist at the state experimental station in Madison He was a leader in the development of the use of spraying to combat harmful insects and fungi, and he invented a device for using kerosene in spray pumps for that purpose Goff conducted important researches on the root systems of plants, made studies of budding, and developed new, hardy varieties of plums His works include *Principles of Plant Culture* (1897), *Lessons in Pomology* (1899), and, with D. D Mavne, *First Principles of Agriculture* (1904)

Goffe, William, c.1605–c 1679, English Puritan, one of the REGICIDES A personal adherent of Oliver and Richard Cromwell, he fought in the civil war and served in Parliament under them He was excepted from the Act of Indemnity (at the Restoration) and fled to America where, after short periods in Cambridge, New Haven, and Guilford he lived in seclusion at Hadley, Mass The tradition that he headed the citizens in repelling an Indian attack was used by Scott in his *Peveril of the Peak* and by Cooper in his *Wept of Wish-ton-Wish* He is also the subject of "The Gray Champion" in Hawthorne's *Twice-told Tales*

Goffstown, town (pop 4,247), S N H, WNW of Manchester, inc 1761 Granted in 1734 by Massachusetts, it was regranted in 1748 by the MASONIAN PROPRIETORS

Gog, in the Bible **1** Reubenite 1 Chron. 5.4 **2** In the prophecy in Ezek 38-39, a leader who will attack Israel and be defeated Magog is his country Gog is often identified with the Scythians The same theme is used in Rev 20 8, where the assailants are Gog and Magog

Gogarty, Oliver St. John (gō'gärtē), 1878–, Irish author and wit, a surgeon He is most famous as the character Buck Mulligan in James Joyce's *Ulysses*. His own early reminiscences of his friends

in the Irish literary renaissance, especially Joyce and W B Yeats, are in *As I Was Going down Sackville Street* (1937, rev ed 1939) and *Mourning Becomes Mrs Spendlove* (1948) *Selected Poems* (1913) contains his best poetry He was a senator of the Irish Free State from 1922 to 1936

Gogebic (gōgē'bik, gōjē'bik), range, c 80 mi long, extending westward from the W Upper Peninsula, N Mich , into N Wisconsin, known for its iron deposits The name Penokee is sometimes given to the western end, sometimes to that part in Wisconsin, and, rarely, to the whole range

Gogh, Vincent van (vän gō', Dutch vinsənt' vän khôkh'), 1853–90, postimpressionist painter, b Netherlands, son of a clergyman As a youth he abandoned his position with a picture dealer to preach to the miners, but was soon dismissed as an evangelist for misplaced zeal In 1880, 10 years before his death, he decided to be a painter His early pictures such as *The Potato Eaters* were very dark In 1886 after many hardships and several abortive romances, he joined his younger brother Théo in Paris There he met Pissarro, Toulouse-Lautrec, Degas, and Gauguin and began to paint the brilliantly colored and dynamic pictures that later made him famous Two years later in ill-health, he took a house in Arles, where he was joined by Gauguin During this period he developed very rapidly, painted an incredible number of pictures, and had his first attack of madness He was confined first to the Arles Hospital, then to the asylum at Saint-Remy The remaining two years of his life he was subject to violent attacks, but was sane for long intervals and continued to paint pictures of extraordinary beauty and intensity In 1890, despairing of his cure, he shot himself Perhaps no painter has expressed so poignantly as Van Gogh the rapture of mere vision His magnificent and unique landscapes, portraits, and still lifes are familiar to all lovers of modern painting and are prized in private collections and famous galleries in Europe and America A few notable examples are *L'Arlésienne, Bedroom at Arles* (Art Inst , Chicago), *Sunflowers* (Louvre), and *The Starry Night* (Mus of Modern Art, New York) See *Letters of Vincent van Gogh to His Brother, 1872–1886* (2 vols , Eng tr , 1927), Julius Meier-Graefe, *Vincent van Gogh* (2 vols , Eng tr , 1922)

Gogmagog (gōg'măgŏg), low chalk hills, Cambridgeshire, England

Gogol, Nikolai Vasilyevich (nyĭkulĭ' vŭsē'lyuvĭch gô'gul), 1809–52, Russian short-story writer, novelist, and playwright He was the herald of realism in Russian literature Of Cossack origin, he first won literary success with fanciful and romantic tales of the old Cossack realm of the Ukraine in *Evenings on a Farm near Dikanka* (1831, Eng tr 1926) In romantic vein also were two of the tales in *Mirgorod* (1835, Eng tr 1928), especially "Taras Bulba," in which the old free Cossackdom is evoked The tales which followed were more realistic, especially *The Overcoat* (1842, many English translations), dealing with the humble and downtrodden of St Petersburg Gogol's masterpiece is the long novel *Dead Souls* (1842, many English translations), the "souls" being serfs who even in death are pawns of the gentry The novel is a vast canvas of Russian country life prior to the emancipation Gogol was prevented from continuing *Dead Souls* by a religious and moral crisis in which he sought to whitewash serfdom As a dramatist Gogol's fame rests chiefly on *Revizor* (*The Inspector-General*, 1836, often translated), a satire of provincial officialdom rich in characterization His play *The Marriage* (1842) had great influence on Ostrovski and other playwrights and with *The Gamblers* (1842) is available in English (1927) See biographies by Janko Lavrin (1926) and Vladimir Nabokov (1944)

Gogra (gō'grē), river, c 600 mi long, rising in SW Tibet and flowing through Nepal into India It joins the Ganges in W Bihar state The Gogra is a great shipping artery

Goiânia (goiā'nyu), city (pop 14,943), capital of Goiás state, central Brazil, on the interior plateau of Brazil It was planned in 1933 to replace Goiás city as state capital and did replace it in 1937 (when still under construction) It is an ultra-modern city, a shipping point for cattle and minerals, and the seat of several technical schools

Goiás (goush') state (240,300 sq mi , 1949 estimated pop 997,636), central Brazil Goiânia is the capital Goiás is a landlocked plateau crossed by mountain ranges Some of the rivers (notably the Tocantins and the Araguaia) are in the Amazon system, some flow S in the Paraná system Though mining prospectors from São Paulo arrived in the 17th cent and there were small gold rushes in the 18th cent , the state is still unexploited It has much untapped mineral wealth (quartz crystals, diamonds, nickel, and chromium) The wide savannas are given over to cattle, and there are tobacco farms Goiânia was built to replace the old (18th cent) and fever-ridden city of Goiás as capital A site in Goiás has been chosen for the future capital of Brazil The name formerly was Goyaz.

Golan (gō'-) [Heb ,=circuit], refuge city, somewhere in Manasseh E of the Jordan Deut. 4 43, Joshua 20 8, 21 27, 1 Chron 6 71

Golconda (gŏlkŏn'du), deserted city, Hyderabad state, India The capital (1364–1512) of the Bahmani kingdom, it was captured (1512) and was capital of the so-called kingdom of Golconda until 1589 After the Golconda domain was conquered (1687) by Aurangzeb, the city declined The main feature of Golconda is its medieval fort on a hill 400 ft high There are many ruined palaces and mosques The city at its peak was so famed for its wealth that its name was a byword in English. It was a diamond-cutting center

Golconda, town (pop 1,301), co seat of Pope co , SE Ill., on the Ohio and N of Paducah, Ky , in a farm area, inc 1845 Fluor spar is mined near by

gold, metallic element (symbol=Au [Latin *aurum*], for physical constants, see ELEMENT, table) Very ductile and the most malleable of the metals, it can be beaten into extremely thin sheets (see GOLD LEAF) In ability to conduct electricity only silver and copper are superior Chemically inactive, it is neither corroded by moisture nor affected by oxygen or ordinary acids, it reacts, however, with chlorine and other halogens and is attacked by aqua regia (a mixture of nitric and hydrochloric acid which liberates chlorine) and by selenic acid It forms both univalent (aurous) compounds and trivalent (auric) compounds A relatively soft metal, it is usually hardened by alloying with copper, silver, or other metals White gold, a substitute for platinum, is an alloy of gold with platinum, palladium, nickel, or nickel and zinc Green gold, also used by jewelers, is usually an alloy of gold with silver Alloys of gold with copper are a reddish yellow and are used for coinage and jewelry The natural alloy with silver is electrum, with bismuth, maldonite The gold content of an alloy is commonly stated in carats, a carat being $^1/_{24}$ part by weight of the total mass Pure gold is therefore 24 carats fine, an alloy that is 75 percent gold is 18 carats fine Gold is widely distributed on the earth, although large amounts are present also in sea water, the cost of current methods for recovering it exceeds its value Most gold is found in the metallic state in the form of dust, grains, flakes, or nuggets It occurs, usually in association with silver or other metals, in quartz veins or lodes and in alluvial placer deposits Placer deposits are worked by panning, dredging, and hydraulic mining Gold is extracted from its ores by mechanical means and separated from other metals by chemical processes, notably the CYANIDE PROCESS, the AMALGAMATION PROCESS, and the chlorination process (in this the ore is oxidized and chlorinated and the gold precipitated with hydrogen sulphide) Gold occurs also in compounds, notably the telluride Gold has been known from prehistoric times and was possibly the first metal used by man. It was valued for ornaments (see GOLDWORK), and magical efficacy was attributed to it In the Middle Ages alchemists sought to transmute baser metals into gold The quest for gold stimulated European explorations and conquests in the Western Hemisphere Discoveries of gold, notably in California (1848), Victoria, Australia (1851), the WITWATERSRAND (1884), and the KLONDIKE (1896), were followed by great influxes of prospectors to the sites Gold production was stimulated by an advance (1934) in the value of gold to $35 a troy ounce The chief producers are the Union of South Africa, the USSR, Canada, and the United States (especially the Western mountain states, notably California) Gold is a generally accepted means of balancing international accounts and has been a favored metal for the backing of currency (see BIMETALLISM and MONEY) See W H Emmons, *Gold Deposits of the World* (1937), T K Rose and W A. C Newman, *Metallurgy of Gold* (7th ed , revised, 1937)

goldbeating see GOLD LEAF

Goldberg, Rube, 1883–, American cartoonist, whose full name is Reuben Lucius Goldberg After drawing (1904–7) cartoons for San Francisco newspapers, he moved to New York There he worked (1907–21) for the New York *Evening Mail* until his cartoons became syndicated (1921) He originated, among others, the successful comic strip "Boob McNutt" and the panel series "Foolish Questions " He is known for his panels showing fabulously involved machinery for simple operations He was appointed (1938) political cartoonist for the New York *Sun*. A one-man show of his cartoons was held (1942) in the J P Morgan house, New York, where a Goldberg mural covered an entire wall.

Goldberger, Joseph, 1874–1929, American medical research worker, b Austria-Hungary, grad Bellevue Hospital Medical College, 1895 He came to the United States at the age of six He joined the U.S Public Health Service in 1899, specializing in preventive medicine, infectious diseases, and nutrition. Working on PELLAGRA, he discovered the cause to be the deficiency of a nutritive factor which he called "pellagra preventive" (P-P) and which is now known to be niacin (or nicotinic acid). See biography by R P. Parsons (1943).

Gold Coast, British colony and protectorates (91,690 sq mi , pop 4,095,276), W Africa The capital is Accra The Gold Coast comprises the crown colony of Gold Coast (23,490 sq mi , pop 2,194,466) with the capital at Cape Coast, British TOGOLAND, and the inland protectorates of NORTHERN TERRITORIES and ASHANTI It is bordered on the north by French West Africa, on the east by French Togoland, and on the west by the Ivory Coast The coast (c 350 mi) of the crown colony is flat, swampy, and exposed except for the harbor at Takoradi Behind this sandy foreshore is a grass strip gradually widening from a few yards near Takoradi to 50 mi at the Volta, the largest river of the country The forest region to the north, broken by steep ridges and hills, is well watered by streams, especially in the western portion, where gold, from which the country derives its name, is still panned and mined Manganese, bauxite, diamonds, hardwoods, and cacao are other important products There are railroads to Kumasi in Ashanti and highways to the cattle-raising region of the Northern Territories The earliest European settlement in the crown colony was made by Portugal in 1482 at Elmina for the trade in gold and slaves Holland and Great Britain soon followed The British crown colony was created in 1874 There is a college near Accra See W E F Ward, *A History of the Gold Coast* (1948)

Golden, city (pop 3,175, alt c 5,600 ft), co seat of Jefferson co , N central Colo , just W of Denver, in a coal, gold, clay, and farm area A resort city and clay-products manufacturing center, it was founded in 1859, it served as the territorial capital from 1862 to 1867 and was incorporated in 1886 COLORADO SCHOOL OF MINES and the state industrial school for boys are here On near-by Lookout Mt is the grave of Buffalo Bill

Golden Fleece, in Greek mythology, the magic fleece of a ram given by Hermes to Nephele, the wife of Athamas According to one version of the story, when Athamas' second wife, Ino, out of jealousy planned death for Nephele's children, Phrixus and Helle, the ram carried them away When Phrixus arrived at Colchis, he sacrificed the ram and hung the fleece in a wood guarded by a dragon The ram became the constellation Aries Phrixus married a daughter of Aëtes, king of Colchis The quest of JASON and the Argonaut band was for the Golden Fleece, which Jason took after fulfilling tasks put upon him by Aëtes

Golden Gate, strait, 5 mi long and 1 to 2 mi wide, W Calif , between San Francisco Bay and the Pacific Ocean

Golden Gate Bridge, W Calif , across the Golden Gate from San Francisco to Marin co , built 1933–37 Its over-all length is 9,266 ft , and the span across the strait is 4,200 ft long J B Strauss was the chief engineer

Golden Gate International Exposition, 1939–40, held at Treasure Island in San Francisco Bay The theme of the exposition was the Pacific basin—the American West Coast and the Far East, with suggestions of Maya, Inca, Malayan, and Cambodian influence The illumination was spectacularly beautiful, as were the horticultural displays Among the art exhibits was a remarkably fine collection of old masters

golden glow, double variety (*Rudbeckia laeinata hortensia*) of a native North American coneflower closely related to the black-eyed Susan A tall perennial, it is cultivated for the abundance of long-blooming yellow heads of flowers

Golden Horde, Mongol host, so called because of the magnificence of the camp of its leader, BATU KHAN, grandson of Jenghiz Khan The Tatar empire (see TATARS) of the Golden Horde, also called the Kipchak khanate, was founded in the mid-13th cent and comprised most of Russia The khans, with their capital at SARAI on the Volga, ruled part of the empire directly, the rest (e g , the grand duchy of Moscow) being merely tributary The Golden Horde itself was, at first, tributary to the Great Khan at Karakorum, and it took part in Kublai Khan's conquest of S China Among its early rulers were shamanists, Christians, and Moslems, but after 1314 Islam became the official religion Complete religious tolerance continued throughout the existence of the empire. The victory (1380) of Dmitri Donskoi, grand duke of Moscow, over Khan Mamai at Kulikovo marked the ascendancy of Moscow and the decline of the Golden Horde. Soon afterward the Golden Horde passed under the suzerainty of Tamerlane, but after Tamerlane's death (1405) the empire broke up into the independent khanates of ASTRAKHAN,

KAZAN, CRIMEA, and SIBIR. In 1480 Ivan III of Moscow shook off completely the Tatar yoke The period of the Golden Horde immensely influenced the development of RUSSIA

Golden Horn see ISTANBUL

Golden Legend, The, collection of saints' lives written in the 13th cent by JACOBUS DE VORAGINA It was originally entitled *Legenda sanctorum* [readings in the lives of the saints] but soon came to be called *Legenda aurea* [the golden legend] because of its popularity, which continued until the Reformation It is a saints' calendar, with an introduction for each division of the year and a section on each great feast day (including those of OUR LORD) It is a compilation of wonder stories, governed by the moral purpose of presenting the ideals of saintly living and not critical or historical in purpose, it was a devotional book rather than a real collection of biographies. It was early translated from Latin into the vernacular languages, and William Caxton published one of the English translations The fantastic impossibility of some of the stories (accepted less out of sheer credulity than in the belief that moral truth overrides mere fact) and the simple, graceless style of the Latin brought the scorn of Renaissance humanists Only recently has it been recognized that the book is highly valuable as a repository of medieval folklore An excellent, somewhat abridged adaptation by Granger Ryan and Helmut Ripperger appeared in 1941

goldenrod, any species of the large genus *Solidago,* chiefly North American herbs which bloom in late summer and autumn They are characterized by small yellow (rarely white) composite flowers usually clustered along the end of a wandlike stem Goldenrods were formerly considered responsible for most cases of hay fever, a theory no longer held They attracted commercial attention when certain species were found to contain rubber Some species, occasionally called dyer's-weed, have yielded a dye The fragrant leaves of one species—the sweet goldenrod or Blue Mountain tea (*Solidago odora*)—have been used as a medicinal infusion and a tea The goldenrod adds decoration to field and roadside in so many parts of the United States that it has been chosen as the state flower of Alabama, Kentucky, and Nebraska and has been suggested for the national flower

Golden Rule, a saying of Jesus, "As ye would that men should do to you, do ye also to them likewise" Luke 6 31, Mat 7 12 It is stated negatively in Tobit 4 15

golden tuft see ALYSSUM

Golden Valley, village (pop 2,048), E Minn , western suburb of Minneapolis

Goldfield, town (pop 554), SW Nevada, S of Tonopah Gold was discovered here in 1902, and after an early period of disappointment, large yields of high-quality gold were extracted A rush in 1903 built a lusty city, which was soon remarkable for its exuberant elegance, with a theater, a large hotel (still standing), and various fine residences Tex Rickard, a saloonkeeper here, promoted the noted prize fight between Joe Gans and Battling Nelson in 1906 A strike by the miners caused Federal troops to be brought to Goldfield in 1907 Production climbed to its height in 1910, then fell off Goldfield declined almost as fast as it had risen

goldfinch, name of several finches of Europe and America In North America the eastern goldfinch (thistle bird or wild canary) is an all-year resident over most of the continent except in the Far North In spring the male has vivid yellow and black plumage, the rest of the year he is olive yellow like his mate Goldfinches are gay, gregarious birds with an ecstatic, musical song They feed on seeds and insect pests There are several Western forms The British goldfinch was introduced several times, never successfully, into the NE United States, where it is occasionally seen It has a cinnamon-brown back, yellow and black wings, and a red face

goldfish, fresh-water fish of the carp and minnow family much used in aquariums and ponds Native to China, it was first domesticated there centuries ago from the wild form, an olive-colored carplike fish usually from 8 to 12 in long It reverts to this type when it escapes from domestication Breeders in Japan, China, and America have developed bizarre varieties with fan, fringe, and veil tails, sometimes double or triple finned Some have bulging "telescope" eyes The majority of those bred commercially have a metallic sheen, usually of red or gold, white, silver, or black These are known as scaled goldfish The less popularly known forms called scaleless actually have transparent scales and appear in bright red, blue, shades of purple, and variegated calico patterns Goldfish are marketed in lengths ranging from 1 to 4 in The common goldfish, the simplest form, is the one bred extensively in the United States See W T Innes, *Goldfish Varieties and Water Gardens* (1947).

Goldingen, Latvia see KULDIGA

gold leaf, gold beaten into thin sheets or leaves It is used in certain GILDING processes and is usually sold, interleaved with soft paper, in books of 25 leaves, each about 3¼ in square and approximately $^{1}/_{300,000}$ to $^{1}/_{250,000}$ in thick. The gold is alloyed to produce the desired hue and to offset its tendency to stickiness It is cast into ingots, rolled, annealed, cut into small squares which are hammered between sheets of vellum, then twice quartered and rebeaten between sheets of goldbeater's skin, a membrane from the intestines of oxen The extreme thinness to which gold can be beaten without disintegrating is said to be about $^{1}/_{300,000}$ in Substitutes for gold leaf include Dutch gold (tombac), a copper alloy, and silver leaf which is colored after application

Goldman, Edwin Franko, 1878–, American bandmaster and composer, b Louisville, Ky , pupil of Dvorak at the National Conservatory of Music, New York He was solo cornetist (1895–1905) of the orchestra of the Metropolitan Opera Company In 1918 he organized the Goldman BAND. He composed nearly 100 marches for it and wrote manuals on cornet playing and band techniques

Goldman, Emma, 1869–1940, American anarchist, b Russia She came to Rochester, N Y , in 1886 and worked there in clothing factories After 1889 she was active in the anarchist movement, and her speeches attracted attention throughout the United States In 1893 she was imprisoned for inciting to riot From 1906 she was associated with Alexander BERKMAN in publishing the anarchist paper *Mother Earth* In 1916 she was imprisoned for publicly advocating birth control, and in 1917 for obstructing the draft With Berkman she was deported in 1919 to Russia but left that country in 1921 because of her disagreement with the Bolshevik government In 1926 she married James Colton, a Welshman She was permitted to reenter the United States for a lecture tour in 1924 on condition that she refrain from public discussion of politics She took an active part in the Spanish civil war in 1936 She died in Toronto See her *Living My Life* (1931) Other writings include *Anarchism and Other Essays* (1911), *Social Significance of Modern Drama* (1914), and *My Disillusionment in Russia* (1923)

Goldmark, Karl, 1830–1915, Hungarian composer He is known for his concert overture *Sakuntala* (1865), his symphony *A Rustic Wedding,* and his opera *The Queen of Sheba* (1875), showing the influence of Wagner's early works His nephew, **Rubin Goldmark,** 1872–1936, b New York city, was educated in New York and Vienna, and was a pupil in composition of Dvorak From 1924 until his death he taught composition at the Juilliard Graduate School He was the teacher of many prominent American composers His compositions include the orchestral works *Samson* (1914), *Requiem* (1919), inspired by Lincoln's Gettysburg Address, *The Call of the Plains,* and *Negro Rhapsody*

Goldoni, Carlo (kär'lō gōldō'nē), 1707–93, Italian dramatist His comedies have a resemblance to those of Molière Aside from their great merits of wit, gaiety, and skillful construction, they established a new Italian character comedy in place of the old *commedia dell' arte* Goldoni's last work and his memoirs (1787, Eng tr , 1814) were written in French Many of his 120 comedies have been translated Among the most notable are *Un curioso accidente* (1750, Eng tr , *The Odd Mistake,* 1814), *La locandiera* (1753, Eng tr , *The Mistress of the Inn,* 1856), *La bottega del caffè* (1753, Eng tr , *The Coffee House,* 1925), *Il ventaglio* (1763, Eng tr , *The Fan,* 1911), *Il burbero benefico* (1771, Eng tr , *The Beneficent Bear,* 1849), and *La buona figliuola* (1756, Eng tr , *The Accomplished Maid,* 1767), which was set to music by Puccini See biography by H C Chatfield-Taylor (1913)

Goldsboro, city (pop 17,274), co seat of Wayne co , E central N C , near the Neuse river SE of Raleigh, in the coastal plains region, settled c 1840, inc 1847 It is an important market for bright-leaf tobacco and the trade and shipping center for a large truck and cotton area It has varied manufactures An orphans' home is here

Goldsborough, Louis Malesherbes, 1805–77, American naval officer, b Washington, D C Appointed a midshipman in 1812, he saw active service in the Mediterranean and in the Mexican War and was superintendent (1853–57) of Annapolis In the Civil War, Goldsborough, commanding the North Atlantic Blockading Squadron, directed the fleet which supported Gen A E BURNSIDE in the successful expedition against the North Carolina coast (1862) His James River Squadron was defeated at Drewrys Bluff in the Peninsular campaign (May, 1862) Goldsborough maintained that he could not take Richmond without supporting successes on land by McClellan The Dept of the Navy thought otherwise, and the James River Squadron was given to Charles Wilkes as an independent command Goldsborough was subsequently relieved at his own request but remained in the navy till 1873 He was made rear admiral in 1862

Goldschmidt, Meir Aaron, Dan *Meïr* (mī'ur ä'rōn gōl'shmĭt), 1819–87, Danish editor and author, of Jewish parentage He founded the critical weeklies *Corsaren* (1840) and *North and South* (1847) In his novel *The Jew* (1845, Eng tr , *The Jew of Denmark,* 1852) the home life of a Jewish family is pictured One of his most successful novels was *Homeless* (1853–57, Eng. tr , 3 vols , 1861), *The Heir* (1863; Eng. tr , 1865) is the first Danish novel to deal with the problem of divorce His outlook on life was influenced by the writings of Linnaeus and Swedenborg

Goldschmidt, Otto (ō'tō gōlt'shmĭt), 1829–1907, German conductor, pupil of Mendelssohn and Chopin In 1851 he came to the United States as conductor of concerts featuring Jenny Lind, whom he married in 1852 He founded (1875) the London Bach Choir, which he conducted until 1885 His compositions include piano pieces and an oratorio

Goldschmidt, Richard Benedikt (gōld'shmĭt), 1878–, American zoologist and geneticist, b Germany, Ph D Heidelberg, 1902 He taught at the Univ of Munich (1903–14) and was at the Kaiser Wilhelm Institute, Berlin, from 1914 to 1936 (as director from 1921) In 1936 he came to the United States and served as professor of zoology at the Univ of California (1936–48) His works include *The Mechanism and Physiology of Sex Determination* (1923), *Ascaris the Biologist's Story of Life* (1937), *Physiological Genetics* (1938), and *The Material Basis of Evolution* (1940)

Goldsmith, Oliver, 1730?–1774, British poet, dramatist, and novelist, b Ireland, perhaps in Co Roscommon, grad Trinity College, Dublin, 1749 Refused ordination, he went first to the Univ of Edinburgh and then to Leiden, ostensibly to study medicine He traveled through Western Europe and may have obtained a medical degree After his return to England in 1756 he was unsuccessful as a physician, and destitution forced him to hack writing His *Enquiry into the Present State of Polite Learning in Europe* (1759) first brought him favorable notice, and his fame grew with *The Citizen of the World* (2 vols , 1762), a collection of his "Chinese Letters" from the *Public Ledger* Next appeared the long poem *The Traveller* (1764), of the same type he made more famous in *The Deserted Village* (1770) His only novel, *The Vicar of Wakefield* (1766), was a masterpiece of domestic literature, the quiet adventures of Dr Primrose and his family are probably based on those of Goldsmith's father, also a clergyman The novel contains the poems "Elegy on the Death of a Mad Dog" and "When Lovely Woman Stoops to Folly" His comedies *The Good-natured Man* (1768) and *She Stoops to Conquer* (1773), which injected a new note of realism into the sentimental plays of the period, were popular then and in many revivals Goldsmith brought his charm even to his hack work, such as the epistolary *History of the World* (2 vols , 1764), *The History of Little Goody Two-Shoes* (1765) is anonymous but is possibly by him Though he earned a great deal of money, his improvidence kept him poor He was the friend of most of the literary and artistic great of his day, including Johnson, Burke, Reynolds, and Garrick See his collected letters (ed by K C Balderston, 1928) and *New Essays* (ed by R S Crane, 1927), biographies by Sir James Prior (2 vols , 1837), John Forster (2 vols , 1854), Austin Dobson (1888), and Stephen Gwynn (1935)

gold standard see BIMETALLISM and MONEY.

Goldthwaite, Anne (gōld'thwāt), 1874?–1944, American painter and etcher, b Montgomery, Ala , studied at the National Academy of Design and in Paris She taught at the Art Students League after 1920 Among her paintings and etchings (in many galleries in the United States and France) is a still life, *Window at Night* (Metropolitan Mus)

Goldthwaite, town (pop 1,414), co seat of Mills co , central Texas, in hilly country W of Waco Ranches here produce sheep, goats, and cattle, and there are dairy and poultry farms as well as fields of peanuts and grain

goldwork. Early craftsmen developed much skill in fashioning gold into JEWELRY, bowls, cups, plates, and altarpieces and in decorating arms, usually by inlaying in other metals Egyptian jewelry, some dating from 2000 B C , embraces rings, bracelets, necklaces, and other ornaments, sometimes set with precious stones Examples may be seen in museums in Cairo, London, New York, and elsewhere Similar, but fewer, remains have been found in Assyria, Phoenician specimens are more plentiful, of greater variety, and of exceptionally fine workmanship Minoan goldwork from the mainland and Crete (c 2000 B C) includes openwork, embossing, inlay, or jeweled amulets, weapons, vases, masks, boxes, and drinking vessels Early Greek goldwork was excavated by Schliemann at Tiryns and Mycenae Among Oriental countries, Persia is outstanding for the beauty of its goldwork (5th–4th cent B C), as shown in the Oxus (British Mus) and Susa (Louvre) treasures, and later periods continued the traditions India had many centers—Delhi, Cutch, Lucknow, Punjab—noted for goldwork and other metalwork Important examples are in the British Museum and the Victoria and Albert Museum Modern Tibetan goldwork is of superior craftsmanship Scarcity of the metal made Chinese goldwork rare, though the pommel of a dagger (3d cent B C) remains Silverwork was more abundant in early periods Skilled Chinese artisans have continued to create designs of great delicacy Greek goldwork (500–200 B C) displays exquisite filigree, and many guilloche, fret, and wave motifs The Etruscans copied Greek technique and designs, so that there is little to set

their work apart until a later period of over-ornateness The Romans also followed Greek forms, but developed massive mountings enriched with precious stones. Among the few gold objects remaining are a bowl, discovered at Rennes (Bibliothèque nationale); the casket of Projecta (British Mus), and coins. Later work became heavy Italian 14th-century goldworkers produced a wealth of ecclesiastical crosses, reliquaries, sacred vessels, and altar fronts In the Renaissance most artists were trained as goldsmiths and created jewelry and ornaments of a high order CELLINI was especially noted Spain is best represented by her church pieces—elaborate Gothic and Renaissance chalices and unique monstrances In Gaul, from the early Christian era, there were expert craftsmen creating objects in gold, the Carolingians introducing relief work and other ornament from Italy The 13th-century cup of the kings of France (British Mus) is a culmination of French artistry in goldwork French boxes of the 18th cent are notable The Celts in Ireland were noted for their skill, their medieval products including the Ardagh chalice and the Tara brooch, of intricate design and fine workmanship Anglo-Saxons employed spiral, animal, and interlacing ornament, Kent being a center for 6th- and 7th-century goldsmiths Germans produced many cups and tankards and under the leadership of JAMNITZER were influenced by the Renaissance work in Italy Russia and other European countries also produced considerable goldwork In the Western Hemisphere, Mexico, Peru, Costa Rica, and Panama have possessed excellent goldsmiths from early times See Nelson Dawson, *Goldsmiths' and Silversmiths' Work* (1907)

golem (gō'lŭm) [Heb ,=embryo or anything incompletely developed], in medieval Jewish legend, an automatonlike servant made of clay and given life by means of a charm, or *shem* [Heb ,=name, or the name of God] *Golems* were attributed in Jewish legend to several rabbis in different European countries The most famous legend centered around Rabbi Löw, of 16th-century Prague After molding the golem and endowing the clay creature with life, Rabbi Löw was forced to destroy it after it ran amuck The golem legends are often said to have been a morale builder to oppressed Jews in medieval Europe In 1920 Rabbi Low's story was produced as a moving picture in Germany

golf, game played with specially made clubs and balls, on an outdoor course called links The game became identified with Scotland, where it has enjoyed great popularity since the 15th cent and where several golf clubs were organized in the 18th cent The Royal and Ancient Golf Club of St Andrews, Scotland, founded in 1774, became the international shrine of golf, and its basic rules are accepted throughout the world The British Open tournaments, played annually, were begun in 1860 The game began to be popular in the United States after 1888, when the St Andrews Golf Club of Yonkers, N Y , was formed by John G Reid. Today many municipal courses afford playing opportunity to those who have no access to country clubs or privately owned courses The U S Golf Association, founded in 1894, is the governing body of the game and conducts annual tournaments, including the National Amateur, the National Open (for amateur and professional players), and the National Women's Amateur championships In 1916 the U S. Professional Golfers Association was founded Famous international golf trophies won in competition between British and U S teams are the Walker Cup (amateur), the Ryder Cup (professional), and the Curtis Cup (women) The standard golf course, usually more than 6,000 yd around, is divided into 18 consecutively numbered holes varying in length from 100 to 650 yd from tee to green A player drives his ball (1 68 in in diameter, 1.62 oz in weight, with a pitted, gutta-percha surface) from the tee, his object being to reach the green and there sink the ball in a hole or cup (4½ in in diameter, 4 in deep, and marked by a flag) with as few strokes as possible Between the tee and the green—a smooth surface of closely cropped grass or sometimes firmly packed sand- is the fairway, often bounded by tall grass and trees (the rough) and containing natural or artificial obstacles (hazards), such as water, sand pits, and mounds (traps) A complete set of golf clubs now consists of four woods (driver, brassie, spoon, and cleek) and 10 irons (driving iron, mid-iron, mid-mashie, mashie-iron, mashie, spade-mashie, mashie-niblick, lofter, niblick, and putter) The woods, standardized with the numbers 1 through 4, are used for long drives, and the irons, standardized 1 through 10, are used for shorter shots The putter is used only on the green The game may be played by two (a twosome), three (a threesome) or four players (a foursome), each using a separate ball Strictly speaking, however, a twosome is a single, and a foursome should be played with one ball to each pair of partners, who play their ball on alternate shots In match play, as in the U.S. National Amateur tournaments, the winner is determined on the basis of the number of holes won from an opponent; in medal play, as in the U.S National Open tournament, victory is decided by the lowest stroke total taken in two trips over the entire course, or 36 holes The most famous figure of golf in recent times is Robert Tyre (Bobby) Jones, Jr , who won in 1930 the U S National Amateur, the U S National Open, the British Amateur, and the British Open championships, a feat never equaled before or since Other outstanding golfers include Glenna Collett (Glenna Collett Vare), Thomas Henry Cotton, Mildred Babe Didrickson (Mildred Didrickson Zaharias), Walter Hagen, Ben Hogan, Lawson Little, Jr , John Byron Nelson, Jr , Gene Sarazen, Sam Snead, and Michael and William Turnesa See H B Martin, *Fifty Years of American Golf* (1936), R S Francis, *Golf Its Rules and Decisions* (1937), H W Wind, *The Story of American Golf* (1948)

Golgi, Camillo (kämēl'lō gōl'jē), 1844–1926, Italian physician, noted as a neurologist and histologist He shared with Ramón y Cajal the 1906 Nobel Prize in Physiology and Medicine for work on the structure of the nervous system He introduced (c 1870) a method of staining nerve tissue with silver nitrate, which he used (1883) to demonstrate certain nerve cells (Golgi cells) in the central nervous system He observed (1909) the Golgi apparatus, a part of the cytoplasm distinguishable by special staining and known as the Golgi bodies when in the form of separate particles He recognized that the three types of malaria are caused by different protozoan organisms Golgi taught at the Univ of Pavia from 1875

Golgotha (gōl'gŭthu), the same as CALVARY

Goliad (gō'lēăd), city (pop 1,446), co seat of Goliad co , S Texas, on the San Antonio river and SE of San Antonio A market town for a farm region, it draws its importance from its long past A Spanish mission, first founded on Lavaca Bay in 1722 and moved to present Victoria co in 1726, was established in 1749 at Goliad, then called La Bahia An unthriving frontier town, it was captured and briefly held by filibustering expeditions from the United States in 1812 and 1821 After the Texas Revolution began, the Texans seized it Col J W FANNIN was in command when the Mexican advance into Texas began in 1836 When Fannin evacuated Goliad with more than 300 men and headed for Victoria, he was overtaken by the Mexicans and on March 19, 1836, after a hopeless battle, surrendered unconditionally On March 27 most of the prisoners were shot in cold blood by the Mexicans This Goliad massacre contributed to the battle cry of the victorious Texans at San Jacinto, "Remember the Alamo! Remember Goliad!" The American settlement grew up across the river, the restored mission and the ruins of the old presidio are today in a state park The ruins of another mission (1754) are a few miles to the southwest

Goliardic songs (gōlēär'dĭk), Late Latin poetry written by "wandering scholars " The scholars were university students who were going to or from a university or from one to another, scholars who had completed their studies but were unable to buy benefices, unfrocked priests, and runaway monks or clerks They begged their way from place to place, finding temporary lodgment in cities or monasteries First appearing in large numbers in the 11th cent , the *vagi* or *vagantes* increased until there was a veritable plague of vagabond clerks over Europe Formerly it was believed that in the 13th cent they actually constituted themselves into a burlesque religious order, but it is now more commonly thought that the *ordo vagorum* with Bishop Golias as grand master was merely a literary fiction The name given the scholars, *Goliards*, is of uncertain origin, it may have been derived from the legendary archpoet, Bishop Golias (Goliath), whom some have attempted to identify with Abelard The Church began to take strong measures c 1230 against these makers of verse and scandal, and the Goliards thereafter declined, though their continued existence is proved by later Church edicts against them Their poetry, in lilting Latin verse with stressed rhymes, has some similarity to medieval hymns in form but is the reverse in content Most Goliardic songs are licentious, written in praise of light love, of wine, and of the vagabond's life They attack the Church and churchmen viciously For the most part the songs are anonymous or pseudonymous Some of the best are attributed to Archipoeta, or the Archpoet, who wrote between 1161 and 1165, others to Primus, who was Hugo d'Orléans, a scholar of the early 12th cent A large group of them were once erroneously attributed to Walter MAP The songs are frequently all called *carmina burana* from the title of the collection edited by J A Schmeller (1847) There are collections of Goliardic verse and studies of the Goliards by French, German, and Italian scholars Translations into English appear in *The Cambridge Songs* (ed by Karl Breul, 1915), J A Symonds, *Wine, Women, and Song* (1884), Helen Waddell, *Medieval Latin Lyrics* (1929), and George F. Whicher, *Goliard Poets* (1949). See Helen Waddell, *The Wandering Scholars* (1927).

Goliath (gōlī'ŭth), gigantic Philistine, who challenged the Israelites. The young David, fortified by faith, accepted the challenge and killed him with a stone from a sling. 1 Sam 17, 21.9; 22.10; 2 Sam 21 19.

Gollancz, Sir Hermann (gō'lănts), 1852–1930, English rabbi and authority on Hebrew language and literature He was professor of Hebrew (1902–24) at University College, London. In 1902 he edited an English version of the Bible for Jewish use. His publications include translations from Hebrew and Aramaic He was knighted in 1923

Golovnin, Vasily Mikhailovich (vŭsē'lyē mēkhī'lŭvĭch gŭlŭvnyĕn'), 1776–1831, Russian explorer and writer He was sent in 1807 to make a geographical survey of Kamchatka and the Russian possessions in Alaska, was imprisoned by the Japanese in 1811–13, and made a second trip to Kamchatka in 1817–19 He wrote *Narrative of My Captivity in Japan, 1811–1813* (1816; Eng trs , 1818, 1824)

Goltz, Colmar, Freiherr von der (kōl'mär frī'hĕr fŏn dur gōlts'), 1843–1916, Prussian general and military historian He reorganized the Turkish army (1883–95), and in the First World War he commanded a Turkish army in Mesopotamia His reputation rests on his writings, notably *The Nation in Arms* (1883, Eng tr , 1913)

Goltzius, Hendrik (hĕn'drĭk gōlt'sēŏs), 1558–1617, Dutch line engraver and painter, son of a glass painter He early established himself as a printer in Haarlem, whither he returned after extensive travel in Italy and Germany As an engraver he was extremely versatile, imitating successfully the styles of Lucas van Leyden and Dürer He is best known for his engravings after the work of these and of various Italian masters and for his engraved portraits He produced over 300 plates of great virtuosity

Golytsin: see GALLITZIN

Gomberg, Moses (gŏm'bûrg), 1866–1947, American chemist, b Russia After studying in Russia he came to the United States and was graduated from the Univ of Michigan (B S , 1890) From 1893 to 1936 he taught organic chemistry at the Univ of Michigan He is internationally known for his researches in organic chemistry, including work on trivalent carbon and free radicals, tautomerism in the triphenylmethane series, and ethylene chlorhydrin

Gombos, Julius (gûm'bûsh), Hung *Gömbös Gyula* (dyō'lō), 1886–1936, Hungarian statesman and officer After the First World War he became a leading figure in the nationalist and revisionist movement He was minister of war under the premiership of Bethlen (1921–31) and of Julius Karolyi (1931–32) In Sept , 1932, Gombos became premier He ruthlessly crushed all opposition, curtailed freedom of the press and political liberties, and introduced anti-Semitic bills in the legislature Though favoring a national brand of fascism at home, Gombos opposed the spread of Nazi German influence and for this purpose drew close to Italy and Austria After his sudden death, however, the drift of Hungary toward the Rome-Berlin Axis became inevitable

Gomel (gō'mĕl, -mul, Rus gō'mĭl), city (pop 144,169), capital of Gomel oblast, SE Belorussia, on the Sozh, a tributary of the Dnieper It manufactures agricultural implements, electrical goods, textiles, and glass Dating from the 12th cent , it passed (1772) to Russia in the first Polish partition Until the Second World War about 40 percent of the population was Jewish Gomel was the scene of pogroms in 1905 It was held (1941–43) by the Germans, and most of the Jews who had stayed behind were exterminated

Gomer (gō'ĕr) [Heb ,=finish] **1** Concubine of the prophet Hosea Hosea 1 3 **2** Son of Japheth and eponym of a people, probably the Cimmerians Gen 10 2, 1 Chron 1 5, Ezek 38 6.

Gomes, Antonio Carlos (ănto'nyō kär'lōsh gō'mĭsh), 1836–96, Brazilian composer, studied in Rio de Janeiro and at the Conservatory of Milan His operas, such as *Il Guarany* (1870), often employ Brazilian subjects, but their style, influenced by Verdi, is Italian

Gómez, José Miguel (hōsā' mēgāl' gō'mĕs), 1858–1921, president of Cuba (1909–13) He took part in the Ten Years War (1868–78) and the successful revolution begun in 1895 A liberal, he was defeated for the presidency in 1906 by ESTRADA PALMA, but led an uprising which caused U S intervention and his own successful election Affable and popular, he made some attempt to increase Cuba's material progress, but his administration was marred by corrupt practices He was succeeded by Mario G MENOCAL Supporting Alfredo ZAYAS against Menocal in 1916, Gómes charged fraud and revolted, but was captured In 1920 he unsuccessfully ran against Zayas and again charged fraud. He died in New York city

Gómez, Juan Vicente (hwän' vēsān'tā), 1857–1935, CAUDILLO of Venezuela (1908–35) Of Indian and white parentage, Gómes was born on a ranch near San Cristóbal in the W Andes and grew up as a nearly illiterate cattle herdsman. He catapulted upon the national scene in 1899 when he led his guerrilla henchmen in support of Cipriano CASTRO, under whom he was vice president When Castro was overthrown, Gómes became president, and although he relinquished the title for long intervals, he ruled steadily from his estate near MARACAY. Congress conferred on him the title El Bene-

mérito [the meritorious] but his enemies dubbed him El Bagre [the catfish] because of an obvious facial resemblance enhanced by a bushy mustache Though cordial and simple in manner, Gómes was an absolute tyrant whose secret police ferreted out opposition and subjected victims to imprisonment and torture But, shrewd and industrious, he was also a patriot who brought his country economic stability Even before the oil development at Lake Maracaibo after 1918, he had put Venezuela on a sound financial basis, he was noted for fair dealing with foreign investors, and the capital thus attracted made it possible for him to make Venezuela a modern nation of railroads, highways, and other public works As he enriched the nation, so he made himself enormously wealthy Nepotism was rife Though unmarried, he sired between 80 and 100 offspring, and many of these as well as his local henchmen filled civil positions; he dominated them and other men by savage force of character See biography by Thomas Rourke (1936)

Gómez de Avellaneda, Gertrudis (hĕrtrōō'dhēs gō'-mĕth dā āvĕlyänä'dhä), 1814–73, Spanish poet, b Puerto Príncipe (now Camagüey), Cuba She went to Spain in 1836 and there led a troubled life An unfortunate love affair in Seville is reflected in several passionate poems inscribed "A Él" [to him], among the best of her poems, which are generally considered among the finest of the Spanish romantic period Her later years were tranquil She returned to Cuba in 1860 with much honor but stayed only briefly Besides her poems, she wrote problem novels such as *Sab* (1841) and *Espatolino* (1844) and dramas including *Alfonso Munio* (1844) and two religious plays, *Saúl* (1849) and *Baltasar* (1858)

Gómez Palacio (gō'mĕs pälä'syō), city (pop 25,558), Durango, N Mexico, across the Nazas river from Torreón Practically a suburb of the larger city, it handles on a smaller scale the same agricultural and industrial produce

Gómez y Báez, Máximo (mäk'sēmō, ē bä'ĕs), 1826?–1905, Cuban revolutionist, b Dominican Republic He served in the Spanish army there and in Cuba, but joined the Cuban revolutionists in 1868 and became commander in chief in 1873 At the end (1878) of the Ten Years War, he left Cuba, but returned to serve in the revolution of 1895 Friendly toward the Americans, Gómez was deposed from his command in 1899 for accepting money for his army from the United States

Gomme, Sir Laurence (George Laurence Gomme) (gŏm), 1853–1916, English archaeologist and folklorist A lecturer at the London School of Economics, he was an authority on the history of London and a founder of the Folklore Society He edited the *Archaeological Review*, the *Folklore Journal*, and *Antiquary* Two of his books are *Folklore as an Historical Science* (1908) and *The Making of London* (1912)

Gomorrah or **Gomorrha** (both gŭmŏr'ŭ), city, destroyed with Sodom

Gompers, Samuel (gŏm'pûrz), 1850–1924, American labor leader, b London He came to America with his parents in 1863 He worked as a cigar maker and in 1864 joined the local union, being its president from 1874 to 1881, when he helped found the Federation of Organized Trades and Labor Unions This, reorganized in 1886, became the American Federation of Labor, of which Gompers was first president and of which he remained president, except for the year 1895, until his death He directed the successful battle with the Knights of Labor for supremacy, kept free from political entanglements in the early days, and refused to entertain various cooperative business plans, socialistic ideas, and radical programs, maintaining that more wages, shorter hours, and greater freedom were the just aims of labor As his name appeared more and more frequently in connection with crises in labor troubles he was recognized as a public figure, and his pronouncements carried much weight During the First World War, as head of the War Committee on Labor, which he organized, and as a member of the Council of National Defense, he helped to hold organized labor loyal to the government program A man of great personal integrity, he did much to make organized labor respected See his autobiography, *Seventy Years of Life and Labor* (1925, new ed, 1943), L S Reed, *The Labor Philosophy of Samuel Gompers* (1930), R H Harvey, *Samuel Gompers, Champion of the Toiling Masses* (1935)

Gona (gō'nä), town, on SE New Guinea, in the Territory of Papua, NE of Port Moresby In the Second World War the Japanese made it a base for their unsuccessful drive on Port Moresby

Gonâves (gônäv'), city (pop c 15,000), capital of Artibonite dept, NW Haiti, a port on the Gulf of Gonâves, at the northern limit of the Artibonite plain Together with Saint-Marc at the plain's southern edge, it exports the agricultural products of the region, chiefly cotton, sugar, bananas, coffee, and logwood Here in 1804 Haitian independence was proclaimed and Dessalines, first of the Negro emperors, was crowned. The Gulf of Gonâves, in the pincers of the mountainous northern and southern peninsulas of Haiti, is usually brilliantly blue.

Gonçalves Dias, Antonio (äntō'nyō gônsäl'vĭsh dē'-ûsh), 1823–64, Brazilian poet A leading writer of the romantic school, he is known to every Brazilian for his nostalgic poem beginning "Minha terra tem palmeiras onde canta o sabiá" [in my homeland there are palm trees where the sabiá is singing], which might be called the national Brazilian poem His volumes of poetry include *Primeiros cantos* (1846), *Segundos cantos* (1848), and *Ultimos cantos* (1851), and he also wrote a drama, *Leonor de Mendonça* (1847), and compiled a dictionary of the language of the Tupi (Guarani) Indians (1858)

Goncharov, Ivan Aleksandrovich (gŭnchär' tĭlyĭksän'-drŭvĭch gŭnchŭrôf'), 1812–91, Russian novelist. Three of his novels have been translated—*A Common Story* (1847, Eng tr, 1894), *The Precipice* (1869, Eng tr, 1915), and *Oblomov* (1858, Eng trs, 1915, 1929), a minute portrayal of the indolent and passively submissive type of gentleman common in Russia c 1860 The author's fame rests on this work, which has given the Russian language the word *Oblomovism*. He also wrote *The Frigate Pallas* (1858), based on a journey to Japan

Goncourt, Edmond Louis Antoine Huot de (ĕdmō' lwē' ätwän' uō' dŭ gōkōōr'), 1822–96, and **Jules Alfred Huot de Goncourt** (zhül' älfrĕd'), 1830–70, French authors, brothers They were known, for their close association in art and literature, as "les deux Goncourt" They began as artists, touring France in 1849 and keeping notes which were presently to turn them toward literature They were art critics and historians of art, unsuccessful dramatists, promoters of Japanese art, and, in collaboration, the authors of a number of well-known novels of the naturalist school, including *Charles Demailly* (1860), *Sœur Philomène* (1861), *Renée Mauperin* (1864, Eng tr, 1887), *Germinie Lacerteux* (1865), *Manette Salomon* (1867), *Mme Gervaisais* (1869), and a study, *The Woman of the Eighteenth Century* (1862, Eng tr, 1927) After his brother's death Edmond wrote *La Fille Élisa* (1878), *Les Frères Zemganno* (1879), and *Chérie* (1884) In 1851 the brothers began the *Journal des Goncourt* (9 vols, 1887–96, Eng tr of selections by Lewis Galantière, 1937), an immensely successful publication devoted to an intimate account of Parisian society for 40 years The brothers affected an elaborated and contorted style, employed telegraphic brevity on occasion, and often selected subjects of sensational value Their work paved the way for both naturalism and impressionism In his will Edmond provided for the founding of the Goncourt Academy (officially recognized 1903), which makes an annual award, the Goncourt Prize, for fiction

Gond (gŏnd), ethnic group (c 3,000,000), India The population is centered in Madhya Pradesh, where four Gond dynasties ruled (14th–18th cent) The Gonds, predominantly Hindu, are mainly organized into low-caste tribes of simple culture

Gondar (gŏn'dur), town (pop 15,000), NW Ethiopia It was the Ethiopian capital from c 1650 until 1867, when it was nearly destroyed by Emperor Theodore in the course of civil war There are remains of palaces and churches of the 17th and 18th cent. Gondar was the last outpost in Italian East Africa to fall (1941) to Great Britain in the Second World War

Gondi, Paul de see Retz, Jean François Paul de Gondi, Cardinal de

Gondola, Giovanni: see Gundulic, Ivan

gondola (gŏn'dŭlu), type of boat used on the canals of Venice since the 11th cent Gondolas are long, narrow, and flat-bottomed, with high tapering prows and sterns They average in size about 30 ft long by 4 ft wide The operator, known as a gondolier, stands in the stern and propels the boat with a single oar A curtained cabin in the center of the boat accommodates from four to eight persons Once gondolas were gaily colored and decorated with rich embroideries, but they are now required by law to be somber black

Gondomar, Diego Sarmiento de Acuña, conde de (gōn'dōmar', Span, dyä'gō särmyĕn'tō dā äkōō'-nya kōn'dā dā gōndōmar'), 1567?–1626, Spanish ambassador to England (1613–18, 1620–22) He gained great influence over James I and dissuaded him from giving real assistance to his son-in-law, Frederick the Winter King, at the outset of the Thirty Years War Gondomar was highly unpopular in England He was attacked in Thomas Middleton's play *A Game at Chess*

gong, percussion instrument consisting of a disk with upturned edges, usually made of bronze and struck with a mallet or drumstick It is of Oriental origin and is also called tam-tam French composers of the period of the French Revolution made use of it in orchestral music, as have some composers of the 19th and 20th cent European gongs are usually of indeterminate pitch

Góngora y Argote, Luis de (lwĕs' dä gōn'gōrä ē ärgō'tä), 1561–1627, Spanish poet He studied in Salamanca and became a priest He was a poet of elegance and genius, whose wit and solid culture led to the rise of the tendency bearing his name—Gongorism—which is the equivalent in Spanish literature of euphuism in England He wrote ballads, sonnets, and other short traditional verses, but his fame rests on his longer works, which include *Panegyrico al duque de Lerma*, *Fábula de Polifemo y Galatea* and the *Soledades* The use of the metaphor and the hyperbaton in a new and creative manner, with mythology as a source of inspiration, are outstanding characteristics of his style Góngora was the last of the great poets of the Golden Age His influence on modern poetry has been great

gonorrhea (gŏnurē'u), infectious venereal disease caused by the gonococcus (*Neisseria gonorrheae*) It is in most instances transmitted to the genital organs by direct contact It attacks the genitourinary tract in both males and females and spreads to adjacent structures Through the lymphatic system it may be carried to other parts of the body, producing various severe infections Diagnosis is based on the history and symptoms and on the examination of stained smears from the genitourinary tract or from joint-fluid exudate Intradermal tests are useful in diagnosis, but only after a lapse of several weeks following the initial infection The condition is treated with sulfa drugs, penicillin, and diathermy Conjunctivitis in the newborn (*ophthalmia neonatorum*) is caused, in the majority of cases, by the gonococcus, transmitted to the infant at birth from the genital tract of the mother Blindness resulting from gonorrhea has been reduced by the practice of placing one drop of one-percent silver nitrate solution in each eye of every infant at birth (Crede's method of treatment)

Gonville and Caius College. see Cambridge University

Gonzaga (gōntsa'ga), Italian princely house which ruled Mantua (1328–1708), Montferrat (1536–1708), and Guastalla (1539–1746) The family name is derived from the castle of Gonzaga, a village near Mantua **Luigi Gonzaga** (lwē'jē), 1267–1360, became captain general of Mantua in 1328 The power of his descendants grew in the 14th cent, and in 1433 Emperor Sigismund made **Gian Francesco Gonzaga** (jän' fränchä'skō), d 1444, marquis of Mantua His grandson, **Francesco Gonzaga,** d 1519, married Isabella d'Este He led the allied troops which defeated (1495) Charles VIII of France at Fornovo During the Italian Wars, Francesco and Isabella had great difficulty in preserving the independence of Mantua Francesco fought in turn for Venice for the French, and for Pope Julius II The court of Mantua, long a center of the arts and letters, was particularly brilliant under Francesco and Isabella Their son and successor, **Federico** or **Federigo Gonzaga** (fädārē'kō, fädārē'gō), 1500–1540, was made duke of Mantua (1530) by Emperor Charles V In 1536 he acquired Montferrat, which continued to be claimed by Savoy His brother **Ercole Gonzaga** (ĕr'kōlä), 1505–63, cardinal of the Roman Church, was long regent of the duchy He furthered learning and the arts and presided over the Council of Trent A younger brother, **Ferrante Gonzaga** (fĕr-ran'tä), 1507–57, was generalissimo of Emperor Charles V in Italy, France, and Flanders He acquired (1539) the county of Guastalla, which remained with his direct descendants until their extinction in 1746, in 1748 it was annexed to the duchy of Parma In 1627 the senior male line of the older branch, ruling Mantua and Montferrat, became extinct A cadet line, established in France, had succeeded, by marriage, to the duchies of Nevers and Nivernais and Rethel, and in 1627 began to claim the succession to Mantua and Montferrat Its claim was strengthened by the marriage of Maria Gonzaga, sole heiress of the senior line, with Charles de Rethel, son of the duke of Nevers France supported the Nevers branch, while Spain supported the claims of the Guastalla branch War between France and Spain broke out over the contested succession and helped to draw France into the Thirty Years War The Nevers branch ultimately won and ruled Mantua and Montferrat until it in turn became extinct (1708) during the War of the Spanish Succession Austria then annexed Mantua, and Savoy annexed Montferrat

Gonzaga University: see Spokane, Wash

Gonzales, Ambrose Elliott (gŏnzä'lĭs), 1857–1926, American editor and author, b Adams Run, S C He was founder and editor (1891–1922) of the Columbia, S C, *State*, a progressive reform paper organized to oppose the Tillman regime in South Carolina His four books of short stories—*The Black Border* (1922), *With Aesop along the Black Border* (1924), *The Captain* (1924), and *Laguerre a Gascon of the Black Border* (1924)—capture the mentality and customs as well as the dialect of the Gullah Negroes His brother, **Narciso Gener Gonzales,** 1858–1903, helped found the *State* He was shot and killed by James H Tillman, nephew of Benjamin Tillman Narciso's *In Darkest Cuba* (1922) has an introduction by A E Gonzales which contains biographical material

Gonzales, Richard Alonzo, 1928–, American tennis player, who is commonly known by the nickname "Pancho" Gonzales, b Los Angeles At the age of 15 Gonzales, of Mexican parentage, excelled at tennis, and after service (1945–47) in the U S navy, he returned to the game and established an inter-

national reputation He won the U S national singles and the U S clay court titles in both 1948 and 1949 In 1949 Gonzales also was a member of the U S team that won the Davis Cup, and with Frank Parker he took the French and British doubles championships Gonzales turned professional (Sept , 1949), and in 1949–50 played John A (Jack) Kramer in a cross-country tournament

Gonzales (gunsä'lĭs), city (pop 4,722), co seat of Gonzales co , S central Texas, near the Guadalupe river and ENE of San Antonio The old city, founded in 1825 as administrative center of Green De Witt's colony, spreads out from squares that were a double plaza of Spanish style On Oct 2, 1835, the men of Gonzales dispersed Mexican cavalry in the first battle of the Texas Revolution, a park at Cost, to the southwest, encloses the battlefield At Ottine, to the northwest, is the botanically interesting Palmetto State Park The prosperous farm region yields cotton and poultry

González, Fernán see FERNÁN GONZALEZ

González de Ávila, Gil (hĕl' gŏnthä'lĕth dā ä'vēla), d 1543, Spanish conquistador In 1522 he conquered Nicaragua, but fled to avoid trouble with Pedrarias His claims were usurped (1524) by Francisco FERNANDEZ DE CÓRDOBA

González de Ávila, Gil, 1578?–1658 Spanish historian The royal chronicler of Castile and the Indies, he wrote a history of the Church in the Spanish colonies

González Martínez, Enrique (änrē'kā gōnsä'lĕs martē'nĕs), 1871–, Mexican poet He worked as a physician for 17 years and on the side wrote poetry which showed the influence of Rubén Darío and the French symbolists After going to Mexico city in 1911 he turned against MODERNISMO and derided it, writing as the first line of one of his poems in *Los senderos ocultos* [hidden paths] (1911) the famous exhortation, "Wring the necks of the deceitful swans " He served in later years as a diplomat in Argentina, Chile, and Spain He collected and edited his poetry in three volumes of *Poesías* (1938–40)

goober see PEANUT

Gooch, Sir Daniel (gōōch), 1816–89, English mechanical engineer A designer of locomotives, he was made (1837) locomotive superintendent of the Great Western Railway For laying a transatlantic cable (1864) he was made a baronet (1866)

Gooch, George Peabody, 1873–, English historian, educated at King's College, Univ of London, and Trinity College, Cambridge He had practical experience in politics as a Liberal member of Parliament from 1906 to 1910, and his interest in democratic political ideas was expressed especially in his *History of Democratic Ideas in the Seventeenth Century* (1898, new ed , with additions by Harold J Laski, 1927) and *Political Thought in England from Bacon to Halifax* (1914) He also studied the impact of political ideas on history in *Germany and the French Revolution* (1920) Gooch was associated with Harold W V Temperley in diplomatic studies, they edited *British Documents on the Origins of the War, 1898–1938* (13 vols , 1926–38) His critical bibliography, *Recent Revelations of European Diplomacy* (1927, 4th ed , 1941), is pleasant as well as valuable With Sir Adolphus W Ward he edited *The Cambridge History of British Foreign Policy, 1783–1919* (3 vols , 1922–23) Gooch also became an authority on the history of Germany and wrote a useful survey of that country in the time of the Weimar Republic, *Germany* (1925), a biography of Frederick II (1947); and essays in *Studies in German History* (1948) His *History and Historians in the Nineteenth Century* (1913, 2d ed , 1946) is one of the most valuable books of modern historiography Among his numerous other works is the textbook, *History of Modern Europe, 1878–1919* (1923). Gooch's historical writing is characterized by a scrupulous attention to detail

Gooch, Sir William, 1681–1751, colonial governor of Virginia (1727–49), b Yarmouth, England He came to Virginia after distinguished service with the British army Nominally, Gooch was only lieutenant governor, but actually he was the real chief executive in the colony for 22 years He defended the colonists before the Board of Trade, was an influence in their favor with Parliament, promoted tobacco growing, and generally got on well with the burgesses His resignation because of failing health was profoundly regretted by the Virginians Gooch was created baronet in 1746 and promoted major general in 1747. See biography by P S Flippin (1926)

Good, James Isaac, 1850–1924, American clergyman of the German Reformed Church, b York, Pa He held pastorates in York, Philadelphia, and Reading, Pa , and in 1890 became professor in the School of Theology of Ursinus College (from 1898 in Philadelphia) He was dean from 1893 to 1907, when he became professor of church history and liturgics at the Central Theological Seminary, Dayton, Ohio He was the author of more than 20 books, chiefly on the origins and history of the Reformed Church in Germany and the United States

Goodale, George Lincoln (gōō'dāl), 1839–1923, American botanist and educator, b Saco, Maine, grad Amherst, 1860, M D Harvard, 1863 From 1872 he taught at Harvard, serving as professor of botany (1878–88) and as professor of natural history (1888–1909) His writings and lectures aroused much interest in botany Goodale wrote some of the earliest works on plant physiology and histology and was one of the first to use lantern slides to illustrate his talks His works include *The Wild-Flowers of America* (1876)

Goode, George Brown (gōōd), 1851–96, American ichthyologist and museum administrator, b New Albany, Ind , grad Wesleyan Univ , 1870 He became assistant director of the National Museum, Washington, D C (1878), was U S commissioner of fisheries (1887–88), and was assistant secretary of the Smithsonian Institution (from 1887) Among his many works on fishes are *Catalogue of the Fishes of the Bermudas* (1876), *The Natural and Economical History of the American Menhaden* (1879), and, with others, *The Fisheries and Fishery Industries of the United States* (7 vols , 1884–87), *American Fishes* (1888), and *Oceanic Ichthyology* (1895)

Goode, John Paul, 1862–1932, American geographer, b Stewartville, Minn , grad Univ of Minnesota, 1889, Ph D Univ of Pennsylvania, 1901 He taught geography at the Univ of Pennsylvania (1901–17) and at the Univ of Chicago (1917–28) He edited many maps and books on geography, including the well-known *Goode's School Atlas* (1923, many later editions)

Goodell, William (gōōdĕl'), 1792–1867, American missionary in the Near East, b Templeton, Mass , grad Dartmouth College and Andover Theological Seminary He went in 1823, for the American Board of Commissioners for Foreign Missions, to Beyrouth, Syria, where he established the Congregationalist mission In 1831 he went to Constantinople and there established a mission for the Armenians of the city His translation of the Bible into Armeno-Turkish occupied 20 years The success of Congregational missions in Turkey is largely founded upon his work His memoirs were edited by E D G Prime under the title *Forty Years in the Turkish Empire* (1876)

Goodenough's Island see RAROTONGA

Good Friday [probably from *God's Friday*], anniversary of Jesus' death on the cross, the Friday before EASTER, observed from the first as a day of mourning and penitence In Roman Catholic and Orthodox churches there is no Mass, and communion is not given, the Mass of the Presanctified, sung on the day, is simply the priest's communion with a previously consecrated Host Other special services are adoration of the Cross (creeping to the Cross) and the Three Hours, a public meditation on the Seven Last Words An old English custom of Good Friday was making hot cross buns Good Friday is a legal holiday in many countries and in some states of the United States

Good Hope, Cape of see CAPE PROVINCE.

Goodhue, Bertram Grosvenor, 1869–1924, American architect, b Pomfret, Conn He studied under James Renwick in New York and (1891) entered the office of Ralph Adams CRAM in Boston Later he was made a partner in this firm, but left it (1914) to begin independent practice Goodhue was particularly successful in evolving a distinctive style for his ecclesiastical work, which was Gothic in form yet permeated with a modern spirit Examples are the churches of St Thomas and of St Vincent Ferrer, New York, and the buildings of the U S Military Academy at West Point In his later years he turned from historic design and endeavored to create forms more harmonious with contemporary life and methods of construction, but he died before he could fully accomplish this aim The most important works of this last period are the building at Washington, D C , to house the National Academy of Sciences and National Research Council and the state capitol, Lincoln, Nebr Among his other works are St Bartholomew's Church and the Chapel of the Intercession, New York, and the First Baptist Church, Pittsburgh See biography by C H Whitaker (1925)

Gooding, city (pop 2,568), co seat of Gooding co , S Idaho, on the Little Wood river and W of Shoshone, in the MINIDOKA PROJECT Founded in 1883, the town was opened in 1907 A state school for the deaf and the blind is here

Goodland. 1 Town (pop 1,097), Newton co , NW Ind , near the Ill boundary **2** City (pop 3,306), co seat of Sherman co , NW Kansas, near the Colorado line, inc 1887 To the west is the highest elevation in Kansas—c 4,000 ft Fossils have been found in the region

Goodman, Benny (Benjamin David Goodman), 1909–, American clarinetist and band leader, b Chicago, of Russian parents He grew up in Chicago in the period when jazz, brought by Negro musicians from New Orleans, was flourishing there, and he had the opportunity to hear (and eventually to play beside) some of the outstanding jazz musicians of the era Having played the clarinet for many years in Chicago and later (1925) in California, he went to New York in 1928, where in 1934 he organized his own orchestra and became associated with the development of swing music. Through the media of radio and moving pictures his orchestra became nationally famous. He has also achieved some success in classical music for clarinet, particularly the music of Mozart Bartok's *Contrasts* (1938), for violin, clarinet, and piano, was written for Goodman and Joseph Szigeti See the autobiographical *The Kingdom of Swing* (with Irving Kolodin, 1939)

Goodnews Bay, inlet of Kuskokwim Bay, SW Alaska. Platinum and osmiridium are found here

Goodnight, Charles, 1836–1929, Texas cattleman, b Macoupin co , Ill He went to Texas in 1846, where he joined the Texas Rangers and became a noted scout and Indian fighter He later pioneered in cattle ranching in New Mexico and Colorado and in 1866 laid out the Goodnight cattle trail from Texas to Wyoming In 1877, in partnership with John Adair, he established in the Texas Panhandle the J A Ranch of nearly 1,000,000 acres, on which he maintained about 100,000 head of cattle He improved his herds by crossing shorthorns and Herefords with the native longhorns By crossing bison and polled Angus cattle he produced the first herd of cattalo. He also bred bison and is thereby credited with preserving the remnant of the South Plains herd In 1880 he organized the Panhandle Stockman's Association, which suppressed lawlessness and introduced purebred cattle

Goodnow, Frank Johnson (gōōd'nō), 1859–1939, American authority on government, grad Amherst (B A , 1879, M A , 1887) and Columbia (LL B , 1882) After study abroad, he taught administrative law at Columbia Univ for 30 years, was an adviser (1913–14) to the revolutionary Chinese government on drafting the new constitution, and was president (1914–29) of Johns Hopkins Univ He is best remembered as a pioneer in the study of modern municipal government, and most of his works deal with administrative law and municipal government

Goodrich, Annie Warburton, 1866–, American nurse b New Brunswick, N J , grad New York Hospital, 1892, in nursing As director of nurses at the Henry St Settlement, as professor of nursing and health at Teachers College, Columbia Univ (1914–23), as dean of the Army School of Nursing (1918–19), and as professor and dean of the Yale Univ School of Nursing (1923–39, dean emeritus from 1939), she did much to raise standards of education and practice in her profession She wrote *The Social and Ethical Significance of Nursing* (1932)

Goodrich, Chauncey Allen, 1790–1860, American lexicographer, b New Haven, Conn , grad Yale, 1810 A professor of rhetoric at Yale, he married Noah Webster's daughter Julia Goodrich edited the 1847 revision of Webster's unabridged dictionary

Goodrich, Samuel Griswold, pseud **Peter Parley,** 1793–1860, American editor and writer of juvenile stories, b Ridgefield, Conn In 1816 he entered publishing and by 1822 was writing juveniles On a trip to England in 1823 he met Hannah More whose work he had long admired It was she who gave him the idea for the *Peter Parley Tales*, famous sugar-coated moralistic stories of instruction In 1826 he founded the *Token*, in which many of Hawthorne's stories first appeared He founded and edited (1841–50) a juvenile magazine, *Robert Merry's Museum* From 1851 to 1853 he was American consul in Paris Because of the quantity of his works, authorship of some is doubtful See his *Recollections of a Lifetime* (1856)

Goodspeed, Edgar Johnson, 1871–, American Greek scholar, b Quincy, Ill , grad Denison Univ (B A , 1890, D D , 1928) and Univ of Chicago (B D , 1897, Ph D , 1898) He taught at the Univ of Chicago from 1898 to 1937 and gained recognition as a biblical critic He is principally known for his new translation of the Bible *The New Testament—an American Translation* appeared in 1923, the wide esteem given it was extended also to *The Complete Bible—an American Translation* (with J M P Smith, 1939)

Good Thief or **Penitent Thief,** the malefactor crucified with Jesus who did not revile Him, Jesus promised him Paradise that day Luke 23 39–43 In the Roman martyrology his feast is March 25 His name in tradition is Dismas or Desmas, that of the other thief Gesmas

Good Water, town (pop 1,028), E central Ala , SE of Birmingham, in a farm area, inc 1875

Goodwin, Nat (Nathaniel Goodwin), 1857–1919, American actor, b Boston In 1875 he became a popular actor at Tony Pastor's Theatre, New York, his natural gifts of comedy and mimicry winning success in vaudeville acts Later, playing more serious parts, he won fame in England and the United States in American plays such as *In Mizzoura* (1893) and *Nathan Hale* (1898) He triumphed as Fagin in Dickens's *Oliver Twist* He returned to vaudeville in 1911

Goodwin Sands, 10-mile stretch of shoals and sand bars, lying off the east coast of Kent, England It forms a breakwater east of the roadstead called the Downs The shifting sands do not allow the construction of lighthouses, but there are several lightships and numerous buoys and foghorns Shipwrecks were formerly frequent on the Sands. Traditionally, the Sands were once a fertile isle called Lomea, the property of Earl Godwin.

Goodyear, Charles, 1800–1860, American inventor, b New Haven, Conn , originator of vulcanized rubber He failed in his earlier business ventures and was in jail for debt when he began his experiments with rubber, searching for a way to prevent it from sticking and melting in hot weather He experimented endlessly, kneading various chemicals into the raw rubber Some success was achieved in 1837 with a patented acid and metal coating, but the real process of vulcanization was not discovered until 1839 He spent further years in perfecting the process, which was patented in 1844 Goodyear had carried on his researches in the face of poverty and debt and was forced to market his patent rights for a fraction of their value He spent the years 1852-58 in Europe and established the rubber business there He wrote *Green Elastic and Its Varieties* (1853) See studies by R F Wolf (1939) and A C Regli (1941) His son **Charles Goodyear,** 1833-96, b Germantown, Pa , assisted him in the manufacturing and marketing of rubber articles, but later turned to shoe manufacturing, being one of the first to see the application of Howe's sewing machine to the making of shoes He organized in 1871 the Goodyear Boot & Shoe Machinery Company of New York to manufacture machines He was only partially successful until the consolidation in 1880 with Gordon McKay, his chief competitor See F J Allen, *The Shoe Industry, Old and New* (1916)

Googe, Barnabe (gōōj, gōō), 1540–94, English poet His *Eglogs, Epytaphes, and Sonettes* (1563) are early English pastoral poems

Goole (gōōl), urban district (pop 20,239), West Riding of Yorkshire, England, at the confluence of the Ouse and Don rivers WSW of Hull It has extensive dockyards and a good harbor, coal and textiles are exported, and shipbuilding, iron casting, sugar refining, flour milling, and the making of farm machinery and chemicals are leading industries There are passenger lines to Amsterdam, Copenhagen, and other continental ports

goose, wild and domesticated bird related to the duck and the swan The usual general term is goose, but goose is the exact term for the female, gander that for the male In North America the common Canada or wild goose is known by its honking call and by the migrating V-shaped flocks in spring and fall Other wild geese are the BRANT and the blue, the snow, and the white-fronted or laughing geese Among the domestic geese are the popular Toulouse or gray goose (descended from the graylag of Europe), the African goose, the Embden goose, and the Oriental breeds (developed from the wild Chinese goose) Geese were raised in early days by the Romans and other Europeans and were sacred in Egypt 4,000 years ago Forcible feeding is used to fatten geese and to enlarge the liver for use in making *pâté de foie gras* See F H Kortright, *The Ducks, Geese, and Swans of North America* (1943), *Goose Raising* (U S Dept of Agriculture, Farmers' Bul 767)

gooseberry (gōōz'–, gōōs'–), fruit of a wild and cultivated bush (*Ribes* or *Grossularia*) of the North Temperate Zone, related to the currant In England the gooseberry is very popular both as a fresh dessert fruit and in preserves Though the European species bear much larger fruit than the North American, they are little cultivated in the United States because of their susceptibility to various fungus diseases The cultivation of gooseberries is prohibited in some localities because the plant is a host to the white-pine BLISTER RUST The native species are sometimes grown in gardens

Goose Creek, Texas see BAYTOWN

goosefoot, any plant of the genus *Chenopodium,* such as the LAMB'S-QUARTERS

Goossens, Eugene (gōō'sunz), 1893–, English conductor and composer, of Belgian parentage, studied in Bruges and Liverpool and with C V Stanford at the Royal College of Music He was first violinist (1911–15) of the Queen's Hall Orchestra, afterward conducting Sir Thomas Beecham's opera company until 1920 He conducted the orchestra of Diaghilev's ballet company from 1919 until 1923, when he came to the United States to conduct the Rochester Philharmonic He was conductor of the Cincinnati Symphony Orchestra from 1931 until 1947 At that time he became resident conductor of the Sydney Symphony Orchestra and director of the New South Wales Conservatory of Music He has appeared as guest conductor of the major orchestras of England and the United States His compositions include two operas with librettos by Arnold Bennett, *Judith* (1925, London, 1929) and *Don Juan de Mañara* (London, 1937), orchestral music, songs, and chamber music, including a piano trio, *Five Impressions of a Holiday* (1914), in which Ravel's influence is evident His brother Leon (1897–) is a noted oboe virtuoso who first appeared in the United States in 1928 His father, Eugène Goossens (1867–), and his grandfather, Eugène Goossens (1845–1906), were also conductors

gopher (gō'fur) or **pocket gopher,** rodent of North America and Central America In the United States the chief genera are the Western (*Thomomys*) and the Eastern (*Geomys*) gophers The gopher is gray, buff, or dark brown, with a total length of 7 to 14 in Fur-lined pouches which open on the outside of its cheeks are used for carrying food and nesting material A burrowing animal, it lives and does most of its foraging underground, feeding chiefly on roots and tubers Sometimes it emerges for a change of diet Its extensive, ramifying tunnels sometimes damage earth dams and banks It is of some value as an agent of soil aeration and in forming humus by burying organic matter Minnesota is called the Gopher State

Göppingen (gû'pĭng-un), city (pop 35,784), N Württemberg, ESE of Stuttgart It is a railroad transportation center and has industries producing machinery, precision instruments, chemicals, and textiles Göppingen mineral water is exported Chartered in 1029, the city was twice (1125, 1782) devastated by fire It has retained a 15th-century church and a 16th-century castle The ruined Hohenstaufen castle is near by

Gorakhpur (gō'rŭkpōor″), town (pop 98,977), E central United Provs , India, founded c 1400 It is really a collection of agricultural villages

Gorboduc (gôr'bŭdŭk), legendary early British king mentioned by Geoffrey of Monmouth He divided his kingdom in his lifetime between his sons Ferrex and Porrex and thereby created murderous strife *Gorboduc, or Ferrex and Porrex,* the first English blank verse tragedy presented on a London stage was given by the players of the Inner Temple in 1562 The first three acts were probably by Thomas Norton, the last two by Thomas SACKVILLE, and the whole shows the influence of its Senecan models

Gorchakov, Aleksandr Mikhailovich, Prince (ŭlyĭksan'dur mĭkhī'luvĭch, gûrchŭkôf'), 1798–1883, Russian statesman He succeeded Nesselrode in 1856 after serving (1854 56) as ambassador at Vienna Brilliant, witty, gifted, Gorchakov was the outstanding diplomat of Alexander II's reign His chief aim was to nullify the disastrous Treaty of Paris that closed the Crimean War Friendly with Bismarck, generally hostile to Austria, he maintained Russian neutrality in the Austro-Prussian War of 1866 and in the Franco-Prussian War of 1870–71 Later, however, he was frightened at the rumors of new trouble between Germany and France and indicated that Russia would in such case side with France However, the THREE EMPERORS' LEAGUE of Austria, Russia, and Prussia was formed during Gorchakov's administration Gorchakov opposed the Russo-Turkish War of 1877–78 and the accompanying agreement with Austria, he represented Russia at the Congress of Berlin (1878), where the advantages gained in the war were largely lost (see RUSSO-TURKISH WARS, SAN STEFANO, TREATY OF, BERLIN, CONGRESS OF) He resigned in 1882, and Russia soon drifted from his policies His successor was Nikolai K Giers

Gorchakov, Mikhail Dmitreyevich, Prince (mĭkhŭyl' dumē'trĕuvĭch), 1793–1861, Russian general He rose through service in the Russo-Turkish War of 1828–29, the suppression of the Polish insurrection (1830–31), and the campaign in Hungary (1849) as well as through semipolitical service, to become chief of staff in 1853 He succeeded Aleksandr S Menshikov as Russian commander in chief in the Crimean War, where he conducted the heroic defense of Sevastopol

Gordian I (Marcus Antonius Gordianus Africanus) (gôr'dēun), d 238, Roman emperor He was a Roman of great wealth and was colleague in the consulship with Caracalla and with Alexander Severus, who appointed him proconsul in Africa After the usurpation of MAXIMIN the dissatisfaction of Africa broke into revolt, and Gordian was made emperor (238) with his son Gordian II (192–238) as colleague They were recognized by the people and senate in Rome Soon, however, a partisan of Maximin attacked them in Carthage Gordian II was killed, and his father committed suicide When the news of this arrived in Rome, the senate named two new emperors, Balbinus and Pupienus Gordian II's son, Gordian III (c 223–244), was made Caesar Balbinus and Pupienus defeated and killed Maximin, but were soon murdered by the Praetorians, whereupon Gordian III became emperor (238–44) In 242 Gordian opened the temple of Janus (a sign of war) for the last time and went to attack the Persians in Mesopotamia He defeated them, but his best general, his father-in-law, died The troops became disorderly, and PHILIP (Philip the Arabian) contrived Gordian's murder

Gordian knot see GORDIUS

Gordin, Jacob Mikhailovich, 1853–1909, American writer of Yiddish plays, b Russia He was for some years a teacher and a newspaper writer in St Petersburg, Odessa, and elsewhere In 1880 he founded the Bible Brotherhood, a reform movement in Judaism After this was suppressed, he left Russia in 1891 for the United States In New York he found the Yiddish stage in need of good plays, and for the rest of his life he wrote, translated, and adapted plays in the vernacular Among the best of these were *Siberia, God, Man, and the Devil; The Jewish King Lear; The Jewish Sappho,* and *The Kreutzer Sonata* (an English translation was produced in 1907) His collected plays were published (1910) in Yiddish in New York.

Gordius (gôr'dēŭs), legendary king of Phrygia and founder of its capital, Gordium An oracle had foretold that a wagon would bring to the people a king who would put an end to their troubles. When Gordius, a peasant, appeared in his wagon, he was hailed as king In gratitude, Gordius dedicated his wagon to Zeus The pole of the wagon was fastened to the yoke with an intricate knot of bark which defied all efforts to untie it This was the Gordian knot An oracle declared that he who untied it would become the ruler of all Asia When Alexander the Great came to Gordium, he examined the knot, then with one blow of his sword severed it Upon this story is based the familiar figure, "to cut the Gordian knot," meaning to solve a perplexing problem by a single bold action

Gordon, Adam Lindsay, 1833–70, Australian poet, b in the Azores In 1853 he went to South Australia, where he joined the mounted police and later became famous as a steeplechase rider and horse owner His works include *Sea Spray and Smoke Drift* (1867), *Ashtaroth* (1867), and the vigorous *Bush Ballads and Galloping Rhymes* (1870) His collected poems (ed by F M Robb) were published in 1912

Gordon, Charles George, 1833–85, British soldier and administrator He served in the Crimean War, went to China in the expedition of 1860, taking part in the capture of Peking (Peiping), and in 1863 he took over the command of F T WARD, who had raised a Chinese army to suppress the Taiping Rebellion For the achievements of this "ever-victorious army" he was popularly known as Chinese Gordon In 1873 he entered the service of the khedive of Egypt in the Egyptian Sudan, becoming governor of the Sudan in 1877 He resigned in 1880 and went to Mauritius In his absence, the Mahdi acquired control, Gordon therefore returned in 1884 to place himself at the head of the Egyptians in an attempt to crush the power of the Mahdi He was besieged at Khartoum for 10 months, the relief expedition finally dispatched from England reaching the garrison two days after it had been stormed by the Moslems, who killed Gordon Gordon was a religious, courageous man, devoted to duty The Gladstone government fell in 1885 partly because of popular indignation at Gordon's death. See his journals at Khartoum (1885), his letters (ed by D C Boulger, 1884), and letters to his sister (1888), biographies by D C Boulger (1896) and H E. Wortham (1933)

Gordon, Charles William, pseud **Ralph Connor,** 1860-1937, Canadian clergyman and novelist His popular stories were based on his experiences as a Presbyterian missionary in the lumber and mining camps of the Canadian Northwest Of the long list of his somewhat didactic and romantic novels, the most widely read are *The Sky Pilot* (1899) and *The Man from Glengarry* (1901) See his autobiography, *Postscript to Adventure* (1938)

Gordon, George, earls of Huntly see HUNTLY

Gordon, Lord George, 1751–93, English agitator, responsible for the tragic Gordon riots in London (June 2–7, 1780) Great damage was done, and probably more than 300 persons were among the injured and killed The riots arose from a Protestant demonstration against the removal of civil restrictions from Roman Catholics, but passed into an orgy of destruction, jail deliveries, and plunder Some 21 rioters were executed, but Gordon was acquitted because he was clearly deranged Dickens vividly described the riots in *Barnaby Rudge* See biography by Percy Colson (1937)

Gordon, George Byron, 1870–1927, American anthropologist, b Prince Edward Island, Sc D Harvard, 1894 He headed the Harvard expedition which from 1894 to 1900 conducted the field work at the ruins of Copán in Honduras From 1903 until his death he was connected with the Univ of Pennsylvania, after 1910 being director of the university museum His books concern his work at Copán, his sojourn in Alaska, and travels in Europe

Gordon, George Henry, 1824?–1886, Union general in the Civil War, b Charlestown, Mass , grad West Point, 1846 He fought under Scott in the Mexican War, resigned from the army in 1854, and subsequently practiced law in Boston In 1861 Gordon raised and became colonel of a Massachusetts regiment Made a brigadier general of volunteers in 1862, he fought in most of the Virginia campaigns of that year, took part in the operations against Charleston, S C (1863–64), and Mobile, Ala (1865), and commanded in E Virginia in the last months of the war He wrote several books concerning his Civil War service

Gordon, John Brown, 1832–1904, Confederate general and Georgia statesman, b Upson co , Ga He was educated at the Univ of Georgia and studied law Gordon began his Civil War service as an infantry captain and so distinguished himself through four years of campaigning in the Virginia area that at Lee's surrender he was a lieutenant general commanding a corps His fighting in the WILDERNESS CAMPAIGN and in the Shenandoah Valley under J A EARLY in 1864 was particularly brilliant After the war he became an outstanding leader in Georgia politics With Alfred H Colquitt and Joseph E. Brown, he dominated the state govern-

ment for many years He was U S Senator (1873–80, 1891–97) and governor (1886–90) Despite charges that he mixed politics and railroad affairs, he was the idol of his state throughout his long career See his *Reminiscences of the Civil War* (1903), D S Freeman, *Lee's Lieutenants* (3 vols , 1942–44)

Gordon, Sir John Watson-, 1788–1864, Scottish portrait painter, b Edinburgh He took the name Gordon in 1826 After the death of Raeburn he was the leading portraitist in Scotland, enjoying a large practice and many honors Famous portraits are those of Sir Walter Scott (National Gall , Edinburgh) and Thomas De Quincey and Sir David Brewster (National Portrait Gall , London)

Gordon, Leon, 1830–92, Russian-Hebrew novelist and poet, b Vilna His name in patronymic style was Jehudah Löb ben Asher As teacher and writer he was one of the leaders in the renaissance of progressive culture among the Jews and was an indefatigable foe of obscurantism He wrote in both Hebrew and Russian, his influence upon Hebrew letters has not waned A complete edition of his works was published (1928–35) in Tel-Aviv See biography by A B Rhine (1910)

Gordon, Patrick, 1635–99, Scottish soldier of fortune and Russian general After serving alternately on both sides in the war between Sweden and Poland, he entered the Russian army (1661) and became the devoted friend of Peter the Great The greatest service he rendered Peter was his aid in thwarting the aims of Peter's half sister SOPHIA ALEKSEYEVNA in 1689 Parts of Gordon's diary were published as *Passages from the Diary of General Patrick Gordon of Auchleuchries* (1859)

Gordon. 1 Town (pop 1,524), central Ga , just E of Macon 2 City (pop 1,967), NW Nebr , in the Niobrara valley near the S Dak line, inc 1921 It is a shipping and trading center for an agricultural area 3 Borough (pop 1,062), E Pa , NW of Pottsville, settled 1856, inc 1891 Anthracite is mined

Gordon Highlanders, kilted Scottish infantry regiment in the British army It was raised in 1794 and named for George Gordon, 5th duke of Gordon, who was prominent in its early history The regiment has had a distinguished record in the British army since that time. It is no longer limited to men of Scottish origin

Gordon riots see GORDON, LORD GEORGE

Gore, Charles (gôr), 1853–1932, English prelate and theologian As head librarian at Pusey House, Oxford, (1884–93), his influence was extensive among the undergraduates In 1890, as editor of *Lux Mundi*, he was looked upon as leader of a Modernist trend in the High Church party Because the views on the incarnation of Christ expressed in his Bampton Lectures (1891) were questioned, he resigned his post He was canon of Westminster from 1894 to 1902 In 1902 he was chosen bishop of Worcester, in 1905 bishop of Birmingham, and in 1911 bishop of Oxford Among his many works are *The Church and the Ministry* (1889), *The New Theology and the Old Religion* (1908), *Belief in God* (1921), *Christ and Society* (1928), *Jesus of Nazareth* (1929), and *The Philosophy of the Good Life* (1930) See G. L Prestige, *The Life of Charles Gore, a Great Englishman* (1935)

Goremykin, Ivan Longinovich (ēvan lŏn-gē'nûvĭch gŭryĭmĭ'kĭn), 1839 1917, Russian statesman A conservative and an obedient servant of the emperor, he was chosen (1906) to succeed Count WITTE as chief minister The opposition of the DUMA to his incompetent and reactionary government led to the Duma's dissolution as well as to Goremykin's dismissal in the same year From 1914 to 1916 he again served as prime minister He was killed by the Bolsheviks

Gorenko, Anna Andreyevna see AKHMATOVA, ANNA

Gore Range, Rocky Mts , see PARK RANGE

Gorgan (gôrgän') or **Jurjan** (jôrjän'), city (1947 estimated pop 21,376), N Iran, c 25 mi. E of the Caspian. It is the center of a region that yields rice and has extensive marshes and forests This area, the ancient Hyrcania, was the homeland of the Kajar or Qajar dynasty The city was formerly Asterabad.

Gorgas, William Crawford (gôr'gŭs), 1854–1920, American disease and sanitation expert, surgeon general of the United States, b Mobile, Ala , grad Bellevue Hospital Medical College, 1879 He served with the U.S. army medical corps after 1880 He was stricken with yellow fever while he was stationed at Fort Brown, Texas. Gorgas soon recovered and thereafter remained immune to the disease. In 1898 he was sent to Cuba as sanitation director. Applying the findings of Carlos J FINLAY and Walter REED, Gorgas after a short time permanently rid Havana of yellow fever. He then went (1904) to the Isthmus of Panama, where amid administrative difficulties he succeeded in cleansing the Canal Zone of the dreaded yellow fever by eliminating the breeding places of mosquitoes and segregating stricken patients He improved health conditions in the cities of Colón and Panama while insuring the completion of the Panama Canal These events he discussed in his book, *Sanitation in Panama* (1915). He later made several trips to clear up disease-infested places throughout the world, and he made notable progress in Guayaquil, Ecuador—a city long scourged with yellow fever. He served (1914–19) as surgeon general of the United States and was attached, after 1916, to the International Health Board See biography by Marie Gorgas and B. J Hendrick (1924).

Gorges, Sir Ferdinando (gôr'jĭs), c.1566–1647, British colonizer, proprietor of Maine He was knighted for his services at the siege of Rouen (1591) and was subsequently (1596–1602, 1604–29) military governor of Plymouth, England. The voyages of George Weymouth to the New England coast stirred his interest and led to his resolve to colonize the region He was a leading figure in the Plymouth Company, chartered in 1606, and one of the two chief backers of the Sagadahoc colony which was planted in 1607 at the mouth of the Kennebec river, Maine, and failed in 1608 Gorges, in the following years, directed the many fishing and trading expeditions which the company carried on along the New England coast and defended its monopoly of the fisheries He procured the services of Capt John SMITH to head a new settlement, but three successive expeditions met grief soon after leaving harbor and Smith withdrew in complete discouragement. In 1620 Gorges's influence procured for the members of the old company a revised charter in which their territory, for the first time called "New England," was established as lying between lat 40° and 48° N They reconstituted themselves as the Great Council of New England, and grants were made to the individual members in the hope that they would become more interested in the project Interest, however, centered in the more southern ventures, and Gorges found no financial support The Pilgrim colony at Plymouth, patented under the Virginia Company, had mistakenly settled within the bounds of the New England Council grant, but in 1621 received a patent from the council and had Gorges's fatherly interest henceforth Not so the Massachusetts Bay and Salem colonies, which were regarded as intruders and against which Sir Ferdinando carried on a long struggle in England on the ground that their patent was irregular In order to make the whole of New England a royal colony, over which Gorges was to be governor general, the council surrendered its charter in 1634 The remaining territory of New England was to be divided between the eight lords of the council, who were to hold it under new patents, but because of the growing intensity of the struggle between king and Parliament at home the new arrangement was never consummated, and the Puritan commonwealth of Massachusetts was left free Gorges received title to the province of Maine in 1639, but was unable in the face of existing events in England to raise funds to colonize his domain His grant passed to his heirs, who so neglected the province that the settlers petitioned to be taken under the government of Massachusetts His grandson, **Ferdinando Gorges,** 1630–1718, in 1677 finally sold to Massachusetts all rights to Maine for £1,250 See James P Baxter, ed , *Sir Ferdinando Gorges and His Province of Maine* (3 vols , 1890), Henry S Burrage, *Gorges and the Grant of the Province of Maine* (1923)

Gorgey, Arthur (gôr'gĕĭ), Hung *Görgey*, 1818–1916, Hungarian general He fought the Austrians in 1848–49 as a commander of the Hungarian republican army. He captured Buda (May, 1849), but when Russia sent aid to the Austrians, Gorgey decided to surrender to the Russians rather than continue a lost cause. He forced Louis KOSSUTH, with whom he had had many differences, to resign Gorgey was interned in Austria until 1867

Gorgias (gôr'jŭs), c 485–c 380 B C , Greek Sophist From his native city, Leontini, Sicily, he went to Athens, seeking aid against the Syracusans He settled in Athens, where he taught and practiced rhetoric Gorgias drew upon the negative aspect of the Eleatic philosophers, especially Zeno of Elea, and formulated a nihilistic philosophy His three propositions were nothing exists, if anything does exist, it cannot be known, if it can be known, the knowledge of it cannot be communicated Objective truth being thus impossible, there remains only the Sophist's art, persuasion Gorgias' fame is preserved in the dialogue of Plato that bears his name

Gorgon (gôr'gŭn), in Greek mythology, a female monster The chief of them was MEDUSA, but she had two sisters who were also Gorgons, Stheno and Euryale They were the daughters of Phorcus and Ceto They were so hideous that men looking upon them turned to stone. The winged, snake-haired Gorgon was much represented in Greek art

Gorham. 1 Town (pop 3,494), SW Maine, just W of Portland, granted 1728, inc 1764 A garrison house was built on Fort Hill in the French and Indian Wars The McLellan House, of handmade brick, and a few other 18th-century houses remain A state teachers college is here 2 Town (pop 2,597), NE N H , at the juncture of the Androscoggin and the Peabody S of Berlin and on the northern edge of the White Mountain National Forest, settled c 1805, inc 1836 Within sight of the Presidential Range, it is a center of lumbering and resort activities, a large paper mill is here, and a winter sports carnival is held yearly

Gori (gô'rē), city (pop. 10,547), central Georgian SSR, on the Kura river, in an orchard and garden district. An ancient fortress, it passed in 1801 to Russia. Much of the town was destroyed by an earthquake in 1920. J V. Stalin was born here

gorilla, anthropoid ape native to western equatorial Africa Largest of the great apes, the males reach a height of from 5 to 6 ft and weigh from 300 to 600 lb Usually terrestrial, gorillas walk on all fours with the hands doubled under. At night the males sleep at the base of a tree, with the females and young in platform nests above Gorillas are chiefly vegetarian Long in danger of extinction, they are among the animals protected in Albert National Park established (1922) in the Belgian Congo largely through the efforts of Carl E Akeley See Akeley, *In Brightest Africa* (1923), W K Gregory and H C Raven, *In Quest of Gorillas* (1937)

Gorinchem (khô'rĭn-khŭm, khôr'kum) or **Gorkum** (khôr'kum), municipality (pop 15,163), South Holland prov., SW Netherlands, on the Upper Merwede river. It is a manufacturing center. Mentioned from the 13th cent , it rose to commercial importance in the 15th cent. It was captured by the Beggars of the Sea in 1572 The 16th-century Bethlehem House is now a museum.

Goring, George Goring, Baron, 1608–57, English royalist commander in the civil war He was a court gallant who had previously served in the Dutch army In 1641 a group of army officers formed the first army plot with the intent of asserting the king's will against Parliament by force Goring, then governor of Portsmouth, was one of the principal figures Dissatisfied, he betrayed it to the parliamentarians In 1642 after playing a double game, Goring declared for the king but was never very stable He held high commands until 1645, but his considerable ability as a general was offset by his ambition and the intrigues which were disastrous for the royalist cause

Göring, Hermann Wilhelm. see GOERING, HERMANN WILHELM

Gorizia (gôrē'tsēä), Ger *Görz* (gûrts), city (pop 30,265), capital of Gorizia prov , Friuli-Venezia Giulia, NE Italy It is a center of communications and industry on the Isonzo river and on the Yugoslav border In historic FRIULI, the city was the seat of a county (c 1060–1500), it then passed to the Hapsburgs, but preserved a remarkable autonomy until the 18th cent The Austrian crownland of Gorz-Gradisca was included in Küstenland prov until 1918 In the First World War, Gorizia and the surrounding area in the Karst were bloody battlefields The Italians under the duke of Aosta took Gorizia in 1916, evacuated it in 1917, and recovered it in 1918 The city suffered heavy damage, but was reconstructed On a hill overlooking the city is a 15th-century castle

Gorki, Maxim (mŭksyēm gôr'kĭ), pseud of **Aleksey Maximovich Pyeshkov,** 1868–1936, Russian short-story writer, novelist, and playwright He was one of the leading influences of his age on literature, both at home and abroad Gorki was born at Nizhni Novgorod (now Gorki) on the Volga, which was a major influence on his life At 12 he left his squalid home and through years of vagabondage acquainted himself thoroughly with all types of men Out of the understanding thus acquired, he began in 1892 to write short stories, full of energy and vitality "Twenty-six Men and a Girl" (1898), "Chelkash" (1895), and "Malva" (1899) have all appeared in English in different collections Like his later plays, these deal with the "ex-people," as Gorki called them, of human society In these he saw the hope of the future He turned c.1900 to the novel, abandoning romanticism for social realism *Foma Gordeyev* (1899, Eng tr , 1901), *Three of Them* (1901, Eng tr , 1902), *Mother* (1907, Eng tr , 1907), and *The Confession* (1908, Eng tr , 1916) are his best novels of this period Turning to the drama, Gorki won success with the internationally famous drama of the slums, *The Lower Depths* (1902, Eng tr , 1912; also tr as *At the Bottom*, *Submerged*, and *A Night's Lodging*) A companion piece to this is *The Smug Citizen* (1902, Eng. tr , 1906), a drama of the bourgeoisie Gorki took an active part in the 1905 revolution and when it failed went abroad Though absent, he still carried on a publishing project known as *Znanie* which provided an outlet for young liberal writers Gorki's autobiographical sketches include *My Childhood* (1913, Eng tr , 1915) In 1925 he returned to the novel in *The Artamonov Affair* (Eng tr , *Decadence*, 1927), which shows the effect of the revolution on a greedy mercantile dynasty. In 1928 Gorki went back to Russia, where he was given a royal welcome There he wrote *The Life of Klim Samgin* (1927–36), a long novel covering the whole revolutionary period from 1880 to 1934 Gorki saw this as the crowning work of his life, but critical opinion finds it overlong and lumbering It has been translated in four parts, *Bystander* (1930), *The Magnet* (1931), *Other Fires* (1933), and *The Specter* (1938) Of value are his reminiscences of various figures (Andreyev, Blok, Chekhov, Tolstoy), available in one volume, *Reminiscences* (1946). In the treason trial of 1938 it was charged that Gorki had been poisoned. See *The Last Plays of Maxim Gorky* (1937); *A Book of*

Short Stories by Maxim Gorki (1947); Alexander Kaun, *Maxim Gorky and His Russia* (1940), Filia Holtsman, *The Young Maxim Gorky* (1948)

Gorki or **Gorky** (both gôr'kĭ), formerly **Nizhni Novgorod** (nĭzh'nĭ nôv'gurŏd, Rus nyĭzh'nyĭ nôv'gurŭt), city (1926 pop. 222,356; 1939 pop 644,116; 1946 est. pop. 900,000), capital of Gorki oblast, central European RSFSR, on the right bank of the Volga and at the mouth of the Oka. It is a major transportation and industrial center, producing rolling stock, locomotives, automobiles, Diesel engines, heavy machinery, electric equipment, and chemicals The city was founded in 1221 by a prince of Vladimir as an outpost against the Mordovinians and the Eastern Bulgars Nizhni Novgorod became an important trading center and, in 1350, the capital of a principality which fell to Moscow in 1393 Repeatedly sacked by Tatar raids (15th and 16th cent), it was in 1611 the place of assembly of the Russian army that liberated Moscow from Polish occupation The famous annual fairs of Nizhni Novgorod were held—except during the Russian Revolution and civil war—from 1817 to 1930 The industrial growth of the city dates from the mid-19th cent and increased in pace after the revolution. Nizhni Novgorod was renamed in 1932 for Maxim Gorki, who was born here Its oldest section is the turreted kremlin, dating from the 13th cent , it includes a palace and two 13th-century cathedrals Gorki has a university and several technical schools

Gorki (gôr'kĭ) or **Gorki Leninskoye** (lyĕ'nyĭnskŭyu), village, RSFSR, c 17 mi SSE of Moscow It was the country home of Lenin, who died here, and has a memorial museum

Gorkum, Netherlands see GORINCHEM.

Gorky· see GORKI

Gorlice (gôrlē'tsĕ), town (pop 6,100), Poland, 60 mi SE of Cracow, in the Carpathians It has a petroleum industry In the First World War the Austro-German forces defeated (1915) the Russians in the vicinity

Görlitz (gûr'lĭts), city (pop 90,947), Lower Silesia, E Germany, on the Gorlitzer (or Lusatian) Neisse river The chief city of Lusatia, it manufactures textiles, machinery, glass, and beer It was (1377–96) the seat of a duchy and flourished throughout the Middle Ages As a Bohemian dependency, Görlitz passed to the Hapsburgs in 1526 In 1635 the Treaty of Prague awarded it to Saxony, and in 1815 the Congress of Vienna gave it to Prussia After the Second World War, in which Görlitz suffered some damage, the part of the city on the left bank of the Neisse (pop 85,686) was incorporated into Russian-occupied Saxony, while the section on the right bank (pop 5,261) passed under Polish administration The Polish name is Zgorzelec Jakob Boehme lived here

Görlitzer Neisse see NEISSE

Gorlovka (gôr'lufkŭ), city (1926 pop 23,215, 1939 pop 108,693), SE Ukraine, in the Donets Basin It is a major coal-mining and industrial center

Gorman, Arthur Pue, 1839–1906, American politician, b Woodstock, Md Six years in the Maryland house of representatives and five years in the state senate were followed by election to the U S Senate in 1880 He had by this time become practically the Democratic boss of Maryland As chairman of the Democratic National Committee in 1884, he directed Cleveland's successful campaign for the presidency His share in the Wilson-Gorman Tariff Act of 1894 consisted in leading a group of Senators, who, by over 600 amendments, turned the low-tariff Wilson Bill into a high-tariff act, as high as the act passed by the Republicans in 1883 Cleveland declared the bill a betrayal of the Democratic stand and denounced it, allowing it to become law without his signature Gorman, who had become one of his party's leaders in the Senate, was defeated in 1898, but was returned again in 1903 and served as minority leader until his death

Gorman, city (pop 1,157), N central Texas, SW of Fort Worth, founded 1890, inc 1902 The region, once oil producing, now mainly grows peanuts

Gorno-Altai and **Gorno-Altaisk**, RSFSR see MOUNTAIN-ALTAI

Gorter, Herman (hĕr'man gôr'tur), 1864–1927, Dutch poet. He wrote two notable long poems, *Mei* (1889), in impressionistic style, and *Pan* (1912), instinct with the Marxian socialism to which Gorter devoted his later talents, especially in journalism

Gorton, Samuel, c 1592–1677, one of the founders of Rhode Island, b near Manchester, England Seeking religious freedom, he came to America (1637) but, because of his unorthodox religious teachings, was banished successively from Boston and Plymouth At Portsmouth, R I , he joined Anne Hutchinson in ousting William CODDINGTON (1639) but on Coddington's return to power was himself turned out In 1642, after a characteristically turbulent stay in Providence, Gorton bought Indian land south of that town and founded Shawomet Massachusetts authorities, with designs on that territory, jailed him (1643) for holding erroneous religious opinions The earl of Warwick finally obtained for Gorton freedom from molestation on his land, which he renamed (1648) Warwick and on which he preached to colonists and Indians His followers called themselves "Gortonites" for many decades after his death His tenets included denial of the Trinity, denial of actual heaven and hell, and a belief that every man should be his own intercessor

Gortyna (gôrtĭ'nu), ancient city, S central Crete, near the foot of Mt Ida It was second in importance only to Cnossus in Crete Near it was the famous Labyrinth Under Rome it was the metropolis of the island An inscription of a code of laws of inheritance, marriage, divorce, and the like was found on a wall in Gortyna in 1884

Görtz, Georg Heinrich von (gā'ôrk hīn'rĭkh fŭn gûrts'), 1668–1719, Swedish statesman, a German While in the service of Frederick V, duke of Holstein-Gottorp, he was largely responsible for the duke's alliance with Sweden, which threatened Danish power in Schleswig-Holstein He won the favor of CHARLES XII of Sweden and became his chief minister (1714) An able diplomat, he tried to improve the position of Sweden by conducting peace negotiations with Russia (1718) to end the Northern War, but Charles would make no concessions Despite the exhaustion of Sweden, Charles invaded Norway (1718) The unpopular measures of the reign were blamed upon Gortz, and after Charles's death he was executed on charges of treason

Goryn (gô'rĭnyu), Pol *Horyń* (hô'rĭnyu), river of the USSR It rises 65 mi E of Lvov and flows 400 mi N into the Pripet

Görz see GORIZIA

Gorzow Wielkopolski see LANDSBERG AN DER WARTHE

Goschen, George Joachim Goschen, 1st Viscount (gō'shun), 1831–1907, English statesman A leading financier, he was sent to Cairo (1876) to help plan the conversion of the Egyptian debt He was ambassador to Turkey (1880–81) As chancellor of the exchequer (1886–92) he converted part of the national debt Later he advocated free trade and was an energetic first lord of the admiralty (1895–1900) See his *Theory of Foreign Exchanges* (first written 1861, 4th ed , with biographical preface by B F Hopper, 1932)

Gosford, Archibald Acheson, 2d **earl of** (gŏz'fûrd), 1776–1849, governor in chief of British North America (1835–37) In 1835 he was appointed by the Melbourne government governor in chief of British North America—excepting Newfoundland—and a royal commissioner to inquire into the state of affairs in Lower Canada His policy of "conciliation without concession" toward Papineau and the French Canadian patriots alienated the English element without winning the French extremists He resigned on Nov 14, 1837, on the eve of the rebellion of 1837 Returned to England, he opposed the Act of Union in the House of Lords in 1840, but without success.

Gosforth (gŏs'fûrth) **1** Village, Cumberland, England, near Wastwater It has a famous Viking cross, 14½ ft high, dating probably from the 7th cent., in its decorations, Norse mythology and Christian lore are blended. **2** Urban district (1913 pop 18,044, 1943 estimated pop 20,270), Northumberland, England, N of Newcastle-on-Tyne It is a coal-mining center On its racecourse George Stephenson built his first locomotive (1814)

goshawk (gŏs'hôk), fearless and relentless hawk of the Old World and North America The Eastern goshawk male is about 22 in long, and the female is about 24 in. Both sexes (in adult plumage) have a black crown and a white stripe over the red eye, the upper parts are blue gray and the under parts white, finely barred with gray. They are very destructive to poultry and to game birds, especially to the ruffed grouse and ptarmigan There is a Western goshawk with darker plumage

Goshen (gō'shŭn) **1** Fertile part of Egypt occupied by the Israelites Gen 47 6, Ex 8 22, 9 26 **2** Unidentified region, S Palestine Joshua 10 41, 11 16 **3** Town of Judah Joshua 15 51

Goshen. 1 Town (pop 778), NW Conn , in the Litchfield Hills, settled and inc 1739 It is the birthplace of Asaph Hall Goshen produced cheese in commercial quantities as early as 1792 **2** City (pop 11,375), co seat of Elkhart co , N Ind , on the east bank of the Elkhart and c 25 mi SE of South Bend, settled c 1830, inc 1868 It is a distributing point for a fertile agricultural area and produces radios, phonographs, refrigerators, and special production machinery A large Mennonite population maintains its own customs Goshen College (Mennonite, coeducational, 1894) is here **3** Village (pop 3,074), co seat of Orange co , SE N.Y , SE of Middletown, in a dairy and truck-garden region, settled during the 18th cent , inc 1809 The Good Time track is the scene of the Hambletonian and other horse races; the Historic or Harriman track is also at Goshen

Goslar (gŏs'lar), city (pop 35,663), Brunswick, central Germany, at the northern foot of the Harz mts Since its foundation (10th cent) it has been a mining center Its silver mines are no longer worked, but copper, lead, zinc, iron, and sulphur are extracted, and there are varied manufactures Goslar was a favorite residence of many early German kings and emperors and was the scene of several imperial diets It long was a member of the Hanseatic League and was a free imperial city until 1802 Awarded to Hanover in 1815, it was transferred to Brunswick in 1941 The city has completely preserved its medieval character The Zwinger, a round tower dating from the 16th cent , is a remnant of its old fortifications The Kaiserhaus, a large Romanesque palace, was built (mid-11th cent) for Emperor Henry III There are several Romanesque and Gothic churches, a Gothic city hall, and many half-timbered houses

Gosnold, Bartholomew (gŏz'nōld), fl 1572–1607, English explorer and colonizer In 1602 he commanded the *Concord* on a voyage of exploration, in which he navigated the coast from Maine to Narragansett Bay, naming Cape Cod and several islands and building a small fort on Cuttyhunk, westernmost of the Elizabeth Islands In 1606 he commanded the *God Speed*, which carried a portion of the first settlers to Virginia. He protested against the site of Jamestown but was overruled and several months later died there of malaria For accounts by Gabriel Archer and John Brereton on the 1602 voyage, see Massachusetts Historical Society, *Collections*, Vol XXVIII (1843)

Gospel [M E ,=good news, cf *evangel* from Gr ,= good news], one of the four biographies of Jesus which begin the New Testament The Gospels are named MATTHEW, MARK, LUKE, and JOHN The first three are called SYNOPTIC GOSPELS because of their chronological order and apparent relationship The solemn reading of the Gospel of the day is a special feature of the liturgy in many churches In the Western Church the congregation stands when it is read, at High Mass it is sung by the deacon in the sanctuary on the left side (congregation's left), hence called the Gospel side, lights are carried, and the book is censed In Eastern rites, before the reading of the Gospel there is a solemn procession through the nave to the sanctuary, with lights and incense Formerly the Gospel (i e , a book of the Gospels) was used instead of the Bible for the oath in courts in Christian countries This sort of honor paid to the book resulted in some of the glories of ILLUMINATION, e g , the Lindisfarne Gospels (see LINDISFARNE) and the Book of KELLS For apocryphal Gospels, see PSEUDEPIGRAPHA

Gosplan (gŭsplan'), abbreviation for *Gosudarstvennaya planovaya komissiya* [Rus ,=state planning commission] The Gosplan was organized in the USSR in 1921 to facilitate the recovery of Russian industry from the ravages of the First World War and the civil war The Gosplan plans the Five Year Plans

Gosport (gŏs'-), municipal borough (1931 pop 38,-338, 1947 estimated pop 48,290), Hampshire, England, on Portsmouth Harbour opposite Portsmouth It is a port, the site of a royal victualing yard, naval barracks, and Haslar Hospital for seamen Holy Trinity Church has an organ on which Handel played Once a fishing village, Gosport now has a coast trade, and yachts and sails are made

Gossaert or **Gossart, Jan** see MABUSE, JAN DE

Gosse, Sir Edmund William (gŏs), 1849–1928, English poet and critic He was assistant librarian in the British Museum at 17, Clark lecturer in English literature at Trinity College, Cambridge (1884–90), and librarian of the House of Lords (1904–14) He was praised for his verse in *On Viol and Flute* (1873), *King Erik* (1876), *New Poems* (1879), and other volumes Through his excellent criticisms, he introduced English readers to Ibsen and other Scandinavian writers and to some modern French writers and painters Among the many biographies he wrote were those of Gray (1882), Donne (1899),

Jeremy Taylor (1904), Sir Thomas Browne (1905), Ibsen (1907), Swinburne (1917), and Congreve (rev ed, 1924) *Father and Son* (1907) describes his relation with his father, Philip Henry Gosse (1810–88), English naturalist and author of zoological works, whose biography he had written (1890) Sir Edmund was knighted in 1925 See his essays on Scandinavian poetry and *Studies in the Literature of Northern Europe* (1879), biography by Sir Evan Charteris (1931)

Gossec, François Joseph (frăswä' zhōzĕf' gōsĕk'), 1734–1829, Belgian composer, who lived in Paris after 1751, pupil of Rameau He founded the École royale de Chant in 1784 and later taught composition in its successor school, the Paris Conservatoire He composed many operas, string quartets, and a Requiem, his symphonies, published (1754) before Haydn's, were the first written in France

Gossen, Hermann Heinrich (hĕr'mán hĭn'rĭkh gō'sən), 1810–58, German economist, little known in his lifetime His great work, *Entwicklung der Gesetze des menschlichen Verkehrs und der daraus fliessenden Regeln fur menschliches Handeln* [development of the law of human intercourse and its resulting rule for human behavior] (1854), anticipated the theory of marginal utility as formulated by Jevons and others

Gosson, Stephen (gŏs'ĭn), 1554–1624, English playwright and pamphleteer, a clergyman, b Canterbury, educated at Corpus Christi College, Oxford His plays are lost, but his attack on plays, poetry, and other amusements in *The School of Abuse* (1579) evoked in reply Thomas Lodge's *Defense of Playes* (1579?) and Sir Philip Sidney's *Apologie for Poetrie* (1595) See study by William A Ringler (1942)

Got, François Jules Edmond (frăswä' zhul' ĕdmō' gō'), 1822–1901, French actor He made his debut at the Comédie Française in 1844 and in 1850 was made a member of the company Got was considered one of the finest exponents of the classical school of acting and was the most popular comedian of his time in French classical drama and in such plays as Augier's *Le Fils de Giboyer* and *Les Fourchambault* He made his farewell appearance in 1895

Gota, Swed *Göta älv* (yōō'tə ĕlv'), river, 56 mi long, SW Sweden, draining Vanern lake into the Kattegat It is part of the **Gota Canal,** a 240-mile system of rivers, lakes and canals, which crosses S Sweden from Goteborg to Stockholm The canal, completed in 1832, passes around the TROLLHÄTTAN falls, it ascends and descends 300 ft by means of 58 locks

Gotaland or **Gotarike.** see SWEDEN

Goteborg or **Gothenburg** (gō'thunbûrg, gō'tun–), Swed *Göteborg* (yōōtubôr'yu), city (pop 325,563), SW Sweden, co seat of Goteborg and Bohus co, a seaport at the mouth of the Gota river on the Kattegat It is an important shipping center and the second largest city of Sweden, with shipyards, ball-bearing factories, and porcelain works Goteborg is the seat of a Lutheran bishop, of a university (founded 1887), and of several academies and technical schools It was made a free port in 1922 and is the site of a large annual fair Founded in 1619 by Gustavus II, it was planned by Dutch architects and has retained much of its handsome and stately architecture The ancient city wall has been razed, but the moat remains In 1865 the city originated the Goteborg licensing system for the control of liquor sales, which still is the basis of Swedish LIQUOR LAWS

Goteborg and Bohus, Swed *Goteborg och Bohus län* (yōōtûbôr'yu ō bōō'hus lĕn"), county (1,989 sq mi, pop 510,896), SW Sweden, on the Kattegat It comprises the historic province of BOHUSLÄN and the city of Goteborg, its county seat The chief occupations are fishing, dairying, vegetable growing, and stone quarrying There is a large textile plant at Uddevalla, and there are paper mills at Munkedal

Goteborg licensing system: see LIQUOR LAWS

Gotha (gō'thu, –tə, Ger gō'tä), city (pop 57,639), Thuringia, central Germany It is a manufacturing center, producing railroad cars, machinery, electrical equipment, precision instruments, and a number of other articles First mentioned as a town in 1189, it passed (1485) to the Ernestine line of the Saxon house of WETTIN and became (1640) the capital of the duchy of Saxe-Gotha (from 1826 to 1918, of SAXE-COBURG-GOTHA) Gotha has long been a center of geographic research and publishing The well-known house of Justus Perthes began in 1764 the publication of the *Almanach de Gotha,* an authoritative reference work on the royal houses and the nobility of Europe, publication was not resumed after the Second World War In 1875 the German Socialist groups held a congress at Gotha and united in the Social Democratic party Among the chief historic buildings of Gotha are the ducal palace of Friedenstein (1643–57) and the Friedrichstal Palace (1712), an early 15th-century church, the 16th-century city hall, and parts of a 13th-century Augustine monastery The Leina canal (built 1366–69) brings water to Gotha from the near-by Thuringian Forest The city suffered considerable damage in the Second World War

Gotham (gō'tŭm), village, Nottinghamshire, England Its inhabitants early acquired a reputation for doing ridiculous things, such as trying to drown an eel The stories, collected in the *Merry Tales of Gotham* probably first in the 16th cent, are conjectured to have arisen in the efforts of the townspeople to appear to be fools and thus prevent King John from residing in the town or establishing a highway through it

Gotham (gō'tŭm, in New York gŏth'ŭm), name first used for New York city by Washington Irving and others in the *Salmagundi Papers,* with satirical reference to Gotham, England

Gothenburg see GOTEBORG

Gothenburg (gŏth'unbûrg), city (pop 2,330), S Nebr, on the Platte river and SE of North Platte, in an alfalfa and hay area, settled 1882, inc 1884 A fur-trading post, founded (1854) on the Oregon Trail near by and used (1860–61) as a pony-express station, was moved here in 1931

Gothic architecture, style of building practiced in Europe in the 13th, 14th, and 15th cent, sometimes called pointed style for the conspicuous use of the pointed ARCH and VAULT The term *Gothic* first came into use in the Renaissance as synonymous with barbarous, an adjective then applied to the architecture of the Middle Ages Though all medieval pointed architecture has been classed as Gothic, the style in its most complete and consistent embodiment is seen primarily in France and there only in a few supreme works, such as the cathedral at Amiens In these was attained the goal of an open skeleton of stone, supporting stone vaulting, with each member of the entire building fulfilling a calculated and indispensable function, both structurally and artistically The various arts and crafts developed a related stylistic character and were skillfully used to enrich the great buildings When the 11th-century Romanesque builders of N Europe substituted for the wooden roofing stone vaulting built up of small stones over the side aisles and the nave, their buildings called into play the principles of elasticity and equilibrium to which the high organizing of thrust and counterthrust in Gothic architecture gave eventual stability The introduction of diagonal ribs to support and strengthen the groined vaults was an early and important move These, with the transverse and longitudinal ribs which had already come into use, constituted an independent skeleton frame for the vault masonry With the development of vertical piers to receive this frame at each bay along the walls of nave and side aisles, the walls themselves no longer were needed for support, they could be thin and would permit the use of large windows The advent of the pointed arch (early 12th cent) decreased the lateral thrust and brought greater height and lightness to the vault surfaces and greater flexibility in the covering of oblong areas In the developed Gothic structural organism the great thrusts of the main vaults and roof were collected at points of support where the outward thrust was transferred over the side aisles by a system of flying buttresses (see BUTTRESS) to massive vertical stacks of masonry in the outer walls of the aisles, while the lessened downward thrust of the main vaults was carried by the main piers to the foundations below This interrelation of vaults, thrusts, and supports was termed *articulation* and on it depended the stability of the whole structure As the full possibilities of this skeleton method of construction were understood, extraordinary lightness of effect became possible, as exemplified in such cathedrals as those of Amiens and Bourges, lending plausibility to the statement, "vaults of stone supported on walls of glass," since the stone framework became less and less visually predominant in the interior Upon these fundamental elements of pointed arches, vaults, ribs, piers, and buttresses builders composed effects steadily increasing in variety and audacity In Notre Dame, Paris (1163–c 1230), the skeleton method of construction received its earliest complete expression, while Amiens (1220–88), the loftiest of all completed Gothic cathedrals, displays the fully evolved French church The evolution of the French Gothic churches culminated in the double aisles and side chapels flanking the nave, the elaborated east end with its greatly expanded chevet, the great transept with east and west arms, and the two or more magnificent towers The four periods of French Gothic are Transitional Gothic (1134–80), marking the change from Romanesque to Developed Gothic work, in which both round and pointed arches occur and the structural system is explored, but not perfected, as in the cathedral at Noyon, Developed Gothic (1180–1270), marking the structural and decorative culmination of Gothic architecture for France and indeed the rest of Europe, as in Rheims, Amiens, and Bourges cathedrals, Rayonnant Gothic (mainly 14th cent), a period of application of Developed Gothic principals to smaller structures with an evident loss of strength and vitality in design, as in Saint-Ouen, Rouen, and the choir of St Urban at Troyes, Flamboyant Gothic (mainly 15th cent), marked by an exuberant use of decoration built on a system of compound (flamelike) curves and other decorative devices, as in the Church of St Maclou, Rouen, and in the transept façade of the Évreux cathedral. In England the latter half of the 12th cent saw the transition from massive Norman or Romanesque building to Gothic The pointed arch became established in the late 12th cent, and English Gothic was only at the point of readiness at a time when France was already producing its great works French influences upon English builders, only indirect except for Westminster Abbey, definitely ceased after the early part of the 13th cent English building passed through three merging but definable phases Early English (late 12th–13th cent), with simplicity and statelness, retaining structurally much of the Romanesque, as in Salisbury's cathedral and in the nave and west front of the cathedral at Wells, Decorated style, also termed Geometric or Curvilinear (14th cent), increasingly rich with elaborate tracery (e g, Bristol Cathedral), and Perpendicular style (late 14th–middle 16th cent) —thus termed from the character of its tracery and paneling and distinguished by the development of the FAN VAULT and by much collegiate and manor-house construction, e g, St George's Chapel (1481–1537), Windsor, and Henry VII's chapel (1502–20), Westminster Abbey The latter part of this phase (1485–1558) is also identified as Tudor In England, Gothic church plans exhibited elongated east arms, with square rather than apsidal termination, single aisles, with rarity of side chapels, small east transepts, in addition to the great transepts, frequent cloisters, and a prominent central tower, sometimes crowned by a tall spire In Germany, Gothic architecture borrowed from France in the 13th cent In the Cologne cathedral (commenced c 1248) the eastern arm was copied from Amiens Interpenetrating moldings and other elaborate effects in masonry carving, as well as fine figure sculpture, were characteristic In Italy, Gothic building in general confined itself to the external and decorative features of the style, with the enduring influences of classic Roman design and materials always in the background The Milan cathedral (1386–1813), influenced by German Gothic, is the most important example, while the doges' palace, Venice, exemplifies the richly decorative Venetian Gothic In Spain, French monuments were the chief inspiration, while the decorative elements took a graceful and distinctive character from classic and Moorish influences, and there, as in Italy, the constructive essence of Gothic architecture was subordinated Church interiors, lofty and boldly impressive, were decorative and even sensational in quality, as in Seville (begun 1401), the largest medieval cathedral in Europe, Burgos (begun 1221), and Toledo (1227), with a French plan resembling Bourges The medieval sculptors produced everywhere superb ornamental details and figure sculptures Stained glass encouraged the enlargement of window tracery In the north its use contributed the chief adornment of church interiors, giving a unique and inspiring splendor of color See MEDIEVAL ART See C H Moore, *Development and Character of Gothic Architecture* (1899), T G Jackson, *Gothic Architecture in France, England, and Italy* (1915)

Gothic art see MEDIEVAL ART

Gothic language, East Germanic language The earliest literary remains in any Germanic tongue are in the Gothic Bible of ULFILAS See LANGUAGE (table)

Gothic revival, a phase of taste, chiefly confined to England and America and reaching its maximum popularity c 1850 Though the movement remained a faddish and superficial emulation of the arts of the Middle Ages, yet out of it emerged some capable exponents and some works of merit Architectural evidences of the change may be seen as early as 1770 in Strawberry Hill, near London, in the imitation Gothic abbey redesigned by Horace Walpole as a country residence In 1841 A W N Pugin wrote *The True Principles of Pointed or Christian Architecture,* later the textbook of the revival The English Church supported the movement, restoring a large number of medieval ecclesiastical edifices Sir George Gilbert Scott was the noted English restorer of the day, while France found the requisite talents in the great Viollet-le-Duc The new enthusiasm traveled quickly to the United States, where, early in the 19th cent, the architects Benjamin Latrobe and Maximilian Godefroy had already been experimenting with Gothic motives Meanwhile the CLASSIC REVIVAL had reached full development, and the two causes came into headlong conflict with their respective exponents taking sides in a battle of the styles, as it has been termed In England a decided triumph for the Gothicists came with the construction of the Houses of Parliament (1840) in Perpendicular Gothic, by Sir Charles Barry In the United States the style was exploited chiefly for its romantic and picturesque side, with little knowledge of its true values Used largely in residences and tinctured with Victorian taste, it degenerated into triviality and actual ugliness However, the work of Richard Upjohn and of James Renwick pointed the way to the expert modern use of Gothic by many able architects, including R A Cram and B. G. Goodhue.

In England the revival produced a permanent good effect, and it revived interest in the decorative arts, with the work of the Middle Ages as inspiration This was the arts and crafts movement of the 1870s and 1880s, with William Morris and his group as the most effectual leaders Much of the minor architecture and of the popular arts and cabinetmaking of the revival, though of no high artistic rank, yet reveal good craftsmanship and a naïve charm See A E Addison, *Romanticism and the Gothic Revival* (1938)

Gothic romance, a type of NOVEL which flourished in the late 18th and early 19th cent in England The mystery of each tale is heavily tinged with horror derived from a gloomy background of medieval architecture and with terror of the supernatural The *Castle of Otranto* by Horace Walpole was the forerunner of the type which flourished in the works of Mrs Ann RADCLIFFE, Matthew Gregory LEWIS, and Charles R MATURIN and in the novel *Frankenstein* by Mary Shelley

Goths. see OSTROGOTHS and VISIGOTHS

Gotland (gôt'lund), Swed *Gotlands län* (gôt'lants lĕn'), island county (1,225 sq mi , pop 59,505), SE Sweden, in the Baltic Sea off the coast of Kalmar co It comprises the islands of Gotland, FARO, Karlso, Sando, and others Gotland is a limestone plateau with a few hills and with steep coasts Its temperate climate and fertile soil favor the growing of wheat, rye, sugar beets, and vegetables Other industries are fishing and cementmaking Wisby is the county seat The historic province of Gotland is coextensive with the administrative county Archaeological remains indicate that Gotland, inhabited since the Stone Age, was nearly depopulated by a climatic change to intense cold between 600 and 300 B C Ancient Roman, Arabic, and Anglo-Saxon coins demonstrate early wide commercial activity In the 12th cent German merchants settled at WISBY, which became one of the chief towns of the HANSEATIC LEAGUE From the 11th to the 14th cent Gotland prospered as the trade center of the North However, the Wisby merchants, in trying to maintain exclusive trade privileges, clashed with the peasant-traders of the island, who had achieved great prosperity The resulting conflicts left Gotland open to conquest (1280) by the Swedish king, Magnus I (Magnus Ladulas) Lubeck soon took away much of its commerce, and fires and plagues in the 14th cent reduced its population Gotland was devastated (1361) and conquered (1362) by WALDEMAR IV of Denmark, who, however, again had to yield it to the Hanseatic League by the Peace of Stralsund (1370) In the subsequent wars between the Hansa and the Scandinavian kingdoms, Gotland served as a base of operations for pirates, who terrorized the entire North By the Treaty of Stettin (1570) Gotland passed under Danish rule, in 1645 it was regained by Sweden Many ruins of castles and churches recall its important role in the past

Goto-retto (gōtō'-rĕt'tō), group of islands (249 sq mi , pop 154,207), in the East China Sea, off W Kyushu, Japan Administratively they are part of Nagasaki prefecture They yield large quantities of ornamental coral

Gottfried von Strassburg (gôt'frēt fŭn shtras'bŏŏrk), fl 13th cent German epic poet He is thought to have been official scribe of Strasbourg, but little is known of him As author of the Middle High German epic *Tristan* (c 1210) he ranks as one of the great medieval German poets and surpasses all the other epic writers of his period in artistry, fluency, and psychological interest His style, usually smooth and always artistic, is often capricious and mannered, and in some respects he is inferior to Wolfram von Eschenbach *Tristan* breaks off at the point where Tristan meets Isolt of the White Hands The poem was concluded by two different poets, Ulrich von Türheim and Heinrich von Freiberg The second of these (c 1300) was by far the better poet See TRISTRAM AND ISOLDE See also translation of *Tristan* by Jessie Weston (1899)

Gottheil, Gustav (gôt'hīl), 1827–1903, American reform rabbi, b Prussia, educated at the universities of Berlin and Halle He served as assistant (1855–60) in the Berlin Reform Temple and as rabbi (1860–73) in Manchester, England From 1873 until his retirement in 1899 he was assistant rabbi and then rabbi of Temple Emanu-El, New York City His influence on reformed Judaism in the United States was great, he was the founder of several Jewish societies and a governor of the Cincinnati Hebrew Union College In 1886 he prepared the first American Jewish hymnbook, upon which the Union Hymnal of most of the American reformed congregations is based See biography by his son, Richard Gottheil (1936)

Gottheil, Richard James Horatio, 1862–1936, American Orientalist and Semitic scholar, b Manchester, England, grad Columbia Univ., 1881, Ph D Univ of Leipzig, 1886, son of Gustav Gottheil He taught Semitic languages at Columbia Univ from 1886 (as professor from 1887), and he was head of the Oriental department of the New York Public Library from 1896. An ardent Zionist, he was interested in the rebuilding of Palestine and was head (1909–10) of the American School of Archaeology at Jerusalem His contributions to the study of Syriac are noteworthy His works include *The Syriac Grammar of Mar Elia of Zobha* (1887), *The Syriac-Arabic Glosses of Isha bar Ali* (1908–28), many articles in *The Jewish Encyclopedia*, of which he was an editor, and a biography of his father (1936)

Gotthelf, Jeremias (yärĕmē'as gôt'hĕlf), 1797–1854, Swiss author and clergyman, whose real name was Albert Bitzius He spent most of his adult life as Protestant pastor in the Emmental, Bern canton, where he took an ardent and active interest in the education and economic improvement of the then poverty-stricken rural population His political thought was conservative, and his writings constitute largely a crusade against the materialistic and irreligious spirit of the time His novels, partly written in the Swiss-German idiom, have survived their immediate application because of their high literary merit and originality Gotthelf, sometimes called the first of the German naturalist school, had a profound insight in the psychology of his characters—mostly Bernese peasants —and his style is distinguished for its realistic vigor Best known among his novels are *Uli der Knecht* [Ulric the farmhand] (1840) and *Uli der Pächter* [Ulric the tenant] (1849)

Göttingen (gû'tĭng-un), city (pop 68 577), S Hanover, W central Germany, on the Leine river and NE of Kassel It has manufactures of optical and precision instruments and other industries, but its fame rests on its university, founded in 1737 by Elector George Augustus (later George II of England) First mentioned in the 10th cent , Göttingen received (c 1200) a city charter and joined the Hanseatic League When, in 1837, King Ernest Augustus revoked the constitution of Hanover, seven professors of the Univ of Göttingen issued a strong protest and were summarily dismissed They were the brothers Jakob and Karl Grimm, the founders of comparative philology, the historian and critic Gervinus, the historian Dahlmann, the physicist W E Weber, the Orientalist G H A von Ewald, and the jurist Wilhelm Eduard Albrecht In those times such a breach of academic freedom was still considered an outrage, and the reputation of the university accordingly declined It was revived at the end of the 19th cent thanks to the departments of mathematics and physics, which ranked among the world's best The mathematical tradition of Göttingen dates back to Karl Friedrich Gauss, who was born here and taught at the university Göttingen was also the seat of the *Göttinger Dichterbund* or *Göttinger Hain* a group of early romantic poets, founded here in 1772 by J H Voss and others The city, virtually undamaged in the Second World War has the typical quiet and pleasant character of a German university town and has preserved much of its medieval architecture

Gottschalk or **Gottschalck** (both gôt'shalk), d c 868, German theologian, son of the count of Saxony He was placed as a lad in the monastery of Fulda (c 822) He did not wish to be a monk but was forced by RABANUS MAURUS, his superior, to remain In 827 a synod freed him of his vows, but he went to the monastery of Orbais, where he was ordained a priest He soon began to teach an extreme doctrine of predestination, holding that God had selected in advance whom He would save and whom condemn He preached in Italy and elsewhere Rabanus and HINCMAR worked to suppress him, and Gottschalk was condemned in 848 and 849, deposed from the priesthood, and imprisoned in the Monastery of Hautvillers Gottschalk's heterodoxy was much discussed, it was apparently derived from a too stringent interpretation of St Augustine

Gottschalk, Louis Moreau (gôt'shôk), 1829–69, American pianist, b New Orleans, of English-French parentage He studied in Paris Chopin and Berlioz praised his playing, he appeared successfully in Europe, the United States, and South America The musical value of his programs, however, was slight His own salon pieces, such as *The Last Hope* and *The Dying Poet*, were immensely popular See his *Notes of a Pianist* (1881), biographies by Paul Lapin (Eng tr , 1852) and Octavia Hensel (1870)

Gottsched, Johann Christoph (yō'hän krĭs'tôf gôt'shät), 1700–1766, German poet and critic, professor of poetry at Leipzig He was the most influential critic of his time until the Swiss Bodmer and J J Breitinger successfully combated his theories In addition to critical works he produced a bibliography of German dramatic literature, the *Nöthiger Vorrath* (1757–65) Gottsched made a valiant attempt to reform the German stage He organized his own company and opened a theater in which Karoline NEUBER was the leading spirit He adapted *The Dying Cato* (1731) from plays by Deschamps and Addison, his wife, Luise Adelgunde Viktoria Gottsched wrote successful comedies and adaptations for his players His work for the theater was later ruthlessly attacked by LESSING

Goucher College (gou'chur), at Baltimore and Towson, Md , nonsectarian, for women, chartered 1885, opened 1888 by Methodists Formerly called the Woman's College of Baltimore, it was renamed in 1910 for its president, John Franklin Goucher (1890–1908), and his wife, who were among the founders Building on the new campus near Towson began in 1940 See history by A H Knipp and T F Thomas (1938)

Gouda (gou'du, Dutch khou'da), municipality (pop 36,991), South Holland prov , W Netherlands, ENE of Rotterdam It has pottery and other manufactures and is an important cheese market Gouda was chartered in 1272 and was a cloth-manufacturing center in the Middle Ages Erasmus received his first schooling at Gouda, before his removal (1475) to Deventer, in 1486 he entered a near-by Augustinian monastery Gouda has kept its Gothic town hall (15th cent) and a fine 16th-century church, the Sint Janskerk or Groote Kerk

Goudy, Frederic William, 1865–1947, American type designer, b Bloomington, Ill He did printing, and his wife, Bertha M Sprinks Goudy, acted as typesetter He is noted as the most prolific type designer in history Kennerley, Deepdene, Garamont, and Forum are only a few of his more than 100 type faces He is the author of *The Alphabet* (1918), *Elements of Lettering* (1922), and *Typologia* (1940) See his *Half Century of Type Design and Typography, 1895–1945* (1946)

Gough, John Bartholomew (gŏf), 1817–86, American temperance lecturer, b England Dramatically diverted from alcoholism by a temperance pledge (1842), he devoted the rest of his life to lecturing for the cause in America and England, winning thousands of followers His autobiography (1845) was supplemented in 1869 *Tiger! Tiger!* (1930) by Honoré Morrow is a fictionized biography

Gough, Richard, 1735–1809, English antiquary, authority on British topography His valuable collection of books and manuscripts is in the Bodleian Library, Oxford Chief among his many works are *Anecdotes of British Topography* (1768, enlarged as *British Topography*, 2 vols , 1780) and *Sepulchral Monuments* (4 vols , 1786–99)

Gouin, Sir Jean Lomer (zhäⁿ lômĕr' gwĕ'), 1861–1929, Canadian political leader, b Quebec prov , educated at Laval Univ In 1844 he was called to the bar of Quebec For 15 years (1905–20) he was Liberal prime minister and attorney general of Quebec Knighted in 1908, Sir Lomer served (1921–24) as minister of justice in Mackenzie King's administration In 1929 he was appointed lieutenant-governor of Quebec, but he died several months after he took office

Goujon, Jean (zhäⁿ' gōōzhōⁿ'), c 1510–c 1566, French Renaissance sculptor and architect Much of his work consisted in decorations in low relief for buildings or monuments He was the first French sculptor to free himself completely from the medieval tradition While his work reflects the Italian Renaissance, it is unmistakably French and highly original He was associated with Pierre LESCOT, architect of the Louvre, and was employed on the churches of Saint-Maclou, Rouen, and Saint-Germain-l'Auxerrois, Paris[1] Two reliefs from the latter are in the Louvre Later he worked on the châteaux at Écouen and Anet and at the Louvre He made the celebrated decorations for the *Fountain of the Innocents*, Paris, some of which have since been removed to the Louvre Among his decorations on the Louvre itself are the reliefs on the staircase of Henry II and the caryatids of the *Tribune of Caryatids* Goujon, a Huguenot, died in exile in Italy See studies by Reginald Lister (1903) and Paul Vitry (1908, in French)

Gould, Augustus Addison (gōōld), 1805–66, American naturalist, b New Ipswich, N H , M D Harvard, 1830 A pioneer in American conchology, he described the mollusks gathered by the Wilkes expedition and wrote and illustrated the *Report on the Invertebrata of Massachusetts* (1841) With Louis Agassiz he wrote *Principles of Zoölogy* (1848)

Gould, Benjamin Apthorp, 1824–96, American astronomer, b Boston, grad Harvard, 1844, Ph D Univ of Göttingen, 1848 He did notable work in developing and organizing the longitude department of the U S Coast Survey, with which he was connected from 1852 to 1867 He was among the first to employ the Atlantic cable (1866) to establish relations in longitude between stations in Europe and in America He founded the *Astronomical Journal* (1849) and was director (1855–59) of Dudley Observatory, Albany, N Y After organizing for the Argentine republic a national observatory at Córdoba, he undertook (1870) observations there which resulted in two valuable works, *Uranometria argentina* (1879) and *Catálogo de zonas estelares* (1884) This zone catalogue included 73,160 stars Before returning (1885) to the United States he established a system of meteorological stations in Argentina extending as far south as Tierra del Fuego

Gould, Sir Francis Carruthers, 1844–1925, English caricaturist He was political cartoonist on the *Pall Mall Gazette*, 1887-92, and later on the *West-*

minster Gazette, where he became assistant editor. Among his independent publications are *Tales Told in a Zoo* (1900) and *Froissart's Modern Chronicles* (1902, 1908)

Gould, George Jay, 1864–1923, U S railroad owner, b. New York city; son of Jay Gould He was associated with his father, inherited all the holdings on Jay Gould's death, and adopted daring policies To compete with E H Harriman he bought the Denver & Rio Grande RR, but Harriman bought the Southern Pacific and bottled up the Gould roads. Gould then purchased the Western Pacific and completed it to San Francisco to get an outlet to the sea In the east he also bought or built lines from Toledo to Baltimore via Pittsburgh to give the Wabash RR an outlet to the Atlantic and to challenge the monopoly of the Pennsylvania RR He seemed to have a transcontinental system in his grasp, but his financing was unsound, and he crashed in the Panic of 1907 All the roads had been lost by 1918

Gould, George Milbry, 1848–1922, American ophthalmologist, b Auburn, Maine, M D Jefferson Medical College, Philadelphia, 1888 He introduced the cemented bifocal lens and described the constitutional effect of eyestrain He edited *American Medicine* (which he founded) and other journals, and, besides standard medical dictionaries, wrote *Biographic Clinics* (1903–9), *Concerning Lafcadio Hearn* (1908), and, with Laura Stedman (later his second wife), *Life and Letters of Edmund Clarence Stedman* (1910)

Gould, Jay, 1836–92, American capitalist, b Delaware co, N Y He rose from being a country-store clerk and surveyor's assistant to control of half the railroad mileage in the Southwest, of New York city's elevated railroads, and of the Western Union Telegraph Company With savings of $5,000 at 21 he became a speculator, particularly in small railroads After some years he became a director of the ERIE RAILROAD Aided by James FISK and Daniel DREW, he defeated Cornelius VANDERBILT for control of this road and manipulated its stocks in the interest of himself and his group, including "Boss" Tweed The Gould-Fisk scheme to corner gold in 1869 caused the BLACK FRIDAY panic Public protest forced the Gould group out of the Erie, Gould, the last, going in 1872 He then bought into the Union Pacific and other Western roads By sharp practice he gained control of four lines which made up the Gould system After his death his estate and interests were managed by his son, George Jay GOULD

Gould, Thomas Ridgeway, 1818–81, American sculptor, b Boston, studied with W W Story A prosperous merchant before the Civil War, he merely amused himself with sculpture However, after suffering financial reverses, he earned a living as a sculptor He made portrait busts of Junius Brutus Booth and of Emerson and other prominent Bostonians An imaginary portrait statue of King Kamehameha I is in Honolulu Of the popular *West Wind* he made seven replicas He died in Florence, where he had opened a studio in 1868

Gouldsboro (gōōlz'–, gōōldz'–), resort town (pop 1,068), SE Maine, SE of Bangor, on Frenchman Bay opposite Bar Harbor, inc 1739

Gounod, Charles François (shārl' fräswä' gōōnō'), 1818–93, French composer, studied at the Paris Conservatoire and received the Grand Prix de Rome in 1839 His fame rests chiefly on his operas *Faust* (1859) and *Romeo and Juliet* (1867), but one other opera, *Mireille* (1864), had some success His oratorios *La Rédemption* (1882) and *Mors et vita* (1885), his funeral cantata, *Gallia* (1870), and his *Messe à Sainte Cécile* (1882) are worthy of note He spent some years in the study of theology and greatly admired the church music of Palestrina See his *Mémoires d'un artiste* (Eng tr, 1896)

Goupil, René (Saint René Goupil) (runā' gōōpēl'), c.1607–1642, French martyr missionary, canonized in 1930 He came to Canada in 1640, spent two years assisting the Jesuits, and at the request of Father Isaac JOGUES accompanied him on his return to the Huron Indians from Quebec in 1642 Captured on the journey by Iroquois, they were enslaved and cruelly tortured At this time Goupil took his vows. Not long afterward he was tomahawked near the site of the present Auriesville, N Y. He was one of the group known as the Jesuit Martyrs of North America Feast Sept 26 or (among the Jesuits) March 16.

gourd (gōrd, gōōrd) [O Fr. from Latin], popular name for plants of several genera that bear fruits of various forms which are used for ornament and as utensils, drinking cups, dippers, and bowls Some gourds are hard shelled and durable, others are not The genus *Lagenaria* includes the calabash, snake (*Trichosanthes anguina* is also called snake gourd), dipper, and bottle gourds. The genus *Luffa* includes the rag or dishcloth gourd or vegetable sponge—called in the S United States the California okra—which has an edible, spongelike inner part, sometimes dried and used as a cloth Yellow-flowered gourds belong to a variety of the PUMPKIN The gourd under which Jonah is supposed to have rested (Jonah 4 6) has been identified both with gourds and with the castor bean. In Europe the term *gourd* is used generally for plants of the genus *Cucurbita*, which includes both the squash and pumpkin See L H Bailey, *The Garden of Gourds* (1937), *Useful and Ornamental Gourds* (U.S. Dept of Agriculture, Farmers' Bul. 1849)

Gourgaud, Gaspard (gäspär' gōōrgō'), 1783–1852, French general He served under Napoleon, whom he accompanied to St Helena and whose memoirs he helped to prepare Louis Philippe, under whom he served after his return to France, created him a baron and a peer Gourgaud wrote books on the Napoleonic empire

Gourgues, Dominique de (dōmēnēk' dŭ gōōrg'), c.1530–1593, French soldier and adventurer He served in the Italian Wars, was captured by the Spanish, then by the Turks, served as galley slave under both, and after his release led expeditions to Africa and South America Stirred by the massacre (1565) of the Huguenot colony of Jean RIBAUT on the Florida coast, he fitted out three ships and, joining forces with the Indians of the region, captured the Spanish forts on the same coast He ruthlessly put all the surviving garrison to death and nailed to a tree a sign saying, "Hanged, not as Spaniards, but as traitors, robbers, and murderers," in reply to the Spanish claim that Ribaut's colonists were "hanged, not as Frenchmen, but as Lutherans and heretics"

Gourlay, Robert Fleming (gōōr'lē), 1778–1863, Scottish writer and agitator, b Fifeshire, educated at St Andrews Univ He came to Upper Canada in 1817 and at Kingston attempted to establish himself as a land agent, but he quickly discovered that land grants were largely controlled by the powerful clique known as the Family Compact Gourlay circulated throughout the province a noted questionnaire, replies to which indicated clearly that the difficulty in obtaining unclouded title to land was a major cause for discontent At his instigation a convention of pioneer farmers from all over Upper Canada met (1818) at York to discuss their grievances Alarmed at this threat to their power, the Family Compact contrived to have Gourlay arrested and imprisoned, after an unfair trial, he was banished (1819) from the province as a seditious alien He returned to Scotland and later published in London his *Statistical Account of Upper Canada* (1822) While living in the United States, where he went c 1836, he wrote his autobiographical *The Banished Briton and Neptunian*, which was printed (1843) in 38 parts In 1842 the Parliament of United Canada declared Gourlay's sentence null and void, but he did not return to Canada until 1856 He attempted to enter the legislative assembly but was defeated, and he went back (c 1860) to Scotland In addition to his books he wrote a number of pamphlets

Gourmont, Remy de (rumē' dŭ gōōrmō'), 1858–1915, French critic and novelist, leading critical apologist for the SYMBOLISTS Although his views were broad and seemingly contradictory, he was consistent in opposing traditionalism and defending new literary departures He was for many years a contributor to the *Mercure de France* His novels, stories, and plays reveal no one style but are always analytic in their character study Two of his better-known novels are *Les Chevaux de Diomède* (1897, Eng tr, *The Horses of Diomedes*, 1923) and *Un Cœur virginal* (1907, Eng tr, *A Virgin Heart*, 1921) See Amy Lowell, *Six French Poets* (rev. ed, 1916)

Gournay, Vincent de (vēsä' dŭ gōōrnā'), 1712–59, French economist, precursor of the PHYSIOCRATS and of Adam Smith. A wealthy merchant, he had connections, and traveled, in Spain, England, Holland, and Germany and from 1751 to 1758 was in government service as intendant of commerce He translated and annotated the work of Josiah CHILD and gathered around him a group of men interested in reforming the economy of France and in abolishing trade restrictions His favorite phrase was "*Laissez faire, laissez passer*," and he is generally credited with being its originator

Gourock (gōō'rŭk), burgh (pop 8,845), Renfrewshire, Scotland, WNW of Greenock and on the south shore of the Firth of Clyde It has a good harbor and is a yachting center, summer resort, and terminus of steamship lines

gout, disease characterized by actute paroxysmal arthritis A large amount of uric acid is present in the blood. Deposits of sodium urate crystals are found in the subcutaneous tissues of joints or of the ear, and frequently there are terminal lesions in the kidneys The cause of gout is not known It occurs more frequently in males than females and generally after the age of 35 Heredity and alcoholic and dietary excesses are predisposing factors Symptoms include swelling, redness, and tenderness of the joints, especially the joint of the great toe, the ankle or the knee may be the first of the joints attacked. Gouty arthritis recurs and may become chronic. Treatment consists of resting the affected part and the use of cathartics and hot-water compresses The drug colchicine relieves pain and may abort an attack. Regulation of the diet is necessary.

Gouthière, Pierre (pyĕr' gōōtyĕr'), 1740–1806, French metalworker. The greatest artist of ornamental bronzes of the period of Louis XVI, he produced a vast number of superb cast and chiseled gilt bronzes, executed chiefly for the adornment of fine clocks, Oriental and Sèvres porcelains, and objects of furniture. Among his patrons were the duc d'Aumont and Mme du Barry The Wallace Collection in London includes a celebrated red jasper bowl adorned by Gouthière which had belonged to Du Barry, a noted clock bearing his signature, and many others of his finest productions.

Gouverneur (gŭvurnŏr'), village (pop 4,478), N N Y, on the Oswegatchie and S of Ogdensburg; laid out 1787, inc 1850. Talc, lead, zinc, and marble are its chief products. The town was named for Gouverneur Morris, whose mansion still stands

government, system of social control fixed by laws promulgated by those who can enforce them by definite penalties Laws of political government are sanctioned ultimately by the authority of physical force, and the body politic promulgating and enforcing the laws is the state The power of the national government may be limited by certain powers delegated or reserved to smaller political divisions, as the states in the United States Power may be vested in an individual, as in autocracies and monarchies, or in a small class, as in oligarchies Oligarchies are known as aristocracies when the dominating class is the most privileged and when the power is hereditary or racial Democracies allow the people to participate more or less directly in actual government, and dictatorships combine certain features of autocracy with the minimum of democracy Whatever the form of government, its power rests upon the consent of a more or less large proportion of the governed, whose composite will is synonymous with the state and who can control the major physical force within the community Governments may be unitary—i e, with the central government controlling local matters—or they may be federal or confederated, according to the degree of unity between the national and local governments The law determining the form of government is called the CONSTITUTION, whether it is written, as in the United States, or unwritten, as in Great Britain See also POLITICAL SCIENCE See J W Burgess, *The Foundations of Political Science* (1933), W F Willoughby, *The Government of Modern States* (rev and enl ed, 1936), E S Griffith, *Modern Government in Action* (1942), C E Merriam, *Public & Private Government* (1944), R M MacIver, *The Web of Government* (1947), Herman Finer, *The Theory and Practice of Modern Government* (rev ed, 1949)

governor, in the United States, the chief executive of each state, elected by the people, in the British dependencies, the representative of the crown, an appointed officer The functions of the governor of a state are lessened by the fact that many state bureaus have elective heads, and appointments by the governor are almost always subject to ratification by the state senate An annual conference of governors has developed from the conference called (1908) by President Theodore Roosevelt to discuss conservation of natural resources Later conferences have discussed marriage, divorce, child labor, capital punishment, and other questions on which state laws are not uniform, flood control, labor problems, state control over intrastate commerce (1911), and, at the end of the Second World War (1945), the return of state powers by the Federal government Governors of territories and dependencies are appointed by the President and are removable at his will. See W B Munro, *Government of the United States* (1936)

governor, automatic device used to regulate and control speed, pressure, or other variables in the functioning of an engine or other machine The constant-speed governor serves to keep the speed of an engine constant under changes in load and steam pressure It is of the centrifugal type, with weights or flyballs attached to the ends of arms These arms are arranged, like the spokes of wheels, around a central spindle They are connected to the steam-inlet valve (commonly called the governor valve) and are so attached as to extend farther from the spindle as the speed of the engine increases until, at a predetermined point of extension they force the governor valve to close. Varying degrees of closure and the speeds at which they shall occur can be set in advance Where changes are required while an engine is in operation, a variable-speed governor is employed. A governor synchronizing device is used to equalize the speed of two or more engines driving electric generators, before they engage the generators Another type of speed governor consists essentially of an oil pump, driven from an engine shaft, in which the oil pressure, changing in proportion to the change of engine speed, closes or opens the governor valve by means of a spring arrangement. An overspeed governor, generally used on steam turbines, acts as a safety device by stopping the machine when its speed is too great for safety

Gouvion-Saint-Cyr, Laurent, marquis de (lōrä' märkē' dŭ gōōvyō'-sĕ'-sēr'), 1764–1830, marshal of France He served in the French Revolutionary and Napoleonic Wars, and after the Bourbon restoration he was twice (1815, 1817–19) minister of

war. He wrote on the Napoleonic Wars and left memoirs.

Govan (gŭ'vən), parish (pop. 364,801) of SW Glasgow, Scotland, on the south shore of the Clyde It is in Lanarkshire It has extensive shipbuilding yards and manufactures chemicals, asbestos, and machine tools

government ownership: see PUBLIC OWNERSHIP.

Government Printing Office, United States, authorized (1860) by joint resolution of Congress and purchased (1861) for $135,000 by congressional appropriation The activities of the Government Printing Office were defined in the Printing Act of 1895, and today its plant in Washington, D C , is probably the largest in the world The Government Printing Office executes orders for printing and binding placed by Congress, Federal departments, and Federal agencies, distributes government publications, and reprints documents for public purchase

Governors Island, in Upper New York Bay, S of Manhattan Island Known as Nutten (Nooten, Nut) Island after the Dutch governor of New Netherland, Wouter Van Twiller, bought it (1637) from the Indians, it had several names before the present one was adopted in 1784 because the colonial governors lived there A race track built here in 1784 lasted until 1797 Its historic landmarks include Fort Jay, completed in the early 19th cent , and the military prison Castle Williams (built 1807–11) In 1878 the island became headquarters of the 2d Corps Area Shortly after 1900 the Federal government reclaimed eroded land, bringing the area to 173 acres

Gowanda (gōwän'də), village (pop 3,156), W N Y , on Cattaraugus Creek and E of Dunkirk, settled 1810, inc 1848 Tanning and gluemaking are its chief industries Near by is the Gowanda State Homeopathic Hospital for mental disorders

Gower, John (gou'ur, gôr), d 1408, English poet He was the best-known contemporary and friend of Chaucer, who called him "Moral Gower " Apparently he was a Kentish landowner who lived in London until his last years, when he became blind and retired as a layman to the priory of St Mary Overey His major works are the *Speculum Meditantis* (in French verse, known also as *Mirour de l'omme* and written c 1376–1379), a religious allegory, valuable for its picture of contemporary society, the *Vox Clamantis* (in Latin verse), an expression of the terror of the wealthy at the Peasants' Revolt under Wat TYLER and a protest against the evil practices of men, and the *Confessio Amantis* (in English verse, completed c 1393), his masterpiece, a collection of stories written at the suggestion of Richard II, illustrating the Seven Deadly Sins Among his minor works are *Cinkante Balades*, which are love poems in French, and *In Praise of Peace*, a poem in English See his complete works (ed by G C Macaulay, 1899–1902), study by G C Fox (1931), J E Wells, *A Manual of the Writings in Middle English* (1916 and supplements)

Gower (gou'ur), peninsula c 15 mi long and 5 mi wide, Glamorganshire, Wales, SW of Swansea It is of limestone, and there are numerous caves and fine scenery There are several resorts on the coast Brandy Cove is known as a former haunt of smugglers Paleolithic and Bronze Age relics have been found here

Gowrie, earls of see RUTHVEN, family

Gowrie, town (pop 1,028), W central Iowa, SSW of Fort Dodge, inc 1870 Dairying is done here

Gowrie, Carse of (kärs, kārs, gou'rē), fertile area, Perthshire, Scotland, between Perth and Dundee

Goya y Lucientes, Francisco José de (frənthē'skō hōsā' dā gō'yä ē lōōthēän'(tās), 1746–1828, Spanish painter and etcher, b near Saragossa, of humble parents He studied in Saragossa and Madrid and then in Rome, leading an obscure but tumultuous youth, devoted as much to sowing his wild oats as to advancing his art He returned to Madrid c 1775 and married Soon after his return he was employed in painting a series of tapestry designs for the royal manufactory of Santa Barbara, in Huelva prov These were executed as oil paintings, and their brilliance and daring soon focused royal attention on his talent Later, in 1786 and again in 1791, he added to this series These paintings, which can be admired as such apart from their decorative function, show Goya in a lighter vein Depicting scenes of popular life, they are painted with freedom, gaiety, and charm He became court painter to Charles III in 1786 and during the reign of Charles IV and María Luisa was a great favorite at court. His royal portraits are painted with extraordinary candor and realism The life of the court was frankly libertine and that of Goya seems to have been no exception Rightly or wrongly his name is linked with that of the duquesa de Alba, of whom he painted many delightful portraits Almost all the notables of Madrid posed for him If he could be brutally frank he could be exquisitely tender, and in many of his portraits of women and children one finds a kind of sensibility not to be seen in the work of any earlier master. Despite his great success and productivity in this field, Goya never ceased to explore others. From 1790 to 1800 appeared his *Caprichos*, a series of etchings in the nature of grotesque social satire They were followed by a similar series, the *Proverbios*, the *Tauromaquia* [the bullfight], and the terrible *Desastres de la guerra* [the disasters of war] These magnificent etchings were suggested by the Peninsular War. They constitute almost an indictment of mankind and are not the work of a reformer bent on correcting specific abuses but the spontaneous reaction of a sensitive man in a world given over to war and corruption Only his credit at court made their publication possible As a religious painter Goya was generally less successful, but his frescoes in the Church of San Antonio de la Florida, Madrid, are justly famous Throughout the Napoleonic period Goya retained favor under changing regimes At 70 he retired to his villa, called the Quinta del Sordo because of his deafness There he decorated his walls with a series of somber paintings of macabre subjects, such as *Saturn Devouring His Children*, *Witches' Sabbath*, and *The Three Fates* (all Prado) His last years were spent in voluntary exile in Bordeaux Goya is generally conceded to be the greatest painter of his century, the worthiest successor of the masters of the baroque, and the forerunner of the great French painters of the 19th cent All phases of his large and varied production can be appreciated only in Madrid He is represented in many European and American galleries, notably in the Hispanic Society of America, the Metropolitan Museum, and the Frick Collection, all in New York, and in the museums of Boston and Chicago His self-portrait is in the New York Public Library See studies by A F Calvert (1908), Hugh Stokes (1914), Aureliano de Beruete y Moret (Eng tr , 1922), Charles Poore (1938), and Antonina Vallentin (1949)

Goyaz, Brazil see GOIÁS

Goyen, Jan Josephszoon van (yän' yō'zufsōn van gō'yun), 1596–1656, Dutch landscape painter, studied at Leiden and Haarlem In 1631 he settled at The Hague, where he became dean of the painters' guild and prospered His typically Dutch landscapes of harbors, canals, riverbanks, and winter scenes with skaters and sleighs are naturalistically painted in a grayish-green tonality He was one of the first landscape painters to sacrifice minute detail for atmospheric effect and space, and he had a considerable influence on later Dutch landscapists His paintings are in many collections in Europe and America Famous examples are *Panorama of The Hague* (The Hague), *Banks of a Canal* (Louvre), and *View of Dordrecht* (Rijks Mus) The Metropolitan Museum contains five fine landscapes, and the Pennsylvania Academy of the Fine Arts two

Gozan (gō'–), fertile country bordering on the HABOR, to which the Assyrians carried the Israelites 2 Kings 17 6, 18 11, 19 12, Isa 37 12

Gozlin (gōzlĕ'), c 805–886, French cleric He was abbot of Saint-Germain-des-Prés and of Saint-Denis and served as chancellor under the emperors Charles II and Charles III and the French kings Louis II and Louis III In 883 he was made bishop of Paris He had the fortifications strengthened and was one of the leaders of the defense against the Normans (885–86), but died in the siege

Gozzi, Carlo, Conte (kär'lō kōn'tā gôt'tsē), 1720–1806, Italian dramatist He wrote comedies based on the old *commedia dell' arte* To ridicule Goldoni, his adversary, he conceived the idea of dramatizing the tales of Basile's *Pentamerone*, thus founding the fable play in Italy His *Fiaba dell' amore della tre melarancie* (1761, later set to music by Prokofiev as *The Love for the Three Oranges*) was so successful that Gozzi continued to produce more plays of the type, among them *Re Turandot* (1762), made into an opera by Puccini These were written in Venetian dialect and were very popular in their day See Gozzi's memoirs (1797, Eng tr with a critical essay by J A Symonds, 1890), Hedwig Russack, *Gozzi in Germany* (1930)

Gozzi, Gasparo (gä'spärō), 1713–86, Italian critic and poet, brother of Carlo GOZZI He wrote dramas and stories in prose and verse and founded the *Gazzetta veneta* (1760) and the *Osservatore veneto* (1761), which was modeled on the *Spectator* Among his volumes of verse is the *Sermoni* His sympathetic criticism of Dante, *Difesa di Dante* (1758), contributed to the 19th-century revival of interest in Dante

Gozzoli, Benozzo (bānôt'tsō gôt'tsōlē), 1420–97, Florentine painter, whose real name was Benozzo di Lese After assisting Fra Angelico in Rome and Orvieto, he settled (1499) in Montefalco, where he painted many important works, all of which show the influence of Fra Angelico Among them are a *Madonna and Child with Saints* (Church of San Fortunato), with an altarpiece, *St Thomas Receiving the Girdle of the Virgin* (now in the Vatican), and frescoes depicting the life of St Francis, a *Madonna and Child*, a *Crucifixion*, and scenes from the life of St Sebastian (all Monastery of San Francesco) He returned to Florence c 1459 and there painted the famous *Journey of the Magi to Bethlehem* (Riccardi Palace) In San Gimignano he painted for the Church of Sant' Agostino *St Sebastian Protecting the City from the Plague*, a *Crucifixion*, and frescoes from the life of St. Augustine and, in the Pieve, a *Martyrdom of St. Sebastian* and other frescoes Between 1468 and 1485 he produced his largest and most important work, the vast series of 24 frescoes in Campo Santo, Pisa, with subjects taken from the Old Testament Among his easel pictures are *The Triumph of St Thomas Aquinas* (Louvre), the *Virgin and Child* (National Gall , London), and *St Ursula with Angels and Donor* (National Gall of Art, Washington, D C) In the Metropolitan Museum are panels of an altarpiece attributed to Gozzoli Gozzoli's art is notable for its charm and naturalness and for its decorative quality, the style is animated, the technique smooth, the color clear and bright. See study by Hugh Stokes (1904)

GPU see SECRET POLICE

Graaf, Reinier de (rīnēr' dŭ grāf'), 1641–73, Dutch physician He wrote a pioneer work (1664) on the nature and function of pancreatic juice He studied the generative organs and discovered and described (1672) follicles of the ovary known as Graafian follicles or Graafian vesicles.

Graaff Reinet (grāf' rī'nut), town (pop 13,467), Cape Prov , Union of South Africa, in the Karroo; founded 1786 Fruits and flowers are grown.

Grabau, Amadeus William (grä'bou), 1870–1946, American paleontologist, b Cedarburg, Wis , educated at Massachusetts Institute of Technology and at Harvard He was professor of paleontology at Columbia Univ and at the National Univ , Peiping, chief paleontologist, China Geological Survey from 1920, and, from 1925, dean of the Peiping Laboratory of Natural History Among his works are *Principles of Stratigraphy* (1913), *Textbook of Geology* (1920–21), *Evolution of the Earth* (1921), and *Stratigraphy of China* (1924–25) In 1901 he married Mary Antin

Grabbe, Christian Dietrich (krĭs'tyän dē'trĭkh grä'bu), 1801–36, German dramatist His plays in verse were frequently powerful, but uneven, bizarre, and often grotesque Among them are *Don Juan und Faust* (1829) and the historical dramas *Friedrich Barbarossa* (1829), *Heinrich VI* (1830), and *Napoleon* (1831)

Graça Aranha, José Pereira da (zhōōzā' pĕrā'ru du grä'sä ara'nyu), 1868–1931, Brazilian writer He was a diplomat and occupied public posts He wrote a number of fine critical essays and a well-known play (*Malazarte*, 1911), but his fame rests chiefly upon his realistic novels and particularly on *Canaan* (1902, Eng tr , 1920), which presents a gloomy picture of Brazilian culture

Gracchi (grä'kī), two Roman statesmen and social reformers, brothers, sons of Tiberius Sempronius Gracchus, general in Spain, censor (169), and twice consul (177, 163 B C), and of CORNELIA, daughter of SCIPIO AFRICANUS MAJOR The brothers were brought up with great care by their mother

Tiberius Sempronius Gracchus (tĭbēr'ēŭs sĕmprō'-nēŭs), d 133 B C , the elder of the Gracchi, fought at Carthage (146 B C) and in Spain (137 B C), where he made a treaty with Numantia to save his troops from certain annihilation Alarmed at the state of Italy and the provinces, where the middle class and the yeoman peasantry were being completely eliminated by concentration of wealth and lands in the hands of a few, Tiberius stood for the tribunate of the people for 133 B C as an avowed reformer On his election he immediately proposed and succeeded in passing the Sempronian Law (*Lex Sempronia Agraria*), a modification of the Licinian Rogations (see AGRARIAN LAWS), to redistribute the public lands which the rich had taken over Tiberius' colleague, Octavius, vetoed the law, and Tiberius, by holding at once an unconstitutional referendum, deposed Octavius Later in the year Attalus, king of Pergamum, died and bequeathed his property to Rome, and Tiberius proposed to use the bequest to provide capital for the paupers who were to settle the lands allotted under the Sempronian Law It was now election time and Tiberius renominated himself, the senate declared this illegal and had the election postponed In a great riot on the following day Tiberius was murdered The first three commissioners to administer the allotment were Tiberius, his father-in-law, Appius Claudius, and his brother,

Caius Sempronius Gracchus (kā'ŭs), d 121 B C After Tiberius' murder Caius was (126 B C) quaestor to Sardinia But driven, it is said, by a dream of his brother, he returned to Rome to run for tribune for 123 B C The situation was as bad as when Tiberius had come into power the allotment had fallen into desuetude, and the optimates were all-powerful; as a result the people elected Caius, who was already publicly committed to avenging his brother and to completing his work On his election Caius initiated a series of remarkable social reforms, including a law providing a maximum price for grain, the possible difference between the actual price and the maximum to be made up out of the public treasury The cardinal purpose of this *Lex Frumentaria* was to benefit the small landholders by reappropriating the proceeds of the tax on allotted lands The senate, which had formerly used this money for the aggrandizement of the optimate, was now required to use it for the good of the poor

Caius now won over the Roman men of wealth (the equites or knights) by granting them control over the judgeships which had heretofore belonged to the senate. This *Lex Judiciaria* seems to have worked far better than the older system. He also gratified the knights by farming out the taxes of Asia to the highest bidder Caius was reelected to office for 122 B C and proceeded with his great schemes, always increasing checks on the consuls and the senate, but the optimates gained over M. Livius Drusus, another tribune, who proceeded to outbid Caius for popularity Caius was defeated for reelection for 121 B C Soon after his term was over repeal of his measures was proposed, and in the ensuing riots Caius was killed Within 10 years the reaction had annulled every Gracchan reform, and the social and political war began again, this time to culminate in the fatal and bloody struggle of Marius and Sulla See A H Beesley, *The Gracchi, Marius, and Sulla*, (1895), C W C Oman, *Seven Roman Statesmen* (1934)

Grace, William Russell, 1832–1904, American capitalist, b Queenstown, Ireland He was in business in England and Peru before establishing (1865) W R Grace & Company in New York city After Peru's defeat at the hands of Chile, Grace was among those who underwrote the Peruvian national debt, in return for extensive business concessions These concessions were held by the Peruvian Confederation, Ltd , with a board largely of British bondholders, but controlled by Grace The Grace firm established, after 1895, branches in many Latin American countries and took over steamship operations begun in 1891 In 1880 Grace became the first Roman Catholic mayor of New York city and headed two reform administrations in opposition to Tammany

grace, in Christian theology, the free favor of God towards men which is necessary for their salvation A distinction is made between natural graces (e g , the gift of life) and supernatural graces, by which God makes man (born sinful because of ORIGINAL SIN) capable of enjoying eternal life In general, the term *grace* is restricted to supernatural grace, usually considered as the keystone of the whole Christian theological system Supernatural grace is usually defined as being actual or sanctifying Actual grace turns the soul to God, sanctifying grace confirms and perpetuates the ends of this conversion and makes the soul habitually good Most theologies, except in CALVINISM, wishing to maintain man's freedom in addition to God's complete freedom in granting grace, distinguish prevenient grace, which makes man's will free, from cooperating grace, by which God assists to salvation the free man who seeks it When God seems to confer on a man such grace that his conversion appears inevitable, the grace is said to be efficacious The apparent difficulty of holding that grace may be efficacious while man is free was explained by St THOMAS AQUINAS on the ground that it was a peculiar nature of this grace granted to some men that it should be irresistable, it was of this doctrine that MOLINA and the Molinists fell afoul Differing in effect from efficacious grace is merely sufficient grace, which, while sufficient to conversion, may be rejected by man at will Calvinism rejects merely sufficient grace, holding instead that grace is irresistible In every Christian theology God is considered to grant grace quite freely since its gift is far greater than man can merit As to what men are offered His grace, there is great difference The generality hold that it is offered to men who place no obstacle in the way of salvation rather than to those who neglect what ways to grace they have been given, the JANSENISTS, however, believed that grace was not given outside the Church, and the Calvinists hold that it is offered only to those predestined to election Sanctifying grace may be said to succeed justification as actual grace precedes it The operation of sanctifying grace brings holiness to the individual soul The indwelling of God in the soul and the soul's actual participation in God's nature (in an undefinable manner) are the perfections of sanctifying grace As to the means of grace there is a serious cleavage in Christianity, notably in regard to sacramental grace According to Catholics and Orthodox, the grace accompanying a SACRAMENT is *ex opere operato*, i e , by God's ordinance the sacrament actually confers grace, the good disposition of the minister being unimportant and that of the recipient being not always a condition, Protestants hold that the sacraments are *ex opere operantis*, i e , the disposition of minister and recipient is all-important, and that the sacrament is the sign, not the means, of grace Certain Christian systems have developed quite different ideas of grace (e g , the Society of FRIENDS, who deny original sin) The great emphasis on grace is a distinction of Christianity In recent years Christian liberals and modernists have largely lost interest in the theological aspect of grace

Graces, three Greek goddesses, daughters of ZEUS and EURYNOME The Graces were Aglaia (ăglā'ŭ), Thalia (thălī'ŭ), and Euphrosyne (ūfrŏs'ĭnē). They were personifications of beauty and charm, often associated with the Muses, Dionysus, Eros, and Aphrodite The Greeks called the Graces Charites (see CHARIS), and the Romans called them Gratiae (grā'shē)

Graceville. **1** City (pop. 1,181) NW Fla , NW of Tallahassee near the Ala line, in a farm and limestone area It has trade in peanuts, watermelons, and lumber. **2** Village (pop 1,020), W Minn , N of Ortonville, in a farm and dairy region

Gracián, Baltasar (bältəsär' grəthyän'), 1601–58, Spanish Jesuit philosopher and writer. He was a scholar and a satirist who frequently expressed himself in epigrams *El héroe* (1637), *El político* (1640), and his book on Gongorism, *Agudeza y arte de ingenio* (1648, expanded from an edition of 1642), were followed by his masterpiece, *El criticón*, published in three parts (1651–57) It has been called the Spanish *Pilgrim's Progress* His *Oráculo manual y arte de prudencia* (1647, Eng tr , *The Art of Worldly Wisdom*) was admired and translated by Schopenhauer Gracián was confined to a monastery after writing *El criticón* See biography by Aubrey F G Bell (1921)

Gracias a Dios (grä'syəs ä dyōs'), cape, Nicaragua, at the border of Honduras, on the Caribbean Sea at the mouth of the Segovia river Columbus discovered it on his fourth voyage

Graciosa (grəsyō'sə) island, W of Portugal, in the N Atlantic, one of the central AZORES The chief town is Santa Cruz

grackle, name applied to some members of the family of New World orioles, blackbirds, meadow larks, bobolinks, and cowbirds The plumage of the purple or common grackle of the Atlantic coastal region is black with metallic hues, iridescent in the sunlight It feeds on grain and harmful insects, but it is a cannibalistic nest robber Grackles invade cities and roost in huge flocks in shade trees Inland and W to the Rocky Mts the bronzed grackle replaces the purple grackle, in the South are found the Florida and boat-tailed grackles, in Texas and Mexico the great-tailed grackles or jackdaws

gradation see ABLAUT

Gradisca (grädē'skä), small town, Friuli–Venezia Giulia, NE Italy, on the Isonzo river and near the Yugoslav border With Gorizia (Gorz) it formed until 1919 the crownland of Gorz-Gradisca in the Austrian province of Küstenland

Gradle, Henry, 1855–1911, American bacteriologist, b near Frankfurt-am-Main, M D Northwestern Univ , 1874 After studying under Robert Koch and others he taught at Northwestern, he specialized in diseases of the eye, ear, nose, and throat His *Bacteria and the Germ Theory of Disease* (1883) was a pioneer American work in its field

Grado, Italy see AQUILEIA

Grady, Henry Woodfin, 1850–89, American journalist and orator, b Athens, Ga , grad Univ of Georgia, 1868 In 1879 a gift from Cyrus W Field enabled him to buy into the Atlanta *Constitution* He gained fame with his editorials and addresses reconciling North and South and particularly with his stirring speech "The New South," delivered in New York in 1886 See R B Nixon, *Henry W Grady, Spokesman of the New South* (1943)

Graecia Magna see MAGNA GRAECIA

Graefe or **Gräfe, Albrecht von** (both əl'brĕkht fŭn grā'fə), 1828-70, German ophthalmologist He is known for his contributions to surgery of the eye, especially the introduction of iridotomy in the treatment of glaucoma and iritis and of a new technique in operations for cataract He established (1850) an eye clinic in Berlin, taught at the Univ of Berlin from 1853, and founded (1855) *Archiv für Ophthalmologie*, a leading journal in this field, in which he published many of his discoveries His father, **Karl Ferdinand von Graefe** (kärl' fĕr'dēnänt), 1787–1840, a German surgeon born in Warsaw, was a pioneer in plastic surgery and in the treatment of wounds

Graetz, Heinrich see GRÄTZ, HEINRICH

Graevius, Johann Georg (yō'hän gā'ôrk grā'vē ŭs), 1632–1703, German antiquary, whose German name was Grave or Greffe He was historiographer to William III of England He is remembered for his vast catalogues of Roman and Italian antiquities, which were long used

Graf or **Graff, Urs** (ōors), c 1485–c 1527 Swiss wood engraver, etcher, painter, and goldsmith, studied at Basel He was influenced by the work of Dürer and Hans Baldung He executed over 100 woodcuts, 200 drawings, and numerous etchings Among the woodcuts are 25 called *The Passion of Our Savior*, printed in 1506

Gräfe, Albrecht von see GRAEFE, ALBRECHT VON

graffito (graf-fē'tō), method of ornamenting architectural plaster surfaces The designs are produced by scratching a top coat of plaster to reveal an under coat of contrasting and deeper color The incised decoration upon the plaster finish of Egyptian walls is a comparable technique Graffito is a development in Italian decorative art of the 15th and 16th cent , being then used to treat the entire façades of buildings as great formal mural decorations Around windows and doors were architectural borders depicting pilasters, colonnettes, and caryatids, while remaining surfaces were covered with medallions, garlands, and arabesque bands Fine examples remain, especially at Florence, while the medium has occasionally been revived in modern buildings Over a ground coat of plaster is laid a colored coat, generally umber or black Upon this a finish coat, usually white or cream-colored, is applied to form a thin but firm textured surface which will not crack Full-size charcoal cartoons in which the designs have been pricked are laid against this surface and the patterns transferred by means of pouncing with a bag of charcoal The scraping and scratching of the top surface is then done with metal instruments, the work being planned in small portions which can be executed before the plaster has dried and set Graffito decoration is applied to pottery by coating an unfired piece with a contrasting color of clay and scratching a design through it to show the color underneath The slip ware of the Pennsylvania Germans is a good example of graffito work It is also called sgraffito

Grafly, Charles (grăf'lĭ), 1862–1929, American sculptor and teacher, b Philadelphia, studied at the Pennsylvania Academy of the Fine Arts and in Paris His portrait busts are well known, and his statues and groups combine symbolism of idea with realistic treatment Especially noted are *Symbol of Life*, a small bronze, *Fountain of Man* (for the Pan-American Exposition, Buffalo, 1901), *England* and *France* (customhouse, New York), *Pioneer Mother Monument* (San Francisco), and the General Meade Memorial (Washington, D C)

graft, surgical, portion of tissue used by the plastic surgeon to replace a defect The tissue, e g , skin, bone, periosteum, or cartilage, replaces corresponding structures to repair scars, e g , from burns or war wounds Skin may be grafted from other portions of the body of the patient or from some other individual The part is usually transferred with the original blood supply attached to it, those original vessels being severed after the grafted tissue has become established

grafting, horticultural practice of uniting parts of two plants so that they grow as one The scion or scion, the part grafted on the rooted part or stock, may be a single bud, as in BUDDING, or a twig cutting with several buds The stock may be a mature plant, such as an apple tree, or it may be a root The most important reason for grafting is propagation (especially of seedless plants or those that do not grow true from seed), it is also used for dwarfing, for increasing the productivity of fruit trees, for making a plant more adaptable to soil or climate, and in tree surgery Grafting has been known since Roman times at least and is extensively practiced by nurserymen and other horticulturists Only closely related plants can usually be successfully grafted, and the process is, as a rule begun while the scion is dormant and the stock just beginning growth There are many forms of grafting See L H Bailey, *Nursery Manual* (1920), M G Kains and L M McQuesten, *Propagation of Plants* (rev ed , 1942)

Grafton, Richard, d c 1572 London printer In 1539 with Edward Whitchurch he printed the Great Bible in black letter He printed the first edition of the Book of Common Prayer, also in black letter Grafton was printer to King Edward VI, and he earned a minor place among English chroniclers

Grafton **1** City (pop 1,110), SW Ill , at the confluence of the Illinois and the Mississippi, inc 1853 Pere Marquette State Park is near by **2** Rural town (pop 7,457) S central Mass , SE of Worcester, settled 1718 on the site of an Indian village, inc 1735 Textiles are produced In 1935 it was chosen as a typical New England village for the filming of Eugene O'Neill's *Ah! Wilderness* **3** City (pop 4,070), co seat of Walsh co , NE N Dak , on the Park river and NNW of Grand Forks, in the Red River valley wheat region, inc 1883 It is an important shipping point for grain and livestock A state school for the feeble-minded is here **4** Rail city (pop 7,431), co seat of Taylor co , N W Va , on the Tygart river and near Fairmont, in a mining area, settled 1852 Glass products are made here It is the seat of a national cemetery Near by is Tygart Reservoir Dam **5** Village (pop 1,150), E Wis , on the Milwaukee river and N of Milwaukee, inc 1896

Graham, Catherine Sawbridge Macaulay. see MACAULAY, CATHERINE SAWBRIDGE

Graham, Frank Porter, 1886–, American university president and U S Senator (1949–), b Fayetteville, N C , grad Univ of North Carolina, 1909, M A Columbia, 1915 After 1915 he taught history at the Univ of North Carolina and later (1930) became president of the university Liberal in his views, Graham held numerous U S government positions and served (1948) as U S. representative to the United Nations committee for arranging a truce in Indonesia He was appointed (March, 1949) to fill an unexpired term in the U S Senate

Graham, Hugh: see ATHOLSTAN, HUGH GRAHAM, 1ST BARON.

Graham, James: see MONTROSE, JAMES GRAHAM, 5TH EARL AND 1ST MARQUESS OF

Graham, Martha, American dancer and teacher of the dance, b Pittsburgh She attended the Denishawn School, Los Angeles, and made her debut in

Ted Shawn's *Xochitl* (1920). She remained with the Denishawn company from 1919 to 1923, but left to dance in musical revues and to make her independent debut (1926) She first appeared with her own group of dancers in 1929 Some of the dances which have established her as a leading figure in modern dance are *Frontier*, *American Provincials*, *Every Soul Is a Circus*, *Letter to the World*, and *Appalachian Spring* See *Martha Graham* (ed by Merle Armitage, 1937), Barbara Morgan, *Martha Graham* (1941)

Graham, Robert, later **Robert Cunninghame-Graham**, d 1797?, Scottish lyric poet He is noted particularly as the author of the lyric, "If Doughty Deeds My Lady Please " While he was in Parliament (1794–96), he proposed a bill of rights, which was rejected but which in some ways foreshadowed the Reform Bill of 1832 Upon succeeding to the Finlaystoun estates in 1796, he added to his name the surname Cunninghame

Graham, Robert Bontine Cunninghame- see CUNNINGHAME GRAHAM, ROBERT BONTINE

Graham, Sylvester, 1794–1851, American reformer and Presbyterian minister, b West Suffield, Conn He advocated a vegetable diet as a cure for intemperance and the use of coarsely ground wholewheat flour Graham flour was named for him Other tenets of his—such as fresh air while sleeping, light, loose clothing, vegetables and fruits in the diet—have gained acceptance He wrote *Treatise on Bread and Bread-making* (1837) and *Lectures on the Science of Human Life* (1839)

Graham, Thomas, 1805–69, Scottish chemist, best known for his research in DIFFUSION in both gases and liquids which led to his formulation of GRAHAM'S LAW His discovery that certain substances (e g , glue, gelatin, starch) pass through a membrane more slowly than others (inorganic salts, e g , common salt or sodium chloride) led him to draw a distinction between the two groups, calling the former (the slower) colloids and the latter crystalloids In this connection he discovered DIALYSIS His work was the earliest in colloidal chemistry His investigation of phosphoric acid led to the present chemical concept of polybasic acids

Graham, William Alexander, 1804-75, American statesman, b Lincoln co , N C , grad Univ of North Carolina, 1824 A lawyer, he served several terms in the state legislature and three years (1840–43) in the U S Senate As governor of North Carolina (1845 49), he was especially interested in the development of the state's railroads He was Secretary of the Navy (1850–52) in President Fillmore's cabinet and the unsuccessful candidate for Vice President on the Whig ticket with Gen Winfield Scott in 1852 Graham was a leader of the element in North Carolina which advocated compromise rather than secession, but ultimately he supported the Confederacy Elected to the Confederate senate in 1864, he urged peace and a resumption of responsibility to the Union

Graham. 1 Textile-mill town (pop 4 339), co seat of Alamance co , central N C , E of Greensboro, est 1849 **2** City (pop 5,175), co seat of Young co , N Texas, S of Wichita Falls, founded 1872 Ranching, oil, and farming support the industries of Graham, which packs meat and makes saddles, has oil refineries and a carbon-black plant, mills flour and feedstuffs, and extracts cottonseed oil Near by is Possum Kingdom Lake, a reservoir in the Brazos river conservation project

Graham Coast see GRAHAM LAND

Grahame, Kenneth, 1859-1931, English author A secretary of the Bank of England from 1898 to 1908, he wrote *The Golden Age* (1895) and *Dream Days* (1898), scenes of his childhood in England, and *The Wind in the Willows* (1908), all children's classics The last was dramatized by A A Milne as *Toad of Toad Hall* (1929) Grahame's warm and charming books have retained their popularity He compiled the *Cambridge Book of Poetry for Young People* (1916) See biography by Patrick Chalmers (1935), Elspeth Grahame, *First Whisper of "The Wind in the Willows"* (1945)

Grahame-White, Claude, 1879–, English aviator, aeronautical engineer, and author An automobile engineer, in 1909 he took up aviation and started the first British flying school at Pau He was the first Englishman to be given a certificate of proficiency as an aviator His writings include *The Aeroplane, Past, Present, and Future* (1911), *Learning to Fly* (1914), and *Flying an Eptome and a Forecast* (1930)

Graham Island, off the coast of British Columbia, northernmost and largest of the QUEEN CHARLOTTE ISLANDS

Graham Land or **Graham Coast**, name given by the British to Palmer Peninsula in ANTARCTICA The British do not recognize the discovery by Nathaniel Brown Palmer and claim the area by virtue of John Biscoe's discovery of Enderby Land Officially Graham Coast (once thought to be islands) is attached to the Falkland Islands

Graham of Claverhouse, see DUNDEE, JOHN GRAHAM OF CLAVERHOUSE, 1ST VISCOUNT

Graham's law [for Thomas Graham] states that the rate of DIFFUSION of a gas is inversely proportional to the square root of its density.

Grahamstown, town (pop 22,913), S Cape Prov , Union of South Africa, founded 1812 It exports wool, dairy products, and fruit. It is the seat of Rhodes University College

Grail, Holy, a feature of medieval legend and literature. It appears variously as a chalice, a cup, or a dish and sometimes as a stone or a caldron into which a bleeding lance drips blood It was identified by Christians as the chalice of the Last Supper brought to England by St Joseph of Arimathea Miraculous in its powers, it could provide food and healing However, it would be revealed only to a pure knight, and the Grail Quest appears in different stories In ARTHURIAN LEGEND the purest knight is variously PARSIFAL or Galahad The Grail is one of the most difficult problems of Arthurian legend, introducing as it does features of Christian story, Celtic myth, and ancient fertility cults See R S Loomis, *Celtic Myth and Arthurian Romance* (1927) and *Arthurian Tradition & Chrétien de Troyes* (1949)

grain, collective name given to the cereal grasses, to certain other plants, such as buckwheat, which are grown for the same purpose, and to their edible seeds The seeds, whole or ground into meal or flour, supply the principal food of the human race and of some domestic animals All grains are termed corn, but this name generally is restricted specifically to the chief grain of a region—in England to wheat, in Scotland, to oats, in America, to Indian corn The principal grain crops of the world are wheat, Indian corn, oats, barley, rye, and rice All the staple grains were domesticated in the Neolithic period The growing of grains was a potent influence in causing men to live in permanent communities, where what was sown might be harvested and stored Many religious beliefs and rites are associated with grains The cereals derive their name from Ceres, the Roman goddess of grain The cultivation of their corn by the American Indians was accompanied by elaborate rites Grain has been an article of commerce in various civilizations See publications of the U S Dept of Agriculture

grain alcohol see ETHYL ALCOHOL

Grain Coast, W Africa, on the Atlantic Ocean It is nearly identical with the coast of Liberia It is named for the early export of "grains of Paradise," i e , the seed of the melegueta pepper

Grainger, Percy Aldridge (grān'jur), 1882–, Australian-American pianist and composer, studied with Busoni He was a friend and disciple of Grieg, whose music he has often played He came to the United States in 1914, having already established a wide reputation as pianist and composer His interest in folk music is exemplified in his many settings of folk tunes as songs, orchestral pieces, and piano pieces

graining, process of painting by which natural wood grain is imitated It was common practice in the late 19th cent to "grain" cheap, soft woods to give them the appearance of rare, expensive ones A light general tone with the brush was followed by darker streaks applied with a comb and wiped with a rag This art is rarely practiced today except in matching old work The term is also applied to mechanical methods for producing an artificial texture of any kind, as in bookbinding

Gram, Hans Christian Joachim (grām, Dan hāns krĭs'tĭ an yō'ăkĭm gram'), 1853 1938, Danish physician He was professor (1891 1923) at the Univ of Copenhagen He developed (c 1883) a differential staining method (Gram method) useful in identifying and classifying bacteria The organisms are immersed successively in a solution of gentian violet or certain other dyes, then in an alkaline solution of iodine used as a mordant, and finally in a decolorizer such as alcohol or acetone Bacteria that retain the dye are known as Gram positive, those that are decolorized are said to be Gram negative

gramicidin see ANTIBIOTIC SUBSTANCES

grammar, description of the structure of a language A grammar has two necessary subjects, the sounds and the meaningful combinations of sounds The sounds are studied in phonetics and phonemics, see PHONETICS The description of the meaningful forms is the morphology, a minimal meaningful unit is a morpheme, e g , *hat* or *-s* (in *hats*) Some morphemes have variations in their form, as *wife* (with *f*) vs *wives* (with *v*), such phenomena are the subject of morphophonemics English morphology is mainly concerned with INFLECTION and derivation (see ETYMOLOGY) In English, as in many other languages, a normal sort of free entity consists of one or several morphemes bound together, this is a word Such a word may be conveniently studied as a unit, and the study of the arrangement of words may be set apart and called syntax But many languages string morphemes together in long sequences so that defining a word is of no use, in such case there may be no place for a section called syntax, for the whole burden falls on the morphology The list of morphemes of a language, or lexicon, is often not put in a grammar but isolated in a DICTIONARY (or vocabulary) A grammar describing a language objectively is a descriptive grammar School grammars of one's own standard language are not descriptive, but prescriptive, i e , rule books like books of etiquette, hence the prevalence of such popular terms as *right*, *wrong*, *correct*, and *grammatical* instead of more exact terms such as *standard*, *substandard*, or *colloquial* Prescriptive grammars have popularized many unsound notions, e g , the primacy of WRITING in language, the superiority of archaic features, and the role of etymology in meaning The term *historical grammar* refers to a history of the structure of a language See Leonard Bloomfield, *Language* (1933), Charles C Fries, *American English Grammar* (1940)

Grammont (grämōN'), Flemish *Geraardsbergen* (khā'rärtsbĕr"khun), town (pop 11,115), East Flanders prov , Belgium, on the Dender river It is a textile center There is a 15th-century Gothic town hall

Gramont, Agénor, prince de Bidache, duc de Guiche et de (ażhānôr' prĕs' du bēdash' duk' dū gēsh ā du grämōN'), 1819–80, French diplomat In 1870 he became foreign minister in the cabinet of Émile Ollivier It was on his instructions that the French ambassador to Prussia, Benedetti, had the ill-fated interview with William I which led to the publication of the Ems DISPATCH and thus to the Franco-Prussian War He defended his actions in *La France et la Prusse avant la guerre* (1872)

Gramont, Philibert, comte de (fēlēbĕr' kōt'), 1621 1707, French courtier of Louis XIV's court He lived in England (1663–64) while in disgrace for having attempted to rival Louis in a love affair During his banishment he was prominent at Charles II's court, where he married Elizabeth Hamilton It was to her brother, Anthony HAMILTON, that the aged courtier gave the anecdotal material Hamilton used in writing Gramont's memoirs The memoirs, though they show Gramont a witty and insolent cad, are an invaluable source for the social history of his period The spelling Grammont, always used in the title of the memoirs, is an old error

Grampians, mountain system, cutting NE–SW across central Scotland and separating the Highlands from the Lowlands The highest peak is Ben Nevis (4 406 ft) Other heights are Macdhui, Cruachan, Cairngorm, and Cairntoul The mountains are the source of the headwaters of the Dee, Don, Spey, Findhorn Esk, Tay, and Forth RIVERS The scenery is wild and magnificent on the precipitous northern side, the south side has a more gentle slope, with extensive deer forests

Gran, Hungary see ESZTERGOM

Granada (grənä'dä, Span grāna'dha), city (1946 estimated pop 28,442), W Nicaragua, on Lake Nicaragua Founded in 1524 by Francisco FERNÁNDEZ DE CÓRDOBA, Granada, in a rich agricultural region and with ample Indian labor, has been the stronghold of Nicaragua's landed aristocracy With independence from Spain in 1821, it became the Conservative center, engaging in bloody rivalry with LEÓN, the city of the Liberals The struggle led to the founding (1855) of MANAGUA Granada was captured (1855) by the filibuster, William WALKER With rail connections to Managua, it controls the extensive commerce on Lake Nicaragua in sugar, coffee, hides, cotton, and indigo

Granada (grənä'dä, Span grāna'dha), city (pop 140 941), capital of Granada prov , S Spain, in Andalusia Picturesquely situated in view of the Sierra Nevada, it is a tourist center, attractive because of its long history One of the great monuments of Moorish civilization, it was originally a Moorish fortress and became (1238) the seat of the kingdom of Granada last refuge of the MOORS whom the Christian reconquest had driven south The kingdom occupied the present provinces of Almería and Málaga and parts of Jaén and Cádiz The concentration of Moorish civilization in Granada gave the city great splendor and made it a center of commerce, industry, art, and science It was, however, racked by continuous feuds among the noble families, notably the Zegrís and the Abencerrages The state in dissolution was conquered in the reign of BOABDIL by Ferdinand V and Isabella I With the surrender (Jan , 1492) of Granada itself, the Moors lost their last hold in Spain, and the kingdom was united with Castile Granada became an archiepiscopal see and, in the 16th cent , the seat of a university In the 20th cent several new industries (sugar refineries ironworks, food-processing plants) developed here The best-known part of Granada is the ALHAMBRA, the ancient Moorish citadel and royal palace, which dominates the city from a hill On the same hill is the imposing palace of Emperor Charles V The Palacio del Generalife, summer residence of the Moorish kings, has celebrated gardens Among the Christian constructions are the 16th-century cathedral, in late Gothic and PLATERESQUE style, the adjoining royal chapel, containing the tombs of Ferdinand and Isabella, and a Carthusian monastery (16th cent) See Washington Irving, *The Conquest of Granada* and *The Alhambra*, both classic works

Granados y Campiña, Enrique (ānrē'kā grənä'dōs ē kämpē'nya), 1867–1916, Spanish composer Like his countryman Albéniz, his most significant works are those for the piano *Goyescas* (1912–14), a set

of piano pieces which later formed the basis for an opera of the same name, is his outstanding work The opera, the most popular of his four, was produced in New York in 1916 Granados was present, and while making the return voyage was drowned when the English channel steamer *Sussex* was torpedoed by a German submarine See Gilbert Chase, *The Music of Spain* (1941)

Granbury, city (pop 1,166), co. seat of Hood co., N Texas, on the Brazos and SW of Fort Worth, in a farm area, settled c 1860, inc 1873

Granby (grăn'bĭ, grăm'bĭ), city (pop 14,197), S Que., on the North Yamaska and E of Montreal In a dairying, apple-growing, and fur-farming area, it has textile mills and manufactures furniture and rubber products

Granby (grăn'bĭ, grăm'bĭ). **1** Rural town (pop 1,544), N Conn., at the Mass line, settled c 1664, inc 1786 It includes part of the McLean Game Refuge **2** Rural town (pop 1,085), W Mass., NE of Holyoke, settled 1727, inc 1768 **3** City (pop 1,455), SW Mo., SE of Joplin, settled in the 1850s It is in a farm area of the Ozarks which also has zinc and lead mines

Gran Chaco see CHACO.

Gran Chimu. see CHANCHAN

Grand, Sarah, 1862–1943, English novelist and feminist, b Ireland Her real name was Frances Elisabeth Clarke M'Fall She was six times mayor of Bath (1923–24, 1925–30) and is remembered for *The Heavenly Twins,* a best seller of 1893

Grand Alliance, War of the, 1688–97, war between France and a coalition of European powers, known as the League of AUGSBURG (and, after 1689, as the Grand Alliance) Louis XIV of France took advantage of the absence of Emperor Leopold I on a campaign against the Turks and of the promised support of James II of England to invade the empire and devastate (1689) the Palatinate The revolution in England overthrew James, and William, prince of Orange, became William III of England (1688–89). In an attempt to keep William from leading troops to the Continent, Louis supported a counterrevolution in Ireland but was frustrated at the battle of the Boyne (1690) The naval war, of which the first major battle was the French victory at Beachy Head (1690), was practically ended by the English victory of La Hogue (1692) On land, however, Louis and Vauban took Namur (1692), Marshal LUXEMBOURG was victorious at Fleurus (1690) over the Dutch and at Steenkerke (1692) and Neerwinden (1693) over William III, and the duke of Savoy was defeated at Marsaglia by CATINAT (1693) while another French army entered Catalonia The exhaustion of the belligerents and the defection of Savoy from the Grand Alliance (1696) finally led to the Treaty of RYSWICK This war was known on the American continent as King William's War (see FRENCH AND INDIAN WARS).

Grand Army of the Republic, organization established by Civil War veterans of the Union army and navy. Dr. Benjamin F Stephenson, former surgeon of the 14th Illinois Infantry, was the principal figure in founding the G A R The first post was formed (April 6, 1866) at Decatur, Ill., and at the first national encampment, held at Indianapolis, Ind., on Nov 20, 1866, 10 states and the District of Columbia were represented Gen Stephen A Hurlbut, the first commander in chief, was succeeded by Gen John A Logan, who was followed in office by Gen Ambrose E Burnside They were the most prominent military men to head the G.A.R. Membership increased rapidly in the 1880s so that by 1890, when the G A R reached its peak, over 400,000 members were reported The members sought to strengthen the bonds of comradeship, to preserve the memory of their fallen comrades (they secured the general adoption of MEMORIAL DAY to achieve this purpose), to give aid to soldiers' widows and orphans and to handicapped veterans, and, most of all, to fight for pension increases and other benefits Though the organization was nonpolitical, G A R members were overwhelmingly Republican, and they formed a reliable bloc of that party's strength in the years up to 1900. Soldier preference in Federal appointments became the rule, and pension legislation was usually enacted by the Republicans with their support in mind The *National Tribune,* a paper founded (1877) by George E. Lemon, powerful pensions attorney of Washington, D C, kept G A R members posted on pension matters The organization scored a great victory in 1879 with the passage of the Arrears of Pension Act, which led many more veterans to apply for pensions Only those who suffered disabilities in service were theoretically entitled to pensions, but it became the practice for lenient Congressmen to introduce private pension bills These were almost always granted until Grover Cleveland, the first President to examine the bills critically, found many of them to be fraudulent and forthwith vetoed hundreds of them The fact that Cleveland was a Democrat further confirmed G.A.R. members in their staunch Republicanism. Auxiliary societies associated with the G.A.R were the Sons of Veterans (1881), the Women's Relief Corps (1883), and the Ladies of the Grand Army of the Republic (1886). The United Confederate Veterans was organized in 1889, but this organization never had a membership (less than 50,000 at its peak) approaching that of the G A R With the coming of the 20th cent. the G.A.R declined rapidly in numbers and influence. The 83d and last encampment was also held at Indianapolis, on Aug 28–31, 1949, with six of the 16 surviving members in attendance See R B Beath, *History of the Grand Army of the Republic* (1889); J. W Oliver, *History of Civil War Military Pensions, 1861–1885* (1917)

Grand Bahama. see BAHAMA ISLANDS

Grand Bank, town (1945 pop 2,331), S N F, on the southeast shore of Fortune Bay and SW of St John's It is an important base for the Grand Bank fisheries

Grand Banks, submarine plateau, off SE Newfoundland, c 50 mi E of Cape Race, extending northeast-southwest some 300 mi and being c 200 mi wide Many of the shallower ridges bear names of their own The depth is usually between 20 and 100 fathoms The Gulf Stream sweeps along the eastern edge of the Banks, sometimes crossing the southern part, but the greater part of the Banks are in the Labrador Current The mingling of the two streams helps to account for the abundant marine life existing there The Grand Banks are probably the most important cod-fishing region in the world and are frequented annually by some 100,000 fishermen, chiefly from Canada, the United States, Great Britain, and France The meeting of the cold and warm streams causes a persistent fog The fishing is hazardous because it is in the path of icebergs carried down by the Labrador Current and near the path of transatlantic steamers Government patrol ships have lessened the dangers

Grand Blanc (grănd' blăngk'), residential city (pop 1,012), S Mich., on the Thread river and SE of Flint, settled 1823, inc 1930

Grand Canal, Chinese *Yün-ho* [transit river], longest canal of China, c 850 mi long, extending from Hangchow to Tientsin The oldest portion, connecting the Yellow and Yangtse rivers, was completed under emperor Yang Ti (reigned A D 605–17) The remainder, including an extension to Peiping which is now filled in, was constructed during the Yüan dynasty (1206–1368) The water level in the canal is maintained by stone gates, which divert the water Outlets to several large lakes, including Hungtse and Tai, prevent flooding The Grand Canal is the only extensive north-south waterway of the China Plain, but widespread silting has reduced its former economic importance

Grand Canary: see CANARY ISLANDS

Grand Canyon, gorge, roughly a mile deep, 4 to 18 mi wide, and 217 mi long, of the Colorado river, NW ARIZ The canyon shows in the strata exposed by erosion the story of long geological change—uplift, erosion, submergence in the sea, deposition of materials on the sea floor, then the same sequence repeated, most of the stages with records of particular plant and animal life—from the Archeozoic era to the present The varicolored strata, the steep and embayed rims, and the isolated towers, "temples," mesas, and other eroded rock forms in the chasm catch the light of sun and shadow and glow with changing hues of intense, air-filling beauty The first white man to see the canyon was García López de CÁRDENAS in 1540 J W POWELL took a party through the canyon in a boat in 1869 In 1919 the Federal government expanded a national monument established in 1908 to become Grand Canyon National Park (now 645,295.91 acres), which contains 105 mi of the canyon, in 1932 an adjacent area was made the Grand Canyon National Monument (now 196,051 acres) See works of J W Powell, publications of the National Park Service, C E Dutton, "Report," in U S Geological Survey, *Second Annual Report* (1882)

Grand Coulee Dam (kōō'lē), NE central Wash., in the Columbia river and WNW of Spokane Construction was begun in 1933, and the dam went into operation in 1941 as a unit in a project to harness the Columbia river for power, irrigation, and flood control The dam, one of the largest in the world (4,300 ft long and 550 ft high), backs up huge Roosevelt Lake (151 mi long), which is being developed for recreational use The city of **Grand Coulee** (pop 3,659, inc 1935) was established by the Federal government as the construction and operation base for the dam

Grand Detour, unincorporated village, N Ill., SW of Rockford and on the Rock River It was founded in 1835 by Leonard ANDRUS, with John DEERE associated in building (1837) the first Grand Detour steel plow The Grand Detour factory later moved to DIXON In 1937 a centennial celebration of the building of the steel plow was held

Grande Prairie (grād prā'rē'), town (pop 2,267), W Alta., 250 mi. NW of Edmonton. It is the chief business center for the Peace river valley farming area. There are an airport, a dominion land office, and the district courts and offices. The Northern Winter Carnival is held here annually.

Grand Falls. 1 Town (pop 1,806), W N.B., on the St. John river. The falls in the river here and its mile-long gorge attract many visitors. There is a large hydroelectric development **2** TOWN (1945 pop 4,508), central N.F., on the Exploits river and NW of St. John's. There are large paper mills here

Grand Falls, spectacular waterfalls of the upper Hamilton river, S Labrador The river here narrows to 200 ft., negotiates a series of rapids over a distance of 4 mi, then falls 245 ft., leaping the inland plateau into McLean Canyon, from which sheer cliffs rise several hundred feet on either side The river then flows 12 mi. through the canyon over a further series of rapids The total fall from the rapids above the main falls to the end of McLean Canyon is 1,038 ft The falls were discovered by a trader of the Hudson's Bay Company named McLean and were rediscovered, having been generally forgotten, in 1891

Grandfield, town (pop 1,116), SW Okla., near the Texas boundary; inc 1909

Grand Forks, city (pop 1,259), S British Columbia, at the confluence of the Granby and Kettle rivers near the Wash border and NNW of Spokane. It has a great smelter and is the center of a fruit-growing area

Grand Forks, city (pop. 20,228), co. seat of Grand Forks co., E N Dak., at the confluence of the Red and Red Lake rivers N of Fargo, settled 1871, organized as a village 1879, inc 1881 with the coming of the railroad It was early a trading post and became an important distributing and industrial center In a great spring-wheat region, it has grain elevators and flour mills, built and operated by the state, creameries, and meat-packing plants The Univ of North Dakota (see NORTH DAKOTA, UNIVERSITY OF) is here The state fair and the all-American turkey show are annual events

Grandgent, Charles Hall (grăn'jĕnt), 1862–1939, American philologist, b Dorchester, Mass., grad Harvard, 1883 After study abroad, he taught Romance languages at Harvard (1886–89, 1896–1932) A distinguished student of the Italian language and Italian literature (especially Dante), he wrote several standard works

Grand Haven, city (pop 8,799), co. seat of Ottawa co., S Mich., on Lake Michigan at the mouth of the Grand and NW of Grand Rapids, inc 1867 It is a resort and commercial fishing center, and its lake port ships quantities of grapes and celery Printing presses, tools, and plumbing fixtures are among its manufactures A U S coast guard station is here Grand Haven State Park is near by

Grand Island. 1 City (pop 19,130), co. seat of Hall co., S Nebr., on the Platte and W of Lincoln, settled 1857 by Germans, laid out 1866 by the Union Pacific, inc 1871 A railroad, manufacturing, and shipping center for a livestock, agricultural, and dairy area, it has railroad repair shops and produces beet sugar and dairy foods It is known as a horse, mule, and cattle market The city has a Roman Catholic cathedral and a fine airport Near by are a state park and the U S Central Monitoring Station, radio-broadcasting checking point **2** Town (pop 1,055), W N Y, comprising a group of islands in the Niagara river NW of Buffalo It was once (c 1827–c 1840) the center of W New York's orchard industry

Grand Island, N Mich., in Lake Superior N of Munising One of Michigan's largest islands (c 13,000 acres) and heavily wooded, it is a resort area and has a game refuge

Grand Isle, town (pop 1,574), NE Maine, on the St John between Fort Kent and Van Buren, inc 1869

Grand Junction. 1 City (pop 12,479), co. seat of Mesa co., W Colo., at the junction of the Gunnison river with the Colorado near the Utah line, founded 1881, inc 1882 It is the shipping and processing center for a large livestock and irrigated farm area A junior college is here The city is headquarters for Grand Mesa National Forest, and Colorado National Monument is near by **2** Town (pop 1,125), central Iowa, W of Boone, inc 1873

Grand Lake. 1 Lake, c 2 mi long and c 1 mi wide, N central Colo., at the west border of Rocky Mountain National Park A resort center, it is the scene of an annual yachting regatta. The lake is included in the COLORADO–BIG THOMPSON PROJECT **2** See GRAND RIVER DAM, Okla

Grand Ledge, city (pop 3,899), S Mich., on the Grand and near Lansing, settled c 1848, inc as a village 1871, as a city 1893 There are soft-coal deposits here, and sandstone found near the river is used for tile and clay products Near by is Grand Ledge Park, and east of the city is the Seventh-Day Adventist Campground

Grand Manan (munăn'), island (pop 2,457), c 16 mi long and c 7 mi wide, S N B, in the Bay of Fundy near the entrance to Passamaquoddy Bay and 15 mi SE of Eastport, Maine. On the north and west sides are bold cliffs, rising 200 ft. to 400 ft high, visible from the Maine coast. The principal villages and harbors, North Head, Grand Harbor, and Seal Cove, are on the south and east sides The chief occupation is fishing, and the island is a summer resort It was settled after the Revolutionary War by Loyalists; its possession was disputed by the United States until 1817.

Grand'Mère (grā'mĕr'), city (pop 8,608), S Que., on the St. Maurice and NNW of Trois Rivières.

The Grand'Mère falls furnish power for paper and pulp mills.

Grand Panjandrum (păn"jăn'drŭm), mocking term applied to a self-important person It derives from a bit of nonsense written by the 18th-century wit Samuel Foote to test the ability of the actor Charles Macklin at learning a senseless passage after Macklin had boasted of his memory The passage contained the words "and the Grand Panjandrum himself, with the little round button at top"

Grand Portage (pōr'tĭj), nine-mile carrying place, famous in the history of the American fur trade, in the extreme northeast corner of present Minnesota It led from Lake Superior northward to a widening of the Pigeon river A halting place for *voyageurs* and an important depot for fur trade, it seems to have already been in use when Vérendrye used it in 1731 Its chief importance occurred after the French regime when the North West Company maintained its headquarters here until the establishment of FORT WILLIAM

Grand Prairie, city (1940 pop 1,595,†1947 estimated pop 7,000), N Texas, WSW of, and near, Dallas This industrial suburb has a large aircraft plant

Grand Pré (grăn' prā', Fr grā prā') [Fr ,=large field], village (1948 estimated pop 250), N N S , on the shores of Minas Basin, an arm of the Bay of Fundy It is famous as an early settlement of the Acadians and as the home of the heroine of Longfellow's *Evangeline* The old village, founded c 1675, stood near the present one, the site is marked by a group of old willows, a well, and several cellar holes Horton Landing at the mouth of the Gaspereau river near by was the embarkation point of the refugees The fertile diked meadow flats from which the village takes its name yield excellent hay There is an Evangeline statue by L P Hébert See J F Herbin, *Grand Pré* (1898), G P Bible, *The Acadians* (1906)

Grand Rapids. **1** City (pop 164,292), co seat of Kent co , S Mich , on the Grand and NW of Lansing, inc as a village 1838, as a city 1850 Several Indian villages and a trading post were once here Logs floated down the river and converted into lumber were the origin of the furniture which Grand Rapids now produces in great quantity The city is a distributing and industrial center for an area yielding fruit, farm produce, gypsum, and gravel Among the city's manufactures are railroad equipment, phonographs, gases, automobile parts, metal products, and paints and varnishes It has an art gallery, a furniture museum, and a symphony orchestra and is the seat of Calvin College (Christian Reformed, coeducational, 1876) and Aquinas College (Catholic, coeducational) **2** Village (pop 4,875), co seat of Itasca co , N central Minn , on the Mississippi and NW of Duluth, in a region of woods, lakes, and streams, settled 1877, inc 1891 It has paper mills The North Central Experiment Station of the state university is here, as well as the North Central School of Agriculture

Grand River **1** River in Labrador see HAMILTON, river **2** River, 165 mi long, S Ont , flowing into Lake Erie at Port Maitland It passes a number of important towns and villages and is navigable for 70 mi from its mouth **3** Former name of the OTTAWA river, E Ont and W Que

Grand River. **1** See COLORADO, river **2** River rising in SW Iowa, near Creston, and flowing c 215 mi SE through NW Missouri to the Missouri river just after passing Brunswick **3** River, c 260 mi long, rising in S Michigan and flowing N to Lansing, then NW and W past Grand Rapids to Lake Michigan at Grand Haven It is navigable to Grand Rapids **4** River rising in SW North Dakota and flowing c 209 mi ESE through South Dakota to the Missouri near Mobridge On it is the Bureau of Reclamation's Shadehill Dam (begun 1948), an item of the Missouri river basin project **5** River in Oklahoma see NEOSHO, river, and GRAND RIVER DAM

Grand River Dam, NE Okla , in the Grand River (local name of the NEOSHO) and SE of Vinita Built for power and for flood control, it was completed, with Federal aid, in 1941 It has a 6,565-foot multiple-arch construction It is also known as Pensacola Dam Grand Lake, created by the dam, is a recreational center

Grand Saline (sūlĭn', să'lĭn), city (pop 1,641), E Texas, E of Dallas, in the northeast corner of the state It has one of the largest U S salt mines, and at Van, near by, oil was discovered in 1929

Grandson (grăsō), Ger *Grandsee* town (pop 1,726), Vaud canton, Switzerland, on the Lake of Neuchâtel Here the Swiss Confederates defeated CHARLES THE BOLD of Burgundy in 1476. The name also appears as Granson.

Grand Teton National Park (grănd" tē'tŏn', tē'tŏn), 94,892 92 acres, NW Wyo , S of Yellowstone National Park and E of Idaho; est. 1929 The park is 27 mi. long and from 3 to 9 mi wide and is bounded on the north and the east by Jackson Hole National Monument and Jackson Lake. It embraces the most scenic portion of the Teton Range. Among its array of towering peaks are Grand Teton (13,747 ft.), highest of the range, Middle Teton (12,700 ft.), South Teton (12,500 ft), Mt. Owen (13,400 ft), and Mt Moran (12,100 ft) The first three are the TROIS TETONS [three breasts], so called by French Canadian fur traders Teton glacier is the larger of the two glaciers on Grand Teton Of the numerous small lakes in the park, Jenny Lake is the largest A further gift of land, not included in the area given above, was made to the government by John D Rockefeller, Jr , in 1949.

Grand Tower, city (pop 1,043), S Ill , on the Mississippi and NNW of Cairo, inc 1872 The 60-foot rock (about an acre in area) for which the city is named is in the river here

Grandview, city (pop 1,449), S Wash , SE of Yakima, in a farm area; founded 1905, inc 1919.

Grandview Heights, village (pop. 6,960), central Ohio, near Columbus

Grandville · see GÉRARD, JEAN IGNACE ISIDORE.

Grandville, city (pop 1,566), S Mich , on the Grand and SW of Grand Rapids, in a farm area, inc as a village 1887, as a city 1933 Hardware is made

Granet, François Marius (fräswa' märyüs' grănā'), 1775–1849, French painter, student of David He is famous for his paintings of church interiors — among them his numerous versions of the *Choir of the Capuchin Monastery* and his *Interior of the Basilica of St Francis of Assisi* (all Louvre)—and for his *Franciscan Friars in Choir* (Metropolitan Mus) He bequeathed much of his best work and also his fine collection of paintings to the museum of his native AIX

Grangemouth (grānj'mŭth, -mouth), burgh (1931 pop 11,799, 1948 estimated pop 15,498), Stirlingshire, Scotland, on the Forth estuary at the terminus of the Forth and Clyde Canal and NE of Falkirk It has extensive docks and shipyards, other industries are oil refining and soapmaking Here some of the earliest experiments in steam navigation were made In 1802 the *Charlotte Dundas* was launched at Grangemouth

Granger, Francis (grān'jûr), 1792–1868, American political leader, b Suffield, Conn , grad Yale, 1811, son of Gideon Granger He practiced law in Canandaigua, N Y , and served (1826–28, 1830–32) in the New York state legislature He was associated with Thurlow Weed as a prominent leader of the ANTI-MASONIC PARTY and was twice (1830, 1832) defeated as its nominee He was elected as a Whig to Congress in 1834 Appointed Postmaster General by William Henry Harrison, Granger resigned (1841) with other cabinet members at Harrison's death After another term (1841–43) in Congress, he did not run for office again Instead, he became a leader of the conservative Whigs who opposed their party's drift toward radical anti-slavery views He broke (1845) with Weed over the annexation of Texas, favored the Compromise of 1850, and with a small minority known as the Silver Grays withdrew (1850) from the Whig convention at Syracuse when resolutions were adopted endorsing William H Seward's opposition to the compromise measures

Granger, Gideon, 1767–1822, American political leader, b Suffield, Conn , grad Yale, 1787, father of Francis Granger A lawyer in Suffield, Granger was elected to the legislature in 1792 He became an Anti-Federalist, and, as leader of the Connecticut Democratic Republicans, he actively supported Jefferson in the 1800 presidential campaign The next year Jefferson appointed him Postmaster General Leaving this position in 1814, Granger settled a few years later at Canandaigua, N Y , where he became an ardent supporter of De Witt Clinton and the Erie Canal project

Granger, James, 1723–76, English clergyman, print collector, and biographer His *Biographical History of England from Egbert the Great to the Revolution* (2 vols , 1769) was increased to six volumes by other hands and published with blank pages for the insertion of extra illustrations So many books were robbed of steel engravings to put into the *History* that such mutilation came to be known as *grangerizing*

Granger, city (pop 1,723), central Texas, NNE of Austin, in a rich blackland farming area.

Granger movement, American agrarian movement taking its name from the National Grange of the Patrons of Husbandry, an organization founded in 1867 by Oliver H KELLEY and six associates Its local units were called granges and its members grangers It grew slowly until after the Panic of 1873, when it expanded rapidly, reaching its membership peak in 1875 Though established originally for social and educational purposes, the local granges became political forums and increased in numbers as channels of farmer protest against economic abuses of the day They sought to correct these abuses partly through cooperative enterprise They were in part successful with stores, elevators, and mills, but ran into financial trouble in attempting to manufacture farm machinery Through political activity the grangers captured several state legislatures in the Middle West and secured the passage in Illinois, Wisconsin, Minnesota, and Iowa of the so-called Granger laws, setting or authorizing maximum rates for railroads and establishing state railroad commissions to administer the new legislation There was also legislation covering warehouses and elevators Railroads and other parties challenged the constitutionality of these laws in the so-called Granger Cases The U S Supreme Court in 1876 by the decision in MUNN VS ILLINOIS established as constitutional the principle of public regulation of private utilities devoted to public use The Granger movement thus revealed the farmer as a political power and forced the older parties to give more attention to his demands Inadequacy of state regulation led to demands for national legislation After 1876 the GREENBACK PARTY, the Farmers' Alliance, and, finally, the Populist party expressed much of the agrarian protest, and the granges relapsed into being social organizations They continued to exist in the East, especially in New England, where they had been least active politically See S J Buck, *The Granger Movement* (1913)

Granges (grăzh'), Ger *Grenchen* (grăn'khŭn), town (pop 10,939), Solothurn canton, Switzerland It has a large watch industry

Grangesberg, Sweden see KOPPARBERG

Grangeville, city (pop 1,929), co. seat of Idaho co , N central Idaho, in a wheat-growing section of the Camas Prairie, settled 1876, inc 1897 During the 1898 gold rush it was an important outfitting point It is a center of the old Nez Perce country around the sources of the Clearwater and is the headquarters of Nez Perce National Forest

Granicus (grunī'kŭs), ancient name of a small river of Mysia, Asia Minor, flowing NNE to the Propontis It is now the Turkish Kocabas Here Alexander the Great in 334 B C won his first great victory over the Persians Here too in 73 B C the Romans under Lucullus defeated Mithridates VI of Pontus

Granite, city (pop, 1,058), SW Okla , near the North Fork of the Red River and the Wichita Mts , in a granite-quarrying district, settled and inc 1900 A state reformatory is here

granite, a rock of coarse granular structure, composed typically of quartz, alkali feldspar, and mica The quartz and feldspar are always present, tourmaline, hornblende, or certain other minerals are sometimes present It is believed that granite was formed by the cooling of molten rock under pressure and that it underlies all stratified rocks Some granites are the oldest of known rocks, but granites continued to be formed through successive geologic periods Sometimes granite is the surface rock of level country, but much more commonly it has been brought to the surface by disturbances of the earth's crust Though the feldspar in it sometimes decomposes, granite is typically a very hard rock and takes a high polish It is usually red or gray A red variety is the stone of the ancient Egyptian obelisks, gray was used for Roman columns, and granites of many kinds are now used for buildings and monuments

Granite City, industrial city (pop 22,974), SW Ill , on the Mississippi above St Louis, inc. 1896 A rail center, it developed with the establishment of its steel mills and foundries in 1892–93 Its manufactures include metal products, railroad and automotive parts, and kitchen utensils.

Granite Falls. **1** City (pop 2,388), co seat of Yellow Medicine co , W Minn , at falls of the Minnesota, platted 1872, inc as a village 1879, as a city 1889 It is a farm trade center Andrew J Volstead lived here **2** Town (pop 1,873), W N C , NNW of Charlotte It has varied industries

Granite Peak, 12,850 ft high, S Mont , in the Absaroka Range NE of Yellowstone National Park, highest peak in Montana

Graniteville, unincorporated cotton-milling town (pop c 2 500), W S C , near Aiken It was founded in 1846 as the state's first mill town by William GREGG

Granja, La see SAN ILDEFONSO

Granjon, Robert (grăn'jun, Fr rôbĕr' grăzhô'), fl 1545–88, French designer of type and printer He began his work in Paris and afterward worked in Lyons, Antwerp, and Rome The types that he designed and made included roman, italic, Greek, Hebrew, and Syriac He is known especially for his *caractères de civilité*, based on a beautiful French handwriting and intended to take the place in France that italic type then held in Italy The greater legibility of italic has contributed to the disuse of *caractères de civilité* Printers who used types designed and made by Granjon included Christophe Plantin, of Antwerp.

Gran Paradiso (grän" päradē'zō), mountain, 13,320 ft high, NW Italy, S of Aosta, highest Alpine peak entirely in Italian territory It was made a national park in 1922

Gran Quivira National Monument: see NATIONAL PARKS AND MONUMENTS (table)

Gran Sasso d'Italia (grän sä's'sō dētä'lyä), mountain group, Abruzzi, S central Italy, between Aquila and Teramo, highest of the Apennines The highest peak is Monte Corno or Corno Grande (9,557 ft) Campo Imperatore, a mountaineering and skiing resort, may be reached by cable car. Mussolini was confined here after his fall and was rescued by German parachute troops on Sept. 12, 1943

Granson, Switzerland see GRANDSON.

Grant, Asahel, 1807–44, American physician and missionary to the Nestorians around Urmia, W

Persia He was born in Marshall, N Y Grant's book on the Nestorians, published in 1841, contains valuable descriptions of the people at that time

Grant, Duncan James Corrowr, 1885–, British painter and designer, b Scotland His works, which show the influence of the French modernists, include *Lemon Gatherers*, *The Tightrope Walker*, and *Hammock* He has designed stage settings

Grant, Sir Francis, 1803–78, Scottish portrait painter He was self-taught in painting, for which he abandoned the law He began as a painter of hunting scenes (*The Melton Hunt* and *The Cottesmore Hunt*), but rose to success as a fashionable portrait painter Among his sitters were Scott, Macaulay, Disraeli, Palmerston, and Landseer Sir Francis was president of the Royal Academy, 1866–78

Grant, George Monro, 1835–1902, Canadian minister, educator, and author, b Nova Scotia, educated at the Univ of Glasgow Ordained (1860) in the Presbyterian ministry, he was pastor (1863–77) of a church in Halifax, N S From 1877 to 1902 he was principal of Queen's Univ., Kingston, under him the university made great gains in size and prestige, and Grant became a notable figure in the educational world of his day He wrote articles for many periodicals in Canada, the United States, and England and several books, best known of which is *Ocean to Ocean* (1873, rev ed , 1925), an account of the expedition of 1872 of Sir Sandford Fleming, chief engineer of the Canadian Pacific Railway Grant served as secretary of the expedition, his book aroused much interest in the Canadian West See biography by W L Grant and Frederick Hamilton (1904)

Grant, Robert, 1852–1940, American jurist and novelist, b Boston, grad Harvard, 1873 A prominent Boston judge, he was one of three men appointed to advise Governor Fuller on the SACCO-VANZETTI CASE The best known of Grant's many novels was *Unleavened Bread* (1900) See his autobiography, *Fourscore* (1934)

Grant, Ulysses Simpson, 1822–85, commander in chief of the Union army in the Civil War, 18th President of the United States, originally named Hiram Ulysses Grant, b Point Pleasant, near New Richmond, Ohio He spent his youth in Georgetown, Ohio, was graduated from West Point in 1843, served creditably in the Mexican War, and resigned from the army in 1854 Grant was a dismal failure in civil life He was a clerk in his father's leather store in Galena, Ill , when the Civil War broke out He was commissioned colonel of the 21st Illinois Volunteers in June, 1861, and in August became a brigadier general of volunteers Grant assumed command of the Dist of Cairo, Ill , in September and fought his first battle, an indecisive affair, at Belmont, Mo , on Nov 9, 1861 In Feb , 1862, aided by Union gunboats, he captured Fort Henry on the Tennessee river and Fort Donelson (see DONELSON, FORT) on the Cumberland This was the first major Union victory, and Lincoln at once made him a major general of volunteers However, in April at Shiloh (see SHILOH, BATTLE OF), the arrival of the army of Gen D C BUELL probably saved him from defeat The VICKSBURG CAMPAIGN (1862–63) was one of Grant's greatest successes After repeated failures to get at the city, he made a brilliant advance in cooperation with a fleet and finally took Vicksburg by siege The victory of Braxton Bragg, the Confederate general at Chickamauga (see CHATTANOOGA CAMPAIGN), led to Grant's accession to the supreme command in the West, Oct , 1863 At Chattanooga in November his forces thoroughly defeated Bragg The President, in March, 1864, made him commander in chief with rank of lieutenant general, a grade especially revived by Congress for him Grant himself directed G G Meade's Army of the Potomac against Lee in the WILDERNESS CAMPAIGN His policy of wearing Lee out by sheer attrition was effective, though it resulted in the horrible slaughter of Spotsylvania and Cold Harbor Failing to carry PETERSBURG by assault in June, 1864, Grant had that city under partial siege till April, 1865 P H Sheridan's victory at FIVE FORKS made Petersburg and Richmond no longer tenable Lee retreated, but was cut off at APPOMATTOX COURTHOUSE, where he surrendered, receiving generous terms from Grant, April 9, 1865 Criticized as a butcher (unjustly, say some military historians), Grant went about the distasteful business of war realistically and grimly His campaigns, executed with a skill which increased with experience, were successful largely because he had a clear perception of the elemental military doctrine that the destruction of the enemy's main armies was the principal objective in warfare He also was notably wise in supporting good commanders, W T SHERMAN, P H SHERIDAN, and G H THOMAS Made a full general in 1866, he was the first U S citizen after Washington to hold that rank Grant at first seemed to favor the RECONSTRUCTION policy of President Andrew JOHNSON In April, 1867, Johnson appointed him Secretary of War ad interim, replacing E M. Stanton Johnson expected him to hold the office against Stanton and thus bring about a court test of the constitutionality of the TENURE OF OFFICE ACT, but Grant turned the office back to Stanton when the Senate refused to sanction his removal It was apparent then that the general had thrown in his lot with the radical Republicans The inevitable choice of the Republicans for President, Grant was victorious over the Democratic candidate, Horatio Seymour, in 1868. Characterized chiefly by bitter partisan politics and shameless corruption, his administrations were a national disgrace. He was possibly the most ill-fitted man for the office the nation ever had as chief executive The punitive Reconstruction program of the radicals was pushed with new vigor, and monetary legislation favorable to the commercial and industrial interests was passed (see GREENBACK) The President associated with disreputable politicians and financiers, James Fisk and Jay Gould deceived him when they tried to corner the gold market in 1869 (see BLACK FRIDAY) In foreign affairs, however, much was accomplished by the able Secretary of State, Hamilton FISH The party unanimously renominated Grant in 1872, and he was reelected easily over Horace Greeley, the candidate of the LIBERAL REPUBLICAN PARTY and the Democrats. Toward the end of his second term his Secretary of War, William W Belknap, and his private secretary, Orville E Babcock, were implicated in graft scandals Through the loyalty of the honest but deceived Grant, both escaped punishment The two years following his retirement from the White House were spent in making a triumphal tour of the globe In 1880 the Republican "Old Guard," led by Roscoe Conkling, tried to secure another nomination for Grant but failed He took up his residence in New York city, where he invested his money in a fraudulent private banking business which collapsed in 1884, leaving Grant bankrupt Fatally ill from cancer of the throat, he set about writing his *Personal Memoirs* (2 vols , 1885–86) in order to provide for his family He died a few days after the manuscript was completed As solid and unpolished as Grant himself, these memoirs rank among the great military narratives of history The remains of the general and his wife lie in Grant's Tomb (completed 1897), in New York city See biographies by Hamlin Garland (1920) and R R McCormick (1934), A L Conger, *The Rise of U S Grant* (1929), J F C Fuller, *The Generalship of U S Grant* (1929), W B Hesseltine, *Ulysses S Grant, Politician* (1935), Horace Green, *General Grant's Last Stand* (1936), Allan Nevins, *Hamilton Fish the Inner History of the Grant Administration* (1936), A H Burne, *Lee, Grant, and Sherman* (1939), Lloyd Lewis, *Captain Sam Grant* (1950)

Granta, river, England see CAM

Grant City, city (pop 1,209), co seat of Worth co , NW Mo , near the Iowa boundary, in a farm area, settled 1864

Grantham (grăn'tum, grăn'thum), municipal borough (1931 pop 19,711, 1943 estimated pop 20,000), in the Parts of Kesteven, Lincolnshire, England, SSW of Lincoln, on the Witham and on the ancient Ermine Street It is the site of St Wulfram's Church, mainly 13th cent , with its 280-foot steeple, of Angel Inn, where in 1483 Richard III condemned the duke of Buckingham to death, of a bronze statue (on St Peter's Hill) of Sir Isaac Newton, who attended King's School in Grantham, and of George Hotel, described in Dickens's *Nicholas Nickleby* An Eleanor Cross was erected in Grantham (see ELEANOR OF CASTILE) Here, in 1643, Oliver Cromwell won his first victory over the royalists There are two libraries of old books

Grants Pass, city (pop 6,028), co seat of Josephine co , SW Oregon, W of Medford and on the Rogue river, inc 1887 It is the commercial center of a large irrigated district producing fruits and dairy products, lumbering and mining are also carried on The city is headquarters for Siskiyou National Forest

Grantsville, 1 City (pop 1,242), N central Utah, S of Great Salt Lake and NW of Tooele, settled 1850 by Mormons, inc 1867 The region is given over to grain, turkey raising, and grazing 2 Town (pop 1,052), co seat of Calhoun co , W central W Va , on the Little Kanawha river and SE of Parkersburg, in a livestock and dairy area, laid out 1866

Grantville, town (pop 1,267), W Ga , SW of Atlanta

Granvelle, Antoine Perrenot de (ătwan' pĕrunō' dŭ grăvĕl'), 1517–86, statesman in the service of Emperor Charles V and Philip II of Spain, cardinal of the Roman Church He was born at Besançon (then an imperial city), the son of Nicolas Perrenot de Granvelle (c 1485–1550), an imperial councilor to whose post he succeeded The younger Granvelle negotiated the marriage of the Infante Philip (later Philip II) to Queen Mary I of England After Philip's accession (1556) he became chief adviser to MARGARET OF PARMA, regent of the Netherlands His introduction of Spanish troops and of the Spanish Inquisition into the Netherlands infuriated all Dutch and Flemish patriots, Protestants and Catholics alike. William the Silent and Egmont and Hoorn headed the opposition. In 1564 Granvelle was advised by Philip II to retire to Besançon Granvelle subsequently served Philip as viceroy of Naples and adviser on Italian affairs. A part of his magnificent library is still preserved at his house in Besançon

Granville, Granville George Leveson-Gower, 2d **Earl,** 1815–91, British statesman He entered Parliament as a Whig in 1836 and served as foreign minister under Lord John Russell (1851–2) and under Gladstone (1870–74, 1880–85) As colonial secretary (1868–70) he had a large part in passing the bills which disestablished the Church of Ireland and began reforms in Irish land tenure.

Granville, John Carteret, 1st **Earl,** 1690–1763, British statesman While ambassador to Sweden (1719–21), he performed notable service as mediator in bringing about the treaties which ended the NORTHERN WAR After service as a secretary of state (1721–24) in Robert Walpole's cabinet, a period marked by constant jealousy between the two, he was lord lieutenant of Ireland (1724–30) He took the advice of his friend, Jonathan SWIFT, on Irish questions and was able to quiet the disturbances in that country For the next 12 years he was a leader of the opposition which in 1742 accomplished Walpole's downfall He became chief figure in the new cabinet, but was soon unpopular because he supported the king's Hanoverian policies and aided Maria Theresa in the War of the Austrian Succession President of the privy council (1751–63), he successfully opposed William Pitt's determination to declare war on Spain in 1761 See biography by W B Pemberton (1936), Basil Williams, *Carteret and Newcastle* (1943)

Granville, town (pop 26,949), New South Wales, Australia, W of Sydney, in the metropolitan area A manufacturing center, it has iron foundries, furniture factories, and flour mills

Granville (grăvēl'), town (pop 9,037), Manche dept , NW France, in Normandy This old fishing port on the English Channel was damaged in the Second World War

Granville (grăn'vĭl) **1** Village (pop 1,038), N Ill , SW of La Salle, in a coal and farm area, inc 1861 **2** Village (pop 3,173), E N Y , near the Vt line, settled 1780, inc 1885 It has slate quarries Roofing materials are made here **3** Village (pop 1,502), central Ohio, NE of Columbus, in a diversified farming area, settled 1805, inc 1832 It is the seat of Denison Univ (Baptist; coeducational, 1831)

Granville-Barker, Harley Granville, 1877–1946, English dramatist, actor, and producer As actor and producer for the STAGE Society in London, he introduced many of G B Shaw's plays He adapted the work of several continental writers—Schnitzler, Brieux, Martínez Sierra, and Serafín and Joaquín Álvarez Quintero Among his own plays, dealing usually with social problems, are *The Marrying of Ann Leete* (1901), *The Voysey Inheritance* (1905), *Waste* (1907), and *Madras House* (1910) His later works, chiefly on acting and stage technique, include *Prefaces to Shakespeare* (4 series, 1927–45) and *On Dramatic Method* (1931)

grape, name for vines of the genus *Vitis*, extensively cultivated throughout the Northern Hemisphere, and also for their fruits *Vitis vinifera*, which probably originated in the Mediterranean region and W Asia, is the grape (often called "the vine") of agriculture known from ancient times and frequently mentioned in the Bible At present it is cultivated in the Old World and in California but attempts to cultivate it in E North America have failed because of unfavorable climate and its susceptibility to disease Varieties of this species are used for making most WINE and for the RAISIN Grapes cultivated in North America E of the Rockies are all derived from native American species or are hybrids of American grapes and *Vitis vinifera* These include the muscadine varieties (scuppernong, James, Eden, and others) of the Gulf and Southeastern states and the labrusca varieties (among them the Concord, Catawba, and Delaware grapes) of the East and North There are numerous hybrids of all groups In art and literature the grape has been a symbol of revelry and joy See T V Munson, *Foundations of American Grape Culture* (1909), U P Hedrick, *Manual of American Grape-Growing* (1919), *Grape Propagation, Pruning, and Training* and *Grape Districts and Varieties in the United States* (U S Dept of Agriculture, Farmers' Buls 471 and 1689)

grapefruit or **pomelo** (pō'mulō), citrus fruit (*Citrus paradisi*), related to the orange and the lemon. Grapefruit is so named because it grows in bunches The large, globular edible fruits weigh 4 or 5 lb Although its origin may have been in SE Asia, the grapefruit as known today is probably the result of a seedling sport which appeared in the West Indies and which, in 1809, was introduced into Florida Since c 1900 it has been an important commercial product Florida, Texas, and California lead in its production in the United States The fruit has been much improved through selection of superior varieties, and now most trees are propagated by budding The grapefruit like all citrus fruits is valued for its vitamin content and alkaline reaction. The shaddock or pummelo is a closely related species (*C maxima*), popular in India and other parts of Asia and considered by some to be the progenitor of the grapefruit

grape hyacinth, any plant of the genus *Muscari*, early-spring-blooming low bulbous plants of the

Old World, with narrow leaves and small nodding flowers in a dense spikelike cluster The blue-flowered kinds are most common The grape hyacinth is popular for colonizing effects, does not require lifting, and easily becomes naturalized It may be increased by seeds or offsets

grape ivy: see IVY

Grapeland, town (pop 1,327), E Texas, SSE of Palestine, inc 1924 In an oil area, the town has refineries and recycling plants It also has sawmills and canning plants

grape sugar, see GLUCOSE

Grapevine, city (pop 1,043), N Texas, NE of, and near, Fort Worth, in a blackland farming area, settled 1854, inc 1907

graph, geometrical figure which shows relationships between quantities Statistics makes extensive use of both bar graphs, in which the lengths of the various bars show the quantities to be compared, and line graphs In line graphs the relationship to be studied is treated as a function and is plotted as in a coordinate system, such a system consists of two straight lines intersecting at right angles and each line has a unit length or scale indicated on it The position of any point in the same coordinate system can be described by giving its distances (with plus and minus signs to indicate respectively the distances to the right and left or up and down) from these lines In mathematics interest is almost exclusively in line graphs and what these reveal about the functions they represent

graphite (grăf'īt), an allotropic form of CARBON, known also as plumbago and black lead It is dark gray or black, crystalline (often in the form of shippery scales), greasy, and soft, with a metallic luster It is a good conductor of electricity and does not fuse at very high temperatures or burn easily It occurs in nature in grayish-black masses, amorphous or crystalline and containing impurities, and is obtained in various parts of the world—in the United States (amorphous) in Nevada, Michigan, and Rhode Island and (crystalline) in Alabama and North Carolina, in Brazil, in the British Isles and on the Continent, and in Ceylon, Madagascar, and Siberia It is also prepared artificially by treating hard coal in the electric furnaces, a process discovered by E G Acheson The uses of graphite are wide and diverse The so-called "lead" of pencils is in reality a mixture of graphite with clay Crucibles required to withstand high temperatures and also electrodes are commonly made of graphite It is used also in stove polish, in some paints, and as a lubricant

Gras, Félix (fālĕks' grăs'), 1844–1901, French Provençal writer He wrote poetry and was the author of novels, including *Li Rouge dóu Miejour* (1896, Eng tr, *The Reds of the Midi*, 1896), outstanding in Provençal prose

Grasmere, village, Westmorland, England, near the lake named Grasmere and NW of Ambleside Dove Cottage was the home of Wordsworth from 1799 until 1808, it now contains a Wordsworth museum Wordsworth, his wife, his sister Dorothy, his children, and Hartley Coleridge are buried in the churchyard of St Oswald's De Quincey and Samuel Taylor Coleridge also lived in Grasmere The lake, about a mile long, has a single island

grass, any plant of the important and widely distributed family Gramineæ, comprising more than 3,500 species The grasses are characterized by hollow, jointed stems and bladelike leaves Their inconspicuous, wind-pollinated flowers are in spikes, and the cereal grains are typical of their seedlike fruits The grasses include the hay and pasture grasses, e g, timothy and bluegrass, the cereals, sugar cane, and bamboo Popularly the word *grass* is used chiefly for species grown for hay and pasture and those cultivated for ornament, e g, ribbon grass and pampas grass It is loosely used also for plants which are not true grasses but which resemble them, e g, clover and alfalfa, which, like some true grasses, are used for hay and pasture The cereal grasses, including, for example, barley, wheat, rye, and Indian corn, have held a dominant place in agriculture since its beginnings in the Neolithic period Men and domestic animals are largely dependent on them for food The use of grasses to make a LAWN on both private and public grounds makes them important ornamental plants See U S Dept of Agriculture, *Grass the Yearbook of Agriculture* (1948)

Grasse, François Joseph Paul, comte de (frāswa' zhōzĕf' pōl' kōt' du grăs'), 1723–88, French admiral. In 1781, in command of a French fleet sent to cooperate with the Continental forces in the American Revolution, he defeated a British naval force under Admiral Hood and captured Tobago Then he came N to Virginia at the request of Washington and Rochambeau There he used his fleet to blockade the York and James rivers, thus bottling up Cornwallis at Yorktown He outmaneuvered and defeated a British force under Admiral Graves, and men from his ships also took part in the land fight Thus his was the crucial part in the great victory of the YORKTOWN CAMPAIGN It is ironic that after the Revolution was won Admiral de Grasse was severely defeated (1782) by Admiral Rodney in the West Indies

Grasse (grăs), town (pop 13,731), Alpes-Maritimes dept., SE France. It is an old town beautifully situated in the hills above Cannes Though it was destroyed by Francis I in 1536 to prevent the advance of Emperor Charles V, it has preserved a splendid early Gothic cathedral Surrounded by fields of flowers and rose gardens, Grasse is a center of the French perfumery industry Fragonard was born here

grasshopper, name used to refer to insects of two families of the order Orthoptera Most of the common grasshoppers and the locusts comprise the family of short-horned grasshoppers in which the antennae are shorter than the body The family of long-horned grasshoppers includes the katydid, the meadow grasshopper, and the Mormon, the sand, and the cave or camel crickets In the short-horned grasshoppers the auditory organ is on the first abdominal segment In the long-horned species it is on the foreleg Most grasshoppers have a narrow, flexible but firm pair of fore wings or wing covers and a pair of membranous underwings, often brightly colored They have powerful jumping legs Their jaws are strong Many eat vegetation but some are partly carnivorous Sounds are made chiefly by the males, by rubbing a portion of the hind leg against the fore wing or by rubbing a fore and a hind wing together The metamorphosis is gradual At times, especially during dry spells, locusts migrate in vast swarms destroying all vegetation in their path Serious crop losses are suffered in the Middle Western United States and in parts of South America and the Old World Mass starvation has resulted in some countries The desert locust is believed to have caused such plagues in biblical times Spreading poisonous bran mixtures on fields is a method of control See bulletins of the U S Dept of Agriculture

Grassi, Giovanni Battista (jōvän'nē bat-tē'sta grăs'sē), 1854–1925, Italian zoologist He demonstrated (1898) that the *Anopheles* mosquito carries the plasmodium of malaria in its digestive tract He is known also for his research on parasites, on migrations and metamorphosis in eels, on the phylloxera disease of the vine, and on termites

Grassmann, Hermann Günther (hĕr'man gun'tur grus'man), 1809–77, German mathematician and Sanskrit scholar, educated in Berlin He invented a new algebra of vectors (somewhat similar to quaternions) called *Ausdehnunglehre* (1878) He composed a dictionary and a translation of the Rig-Veda (1875, 1876–77) The linguistic law reformulated by him holds that in Indo-European bases, especially in Sanskrit and Greek, successive syllables may not commence with aspirates

grass-of-Parnassus, any plant of the genus *Parnassia*, small hardy herbs—not grass—of the North Temperate Zone The flowers, yellow or white, are conspicuously veined and solitary It is sometimes cultivated in damp or shady spots

Grass Valley, city (pop 5,701), N central Calif, NE of Sacramento, settled 1849, inc 1861 It is in a rich gold-mining area in the Sacramento valley The home of Lola Montez, who lived here from 1852 to 1854, is preserved, as is the childhood home of Lotta Crabtree

Grasty, Charles Henry, 1863–1924, American newspaper publisher and editor, b Fincastle, Va, educated at the Univ of Missouri From 1892 to 1908 he was publisher and editor of the Baltimore *News*, and from 1910 to 1914 publisher and editor of the Baltimore *Sun*, which he enlarged and to which he added an evening edition One of the ablest First World War correspondents, he sent dispatches to the New York *Times* and to Western papers He wrote *Flashes from the Front* (1918)

Gratiae see GRACES

Gratian (grā'shun), 359–83, Roman emperor of the West (375–83) At the death of his father VALENTINIAN I, he accepted the army's election of VALENTINIAN II as his colleague and took Britain, Gaul, and Spain as his own share of the empire, acting as guardian for Valentinian in Italy, Illyricum, and Africa After the death of VALENS (378), he made THEODOSIUS I emperor of the East Gratian fought successfully against the barbarians He took St AMBROSE as an adviser and vigorously attacked paganism, ordering the removal of the altar of Victory from the senate house and the confiscation of the revenues of the vestal virgins and refusing the title Pontifex Maximus Toward the end of his reign he neglected public affairs for hunting In 383 he was assassinated by MAXIMUS

Gratian, fl 1140, Italian canonist, founder of the science of CANON LAW Almost nothing is known of his life beyond the fact that he was a monk, almost certainly Camaldolite, and that he taught at the convent of SS Felix and Nabor (San Felice) in Bologna He was apparently very learned in scholasticism and Roman law About 1140 (perhaps a little later) appeared his great work, commonly known as the *Decretum* He appears to have called it *Concordia discordantium canonum* It is a synthesis of church law, divided into three parts the first deals with sources and principles of canon law and with ecclesiastical persons, the second, with ecclesiastical jurisdiction and property and to some extent with marriage and penance, the third, with sacraments and liturgy Gratian by his method makes the compilation a systematic treatise, his commentaries, the *dicta Gratiani*, make up a large part of the work Though the *Decretum* was private in character, it was used by the later popes and became the kernel of the *Corpus juris canonici*

Gratiot, Charles (grā'shut), 1752–1817, American fur trader, b Lausanne, Switzerland He entered the fur trade in Montreal, in 1769, and by 1777 had established a post at Cahokia, Ill When that place was captured (1778) by George Rogers Clark, he moved to St Louis, where he was a leading trader Late in life he was associated with John Jacob Astor

Gratiot Charles, 1786?–1855, American army engineer, b St Louis, grad West Point, 1806, son of Charles Gratiot (1752–1817) He was chief engineer of the army and inspector at West Point until 1838, when he was dismissed from the army on charges of irregularity in disbursement of government funds

Grattan, Henry (grăt'tn), 1746–1820, Irish patriot statesman He entered the Irish Parliament (1775) and became known at once as a brilliant orator and an advocate of increased freedom for Ireland The Irish Parliament was then made up largely of members appointed by the great Anglo-Irish landholders and was only free to accept the measures of the British privy council, which was supreme After repeated efforts Grattan led a successful fight for the independence of the Irish Parliament from the English government (1782) through repeal of Poynings's Law The Parliament thus freed is called Grattan's Parliament (1782–89) He tried to eliminate corruption in Irish government and advocated Catholic Emancipation as the only means for making the Irish Parliament representative, in 1792 he gained Catholics the right to vote in Ireland, and in 1794–95 the government agreed to allow Catholics to sit in Parliament, but was overruled by George III It is generally agreed that this as much as any single factor encouraged the Rising of '98 (see FITZGERALD, LORD EDWARD, and TONE, WOLFE) Before this (1797) Grattan had retired in indignation at the government's policy In 1800, on the last day of the debate on the union with England, Grattan bought a seat in the Irish Parliament and made the greatest speech of his career, but was unable to prevent the Act of Union from being adopted He sat in the British Parliament from 1805, taking little part except to support Catholic Emancipation See memoirs of Henry Grattan, Jr (1839–46), biography by Roger McHugh (1938)

Gratz, Barnard (grăts), 1738–1801, American merchant, b Langendorf, Upper Silesia Having worked in his cousin's countinghouse in London, Gratz came to Philadelphia (1754), where he became a fur trader Within a few years he and his brother Michael Gratz (1740–1811) established a firm that acquired tracts of land in Ohio, Kentucky, Indiana, and Illinois for pioneer settlement and ran boats on the Ohio river The brothers signed the non-importation resolutions against the Stamp Act and gave invaluable aid to the patriot cause in the American Revolution when they ran supplies through the British blockade Later, Barnard helped to amend Pennsylvania's and Maryland's constitutions so that Jews could hold office Michael was the father of Rebecca Gratz See W V Byars, ed, *B and M Gratz* (1916)

Grätz or **Graetz, Heinrich** (both hīn'rĭkh grĕts'), 1817–91, German-Jewish historian, exegete, and champion of orthodox Judaism His greatest claim to fame rests upon his *Geschichte der Juden* (11 vols, 1853–75), of which there have been numerous English translations as *History of the Jews*

Gratz, Rebecca (grăts), 1781–1869, American philanthropist, b Philadelphia, daughter of Michael Gratz Well known for her philanthropies in Philadelphia, she is remembered chiefly as the probable prototype of Rebecca in Scott's *Ivanhoe*, her charm and beauty having been described to Scott by Washington Irving Her letters were edited by David Philipson (1929) See biography by R G Osterweis (1935)

Graubunden, see GRISONS

Graudenz see GRUDZIADZ

Graun, Karl Heinrich (karl hīn'rĭkh groun'), 1704–59, German composer, best known for his oratorio *Der Tod Jesu* (1755), for many years performed annually in Germany As musical director to Frederick the Great, who wrote the libretto of Graun's *Montezuma* (1755), he was also director of the opera at Berlin, where his own Italianate operas and those of Johann Hasse dominated the stage

Graupner, Gottlieb (Johann Christian Gottlieb Graupner) (gōt'lēp group'nur), 1767–1836, German-American musician, b near Hanover He played the oboe in a regimental band in Hanover but left in 1788 and went to England, where he is believed to have played in an orchestra conducted by Haydn in 1791–92 After a few years in England he came to America, settling shortly in Charleston, S C, there he played in the City Theatre Orchestra and in 1796 married an English actress and singer who had come to Charleston from the Bos-

ton stage. The Graupners settled in Boston in 1798 and were for nearly a quarter of a century leading figures in its musical life. Graupner was active as music publisher and dealer, teacher of piano and the orchestral instruments, player of the oboe and double bass, and a founder of the Handel and Haydn Society. He organized (c 1810) the Philharmonic Society, which gave concerts until 1824; its importance in the development of the cultural life of Boston is inestimable See H. E. Johnson, *Musical Interludes in Boston* (1943)

Grau San Martín, Ramón (rämōn' grou' sän märtēn'), 1887–, president of Cuba (Sept , 1933–Jan , 1934, 1944–48), b. Pinar del Río. Physician and teacher at the Univ of Havana, Grau San Martín opposed Gerardo Machado. He then joined with student radicals and the military junta that ousted Carlos Manuel de Céspedes and instituted sweeping social reforms Grau was in turn removed from office by a coup led by Fulgencio Batista. He lost to Batista in 1940, but defeated the latter's candidate in the free election of 1944 and as president launched a program of social and economic readjustment He was succeeded in 1948 by a member of his party, Carlos Prío Socarrás

grave, place of interment of a corpse. It is usually constructed or excavated to conform to the requirements of rites of BURIAL, but sometimes a location, such as an unoccupied cave, is selected for reasons of convenience. Frequently graves are marked, in order that the living may avoid or be reminded to propitiate the spirits of the dead or that the memory of the deceased may continue to be cherished Such emotional associations reinforced by awe and tradition often have created shrines of grave sites FUNERAL CUSTOMS may decree inclusion in the grave of the equipment of the living, e g , weapons, food, and vessels Because graves are far less often disturbed than are former habitation sites, they provide invaluable source material for the archaeologist See also CEMETERY.

gravel, water-worn particles of rock, i e , stones and pebbles, usually round in form and intermediate in size between sand grains and boulders Deposits of gravel are formed as a result of the WEATHERING of rocks and the erosive and concentrating action of rivers and tides Gravel is composed of various kinds of rock, quartz being the most common. Under certain conditions gravel sometimes becomes consolidated into conglomerate It is used extensively in road building and for making concrete For road building it should be of a durable nature and contain a certain percentage of clay to act as a binder When used as a coarse aggregate for CONCRETE, it must be clean and free from clay and all organic matter Commercially, it is classified according to the size of the particles

Gravelbourg, town (pop 1,079), S Sask , SW of Moose Jaw. The College of Gravelbourg (Catholic) here is affiliated with Ottawa Univ

Gravelines (grävlēn'), town (pop 1,788), Nord dept., N France, between Calais and Dunkirk Now a small Channel port, it was early fortified, with ramparts dating from the 16th and 17th cent Here in 1558 the Spanish defeated the French.

Gravelotte: see SAINT-PRIVAT

Gravenhage, 's, Netherlands see HAGUE, THE.

Gravenhurst (grā'vunhûrst), town (pop 2,122), S Ont , just N of Toronto Chiefly a health resort, with three large sanatoriums, it has dairying, boatbuilding, and mining

Graves, Alfred Percival, 1846–1931, Irish poet, b Dublin An inspector of schools, he was twice president of the Irish literary society and a collector of many volumes of Irish music and folk songs He wrote the popular ballad *Father O'Flynn*, collected with others in his *Irish Poems* (1908) See his autobiography, *To Return to All That* (1930) Robert R Graves is his son

Graves, Bibb, 1873–1942, governor of Alabama (1927–31, 1935–39), b Hope Hull, near Montgomery, Ala., grad Univ of Alabama, 1894, and Yale Law School, 1896 He was colonel of a field artillery regiment in the First World War. Under his two administrations as governor the convict-leasing system was abolished and advances were made in education

Graves, Frank Pierrepont, 1869–, American educator, b Brooklyn, N Y., grad Columbia (B A , 1890, Ph.D., 1912) He taught Greek and classical philology at Tufts (1891–96), was president of the Univ of Wyoming (1896–98) and of the Univ of Washington (1898–1908), and later served as professor of education and dean at the Univ of Missouri, Ohio State Univ , and the Univ of Pennsylvania From 1921 until his retirement in 1940 he was commissioner of education and president of the Univ of the State of New York. He is the author of several works on Greek and the history of education and of three volumes of addresses and papers.

Graves, Henry Solon, 1871–, American forester, b. Marietta, Ohio He was chief of the U S. Forest Service from 1910 to 1920 and dean of the school of forestry at Yale from 1922 to 1939 His chief work has been for forest conservation Among his writings are *Forest Mensuration* (1906) and *Principles of Handling Woodlands* (1911).

Graves, Robert Ranke, 1895–, English poet and novelist; son of Alfred Perceval Graves He has written poetry—e g., *Collected Poems* (1938) and *Poems, 1938–1945* (1946)—and literary criticism, including *Survey of Modernist Poetry* (with Laura Riding, 1928), but he is best known for his historical novels. These include *I, Claudius* (1934) and its sequel, *Claudius the God* (1934), *Sergeant Lamb's America* (American title, 1940), and *Proceed, Sergeant Lamb* (1941). *The White Goddess* (1948), a work on poetic myth, was followed by a related novel, *Watch the North Wind Rise* (1949) Graves also wrote *Lawrence and the Arabian Adventure* (American title, 1928) See his *Good-bye to All That* (1929) and *But It Still Goes On* (1930), which are autobiographical

Graves, Thomas Graves, Baron, 1725?–1802, British admiral He served in the navy in the War of the Spanish Succession and the Seven Years War. In July, 1781, he was made commander in chief in North American waters In Sept , 1781, his fleet unexpectedly met the superior French fleet under Admiral de Grasse at the mouth of Chesapeake Bay and in the resulting action was worsted Graves returned to New York, refitted, and, with additional ships and the army of Sir Henry Clinton on board, returned, but arrived too late to prevent the surrender of Lord Cornwallis at Yorktown The French fleet had also been reinforced, so that Graves did not attack, but returned to New York and resigned his command In the French Revolutionary Wars, Graves was made second in command of the Channel Fleet, played a leading part in 1794, and for his conduct was raised to the peerage.

Graves, William Sidney, 1865–1940, American army officer, b Hill co , Texas, grad West Point, 1889 He served (1899–1901) in the Philippines and commanded (1918–20) American forces in Siberia The story of his conduct of the Siberian forces is told in his *America's Siberian Adventures* (1941)

Gravesend (grāv'sĕnd'), municipal borough (1931 pop 35,495, 1947 estimated pop 42,390), Kent, England, on the southern bank of the Thames SE of London and opposite Tilbury The town's industries include shipbuilding, metal casting, and the making of soap, leather, and paper Rosherville Gardens was formerly a resort of Londoners. Pocahontas is buried in the parish churchyard, memorial windows of this church (St. George's) were provided by the ladies of Virginia The town is the headquarters of the Royal Thames Yacht Club. It has been for centuries the place of the official reception of London's distinguished visitors and the starting point of expeditions It is a station of pilots and customhouse officers

Graves's disease · see THYROID GLAND

Gravier, Jacques (shak' grāvyā'), 1651–1708, French Jesuit missionary to the Illinois Indians He went to Canada in 1685 He was sent west to the St Ignace mission at Mackinac in 1687 and thence (1688) to Illinois to aid Father Allouez with the tribes of that region He succeeded Father Allouez as vicar general of Illinois Except for three years at St Ignace, Gravier spent the remainder of his life with the Illinois Indians, reducing their language to writing and preparing a grammar for it. He journeyed to New Orleans in 1700 and in 1706

gravitation. In his law of gravitation, Isaac Newton states that all bodies in the universe, from the heavenly bodies down to the smallest particles of matter, have a mutual attraction for one another Because it involves all kinds of bodies, it is often known as the law of universal gravitation This force of attraction acting between all bodies to pull them together is in direct proportion to the product of the masses of the bodies under consideration and varies inversely as the square of the distance between them Experiment has shown (so far as experiment can yet show) that no matter what the circumstances gravitation is always acting between two given bodies and can under no known circumstances be destroyed. The gravitation constant is the force which a body with a mass of one gram exerts upon another body with the same mass at a distance of one centimeter. Although the law of gravitation was discovered by Newton (i e , was first stated by him), the work of Johannes Kepler was important in making its formulation possible In substantiating its universal application, the experiments of Cavendish were of primary significance in their startlingly accurate results and conclusions **Gravity** is commonly used synonymously with gravitation, but in correct usage a definite distinction is made Whereas gravitation is the attractive force acting to draw any bodies together, gravity indicates that force in operation between the earth and other bodies, i e., that acting to draw bodies towards the earth. It is affected by the centrifugal force set up by the earth's rotation, and its direction is not, therefore, on a straight line with the center of the earth. The force of gravity between the earth and another body is the cause of that body's having weight (as distinguished from MASS) The force can be considered as acting upon the whole body at a definite point (the center of gravity) within the body Since the force of gravity varies in different localities, the weight of a body also varies, depending upon the place in which it is measured. Gravity gives to a falling body a uniform acceleration, i.e., causes the speed at which it falls to increase a uniform amount for each second of time that it is falling This increase in velocity per unit of time is known as the acceleration of gravity Although a feather falls to the ground much more slowly than a lead ball, for example, this variation is caused by air resistance and not by the differences in mass and volume. This has been demonstrated many times, first by Galileo's classic experiment in which solid metal balls of different mass and volume but all heavy enough to make the effect of air resistance upon them not noticeable were dropped from a tower simultaneously and struck the ground at the same time and subsequently by many other experiments in which very different kinds of bodies, as lead shot and feathers, gave the same results when allowed to fall through a vacuum In experimental work, however, the acceleration of gravity has been found to differ somewhat, though very slightly, in different localities and at different altitudes above sea level For example, at Key West, Fla , the increase in velocity per second is 32 11 ft per second, whereas at Ootacamund, India, at an altitude of 7,220 ft., it is 32 08 ft. per second To reach an average value, data so obtained are first "reduced to sea level" by the addition or subtraction of various carefully determined "correction" values and then compared. Because the differences are found to be so small, the value for the acceleration of gravity used commonly as a standard in ordinary calculations is 32 ft (or 980 cm) per second per second at sea level A body starting from rest and falling freely would have a velocity of 32 ft. per second at the end of the first second, of 64 ft. per second at the end of the second second, of 96 ft. per second at the end of the third, and so on, the increase in velocity each second being 32 ft per second

Gray, Asa, 1810–88, America's leading botanist and taxonomist, b. Oneida co., N.Y As professor of natural history at Harvard from 1842, he was the teacher of many eminent botanists Through his voluminous writings in periodicals and his well-known textbooks, he helped to popularize the study of botany His *Manual of the Botany of Northern United States* (1848) and its later revisions remain outstanding in the field Among his other works are *Elements of Botany* (1836), *How Plants Grow* (1858), *How Plants Behave* (1872), *Darwiniana* (1876), and *Natural Science and Religion* (1880) He was one of Darwin's early supporters With John Torrey he attempted a new and natural classification of plants. See J. L. Gray, *Letters of Asa Gray* (1893)

Gray, Elisha, 1835–1901, American inventor, b Barnesville, Ohio He patented many electrical devices, most of them having to do with the telegraph His telautograph for transmitting handwriting and line drawing has been widely used While experimenting in 1875 with the idea of sending musical notes by wire, as a means to multiple telegraphy, he hit upon the idea of transmitting the human voice and early in 1876 filed with the patent office a caveat for such an invention. Bell's final patent had been registered just a few hours before The Western Union Telegraph Company, which acquired both Gray's and Edison's patents was defeated by the Bell Telephone Company in one of the most famous patent controversies in American history

Gray, George, 1840–1925, American jurist, b New Castle, Del , grad Princeton, 1859 He studied at Harvard Law School and became a lawyer and a politician Gray was the attorney general of Delaware from 1879 to 1885 and U S Senator from 1885 to 1899 On many occasions from 1898 to 1916 he was a U.S member of commissions to arbitrate differences between the United States and other countries—notably in drawing up the treaty that ended the Spanish-American War, in negotiating a settlement of the dispute over fisheries of the N Atlantic, and in calming trouble with Mexico in 1916. He was also (1900–1920) on the panel of the Permanent Court of Arbitration at The Hague He was chairman of Theodore Roosevelt's commission to arbitrate the 1902 anthracite coal strike and served as labor arbitrator

Gray, Gordon, 1909–, U S Secretary of the Army (1949–50), b Baltimore, grad Univ. of North Carolina, 1930, LL.B Yale, 1933. He practiced law, entered newspaper publishing, and served (1938–42) in the North Carolina legislature. In the Second World War he enlisted in the U.S. army as a private and rose to the rank of captain. After discharge, he was again (1946) elected to the North Carolina legislature, but resigned (1947) to become Assistant Secretary of the Army when the country's defenses were reorganized He succeeded Kenneth C Royall and resigned to become president of the Univ of North Carolina

Gray, Henry Peters, 1819–77, American painter, b New York city. He studied in Europe the works of the Old Masters Of his portraits, that of William Cullen Bryant is in the New York Historical Society Other works include *Cupid Begging His Arrow* (Pa Acad. of the Fine Arts); *Judgment*

of Paris (Corcoran Gall.); and *Wages of War, Cleopatra Dissolving the Pearl,* and *Greek Lovers* (Metropolitan Mus.). Gray was president of the National Academy of Design from 1869 to 1871

Gray, Horace, 1828–1902, American jurist, Associate Justice of the U S Supreme Court (1881–1902), b. Boston, grad Harvard (B A , 1845; LL.B., 1849) At first a reporter (1854–61) to the Massachusetts supreme court, he later entered into law partnership with Ebenezer R Hoar Defeated (1800) in the race for Massachusetts attorney general, he was appointed (1864) to the state supreme court and later (1873) became chief justice of the court. He was appointed by President Chester A Arthur to the U S Supreme Court, where he served the last 21 years of his life Gray on his own initiative while in law school began analytical case study as an approach to the historical development of law principles, and as a lawyer and jurist he was noted for his use of precedent cases

Gray, John Chipman, 1839–1915, American lawyer and teacher, b Brighton, Mass., grad Harvard, 1859, and Harvard Law School, 1861 After serving in the Civil War he began his practice in Boston and in 1869 began a connection with Harvard Law School as teacher He continued both practice and teaching until the last years of his life and was Royall professor at Harvard from 1883 until 1913 He became one of the leading advocates of the case system of teaching law He was a recognized authority both in England and America on the law of real property. Besides his *Select Cases . on the Law of Property* (6 vols , 1888–92), he wrote *Restraints on the Alienation of Property* (1883), *The Rule against Perpetuities* (1886), and *The Nature and Sources of the Law* (1909) See Roland Gray, *John Chipman Gray* (1917)

Gray, John Purdue, 1825–86, American alienist, b. Centre co , Pa , M D Univ of Pennsylvania, 1848 An advocate of humane treatment of the insane, he was from 1854 medical superintendent of the state asylum at Utica, N.Y., and editor of the *American Journal of Insanity*

Gray, Robert, 1755–1806, American sea captain, discoverer of the Columbia river, b Tiverton, R I He probably served in the Continental navy in the American Revolution In 1787 he and John Kendrick were sent by Boston merchants to the Northwest coast, with two vessels, the *Columbia Rediviva* and the sloop *Lady Washington* In 1789 Gray was transferred in command to the *Columbia,* took a rich cargo of sea otter skins to Canton, and in 1790 was back in Boston, the first American to circumnavigate the globe In 1791 he was back on the Northwest Coast and wintered there On May 11, 1792, he took the *Columbia* past the dangerous bar and up the river later named after the ship Though Spanish and English navigators—notably Bruno Heceta, John Meares, and George Vancouver —had been familiar with the bar at the Columbia's mouth, Gray was the first to enter the river itself

Gray, Thomas, 1716–71, English poet The son of a scrivener, Gray was educated at Eton, where he met Horace Walpole, and at Peterhouse, Cambridge, which he left without a degree in 1738 He began a grand tour of the Continent with Walpole in 1739 They quarreled in Italy in 1741, and Gray returned to England to live with his mother at Stoke Poges As a commoner he went back to the seclusion of Cambridge in 1742 and received his LL B in 1744 In the same year he became reconciled with Walpole Gray refused the laureateship in 1757, and in 1768 he was made professor of modern history at Cambridge His first poems, including "To Spring," "On a Distant Prospect of Eton College," and "Sonnet upon the Death of Richard West," were written in 1742 After years of revision he finished his famous "An Elegy Written in a Country Churchyard" in 1750 He completed "The Progress of Poesy" in 1754, "The Bard" in 1757, and "The Fatal Sisters" and "The Descent of Odin" in 1761 Gray was a transitional poet, and his work—from the classicism of the 1742 poems to the romantic tendencies of "The Descent of Odin" —illustrates the evolution of English poetry in the 18th cent In his own day his work met with the hostility of Dr. Johnson, while after Gray's death his poetry drew the censure of Wordsworth and Coleridge Although he produced a quantity of prose, Gray did not write a large amount of poetry His method of composition—he often spent years revising a poem—resulted instead in a handful of finely finished poems characterized by a melodic smoothness Much of Gray's poetry is tinged with melancholy, and even more of his poems reflect his extensive learning, for he was well acquainted not only with the classics, but with Old Norse, Welsh, and Icelandic literature as well He had little interest in publication, and he had the misfortune to have William Mason for his first editor, a man with singular incompetence and a complete lack of understanding of Gray's temperament Gray's letters, which reveal a fund of humor, a talent for picturesque description, and a strong sense of loyalty, are among the finest in the English language See his correspondence (ed by Paget Toynbee and Leonard Whibley, 1935), biographies by Edmund Gosse (1882) and W. P Jones (1937), Lord David Cecil, *Two Quiet Lives· Dorothy Osborne, Thomas Gray* (1948).

Gray, town (pop 1,378), SW Maine, between Portland and Auburn; settled c 1750, inc. 1778. It includes the villages of Gray, Dry Mills (site of a large fish hatchery and a game farm), and North Gray (site of an early woolen mill).

Gray Eminence: see Joseph, Father

Grayling, city (pop 2,124), co seat of Crawford co , N Mich , on the Au Sable and ESE of Traverse City; settled 1872, inc as a village 1903, as a city 1935 Hartwick Pines State Park and a military training camp are near here

grayling, game fish related to the salmon and found chiefly in clear, cold, fresh waters of the Northern Hemisphere. It has a high dorsal fin and is usually vivid with mixed purples and blues, but is sometimes marked with red, blue, purple, or green. The generic name *Thymallus* refers to the odor of wild thyme which pervades freshly caught specimens The flesh is delicious In North America are found the arctic or Alaska grayling, said to reach a weight of 4 lb , the now scarce Michigan grayling, and the Montana grayling, which some authorities consider a slightly duller color phase of the Michigan form The common grayling (*Thymallus thymallus*) inhabits European rivers, and a related form is found in Siberia

Grays Harbor, inlet of the Pacific Ocean, W Wash , into which the Chehalis river empties. Aberdeen and Hoquiam are on its shores

Gray's Inn· see Inns of Court

Grays Lake or **Grayslake,** resort village (pop 1,182), NE Ill , NNW of Chicago, inc 1895

Grayson, Cary Travers, 1878–1938, American naval officer and surgeon, b Culpeper co , Va As a physician he entered (1903) the U S navy, was graduated (1904) from the navy medical school, and after further service and study became (1916) medical director with the rank of rear admiral He was personal physician to Theodore Roosevelt, William Howard Taft, and Woodrow Wilson He was twice (1933, 1937) inaugural committee chairman for Franklin D Roosevelt and was chosen (1935) chairman of the American Red Cross

Grayson, David: see Baker, Ray Stannard

Grayson, town (pop 1,176), co seat of Carter co , E Ky , SW of Ashland, in an area of clay, iron, and coal deposits and farms Kentucky Christian College is here Near by are Carter and Cascade limestone caves and several natural bridges

Grays Peak, 14,274 ft high, N central Colo , in the Front Range of the Rocky Mts

Grays Thurrock, former urban district (1931 pop 18,173), since 1936 part of Thurrock urban district (1947 estimated pop 73,980), Essex, England, on the Thames below London Remains of extinct mammals have been found in the chalk pits near the town Near here are fine examples of the ancient excavations known as deneholes

Grayville, city (pop 2,240), SE Ill , on the Wabash river and NW of Evansville, Ind , in a farming area, inc 1851

Graz (grats), city (pop 219,974), capital of Styria, SE Austria, on the Mur and 80 mi SW of Vienna The second largest city of Austria, it was founded probably in the 12th cent and is built around the Schlossberg, on which there are the Uhrturm [clock tower] and the ruins of a 15th-century fortress, demolished by the French in 1809 Graz has a Gothic cathedral, several medieval churches (13th-15th cent), and a town hall (19th cent) built in Renaissance style The Landhaus [provincial parliament] dates from the 16th cent The Johanneum museum (founded 1811) is one of the finest in Austria At the state university, founded in the 16th cent , Kepler taught for several years Graz is a tourist center and has a large metal industry

Graziani, Rodolfo (rôdôl'fô grätsēä'nē), 1882–, Italian marshal After service in the African colonies and in the First World War, he won fame in Libya (1921–29) by his pacification of the Senussi tribesmen He was made (1935) commander in Italian Somaliland His prosecution of the southern campaign in the Italo-Ethiopian war won him much acclaim in Italy He was promoted marshal and served (1936–37) as viceroy of Ethiopia An attempt on his life was punished by numerous executions. Graziani was created marquis of Neghelli (1937), was made chief of staff of the Italian army (1939), and became governor of Libya (1940) In the Second World War, Graziani's army was completely routed (winter 1940–41) by the British in the Libyan campaign, and Graziani resigned his command Arrested in 1945, Graziani was indicted for high treason. His trial, begun in 1948, was suspended in 1949

Grazzini, Antonio Francesco (äntō'nyō fränchā'skō grät-tsē'nē), 1503–84, Italian author, one of the founders of the Accademia della Crusca (see Italian literature), an apothecary by trade He took the name Il Lasca [the roach] as a member of the Accademia degli Umidi, each of whose members had to assume the name of a fish He is best known for his stories under the title *Le Cene* [the suppers], tales which deal with Florentine life For translations, see Thomas Roscoe, *The Italian Novelists* (1825)

grease, lubricating material used to reduce friction between surfaces where a substance thicker than oil is required. The most commonly used greases are made from a mineral oil thickened with a soap having a metal base (usually calcium or lime, sodium or caustic soda, aluminum, or lead) Calcium soap greases are much used as axle grease, waterpump grease, and pressure-gun grease and on oilfield pumping equipment Sodium soap greases are used for automotive wheel bearings and steering-sector lubrication and similar purposes and for ball bearings and roller bearings (for which the grease used generally contains a base of both calcium and soda) Greases for lubricating concrete mixers, mechanical digging apparatus, tractor rollers, and parts of other machines working at low speed and bearing heavy loads are made from mixtures of mineral oil and solid materials such as graphite, mica, asbestos fibers, and talc Greases must be carefully selected according to the purpose for which they are to be used, they must be of the proper texture, thickness, and melting point in order to be useful

greasewood, shrubby plant (*Sarcobatus vermiculatus*) of the goosefoot family, having a very hard yellow wood It grows abundantly on the alkali soils of the W United States Cattle and sheep feed on the leaves, and the wood is used locally for fuel The name is also applied to similar plants common to the same regions, e g , the creosote bush (*Larrea tridentata*) and the salt bush (*Atriplex*)

Great Australian Bight, wide bay of the Indian Ocean, indenting the south coast of Australia

Great Awakening, series of religious revivals which swept over the American colonies about the middle of the 18th cent It resulted in doctrinal changes and influenced social and political thought It may be said to have begun in New Jersey under the evangelical preaching of Theodorus Frelinghuysen of the Dutch Reformed Church and Gilbert Tennent of the Presbyterian denomination, Tennent became the leading figure of the Great Awakening in the Middle Colonies In New England it was started by the stirring preaching of Jonathan Edwards of Northampton Other preachers followed these, and with the tour (1739–41) of George Whitefield, one of the most famous preachers of his day, the isolated streams of revivalism united and flowed into all the colonies The revival reached the South with the preaching (1748–59) of Samuel Davies among the Presbyterians of Virginia, with the great success of the Baptists in North Carolina in the 1760s, and with the rapid spread of Methodism shortly before the Revolution In New England the movement died out rapidly, leaving behind bitter doctrinal disputes between the "New Lights" and the "Old Lights," the latter led by Charles Chauncy, a Boston clergyman, who opposed the revivalist movement as extravagant and impermanent The theology of the "New Lights," a slightly modified Calvinism, crystallized into the Edwardian or New England theology which became dominant in W New England, while the liberal doctrines of the "Old Lights," strong in Boston and the vicinity, were destined to develop into the Universalist or Unitarian positions A similar division between "New Sides" and "Old Sides" took place in the Middle Colonies, causing a schism (1741–58) in the Presbyterian Church In Virginia the rapid growth of dissenting sects was a leading factor in the overthrow of the Established Church and the passage of the religious liberty act after the Revolution The Great Awakening also resulted in an outburst of missionary effort among the Indians, represented by David Brainerd, Eleazar Wheelock, and Samuel Kirkland, in the first movement of importance against slavery, and in various humanitarian undertakings It led to the founding of a number of academies and colleges, notably Princeton, Brown, Rutgers, and Dartmouth It served to build up interests that were intercolonial in character, to increase opposition to the Anglican Church and the royal officials who supported it, and to create a democratic spirit in religion that was allied to the insistence on political home rule See Joseph Tracy, *A History of the Revival of Religion in the Time of Edwards and Whitefield* (1842), C H Maxson, *The Great Awakening in the Middle Colonies* (1920), W M. Gewehr, *The Great Awakening in Virginia* (1930)

Great Barrier Reef, largest coral reef in the world, in the Coral Sea, forming a natural breakwater for the coast of Queensland, Australia It is 1,250 mi. long, and the channel separating it from the mainland is from 10 to 100 mi wide The islets contained within the reef have coral gardens and unusual marine life

Great Barrington, town (pop 5,824), SW Mass., on the Housatonic, in the Berkshires near the N Y line, settled 1726, set off from Sheffield 1761 Many old houses remain, including the home of William Cullen Bryant, who was town clerk, 1816–25. An annual fair is held The town is a summer resort and a ski center.

Great Basin, an interior region of the W United States, between the west wall of the Rocky Mts and the east wall of the Sierra Nevada and extending SE to the Colorado Plateau and SW to the

Sonoran Desert Covering an area of over 200,000 sq mi , it is approximately triangular in shape, with the widest part at the north The Great Basin proper includes areas in Oregon and Idaho most of Nevada, the west half of Utah, and a portion of SE California The larger basin region is sometimes defined as including the interior areas between the drainage basins of the Columbia, Colorado, and Rio Grande rivers The surface of the Great Basin is characterized by a series of rugged north-south mountain ranges, divided by deep, flat valleys The altitude varies from thousands of feet above sea level to 280 ft below in Death Valley National Monument in the south Little rain falls in the Basin and its streams find no ultimate outlet to the ocean The Humboldt river, largest in the area, disappears in Humboldt Sink The Carson river is dispersed in Carson Sink The lakes are generally saline In some early geological age two great lakes, Bonneville and Lahontan, covered the greater part of the northern section Great Salt Lake, Utah Lake, and Sevier Lake are remnants of Lake Bonneville, Lake Lahontan survives in Pyramid, Winnemucca, and Walker lakes In his expeditions of 1843–45, J C Frémont explored parts of the Great Basin and gave it its name Gold, silver, and other minerals are found here Where irrigation has been developed, farming is successfully carried on

Great Bear Lake, large lake, c 175 mi long and 25 to 45 mi wide, N central Mackenzie dist , Northwest Territories It is drained to the west by Great Bear river, which flows c 100 mi into the Mackenzie river Because of its northern latitude the lake's waters are open only about four months a year It was discovered by traders of the North West Company c 1800, and a trading post was established there Fort Franklin on its southwest shore was built by Sir John Franklin in 1825 Discoveries of rich radium ores on the eastern end in 1930 caused much mining excitement in the years immediately following Eldorado Mines is on this side of the lake

Great Belt · see Belt, Great

Great Bend, city (pop 9,044), co seat of Barton co , central Kansas, on the Arkansas and on the old Santa Fe and Chisholm trails, inc 1872 It is a trade center for a grain region In the 1930s the area's oil and natural-gas resources were tapped Fort Zarah, an early post east of the town, was abandoned in 1869 The Federal game preserve of Cheyenne Bottoms is near by

Great Berge, Union of South Africa see Paarl

Great Berkhampstead, Berkhampstead, or Berkhamsted (all bûrk'umstĕd, bärk'–), urban district (1931 pop 8,052, 1943 estimated pop 16,000), Hertfordshire, England It is the site of a royal castle dating from the 11th cent in which Edgar Atheling submitted to William the Conqueror, Thomas à Becket lived, and Henry II held court John II of France was imprisoned in the castle after Poitiers The castle was pulled down in the 16th cent and replaced by Berkhamsted House, where Charles I spent part of his boyhood There is a 16th-century grammar school William Cowper was born in the former rectory

Great Blasket, Ireland see Blasket Islands

Great Britain, largest of the British Isles Politically the name has been given since the Act of Union (1707) to England, Scotland, and Wales Together with Northern Ireland they constitute the United Kingdom, which formerly included all of Ireland The island was originally called Britain That heading has a sketch of its history and geography until the Germanic invasions of the 5th and 6th cent Its history thereafter is treated in England, Scotland (until 1707), and Wales (until 1284).

The Growth of Empire Upon the accession of James VI of Scotland as James I of England in 1603, the crowns of the two countries had been joined, permanently as it transpired, and Scotland's history paralleled England's thereafter When England was involved in the War of the Spanish Succession against France (despite the early successes of the duke of Marlborough), the threat of Scottish Jacobites to enthrone an exiled Stuart in Scotland after Queen Anne's death instead of accepting an English sovereign of the house of Hanover presented a possibility of disruption of the country and of the growing empire To avoid this Scotland was united to England in 1707, the Scottish Parliament and privy council were absorbed by those of Great Britain, but no change occurred in London except for extension of representation to Scotland The government remained that described under *England.* Thus, despite opposition by the Jacobites, George I succeeded (1714) Anne and introduced the Hanoverian line of rulers In the reigns of William III and Anne, the founding of the Bank of England (1694) and the creation of the permanent national debt coincided with, and were part of, mercantile England's growing dominance of world trade and finance England's empire was rapidly established, partly as the victorious outcome of rivalry with Holland and France confirmed by the Peace of Utrecht (1713–14) The reigns of George I, George II, and George III were a period of internal stability, of expansion and of the development of the cabinet as the central organ of government under Sir Robert Walpole and under the rival party leaders of the late 18th cent , among them William Pitt, earl of Chatham, his son William Pitt, Charles James Fox, and Edmund Burke It was a period of great achievement in literature and the arts and of the glorification of common sense In the continuing struggle with France, Great Britain fought both France and Spain in the European war called the War of the Austrian Succession From the Seven Years War which was ended by the Peace of Paris in 1763, Britain emerged as mistress of the seas That peace confirmed the British predominance in India which had been won by the East India Company under Robert Clive and was to be consolidated by the administrator Warren Hastings In North America the treaty granted to Great Britain immensely increased territory conquered by James Wolfe and lesser-known heroes of empire in the last of the French and Indian Wars The American Revolution caused a serious loss to the empire, but it was soon more than made up Settlements of Australia and New Zealand resulted from the explorations by Capt James Cook Further, England gained great power and improved lines of control and empire communication in the French Revolutionary Wars and those with Napoleon I, in which Horatio Nelson on the sea and Arthur Wellesley, duke of Wellington, on land won new victories, ending with the downfall of Napoleon at Waterloo (1815). George Canning and Viscount Castlereagh shaped British foreign policy A by-product of the Napoleonic Wars was the War of 1812 Meanwhile British political conservatism in reaction to the French Revolution delayed legislation which should have kept pace with the great changes brought about by the inclosures and other 18th-century changes of agricultural methods, by a tremendously increasing population, and by the Industrial Revolution, which began in the latter half of the century In particular these changes resulted in the shift of population in England from the south and east to the north and the Midlands In Scotland, Glasgow grew rapidly to be the largest city, skilled workmen were concentrated in the Tyne and Forth shipyards The rising demand for wool in the early years of the 19th cent caused many Scots to be driven from their lands, which were then turned into sheep pastures Uneasy Ireland had obtained an independent Parliament in 1782, but needed reforms in that Parliament were denied, and rebellion broke out in 1798 The English remedy was to unite England and a reluctant Ireland (1800), with Irish representation in the British Parliament The problem of Ireland was thereby only made more acute Catholic Emancipation, promised in 1800, occurred only in 1829, and the Church of Ireland was not disestablished until 1869. Absentee landlordism continued, with the attendant evils of poverty and hatred of the English.

Commercial Leadership of the World George IV (prince regent before becoming king) was followed by William IV, and he was succeeded by Victoria, upon whose succession the throne of Hanover was separated from that of Great Britain Her reign, the longest in British history (1837–1901), covered the greater part of the 19th cent. England reached in this century the height of commercial and industrial prosperity. Chief among the political issues was the delayed political reform, achieved with difficulty, but with a minimum of violence (as in Chartism), in the Reform Bills of 1832, 1867, and 1884, which admitted to the franchise first the great new middle class and then the working class Humanitarian and economic legislation (the factory acts, poor laws, and prohibition of the slave trade) removed some of the abuses of English social life After 1832 the reformed Parliament under the pressure of the rising new Liberal party ended slavery and paid indemnities to the slaveowners throughout the empire The profitable trade with the United States had lent force to the arguments for free trade and laissez faire by Adam Smith, Jeremy Bentham, and John Stuart Mill Richard Cobden and John Bright led agitation for the repeal of the corn laws, which was finally achieved through the agency of Sir Robert Peel When Peel, however, made free trade the policy of Great Britain, he split the Conservative party he led In this period a deliberate policy of colonial representative self-government was started, beginning with Canada, and it was combined with controlled emigration from overpopulated Great Britain At the demand of Australians the transportation of criminals to Australia was stopped in mid-century, and self-government was set up there India continued to be expanded by conquest and annexation, in the course of which British military force was used, and the government was in 1833 brought under the colonial office British trade was worldwide and prosperous under the protection of the British navy Great Britain's commercial interests brought on the Opium War with China in 1840, with its resultant British opening of five Chinese ports and British control of Hong Kong Great Britain, under the leadership of Viscount Palmerston, also took part in the Crimean War. The dominating statesmen of the later part of Victoria's reign were the Liberal, William Ewart Gladstone, and the Conservative, Benjamin Disraeli Gladstone brought about many reforms. He attempted to solve the problem of Ireland by the disestablishment of the Church of Ireland in 1869 and by various acts concerning the Irish Land Question and was defeated finally when attempting to obtain Home Rule for Ireland. Gladstone's foreign policy, which kept England out of the Franco-Prussian War of 1870, was called weak That of Disraeli was to strengthen the empire He directed the purchase of the Suez Canal in 1875, his protests over the Russo-Turkish War of 1877 resulted in the temporary settlement of the Eastern Question at the Congress of Berlin in 1878, under him also was initiated the system of dual control with France in Egypt Problems of government and expansion of the empire (see British Empire) were major concerns of the home government and led to open warfare at the end of the century in the South African War With the height of prosperity in the latter half of Victoria's reign came an outpouring of private philanthropy and widespread moral earnestness Also, subservience to propriety became marked and seriously hampered improvement in the position of woman well into the 20th cent The administration of government was improved by the foundation of the civil service, and efforts were made to provide and regulate primary and secondary education on national lines Trade unions became increasingly the spokesmen of laborers and laid the foundations of the organizations which were to have great political power in the next century

Before the Second World War Victoria was succeeded by her son Edward VII, who was in 1910 succeeded by George V In internal policy the first years of Edward VII's reign were devoted to the tariff-reform question (see Chamberlain, Joseph) and matters of economic and social progress—old-age pensions, woman suffrage, and child welfare The financial measures sponsored by David Lloyd George brought about the struggle that resulted in drastic reduction of the power of the House of Lords (1911), thus signalizing the collapse of the nobility, which had been undermined in the 19th cent More important was the trend of foreign affairs Naval and colonial rivalry with Germany helped to drive Great Britain into an alliance with France and Russia (see Triple Alliance and Triple Entente) As the complexion of foreign affairs changed (as in the crises over Morocco), Great Britain was drawn closer and closer to the Allies In 1914 Sir Edward Grey made valiant efforts to prevent the outbreak of war, but after the violation of Belgian neutrality, Great Britain plunged into the First World War (see World War, First) Years of fighting drained Great Britain of wealth and man power, despite the extensive participation of the dominions, and Lloyd George, who at the head of a coalition ministry had replaced Herbert Asquith as premier in 1916, was unable to satisfy the British by the gains made in the Treaty of Versailles (see Versailles, Treaty of) Years of disillusion and difficulty began To such general problems as disarmament, reparations, and war debts were added complex economic problems, difficult reorganization and administration of the British Empire, and the new relation with the Irish Free State The alignment of the older parties (Conservative and Liberal, the heirs of Tory and Whig) was upset by the tremendous and rapid growth of the Labour party, fostered by the gloomy economic outlook and unemployment The first victory of the Labour party made Ramsay MacDonald premier in 1924. Labor troubles grew more and more tense and produced the general strike of 1926 The maintenance of economic stability became an even more pressing problem with the world-wide economic depression In 1931 a crisis in government was reached A coalition government, headed by MacDonald, but largely Conservative in tone, was organized Desperate measures were attempted, the gold standard was abandoned, payments of war debts were repudiated, free trade was supplanted by protection with preferential tariffs within the empire and with treaty nations The Ottawa Agreements of 1931 initiated the new policy of economic alignment in the empire Even so, Great Britain recovered only slowly from the depression of the early 1930s New industries, such as automobile and electric-goods manufacture, flourished, but older industries, such as coal mining and cotton textile manufacture, were hindered by obsolescence of equipment and methods and by growing trade rivalry from abroad, particularly from the United States Unemployment continued high, especially in such distressed areas as S Wales and the industrial Midlands. Stanley Baldwin succeeded (June, 1935) Ramsay MacDonald as prime minister and was succeeded (May, 1937) by Neville Chamberlain. No general elections were held. Edward VIII became king (Jan , 1936) on the death of his father, George V, but abdicated the following December because

of official opposition to his intended marriage to an American divorcee, Wallis Warfield Simpson (see WINDSOR, WALLIS WARFIELD, DUCHESS OF) He was succeeded by GEORGE VI, whose coronation (May, 1937) was the occasion for an Imperial Conference in London The policy of preferential tariffs was maintained to hold the empire together The years prior to the outbreak of the Second World War were largely engrossed by futile attempts to stem or divert the rising tide of aggression by Germany and Italy The LEAGUE OF NATIONS, in which Britain was a leader, declined politically, notably with the failure to halt the Italian conquest of Ethiopia (1935–36) British prestige declined further because of the nonintervention policy in Spain, where Hitler and Mussolini were openly assisting Francisco Franco Germany rearmed and occupied the Rhineland unopposed. Japanese aggression in China continued unchecked The policy of appeasement of the AXIS Powers became the symbol of the Chamberlain government and reached its climax in the MUNICH PACT of Sept , 1938, which Hitler flouted a few months later by seizing all of Czechoslovakia Italy invaded Albania Anthony EDEN had already resigned as British foreign minister in protest against government policy In March, 1939, Germany occupied Austria Great Britain began, tardily, to rearm, instituted military conscription, and sought, along with France, to build an "anti-aggression front" Guarantees were offered Greece and Rumania in April, 1939, and a pact was signed with Turkey, but France and England failed, most significantly, to reach an understanding with Russia In April, too, Britain agreed to come to Poland's aid if that country were attacked In Aug , 1939, the world was shocked to learn of the Soviet-German accord, and war was recognized as inevitable

The Second World War and Social Change On Sept 1, 1939, Germany loosed an attack on Poland Great Britain and France declared war on Sept 3, and all the dominions of the British Empire, except Ireland, followed suit (see WORLD WAR, SECOND) Chamberlain broadened his cabinet to include Labour party representatives, but after the German occupation of Denmark the following April and the disastrous British defeat in Norway, Chamberlain resigned (May 10, 1940) and was replaced by Winston L S CHURCHILL, who had an anti-Hitler reputation and military experience as assets France fell on June 22, and the gloom of the situation was only partially lightened by the heroic rescue of thousands of troops from DUNKIRK (May–June, 1940) Great Britain, now virtually alone, steeled itself for an expected invasion which did not materialize Instead there began the scourge of bombing The Royal Air Force rose courageously to its victorious struggle in the contest that has become known as the Battle of Britain The vast damage inflicted on Coventry and Plymouth, however, was typical of many cities, and great areas of London were burned to the ground Outstanding in the global warfare in which Great Britain engaged in the following years were such military leaders as Bernard Law MONTGOMERY, Harold R L G ALEXANDER, Archibald WAVELL, Air Chief Marshal Arthur William TEDDER, and Lord Louis MOUNTBATTEN Increasing assistance to Great Britain came from the United States In Sept , 1940, the United States agreed to give Britain 50 destroyers in return for leases on a number of Atlantic naval and air bases, and in March, 1941, President Roosevelt signed the act making LEND-LEASE aid to Britain possible In Aug , 1941, Roosevelt and Churchill met at sea and proclaimed the ATLANTIC CHARTER On June 22, 1941, Germany attacked the USSR, and in December Japan struck at American and British possessions in the Pacific Great Britain had gained two great allies The Big Three drew closer together, and their wartime accord led to the UNITED NATIONS Great Britain participated in a long series of international conferences during the war (see CASABLANCA CONFERENCE, CAIRO CONFERENCE, MOSCOW CONFERENCES, POTSDAM CONFERENCE, QUEBEC CONFERENCE, TEHERAN CONFERENCE, YALTA CONFERENCE) In many ways Great Britain's military picture was at its bleakest in the autumn of 1942, but Churchill's coalition government remained stable Labour members, however, such as Clement R ATTLEE, Ernest BEVIN, Sir Stafford CRIPPS, and Herbert MORRISON, cooperated only with the understanding that there were to be great advances in socialization after victory was achieved A third or more of the British people were engaged in the armed forces or in services and industry directly related to the war Women as well as men were mobilized for work in the armed services, the factories, and the fields Britons lowered their living standards to those of Spartan rigor and cultivated their farms and gardens so intensively as to raise England's degree of food self-sufficiency from one third to one half Enormous numbers of troops, including millions of Americans, poured into the little island prior to the Normandy invasion of the Continent, further straining the country's economy. Germany surrendered May 7, 1945, and Japan three months later (Aug. 14). Already Great Britain had begun to make plans for the post-war world England was committed to a partial occupation of Germany, had taken part in guiding the destinies of Italy and Greece, and participated actively in the United Nations organization The war, however, had wrought effects on England which were, as yet, little appreciated Six years of strenuous war effort and great damage from enemy action had seriously weakened Britain's economy Leadership in world trade and shipping had passed to the United States, the bonds of the empire were strained, and the political outlook of the people in the 10 years since the last general elections had moved farther to the left The Labour members of the cabinet withdrew in May, 1945, and general elections were held in July The result was an overwhelming victory for the socialist program of the Labour party Clement Attlee, the new prime minister, replaced Churchill at the Potsdam Conference which was then in progress Ernest Bevin became foreign minister Foreign policy, however, was not greatly affected by the change of leadership Britain attempted to maintain the friendship of both the United States and the USSR The occupation of Germany settled into a rivalry between East and West, and there were mutual recriminations concerning Russian influence in Eastern Europe and Iran and British activities in Greece and Italy The Labour government offered India its freedom, which, after much difficult negotiation, was achieved by the establishment of the dominions of Pakistan and India and the final British withdrawal in June, 1948 The question of the protectorate over PALESTINE Britain resigned to the deliberations of the United Nations, and British administrators withdrew from Palestine in 1948 In March, 1948, England signed a 50-year pact with France, Belgium, Luxembourg, and the Netherlands, but declined to unite so closely with a Western European union against Russia as Churchill advocated The sudden termination of lend-lease arrangements with the United States made apparent the precarious internal financial condition of Great Britain In July, 1946, the United States extended to Great Britain a loan of $3,750,000,000, which was intended to tide Britain over the three to five years considered necessary for the readjustment of British industry and trade England undertook to adopt world free-trade principles and continued the wartime controls of its economy The loan proved insufficient for a number of reasons British industry, notably coal, failed to revive as quickly as anticipated, foreign commitments, particularly in Germany, were a heavy strain, the country was stricken with a severe cold spell and subsequent floods early in 1947, and both inflation in the United States and the vast quantity of imports from America quickly depleted England's dollar reserve Additional financial assistance from the dominions and relaxed terms on the U S loan were inadequate to meet Britain's needs In less than two years the entire sum of the loan was expended In 1948 more U S aid (see EUROPEAN RECOVERY PROGRAM) was extended to Britain to meet the crisis Meanwhile the situation improved somewhat Late in 1947 England began once more to export coal Other exports were pushed relentlessly, though it meant continued privation at home By 1948 England was shipping great quantities of tractors, automobiles, and luxury items to the United States All efforts, nevertheless, did not sufficiently meet the contingencies, and late in 1949 Great Britain was forced to devalue the pound in terms of dollars from $4 03 to $2 80, despite the danger of an increased cost of living at home Nationalization of industry and extension of social-security provisions were pursued vigorously under the Labour government The Bank of England, the coal industry, cable and wireless facilities, and civil aviation were nationalized in the Labour government's first year, and internal transport shortly thereafter In July, 1948, the huge program of socialized medicine was instituted Power over agricultural production was increased, financial allowances were made to the parents of children, the minimum educational age was raised from 14 to 16 years, and public housing was pushed After its initial impetus the socialization program slowed somewhat Steel was the first great manufacturing industry to be voted under government control (to be implemented in 1951) Shortly before the legal termination of Parliament the Labour government called for a new general election (Feb , 1950) The result, in the reconstituted House of Commons, was extremely close The Labour party gained a majority by the narrowest margin Attlee declined to appeal again to the electorate and continued as prime minister, with Herbert Morrison as president of the council, Ernest Bevin as minister of foreign affairs, and Sir Stafford Cripps as chancellor of the exchequer Strict party discipline enabled the government to defeat opposition motions of censure on the vital steel and housing programs, and the Conservatives, under the leadership of Churchill, possibly from the conviction that conditions would inevitably worsen for a time, declined to press for a dissolution of the government For a list of British kings, see the article ENGLAND Additional bibliography is to be found in the articles BRITAIN, BRITISH EMPIRE, ENGLAND, ENGLISH LANGUAGE, and ENGLISH LITERATURE. See also A W Ward and others, ed., *The Cambridge Modern History* (14 vols , 1902–26), A W Ward and G P Gooch, ed , *The Cambridge History of British Foreign Policy, 1783–1919* (3 vols , 1922–23), H D Traill, *Social England* (6 vols , 1901–4), H M S Croome and R J Hammond, *Economic History of Britain* (1947), J H Jackson, *England since the Industrial Revolution, 1815–1918* (new ed , 1948), G D H. Great Chebeague Island (shĭbēg′) or **Chebeague Island,** SW Maine, in Casco Bay It is a resort and residential island of about 2,000 acres Chebeague Island village is on the east shore

great Dane, large dog with a short-haired, sleek coat of which the color may be brindled, fawn, blue, black, or harlequin (white with black spots) The male should stand not less than 30 in at the shoulder It is a strong, graceful dog and when well trained is a valuable guard dog Its origin is obscure Dogs closely resembling the great Dane lived in ancient times in Egypt, Greece, and China and probably in England in the 1st cent A.D. Descriptions of hunts testify to their use in Germany in the 16th cent for hunting wild boars, bears, and wolves In 1880 breeders and judges in Germany drew up official points for judging the breed and adopted the name *Deutsche dogge* to replace the numerous earlier names It is not known why the name suggesting Danish origin was originally used

Great Divide see CONTINENTAL DIVIDE

Great Dividing Range, general name for the mountains and plateaus roughly paralleling the east and southeast coasts of Australia and forming the watershed between the rivers flowing to the Coral and Tasman seas and those flowing to the Gulf of Carpentaria and the Indian Ocean Among the many parts of the system are the Australian Alps (with Mt Kosciusko, 7,305 ft , the highest peak of Australia), the McPherson Range, the New England Range, the Blue Mts , and the Grampians

Great Elector, the see FREDERICK WILLIAM

Greater Lebanon see LEBANON

Great Falls, city (pop 29,928), co seat of Cascade co , N central Mont , on the Missouri opposite the mouth of the Sun river and near the falls that give the city its name Founded (1883) by Paris Gibson with the help of James J HILL to be an industrial city and incorporated in 1888, it is highly industrialized and is the center of large hydroelectric-power development Besides a large zinc-reduction plant (across the river), copper refineries, and a wire mill, there are flour mills, a packing plant, an oil refinery, and other plants The city is also a port of entry and the market for an irrigated farm district and the Sun river project It is, too, a communications center, with a much-used airport. The log cabin of the cowboy artist Charles M Russell is preserved as a museum Outside the city is Giant Springs, discharging a large flow of water to the Missouri

Great Fish, river see BACK, SIR GEORGE

Great Glen, depression extending NE–SW across Scotland See CALEDONIAN CANAL, NESS, LOCH

Great Harwood, urban district (1931 pop 12,789, 1943 estimated pop 11,500), Lancashire, England, near Blackburn It is a cotton-mill town, with collieries in the vicinity

Great Lakes, group of five fresh-water lakes in the central part of North America, between Canada and the United States They are Lake SUPERIOR, Lake MICHIGAN (the only one entirely within the United States), Lake HURON, Lake ERIE, and Lake ONTARIO, out of which flows the SAINT LAWRENCE river From Duluth, Minn , at the western end of Lake Superior, to the outlet of Lake Ontario they stretch 1,160 m The international boundary passes approximately through the center of all except Lake Michigan French traders were the first white men to see any of the Great Lakes, possibly Étienne Brulé visited Lake Huron c 1612 or earlier. In 1615 Samuel de Champlain voyaged on Lake Huron and Lake Ontario The *Griffon,* under La Salle, sailed (1679) from Lake Erie to Green Bay, an arm of Lake Michigan The Great Lakes region was a prize for which the English and French in North America struggled for many years With the close of the American Revolution and after the War of 1812 had finally ended the long contest for possession of the Great Lakes, settlement of the region was rapid The opening (1825) of the Erie Canal accelerated the development of commerce on the lakes They carry the products of an immensely productive, widespread area, great quantities of iron ore and grain, much coal, petroleum, and steel, and countless manufactured articles are shipped from April until December, when ice closes most of the ports and winter storms hinder extensive navigation Fishing and shipbuilding are also impor-

tant industries A number of large industrial cities lie along the Great Lakes, which are connected with the Mississippi river and the Gulf of Mexico by the Illinois river waterway The New York State Barge Canal links them with the Hudson river and the Atlantic The GREAT LAKES-SAINT LAWRENCE SEAWAY AND POWER PROJECT for improved navigation and hydroelectric power has long been under discussion See Walter Havighurst, *The Long Ships Passing the Story of the Great Lakes* (1942), Harlan Hatcher, *The Great Lakes* (1944)

Great Lakes-Saint Lawrence Seaway and Power Project, proposal by the governments of the United States and Canada to deepen the existing waterway from the western end of Lake Superior to the Atlantic via the SAINT LAWRENCE river, for passage by ocean-going vessels and for the creation of new water-power sites The project is intended to apply particularly to the portion of the river between Lake Ontario and Montreal Here the canals which by-pass the numerous rapids are too shallow to provide deep-draft navigation In 1932 a treaty providing for the joint development and use of the St. Lawrence basin was signed by the United States and Canada, but it was not ratified by the U S Senate In 1941 an agreement, embodying the main features of the earlier treaty, was reached between the two governments and drawn up in the form of a bill, which was not passed by the U S Congress See F. N Menefee, *The St Lawrence Seaway* (1940), Tom Ireland, *The Great Lakes-St Lawrence Seaway and Power Project* (1946)

Great Malvern, England see MALVERN

Great Meadows see NECESSITY, FORT

Great Miami (mīă'mu,-ĕ) or **Miami,** river rising in W Ohio and winding generally southwest c 160 mi , passing Dayton and joining the Ohio river at the Ind line After the severe flood of 1913, retarding basins were built in the Miami valley The Little Miami, to the east and generally parallel, enters the Ohio at Cincinnati.

Great Mother of the Gods, in ancient religions, Mother Earth, goddess of motherhood and of wild things, the great symbol of fertility Ancient peoples worshiped her under many names and aspects In Greece she was Gaea, Rhea, and, in later times, Demeter, Artemis, and Aphrodite The Romans knew her as Magna Mater and Bona Dea and in specialized phases as Diana and Venus Cybele in Phrygia and Isis in Egypt represented the Great Mother The Phoenicians worshiped her as Astarte, and the Babylonians and Assyrians as Ishtar In Greece she lost her place in literature to Hera and other Olympian gods See FERTILITY RITES.

Great Neck, residential village (pop 6,167), on the north shore of Long Island, SE N Y , near New York city, inc 1921

Great Neck Estates, residential village (pop 1,969), on the north shore of Long Island, SE N Y , inc 1911

Great Neck Plaza, residential village (pop 2 031), on the north shore of Long Island, SE N Y , inc 1930

Great Northern Peninsula or **Petit Nord Peninsula,** comprising NW Newfoundland, extending 170 mi NNE from Bonne Bay on the west to Cape Bauld and bounded on the east by White Bay The Long Range, along the west coast, rises to 2,060 ft in Gros Morne

Great Ouse, river, England see OUSE 1

Great Plains, high, extensive grasslands of the W United States and Canada They are a sloping plateau between the Rocky Mts on the west and the level prairies of the Mississippi valley on the east They start in W Canada and continue S to the Llano Estacado and the South Plains in the Texas Panhandle They are generally level, treeless, and semiarid In the United States they include the western part of the Dakotas, Nebraska, Kansas, and Oklahoma, the eastern part of Montana, Wyoming, Colorado, and New Mexico, and the northwestern part of Texas They slope gently down from the foothills of the Rockies at an elevation of 6,000 ft, to merge into the prairies at an elevation of 2,000 ft The Platte, Republican, Kansas, Arkansas, Cimmaron, and Canadian rivers flow generally from west to east The land is natural grazing land, and attempts to make it into wheat-farming country have brought some difficulties and some disasters from drought See the masterly study by Walter Prescott Webb, *The Great Plains* (1931)

Great Pyrenees, large white dog believed to be descended from the mastiff Its existence in Europe is said to date from earlier than 1000 B C , its original home is thought to be central Asia or Siberia An intelligent and devoted guard dog, the Great Pyrenees was during many centuries the guardian of shepherds and flocks especially in the mountains of Europe, in France he was long a favorite guard dog on large estates and at court The breed was recognized by the American Kennel Club in 1933 and from that time was bred in North America. It makes a devoted and gentle companion dog. Males stand from 27 to 32 in. at the shoulder and weigh from 100 to 125 lb. The head is large, the body rather massive, and the tail plumed Well protected against severe weather, the dog has a long, heavy outer coat and a thick, fine undercoat When the coat is not entirely white, it has some markings of gray or varying shades of tan.

Great Rift Valley, geological FAULT system of E Africa and SW Asia. It extends roughly from lat 35° N to lat. 20° S The northernmost extension runs S through Syria, the Jordan valley, the Dead Sea, and the Gulf of Aqaba. It continues into the trough of the Red Sea and at the southern end branches into the Gulf of Aden The main section of the valley in Africa continues from the Red Sea SW across Ethiopia and S across Kenya, Tanganyika, and W Mozambique Many small lakes in Ethiopia and several long narrow lakes, notably Lakes Rudolf and Nyasa, lie on its course Just N of Lake Nyasa there is a western branch, which runs north, chiefly along the eastern border of the Belgian Congo On the map it is strikingly marked by a chain of lakes, including Lakes Tanganyika and Kivu and Edward Nyanza and Albert Nyanza. Between these two branches lies Victoria Nyanza. The Great Rift Valley ranges in elevation from 1,300 ft below sea level (the floor of the Dead Sea) to 6,000 ft above sea level in S Kenya Erosion has concealed some sections, but in places, notably in Kenya, there are sheer cliffs several thousand feet high Many geologists believe that the faulting was associated with the volcanic activity which gave rise to Mt Elgon and Mt Kilimanjaro

Great Salt Lake, shallow body of briny water, N Utah, just W of the Wasatch Range Fed by the Weber, Jordan, and Bear rivers, the lake is the largest W of the Mississippi but varies in size and depth from year to year and with changes in the weather, the average depth is a little more than 12 ft It is a remnant of ancient Lake Bonneville, which went through great changes and was at one time about a thousand feet deep Various levels are shown by marks on the emerging mountains and by rich soil deposits on the benches to the east There are islands in the lake, the largest being Antelope Island, several become peninsulas when the water is low A long promontory extends from the northern shore The heavy brine supports no life except brine shrimp, and to the west are dead wastes of salt desert, a barrier for frontiersmen and in the 20th cent a racing ground for automobiles Salt is extracted from the lake for commerce James Bridger is usually credited with being the first white man to see the lake (in 1825), but there is much debate about the matter The lake was surveyed in 1849-50 by a government party under Howard Stansbury A railroad cutoff to Lucin (completed 1903) crosses the lake See Dale L Morgan, *The Great Salt Lake* (1947)

Great Salt Plains Dam, NW Okla , in Salt Fork, a tributary of the Arkansas river The dam, 5,700 ft long and 68½ ft high, was authorized in 1936 as a Federal project and completed, except for recreational facilities, in 1948 Designed for flood control and for a wild-fowl refuge, it forms a large reservoir in a salt-encrusted plains area

Great Slave Lake, c 10,700 sq mi , S Mackenzie dist , Northwest Territories, named for the Slave (Dogrib) Indians It is c 310 mi long and 12 to 68 mi. wide and is drained at its west end by the Mackenzie river The western shores are wooded, but the long east and north arms reach into tundra-like country Samuel Hearne discovered it in 1771 Gold was discovered in the 1930s on the north shore, and the town of YELLOWKNIFE was established as a mining center The chief rivers flowing into it are the Hay in the southwest and the **Great Slave** or **Slave,** which enters at about the middle of the south shore near Fort Resolution Great Slave river is the name given to the central stream of the Mackenzie system for its 310-mile course between Lake Athabaska and Great Slave Lake Shortly after it leaves the west end of Lake Athabaska it is joined by the Peace river It is navigable for steamers except for the rapids where it breaks through the Cariboo Hills Here a wagon road portage 16 mi long exists At the foot of the portage is Fort Smith, the most important settlement on the river

Great Smoky Mountains, part of the Appalachian system, W N C and E Tenn., between Asheville and Knoxville and between the French Broad and Little Tennessee rivers Part of the group, including some of the highest peaks, was set aside in 1926 as a national park, which was established in 1930 and dedicated in 1940 (229,588.3 acres in North Carolina, 231,415 49 acres in Tennessee). The park is a favorite resort area, with its rich variety of flowers and trees, beautiful lakes and streams (stocked with fish), and unspoiled mountain and woodland scenery The highest peak, Clingmans Dome, rises to 6,642 ft , and 15 other peaks are over 6,000 ft. high. Park headquarters are near Gatlinburg, Tenn., a small resort at the foot of Mt. Le Conte. Other towns near the region are Bryson City, N.C , and Newport, Tenn. There are museums of Indian and pioneer handcraft. Trails have been marked for hikers See G W. McCoy, *Guide to the Great Smoky Mountains National Park* (rev. ed., 1935); Roderick Peattie, ed , *The Great Smokies and the Blue Ridge* (1943)

Great South Bay, protected bay with several inlets from the Atlantic, SE N Y., between the south shore of Long Island and the OUTER BARRIER It extends c 45 mi. from an inlet near Rockaway Beach to Moriches Bay Long Beach, Jones Beach and other state parks, and Fire Island are on the Outer Barrier The bay is crossed by several highway bridges

Great Whale, river, rising in Apiskigamish Lake, N central Que , flowing 365 mi W into Hudson Bay There are several falls in the river

Great Yarmouth, Norfolk, England see YARMOUTH

grebe (grēb), diving bird related to the loon, of almost world-wide distribution, and found on lakes and oceans Grebes have short wings, a vestigial tail, smooth plumage, and long, individually webbed toes When in danger they dive with amazing speed The feet are far back on the body and are used as a rudder and to help propel them in the water They swim expertly with the body submerged to any desired depth and are good fliers, but move awkwardly on land They eat insects, crustacea, fish, and some vegetable matter Unique among birds is their habit of swallowing feathers Unusual courtship ceremonies, which include dancing in pairs in the water, are found among grebes Their loosely constructed nests of aquatic plants are placed on floating vegetation or fastened to water plants Many grebes conceal their eggs with plant material when they leave the nest The young are often carried on the backs of swimming adults Probably the best-known representative in the Western Hemisphere is the pied-billed grebe which is locally called dabchick, water witch, helldiver, and didapper Other grebes are the western and Holboell's grebes of North America and the eared and the horned grebes of parts of North America, Europe, Asia, and Africa There is a flightless South American species Grebes were formerly much hunted for their silky breast feathers used in millinery

Greco, El (ĕl grĕ'kō), c 1541-1614, Greek painter in Spain, b Candia, Crete His real name was Domenicos Theotocopoulos, of which several Italian and Spanish versions are current There is no reliable information concerning his youth He is known to have studied in Venice, probably under Titian, and to have painted in Rome In 1577 he was established in Toledo at work on the altar of the Church of Santo Domingo el Antiguo The center painting of this group, the *Assumption*, now in the Art Institute of Chicago, shows marked Italian influence His next great works, *El espolio* (cathedral, Toledo) and *San Mauricio* (Escorial) indicate a rapid development The second was commissioned by Philip II but seems to have dissatisfied him In any case Greco remained in Toledo, then an abandoned and rapidly dwindling capital whose proud and recalcitrant nobility were driven wholesale into the Church as their only remaining vocation He has left superb portraits of their ascetic faces, and in the foreground of his famous *Burial of the Conde de Orgaz* (Church of Santo Tomé, Toledo) it is they who are assembled at the funeral of the count, whose soul is seen ascending to Christ in the upper part of the painting This masterpiece, painted in 1586, was followed by many others in which the artist, now mature, brought into play every resource of his dynamic art to express religious ecstasy Flamelike lines, accentuated by vivid high lights, elongated and distorted figures, and vibrant color contrasted with subtle grays—these combine to produce a unique art Among the many great works of this period are the *Baptism*, *Crucifixion*, and *Resurrection* (Prado), portrait of the inquisitor Cardinal Don Fernando Niño de Guevara (Metropolitan Mus), two similar versions of St Jerome (one in the National Gall , London; one in the Frick Coll , New York), and a long series of paintings of St Francis. In his old age all of El Greco's characteristics became accentuated To his last period belong such works as the *Assumption* (Church of San Vicente Anejo, Toledo), *Adoration* (Church of Santo Domingo el Antiguo, Toledo), of which an unfinished version is in the Metropolitan Museum, *Pentecost* (Prado), and portrait of Hortensio Félix Paravicino (Mus. of Fine Arts, Boston) The debt to El Greco of the later Spanish masters is incalculable He unquestionably influenced Velásquez, who knew and admired his work. In his own day his admirers seem to have been intellectuals. Paravicino, the court preacher, was his friend and apologist. Overshadowed by the more popular masterpieces of Velásquez and Murillo, his work became less and less known, especially outside of Spain. It is only in the 20th cent. that he has become widely celebrated. Modern criticism ranks him among the

very greatest artists of the baroque. Splendid examples of his vast production exist in many European and American galleries and collections He is best seen in Toledo, Madrid, and the Escorial. A museum has been devoted to his work in what is said to have been his home in Toledo See study by M. Legendre and A Hartmann (1937); Julius Meier-Graefe, *The Spanish Journey* (Eng. tr., 1927); *The Paintings of El Greco* (with biographical note by Ludwig Goldscheider, 1938)

Greece, Gr *Hellas* or *Ellas*, kingdom (50,147 sq mi ; pop 7,347,002, exclusive of the Dodecanese, acquired from Italy in 1947), SE Europe Athens is the capital Greece occupies the southernmost part of the Balkan Peninsula and numerous islands (9,854 sq mi) in the Ionian and Aegean seas These parts of the Mediterranean wash the Greek mainland in, respectively, the west, south, and east The northern land frontier touches Albania, Yugoslavia, Bulgaria, and Turkey Most of Greece is mountainous terrain, cut by small, rapid rivers with some fertile valleys. Continental Greece is cut into two sections at the Isthmus of Corinth To the north of the isthmus extend the regions of ATTICA, BOEOTIA, S EPIRUS, THESSALY, S MACEDONIA, the CHALCIDICE peninsula, and W THRACE, to the south of the isthmus and the Gulf of Corinth lies the PELOPONNESUS, a peninsula terminating in Cape Matapan At various times in its history Greece included all of Epirus, Macedonia, and Thrace, part of Asia Minor, and MAGNA GRAECIA The largest islands of Greece are EUBOEA, NE of Attica, and CRETE, SE of the Peloponnesus The IONIAN ISLANDS include CORFU, CEPHALONIA, and ZANTE The Greek Archipelago in the Aegean includes THASOS, SAMOTHRACE, LESBOS, CHIOS, SAMOS, and other islands of the SPORADES, the CYCLADES (notably NAXOS, PAROS, and DELOS), and the DODECANESE (notably RHODES) Most of the important cities of modern Greece are situated in the more prosperous north, these are, besides Athens, the ports of Piraeus (part of Greater Athens), Salonica, and Kavalla Patras is the largest city and port of the Peloponnesus Most of the great cities of ancient Greece (Corinth, Sparta, Thebes, Achaea, Argos, Mycenae, Olympia, Messene) have sunk to very little importance Though predominantly agricultural, Greece grows only about half of the food consumed by its poverty-stricken and frugal population Except in Epirus, the "granary of Greece," most crops are for export (tobacco, olives, grapes, and figs), usually in processed form (olive oil, raisins, currants, dried figs, and wine) Thousands of years of intensive sheep and goat raising have helped to erode the soil and make it unfit for farming Greek exports are supplemented by mineral resources (high-grade iron ore, iron pyrites, magnesite, chromite, and emery) and by its sponge fisheries Only lignite is available for Greek industries, which are mostly small, the hydroelectric potential, though great, is as yet little exploited The modern Greek people are only partly descended from the ancient Greeks, having mingled in the course of the ages with the numerous invaders of the Balkans The religion of the majority is Greek Orthodox. The Greek primate is the archbishop of Athens, who recognizes the Eastern patriarch of Constantinople

Ancient Greece This section gives a brief, general account of the history of ancient Greece Important aspects of ancient Greek culture are covered under separate articles—GREEK ARCHITECTURE, GREEK ART, GREEK LANGUAGE, GREEK LITERATURE, GREEK MUSIC, and GREEK RELIGION See also the articles on the cities, e.g., ATHENS, SPARTA, CORINTH, and THEBES Archaeological remains show that Greece had a long prehistory, from at least the New Stone Age By the Bronze Age important cultures had developed The AEGEAN CIVILIZATION had several phases, two of the most important being the MINOAN CIVILIZATION and the MYCENAEAN CIVILIZATION These cultures had disappeared by 1100 B.C Probably well before that time Greek-speaking peoples had been moving into the peninsula from the north and blending with the older population Possibly the Achaeans represented an early wave of the migration The Aeolians and the Ionians, traditional branches of the Greek people, apparently preceded the Dorians, who migrated into Greece before 1000 B C The Ionians, moving forth, possibly as refugees, possibly as conquerors, settled in the Ionian Islands and on the shores of Asia Minor, which became a part of the Greek world. After the Dorian invasion, the peoples of Greece under the influence of the divisive geography developed the CITY-STATE; small units developed into minor kingdoms Homeric Greece was dependent on the agriculture of relatively unproductive fields but was already open to the sea Though the Greeks never rivaled the Phoenicians or the later Carthaginians and Romans as mariners, the sea offered them an opportunity for expansion and commerce In the 8th, 7th, and 6th cent. B C , the Greeks sent out colonies, which became separate city-states, from the Black Sea and the Bosporus (where Byzantium was founded) to Sicily, S Italy, Mediterranean France, the northern shores of Africa, and Spain These colonies (Magna Graecia) had a great influence on the history of the Greek mainland, where the city-states were developing in quarrelsome freedom Because of their independence, the cities developed separately, each in its own fashion The militaristic Sparta was thus unique in its constitutional and social development. Elsewhere there was a general pattern of development, varied with each particular instance The monarchies yielded to aristocracies, which were in turn replaced by tyrants, who usually gained power by espousing the cause of the underprivileged peasants and merchants and by the use of force Though usually the tyrants tried to establish dynasties, the bold established by their families did not long persist Peisistratus, Hipparchus, and Hippias in Athens and the later Gelon, Dionysius the Elder, and Dionysius the Younger in Sicily were typical examples of tyrants On the Greek mainland the tyrannies soon yielded to oligarchies or to democracies tempered by limited citizenship and slaveholding, it was in Greece that the idea of political democracy came into being The warring city-states had a sense of unity, all considered themselves as Hellenes, and religious unity gave rise to leagues known as amphictyonies, notably the great amphictyony centered at Delphi The celebration of common contests such as the Olympic games also fostered unity. But as the expanding Persian Empire threatened to engulf Greece, the Ionian cities in Asia Minor when they revolted against Persia in 499 B C got little help from Greece, and the mainland cities were but poorly united in the PERSIAN WARS that lasted until 449 B C Out of the successful war, however, came the powerful surge of Greek civilization. Athens, in particular, with the support of the DELIAN LEAGUE as the basis of an empire, developed into glory and in the age of Pericles flowered into a culture that left its mark on all succeeding ages Drama and poetry, art, architecture, and philosophy flourished then and vigorous intellectual life was so well founded that it continued long after political misfortunes This was the true Hellas, the fountainhead of Western civilization A catalogue of the great in Greece of those times would be a list of names familiar to schoolboys in the present day, among them Aeschylus, Sophocles, Euripides Aristophanes, Phidias, Socrates, Plato, Aristotle Though Athens succumbed in the PELOPONNESIAN WAR (431–404 B C) and grim Sparta triumphed briefly before continued fighting gave the hegemony to Corinth and to Thebes the civilization that had been created lived on When PHILIP II of Macedon fell upon the warring city-states and won Greece by conquering Athenians and Thebans in the battle of CHAERONEA (338 B C), his military leadership only paved the way for his son ALEXANDER THE GREAT, to spread Greek civilization over the known Western world and across Asia to India The great days were, however, past, and the empire of Alexander was torn apart by his warring generals after his death (see DIADOCHI, PTOLEMY I, SELEUCUS I, ANTIGONUS I, DEMETRIUS I) in the period from 323 to 276 B.C Some Greek cities formed the AETOLIAN LEAGUE to shake off Macedonian rule, but others in the ACHAEAN LEAGUE took the Macedonian side The Greek city-states continued to nurse their ambitions and rivalries, while Macedonia under the Antigonids became thoroughly Hellenized Incessant warfare weakened Greece more and more, while the power of Rome was rising In 146 B C the remnants of the Greek states fell definitively into the hands of Rome, and Greece was thereafter a backwater in the Roman Empire The cities long retained a measure of independence but lost political and economic importance Hellenism, however, had triumphed, and the intellectual supremacy continued for many centuries The Byzantine Empire was thoroughly Greek in origin, and the HELLENISTIC CIVILIZATION, though it centered elsewhere, spread Greek influence and handed the Greek heritage to later ages The Greeks were the first to write narrative secular history, and the works of HERODOTUS, THUCYDIDES, XENOPHON, and POLYBIUS are basic sources of knowledge as well as classics of world literature. The histories of Greece by George Grote (rev ed , 12 vols., 1906), Ernst Curtius (Eng. tr., 5 vols , 1892), and Adolf Holm (Eng tr , 4 vols , 1894–98) were long standard and remain useful J B Bury, *The History of Greece to the Death of Alexander the Great* (rev ed , 1913), is still standard See *The Cambridge Ancient History* Vols II-IX (1924–32), Michael Rostovtseff, *A History of the Ancient World*, Vol I (2d ed , 1930), G L Dickinson, *The Greek View of Life* (1925), A E Zimmern, *The Greek Commonwealth* (rev ed., 1931), M Cary, *A History of the Greek World from 323 to 146 B C* (1939), W. W Jaeger, *Paideia* (Eng tr , 3 vols , 1939–45)

Medieval and modern Greece. From the division (395 A D) of the Roman Empire into East and West, until the conquest (15th cent) of Greece by the Ottoman Turks, Greece shared the fortunes and vicissitudes of the BYZANTINE EMPIRE The victory (378) of the VISIGOTHS over Emperor Valens at Adrianople marked the beginning of the frequent barbarian invasions of Greece, the Huns, Avars, Slavs, and Bulgars followed, leaving devastation behind them. Greek power and prestige were restored by the Macedonian dynasty of Byzantine emperors (867–1025), however, the center of the Greek world was CONSTANTINOPLE, not Greece proper, which ever since the Roman conquest had been reduced to a provincial status. In the 11th cent. began the Turkish inroads into the empire, the Norman attacks on Epirus, and the age of the CRUSADES. The Fourth Crusade led (1204) to the temporary disintegration of the Byzantine Empire and the creation of a feudal state (see CONSTANTINOPLE, LATIN EMPIRE OF) under the rule of Flemish, Flemish, and Italian nobles and of Venice The restored Byzantine Empire (1261–1453) recovered only parts of Greece, most of which continued under the rule of French and Italian princes until its conquest by the Turks (completed in 1456) Venice retained Crete until 1669 and the Ionian Islands until 1797, in its numerous wars with Turkey it also held Athens, Euboea, and several other ports and islands for brief intermittent periods prior to 1718 Under the OTTOMAN EMPIRE, Greece was merely one of the many exploited territories of the sultans The Turks practiced a policy of religious tolerance, but otherwise their regime was grasping and oppressive Many Greek families (notably the PHANARIOTS) played an important part in the administration of the empire, and the Greek merchants living in Constantinople and in the ports of Asia Minor (notably SMYRNA) knew much prosperity; but Greece itself sank into obscurity and poverty In the early 19th cent Greek dreams of independence revived and were stimulated by the growing spirit of nationalism, by the influence of the French Revolution, by the Turkish reverses in the Russo-Turkish Wars, by the rebellion of ALI PASHA, and by the sympathetic attitude of Alexander I of Russia, whose foreign minister, CAPO D'ISTRIA, was a Greek In 1821 the Greek War of Independence began under the leadership of Alexander and Demetrios YPSILANTI The rebellion was unsuccessful at first, but European sentiment was overwhelmingly in favor of Greece Financial aid poured in, and many foreign volunteers (of whom Lord BYRON was the most celebrated) joined the Greek forces Russia and England agreed (1826) to mediate between the Greeks and Turkey, and in 1827 the Greek political factions set aside their bitter rivalries to elect Capo d'Istria president of Greece In the same year England, Russia, and France joined in demanding an armistice. Turkey having refused, the allied fleet attacked and defeated the fleet of MOHAMMED ALI, viceroy of Egypt and the sultan's chief supporter against the Greeks, in the battle of Navarino Only Russia, however, declared war on Turkey (1828, see RUSSO-TURKISH WARS) Defeated, Turkey accepted the Treaty of Adrianople (1829) and recognized Greece as an autonomous principality In 1832 Greece obtained recognition of its complete independence by the European powers and a northward extension of its border Civil war had broken out in 1831 after the assassination of Capo d'Istria, but in 1832 the powers chose, and Greece accepted, a Bavarian prince as king of the Hellenes OTTO I was authoritarian and unpopular He was deposed (1862) and a Danish prince was chosen (1863) as King GEORGE I A democratic constitution was immediately introduced, and in 1881 Greece acquired Thessaly and part of Epirus Nationalist agitation in favor of a Cretan insurrection against the Turks led to the Greco-Turkish War of 1896–97, Greece was defeated, but because of the pressure of the powers Crete was eventually made independent and later (1913) incorporated into Greece VENIZELOS and ZAIMIS were the outstanding Greek political figures in the following decades In the BALKAN WARS (1912–13) Greece obtained SE Macedonia and W Thrace, the frontier with newly independent ALBANIA gave a larger part of Epirus to Greece but failed to satisfy either Greece or Albania and has remained in dispute King CONSTANTINE favored neutrality in the First World War, but the pro-Allied Venizelos negotiated (1915) an agreement allowing the Allies to land troops at Salonica (see SALONICA CAMPAIGNS). Constantine, however, refused to join the Allies fully, dismissed Venizelos, and incurred an Allied blockade of Greece. In 1916 Venizelos organized a rebel government at Salonica, and in 1917 Constantine abdicated in favor of his younger son, ALEXANDER Venizelos replaced Zaimis as premier, and Greece fully entered the war At the peace conference (see NEUILLY, TREATY OF, and SÈVRES, TREATY OF) Greece was rewarded with the Bulgarian coast on the Aegean and with what remained of European Turkey except the Zone of the Straits The district of Smyrna was placed under Greek administration pending a plebiscite Encouraged by the Allies, the Greeks invaded (1921) Asia Minor, but were resoundingly defeated (1922) by the Turkish nationalist forces under Kemal ATATURK The Treaty of Lausanne (1923) restored the Maritsa river as the Greco-Turkish frontier in Europe A separate agreement provided for the compulsory exchange of populations Under the supervision of a League of Nations commission nearly 2,000,000 Greeks of

Asia Minor were settled in Greece, and c 800,000 Turks and 80,000 Bulgarians left Greece and were resettled in their respective countries Constantine, who had returned after the death (1920) of King Alexander, was again deposed in 1922 GEORGE II succeeded him only to be promptly expelled himself (1923), and in 1924 a republic was proclaimed The years 1924–35 were a period of violent political strife, coups d'état, and countercoups, in which KONDOURIOTIS, PANGALOS, Panayoti TSALDARIS, Zaimis, and Venizelos were the chief protagonists, it culminated in the unsuccessful rebellion (1935) of the Venizelists in Crete Their defeat marked the death of the republic General KONDYLIS ousted Tsaldaris and arranged for a plebiscite which brought about the return of George II (the republicans abstained from voting) Within a year a dictatorship was set up under Premier METAXAS, who was fully supported by the king In its foreign relations, Greece had abandoned its anti-Turkish policy in 1934 by entering the BALKAN ENTENTE with Yugoslavia, Rumania, and Turkey When the Second World War broke out (1939) Greece remained neutral In Oct , 1940, however, Italy (since 1939 in possession of Albania) charged Greece with mistreatment of its Albanian minority and, after a farcical ultimatum, invaded Greece The Greeks resisted successfully, carrying the war into S Albania When Germany began to gather troops on the Greek borders in Rumania and Bulgaria, Greece allowed the landing of a British expeditionary force in March, 1941 In April, Germany attacked Yugoslavia and Greece By April 27 the Greek mainland was in German hands, and by May 30 Crete had also fallen The Greek government fled to Cairo, then to England, and in 1943 settled in Cairo German occupation, in which Bulgarian and Italian troops shared, plunged Greece into abject misery Resistance grew despite the most ruthless reprisals, the successive puppet governments set up by the Axis were failures Guerrilla bands controlled large rural areas, but late in 1943 sporadic civil war broke out between the leftist guerrilla group (ELAS) and the rightist one (EDES) The guerrillas held most of Greece after the Germans had begun to evacuate their forces in Sept , 1944 British troops landed, and by November all Germans were expelled The appalling financial and economic conditions faced by the Greek government on its return to Athens were complicated by an explosive political situation The return of George II was postponed pending a plebiscite, but in Dec , 1941, fighting broke out between the British troops and the ELAS, which refused the British order to disarm Eventually, upon the personal intervention of Winston Churchill, an uneasy truce was made and a regency established under Archbishop Damaskinos of Athens While cabinets replaced each other in rapid succession, guerrilla fighting went on all over Greece In the northern mountain districts Communist-led bands waged successful warfare and eventually (1947) proclaimed a rival government The charges by the Greek government, supported by Britain and the United States, that Albania, Yugoslavia, and Bulgaria were aiding the rebel army created a violent controversy in the United Nations between the Western and the Soviet blocs In Sept , 1946, a plebiscite decided for the return of George II, who died in 1947 and was succeeded by his brother PAUL As the civil war continued and Great Britain was unable to extend further financial and military support to the Greek government, U S President TRUMAN announced (March, 1947) the "Truman Doctrine," by which the United States gave Greece $300,000,000 in military and economic aid and sent a group of officers to advise the Greek army By 1949 the rebels had suffered severe setbacks The war was marked by brutality on both sides Economic conditions were depressing, and charges of incompetency and corruption were hurled against the Greek government from non-Communist as well as Communist quarters Much was done, however, by the Red Cross and by relief agencies to bring some temporary comfort to the starving refugees from civil war areas and to the miserable and diseased orphans left by the Second World War and the civil war Political freedom was necessarily somewhat curtailed The unicameral legislature, dominated by the Populist (royalist) party of Constantine Tsaldaris, operated under the constitution of 1911, which it was empowered to revise The Communist party was outlawed See George Finlay, *History of Greece from Its Conquest by the Romans* (7 vols , 1877), W A Philips, *The War of Greek Independence* (1897), William Miller, *A History of the Greek People* (1922) and *Modern Greece* (1928), N S Kaltchas, *Introduction to the Constitutional History of Modern Greece* (1940), E S Forster, *Short History of Modern Greece* (2d ed , 1946), *Report on the Greeks* (pub by the Twentieth Century Fund, 1949)

Greek Anthology, collection of Greek epigrams or short poems, which, in its latest form, includes poetry representing every period of Greek literature to the decadence of Byzantium Meleager made (probably between 90 and 80 B C) a collection of epigrams which he called the *Garland* Later Philip of Thessalonica (1st cent. A D), Agathias (6th cent) and others made additions or new collections Early in the 10th cent Constantius Cephalas made a compilation which is known as the *Palatine Anthology* because the sole manuscript was found in the library of the count palatine in Heidelberg. In the first half of the 14th cent a monk, Planudes Maximus, rearranged this collection and made additions while leaving out many epigrams This Planudian version was used until the *Palatine Anthology* was rediscovered in 1606 See J A Symonds, *Studies of the Greek Poets* (3d ed , 1893)

Greek architecture arose on the shores of the Aegean Sea Palaces of the MINOAN CIVILIZATION remain at Cnossus and Phaestus, Crete Of the later MYCENAEAN CIVILIZATION, remaining examples are the Lion's Gate at Mycenae and palaces at Mycenae and Tiryns When the Dorians migrated into Greece (before 1000 B C) true Hellenic culture commenced, and the architecture which eventually developed seems to have borrowed little or nothing from the preceding local civilisations The Dorians either brought their other building forms from areas of Europe or from Asia or created them in Greece with such rapidity that between the 10th and the 6th cent B C a definite system of construction was established However, prior to the creation of the great marble temples of the 5th cent , there were undoubtedly evolutionary stages in which walls were of sun-dried bricks and roofs, columns, and uprights were of wood The Heræum at Olympia, considered the most ancient temple yet discovered, is illustrative of such a stage and also, in later alterations to it (700 B C), of the beginnings of the Doric temple of stone Of the three great styles or ORDERS OF ARCHITECTURE (Doric, Ionic, and Corinthian), the Doric was the earliest and the one in which the noblest monuments were erected Between 700 B C and the Roman occupation (146 B C), all the chief works were produced The period in which all true masterpieces were erected extended from 480 B C to 323 B C , it includes the reign of Pericles, in which the architects Callicrates, Mnesicles, and Ictinus flourished and in which the PARTHENON and other great works were produced The products of the following Hellenistic period shows a decline from the Athenian tradition and reveal Asiatic influences. The Greeks had their masonry without mortar but with joints cut to great exactness Marbles were not generally used until the 5th cent B C Where coarse stonework or crude bricks were used, a coating, composed of marble dust and lime and rubbed and highly polished, was applied to them. Even marble itself was sometimes so treated Though Greek buildings long were thought to have been the unbroken white of the marble, colors and gilding were customarily applied for emphasizing decorative sculpture and certain details, and remaining traces of these have been found Having found in the simple column and lintel an adequate method of construction, they used it exclusively, drawing from it the maximum of dignity and beauty Of the principle of the triangular truss they remained entirely ignorant For the origin of the DORIC ORDER there are many theories The great remaining examples of the 6th cent B C are found chiefly in Sicily and at Paestum in Italy After 500 B C the archaic features of the Doric disappeared, harmonic proportions were achieved, and the final exquisitely adjusted type took form at Athens, in the Hephaesteum (465 B C), the Parthenon (447–432 B C), and the Propylaea (437–432 B C) The Greek colonies of the Asia Minor coast had evolved their own special order, the IONIC ORDER, stamped with Oriental influences This style appeared in temples in Greece proper after 500 B C , challenging with its slenderly proportioned columns and carved enrichments the supremacy of the simple, sturdy Doric The most magnificent Ionic temples were those at Miletus In Greece proper the Ionic appeared in but one temple of first importance, the ERECHTHEUM at Athens, and otherwise was restricted to minor buildings, as the temple of Nike Apteros, Athens (438 B C), and to interiors as in the Propylaea, Athens The third Greek order, the still more ornate CORINTHIAN ORDER, appeared in this period, but was little used The chief examples, both at Athens, are the choragic monument of Lysicrates (c 335 B C) and the Tower of the Winds (100 B C –35 B C) Greek cities were often built in the vicinity of a steep hill called an acropolis, which served as a citadel and upon which the principal temples were located for safety, the Acropolis at Athens being the most celebrated example Throughout Greece numerous temples existed Many illustrated the most rudimentary temple type—a simple rectangular chamber called naos, the side walls extending to the front to form terminations for an open entrance porch containing two columns This loggia was sometimes repeated at the other end The next stage was the forming of free-standing porticoes, then a continuing of columns, flanking sides and ends, the naos thus being completely surrounded by a colonnade This type was termed peripteral and was exemplified in most of the important monuments of the great period. In dipteral temples the surrounding colonnade was doubled. Into these few general types minor variations were introduced, relating mainly to the number of columns and their disposition No public mass worship took place within the temples, the naos being designed primarily to house the statue of the deity The structures of the culminating period are unique for the subtle proportionings and refinements of all the members, which are integrated into a superbly adjusted whole To prevent an appearance of sagging, as in the temple platform (stylobate), or of concavity, as in the outlines of columns, subtly curved or slanting lines were substituted for straight or vertical ones and served as optical corrections To insure the desired proportions and delicate relationships, a body of traditional formulas was accumulated, using mathematical and geometrical devices The Greeks built, also, monumental tombs, agorae or public meeting places, stoae or colonnaded shelters, stadiums, palaestrae or gymnasiums for athletic training, propylaea or entrance gateways to cities, and open-air theaters After the passing of power from Athens and Sparta to Asia Minor with its prosperous cities, such as Ephesus and Miletus, the pure traditions of the mainland were lost Hellenistic architecture thus arose (4th–3d cent B C), with florid and opulent elements and rather complicated planning and design City planning, ignored by the mainland Greeks, was cultivated by the Hellenistic architects, among them Hippodamus, from them the Romans doubtless acquired their concepts of monumental civic design

Greek art. The Aegean basin was a center of artistic activity from early times (see AEGEAN CIVILIZATION) Two great cultures—the MINOAN CIVILIZATION and the MYCENAEAN CIVILIZATION—had flowered into complex and delicate art forms Before 1000 B C , invasions of Dorians and other barbarian tribes from the north laid waste the earlier Aegean cultures Although there was probably a transition from the Mycenaean phase and a continued play of Mediterranean influences, the nature of these and the role of the invaders in establishing the foundations of Greek art remain a subject of controversy Certainly the pottery of the period from c 900 B C to 700 B C with its completely abstract, mathematical systems of design already displayed a kind of simplicity and rationality of composition which was to be distinctive of Greek art throughout its development Between 700 and 600 B C this geometric style gave way to new interest in representation, and Oriental influence encouraged the use of floral and arabesque designs During the archaic period (c 625–480 B C) sculpture definitely emerged as a principal form of artistic expression Dating from the beginning of this period are magnificent statues of nude walking youths, *kouroi*, which suggest Egyptian prototypes but which are distinctive in stylization and tension of movement (e g , *Kouros* Metropolitan Mus), and draped female sculptures which suggest Near Eastern influence (e g , *Hera of Samos*, Louvre) Of later date are many statues of youths and maidens, principally to be found in the Acropolis Museum, Athens, and the groups of figures from the pediments of the temple of Aphaia at Aegina, which reveal an increased concern with the expression of anatomical structure and greater refinement of surface detail Vase painters depicted mythological scenes and, towards the end of the archaic period, many scenes from contemporary life Outstanding was the Athenian school of black-figured vase painting led by Exekias (e g , amphora by Exekias, Vatican) The appearance of the red-figured style of vase painting, c 525 B C , showed increased concern with the rendering of three-dimensional space and naturalistic detail Euthymides and Euphronius were among the great early masters in this medium (e g , cup by Euphronius, Louvre) About a generation later masterpieces were produced by the painters Brygos and Duris As this style developed throughout the 5th cent there was an increasing tendency toward representational illusion In the early classical or transitional period (c 480–450 B C) a new humanism began to find its aesthetic expression in terms of a perfect balance between verisimilitude and abstraction of form The largest surviving single group of sculpture is from the temple of Zeus at Olympia Although certain conventions in rendering hair and draperies persist from the archaic period, the magnificent marble figures from the pediments reveal a new kind of insight into the structure of the human figure A rare surviving work in bronze is the famous *Charioteer* (museum, Delphi) The height of the classical period or Golden Age (c 450–400 B C) was the time of Pericles and Thucydides, of the great dramatists Sophocles and Euripides, and of the young Socrates The aesthetic ideal based on the representation of human character as an expression of a divine system embodying a rational ethic and ordered reality was integral to the culture Polycletus sought to arrive at a rational norm for the structure of the ideal human figure Roman imitations of his sculptures give some notion of this ideal The most magnificent original sculptures from this period are those from the temples of

the Athenian Acropolis Earliest of these are the Parthenon sculptures including the frieze representing the Panathenaic procession and the pedimental sculptures, most of which are now in the British Museum The sculptors are anonymous, but Phidias is believed to have been the inspiring genius although he himself is known to have executed only a gigantic gold and ivory statue of Athena that once stood in the cella of the temple Somewhat later in date are the sculptures of the Hephaesteum, the Erechtheum, and Nike Balustrade In the late classical period (400–300 B C) there was increased emphasis on emotion Works attributed to Praxiteles are characterized by elegance of proportion, graceful beauty, and sensuous differentiation of textures Powerful emotional effects are typical of the sculpture in the style of Scopas, and a new feeling for individualization and three-dimensional movement appeared in the art of Lysippus Between 500 and 300 B C there flourished an abundance of great artistic personalities Other sculptors of the period were Myron, Cresilas, Timotheus, and Bryaxis, and the painters included Polygnotus, Apollodorus, Zeuxis, Parrhasius, and Apelles Aside from literary references, little is known about the actual work of these men The style of the sculptors is adduced from fragments and Roman copies Even less is known about the painters From the vase paintings some reconstruction of the Greek school of mural painting is possible With the conquests of Alexander the Great, Greek art entered its last great phase, the Hellenistic period The importance of Athens gradually declined, and cultural centers rose at Pergamum, Rhodes, and Alexandria Masterpieces of this period include the *Victory of Samothrace* and *Aphrodite of Melos* (both Louvre) and the *Pergamum Frieze* (formerly in the Berlin Mus) Especially charming among the minor arts are terra-cotta figurines from Tanagra (Boeotia) These characteristically represent common human types, emotions, and experiences Marked tendencies towards heightening spatial illusionism are revealed in sculpture and, to judge from Roman copies, prevailed also in painting (e g , *Odyssey Landscapes*, Vatican) About 100 B C began the transition from Greek to Roman art The famous statue *Laocoön and His Sons* (Vatican) seems already to embody a kind of physical realism more Roman than Greek in flavor Although the artistic culture of Greece declined at this time, its influence was of paramount importance during the Roman and Byzantine periods, and it has continued to be an inspiring force throughout the history of Western culture See Gisela Richter, *Sculpture and Sculptors of the Greeks* (1930), J D Beazley and Bernard Ashmole, *Greek Sculpture and Painting* (1932)

Greek Church see ORTHODOX EASTERN CHURCH

Greek fire, inflammable substance, a "liquid" fire, said to have been invented by Callinicus of Heliopolis, who, at Constantinople in the reign of Constantine Pogonatus, used it to set fire to enemy ships Its use by the Byzantine Greeks was common in the early Middle Ages, but its chemical nature is not definitely known Apparently it contained sulphur and various easily inflammable materials together with some other substance, e g , lime, which reacts with water, enough heat being evolved to raise the temperatures of the other materials to the kindling point

Greek language, Indo-European language Modern Greek is derived from the standard Greek (or Koine) of the Hellenistic world The New Testament is written in a form of this See LANGUAGE (table)

Greek-letter society see FRATERNITY

Greek literature, ancient European literature begins in Greek literature, and Greek literature begins in HOMER The *Iliad* and the *Odyssey* became the greatest unifying influence in Greek life There were other epic poems, which have been lost, but the works of HESIOD, first didactic poet, are in epic form The so-called *Homeric Hymns* are dated 800–500 B C Only fragments remain of most Greek poets, as of the elegiacs CALLINUS, TYRTAEUS, THEOGNIS, SOLON, PHOCYLIDES, XENOPHANES, SEMONIDES OF AMORGOS, ARCHILOCHUS, and HIPPONAX The most personal Greek poetry is the lyric of ALCAEUS, SAPPHO, and ANACREON The Dorian lyric for choral performance, developed with ALCMAN, IBYCUS, and STESICHORUS, came to fruition in PINDAR and SIMONIDES and the lesser BACCHYLIDES Out of the song and dance in the ceremonies honoring Dionysus at Athens came the drama It is remarkable that within a century TRAGEDY had grown from a mere dithyrambic chorus to the flowering of dramatic genius in three of the greatest tragedians the world has known—AESCHYLUS, SOPHOCLES, and EURIPIDES Those of their tragedies that survive are a part of living literature today. The same is true of ARISTOPHANES, the greatest exponent of the Attic Old Comedy. Other names are connected with his (notably Cratinus and Eupolis), but little is known of them. The rowdy horseplay of these dramas gave way to the more sedate and decent Middle Comedy and finally to the New Comedy, which set the form of comedy for the rest of literary history, the best-known name of Greek Middle Comedy is Menander History writing also came into organic being in Greece with the rich and diffuse work of HERODOTUS, the precise and exhaustive accounts of THUCYDIDES, and the rushing narrative of XENOPHON Philosophy also reached a peak in the brief flowering of Athenian literature, the works of PLATO and ARISTOTLE have had almost incalculable effect in the shaping of the thought of the Western world Somewhat less in its effect on modern thought but of immense importance in ancient times was the ORATORY of Greece Among the celebrated orators were ANDOCIDES, LYSIAS, ANTIPHON, ISOCRATES, ISAEUS, AESCHINES, and the greatest of them all—DEMOSTHENES "Classical" Greek literature is said to end with Aristotle and Demosthenes (4th cent B C) All of the best classical writers have certain common characteristics economy of words, simple directness and moderation of expression, subtlety of thought, fresh enthusiasm, and attention to form The next period of Greek literature was at its height in Hellenistic Alexandria, where literature was a profession There were many philosophers, critics, dramatists, poets, historians, and some verbose librarians In general, specialization of learning resulted in many works that have no appeal for the modern reader except the scholar Many of the works were imitative, some were vulgar Yet today Hellenistic literature is held in much higher esteem than it was by the humanists of the Renaissance and their successors The poems of CALLIMACHUS, the bucolics of THEOCRITUS, and even the panting epic of APOLLONIUS RHODIUS are recognized as major works of world literature The production of literary works just before and after the birth of Christ was enormous, but artificiality and self-conscious aesthetic predominated in poetry and drama, and pedantry supplanted thought in most of the learned works The dominance of Rome in the ancient world did not end Greek literature but did dim it To be sure, there were great names—the historians POLYBIUS, JOSEPHUS, and DION CASSIUS, the immortal biographer, PLUTARCH, the philosophers PHILO and DION CHRYSOSTOM, and the novelist LUCIAN—yet the conscious cultivation of Greek writing in general produced works that seem strained and unreal, with one great exception in the philosophical meditations of Marcus Aurelius With Christianity, Greek writing took a new turn, and much of the writing of the Greek Fathers of the Church is eloquent Religion dominated in the literature of the Byzantine Empire, a vast treasury of writing that is not generally well known to the West with the exception of some historians (e g , PROCOPIUS, ANNA COMNENA, George ACROPOLITA, and Emperor JOHN VI) and some anthologists (e g , PHOTIUS) The series of the Loeb Classical Library offers text and translations of most of the extant ancient Greek literature See G Lowes Dickinson, *The Greek View of Life* (7th ed , 1925), A W Pickard-Cambridge, *Dithyramb, Tragedy, and Comedy* (1927), Gilbert Norwood, *Greek Comedy* (1930), H D F Kitto, *Greek Tragedy* (1939), Werner Jaeger, *Paideia* (Eng tr , 3 vols , 1939–44), H J Rose, *Handbook of Greek Literature from Homer to the Age of Lucian* (3d ed , 1948), Moses Hadas, *A History of Greek Literature* (1950)

Greek literature, modern Under Turkish rule, Greek literature virtually ceased, except in Crete The founding of the revolutionary society Philike Hetairea in the beginning of the 19th cent , however, furnished not only the intellectual cadre for the War of Independence but the pioneers of the post-war nationalist revival which awakened a modern Greek literature Adamantios Korais or Coraïs (1748 1833), one of the patriotic intellectuals, created a literary style more heavily indebted to the classical Greek than to the living language of his time But the Greeks had been so completely cut off from their classical tradition by centuries of Turkish occupation and the successful revolution had created such a militant pride in the new nation that there were many champions of a demotic literary style Throughout the rest of the 19th cent and into the 20th, the reformed classical and the demotic styles were each upheld by uncompromising adherents, a controversy which was high-lighted by a riot in Athens (1901) over the publication of a vulgate translation of the New Testament Alexandros RANGABE was the outstanding literary figure of the classical trend, a poet and dramatist, he also wrote the first important history of modern Greek literature Demetrios Vernadakis (1834-1907) and Spyridon Vasiliadis (1845-74) were 19th-century dramatists who wrote romantic plays in classical speech forms The demotic style, however, won increasing acceptance in all the literary genres This was particularly true in poetry, which has flourished above all other forms in modern Greek literature—in the beginning as celebrations of the heroic exploits in the revolution but later chiefly lyric The verse of the Ionian poets in the middle and late 19th cent —the works of Dionysios Solomos (1798–1857), whose "Ode to Liberty" became the lyrics of the national anthem, Andreas Kalvos (1796–1869), Andreas Lascaratos (1811–1901), and Aristotle Valaoritis (1824–79)—freely used the vernacular Stephen Martzokis (1855 1913), a disciple of the Ionian school, and Konstantinos Hadzopoulos (1868-) composed lyrics in the popular idiom The early works of George Drossinis (1859–) and Kostes PALAMAS, the outstanding Greek poets of recent times, were written in the classical style, but both came to express themselves in modern Greek, Drossinis winning great popularity among the people and Palamas receiving the greater acclaim from the critics at home and abroad The trend to free verse, represented by Angellos Sikelianos (1884–), rests on the demotic style In prose the plays and short stories of Ioannis Psichare (1854–1929) firmly established the use of the vernacular, and the short stories of Alexandros Papadiamitis (1851–1911) and Argyris Eftaliotis (1849–1924) expressed indigenous themes in the language of the people The demotic style has also been favored by the principal modern dramatists, including the naturalists Ioannis Kambisis (1872–1902), Spyros Melas (1880-), and Gregorios Xenopoulos (1867–), and the symbolist Demetrios Tangopoulos (1867–1926) For translations, see Rae Dalven, ed , *Modern Greek Poetry* (1949)

Greek music The music of ancient Greece was evidently a highly developed art Although there exists a plethora of literary, philosophical, and theoretical treatises concerning it, only about a dozen musical examples are extant, most of which originated after 440 B C , when the classical period of Greek music came to an end The earliest Greek music was associated with and inseparable from poetry and dancing It was entirely monodic, there was no harmony as we understand the term Its melodic system was based upon the modes (see MODE) Music was believed, according to the doctrine of ethos, to have emotional and moral influence, and each mode was associated with definite types of emotion A discussion of the moral significance of music is to be found in the third book of Plato's *Republic* The chief instruments were the aulos (a wind instrument of the oboe type), associated with the cult of Dionysius, and the KITHARA, associated with the cult of Apollo Two systems of notation, a vocal notation and an instrumental notation, were employed, both using letters and both decipherable today, largely because of the *Introduction to Music* of Alypius (A D c 360) Early in Greek music's history it was given a physical basis Pythagoras is usually given credit for a large share of the application of science to music, but his exact contribution is not known Lasus of Hermione (c 500 B C) discovered that vibration is the cause of sound The outstanding musical theorist was ARISTOXENUS OF TARENTUM See Curt Sachs, *The Rise of Music in the Ancient World* (1943), P H Lang, *Music in Western Civilization* (1941)

Greek religion The sources and history of Greek myth are the subject of much argument and conjecture Religious beliefs in ancient Greece were complex and often contradictory There was a basic animism, with reverence for river-gods, sea-gods, nymphs, gods and goddesses of fertility, and disembodied demons (both universal natural powers and particular tutelary spirits) This was, however, complicated by the confusion of local deities, who were roughly identified with corresponding deities of other places and confounded with them As time went on and the literary treatment of the myths was intensified, systematization occurred and a certain straining of identification took place, creating further contradictions Moreover, as in most polytheistic systems, certain cults (notably the Great Mother of the Gods) were imported knowingly Even in the time of Homer, when the gods were pictured anthropomorphically, there was no question of ethics or morals as applied to, or dictated by, these supernatural beings The cult of the hero, particularly the eponymous hero who is the ancestor of a family, a group, or a whole people, was known from the earliest times In popular religion the hero to a certain extent remained only a ghost, a revenant to inspire fear in the living, but in the expanding cults the heroes and the gods became inextricably mixed in legends, as did nymphs and river-gods The characteristics and stories of the great gods were drawn from many sources, some stemmed from the worship of the Greeks before they invaded the peninsula from the north, some came from the Minoan and Mycenean civilizations, some were brought in from Asia and Egypt The chief and the ruler of the gods in the more or less regularized system was ZEUS He was surrounded by the other great gods, who were thought of as living on the top of Mt Olympus (or sometimes in the air above it) but free to wander about the world at will There were many, among them HERA (Zeus' wife), APOLLO, ARTEMIS, ARES, HERMES, APHRODITE, ATHENA, POSEIDON, and DEMETER These were the Olympian gods There were also chthonian or underworld gods, who were worshiped with libations, often poured out at night to assuage the dark powers of the underworld and death—for the domain of the departed spirits was Hades beneath the earth, the abode of Pluto and

his wife, Persephone Persephone was the daughter of the corn goddess, Demeter, and the connection of the underworld with the growth, death, and resurrection of vegetation gave rise to one of the most important of religious developments, the ELEUSINIAN MYSTERIES There were other mysteries as well (e.g., the Orphic Mysteries), and the worship of DIONYSUS was connected with them Though Athena was the goddess par excellence of Athens, the greatest festival there was that of Dionysus The mysteries were important for their strong ethical and moral teachings. Unlike most of the priests and priestesses of the local temples, the priests of the mysteries occupied an exalted place. So did the priests and priestesses of the great oracles (see ORACLE), such as those at Delphi and Dodona By the 5th cent B C literal belief in the gods had begun to fade in the minds of the educated but at that time emerged the dematerialization of the gods into great forces that enabled philosophers and poets to picture a cosmos in which moral struggle was paramount The ideas of crime, guilt, retribution, punishment, and the goals of the good life were expressed in the great Greek dramas The development of philosophic systems replaced the old simple myths, though among the peasantry the simple customs and FERTILITY RITES continued See MYTH See W W Hyde, *Greek Religion and Its Survivals* (1923), Martin P Nilsson, *History of Greek Religion* (Eng tr, 1925) and *Greek Popular Religion* (1940)

Greek revival: see CLASSIC REVIVAL

Greeley, Horace, 1811–72, American newspaper editor, founder of the New York *Tribune*, b Amherst, N H His irregular schooling, ending at 15, was followed by a four-year apprenticeship (1826–30) on a country weekly at East Poultney, Vt When the paper failed, he went briefly to Erie co, Pa, where his impoverished farming family had moved In Aug, 1831, he came to New York city, worked as a newspaper compositor, and in Jan, 1833, opened a job printing office in partnership with another printer Greeley's great interest in public questions led him to found (1834), with a new partner, the *New Yorker*, a weekly journal "devoted to literature, the arts and sciences," which he edited ably but unprofitably for seven years He supplemented his income by writing regularly for the *Daily Whig* and by editing Whig campaign sheets, the *Jeffersonian* in 1838 and the *Log Cabin* in 1840 His success in political journalism cemented Greeley's friendship with Thurlow WEED and William H SEWARD, Whig leaders in New York state, and with their encouragement he issued the first number of the New York *Tribune* on April 10, 1841 He edited this paper for over 30 years; during much of that time it was the greatest single journalistic influence in the country Actually, there were three *Tribunes* The *Daily Tribune* was published every morning and evening except Sunday (with the Civil War there also came Sunday issues) In Sept, 1841, Greeley converted the *New Yorker* into the *Weekly Tribune*, and in 1842 he also began the *Semi-Weekly Tribune*, which stressed literary matters more than the other editions did All three, however, carried the same editorials, and Greeley alone shaped the editorial policy. From the first Greeley's object was to provide for the laboring classes a paper which should be as cheap as those of his rivals, but cleaner and more intelligent Sensational police news and objectionable medical advertising were eliminated from the *Tribune* Greeley's chief editorial assistant for 15 years after 1846 was Charles A DANA, the first managing editor on any American newspaper Beginning in 1849 George RIPLEY conducted for 30 years the first regular literary and book review department in a U S newspaper Other talented men also joined Greeley's staff (he was the first editor to allow by-lines), but his own clear, timely, vigorous editorials were the feature which made the *Tribune* known and quoted throughout the nation. Although Greeley styled both himself and his paper Whig, they were conservative only in so far as they thundered for a protective tariff Other causes that Greeley promoted were hardly Whig-inspired. He advocated the organization of labor and led the way by organizing *Tribune* printers New York printers elected (1850) him the first president of their chapel, the first in the nation, the "Big Six," as it later came to be known He also believed that a successful business should share its profits and ownership with its employees, and this practice was naturally observed on the *Tribune* He advocated temperance and a homestead law because he felt that these too would elevate the condition of labor He supported woman's rights and opposed all monopoly, including large land grants to railroads, which he felt would lead to monopoly. He gave space in his paper to Fourierism when that movement was at its height and sponsored several experiments in cooperative living, including, later, the colony named for him at GREELEY, Colo Even Karl MARX contributed to the *Tribune*, from London "Greeley'a isms," as scoffers contemptuously called his plans for social reform, annoyed many *Tribune* readers, but he never apologized for them, and the paper continued to grow. After 1850 slavery overshadowed all other questions, and Greeley's antislavery views became more intense as the crisis approached. He opposed the Mexican War and the Compromise of 1850, and some of his best editorials were directed against the Kansas-Nebraska Bill. In this period the circulation (a total of 200,000 by 1860) of the *Weekly Tribune* became so extensive in the rural districts of the West that Bayard Taylor could declare that it "comes next to the Bible" Everyone had heard and thousands had acted on his advice, "Go West, young man, go West" Greeley was one of the first editors to join the Republican party, and he was a delegate to the national organizing convention at Pittsburgh in Feb, 1856 Out of political pique he had broken with Weed and Seward in 1854 and, barred as a New York delegate to the 1860 Republican convention at Chicago, he attended as a representative of Oregon. He was a leader in the successful fight to prevent Seward's nomination, and though at first favoring Edward Bates, he eventually threw his support to Abraham Lincoln Seward and Weed had their revenge by later blocking Greeley's election to the U S Senate (he had served in the House of Representatives from Dec, 1848, to March, 1849). Greeley's course in the Civil War lost him many admirers At first he was disposed to let the "erring sisters go in peace," but soon came around to vigorous support of the war. However, he persistently denounced Lincoln's policy of conciliating the border slave states On Aug 19, 1862, he published over his signature in the *Tribune* an open letter to the President, which he titled "The Prayer of Twenty Millions," demanding that Lincoln commit himself definitely to emancipation Lincoln's reply (Aug 22) "to an old friend, whose heart I have always supposed to be right" was masterly (see EMANCIPATION PROCLAMATION) Only reluctantly and belatedly did he support Lincoln for reelection in 1864 His humanitarian hatred of war led him to advocate peace negotiations of any sort, often to the embarrassment of the administration In 1864 Lincoln sent him on what turned out to be a futile mission to Canada to treat with Confederate emissaries When the war finally ended and Reconstruction set in, Greeley, though he favored Negro suffrage, advocated amnesty for all Southerners He was one of those who signed the bail bond to release Jefferson Davis from prison, and this magnanimous act cost him half the subscriptions to the *Weekly Tribune* Greeley supported Ulysses S Grant during the first years of his administration, but came to resent what he considered Grant's subserviency to that wing of the Republican party in New York state dominated by Roscoe Conkling In 1871 he began to encourage the movement which grew into the LIBERAL REPUBLICAN PARTY and avidly sought the nomination for President in 1872 The new party's Cincinnati convention was cleverly stampeded toward Greeley, much to the disappointment of many of the reformers Though the Democrats also endorsed him, many of them refused to support a man who had spent his life opposing the principles, especially a tariff for revenue only, for which they had stood. During the campaign all Greeley's shortcomings were caricatured, and he was denounced as a traitor and a crank Despite his strenuous campaign he was thoroughly defeated by Grant His disappointment at the result and his sorrow at the death of his wife a few days before the election unbalanced his mind, and he died insane on Nov 29 The tragedy brought the shocked nation to a realization of how much it owed him Greeley wrote *The American Conflict* (1866), a history of the Civil War, and the autobiographical *Recollections of a Busy Life* (1868) His other books, while interesting, were journalistic in character. See biographies by W A Linn (1904), Don C Seitz (1926), and Henry L Stoddard (1946), Constance M. Rourke, *Trumpets of Jubilee* (1927), Ralph R. Fahrney, *Horace Greeley and the Tribune in the Civil War* (1936), and Jeter A. Isley, *Horace Greeley and the Republican Party, 1853–1861 a Study of the New York Tribune* (1947).

Greeley, city (pop 15,995), co seat of Weld co., N Colo, NNE of Denver near the South Platte river, inc 1885 Here Horace GREELEY through his agent, Nathan C Meeker, founded (1870) the cooperative Union Colony Greeley is the rail, trade, and processing center for a rich irrigated farm area. The Colorado State College of Education is here.

Greely, Adolphus Washington, 1844–1935, American army officer and arctic explorer, b. Newburyport, Mass. Entering the Union army at 17, he emerged a brevet major of volunteers at the end of the Civil War. In 1881, as a lieutenant in the regular army, Greely was given command of a U S. expedition to establish one of a chain of international circumpolar meteorological stations. Although he was without previous arctic experience, he and his party performed notable feats of exploration, many hitherto unknown miles along the northwest coast of Greenland were added to the map, Ellesmere Island was crossed to the west shore, and Lt. James B. Lockwood achieved a new northern record of 83° 24'. Relief ships failed to reach Greely's party, which in camp at Cape Sabine was visited by starvation; when the third relief vessel, under command of Winfield Scott Schley, arrived in 1884, all but Greely and six others had perished. The survivors were in a dying condition, and one died on the homeward journey Greely's account is his *Three Years of Arctic Service* (1886), another record is the diary of David L Brainard, published as *Six Came Back* (ed by B R James, 1940). Promoted chief signal officer and brigadier general in 1887 and later (1906) major general, Greely made a name for himself as builder of telegraphic communications for the army in Puerto Rico, Cuba, the Philippine Islands, and Alaska. He was director of relief operations after the San Francisco earthquake He was retired in 1908 The Congressional Medal of Honor was awarded him in 1935. His writings include *Handbook of Alaska* (rev ed., 1925) and *The Polar Regions in the Twentieth Century* (1928) See his autobiographical *Reminiscences of Adventure and Service* (1927), biography by William Mitchell (1936)

Green, Alice Stopford: see GREEN, JOHN RICHARD

Green, Andrew Haswell, 1820–1903, American civic leader, b Worcester, Mass He read law under Samuel J TILDEN and became his partner Prominent in civic affairs of New York city, he held a number of offices, was largely responsible for much of the park system (notably Riverside Drive, Morningside, and Fort Washington parks), and accomplished financial reform He is, however, remembered as the chief advocate of the merging of the surrounding cities with New York to make Greater New York He was chairman of the commission that in 1897 drew up the plan by which Greater New York was established in 1898 He also helped to bring about the union of the Astor and Lenox foundations into the New York Public Library with funds left by Tilden See biography by John Foord (1913)

Green, Anna Katharine, 1846–1935, American detective-story writer, b Brooklyn, N Y, grad Ripley Female College, Poultney, Vt, 1867 Her thrillers, characterized by logicality and a knowledge of criminal law, popularized the master detective Her first and best-known book, *The Leavenworth Case* (1878), dramatized in 1892 for her actor-husband, Charles Rohlfs, is still read Her last work was *The Step on the Stair* (1922).

Green, Bartholomew, 1666–1732, early American printer, b Cambridge, Mass The son of Samuel GREEN, he fell heir in 1692 to his father's press in Cambridge and moved it to Boston He had the patronage of the government and of the college and became the foremost printer in New England He printed the Boston *News-Letter*, first American newspaper, for John Campbell from its inception in 1704 until his death, except for four years, and in 1722 he became the publisher also His son-in-law, John Draper, succeeded to the *News-Letter*

Green, Duff, 1791–1875, American journalist and politician, b Woodford co, Ky After service in the War of 1812, he settled in Missouri, where he devoted himself to politics and to business and was editor of the St Louis *Enquirer* He moved (1825) to Washington, D C, purchased the *United States Telegraph*, and backed Andrew Jackson for President After Jackson was elected (1828), Green's newspaper became the administration organ and Green was admitted to Jackson's Kitchen Cabinet He soon backed John C Calhoun, his son-in-law, against Jackson in the nullification controversy, however, and thereafter he increasingly defended the South on the issues of slavery and the tariff He left (1836) the *Telegraph*, and—having staunchly supported the Harrison-Tyler ticket in 1840—he was appointed by President John Tyler as unofficial agent abroad to probe opinion on the Texas and Oregon questions and on trade and tariff matters He was also sent to Texas and Mexico on diplomatic missions He started (1844) in New York city the *Republic*, a newspaper devoted to tariff reduction and sympathetic toward the South. He became increasingly involved in Southern industrial developments and railroad building He had secured charters and funds for a Southern Pacific railroad and was about to start construction when the Civil War began. During the war he operated various ironworks for the Confederacy

Green, George, 1793–1841, English mathematician, largely self-taught until, in 1833, he entered Caius College, Cambridge He became one of the foremost mathematicians of his age. He was especially interested in the equilibrium of fluids and was the first to introduce the potential in its application to the theories of the magnetic and electric fields His papers were edited, with a memoir, by N. M Ferrers (1871).

Green, Hetty Howland (Robinson), 1835–1916, American financier, b New Bedford, Mass. She inherited a large fortune from her father and managed it so shrewdly that she was considered the greatest woman financier in the world Her wealth was estimated at $100,000,000 See Boyden Sparkes and S. T. Moore, *Hetty Green, a Woman Who Loved Money* (1930).

Green, John Richard, 1837–83, English historian Educated at Jesus College, Oxford, he became an Anglican clergyman in 1860 In 1869 ill-health and his increasingly liberal views led him to give up his London curacy and to become librarian of Lambeth Palace, supporting himself by writing for periodicals His first historical work, *A Short History of the English People* (1874), was immediately popular and remains a work of high literary merit As history it showed a marked emphasis on social rather than political change and stressed the significance of local events in the larger national picture He expanded the *Short History* into a less popular four-volume *History of the English People* (1877–80) His later works were *The Making of England* (1882) and *The Conquest of England* (1883), not quite finished when he died of tuberculosis and edited by his widow She was **Alice Stopford Green,** 1848–1929, also a historian Among her competent works on English and Irish history are a biography of Henry II (1888) and *History of the Irish State to 1014* (1925). She returned to live in Dublin and became a member of the Irish Senate in 1922 See Leslie Stephen, ed , *Letters of J R Green* (1901), G P Gooch, *History and Historians in the Nineteenth Century* (1913)

Green, Julian, 1900–, French writer, b. Paris, of American parentage. He studied (1919–22) at the Univ of Virginia and lived in the United States from 1940 until 1945, but otherwise has resided in France His novels, which he has preferred to write in French, are somber psychological tales, the best of which include *The Closed Garden* (1927, Eng tr , 1928), *The Dark Journey* (1929, Eng tr , 1929), *The Dreamer* (1934; Eng tr , 1934), and *Midnight* (1936, Eng tr , 1936) See his journals (1938–39, Eng tr , *Personal Record*, 1939) and his *Memories of Happy Days* (1942)

Green, Paul, 1894–, American author, b Lillington, N C , grad Univ of North Carolina, 1921 In plays, short stories, and a novel he has depicted realistically the folk life of the South, especially of Negroes, the tenant white class, and those close to the soil His plays include *In Abraham's Bosom* (1926, awarded the Pulitzer Prize for drama, 1927), *The Field God* (1927), *The House of Connelly* (1931), and *Native Son* (with Richard Wright, from Wright's novel, 1941) He has also written two symphonic dramas, *The Lost Colony* (1937) and *The Common Glory* (1948), both about colonial history, short stories collected in *Wide Fields* (1928) and *Salvation on a String* (1946), a novel, *Laughing Pioneer* (1932), and *Hawthorne Tree* (1944), concerning the theater See biographical sketch by B H Clark (1928)

Green, Samuel, 1615–1702, early American printer He established himself at Cambridge, Mass , in 1649, using a press owned by Henry Dunster, president of Harvard He succeeded Stephen DAYE and was the only printer in the colonies until 1665 Green was given the press sent to the colony in 1654 by the Society for the Propagation of the Gospel in New England, on which were printed John Eliot's Indian tracts and the Indian Bible, most famous of Green's imprints He continued in business until 1692, when his son Bartholomew GREEN succeeded him, his imprints number nearly 300, among them editions of the *Bay Psalm Book* and *The Book of the General Lawes and Libertyes*

Green, Samuel Bowdlear, 1859–1910, American horticulturist, b Chelsea, Mass , grad Massachusetts Agricultural College, 1879 He spent 13 years gaining a wide practical experience on farms, in nurseries, in experiment stations, in the horticultural department at the Massachusetts Agricultural College, and at the Minnesota Experiment Station In 1888 he began his long period of service on the faculty of the Univ of Minnesota, first as professor of horticulture and later as professor also of forestry He was one of the editors of *Farm and Fireside* after 1888 He wrote practical guides in forestry as well as *Amateur Fruit Growing* (1894), *Vegetable Gardening* (1896), and *Farm Wind-Breaks and Shelter-Belts* (1906)

Green, Samuel Swett, 1837–1918, American librarian, b Worcester, Mass , grad Harvard College, 1858, and Harvard Divinity School, 1864 He was librarian of the Worcester, Mass , Free Public Library (1871–1909) and was head of the Free Public Library Commission of Massachusetts from its beginning in 1890. One of the founders of the American Library Association, he was its delegate to the International Congress of Librarians at London in 1877, its president in 1891, and president of the World's Congress of Librarians at Chicago in 1893 His writings include *The Public Library Movement in the United States, 1853–1893* (1913) See biography by R. K. Shaw (1926)

Green, Seth, 1817–88, pioneer American pisciculturist, b. Rochester, N Y He began his experiments in the artificial hatching of trout and salmon and continued with other kinds of fish, especially shad; this he transplanted from its native Atlantic waters to the Pacific, where it became more abundant than in the original habitat Green is credited with making fish breeding practical on a large scale. Besides various articles on angling, he wrote *Trout Culture* (1870), *Home Fishing and Home Waters* (1888), and *Fish Hatching and Fish Catching* (with R. B Roosevelt, 1879)

Green, Thomas Hill, 1836–82, English neo-Hegelian philosopher Educated at Oxford, he was professor of moral philosophy there from 1878 until his death. Green, in his *Prolegomena to Ethics* (1883), produced a powerful force on the thinking of the latter half of 19th-century England Empiricism and sensationalism had dominated English thought, making conduct a theory and knowledge unmeaningful Together with T H Gross, Green examined Hume's philosophy from the viewpoint of idealism Green submitted that the fact of consciousness was evidence that made knowledge and morality possible Both in the individual and in society, moral ideas change, a belief which he emphasized by his famous statement, "Rules are made for man and not man for rules" Self-determination is present when man is conscious of his own desires, and freedom occurs when man identifies himself with what he considers morally good. Politically, Green was a liberal, believing that government must represent general will and that when it failed to do so it should be changed His ethics are believed to have influenced such modern philosophers as John Dewey and A N Whitehead Another of his writings is *Lectures on the Principles of Political Obligation* (1895) See Y L Chin, *Political Theory of Thomas Hill Green* (1920), J C McKirachan, *The Temporal and the Eternal in the Philosophy of Thomas Hill Green* (1941)

Green, William, 1873–, American labor leader, president of the American Federation of Labor (1924–), b Coshocton, Ohio He rose through the ranks of the United Mine Workers of America, of which organization he was (1912–24) secretary-treasurer Green was elected—with backing from John L LEWIS—as president of the A F of L to succeed Samuel Gompers He led the organization of skilled labor into craft unions and gradually built up A F of L membership After eight of the largest unions in the A F of L split away (1935) under the leadership of John L Lewis and formed the Congress of Industrial Organization to organize workers into industrial unions, Green led the A F of L in the subsequent struggle with the C I O Green set forth his philosophy in *Labor and Democracy* (1939)

Greenaway, Kate, 1846–1901, English illustrator and water-color painter She is famous for her fanciful, humorous, delicately colored delineations of child life She influenced children's clothing and the illustrating of children's books Among the books for which she provided text as well as illustrations are *Under the Window* (1879), *A Day in a Child's Life* (1881), and *The Language of Flowers* (1885) See Covelle Newcomb, *The Secret Door* (1946)

greenback. In 1862 in the exigencies of the Civil War the U S government first issued legal tender notes (popularly called greenbacks) which were placed on a par with notes backed by specie By the end of the war such notes were outstanding to the amount of more than $4,000,000 They had been issued as temporary, and in accordance with the Funding Act of 1866 Secretary of State Hugh MCCULLOCH began retiring them The hard times of 1867 caused many, especially among Western farmers, to demand that the currency should be inflated rather than contracted, and Congress suspended the retirement George H PENDLETON advanced the so-called Ohio Idea, recommending that all government bonds not specifying payment in specie should be paid in greenbacks John SHERMAN, more conservative, was nevertheless willing to let the greenbacks stay in circulation on a redemption basis The question was warmly debated in 1868 and was ended by a compromise, which left greenbacks to the amount of $356,000,000 in circulation The law creating them was declared constitutional in the later LEGAL TENDER CASES, and the matter rested until the Panic of 1873 The hard-hit agrarians then wanted to inflate the currency with more greenbacks President U S Grant was firmly opposed and vetoed the inflation bill of 1874 Though the Greenback party worked hard to oppose them, the conservatives triumphed in Jan , 1875, with the Resumption Act, which fixed Jan 1, 1879, as the date for redeeming the greenbacks in specie The Secretary of the Treasury accumulated a gold reserve of $100,000,000, and confidence in the government was so great that few greenbacks were presented for surrender in 1879 Congress provided in 1878 that the greenbacks then outstanding ($346,681,000) remain a permanent part of the currency See Wesley Clair Mitchell, *A History of the Greenbacks* (1903)

Greenback party, in U.S history, political organization formed in the years 1874–76 to promote currency expansion The members were principally farmers of the West and the South, stricken by the Panic of 1873, they saw salvation in expansion of the currency, for inflated currency would wipe out farm debts contracted in times of high prices They were opposed by the conservatives, who managed to get the Resumption Act of 1875 passed The Greenbackers had in 1874 hoped to capture the Democratic party, but the nomination of Samuel J Tilden killed that hope, and the Greenback party nominated Peter COOPER, its own candidate for President, in 1876 The Greenbackers got only 81,737 votes In 1878, however, some labor organizations, embittered by the labor troubles of 1877, united with the advocates of cheap money in the Greenback-Labor party They polled over 1,000,000 votes and elected 14 Representatives to Congress that year. In the presidential election of 1880 the vote for the Greenback-Labor candidate, James B. WEAVER, was just a little over 300,000, and when the candidate in 1884, Gen Benjamin Franklin BUTLER (1818–93) did very badly, the party dissolved Some members joined the Union Labor party in 1888, but more of them went back to the old parties Later many became Populists

Green Bay, city (pop. 46,235), co seat of Brown co., NE Wis , at the mouth of the Fox and on Green Bay, inc 1854 Here Jean Nicolet established (1634) a trading post, and Father Allouez carried on (1669) missionary activities A host of other French explorers, traders, and missionaries—including Nicolas PERROT, Louis Jolliet, and Father Marquette—visited the region, and the permanent settlement, the oldest in the state, is dated at 1701 Augustin LANGLADE was the chief figure in the thriving fur trade of early years After 1717 the French maintained a fort, which the British took over in 1761 and held until PONTIAC'S REBELLION The French settlement La Baye became Green Bay The old inhabitants resented the coming of the British and later of the Americans, who built (1816) Fort Howard here after the War of 1812, but gradually old and new loyalties were fused The fur trade at this key to the Fox-Wisconsin water route was dominated in the early 19th cent by the American Fur Company, but as lumbering and farming expanded, especially after the opening of the Erie Canal, furs lost their importance The first newspaper in Wisconsin was established here in 1833, and Green Bay grew lustily Today, with one of the best of the Great Lakes harbors, it is a port of entry, with heavy shipping, much wholesale and jobbing trade, and thriving industries, notably papermaking and cheese processing The Neville Museum has Nicolas Perrot's silver ostensorium (see DE PERE) The city's name has been given luster in the sports world by the professional football team, the Green Bay Packers

Green Bay, western arm of Lake Michigan, c 100 mi long, bordering part of the Michigan Upper Peninsula and deeply indenting the NE Wisconsin shore

Greenbelt, town (1940 pop 2,831; 1946 estimated pop 10,000), W central Md , near Washington, D C ; chartered 1937 Its city-manager government was the first in the state Greenbelt was planned and built by the Federal Resettlement Administration as the first of three experimental model communities (the others are Greenhills, Ohio, and Greendale, Wis) Its population, composed largely of government workers from Washington, has moderate-priced housing and school, shopping, and recreational facilities, set in a GARDEN CITY surrounded by a broad belt of park All businesses are cooperatively owned by the townspeople See O K Fulmer, *Greenbelt* (1941)

Greenbrier, river rising in E West Virginia and flowing southwest, parallel to the Va line. It joins the New River near Hinton.

greenbrier. see SMILAX

Greencastle. **1** City (pop 4,872), co seat of Putnam co , W central Ind , WSW of Indianapolis, laid out 1822 The city is a trading center for a farming region, and cement is made Greencastle is the seat of DePauw Univ (Methodist, coeducational, 1837) **2** Industrial borough (pop 2,511), S Pa , SSW of Chambersburg, laid out 1784, inc 1805 It produces textiles, machinery, and canned goods Sheep raising is done here

Green Cove Springs, town (pop 1,752), co. seat of Clay co , NE Fla , on the west bank of the St Johns river and S of Jacksonville, settled 1830 on the site of an Indian village It is a mineral-springs resort in a farming, stock-raising, and lumbering area Near by are the Penney Memorial Community for retired ministers and the site of an early-18th-century Spanish fort

Greendale. **1** Town (pop 1,548), SE Ind , near Lawrenceburg N of Aurora Whisky is distilled here **2** Village (pop 2,527), SE Wis , near Milwaukee, inc 1938 It is one of the garden cities of the Federal Resettlement Administration (see GREENBELT, Md)

Greene, Albert Gorton, 1802–68, American poet and jurist, b Providence, R I , grad Brown, 1820 He was a city official and magistrate in Providence and is remembered for his humorous poem "Old Grimes" His library is now part of the Harris Collection of American Poetry at Brown Univ

Greene, Evarts Boutell, 1870–1947, American historian, b Kobe, Japan, where his parents were missionaries He was educated at Northwestern Univ , Harvard (B A , 1890, M A , 1891, Ph D , 1893), and the Univ of Berlin (1893–94) In 1894 he began teaching American history at the Univ of Illinois, where from 1897 to 1923 he was a professor He was also dean of the college of arts and literature at Illinois from 1906 to 1913 Called to Columbia Univ in 1923, Greene was appointed (1926) the first De Witt Clinton professor of history and held

this chair until his retirement in 1939 From 1936 to 1939 he also served as chairman of the Institute of Japanese Studies at Columbia Greene was a noted authority upon the colonial and Revolutionary periods of American history His principal works were *The Provincial Governor in the English Colonies of North America* (1898); *The Government of Illinois· Its History and Administration* (1904); *Provincial America, 1690–1740* ("American Nation" series, 1905), *The Foundations of American Nationality* (1922, rev ed, 1935), *A New Englander in Japan Daniel Crosby Greene* (1927), a biography of his father, *A Guide to the Principal Sources for Early American History (1600–1800) in the City of New York* (with Richard B. Morris, 1929); *American Population before the Federal Census of 1790* (with Virginia D Harrington, 1932); *Religion and the State the Making and Testing of an American Tradition* (1941), and *The Revolutionary Generation, 1763–1790* ("History of American Life" series, Vol IV, 1943)

Greene, George Sears, 1801–99, American civil engineer, Union general in the Civil War, b Apponaug (in Warwick), R I, grad West Point, 1823 He resigned from the army in 1836 and for many years was engaged chiefly in railroad construction Greene was an engineer for the Croton water system of New York city before and after his Civil War service. Made a brigadier general of volunteers (1862), he served at the second battle of Bull Run and in the Antietam, Chancellorsville, and Gettysburg campaigns He was severely wounded in the Chattanooga campaign (1863) Later he was with W T Sherman in North Carolina (1865) His engineering work after the war included the planning of a sewer system for Washington, D C, and the building of water-supply systems in other cities

Greene, Graham, 1904-, English writer, educated at Oxford He was on the staff of the London *Times* (1926–30) and the *Spectator* (1935-39) In the Second World War he served at the foreign office, with special duties in West Africa (1942–43) His novels and short stories, often dramatic in plot, are subtle in characterization and are colored by his Catholicism Among his works are *The Man Within* (1929), *Stamboul Train* (1932), *The Confidential Agent* (1939), *The Power and the Glory* (1940, American title, *Labyrinthine Ways*), *British Dramatists* (1942), *The Ministry of Fear* (1943), *The Heart of the Matter* (1948), and *Nineteen Stories* (1949)

Greene, Nathanael, 1742–86, American Revolutionary general, b Warwick, R I An iron founder, he became active in colonial politics and served (1770–72, 1775) in the Rhode Island assembly At the beginning of the American Revolution, he commanded a detachment of militia at the siege of Boston and was in charge of the city after the British evacuation (1776) He helped plan the defense of New York (1776), but illness kept him from the battle of Long Island He was with Washington (1776–77) at Trenton, Brandywine, Germantown, and Valley Forge In 1778 he became quartermaster general while still holding his field command. Greene reorganized the department, found supplies for the army, and rendered fine service in this capacity He displayed notable ability at organization, which appeared also in his field work He fought (1778) at Monmouth and in the Rhode Island campaign and was president (1780) of the court-martial board that sentenced Major John André. After Gates was defeated at Camden (1780), Greene became the commander in the CAROLINA CAMPAIGN He reorganized the southern army, and he and his lieutenants (notably Daniel Morgan and Light-Horse Harry Lee), with aid of partisan bands under Francis Marion, Thomas Sumter, and Andrew Pickens, turned the tide in Carolina Greene's forces were defeated at Guilford Courthouse, Hobkirks Hill, and Eutaw Springs, but each time the British victory ended in British retreat, and he pushed south to surround Charleston until the British evacuated it (1782) The campaign is generally considered an example of excellent strategy, and Greene's generalship is much admired To get supplies for the Continental army Greene often had been forced to endorse personal notes After the war the dishonesty of a contractor forced him to sell his estates to honor these pledges The people of Georgia, however, gave him a plantation See biography by his grandson, G. W Greene (3 vols, 1867–71)

Greene, Robert, 1558?–1592, English dramatist, poet, and miscellaneous writer, grad. Cambridge (B A., 1579, M A, 1583). His series of popular, short romantic "novels," written in the manner of Lyly's *Euphues* include *Euphues His Censure to Philautus* (1587), *Pandosto* (1588), from which Shakspere drew the plot for *A Winter's Tale*, and *Menaphon* (1590) His best dramas were history freely used, *Friar Bacon and Friar Bungay* (1594) and *The Scottish History of James IV* (1598), he collaborated with Thomas Lodge in *A Looking Glass for London and England* (1594). He also wrote didactic tracts and many pamphlets, those on cony-catching portrayed his sordid London. Greene's *Groatsworth of Wit Bought with a Million of Repentance* (1592) is a famous alleged reference to Shakspere, and another tract led to a quarrel between Gabriel HARVEY and Thomas NASHE. *A Quip for an Upstart Courtier* (1592) is an allegory of social conflict. See his *Life and Complete Works* (ed by A. B Grosart, 15 vols., 1881–86), fictionized biography by Gwyn Jones, *A Garland of Bays* (1938)

Greene. 1 Town (pop 1,303), NE Iowa, on the Shell Rock River and NW of Waterloo, inc 1879 **2** Village (pop 1,431), S central N Y, on the Chenango and NE of Binghamton, settled 1792, inc. 1842. Silk goods and furniture are made

Greeneville, town (pop 6,784), co seat of Greene co, NE Tenn, SW of Johnson City, in a tobacco and farm area In 1785 it succeeded Jonesboro as capital of the short-lived State of Franklin (see FRANKLIN, STATE OF), the site of the capitol is marked. Andrew Johnson's home, tailor shop, and grave here are in Andrew Johnson National Monument (17.08 acres, est 1942) Greeneville has a monument to Gen John H Morgan, who was killed here during the Civil War Tusculum College (coeducational, 1794) and a tobacco experiment station of the Univ of Tennessee College of Agriculture are near by David Crockett was born at Limestone, to the northeast

Greenfield. 1 City (pop 1,006), SW central Ill, W of Springfield, in a farm and coal area, inc 1867 **2** City (pop 4,821), co seat of Hancock co, central Ind, E of, and near, Indianapolis, settled 1828, inc 1850 It is the birthplace of James Whitcomb Riley **3** Town (pop 1,869), co seat of Adair co, SW Iowa, WSW of Des Moines, in a farm and livestock region, settled 1841, inc 1876 **4** Town (pop 15,672), co seat of Franklin co, NW Mass, near the confluence of the Deerfield with the Connecticut, settled 1686, set off from Deerfield 1753 Tools and machine parts are made here It is the eastern terminus of the Mohawk Trail Asher Benjamin was born here. **5** City (pop 1,353), co seat of Dade co, SW Mo, NE of Joplin, in a farm area, settled 1841 **6** Village (pop 4,228), S central Ohio, W of Chillicothe, in a rich farming area, platted 1798, inc 1841 It has varied industries (including shoemaking) and stone quarries **7** Town (pop 1,509), W Tenn, N of Jackson, in a farm area

Greenfield Park, town (pop 1,819), S Que, near Montreal

Greenfield Village, reproduction of an early American village, established (1933) by Henry Ford at Dearborn, Mich, as part of the Edison Institute A white-spired church, a town hall, an inn, a school, a courthouse, a general store, a firehouse, and other buildings are grouped about a typical New England village green Many of the structures were brought from their original location, others are faithful reconstructions Among them are Edison's Menlo Park workshop and Fort Myers laboratory, a McGuffey group including a school in which classes are regularly held, Noah Webster's birthplace, Stephen Foster's home, Luther Burbank's birthplace and office, and the Wright brothers' cycle shop and home Mills and craft shops illustrate early methods of production of flour, cider, sorghum, textiles, pewter ware, pottery, bricks, and Sandwich glass, and the village has a blacksmith shop, a cobbler's shop, a cooperage, and a tintype studio. See W A Simonds, *Henry Ford and Greenfield Village* (1938)

green fly see APHID

Greenhills, village (pop 2,677), SW Ohio, near Cincinnati, est 1938 by the Federal Resettlement Administration, inc 1939 See GREENBELT, Md.

greenhouse, enclosed glass house, constructed on a metal or wood frame and used for growing plants in regulated temperatures and humidity Greenhouses range from an unheated small room, carrying a few plants over the winter, to an immense heated glass building, or hothouse, covering acres of ground and used for forcing flowers or fruits out of season Greenhouses have long been used for holding plants over cold seasons and to some extent for growing hothouse fruit, but only in this century has the greenhouse been used for vegetable forcing. Now millions of dollars' worth of plant products are raised yearly under glass For use and construction, see W J Wright, *Greenhouses Their Construction and Equipment* (rev ed, 1946), E D Chabot, *Greenhouse Gardening for Everyone* (1946)

Green Island, industrial village (pop 3,988), on an island in the Hudson, E N Y, between Troy and Watervliet, inc 1869. Machinery is made here.

Greenland, Dan *Grønland*, Danish colony (c 840,000 sq mi, pop 21,412), an island largely within the Arctic Circle It is surrounded by the Arctic Ocean (in the north), the Greenland Sea (in the west), Denmark Strait (in the southwest), between Greenland and Iceland, the Atlantic Ocean (in the south), and Davis Strait and Baffin Bay (in the west), which separate it from Baffin Island (Canada) Geologically it is part of the Canadian shield. Greenland is 1,660 mi long from Cape Farewell (lat. 59° 46' N) to Cape Morris K Jesup (lat 83° 39' N) and a maximum of 700 mi wide. Except for c 132,000 sq mi of coastland, an ice sheet covers the island. The extreme northern peninsula (Peary Land) has no ice cap The thickness of the ice sheet exceeds 8,000 ft in some places, where soundings have been taken. The ice mass moves outward from the center, entering the sea in walls or debouching in glaciers. The HUMBOLDT GLACIER is the largest. The rapidly moving glaciers (one was observed to move more than 100 ft. a day) "calve" tremendous icebergs, notably into Davis Strait, through which they frequently reach Atlantic ship lanes Cold winds rush out from the interior, rendering the weather uncertain and foggy. A polar ocean current flows south along the entire east coast and around Cape Farewell, carrying immense ice floes which render the approach to the east coast hazardous The NORTH ATLANTIC DRIFT gives the southwest coast a warmer climate and heavy rainfall Basalt mountains border the coast, which is broken by many deep fjords More than 90 per cent of the population live along the west coast Greenland is administered by a board of governors at Copenhagen, directly responsible to the Danish premier There are two main territorial divisions, East Greenland (pop 1,372) and West Greenland (pop 20,040) West Greenland is in turn divided into North Greenland and South Greenland, each with a governor and a provincial assembly, meeting at GODHAVN and GODTHAAB respectively Other important settlements are Julianehaab, Frederikshaab, Egedesminde, Sukkertoppen, and Upernivik (west coast) and Angmagssalik (east coast) There are only some 500 Europeans, the native Greenlanders are of mixed Eskimo and Danish ancestry (see ESKIMO). Fishing and seal hunting are their means of livelihood The entire trade of Greenland is a state monopoly, and only such vessels (Danish and foreign alike) as have special permission may enter Greenland ports The chief resources of the island are mineral deposits, as yet only partly explored The chief source of revenue is CRYOLITE, mined at Ivigtut Coal is mined on Disko island, and a large lead deposit was found in 1948 on the east coast. Agriculture and sheep raising are very limited and exist only in the southwest, vegetation being arctic in character The polar bear, musk ox, polar wolf, ermine, lemming, arctic hare, and reindeer are the chief land animals Sea birds (ducks, gulls, auks) are hunted for their flesh, eggs, and down Greenland was discovered and colonized (c 982) by ERIC THE RED, who named it Greenland in order to make it sound attractive for potential settlers From here LEIF ERICSSON sailed to North America (1003) Greenland became a bishopric (1110, and ruins of churches of that period remain In 1261 the colony came under Norwegian rule, but in the 14th and 15th cent it was neglected and the colonists died out Sir Martin Frobisher and John Davis rediscovered Greenland in the 16th cent, but found no trace of Norsemen Other explorers looking for the NORTHWEST PASSAGE subsequently charted the coast Modern colonization was begun (1721) by the Norwegian missionary, Hans EGEDE Danish trading posts were established shortly afterward and colonization was furthered by the deportation of undesirable subjects to Greenland The early Danish governors brutally exploited the natives, who soon began to suffer from the white man's diseases Tuberculosis remains a major problem In 1815, at the Congress of Vienna, Denmark retained the colony through an oversight of the delegates, who detached Norway from Denmark, but forgot to mention the outlying Norwegian possessions In the 19th and 20th cent, Greenland was explored and mapped by numerous arctic explorers In the Second World War, after the German occupation (1940) of Denmark, the United States invoked the Monroe Doctrine for Greenland, established (1940) a consulate at Godthaab, and reached an agreement (1941) with the Danish minister at Washington which permitted the establishment of American army, air, and naval bases and meteorological stations The agreement was repudiated by the Danish government in 1941, but recognized after the liberation (1945) of Denmark Two American air bases on the west coast were still maintained in 1949 A Five Year Plan for the raising of the Greenlanders' economic, educational, and hygienic standards was drafted in 1946 by the board of governors and a Greenland deputation See Vilhjalmur Stefansson, *Greenland* (1942).

Greenland Sea, arm of the Arctic Ocean, off the northeast coast of Greenland It is the main outlet of the Arctic Ocean to the Atlantic Because of drifting arctic ice, the northern part is rarely open to navigation By some geographers, the Greenland Sea is considered a part of the Norwegian Sea

Greenleaf, Simon, 1783–1853, American writer on legal subjects, b Newburyport, Mass A member of the Maine bar, he early enjoyed a high reputation for legal scholarship With the admission (1820) of Maine as a state, he was elected to a term in the legislature and was appointed reporter of the Maine supreme court In 1833 he resigned this position and accepted the invitation of Joseph Story to become a professor of law at Harvard Much of the excellence of Harvard Law School is attributed to these men. Greenleaf's *Treatise on the Law of Evidence* (3 vols, 1842–53) for many years was the standard American work on the subject Another long-used text was his revision (5 vols, 1849–50) of William Cruise's *Digest of the Law of Real Property*

Greenman, Jesse More, 1867–, American botanist and educator, authority on the flora of Mexico and the W United States, b North East, Pa He was assistant at Gray's Herbarium, Harvard, assistant curator at the Field Museum of Natural History, Chicago; and assistant professor of botany at the Univ of Chicago (1908–13) In 1913 he became affiliated with Washington Univ , St Louis, serving as professor of botany (1917–45) and also as curator of the Missouri Botanical Garden

Green Mountain Boys, popular name of partisan armed bands in what is today Vermont. When c 1770, settlers and land speculators came into the region under grants from New Hampshire (see NEW HAMPSHIRE GRANTS), they were faced with ejectment by the New York officials, since the land was claimed by New York. They banded together in irregular armed groups to defend their lands Ethan ALLEN was the chief leader, his brothers were also prominent, as was Seth WARNER Their methods were threat, intimidation, and actual violence against the Yorkers, and they managed to keep the region free from New York control, establishing instead a separate government (see VERMONT) In the American Revolution the Green Mountain Boys figured prominently when under Allen's leadership they captured Ticonderoga in 1775 They were not so successful in the Quebec campaign, but in 1777 Seth Warner led them to victory at Bennington—one of the notable achievements of the patriots in the Saratoga campaign

Green Mountains, range of the Appalachians, extending N-S through Vermont and rising to 4,393 ft. in Mt Mansfield NW of Montpelier The peaks are generally low and rounded and well forested There are fertile valleys, and some of the many streams provide water power, the mountains yield marble and granite Famed for their beauty, they are a favorite resort, site of many summer homes Much of the area is a U S forest reserve The Long Trail was built by the Green Mountain Club (Rutland, Vt) for hikers, it extends 260 mi from Massachusetts to Canada, with shelters at frequent intervals See Green Mountain Club, *Guide Book of the Long Trail* (latest ed), W C O'Kane, *Trails and Summits of the Green Mountains* (1926)

Greenock (grē'nuk, grī'–, grē'–), burgh (1931 pop 78,949, 1948 estimated pop 79,470), Renfrewshire, Scotland, WNW of Glasgow It is on the south shore of the Firth of Clyde, along which there is an esplanade Improvement of the harbor was begun in 1707, there are now extensive docks, and shipping and shipbuilding are important industries Others are aluminum casting, wool weaving, and sugar refining, and boilers and chemicals are made Greenock is the birthplace of James Watt, who is commemorated by Watt Institution and a statue by Chantrey Burns's "Highland Mary" (Mary Campbell) was buried in the cemetery of West Kirk The church (founded 1591), with windows by William Morris, Burne-Jones, D G Rossetti, and Ford Madox Brown, was removed to Seafield, near Greenock town, because of the extension of shipyards Greenock has an unusually heavy rainfall It was a debarkation port for American troops in the Second World War

Greenough, Horatio (grē'nō), 1805–52, American sculptor, b Boston, grad Harvard, 1824, and studied in Italy under Thorvaldsen He worked in Florence from 1829 to 1851 Greenough was the first important American sculptor A protégé of Washington Allston and a friend of James Fenimore Cooper, he was a man of ideas in advance of his time His colossal statue of Washington, commissioned for the rotunda of the Capitol, was found too heavy for the floor and was set up in the grounds, later to be placed in the Smithsonian Institution building *The Rescue* is on the east stairway of the Capitol. See his *Travels, Observations, and Experiences of a Yankee Stonecutter* (1852) and his letters (ed by Frances B Greenough, 1887), A T Gardner, *Yankee Stonecutters* (1945) His brother, **Richard Saltonstall Greenough,** 1819–1904, also a sculptor, spent much of his life in Europe

Greenport, village (pop 3,259), near the northeastern tip of Long Island, SE N Y , inc 1838 It is a commercial town with oyster-fishing and boatbuilding industries

Green River, town (pop 2,640, alt c 6,100 ft), co. seat of Sweetwater co., SW Wyo , on the Green River, founded 1868, inc 1891 It is a rail and trade center for a forest, livestock, and farm area

Green River. 1 River rising in central Kentucky, near Stanford, and flowing WNW to the Ohio near Evansville, Ind. **2** River, 730 mi long, rising in W Wyoming in the Wind River Range and flowing generally S through W Wyoming and E Utah (with a loop in the northwestern corner of Colorado) to the Colorado river in SE Utah It flows through the Canyon of the Lodore in Dinosaur National Monument Largest tributary of the Colorado, the Green receives the Yampa and White rivers from the east, from the west it is fed by Blacks Fork and the Duchesne, Price, and San Rafael rivers The Federal government has made plans for extensive irrigation and hydroelectric power projects in the Green River basin

Greens, political faction see BLUES AND GREENS

Greensboro. 1 Town (pop 2,034), co seat of Hale co , W central Ala , S of Tuscaloosa, in the Black Belt cotton area, settled c 1816, inc 1823 **2** City (pop 2,459), co seat of Greene co , NE Ga , ESE of Atlanta, laid out 1786, inc 1803 It is a processing center (*with cotton mills*) in a farm and dairy area **3** City (pop 59,319), co seat of Guilford co , central N C , E of Winston-Salem, in the piedmont, settled 1749, laid out 1808 The city is a textile-manufacturing center and is noted for its numerous educational institutions It is the seat of Greensboro College (Methodist, for women, 1838), Bennett College (Negro; Methodist, for women, 1873), Woman's College of the Univ of North Carolina (see NORTH CAROLINA, WOMAN'S COLLEGE OF THE UNIVERSITY OF), the Agricultural and Technical College of North Carolina (see NORTH CAROLINA, AGRICULTURAL AND TECHNICAL COLLEGE OF), Immanuel Lutheran College (Negro, coeducational), and Guilford College (Friends, coeducational, 1834) O Henry was born here The battle of GUILFORD COURTHOUSE occurred near by

Greensburg. 1 City (pop 6,065), co seat of Decatur co , SE Ind , c 50 mi SE of Indianapolis, settled 1822, inc 1859 It is a shipping point for tobacco and a farm trading center The area yields oil **2** City (pop 1,417), co seat of Kiowa co , S Kansas, W of Wichita, in a livestock and wheat area, inc 1886 **3** Town (pop 1,176), co seat of Green co , S Ky , SSE of Louisville and on the Green River, in a timber, tobacco, and grain area, settled c 1780 as Glovers Station **4** City (pop 16,743), co seat of Westmoreland co , SW Pa , SE of Pittsburgh, settled 1782, inc 1799 Coke, plumbing supplies, metal products, and glass are made here Seton Hill College (Catholic, for women, 1883) is in the city Col Henry Bouquet defeated Indian warriors of Pontiac near Greensburg (1763) and opened up W Pennsylvania for settlement The city was named for Nathanael Greene, Revolutionary War general

Greentown, residential town (pop 1,060), N central Ind , near Kokomo, founded 1848

Greentree, borough (pop 1,880), Allegheny co , SW Pa , near Pittsburgh, inc 1885

Greenup. 1 Village (pop 1,410), E Ill , SW of Terre Haute, Ind , in a farm area, founded 1836, inc 1855 **2** Town (pop 1,063), co seat of Greenup co , N Ky , on the Ohio and NW of Ashland, in a farm area The Raceland track is south

Greenville. 1 City (pop 5,075), co seat of Butler co , S central Ala , SSW of Montgomery, in a cotton, truck, and pecan area, settled 1819 **2** Town (pop 1,114), N Fla , E of Tallahassee near the Ga line, founded in the mid-19th cent It is a lumber-milling center **3** City (pop 3,391), co seat of Bond co , SW Ill , in a farm, coal, and natural-gas area, ENE of St Louis, settled 1815, inc 1855 Evaporated milk is one of the city's products Greenville College (coeducational) is here **4** City (pop 2,347), co seat of Muhlenberg co, W Ky , S of Owensboro It is a trade and processing center in an area of farms, coal, oil, clay pits, and timber **5** Town (pop 1,955), central Maine, at the southern end of Moosehead Lake, settled 1824, inc 1836 It is the headquarters for travel and sports in this area **6** City (pop 5,321), S Mich , on the Flat River and NE of Grand Rapids, in a farm area, inc as a village 1867, as a city 1871 It ships potatoes and makes refrigerators and machinery **7** City (pop 20,892), co seat of Washington co , W Miss , on the Mississippi and NW of Jackson, inc 1870 It is the trade, processing, and shipping center of the rich Mississippi-Yazoo delta, producing especially cotton The destructive flood of 1927 caused the building of higher levees and creation of a lake, which enters the river 4 mi below Greenville See W A Percy, *Lanterns on the Levee* (1941), D L Cohn, *Where I Was Born and Raised* (1948) **8** Town (pop 1,236), S N H , on the Souhegan and W of Nashua, inc 1872 The river furnishes power for textile mills Jonas Chickering was born here **9** Town (pop 12,674), co seat of Pitt co , E N C , on the Tar river and ESE of Raleigh, founded 1786 It is a great tobacco market East Carolina Teachers College is here **10** City (pop 7,745), co seat of Darke co , W Ohio, NW of Dayton, laid out 1808, inc 1838 Gen Anthony Wayne built (1793) Fort Greenville here as a base for his Indian campaign After his victory at FALLEN TIMBERS, Wayne returned and in 1795 negotiated a treaty (Treaty of Greenville) with the Indians, who ceded a large part of the Old Northwest to the United States The fort was then abandoned. In 1805 Tecumseh and his brother the Shawnee Prophet lived here A memorial marks the site of the signing of the Treaty of Greenville **11** Industrial borough (pop 8,149), W Pa , near the Ohio boundary NE of Youngstown, Ohio, settled c 1796, laid out 1798, inc 1837 A trading center for an agricultural area, it is the site of Thiel College **12** City (pop 34,734), co seat of Greenville co , NW S C , in the piedmont near the Blue Ridge and on Reedy river, laid out 1797 as Pleasantburg, renamed 1831 One of the principal industrial and commercial centers of the SE United States, it has many large textile mills, farm-produce processing and packing plants, and other factories It is the center of a large industrial region of mill towns Textile Hall is the scene of the biennial Southern Textile Exposition and of the annual South Carolina Singing Convention. Furman Univ (Baptist, 1825), with which Greenville Woman's College was coordinated in 1933, and Bob Jones Univ. are here **13** City (pop. 13,995), co seat of Hunt co , E Texas, NE of Dallas; settled 1846, inc 1874 It is known as the rich center of a prosperous blackland cotton region in the northeast corner of the state and has processing plants and small industries

green vitriol see COPPERAS

Greenwich (grī'nij, grē'–), metropolitan borough (1931 pop 100,924, 1948 estimated pop 84,410) of SE London, England, on the Thames. Among its features are the Royal Naval College and Greenwich Hospital, on the site of a royal residence where Henry VIII, Mary, and Elizabeth were born and where Edward VI died Greenwich "whitebait dinners," held for cabinet members at the close of sessions of Parliament, were discontinued c 1890 Geographic longitude is figured from the prime meridian at Greenwich Formerly the Royal Observatory was on a hill 180 ft high in Greenwich Park (185 acres) at lat 51° 28′ 38.1″ N and long. 0° Sir Christopher Wren chose the site and designed the first buildings, for which Charles II in 1675 had granted £500 Because of the glare of London street lights and neon signs officials decided to remove the observatory, the move began in 1946. Controlled by the British admiralty, the observatory staff has made regular meteorological and magnetic observations since 1838 and has taken almost daily photographs of the sun since 1873 The National Maritime Museum was opened in Greenwich in 1937

Greenwich. 1 (grē'nich, grī'nich, grēn'wich) Residential and resort town (pop. 35,509), SW Conn , on Long Island Sound It includes the villages of Greenwich, Riverside, Old Greenwich, and Cos Cob. This area was bought from Indians in 1640 Tryon's men invaded it in 1779, a house (1731) from which Putnam traditionally made a dramatic escape from the British is preserved The town is the seat of Edgewood (1910), a pioneer progressive coeducational school, and Rosemary Hall for girls (1890) There is a publishing house, and some manufacturing is done Audubon Nature Center, a 400-acre wildlife sanctuary near here, was opened in 1943 **2** (grēn'wich) Village, SW N J , on the Cohansey near its influx into the Delaware and SW of Bridgeton It was an early seaport and the scene of a tea-burning "party," 1774 There are pre-Revolutionary houses **3** (grēn'wich) Industrial village (pop 2,270), E N Y , E of Saratoga Springs, in a farm area, inc 1809 Clothing and paper are made here

Greenwich Village (grē'nich, grī'nich), residential district of lower Manhattan, New York city, extending roughly from 14th St S to Houston St. (hou'stun) and from Washington Square W to the Hudson river A separate village in the colonial period, it was later an exclusive residential part of the city whose center lay farther south Around 1910 it gained renown as the home and workshop of nonconformist artists, writers, and theater people. Barns and old houses along the narrow, crooked streets were converted into eating places, night clubs, and shops The Village acquired a reputation for bohemianism and attracts many visitors. The region is still the home of a number of artists. Outdoor art exhibits are held semiannually See Floyd Dell, *Homecoming an Autobiography* (1933), Albert Parry, *Garrets and Pretenders a History of Bohemianism in America* (1933), Caroline F Ware, *Greenwich Village, 1920–1930* (1935), H W Lanier, *Greenwich Village Today & Yesterday* (1949)

Greenwood, Grace, pseud of **Sara Jane Clarke Lippincott,** 1823–1904, American author, b Pompey, N Y In 1853 she married Leander K Lippincott and with him edited the juvenile monthly, *Little Pilgrim* She was one of the first women newspaper correspondents, and her letters from Washington and Europe appeared in leading papers throughout the United States Among her works are *Greenwood Leaves* (1850) and *Haps and Mishaps of a Tour in Europe* (1854)

Greenwood 1 Coal-shipping town (pop 1,219), a co seat of Sebastian co , W Ark , SE of Fort Smith. **2** Town (pop 2,499), central Ind , S of, and near, Indianapolis Automobile parts and household appliances are manufactured here. **3** City (pop. 14,767), co seat of Leflore co , W central Miss , on the Yazoo and N of Jackson, settled 1834, inc 1844 It is an important processing, marketing, and shipping center in a productive cotton region. **4** City (pop 13,020), co seat of Greenwood co., W S C , WNW of Columbia, settled 1824, inc. as a town 1857, as a city 1927 City-manager government was adopted in 1939 It is the center of a fertile farm area yielding cotton and diversified crops and has textile and lumber mills, foundries, machine shops, and food-processing plants Lander College (Methodist, for women, 1872), Brewer Normal Institute (Negro), and an orphanage are here Near by are a state park and the Buzzard Roost hydroelectric development on the Saluda.

Greenwood Lake, c.7 mi. long, bisected by the N.Y.–N J border, in hilly country It is a resort.

Greer, David Hummell, 1844–1919, American Episcopal bishop b Wheeling, W Va , grad Washington College, 1862, and studied at the Episcopal theological school at Gambier, Ohio (now Kenyon College) He became rector of St Bartholomew's Church, New York, in 1888 Made bishop coadjutor of the diocese of New York in 1904, he succeeded Bishop Potter in 1908 Under Bishop Greer the construction of the Cathedral of St John the Divine made progress See biography by C. L. Slattery (1921)

Greer, textile-mill town (pop 2,940), NW S.C., between Spartanburg and Greenville

Greet, Ben (Sir Philip Ben Greet), 1857–1936, English actor and theatrical manager He began outdoor performances of Shakspere in England in 1886 In 1890 he formed a company which toured England until 1902 and then appeared in the United States (1902–14, 1929–32) in Shakspere and in the morality play *Everyman*. He was knighted in 1929.

Gregg, David McMurtrie, 1833–1916, Union general in the Civil War, b Huntingdon, Pa , grad West Point, 1855 Gregg served with the cavalry of the Army of the Potomac and was particularly distinguished in the fighting of July 3 at Gettysburg, when he checked Jeb Stuart's attempt to get to the Union rear

Gregg, Josiah, 1806–50, American trader and historian of the SANTA FE TRAIL, b Overton co , Tenn He removed with his family to Illinois (1812) and to Missouri (1815). He gained wide knowledge from his diverse readings He journeyed to Santa Fe for the first time in 1831 and later, having become a trader, made many expeditions, sometimes going as far as Chihuahua, in Mexico He recorded his observations, which were published as *Commerce of the Prairies* (1844), later regarded as a classic of American frontier history and literature He served under Gen John W Wool in the Mexican War and in 1849 joined the California gold rush He died when leading a prospecting party across the Coast Range in the winter See his diary and letters (ed by M. G Fulton, 1941–44)

Gregg, William, 1800–1867, "father of Southern cotton manufacture," b Monongalia co , Va (now W Va) He established a jewelry business in Columbia, S C (1824), and in Charleston (1838), but then turned to cotton manufacture in a small mill near Edgefield, S C His energies thus were devoted to building up industrial resources in the South that might compare with those in the North His views were expressed in *Essays on Domestic Industry* (1845), articles published first in the Charleston *Courier* Having fought for a favorable attitude toward corporations, Gregg formed a company to establish (1846) Graniteville, the first Southern mill town, built with local materials and labor and consisting of a large mill and houses for its 300 employees The mill continued to operate under his personal direction through financial depression and the Civil War, and it brought him steady profits He introduced an advanced factory-welfare program for the community. In the state legislature (1856–57) his interest in economic issues was directed toward the strengthening of industrial enterprises. See biography by Broadus Mitchell (1928)

Grégoire, Henri (ārĕ' grāgwär'), 1750–1831, French priest, writer, and revolutionist. A Jansenist in tendency, he advocated a Gallican church and the participation of the lower clergy in the church government Elected to the States-General (1789), he supported the French Revolution, fighting for the abolition of clerical and noble privileges and for the emancipation of slaves in the French colonies. He took the oath to the civil constitution of the clergy (not recognized by Rome) and became constitutional bishop of Blois (1791–1801) A member of the Convention, he clung to his own religious beliefs throughout the Terror and fought for religious toleration under the Directory As a senator under the Consulate, Grégoire opposed the CONCORDAT OF 1801 and resigned his see but continued to function as a simple priest Although he voted against the proclamation of the empire, he was created a count by Napoleon In 1819 he was elected a deputy, but, as a dissident priest and a radical, he was refused a seat in the chamber Grégoire died obscure and poor. His works deal principally with Jansenism, racial equality, and international cooperation. Some have been translated He also wrote memoirs.

Gregoras, Nicephorus (nisĕ'fûrûs grĕ'gûrûs), c 1295–c.1359, Byzantine historian and theologian, one of the most learned men of his time He was a partisan of the union of the Orthodox Eastern Church with Rome and fell into disgrace (1351) as a result of his opponents' victory. Among his scientific and philosophical works is a plan for a calendar reform similar to that effected by Pope Gregory XIII two centuries later. His chief book is the *Roman History*, covering the period 1204–1359. This and the *Histories* of John Cantacusene (Emperor John VI) are the only sources for 14th-century Byzantine history.

Gregorian chant: see PLAIN SONG.

Gregorovius, Ferdinand (grĕgûrō'vēûs, Ger. fĕr'dēnänt grā"gôrō'vôôs), 1821–91, German historian. He spent many years at Rome, during which he produced his *History of the City of Rome in the Middle Ages* (8 vols., 1859–72, Eng. tr , 1894–1900). Other works include his *Life of the Emperor Hadrian* (1851, Eng. tr , 1898). He is considered one of the greatest authorities on Italy and particularly on Rome.

Gregory I, Saint (Saint Gregory the Great), c 540–604, pope (590–604), a Roman, successor of Pelagius II and predecessor of Sabinian. A Doctor of the Church, he was distinguished for his spiritual and temporal leadership. He was of patrician family and was made prefect of Rome, but, feeling the call to monasticism, he converted (c.575) his home and others of his houses into Benedictine convents Later (c.586), he reluctantly became abbot In 578 he was made a deacon of Rome, from 579 to c 586 he was ambassador at Constantinople, then he served as chief adviser of Pelagius II. When commencing a missionary voyage to England, he was recalled to Rome and accomplished his aim only by sending St AUGUSTINE OF CANTERBURY (596) and a later mission (601). He was elected pope by acclamation, accepting against his will The two chief features of Gregory's lasting work are the enforcement of the papal supremacy and the establishment of the temporal position of the pope Gregory not only legislated minutely and carefully for his immediate charges, but he interfered when necessary outside Italy, e.g., he attacked Donatism in Africa and simony in Gaul Most significantly, he refused to recognize "ecumenical" as a title of the patriarch of Constantinople, since that title was not consistent with the divine vicegerency of the pope Gregory's action helped to divide Constantinople and Rome, but his general behavior became a momentous precedent The exarch of Ravenna, representative of the emperor in the West, claimed jurisdiction over Rome, and Gregory acknowledged it *de jure* But the exarch, Romanus, would do nothing to help the city when it was threatened by a Lombard attack in 592 Gregory, as bishop of Rome, took command and negotiated a peace which the exarch ignored, attacking the Lombards, who returned to Rome Since Romanus deferred making peace, Gregory began independent negotiations, a new affront to the imperial dignity and an extralegal act In his dealings with the Lombards and the exarch, Gregory showed that if the emperor would not defend the pope, the pope would defend himself and by doing so would make himself temporally independent. Thus he set a precedent which enabled the papacy to prevent the total destruction of Rome Yet Gregory was the important exponent of the doctrine of divided powers the emperor was God's vicar in things temporal, the pope in things spiritual Gregory's encouragement of monasticism was significant historically, and his insistence on clerical celibacy and the exemption of the clergy from civil courts bore great fruit later Gregory's works included *Moralia* (Eng tr., *Morals on the Book of Job*, 1844–50), *Dialogues*, lives of saints, including St Benedict, *Liber pastoralis curae* (various Eng trs , *Pastoral Care*, *Pastoral Charge*, and *Pastoral Rule*), homilies on the Gospel, and many invaluable letters The Gregorian Sacramentary, a revision of the Gelasian Sacramentary (see GELASIUS I, SAINT), and the Gregorian antiphonary are spurious St Gregory contributed to the development of the Gregorian chant or PLAIN SONG Feast March 12 See F H Dudden, *Gregory the Great* (1905), Peter Batiffol, *Saint Gregory the Great* (1929), Cuthbert Butler, *Western Mysticism* (1922)

Gregory II, Saint, d 731, pope (715–31), a Roman, successor of Constantine and predecessor of St Gregory III He was illustrious in the Church before his election As pope he vigorously opposed Leo III, who tried to enforce ICONOCLASM in Italy by an imperial edict Gregory wrote that the emperor could not decide tenets of faith and that, if Leo persisted, the pope would hinder collection of the imperial levy In so doing, he temporarily ended the traditional enmity between himself and the Lombards, who were drawn into a partial alliance with him through their defense of images and their opposition to the exarch of Ravenna. Gregory's stand on images was upheld by St. ZACHARIAS Gregory was deeply interested in the mission of St. BONIFACE in Germany. Feast Feb. 11.

Gregory VII, Saint, d. 1085, pope (1073–85), an Italian (b near Rome) named Hildebrand (Ital *Ildebrando*), successor of Alexander II and predecessor of VICTOR III. He was one of the greatest of popes He was a Benedictine and came to the attention of the archbishop who later was made pope as Gregory VI. Gregory VI made Hildebrand his chaplain, and the young man accompanied the pope in his exile in Germany. Under Leo IX, Hildebrand became the chief papal adviser in temporal affairs, as administrator of the Patrimony of St Peter he took from the Italian nobles the ecclesiastical property they were holding and restored the papal finances. He was even more vigorous in suppressing the corruption in the important monastery under his charge, St Paul's without the Walls In Leo's pontificate the Hildebrandine reform got under way, a movement vigorously promoted by Hildebrand all his life The chief abuses to be combated were simony (the sale of ecclesiastical office, honor, or dignity), domination of church appointments by laymen (lay INVESTITURE), and violation of the law of celibacy for the clergy The reform was opposed by many of the clergy and most of the upper classes of laymen, in Germany and in France especially, but the people were behind Hildebrand Under Leo's successors, Victor II and Stephen X, Hildebrand followed his course, for now he was the chief personality in the Curia Under Nicholas II, Hildebrand accomplished two significant measures—the papal election was taken out of the hands of the Romans and put into the college of cardinals (nevertheless Gregory VII was elected by the older method), and a treaty was signed with the Normans of S Italy (1059) By these acts the election of reformers in the papacy was assured and the pope was protected from the interference of the German king Hildebrand's course was not easy, for a powerful party opposing reform in Rome and abroad had formed early, this party gained great strength from laymen who feared ecclesiastical domination This group set up several antipopes and profited often by Hildebrand's intractability and relentlessness where reform was concerned By 1073 the struggle was reaching a climax, for it appeared evident that the young German king, HENRY IV, must attach himself to the party opposing reform in the empire in order to proceed with his course of establishing his power and humbling the duchies In that year Alexander II died and Hildebrand was made pope as Gregory VII His reign was marked by reform and even more by the first great clash of the long-continued struggle between pope and king for universal power—a struggle that dominated medieval political history Decrees from the Holy See forbade under pain of excommunication clerical marriage (or concubinage), simony, and lay investiture and put teeth into the legislation by degrading guilty clerics and by forbidding the faithful to use their ministrations The outcry against these measures was loud and many of them were openly flouted, but Gregory's legates went about Europe putting the decrees into effect In 1076 the rupture between pope and German king over investiture brought Henry under excommunication The decree lost Henry much of his support, and in 1077 he humbled himself at CANOSSA and begged for readmission to the Church In the German civil war that succeeded Henry's reconciliation Gregory remained neutral until 1080, when the pope and Henry fell out, Henry was excommunicated, and an imperial antipope, GUIBERT OF RAVENNA (Clement III), was set up This time Gregory's appeal to the Christian world against the emperor failed, for many bishops sided with Henry, and Henry's rival in the empire died, the civil war came to an end and Henry marched into Italy to avenge himself on the pope He first attacked Rome in 1082, and in 1083 took the city, Gregory retired into the Castel Sant' Angelo, whence he was rescued by his Norman ally, ROBERT GUISCARD The Normans were quickly expelled from the city by the Romans, and Gregory went with them He died in Salerno after a year of exile, shorn of nearly all of his support but that of the Normans His last words are said to have been, "I have loved justice and hated iniquity, therefore I die in exile" Gregory did more than any other person to make the medieval papacy what it was He strove always for the superiority of the Church over the state, and many of his claims to ecclesiastical prerogative (e g , as to his suzerainty over all sovereigns) were never realized; they certainly ended in uniting his enemies against him and in accomplishing his material ruin. But his contributions to his Church are incalculable, for at a time when the Church seemed ready to fall into disunion he united it under the Holy See, when the morals of the clergy had become a scandal to the people, Gregory set an irreproachable example and enforced the law of the Church with unanswerable authority, and when the influence of powerful laymen was threatening the integrity of the ecclesiastical constitution, he resisted with all his strength He was canonized in 1728. Feast May 25 See W. F Barry, *The Papal Monarchy*, "Story of the Nations" series, A J. S. Macdonald, *Hildebrand* (1932); J P Whitney, *Hildebrandine Essays* (1932); R W Carlyle and A J. Carlyle, *A History of Medieval Political Theory in the West* (5 vols., 1903–28).

Gregory IX, 1145–1241, pope (1227–41), an Italian (b. Anagni) named Ugolino di Segni; successor of HONORIUS III and predecessor of Celestine IV Under his uncle, INNOCENT III, he was a dominant figure in the Curia and was employed on various missions He was especially active as a mediator in wars between Italian cities. He was friendly with St. Dominic and St Francis and was made first cardinal protector of the Franciscans at St Francis's request. On the death of HONORIUS III,

whose principal adviser he was, he was elected pope and immediately reopened hostilities with Emperor FREDERICK II. He commanded Frederick to keep his vow to go on crusade and excommunicated him when he delayed (1227) The imperialists in Rome broke into insurrection, and the pope fled to Viterbo and Perugia In spite of making the crusade, Frederick remained under the ban until 1230. Five or six years later the struggle broke out again, this time over Italian liberties Gregory excommunicated Frederick and ordered his dethronement Frederick prevented publication of the bulls in Germany and blocked a general council summoned by Gregory Gregory died, at 96, when Frederick was about to attack the city Gregory ordered the collection of the decretals, a step toward codifying canon law

Gregory X, d 1276, pope (1271–76), an Italian (b Piacenza) named Tedaldo Visconti, successor of CLEMENT IV and predecessor of INNOCENT V After Clement IV's death the cardinals took 34 months (the longest time ever taken) to elect a pope Gregory was archdeacon of Liége when elected and neither a cardinal nor a priest. At the time he was in the Holy Land, and the restoration of the East to Christendom was his chief endeavor He was a conciliator in European politics and helped to end civil war in Germany by supporting the election of Rudolf of Hapsburg as emperor He convoked the Second Council of Lyons (1274) and led it particularly in the (ephemeral) reunion with the Orthodox Church of Constantinople, in establishing the strict law of the conclave for papal elections, and in reforms of clerical life on every level Gregory's most important legislation was a canon of the council drastically regulating activities of the mendicant orders, but providing special protection for the Franciscans and the Dominicans Gregory was beatified in 1713

Gregory XI, 1330–78, pope (1370–78), a Frenchman named Pierre Roger de Beaufort, successor of URBAN V and predecessor of URBAN VI He was famous for a blameless life and great learning Urban V had made an unsuccessful attempt to remove the papacy from Avignon to Rome (1367–70), and from the time of his election Gregory heard prophetic admonitions to go to Rome, from St Bridget of Sweden and then from St CATHERINE OF SIENA, who visited him But the entire Avignon court was opposed, and Italy was inhospitable In the first years of Gregory's rule, Bernabò Visconti of Milan was at war with the pope, who defeated him with the hired aid of Sir John de HAWKWOOD (1374) A struggle with Florence and Milan ensued This ended with the interdict on Florence and Catherine's mission to Avignon Finally the pope consented to Catherine's pleas and moved to Rome (1376–77) Fighting went on in Italy, with the papal army led by the ruthless Robert of Geneva Gregory issued the first condemnation of teachings of WYCLIF He was the last French pope The elections after his death began the Great SCHISM

Gregory XII, c 1327–1417, pope (1406–15), a Venetian named Angelo Correr, successor of Innocent VII and predecessor of MARTIN V He is recognized as the canonical pope during his period in the Great SCHISM He was a man of ability and experience, and he agreed before his election at Rome that he would resign if the Avignon antipope, Benedict XIII (see LUNA, PEDRO DE), would also After extended negotiations between pope and antipope which came to nothing, Gregory created four new cardinals, in spite of an agreement against new creations His cardinals now deserted him and joined most of Benedict's cardinals in convoking the Council of Pisa (1409, see PISA, COUNCIL OF) Before the council met, Gregory had no support left but Rimini, Naples, and Venice The council declared pope and antipope deposed and elected a new antipope, Alexander V It was partially to do this that the conciliar theory was devised—a theory important again at Constance and at Basel While the Council of Pisa was meeting (1409) Gregory had a council of his own at Cividale (NE of Venice), this, like Pisa, has never since been considered as ecumenical After years of ecclesiastical confusion, the Council of Constance (see CONSTANCE, COUNCIL OF) was convened, and to bring peace Gregory resigned, the council having recognized him as canonical pope Carlo Malatesta, lord of Rimini, was the only prince consistently loyal to Gregory

Gregory XIII, 1502–85, pope (1572–85), an Italian (b Bologna) named Ugo Buoncompagni, successor of St PIUS V and predecessor of SIXTUS V He is best known for his work on the CALENDAR, and for him the reformed calendar is called Gregorian He was one of the popes of the Catholic Reform He was prominent at the Council of Trent (1545, 1559–63; see TRENT, COUNCIL OF) and in the work of reform thereafter He was created (1564) cardinal and later was legate to Spain Gregory's absorbing interests were the education of the clergy and the conversion of Protestants. He especially patronized the Jesuits, whom he encouraged on their many missions, particularly in N Europe and in Japan. He proposed the deposition of Queen Elisabeth, and he advocated no compromise with German Protestants. He has been much condemned for a public thanksgiving at Rome for the massacre of SAINT BARTHOLOMEW'S DAY, but he had been told that it was the suppression of a rebellion He issued a new edition of the canon law His government of the Papal States was execrable

Gregory XVI, 1765–1846, pope (1831–46), an Italian (b Belluno) named Bartolomeo Alberto Capellari, successor of Pius VIII and predecessor of PIUS IX He became in 1783 a Camaldolite and (1820) was created cardinal and prefect of the propaganda Gregory was a conservative, and he was continually denounced by liberals all over Europe His most famous act was the condemnation of LAMENNAIS with the encyclical *Mirari vos* (1832) In 1831 the CARBONARI outbreaks spread to Rome, and only Austrian help suppressed them He nearly came to an open break over anticlerical legislation in Spain and Portugal, and he had a long controversy with Prussia Gregory was actively interested in propagating the faith in England and the United States

Gregory, Augusta (Persse) Gregory, Lady, 1859–1932, Irish author and playwright She was one of the founders of the ABBEY THEATRE and for many years devoted all her talents to it, managing, directing, and writing For performance there she wrote her most successful pieces—short sketches from Irish life, such as *Spreading the News* (1904), *The Gaol Gate* (1906), *The Rising of the Moon* (1907), *The Workhouse Ward* (1907), and *Hyacinth Halvey* (1907) Her longer historical plays, e g *Grania* (1912), are well written, but they have had little success outside Ireland Among her other works are *Cuchulain of Muirthemne* (1902), *The Kiltartan History Book* (1909), and *Our Irish Theatre* (1913) Her journals (ed by Lennox Robinson, 1946) give a vivid account of the Irish literary movement from 1916 until 1930

Gregory, Horace, 1898–, American poet and critic, b Milwaukee, Wis, grad Univ of Wisconsin (1923) He went to New York in 1923, contributed verse to several magazines, and in 1925 married the poet Marya Zaturenska He began teaching English literature at Sarah Lawrence College in 1934 Among his volumes of verse are *Chelsea Rooming House* (1930), *Chorus for Survival* (1945), and *Poems, 1930–1940* (1941) He has also translated the poems of Catullus, written a biography of D H Lawrence, *Pilgrim of the Apocalypse* (1933), and written two critical works, *The Shield of Achilles* (1944) and, with his wife, *A History of American Poetry, 1900–1940* (1946)

Gregory, James, 1638–75, Scottish mathematician He invented a reflecting telescope (1661) which he described in his *Optica promota* (1663) In 1668 he became professor of mathematics at the Univ of St Andrews and, in 1674, professor of mathematics at the Univ of Edinburgh He originated a photometric mode of measuring the distance of stars and wrote *Geometriae pars universalis* (1668) and *Exercitationes geometricae* (1668) See study by H W Turnbull (1939)

Gregory, John, 1879–, American sculptor, b London His sculptures, which show somewhat the influence of the archaic Greek, include decorative works and garden statues, such as *Wood Nymph, Bacchante; Orpheus and Dancing Panther, Philomela* (bronze replica in the Metropolitan Mus); and *Tiny Venus*, a marble fountain figure These are all on private estates Other works are *Lancelot* (memorial panel, Corcoran Gall), *The Voyage* (floor relief, Cunard Building, New York), and the *Four Seasons* (reliefs for the Huntington Mausoleum, San Marino, Calif)

Gregory, Thomas Watt, 1861–1933, U S Attorney General (1914–19), b Crawfordsville, (now Crawford), Lowndes co, Miss, grad Univ. of Texas in law, 1885 A lawyer of Austin, Texas, he became prominent because of his trust prosecutions, notably of the Waters-Pierce and Standard Oil companies, first in Texas and then before the U S Supreme Court He was special assistant to the U S Attorney General in charge of prosecuting the New York, New Haven & Hartford RR in 1913 When McReynolds became a Supreme Court Justice, Gregory succeeded him as U S Attorney General, serving through the First World War period

Gregory, William King, 1876–, American paleontologist, b New York city, grad. Columbia (B A, 1900, Ph D, 1910) He taught at Columbia after 1907, becoming professor emeritus in 1945 Known especially for his work in comparative anatomy, he influenced through his teaching and writing the development of that branch of zoology He became curator of the department of comparative anatomy (1921) and of the department of ichthyology (1925) in the American Museum of Natural History, New York city Besides many scientific papers, his works include *Orders of Mammals* (1910), *Structure and Relations of Notharctus* (1919), *Origin and Evolution of the Human Dentition* (1922), *Our Face from Fish to Man* (1929), and *In Quest of Gorillas* (with H C Raven, 1937).

Gregory, city (pop. 1,246), S S.Dak., near the Nebr line SSE of Pierre. After the territory was opened to white settlement (1904), Gregory became the trade center for a livestock and agricultural region

Gregory Nazianzen, Saint (năzēăn'zĭn), c.330–390, Cappadocian theologian, Doctor of the Church, one of the Four Fathers of the Greek Church He is sometimes called Gregory Theologus He studied widely in his youth and was from his student days intimate with St Basil the Great Basil appointed the unwilling Gregory to a bishopric, and Gregory succeeded him as principal leader of the conciliatory party in the Church In 379 Gregory was chosen as Catholic bishop of Constantinople There by his preaching he wrought a great revival of Catholicism He was deposed by the chicanery of an Alexandrian, but the first Council of Constantinople restored him When St Meletius died during the session, he took the chair, but on failing to settle the Antiochene schism, he gave up his patriarchate and went home In him were combined unimpeachable orthodoxy, exceptional modesty, and Christian charity Feast May 9

Gregory of Nyssa, Saint (nĭs'ŭ), d 394?, Cappadocian theologian, one of the Four Fathers of the Greek Church, brother of St. BASIL THE GREAT He became bishop of Nyssa, Cappadocia, in 371, was removed in 376, and was restored in 378 His fame rests on his theological works, principally controversial, against Eunomius, against Apollinarians, and against Jews and pagans (*Oratio catechetica*) He is one of the great Catholic expositors on the Trinity, redemption, and grace Feast March 9

Gregory of Tours, Saint, 538–94, French historian, bishop of Tours (from 573), b Clermont-Ferrand, of a prominent family He had a distinguished and successful career as bishop Gregory wrote accounts of miracles of the saints, an astronomical work to determine movable feasts, and a commentary on the Psalms His masterpiece, *Historia Francorum* [history of the Franks], in 10 books, is a universal history Its account of contemporary events is of great importance Gregory's Late Latin is interesting linguistically Feast Nov 17 See O. M Dalton, *Gregory of Tours* (1927)

Gregory Thaumaturgus, Saint (thô"mutûr'gus) [Gr., =wonder-worker], c 213–c 270, Greek Father of the Church, bishop of Neocaesarea He is said to have converted his diocese completely to Christianity 85. Gregory's principal interest is his understanding of his friend and teacher, ORIGEN who is constantly mentioned in his works Feast Nov 17

Gregory the Illuminator, Saint, 257?–332?, churchman, called the Apostle of Armenia He was first catholicus, or metropolitan, of Armenia and is revered as founder of the ARMENIAN CHURCH

Greifswald (grīfs'vält), city (pop 43,590), Pomerania, NE Germany It has varied manufactures Founded in 1241, Greifswald joined the Hanseatic League in 1281 and was part of Swedish Pomerania from 1648 to 1807 Greifswald has a university, founded in 1456

Grein, Jacob Thomas (grīn), 1862–1935, English dramatic critic and theatrical manager, b Amsterdam, Holland He became an English citizen in 1895. Grein founded the Independent Theatre, London, in 1891, modeled after the Théâtre Libre of Antoine in Paris Here he presented plays then unacceptable to English commercial theaters, such as Ibsen's *Ghosts* and *The Wild Duck* and Shaw's *Widowers' Houses* He was dramatic critic for the *Sunday Times* and other newspapers and in 1923 founded the People's Theatre, London In 1925 he was appointed English consul general to Liberia His works on the theater include *Dramatic Criticism* (1899–1905), *The World of the Theatre* (1920), and *The New World of the Theatre* (1924)

Greiz (grīts), city (pop 45,410), Thuringia, central Germany It was until 1918 the capital of the principality of REUSS (older line) It has textile, paper, and chemical manufactures

Grellet, Stephen (grĕlĕt'), 1773–1855, Quaker missionary, b France, son of well-to-do Catholic parents His name originally was Étienne de Grellet du Mabilier Fleeing at the time of the Revolution, he eventually came (1795) to the United States, where at Newtown (now part of Queens borough), L I, he was converted to the beliefs of the Quakers. In 1796 he joined the Society of Friends, in 1798 he was recorded a minister of that body He engaged in trade in New York city, from the profits of which he financed his extraordinary missionary tours In America they extended through all the settled parts W to Illinois, N into Canada, and S to New Orleans Four extended tours were made in Europe, where every major country was visited, interviews were granted to Grellet by many of the reigning sovereigns He was deeply interested in education, in prison and hospital conditions, in provision for the poor, and in other social problems He inquired into conditions and made recommendations in every country which he visited His memoirs (2 vols, 1860) were edited by Benjamin Seebohm See W. W. Comfort, *Stephen Grellet, 1773–1855* (1942).

Grenada (grĭnā'du), island, area c 119 sq. mi, British West Indies It is part of Grenada colony (133 sq mi, pop 72,055), in the WINDWARD ISLANDS The colony includes the southern half of the archipelago known as the Grenadines. The capital is SAINT GEORGE'S. Volcanic, mountainous, with crater

lakes, Grenada has a healthful climate, moderate temperature, and ample rainfall Sugar and rum are produced for local use, but have been superseded as exports by cacao, nutmegs, mace, cotton, lime oil, and bananas Only about 2 percent of the population is white; the remainder is Negro Although English is the dominant language, a French patois is also commonly spoken From the discovery by Columbus in 1498 until French settlement began in 1650, Grenada was uncolonised Twice thereafter (1762, 1779) it changed hands between England and France, but in 1783 became permanently British

Grenada (grĭnā'dŭ), city (pop 5,831), co seat of Grenada co, N central Miss, on the Yalobusha and NW of Greenwood, in a cotton and timber area, settled in the early 1830s, inc 1836

grenade (grĭnād'), small shell filled with explosives, gas, or chemicals, either thrown by hand or projected from a rifle It may explode on contact or by means of a fuse Grenades were in use as early as the 15th cent, and men trained to use them were called *grenadiers* As the *grenade* fell into disfavor, however, the name grenadier was used for a member of various elite guards, such as those of Frederick II of Prussia and Napoleon I Grenades were reintroduced into wide use in the Russo-Japanese War They were an important weapon in the First World War and were in general use in the Second World War

grenadine. see POMEGRANATE

Grenadines. see GRENADA and WINDWARD ISLANDS

Grenfell, Bernard Pyne (grĕn'fĕl), 1869–1926, English classical scholar and Egyptologist With Arthur Surridge Hunt he discovered at Oxyrhynchus the Logia of Jesus (see AGRAPHA OF JESUS) He became in 1908 professor of papyrology at Oxford and helped edit the *Oxyrhynchus Papyri* (9 vols, 1897–1912) and other similar works

Grenfell, Sir Wilfred Thomason, 1865–1940, English medical missionary, famous for his work among Labrador fishermen and Eskimo After serving as a missionary to fishermen of the North Sea, Dr Grenfell went to Labrador in 1892 During his more than 40 years of selfless and distinguished service there and in Newfoundland, he built hospitals and nursing stations, established cooperative stores, agricultural centers, schools, libraries, and orphanages, and opened the King George V Seamen's Institute in St John's, Newfoundland, in 1912 That same year the International Grenfell Association consolidated the work of the English, American, and Canadian branches supporting his mission Grenfell cruised annually in the hospital steamer, *Strathcona II*, keeping in touch with his centers of missionary work Among his many books are his autobiography (*Forty Years for Labrador*, 1932) and *The Romance of Labrador* (1934) See Basil J Mathews, *Wilfred Grenfell, the Master Mariner* (1930), E H Hayes, *Grenfell, the Labrador Pioneer* (1946 ed)

Grenoble (grŭnō'bŭl, Fr grunō'blu), city (pop 97,287), capital of Isère dept, SE France, beautifully situated on the Isère river at the foot of the Alps It is the historic capital and chief city of DAUPHINÉ, with paper, cement, and electrical industries, and has a famous university founded in 1339 Among its many handsome buildings are the cathedral (12th–13th cent), the Church of St André (13th–14th cent), with the tomb of Bayard, the Renaissance palace of the dauphins (now the courthouse), and a very fine art museum Another museum is devoted to Stendhal, who was born here Near Grenoble is the Grande CHARTREUSE

Grenville, George, 1712–70, British statesman He entered Parliament in 1741, held several cabinet posts, and was prime minister (1763–65) At first a friend of George III, he alienated even the king by initiating the unpopular prosecution of John WILKES at home and provoking unrest in America by the ill-advised STAMP ACT of 1765

Grenville, George Nugent Temple, 1st **marquess of Buckingham,** 1753–1813, British statesman, son of George Grenville He sat in the House of Commons as a Whig (1774–79) and opposed Lord North's policy of coercion of the American colonies While lord lieutenant of Ireland (1782–83) he furthered the legislative independence of the country In his second tenure of the office (1787–89) his policies met with severe criticism and he resigned

Grenville, Sir Richard, 1542–91, English naval hero, cousin of Sir Walter Ralegh He commanded a fleet of seven vessels carrying the first colonists to ROANOKE ISLAND in 1585 In 1591 he was second in command of the *Revenge* in Sir Thomas Howard's fleet which went to capture Spanish treasure ships homeward bound Sir Thomas withdrew on finding the odds against him too heavy, but the *Revenge* became separated from the rest of the fleet, and Grenville tried to break through the Spanish line He fought 15 Spanish ships all one evening and night, was mortally wounded, and finally captured His exploit is celebrated in Tennyson's poem, "The Revenge" Grenville appears in Charles Kingsley's novel, *Westward Ho!* See biography by A L Rowse (1937)

Grenville, William Wyndham Grenville, Baron, 1759–1834, British statesman, son of George Grenville and cousin of William Pitt. After holding minor offices he was Pitt's foreign secretary (1791–1801) and in 1806 formed the "ministry of all the talents" which abolished the slave trade

Grenville, rock system see ARCHEOZOIC ERA

Grenzmark Posen-West Prussia (grĕnts'mark pō'zŭn–), former province (2,978 sq mi, pop 332,485) of Prussia, formed in 1922 from those sections of the old provinces of Posen and West Prussia remaining in Germany after 1919 Its capital was Schneidemuhl In 1937 the province was reduced to district status and incorporated in POMERANIA, in 1945 it was placed under Polish administration

Gresham, Sir Thomas (grĕ'shum), 1519?–1579, English merchant and financier As the royal financial agent in Antwerp after 1551 he proved himself very able, though his methods were frequently more effective than ethical. After Elizabeth's accession to the throne he spent most of his time in London but went on missions, diplomatic and financial He also accumulated a great private fortune as banker, mercer, and merchant He was the principal figure in the founding of the Royal Exchange, and he endowed Gresham College in London His name has been given to **Gresham's law,** the economic principle that in the circulation of money, "bad money drives out good," i e, when depreciated, mutilated, or debased coinage (or currency) is in concurrent circulation with money of high value in terms of precious metals, the good money automatically disappears It was thought that Gresham was the first to state the principle, but it has now been shown that it was stated long before his time and that he did not even formulate it See J W Burgon, *Life and Times of Sir Thomas Gresham* (1839), biography by F R Salter (1925)

Gresham, Walter Quintin, 1832–95, American statesman, b Harrison co, Ind He attended the Univ of Indiana, practiced law, and fought in the Union army in the Civil War President U S Grant appointed (1883) him district judge in Indiana and President Chester A Arthur chose him as Postmaster General (1883) and Secretary of the Treasury (1884), but he was soon made circuit judge (1884) He supported Grover Cleveland on the tariff issue in 1892 and declined the Populist nomination for President He served (1893–95) ably as Secretary of State under President Cleveland See biography by his wife, Matilda McGrain Gresham (1919)

Gresham, town (pop 1,951), NW Oregon, E of Portland, in a fruitgrowing region, inc 1905 The Multnomah County Fair is held here

Gresham's law see GRESHAM, SIR THOMAS

Gresset, Jean Baptiste Louis (zhäⁿ' baptēst' lwō' grĕsā'), 1709–77, French poet He was the author of a mock epic, *Vairvert* (1734), and of a satirical comedy, *Le Méchant* (1747)

Gretchaninov, Aleksandr Tichonovich (ŭlyĭks in'dur tēkŏnō'vĭch grĕchanē'nŏf), 1864–, Russian composer, pupil of Rimsky-Korsakov at the St Petersburg Conservatory Among his works are four symphonies, two operas, and a setting of the Russian Orthodox service, but he is best known for his many songs and sacred choral works He made a European tour in 1922 and moved to Paris in 1925 There he lived until 1939, when he came to the United States (naturalized 1946) His autobiography (in Russian) was published in Paris (1934) His music is romantic and eclectic

Gretna, city (pop 10,879), parish seat of Jefferson parish, SE La, just S of New Orleans Founded in the early 19th cent as Mechanicsham, it was merged in 1913 with McDonoghville, founded by John McDonogh It has small manufactures

Gretna Green or **Gretna,** parish (pop 2,857) and village, Dumfriesshire, Scotland, on the English border It was famous as a place of runaway marriages from 1754 until 1856, when a law was passed requiring that one of the parties to marriage in Scotland reside in Scotland for at least 21 days before issuance of the license In the First World War the government established a great munitions factory near the village

Grétry, André Ernest Modeste (ädrā' ĕrnĕst' mōdĕst' grātrē'), 1741?–1813, French operatic composer, master of the 18th-century *opéra comique* He combined the melodic grace of Italy with the delicate imagination, simplicity, lyricism, and rhythmic finesse of the French His masterpiece is *Richard Cœur-de-Lion* (1784)

Greuze, Jean Baptiste (zhäⁿ' baptēst' grŭz'), 1725–1805, French genre and portrait painter He studied at the Académie royale de Peinture et de Sculpture and won recognition in 1755 with his *Blind Man Deceived* He traveled in Italy and on his return painted a series of pictures of a somewhat moralizing character—*The Village Bride, The Father's Curse, The Wicked Son Punished, The Broken Pitcher* (all Louvre) His vogue as a genre painter was great A tireless worker in love with his art, he attempted to put into painting the aesthetic theories of Diderot As a portraitist Greuze counted among his sitters the dauphin, Robespierre, and Napoleon (all Versailles) In the Revolution he lost both fortune and popularity and died in extreme poverty Fine examples of his work are in the Louvre, the Wallace Collection, London, the Edinburgh National Gallery, and the Metropolitan Museum

Greville, Charles Cavendish Fulke (grĕv'ĭl), 1794–1865, English diarist As clerk of the Council in Ordinary (1821–59), he was closely associated with Wellington, Palmerston, and other political leaders of the reigns of George IV, William IV, and Victoria His memoirs (1874–87, ed by Lytton Strachey and Roger Fulford, 1938) are an invaluable record of the period

Greville, Fulke: see BROOKE, FULKE GREVILLE, 1ST BARON

Grévy, Jules (zhül' grāvē'), 1807–91, French statesman, president of the French republic (1879–87) He was prominent as a leftist politician in the Second Republic, but opposed Napoleon III and was inactive from 1851 until 1868, when he became a deputy President of the national assembly (1871–73) and of the chamber of deputies (1876), he was chosen to succeed MacMahon as president of France He served with quiet dignity as a moderate republican and was reelected, but in 1887 he was forced to resign because of the revelations concerning his son-in-law's traffic in decorations of honor Sadi Carnot succeeded him

Grew, Joseph Clark, 1880–, American diplomat, U S ambassador to Japan (1932–41), b Boston, grad Harvard, 1902 At first a clerk in the American consulate in Cairo, he held posts of increasing importance in different capitals until in 1924 he became Undersecretary of State After serving (1927–32) as ambassador to Turkey he was appointed ambassador to Japan and remained there until the attack on Pearl Harbor He afterwards was special assistant (1942–44) to Secretary of State Cordell Hull and then (1944–45) Undersecretary of State

Grew, Nehemiah, 1641–1712, English botanist and physician He practiced medicine in London and made important microscopic studies of plants His observations of sex in plants were probably the first His most noted book is his *Anatomy of Plants* (1682), in which are included a number of papers on chemistry He was also author of *Anatomy of Vegetables Begun* (1672) and *Comparative Anatomy of Trunks* (1675)

Grey, Albert Henry George Grey, 4th **Earl,** 1851–1917, English statesman, educated at Cambridge, grandson of the 2d Earl Grey In 1880 he entered the House of Commons as a Liberal, but he lost his seat as a result of his opposition to Gladstone's Home Rule Bill of 1886 Grey returned to Parliament as a member of the House of Lords when he succeeded his uncle in the earldom in 1894 Administrator (1896–97) of Rhodesia, he was appointed governor general of Canada in 1904 In this post he served with such success that his term of office was twice extended (to 1911) at the request of the Canadian government See Harold Begbie, *Albert, Fourth Earl Grey a Last Word* (3d ed, 1918)

Grey, Charles Grey, 2d **Earl,** 1764–1845, British statesman, prime minister (1830–34) He cooperated in impeaching Warren Hastings, introduced the motion to impeach the younger Pitt, and opposed the union of Ireland with England He succeeded Charles James Fox as foreign secretary and leader of the House of Commons, putting through Wilberforce's measure to abolish the African slave trade (1807) As prime minister, he secured the passage of the Reform Bill of 1832 by forcing William IV to create enough Whig peers to carry it in the House of Lords See biography by G M Trevelyan (1929)

Grey, Edward see GREY OF FALLODON, EDWARD GREY, 1ST VISCOUNT

Grey, Sir George, 1812–98, British administrator He explored the Swan river district in Australia (1838) and later was governor of South Australia (1841–45), of New Zealand (1845–54), and of Cape Colony (1854–60) He was again governor of New Zealand (1861–68), and after brief residence in London he returned to live in New Zealand and served (1877–79) as premier, advocating radical reforms all later adopted *Polynesian Mythology* (1855) is his most important book See biographies by W L Rees (1892), G C Henderson (1907), and James Collier (1909)

Grey, Lady Jane, 1537–54, candidate for the throne of England She was the daughter of Henry Grey, earl of Dorset (later duke of Suffolk), and Frances Brandon, niece of Henry VIII She became a ward of Lord Seymour of Sudeley, who tried unsuccessfully to bring about a marriage between her and Edward VI Upon Seymour's execution for treason she fell under the control of the duke of Northumberland, who married her to his youngest son, Lord Guilford Dudley Northumberland persuaded the boy king, Edward, to reverse his father's order of succession and name Lady Jane to follow him on the throne. After Edward's death Lady Jane was unwillingly proclaimed queen (July 10, 1553) The English people, however, were in favor of MARY I, and the army of Northumberland disappeared After nine days as nominal queen, Lady Jane was imprisoned Because of her youth and innocence her life would probably have been spared had not her father joined the rebellion of Sir Thomas

WYATT Lady Jane, her husband, and her father were beheaded See R P Davey, *The Nine Days' Queen* (1910)

Grey, Zane, 1875–1939, American novelist, b Zanesville, Ohio, grad Univ of Pennsylvania, 1896 His melodramatic tales of the West and Southwest are vivid in topographical detail, but improbable in character and situation A prolific writer, Grey was best known for his first popular novel, *Riders of the Purple Sage* (1912) Many of his stories have been successfully filmed

Greybull (grā'bŏōl), town (pop 1,828), N Wyo , on the Bighorn river, settled 1904, inc 1912 It is an oil-refining center

greyhound, tall, slender dog, with narrow, pointed nose and, usually, a silky gray coat of short hair The greyhound is exceedingly graceful in form and in its movements and is very swift He is trained for racing and sometimes achieves a speed of more than 35 mi an hour The breed is so old that its origin is unknown, a similar dog was known to the Greeks and Egyptians The Italian greyhound is a toy breed prized for many centuries as a pet See also WHIPPET

Greylock, peak, 3,491 ft high, NW Mass , in the Berkshires SW of North Adams, highest point in the state The summit, included in a state reservation, is accessible by motor

Grey of Fallodon, Edward Grey, 1st Viscount (fă'lŏdun, -ludŭn), 1862–1933, British statesman He became foreign secretary (1905) in the difficult period preceding the First World War He encouraged the understanding with France and Russia, opposed German designs in North Africa (1911), and fostered peace in the Balkans (1913) His great efforts toward peace in Europe failed to avert the war and he resigned in 1916 He was ambassador to the United States (1919–20) with special reference to peace negotiations and gave encouragement to the League of Nations His chief publications are *Twenty-five Years, 1892–1916* (1926), *Fallodon Papers* (1926), and *Speeches on Foreign Affairs, 1904–1914* (1931) See biography by G M Trevelyan (1937)

Grey Owl or **Wa-Sha-Quon-Asin,** 1888–1938, Canadian author and lecturer He represented himself as an Apache Indian, but the facts about his birth are obscure As a guide and forest ranger in Ontario and Quebec, he had great success in taming beaver and other wild creatures He became an ardent advocate of conservation and in 1920 was appointed conservation officer at Prince Albert National Park, Sask In his later years he wrote several books, among them *The Men of the Last Frontier* (1932), *The Adventures of Sajo and Her Beaver People* (1935), and *Tales of an Empty Cabin* (1936) He also lectured in England and America See biographies by Harper Cory (rev ed , 1936) and Lovat Dickson (1939)

Greytown, Nicaragua see SAN JUAN DEL NORTE

Griboyedov, Aleksandr Sergeyevich (ūlyĭksan'dur sirgā'uvĭch grĭbuyĕ'dŏf), 1795–1829, Russian playwright His fame rests upon a single play, *The Misfortune of Being Clever* (1825, Eng tr , 1914), a satire in rhymed iambics directed against Moscow society It owes something to Molière's *Misanthrope*, but is typically Russian in scene and characters Griboyedov's letters are much read

grid, in the vacuum TUBE, a fine wire spiral or mesh surrounding but insulated from the cathode and in turn surrounded by but insulated from the plate Modern tubes may contain several such grids, e g , screen grid, suppressor grid, and control grid The control grid is the one usually referred to simply as the grid Its function is to control the stream of electrons from cathode to plate The action is based on the principle of repulsion and attraction between electrically charged bodies The grid is normally more negative than the cathode This condition, called bias, may be achieved in several ways—by the use of a cathode resistor, grid-leak resistor, bias-cell, or C battery Electrons emitted by the cathode—themselves being negatively charged—are impeded by the grid in their drift toward the plate The signal input to the tube is a varying voltage which is applied to the grid, making it now less, now more negative, permitting now more, now fewer electrons to pass to the plate beyond, a point of high positive potential and, consequently, much greater attraction

Gridley, Charles Vernon, 1844–98, U S naval officer, b Logansport, Ind , grad Annapolis, 1863 He was in the Civil War battle of Mobile Bay and continued in naval service He was flagship commander under George Dewey at Manila in 1898 It was to him that Dewey said, "You may fire when you are ready, Gridley " Already in ill-health, Gridley died en route home

Gridley, Richard, 1711–96, American military engineer, b Boston He came to prominence in the French and Indian Wars, taking part in the capture of Louisburg by William Pepperrell in 1745, serving under William Johnson in the Crown Point expedition and the building of Fort William Henry on Fort George in 1755, and participating in the capture of Quebec in 1760. The British rewarded him with the Magdalen Islands in the Gulf of St Lawrence, and he lived there for a time. In the American Revolution he took the patriot side He was chief engineer of the Continental army (1775–76), and under William Prescott he supervised the building of breastworks at Breed's Hill (see BUNKER HILL, BATTLE OF)

Gridley, city (pop 2,338), N central Calif , N of Sacramento, in a diversified farming area, inc 1905

Grieg, Edvard Hagerup (ĕd'vär hä'gurōōp grĕg'), 1843–1907, Norwegian composer, studied at the Leipzig Conservatory Under the influence of N W Gade, he at first wrote in the idiom of German romanticism, but after 1864, when the composer Richard Nordraak (1842–66) had introduced him to Norwegian folk music, his music showed strong Norwegian nationalism In 1864 he became conductor of the Philharmonic Society of Christiania, and the following year he established the Academy of Music there Grieg's lyrical gift produced the finest music in small forms—songs and piano pieces, the Piano Concerto in A Minor (1868) is the one large work by which he is known In 1874 Ibsen asked him to write the incidental music for *Peer Gynt* The play was produced the following year, Grieg's music, in the form of two orchestral suites, became his most popular work He also wrote three violin sonatas and some chamber music See David Monrad-Johansen, *Edvard Grieg* (Eng tr , 1938), H T Finck, *Grieg and His Music* (rev ed , 1929)

Grien, Hans Baldung see BALDUNG, HANS

Grier, Robert Cooper (grēr), 1794–1870, American jurist, Associate Justice of the U S Supreme Court (1846–70), b Cumberland co , Pa , grad Dickinson College, 1812 He was admitted (1817) to the bar and early acquired a large practice He served (1833–46) as district court judge and was then appointed Associate Justice of the Supreme Court by President Polk In a period when decisions on sectional issues aroused political furor, Grier concurred (1857) in the Dred Scott decision and was accused of undue Southern sympathy During the Civil War, however, he remained strongly loyal to the Union, and he wrote the opinion in the Prize Cases which upheld the President's power to blockade the Southern ports After the war he maintained his independent attitude by opposing radical Reconstruction measures when they were brought before the Supreme Court

Grierson, Sir George Abraham, 1851–1941, Irish philologist Besides writing grammars of many modern Indian vernaculars, he directed compilation of the great *Linguistic Survey of India* (19 vols , 1894–1927)

Griffenfeld, Peder Schumacher, Count (pā'dhur shōō'makhur, grĭ'funfĕlt), 1635–99, Danish statesman The son of a merchant, he completed his education in the Netherlands, Germany, and England He became secretary to FREDERICK III (1665) and drew up the *Kongelov* [king's law] which established absolute rule in Denmark, he delivered (1670) the document, kept secret until Frederick's death, to CHRISTIAN V From 1671 until his fall in 1676, Griffenfeld dominated the Danish government In 1673 he was created count He encouraged trade and industry and centralized the administration The nobles opposed him because he was a bourgeois and a spokesman for absolutism His peace policy, through which he hoped to restore Denmark to the rank of a great power, alienated the army Denmark was drawn into war with Sweden (1675), Griffenfeld's plans were overruled He was imprisoned and tried for treason on trivial evidence, the death sentence was commuted to life imprisonment

Griffes, Charles Tomlinson (grĭ'fĭs), 1884–1920, American composer, b Elmira, N Y , pupil of Humperdinck in Germany Outstanding larger compositions are *The Pleasure-Dome of Kubla Khan* (Boston, 1920), for orchestra, his *Poem*, for flute and orchestra (1918), and *Roman Sketches* (1915–16), for piano, from which *The White Peacock* is a popular selection His piano sonata (pub 1921) represents his mature style, in which he was free from the earlier influences of German romanticism and of impressionism See biography by E M Maisel (1943)

Griffin, Eugene, 1855–1907, American electrical engineer, b Ellsworth, Maine, grad West Point, 1875 He participated in the geographical survey in the Southwest and served as engineer in the military department of the East As assistant engineer in the District of Columbia (1886–88), he made an extensive investigation of the use of electricity in the United States and published a report on the adaptability of electricity for street railways In 1889 he became an executive in the Thomson-Houston Electric Company, using his influence to promote streetcar transportation throughout the country After the consolidation with the Edison Company to form the General Electric Company, in 1892, he became vice president of that company He served in the Spanish-American War

Griffin, Gerald, 1803–40, Irish novelist and poet. His best novel, *The Collegians, or, The Colleen Bawn* (1829), was dramatised by Dion Boucicault in 1859 His own play, *Gisippus*, was successfully produced in 1842

Griffin, city (pop 13,222), co. seat of Spalding co , W central Ga , 8 of Atlanta, in a fertile agricultural area yielding cotton and other products, laid out 1840, inc 1843. It has cotton mills and farm-product processing plants Near by is a state agricultural experiment station

griffin, in ancient and medieval mythology, an animal usually represented as a cross between a lion and an eagle The place of the griffin in ancient sculpture is conspicuous, as in that of the Assyrians and the Persians It appears in heraldry symbolizing vigilance Its origin is traced to the Hittites The biblical griffin is probably the osprey

Griffing Park, town (pop 1,344), E Texas, near Beaumont, inc 1929

Griffith, Arthur, 1872–1922, Irish statesman, founder of SINN FEIN He was a journalist from his youth, and his principal service to his cause was the propaganda of his newspapers, which repeatedly failed and were revived under new names—*The United Irishman*, literarily his best paper (1899–1906), *Sinn Féin, Eire, Scissors and Paste, Nationality*, and *Eire Og* In *Sinn Féin* and *Eire* he did his most influential work in advancing the Irish Ireland ideal He was imprisoned several times by the authorities, especially for his opposition to recruiting in Ireland (1916–18) At the first DÁIL ÉIREANN he was elected vice president, and in DE VALERA'S absence (1919–20) he was in command of the revolution Griffith naturally succeeded when De Valera resigned the presidency to oppose the treaty, and he was first president (1922) of the constitutional Free State He died suddenly at the beginning of the civil war His edition of John Mitchel's *Jail Journal* appeared in 1940

Griffith, David Wark, 1875–1948, American moving-picture director and producer, b La Grange, Ky After appearing in stock companies (1897–1906), Griffith was given the leading role in Edwin S Porter's moving picture *Rescued from an Eagle's Nest* (1907) His association with the Biograph Company started in 1908, when he wrote scenarios and acted in several productions In that year he became a director for Biograph and had as his assistant the expert cameraman and inventor G W Bitzer In the work which followed, Griffith evolved the principles and formed the patterns of moving-picture technique He changed a camera in mid-scene, used crosscutting, introduced the flash back, the long shot, the close-up, the fade-in, the fade-out, accelerated editing, and made the first American film of four reels, *Judith of Bethulia* (1913) The first notable long American film, *The Birth of a Nation* (1915), sums up all of Griffith's experiments and discoveries and is a landmark in the history of the moving picture Among his other important films are *Intolerance* (1915), the first "spectacle" film, *Hearts of the World* (1917), *Broken Blossoms* (1919), *Way Down East* (1920), and *Orphans of the Storm* (1921) See Mrs D W Griffith, *When the Movies Were Young* (1925), Iris Barry, *D W Griffith, American Film Master* (1940)

Griffith, town (pop 2,116), Lake co., NW Ind , SE of Chicago, settled 1891, inc 1904

Griffiths, Ann, 1776–1805, Welsh poet and hymn writer She wrote 76 hymns, published after her death, all notable for intensity of feeling, extraordinary radiance, and poignant simplicity

Griffiths, David, 1867–1935, American botanist, b Wales In 1900 he became professor of botany at the Univ of Arizona, and after 1901 he was affiliated with the U S Dept of Agriculture He has written bulletins on the forage and range conditions of the Western states

Griffiths, John Willis, 1809–82, American naval architect, b New York city By the ships he built —particularly the steamships he designed for the Collins line in the 1850s—and by his *Treatise on Marine and Naval Architecture* (1853), he exercised much influence on American naval architecture

Griggs, John William, 1849–1927, American lawyer and cabinet officer, b Newton, N J , grad Lafayette College, 1868 He practiced law at Paterson, N J , and became politically prominent He was Republican governor of New Jersey (1896–98), Attorney General under President McKinley (1898–1901), and a member of the Permanent Court of Arbitration (1901–12)

Griggsville, city (pop 1,266), W central Ill , W of Springfield, in a farm area, inc 1878

Grignard, Victor (vēktôr' grēnyar'), 1871–1935, French chemist He shared the 1912 Nobel Prize in Chemistry for his work in organic synthesis based on his discovery (1901) of the Grignard reagent He taught at the Univ of Nancy (1909–19) and at the Univ of Lyons (from 1919)

Grignard reagent, a halogen compound formed by the reaction of an alkyl halide with metallic magnesium in the absence of water It is widely used in combination with other substances to synthesize certain alcohols and other organic compounds, the synthesis involves the reaction known as the Grignard reaction

Grigorovich, Dmitri Vasilyevich (dumē'trē vŭsē'lyuvĭch grĭgurô'vĭch), 1822–99, Russian novelist He was strongly influenced by George Sand and was a forerunner of Turgenev in his novels of peasant life—*The Village* (1846), *Anton Goremyka* (1847), and *The Fishermen* (1855, Eng. tr , 1916)

He portrays the peasant realistically and with compassion

Grijalva, Juan de (hwän' dā grēhäl'vä), d 1527, Spanish explorer, commander of an expedition for the purpose of furthering the discoveries of FERNÁNDEZ DE CORDOBA Leaving Santiago de Cuba in April, 1518, he sailed to Yucatán and explored the coast of Mexico at least as far as the neighborhood of Veracruz Grijalva was the first Spaniard to hear of the empire of Montezuma In 1523 he went to Mexico; later he took part in the conquest of Nicaragua.

Grijalva, river rising in N Guatemala and flowing NW into S Mexico and generally N through Chiapas and Tabasco to the Gulf of Campeche It is navigable for c 60 mi Several branches of the USUMACINTA flow into it. Named for Juan de Grijalva, who discovered it in 1518, the river is also called the RIO Grande de Chiapas in the highland region

grille, in architecture, a system of bars, usually of decorative metalwork, forming an openwork barrier or enclosure In its usual materials of wrought iron or bronze, it has been a favored subject for decorative treatment in all periods Besides its almost universal function of protecting window and door openings, the grille since early medieval times has been used widely as an ornamental enclosure, especially in churches, for tombs, chapels, or shrines An early authenticated example is of pierced bronze in the Church of the Nativity at Bethlehem (5th or 6th cent) Other notable grilles are those around the tombs of the Scalas, Verona (13th cent), that which formerly enclosed the tomb of Edward IV, St George's Chapel, Windsor (15th cent); and the railing of the tomb of Emperor Maximilian I, Innsbruck, Austria (16th cent) The Renaissance was notable for its lavish employment of decorative metalwork, in England one of the great names is that of Jean Tijou (17th cent) who executed many notable grilles at St Paul's Cathedral and Hampton Court Palace, in 18th-century France the works of Jean Lamour, especially at Nancy, are noteworthy But it was in Spain that the Renaissance grille reached its height in the *rejas* or monumental altar and choir screens in the great cathedrals, usually of wrought iron gilded In modern times the grille has been marked by the appearance of new forms, some of which possess no merit except novelty, others, especially at the hands of masters such as Edgar Brandt, achieve real beauty.

Grillparzer, Franz (frants' grĭl'pärtsĕr), 1791–1872, Austrian dramatist and civil servant As a dramatist he is often mentioned with Goethe and Schiller Among his plays, notable for their power and poetic beauty, are *Die Ahnfrau* (1817), a trilogy, *Das goldene Vlies* (1819–22), *Der Traum ein Leben* (1817–34), his most romantic work, which influenced among others Hauptmann and Maeterlinck, the lyric tragedy based on the story of Hero and Leander, *Des Meeres und der Liebe Wellen* (1819), and the posthumous *Die Jüdin von Toledo* (Eng tr , *The Jewess of Toledo*, 1913–15) He is also noted for the finely wrought *Novelle, Der arme Spielmann* (1848, Eng tr , *The Poor Minstrel*, 1913–15), perhaps his most artistically perfect work See J F Coar, *Studies in German Literature in the 19th Century* (1903)

Grimald, Grimalde, or **Grimoald, Nicholas** (grĭm'-ŏld), 1519–62, English poet, educated at Cambridge and Oxford He contributed 40 poems to Tottel's miscellany (1557) and wrote two Latin dramas

Grimaldi (grēmäl'dē), race of men of the Paleolithic period The concept of this race is based on studies of two skeletons found in the early 20th cent in one of the Grimaldi caverns in NW Italy at the French border These skeletons, one of a woman and one of a youth, have some Negroid characters, but whether they really represent a Negroid race is controversial At another level in the same cave and also in the other Grimaldi caves, a number of skeletons of Cro-Magnon man have been discovered.

Grimaldi, Francesco Maria (frānchä'skō märē'ä grēmäl'dē) 1618?–1663, Italian physicist and Jesuit priest. He was the first to describe the fringes which bound the shadow of an object illuminated by a small point of light and which are caused by the diffraction of light.

Grimaldi, Giovanni Francesco (jōvän'nē), 1606–80, Italian painter, architect, and engraver, called Il Bolognese, pupil of the Carracci and of Francesco Albani With the exception of two years in France (1649–51), where he decorated the Masarin Palace and other buildings under the patronage of Cardinal Masarin, most of his life was spent in Rome He was employed as architect and painter by different popes His paintings, chiefly landscapes in the manner of the Carracci, are found in the Borghese and Colonna galleries and the Quirinal, Rome, the Louvre, and the Imperial Gallery, Vienna. Several etchings of his own landscapes and of the works of Titian and the Carracci attest his skill in that art.

Grimaldi, Joseph (grĭmäl'dē), 1779–1837, English pantomime actor and clown. He made his debut at the age of three in *Robinson Crusoe* at Sadler's Wells, London. He performed there and at Drury Lane for many years, and by the time he played clown in his production of *Mother Goose* at Covent Garden in 1806 he was a legend. He last appeared in *Harlequin Hoax* (1828) A master of grimace and of pantomime stagecraft, he was so beloved that the gallery clamored for his songs long after his death See his memoirs (ed by Charles Dickens, 1838), A E Wilson, *King Panto* (1935)

Grimké, Angelina Emily (grĭm'kē), 1805–79, American abolitionist and advocate of woman's rights, b Charleston, S C. Converted to the Quaker faith by her elder sister Sarah Moore GRIMKÉ, Angelina nevertheless felt frustrated in her strong desire to do something worth while for humanity until, in 1835, she came upon some pamphlets issued by the American Anti-Slavery Society Immediately she became an abolitionist and wrote *An Appeal to the Christian Women of the South* (1836) as a testimony of her conversion She enlisted Sarah in the anti-slavery crusade, and the two, after attending the convention of the "Seventy," the society's select group of agents trained by Theodore D WELD, began speaking among the society's women's auxiliaries around New York city At first they were not particularly effective, but after further tutoring by Weld they began to attract more favorable attention Angelina, in fact, developed into an orator of considerable power. Invited (1837) to lecture in Massachusetts, the sisters created a sensation there, men as well as women flocking to hear them Neither was beautiful, but they were obviously ladies of distinction Angelina's three appearances before the Massachusetts legislative committee on antislavery petitions early in 1838 constituted a triumph. However, conservatives, especially Congregational clergymen, began to condemn "females [who took] an obtrusive and ostentatious part in measures of reform," and the question of woman's rights soon divided antislavery adherents In this split the Grimké sisters at first enrolled under the banner of William Lloyd GARRISON, who loudly proclaimed his devotion to the theory of woman's rights. Weld and other more effective leaders of the abolition crusade such as John Greenleaf Whittier, who, in practice, were actually more favorable to woman's rights than Garrison and his extremists, urged the sisters to avoid controversy over the question lest the antislavery cause be hopelessly wrecked through dissension. When in Feb , 1838, Angelina accepted Weld's proposal of marriage, she recanted her Garrisonian opinions, and Sarah too soon came to hold the view that no matter how important the cause of woman's rights might be, it or any other extraneous doctrine should not serve to weaken the larger cause of abolition Angelina's ill-health after her marriage led her to abandon the lecture platform, but "Carolina's high-souled daughters," as the sisters were called, continued to aid Weld in his work and maintained a lasting, lively interest in the causes to which they had contributed so much See Catherine H Birney, *The Grimké Sisters* (1885), G H Barnes and D L Dumond, ed , *Letters of Theodore Dwight Weld, Angelina Grimké Weld, and Sarah Grimké, 1822–1844* (2 vols , 1934)

Grimké, Archibald Henry, 1849–1930, American Negro author and crusader for Negro advancement, b near Charleston, S C The son of a white father and a slave mother, he was graduated from Lincoln Univ (B A , 1870, M A , 1872) and, aided by his aunt, Sarah Moore Grimké, from Harvard (LL B , 1874) He then practiced law in Boston. Besides many articles in different periodicals on race problems and pamphlets published by the American Negro Academy, of which he was president (1903–16), he wrote biographies of William Lloyd Garrison (1891) and Charles Sumner (1892) From 1894 to 1898 he was American consul to Santo Domingo In 1919 he was awarded the Spingarn medal by the National Association for the Advancement of Colored People for his services in behalf of the Negro

Grimké, Sarah Moore, 1792–1873, American abolitionist and advocate of woman's rights, b Charleston, S C Her father, John Faucheraud Grimké (1752–1819), served in the American Revolution and was long senior associate judge (virtually chief justice) of the South Carolina supreme court, and her brother, Frederick Grimké (1791–1863), was also a supreme court justice, in Ohio Another distinguished lawyer brother, Thomas Smith Grimké (1786–1834), was an organizer of the American Temperance Society and the American Peace Society Although Sarah's father had the reputation of being a stern judge, he was unusual for his day in having a high regard for the intellectual capacities of women, and Sarah profited from her close association with him and her brother Thomas. Thomas moved her to question the authority of the Episcopal Church, and on a visit to Philadelphia, Sarah joined the Society of Friends She converted her younger sister Angelina to the Quaker faith, and the two left the "ungentle, uncongenial air" of Charleston, as Angelina described it in Jan., 1832, and removed to the North permanently. Angelina, becoming an abolitionist in 1835, in turn converted Sarah, and these two timid daughters of an aristocratic slaveholding family became the first women who dared to speak in public for the Negro slave and then for woman's rights. Sarah wrote *An Epistle to the Clergy of the Southern States* (1836), urging abolition, and *Letters on the Equality of the Sexes and the Condition of Woman* (1838). In 1838 the sisters persuaded their mother to give them, as their share of the family estate, slaves, whom they promptly freed. For further details on Sarah's activities and for bibliography, see GRIMKÉ, ANGELINA EMILY.

Grimm, Friedrich Melchior (frē'drĭkh mĕl'khôr grĭm'), 1723–1807, German man of letters in France, b Regensburg His series of periodical letters from abroad (1753–74), *Correspondance littéraire* (1st complete ed , 1829–30), is a source for the ENLIGHTENMENT. He was made a baron of the Holy Roman Empire

Grimm, Jakob Ludwig Karl (yä'kôp lōōd'vĭkh), 1785–1863, German philologist, one of the great founders of comparative philology Interested principally in the relationship between the various Germanic languages, he first fully stated GRIMM'S LAW His German grammar (1819–37) and his *German Mythology* (1835, Eng tr , 1880–88) were works of first importance He is world famous for his collection and publication of German folk tales, commonly known as *Grimm's Fairy Tales* (1812–15), in which he collaborated with his brother, **Wilhelm Karl Grimm** (vĭl' hĕlm), 1786–1859. The brothers Grimm also planned and inaugurated the great German dictionary, of which Vol I appeared in 1852

Grimmelshausen, Hans Jakob Christoffel von (häns' yä'kôp krĭs'tôfûl fŭn grĭ'mûlshou"zŭn), 1625?–1676, German novelist At the age of 10 he was kidnaped by soldiers and forced to remain in the army Later he succeeded in educating himself and became a magistrate and man of letters Of his various satires and other works, the most famous is the translated picaresque novel, *The Adventurous Simplicius Simplicissimus* (1669, known as *Simplicissimus*), written under one of his numerous pseudonyms It is characterized by misanthropy, vigor, humor, and strong character drawing.

Grimm's law, principle of relationships in Indo-European languages, first observed by Jakob Grimm in 1822 It shows that primitive tenues (k, t, p) become aspirates in Low German (e g , English) and medias in High German (German), that primitive aspirates (gh, dh, bh) become medias in Low German, tenues in High German, and that primitive medias (g, d, b) become tenues in Low German, aspirates in High German In English, aspirates are h, th, f, medias, g, d, b, tenues, k, t, p In German, medias are h, d, f, tenues, k, t, p; aspirates, ch, z, f Words representing Grimm's law are, initially, Latin *pater*, English *father*, German *Vater*, in the dental, Latin *frater*, English *brother*, German *Bruder;* initially, Sanskrit *dhar*, English *draw*, German *tragen*, initially, Latin *decem*, English *ten*, German *zehn*

Grimoald, Nicholas see GRIMALD, NICHOLAS

Grimsby (grĭmz'bē), town (pop 2,331), S Ont , on Lake Ontario between Hamilton and St Catharines It is the center of a fruit-farming district, has small manufactures, and is a summer resort

Grimsby, county borough (1931 pop 92,458, 1947 estimated pop 90,390), in the Parts of Lindsey, Lincolnshire, England, at the mouth of the Humber river and SE of Hull It is the largest fishing port in Great Britain, the docks, begun in 1849, cover more than 100 acres, and there are passenger steamship lines to the Continent Grimsby has an extensive trade in fish, coal, and timber Cleethorpes is a resort suburb

Grimsel (grĭm'zŭl), pass, 7,159 ft high, between the Rhone and Aar valleys, Switzerland The modern Grimsel Road (built 1891–94), over the pass, connects the canton of Bern with Valais. The dammed Grimsel Lake, near by, supplies water to the Handegg power station, which is one of the largest in Switzerland

Grindelwald (grĭn'dûlvält), resort (resident pop 2,916), Bern canton, Switzerland, at the foot of the Eiger, Schreckhorn and Wetterhorn and of the Upper and Lower Grindelwald Glaciers

grinding and polishing includes shaping, sharpening, polishing, and finishing a metallic or other surface by means of a grinding machine The grinding machine consists essentially of an abrasive rotating wheel against which is pressed the surface to be treated Machines vary in type and abrasive action according to the material to be worked upon The simplest forms are the familiar hand-driven grindstone and the emery wheel, both of which are called nonprecision grinders; precision grinders are machine tools capable of accuracy within *thousandths of an inch*

grindstone, an abrasive stone shaped and mounted to turn as a wheel. It is used dry or with water, for the coarser grinding of edge tools and implements, such as the ax and the scythe.

Gringore, Pierre (pyĕr' grĕgôr'), c.1475–c 1539, French dramatist and poet. He produced mysteries and wrote the *Jeu du prince des sots* (1512), a dramatic work on contemporary political subjects. By an old error his name appears often as Gringoire.

Grinnell, George Bird (grĭnĕl'), 1849–1938, American naturalist and student of Indian life, b. Brook-

lyn, N.Y., grad Yale (B A , 1870; Ph D , 1880). He accompanied Custer's Black Hills expedition as naturalist (1874), was with William Ludlow's expedition to Yellowstone Park (1875), and was a member of the Harriman Alaska expedition, 1899 He was editor of *Forest and Stream* from 1876 to 1911 and was prominent in preservation of wildlife and conservation movements He organized the first Audubon Society and was an organizer of the New York Zoological Society In 1885 he discovered the glacier in Montana which now bears his name and was influential in legislation which led to the establishment (1910) of Glacier National Park He is best known, however, for his books on the Plains Indians, such as *Pawnee Hero Stories* (1889), *Blackfoot Lodge Tales* (1892), *The Story of the Indian* (1895), *The Indians of Today* (1911), *The Fighting Cheyennes* (1915), *The Cheyenne Indians* (1923), and *By Cheyenne Campfires* (1926)

Grinnell, Josiah Bushnell, 1821–91, American pioneer, clergyman, and abolitionist, b New Haven, near Middlebury, Vt , grad Auburn Theological Seminary, 1847 As pastor (1851–52) of the First Congregational Church in Washington, D C , he created a sensation by preaching an antislavery sermon, which cost him his pastorate It was to him that Horace Greeley gave the famous advice, "Go West, young man, go West!" Go Grinnell did —to Iowa, where he founded (1854) the town of Grinnell and gave land and buildings (1859) to Iowa College, which was later named Grinnell College An abolitionist political leader, he aided in the formation of the Republican party He also helped to extend education in Iowa, to promote railroads, and to aid agriculture and stock raising (especially by introducing new breeds) See the autobiographical *Men and Events of Forty Years* (1891), biography by C E Payne (1938)

Grinnell, city (pop 5,210), central Iowa, between Des Moines and Iowa City, inc 1865 It was founded by Josiah Bushnell GRINNELL in 1854 and named for him **Grinnell College** (nonsectarian, coeducational) was chartered as Iowa College in 1847 and opened in 1848 at Davenport by pioneer Congregational missionaries The school moved in 1859 when Grinnell donated land and a building, the college was named for him in 1909

grippe see INFLUENZA

Gripsholm (grĭps-hôlm'), castle, SE Sweden, on Malaren lake and near Stockholm Now a museum, it was begun in 1537 by Gustavus I

Griqualand see TRANSKEIAN TERRITORIES

Gris, Juan (hwän' grēs'), 1887–1927, Spanish cubist painter, whose real name was José Victoriano González After studying in Madrid he settled (1906) in Paris, where he held (1912) his first exhibition at the Salon des Indépendents His early work, such as the *Portrait of Picasso* of 1910, is very similar to Picasso's style of the same period, but Gris's cubism remained pure and subjective The majority of his works are still lifes, both in oils and in collage, he also executed several portraits The Museum of Modern Art, New York, owns several still lifes, but most of his pictures are in private collections See study by D H Kahnweiler (1947)

Griselda (grĭzĕl'dŭ), long-suffering heroine of medieval story, supposedly drawn from the marquise of Saluzzo (11th cent), whose husband, to test her devotion, subjected her to numerous trials The story was used by Boccaccio in the *Decameron*, by Chaucer in the Clerke's Tale, and by Dekker in the comedy *Patient Grisel*

Grisi, Giulia (jōō'lyä grē'zē), 1811–69, Italian operatic soprano She toured the United States in 1854 with Giuseppe Mario, whom she married in 1856 Roles were written for her by Bellini, in *I Puritani*, and by Donizetti, in *Don Pasquale* Her first teacher was her sister, **Giuditta Grisi** (jōōdēt'tä), 1805–40, a messo-soprano, who married and retired in 1834

Gris-Nez, Cape (grē-nā'), cliff, N France, projecting into the Strait of Dover, SW of Calais and 21 mi from the English coast It has a lighthouse

Grisons (grēsôns', Fr grēsôN'), Ger *Graubünden* (groubün'dŭn), canton (2,746 sq mi , pop 128,247), Switzerland, bordering on Italy and Austria The largest and most scarcely populated of the cantons, it has pastures, Alpine peaks and glaciers, forests, hydroelectrical stations, and some cultivated valleys The ENGADINE Valley and the Swiss National Park, in the eastern part of the canton, attract large tourist traffic Part of Rhaetia under the Roman Empire, the territory preserved Roman laws and customs, though it nominally passed to the Ostrogoths (493) and to the Franks (537) In the 9th cent the bishops of CHUR, its present capital, began to attain prominence in the region, their power was checked and gradually broken by three local leagues founded between 1367 and 1436—the League of God's House, the Gray League (which gave its name to the canton), and the League of Ten Jurisdictions The three leagues, composed of communes and feudal lords, allied and joined with the Swiss Confederation In 1512 they conquered the Valtellina from Milan Only part of the population accepted the Reformation (1524–26). In the Thirty Years War the country was rent by bloody strife between the Catholic party, siding with Spain and the emperor, and the Protestants, siding with Venice and France With the VALTELLINA the chief bone of contention, the struggle was one of European importance In 1799 the Grisons were forced by French arms to enter the Helvetic Republic, and in 1803 they became a Swiss canton under Napoleon's Act of Mediation The Valtellina was definitely lost at the Congress of Vienna (1815) In 1937 Romansh, a Rhaetic dialect spoken by almost a third of the population, was made a national language A smaller minority speak Italian, and the rest, German

Griswold, Matthew (grĭz'wŭld), 1714–99, American jurist and statesman, b Lyme, Conn Admitted to the bar in 1743, he was very learned in the law and also took a small part in Connecticut politics As deputy governor (1769–84) before and during the American Revolution he was ex officio judge of the highest court in Connecticut, and by his wisdom contributed much to the new state in troubled times He was later governor and presided over the state convention that ratified the Constitution. Roger Griswold was his son

Griswold, Roger, 1762–1812, American politician, leader of New England Federalism, b Lyme, Conn , grad Yale, 1780, son of Matthew Griswold A Connecticut lawyer, he entered politics and, as U S Congressman (1794–1805), was a vigorous Federalist and a virulent critic of Jefferson's administration, going so far as seriously to advocate the separation of New England from the Union He was lieutenant governor of Connecticut (1809–11) and governor (1811–12) In the last office he expressed Connecticut's attitude toward the war with England by withholding the state militia from the command of Federal officers, thereby causing a test case on the clause in the Constitution dealing with the authority of the President to requisition the state militia

Griswold, Rufus Wilmot, 1815–57, American author and editor, b Benson, Vt He was an itinerant printer and journalist and settled in New York as a protégé of Horace Greeley As editor of *Graham's Magazine* (1842–43) and of the *International Monthly Magazine* (1850–52) and as anthologist of *The Poets and Poetry of America* (1842) and many similar books, he was influential and was able to help such writers as Alice Cary, Charles G Leland, and Bayard Taylor He had known Edgar Allan Poe since 1842 and on Poe's death was named his literary executor The obituary he wrote emphasized all the scandals attached to Poe's name His edition of Poe's writings was conscientious, but in editing the letters he added passages favorable to himself and had them published as Poe's own His most important book was *The Republican Court, or, American Society in the Days of Washington* (1855) See his selected letters and papers (ed by his son, W McC Griswold, 1898), biography by Joy Bayless (1943)

Griswold. 1 Town (pop 5,343), SE Conn , bordered on the west by the Quinebaug, settled c 1690, inc 1815 It includes the textile-producing borough Jewett City (pop 3,682, chartered 1895) 2 Town (pop 1,132), SW Iowa, on the East Nishnabotna river and E of Council Bluffs, inc 1880 It is a trade and manufacturing center for a rich corn area Cold Springs State Park is not far

grits, coarsely ground grain, usually wheat, oats, or maize, with the hulls removed It is used as a vegetable dish or as a breakfast food

grizzly bear see BEAR

Grocyn, William (grō'sĭn), 1446?–1519, English humanist An associate of John COLET and Thomas LINACRE, he reputedly introduced the teaching of Greek at Oxford

Grödnertal, Italy see GARDENA, VAL

Grodno (grôd'nô), city (1931 pop 49,818), capital of Grodno oblast, Belorussia, on the Niemen and 45 mi NE of Bialystok Dating from at least the 10th cent and once the capital of an independent principality, it was included (13th cent) in the grand duchy of Lithuania In 1673 it became a seat of Polish diets, the last of which (1793) was forced to consent to the second partition of Poland In 1795 STANISLAUS II abdicated here, the city passed to Russia and became a provincial capital It reverted to Poland in 1921 and was ceded to the USSR in 1945 The medieval castle was restored in the 1930s Ruins of the ducal residence are the oldest example of secular brick architecture in this part of Europe Grodno, which produces agricultural machinery, cloth, and tobacco, is a transportation and commercial center Here Stephen Bathory and the Polish novelist Orzeszkowa died Grodno oblast (5,000 sq mi ; pop 800,000) is largely a lowland, which has the 257,300-acre Grodno Forest (mostly pine) and phosphate deposits

Groesbeck (grōs'bĕk), city (pop 2,272), co seat of Limestone co , E central Texas, E of Waco It is a market town with small industries in a region growing cotton and other crops and yielding dairy products, clay, timber, and oil

grog, originally a mixture of rum and water The term is now applied to almost any unsweetened mixture of spirits and water, hot or cold, and it is sometimes used for any intoxicating drink hence, grogshop, groggy.

groin, in architecture see VAULT

Grolier de Servières, Jean, vicomte d'Aguisy (grôl'yēr, Fr. zhäN' grôlyā' du sĕrvyĕr' vēkôt' dägēzē'), 1479–1565, French book collector While he was French ambassador in Italy (1510–15), he made the acquaintance of Aldus Manutius, the Italian printer and scholar Grolier's library consisted of some 3,000 richly bound volumes, which remained in his family until dispersed in 1675 About 350 volumes are now known to be in existence, many are in the Bibliothèque nationale These books bear their owner's *ex libris*, "J Grolerii et amicorum," which probably indicates that he also secured copies of the book for his friends A New York club of bibliophiles, the Grolier Club (1884), is named after him See Brander Matthews, *Bookbindings . with an Account of the Grolier Club* (1895)

Gromyko, Andrei Andreyevich (ŭndrā' ŭndrā'uvĭch grŭmē'kŭ), 1909–, Russian diplomat He was Soviet ambassador at Washington (1943–46) and chief permanent Soviet delegate to the United Nations (1946–48) In 1949 he was made chief deputy foreign minister of the USSR

Grongar Hill (grŏng'gär), Caermarthenshire, Wales, near the Towy river It is celebrated in a poem by John Dyer, who lived near here

Groningen (khrō'nĭng-un), province (898 sq mi , pop 447,423), N Netherlands, bordering on Germany in the east and the North Sea in the north Groningen is the capital It has a fertile coastal strip; the interior consists largely of reclaimed fenland and peat bogs and is drained by numerous canals Cattle raising, dairying, and agriculture are the chief resources Its history is that of its capital

Groningen, municipality (pop 131,210), capital of Groningen prov , N Netherlands It is an important trading center, with grain and cattle markets, sugar refineries, and various manufactures The Univ of Groningen was founded in 1614 Dating from the early Middle Ages, Groningen passed (11th cent) under the temporal power of the bishops of Utrecht In fact, however, it soon gained virtual independence, joined (1284) the Hanseatic League, and gained control over the central section of Friesland, which constitutes Groningen prov Groningen joined (1579) the Union of Utrecht for the independence of the Netherlands, was taken (1580) by the Spaniards under Alexander Farnese, and was retaken (1594) by the Dutch under Maurice of Nassau There are several fine churches, notably the Martinikerk (15th cent) and the Nieuwe Kerk (17th cent.). Josef Israëls and H. W Mesdag were born here

Gronlund, Laurence (grŏn'lund), 1846–99, American Socialist, b Denmark, educated at the Univ of Copenhagen He came to America in 1867 and became a lawyer in Chicago His *Cooperative Commonwealth* (1884), the first adequate exposition in the English language of German socialism, went through many editions and was influential both in America and in England He wrote *Our Destiny* (1891), *The New Economy* (1898), *Socializing a State* (1898), and a number of pamphlets against the single-tax doctrines of Henry George He lectured in all parts of the country and, for a time, was an executive of the Socialist Labor party

Groote, Gerard or Geert (khä'rart, khärt', khrō'tŭ), 1340–84, Dutch Roman Catholic reformer He studied at Paris and elsewhere and because of his learning in theology, philosophy, jurisprudence, and medicine, he was appointed professor at Cologne Converted from a worldly life c 1374, he retired to a Carthusian monastery near Arnhem, urged probably by John RUYSBROECK He was ordained deacon, but never priest, and under episcopal auspices he preached all over the Netherlands, denouncing clergy and laity impartially and turning many souls to religion In 1383 his clerical enemies procured an episcopal ban on his preaching In his preaching period he formed the Brothers of Common Life, or Modern Devotion, a voluntary monastic communal organization Before his death he asked his followers to become Augustinian canons His society and the Augustinians he inspired were pioneers in a general reform of German monastic life His works reveal his deep devotion Among them possibly should be included *The Following* (or *Imitation*) *of Christ* (Latin *De imitatione Christi*, Dutch *De Navolging van Christus*), of long-disputed authorship It has been argued that this is Groote's spiritual journal written in Middle Dutch, of which THOMAS Á KEMPIS arranged an "official" version The countless English translations of this work were from Thomas's version until the translation by Joseph Malaise, S J , *The Following of Christ* (1937) Whatever the version or author, this little book of meditation and admonition, written in a simple and vigorous style and informed with a gentle piety, is established, after the Scriptures, as the most popular devotional book of Christendom See A Hyma, *The Christian Renaissance* (1924)

Groote Eylandt (grōōt ī'lŭnd) [Dutch, =large island], area 950 sq mi , off N Australia, largest island in the Gulf of Carpentaria Barren and rocky, it is an aboriginal reservation

Groote Schuur (khrō'tŭ Skhūr') [Afrikaans, =large barn], estate, Capetown, Cape Prov., Union of

South Africa Formerly the residence of Cecil Rhodes, it is now occupied by the Union premier. On the estate are some buildings of the university at Capetown.

Gropius, Walter (väl'tûr grō'pēōōs), 1883–, German architect, one of the leaders of modern "functional" architecture. His Fagus factory buildings (1912) at Alfeld, with their walls of glass, metal spandrels, and discerning use of purely industrial features, were among the most advanced works in Europe In his buildings for the Cologne Exposition (1914), using extensive areas of glass, modern engineering and materials received a frank architectural expression After the First World War, Gropius became (1919) director of the Weimar School of Art, reorganising it as the Bauhaus It was moved in 1925 to Dessau The complete set of new buildings for it which Gropius designed (1926) remains one of his finest achievements He built the Staattheater at Jena (1922), some experimental houses at Stuttgart (1927), and designed residences, workers' dwellings, and industrial buildings He practiced (1934–37) in London with Maxwell Fry and in 1937 came to America, where he headed the school of architecture at Harvard See his *New Architecture and the Bauhaus* (Eng tr , 1935)

Gropper, William, 1897–, American painter and cartoonist, b New York city From the age of 14 he earned his living by working in sweatshops and restaurants and studied art at night at the New York School of Fine and Applied Art and at the Ferrer School, New York under Henri and Bellows He resigned as reporter on the New York *Tribune* in 1919 and went to work for the *Rebel Worker* because of his class sympathies, subsequently his radical cartoons in the *New Masses* and other publications had a wide and enthusiastic audience In 1927 he visited Russia, and his book *Fifty-six Drawings of U S S R* was published in 1928 His first exhibition of oil paintings in 1936 was the outcome of long years of study and gained him immediate recognition as a painter The following year he was awarded a Guggenheim fellowship Works by him are in many American galleries and in the Museum of Western Art, Moscow, and his murals are in the post office of Freeport, L I , and in the Dept of the Interior Building, Washington, D C *The Senate* (Mus of Modern Art, New York) is a good example of his bold, satiric style

Gros, Antoine Jean, Baron (ätwän' shä' barō' grō'), 1771–1835, French painter, studied with his father, a miniaturist, and with the classicist J L David He attracted the attention of Napoleon in 1793 and followed the army as an inspector at reviews In 1797 he was commissioned to select spoils to enrich the Louvre Between 1802 and 1808 he painted his three most famous pictures, *The Plague at Jaffa* and *The Battle of Eylau* (both Louvre) and *The Battle of Aboukir* (Versailles) These paintings had a realism little in keeping with his professed classicism, to which he vainly strove to return In spite of many honors under the Restoration he became more and more discouraged and in 1835 drowned himself in the Seine Gros had many pupils who later were famous

grosbeak (grōs'bēk) [i e , *great beak*], name used (generally in combination) for various birds, especially for some of the FINCH family They have large, conical bills and bright summer plumage, and most of them are 8 or 9 in long The rose-breasted grosbeak is striking with its white bill and summer plumage of black and white accented by a rose-red breast Its lovely song is somewhat similar to a robin's Sometimes called potato-bug bird, it destroys these and other insects Among other well-known grosbeaks are the cardinal, or Virginia nightingale, the pine grosbeak of the Old and New Worlds, which feeds on conifer seeds and wild fruits, and the western or black-headed grosbeak, an enemy of scale insects, codling moths, and flower beetles The common European grosbeak is the hawfinch

Grose, Francis (grōs), 1731?–1791, English antiquary and draughtsman He wrote—and in some cases illustrated—works on the antiquities of England and Wales, Scotland, and Ireland, *A Treatise on Ancient Armour and Weapons*, and the *Classical Dictionary of the Vulgar Tongue* (1785), which was reprinted in 1931 with biographical and critical sketch and commentary by Eric Partridge

Groseilliers, Médard Chouart, sieur des (mädar' shwär' syûr dù grōsāyā'), 1618?–c.1690, French trader and explorer in North America He was the brother-in-law of Pierre Esprit RADISSON and his companion in his great journeys

Gros Morne (grō' môrn'), mountain, 2,666 ft high, W N F , in the Long Range N of Bonne Bay, highest elevation in Newfoundland

Gross, Charles (grōs), 1857–1909, American historian, b Troy, N Y , grad Williams, 1878, Ph D Univ of Gottingen, 1883. From 1888 to his death he taught history at Harvard, becoming professor in 1901 His *Gild Merchant* (2 vols , 1890) a work of remarkable research, remains standard. He was also the author of the important *Bibliography of British Municipal History* (1897) and the monumental *Sources and Literature of English History from the Earliest Times to About 1485* (1900, rev ed., 1915), a book used by every worker in medieval or early English history

Gross, Samuel David, 1805–84, American surgeon, b near Easton, Pa , M.D Jefferson Medical College, Philadelphia, 1828 He taught at the medical colleges of several universities and at Jefferson from 1856 He made outstanding contributions to his profession as teacher of pathological anatomy and surgery, as inventor of surgical instruments and techniques, as author of *Elements of Pathological Anatomy* (1839), *A System of Surgery* (1859), and other works, and as a founder of the American Medical Association See his autobiography (1887)

Gross Beeren (grōsbā'run), village, Brandenburg, S of Berlin Here, in 1813, Friedrich Wilhelm von Bülow, using the Prussian militia for the first time, defeated the French under Oudinot

Grosse, Aristid V. (grō'su), 1905–, American chemist, b Russia, D Eng , Technische Hochschule, Berlin-Charlottenburg, 1927 He came to the United States in 1930 (naturalized 1937), taught at the Univ of Chicago (1931–40), and worked (1940–43) at Columbia Univ on uranium fission, he was associated with atomic-bomb research of the "Manhattan District " An authority on synthetic rubber, he served as consultant (1942–43) to the War Production Board and as director (1943–48) of research of the Houdry Process Corp , Philadelphia In 1948 he became president of the Research Institute of Temple Univ Grosse has worked also on radioactivity, isotopes, and catalytic chemistry of hydrocarbons, he isolated (1927) an oxide of protactinium

Grosse Pointe (grōs' point'), residential city (pop 6,179), SE Mich , a suburb of Detroit, on Lake St Clair, inc as a village 1879, as a city 1934

Grosse Pointe Farms, residential village (pop 7,217), SE Mich , a suburb of Detroit, on Lake St Clair, inc 1893 The mansion of John Dodge and the Alger House, a branch of the Detroit Institute of Arts, are points of interest

Grosse Pointe Park, residential village (pop 12,640), SE Mich , a suburb of Detroit, on Lake St Clair, inc 1907

Grosse Pointe Woods, residential village (pop 2,805), SE Mich , a suburb of Detroit, inc 1926 as Lochmoor, name changed 1939

Grosseteste, Robert (grōs'tēst), c 1170–1253, English prelate Educated at Oxford and Paris, he became one of the most learned men of his time He taught at Oxford for a number of years and had probably become its first chancellor by 1221 In 1232 he resigned his ecclesiastical preferments and became rector of the Franciscans at Oxford He was the principal founder of the Oxford Franciscan school, which profoundly influenced medieval thought and the development of the Franciscan order His most illustrious pupils, Adam MARSH and Roger BACON, continued Grosseteste's work at Oxford when he was made (1235) bishop of Lincoln, the most populous see of England As bishop, he was an indefatigable administrator and zealous reformer, visiting the monasteries, assigning suitable candidates to parish offices, and preaching to the people Grosseteste fought for the maintenance of Magna Carta He thwarted efforts of HENRY III to control ecclesiastical appointments and as a member of the great council supported the reforms of Simon de MONTFORT Grosseteste was a strong upholder of the papal prerogative, but he did not hesitate to censure INNOCENT IV for his excessive exactions and the Curia for its corruption and indolence Above all, Grosseteste was a deep and prolific scholar whose activities made Oxford a university center He knew both Greek and Hebrew, and his translations of, and commentaries on, Aristotle served as a foundation for the development of SCHOLASTICISM under St ALBERTUS MAGNUS and St THOMAS AQUINAS His hundreds of writings include treatises on physics, on mathematics, on astronomy, and on psychology, pastoral works, and polemical poems in French for the layman Many spurious works, including the *Summa philosophiae*, were attributed to him because of his rare learning For 50 years after his death he was revered in his diocese as a saint There is no definitive life of Grosseteste, and few of his writings are translated into English Three treatises are translated in Richard McKeon, *Selections from Medieval Philosophers* (1928–31) See L M Friedman, *Robert Grosseteste and the Jews* (1934), B C Boulter, *Robert Grosseteste* (1936), S H Thomson, *The Writings of Robert Grosseteste* (1940)

Grossglockner (grōs'glôknur), peak, 12,460 ft. high, Austria, highest of the HOHE TAUERN of Austria First ascended in 1800, it is now traversed by the Grossglocknerstrasse, a magnificent Alpine highway rising up to 8,215 ft The great Pasterze glacier descends the peak

Grossgörschen or **Gross Görschen,** Germany see LÜTZEN.

Grossi, Tommaso (tôm-mä'zō grôs'sē), 1791–1853, Italian novelist and poet; friend of Manzoni. His historical novel *Marco Visconti* (1834, Eng. tr., 1836) was many times reprinted. Other works include *I Lombardi alla Prima Crociata* [the Lombards in the First Crusade] (1826) and lyrics in the Milanese dialect

Grossmith, George (grōs'mĭth), 1847–1912, English singer and comedian. At the Opéra-Comique, Paris (1877), and at the Savoy Theatre, London (1877–89), he gained fame when he created the chief roles in the operettas of W S Gilbert and A S Sullivan See Stanley Naylor, *Gaiety and George Grossmith* (1913) His brother, **Weedon Grossmith,** 1853–1919, was well known in pantomime and light comedy His whimsical book, *The Diary of a Nobody* (1892), written in collaboration with his brother George, has often been reprinted See his autobiography, *From Studio to Stage* (1913)

Grossvenediger: see HOHE TAUERN.

Grosswardein, Rumania see ORADEA.

Grosvenor, Gilbert Hovey (hŭ'vē grōv'nur), 1875–, American editor, b Constantinople, Turkey, grad Amherst, 1897 As director of the National Geographic Society from 1899 and editor of the *National Geographic Magazine* from 1903, he encouraged world-wide exploration and greatly increased the circulation of his magazine, especially by using illustrations

Grosvenor Gallery, founded in London (1877) by Sir Coutts Lindsay for the independent exhibition (opening May 1 annually) of paintings and sculpture by established artists, both Academicians and moderns being represented There is no jury The gallery has the atmosphere of the private dwelling for which the work shown usually is destined

Grosvenor Square (grōv'nur), fashionable residential section in Mayfair, W London, England, planned 1695 by Sir Richard Grosvenor Among its famous residents have been Lord Chesterfield, Lord North, the earl of Shaftesbury, John Wilkes, and Walter Hines Page It was used as the headquarters of American troops in Great Britain in the Second World War

Gros Ventre Indians (grō vä'tru) [Fr , =big belly], name used by the French for two quite distinct North American Indian tribes One was the Atsina, a detached band of the ARAPAHO INDIANS, of Algonquian linguistic stock, the other was the HIDATSA INDIANS of Siouan linguistic stock. The Indian sign language designated the two groups by somewhat similar gestures on the torso, one referring to the Hidatsa chest tattoos and the other conveying the meaning "always hungry" (i e , beggars) to designate the Atsina The name is now generally confined to the Atsina, who in the 18th cent , practicing the Plains culture, ranged between the Missouri and Saskatchewan rivers under the protection of the powerful Blackfoot Indians to the west Today the Atsina live with the Assiniboin Indians on the Fort Belknap Reservation in Montana and number some 1,000

Grosz, George (grōs), 1893–, German painter and caricaturist in America, b Berlin He studied at the Dresden Academy from 1909 to 1912 and at the school of decorative arts in Berlin Before the First World War he contributed drawings on proletarian themes to *Illustration* and other German periodicals During the war he was twice drafted and discharged In 1917 he joined the Dadaist art movement in Berlin In post-war Germany, Grosz was famous for his vitriolic, satirical drawings of bourgeois society Not even the most radical publications dared to print them always, and many appeared in pamphlet form A nightmare world, a true inferno, is made visible and credible with a few jagged pen-and-ink lines This bitter labor continued until 1924, when he began to paint a little In 1933 he accepted a position as art instructor at the Art Students League, New York, and came to America with his wife and sons After that as teacher, draughtsman, and water-colorist, he played a larger and larger role in the art of his adopted country In 1937 he was awarded a Guggenheim fellowship, and in 1938 he became an American citizen Grosz's drawings are perhaps the most terrible indictment of post-war Europe Two collections of his drawings were published in 1945 See his autobiographical, *A Big Yes and a Little No* (1946)

Grote, George (grōt), 1794–1871, English historian of ancient Greece The son of a wealthy banker, he attended Charterhouse but not a university, being required to work in the family bank He pursued his studies in classical literature and history by himself One of Jeremy Bentham's circle of friends, he pushed his own utilitarian economic and political doctrines as a member of Parliament (1832–41). Thereafter he spent his efforts for public improvement on the Univ of London His great work, his *History of Greece* (12 vols., 1846–56), was begun to refute the conservative history written by William Mitford and is colored by Grote's liberal and democratic sentiments His careful workmanship, however, and his singularly wide and practical sympathy with Greek life make the book a classic of historical writing Among his other works are *Plato and the Other Companions of Socrates* (3 vols , 1865) and the unfinished *Aristotle* (ed. by Alexander Bain and G. C. Robertson, 2 vols , 1872). See H L Grote, *The Personal Life of George Grote* (2d ed , 1873), G P. Gooch, *History and Historians in the Nineteenth Century* (2d ed., 1946).

Grotefend, Georg Friedrich (gā'ôrk frē'drĭkh grō'tufĕnt), 1775–1853, German archaeologist and phi-

ologist. He specialized in Latin and Italian and wrote works on the Umbrian and Oscan languages and other subjects, but his greatest achievement was deciphering cuneiform inscriptions of Persia

Groth, Klaus (klōus' grōt'), 1819–99, German poet, whose use of Low German as a literary medium has been the cause of much controversy One of the best German lyric poets and an excellent writer of fiction, he was awarded the Schiller Prize in 1890 His most famous work is *Quick born* [fresh springs] (1852) For translations, see MAX MÜLLER, *Chips from a German Workshop* (1867–75), Vol. III

Grotius, Hugo (grō'shus), 1583–1645, Dutch jurist and humanist, whose Dutch name appears as Hugh de Groot He studied at the Univ of Leiden and became a lawyer when 15 years old In his youth he wrote plays and verse in Latin and edited classical texts In Dutch political affairs Grotius supported OLDENBARNEVELDT against MAURICE OF NASSAU Maurice, having gained power, in 1619 had Grotius condemned to prison for life, but he made a daring escape in 1621 and fled to Paris There, expanding certain views he had earlier recorded but had never published, he wrote *De jure belli ac pacis* [concerning the law of war and peace] (1625, definitive ed , 1631), usually considered the first definitive text on international law In it Grotius contended that natural law prescribed rules of conduct for nations as well as for private individuals He derived much of the specific content of international law from the Bible and from classical history Although he did not condemn war as an instrument of national policy, he maintained that it was criminal to wage war except for certain causes Much of his book is an attempt to make the conditions of warfare more humane by inducing respect for private persons and their property Grotius returned briefly to Holland in 1631, but was forced to flee in 1632 From 1635 to 1645 he represented Sweden at the French court The last years of Grotius were largely devoted to an attempt to reconcile the sects into which Christianity was divided He proposed unity on the basis of commonly held tenets and avoidance of doctrinal disputes He also accomplished valuable work in exegesis of the Bible See A D White, *Seven Great Statesmen* (1910), biography by W S M Knight (1925)

Groton (grō'tun) **1** Town (pop 10,910), SE Conn , on the Thames, here bridged to New London (1943), settled c 1650 It includes Groton borough (pop 4,719) and West Mystic It is the site of Fort Griswold (1775), unsuccessfully defended against the British in 1781 On the Thames above the borough is a U S submarine base and a U S coast guard training school, in the world wars Groton was a leading submarine-building base Silas Deane was born here **2** Town (pop 2,550), N Mass , NW of Boston It was incorporated in 1655 but was destroyed in King Philip's War, rebuilt, it was several times attacked by Indians Paper is produced There are some old buildings The famous Groton School for boys (preparatory) was founded here in 1884 Lowthorpe School of Landscape Architecture is also in the town **3** Industrial village (pop 2,087), W central N Y , W of Cortland, inc 1860 Typewriters are made here

Grouchy, Emmanuel, marquis de (ĕmänüĕl' märkē' dŭ grōōshē'), 1766-1847, French general in the French Revolutionary and Napoleonic Wars Made a marshal in the Hundred Days, he was largely responsible for Napoleon's disaster in the WATERLOO CAMPAIGN through his failure to prevent the Prussians from joining the English

ground bass (bās), short musical phrase constantly reiterated in the bass of a composition, with variations in the upper parts It was often used by composers of the 17th cent in England (e g , by Purcell in *Dido's Lament* from his *Dido and Aeneas*) The Italian and German composers of the baroque period used the device also J S Bach and Buxtehude composed grounds, but in them pure form they are rare in Handel's works

ground hog, see WOODCHUCK

ground ivy, trailing perennial plant (*Glecoma*, or *Nepeta, hederacea*) related to the mints, native to the Old World but naturalized in the New It has rounded leaves and small, commonly purple flowers Of a weedy nature, it is a good ground cover, even in shade Ground ivy was formerly used as a brewing ingredient and was considered medicinal—it is still sometimes used as a domestic remedy—but in quantity is reported to poison horses Gill-over-the-ground is another of its many names

ground laurel: see TRAILING ARBUTUS

groundnut, a name for various plants, among them the PEANUT

ground pine, name for several plants, particularly species of CLUB MOSS

groundsel, any plant of the very large genus *Senecio*, herbs and (in the tropics) shrubs or trees, of wide distribution The composite flowers are yellow in North American species, which have clusters of usually small, somewhat daisylike heads, the rays are absent in some, e g , the common groundsel (*Senecio vulgaris*) naturalized from Europe A few groundsels have been found to be poisonous to livestock, while others are useful for grazing Some species of the genus are better known as ragworts. The golden ragwort or squawweed (*Senecio aureus*) has been used as an emmenagogue and a vulnerary by both Indian and white man Other species have also been used medicinally The groundsel tree (*Baccharis halimifolia*) is a small tree or shrub of the East Coast of the United States, its fruit is conspicuous because of the white down (pappus), and the plant is sometimes cultivated

ground squirrel, rodent of the squirrel family The name is applied chiefly to the genus *Citellus* (or *Spermophilus*) of North America, Europe, and Asia, as well as *Xerus*, the African ground squirrel, and to the chipmunk In North America about 31 species are found, chiefly in the West Some destroy crops but also eat insects and mice In the colder regions they sleep underground from fall to spring The striped ground squirrel (*Citellus tridecemlineatus*) of the Great Plains and prairies of North America is cinnamon or buff above with longitudinal white-spotted, dark brown or black stripes alternating with narrow white stripes Some species carry bubonic plague, Rocky Mountain spotted fever, and tularemia

group insurance see INSURANCE

group medicine see MEDICINE

grouse (grous), game bird of the colder parts of the Northern Hemisphere, where about 25 species occur Grouse are henlike, terrestrial birds, protectively plumaged in shades of red, brown, and gray The nostrils are entirely hidden by feathers, and the legs are partially or completely feathered Among the American birds of the group are the eastern ruffed grouse (sometimes called partridge or pheasant), a forest bird noted for its drumming mating call made by beating the air with its wings, the SAGE GROUSE, the PTARMIGAN, and the PRAIRIE CHICKEN The European capercaillie and black grouse and the red grouse of Great Britain are well known See H M Hall, *The Ruffed Grouse* (1947)

Grove, Sir George, 1820–1900, English musicographer, whose *Dictionary of Music and Musicians* (1879–89) has become a standard reference work Originally an engineer, he assisted in the erection of the Crystal Palace and for many years annotated the programs of the concerts there From these notes he later drew material for *Beethoven and His Nine Symphonies* (rev ed , 1896, first pub 1884) He served as editor (1868–83) of *Macmillan's Magazine*, and directed the Royal College of Music from 1888 to 1894 In 1883 he was knighted See C L Graves, *The Life and Letters of Sir George Grove* (1903)

Grove, Robert Moses, 1900–, American baseball player, b Lonaconing, Md A left-handed pitcher and therefore called "Lefty" Grove, he won over 100 games (1920-25) for the Baltimore Orioles of the International League Playing (1925–33) for the Philadelphia Athletics, he attained in 1931 the season pitching record of 31 victories against four defeats for a percentage of 886 and equaled the American League mark of 16 consecutive victories He was traded to the Boston Red Sox in 1934 and played with them until 1941 During his 17 years of major-league pitching, Grove won 300 and lost 141 games for a lifetime pitching percentage of 680, he struck out over 2,000 batters

Grove, Sir William Robert, 1811–96, English judge A physicist by avocation, his investigation in the field of electrochemistry led to his invention of the Grove cell (see CELL, in electricity)

Grove, town (pop 1,093), NE Okla , near the Mo border It ships farm products

Grove City. 1 Village (pop 1,787), central Ohio, near Columbus, in a rich agricultural and truck-gardening area There is horse racing here **2** Industrial borough (pop 6,296), W Pa , NNW of Pittsburgh, settled 1798, laid out 1844, inc 1883 It manufactures gas and gasoline engines Grove City College (coeducational, 1876) is here

Groveland, town (pop 2,122), NE Mass , on the Merrimack below Haverhill, settled c 1639, set off from Bradford 1850

Groveport, village (pop 1,052), central Ohio, SE of Columbus

Grow, Galusha Aaron, 1823–1907, American political leader, b Ashford (now Eastford), Windham co , Conn , grad Amherst College, 1844 He was admitted (1847) to the bar and became a law partner of DAVID WILMOT at Towanda, Pa He took (1850) Wilmot's place in Congress and held office until 1863 As speaker of the House (1861–63) Grow was able to put through the Homestead Act of 1862, in the absence of Southern opposition A gerrymander, which made his district Democratic, resulted (1862) in his defeat for reelection It was not until 1893 that he again returned to Congress to serve 10 more years He still maintained his interests in Western land problems See biography by J T Du Bois and G S Mathews (1917)

growing pains: see RHEUMATISM

growing season, period during which plant growth can take place In temperate regions it is the time between the last killing FROST in the spring and the first killing frost in the fall, when growth activity stops or begins to decline. The amount of plant growth is determined by other elements as well as length of the growing season In some arctic regions the growing season is very short, but plant growth is luxuriant, because the sun shines for so large a proportion of each day that the total amount of sunlight and heat is as great as that of temperate regions which have a longer growing season In tropical climates the amount of available moisture is often the determining factor for plant growth, during periods of drought dormancy is induced The length and other elements of the growing season are determinants of the crops grown in a region crops which require a long growing season must be grown in low latitudes or near large bodies of water in higher latitudes, while plants which mature rapidly may be grown farther north and farther south of the equator See John Asch, *The Story of Plants* (1948)

growth, in biology, the development of a plant or animal from its early stages Increase in size, cell division, and differentiation of tissues are usually involved in the developmental processes The growth of living things is often called growth by intussusception, or growth from within In this process the substances which make growth possible are distributed through the body of the organism and are, by complex processes, incorporated into the living material This method of growth is in contrast to growth by accretion, or increase in size by the addition of material externally, growth by accretion is exemplified in the growth of crystals There are many unsolved problems concerning growth of living things Some of these problems are the concern of the science called morphogenesis, or the origin of form, the mechanisms by which living matter develops into the form characteristic of a given species are not well understood Through the chromosomes of the sex cells are transmitted those factors that result in the offspring's having the characteristics of the parent species, but the biochemical processes by which this is brought about cannot be adequately explained Normally each kind of plant and animal ceases to increase in size when a certain limit has been reached After that the growth process consists chiefly of the repair of tissues In human beings and some other higher mammals a hormone secreted by the anterior lobe of the pituitary gland is believed to be concerned with growth Malfunctions of the gland are associated with the conditions of dwarfism and giantism Vitamins, especially vitamin A, also influence growth, vitamin D and the minerals calcium and phosphorus are essential to normal, healthy growth of bones and teeth

Grozny (grôz'nē), city (pop 172,468), capital of Grozny oblast, RSFSR, at the northern foot of the Greater Caucasus It is the industrial center of a major oil district, exploited since 1893, and is linked by pipe line with Makhachkala on the Caspian Sea, with Tuapse on the Black Sea, and with the Donets Basin Grozny was founded (1818) as a Russian fortress and became a city in 1870 In the Second World War it was the objective of a German army which, however, was stopped (1942) c 50 mi to the west

grub see LARVA

Gruber, Franz (frants' grōō'bûr), 1787–1863, Austrian organist His one published composition is the tune for Josef Mohr's poem *Silent Night*

Gruber, Johann Gottfried (yō'hän gôt'frēt), 1774–1851, German encyclopedist He was associated with Johann Samuel Ersch in work on the great encyclopedia known as Ersch and Gruber's After the death of Ersch, he became the editor, continuing the work from Vol XVIII to Vol LIV He was a professor at Wittenberg and Halle Herder and Wieland were his friends and are subjects of books by him Goethe was also a friend

Grub Street, in London, not far W of Finsbury Circus, since 1830 named Milton St It was once famous as the residence of poor authors and journalists and was used as a symbol of literary hack work by Dr Samuel Johnson and others George Gissing called a novel *New Grub Street*

Grudziadz, Pol *Grudziądz* (grōō'jôts), Ger *Graudenz* (grou'dĕnts), city (pop 36,805), Pomorze prov , NW Poland, on the Vistula It passed to Prussia in 1772 and was restored to Poland in 1919 Its fortress, built by Frederick II, was resolutely defended (1807) by the Prussian general G R Courbière against Napoleon Grudziadz suffered heavy damage during the Second World War. Chiefly a trade center, it has also several industries (metals, chemicals, food, electrical goods, and printing)

Gruenberg, Louis (grōō'unbûrg), 1884–, American composer, b Russia, pupil in piano and composition of Busoni After his debut in Berlin in 1912 as a pianist, he played for a number of years both in Europe and in the United States His early compositions, such as *Daniel Jazz* (1923) for tenor and small orchestra and his *Jazz Suite* for orchestra (1925), show his interest in jazz as an element of serious music He has written much orchestral and chamber music, but better known are the operas *Jack and the Beanstalk* (1930), a satire, with libretto by John Erskine, and *The Emperor Jones* (New York, 1933), an operatic version of O'Neill's play, considered outstanding among American operas. In 1940 he began to compose for moving pictures.

Gruening, Ernest Henry (grō'nĭng), 1887–, American administrator, journalist, and author, governor of Alaska (1939–), b. New York city, grad. Harvard (B.A., 1907; M.D., 1912). He became interested in journalism and worked on Boston newspapers until 1917. From 1920 to 1923 he edited the *Nation*, directed publicity for Robert La Follette's campaign for the presidency, and founded (1927) the Portland, Maine, *Evening News*. He edited *These United States* (1923) and also wrote the highly regarded *Mexico and Its Heritage* (1929). After directing (1934–39) the territories and island possessions division of the U.S. Dept. of the Interior and after heading (1935–37) the Puerto Rico Reconstruction Administration, he was appointed governor of Alaska.

Gruffydd ap Llewelyn (grŭf'fĭdh ap lōōĕ'lĭn, grĭ'fĭdh, thlōōĕ'lĭn), d. 1063, ruler of Wales (1039–63), one of the ablest of early Welsh princes. He united Wales, expanded the boundaries, and restored the national spirit. He was at first successful against the English, but his power was broken by HAROLD in two invasions (1062–63). His defeat plunged Wales into confusion and paved the way for the conquest of Wales by the Normans. The name also appears as Griffith ap Llewelyn.

Grün, Hans Baldung see BALDUNG, HANS.

Grünberg (grün'bĕrk) or **Zielona Gora**, Pol. *Zielona Góra* (zhĕlô'nä gōō'ra), town (1939 pop. 26,076, 1946 pop. 15,738), Lower Silesia, transferred to Polish administration in 1945 (see SILESIA). Founded probably in 1222, it reached its flower c. 1430. A church dates from 1272, the town hall from 1321. The town suffered minor damage in the Second World War. A trade center, it is noted for its wines.

Grundtvig, Nikolai Frederik Severin (nĭkôlī' frĭ'dhŭrĭk sĕvurēn' grōōnt'vĭg), 1783–1872, Danish writer and educator, founder of the Danish FOLK SCHOOL. He entered the ministry but came into conflict with the church authorities and was forbidden to preach; he was reinstated, however, in 1832 and in 1861 was made titular bishop. His *Northern Mythology* (1808) was an epoch-making work. It was followed by a long epic poem, *The Decline of Heroic Life in the North* (2 vols., 1809–11). He edited *Dannevirke*, a polemical journal, from 1816 to 1819. An ardent champion of education for the masses, Grundtvig evolved the system of folk high schools which has attracted widespread interest in other countries and wrote several books in this field. See Noëlle Davies, *Education for Life* (1931). His son, **Svend Hersleb Grundtvig** (svän' hĕr'slĕb), 1824–83, was professor of Scandinavian philology at the Univ. of Copenhagen. He produced a five-volume collection of Danish folk songs and several volumes of Danish fairy tales which have been translated into English.

Grundy, Felix, 1777–1840, American political leader, b. Berkeley co., Va. He practiced law, was (1800–1805) in the Kentucky legislature, and served (1806–7) on the Kentucky supreme court. He moved to Nashville, Tenn., where he became a noted criminal lawyer. A member (1811–14) of Congress, he joined the "war hawks" in strongly urging the War of 1812. He then served (1819–25) in the Tennessee legislature. His political power in Tennessee forced Andrew Jackson to keep his support, and Grundy succeeded to John H. Eaton's seat in the U.S. Senate when Eaton entered (1829) Jackson's cabinet. Grundy gave Jackson little support in the nullification crisis, but was reelected (1834) despite Jackson's opposition. He was appointed (1837) Attorney General by President Van Buren and resigned (1839) to return to the Senate.

Grundy, coal-mining town (pop. 1,476), extreme SW Va., near the Ky. and W. Va. lines. The courthouse of Buchanan co. is here.

Grundy Center, town (pop. 2,012), co. seat of Grundy co., central Iowa, SW of Waterloo, inc. 1877. It is a trade center for a rich agricultural area. Here Herbert Quick, born near by, attended a country school, which is preserved.

Grünewald, Mathias (matĕ'ăs grü'nuvält), c. 1480–c. 1530, German religious painter. He worked chiefly in his native Aschaffenburg and in Mainz under the patronage of the archbishop of Mainz. His work is characterized by a dramatic intensity unique in German painting. A great colorist and powerful realist, Grünewald is best known as the painter of the passion of Christ. Famous *Crucifixions* are in the museums of Basel and elsewhere, and another forms part of his celebrated masterpiece, the *Isenheim Altarpiece* (Colmar). In these tragic and somber paintings the physical agony of Christ is portrayed with harrowing realism and unmitigated horror.

Grünwald, battle of, 1410 see TANNENBERG.

Grütli, Switzerland see RÜTLI.

Gruyère (grüyĕr'), Ger. *Greyerz* (grī'ĕrts), area in Fribourg canton, Switzerland. It is known for its cattle breeding and for the production of the Gruyère cheese. One of the towns is **Gruyères** (pop. 1,356). It has well-preserved medieval architecture.

Gryphius, Andreas (ändrā'ăs grü'fēōōs), 1616–64, German poet and dramatist. He wrote in Latin, new High German, and Silesian dialect. An impoverished orphan, he was enabled by patronage to study and travel; in 1647 he became syndic of Glogau. He wrote tragedies, e.g., *Leo Armenius* and *Cardenio und Celinde*; lively comedies, e.g., *Horribilicribrifax*, *Peter Squenz*, and *Das Gelibte Dornrose*, and odes, epigrams, lyrics, and religious verse.

Guadalajara (gwä"dhälähä'rä), city (pop. 229,235), capital of Jalisco, W Mexico, the second largest city of Mexico. A spacious and beautiful city on a plain over 5,000 ft. high and surrounded by mountains, Guadalajara is a modern commercial metropolis with many picturesque survivals of Spanish colonial living. The mild, clear, dry climate has made it a popular health resort. Founded by Cristóbal de Oñate in 1530 or 1531 under the orders of Nuño de GUZMÁN, Guadalajara was moved twice because of Indian raids before and during the MIXTÓN WAR before it was permanently established in 1542—the date chosen as its official founding. It became the seat of the *audiencia* of NUEVA GALICIA. Easily captured (1810) by HIDALGO Y COSTILLA in the war against Spain, the city was the center of reform activities. Again in 1858, in the War of Reform, it was briefly occupied by the liberals under Benito JUÁREZ. Impressive among the public buildings are the cathedral, finished in 1618 after more than 50 years of work, and the governor's palace, begun in 1643. The cathedral, containing a painting by Murillo, *The Assumption of the Blessed Virgin*, has been partially destroyed several times by earthquake and is a conglomerate of architectural styles. The governor's palace, where the central stairway has been decorated with murals by J. C. Orozco, is an excellent example of Spanish colonial architecture. The Univ. of Guadalajara and the orphanage chapel also contain Orozco murals. There is considerable local industry, aided by through rail service to the United States and by a hydroelectric plant utilizing the Juanacatlán falls on the Santiago river. Some coal is mined in the region. The most famous products of Guadalajara and its environs are handmade glassware and pottery so intricately designed and finely worked that it ranks among the best in Mexico.

Guadalajara, city (pop. 21,466), capital of Guadalajara prov., central Spain, in New Castile, on the Henares river. A Roman settlement, it belonged to the Moors from the 8th to the 11th cent. During the Spanish civil war (1936–39) the engagement called the battle of Guadalajara (March 11–20, 1937) was actually fought near Brihuega, c. 15 mi. to the northeast. An Insurgent force (mostly Italian "volunteers") moving toward Madrid was crushingly defeated by the Loyalists. The most notable landmark of the city, the Palacio del Infantado, badly damaged in the civil war, has been restored.

Guadalcanal (gwädulkunäl'), volcanic island (2,500 sq. mi., pop. c. 14,000), S Pacific, one of the SOLOMON ISLANDS. Honiara, capital of the Solomons, is here. Guadalcanal is largely jungle with mountains as high as c. 8,000 ft. (Mt. Popomanseu); there are coconut plantations and a few gold mines. In the Second World War the island was occupied in 1942 by the Japanese. The chief airfield, Henderson Field, was captured in 1943 by U.S. forces after bitter naval and jungle fighting. The battles of Cape Esperance and Lunga Point were important. U.S. victories: see S. E. Morison, *History of United States Naval Operations in World War II*, Vol. V (1949).

Guadalquivir (gwä"dhälkĭvēr'), river, c. 350 mi. long, S Spain, in Andalusia. Its source is in the Sierra de Cazorla, and the river flows SW past Baeza, Córdoba, and Seville into the Atlantic near Sanlúcar de Barrameda. In its middle course it traverses a populous, fertile region (growing grapes, olives, and fruit) at the foot of the Sierra Morena; its lower course crosses extensive marshlands (Las Marismas). The Genil is its main tributary. The action of the tide is noticeable as far as Seville, which is the head of navigation for vessels of moderate size, smaller boats reach Córdoba.

Guadalupe (gwä"dhälōō'pā), village, Cáceres prov., W central Spain, in Estremadura. It is noted for its monastery (formerly Hieronymites, now Franciscan) and the shrine of Our Lady of Guadalupe, whose cult was transferred in the 16th cent. to GUADALUPE HIDALGO, Mexico.

Guadalupe, Sierra de (sĕĕ'rä dā gwädhälōō'pā), mountain range, W Spain, in Estremadura, between the Tagus and Guadiana rivers. The highest elevation is c. 4,700 ft.

Guadalupe Hidalgo (gwädhälōō'pā ēdäl'gō, wä–), shrine, central Mexico, in the Federal District. The basilica of Guadalupe containing the shrine of Our Lady of Guadalupe (feast Dec. 12) is one of the principal shrines of Christendom and the focal point of the greatest pilgrimage in the Western Hemisphere. In 1531 an Indian, Juan Diego, reported to Archbishop Zumárraga his miraculous visions of the Virgin on the hill of Tepeyacac. The spot was renamed Guadalupe in honor of the shrine of Our Lady of Guadalupe, Spain. To this was added later the name of the revolutionary priest of 1810, HIDALGO Y COSTILLA, who adopted her banner as his standard. She is the patroness of Mexico, especially beloved by Mexican Indians. The **Treaty of Guadalupe Hidalgo**, signed Feb. 2, 1848, ended the MEXICAN WAR. Long negotiations of the U.S. special agent, Nicholas P. TRIST, with Santa Anna had come to nothing during the war, but after the fall of Mexico city, negotiations were begun in earnest. Trist, though he had been recalled, decided to ignore his orders and finished the treaty. By it Mexico recognized Texas as a U.S. possession and ceded the present California, Nevada, Utah, parts of Colorado and Wyoming, almost all New Mexico, and Arizona N of the Gila (see GADSDEN PURCHASE), the United States agreed to pay Mexico $15,000,000 and to assume American claims against Mexico. The treaty was ratified by the U.S. Senate in March and by the Mexican Congress in May, 1848.

Guadalupe Mountains (gwädŭlōōp'), SE N. Mex. and W. Texas. Guadalupe Peak (8,751 ft.), the highest point in Texas, and El Capitan (8,078 ft.), also in Texas, are in the range. West of Guadalupe Peak are salt lakes and salt flats.

Guadalupe Victoria (gwädhälōō'pā vēktôr'ya), 1786?–1843, Mexican general, first president of Mexico (1824–29), whose real name was Manuel Félix Fernández. He joined (1811) the revolution proclaimed by HIDALGO Y COSTILLA, and even after the defeat and death of MORELOS Y PAVÓN he continued, as a fugitive, to support the revolutionary cause. His name, Guadalupe Victoria [Our Lady of Guadalupe Triumphant], was adopted in honor of the revolutionary standard. The achievement of independence under Agustín de ITURBIDE did not satisfy him, but he adhered to the Plan of IGUALA (1821). Two years later he joined SANTA ANNA in his revolt against Iturbide's empire. Guadalupe Victoria was chosen as a member of the provisional government and then as president. Factional strife between the conservatives and liberals marred his administration, and the conservatives, under Vice President BRAVO, started an unsuccessful revolt.

Guadarrama, Sierra de (sĕĕ'rä dā gwädhärä'mä), mountain range rising from the plateau of central Spain, N of Madrid, between the Tagus and Duero rivers. Several peaks exceed 6,500 ft., Peñalara (c. 7,900 ft.) is the highest.

Guadeloupe (gôdulōōp', gwä–), overseas department of Metropolitan France (687 sq. mi., pop. 278,464), in the Leeward Islands, West Indies. The capital is BASSE-TERRE. The department comprises the following principal islands: Basse-Terre (Guadeloupe proper) and Grand-Terre, which are separated by a narrow and shallow channel of the sea, the Rivière Salée, to make a double island (583 sq. mi., pop. 226,957), Marie Galante (58 sq. mi., pop. 29,349) and Les Saintes (5 sq. mi., pop. 11,358) immediately to the south, Désirade (10 sq. mi., pop. 1,581) to the east, and more than 100 mi. to the north St. Barthélemy (9 sq. mi., pop. 2,231) and SAINT MARTIN. Basse-Terre, volcanic in origin and extremely rugged, has the highest mountain in the Lesser Antilles—the dormant volcano Grande Soufrière or La Soufrière, 4,869 ft. high. Basse-Terre is settled along the coasts and produces bananas, coffee, cacao, and vanilla. On Grande-Terre and Marie Galante are low limestone hills with little rainfall; sugar cane is raised, and sugar and rum are manufactured, chiefly at POINTE-À-PITRE. The other islands are of small economic value. Subject to hurricanes which sweep over the low eastern parts, the islands have a generally mild and humid climate. The population is almost entirely Negro, speaking a French patois, many among the whites are descendants of the original settlers. Discovered by Columbus in 1493, Guadeloupe, the double island, was only feebly colonized by the Spanish and was finally abandoned in 1604. In 1635 the French began settlement, and from then until 1815, when it was ultimately confirmed as French, Guadeloupe was hotly contested with the English, who captured and lost it several times. After the fall of France (1940) in the Second World War, the governor adhered to the Vichy government, but in 1942 a political and economic agreement was reached with the United States. In 1946 the colony became a department, and a prefect replaced the governor as executive officer.

Guadet, Marguerite Élie (märgürĕt' ālē' gwädā'), 1758–94, French revolutionist, a leader of the GIRONDISTS. Outlawed for his attacks on Robespierre and Marat, he hid for 10 months before being captured and executed.

Guadiana (gwädhyä'nä), river, c. 500 mi. long, central Spain and S Portugal. While some locate its source in the La Mancha plateau, others assume that the Záncara river takes the name of Guadiana below Ciudad Real. From here the Guadiana flows generally W across Castile and Estremadura past Badajoz, where it turns south and marks the Spanish-Portuguese frontier, except for a short section within Portugal. It empties into the Gulf of Cádiz in the Atlantic.

Guadix (gwädhĕsh'), city (pop. 18,318), Granada prov., S Spain, in Andalusia. It was a Roman colony and under the Visigoths an episcopal see. There

are Roman ruins, remains of a Moorish castle, and an 18th-century cathedral The sugar industry is notable.

Guaira, La (lä gwī'rä), town (pop 10,103), N Venezuela, a port on the Caribbean. Founded in 1577 as the outlet for CARACAS, it is connected by rail and concrete highway with the capital and is administered by the Federal District Chief exports include coffee, tobacco, cacao, hides, and lumber.

Guam (gwäm), island (203 sq mi , pop 22,290), W Pacific, belonging to the United States, largest, most populous, and southernmost of the MARIANAS ISLANDS It is c 30 mi long and 4 to 10 mi wide, the southern part of the island is mountainous, rising to 1,334 ft In the fertile valleys are grown rice, coconuts, coffee, cacao, tobacco, pineapples, and indigo The principal export is copra AGANA, the seat of the government, was completely destroyed during the Second World War APRA HARBOR is near by The inhabitants of Guam are chiefly Chamorros Discovered (1521) by Magellan, after 1696 the island belonged to Spain It was taken by the United States in 1898 in the Spanish-American War Since 1917 it has been under the Dept of the Navy and is governed by a naval officer, advised by a native congress The island is divided into 15 municipalities In 1935 Guam became a stop on the Pan American Airways transpacific route. Congress in 1941 approved appropriations for the improvement of Guam as an advance base for the U S fleet, but before this could be accomplished, the Japanese attacked (Dec 7, 1941) and Guam fell on Dec 9 Americans landed on Guam July 20, 1944, and after a bloody fight regained control of the island It became a major base of air and sea operations for the rest of the war Appropriations were made in 1946 for the rehabilitation of Agana and Agat

Guanabacoa (gwä"näbäkō'ä), city (pop 21,999), Cuba, residential suburb of Havana Mineral springs and beautiful countryside have made it a summer resort for residents of Havana since the 17th cent

Guanabara Bay (gwänōbä'ru), inlet of the Atlantic, SE Brazil Rio de Janeiro is on its southwest The bay, also called Rio de Janeiro Bay, is noted for its beauty.

guanaco (gwäna'kō) or **huanaco** (hwänw'kō), wild South American mammal of the camel family, found in the Andes It is believed that the llama and the alpaca were domesticated from the guanaco It stands about 3½ ft high at the shoulder and is brown on the back and sides, with light under parts and a dark face Indians rely on its flesh for much of their food and make its hide into clothing and other coverings and its bones into various implements Winter cold and the increase in the use of grazing land reduced its numbers

Guanahani see SAN SALVADOR, island

Guanajuato (gwänähwa'tō), state (11,805 sq mi , 1946 estimated pop 1,244,281), central Mexico, on the central plateau The state has a high average elevation (6,000 ft), which gives it a moderately cool, healthful climate, and is crossed in the north by transverse ranges (some reaching altitudes of 11,000 ft) of the Sierra Madre Occidental, in the south are fertile plains supporting stock raising and producing wheat, corn, beans, alfalfa, barley, and canary seed The LERMA, with its tributaries, is the chief river system By far the most important activity is mining The leading mining state in Mexico, noted for its enormous output of silver and gold, Guanajuato also produces mercury, lead, tin, copper, and opals Industrial products from the cities—Guanajuato, CELAYA, LEÓN, and IRAPUATO—include flour, textiles, straw hats, saddle and leather goods, and wines Joined with Querétaro, the state was a Spanish intendancy until 1824 The capital, **Guanajuato** (pop 23,521, alt 6,700 ft), founded in 1554, is in the central part of the state in the Cañada de Marfil [ivory ravine], a precipitous ravine encircled by barren hills It has narrow, winding, steep cobblestone streets, sometimes paved out by stone steps, and the ground underneath is honeycombed with silver-mine shafts There are several noteworthy colonial churches and buildings, among them the Alhóndiga de Granaditas [public granary], besieged and captured (1810) by HIDALGO Y COSTILLA at the outset of the war against Spain Because of its geographical position and economic importance, Guanajuato figured prominently in the wars and revolutions that racked Mexico in the 19th and the early 20th cent

guano (gwä'nō), fertilizer material composed of the dried excrement of sea birds collected from equatorial coasts—especially from the coast of Peru, where it has been used as fertilizer for at least 700 years Its discovery by Europeans in the early 19th cent is said to have started the use of artificial manures The Peruvian deposits have been practically exhausted, and other guanos—the excrement of bats, fish, and whales—have been introduced

Guantánamo (gwäntä'nämō), city (pop 42,445), SE Cuba. Connected by rail and highway with Santiago de Cuba, it is a large sugar center It is c 20 mi inland from its port, Caimanera, on land-locked **Guantánamo Bay**, where the United States maintains a naval station

Guaporé (gwäpōrā'), river, c 750 mi. long, rising in the mountains of Mato Grosso state, W Brazil It flows northwest through rain forest and is the Brazil-Bolivia border for some distance before it flows into the Mamoré A territory of Brazil, created out of Amazonas and Mato Grosso in 1942, is named Guaporé. The river is also called the Itênes or Itênez

Guaraní Indians (gwärānē'), people of the Tupi-Guaraní linguistic stock, on the north and east coasts of South America from the Guianas to the Río de la Plata and W to the Paraná, Uruguay, and Paraguay rivers Today the term *Tupí* or *Tupinamba* is generally used for the Brazilian Indians of the Amazon region and the term *Guaraní* for the groups in S Brazil and Paraguay At the coming of the white man, most Guaraní went naked, although in some sections the women wore a garment covering the body from breast to knee and men wore a loincloth (*chiripá*) They lived in patrilineal communities, sometimes as large as 60 families, and had no central government, each of the numerous tribes was governed by a cacique They never planted twice in their small farms (*conucos*) and were therefore seminomadic They ate maize, manioc, beans, and squash, supplementing this diet with fish, game, and wild fruits Polygamy was practiced, and girls were betrothed soon after puberty Their gods were unconcerned with the affairs of men, and there were no idols or sanctuaries They had no funeral rites and buried a man in the hut in which he had lived, deserting it at once Guaraní is still spoken all over Paraguay

Guarda (gwär'du), city (pop 6,598), capital of Guarda dist , N central Portugal, in old Beira prov (now in Beira Alta) On the lower slopes of the Serra da Estrela, it is still high enough to be very cold in winter It has an old fort, a castle, a cathedral, and a hospital for lung diseases

Guardi, Francesco (franchä'skō gwar'dē), 1712–93, Venetian landscape and architectural painter A pupil and follower of Canaletto, he developed a freer style of great brilliance His many charming landscapes are in the galleries of London, Paris, Venice, and Boston The Metropolitan Museum and the National Gallery of Art, Washington, D C , have three each

Guardia, Tomás (tōmas' gwär'dēä), 1832–82, president of Costa Rica An army general, he led a revolt that placed a provisional president in office and then himself took control and ruled the country from 1870 to 1882 with only brief interruptions Under a repressive military dictatorship, he exiled the leading families and halted the destructive Liberal-Conservative rivalry, thus making constitutional government possible Guardia undertook the costly railroad from ocean to ocean, construction was directed by Minor Cooper KEITH

guardian and ward. Guardianship is the relation between a guardian and his ward, whereby the person, or the property, or both, of an INFANT, an insane person, or a spendthrift is placed under the management and control of the guardian for the benefit of the ward The three principal classes of guardianship over infants are testamentary, by nature, and by judicial appointment In the first, the father of an infant has the right to appoint the guardian in his will, the guardian acting under the authority of the will In many states the mother is given this same right by statute Guardianship by nature is the natural guardianship arising out of the relation of PARENT AND CHILD. At common law it belongs first to the father, and after his death to the mother, and in default of both to the grandfather, the grandmother, or next of kin It extends to the person of the child only and not to the separate property of the child The rights and duties of the guardian by nature are usually treated as those of a parent rather than of a guardian The guardian by judicial appointment is one appointed by the court which by statute is given the jurisdiction over such relations A court may, where no testamentary guardian has been appointed by the will of a deceased parent, appoint a guardian for the children The selection of the guardian, if not made by the parent, is generally at the discretion of the ward if over the age of 14 The welfare of the ward being primary, a guardian either of the person or of the property may be set aside by the court at its discretion The same person is usually appointed guardian of the person and the property of the ward, but this is not necessary, the two being legally separate The guardian is held to standards of prudence such as a businessman would exercise in his own affairs He is bound by the fiduciary relationship existing between his ward and himself and must render an accounting both annually and at the termination of the guardianship

Guarini, Giovanni Battista (jōvän'nē bät-tē'stä gwarē'nē), 1537–1612, Italian poet, attached to the court of Ferrara His *Pastor Fido* (1590, first Eng tr , 1602), a pastoral drama, rivaled Tasso's *Aminta*

Guarino da Verona (gwärē'nō dä vārō'nä), 1370–1460, Italian humanist, considered the first among teachers of his time. He translated various Greek and Latin classics and wrote a Latin grammar

Guarneri (gwärnā'rē) or **Guarnerius** (gwarnēr'ēus), family of violinmakers of Cremona Italy The first craftsman of the family was **Andrea Guarneri** (ändrā'a), c.1626–1698, a pupil of Niccolò Amati His two sons, who were his pupils, surpassed him in his work They were **Pietro Giovanni Guarneri** (pyā'trō jōvän'nē), 1655–c 1740, and **Giuseppe Giovan Battista Guarneri** (jōzĕp'pā jōvan' bät-tē'stä), 1666–c 1738, who made even finer violins than his elder brother His son **Pietro Guarneri**, 1695–1765?, was also a successful craftsman The greatest violinmaker of all the family was **Giuseppe Guarneri**, 1687?–1745, grandnephew of Andrea, called "del Gesù" because he signed his labels with a cross and the letters IHS See W H Hill, *The Violin-Makers of the Guarneri Family* (1931)

Guastalla (gwästal'lä), town (pop 13,723), Emilia, N Italy, near the right bank of the Po In 1539 Guastalla was bought by Ferrante GONZAGA of Mantua, it was made a duchy in 1621 The Guastalla branch of the Gonzagas became extinct in 1746, and the duchy passed to Parma (1748) In 1806 Napoleon I conferred Guastalla on his sister, Pauline Borghese but it later reverted to Parma

Guatemala (gwätəma'lə), republic (c 48,000 sq mi , 1946 estimated pop 3,546,624), the most populous and the second largest country of Central America The capital is Guatemala The country is bounded on the north and west by Mexico, on the east by British Honduras and the Caribbean, on the southeast and east by Honduras and Salvador, and on the southwest by the Pacific Guatemala has two principal climatic regions, the cool highlands and the tropical areas of the Pacific coast, the Caribbean coast, and the jungles of PETÉN (vast lowland producing hardwoods and chicle) The highlands, extending from CHIAPAS to the borders of Salvador and Honduras, are the most thickly populated region The rugged main range, reaching altitudes over 11,000 ft , is flanked for its entire length on the Pacific side by a chain of volcanoes (some active), beginning with TACANÁ on the Mexican border and including TAJUMULCO and AGUA Volcanic eruptions and great floods have plagued Guatemala since its beginning, the flood of 1949 was particularly disastrous The northwest section is fertile and is under intense cultivation by Indians, who comprise approximately 65 percent of the population, most of them own their fields Except in large urban centers such as QUEZALTENANGO, their cultural pattern predominates The Maya-Quiché (see QUICHÉ) were defeated (1523–24) by the Spanish conquistador, Pedro de ALVARADO, who became captain general of Guatemala The capital later was ANTIGUA The conquerors found little of the gold they sought (today Guatemalan mines yield only small amounts of chromium and antimony), but the fertile soil produced ample foodstuffs, and from the Pacific slopes came hardwoods, sugar cane, cattle, and cochineal These were the main source of wealth until the late 19th cent , when development and exportation of coffee and bananas outstripped all other sources of revenue The semiarid southeastern highlands are drained by the MOTAGUA river PUERTO BARRIOS near its mouth has, since the construction of the International Railways of Central America, exceeded the Pacific ports, SAN JOSÉ and Champerico, in volume of trade The lower Motagua valley, in the tropical belt, is under intensive banana cultivation To the north is the Lake Izabal–Río Dulce system (see IZABAL, LAKE), eastern outlet of transport during colonial times Besides the railroad, Guatemala is served by international and local air lines and has an extensive highway system With the exception of Negroes and Caribs on the eastern coast, the chief source of agricultural labor (providing subsistence in foodstuffs and the vital manpower to cultivate the coffee farms and, additionally, to maintain municipal and state projects) is Indian The Indians were exploited in the Spanish Conquest, and their condition has not improved greatly It was partly alleviated by Jorge UBICO, who abolished (1936) labor indebtedness but the law requiring public labor was not repealed Industrial workers in the textile mills are largely Spanish-speaking ladinos (Indian handicraft also produces fine textiles) Cigarettes, printing, cement, and leather goods are produced, and Guatemala has other industries, notably distilleries, flour mills, and sugar refineries Petroleum products and most manufactures are imported, creating a deficit offset by coffee and bananas, which account for approximately 90 percent of exports Guatemala's political history has been turbulent Gaining independence from Spain (1821), it was briefly annexed to Iturbide's Mexican Empire and then became the nucleus of the CENTRAL AMERICAN FEDERATION (1823–38) Guatemalan interference in the affairs of other Central American nations during the 19th cent and part of the 20th under the Conservative dictatorships of Rafael CARRERA and Manuel ESTRADA CABRERA and under the Liberal, Justo Rufino BARRIOS, caused intense hostility in the other nations and

led finally to the Washington Conference of 1907, which established the Central American Court of Justice Even under Juan José Arévalo (elected in 1944), Guatemala continued to show interest in other Spanish American countries A long-standing boundary dispute with Honduras was settled (1933) by arbitration That with Great Britain over sovereignty in British Honduras began in 1859 and has been argued with varying force, giving rise to an incident in 1948 that ended with Britain's offer to submit the matter to the International Court of Justice In the Second World War after Guatemala's declaration of war against the Axis powers, property that had gradually been acquired by many of German descent since the late 19th cent (about one fourth of all privately owned land) was expropriated The tremendous influx of new ideas and the doubling of national income, both outgrowths of the war, and the control of immense land areas by the government have catapulted Guatemala from a feudal to a socialistic economy, with consequent strains on the political and social life of all classes of the people See D G Munro, *The Five Republics of Central America* (1918), C L Jones, *Guatemala Past and Present* (1940), George Wythe, *Industry in Latin America* (1945), Ralph Hancock, *The Rainbow Republics* (1947)

Guatemala, city (1946 estimated pop 241,335), S central Guatemala, capital and largest city of the republic, in a broad highland valley Its full name is Santiago de los Caballeros de Guatemala la Nueva The climate is equable the year round, with some cold nights during the winter months It is the largest city in Central America, with a cosmopolitan atmosphere and many fine public buildings erected during the regime of Gen Jorge Ubico Served by international and local airways, the International Railways of Central America, and the Inter-American Highway, it is the nerve center of Guatemala for export and import and for distribution of local industrial and agricultural products The surrounding valley is made fertile by the deposit of volcanic ash To the city's markets come the fruits and vegetables of the tropical coasts and temperate highlands and native handicrafts, textiles, and manufactures Much of the produce is carried in from the countryside by Indians and sold by them in the market stalls The business center offers every kind of foreign import—principally from the United States since the Second World War, which brought about a swift expansion and change in the life of the city The Univ of San Carlos de Guatemala is an outstanding institution of higher learning The present city is the third permanent capital of Guatemala and was founded in 1776 after Antigua was abandoned An earthquake destroyed Guatemala city in 1917–18, but it was rebuilt on the same site

Guatémoc or Guatemozín. see Cuauhtémoc

guava (gwä'vu), small tree or shrub belonging to the myrtle family, native to tropical America and naturalised in many tropical regions The common tropical guava (*Psidium guajava*) has smooth greenish-brown bark and white flowers The fruit, a fleshy berry with many hard seeds, is round or oval, ranging in diameter from 1 to 4 in , and the rind is usually yellow Sweet and musky in flavor, the flesh of the fruit may be white, pink, or red, depending on the variety The strawberry guava (*P cattleyanum*), a native of Brazil produces a round, red fruit with a rough rind and reddish pulp and a supposed strawberry flavor and makes good preserves At the time of the Spanish explorations the guava was found from Peru to Mexico, it is now profitably cultivated in Florida and California The fruit is too perishable to ship easily, and much of it is made into jelly

Guayama (gwīyä'mä), city (pop 16,913), SE Puerto Rico Founded in 1736, it is one of the oldest settlements on the island It is the headquarters of an irrigation and electrification project Besides sugar cane, which is cultivated extensively, coffee, tobacco, and subsistence crops are raised

Guayaquil (gwīukēl'), city (1944 estimated pop 172,948), W Ecuador, on the Guayas river c 40 mi inland from the Gulf of Guayaquil It is the Pacific port and the largest city of the nation Founded by Benalcázar in 1535, Guayaquil was often subjected in the 17th cent to attacks by buccaneers It was destroyed repeatedly by fires in the 18th and the 19th cent. and frequently was scourged by yellow fever until the sanitation work of W C Gorgas It was severely damaged by earthquake in 1942 The port facilities are modern, and the city has an attractive river front and many old colonial buildings During the dry season (July to Dec) cacao beans, Ecuador's chief source of revenue, are spread on many of the city's streets to cure Besides cacao, exports include tagua nuts, cattle, sugar, coffee, alligator skins, and Panama hats Though a railroad links Guayaquil with Quito, the cost of this transport over the Andes is almost prohibitive, while a river network in the valley between the coast range and the Andes makes Guayaquil the metropolis of the coastal region Air lines link it to Panama and Peru Occupation of Guayaquil in 1821 by patriot forces under Sucre was the first major step in the final liberation of Ecuador from Spain Here in 1822 occurred the fateful meeting between Simón Bolívar and José de San Martín that was to influence greatly the course of independence in South America

Guaymas (gwī'mäs), city (pop 8,796), Sonora, NW Mexico, a port on the Gulf of California On the main western rail line, Guaymas is the seaport for Hermosillo and the interior Though the harbor is poor, wheat, cotton, tobacco, gold, silver, hides, and pearls are exported Two quick-freezing plants have increased the importance of fish products It is a popular resort for Gulf fishing

Gubbio (gōō'byō), town (pop 7,432), Umbria, central Italy, 20 mi NE of Perugia It was an ancient town of the Umbrians (coins and the Iguvine Tables were found here) and also flourished under the Romans It was a free commune in the 11th cent and passed under the Montefeltro family of Urbino in 1378 and under the popes in 1626 There was a local school of painting Beautiful ceramics were made here in the 16th cent The city has a marked medieval aspect, among its notable buildings are the palace of the consuls (14th cent), the town hall, the early Renaissance ducal palace, and several churches

Gudbrandsdal (gōō'bränsdäl"), valley, central Norway It extends from Lillehammer on Mjosa lake northwestward to the Dovrefjell A rich agricultural and timber district, it is also important for its horse breeding Many Gudbrandsdal farmers trace their ancestry back to saga times, and the population has preserved its own dialect and customs Much of the action in Ibsen's *Peer Gynt* is laid in the Gudbrandsdal In the Second World War there was severe fighting here during the German invasion of Norway (1940)

Guden (gōō'dun), Dan *Gudenaa* (gōō'dhunô"), river, 98 mi long, Jutland, Denmark The only Danish river of importance, it flows generally north, traversing several lakes, past Silkeborg, then northeastward past Randers to Randers Fjord and the Kattegat It is partly navigable and has salmon

Gudgodah (gŭd'gōdù, gŭdgō'–), desert camping place see Hor-hagidgad

Gudmundsson, Kristmann, Icelandic *Guðmundsson* (krist'man gvüdh'munsŏn), 1902–, Icelandic novelist He lived in Norway from 1924 to 1937 and has written in both Norwegian and Icelandic He excels in the romantic type of story, displaying a keen psychological insight His books have been widely translated, e g , *The Bridal Gown* (1927, Eng tr , 1931), *Morning of Life* (1929, Eng tr , 1936), and *Winged Citadel* (1937, Eng tr , 1940)

Gudrun (gōō'drōōn) or **Kudrun** (kōō'–), in Germanic literature **1** Heroine of the Volsungasaga, married first to Sigurd (see Siegfried), then to Atli (Attila the Hun) She corresponds to Kriemhild of the Nibelungenlied, but is fiercer Wagner's Gutrune (in the *Götterdämmerung*) is a wholly subordinate character, playing the traditional role of robbing Brunhild of Siegfried **2** Heroine and title person of an anonymous Middle High German epic written (c 1210–1220) after the *Nibelungenlied* It is neither so interesting nor so savage as its predecessor **3** Principal character of the Icelandic *Laxdaelasaga*, made known to English readers by William Morris through his "Lovers of Gudrun" in *The Earthly Paradise* The tale is based on the saga

Guébriant, Jean Baptiste Budes, comte de (shä' bäptēst' büd' kōt' du gäbrēä'), 1602–43, marshal of France and general in the Thirty Years War He commanded the French auxiliaries of Bernhard of Saxe-Weimar and succeeded to his command Guébriant, with Swedish aid, defeated the imperial troops at Wolfenbüttel (1641) He was killed at Rottweil

Guebwiller, Ballon de, France see Vosges, mountains

Guelderland or **Guelders,** Netherlands see Gelderland

guelder-rose see high-bush cranberry

Guelph (gwĕlf), city (pop 23,273), S Ont , on the Speed river and NW of Hamilton It is an industrial city with packing plants, paper mills, and clothing manufactures, in the center of a rich farm area The Ontario Agricultural College, with an experimental farm, is here, and a provincial fair and stock show is held annually Guelph was founded by John Galt in 1827 and named by him after the family name of the royal house

Guelphs (gwĕlfs), highly ramified European dynasty, tracing its descent from Guelph I or Welf I (9th cent), father-in-law of Emperor Louis I Guelph III (d 1055) was made (1047) duke of Carinthia and margrave of Verona Without male heirs, he was succeeded by his nephew, Guelph d'Este IV, ancestor of the dukes of Ferrara and Modena (see Este) and of the Guelphic dukes of Bavaria and Saxony (see Henry the Proud and Henry the Lion) His daughter Judith married Frederick II of Hohenstaufen, their son, Emperor Frederick I, thus united in his person the two chief rival houses of Germany It was, however, during the reign of Frederick I that the strife between Guelphs and Hohenstaufen reached its acute stage and set off the chronic civil war between Guelphs and Ghibellines in Italy After 1180 only the duchy of Brunswick remained to the descendants of Henry the Lion The line of Brunswick-Lüneburg or Hanover ascended (1714) the throne of Great Britain in the person of George I Because of the Salic law of succession Hanover was separated (1837) from the British crown on the accession of Queen Victoria After the deposition (1866) of George V, last king of Hanover, the so-called Guelphic party was founded and unsuccessfully sought to restore the kingdom

Guelphs and Ghibellines (gwĕlfs, gĭ'bulēnz, -līnz), opposing political factions during the later Middle Ages The parties originated in the rivalry of two princely houses of Germany, the Welfs or Guelphs, who were dukes of Saxony and Bavaria, and the Hohenstaufen (the name Ghibelline is supposedly derived from Waiblingen, a Hohenstaufen castle) The struggle began under Conrad III with the rebellions of Henry the Proud and Henry the Lion and reached its highest pitch under Frederick I, who in 1180 deprived Henry the Lion of most of his lands In Italy (except Venice) the party names were perpetuated by the two rival factions which, for centuries, were to plunge the country into internal warfare At first the Italian Guelphs were members of the papal party, opposing the Hohenstaufen emperors during the wars of investiture, they included most of the great cities, particularly those of the Lombard League and Bologna, Florence, and Genoa The Ghibellines were mostly found among the great noble families and petty tyrants such as Ezzelino da Romano, Castruccio Castracani, the Della Scala of Verona, the Montefeltro of Urbino, and the Visconti of Milan (though Milan itself was Guelph), they also included several cities, notably Pisa and Arezzo However, the individual cities themselves were also divided between the two factions In Rome the Ghibellines were represented by the pope's enemies, notably the Colonna, and by the republicans In S Italy the terms were seldom used, though the Angevin kings of Naples were strongly Guelph The party names soon lost their original connotation, and local feuds disturbed the party alignments Thus, for instance, the Guelphs of Florence, after the Ghibellines had been expelled, soon divided into Blacks and Whites By the 15th cent the names fell into disuse Guelph-Ghibelline warfare had ruined the peace of Italy and prolonged all the evils of partisanship At no time did either party clearly represent any particular political doctrine or social class See Oscar Browning, *Guelphs and Ghibellines* (1894)

Guenever or **Guenevere,** King Arthur's queen see Arthurian legend

Guercino (gwĕrchē'nō), 1591?–1666, Italian eclectic painter, whose real name was Giovanni Francesco Barbieri The influence of Caravaggio and of Guido, his great contemporary, is apparent in much of his work Among the 250 or more paintings left by him are 106 large altarpieces *St Petronilla*, his masterpiece, is now in the capitol, Rome, other examples are in the Uffizi and Pitti galleries, Florence, the Louvre, the Brera, Milan, and Bologna Gallery

Guéret (gārā'), town (pop 8,239), capital of Creuse dept , central France, a market center It was the capital of the county of Marche

Guericke, Otto von (ō'tō fŭn gā'rĭku), 1602 86, German physicist, noted for his study of pneumatics In the course of attempts to create a vacuum he made the first air pump He devised the Magdeburg hemispheres to demonstrate the pressure of air These were two metal hemispheres fitted together to form a globe, when the air was pumped out, it is said to have required 16 horses to pull the hemispheres apart Guericke also invented a machine to generate electricity He was burgomaster (1648–81) of Magdeburg

Guérin, Jules (jōlz' gā'rĭn), 1866–1946, American mural painter and illustrator, b St Louis His illustrations appeared in leading magazines He executed decorations for the Lincoln Memorial, Washington, D C , for the Pennsylvania RR station, New York, for the Federal Reserve Bank, San Francisco, for the Civic Opera, the Merchandise Mart, and the Illinois Merchants' Bank, Chicago, for the Union Trust Bank and Cleveland Terminal, Cleveland, and for the Louisiana state capitol, Baton Rouge He was director of decorations and color at the Panama-Pacific Exposition (1915) and became a member of the National Academy of Design in 1931

Guérin, Maurice de (Georges Maurice de Guérin) (mōrēs' dù gārĕ"), 1810–39, French writer He was educated at the Collège Stanislas and taught there, was for a time a follower of Lamennais, married, contributed a few articles to periodicals, and died young, leaving two fragmentary poems in prose, *Le Centaure* and *La Bacchante*, a handful of poems, letters, journals, and miscellaneous bits of prose His work, infused with a strange mingling of pantheism and Christian mysticism, has a classic purity of form First edited by G. S. Trébutien and Barbey d'Aurevilly as *Reliquiae* (1861, republished as *Journal, lettres, et poèmes*), his collected works have been augmented in the many later editions

Essentially a "poet's poet," Guérin is important more for the interest that later literary men have taken in his tragic life and his works than for the works themselves Matthew Arnold wrote essays on Guérin and his sister, **Eugénie de Guérin** (ûzhānē'), 1805–48, who collected her brother's writings and herself wrote prose of rare charm. Her journals and letters were gathered slowly Interest in the Guérins has been strong in foreign lands as well as in France See *Journal of Eugénie de Guérin* (Eng tr , 1865, new ed , 1866), *Journal of Maurice de Guérin* (Eng tr , 1891), and *From Centaur to Cross* (Eng tr , 1929).

Guérin, Pierre Narcisse, Baron (pyĕr' närsēs' bärō' gărē'), 1774–1833, French painter He won enthusiastic recognition in 1800 for his *Marius Sextus* (Louvre) A worthy exponent of the classicism of J L David, he was made professor at the École des Beaux-Arts in 1814 He counted among his pupils Delacroix, Géricault, and Ary Scheffer, who were destined to launch the romantic school Guérin enjoyed many honors under varying regimes Among his best works are *Aeneas and Dido*, *Clytemnestra*, and *Andromache*, all in the Louvre

Guernica (gĕrnē'kä), historic town, Vizcaya prov , N Spain, in the Basque Provs The oak of Guernica, under which the diet of Vizcaya used to meet, is a symbol of the lost liberties of the Basques In April, 1937, German planes, sent to aid the Insurgents in the Spanish civil war, bombed and destroyed Guernica The indiscriminate bombing of women and children aroused world opinion and became a symbol of fascist brutality The event inspired one of Picasso's most celebrated paintings

Guernsey, Egbert (gûrn'zē), 1823–1903, American physician, b Litchfield, Conn , studied medicine at New York Univ A leader of the homeopathic school, he taught in the New York Homeopathic Medical College and founded a maternity hospital He founded (1872) and edited the *Medical Union* (later the *Medical Times*) and wrote *Homeopathic Domestic Practice* (1853, later called *Domestic Practice*)

Guernsey (gûrn'zē), triangular island, area 25 sq mi , in the English Channel, second in size of the CHANNEL ISLANDS Guernsey, bailiwick (pop 40,588) includes Alderney, Sark, Herm, Jethou, and smaller islands Guernsey has a low beach in the north and bold rocky cliffs along the south shore The shipping and distributing center and chief town is St Peter Port, on the east coast Exports include dairy products, fruits, flowers, and vegetables for city markets, blue granite, and Guernsey cattle Victor Hugo lived in St Peter Port for more than 15 years

Guernsey cattle, breed of dairy cattle related to the Jersey breed, descendants of ancestral members from the islands of Alderney, Guernsey, and Sark They are larger than the Jersey and fawn-colored marked with white, characteristically having a white shield on the forehead The average milk yield is a little higher than that of the Jersey but the milk is slightly less rich

Guerra Junqueiro, Abilio (äbē'lyō gĕ'rə zhōōnkā'rō), 1873–1923, Portuguese poet A hot revolutionary, he wrote violent satiric poems, attacking conservatism, romanticism, and the Church, among them *A morte de Dom Jôas* [the death of Don Juan] (1874) and *A velhice do Padre Eterno* [the old age of the Eternal Father] (1895) He also wrote simple, touching lyrics such as those in *Os simples* (1892)

Guerrazzi, Francesco Domenico (frāncha'skō dōmā'nēkō gwär-rat'tsē), 1804–73, Italian patriot and writer He was born in Leghorn, where he practiced law A radical republican and nationalist, he was repeatedly imprisoned for his patriotic activities He became a minister and dictator (1848–49) of Tuscany in the revolutionary government and on its fall was imprisoned and was exiled until 1859 He sat until 1870 in the Italian parliament Of his historical novels the best known is *L'assedio di Firenze* [the siege of Florence]

Guerrero, Vicente (vĕsān'tā gĕrā'rō), 1782–1831, Mexican revolutionist and president (April–Dec , 1829) He fought under the command of MORELOS Y PAVÓN, spreading the revolution in the South Guerrero won victory after victory When Morelos was defeated and executed, Guerrero continued to wage guerrilla warfare, harassing the royalists He fought on when most of the revolutionary leaders had been defeated or had given up the struggle for freedom When Agustín de ITURBIDE was sent out in 1820 to defeat him, Guerrero won minor victories over Iturbide's troops but was persuaded to adhere to the Plan of IGUALA (1821) and to accept Iturbide's leadership Thus the revolution lost its popular cast and passed into the hands of the landowning creoles and the clergy Guerrero accepted Iturbide's empire in 1822 but later joined the revolution begun by SANTA ANNA The flimsy structure of Iturbide's government fell, and Guerrero was elected a member of the provisional government He became a liberal party leader in opposition to the conservative, Nicolás BRAVO, and helped to put down Bravo's revolution against President GUADALUPE VICTORIA (1828) Defeated in the election of 1828, Guerrero charged fraud and, with the help of Santa Anna, led a successful revolution and was made president (1829) In his administration the Spanish invaders of Mexico were driven back by Santa Anna Dec , 1829, Anastasio BUSTAMANTE, the vice president, led a revolt against Guerrero, who retired to the South, where he conducted sporadic warfare throughout 1830 He was finally captured and shot See biography by W F Sprague (1939)

Guerrero, state (24,887 sq mi , 1946 estimated pop 858,325), SW Mexico, on the Pacific The capital is CHILPANCINGO Dominated by the Sierra Madre del Sur, which reaches 12,149 ft in the Pico de Teotepec, Guerrero is extremely mountainous except for a narrow coastal strip, which has a good harbor at ACAPULCO The major river is the Río de las BALSAS The climate of the coast and the deep valleys is hot, rainy, and unhealthful, but the highlands are temperate and drier Growing of coffee, tobacco, cotton, sugar cane, cocoa, and cereals and breeding of cattle are the chief means of livelihood From extensive forests come rubber, vanilla, and woods for cabinetwork and for dyes Although mineral resources remain generally unworked, there are deposits of gold, silver, lead, mercury, iron, coal, precious stones, and sulphur The silverwork of TAXCO is famous In Chilpancingo, TIXTLA, and other towns, cotton and leather goods, cigarettes, cane products, mescal, and tequila are manufactured In the Spanish colonial period and later Guerrero was divided among Michoacán, Mexico (state), Puebla, and Oaxaca and did not become a state until 1849 Prominent in the war against the Spanish (1810–21), the state was named later for Vicente GUERRERO, one of the revolutionary leaders, who accepted Agustín de Iturbide's Plan of IGUALA At AYUTLA in 1854 the Plan of Ayutla was proclaimed against Santa Anna's tyranny

Guerrière see CONSTITUTION, ship

guerrilla warfare (gərĭl'lə) [Span , =little war], fighting by small armed bands independent of regularly organized and official military forces Discipline is less rigid with them than with regular soldiers, as it depends entirely on the personality of their leader Sometimes they merely constitute robber bands using the war as a cover for their plundering and like pirates on the sea, are not entitled, when captured, to the privileges of ordinary prisoners of war, this class is usually executed as robbers and murderers More often they are partisans, akin to seagoing privateers, under a leader who is commissioned by the power he is fighting for When partisans obey the laws of civilized warfare they are entitled on capture to be treated as ordinary prisoners of war Very often, however, they are executed by their captors Guerrilla warfare has played a great part in modern history Large-scale guerrilla fighting accompanied the American Revolution Farmers, hidden behind trees or walls, aimed their rifles at retreating redcoats after the battle of Lexington, and throughout the colonies they continued to harass the British regulars till their capitulation at Yorktown Particularly in the South was guerrilla fighting effective The development of guerrilla tactics there under such famous partisan leaders as Francis MARION, Andrew PICKENS, and Thomas SUMTER has been called the great contribution of the American Revolution to the history of warfare The name guerrilla itself was coined during the Peninsular War (1808–14), when Spanish partisans under able leaders such as Francisco MINA proved unconquerable even before the military genius of Napoleon From Spain the use of the term spread to Latin America and thence to the United States The "bushwhacking" and "jayhawking" of proslavery and antislavery forces in "bleeding" Kansas in the late 1850s were species of guerrilla fighting In the American Civil War, William C QUANTRILL, who operated in Missouri and Kansas, was the most notorious Confederate guerrilla leader However, John S MOSBY, eternal gadfly to Union forces in N Virginia, was doubtless the most effective Southern partisan leader Guerrilla fighting also flourished in the mountainous sections of West Virginia and Tennessee and in Kentucky during the Civil War The Germans suffered so much from French partisans (francs-tireurs) in the Franco-Prussian War of 1870–71 that Field Marshal von Moltke ordered all prisoners who were not fully uniformed and led by regular army officers to be shot The death penalty was even prescribed for a refusal to betray comrades Much of the long-drawn-out military activity of the U S army in the Philippines after the Spanish-American War was against Filipino and Moro guerrilla bands Guerrilla warfare has been characteristic of much fighting in Latin America, and Francisco (Pancho) VILLA and Augusto C SANDINO were leaders who caused no little trouble In the First World War the most spectacular theater of guerrilla operations was the Arabian peninsula, where under the leadership of T E LAWRENCE and Feisal al Husein (later Feisal I) various Arab bands were effectively used against the ordinarily much superior Turkish forces Chinese resistance against Japanese aggression after 1937 was due as much to small partisan bands as to regular Chinese armies, and Spanish republican partisans delayed Franco's victory in the Spanish civil war In the Second World War partisans were especially important in the Balkans and in Russia The Germans were never able to establish a complete hold on Yugoslavia because of the small but well-equipped bands of the Communist partisan leader TITO In the Soviet Union guerrilla warfare was even taught at the military academy and was so brilliantly organized that it constituted a continual threat to the German rear and contributed greatly to the German disaster on the Eastern Front French guerrillas (the *maquis*) aided Allied airmen downed in combat and were of tremendous help to Allied ground forces after the landing in Normandy Guerrillas were also active in Greece, Italy, Poland, the Philippines, China, and most other countries occupied by the Axis powers When captured the partisans were treated with utmost cruelty by the Germans and Japanese Shortly before their surrender the Germans organized a guerrilla movement called the Werewolf, but it failed to achieve any results

Guerrini, Olindo (ōlēn'dō gwär-rē'nō), 1845–1916, Italian poet His *Postuma* (1877) and some later volumes of poetry were published under the pseudonym Lorenzo Stecchetti (lōrān'tsō stāk-kāt'tē) Guerrini also wrote humorous verse in the Venetian dialect He was a leader of the *verismo* school of literature, opposed to the classicism of Giosuè Carducci

Gueslin, Bertrand du see DU GUESCLIN, BERTRAND

Guesde, Jules (zhül' gĕd'), 1845–1922, French socialist, whose real name was BASILE Exiled for his support of the Paris commune, he became a confirmed Marxist after 1876 and, with Paul Lafargue, led in advocating socialism in France and a policy of non-compromise with the existing government Guesde was largely responsible for the formation (1905) of the unified Parti socialiste, which marked the triumph of Marxism over variant forms of French organized socialism He was a deputy (1893–1921) and served in the cabinet during the First World War, when his patriotism overcame his former uncompromising stand He wrote many socialist pamphlets and articles

Guess, George see SEQUOYA

Guest, Lady Charlotte (Bertie), 1812–95, English author who translated (pub 1838–49) the MABINOGION Her second husband was Charles Schreiber

Guest, Edwin, 1800 1880, English archaeologist and philologist Practically the founder of the Philological Society (1842), he wrote articles on English philology and on archaeology, especially the remains of Roman Britain Guest's writings are still valuable for their extensive materials cited His only book was *A History of English Rhythms* (1838, ed by W W Skeat, 1882), his papers were republished as *Origines Celticae* (ed by William Stubbs and C Deedes, 2 vols , 1883)

Gueux (gû) [Fr , =beggars] In 1566 more than 2,000 Dutch and Flemish nobles and burghers (both Protestants and Catholics) signed a document—the so-called Compromise of Breda—by which they bound themselves in solemn oath to resist the curtailment of liberties imposed by the Spanish government in the NETHERLANDS The document was drafted chiefly by Philip van MARNIX Its radical tone displeased the great nobles, on the advice of William the Silent the original wording was considerably toned down when, in the same year, a petition on behalf of the signers of the compromise was presented to the regent, Margaret of Parma Margaret's adviser, Barlaymont, referred to the petitioners as "these beggars," whereupon the revolutionary party adopted both the sobriquet and the insignia of beggars In 1569 the term "Beggars of the Sea" (Fr *Gueux de la mer*) came to be applied to crews of patriotic privateers chartered by WILLIAM THE SILENT to harass Spanish shipping, their most notable action was the raising of the siege of LEIDEN (1574) In later years the crews degenerated into ordinary pirates

Guevara, Antonio de (antō'nyō dā gəvär'rä), 1480?–1545, Spanish moralist and chronicler His most famous book is a didactic novel, *Libro llamado Relox de príncipes* (1529), often called *Libro áureo del emperador Marco Aurelio*, of which there were early English translations under various titles The best known of these are *The Golden Book of Marcus Aurelius* (1535), translated by Baron Berners, and *The Dial of Princes* (1557), translated by Sir Thomas North, which was once thought to have given rise to the euphuistic school of English literature *Menosprecio de corte y alabanza de aldea* (1539) contrasts life in court and in the country His *Epístolas familiares* (1539 45) was translated as *Golden Epistles* (1593)

Guevara, Luis Vélez de see VÉLEZ DE GUEVARA

Gueydan (gādan', gā'dun), town (pop 1,506), SW La , in the bayou region, inc 1899

Guggenheim (gōō'gunhīm), family of American industrialists and philanthropists **Meyer Guggenheim,** 1828–1905, b Aargau canton, Switzerland, came (1847) to the United States, prospered as a retail merchant in Philadelphia, and in time built up a flourishing business importing Swiss embroidery When nearly 60 he purchased from friends

some Colorado mining property. Sensing that sure profits were in processing rather than in mining, he built large smelters in Colorado and Mexico and a refinery at Perth Amboy, N J The expansion of the Guggenheim enterprises was accelerated by seven well-trained sons—Isaac, Daniel, Murry, Solomon, Benjamin, Simon, and William—who filled strategic places in the Guggenheim organization **Daniel Guggenheim**, 1856–1930, b Philadelphia, was largely responsible for combining (1901) the Guggenheim interests with the American Smelting and Refining Company, of which he became president. He thus headed an industrial empire which mined copper and nitrate in Chile, tin in Bolivia, gold in Alaska, and diamonds in Africa The Daniel and Florence Guggenheim Foundation and the Guggenheim Fund for the Promotion of Aeronautics represent his principal philanthropies His son, **Harry Frank Guggenheim**, 1890–, b West End, N J , fought in two world wars, served in international conferences, and was (1929–33) ambassador to Cuba Daniel's brother, **Simon Guggenheim**, 1867–1941, b Philadelphia, served (1907–13) as U S Senator. With his wife he established (1925) in memory of their son the John Simon Guggenheim Memorial Foundation, which annually grants fellowships to scholars, writers, and artists Another brother of Daniel, **Solomon Robert Guggenheim**, 1861–1949, b Philadelphia, established a foundation to increase public appreciation of nonobjective art See Harvey O'Connor, *The Guggenheims* (1937)

Guiana (gēä'nu, gēä'nū), region, NE South America, bounded by the Orinoco, by the Casiquiare channel connecting the Orinoco with the Río Negro, by the Amazon, and by the Atlantic It includes SE Venezuela, part of N Brazil, and Dutch, British, and French Guiana In a narrower sense, the name is restricted to the three colonies Most of the GUIANA HIGHLANDS is in Venezuela A southeastern extension of the highlands, and geologically a part of them, though separated from them by the valleys of the upper Río BRANCO and the ESSEQUIBO, is the low Tumuc-Humac range Descending from the plateaus in gigantic waterfalls such as KAIETEUR FALLS and flowing among low mountains, the rivers pass through savannas, tropical rain forests, and coastal mangrove swamps and lagoons They are navigable only for short distances because of frequent falls and rapids, a feature which has seriously handicapped exploitation of the region. The coastal zone, from 15 to 50 mi wide, contains rich deposits of alluvium carried by ocean currents from the Amazon and piled up in long mud bars The Dutch and subsequently the English reclaimed near the centers of population much of the tidal lands for planting sugar cane and rice, but the acreage is tiny in comparison to Guiana as a whole Virtually the only other agricultural activities are the Bush Negroes' fields of subsistence crops on the savannas of the interior Together with scattered tribes of Indians, with whom generally they do not intermingle, the bush Negroes are practically an independent people, descendants of freed slaves or MAROONS. Ever since the emancipation of the slaves in the 19th cent., labor shortage has proved a second important handicap to material advancement, partially offset in British Guiana by importing East Indians until the emigration was prohibited by the Indian government Most of coastal Guiana suffers from a monotonous and muggy heat Rainfall is heavy Except in the British and Dutch centers of population, where modern sanitation measures have been taken, tropical fevers are prevalent The legend of EL DORADO existed in Guiana, but the difficulty of finding easy wealth kept the Spaniards out and left the coast open to the commercial enterprises of the Dutch, English, and French, spurred on at first by the tales of Sir Walter Raleigh, who voyaged there in 1595 The Dutch were first to settle, but ownership of the territory was to change hands many times before the present arrangement. **British Guiana** (83,000 sq mi., pop 375,819, exclusive of native Indians) is a crown colony and westernmost of the three. The capital is GEORGETOWN on the Demerara river, and the colony is sometimes called Demerara The population is polyglot—about 3 percent white, about 3 percent Indian, about 42 percent East Indian, about 38 percent Negro, and the rest various mixtures Most prosperous of the three colonies, British Guiana exports sugar, rum, rice, hardwoods, balata, and quantities of gold, diamonds, and bauxite The diamond fields on the Mazaruni river rank next to the African fields, the bauxite mines are among the world's major sources of aluminum In 1630 the British had begun settlement of Surinam (present Dutch Guiana), and by the middle of the century were casting covetous glances toward the prosperous Dutch settlements to the northwest—Essequibo, Berbice, and Pomeroon in present British Guiana During the DUTCH WARS the English captured (1665) the Dutch settlements, but by the Treaty of Breda (1667) the Dutch not only regained them but also, in exchange for New Netherland (New York), the British title to present Dutch Guiana Dutch control was briefly interrupted (1780) by English capture of the principal towns, but in 1782 the French wrested control from the British, and by the Treaty of Paris (1783) Dutch ownership was restored. Again, in the French Revolutionary Wars, England seized all the Dutch possessions in Guiana. Restored to the Netherlands by the Peace of Amiens (1802), the colonies were once more captured (1803) by the British and held until the Congress of Vienna (1815), when Great Britain was permanently awarded what is today British Guiana and the Netherlands was confirmed in its ownership of Surinam—a reversal of the original pattern of settlement. The colonies of Essequibo, Berbice, and Demerara were united Gold was discovered in 1884 and speeded British expansion toward the Orinoco delta, a trend bitterly resented by Venezuela. The VENEZUELA BOUNDARY DISPUTE ensued In 1940 the United States acquired 99-year leases to defense bases in the colony See William Beebe, *Jungle Peace* (1918), Evelyn Waugh, *Ninety-two Days* (1934), P A Zahl, *To the Lost World* (1939) **Dutch Guiana, Netherlands Guiana**, or **Surinam** (sōōrĭnäm', -näm'), Dutch *Suriname* (55,143 sq mi , pop 203,580, including Indians and bush Negroes), lies between British and French Guiana The capital is PARAMARIBO While the Negro element predominates, the population also includes Javanese, East Indians, native Indians, Brazilian Jewish refugees, and a few fugitives from the French penal camps Of the chief exports—rum, coffee, timber, and bauxite—bauxite is shipped almost entirely to the United States Although the first Dutch expedition to the Guianan coast took place in 1597–98, it was 1616 before a colony was established on the Essequibo in present British Guiana To exploit the territory the Dutch West India Company was founded in 1621 The Dutch hold on the coast was interrupted by the English (as told in the account of British Guiana), by French attacks, and by a disastrous slave insurrection (1762–63) The Treaty of Breda gave the present Dutch Guiana to the Netherlands, and when the Congress of Vienna reapportioned the territory of Guiana in 1815, the Dutch lost the colonies they had founded but secured permanent title to Surinam Late in 1949 the colony was made autonomous within the Dutch empire See M J Herskovits and F S Herskovits, *Surname Folk-Lore* (1937), P H Hiss, *Netherlands America* (1943) **French Guiana**, Fr *La Guyane Française* (c 34,740 sq mi , pop 28,537, excluding the floating population of the interior), is E of Dutch Guiana In 1946 it became a department of Metropolitan France The region comprises the colony proper, a coastal area some 25 mi wide, and the interior Territory of Inini (c 30,300 sq mi , pop 5,024), which was administered separately from 1930 to 1947 The capital is CAYENNE The French possession is less prosperous than the British or the Dutch Plantations produce practically nothing for export The only economic mainstay has been gold, discovered in 1853 French Guiana was used as a penal colony and place of exile in the days of the French Revolution, and Napoleon III strengthened its status as a prison for hardened criminals Escaped and paroled prisoners have settled in the colony In 1946 France halted the transportation of prisoners to Guiana and began removing those still in the prisons and the camps on the tropical coastal rivers and on islands such as the Îles du Salut, the most famous of which is DEVIL'S ISLAND The first important French settlement in the region was founded at Cayenne in 1643 In the Dutch Wars of Louis XIV, Cayenne in 1676 was captured by the Dutch but was later retaken During the Napoleonic Wars, Cayenne was occupied (1808–17) by the Portuguese, but the Congress of Vienna had restored the colony in 1815.

Guiana Highlands, mountainous tableland, mostly in Venezuela, bounded by the Orinoco and Amazon basins and the coastal lowlands of British Guiana. RORAIMA is the highest mountain The Guiana Highlands consist of vast plateaus of crystalline rocks overlaid by sandstone and lava caps The tablelands rise one after another in sheer escarpments hundreds to thousands of feet high, like gargantuan steps, and rivers pouring over the edges create magnificent waterfalls, such as Kukenaam (2,000 ft high) and ANGEL FALLS Vegetation ranges from open grasslands to semideciduous tropical rain forests Quantities of gold have been mined in the El Callao area c 125 mi S of CIUDAD BOLÍVAR, and some diamonds have been obtained Fabulous deposits of iron ore remain almost untouched, for though potentially a source of great mineral and agricultural wealth, the region of the Guiana Highlands is one of the most inaccessible wilderness areas of the world

Guibert of Ravenna (gwĭ'bûrt, gēbĕr'), d. 1100, Italian churchman (b Parma), antipope (1080–1100) with the name Clement III He was imperial chancellor of Italy (1057–63) and always opposed the papal reform efforts, so he led the party which repudiated Pope Alexander II HENRY IV made him archbishop of Ravenna (1072), and Guibert continued to intrigue against GREGORY VII In 1080 after Henry was excommunicated, he summoned a council which declared the pope deposed and chose Guibert The antipope entered Rome in 1083, in Henry's train, and was enthroned in 1084 He crowned the emperor. His name is sometimes spelled Wibert

Guicciardini, Francesco (frănchä'skō gwēt-chärdē'nē), 1483–1540, Italian historian and statesman He represented (1512) his native Florence at the court of Spain, held several offices in the Florentine government, and entered (1516) the service of Pope Leo X. He was appointed governor of Modena (1516), commissary of the papal army (1521), and president of the Romagna (1524) After 1527, when he lost his high office as a result of the invasion of the Papal States by the army of Emperor Charles V, Guicciardini devoted himself chiefly to writing His history of Italy, written in his maturity and covering the period 1492–1534 (i e , the period of the Italian Wars), is the masterwork of Italian historical literature of the Renaissance It is distinguished by its objectivity and its clear-eyed analysis of motives, events, and persons. A follower of Machiavelli, Guicciardini had scant regard for ethics in politics and has been accused of cynical realism. His history of Florence, covering the period from 1378 to 1509, written during his youth, was published only in 1859 It has all the merits of the later work, and in addition that of extreme simplicity and directness of style. Guicciardini also wrote a collection of maxims, translated as *Counsels and Reflections* (1890).

guidance, concept that education must promote the efficient and happy life of the individual student The disruption of community and family life by the complexities of industrial civilization made it apparent that experts in guidance should be trained to handle problems of individual adjustment Though the need for attention to the whole individual has been recognized by educators since Socrates, only during the 20th cent has a body of information developed This development, occurring largely in the United States, was the result of two influences John Dewey and others insisted that the object of education should be to stimulate the fullest possible growth of the individual and that the unique qualities of individuality require individual handling for adequate development, in this same period, social and economic developments stimulated a great increase in school enrollment These two forces encouraged a reexamination of the curriculums and methods of secondary schools with special reference to the needs of students who did not plan to enter college The academic curriculum was revised to fit their cultural and vocational requirements (see VOCATIONAL TRAINING) Early guidance programs dealt with the immediate problem of vocational placement In an industrial economy, machinery for bringing together jobs and workers was essential, and the problem was complicated by the unrealistic ambitions of many young people To meet the need, vocational counselors assumed the duties of helping people understand their potentialities and liabilities and of helping them make intelligent vocational decisions The Boston Vocational Bureau was organized in 1908, and since then many schools, municipalities, states, and private organizations have instituted vocational counseling services With the development of aptitude testing, commercial organizations were formed to analyze the client's abilities and to furnish advice Schools, especially those in industrial areas, organized testing and placement services, many of them in cooperation with interested Federal and state agencies The U S. Employment Service has been an active force in establishing standards and methods of vocational guidance The personnel departments of many large corporations have instituted systems of guidance to promote the better utilization of their man power At the conclusion of the Second World War the Veterans' Administration set up an ambitious vocational and educational guidance program Every person who served in the armed forces honorably and more than 90 days was eligible under the law for vocational advisement by trained advisers The field of guidance includes educational counsel which goes beyond vocational considerations into questions of avocation, creative interests, financial resources, and family background In so far as guidance enters the field of personal and social adjustment, counselors must be conversant with the psychology of personality Virtually all teachers colleges offer major courses in guidance, and graduate schools of education grant advanced degrees in the field See W V Bingham, *Aptitudes and Aptitude Testing* (1937), R M Strang, *Pupil Personnel and Guidance* (1940), J. M Brewer, *History of Vocational Guidance* (1942), A. E. Traxler, *Techniques of Guidance: Tests, Records, and Counseling* (1945).

Guidi, Tommaso: see MASACCIO.

Guido d'Arezzo (gwē'dō därĕt'tsō) or **Guido Aretinus** (ărĭtī'nus), c.990–1050, Italian Benedictine monk. His chief contributions to musical notation are two—he added two lines to the two (one red, one yellow) already serving as a staff, and he made use of both the lines and the spaces. His

theoretical work, *Micrologus* (c.1040), is one of the principal sources of our knowledge of organum An important innovation of his was the solmization syllables (sometimes called, after him, Aretinian syllables). He observed that each line of a well-known hymn to St John began a note higher than the previous line and, as an aid to memorising, used the first syllable of each line to indicate the successive tones of the hexachord *Ut* queant laxis; *Resonare* fibris, *Mira* gestorum, *Famuli* tuorum, *Solve* polluti, *Labii* reatum; Sancte Joannes As the octave superseded the hexachord, an additional syllable *si* or *ti* was added, and for nearly 200 years *ut* has been replaced by *do* as being more singable Other revisions which have been suggested from time to time have not survived Guido's system was such as is called a movable-do system today, each hexachord beginning with *ut* and ending with *la*, even when transposed In this manner these syllables became the basis of the tonic sol-fa system of MUSICAL NOTATION Fixed-do systems, wherein do is always C no matter what the key of the music, have also been employed in the teaching of sight singing SOLFÈGE is the commonest fixed-do system

Guido of Siena (sē'nä), 13th cent, Italian painter whose identity is doubtful All that is known of him is an inscription on a large and almost completely repainted *Virgin and Child Enthroned* (formerly in San Domenico at Siena, now in the Palazzo Pubblico), which reads, "Guido de Senis" and bears the date 1221 Some authorities claim this should read 1281 and ascribe the work to Guido Graziani, a Sienese artist of the later 13th cent, but modern experts incline to the earlier date—a fact which, if true, makes this artist the predecessor of Cimabue and establishes the Sienese rather than the Florentine school as the first to revive painting in Italy after the Byzantine dominance

Guido Reni (rā'nē), 1575–1642, Italian painter, b near Bologna As a child he entered the studio of the Flemish painter Denis Calvaert About 1595 he became, for a short time, a pupil of the Carracci, who were then at the height of their popularity Such works as the *Virgin in Glory with Saints* (Bologna) and his copy of Annibale Carracci's *St Roch Distributing Alms* won him early acclaim By 1598 he was commissioned by the government to execute decorative frescoes on the façade of the Palazzo Pubblico in honor of Pope Clement VIII's visit to Bologna In 1600 he made the first of his many trips to Rome, which was to become the center of his activities for more than 20 years He became a rival of Caravaggio, whose work clearly influenced his famous *Crucifixion of St Peter* (Vatican) About 1607–9 he worked on frescoes in the Church of San Gregorio Magno (Rome) Here, in his rendering of such scenes as *God the Father above a Concert of Angels*, he already displays the grandeur of style and golden and silver tonality characteristic of his most renowned work, the *Aurora* fresco in the Rospighosi Palace, Rome, executed some five years later for his patron Pope Paul V In 1620 he was commissioned by Cardinal Aldobrandini to execute the frescoes in the cathedral at Ravenna, which include the famous scene *Israelites Gathering the Manna* During the latter part of his life he returned to Bologna, where he established his own academy Among his many works, well represented in European museums, are the so-called Beatrice Cenci portrait (Corsini Gall, Rome), *Atalanta and Hippomenes* (Naples), and many versions of such subjects as the *Ecce Homo* (examples in the National Gall, London, and the Louvre), *Mater Dolorosa* (examples in the Corsini Gall), and *Penitent Magdalen* (examples in the Louvre and the Liechtenstein Gall, Vienna) He also executed many engravings based on paintings of his own or of other artists Guido's eclecticism and his tendency towards a voluptuous sentimentality are characteristic of the Italian baroque art of his period During the 17th and 18th cent he was esteemed as one of the great masters of all time Since then, with change in taste, his reputation has declined

Guienne, Fr *Guyenne* (both gēĕn', gwĕn') [like Aquitaine, from Latin *Aquitania*], region and former province, SW France The term meant different territories at different times Guienne as it existed from the time of Henry IV to the French Revolution covered the present departments of Gironde, Dordogne, Lot, Lot-et-Garonne, and Aveyron It thus has no geographic unity but includes part of the Aquitaine basin and part of the MASSIF CENTRAL. BORDEAUX is the historic capital, the chief port, and the center of the wine industry Guienne was synonymous with AQUITAINE until the HUNDRED YEARS WAR It passed to England (1152) by the marriage of ELEANOR OF AQUITAINE to Henry II By 1453 Guienne was reconquered by France To its main components—Bordelais, PÉRIGORD, and Agenois (see AGEN)—two former dependencies of Toulouse were added, QUERCY and ROUERGUE Guienne was under the jurisdiction of the PARLEMENT of Bordeaux

Guilbert, Yvette (ēvĕt' gēlbĕr'), 1869–1944, French *chanteuse* Her repertoire included songs and sketches of life in the Latin Quarter and, later, romantic ballads of the Middle Ages The charm of her expressions, mannerisms, and gestures overcame the barrier of language on her seven visits to the United States between 1895 and 1922 She wrote *How to Sing a Song* (1919) and an autobiography, *The Song of My Life* (1929)

Guildford (gil'fûrd), municipal borough (1931 pop 30,754, 1947 estimated pop 47,930), county town of Surrey, England, on the Wey and SW of London On its steep High St are Abbot's Hospital (a home for old men and women, founded 1619 by Archbishop Abbot), the grammar school (1509), the guildhall (17th cent), and the Church of St Mary (partly Norman) The ruins of a Norman castle stand on a mound A cathedral (founded 1927) is being erected Sheep and cattle fairs are held in Guildford Lewis Carroll is buried here In Malory's *Morte d'Arthur*, Astolat, the home of Elaine, is identified with Guildford (see ARTHURIAN LEGEND)

guilds or **gilds** (both gĭldz), economic and social associations of persons in the same business or plying the same craft, typical of Western Europe in the Middle Ages Distinctively membership was never by class but by profession or trade, and the primary functions were to establish control over that profession or trade in a locality, to set standards of workmanship and price, to protect the particular business from capricious exactions, to prevent encroachment of members of the trade or craft from other localities, and to establish status for members of the guild in society Similar associations of both merchants and craftsmen have been known at various times and places Greek merchants' associations were of considerable significance in the Hellenistic period, and in Roman times Each provincial city had its various *collegia* (some of which were economic guilds as well as clubs), while the capital city and later that other capital city, Constantinople, had efficiently organized *corpora* Under the centralizing power of the Roman emperors these tended to be reduced to subservience and to become mere administrative tools of the government This process was completed in the compulsory membership imposed in the Byzantine Empire after the barbarian invasions had made such compulsion impossible in the West These guilds were continued in the East and in some of the cities of Italy, notably Ravenna, where they persisted at least until the 10th cent Their effect on the creation of medieval guilds is, however, at best debatable Some scholars have found the origin of guilds in old tribal organisms of the Germans or in religious associations At any rate, when spontaneous associations of merchants began to spring up, they seem to have been intended for protection of commerce in perilous times of feudal and insecure local governments These merchant guilds (or guilds merchant) became extremely powerful as lucrative trade in the Mediterranean and across Europe increased Some of the Italian merchant guilds, such as those of Genoa and Florence, became dominant in the local government Likewise in England and in some of the cities of Germany the guilds of merchants exercised enormous power in the growing towns—though it should perhaps be noted that the organization of the commune long antedated the guild and in most cases control by a guild meant capture, rather than development, of power Commerce was less and less of a local affair, and the associations in some cases tended to become huge intercity leagues for the development and protection of trade The most striking example was the HANSEATIC LEAGUE of N Europe, which established some of its own trading cities and controlled them The merchant guilds had a vast effect on what is known as the Commercial Revolution No less important were the craft guilds, the associations of artisans of a particular trade, e g, the weavers guild and the fullers guild These grew with great rapidity as towns developed in the 12th cent and tended to share power with the merchants or even, in some cases, to supplant them in power Generally the members were divided into masters, apprentices, and journeymen The masters were the owners of the shops and the trainers of the apprentices The apprentices were bound to the masters, they were accepted for a stipulated sum paid to the masters for training and were given a bare living for a number of years, the amount paid and the length of time were set by the guild and varied from one craft to another and one place to another The apprentices were strictly under the control of the masters, but the conditions of control were set by custom and by some guild regulation The third class in the guild was made up of journeymen, men who had finished their training as apprentices but could not attain the status of masters (for the number of masters was limited) The guild reflected the medieval desire for ordering society, and its aim was generally a rather static permanence Each guild set the terms of its craft, forms of labor, standard of product (e g, the weight of a loaf of bread), and methods of sale, all these things were, however, subject to royal and national law as coherent nations developed in the West The relationship of the feudal ruler to the guilds was ideally one of cooperation Actually the wealthy guilds were able to secure immunity from interference by noble or king either by paying large sums of money, promising future benefits, or by intimidation Sometimes, as in the weaving towns of Flanders, the guilds were leaders of revolt against feudal authority (e g, BRUGES and GHENT) The tendency in the industrial towns was, thus, for the guilds to assume dominance in municipal government, and traces of that control persist in much of the local government of Western Europe today The guilds of London (see LIVERY COMPANIES) had wide social obligations and prominence in the city government The strengthening of the power of the nations in the 15th and 16th cent tended to make royal power greater, and the king in some instances was able to reduce the guilds to subservience The improvement of communications, the expansion of trade with the introduction of foreign-made goods, and finally the appearance of the capitalist and the entrepreneur heralded the end of the guild system The guilds, with all their wealth and power, were not equipped to adapt themselves to the expanding economies They tended to guard their monopolies jealously and to oppose change In many instances the number of masters in a trade was limited further as time went on, and the number of journeymen with no hope of becoming masters increased, naturally this situation bred discontent Prices for apprenticeship in many cases rose exorbitantly, and the trend toward hereditary membership in the guilds—always present—became very marked Masters were succeeded by sons and nephews, and apprentices were accepted only if they had proper family connections Thus the development of new trade and new industry fell to the capitalists, who adapted themselves to new demands in the age of exploration and expansion By the 17th cent the power of the guilds had withered in England It persisted longer on the Continent In France the attempt of Colbert to meld the guilds into the national economy was not successful, and guild monopolies continued to flourish in the 18th cent Turgot's attempt to abolish them failed, and it was not until 1791 in the French Revolution that the guilds were swept away In E Europe guilds grew numerous in the great market cities, and the power of some (e g, those of Novgorod and Cracow) long persisted Elsewhere in the world associations of merchants and of craftsmen developed early and seemed to show the same pattern of flourishing as protective devices in periods when the central government was weak and as instruments of the government in regulating trade and industry when the government was strong In India, as early Buddhist writings show, guilds were highly developed before the time of the Maurya empire, and they continued in existence long after British control was established, thus spanning some 2,000 years The history of the Indian guilds was individual because of conflict and compromise with the caste system The guilds in Japan were opposed and weakened by the stronger medieval rulers, but they were later used under the shogunate as powerful regulatory devices, they were swept away in the Meiji restoration in 1868 In China guilds were of unknown antiquity and persisted as powerful bodies into the 20th cent In the Western world today the name *guild* is used for all sorts of associations that have no connection with the medieval institution (e g, theater guilds and guilds of literary workers) Some of the great professional associations (e g, in medicine and law) fulfill some of the old functions of guilds but are rarely given the name See Charles Gross, *The Gild Merchant* (1890), Emile Levasseur, *Histoire des classes ouvrières et de l'industrie en France avant 1789* (2d ed, 2 vol, Eng tr, 1900-1901), Henri Pirenne, *Belgian Democracy* (Eng tr, 1910), L F Salzman, *English Industries of the Middle Ages* (rev ed, 1913) and *English Life in the Middle Ages* (1926), Henri Sée, *Economic and Social Conditions in France during the Eighteenth Century* (Eng tr, 1927); Stella Kramer, *The English Craft Guild* (1927), H B Morse, *The Gilds of China* (2d ed, 1932), George Unwin, *Guilds and Companies of London* (3d ed, 1939), R S Smith, *The Spanish Gild Merchant* (1940), George Clune, *The Medieval Gild System* (1943)

guild socialism, type of socialism developed in England, advocating a system of industrial self-government through national worker-controlled guilds The theory, as originated by Arthur J Penty in his *Restoration of the Gild System* (1906), stressed the spirit of the medieval craft guilds. In later elaborations by A R Orage, S G Hobson, and G D H Cole, aspects of Marxism and SYNDICALISM were adopted Guild socialists held that workers should work for control of industry rather than for political reform The function of the state in a guild-organized society was to be that of an administrative unit and owner of the means of production, to it the guilds would pay rent, while remaining independent In 1915 the National Guilds League was created with a number of notable speakers, including Bertrand Russell Several working guilds were formed, but with the collapse

of the chief one (National Building Guild), the movement waned, and the League was dissolved in 1925 During its existence it had considerable influence on British trade unions See G. D H Cole, *Guild Socialism Restated* (1920), Niles Carpenter, *Guild Socialism* (1922)

Guilford (gĭl'fûrd). **1** Town (pop 3,544), S Conn., on Long Island Sound E of New Haven, settled 1639 It includes Guilford borough (pop 1,986) and several hamlets It has some of the oldest houses in the state, the stone Whitfield House (1639–40) was restored (1936) as a WPA project Abraham Baldwin and Fitz-Greene Halleck were born in Guilford Castings are made here **2** Industrial town (pop 1,752), central Maine, on the Piscataquis above Dover-Foxcroft, settled 1803, inc 1816

Guilford College see GREENSBORO, N.C.

Guilford Courthouse, battle of, in the CAROLINA CAMPAIGN of the American Revolution, fought March 15, 1781 The site is included in a national military park (148 8 acres, est 1917) near Greensboro, N C

Guillaume, Charles Édouard (shärl' ādwar' gēyōm'), 1861–1938, French physicist, b Switzerland He was with the Bureau of International Weights and Measures, Sèvres, from 1883 and was its director from 1915 His work on the thermal expansion of metals led to his discovery of several important alloys, among them invar, a nickel-iron alloy (36 percent nickel), which exhibits practically no thermal expansion and is consequently much used in making scientific instruments, and platinite, also a nickel-iron alloy (46 percent nickel), expanding in the same ratio as platinum, for which it is substituted in the manufacture of electric-light bulbs For this work he received the 1920 Nobel Prize in Physics

Guillaume de Lorris (du lôrē'), c 1215–c 1278, French poet, author of the first part of the ROMAN DE LA ROSE His family name is also spelled Louiy, Lory, and Lorrys

Guillaumet, Gustave Achille (güstav' ashēl' gēyōmā'), 1840–87, French genre and landscape painter His chief subjects are Algerian The Luxembourg Museum in Paris has his *Evening Prayer in the Desert* and *Wool Spinners at Bou-Saada*, and his *Arab Market in Tocrua* is in the Lille Museum He wrote *Tableaux algériens* (1880) Guillaumet won (1863) the Prix de Rome, and he was a member of the Legion of Honor

Guillén, Jorge (hôr'hā gēlyān'), 1893–, Spanish poet. He taught Spanish literature at the universities of Murcia and Seville and in Paris After the Spanish civil war he came (1939) to the United States and taught Spanish at Wellesley College His poems are collected in successive editions of *Cantico* (1928, 1936, 1945), increasing in each new edition the number of poems and deepening his poetic vision Guillén is considered the most intellectual of all Spanish poets of the 20th cent , he has been compared to Paul Valéry, whose work he translated into Spanish

Guillén, Nicolás (nēkōlās' gēyān'), 1904–, Cuban poet Interpreter and exponent of the Afro-Cuban poetry—the so-called *poesía negra*, an original genre developed in the Caribbean —he wrote poetry that is intensely racial, in *Motivos de son* (1930) and *Sóngoro cosongo* (1931) he interprets the Negro soul through native incantations, dances, and street cries These early poems are profoundly sensuous and are based fundamentally on rhythm Later poems show more of Guillén's extensive knowledge of Spanish literature Some of his poems appear in H R Hays, ed , *12 Spanish American Poets* (1943)

Guilmant, Félix Alexandre (fālēks' alĕksä'dru gēlmä'), 1837–1911, French organist, one of the foremost performers of his day He taught at the Schola Cantorum, of which he was a founder, and at the Paris Conservatoire, where Marcel Dupré and Joseph Bonnet were among his pupils He composed much organ music

Guimarães or **Guimarães** (both gē"murā'ĕsh), city (pop. 12,568), NW Portugal, SE of Braga It has textile and cutlery manufactures, but its importance is historical. This was the seat of Duke Henry of Burgundy and of his son, Alfonso I, first king of Portugal Alfonso VII of Leon took (1127) Guimarães by siege and forced Alfonso of Portugal to swear fealty, but the Portuguese later established his independence Guimarães was a favorite royal residence It has a noted old castle

Guimaras (gēmär'äs'), island (223 sq mi , 1939 pop 37,797), Philippine Islands, between Negros and Panay. It is 25 mi long and 10 mi wide, its chief products are rice, hemp, cotton, and tobacco

Guimerá, Angel (än'shĕl gēmārä'), 1845–1924, Catalan poet and dramatist His first successful play, *Mar i cel* [sea and sky] (1888), was followed by many others, among them *Maria Rosa* (1894) and *Terra baixa* (1896, Eng tr , *Marta of the Lowlands*, 1914). These were translated by his contemporary, Echegaray, into Spanish He surpassed Echegaray as a poet but resembles him in his romantic themes and the passions which he portrays on the stage.

Guin (gwĭn), town (pop. 1,175), NW Ala , near the Miss line c.70 mi. NW of Birmingham, in an agricultural area.

Guinea (gĭ'nē), term applied to part of the coast of W Africa The name may be derived from an ancient kingdom in the W Sudan or from the town of Jenné In the widest current sense Guinea includes the coast extending from Senegal to Nigeria inclusively, but it is sometimes limited to smaller areas Portuguese Guinea and French Guinea occupy part of this coast NEW GUINEA is a large island N of Australia

Guinea, Gulf of, large open arm of the Atlantic Ocean, within the great bend in the west coast of Africa It is usually taken to extend from the W Gold Coast to the mouth of the Congo Bays belonging to the gulf include the Bight of Benin and the Bight of Biafra.

guinea fowl, breed of domestic poultry related to the pheasant, developed originally from wild species of Africa It is raised, usually in a semiwild state, in many parts of the world Its flesh, resembling that of game birds, is increasingly demanded by restaurants In the United States there are numerous farms in the Middle West and the South Of the three domestic varieties (the pearl, the white, and the lavender), the pearl, with its uniformly white-dotted purplish-gray plumage, is the commonest

guinea pig, domesticated form of the cavy, descended from wild species of South America It was raised by the Incas and has long been used as food in South America There are a number of varieties, some with short, smooth hair and others with longer hair, and a great range of color combinations, including mixtures of black and white and many shades of brown They grow to a length of about 10 in and a weight of about one pound In North America the guinea pig is sometimes a pet but is chiefly a laboratory animal used for testing serums and antitoxins and for experiments in genetics and nutrition

Guinegate (gēngät'), village, Pas-de-Calais dept , N France, near Saint-Omer It was the scene of two French defeats In 1479 Archduke Maximilian (later Emperor MAXIMILIAN I) defeated a force of LOUIS XI during their contest for the Burgundian succession In 1513 English and imperial forces under Henry VIII defeated an army of LOUIS XII in the second BATTLE OF THE SPURS

Guinevere, King Arthur's queen see ARTHURIAN LEGEND

Guiney, Louise Imogen (gĭ'nē), 1861–1920, American poet and essayist, b Boston, educated at the Sacred Heart convent, Elmhurst, Providence, R I From 1901 she lived in England, where she continued the writing of her poems and essays Among her works are *A Little English Gallery* (1894) and *The Martyr's Idyl and Shorter Poems* (1899) Her annotated anthology of Catholic verse was completed by Geoffrey Bliss and Edward O'Brien as *Recusant Poets* (1939), but her critical life of Henry Vaughan has remained unfinished and unpublished See her collected poems, *Happy Ending* (1927), and her letters (ed by Grace Guiney, 1926), biographies by Alice Brown (1921) and E M Tenison (1923)

Guinicelli or **Guinizelli, Guido** (gwē'dō gwēnēchĕl'lē, gwēnētsĕl'lē), c 1240–1276?, Italian poet His work was greatly admired by Dante At first he imitated the Provençal poets, but afterwards turned to philosophical treatment of erotic themes His verse is characterized by brilliance of imagery and profundity of thought, and his influence on the amorous poetry of his time was great Translations appear in D G Rossetti, *The Early Italian Poets* (1861), and Lorna de' Lucchi, *An Anthology of Italian Poems* (1922)

guipure. see LACE.

Guipúzcoa, Spain see BASQUE PROVINCES

Güiraldes, Ricardo (rēkär'dō gwēral'dĕs), 1886–1927, Argentine novelist, poet, and short-story writer He spent his boyhood on a ranch where he learned the ways of the gauchos, later traveling abroad and widening his culture Known as an "advanced" poet, he applied post-modernist techniques to Argentine regional themes, even in his novels and short stories His masterpiece, *Don Segundo Sombra* (1926, Eng tr , *Shadows in the Pampas*, 1935), in part autobiographical, captured the heroic spirit of the gaucho The central figure ends by retaining his legendary freedom even though he works on an *estancia* and is no longer "lord of the plains" *Xamaica* (1923), another introspective novel, was also well received

Guisborough (gĭz'–), urban district (1931 pop 6,306, 1943 estimated pop 8,300), North Riding of Yorkshire, England, at the foot of the Cleveland Hills ESE of Middlesbrough It is a market town There are remains of a priory founded in 1119 by Robert the Bruce

Guiscard, Norman rulers in Sicily see ROBERT GUISCARD and ROGER I

Guise (gēz, gwēz), influential ducal family of France It was founded as a cadet branch of the ruling house of LORRAINE by **Claude de Lorraine,** 1st **duc de Guise** (klōd' dŏ lôrĕn'), 1496–1550, who received the French fiefs of his father, René II, duke of Lorraine and Bar In 1513 Claude connected himself by marriage with the French royal family He fought in the Italian Wars under Francis I and was wounded at Marignano, as governor of Champagne he fought successfully against the English and the imperial troops. He was created a duke and peer by Francis I, who, however, ultimately came to regard him with distrust. His daughter, MARY OF GUISE, married James V of Scotland and was the mother of Mary Queen of Scots (Mary Stuart) His son **François de Lorraine, 2d duc de Guise** (frāswä'), 1519–63, French Catholic statesman and general, became conspicuous, at the accession of Henry II, as the rival for power of Anne de MONTMORENCY He distinguished himself in the defense of Metz against the duque de Alba (1552), was the leader of the party favorable to the war in Italy against Philip II of Spain, and in 1558 took Calais from the English He and his brother, the Cardinal de Lorraine, were given absolute control of the government under Francis II, who had married their niece, Mary Stuart Their arrogance, their persecution of the Protestants, and their enmity toward the princes of Bourbon and Condé led to the conspiracy of AMBOISE, which they suppressed (1560) When the death of Francis and the appearance of CATHERINE DE' MEDICI as regent had deprived the brothers of power (1560), the duke joined with Montmorency and Marshal Saint-André in the "triumvirate" which, at the head of the Catholic party, opposed itself both to the HUGUENOTS and to the tolerant policy of the regent (1561) The massacre of the Protestants at Vassy by Guise's servants having brought about the outbreak of the Wars of RELIGION (1562–98), Guise took the field against the Huguenots He was assassinated shortly after his victory at Dreux (1562) His brother **Charles de Guise, Cardinal de Lorraine** (shärl), c 1525–1574, while in power during the reign of Francis II was largely responsible for the persecution of the Protestants (1559–60). At the Colloquy of POISSY (1561) he defended Catholicism against Theodore BEZA, at the Council of Trent (1562–63) he at first upheld the independence of the Gallican church but later reversed his position and attempted to have the decrees of the council proclaimed in France He subsequently negotiated with Philip II of Spain for Spanish support of the Catholic cause in France After the downfall of Michel de L'HÔPITAL he temporarily returned to power (1567–70) He was the most consummate politician and master of intrigue in his family and the most generally hated of its members His nephew **Henri de Lorraine,** 3d **duc de Guise** (ānrē'), 1550–88, son of François, fought on the Catholic side in the Wars of Religion and cooperated with Catherine de' Medici in planning the massacre of SAINT BARTHOLOMEW'S DAY After the peace of 1576 he formed the Catholic League (see LEAGUE), of which King HENRY III, though secretly fearing it, became the nominal head After the death of FRANCIS, duke of Alençon and Anjou (1584), he revived (1585) the League in opposition to the Protestant Henry of Navarre, the heir presumptive (later King HENRY IV) Guise, as the defender of the Catholic faith, became immensely popular and overshadowed the king, upon whom he attempted to force the complete program of the League Allegedly, he even had designs on the royal throne He instigated the revolt of the Parisians against the king on the Day of the Barricades (May 12, 1588) and took control of the city He subsequently became reconciled to the king, who, however, procured his assassination His brother **Louis de Lorraine, Cardinal de Guise** (lwē), 1555–88, was killed at the same time After their death the leadership of the League devolved upon their brother, Charles, duc de MAYENNE **Henri de Lorraine,** 5th **duc de Guise,** 1614–64, grandson of the 3d duke, was archbishop of Rheims but became duke after the death of his brother (1639) and of his father (1640) He conspired against Richelieu (1641) and was forced to live for a time in exile in Flanders In 1647 he took part, as representative of the house of Anjou, in the insurrection of MASANIELLO at Naples Captured by the Spanish (1648), he was a prisoner till 1652 He made a new attack on Naples in 1654, then returned to Paris, where, as grand chamberlain, he played a prominent role in the social life of the court See H D Sedgwick, *The House of Guise* (1938), H N Williams, *The Brood of False Lorraine* (1918)

Guise, Jean d'Orléans, duc de: see ORLÉANS, family

Guise (gēz), town (pop 5,947), Aisne dept , N France, in Picardy, near Saint-Quentin It has the ruins of the ancestral castle of the house of Guise A large cooperative iron plant (*familistère* Godin) was founded here in 1859 by Jean Baptiste André Godin, a disciple of Charles Fourier, it is considered a model of its kind. Guise suffered damage in the Second World War

guitar (gĭtär'), musical instrument having from four to seven strings or pairs of strings which are plucked with the fingers or with a plectrum Its neck is usually fretted, and its body has a flat back and sides which curve inward It appeared as early as the 12th cent in Spain, with which country it is particularly associated It was very popular there in the 16th cent , when much music was written for it In the 19th cent, there was revived interest in the guitar, aroused largely by the playing of Francesco Tarrega (1852–1909), one of the greatest guitar players of all time His pupil

Andrés Segovia (1896–) is the greatest contemporary guitarist.

Guiteras, Juan (hwän' gētā'räs), 1852–1925, Cuban physician, b Matanzas, M D Univ. of Pennsylvania, 1873. He served on the Yellow Fever Commission in Havana (1879), was professor of pathology at the Univ of Pennsylvania (1889–99) and of tropical diseases at the Univ of Havana from 1900 He specialized in yellow fever and also contributed work on filariasis and hookworm disease

Guiterman, Arthur (gī'tûrmün), 1871–1943, American poet, b Vienna, of American parentage, grad College of the City of New York, 1891 Librettist of an opera by Walter Damrosch, *A Man without a Country* (produced in New York, 1937–38), Guiterman is remembered for humorous verse and ballads. His volumes of verse, often using American history and legend for subject, include *The Laughing Muse* (1915), *I Sing the Pioneer* (1926), and *Lyric Laughter* (1939)

Guitry, Lucien Germain (lüsyē' zhěrmē' gētrē'), 1860–1925, French actor He studied at the Paris Conservatoire and in 1878 made his debut in *La Dame aux camélias* at the Gymnase He played nine years at the Michel Theater, St Petersburg, and returned to Paris to become stage director (1902) at the Comédie Française and director and actor (1902–9) at the Théâtre de la Renaissance Here and at other theaters he won fame in Dounay's *Amant*, Anatole France's *Crainquebille*, Zola's *L'Assommoir*, Sacha Guitry's *Pasteur*, and in the plays of Henri Bernstein One of the first exponents of realistic drama, Guitry had power and restraint and is ranked with the greatest actors of the French theater His son **Sacha Guitry** (sāshā'), 1885–, actor and dramatist, was a prolific writer for the theater from the age of 21 His skillful and witty dramas include *Nono* (1905), *Deburau* (1918), *Jean de la Fontaine* (1922), and *Mozart* (1925) An accomplished actor, he appeared in his own plays and directed and acted in moving pictures, the best of which are *The Story of a Cheat* (1937) and *Pearls of the Crown* (1938) He was arrested on charges of collaboration with the Nazis in 1945 but was released in 1946 See his memoirs, *If Memory Serves* (Eng tr , 1935)

Guizot, François (frāswa' gēzō'), 1787–1874, French statesman and historian He came of a Protestant family of Nîmes, was educated at Geneva, and commenced a legal career in Paris in 1805, but soon took up literary work and became a professor of modern history at the Univ of Paris His friendship with Royer-Collard and his sympathy with the Doctrinaires (moderate royalists) drew him into minor political office, but it was as historian and political theorist that Guizot was first known He was drawn into the July Revolution of 1830 and became one of the leading intellectual exponents of the bourgeois July Monarchy of Louis Philippe As minister of public instruction (1832–37), Guizot introduced a new system of primary education (1833) Drifting more and more into conservatism, Guizot became (1840) the chief power in the ministry nominally headed by Soult, who had displaced the more liberal Thiers as premier In 1847 Guizot became premier His complacent acceptance of the established order led to his overthrow in the February Revolution of 1848 On the following day (Feb, 24) Louis Philippe abdicated Guizot devoted the rest of his life to writing He ranks very high as a historian The best known of his many works, *Histoire de la révolution d'Angleterre* [history of the revolution in England] (2 vols , 1826–27), illustrates his insistence on the critical approach and his devotion to original sources as well as his intense admiration for middle-of-the-road British revolutionism He also wrote *Mémoires pour servir à l'histoire de mon temps* [memoirs to serve as a history of my time] (8 vols , 1858–67) and the brilliant *General History of Civilization in Modern Europe* (6 vols , 1820–32, Eng tr by William Hazlitt, 3 vols , 1846) The last work, never completed, covers principally the civilization of France up to the 14th cent

Gujarat (gŏŏjürät'), region of India, comprising N Bombay state and the Kathiawar peninsula It was a center of Jainism in the Hindu Anhilvada kingdom (founded c 755), which fell (1233) to the sultanate of Delhi In 1401 Gujarat became an independent Moslem kingdom. Its immense wealth invited attack Portugal wrested from it (1509) the colony of Diu, and in 1572 the kingdom was annexed to the Mogul empire

Gujarati (gŏŏ"jürä'tē), Indo-Iranian language See Language (table).

Gujranwala (gŏŏj'ruwä'lù), town (pop 84,545), N West Punjab prov , Pakistan A mausoleum houses some of the ashes of Ranjit Singh, the great Sikh ruler Cloth and metal implements are made

Gulbarga (gŭl'bûrgä'), town (pop 53,551), SW Hyderabad state, India It was the capital of the Bahmani kingdom (1347–c 1500) until 1432 The large 13th-century mosque is modeled after that in Córdoba, Spain. There is cotton spinning and weaving

Gulbranssen, Trygve (trŭg'vù gŏŏl'bränsun), 1894–, Norwegian novelist. Among his books, which have won wide popularity, are *Beyond Sing the Woods* (1933, Eng tr , 1936) and *The Wind from the Mountain* (1934, Eng tr., 1937)

Gulek Bogaz, Turkey· see Cilician Gates

Gulf, unincorporated town, S Texas, SW of Houston and between Bay City and Matagorda Bay It has large sulphur deposits

Gulf. For names beginning thus, see second part, e g., for Gulf of Mexico, see Mexico, Gulf of

Gulfport. 1 Town (pop 1,581), W Fla , a suburb of St Petersburg 2 City (pop 15,195), co seat of Harrison co , SE Miss , on Mississippi Sound just W of Biloxi, in a farm area, settled 1891 as the site for a railroad terminus, inc as a town 1898, as a city 1904 In 1902 its fine artificial harbor was opened, and the city developed as an important lumber-shipping center It is a port of entry With the depletion of the timber resources, Gulfport extended its shipping facilities and turned to various industries and to a growing tourist and resort trade A large veterans' hospital is here, and Gulf Park College (junior) for girls is near by

Gulf Stream, best known of the ocean currents It was found in 1513 by Ponce de León The Gulf Stream originates in the Gulf of Mexico, passes through the Straits of Florida in a breadth of 50 mi , and then flows northeast parallel to the U S coast and separated from it by a narrow strip of cold water ("cold wall") Its average speed is 4 mi per hour At the beginning of the Gulf Stream the temperature is 80°F but it drops as the stream moves north At the same time the Gulf Stream becomes slower and spreads out and finally merges with the North Atlantic Drift At lat 40° N and long 60° W the Gulf Stream cannot longer be distinguished from the rest of the ocean drift It is a common error to confound the Gulf Stream with the North Atlantic Drift and to attribute the warmth of Western Europe to it The Gulf Stream is a result of the general vertical circulation of the ocean, the cold water from the north sinks down, while the warm water of the equatorial region rises and flows north above the cold current

gulfweed, any seaweed of the genus Sargassum, one of the brown algae of tropical waters commonly floating in large patches in the Sargasso Sea and the Gulf Stream It was formerly thought to cover the Sargasso Sea, where it was observed by Columbus, and to make navigation impossible, but it actually occurs only in drifts Numerous air sacs, resembling berries, cause the branching plant to float Gulfweed is sometimes called sea lentil

Gulick, Luther Halsey (gŭ'lĭk), 1865–1918, American pioneer in physical education, b Honolulu, of American missionary parents He studied at Oberlin College, Sargent School of Physical Training (now part of Boston Univ), and New York Univ medical college (M D , 1889) From 1887 to 1903 he was secretary of the physical training department of the Y M C A He devised the emblem of the organization and, with James Naismith, originated the game of basketball He was director of physical training in the New York city public schools from 1903 to 1908, in 1907 he founded the child hygiene department of the Russell Sage Foundation, directing it until his retirement in 1913 With others he founded (1910) the Camp Fire Girls movement He devoted much of his time to associations interested in hygiene and physical education, wrote several books in these fields, and lectured extensively In 1917 he surveyed the work of the Y M C A in France, returning to write his last and best-known book, *The Dynamic of Manhood* (1917)

Gulick, Luther Halsey, 1892–, American educator, b Osaka, Japan, grad Oberlin College, 1914 He studied at the Training School for Public Service, New York, and at Columbia Univ (Ph D , 1920) and became a specialist in municipal finance and administration He is director of the New York Bureau of Municipal Research and the Institute of Public Administration and president of the Tax Research Foundation He was professor of municipal science and administration at Columbia Univ (1931–42) and director and editor of the reports of the New York State Inquiry on Public Service Personnel (1933–35) and of the Regent's Inquiry into Public Education (1935–39) He became special assistant to the U S Treasury in 1941 He is author of *Evolution of the Budget in Massachusetts* (1920) and *An Adventure in Democracy* (1928) and co-author of numerous works on governmental, financial, administrative, and personnel problems

Gulistan, Treaty of (gōōlĭstän'), 1813, signed by Russia and Iran at Gulistan, a village in Azerbaijan SSR It ended the Russo-Persian war which had begun in 1804 Persia ceded the khanates forming the present Azerbaijan SSR and renounced its claim on Georgia and Dagestan

gull, any of a group of aquatic birds of the same family as the tern and found near all oceans and many inland waters. The name sea gull is commonly applied to the herring gull, a subspecies of the common European gull, found on the Atlantic and Pacific coasts of Canada and the United States, as well as inland. Gulls are larger and have heavier bodies than terns They have webbed feet and strong bills, hooked at the end. Their plumage is usually gray and white with black on the wings and tail They have long, slender wings and are strong fliers Although gulls eat fish, clams, and grasshoppers, most of them feed chiefly on wastes in harbors and bays and are useful scavengers They feed on the surface and often roost in flocks on the water They are protected in most states

Gullah, dialect see Sea Islands

Gulliver's Travels, great satirical work of Jonathan Swift, in four parts (1726) It describes the voyages of Lemuel Gulliver to Lilliput, where the people are tiny, and to Brobdingnag, where they are huge, to Laputa and its neighbor Lagado, peopled with philosophers and men of science, and to the land of the Houyhnhnms where horses behave with reason and men (Yahoos) behave as beasts In spite of its political and social satire, its fairy-tale quality has made it a children's classic

Gullstrand, Allvar (äl'vär gül'stränd), 1862–1930, Swedish ophthalmologist. He was professor (1894–1927) successively of eye therapy and of optics at the Univ of Uppsala He applied the methods of physical mathematics to the study of optical images and of the refraction of light in the eye For this work he received the 1911 Nobel Prize in Physiology and Medicine He is noted also for his research on astigmatism and for improving the ophthalmoscope and corrective lenses for use after removal of a cataract from the eye

gum, term used commonly, but loosely, to include a wide variety of substances obtained from plants, usually as exudations, somewhat similar in appearance and general characteristics In this classification, however, many substances not true gums are included, among them many resins, so-called gum resins, and such substances as frankincense, myrrh, labdanum, copal, amber, chicle, and rubber (gum elastic, India rubber) True gums are complex organic substances mostly obtained from plants, some of which are soluble in water and others of which, although insoluble in water, swell up by absorbing large quantities of it With water they form thick, gluey fluids Their chemical nature is complex In general, they contain in various proportions carbon, hydrogen, oxygen, and such metals as calcium, magnesium, and potassium in the form of salts of various organic acids Gum arabic, or gum acacia, is a typical, water-soluble gum obtained from various plants of the genus *Acacia*, chiefly those found in Africa It varies in color from white to red and is used extensively in making inks, adhesives, and confections, in the textile industry for filling fabrics, and in medicine as an emollient Gum senegal is very similar Among the gum resins (mixtures of gums and resins) are ammoniac, asafetida, bdellium, gamboge, and myrrh See also tragacanth See C L Mantell, *The Water-soluble Gums* (1947)

gum ammoniac see ammoniac

Gumbinnen (gōōmbĭ'nŭn) or **Gusev** (gōō'syĭf), town (1939 pop 24,534), former East Prussia It is an important market for cattle In the First World War it was briefly occupied (1914–15) by Russian troops, who again took it in 1945 Under the Potsdam Agreement (1945) it was placed under Russian administration Incorporated into the RSFSR, it was renamed Gusev

gumbo, another name for okra, also applied in the West to a rich, black, alkali alluvial soil, which is soapy or sticky when wet

Gumilev, Nikolai Stepanovich (nyĭkulī styĭpä'nuvĭch gōōmĕlyôf'), 1886–1921, Russian poet With Gorodetsky he founded (1912) the Acmeist school of poetry He traveled widely in Europe and, especially, in Africa, and his poems are full of elements foreign and exotic *The Pillar of Fire* (1912) contains his best work He was executed by the Bolsheviks for alleged conspiratorial activities

Gumma (gōōm'mä), prefecture, central Honshu, Japan See Maebashi, the capital

Gumplowicz, Ludwig (lōōt'vĭkh gōōm'plōvĭch), 1838–1909, Austrian sociologist, political scientist, and jurist From 1897 to 1909 he was a professor at Graz He held that social development rose out of conflict, first among races, then among states, then among other social groups His theories, influential though extreme, are expressed chiefly in *Der Rassenkampf* [race conflict] (1883) and in *Grundriss der Soziologie* (1885, Eng tr , *The Outlines of Sociology*, 1889)

Gumri, Armenian SSR see Leninakan

gum tragacanth· see tragacanth

gum tree see eucalyptus For other gum trees, see black gum and sweet gum

gun, in general, any weapon discharging explosives. Specifically, it refers to artillery and to the firearm (including rifle, machine gun, and revolver) The sporting gun, which is a smoothbore weapon discharging small shot (see shotgun), has had a classification apart from the military weapon since rifled barrels were adopted for belligerent use See also musket

gunboat, small warship for use on rivers and along coasts, in places inaccessible to vessels of larger displacement One of the first steel gunboats was built by the East India Company in 1839 In the American Civil War both sides used as gunboats, on the Mississippi and other rivers, any boat that had an engine and had room to mount a gun.

guncotton, explosive substance, formed by the action of a cold mixture of nitric and sulphuric acids on cotton (cellulose) and resembling the original unrefined cotton in appearance A compound of the elements carbon, hydrogen, oxygen, and nitrogen, its chemical formula indicates the presence either of three nitrate groups, when it is called a trinitrate, or of six nitrate groups, when it is called a hexanitrate. The higher nitrates (guncotton) are not soluble in water, chloroform, ether, alcohol, or a mixture of ether and alcohol and are distinguished from the lower nitrates (soluble guncotton, see PYROXYLIN) in this respect Guncotton burns when ignited, but is exploded, when either wet or dry, by the use of a detonator, such as fulminate of mercury. It is used in torpedoes, in blasting, when it is commonly mixed with NITROGLYCERIN to form blasting gelatin, in underwater blasting and submarine mines, and in the smokeless POWDER, cordite. See also SCHÖNBEIN, CHRISTIAN FRIEDRICH

Gundulic, Ivan (ē'vän gōōndō'lĭch), or **Giovanni Gondola** (jōvän'nē gōndō'lä), 1588–1638, Croatian poet He was born in Ragusa (Dubrovnik) of an aristocratic Dalmatian family and held high office in the city As a poet he began by imitating Italian models In his greatest work, the epic poem *Osman* (1626), based on the wars of Poland with the Turks, there is strong Slavonic feeling, and traces are found of ancient native song He was the foremost South Slav poet of his period

Guni (gū'nī). **1** Son of Naphtali Gen 46 24; Num 26 48. **2** Descendant of Gad. 1 Chron 5.15

Gunib (gōōnyēp'), village, central Dagestan, RSFSR, in the E Greater Caucasus A strong, natural fortress, it was important in the Caucasian wars of the 19th cent Here SHAMYL made his last stand against the Russians and was captured (1859)

gun metal, a BRONZE, an alloy of copper, tin, and a small amount of zinc Although originally used extensively for making guns (from which it gets its name), it has been superseded by steel, and it is now chiefly employed in the manufacture (casting) of machine parts The so-called "88-10-2" (copper-tin-zinc) alloy is the "government bronze," composed of 88 percent of copper, 10 percent tin, and 2 percent zinc The percentages of the constituent elements are varied slightly in gun metals produced for various purposes The metal commonly called gun metal today is very often steel treated to simulate the bronze alloy In other cases, copper and tin are used alone, in still others, copper, tin, and lead are employed

Gunnarsson, Gunnar (gū'när gū'närsŏn), 1889–, Icelandic novelist In 1907 he went to Denmark, where he obtained his secondary schooling, and later he traveled in Italy In 1938 Gunnarsson returned to Iceland. His early works were written in Danish, but were later translated into Icelandic. *Guest the One-eyed* (4 vols , 1912–14, Eng tr , 1920) is an Icelandic family saga, *Seven Days' Darkness* (1920, Eng tr , 1930) reflects his concern with the problem of war. *The Heath Laments* (1940) is written in Icelandic His autobiographical *The Church on the Mountain* (5 vols , 1924–28) has been partially translated as *Ships in the Sky* (1938) and *The Night and the Dream* (1938) Gunnarsson is a leading interpreter of modern Iceland

Gunnison. 1 Town (pop 2,177, alt c 7,680 ft), co seat of Gunnison co , W central Colo , on the Gunnison river, in a farm, mine, and resort area, laid out 1879 as a silver-mining town, inc 1880 Western State College of Colorado (coeducational) is here The town is the headquarters for Gunnison National Forest **2** City (pop 1,115), central Utah, near the Sevier river, founded 1860, inc 1893. It is in a poultry and irrigated sugar-beet area

Gunnison, river formed in W central Colorado by the junction of the Taylor and East rivers and flowing SW, W, and NW to the Colorado at Grand Junction Its courses through magnificent canyons, notably the Black Canyon of the Gunnison (see NATIONAL PARKS AND MONUMENTS, table) An irrigation project diverts water from the river through the Gunnison Tunnel (1905–9), 30,582 ft long.

gunpowder, an explosive mixture of potassium nitrate (75 percent) sulphur (10 percent), and carbon (15 percent) in the form of charcoal An increase in the percentage of saltpeter (potassium nitrate) increases the speed of combustion The chemical activity involves the reduction of the saltpeter, the oxygen being used for the combustion of the carbon and sulphur Gunpowder has been much used for BLASTING and formerly was commonly employed in guns, but, because of the large quantity of solid matter formed when it was exploded, it has been largely superseded by smokeless POWDER Another form of powder containing potassium chlorate instead of the nitrate is commonly used in fireworks and in matches The invention of gunpowder is obscure The origin of gunpowder was probably Chinese, for it seems to have been known in China at least as early as the 9th cent. and was there used for making firecrackers. There is some evidence that it came to Europe through the Arabs Roger BACON was long credited with inventing it because a formula for making it is given in a work attributed to him and some German scholars have called the alchemist-monk Berthold Schwarz the inventor, but it is now generally agreed that it was introduced and not invented in Europe in the 14th cent. It revolutionized warfare completely, and ultimately played a large part in the alteration of European patterns of living from medieval to modern It was, of course, improved in later centuries The scientist Lavoisier turned his attention to it, and it was Lavoisier's improved powder that Eleuthère Irenée du Pont de Nemours started to make (1802) in his powdermill, which was to be the kernel of the gigantic Du Pont enterprises.

Gunpowder Plot, frustrated plan to blow up the British houses of Parliament and King James I on Nov. 5, 1605, the day set for the king to open Parliament The confusion resulting from this crime was intended to be the beginning of a great rising of English Catholics, who were distressed by the increased severity of penal laws against their religion The conspirators, who began plotting early in 1604, expanded their number to a point where secrecy was impossible They included Robert Catesby, the originator, John and Christopher Wright, Robert Keyes, Thomas and Robert Winter, Guy Fawkes, a soldier who had been serving in Flanders, Thomas Percy, John Grant, Sir Everard Digby, Francis Tresham, and Thomas Bates. Percy hired a cellar under the House of Lords, in which 36 barrels of powder, overlaid with iron bars and firewood, were secretly stored The conspiracy was brought to light through a mysterious letter received by Lord Monteagle, a brother-in-law of Tresham, on Oct 26, urging him not to attend Parliament on the opening day The 1st earl of Salisbury and others, to whom the plot was made known, took steps leading to the discovery of the materials and the arrest of Fawkes as he entered the cellar Other conspirators, overtaken in flight or seized afterward, were killed outright, imprisoned, or executed Among those executed was Henry Garnett, the provincial of the English Jesuits, who had known of the conspiracy While the plot was the work of a small number of men, it damaged all English Catholics and led to an unfortunate increase in the harshness of laws against them Guy Fawkes Day, Nov 5, is still celebrated as an English holiday, on which effigies of the conspirator are burned See S R Gardiner, *What the Gunpowder Plot Was* (1896), John Gerard, *What Was the Gunpowder Plot?* (1897), Donald Carswell, ed , *Trial of Guy Fawkes* (1934)

Gunsaulus, Frank Wakeley (gŭnsô'lŭs), 1856–1921, American Congregational clergyman and lecturer, b Chesterville, Ohio, grad. Ohio Weslevan Univ , 1875 Ordained a minister of the Methodist Church in 1875, he entered the Congregational ministry in 1879 He then filled pastorates in Ohio, Massachusetts, Maryland, and Chicago From 1899 to 1919 he preached to large congregations in the independent Central Church, Chicago, resigning to devote his energies fully to the Armour Institute of Technology (now Illinois Institute of Technology), of which he was president from its establishment in 1893 In the affairs of the city he took a leading part, and he was noted throughout the country as a lecturer His writings include *The Man of Galilee* (1899), *Paths to Power* (1905), and *Martin Luther and the Morning Hour in Europe* (1917)

Gunter, Edmund, 1581–1626, English mathematician and astronomer, educated at Westminster School, London, and Christ Church, Oxford In 1618 he invented a small portable quadrant He discovered (1622) the variation of the magnetic compass His Gunter's chain is a surveyor's chain graduated on the decimal scale, and his Gunter's sector or scale is graduated according to the line of numbers of sines and tangents He is said to have been the first to use the words *cosine* and *cotangent* He wrote *Canon triangulorum* (1620); his collected works were published in 1624.

Guntersville, city (pop, 4,398), co. seat of Marshall co , NE Ala , a port on the Tennessee and NNW of Gadsden, in a farm area; founded c 1818 on a Cherokee site It has textile mills Guntersville Dam near by, built by TVA, flooded much of the surrounding farm lands but provided new navigation and resort opportunities

Günther, Johann Christian (yō'hän krīs'tyän gün'tur), 1695–1723, German poet His unhappy life finds expression in his verse, which is characterized by passion and depth of feeling, naturalness, and vigor and which inspired the young Goethe Perhaps his best-known poem is "Brothers, Let's Be Merry," a drinking song

Gunton, George, 1845–1919, American economist, b England In 1874 he came to Fall River, Mass His activities as a labor leader prevented his obtaining employment there in his trade as a weaver, and in 1878 he became manager of *Labor Standard* Appointed (1889) director of economics and sociology for the Y M C.A of North America, he founded in 1890, in association with the Rev. Heber Newton, the Institute of Social Economics, in New York city, and the *Social Economist* (known after 1896 as *Gunton's Magazine*), which he edited until 1904 He wrote *Wealth and Progress* (1887), *Principles of Social Economy* (1891), *Trusts and the Public* (1899), and, with Hayes Robbins, *Outlines of Social Economics* (1900) and *Outlines of Political Science* (1901).

Guntram (gŭn'trŭm), c.525–593, Frankish king of Burgundy and Orléans (561–93), son of Clotaire I His interventions in the wars of his relatives had as their object the maintenance of the balance of power; thus he aided his nephew, Childebert II, against Fredegunde and supported Clotaire II against Childebert He finally ranged himself on the side of Childebert, to whom he left his dominions His orthodoxy and his pacific policy caused him to be called a saint by the Roman Church Feast March 28.

Guntur (gōōntōōr'), town (pop 83,599), NE Madras state, India. It was founded by the French in the 18th cent. and ceded to Great Britain in 1823 It is a railroad junction and a cotton and tobacco mart. Cotton cloth is woven

guppy or **rainbow fish,** small fish (*Lebistes reticulatus*) abundant in parts of South America and a popular aquarium fish It can survive temperatures from 65° to 100°F. The rainbow colors of the inch-long male are marked with black spots and bars. The greenish-gray female is about 1½ in long From 12 to 25 living young are produced every few weeks The adults are cannibalistic Guppies are used in heredity studies, in the tropics they help to check malaria by eating mosquito larvae

Gupta (gōōp'tŭ), dynasty, 320?–544?, of N India It was founded by Chandragupta I (reigned 320?–380?) At its height it ruled most of India N of the Narbada river The dynasty saw a revival of Hindu culture The drama, with Kalidasa the most noted writer, flourished Painting (examples are found in the Ajanta caves) and bronze castings were perfected Pataliputra and Ajodhya were the Gupta capitals

Gur (gūr), ascent near Ibleam. 2 Kings 9 27

Gur-baal (gur-bā'ăl) [Heb ,=abode of Baal], unidentified district, Arabia 2 Chron 26.7

Gurdon, lumber and rail city (pop 2,045), SW Ark , SW of Arkadelphia

Gurkha (gōōr'kŭ), ethnic group of Nepal, mainly of Mongoloid stock and predominantly Hindu in religion The Gurkhas have dominated Nepal since the 18th cent Great Britain formerly recruited large military contingents from this warlike people and the term *Gurkha* was often loosely applied to any Nepalese soldier in British service

Gurney, Edmund, 1847–88, English psychologist He was a founder (1882) of the Society for Psychical Research He wrote *The Power of Sound* (1880)

Gusev, former East Prussia see GUMBINNEN

Gustavus I (Gustavus Vasa) (gŭstā'vŭs vä'sŭ), 1496–1560, king of Sweden (1523–60) Known as Gustavus Eriksson before his coronation, he was the son of Erik Johansson, a Swedish senator and follower of the STURE family He early acquired his hatred for the Danes when he was treacherously imprisoned by CHRISTIAN II In 1520 his father was one of the nobles killed in the massacre of Stockholm Having escaped imprisonment, Gustavus led the peasants of Dalarna to victory over the Danes and was elected (1521) protector of Sweden In 1523 the Riksdag at Strangnas elected him king and deposed, for the second time, the archbishop Gustav Trolle, who had joined Christian II in opposing Gustavus Thus the KALMAR UNION of the Scandinavian countries was dissolved, and the first step toward the Reformation was taken The Riksdag at Vasteras (1527) established a national Protestant church Confiscation of church property helped to replenish the exhausted treasury A national army was organized, and an efficient navy was built As a result of a Danish-Swedish victory over Lübeck (1537) Sweden was liberated from the economic grasp of the Hanseatic League Native industries were developed and foreign trade expanded Gustavus firmly established the royal authority, crushed several peasant and clerical revolts, and in 1544, by the Pact of Succession, made the throne hereditary in the Vasa family His reign, which marked the rise of Sweden as a modern national state, also was distinguished by the translation (1526) of the New Testament into Swedish, a milestone in Swedish literature

Gustavus II (Gustavus Adolphus), 1594–1632, king of Sweden (1611–32), son and successor of Charles IX His excellent education, his personal endowments, and his early experience in the field and in affairs of state prepared him for the crucial role he was to play in the history of his country and in that of Europe With the help of his great chancellor, Axel OXENSTIERNA, he insured internal stability by granting concessions to the turbulent nobility and terminated (1613) the KALMAR WAR by buying off the Danes This enabled him to undertake a successful campaign against Russia, which was forced to cede Ingermanland (1617) Gustavus Adolphus at first intended to stay out of the THIRTY YEARS WAR, which had begun in 1618 However, his resumption (1621) of the intermittent warfare between the Swedish and the Polish branches of the house of VASA led to his entry into the vast conflict His primary objects in invading Poland were to consolidate Swedish hegemony over the Baltic by acquiring Polish LIVONIA and to reduce the threat

represented by the Catholic SIGISMUND III of Poland against Swedish Protestantism. The imperial victories in the Thirty Years War soon caused the king to draw closer to the German Protestant princes In 1628 he promised his aid to CHRISTIAN IV of Denmark in the defense of Stralsund In 1629, through the mediation of Cardinal Richelieu, he obtained the favorable truce of Altmark with Poland, gaining a large part of Livonia and several good Baltic ports; a secret treaty with France promised a French subsidy if he entered Germany In 1630 the king landed with 16,000 troops in Pomerania, these soon were augmented until 40,000 were at his disposal Gustavus's invasion of Mecklenburg failed when the Mecklenburgers refused to heed his appeal to rise against WALLENSTEIN Early in 1631 the Franco-Swedish treaty was openly ratified at Bärwalde, and after the fall of MAGDEBURG (which Gustavus did nothing to prevent), Saxony and Brandenburg accepted the king's conditions for an alliance with Sweden The spectacular sweep of the Swedish army through Germany now began In Sept, 1631, Gustavus defeated TILLY at Breitenfeld near Leipzig in the first Protestant victory of the war He now marched west, reaching Mainz by Christmas, while the Saxon army moved into Bohemia Resuming his campaign early in 1632, Gustavus returned east, defeating (April) the imperial troops at the crossing of the Lech (where Tilly was mortally wounded), and entered Bavaria Wallenstein, reinstated by the emperor, speedily put a large army into the field and forced the king to fall back on Nuremberg, where he entrenched himself Wallenstein set up his camp at a short distance, and there the two armies remained facing each other for more than two months (July–Sept, 1632) without giving battle At last Gustavus attacked Wallenstein's camp He failed and retired toward Würzburg, leaving a strong garrison at Nuremberg Wallenstein now invaded unprotected Saxony, causing Gustavus to hasten north At Lützen the two armies met on Nov 16 The Swedes won the battle but Gustavus was killed Oxenstierna continued to direct Swedish policy under Gustavus's daughter, Queen Christina, while Baner, and later Torstensson, took his place in the field In military organization and strategy, Gustavus Adolphus was ahead of his time While most powers relied on mercenary troops, he organized a national standing army which distinguished itself by its discipline and its relatively high moral standard Deeply religious, the king desired his soldiers to behave like a truly Christian army and took stern measures against the common practices of looting, raping, and torturing, this changed soon after his death His successes were due partly to this discipline, partly to his use of small, mobile units, and partly to the superiority of his firearms Though he was deeply interested in the internal progress of his kingdom, the chief credit for the development of Swedish industries and for the final and administrative reforms of his reign belongs to Oxenstierna See J L Stevens, *History of Gustavus Adolphus* (1884), B H Liddell Hart, *Great Captains Unveiled* (1929), G F MacMunn, *Gustavus Adolphus, the Lion of the North* (1931), N G Ahnlund, *Gustav Adolf the Great* (1940)

Gustavus III, 1746–92, king of Sweden (1771–92), son and successor of Adolphus Frederick When Gustavus ascended the throne, he found his kingdom torn by civil strife To the conflicting interests of peasants, nobles, priests, and officials was added the struggle between the aggressive, pro-French "Hat" party and the more conservative pro-Russian "Cap" party His efforts at conciliation having failed, the king resolved to place himself in complete control by a coup d'état After assuring himself of French support, he arranged a sham revolt On the pretense of crushing the insurrection, he secured the support of the army and navy He then imposed upon the estates a new constitution which restored to the sovereign the prerogatives lost by his predecessors (1772) He immediately inaugurated a policy of rigid financial reform, made his fleet one of the most powerful in Europe, and proclaimed complete religious toleration His extravagance and emulation of the court of Versailles, however, offset many of his improvements On account of the aggressive policy of Empress Catherine II, Gustavus embarked upon a war with Russia (1788), first forcing the rebellious Swedish gentry to promise their support An officers' mutiny threatened the campaign with disaster, but when the Danes invaded Sweden at Catherine's instigation, the king rallied the lower classes, and, with the moral support of Prussia and England, repulsed the attackers In a second coup d'état, Gustavus strengthened the regal authority (1789) The next year he defeated the Russians, who then entered a defensive alliance with him He was attempting to form a coalition to intervene in the French Revolution when he was assassinated by a representative of the nobles Gustavus, a gifted and learned monarch, was author of important dramas and poems He patronized science and literature and founded the Swedish academy (1786). He was succeeded by his son, Gustavus IV See R. N Bain, *Gustavus III and His Contemporaries, 1746–92* (1894)

Gustavus IV (Gustavus Adolphus), 1778–1837, king of Sweden (1792–1809) On the assassination of his father, Gustavus III, he succeeded under the regency of his uncle, the duke of Sodermanland (later King CHARLES XIII), a liberal Attaining his majority in 1796, Gustavus dismissed his uncle's ministers and embarked on a thoroughly reactionary policy at home and on a foreign policy directed against the French Revolution In 1805 he joined the third coalition against Napoleon I Swedish Pomerania was occupied by the French, and Finland was lost (1808) to Russia, which in 1807 had made peace with France at TILSIT His despotism, his mental unbalance, and his disastrous policy led to his enforced abdication (1809) The crown was tendered to Charles XIII, and Gustavus's descendants were barred from succession Gustavus IV spent most of his exile as "Colonel Gustafsson" at St. Gall, Switzerland, where he died He left memoirs

Gustavus V, 1858–, king of Sweden (1907–), son and successor of Oscar II During his reign Sweden evolved toward advanced democracy and economic prosperity and avoided involvement in two world wars The king, however, upheld the reality and dignity of the royal power Fond of traveling and good living, Gustavus V preserved youthful vigor even in his old age and until very late years was famed as a redoubtable tennis player He married (1881) Victoria of Baden (d 1930) His heir is his son, Crown Prince Gustavus Adolphus

Gustavus Adolphus see GUSTAVUS II and GUSTAVUS IV

Gustine, city (pop 1,355), central Calif, W of Merced, in the San Joaquin Valley, inc 1915

gut: see CATGUT

Gutenberg, Johann (gōō'tŭnbûrg, Ger vō'hän gōō'tunbĕrk), c 1397 1468, German printer, believed to have been the first European to print with movable types cast in molds Similar PRINTING had been done earlier in Korea, but there is no evidence that the Korean printing was known in Europe in Gutenberg's time Europeans who have been thought by some to have preceded Gutenberg in the practice of his art include Laurens Janszoon KOSTER, of Holland, and Pamfilo CASTALDI, of Italy Gutenberg's name does not appear on any printing attributed to him, and details of his life and work remain doubtful The evidence indicates that he was born in Mainz, that his father's name was Gensfleisch, and that his mother's maiden name or the name of her birthplace or of land that belonged to her was Gutenberg His use of the name Gutenberg instead of Gensfleisch was not out of harmony with the customs of the time Gutenberg is believed to have lived in Strasbourg for some years, and there is some evidence that in 1536 or 1537 he may have made his great invention there, but he returned to Mainz, and in this city the printing attributed to him was produced Mainz was the center from which skillful printers went to other European cities The masterpiece of Gutenberg's press was the MAZARIN BIBLE He borrowed money from the goldsmith Johann FUST, was unable to repay it, and lost his press and types Fust continued the work of printing with his son-in-law, Peter Schöffer There is a Gutenberg Museum in Mainz, and there are statues of him, though his form and features are unknown See D B Updike, *Printing Types* (2d ed, 1937), Otto W Fuhrmann, *The Five Hundredth Anniversary of the Invention of Printing* (1937)

Guthrie, Sir James, 1859–1930, Scottish painter, one of the leaders of the Glasgow school His early genre pictures, such as *Funeral Service in the Highlands* (Glasgow Gall), were painted in heavy impasto, but his later works, largely portraits, are more restrained The influence of impressionism is seen throughout Guthrie's best portraits include one of his mother and those of Major Hotchkiss, Professor Jack, and Mrs Watson

Guthrie, Samuel, 1782–1848, American physician, b Brimfield, Mass In Sackets Harbor, N Y, where he settled after serving as surgeon in the War of 1812, he invented a percussion powder and a punch lock for exploding it, thus making obsolete the flintlock musket. In 1831 he discovered chloroform, anticipating by a few months its discovery by Eugène Soubeiran in France and Justus von Liebig in Germany

Guthrie, Thomas Anstey, see ANSTEY, F

Guthrie, 1 City (pop 1,253), S Ky, SE of Hopkinsville and at the Tenn line, settled 1860 It is a railroad center in a farm area 2 City (pop 10,018), co seat of Logan co., central Okla, near the Cimarron N of Oklahoma City Founded in 1889, it was the territorial and then the state capital until 1910, when Oklahoma City became the capital after a bitter struggle. Guthrie is the commercial center of a farming and dairying section and a center for Masonic activities. Mineral Wells Park is near Guthrie, as is LANGSTON UNIVERSITY

Guthrie Center, town (pop. 2 066), co. seat of Guthrie co., W central Iowa, W of Des Moines, inc. 1880 Spring Brook State Park is near by

Gutiérrez, Juan María (hwän' märē'ä gōōtyĕ'rĕs), 1809–78, Argentine poet and scholar A follower of Esteban ECHEVERRÍA, he took part in the conspiracy of the Asociación de Mayo and was exiled by Juan Manuel ROSAS He began his literary career as a romantic with a nativist poem, *Los amores del payador* [the loves of the gaucho minstrel] (1838). After the fall of Rosas, he participated in the constitutional convention, served as foreign minister, and was rector of the Univ of Buenos Aires for many years He helped to forward free education, was a literary critic of note, and helped to forward the Americanizing of literature, as in his collection of poems written by Spanish Americans, *América poética* (1846)

Gutiérrez Nájera, Manuel (mänwĕl' gōōtyĕ'rĕs nä'hĕra), 1859–95, Mexican poet One of the precursors of MODERNISMO, he founded the literary periodical the *Revista azul* His elegant poetry, edited after his death, is delicately musical and wistfully sad, it reflects the influence of Bécquer and of the French symbolists and shows the transition from romanticism to modernism He also wrote exquisite prose, notably in *Cuentos frágiles* [fragile stories] (1883) and *Cuentos de color de humo* [stories in the color of the earth] (1898) See Nell Walker, *The Life and Works of Manuel Gutiérrez Nájera* (1927)

gutta-percha [Malay], solidified milky juice of various Malayan evergreen trees (especially *Palaquium gutta* and *P oblongifolia*) It does not dissolve in water, but under water of high temperature becomes plastic and easy to manipulate Unlike caoutchouc it is nonelastic In trade it is handled in the form of reddish or gray bricks. It is used for insulation (particularly for submarine cables), golf balls, telephone receivers, adhesives, waterproofing materials, and other purposes

Guttenberg (gŭ'tunbûrg) 1 Town (pop 1,860), NE Iowa, on the Mississippi and NW of Dubuque, first settled 1834, colonized and named by German immigrants 1845, inc 1851 A lock and dam of the Mississippi canalization project were completed here in 1937 2 Town (pop 6,200), NE N J, near the Hudson and NE of Jersey City, inc 1859

Gutzkow, Karl Ferdinand (kärl' fĕr'dēnänt gōōts'kō), 1811–78, German novelist and dramatist He entered journalism in 1831 and became one of the leaders of the group known as Young Germany For his *Wally die Zweiflerin* [Wally the doubter] (1835), which was excessively frank for the time and expressed skeptical religious views, he spent three months in jail His career was one of constant controversy and difficulties, later in his life his mind failed His writing greatly influenced feminism and the social and political thought of his day His fiction, among which is the nine-volume novel, *Die Ritter vom Geiste* [knights of the spirit] (1850–52), is important in the history of the modern German novel He also produced several plays, among them the comedy *Sword and Queue* (1843, Eng tr, 1913–15) and the drama *Uriel Acosta* (1847, Eng tr, 1913–15), which, though derivative, is perhaps his best work See L A Willoughby, *The Romantic Movement in Germany* (1930), O P Schinnerer, *Woman in the Life and Work of Gutzkow* (1924)

Guy, Thomas, 1645?–1724, English philanthropist, founder of Guy's Hospital, London (1721) As a printer and bookseller, Guy amassed a fortune, which he devoted to private and institutional charity He contributed largely to St Thomas's Hospital and Christ's Hospital in London and founded an almshouse in Tamworth, Staffordshire

Guyenne see GUIENNE

Guyer, Michael Frederic (gī'ur), 1874–, American zoologist, b Plattsburg, Mo, grad. Univ of Chicago (B S, 1894) He was head of the biology department (1900–1911) at the Univ of Cincinnati and professor of zoology (1911–45) at the Univ of Wisconsin A specialist in genetics and cellular biology, he wrote *Animal Micrology* (1906, 4th ed, 1936) and *Animal Biology* (1931, 4th ed, 1948)

Guymon (gī'mŭn), city (pop 2,290), co seat of Texas co., NW Okla, near the North Canadian river in the Panhandle wheatlands, inc 1905 A U S soil conservation station and the Panhandle Agricultural and Mechanical College are near by

Guy of Chauliac. see CHAULIAC, GUY DE

Guy of Lusignan (lusēnyäN'), d 1194, king of Jerusalem (1186–92) and of Cyprus (1192–94), second husband of Sibylla, sister of King BALDWIN IV of Jerusalem In 1183 he was briefly regent for his brother-in-law, who was incapacitated by leprosy, but when Baldwin V, Guy's stepson, was made king, the Latin nobles forced Guy to yield command to RAYMOND of Tripoli On Baldwin V's death (1186) Guy was chosen king with the support of Reginald of Châtillon He was defeated and captured (1187) by SALADIN at the decisive battle of Hattin, which led to the fall of Jerusalem Released in 1188, he laid siege (1189) to ACRE, which was captured (1191) in the Third Crusade with the help of Richard I of England and Philip II of France After the death (1190) of Sibylla, Guy's right to the throne was contested by CONRAD, MARQUESS OF MONTFERRAT, who was supported by

Philip II In spite of Richard I's support, Guy was compelled (1192) to resign his title, but was given the island of Cyprus His descendants (see LUSIGNAN) ruled Cyprus and Lesser Armenia He was succeeded by his brother, AMALRIC II

Guy of Warwick (wôr'ĭk), English legendary hero, popularized by a 13th- or 14th-century rhymed romance telling how Guy fought for and won the earl of Warwick's daughter and how he saved England from the Danes by killing the giant Colbrand in single combat It was tremendously popular in the Middle Ages and in a new versified form in the 17th and 18th cent

Guyon, Jeanne Marie Bouvier de la Motte (zhän' mārē' bōōvyā' du la mŏt' gēôvō'), 1648–1717, French mystic and author of writings dealing largely with QUIETISM Confined by the government (1688) in a convent because of her heretical opinions and her correspondence with Miguel de MOLINOS, she was released through the efforts of Mme de Maintenon She was later imprisoned (1695–1702) in the Bastille Her collected works appeared (1767–91) in 40 volumes See her autobiography (*Eng tr*, 1897), biography by T C Upham (1847)

Guyot, Arnold Henry (arnōld' ārē' gēyō'), 1807–84, Swiss naturalist and geographer He was a friend of Louis AGASSIZ, by whom he was persuaded to come to America (1848) He lectured at Lowell Institute, Boston, and from 1855 was professor of geology and physical geography at Princeton He investigated glaciers and conducted meteorological observations which led to the foundation of the U S Weather Bureau His writings include *Meteorological and Physical Tables* (1852) and *Memoir of Louis Agassiz* (1883)

Guys, Constantin (Ernestus Adolphus Hyacinthus Constantinus Guys) (gois), 1805?–1892, French draughtsman, b Flushing, Holland He accompanied Byron in the Greek struggle for liberty in 1824, then served in the French army until 1830 His friend Charles Baudelaire early recognized his talent, but his work was known to the public only as that of an anonymous artist on the staff of the *Illustrated London News*, in which his superb drawings in line and wash were badly reproduced in wood engraving Most of them deal with the high life of his period, but he also served as war artist in the Crimean War and in his impecunious old age depicted the vices of the poor Since his death Guys has come to be recognized as one of the most brilliant and original artists of a brilliant period See P G Konody, *The Painter of Victorian Life* (with an essay by Charles Baudelaire, 1930)

Guyton de Morveau, Louis Bernard, Baron (lwē' bĕrnär' barō' gētō' du môrvō'), 1737–1816, French chemist and lawyer He wrote the chemical section of the *Encyclopédie méthodique* (Vol I, 1786) and collaborated with Lavoisier and others in establishing a system of chemical nomenclature He taught chemistry (1794–1805) at the École polytechnique, Paris, served in the Legislative Assembly and in the National Convention during the French Revolution, and was master of the mint (1800–1814) In 1811 he was created baron

Guzmán, Nuño de (nōō'nyō dā gōōthmän'), or **Núñez Beltrán de Guzmán** (nōō'nyĕth bĕlträn'), d 1544, Spanish conquistador After serving as governor of Pánuco (NE Mexico), he became president of the first *audiencia* of New Spain (1528) His notorious rule brought an outcry from the colonists, in 1530 the *audiencia* was excommunicated by Bishop ZUMÁRRAGA, later it was replaced by a second *audiencia* Meanwhile, Guzmán left Mexico city (Dec , 1529) and with the help of his lieutenant, Cristóbal de Oñate, conquered NUEVA GALICIA and was responsible for the founding of Culiacán and Guadalajara He blocked several expeditions sent out by CORTÉS, his bitter rival. Guzmán's conquest was, however, not very productive He stirred up trouble with the Indians and with his own men Superseded in the governorship, he was imprisoned (1536–38), then he returned to Spain, where he died in obscurity

Guzmán or Ciudad Guzmán (syōōdhädh' gōōsmän'), city (pop 22,170), Jalisco, W Mexico Formerly called Zapotlán el Grande, it is an agricultural town with some minor industries and is the starting point for ascents of the Nevado de Colima (14,235 ft. high) and the smoking volcano, Colima (12,631 ft. high) The town was almost completely destroyed by earthquake in 1810

Guzmán Blanco, Antonio (äntō'nyō gōōsmän' blän'kō), 1829–99, president of Venezuela, a *caudillo* who dominated the nation from 1870 to 1888 Son of the founder of the Liberal party, Guzmán Blanco was a magnetic and energetic figure with considerable diplomatic and administrative ability He became a general in the revolution that deposed PÁEZ and was vice president (1863–68) in the Liberal administration that followed In 1870 he led a successful counterrevolution against MONAGAS and was elected president A benevolent despot, he alternately suppressed and supported the Church, he opposed political freedom, but made free education compulsory, he reformed governmental administration and instituted many public works that brought material advancement to Venezuela The egocentric Guzmán Blanco filled Venezuela with portraits and statues of himself. Several times he relinquished his office to make diplomatic and pleasure trips to Europe but kept control of the country through presidential puppets, notably Joaquín CRESPO In 1888, when he was abroad, his power was destroyed by revolution He spent the rest of his life in Paris

Guzmán de Alfarache: see ALEMÁN, MATEO.

Gwalior (gwä'lôr), former princely state (26,008 sq mi ; pop 4,006,159), central India It consisted of one large territory and numerous enclaves Wheat, millet, oilseed, and cotton are the leading crops The state was formed in the mid-18th cent by Ranoji Sindhia, a Mahratta chief who became independent of the peshwa (hereditary Mahratta prime minister) Forces of Gwalior overran much of central India until they were checked by the British in the early 19th cent , and the state was temporarily annexed to the British domain It was restored to the Sindhias in 1886 Gwalior merged with Madhya Bharat in 1948

Gwalior, town (pop 34,488), Madhya Bharat, India, adjoining Lashkar It lies at the foot of Gwalior fort, a stronghold on a hill c 300 ft high The fort is surrounded by battlemented walls pierced by six imposing gateways Within the walls are elaborately carved palaces and temples The town has food-processing and other light industries

Gwilt, Joseph (gwĭlt), 1784–1863, British architect, archaeologist, and writer, known chiefly for his *Encyclopaedia of Architecture, Historical, Theoretical, and Practical* (8 vols , 1842) Among his other books are *Scenography, or, Examples of Shades and Shadows, with Rules for Their Projection* (1822), an edition of Sir William Chambers's *Treatise on the Decorative Part of Civil Architecture*, with annotations (1825), a translation of Vitruvius (1826), and *Elements of Architectural Criticism* (1837)

Gwin, William McKendree, 1805–85, American politician, b Sumner co , Tenn , grad Transylvania Univ , 1828 Having taken a degree in medicine, he practiced in Clinton, Miss , until 1833 He represented Mississippi in the U S Congress (1841–43), but, conditions not proving favorable for a political career in that state, he went to California in 1849 There Gwin threw himself into the movement for statehood, stumping the territory for the project He was an outstanding leader in the state constitutional convention One of the first U S Senators from California (1850–55, 1857–61) and chief spokesman for the slavery interests there, he became involved in several turbulent battles with his ambitious antislavery rival, David C BRODERICK In the Civil War he was imprisoned briefly in the North For part of the war he went to France, where he unsuccessfully attempted to interest Napoleon III in a scheme for colonizing N Mexico with Southerners He is credited with promoting the first pony express (1860)

Gwinnett, Button, c 1735–1777, American Revolutionary patriot, signer of the Declaration of Independence, b Gloucestershire, England Gwinnett, a delegate to the Continental Congress (1775–77) from Georgia, fought a duel with Lachlan McIntosh, who was his personal and political rival Gwinnett was fatally wounded His signature, one of the rarest of American holographs, is extremely valuable See biography by C F Jenkins (1926)

Gwyn, or Gwynn, Eleanor (Nell Gwyn), 1650–87, English actress An orange seller in the Theatre Royal, she made her debut at Drury Lane as Cydaria in Dryden's *Indian Emperor* in 1665 Her forte was in comic roles and in her witty renditions of prologues and epilogues, in which she appeared until 1682 In 1669 she became the mistress of Charles II and bore him two sons, one of whom was created the duke of St Albans Her portrait was painted by Sir John Lely, and she appears in Pepys's *Diary* and Scott's *Peveril of the Peak* See Clifford Bax, *Pretty Witty Nell* (1932)

Gylippus (jĭlĭ'pus), fl 415–404 B C , Spartan commander in the Peloponnesian War He was sent to help Syracuse in the defense against Athenian attack, and it was his resourcefulness and skill combined with Athenian ineptitude that brought about one of the greatest defeats Athens suffered (413 B C) Later he was banished for stealing public money

gymnastics, exercises for the balanced development of the body practiced usually in a room or building called a gymnasium In Greece the gymnasium was originally a place of training for the OLYMPIC GAMES and other athletic contests, and the Lyceum and Academy of Athens were large enough for cavalry parades, besides containing a running track, pits for jumping, and ranges for throwing the discus and javelin By the end of the 4th cent B C the gymnasium became an educational and cultural center for Greek youths Public gymnasiums were built in Rome by Nero and Commodus, but were never as popular as in Greece Modern gymnastics date from the early 19th cent., when Ludwig Jahn established several *Turnplätze* in Berlin. Gymnastics spread on the Continent, to England, then to the United States, and became part of the modern Olympic meets. Gymnastics (see PHYSICAL EDUCATION) became part of the American school curriculum, was adopted by the army, and became a featured college sport in the United States. Besides free calisthenics, the principal gymnastic events in the United States are the side and long horse, the parallel and horizontal bars, Indian-club swinging, rope climbing, the flying rings, and tumbling. Except for rope climbing, which is scored on speed, events are scored as follows 60 points for variety, beauty, and difficulty of combination, 40 points for execution and general form, and 10 points for approach and retreat In team play, the most points for all events wins The Amateur Athletic Union holds annual events for both men and women See N E Bukh, *Primary Gymnastics* (5th ed , 1939), W D West, *The Gymnast's Manual* (1942), L C Drew, *Individual Gymnastics* (5th ed , 1945), and K A Knudsen, *A Textbook of Gymnastics* (2d ed , 1947–48)

Gympie (gĭm'pē), city (pop 8,413), Queensland, Australia, N of Brisbane It is a dairying and agricultural center producing bananas and sugar cane A silver mine is near by Gympie was formerly a gold-mining center

Gyongyos, Hung *Gyongyös* (dyûn'dyûsh), city (pop 24,086), N Hungary, at the foot of the Matra Mts It has a large Franciscan college and is the trading center for the excellent wine grown in the vicinity

Gyor, Hung *Győr* (dyûr), Ger *Raab*, city (pop 57,192), NW Hungary, near the Czechoslovak border and at the confluence of the Raab river with an arm of the Danube It is the chief textile center of Hungary and has important machine manufactures Built on the site of a Roman camp, Gyor became an episcopal see (1001) and a royal free town (1743) It was occupied by the French in 1809 In 1849 the Hungarian revolutionary forces were decisively defeated near Gyor by the Austrians The cathedral, which dates from the 12th cent , was rebuilt in the 17th cent

Gyp (shĕp), pseud of **Sibylle Gabrielle Marie Antoinette de Riquetti de Mirabeau, comtesse de Martel de Janville** (sēbēl' gäbrēĕl' marē' ätwänĕt' du rēkĕtē' du mērabō' kōtĕs' du martĕl' du zhävēl'), 1850–1932, French author She wrote a long series of novels, very popular in their day

Gypsophila, see BABY'S-BREATH

gypsum (jĭp'sum), mineral composed of calcium sulphate (calcium, sulphur, and oxygen) with two molecules of water It occurs in many places and in many forms A transparent crystalline variety is selenite A massive gypsum of delicate color and texture, readily worked into ornamental vases, boxes, and the like, is called alabaster A lustrous gypsum with fibrous structure, called satin spar, is used in jewelry and for other ornaments, but it is soft and easily marred Plaster of Paris, a fine white powder, is produced by heating gypsum to expel the water If this powder is moistened and then allowed to dry, it becomes hard, or sets It is used in making casts of sculpture and plaster casts used in medicine

gypsy or gipsy (both jĭp'sē) [from *Egypt*, because of an idea that gypsies came from a certain Little Egypt], nomadic people found on every continent and appearing first, according to record, in Eastern Europe in the 15 cent The gypsies live in small groups, usually unattached to the soil, and they have made their living usually by trading, especially horse trading, the women are famous as fortune-tellers Wherever the gypsies have gone a few persons native to the land have joined them Many wandering bands which are not ethnically related to them are called gypsies, such are the British and Irish Tinkers and many American "gypsies." Gypsies are swarthy, short, and lightly built; the men are usually handsome, the women often beautiful The theory is held that they are of partial East Indian origin, descendants of migrants from India some six centuries ago, with features that indicate some intermixture with the populations amid which they live The language, called Romany (rŏ' munē), is an Indo-Iranian language (see LANGUAGE, table), closely related to the languages of NW India, and their dialects also are heavily influenced by the speech of their nongypsy neighbors. Gypsies profess the religion of their country probably the greater number are Roman Catholic or Orthodox, because of the great gypsy centers in Hungary and Rumania They have many customs of their own, and their tenacity of them, especially of their marriage customs, has caused them trouble from many governments There are no reliable statistics on the gypsies, but they probably number more than 1,000,000 In the depression and Second World War the Eastern European countries (where most gypsies live) undertook to curb their nomadic habit of life by requiring them to register, to go to school and learn trades, and to observe certain rules of sanitation. Many were inducted into the army See George Borrow, *The Zincali* (1841), *Lavengro* (1851), and *The Romany Rye* (1857), I H Brown, *Gypsy Fires in America* (1924), Charles Godfrey Leland, *Gypsies* (1924), W F Starkie, *Ragglet-taggle* (1933), Martin Block, *The Gypsies: Their Life and Their Customs* (1939)

gypsy moth, European insect of which the larva is destructive to almost all forest and fruit trees It escaped from an imported collection of silk-pro-

ducing caterpillars with which a French naturalist was experimenting in Massachusetts and became established there c.1869 Unchecked for about 20 years, it became too abundant to make extermination possible, although millions of dollars have been spent in the attempt In the United States it is confined to the northeastern portion The adult male is a yellowish-brown moth, the female whitish, and the forewings of both are marked with dark lines The dark brown or black larva is about 2 in long and has yellow markings and rows of tubercles, some blue and some red, which bear long hairs Young larvae, buoyant because of hairs with air sacs, are carried long distances by the wind Spraying the trees and covering the egg masses with arsenate of lead, banding trees with burlap and destroying the egg clusters laid on it, and breeding natural enemies are methods of control. See H. A. Bess and others, *Forest Site Conditions and the Gypsy Moth* (1948).

gyrocompass: see GYROSCOPE.

gyroplane: see AUTOGIRO

gyroscope (jī'rŭskōp), a rotating wheel which is enabled to move with varying degrees of freedom about a second axis This secondary movement, called "precession," is the azimuthal motion of the spin axis of a top The instrument's first notable use was in the first half of the 19th cent , in giving visual demonstration of the earth's rotation The gyroscope was invented in 1852 by Foucault In the second half of the 19th cent , with the invention of the electrically driven rotor, its uses multiplied It became possible to rotate the wheel at desired speeds without interfering with the precession Practical applications are in giant gyroscopic ship stabilizers to counteract rolling, in recording instruments for registration of smoothness and irregularity of movement, and in directional instruments such as the gyrocompass Unaffected by magnetic variations, its spinning axis when brought in line with the north-south axis of the earth provides an unerring point of reference When coupled to a ship's steering gear it enables a course to be held more steadily than a human could hold it Even more numerous than its maritime applications are those it affords in aeronautical equipment It is the nucleus of the automatic pilot which can take over the guidance of a plane to a given destination Certain toys for children operate on the gyroscope principle See Martin Davidson, ed., *The Gyroscope and Its Applications* (1946)

Gyula (dyōō'lŏ), city (pop 25,169), SE Hungary, on the White Koros river near the Rumanian border. It has a fine château and an old castle.

H

H, eighth letter of the ALPHABET It is a usual symbol for a voiceless glottal spirant, as in *house* In some Greek alphabets eta, the long e, had this form, for short Greek e see E In chemistry H is the symbol for the element HYDROGEN

Haag, Carl (hāg), 1820–1915, English painter, b Germany He was court painter to the duke of Saxe-Coburg-Gotha and, later, to Queen Victoria After settling in England (1847), he devoted himself entirely to water colors He traveled extensively, spending considerable time with the Bedouins in the desert Among his finest works are Bavarian and Tyrolean landscapes and views of the Holy Land and of Bedouin life

Haag, Den, Netherlands see HAGUE, THE

Haahashtari (hä"hähsh'tärĭ, -häshtä'-), descendant of Judah 1 Chron 4 6

Haakon I (hä'kun, Nor hô'kōōn) (Haakon the Good), c 915–961, king of Norway (c 935–961), son of Harold I He was brought up as a Christian at the court of King Athelstan in England His brother, Eric Bloodyaxe, had succeeded Harold as chief king, but the other sons of Harold refused to obey Eric and helped Haakon seize power Haakon strengthened the national army and fleet, but failed in his effort to introduce Christianity He died from a battle wound Eric's sons succeeded him

Haakon IV (Haakon Haakonsson), 1204–63, king of Norway (1217–63), illegitimate son of Haakon III and grandson of Sverre Secretly reared by the Birkebeiner (see SVERRE), he was chosen king (1217) on the death of Haakon III's successor, King Inge Haakon Haakonsson overcame the rival claims of Earl Skule (Inge's brother), and in 1223 a great council reaffirmed his kingship at Bergen Skule, after a renewed attempt at rebellion, was slain by the Birkebeiner in 1240 In 1247 Haakon, now recognized by Pope Innocent IV, was solemnly crowned at Bergen Under Haakon IV medieval Norway reached its zenith Iceland and Greenland were acquired, and important legal reforms were carried out His court was splendid, and Old Norse literature flowered during his reign SNORRI STURLUSON for some time lived at Haakon's court Haakon died at Kirkwall in the Orkney Islands when campaigning against Scotland He was succeeded by his son, Magnus VI

Haakon VII, 1872–, king of Norway Formerly Prince Charles, second son of King Frederick VIII of Denmark, he was elected to the throne on the separation of Norway from Sweden in 1905 and took the name Haakon He married Princess Maud, third daughter of Edward VII of England, in 1896 As a result of the German occupation of Norway (1940–45) in the Second World War, Haakon with his ministers fled to England, where he headed a government in exile His return to Oslo (1945) was the occasion for nation-wide rejoicing

Haardt, Georges Marie (shôzh' märē' ärt', härt'), 1886–1932, French explorer He crossed the Sahara by automobile and made the north to south journey across Africa in the same manner In April, 1931, he led a trans-Asian motor expedition, one party of which started from Beyrouth, Syria, and the other from Peiping, China, to meet in Sinkiang They returned to Peiping in Feb , 1932, after an 8,000-mile journey With Louis Audouin-Dubreuil he wrote *Across the Sahara by Motor Car* (Eng tr , 1924)

Haarlem (här'lŭm), municipality (pop 155,759), capital of North Holland prov , W Netherlands, W of Amsterdam and near the North Sea coast It is the center of the chief Dutch flower-growing district and exports bulbs (particularly of tulips) to all parts of the world. There also are machinery, shipbuilding, and textile industries Haarlem is the see of a Roman Catholic bishop. It was chartered in 1245. In the Dutch rebellion against Spain it was sacked (1573) after a long siege In the 17th cent it was a center of Dutch painting, Frans Hals, Jacob van Ruisdael, and Adriaen van Ostade worked here. The tulip craze penetrated from Turkey to the Netherlands at the same period, and it is since the 17th cent that Haarlem has been the world center of tulip breeding On the Groote Markt, the central square, stands the Church of St Bavo or Groote Kerk (15th cent) Near by is the Stadhuis [city hall], formerly a palace of the counts of Holland, begun in 1250 There also are many fine medieval gabled houses L J Koster was born at Haarlem The popular tale of the boy of Haarlem who stopped a leak in the dike with his finger is entirely legendary and probably of American origin The name was formerly also spelled Harlem, and Harlem in New York City is named for it

Haas, Maurice Frederick Hendrick de. see DE HAAS, MAURICE FREDERICK HENDRICK

Haase, Hugo (hōō'gō hä'zu), 1863–1919, German revolutionist, a Socialist leader He steadfastly opposed the First World War and in 1916 split with the Majority Socialists under EBERT, who replaced him as leader in the Reichstag In 1917 Haase and his followers formed the Independent Socialists He was one of the foremost figures of the revolution in Nov , 1918, and was a leader of the commission that took over the government with the downfall of the empire, but the Independent Socialists were unwilling to accept the "bourgeois revolution" of the Social Democrats and withdrew Haase was murdered by a personal enemy

Habacuc (hubă'kuk), variant of HABAKKUK

Habaiah (hăbā'ĭ'u, hăbā'yu) [Heb ,=God has hidden], priestly family Ezra 2 61, Neh 7 63

Habakkuk (hŭbă'kŭk, hă'bukŭk) [Heb ,=embrace], **Habacuc** (hŭbă'kŭk), or **Habbacuc** (hubă'kuk), book of the Old Testament, eighth of the books of the Minor Prophets It is a set of poems, perhaps three (1 1–2 4, 2 5–20, 3), on the punishment of the wicked by God, using the Chaldeans as His instrument, and the triumph of divine justice and mercy The third (3) resembles a psalm and has a musical direction like one The prophet and his time are unknown A prophet of this name is mentioned in the story of BEL AND THE DRAGON. For bibliography, see OLD TESTAMENT

Habana, Cuba see HAVANA

Habaziniah (hă"bŭzĭnī'u), ancestor of Jaazaniah the Rechabite Jer 35 3

Habbacuc (hubă'kuk), variant of HABAKKUK

Habberton, John, 1842–1921, American author and journalist, b Brooklyn, N Y His most popular books were the humorous story of a bachelor uncle and two small nephews, *Helen's Babies* (1876), and a sequel, *Budge & Toddie* (1908) His other fiction, a play, and a biography of Washington were less successful

habeas corpus (hā'bēŭs kôr'pŭs) [Latin, =you may have the body], writ directed by a judge to some person who is detaining another, commanding him to bring the body of the person in his custody at a specified time to a specified place for a specified purpose It is mentioned as early as the 14th cent in England and was formalized in the Habeas Corpus Act of 1679 The privilege of the use of this writ as a safeguard against illegal imprisonment was highly regarded by the British colonists in America, and wrongful refusals to issue the writ were one of the grievances before the American Revolution As a result, it is provided in the Constitution of the United States that the privilege of the writ of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it

Haber, Fritz (hä'bur), 1868–1934, German chemist. He was professor of physical chemistry at Berlin, director of the Kaiser Wilhelm Institute, and winner of the 1918 Nobel Prize in Chemistry He invented the HABER PROCESS

Habermann, Hugo, Baron von (hōō'gō barōn' fŭn hä'burmän), 1849–1929, German portrait and figure painter A pupil of Karl von Piloty at the Munich Academy, he became instructor there in 1905 Among his well-known works are *Piloty's Studio*, *The Monk*, and *In a Studio* and *Portrait of a Lady* (both: Metropolitan Mus).

Haber process [for Fritz Haber], commercial process for the synthesis of ammonia by the direct combination of nitrogen and hydrogen The gases, mixed in correct proportion for reaction, are heated under pressure (up to 1,000 atmospheres pressure, at 400°–600°C) and passed over a catalyst The ammonia gas formed is removed by solution in water or by liquefaction The pure nitrogen for the operation is obtained from liquid air

Habersham, James (hă'bŭrshŭm), 1712–75, colonial statesman, acting governor of Georgia (1771–73), b Beverley, Yorkshire, England He came to Georgia (1738) and was associated with George WHITEFIELD and the Bethesda Orphanage until he became (1744) a merchant He favored the introduction of slavery into the colony and played an important role in the colonial politics after Georgia became a royal province Unlike his son Joseph, he was a strong Loyalist and dissolved (1773) the assembly for its radical actions as the American Revolution was brewing

Habersham, Joseph, 1751–1815, patriot leader in the American Revolution and U S Postmaster General (1795–1801), b Savannah, Ga , son of James Habersham He was from the first active in the Revolutionary cause and rose to be a colonel in the Continental army He also served in the Continental Congress and was a member of the Georgia convention that ratified the Constitution of the United States After service in the cabinet, he was (1802–15) president of the Georgia branch of the Bank of the United States

Habington, William (hăb'-), 1605–54, English poet His one volume of verse, *Castara* (1634), included originally only love poems to his wife, Lucy (daughter of Sir William Herbert), but was revised in 1640 to include a number of sacred poems He was also author of a play, *The Queen of Aragon* (1640)

Habor (hā-), tributary of the Euphrates, now called Khabur It enters the river from the north below Deir, Syria Along it, in Gozan, the Israelite captives from Samaria were settled 2 Kings 17 6, 18 11

Habsburg, family see HAPSBURG

Habsburg (hŭps'bōōrk), castle, Aargau canton, Switzerland, near the Aar river Built c 1020, it was in the 12th and 13th cent the seat of the counts of Habsburg or HAPSBURG

Hachaliah (hăkulī'u), Nehemiah's father Neh 1 1, 10 1

Hachijo-shima (hă"chējō'-shĭma), second largest island of the Izu-shichito group, Japan It has two active volcanoes

Hachilah (hă'klu), unidentified hill, S Palestine 1 Sam 23 19, 26 1, 3

Hachmoni (hăk'mōnī) or **Hachmonite** (-nīt), name of a family 1 Chron 11 11, 27 32 Tachmonite. 2 Sam 23 8 The passages are obscure

hackberry, name for plants of the genus *Celtis*, deciduous trees or shrubs widely distributed and often cultivated The hackberry (sometimes called sugarberry) commonly has warty bark, elmlike leaves, and small edible fruit, palatable to bird and man Witches'-brooms (abnormal bunchy growths of twigs) are often present Old World kinds, usually called nettle trees, have stronger and more useful wood than American See also LOTUS

Hackensack, city (pop 26,279), co seat of Bergen co , NE N J , on the Hackensack and NW of New York city, settled 1639 by Dutch, inc as a city 1921 It was the scene of several engagements in the Revolution The city grew as a commercial center and later as a residential and industrial suburb of New York The first Dutch Reformed church, built in 1696, was later rebuilt and enlarged The county buildings are notable Samuel Cooper, Confederate general, was born here

Hackensack, river rising in SE New York, W of Haverstraw, and flowing generally south c 50 mi , past Hackensack and Ridgefield Park in New Jersey to Newark Bay Near the bay it flows through a salt-marsh area which is known as the Hackensack Meadows.

Hackett, James Henry, 1800–1871, American actor, b New York city. He was most successful in roles in which he impersonated American comedy types, and several such parts were written for him. His Falstaff was successful both in England and the United States. He also managed several theaters and wrote a volume of comments on Shakspere (1863). His son, **James Keteltas Hackett,** 1869–1926, b. Wolfe Island, Ont., was also an actor. One of the first matinee idols, he was outstanding in such romantic plays as *The Prisoner of Zenda* and *Rupert of Hentzau*, adaptations of Anthony Hope's novels. In 1895 he joined Daniel Frohman's stock company in New York and married (1897) its leading lady, Mary Mannering, with whom he appeared in Alfred Sutro's *Walls of Jericho* (1905). See M. J. Moses, *Famous Actor-Families in America* (1906).

Hackettstown, town (pop. 3,289), NW N.J., in the fertile Musconetcong valley W of Dover; inc. 1853. Centenary Junior College for girls is here.

hackmatack see LARCH

Hackney, metropolitan borough (1931 pop. 215,333, 1948 estimated pop. 172,900) of NE London, England. It was once an exclusive residential district. St. John's parish church has a 16th-century tower.

Haco. For rulers of Norway named thus, see HAAKON.

Hadad (hā'–). **1** Son of Ishmael. 1 Chron. 1 30. Hadar Gen. 25 15. **2** King of Edom. Gen. 36 35, 1 Chron. 1 46. **3** Last king of Edom. 1 Chron. 1 50. Hadar Gen. 36 39. **4** Scion of the kings of Edom, who escaped Joab's massacre. He fled to Egypt and married the Pharaoh's sister-in-law. Later he seems to have relieved Edom from Solomon's oppression. 1 Kings 11 14–25.

Hadadezer (hădudē'zur), king of Zobah, who led a Syrian coalition against David. The allies were eventually defeated and became tributaries. 2 Sam. 8 3–12, 1 Kings 11.23. Hadareser. 2 Sam. 10 16,19, 1 Chron. 18.3–10, 19 16,19.

Hadadrimmon (hă"dădrĭm'ŭ), proper name, perhaps of a place, occurring in Zech. 12 11. It is a compound of the names of two Syrian gods.

Hadar (hā'dăr), variant of HADAD **1, 3.**

Hadarezer (hădūrē'zŭr), variant of HADADEZER.

Hadashah (hă'dŭshŭ, hŭdă'–), unidentified town, SW Palestine. Joshua 15 37.

Hadassah (hudă'su) [Heb., =myrtle], Hebrew name of ESTHER. Esther 2 7.

Hadassah (hŭdă'su), the women's Zionist organization of America, founded by Henrietta Szold in 1912. It has done important work in Palestine with medical service, child welfare, and aid to refugees. Its principal activities in the United States are educational and charitable work.

Hadattah, in the Bible. see HAZOR **6.**

Haddam, town (pop. 2,069), S Conn., bisected by the Connecticut river, settled 1662, inc. 1668. It has some old houses. Metal products are made.

Haddington, county, Scotland. see EAST LOTHIAN.

Haddington, burgh (pop. 4,405), co. seat of East Lothian, Scotland, on the Tyne and E of Edinburgh. The cruciform parish church of St. Mary (12th or 13th cent.) is called the "Lamp of the Lothians." Jane Welsh Carlyle is buried in the church. Knox Institute commemorates John Knox, who was born in Giffordgate, a suburb. Haddington. There is a 15th-century bridge across the river to Nungate. The burgh has wool and hosiery mills.

Haddingtonshire: see EAST LOTHIAN.

haddock, food fish of the N Atlantic very similar to the cod, but with a black instead of a white lateral line from gill to tail. It averages from 2 to 4 lb., reaching a maximum of about 17 lb. The annual catch in North America usually outweighs that of other Atlantic food fish. The haddock's flesh is tender, white, and flaky. Smoked, it is finnan haddie, originally a product of Scotland and now prepared also in the United States.

Haddonfield, borough (pop. 9,742), SW N.J., a suburb of Camden, settled 1682, inc. 1875. Of interest is Indian King Tavern (1750), where the first state legislature met in 1777. British and Hessians camped here in the Revolution.

Haddon Heights, borough (pop. 5,555), SW N.J., near Haddonfield, laid out c. 1891, inc. 1904.

Haden, Sir Francis Seymour (hā'dŭn), 1818–1910, English etcher, writer, and surgeon. He was a successful practicing surgeon in London (1847–87) and founded the hospital for incurables there, but is best known as an etcher and an authority on etching. He was a lover of the classical etching of Rembrandt and did much to familiarize the public with Rembrandt's work. Haden's writings include *The Etched Work of Rembrandt Critically Reconsidered* (1877), *About Etching* (1879), and *The Relative Claims of Etching and Engraving to Rank as Fine Arts* (1883). His own works, for the most part hard-ground etchings and dry points, are of a very high quality. Among the best known of his 251 plates are *Thames Fisherman, Breaking Up of the Agamemnon, Calais Pier* (after J. M. W. Turner), *Sunset in Ireland, A By-Road in Tipperary,* and *Early Morning in Richmond.* The best collections of Haden's work are in the New York Public Library; the Albright Art Gallery, Buffalo; the Metropolitan Museum; and the British Museum. Haden was knighted in 1894. See catalogue by H. N. Harrington (1910).

Hadera (hudă'rä), town (pop. c.10,000), central Israel, near the Mediterranean coast. Near by are the ruins of Caesarea Palestinae. Hadera was founded in 1890 by Jewish settlers, who drained vast malarial swamps and planted groves of citrus fruit and fields of grain. Building materials are manufactured.

Hadersley (hă'dhŭrslĕv), Ger. *Hadersleben,* (hă'–durslā"bun), city (pop. 17,583), SE Jutland, a seaport on the Hadersley Fjord, an inlet of the Little Belt. As part of N Schleswig, it was under Prussia from 1864 to 1920.

Hades. see HELL and PLUTO.

Hadewijch (hă'dŭvĭkh), fl. early 13th cent., Dutch mystical poet, a nun. Her works, beautiful lyrics on the love of God and letters and visions in prose, are a monument alike of early Dutch literature and of Roman Catholic mysticism.

Hadfield, Sir Robert Abbott, 1858–1940, English metallurgist. For his discovery of manganese steel (1883) and many other metallurgical discoveries and inventions he was knighted in 1908, was made a baronet in 1917, and received numerous international honors. His works include *Metallurgy and Its Influence on Modern Progress* (1926) and *Faraday and His Metallurgical Researches* (1931).

Hadhramaut. see HADRAMAUT.

Hadid (hă'–), town, NE of Lydda, settled by Benjamites after the Exile. Ezra 2 33, Neh. 7 37, 11 34.

Hading, Jane (ădĕ'), 1859–1941, French actress, whose real name was Jeanne Alfrédine Tréfouret (shăn' ălfrădĕn' trāfōōrā'). Her performances in Ohnet's *Maître de Forges,* and in Lavedan's *Prince d'Aurec* met with success, but she rose to fame when she created the title role in Daudet's *Sapho* and in Sardou's *Marcelle.*

Hadlai (hădlā'ī, hăd'lāī, hăd'lī) [Heb., =resting], Ephraimite. 2 Chron. 28 12.

Hadley, Arthur Twining, 1856–1930, American economist and educator, b. New Haven, Conn., son of James Hadley. A graduate (1876) of Yale, he was on the faculty (1879–99) and later was president (1899–1921) of the university. As president of Yale, Hadley guided the wide expansion and improvement of the university. His *Railroad Transportation* (1885), the first comprehensive treatment of the subject, was long a standard work, and he served on several government commissions dealing with railroad problems. His other works include *Economics: an Account of the Relations between Private Property and Public Welfare* (1896), a strong defense of capitalism, *Undercurrents in American Politics* (1915), *The Conflict between Liberty and Equality* (1925), and *Education and Government* (1934). See biography by his son Morris Hadley (1948).

Hadley, Henry Kimball, 1871–1937, American composer and conductor, b. Somerville, Mass., studied at the New England Conservatory and in Vienna. He composed and conducted in Europe from 1904 until 1909. Upon his return he became conductor of the Seattle Symphony Orchestra. From 1911 to 1915 he was conductor of the San Francisco Symphony Orchestra. Neither self-consciously modern nor typically American in style, he composed with craftsmanship and facility in all forms. His best-known works are his opera *Cleopatra's Night* (New York, 1920) and the orchestral works *Salome* (1907) and *The Culprit Fay* (1909).

Hadley, Herbert Spencer, 1872–1927, American lawyer, b. Olathe, Kansas, grad. Univ. of Kansas (B.A., 1892) and Northwestern Univ. (LL.B., 1894). As attorney general of Missouri (1904–8), he successfully prosecuted the Standard Oil Company for violating the state antitrust law. He was governor of Missouri from 1909 to 1913 and was a prominent Roosevelt Republican. In 1923 he became chancellor of Washington Univ. in St. Louis. He was on the committee of the American Law Institute which prepared the *Code of Criminal Procedure,* a model code published in 1930.

Hadley, James, 1821–72, American philologist, b. Fairfield, Herkimer co., N.Y., grad. Yale, 1842. He became a tutor (1845), an assistant professor (1848), and a professor (1851) of Greek at Yale. His *Greek Grammar* (1860) was long a noted text; *Introduction to Roman Law* (1873) contains his valuable lectures on that subject, and *Essays Philological and Critical* (1873) was a posthumous selection of his papers. Arthur Twining Hadley was his son.

Hadley, town (pop. 2,576), W Mass., on the Connecticut opposite Northampton; settled 1659, inc. 1661. Paper mills are here. There are several 18th-century buildings. The regicides Whalley and Goffe lived for years in Hadley.

Hadoram (hŭdō'rŭm). **1** The same as JORAM **3.** **2** Descendant of Eber. Gen. 10.27; 1 Chron. 1 21. **3** The same as ADONIRAM.

Hadrach (hā'drăk), region, Syria. Zech. 9.1.

Hadramaut or **Hadhramaut** (both: hădrŭmout', –mŏt'), region, Arabia, on the Gulf of Aden and the Arabian Sea, occupying approximately the central portion of the Aden protectorate. The chief port and city is Mukalla. The Hadramaut extends c.400 mi. from east to west. It consists of a narrow, arid coastal plain, a broad plateau averaging 4,500 ft. high, a region of deeply sunk wadis (watercourses), and an escarpment fronting on the desert. The sedentary population, the Hadranis, live in towns built along the wadis and harvest rich crops of wheat, maize, millet, dates, coconuts, and coffee. On the plateau the Bedouins raise sheep and goats. The Hadramaut is called HAZARMAVETH in the Bible.

Hadrian. For popes of that name, see ADRIAN.

Hadrian (hā'drēŭn) or **Adrian,** A.D. 76–138, Roman emperor (117–38), whose name in full was Publius Aelius Hadrianus. He was born in Spain. Left orphaned, he was the ward of Trajan. As a commander (especially in Dacia) and an administrator he distinguished himself. Nevertheless, Trajan's choice of Hadrian as his successor, announced after Trajan's death, caused some chagrin in Rome. Hadrian's reign was vigorous and judicious. He proved his military skill in pacifying Moesia, was generous in offering circuses and giving alms to the poor, and enlarged and reformed the civil service. He abandoned the aggressive policy of Trajan in Asia and withdrew to the boundary of the Euphrates. In Germany he built great protective walls, and in BRITAIN (which he visited) he had Hadrian's Wall built. In Palestine he proved himself ruthless. His Romanizing policy awoke opposition, he put down the insurrection of BAR KOCHBA with great severity, followed out his plan of building a temple of Jupiter Capitolinus on the ruined Temple, and renamed Jerusalem Aelia Capitolina. He traveled much in the empire, interesting himself in all the local affairs of state and adorning the provincial cities, but from 131 to his death he lived more or less quietly in Rome and in his villa at Tibur, cultivating the arts. He was learned in Greek and was accomplished in poetry and music. He patronized artists, and his regard for the young ANTINOÜS is imperishably recorded by sculptors and architects. He built the Arch of Hadrian in Athens, built the extant Pantheon, added to the Roman Forum, and erected a mausoleum at Rome (now Castel Sant' Angelo). He set up a new and more humanitarian law code. As his successor he chose ANTONINUS PIUS. See B. W. Henderson, *Life and Principate of the Emperor Hadrian* (1923), biography by Sulamith Ish-Kishor (1935).

Hadrian's Mausoleum or **Hadrian's Mole:** see CASTEL SANT' ANGELO.

Hadrian's Wall, ancient Roman wall, 73½ mi. long, across the narrow part of the island of Great Britain from Wallsend on the Tyne river to Bowness at the head of Solway Firth. It was built A.D. c.121–127 by Emperor Hadrian, probably connecting forts of Agricola, and was added to by Severus a century later. Fragments of the wall, 6 ft. high and 8 ft. thick, and many of the "mile stations" (stone forts along the wall constructed every Roman mile) remain. The British government has undertaken the preservation of the wall, which is one of the largest and most significant of the remains of Roman occupation. See R. G. Collingwood and J. N. L. Myres, *Roman Britain and the English Settlements* (2d ed., 1937).

Hadrumetum see SOUSSE, Tunisia.

Haeckel, Ernst Heinrich (ĕrnst' hīn'rĭkh hĕ'kŭl), 1834–1919, German biologist and philosopher. He taught (1862–1909) at the Univ. of Jena. An early exponent of Darwinism in Germany, he evolved a mechanistic form of MONISM based on his interpretation of Darwin's theories and set forth in his speculative popular works on science, *Generelle Morphologie* (1866), *The History of Creation* (1868, Eng. tr., 1906), and *The Evolution of Man* (1874, Eng. tr., 1910). Although many of his conclusions have been proved erroneous, they attracted a large following and stimulated research. He developed a theory of RECAPITULATION illustrated by his gastraea theory wherein he postulated a hypothetical ancestral form (gastrula) represented by the gastrula stage of individual development. He is known also for his study of invertebrate marine organisms, especially the Radiolaria and sponges.

Haedui: see AEDUI.

haemo–, for words beginning thus see HEMO–.

Hafiz (hăfĭz') [Arabic, =one who knows the Koran by heart], d. 1389?, Persian lyric poet, b. Shiraz. His real name was Shams-ud-Din Mohammed. He was a teacher of the Koran and was in close association with dervishes, whom he continually satirized. According to Moslem criticism he was a SUFI, and in this light they interpret his passionate lines as allegorical. Critics of the West generally incline to construe them literally. His lyrics are always vehement, especially his amatory verses, his drinking songs, and his invective. Hafiz's favorite form is the gazel, in rhyming couplets, comparable to the sonnet. He is buried in a splendid tomb near Shiraz.

Hafnafjord, Icelandic *Hafnarfjörður* (häp'närfyûr"dhür), town (pop. 4,596), SW Iceland, S of Reykjavik. A distribution and shipping center, it has a good harbor and a fishing fleet. During the 15th and 16th cent. German and English traders fought over the port.

hafnium (hăf'nēŭm), metallic element (symbol= Hf, for physical constants see ELEMENT, table). It is widely distributed, appearing associated with zirconium, with which it was confused for some time because of its properties. It has as yet no commercial importance The element was first obtained in 1923 by Dirk Coster and Georg von Hevesy, who gave it its name and to whom is commonly accredited its discovery, although its existence had been recognized previously A substance known as celtium which Georges Urbain had described in 1911 was for a time erroneously thought to be element 72 in the periodic table, the position later filled by hafnium

Hafrs Fjord or **Hafs Fjord** (both· hăfs'fyôrd), inlet of the North Sea, SW Norway, near Stavanger Here in 872 HAROLD I of Norway won a decisive victory

Hagab (hā'–), family which returned from the Exile. Ezra 2 46.

Hagaba or **Hagabah** (both hă'gubŭ), family of Nethinim. Neh 7 48; Ezra 2 45

Hagar (hā'gur) [Heb ,=flight] or **Agar** (ā'gŭr), handmaid of Abraham's wife Sarah and mother of his eldest son, Ishmael She and her son were sent out into the wilderness because of Sarah's jealousy An angel comforted her there Gen 16 21 9–21 St Paul uses Hagar as a symbol for the bondage of the Old Law Gal 4 24 The Hagarites, Hagrites, or Agarenes were a tribe hostile to Israel and probably had nothing to do with Hagar 1 Chron 5 10, Ps 83 6, Baruch 3 23

Hagen, Hermann August (hā 'man ou'gōost hā'gun), 1817–93, German-American entomologist, b Königsberg From 1870 he held at Harvard the first chair devoted solely to entomology to be established in the United States His *Bibliotheca entomologica* (2 vols , 1862–63) was one of the most used working tools of the entomologist for the rest of the century He wrote over 400 papers, describing new European and American insects, including fossil forms

Hagen, Johannes Georg (yōhā'nŭs gā'ôrk hā'gŭn), 1847–1930, American astronomer and mathematician, b Austria A Jesuit, he came in 1880 to the United States to teach In 1888 he was made director of the astronomical observatory at Georgetown Univ , Washington, D C , where he remained until called to Rome in 1906 to be at the head of the Vatican Observatory Much of his research and writing was devoted to the variable stars and to nebulae and cosmic clouds

Hagen, Walter (hā'gŭn), 1892–, American golfer, b Rochester, N Y Hagen won the U S National Open championship in 1914 and again in 1919, he took the British Open title in 1922, 1924, 1928, and 1929 "The Haig," as he is called by golfing fans, also won the U S Professional Golfers Association championship five times (1921, 1924–27) and several other golf titles, including the French Open (1920) and the Australian Open (1931) championships

Hagen (hā'gun), city (pop 126,516), Westphalia, NW Germany It is an industrial center of the Ruhr district, with large iron and steel foundries and machinery plants Though mentioned in the 9th cent , it became a city only in 1746, and its growth is recent In the Second World War, Hagen was very heavily damaged

Hagerstown (hā'gŭrstoun) 1 Town (pop 1,638), E Ind , NW of Richmond. It is a farm trading center and produces machinery **2** City (pop 32,491), co seat of Washington co , NW Md , NW of Frederick in the Cumberland Valley, settled 1762 It is the trading center of an agricultural area and produces organs, furniture, flour, airplanes, cement, shoes, and paper goods Its historic importance comes from its nearness to Antietam and Gettysburg In a near-by state park is Fort Frederick, a restored French and Indian War bastion

Hagersville, village (pop 1,455), S Ont , SW of Hamilton

haggada· see HALAKAH

Haggai (hă'gāĭ) [Heb.,=festival] or **Aggeus** (ăgē'ŭs), book of the Old Testament, 10th of the books of the Minor Prophets, dated 520–519 B C , at Jerusalem, after the return from captivity It is a call to renew work on restoring the Temple (Ezra 4–5) and is addressed to the leader Zerubbabel and the high priest Joshua, saying that the new Temple will be less in material splendor than Solomon's, but its glory will be greater, this embodies a Messianic prophecy (2 7). For bibliography, see OLD TESTAMENT.

Haggard, Sir Henry Rider, 1856–1925, English novelist South Africa, where he served as master of the High Court in the Transvaal, was the scene of many of his highly popular romances *Dawn* (1884), *King Solomon's Mines* (1885), *Allan Quatermain* (1887), and *She* (1887), all in rough but colorful prose, are among his best-known works. He also wrote *The Poor and the Land* (1905), a study of colonization in South Africa; travel sketches; works on agricultural problems; an autobiography, *The Days of My Life* (1926). He was knighted in 1912.

Haggeri (hă'gŭrĭ, hăgē'rĭ), father of MIBHAR.

Haggi (hă'gī) [Heb.,=festive], founder of a Gadite family. Gen. 46.16; Num. 26.15.

Haggiah (hŭgī'ŭ) [Heb.,=festival of God], Merarite Levite 1 Chron. 6 30

Haggith [Heb ,=dancing], mother of ADONIJAH 1.

Hagia Sophia (hā'jŭ sōfē'ŭ, hă'jŭ, hă'gyŭ) [Gr ,= Holy Wisdom] or **Santa Sophia** (sän'tŭ sōfī'u), Turkish *Ayа Sofia*, originally a Christian church at Constantinople, later a mosque, but now converted into a museum of Byzantine art. The supreme masterpiece of Byzantine architecture and one of the world's greatest buildings, it stands on the site of an earlier basilican church erected by Constantius II in 360, some 30 years after Byzantium had become the capital of the Roman Empire This was burned in 404 and rebuilt by Theodosius II in 415, only to be again destroyed by fire in 532 The present structure, entirely fireproof, was built in 532–37 by Emperor Justinian on designs of his imperial architects Anthemius of Tralles and Isidorus of Miletus As a result of severe earthquakes in 553 and 557 the dome collapsed in 558, but was rebuilt by 563 in the form which it has since preserved despite two other reconstructions in 994 and 1356 With the Turkish conquest of Constantinople in 1453, Hagia Sophia became a mosque, and in subsequent years all the interior figure mosaics were obscured under coatings of plaster and painted ornament, while most of the Christian symbols elsewhere were obliterated The four slender minarets, which rise so strikingly at the outer corners of the structure, were added singly and at different times, the crescent supplanted the cross on the summit of the dome, and the altar and the pulpit were replaced by the customary Mohammedan furnishings The spacious nave is covered by a lofty central dome Pendentives make possible its support on a square framework of four huge equal arches, of which the two at east and west are extended and buttressed by great half domes, while the half domes in turn are carried on smaller semidomed exedrae A vast oblong interior, 102 ft by 265 ft , is thus created from a succession of domical elements which build up to a climax in the main dome, 102 ft in diameter and 184 ft high, and in which opens a corona of 40 arched windows shedding a flood of light to the interior At the east end of the nave is the vaulted sanctuary apse, and at the west end a great narthex or vestibule, beyond which an exonarthex opens to the forecourt or atrium Flanking the nave to the north and south are side aisles with galleries over them Their massive vaults, carried at both levels by monolithic columns of green and white marble and purple porphyry, serve as buttresses to receive the thrust of the great dome and its supporting arches, while other buttressing masses are posed above the gallery roofs and hence removed from sight The vast interior is thus wholly free from suggestion of ponderous load, and its effect is that of a weightless golden shell which seems to possess a miraculous inherent stability In one structural organism are epitomized the Roman methods of construction, modified and enriched by new aesthetic theories and realized in strikingly colorful materials and ornamental techniques, which, though often considered Eastern, are in fact the logical outgrowth of trends already apparent in Roman imperial buildings of the first three centuries A D All interior surfaces are sheathed with polychrome marbles and gold mosaic, incrusted upon the brick core of the structure, most of the magnificent figure mosaics have been cleaned and restored to view by American archaeologists Externally, the broad smooth surfaces of stuccoed walls and the great unconcealed masses of vaults and domes pile up impressively. Hagia Sophia served as model for several of the great Turkish mosques of Constantinople See E H Swift, *Hagia Sophia* (1940)

Hagios Ilias (hī'ŏs ēlyē'ŭs) or **Mount Saint Elias,** name of several peaks in Greece The highest (7,895 ft) is in the S Peloponnesus, SW of Sparta, and is the chief peak of the Taygetus mts

Hague, Arnold (hăg), 1840–1917, American geologist, b. Boston, grad Yale, 1863 With S F Emmons in 1866 he joined the Fortieth Parallel Survey (under Clarence King), and together they wrote the second volume, *Descriptive Geology*, of the Survey's report Hague served as government geologist in Guatemala and in N China and with the U S Geological Survey from 1879 In 1883 he was given charge of the Yellowstone Park survey, and most of his subsequent publications deal with his work in that region, including the *Geology of the Yellowstone National Park* (1899) and *Atlas of Yellowstone National Park* (1904) See memoir and complete bibliography in the *Bulletin of the Geological Society of America*, Vol XXIX (1918) An elder brother, **James Duncan Hague,** 1836–1908, also became associated with the Fortieth Parallel Survey and wrote for its report the third volume, *Mining Industry*.

Hague, Frank, 1876–, Democratic political boss, former mayor of Jersey City, N J , b Jersey City He began his political career by working in the sheriff's office in Hudson co. and later as a member of the street and water board of Jersey City In 1913 Hague was elected to the board of commissioners, from 1917 to 1947 he was mayor of Jersey City, and after 1922 was a member of the Democratic National Committee A powerful boss, Hague's political influence spread through state and national politics His attempts to oust the C I O and the American Civil Liberties Union from Jersey City were frustrated by a U S Supreme Court ruling in 1939 He lost much of his power in the 1948 election. See D D McKean, *Boss: the Hague Machine in Action* (1940)

Hague, James Duncan see HAGUE, ARNOLD

Hague, The (hăg), Dutch 's *Gravenhaage* (skhrävünhä'khu) or *Den Haag* (dun häkh'), Fr. *La Haye* (lä ā'), municipality (pop 523,703), capital of South Holland prov and seat of the government of the Netherlands. It is situated c 30 mi SW of Amsterdam and 4 mi. from the North Sea, on which is the popular resort of SCHEVENINGEN The *de facto* capital of the Netherlands, The Hague is the seat of the Dutch royal court, of the Dutch legislature, of the Dutch supreme court of justice, of the International Court of Justice, and of the foreign embassies It is almost wholly residential The Hague was (13th cent) the site of a hunting lodge of the counts of Holland ('s Gravenhaage means the count's wood) In 1250 William, count of Holland, began the construction of a palace, around which a town grew in the 14th and 15th cent In 1586 the States-General of the United Provs of the Netherlands convened in The Hague, which became the residence of the stadholders and the capital of the Dutch republic In the 18th cent The Hague rose to be one of the chief diplomatic and intellectual centers of Europe From 1815 it has been the Dutch royal residence. It was greatly expanded and beautified in the 19th cent by King William II and now is considered one of the finest cities of Europe In 1899 the First Hague Conference met here on the initiative of Nicholas II of Russia, ever since, The Hague has been a center for the promotion of international justice and arbitration In the Second World War several city blocks were destroyed by bombing Among the landmarks of The Hague is the Binnenhof, which grew out of the 13th-century palace and which now houses both chambers of the legislature, it contains the 13th-century Hall of Knights (Dutch *Ridderzaal*) Near by is the Gevangenenpoort, the 14th-century prison where Jan de Witt and Cornelius de Witt were murdered in 1672 The Mauritshuis, a Renaissance structure built as a private residence for John Maurice of Nassau, is now an art museum and contains several of the greatest works of REMBRANDT The Peace Palace (Dutch *Vredespaleis*), completed in 1913, has housed the Permanent Court of Arbitration, the Permanent Court of International Justice, and, since 1945, the International Court of Justice Among the other notable buildings are the royal palace, the Groote Kerk, a Gothic church built in the 15th and 16th cent , the Nieuwe Kerk, containing Spinoza's tomb, and the 16th-century city hall The center of the city is the Plein, a square flanked by government buildings

Hague, La (lä äg'), cape, NW France, W of Cherbourg, extending into the English Channel from the Cotentin peninsula

Hague Conferences (hăg), term for the International Peace Conference of 1899 and the Second International Peace Conference of 1907, both proposed by Russia and meeting at The Hague. These are called usually the First Hague Conference and the Second Hague Conference Neither succeeded in the main announced purpose of effecting a reduction in armaments, but a number of declarations and conventions respecting the laws of war were adopted and were later ratified by many states Ratified prohibitions of aerial bombardment and of the use of submarine mines and poison gas proved ineffective, but more heed was given to conventions respecting the rights of neutral shipping (particularly respecting contraband) and the protection of noncombatants A substantial achievement was the founding of the Permanent Court of Arbitration, popularly called the HAGUE TRIBUNAL However, no state ratified the convention providing for an international PRIZE court with compulsory jurisdiction A third conference scheduled for 1916 was canceled because of the First World War In the attempt to formulate certain rules of international law, the Hague Conferences furnished an example to the League of Nations and the United Nations See J B Scott, *The Hague Conventions and Declarations* (3d ed , 1918)

Hague Tribunal, popular name for the Permanent Court of Arbitration established in 1899 by a convention of the First Hague Conference Its headquarters are at The Hague In 1950 there were 48 countries adhering to the convention Each member nation may appoint to the court up to four jurists versed in international law, and in 1950 there were some 130 jurists on the panel. A case is initiated when two or more nations sign a *compromis*, an agreement to submit a dispute to arbitration The disputants may either select arbitrators from the panel to hear their case or they may have two arbitrators choose an umpire before whom the hearing will be held. Tribunals sit at The Hague

unless another place is specified in the *compromis*. The Hague Tribunal is administered by the Bureau of Registry, which has custody of archives, and by the Permanent Council, which is composed of the diplomatic envoys of member nations accredited to The Hague. The tribunal has arbitrated more than 20 international disputes Important cases were the North Atlantic Coast Fisheries Arbitration (1910) between the United States and Great Britain and an arbitration (1904) of part of the VENEZUELA CLAIMS After the First World War the Hague Tribunal lost most of its importance to the WORLD COURT, which was in 1945 superseded by the INTERNATIONAL COURT OF JUSTICE.

Hahn, Otto (ōt'ō hän'), 1879–, German chemist and physicist His important contributions in the field of radioactivity include the discovery of several radioactive substances, the development of methods of separating radioactive particles and of studying chemical problems by the use of radioactive indicators, and the formation of artificial radioactive elements by bombarding uranium and thorium with neutrons He received the 1944 Nobel Prize in Chemistry for splitting the uranium atom (1939) and discovering the possibility of chain reactions The development of the atom bomb was based on this work Hahn was a member of the Kaiser Wilhelm Institute of Chemistry, Berlin, from 1912 and director from 1928 to 1944 He was in Allied custody (1944–46) and on his return to Germany became head of the Kaiser Wilhelm Gesellschaft, Gottingen (later reorganized as the Max Planck Gesellschaft)

Hähnel, Ernst Julius (ĕrnst' yōō'lyōōs hā'nul), 1811–91, German sculptor He executed decorations in reliefs and statues for the museum and the opera house in Dresden. Among his monuments and portrait statues were those of Beethoven, Leibniz, and Frederick Augustus II Hahnel treated ideal subjects in the neoclassic manner, though in portraiture he showed a moderate degree of realism

Hahnemann, Samuel (hä'numun, Ger zä'mōōĕl hä'nūman), 1755–1843, German physician, founder of HOMEOPATHY He expounded his system in *Organon of the Rational Art of Healing* (1810, Eng tr, 1913) He practiced in Leipzig, Cothen, and Paris and, despite opposition, gained a large following See biographies by R W Hobhouse (1933) and Martin Gumpert (1945)

Hahnemann Medical College and Hospital, in Philadelphia, chartered 1848 as the Homeopathic Medical College of Pennsylvania Certain faculty members organized (1866–67) the Hahnemann Medical College of Philadelphia, this was reunited (1869) with the Homeopathic Medical College of Pennsylvania, taking the name of the latter. In 1885 it assumed its present name

Hai (hā'ī), variant of AI 1

Haida Indians (hī'dŭ), North American Indian tribe living on the Queen Charlotte Islands, off British Columbia, and on the southern end of the Prince of Wales Island, off Alaska They speak the Haida language, which comprises its own family (also called Skittagetan, for a supposed relationship, see ATHAPASCAN) In physical and cultural characteristics they are closely related to the Tlingit and the Tsimshian Indians, the three tribes belong to the Pacific Northwest cultural area Before the advent (early 19th cent) of white fur traders, the Haida lived in large cedar plank houses, fished for salmon, and hunted sea mammals Their society was divided into the Raven and Eagle clans, and their customs featured the conspicuous display of wealth (see POTLATCH). They then numbered some 8,000, but by 1880 disease, particularly smallpox and venereal infections, had reduced them to some 2,000 Today most of the Haida are employed in extracting dogfish oil and in canning salmon They also sell carved wooden figures, for which they are especially noted, to tourists and traders See J R Swanton, *Contributions to the Ethnology of the Haida* (1905); Charles Harrison, *Ancient Warriors of the North Pacific* (1925).

Haidar Alī see HYDER ALI

Haidar Pasha, Turkey see HAYDARPASA.

Haifa (hī'fä), seaport (1944 estimated pop 128,800), NW Palestine, on the Mediterranean It is at the foot of Mt Carmel, which creates a bay here The harbor, developed by the British, is one of the biggest of the Mediterranean ports Haifa, the chief city of N Palestine, is growing industrially, it is the terminus of a pipe line from Iraq

Haig, Douglas Haig, 1st **Earl,** 1861–1928, British soldier He saw active service in the Sudan (1898) and South Africa (1899–1902) before commanding the 1st Army in France (1914–15) upon outbreak of the First World War He was made British commander in chief (1915) His generalship was notable for its painstaking qualities rather than its brilliance He preserved the confidence of the British people throughout the war, despite the antagonism between him and Prime Minister Lloyd George. See *Sir Douglas Haig's Despatches (1915–19)* (ed. by J. H. Boraston, 1919); biographies by John Charteris (1929) and Duff Cooper (1936)

Haight, Charles Coolidge (hāt), 1841–1917, American architect. His works include several buildings of the old Columbia Univ. campus on Madison Ave. and the General Theological Seminary in New York city and buildings at Yale Univ He was a leading influence in the adaptation of English collegiate Gothic in America.

Hail or **Hail** (both hā'ĕl, hīl), city (pop. c.15,000), N central Saudi Arabia. It was the capital of the independent emirate of Jebel Shammar, which Ibn Saud conquered in 1921 and added to his domain.

hail, form of precipitation occurring usually over small areas in very hot weather at the beginning of a violent THUNDERSTORM The nucleus of the hailstone is carried up in the turbulent air characteristic of the first part of thunderstorms, it is coated with snow in the cold upper areas, it drops or is carried down, where it is coated with water, and it is again carried up, where it is frozen and coated with snow This process is repeated as long as the violence of the air currents overbalances the weight of the hailstones

Hailar (hī'lär'), Mandarin *Hai-la-ehr,* city (pop. 16,140), capital of Hingan prov, NE China. There is trade in horses and hides The city was formerly called Hulun

Hailes, David Dalrymple, Lord see DALRYMPLE.

Haile Selassie (hī'lē sŭlä'sē, sūlä'sē) [Amharic, =power of the Trinity], 1891–, emperor of Ethiopia, originally named Tafari Makonnen, grandson of Menelik II He was educated at a French mission school As governor of several Ethiopian provinces he held the title RAS. When Lij Yasu, the emperor who succeeded Menelik, became a Mohammedan, Ras Tafari, a Coptic Christian, compelled his deposition and established Menelik's daughter Judith as empress with himself as regent Supporters of Lij Yasu waged guerrilla warfare until 1921, when he was captured In 1928 Ras Tafari was crowned king of Ethiopia, and in 1930, after Judith's death, he became emperor under his present name He attempted internal reforms, especially in Shoa, the central part of Ethiopia, which was most effectively under his control He took great pride in the suppression of slavery When Italy invaded Ethiopia in 1935, he personally led defending troops in the field In May, 1936, when further resistance was hopeless, he fled to British protection, Twice (1936, 1938) he vainly appealed to the League of Nations for effective action against Italy Most of his exile was spent in retirement near Bath, England In 1940, after Italy entered the Second World War, Great Britain flew Haile Selassie to the Anglo-Egyptian Sudan to rally his people In Jan, 1941, he reentered Ethiopia and in May regained his throne at Addis Ababa His main efforts during and after the war were to consolidate his country and to encourage education. See biography by Princess Asfa Yilma (1936)

Hailey, city (pop 1,443, alt 5,342 ft), co seat of Blaine co, S central Idaho, laid out 1881, inc as a village 1903, as a city 1909 It is the headquarters of Sawtooth National Forest, the center of near-by mining, lumbering, stock-raising, and farming activities, and a resort town The Sawtooth Mts lie to the north

Haileybury, town (pop 2,268), E Ont, N of North Bay and on Lake Timiskaming, founded 1903, inc 1905 It is a distributing and residential center for a region of silver, gold, and cobalt mines It has pulp and lumber mills and an airport and is a popular ski resort The town was rebuilt after almost total destruction by fire in 1922

Haileyville, city (pop 1,183), SE Okla, contiguous to HARTSHORNE, settled c 1890

Hainan or **Hai-nan** (hī'nan'), island (11,400 sq mi, pop 2,116,700), off Kwangtung prov, China It is separated from the mainland by Hainan Strait (15 mi wide) and is bordered on the west by the Gulf of Tonkin and on the east by the China Sea Hoihow is the chief port Since the climate is hot and wet, the coastal lowlands yield heavy crops of rice, tobacco, and sugar cane The mountainous inland region is densely forested and rich in minerals Japan held Hainan from 1939 to the end of the Second World War

Hainaut (ĕnō'), province (1,437 sq mi, pop 1,190,543), SW Belgium, bordering in the west on France. Mons is the capital Other important cities are Charleroi and Tournai Drained by the Escaut (Scheldt), the Sambre, the Dender, and the Charleroi-Brussels Canal, the province is partly agricultural, with cattle raising and dairying in the south, but its chief importance is due to the coal mines of the BORINAGE region and to its old industries—textiles in the north and metal manufactures in the south. Hainaut is predominantly French-speaking The county of Hainaut was created in the 9th cent, and in the divisions of the Carolingian empire became a fief of Lotharingia Count Reginar Long-Neck made himself master (10th cent) of the duchy of Lower Lorraine, which continued under his elder son (see LOTHARINGIA) while his younger son inherited Hainaut The widow of Reginar V married (1036) Count Baldwin V of FLANDERS, but at his death (1070) Hainaut and Flanders were again separated. In 1191 Flanders once more passed, through marriage, to the counts of Hainaut. Baldwin VI of Hainaut (as Baldwin IX, count of Flanders) took part in the Fourth Crusade and became (1204) emperor of Constantinople as BALDWIN I. After his death the two counties were ruled by his daughters, Joan and Margaret, and their husbands, but in 1278 they were again separated, Flanders passing to Guy of Dampierre and Hainaut to John of Avesnes, both grandsons of Margaret John of Avesnes was also count of HOLLAND, and the two fiefs were united under rulers who raised them to a position of importance in European affairs in the 14th cent Philippa of Hainaut married Edward III of England and Countess Margaret married Emperor Louis IV In 1433 Philip the Good of Burgundy added Hainaut and Holland to his dominions after overcoming the resistance of his cousin, Countess Jacqueline Hainaut remained under the house of Burgundy until the death (1482) of MARY OF BURGUNDY, when its history became that of the Austrian Netherlands (see NETHERLANDS, AUSTRIAN AND SPANISH) By the treaties of the Pyrenees (1659) and of Nijmegen (1678) parts of Hainaut, including Valenciennes, were permanently annexed to France, they form part of the present NORD dept. Hainaut was formerly spelled Hainault

Haines (hānz), village (pop. 357), SE Alaska, on Chilkoot Inlet of Lynn Canal, SSW of Skagway A fur-trading post was established here in 1867, and later a U S army post was established Fishing and fur farming are carried on, and the town has a good harbor In the Second World War a road, known as the Haines Cutoff, was built to connect with the Alaska Highway at Haines Junction, Yukon territory, providing a short land route to the interior.

Haines City, city (pop 3,890), central Fla, ENE of Tampa and NNW of Lake Kissimmee It is a shipping center for a citrus-fruit area A military institute is here, and at near-by Lake Alfred is an agricultural experiment station

Hainisch, Michael (mī'khāĕl hī'nĭsh), 1858–1940, president of Austria (1920–28), son of Marianne Hainisch, founder of the Austrian feminist movement He was a leading agriculturist and a writer of note Politically acceptable to all majority parties, he was elected first president of the new republic in 1920 and was reelected in 1924 In 1930 he was minister of commerce and communications in the Schober cabinet and in the same year represented Austria at the League of Nations economic conference Throughout his political career Hainisch strongly favored a union of Austria and Germany

Haiphong (hīfŏng'), city (pop c 73,000), Indo-China, main port and naval base of Tonkin on a small island at the confluence of two rivers 55 mi ESE of Hanoi Its exports are rice, corn, zinc, tin, and cotton Haiphong has cement, glass, and tin-smelting plants, rice mills, and brick kilns. It was developed in 1874 as a French naval base

hair, modified skin structure, consisting of a shaft and a root which is expanded into a hair bulb embedded in the dermis of the skin A single hair is a delicate filament growing from the hair follicle, collectively, the term hair applies to all of these filaments which cover the skin Hairs vary in character, e g, in coarseness, length, color, and form, and also in accordance with age, sex, and race Growth of hair continues for varying periods, reaches a resting interval, and is then shed The hair of the scalp passes through this cycle in about four years The eyebrows, the eyelashes, and the hair of the axillary region and other parts of the body have shorter life cycles See also BALDNESS

hairdressing, one of the earliest steps in the development of COSTUME Primitive men plastered their hair with clay and tied into it trophies and badges to signalize their feats and qualities Among women, a band to keep the hair from the eyes was the forerunner of the fillet Much early hairdressing is ceremonial and traditional, as in the feather tufts or stiffened coronet of some savages, the queue of the Chinese, the tonsure, the flowing locks of the maid, and the bound or cut tresses of the wife Dishevelled hair, sprinkled with ashes, has been long a sign of mourning, anointing and adorning the hair has been symbolical of joy From ancient times hair has been dyed, bleached, curled, braided, waxed and oiled, hennaed, powdered with gold or other substances, cut, shaved, mixed with false hair, perfumed, covered with a wig, or adorned with beads, jewels, feathers, ribbons, combs, pins, nets, and flowers, natural and artificial Short hair was often a sign of servitude, as among the Greeks, Celts, and Germans until in the 11th cent the Church forbade long hair to men The extremely high coiffure for women and the elaborate WIG for men were in vogue in the 17th and 18th cent. The French Revolution brought only temporary simplicity, for with the middle of the 19th cent came the huge waterfalls, or chignons, of false hair Methods of modern hairdressing are but variants of the old, to which chemistry and the mechanical arts lend greater efficiency.

hairworm or **horsehair worm,** long, slender, unsegmented roundworm usually included in the phylum Nemathelminthes. The larvae are parasitic, usu-

ally in the body of an aquatic insect larva and later in another insect, such as a beetle or grasshopper. After developing to maturity they escape from the second host into the water, where they live as adults The superstition that the worm developed from a horsehair gave it its name

Haiti (hā'tē), Fr. *Haïti* (āētē'), republic (c 10,700 sq. mi ; 1944 estimated pop. 3,000,000), West Indies, on the western third of the mountainous island of HISPANIOLA The capital is PORT-AU-PRINCE. After its discovery by Columbus in 1492, the region now known as Haiti was ignored by the Spanish and consequently in the 17th cent became a base for English and French buccaneering Gradually French colonists, importing African slaves, began to develop rich sugar plantations on the northern coast (the Plaine-du-Nord about CAP-HAÏTIEN), and finally Spain, unable to support its claim, ceded Haiti (Saint-Domingue as it was then called) to France in 1697 The pattern of settlement took the French south in the 18th cent , and society became stratified into Frenchmen, creoles, freed Negroes, and Negro slaves Politically and socially Haiti was a tinderbox, the spark was the French Revolution After an abortive uprising under Vincent Ogé, the entire structure of Haitian society collapsed The Negroes formed into guerrilla bands under the remarkable leadership of TOUSSAINT L'OUVERTURE During the war between France and England, when the English invaded Haiti in 1793, Toussaint maintained an uneasy alliance with the mulatto André RIGAUD and cooperated with the remnant of French governmental authority In 1795 Spain ceded its part of the island, SANTO DOMINGO, to France, and in 1801 Toussaint conquered it In 1802 Napoleon sent General LECLERC with a huge punitive force to restore French rule, but Leclerc was unable to conquer the interior A peace was patched up, and Toussaint, taken by trickery, died in a French prison But the revolt went on, the French were forced to withdraw, and Haiti's complete independence, proclaimed at GONAÏVES in 1804, was confirmed by the defeat of Gen Marie Louise Ferrand The remaining whites were expelled Jacques DESSALINES, the first Negro emperor, was assassinated, and Haiti was divided between Henri CHRISTOPHE and Alexandre PÉTION, each struggling unsuccessfully to rule the whole nation After their deaths Haiti was unified by J P BOYER, who also (1822–44) brought Santo Domingo under Haitian control The overthrow (1858) of SOULOUQUE by N F GEFFRARD ended the last of the Negro emperor reigns But anarchy persisted, heightened by the struggle of mulatto against Negro, and, slipping backward, Haiti became a country of primitive agricultural economy with heavy international indebtedness The ruinous financial position caused the United States to exercise a customs receivership over the country from 1905 to 1941 In 1915 the Haitian congress was forced to accept an agreement permitting American control, two years later the resident U S naval commander dissolved the Haitian congress and dictated a new constitution Although financial, sanitary, and material progress increased under American control, Haiti and other Latin American nations bitterly protested against violation of sovereignty, and a U S Senate investigating committee found in 1921 that the avowed purpose of preparing the Haitians for reliable self-government had been ignored Continued complaints led in 1930 to recommendation by the Forbes Commission of gradual withdrawal, which was completed in 1934 Since Haiti's preeminence in sugar production was destroyed by the civil strife of the 19th cent and crop diversification was enforced by law after the collapse of the sugar market in 1926, coffee accounts for about 50 percent of exports, followed by cotton, sugar, sisal, bananas, and cacao There is little manufacturing Since the middle of the 19th cent Haiti has been dominated by the mulattoes, who have clung to the French cultural tradition, while the Negroes (about 95 percent of the population) follow Dahomey African cultural patterns with only a smattering of French They speak a patois and practice a more or less communal type of agriculture. Their religion is predominantly Roman Catholic, but African nature gods are still worshiped, and *vodun* (voodoo) rites are prevalent On his small, fertile farm lands, producing a variety of crops, the Negro raises only enough to keep himself well fed and lives in poverty. The security offered by the American occupation caused an unforeseen result—an enormous increase in population Long overcrowded (at present Haiti has a very dense population—c 280 per square mile), Haitians have filtered across the undemarcated boundary into the Dominican Republic Frequent border clashes culminated in 1937 in the bloody massacre of between 10,000 and 15,000 Haitians by Dominican troops See H P Davis, *Black Democracy* (1928), M J Herskovits, *Life in a Haitian Valley* (1937), J G Leyburn, *The Haitian People* (1942), L L. Montague, *Haiti and the United States* (1940).

Hajduki Wielkie, Poland. see CHORZOW.

Hajj Omar (hăj' ō'măr), 1797–1865, Moslem religious leader of Africa. He was chieftain of the large Tukulor domain in Senegal. Bitterly resenting the encroachments of the French, he began in 1855 a holy war against them Faidherbe, the French governor, suffered some early defeats, but in the last phase of the intermittent warfare Hajj Omar was driven north and committed suicide to avoid capture His sons quarreled over his domain until 1890, when it was incorporated into French territory

Hakata see FUKUOKA.

Hakkatan (hă'kutăn, hăkă'tăn) [Heb ,=the small], family returned from the Exile Ezra 8 12

Hakkoz (hă'kŏz) [Heb , =the thistle], the same as Koz

Hakluyt, Richard (hăk'lōōt), 1552?–1616, English geographer He was graduated in 1574 from Oxford, where he later lectured on geography A passionate interest in the history of discovery led him to collect and publish narratives of voyages and travels He was active in promoting English discovery and colonization, especially in North America, and was a member of the London Virginia Company His chief work, called by J A Froude "the prose epic of the English nation," was *The Principal Navigations, Voyages, Traffics, and Discoveries of the English Nation* (3 vols , 1598–1600), an enlargement of a one-volume version (1589) Other publications include *Divers Voyages touching the Discovery of America and the Islands Adjacent* (1582) and an account of the discoveries of Hernando De Soto under the title *Virginia Richly Valued* (1609) Manuscripts left at his death were included by Samuel Purchas in his *Pilgrims* (4 folios, 1625), others are preserved at the Bodleian Library, Oxford The publication of narratives of early explorations has been continued by the Hakluyt Society, founded in 1846 See G B Parks, *Richard Hakluyt and the English Voyages* (1928), E G R Taylor, ed , *The Original Writings & Correspondence of the Two Richard Hakluyts* (1935)

Hakodate (hakō'da'tā), city (1947 pop 211,441), extreme SW Hokkaido, Japan, a port on Tsugaru Strait Opened (1854) to U S ships and a little later to general foreign trade, it is today the chief port of the island and a commercial and industrial center, with ironworks, shipyards, and an extensive fishing industry

Hakon. For rulers of Norway named thus, see HAAKON

Hakone (ha"kō'nā), resort region of mountains, lakes, and hot springs, central Honshu, Japan It is included in Fuji-Hakone National Park, of which the central feature is Fujiyama

Hakupha (hăku'fu), family returned from the Exile. Ezra 2 51, Neh 7 53

Hal (āl), Flemish *Halle* (ha'lu), town (pop 17,421), Brabant prov , Belgium, SSW of Brussels It is a market center and has textile manufactures Its 14th-century Gothic church contains a celebrated miraculous image of the Virgin and is a place of pilgrimage

halacha, see HALAKAH

Halah (hā'lŭ) unidentified place of upper Mesopotamia 2 Kings 17 6, 18 11, 1 Chron 5 26

Halak (hă'-) [Heb ,=smooth], unidentified mountain, near Mt Seir Joshua 11 17, 12 7

halakah or **halacha** (both hala'kha, halakha'), that part of the MIDRASH and the TALMUD which embraces the legal statutes and ordinances of the unwritten commentaries based upon the teachings of the Old Testament It consists of interpretations of the Scriptures and of legal decisions affecting conduct—religious, political, and civil. In contradistinction to the halakah is the haggada, also based upon the Scriptures and the oral traditions, which is the aesthetic and literary element of the Oral Law, illustrating its application through parables, legends, tales, and allegories After the Talmud was finished, both these elements were extracted and amplified

Halbe, Max (maks'hal'bu), 1865-1915, German naturalistic dramatist and novelist, influenced by Ibsen and Hauptmann His most lasting work is the drama *Jugend* (1893, Eng tr , *When Love Is Young*, 1904) Other plays include *Mutter Erde* (1897, Eng tr , *Mother Earth*, 1913–15) and *Haus Rosenhagen* (1901, Eng tr , *The Rosenhagens*, 1910) Two of his novels are *Die Tat des Dietrich Stobäus* [the deed of Dietrich Stobäus] (1910) and *Jo* (1917) *Jahrhundertwende* [the turn of the century] (1935) tells of his life from 1893 to 1914

Halberstadt (hal'bŭrshtat), city (pop 47,652), in the former Prussian province of Saxony, central Germany, SW of Magdeburg It is a railroad center with varied manufactures An episcopal see since 814, it was burned (1179) by HENRY THE LION, after whose fall (1180) the bishopric of Halberstadt was given in temporal fief to the bishops by Emperor Frederick I It was annexed (1648) by Brandenburg. Among its many fine medieval buildings are the Liebfrauenkirche (12th cent) and the cathedral (13th-17th cent , heavily damaged in the Second World War)

Halcyone (hălsī'ŭnē) [Gr ,=kingfisher], in Greek mythology, daughter of Aeolus and wife of Ceÿx (sē'ĭks). When her husband drowned while on his way to consult the oracle of Apollo, Halcyone from grief threw herself into the sea The gods, from compassion, changed the pair into kingfishers or halcyons, and Zeus forbade the winds to blow seven days before and seven days after the winter solstice, the breeding season of the halcyon. The expression "halcyon days" (hăl'sēun) comes from this myth and figuratively means a time of peace and tranquillity. Another legend says that they were changed to birds because they called themselves Zeus and Hera

Haldane, John Scott (hôl'dān), 1860–1936, English scientist He served as government adviser on public health, and he made important studies in respiration and in gasometry of the blood and contributed to industrial hygiene by his researches in factory ventilation and problems of health and safety in mining He founded and was joint editor of the *Journal of Hygiene*. His works include *New Physiology* (1919), *Respiration* (1922), *Gases and Liquids* (1928), *The Sciences and Philosophy* (1929), and *Materialism* (1932) See study by A H. Simpson (1938) His son, **John Burdon Sanderson Haldane,** 1892–, professor of biometry at University College, London, from 1937, is known for his work in the application of mathematics to biology and for his graphic expositions of science for the layman His works include *Animal Biology* (with J S Huxley, 1927), *Enzymes* (1930), *Marxist Philosophy and the Sciences* (1939), *Adventures of a Biologist* (1940), *New Paths in Genetics* (1941), *Science Advances* (1947), and *What Is Life?* (1947)

Haldane of Cloan, Richard Burdon Haldane, 1st **Viscount,** 1856–1928, British statesman and philosophical writer He entered the House of Commons as a Liberal (1885) As Campbell-Bannerman's war secretary (1905–12) he effected drastic army reforms, creating the territorial forces and an imperial general staff On a diplomatic mission to Germany (1912), he rejected a proposal of British neutrality in any war into which Germany might be drawn His tenure of the office as lord chancellor (1912–15) ended after outbreak of the First World War, when popular clamor mistakenly attacked him as pro-German In Ramsay MacDonald's first short Labour ministry (1924) he was again lord chancellor He was first chancellor of the Univ of Bristol and was elected lord rector of Edinburgh His books include *Pathway to Reality* (1903), *Reign of Relativity* (1921), *The Philosophy of Humanism* (1922), *Selected Addresses and Essays* (1928), and an autobiography (1929) See biography by Frederick Maurice (2 vols , 1937–39)

Haldeman, Samuel Stehman (hôl'dumŭn), 1812–80, American naturalist and philologist, b. Locust Grove, Pa He was professor of natural history (1851–55) and of comparative philology (1868–80) at the Univ of Pennsylvania He made significant studies of fresh-water mollusks In addition to zoological monographs he wrote a number of works on philology

Halden (hal'dŭn), city (pop 9,149), co seat of Ostfold co , SE Norway, a seaport on the Skagerrak near the Swedish border There are cellulose, wood pulp, paper, and other industries Fredriksten was its fortress, when besieging it Charles XII of Sweden received (1718) his fatal wound Halden was also known as Fredrikshald and Frederikshald

Haldimand, Sir Frederick (hôl'dĭmund), 1718–91, British general and colonial governor of Quebec, b Neuchâtel canton, Switzerland A soldier of fortune in several European armies before joining (1754) the British forces, he commanded a battalion in America in the last of the French and Indian Wars Later he was military governor (1762–64) of Trois Rivières dist in Quebec, commander in chief (1767–73) in Florida, which then extended to the Mississippi, and commander in chief of North America (1773–74) during Thomas Gage's absence in England His patience with the colonists during the episode of the Boston Tea Party helped to prevent hostilities at the time Recalled to England at the opening of the American Revolution because it was considered best to have a person of English birth in chief command, he was sent (1778) to Quebec to replace Guy CARLETON as governor There, aided by his native knowledge of French, he succeeded in keeping the loyalty of the French Canadians when France was aiding the Americans He efficiently organized the defenses of the province, inaugurated a system of canals, and provided admirably for the Loyalist refugees from the revolting colonies In 1784 he returned to England His papers, in the British Museum, have been a leading historical source See biography by J. N. McIlwraith (1904)

Hale, Benjamin, 1797–1863, American educator, b Newburyport, Mass , grad Bowdoin, 1818 He served as tutor at Bowdoin and in 1823 founded and became principal of Gardiner Lyceum, Gardiner, Maine, where he organized practical technical courses which were widely influential He was professor of chemistry and mineralogy at Dartmouth from 1827 to 1835 and was active also as an Episcopal minister In 1836 he became president of Geneva (now Hobart) College at Geneva, N Y. Before his retirement in 1858, Hale liberal-,

ised the curriculum of the college, stabilised its finances, and increased its reputation. See A. D. White, *The Work of Benjamin Hale* (1911).

Hale, Edward Everett, 1822–1909, American author and Unitarian clergyman, b Boston, grad Harvard, 1839. He was the nephew of Edward Everett and the brother of Lucretia P Hale He was pastor of a church in Worcester, Mass (1842–56), and of one in Boston (1856–1903) and was widely influential as a reformer and prolific writer of magazine articles From 1903 until his death he was chaplain of the U S Senate His famous short novel, *The Man without a Country*, was published anonymously in the *Atlantic Monthly* in 1863 Of his voluminous writings the best are *Franklin in France* (1887–88), the autobiographical *New England Boyhood* (1893), and *Memories of a Hundred Years* (1902) See E E Hale, Jr, *The Life and Letters of Edward Everett Hale* (1917)

Hale, Eugene, 1836–1918, American statesman, b Turner, Maine He practiced law at Ellsworth, Maine, and was (1867–68) a member of the Maine legislature. He served (1869–79) in the U S. House of Representatives and gained leadership in naval affairs He allied himself with the regular Republicans and became closely united with James G Blaine Hale declined appointments as Postmaster General by President U S Grant and as Secretary of the Navy by President Rutherford B Hayes He was (1881–1911) in the U S Senate, where he upheld the protective tariff and opposed many measures demanded by progressives He also opposed American expansion during and after the Spanish-American War, even losing interest in naval development at this time After 1900 he was attacked for lack of sympathy with Theodore Roosevelt His son, **Frederick Hale,** 1874–, b Detroit, grad Harvard, 1898, was (1917–41) Senator from Maine, and he too showed special interest in naval affairs

Hale, George Ellery, 1868–1938, American astronomer, b Chicago, grad Massachusetts Institute of Technology, 1890 He is noted as the organizer of three great observatories, Mt Palomar Observatory, Yerkes Observatory (which he directed, 1895–1905), and Mt Wilson Observatory (director, 1904–23) The inventor of the spectrohelograph, he was an outstanding authority on solar vortaces and magnetic fields From 1895 he was joint editor of the *Astrophysical Journal* Besides technical monographs he wrote *Depths of the Universe* (1924), *Beyond the Milky Way* (1926), and *Signals from the Stars* (1932)

Hale, Horatio Emmons, 1817–96, American ethnologist, b. Newport, N H ; son of Sarah Josepha Hale He served as ethnologist on the Charles Wilkes exploring expedition (1838–42) and wrote Vol VI, entitled *Ethnography and Philology*, of the expedition's reports He also wrote *An International Idiom* (1890), a study of the Chinook jargon, and many significant papers on American Indian languages

Hale, John Parker, 1806–73, American politician, b Rochester, N H , grad Bowdoin College, 1827 He practiced law at Dover, N H , and had remarkable success with juries He was U S. district attorney (1834–41) and served in the House of Representatives (1843–45) His refusal to vote for the annexation of Texas caused his expulsion from the Democratic party He then (1847–53) served in the Senate as an independent and was nominated (1852) for President by the Free-Soil party Again (1855–64) in the Senate, he was accused of questionable practices as naval committee chairman, and he was defeated (1864) for reelection He was minister to Spain (1865–69)

Hale, Lucretia Peabody, 1820–1900, American author, b Boston, sister of Edward Everett Hale She is chiefly remembered for her amusing stories for children, *The Peterkin Papers* (1880) and *The Last of the Peterkins* (1886)

Hale, Sir Matthew, 1609–76, English jurist He was successively a judge in the Court of Common Pleas (1654), chief baron of the Exchequer (1660), and chief justice of the Court of King's Bench (1671), and he served under both Oliver Cromwell and the crown. Hale is best known for his scholarly works on criminal law, including *Pleas of the Crown* (1678) and *History of the Pleas of the Crown* (1685). His *History of the Common Law of England* (1713) was a pioneer work

Hale, Nathan, 1755–76, American patriot in the American Revolution, b. Coventry, Conn , grad Yale, 1773. A young schoolteacher when the Revolution broke out, he was commissioned an officer in the Connecticut militia, served in the siege of Boston, then went to take part in operations in New York He volunteered for the dangerous mission of getting information about the British forces on Long Island, where he went in the easy disguise of a schoolmaster He was discovered, captured (possibly by Robert Rogers), and hanged without trial He is remembered especially for the statement he is said to have uttered on the gallows, "I only regret that I have but one life to lose for my country." See biography by H P. Johnston (1914), Morton Pennypacker, *General Washington's Spies on Long Island and in New York* (1939); D. G Seymour, *Documentary Life of Nathan Hale* (privately printed, 1941).

Hale, Nathan, 1784–1863, American journalist; nephew of Nathan Hale, patriot and spy He owned and published (1814–54) the Boston *Daily Advertiser*, the first successful daily in New England, and used in it the then new device of the editorial He also organized and was president (1831–49) of the Boston and Worcester RR. Edward Everett Hale was his son.

Hale, Philip, 1854–1934, American music critic, b. Norwich, Vt , grad Yale, 1876, studied music in Germany and France. He was music critic of the Boston *Post* (1890–91), Boston *Journal* (1891–1903), and Boston *Herald* (1903–34) and annotated the program notes of the Boston Symphony Orchestra from 1901 until his death A collection of his writings, *Boston Symphony Programme Notes*, was published in 1935

Hale, Philip Leslie, 1865–1931, American painter, art critic, and teacher, b Boston He taught for 30 years at the Museum of Fine Arts, Boston Two of his paintings are *The Girl with the Muff* and *Madonna of the Porcelain Tub*. He was the son of Edward Everett Hale His *Jan Vermeer* was published in 1913

Hale, Sarah Josepha (Buell), 1788–1879, American author and editor, b near Newport, N H Left a widow in 1822 with five children to support, she became editor in 1828 of the *Ladies' Magazine*, Boston, and in 1837 of *Godey's Lady's Book*, Philadelphia, where she remained over 40 years The illustrated *Lady's Book* strongly influenced fashions and manners Although Mrs Hale was no feminist, she constantly urged the higher education of women She also advocated a national Thanksgiving holiday Her authorship of "Mary Had a Little Lamb," published in her *Poems for Our Children* (1830), has been disputed Horatio Emmons Hale was her son See Ruth Finley, *The Lady of Godey's* (1931)

Hale, William Bayard, 1869–1924, American journalist, b Richmond, Ind , educated at Boston and Harvard universities He left the ministry c 1900 to become a star feature writer and special correspondent He wrote an official biography of Woodrow Wilson (1912), helped in the publicity campaign to elect him, and gave a report as confidential agent in Mexico (1913) which probably influenced the President against Huerta In 1915 Hale turned propaganda adviser for Germany until the United States entered the war He was denounced and ostracized in 1918 and lived in Europe the rest of his life See biography of Woodrow Wilson by Ray Stannard Baker, Vols III-IV (1931), G S Viereck, *Spreading Germs of Hate* (1930)

Hale, William Gardner, 1849–1928, American classical scholar, b Savannah, Ga , grad Harvard, 1870 He was professor of Latin in Cornell (1880–92) and in the Univ of Chicago (1892–1919) He was a leader in the foundation of the American School of Classical Studies at Rome Classical syntax was his chief interest, and he was one of the few scholars who applied linguistic methods to its study.

Haleakala (hä″lää″kalä′), mountain, 10,032 ft high, on E Maui, T H. In Hawaii National Park, it is the largest inactive crater in the world, 2,000 ft deep, 7 5 mi long, 2 4 mi wide, and 20 mi in circumference Rare silver sword plants are found.

Haleb, Syria: see Aleppo.

Haledon (hāl′dun), borough (pop 5,303), NE N J., NW of Paterson, inc 1908

Hales, Alexander of. see Alexander of Hales

Hales, John, 1584–1656, English clergyman and scholar, often alluded to as the Ever-Memorable He won distinction by his lectures on Greek at Oxford, his preaching, and his writings From 1613 to 1649 he held a fellowship at Eton College He attended the Synod of Dort (1618–19) His attitude of religious tolerance found expression in *Schism and Schismatics*, written c 1636 and published anonymously in 1642 Archbishop Laud in 1639 made Hales a canon of Windsor, but he was ejected from that post in 1642 and from his Eton fellowship in 1649 His remaining years, under the Commonwealth, were spent in obscurity and poverty In the *Golden Remains of the Ever Memorable Mr John Hales* (1659), with a preface by John Pearson, are included a number of his writings

Hales, Stephen, 1677–1761, English clergyman and physiologist From 1709 he was perpetual curate of Teddington His experimental studies in both animal and plant physiology were outstanding contributions to the progress of science In his investigations of circulation he made the first measurements of blood pressure by inserting a tube in a horse's artery Plant physiology was given impetus by his work on transpiration, root pressure, circulation of sap, and the relationship between green plants and air His mechanical inventions included apparatus for ventilating buildings Some of his studies are described in his *Vegetable Staticks* (1727), *Haemostaticks* (1733), and *A Description of Ventilators* (1743).

Halévy, Jacques François Fromental Élie (ählā′ frāswä′ frômätäl′ älē′ älāvē′), 1799–1862, French operatic composer. He studied with Cherubini at the Paris Conservatoire, where he became a professor in 1827. Bizet, who later became his son-in-law, was one of his pupils. His one big success was *La Juive* (1835), although others, such as the comic opera *L'Eclair* (1835) and *La Reine de Chypre* (1841), enjoyed popularity in their time. His style today seems unpolished and repetitious, but at his best he reveals a fine melodic gift and a sense for dramatic effectiveness.

Halévy, Joseph (ähōzĕf′), 1827–1908, Jewish-French Orientalist and biblical critic, b Adrianople, Turkey. He made a report on the Falashas, deciphered Sabean and Himyaritic inscriptions, and argued that the Sumerians never existed at all, their literature being merely Babylonian literature in a secret writing.

Halevy, Judah: see Judah ha-Levi.

Halévy, Ludovic (lüdôvēk′ älāvē′), 1834–1908, French librettist. His first great success was the libretto, with Henri Crémieux, to *Orphée aux enfers* (1858) by Jacques Offenbach. Later, collaborating with Henri Meilhac, Halévy wrote the libretto to Bizet's *Carmen* (1875).

Haleyville, city (pop 2,427), NW Ala., S of Florence near William B. Bankhead National Forest.

half-timber house, type of construction of the Middle Ages in N Europe, used chiefly for dwellings Some French examples date from the 12th cent , and in the 13th cent the medium had reached high development In this form of construction the skeleton frame of the building, with all supporting and bracing members, was of timber, usually oak The outside enclosing walls were of wattle and daub, plaster, or brick, the material being used as a filling between the exposed structural timbers The work of the 14th, 15th, and 16th cent gave increasing decorative emphasis to the timbers, which had richly carved Gothic or Renaissance ornament Many cottages, farmhouses, and manors in England used half-timber, but in France and Germany it was chiefly employed for town dwellings In these three countries many fine examples remain, particularly in the Rhine towns of Germany and at Rouen, Lisieux, and Caen in France. Half-timber, used in some of the 17th-century dwellings of the American colonists, proved unsuited to the climate and was soon abandoned for more weather-tight methods Primarily it was an honest and organic constructive method, and the many modern attempts to use it for its purely decorative value are often meretricious See A W. Jackson, *The Half-Timber House* (1912)

half tone· see photoengraving and printing.

Half-Way Covenant, a doctrinal decision of the Congregational churches in New England The first generation of Congregationalists had decided that only adults with personal experience of conversion were eligible to full membership but that children shared in the covenant of their parents and therefore should be admitted to all the privileges of the church except the Lord's Supper The question arose (c 1650) whether this privilege should be extended to the children of these children, even though the parents of the second generation may have confessed no experience which brought them into full communion It was proposed (1657) and adopted (1662) by a church synod that the privileges should be extended The measure, to which the nickname Half-Way Covenant became attached, provoked much controversy and was never adopted by all the churches Portions of many congregations seceded to form new settlements, among these Newark, N J

Halhul (hāl′hŭl), mountain town, S Palestine, just N of Hebron Joshua 15 58

Hali (hā′lī) [Heb ,=necklace], unidentified town, N Palestine Joshua 19 25

Haliartus (hălēär′tus), locality in Boeotia, NW of Thebes Here Lysander fell in battle leading the Spartans against the Boeotians in 395 B C

Haliburton, Thomas Chandler (hă′lĭbûrtun), pseud. **Sam Slick,** 1796–1865, Canadian jurist and author, b Windsor, N S His *Historical and Statistical Account of Nova Scotia* (1829) was the first history of that province A judge of the court of common pleas in 1829 and a judge of the provincial supreme court in 1841, he retired in 1856 His popular series of the sayings and doings of Sam Slick had begun in 1835 in the newspaper the *Nova Scotian* and were collected in *The Clockmaker* (1836) He continued writing about his Yankee character, a medium for humor and satire, in *The Attaché, or, Sam Slick in England* (4 vols , 1843–44) and *Sam Slick's Wise Saws and Modern Instances* (1853) Haliburton lived in England after 1856 and was a member of the House of Commons from 1859 until his death He wrote several other humorous or historical works See biographies by V. L. O Chittick (1924) and J D Logan (1925)

halibut, important food fish, largest of the flatfish, belonging to the genus *Hyppoglossus* Two species are known, one in the N Atlantic and one in the N Pacific A voracious eater of smaller fish, the halibut has a large mouth and strong, sharp teeth Females sometimes weigh 500 lb or more, the male rarely more than 50 lb The flesh of the small fish is most palatable. Halibut-liver oil is rich in vitamins A and D.

Halicarnassus (hă'lĭkärnă'sŭs), ancient city of Caria, SW Asia Minor, on the Ceramic Gulf (now the Gulf of Kos) and on the site of the modern city of Bodrum, Turkey. Halicarnassus was a Greek foundation but there were Carian inhabitants, and except for a brief period in the 5th cent B C., the city was not intimately concerned with Greek affairs A dynasty of Carian kings in the 4th cent. was made famous by MAUSOLUS, whose wife built him a magnificent tomb (see MAUSOLEUM), considered one of the SEVEN WONDERS OF THE WORLD. Alexander the Great partly destroyed the city by fire It was the birthplace of Herodotus and of Dionysius of Halicarnassus

Halicz, Ukrainian SSR: see GALICH.

Halide Edib (hälē'dē ă'dēp), 1885?–, Turkish feminist and writer, grad Constantinople College for Women, 1901 She became an enthusiastic supporter of the nationalist cause, escaping from British surveillance in Constantinople to Angora and serving there as soldier and correspondent. Mustapha Kemal (Ataturk) appointed her minister of education in charge of reorganizing the schools of Syria Having divorced her first husband, in 1917 she married Dr Adnan Bey, speaker of the national assembly at Angora When Mustapha Kemal established the dictatorship, Halide Edib and her husband went into voluntary exile for five years in protest At that time she wrote two autobiographical books, *Memoirs* (Eng tr, 1926) and *The Turkish Ordeal* (Eng tr, 1928) She was already well known as a novelist in Turkey, her *Shirt of Flame* was translated into English in 1924 In 1928 she lectured at the Williamstown (Mass) Institute of Politics, and in 1931 she returned to the United States to lecture at Barnard College and elsewhere Her *Turkey Faces West* appeared in English in 1930

Haliden Hill (hăl'ĭdĕn), Northumberland, England, near Berwick, overlooking the Tweed Edward III defeated the Scots here on July 19, 1333

Halifax, Charles Montagu, earl of (hă'lĭfăks, hă'lĭf-), 1661–1715, English statesman He and Matthew Prior were co-authors of a parody of *The Hind and the Panther* of John Dryden entitled *The Town and the Country Mouse* (1687) As lord of the treasury Halifax persuaded the House of Commons (1692) to negotiate a huge loan, thus establishing the British national debt In 1694 he adopted William Paterson's proposal to found the Bank of England and was appointed chancellor of the exchequer. The following year he designated Isaac Newton as warden of the mint to effect a recoinage (the cost of which was met by a window tax) and issued the first exchequer bills He succeeded Godolphin as prime minister (1697–99) and was twice impeached for breach of trust (1701, 1703) but not convicted He was appointed first lord of the treasury in 1714

Halifax, Edward Frederick Lindley Wood, 1st **earl of,** 1881–, British statesman He entered the House of Commons (1910) as a Conservative and became colonial undersecretary (1921) and president of the Board of Education (1924) and of the Board of Agriculture (1924–25) As governor general of India (1926–31), he was confronted with the boycott of the Simon parliamentary commission by the Indian extremists, whom he sought to conciliate Created Baron Irwin in 1926, he succeeded his father as Viscount Halifax in 1934 and was created 1st earl of Halifax in 1944 He became leader of the House of Lords in 1935, in which year he also served as secretary of state for war Halifax was appointed foreign secretary in 1938, upon the resignation of Anthony Eden, and played an important part in the negotiations with Germany that led to the MUNICH PACT (Sept, 1938), he was attacked by his opponents as an advocate of appeasement Early in 1939 he supported Prime Minister Neville Chamberlain in his assertion of British-French solidarity in Feb, 1939 In 1940 he was succeeded as foreign minister by Anthony Eden, and from 1941 to 1946 he was ambassador to the United States He wrote *John Keble* (1932), his speeches are collected as *Indian Problems* (1932), *Speeches on Foreign Policy* (1940), and *American Speeches* (1947) See Alan C Johnson, *Viscount Halifax* (1941)

Halifax, George Savile, 1st **marquess of,** 1633–95, English statesman A royalist, he aided in the Restoration, became a privy councilor (1672), and, in spite of his anti-Catholic convictions, opposed the bill (1679) to exclude the Catholic duke of York (later James II) from the succession He supported James as king until he saw that the revolution which came in 1688 would be inevitable Then he actively furthered the accession of William III Halifax's most famous pamphlet, *The Character of a Trimmer* (written 1684, pub. 1688), describes the virtues of his middle course in politics and religion See his works (ed. by Walter Raleigh, 1912), H C Foxcroft, *A Character of the Trimmer* (1946)

Halifax, city (pop 70,488; metropolitan pop 91,829), provincial capital, S N S, on a small rocky peninsula reaching out into a fine harbor, inc. 1842. It is the largest city and chief port of Nova Scotia and is the eastern terminus of Canada's two great railway systems and of its transcontinental airway, it is the chief port of the dominion when the St. Lawrence is closed in winter. Halifax was founded in 1749 and named for the earl of Halifax, then president of the Board of Trade and Plantations It was intended from the first as a British naval stronghold comparable to that of France at Louisburg; it played its part as a naval base in the expedition against Louisburg in 1758, against the colonies in the American Revolution, and against the United States in the War of 1812. The Citadel, a massive old fortress, dominates the hill around which the city is built, the more effective modern fortifications are less noticeable During both world wars the port was an important naval and air base, convoy terminal, and embarkation center In 1917 a vessel carrying explosives was rammed in the harbor, causing an explosion which killed c.1,800 people, injured 20,000 others, and destroyed the northern part of the city, in 1945 an explosion at the Royal Canadian Navy Arsenal rocked the city Halifax has a large fishing fleet and exports dried fish and lobsters and other produce Its many industries include shipbuilding, sugar refining, oil refining (at near-by Imperoyal), meat packing, and furniture making DALHOUSIE UNIVERSITY, Nova Scotia Technical College, St Mary's College, and Holy Heart Seminary (theology) are here Places of interest include the Province House (1818); the Government House (1800); St Paul's Church, the oldest Anglican church in Canada, a gift of George II to his new colony, and Point Pleasant Park, on the northwest arm of the harbor The Halifax *Gazette*, founded in 1752 and the first newspaper in Canada, still exists as the *Nova Scotia Royal Gazette* See W C Borrett, *Historic Halifax* (1948), T H Raddall, *Halifax Warden of the North* (2d ed, 1949)

Halifax, county borough (1931 pop 98,115, 1947 estimated pop 95,820), West Riding of Yorkshire, England, on a small tributary of the Calder and SW of Leeds Noteworthy are the Akroyd museum and art gallery, the 18th-century Piece Hall in which piece goods were displayed in the early days of cloth manufacture in Halifax, the 15th-century parish church of St John the Baptist, the Renaissance town hall designed by Sir Charles Barry, and Heath Grammar School (1585) Defoe is supposed to have written part of *Robinson Crusoe* at the Rose and Crown Inn, in Back Lane The borough's industries include the manufacture of carpets, cotton, wool, and worsted goods, machinery, and chemicals

Halifax 1 Town (pop 374), co seat of Halifax co, N N C on the Roanoke river and NE of Raleigh, settled c 1750 It is the site of the first constitutional convention (1776) of North Carolina, several 18th-century buildings remain The area grows and processes peanuts and cotton **2** Town (pop 536), S Va, on the Banister river near the N C boundary, inc 1875. The courthouse of Halifax co is here

Hall, Asaph (ā'sŭf), 1829–1907, American astronomer, b Goshen, Conn After special studies at the Univ of Michigan he became an assistant in the astronomical observatory of Harvard in 1857 In 1862 he joined the staff of the U S Naval Observatory at Washington, D C, was professor of mathematics there from 1863 to 1891, and was a member of many government expeditions From 1895 to 1901 he was professor of astronomy at Harvard He is noted for the discovery (1877) of the two satellites of Mars See biography by G. W Hill (1908).

Hall, Basil, 1788–1844, British naval officer and traveler. In the service from 1802 to 1823, he commanded vessels on scientific assignments and voyages of exploration and wrote accounts of them in *Fragments of Voyages and Travels* (1831–33) in three series, each series in three volumes, in the *Account of a Voyage of Discovery to the West Coast of Corea* (1818), and in his *Journal Written on the Coasts of Chile, Peru, and Mexico* (2 vols, 1823). After leaving the navy he traveled in the United States, his *Travels in North America* (3 vols, 1829) forming a valuable description of America The letters of his wife Margaret Hunter Hall, during this period were printed in 1931 under the title *The Aristocratic Journey*

Hall, Charles Francis, 1821–71, American arctic explorer, b Rochester, N H He became interested in the many search expeditions for Sir John Franklin's party. With Eskimo companions he explored (1860–62) the southeast coast of Baffin Island, finding traces of Sir Martin Frobisher's party but none of Franklin's His *Arctic Researches and Life among the Esquimaux* (1864) is a narrative of this journey On his second arctic expedition (1864–69) he found traces of the fate of Franklin's party on Boothia Peninsula and King William Island and in his searching added much to the geographical knowledge of the whole area. In 1871 he was placed in command of a government expedition to the North Pole. In the *Polaris* his party went northward in the passages between Greenland and Ellesmere Island to the Arctic Ocean and achieved a new northern record of 82° 11'. Hall died of apoplexy at the party's wintering harbor.

Hall, Charles Martin, 1863–1914, American chemist, b Thompson, Ohio, grad Oberlin (B A, 1885, M A, 1893) In 1886 he discovered the electrolytic process for the preparation of ALUMINUM which made possible its large-scale production. His manufacturing company became the Aluminum Company of America. Hall made a large bequest to Oberlin.

Hall, Edward, d 1547, English chronicler He wrote *The Union of the Noble and Ilustre Famelies of Lancastre and York* (1542), usually called *Hall's Chronicle*. A glorification of the Tudors, it is interesting chiefly for the light it sheds on social life early in the reign of Henry VIII and for the use Shakspere made of it in his historical plays

Hall, Edwin Herbert, 1855–1938, American physicist, b Gorham, Maine, grad Bowdoin (B A, 1875) He taught at Harvard from 1881 (professor of physics, 1895–1921) Hall wrote textbooks and manuals which remolded the teaching of secondary school physics and did important work in thermodynamics In 1879 he discovered a phenomenon known as the Hall effect, a deflection of the lines of flow of an electric current passing through a metal conductor when it is placed in a magnetic field He also made important contributions to the theory of thermoelectric action and thermal conduction in metals, to knowledge of electromagnetic and thermomagnetic effects in soft iron, and to other related fields of study His works include a number of texts in physics and the *Dual Theory of Conduction in Metals* (1938)

Hall, Granville Stanley, 1846–1924, American psychologist and educator, b Ashfield, Mass, grad Williams, 1867 G Stanley Hall taught at Antioch and at Harvard, studied experimental psychology in Germany, and in 1882 organized at Johns Hopkins a psychological laboratory, which rapidly took a leading position in the field He founded (1887) the *American Journal of Psychology* and was one of the organizers (1891) of the American Psychological Association. As first president (1889–1920) of Clark Univ, he raised it to high rank for its courses in education. Among his works are *The Contents of Children's Minds on Entering School* (1894), which inaugurated the child-study movement in the United States; *Adolescence* (1904), *Educational Problems* (1911), *Jesus the Christ, in the Light of Psychology* (1917), and his autobiography (1923) See biographies by L. N Wilson (1914), E L Thorndike (1928), and Lorine Pruette (1926)

Hall, James, 1793–1868, American author, jurist, and banker, b Philadelphia After fighting in the War of 1812, he settled in the frontier state of Illinois Here he was a circuit judge and state treasurer and established the first literary periodical W of Ohio, the *Illinois Monthly Magazine* (1830–32) He continued it (1833–36) as the *Western Monthly Magazine* in Cincinnati when he became a banker there Among his many writings are vivid first-hand accounts of the Middle West frontier—the half-romantic *Legends of the West* (1832) and *Sketches of History, Life, and Manners in the West* (2 vols, 1834–35) He also collaborated with T L McKenney in the illustrated *History of the Indian Tribes of North America* (3 vols, 1836–44) See biography by John T Flanagan (1941).

Hall, James, 1811–98, American geologist, b Hingham, Mass, grad Rensselaer School (later Rensselaer Polytechnic Institute), 1832 An authority on stratigraphy and invertebrate paleontology, he joined the New York state geological survey in 1836 and in 1893 became state geologist for New York He wrote *The Geology of New York* (1843) and *New York State Natural History Survey* (1847–94), a monumental report on the paleontology of the state, his work formed the basis for the later geological histories of North America He also served, briefly, as state geologist for Iowa and Wisconsin and was director of the New York State Museum at Albany (1866–94) See J M Clarke, *James Hall of Albany* (1921)

Hall, Joseph, 1574–1656, English prelate and author Educated at Emmanuel College, Cambridge, he was bishop of Exeter, 1627–41, and of Norwich, 1641–47 He was noted for his satires, especially the verse *Virgidemiarum* (1597–98), the prose *Mundus Alter et Idem* (1605, ed by Huntingdon Brown, 1937), and *Characters of Virtues and Vices* (1608), for his devotional *Meditations and Vows* (1605), and for his writings on the bitter church controversy of his time (*Episcopacy by Divine Right Asserted*, 1640, and others) He was imprisoned, then released, but his living was confiscated He described this period in *Hard Measure* (1647)

Hall, Lyman, 1724–90, American Revolutionary patriot, signer of the Declaration of Independence, b Wallingford, Conn, grad Yale, 1747. He was a Congregational minister for some time before practicing medicine. Hall moved to Georgia, became a political leader, and was sent (1775) to the Continental Congress as a delegate from St John's Parish before the colony sent any official delegation. Hall served until 1780, when he returned to Georgia He became governor in 1783 It was at his suggestion that Georgia chartered a state university in 1785

Hall, Marshall, 1790–1857, English physician and physiologist, M.D. Univ of Edinburgh, 1812 He practiced medicine in Nottingham and in London He was opposed to bloodletting The Hall method of artificial respiration was devised by him. As a

result of his experiments with animals he advanced the theory of reflex action in a paper before the Royal Society (1833), despite some opposition the theory was later universally accepted. His works also include *The Diagnosis of Diseases* (1817) and *Memoirs on the Nervous System* (1837).

Hall, Robert, 1764–1831, English Baptist minister, considered the foremost pulpit orator of his time His celebrated sermon, "On the Death of the Princess Charlotte," was delivered (1817) at Leicester. His works include *Modern Infidelity Considered with Respect to Its Influence on Society* (1800)

Hall, Samuel Read, 1795–1877, American educator and clergyman, b Croydon, N H After teaching in Rumford, Maine, and Fitchburg, Mass , he founded (1823) at Concord, Vt , a training school for teachers, one of the first in the United States He later became principal of the teachers' seminary at Philips Academy (1830–37), of Holmes Plymouth Academy (1837–40), and of Craftsbury Academy, to which he added a teachers' training department (1840–46) From 1846 to 1875 he held pastorates at Brownington and at Granby, Vt He wrote numerous textbooks, and his famous *Lectures on School-Keeping* (1829) were republished in 1929, with a biography of Hall and a bibliography of his works by A D Wright and G. E Gardner.

Hall, Walter Henry, 1862–1935, American organist and choral conductor, b England Coming to the United States in 1883, he played in various churches and in 1893 founded the Brooklyn Oratorio Society In 1909 he joined the faculty of Columbia Univ , where he was professor of choral and church music from 1913 to 1930

Hall, Winfield Scott, 1861–1942, American physiologist and educator, b Batavia, Ill , M D Northwestern Univ. (1888) He was professor of physiology at Northwestern Univ from 1895 to 1919. His many writings, largely for lay readers, deal with physiology and sex hygiene.

Hall, Austria. see Solbad Hall in Tirol.

Hall, Wurttemberg. see Schwäbisch Hall

hall, a communicating passageway, in medieval buildings the large and high main room. In the primitive feudal castle of N Europe it was the single apartment, and in it lord and retainers lounged, ate, and slept From the hearth in its center the smoke rose to an outlet in the roof At one end was the raised dais reserved for the master and those of his own rank With developing amenities extra spaces were added for cooking and sleeping, and the hall advanced beyond its early rude and unfinished appearance In English manor houses of the 14th and 15th cent the characteristic great hall was covered by a fine open-timber roof, heated by one or more huge fireplaces, and lighted with lofty windows often arranged in deep, projecting bays Westminster Hall, part of the ancient royal palace commenced in the 11th cent. and rebuilt in the 14th, was the most splendid By the 17th cent , with the addition of drawing room, library and bedrooms, the hall of the English house was no longer of great size and dominance The English colleges of the Middle Ages and Renaissance also had halls or commons, chiefly for dining, which were architecturally similar to the baronial examples Some were covered with fine fan vaults, others with timber roofs as at Christ Church, Oxford, perhaps the most splendid hall next to Westminster The various guilds of N Europe had their halls, especially impressive in Flanders, e g , the cloth halls at Bruges, Brussels, and Ypres In Italy communal independence produced the remarkable series of local civic halls, often with imposing towers, as at Siena and Florence The word *Hall* came to be used in the title of many great English houses (Haddon Hall) and similarly in that of some Southern estates in the American colonies. See J. A. Gotch *Growth of the English House* (1909).

Hall, Fort, trading post, SE Idaho, on the Snake river and not far from the present Pocatello It was built by Nathaniel J Wyeth in 1834, sold by him to the Hudson's Bay Company in 1836, and occupied by that company until about 1856 It was a main stopping point on the Oregon Trail W of Fort Bridger. Soldiers campaigning against the Indians were quartered here in the '50s and early '60s The ruins were destroyed in the floods of 1862 and 1864 See Jennie B Brown, *Fort Hall on the Oregon Trail* (1932)

Hallam, Arthur Henry (hăl'ŭm), 1811–33, English poet and essayist, son of Henry Hallam His early death inspired his close friend Alfred Tennyson to write *In Memoriam*

Hallam, Henry, 1777–1859, English historian Educated at Eton and Christ's Church, Oxford, he was an active barrister until 1812, when he inherited large properties, and was given the sinecure commissionership of stamps The historical works he thereafter wrote reveal his conservative Whig viewpoint and his interest in legal and institutional history, but also show an accuracy and a knowledge of original sources unequaled before his day. His works include *A View of the State of Europe during the Middle Ages* (2 vols , 1818) and *The Constitutional History of England from the Accession of Henry VII to the Death of George II* (2 vols., 1827).

Hallam, Lewis, d. 1754, Anglo-American actor and manager. He arrived from England with his company in 1752 and opened at Williamsburg, Va., in Shakspere's *Merchant of Venice* The next year he built a theater in New York, where he presented Elizabethan and Restoration dramas, farces, and operettas. In 1754 his company opened in Philadelphia, against vigorous opposition, with Rowe's *Fair Penitent.* He toured the South and then went to Jamaica; here he died, and his organization disbanded. The performances of his company began the history of the theater in the United States His son, **Lewis Hallam, Jr.,** c 1740–1808, was also an actor and manager He appeared in his father's company and in the American Company, formed in 1758 by his mother and David Douglass, her second husband He was excellent in comedy, appeared in tragedy, and in 1767 played in Thomas Godfrey's *Prince of Parthia,* the first play written by an American and produced on the American stage by a professional company.

Halland, Swed *Hallands län* (hä'lănts lĕn'), county (1,902 sq. mi , pop 155,257), SW Sweden, on the Kattegat It is coextensive with the historic province of Halland, conquered from Denmark by Charles X of Sweden in 1658 The county seat is Halmstad

Hallandale, town (pop 1,827), SE Fla , on the Atlantic coast N of Miami, inc 1927

Hallé, Sir Charles (hă'lē), 1819–95, German-English conductor and pianist, originally named Karl Halle As a young pianist in Paris he knew Chopin, Liszt, and Berlioz During the Revolution of 1848 he moved to England There in 1857 he founded the Hallé Orchestra in Manchester He was knighted in 1888 He conducted many music festivals and was a noted educator At the founding (1893) of the Royal Manchester College of Music, he became principal See the partly autobiographical *Life and Letters of Sir Charles Hallé* (ed by C E Hallé and Marie Hallé, 1896)

Halle (hä'lŭ), city (pop 222,505), in the former Prussian province of Saxony, central Germany, on the Saale river and NW of Leipzig After the Second World War, which it survived without appreciable damage, Halle became the capital of the newly founded state of Saxony-Anhalt, under Russian military occupation Mentioned in the 9th cent , it later passed under the archbishops of Magdeburg, with whom the townspeople were frequently at war, accepted the Reformation (1544), and was annexed to Brandenburg in 1648 The famous Univ of Halle was founded in 1694, and in 1817 it absorbed the Univ of Wittenberg Here, in 1695, A H Francke founded a school for paupers, first of the Francke Institutes The first Bible Society was founded at Halle in 1710 Among the finest buildings of Halle are the Gothic Red Tower and Marienkirche [church of Our Lady], both on the medieval market place Handel was born in Halle Near the city are important salt and potash mines and saline springs

Halleck, Fitz-Greene (hăl'ĭk), 1790–1867, American poet and satirist, b Guilford, Conn He was joint author, with Joseph Rodman Drake, of the humorous "Croaker Papers," most of which were printed in the New York *Evening Post* in 1819, and wrote a long satire, *Fanny* (1819), in the style of Byron's *Beppo* His poem "Marco Bozzaris," popular as a recitation, and his elegy on the death of Drake were the best known of his graceful verses For many years he was personal secretary to John Jacob Astor See biographies by J G Wilson (1869) and N F. Adkins (1930)

Halleck, Henry Wager, 1815–72, Union general in the Civil War, b Oneida co , N Y , grad West Point, 1839 He entered the Corps of Engineers and became an expert on fortifications, his *Elements of Military Art and Science* (1846) was influential in the Civil War In the Mexican War he served in California, holding various positions in the military government there After the war he helped frame the new state's constitution Halleck resigned from the army in 1853 and entered the leading law firm of the state He compiled *A Collection of Mining Laws of Spain and Mexico* (1859) and wrote a treatise on international law (1861). In the Civil War he was made a major general in the regular army (Aug , 1861) and was sent to succeed J C Frémont in command of the Dept of the Missouri In March, 1862, the departments of the Ohio and Kansas were added to his command. Although he was an able organizer, the prestige given him by the successes of U S Grant, D C. Buell, S R Curtis, and John Pope—all under Halleck's command—was unwarranted. After Shiloh (April) he took the field himself and advanced on Corinth, which Beauregard abandoned in May In July, 1862, he was appointed general in chief with the understanding that he was to remain in Washington as military adviser to the President and the Secretary of War. His position, between the politicians and the generals, was not a happy one, and he was grateful when, upon Grant's being given supreme command in March, 1864, he was demoted to chief of staff He remained in the army after the war and was commanding the Division of the South at the time of his death

Hallein (hä'lĭn), town (pop. 14,150), Salzburg, W central Austria, near the German border. It has saltworks and varied manufactures. Its 18th-century church is a shrine of pilgrimage.

hallel (hŭlăl', hă'lĕl) [Heb.=praise], certain of the Psalms sung, as in the days of the Temple, every morning of Hanukkah,] at the Passover service, and on most other Jewish holidays

Hallelujah (hă'lŭ lōō'yŭ) or **Alleluia** (ă'lŭlū'yŭ) [Heb.=praise the Lord], joyful expression used in Hebrew worship, of Pss. 104–6, 111–13, 115–17, 135, 146–50. Christian liturgies make wide use of it, particularly at Easter time. The *Hallelujah Chorus* is the brilliant concluding piece of Part II of Handel's *Messiah*

Haller, Albrecht von (äl'brĕkht fŏn hä'lûr), 1708–77, Swiss scientist and author. He had already won distinction as botanist and poet when he was appointed (1736) professor of anatomy, medicine, and botany at the Univ. of Göttingen There he carried on the researches in experimental physiology for which he is especially famed and on which he based his theory of the irritability (known today as contractility) of muscle tissue, set forth in *A Dissertation on the Sensible and Irritable Parts of Animals* (1732, Eng tr , 1936) He returned (1753) to his native Bern where he continued his researches and took part in public affairs Among his voluminous writings are *Elementa physiologiae corporis humani* (8 vols , 1757–66); noted works on bibliography and medical history, a volume of poems, *Versuch schweizerischer Gedichte* (1732), enlarged in subsequent editions, and novels of political satire including *Usong* (1771) and *Alfred* (1773)

Hallet, Étienne Sulpice (ātyĕn' sülpēs' ală'), 1755–1825, French architect He came (c 1789) to the United States where he became known as Stephen Hallet Before the opening of the public competition for the design of the Capitol, at Washington, D C , Hallet had submitted to Thomas Jefferson, then Secretary of State, designs of a Louis XVI type, with a monumental central dome, and had been encouraged to prepare additional studies to meet the approval of the President and the commissioners In 1793, however, the design submitted by William Thornton was approved and adopted by the President, who, in justice to Hallet, retained him as supervisor of the execution of Thornton's plans Hallet, however, criticized Thornton's scheme, attempted to introduce alterations to it, and was dismissed.

Hallet, Stephen: see Hallet, Étienne Sulpice.

Hallettsville (hă'lĭtsvĭl), city (pop 1,581), co seat of Lavaca co , S Texas, on the Lavaca river and WSW of Houston, in a diversified farm area

Halley, Edmund (hă'lĭ), 1656–1742, English astronomer and mathematician He is particularly noted as the first astronomer to predict the return of a comet and the first to point out the use of a transit of Venus in determining the parallax of the sun In 1676 he went to St Helena to observe the southern skies and as a result made a catalogue of 341 stars of the Southern Hemisphere He financed the publication of Isaac Newton's *Principia* and helped to prepare it for the press On the basis of Newton's theory, Halley calculated the orbit of the great comet of 1682—since known as Halley's comet In 1720 he was made astronomer royal He observed the moon through the complete revolution of its nodes, this took 18 years Other discoveries of Halley are the proper motions of the stars, the long inequality of Jupiter and Saturn, and the acceleration of the moon's mean motion His noted synopsis of known comets appeared in 1705, his *Tabulae astronomicae* (1749, Eng tr , 1752) was published posthumously See his *Correspondence and Papers* (ed by E F MacPike, 1932)

Halley's comet, periodic comet named for Edmund Halley, who observed it in 1682 and identified it as the one observed in 1531 and 1607 Its next return, early in 1759, was close to the time he predicted. The most recent appearance was in 1910

hallmark, a mark impressed on silverwork or goldwork to signify official approval of the standard of purity of the metal, also called plate mark The hallmark was introduced by statute in England in 1300 and enforced by the Goldsmiths' Hall, London. Similar marks, many of them unofficial, were used on the Continent and in America. Other marks used on plate include one for the place of assay, a date mark, usually a letter, the maker's touch, at first a symbol, later his initials or name, a duty mark, to signify payment of a tax, the artisan's mark Marks have also been used on plated ware, baser metals, and pottery

Hallock, Gerard, 1800–1866, American journalist, b Plainfield, Mass , grad. Williams, 1819, brother of William Allen Hallock After working on several newspapers, chiefly religious, he served as editor (1828–61 of the New York *Journal of Commerce.* In this position he was active in establishing cooperative news-gathering services, and in 1856 he became president of the General News Association of the City of New York, a consolidation of such services. He opposed Abraham Lincoln's election in 1860 and defended the South to such a degree that after the Civil War broke out the *Journal of Commerce* was excluded from the mails, whereupon he retired.

Hallock, village (pop 1,353), co seat of Kittson co, NW Minn, in the Red River valley near the Canadian boundary, platted 1879, inc 1887 It is a center for hunting and fishing

Hall of Fame, national shrine established (1900) at New York Univ The Hall of Fame, which overlooks the Harlem river on the campus at University Heights, New York city, was instituted by Chancellor John J MacCracken from a $250,000 donation by Finley J Shepherd The names of 50 outstanding Americans—selected by over 100 leading American men and women from every state in the union—were inscribed on bronze tablets in 1900 and 5 were to be added each fifth year This plan has not been followed with any great regularity, but numerous other names were chosen later See R V Johnson, *Your Hall of Fame* (1935)

Hallohesh (hălō-) [Heb ,=the enchanter], signer of the covenant Neh 10 24

Halloween see ALL SAINTS.

Hallowell (hŏl'ōwĕl), city (pop 2,906), SW Maine, on the Kennebec below Augusta, settled c 1754, inc as a town 1771 It then included the present Augusta, the part comprising modern Hallowell was an important center in colonial days One of Maine's first two academies was established here in 1791, the other, at South Berwick, still exists Hallowell granite quarries supplied stone for the state capitol and other important buildings.

Halls, town (pop 1,511), W Tenn, NNE of Memphis, in a cotton, timber, and farm area

Hallstatt (hăl'shtăt), summer resort (pop 1,494), Upper Austria, in the SALZKAMMERGUT, on the Lake of Hallstatt The region yields salt In the middle of the 19th cent a near-by cemetery yielded prehistoric remains, perhaps Celtic, of a culture known as the Hallstatt culture (see IRON AGE)

Hallstead, residential borough (pop 1,293), NE Pa, N of Scranton at the N Y border, inc 1874 Meat-packing is done here

hallucination, false sensory perception characterized by a lack of external stimulus The two most common types of hallucination are hearing voices or noises (auditory) and seeing people or things (visual) when nothing is present Hallucinations play a prominent part in schizophrenia and are considered an important aid to the psychiatrist in his attempt to understand the underlying emotional conflicts of the psychotic patient However, hallucinations occur to normal people under emotional stress or in great fatigue One of the best known is the fata morgana, where the exhausted and thirsty traveler in the desert thinks he sees an oasis While there is no unanimity of opinion in the interpretation of hallucinations, the view most commonly held among psychiatrists is that they are symbolic representations of repressed wishes

Halm, Friedrich (frē'drĭkh halm), 1806–71, Austrian dramatist, whose real name was Baron Eligius von Münch-Bellinghausen A follower of Grillparzer, he wrote historical plays, among them *Griselda* (1834, Eng tr, 1840), *Der Sohn der Wildnis* (1843, Eng tr, *Ingomar the Barbarian*, 1859), and *Der Fechter von Ravenna* (1854, Eng tr, *The Gladiator of Ravenna*, 1859), and a few short tales

Halmahera (hälmähā'rä) or **Jailolo** (jīlō'lō), island (7,505 sq mi, pop including near-by Morotai 83,743), East Indonesia, between New Guinea on the east and Celebes on the west Largest of the Moluccas and resembling Celebes in irregularity of shape, it has four rocky peninsulas separated by three deep bays The island is mountainous for the most part and has several active volcanoes The chief products are nutmeg, resin, sago, rice, tobacco, and coconuts. There are anchorages at Jailolo (or Djailolo) and at Weda In the Second World War, Halmahera was a major Japanese air base, which was neutralized by Sept, 1944 The island is sometimes called Jilolo or Gilolo

Halmstad (hälm'städ"), industrial town (pop, 32,474), co seat of Halland co, SW Sweden, a seaport on the Kattegat Near by are mineral and sea-water baths

halo, in art, a circle or disk of light around the head of a divinity or saint See NIMBUS

halo, in physics, a circle of light surrounding the sun or the moon It may be white or it may show the colors of the spectrum more or less blurred, with the red on the inside Halos are produced when the light from the sun or the moon is refracted and reflected by ice crystals in the atmosphere, usually in a thin layer of high cirro-stratus clouds Under certain circumstances, a second or outer halo appears, fainter than the inner one. At times another ring, white and luminous, is seen lying parallel with the horizon and passing through the source of light. On this parhelic circle mock suns, or parhelia, sometimes appear, a single mock sun, the anthelion, directly opposite the sun, may be added. Near the poles, halos are more brilliant and complex than in other parts of the world. The theory attributing their formation to the presence of ice crystals was first given by the French philosopher Descartes. The study of Auguste Bravais on the subject is considered most authoritative. Similar to a halo and sometimes confused with it is the CORONA.

halogen (hă'lŭjun) [Gr. *halo*=salt; *-gen* (as in *genetics*)=bearing], any member of the family of very active elements consisting of FLUORINE, CHLORINE, BROMINE, and IODINE Chemically the halogens resemble one another closely, all being monovalent and nonmetallic and all forming negative ions Fluorine, a gas, is the lightest and the most active, displacing the others of the family from compounds and even displacing oxygen from water Iodine, a solid, although the least active of the family, is less active only than oxygen among the other nonmetals The halogens combine with other elements to form BROMIDE, CHLORIDE, CHLORATE, and other compounds Some common compounds are salt, iodoform, calomel, chloroform, corrosive sublimate, sal ammoniac, fluorite, and bleaching powder

Halohesh (hălō'-) [Heb ,=HALLOHESH], father of Shallum, ruler in Jerusalem. Neh 3 12

Hals, Frans (frans' hăls'), c 1580–1666, Dutch master, second only to Rembrandt as a painter of portraits and of portrait groups, b Antwerp He spent most of his life in Haarlem, where he studied with Karel van Mander and early established a high reputation Nevertheless much of his long life was passed in poverty because of his improvident habits Hals loved drink and gay company He is said to have abused his first wife, but his second marriage was happy and he reared a family of 10 children It was an expansive and prosperous period in Holland, following the emancipation of the country The civic guards were in the habit of commissioning group portraits of their various companies, and Hals painted large canvases of them in full regalia Some of these "corporation pictures" are among his finest works Each man is caught in a characteristic pose, and the entire group is portrayed with amazing naturalness, vivacity, and informality He also painted many single portraits and studies of low-life types As he progressed he abandoned the heavy browns of his youthful work and developed a cool palette, alternating blacks and grays with brilliant and sparkling color Much of his best work was done from 1625 to 1640 In 1644 he was dean of the painters' guild His possessions were distrained for debt in 1652, and difficult years followed In 1664, two years before his death, he was granted a pension by the town In that year, at the age of 84, he painted two famous masterpieces, *The Governors of the Almshouse* and *Lady Governors of the Almshouse* (both Haarlem) These somber portrait groups have the same brilliant lighting and cool clarity as his gayer canvases Hals is unexcelled as a virtuoso in seizing momentary effects and giving them authentic life He worked rapidly, with bold and sure brush strokes, painting details of costume with the same gusto as the lineaments of his sitters His subjects are usually painted in full light without mystery, with the utmost frankness and economy of means After his death his work waned in popularity until the middle of the 19th cent, when its greatness was again recognized It is best seen in the Haarlem collection, but splendid examples are in important collections everywhere Among his masterpieces may be mentioned *Archers of St George* (three paintings), *Archers of St Adrian* (two paintings), and *Governors of St Elizabeth Hospital* (Haarlem), *The Rael and Blaeuw Company*, *Married Couple*, and *The Merry Drinker* (Rijks Mus), *Laughing Cavalier* (Wallace Coll, London), portrait of Descartes (Louvre), *Hulle Bobbe*, and *The Smoker* (Metropolitan Mus) Hals is well represented in the museums of Boston, Chicago, and Philadelphia and in the Frick Collection, New York The Metropolitan Museum has nine paintings See studies by G S Davies (1902), E W Moes (1909), and Joséphin Péladan (1912) His son **Frans Hals,** c 1620–c 1669, was a skillful painter of still life and rustic scenes His *Vanitas* is characteristic **Dirk Hals** (dĭrk), c 1591 1656, brother of the elder Frans Hals specialized in festivals and drinking scenes, his *Merry Party* (National Gall, London) being characteristic

Halsey, William Frederick (hŏl'sē), 1882–, American admiral, b Elizabeth, N J, grad Annapolis, 1904 He commanded destroyers in the First World War, and after 1935 he served with naval air units He led (Jan, 1942) a spectacular carrier raid against the Marshall Islands and Gilbert Islands and during the Solomons campaign he assumed command of the South Pacific area As commander (1944–45) of the U S 3d Fleet, he commanded the naval action in the Philippines and led (July, 1945) the sea-borne bombardment of Japan. He was promoted (Nov, 1945) to admiral of the fleet ("five-star admiral"), but he retired (March, 1947) from the navy because of ill-health His experiences in the Second World War were published as *Admiral Halsey's Story* (1947)

Halsingborg, Swed *Hälsingborg* (hĕlsĭngbôr'yù), city (pop 66,820), Malmohus co, S Sweden, a seaport on the Oresund opposite Elsinore, Denmark, to which there is a railway ferry From the 9th cent, Halsingborg has been a trade center and stronghold A high square tower remains of its medieval fortress. In 1658 it was ceded by Denmark to Sweden, it was seized and plundered by the Danes in 1676 and regained by Sweden in 1710. It is an important grain center, processes copper, and has sugar refineries, rubber works, breweries, and superphosphate works To the northeast are the only coal field in Sweden and the deposits of clay used in the Halsingborg potteries

Halsingland, Swed *Hälsingland* (hĕl'sĭng-länd"), historic province, E central Sweden It is now administratively part of GAVLEBORG co

Halstead (hŏl'stĭd), city (pop 1,397), S central Kansas, WSW of Newton, founded 1873, inc 1877 A trade center, it ships wheat and cattle

Halsted, William Stewart (hŏl'stĭd), 1852–1922, American surgeon, b New York city, M D College of Physicians and Surgeons, 1877. He practiced in New York and in 1886 became the first professor of surgery at Johns Hopkins, where he was associated with Sir William Osler, W H Welch, and H A Kelly in developing the great medical school and hospital His surgical contributions include an operative technique based on minimum injury of tissues, anesthesia by the injection of cocaine into the nerves, a method of operating for cancer of the breast and for hernia, experimental work on the thyroid, and the introduction of the use of rubber gloves See his *Surgical Papers* (1928), study by W. G. MacCallum (1930)

Halys, river of Asia Minor see KIZIL IRMAK.

Ham [Heb ,=swarthy] 1 Son of Noah and father of Cush, Mizraim, Phut, and Canaan Gen 9, 10 **2** Unidentified country of the Zuzims Gen 14 5 **3** Name used in connection with the cities of Simeon 1 Chron. 4 40 The "Land of Ham" is a designation for Egypt Ps 105 23,27, 106 22 The Hamitic languages were named after the son of Noah see LANGUAGE

ham, hind leg of a hog above the hock joint, usually prepared for food by curing or smoking Ham is one of the earliest of preserved meats, originally made in the home, now a leading product of the meat-packing industry The flavor and quality of ham depend on the age, condition, and feeding of the swine and on the smoke used in curing The Westphalian hams of Germany are smoked with juniper brush, birchwood also is used in N Europe, hickory is favored in the United States The delicate flavor of the relatively lean Virginia ham is attributed in part to the roots, acorns, and nuts upon which the hogs feed

Hama (hä'mä), city (pop 50,400), N Syria, on the Orontes A city of great antiquity, it was a center of the Hittites and has yielded material on the Hittite culture As Hamath it is mentioned often in the Bible and is called the northern boundary of Israel The Assyrians under Shalmaneser III were attacking the city in the 9th cent, and it passed under Assyrian dominion Later it was included in the Persian Empire, was conquered by Alexander the Great, and after his death was claimed by the Seleucid kings It was renamed Epiphania by Antiochus IV (Antiochus Epiphanes) Hama was later under Rome and the Byzantine Empire, and in the 7th cent it was taken by the Arabs The Christian Crusaders held it briefly, and later it was given to Turkish control The learned prince Abu-l-Fida ruled it early in the 14th cent Despite Islamic rule, Christianity persisted in the city Formerly the silk, woolen, and cotton goods of Hama were famous The grain from the surrounding fertile plains is still of importance, and the city, commanding the upper Orontes valley, has commercial and strategic standing Old water wheels, some as much as 90 ft in diameter, still bring the water up from the Orontes to Hama for irrigation Hemath is the AV form, Hamath RV, in Amos 6 14 The Hamath-zobah taken by Solomon may be Hama, or it may be a city of Zobah E of the Jordan 2 Chron 8 3

Hamadan (hä'mudän, hămudän'), city (pop 103,874), W Iran, at the foot of Mt Elvend It has an altitude of 6,280 ft In ancient times it was the capital of Media, ECBATANA. Though primarily the market place of a fertile province, Hamadan produces carpets and metal and leather goods It contains an American mission, Avicenna's tomb, and an ornate 12th-century Seljuk mausoleum The traditional tomb of Esther is here

Hamaguchi, Yuko (yōō'kō hämä'gōōchē), 1870–1931, Japanese statesman He was finance minister (1924–26) and home minister (1926–27) before becoming in 1927 the president of the Minseito party, to which he gave strong leadership Appointed prime minister in 1929, he formed a party cabinet, which attempted unsuccessfully to combat economic depression by deflation and retrenchment, pursued a conciliatory policy toward China, and adhered to the naval-limitation treaty of 1930 These measures were unpopular with the militarists He was shot by a fanatic in Nov, 1930, and died in April, 1931

Hamamatsu (hämä'mätsōō), city (1947 pop 125,767), Shizuoka prefecture, central Honshu, Japan, on the Philippine Sea It is a cotton-textile center

Haman (hā'-) or **Aman** (ā'-), favored minister of Ahasuerus He commanded that all Jews be put to death. ESTHER interceded for her people, and Haman was hanged on the gallows he had set up for Mordecai. Esther 3–7.

Hamar (hä'mär), city (pop 10,183), co. seat of Hedmark co., SE Norway, on Mjosa lake. It is the center of a rich agricultural district and produces machinery and leather goods. It also is a popular skiing resort. Hamar was founded (1152) as an episcopal see by Nicholas Breakspear (later Pope ADRIAN IV) and is now a Lutheran see. There are remains of the 12th-century cathedral, but modern Hamar dates only from the 19th cent. There was fighting at Hamar during the German invasion (1940) of Norway in the Second World War.

Hamasa (hämä'sä, humä'su) [Arabic,=bravery], one of the great anthologies of Arabic literature. It was gathered together by ABU TAMMAM when he was snowbound in Hamadan where he had access to an excellent library. There are 10 books of poems, classified by subject. Some of them are selections from long poems. This is one of the treasuries of early Arabic poetry, and the poems are of exceptional beauty.

Hamath or **Hamath-zoba**, Syria: see HAMA.

Hambach (häm'bäkh), village (pop 3,274), Rhenish Palatinate, W Germany, near Speyer. It was the scene (1832) of the **Hambacher Fest**, a gathering of German democrats advocating political reform.

Hambidge, Jay (häm'bĭj), 1867–1924, American writer and artist, b. Canada. His exhaustive measurements of Greek vases and classical temples led him to a discovery of mathematical principles which he considered to have been consciously employed by ancient Egyptian and Greek designers. These principles, christened DYNAMIC SYMMETRY, were first expounded in informal lectures which Hambidge delivered in 1917. Later developed into an extensive system of application and given publicity by books and articles, they aroused wide discussion among artists. Instruction based upon the system is given in some American schools of art. Hambidge's writings include *Dynamic Symmetry: the Greek Vase* (1920), *Dynamic Symmetry in Composition as Used by the Greek Arts* (1923); *The Parthenon and Other Greek Temples: Their Dynamic Symmetry* (1924); and *The Elements of Dynamic Symmetry* (1926), the last composed of articles originally appearing in the *Diagonal*, a magazine published by Hambidge in 1919–20.

Hambletonian (hämbultō'nēun), 1849–76, American trotting horse, foaled at Chester, N.Y. Originally owned by Jonas Seely, Hambletonian was bought for little money by Bill Rysdyk and won few honors as a trotting horse. But Hambletonian, a very muscular bay with well-formed hind legs, became the foundation sire of the strain of trotting horses bearing his name. The Hambletonian Association, formed in 1923 to promote trotting races, offered a stake for three-year-old trotters, and the famous Hambletonian trotting event—also named for Rysdyk's horse—first took place in Syracuse in 1926. Since 1927 the Hambletonian has been held annually in August at Goshen, N.Y.

Hamburg (häm'bûrg, Ger. häm'bo͝ork), state (288 sq mi., pop. 1,403,300), N Germany, composed mainly of the free Hansa city of **Hamburg**, on the Elbe near its entrance into the North Sea. Although the volume of Hamburg's trade in 1948 was only about 25 percent of the pre-war volume, it remains the largest seaport of Germany, with great shipyards, machinery plants, chemical industries, an important fishing fleet, and a free port. It has numerous technical and medical institutes, a university (founded 1919), and an active cultural and musical life. Hamburg originated in the castle of Hammaburg, built by Charlemagne. It became (834) an archiepiscopal see (united in 848 with the archdiocese of Bremen) and quickly grew to commercial importance. The alliance (1241) of Hamburg with Lübeck was the basis of the HANSEATIC LEAGUE, of which Hamburg was one of the leading cities. A free imperial city from the 13th cent., Hamburg continued to prosper through the centuries. In 1558 the first German stock exchange was founded here. Hamburg accepted the Reformation. In 1815 it joined the German Confederation as a separate state, it retained its statehood after joining the new German Empire (1871) and the Weimar Republic (1919). In 1938 its outlying port, CUXHAVEN, was ceded to Prussia, but the formerly Prussian city of ALTONA (1934 pop. 241,970) was incorporated with Hamburg. Economically, Cuxhaven remains part of Hamburg. In the Second World War at least half of the city was devastated by gigantic fires set off by British air raids. Many of the fine buildings (both historic and modern), for which Hamburg was famed, were destroyed. Human losses were exceedingly heavy. Hamburg was incorporated (1945) in the British zone of occupation, and in 1949 it joined the West German state. The city has been governed since the Middle Ages by a senate.

Hamburg. 1 Lumber-milling town (pop. 1,939), co. seat of Ashley co., SE Ark., near Louisiana. A state game refuge is near by. 2 City (pop. 2,187), extreme SW Iowa, on the Nishnabotna river near the Mo. line; inc. 1867. It has a large nursery. 3 Borough (pop. 1,116), NW N.J., N of Franklin; inc. 1920. Its "Gingerbread Castle" is reminiscent of various fairy tales. 4 Village (pop. 5,467), W N.Y., S of Buffalo, in a truck-farming area; settled c 1808, inc. 1874. 5 Borough (pop. 3,717), SE Pa., NNW of Reading, inc. 1837. It is a farm trade center. A tuberculosis sanatorium is here.

Hamden, town (pop. 23,373), S Conn.; settled c.1664, set off from New Haven 1786. The site of Eli Whitney's arms factory is marked, and his model barn (1816) is preserved. Firearms are still produced, and also other metal products.

Hämeenlinna (hä'mānlĭn"nä), Swed. *Tavastehus* (tĭvä'stühüs"), city (pop. 10,017), SW Finland. Located on a lake, the town grew around a Swedish castle built in 1249 and was incorporated in 1638. It has plywood mills, spool mills, and a teachers college. The beautiful Aulanko Park, a recreation area, is near by.

Hameln (hä'mŭln) or **Hamelin** (hä'mŭlĭn), city (pop. 41,711), Hanover, NW Germany, on the Weser river. It is chiefly known as the scene of the legend of the PIED PIPER OF HAMELIN. Frescoes illustrating the legend adorn the so-called Ratcatcher's House (built 1602–3). An ancient Saxon settlement, Hameln became a missionary outpost c 750, received city rights c 1200, and, while frequently changing hands, acquired considerable independence. It was a member of the Hanseatic League (1426–1572). Though somewhat damaged in the Second World War, it retained many historic buildings, notably the Rattenkrug (built 1568), the museum (1569), and the Wedding House (1612–13). Hameln is primarily a transportation center.

Hamhung (häm'hûng'), Jap. *Kanko*, city (1944 pop. 112,184), North Korea. Metalware and cotton textiles are manufactured. Coal mines are near by.

Hamilcar (hämĭl'kär, hŭmĭl'kär), fl. 480 B.C., Carthaginian general. Little is known of him, though his name tells that he was a member of the Barca family. He commanded an army against Gelon and the Greeks in Sicily, who severely defeated him (480 B.C.) at Himera.

Hamilcar Barca [Punic *barca*,=lightning], d. 228 B.C., Carthaginian military commander. He was assigned the command in Sicily in 246 B.C. in the First Punic War. (Possibly he was identical with the Hamilcar commanding there from 260 B.C.) From mountain bases near Palermo he made repeated raids on the Romans and relieved the Punic garrison in Lilybaeum. By the peace, which surrendered Sicily, his unbeaten troops withdrew without submission. The mercenaries shortly afterward revolted and besieged Carthage, but Hamilcar caught and destroyed them in the defile of the Axe (238). After this his popularity made him virtual dictator. He now (237) set out to conquer Spain as a new base against Rome and had won a considerable territory when he fell in battle. Hamilcar was probably the ablest general and statesman Carthage had before his son HANNIBAL.

Hamilton, Alexander, 1757–1804, American statesman, b. Nevis, in the West Indies. The brilliant and ambitious youngster was sent to New York, where he entered King's College (now Columbia) in 1774. In the troubles leading to the American Revolution, he wrote articles and pamphlets espousing the patriot cause so well that the works were then popularly attributed to John JAY. In the war he became a captain of artillery, attracted George Washington's notice, and, as Washington's secretary and aide-de-camp, performed invaluable services. Wishing more active service, he left Washington's staff in 1781 and performed brilliantly in the field at Yorktown. His marriage to Elizabeth Schuyler, daughter of Gen. Philip J. SCHUYLER, connected him with an old New York family. He was a lawyer in New York city and a member of the Continental Congress. By 1780 he had already outlined a plan of government with more Federal authority than that of the Continental Congress, and he worked steadily to establish the new state. As a delegate to the Annapolis Convention and to the Federal Constitutional Convention, he was a strong proponent of a centralized government. When the Constitution was drafted, he did much to get it ratified, particularly by his contributions to the FEDERALIST PAPERS. In New York, Hamilton fought vigorously against the opposition of George CLINTON to the Constitution, and of all the advocates of the new instrument of government Hamilton had perhaps the strongest voice of any except James MADISON. He was one of the giants of the young republic. As Secretary of the Treasury under George Washington he had an opportunity to show his financial genius. He planned to put the finances of the country on a stable basis, and he had his program ready before the first Congress under the Constitution met. The Hamiltonian system, which he unfolded over the years, was based on the proposition of running the country like a sound business venture. He proposed to pay the domestic debt in full, to have the Federal government assume state debts, to establish the Bank of the United States, to raise excise taxes, and to impose protective tariffs. Thus he favored strengthening the Federal government at the expense of the states and tying the administration more or less tightly to the moneyed interests. Hamilton himself was a well-to-do lawyer and banker (he had founded the Bank of New York), and his own high connections aroused suspicion in the less conservative members of the government. Though Washington wished to avoid parties, two groups came into existence almost immediately and crystallized into the FEDERALIST PARTY, with Hamilton and John Adams as its leaders, and the ANTI-FEDERALISTS, under the leadership of Thomas JEFFERSON. Hamilton's program was vigorously opposed. He was not allowed to offer his first financial report on the floor of Congress, principally because his opponents feared his powers of eloquent and persuasive oratory. The assumption of state debts was achieved only when Jefferson swung votes to it on the understanding that Hamilton would lend his influence to locating the national capital in the South—an early example of political logrolling. The Bank of the United States was established, but Hamilton had to defend its creation against vigorous opposition and resorted to the argument that the Federal government has "implied powers" as well as explicit powers under the Constitution, an argument later very powerful when used by Chief Justice MARSHALL to strengthen the national government. The protective tariff Hamilton did not obtain, and the raising of excise taxes caused difficulties, notably an uproar in W Pennsylvania known as the WHISKY REBELLION. In foreign affairs, Hamilton favored friendship with Great Britain and supported JAY'S TREATY (1794), he was opposed to the French Revolution and encouraged strong measures against France in the "near-war" of 1798—measures bitterly opposed by the pro-French Jefferson. By that time, John Adams was President, for, though Hamilton was perhaps the most brilliant and powerful of the Federalists, he was not in complete command of the party (he had even resigned his cabinet post in 1795 largely for financial reasons), and the successful candidate for President was another conservative, John Adams. There was little personal liking between these two, and friction between them grew in the course of the Adams administration, largely because Adams felt that Hamilton's attempts to dictate policies were unwarranted. Both were swept under when in the election of 1800 the wave of Jeffersonian democracy rolled in. Because the Constitution had been drawn without provision for separate votes for President and Vice President, the votes for the Anti-Federalist—now called Republican or Democratic Republican (see DEMOCRATIC PARTY)—candidates were equal in number. Hamilton's influence made Jefferson President and Aaron BURR Vice President—an outcome in accord with the popular will. Burr was, however, disgruntled, and when in 1804 Hamilton again thwarted Burr, keeping him from the governorship of New York, trouble followed. Burr accused Hamilton of having called him a "dangerous" man and when Hamilton replied evasively to the charge—which was probably just—challenged him to a duel. The two men met at Weehawken Heights, N.J., and Hamilton was mortally wounded. He left an enduring political legacy. It is customary in American history to view political theories and policies through the decades as either Hamiltonian or Jeffersonian. Though Jefferson's broader democracy has generally attracted more admirers than Hamilton's belief that the powers of government should rest with "the wealthy, the good, and the wise," the opposition of their views can easily be oversimplified. Certainly Hamilton's vision of the future America as a land wealthy from busy trade and busier industry proved more accurate than Jefferson's dream of a land dominated by free, small farmers. The distrust that haunted the dark, handsome, egotistical, and aristocratic Hamilton in his lifetime has continued, and he has perhaps never received his due as a founder and molder of the United States. His papers were edited by his grandson, John C. Hamilton (7 vols., 1850–51), and by Henry Cabot Lodge (9 vols., 1885–86), and various additions to these have been published (e.g., in *Papers on Public Credit, Commerce, and Finance*, ed. by Samuel McKee, Jr., 1934), but a definitive edition has not yet been issued. See biographies by Henry Cabot Lodge (1882), H. J. Ford (1920), David Loth (1939), and Nathan Schachner (1946); Gertrude Atherton's novel, *The Conqueror* (rev. ed., 1918).

Hamilton, Alice, 1869–, American physician and educator, b. New York city, M.D. Univ. of Michigan (1893), studied (1895–96) in Leipzig and Munich. Pioneering in research in hygiene and in industrial diseases, she became the first woman faculty member (1919) of Harvard. In 1935 she was made emeritus professor of industrial medicine of Harvard Medical School. As an outstanding authority on ailments contracted through chemicals and working conditions in industry, her services were utilized by the state of Illinois, the U.S. Dept. of Commerce, and the health committee of the League of Nations. Her writings include *Industrial Poisons in the United States* (1925), *Industrial Toxicology* (1934), and the autobiographical work, *Exploring the Dangerous Trades* (1943).

Hamilton, Andrew, d. 1703, colonial governor of New Jersey, b. Scotland. Becoming deputy governor of East Jersey in 1687, Hamilton defended the proprietors against popular opposition and shortly

had to leave the colony. In 1692 he was commissioned governor of East and West Jersey, but after five years of wise administration, was removed by the proprietors to please the crown When he was recalled he could not restore authority Appointed deputy postmaster general for the colonies in 1692, Hamilton induced several colonies to set up uniform postal rates. In 1701 he was appointed by William PENN deputy governor of Pennsylvania and served until his death

Hamilton, Andrew, 1676–1741, colonial American lawyer, defender of John Peter ZENGER, b Scotland He was brought by his family to Virginia (1679) and later moved to Pennsylvania, where he held office and was a prominent lawyer The governing party in New York disbarred all local lawyers who ventured to defend Zenger, Hamilton was brought in and by brilliant defense freed (1735) Zenger and helped to establish freedom of the press in America. See biography by A B Konkle (1941)

Hamilton, Andrew Jackson, 1815–75, provisional governor of Texas (1865–66), b Huntsville, Ala Moving to Texas in 1846, he served (1850) as attorney general, was a member of the legislature (1851–53), and in 1859 was elected as a Unionist to the U S House of Representatives, where he tried to check secessionist sentiment He returned (1861) to the state legislature, but with the outbreak of the Civil War he was regarded as a traitor and fled to Washington Abraham Lincoln appointed him a brigadier general of volunteers and military governor of Texas, and in June, 1865, he was made provisional governor by Andrew Johnson Hamilton's course in the early days of Reconstruction has been generally recognized as both courageous and wise Within a year he had established order and turned the state over to officials elected under a new constitution, only to have much of his work undone by the radical Republican plan of Reconstruction For a time he worked with the military authorities, who appointed (1866) him to the Texas supreme court But his opposition to Negro suffrage and to the disenfranchisement of the whites led him to become a leader of the conservative Republicans

Hamilton, Anthony, c 1645–1719, Scottish author of the French *Mémoires du comte de Grammont,* b Ireland He fought in the Dutch Wars for Louis XIV Later he fought for James II at the Boyne (1690) and went to live at the exiles' court at Saint-Germain-en-Laye He was a master of French and wrote much Hamilton's principal work was the memoirs (1713') of his brother-in-law, Philibert GRAMONT, these are rather racy, malicious, and gay than profound or exact The account of life at Charles II's court is especially well known See the annotated translation of Peter Quennell (1930), Ruth Clark, *Anthony Hamilton* (1921)

Hamilton, Emma, Lady, c 1765–1815, English beauty A fascinating woman, she was the mistress of Charles Greville, then of Sir William Hamilton, ambassador to Naples, whom she married She gained enormous influence with Queen Marie Caroline Her intimacy with Horatio NELSON began in 1798, and in 1801 she bore him a daughter, Horatia Nelson, already married, was so infatuated that he risked insubordination to remain in Naples with her His dying request that England provide for her was but poorly granted, and she died in want after running through his modest fortune Portraits of her were painted by many of the famous artists of her day, many are by Romney See biography by Walter Sichel (1905), study by Marjorie Bowen (1935)

Hamilton, Gail: see DODGE, MARY ABIGAIL

Hamilton, Henry, d 1796, British army officer He served in Canada and the West Indies in the French and Indian War In 1775 he became lieutenant governor of Detroit In the American Revolution, Hamilton was hated by Americans and accused of being a "hair buyer"—i e , one who paid bounties to Indians for scalps taken in their raids on frontier settlements George Rogers Clark in 1778 led his forces against the British in the West and captured (1779) Hamilton at Vincennes He later had administrative posts in Canada, Bermuda, and the West Indies. For bibliography, see CLARK, GEORGE ROGERS.

Hamilton, Sir Ian Standish Monteith (ā'un, mŏnt-tĕth'), 1853–1947, British soldier, b Corfu He served in many campaigns in the East and in Africa and was military attaché with the Japanese in the Russo-Japanese War In the First World War he commanded the Mediterranean Expeditionary Force (1915) and was relieved of his command after the abortive GALLIPOLI CAMPAIGN His later years were devoted to pacifistic activities His books include *The Millennium?* (1918), *Gallipoli Diary* (1920), and *Listening for the Drums* (1944)

Hamilton, James, 2d **Baron Hamilton** and **1st earl of Arran,** 1477?–1529, Scottish nobleman; son of James Hamilton, 1st Lord Hamilton, and Mary, daughter of King JAMES II. He was privy councilor to JAMES IV and was created earl of Arran (1503) He went on various embassies and an unsuccessful campaign to aid France After the marriage of Archibald DOUGLAS, 6th earl of Angus, to the queen mother, Margaret, Arran was in opposition, supporting the duke of Albany for regent. Angus's rupture with his wife and Albany's departure to France brought Arran the regency (1522–24) On Angus's return to Scotland (1524) Arran had to come to terms with him, assisting him in keeping the boy king, James V, prisoner. When Angus fell, Arran changed sides to the royal party

Hamilton, James, 2d **earl of Arran,** d. 1575, Scottish nobleman, duke of Châtelhérault in France; son of James Hamilton, 1st earl of ARRAN He was a leader of the Protestants in his youth and joined the English party against Cardinal BEATON After the success of his party and his appointment as protector of Scotland (1542) he turned Catholic and joined the French party (1543–44) He consented to the marriage of the young MARY QUEEN OF SCOTS to the dauphin (FRANCIS II), and gave up his regency to the queen mother, MARY OF GUISE (1554) He rejoined the Protestants, met many misfortunes, and fled Scotland when Queen Mary married Darnley (1564) In 1569 he returned to Scotland and was later imprisoned, although he had recognized JAMES VI (James I of England) as king He was freed, but went into rebellion, was defeated, and became reconciled, nominally at least, to James

Hamilton, James, 3d **earl of Arran,** 1530–1609, Scottish nobleman, son of James Hamilton, 2d earl of Arran He spent some years in France (1550–58) as a soldier, but his espousal of Protestantism brought his recall to Scotland, where his father, with the concurrence of John Knox, unsuccessfully tried to marry him to MARY QUEEN OF SCOTS He was on good terms with Elizabeth of England, who probably backed him for the regency in Scotland, but also declined his proposal of marriage He was a bitter enemy of the earl of Bothwell Arran succeeded to his father's estates in 1575, but was declared insane and put under the care of his brother, John Hamilton, 1st marquess of Hamilton The Arran estates and title were forfeited to James Stuart (see STUART, JAMES, EARL OF ARRAN) in 1580 but restored in 1585 Arran, however, never regained his sanity and remained in confinement for the remainder of his life

Hamilton, James Douglas, 4th **duke of,** 1658–1712, Scottish nobleman He served at the courts of Charles II and James II and remained, after his grudging acceptance of William III, a sympathizer with the JACOBITES Briefly imprisoned in 1689, he retired to Scotland in 1690 He became duke of Hamilton in 1698 and in the Scottish Parliament opposed union of Scotland with England, but he entered the united Parliament in 1708 Coming into favor in the Tory regime after 1710, he was made privy councilor (1710), duke of Brandon (English) in 1711, and ambassador to Paris (1714) He was killed in a duel by Lord Mohun before he could go to France Suspicion of foul play caused the Tories to accuse the Whigs of murdering him because of fear that he was to engineer from France a Jacobite restoration

Hamilton, James Hamilton, 3d **marquess** and 1st **duke of,** 1606–49, Scottish nobleman, grandson of the 1st marquess He became marquess of Hamilton (Scottish) and earl of Cambridge (English) at his father's death (1625) and was privy councilor in Scotland (1628) and Charles I's principal adviser for Scottish affairs He raised an army (1630–33) to fight for the count palatine in the Thirty Years War, but his expedition failed He tried, as Charles' commissioner, to pacify the COVENANTERS (1638) and, failing, raised a force to fight them. Later he pretended to conciliate them in order to learn their plans He was suspected in Scotland and disliked for the monopolies he held by patent of the crown In 1641 occurred the incident devised by the earl of MONTROSE, to seize and probably murder Hamilton, his brother, and the marquess of ARGYLL In 1643 he was created duke, but in 1644 was imprisoned by Charles on suspicion of treachery and was freed only by parliamentary troops in 1646 He and his Scots soldiers fought for Charles at Preston (1648) and were defeated and captured by John Lambert and Oliver Cromwell He was taken to London There he was found guilty of treason by the same court which condemned Charles I and was executed

Hamilton, James, 1786–1857, governor of South Carolina (1830–32), b Charleston, S C He practiced law in Charleston after his return from service in the War of 1812 In the U S House of Representatives (1822–29), he was at first a leader of the Jacksonian Democrats, but his increasing opposition to a high tariff led him to become a firm advocate of states' rights His championship of nullification won him the governorship of South Carolina, and he presided over the convention which passed the nullification ordinance Upon his retirement as governor he was placed in command of the state militia, which he organized to resist Federal coercion, but he willingly accepted the compromise tariff of 1833, regarding it as a vindication of his political course His enthusiasm for Texas independence was accompanied by large gifts of money and was acknowledged by Texas with a grant of land In 1839 he went to Europe as a diplomatic agent for Texas, securing recognition and commercial treaties from France, Belgium, the Netherlands, and Great Britain, but failing to secure loans of money While attempting a settlement with Mexico, involving the payment of $5,000,000, he was recalled and his work was repudiated by Sam Houston. Until he drowned in the Gulf of Mexico he sought reimbursement for the money owed him by Texas.

Hamilton, John Hamilton, 1st **marquess of,** 1532–1604, Scottish nobleman; second son of James Hamilton, 2d earl of Arran. He was in his earlier years hostile to the cause of Mary Queen of Scots. The death of his father in 1575 made him the nearest heir to the throne of Scotland after James VI and placed him at the head of the Hamilton family by virtue of the insanity of his elder brother James, 3d earl of Arran Hamilton's part in the murder of the regent, the 1st earl of Murray, led to a heated feud with Murray's relative, Sir William Douglas Hamilton fled to England and thence to France, where he tried unsuccessfully to secure support He returned to ask for Elizabeth's aid With other banished lords he returned to Scotland in 1585, was reconciled to James VI, and thenceforward enjoyed possession of his family's estates (except for the earldom of Arran which had passed to James STUART) and the favor and confidence of the king He was created marquess in 1599 His grandson was James Hamilton, 3d marquess and 1st duke of Hamilton

Hamilton, Patrick, 1504?–1528, Scottish reformer and martyr While at St Andrews, he was suspected of Lutheran sympathies He fled (1527) to Germany, where, during his short stay, he was associated with William Tyndale and probably with Luther and Melanchthon In Germany he wrote *Loci communes,* known as *Patrick's Places,* embodying the doctrines of the Reformation When Hamilton returned in 1527 to Scotland, he was charged with heresy, sentenced by Archbishop Beaton, and burned at the stake in 1528 See biographies by Peter Lorimer (in *Precursors of John Knox,* 1857) and T P Johnston (1882)

Hamilton, William Hamilton, 2d **duke of,** 1616–51, Scottish nobleman He was a partisan of the Stuarts during the civil wars (see PURITAN REVOLUTION) With his brother James Hamilton, 1st duke of HAMILTON, he gained favor with Charles I of England He was created (1639) earl of Lanark and made (1640) secretary of state for Scotland He was arrested by Charles's orders in 1643 with his brother for supposed implication in the latter's intrigues, but he escaped He regained favor when he went in 1646 as one of the Scottish commissioners to treat with Charles at Newcastle In 1647 he signed for the Scots the treaty known as the engagement with Charles, and he helped to organize the second civil war After the defeat at Preston (1648), he fled to Holland but returned in 1650 with Charles II and joined the Scottish invasion of England He died of wounds received at the battle of Worcester

Hamilton, William, 1704–54, Scottish poet His best poem was "The Braes of Yarrow" See his *Poems and Songs* (ed by J Paterson, 1850)

Hamilton, Sir William, 1730–1803, English diplomat and archaeologist, ambassador to Naples (1764–1800) He is chiefly remembered as the husband of Emma, Lady Hamilton, mistress of Horatio Nelson His fine collection of antiquities from Pompeii was sold to the British Museum in 1772. His publications include *Antiquités étrusques, grecques et romaines* (1766–67) and *Mount Vesuvius* (1772)

Hamilton, Sir William, 1788–1856, Scottish philosopher He was widely interested in law, physiology, and literature and was professor of history and philosophy at the Univ of Edinburgh. Hamilton helped to reestablish the waning fame of the Scottish school of metaphysicians His "Philosophy of the Unconditioned" (1829), a critique of Cousin's *Cours de philosophie* published in the *Edinburgh Review,* publicized his views upon the infinite, which he considered unknowable. He conceived of the world that man knows as finite and conditioned in terms of space, time, and degree He was a stimulating teacher, and his emphasis on Aristotle and the German philosophers broadened the English academic outlook His son, Francis, published his *Lectures on Metaphysics and Logic* (ed by H L Mansel and John Veitch, 4 vols , 1859–60)

Hamilton, Sir William Rowan, 1805–65, British mathematician, b Dublin He was professor of astronomy at the Univ of Dublin from 1827 and later royal astronomer His contributions include his research on light rays and his development of the theory of quaternions He was knighted in 1835

Hamilton, city (pop c 3,000), chief port and capital of Bermuda, on Bermuda island At the head of Great Sound, a huge lagoon protected by coral reefs, Hamilton is the focus of Bermuda's governmental, commercial, and social life It is laid out geometrically

Hamilton, city (pop 166,337), S Ont., on Hamilton Harbour at the head of Lake Ontario, SW of Toronto and NW of Buffalo, N Y It is at the foot of the Niagara escarpment, and behind it rises a high bluff There is steamship connection with other lake ports and with Montreal. It is an important

lake port and rail and air center, and its industries include steel, cotton and knitting mills, tobacco processing, automobile plants, and railroad shops. A notable fruit-raising region surrounds it. Educational institutions include McMaster Univ (Baptist; coeducational, 1887), a provincial normal school, a technical school, a collegiate institute, and a conservatory of music Dundurn Castle in Dundern Park has a museum The city was laid out in 1813 by George Hamilton

Hamilton, borough (pop 21,982, metropolitan pop. 26,401), on N North Island, New Zealand, on the Waikato river and SSE of Auckland It produces dairy foods and timber

Hamilton, burgh (1931 pop 37,862, 1948 estimated pop 40,883), Lanarkshire, Scotland, near the junction of the Avon with the Clyde SE of Glasgow It has coal and iron mines and engineering works Hamilton Palace, seat of the dukes of Hamilton, was razed in 1919, because it was endangered by coal mines Rudolf Hess landed on the Hamilton estate near here after his flight from Germany in May, 1941.

Hamilton. 1 Town (pop 1,002), co seat of Marion co , NW Ala , near the Miss line NW of Birmingham, in a farm area, settled c 1818 **2** City (pop 1,642), W Ill , on the Mississippi opposite Keokuk, Iowa, with which it is connected by a bridge, inc 1859 It is a farm trading and shipping center. **3** Town (pop 2,037), NE Mass , W of Gloucester, settled 1638, set off from Ipswich 1793 **4** City (pop 1,655), NW Mo , E of St Joseph, settled c 1855, inc 1868 It is a lumber, grain, and livestock center **5** City (pop 2,332), co seat of Ravalli co., W Mont , on the Bitterroot river, inc 1894 In this farm and dairy region Marcus Daly had an estate and model farm **6** Village (pop 1,790), central N Y , SW of Utica, settled 1795, inc 1816 COLGATE UNIVERSITY is here **7** Industrial city (pop 50,592), co seat of Butler co , SW Ohio, N of Cincinnati and on the Great Miami, inc 1810 It was settled on the site of Fort Hamilton, built in 1791 by Arthur ST CLAIR A manufacturing center, it produces various metal products, paper-mill machinery, and paper Development followed the building of a water-power plant (1852) and the arrival of railroads in the mid-19th cent William Dean Howells lived here as a boy **8** City (pop 2,716), co seat of Hamilton co , central Texas, W of Waco It has a flour mill and serves many poultry farms A natural-gas field is near by

Hamilton, river, 600 mi long, S Labrador It issues as the Ashuanipi river from Ashuanipi Lake, near the Quebec border, flows in a great arc north, then southeast through a series of lakes to the GRAND FALLS, where it becomes the Hamilton At the falls it drops 1,038 ft over a distance of 16 mi , with a main fall of 245 ft Below the Grand Falls it flows southeasterly, then ENE to Lake Melville Its waters pass Rigolet and reach the Atlantic through Hamilton Inlet. The falls and rapids made early exploration difficult. The river was formerly called the Grand River.

Hamilton, Mount, peak, 4,372 ft high, W Calif , in the Coast Range just E of San Jose It is the site of Lick Observatory (built 1876–88), directed by the Univ of California

Hamilton College, at Clinton, N.Y , nonsectarian, for men, chartered 1812, originating from an academy founded by Samuel KIRKLAND Among its graduates are Elihu Root and Alexander Woollcott

Hamilton Inlet, large bay on the Labrador coast At its narrows is Rigolet, a post of the Hudson's Bay Company

Hamitic languages: see LANGUAGE (table)

Hamlet, town (pop. 5,111), S N C , WSW of Fayetteville near the S C line It is a trade and shipping center for a fruitgrowing area

Hamlet, by many considered Shakspere's greatest play and one of the greatest works in the world's literature. The story itself dates back to primitive Germanic times and was first recorded by the 12th-century Danish scholar SAXO GRAMMATICUS in *Historia Danica* (c 1200) Here Prince Amleth's father has been killed by the usurping uncle, the murder is common knowledge, and the young prince feigns madness to save his own life and to await revenge Returning from England, where he has married the king's daughter, he finds the court celebrating a false report of his death Amleth, still pretending insanity, tricks all into drunkenness, sets the hall afire, kills his uncle, and proclaims himself king. An Elizabethan dramatist, probably Thomas Kyd, made the tale into a Senecan play of revenge, a form highly popular with his audience When Shakspere in 1601–2 rewrote this early play, which belonged to his company, he retained the events of his predecessor's plot, but with characteristic genius he shifted the emphasis from the external circumstances which prevent Hamlet from revenge to the complexity of Hamlet's own nature. To this day the greatness of the play consists essentially in the brilliance and impenetrability of Hamlet's character. Many critics and actors have attempted to interpret the hero, but no agreement is likely to be reached, and repeated readings of the text itself will prove more rewarding than any commentary For some indication of the extensive literature on *Hamlet*, see A. A. Raven, *Hamlet Bibliography and Reference Guide, 1877 to 1935* (1936), and the suggested reading under the article SHAKSPERE.

Hamlin, Alfred Dwight Foster, 1855–1926, American architect and teacher, b Constantinople, grad. Amherst, 1875, studied at the Massachusetts Institute of Technology and the École des Beaux-Arts He began practice with the firm of McKim, Mead, and White, but after 1883 taught architecture at Columbia Univ , he became professor of the history of architecture in 1904 and director of the School of Architecture in 1911 His chief writings are *Text-Book of the History of Architecture* (1896, rev ed , 1928) and *History of Ornament* (1916–23) His son, **Talbot Faulkner Hamlin,** 1889–, librarian of Avery Library, Columbia Univ , and later professor of architecture, wrote *Some European Architectural Libraries* (1939), *Architecture through the Ages* (1940), *Greek Revival Architecture in America* (1944), and *Architecture an Art for all Men* (1947)

Hamlin, Hannibal, 1809–91, Vice President of the United States (1861–65), b. Paris, Maine Admitted to the bar in 1833, he practiced at Hampden, Maine He was a Maine legislator (1836–40, 1847), a U S Representative (1843–47), and a U S Senator (1848–57) As a Democrat he supported Franklin Pierce's administration, but his increasing anti-slavery leanings led him to join the Republican party in 1856, in the same year he became governor of Maine. After a few weeks he resigned to reenter the U S. Senate, where he became increasingly prominent Geographical and political considerations made him a natural choice as Abraham Lincoln's running mate in 1860 As Vice President during the Civil War he presided over the Senate with ability and took part in a variety of governmental wartime activities He was again a member of the U S. Senate (1869–81), supporting the Reconstruction and economic policies of his party. From 1881 to 1882 he was minister to Spain. See biography by his grandson Charles E Hamlin (1899)

Hamlin, city (pop 2,406), W central Texas, NW of Abilene Oil and gypsum have made the fortune of the city Gypsum cement and plaster are produced, and there is a chick hatchery

Hamline University see SAINT PAUL, Minn

Hamm (ham), city (pop 49,751), Westphalia, NW Germany, on the Lippe river It is the largest railroad center of the Ruhr district and has iron and steel foundries Founded (1226) as the capital of the county of Mark, it later passed to Cleves and thence to Brandenburg It suffered great hardship in the Thirty Years War and in the Seven Years War and was very heavily damaged in the Second World War The Gothic city hall (15th cent) and the Church of St Paul (c 1300) were destroyed

Hamm (ham), village, grand duchy of Luxembourg, 3 mi. E of Luxembourg There is a large American military cemetery. Gen George S Patton is buried here

Hammath (hăm'-) [Heb , =warm springs], fortified Naphtalite city Joshua 19 35 It is probably the Hammon of 1 Chron 6 76 and the Hammoth-dor of Joshua 21 32 Hammam on the Sea of Galilee, S of Tiberias, is on the site of Hammath

Hammedatha (-dă'duthu, -udă'thu), father of Haman Esther 3 1

Hammelech (hă'mĕlĕk) [Heb , =the king], in the Bible, form occurring in Jer 36 26 and 38 6 The translators of AV took it for a name, but it is better translated "the king"

hammer. Men without hammers pound with clubs and with stones held in the hand The club and the hammerstone are believed to share with the digging stick (see SPADE) the distinction of having been used as tools before any tools were made by man One of the first tools man made was the hammer Its history begins in the Neolithic period Typically a hammer consists of two parts, the head and the handle Weighting the striking end of a club by attaching a hammerstone to it formed a hammer This was improved by shaping the stone so that the handle might be attached more firmly and so that the blows of the hammer might be more effective The wooden handle was commonly bent around the stone head, which was grooved to receive it. From the hammer of stone the stone AX was developed Both were primarily tools but were used also as weapons Hammers of bronze and of other metals did not make the hammer of stone obsolete Sometimes a hole was drilled through the stone head of a hammer to receive the handle A hole for the handle became a usual detail in the design of hammerheads of metal The Romans varied the design of their iron hammerheads to adapt them to different purposes Modern hammers with steel heads are made for driving nails and for shaping metals The power hammer came into use c 1840 The stone hammer is the emblem of Thor. See also PNEUMATIC APPLIANCES AND TOOLS See Thomas Hibben, *The Carpenter's Tool Chest* (1933), E M. Wyatt, *Common Woodworking Tools* (1936); A P Morgan, *Tools* (1948).

Hammerfest (hă'mŭrfĕst), city (pop. 3,588), Finnmark co., N Norway, a port on small Kval island It is the northernmost city of Europe, but its harbor is always ice free. A fishing, whaling, and sealing center, Hammerfest exports cod-liver oil, train oil, furs, and fish. Incorporated in 1789, it was destroyed by fire in 1890 and was reconstructed on entirely modern lines It served as a German naval base in the Second World War. Before evacuating the city, the Germans demolished it thoroughly, but reconstruction was soon begun.

Hammer-Purgstall, Joseph, Baron von (yō'zĕf fŭn hă'mŭr-pōōrk'shtal), 1774–1856, Austrian diplomat and Orientalist An assiduous worker, he spent his life trying to make the literature and lore of Persia, Arabia, and Turkey known in Germany He influenced Rückert, and his translation of the Persian poet Hafis inspired Goethe's *Divan*

Hammersmith, metropolitan borough (1931 pop 135,523, 1948 estimated pop 115,800) of W London, England, just W of Kensington Here were the Kelmscott Press, founded by William Morris, and the Doves Press of Cobden-Sanderson St Paul's School for boys was founded in 1509 by John Colet Milton and Pepys were both at St Paul's before going to Cambridge

Hammerstein, Oscar (hă'mŭrstĭn), 1847–1919, German-American operatic impresario He made his fortune on a cigar-making machine In 1888 he built the Harlem Opera House, and in 1892 the Manhattan Opera House The scene of his principal activities, however, was a second Manhattan Opera House, built in 1906, where he gave noteworthy productions, brought many fine singers to the United States, and introduced *Louise, Pelléas et Mélisande,* and *Elektra* to the American public In 1910 the Metropolitan Opera Company bought his interests, stipulating that he was to produce no more operas in the United States for 10 years Upon the failure (1913) of an operatic venture in London, he returned to New York and built the American Opera House (later called the Lexington Opera House), but his plans to produce opera there were halted by court order

Hammerstein, Oscar, 2d, 1895–, American lyricist and librettist, b New York city, grad Columbia, 1916, grandson of Oscar Hammerstein. With the composer Richard Rodgers he has brought to the stage the musicals *Oklahoma!* (1943), *Carousel* (1945), *Allegro* (1947), and *South Pacific* (1949) All but *Allegro* made theatrical history by running for great lengths of time, notable also is the fact that serious plots and sometimes tragic overtones are employed, contrary to previous musical tradition Earlier, Hammerstein had written books and lyrics for *Rose Marie* (1924), with music by Rudolf Friml, *Desert Song* (1926) and *New Moon* (1928), both with music by Sigmund Romberg, and *Show Boat* (1927), to Jerome Kern's score

Hammett, Dashiell (dăshĕl'), 1894–, American writer of detective fiction, b Eastern Shore of Maryland He had been a detective and a reviewer of detective fiction when his first novel, *Red Harvest* (1929), appeared Among his best works are *The Maltese Falcon* (1930) and *The Glass Key* (1931) *The Thin Man* (1932) was so successful as a moving picture that Hammett has since written little except film plays His fiction is fast-paced and realistic and his dialogue excellent He was a founder of the "tough" school of detective fiction

hammock, suspended bed, usually of canvas, netting, or leather The hammock and its name were introduced to Europeans by Columbus, who learned of them from American Indians Hammocks of heavy canvas were formerly much used by sailors, especially in naval vessels, and were suspended at night from hooks in the deck beams and stowed away during the day

Hammoleketh (-mŏ'lŭkĕth) [Heb , =the queen], mother of Ishod 1 Chron 7 18

Hammon, Jupiter, c 1720–c.1800, American Negro poet, a Long Island slave His religious poem *An Evening Thought,* printed in 1761, preceded the publication of Phillis Wheatley's poems In 1786, in an address before the African Society of New York, Hammon advised his fellow slaves not to revolt and advocated that the masters should free their slaves voluntarily. See Vernon Loggins, *The Negro Author* (1931)

Hammon. 1 Unidentified Asherite town. Joshua 19 28 **2** See HAMMATH

Hammond, James Henry, 1807–64, governor of South Carolina (1842–44), b. Newberry co , S C , grad South Carolina College (now the Univ. of South Carolina), 1825. A lawyer and the owner of large plantations on the Savannah river, Hammond from the days of the nullification movement was firm in his belief that it was to the interest of Southern states to secede from the Union. This belief he voiced boldly (1835–36) in the U S. House of Representatives in speeches opposing antislavery petitions and other actions of abolitionists As governor he considered the times, marked by the turmoil over the tariff of 1842, ripe for secession. He attended the Nashville Convention of 1850, but adjudged its results ineffective. In 1857 he was elected to the U S. Senate and there, in reply to William Seward, made his famous "Cotton is King" speech Strangely enough, as the crisis approached he be-

gan to doubt the wisdom of secession, thinking the South could attain its desired ends within the Union. He later supported the Confederacy, though he criticized the government of Jefferson Davis. See biography by Elisabeth Merritt (1923).

Hammond, John Hays, 1855–1936, American mining engineer, b. San Francisco, grad Yale, 1876 After studying in Germany he became attached (1880) to the U S Geological Survey, examining California gold fields. Afterwards he met with several adventures in the Southwest, in Mexico, and in the Andes while doing engineering work He went (1893) to South Africa and was soon employed by Cecil Rhodes Involved (1895–96) in the Jameson raid, Hammond was captured and sentenced to death by the Boers He was soon released upon payment of $125,000, and he returned to the United States in 1900 He was associated with important financial interests, promoting many mining and hydroelectric projects He served (1922–23) as chairman of the U.S. Coal Commission See his autobiography (1935). His son **John Hays Hammond, Jr**, 1888–, b San Francisco, grad Yale, 1910, gained note as an inventor and an electrical engineer He became a director of the Radio Corp of America His numerous inventions include torpedoes for coastal defense, incendiary projectiles, and radio, telegraphic, and telephonic apparatus

Hammond, Laurens, 1895–, American manufacturer and inventor, b Evanston, Ill , M E Cornell Univ , 1916 Originally a manufacturer of electric clocks, he later turned to the invention and manufacture of electric musical instruments The pipeless Hammond organ, first marketed in 1935, produces sounds by amplified electrical vibrations, the Novachord imitates the tones of orchestral instruments

Hammond. 1 City (pop 70,184), NW Ind , near Lake Michigan between Gary and Chicago, on the Grand Calumet, settled 1851, inc 1884 It is an important industrial center in the Calumet region and has railroad repair shops, chemical works, surgical-supply factories, and soap plants The impetus for its early growth was the location of abattoirs here **2** City (pop 6,033), SE La , E of Baton Rouge, settled 1855, inc 1888 It is called the "strawberry capital of America " A state experiment station and Southeastern Louisiana College are here

Hammondsport, village (pop 1,112), S N Y , at the southern end of Keuka Lake, in a grape region, inc 1871 Champagne and other wines are produced Glenn Curtiss was born in the village and made aviation experiments here

Hammonton, town (pop 7,668), S central N J , SE of Camden, settled in the 1850s, inc 1866 It is the center of a fruit region, with canneries and a cooperative market

Hammoth-dor (hăm'-) see HAMMATH

Hammurabi (hăm'ōōrä'bē), fl 2100 B C , king of BABYLONIA, known from his many letters and his law code He was a founder of the greatness of Babylon, and the letters reveal his imperial interest in the whole Tigris and Euphrates valley His code of laws is one of the greatest of ancient codes, it is carved on a diorite column, in 3,600 lines of cuneiform, it was found at Susa and is now at Paris It is particularly strong in prohibitions of defrauding the helpless, and it is genuinely humanitarian One savage feature is the retributive nature of the punishment, which follows "an eye for an eye" literally The biblical Amraphel, ally of CHEDORLAOMER, is identified by some with Hammurabi Other systems of dating place Hammurabi much later, possibly c 1700 B C

Hamonah (hămō'nu) [Heb , =multitude], name to be given a city in the prophecy in Ezek 39 16

Hamon-gog (hā'-) [Heb , =multitude of Gog], name to be given a valley in the prophecy in Ezek 39 11–16

Hamor (hā'-) [Heb , =she-ass], head of the family of whom Abraham bought his tomb Gen 34 2–31 Emmor Acts 7 16

Hampden, John (hămp'dŭn, hăm'dŭn), 1594–1643, English statesman, cousin of Oliver Cromwell He served in Parliament from 1621 His conviction in 1637 for refusing to pay ship money, a tax historically imposed only in the maritime counties, inflamed popular resentment against Charles I Hampden was one of the five members whose attempted arrest by Charles in person (1642) helped to precipitate the civil war He raised a regiment for the parliamentarians, fought at Edgehill and Reading, and was mortally wounded at Chalgrove Field, fighting Prince Rupert His stalwart resistance to Charles made Hampden a popular hero of the parliamentarians See biography by Hugh Williamson (1933)

Hampden, Walter (hăm'dŭn), 1879–, American actor, whose real name was Walter Hampden Dougherty, b. Brooklyn, N.Y After studying acting in Paris he made his stage debut in London (1901) in classical repertory. In 1907 he returned to the United States, supporting Nazimova in an Ibsen series and later appearing with distinction in Kennedy's *Servant in the House* and in Shaksperian drama. After 1923 he acted with his own company in a variety of works which included Ibsen's *Enemy of the People* and *Caponsacchi* (Arthur Goodrich's adaptation from Browning's *Ring and the Book*) and in Brian Hooker's adaptation of Rostand's *Cyrano de Bergerac*

Hampden (hăm'dun, hămp'-). **1** Town (pop 2,591), S Maine, on the west bank of the Penobscot below Bangor; settled 1767, inc 1794 In Sept , 1814, the village was plundered by a British force from Castine A park commemorates Dorothea Dix, born in Hampden **2** Rural town (pop 1,023), S Mass , settled c 1740, set off from Springfield 1878

Hampden-Sydney College, at Hampden-Sydney, Va , near Farmville, for men, opened by Presbyterians as an academy 1776, chartered as a college 1783

Hampshire (hămp'shĭr, -shûr) or **Hants** (hănts), maritime county (1,649 sq mi , 1931 pop 1,102,770, 1948 estimated pop 1,106,310), S England. The area and population are of the mainland only, which is the administrative county of Southampton The old county of Hampshire includes also the Isle of WIGHT WINCHESTER, the county town, is famous for its cathedral and its public school Hampshire is undulating and is crossed by two chalk downs, rising in places to more than 1,000 ft The principal rivers are the Test, the Itchen, and the East Avon The region is devoted to sheep raising and dairy farming It also has extensive shipbuilding and a large maritime trade SOUTHAMPTON, on Southampton Water, which extends northwest from the confluence of the Solent and the Spithead, is one of the chief ports of Britain Portsmouth is also an important port Hampshire was the nucleus of the Anglo-Saxon kingdom of Wessex and has numerous historical and literary associations Since the Local Government Act of 1888 the mainland has officially been known as the county of Southampton See Arthur Mee, *Hampshire with the Isle of Wight* (1939)

Hampshire sheep, breed of large sheep native to Hampshire, England, where they were derived by crossbreeding Southdowns, Cotswolds, and other existing breeds The sheep is hornless and has a black face and black legs It has spread widely over the world on farms and on the range, and is one of the leading breeds in the United States, being popular in both the East and the West for the production of market lambs

Hampstead (hămp'stĭd, hăm'-), metropolitan borough (1931 pop 88,947, 1948 estimated pop 95,480) of NW London, England It is a residential district, popular with writers and artists Among those who have lived here are Keats, Constable, Du Maurier, and Kate Greenaway **Hampstead Heath,** a public park of 869 acres, is on a hill above Old Hampstead

Hampton, Wade, c 1752–1835, American planter and general, b Halifax co , Va After serving as a colonel under Gen Thomas Sumter in the American Revolution, he took part in South Carolina politics, opposing the ratification of the Federal Constitution and serving as a U S Representative (1795–97, 1803–5) He developed large cotton plantations in South Carolina before 1800, held sugar plantations in Mississippi after 1811, and was reputed to be the wealthiest planter of his day in America A major general in the War of 1812, he was given command of a force which was to march from N New York to the St Lawrence and then, after effecting a union with Gen James Wilkinson's army, move against Montreal He was turned back in the battle of CHATEAUGAY, blamed by Wilkinson for the failure of the campaign, and resigned his command Wade Hampton (1818–1902) was his grandson

Hampton, Wade, 1818–1902, Confederate general, b. Charleston, S C , grad South Carolina College (now Univ of South Carolina), 1836, grandson of Wade Hampton (c 1752–1835) Hampton, a wealthy planter, served in the South Carolina legislature from 1852 to 1861 In the Civil War he raised Hampton's Legion, which he led at the first battle of Bull Run He commanded an infantry brigade in the Peninsular campaign, being made a brigadier general in May, 1862, but in July was given a brigade in the cavalry of J E B STUART He was active in most of Stuart's operations, (1862–64), and when Jeb was killed in 1864, Hampton succeeded him as commander of the cavalry corps Handicapped by lack of mounts, he was still a match for the numerically superior Union cavalry in fighting around Richmond and Petersburg In Jan., 1865, Hampton took part of his force to the Carolinas, where he was engaged in covering J E Johnston's army until the surrender to Sherman He had been promoted lieutenant general in Feb , 1865 In the memorable election of 1876, the Democrats of South Carolina were led to victory by Hampton, their candidate for governor Daniel H Chamberlain, the carpetbagger incumbent, disputed the result, but when, in April, 1877, Federal troops were withdrawn, he had no support More for this political triumph, which restored home rule, than for his military prowess is Hampton a state hero He was reelected in 1878 and until 1890 was the dominant figure in South Carolina politics In that year Benjamin TILLMAN led his forces in a successful revolt against Hampton's rule, and Hampton, who had served in the U S. Senate after 1879, was defeated for reelection. He was (1893–99) commissioner of Pacific railroads. See E L Wells, *Hampton and His Cavalry* (1899) and *Hampton and Reconstruction* (1907), A B Williams, *Hampton and His Red Shirts* (1935), D S. Freeman, *Lee's Lieutenants* (3 vols , 1942–44), M. W. Wellman, *Gaunt in Gray* (1949)

Hampton, former urban district (1931 pop. 13,061), since 1937 part of Twickenham, Middlesex, England, on the Thames and WSW of London David Garrick's house is here **Hampton Court Palace** was built by Cardinal Wolsey in 1515 as his private residence After his downfall it was taken by Henry VIII and continued to be a royal residence to the time of George II William III had part of it torn down and rebuilt by Christopher Wren It has an art gallery and gardens open to the public Many of its rooms are occupied by royal pensioners See Edward Yates, *Hampton Court* (1935) **The Hampton Court Conference** was held in 1604, early in the reign of James I, to seek a basis of agreement between the Puritans and the Established Church Its results were most unsatisfactory to the Puritans, and many Puritan clergymen were expelled

Hampton. 1 City (pop 4,006), co seat of Franklin co , N Iowa, S of Mason City, founded 1856, inc 1870 It is a trade and processing center in a farm and livestock area Beeds Lake State Park is near by **2** Town (pop 2,137), SE N H , S of Portsmouth, inc 1639 Hampton Beach is a resort The town is the birthplace of Henry Dearborn Whittier lived at "Elmfield " **3** City (pop 5,898), SE Va , one of the ports of HAMPTON ROADS The courthouse of Elizabeth City co is here One of the oldest continuous English settlements in the country, Hampton was settled in 1610 on the site of an Indian village, laid out in 1680, and incorporated as a town in 1849, as a city in 1908 It was sacked by the British in 1813 and in 1861 was burned by Confederates It has important fisheries and ships large quantities of oysters and crabs Near by is Langley Field, a U S army air base opened in 1917 The city is the seat of **Hampton Institute** (Negro, nonsectarian, coeducational), opened in 1868, chartered in 1870, and called a normal and agricultural institute until 1930 It became a college in 1920 and has divisions of agriculture, business, education, home economics, trades and industries, and general education It was founded by the American Missionary Association through the efforts of Samuel C Armstrong and planned as "education for life " Booker T Washington and other early Tuskegee teachers studied at Hampton Institute Indians attended from 1878 to 1923 It is the best-endowed school for Negroes and was the first to become internationally known Students perform much of the manual labor There is an anthropology museum

Hampton Institute see HAMPTON, Va

Hampton Roads, roadstead, SE Va , between Old Point Comfort and Sewall Point, through which the waters of the James, Nansemond, and Elizabeth rivers pass into Chesapeake Bay Four miles long and 40 ft deep, it is one of the finest natural harbors in the world, with Newport News and Hampton on the north and Norfolk and Portsmouth on the south Newport News, Norfolk, and Portsmouth constitute the Port of Hampton Roads, under the State Port Authority of Virginia (1926) —one of the busiest U S seaports The roads have long been important to the U S navy, and the operating base at Norfolk is headquarters of the Atlantic Fleet The Civil War battle of Hampton Roads (March, 1862) was featured by the fight between the ironclads MONITOR AND MERRIMAC

Hampton Roads Peace Conference, meeting held on Feb 3, 1865, on board the Union transport *River Queen* in Hampton Roads with the object of ending the Civil War President Lincoln and Secretary William H Seward represented the Union, and A H Stephens, R M T Hunter, and J A Campbell, the Confederacy It was brought about through the efforts of Francis P BLAIR (1791–1876) Unofficially, but with Lincoln's knowledge, Blair had discussed with Jefferson Davis the possibility of restoring peace through a united opposition to European intervention in Mexico Lincoln's terms—reunion, acceptance of emancipation, immediate cessation of hostilities, and the disbanding of all Confederate forces—proved unacceptable to the South, and the conference failed.

hamster, small rodent native to the temperate parts of Europe and of W Asia It has a rather thickset body growing to a length of about 6 in , and its hairy tail is only ½ in long The coat is usually some shade of brown or gray above, sometimes black or marked with black, and the under parts are white The head is relatively broad, the ears round, and there are large internal cheek pouches In the wild state it feeds in summer on small animals and in winter lives on grain which it stores in quantities in underground chambers It was introduced in the United States as a laboratory animal and as a pet

Hamsun, Knut (kŭn'ōōt' hăm'sōōn), 1859–, Norwegian novelist. He led a wandering life and on his

second visit to America (1886–88) worked as a streetcar conductor in Chicago, as a lecturer in Minneapolis, and as a harvest hand in the wheat fields of North Dakota. Returning to Europe, he published a scathing book on the cultural life of modern America (1889) and the novel *Hunger* (1890, Eng tr , 1899), which, for its unprecedented naturalism, aroused a great deal of criticism. In Paris, Hamsun wrote *Pan* (1894), an immediate success. He wrote a trilogy of plays, a volume of lyrics (1903), and in 1917 the novel *The Growth of the Soil* (Eng. tr , 1920), which was awarded the 1920 Nobel Prize in Literature Later works are *Vagabonds* (1927; Eng tr., 1930), *The Road Leads On* (1933; Eng tr , 1934), and *The Ring Is Closed* (1936, Eng tr , 1937). In the Second World War, Hamsun lost his popularity because of his open acceptance and approval of the German invasion of his country He was tried as a collaborationist in 1947 and fined $85,000. See H. A Larsen, *Knut Hamsun* (1922), Alrik Gustafson, *Six Scandinavian Novelists* (1940).

Hamtramck (hămtrā'mĭk), city (pop. 49,839), SE Mich , within the confines of Detroit, inc as a village 1901, as a city 1922 Its population, largely Polish, grew mainly after the coming of the automobile industry c 1910 Metal and roofing products and machinery are made Hamtramck's public school system under the leadership of M. R Keyworth (1923–35) undertook a notable plan of education for democracy.

Hamuel (hā'mū'ĕl), Simeon's grandson 1 Chron. 4 26

Hamul (hā'mŭl), grandson of Judah Gen. 46 12

Hamun-i-Helmand (hämōōn'-ē-hĕl'mund), marshy lake, area 5,000 sq mi , on the border of Iran and Afghanistan It is fed by the Helmand, the Farah, and other rivers It sometimes overflows into the Gaud-i-Zireh, another swamp

Hamutal (hămū'-), mother of Jehoahaz and Zedekiah. 2 Kings 23.31, 24 18, Jer 52 1

Han (hän), dynasty of China, which ruled from 202 B C. to A D 220 Liu Pang, the first Han emperor, had been a minor official under the Ch'in dynasty After the fall of the Ch'in he advanced from the Hwai river valley to conquer the feudal kingdoms to the north and south and the strategic area at the confluence of the Wei and Yellow rivers. In this fruitful region guarded by the Yellow River to the east and the Tsingling mts to the south, the Han emperors ruled for 400 years with one interruption, A D c.9 an agrarian reformer seized the throne and established the Hsin dynasty, which divided the Early or Western Han period from the Later or Eastern Han period, which began A D c.25 The entire Han era was one of political and cultural centralization and expansion. The writing brush and paper and ink came into wide use, the consequent modification of the written characters led to editing of texts which scholars until then had inscribed on stone. The first dictionary and the first encyclopedic history of China were compiled. The coming of Buddhism increased cultural ties with India and other parts of the Near East Trade with border tribes was increased to pacify them and to gain their allegiance The dynasty collapsed A.D. c 220 and was followed by some 350 years of smaller political units, including the Three Kingdoms and the Tsin and the Sui dynasties

Han (hän), river, c.800 mi long, rising in SW Shensi prov., China It flows E through Shensi prov. and SE through Hupeh prov to join the Yangtse river At the junction of the rivers lie the cities of Hankow, Wuchang, and Hanyang Much of the Han is navigable

Hanaford, Phoebe Ann (Coffin) (hă'nufurd), 1829–1921, American Universalist minister She was the first woman to be regularly ordained (1868) in New England.

Hananeel (hănă'nēĭl, hăn'ŭmēl), son of Jeremiah's uncle Shallum Jer 32.7–9,12,44

Hanan (hā'-) [Heb ,=merciful] 1 Reader with Ezra in explaining the law. Neh 8 7 2 Sealer of the covenant, probably the same as the preceding Neh. 10.10. 3 Descendant of Saul. 1 Chron 8 38, 9.44. 4 One of David's guard. 1 Chron 11 43 5 One of Nehemiah's treasurers. Neh 13 13 6 Father of men who had a room in the Temple Jer. 35.4 7, 8 Sealers of the covenant Neh. 10 22,26. 9 Family of Nethinim Ezra 2.46, Neh. 7.49. 10 Benjamite chief. 1 Chron. 8.23.

Hananeel (hănă'nēĭl, hă'nŭnēl) [Heb.,=God is gracious], tower, on the Jerusalem wall. Neh. 3 1, 12.39, Jer. 31.38; Zech. 14.10.

Hanani (hă'nŭnī, hănā'-) [Heb.,=gracious]. 1 Chief singer of David. 1 Chron. 25 4,25. 2 Seer who reproved Asa 2 Chron. 16 7. Apparently this is the father of Jehu 1 Kings 16 1,7. 3 Governor of Jerusalem. Neh. 1 2; 7.2. 4 Priest. Ezra 10.20. 5 Singer. Neh. 12.36.

Hananiah (hănŭnī'ŭ) [Heb.,=grace of God] 1 One of the Three Holy Children 2 False prophet. Jer. 28. 3 Son of Zerubbabel. 1 Chron 3 19 4 Musician. 1 Chron 25.23. 5 Father of Zedekiah 4. 6 Grandfather of Irijah. 7 Benjamite 1 Chron. 8.24 8 Captain under King Uzziah. 2 Chron. 26.11. 9 Man who had a foreign wife. Ezra 10.28. 10 Sealer of the covenant. Neh. 10.23. 11, 12 Repairers of the wall. Neh. 3.8,30. 13 Chief priest. Neh 12.12. 14 Priest at the dedication of the walls Neh. 12 41 15 Governor in Jerusalem. Neh. 7.2,3 Ananias and Annas are Greek forms of this name.

Hanau (hä'nou), city (1939 pop. 42,191; 1946 pop. 22,067), Hesse-Nassau, W Germany, on the Main and Kinzig rivers. It has a diamond-polishing and jewelry industry. It suffered heavily in the Second World War. Jakob and Wilhelm Grimm were born here

Hancock, John, 1737–93, American Revolutionary patriot, signer of the Declaration of Independence, b Braintree, Mass , grad Harvard, 1754 From an uncle he inherited Boston's leading mercantile firm, and naturally he opposed the Stamp Act (1765) and other British trade restrictions In 1768 his ship *Liberty* was seized as a smuggler and confiscated by the crown A riot ensued, and later the ship was burned Hancock was hailed as a martyr and elected (1769) to the General Court, where he joined Samuel Adams in advocating resistance to England Gen Thomas Gage issued a warrant for their arrest, but during the confusion of the battles of Lexington and Concord, which began the American Revolution, they escaped Hancock was a member (1775–80) and president (1775–77) of the Continental Congress His name appears first on the Declaration of Independence, and the term "John Hancock" is often used to mean a signature He was governor of Massachusetts (1780–85, 1787–93) See biographies by Lorenzo Sears (1912) and H S Allan (1948)

Hancock, Winfield Scott, 1824–86, Union general in the Civil War, b Montgomery Square, near Norristown, Pa , grad West Point, 1844. He served with distinction in the Mexican War and was chief quartermaster on the Pacific coast when the Civil War broke out. Made a brigadier general of volunteers in Sept , 1861, Hancock fought in the Peninsular campaign (1862), in the Antietam campaign he succeeded to the command of a division His command was heavily engaged in the battles of Fredericksburg (1862) and Chancellorsville (1863) In the Gettysburg campaign Hancock, now commanding the 2d Corps was most conspicuous Gen George G Meade chose to fight at Gettysburg on his recommendation, and in the last two days of the battle Hancock was foremost in repulsing the Confederate attacks, particularly Pickett's charge on July 3, 1863 He was severely wounded Hancock led the 2d Corps in the Wilderness campaign and in the operations around Petersburg until Nov , 1864, when he left to recruit a new corps His course as chief of the military department of Louisiana and Texas after the war was characterized by a wise humanity, which was not approved by the radicals in Congress He was transferred to another command at his own request The Democratic party nominated him for President in 1880, on his military record Garfield defeated him, but with only a slight popular plurality See Almira Hancock, *Reminiscences of Winfield Scott Hancock* (1887), biography by F A Walker (1895)

Hancock. 1 City (pop 5,554), Keweenaw peninsula, extreme N Mich , on the Portage Lake Ship Canal, in a copper region, platted 1859, inc as a village 1875, as a city 1903 There are foundries and machine shops Suomi College and Theological Seminary (Finnish) is in Hancock 2 Resort village (pop 1,581), S N Y , at the junction of the east and west branches of the Delaware SE of Binghamton, inc 1888 Wood alcohol is made here

hand, terminal portion of the arm. The hand includes the digits (the fingers and thumb) the bones of which are called phalanges, the metacarpus or hand proper, and the carpus or wrist The human hand contains eight bones in the wrist, five long, parallel metacarpals, and three phalanges in each finger and two in the thumb In man and certain other higher mammals, structural modifications permit the performance of intricate motions. In apes, the hand is chiefly a prehensile organ, whereas in man, in addition to prehensile ability, the hand is capable of skillful performances, e.g , writing, sewing, and the fingering of musical instruments These motions are made possible by the action of small muscles completely within the hand and of tendons of the arm muscles and by the coordination of nerve structures

handball, indoor and outdoor ball game played by two or four persons on a one-wall or four-wall court In the one-wall game, the court is 20 ft. by 34 ft The short line, from behind which the ball is served, is marked off 16 ft from, and parallel to, the wall, which is 16 ft. high. The player hits the ball—made of hard rubber, 1⅞ in. in diameter, and weighing 2 3 oz.—with either of his hands, against the wall before or after it has struck the floor once. His object is to keep the ball out of reach of the opponent (who tries to strike it back against the wall) but within bounds of the court. A point is scored only when the nonserver cannot return the ball against the wall. The serve changes hands when the server cannot return the ball, and the first player or first pair of partners to get 21 points wins. In the four-wall game, the court, 23 ft. by 46 ft., is surrounded by three walls 23 ft. high and a back wall 12 ft. high. Though the ball is played off all four walls, the scoring is similar in principle to the one-wall game. Special gloves are used to protect the hands. Four-wall handball was played in Ireland and England for many centuries and was introduced in the 1870s into the United States, where its popularity declined in the 20th cent. with the innovation of the one-wall game. Famous names in handball are Philip Casey, John Cavanagh, and Joseph P. Platack. See Amateur Athletic Union of the United States, *Official Rules. Handball* (1944).

Handel, George Frideric (hăn'dĕl), 1685–1759, German-English composer, b Halle His name originally was Georg Friedrich Handel. Intended by his father, a barber-surgeon, for a legal career, he displayed such musical talent that he was sent to Zachau, organist of the Liebfrauenkirche, Halle, with whom he studied for three years He studied law at the Univ. of Halle but left (1703) to join the opera orchestra at Hamburg There, in 1705, his first two operas, *Almira* and *Nero*, were successfully produced He went to Italy, where the operas *Rodrigo* (Florence, 1707) and *Agrippina* (Venice, 1709) were produced, the latter very successfully. Domenico Scarlatti bested him in contest at the harpsichord, though as an organist Handel was considered without peers In 1710 he became musical director to the elector of Hanover. In 1711 he produced his opera *Rinaldo* in London. He again visited England in 1712 and lived there the rest of his life, for in 1714 the elector became George I of England In 1719 an opera company, the Royal Academy of Music, was formed under the musical direction of Handel, Attilio Ariosti, and Giovanni Battista Bononcini, all of whom composed operas for it It failed in 1728, having been dealt the death blow by John Gay's *Beggar's Opera* Handel continued trying to present Italian opera in London until 1741, when his last opera, *Deidamia*, failed Much of Handel's finest music is to be found in his 46 operas despite their neglect Among them are *Atalanta* (1736), *Berenice* (1737), and *Serse* (1738), which contains the tenor aria now known as *Largo* His *Messiah* was presented in Dublin in 1742 Stylistically it stands apart from the rest of his oratorios (32 in all), and its immense popularity has led many to believe that Handel was primarily a church composer Other outstanding oratorios are *Acis and Galatea* (1720), *Esther* (1732), *Israel in Egypt* (1736–37), *Samson* (1743), and *Judas Maccabeus* (1747) He also composed over 100 Italian solo cantatas, two books of harpsichord suites (1720, 1733), three sets of six organ concertos (1738, 1743, 1760, the last book published posthumously), and anthems for the coronation of George II, which has been used for all subsequent coronations While the fabulous duke of Chandos was his patron, he composed the 11 Chandos Anthems (1716–19) Handel's sight became affected in 1751, though by 1753 he was totally blind, he continued to conduct performances of his works for some time He was buried in Westminster Abbey See his letters and writings (ed by E H Muller, 1935), biographies by W S Rockstro (1883), E J Dent (1935), C F A Williams (rev ed , 1935), Herbert Weinstock (1948), and Newman Flower (rev ed , 1947), R. M Myers, *Handel's Messiah* (1948)

handicraft. see arts and crafts

handkerchief. In classical Greece pieces of fine cotton, often perfumed, were known as mouth or perspiration cloths From the 1st cent B C Roman men used an oblong of linen (the *sudarium*) chiefly to wipe perspiration from the face and hands During the empire the handkerchief was used by patricians of both sexes It was dropped by the praetors as a starting signal in the games and was waved by spectators as a sign of approval In the Middle Ages it was conspicuously displayed by the wealthy, but did not come into general use until the Renaissance Silk, cambric, and lawn lavishly embroidered or laced became fashionable The handkerchief carried in the left hand of the officiating priest in the early Christian church evolved into a folded band which by the 12th cent had become the maniple, worn on the left arm.

Handsome Lake, 1735?–1815, Seneca Indian religious prophet, half brother of Cornplanter After a long illness he had a vision (c 1800) and began to preach new religious beliefs His moral teachings showed some likeness to Christian ethics and had a profound effect among the Iroquois tribes. He advocated giving up the Indian mode of life and taking up agriculture, much to the disgust of Red Jacket Though Christian missionaries opposed Handsome Lake's religion, it nevertheless persisted alongside Christianity. See *The Code of Handsome Lake* (tr. by A. C. Parker, 1913).

Handsworth, suburb of Birmingham, England The Soho ironworks of Boulton and Watt were here

handwriting. Modern handwriting is a development from medieval calligraphy through the Italian hand, a Renaissance simplification of the manuscript writing. A crabbed clerk's style of the late Middle Ages produced the secretary hand, which has given some elements to Anglo-American writing. The Gothic hand is a conservative, German

adaptation of manuscript lettering. Spencerian writing was a 19th-century attempt to restore ornate elegance and the Palmer method and other American systems are utilitarian.

Handy, William Christopher, 1873–, American Negro composer, b. Florence, Ala. In 1896 he began to play the cornet in a minstrel show, with which he toured for many years. Briefly in 1900 he was a member of the faculty of a Negro college in Alabama. He was the first to set down the BLUES, and with his *Memphis Blues* (1912), first written as an election song in 1909, he established Memphis as its home. His songs, such as *St. Louis Blues* (1914) and *Beale Street Blues* (1917), are the classic examples of their type. He was publisher of many of his own compositions and is author of several books, including *Blues: an Anthology* (1926) and his *Collection of Negro Spirituals* (1938). See his autobiography, *Father of the Blues* (1941)

Hanes (hā'nēz), unidentified place, Egypt. Isa. 30 4

Hanford, city (pop. 8,234), co. seat of Kings co., S central Calif., 8 of Fresno, inc. 1891. It is a trade and processing center in the fertile San Joaquin Valley.

hangar (hăng'ur), building for housing and servicing airplanes. Hangars are usually fireproof and are equipped for fire fighting and for carrying out minor repairs. Airship sheds (for lighter-than-air craft) are often called hangars.

Hangchow or **Hang-chou** (both hăng'chou'), city (pop. 606,146), capital of Chekiang prov., E China. It is a port on the Chientang river, near Hangchow Bay. Hangchow was founded A.D. 606. During the 12th cent. it was the capital of the Southern Sung dynasty. Famous for its splendid buildings before its near destruction (1861) by Taiping rebels, Hangchow has a charming natural setting that still attracts many visitors. One of the most beautiful places in the city is Lake Si, 12 mi. in circumference, surrounded by high wooded hills. A railroad junction at the southern terminus of the Grand Canal, the city is a major shipping center. Cloth is manufactured. The Japanese held Hangchow from 1938 until the end of the Second World War, and it fell to the Communists in 1949. **Hangchow Bay,** c.80 mi. long, an arm of the East China Sea, begins at the mouth of the Chientang river. When the tide is coming in, the funnel shape of the bay creates a spectacular bore, 5 to 15 ft. high, which sweeps past Hangchow.

Hanging Gardens of Babylon see BABYLON.

Hango, Finland: see HANKO.

Haniel (hā'nĭĕl, hunī'–) [Heb., =God's grace], Asherite chief. 1 Chron. 7:39.

Hankinson, city (pop. 1,420), SE N.Dak., SW of Wahpeton near the S.Dak. line, inc. 1912. It is in a grain and poultry farm area.

Hanko (hang'kō), Swed. *Hangö* (hăng'ö"), city (pop. 5,363), SW Finland, on a small peninsula projecting into the Baltic Sea. It is a seaport and bathing resort, the harbor is kept ice-free. After the Finnish-Russian War of 1939–40 the Hanko peninsula was leased to the USSR for 30 years as a naval base, but in the Finnish-Russian armistice of 1944 the USSR exchanged it for a 50-year lease on the Porkkala district.

Hankow (hăng'kou"), Mandarin *Han-k'ou,* city (pop. 641,513), E Hupeh prov., China. Its administration is independent of the province. It is at the junction of the Han river with the Yangtse and near Wuchang and Hanyang. Hankow was opened as a TREATY PORT in 1862. The city, a major commercial center, is served by the Peiping-Canton RR, and its harbor accommodates ocean-going vessels.

Hanley, part (since 1910) of STOKE-ON-TRENT, Staffordshire, England, in the Potteries district. It is the birthplace of Arnold Bennett.

Hann, Julius (yōō'lyōōs hän'), 1839–1921, Austrian meteorologist. He became professor of physics in the Univ. of Vienna, founded, edited, and contributed to a meteorological journal, and for the second half of his life was associated with the Central Meteorological Institute in Vienna. His works include the often quoted *Handbuch der Klimatologie* (1897, Eng. tr., 1903) and *Lehrbuch der Meteorologie* (1901). Hann is still one of the foremost authorities in his field. See biography by G. C. Simpson (1925).

Hanna, Marcus Alonzo, 1837–1904, American capitalist and politician, b. New Lisbon (now Lisbon), Ohio. He attended Western Reserve Univ. a short time, then entered his father's wholesale grocery and commission business at Cleveland in 1858. He became a partner in 1862 and rapidly developed as a characteristic American capitalist of the Gilded Age. He became a dealer in coal and iron and was soon interested in coal and iron mines, furnaces, lake shipping and shipbuilding, a bank, a newspaper, an opera house, and a street-railway system. He was active in politics and by 1890 was the ruling Republican power in Ohio. He was instrumental in having William McKINLEY elected governor of Ohio in 1891 and again in 1893. He saved McKinley's reputation when financial ruin threatened, groomed him for the presidency in 1895, and was responsible for his nomination by the Republicans in 1896. Hanna, as chairman of the Republican National Committee, boldly made that campaign a defense of business and property against the doctrines of the Democrats enunciated by William Jennings Bryan, and on that basis secured heavy financial contributions from "big business." He was appointed Senator from Ohio in 1897 after John SHERMAN resigned, nominated the same year for the short and long terms, and subsequently elected for both. He advocated construction of the Panama Canal, opposing the Nicaraguan route, and supported ship subsidies. He was sympathetic toward organized labor. Hanna was a great party boss who significantly exemplified the union between business and politics for purposes of economic policy rather than for personal graft. See biographies by Herbert Croly (1912) and Thomas Beer (1929).

Hanna, town (pop. 1,756), SE Alta., NE of Calgary. There are coal fields around the town.

Hanna, town (pop. 1,127, alt. c.6,780 ft.), S central Wyo., in a coal area, settled 1887, inc. 1936. Near by is the site of Fort Halleck (1862), which protected the overland stage.

Hannah [Heb., =grace], Samuel's mother. Her song is recalled in the MAGNIFICAT. 1 Sam. 1, 2:1–26. The names Anna and Ann are variants of Hannah.

Hannathon (hă'nu–), unidentified place, N Palestine. Joshua 19:14.

Hannay, James Owen, pseud. **George A. Birmingham,** 1865–, Anglo-Irish novelist and Church of Ireland clergyman, b. Belfast. His theological writings were published under his own name, but his humorous novels of Irish life appeared under his pseudonym. These include *Spanish Gold* (1908), *General John Regan* (1913), a play as well as a novel, and *The Smuggler's Cave* (1926).

Hannegan, Robert Emmet, 1903–49, U.S. Postmaster General (1945–47), b. St. Louis, grad. St. Louis Univ. (LL.B., 1925). A lawyer, he entered St. Louis ward politics in 1933 and became (1934) chairman of the city Democratic committee. After efficient administration (1942–43) as collector of internal revenue for E. Missouri, he was named Federal commissioner of internal revenue by President F. D. ROOSEVELT. He succeeded Frank G. WALKER as Democratic national chairman (1944–47) and as Postmaster General.

Hannibal [Punic, =grace of Baal], 247–182? B.C., Carthaginian general, the greatest opponent Rome ever met. From his father, HAMILCAR BARCA, the gallant defender of Sicily in the First Punic War (see PUNIC WARS), he learned hatred of Rome. He succeeded as general in Spain on the death of his brother-in-law, HASDRUBAL, in 221. After consolidating his position for two years, he laid siege to Saguntum, friendly to Rome, and stormed it eight months later. Carthage supported him, and Rome declared war (the Second Punic War, 218–201). With a comparatively small army of picked troops, Hannibal set out to invade Italy by the little-known route overland. He easily fought his way through the Pyrenees and reached the Rhone before the Romans could block his crossing. He moved up the valley to avoid their army, and crossed the Alps. This crossing of the Alps, with a full baggage train and elephants, is one of the remarkable feats of history. Which pass he used is unknown, it may have been the Mont Genèvre or the Little St. Bernard. He descended into Italy and with his superior cavalry overran the Po valley, winning recruits from the Gallic tribes. A Roman force tried to stop him on the Trebbia (near Piacenza) only to be wiped out. In the spring of 217 he crossed the Apennines and marched toward Rome. At Lake Trasimeno he destroyed the main Roman army, but he avoided the strong walls of Rome and moved southward to stir up a general revolt. In 216 the Romans, having replaced the cautious FABIUS Cunctator, advanced and gave battle at Cannae, but by brilliant cavalry tactics Hannibal managed to surround the entire force and cut it to pieces. S Italy now largely went over to him, including the important city Capua. Insufficiently supported from home, he could not assail Rome and had to content himself with ravaging and with reducing smaller places. In 212 the tide turned against him. In 211 the Romans retook Capua, despite his rapid march to within 3 mi. of Rome to entice them away. In 207 he fought his way for the last time into a position near Rome, but the defeat and death of his brother HASDRUBAL on the Metaurus (207) made his position hopeless, and he withdrew into the mountains of Bruttium (the Abruzzi). Recalled to Carthage in 203 to check the victorious advance of Scipio (see SCIPIO AFRICANUS MAJOR) in Africa, he was decisively beaten at Zama, after a close battle (202). On the conclusion of peace (201), Hannibal became the chief minister of state, reformed the government, and, without extra taxation, paid the heavy tribute imposed by Rome. Rome now demanded his person (c.195), and he went into voluntary exile, stopping with Antiochus III of Syria. Later when, in Bithynia, he was about to be delivered to the Romans, he poisoned himself. Though our knowledge of him is entirely through his enemies, Hannibal appears to have been both just and merciful. His ability to raise troops on foreign soil and to hold their constant loyalty has never been surpassed, and for tactical genius and indomitable energy he has had few equals. See biography by T. A. Dodge (1893). See also bibliography under ROME.

Hannibal, city (pop. 20,865), NE Mo., on the Mississippi and S of Quincy, Ill., founded 1819. A river port, railroad center, and industrial city, it has varied manufactures, including shoes, cement, lumber products, steel, and car wheels. Hannibal-La Grange College (junior, coeducational) is here. The city is famous as the boyhood home of Mark TWAIN; a museum, a statue, a lighthouse, and a bridge across the Mississippi commemorate him. The Hatch dairy experiment station and Saverton Dam are near by.

Haniel (hă'nĭĕl) [Heb., =HANIEL], Manassite prince. Num. 34:23.

Hanno, fl. c.470? B.C., Carthaginian navigator. He founded seven towns on the Atlantic shore of Morocco and probably explored to Sierra Leone. See Wilfred Schoff, ed., *The Periplus of Hanno* (1913).

Hanno, fl. 250–200 B.C., Carthaginian statesman, leader of the conservative land-owning party and consistent opponent of the Barca family. His refusal to pay Hamilcar's mercenaries brought on their great revolt (240–238 B.C.). He favored expansion in Africa (where he extended the Carthaginian conquests to Theveste) and friendship with Rome. Hanno's unwillingness to send help overseas was a factor in Hannibal's final failure in Italy.

Hannover, Germany: see HANOVER.

Hanoch (hā'nuk) [Heb., =ENOCH]. **1** Son of Midian. Gen. 25:4. Henoch. 1 Chron. 1:33. **2** Reuben's eldest son. Gen. 46:9, 1 Chron. 5:3, Ex. 6:14, Num. 26:5.

Hanoi (hă'noi, hūnoi'), city (pop. c.132,000), Indo-China, capital of Tonkin, on the right bank of the Red River. Placed at the center of a network of roads and waterways and connected by rail with Saigon and Kunming, Hanoi is an important shipping center for agricultural and industrial products. The main industries are processing of rice, distilling, tanning and leatherworking, and woodworking. The city consists of the old Annamese town and modern European-style business and residential sections. The 19th-century citadel is largely in ruins. Besides modern public buildings (including a university), the city contains a number of Annamese monuments. The city was from the 7th cent. the seat of the Chinese rulers of Annam and after the 15th cent. an Annamese capital. One of its Annamese names, Dong Kinh, was corrupted by Europeans into Tonkin. Hanoi was occupied by the French briefly in 1873 and again in 1882, from 1902 to the Second World War it was the seat of the French governor general of Indo-China. From 1945 till late 1946 it was the capital of the Viet Nam government, in Dec., 1946, it saw violent fighting between French and Annamese.

Hanotaux, Gabriel (gabrĭĕl' ănôtō'), 1853–1944, French historian and statesman. Twice minister of foreign affairs (1894–95, 1895–98), he greatly furthered the Franco-Russian rapprochement. His chief fame is as a historian, notably as the author of *Contemporary France* (4 vols., 1903–8; Eng. tr., 4 vols., 1903–9) and *Histoire de la fondation de la troisième république* (4 vols., 1925–26). He also edited the multi-volume *Histoire de la nation française.*

Hanover (hă'nōvur), Ger. *Hannover* (hänō'vûr, –fur), former province (1939 area 14,960 sq. mi., 1939 pop. 3,457,477) of Prussia, NW Germany. After the Second World War it was incorporated into the newly formed state of LOWER SAXONY, under British military occupation. Hanover, Osnabrück, Hildesheim, Emden, Lüneburg, Celle, and Göttingen are the principal cities. Very irregular in outline, the province stretched from the Dutch border and the North Sea in the northwest to the HARZ mts. in the southeast. Most of its area is agricultural lowland producing grain, potatoes, and sugar beets. Stock raising is important. Some oil, potash, and coal are mined. The name Hanover originally applied only to the city. Most of the territory was comprised in the duchy of Brunswick, which the house of the GUELPHS retained after 1180. In the repeated subdivisions of Brunswick among the various branches of the family, the branch of Brunswick-Lüneburg emerged as the most powerful. The dukes of Brunswick-Lüneburg played an important part in the Thirty Years War on the Protestant side, and in 1692 Duke Ernest Augustus was raised to the rank of elector. His lands became known as the electorate of Hanover. The marriage of Ernest Augustus to SOPHIA, granddaughter of James I of England, brought (1714) the English throne to his son, Elector George Louis (GEORGE I of England). Personal union of Great Britain and Hanover continued under the house of Hanover (see separate article). Napoleon I gave the electorate to Prussia (1806), but in 1807 he assigned part of Hanover to the kingdom of Westphalia under his brother Jérôme Bonaparte, adding the rest in 1810. In 1813 Great Britain regained possession, and in 1815 the Congress of Vienna raised Hanover to a kingdom, with membership in the GERMAN CONFEDERATION. At the accession (1837) of Queen Victoria in

England, Hanover was separated from the British crown because of the Salic law of succession ERNEST AUGUSTUS, son of George III, became king of Hanover and began his reactionary reign by rescinding the Hanoverian constitution, thus evoking the well-known protest of the seven professors of GÖTTINGEN, the Revolution of 1848 restored the constitution His son, GEORGE V, succeeded in 1851 He sided with Austria in the AUSTRO-PRUSSIAN War (1866) and, as a consequence, lost his kingdom, which was made a Prussian province

Hanover, town (pop 3,290), S Ont , on the Saugeen river and S of Owen Sound

Hanover, Ger *Hannover,* city (1939 pop 470,950, 1946 pop 357,040), NW Germany, on the Leine river An important industrial and commercial center, it produces automobile tires, machinery, iron, steel, and other industrial items It is also an important communications center and has several technical and professional schools After the Second World War, during which more than half of the city was destroyed, Hanover became the capital of the British-occupied state of LOWER SAXONY Dating from the 12th cent , Hanover joined (1386) the Hanseatic League After 1692 it became the capital of the electorate (after 1815 kingdom, after 1866 province) of Hanover (see separate article) Of the important buildings bombed in the Second World War, the Marktkirche (a 14th-century church), the Leineschloss (an 18th-century château), the Gothic city hall, and some others were rebuilt The Leineschloss contains the tombs of Elector Ernest Augustus and his wife Sophia and of George I of England The house of Leibniz, who spent his last years at Hanover, was totally destroyed

Hanover (hă'nōvur) **1** Town (pop 2,875), SE Mass , SE of Boston, settled 1649, set off from Scituate and Abington 1727 Ammunition materials are made here The Samuel Stetson House dates from c 1694 **2** Town (pop 3,425), W N H , near the Connecticut NW of Lebanon, granted 1761 to Connecticut men It is the seat of DARTMOUTH COLLEGE James Freeman Clarke, Henry Fowle Durant, and Laura Bridgman were born here **3** Borough (pop 13,076), SE Pa , E of Gettysburg, inc 1815 Harness-racing horses are bred in this principally agricultural area The first Civil War battle N of the Mason-Dixon line was fought here in 1863 **4** Village, E Va , N of Richmond Patrick Henry long made his home here and here pleaded (1763) his first important case in the courthouse (c 1735) of Hanover co Near by on the Pamunkey river is the decayed village of Hanovertown, which nearly became state capital (1751) In 1864 Grant crossed the Pamunkey here in his attempt to take Richmond

Hanover, house of, royal family, of Guelphic origin (see HANOVER, province), whose accession to the throne of England was established by the Act of SETTLEMENT (1701) and whose claim was based on descent from James I The first Hanoverian king (in 1714) of Great Britain was GEORGE I, elector of Hanover, grandson of James's daughter ELIZABETH, queen of Bohemia, and son of SOPHIA, electress of Hanover His successors were GEORGE II, GEORGE III, GEORGE IV, and WILLIAM IV The Salic law barred women from the succession in Hanover, and when Victoria came (1837) to the British throne, the crowns of Hanover (a kingdom after 1815) and Great Britain were separated After Victoria's marriage the British royal house was that of WETTIN ERNEST AUGUSTUS, son of George III, became king of Hanover and was succeeded by GEORGE V, who lost the crown in 1866

Hansa. see HANSEATIC LEAGUE

Hansard (hăn'surd) Reports of the proceedings of the British Parliament were long printed by Luke Hansard (1752–1828) and his sons Although Hansard began printing them, partly from newspaper reports, in 1774, they were recognized as official in 1803 The reports are now published by His Majesty's Stationery Office, but the name Hansard is still conventionally applied to them

Hanseatic League (hăn"sēă'tĭk, hăn"zē–) or **Hanse towns** (hăns), mercantile league of medieval German towns It was amorphous in character, to date its origin exactly is impossible Originally a *hansa* seems to have been a company of individual traders to foreign lands After the German push eastward and the settlement of German towns in the Slavic lands of the Baltic, the merchant guilds and town associations led, in the 13th cent , to leagues The most notable was the company of German merchants in Gotland with headquarters at WISBY They pushed east and founded a branch establishment at NOVGOROD. The privileges granted Cologne merchants in London were extended to other Germans, and a hanse of German merchants was formed with a guildhall, later the famous STEELYARD Political troubles in the Holy Roman Empire and the difficulties of seafaring merchants—pirates, regulations against foreign merchants, excessive customs—fostered closer union of German towns. In 1241 LÜBECK and HAMBURG concluded a treaty of mutual protection Other cities soon joined this protective association and a strong league grew up, with Lübeck, the central town of the Baltic trade, as leader. Though ports and inland towns from Holland to Poland belonged to the league, the north German cities remained the principal members The league vigorously extended its operations, founding its principal foreign branches (factories) at BRUGES and BERGEN The Hanse towns reached their summit in their victories over WALDEMAR IV of Denmark, gaining the Treaty of Stralsund (1370), which gave them a virtual trade monopoly in Scandinavia They maintained their hegemony for a century thereafter and waged numerous wars, but the formal organization, dating from 1358, marked the end of Hanseatic rise, and the diets of the members meeting at Lübeck were not very significant The number of members fluctuated, though it seems to have been generally a little over 70 Internal dissensions, lack of political assistance from German rulers, the growth of centralized foreign states and consequent loss of Hanseatic privileges, the progress of Dutch and English shipping, and various changes in trade—all these operated against the league The political organization of the league, always subordinate, lost significance in the 16th cent and in the 17th the league itself practically dissolved, though the name has lived on in Lübeck, Hamburg, and BREMEN The complexion of the league as a European organization is unique The customs of training apprentices in the towns and the foreign branches and the general customs of the league are of great interest See Helen Zimmern, *Hansa Towns* (1889), Wilson King, *Chronicles of Three Free Cities, Hamburg, Bremen, Lübeck* (1914), E G Nash, *Hansa* (1929), E R Daenell, *Die Blütezeit der deutschen Hanse* (2 vols , 1905 6)

Hansen, Emil Christian (ĭmēl' krĭs'tyan han'sun), 1842-1909, Danish botanist An authority on fungi, he developed a technique of cultivating pure strains of yeasts, this revolutionized the manufacture of yeast and its use in brewing From 1879 Hansen was head of the physiology department of the Carlsberg Laboratory, Copenhagen

Hansen, Marcus Lee (hăn'sun), 1892–1938, American historian, b Neenah, Wis , grad State Univ of Iowa (B A , 1916, M A , 1917), Ph D Harvard, 1924 He spent almost four years in Europe gathering material for his studies on immigration For *The Atlantic Migration, 1607–1860* (1940), first volume of a projected trilogy, he was awarded (posthumously) the 1941 Pulitzer Prize for history In 1928 he began teaching history at the Univ of Illinois, where he was made full professor in 1930 Among his other books are *Old Fort Snelling, 1819–1858* (1918), *Welfare Campaigns in Iowa* (1920), *German Schemes of Colonization before 1860* (1924), and *The Immigrant in American History* (posthumous, 1940)

Hansen, Martin Alfred (mar'tēn al'frud hăn'sun), 1909–, Danish novelist In the Second World War he worked on the underground newspaper *Folk and Freedom* and contributed poems and stories to the illegal anthology *A Fire Is Burning* (1944–45) His novels include *Colonies* (1937) and *Happy Christopher* (1945)

Hansen, Peter Andreas (pē'tûr ăndrē'ăs), 1795–1874, Danish astronomer, b Schleswig He was director from 1825 of the observatory at Seeberg (near Gotha) which was moved (1859) to Gotha He revised the lunar theory and compiled *Tables de la lune* (1857), which was widely used in the preparation of nautical almanacs He also compiled (with C F R Olufsen) *Tables du soleil* (1853, supplement, 1857)

Hanse towns see HANSEATIC LEAGUE

Hanson, Howard, 1896–, American composer and educator, b Wahoo, Nebr In 1921 he went to Rome, the first composer to enter the American Academy there Upon his return (1924) he became director of the Eastman School of Music, Rochester, N Y , where he established his American Composers Concerts His *Merry Mount* (New York, 1944) ranks high among American operas Most popular of his works are his *Romantic Symphony* (Symphony No 2, 1930), *The Lament for Beowulf* (1925), for chorus and orchestra, and the symphonic poems *Lux Aeterna* (1923) and *Pan and the Priest* (1926)

Hanson, John, 1715–83, first "President of the United States in Congress Assembled," b Charles co , Maryland He served in the Maryland provincial legislature, was active in the patriot cause in the Revolution, and was (1780–82) a member of the Continental Congress and of the Congress of the Confederation Since he was the first President (1781–82) to serve the one-year term under the Articles of Confederation, Hanson is often referred to as the first President of the United States, but his duties were merely those of a presiding officer and bore no relation to the duties of the President under the Constitution. See biography by Seymour Wemyss Smith (1932)

Hanson, town (pop 2,570), SE Mass , SSE of Boston, settled 1632, set off from Pembroke 1820

Hansteen, Christopher (krĭstô'fûr hăn'stăn), 1784–1873, Norwegian astronomer and physicist He was noted especially for his work on terrestrial magnetism. He traveled in Finland and Norway to obtain data for determining the earth's magnetic poles and made magnetic observations in Siberia (1828–30). He directed a triangulation of Norway and taught at the Univ of Christiania from 1814

Hanswurst (hăns'vôrst"), traditional clown of the German stage A fat, vulgar, gluttonous peasant in a green peaked cap, he dominated comedy and insinuated his presence into serious drama In the first half of the 18th cent he was banished from the stage in the reform movement begun by Gottsched and Karoline Neuber

Hants: see HAMPSHIRE

Hanukkah (hu'nōkă), Jewish holiday, the Festival of Lights or the Feast of the Maccabees, also transliterated Chanukah It was instituted by Judas Maccabaeus and his brothers in 165 B C to celebrate the dedication of the new sacrificial altar in the Temple of Jerusalem where, three years earlier, one had been erected on the same day by Antiochus Epiphanes (Antiochus IV) to serve as a pagan altar upon which the Jews were to offer sacrifices to heathen deities The festival occurs usually in December and lasts eight days The principal feature is the lighting of special Hanukkah candles, one the first evening, two the second, and so forth

Hanun (hā'–) (Heb , =favored) **1** King of Ammon His insolent reception of David's messengers brought on a disastrous war 2 Sam 10, 1 Chron 19 He may be the same as SHOBI. **2, 3** Two workers on the wall Neh 3 13,30

Hanway, Jonas, 1712–86, English philanthropist He is said to have introduced the use of the umbrella in London After traveling widely in Persia and spending some time in St Petersburg, he returned to England and devoted himself to numerous reform movements and philanthropies, founding hospitals and homes, establishing Sunday schools, and working for the alleviation of the condition of chimney sweeps and of foundlings He wrote on a variety of subjects See biographies by R E Jayne (1929) and J H Hutchins (1940)

Hanyang or **Han-yang** (han'yang'), city (pop 69,483), E Hupeh prov , China It is at the juncture of the Han river with the Yangtse river and near Hankow and Wuchang Hanyang contains large steelworks and ironworks

Hapeville, residential city (pop 5,059), NW Ga , southern suburb of Atlanta, inc 1891

Hapgood, Norman, 1868–1937, American editor, b Chicago, grad Harvard, 1890, and Harvard Law School, 1893 He was a leading figure in American magazine journalism in the first two decades of the 20th cent , especially as editor (1903–12) of *Collier's Weekly* when that periodical was engaged in a fight for pure foods, conservation of natural resources, and other causes He afterwards edited *Harper's Weekly* (1913–16) and *Hearst's International* (1923 25) He served as U S minister to Denmark in 1919 His books include *Literary Statesmen* (1897), biographies of Lincoln, Washington, and Daniel Webster, *The Stage in America* (1901), *Industry and Progress* (1911), and his autobiography, *The Changing Years* (1930)

Haphraim (hăfrā'ĭm), border town of Issachar Joshua 19,19

Hapsburg or **Habsburg** (both hăpsbûrg, Ger hăps'bōōrk), ruling house of AUSTRIA from 1282 to 1918 Its original holdings were in NW Switzerland and in Alsace The family tree can be traced with certainty to the 10th cent The first to assume the name Hapsburg, after a castle in Aargau, Switzerland, was Otto (d 1111) His grandson, Count Albert III (d 1199), inherited (1173) vast estates in Upper Alsace, Switzerland, and Baden, as did Albert's son, Rudolf II (1160?–1232), and Rudolf's son, Albert IV (d c 1240) These acquisitions were facilitated by the extinction of the houses of Lenzburg, ZAHRINGEN, and KYBURG Albert's son, Count Rudolf IV, was elected (1273) German king as RUDOLF I In 1276 he forced king Ottocar II of Bohemia to surrender Austria, Carinthia, Styria, and Carniola, which became (1282) hereditary Hapsburg possessions Rudolf's son was German king as ALBERT I During his rule SWITZERLAND began to free itself from Hapsburg domination, but with its vast new acquisitions the family had risen to European importance Although the various Austrian duchies were held by the different branches issued from Albert, the Hapsburg possessions as a whole were held together by a family law and could not be alienated from the family or inherited by females In 1363 TYROL was added to the Hapsburg lands Albert V of Austria, great-great-grandson of King Albert I, married a daughter of Emperor SIGISMUND, succeeded him as king of Bohemia and Hungary, and was chosen (1438) German king as ALBERT II His son, LADISLAUS V, king of Bohemia and Hungary, was by-passed in the imperial election of 1440 in favor of his distant cousin, Frederick, duke of Styria, who became emperor as FREDERICK III Though it remained elective, the imperial dignity was, by tradition, conferred on the head of the house of Hapsburg from 1438 until 1806 (for a complete list of emperors, see HOLY ROMAN EMPIRE) During the rule of Frederick III and of his son, MAXIMILIAN I, a series of European marriages vastly increased the Hapsburg hereditary domains, giving rise to the motto, *Bella gerant alii; tu, felix*

Austria, nube [let others wage war; thou, happy Austria, marry] The marriage of Maximilian I and MARY OF BURGUNDY brought most of the Low Countries (see NETHERLANDS, AUSTRIAN AND SPANISH). The marriage of Maximilian and Mary's son, Philip I, to Joanna of Castile, brought their elder son, Emperor CHARLES V, to the throne of SPAIN The marriage of Philip and Joanna's younger son, Ferdinand, to Anna, daughter of Louis II of BOHEMIA and HUNGARY, strengthened the Hapsburg hold over these two kingdoms The epitome of Hapsburg greatness was reached under Emperor Charles V, who also placed much of Italy under Hapsburg control From Peru to the Carpathians, the house of Austria ruled an empire "where the sun never set" During Charles's rule, also, the family became committed to the defense of Catholicism against the Reformation Charles V divided his empire between his son, PHILIP II of Spain, and his brother, Ferdinand of Austria, Bohemia, and Hungary, who on Charles's death succeeded as Emperor FERDINAND I. In their struggle against the French monarchy and against Protestantism, the Spanish and Austrian branches sided together, notably in the Thirty Years War (1618–48), in the Third Dutch War (1672–78), and in the War of the Grand Alliance (1688–97) These wars considerably weakened the imperial authority of the Hapsburgs and cost them several territories, notably Alsace, Franche-Comté, Artois, and part of Flanders and Hainaut, but at the same time the reconquest of Hungary from the Turks amply compensated them in the east for their losses in the west The Spanish branch of the Hapsburgs ended in 1700 with King CHARLES II His death precipitated the War of the SPANISH SUCCESSION (1701–14), which forced the Hapsburgs to relinquish their claims to Spain but left them the Austrian Netherlands and Lombardy Emperor CHARLES VI, who had no male heir, changed the Hapsburg law of inheritance by the PRAGMATIC SANCTION, which guaranteed the succession of his daughter, MARIA THERESA, to all Hapsburg domains and to Hungary In the War of the AUSTRIAN SUCCESSION (1740–48) and SEVEN YEARS WAR (1756–63), Maria Theresa successfully defended her heritage, losing only Silesia (a Bohemian dependency) to Prussia Her chief rival claimant, Elector Charles Albert of Bavaria, died in 1745 He was elected emperor in 1742 as Charles VII, but his election cannot be said to have interrupted the Hapsburg line of emperors, for as grandson of Emperor Leopold I and as son-in-law of Emperor Joseph I, he claimed to be the rightful heir of the house of Hapsburg He was succeeded (1745) as emperor by Maria Theresa's husband, FRANCIS I, grand duke of Tuscany and former duke of Lorraine Their son, JOSEPH II, was one of the greatest Hapsburg rulers and an ardent reformer With him began the line of **Hapsburg-Lorraine.** TUSCANY was separated (1790) from the family lands and continued until 1860 (with the interruption caused by the French Revolutionary and Napoleonic Wars) under a younger branch of the Hapsburg-Lorraine family The duchy of MODENA, acquired by marriage in 1806, was also ruled until 1859 by still another branch The main branch of the house was continued by Joseph II's brother, Emperor Leopold II, and by Leopold's son, Emperor FRANCIS II Francis was the last ruler of the Holy Roman Empire, in 1806 he assumed the title Francis I, emperor of Austria Though repeatedly humbled by Napoleon I, he emerged at the Congress of Vienna (1815) as one of the most powerful European monarchs With him the history of the house of Hapsburg became definitely identical with that of Austria His son, Ferdinand, was forced to abdicate (1848) in favor of FRANCIS JOSEPH During Francis Joseph's long reign (1848–1916) Austria lost Lombardy and Venetia and had to yield leadership in German affairs to Prussia In 1867 the entire Hapsburg empire was reorganized as the AUSTRO-HUNGARIAN MONARCHY The assassination (1914) of the heir apparent, FRANCIS FERDINAND, precipitated the First World War It was left for Emperor CHARLES I to witness the defeat and dissolution of Austria-Hungary Charles abdicated in 1918 His claims were transmitted to his son, Archduke OTTO The titles archduke and archduchess have been in use since the 15th cent. for every member of the family.

Hara, Takashi (tä'kä'shē hä'rä), 1854–1921, Japanese statesman, prime minister (1918–21) He was the first commoner to become prime minister and the first to form a party cabinet in accordance with principles of parliamentary government The leader of the Seiyukai party, he was a skillful politician and in policy largely an opportunist His administration was notable for the expedition to Siberia, the independence movement in Korea, Japanese participation in the Paris Peace Conference, labor unrest, and naval armament He was assassinated by a fanatic

Hara (hä'rü), unidentified town. 1 Chron 5 26.

Haradah (hä'rüdü), unidentified desert encampment. Num. 33.24,25

Harahan, village (pop. 1,082), SE La., near New Orleans, in a farming and dairying section.

hara-kiri (hä'rü-kēr'ē, hä'ru-) [Jap., =belly-cutting], the national Japanese form of honorable suicide. Obligatory hara-kiri was performed by the noble or official who disobeyed or was disloyal to the emperor He received a jeweled dagger sent by the ruler, and with great formality he took the dagger and disemboweled himself His second then cut his neck with a sword, and the dagger was sent to the emperor Voluntary hara-kiri is still occasionally performed after private or national misfortunes or to protest against a false national policy Obligatory hara-kiri was abolished in 1868 Hara-kiri was performed by some prominent Japanese on the death of Emperor Yoshihito in accordance with the ancient custom of "following in death"

Harald see HAROLD

Haran (hā'lăn) 1 Abraham's brother Gen 11 26, 27,29 **2** Caleb's son 1 Chron 2 46 **3** Levite 1 Chron 23 9

Haran (hā'rān) or **Harran** (ha'ran), ancient city of Mesopotamia, now in SE Asiatic Turkey, SE of Urfa. It was an important center on the trade route from Nineveh to Carchemish and the seat of the Assyrian moon-god Frequently mentioned in the Bible, it was the home of Abraham's family after the migration from Ur The Greek form of the name is Charan or Charran In Roman times it was CARRHAE and was the scene of a disastrous Roman defeat in 53 B C

Harar or **Harrar** (both ha'rur), city (pop 40,000), E central Ethiopia Little of note survives from the 16th cent., when it was a center of Moslem power in Ethiopia It is a walled city Harar trades in coffee and other products of the rich agricultural plateau on which it is situated

Hararite (hă'ru-), obscure epithet used of five names in the lists of mighty men 2 Sam 23 11,33, 1 Chron 11 34,35

Harbin (här'bĭn), Mandarin *Ha-ehr-pin*, Rus *Kharbin*, city (pop 637,573), Sunkiang prov., China Its administration is independent of the province Harbin is on the Sungari river It was unimportant until Russia was granted (1896) a concession and built a modern section alongside the old Chinese town Today Harbin is the major trade and communications center of central Manchuria It is the junction of the Chinese Eastern RR and the South Manchurian RR and is the main port on the Sungari river Soy beans and their products constitute the largest exports There is food processing and railroad maintenance Although Russia surrendered its concession in 1924, c 100,000 Russians still live in Harbin

Harbona or Harbonah (both –bō'nu), chamberlain of King Ahasuerus Esther 1 10, 7 9

harbor see PORT

Harbor Beach, city (pop 2,186), N Mich., on Lake Huron and NE of Bay City, settled 1837, inc as a village 1882, as a city 1909 It is a resort and fishing center Wheat and corn products are made Frank Murphy was born here

Harbord, James Guthrie, 1866–1947, American army officer, b Bloomington, Ill., grad Kansas State Agricultural College, 1886 He joined (1889) the army as a private and saw service in Cuba and in the Philippines Appointed (1917) chief of staff of the American Expeditionary Force in France by Gen John J Pershing, Harbord commanded the marine brigade at Château-Thierry and the 2d Division in the Soissons offensive He retired (1922) from the army and became a business executive He wrote *Leaves from a War Diary* (1925) and *The American Expeditionary Force* (1929)

Harbor Springs, resort city (pop 1,423), N Mich., on Little Traverse Bay of Lake Michigan, inc as a village 1881, as a city 1932 It has a good landlocked harbor There were Ottawa and other Indian villages near here See U. P Hedrick, *The Land of the Crooked Tree* (1948)

Harbour Grace, town (1945 pop 2,065), E N F, W of St. John's and on the west coast of Conception Bay An airport is just outside the town.

Harbour Island see BAHAMA ISLANDS

Harburg-Wilhelmsburg (har'bōōrk-vĭl'hĕlmsbōōrk), industrial port of Hamburg, N Germany, on the Elbe It belonged to Hanover prov of Prussia until its incorporation (1938) with Hamburg

Harcourt, Sir William George Granville Venables Vernon, 1827–1904, English statesman A brilliant parliamentarian, a Liberal leader, and a supporter of Gladstone, he entered Parliament in 1868 and had a notable career as solicitor general (1873–74), home secretary (1880–85), and chancellor of the exchequer (1886, 1892–95) In his 1894–95 budgets he devised a new system of death duties and extended graduated taxation. He was also a noted writer on international law. See biography by A. G Gardiner (1923)

Hardanger Fjord (härdäng'ür fyôrd'), second largest fjord of Norway, penetrating 114 mi. from the Atlantic into Hordaland co., SW Norway A southern branch, the Sor Fjord (Nor. *Sør Fjord*), cleaves the Hardanger Vidda, a barren and rocky plateau, for 25 mi., at its head are the village of Odda and the famous Skjeggedalsfoss, a waterfall 525 ft. high An eastern branch, the Eid Fjord, extends 15 mi to the quaint village of Vik Near Vik is the Voringfoss (Nor. *Vøringfoss*), a waterfall 535 ft high. The valleys of the Hardanger region are fertile and dotted with picturesque villages Embroidering and violin making are traditional home industries The beautiful Hardanger region is a favorite tourist area The Hardangerfjell, which extends inland from the fjord, is a mountain mass rising to 6,153 ft. in the Hardangerjokel (Nor. *Hardangerjøkel*)

Hardecanute see HARTHACANUTE.

Hardee, William Joseph, 1815–73, Confederate general, b Camden co., Ga., grad West Point, 1838 He served with distinction in the Mexican War and compiled *Rifle and Light Infantry Tactics*, a standard army textbook of the time (1853–55) When Georgia seceded, he resigned his lieutenant colonelcy and became a Confederate brigadier general After organizing an Arkansas brigade, he joined A S Johnston's army and fought at Shiloh (April, 1862) Hardee, promoted lieutenant general in October, was an able corps commander in the Army of Tennessee, fighting under Braxton BRAGG at Perryville, Murfreesboro, and Missionary Ridge and under J E Johnston and Hood in the ATLANTA CAMPAIGN He commanded against W T SHERMAN in Georgia and South Carolina (1864–65), abandoning Savannah and Charleston to that general and surrendering to him in North Carolina in April, 1865

Hardeeville, town (pop 1,361), extreme S S C, near the Savannah SW of Beaufort It has sawmills

Harden, Sir Arthur (har'dun), 1865–1940, English biochemist For many years he was professor of biochemistry at the Univ of London and head of the biochemical department of Lister Institute For his researches in alcoholic fermentation—in the course of which he established the character of zymase and discovered that, in addition to zymase, other yeast enzymes are concerned with fermentation—he shared with Hans von Euler-Chelpin the 1929 Nobel Prize in Chemistry He was knighted in 1936

Harden, Maximilian (mäk"sēmē'lyan här'dün), 1861–1927, German journalist, whose real name was Witkowski One of the leading publicists of his time, he was an admirer of Bismarck After the fall of Bismarck he made his paper, the *Zukunft*, well known by his unsparing attacks on the men surrounding William II He accomplished much good, but his methods were not always too scrupulous In the First World War he continued his daring career by his censures of military leaders. He also sharply criticized the statesmen of the German republic Essentially he was a popular journalist appealing to mass prejudices and beliefs He wrote a number of books, the most important being *Germany, France, and England* (Eng tr, 1924) and *I Meet My Contemporaries* (Eng tr, 1925).

Hardenberg, Georg Friedrich Philipp von. see NOVALIS

Hardenberg, Karl August, Fürst von (kärl' ou'gōōst fürst' fŭn har'dunbĕrk), 1750–1822, Prussian statesman, b electorate of Hanover After service for Hanover and Brunswick, he became administrator of Ansbach and Bayreuth and soon afterward entered the Prussian service As Prussian delegate he signed the Treaty of Basel (1795) with France He became chief minister in charge of foreign affairs (1804–6), but was dismissed upon pressure from Napoleon I After war had broken out a few months later, Hardenberg was recalled to the ministry in 1807, only to be ousted again by the Treaty of Tilsit In 1810 he was made chancellor He continued the reform program begun by Karl vom und zum STEIN, abolishing trade monopolies, turning feudal lands into freeholds, and emancipating the Jews In 1813 he persuaded the vacillating FREDERICK WILLIAM III to join the coalition against Napoleon As delegate to the Congress of Vienna and afterward, he lost prestige and came more and more under the conservative sway of Metternich He remained in office until his death

Hardenbergh, Henry Janeway, 1847–1918, American architect He was designer of the Plaza and old Waldorf-Astoria hotels, New York city, and the Copley Plaza, Boston An associate of the National Academy of Design, he was also a founder of the Municipal Art Society and the American Fine Arts Society, his building for the latter is considered his finest work

hardening, in metallurgy, the treatment of metals or alloys to produce hardness either throughout or at the surface Various methods are employed, depending upon the effect required STEEL, for example, is given great hardness by the introduction of various other metals to form alloy steels and by treatment with heat Some other alloys, after heat treatment, become harder gradually until they reach their maximum hardness This slow hardening is known as age-hardening When a hard surface, but a tough rather than hard and brittle interior, is required for some object (e g., various tools and machine parts) made of low-carbon steel or of wrought iron, a process known as case hardening is commonly employed The object to be treated is covered with carbonaceous material (charcoal itself is commonly used) and subjected to intense heat Under these conditions, the carbon and iron combine at the surface of the object to form a thin layer or "skin" of extreme hardness.

The interior part remains as it was originally, retaining its toughness The thickness of the hard layer depends in part upon the length of time that the object is heated in contact with the carbon As a result, the time required for the process varies, depending upon the thickness of the layer desired Nitrogen hardening or nitriding is a form of casehardening in which nitrogen is used as the hardening agent instead of carbon The object is treated with ammonia gas at a temperature of about 500°C Chill hardening or chilling also produces a hard exterior In this process, however, the result is obtained by chilling the exterior more rapidly than the interior and without the use of carbon or other substance Chill hardening is employed in making wheels for railroad cars and other objects When fused metal is poured into a mold, that entering first (which forms the outer surface of the finished object) is chilled by the mold and hardens rapidly to form the hard outer surface Objects are also hardened by plunging them into a bath of some cooling liquid, e g , water or oil They are then subjected to TEMPERING or ANNEALING

hardening of the arteries: see ARTERIOSCLEROSIS.

hardhack or **steeplebush,** North American SPIRAEA (*Spiraea tomentosa*), sometimes cultivated for the spire-shaped cluster of small rose or white flowers that bloom in late summer The plants have been used as an astringent and tonic

Hardicanute · see HARTHACANUTE

Hardie, James Keir (kēr' här'dē), 1856–1915, Scottish labor leader, a coal miner He founded the Independent Labour party (1893), was the first independent workers' representative in Parliament, and led the Labour party in the House of Commons He wrote *From Serfdom to Socialism* (1907) and *After Twenty Years* (1913). See biography by J. B Glasier (1915).

Hardin, John, 1753–92, American Indian fighter, b Fauquier co , Va He served in Lord Dunmore's War (1774) and was a noted member of Daniel Morgan's riflemen during the Revolution His services at Saratoga were particularly noteworthy He moved to Washington co , Ky , in 1786 and afterwards took part in many expeditions against the Indians N of the Ohio, winning general recognition for his courage and his ability as a woodsman and a leader of men He was sent in 1792 to negotiate a treaty with the Miami Indians and was murdered by Indians at what is now Hardin, Ohio

Hardin, John Wesley, 1853–95, American desperado, b Bonham, Texas In the lawless violence of the frontier the boy early became a gambler and a gunman, but succeeded by his shooting skill and the help of friends to escape capture until 1877, when he was sentenced to 25 years for killing a sheriff. He studied law in prison and, pardoned in 1894, began practice in El Paso but was shot down a year later by a local constable See his autobiography (1896), Thomas Ripley, *They Died with Their Boots On* (1935)

Hardin, city (pop. 1,886), co. seat of Big Horn co., S Mont , on the Bighorn river and E of Billings, inc 1911. It is near the Crow Indian Reservation

Harding, Chester, 1792–1866, American portrait painter, b Conway, Mass , mostly self-taught He worked as an itinerant portrait painter long enough to enable him to study at the Pennsylvania Academy of Design Later he practiced in St Louis, Washington, and Boston and had three years of artistic and social success in London On returning to America he became the fashionable painter of Boston His principal portraits are those of Sir Archibald Alison, the historian, the dukes of Sussex and Hamilton; Lord Aberdeen, Daniel Webster (one in the Bar Association, New York, and one in the Cincinnati Art Mus), John Randolph (Corcoran Gall.), Mrs Thomas B Coolidge and Mrs. Blake (Metropolitan Mus), Chief Justice Marshall; Henry Clay; and Washington Allston.

Harding, Stephen: see STEPHEN HARDING, SAINT.

Harding, Warren Gamaliel (gumā'lēəl), 1865–1923, 28th President of the United States (1921–23), b Bloomington Grove, Morrow co , Ohio After study (1879–82) at Ohio Central College, he moved with his family to the county seat, Marion, Ohio, where he devoted himself to journalism. He bought the Marion *Star*, built up the newspaper, and became a member of the small group which dominated local affairs He entered Ohio Republican politics as a partisan of Joseph B FORAKER, was (1899–1903) a member of the state legislature, and served as lieutenant governor (1904–5), but he was defeated (1910) as Republican candidate for governor His talent for public speaking and his affable personality won Harding the support of the political leaders as well as of the people and enabled him to rise into national politics, he was picked to nominate William Howard Taft at the convention of 1912, and he was elected (1914) to the U S Senate after winning the nomination from Foraker His six-year stay in the Senate was undistinguished, for he followed the party whips on domestic legislation and Henry Cabot Lodge on issues concerning the peace In 1920 Harding was nominated for the presidency largely through the efforts of a group of Senators after successive balloting for Gen. Leonard Wood and Frank O. LOWDEN had deadlocked the Republican convention. His vague pronouncements on the League of Nations and his noncommittal utterances in the campaign (he coined the word *normalcy* to express the social and economic conditions he promised to the nation) helped him to win the election, defeating the Democratic candidate, James M Cox, by an impressive majority The administration that followed was marked by one achievement, the calling of the Washington Conference (see NAVAL CONFERENCES) Harding, conscious of his own limitations, had promised to rely on a cabinet of "best minds," but unfortunately he chose—along with more capable advisers—men who lacked any sense of public responsibility At the time of the legislative deadlock of 1923 came rumors of scandals in the Veterans' Bureau and in the Depts of the Interior and Justice In the midst of these rumors Harding died suddenly (Aug , 1923) in San Francisco on his return from a journey to Alaska Thus he was not troubled by the exposure of the TEAPOT DOME scandal and was spared the humiliation of seeing his appointees, Secretary of Interior Albert B FALL and Attorney General Harry M DAUGHERTY brought to the bar of justice Lesser scandals were also exposed, and Harding's administration has been stigmatised as one of the most corrupt in American history See William Allen White, *Masks in a Pageant* (1928); Samuel Hopkins Adams, *Incredible Era* (1939)

Hardin-Simmons University see ABILENE, Texas.

hardness, property of matter, commonly described as the resistance of a substance to being scratched by another substance Degree of hardness is relative, different substances being compared with one another Mohs's scale of hardness (named for Friedrich Mohs), used commonly in mineralogy, lists certain minerals in order of hardness talc, 1, gypsum, 2, calcite, 3, fluorspar, 4, apatite, 5, feldspar, 6, quartz, 7, topaz, 8, corundum, 9, diamond, 10 The listing indicates merely that gypsum (hardness=2) is harder than—i e , capable of scratching—talc (hardness=1) or that calcite (hardness=3) is harder than either talc or gypsum The listing does not indicate that gypsum (2) is twice as hard as talc (1) or that calcite (3) is three times as hard The difference in hardness between one substance and the next higher in the list is not constant for all The hardness of many minerals not listed falls between that of those included For example, the hardness of barite is 3 3 Other tables of hardness have been compiled which include a much greater number and variety of substances The solid elements have been so classified, carbon (of which the diamond is an allotropic form) being hardest and listed as 10, with cesium the softest, being rated as 0 2, the same degree of hardness as wax (hardness=0 2 at 0°C). The hardness numeral of the Brinell scale is based upon the indentation produced when pressure is exerted on a sphere of the substance. The value so obtained has a direct relation to the tensile strength of the substance The degree of hardness of any substance is believed to be dependent upon the cohesive forces between the molecules of the substance at its surface

Hardouin, Jean (zhā' ärdwē'), 1646–1729, French classical scholar, a Jesuit His works *Nummi antiqui* [ancient medals] (1864) and *Conciliorum collectio* [collection of councils] (1724) were of great value in the 18th cent His work was characterized by an excessive boldness of hypothesis, e g , he maintained that most works of classical literature were not genuine but Renaissance forgeries.

Hardouin, Jules: see MANSART, JULES HARDOUIN.

hardpan, condition of the soil or the subsoil in which the soil grains become cemented together forming a hard, impervious mass It is disadvantageous to farming, particularly because it interferes with the circulation of moisture in the soil and with the growth of roots through the soil When the condition is caused by the filling of the air spaces in the soil with fine particles of clay the subsoil is called a clay pan Thus usually occurs in said soil

Hardwar (hŭrdwär'), town (pop 40,823), NW United Provs., India. It is on the Ganges river near a gorge through the Siwalik Hills Annual and duodecennial pilgrimages are associated with the town's Hindu temples (c 10th cent)

Hardwick. 1 Rural town (pop 2,154), central Mass , WNW of Worcester, settled 1737, inc. 1739. 2 Town (pop 2,605), N central Vt , NNE of Montpelier, settled before 1800. It is a granite-quarrying center.

Hardwicke, Philip Yorke, 1st earl of, 1690–1764, English judge. As lord chancellor (1737–56) he welded much that was vague in equity into a coherent system and established the principle that equity must follow its precedents. He was active in suppressing the Jacobite rising of 1745. See biography by George Harris (3 vols., 1847).

hardwood, name used for any hard, close-grained wood and also for the wood of any deciduous tree as contrasted with the softwood of coniferous trees Actually the wood of many deciduous trees is softer than that of many conifers so that the name is not always indicative of the physical qualities of the wood. A transverse section of a hardwood tree shows pores (really the cross sections of longitudinal vessels or ducts), often visible to the naked eye The softwoods do not have these pores Among the numerous hardwoods are chestnut, oak, maple, ash, ebony, mahogany, and teak. See H. P. Brown, *Commercial Timbers of the United States* (1940).

Hardy, Alexandre (älĕksäN'drŭ ärdē'), b between 1569 and 1575, d 1631 or 1632, French dramatist He is author of more than 600 plays, the best of those surviving is perhaps *Mariamne*, a tragedy Hardy clearly foreshadows the work of CORNEILLE.

Hardy, Arthur Sherburne (här'dē), 1847–1930, American novelist and diplomat, b. Andover, Mass , grad. West Point A professor of mathematics and civil engineering, he later became successful as a writer of popular fiction. His best-known novels are *The Wind of Destiny* (1886) and *Passe Rose* (1889) He served as minister to several European countries from 1897 to 1905.

Hardy, Thomas, 1840–1928, English novelist and poet, b near Dorchester, in the part of England known in his novels as WESSEX He was early apprenticed to a church architect, but soon turned to literature, and in 1871 his first novel, *Desperate Remedies*, was published anonymously *Under the Greenwood Tree* (1872) was more successful, and *Far from the Madding Crowd* (1874), published in the year of his marriage to Emma Gifford, won for Hardy a leading place among contemporary novelists The Wessex novels which followed, Hardy classified as novels of character and environment *The Return of the Native* (1878), *The Mayor of Casterbridge* (1886), *The Woodlanders* (1887), *Tess of the D'Urbervilles* (1891), and *Jude the Obscure* (1896) are generally considered the finest So violently were his novels, especially the last two, denounced as books depicting indecency and immorality that Hardy wrote no more of them, but devoted himself to poetry, which he had long preferred *Wessex Poems* appeared in 1898, *Poems of the Past and the Present* in 1901, and then his poetical drama, *The Dynasts* (1904–8) Begun as an epic on the Napoleonic era, it finally became a vehicle for the expression of Hardy's mature views of man, nature, and the unconscious supernatural will which governs the universe From 1909 to his death Hardy wrote several volumes of lyric poetry, outstanding among which are *Satires of Circumstance* (1914), *Moments of Vision* (1917), and the posthumously published *Winter Words* (1928) Hardy also wrote distinguished short stories (*Wessex Tales*, 1888, *Life's Little Ironies*, 1894) Hardy's first wife died in 1912, and in 1914 he married Florence Emily Dugdale, who later became his literary executor and biographer Hardy himself died Jan 11, 1928, at Max Gate, the home which he had built after his own plans, his ashes were buried in Westminster Abbey See biography by his wife, F E. Hardy (2 vols , 1928–30); Hermann Lea, *Thomas Hardy's Wessex* (1913), biographical or critical studies by S C Chew (1928), W R Rutland (1938), C J Weber (1940, 1946), Edmund Blunden (1942), David Cecil (1946), J G Southworth (1947), and A. J Guérard (1949)

Hardyng, John, 1378–1465?, English chronicler In the service of Sir Henry Percy, he was at the battle of Shrewsbury (1403), where Percy was killed Later serving Sir Robert Umfreville, he was made constable of a castle in Kyme, Lincolnshire. He was sent to Scotland to gather evidence of the feudal submission of Scotland to the English crown, but the documents he presented to the English court were much later proved to be forgeries, perhaps by him. He wrote a long rhymed chronicle of English history, which in its first version (carrying events to 1436) has a Lancastrian tinge, in the next a Yorkist bias, and in the one given to Edward IV (carrying events to 1461) still a Yorkist flavor There are other variant copies, all of antiquarian interest only.

Hare, Augustus John Cuthbert, 1834–1903, English author His works include *Walks in Rome* (1871) and other continental guidebooks and an autobiography (1896–1900) See Shane Leslie, *Men Were Different* (1937).

Hare, Sir John, 1844–1921, English actor-manager, whose real name was John Fairs He gained a reputation for his acting in T. W. Robertson's plays with the Prince of Wales's company, London (1865–74), and in 1875 became manager with Kendal of the Court Theatre, London, where Ellen Terry often played. He managed the St James Theatre (1879–88), in association with Kendal and his wife, and the Garrick Theatre (1889–95) His best-known roles were in *A Pair of Spectacles* and *The Gay Lord Quex*. He was knighted in 1907.

Hare, Robert, 1781–1858, American chemist b. Philadelphia. He was professor of chemistry (1819–47) at the medical college of the Univ. of Pennsylvania. He invented the oxyhydrogen blowpipe and a calorimotor, built an electric furnace, and worked on salts. See biography by E. F. Smith (1917).

hare, mammal of North America, Europe, Asia, and Africa, formerly considered a rodent, now usually placed in the order Lagomorpha. True hares (genus *Lepus*) have longer ears and hind legs than

rabbits. At birth they are covered with hair and the eyes are open. North American hares include the varying hare or snowshoe rabbit and the jack rabbit, whose ears are sometimes one third of the body length Both can travel at 30 mi or more an hour In northern regions and at high altitudes the brownish or grayish coat is usually shed and replaced by a white winter coat The arctic hare has a circumpolar distribution The European hare is a large species native to central and W Europe and introduced into North America

harebell, bluebell, or bluebells-of-Scotland, slender wiry-stemmed perennial bellflower (*Campanula rotundifolia*) native to Europe, Asia, and North America It has one or more blue (occasionally white), bell-shaped blossoms A species of SQUILL is also called harebell

harelip, a cleft lip, a deformity caused by the failure of premaxillary and maxillary bones to unite during development The condition may occur unilaterally or bilaterally, it may be complete or incomplete, and it may be associated with a cleft of the palate Surgery to reduce the condition properly is usually begun in very early infancy

harem (hâ'rum) [Arabic], women's apartments in a Moslem household Islam enjoins strict seclusion for women The most famous harem, that of the sultans of Turkey, dates from the 15th cent with the building of the old and new seraglios or palaces on Seraglio Point, Constantinople. It was abolished with the downfall (1909) of Abdu-l-Hamid II The sultan's harem often contained several hundred women—*kadins* (with status similar to that of wife), concubines, and servants—all subject to the control of the sultan's mother and guarded by eunuchs In India the harem is called a purdah or zenana, in Persia, a zenana See N. M. Penzer, *The Harem* (1936)

Haren, Willem van (wĭl'um van ha'run), 1710–68, Dutch poet, b Friesland, of a noble family His chief work is an epic poem, *Friso* (1760) His brother, **Onno Zwier van Haren** (ôn'nō zvēr'), 1713–79, also a poet, wrote patriotic verse, notably a series about the Gueux, entitled first *Aan de Vaderland* (1769), in final form *De Geuzen*

Hareph (hâ'rĕf), Judah's descendant 1 Chron 2 51

Hareth (hâ'–), forest, apparently near ADULLAM 1 Sam 22 5

Harewood, Henry George Charles Lascelles, 6th **earl of** (lă'sulz, hăr'wo͝od, hâr'–), 1882–1947, British soldier He held diplomatic posts in Rome and Canada and served with distinction in the First World War In 1922 he married Princess Mary, only daughter of George V He had two sons In 1929 he succeeded his father in the earldom

Harfleur (ärflûr'), town (pop 5,052), Seine-Inférieure dept, N France, in Normandy, at the mouth of the Seine A flourishing Channel port during the later Middle Ages, it declined with the growth of Le Havre The siege and capture (1415) of Harfleur by HENRY V of England is described by Shakspere

Hargreaves, James (här'grēvz), d 1778, Englishman who is generally believed to have invented the spinning jenny (see SPINNING) c 1765

Harhaiah (–hāī'ŭ, –hâ'yu), father of UZZIEL 6

Harhas (hâr'hăs), ancestor of Huldah's husband 2 Kings 22 14 Hasrah 2 Chron 34 22

Harhur, postexilic family Ezra 2 51, Neh 7 53

Hari, Mata see MATA HARI

Harim (hâ'–) **1** Family of priests in the return from the Exile Neh 12 15 Rehum Neh 12 3 **2** Another family of priests in the return from the Exile Ezra 2.39, 10 21, Neh 7 42, 10 5 **3** Priest, probably the ancestor of **2** 1 Chron 24 8 **4** Family of laymen in the return from the Exile Ezra 2 32, 10 31, Neh 7 35, 10 27. **5** Father, or family, of a repairer of the wall, probably the same as **1**, **2**, or **4** Neh 3.11.

Harington, Sir John, 1561–1612, English author At the command of Queen Elizabeth he translated (1591) Ariosto's *Orlando Furioso* He fell from grace at court because of his Rabelaisian *Metamorphose of Ajax* (1596), but later was restored to favor His personal letters sketched a vigorous portrait of Elizabethan life See his *Letters and Epigrams* (ed by N E. McClure, 1930)

Hariph (hâ'rĭf), a signer of the covenant. Neh 7 24, 10 19 Jorah Ezra 2 18.

Hariri (Abu Mohammed al-Kasim al-Hariri) (hărē'rē), 1054–1122, Arabian writer of Basra His principal work is one of the most popular of Arabian books. It is called *Makamat* [assemblies], the name of a literary genre that was much affected at this time It consists of 50 episodes, in which an old rogue, Abu Zaid, goes from place to place earning his living by his clever talk and his wits. It is written in an almost euphuistic style

Hari Rud (hâ'rē rōōd'), river, 650 mi long, rising in central Afghanistan It flows westward through barren hills and past the fertile valley of Herat, then turns north as the boundary between Iran and the Turkmen SSR and finally disappears in the steppes S of Kara Kum In the USSR it is called the Tejend, and in ancient times it was the Arius

Härjedalen, Swed. *Härjedalen* (här'yŭdă"lŭn), historic province, W central Sweden. It is now administratively part of JAMTLAND co.

Harkness, Edward Stephen, 1874–1940, American philanthropist, b Cleveland He inherited a fortune from his father, a partner of Rockefeller His extensive philanthropies, many of them anonymous, were extended especially to colleges, hospitals, and museums He served as president of the Commonwealth Fund, established by his mother

Harkness, William, 1837–1903, American astronomer, b. Scotland, grad Univ of Rochester, 1858 In 1862 he became an aid in the U.S. Naval Observatory, and in 1865–66, on a journey from Philadelphia to San Francisco in the monitor *Monadnock*, he studied the deviations of the compass and terrestrial magnetism While observing the total solar eclipse of Aug , 1869, he discovered the coronal line K 1474 As one of the original members of the Transit of Venus Commission, he was given charge of the party sent to Hobart, Tasmania, in 1874. He observed the transit of 1882 at Washington, D C He was astronomical director of the Naval Observatory (1894–99) and director of the *American Ephemeris and Nautical Almanac* (1897–99) He was responsible for great improvements in the apparatus of the observatory and invented several instruments, notably the spherometer caliper

Harlan, James, 1820–99, U S Senator from Iowa, b Clark co., Ill , grad. Indiana Asbury Univ (now DePauw Univ), 1845 Principal of Iowa City College, he became in 1853 president of Iowa Wesleyan Univ and was a leader of the Free-Soil movement in Iowa He was elected (1855) to the U S Senate, vacated the seat in 1857 because the election was irregular, but was immediately reelected and served until 1865 Harlan was in charge of legislation connected with a railroad to the Pacific and was interested in educational land grants and a homestead law In 1865 he was appointed Secretary of the Interior by Abraham Lincoln, but he resigned in July, 1866, because of opposition to President Andrew Johnson's policies Reentering the U S Senate (1867–73), he voted for Johnson's impeachment and generally supported the radical Republican Reconstruction program. His defeat in 1872 by William B Allison closed his official career See biography by Johnson Brigham (1913)

Harlan, John Marshall, 1833–1911, American jurist, b Boyle co , Ky., grad Centre College, 1850 Admitted to the bar in 1853, he served in the Civil War as a colonel in the Union army until 1863, when he became attorney general of Kentucky He took a leading part in the violent political struggles of the day, becoming after the war a leader of the conservative Republicans, but he was defeated for the governorship in 1872 and 1875 As head of the Kentucky delegation to the Republican national convention in 1876, he played a leading role in the nomination of Rutherford B Hayes In Oct , 1877, Hayes appointed him to the U S Supreme Court, on which he was to serve for almost 34 years A man of strong and independent convictions and, on the whole, a strict constructionist, he became known as a "dissenter " In the "insular cases" (1901) he protested against a decision which would not give the inhabitants of the nation's new possessions the full benefits of the Constitution He upheld the police power of the states, dissented in the civil-rights cases (1883) and the income-tax (1894), and argued that the court had no right to read the word *unreasonable* into the Sherman Act in the decisions against the Standard Oil and American Tobacco trusts In 1893 he served by President Benjamin Harrison's appointment on the tribunal to settle the Bering Sea Fur-Seal Controversy at Paris See F B Clark, *The Constitutional Doctrines of Justice Harlan* (1915)

Harlan, 1 City (pop 3,727), co seat of Shelby co , W Iowa, NE of Council Bluffs, in a farm and livestock area, settled 1858, inc 1879 **2** City (pop 5,122), co seat of Harlan co , E Ky , in the Cumberlands near the Va. line, in the heart of a coal region, settled 1819 After the railroad's arrival in 1911, Harlan developed as a shipping point for coal and lumber Conflicts between coal operators and miners in Harlan co have been frequent and bitter After 20 years of strife the mines were unionized in 1941 Indian mounds in the area have yielded many relics

Harland, Henry, 1861–1905, American novelist Born in St. Petersburg, Russia, he traveled extensively in Europe during his childhood before studying at Harvard His first novels were written under the pseudonym Sidney Luska and dealt with immigrant Jewish life. In 1889 he abandoned this type of writing and left America to live in London There he became associated with the Bodley Head press He developed a light, highly polished prose style and with Aubrey Beardsley founded the YELLOW BOOK (1894–97), of which he was literary editor and to which he contributed stories Most popular of Harland's books was *The Cardinal's Snuff Box* (1900)

Harland, Marion, pseud. of **Mary Virginia Hawes Terhune,** 1831–1922, American novelist and author of books on cookery and housekeeping, b Amelia co., Va. Her *Common Sense in the Household* (1871) was one of the first works of its kind. See *Marion Harland's Autobiography* (1910)

Harlech (hâr'lĕkh, –lĕk, hăr'lĕ), village, Merionethshire, Wales, on the coast Its 13th-century castle stands on a rocky point overlooking the sea. Its heroic defense against the Yorkists (1468) is the theme of the Welsh battle song, *The March of the Men of Harlech* Harlech has the best golf course in Wales

Harleian Library (hăr'lēun, hărlē'ŭn), manuscript collection of over 7,000 volumes and over 14,000 original legal documents, formed by Robert Harley, 1st earl of Oxford, and his son Edward Harley, 2d earl of Oxford In 1753 it was purchased for £10,000 by the British government and with the collections of Sir Robert Bruce Cotton and Sir Hans Sloane formed the basis of the British Museum library

Harlem, town (pop 1,166), N Mont , NE of Great Falls and on the Milk river project, inc 1910 Fort Belknap Indian Reservation is near by

Harlem, congested residential and business section of upper Manhattan, New York city, bounded roughly by Central Park and 110th St , East River and Harlem River, 168th St , and Amsterdam Ave and Morningside Park The Dutch settlement Nieuw Haarlem was established by Peter Stuyvesant in 1658, and the area was a rural one until transportation facilities linked it with lower Manhattan in the 19th cent The rapid influx of Negroes that began in the decade 1910–20 resulted in great overcrowding Harlem, with a population of over 400,000, is the largest Negro community in the country Puerto Ricans and other Latin Americans and some Italians also live in the area, where the physical and social evils of poverty, congestion, and discrimination are well illustrated The 1930s brought public housing projects, and the 1940s saw further attempts to relieve unfavorable conditions To the west of Harlem, near the present site of Columbia Univ , Continental forces stopped (Sept 16, 1776) the British advance up Manhattan Island in the American Revolutionary battle of Harlem Heights See Claude McKay, *Harlem Negro Metropolis* (1940), Roi Ottley, *New World a-Coming Inside Black America* (1943)

Harlem River, navigable tidal channel, SE N Y , within the confines of New York city and separating Manhattan Island from the borough of the Bronx. With short Spuyten Duyvil Creek, now a ship canal, it is 8 mi long and connects the Hudson and the East River (at HELL GATE channel) Its bridges include High Bridge (1848) and Washington, or Harlem, Bridge (1888)

Harlequin (hâr'lukwĭn), stock character derived from the pantomime of the Italian COMMEDIA DELL' ARTE of the 16th and 17th cent He usually played opposite COLUMBINE, sometimes as her father He was masked, dressed in motley colors, and always carried a bat, the ancestor of the slapstick Originally a servant or an adventurer, he later appeared in many guises but was always a nimble dancer and acrobat, a wit, a dreamer, and a grotesque rogue In later English pantomime he is mute, more mischievous, and invisible to clown and pantaloon, his rivals for Columbine See C W. Beaumont, *The History of Harlequin* (1926)

Harley, Robert, 1st **earl of Oxford** and **Earl Mortimer,** 1661–1724, English statesman and bibliophile His career, which illustrates the power of personal connections and intrigue in the politics of his day, began when he was a member of Parliament as a Whig in the reign of William III His sympathies shifted, and before Queen ANNE took the throne he was a rival of Henry ST JOHN as Tory leader He was made a secretary of state (1704) and a commissioner (1706) for negotiating the union with Scotland but was forced out of office in 1708 by MARLBOROUGH and GODOLPHIN His influence on the queen through his kinswoman Mrs Masham (later Lady MASHAM) continued, however, and brought him to power with St John after the Whigs fell in 1710 In 1711 his personal popularity, wavering despite the journalistic services of Swift and Defoe, was bolstered by sympathy after an attempt on his life Created earl and made lord high treasurer, he consolidated his power and was virtual prime minister until 1714 Early negotiations for peace, undertaken secretly while he still talked war, led to the end of the War of the SPANISH SUCCESSION by the Peace of Utrecht (1713) Harley also instituted the plan that led to the scandal of the SOUTH SEA BUBBLE He and St John, now Viscount Bolingbroke, struggled for power, and Harley, after he had lost the friendship of Lady Masham, lost (1714) his office After the accession of George I, he was imprisoned (1715) and impeached (1716) for his conduct of the peace negotiations and for dealings with the JACOBITES, but he was acquitted The manuscript collection gathered by Harley and his son Edward constitute the HARLEIAN LIBRARY in the British Museum See biographies by E S. Roscoe (1902) and O B Miller (1925)

Harlingen (hâr'lĭngŭn), city (1940 pop 13,306, 1947 estimated pop 18,500), extreme S Texas, NW of Brownsville Founded c.1904 with the coming of the railroad, it grew when the culture and packing of citrus and other fruits, truck, and cotton developed in the irrigated lower Rio Grande valley. It has canneries, a quick-freezing plant, cotton-processing plants, and small factories.

Harlowton (här'lōtŭn), city (pop 1,547), co seat of Wheatland co, central Mont, on the Musselshell river, inc 1917. It has railroad shops and a large flour mill

Harmar, Josiah, 1753–1813, American army officer, b Philadelphia He served throughout the American Revolution, first under George Washington in the North and then under Nathanael Greene in the South He became in 1785 commander of the forces on the Ohio river, was promoted (1787) brigadier general, and led (1790) an expedition against the Shawnee and Miami Indians in the valleys of the Scioto and Maumee rivers His expedition was inconclusive and had to be followed by that of Arthur St Clair Harmar resigned (1792) from service and held office (1793–99) as adjutant general of Pennsylvania

Harmensen, Jacob · see Arminius, Jacobus

Harmhab (härm'hăb) or **Horemheb** (hō'rĕmhēb'), fl. 1350 B C, king of ancient Egypt, founder of the XIX dynasty A powerful noble under Ikhnaton, he seems to have been chief officer of state under the successors of that ruler, especially Tut-ankhamen Harmhab himself became king c 1350 B C He repaired the temples of Amon, abandoned or demolished buildings erected under Ikhnaton, and by untiring effort suppressed corruption in the government and restored prosperity to Egypt He was succeeded (c 1315) by Ramses I

Harmodius and Aristogiton (härmō'dēus, ă"rĭstŏjī'tŭn), d c 514 B C, Athenian patriots Hipparchus, the tyrant, tried to supplant Aristogiton in the affection of Harmodius, but, his advances being scorned, he avenged himself by publicly insulting Harmodius' sister In return the friends planned to assassinate Hipparchus and his brother Hippias The plans miscarried, Hipparchus was killed, but Hippias was not hurt Harmodius was killed on the spot, and Aristogiton was executed In spite of their mixed motives they were soon made heroes of Athens A public statue was erected, and coins were struck with their image Verses about them (ascribed to Callistratus) became the war song of liberty-loving Athens

Harmon, Judson, 1846–1927, U S Attorney General and governor of Ohio, b Newton, Ohio, grad Denison Univ, 1866, and Cincinnati Law School, 1869 He was a lawyer and a judge in Cincinnati for many years and served (1895–97) ably as U S Attorney General under President Cleveland He was elected (1908) governor of Ohio on the Democratic ticket, thus breaking a long Republican rule He was reelected in 1910, defeating Warren G Harding As governor he put through many reforms, including a corrupt-practices act, a workmen's compensation act, and Ohio's ratification of the Sixteenth and Seventeenth amendments of the U S Constitution

Harmonia, in Greek legend, the wife of Cadmus A robe and a necklace given her on her wedding day caused misfortune to all who wore them

harmonic, subsidiary musical tone produced by the vibration of segments of a sound-producing body The fundamental tone, also called the first partial, of a vibrating string or column of air, by whose frequency the tone is identified, is produced by its vibration as a whole The quality, or timbre, of a tone is determined by the number of its harmonics which are heard and their relative intensity The rate of vibration of halves, thirds, quarters, etc, of the vibrating body is respectively twice, three times, four times, etc, that of its whole length Only the first 16 harmonics are audible to the human ear Harmonics are also called upper partials and overtones, although the term *overtones* includes a number of sounds which are not musical.

harmonica. **1** The simplest of the musical instruments employing free reeds, also known as the mouth organ or French harp It was probably invented in 1829 by Sir Charles Wheatstone, who called his instrument the aeolina The reeds are set in a small narrow case of wood or metal For each reed there is a hole, through which one draws or blows air with the mouth Commonly the instrument is diatonic, having a compass of about two octaves, but its comparatively few virtuoso players use larger instruments having the full chromatic scale The cheapness and extremely small size of the harmonica adapt it well to class instruction among school children, but it remains a novelty in concert music **2** Musical glasses, introduced in Dublin in 1743 by Richard Pockrich, played upon in London by Gluck in 1746, and improved by Benjamin Franklin c 1761 Franklin's instrument consisted of a series of glass bowls, graduated in size and fitting inside one another They were supported by a horizontal spindle passing through all of the bowls As the spindle was made to revolve by means of a lever, the edges of the bowls passed through a trough filled with water. Contact of the player's fingertip with the moistened revolving edges of the bowls produced the sound A later form of the instrument had a keyboard Both Mozart and Beethoven, as well as a few lesser composers, wrote works for it **3** Strips of metal or glass, played upon with hammers or, later, having a keyboard, as described by Berlioz in his treatise upon instrumentation.

harmonium: see reed organ.

Harmony, borough (pop 846), Butler co, W Pa, NE of Zelienople It was the first settlement (1805) of the Harmony Society.

harmony, in music, the simultaneous sounding of two or more tones and, especially, the study of chords and their relations Harmony was the last in the development of what may be considered the basic elements of modern music—harmony, melody, rhythm, and tone quality or timbre Although polyphony contains sounds which to our ears are chords, horizontal or melodic considerations took precedence over the vertical or harmonic aspect until about the 16th cent, when the idea of chords had been definitely established Rameau, in 1722, presented the idea that different groupings of the same notes were but inversions of the same chord During the 18th cent the concept of tonality—taking a certain chord as the key center of a composition and the major and minor modes as its basis—became general The polyphonic music of Bach has a definite harmonic structure As the system of triads and their relations was explored, the principle of modulation appeared and composers developed freer concepts of tonality, finally, in the 20th cent, some have discarded tonality in favor of music which is composed in terms of horizontal contrapuntal lines See Lawrence Abbott, *The Listener's Book on Harmony* (1941), Walter Piston, *Harmony* (1941)

Harmony Society, religious society founded by German Separatists under the leadership of George Rapp The Harmonists (or Rappites) held property in common and subscribed to the austere doctrines of their leader, including that of celibacy In 1805 the society founded the village of Harmony, Pa, developing it into a prosperous agricultural and industrial community Led by Rapp, the Harmonists moved in 1814–15 to Indiana, founding another Harmony They prospered there too, but in 1825 sold their holdings to Robert Owen (see New Harmony) and returned to Pennsylvania to create their third village at Economy (now Ambridge), NW of Pittsburgh In 1832 a part of the colony, under "Count Leon," a German adventurer, withdrew to form a separate community. The society was weakened by the death of Rapp, dwindled as the members grew older, and went out of existence after 1906 See Aaron Williams, *The Harmony Society* (1866), John S Duss, *The Harmonists* (1943)

Harmsworth, Alfred Charles William · see Northcliffe, Alfred Charles William Harmsworth, Viscount

Harnack, Adolf von (ä'dôlf fŭn har'nak), 1851–1930, German theologian and church historian He was professor of church history successively in the universities of Leipzig, Giessen, Marburg and Berlin He was director (1905–21) of the Royal Library, Berlin, and president of the scientific research foundation, Kaiser Wilhelm Institute His great work, *Lehrbuch der Dogmengeschichte* (4 vols, 1886–90, Eng tr, *The History of Dogma*, 7 vols, 1895–1900), has exerted an important influence upon modern theological study Other translated works include *Monasticism Its Ideals and Its History* (1895), *What Is Christianity?* (1901), *The Apostles' Creed* (1901), *The Expansion of Christianity in the First Three Centuries* (2 vols, 1904–5), and *Luke the Physician* (1907)

Harnepher (har'nēfur, härnē'fur), son of Zophah the Asherite 1 Chron 7 36

harness. Wheeled vehicles and plows drawn by animals were inventions of the Bronze Age, if harness was used earlier, in the Neolithic period, possibly for dogs drawing travois and sledges, the Bronze Age at least gave it new importance Goats are sometimes driven in harness, as are oxen, but oxen usually draw their loads by a wooden yoke, without harness The typical harness is for horses It is usually of leather with some metal parts, the hames (two curved pieces in the harness of draft animals, to which the traces are fastened) are sometimes of steel and sometimes of wood The power of the horse is applied at the shoulders, either to a collar or to a breastband—a band crossing the shoulders below the neck Harnesses, therefore, are of two main kinds—the collar harness and the breast harness Either may be used in driving one horse, but the breast harness is lighter and simpler and is usually preferred The collar harness is commonly used when two horses are driven abreast, since the neck yoke, by which the pole or tongue of a vehicle is held in place, is conveniently attached to the collar of each horse by a strap The horse draws his load by straps called traces or tugs. He is controlled by reins or lines attached to the bit, which is held in his mouth by the bridle Other parts of the harness are designed to add to the efficiency, comfort, or beauty of the horse In America when harnesses were made by handicraftsmen, a typical sign of the harness shop was a life-size wooden horse, on which harness might be displayed. Many of these wooden horses are now in museums where they serve as the chargers of armed knights.

Harney, William Selby, 1800–1889, American general, b Haysboro, near Nashville, Tenn. He entered the army in 1818 and gained a colonel's rank in the Florida Indian campaigns Ranking cavalry officer under Scott in the Mexican War, Harney was disliked by that general, who arbitrarily relieved him of his command and had him court-martialed for resuming it in defiance of orders Harney apologized, but at the same time appealed to superiors in Washington, who supported him Restored to his position, he performed brilliantly at Cerro Gordo (1847) In the Platte country after the war, Harney defeated the Sioux As commander of the Dept of Oregon, he ordered (1859) the occupation of San Juan Island, which the British claimed, the San Juan Boundary Dispute was thus brought to a crisis For this action he was recalled At the opening of the Civil War, Harney commanded the Dept of the West, with headquarters in St Louis He agreed with Gen Sterling Price of the pro-secessionist Missouri militia to make no hostile move if the militia kept the peace The radical Unionists, irked at his conciliatory policy, had him deprived of his command in May, 1861, he was retired in 1863 See biography by L U Reavis (1878)

Harney Peak, 7,242 ft high, SW S Dak, NNE of Custer, highest point of the Black Hills and of the state Mt Rushmore is northeast

Harnosand, Swed *Härnösand* (härnûsand'), seaport (pop 13,709), co seat of Vasternorrland co, NE Sweden, at the mouth of the Angerman river It is a Lutheran episcopal see Its harbor, though icebound in winter, is a center for the coastwise trade of N Sweden and exports timber, tar, cellulose, and wood pulp Settled in the 14th cent and incorporated in 1585, it was plundered and burned by the Russians in 1721 It is said to have been the first European town to be electrically lighted (1885)

Harod (hă'–) [Heb, =trembling], spring, near Mt Gilboa, where Gideon tested his men Judges 7 1–8

Haroeh (hă'rōĕ, hărō'ĕ) [Heb, =the seer], descendant of Judah 1 Chron 2 52

Harold, 1022?–1066, king of England (1066), rival of William I (William the Conqueror) The son of Godwin, earl of Wessex, he belonged to the most powerful noble family of England in the reign of Edward the Confessor Through Godwin's rise Harold was made earl of a part of East Anglia The fall of Godwin in 1051, however, involved the family and all went into exile Harold went to Ireland, where he recruited a strong force and brought it to the English coast In 1053 he joined his father and brothers in the expedition against England Godwin recovered power, and Harold was restored to his old earldom He was not as high in the favor of the king as his brother Tostig, but his succession to the earldom of Wessex and to great estates at his father's death made Harold the most powerful figure in England except the king, and he aspired to become heir to the throne He gained some glory by a great campaign against the Welsh leader Gruffyd ap Llywelyn in 1062–63 About this time Harold, on a ship in the English Channel, was driven by an adverse wind to the coast of Ponthieu The count of Ponthieu seized him but was, as William's vassal, forced to surrender him to William of Normandy Harold was compelled to take an oath to support William's candidacy to the English throne and also agreed to marry his daughter Returning to England, Harold renounced his oath as one of coercion When the Northumbrians revolted against Harold's brother Tostig and chose Morkere in his place as earl of Northumbria, Harold took Morkere's part The family was thus divided when Edward the Confessor died, naming Harold his heir instead of Edgar Atheling Harold succeeded to the throne also as the choice of the council William of Normandy immediately undertook an invasion At the same time, Tostig, with Harold III of Norway, invaded England from the north Harold went north and soundly defeated them (Sept 25) at the battle of Stamford Bridge, in which both Tostig and Harold III were slain Then the harassed king hurried south to oppose William, who had landed at Pevensey (see Norman Conquest) Harold established his forces in hastily built earthworks near Hastings They fought valiantly but were finally put to rout, and Harold himself was killed

Harold I or **Harold Fairhair,** Norse *Harald Haarfagre*, c 850–c 933, first king of Norway, son of the petty king Halfdan the Black He initiated a series of battles against the other petty kings, climaxed by a great victory at Hafrs Fjord (872) which made him ruler of Norway After being defeated, many of the Viking rulers fled to Iceland This conquest was also the impelling force in driving forth the Vikings to conquer Normandy under Rollo Harold conquered the Shetland and the Orkney Islands On his death his lands were divided among his sons, Eric Bloodyaxe being made overlord

Harold III or **Harold Hardrada** (härdrä'dŭ), Norse *Harald Hardrådi* (Harold stern council), d 1066, king of Norway (1046–66), half brother of Olaf II After Olaf's defeat (1030), Harold went to serve Zoë, the Byzantine empress, in campaigns against the Seljuk Turks, but returned (1042) to Scandinavia to join the revolt against Magnus I. Made

joint king in 1046, he became sole king in 1047 and led in the turbulent warfare of the time He greatly affected the history of England In 1066 he accompanied TOSTIG, the exiled earl of Northumbria, on an invasion of N England At the same time William of Normandy was preparing an invasion of S England The hard-pressed king of the English, HAROLD, defeated the Norse invasion at Stamford Bridge, and both Harold III and Tostig fell in the battle But the way was prepared for the Norman Conquest

Harold Bluetooth, d c 985, king of Denmark Succeeding his father, Gorm the Old, in 935, he tried to assert suzerainty over Norway but was defeated by the Germans and forced to accept Christianity, which he thus introduced to Denmark He was defeated and killed in battle with his son's forces.

Harold Fairhair see HAROLD I

Harold Hardrada see HAROLD III

Harold Harefoot, d 1040, king of England (1037–40), illegitimate son of CANUTE and Ælfgifu of Northampton On his father's death (1035) he and his half brother Harthacanute struggled for control of England A compromise was reached by which Harold should be regent in Harthacanute's absence in Denmark By 1037 Ælfgifu succeeded in having her son recognized as king His brief reign was one of bloodshed and confusion, and he died as Harthacanute was preparing to invade England and claim his throne

Haronite (hā'–), in the Bible, apparently a copyist's error for Harodite 1 Chron 11 27

Harosheth (–rō'–), unidentified place, the home or camp of Sisera Judges 4 2,13,16

Haroun al-Rashid see HARUN-AL-RASHID

harp, stringed musical instrument of ancient origin, whose strings are plucked with the fingers It went from Syria to Europe, and very early became popular in the British Isles, particularly in Ireland, it was certainly known in England and Wales in the 10th cent During the 15th cent it began to be made, as it is today, in three parts—sound box, neck, and pillar The strings are stretched between the sound box and the neck, into the neck, usually curved inward, are fastened the tuning pegs During the Renaissance its compass was increased, and the baroque period gave it its characteristic ornamentation Originally it was diatonic, but chromatic harps, having strings for each tone of the chromatic scale, appeared late in the 16th cent More practical were the harps made in the late 17th cent in Tyrol, strung diatonically and equipped with hooks capable of altering the pitch of any string by a semitone Pedals were devised for this purpose c 1720 in Germany, but the perfecting of the harp and its admission to the orchestra awaited the invention (c 1810) of the double-action pedals by Sébastien Érard Its principal use in the orchestra as well as most of its solo repertoire dates from the late 19th cent See W H Grattan-Flood, *The Story of the Harp* (1905)

harp, aeolian · see AEOLIAN HARP

Harpenden (har'pundun), urban district (1931 pop 13,750, 1943 estimated pop 14,750), Hertfordshire, England, NW of London It is the site of Rothamsted Experimental Station (for agricultural research)

Harper, Ida Husted, 1851–1931, American woman suffragist Allied with the woman-suffrage movement from 1898, she became the official reporter and historian of the National American Woman Suffrage Association She wrote *The Life and Works of Susan B Anthony* (3 vols, 1898–1908) and later volumes (IV–VI, 1900–1922) of the *History of Woman Suffrage* started by Susan B Anthony, who also contributed to Vol IV

Harper, William Rainey, 1856–1906, American educator and Hebrew scholar, b New Concord, Ohio, grad Muskingum College, 1870, Ph D Yale, 1875 In 1879 he became an instructor in Hebrew at Baptist Union Theological Seminary, Chicago He was appointed professor in 1880 and wrote several texts on Hebrew language and literature After 1883 he gave courses also at Chautauqua Institution In 1886 Harper went to Yale as professor of Semitic languages, resigning in 1891 to become the first president of the Univ of Chicago See biography by T W Goodspeed (1928)

Harper, city (pop 1,695), S Kansas, SW of Wichita, in a wheat area, settled 1877, inc 1880

Harpers Ferry, town (pop 665), easternmost W Va, on bluffs at the confluence of the Potomac and Shenandoah rivers, c 55 mi NW of Washington, D C, inc 1763 Its beautiful location at a point where the rivers break through the Blue Ridge has made it a tourist center In 1747 Robert Harper established a ferry here—hence the name An important U S arsenal was located here in 1796 This was seized by John BROWN in his raid of Oct 16, 1859 Harpers Ferry was important in the Civil War as a key to the Shenandoah Valley Virginia militia seized it on April 18, 1861, but on June 15 Gen J E Johnston abandoned it on the advance of Union forces under Gen Robert Patterson In Lee's ANTIETAM CAMPAIGN, Stonewall Jackson captured the town with its garrison of 11,000 men, but after Lee's retreat it again fell into Union hands Similarly, in the Gettysburg campaign, the town was abandoned to the Confederate army and later recovered, to be held by the Union for the rest of the war Storer College (junior) for Negroes, here, has an interesting history museum

Harpignies, Henri Joseph (ärē' zhōzĕf' arpēnyē'), 1819–1916, French landscape painter, follower of Corot He traveled in Italy but painted chiefly at Fontainebleau and Auvergne and on the banks of the Allier His landscapes are distinguished for their serene light and broad treatment He is represented in the Luxembourg Museum, Paris, and in the museums of Lille, Orléans, and Grenoble His *Moonrise* is in the Metropolitan Museum.

Harpocrates (harpŏ'krutēz), Egyptian deity, child of Osiris, and in EGYPTIAN RELIGION identified with Horus He was one of the Egyptian gods who grew very popular in Rome He was represented as a small boy with his finger on his lip and came to be considered the god of silence

harpoon (harpōōn'), weapon used for spearing whales and large fish The early type was a flat triangular piece of metal with barbed edges and with a socket for attaching a wooden handle, to the end of which a long rope was fastened The modern weapon usually has but one barb or point, with a pivoted crosspiece to prevent its withdrawal Harpoons are used to capture the whale, which is commonly killed by driving a lance into the vital parts Harpoons may be thrown by hand or fired from guns These guns are 4 to 5 ft long, weigh about 75 lb, and discharge a harpoon weighing about 100 lb Svend Foyn, a Norwegian, invented a harpoon c 1856 with an explosive-filled tip which kills the whale A later invention is a harpoon propelled by air pressure and having a valve which opens as it strikes the whale, thus admitting air to hasten death and to keep the whale afloat

harpsichord, stringed musical instrument played from a keyboard Its strings are plucked by quills or jacks, while those of the clavichord and the piano are struck with hammers The harpsichord originated in the 14th cent, in the 15th cent, Venice was the center of its manufacture, and at this time its prevailing shape was winglike, similar to that of a grand piano The square harpsichord, often called SPINET, became more common in the 16th cent, when harpsichord making in the northern countries surpassed that of Italy Perhaps the greatest craftsmen of all were the Ruckers family of Antwerp, who worked from the late 16th cent through most of the 17th cent Varying the touch in harpsichord playing does not alter the quality or volume of tone, to compensate for this fact, octave couplers and various stops which alter the tone in several ways were introduced Contrast in volume and in tone color is made easier by the addition of a second keyboard, found on German harpsichords from the late 16th cent and on Italian ones from c 1665 In the 19th cent the prominence of the harpsichord was usurped by the piano See Philip James, *Early Keyboard Instruments from Their Beginning to the Year 1820* (1930)

Harpswell, resort town (pop 1,305), SW Maine, on a peninsula and islands in Casco Bay NE of Portland, settled 1720, inc 1758 In Harpswell Center is the church (1843) where Elijah Kellogg preached

Harput (har'pōōt), town (pop 2,095), E central Turkey, near Elazig It long was an administrative and trading center, but has been replaced by Elazig There is an ancient Jacobite convent In 1895 the Christian population of Harput suffered heavily in the Armenian massacre The name formerly was spelled Kharput

Harpy, in Greek religion, predatory monster with the head of a woman and the body, wings, and claws of a bird The Harpies were daughters of Electra, the sea nymph, and Thaumas

harpy, large bird of prey, named from the winged monsters of Greek mythology, found from S Mexico to Brazil It is from 38 to 40 in long The Aztecs called it the "winged wolf"

Harran, Mesopotamia see HARAN.

Harrar, Ethiopia see HARAR

Harricanaw (hărĭkă'nô), river, 250 mi long, rising in W Quebec N of Abitibi Lake, flowing northwest across the Ont line, and emptying into James Bay at Hannah Bay It is navigable for 50 mi

Harriman, Edward Henry, 1848–1909, American railroad executive, b Hempstead, Nassau co, N Y He became a stockbroker in New York city and soon entered the railroad field He attracted attention by able management of the Illinois Central RR, of which he became a director (1883) and vice president (1887) He became executive committee chairman of the Union Pacific in 1898 and repossessed for it the Oregon Short Line By purchase of the holdings of Collis P HUNTINGTON, he secured control not only of the Southern Pacific RR, but also of the Central Pacific RR His attempt to control the Chicago, Burlington & Quincy RR for entrance into Chicago was blocked by James J HILL in a struggle famous in American financial history He later joined with Hill and Morgan in forming the Northern Securities Company, a holding company to prevent railroad competition This was ordered dissolved by the U S Supreme Court Harriman used the financial strength of his roads to buy widely and speculatively in railroad stocks elsewhere His practices were investigated and condemned by the Interstate Commerce Commission (1907) He conducted the Harriman Alaskan expedition of 1899, a scientific undertaking, sponsored boys' clubs, and pledged $1,000,000 and 10,000 acres of forest land to New York state for park purposes This reservation, now 42,500 acres, is in the Palisades Interstate Park See biographies by George Kennan (1922) and H J Eckenrode and P W Wight (1933)

Harriman, William Averell, 1891–, U S Secretary of Commerce (1946–48), grad Yale, 1913, son of E H Harriman Expanding his railroad inheritance, W Averell Harriman became (1934) board chairman of the Union Pacific and was also a banker and shipbuilder He was administrative officer (1934–35) of the NRA and an official (1937–40) in the Dept of Commerce, then became (1941) chief overseas administrator of lend-lease He was ambassador to the USSR (1943–46) and to Great Britain (March–Sept 1946) After serving (1946–48) as Secretary of Commerce, he was appointed (April, 1948) U S representative abroad for the EUROPEAN RECOVERY PROGRAM

Harriman, city (pop 5,620), E Tenn, W of Knoxville and near the Tennessee river, platted 1889, inc 1891 In a farm area, it is a railroad shipping point and a trade center and has textile mills and other plants

Harrington, James, 1611–77, English political writer His *Commonwealth of Oceana* (1656) was a picture of a utopian society based on a sort of patrician agrarianism and the ballot He extended the elective principle and believed in the division of powers of government He also advocated the written constitution Harrington's ideas seem to have been drawn from Plato, Machiavelli, and the example of the republic of Venice Penn's government in Pennsylvania is said to owe much to the *Oceana*, and traces of Harrington's thought are to be seen in other British colonies in America and in the doctrines of the American Revolution and the French Revolution See H F Russell Smith, *Harrington and His Oceana* (1914)

Harrington, Mark Walrod, 1848–1926, American astronomer and meteorologist, grad Univ of Michigan, 1868 He became professor of astronomy and director of the observatory at the Univ of Michigan in 1879 In 1891 he became chief of the U S Weather Bureau and was president of the Univ of Washington (1895–97) He founded the *American Meteorological Journal* and was its editor (1884–92) He wrote *About the Weather* (1899)

Harrington, city (pop 2,113), S central Del, S of Dover, inc 1869 It is a trading center, and the Kent and Sussex Fairgrounds are here

Harrington Park, borough (pop 1,389), NE N J, NE of Paterson, inc 1904

Harriot, Thomas (hă'rĕut), 1560–1621, English mathematician and astronomer He was tutor to Sir Walter Raleigh, who sent him in 1585 to Virginia as surveyor with Sir Richard Grenville Returning to England, Harriot wrote *A Brief and True Report of the New Found Land of Virginia* (1588), one of the earliest known large-scale statistical surveys He made valuable contributions to the science of algebra, introducing new symbols and notation His *Artis analyticae praxis* appeared in 1631

Harris, Sir Arthur Travers, 1892–, British air chief marshal After serving for a time in an African infantry regiment in the First World War, "Bert" Harris transferred to the air force and was given command of the first English night-flying unit Prominent in the Royal Air Force from its beginning, he was chief of the bomber command (1942–45) and proponent of the saturation bombing tactics used against German targets

Harris, Chapin Aaron, 1806–60, American dentist, b Pompey, N Y One of the founders of dentistry as a profession, he was the author of *The Dental Art* (1839, later called *Principles and Practice of Dental Surgery*) and *Dictionary of Dental Science* (1849) and founder (1840) of the first dental school—the Baltimore College of Dental Surgery (now part of the Univ of Maryland) He also founded the *American Journal of Dental Science* (1839)

Harris, Elisha, 1824–84, American physician, b Westminster, Vt, M D College of Physicians and Surgeons, 1849 He was one of the chief founders of the U S Sanitary Commission and was a leader in organizing sanitary work in New York city, aiding in the survey of 1864 and establishing the city's first free vaccination service He was a founder and first secretary of the American Public Health Association and in 1880 became a commissioner of the newly formed New York state board of health

Harris, Frank, 1856–1931, British-American author, b Galway, Ireland He studied at the Univ of Kansas, became an American citizen, and, returning to England, edited successively the *Evening News*, the *Fortnightly Review*, the *Saturday Review*, and *Vanity Fair* He knew many of the younger writers of the day, including George Bernard Shaw and H G Wells, both of whom he later claimed to have discovered Among his books were collections of short stories, *Montes the Matador* (1900) and *Veils of Isis* (1915), five series of rather scandalous

Contemporary Portraits (1915–27), biographies of Oscar Wilde (1916) and G B Shaw (1931), and his autobiographies, *My Reminiscences as a Cowboy* (1930) and the deliberately frank *My Life and Loves* (3 vols , 1923–27) See biographies by H K Lunn (1932) and E. M Root (1947)

Harris, George Washington, 1814–69, American humorist, b near Pittsburgh He lived in and near Knoxville, Tenn , working as steamboat captain, metalworker, farmer, and railroad man, among other vocations His *Sut Lovingood Yarns* (1867) are humorous dialect stories supposedly told by a rough mountaineer of the Great Smoky region

Harris, Isham Green (I'shum), 1818–97, American political leader, b Franklin co , Tenn Admitted to the bar in 1841, he was elected in 1847 to the Tennessee senate Harris, a states' rights Democrat, served (1849–53) in Congress and was elected governor of Tennessee in 1857 and reelected in 1859 and 1861 It was largely through his efforts that Tennessee joined the Confederacy in May, 1861 Forced by Union victories to leave the state, he served upon the staffs of different Confederate generals from 1862 to 1865, when he fled to Mexico and then to England In 1867 he returned to practice law in Memphis From 1877 to his death he was a U S Senator from Tennessee

Harris, James, 1709–80, English grammarian He wrote *Hermes* (1751), an elaborate treatise on universal grammar, most celebrated in its day

Harris, Joel Chandler, 1848–1908, American author, b Eatonton, Ga He is famous for his "Uncle Remus" stories, first published in the Atlanta *Constitution*, with which he was associated from 1876 to 1900 His stories and sketches made the paper famous even outside Georgia. his first collection, *Uncle Remus· His Songs and His Sayings* (1881), gained world-wide fame, especially for the "Tar-Baby" story The demand for more "Uncle Remus" books was met by *Nights with Uncle Remus* (1883) and a series issued until 1918 Harris first gave literary form to Negro folklore, and his stories accurately represent the Negro dialect of middle Georgia His record of the white Georgia cracker is equally accurate, in such works as *Mingo and Other Sketches in Black and White* (1884) and *Free Joe and Other Sketches* (1887) His home in Atlanta is now an Uncle Remus memorial See biography by Julia C Harris (1918)

Harris, Robert, 1849–1919, Canadian portrait and landscape painter, b North Wales He came to Prince Edward Island in 1859 He studied art in London and Paris and was a charter member of the Royal Canadian Academy (1882), of which he was president from 1893 to 1906 Most of his life was spent in Montreal His painting *Fathers of Confederation* was destroyed in the fire at the Ottawa Parliament buildings in 1916

Harris, Roy, 1898–, American composer, b Lincoln co , Okla , pupil of Arthur Farwell and Nadia Boulanger He began to compose c 1925, and even before his technique was very well developed his compositions displayed the vital and personal emotional expression which is characteristic of all his works Significant works are his *Symphony 1933* (Boston, 1934), *When Johnny Comes Marching Home* (1934), an "American overture", his Symphony for Voices (1936), to poems by Walt Whitman, his Third Symphony (1939), his Folksong Symphony (1940), and his Fifth Symphony (1943) Outstanding among his numerous works of chamber music is his Piano Quintet (1936) While not attempting to use techniques of composition which would label him as a modernist, he does occasionally employ such devices as polytonality and irregular metrical patterns A strong gift for melodic invention is evident in his works He was head of the composition department (1934–38) of the Westminster Choir College, Princeton, N J , and composer in residence (1941–42) at Cornell Univ and in 1945 became musical director of the Office of War Information

Harris, Thaddeus William, 1795–1856, American entomologist, b Dorchester, Mass , grad Harvard, 1815 He was librarian at Harvard from 1831 He made the study of insects his hobby and taught and wrote about them. Through his classic *Treatise on Some of the Insects of New England Which Are Injurious to Vegetation* (1842) he did much to establish economic entomology in the United States

Harris, Thomas Lake, 1823–1906, American Christian mystic He was born in England and was brought to America as a child In 1845 he was called to the pulpit of the Fourth Universalist Society, New York, but three years later, deeply impressed by spiritualism, Harris organized the First Independent Christian Society in that city At this period he dictated long poems for which he claimed to have received inspiration while in trances. He wove the ideas of Swedenborgianism into his religious teachings Under his leadership, the Brotherhood of the New Life, to which adherents had been drawn in Great Britain as well as the United States, established a community in Wassaic, N Y (1861), later moving it to near-by Amenia (1863–67), and in 1867 to Brocton, near Buffalo, where it was known as Salem-on-Erie In that year Laurence OLIPHANT joined this communal religious settlement. Harris and part of the community moved to Santa Rosa, Calif , in 1875; Oliphant in 1881 broke completely with Harris. Ten years later Harris left the Santa Rosa community See H W Schneider and George Lawton, *A Prophet and a Pilgrim* (1942)

Harris, Townsend, 1804–78, American merchant and diplomat, b Sandy Hill, Washington co., N Y A merchant in New York city for many years, he became (1846) a member of the board of education and helped obtain the legislation chartering the present College of the City of New York Appointed (1855) consul general to Japan, he arrived at Shimoda in 1856, the first U S diplomat in Japan after that country had been opened up by Commodore Matthew C Perry In 1859 Harris was raised to be minister Having previously negotiated a commercial treaty with Siam, he won the confidence of the Japanese and obtained a commercial treaty (1858) notably moderate in its demands See M. E Cosenza, ed , *The Complete Journal of Townsend Harris* (1930), Carl Crow, *He Opened the Door of Japan* (1939)

Harris, William Torrey, 1835–1909, American educator and philosopher, b Windham co , Conn , educated at Yale He was superintendent (1868–80) of the St Louis public school system and was U S commissioner of education (1889–1906) In 1873, with Susan Blow, he established in St Louis the first permanent kindergarten in America He interpreted German philosophical thought, particularly Hegelianism, through his books and in the pages of the *Journal of Speculative Philosophy*, which he founded and edited (1867–93) His books include *Hegel's Logic* (1890) and *The Psychologic Foundations of Education* (1898) See biography by J S Roberts (1924), K F Leidecker, *Yankee Teacher* (1946)

Harris, southern part of LEWIS WITH HARRIS, Outer Hebrides, Scotland Harris is part of Inverness-shire and has an area of 123,752 acres It is famous for its hand-woven tweeds

Harrisburg 1 Town (pop 1,193), co seat of Poinsett co , NE Ark , S of Jonesboro 2 City (pop 11,453), co seat of Saline co , S Ill , N of Paducah, Ky , in a coal, grain, and timber area, platted in the 1850s, inc 1861 An industrial center, the city has flour mills and brick and tile factories It is headquarters for Shawnee National Forest, which lies to the south 3 City (pop 83,893), state capital, and co seat of Dauphin co , SE Pa , laid out 1785, inc as a borough 1791, as a city 1860 It is an important railroad center, with coal and iron mines near by, and produces iron, steel, brick, and lumber products Situated on the Susquehanna river, the city has numerous parks and bathing beaches Buildings include the capitol, a state library, a museum, and a hospital for the insane It was settled by representatives of many German religious sects and by Scotch-Irish In 1812 it became the state capital and first grew as a canal and railroad center See G P Donehoo, *Harrisburg, the City Beautiful* (1927)

Harrison, Benjamin, 1726?–1791, American Revolutionary patriot, signer of the Declaration of Independence, b "Berkeley," Charles City co , Va , educated at the College of William and Mary As a member of the house of burgesses (1749–75), he protested against the Stamp Act (1765) He was a delegate to the Continental Congress (1774–78) and later governor of Virginia (1781–84) His son William Henry Harrison and his great-grandson Benjamin Harrison were U S presidents

Harrison, Benjamin, 1833–1901, 23d President of the United States (1889–93), b North Bend, near Cincinnati, Ohio, grad Miami Univ , 1852, grandson of William Henry Harrison After reading law in Cincinnati, he removed (1854) to Indianapolis, where he was a lawyer and politician He served in the Civil War as commander of an Indiana volunteer regiment and in 1865 was brevetted brigadier general of volunteers A well-established corporation lawyer, he was (1881–87) a Republican Senator but was defeated for reelection He followed all Republican policies faithfully and achieved some notice by supporting a bill to give Alaska a frame of government The Republicans chose him (1888) presidential candidate against Grover Cleveland He was elected in the electoral college, though Cleveland had the larger popular vote Harrison as President approved all regular Republican measures, including the highly protective McKinley Tariff Act His moderate stand on civil service reform displeased both reformers and spoilsmen The first Pan-American Conference was held (1889) in his administration Defeated for reelection in 1892 by Cleveland, Harrison returned to his Indianapolis law practice He later represented Venezuela in the Venezuela Boundary Dispute. Harrison wrote *This Country of Ours* (1897) and *Views of an Ex-President* (1901)

Harrison, Birge: see HARRISON, LOVELL BIRGE.

Harrison, Carter Henry, 1825–93, American politician, mayor of Chicago, b near Lexington, Ky , grad. Yale, 1845. After travel in Europe, he settled in Chicago to practice law. He served (1875–79) in Congress, was elected mayor of Chicago in 1879, and served four successive terms A Democrat, he was defeated for governor of Illinois in 1884 He was elected (1893) World's Fair mayor Soon afterward his colorful career was cut short by assassination His son, **Carter Henry Harrison**, 1860–, b. Chicago, was also mayor of Chicago five times (1897–1905, 1911–15) See biography by C O Johnson (1928)

Harrison, Constance Cary, 1843–1920, American novelist, b Fairfax co , Va In 1867 she married Burton Norvell Harrison, who had been secretary to Jefferson Davis After their removal to New York she wrote essays, magazine articles, and several novels of the social life of the '80s and '90s Among the novels are *Bellhaven Tales* (1892), *Sweet Bells Out of Tune* (1892), and *The Anglomaniacs* (1899) See her autobiographical *Recollections Grave and Gay* (1911)

Harrison, Frederic, 1831–1923, English jurist, historian, and sociologist. Called to the bar in 1858, he became deeply interested in labor legislation, he was a member of the Commission for Trades Unions (1867–69) In 1869–70 he became secretary to the Commission for the Digest of the Law and in 1877–89 was professor of jurisprudence and international law under the Council of Legal Education At the same time he was rising to prominence as the leader of English positivism, becoming cofounder of, and contributor to, the *Positivist Review* and president of the English Positivist Committee A voluminous and interesting author, he wrote studies of the law, of politics, and of literature, biographies, a novel, and a long poem See his *Creed of a Layman* (1907), *Autobiographic Memoirs* (2 vols , 1911), and *De Senectute* (1923), Austin Harris, *Frederic Harrison· Thoughts and Memories* (1926)

Harrison, Henry Sydnor, 1880–1930, American novelist, b Sewanee, Tenn , grad Columbia, 1900 He was on the staff of the Richmond *Times-Dispatch* from 1902 to 1910 His best-known novel is *Queed* (1911), others are *V V's Eyes* (1913), *Angela's Business* (1915), and *Saint Teresa* (1922)

Harrison, Jane Ellen, 1850–1928, English classical scholar A fellow and lecturer in classical archaeology at Newnham College, Cambridge, she applied archaeological discoveries in the interpretation of Greek religion Her works include *Myths of the Odyssey in Art and Literature* (1882), *Greek Vase Painting* (with D S MacColl, 1894), *Prolegomena to the Study of Greek Religion* (1903), *Themis* (1912), *Ancient Art and Ritual* (1913), and *Epilegomena to the Study of Greek Religion* (1921) She made translations from the Russian See her delightful autobiography, *Reminiscences of a Student's Life* (1925)

Harrison, Lovell Birge, 1854–1929, American landscape and figure painter, known as Birge Harrison, b Philadelphia, studied in Philadelphia and in Paris, brother of Thomas Alexander Harrison He was a member of the National Academy of Design and director of the summer school of the Art Students League at Woodstock, N Y He was a frequent contributor to magazines and wrote *Landscape Painting* (1909) He is best known for his snow scenes and nocturnal effects Among his principal works are *November* (Marseilles), *Fifth Avenue at Twilight* (Detroit), and *Glimpse of the St Lawrence* and *Autumn Sunset* (Pa Acad of the Fine Arts)

Harrison, Pat (Byron Patton Harrison), 1881–1941, U S Congressman, b Copiah co , Miss He studied at Louisiana State Univ and after 1902 practiced law in Mississippi He served in the U S House of Representatives (1911–19) and in the U S Senate from 1919 until his death He became (1933) chairman of the Senate finance committee and was active in putting early New Deal legislation through Congress He was opposed to President Franklin D Roosevelt's tax measures, but supported his foreign policy

Harrison, Richard Berry, 1864–1935, American Negro actor, b Canada He is remembered for his playing of "De Lawd" in Marc Connelly's *Green Pastures* (1930–35)

Harrison, Ross Granville, 1870–, American biologist and anatomist, b Germantown, Pa , Ph D Johns Hopkins, 1894 He taught at Johns Hopkins (1896–1907) and went to Yale in 1907, serving as professor of comparative anatomy (1907–27) and as Sterling professor of biology (1927–38) He is internationally known for his work on muscle-nerve relationships in the embryo, on the regeneration and outgrowth of peripheral nerves, and on tissue culture

Harrison, Thomas Alexander, 1853–1930, American marine, landscape, and figure painter, b Philadelphia, studied in Philadelphia and with Bastien-Lepage in Paris He first attracted attention with his *Châteaux en Espagne* in the Salon of 1882, Paris Among his works are *Arcady* and *Solitude* (Luxembourg Mus , Paris), *Castles in Spain* (Metropolitan Mus); *The Wave* (Pa Acad of the Fine Arts), *Twilight* (Corcoran Gall), *Marine* (Philadelphia), and *Amateurs* (Art Inst , Chicago). He became a member of the National Academy in 1901

Harrison, William, 1534–93, English clergyman, topographer, and chronologist, educated at Cambridge and Oxford. He was rector in Radwinter,

Essex, after 1559 and became canon of Windsor in 1586. He wrote the description of England in *The Chronicles of England, Scotland, and Ireland* of Raphael Holinshed and probably translated the description of Scotland by Boece in the same work.

Harrison, William Henry, 1773–1841, 9th President of the United States (1841), b. "Berkeley," Charles City co , Va ; son of Benjamin[Harrison(1726?–1791) and grandfather of Benjamin Harrison (1833–1901). He attended Hampden-Sydney College and studied medicine under Benjamin Rush in Philadelphia before joining (1791) the army and taking part in campaigns against the Indians in the Old Northwest In 1798 he resigned to become secretary of the Northwest Territory, and the next year he became territorial delegate to Congress He helped secure the division of the territory into Ohio and Indiana and served (1800–1812) as governor of Indiana Territory at Vincennes He was perhaps more important than any other man in opening Ohio and Indiana to white settlement, negotiating a number of treaties with the Indians, notably the Treaty of Fort Wayne (1809). Indian opposition to American advance then concentrated in hostile demonstrations directed by TECUMSEH Harrison gathered a force and marched against the Indian chief At Tippecanoe river Harrison encamped and on the night of Nov 6–7, 1811, threw back an Indian attack This was the victory of Tippecanoe, the Indians were not decisively defeated, and the battle changed the aspect of affairs little In the War of 1812, after the debacle of Gen William Hull, Harrison was made commander in the Northwest The advance section of his troops was badly defeated (Jan , 1813) by Gen Henry A Proctor, but Harrison established himself at Fort Meigs at the rapids of the Maumee river and withstood two British attacks After Oliver H Perry's victory on Lake Erie had cut Proctor's supply line, Harrison advanced, took (Sept 15, 1813) Detroit, and advanced to defeat Proctor and establish American hegemony in the West at the battle of the Thames river on Oct 5, 1813 (see THAMES, BATTLE OF THE), in which Tecumseh was killed Later Harrison concluded treaties with the Indians—Greenville (1814) and Spring Wells (1815)—that ushered in an era of peace and white expansion in the Old Northwest He served in the House of Representatives (1816–19) and the Senate (1825–28) He was appointed (1828) minister to Colombia but was recalled (1829) by Andrew Jackson Harrison was a supporter of Henry Clay, and his political fortunes fell in Jackson's time He was even reduced to being a county recorder to support his family His fortunes rose again, however, as his position was enhanced as a compromise Whig candidate between Clay and Daniel Webster A group of Whig Anti-Masons nominated him for President in 1836, and in 1840 Webster went over to Harrison's candidacy for the presidency as a Whig Clay, bitterly disappointed at not getting the nomination himself, had to support Harrison too The campaign that followed was the first of the "rip-roaring" campaigns in U S history Harrison and his running mate, John TYLER, were transformed by publicity Harrison was made into a simple backwoods frontiersman, Tyler into his faithful lieutenant The "Log Cabin and Hard Cider" campaign was launched in answer to ill-judged jeers from the supporters of the Democratic candidate, Martin VAN BUREN Van Buren was pictured as an effete, "silver-spoon" man, Harrison as a rugged Westerner, despite his Virginia upbringing "Tippecanoe and Tyler too" won—partly because the Panic of 1837 had turned many against Van Buren Harrison then selected a brilliant Whig cabinet headed by Webster and with a program outlined by Clay, but the strain of the campaign was too much Harrison died a month later, Tyler became President, and the WHIG PARTY fell to pieces See biographies by D B Goebel (1926), Freeman Cleaves (1839), and J A. Green (1941)

Harrison. 1 City (pop 4,238), co seat of Boone co , NW Ark , in the Ozarks, platted c 1860, inc 1876 It is the commercial and industrial center of an area producing fruit, lumber, livestock and poultry Diamond Cave, with its interesting stalactites and stalagmites, is near by **2** Town (pop 1,026), SW Maine, at the northern end of Long Lake W of Auburn; inc 1805 **3** Town (pop 14,171), NE N J., industrial suburb of Newark, inc 1869 Ink, machine parts, metal products, and chemicals are made here **4** Unincorporated village (pop 6,307) in Harrison town (pop 11,783), SE N Y , in Westchester co , between Mamaroneck and Rye **5** Village (pop 1,656), SW Ohio, on the Ind line NW of Cincinnati, in a farm area, laid out 1813 It is contiguous to West Harrison, a town (pop 311) in Indiana There are varied industries

Harrisonburg, industrial city (pop 8,768), N Va , in the Shenandoah Valley NNE of Staunton, settled 1739. In a fertile farm area producing poultry, dairy products, livestock, and fruits, the city also has a shoe factory. The courthouse of Rockingham co. and Madison College, a state teachers college for women, are here. Harrisonburg is the headquarters of George Washington National Forest.

Harrisonville, city (pop. 2,322), co. seat of Cass co., W Mo., 8E of Kansas City, in a farm area; laid out 1837.

Harriston, town (pop. 1,305), S Ont., on the Maitland river and NW of Guelph, is a lumber and dairy-farming region.

Harrisville. 1 Village, R.I.: see BURRILLVILLE. **2** Residential town (pop. 1,338), co seat of Ritchie co , NW W Va., E of Parkersburg, in an oil and stock area, platted 1822.

Harrod, James, 1742–93, American frontiersman, b Bedford co., Pa. He fought in the French and Indian Wars and in 1773 made a journey down the Ohio river to Kentucky. In 1774 he returned to Kentucky with 31 men and began a settlement later named Harrodsburg in his honor—the first settlement in the state Later he opposed the colonization schemes of Richard HENDERSON and his Transylvania Company In 1777, 1779, and 1782 he took part in campaigns against the Indians and was a member of the Virginia assembly (1779). He disappeared mysteriously from home and never returned, having probably been murdered.

Harrodsburg, city (pop 4,673), co seat of Mercer co , central Ky , S of Frankfort It is a trade center in a bluegrass area producing livestock, grain, and tobacco It is also a tourist and resort city, with mineral springs Harrodsburg is the oldest settlement in the state, it was founded in 1774 by James HARROD One of the settlement's early leaders was George Rogers CLARK The city has a number of interesting early-19th-century buildings Pioneer Memorial State Park here contains a replica of old Fort Harrod (where the state's first school was conducted) and the cabin in which Nancy Hanks and Thomas Lincoln were married

Harrogate (hăr'ŏgĭt, -gāt), municipal borough (1931 pop 39,770, 1947 estimated pop 50,210), West Riding of Yorkshire, England High Harrogate is on a moor c 250 ft above Low Harrogate The borough is a health resort, having a good climate (dry and bracing on the uplands and mild in the lower portions) and more than 80 springs

Harrow, town (pop 1,166), S Ont , near Lake Erie and S of Windsor It is in a farming region

Harrow or Harrow-on-the-Hill, urban district (1931 pop 26,380, 1947 estimated pop 219,340), Middlesex, England, WNW of London It is the seat of Harrow, one of the great public schools of England The school was founded in 1571 and has among its illustrious graduates Byron, Galsworthy, Peel, and Palmerston St Mary's Church on the school grounds was founded by Lanfranc and rebuilt in the 14th cent In 1934 Harrow urban district began absorbing near-by areas, including Wealdstone

harrow, cultivating implement used for breaking up and pulverizing soil, for leveling it after plowing, for covering seeds, and for weeding There are several types—some have curved or slanting teeth, others have metal disks capable of breaking up the hard, dry soils on which they are most used The first "harrow" was probably a small tree or a branch dragged over soil to smooth it Ladderlike harrows of bamboo are used in India

Harrowing of Hell, the victorious descent of Jesus Christ into hell after his death, to release the souls held captive there and confound the rulers of hell This is not a Christian dogma, but an idea ancient in Christianity, some analogous idea is behind the phrase of the Apostles' Creed (see CREED), "He descended into hell" (omitted by the Nicene Creed) The Gospel of Nicodemus, one of the PSEUDEPIGRAPHA, gives an elaborate account of the Harrowing of Hell, and the story became very popular in the Middle Ages, thus it is told in the *Cursor Mundi* *The Harrowing of Hell* is the name of a 13th-century dialogue, sometimes called the first English religious drama See Early English Text Society, *The Middle English Harrowing of Hell and Gospel of Nicodemus* (1907)

Harrow-on-the-Hill, England see HARROW

Harsanyi, Zsolt (shôlt' hŏr'shänyĭ), Hung *Harsányi Zsolt*, 1887–1943, Hungarian novelist, especially noted for his fictionized biographies Among his translated works are the life of Franz Liszt (1936, Eng tr , *Hungarian Melody*, 1936, American title, *Immortal Franz*, 1937), of Galileo (1937, Eng tr , *The Star-Gazer*, 1939), and of Rubens (1940, Eng tr , *Lover of Life*, 1942).

Harsha (hûr'shù), d 647, Indian emperor He became (606) king of a state in the upper Ganges valley, and by 612 he had forged nearly all India N of the Narbada river into an empire His capital at Kanauj was an artistic and literary center, and Harsha is reputed to have been a distinguished poet and dramatist A Hindu early in life, he later became a devout Buddhist and forbade the killing of animals in his realm After Harsha's death, N India relapsed into anarchy

Harsha (hăr'shù), family returned from the Exile. Ezra 2 52, Neh. 7.54.

Hart, Albert Bushnell, 1854–1943, American historian, b Clarkesville, Greene co., Pa , grad Harvard, 1880, Ph.D Univ. of Freiburg, 1883 He began teaching history at Harvard in 1883, became a full professor in 1897, and from 1910 to his retirement in 1926 was professor of government Hart was a prodigious worker who was responsible for the publication of about 100 volumes, notably the "American Nation" series (28 vols , 1904–18), of which he was editor and for which he wrote Vol XVI, *Slavery and Abolition, 1831–1841* (1906), and Vol XXVI, *National Ideals Historically Traced* (1907). He also edited *Epochs of American History* (4 vols., 1891–1926), contributing *Formation of the Union, 1750–1829* (Vol II, 1892; new ed , 1925) to the series; *American History Told by Contemporaries* (5 vols , 1897–1929), *Source Readers in American History* (5 vols , 1901–27), *American Patriots and Statesmen from Washington to Lincoln* (5 vols , 1916); and *Commonwealth History of Massachusetts* (5 vols , 1927–30) He was joint editor, with Edward Channing, of *American History Leaflets* (1892–1910) and, with Andrew C McLaughlin, of the *Cyclopedia of American Government* (3 vols , 1914). With Channing again he also compiled the *Guide to the Study and Reading of American History* (1896, revised and augmented ed by Channing, Hart, and Frederick J Turner, 1912), still the most valuable single-volume bibliography of American history Hart also edited, with Herbert E Bolton, the *American History Atlas* (1918; 4th ed , revised, with Bolton and David M Matteson, 1940) and was editor of *The American Yearbook* (1911–20, 1923–32) Long an admirer and supporter of his Harvard classmate Theodore Roosevelt, he edited, with Herbert R Ferleger, the *Theodore Roosevelt Cyclopedia* (1941) Of the individual books he wrote, *Salmon Portland Chase* (1899), *The Foundations of American Foreign Policy* (1901), and *Actual Government as Applied under American Conditions* (1903, 4th ed , 1919) were probably most important Despite his teaching duties and the heavy working schedule that this impressive production must have entailed, "Bushy," as he was affectionately known to Harvard men, found time to participate in public affairs. He represented Harvard at the Massachusetts constitutional convention of 1917, being chairman of its committee on amendment and codification After his retirement he was a member and historian (1926–32) of the U S commission for celebrating the 200th anniversary of George Washington's birth

Hart, Basil Henry Liddell: see LIDDELL HART, BASIL HENRY

Hart, Charles Henry, 1847–1918, American writer and art expert, b Philadelphia An injury (1894) forced him to relinquish his law practice, and he turned to letters and art He became an authority on historical portraiture, exposing numerous spurious works, and was director of the Pennsylvania Academy of the Fine Arts (1882–1902) and chairman of the committee on retrospective American art at the Chicago exposition, 1893 Among his writings are *Edward Savage, Painter and Engraver* (1905), *Who Was the Mother of Franklin's Son?* (1911), and, with E Biddle, *Memoirs of the Life and Works of Jean Houdon* (1912)

Hart, George Overbury, 1868–1933, American water-color painter, etcher, and lithographer, b Cairo, Ill , known as "Pop" Hart As a boy he worked in his father's glue factory in Cairo Early in life he began his travels to strange corners of the world where he painted the life of everyday people for his own pleasure In 1907 he built himself a shack at Coytesville, N J , which was to be his only home In 1912 he began painting moving-picture sets in the summers but continued to travel each winter Late in life he received wide recognition, particularly for his genial and vigorous water colors He is represented in many museums and collections His *Watching and Weighing the Birds, Mexico* (Carnegie Inst , Pittsburgh) is characteristic

Hart, Hastings Hornell, 1851–1932, American penologist, b Brookfield, Ohio, grad Oberlin, 1875, and Andover Theological Seminary, 1880 He was a clerk (1875–77) in the U S Indian Service and was pastor (1880–83) of a Congregational church in Worthington, Minn While secretary (1883–98) of the Minnesota state board of correction and charities, he effected many institutional reform measures From 1898 to 1908 he was superintendent of the Illinois Children's Home and Aid Society and was secretary of the committee which framed for Illinois one of the first juvenile court laws in the United States Director of the child-helping department of the Russell Sage Foundation from 1908 to 1924, he became (1924) the foundation's consultant in delinquency and penology He made numerous investigations of state prison systems and wrote several penological studies

Hart, James MacDougal, 1828–1901, American landscape painter, b Scotland A vice president of the National Academy of Design, he did much to cultivate a public taste for natural scenery Several of his paintings are *Drove at the Ford* (Corcoran Gall), *Pasture Scene* (Metropolitan Mus), *In the Autumn Woods* (Sayles Memorial Hall, Brown Univ); and *Adirondacks* (Walters Art Gall , Baltimore). His brother **William Hart,** 1823–94, also a landscape painter, was first president of the Brooklyn Academy of Design He was an organizer and president of the American Water Color Society. His work is characterised by its meticulous detail. Two of his paintings are *Scene at Napanoch* and *Adirondack Lake, Morning* (Metropolitan Mus).

Hart, Joel Tanner, 1810–77, American sculptor, b Winchester, Ky He began as a stonecutter and attained great vogue as a maker of busts and statues. His bust of Henry Clay for Richmond, Va , was repeated for Louisville, Ky , and New Orleans. Andrew Jackson also posed for him Some of his busts are in the Corcoran Gallery He lived mostly in Florence after 1849 He worked for 30 years on a group, *Woman Triumphant*, but never completed it.

Hart, John, 1711?–1779, American Revolutionary patriot, signer of the Declaration of Independence, b Stonington, Conn Moving to Hopewell, N J , as a youth, he became prosperous as a farmer and a miller. He was a member of the provincial assembly (1761–71), of several provincial congresses, and of the Continental Congress

Hart, William. see HART, JAMES MACDOUGAL

Hart, William S., 1870–1946, American stage and moving-picture actor, b Newburgh, N Y From 1895 to 1914 he appeared on Broadway and in road companies, starring in *Ben Hur*, *The Squaw Man*, *The Virginian*, and *The Barrier* and in Shakesperian dramas After 1914 he performed in moving pictures Some of the silent films that made him famous include *The Last Card*, *Wild Bill Hickok*, *The Toll Gate*, *Square Deal Sanderson*, *Two-Gun Hicks*, *Hell's Hinges*, and *Tumbleweeds* He was the prototype of "the strong, silent man of the West "

Hart, village (pop 1,922), co seat of Oceana co , S Mich , on the Pentwater river and N of Muskegon, in a fruit area, inc 1885

Harte, Bret (Francis Bret Harte) (hart), 1836–1902, American writer of short stories, novels, and humorous verse, b Albany, N Y After youthful experiences as gold seeker, schoolteacher, and itinerant journalist in California, he began his sketches in prose and verse of mining-camp life in the California of his day In 1863 he was appointed secretary of the U S branch mint in San Francisco In 1868 he helped to establish, and then edited, the *Overland Monthly*, in which for several years his famous stories of Western local color appeared, including "The Luck of Roaring Camp," "The Outcasts of Poker Flat," and the humorous poem "Plain Language from Truthful James " In 1871 he settled in New York, he was U S consul in Germany and Scotland from 1878 to 1885 The remainder of his life was spent near London, where he continued to write prolifically but with less success than in earlier years Among his many books are *The Luck of Roaring Camp and Other Tales* (1870) and *Tales of the Argonauts* (1875) See his letters (ed by G. B Harte, 1926) and *Representative Selections* (ed by J B Harrison, 1941), biography by G R Stewart (1931)

hartebeest, (här'tĭbēst*), name for several species of large antelopes of Africa The name is usually restricted to members of the genus *Alcelaphus* (or *Bubalis*), although sometimes antelopes of other genera, e g , the bontebok and the blesbok, are also called hartebeests The Bubal hartebeest (*Alcelaphus buselaphus*, formerly abundant in North Africa) is believed by some authorities to be extinct, although others maintain that there are survivors in Algeria Its coat is reddish or fawn, the horns ringed and pointed and somewhat curved to form a U shape, its shoulder height is about 3½ ft The somewhat larger red hartebeest (*Alcelaphus caama*) is native to the southern parts of Africa Although much reduced in numbers, several subspecies survive

Hartford. **1** Town (pop 1,494), SE Ala , SW of Dothan near the Fla line, founded 1894 **2** City (pop 1,189), W Ark , near Oklahoma and S of Fort Smith, founded 1899 **3** City (pop 166,267), state capital, and co seat of Hartford co , central Conn , on the west bank of the Connecticut river It was settled as Newtown, 1635–36, under Thomas Hooker and Samuel Stone on the site of a Dutch trading post (1633) and was incorporated in 1784 One of the earliest and strongest colonies and until 1875 joint capital with New Haven, it developed as a commercial, industrial, and cultural center The insurance business for which Hartford is internationally famous was begun in 1794 Other industries produce firearms, typewriters, airplane parts, tools, and brushes The city is a port of entry. The Hartford *Courant*, founded in 1764, is one of America's oldest newspapers The city was the home of the Hartford Wits or Connecticut Wits Henry Barnard, Harriet Beecher Stowe, Lydia Huntley Sigourney, Charles Dudley Warner, Mark Twain (his home, built in 1873, became a library), and Horace Bushnell lived here Hartford is the birthplace of Noah Webster, John Fiske, and the elder J P. Morgan Points of interest include Bushnell Park, Horace Bushnell Memorial (1930), the old statehouse (1796, designed by Bulfinch), and the capitol (1872, by Richard M. Upjohn) The site of the CHARTER OAK is marked The state library and supreme court building (1910) has Stuart's full-length *Washington* and other treasures. Trinity College (for men, 1823), Hartford Seminary Foundation, and a state trade school are here Libraries, museums, parks (notably a rose garden), an art school, and state institutions for the handicapped are here There is a municipal airport A city manager–council government was adopted in 1947. **4** Village (pop. 1,842), SW Ill., on the Mississippi above St Louis, inc 1920 **5** City (pop. 1,385), co. seat of Ohio co , W Ky , on the Rough River and SSE of Owensboro, in a coal, oil, limestone and farm area, founded c 1790 **6** Village (pop 1,694), SW Mich , between Benton Harbor and Kalamazoo, inc 1877. Market center of a fruit area, it has a factory making wreaths treated for permanence Indian mounds are near by **7** Town (pop 4,978), E Vt , on the Connecticut and White rivers, E of Rutland, settled 1765 It includes the industrial and commercial center WHITE RIVER JUNCTION and the residential village Hartford It is the birthplace of Horace Wells **8** Industrial city (pop. 3,910), E Wis , on the Rubicon and NW of Milwaukee, settled 1844, inc 1883

Hartford City, city (pop 6,946), co seat of Blackford co , E Ind , N of Muncie, settled 1832, laid out 1839 Natural gas and oil fields are near, and the surrounding country is a rich agricultural district The town has a jute-board factory

Hartford Convention, Dec 15, 1814–Jan 4, 1815, meeting of 26 delegates to consider the problems of New England in the WAR OF 1812, held at Hartford, Conn The conservatives in New England had opposed the Embargo Act of 1807 and other government measures before the war, and the more extreme of them continued opposition to the government after fighting had begun Though manufacturing (fostered by isolation) and contraband trade brought wealth to the section, "Mr Madison's War" and war expenses became steadily more repugnant to the more reactionary New Englanders The Federalists, notably those who had been leaders in the ESSEX JUNTO, encouraged disaffection The New England states were reluctant to surrender their militia to national service (see GRISWOLD, ROGER)—especially when New England was threatened with invasion in 1814 The Federal loan of 1814 got almost no support in New England, despite prosperity there Talk of a separate peace between New England and Great Britain was common in New England taverns, especially after the Embargo Act of 1813 At that time Timothy PICKERING suggested a meeting of representatives of the dissident states, but the idea did not take hold immediately Not until Oct , 1814, did Massachusetts send out invitations to the other New England states for a conference Only the true conservatives viewed the plan with warmth In all the states there was a strong majority loyal to the Union New Hampshire and Vermont sent no official delegates, though unofficial delegates, popularly chosen by the Federalists, did come The convention was thoroughly Federalist The meetings were secret and not too much is actually known of them, although a report was issued by the convention, the journals were published years later, and Theodore DWIGHT (1764–1846) wrote a history of the meetings Harrison Gray OTIS (1765–1848) was a leader, George CABOT presided, and Dwight was secretary The proposal to secede from the Union was discussed, the grievances of New England were reviewed, and such matters as the use of the militia were threshed out The extremists did not prevail, and the report rather lamely recommended that secession, if it came at all, should be gradual and should be executed in peaceful times The news of Andrew Jackson's victory at New Orleans and of the Treaty of Ghent made any recommendation of the convention a dead letter Though some later historians have adduced many circumstances to excuse the convention, the fact remains that it was the creation of a dissident group in the midst of a national war. Its importance is twofold it continued the view of states' rights that was the refuge of minority groups, a view to be expressed later in another section by nullification and secession, it all but destroyed the Federalist party politically, since the Federalists were unable to regain lost prestige See Henry Adams, *History of the United States during the Administrations of Jefferson and Madison* (9 vols , 1889–91), S E Morison, *Life and Letters of Harrison Gray Otis* (1913)

Hartford Wits see CONNECTICUT WITS

Harthacanute (har'thăkunūt), **Hardicanute,** or **Hardecanute** (both har'dĭkunūt), d 1042, king of Denmark (1035–42) and of England (1040–42), son of CANUTE On his father's death (1035) he succeeded to the throne of Denmark, where he was already underking In England his illegitimate half brother, HAROLD HAREFOOT, first acted as regent, then as king (1037–40), while Harthacanute in Denmark was reaching a settlement with Magnus I of Norway Harold's death in 1040 allowed Harthacanute to take over the English throne peaceably, although he arrived in England with 62 warships His reign was quarrelsome and oppressive, but by indicating as his heir Edward (later EDWARD THE CONFESSOR) he averted a possible dynastic struggle when his own death ended the male line of the royal Danish house in England

Hartington, Spencer Compton Cavendish, marquess of: see DEVONSHIRE, SPENCER COMPTON CAVENDISH, 8TH DUKE OF.

Hartington, city (pop 1,688), co seat of Cedar co., NE Nebr., near the Missouri WNW of Sioux City, Iowa; inc 1883.

Hartland. **1** Town (pop 1,240), central Maine, on the Sebasticook and NE of Skowhegan; settled c 1800, inc. 1820 Farm produce is canned. **2** Town (pop. 1,306), E Vt , along the Connecticut S of Hartford, settled 1763 from Connecticut It is known for its annual horse show

Hartlepool (härt'lē–, härt'ōl–), municipal borough (1931 pop 20,537, 1943 estimated pop 17,870), Durham, England, N of the Tees estuary A convent was founded here in 640 It is a seaport, whose early establishment is testified by fragments of an old town wall and gate There are more than 350 acres of docks, and trade in coal and timber, especially, is very great Other industries are shipbuilding and iron, steel, and cement manufacturing Hartlepool was bombed by Germans in the First World War Its suburbs are Throston, Seranton, and Seaton Carew

Hartley, David, 1705–57, English physician and philosopher, founder of associational psychology In his *Observations on Man* (2 vols , 1749), he explained all mental phenomena as due to sensations arising from vibrations of the white medullary substance of the brain and spinal cord He did not identify the soul with the brain, but he conceived the whole mind as resulting from the association of simple sensations, very much as Condillac had already done See ASSOCIATIONISM

Hartley, Jonathan Scott, 1845–1912, American sculptor, b Albany, N Y He is noted for his portrait busts, among them John Gilbert as Sir Peter Teazle, John Drew as Sir Lucius O'Trigger, and George Inness Some of his public works are the Daguerre monument, Washington, D C , and statues of Ericsson and Alfred the Great, Appellate Courthouse, New York

Hartley, Marsden, 1878–1943, American landscape and still-life painter, b Lewiston, Maine He was educated in Cleveland but early went to New York, where he studied under William Chase and at the National Academy of Design In 1909 his landscapes were shown at the Stieglitz gallery During the next 12 years he made three trips to Europe and one to the Southwest, his work showed the influence successively of the French and German moderns He exhibited in Munich with Klee and Kandinsky His reputation was established about 1921, and in 1930 he was awarded a Guggenheim fellowship His later work was largely representational although at one time he was an abstract painter His *Kinsman Falls* (Whitney Mus , New York) is characteristic

Hartley, town (pop 1,503), NW Iowa, NE of Sioux City, inc 1888 It is a farm trade and dairying center

Hartmann, Eduard von (ā'dōōart fŭn hart'man), 1842–1906, German philosopher His *Philosophy of the Unconscious* appeared in 1869 (Eng tr , 3 vols , 1884, new ed , 1931) By the unconscious, Hartmann meant the inexplicable forces of nature which activate the universe, whether in atoms, organisms, or the world process Hartmann stressed misery rather than happiness, seeing the world process as a constant struggle between blind impulse and reason The only possibility of ultimate happiness was in non-willing

Hartmann von Aue (hart'man fŭn ou'u), c 1170–c 1220, German poet He wrote the chivalric romances *Erec* and *Iwain*, the religious legend *Gregorius*, the idyl *Der arme Heinrich* [wretched Henry], upon which Longfellow based his *Golden Legend*, and a few excellent lyrics For a translation of *Der arme Heinrich*, see C H Bell, *Peasant Life in Old German Epics* (1931)

Hartselle (hart'sĕl), city (pop 2,584), N central Ala , just S of Decatur, in an area producing cotton, corn, vegetables, and minerals, founded 1870, inc 1875

hartshorn, spirits of see AMMONIA

Hartshorne (härts'hôrn), city (pop. 2,596), SE Okla , in an agricultural and coal-mining area, settled c 1890

Hartsville. **1** Town (pop 5,399), NE S C , ENE of Columbia It is a trade and processing center in a cotton area Coker College (for women, 1908) is here An experimental seed farm is near by **2** City (pop 1,095), co seat of Trousdale co , N Tenn , near the Cumberland river ENE of Nashville, settled in the early 1800s, inc 1913 In the Civil War, Gen John H Morgan defeated (Dec , 1862) Federals garrisoned here

Hartwell, city (pop 2,372), co seat of Hart co., NE Ga , near the S C line NE of Athens; inc. 1856 It is a trade and shipping center for a cotton and corn area The city was named for Nancy Hart, Revolutionary heroine

Harum (hā'–), descendant of Judah 1 Chron 4 8

Harumaph (hărū'–, hă'rū–), father of **JEDAIAH 2.**

Harun-al-Rashid (hărōōn-ăl-răshēd', hă'rōōn-ălră'shĭd) [Arabic,=Aaron the Upright], c 764–809, 5th and most famous ABBASID caliph (786–809) He succeeded his brother Musa al-Hadi, fourth caliph, a year after the death of his father, MAHDI, the third caliph. In his youth he had been very successful as a general in invasions of Asia Minor,

on one of these he reached the Bosphorus. Harun's empire included all SW Asia and the northern part of Africa, but by the end of his caliphate much of Africa had withdrawn from all but nominal obedience. He had diplomatic relations with China and is reputed to have been in communication with Charlemagne. The most famous incident of his career was the fall of the Barmecides, a Persian family which had become very powerful under Mahdi Yahya the Barmecide had aided Harun to the caliphate, and he and his sons were in high favor until 798, when the caliph threw them in prison and confiscated their land, the reasons for this are not known, but it was probably a result of an extended intrigue by the Arabian group at court Harun was repeatedly faced with insurrections in his empire These grew more frequent after the fall of the Barmecides, who were adroit statesmen After this Harun's prime minister was Fazl ibn-Rabi Harun was a munificent patron of letters and of arts, and under him Baghdad was at its apogee He became a great figure for the Arabs, who tell many of the stories of the *Thousand and One Nights* about him

Harunobu, Suzuki (sōōzōō'kē hä'rōō'nō'bōō), c 1725–1770, Japanese painter, illustrator, and color-print artist In 1765 he introduced multiple color printing with wood blocks, then he devoted himself to designing *kakemono*, revolutionizing such work by changing the size of prints and using color for every detail except the human face From popular portrayals of actors and courtesans, he progressed to interpretations of domestic life and graceful figures of young girls He achieved rich color effects

Haruphite (hărū'fīt, hăr'ūfīt), obscure designation of Shephatiah 1 Chron 12 5

Haruz (hā'-) [Heb ,=active], father of Meshullemeth 2 Kings 21 19

Harvard, John (här'vurd), 1607 38, chief founder of Harvard College, b Southwark, England, M A Emmanuel College, Cambridge, 1635 He migrated in 1637 to Charlestown, Mass , where he was assistant to the pastor and teaching elder of the First Church He bequeathed £780 (half his estate) and his library of 320 volumes toward the foundation of a new college at Cambridge, Mass , which was named in his honor

Harvard 1 City (pop 3,121), N Ill , near the Wisline NE of Rockford, inc 1867 It is a railroad junction (with shops) in a dairy area 2 Town (pop 1,790), E central Mass , NW of Boston, settled 1704, inc 1732 In the town are a Shaker house, an Indian museum, a Harvard Univ observatory, and "Fruitlands," once scene of a community founded by Bronson Alcott

Harvard, Mount, peak, 14,399 ft high, W central Colo , in the Sawatch Mts of the Rockies

Harvard University, mainly at Cambridge, Mass , nonsectarian, mainly for men, founded 1636 by a grant of the Massachusetts Bay colony, opened 1638, chartered 1650 In 1638 the endowment was increased by a bequest from John Harvard, for whom the college was named in 1639 The first board of overseers was appointed in 1637, in 1650 the college was made a corporation, consisting of the president, five fellows, and the treasurer From that time the control was vested jointly in the board of overseers and the corporation (the fellows) In its early years the college was closely allied, first with the Congregational Church, then with the Unitarian, but in 1851 representation of the clergy on the board of overseers ceased to be obligatory Harvard's presidents have included Henry Dunster (1640 54), Increase Mather, Josiah Quincy the younger, Edward Everett, Charles W Eliot (in whose long administration, 1869–1909 Harvard was transformed from a New England college to a great university), A Lawrence Lowell, and James B Conant Eliot introduced the elective system, in Lowell's administration innovations included the tutorial system, general examinations, and a reorganization of the residence halls Besides Harvard College, the university includes graduate schools of divinity (1810), law (1817), arts and sciences (1872, with journalism), education (1920), engineering (1935, reorganization of Lawrence Scientific School of 1847), public administration (1935), and design (1936, reorganization of architecture, landscape architecture, and regional planning faculties) and, in Boston, schools of business administration (1908), medicine (1782), public health (1922), and dental medicine (1941) Radcliffe College for women is affiliated One of the largest libraries in America is housed in the Widener Memorial Library and other buildings There are astronomical observatories at Cambridge (1843), Harvard, Mass , Climax, Colo , near Leadville, and Bloemfontein, South Africa Rotch meteorological observatory is at Blue Hill, Mass , near Milton The University Museum contains the Peabody Museum of Archaeology and Ethnology (1866) and the Museum of Comparative Zoology (1859) The Fogg Museum of Art (1894) is used as a laboratory and training center Botanical collections are found in the Botanic Garden (1807), the Gray and Farlow herbariums, the Bussey Institution (formerly an agricultural school, now a research station), the Harvard Forest (Petersham, Mass), and the Arnold Arboretum (1872, with Atkins Institution in Cuba) The Harvard-Yenching Institute (for aid in China) was founded in 1928 Later buildings have been planned to harmonize with the old ones in the Harvard Yard In sports, rivalry is traditional with Yale University, the second New England college Harvard Univ Press, established in 1913, publishes a number of scholarly series (including the Loeb Classical Library) and the *Harvard Law Review* See histories by S A Eliot (1848), A S Pier (1913), J H. Gardiner (1914), and S E Morison (1936)

harvest, the gathered crop of one planting or of all plantings It may consist of the grain from one field or of all the products of the fields and orchards The climax of the year's labors wherever the soil is cultivated, the gathering of the harvest has been celebrated from time immemorial, by both primitive and civilized peoples, with merrymaking or with the performance of symbolic rites The corn mother, symbolizing the spirit of the grain—barley, wheat, or rye—was a common figure of harvest time Usually made of the last or the best sheaf cut, it was carried in triumph from the field, drenched with water to invoke rain for the next season, and burned or otherwise ceremonially treated Other European harvest customs, such as the baking of a loaf in the figure of a child out of the best or first sheaf cut, suggest ancient sacrifical rites of harvest time The ripening of the corn was celebrated by the American Indians, that of rice by primitive East Indian tribes The druids had harvest festivals, and the name of the Roman harvest rites—the Cerealia—is related to our word *cereal* Although modern machinery has taken the place of hand harvesting, we still celebrate the harvest season on Thanksgiving Day

harvestman see Daddy Longlegs

harvest moon, the full moon occurring nearest to the autumnal equinox (Sept 23) when the sun in its annual course crosses the celestial equator from north to south At that time because of the position of the moon's path with relation to the horizon, the retardation, or later rising every night, of the moon is at its minimum For this reason, on several nights in succession the moon rise is at nearly the same hour and there is full moonlight almost from sunset to sunrise when the sky is unclouded

Harvey, Eli, 1860–, American sculptor, b Ogden, Ohio, studied at the Academy of Fine Arts, Cincinnati His special field is animal sculpture, such as decorations for the Lion House, New York Zoological Gardens, and the recumbent lions for the Eton Mausoleum, Toronto

Harvey, Gabriel, 1545?–1630, English poet and miscellaneous writer He studied at Cambridge and became a fellow of Pembroke Hall There he exercised a strong influence over his friend Edmund Spenser, who later celebrated Harvey as Hobbinol in *The Shepheard's Calendar* In 1578 Harvey became a fellow of Trinity Hall and began the study of law, but the publication of some satirical verses in 1579 involved him in considerable trouble, and in 1585 his appointment as master of Trinity Hall was recalled Contemptuous references to Robert Greene and Thomas Nashe by Harvey's brother Richard led to a literary quarrel and elicited Gabriel Harvey's famous *Foure Letters* (1592), a scurrilous post-mortem attack on Greene Thomas Nashe took up the cudgels, and the war was terminated in 1599 by the intervention of the government only after bitter assaults on both sides, including pamphlets by Harvey, *Pierce's Supererogation* and *A New Letter of Noble Contents* in 1593 and possibly *The Trimming of Thomas Nashe* in 1597 Henceforward Harvey lived in retirement at his home in Saffron Walden See introduction by A B Grosart to his edition (1884–85) of Harvey's works, E G Harman, *Gabriel Harvey and Thomas Nashe* (1923)

Harvey, George Brinton McClellan, 1864–1928, American journalist and diplomat, b Caledonia co , Vt In association with William C Whitney, he acquired a fortune and bought (1899) the *North American Review*, and, with the backing of J P Morgan, he assumed control (1901) of *Harper's Weekly* Harvey retired (1913) from the editorship of *Harper's Weekly*, but later (1918) founded *Harvey's Weekly* as a medium for virulent attacks on Woodrow Wilson, the administration, and the peace negotiations Harvey supported (1920) the candidacy of Warren G Harding and aided in the preparation of the Harding campaign speeches After Harding's election, Harvey was appointed ambassador to Great Britain See biography by W F Johnson (1929)

Harvey, William, 1578–1657, English physiologist, studied at Cambridge and under Hieronymus Fabricius in Padua (1598–1602) He practiced in London, where he was a member of the College of Physicians and was court physician and where he lectured on the circulation of the blood as early as 1616 Amplifying and correcting the observations of his predecessors—Galen, Vesalius, Servetus, Realdus Columbus, and Caesalpinus—he demonstrated the function of the heart as a muscular pump and the complete circulation of the blood except for the capillary system, which, lacking the microscope, he did not discover His famous *Exercitatio anatomica de motu cordis et sanguinis* (1628) was published in Frankfurt The *Exercitationes de generatione animalium* (1651) comprises his researches in embryology (see the *Analyses* by A W Meyer, 1936) See studies by Sir D'Arcy Power (1897) and A E Malloch (1929)

Harvey, William Henry, 1811–66, Irish botanist An authority on algae, he wrote *A Manual of the British Algae* (1841), *Phycologia Britannica* (4 vols , 1846–51), and *Phycologia Australica* (5 vols , 1858–63), which are classics in their field He spent several years in South Africa, and as a result of his studies there, he wrote, with O W. Sonder, *Flora Capensis* (7 vols , 1859–1925)

Harvey, William Hope, 1851–1936, American writer on economics, called Coin Harvey, b Buffalo, Putnam co , W Va He studied at Marshall College, practiced law and interested himself in monetary problems He was a vigorous advocate of bimetallism at the time the argument over coinage of silver was at its height His sturdy pamphleteering had great influence on the Populist party, and his demand for free coinage of silver was given full expression when William Jennings Bryan ran for President in 1896 Bryan's famous "cross of gold" speech in 1896 embodied Harvey's ideas Harvey himself ran for President in 1932 after he organized the Liberty party He wrote *Coin's Financial School* (1894), *Coin on Money, Trusts, and Imperialism* (1899), and *The Remedy* (1915)

Harvey 1 City (pop 17,878), NE Ill , just S of Chicago, inc 1895 It manufactures stoves, automobile parts, and other metal products Thornton Junior College (coeducational) is here 2 City (pop 1,851), central N Dak , on the Sheyenne river and between Minot and Jamestown, inc 1906 It is a railway division point

Harwich (hăr'ĭj), municipal borough (pop 12,046), Essex England, at the estuary of the Stour and the Orwell The port is fortified and is the chief naval station (especially for submarines and destroyers) on the east coast It was frequently attacked from the air in 1940–41 There are passenger and trade lines to Antwerp and other continental ports

Harwich (har'wĭch), town (pop 2,535), SE Mass , on Cape Cod W of Chatham, settled c 1670, inc 1694 It includes several resort villages

Harwinton, town (pop 1,112), NW Conn , on the Naugatuck in a hilly region W of Hartford, settled 1730, inc 1737

Harz (härts), densely forested mountain range, central Germany, extending c 60 mi between the Elbe and Weser rivers and occupying parts of Hanover and Saxony provs , Brunswick, and Anhalt The Upper Harz, in the northwest, is rich in silver, iron, lead, and copper, it culminates in the Brocken, the legendary scene of the Walpurgis Nacht There are many popular vacation and health resorts, notably Bad Harzburg, Braunlage, and Schierke At the foot of the Harz are the ancient cities of Eisleben, Quedlinburg, Halberstadt, Blankenburg, Wernigerode, Goslar, and Nordhausen

Hasa, El (ĕl hä'sə, hă'sə), region, NE Saudi Arabia, on the Persian Gulf. Hofuf is the chief town El Hasa was tributary to Turkey (though taken by the Egyptians under Ibrahim Pasha) until its conquest by Ibn Saud in 1914 There is extensive oil drilling, especially near the Bahrein Islands

Hasadiah ((hăsədī'ə) [Heb ,=God loves], one of Zerubbabel's sons 1 Chron 3 20

Hasan (hə'sän), c 625–c 669, 5th caliph, son of Ali and Fatima (daughter of Mohammed the Prophet) When Ali was killed in 661 Hasan became caliph, but he was not strong enough to withstand the threat of arms of the Omayyads and under pressure abdicated in favor of Muawiya He retired to Medina His more active brother, Hussein, took up the family cause Later the Shiites believed that Hasan had been murdered The name also appears incorrectly as Hassan

Hasbeya (hasbā'ə), small town, S Lebanon, at the foot of Mt Hermon It was a center of the Druses from the 13th cent to the 19th cent , and the Khulwat el-Bujad, a sacred shrine of the Druses is on the hillside Much of the population is Christian, with some Jews

Hasbrouck Heights (hăz'brōōk), residential borough (pop 6,716), NE N J , S of Hackensack, settled c 1685, inc 1894 The Teterboro airport is near

Hasdrubal (hăz'drōōbl), d 221 B C , Carthaginian general He fought under his father-in-law, Hamilcar Barca, in Africa and in Spain, where he succeeded (228 B C) Hamilcar as general He increased the empire in Spain and, by treaty with Rome, fixed its northern boundary at the Ebro Hasdrubal founded Cartagena

Hasdrubal, d 207 B C , Carthaginian general, son of Hamilcar Barca His brother Hannibal, on leaving for Italy, deputed Spain to Hasdrubal's command Hasdrubal conducted a long campaign against the Scipios, who prevented him from joining Hannibal at a critical moment in 216 B C Both Scipios fell in battle, but in 209 the son of P Cornelius Scipio took Cartagena Hasdrubal eluded him by crossing the Pyrenees at their western ex-

tremity and, after crossing the Alps, arrived in central Italy. On the Metaurus (207 B C) he met the army of C Claudius Nero Hasdrubal fell, and his head was thrown into Hannibal's camp Hasdrubal's defeat is considered decisive in the Second Punic War, for it prevented Hannibal from receiving the only aid, even indirect, which was proffered him from Carthage

Hasenuah (hăsĭnū'ă) [Heb ,= the hated woman], Benjamite 1 Chron 9 7

Hashabiah (–ăbĭ'ă) [Heb ,= God has noticed] 1 Chief priest Ezra 8 24 2 Priest Neh 12 21 3, 4, 5 Chief Levites 1 Chron 27 17, 2 Chron 35 9, Neh. 12 24 6 Kohathite 1 Chron 26 30 7 Harpist. 1 Chron 25 3,19 8, 9, 10 Merarites 1 Chron 6 45, 9 14, Ezra 8 19 11 Sealer of the covenant Neh. 10 11 12, 13 Levites in the Temple Neh. 11.15,22 14 Worker on the wall Neh 3 17

Hashabniah (hă"shăbnī'ă) [Heb ,=whom God has regarded] 1 Father of a repairer of the wall Neh. 3.10 2 Signer of the covenant Neh 9 5

Hashbadana (–bă'–), companion of Ezra Neh 8 4

Hashem (hă'–), the same as JASHEN

hashish (hă'shĭsh, hă'shēsh), name used chiefly in Asiatic countries for a narcotic and inebriant substance prepared from the hemp plant (*Cannabis sativa*) Several parts of the plant are used in making different preparations which are known by a variety of names, e g , bhang, charas, ganja, and kif The name hashish is sometimes limited to an extract prepared from the leaves, and sometimes it is used to refer to a product of the flowering tops of the plants The different products are chewed, smoked, or taken in liquid form, and their effects on the user are caused by certain resinous substances In parts of South America, Mexico, and the United States the flowers of the same species of hemp are used to make MARIJUANA

Hashmonah (–mō'nă), unidentified desert place of encampment Num 33 29, 30

Hashub (hă'–) [Heb ,=intelligent] 1,2 Repairers of the wall Neh 3 11,23 3 Signer of the covenant Neh 10 23 4 Merarite Neh 11 15 Hasshub 1 Chron 9 14

Hashubah (hushōō'bă) [Heb ,=esteem], one of Zerubbabel's sons 1 Chron 3 20

Hashum (hă'–) 1 Family returned with Zerubbabel, several of whom had foreign wives Ezra 2 19, 10 33, Neh 7 22, 10 18 2 Companion of EZRA at his reading of the law Neh 8 4

Hashupha (hushū'fu), the same as HASUPHA

Hasidim (hăsē'dĭm) or **Assideans** (ăsĭdē'ănz) [Heb , =pious], originally the most rigid adherents of Judaism in contradistinction to those Jews whom Hellenistic influences were beginning to affect The sect developed between 300 B C and 175 B C When Simon the Just was high priest of Judaea, the Jews became divided into those who adopted new and pagan customs and those who clung to the strict old traditions to the point of fanaticism When Antiochus IV decreed that the Jews should eat the flesh of swine and offer sacrifices to the Greek gods, it was the Hasidim who led the resistance and rallied the Jews to choose death in preference to violation of their laws The modern sect of Hasidim was founded in Europe in the 18th cent by BAAL-SCHEM-TOV It developed out of opposition to the inflexible rationalism of the Talmud and is characterized by a belief in miracles and in the immediate approach of the Messiah, emotional exaltation in prayer, and communion with God through ecstasy These doctrines exercised a great appeal for the uneducated masses and spread with great rapidity The sect aroused much opposition among the Talmudists, who in 1781 pronounced the Hasidim heretics. The sect still has adherents, but it has lost its original enthusiasm. The leaders of the modern Hasidim are called Zaddikim. They are supposed to have achieved so perfect a state of holiness that they can serve as mediators between God and the common people Since the office is hereditary and the Zaddikim are supported by contributions from the people, the system has degenerated into one of exploitation The name is also transliterated as Chassidim For the modern Hasidim, see D. L Mekler, *Miracle Men* (1936).

Haskell (hă'skŭl) 1 Farm trading town (pop 1,572), NE central Okla , near the Arkansas river SE of Tulsa, founded 1903. Historic Indian sites are in the vicinity 2 City (pop. 3,051), co seat of Haskell co , W central Texas, N of Abilene, settled 1882, inc 1907 Long a cow town in mesquite-brush country, it now serves farmers and dairymen as well as some ranches.

Haskins, Charles Homer, 1870–1937, American historian, b Meadville, Pa , grad. Johns Hopkins (B A , 1887, Ph D., 1890) After serving as instructor of history at Johns Hopkins, Haskins taught (1890–1902) at the Univ. of Wisconsin At Harvard (1902–31) he was a professor of history, political science, and medieval history, becoming professor emeritus in 1931 From 1918 to 1919 he served as chief of the division of Western Europe on the American commission at the Paris Peace Conference. A member of many learned groups, he was chairman (1920–26) of the American Council of Learned Societies and president (1926–27) of the Medieval Academy of America. His reputation as an outstanding scholar, particularly in medieval history, was earned through such books as *The Normans in European History* (1915), *Norman Institutions* (1918), *The Rise of Universities* (1923), *Studies in the History of Mediaeval Science* (1924), *The Renaissance of the Twelfth Century* (1927), and *Studies in Mediaeval Culture* (1929)

Haslemere (hā'zŭlmēr), urban district (1931 pop 4,339, 1943 estimated pop. 10,100), Surrey, England, SW of Guilford It is a market town and is noted as a center of arts and crafts and for its music festivals George Eliot lived at Shottermill near by. The church contains a window by Burne-Jones in memory of Tennyson, who lived near here, and the grave of John Tyndall

Hasmoneans: see MACCABEES

Hasrah (hăs'ru), the same as HARHAS.

Hassam, Childe (chĭld' hă'sum), 1859–1935, American painter and etcher, b Boston, pupil of Jules Lefebvre and G R Boulanger in Paris. His fine landscapes and interiors show the strong influence of impressionism Examples of his work are *Isles of Shoals, Church at Gloucester,* and *July 14th Rue Daunou* (Metropolitan Mus), *The New York Window, Broad and Wall Streets; The Little June Idyll, Aphrodite, The Strawberry Tea-Set,* and *Evening Bells* He is represented in the Pennsylvania Academy of the Fine Arts, Art Institute of Chicago, Museum of Fine Arts, Boston, Corcoran Gallery, and museums in Cincinnati, St Louis, Worcester, Mass , Portland, Oregon, and Savannah, Ga He became a member of the National Academy of Design in 1906

Hassan · see HASAN

Hasse, Johann Adolph (yō'hän a'dôlf ha'su), 1699–1783, German composer, pupil of Alessandro Scarlatti His musical style was thoroughly Italianized He composed Masses, oratorios, sonatas, and symphonies, but was known chiefly as an opera composer He was court composer (1721–60) at Dresden, his operas were also performed in London (where he was a rival of Handel), in Venice, and in Vienna He wrote melodiously and with understanding of the voice and of dramatic construction His wife, Faustina Bordoni Hasse (1693–1783), because of her technical excellence, was regarded as one of the greatest singers of her time

Hasselt (ha'sŭlt), city (pop. 28,638), capital of Limburg prov , E Belgium, in the Campine, near the Albert Canal. Here the Dutch defeated (1831) the Belgians Hasselt is noted for its processions on the Feast of the Assumption (Aug 15)

Hassenaah (hăsē'nă'ă), family name of workers on the wall Neh 3 3 Senaah Ezra 2 35, Neh 7 38

Hasshub (hă'shŭb), variant of HASHUB

Hassler, Ferdinand Rudolph (hă'slŭr), 1770–1843, American geodesist, b Switzerland, studied at the Univ of Bern He is known for his work in organizing the U S Coast and Geodetic Survey Coming to America in 1805, he won Jefferson's aid in his plan for a survey of the Atlantic seacoast, and from 1816 to 1818 he was in charge of the work Then he was excluded by a law which required that only military and naval men be employed in the work In 1832 he was again appointed to head the coast survey, which had lapsed since his previous work His original survey work has not had to be repeated, and his standards in the first scientific bureau helped to establish those for later government scientific work See biography by Florian Cajori (1929)

Hasting (hă'stĭng), fl last half of 9th cent , Viking leader, called Hasting the Pirate He ravaged the coasts of France, Spain, and Italy, went into Morocco, plundered in the south of France, and took a fleet to England late in Alfred's reign

Hastings, Francis Rawdon-Hastings, 1st **marquess** of (hă'stĭngz), 1754–1826, British soldier and administrator In the American Revolution he distinguished himself at Bunker Hill, at Charleston, and in the Carolina campaign (1781) On his return to England, he was active in the House of Lords and was a partisan of the prince of Wales (later George IV) He became 2d earl of Moira in 1793 As governor general of India (1813–21) he waged war on the Gurkhas (1816), the marauding Pindaris, and the Mahratta confederacy (1817), meanwhile maintaining a vigorous and progressive government. He was governor of Malta when he died. See his private journal (ed by his daughter, the marchioness of Bute, 1858).

Hastings, Serranus Clinton, 1814–93, American judge, b Jefferson co , N Y. He was admitted to the Indiana bar in 1836 and moved to Iowa soon afterward He served in the first Iowa territorial legislature and in 1846 became the first representative of Iowa in Congress. In 1849 he moved to California and was chief justice of the state supreme court while the fusion of common law and Spanish custom was being effected. He established and endowed Hastings College of Law in San Francisco, now part of the Univ. of California.

Hastings, Thomas, 1784–1872, American composer b. Washington, Conn. Of his hymns, *Rock of Ages* is most famous. He compiled several books of hymns, including *Musica Sacra* (1816) and *Spiritual Songs* (with Lowell Mason, 1831). His *History of Forty Choirs* (1854) describes his activities with church choirs. See F. J. Metcalf, *American Writers and Compilers of Sacred Music* (1925)

Hastings, Thomas, 1860–1929, American architect, b. New York city, grad École des Beaux-Arts, Paris He worked in the office of McKim, Mead, and White, New York, and in 1886 commenced practice in partnership with John M. Carrère Two large hotels at St. Augustine, Fla., were the first of the firm's many important works, of which the New York Public Library is their best known Hastings's designs after the death of Carrère (1911) included the Chapel of St. Ambrose in the Cathedral of St John the Divine, the architectural ensemble of the 59th St Plaza, and the Standard Oil Building, all in New York city, and the memorial amphitheater, Arlington Va

Hastings, Warren, 1732–1818, first governor general of British India Employed (1750) as a clerk by the East India Company, he soon became manager of a trading post, fought beside Robert CLIVE in the recapture of Calcutta (1756), and was made the British resident at a Bengal factory. Good service there brought an appointment to the Calcutta council (1761), but Hastings returned to England (1764) disgusted with the corruption of the administration in Bengal In 1769 he joined the Madras council, and later he became governor of Bengal (1771) and governor general of India in 1774 His aggressive policy of judicial and financial reform, law codification, and the suppression of banditry reestablished British prestige in India Attention was given to cultural matters, and a dangerous Mahratta conspiracy, supported by France, was suppressed The governor was sometimes high-handed—he put British troops at the disposal of the nawab of Oudh, and he used questionable means in recovering from the dowager of Oudh moneys unlawfully withheld from the state He was not, however, personally corrupt, nor did he sanction cruelty Yet he met constant opposition in his council and in England and narrowly escaped recall He resigned in 1784 and returned to England, where he was charged with high crimes and misdemeanors by Edmund BURKE and Sir Philip Francis, whom he had wounded in a duel in India He was impeached in 1787, and the trial dragged on to ultimate acquittal in 1795, despite the bitter prosecution of Burke, Francis, Richard B Sheridan, and C J Fox Hastings's fortune was spent in the defense, but the East India Company contributed to his later support He became popular, was made a privy councilor (1814), and maintained a lively interest in affairs See his letters to his wife (ed by S C Grier, 1905), essay on him by T B M Macaulay, biography by A M. Davies (1935), bibliography by Vera Ward (1932)

Hastings, county borough (pop 63,360), Sussex East, England, SE of London and on the south coast of England The site was occupied in Roman times and probably earlier There are remains of a castle of the time of William the Conqueror and two churches of the 11th and 13th cent Hastings is backed by cliffs and has a 3-mile marine esplanade, pleasure grounds, and bathing beaches St Leonards, the new section of the town, is a residential watering place The place was made famous by the battle of Hastings, which took place on a hill, sometimes called Senlac, inland from the town, on Oct 14, 1066, between the Normans under William duke of Normandy (William the Conqueror, later William I) and the Saxons under HAROLD This battle, one of the most celebrated in history, was won by William's smaller but better-trained and better-equipped force after a whole day's fighting This was the first and most decisive victory of the NORMAN CONQUEST Hastings is one of the CINQUE PORTS

Hastings, borough (pop 14,623; metropolitan pop 20,330), on E North Island, New Zealand, S of Napier. It has a fruit cannery and a dehydration plant

Hastings, 1 Town (pop 1,035), NE Fla , near the east bank of the St Johns river SW of St Augustine It ships potatoes, and there is an agricultural experiment station here 2 City (pop 5,175), co seat of Barry co , S Mich , WSW of Lansing and on a tributary of the Grand, settled c 1836, inc. as a village 1855, as a city 1871 Piston rings and metal-working machinery are made. Indian mounds are near 3 City (pop 5,662), co seat of Dakota co , E Minn , SE of St Paul and on the Mississippi opposite the confluence of the St Croix, platted 1853, inc 1857 It is a farm trade and manufacturing center A state mental hospital (1900) is here. 4 City (pop. 15,145), co seat of Adams co , S Nebr , S of Grand Island, founded 1872, inc 1874. Trade, railroad, and industrial center for a great wheat area, it produces brick, farm machinery, flour, and dairy products It is the seat of Hastings College (Presbyterian; coeducational, 1882) and has a regional museum. A state hospital for the insane is near by. 5 Borough (pop. 2,105), SW Pa , NW of Altoona; inc. 1894.

Hastings-on-Hudson, residential and industrial village (pop. 7,057), SE N.Y., in Westchester co., on

the east bank of the Hudson and N of Yonkers; inc. 1879. Chemicals and copper wire are made

Hasupha (hŭsū'fŭ) [Heb.,=naked], family of Nethinim. Ezra 2 43. Hsshupha. Neh. 7.46

Haswell, Charles Haynes (hāz'wŭl), 1809–1907, American engineer, b New York city. He designed and superintended the construction of the engines in the first steam vessels of the U.S navy, notably in the *Fulton, Mississippi, Missouri,* and *Michigan.* He became (1884) engineer in chief of the navy and wrote a number of manuals, the best known being the *Mechanics' and Engineers' Pocket-Book of Tables, Rules, and Formulas* (1842; 77th ed 1920) ¶ He also wrote *Reminiscences of an Octogenarian* (1896).

hat, a HEADDRESS distinguished from a CAP OF HOOD by having a continuous brim Greeks and Romans wore hats, mostly for protection when traveling, northern European people used head covers of hide or leather, and a square hat was used about the time of the First Crusade FELT hats were made in the Middle Ages, and beaver hats were worn by English dignitaries Since the 16th cent , millinery has been an important part of dress The top hat appeared early in the 19th cent., and the soft felt worn by Kossuth (1849) started a new fashion in America Hats are made of felt—the derby or bowler of heavily stiffened felt, of silk or plush, as in 18th-century Italy, or of straw of two distinct types Straw hats woven like baskets are the Panamas, Bangkoks, Neapolitans, and Manilas, made in Ecuador, Colombia, Peru, Japan, the Philippines, and Switzerland, the Tuscan or Leghorn straws are woven in plaits Hatmaking in America, from colonial days up to 1870, was done by hand The cardinal's scarlet hat, usually called the red hat, has a broad brim and a flat, low crown From each side hangs a cluster of 15 tassels The hat is not worn after the pope places it on the cardinal's head

Hatach (hā'tăk), Esther's eunuch Esther 4 5,6,9,10.

Hauff, Wilhelm (vĭl'hĕlm houf'), 1802–27, German novelist and short-story writer His *Lichtenstein* (1826) was one of the earliest and most popular German historical novels Some of his tales have been translated into English as *Fairy Tales* (1910) and *Caravan Tales* (1912)

Haugen, Gilbert N. (hou'gun), 1859–1933, U S Congressman (1899–1933), b Rock co , Wis He had a grammar school education, entered business at an early age and became a successful banker in Iowa He held many local offices in Iowa and served (1894–98) in the state legislature before becoming a Republican member of the U S House of Representatives Interesting himself in farm problems, Haugen became chairman of the House Committee on Agriculture He was responsible for the Packer Control and Stockyard Act and helped pave the way for the Federal farm relief bill (1933)

Haugesund (hou'gusŏn), city (pop 18,407), Rogaland co , SW Norway a North Sea port It has a large fishing fleet and a fish-processing industry There are numerous viking monuments near by, notably the grave of Harold I

Haugwitz, Heinrich, Graf von (hīn'rĭkh graf' fŭn houk'vĭts), b 1752, d 1831 or 1832, Prussian foreign minister under Frederick William II and Frederick William III In 1805–6 he sought, by inglorious negotiations, to avoid a break between Prussia and Napoleon I When Prussia was drawn into the war and crushed at Jena (1806) Haugwitz retired He died at Venice

Haupt, Herman (houpt), 1817–1905, American civil engineer, b. Philadelphia, grad. West Point, 1835 In 1856 he became chief engineer of the Hoosac Tunnel in the Berkshires He was appointed chief of construction and transportation on U S military railroads (1862), and he developed the principles of using the railroads in war Having introduced the use of compressed air in construction and mining machinery, he became (1892) president of the General Compressed Air & Power Company. His authoritative *General Theory of Bridge Construction* (1851) went through a number of editions. Other books were *Military Bridges* (1864), *Tunneling by Machinery* (1876), and *Reminiscences* (1901)

Hauptmann, Bruno Richard, 1899–1936, convicted kidnaper and murderer, b Germany The infant son of Charles A LINDBERGH was abducted (March 1, 1932) at Hopewell, N J and a ransom of $50,000 for his release was paid through the intercession of Dr John F Condon The child's battered body was found (May 12, 1932) near Hopewell, and on Sept 19, 1934, Hauptmann, an immigrant carpenter, was found with part of the ransom. In a sensational trial at Flemington, N J , he was convicted of murder Hauptmann maintained his innocence to the last, and although temporarily reprieved, he was electrocuted, April 3, 1936 See S B Whipple, *The Trial of Bruno Richard Hauptmann* (1937)

Hauptmann, Gerhart Johann Robert (gĕr'hart yō'hän rō'bĕrt houpt'män), 1862–1946, German poet, dramatist, and novelist, a leading figure in modern German literature After early experimental works, he turned to the new naturalism and wrote the play *Before Dawn* (1889; Eng tr , 1909) This was followed by *Lonely Lives* (1891, Eng tr , 1898) and the famous tragedy *The Weavers* (1892, Eng tr , 1899) With the dream play *Hannele* (1893, Eng tr , 1894) he assumed a romantic medium, and in his most popular play, *The Sunken Bell* (1897, Eng tr , 1898), he surrendered completely to this style Realism was again evident in the tragedies *Drayman Henschel* (1899, Eng tr , 1913) and *Rose Bernd* (1903, Eng tr , 1913), which are among the great works of the modern German theater. His mastery of prose narrative is shown in such novels as his autobiographical *The Fool in Christ, Emanuel Quint* (1910, Eng tr , 1911) and *The Heretic of Soana* (1918, Eng tr , 1923) Many honors came to Hauptmann, among them the 1912 Nobel Prize in Literature He supported the Nazi regime in his old age His complete dramatic works were published in English in 1912–17 See Camillo von Klenze, *From Goethe to Hauptmann* (1926).

Hauraki Gulf (houra'kē,-rä'kē), arm of the Pacific Ocean, in N North Island, New Zealand, forming the entrance to the harbor of Auckland

Hauran (houräN') [Heb ,=hollow or cavernous land], district, SW Syria, E of the Jordan river. The name is derived from the numerous caverns, many at one time inhabited, in the mountainous northeast Hauran is largely a treeless region, including conical volcanic peaks, barren lava fields, and much rich lava soil. Most of the inhabitants are Druses, who migrated here from Lebanon in recent times At least in part, Hauran belonged to the biblical kingdom of BASHAN, which the Israelites conquered Designated the northeastern boundary of the Promised Land (Ezek 47 16,18), Hauran was later the Roman province of Auranitis It was converted to Christianity by the late 2d cent. Great havoc was wreaked by an Arab invasion in the early 7th cent There are many ancient towns in which the buildings, including the furniture, are made entirely of lava. Some 300 of these "giant cities of Bashan" have been located. Inscriptions in Greek, Latin, Arabic, and Sabrean (southern Arabic) are abundant

Hausa or **Haussa** (both hou'su, -sä), Negro people, numbering over 5,000,000, chiefly in N Nigeria and the adjacent Niger territory The Hausa are almost exclusively Moslem and practice agriculture Their widespread trading activities have contributed to make their language a lingua franca in much of W Africa Most of the Hausa sultanates were conquered by the Fulani in the early 19th cent

Hauser, Kaspar (kas'par hou'zur), 1812?–1833, mysterious German foundling. He appeared in Nuremberg in 1828 in a state of semi-idiocy, producing dubious documents and giving an incoherent account of his past, which, he said, he spent in a dark prison hole He awakened immediate interest and sympathy, and his intelligence developed with amazing speed. In 1829 he wrote his autobiography, which was published and spread his fame, and in 1832 the earl of Stanhope, interested in him, assumed responsibility for his education The boy's death from a knife wound was regarded as a political assassination by those who believed him—without any serious grounds—to be the son of the grand duke of Baden by his first wife Others believe that the wound was self-inflicted and that Hauser was a psychopath Much has been written on him, he is the subject of Jakob Wassermann's novel *Caspar Hauser* (Eng tr , 1928). See Andrew Lang, *Historical Mysteries* (1904)

Haushofer, Karl (karl' hous'hōfur), 1869–1946, German geographer, chief exponent of GEOPOLITICS After a successful military career he became (1921) professor of geography at Munich Among his students was Rudolf Hess, who introduced Haushofer to Hitler Haushofer is believed to have virtually dictated the chapters on foreign policy in *Mein Kampf* He remained one of Hitler's closest advisers on foreign affairs In 1946 Haushofer and his wife committed suicide by poisoning Haushofer's writings were much influenced by those of Sir Halford John Mackinder They include *Geopolitik des Pazifischen Ozeans* (1925), *Bausteine zur Geopolitik* (1928), and *Weltpolitik von heute* (1934) Haushofer also edited the periodical, *Zeitschrift fur Geopolitik.* For bibliography, see GEOPOLITICS. See E A Walsh, *Total Power* (1948).

Haussa see HAUSA

Haussmann, Georges Eugène, Baron (shôrzh' ûzhĕn' barō ōsmän'), 1809–91, French civic official and city planner Distinguished for his bold alterations to the layout of Paris under Napoleon III, he is largely responsible for the city's present appearance To create adequate traffic circulation, old streets were widened and new ones cut, while the great railway stations were placed in a circle outside the old city and provided with broad approaches For the enhancement of monuments, open spaces and vistas were contrived, including the Place de l'Opéra, the Étoile, and the Place de la Nation, which became focusing points for radiating avenues The fine Bois de Boulogne was laid out in the bend of the Seine, as well as a number of smaller parks The Boulevard Haussmann in Paris commemorates his name

hautboy see OBOE

Haute-Garonne (ōt"-garôn'), department (2,458 sq mi , pop 512,260), S France, in Gascony and Languedoc It touches on Spain in the Pyrenees near Luchon Toulouse is the capital

Haute-Loire (-lwar'), department (1,931 sq mi , pop 228,676), S central France, in VELAY and AUVERGNE Le Puy is the capital

Haute-Marne (-märn'), department (2 416 sq mi , pop. 181,840), NE France, drained by the upper Marne and the Meuse It is part of CHAMPAGNE In the south rises the LANGRES PLATEAU Chaumont is the departmental capital

Hautes-Alpes (ōt"-sälp'), department (2,178 sq mi , pop 84,932), SE France, in DAUPHINÉ, bordering on Italy Gap is the capital

Haute-Saône (ōt"-sōn'), department (2,075 sq mi , pop 202,573), E France, in FRANCHE-COMTÉ, traversed in the west by the Saône river and in the east by the Vosges mts Vesoul is the capital.

Haute-Savoie (-savwa'), department (1,775 sq mi , pop 270,468), E France, in SAVOY, bordering on Switzerland and Italy. The Alps rise here from the Lake of Geneva and culminate in Mont Blanc Annecy is the capital.

Hautes-Pyrénées (-pērānā'), department (1,751 sq mi , pop. 201,954), SW France, in GASCONY. It rises in the south to some of the highest peaks of the PYRENEES, which form the border with Spain Tarbes is the capital.

Haute-Vienne (-vyĕn'), department (2,145 sq mi ; pop. 336,313), W central France, traversed by the Vienne river It occupies parts of LIMOUSIN and MARCHE LIMOGES is the capital.

Haute-Volta, see UPPER VOLTA

Haut-Rhin (ō"-rĕ'), department (1,354 sq mi.; pop. 471,705), E France, occupying Lower ALSACE. Colmar is the capital

Haüy, René Just, Abbé (rənā' zhüst' äbā' ü̇ē'), 1743-1822, French mineralogist, an authority on crystals He discovered the geometric law of crystallization and wrote many books and papers on crystallography He was professor at the Museum of Natural History, Paris, from 1802

Havana (hüvă'nü) Span *La Habana* (lä äva'nä), city (pop 676,376), W Cuba, capital of Havana prov and of Cuba, largest city and chief port of the West Indies Founded c 1515 probably by Diego de VELÁZQUEZ, Havana has long been strategically and commercially important In the city's capacious harbor, under the protection of MORRO CASTLE, the Spanish treasure galleons assembled for the return voyage to Spain, and the city tempted many buccaneers In the French and Indian War, Havana fell to a British and American force under Admiral Sir George Pocock and the 3d earl of Albemarle in 1762 The U S battleship MAINE was blown up in the harbor in Feb , 1898 After Cuba gained independence from Spain, U S forces in the 20th cent improved sanitary conditions and abolished yellow fever from Havana An important rail, air, and shipping center, the city handles about two thirds of Cuba's imports and about one fifth of its exports—sugar, tropical fruits, and almost all the tobacco crop Cigars, liquors, straw hats, perfumes, and other lesser items are made In the old city are fine examples of colonial architecture, but the new city, built almost entirely from sugar revenues, is completely modern, with superb boulevards, impressive public buildings (notably the lavishly decorated and gilt-domed capitol), and magnificent residences Good hotels and entertainment have made it a popular winter tourist resort Although the climate is hot and humid, sea winds lower the average annual temperature to 77° F Hurricanes have caused severe damage

Havana (hüvă'nü) 1 Town (pop 1,221), NW Fla , between Tallahassee and the Ga line, in a tobacco area, settled 1904, inc 1906 It processes timber **2** City (pop 3,999), co seat of Mason co , W central Ill , below Peoria on the Illinois, opposite the mouth of the Spoon, founded 1827, inc 1853 It was early important as a river port, with a large fishing industry The city is the trade and industrial center for a farm region, a lake resort area is near by A marker notes the site of a Lincoln-Douglas debate in 1858 A U S waterfowl refuge and a state nursery are near Havana

Havelock, Sir Henry (hăv'lŏk), 1795–1857, British general In the Sepoy Rebellion (1857) he recaptured Cawnpore, but was too late to save the British population from massacre Later he was commander of the famous besieged garrison at Lucknow until relieved by Sir Colin Campbell. See biography by Archibald Forbes (1897)

Havelock (hăv'lŏk), village (pop 1,113), S Ont., ENE of Peterborough, in a farming district

Havelok the Dane, English 14th-century metrical romance, telling the story of a prince brought up as a peasant who comes into his own The poem is full of common elements of folk tale and myth but its hero can probably be identified with a historical person, the 10th-century Amlaibh (Olaf) Cuaran, who was defeated at BRUNANBURH and who ruled at different times as king of Northumberland and of Dublin Some have connected the story with Hamlet

Havemeyer, Henry Osborne (hă'vumĕ"yur), 1847–1907, American industrialist, b New York city He inherited large family interests in sugar refining and, with his brother Theodore, built them up A large part of his notable art collection was bequeathed in 1929 by his widow to the Metropolitan Museum of Art

Haverfield, Francis John (hă'vurfēld), 1860–1919, English historian and archaeologist Educated at Oxford, he also worked under Theodor Mommsen. In 1907 he became Camden professor of ancient history at Oxford He was the first scientific historian of Roman Britain. His works include *The Romanization of Roman Britain* (1905), *Ancient Town Planning* (1913), and *The Roman Occupation of Britain* (1924), many monographs, and the authoritative chapters he contributed to the *Victoria History of the Counties of England.*

Haverford College, at Haverford, Pa., near Philadelphia, Friends, for men, opened 1833, called a school until 1856. Its Quakeriana collection is notable

Haverfordwest (hă'vürfürdwĕst'), municipal borough (pop. 6,121), county town of Pembrokeshire, Wales, on a hill above the Western Cleddau It has woolen mills There are ruins of a 12th-century castle and remains of a 12th-century Augustinian priory

Haverhill (hă'vurĭl) 1 City (pop 46,752), NE Mass , on the Merrimack and N of Boston; settled 1640, inc. as a town 1645, as a city 1869. It is one of the country's leading producers of shoes. Shipping containers are also made here Whittier's birthplace (built 1688) is preserved. Bradford Junior College for women is here **2** Town (pop 3,487), W N H , on the Connecticut river above Hanover; inc 1763

Havers, Clopton (hă'vürz, hă'–), c 1650–1702, English physician and anatomist. His noteworthy contribution to medicine was his study of the structure and manner of growth of bone The characteristic canals within the bones are known as Haversian canals His study is reported in *Osteologia nova* (1691).

Haverstraw (hă'vürstrô), village (pop 5,909), SE N Y , on the west bank of the Hudson opposite Ossining, in the foothills of the Ramapo Mts , inc. 1854 Bricks and clothing are made Letchworth Village, a state institution for mental defectives, is near by.

Havilah (hă'vĭlû, hüvī'lu) **1, 2** Descendants of Noah Gen 10 7,29, 1 Chron 1 9,23 **3** Region, probably to be identified with some part of N or NE Arabia Gen 2 11, 25 18, 1 Sam 15 18

Havoth-jair (hă'vŏth-jā'ür) [Heb ,=tents of Jair], group of villages in Bashan and Gilead, E of the Jordan They were named for Jair son of Manasseh or for Jair the judge Num 32 41, Judges 10 4 Bashan-havoth-jair Deut 3 14 The "towns of Jair" also are mentioned in Joshua 13 30, 1 Kings 4 13, and 1 Chron 2 23

Havre (hă'vu), city (pop 6,427), co seat of Hill co , N Mont , NE of Great Falls and on the Milk river, inc 1893 A farm center founded (1887) with the coming of the railroad, it has an experimental farm run by Montana State College Northern Montana College (junior) is at Havre Some miles away are the remains of Fort Assiniboine (est 1879)

Havre, Le (lu a'vru), city (1936 pop 161,760; 1946 pop. 105,491), Seine-Inférieure dept , N France, at the mouth of the Seine on the English Channel. The most important transatlantic port of France, it was founded (1517) as Havre-de-Grace by Francis I During the Second World War the water front with its modern installations and part of the city were heavily damaged, but reconstruction was begun soon after the city was liberated in 1944

Havre de Grace (hăv'ur du grās', grās'), city (pop 4,967), NE Md , on Chesapeake Bay at the mouth of the Susquehanna and NE of Baltimore, inc. 1785 It is a banking, trading, and railroad center; quarrying and canning are important, and chemical products are made here Its race track is world famous An automobile bridge was built over the Susquehanna in 1940

haw, name for several plants, particularly the HAWTHORN and its fruit and the BLACK HAW

Hawaii (huwī'ē, huwä'yu, havī'ē), formerly **Owyhee** (ōwē'hē), island (4,021 sq mi ; pop 73,276), largest and southernmost of the HAWAIIAN ISLANDS Geologically the youngest of the group, Hawaii is made up of three great mountain masses, MAUNA LOA MAUNA KEA, and Hualalai Mauna Loa with its KILAUEA crater are included in the HAWAII NATIONAL PARK The northeast and north coasts of the island are rugged with high cliffs, the west and south coasts are generally at sea level, with a few good bathing beaches The climate ranges from the tropical heat of the southern coastal areas to the icy chill of the mountain summits Vast lava deserts (Kau and S Kona) contrast strikingly with the fern and bamboo forests There are many waterfalls An unusual black-sand beach is on the southeast part of the island Parker Ranch at the foot of Mauna Kea covers 500,000 acres and produces most of the meat for the Territory There is a good motor road around the island, and a railroad skirts the scenic northeastern coast, which is the chief sugar-cane area Sisal is the principal product of the southern coast KONA in the western part, the coffee belt of the islands, is also known for its health resorts and for the deep-sea fishing off its coast Near by is the ancient City of Refuge *Heiau* (ancient temples) are scattered all over the island Parts of the northeast coast are vulnerable to tidal waves, Hilo, the chief port and county seat, has been the scene of several tidal-wave disasters, the most recent occurring in 1946

Hawaii, University of, at Honolulu; land grant and territorial, coeducational, chartered 1907, opened 1908 as the College of Agriculture and Mechanic Arts, known as the College of Hawaii 1911–20 It has colleges of arts and sciences, agriculture, applied science, and education, an agricultural experiment station, agriculture and home economics extension services, a psychological and psychopathic clinic, a legislative reference bureau, a volcano laboratory, and an aquarium. The Hawaii School of Religion is affiliated

Hawaiian Islands, group of 20 islands (6,420 sq. mi , pop. 423,330), central Pacific, c 2,400 mi. from San Francisco A territory of the United States, the group is officially known as the Territory of Hawaii and has a governor appointed by the U.S. President and Congress The capital is HONOLULU. The islands, formerly called the Sandwich Islands, are of volcanic origin and are fringed with coral reefs. They are mountainous, generally fertile, and have a notably fine climate. The two principal islands are HAWAII, the largest and geologically the youngest of the group, and OAHU, the most important and seat of the territorial government and of the Univ. of Hawaii Others of importance are LANAI, NIIHAU, and KAHOOLAWE. The territory is divided into four counties—Hawaii, Honolulu, Maui, and Kauai. Some of the largest active and inactive volcanoes in the world are found on Hawaii and Maui MAUNA KEA (13,784 ft) and MAUNA LOA (13,675 ft , with the crater Kilauea on its eastern slope) are volcanic mountains on Hawaii On Maui there is HALEAKALA (10,032 ft). Vegetation is generally luxuriant, with giant fern forests in Hawaii National Park Niihau and Kahoolawe, however, are arid islands, with little vegetation. Many species of birds and domestic animals have been successfully introduced on the islands. There are few wild animals other than wild boars and goats, and there are no snakes The coastal waters teem with fish Sugar cane and pineapples, grown chiefly on large company-owned plantations, are the chief products and the basis of the principal industries Coffee is grown chiefly in the Kona dist of Hawaii. Other products are rice (raised mostly on Kauai), sisal, cotton, and meat Most of the trade is with the United States The islands lie at the junction of the principal Pacific shipping routes and are connected with the Atlantic lines via the Panama Canal and Cape Horn. There is interisland steamship and airplane service, Honolulu, the territorial capital and chief port, is connected by steamship and by airplane with the mainland, the Orient, and Australia The U.S government maintains a naval base and dry dock at PEARL HARBOR, Oahu, and there are large military and air bases on the same island At the time the islands were discovered (1778) by Captain James Cook, they were under the rule of four warring native kings In 1810, KAMEHAMEHA I became sole sovereign of all the islands, and in the peace that followed his conquests, agriculture and commerce were promoted As a result of his hospitality towards American traders, the sandalwood trade with China reached its height during his reign Native religion collapsed with the death of Kamehameha, and the missionaries arriving in 1820 found the natives eager to embrace a new belief With the help of the missionaries, the Hawaiians evolved a written language, and the year 1839 saw the appearance of the first Hawaiian constitution and the Hawaiian translation of the Bible Some missionaries resigned from the mission and established small firms which are operated today by their descendants who belong to the Big Five, a group of industrial firms exerting powerful influence over the economy of the islands. The sandalwood trade, which declined with the virtual disappearance of the wood, was replaced by the sugar industry, which became the source of Hawaiian prosperity when King Kalakaua won (1875) American agreement for reciprocal trade A few years later, the commercial cultivation of pineapples was begun, but it was not until the second decade of the 20th cent that large canneries were established and export was conducted on a large scale Tourist trade grew to large proportions in the 1930s, after skillful advertising and the construction of luxury hotels gave it fresh impetus. Toward the end of the 19th cent , agitation for constitutional reform led to the deposition (1893) of Queen LILIUOKALANI A provisional government was set up, and this, when annexation to the United States was refused by President Cleveland, was supplanted by a republic (1894), with Sanford B DOLE as president Annexation was accomplished in 1898, and in 1900 the islands were constituted a territory with Dole as governor A joint Congressional committee recommended to Congress (1937) that the consideration of statehood for Hawaii be postponed In 1940 a territorial plebiscite was held, which showed that the majority of Hawaiians favored statehood. During the Second World War, the islands were the chief Pacific outposts for U S. forces and were under martial law (Dec. 7, 1941–March, 1943). Many ethnic and cultural groups are represented The Chinese, answering the call for labor in the sugar industry, were the first of the large groups of immigrants to arrive (starting in 1852), and the Filipinos were the last (after 1906). With the exception of the Koreans, the other immigrant groups—including Portuguese, Germans, Japanese, and Puerto Ricans came in the later part of the 19th cent. The mixture of nationalities sometimes gives rise to racial friction, and laws have been passed to prevent this by reforms in the administration of the police departments and courts. Education in the Territory is free and compulsory, and the rate of literacy is high. The Japanese, representing a third of the population, were feared for many years as a possible menace to national defense, but during the Second World War there were no official reports of Japanese sabotage. The original native culture of the Hawaiians was one of the most advanced of Polynesian civilizations, but it has shrunk as wars and diseases in the 18th and 19th cent. and in more recent years intermarriage with other races caused

a sharp decrease in the number of pure-blooded Hawaiians. See Joseph Barber, Jr., *Hawaii, Restless Rampart* (1941), W.R Castle, *Hawaii, Past and Present* (1924); T. B. Clark, *Paradise, Limited* (1941); R. S Kuykendall, *History of Hawaii* (1938); H W. Bradley, *The American Frontier in Hawaii* (1942); H. G. Pratt, *Hawaii, Off-Shore Territory* (1944)

Hawaii National Park, 173,404 6 acres, comprising two areas on Hawaii and Maui islands The park includes KILAUEA with its fire pit, called Halemaumau, and MAUNA LOA with the active Mokuaweoweo crater on its summit, on the island of Hawaii. On Maui the park area is the HALEAKALA section Hawaii National Park was created by act of Congress in 1916 and placed under the Dept of the Interior Its main features are tropical vegetation, fern forests, and volcanoes In the Haleakala area the rare silver sword plant, once in great abundance, is now protected

Hawarden (hä'wardun), city (pop 2,681), NW Iowa, on the Big Sioux river and N of Sioux City; inc 1887 Oak Grove State Park is near by

Hawarden (hôr'dŭn, har'-), market town, Flintshire, Wales, W of Chester There are ruins of the keep of a 13th-century castle overlooking the Dee, in the grounds of Hawarden Castle (built 1752), the home of Gladstone until his death there in 1898 Gladstone established St Deniol's Hostel and library for theological students The Early English church has a window by Burne-Jones

Hawes, Stephen, c 1475–1530, English poet A disciple of Lydgate, his two best-known works are allegories somewhat in the manner of Chaucer and anticipatory of Spenser, but inferior to both—his *Example of Virtue* (1504?) and the longer *Pastime of Pleasure* (1509)

Haw-Haw, Lord. see JOYCE, WILLIAM

Hawick (hô'lk), burgh (pop 17,059), Roxburghshire, Scotland, on the Teviot and SE of Edinburgh The castle at Branxholm or Branksome, to the southwest, is the Branksome Hall of Sir Walter Scott's *Lay of the Last Minstrel* Mote or Moot Hill is an artificial mound 50 ft high The house of the Douglases of Drumlanrig, said to be the only building not burned in 1570 by the earl of Sussex, remains There are several very old churches—one supposed to be on the site of a church of St Mary founded by St Cuthbert in the 7th cent Hawick is a center for woolen and hosiery manufacture In the Riding of the Marches, a local celebration held in June, a mounted procession rides along the parish boundaries

hawk, bird of prey of the same family as the eagle, the kite, and the osprey It is a short-winged bird, strong and swift in flight The female is usually larger than the male It stuns its prey and carries it off with its sharply clawed feet and tears the flesh with its hooked bill The indigestible parts are regurgitated in pellets The only completely harmful North American hawks are the sharp-shinned hawk, which eats all kinds of small birds, the larger but similar Cooper's or chicken hawk, and the GOSHAWK Among the hawks which are largely beneficial because they destroy so many rodents and insect pests are the American and the ferruginous rough-legged hawks and the broad-winged, the red-tailed, and the red-shouldered hawks The marsh hawk destroys game in some localities The name hawk is used for some birds of the FALCON family

Hawke of Towton, Edward Hawke, 1st **Baron** (hôk, tou'tŭn), 1705–81, British admiral His defeat of the French fleet in Quiberon Bay (1759) decided the naval outcome of the Seven Years War and saved England from possible invasion His long naval career began in 1720, and some years after his great victory he was first lord of the admiralty (1766–71)

Hawker, Robert Stephen, 1803–75, English poet He was vicar of Morwenstow from 1834 He is best remembered for his *Cornish Ballads* (1869), in which the "Song of the Western Men" has the refrain beginning, "And shall Trelawny die?" His other poetical works include *Reeds Shaken with the Wind* (1843, 1844) and a mystical poem, *The Quest of the Sangraal* (1864) See *The Life and Letters of R S Hawker* by his son-in-law, C E Byles (1905), studies by S Baring-Gould (1876) and M F Burrows (1926)

hawker: see PEDDLER

Hawkesbury, town (pop 6,263), SE Ont., on the Ottawa river and W of Montreal It has lumber and paper mills The Canadian International Paper Company has erected a garden city within the town limits

Hawkesworth, John, 1715?–1773, English author He succeeded his friend Samuel Johnson in 1744 as reporter of parliamentary debates in the *Gentleman's Magazine* With Johnson and Joseph Warton he wrote the *Adventurer* (1752–54), an essay periodical; in 1754–55 he edited Swift's works.

hawking: see FALCONRY.

Hawkins, Sir Anthony Hope: see HOPE, ANTHONY

Hawkins or **Hawkyns, Sir John,** 1532–95, English mariner He was bred to the sea and learned the value of Negroes as merchandise on a number of early voyages. In 1562–63 and in 1564 he led extremely profitable expeditions which captured slaves on the African coast and sold them, despite Spanish prohibition, to Spanish ports both in Europe and the West Indies Hawkins set out again in 1567, plundered Portuguese ships, carried off hundreds of Negroes, and peddled them in ports along the Spanish Main At San Juan de Ulúa he fell afoul of a Spanish squadron and barely escaped with two of his boats, one of which was commanded by Sir Francis DRAKE His reputation somewhat diminished, Hawkins recouped some of his losses by muleting (with the connivance of Elisabeth's chief minister, Lord Burghley) the king of Spain of £40,000 by pretending to betray the English interest In 1572 he entered Parliament and subsequently became treasurer and comptroller of the navy In this capacity he made a number of important improvements in ship construction and rigging, although it is probable that he used his office to his personal financial advantage In the great defeat of the Spanish Armada (1588), Hawkins commanded the *Victory* and was knighted for his services In 1594 he set out on a new expedition to the West Indies under Drake, but died and was buried at sea off Puerto Rico See biographies by J A Williamson (1927) and Philip Gosse (1930) His son was **Sir Richard Hawkins,** 1562?–1622 He served under Drake in the 1585 expedition to the West Indies, commanded the *Swallow* in the defeat of the Spanish Armada, and served under his father in 1590 He commanded an expedition in the ship *Dainty* which set out in 1593, sailed down the Brazilian coast and through the Strait of Magellan, plundered Valparaiso, and took a number of prizes, but was captured by two Spanish ships Hawkins was imprisoned, taken to Peru, and sent to Spain (1597), where he remained in prison until 1602 He later served in Parliament and was knighted (1603), and, as vice admiral, he was active in defending the Devonshire coast from pirates He served also in a disastrous expedition (1620–21) against the Barbary pirates

Hawkinsville, city (pop 3,000), co seat of Pulaski co., central Ga., on the Ocmulgee river and S of Macon, inc 1830 It is a trade and processing center in a cotton, peanut, and dairy area

Hawks, Frank Monroe, 1897–1938, American aviator, b Marshalltown, Iowa He moved to California, where he learned to fly and taught flying in the army (1917–19) Among his numerous speed records were those established in two nonstop flights from Los Angeles to New York, one in 1929 and one in 1933 He was killed in an airplane crash at East Aurora, N Y He wrote *Speed* (1931) and *Once to Every Pilot* (1936)

Hawkshaw, Sir John, 1811–91, English engineer. He was consulted on most of the great engineering projects of his time, his greatest work was as engineer of the Severn Tunnel

Hawksmoor, Nicholas, 1661–1736, English architect, known chiefly for works which he did as employee and associate of Sir Christopher Wren and Sir John Vanbrugh Under Wren he was deputy surveyor in the construction of Chelsea Hospital and Greenwich Hospital in London He assisted Wren in the construction of St Paul's Cathedral (1675–1710) and the buildings at Queen's College, Oxford (1692–95) With Vanbrugh he was associated in building Castle Howard and Blenheim Palace Under the act of 1708, Hawksmoor was appointed one of the architects for designing 50 churches for London Of the six which he built, the best are Christ Church, Spitalfields, and St George's, Bloomsbury At Oxford he designed the gateway to Queen's College and the North Quadrangle of All Souls' College His designs show an individual method of design considerably influenced by the Italian baroque See study by H S Goodhart-Rendel (1924)

hawkweed, any species of the genus *Hieracium*, widely distributed perennials They have small, dandelionlike flower heads of yellow, orange, red, or white, usually clustered at the top of the flower stem A few species are cultivated in gardens, especially on rocky soil where few plants thrive, and some Western species are utilized for forage, but the hawkweeds are regarded in the East chiefly as weeds, the orange or tawny hawkweed or devil's-paintbrush being considered one of the worst weeds of New England, where it often makes whole fields a ruddy orange The king devil is a yellow-flowered species According to tradition, hawks sharpened their eyesight with hawkweed

Hawkwood, Sir John de, d 1394, English soldier. He fought in France with the Black Prince and was knighted (perhaps by Edward III) With his "white company" of mercenaries, he entered Italy (1362) and became a condottiere, serving sometimes one republic, sometimes another, but finally accepting a pension from the Florentines to fight in their behalf

Hawley, Joseph, 1723–88, American Revolutionary patriot, b Northampton, Mass He was a leader of the opposition to the revivalist preaching of Jonathan EDWARDS He served in the Massachusetts General Court, where he became prominent in the struggle for political freedom before the Revolution. A leader of pre-Revolutionary activities in W Massachusetts, he was a strong supporter and frequent correspondent of John Adams. See biography by E F. Brown (1931).

Hawley. 1 Village (pop. 1,122), W Minn., E of Moorhead; settled c 1870 It is a farm trade and shipping center A state game refuge is near. 2 Borough (pop 1,778), NE Pa., E of Scranton, settled 1803, inc 1884 In heavily wooded country, it is a hunting and fishing center. There are also small textile mills

Hawley-Smoot Tariff Act (hô'lē-smōōt'), 1930, passed by the U S Congress President Herbert Hoover desired a limited upward revision of tariff rates with general increases on farm products and adjustment of a few industrial rates. A congressional joint committee, however, in compromising the differences between a high Senate tariff bill and a higher House tariff bill, arrived at new high rates by generally adopting the increased rates of the Senate on farm products and those of the House on manufactures Despite wide protest, the tariff act, called the Hawley-Smoot Tariff Act, was signed (June, 1930) by President Hoover The act —which brought the U S tariff to the highest protective level yet in the history of the United States—brought retaliatory tariff acts from foreign countries, and American foreign trade suffered a sharp decline

Haworth, Sir Walter Norman (harth), 1883–1950, English biochemist He was professor and director of the department of chemistry at the Univ of Birmingham from 1925 to 1948 For his work on the carbohydrates and vitamin C he shared with Paul Karrer the 1937 Nobel Prize in Chemistry In 1947 he was knighted

Haworth (hô'uth, hou'-, hô'wurth), former urban district (pop 5,911) and village, since 1939 part of Keighley, West Riding of Yorkshire, England Patrick Brontë and his family lived in the parsonage, which now houses the Brontë museum and library All the Brontes but Anne are buried at Haworth

Haworth (hä'wurth), borough (pop 1,419), NE N J., ENE of Paterson, inc 1894

hawthorn, any species of the large genus *Crataegus*, widely distributed shrubs or small trees particularly prevalent in E North America They commonly have thorns, clusters of white flowers, and orange red, or yellow fruits, some have rose flowers and some have blue or black fruits The fruits (usually called haws) of a few are edible and are used for jelly Hawthorns are often cultivated for ornament and in Europe particularly, for hedges The flowers were long used in celebrating May Day in England, and the hawthorn, haw, whitethorn, thorn, or may, as it is variously known, has been a favorite symbol of spring in English poetry Many legends glorify it, e g , that of the Glastonbury thorn (see GLASTONBURY, England), Two species are considered common English hawthorn or may, *Crataegus oxyacantha* and *monogyna* The common American hawthorn is *Crataegus coccinea*, usually called scarlet or red haw (as are other similar species), it has bright red fruits A hawthorn is the state flower of Missouri Hawthorns have very hard wood, which is chiefly used for tool handles and small items A viburnum is usually called BLACK HAW

Hawthorne, Charles Webster, 1872–1930, American portrait and genre painter, b Lodi, Ill., studied in New York He taught in the Art Students League and the New York School of Art and in 1899 started his own school, the Cape Cod School of Art, at Provincetown, Mass He won many prizes for *Trousseau* (Metropolitan Mus.) Other works are *Venetian Girl* (Worcester, Mass., Art Mus.) and paintings in the Corcoran Gallery, Rhode Island School of Design, Providence, Art Institute of Chicago, Peabody Institute, Baltimore, Hackley Gallery, Muskegon, Mich., and Buffalo, St Louis, Syracuse, and Detroit art museums He became a member of the National Academy of Design in 1911 See *Hawthorne on Painting* (1938)

Hawthorne, Nathaniel, 1804–64, American novelist and short-story writer, b Salem, Mass., grad Bowdoin, 1825, son of a ship captain who spelled his name Hathorne From his widowed mother, almost a recluse, the boy had learned solitary ways, and after he finished college he spent 12 years in the seclusion of his home, supporting himself by literary hack work and writing his unsuccessful novel *Fanshawe* (1828) Magazine stories first made him known and were collected as *Twice-told Tales* (1837, second series, 1842) With his later stories they remain among the best American short stories When journalistic work proved uncongenial, he took a political appointment to earn his living (as he was to do twice later), becoming measurer at the Boston customhouse In 1841 he tried life at Brook Farm In 1842 he married Sophia Peabody, through whom he had come to know the transcendentalists Emerson, Thoreau, Margaret Fuller, and others, and his book *Mosses from an Old Manse* (1846) was written at the home in Concord where he took his bride In Salem, when he was surveyor of the port (1846–49), he began his masterpiece, *The Scarlet Letter* (1850) In this novel the preoccupation with the brooding,

gloomy spirit of Puritan New England which had permeated his short stories reached its greatest expression His use of symbolism, his swift evocation of atmosphere and setting, and his rhythmic prose disclosed a master of romantic fiction. For this and later stories of the Puritan mind, he has been called the founder of the American psychological novel Living on the estate "Tanglewood," near Lenox, Mass , Hawthorne wrote the novel he liked best of his works, *The House of the Seven Gables* (1851), and there became the friend of his admirer, Herman Melville Back in Concord, he finished *The Blithedale Romance* (1852), based on his months at Brook Farm, and soon, in return for a campaign biography of his college friend Franklin Pierce (1852), he was appointed U S consul at Liverpool, England His three years there and his travels in Italy resulted in *The Marble Faun* (1860), a novel set in Italy, and *Our Old Home* (1863), travel sketches of England He died on a trip to the White Mts with Franklin Pierce Among his four unfinished pieces was a novel, *Septimius Felton* (1872) His *Wonder-Book* (1852) and *Tanglewood Tales* (1853) have remained children's favorites See Hawthorne's *American Notebooks* and *English Notebooks* (both ed by Randall Stewart, 1932, 1941). Passages from them and from the French and Italian notebooks had been selected by Hawthorne's wife and published in 1868-72 See *Hawthorne's Short Stories* (ed by Newton Arvin, 1946) and *The Portable Hawthorne* (ed by Malcolm Cowley, 1948), studies by Hawthorne's son-in-law G. P Lathrop (1876), Henry James (1879), Hawthorne's daughter, Rose H Lathrop (1897), and Robert Cantwell (1948), biographies by G E Woodberry (1902), A Mather Jackson (1940), and Randall Stewart (1948) His son, **Julian Hawthorne,** 1846–1934, wrote the standard biography, *Nathaniel Hawthorne and His Wife* (1885), as well as novels, including *A Fool of Nature* (1896), and short stories See his memoirs (ed by his wife, E G Hawthorne, 1938)

Hawthorne, 1 City (1940 pop 8,263, 1948 special census pop 14,131), in Inglewood township, S Calif., SW of Los Angeles, in an oil and truck-farm area, inc 1922 It has aircraft and other industries **2** Borough (pop 12,610), NE N J , NNE of Paterson, settled 1850, inc 1898 Chemical products are made here

Haxtun (hăk'stŭn), town (pop 985), NE Colo , near the South Platte, in a farm area, inc 1909

Hay, John: see TWEEDDALE, JOHN HAY, 2D EARL AND 1ST MARQUESS OF

Hay, John, 1838–1905, American author and diplomat, b Salem, Ind , grad Brown Univ , 1858 He read law at Springfield, Ill , where he met Abraham LINCOLN He accompanied Lincoln to Washington and was his assistant private secretary until the assassination The next five years he spent in minor posts in the American legations at Paris, Vienna, and Madrid Then followed five years of journalism in New York city, with publication of magazine articles, his *Castilian Days* (1871), and his *Pike County Ballads* (1871) Marriage to a daughter of a wealthy Cleveland financier enabled him to be a man of letters, to travel, and to fill political posts of distinction He became Assistant Secretary of State in 1879 and moved to Washington, where he became the intimate of Henry ADAMS and Clarence KING In this period he wrote a social novel, *The Breadwinners* (pub anonymously, 1883), and, with John G Nicolay, the monumental *Abraham Lincoln: a History* (10 vols , 1890), a work for which the two had gathered material with Lincoln's permission when they were his secretaries. In March, 1897, McKinley appointed Hay ambassador to Great Britain, and there he served his country ably during the Spanish-American War From Sept , 1898, until his death he was Secretary of State under McKinley and Theodore Roosevelt Under McKinley he was a maker of policies, but Roosevelt said Hay was "a fine figurehead " Hay was responsible for the Open Door policy (1899), which stressed equality of trade opportunity in China; for American participation in the international demonstration against the Boxers (1900), and for the HAY-PAUNCEFOTE TREATY See biographies by W R. Thayer (1915) and Tyler Dennett (1933).

Hay, Oliver Perry, 1846–1930, American paleontologist, b Jefferson co., Ind., grad. Eureka College (B A , 1870). He taught at Butler Univ , Indianapolis (1879–92) and served with the Field Museum of Natural History, the American Museum of Natural History, and the Carnegie Institution and on the geological surveys of Arkansas, Indiana, and Iowa He made studies of Pleistocene vertebrates of North America and wrote several works in this field.

Hay, river, c.350 mi long, rising in NE British Columbia N of Peace river, crossing NW Alberta, and flowing into Great Slave Lake.

hay, wild or cultivated plants, such as grasses and legumes, dried and cured for use as food for livestock. It is an important factor in cattle raising Hay is one of the leading crops of the United States, where it is grown mainly for home consumption Timothy, alfalfa, and clover are the principal crops used for hay. Because haymaking processes must be carried on quickly for best results, modern power machinery for cutting, raking, loading, and baling has been developed to take the place of the scythe and hand rake Brown hay is hay which has been allowed to ferment See U S Dept of Agriculture *Grass the Yearbook of Agriculture* (1948)

Haya de la Torre, Víctor Raúl (vēk'tôr räōōl' ä'yä dä lä tô'rĕ), 1895–, Peruvian political leader, founder of the APRA party (Alianza Popular Revolucionario Americana) The members of the party are known as Apristas A student radical, he was exiled in 1920 and spent eight years traveling before returning to Peru He campaigned unsuccessfully for the presidency in 1931, was imprisoned for 15 months, and ran by proxy in 1936. Because APRA advocates overthrow of the oligarchy which has ruled Peru since independence was won, it was outlawed from 1931 to 1945, when Bustamante became president with Aprista support The APRA movement has also become a profoundly significant trend in Latin America A social and economic force rooted deeply in demands for the underprivileged, it seeks alleviation of oppression, particularly oppression of the Indian The successful coup of Manuel Odría in Nov , 1948, caused Haya de la Torre to find refuge in the Colombian embassy A bitter Colombian-Peruvian exchange followed

Haydarpasa (hī'därpäshä'), railroad terminus, Turkey, on the Asiatic side of Istanbul and included in the Istanbul city limits. It is sometimes spelled Haidar Pasha.

Hayden, Ferdinand Vandiveer (hā'dun) 1829–87, American geologist, b. Westfield, Mass , grad Oberlin, 1850, M D Albany Medical College, 1853 Chiefly through the influence of James Hall, his interest in geology was aroused and he engaged in geological expeditions, Hayden first explored the Badlands (with F B Meek) and later the upper Missouri valley After serving as a surgeon in the Civil War, he taught geology (1865–72) at the Univ of Pennsylvania. In 1867 he undertook for the government a survey of Nebraska, later he headed (1872–79) the survey of the territories His notable work, especially in the Rocky Mt region, resulted in his appointment to the newly created U S Geological Survey, he was in charge (1879–86) of the Montana division Largely through his efforts, Yellowstone National Park was created

Haydn, Franz Joseph (fränts' yō'zĕf hī'dn), 1732–1809, Austrian composer As a boy he sang in the choir at St Stephen's, Vienna, and beyond this his early musical training was scanty Most of his enormous musical output was produced during the 29 years of his service as musical director to the Princes ESTERHAZY, beginning in 1761 Haydn visited London in 1791 and again in 1794 During the earlier visit he received the degree of doctor of music from Oxford Univ , and on that occasion his Oxford Symphony (composed, 1788) was performed The last important creations of his old age were his two great oratorios, *The Creation* (1799) and *The Seasons* (1800) Throughout his creative life he composed string quartets, some of which influenced Mozart, whose own quartets influenced the later ones of Haydn For the court of the Esterhazys, Haydn composed a number of operatic works which served as training for his later oratorios It is impossible to say just how many symphonies he wrote, the count of 104 by the scholar Mandyczewski is generally accepted Many are known by nicknames such as Farewell Symphony (1772), Toy Symphony (1788), Surprise Symphony (1791), Military Symphony (1794), Clock Symphony (1794), Drum Roll Symphony (1794), and London Symphony (1795). Outstanding also are the Symphony No 88 in G (1786) and the Symphony No 99 in E Flat (1793–94) In his symphonies and those of Mozart, sonata form reaches perfection Haydn also composed piano sonatas, songs, choruses, Masses, chamber music for various instruments, and *The Seven Last Words*, originally written (c 1785) for orchestra, on commission from the cathedral at Cádiz, and later arranged by Haydn for string quartet and as a choral work Haydn's younger brother, Johann Michael Haydn (1737–1806), was a composer, musical director to the archbishop of Salsburg for many years, and a teacher of Weber See biography of Franz Joseph Haydn by Karl Geiringer (1946)

Haydon, Benjamin Robert, 1786–1846, English painter and writer His ambitions involved him in many difficulties and despite some early successes he was always in debt. During one of his imprisonments for debt in 1827 he painted *Mock Election* (Buckingham Palace), a fine picture which was purchased from him by George IV. Other admirable works include *Lazarus* (National Gall , London), *Agony in the Garden* (Victoria and Albert Mus), and *Punch and Judy* (Tate Gall., London) Haydon was a popular teacher, writer, and lecturer and included among his admirers most of the great literary figures of his day His lectures on design (later published) were delivered in many cities His continued lack of financial success drove him to suicide at the age of 60. See his *Correspondence and Table-Talk* (1876) and his autobiography and journals (1926 ed., with introduction by Aldous Huxley); biography by Eric George (1948).

Hayes, Carlton Joseph Huntley, 1882–, American historian and diplomat, b. Afton, Chenango co., N Y., grad. Columbia (B A , 1904; M.A., 1905, Ph D , 1909). He began teaching history at Columbia in 1907, became a full professor in 1919, and from 1935 to his retirement in Jan., 1950, held the Seth Low chair of history Hayes is especially noted for his studies in nationalism, *Essays on Nationalism* (1926) and *The Historical Evolution of Modern Nationalism* (1931) A forceful teacher, he also inspired his students to further research in this field. Other works include *An Introduction to the Sources Relating to the Germanic Invasions* (1909), *British Social Politics* (1913), *France, a Nation of Patriots* (1930), and *A Generation of Materialism (1871–1900)* (1941). Of his many textbooks (the earlier ones were often written in collaboration with Parker T Moon), *A Political and Cultural History of Modern Europe* (2 vols , 1932–36, rev ed , 1939) is best known, a more recent one is *History of Europe*, with Marshall W. Baldwin and Charles W Cole (1949) Hayes served as a captain in military intelligence in the First World War and wrote *A Brief History of the Great War* (1920) He had been converted to Catholicism in his undergraduate days and became one of the leading Catholic laymen in the United States. The period from May, 1942, to March, 1945, when he was U S ambassador to Spain, he records in *Wartime Mission in Spain, 1942–1945* (1945). Although anti-Franco elements criticized him as being too friendly with the Spanish dictator, it was generally held that he played an important role in preventing an outright Spanish alliance with the Axis in the Second World War Hayes was long cochairman (1925–45) of the National Conference of Christians and Jews

Hayes, Harvey Cornelius, 1878–, American physicist, b North Fenton, N Y , grad Harvard (B A , 1907) From 1917 he served as research physicist of the U S navy His most notable contribution is the invention of the sonic depth finder, a practical instrument for use in mapping the ocean floor

Hayes, Helen, 1900–, American actress, whose maiden name was Helen Hayes Brown, b Washington, D C She made her Broadway debut in 1908 in *Old Dutch*, a musical comedy Her performances in *Dear Brutus*, *Mary of Scotland*, *Caesar and Cleopatra*, and *What Every Woman Knows* made her popular, and her portrayal (1935–39) of the title role in Laurence Housman's *Victoria Regina* established her as an actress of the first rank Her more recent appearances have been in *Twelfth Night*, *Harriet*, and *Happy Birthday* Some of the films in which she has starred are *The Sin of Madelon Claudet*, *Arrowsmith*, and *Farewell to Arms* She married (1928) the playwright Charles MacArthur See Catherine Hayes Brown, *Letters to Mary* (1940)

Hayes, Isaac Israel, 1832–81, American arctic explorer, b Chester co , Pa , M D Univ. of Pennsylvania, 1853 While serving as ship's surgeon on the second expedition (1853–55) of E K KANE, Hayes led an exploring party across Kane Basin and northward along the east shore of Ellesmere Island. On his own expedition (1860–61) he sought an open seaway to the North Pole, which he incorrectly believed he had found at a point which seems to have been the south end of Kennedy Channel His astronomer had died during the early part of the expedition, and Hayes's astronomical calculations were inaccurate In 1869 he made another journey to Greenland, on which he was accompanied by the marine artist, William Bradford Hayes wrote several books on his arctic experiences, including *Cast Away in the Cold* (1868) and *The Land of Desolation* (1872)

Hayes, Patrick Joseph, 1867–1938, American churchman, archbishop of New York (1919–38), cardinal of the Roman Church, b New York city, educated at Manhattan College, at Catholic Univ , and at Rome. He was ordained in 1892, and became chancellor of the archdiocese of New York (1903) and auxiliary to Archbishop John M FARLEY (1914). He succeeded as archbishop in 1919 and was created cardinal in 1924 Cardinal Hayes manifested great interest in social and industrial reforms, especially in the administration of F D Roosevelt He organized the Catholic Charities of New York, which became one of the principal American agencies of social work Cardinal Hayes was greatly loved and revered by all classes and creeds His death and his burial in the crypt of St Patrick's Cathedral were the occasion of a great popular demonstration of mourning See John B Kelly, *Cardinal Hayes: One of Ourselves* (1941).

Hayes, Roland, 1887–, American Negro tenor, b. Curryville, Ga , studied at Fisk Univ. and with private teachers in Boston and in Europe. Born into a poor family, he secured his education under very difficult circumstances, and finally, past the age of 30, he achieved recognition both in Europe and in the United States as a great singer of Negro spirituals and of the art-song repertoire. See MacKinley Helm, *Angel Mo' and Her Son, Roland Hayes* (1942).

Hayes, Rutherford Birchard, 1822–93, 19th President of the United States (1877–81), b. Delaware, Ohio, grad. Kenyon College, 1843, and Harvard Law School, 1845 He became a moderately successful lawyer in Cincinnati and was made (1858) city solicitor In the Civil War he began as a major of volunteers, took part in some 50 engagements, was several times wounded, and rose in rank to be (1865) major general of volunteers Elected to Congress while still in the field, he served (1865–67) as a regular Republican, quietly supporting the radical Reconstruction program He was three times (1867, 1869, 1875) elected governor of Ohio and was chosen as the Republican candidate for President in 1876, opposing Samuel J TILDEN, the Democratic candidate The election was one of the most significant in U.S history, for it marked the resurgence of the Democrats and the political reentry of the South into the Union The chaotic political conditions brought on by Reconstruction resulted in disputed elections in South Carolina, Florida, Louisiana, and Oregon Congress created an electoral commission to decide the elections The commission awarded all disputed returns to Hayes and thereby gave him a majority of one in the electoral college Needless to say, the decisions were obviously partisan, and the resultant indignation had some effect on Hayes's administration, which was generally conservative and efficient and no more He withdrew Federal troops from Louisiana and South Carolina, and the Reconstruction era was ended His conciliatory policy toward the South and his genuine interest in civil service reform alienated important Republican groups, notably that led by Roscoe CONKLING An advocate of hard money, he vetoed the BLAND-ALLISON ACT, which was passed over his veto, and provided for resumption of specie payments in gold At the end of his term he retired to become active in philanthropic foundations See his diaries and letters (ed by C R Williams, 5 vols , 1922–26), biographies by C R Williams (1914) and H J Eckenrode and P W Wight (1930)

Hayes, river of NE Manitoba, rising in the lake region NE of Lake Winnipeg, and flowing generally northeast c 300 mi to Hudson Bay It was the chief route used by Hudson's Bay Company traders from Hudson Bay to Lake Winnipeg and the interior, York Factory, an important establishment of the company is at its mouth

hay fever, INFLAMMATION of the mucous membrane of nose and eyes resulting from a specific sensitivity to certain foreign substances, usually the POLLEN of plants (see ASTHMA) It usually recurs each year, the exact time depending upon the time of flowering of the plant There is itching, sneezing, swelling, and discharge associated with the congestion and there are many degrees of severity of the attack The discomfort can be lessened by local astringents. To prevent attacks some persons choose a suitable place of residence away from the plant during flowering season The substance which causes hay fever can be determined by skin tests It is possible to desensitize some individuals by means of injections prepared from the offending agent

Hay-Herrán Treaty (hā"-hĕrän'), concerning the Panama Canal, was signed by Secretary of State John Hay of the United States and Foreign Minister Tomás Herrán of Colombia on Jan 22, 1903 The treaty provided that the New Panama Canal Company, which held an option on the canal route, might sell its properties to the United States, Colombia was to lease a strip of land across the Isthmus of Panama to the United States for construction of a canal, and the United States was to pay Colombia $10,000,000 and, after nine years, an annuity of $250,000 Although it did not give the United States complete governmental control over the proposed canal zone, the treaty was ratified by the U S. Senate Fear of "Yankee imperialism" and of the loss of national sovereignty, plus the insufficiency of the proposed money payments, caused the Colombian congress to decline ratification of the treaty. See D C Miner, *The Fight for the Panama Route* (1940)

Hayley, William, 1745–1820, English poet and biographer. His biography (1803–4) of his close friend Cowper was illustrated by Blake during a three-year residence with Hayley Although his dramas, essays, and odes are forgotten and his biographies of Milton (1796) and Romney (1809) superseded, he was once so popular a poet that he was offered the laureateship, which he declined. See his memoirs (ed by John Johnson, 1823).

Haymarket Square riot, outbreak of violence in Chicago on May 4, 1886 Demands for an eight-hour working day became increasingly widespread among American laborers in the 1880s. This issue caused trouble. A demonstration, largely staged by a small group of anarchists in Chicago caused a crowd of some 1,500 people to gather at Haymarket Square. When policemen attempted to disperse the meeting, a bomb exploded and rioting ensued. Seven policemen and four other persons were killed, while over 100 were wounded. Public indignation rose rapidly, and punishment was demanded. Eight anarchist leaders were tried, but no evidence was produced that they had made or thrown the bomb. They were, however, convicted of inciting violence Four were hanged, one committed suicide, and the remaining three—after having served in prison for seven years—were pardoned (1893) by John P Altgeld, governor of Illinois, on the ground that the trial had been unjust The incident was frequently used by the adversaries of organized labor to discredit the waning KNIGHTS OF LABOR movement See Henry David, *History of the Haymarket Affair* (1936)

Hayne, Isaac, 1745–81, soldier in the American Revolution, b Colleton District, S C He became a planter there and manufactured arms for the Revolutionary forces Upon the destruction by the British of the ironworks, he became a soldier in the Continental army After Charleston fell, he was paroled and returned to his plantation Because of desperate illness in his family he found it expedient to swear allegiance to the British, having been assured by them, so he thought, that military service would not be required of him Therefore when ordered to military service by them, he considered his agreement violated and again enlisted in the colonial forces On subsequent capture he was hanged as a spy without trial, an act which greatly angered the Americans

Hayne, Paul Hamilton, 1830–86, American poet, b. Charleston, S C, grad Charleston College His first book of poems came out in 1855 Too frail for active service, he was an aide to the Confederate General Pickens in the Civil War and wrote spirited war poems After the war, his home and library destroyed, he took refuge on a small estate in Georgia, working in his garden for food and lightening his poverty by writing poems and corresponding with literary friends and admirers, among them the younger Southern writers, Lanier, Timrod, and Scollard In 1873 he edited the works of Timrod His own works include *Legends and Lyrics* (1872), *The Mountain of the Lovers* (1875), and collected poems (1882) See his letters, ed by D M McKeithan (1944) and Charles Duffy (1945)

Hayne, Robert Young, 1791–1839, American statesman, b. Colleton District, S C Having served in the South Carolina state legislature (1814–18) and as attorney general of South Carolina (1818–22), Hayne was a U S Senator (1823–32) and gained attention as the leading Southern spokesman against the tariff His famous debate with Daniel Webster in Jan , 1830, precipitated by the FOOT RESOLUTION, covered all the issues of political and economic difference between the South and the North, in it Hayne upheld the doctrines of states' rights and nullification, thus provoking Webster's impassioned defense of a nationalistic interpretation of the Constitution Hayne retired (1832) from the Senate in favor of John C Calhoun and was governor of South Carolina (1832–34) at the time the nullification convention met The compromise which Henry Clay procured satisfied him, and his influence ameliorated the ensuing high feeling After a year as mayor of Charleston, Hayne devoted the rest of his life to railroad projects to ally the West with the South, but with little success See biography by T D Jervey (1909)

Haynes, Elwood, 1857–1925, American automobile inventor and manufacturer, b Portland, Ind , grad Worcester Polytechnic Institute, 1881 While working as field superintendent for a natural gas company in Kokomo, Ind , he designed a gasoline automobile, with which he made successful tests on July 4, 1894 This was of the "horseless carriage" type, Haynes gave it to the Smithsonian Institution in 1910 In 1895 he formed his own manufacturing company and in later years made many improvements in design and construction He invented a number of alloys, including one of cobalt and chromium used in the manufacture of cutting instruments

Haynes, John, c 1594–1654, colonial governor of Massachusetts and then of Connecticut He emigrated (1633) to Massachusetts and as governor (1635) banished Roger Williams, an act he later regretted Haynes moved (1637) to Hartford, Conn , and became (1639) the first governor of Connecticut under the FUNDAMENTAL ORDERS He held the office on alternate years until his death He urged the union of the New England colonies and later served as Connecticut commissioner to the New England Confederation

Haynesville, town (pop 2,418), NW La , near Arkansas, in a cotton and oil district, inc 1861

Hay-Pauncefote Treaty (hā"-pôns'fōōt), negotiated in 1901 by Secretary of State John HAY, for the United States, and Julian Pauncefote, 1st Baron PAUNCEFOTE OF PRESTON, British ambassador to the United States, for Great Britain It replaced the CLAYTON-BULWER TREATY and established the supremacy of the United States in the Caribbean. The original draft of the treaty was signed on Feb. 5, 1900 It provided for a neutralized canal, to be governed by rules similar to the Suez Canal regulations adopted at Constantinople in 1888, and, most important, it authorized the United States to construct and manage the transisthmian canal This draft was ratified by the U S Senate on Dec. 20, 1900, with three amendments—abrogation of the Clayton-Bulwer Treaty, provision for the fortification of the canal, and deletion of the article providing that other powers join the treaty Since Great Britain refused to ratify the treaty as amended, a revised treaty was signed by Hay and Pauncefote on Nov 18, 1901, and was ratified by the U S Senate on Dec 16, 1901 A compromise, it superseded the Clayton-Bulwer Treaty, provided that the United States might construct a canal and have full control of its management and regulation, retained nominally the principle of neutrality under the sole guarantee of the United States, provided that the canal be open to ships of all nations on equal terms, and omitted the clause contained in the first draft forbidding fortifications The Panama Canal Act, passed in 1912, which exempted from tolls American ships engaged in coastwise trade, was protested by Great Britain as a violation of the treaty and was repealed in 1914 through the efforts of President Woodrow Wilson See S F Bemis, *A Diplomatic History of the United States* (1936)

Hays, Arthur Garfield, 1881–, American lawyer, b Rochester, N Y , grad Columbia (B A , 1902, LL B , 1905). He was admitted (1905) to the bar and practiced in New York city He was active in many cases concerned with civil liberties, he distinguished himself as a defense attorney in the Scopes Case (1925) in Tennessee, in the Sacco-Vanzetti Case (1927), and in the case (1933) involving the burning of the German Reichstag He is the director of the American Civil Liberties Union and conducted (1937) the investigation of civil liberties in Puerto Rico He wrote *Let Freedom Ring* (1928), *Trial by Prejudice* (1933), and *Democracy Works* (1939)

Hays, William Harrison, 1879–, American moving-picture executive, b Sullivan, Ind , grad Wabash College, 1900 Will H Hays became active in Indiana political affairs, was chairman of the Republican state committee, and served (1918–21) as chairman of the Republican National Committee He was (1921–22) Postmaster General under President Harding As president (1922–45) of the Motion Picture Producers and Distributors of America, he administered the moving-picture moral code—popularly called the "Hays Code"—which was promulgated (1934) by agreement of the leaders of the moving-picture industry

Hays, William Jacob, 1830–75, American painter of Western scenes and wild life, b New York city Noteworthy examples of his work are *Wounded Buffalo*, *The Stampede*, *Herd on the Move*, and *Prairie Dog Village* He also made excellent studies of flowers, fruit, and game birds

Hays, city (pop 6,385), co seat of Ellis co , W central Kansas, W of Salina, inc 1885 It was founded in 1867 near Fort Hays, established in 1865 for protection against the Indians and abandoned in 1889 In an agricultural and livestock area, it prospered after 1936 with the development of near-by oil fields Fort Hays Kansas State College and an agricultural experiment station are here

Hayti (hā'tē), city (pop 2,628), extreme SE Mo , near the Mississippi It ships cotton and other farm products

Hayward, Abraham, 1801–84, English lawyer and essayist Editor of the *Law Magazine*, he contributed to many periodicals, including the *Quarterly Review*, and translated Goethe's *Faust* "The Art of Dining" (1852) is his best-known essay

Hayward. 1 City (pop 6,736), W Calif , SE of Oakland, founded 1854, inc 1876 It is a large poultry center Canning is done here, and poultry-farm equipment and feeds are produced 2 Resort city (pop 1,571), co seat of Sawyer co , NW Wis , on the Namekagon and SE of Superior, in a lake and woods region, settled 1881, inc 1915 Camp Hayward, for migratory workers, was established here in 1934 Two state fish hatcheries and a government nursery are near by

Haywood, Eliza (Fowler), 1693?–1756, English novelist Her libelous references in *Memoirs of a Certain Island Adjacent to Utopia* (1725) prompted Pope to satirize her in *The Dunciad* Her periodical the *Female Spectator* (1744–46) was followed by some 70 books the best were the novels *The History of Miss Betty Thoughtless* (1751) and *The History of Jemmy and Jenny Jessamy* (1753) See biography by G F Whicher (1915)

Haywood, William Dudley, 1869–1928, American labor leader, b Salt Lake City, Utah. He began mining at 15 years of age In 1896 he joined the newly organized Western Federation of Miners, and in 1900 he became a member of the executive board and national secretary-treasurer of the organization, with headquarters in Denver His leadership was militant, and he was often accused of inciting to violence, especially in the Colorado troubles culminating in the Cripple Creek strike (1904), which he led He was also accused of instigating the assassination of Idaho's governor in 1905, but was acquitted in a trial in which he was defended by Clarence S Darrow and which attracted nation-wide attention In 1905 he was one of the organizers of the INDUSTRIAL WORKERS OF THE WORLD He joined the Socialist party and became a member of its national executive board,

but because of his advocacy of violence was forced out of the party. He led the famous Lawrence and Paterson textile workers' strikes in 1912 and 1913 Repudiating the crafts union ideal and the co-operation policy of the American Federation of Labor, he preached the class struggle, no compromise, mass action doctrines of the I W W When the United States entered the First World War, he was arrested on a charge of sedition, was tried, convicted, and sentenced to 20 years' imprisonment. While awaiting a new trial in 1921, he forfeited bail and escaped to Russia He wrote many articles and prepared his own autobiography, published as *Bill Haywood's Book* (1929) See P. F. Brissenden, *The I W W* (2d ed , 1920)

Hazael (hă'zāĕl, hŭzā'ĭl), fl 840 B C , king of Damascus, successor and murderer of BENHADAD **2** From the Bible he appears as the ally of the party of Elisha in Israel and later as the conqueror, for he took all the Hebrew possessions E of the Jordan, ravaged Judah, and rendered Israel impotent From inscriptions of Shalmaneser of Assyria it appears that Hazael withstood an attack by the Assyrian army and kept Damascus, Syria, and Palestine independent He was succeeded by his son Benhadad 1 Kings 19 15, 2 Kings 8–10

Hazaiah (hăzā'yu, hă"zāĭ'u) [Heb ,=God decides], descendant of Judah Neh 11 5

Hazar-addar (hā'zar–), boundary town, S Palestine Num 34 4 In the parallel verse, Joshua 15 3, textual error seems to have made two names, Hezron and Adar, out of one

Hazard, Ebenezer (hă'zurd), 1744–1817, American public official and historian, b Philadelphia, grad Princeton, 1762 He became a publisher in New York city. He was appointed (1775) first postmaster of the city under the Continental Congress, made (1776) surveyor general of the Continental Post Office and in 1782 succeeded Richard BACHE as Postmaster General This office he held until Sept , 1789, when, under the new Federal Constitution, the Post Office establishment was reorganized Under him the mail was first carried in stagecoaches on main routes, displacing the old horse-and-rider system He edited two volumes of *Historical Collections* (1792–94)

Hazard, Paul (pôl' ăzar'), 1878–1944, French scholar He began his teaching at the Univ of Lyons in 1910, and his success was immediate After the First World War he taught (1919–25) at the Sorbonne and in 1925 was appointed to the chair of comparative literature in the Collège de France In alternate years between 1932 and 1940 he was a visiting lecturer at Columbia Recognized as one of the outstanding authorities on comparative literature, Hazard was elected to the French Academy in 1939 Appointed (1941) president of the Univ of Paris, he was rejected by the Germans and taught in Paris and Lyons until his death Among his important writings are *Histoire de la littérature française* (comp with Joseph Bédier, 2 vols , 1923–24), *Les Livres, les enfants et les hommes* (1932, Eng tr , *Books, Children & Men*, 1944), and *La Crise de la conscience européenne* (3 vols , 1935)

Hazard (hă'zurd), city (pop 7,397), co seat of Perry co , E Ky , on the North Fork of the Kentucky river, in the Cumberland foothills It is the trade and shipping center for an important coal area which also yields oil, gas, and timber Oil is refined in the city The surrounding mountain regions are sparsely settled and isolated The Frontier Nursing Service is at Hyden, to the southwest, and the Hindman Settlement School, on Troublesome Creek, is NE of Hazard

Hazar-enan (hă'zar-ē'–) [Heb ,=village of springs], unidentified northern boundary limit of Israel Num 34 9, Ezek 47 17, 48 1

Hazar-gaddah (hă'zar-gă'du) [Heb ,=village of fortune], town, S Palestine Joshua 15 27

Hazar-hatticon (hă'zar-hă'tĭ–) [Heb ,=the middle village], town of Israel Ezek 47 16

Hazarmaveth (hă'zarmă'–), son of Joktan and eponym of the country now called HADRAMAUT Gen. 10 26, 1 Chron 1 20

Hazar-shual (–shō'ŭl) [Heb ,=fox village], unidentified town, S Palestine Joshua 15 28, 19 3, 1 Chron. 4 28, Neh 11 27

Hazar-susah (hă'zar-sū'su) or **Hazar-susim** (–sū'–) [both Heb ,=horse village], town, S Palestine Joshua 19 5, 1 Chron 4 31

haze, a lack of transparency in the atmosphere caused by suspended dust or salt particles or by minute water droplets (smaller and less numerous than in fog). A hazy condition prevalent on hot days, known as optical haze, or "shimmer," is caused by unequal heating of the air, which results in unequal refraction of light as it passes through air of varying density. In haze there is no visible obscuration of near-by objects, but distant objects are blurred and details of landscape and color disappear.

Hazebrouck (ăzbrōōk'), **town** (pop 11,896), **Nord** dept , N France, in Flanders. It has a textile industry.

hazel, any plant of the genus *Corylus*, shrubs or small trees with foliage similar to the related alders The flowers are produced before the leaves, the male in catkins, the female inconspicuous, both on the same tree Hazels are also called filbert, although this is more strictly a name for two European kinds (and their hybrids) cultivated chiefly in Europe for the filbert nuts of commerce American hazels are rarely cultivated for the edible nuts that are often gathered but seldom sold Cobnut is another name, particularly for a third European kind Winter hasel and WITCH HAZEL are not related to hazel

Hazel Crest, village (pop 1,299), NE Ill , near Chicago, inc 1911

Hazelelponi (hă'zĕlĕlpō'nī), Judahite woman. 1 Chron 4 3

Hazelwood, town (pop 1,508), W N C , WSW of Asheville, in the Blue Ridge resort area

Hazen, William Babcock, 1830–87, American general, b West Hartford, near Hartford, Vt , grad West Point, 1855 In the Civil War he fought at Shiloh, Perryville, and Murfreesboro and in the Chattanooga campaign. Promoted major general of volunteers (1864), he led a division in Sherman's campaign through Georgia and the Carolinas After the war he served many years in the West His criticism of army contracts and the post-trader system led to exposure of the Belknap scandals in the War Dept (see BELKNAP, WILLIAM WORTH) Hazen was appointed chief signal officer in 1880 As ex officio head of the Weather Bureau, he organized the polar expedition of Adolphus W GREELY See his *Narrative of Military Service* (1885)

Hazerim (huzē'rĭm, hă'zu–) [Heb ,= villages], unidentified place Deut 2 23 Perhaps it represents a common noun

Hazeroth (huzē'rŏth, hă'zu–) [Heb ,=camping grounds], camp of the Hebrews, N of Mt Sinai. Num 11 35, 12 16, 33 17, Deut 1 1

Hazezon-tamar (hă'zŭzŏn-tā'mär) see EN-GEDI

Haziel (hā'zēĕl, hăzī'–) [Heb ,=God's vision], Gershonite Levite 1 Chron 23 9

Hazlehurst (hā'zulhûrst) **1** City (pop 1,732), co seat of Jeff Davis co , SE Ga , near the Altamaha river WSW of Savannah, settled in late 1850s, inc 1891 It is a market for tobacco **2** City (pop 3,124), co seat of Copiah co , SW Miss , SSW of Jackson, founded 1857, inc 1865 It is the shipping center for a fruit and vegetable area

Hazleton (hā'zultun), industrial city (pop 38,009), E Pa , S of Wilkes-Barre, settled 1780, laid out 1836, inc as a borough 1856, as a city 1892 It has anthracite mines and textile mills and a wire and cable industry established through the voluntary contributions of its citizens The highest elevation of the anthracite region (1,750 ft above sea level) is near the city

Hazlitt, William, 1778–1830, English essayist After an informal education which included theology, art, and philosophy, he began writing for newspapers and periodicals He acted as parliamentary reporter and theatrical critic for the *Morning Chronicle* and later contributed to Leigh Hunt's *Examiner*, the *Edinburgh Review*, the *London Magazine*, and the *New Monthly* The best of Hazlitt's enthusiastic and penetrating literary criticism is collected in *Characters of Shakespear's Plays* (1817), *Lectures on the English Poets* (1818), *Lectures on the English Comic Writers* (1819), *Table Talk* (1821–22), and *The Spirit of the Age* (1825), portraits of his contemporaries With Coleridge, Hazlitt led the move for a new view of Shakspere and Elizabethan drama, in general he showed keen insight in his judgments on contemporary writers and actors as well as on past authors Hazlitt is one of the masters of the English essay, displaying a keen intellect, sensibility, and wide interests in such essays as "On Going a Journey," "My First Acquaintance with Poets," "On the Feeling of Immortality in Youth " Hazlitt was well acquainted with Wordsworth, Coleridge, Southey, Lamb, and many other prominent men of his time, although his obstinate independence and uncertain temper frequently alienated his friends, even his enemies had to respect his honesty and ability His admiration of Napoleon, of whom he wrote a biography (1828–30), was the exception to his lifelong liberal tendencies See his collected works (ed by P P Howe, 1930 34), biographies by P P Howe (rev ed , 1928) and C M Maclean (1944) *The Memoirs of William Hazlitt* (1867) is by his grandson, **William Carew Hazlitt,** 1834–1913, bibliographer Among W C Hazlitt's works are a valuable *Handbook to the Popular Poetical and Dramatic Literature of Great Britain* (1867) and its supplements and *Four Generations of a Literary Family the Hazlitts* (2 vols , 1897)

Hazo (hā'–), nephew of Abraham Gen 22 22

Hazor (hā'–) **1** Fortified city, somewhere in N Palestine, which Joshua destroyed and Solomon rebuilt Joshua 11 1, 19 36, 1 Kings 9 15, 2 Kings 15 29 **2** Unidentified town, Palestine Joshua 15 23 **3** See KERIOTH **2** **4** Unidentified place, near Jerusalem, occupied after the Exile Neh 11 33 **5** A district, Arabia Jer. 49 28–33. **6** Unidentified town, S Palestine. Joshua 15 25. AV gives at this point "Hazor, Hadattah," but RV is more likely correct with Hasor-hadattah.

H. D.: see DOOLITTLE, HILDA.

He, chemical symbol of the element HELIUM.

Head, Sir Edmund Walker, 1805–68, British administrator in Canada; cousin of Sir Francis Bond Head. As governor (1847–54) of New Brunswick he so successfully discharged his duties that he was appointed lieutenant governor of Canada in 1854, but increasing friction between Upper and Lower Canada made his tenure of office a period of difficulties and he retired from office in 1861 An able linguist, he prepared an edition of Franz T. Kugler's *Handbook of Painting: the German, Flemish, Dutch, Spanish, and French Schools* (1854) and translated from the Icelandic *Viga-Glum's Saga* (1866)

Head, Sir Francis Bond, 1793–1875, British administrator in Canada His experience as an officer in the British army, as the manager of a mine in South America, and as assistant poor-law commissioner for Kent, England, had little prepared Head for the post of lieutenant governor of Canada, to which he was appointed in 1835 An unsubstantiated story has it that this appointment was offered to him by mistake, it was intended for his cousin, Sir Edmund Walker Head Sir Francis's reactionary policy in Canada, which announced itself shortly after his arrival, and his alliance with the Family Compact estranged Robert Baldwin and the moderate reformers and drove William Lyon Mackenzie and other radical reformers into open rebellion in 1837. Head quelled this uprising (he had resigned before it broke out but had not been relieved of his post) and left Canada early in 1838, never again to hold public office He wrote a number of books, those dealing with his experiences in Canada are *A Narrative* (1839) and *The Emigrant* (1847).

head, portion of the body of an animal which bears sense organs, a mouth, and usually the entrance to the respiratory tract The lowest forms of animal life have no head Some invertebrates, e g , worms, have a slightly differentiated anterior portion suggestive of a head region, others, e g , insects, have a well-defined head Among vertebrates the head is most highly developed and forms a definite body region In the lower classes of the vertebrates, i e , fish, amphibia, and reptiles, the head is joined directly with the trunk of the body, but in the birds and mammals a third body region, the neck, separates the head and trunk In birds and mammals the skeletal portion of the head is a bony skull, of which the portion called the cranium surrounds and protects the brain

headache, pain in the head which varies in location, duration, and severity It is often caused by eyestrain or disease of the eye (GLAUCOMA), SINUS INFECTION, CONSTIPATION, FEVER, exhaustion, and excessive stimulation by emotion or by drugs In children it may be caused by adenoids Many drugs are commonly used to relieve the pain However, these give only temporary relief, and in the case of nephritis and other diseases headache is a sign of toxemia and is not relieved by headache remedies The use of histamine has been reported as beneficial in the treatment of some headaches See also MIGRAINE

headdress, the head covering or decoration, protective or ceremonial, which has been an important part of COSTUME from primitive ages Its style is governed in general by climate, available materials, religion or superstition, and the stage of development The most primitive form consisted of varied styles of HAIRDRESSING Protective head coverings include the hat, cap, hood, turban, helmet, and veil Ceremonial headdress includes all head coverings and hairdressing that indicate rank, profession, sex, or religion, as well as those worn in ritualistic ceremonies, games, and contests Of such are the feathered war bonnet of the American Indian, the peacock feathers of the Manchu, the academic cap, the nun's coif and veil, the cardinal's hat, the headdress of the Oriental wife, the marriage crowns, and the judge's wig The ritualistic headdress and also the mask are complex in their symbolism See K M Lester and B V Oerke, *Illustrated History of Accessories of Dress* (1940)

head-hunting. Taking the head of a slain enemy occurs sporadically throughout the world, and its persistence from the times of early man to the 20th cent indicates not only the assignment of a trophy value to the head, but also the frequent association of the head with a source of sanctity and power Head-hunting practices are not easily eliminated, the need to acquire status through prowess or spiritual reinforcement is too strong in some societies to be effectively legislated against The South American Jibaro remove the skull and shrink the head through curing

Headland, town (pop 2,052), SE Ala , N of Dothan, in a farm area. It has timber-processing plants A state agricultural experiment station is here

Healdsburg (hēldz'bûrg), city (pop 2,507), W Calif , on the Russian river and N of San Francisco, founded 1852, inc 1874 It is the trade and processing center of a fruit and grape area

Healdton (hēl'tun), oil town (pop. 2,067), S Okla., near Ardmore.

health: see HYGIENE and PUBLIC HEALTH.

health insurance, prepayment plan providing cash indemnities or services for medical care or disability It is effected by compulsory national in-

surance plans, usually tied in with a social-security program, or by voluntary plans, either commercial or nonprofit. Compulsory accident and sickness insurance was initiated (1883–84) in Germany by Bismarck; was adopted by England, France, Chile, the USSR, and other nations after the First World War; and in England was extended by the National Insurance Act (1946), coordinated with the National Health Service Although the responsibility of governments to make available to all people the resources of medical science for the prevention and cure of illness is widely recognized, the fear that government socialization of medicine might entail regimentation deleterious to the progress of medicine and to individual freedom of choice has prevented compulsory legislation in many countries Voluntary health insurance, although valuable in cushioning the financial distress consequent to prolonged illness, not only fails to cover many people but must limit benefits in order to avoid prohibitive rates In the United States it dates from c 1850 and was at first provided chiefly by cooperative mutual benefit and fraternal beneficiary associations Limited coverage by commercial companies was inaugurated at this period, and subsequently many plans were established by industries and by labor unions Since the 1920s emphasis has been on hospitalization and medical care policies, enabling laws have been passed by most states Many plans have been set up by societies of practicing physicians and by group organizations of practicing physicians, but the largest enrollment has been in Blue Cross plans. These are community-sponsored, nonprofit hospital service plans based on contracts with both hospitals and subscribers and approved by the American Hospital Association, which has been active in promoting and coordinating the plans The movement was initiated in the 1930s, by 1947 there were 87 plans (27 of them operating on a state-wide basis) with a total enrollment of over 24,000,000 subscribers Physicians' services are usually covered by separate plans, notably the Blue Shield plans, operated under the auspices of medical societies Most general voluntary plans accept subscribers in groups or as individuals without medical examination and regardless of income, extend coverage to dependents, and exclude accidents and diseases covered by workmen's compensation laws See Franz Goldmann, *Voluntary Medical Care Insurance in the United States* (1948)

Healy, George Peter Alexander, 1813–94, American painter, b Boston He began painting portraits at 18 and, disregarding background, concentrated on producing a good likeness Examples of his art are the portraits of Louis Philippe, François Guizot, and a self-portrait (Uffizi), Daniel Webster and Longfellow (Mus of Fine Arts, Boston), Mrs John C Cruger and a self-portrait (Metropolitan Mus), in Washington, D C, Chief Justice Taney (Capitol) and a series of the Presidents (Corcoran Gall), and Lincoln (Newberry Library, Chicago) His best-known historical compositions are *Webster Replying to Hayne* (Faneuil Hall, Boston) and *Franklin Urging the Claims of the American Colonies before Louis XVI* See his *Reminiscences of a Portrait Painter* (1894)

Healy, Timothy Michael, 1855–1931, Irish statesman, first governor general of the Irish Free State (1922–27) He belonged to a family of Nationalist politicians and members of Parliament and himself served (1880–1918) in the British Parliament He was C S Parnell's secretary until the divorce proceedings began, but with his colleagues left Parnell when Gladstone repudiated him Thereafter Healy became more and more lonely in politics, voting as he pleased, but always in favor of Irish measures He was continually censured for his sharp-tongued remarks and was once imprisoned Although he had nothing to do with Sinn Fein, he resigned to give a Sinn Feiner his seat In the meantime he practiced at the bar, especially in the interests of Irish tenants and suffragettes On the foundation of the Free State he was appointed representative of the crown by George V and showed a remarkable spirit of conciliation and prudence He resigned in 1927 See biography by Liam O'Flaherty (1927).

Heard, Gerald (hûrd), 1889–, English essayist Active in the cooperative movement in Ireland and England from 1912 until 1927, he came to the United States in 1937 His best works are the philosophical essays *Ascent of Humanity* (1929), *The Social Substance of Religion* (1931), and *The Source of Civilization* (1937) His *Dialogue in the Desert* appeared in 1942 He is the author of several successful detective stories, e g, *A Taste for Honey* (1941)

hearing, special sense of the body by which sound is appreciated Vibrations collected by the outer ear pass through the external auditory canal and are registered on the tympanic membrane (eardrum) In the middle ear, the vibrations are transmitted by way of the tiny ear bones, the malleus, incus, and stapes, and are passed through the oval window of the inner ear to the fluid-filled sacs in the cochlea The cochlea of the internal ear, a spiral tube resembling a snail shell, contains the organ of Corti; here specialised cells receive the vibrations conveyed by movements of the fluid in the cochlea, and nerve impulses are generated which reach the cerebrum through the auditory nerve The range of hearing in different individuals and in the ears of the same individual may vary considerably See also DEAFNESS

Hearn, Lafcadio (läfka'dēō hûrn'), 1850–1904, multinational author of works in English, b Leucadio, Ionian Islands, of Irish-Greek parentage He was educated in Ireland, England, and France In 1869 he emigrated to the United States and, handicapped by partial blindness and a morbid sense of inferiority, lived miserably by odd jobs and occasional newspaper work His "Fantastics," a series of weird sketches appearing in a New Orleans paper, first attracted attention for originality and finished style His first published book was *One of Cleopatra's Nights* (1882), a translation of six Gautier stories. This was followed by *Gombo Zhèbes* (1885), a collection of Negro-French proverbs, *Some Chinese Ghosts* (1887), *Chita* (1888), and *Two Years in the French West Indies* (1890) In 1890 he went to Japan, commissioned to write a series of articles for an American publisher There he spent the rest of his life He married a Japanese woman, taught in Japanese universities, and became a Japanese citizen, taking the name Yakumo Koizumi In his later works, which include *Glimpses of Unfamiliar Japan* (1894) and *Japan an Attempt at Interpretation* (1904), he interpreted Japanese thought and life to the Western world See Elizabeth Bisland, *The Life and Letters of Lafcadio Hearn* (1906) and *The Japanese Letters of Lafcadio Hearn* (1910), Setsuoko Koizumi, *Reminiscences of Lafcadio Hearn* (1918), Kazuo Koizumi, *Father and I* (1935), biography by Vera McWilliams (1946), introduction by Malcolm Cowley to *The Selected Writings of Lafcadio Hearn* (ed by Henry Goodman, 1949)

Hearne, Samuel (hûrn), 1745–92, British fur trader, explorer in N Canada He entered the British navy at the age of 11 and saw service in the naval battles of the Seven Years War In 1766 he was engaged by the Hudson's Bay Company, and he was mate of the sloop *Churchill*, serving at and about Fort Prince of Wales (Fort Churchill) until 1768, when he was made mate of the brigantine *Charlotte* In 1769 he was chosen to head a land expedition to the north to investigate Indian reports of a great river and large copper mines His first attempt was thwarted by the infidelity of Indian guides In Feb, 1770, he set out again, discovered Dubawnt Lake, and reached the barren grounds before the breaking of his quadrant caused him to return once more In Dec, 1770, guided by a Chipewyan Indian, he set off on the third and successful expedition, which took him across the barren grounds to the Coppermine river and down to its mouth He came back by Great Slave Lake and arrived at Fort Prince of Wales on June 30, 1772 Although the copper mines proved disappointing, the trip was of great importance In spite of his inaccurate geographical data, Hearne opened an unknown territory, small parts of which have been unexplored since; he gave an accurate and valuable account of the Chipewyan Indians, and he proved that there was no short Northwest Passage In June, 1774, Hearne set out from York Factory and established Cumberland House for the Saskatchewan trade, the first inland post of the Hudson's Bay Company He returned in 1775 and set off immediately again for the west but was recalled to Fort Prince of Wales, where he was put in charge until the French captured the fort in 1782 Hearne, apparently taken to Europe as a prisoner, returned to Canada in 1783, where he remained until 1787 His *Journey from Prince of Wales's Fort on Hudson's Bay to the Northern Ocean* appeared in 1795 See the Champlain Society editions of that work (ed by J B Tyrrell, 1911) and of his later journals (ed by J B Tyrrell, 1934)

Hearne (hûrn), city (pop 3,511), E central Texas, SE of Waco, settled 1868, inc 1871 In the Brazos bottom lands, it has cotton processing, railroad shops, a gravel industry, and much farm trade

Hearst, George (hûrst), 1820–91, American mining magnate, U S Senator (1886–91), b Franklin co, Mo He went to California in 1850 and became a mining prospector and geologist He successfully selected and invested in numerous mining properties, notably the Ophir in Nevada, the Homestake in South Dakota, and the Anaconda in Montana. He bought (1880) the San Francisco *Examiner*, which his son William Randolph Hearst managed after 1887 An unsuccessful Democratic candidate (1885) for U S Senator, George Hearst was later appointed (1886) and then (1888) elected to the Senate His wife, Phoebe Apperson Hearst (1842–1919), became a prominent philanthropist and donated freely to the Univ of California for buildings, expeditions, and facilities For bibliography, see HEARST, WILLIAM RANDOLPH

Hearst, William Randolph, 1863–, American journalist and publisher, b San Francisco, studied at Harvard. He persuaded his father, George Hearst, to place him in charge of the San Francisco *Examiner*, where he conducted profitable journalistic experiments In 1895 he invaded New York with his purchase of the *Morning Journal* and with the aid of some $7,000,000 entrenched himself for a bitter war with other "yellow" journals Hearst provided good news coverage, bought distinctive talent, enticed employees of other papers from their jobs with higher salaries and greater prestige, increased the size of his paper while decreasing its price, and, above all, was luridly sensational By the time he established his superiority, funds were almost exhausted, but he had gained a foothold for the beginning of the great newspaper empire he was eventually to erect He was a member of the House of Representatives (1903–7) but was defeated as candidate for mayor of New York city in 1905 and 1909 and for governor of New York in 1906 His ranch in San Simeon, Calif, is famed for its collection of art, the overflow of which has been gradually disposed of in private sales See biographies by Ferdinand Lundberg (1936) and Oliver Carlson and E S Bates (1936)

Heart, river rising in SW North Dakota, in the low prairie country between the Little Missouri and the Missouri After being joined by the small Green River E of Dickinson, it flows c 180 mi E to the Missouri at Mandan The Heart is included in the MISSOURI RIVER BASIN PROJECT

heart, hollow muscular organ which maintains the circulation of the blood It lies in the thorax between the lungs and beneath the sternum (breast bone) and is enclosed in a membranous sac, the pericardium The shape of the heart is that of an irregular cone, its apex is directed downward and slightly toward the left It consists of four chambers, two auricles and two ventricles, the right and left sides are separated by a septum The blood is received by the auricles and ejected by the ventricles (see CIRCULATION OF THE BLOOD) The heart structure is supplied by the coronary circulation The weight of the heart ranges from 10 to 12 oz in the male and from 8 to 10 oz in the female Normally the heart has a rhythmic beat of about 72 pulsations per minute, this varies with activity and in disease The heart musculature and valves are subject to infection from disease, e g, rheumatic heart disease, endocarditis, and syphilis Arteriosclerosis may result in occlusion of the coronary arteries (see ANGINA PECTORIS) Increased blood pressure may cause enlargement of the heart and weakening of the heart musculature, thus interfering with its normal function In prenatal life, the blood passes directly from the right to the left auricle through an opening, the foramen ovale, which normally closes at birth, when this fails to close, and the defect persists, the individual suffers from a lack of complete oxygenation of the blood, and the skin has a bluish tinge

hearts, card game played by from two to eight players with an ordinary deck. All the cards are dealt to the players When a card is led, each hand must follow suit if possible The object is to avoid taking tricks which contain cards of the heart suit, but a larger premium is given if every heart card is taken In black lady, a popular variation of hearts, the queen of spades is to be equally avoided Other variations include domino hearts, auction hearts, and cancellation hearts See R L Frey, ed, *The New Complete Hoyle* (1947)

heartsease, name for several plants, particularly the PANSY and a VIOLET

heat, a form of ENERGY into which other forms of energy are convertible It is described according to the kinetic molecular theory of MATTER as the kinetic energy of the molecule i e, the energy of motion that the molecule possesses The most important source of heat is the sun, but it is obtained also as a result of many natural phenomena It results commonly, for example, from friction, from many chemical reactions, as in the combustion of fuels, from the compression of substances (because molecules, when forced close together, lose in velocity and give off their excess kinetic energy, i e, heat), from impact, as when a bullet or some other object strikes a surface, and from the passage of an electric current over a high resistance, as in electric toasters, irons, and stoves Heat is measured qualitatively and quantitatively TEMPERATURE is a qualitative measurement, for it indicates the relative "hotness" or "coldness" of a body as compared to a standard, it is determined by the THERMOMETER On the other hand, for indicating a quantity or amount of heat either of two unit measurements is used, the CALORIE or the BRITISH THERMAL UNIT (B T U) When heat is added to a body its temperature rises, but to bring about this increase in relative "hotness" a definite quantity of heat must be added for each degree rise in temperature, the quantity needed depending upon the nature of the substance This amount of heat necessary to raise the temperature of one gram of a substance one degree centigrade is called the specific heat of that substance The specific heat of water, for example, is approximately one calorie When heat is added to a body, the body also undergoes a definite amount of expansion with each degree rise in temperature Change of state of a substance is brought about by the addition or subtraction of heat The amount of heat necessary to change a unit mass of a given substance from the

solid to the liquid state at its melting point is known as its latent heat of fusion, the amount needed to change a unit mass of a substance from the liquid to the gas at its boiling point is called its heat of vaporization (see VAPORIZATION) Both quantities are specific for a given substance The transmission of heat is brought about in any of three ways—CONDUCTION, CONVECTION, or RADIATION Until late in the 18th cent, heat was generally held to be a kind of fluid known as caloric, and explanations of natural phenomena in which heat was involved were made on that basis At that time the work of Count Benjamin T Rumford and Sir Humphrey Davy questioned and refuted this theory and presented the idea that heat was related to motion The relationship between mechanical energy and thermal or heat energy was first determined by Sir James P Joule, who found by experiment how much work was required to raise the temperature of a unit weight of water one degree Fahrenheit This relationship is called the mechanical equivalent of heat The apparatus used by Joule in his well-known experiment consisted essentially of an insulated container for the water, with a paddle wheel set in it Weights attached to the shaft of the paddle wheel caused it to rotate when the weights were allowed to fall This rotation generated heat through friction which in turn raised the temperature of the water Since the work done by the falling weights is the product of the weights and the distance they fall, a comparison is possible between the work done and the amount of heat generated It has been found that approximately 778 foot-pounds of work raise the temperature of one pound of water one degree Fahrenheit Since the amount of heat required to raise the temperature of one pound of water one degree Fahrenheit is defined as one B T U, then approximately 778 foot-pounds of work is equivalent to one B T U Practical application of various physical principles connected with heat are common, as in the HEATING and VENTILATION of buildings and homes, in the COOLING SYSTEM, in REFRIGERATION, and in the operation of the STEAM ENGINE and the INTERNAL-COMBUSTION ENGINE

heath (hēth), level or rolling wasteland with a growth of characteristic dry-land shrubs In Great Britain its characteristic shrub is the HEATHER, called also **heath** The conversion of heath land into agricultural land has been often attempted, sometimes with success, as notably in Denmark Typically the problem is financial, the expense often makes the process unprofitable

Heathcote, Caleb (hēth'kŭt, hĕth'-), 1666–1721, merchant and public official in colonial New York, b Derbyshire, England He arrived in New York in 1692 He became a member of the governor's council and, in Westchester co, a colonel of militia, presiding judge in the courts of sessions, prerogatives, and common pleas, and after 1690 mayor of Westchester borough town All these positions he retained throughout his life Later he held the offices of mayor of New York city (1711–13) and surveyor general of customs for all northern colonies He engaged in contracting, milling, and land speculation in large tracts in Westchester, Dutchess, and Ulster counties In 1701 he received the manor of Scarsdale (Westchester co), the last to be granted in the British colonies His enthusiasm for the Anglican Church led him to take five missionary journeys into Connecticut, and both there and in Westchester he established new congregations See D R FOX, *Caleb Heathcote, Gentleman Colonist* (1926)

heather, name for an evergreen shrub (*Calluna vulgaris*) of the Old World, often applied also to species of the closely related genus *Erica*, more properly distinguished as heath, but heath and heather are often used interchangeably. The true or common **heather**—the heather of Scotland—sometimes called ling, is a rosy- or white-flowered species represented in cultivation by red- and purple-flowered forms also, the flowers are long lasting It has short, scalelike, overlapping leaves and numerous branches that have been used for brooms Heather is found in E North America—supposedly introduced. Of the **heaths**, or *Erica*, there are a large number of species. These, like heather, are Old World evergreen shrubs but have spreading, needlelike leaves and white, rose, or yellow flowers, they are often cultivated by florists Other plants, particularly of the same family, are sometimes called heath See also BRIER

Heathfield, 1st Baron: see ELIOTT, GEORGE AUGUSTUS, 1st Baron HEATHFIELD OF GIBRALTAR

heating. With the development of the human habitation, methods of heating progressed from the open fire to the fireplace with a chimney, the STOVE, and finally to the modern hot-air, hot-water, and steam-heating systems In designing the heating equipment of a building, attention must be given to its VENTILATION. When a building is simply heated and no change of air takes place, the atmosphere becomes vitiated and unhealthful. The open grate, still extensively used as a main source of heat in the parts of Europe where winters are not severe and in the S United States, maintains circulation by drawing the air from the room up the chimney, fresh air coming in through the various openings It is, however, very inefficient, for about 80 percent of the heat generated passes up the chimney Also, a separate unit is required for every room heated, and the fires require much attention While the stove is more efficient than the open grate, it does not create a natural ventilation, is likely to overheat the room and cause the air to be very dry, and allows injurious gases to escape Heating by a hot-air system has many advantages over the old methods The firebox has an enclosing sheet-metal casing used as an air chamber, from which pipes are led to various parts of the house The heating unit is in the basement, the air, heated in the casing, rises through the pipes and enters the rooms through outlets, or registers, placed near the floor and fitted with an arrangement for shutting off the supply of hot air Fresh air may be admitted to the casing by an inlet from outdoors, and, by placing a water chamber in or near the heated air, the humidity may be controlled to a certain degree The hot-water system has a boiler for heating the water, which is circulated by connecting pipes through radiators placed in the various rooms The circulation is dependent on the fact that, like hot air, hot water will rise, while the cooled water returns to the boiler In the steam-heating system, steam generated in a boiler is circulated by its own pressure through radiators There are in general two systems, the single-pipe system and the vacuum system The single-pipe system has a large main located in the basement, from which pipes are led to the radiators, the condensate running back through the same pipe The air in the system is forced out by the steam through valves placed on the radiators These valves automatically close as soon as the steam reaches them The vacuum system, used in large buildings, has a pipe leading to each radiator and also a return pipe Attached to the return pipe is a pump which creates a partial vacuum, thereby improving circulation In many large buildings, such as theaters, public libraries, and municipal buildings, heating and ventilation are combined in one system, the fresh air being drawn in from the outside atmosphere by fans and passed over a series of steam coils until it is heated It then passes on through the ducts to the various parts of the building This system is also used for heating ships Experiments are being made in utilizing solar energy for heating buildings See A M Daniels, *Fundamentals of Heating* (1930), J R Allen and others, *Heating and Air Conditioning* (6th ed, 1946), R W Shoemaker, *Radiant Heating* (1948)

heat stroke: see SUNSTROKE

heaven, in Christian theology, the state of bliss in which God is seen face to face This is called the Beatific Vision The souls of the good abide in heaven forever, and the glorified bodies shall be united in heaven to the souls after the general RESURRECTION on JUDGMENT DAY The Roman Catholic Church teaches that before entering heaven many souls must pass through PURGATORY to be made ready The Orthodox churches hold a doctrine somewhat similar, but not so definite In the popular mind and in literature heaven is often represented as full of material delights Much of the conventional imagery—e g, golden streets—is based on Revelation Poetical names for heaven are Paradise, Holy City, and New Jerusalem ISLAM is commonly accused of teaching that heaven is full of delights of the flesh, but there is good ground for supposing that the passages of the Koran telling the delights of heaven are allegorical Outside Christianity and Islam, the ideas of the otherworld do not usually include eternal bliss open to all the virtuous See ELYSIAN FIELDS, FORTUNATE ISLES, VALHALLA, ZOROASTER

Heavener (hĕv'nûr), railroad city (pop 2,215), E Okla, near the Ouachita Mts, in a farm and coal area, founded c 1896 A fish hatchery and an agricultural experiment station are near by

heaves (hēvz), disease affecting the respiration of horses There is permanent dilatation of the air sacs of the lungs of the horse, leading to loss of elasticity of the lungs. A chronic cough, wheezing, and difficulty in exhaling are characteristic In severe cases the nostrils are dilated Its cause is not definitely known Indigestion usually accompanies it, and improper feeding, leading to overdistention, makes the condition worse Once developed, it can be relieved only by limiting roughage in diet, by feeding only clean hay, and by rest after feeding

Heaviside, Oliver (hĕ'vēsĭd), 1850–1925, English physicist He did valuable work in telephony and early in the 20th cent developed his theory that a conducting layer exists in the upper atmosphere. The same conclusion was reached by Arthur E Kennelly, its existence was proven, and it is known both as the Kennelly-Heaviside layer and as the Heaviside layer. It is a stratum of ionized gas which conducts, reflects, and refracts radio waves. Its effect varies with the length and frequency of the radio waves, some seem to pass through the layer into space, while others are conducted long distances and are reflected back to earth

heavy hydrogen: see HYDROGEN

heavy spar: see BARITE

heavy water see WATER.

Hebbel, Christian Friedrich (krĭs'tyän frē'drĭkh hĕ'bûl), 1813–63, German dramatic poet, considered the most powerful tragic dramatist of the Germany of his period Humbly born, he was largely self-educated. Hegel's historical theories influenced his work, which links the last of romanticism with the new realism His first play, *Judith* (1839), was followed by *Maria Magdalena* (1844, Eng tr, 1913–15), *Herod and Mariamne* (1850, Eng tr, 1912), *Agnes Bernauer* (1852, Eng tr, 1909), *Gyges and His Ring* (1853, Eng tr, 1914), and the trilogy *The Nibelungs* (1855–60, Eng tr, 1903) He also wrote three volumes of poems (1842, 1848, 1857) and interesting early diaries (1885–87) See Edna Purdie, *Friedrich Hebbel* (1932)

Hebbronville, unincorporated town (pop c 2,500), co seat of Jim Hogg co., S Texas, E of Laredo. The semiarid plains have oil fields and ranches

Hebburn, urban district (1931 pop 24,123; 1943 estimated pop, 22,700), Durham, England, on the Tyne below Newcastle It has shipbuilding and engineering works and electrical industries

Hebe (hē'bē), in Greek mythology, goddess of youth, daughter of Zeus and Hera She was the cupbearer of the Olympian gods and the personal attendant of Hera Later tradition invested her with the power to make old people young again, and it is said that she rejuvenated Hercules after his ascent to Olympus According to one legend she resigned her office when she married Hercules, but according to another she was dismissed in consequence of an injury Hebe is sometimes considered one of the OLYMPIAN gods The Romans called her Juventas, and there were several temples to her at Rome

Heber (hē'bûr) **1** Eponym of the Hebrews Luke 3 35 Eber Gen 10 21 **2** Kenite, husband of Jael Judges 4 11,17, 5 24 **3, 4** Benjamites 1 Chron 8 17,22 **5** Gadite 1 Chron 5 13 **6** Judahite 1 Chron 4 18 **7** Asherite Gen 46 17, Num 26 45, 1 Chron 7 31,32 **8** Priest Neh 12 20

Heber, Reginald, 1783–1826, English clergyman and hymn writer He became bishop of Calcutta in 1823 Several volumes of his poems and of his sermons were published, but he is best known as the author of the familiar hymns *The Son of God Goes Forth to War, Holy, Holy, Holy,* and *From Greenland's Icy Mountains* He also wrote *Narrative of a Journey through India* (1828) and edited the works of Jeremy Taylor See *The Poetical Works of Reginald Heber* (1841), biography by his wife, Amelia Heber (1830)

Heber (hē'bûr), city (pop 2,748, alt 5,595 ft), co seat of Wasatch co, N central Utah, SE of Salt Lake City, settled 1859 by Mormons It is a trade center of a ranching area "Hot pots" (hot-water pools of extinct geysers) are near by

Heber Springs, resort town (pop 1,656), co seat of Cleburne co, N central Ark, in a mineral-spring area of the Ozark Mts, laid out 1881

Hébert, Jacques René (zhäk' rənā' ābĕr'), 1757–94, French Revolutionary journalist He won the support of the working classes through his virulent paper *Père Duchesne* and was prominent in the CORDELIERS He became then intellectual leader after Marat's death Hébert was largely responsible for the tightening of the maximum price laws in the REIGN OF TERROR and for the Law of Suspects Violently atheistic, he and CHAUMETTE were the founders of the extreme cult of the worship of Reason Hébert's power over the Paris commune threatened the position of Robespierre An alleged attempt of the Hébertists to seize power served as pretext for their suppression, and Hébert was guillotined The defeat of Hébertism signified the victory of the propertied middle classes over the extremist left

Hébert, Louis (lwē' ābĕr'), d 1027, French pioneer, known as the first Canadian farmer A Paris apothecary, he spent 10 years (1604–14) in Acadia, and at Port Royal (now Annapolis Royal, N S) he made some attempts to farm Soon after his return to France, Hébert, at the urging of his friend Champlain, again set forth for Canada With his family he settled at Quebec in 1617, the first permanent settler and farmer in Canada. In 1623 he received a grant of land on the site of what is now Upper Town, Quebec.

Hébert, Louis Philippe (lwē' fēlēp' ābĕr'), 1850–1917, Canadian sculptor Elected to the Canadian Academy in 1883, he was the most noted sculptor and monument designer of his time in Canada His works include patriotic statues of Queen Victoria, Sir Georges Cartier, and Sir John Macdonald (Ottawa), Laval (Quebec), and King Edward and Maisonneuve (Montreal). After his death, the *Evangeline* statue for Grand Pré, N S, was executed from his design by his son, Henri Hébert, also a sculptor

Hébertville (ā"bâr'vĭl), village (pop 1,025), S Que., SE of Lake St John and W of Arvida, in a lumbering and dairy-farming region.

Hebrew language, Semitic language of the Canaanite group See LANGUAGE (table).

Hebrew literature. The great monument of the earliest period of Hebrew literature is the OLD TESTAMENT, and the APOCRYPHA was also produced before the conquest of Judaea by Titus The literature of the Jews developed mainly in the Hebrew language, although there were also works in Greek, Aramaic, and Arabic In the 2d cent. began the Talmudic period, which lasted well into the 6th cent ; in these centuries the great anonymous encyclopedic work of religious and civil law, the TALMUD, was compiled, edited, and interpreted The MIDRASH—a collection of HALAKAH (found also in the Talmud) and haggadic material—likewise forms part of the Hebrew literature of that period In the 4th cent the TARGUM to the Pentateuch and to the Prophets was finished The 6th and 7th cent saw the development of the MASORA in Palestine In Babylonia meanwhile many valuable additions to Hebrew literature were made by the Geonim (see SCRIBE) after the 6th cent Commentaries on the Talmud and haggadic material continued to be written until the 11th cent , when the Babylonian academies were suppressed and the center of Jewish literary activity shifted to Spain There, and to some extent in Italy, Hebrew literature flourished for centuries The chief language used was Arabic, the finest work was accomplished in the realm of poetry—which was influenced by Arabian and Indian literature—and philosophy Philology, exegesis, and codification also flourished Literature on philosophy and ethics was subsequently eclipsed by writings on MYSTICISM (see CABALA), and by the 14th cent the great cabalistic work, the *Zohar*, appeared Famous scholars and authors of Hebrew literature in the Middle Ages were AHA OF SHABCHA, SAADIA BEN JOSEPH AL-FAYUMI, DUNASH BEN TAMIM, DUNASH BEN LABRAT, GERSCHOM BEN JUDAH, AL-FASI, Solomon ben Judah IBN GABIROL, RASHI, JUDAH HA-LEVI, Abraham ben Meir IBN EZRA, MAIMONIDES, IMMANUEL BEN SOLOMON, ISAAC ABRAVANEL, and Joseph ben Ephraim CARO In the persecutions following the Crusades, when the Jews were driven from country to country, they clung to their literature—which leaned increasingly to mysticism and asceticism —and especially to the Old Testament On the threshold of the transition from the old isolated life was the poet Moses Hayyim LUZZATTO—a contemporary of the Gaon of Vilna, ELIJAH BEN SOLOMON - but the modern period of Hebrew literature really began with Moses MENDELSSOHN While Nachman Kohen KROCHMAL and Solomon Judah Rapoport were contributing to biblical criticism and historical scholarship, writers such as Peretz (Peter) Smolenskin were devoting themselves to Haskalah, or literature of enlightenment, intended to shake the Jews of Central Europe from their medieval attitudes Other important names of the more recent period are the scholar Joseph HALÉVY, the poet Leon GORDON, the novelist Solomon Yakob Abramovich, whose pseudonym was MENDELE MOCHER SEFORIM, and the poet and journalist Hayyim Nahman BIALIK The rise of ZIONISM particularly reflected in the writings of Asher Ginzberg (Ahad Ha'am), gave Hebrew literature fresh impetus, and Palestine became again the center of publication in Hebrew Hebrew was proclaimed the national language of the Jews, and after the establishment (1948) of the state of Israel, greater opportunities were given to Hebrew writers and scholars Outside of Israel, the writing of the Jews is ordinarily in the language of the countries in which they live or in YIDDISH, the literary use of which developed rapidly after the middle of the 19th cent See Nahum Slouschz ben David, *The Renascence of Hebrew Literature, 1743–1885* (1909), H T Fowler, *The History of the Literature of Ancient Israel from the Earliest Times to 135 B C* (1912), R H Charles, ed , *Apocrypha and Pseudepigrapha of the Old Testament in English* (1913), A S Waldstein, *The Evolution of Modern Hebrew Literature, 1850–1912* (1910), Meyer Waxman, *The History of Jewish Literature from the Close of the Bible to Our Own Days* (3 vols , 1930–36), Lewis Browne, ed , *The Wisdom of Israel* (1945)

Hebrew music see JEWISH MUSIC

Hebrews. For history, see JEWS, for religion, see JUDAISM.

Hebrews, epistle of the New Testament, the 19th book in the usual order It was traditionally ascribed to St Paul, but few critics accept his authorship It was written before A D 90 The epistle is a treatise on the superiority of the new religion over the old (Judaism) The first part (1.1–4.13) is an argument that the mediator of the New Covenant, Christ, is superior to the angels (1–2) and to Moses (3 1–6), the mediator of the Old, it closes with an exhortation to faith in the form of a commentary on Ps. 95 7–11 (3 7–4 13) The second part (4 14–10 18) treats the priesthood of Jesus Christ (the order of Melchisedek), which replaces the priesthood of the Jews (the order of Aaron), it ends with the sacrifice by Christ of Himself as taking away sin (9–10 18) The doctrine is followed by an exhortation (10 19–12 13) to perseverance in the faith, including a famous chapter (11) on faith in Old Testament lives. The teaching of Hebrews is very significant in the history of theology

Hebrews, Gospel according to the: see PSEUDEPIGRAPHA

Hebrew University, at Jerusalem First proposed in 1882, it was formally opened in 1925. The institutes of chemistry, microbiology, and Jewish studies had opened in 1924 The faculty of humanities was established in 1928; of biological sciences, 1931, of science, 1935 The pre-faculty of medicine for postgraduate study was established in 1936, and the Hebrew Univ–Hadassah Medical School opened 1949 In 1940, in connection with the agricultural research station at Rehoboth, the school of agriculture was opened In 1950 the Weizmann Institute of Science was merged with the university, Albert Einstein was elected president of the American joint board of directors Serge Koussevitzky gave (1950) to the university his library of music

Hebrides (hĕ'brĭdēz) or **Western Islands,** group of more than 500 islands, off W and NW Scotland, in Ross and Cromarty co , Inverness-shire, and Argyllshire Less than a fifth are inhabited The Outer Hebrides (sometimes also referred to as the Long Island) are separated from the mainland and from the Inner Hebrides by the straits of Minch and Little Minch and the Sea of the Hebrides and extend for 130 mi from the Butt of Lewis on LEWIS WITH HARRIS to Barra Head island Other islands are North Uist, Benbecula, South Uist, BARRA, the FLANNAN ISLANDS (Seven Hunters), and SAINT KILDA The Inner Hebrides include the islands of SKYE, RAASAY, Rum, EIGG, COLL, Tyree, Ulva, STAFFA, IONA, MULL, SCARBA, COLONSAY, ORONSAY, JURA, and ISLAY Fishing, farming, sheep grazing, manufacturing of tweeds and other woolens, quarrying (slate), and catering to tourists are the chief means of livelihood The original Celtic inhabitants were conquered by the Norwegians, who held the Southern Islands, as they called them, until 1266 From that time until 1346 various native Scottish chiefs ruled, and then the Macdonalds established themselves as lords of the isles From the 15th the Hebrides belonged to the crown of Scotland The tales of Sir Walter Scott and of William Black did much to make the islands famous The climate is mild and humid, the scenery is beautiful—rock, moor, lake, forest, bog, mountain, and valley There are interesting prehistoric and ancient historical remains and geological structures Much emigration of the inhabitants has taken place from the overpopulated islands, especially to Canada in the 20th cent See James Boswell, *The Journal of a Tour to the Hebrides with Samuel Johnson* (1785), A A MacGregor, *The Haunted Isles* (1933)

Hebron (hĕ'brun) **1** Kohathite Levite Ex 6 18, Num 3 19, 1 Chron 6 2,18, 23 12 **2** Judahite 1 Chron 2 42,43

Hebron, city (1944 estimated pop 24,560), S Palestine, c 20 mi SW of Jerusalem Its modern Arabic name is El-Khalil (ĕlkhälēl') [Arabic, = friend (of God), i e , Abraham] The city antedates the biblical record, which first mentions its connection with Abraham Here Abraham established the family tomb David lived at Hebron, and Absalom began his revolt here As an important city it has figured in every Palestinian war, Maccabean, Roman, and Crusaders' Hebron was very early named Kirjath-arba [Heb ,=city of ARBA], and Mamre (mām'rē) [Heb ,=fat] was another name for the city or part of it There was always a considerable Jewish population In 1929 one of the worst of the Arab attacks on Jews took place here The city is a shrine of Moslems and Jews Gen 13 18, 14 24, 23, 35 27, Num 13 22, Joshua 10 36, 14 13, 15 13, 54, 20 7, 21 11,13, Judges 1 10, 2 Sam 2; 3, 5, 15 7, 2 Chron 11 10, Neh 11 25 For a different Hebron, see ADDON **5**

Hebron. 1 City (pop 1,909), co seat of Thayer co , SE Nebr , on the Little Blue and SW of Lincoln, founded 1869 **2** City (pop 1,267), SW N Dak , W of Bismarck, inc 1916 Bricks are manufactured from near-by clay deposits A state university mining experiment station is here

Hecataeus (hĕk"ətē'us), fl 500 B C , Greek traveler of Miletus His genealogies and descriptions of the known earth were considered predecessors of Herodotus' work. He took part in the Ionian rebellion against Persia

Hecate (hĕ'kətē, hĕ'kāt), in Greek mythology, mysterious moon-goddess, daughter of the TITAN Coeus After taking an active part in the search for PERSEPHONE, Hecate was Persephone's attendant in the underworld, where she had the power to conjure up phantoms, dreams, and the spirits of the dead; in this aspect she was the goddess of ghosts presiding over witchcraft and sorcery In the upper world, she haunted graveyards and crossroads Although she carried a torch and brandished a sword and was a giantess, she was invisible to all eyes except those of the dog, who howled to announce her presence. The Athenians sacrificed dogs and black female lambs to her Hecate was often thought of as amalgamated with other moon-goddesses such as ARTEMIS and SELENE, and as a result she is represented in Greek art with three heads or three bodies as in the statue of Hecate by Alcamenes

Hecht, Selig (hĕkt), 1892–1947, American biophysicist, b Austria He was brought to the United States in 1898 and was graduated from the College of the City of New York (B S , 1913) and from Harvard (Ph D , 1917) After organizing the laboratory of biophysics at Columbia Univ , he was professor of biophysics there from 1928 He pioneered in applying physiochemical principles to sensory physiology and is known for his determination of minimal quantal requirements at the threshold of vision and for his successful laboratory regeneration of visual purple An advocate of popular scientific education, he wrote *Explaining the Atom* (1947)

Hecker, Friedrich Franz Karl (frē'drĭkh fränts' karl' hĕ'kur), 1811–81, German revolutionist He was the spokesman of the radical republicans at the Preliminary Parliament of Frankfurt (1848) and a leader in the unsuccessful Baden uprising of 1848 Forced into exile, he settled permanently in the United States and became a leader of the German-Americans of Illinois A Republican, he supported Lincoln and fought in the Civil War He took part in the Liberal Republican movement of 1872

Hecker, Isaac Thomas, 1819–88, American Roman Catholic priest, founder of the Paulist Fathers, son of Prussian immigrants Feeling the general discontent of his day in the dying Puritanism of New England, he associated with the transcendentalists, stayed for a short time at Brook Farm, and was a friend of Thoreau, Emerson, Bronson Alcott, and Orestes Brownson Still dissatisfied, he entered (1844) the Catholic Church, joined the Redemptorist order, and was ordained priest (1849) He returned from abroad (1851) and worked with immigrant Catholics in the United States He was a successful missionary, but his intense zeal, doubts of his own worthiness, ill-health, and his fixed purpose caused a somewhat stormy career Difficulties with his order caused him to be expelled, but the pope dispensed him and his colleagues of their vows and allowed them in 1858 to found the Missionary Priests of St Paul the Apostle (the Paulist Fathers)—an order that achieved prominence in the United States Father Hecker, who was the superior until his death, founded the Paulist organ, the *Catholic World* Though ideas allegedly based on those of Hecker were later condemned as the heresy of "Americanism," neither Father Hecker nor any other American priest was ever charged with holding them See biography by Walter Elliott (1891), V F Holden, *The Early Years of Isaac Thomas Hecker* (1939), Katherine Burton, *Celestial Homespun* (1943, semifictional)

Heckewelder, John Gottlieb Ernestus (hĕ'kuvĭldur), 1743–1823, Moravian missionary in America, b Bedford, England Coming (1754) to Bethlehem, Pa , with his parents, he later was indentured to a cedar cooper, while acting occasionally as a messenger to the Indians on the Susquehanna By 1771 he was an accredited missionary and assistant to David ZEISBERGER After years with the Pennsylvania Indians who had been removed to Ohio, he retired to Bethlehem, Pa in 1786, but he aided the U S government on several occasions with Indian treaties In 1801 he managed the Indian lands at Gnadenhutten, and he supervised the removal of the Indians to Canada He spent his last years writing numerous accounts of Indian life, notably his *Account of the History, Manners, and Customs of the Indian Nations, Who Once Inhabited Pennsylvania* (1819)

Hector, in the *Iliad*, leader of the Trojan forces in the TROJAN WAR, greatest of the Trojan heroes He was famous for courage in battle and devotion to his people He was the eldest son of Priam and Hecuba, the brother of Paris, the husband of Andromache, and the father of Astyanax He was killed by ACHILLES in revenge for the death of PATROCLUS In later times Hector was worshiped in Boeotia and the Troad Hector is a prominent character in Shakspere's *Troilus and Cressida*

Hector, village (pop 1,044), S central Minn , E of Olivia, in a farming region.

Hecuba (hĕ'kyōbə), in Greek legend, queen of Troy, wife of PRIAM The most famous of her many children were Hector, Cassandra, Paris, Troilus, Polyxena, Helenus, and Deiphobus After the Trojan War she was taken as a slave by Odysseus She left the last of her children, Polydorus, in the care of King Polymnestor of Thrace, who murdered the child Hecuba, in revenge, blinded the king and killed his children She is a prominent character in two plays by Euripides

Heda, Willem Claasz (vĭl'ĭm kläs' hä'dä), 1594–c 1678, Dutch still-life painter His excellent studies of tempting viands are seen in many important European galleries

Hedge, Frederic Henry, 1805–90, American Unitarian clergyman and author, b Cambridge, Mass educated in Germany and at Harvard He held several New England pastorates In 1836 he joined R W Emerson and others in forming the group of transcendentalists sometimes called the "Hedge Club" because it often met when Hedge came to Boston from Maine. His edition of *Prose Writers*

of Germany (1848) established him as a German scholar He wrote for periodicals, edited (1857–61) the *Christian Examiner*, and wrote *Reason in Religion* (1865) and many other books He was professor of ecclesiastical history in the Harvard Divinity School (1857–76) and professor of German in Harvard (1872–81) See biography by O. W. Long (1940)

hedge [Indo-Eur.], ornamental or protective barrier composed of shrubs or small trees growing in close rows The plants may be allowed to grow naturally or they may be trimmed to various heights and forms In the formal gardens of other days, hedges were often pruned to resemble statuary Some of the popular hedge plants are box, privet, barberry, buckthorn, hawthorn, lilac, Osage orange, Japanese yew, Carolina and Canadian hemlock, and dwarf burning bush See Donald Wyman, *Hedges, Windbreaks, and Screens* (1938)

hedgehog, insectivorous, nocturnal, hibernating Old World animal related to the shrew and the mole It has spines among its hairs and can roll itself up into a ball like the American porcupine which is incorrectly called hedgehog

Hedin, Sven Anders (svĕn' än'dûrs hēdēn'), 1865–, Swedish explorer in central Asia Following soon after Przhevalsky, Hedin explored the Kunlun and Trans-Himalaya ranges and discovered the sources of the Brahmaputra and the Indus rivers, his account was published in *Scientific Results of a Journey in Central Asia, 1899–1902* (8 vols, 1904–8) and in *Transhimalaya* (3 vols, 1909–12) His explorations in Tibet were reported in *Southern Tibet* (12 vols, 1917–22). Hedin also wrote popular accounts of his travels, including *Across the Gobi Desert* (1931), *Jehol, City of Emperors* (1931); *The Conquest of Tibet* (1934), and a trilogy, *The Flight of the Big Horse* (1936), *The Silk Road* (1938), and *The Wandering Lake* (1940), dealing with a journey into Sinkiang prov, China. Hedin, who in the First World War publicly expressed support for Germany, in 1940 accepted an offer by Hitler to head a committee for the care of refugees. See his *My Life as an Explorer* (1925)

Hedjaz: see HEJAZ

Hedmark (hĕd'märk), county (10,586 sq mi.; pop. 157,256), SE Norway, bordering on Sweden in the east Hamar is the county seat Hedmark is the chief forest area of Norway. Lumbering is the main industry, especially along the upper valley of the Glomma river

hedonism (hē'dŭnĭzm, hĕ'–) [from Gr, =pleasure], the doctrine that pleasure is the highest good Ancient hedonism expressed itself in two ways. the cruder form was that proposed by ARISTIPPUS and the early CYRENAICS, who believed that pleasure was achieved by the complete gratification of all one's sensual desires, on the other hand, Democritus and EPICURUS, though accepting the primacy of pleasure, taught that it could best be attained through the rational control of one's desires The eudaemonism of ARISTOTLE is not properly hedonistic, as he emphasizes the superiority of happiness over pleasure, he saw the latter as a transient state, the former the result of inner harmony While ancient hedonism was egoistic, the modern hedonism of the British philosophers is universalistic in that it is conceived in a social sense—"the greatest happiness for the greatest number" (the term *happiness* is closer to the Aristotelian term *pleasure*) Its modern expression is in UTILITARIANISM. Among its foremost exponents are Herbert Spencer and Leslie Stephen and their predecessors, David Hume, Jeremy Bentham, J S. Mill, Henry Sidgwick, and Sir William Hamilton

Hedrick, Ulysses Prentiss (hĕ'drĭk), 1870–, American horticulturist, b Independence, Iowa, grad. Michigan Agricultural College (B S, 1893, M S, 1895) He taught botany and horticulture at several colleges and served with the state agricultural experiment station of New York as horticulturist (1905–30) and as director (1928–37) His many works on cultivation of fruits include *Grapes of New York* (1908), *Cyclopedia of Hardy Fruits* (1922; 2d ed., 1938), *Pears of New York* (with others, 1922), *Small Fruits of New York* (with others, 1923), and *Systematic Pomology* (1925). He also wrote *History of Agriculture in the State of New York* (1933), *The Land of the Crooked Tree* (1948), and *History of Horticulture in America to 1860* (1950).

Hedwig, Johann (yō'hän hät'vĭkh), 1730–99, German botanist, b Transylvania. He was an authority on the lower plants, especially mosses, and was professor at the Univ. of Leipzig from 1786. The moss *Hedwigia* is named for him.

Heem, Jan Davidszoon de (yän' dä'vĕtsōn dŭ hām'), 1606–c 1683, Dutch painter of fruit and flower pieces, one of the most celebrated still-life painters of Holland He studied with his father, David de Heem, also a still-life painter His paintings, about 100 in number, are found in leading European galleries The Metropolitan Museum possesses three excellent specimens. His son and pupil, **Cornelis de Heem** (kôr'nā'lĭs), c 1631–1695, painted flower pieces in the manner of his father and with considerable skill, but without his father's genius

Heemskerck, Maarten van (mär'tŭn vän hāms'kĕrk), 1498–1574, Dutch painter. His family name was Van Veen He studied in Haarlem under Scorel and in Rome His Italianate paintings (showing the influence of Michelangelo) won him a high reputation in Haarlem, where he was made dean of the painters' guild in 1540 and where much of his best work remains His *St Luke Painting the Portrait of the Virgin* is characteristic The Metropolitan Museum has his portrait of his father.

Heerlen (hār'lŭn), municipality (pop 56,335), Limburg prov., SE Netherlands, ENE of Maastricht. It is a coal-mining center and has textile, stoneware, cement, and other manufactures.

Heflin, James Thomas, 1869–, U S. Senator from Alabama (1920–31), b Randolph co., Ala. Educated at Southern Univ. and at the present Alabama Polytechnic Institute, he was admitted to the bar in 1893 Heflin practiced law in Lafayette, Ala, where he was mayor (1893–94) He served in the state house of representatives (1896–98) and in the U S House of Representatives (1904–20) before entering the Senate Known at first as "Cotton Tom" because of his championing of the Southern farmer, Heflin later became a violently anti-Catholic crusader and supporter of "white supremacy," famous for his theatrical oratory and distinctive dress His opposition to Al Smith in 1928 promoted Heflin's defeat for reelection in 1930, and in subsequent elections he was unsuccessful in regaining office See A A Michie and Frank Ryhlick, *Dixie Demagogues* (1939).

Heflin, lumber town (pop 1,684), co seat of Cleburne co, NE Ala, near the Tallapoosa river and the Ga boundary and E of Anniston; settled 1883, inc 1892

Hegai (hĕ'gāī) or **Hege** (hĕ'gē), chamberlain of Ahasuerus. Esther 2 3,8,15.

hegari: see SORGHUM

Hege, same as HEGAI.

Hegel, Georg Wilhelm Friedrich (gā'ôrk vĭl'hĕlm frē'drĭkh hā'gŭl), 1770–1831, German philosopher, b. Stuttgart, son of a government clerk Educated in theology at Tübingen, he acted as a private tutor at Bern and Frankfurt In 1801 he became *Privatdocent* and in 1805 professor at the Univ of Jena While considered a follower of Schelling, he was developing his own system, which he first presented in *Phenomenology of Mind* (1807) During the Napoleonic occupation Hegel edited (1807–8) a newspaper, which he left to become rector (1808–16) of a *Gymnasium* at Nuremberg He then returned to professorships at Heidelberg (1816–18) and Berlin (1818–31), where he became famous. In his lectures at Berlin he set forth the system elaborated in his books. Chief among these were *Science of Logic* (1812–16), *Encyclopedia of the Philosophical Sciences* (1817), an outline of his whole philosophy, and *Philosophy of Right* (1821). He also wrote books on ethics, aesthetics, history, and religion His interests were wide, and all were incorporated into his unified philosophy His absolute idealism envisaged a world-soul that develops out of, and is known through, the dialectical logic In this dialectic, one concept (thesis) inevitably generates its opposite (antithesis), and the interaction of these leads to a new concept (synthesis) This in turn continues the dialectic in a new triad Hegel thought that Kant's categories did not go far enough Thus, the idea of being is basic, but it evokes its antithesis, not being, and the two are not mutually exclusive for they necessarily produce the synthesis, becoming The study of nature and mind reveal reason as it realizes itself in cosmology and history. The world process is the absolute, the active principle which does not transcend reality but exists through and in it The universe develops by a self-creating plan, proceeding from astral bodies to the world, from the mineral kingdom to the vegetable, from the vegetable kingdom to the animal In society the same progress can be discovered, man's activities lead to property, which leads to law Out of the relationship between the individual and law develops the synthesis of ethics, where both the interdependence and the freedom of individuals interact to produce the state. The state thus is a totality above all individuals, and since it is a unit, its highest development is rule by monarchy Such a state is an embodiment of the absolute idea. In his study of history, Hegel reviews the story of states which hold sway over lesser peoples until a higher representative of the absolute evolves Though much of his development was questionable, the concept of the conflict of cultures stimulated historical analysis Hegel considered art as a closer approach to the absolute than government In the history of art he distinguishes three periods—the Oriental, the Greek, and the romantic. He found that the modern romantic form of art cannot encompass the magnitude of the Christian ideal Religion thus is close to art as it is to all development Hegel taught that religion moved from worship of nature through a series of stages to Christianity, where Christ represents the union of God and man, of spirit and matter Philosophy goes beyond religion, for it enables man to comprehend the absolute. The whole system presents nearly insurmountable difficulties of comprehension, and any short restatement is bound to be incomplete and misleading. Hegel has stimulated many subsequent philosophies, some of which have been distortions Thus, the Hegelian theory of the state was the guiding force of the Young Hegelians, who sought the unification of Germany Hegelian dialectic appealed strongly to the socialists, especially Lassalle and Karl Marx, and the Marxian dialectic continued in the doctrines of Lenin and his followers After Hegel's death his philosophies of history, aesthetics, and religion were collated from lecture notes and published. See Sidney Hook, *From Hegel to Marx* (1936), Israel Knox, *The Aesthetic Theories of Kant, Hegel, and Schopenhauer* (1936), G R C Mure, *An Introduction to Hegel* (1940), Herbert Marcuse, *Hegel and the Rise of Modern Social Theory* (1941)

hegemony (hĭjĕ'mŭnē, hē–, hĕ'jumō"nē, hĕ'gu–) [Gr, =leadership], dominance, especially of one Greek city-state over others The free Greek city-states produced the best soldiers in the world, but the governments so weakened themselves by wars over hegemony that they fell prey to Macedon and later to Rome When the city-states lost their independence, they lost their cultural leadership of the world and their significance in history The greatest of the wars over hegemony was the Peloponnesian War, between Athens and Sparta, each strengthened by allies The subjugation of all GREECE by Macedon resulted

hegira or **hejira** (hĕj'ĭru, a more etymological pronunciation would be hĕ'jĭru) [Arabic *hijra*=departure], the flight of the prophet MOHAMMED from Mecca, June, 622 He fled to escape his enemies in his native city and went to Yathrib, where he became ruler, Yathrib changed its name to MEDINA The Mohammedan era is dated from the hegira (really from July 16, 622, the beginning of the year), because the Prophet had no opportunity to lay the foundation of ISLAM until he came to Medina The abbreviation A H is used before years of the hegira, like A D in Christendom

Heiberg, Gunnar Edvard Rode (gōō'nur ĕd'vär rō'dŭ hī'bĕr), 1857–1929, Norwegian dramatist Director of the Bergen National Theater (1884–88), he was author of successful plays, including *Tante Ulrikke* (1883), *The Balcony* (1894, Eng tr, 1922), *King Midas* (1900), a satire on Bjornson, and *The Tragedy of Love* (1904, Eng tr in T H Dickinson, *Chief Contemporary Dramatists*, Ser 2, 1921)

Heiberg, Johan Ludvig (yōhän' lōōdh'vē hī'bĕr), 1791–1860, Danish poet, dramatist, and critic, director of the National Theater In 1814 he wrote *The Marionette Theater* He studied in France from 1819 to 1822, and was for three years professor of Danish at Kiel Returning to Copenhagen, he composed many vaudevilles, based on French models but Danish in subject and humor He edited and wrote for several influential critical journals and published a number of plays, including *The Hill of the Elves* (1828), the most frequently performed Danish play

Heidegger, Martin (mär'tēn hī'dĕgur), 1889–, German philosopher He was professor at the Univ of Marburg (1923–28) and at the Univ. of Berlin (1928–33) and was rector at Berlin after 1933 Heidegger is regarded as the father of atheistic existentialism, and the most popular exponent of this school, Jean Paul Sartre, studied under him Combining two theories current in European thought during the 19th cent —the phenomenology of Husserl and part of EXISTENTIALISM as promulgated by Kierkegaard—Heidegger built an ontology of human existence From Kierkegaard he takes as his problem the tragic nature of being in a finite world and the sense of anguish and forlornness which oppresses man as he recognizes the inevitable limits of his life From phenomenology he accepts introspection and subjective examination as legitimate tools for the analysis of human nature, thereby rejecting the restraints and consolations of conventional philosophical and religious method. Since man is the only being capable of questioning himself, he is the only being in which existence precedes essence By questioning he may comprehend the nature of existence and, accepting its conditions within the essential relationships of the individual to the world and to other existents, he may transcend the everyday world of the non-inquiring anyone and assert his essence and destiny through "Resolute Decision" This solution is secular and depersonalized, differing in these aspects from the position of Kierkegaard, who answers the problem through the individual's escape from brutal reality into the plane of faith Heidegger's thesis is presented in *Sein und Zeit* (1927, Eng tr, *Existence and Being*, 1949), a work which was an important source for Sartre's *L'Être et le néant*. Other writings include *Vom Wesen des Grundes* (1929), *Kant und das Problem der Metaphysik* (1929), *Was ist Metaphysik?* (1929) and *Hölderlin und das Wesen der Dichtung* (1936).

Heidelberg (hī'dŭlbûrg, Ger. hī'dulbĕrk) city (pop, 111,766), N Baden, W Germany, celebrated chiefly for its university and student life. It is idyllically situated on the Neckar, in a valley covered with orchards and vineyards, and has a famous castle (15th–17th cent.) and several medi-

eval and Renaissance houses and churches The castle cellar contains the Heidelberg Tun, a gigantic wine cask with a capacity of about 49,000 gal In the Second World War, Heidelberg suffered no important damage First mentioned in the 12th cent, Heidelberg was acquired (1225) by the count palatine of the Rhine and until 1720 was the residence of the electors palatine (see PALATINATE) It was devastated in 1622 by imperial troops under Tilly and in 1689 and 1693 by the French The Univ of Heidelberg (Ruprecht-Karl-Universität) was founded in 1386 by Elector Rupert I It became a bulwark of the Reformation in the 16th cent, declined after the Thirty Years War, and, recovering after the Napoleonic Wars, became the most famous university of Germany Student life in 19th-century Heidelberg, with its duels, songs, and romance, has been much publicized in various adaptations of a novel, *Karl Heinrich*, by Wilhelm MEYER-FÖRSTER Actually, Heidelberg was and remains also a center of serious studies and has produced generations of scholars as well as dueling scars The **Heidelberg Catechism** was a profession of faith of the German Reformed (Calvinistic) Church, drawn up on the request of Elector Frederick III and published in 1563 It gained wide repute and was adopted by several REFORMED CHURCHES

Heidelberg (hī'dŭlbûrg), borough (pop 2,239), Allegheny co, SW Pa, near Pittsburgh

Heidelberg College see TIFFIN, Ohio

Heidelberg man see MAN, PRIMITIVE

Heidenstam, Verner von (vĕr'nûr fŭn hī'dunstăm), 1859-1940, Swedish lyric poet, novelist, and essayist His first volume of poetry, *Pilgrimage and Wanderyears* (1888), challenged the contemporary naturalistic, utilitarian Swedish literature *Poems* (1895) and *New Poems* (1915) established Heidenstam as one of Sweden's great lyric poets In the historical novels *The Charles Men* (1897-98, Eng tr, 1920), *Saint Birgitta's Pilgrimage* (1901), and *The Tree of the Folkungs* (2 vols, 1905-7, Eng tr, 1925) he evoked a sense of the continuing unity of a nation's past and present in its cultural development In such essays as "Renaissance" (1889) the theme of nationalism is further developed In 1916 the Nobel Prize in Literature was awarded to Heidenstam Some of his poems have been translated as *Sweden's Laureate Selected Poems* (tr by C W Stork, 1919) See Alrik Gustafson, *Six Scandinavian Novelists* (1940)

Heifetz, Jascha (yä'shŭ hī'fĭts), 1901-, Russian-American violinist At the age of six he made his debut in his native city, Vilna, afterward becoming a pupil of Leopold Auer at the St Petersburg Conservatory After playing with great success in Europe, he came to the United States in 1917, he has been ranked as one of the world's foremost violinists He has transcribed a number of works for the violin and, under the pseudonym Jim Hoyl, is the composer of one or two popular songs

Heijermans, Herman (hĕr'măn hī'urmăns), 1864-1924, Dutch dramatist He was of Jewish descent, and much of his work treated life among the Dutch Jews His dramas include *Op Hoop van Zegen* (1900, Eng tr, *The Good Hope*, 1928)

Heijo, Korea see PYONGYANG

Heilbronn (hīlbrŏn'), city (pop 52,745), N Württemberg, W Germany, on the Neckar It has machinery, tool, and other manufactures Of pre-Carolingian origin, Heilbronn became a free imperial city in 1281 Though it suffered in the wars of the 16th cent, particularly in the Peasants' War, Heilbronn rose to great commercial prosperity in the late 16th and early 17th cent In the 19th cent it acquired industrial importance In the Second World War most of the old city was destroyed The Götzenturm, a tower built in 1392, mentioned in Goethe's *Götz von Berlichingen*, is undamaged Götz von Berlichingen was a prisoner here in 1522

Heiligenblut (hī'lĭgunblōōt'), village in Carinthia, W central Austria, at the foot of the GROSSGLOCKNER It is a famous place of pilgrimage, in its Gothic church (1483) is a vial which according to tradition contains some of Christ's blood

Heilprin, Angelo (hīl'prĭn), 1853-1907, American naturalist, b Hungary He was brought to the United States in 1856, but was educated abroad. He was long associated with the Academy of Natural Sciences and the Wagner Free Institute of Science, both in Philadelphia He accompanied Peary on his first arctic expedition (1891) and headed the relief expedition of 1892, as described in his *Arctic Problem* (1893) His books include descriptions of his travels and two works on the eruption of Mont Pelée

Heilungkiang (hā'lōōng'kyäng', -jĕang'), Mandarin *Hei-lung-chiang*, province (99,522 sq mi, pop. 2,860,037), NE China. The capital is Peian This province, a part of Manchuria, was created in 1945 from the eastern section of the former province of Heilungkiang. On the north and west the Amur river separates Heilungkiang from the USSR The chief range of this largely mountainous province is the Little Khingan The southern region, crossed by the Nonni river, is economically the most important, and it alone has railroad service Most of its inhabitants are Chinese, who raise soybeans and grains in exportable surplus The Manchu and Mongol inhabitants of the north are pastoral nomads In 1949 the Communists made W Heilungkiang a part of the Inner Mongolian Autonomous Region.

Heimdall (hām'dal), in Norse mythology, the watchman of Asgard He lives at the end of the bridge BIFROST

Heine, Heinrich (hīn'rĭkh hī'nu), 1797-1856, German poet, b Düsseldorf, of a poor Jewish family A rich uncle gave him a start in business and, after Heinrich's dismal failure, sent him to law school at Bonn and Göttingen He left Göttingen after a duel and was in Berlin for a time There Rahel von Varnhagen introduced him into a literary circle, and in 1822 *Gedichte* appeared, his first volume of poems In 1825 he nominally embraced Christianity in order to be qualified by Göttingen as a lawyer, but he did not enter legal or civil service His early poems and his tragedies, *Almansor* and *William Ratcliff*, failed to gain public approval, but he sprang into fame with the exquisite prose of the first of his sketches of travel, *Die Harzreise* [the Harz journey] (1826), and the lyrics and ballads of his *Buch der Lieder* [book of songs] (1827) In sympathy with the liberal and nationalistic revolutionary ideals of Young Germany, he considered himself "a son of the French Revolution" In 1831 he left Germany for Paris, where he remained for the rest of his life He was correspondent for German newspapers, was for a time a Saint-Simonist, and for many years received a pension from the French government He married Eugénie Mirat (called Mathilde), who had been his mistress, but his marriage was unhappy Heine's life was embittered by his own temperament He quarreled violently with almost all his friends, and he issued frequent polemics against his enemies His piercing wit made matters worse In 1848 he was first stricken with the syphilis of the spine that condemned him to his "mattress grave" from 1849 until his death In his last years he was cared for by his faithful "Mouche," the woman who used the pen name Camille Selden Heine's work has been interpreted and reinterpreted by later critics in the light of Jewish influences the conflict of his romanticism and his revolutionary tenets, his devotion to classical literature, and his reaction to the anti-Semitic elements of his time Whatever may have been the forces shaping his art, Heine's lyrics and ballads are recognized as among the finest in world literature Many of his poems were set to music by Schubert Brahms, and Schumann and are still widely sung, the *Lorelei* is the most notable example His later poems (*Neue Gedichte*, 1847, and *Letzte Gedichte*, 1853) lack some of the fervor and fine music of his earlier lyrics but are still of first quality His satires both in verse (e g, *Atta Troll*) and in prose (such as his castigation of Germany in *Deutschland*) display his barbed wit and his penetrating criticisms of the social order His works are among the best of the 19th cent Best known of them are the *Reisebilder* [pictures of travels], in the manner of *Die Harzreise* These appeared in 1827, 1830, and 1831 Almost all Heine's works have been translated into English, but the translation of his lyrics has been, for the most part, unsuccessful because their value depends so much upon their tender cadences and the subtle relationships of word and thought The entire works of Heine were banned during the Nazi regime, which attributed "Die Lorelei" to an unknown author C G Leland, Sir Robert Randolph Garran, Elisabeth Sharp, E A Bowring, Havelock Ellis, Humbert Wolfe, and Louis Untermeyer have been among his translators Among the early important works on Heine in English are the essay by Matthew Arnold in *Essays in Criticism* (1865) and biographies by William Stigand (1880) and William Sharp (1888) Among later biographies are Lewis Browne and Elsa Wethl, *That Man Heine* (1927), H G Atkins, *Heine* (1929), Antonina Vallentin, *Poet in Exile* (1934), and Louis Untermeyer, *Heinrich Heine, Paradox and Poet* (1937) See also *The Poetry and Prose of Heinrich Heine* (ed by Frederic Ewen, 1948).

Heinrich, Anthony Philip, 1781-1861, American composer, conductor, and violinist, b Schönbüchel, Bohemia He settled in the United States in 1816, spending some time in Philadelphia and Pittsburgh In Kentucky (1818-23), he gave a number of concerts in which he figured as composer, conductor, pianist, and violinist In one he presented Beethoven's First Symphony, the first performance in America of any Beethoven symphony He was later active in Boston, London, the Continent, and New York, where he died

Heinse, Johann Jakob Wilhelm (yō'hän yä'kŏp vĭl'hĕlm hīn'zu), 1749-1803, German art critic and novelist His best-known work is the utopian romance *Ardinghello und die glückseligen Inseln* (1787, Eng tr, *Ardinghello, or, An Artist's Rambles in Sicily*, 1839)

Heinsius, Daniel (hīn'sēus), 1580-1655, Dutch classicist One of the most famous of Renaissance scholars, he edited many Latin authors, composed fine Latin poetry, and wrote in Dutch as well His son, **Nikolaas Heinsius** (nē'kōlus), 1620-81, was almost as famous as his father, but rather for his Latin poetry (which is unrivaled in elegance among moderns) than for his scholarship, somewhat less brilliant than his father's

Heintzelman, Samuel Peter (hīn'tsulmŭn), 1805-80, Union general in the Civil War, b Manheim, Pa, grad West Point, 1826 He fought at both battles of Bull Run (1861, 1862) and in the PENINSULAR CAMPAIGN

Heinze, Frederick Augustus (hīn'zē), 1869-1914, American copper magnate, b Brooklyn, N Y He went (1889) to Butte, Mont, as engineer for a mining company His clever operations in promoting ventures pushed him forward In 1893 he organized the Montana Ore Purchasing Company, built a smelter, and soon was cutting in on the claims of the Amalgamated Copper Company, which was controlled by Standard Oil Brilliant and aggressive, F Augustus Heinze was a more striking figure than William A Clark or Marcus Daly He won sympathy as a knight pitted against the "interests," but he was ultimately unsuccessful In 1906 he sold most of his holdings, and the United Copper Company, which he founded, went down in the Panic of 1907 See C B Glasscock, *The War of the Copper Kings* (1935)

heir, person designated by law to succeed to the ownership of property of another if that other does not make a contrary disposition of it by WILL. A person who takes a legacy left to him by will is not an heir but a legatee The property which the heir receives is his inheritance Originally the common law confined the term *heir* to an inheritor of real estate, the persons to whom the personal property of the deceased went were called the next of kin or the distributees The group of heirs of a man may differ from the group which the law recognizes as his next of kin, but the law which dictates the constitution of both groups is now largely statutory, and in many states of the United States the statutes have abolished all distinction When title to property is in a living man and his heirs, the meaning is merely that the man has absolute ownership of the property and can do what he wishes with it An heir apparent survives the owner of it An heir presumptive is in the same position except that his claim may be superseded, as by the birth of one more closely related to the owner These terms are much used with regard to dynastic succession, an heir apparent is in such connection the undisputed heir to the throne if he survives the incumbent, an heir presumptive is one who will inherit the throne unless some unforeseen event intervenes—especially the birth of a child to the incumbent

Heisenberg, Werner (vĕr'nur hī'zunbĕrk), 1901-, German physicist For his theory of quantum mechanics (1925) and the discovery of allotropic forms of hydrogen he received the 1932 Nobel Prize in Physics In 1927 he enunciated the principle of uncertainty (or indeterminancy) which held that it is impossible to determine at the same time both the position and the velocity of an electron, he suggested, therefore, that laws governing subatomic phenomena should be stated in terms of observable properties, such as intensity and frequency of radiation Heisenberg taught at the universities of Leipzig (1927-41) and Berlin (1942-45) and became director (1942) of the Kaiser Wilhelm Institute of Physics (reorganized as the Max Planck Institute of Physics)

Heiser, Victor George (hī'zur), 1873-, American physician and public health specialist, b Pennsylvania, M D Jefferson Medical College, Philadelphia, 1897 He joined (1898) the U S Public Health Service as an assistant surgeon and served on special missions abroad In 1903 he was appointed chief quarantine officer of the immigration service in the Philippine Islands, where he remained as director of health (1905-15), he was instrumental in establishing there many hospitals and the medical school connected with the Univ of the Philippines Subsequently, as associate director (1915-34) of the International Health Division, Rockefeller Foundation, he visited scores of lands studying and organizing the work of combating disease Plague, cholera, smallpox, hookworm, leprosy, and malaria are some of the diseases against which his efforts were directed After retiring (1934) from his position with the Rockefeller Foundation, he worked as consultant in public and industrial health In addition to his technical works he wrote *An American Doctor's Odyssey* (1936), *You're the Doctor* (1939), and *Toughen Up, America* (1941)

Hejaz or **Hedjaz** (both hĕjăz', hĕjaz'), region, NW Saudi Arabia, on the Gulf of Aqaba and the Red Sea, extending south to about lat 20° N The region is mainly a mountain range and plateau, both lying between the narrow, low coastal strip and the interior desert There are several oases and some wadis (watercourses) where crops are raised Each year many Moslem pilgrims come into the Hejaz to visit the holy cities of Mecca and Medina, and infidels are excluded from much of the region Originally a province of Turkey, the Hejaz was in 1916 proclaimed independent by Husein ibn Ali, the sherif of Mecca, who with the aid of T. E. Lawrence

destroyed Turkish authority. Husein in 1924 was himself defeated by Ibn Saud, founder of SAUDI ARABIA, who annexed his domain

hejira. see HEGIRA

Hekla (hĕk'lä), volcano, 4,746 ft high, SW Iceland. A score of eruptions have been recorded since 1004; the worst occurred in 1766 Inactive after 1913, the volcano erupted again in 1947

Hel (hĕl), in Norse myth, goddess of death She is ruler of the underworld, which lies under one of Yggdrasill's roots Her name is probably identical with HELL, but she makes no distinction between good and bad The name is also given to her abode

Helah (hē'lä), wife of Ashur 1 Chron 4 5

Helam (hē'-), unidentified place, Syria, where **David** defeated Hadarezer 2 Sam 10 16,19

Helbah (hĕl'bu) [Heb ,=fat], unidentified town, NE Palestine Judges 1.31

Helbon [Heb ,=fat], ancient place, Syria, NNW of Damascus It was noted for its wine Ezek 27 18

Held, Anna, 18737-1918, American musical comedy actress, b Paris. She is remembered for her beauty and charm as well as for her tempestuous off-stage life After she had small singing and dancing parts in Paris, success came to her when Florenz Ziegfeld (whom she subsequently married) persuaded her to come to America to star in the first of his lavish productions, *A Parlor Match* (1896). She was long a favorite on the New York stage, some of her outstanding roles being *The Little Duchess* (1903-4), *Mlle Napoleon* (1905-6), and *Miss Innocence* (1909-10)

Heldai (hĕl'dāī) 1 See HELEB 2 Man who was to have a memorial in the temple Zech 6.10 Helem Zech 6 14

Heleb (hē'-), mighty man. 2 Sam 23 22 Heled 1 Chron 11 30 He may be the captain Heldai of 1 Chron 27 15.

Heled (hē'-), the same as HELEB

Helek (hē'-) [Heb ,=portion], descendant of Manasseh Num 26 30

Helem (hē'-) [Heb ,=blow] 1 Asherite 1 Chron 7 35 2 The same as HELDAI 2

Helen, in Greek legend, the most beautiful of all women She was the daughter of LEDA and Zeus, who came to Leda as a swan Helen was therefore born from an egg Her half sister was CLYTEMNESTRA, her half brothers CASTOR AND POLLUX Late legend says she was so beautiful even as a child that Theseus could not resist carrying her off, and Castor and Pollux pursued him and brought their sister back Late legend also says that all the nobles of Greece sought her hand in marriage and agreed to support the rights of the man fortunate enough to become her husband In Homer as in the later writings her husband was MENELAUS When PARIS decided to award the APPLE OF DISCORD to APHRODITE, she had to make good her promise to give him the fairest woman in the world. Therefore with her aid Paris abducted Helen to Troy, where she was his wife The chiefs and nobles then undertook a war to recover her and avenge Menelaus This was the TROJAN WAR, the subject of Homer's *Iliad* and of countless later legends When the war was finished, Helen returned quietly to Sparta with Menelaus She bore him but one child, HERMIONE Another version of Helen's story is that she did not go to Troy at all but was taken to Egypt, where she remained until her husband came to reclaim her while a phantom Helen went to Troy, this was the version favored by Euripides By some students of myths she is considered a "faded goddess," i e , an ancient goddess reduced to human form

Helena, Saint (hĕ'lunu), c 248 328?, mother of Constantine I (Constantine the Great) She became Christian in 313 According to tradition she found the relic of the True Cross near Calvary at Jerusalem (an event usually called the Invention of the Cross), she is also said to have identified the location of the Holy Sepulcher A popular tradition made her British Feast Aug 18

Helena (hĕ'lunu) 1 City (pop 8,546), co seat of Phillips co , E Ark , on the Mississippi and SW of Memphis, Tenn , inc 1856. A rail center and river port, it ships cotton, lumber, and food products. Cottonseed oil and woolen goods are made In 1863 a battle occurred here, resulting in a Union victory 2 Town (pop 1,073), S central Ga., contiguous to McRae, SE of Macon and on the Little Ocmulgee river, in a farm and dairy area 3 City (pop 15,056), state capital, and co seat of Lewis and Clark co., W central Mont , inc 1881 Founded after discovery of gold in Last Chance Gulch (1864), the town grew rapidly, and in 1874 a general election ratified the choice of Helena to replace Virginia City as territorial capital In the 1890s it maintained its position as state capital against the rivalry of Anaconda. Rich silver strikes in the neighborhood kept the mining wealth high, and Helena still depends on mining as well as on the ranching and farming of the Prickly Pear valley In 1935 an earthquake severely damaged the city Helena is the seat of Carroll College (Catholic, for men, 1910) and of a veterans' hospital (formerly Fort Harrison, an army post)

Helensburgh (hĕ'lnzbûrû), burgh (pop 8,893), Dumbartonshire, Scotland, on the north shore of the Clyde. A resort, it is a point of departure for steamers to Garelochhead, Dunoon, Glasgow, and Greenock It was named for the wife of Sir James Colquhoun, who founded it in 1777.

Heleph (hē'lĕf) [Heb ,=exchange], unidentified town, NE Palestine. Joshua 19 33

Helez (hē'-) 1 One of David's guard. 2 Sam. 23 26, 1 Chron 11 27. 2 Descendant of Jerahmeel 1 Chron 2 39.

Helgoland (hĕl'gōländ", Ger hĕl'gōlänt") or **Heligoland** (hĕ'lĭgōländ"), island, area less than 150 acres, Germany, in the North Sea, c 40 mi NNW of Cuxhaven. Formed of constantly eroding red sandstone, it rises c 160 ft. above the sea and is covered by grazing land of an intense green. Its picturesqueness made it a favorite tourist resort before the Second World War Formerly a Danish possession, the island was occupied by the English in 1807 and formally ceded to England in 1814 In 1890 Great Britain traded it to Germany for Zanzibar The German fortifications were razed according to the terms of the Treaty of Versailles, but in 1936 Germany refortified Helgoland and in the Second World War used it as a naval base In 1947 the British occupation authorities, after evacuating its population (mostly fishermen), blew up the fortifications and part of the island in the largest known non-atomic blast

Helgoland Bight, indentation in the coast of the North Sea S and E of Helgoland, Germany Here in 1914 the British defeated the Germans in the first serious naval battle of the First World War.

Heli (hē'lī), father of St Joseph Luke 3.23.

Heliand (hē'lēund, hĕ'lēänd) [Old Saxon, =Savior], Old Saxon poem of 5,983 lines, a narrative of the life of Christ in alliterative verse, written c 825

Helianthus. see SUNFLOWER

Helicon (hĕ'lĭkŏn), Gr *Elikon* (ĕlē'kôn), mountain group, central Greece, in Boeotia It is c 25 mi long and rises to 5,736 ft In Greek legend it was the abode of the MUSES. The fountains of Hippocrene and Aganippe are on the slopes of Mt Helicon The temple of the Muses was situated in the eastern part of the mountain, at the foot of which were Thespiae and Ascra, home of Hesiod

helicopter (hĕ'lĭkŏptur, hē') [Gr ,=spiral winged], type of rotor aircraft in which lift is obtained by means of one or more power-driven horizontal propellers This method of flight was one of the earliest considered, Leonardo da Vinci, in the 16th cent , described its possibilities Although the helicopter has not been extensively used for long-distance transportation, it has proved of great value for certain special purposes, e g , air-sea rescue and some kinds of aeromagnetic surveying Its particular fitness for these and similar purposes lies in the high degree of maneuverability and of control of the craft possible even down to zero air speed See H F Gregory, *Anything a Horse Can Do* (1944), C B F Macaulay, *The Helicopters Are Coming* (1944), C L Morris, *Pioneering the Helicopter* (1945), A H Stevens, Jr , *The How of the Helicopter* (1946)

Heligoland· see HELGOLAND

Heliodorus (hē"lēōdō'rŭs), fl 175 B C , Syrian statesman The treasurer of Seleucus IV (Seleucus Philopator), he murdered the king, hoping to usurp the throne According to 2 Mac 3 he entered the Temple at Jerusalem, but in attempting to take the treasure he was prevented by three angels Josephus does not mention this incident It is depicted in a fresco by Raphael at the Vatican

Heliodorus of Emesa (ĕ'mŭsŭ), fl 2d or 3d cent , Syrian Greek writer He wrote the romance *Aethiopica*, one of the oldest and best of surviving Greek romances He was a native of Emesa, but little else is known surely of his life. He possibly antedates ACHILLES TATIUS

Heliogabalus (hē"lēōgă'bŭlŭs) or **Elagabalus** (ĕlŭgă'bŭlŭs), c 205–222, Roman emperor (218–22) He was a priest of the sun-god at Emesa and was named Varius Avitus Bassianus. He was a cousin of CARACALLA; according to the claims (almost certainly false) of his ambitious mother and grandmother, he was the son of Caracalla. He was chosen by the troops in Syria as emperor in opposition to the legitimate heir, MACRINUS When Macrinus was defeated and slain at Antioch, Heliogabalus became emperor as Marcus Aurelius Antoninus His reign was a tragic farce He imported the cult of which he was priest, and Rome was shocked and disgusted by the indecency of the rites as well as by the private life of the emperor, who gave high offices to an actor, a charioteer, and a barber His grandmother, Julia Maesa, induced him to adopt his young cousin, but Heliogabalus later tried to have the boy killed To the regret of no one Heliogabalus and his mother were murdered in a Pretorian uprising. The young cousin, ALEXANDER SEVERUS, succeeded

heliograph (hē'lēŭgrăf) [Gr ,=sun-writer], signaling device consisting of a mirror set to reflect sunlight and shuttered so that messages may be transmitted in ordinary telegraphic code by means of long and short flashes. The heliostat is a similar device which reflects a beam of light on a distant spot The spectroheliograph, invented (1890) independently by George E. Hale and H. A. Deslandres, combines the principle of the heliostat and the spectroscope and is used to photograph the sun in the study of the sun's atmospheres.

Hélion, Jean (zhäⁿ' ālyō), 1904–, French abstractionist painter. His works are studiously devoid of literal content and bear no titles. Settling (1932) in the United States, he has since held numerous one-man shows; the Museum of Modern Art, New York, owns one of his compositions, and others are in private collections. His experiences of capture and escape from a German prison camp while fighting with the French in the Second World War are described by him in *They Shall Not Have Me* (1943)

Heliopolis (hēlĭŏ'pŭlĭs) [Gr ,=city of the sun], ancient city, N Egypt, in the Nile delta a few miles below Cairo It was noted as the center of sun worship, and its god Ra or Re became (c 2600 B C) the state deity, when Thebes became capital (c 2160 B C), the god Amon was joined with him as Amon-Ra or Amon-Re (see EGYPTIAN RELIGION). Heliopolis was under the New Empire (c 1580–c 1090) the seat of the viceroy for N Egypt The obelisks called Cleopatra's Needles were erected here Its schools of philosophy and astronomy, said to have been visited by Plato, declined after the founding of Alexandria in 332 B C , but the city never wholly lost importance until the Christian era The Egyptian name was On, and by this name it appears in the Bible as the shrine to which Joseph's father-in-law was attached Gen 41 45,50, 46 20 Elsewhere in the Bible, Heliopolis is referred to as Beth-shemesh and Aven.

Heliopolis, Syria see BAALBEK

Helios (hē'lĭŏs) [Gr ,=sun], in Greek religion, sun-god, son of the Titans Hyperion and Theia, husband of the nymph Clymene, and father of PHAËTHON Helios had a magnificent eastern palace He left it every morning in a golden chariot drawn by four immortal horses for another palace in the west The islands of Rhodes and Sicily (where he pastured his cattle) were sacred to Helios In Rhodes he was the national god, and the famous Colossus represented him. In later times Apollo was frequently identified with Helios, but generally Helios, the great eye of the world, represented the sun in its material or diurnal aspects and Apollo represented it in its spiritual aspects In the *Odyssey* Helios shipwrecked Odysseus and his men after they had partaken of his sacred cattle Helios was called Sol by the Romans

heliotrope (hē'-) [Gr ,=sun-turning], any plant of the genus *Heliotropium*, widely distributed herbs or shrubs some of which are cultivated, usually as annuals, for garden or pot plants or for cut flowers The small white to purple clustered blossoms are very fragrant The heliotrope is also called turnsole, because of its turning toward the sun, both names were formerly applied to any such plant \ valerian is known as garden heliotrope, and the sweet coltsfoot as winter heliotrope Heliotrope is also a name for the BLOODSTONE

helium (hē'lēum) [Gr ,=sun], colorless, odorless, tasteless gaseous element (symbol=He, for physical constants, see ELEMENT, table) It is about one seventh as heavy as air, and only hydrogen is lighter It is extremely inert and is grouped in the periodic table with neon, argon, krypton, xenon, and radon Because of its nonflammability and lightness it is the most satisfactory gas for balloons and airships Because of its low solubility in the human blood, it is useful as a component (as a substitute for nitrogen) of the "air" supplied to deep-sea divers and caisson workers and in the chambers used to accustom them gradually to normal pressures Its rarity, its cost of production, and the monopoly on its commercial production held by the United States has limited its use in other parts of the world, the gas is found in natural gas in the oil fields chiefly in Texas and Kansas It occurs also in uranium ores and in some mineral waters, but it is not available from these sources for industrial use Sir Norman Lockyer investigated (1868) a substance whose spectrum P J C Janssen had observed while studying the chromosphere of the sun in India during the total eclipse of 1868. Lockyer recognized it as a new element and named it helium Part of this research was carried on with Edward Frankland. W F Hillebrand later obtained helium by the action of an acid on a uranium ore, but he did not recognize that the gas evolved was helium Sir William Ramsay repeated the experiment using a different uranium ore, cleveite, and obtained a gas identical with helium As a result he announced, in 1895, the isolation of helium on earth. The alpha rays which emanate from radium are composed of the nuclei of helium atoms

Helkai (hĕl'kāī, hĕlkā'ī) [Heb.,=whose portion is God], priest with Zerubbabel. Neh 12 15.

Helkath, unidentified town, N Palestine. Joshua 19.25· 21 31. Hukok 1 Chron. 6.75

Helkath-hazzurim (-hă'zû-), field, where 12 champions of David fought 12 champions of Ishbosheth 2 Sam. 2.12–17.

hell, in Christian theology, the eternal abode of the souls damned by the judgment of God. Its characteristic is that the souls in hell are deprived forever

of the sight of God. The punishment of hell is generally analogised to earthly fire Hell has been treated in legend and literature, especially in the *Divine Comedy* of Dante A constant feature is Satan or Lucifer, considered as the ruler of hell Analogous to hell are conceptions of other religions Islam has a hell that is virtually the same The Sheol or Tophet of the ancient Jews is a gloomy place of departed souls, where they are not tormented, but wander about unhappy The ethical aspect was apparently gradually developed, and Sheol became much like the hell of Christianity Gehenna, in the New Testament, which drew its name from the Vale of HINNOM, was certainly a place of punishment. Among the Greeks the great underworld was Hades, ruled by a king, called Hades, MINOS, or PLUTO, and by PERSEPHONE It was like the Hebrew Sheol, unpleasant and gloomy, the general place of the departed The river STYX was said to surround it, CHARON was the ferryman, and CERBERUS guarded the entrance to Hades The Romans called this underworld also Orcus, Dis (a name for Pluto), and, poetically, Avernus. The principal description of Hades is in the *Odyssey*, and Vergil makes Aeneas visit Hades Tartarus, below Hades, was a place of torment for the very wicked The idea of Hel appearing in the elaborate cosmology of the *Edda* was probably heavily influenced by Christian writings It is a general underworld abode for the departed and the place of the damned. See HEAVEN and SIN.

Hellas: see GREECE

Helle see PHRIXUS

hellebore (hĕl'ŭ-) [Gr], name for plants of the genus *Helleborus*, Eurasian perennials with attractive palmately divided leaves and flowers of various colors. Hellebores are noted for their early blooming, particularly the black hellebore or CHRISTMAS ROSE Some are both poisonous and medicinal Species of the unrelated genus *Veratrum*—which are also poisonous and medicinal and which yield an insecticide—are variously known as false, or American, hellebore and white hellebore

Hellen, in Greek mythology, eponymous ancestor of the Hellenes or Greeks He was the son of Deucalion and Pyrrha (in some accounts, the son of Zeus), father of Aeolus, Dorus (ancestor of the Dorians), and Xuthus

Hellenism, the culture, ideals, and pattern of life of ancient Greece in classical times It usually means primarily the culture of Athens and the related cities in the Age of Pericles The term is also used to apply to the ideals of later writers and thinkers who draw their inspiration from ancient Greece Frequently it is contrasted with Hebraism, Hellenism then meaning pagan joy, freedom, and love of life as contrasted with the more serious, even gloomy, ethic of the Old Testament The Hellenic period came to an end with the conquest of Alexander the Great in the 4th cent B C It was succeeded by the Hellenistic civilization See GREECE, GREEK ARCHITECTURE, GREEK ART, GREEK LITERATURE, GREEK RELIGION

Hellenistic civilization (hĕ"lĭnĭ'stĭk) The conquests of Alexander the Great spread Hellenism immediately over the Near East and far into Asia After his death in 323 B C, the influence of Greek civilization continued to expand over the Mediterranean world and W Asia The wars of the DIADOCHI marked, it is true, the breakup of Alexander's brief empire, but the establishment of Macedonian dynasties in Egypt and Syria and Persia (the Ptolemies and the Seleucidae) helped to mold the world of that day into a wider unity of trade and learning While the city-states of Greece itself tended to stagnate, elsewhere cities and states grew and flourished Of these the chief was Alexandria So great a force did Alexandria exert in commerce, letters, and art that this period is occasionally called the Alexandrian Age, and the end of Hellenistic civilization is generally set at the final triumph of Roman power in Alexandria in the 1st cent B C Pergamum was also prominent, and there were other cities, great and small, of influence (e g , Dura). The bounds of the known world were extended somewhat by navigators, who learned, for example, about the North Sea The upsurge of commerce brought wealth to merchants and in general to the upper classes, and the Hellenistic era was marked by a great increase in physical comfort, better housing, and better food for the well to do Thus wealth was also reflected in a tendency toward the ornate and superimpressive in architecture, although town plans and buildings of the period have proportions and grace rarely excelled It should be noted, however, that the increase of wealth did not reach the poor, who in general were more impoverished than before and benefited only from the capricious benevolence of the rulers and the wealthy—and of course from the indirect gains of beautification of the cities Greek was the fashionable language of the educated world, and education was much more widespread than ever before. The result was a great increase of volume in literature and a tendency for writing to divide into popular literature for the wide audience and specialized writing for narrow, highly intellectual circles. Thus learning of the academic sort flourished as it never had before, and the libraries of Alexandria and Pergamum were centers of literary criticism, the compiling of anthologies and catalogues, and the construction of treatises (often in verse) containing all sorts of miscellaneous learning (e g , on word use, grammar, and mythology) The literature of the Hellenistic period has been stigmatized since the Renaissance as imitative and ponderous, but actually there was a great richness in some of the writing Not only were there outstanding poets such as Callimachus and Theocritus but there were also new forms that emerged, such as the complicated but frequently charming romances and the works of Lucian. Similarly some of the finest—and some of the most familiar—ancient sculpture to survive to our day are Alexandrian (e g , the Venus of Milo and the Dying Gaul) Philosophical disputation was popular among the educated, and while much of the discussion was stale, the contributions of the Stoics and the Epicureans to the world were very great The greatest contribution of the age was the actual expansion of art, education, and wealth and the preservation and enrichment of the Greek heritage for the use of Rome and succeeding civilizations As Rome gradually overshadowed the Mediterranean world, the Romans learned much from the peoples they conquered, and Hellenistic civilization was submerged rather than extinguished See W. W. Tarn, *Hellenistic Civilization* (2d ed , 1930)

Hellertown, borough (pop 4,031), SE Pa , near the Delaware SSE of Bethlehem, settled c 1740, inc 1872 Electrical products and commercial gases are made here

Helles, Cape (hĕ'lus), southernmost point of the Gallipoli peninsula, European Turkey. It commands the entrance to the Dardanelles

Hellespont see DARDANELLES

Helleu, Paul César (pôl' sāzär' hĕlö'), 1859–1927, French dry-point etcher and painter Examples of his somewhat impressionistic painting are in the Museum of Fine Arts, Boston, and in the Luxembourg Museum, Paris He is best known, however, for his dry-point studies and portraits of fashionable women which have the spontaneity of rapid sketches They were often printed in two or more colors

Hell Gate, narrow channel of the East River, SE N Y , between Wards Island and Astoria, Queens, New York city Named Hellegat by Adriaen BLOCK, who passed through it into Long Island Sound in 1614, it was long dangerous to ships because of its strong tidal currents and rocks It is crossed by the Triborough highway bridge and the Hell Gate railroad bridge, which is a connecting link for trains from the north to the south and the west

Hellín (ēlyēn'), city (pop 13,013), Albacete prov , SE Spain, in Murcia There are sulphur mines in the vicinity, worked since Roman times

Hellman, Lillian, 1905–, American dramatist, b New Orleans, studied at New York Univ and at Columbia Her first play, *The Children's Hour* (1934), attracted wide attention and was filmed as *These Three* in 1936 *The Little Foxes* (1939) and *Another Part of the Forest* (1946) constitute a chilling two-generation study of a well-to-do and vicious Southern family *Watch on the Rhine* (1941), on the German underground, and *The Searching Wind* (1944) were equally successful Miss Hellman is also a leading writer for moving pictures

Helmand (hĕl'mund), river, c 700 mi long, rising in central Afghanistan, in the mountains W of Kabul It flows generally SW to the Hamun-i-Helmand on the Iranian border. Its only important tributary is the Arghandab. Its ancient irrigation system was ruined by Jenghiz Khan and Tamerlane, but the modern irrigation works, though not so extensive, are vital to both Iranians and Afghans, and in times when the river runs low there are disputes The name also appears as Helmund

Helmholtz, Hermann Ludwig Ferdinand von (hĕr'män lōōt'vĭkh fĕr'dēnänt fŭn hĕlm'hôlts), 1821–94, German scientist Although known especially as a physicist and biologist, he was also physician, mathematician, philosopher, and lecturer on popular science He extended the application of the law of conservation of energy and in 1847 formulated it mathematically He contributed to the knowledge of thermodynamics and electrodynamics and studied vortex motion in fluids A pioneer in physiological optics and author of a *Treatise on Physiological Optics* (1867, Eng. tr., 3 vols , 1924–25), he extended Thomas Young's theory of color vision, explained the mechanism of lens accommodation in the eye, and invented (1851) the ophthalmoscope He was an authority on acoustics, especially on the perception of tone quality, and wrote *On the Sensations of Tone* (1863, Eng tr , 4th ed., 1912, reissued 1948). Helmholtz was professor of physics at the Univ of Berlin from 1871 and also director of the Physico-technical Institute, Charlottenburg, from 1887 See biography by Leo Koenigsberger (Eng. tr , 1906)

Helmond (hĕl'mônt), municipality (pop 32,880), North Brabant prov , SE Netherlands, ENE of Eindhoven. It is a textile center, manufacturing cotton fabrics and artificial silk. Its old castle is now used as town hall

Helmont, Jan Baptista van (yän' bäptē'stä vän hĕl'mônt), 1577–1644, Flemish physician, chemist, and physicist He attributed physiological changes to chemical causes, but his conclusions were colored by his speculative mysticism. He discovered carbon dioxide, distinguished gases as a class of substances (as contrasted with solids and liquids), and is credited with introducing the term *gas* in its present scientific sense His chief work is *Ortus medicinae* (1648).

Helmstedt (hĕlm'shtĕt), city (pop 25,599), Brunswick, central Germany It has machine and textile manufactures Dating from the 9th cent , it has preserved much medieval architecture After the Second World War it became an important communications center on the border of the British and the Russian occupation zones of Germany

Helmund, river see HELMAND.

Heloise see ABELARD, PETER

Helon (hē'-) [Heb , =strong], father of ELIAB 1

helots. see SPARTA, Greece

Helper, Hinton Rowan, 1829–1909, American author, b Davie co , N C In California during the gold rush, Helper returned east to write *The Land of Gold* (1855), which was followed by *The Impending Crisis of the South* (1857) An attack on slavery this book by a Southerner enraged the South and delighted Republicans who distributed 100,000 copies in 1860 The book condemned slavery not on humanitarian or moral grounds, but because it was an economic threat and the cause of backwardness and impoverishment among the poor whites and small farmers of the South Three subsequent books, the first being *Nojoque* (1867), were vicious racist attacks on the Negro for his alleged basic inferiority

Helper, city (pop 2,843, alt 5,829 ft), E central Utah, on the Price river and NW of Price, inc 1907 It is a coal-mining town, called Pratts Siding until 1892 Some lands in the area are irrigated from Scofield Reservoir, impounded by Scofield Dam, completed in 1946 by the Bureau of Reclamation in the headstream of the Price to replace an earlier dam

Helps, Sir Arthur, 1813–75, English historian and essayist His works include *Friends in Council* (1847–59), dialogues on social and intellectual subjects, *The Conquerors of the New World* (1848–52), *The Spanish Conquest in America* (1855–61), and *The Life of Columbus* (1869) He assisted Prince Albert with his speeches and helped to prepare the works of Queen Victoria for publication

Helsingborg see HALSINGBORG

Helsingfors, Finland see HELSINKI

Helsingor, Denmark see ELSINORE

Helsinki (hĕl'sĭngkē), Swed *Helsingfors* (hĕl'sĭngfôrz, Swed hĕlsĭngfôrs', fôsh'), city (pop 319,939) capital of Finland, a Baltic seaport on the Gulf of Finland Built on a peninsula, surrounded by islands and fortified by SUOMENLINNA, the city is the intellectual, commercial, and administrative center of Finland Its distinctive modern buildings of native granite and its cleanliness have earned it the name White City of the North Three harbors accommodate passenger steamers, large freighters, and local shipping Its principal manufactures include paper, tobacco, sugar, liquor, textiles and machinery The city, founded (1560) by Gustavus I of Sweden, grew rapidly after the capital was moved here (1812) from Turku by Alexander I of Russia In the older part of the city are the state council building, the residence of the president, the impressive railway station (designed by Eliel Saarinen), the university (moved here from Turku in 1828), the Church of St Nicholas, the national archives, an art gallery, and the Russian cathedral Outstanding in the newer part of the city are the house of representatives building (1931), the general post office (1938), the national museum, a stadium, an opera house, and the technical university (1877) Although bombed several times during the Finnish-Russian War (1939–40) and the Second World War, Helsinki suffered only slight damage

Helst, Bartholomeus van der (bär"tōlōmā'us vän dur hĕlst'), c 1613–1670, Dutch portrait painter Most of his life was spent in Amsterdam, whose wealthy citizens preferred his portraits to those of Rembrandt He painted several group portraits for the city fathers One of these, *Banquet of the Civic Guard* (Rijks Mus), is considered his masterpiece Helst was a founder of the painters' Guild of St Luke in Amsterdam (1654) Among his well-known works are *The Peace of Münster, Confraternity of St Sebastian*, and portraits of Andries and Gerard Bicker (Rijks Mus), *Lady in Blue* (National Gall , London), and a portrait of Paul Potter (The Hague) The Metropolitan Museum has three fine portraits

Helvellyn (hĕlvĕl'ĭn), mountain, 3,118 ft high Cumberland and Westmorland, England Near the summit is a memorial to Charles Gough, who was commemorated in poems by Scott and Wordsworth

Helvetia (hĕlvē'shŭ), short for *Confoederatio Helvetica*, Latin name of Switzerland Helvetia was also the name of a Roman administrative district

of Upper Germany (1st cent. B C–5th cent. A D), which occupied, with RHAETIA in the east, the site of modern Switzerland Its inhabitants, the predominantly Celtic Helvetii, attempted in 58 B C to conquer S Gaul, but were defeated by Julius Caesar at Bibracte (see GALLIC WARS) Under Roman rule they attained great prosperity, as witnessed by the ruins at AVENCHES

Helvetic Republic (hĕlvē'tĭk), 1798–1803 In Sept, 1797, several exiled Swiss leaders in France (notably Frédéric César de LA HARPE) formally urged the French Revolutionary government (the Directory) to help in the liberation of the subject districts of SWITZERLAND and in the overthrow of the aristocratic cantonal governments The Directory, eager to secure the Alpine passes and to seize the treasury of BERN, ordered the invasion of Switzerland (Jan, 1798), resistance was brief A unified state, the Helvetic Republic, was set up replacing the former loose confederation Its democratic constitution was changed six times in five years, and ruin was added to chaos when the battles of the French Revolutionary Wars shifted into Switzerland (1799) An Austrian army defeated the French at Zurich (June), but Austro-Russian discord led to the victory (Sept), again at Zurich, of Masséna over a Russian army under Korsakov SUVAROV, who arrived too late from Italy to aid Korsakov, was obliged to retreat to Lindau in Germany The survival of the Helvetic Republic till 1803 was largely due to the presence of French troops, the Swiss being hostile to centralization In Feb, 1803, Napoleon, by imposing the Act of Mediation, established a confederation of 19 cantons, with a federal diet entirely subservient to France

Helvétius, Claude Adrien (hĕlvē'shus, Fr klōd' adrēē' ělvāsyüs'), 1715–71, French philosopher, one of the Encyclopedists He held the post of farmer-general, an exceedingly remunerative position, and was then chamberlain to the queen In 1751 he retired to the country, devoting himself to his writings and philanthropies and traveling briefly in England and Germany Unfortunately his philosophy irritated both Church and State, and his book *De l'esprit* (1758, Eng tr, *Essays on the Mind*, 1807) was condemned by the Sorbonne and burned Agreeing with Locke's doctrine that the minds of men are originally blank tablets, Helvétius maintained that all men are born with equal ability and that distinctions develop from the total of educational influences All forms of intellectual activity have their beginning in sensation, and the soul is at first simply a capacity for sensation In ethics a utilitarian, he judged the good in terms of self-satisfaction and regarded self-interest as the sole motive for action Both Bentham and James Mill acknowledge his influence Another book, *De l'homme*, posthumously published (1772) and translated, is called in English *A Treatise on Man His Intellectual Faculties and His Education* (1777) The complete works of Helvétius were published in 1796 and 1818 See G V Plekhanov, *Essays in the History of Materialism* (Eng tr, 1934)

Helwan (hĕlwan'), town (pop c 8,000), Egypt, on the Nile opposite the ruins of Memphis With warm sulphur springs famed from antiquity, the town is a health resort

Hemam (hē'-), descendant of Esau Gen 36 22 Homam 1 Chron 1 39

Heman (hē'mun, hē'-) [Heb, =true] **1** Wise man 1 Kings 4 31, 1 Chron 2 6, title of Ps 88 **2** Chief singer 1 Chron 6 33, 15 16–22, 25 1–7

Hemans, Felicia Dorothea (Browne) (hĕm'ŭz, often in America hē'mŭz), 1793–1835, English poet She married Capt Alfred Hemans in 1812 and separated from him in 1818 A facile writer, the demand for her poems—mild, sentimental, and melodious—was constant She is remembered for "Casabianca," "The Landing of the Pilgrims," and "England's Dead" A collection of her poetry was published in 1839

Hemath (hē'-) **1** Ancestor of the Rechabites 1 Chron 2 55 **2** The same as HAMA

hematite (hē'mutīt), a mineral, an oxide of iron containing about 70 percent metal, occurring in nature in red to reddish-brown earthy masses and in various steel-gray to black crystalline forms That having a metallic luster is called specular hematite or specular iron The red powdered hematite is used as a pigment (OCHER) and as rouge in polishing Hematite is most important as an ore of iron. Extensive and richly productive deposits occur in the Lake Superior region (in Michigan, Minnesota, and Wisconsin) and the Birmingham district (Alabama) The mineral is widely distributed throughout the world

Hemdan, Edomite Gen 36 26 Amram 1 Chron 1 41

Hemet (hē'mĭt), city (pop. 2,595), S Calif, SE of Riverside, inc 1910. It is a processing center in a fruitgrowing region An annual Ramona pageant, based on the novel by Helen Hunt Jackson, is held near by.

Heming or Hemminge, John (both· hĕ'mĭng), d 1630, English actor A proprietor of the Globe Theatre and a fellow actor of Shakspere, he is said to have been the first to play Falstaff In 1623 he edited, with Henry Condell, the First Folio of Shakspere's plays

Hemingway, Ernest, 1898–, American novelist, b Oak Park, Ill His first three books, *Three Stories and Ten Poems* (1923), *In Our Time* (1924), and *The Torrents of Spring* (1926), were talented though somewhat sentimental works, his true vigor appeared with the realistic novel *The Sun Also Rises* (1926), thought by many to be Hemingway's most representative work The protagonists are cynical, disillusioned men and women living in 20th-century Spain His *Farewell to Arms* (1929), a novel of the First World War, was followed by *Death in the Afternoon* (1932), a rambling treatise on the pageantry and excitement of bullfighting, in reality an essay on death *To Have and Have Not* (1937), set in Key West, noted the turbulence of contemporary society without offering either solution or hope *For Whom the Bell Tolls* (1940), inspired by the courage of the Spanish Loyalist and peasant in the Civil War (1936–39), subordinated the legendary Hemingway hero and heroine to duty Hemingway's short stories, included in the collections *Men without Women* (1927), *Winner Take Nothing* (1933), and *The Fifth Column* [a play] *and the First Forty-nine Stories* (1938), are also occupied with the theme of man mutilated by his environment Hemingway has lived in Europe and has been a foreign correspondent and a big-game hunter in Africa, experiences which he has used in his writing Influenced himself by Gertrude Stein and Ezra Pound, he has had tremendous stylistic influence on contemporary fiction

Hemling, Hans see MEMLING, HANS

hemlock, name for several plants, especially trees of the genus *Tsuga*, coniferous evergreens of the pine family native to North America and Asia The common hemlock of E North America is *Tsuga canadensis*, an ornamental tree (sometimes cultivated as a hedge) with small cones and short, dark green leaves so arranged as to give the branchlets a flattened appearance The tree has been highly valued as a source of tanbark but is now seriously reduced in numbers Its wood is soft and light One of the two Western hemlocks (*T heterophylla*) has more valuable wood, which is used in construction work The ground hemlock is a species of YEW The poison hemlock of classical literature, by which Socrates died, is an herbaceous plant, *Conium maculatum*, of the carrot family It has finely divided foliage, flat-topped clusters of small white flowers, and a hollow, purple-mottled stem Though native to the Old World it is now naturalized and common in parts of the United States The poisonous principle (conine) is extracted for medicinal purposes Water hemlock (*Cicuta maculata* and other species) is similar in appearance to poison hemlock The species of *Cicuta* are violently poisonous

Hemmer, Jarl Robert (järl' rō'burt hĕ'mur), 1893–1944, Finnish poet and novelist, who wrote in Swedish His writing is marked chiefly by his insistence upon suffering His books include *A Fool of Faith* (1931, Eng tr, 1935) and the poems in *Realm of the Rye* (1922, Eng tr, 1938)

Hemmeter, John Conrad, 1864–1931, American physician, b Baltimore, M D Univ of Maryland, 1884 His middle name was formerly Cohn After studying abroad, he was professor and director of the clinical laboratory at the Univ of Maryland A specialist in diseases of the digestive organs, he introduced duodenal intubation and made early use of the X ray in diagnosis He wrote important treatises in his special field, as well as a manual of physiology and the biographical *Master Minds of Medicine* (1927)

Hemminge, John see HEMING, JOHN

hemoglobin (hē'mūglō'bĭn, hĕ-), protein substance containing iron and forming the coloring matter of the red blood corpuscles It is a complex crystalline compound of a protein (globin) with heme (formerly called hematin) It readily combines with oxygen to form the bright red oxyhemoglobin After releasing oxygen to the body tissues, the blood, which is then carrying reduced hemoglobin, is dark red and through the skin appears purplish or blue

Hémon, Louis (lwē' āmō'), 1880–1913, French Canadian novelist, b France He went to Canada in 1911 and wrote there his noted story of pioneer life in Quebec, *Maria Chapdelaine* (1913) A moving picture was made (1935) in France from the novel Hémon's journal (1924) was posthumously published

hemophilia (hē"mufĭl'ēu, hĕ"-), rare hereditary disease, characterized by a tendency to protracted bleeding from even a slight cut or bruise Because the clotting of the blood is delayed, hemorrhage is difficult to control, and death may follow from bleeding after slight injuries and simple operations. The disease is inherited by males only and is transmitted as a sex-linked character only through the female Examples of the transmission of hemophilia are seen in several royal families. Through the marriage of Alfonso XIII of Spain to Victoria Eugenie of BATTENBERG, who inherited the gene from her grandmother Queen Victoria of England, the disease was introduced into the Spanish royal family and inherited by two of their sons, who died of hemorrhage. Queen Victoria's daughter Alice married Louis IV, grand duke of Hesse, their younger son Friedrich is believed to have died of hemophilia Their youngest daughter Alexandra (Alix) married Nicholas II, tsar of Russia, and their son Alexis was a hemophiliac

hemorrhage (hĕ'murĭj), the escape of blood from heart or blood vessels (arteries, veins, and capillaries) Arterial bleeding is red and of rhythmic flow Venous bleeding is dark and of constant flow. Bleeding occurs internally or from natural orifices of the body as well as from skin It results from injury, as in cuts, or from diseases, such as hemophilia, scurvy, and purpura Slow loss of blood may lead to anemia Sudden large loss results in shock Bleeding is sometimes treated by pressing the site of the bleeding with pads of sterile gauze In case of severe arterial bleeding a TOURNIQUET is temporarily applied on the side of the injury towards the heart Surgical treatment and a blood transfusion may be necessary

hemorrhoids (hĕ'muroidz) or **piles,** dilated veins located at, or just inside, the anus They often result from constipation, from pressure on the rectum, and from poor circulation caused by disorders of the heart, kidneys, and liver, and they sometimes develop in persons of sedentary occupation They may become inflamed or ulcerated or may rupture If bleeding occurs over a long period, it sometimes leads to anemia Hemorrhoids may result in clotting of blood inside the vein (thrombosis) In the early stages, treatment of the cause prevents progress of the condition Warm applications and astringents are soothing Bleeding is controlled by pressure and by the application of ice Injection of chemicals to close the veins or actual surgical removal of the veins is often advisable

hemp, name for a tall annual herb (*Cannabis sativa*) native to Asia but now widespread because of its cultivation for the bast fiber (also called hemp) and for the drug it yields Known and cultivated in ancient China, the plant was introduced into Europe, now the center of its production, before the Christian era In the United States it is cultivated chiefly in the Middle West The fiber, retted from the stem, is one of the most important for various kinds of cordage, it also serves to make paper, cloth (canvas and other kinds), oakum for calking ships, and other products The female flowers of hemp are used medicinally (sometimes called cannabis indica), and the powerful narcotic known as marijuana or HASHISH is procured from hemp, for which reason its cultivation is prohibited in some states An oil obtained from the seed is utilized in making soaps and paints, and the seed is mixed with birdseed Hemp has large, digitately divided leaves with slender segments The male and female flowers are not showy and are borne on separate plants The word *hemp* is used in combination for several other kinds of fiber plants, notably MANILA HEMP, SISAL HEMP, New Zealand hemp, bowstring hemp, ambary or Deccan hemp, and Bombay, sunn, or san hemp

Hempstead 1 Residential village (pop 20,856), on W Long Island, SE N Y, settled 1644, inc 1853 Hofstra College (coeducational, 1935) is here, and a state park is near by **2** Town (pop 1,674), co seat of Waller co, S Texas, NW of Houston, founded 1835 The region produces watermelons, other truck, fruit, and grains An oil field is near by, and Hempstead has a recycling plant "Liendo," outside the town, was the plantation home of Elisabeth NEY

Hems, Syria see HOMS

Hen [Heb, =favor], man who was to have a memorial in the temple Zech 6 14

Hena (hē'nu), unidentified town, on the Euphrates 2 Kings 18 34, 19 13, Isa 37 13

Henadad (hē'nu-), chief of a family active in rebuilding the Temple Ezra 3 9

henbane or **black henbane,** annual or biennial herb (*Hyoscyamus niger*) native to the Old World and naturalized in parts of America It belongs to the nightshade family and has rank-smelling, hairy, and toothed leaves All parts of the plant contain a poison (similar to belladonna), which is extracted from the dried leaves for medicinal use Poultry are often killed by eating the seeds

Henday, Anthony see HENDRY, ANTHONY

Hendaye (ädī'), town (pop. 5,306), Basses-Pyrénées dept, SW France, on the Bidassoa, which forms the frontier with Spain It is an important border station and a beach resort

Henderson, Alexander, 1583–1646, Scottish churchman He is often regarded as the greatest figure in the Church of Scotland after John Knox Although he was presented to the parish of Leuchars by a prelate, he soon became a leading opponent of prelacy and of English domination in the Church In 1638, after the signing of the National Covenant (see COVENANTERS), he was elected moderator of the general assembly at Glasgow, which deposed the bishops and set up Presbyterianism in spite of royal threats. Henderson met King Charles to settle the problem and was favorably received In 1640 he was elected rector of the Univ. of Edinburgh. In

1641 and 1643 he was moderator of the general assembly and in 1643 presented a draft of the Solemn League and Covenant He sat thereafter (1643-46) in the Westminster Assembly. In the year of his death he again met Charles for a conference on church government during the course of the king's alliance with the Scottish army Henderson wrote many speeches and sermons See biographies by J P. Thomson (1912) and R L Orr (1919)

Henderson, Arthur, 1863–1935, British statesman, organizer and leader of the British Labour Party. In early life he worked as an ironworker, and was a labor union leader In 1903 he became mayor of Darlington Elected to Parliament (1903) he became chairman of the new Labour party (1908–10, 1914–17), president of the Board of Education in the coalition ministry (1915–16), and paymaster general (1916–17). In Ramsay MacDonald's first ministry (1924) he was home secretary, and in the second (1929–31) he was foreign secretary Henderson was defeated at the polls in 1931 with the rise of the National government He was president, until his death, of the World Disarmament Conference, and he was awarded the 1934 Nobel Peace Prize His writings include *The Aims of Labour* (1919) See biography by Mary Agnes Hamilton (1938)

Henderson, Arthur, 1894–, British public official, son of Arthur Henderson (1863–1935) He served on the general staff and in the war office during the Second World War In 1947 he was appointed secretary of state for air

Henderson, Leon, 1895–, American economist, administrator of the Office of Price Administration (1941–42), b Millville, N J , grad Swarthmore, 1920 An official of the Russell Sage Foundation (1925–34), Henderson held several posts as economic adviser in the Roosevelt administration before his appointment to the Securities and Exchange Commission in 1939 After leaving the OPA, he became an official of the Research Institute of America

Henderson, Peter, 1822–90, American horticulturist, b Scotland After serving an apprenticeship in gardening in Scotland, he came to the United States (1843) He established his first market-gardening business in Jersey City (1847) and later founded his seed and garden-supply house His methods of growing and marketing both flower and food plants were widely followed and imitated considerable progress in commercial horticulture A prolific writer, he contributed to many periodicals and was author of a number of influential books, including *Gardening for Profit* (1866), *Practical Floriculture* (1869), *Gardening for Pleasure* (1869), and *Henderson's Hand Book of Plants* (1881)

Henderson, Richard, 1735-85, American colonizer in Kentucky, b Hanover co , Va An associate justice of the North Carolina superior court (1769–73), Henderson was long interested in Western lands and was the chief promoter of the TRANSYLVANIA COMPANY He followed (1775) Daniel BOONE to the company's first settlement at Boonesboro (or Boonesborough) on the Kentucky river and in 1779 employed James ROBERTSON to settle the Cumberland river area Virginia and North Carolina voided the company's land grants, and Henderson and his associates were left with a very small portion of the vast territory they had claimed Although primarily a land speculator, Henderson was one of the most important figures in the early expansion of the frontier See Archibald Henderson, *The Conquest of the Old Southwest* (1920), W. S Lester, *The Transylvania Colony* (1935)

Henderson 1 Industrial city (pop 13,160), co seat of Henderson co , W Ky , on the Ohio and S of Evansville, Ind , in a tobacco, corn, fruit, and livestock area Founded in 1797 and named for Richard Henderson, it is an important tobacco-exporting center, with manufactures of wood, food, cotton, and tobacco products John James Audubon lived here (1810-19), near by is Audubon Memorial State Park with a museum and a bird sanctuary. 2 City (pop 7,647), co seat of Vance co , N N C , NNE of Raleigh, settled 1841, inc 1841 It has textile and fertilizer plants and a large tobacco market 3 City (pop 1,771), co seat of Chester co , W Tenn , SSE of Jackson, in a farm and timber area Freed-Hardeman College (junior, coeducational) is here A number of Indian mounds are in the area 4 City (pop 6,437), co seat of Rusk co , E Texas, WSW of Shreveport, La , founded 1844, inc 1877 Henderson has passed through several phases It was a pine-woods lumbering town, then a center of cotton farming, in 1930 near here C M Joiner struck the first gusher of the fabulously rich East Texas oil field, and Henderson became a prosperous oil city Near by is the site of a Shawnee Indian village

Hendersonville, city (pop 5,381), co seat of Henderson co , W N C , in the Blue Ridge SSE of Asheville and near the S C line. It is a mountain resort and a farm trade center with textile mills.

Hendon, urban district (1931 pop. 115,682, 1947 estimated pop. 160,410), Middlesex, England, NW of London. At Mill Hill, a suburb, there is a Roman Catholic missionary college. Hendon's importance has increased with the development of flying, it is the scene of the June Royal Air Force Display

Hendrick, c 1680–1755, chief of the Mohawk Indians, known also as Tiyanoga He became a Christian and was an ally of the British He represented his tribe at the Albany Congress (1754) The next year he was killed fighting for the British at Lake George in the French and Indian War

Hendricks, Thomas Andrews, 1819–85, American political leader, b near Zanesville, Ohio, grad Hanover College, Hanover, Ind , 1841 He practiced law in Indiana and was U S Senator (1863–69) and governor of Indiana (1873–77) He was defeated for Vice President on the Tilden ticket in 1876, but won on the Cleveland ticket in 1884. He died after eight months in office

Hendrix College see CONWAY, Ark

Hendry or **Henday, Anthony,** fl 1748–55, British fur trader and explorer in W Canada, b Isle of Wight. He became a member of the Hudson's Bay Company in 1750 and in June, 1754, led a land expedition to induce the Western Indians to trade at the posts on Hudson Bay Ascending the Nelson river, he reached the Saskatchewan river and from there traveled by foot, the first to explore the great plains between the North Saskatchewan and the South Saskatchewan to the area of the Red Deer river He returned to York Factory in June, 1755, and although he was unsuccessful in procuring Indian trade, he brought back the first reliable reports of the Blackfoot Indians

henequen. see SISAL HEMP

Hengist and Horsa (hĕng'gĭst, hôr'sŭ), names traditionally given to two leaders of a Germanic invasion of Britain Hengist would more properly be written Hengest They are said to have been invited by VORTIGERN in 449 to help the Britons defend themselves against the Picts and Scots to the north, to have settled in Kent, and to have fought a battle with Vortigern, in which Horsa was killed The names may all be mythical, but historians generally agree that the Jutish chief and his retinue did arrive in Kent, did serve a British king, and did revolt and that various battles prepared the way for settlement of Kent by his son and his followers

Henie, Sonja (sō'nyu hĕ'nē), 1913–, Norwegian-American skater, b Oslo, Norway She began ice skating at the age of eight and six years later won the world title for figure skating, which she kept for nine consecutive years She also won, among other honors, the Olympic figure-skating championship in 1928, 1932, and 1936 In 1936 she turned professional and removed permanently to the United States, where she appeared in several movies and made numerous tours of the country She wrote *Wings in My Feet* (1940)

Henle, Jacob (Friedrich Gustav Jakob Henle) (yä'kŏp hĕn'lu, frē'drĭkh gōō'stăf), 1809–85, German anatomist and pathologist He was professor at Gottingen from 1852 to 1885 Henle contributed important work on the microscopic structure of tissues, especially of epithelium and hair, propounded the theory of microorganisms as the cause of infectious diseases, and made a special study of sharks and rays He wrote *Handbuch der systematischen Anatomie* (3 vols , 1866–71) and other outstanding works

Henley, William Ernest, 1849–1903, English poet, critic, and editor Crippled by tuberculosis of the bone, Henley was a giant of a man on crutches, from whom Stevenson modeled Long John Silver Henley was an aggressive exponent of realism, impatient with Victorian prudery in literature and with what he considered the vaporings of the aesthetic movement As editor of several reviews successively, he introduced to the public a galaxy of young writers, including Kipling, Conrad, and Yeats His most famous poems are "England, My England," and "Invictus," which begins, "Out of the night that covers me", they, and perhaps better poems, are in *A Book of Verses* (1888), *The Song of the Sword* (1892), and *For England's Sake* (1900) He collaborated with Stevenson in four plays See biographies by J H Buckley (1946) and John Connell (1949)

Henley-on-Thames (-tĕmz), municipal borough (1931 pop 6,621, 1943 estimated pop 7,327), Oxfordshire, England, at the base of the Chilterns, on the Thames and NE of Reading The river is crossed by a five-arched stone bridge built in 1786 Henley has a 14th-century parish church (restored) and a grammar school founded in 1605 The town is chiefly known as the scene of the annual Henley rowing regatta, which originated in 1839 and in which the London Rowing Club, the Thames Rowing Club, several English college crews, and some American crews take part

Henlopen, Cape (hĕnlō'pŭn), SE Del , at the mouth of Delaware Bay opposite Cape May, N J. A lightship is off the cape, and there is a naval radio station

henna, Old World tropical shrub (*Lawsonia inermis*), valued for its small fragrant flowers, but best known for the reddish or black hair dye obtained from the powdered leaves. Henna dye has long been in use, as evidenced by Egyptian mummies. In the East, hair, beards, nails, and feet have been hennaed, also leathers and the manes of horses.

Hennepin, Louis (hĕ'nupĭn), 1640-1701?, Franciscan Recollect friar and explorer in North America. He came to Canada in 1675, meeting on the journey La SALLE, who made him chaplain of his proposed Western expedition in 1678 After some time spent at Fort Frontenac the party sailed (1679) in the *Griffon*, the first ship on the Great Lakes, for Green Bay La Salle crossed to the Mississippi by the Illinois route and from there sent Hennepin with the expedition, led by Michel Aco, which was the first to explore the upper Mississippi valley They ascended the river to Minnesota, where they were captured by the Sioux In the course of his captivity Hennepin first saw and named the Falls of St Anthony, where Minneapolis was afterwards located He was rescued by DULUTH Hennepin returned to France, and in 1682 appeared his *Description de la Louisiane* He later published his *Nouveau Voyage* (1696) and *Nouvelle Découverte* (1697), in which books he falsely claims to have descended the Mississippi to its mouth In his *Description* he had claimed the leadership and all credit for the upper Mississippi expedition The importance and charm of his narratives, however, cannot be denied He was the first to describe parts of America, as Niagara Falls and the upper Mississippi R G Thwaites's translation, *Hennepin's New Discovery* (1903), contains a biography and bibliography

Henner, Jean Jacques (zhäⁿ zhak' ĕnĕr'), 1829–1905, French figure and portrait painter, son of an Alsatian peasant He won the Prix de Rome in 1858 and in Italy came under the influence of Correggio He is best known for his pictures of nudes in woodland surroundings He is represented in many American galleries, including the Metropolitan Museum and the Corcoran Gallery

Hennessey (hĕn'ĭsē), city (pop 1,342), central Okla , S of Enid, laid out 1889

Henniker (hĕn'ĭkur), town (pop 1,336), S N H , W of Concord, on the Contoocook, settled 1763–64, inc 1768

Henoch (hē'nuk): see ENOCH **2** and HANOCH **1.**

Henri, Robert (hĕn'rĭ), 1865–1929, American painter and teacher, b Cincinnati He studied at the Pennsylvania Academy of the Fine Arts In 1888 he went to Paris, where he worked at Julien's and the Beaux-Arts until, dissatisfied with the schools, he set up his own studio In 1891 he returned to Philadelphia, there his studio became the center for a group of talented artists For the rest of his life he was to preach to devoted friends and students his doctrine of a new and living art for America First in Philadelphia, then at the Chase School in New York, at his own school (1909–12), and at the Art Students League he inspired his students with his dynamic concept of art His own work, proficient and brilliant though it was, is not a measure of his influence in breaking up timid and false traditions and giving courage to a generation of American artists One of The EIGHT, he sponsored the first nonjury exhibit in America Henri excelled in dramatic portraits, examples of which are to be seen in leading museums throughout the country Characteristic are his *Spanish Gypsy* (Metropolitan Mus), *Young Woman in Black* and *Himself* and *Herself* (Art Inst , Chicago), and *Girl with a Fan* (Pa Acad of the Fine Arts) See studies by William Yarrow and Louis Bouche (1921) and Helen Appleton Read (1931)

Henrietta, town (pop 2,391), co seat of Clay co , N Texas, in the valley of the Little Wichita and SE of Wichita Falls It was founded in ranching country in 1857, was abandoned because of Indian attacks, and was renewed after 1873 and incorporated in 1883 It is still much concerned with cattle, but also relies on agriculture and has several small industries, including leatherworking and making of pottery from native clay Oil is produced in the county

Henrietta Maria (mărĭ'ə), 1609–66, queen consort of Charles I of England, daughter of Henry IV of France Although she was a woman of good character and great loyalty, she lacked judgment, and her Catholic faith made her suspect in England Married to Charles in 1625, she encouraged him to coerce Parliament, and by her negotiations with the pope, with foreign powers, and with English army officers, she added greatly to the suspicions against Charles and the fear of a Catholic uprising The fear was groundless, but it was important in precipitating the civil war After 1644 she lived in France, making continual efforts to secure foreign aid for her husband until his execution in 1649 She returned to England after the Restoration, but resumed living in France in 1665 Her influence may have affected the religious beliefs of her sons Charles II and James II, although she herself was unsuccessful in converting them to Catholicism See biography by Carola Oman (1936)

Henrietta of England (Henrietta Anne), 1644–70, princess, called Madame, sister-in-law of Louis XIV of France. The daughter of Charles I and Henrietta Maria of England, she was taken (1646) to France when civil war raged in England, in 1661 she married Philippe I D'ORLÉANS, brother

of Louis XIV. In Louis's behalf she negotiated the Treaty of Dover with her brother, King CHARLES II (1670) She died shortly after her return from England; it was rumored that she had been poisoned by her husband Bossuet's funeral oration for Madame is one of his best-known sermons. See Mme de la Fayette, *Secret History of Henrietta, Princess of England* (Eng tr, 1929)

Henry I or **Henry the Fowler,** 876?–936, precursor of the emperors and German king (919–36), first of the Saxon line of kings and emperors He was, as duke of SAXONY, a turbulent subject of King CONRAD I, who on his deathbed (918) recommended Henry as his successor Elected (919) king by Saxon and Franconian nobles, Henry refused to be crowned by the bishops, probably to safeguard his independence of the Church Unlike his predecessor, Henry made little effort to impose his authority on the feudal dukes Once his position as titular head of a loose confederation had been recognized in Saxony, Franconia, Swabia, and Bavaria, he succeeded (925) in winning LOTHARINGIA from its allegiance to France An invasion of Saxony by the Magyars in 924 ended with a nine-year truce, Henry agreeing to pay a yearly tribute Henry made use of this respite to introduce military reforms in Saxony and Thuringia Saxon soldiers were trained to fight on horseback In the frontier regions, or marches, Henry built walled towns, each of which he made the judicial, commercial, and social center of the surrounding region He further provided for the storage of reserve food for emergencies Henry's new army proved efficient in his campaign against the Wends, from whom he took Brandenburg In 933, after the expiration of the truce with the Magyars, Henry defeated them in a great battle at Riade, near the Unstrut river, in 934 he expanded his frontier at the expense of the Danes. Before his death Henry persuaded the nobles to designate his son Otto I as his successor Henry was recognized even in his own lifetime as the founder of a new realm—Germany —and the restorer of the imperial tradition His wife, Matilda (d 968), founded many monasteries, among them Quedlinburg, where she was buried with her husband As a saint of the Roman Catholic Church, her feast is March 14

Henry II, 973–1024, emperor (1014–24) and German king (1002–24), last of the SAXON line When Otto III died without an heir, Henry, duke of **Bavaria,** great-grandson of King Henry I, and Otto's third cousin, was elected as his successor Henry was accepted, after some difficulties, by the German duchies, but Lombardy remained rebellious until 1004, when Henry entered Italy and was crowned king of the Lombards at Pavia Italian resistance was apparently broken when Pavia was destroyed in a conflict between the citizens and Henry's German followers, but his supremacy was not really established when he went north to meet BOLESLAUS I of Poland Henry expelled (1004) Boleslaus from Bohemia, but the war dragged on until 1018, when Boleslaus received territories in E Germany as Henry's vassal. Returning (1013) to Italy, Henry was crowned emperor at Rome (1014). On his third expedition to Italy (1021–22) he restored order in Lombardy and attended a synod at Pavia where he advocated far-reaching church reform Throughout his reign, Henry relied heavily on ecclesiastic support. He opposed the regular clergy in its jurisdictional struggle with the bishops, and he exercised to the full his right of nominating bishops, forcing his candidates upon obdurate chapters However, both Henry and his empress, Kunigunde of Luxemburg, were distinguished for their piety and have been canonized By his attention to German affairs Henry counteracted the ill effect of his predecessor's exclusive preoccupation with Italy. Henry died childless, he was succeeded by Conrad II

Henry III, 1017–56, emperor (1046–56) and German king (1039–56), son and successor of Conrad II. He was crowned joint king in 1028, and his accession in 1039 went unchallenged Under Henry III the medieval empire probably attained its greatest power and solidity In 1041 Henry defeated the Bohemians, who had been overrunning the lands of his vassals the Poles, and compelled Duke Bretislaus I of Bohemia to become his vassal. Although several expeditions against Hungary failed to establish his authority in that country, Henry was able in 1043 to fix the frontier of Austria and Hungary at the Leitha and Morava rivers, where it remained till 1919 Henry's reign was disturbed by the rebellions of the duke of Upper Lorraine, whom Henry had disappointed in his hope of inheriting all of former Lotharingia. In 1047–50 the barons of the Low Countries (Lower Lorraine) joined in the revolt Henry III thought of himself as a priest-king, and his primary concern was with religious matters He supported the CLUNIAC ORDER In 1043 he proclaimed that he was forgiving his private enemies and giving up all thought of vengeance and urged the nobles to do likewise, but he failed in his purpose of giving his empire permanent peace In 1046 Henry descended into Italy, where he set aside three rival claimants to the papacy at the Synod of Sutri, over which he presided, and caused the election of a reform-minded German in their stead In the same year he was crowned emperor In 1048 and again in 1055 Henry's candidates, LEO IX and VICTOR II, were elected to the papacy Henry III died while trying to put down a new rebellion fomented in Italy and in Flanders by the duke of Lorraine He was succeeded by his young son, Henry IV

Henry IV, 1050–1106, emperor (1084–1105) and German king (1056–1105), son and successor of Henry III He was the central figure in the opening stages of the long struggle between the empire and the papacy During his minority the nobles and high ecclesiastics greatly increased their power at the expense of the royal authority In 1062 Henry was kidnaped by Archbishop Anno of Cologne, who proceeded to enrich his see out of the crown lands, Anno was later forced to share his authority and his plunder with Archbishop ADALBERT of Bremen, a favorite of the young king In 1066 Henry was forced by the nobles to banish Adalbert from court The first task of Henry IV, after assuming control of the government (1065), was to restore his authority in the duchies, especially in Saxony, where particularism was strong By 1075 Saxony was pacified The great crisis of Henry's career, however, was at hand In spite of the pronouncements of Pope GREGORY VII against lay INVESTITURE (1075), Henry made appointments to the sees of Milan, Fermo, and Spoleto and, when the pope reproved him, summoned a council at Worms which declared Gregory deposed (Jan, 1076) Gregory, at a synod in Feb, 1076, declared Henry excommunicate and deposed and absolved his subjects of their oaths of fealty A powerful coalition of German nobles agreed (Oct, 1076) not to recognize the king unless he obtained absolution by February and in any event to decide the question of his fitness to rule at a diet to be held at Augsburg under the chairmanship of the pope To forestall the action of this diet, Henry crossed the Alps in the dead of winter to seek absolution By his humiliation and penitence he moved the pope to grant him absolution at CANOSSA in Jan, 1077 Disappointed, the German nobles elected Rudolf of Swabia king, plunging Germany into civil war Gregory remained neutral until March, 1080, when he renewed Henry's excommunication and deposition and recognized Rudolf's title But Henry was now supported by a large party, German and Italian bishops joined him in declaring Gregory deposed and in electing an antipope, Clement III (see GUIBERT OF RAVENNA) At the death of Rudolf (1080), the German revolt was practically broken, and in 1081 Henry carried the war into Italy After several unsuccessful attempts he occupied Rome in 1084 and was crowned emperor by Clement III He temporarily retired from Rome before the advance of the Normans under ROBERT GUISCARD, who liberated Gregory VII, but upon Henry's return Gregory went into final exile In 1104 the emperor's son, Henry V, rebelled, and only the Rhenish cities were loyal to the emperor Trapped by a promise of conciliation, Henry IV was imprisoned and forced to abdicate (1105) In 1106, just before his death, he escaped and received considerable support An able ruler, Henry IV found his chief support in the lower classes, with which he established more direct relations than any of his predecessors. His reign was characterized by a further spread of market towns, an indication of expanding commercial activities His contest with a revivified papacy was the natural consequence of the reforming activities of his father, his ambitions, moreover, were thwarted by the fact that he was the contemporary of one of the greatest of the popes

Henry V, 1081–1125, emperor (1111–25) and German king (1105–25), son of Henry IV Crowned joint king with his father in 1098, he put himself at the head of the party desiring reconciliation with the pope and, with the approval of Pope PASCHAL II, rebelled against his father (1104) and compelled him to abdicate (1105) Formally reconciled with the Church, Henry V practiced lay INVESTITURE from the beginning of his reign The pope protested against the practice In 1110, Henry having entered Italy, the pope proposed a compact under which the Church, in return for the king's abandonment of lay investiture, was to renounce its claims to the Papal States, except the Patrimony of St Peter Henry accepted the compromise, but when it was announced at St Peter's as a preliminary to his imperial coronation (1111), a violent tumult arose from the clergy. Henry thereupon made pope and cardinals prisoners, in order to procure his release, Paschal conceded to Henry the right to appoint and invest at will and crowned him emperor. Henry returned to Germany, but in 1112 Paschal repudiated his concessions. Henry was faced (1114–21) by rebellions in Saxony which he was unable to put down; he nevertheless went to Italy in 1116 to take possession, as suzerain, of the fiefs of MATILDA of Tuscany and, as heir, of her allodial lands. For supporting an antipope Henry was excommunicated (1118) by Pope GELASIUS II In 1119 he entered upon negotiations with Gelasius's successor, CALIXTUS II, and a compromise on the investiture question was reached at last in the Concordat of Worms (1122, see WORMS, CONCORDAT OF). With his domestic enemies Henry made peace at the Diet of Wurzburg (1121) Henry's empress, MATILDA (who after his death married Geoffrey Plantagenet), bore him no heir, the nobles elected the duke of Saxony to succeed him as Emperor Lothair II. Henry was the last emperor of the Salian line

Henry VI, 1165–97, emperor (1191–97) and German king (1190–97), son and successor of Emperor Frederick I (Frederick Barbarossa) He was crowned king of the Romans at Aachen in 1169 and king of Italy at Milan in 1186 on the occasion of his marriage to CONSTANCE, heiress of Sicily After 1186 he laid waste the lands of the papal allies in Italy and reduced the country to obedience He became regent at his father's departure (1189) for the Third Crusade In 1191 Henry entered Italy on an expedition to conquer the kingdom of Sicily from TANCRED of Lecce Pope CELESTINE III having reluctantly crowned him emperor at Rome, Henry continued southward, assisted by the Pisan and Genoese fleets He failed to take Naples and returned to Germany, where he faced a rebellion fomented by the Guelphs and the nobles of the Lower Rhine (1192–94) Henry secured a powerful bargaining weapon when he obtained custody of RICHARD I of England, an uncle of the Guelph leader, HENRY THE LION Soon after Richard had paid a ransom, had sworn fealty to Henry, and had been released (Feb, 1194), peace was made In Sicily, the death of Tancred favored the success of Henry's second expedition (May, 1194) Palermo fell in November, and on Christmas Day, Henry was crowned king of Sicily Insatiable, Henry dreamed of further expansion Threatening invasion, he intimidated ISAAC II of Byzantium into paying him tribute, and in 1195 he began to promote a new crusade At the Diet of Wurzburg (1196) he proposed that the empire be made hereditary in his family, the Hohenstaufen, and in return offered to transform the feudal fiefs into allods The proposal was defeated, though it found many supporters, and Henry contented himself with securing the coronation of his infant son, FREDERICK II (later emperor), as king Henry died of a fever at Messina just as he was preparing to invade the Holy Land He was succeeded in Sicily by Frederick II and in the rest of the empire by PHILIP OF SWABIA

Henry VII, c 1275–1313, emperor (1312–13) and German king (1308–13) After the murder of King ALBERT I, Albert's eldest son, Frederick of Austria, was set aside by the electors, who also rejected the French prince CHARLES OF VALOIS and chose Henry, count of Luxemburg, as king At the outset of his reign, Henry restored order in Germany by the lavish distribution of the imperial domain and took (1310) the necessary step of increasing his family holdings by marrying his son, JOHN OF LUXEMBURG, to Elisabeth of Bohemia His main interest, however, was in Italy, where he dreamed of reviving the Hohenstaufen domination and where many, among them Dante, welcomed his rule as a means of ending the endless, and by now almost meaningless, strife of the GUELPHS AND GHIBELLINES Entering the peninsula in 1310, he proclaimed himself above all parties and received the homage of leaders of both the chief factions, in Jan, 1311, he was crowned king of the Lombards at Milan A revolt in Milan, though suppressed, had the effect of driving him into the Ghibelline camp and precipitating war with the Guelph cities On June 29, 1312, he was crowned emperor at Rome, but in St John Lateran and by the cardinals, since St Peter's was in the hands of the Neapolitans and the pope was in Avignon Leaving Rome, he besieged Florence, but without success, in 1313, having allied himself with FREDERICK II of Sicily, he pronounced the ban of the empire against Robert of Naples, whom he was preparing to attack when he died of fever Henry VII's abortive Italian campaign only served to prove the futility of any attempt by a 14th-century emperor to revive the ancient imperial policy. He was succeeded by Emperor LOUIS IV

Henry I, 1068–1135, king of England (1100–1135), b. England, youngest son of WILLIAM I (William the Conqueror) He is called Henry Beauclerk He quarreled with his elder brothers, WILLIAM II (William Rufus) and ROBERT II, duke of Normandy, and attempted to establish himself on continental territory with little success When William Rufus was killed, Henry by a sort of coup d'état obtained the English crown to the exclusion of Robert, who was away on crusade. Henry issued a charter promising to right the injustices inflicted by William and to refrain from unjust demands on the Church and the barons. He filled vacant church

offices and recalled ANSELM. His marriage to the daughter of Malcolm III of Scotland, Edith (who took the name of Matilda), gained him some popularity. Robert invaded England in 1101 but was bought off by promises, never subsequently fulfilled, of a pension and military aid on the Continent. When some of the barons in 1102 resisted Henry's program of meting out heavy punishment to all of Robert's allies, the king crushed them by force. Their leader, Robert of Bellême, and others took refuge in Normandy, where they plotted against Henry and harassed the country. In 1105 Henry invaded Normandy, he defeated Robert and the barons the next year at Tinchebrai and imprisoned his brother for life. Henry had been involved since 1100 in a struggle with Pope PASCHAL II and Anselm over investiture. A compromise in 1106 gave investiture with staff and ring to the church but awarded the king the rights of homage for church temporalities and of effective control. Henry's reign continued to be troubled by uprisings in Normandy centering about Robert's son, William the Chto, and encouraged by LOUIS VI of France who was almost constantly at war with Henry. Henry had married his daughter MATILDA to Emperor HENRY V (1114). The heir to the English throne, William Atheling, was drowned (1120), and Henry I's second marriage was childless. The latter years of his reign were marked by his attempts to secure the succession to Matilda, who, left a widow, had married (probably in 1128) Geoffrey IV (Geoffrey Plantagenet) of Anjou. Henry's attempt to force her succession on the barons later led to the long civil war between STEPHEN and Matilda. Henry's reign in England was one of order and progress. Royal justice was strengthened and expanded, the Norman legal system gradually fused with the old Anglo-Saxon. The first of the extant PIPE ROLLS and the first appearance of the Exchequer date from this reign. At this time also the Curia Regis began to develop its administrative functions. See J. H. Ramsay, *The Foundations of England*, Vol. II (1898), G. B. Adams, *History of England 1066–1216* (1905), H. W. C. Davis, *England under the Normans and Angevins* (1930).

Henry II, 1133–89, king of England (1154–89), son of MATILDA and GEOFFREY IV (Geoffrey Plantagenet) of Anjou. His early attempts to recover the English throne, which he claimed through his mother, were unsuccessful. He was made duke of Normandy before Geoffrey's death and in 1151 inherited the Angevin territories. His marriage (1152) to ELEANOR OF AQUITAINE brought him Aquitaine, Guienne, and vast territories in S France. By an invasion of England in 1152–53 he forced King Stephen to acknowledge him as heir, and in 1154 he ascended the English throne, thus controlling a large part of present France and all of England. Although he spent much time on the Continent, he restored order to an England ravaged by civil wars, subdued the barons, centralized the power of government in royal authority, and strengthened the royal courts. Henry's assertion of royal justice was more effective over private feudal courts than over those of the Church. His long controversy with THOMAS À BECKET, whom he had made archbishop of Canterbury, concerned the sole jurisdiction of ecclesiastical courts over "criminous clerks" (clergymen accused of crimes). The king's great council adopted the Constitutions of Clarendon (1164), which brought such clerks into lay courts instead of ecclesiastical courts and imposed other restrictions upon the clergy. Becket protested, was declared a traitor, and fled to France. To avoid a papal interdict, Henry submitted (1170) to an ambiguous reconciliation with the archbishop, but his complaints against Becket's continued insistence on ecclesiastical prerogative resulted in the murder of Thomas by four knights in Canterbury cathedral itself. The crime aroused such indignation that Henry had to do penance, and, though the Constitutions of Clarendon were not revoked, the ecclesiastical courts regained lost ground. Henry undertook an expedition to Ireland (1171–72), where he consolidated temporarily the conquests already made by Richard de Clare (Richard Strongbow), earl of PEMBROKE. Earlier in his reign he had obtained the north counties of England from Scotland and had subdued North Wales. Trouble with Louis VII of France and his successor, PHILIP II, was almost incessant, and after 1172 he was involved in family struggles begun by the revolt of his son Henry, seconded by Eleanor. The other sons—GEOFFREY, Richard (later RICHARD I), and JOHN—were also involved in intrigue. Richard in alliance with Philip of France defeated Henry II in 1189, and the old king, who in his restless energy had remade England, died. He was succeeded by Richard. Henry was the founder of the ANGEVIN or Plantagenet line. See Mrs. J. R. Green, *Henry II* (1888); L. F. Salzman, *Henry II* (1914), H. W. C. Davis, *England under the Normans and Angevins* (1930); G. B. Adams, *Constitutional History of England* (1936).

Henry III, 1207–72, king of England (1216–72), son and successor of JOHN. He became king under a regency; William Marshal, earl of PEMBROKE, and later PANDULF acted as chief of government and PETER DES ROCHES as guardian of the king. In 1217 Louis, the French dauphin (later LOUIS VIII), retired from his invasion of England after defeat. The English barons, his former allies, continued to give trouble, but HUBERT DE BURGH, justiciar and greatest power in the government after 1221, gradually imposed order. In 1227 Henry was granted full powers of kingship, and in 1230, with typical willfulness and against the advice of the justiciar, he led an unsuccessful expedition to Gascony and Brittany. In 1232 the king dismissed his justiciar, seized the power of government, and embarked upon a reign characterized by extravagance, absolutism, and a general incapacity. Despite frequent protests from the barons and from his brother RICHARD, EARL OF CORNWALL, Henry surrounded himself with French favorites, including relatives of ELEANOR OF PROVENCE (whom he married in 1236) and his own Poitevin half brothers. He squandered great sums on futile wars in Gascony. His close alliance with the pope encouraged large papal exactions and a preponderance of foreign clergy in England. Edmund Rich (St. Edmund) and the learned Robert GROSSETESTE, bishop of Lincoln, early protested against Henry's absolutism, but the disaffected barons rebelled ineffectively until Simon de MONTFORT, earl of Leicester, became their leader. Henry had estranged him in 1252 by alleging dishonesty in Simon's rigorous governorship of Gascony. In 1254 Henry attempted to put his son, Edmund, earl of LANCASTER, upon the Sicilian throne. The barons refused the necessary funds and in 1258 forced Henry to surrender the government to a committee appointed by the barons and king. This was accomplished by the Provisions of Oxford (1258), reinforced by the Provisions of Westminster (1259). Henry renounced the agreements, with papal sanction, and in 1263 war broke out (see BARONS' WAR). An attempt to have Louis IX of France arbitrate the dispute led to a declaration completely in the king's favor, and the war was renewed. Montfort won at Lewes (1264) and summoned (1265) his famous representative Parliament. The heir to the throne, Edward (later EDWARD I), was a hostage to the barons, but he escaped to lead the royal troops to decisive victory at Evesham (1265), where Simon de Montfort was killed. By 1267 all the barons had capitulated, but Montfort and his allies had prepared England for the great constitutional developments to follow in the reign of Edward I. From 1267 on the king's son actually ruled the realm and Henry was king in name only. Henry III has suffered at the hands of many historians not only because of his manifest ineptitude for rule but also because of the hostility of contemporary chroniclers, especially Matthew Paris. His long reign, however, showed progress in several respects. Learning flourished, particularly at Oxford, where Grosseteste and Roger BACON inspired others by their intense pursuit of knowledge and the championing of the natural sciences. Art continued to develop in sculpture and especially in architecture, as shown in Salisbury cathedral and Westminster Abbey. Commerce and industry throve, though interrupted by warfare. See Cardinal F. A. Gasquet, *Henry the Third and the Church* (1905), Kate Norgate, *The Minority of Henry III* (1912), H. W. C. Davis, *England under the Normans and Angevins* (1930), F. M. Powicke, *King Henry III and the Lord Edward* (1947).

Henry IV, 1367–1413, king of England (1399–1413), eldest son of JOHN OF GAUNT and Blanche, daughter of Henry, duke of Lancaster, grandson of Edward III, b. Bolingbroke, Lincolnshire. Sometimes styled Henry of Bolingbroke, he was also called Henry of Lancaster and by 1377 had become the earl of Derby. In 1380 he married Mary Bohun, coheiress of the earl of Hereford. He opposed Richard II in 1387, siding with his uncle, Thomas of Woodstock, duke of GLOUCESTER, and became one of the lords appellant who ruled England for a year. In 1390 he served in Lithuania with the Teutonic Knights and returned to England in 1391. Again, in 1393, he went to Lithuania and from there to Jerusalem. He joined his father and Richard against Gloucester after his return to England and was made duke of Hereford in 1397. After a quarrel with the duke of Norfolk, whom he accused of treason against Richard (see NORFOLK, THOMAS MOWBRAY, DUKE OF) in 1398, he was banished for six years by the king, who promised that Hereford should not be deprived of his heritage. However, when John of Gaunt died in 1399 Richard confiscated the estate. Taking advantage of Richard's absence in Ireland and the widespread dissatisfaction with Richard's rule, Hereford landed in England in July, 1399, gained ample support, and forced the surrender of Richard, who had returned, in August. Richard consented to abdicate, and Henry, upon claiming the throne, was immediately confirmed by Parliament in September. He thus, by revolution and election, founded the Lancastrian dynasty. The new king was immediately faced with insurrections. In Jan., 1400, discontented followers of Richard rebelled but were put down, and most of the leaders of the rebellion were subsequently executed. Richard himself died at Pontefract Castle, either by self-starvation or at the orders of Henry. The Scots and the Welsh, aided by France, also revolted in 1400. The former were decisively defeated in 1402 at Homildon Hill, but the Welsh continued hostilities. The Percies—Henry Percy (Henry Hotspur) and his father, the earl of Northumberland—dissatisfied with the king's reward for their services, especially at Homildon Hill, rebelled and were defeated at Shrewsbury in 1403. A rebellion in the north in 1405 was crushed and the leaders, Mowbray, earl of Nottingham, and Archbishop Scrope, were executed, for their deaths Henry was severely criticized. The capture of James (later James I), heir to the Scottish throne, made relations with Scotland more peaceful, though trouble continued with Robert Stuart, earl of Albany. Northumberland's new rebellion was put down at Branham Moor in 1408, the Welsh were crushed shortly afterwards though Owen Glendower was not captured, and French armies ceased to harry English possessions in France. No sooner had these troubles ended than others began for Henry—a distressing illness which left him an invalid much of his few remaining years and a somewhat obscure strife between two parties for control of the council. The king's friend, Archbishop Arundel, was opposed by the prince of Wales and his half uncles, Thomas and Henry Beaufort. Henry V came to a throne made temporarily secure by the military efforts of his father. But although Henry IV had stubbornly maintained the prerogatives of the crown against Parliament, he had lacked the skill and patience to restore the financial stability of the crown, now enormously in debt, and to provide a satisfactory administration of civil justice. Shakspere's play *Henry IV*, concerned with the revolts against Henry, is somewhat inaccurate historically. See J. H. Wylie, *History of Henry IV* (1884–98).

Henry V, 1387–1422, king of England (1413–22), son of Henry IV. He was probably brought up under the care of his uncle, Henry Beaufort. He was knighted by Richard II in 1399 and created prince of Wales on the accession of his father in the same year. With his father, with Henry Percy (Harry Hotspur), and later by himself, he led armies against Owen Glendower in Wales and there gained valuable military and administrative experience. Although wounded, he figured largely in the royal victory over the Percies at Shrewsbury (1403), but Shakspere's story that he slew Hotspur is improbable. Henry began (c. 1409) to work actively in the privy council, over which he presided during his father's illness of 1410–11. In favoring the Burgundians rather than the Armagnacs in France he disagreed with the king, and a suggestion by his followers that he should succeed immediately to his father's throne led to his dismissal from the council (1412). He became king, however, upon his father's death in 1413, dismissed the incumbent ministers, and made Henry Beaufort chancellor and the earl of Arundel treasurer. A political and religious rebellion by the Lollards, led by Sir John Oldcastle, resulted in a strong parliamentary statute (1414) against the sect, but trouble continued intermittently until the execution of Oldcastle in 1417. Determined to regain lands in France held by his ancestors, Henry arranged with Burgundy a secret pact and prepared to attack France, thus reopening the HUNDRED YEARS WAR. The French refused to meet his extravagant demands, and he launched his first invasion in 1415. He laid successful siege to Harfleur and marched toward Calais, having announced his claim to the throne of France. He met and defeated a superior French force in one of the most famous battles of English history at Agincourt (1415). Henry then received in England enthusiastic acclaim which for the time overshadowed English political and economic unrest. In 1416, in an attempt to heal the schism in the Church, Sigismund (later Emperor SIGISMUND) visited England but failed to arrange the necessary peace between England and France. Henry, however, succeeded in forming an alliance with Sigismund and in extending his agreement with the Burgundians. In 1417 Henry led another expedition to France, reduced Toques and Caen, and smaller forces were sent out from Caen with success. In 1419 Rouen capitulated, and Normandy was in English hands. The murder of the duke of Burgundy by a favorite of the French dauphin helped to promote a close alliance between the Burgundians and the English. In 1420 Henry married CATHERINE OF VALOIS and agreed to rule France in the name of her father, who accepted Henry as his successor. The English king continued conquests to consolidate his holdings and late in 1420 entered Paris. The following year he returned with his wife to England, there made more military preparations despite considerable popular opposition to further war, and embarked on his third invasion of France. After a year of minor victories, he fell ill and died on Sept. 1, 1422. Henry had abandoned his early recklessness (celebrated and probably exaggerated by Shakspere) and had ruled with justice and indus-

try He lifted England from the near-anarchy of his father's reign to civil order and a high spirit of nationalism His main interest, however, was in gaining control of lands in France—lands which he sincerely but mistakenly believed to be his right His engaging personality, his military successes, and his care for his less fortunate subjects made him a great popular hero He exhibited military genius characterized by brilliant daring, patient strategy and diplomacy, and attentiveness to detail The wars, however, placed the crown heavily in debt and left the nation with economic and military problems which could not be met in the reign of his son, Henry VI See J H Wylie and W T Waugh, *The Reign of Henry V* (1914–29), K H Vickers, *England in the Later Middle Ages* (1930), E F Jacob, *Henry V and the Invasion of France* (1946)

Henry VI, 1421–71, king of England (1422–61, 1470–71) The only son of Henry V and Catherine of Valois, he became king of England when he was not yet nine months old When his grandfather, Charles VI of France, died, Henry was proclaimed king of France by the English, in accordance with the terms of the Treaty of Troyes (1420, see TROYES, TREATY OF) The French, however, recognized the son of Charles VI as Charles VII During Henry's early years, England was under the protectorate of his uncles, JOHN OF LANCASTER, duke of Bedford, who was regent in France, and Humphrey, duke of GLOUCESTER Gloucester held little real power, the actual rule being exercised by a council After the English defeat by JOAN OF ARC at Orléans in 1429 and Charles VII's coronation at Rheims shortly thereafter, the English attempted to protect their interests in France by crowning Henry king of France at Paris in 1431 After the death of John of Lancaster in 1435 and the defection of Burgundy from the Anglo-Burgundian alliance, the English cause in France became hopeless From c 1435 a faction headed by Henry Cardinal Beaufort, and later by William de la Pole, earl of Suffolk, controlled English policy Hoping to strengthen the English position in France, Suffolk negotiated a marriage for Henry with MARGARET OF ANJOU in 1445 This marriage was favorably received in England, but when Henry, influenced by his wife, surrendered Maine to Charles VII, Suffolk lost his popularity He was impeached in 1449 and mysteriously murdered at sea when en route to the Continent The rebellion of Jack CADE, which broke out just after Suffolk's murder, was but one of many riots and uprisings indicating popular dissatisfaction with the English government The faction headed by Queen Margaret and Edmund Beaufort, duke of Somerset, which controlled the king after Suffolk's death, was opposed by Richard, duke of YORK, the most powerful noble in the kingdom and next in line of succession to the throne The struggle between these two factions developed into a dynastic battle between the Lancasters and the Yorks known as the Wars of the ROSES In 1453 Henry became insane, a few weeks before the birth of his son The duke of York was made protector in spite of the protests of Margaret, but in 1454 when the king recovered, York was excluded from the council York met (1455) the Lancastrians at St Albans in a conflict generally regarded as the first battle of the Wars of the Roses, Somerset was killed, and Henry was captured Henry's mind again gave way and York was again made protector, but Henry recovered, and the protectorate ended The Yorkist party suffered defeat at Ludlow in 1459, but won a victory at Northampton the following year Henry again was made prisoner York was made protector once more and named successor to the crown over the claims of Henry's son York was killed at Wakefield in 1460, but his son Edward defeated the Lancastrian forces at Mortimer's Cross, entered London, and was proclaimed king as EDWARD IV (1461) At the second battle of St Albans (1461) Henry, who was with the Yorkist forces, escaped to join his wife He remained in Scotland during the subsequent fighting until 1465, when he was captured and put in the Tower When Richard Neville, earl of Warwick, crossed to England in 1470, Edward IV fled to Holland and Henry was restored to the throne, but the victories of Edward IV at Barnet and Tewkesbury put an end to Henry's reign, one of the most disastrous in English history. Edward IV took secure possession of the crown, and the unfortunate Henry died, perhaps murdered, in the Tower in 1471 Some of the events in the life of Henry VI are recorded in three chronicle plays by Shakspere See Charles Oman, *History of England, 1377–1485* (1906), K H Vickers, *England in the Later Middle Ages* (1914), Mabel E Christie, *Henry VI* (1922)

Henry VII, 1457–1509, king of England (1485–1509) Posthumous son of Edmund Tudor, earl of Richmond, Henry's mother was Margaret Beaufort, a descendant of Edward III through John of Gaunt He was brought up by his uncle, Jasper Tudor, in Wales His uncle contrived to hide him during the reign of the jealous Edward IV and in 1471, after the death of the imprisoned Henry VI in the Tower, took the young Henry, now head of the house of Lancaster, to Brittany for safety. Edward tried unsuccessfully to have him returned to England. The death of Edward (1483) and the murder of his sons by his successor, RICHARD III, left Henry the natural leader of the party opposing Richard, whose tyranny quickly alienated the English people In return for Henry's promise to marry Elizabeth, daughter of Edward IV, Henry Stafford, duke of Buckingham, joined Henry in a revolt against Richard, a great storm at sea and floods in England, however, prevented the success of the venture In 1485, aided by other English refugees, Henry again crossed the Channel, landed in Wales, raised an army in the west, and in the battle of Bosworth Field defeated the royal forces of Richard, who was slain Henry advanced to London, was crowned, and in 1486 married Elizabeth, thus uniting the houses of York and Lancaster and founding the Tudor dynasty Henry's accession marks the end of the Wars of the Roses and the beginning of what is considered the modern period of English history The early years of Henry's reign, however, were disturbed by Yorkist attempts to regain the throne The first serious attempt was the uprising in favor of the imposter, Lambert SIMNEL, it was easily crushed (1487) The French invasion of Brittany aroused great antagonism in England and ultimately, in concert with Spain and Emperor Maximilian I, Henry led an army against Boulogne, but accepted the peace offers of Charles VIII, the Treaty of Étaples (1492) followed In 1494 Henry sent Sir Edward POYNINGS to Ireland to consolidate British rule there Poynings's Law, passed by the assembly at Drogheda (1494), provided for the enforcement in Ireland of English statutes and completely subjugated the Irish Parliament to British control In 1496 Henry joined the Holy League to oppose the French in Italy Ferdinand and Isabella of Spain, anxious for an alliance with Henry, sent an ambassador to Scotland to relieve Henry of hostility there The Yorkist pretender, Perkin WARBECK, who had been favored by the Scottish king, James IV, was forthwith sent out of Scotland and shortly was thereafter defeated in an attempted invasion of Cornwall Henry was willing to marry his daughter, Margaret, to James, but the latter, instead, attempted (1497) an invasion of England In 1499 a treaty of peace between the two countries was followed by the marriage (1500) of Margaret and James—a marriage which led ultimately to the union of Scotland and England By a treaty (1501) with Maximilian, Henry was able to balk still another threat to his throne, this time by Edmund de la Pole, earl of Suffolk In 1501 Henry had married his son, Arthur, to KATHARINE OF ARAGON, daughter of Ferdinand and Isabella When Arthur died in 1502, Henry, now a widower, made the startling proposal that he should marry his own daughter-in-law An agreement was reached, however, by which Katharine should marry Arthur's brother, Henry (later HENRY VIII) On the death of Isabella (1504) Henry made alliances with her successors in Castile, Philip I and Joanna After Philip's death Henry proposed that he should marry Joanna, who had, however, become definitely insane Henry then opened unsuccessful negotiations for the marriage of his daughter Mary to Philip's son (later Emperor Charles V) Relations between Henry and Ferdinand became strained, the latter allied himself with the French while Henry arranged treaties with Maximilian Shortly thereafter Henry contracted the illness from which he never recovered Henry was an astute political leader He established the Tudor tradition of autocratic rule tempered by a sense of justice that endeared him, as it did his great successors, Henry VIII and Elizabeth, to the English people In Henry's latter years, however, his extortionist practices alienated many His marriage and his relentless suppression of Yorkist plots to regain the throne brought order out of chaos In his suppression of the recalcitrant nobles he was greatly assisted by the establishment of the court of the STAR CHAMBER (1487) as a supremely powerful judiciary body His diplomatic abilities kept England at peace, and he arranged a favorable commercial treaty with the Netherlands England's navy was developed and explorations in the New World begun See biographies by James Gairdner (1889) and Gladys Temperley (1914), A D Innes, *England under the Tudors* (1905), H A L Fisher, *History of England, 1485–1547* (1906), A F Pollard, *The Reign of Henry VII* (1913–14)

Henry VIII, 1491–1547, king of England (1509–47), second son of HENRY VII He was created prince of Wales in 1503. In his youth he was well educated in the new learning of the Renaissance and developed the skill in sports which was to endear him to his subjects. When he succeeded to the throne in 1509, he inherited from his father a full exchequer and a precedent for absolute rule. Henry soon married his brother Arthur's widow, KATHARINE OF ARAGON, a dispensation having been obtained from the pope in 1504 In 1511 Henry joined Pope Julius II, Ferdinand of Spain, and the Venetians in their Holy League against France. With his chief minister Thomas WOLSEY, he followed (1513) his army to France, captured Thérouanne and Tournai, and then returned to England after the invading Scottish forces under JAMES IV had been defeated at FLODDEN by the earl of Surrey (later duke of NORFOLK). The projected marriage of Henry's sister MARY OF ENGLAND to Ferdinand's grandson Charles (later Emperor CHARLES V) was delayed Henry, now initiated into the usages of continental politics, married Mary to Louis XII of France (1514). This alliance ended the next year, however, at the death of Louis and the accession of ambitious FRANCIS I, who promptly tried to rouse Scotland against England Rapid changes in the European situation following Ferdinand's death (1516) enabled Wolsey to conclude a new alliance with France, and Henry's daughter Mary (later MARY I) was pledged (1518) to marry the dauphin When Charles, already king of Spain, became emperor in 1519, England held the balance of power between the empire and France War was inevitable Despite the show of amity between Henry and Francis on the FIELD OF THE CLOTH OF GOLD, England in 1522 joined Charles against France England's participation was unimportant except that Henry's efforts to levy heavy taxes met with stubborn resistance from both Parliament and people When Charles won a decisive victory in 1525 and refused England any part of the spoils, Henry tried to curb the alarming rise of imperial power by an unpopular alliance with France Despite the dwindling exchequer and popular opposition to increasing inclosures, England had meanwhile prospered internally under the strong administration of Wolsey, to whom Henry gave almost complete control The execution (1521) of Edward STAFFORD, 3d duke of Buckingham, for alleged treason, demonstrated Henry's power over the weakened nobility The court remained a center of the new learning, and Henry himself in 1521 earned from the pope the title of "Defender of the Faith" for a treatise against Luther By 1527 Henry had determined to divorce Katharine The queen seemed unlikely to have more children and was persistently loyal to Spain, Henry was infatuated with Anne BOLEYN The plan was to have the marriage declared invalid by reason of the illegality of the dispensation of 1504 under which Henry and Katharine had been permitted to marry Pope CLEMENT VII, however, resisted the demands of both Wolsey and Henry Finally he gave authority to a commission consisting of Cardinals Wolsey and CAMPEGGIO to decide the issue in England Katharine refused to retire to a convent and denied the jurisdiction of the court Before a decision could be announced Clement had the hearing adjourned and summoned it (1529) to Rome The failure of the commission led to the downfall of Wolsey and to the initiation by Henry, with the help of Thomas CROMWELL, of an anticlesiastical policy intended to force the pope's assent to the divorce The "Reformation Parliament," responsive both to Henry and to popular antagonism against the clergy, readily followed the first steps of the king's attack on Rome, but the papacy held firm In 1532 the English convocation accepted the submission of the clergy to the crown, and Sir Thomas MORE resigned the chancellorship Cromwell was now clearly the king's chief minister, and the subservient Thomas CRANMER became archbishop of Canterbury In 1533 Henry married Anne, Cranmer proclaimed the marriage with Katharine invalid, and the pope excommunicated Henry By the end of 1534 Parliament had prohibited appeals to the papal court, stopped all payments to the pope, and transferred the papal powers to the king, who now became without qualification the supreme head of the English church No change was made in doctrine, outside of the denial of papal authority, but the break with Rome was complete, the Church of England (see ENGLAND, CHURCH OF) established, and the way opened in England for PROTESTANTISM and the REFORMATION Any effective opposition to the king was thoroughly suppressed by the Act of Succession entailing the crown on Henry's heirs by Anne, by an extensive and severe Act of Treason, and by the strict administration of the oath of supremacy Under Cromwell's supervision, a visitation of the monasteries in 1535 led to an act of Parliament in 1536 by which the smaller monasteries reverted to the king, and the others were soon preempted By redistributing some of this property among the landed gentry, Henry acquired the loyalty of a large and influential group In 1536 Anne Boleyn, who had given birth to Elizabeth but no male heir, was convicted of adultery and incest and beheaded, 10 days later Henry married Jane SEYMOUR, who in 1537 bore a son (later Edward VI) and died Meanwhile in 1536–37 Henry had dealt brutally but effectively with rebellions in the north by subjects objecting to economic hardships and the religious innovations (see PILGRIMAGE OF GRACE) In 1537 Henry licensed the publication of the Bible in English He still pursued a conservative policy in religious doctrine; the SIX ARTICLES passed by Parliament in 1539 were fundamentally Catholic Henry's foreign policy had been to maintain the French alliance until the outbreak of intermittent wars between France and the empire in 1536 left him comparatively safe In 1540 Henry married ANNE OF CLEVES, but disliked her and

found the alliance burdensome Anne was consequently divorced, and Cromwell, who had promoted the match, was beheaded Henry then married Catherine Howard, but she met (1542) the fate of Anne Boleyn, and Catherine Parr became his sixth queen (1543) In 1542 war had begun again with Scotland, still controlled through James V in French and Catholic interests The fighting culminated in the rout of the Scots at Solway Moss and the death of James Henry's efforts to unite the two kingdoms with a pledge of marriage between young Mary Queen of Scots and his own son, Edward, were defeated by Cardinal Beaton and Mary of Guise, and repeated English raids only allied Scotland more closely with France In 1543 England joined Charles in war against France, and Henry was able to take Boulogne The expensive war dragged on until 1546 Henry then was able to secure a payment of indemnity for the city Wales had been officially incorporated into England in 1536 with a great improvement in government administration there In Ireland, however, Henry found a thorough conquest and colonization too expensive Although he derived considerable funds from the dissolution of monasteries there and assumed (1541) the titles of king of Ireland and head of the Church of Ireland, he was forced to adopt a conciliatory policy toward Irish leaders The coming of the Jesuits in 1542 foreboded future trouble In the last years of his reign, Henry moved gradually toward Protestantism The Six Articles had been only fitfully enforced, the use of the English Bible was cautiously increased, seizure of church property continued, and the destruction of relics and shrines was begun At Henry's death, the council which he had appointed for the minority of Edward VI leaned toward the new doctrines As a young man Henry was accomplished, engaging, and far from vicious, but if his tremendous popularity with his subjects persisted until the last, his moral fiber did not There is good evidence that he advanced personal desires under the guise of public policy or moral right, forced his ministers to pay extreme penalties for his own mistakes, and summarily executed many with little excuse But there are several factors which mitigate his despotism as a king The imposition of his will was tempered with a steadily maturing political insight into the revolutionary times in which he ruled Furthermore, he could have imposed his absolute rule only upon a nation willing to accept it Although Henry often packed Parliament, the increased importance of that institution during his reign attests the truth of his statement that king and Parliament worked as one body politic Finally, under his strong hand England enjoyed a comparatively peaceful and prosperous transition at a time when severer wars and religious persecution were ravaging the rest of Europe A historical play about Henry VIII is attributed in part to Shakspere See biographies by A F Pollard (1902), Francis Hackett (1929), and Theodore Maynard (1949, a Roman Catholic view), Kenneth Pickthorn, *Early Tudor Government* (1934), H M Smith, *Henry VIII and the Reformation* (1949)

Henry I, c 1008–1060, king of France (1031–60), son and successor of Robert II In his reign the French monarchy was at its weakest To defend his throne against his mother and his younger brother Robert and subsequently against the counts of Blois, he secured, at the cost of territorial concessions, the aid of Robert I, duke of Normandy, and of Geoffrey Martel, count of Anjou After his brother's submission he unwisely invested him with the duchy of Burgundy, setting up a powerful rival to the French kingdom He found the chief enemy of his later reign in Robert of Normandy's son William, later William I of England, who successfully resisted two invasions by Henry Henry was succeeded by his son, Philip I

Henry II, 1519–59, king of France (1547–59), son of Francis I Weak and pliant in disposition, he was governed throughout his reign by Anne de Montmorency, by his mistress Diane de Poitiers, and by François and Charles de Guise He continued the struggle against Emperor Charles V and Charles's son Philip II of Spain, who was allied with Mary Tudor of England, until the Treaty of Cateau-Cambrésis (1559) ended French pretensions to Italy In 1558 Calais was conquered from the English Francis issued a series of increasingly severe edicts against the Protestants and established more firmly the absolute royal power His queen, Catherine de' Medici, played a minor role during her husband's reign Henry, who was accidentally killed by Gabriel de Montgomery in a tournament, was succeeded by Francis II See H N Williams, *Henry II. His Court and Times* (1910)

Henry III, 1551–89, king of France (1574–89), son of Henry II and Catherine de' Medici, successor of his brother, Charles IX As leader of the Catholic party, Henry (then duke of Anjou) defeated (1569) the Huguenots at Jarnac and Moncontour, refused (1571), on religious grounds, to proceed with negotiations for his marriage to Queen Elizabeth of England, and helped instigate the massacre of Saint Bartholomew's Day Elected king of Poland (1573), he returned to France at his brother's death Henry's reign was almost continually disturbed by the Wars of Religion By the Edict of Beaulieu (1576) he made concessions to the moderates and the Protestants which led to the formation of the Catholic League (see League) by Henri, 3d duc de Guise Throughout the ensuing troubles Henry vainly sought to increase his own power by playing the League against the Protestants The death (1584) of his brother Francis, duke of Alençon, made Henry the last male member of the house of Valois, his recognition of the Protestant Henry of Navarre (later Henry IV) as heir presumptive was opposed by Henri de Guise In the resulting struggle (the War of the Three Henrys), Navarre defeated the king's troops at Coutras (1587) Taking advantage of the king's weakness, Henri de Guise revolted against him and, with the help of the Parisian populace, expelled him from Paris on the Day of the Barricades (May 12, 1588) Changing sides once more, Henry III procured the assassination of Henri de Guise and his brother Louis and joined forces with Henry of Navarre for the recovery of Paris In the siege he was stabbed by Jacques Clément Weak, debauched, and unscrupulous, Henry III left France torn by civil war and plunged in financial anarchy

Henry IV, 1553–1610, king of France (1589–1610) and of Navarre (1572–1610), son of Antoine de Bourbon and Jeanne d'Albret, first of the Bourbon kings of France Reared as a Protestant, he was recognized by Coligny as a chief of the Huguenots (1569) A few days after his marriage (Aug 18, 1572) with Margaret of Valois, sister of King Charles IX, the massacre of Saint Bartholomew's Day took place Henry saved his life by abjuring Protestantism, but he remained a virtual prisoner of the court until 1576, when he escaped and returned to the Protestant faith Upon the death of Francis of Alençon (1584) he was recognized by King Henry III as his heir presumptive, but the Catholic League (see League), headed by Henri, 3d duc de Guise, refused to recognize a Protestant as heir and persuaded the king to send an army to force Henry's conversion In the resulting war (named the War of the Three Henrys after its chief protagonists, Henry III, Henry of Navarre, and Henri de Guise), Henry of Navarre won the victory of Coutras (1587), but came to the king's support when the League revolted against him (1588) After Henry III's death, Henry IV defeated the League forces under Mayenne at Arques (1589) and Ivry (1590), but was unable to capture Paris when the League received Spanish aid In 1593 he again abjured Protestantism, allegedly with the remark, "Paris is well worth a Mass" He was received in Paris in 1594 His conciliatory policy soon won him general support To cleanse France of Spanish influence, Henry declared war on Spain (1595) and brought it to a successful conclusion with the Treaty of Vervins (1598) He then turned to the internal reconstruction of his war-ravaged kingdom With the Edict of Nantes (1598) he settled the Protestant question Aided by Sully, he restored some measure of financial order, encouraged agriculture, founded new industries, built roads and canals, expanded foreign trade through commercial treaties with Spain, England, and Turkey, and encouraged colonization of Canada Anxious to see prosperity reach all classes, he invented the slogan "a chicken in every peasant's pot every Sunday" In foreign policy, Henry sought to form combinations against the Spanish and Austrian Hapsburgs He was preparing for war against these powers when he was stabbed to death by François Ravaillac, a religious fanatic Henry's marriage with Margaret of Valois was annulled in 1599 In the same year his mistress, Gabrielle d'Estrées, whom he intended to marry, died In 1600 he married Marie de' Medici, who was regent during the minority of their son, Louis XIII Henry's reign saw the transition of French arts and literature from the Renaissance to their classical period His tolerance and moderation reflected the spirit of his contemporary, Montaigne Numerous anecdotes and legends bear witness to his gallantry, his Gallic wit, and his concern for the common people, which have made him the most popular king among Frenchmen See biographies by P F Willert (1893), Quentin Hurst (1938), and Heinrich Mann (2 vols, Eng tr, 1937–39)

Henry V, king of France see Chambord, Henri, comte de

Henry I, German king see Henry I, precursor of the emperors

Henry I, 1204–17, Spanish king of Castile (1214–17), son and successor of Alfonso VIII At his death after a short, uneventful reign, his sister Berenguela, the rightful heir, renounced the crown in favor of her son, Ferdinand III

Henry II or **Henry of Trastamara** (trăstŭmā'rŭ), 1333?–1379, Spanish king of Castile and Leon (1369–79), illegitimate son of Alfonso XI He took part in unsuccessful revolts against his half brother, Peter the Cruel, and in 1366, with the aid of Du Guesclin, drove Peter from the throne Peter having secured the aid of England, Henry was defeated by Peter and Edward the Black Prince at Nájera (1367), but after Edward's departure Henry defeated and killed Peter (1369). John of Gaunt, son-in-law of Peter the Cruel, and Ferdinand I of Portugal contested his title as king and the succession of his son, John I

Henry III, 1379–1406, Spanish king of Castile and Leon (1390–1406), son and successor of John I He consolidated the royal authority against the nobles and undertook an expedition to the north shore of Africa, destroying Tetuán (1400) Henry was succeeded by his son John II

Henry IV, 1425–74, Spanish king of Castile and Leon (1454–74), son and successor of John II His weakness opened the way to anarchy, and his state was virtually ruled by the ambitious nobles Henry at first named his sister Isabella (later Isabella I) as his successor, but later designated Juana la Beltraneja At his death civil war broke among contenders for the succession

Henry, prince of Prussia, 1726–1802, brother of King Frederick II of Prussia He was one of the ablest generals in the Seven Years War

Henry, Alexander, two fur traders of the Old Northwest, each of whom left a valuable journal of his travels and experiences **Alexander Henry**, the elder, 1739–1824, b New Brunswick, N J, served under Jeffrey Amherst in the last of the French and Indian Wars As a fur trader he barely escaped massacre by the Indians at Michilimackinac in Pontiac's Conspiracy Captured by the Ojibwa, he was adopted and protected by a family and made his way back to Fort Niagara in time to join Bradstreet's army in lifting the siege of Detroit He returned to fur trading and in 1775 penetrated the Old Northwest to the region of the Saskatchewan Competition with the Hudson's Bay Company caused a body of the free traders, among them Henry, Peter Pond, and the Frobishers, to unite as the group which eventually became the powerful North West Company His *Travels and Adventures in Canada and the Indian Territories* was published in 1809 The date and place of birth of his nephew, **Alexander Henry**, the younger, d 1814, are not known His journal of 1799–1814, edited by Elliott Coues (together with the journal of David Thompson) as *New Light on the Early History of the Greater Northwest* (1897), describes his adventures as a trader of the North West Company on the Red, Pembina, and Saskatchewan and Columbia rivers and is particularly valuable for its account of the Indian tribes of those regions. Henry was drowned near Astoria

Henry, Edward Lamson, 1841–1919, American genre painter, b Charleston, S C, studied at the Pennsylvania Academy of the Fine Arts His paintings, mostly in private collections, are accurate representations of their era *Initial Excursion on the First Railway, New York* is owned by the Albany Historical Society He was a member of the National Academy of Design

Henry, Joseph, 1797–1878, American physicist, b Albany, N Y, educated at Albany Academy. He taught (1826–32) mathematics and natural philosophy at Albany Academy and was professor of natural philosophy (1832–46) at Princeton (then the College of New Jersey) From 1846 he served as the first secretary and director of the newly founded Smithsonian Institution, he introduced and developed many of its activities and established its general policies Before assuming the responsibilities of his position at the Smithsonian Institution, he had made notable contributions to the physical sciences, especially in electromagnetism Improving upon the electromagnet developed by William Sturgeon, Henry produced a much stronger electromagnet, which came into general use He demonstrated the effect of connecting the coils in series and in parallel and employed the series circuit to operate an electromagnetic telegraph of his own invention He discovered self-inductance, and the unit of inductance is for that reason often called the henry Independently of Michael Faraday he discovered the principle of the induced current, basic to the dynamo, transformer, and many other devices, Henry's experiments in this field may have antedated Faraday's detection of the current, but he acknowledged the priority of Faraday, who had published his results earlier Henry invented a small electromagnetic motor, extended the work on induced currents to show that an induced current can be used to induce another current in a near-by circuit and that resulting currents in turn can induce others, invented types of galvanometers for use in his experiments, employed principles later incorporated in transformers, and made numerous other contributions. See biography by Thomas Coulson (1950)

Henry, O., pseud of **William Sydney Porter**, 1862–1910, American short-story writer, b Greensboro, N C He went to Texas in 1882 and worked at various jobs—as teller in an Austin bank (1891–94) and as newspaperman In 1896 an unexplained shortage in the Austin bank was charged to him He fled to Honduras, but returned and served

three years in prison. There he cultivated the art of writing. By 1903 he was in New York, writing a story a week for magazines Each story was short, simple, and with an unexpected and often ironic ending He caught the color and swift movement of the city in the stories collected in *The Four Million* (1906), *The Voice of the City* (1908), *Options* (1909), and others Some of his stories deal with the Southwest, and his only novel, *Cabbages and Kings* (1904), is set in Honduras His fugitive pieces from the Houston *Post* were collected by M S Harrell as *O. Henry Encore* (1939) See biographies by C. A Smith (1916) and R H Davis and A B Maurice (1931), bibliography by P S Clarkson (1938)

Henry, Patrick, 1736–99, American patriot and orator, b Hanover co , Va Largely self-educated, he became a prominent trial lawyer Henry bitterly denounced (1765) the Stamp Act and in the years that followed helped fan the fires of revolt in the South As an orator he knew no equal Several phrases attributed to him—e g , "If this be treason, make the most of it" and "Give me liberty or give me death"—are familiar to all Americans Henry became a leader among the "radicals" and spoke clearly for individual liberties He was a delegate to the house of burgesses (1765–74), the Continental Congress (1774), and the Virginia provincial convention (1775) His hopes for a military career in the American Revolution were frustrated, but as governor of Virginia (1776–79) he sent George Rogers Clark to the Old Northwest After the Revolution, he led the fight for the Virginia Religious Freedom Act of 1785 Henry opposed ratification of the Federal Constitution, believing that it endangered state and individual rights, and he worked successfully to have the first 10 amendments (Bill of Rights) added There is much dispute about the character of Henry, who grew rich as a noisy trial lawyer and land speculator, yet loved the ideal of liberty and the quiet of a gentleman's life William Wirt offered the texts of Henry's speeches to the public See W W. Henry, *Patrick Henry Life, Correspondence, and Speeches* (1891), Jacob Axelrad, *Patrick Henry the Voice of Freedom* (1947)

Henry, William, 1774–1836, English chemist and physician, noted for his research in the solubility of gases in liquids **Henry's law** states that the amount of a gas which dissolves in a liquid is proportional to the pressure of the gas above the liquid.

Henry, city (pop 1,877), N central Ill , on the Illinois river above Peoria, in a mine, timber, and farm area, founded in the early 1840s, inc 1854

Henry, Cape, SE Va , at the entrance to Chesapeake Bay E of Norfolk The Jamestown settlers landed here April 26, 1607 In 1939 the site was included in Colonial National Historical Park.

Henry, Fort, fortification overlooking the harbor of Kingston, Ont Originally built in 1812, it was demolished in 1832, and the present buildings were erected in 1832–36 In peacetime a museum, it was used in both world wars as a place of detention for prisoners of war

Henry, Fort, Confederate fortification (in the Civil War) on the Tennessee river, just S of the Ky - Tenn boundary On Feb 6, 1862, it was bombarded and reduced by the Union gunboats of Commodore A H Foote, after the Confederate commander, Gen Lloyd Tilghman, foreseeing capture, had dispatched the bulk of his force to Fort Donelson

Henry E. Huntington Library and Art Gallery: see Huntington, Henry Edwards

Henryetta, city (pop 6,905), E central Okla , S of Tulsa; founded c 1900 It has coal mines, iron smelters, and glassworks

Henry of Burgundy, d 1112 or 1114, count of Portugal. He was the brother of Eudes, duke of Burgundy, and he may have accompanied his brother to Spain earlier About 1095 he was called by Alfonso VI of Leon to assist in the fight against the Moors. He was assigned a portion of land previously held by his cousin Raymond, who was the husband of Alfonso's daughter Urraca To Henry, Alfonso gave his illegitimate daughter Theresa and the title count of Coimbra—later exchanged for the title count of Portucalense or Portugal (a name derived from the Roman name for Oporto) He solidified his power After the death of Alfonso VI he tried to enhance his position by war and intrigue with Urraca, her son Alfonso, and her second husband, Alfonso I of Aragon In this he failed but he died leaving a territory that was to become the independent kingdom of Portugal under his son Alfonso I (Afonso Henriques).

Henry of Flanders, c 1174–1216, Latin emperor of Constantinople (1206–16), brother and successor of Emperor Baldwin I. He fought successfully against the Bulgarians and with varying success against Emperor Theodore I of Nicaea His brother-in-law, Peter of Courtenay, succeeded him

Henry of Huntingdon, d. 1155, English chronicler, archdeacon of Huntingdon His *Historia Anglorum* is important not because it gives many new facts but because it was much used by later writers. It is based on Bede and the *Anglo-Saxon Chronicle* for the earlier period but is original work for the years 1126–54 The *Historia Anglorum* was translated by Thomas Forester (1855)

Henry of Trastamara: see Henry II, Spanish king of Castile and Leon.

Henry's law. see Henry, William

Henryson, Robert, c 1425–c 1506, Scottish poet, of whose life little is known He is one of the Scottish Chaucerians, and his principal poem, *The Testament of Cresseid*, is a sequel to Chaucer's *Troilus and Criseyde* Henryson wrote two other long poems, of which the *Moral Fables of Æsop* is the livelier, and 13 short poems In the latter group, his short pastoral, *Robene and Makyne*, is both original and entertaining See editions of his work by G G. Smith (3 vols , 1906–14) and H H Wood (1933), study by M. W Stearns (1949)

Henry Street Settlement see Wald, Lillian D

Henry the Fowler. see Henry I, precursor of the emperors

Henry the Lion, 1129–95, duke of Saxony (1142–80) and of Bavaria (1156–80), son of Henry the Proud Emperor Frederick I restored the two duchies to him in the hope of thus winning over the hereditary rival of the Hohenstaufen family (see Guelphs and Ghibellines) Henry took part in Frederick's earlier Italian expeditions, but devoted his attention chiefly to his own domains, where for many years he ruled without imperial interference With Albert the Bear and other Saxon nobles he took part in the Wendish crusade of 1147, in subsequent years he gradually extended his power over the heathen lands bounded by the Elbe, the Oder, and the Baltic He encouraged settlement in the conquered regions, which became Christianized, he also fostered commercial activity, especially that of Lübeck In 1168 he married Matilda, daughter of Henry II of England Meanwhile, causes of friction arose between the emperor and the duke, in 1178 a controversy between Henry and the bishop of Halberstadt became the pretext for the fall of Guelph power The emperor, called in to judge the case, confiscated Henry's fiefs (1180) The partitioning of Bavaria and Saxony destroyed the last great duchy of Germany, which from then on was a patchwork of small principalities Henry's resistance was broken, and he was banished to England in 1181 He returned for good in 1189 and recovered parts of Saxony (Brunswick and Lüneburg), and he was left in possession of them by the Peace of Fulda (1190) His final reconciliation (1194) with Emperor Henry VI was facilitated by the marriage between his eldest son and a cousin of the emperor Henry's younger son became emperor in 1209 as Otto IV

Henry the Minstrel see Blind Harry

Henry the Navigator, 1394–1460, prince of Portugal, patron of exploration Because he fought with extraordinary valor in the Ceuta campaign (1415), he was granted a dukedom by his father, John I, king of Portugal The Moroccan campaign inspired him with a desire to extend his knowledge of Africa, and in 1416 he founded a naval arsenal at Sangres to serve as a base for exploration. Later he added an observatory and a school for the study of geography and navigation The results of his ambitious plan were soon evident One of his navigators rediscovered the Madeira Islands (1420), and by degrees the west coast of Africa was explored Cape Bojador was reached in 1434, Cape Blanco was passed in 1441, and the next year a slave-trading post was established on the Bay of Arguim When Henry's captains returned with slaves and gold, African exploration, long derided, became very popular, and from 1444 to 1446 between 30 and 40 vessels sailed for the Guinea coast under the prince's authority Meanwhile, his navigators had penetrated into the Sudan, discovered the Senegal, and reached a point near the present Sierra Leone The abuses of the slave trade caused Henry to forbid the kidnaping of Negroes in 1455. Henry played an important political role in the minority of Alfonso V, while his position as grand master of the wealthy and powerful Order of Christ (Portuguese successor to the Knights Templars) increased his influence Much of the revenue for his ventures was derived from his ecclesiastical tithes His military reputation, dimmed by a fruitless expedition against Tangier (1437), was recovered by a subsequent Moroccan campaign, and he was offered the command of several foreign armies Henry's chief importance, however, was his notable contributions to the art of navigation and to the progress of exploration See L R Beazley, *Prince Henry the Navigator* (1895); P H. Major, *Life of Henry of Portugal* (1868); J P. Oliveira Martins, *The Golden Age of Prince Henry the Navigator* (Eng. tr , 1914); Elaine Sanceau, *Henry the Navigator* (1946)

Henry the Proud, c.1108–1139, duke of Bavaria (1126–39) and of Saxony (1137–39). Having inherited the duchy of Bavaria and enormous private wealth, he became, by his marriage with Gertrude, daughter of Emperor Lothair II, the most powerful German noble. He fought with Lothair against the Hohenstaufen and in 1136 accompanied him to Italy Intended by Lothair as his successor in the German kingship, Henry was defeated in the election of 1138 by Conrad III of Hohenstaufen, who shortly afterward deprived Henry of his duchies Henry, however, retained the loyalty of his subjects, he succeeded in expelling Albert the Bear from Saxony and was preparing to attack Bavaria when he suddenly died, leaving as his heir his young son Henry the Lion

Henschel, Sir George (hĕn'shul), 1850–1934, German-English conductor, composer, and baritone, studied in Leipsig and Berlin As a pianist he was a child prodigy. His first appearance (1877) in England was as a singer, and there he and his wife inaugurated (c 1880) the song recital. In 1881 he became the Boston Symphony Orchestra's first conductor He returned in 1884 to England; here he was professor of singing (1886–88) at the Royal College of Music, London, and founded (1886) the London Symphony Concerts, which he conducted until they ceased in 1896. He composed church music, piano pieces, some instrumental pieces, songs, and operas, including *Nubia* (Dresden, 1889) He was knighted in 1914 His first wife, **Lillian June (Bailey) Henschel**, 1860–1901, was an American soprano She made her debut in Boston in 1876, then studied (1878) with Viardot-Garcia in Paris and later with Henschel, whom she married in 1881

Henschke, Alfred see Klabund

Henselt, Adolf von (ä'dôlf fŭn hĕn'zult), 1814–89, German pianist and composer A brilliant pianist, he gave up his concert career in 1838 to become court pianist and teacher in St Petersburg He composed a concerto, salon pieces, and studies for the piano

Henslow, John Stevens (hĕnz'lō), 1796–1861, English botanist At Cambridge Univ he was professor of mineralogy (1822–27) and of botany (1827–61) He was a teacher and friend of Charles Darwin, whom he recommended as naturalist to the *Beagle* expedition Henslow wrote on scientific farming and also *A Catalogue of British Plants* (1829) and *Dictionary of Botanical Terms* (1857)

Henslowe, Philip, d 1616, English theatrical manager He managed the Rose Theatre, Bankside, London, until 1603, and his association with Edward Alleyn, 1600–1616, in the Fortune Theatre, Cripplegate, London, was another of his numerous theatrical enterprises His diary has valuable information on the Elizabethan stage See F E Schelling, *Elizabethan Drama* (1908)

Henson, Josiah, 1789–1883, reputed original of Uncle Tom in *Uncle Tom's Cabin*, b Charles co , Md. In 1825 he faithfully led a party of his master's slaves from Maryland, across free territory in Ohio, to Kentucky Tricked out of the freedom he had purchased and threatened with being sold down South, he escaped with his wife and children in 1830 He became a leader of the community of escaped Negroes at Dresden, Upper Canada (now Ontario) Henson, who became a Methodist Episcopal preacher when in Kentucky, traveled widely, visiting England three times His autobiography, *The Life of Josiah Henson* (1849), was enlarged in 1858 as *Truth Stranger than Fiction* and in 1879 as *"Truth Is Stranger than Fiction"*, the later editions contained introductions by Harriet Beecher Stowe, who had been familiar with his story since 1851 See Brion Gysin, *To Master—a Long Goodnight* (1946)

Henty, George Alfred, 1832–1902, English journalist and writer of boys' books He was a war correspondent in the Austro-Italian War of 1866 and in the Franco-Prussian War of 1870–71. In middle life he edited a boy's *magazine*, the *Union Jack*, in which his first widely circulated stories appeared He wrote 80 tales of adventure which were as popular with boys in America as in England.

heparin. see Clotting of Blood.

hepatica or **liverwort**, any plant of the genus *Hepatica*, low, woodland, spring wild flowers of the North Temperate Zone, popular for wild gardens The delicate blossoms, of shades varying from lavander, may appear while there is still snow, the three-lobed leaves persist through winter. Hepaticas were formerly used as a domestic remedy Hepatic and liverwort are both names for a group of flowerless plants

Hepburn, Alonzo Barton, 1846–1922, American legislator and banker, b Colton, St. Lawrence co., N.Y. He served (1875–80) in the New York state legislature and became chairman of the legislative committee to investigate railroad-rate discrimination The published proceedings of this committee—popularly called the Hepburn Report—strongly influenced subsequent corrective legislation and helped bring about the adoption of the Federal Interstate Commerce Act. Later A. Barton Hepburn devoted himself to banking and to government fiscal administration. See biography by J. B Bishop (1923)

Hepburn, Mitchell Frederick, 1896–, Canadian political leader, b. St. Thomas, Ont. Elected to the Canadian House of Commons in 1926, he was

chosen (1930) leader of the Liberal party in Ontario He resigned his seat in Parliament in 1934 to enter the Ontario legislature, and upon his party's victory in the elections of that year, Hepburn became premier of the province A few years after his assumption of office, he was involved in struggles with labor organizations and with Mackenzie King and his Liberal administration In 1942 Hepburn resigned the premiership, and the following year saw the severe defeat of his party at the polls in Ontario

Hepburn, William Peters, 1833–1916, American statesman, b Wellsville, Ohio He grew to manhood in Iowa, where he practiced law He was a Civil War cavalry officer From 1881 to 1887 he was a Republican member of Congress After four years as solicitor of the Treasury, he reentered Congress in 1893, serving 16 years He was vitally interested in railroad regulation and was for many years chairman of the Committee on Interstate and Foreign Commerce He was author of the Hepburn Act of 1906, which greatly strengthened the INTERSTATE COMMERCE COMMISSION (see REBATE) He was joint author of the Pure Food and Drugs Act (1906). See biography by John Ely Briggs (1919)

Hephaestus (hĭfĕ'stŭs), in Greek religion, OLYMPIAN god, son of Zeus and Hera He was the god of fire and of metalwork In early legend he was the husband of Charis, later, he was called the husband of Aphrodite ERECHTHEUS was his son Hephaestus, called Vulcan by the Romans, is usually represented as a bearded man with mighty shoulders and arms, but lame One legend says that he was born lame, another that he was lamed when Zeus threw him from Olympus down to the island Lemnos for taking Hera's side in a dispute Hephaestus' favorite abodes on earth were volcanic islands, such as Lemnos and Sicily, where he had workshops complete with anvils, hammers, and bellows Cyclopes worked his forges He, the divine artificer, cunningly fashioned palaces for the gods and weapons for heroes and gods (e g , Achilles' shield) Generally he was a comic figure on Olympus and the butt of many jokes Hephaestus split Zeus' aching head with an ax, and the goddess Athena sprang forth Hephaestus, as craftsman's god, was worshiped at industrial centers such as Athens, where he had a temple In the Trojan War he supported the Greeks

Hepher (hē'fur) [Heb ,=well] **1** Head of a Manassite family Num 26 32, 27 1, Joshua 17 2,3 **2** Judahite 1 Chron 4 6 **3** One of David's warriors 1 Chron 11 36 **4** Unidentified city, Palestine Joshua 12 17, 1 Kings 4 10

Hephzi-bah (hĕf'zĭ-bu) [Heb ,=my delight is in her] **1** Mother of Manasseh 2 Kings 21 1 **2** Name for Jerusalem restored Isa 62 4

Hepplewhite, George (hĕ'pulhwīt), d 1786, English cabinetmaker and furniture designer His style is characterized by light, curvilinear forms, painted or inlaid decoration, and distinctive details such as slight tapering legs (plain, fluted, or reeded) and the spade foot Decorative motifs include the classical designs introduced by Robert and James Adam, ribbons, rosettes, prince of Wales feathers, ears of wheat, and the lyre He is noted for distinctive chair backs in shield, oval, interlaced hearts, and hoop forms and for using much satinwood and painted beechwood as well as mahogany His small pieces, e g , inlaid work tables, fire screens, knife boxes, and tea caddies, are especially prized by collectors Hepplewhite's firm was continued by his widow, who published in 1788 his *Cabinet-Maker and Upholsterer's Guide*

Heppner, city (pop 1,140), co seat of Morrow co , N Oregon, SW of Pendleton at the confluence of Hinton and Willow creeks, tributaries of the Columbia, in a farming and grazing area, founded 1873, inc 1887 Over 250 lives were lost in the great flood of 1903

Heptameron: see MARGARET OF NAVARRE

heptarchy (hĕp'tärkē) [Gr =seven-kingdom], name applied to seven kingdoms of Anglo-Saxon England The term was probably used first in the 16th cent by writers who believed England was divided among just seven kingdoms founded by Angles and Saxons Actually the political and geographical divisions were neither so orderly nor permanent, but were somewhat fluid and shifting for centuries For history, see ENGLAND and articles on the kingdoms of the heptarchy—NORTHUMBRIA, EAST ANGLIA, MERCIA, ESSEX, SUSSEX, WESSEX, and KENT.

Hera (hē'rŭ), in Greek religion, queen of the OLYMPIAN gods; daughter of the Titans Cronus and Rhea. She was the wife and sister of Zeus, to whom she bore Hephaestus and Ares Hera, protectoress of women, presided over childbirth and marriage and on occasion punished an offending husband (e g , the legend of ATHAMAS and LEARCHUS). A jealous wife, she persecuted Zeus, her erring consort, his earthly mistresses, and their children (e.g., Io, Lamia, and Hercules) When the Trojan prince Paris did not award Eris' APPLE OF DISCORD to Hera she in revenge supported the Greeks in the Trojan War. She is usually represented as a majestic woman, wearing a long flowing gown, golden sandals, a crown or diadem, and a long veil. Her attributes include a scepter, the peacock, and the pomegranate, and her messenger was Iris, the rainbow Hera was worshiped in all parts of Greece, but especially at Argos and Samos, where she had splendid temples. Polycletus, the sculptor, made a magnificent chryselephantine statue of Hera for the temple at Argos At Argos, BITON and Cleobis met their early death. Hera was called Juno by the Romans

Heraclea (hĕrŭklē'ŭ), ancient Greek city, in Lucania, S Italy, not far from the Gulf of Tarantum (Taranto). Here Pyrrhus defeated the Romans in 280 B C Near here were found bronze tablets giving Roman municipal laws The village of Policoro is on the site.

Heraclea Pontica (pŏn'tĭkŭ), ancient Greek city, a port on the southern shore of the Black Sea Modern Eregli, Turkey, is on the site It was founded by colonists from Megara and Boeotia in the 6th cent B C and rose to a position of great prominence, controlling much of the coast and sending out colonies It was at its height in the 4th cent, B C , but was injured by the rise of Pontus It was destroyed by the Romans in the wars against Mithridates VI of Pontus

Heracleopolis (hĭrăk"lēō'pulĭs, hē"rŭklē–), ancient city, N Egypt, just S of the Fayum One of the oldest of Egyptian cities, it was in existence before 3000 B C and was the capital (c 2445–c 2160) of the IX and X dynasties The temple was enlarged in the XII dynasty and again by Ramses II. Sheshonk I was originally general of mercenaries at Heracleopolis

Heracles: see HERCULES.

Heraclitus (hĕrŭklī'tŭs), c 535–c 475 B.C , Greek philosopher of Ephesus, of noble birth According to Heraclitus, there was no permanent reality except the reality of change, permanence was an illusion of the senses He taught that all things carried with them their opposites, that death was potential in life, that being and not-being were part of every whole—therefore, the only possible real state was the transitional one of becoming He believed fire to be the underlying substance of the universe and all other elements transformations of it He identified life and reason with fire and believed that no man had a soul of his own but shared in a universal soul-fire

Heraclius I (hĕrŭklī'ŭs, hĭră'klēŭs), c 575–641, Byzantine emperor (610–41) The son of a governor of Africa, he succeeded the tyrant Phocas, whom he deposed and had executed In the early years of his reign Avars and Bulgars threatened on the north and the Persians conquered Syria, Palestine, and Egypt In a costly campaign (622–28) Heraclius recovered the lost provinces from the Persians, only to see them fall (629–41) to the Moslem Arabs While fighting the Persians in Syria, Heraclius had sought to reconcile the Syrian Monophysites with the Orthodox Church, this attempt led to the compromise of MONOTHELETISM, which was favored by Heraclius He was succeeded by his son Constantine III, and his grandson, Constans II

Herakleion, Crete see CANDIA

heraldry. Personal and family insignia are common to primitive tribes (e g , TOTEM) and are mentioned by Homer, but heraldry proper is a feudal institution, originating probably in Germany during the late 12th cent , adopted and improved in France, Spain, and Italy, and imported into England by the Normans By the time of Richard I armorial bearings were in use Seals with heraldic devices were in use before their application to shields Louis VII (1137–80) was the first French king to seal with the fleur-de-lis of France The practice of embroidering the family emblems on the surcoat worn over chain mail in the 13th cent accounts for the term "coat of arms," and this century saw the rapid spread of heraldry through all grades of feudal rank above the squire Private assumption of arms became so common that Henry V forbade it, and on the chartering of the Heralds' College in 1483 the regulations pertaining to heraldry were placed in the hands of the Garter King-of-Arms Besides personal arms, arms were borne by families, corporations, guilds, religious houses, inns of court, colleges, boroughs and cities, and kingdoms In America the seals and insignia of colleges, cities, and the like are examples of the persistence of the heraldic tradition For methods of displaying armorial bearings, see BLAZONRY See Charles Boutell, *Manual of Heraldry* (1863, many rev eds); A R Wagner, *Heralds and Heraldry in the Middle Ages* (1940)

Heralds' College, body first chartered in 1484 by Richard III of England It has been reorganized several times since then Its purpose is to assign new coats of arms and to trace lineages to determine heraldic rights and privileges It has collected and combined the rule of BLAZONRY into a system. The college consists of the Garter king-of-arms (who is principal king-of-arms of both England and the Order of the Garter), of the kings-of-arms of Norroy and of Clarenceux, and of several heralds and pursuivants In Scotland, heraldic matters are regulated by the Lyon king-of-arms, in Northern Ireland, by the Ulster king-of-arms The kings-of-arms and heralds also proclaim a new king's accession and attend at state occasions such as the opening of Parliament and the introduction of new peers into the House of Lords See Anthony Wagner, *Heraldry in England* (1946)

Herat (hĕrat'), city (pop more than 60,000), capital of Herat, NW Afghanistan, on the Hari Rud river The ancient Aria, it has mile-long walls built on massive prehistoric earthworks and was very old before the Persians included it in their empire and before Alexander the Great refounded it. It is on the trade route from Persia to India and was taken by various conquerors It was overshadowed by Ghazni for a time, and in the 12th cent it was destroyed by Turkmen Rebuilt by the kings of Ghor, it was attacked by the Mongols early in the 13th cent Tamerlane took it in 1383 and his later successors, Shah Rukh and Husein, ruled in splendor until 1506 There were beautiful minarets, and the court was a center of art and learning The Uzbeks took the city, and then the Persians claimed it It was disputed by Persians and Afghans until in the mid-19th cent British pressure forced Nasr ed-Din Shah to give up attempts to take it. Dost Mohammed firmly established Afghan rule Herat is not only a garden spot but has textile weaving and makes carpets

Hérault (ārō'), department (2,403 sq. mi ; pop 461,100), S France, in LANGUEDOC, between the Cévennes mts and the Mediterranean. It is named for a small river Montpellier is the departmental capital. Sète the chief port

Hérault de Séchelles, Marie Jean (mărē' zhă' ārō' du sāshĕl'), 1760?–1794, French revolutionist. A lawyer famed for his eloquent oratory, he was presented at court and became a favorite of Marie Antoinette Nevertheless, he remained an ardent reformer and joined the revolutionary cause in 1789 A member of the Convention and the Committee of Public Safety, he was prominent in shaping the war measures of 1792 and in establishing the revolutionary tribunal which became the chief instrument of the Reign of Terror He was guillotined in 1794 as a supporter of Danton

herb (ûrb, hûrb), botanically **any plant,** whether annual, biennial, or perennial, which has fleshy or succulent stems lacking woody tissue and which dies down at the end of the growing season Herbaceous plants are distinguished, in horticulture, from shrubs, trees, and woody vines Herb is sometimes used to refer only to those plants which are used medicinally or for flavoring and seasoning See Maud Grieve, comp , *A Modern Herbal* (ed by Hilda Leyel, 2 vols , 1931), E S Rohde, *Herbs and Herb Gardening* (1937)

herbal (hûr'bul, ûr'–), early botanical book containing descriptions of herbs and plants with their properties Some of the first books to be printed with movable type were herbals in Latin, German and English Most of the early herbals were filled with queer superstitions about the properties of plants and with prayers and incantations to be recited on gathering plants Among the most famous of the printed herbals were those of Leonard Fuchs and Otto Brunfels and, in England those of William Turner (the 'father of English botany"), John Gerard, whose *Herball* of 1597 is, though not so great as that of Turner, better known, and John Parkinson (1629) The herbal began to disappear as the herb garden ceased to supply family medicines See E S Rohde, *Old English Herbals* (1922), Maud Grieve, comp , *A Modern Herbal* (ed by Hilda Leyel, 2 vols , 1931), A. R Arber, *Herbals* (2d ed , 1938)

herbarium, collection of dried plant specimens used in the study of botany Flowering plants are carefully dried between blotters or absorbent paper, alternated, for best results, with corrugated paper Precautionary measures against insect attack include poisoning the pressed plant or disinfecting the cases Flowering plants are mounted on heavy herbarium paper with glue or gummed tape or both The species of a genus are filed together in a folder and arranged systematically. Collections of other kinds of plants are variously preserved, e g , mosses in packets Most universities maintain herbariums They are essential for the preservation of type specimens, the verification of plant names, and the preparation of floras. Linnaeus's herbarium now belongs to the Linnaean Society, in England Notable herbariums in the United States include the Gray Herbarium at Harvard Univ and those at the National Museum and at the New York and Missouri botanical gardens For the preparation of specimens, see R J Pool, *Flowers and Flowering Plants* (1929)

Herbart, Johann Friedrich (yō'hän frē'drĭkh hĕr'bärt), 1776–1841, German philosopher and educator Influenced by Fichte and Pestalozzi, Herbart made many important contributions to psychology. In 1805 he lectured at Gottingen and from 1809 to 1833 held the chair of philosophy at Konigsberg He then returned to Gottingen as professor of philosophy *Psychologie als Wissenschaft* (1824–25) was his major psychological work, and *Allgemeine Metaphysik* (1828–29) his most important philosophical study Herbart held that

the concepts of change and becoming harbored a contradiction which destroyed the reality of continuous identity He maintained that the universe is composed of "reals," each absolutely simple and independent. Change is nothing but alterations in the various relationships among reals The reactions of reals to these changing relationships are their efforts at self-preservation, as in the case of the soul, whose efforts are ideas Ideas themselves strive for self-preservation, each one having resistance to change This makes possible mathematical treatment of ideas and opens the way to scientific psychology Though he denied the possibility of psychological experiment, Herbart sought to develop the mathematical and empirical, as well as the metaphysical, aspects of psychology In education he emphasized the importance of relating new concepts to the experience of the learner so that there would be less resistance to apperception of new ideas He stressed the need for moral education through experience and brought the work of teaching into the area of conscious method Many of Herbart's educational works have been translated into English See his *Application of Psychology to the Science of Education* (Eng tr, 1892), biography by A M Williams (1911); R D Chalke, *A Synthesis of Froebel and Herbart* (1912)

herb Christopher, name for several plants, among them BANEBERRY

Herbelot, Barthélemy d' (bärtälumē' dŭ ĕrbulō'), 1625–95, French Orientalist He compiled a large anthology, made up of examples from Oriental writers and of historical material relating principally to Arabs, Persians, and Turks

Herbert, Alan Patrick, 1890–, English humorist and member of Parliament A staff writer for the comic magazine *Punch* since 1910 and an indefatigable campaigner for the purity of the language against the inroads of modern bureaucratic jargon, Herbert has served in Parliament since 1935 as a representative for Oxford Univ He was largely responsible for the bill (1937) liberalizing English divorce law His numerous books include *The House by the River* (1921), *The Water Gipsies* (1930), *Holy Deadlock* (1934), *Uncommon Law* (1935), and *Sip! Swallow!* (1937) He has collaborated on a number of musical comedies

Herbert, George, 1593–1633, English religious poet. Of a noble family, he was the brother of Baron Herbert of Cherbury His early determination while he was a student at Cambridge (B A, 1612, M A, 1616) to enter the church was deflected by his appointment as public orator in 1619, a post he held until 1627 He was, however, ordained an Anglican priest in 1630 and made rector at Bemerton, near Salisbury His poems reflect his periods of indecision and rebellion as well as his serenity in the church and are marked by precision of language, metrical versatility, and the occasional use of conceits All unpublished at his death, the poems were left by Herbert to his friend Nicholas Ferrar, who had them published as *The Temple Sacred Poems and Private Ejaculations* (1633) Herbert also wrote Latin poems and a prose manual of clerical life, *A Priest of the Temple* (first printed in *Herbert's Remains*, 1652) See his complete works (ed by F E Hutchinson, 1941), biographies by Izaak Walton (1670), J J Daniell (1902), and G H Palmer (1905) The 20th-century revival of interest in the METAPHYSICAL POETS has stressed Herbert, for bibliography, see Theodore Spencer and Mark Van Doren, *Studies in Metaphysical Poetry* (1939)

Herbert, Henry William see FORESTER, FRANK

Herbert, Mary see PEMBROKE, MARY HERBERT, COUNTESS OF

Herbert, Victor, 1859–1924, Irish-American cellist, composer, and conductor, studied at the Stuttgart Conservatory In 1886 the Metropolitan Opera Company engaged his wife as a singer and Herbert as first cellist, and together they came to the United States He later played in the orchestras of Theodore Thomas and Anton Seidl In 1894 he became leader of the 22nd Regiment Band and from 1898 to 1904 was conductor of the Pittsburgh Symphony Orchestra After 1904 he was chiefly engaged in composition Two serious operas, *Natoma* (Philadelphia, 1911) and *Madeleine* (New York, 1914), had little success He also composed some orchestral music and a cello concerto but is known as an outstanding composer of operettas, some of which are *The Fortune Teller* (1898), *Babes in Toyland* (1903), *Mlle Modiste* (1905), *The Red Mill* (1906), *Naughty Marietta* (1910), and *Sweethearts* (1913) He also wrote music for some of the Ziegfeld Follies. See biography by Joseph Kaye (1931)

Herbert, William see PEMBROKE, WILLIAM HERBERT, 3D EARL OF

Herbert of Cherbury, Edward Herbert, 1st **Baron,** 1583–1648, English philosopher, poet, and diplomat, elder brother of George Herbert, the metaphysical poet He was ambassador to France (1619–24) and was created Baron Herbert of Cherbury in 1620 A precursor of deism, Lord Herbert laid down his principles of natural religion in *De veritate* (1624), *De religione laici* (1645), and *De religione gentilium* (1663) These works are, however, only a foreshadowing of deism and only a part of his philosophy His secular metaphysical poetry shows influences of his philosophy, for even his love poems in *Poems* (1665) reflect the serious, analytic approach of the philosopher He also wrote a biography of Henry VIII (1649) and an autobiography, first published by Horace Walpole in 1764

Herceg Novi (hĕr'tsĕg nô'vē), small port and sea resort, Montenegro, Yugoslavia Founded by a Bosnian king in 1382, it later passed to Hercegovina, Turkey, Dubrovnik, Venice, and Austria before its inclusion (1918) in Yugoslavia There remain two ruined castles, old fortifications, and, near by, a medieval monastery The town is also known under its Italian name, Castelnuovo

Hercegovina see BOSNIA AND HERCEGOVINA

Herculaneum (hûrkyōōlā'nēum), ancient city of S Italy, on the gulf of Naples at the foot of Mt Vesuvius Damaged by an earthquake in A D 63, it was completely buried, along with Pompeii, by the eruption of A D 79 It was a popular Roman resort with fine villas The first discovery was made in 1709, and excavations have continued since Important early finds were the sumptuous so-called Villa of the Papyri with a rich library and bronze and marble statues, a basilica with fine murals, and a theater The modern towns of Resina and Portici are on the site

Herculaneum, village (pop 1,700), E Mo, on the Mississippi below St Louis, platted 1808 It has lead smelters and marble quarries

Herculano de Carvalho Araujo, Alexandre (ûlĕshān'dru ĕrkōōlā'nō dŭ kärva'yō ûrou'zhō), 1810–77, Portuguese historian He is generally considered to have had one of the finest minds of his day in Portugal His great works are a four-volume history of Portugal (1840–53) and a history of the Inquisition in Portugal Modern historical writing in Portugal may be said to begin with him He also wrote historical novels and poetry

Hercules (hûr'kyōōlēz) or **Heracles** (hĕr'ŭklēz), most popular hero in Greek and Roman legends, famous for his extraordinary strength and courage He was the son of Zeus and Alcmene (the wife of Amphitryon) and half brother of Iphicles Hercules incurred the everlasting wrath of Hera because he was the child of her disloyal consort A few months after Hercules was born she sent two serpents to the infant's cradle The child Hercules strangled them When Hercules was older and married to Megara, his first wife, Hera sent madness upon him, and he killed his wife and their children After he returned to sanity he was told by the Delphic oracle to seek purification at the court of King Eurystheus The king demanded that Hercules perform the dangerous and difficult 12 labors killing the monstrous NEMEAN LION, the nine-headed HYDRA, and the man-eating STYMPHALIAN BIRDS, cleaning, in one day, the stables of AUGEAS, procuring the golden apples of the HESPERIDES and the girdle of Hippolyte, queen of the Amazons (he was accompanied by TELAMON on this adventure), and capturing the fleet-footed CERYNEAN HIND, the mad Cretan bull, the flesh-eating mares of DIOMED, the Erymanthian boar (it was during this labor that Hercules accidentally slew his friend and teacher Chiron the centaur), the cattle of Geryon, and the three-headed watchdog of Hades, CERBERUS. After he performed the labors, Hercules returned to Thebes, where he undertook to wrestle the giant ANTAEUS Presently he once again descended to the underworld to restore ALCESTIS to her husband ADMETUS Hercules, prone to fits of madness, killed one of his sons, and the gods again condemned him to bondage, this time at the court of OMPHALE, queen of Lydia During his stay he participated in the CALYDONIAN HUNT and the expedition of the Argonauts (see ARGONAUT) After many other adventures Hercules married DEIANIRA, who caused his death when she steeped his robe in the poisonous blood of NESSUS, thinking it had beneficent powers Knowing that he was poisoned, Hercules built a funeral pyre for himself and ordered that fire be applied. After he died, he joined the ranks of the OLYMPIAN gods Here he married Hebe Hercules was widely worshiped, and bulls, rams, and boars were sacrificed to him He is usually represented as a powerful, muscular man, wearing a lion's skin and armed with a huge club He is the hero of plays by Sophocles, Euripides, and Seneca. Perhaps the most famous statue of him is the *Farnese Hercules* in the National Museum in Naples.

Hercules, in astronomy, a northern constellation lying between Lyra and Corona Borealis It is represented pictorially as the figure of the hero Hercules in a kneeling position, with one foot resting on the head of Draco, the Dragon. There are no very bright stars in the constellation, but with a small telescope several double stars can be distinguished A globular star cluster believed to consist of more than 50,000 stars, it is a beautiful sight even with a small telescope Barely visible to the naked eye, it is estimated to be about 34,000 light years away It was discovered by Edmund Halley in 1714 In the winter of 1934 a conspicuous nova appeared in Hercules

Hercules, Pillars of: see PILLARS OF HERCULES.

Hercules'-club or devil's-walking-stick, small North American tree (*Aralia spinosa*) with a trunk often unbranched, stout, and thorny Very large compound leaves give it a tropical effect A huge cluster of flowers is borne at the top of the tree, followed by black, berrylike fruits that have been used medicinally The prickly ash and other plants are sometimes called Hercules'-club

Hercsег, Francis (hĕr'tsĕg), Hung *Herceg Ferenc* (fĕ'rents), 1863–, Hungarian dramatist, novelist, and short-story writer None of his stories and novels—often light and amusing—have been translated Among his translated plays are *Seven Sisters* (1893, Eng tr, 1911) and *The Silver Fox* (1917, Eng tr, 1921)

Herder, Johann Gottfried von (yō'hän gōt'frēt fŭn hĕr'dur), 1744–1803, German philosopher, poet, and critic, a leader in the *Sturm und Drang* movement After an impoverished childhood, he studied theology at Konigsberg and came under the influence of Kant During an appointment at Riga, Herder gained attention with his *Fragmente über die neuere deutsche Literatur* (1767) In 1776 he became court preacher at Weimar through the influence of Goethe There, where he stayed until his death, he produced his anthology of foreign folk songs, *Stimmen der Völker* (1778–79), and also made contributions to philology, comparative religion, and mythology His *Ideen zur Philosophie der Geschichte der Menschheit* (1784–91, Eng tr, *Outlines of the Philosophy of Man*, 1800) developed an evolutionary approach to history He sought in his philosophy to unite what Kant had divided —mind and nature, the individual and society See F H Burkhardt, *God Some Conversations* (Eng tr, 1940)

herd's-grass see TIMOTHY and BENT GRASS

Heredia, José María (hōsĕ' marē'a ärä'dhēa), 1803–39, Cuban journalist and poet, most lyrical of the poets of the period of the wars of independence Like Bello and Olmedo, he excels in describing the American landscape Although his poetry is classic in form, he was by temperament a romantic His subjectiveness and passionate nature appear in his two best-known poems, "On the Teocalli of Cholula" (written 1820) and "Niagara" (written 1824) Exiled from Cuba for his part in an abortive revolution in 1823, he spent two years in New York, where he published his poems, and the rest of his life in Mexico He was a cousin of the French poet Heredia

Heredia, José María de, 1842–1905, French poet, a member of the Parnassians, b Cuba His reputation rests on a single book of poetry, *Les Trophées* (1893) A remarkable collection of sonnets and poems, *Les Trophées* displays an unparalleled effort to produce the sensory effects of painting, music, and sculpture in poetic terms Both his subject matter and style are derived from the classics

Heredia, city (1944 estimated pop 10,578), W central Costa Rica, c 6 mi NW of SAN JOSÉ One of the four principal cities of the central plateau, it is the center of the coffee industry

heredity (hurĕ'dĭtē), the transmission from generation to generation through the reproductive process in plants and animals of factors which cause the offspring to resemble their parents Suggestions of the inheritability of certain traits in humans are found in some early writings, e g, in those of Hippocrates No well-formulated ideas based on scientific experiments developed until Gregor J MENDEL expressed the results of his experiments in the concepts now known as the Mendelian laws One of the most significant outcomes of Mendel's studies was the evidence that characters of an individual are inherited as units independently of each other Before Mendel's time the nature of hybrids had been recognized but complete statistical results of the occurrence of each character in hybrid generations had not been reported With the discovery of the CHROMOSOME and the GENE, Mendel's suggested hereditary units materialized Studies of MITOSIS, meiosis, and sex-linked characters shed more light on the mechanism of heredity More recently some slight hereditary transmission has been attributed to minute particles, sometimes called plasmagenes, in the cytoplasm of the sex cells For a time the acceptance of the Darwinian concept of evolution seemed at variance with Mendelian heredity, since to some the constancy with which characters are transmitted from generation to generation seemed to preclude the changes required by evolution However, it came to be realized that the changes which are embodied in an evolutionary concept occur in the genetic mechanism, e g, in gene MUTATION Thus heredity and evolution are interdependent A sharp cleavage between heredity and environment with the assumption of either one or the other as the only major force in determining the nature of an individual plant or animal is unfounded. Modern geneticists favor the belief that the characters of the adult form are, at least to some extent, the result of the interaction of heredity and environment Human heredity requires more study, but evidence points to its essential similarities to the mechanism studied in lower

forms of life It is recognized that the individual inherits not only from parents but also from more remote ancestors Sir Francis Galton made some of the first studies of human inheritance, and from his work stemmed the growth of eugenics Studies of heredity have important applications in the breeding of animals and plants For the scientific methods of studying heredity, see GENETICS See L H Snyder, *The Principles of Heredity* (1946), L C Dunn and Theodosius Dobzhansky, *Heredity, Race, and Society* (1946), H J Muller and others, *Genetics, Medicine, and Man* (1947), A F Shull, *Heredity* (4th ed , 1948), Julian Huxley, *Heredity East and West* (1949)

Hereford, county, England see HEREFORDSHIRE

Hereford (hĕr'fûrd), municipal borough (1931 pop 24,163, 1943 estimated pop 33,000), county town of Herefordshire, England, on the Wye It is a trade center At the great cathedral, which dates from the 11th cent , is held every third year the Festival of the Three Choirs, held the other years at Gloucester or Worcester The White Cross, near the town, commemorates the termination of the great plague in 1347 There are remains of an ancient castle, a grammar school founded in 1384, and many buildings of the 16th and 17th cent Hereford is the birthplace of Nell Gwyn and David Garrick

Hereford (hûr'furd), city (1940 pop 2,584, 1947 estimated pop 3,900), co seat of Deaf Smith co , extreme N Texas, SW of Amarillo on the plains of the Panhandle, settled 1898, inc 1906 The semi-arid plains, once belonging to the XIT Ranch and other baronial cattle holdings, still support fine cattle Irrigated farms produce potatoes and grain Tierra Blanca Creek here drains E to Buffalo Lake, much used for recreation The low rate of dental decay among its citizens --explained by some as the result of fluorine in the soil— brought Hereford to national medical notice in the 1940s

Hereford cattle (hûr'furd, hĕ'rufurd), breed of beef cattle originated in Herefordshire, England, and probably first imported to the United States by Henry Clay in 1817 They are red in color, with white faces A strain of polled Herefords was developed by crossbreeding Herefords, long bred on the Western ranges, have also been introduced in parts of Canada and in the E United States

Herefordshire or **Hereford,** county (842 sq mi , 1931 pop 111,767, 1948 estimated pop 123,600), W England, on the Welsh border The county town is Hereford A land of many streams and woods, the county has undulating terrain, reaching its greatest height in the Black Mts and Malvern Hills The chief rivers are the Wye, the Teme, and the Frome The region is primarily agricultural and pastoral and is famous for its orchards and cattle (see HEREFORD CATTLE) In the Middle Ages, Herefordshire was the scene of much border warfare with the Welsh, and there are many ruins of castles and fortifications, the most remarkable of which is Offa's Dyke, built in the 8th cent by Offa, king of Mercia There are many fine examples of Tudor architecture The modern history of the county has been generally uneventful Manufactures are negligible See Arthur Mee, *Herefordshire* (1938)

Heres (hē'rēs), unidentified mountain, S Palestine, the home of the Amorites Judges 1 35

Heresh (hē'–) [Heb ,=artificer], servant of the Tabernacle 1 Chron 9 15

Hereward the Wake (hĕ'rĭwurd), fl 1070, thane of Lincolnshire A leader of resistance against WILLIAM I, he sacked Peterborough (1070) and later consolidated his forces on the Isle of Ely When the king gained possession (1071) of the island, Hereward seems to have continued resistance as an outlaw, until he gained an honorable peace He became a folk hero to the conquered Anglo-Saxons, Charles Kingsley's novel, *Hereward the Wake,* is about him

Herford, Oliver (hûr'fûrd), 1863–1935, American humorist, b England His popular volumes of light verse, illustrated by himself, include *Artful Antics* (1898), *Rubáiyát of a Persian Kitten* (1904), and *Excuse It, Please* (1929)

Herford (hĕr'fôrt), city (pop 43,940), Westphalia, NW Germany Founded in 823, it later became a free imperial city and a member of the Hanseatic League Most of its medieval and Renaissance buildings were destroyed in the Second World War Near Herford is the Teutoburg Forest, where Arminius defeated (A D 9) the Romans The war (774–85) between Charlemagne and the Saxon Widukind took place in this region Today it has furniture, chocolate, and textile manufactures

Hergenröther, Joseph Adam Gustav (yō'zĕf ä'dăm gōōs'täf hĕr'gənrûtûr), 1824–90, German theologian and scholar, cardinal of the Roman Church He was a professor at Munich and Würsburg In 1879 Leo XIII made him cardinal and first prefect of the newly opened Vatican archives Hergenröther wrote polemical works and church history. A zealous ultramontane, he refuted DÖLLINGER with *Anti-Janus* (1870; Eng tr , 1870). His historical works include *The Catholic Church and the Christian State* (1876, Eng tr , 1876) and *Manual of Universal Church History* (3 vols , 1876–80) His monumental work on PHOTIUS, written to dispel charges of papal responsibility for the Eastern schism, is fundamental, but considered by later scholars to be unfair to Photius See American Catholic Historical Association, *Church Historians* (1926)

Hergesheimer, Joseph (hûr'gushĭ'mur), 1880–, American author, b Philadelphia The historical novels *The Three Black Pennys* (1917) and *Java Head* (1919), the novel *Linda Condon* (1919), the novelettes in *Gold and Iron* (1918), and the short stories in *The Happy End* (1919) established him as a literary artist of distinction His later fiction, much of it for magazines, was expertly written, but less profound He also wrote a biography of Gen Philip Sheridan (1931) See his autobiographical *From an Old House* (1925)

Hering, Henry (hĕ'rĭng), 1874–1949, American sculptor, b New York city, studied at the Art Students League and the École des Beaux-Arts While he made portrait busts and fine classic figures, he specialized in architectural sculpture His Civil War Memorial is at Yale Some of his best sculptural decorations are on the Field Museum, Chicago, Federal reserve banks of Dallas, Texas, Kansas City, Mo , and Cleveland, Michigan Ave Bridge and Civic Opera House, Chicago, Yale Art Museum, New Haven, and Indiana State War Memorial and other sculptures for the Civic Center, Indianapolis He became a member of the National Academy in 1937

Herington, city (pop 3,804), E central Kansas, S of Junction City, inc 1887 It is a shipping and trading center for a farm and livestock area A monument to the missionary Juan de Padilla is in Herington

Herisau (hā'rĭzou), town (pop 12,789), capital of Ausser-Rhoden half canton, Appenzell, Switzerland It manufactures embroideries, cotton textiles, and machinery

Héristal, Belgium see HERSTAL

Herkimer, Nicholas (hûr'kĭmur), 1728–77, American Revolutionary general He was born in a German colony near the present town of Herkimer, N Y He served in the French and Indian War and was appointed (1776) a brigadier general in the New York militia In 1777 in the SARATOGA CAMPAIGNS Herkimer was leading a relief party to the Americans besieged by General St Leger at Fort Stanwix when at Oriskany Creek they were ambushed by a force of Loyalists and Indians Herkimer was mortally wounded, and his force had to retreat

Herkimer (hûr'kĭmur), industrial village (pop 9,617), co seat of Herkimer co , central N Y , on the Mohawk and SE of Utica, settled c 1725 by Palatines, inc 1807 It is a farm-product shipping point Desks and other furniture are made The Herkimer County Historical Society here has important documents and exhibits

Herkomer, Sir Hubert von (hûr'kōmur), 1849–1914, English painter and etcher, b Germany, studied at South Kensington art schools He won recognition with his painting *The Last Muster* and became a popular art teacher, founding his own art school at Bushey near London in 1883 He was proficient as water-colorist, etcher, metal worker, and illustrator Among his chief paintings are *Passing to the West* (painted in America), *On Strike, Eventide,* and *Gathering in the Charter House* (National Gall , London) Herkomer enjoyed many honors See his autobiography, *The Herkomers* (1910), study by A L Baldry (1901)

Herlin or **Herlen, Friedrich** (both frē'drĭkh hĕr'lĭn), fl 1462–91, German religious painter of the Swabian school Little is known of his life except that he worked in Nördlingen and painted in the Flemish style Among the works attributed to him are altarpieces in the Church of St James, Rothenburg, Bavaria, and in St Blasius, Bopfingen, Württemberg, *Madonna* (town hall, Rothenburg), and *Legend of St George* (an altarpiece) and *Christ among the Doctors* (Nördlingen)

Herm see CHANNEL ISLANDS

Herman, Yuri Pavlovich (yōō'rē päv'lŭvĭch gĕr'mŭn), 1910–, Russian novelist He wrote *Tonia* (Eng tr , 1938), *Antonina* (Eng tr , 1937), and *Happy Landing* (Eng tr , 1942), a diary of the Second World War

hermandad (ĕrmändädh'), [Span ,=brotherhood], league or federation of towns, a characteristic feature of municipal life in medieval Spain As the kings were unable to offer adequate protection, protective leagues were formed against the lawless nobles The most powerful was the league of coastal towns in the Bay of Biscay, but there also were *hermandades* in Castile (12th-13th cent) and Aragon (13th cent) The militia, at first drawn only from the middle classes, later included men from all classes Ferdinand and Isabella founded the Holy Hermandad (Span *Santa Hermandad*) for all Spain to insure personal security and public order The permanent police force was supported by special taxes, a council of deputies was elected to determine the limits of jurisdiction, and a sort of criminal code was enforced. The *hermandades* were suppressed in Aragon in the 16th cent , but continued locally, though greatly modified, until 1835. A similar organization, called the Acordada, was founded in Mexico

Hermann, d A D 21 see ARMINIUS

Hermann (hûr'mun), city (pop 2,308), co seat of Gasconade co , E central Mo , on the Missouri and ENE of Jefferson City, settled 1837 by Pennsylvania Germans, inc 1839 It is in a farm area with diaspore, flint, and clay deposits Shoes and staves are made here

Hermannstadt, Rumania see SIBIU.

Hermanric see ERMANARIC

Hermaphroditus (hurmă"frudĭ'tus), beautiful son of Hermes and Aphrodite A nymph who loved him embraced him and prayed that they might be united forever They became one body, retaining the characteristics of male and female

Hermas (hûr'mus), Roman Christian Rom 16 14

Hermas, Shepherd of (hûr'mus), Christian apocalypse, composed in Rome at the end of the 1st cent A D A collection of the author's own prophetic visions, it resembles no other early Christian work The book is extant in fragments of the original Greek and in complete Latin and Ethiopic texts See J B Lightfoot, tr , *Excluded Books of the New Testament* (1927)

Hermes (hûr'mēz), in Greek religion, OLYMPIAN god, son of Zeus and Maia He corresponds to the Roman Mercury and is remarkable for the variety of his functions He was the god of commerce and trade, of cheats and thieves, of luck (and hence gamblers), of athletic contests, and of eloquence He acted as the swift messenger of the gods, particularly Zeus, and as the conductor of souls to Hades The herma or herm, a stone which usually had a carved head on top and a phallus in the center, probably represented Hermes in his original role in popular religion, as the giver of fertility to field, flock, and herd The lyre, which he made from a tortoise shell, and the flute were his inventions Hermes was usually thought of as a merry, impudent youth of unbounded cunning who did not scruple to steal or lie Riotous festivals were held in Hermes' honor, e g , the Greek Hermaea and the Roman Mercurialia In art, as in the well-known bronze statue *The Flying Mercury* by Bologna, Hermes is usually represented as wearing a wide-brimmed winged hat (the petasos) and winged sandals (talaria) and carrying the CADUCEUS A famous statue by Praxiteles shows Hermes with the child Dionysus

Hermes (hûr'mēz), Roman Christian Rom 16 14

Hermes Trismegistus (trĭsmu|jĭ'stus) [Gr =Hermes the thrice-greatest], name given to the reputed author of books of occult wisdom It refers to Thoth, the Egyptian god of writing, learning, and wisdom, who was equated with Hermes The *Hermetic Books,* ascribed to him, are supposed to encompass the age-old wisdom of ancient Egypt The name seems to have been applied in the 3d cent by the Neoplatonists, and it was greatly revered throughout the Middle Ages, especially by alchemists and seekers after secret knowledge Various works and thoughts were attributed to Hermes Trismegistus many of them connected with the "sympathy" of all created persons and objects Hence the name of the hermetical philosophy, popular in the 17th cent It is still much used by those interested in the occult

Hermione (hurmī'unē), in Greek legend, only child of Helen and Menelaus She was married to Neoptolemus, but Orestes, to whom she had been betrothed, killed him and married her.

hermit (hûr'mĭt) [from Gr ,=desert], one who lives in solitude especially from ascetic motives Hermits are known in many cultures, and temporary withdrawal from society is a commonplace before initiatory or propitiatory ceremonies Permanent solitude was very popular in ancient Christian asceticism, St ANTHONY of Egypt and St SIMEON STYLITES were noted hermits Many extreme Franciscans (Spirituals) of the 13th and the 14th cent were hermits, among them Pope St CELESTINE V The Basilian monks of the Eastern Church are in effect hermits The Carthusians are the only Western religious order which is partly eremitical A special type of hermit was the anchorite (or anchoret) who had himself walled up in a cell with only a window In medieval Europe the cell usually connected with a church The ANCREN RIWLE was written for English anchoresses, such a one was JULIANA OF NORWICH See MONASTICISM

Hermitage, in France see MONTMORENCY

Hermitage, museum in Leningrad, architecturally beautiful and with a fine art collection It was reconstructed as a museum in Neo-Greek style in the 19th cent from the original pavilion palace erected by Catherine II Among the collections are the treasures found in the Crimea, including the rarest of Greek jewelry It is rich in Spanish and French paintings and has a number of Rembrandts. The name is applied also to a hillside garden resort in Moscow

Hermitage, home of Andrew Jackson, central Tenn , near Nashville The house, a handsome example of a Tennessee planter's home, with a fine formal garden, was built in 1819–31 of bricks made on the

estate and was rebuilt in 1835 after fire had seriously damaged the first structure Jackson and his wife are buried in the plantation graveyard The church which he built (1823) is on the grounds

hermit crab, a crustacean in which the abdomen is soft and asymmetrical and usually coiled It is chiefly a marine animal, but some tropical forms are largely terrestrial Most hermit crabs occupy the shells of snails or other gastropod mollusks and thus protect the vulnerable abdomen with a portable shelter When the growth of the crab makes the shell too small, it seeks a larger one. It will fight for its chosen shell Related to the hermit crab is the coconut crab, which has hard plates on the back and carries no shell It climbs palm trees to eat coconuts

Hermite, Charles (shärl' ĕrmēt'), 1822–1901, French mathematician A professor at the École polytechnique, Paris (1869–76), and at the Faculty of Sciences (from 1869), he exerted a strong influence on the French school of mathematics He made valuable contributions to the theory of numbers, the theory of elliptic functions, and the theory of equations (especially of the fifth degree)

Hermite, Tristan l' see TRISTAN L'HERMITE

Hermit Kingdom. see KOREA

Hermogenes (-mŏ'jŭnēz) [Gr ,=born of Hermes], man at odds with Paul 2 Tim 1 15

Hermon (hûr'mun), town (pop 1,182), S Maine, W of Bangor, settled c 1790, inc 1814 It was a center of the Second Adventists led by William Miller

Hermon, Mount, Arabic *Jebel-esh-Sheik* [mountain of the chief] and *Jebel-eth-Thelj* [snowy mountain], on the Syria-Lebanon boundary, near Palestine The highest of its three peaks rises well over 9,000 ft All are crowned with snow in winter and spring and were a sacred landmark in ancient Palestine It is mentioned much in the Bible as Hermon, Sion, Senir, and Shenir The name Baal-Hermon (Judges 3 3, 1 Chron 5 23) records the reverence in which it was held by the worshipers of Baal The Romans also revered it, as did the Druses (there is a Druse shrine near Hasbeya) The Psalms praise its beauty. Ancient Caesarea Philippi was at its foot Mt Hermon is designated as the scene of the Transfiguration

Hermonthis (hurmŏn'thĭs), ancient city, N Egypt, near Thebes Founded in prehistoric times, it was prominent in Roman times It was originally the shrine of Month, a hawk-headed deity, and has a fine temple built c 1500 B C and reconstructed by the Ptolemies Modern Armant or Erment occupies the site

Hermopolis (hûrmŏ'pulĭs) or **Hermoupolis** (hurmōō'pulĭs, Gr ĕrmōō'pōlēs), city (pop 18,925), on Syros island, Greece It is the chief city of the Cyclades and a busy port Its industries include shipbuilding and textile, glass, and leather manufactures

Hermopolis Magna, ruined city, S Egypt, on the Nile and near the modern Ashmunein In antiquity it was the chief seat for the worship of Thoth Its woolens were famed There are remains of a Greek agora.

Hermosa Beach (hûrmō'su), resort and residential city (1940 pop 7,197, 1947 special census pop 11,172), in Inglewood township, S Calif , on Santa Monica Bay and SW of Los Angeles, inc 1907

Hermosillo (ĕrmōsē'yō), city (pop 18,601), capital of Sonora, NW Mexico, at the entrance to the gorge of the Sonora river With a climate generally hot and arid, the surrounding region raises tropical fruits, especially oranges Using GUAYMAS as its seaport, it is a trading and manufacturing center, rapidly being modernized, and is a pleasant winter resort

Hermopolis: see HERMOPOLIS

Hernandarias: see ARIAS DE SAAVEDRA, HERNANDO

Hernández. See Spaniards thus named, see FERNÁNDEZ.

Hernández, José (hōsā' ĕrnän'dĕs), 1834–86, Argentine poet, journalist, and soldier He was the founder of the *Revista del Rio de la Plata* and author of the classic of gaucho literature, *Martín Fierro* (1872) and its sequel, *La vuelta de Martín Fierro* [the return of Martín Fierro] (1879, Eng tr of both parts, 1936) The poem, written in the form of an autobiography and in dialect, glorifies the vanishing free life of the GAUCHO in the solitude of the Pampa

Hernández Martínez, Maximiliano (mäk"sēmēlyä'nō ĕrnän'dĕs märtē'nĕs), 1882–, president of Salvador (1931–44) A dictator, he was forced into exile by students leading a general strike following his bloody suppression of an army revolt The success of the strike spread to Guatemala, where Gen Jorge Ubico was similarly deposed

Hernando, town (pop. 1,072), co. seat of De Soto co , extreme NW Miss., S of Memphis, Tenn., inc. 1837 It is a trade center for an agricultural region

Herndon, Angelo, 1913–, American Negro labor organizer, the subject (1932–37) of a celebrated civil-liberties case, b. Wyoming, Ohio. Herndon, reared in squalor and often the victim of racial prejudice, worked in coal mines in Kentucky and Alabama after the age of 13 under adverse conditions. He joined the Communist party in Atlanta, Ga , and organized Negro coal miners and sharecroppers In Atlanta in 1932 he led a demonstration protesting the dropping of 23,000 families from the state relief rolls He was arrested and sentenced (1932) to an 18-year prison term for violating a Georgia law of the Reconstruction era forbidding advocacy of forceful resistance to the state's authority The decision was reversed (1935) in a superior court of the state, but the Georgia supreme court upheld (1936) the original verdict. The case attracted nation-wide attention, and in 1937 the U S Supreme Court ruled, five to four, that the state law had been wrongly applied to Herndon and that the evidence did not warrant his conviction See his autobiography, *Let Me Live* (1937)

Herndon, William Henry, 1818–91, friend and biographer of Abraham LINCOLN, b Greensburg, Ky He attended Illinois College until his proslavery father withdrew him for absorbing abolitionist doctrines In 1843 he became the junior member of the Springfield law firm of Lincoln and Herndon, a partnership that was never dissolved He is credited with having influenced Lincoln in his antislavery views and having nursed Lincoln's political fortunes After Lincoln's assassination he collected reminiscences of Lincoln's boyhood and youth from those who had known him, and in his old age wrote, with Jesse Weik, *Herndon's Lincoln the True Story of a Great Life* (3 vols , 1889) The work was savagely attacked because many of his stories were counter to the already established Lincoln legend See J F Newton, *Lincoln and Herndon* (1910), B P Thomas, *Portrait for Posterity Lincoln and His Biographers* (1947), David Donald, *Lincoln's Herndon* (1948)

Herndon, town (pop 1,046), N Va , NW of Alexandria, inc 1874, rechartered 1938

Herne, James A. (hûrn), 1839–1901, American actor and playwright, b Cohoes, N Y He first appeared on the stage in 1859–60 in *Uncle Tom's Cabin*, played stock in the East, and gained prominence in San Francisco as stage manager and character actor He became associated with David Belasco, and together they wrote and adapted several plays, the most notable being *Hearts of Oak*, from an English play, *The Mariner's Compass* Produced as *Chums* in San Francisco, it was a failure, but under its new name it succeeded both in Chicago (1879) and in New York (1880) In 1878 Herne married the actress Katherine Corcoran, for whom he wrote most of his plays The best of his dramas, distinguished by a homely as well as melodramatic realism, were *Margaret Fleming* (produced in Boston, 1891), *Shore Acres* (Boston, 1893), and *The Reverend Griffith Davenport* (New York, 1899) Later, his daughter Chrystal Herne played in revivals Herne used American material, and his influence on the development of realistic character cannot be underestimated

Herne (hĕr'nu), city (pop 97,389), Westphalia, NW Germany, near Bochum It is an industrial center of the Ruhr district

Herne Bay (hûrn), urban district (1931 pop 11,249, 1943 estimated pop 17,500), Kent, England, at the mouth of the Thames and NNE of Canterbury There are a pier and an esplanade Reculver, the Roman station Regulbium, is 3 mi east

hernia or **rupture,** protrusion of any interior organ of the body from the cavity in which it is normally located Hernia occurs most commonly in the umbilical, inguinal, and femoral regions Inguinal hernia occurs more often in the male and femoral hernia in the female In these three types of hernia, a loop of intestine protrudes through a weak spot in the wall of the abdomen or groin Congenital hernia results from a developmental weakness in the wall, acquired hernia is sometimes caused by violent exertion Simple hernia can usually be reduced by mechanical means, in more serious forms surgery is needed A less common condition is diaphragmatic hernia, in which a portion of the abdominal contents protrudes into the thoracic cavity through an abnormal opening in the diaphragm

Hero, in late Greek legend, priestess of Aphrodite in Sestos Her lover, Leander (lēăn'dur), swam the Hellespont nightly from Abydos to see her He drowned one night, and she threw herself into the sea Christopher Marlowe's poem *Hero and Leander* is based on the story

Hero, Greek mathematician see HERON OF ALEXANDRIA

hero, in Greek religion, dead man or woman of note who was given reverence and actual worship as quasi-divine The heroes were regarded in at least some aspects as ghosts or revenants to be propitiated, and the acts of worship were like those for chthonian (underworld) gods. Black animals were sacrificed, offerings were poured in trenches or on altars beside the tomb, and the sacrifices were at night. The worship generally centered about the tomb where the hero was supposed to be buried and therefore was local, though some heroes (notably Hercules) were worshiped at various places Though Homer seems to regard his heroes only as nobles and fighting men, almost all Homeric heroes later were worshiped, thus Hector was worshiped at Thebes. The heroes might be actual dead great men, real or imaginary ancestors, or "faded" gods (i.e , ancient gods for some reason demoted in popular belief to human status).

Herod, dynasty reigning in Palestine at the time of Christ. Antipater (ăntĭp'ŭtur), d. 43 B C , founder of the family fortune, was an Idumaean, he gave refuge to Hyrcanus II (see MACCABEES), thus gaining a stronghold in Palestine He was in high favor with Caesar after Pompey's defeat His principal son, Herod the Great, d 4 B C , gave the family its name Through friendship with Marc Antony, he secured the title king of Judaea (37 B C –4 B C), after the battle of Actium he made peace with Octavian (AUGUSTUS), who thereafter showed him great favor. Herod's kingship was at its best in its second decade He made great efforts to mollify the Jews by publicly observing the Law, by building a temple, and by reestablishing the Sanhedrin He adorned most of his cities, especially Jerusalem Herod married 10 times, and the various families in the palace intrigued against each other continually. In his last years Herod was subject to some sort of insanity, and he became bloodthirsty He executed Aristobulus (ăr"ĭstŏbū'lŭs) and Alexander (6 B C), his sons by Mariamne, granddaughter of Hyrcanus II In 4 B C he executed Antipater, son of his first wife, when he found out that Antipater had instigated the intrigues that led to the execution of Aristobulus and Alexander This was the Herod who was ruling at the time of Jesus' birth and who ordered the massacre of the Innocents See Mat 2, Luke 5 Herod divided his kingdom among his sons Archelaus, Herod Antipas, and Philip Archelaus (ar"kēlā'ŭs), d after A D 6, ruled Palestine S of the Vale of Jezreel (4 B C –A D 6), he was removed by Augustus after complaints by the Jews Mat 2 22 Herod Antipas (ăn'tĭpăs), d after A D. 39, tetrarch of Galilee and Peraea (E of Samaria and Judaea), was the Herod who executed John the Baptist and who was ruling at Jesus' death His wife, daughter of ARETAS, he repudiated to marry Herodias (hĭrō'dĭŭs), daughter of his half brother Aristobulus and wife of his half brother Herod Philip, whom she divorced to marry Herod Antipas This affair gained Herod Antipas many enemies, and the vaulting ambitions of Herodias eventually ruined him She drove him to seek a royal title, and Caligula banished him (A D 39) Mat 14, Mark 6, Luke 3, 23, Acts 13 Herod the Great's son Philip, d A D 34, was tetrarch of the region E of Galilee, his kingdom was non-Jewish, and he pursued a successful Romanizing and Hellenizing policy He was probably the best of his family, his wife was SALOMÉ, daughter of Herod Antipas He built Caesarea Philippi The eldest son of Aristobulus, Herod Agrippa I, d A D 44, was a man of some ability Out of friendship Caligula made him king (A D 39) of Philip's tetrarchy and the region of Abilene (W of Damascus), and on Claudius' accession he was made ruler of S Syria and of Palestine E and W of the Jordan He was strongly pro-Jewish, and he built extensively at Beyrouth (Berytus) He is mentioned in Acts 12 His son, Herod Agrippa II, d c 100, received only the northern part of his father's kingdom, and that not until c 52 He was a poor ruler and alienated his subjects His sister was BERENICE 2 After the fall of Jerusalem he went to Rome See also Acts 25, 26 He was the last important member of his family As a dynasty the Herods were neither good nor capable rulers; they depended largely on the power of Rome They are usually blamed for the state of virtual anarchy in Palestine as the Christian era began The prime source is the history of Josephus, a personal friend of Herod Agrippa II Other members of the family were BERENICE 1 and DRUSILLA

Herodas (hĭrō'dŭs) or **Herondas** (hĭrŏn'dŭs), fl 3d cent B.C , Greek poet. He wrote realistic mimes in choliambic verse depicting the vulgar scene. A papyrus containing some 700 readable lines by Herodas is extant

Herodes Atticus (Tiberius Claudius Atticus Herodes) (hĭrō'dēz ă'tĭkŭs), c 101–c 177, Greek teacher, rhetorician, and Sophist, b Athens A great public benefactor, he expended his fortune in adorning Athens and other Greek cities One doubtfully attributed speech is extant The name also appears as Atticus Herodes

Herodians (hĕrō'dēuns), Jewish political party of the early 1st cent , favorable to the dynasty of HEROD Some have supposed they were largely Sadducees. Mat 22.16, Mark 3 6; 12.13

Herodias (hĕrō'dēus) see HEROD

Herodion (-rō'-), Christian at Rome. Rom. 16 11.

Herodotus (hĕrŏ'dŭtŭs), 484?–425? B.C., Greek historian, called the father of history, b. Halicarnassus, Asia Minor Only scanty knowledge of his life can be gleaned from his writings and from references to him by later writers, notably Suidas. He may have been exiled from Halicarnassus for taking part in a revolution, and certainly he spent some time abroad (possibly in Samos), then he seems to have returned to his native city, where he may have had a part in overthrowing the tyrant Lygdamis before he left Halicarnassus permanently.

He traveled along the coast of Asia Minor to the northern islands and to the shore of the Black Sea, he also at some time visited Mesopotamia, Babylon, and probably Egypt By 447 he was in Athens, and in 443 he seems to have helped to found the Athenian colony of Thurii in S Italy, where he probably spent the rest of his life completing his history That work, the first comprehensive attempt at secular narrative history, is a classic of world literature as well as the starting point of Western history writing It is primarily concerned with the story of the Persian Wars, but the earlier books embody great quantities of material about the ancient world as he knew it, with long digressions and stories of all sorts, illustrating the diverse cultures of his time and earlier It is divided into nine books named for the Muses—a division made by a later editor The value of the work lies not in its accuracy—though Herodotus seems to have made some effort to be critical about his sources—but in the rich diversity of information it offers and the charm of its anecdotal style It has been often contrasted with the work of Thucydides, which is much more rigidly accurate but considerably less broad in scope For bibliography, see HISTORY See T R Glover, *Herodotus* (1924)

Heroic Age, in classical mythology see AGE.

heroic couplet see PENTAMETER

heroin (hĕ'rō-ĭn), habit-forming drug, a derivative of morphine Because a person may easily become addicted to the use of heroin, it is seldom prescribed In the United States the importation and manufacture of heroin are prohibited

Herold, Louis Joseph Ferdinand (lwē' zhōzĕf' fĕrdēnā' ārōld'), 1791–1833, French composer He composed a number of operas, two of which—*Zampa* (1831) and *Le Pré aux clercs* [the field of honor] (1832)—were for a time immensely popular

heron (hĕ'rŭn), large wading bird found in most of the temperate regions of the world, but especially numerous in tropical and subtropical areas It has a long, sharp bill, a long neck, long legs, large wings, and soft drooping plumage Many herons nest in large colonies, usually in trees They are, as a rule, solitary when feeding and often stand patiently for long periods watching for prey—chiefly small aquatic animals Among the American species are the great and the little blue herons, the little green heron, the black-crowned and the yellow-crowned night herons, and the Louisiana heron, called by Audubon the Lady of the Waters *Hern* is an old form of heron used in Tennyson's "The Brook" and in Longfellow's "The Herons of Elmwood"

Herondas. see HERODAS

Heron of Alexandria (hĕr'ŏn) or **Hero,** mathematician and inventor The dates of his birth and death are unknown, conjecture places them between the 2d cent B C and the 3d cent A D He is believed to have lived in Alexandria, although he wrote in Greek, his origin is uncertain Several of his works survive either in Greek or in Latin translation He wrote on the measurement of geometric figures, and a formula for finding the area of a triangle has been ascribed to him Known for his study of mechanics and pneumatics, he invented many contrivances operated by water, steam, or compressed air, these include a fountain, a fire engine, siphons, and an engine in which the recoil of steam revolves a ball or a wheel

Herophilus (hĭrŏ'fŭlŭs), fl 300 B C, Greek anatomist, a contemporary of Erasistratus at Alexandria He made numerous anatomical discoveries, by dissecting human bodies, and investigated the brain, the eye, the alimentary canal (he is credited with naming the duodenum), and the arteries and veins, he was one of the first to distinguish between motor and sensory nerves

herpes. see COLD SORES and SHINGLES

Herrera, Fernando de (fĕrnän'dō dā ĕrā'rä), 1534–97, Spanish poet He was one of the outstanding poets of the 16th cent, leader of the Seville school, and was called Herrera el Divino for his qualities as a poet He is remembered for his sonnets and love lyrics inspired by his love for Doña Leonor de Gelves and for his heroic odes on Don John of Austria and the victory of Lepanto

Herrera, Francisco de (fränthĕ'skō), the elder, 1576–1656, Spanish painter in fresco and in oil Born in Seville, he worked there most of his life He was a founder of the naturalistic school of Seville Velázquez was among his pupils for a short time, but Herrera's irascible temper alienated him from his students and finally from his family He was a good draughtsman and a dramatic and vigorous painter. His *Triumph of St Hermengild* (Seville) and *Vision of St Basil* (Louvre) are famous Many of his works remain in the Sevillian churches for which they were painted His son, **Francisco de Herrera,** the younger, 1622–85, studied in Rome, where he was known as a still-life painter Returning to Spain he occupied positions of honor under Philip IV and Charles II He designed the cathedral at Saragossa, one of the earliest baroque churches Although an admirable technician and colorist, he did not equal his father His fresco *Assumption* (Church of Atocha, Madrid) and his *Triumph of St. Hermengild* (Prado) are among his best-known works.

Herrera, José Joaquín (hōsā' hwäkēn'), 1792–1854, president of Mexico (1844–45, 1848–51) As president he opposed the war with the United States, but his weak political position made him refuse to negotiate with SLIDELL, and a revolution led by PAREDES Y ARRILLAGA resulted in his resignation After the war he again held the presidency Indian insurrections and political revolutions disturbed his administration, and his attempt to reform the government failed

Herrera y Reissig, Julio (hōō'lyō ĕrā'rä ē rāsēk'), 1875–1910, Uruguayan poet He belonged to a family prominent in public affairs but withdrew along with his bohemian followers to an attic known as the Tower of the Panoramas and there wrote in the spirit of MODERNISMO The obscurity and preciosity of his verses and his daring and extravagant figures show the influence of Góngora and of the symbolists He is still considered a poet for the few. His subject matter, however, drew inspiration from daily life, especially from Uruguayan country scenes

Herrera y Tordesillas, Antonio de (antō'nyō dā ĕrā'rä ē tôrdhāsē'lyäs), 1559?–1625, Spanish historian Appointed official historiographer of Castile and the Indies under Philip II, he wrote a general history of the New World (1601), a history of Philip's reign (1606), and various other works dealing with his own times He had access to official documents, and his facts are generally reliable

Herreshoff, John Brown (hĕ'rus-hŏf), 1841–1915, American yacht and speedboat builder He became a shipbuilder, though totally blind from the time he was 15. He managed his own company until his brother, **Nathaniel Greene Herreshoff,** 1848–1938, became superintendent of the Herreshoff Manufacturing Company in 1881 Together, Nathaniel designing and John superintending the construction and finances, they produced steam yachts and torpedo boats, but in 1891 they resumed the construction of sailing yachts, introducing new and radical features of design The *Gloriana* won them a reputation, and they subsequently produced five successful defenders of *America's* Cup—the *Vigilant* (1893), the *Defender* (1895), the *Columbia* (1899), the *Reliance* (1903), and the *Resolute,* successful against *Shamrock IV* in 1920

Herrick, Myron Timothy, 1854–1929, American diplomat, b Huntington, Lorain co, Ohio One of Mark Hanna's lieutenants in the Ohio Republican machine, he worked for McKinley's nomination in 1896 and was (1903–5) governor of Ohio President Taft named (1912) him ambassador to France, and President Harding appointed (1921) him again to the same post He died in the embassy building, which he had bought for the American government out of his own funds See biography by T B Mott (1930)

Herrick, Robert, 1591–1674, English poet, generally considered the greatest of the CAVALIER POETS He was born in London but spent most of his childhood in Hampton Apprenticed in 1607 to his uncle, jeweler to the king, he remained in London until 1613 He was graduated from Cambridge (B A, 1617, M A, 1629) The next years he spent in London, where he seems to have been a member of Ben Jonson's literary circle Sometime before 1627 he took orders and in that year was chaplain in the duke of Buckingham's disastrous expedition to the Isle of Ré In 1629 he was given the country living of Dean Prior in Devon There he remained until 1647, when as a royalist he refused to subscribe to the Solemn League and Covenant and was ejected. He seems to have gone to London, and in the next year appeared his first volume of verse, *Hesperides,* which included poems that had been circulated in manuscript and his sacred songs called *Noble Numbers* In 1662 he was returned to his living, where he remained until the end of his life Herrick is best known for his lyrics of rural life and bucolic love His exquisite love lyrics show considerable classical influence but are remarkable especially for their effect of simple naïveté and their blending of melody and perfectly chosen words Among the best known of his lyrics are "Night-Piece To Julia," the song commencing, "Gather ye rosebuds while ye may," "Corinna's going a-Maying," "To Anthea," and "Cherry-ripe" Among his sacred poems are such fine pieces as "Litany to the Holy Spirit" Herrick also excelled in the writing of epigrams and epitaphs His reputation declined after his death, but in the 19th cent he was recognized as a great lyricist See edition of his poetical works by F W Moorman (1915), biographies by F. W. Moorman (1910) and Floris Delattre (1912)

Herrick, Robert, 1868–1938, American novelist, b Cambridge, Mass, grad. Harvard, 1890 He was professor of English at the Univ of Chicago from 1893 to 1923 and a realistic novelist of distinction His works include *The Man Who Wins* (1895), *The Web of Life* (1900), *Together* (1908), *The Master of the Inn* (1908), *Clark's Field* (1914), *Chimes* (1926), and *The End of Desire* (1932) He was appointed government secretary of the Virgin Islands in 1935 and died in Charlotte Amalie, V.I.

Herrin, city (pop. 9,352), S Ill., N of Cairo; settled 1818, inc 1900 It is the trade center of an extensive coal-mining area The "Herrin Massacre" occurred in 1922 during a country-wide coal strike Clashes between unionized strikers, armed guards from Chicago, and nonunion miners who had been imported by the coal company resulted in the death of about 25 persons In the trials which followed it was impossible to secure a conviction because of strong local sentiment for the union

herring, common food fish widely distributed in the N Atlantic waters of North America and Europe, in the seas of N Europe, and in the N Pacific. There are numerous species, the common herring being *Clupea harengus,* it travels in huge schools through the temperate and cold waters of the N Atlantic When full grown it is usually about a foot long, has silvery sides, and is blue above. It feeds on plankton sifted from the sea water It lays as many as 30,000 eggs in spring or fall; the eggs sink to the sea bottom, where they develop. In three years the young are mature Some related species run up rivers to spawn The smaller herring caught off the shores of North America and also of Norway are canned in quantities as "sardines." Herring are sold in nearly all parts of the world after preservation by drying, smoking, salting, or pickling, and the variously cured forms are marketed as bloaters, kippers, and red herrings

Herrings, battle of the, 1429, episode in the siege of Orléans by the English in the Hundred Years War The French attacked a wagon train commanded by Sir John FASTOLF, which was taking supplies to the army besieging Orléans, but were repulsed by the English who barricaded themselves behind the wagons with the herring barrels. The action took place at Rouvray, a hamlet near Patay, NW of Orléans

Herriot, Édouard (ādwär' ĕryō'), 1872–, French statesman and man of letters. After starting on an academic career he turned to politics. A moderate leftist, anticlerical, and antimilitarist, he rose to leadership of the Radical Socialist party, which was the dominant French party from 1899 to 1940 He began his official career in 1904 when he was elected mayor of Lyons—an office which he held until 1941 and again after 1945 He subsequently became a deputy, president of the chamber of deputies, member of several ministries, and several times premier (notably 1924–25 and 1932) His first term as premier saw the evacuation of the Ruhr, the continued fall of the franc led to his resignation (1925) During his term in 1932 the world was in the midst of the economic crisis that was to shape later history Herriot sought a conciliatory policy among France, England, the United States, Russia, and Germany At the DISARMAMENT CONFERENCE of 1932 Herriot upheld in principle the demand for French security but submitted a modified plan to keep the conference from foundering He was one of the few French statesmen to advocate payment by France of the WAR DEBTS to the United States, it was on this question that his cabinet fell Herriot visited the United States in 1933 on the invitation of President F D Roosevelt, with whom he conferred on debt, disarmament, and monetary problems An outspoken opponent of the Vichy government of France, Herriot was arrested in 1942 and taken to Germany in 1944 Freed in 1945, he resumed leadership of the Radical Socialists, who, however, had dwindled to a minor party and who for many years had ceased to be a leftist group In 1947 Herriot became president of the national assembly, which had taken the place of the chamber of deputies He has ardently advocated a European confederation, for which he set forth a plan in his book, *The United States of Europe* (Eng tr, 1930) Among his nonpolitical writings the best known is a biography of Beethoven (Eng tr, 1935)

Herrnhut (hĕrn'hōōt'), town (pop 2,024), Saxony, E Germany It was founded (1722) by Graf von ZINZENDORF as a colony of Moravian Brothren (see MORAVIAN CHURCH)

Herron, Francis Jay, 1837–1902, Union general in the Civil War, b Pittsburgh He fought at Wilson Creek (1861) and Pea Ridge (1862) and was made brigadier general (July, 1862) With Gen J G Blunt, he defeated Hindman at PRAIRIE GROVE (Dec, 1862), thereby winning himself a major generalcy Herron was with Grant at Vicksburg (1863), served in the Dept of the Gulf (1863–64), and was a commander in Louisiana (1865) Resigning from the army in June, 1865, Herron remained in the South, where he practiced law and participated in the questionable politics of the Reconstruction in Louisiana In 1897 he moved to New York city

Herron, George Davis, 1862–1925, American clergyman, b Montezuma, Ind While professor of applied Christianity at Grinnell College, Iowa, he became a Christian Socialist, resigning from the college because of subsequent criticism He joined the Socialist party and became prominent in it, being chiefly responsible, with money given by Mrs E D Rand, for the organization of the RAND SCHOOL OF SOCIAL SCIENCE Deposed from the ministry because of his views and condemned for his divorce, he moved to Italy. After the outbreak

of the First World War, he broke with the Socialist party and supported Wilson He has been credited with playing an important unofficial role in the peace negotiations His books include *The Larger Christ* (1891), *Social Meanings of Religious Experiences* (1895), and *The Defeat in the Victory* (1921) See M. P Briggs, *George D Herron and the European Settlement* (1932)

Herschel, Caroline Lucretia (hûr'shûl), 1750–1848, English astronomer, sister of Sir William Herschel She was his collaborator from 1772, when she left Germany to join him in England She recorded his observations and comments and worked out calculations In addition, she explored the heavens with a small Newtonian telescope and discovered eight comets (on five of which she could claim priority) and three nebulae. In 1798 the Royal Society published her *Index to Flamsteed's Observations of the Fixed Stars* and a star catalogue Returning to Germany after Sir William's death in 1822, she worked on the arrangement and reduction of the star clusters and nebulae he had discovered, completing the catalogue in 1828 See M C Herschel, *Memoir and Correspondence of Caroline Herschel* (1876)

Herschel, Sir John Frederick William, 1792–1871, English astronomer, son of Sir William Herschel He confirmed his father's observations of double stars, working for a while with the collaboration of James South He was able to add numbers of previously unrecognized pairs to those in the catalogue and extended his examination to include nebulae He presented his results to the Royal Society in the form of a catalogue of stars in 1833 In order to complete the survey of the heavens, he went to the Cape of Good Hope in 1834 In 1848 he became president of the Royal Astronomical Society Sir John was a distinguished chemist and made valuable contributions to the development of photography Among his books are *Outlines of Astronomy* (1849) and *Familiar Lectures on Scientific Subjects* (1867) See A M Clerke, *The Herschels and Modern Astronomy* (1895)

Herschel, Sir William, 1738–1822, English astronomer, originally named Friedrich Wilhelm Herschel, b Hanover, Germany He was a great pioneer in the study of the stars in space Son of a musician, he early became a skilled performer on several instruments and was an oboe player in the band of the Hanoverian Guards Going to England in 1757, he was musical conductor, organist, and teacher of music and studied mathematics and astronomy in his leisure time He constructed telescopes and systematically explored the sky On March 13, 1781, he discovered a new planet later named Uranus Appointed private astronomer to the king (1782), he was able to devote his time to astronomy His sister Caroline aided him in his work In 1789 at Slough, Herschel erected his great telescope, with a 48-inch mirror and a focal length of 40 ft With his powerful reflecting telescopes, Sir William penetrated farther into the distances beyond our solar system, covering the whole of the heavens several times during his life He discovered the sixth and seventh satellites of Saturn, determined the rotation period of Saturn and studied the rotation of other planets, and concluded from the motions of double stars that they are held together by gravitation and that, revolving about a common center, they form systems far outside our own He catalogued over 800 double stars His researches in the field of nebulae suggested a possible beginning of new worlds from gaseous matter Before this time only about 100 nebulae had been known Sir William's catalogue, arranged by his sister, contained about 2,500 He concluded that the whole solar system is moving forward through space, and he was able to indicate the point toward which he believed it to be moving From 1781 to the time of his death, he presented many papers before the Royal Society See biographies by E S Holden (1881), James Sime (1900), and J L E Dreyer (1912)

Herschel Island, off N Yukon, in a bay of the Beaufort Sea. Herschel village on its east coast is the site of a Royal Canadian Mounted Police post

Hersey, John (hûr'sē), 1914–, American author and journalist, b China, of American parents He attended American schools and was graduated from Yale in 1936 He was for some time affiliated with *Time* and *Life* His novels are based on his experiences as a war correspondent in the Second World War *A Bell for Adano* (1944), from which a play and a moving picture were made, won the Pulitzer Prize for fiction in 1945 His powerful account of the effects of atomic bombing, *Hiroshima* (1946), was first published as a complete number of the *New Yorker* magazine His novel *The Wall* (1950) describes the Nazi persecution of the Polish Jews

Hersfeld (hĕrs'fĕlt), town (pop 19,625), Hesse, W Germany, in former Electoral Hesse It originated (8th cent) with a Benedictine abbey patronized by Charlemagne

Hershey, unincorporated village (pop. c 4,000), SE Pa , E of Harrisburg, founded 1903. Owned by the Hershey company, it manufactures chocolate confectionery in large quantities.

Herstal (hĕr'stäl), town (pop. 25,049), Liége prov , E Belgium, a suburb of Liége Also known as Héristal (ārēstäl'), it was a residence of the early Carolingian mayors of the palace and of Charlemagne It now has an important arms industry and also manufactures motorcycles.

Herter, Albert (hûr'tur), 1871–1950, American mural and figure painter, illustrator, and designer of textiles, b New York city His work includes *Two Boys* (Metropolitan Mus) and a large mural painting in the East Station, Paris, commemorative of the First World War, the artist's gift to France in memory of his son

Hertford, William Seymour, 1st **marquess and** 2d **earl of,** 1588–1660, English nobleman, descendant of Edward Seymour, brother of Henry VIII's queen, Jane Seymour For marrying Arabella Stuart, cousin of James I, against the king's wishes he was imprisoned After her death he fled the country, but returned in 1616 Made a privy councilor (1640) and marquess of Hertford (1640) he fought well for Charles I in the civil war He received his ancestor's dukedom of Somerset at the Restoration (1660)

Hertford, county, England see Hertfordshire

Hertford (här'fûrd, hart'–) municipal borough (1931 pop 11,378, 1943 estimated pop 12,970), co seat of Hertfordshire, England, on the Lea and N of London, in an agricultural region It was important in Saxon times, here, in 673, the archbishop of Canterbury convened the first national church council Near Hertford is one of the leading public schools of England, Haileybury College, founded in 1805 by the East India Company and originally a training school for young men entering the colonial service of the company The school was reestablished by royal charter in 1862 as a public school, but much of the old atmosphere and tradition remains

Hertford (hûrt'furd), town (pop 1,959), co seat of Perquimans co , NE N C , N of Albemarle Sound and SW of Elizabeth City, on the Perquimans river, settled before 1700, inc 1758 Cotton and peanuts are grown in the area

Hertford College. see Oxford University

Hertfordshire (har'furdshĭr, härt–) **Hertford,** or **Herts** (hûrts, hûrts), inland county (632 sq mi , 1931 pop 401,206, 1948 estimated pop 587,800), S England The county town is Hertford, but St Albans, famous for its Norman cathedral, is a more important urban center The terrain is level except for an extension of the Chiltern Hills in the northwest portion of the county The chief streams are the Colne, the Lea, the Stort, and the New, which drain into the Thames Hertfordshire is an agricultural county, producing large quantities of wheat and hay as well as vegetables and flowers for the near-by London market The shire was originally organized as a military district by Edward the Elder and has figured prominently in the military history of England, particularly during the Wars of the Roses See *Victoria History of Hertford* (4 vols , 1902–14), Arthur Mee, *Hertfordshire* (1939)

Hertling, Georg, Graf von (gā'ôrk gräf' fŭn hĕrt'-lĭng), 1843–1919, German statesman and philosopher, imperial chancellor (Nov , 1917–Sept , 1918) He was professor of philosophy and a leader of the Center (Catholic) party in the Reichstag before he became (1912) prime minister and minister of foreign affairs of Bavaria Succeeding Michaelis as chancellor in 1917, Hertling was unable to meet the conflicting demands of the military commanders (particularly Ludendorff), the Reichstag, and public opinion The German reverses of 1918 and the food shortage created an atmosphere of defeat that doomed Hertling's chancellorship and the empire as well He resigned and was succeeded by Prince Maximilian of Baden His philosophic works are strongly Catholic, he was an authority on medieval scholasticism He left memoirs (2 vols , 1919)

Hertogenbosch,'s, Netherlands. see 's Hertogenbosch

Herts see Hertfordshire

Hertwig, Oscar (ôs'kär hĕrt'vĭkh), 1849–1922, German embryologist, studied medicine with Haeckel and Gegenbaur In 1875 he established the fact that fertilization consists of the union of male and female nuclei He made studies of the germ-layer theory and of malformations of vertebrate embryos

Herty, Charles Holmes, 1867-1938, American chemist, b Milledgeville, Ga , grad Univ of Georgia, 1886 He taught chemistry at the Univ of Georgia (1891-1902) and at the Univ of North Carolina (1905–16) His researches in making paper from pine pulp were important in the industrial development of the South

Hertz, Alfred (hûrts, Ger äl'frāt hĕrts'), 1872–1942, German-American conductor He conducted at various opera houses in Germany As conductor (1902–15) of German operas at the Metropolitan Opera House, he introduced Wagner's *Parsifal*, Richard Strauss's *Salomé* and *Der Rosenkavalier*, and Humperdinck's *Königskinder* to the United States and conducted the premières of several American operas. He was conductor of the San Francisco Symphony Orchestra from 1915 to 1930, and from their beginning in 1922 until 1925 he conducted the Hollywood Bowl Concerts He conducted (1932-39) the Standard Symphonic Hour on the radio

Hertz, Gustav (gōōs'täf hĕrts'), 1887–, German physicist He is noted for his work on the atom, and he shared with James Franck the 1925 Nobel Prize in Physics for research on the effects of the impact of electrons on atoms He became professor at the Technical Institute, Berlin, in 1928 and also director of research at the Siemens works in 1935, in 1947 he undertook atomic research for the USSR

Hertz, Heinrich Rudolf (hûrts, Ger hĭn'rĭkh rōō'-dôlf hĕrts'), 1857–94, German physicist He confirmed J C Maxwell's electromagnetic theory and in the course of experiments (1886–89) produced and studied electromagnetic waves (known also as hertzian waves or radio waves) He demonstrated that these are long, transverse waves that travel at the velocity of light and can be reflected, refracted, and polarized like light Hertz also investigated electric discharge in rarefied gases He was professor at the Polytechnic Institute, Karlsruhe (1885–89), and at the Univ of Bonn (from 1889) His writings include *Electric Waves* (1890, Eng tr , 1893) and *Principles of Mechanics* (1894, Eng tr , 1899)

Hertzog, James Barry Munnik (hûrt'sŏg, hĕrt'sôkh), 1866–1942, South African military and political leader Before the South African War, in which he commanded a division of the Boer forces (1899–1902), he had been a judge in the Orange Free State As minister of education in the Orange River State (1907–10), he insisted upon the teaching of Dutch as well as English in the schools In the first cabinet of the Union of South Africa he was minister of justice (1910–12), but his active resistance to Louis Botha, then premier, and to the supremacy of Great Britain brought about a crisis, and he was dropped from the government Hertzog then took the lead in organizing a party opposed to imperialism and aiming at a state independent of the British Empire (1913) After 1924, when by an alliance between this nationalist party and the Labour party a coalition government was formed, he was prime minister for 15 years until Sept , 1939 Parliament then repudiated his anti-British attitude on the outbreak of the Second World War

Heruli see Germans

Hervey Islands see Cook Islands

Hervey of Ickworth, John, Baron (har'vē, hûr'vē), 1693–1743, English statesman and memoir writer Elected member of Parliament (1725) and later (1733) called to the House of Lords, he served as vice chamberlain and privy councilor, attaching himself to the prime minister, Sir Robert Walpole He narrowly escaped with his life as a result of a duel with William Pulteney, who quarreled with him because of a pamphlet Hervey supposedly had written Hervey had great influence with Queen Caroline Pope attacked him as Lord Fanny in the first of the *Imitations of Horace* (1733) and as the Sporus in his *Epistle to Arbuthnot* (1735) Hervey's bitter *Memoirs of the Reign of George II*, not published until 1848, would seem to justify Pope's characterization of him as "familiar toad, half froth, half venom "

Hervieu, Paul (Paul Ernest Hervieu) (pôl' ĕrvyû', ĕrnĕst'), 1857–1915, French author His naturalistic novels include *Peints par eux-mêmes* [self-depicted] (1893) and *L'Armature* (1895) Treating similar social problems are his plays, which include *La Course du flambeau* (1901, Eng tr , *The Trail of the Torch*, 1915) and *Le Dédale* (1903, Eng tr , *The Labyrinth*, 1913) A collection of essays appeared as *La Bêtise parisienne* (1884). In 1900 he was elected to the French Academy

Herwegh, Georg (gā'ôrk hĕr'vāk), 1817–75, German revolutionary poet His career was marked by several periods of exile for dueling and political activity, which included a leading part in the unsuccessful revolution (1848) in Baden His best-known volume of verse, *Gedichtes eines Lebendigen* [poems of a living man] (1841) exerted great influence upon political feeling

Herz, Henriette (de Lemos) (hĕnrĭĕt'tu du lā'môs hĕrts), 1764–1847, German intellectual Her Berlin home was frequented by most of the liberal intellectuals of the day, among them Jean Paul Richter, Friedrich Schlegel, and Mme de Staël See H W Puckett, *Germany's Women Go Forward* (1930), Bertha Meyer, *Salon Sketches* (1938)

Herzegowina. see Bosnia and Hercegovina

Herzen, Aleksandr Ivanovich (ălyĭksän'dŭr ēvä'-nŭvĭch hâr'tsĭn), 1812–70, Russian revolutionary leader and writer The Decembrist Conspiracy (1825) inspired him to devote his life to revolution, and for this he was early exiled Freed in 1840, he went to Moscow and met Belinsky The two influenced each other profoundly In 1847 Herzen left Russia for good, to settle first in Paris, where he hailed the revolution in 1848, and later in England, where he set up the first free Russian press abroad In 1855 he published a survey of Russia as it was under serfdom, together with a history of the revolutionary movements he had witnessed—*My Past and Thoughts* (Eng. tr , 1924) He also published a weekly journal *Kolokol* (1857–62), in which he attacked the Russian system of government. The journal was widely read in Russia, even by Tsar

Alexander II himself, although officially it was banned Hersen represents the trend of Russian progressive thought from romantic idealism to scientific positivism He wrote in English a novel, *Whose Fault?* (1847), and a two-volume work, *My Exile to Siberia* (1855), but he is far more important as a revolutionary than as a writer See his memoirs (Eng tr , 1923); E H Carr, *The Romantic Exiles a Nineteenth Century Portrait Gallery* (1933)

Herzl, Theodor (tā'ōdōr hĕr'tsul), 1860–1904, Hungarian Jew, founder of modern Zionism, b. Budapest He was a journalist, dramatist, and critic in Vienna until he was sent to Paris to report the Dreyfus Affair, which aroused his intense interest in the Jewish cause and his determination to aid in the establishment of a Jewish state, to which he devoted the rest of his life His famous pamphlet *Der Judenstaat* has been reprinted many times In 1949 his body was removed from Vienna to Jerusalem, for burial with highest honors See biographies by Jacob De Haas (1927) and Alex Bein (1940)

Herzlia or **Herzliah** (both hĕrtslē'ŭ), town (pop. c 5,500), central Israel, near the Mediterranean Sea It was founded in 1924 and named for Theodor Herzl There is flour milling, and citrus fruits are grown in the vicinity

Herzog, Johann Jakob (yō'hän ya'kôp hĕr'tsōk), 1805–82, German Protestant theologian His most important contribution was the founding and editing of the *Realencyklopädie für protestantische Theologie und Kirche* (22 vols , 1853–68)

Hesed (hĕ'sĕd) [Heb ,=kindness], father of a steward of Solomon 1 King 4 10

Heshbon, ancient city, c 20 mi E of the Jordan, now an extensive ruin called Hesban Its importance—it was an Amorite capital—arose from its situation at the crossroads of the east-west road to Jericho and the north-south road paralleling the Jordan It was first allotted to Reuben, later to Gad Num 21 26, 32 37, Joshua 13 17, 21 39, Isa 15 4, Jer 48 2,34,35

Heshmon [Heb ,=thriving], town, apparently in extreme S Judah Joshua 15 27

Hesiod (hē'sēud, hē'), fl 8th cent ?B C , Greek poet Little is known of his life except for the scant references he makes to a quarrel over property with his brother He lost the dispute Hesiod pictures himself as a Boeotian farmer His most famous poem is the didactic *Work and Days*, which has caustic advice for his brother and maxims for farmers to pursue, its aim is to inculcate righteousness and efficiency The "days" are days lucky or unlucky for particular operations Also ascribed to him are the *Theogony*, a genealogy of the gods, and *The Shield of Heracles* So little is known of him that some scholars have denied his existence He gave his name to the Hesiodic school of poets, rivals of the Homeric school

Hespeler (hĕ'spulur), town (pop 3,058), S Ont , on the Speed river and N of Galt, in a stock-raising region It has wool and flour mills

Hesperides (hĕspĕ'rĭdēz) [Gr ,=in the west], in Greek religion, nymphs, daughters of Atlas On an enchanted island in the western sea in the garden of the Hesperides, they guarded a tree (a wedding gift from Gaea to Hera) which bore golden apples A dragon helped guard it Heracles obtained the apples as one of his 12 labors

Hesperus (hĕ'spurus) [Gr ,=western], name by which the Greeks called Venus as the evening star The Latin name was Vesper He was represented as leading the other stars out into the sky The Greek name for it as the morning star was Phosphorus, the Latin, Lucifer

Hess, Germain Henri (hĕs, Fr zhĕrmĕ' ärē' ĕs'), 1802–50, Swiss-Russian chemist, b Switzerland He taught at the Univ of St Petersburg A founder of thermochemistry, he stated (1840) Hess's law the amount of heat liberated or absorbed in a given chemical reaction is constant regardless of the number of stages occurring, provided that the same original substances and end products are involved

Hess, Heinrich Maria von (hīn'rĭkh mărē'ä fŏn hĕs'), 1798–1863, German painter He was noted for his frescoes in the churches of Munich He was long professor at the Munich Academy and later director of all the Munich galleries His brother **Karl von Hess,** 1801–74, is best known for his pictures of Alpine landscape and animals Another brother, **Peter von Hess,** 1792–1871, painted battle scenes of the Greek and Russian campaigns of 1812–15 and made 36 sketches of the *Liberation of Greece* for the Munich Hofgarten

Hess, Dame Myra, 1890–, English pianist, studied at the Royal Academy of Music She made her debut in London in 1907 and first appeared in the United States in 1922 In 1939 she organized a series of lunch-time concerts in the National Gallery, London These concerts, many of which she herself played, were immensely popular In 1941 she was made Dame of the British Empire

Hess, Peter von : see Hess, Heinrich Maria von

Hess, Rudolf (rōō'dôlf hĕs'), 1894–, German National Socialist leader, b Alexandria, Egypt, son of a German merchant He early was an ardent follower of Adolf Hitler, after the Munich "beer-hall" putsch (1923) he shared Hitler's imprisonment. To him Hitler dictated *Mein Kampf* In 1933 he became deputy Führer and minister without portfolio In 1939 Hitler named him second choice (after Goering) as successor Hess created a world-wide sensation when he stole an airplane and flew (May, 1941) from Augsburg to Scotland (where he was arrested), apparently in an attempt to negotiate a peace agreement with Great Britain At the Nuremberg war-crimes trial (1945–46) he was sentenced to life imprisonment The question of Hess's sanity, complicated by his feigned fits of madness and amnesia, is still open

Hess, Victor Francis, 1883–, American physicist, b. Austria, Ph D, Univ of Graz, 1906 After teaching at the universities of Graz and Innsbruck, he came to the United States in 1938 and was later naturalized. He became professor of physics at Fordham Univ in 1938 By means of instruments carried aloft in balloons, Hess and others proved that radiation that ionizes the atmosphere is of cosmic origin For this discovery of cosmic rays he shared with C D Anderson the 1936 Nobel Prize in Physics He wrote *Cosmic Radiation and Its Biological Effects* (with Jakob Eugster, 1940, 2d ed , 1949)

Hess, Walter Rudolf, 1881–, Swiss physiologist For his work on the control of organs by certain areas of the brain he shared with Egas Moniz the 1949 Nobel Prize in Physiology and Medicine In 1917 he became professor and director of the physiology institute at the Univ of Zurich

Hesse, Hermann (hĕr'män hĕ'su), 1877–, German novelist and poet The son of missionaries in India, he left a theological preparatory school and became a mechanic and then a bookseller before devoting all his time to writing He lived in Switzerland after 1919 and is a naturalized Swiss His works include the novels *Peter Camenzind* (1904), *Unterm Rad* (1905), *Rosshalde* (1914), *Demian* (1919, Eng tr , 1923), *Der Steppenwolf* (1927, Eng tr , 1929), *Narziss und Goldmund* (1930, Eng tr *Death and the Lover*, 1932), and *Das Glasperlenspiel* (1943, complete ed , 1945, Eng tr , *Magister Ludi*, 1949), the stories *Knulp* (1915) and *Siddhartha* (1923), and volumes of poetry, *Gedichte* (1922) and *Trost der Nacht* (1929) In the great German romantic tradition, Hesse presents the problem of man's spiritual loneliness He was awarded the 1946 Nobel Prize in Literature

Hesse, Philip of : see Philip of Hesse

Hesse (hĕ'sə, hĕs), Ger *Hessen* (hĕ'sun), name applied in English to several states and provinces in W Germany After the Second World War the larger part of these territories was formed into a single state (8,153 sq mi , pop 4,064 079) under American military occupation, with Wiesbaden its capital This new state includes the former Prussian province of Hesse-Nassau (1939 area 6,505 sq mi , 1939 pop 2,675,111), extending from Thuringia in the east to the Rhine in the west and containing the cities of Kassel, Fulda, Marburg, Frankfurt, and Wiesbaden, it includes also most of the former grand duchy (after 1918, state) of Hesse or Hesse-Darmstadt (1939 area 2,964 sq mi , 1939 pop 1,469 215) Hesse-Darmstadt consisted of two separate territories, divided by a strip of Prussia and by the Main river The northern portion, including the city of Giessen, is called Upper Hesse (Ger *Oberhessen*) The southern portion is traversed by the Rhine The part of Hesse-Darmstadt W of the Rhine is called Rhenish Hesse (Ger *Rhein-Hessen*) and contains the historic cities of Mainz and Worms, it was incorporated after 1945 with the newly created state of Rhineland-Palatinate, under French occupation The part E of the Rhine contains the former capital of the grand duchy, Darmstadt Nearly all of Hesse is a hilly, agricultural country, heavily forested in parts Along the beautiful Rhine valley some of the finest German wines are produced (e g , around Nierstein, Bingen, Kastel, Rüdesheim, and Johannisberg) Industries are concentrated in the Frankfurt area (notably chemicals), at Kassel (machinery and locomotives), and at Darmstadt There are iron mines along the Lahn river Among the numerous famous health resorts of Hesse are Wiesbaden, Bad Homburg, and Bad Nauheim Hesse has no unified history The cities of W Hesse—Frankfurt, Mainz and Worms—are among the oldest in Germany and have played very important parts in history Frankfurt and Worms, however, were free imperial cities under the Holy Roman Empire and Mainz was the capital of an archbishopric-electorate which comprised large territories of the present state The prince-abbots of Fulda also were independent territorial princes, as for the western part of Hesse-Nassau, its history until 1866 is that of Nassau Other parts of present Hesse long belonged to the Rhenish Palatinate Enfeoffed first to the dukes of Franconia, later to the counts of Thuringia, Hesse emerged in 1247 as a landgraviate immediately subject to the emperor under a branch of the house of Brabant Landgrave Philip the Magnanimous (see Philip of Hesse) was a leading figure in the German Reformation At his death (1567) his lands were divided among his four sons, with Kassel, Marburg, Rheinfels, and Darmstadt their respective capitals Upon the failure, shortly afterward, of the Marburg and Rheinfels lines, the whole territory was held by the two remaining lines—Hesse-Kassel and Hesse-Darmstadt Out of Hesse-Darmstadt the small landgraviate of Hesse-Homburg was taken in 1622 In the 18th cent the rulers of Hesse improved their finances by letting mercenaries for hire, many of the Hessians who fought for the British in the American Revolution settled in the United States after the war In 1803 the landgrave of Hesse-Kassel was raised to the rank of elector and Hesse-Kassel became henceforth known as Electoral Hesse (Ger *Kurhessen*) When Napoleon I created (1806) the Confederation of the Rhine, the landgraviate of Hesse-Darmstadt was raised to a grand duchy, but Electoral Hesse was absorbed (1807) into the kingdom of Westphalia, created by Napoleon for his brother, Jérôme Bonaparte The Congress of Vienna (1814–15) restored Electoral Hesse and awarded it and Hesse-Darmstadt substantial territorial gains In 1866 Electoral Hesse, the free city of Frankfurt, and Nassau, having all three sided with Austria in the Austro-Prussian War, were annexed to Prussia and were merged in the province of Hesse-Nassau, of which Kassel became the capital The former state of Waldeck was incorporated into Hesse-Nassau in 1929 The grand duchy of Hesse-Darmstadt also had sided against Prussia It ceded Hesse-Homburg (which it had just acquired through the extinction of that line), but it continued under its own dynasty until the German revolution of 1918 In 1871 Hesse-Darmstadt joined the newly founded German Empire Louis IV (reigned 1877–92) married Alice of Great Britain, daughter of Queen Victoria, through her the disease of hemophilia was transmitted to the imperial house of Russia The Battenberg (Mountbatten) family is a morganatic branch of the house of Hesse In the Second World War nearly all the major cities of Hesse suffered very severe damage, Kassel was probably the worst hit The chequered history of Hesse has brought about an equally chequered distribution of the Catholic and Protestant religions

Hesse-Darmstadt, Hesse-Homburg, Hesse-Kassel see Hesse

Hesselius, Gustavus (hĕsē'lēŭs), 1682–1755, American portrait painter, b Sweden, settled in Maryland He was America's earliest painter of portraits and the first recorded art commissioner Few of the many portraits attributed to him are authentic His *Last Supper* was placed in St Barnabas Church, Prince Georges co , Md , and his portrait of himself and his wife is owned by the Pennsylvania Historical Society In later life he was assisted by his son, **John Hesselius,** 1728–78, who painted the portraits of nearly a hundred Southern and Philadelphia families

Hesse-Nassau, Germany see Hesse and Nassau

Hessian fly, gall gnat, native to Europe, and one of the pests most destructive to wheat It also damages barley and rye First observed on Long Island during the American Revolution, it is thought to have been carried across the Atlantic on straw bedding used by the Hessian troops The harm is done by the larvae, which weaken the plants by removing sap from the stem The insects winter in the small brown pupa case which resembles a flaxseed In the spring the two-winged adults, about 1/10 in long, emerge to live a few days and lay eggs. There are usually two generations a year, but sometimes three to five Methods of control are late planting of seed and plowing under of infected wheat See bulletins of the U S Dept of Agriculture

Hestia (hĕ'stēu), in Greek mythology, virgin goddess of the hearth and domestic life and guardian of the state's welfare, daughter of Cronus and Rhea From an undying fire in her temple the fires of new temples were kindled She was one of the oldest and most honored deities of Greece and was often considered an Olympian The Romans identified her with Vesta

Heston and Isleworth (Iz'ŭlwŭrth), urban district (1931 pop 76,460, 1947 estimated pop 108,090), Middlesex, England It is a residential and market-gardening suburb of London A large airport is here, as is "Osterley Park," an 18th-century mansion belonging to the earl of Jersey.

Hesychius of Alexandria (hĕsĭk'ēŭs), 5th cent ?, Alexandrian grammarian Little is known of him except that he was compiler of an invaluable lexicon, a glossary of unusual words and expressions occurring in Greek writings The material is drawn from special languages (e g , medical), from older poets, and from various dialects and languages It gives virtually all the material now available on some vanished languages, e g , the Macedonian.

Hetch Hetchy Valley, in Yosemite National Park, central Calif , on the Tuolumne river O'Shaunessy Dam, completed in 1923, and enlarged in 1938, turned the valley into a lake c 9 mi long, which is used for supplying water to San Francisco by an aqueduct 156 mi long and for generating power

heterodyne see superheterodyne

Heth, eponym of the Hittites Gen 10 15, 23 3, 25 10, 49 32, 1 Chron 1 13

Hethlon [Heb ,=stronghold], town, on the northern boundary of the Promised Land Ezek 47 15, 48 1

Hettinger (hĕ'tĭnjur), city (pop 1,138), co. seat of Adams co , SW N Dak , near the S Dak line

1916 Bricks are made and farm products are processed.

Hevelius, Johannes (hĭvē'lēŭs, Ger yōhä'nŭs hävā'lēōs), 1611–87, astronomer, b Danzig From a finely equipped observatory in his house at Danzig, he made valuable observations of the moon's surface, discovered four comets, and collected data for his catalogue of 1,564 stars He recorded his pioneer study of lunar topography in *Selenographia* (1647), noted for excellent lunar maps He was one of the first to observe (1661) a transit of Mercury He improved astronomical instruments but resisted the introduction of telescopic sights His surname also appears as Hewel, Hewelcke, or Hŏwelcke

Hevesy, Georg von (gä'ôrk fŭn hĕ'vĕshē), 1885–, Hungarian physicist and chemist He received the 1943 Nobel Prize in Chemistry for his work on the use of isotopes as indicators in studying chemical processes He was codiscoverer of hafnium, element 72 in the periodic table Hevesy became an associate of the Institute of Theoretical Physics, Copenhagen, in 1920 and also of the Institute for Research in Organic Chemistry, Stockholm, in 1943

Hewes, Joseph, 1730–79, American Revolutionary patriot, signer of the Declaration of Independence, b Kingston, N J He moved to Edenton, N C, and became a wealthy merchant and shipper Hewes, as a member of the Continental Congress (1774–77), helped establish the American navy and obtained a commission for John Paul Jones in 1775

Hewitt, Abram Stevens (hū'ĭt), 1822–1903, American industrialist and political leader, b Haverstraw, N Y, grad Columbia, 1842 He became a lawyer, and friendship with a son and marriage to a daughter of Peter COOPER affected his career Together he and Edward Cooper became iron manufacturers with Peter Cooper's backing Hewitt promoted advanced methods of ironmaking and steelmaking and was interested in railroad development and mining He built up one of the great fortunes of his day He was elected as a Democratic Representative to Congress in 1874 and served continuously, excepting one term, until 1886 As chairman of the Democratic National Committee he directed Tilden's presidential campaign in 1876 In the Hayes administration he led a Democratic House majority in securing the repeal of a number of radical Reconstruction measures In 1886 he was elected mayor of New York on a Tammany ticket, defeating Henry GEORGE and Theodore Roosevelt As a reform mayor, he did not suit Tammany and was not renominated He became a trustee of Columbia Univ and was for many years connected with Cooper Union Selections of his writings, edited by Allan Nevins, appeared in 1937 See Allan Nevins, *Abram Hewitt, with Some Account of Peter Cooper* (1935)

Hewitt, Peter Cooper, 1861–1921, American scientist and inventor, b New York city, son of Abram S Hewitt and grandson of Peter Cooper He invented a mercury arc lamp and a rectifier and pilot electrode (or grid) In 1918 he built a helicopter with F B Crocker

Hewlett, Maurice (hū'lĭt), 1861–1923, English novelist, essayist, and poet He was a practicing lawyer from 1888 until 1900, when he turned wholly to literature His early interest in Italian art and history is reflected in his essays, *Earthwork out of Tuscany* (1895) and *The Road in Tuscany* (1904), and in the short stories, *Little Novels of Italy* (1899) *The Forest Lovers* (1898, based on Malory), *The Life and Death of Richard Yea-and-Nay* (1900), and *The Queen's Quair* (1904) are fine historical romances He also wrote novels of contemporary life, retold Icelandic sagas, and wrote a good deal of narrative poetry See his autobiographic essays, *Lore of Proserpine* (1914), and his letters (ed by Laurence Binyon, 1926), biographies by Milton Bronner (1910) and A B Sutherland (1938)

hexameter (hĕksă'mŭtur) [Gr ,=measure of six], in prosody, a line to be scanned in six feet (see VERSIFICATION). The most celebrated hexameter measure is dactylic, in dactylic hexameter each foot may have a long syllable followed by two shorts, except the last, which has only two syllables, the first being long; any of the first four feet may have two long syllables. The origin of the dactylic hexameter is not known, but it appears first, and in its purest form, in Homer. Classical epic thereafter, as in Vergil, used this meter, and it was extended to didactic and satirical literature, as in Lucretius and Martial In modern languages the only possible substitute for the quantitative differences that were essential to classical meters is the stress accent, hence we have a noticeably singsong effect when English dactylic hexameter is read aloud One of the few examples of its use in modern languages is in Longfellow's *Evangeline* "This is the forest primeval The murmuring pines and the hemlocks" A famous dactylic hexameter in English prose is in Isa 14 12 "How art thou fallen from heaven, O Lucifer, son of the morning!" The ALEXANDRINE is the only important modern hexameter

Hexapla (hĕk'sŭplŭ) [Gr.,=sixfold], polyglot version of the Old Testament made by ORIGEN It was mainly in six columns—a Hebrew text, probably the Masoretic, a Greek transliteration of it, and four Greek versions (Aquila's, Symmachus', Origen's Septuagint, Theodotion's). Some fragments survive.

Hexham (hĕk'sŭm), urban district (pop 8,888), Northumberland, England, on the Tyne and W of Newcastle It has some very old buildings and narrow streets and is an agricultural market St Wilfrid founded a monastery here in 674 The present Church of St Andrew was founded in the 13th cent The battlefield where Edward IV defeated the Lancastrians in 1464 is 2 mi southeast

Heyden, Jan van der (yän' vän dür hī'dŭn), 1637–1712, Dutch architectural and landscape painter He worked chiefly in Amsterdam His charming little pictures of towns, buildings, and public squares are painted with accuracy and detail and constitute an interesting document on the architecture of his day He is represented in many leading European collections The Metropolitan Museum has his *Huize Zwanenburg* Van der Heyden improved the construction of fire engines and was made head of the Amsterdam fire department

Heydrich, Reinhard (rīn'härt hī'drĭkh), 1904–42, German police official under the German National Socialist regime Heydrich had a hand in establishing (1933) the notorious Dachau concentration camp near Munich After his participation in the 1934 blood purges, he became deputy chief of the secret police under Himmler In 1941 Heydrich replaced Neurath as "protector" of Bohemia and Moravia His ruthless methods there, as well as in Norway, the Netherlands, and occupied France earned him a name as the Hangman of Europe In May, 1942, he was shot by Czech patriots Several days later the whole village of LIDICE was wiped out in retaliation

Heymans, Corneille (kôrnā'yŭ hī'mäns), 1892–, Belgian physiologist His contributions to the physiology of circulation include a study of the sensory mechanism through which arterial blood pressure is maintained under a reflex mechanism. He discovered the importance of the carotid sinus in regulating the respiratory center, for this he received the 1938 Nobel Prize in Physiology and Medicine He became professor at the Univ of Ghent in 1930

Heyse, Paul Johann Ludwig (poul' yō'hän lōōd'vĭkh hī'zu), 1830–1914, German realistic novelist and dramatist He early devoted himself to authorship and produced 60 plays, 120 *Novellen*, six novels, and many excellent translations, especially of Italian poets He was awarded the Schiller Prize in 1894 and was the first German author to win the Nobel Prize in Literature (1910) At one time his most famous story, *L'Arrabbiata* (1855, Eng tr, *The Fury*, 1855), was considered a masterpiece It is notable, as is most of his work, for its technical finish His better-known works include the novels *Children of the World* (1872, Eng tr, 1882) and *The Romance of the Canoness* (1881, Eng tr, 1887) as well as *The Maiden of Treppi* (1858, Eng tr, 1874) and *Andrea Delfin* (1859, Eng tr, 1864), which are *Novellen*

Heyward, DuBose (dubōz' hā'wurd), 1885–1940, American author, b Charleston, S C His first published work was poetry, *Carolina Chansons* (1922), written with Hervey Allen Heyward's story of Negro life on the Charleston water front, *Porgy* (1925), he dramatized in collaboration with his wife, Dorothy Heyward, and the drama in 1927 won a Pulitzer Prize *Porgy* was also successful as the opera *Porgy and Bess* (1935), with music by George Gershwin Heyward's other works include *Mamba's Daughters* (1929), a Negro story also dramatized successfully (1939), *Peter Ashley* (1932), a historical novel, and *Star Spangled Virgin* (1939), dealing with the Virgin Islands

Heyward, Thomas, 1746–1809, American Revolutionary patriot, signer of the Declaration of Independence, b near Charleston, S C He was a delegate to the Continental Congress (1775–78), but he resigned to become a judge in South Carolina Heyward fought at Charleston and was captured (1780) when the British took the city

Heywood, John (hä'wŏod), c 1497–c 1578, English dramatist, who married (c 1529) the niece of Sir Thomas More Heywood was the most famous writer of the INTERLUDE, a short comic dialogue Chief among the six preserved are *The Play of the Weather* (1533) and *The Four P's*, printed between 1543 and 1547 but written perhaps 15 years earlier See R W Bolwell, *The Life and Works of John Heywood* (1921), Rupert De la Bère, *John Heywood, Entertainer* (1937)

Heywood, Thomas, 1574?–1641, English playwright and actor, educated at Cambridge Of his many plays, some 20 are extant; his best is the domestic drama, *A Woman Killed with Kindness* (acted 1603, pub 1607). Others are *The Fair Maid of the West* (1631) and *The English Traveller* (1633) His best poems are in the plays, and his best prose is his *Apology for Actors* (1612). See study by A M Clark (1931).

Heywood, municipal borough (1931 pop. 25,968; 1947 estimated pop. 25,120), Lancashire, England, N of Manchester. The introduction of cotton manufacture stimulated its growth. Metal goods, boilers, and machinery are made.

Hezeki (hĕ'zĕkī) [Heb.,=God's strength], descendant of Benjamin. 1 Chron. 8 17

Hezekiah (hĕzŭkī'ŭ) [Heb.,=strong in God], d c.698 B C, king of Judah (c 727–c 698 B.C.), son and successor of Ahaz The principal events of his reign were two invasions of SENNACHERIB of Assyria (701 B C. and c 690 B C.). At the time of the first, Sennacherib completely routed the rebellious coalition and exacted a huge indemnity On the second occasion a plague in the Assyrian army saved Judah. Hezekiah's reign was marked by religious reforms and by the prophecy of ISAIAH and MICAH His son and successor was Manasseh. 2 Kings 18–20, 2 Chron 29–32, Isa 36–39, Prov 25 1 Ezekias Mat 1 10 The Hezekiah of 1 Chron 3 23 is a different person, otherwise unknown See HIZKIJAH.

Hezion (hē'zēŏn) [Heb ,=vision], Syrian king, the grandfather of BENHADAD 1 1 Kings 15 18

Hezir (hē'zĭr) [Heb.,=swine] **1** Chief priest in the time of David 1 Chron. 24 15 **2** Signer of the covenant Neh 10 20

Hezrai (hĕz'rāī) or **Hezro** (-rō), one of David's guard 2 Sam. 23 35, 1 Chron 11 37

Hezron (hĕz'-) **1** Ancestor of David Gen. 46 12, Num 26 21, Ruth 4 18 Esrom Mat 1 3; Luke 3 33 **2** Son of Reuben Gen 46 9, Num 26 6 For towns called Hezron, see HAZAR-ADDAR and KERIOTH 2

Hf, chemical symbol of the element HAFNIUM

Hg, chemical symbol of the element MERCURY

Hialeah (hīŭlā'ŭ), residential city (pop 3,958), SE Fla, part of Greater Miami, settled 1921, inc. 1925 It is the seat of the famous Hialeah Park race track

Hiawatha (hīŭwa'thu), city (pop 3,238), co seat of Brown co, NE Kansas, NW of Atchison, founded 1857, inc 1859 It is the trade center of an area producing apples, corn, and wheat In the town's cemetery is the Davis Memorial with 11 statues of John Davis and his wife

Hibben, John Grier, 1861–1933, American educator, b Peoria, Ill, grad Princeton (B A, 1882, Ph D, 1893) and studied at the Univ of Berlin and Princeton Theological Seminary He was minister of the Presbyterian Church at Chambersburg, Pa, from 1887 to 1891 He taught logic at Princeton (1891–1912), becoming professor in 1907 In 1912 he succeeded Woodrow Wilson as president of Princeton His textbooks *Inductive Logic* (1896) and *Deductive Logic* (1905) were widely used

Hibbing, village (pop 16,385), NE Minn, on the Mesabi iron range and NW of Duluth, laid out and inc 1893 A small lumber town when it was founded, it grew rapidly after its iron mines were opened The village was moved one mile south of its original site after 1917 to make way for the operation of the world's largest open-pit iron mine

hibernation (hī"burnā'shŭn) [Latin,=wintering], practice, among certain animals, of spending part of the cold season in a more or less dormant state The habit is thought to have arisen from the need of protection from cold during the season when food is scarce or as an alternative to migration and, like migration, probably has a close connection with the reproductive life of the animal Hibernation is possible only to such animals as are able to store enough food in their bodies to carry them over until food is again obtainable Animals do not grow during hibernation—all bodily activity is at low ebb Many kinds of animals hibernate, sometimes seeking a colder region, sometimes a warmer region than that of the active period Hibernation is common with amphibians and reptiles, including frogs, vipers, and rattlesnakes Many tortoises hibernate Some will die in captivity if denied the opportunity to do so Among mammals, bears, raccoons, chipmunks, some squirrels, skunks, and others hibernate The deepness of the sleep varies, some animals emerge on the warmer winter days Among insects, butterflies and ladybirds hibernate, and the larvae stage of many insects is passed in a state of hibernation Analogous to hibernation is aestivation, a dormant period of escape from heat when water is scarce It occurs chiefly among amphibians, reptiles, and fishes. Crocodiles, frogs, and climbing perches are examples of animals which aestivate

Hibernia, see IRELAND

hibiscus (hĭbĭs'kŭs, hī-), name given to widely distributed plants of the genus *Hibiscus*, many of which are also called rose mallow The various species range from annuals to small trees, some yielding fiber and food. Hibiscus flowers, usually large and showy, in colors from white to yellow and red, are particularly abundant in the tropics, the floral emblem of Hawaii is the hibiscus blossom The species most often referred to as rose mallow, or sometimes swamp or MARSH MALLOW, is *Hibiscus moscheutos*, a perennial of marshes of the E United States, which, easily cultivated, has given rise to many garden forms The ROSE OF SHARON is a *Hibiscus*

hiccup or **hiccough,** sharp sound associated with spasm of the larynx and diaphragm and produced when inhaled air strikes the closed glottis The spasm usually subsides after a few minutes, but it may continue, resulting in exhaustion. Common

remedies include holding the breath, pulling the tongue forward for a brief period, and using cold applications on the neck. Persistent hiccup may be controlled by the use of anesthetics

Hichborn, Philip (hĭch'bôrn), 1839–1910, American naval officer, b Charlestown, Mass Beginning as a shipwright apprentice, he rose finally to the rank of rear admiral He invented the Franklin life buoy and the Hichborn balanced turret (for warships)

Hichens, Robert Smythe (hĭ'chĭnz), 1864–, English novelist His extensive travels added color to his work The most popular of his sensational novels —*The Garden of Allah* (1905), *Bella Donna* (1909), and *The Paradine Case* (1933)—have been extremely successful as stage and screen plays

Hickam Field (hĭ'kum), U S Air Force base, on Oahu, T H , near Pearl Harbor Its construction was completed in 1935 In the Second World War, Hickam Field was bombed by the Japanese on the day Pearl Harbor was attacked (Dec 7, 1941)

Hickman, town (pop 2,268), co seat of Fulton co , extreme SW Ky , on bluffs above the Mississippi, settled 1819, inc 1834 It is a trade, shipping, and processing center for a farm area A sea wall (1934) protects the city

Hickok, Wild Bill, 1837–76, American frontier marshal, b Troy Grove, near Ottawa, Ill His real name was James Butler Hickok He went (1855) to Leavenworth, took part in the Kansas struggle, was a driver of the Butterfield stage line, and served as a Union scout in the Civil War After the war he became deputy U S marshal at Fort Riley (1866), marshal of Hays, Kansas (1869), and marshal of roaring Abilene (1871) He earned a reputation as a marksman in desperate encounters with outlaws and became a figure of border legend After a tour of the East with BUFFALO BILL (1872–73), Hickok went to Deadwood and was there murdered by Jack McCall See biographies by F J Wilstach (1926) and W E Connelley (1933)

Hickory, city (pop 13,487), W central N C , NW of Charlotte, in the Blue Ridge foothills, founded 1874, inc 1884 In 1931 Highland and West Hickory were annexed The city's products include hosiery, wagons, textiles, metal goods, and furniture It has had council-manager government since 1913 Lenoir Rhyne College (Lutheran, coeducational, 1891) is here

hickory, any plant of the genus *Carya*, called also *Hicoria*, deciduous nut-bearing trees of several species, native to the eastern half of North America and to Mexico. The PECAN, a species of hickory, is one of the outstanding nut-bearing trees of the United States Other hickories having edible nuts, often marketed, include the nutmeg hickory of the South (*Carya myristicaeformis*), the shagbark hickory of the E United States (*C ovata*), the shellbark hickory (*C lacinosa*), chiefly of the Midwest and South, and the mockernut, or white, hickory of the E United States (*C alba* or *C tomentosa*) The hickory nut of commerce is usually that of the shagbark (the names shagbark and shellbark are often used interchangeably), which has a relatively thin shell The Indians made a food of ground hickory nuts The abundant oil or fat of the nuts was a staple article in the diets of both Indians and early colonists The pignut (*C glabra*) has small nuts of variable quality, usually bitter, that have been used for fattening hogs Hickories have been so exploited for their valuable wood that they are in danger of extinction Several species have wood which is extremely hard, heavy, strong, tough, and elastic It is a preferred wood for golf clubs, wheel spokes, and tool handles and wherever strength and resilience are required Prairie schooners often carried hickory sticks on their westward treks to replace broken wagon parts and ox yokes The wood, used also for furniture, is prone to decay easily in moisture The more valuable wood-yielding species are the shagbark, shellbark, pignut, mockernut, and bitternut (*C cordiformis*) hickories

Hicks, Elias, 1748–1830, American preacher of the Society of FRIENDS, b Hempstead, L I , N Y He worked on his Long Island farm between his preaching tours, which established his reputation as one of the most able Quaker preachers of the times Hicks worked against slavery, publishing his *Observations on Slavery* in 1811 When a division in the Society of Friends occurred in 1827, he was the leader of the liberal separation party, to which the name Hicksite was unofficially attached, the conservative section was called Orthodox

Hicks, Thomas, 1823–90, American portrait painter, b Newtown, Pa He studied at the Pennsylvania Academy of the Fine Arts and abroad, where he lived for several years He settled in New York in 1849 and there became one of the outstanding portraitists of his day The New York Historical Society has some interesting portraits, others are of Henry Ward Beecher, Harriet Beecher Stowe, Edwin Booth as Iago, Hamilton Fish, Daniel W. Middleton (Capitol, Washington, D C), and the artist's wife (Metropolitan Mus)

Hicks, Thomas Holliday, 1798–1865, governor of Maryland at the beginning of the Civil War, b. Dorchester co , Md.' He was elected governor in the fall of 1857 as a Know-Nothing. After the states of the Lower South seceded in 1860–61, he refused to yield to the popular demand to call a special session of the Maryland legislature because he feared that the legislators would rush blindly into secession Subsequently, with Federal troops occupying the state and secessionists, including legislators, under arrest, Maryland elected a thoroughly Unionist legislature, which sent Hicks to the U S Senate, where he served from Dec , 1862, till his death See G L P Radcliffe, *Governor Thomas H Hicks of Maryland and the Civil War* (1901); W B Hesseltine, *Lincoln and the War Governors* (1948)

Hicksville, 1 Unincorporated suburban village (pop 6,835), on W Long Island, SE N Y , E of Mineola, founded 1648 Cement products are made **2** Village (pop 2,549), NW Ohio, near the Ind line W of Defiance, founded 1836 It is a shipping, processing, and small manufacturing center for a farm and dairy area

Hico (hī'kō), city (pop 1,242), central Texas, NW of Waco, in a poultry-farming region

Hidalgo (ēdhäl'gō), state (8,058 sq mi , 1946 estimated pop 860,175), central Mexico Crossed by the Sierra Madre Oriental, the state is extremely mountainous, but in the southern and western portions are plains and fertile valleys lying within the central plateau The southeastern and eastern valleys formed by the mountain chain are highly productive The climate varies from warm in the lower valleys to temperate on the plateau and cold in the mountains Although agricultural products include cereals, tobacco, cotton, beans, coffee, and sugar cane, the chief crop is maguey (see AGAVE), grown on the central plateau Some textiles are manufactured Mining is the main industry, and Hidalgo (particularly the area around PACHUCA, the capital) is one of the leading states in production of minerals—silver, gold, copper, mercury, lead, zinc, iron, antimony, manganese, and sulphur Hidalgo was occupied successively by ancient Indian cultures, the Toltec, with the capital at Tollán (now Tula), the Chichimec, and the Aztec Conquered in 1530 by the Spanish, the territory was part of the province and state of Mexico until in 1869 it became a separate state

Hidalgo del Parral (ēdhäl'gō dĕl pärāl') or **Parral,** city (pop 24,241), Chihuahua, N Mexico Near the border of Durango, on the Parral river, it is one of the large mining towns of Mexico and has a clean, healthful atmosphere Near-by mines produce several metals, notably silver, mined in the region since the 16th cent Here Francisco VILLA was assassinated

Hidalgo y Costilla, Miguel (mēgĕl' ēdhäl'gō ē kōstē'yä), 1753–1811, Mexican priest and revolutionist, a national hero One of the creole intellectuals who were deeply influenced by the French Revolution, Hidalgo ran afoul of the government by his attempts, as parish priest of Dolores, to improve the condition of the natives Under his direction the Indians set out olive groves and vineyards, built a porcelain factory, engaged in the silk industry, and commenced other forbidden projects He was also haled before the Inquisition to be tried for heresy, but the process against him was suspended When the Napoleonic invasion and the captivity of Ferdinand VII threw Spain into confusion, the result in Mexico, as in other Spanish American countries, was the birth of separatist revolutions among the native-born inhabitants Hidalgo was one of a group of creoles who met at Querétaro and planned a revolution When the plot was prematurely discovered, he took a bold step and openly adopted the cause of separation from Spain On Sept 16, 1810, he issued the *grito de Dolores* [cry of Dolores], from which the revolt against Spain is dated Hidalgo gathered an immense crowd of natives to his cause, by appropriating as his standard the banner of Our Lady of Guadalupe he injected a religious and superstitious element into the insurrection, but just as potent was the great cry of all for freedom and for free land Ignacio ALLENDE and other creole officers had taken part in the conspiracy and now brought some of the colonial militia into the revolutionary ranks, and some of the radical intellectual creoles also joined, but the Church was hostile, and the great body of landowning creoles, who desired Mexican independence, were frightened by the popular character of the revolt Success attended Hidalgo's ill-organized army Guanajuato, Guadalajara, and Valladolid fell to the revolutionists, and they set out for Mexico city They defeated a royalist force at Monte de las Cruces (Oct 30, 1810) but did not pursue their victory Instead, on Hidalgo's orders, the insurgents turned from the capital and, retiring northwestward, were routed at Aculco At Guadalajara, Hidalgo reorganized the army, which was sent forth only to be crushed by CALLEJA DEL REY, the royalist general, at Calderón Bridge (Jan 17, 1811) Hidalgo, Allende, and the other leaders made their way north, hoping to reach the United States, but were betrayed and captured Hidalgo, after being degraded by the Inquisition, was shot His schemes for social reform, exemplified in the emancipation of slaves, the cessation of the tribute tax, and the return of the land to the Indians, had come to nothing, but the war for Mexican independence continued, his mantle fell on MORELOS Y PAVÓN.

Hidari Jingoro (hēdä'rē jēn'gōrō), c 1594–1633, Japanese sculptor, architect and carpenter His wood carving was true architectural sculpture, among the finest of its kind, particularly his delicately executed friezes of birds and flowers

Hidatsa Indians (hēdät'sä), North American Indian tribe, also known as the Minitari and the Gros Ventre of the River They are of Siouan linguistic stock In the 18th cent they occupied several agricultural villages on the upper Missouri river in North Dakota and were in close alliance with the occupants of other villages, the ARIKARA INDIANS and the MANDAN INDIANS They then numbered some 2,100 The Hidatsa villages, with circular earth lodges, were enclosed by an earthen wall Among other Hidatsa traits, typical of the "village Indians" of the Plains area, were the cultivation of corn and an annual organized buffalo hunt They had a complex social organization and elaborate ceremonies, including the sun dance After the smallpox epidemic of 1837, they moved up the Missouri and established themselves close to the trading post of Fort Berthold Together with the Arikara and Mandan they reside on the Fort Berthold Reservation in North Dakota and number some 900 See A L Kroeber, *Ethnology of the Gros Ventre* (1908), R H Lowie, *Societies of the Crow, Hidatsa, and Mandan Indians* (1913)

Hiddai (hĭ'dāī, hĭdī'), one of David's guard 2 Sam 23 30 Hurai 1 Chron 11 32

Hiddekel (hĭ'dĕkĕl), Hebrew name for the TIGRIS

Hideyoshi, Toyotomi (tōyōtō'mē hēdā'shē), 1536?–1598, Japanese warrior and dictator He entered the service of NOBUNAGA as a common soldier and rose to become his leading general After Nobunaga's death he secured from the emperor the title *kwampaku* [civil dictator] He then completed the military unification of Japan by defeating the powerful clans of the Satsuma in the south and the Hojo in the north The remaining feudal barons acknowledged his supremacy In 1592 he set out to conquer China and succeeded in subduing Korea, but after his death the Japanese armies withdrew from the continent Best remembered as a military genius, he nevertheless found time between campaigns to institute a land survey, revise the land tax, encourage foreign trade, issue a code of maritime law, deprive the peasants of the right to bear arms, and decree the freezing of the existing class structure by forbidding any person to change his occupation He initiated the policy of legislation against change He also erected monuments lavishly, including a fortified castle at Osaka, several gorgeous palaces, and a great statue of Buddha He at first received Christian missionaries cordially Then, believing them a political danger, he proscribed their activities and executed a number of foreign priests and Japanese converts He was the only man of humble birth to attain high position in Japan until modern times See G B Sansom, *Japan a Short Cultural History* (rev ed , 1943)

Hiel (hī'ĕl), rebuilder of Jericho 1 Kings 16 34

Hierapolis (hīrăp'ulĭs) [Gr , =holy city], ancient city of Phrygia W Asia Minor, on a plateau 500 ft above the Lycus valley, not far from Laodicea, and 120 mi NE of Smyrna Anciently devoted to the worship of the Greek goddess Leto, it became an early seat of Christianity (Colossians 4 13) The Romans greatly enlarged and improved the city, building a great theater and numerous baths about the hot springs for which the site was famous. Near by was a deep chasm called the Plutonium, which the ancients thought led to the nether regions The fissure no longer exists it was filled in, possibly as a Christian protest against pagan beliefs Apart from the extensive ruins of the Roman period, the most striking feature of the locality is to be found in vast falls of crystalline formation, fed by the hot springs Of exceptional beauty in their dazzling whiteness, these falls of crystal incrustations exceed Niagara in height and width

Hiero I (hī'rō), 5th cent B C , Greek Sicilian ruler, tyrant of Syracuse (478–467 B C) He succeeded his brother Gelon A noted patron of literature, Hiero had Simonides, Pindar, and Aeschylus at his court, some of them honored him in verse for his victorious contests in the Greek games The greatest glory of his career was his part in the defeat of the Etruscans at sea at Cumae in 474 B C As a ruler Hiero was a despot The name also appears as Hieron I

Hiero II, d c 215 B C , Greek Sicilian ruler, tyrant of Syracuse (c 270–c 215 B C) He showed such ability and distinction after PYRRHUS had left Sicily (275 B C) that he was made commander in chief of the Syracusans and was chosen (c 270) tyrant or king Against the Mamertines, who had taken possession of Messana, Hiero's forces and those of the Carthaginians laid siege (265), but when the Romans under Appius Claudius intervened successfully, the Syracusans withdrew, defeated Hiero then entered into a treaty with the Romans, which recognized his dominion over SE Sicily and the east coast to Tauromenium (Taormina) As an ally of Rome, Syracuse furnished money and fighting forces against Carthage in the

Punic Wars Hiero faithfully abided by the terms of the peace As a ruler he was just, prudent, and generous and was a patron of the arts ARCHIMEDES, his relative, had his encouragement in the construction of great engines of warfare The name also appears as Hieron II

hieroglyphic (hī″rūglĭf′ĭk, hī″urū-) [Gr , = priestly carving], type of WRITING used in ancient EGYPT Similar pictographic styles of Crete, Asia Minor, and Central America and Mexico are also called hieroglyphics (see MINOAN CIVILIZATION, HITTITES, MAYA, AZTEC) Interpretation of Egyptian hieroglyphics, begun by CHAMPOLLION, is virtually complete, the other hieroglyphics are only very imperfectly understood The distinguishing feature of hieroglyphics is that they are conventionalized pictures used chiefly to represent meanings that seem arbitrary and are seldom obvious Egyptian hieroglyphics appear in several stages the I dynasty, when they were already perfected, the Old Kingdom, the Middle Kingdom, when they were beginning to go out of use, the New Empire, when they were no longer well understood by the scribes, and the late hieroglyphics (from 500 B C), when the use of them was a *tour de force* There were in general three uses to which a given hieroglyphic might be put (though very few were used for all three purposes) as an ideogram, e g , a sign resembling a man meant "man" or a closely connected idea (thus a man carrying something meant "carrying"), as a phonogram, e g , an owl meant the sound *m*, because the word for owl had *m* for its principal consonant, or as a determinative, e g , a sitting man placed with a collection of signs meant that the signs taken together were a man's name The phonograms were, of course, the controlling factor in the progress of hieroglyphic writing, because of the fundamental convenience of an ALPHABET In the Middle Kingdom a developed cursive was extensively used, this was the hieratic In the last centuries B C a more developed style, the demotic, supplanted the hieratic Where the origin of most hieratic characters could be plainly seen in the hieroglyphics, the demotics were too conventionalized to bear any resemblance to the hieroglyphics from which they had sprung

Hieron see HIERO

Hieronymus see JEROME, SAINT

Higden, Ranulf, d c 1364, English chronicler, a monk of St Werburg's Abbey, Chester He wrote the *Polychronicon*, a universal history, chiefly interesting for its display of the geographical and historical knowledge of its time It was translated into English by John of TREVISA in 1387 and again by an anonymous translator in the early 15th cent Caxton printed (1482) Trevisa's translation plus several continuations to bring it to 1460 See J E Wells, *A Manual of the Writings on Middle English* (latest ed)

Higgaion (hĭgā′yun), in Ps 9 16, musical direction of unknown significance

Higgins, Eugene, 1874–, American painter and etcher, b Kansas City, Mo , studied under GÉRÔME in Paris His somber and moving pictures, often depicting the life of the poor, have won wide recognition Both as a painter and as an etcher he is represented in galleries throughout the country

Higginson, Francis, 1586–1630, colonial clergyman of Massachusetts, b Leicestershire, England, M A Cambridge, 1613 Admitted (1614) to the ministry of the Church of England, he later became a nonconformist and in 1629 sailed with a group of settlers for Salem, Mass His journal of the first months at Salem was sent back to England and printed with the title *New-England's Plantation* (1630) Formally elected minister of the settlement, he drew up a confession of faith and a covenant which were adopted, but soon died as a result of hardships suffered the first winter See biography by T W Higginson (1891), which contains his complete journal

Higginson, Henry Lee, 1834–1919, American philanthropist He founded (1881), and for many years supported, the Boston Symphony Orchestra He also gave donations to schools and colleges See Bliss Perry, ed , *Life and Letters of Henry Lee Higginson* (1921)

Higginson, Thomas Wentworth, 1823–1911, American author, soldier, clergyman, and reformer, b Cambridge, Mass , grad Harvard, 1841, and Harvard Divinity School, 1847 He was pastor of Unitarian churches in Worcester and other Massachusetts cities Higginson was an ardent abolitionist and close friend of John Brown and in the Civil War became colonel of the first regiment of Negroes, the 1st South Carolina Volunteers Because of a war wound he retired in 1864 to a life of writing and of furthering many liberal reforms, especially the woman-suffrage movement His best work was done for magazines (see his *Atlantic Essays*, 1871) and as a popular writer of history His three full-length biographies, of Margaret Fuller (1884), H W Longfellow (1902), and J G Whittier (1902), are still useful, since he wrote from personal knowledge of his subjects The shorter sketches in *Cheerful Yesterdays* (1898) and *Contemporaries* (1899) are lively reminiscences of his important political and literary friends whom he outlived When Emily Dickinson sent him her strange poems, he did not, perhaps, realize the measure of her genius, but he encouraged her and in 1890–91 edited, with M L Todd, her *Poems* See his *Part of a Man's Life* (1905) and *Letters and Journals, 1846–1906* (1921), biography by his wife, Mary Thatcher Higginson (1914)

Higginsville, city (pop 3,533), W Mo , E of Kansas City, laid out 1869 Shoes are made here In the region are produced coal and farm products, especially corn

Highlands, borough (pop 2,076), E N J , a coast resort near Sandy Hook, inc 1900

Highlands, mountainous country in the northern extremity of Great Britain It includes the Scottish counties of Sutherland, Ross and Cromarty, Inverness, and Argyll and parts of Nairn, Moray, Banff, Aberdeen, Perth, Stirling, and Dumbarton The Highland Line is usually said to run roughly from Moray Firth in a great east-bulging curve to Dumbarton, and Highlands and Lowlands are considered to be separated partly by the Grampians The Hebrides are included in the Highlands in common parlance Until its decline in the 19th cent the Scottish Gaelic language was the chief fact of Highland culture, which resisted innovations from England and the Lowlands with singular tenacity The distinctive superficial marks of the Highlands, the dress and the clan system, now in desuetude except as sentimental archaisms, were products of the late Middle Ages The dress, including the kilt, tartan, sporran, tam, and dirk, was outlawed by the British government in the 18th cent , when it became alarmed at the continual interest in the Jacobite cause (see JACOBITES) which animated the Highlands—the Highlands had furnished the backbone of the risings of 1715 and 1745 Not all the Highlands rose to support the Stuarts, but enough did to make the lost cause the inspiration for a great revival in GAELIC LITERATURE and Highland feeling The British government set out systematically to crush the families that had led in the revolts These were the so-called "broken clans" So successful was the suppression that one of the greatest clans of Scotland, Clan Chattan, simply disappeared as a unit In the 19th cent , as the language and Highland feeling declined, the government allowed the revival of the dress and the cultivation of bagpipes, which had long been the national musical instrument of Scotland Before the Jacobite uprisings that so sharply changed Highland culture, the history of the region is not well known Its rather vague political importance sank when MALCOLM III turned the monarchy definitely away from the Highlands, and except when raids of Highland marauders in the Low ands made punitive expeditions necessary the Scottish government left the Highland lairds to run their own affairs Then and now the barrenness of the country made for poverty and simple living In the remote fastnesses old customs and superstitions survive more than anywhere else in the British Isles, and many of the Highlanders have remained Roman Catholic to the present despite the vigor of the Scottish Reformation This persistence of old ways and the ruggedly beautiful scenery have made the Highlands prominent in English and Scottish romantic literature See W F Skene, *Celtic Scotland* (3 vols , 2d ed , 1886–90) and *The Highlanders of Scotland* (2d ed , 1902), T B Johnston and J A Robertson, *Historical Geography of the Clans of Scotland* (1872), A R H Moncrieff, *The Highlands and Islands of Scotland* (1926)

Highmore, city (pop 1,136), co seat of Hyde co , central S Dak., ENE of Pierre It is a farm trade center, an agricultural experiment station is near by

High Point, city (pop 38,495), central N C , SW of Greensboro, in the piedmont, settled before 1750, laid out 1853, inc 1859 It has city-manager government and is an industrial center, noted for its furniture and hosiery mills It is the seat of High Point College (coeducational)

High Point State Park, extreme NW N J , NW of Sussex, c 10,900 acres of forest land on Kittatinny Mt Included is High Point (c 1,801 ft), highest point in New Jersey, from which three states can be seen The park offers summer and winter sports

High River, town (pop 1,674), S Alta , on the Highwood river and S of Calgary The Turner Valley oil fields are 18 mi away

Highspire, borough (pop 2,371), SE Pa , near Harrisburg, settled 1775, laid out 1814, inc 1867

High Springs, city (pop 2,010), N central Fla , NW of Gainesville, founded c 1885 It is a trade and shipping center for a farm area and has railroad shops

Hightstown, borough (pop 3,486), central N J , between Trenton and Freehold, settled 1721, inc 1853 There is a rug factory, and the Peddie School for boys is here Near by is the site of Jersey Homesteads, a government-aided experiment in cooperative farming and manufacturing, launched in 1933 but sold in 1940 and later named Roosevelt

highway. see ROAD

Highwood, city (pop 3,707), NE Ill , on Lake Michigan NNW of Evanston, inc 1888

High Wycombe (wĭ′kum), officially **Chepping Wycombe,** municipal borough (pop 27,988), Buckinghamshire, England, WNW of London There are traces of ancient British occupation and remains of a Roman station near by Furniture, shoes, and farm machinery are made here The parish church dates partly from the 13th cent

Hilarion, Saint (hĭlâ′rĭun), d c 371, Syrian hermit He lived with St Anthony of Egypt for some time, but returned to the hermit's life in Palestine By 360 he had attracted so many disciples that for seclusion he left his country St Jerome wrote his life Feast Oct 21

Hilary of Arles, Saint (hĭ′lurē, arl), d 449, Gallo-Roman churchman Forsaking riches, he entered the monastery at Lérins He was made archbishop of Arles (c 429) against his wishes As head of the church in Gaul, Hilary hastily deposed two bishops They thereupon appealed to Pope St LEO I, who sheared the see of Arles of its metropolitan powers, enouncing the sovereignty of Rome Later, Leo referred to him as "Hilary of sacred memory " Feast May 5

Hilary of Poitiers, Saint (hĭ′lurē, poitĕrz′, poi′tyā), c 315–367, Doctor of the Church, bishop of Poitiers from 353 A convert from paganism, he distinguished himself as a supporter of Athanasius against ARIANISM For his zeal he was exiled (c 356) After his return (360) he aided LIBERIUS in the attempt to purge the West of Arianism He wrote many theological works, of which the chief, including the historically valuable *De synodis* and the *De trinitate*, were directed against the Arians He also composed allegorical interpretations of the Bible and sacred poetry His hymns were important in early development of the form Feast Jan 14 and, in England, Jan 13 (Hilarymas) Hilary term, in English courts and schools, begins Jan 11 See *A Select Library of Nicene and Post-Nicene Fathers*, W N Myers, ed and tr , *The Hymns of Saint Hilary of Poitiers* (1928)

Hilda, Saint, 614–80, English abbess of Whitby, a princess of Northumbria About 647 she set out to go to a convent in France, but was recalled by St Aidan to found a convent on the banks of the Wear. In 657 St Hilda founded the abbey later called Whitby Her strong personality made her the greatest figure in the Church in N England, and the Synod of Whitby (664) met in her abbey to

settle the differences in ecclesiastical use between the English and the Celts Bede is the source for her life Feast Nov 17

Hildebert of Lavardin (hĭl'dûburt, lä'vurdĭn; lävärdē'), c.1056–1133, French churchman, bishop of Le Mans (1096–1125) and archbishop of Tours (1125–33) He was taken prisoner when Le Mans was captured (1099) by William II and was carried away to England, where he spent a year When he was at Tours he came into conflict with Louis VI of France over the king's supposed right to present the deanery of Tours Hildebert attended the First Lateran Council He completed the cathedral at Le Mans He was one of the most prolific writers of his period, especially noteworthy are his Latin hymns and poems He wrote several elegies, a mythological poem on the destruction of Troy, lives of St Hugh of Cluny and St Mary of Egypt, and miscellaneous works, such as an interpretation of the Mass There is no critical edition

Hildebrand see GREGORY VII, SAINT

Hildebrand, Adolf von (ä'dôlf fŭn hĭl'dûbränt), 1847–1921, German sculptor and author He studied in Munich and in Italy, where he spent 18 years He is best known for his public monuments and fountains in Bremen, Jena, Munich, and Strasbourg and for his realistic portrait busts, e g , those of Clara Schumann and Arnold Boecklin Hildebrand expressed his theories on art in *The Problem of Form* (Eng tr , 1907)

Hildebrand, Lay of (hĭl'dubränd, -brant), fragment of an epic in mixed Low and High German, composed c 800 Discovered in a monastery, on the back of another manuscript, it tells how Hildebrand, armorer of Dietrich of Bern, faces in battle his son Hadubrand, who does not know him A continuation appeared in the 13th cent

Hildebrandt, Eduard (ä'dōōart hĭl'dubrant), 1818–68, German marine and landscape painter He traveled extensively to obtain subjects for his work and in 1862–64 undertook a trip around the world for his patron, Frederick Wilham IV, returning with some 400 water colors Characteristic are his *Brazilian Primeval Forest* and *The Bay of Naples* (Metropolitan Mus)

Hildegard of Bingen, Saint (hĭl'dugard, bĭng'ûn), 1098–1179, German Benedictine nun She lived in a community near Bingen, later (before 1150) she led a group in founding a new convent on the Rupertsberg, W of the Rhine When she was in her 40s St Hildegard revealed that from childhood she had had visions and admonitions, and at her superior's command she had many of them set down. These spread her reputation, and high and low came to seek her advice on every subject Her skill in medicine and her success in prediction were especially esteemed She traveled on missions all over Germany Besides *Scivia*, the account of visions, her writings treat various subjects, as medicine, the natural world, dogmatic theology, and the Christian life Many of her letters are extant, her correspondents included four popes, two emperors, and St Bernard of Clairvaux See L Menzies, *Mirrors of the Holy* (1928), H O Taylor, *The Mediaeval Mind* (1925)

Hildesheim (hĭl'dus-hĭm), city (1939 pop 72,101, 1946 pop 59,909) Hanover, central Germany, SE of Hanover city Before its virtual destruction in the Second World War it was of great historic and cultural interest It is the seat of a bishopric founded in 815 by Emperor Louis I and owed much to St Berward (11th cent) The bishops of Hildesheim later became territorial princes of the Holy Roman Empire Secularized in 1803, the bishopric passed to Prussia, then to Westphalia, and (1815) to Hanover Among the monuments destroyed or heavily damaged in the Second World War are the Romanesque cathedral (11th cent) and the celebrated Knochenhaueramtshaus [butchers' guildhouse], built in 1529, a high-gabled structure with intricate carvings on its timbered façade The Romanesque Church of St Michael (11th cent), only partly damaged, is to be rebuilt, as are many others of the medieval and Renaissance buildings Hildesheim has a diversified light industry

Hildreth, Richard, 1807–65, American historian, b Deerfield, Mass , grad Harvard, 1826 From 1832 to 1838 he was the leading editorial writer of the Boston *Daily Atlas* In addition to writing controversial pamphlets and contributing to magazines, Hildreth wrote *Banks, Banking, and Paper Currencies* (1840), *Despotism in America* (1840), a discussion of slavery, a novel, *The Slave, or, Memoirs of Archy Moore* (1836), which went through many editions in England, France, and America; and two books written in an inductive, scientific manner, *Theory of Morals* (1844) and *Theory of Politics* (1853) His chief work, however, was *The History of the United States* (6 vols , 1849–52), an accurate though unimspired treatment of American history to the year 1821 from a Federalist point of view. See biography by D. E Emerson (1946); M. M Pingel, *An American Utilitarian* (1948).

Hilen (hī'–), the same as HOLON 1.

Hilgard, Eugene Woldemar (hĭl'gärd), 1833–1916, American agricultural chemist and geologist, Ph D Univ. of Heidelberg, 1853 Born in Germany, he was brought to the United States in 1836. He was professor (1874–1904) of agricultural chemistry at the Univ of California and director (1888–1904) of the California agricultural experiment stations and was an authority on soil chemistry and on the reclamation of alkali lands His writings include *Soils* (1906)

Hilkiah (–kī'ù) [Heb ,=God is my portion] **1** High priest under King Josiah and a leader in his revival of religion 2 Kings 22, 23, 2 Chron 34, 35 **2** Father of Jeremiah Jer 1 1 **3** Father of ELIAKIM **2 4** Merarite Levites 1 Chron 6 45, 26 11 **5** Father of GEMARIAH **2 6** Companion of Ezra Neh 8 4 **7** Levite who returned with Zerubbabel Neh 12 7,21

Hill, Ambrose Powell, 1825–65, Confederate general, b Culpeper, Va , grad West Point, 1847 He served briefly in the Mexican War and had a varied army career until he resigned in March, 1861, to fight for the Confederacy After fighting at Williamsburg in the PENINSULAR CAMPAIGN, Hill was promoted major general (May, 1862) His division was heavily engaged in the SEVEN DAYS BATTLES He fought under T J (Stonewall) Jackson from July, 1862, until Jackson's death Hill's "light division," noted for its fast marching, saved the day for Stonewall at Cedar Mt , just before the second battle of BULL RUN (Aug , 1862), and by Hill's opportune return to Lee in the ANTIETAM CAMPAIGN, Gen Ambrose Burnside's attack was repulsed When Jackson was mortally wounded in the battle of CHANCELLORSVILLE, he turned his command over to Hill, but Hill himself was soon wounded, and J E B Stuart took over In reorganizing the Army of Northern Virginia after Jackson's death, Lee gave the new 3d Corps to Hill, who, though impetuous, was an excellent fighter Hill was thereupon promoted lieutenant general (May, 1863) His corps brought on the fighting in the GETTYSBURG CAMPAIGN, and Hill directed the battle on July 1, 1863 He was at the head of his corps through most of the WILDERNESS CAMPAIGN (1864) and in the defense of PETERSBURG (1864–65) In the assault that finally broke Lee's lines at Petersburg (April 2, 1865), Hill, with characteristic impulsiveness, went out to rally his troops and was killed See D S Freeman, *Lee's Lieutenants* (3 vols , 1942–44)

Hill, Archibald Vivian, 1886–, English physiologist He became research professor of the Royal Society in 1926 and served as the society's secretary from 1935 to 1945 For his work on the thermodynamics of muscular activity he shared with Otto Meyerhof the 1922 Nobel Prize in Physiology and Medicine He wrote *Muscular Activity* (1925) and *Living Machinery* (1927)

Hill, Benjamin Harvey, 1823–82, American statesman, b Jasper co , Ga , grad Univ of Georgia, 1843 A highly successful lawyer and Whig politician, he supported the Whig-Democratic alliance which carried Georgia in favor of the Compromise of 1850 When the Whig party was dissolved he joined the Know-Nothing movement Hill opposed secession but accepted his state's decision and in the Civil War was a loyal supporter of President Davis in the Confederate Senate In Congress after 1875, as a leading orator for the Southern cause, he rewon the popularity he lost in the Reconstruction days for his submission to radical Republican policies He was elected U S Senator in 1877 See H J Pearce, Jr , *Benjamin H Hill Secession and Reconstruction* (1928)

Hill, Daniel Harvey, 1821–89, Confederate general, b York District, S C , grad West Point, 1842 He won the brevets of major and captain in the Mexican War Hill resigned from the army in 1849, was professor of mathematics at Washington College (now Washington and Lee Univ) from 1849 to 1854 and at Davidson College from 1854 to 1859, and was superintendent of the North Carolina Military Institute from 1859 to 1861 At the beginning of the Civil War he commanded the 1st North Carolina Regiment but soon rose to a Confederate major generalcy His division rendered distinguished service at Fair Oaks in the PENINSULAR CAMPAIGN, in the SEVEN DAYS BATTLES, and at South Mt in the ANTIETAM CAMPAIGN (1862) In 1863 Hill commanded the Dist of North Carolina, defended Richmond when Lee was conducting the Gettysburg campaign, and fought under Braxton BRAGG at Chickamauga in the CHATTANOOGA CAMPAIGN With others of Bragg's subordinates he petitioned President Davis to remove that general from command, but Davis, favoring Bragg, removed Hill himself He then had no active command until the last days of the war, when he fought under J E Johnston against Sherman at Bentonville, N C After the war he settled in Charlotte, N C , where he established a monthly magazine and a weekly paper As president of the Univ of Arkansas (1877–84) and of the Middle Georgia Military and Agricultural College (1886–89), he emphasized industrial and agricultural training for better education in the South See D S Freeman, *Lee's Lieutenants* (3 vols , 1942–44).

Hill, David Bennett, 1843–1910, American politician, b Montour Falls, N.Y He entered law and politics, becoming the upstate boss of the Democratic party in New York. He served as state legislator and, as lieutenant governor, succeeded to the governorship in 1885 upon Grover Cleveland's resignation. Then he was elected governor (1885), and reelected (1888) As U S Senator (1892–97), he fought the free-silver wing in his own party

Hill, James Jerome, 1838–1916, American railroad builder, b Ontario, Canada He went to St Paul, Minn , in 1856, became a clerk for a line of Mississippi steamboats, and was later a forwarding agent for the steamboat line and for the St Paul and Pacific RR He envisioned the expansion of farming, trade, and industry in the farther Northwest (from Minnesota to the Rockies) and allied himself with capitalists to promote that development He was a partner of Norman Kittson in a steamboat line between Fort Abercrombie on the Dakota frontier and Fort Garry (now Winnipeg) in Canada With Kittson, Donald Alexander Smith (later Baron STRATHCONA AND MOUNT ROYAL), and Sir George Stephen, he bought (1878) the St Paul and Pacific It was completed to the Canadian border Then Hill undertook what was probably the greatest feat of railroad building in the United States He carried the line westward, reaching Great Falls, Mont (which he had helped to found), in 1887 and completing it across the mountains to the Pacific at Seattle in 1893, this he accomplished despite the appalling difficulties of the terrain and the lack of the Federal assistance showered so generously on the earlier transcontinental roads Furthermore, the construction involved no financial scandals He pioneered in having "farm demonstration" trains and by his eloquent publicity persuaded thousands of farmers to settle in Montana, where unfortunately many of them were later ruined by drought Hill in 1890 consolidated his rail properties into the Great Northern Railway Company His great rival, the Northern Pacific, got into difficulties in the Panic of 1893, and he was the leader in its reorganization When the courts prevented a union of the two roads, Hill's financial ally, J Pierpont Morgan, took over the Northern Pacific, and a community of interests was maintained In 1901 the two acted jointly to gain entrance to Chicago by purchasing the Chicago, Burlington & Quincy (commonly called the Burlington) Morgan and Hill thus forestalled Hill's rival, E H Harriman, who also wanted the Burlington A violent financial struggle ensued Hill and Morgan set up the Northern Securities Company as a holding company for the Great Northern and Northern Pacific systems, but this was dissolved by order of the U S Supreme Court as a violation of the Sherman Anti-Trust Act Hill was, however, victorious in his fight with Harriman He retired from the presidency of the Great Northern in 1907, but remained on the board until 1912 Hill also assisted in the construction of the Canadian Pacific He built and endowed the Hill Reference Library in St Paul He wrote *Highways of Progress* (1910) See biography by J G Pyle (1916)

Hill, Octavia, 1838–1912, English social reformer, a pioneer in housing reform Her school for working women increased her interest in their living conditions In 1864, with the financial aid of Ruskin, she began her work of buying and renovating tenements In her housing projects and other social welfare interests, Miss Hill had the invaluable assistance of her sister, Miranda Hill (1836–1910) See *Life of Octavia Hill, as Told in Her Letters* (ed by C E Maurice, 1913), biography by Enid Moberly Bell (1942)

Hill, Sir Rowland, 1795–1879, English educator, inventor, and postal reformer He introduced the system of self-government in his school at Hazelwood in Birmingham After his retirement from teaching (1833) Hill invented a rotary printing press and evolved a system of penny postage which was finally adopted in 1839 From 1854 to his retirement from public office in 1864 he was secretary to the Post Office He was knighted in 1860 See biographies by G Birkbeck Hill (1880) and E C Smyth (1907)

Hillah or **Hilla** (both hĭl'lu), town (pop c 30,000), Iraq, on a branch of the Euphrates river It is largely built of material taken from the ruins of near-by ancient Babylon. Products include dates and textiles

Hillburn, village (pop 1,161), SE N Y , in the Ramapos at the N J line, inc 1893

Hill City, city (pop 1,115), co seat of Graham co , NW Kansas, on the South Fork of the Solomon, in a wheat area, laid out 1880, inc 1888

Hillebrand, William Francis (hĭl'lubränd"), 1853–1925, American chemist, b Honolulu, studied in Germany A pioneer in mineral analysis, he was connected with the U S Geological Survey (1880–1908) and from 1908 was chief chemist of the Bureau of Standards His works include *Some Principles and Methods of Rock Analysis* (1900) and *The Analysis of Silicate and Carbonate Rocks* (1907).

Hillel (hĭl'ĕl), father of ABDON 1.

Hillel, fl 30 B C –A D 10, celebrated Jewish scholar, ancestor of the patriarchs who led the Jews until A D. c 400, b. Babylon He was president of the Sanhedrin and laid the foundation of a systematic legal interpretation of the Midrash. He was the great spiritual and ethical leader of his generation.

His most famous ethical maxim is, "Do not unto others that which is hateful unto thee" Many others of his sayings approximate the teachings of Christ His chief opponent was SHAMMAI See Emil Schürer, *The Jewish People in the Time of Christ* (1924).

Hilliard, Henry Washington (hĭl'yŭrd), 1808–92, U S Representative from Alabama, b Fayetteville, N C , grad South Carolina College (now the Univ of South Carolina), 1826 Admitted to the Georgia bar in 1829, he was professor of English literature (1831–34) at the Univ of Alabama and then began to practice law at Montgomery, Ala He was a state representative (1836–38) and U S chargé d'affaires (1842–44) in Belgium before serving (1845–51) in Congress Hilliard, an able Whig speaker, was the chief opponent of secession in Alabama and engaged in many debates with the "fire-eater" William L YANCEY At the state convention of 1851 he was responsible for the declaration that secession was unconstitutional, but in 1861 he led a losing fight against adoption of Alabama's ordinance of secession Lincoln's call for volunteers was an act which he also considered unconstitutional, and he thereupon joined the Confederate forces, but served only briefly in the Civil War He was U S minister to Brazil from 1877 to 1881 He wrote *Politics and Pen Pictures at Home and Abroad* (1892)

Hilliard, Nicholas, 1537–1619, English miniature painter, trained as a goldsmith He was court painter to Elizabeth and to James I The first true miniaturist in England, Hilliard was self-taught He painted meticulously on card or vellum, even on the backs of playing cards Much of his work is at Windsor Castle and in the private collections of England, *Queen Elizabeth* is in the National Portrait Gallery, London An exhibition of 101 of his miniatures was held in the Victoria and Albert Museum, London, in 1947 A work on miniature painting, *The Art of Limning*, is attributed to Hilliard

Hillis, Newell Dwight, 1858–1929, American Congregational minister He was pastor (1899–1924) of the famous Plymouth Church (Congregational), Brooklyn, N Y. He was an eloquent preacher and a widely known lecturer His books include *Great Books as Life-Teachers* (1899) and *Great Men as Prophets of a New Era* (1922)

Hillman, Sidney, 1887–1946, American labor leader, b Lithuania He entered the United States in 1907, became a clothing worker, led a successful strike, and rose to the presidency of the Amalgamated Clothing Workers (1915) He promoted union-management cooperation and started many novel union practices, such as cooperative housing and banking One of the founders of the C I O , he was its vice president from 1935 to 1940 A moderate, opposed to labor schism, he directed the labor sections of the Office of Production Management (later the WPB) from 1940 to 1942 Through the C I O Political Action Committee, of which he was head from its start (1943) until his death, he sought labor support for political platforms favored by unions, especially President Roosevelt's New Deal He was also a founder of the American Labor party and its chairman (1944–45) As C I O delegate at world labor parleys, he helped create the World Federation of Trade Unions (1945)

Hillquit, Morris, 1869–1933, American lawyer and Socialist leader, b Riga, Latvia He came to the United States in 1886 He was the leader of the right wing or constitutional Socialists in their revolt against the radical leadership of Daniel DE LEON in 1897 This revolt split the Socialist Labor party and led to the founding of the Social Democratic party, which evolved into the present Socialist party Hillquit from the beginning was the dominant theorist and tactician of the party, representing it on the executive committee of the Socialist and Labor International As a lawyer he served labor in many legal struggles, but he also gave expert service to capitalist corporations, a course of action which frequently brought criticism from his party He was a prominent pacifist at the time of the First World War He was his party's candidate for mayor of New York city twice and for Congressman five times In 1924 he led the Socialists into La Follette's Progressive party He wrote *History of Socialism in the United States* (1903), *Socialism in Theory and Practice* (1909), *From Marx to Lenin* (1921), and the autobiography *Loose Leaves from a Busy Life* (1934)

The home of Franklin Pierce was restored in 1925 See G W. Browne, *The History of Hillsborough, New Hampshire, 1735–1921* (1921). **4** Town (pop 1,311), co seat of Orange co , central N C., NW of Durham, settled before 1700, platted 1754. An early capital of the province of North Carolina, it was the scene of disturbances by the Regulators (see REGULATOR MOVEMENT) The town has textile, furniture, and tobacco plants Thomas Hart Benton was born here **5** City (pop 1,338), co seat of Traill co., E N Dak , on the Goose river and NNW of Fargo, in a farm area, laid out 1880, inc 1881 **6** Village (pop 4,713), co seat of Highland co , SW Ohio, E of Cincinnati, platted 1807 It is a trade center for a farm, livestock, and dairy area Farm machinery is made In 1873 the Women's Temperance Crusade was founded here by a group of local women Several mound builders' forts are near by **7** City (pop 3,747), co seat of Washington co , NW Oregon, W of Portland in the fertile Willamette valley, settled c 1845, inc 1876 Quick-freezing and packing of fruits and vegetables are done here. **8** City (1940 pop 7,799, 1947 estimated pop 10,500), co seat of Hill co , N central Texas, SSW of Dallas, inc 1853 In the rich blackland region, it has cotton-processing plants, textile mills, and other small industries The area also has dairying and livestock breeding There is a junior college and a well-known children's home **9** City (pop 1,146), central Wis , on the Baraboo and NW of Madison, settled 1854, inc 1885

Hillsborough, town (pop 2,747), W Calif , S of San Francisco, inc 1910 The founders, to restrict the town to fine residences, banned stores, hotels, postal and telegraph offices, and sidewalks.

Hillsdale. **1** City (pop 6,381), co seat of Hillsdale co , S Mich , on the St Joseph and SW of Jackson, settled 1834, inc as a village 1847, as a city 1869 Automotive and aircraft machinery are made The Slayton Arboretum is part of Hillsdale College (coeducational, 1844) Several Indian mounds are in the vicinity **2** Borough (pop 3,438), NE N J , N of Hackensack, inc 1923

Hillside. **1** Village (pop 1,080), NE Ill, near Chicago, inc 1905 **2** Township (pop 18,556), NE N J , southwestern suburb of Newark, inc 1913 It has a hydrogen plant

Hilo (hē'lō), city (pop 23,358), co seat of Hawaii co , on NE Hawaii, T H , on Hilo Bay A modern city, Hilo is a port of entry and the center of the island's tourist trade It has an airport The Lyman Museum has a collection of Hawaiiana Coconut Island in Hilo Bay is a beach park Mauna Loa and Mauna Kea are near by Hilo was badly damaged in the tidal-wave disaster of 1946 It has fruit canneries, a rice mill, and an ironworks and exports sugar rice, and fruits

Hilprecht, Hermann Volrath (hĭl'prĭkht), 1859–1925, American Assyriologist, b Germany, Ph D Univ of Leipzig, 1883 He is noted as an authority on cuneiform writing He came to the United States in 1886 and was professor of Assyriology (1886–1911) at the Univ of Pennsylvania and curator (1887–1911) of the Semitic department of its museum He was scientific director of four expeditions (1895–1914) to Nippur and reorganized (1893–1909) the Babylonian collection of the Imperial Ottoman Museum, Constantinople He retired to Germany in 1914 but later returned to the United States and was naturalized

Hilton, John, 1804–78, British surgeon An outstanding physician of his day, he is known especially for his treatise *Rest and Pain* (1863) He developed a notable technique of draining deep abscesses and was among the first to use the method of operating on the colon through an incision in the lower part of the back

Hilton, Walter, d 1395, English religious writer, an Austin canon of Thurgarton, Nottinghamshire His spiritual treatise, *The Scale of Perfection* (ed by Evelyn Underhill, 1923), is a general manual for holy living Although it was addressed to a Carthusian recluse, it was popular among English laymen before the Reformation Hilton also composed a shorter *Treatise Written to a Devout Man* His MYSTICISM, typically English, resembles that of Richard ROLLE OF HAMPOLE

Hilversum (hĭl'vursum), municipality (pop 84,293), North Holland prov , W central Netherlands, SE of Amsterdam It is a modern, primarily residential city and a health resort with several sanatoriums Electrical machinery and carpets are manufactured here and there is a diamond-polishing industry Hilversum has a powerful radio station

Himachal Pradesh (hĭmä'chul prä'dĕsh), state (c 10,600 sq mi , pop c 935,000), NW India, bounded by Tibet on the east The capital is Simla The state is covered with forested mountains, and in the valleys there is extensive cultivation. Products include wheat, maize, millet, rice, and turmeric. The state was formed in 1948 by the merger of 21 former princely states A large percentage of the inhabitants is aboriginal Himachal Pradesh is directly administered by the central government of India

Himalayas (hĭmä'lŭyŭz, hĭmälā'ŭz) [Sanskrit,= abode of snow], Asiatic mountain system, extending c 1,500 mi E from the Karakorum system. It lies in India, Tibet, Nepal, Sikkim, Bhutan, and China For most of its length the Himalayas comprise two nearly parallel ranges separated by a wide valley; the northern range is usually called the Trans-Himalaya. A relatively young and still growing system, the Himalayas arose from folding of the earth's crust due to southward pressure against the plain of N India. It is believed that some 40 of the Himalayan peaks are loftier than any other spot on earth Mt EVEREST, the highest, is followed by Mt GODWIN-AUSTEN (K2) Other great peaks which have challenged mountaineers include NANGA PARBAT and NANDA DEVI in India, KANCHENJUNGA in Nepal, and MINYA KONKA in China. Between India and Tibet the Himalayas interpose a barrier which is crossed only by a few passes (c 18,000 ft high), over which yak teams carry goods The aridity of Tibet results from the interception by the mountains of the moisture-laden northwest monsoon On the northern slopes, consequently, snowfall is relatively light and there is little drainage From the snow-covered and extensively glaciated southern slopes, however, arise major Indian rivers, notably the Indus, the Sutlej, the Ganges, and the Brahmaputra Little of the Himalaya region is inhabitable or of great current economic value. The southern approaches, the Terai, are malarial jungle and swamps swarming with ferocious animals Grazing is possible on some of the gentler slopes, and there is some lumbering in the extensive forests of pine, spruce, and deodar found below 12,000 ft. See Sir Francis Younghusband, *Wonders of the Himalaya* (1924), C F Meade, *Approach to the Hills* (1940)

Himeji (hē'mā'jē), city (1947 pop 197,299), Hyogo prefecture, S Honshu, Japan A railroad and manufacturing center with cotton textile mills and other plants, it grew up near a 14th-century castle

Himera (hĭ'murŭ), ancient city on the north coast of Sicily, founded by Greeks in the 7th cent Here in 480 B C (a traditional date) forces led by Gelon routed the Carthaginians led by Hamilcar In revenge the Carthaginians destroyed (408 B C) the city The citizens moved to near-by Thermae (modern Termini)

Himmler, Heinrich (hīn'rĭkh hĭm'lur), 1900–1945, German National Socialist leader An early party member, Himmler took part in Hitler's beer-hall putsch of 1923, and in 1929 he became head of the SS (see NATIONAL SOCIALISM) In 1936, when the Gestapo (the SECRET POLICE set up in 1933 under Goering) was joined with the SS under his control, he became head of the entire German police Himmler's power ultimately rivaled that of Hitler A brilliant organizer and the most ruthless and inhuman of all Nazi chiefs, Himmler terrorized his own party hierarchy as well as all German-held Europe, ordering death for millions In Aug , 1943, he was appointed minister of the interior, and after putting down a conspiracy against Hitler in July, 1944, he acted as the virtual dictator of Germany Arrested by British troops in May, 1945, he committed suicide by swallowing poison Himmler must be credited with the introduction of gas chambers and roving extermination squads as modern political instruments

Himyaritic (-rĭt'-), dead Semitic language See LANGUAGE (table)

Hinckley, urban district (1931 pop 16,030, 1947 estimated pop. 38,190), Leicestershire, England, SW of Leicester Hosiery and shoes are the chief manufactures.

Hincks, Sir Francis, 1807–85, Canadian journalist and statesman, b Ireland Settling (1832) in York (now Toronto), he was soon drawn into the Reform party In 1838 he became editor of the Toronto *Examiner*, a newspaper founded by the reformers, which under his direction ably argued the cause of responsible government Entering the Canadian legislative assembly in 1841, Hincks was twice (1842–43, 1848–51) inspector general (or finance minister) He worked to effect an alliance between the reformers of Upper Canada and Lower Canada, vigorously opposed the movement for annexation to the United States, and in the interval between his terms of office as inspector general he founded a new Reform party journal, the Montreal *Pilot* As premier in the joint Hincks-Morin administration (1851–54) he directed his efforts toward achieving a reciprocal trade treaty with the United States and promoting railroad construction, but charges of financial misdeeds were hurled at him, and he resigned in 1854 Hincks was governor of Barbados and the Windward Islands (1855–62) and of British Guiana (1862–69); he then returned to Canada to serve (1869–73) as minister of finance in Sir John A. Macdonald's coalition government In 1869 he was knighted See his reminiscences (1884); biography by R. S. Longley (1943); Stephen Leacock, *Mackenzie, Baldwin, LaFontaine, Hincks* (rev. ed., 1926)

Hincmar (hĭngk'mär), 806–82, Frankish churchman, archbishop of Rheims (from 845) He was a supporter of Emperor LOUIS I and a counselor of his son CHARLES II (Charles the Bald). As a metropolitan he tried to depose a bishop in 862 and brought on himself the censure of Pope St. NICHOLAS I Later (876) in a different contention he upheld the rights of metropolitans Hincmar vigorously opposed GOTTSCHALK and urged (850) ERIGENA to write on predestination. Dissatisfied with

Erigena's tract Hincmar wrote three treatises on the subject himself. He strongly opposed the divorce of Lothair, king of Lotharingia, and he spent much of his time in defending the claims of Charles in various dynastic struggles, particularly against Louis the German

Hindemith, Paul (hĭn'dəmĭth), 1895–, German-American composer and violist, b Hanau, Germany, studied at the Frankfurt Conservatory He founded the Amar string quartet, with which, as violist, he toured Europe for some time From 1927 to 1937 he taught composition at the Berlin Hochschule In 1935 he was commissioned by the Turkish government to reorganize that country's musical life In 1937 he appeared as violist in his own viola sonata in Washington, D C He taught in Turkey in the season 1938–39 and in 1940 joined the faculty of Yale Univ He became a U S citizen in 1946 His early compositions are highly contrapuntal and often atonal Later works display a return to tonality *Cardillac* (1926) exemplifies the return to the principle of opera divisible into separate numbers, as opposed to the Wagnerian conception of "endless melody" *Hin und zurück* [there and back] (1927) is a kind of operatic palindrome, in which the action of the second part reverses that of the first The satirical *Neues vom Tage* (1929) was denounced by the German ministry of propaganda in 1934 as culturally bolshevistic Hindemith's best-known work is the symphony (1934) drawn from the opera *Mathis der Maler* (1934; Zurich, 1938), which is based on the life of Mathias Grünewald Many of Hindemith's works might be classed as *Gebrauchsmusik* [utility music], written for small combinations of instruments and meant to be performed by amateurs His aim was to establish closer contact between composer and public Included in this group are the children's opera *Wir bauen eine Stadt* (1931) and numerous sonatas and chamber works Other important works are the *Ludus Tonalis* (1943) for piano, the song cycle *Das Marienleben* (1924, revised 1949), the viola concerto *Der Schwanendreher* (1935), based on medieval German folk songs, the ballet *Nobilissima Visione* (1938), based on the life of St Francis of Assisi, and the setting for the chorus of Walt Whitman's *When Lilacs Last in the Dooryard Bloom'd* (1946) His writings include *The Craft of Musical Composition* (Eng tr , 1941–42)

Hindenburg, Paul von (hĭn'dənbûrg, Ger poul' fən hĭn'dənbo͝ork), 1847–1934, German field marshal and president, b Poznan (then in Prussia) His full name was Paul Ludwig Hans Anton von Hindenburg und Beneckendorff He fought in the Austro-Prussian War (1866) and the Franco-Prussian War (1870–71) and was appointed (1878) to the general staff Though retired after 1911, he was made commander in East Prussia early in the First World War His chief of staff, General LUDENDORFF, who was his assistant throughout the war, has often been considered the real author of Hindenburg's victories The victory of TANNENBERG (Aug 1914) over a much larger Russian force was followed (1914–15) by German occupation of Poland and part of the Baltic provinces In 1916 Hindenburg, by then a field marshal, succeeded General FALKENHAYN as chief of the general staff and assumed supreme command of all the forces of the Central Powers The economic program of total warfare, adopted then, was called the Hindenburg Plan in his honor, but was actually the work of Walter Rathenau Hindenburg stemmed the Allied advance in the west and consolidated the Hindenburg Line, running roughly from Lens through Saint-Quentin to Rheims Rumania was crushed, and Russia withdrew from the war (1917) From March to July, 1918, Hindenburg launched a costly offensive into France, but the Allied counteroffensive spearheaded by fresh American troops, led to the German defeat and surrender Hindenburg led his troops back in sufficiently good order to prevent a radical revolution Though, by the terms of the Treaty of Versailles, he was to be tried as a war criminal, the special German court at Leipzig never even indicted him Hindenburg, a monarchist, became the white hope of the German monarchists, the Prussian Junkers, and the conservatives, who in 1925 elected him president of the Reich. His powers were very limited, but his abrupt dismissal (1932) of Chancellor BRÜNING precipitated fateful events Hindenburg, with Socialist help, defeated Adolf HITLER in the presidential elections of 1932 However, convinced by sinister advisers that a Socialist plot was imminent, the president, who was no longer in full possession of his faculties, appointed Hitler chancellor in Jan , 1933. Hindenburg continued as a figurehead till his death See J W Wheeler-Bennett, *The Wooden Titan* (1936), biographies by T. R Ybarra (1932) and M. L Goldsmith and V. A. Voight (1930)

Hindenburg or Zabrze (zäb'zhĕ), city (pop 104,184), Upper Silesia, transferred to Polish administration in 1945 (see SILESIA) It is a center of the KATOWICE mining and industrial region Founded in the 13th cent , Zabrse passed to Prussia in 1742 and was renamed (1915) in honor of Field Marshal von Hindenburg; in 1945 the name Zabrse was restored. Its present population is entirely Polish.

Hindenburg: see AIRSHIP.

Hindi (hĭn'dē), Indo-European languages of N India See LANGUAGE (table).

Hindley (hĭnd'lē), urban district (1931 pop 21,632, 1943 estimated pop 20,330), Lancashire, England, SE of Wigan. It is a cotton-mill town.

Hindman, Thomas Carmichael (hĭnd'–), 1828–68, Confederate general, b Knoxville, Tenn After volunteer service in the Mexican War, he studied law and practiced for a time in Ripley, Miss He moved to Arkansas and was elected to Congress in 1858 Reelected in 1860, Hindman, supporting secession, declined his seat He was commissioned Confederate brigadier general in Sept , 1861, made major general for gallantry at Shiloh (April, 1862), and given command of the trans-Mississippi district (May, 1862), where his vigor in enforcing conscription and martial law led to his being replaced Defeated at PRAIRIE GROVE (Dec , 1862), Hindman was transferred to the East, where he served around Chattanooga and in Georgia He returned in 1867 to Arkansas, where his opposition to the Reconstruction program brought about his assassination, Sept 27, 1868

Hinduism (hĭn'do͞oĭzm), Western term for the religious beliefs and practices of the majority of the people of India The corresponding Indian term, *dharma*, means law, whether as applied to the workings of the divine order or to jurisprudence Hinduism does not have a fixed scriptural canon, but certain ancient works, notably the VEDA, the *Brahmanas*, and the *Bhagavad-Gita*, are the subjects of elaborate theological commentary The nature gods of the *Veda* were designated *deva* (good) or *sura* (evil) Some of them appear in present-day Hinduism, examples are Varuna (the sky), Agni (fire), Surya (the sun), and Lakshmi, the goddess of luck Other Vedic gods have disappeared, including the Apsaras (spirits of the wind), the Asvins (twin deities of light), and Yama, the god of heaven and hell Brahmanism substituted (c 550 B C) for the Vedic religion a complex system of ritual and theosophy expounded in the *Brahmanas* and the *Upanishads* The *Brahmanas* regulate sacrifices to the gods of various ranks and contain personifications of moral qualities, such as lust, which is represented by Kama or Kamadeva The *Upanishads*, the foundation of modern Hindu philosophy, develop the doctrine of a universal soul or being to which individual souls will be reunited after maya (the illusion of time and space) is conquered Continuity with the Vedic tradition is maintained by describing the earlier deities as clumsy efforts to express the ineffable being Buddhism and Jainism, which flourished in India from c 300 B C to A D c 400, attacked this complex ritual and theology Brahmanism, far from succumbing, adopted features of those religions and codified its own ritual in the *Laws of Manu* Several schools of interpretation of the *Upanishads*, notably the VEDANTA school, appeared, and YOGA, a technique for hastening reunion with the universal soul through spiritual and physical exercises and through sacrifice, was developed One lifetime, the Yogis taught, might not suffice for this reunion, since under the principle of karma an individual's evil actions may require successive rebirths in human or animal form, just as his good actions may hasten reunion with the infinite A later stage of Hinduism is represented by the *Tantras* and the *Puranas* The *Tantras* are mainly prescriptions for procuring divine favor by reciting charms and honorific titles of the deities The *Puranas* comprise poems addressed to gods who seem to have assumed human traits in place of some of their divine attributes Siva (or Shiva) the Preserver and Vishnu the Destroyer are the chief gods of the *Puranas* With Brahma, a remote and unapproachable deity who created the universe and is equated with it, they constitute the triad about which Hinduism now centers Many cults, with widely variant practices, exist side by side Siva is commonly worshiped as the linga or phallus Kali, his consort, is primarily the black goddess of death, although she does have other and benign forms Vishnu has descended upon earth in nine incarnations (avatars), that as the voluptuous Krishna is perhaps the most popular Hinduism, at all times more than merely a religion, is a complete way of life Under the impact of modern conditions much of what it formerly ordained has had to be modified or abandoned Thus the British forbade the marriage of children and the rite of suttee which required a widow to immolate herself on her husband's funeral pyre Untouchability (see CASTE) which prescribes that the classes outside the castes must be treated with aversion because of presumptive sinfulness in a prior existence, was attacked by Gandhi and is now unlawful in the Union of India Still widely observed is the protection of animals, especially cows, as enjoined by the rule of ahimsa (nonviolence) In some places snakes are revered as the form of Kali. Pilgrimages to sacred places are a marked feature of Hinduism The cities of Puri, Benares, and Allahabad and the Ganges and Narbada rivers are especially holy. For the literature of Hinduism see SANSKRIT LITERATURE. See J A Dubois, *Hindu Manners, Customs, and Ceremonies* (1897), C N E Eliot, *Hinduism and Buddhism* (3 vols , 1921), Sir Sarvepalli Radhakrishnan, *Hindu View of Life* (1926)

Hindu Kush (hĭn'do͞o ko͞osh') mountain system, central Asia, lying mainly in NE Afghanistan and extending E to Pakistan and Kashmir It adjoins the Pamir on the east Second in loftiness only to the Himalaya range, the Hindu Kush culminates in Tirach Mir (25,426 ft high) in North-West Frontier Prov , Pakistan The Amu Darya rises on the northern slope of the Hindu Kush, and on the southern slope rise several tributaries of the Indus The system is crossed by passes ranging in elevation from 10,000 ft to 17,000 ft These routes, which now serve traders, in former times gave access to India to conquerors advancing from central Asia, including Alexander the Great—whose historians called the system Caucasus Indicus—and Tamerlane

Hindu music. The music of India is entirely monodic Of all Oriental musical cultures it is most easily grasped by the Western mind Its tonal system divides the octave into 22 segments called *srutis*, not all equal but each roughly equal to one quarter of the whole tone of Western music The basic scales are *sa-grama* and *ma-grama* The more important of these, the *sa-grama*, closely approximates our C major scale *Ma-grama*, which differs from *sa-grama* in only one interval, is said to have disappeared from use about the 16th cent Other scales are derived from these by the sharping or flatting of some of the intervals or by leaving out some of the tones Melody is based on the system of *ragas*, which are melody types used as the basis for improvisation There are 60-odd *ragas*, and with each there is an accompanying set of rules for improvisation in that *raga* To each is ascribed certain ethical and emotional properties, and each is associated with a certain season and a certain time of day For a single *raga*, however, these connotations vary in different parts of India Legend celebrates the powers of the *ragas*, e g , a *raga* associated with darkness could, if sung in the middle of the day by a singer whose skill was great enough, bring darkness upon the earth In the performance of the *ragas*, great importance is attached to the *gamakas*, the ornaments or graces which are the life and breath of this music Accompanied song is considered the highest type of music In the accompaniment, rhythm is very complex and is based on certain rhythmic patterns, called *talas*, which are often combined in the most intricate ways The oldest instrument is the drum, of which there are various types, it can be tuned by virtue of special types of coating given the skin The most important instrument is the vina In antiquity the name was given to a harp, but the modern vina is a zither with gourd resonators In addition various types of bagpipe, lute, fiddle, oboe, trumpet, flute, cymbal, and gong have been known in India Many of the instruments are of Islamic origin See A H Fox-Strangways, *The Music of Hindostan* (1914), Curt Sachs, *The Rise of Music in the Ancient World* (1943)

Hindus, Maurice Gerschon (hĭn'dəs), 1891–, American writer, b Russia He came to the United States in 1905 after his father's death and was graduated from Colgate in 1915 In the autobiographical *Green Worlds* (1938) he contrasts an obscure Russian village with rural America as he experienced it in a small New York town He is widely traveled in Europe and the Middle East, and much of his writing, which includes many books and newspaper and magazine articles, attempts to interpret the political views and cultures of these countries to Americans Among his best-known works are *Humanity Uprooted* (1929), *Red Bread* (1931), *Moscow Skies* (1936), *We Shall Live Again* (1939), the novels *Sons and Fathers* (1940) and *To Sing with the Angels* (1941), *Hitler Cannot Conquer Russia* (1941), *Mother Russia* (1943), and *In Search of a Future* (1949)

Hindustan (hĭn"dəstän') [Persian, = Hindu land], term applied to various areas of India and Pakistan It sometimes means the region between the Narbada river and the Himalayas, but, in a more limited sense, it designates N central India including W United Provs , E Rajputana, and E Punjab Since the partition (1947) of the Indian peninsula it has sometimes been applied to the largely Hindu state of India as opposed to the Moslem state of Pakistan

Hindustani (hĭndəstän'ē), standard Indo-European language of Hindus See LANGUAGE (table)

Hines, John Leonard (hīnz), 1868–, American general, b White Sulphur Springs, W Va , grad. West Point, 1891 In the Spanish-American War he served in Cuba (1898–1900), and later he was in the Philippines (1900–1901, 1903–5, 1911–12) and had varied commands elsewhere He was adjutant general on John J Pershing's Mexican expedition (1916–17) In the First World War he was assistant adjutant general of the American Expeditionary Forces in 1917 He commanded an infantry brigade in 1918, and later he led the 4th Division in the battle of Saint-Mihiel and in the Meuse-Argonne offensive. He succeeded to command of

the 3d Army Corps, was in 1921 commissioned a major general and in 1924 succeeded Pershing as chief of staff In 1930 he became commander of the Philippine Dept , and in 1932 he retired

Hines, Walker Downer, 1870–1934, American government administrator, b Russellville, Ky , grad Ogden College, 1888, and Univ of Virginia law school, 1893 In the First World War when the Federal government took over management of the railroads, Hines was at first assistant director general under McAdoo, then himself director general (1919–20) of the railroads He later helped to settle international questions about the navigation of European rivers In 1933 he was sent on an advisory economic mission to Turkey He wrote *War History of American Railroads* (1928)

Hinesburg, town (pop 1,000), NW Vt , SSE of Burlington, chartered 1762, settled immediately after the Revolution

Hingan (hĭng'ăn'), Mandarin *Hsing-an,* province (107,605 sq mi , pop 322,173), NE China The capital is Hailar A part of Manchuria, Hingan was created in 1945 out of the western section of the former province of Heilungkiang Hingan is bordered on the north by the Amur river and on the west by the Argun river—both separate it from Siberia The Great Khingan is the chief mountain range Pastoral Mongols make up the sparse population The immense coal and timber reserves are barely exploited Hingan is served by the Chinese Eastern RR

Hingham (hĭng'ŭm), town (pop 8,003), E Mass , on the South Shore of Boston Bay, settled c 1633, inc 1635 There are several old buildings During the Second World War, ships were built here

Hinkle, Beatrice Moses, 1874–, American psychiatrist, b San Francisco, M D Cooper Medical College (now part of Stanford Univ), 1889 Her maiden name was Van Geisen In 1908 she opened at Cornell Medical College, New York city, the first psychotherapeutic clinic in America She wrote *The Re-Creating of the Individual* (1923) and translated Jung's work as *Psychology of the Unconscious* (1916)

Hinnom, valley, near Jerusalem, perhaps the present Wadi er-Rababi, W of the city It was of ill repute as a place of Moloch worship and the dump for Jerusalem's refuse Joshua 15 8, 18 16, 2 Kings 23 10, 2 Chron 28 3, 33 6, Jer 7 31, 32 35 TOPHET was in the valley In the Greek of the New Testament, Gehenna, a form of the name, meant HELL, perhaps because of fires of Moloch or dump fires in the valley

Hinsdale. **1** Residential village (pop 7,336), NE Ill , just W of Chicago, inc 1873 **2** Town (pop 1,235), W Mass , in the Berkshires SE of Dalton, settled 1763, set off from Partridgefield and Dalton 1804 **3** Town (pop 1,762), extreme SW N H , N of Northfield, Mass , inc 1753 It has water power from the Ashuelot and is the site of paper mills The house that Ebenezer Hinsdale built in 1756 still stands Charles A Dana was born in Hinsdale

Hinsley, Arthur, 1865–1943, English Roman Catholic churchman, cardinal of the Roman Church Born in Yorkshire, he attended Catholic schools in England and Rome He was ordained in 1893 and spent several decades as a schoolmaster and rector He served as a missionary in Africa, first as visitor apostolic (1926–30) and then as archbishop of Sardis and apostolic delegate (1930–34) In 1934 he retired, but was called from retirement in 1935 to be enthroned as archbishop of Westminster, primate of the Roman Catholic Church in England He was created cardinal in 1937 Cardinal Hinsley was noted as a foe of German and Italian fascism

Hinton, city (pop 5,815), co seat of Summers co , S W Va., on the New River near its junction with the Greenbrier and NE of Bluefield, settled 1831, inc 1880 Hinton has railroad shops and is a shipping center for an agricultural area.

hip joint: see JOINT

Hipparchus (hĭpär'kŭs), c 555–514 B C , tyrant of Athens, son of PISISTRATUS He and his brother HIPPIAS governed Athens jointly after the death of their father in 527 B C Trouble arose with HARMODIUS AND ARISTOGITON, and Hipparchus was slain

Hipparchus, 2d cent B C , Greek astronomer, b Nicaea, Bithynia He is the first systematic astronomer of whom there are records He made his observations chiefly on the island of Rhodes Ptolemy's geocentric theory of the universe was based largely on the conclusions of Hipparchus, a record of whose researches is preserved in the *Almagest* of Ptolemy In it Hipparchus is credited with the discovery of the precession of the equinoxes, the eccentricity of the sun's apparent orbit, and certain inequalities of the motions of the moon He also made the first known comprehensive chart of the heavens, giving the positions of at least 850 stars, this was expanded by Ptolemy. Hipparchus suggested a method of determining longitude by observing the parallax of the moon in eclipse He is believed to have been the first to make systematic use of trigonometry, and he computed a table of chords roughly equivalent to trigonometrical sines. Only one of his works, a commentary on the work of Aratus and Eudoxus, survives

Hipper, Franz von (frănts' fŏn hĭ'pĕr), 1863–1932, German admiral He was chief of the scouting fleet at the battle of Dogger Bank (1915) and the battle of Jutland (1916) His conduct at Jutland made him a popular hero He commanded the high seas fleet from 1916 to the end of the First World War

Hippias (hĭp'ĭăs), 6th–5th cent B C , tyrant of Athens, son of PISISTRATUS He and his brother Hipparchus governed Athens jointly from the death of their father until Hipparchus was slain in the trouble with Harmodius and Aristogiton in 514 Hippias then ruled alone until he was overthrown by the Alcmaeonidae and the Spartans and went into exile Hippias guided the Persians in the Marathon campaign

Hippius, Zinaida Nikolayevna (zēnĭ'dŭ nyĭkul'-uvnŭ hĕ'pēŏs), 1869–1945, Russian poet, novelist, critic, and playwright She was the wife of the writer D S Merezhkovsky and the founder of a famous St Petersburg salon As a poet she was a symbolist, and as a novelist a disciple of Dostoyevsky, without his gift for characterization Of her voluminous output, only one play, *The Green Ring* (1914, Eng tr , 1920), has appeared in English She went into exile after the Bolshevist Revolution

Hippocrates (hĭpŏ'krutēz), c 460–c 370 B C , Greek physician, recognized as the father of medicine He is believed to have been born on the island of Cos, to have studied at Athens, and to have continued his education by travel His enormous influence on the progress of medicine is the result of his separation of medicine from superstition, placing it on a scientific basis His theory of disease was the fallacious one of "humors" (disorders of body fluids), but his methods of observation were in many respects those of modern clinical practice Hippocrates' practice of bedside observation resulted in his noting many of the signs of disease, such as the facial expression in approaching death known as the *facies Hippocratica* and the succussion sound of fluid in the chest The large collection of Hippocratic writings contains only a few of the works which are now ascribed to him the *Aphorisms* and the *Airs, Waters, and Places* are considered the chief of these The collection appeared in several translations, and many of the volumes are in the Loeb Classical Library While the **Hippocratic oath** cannot be credited to him, it may well represent his own ideals In abridged form this is administered in many modern universities to graduates in medicine as follows "You do solemnly swear, each man by whatever he holds most sacred, that you will be loyal to the profession of medicine and just and generous to its members, that you will lead your lives and practice your art in uprightness and honor, that into whatsoever house you shall enter, it shall be for the good of the sick to the utmost of your power, you holding yourselves far aloof from wrong, from corruption, from the tempting of others to vice, that you will exercise your art solely for the cure of your patients and will give no drug, perform no operation, for a criminal purpose, even if solicited, far less suggest it, that whatsoever you shall see or hear of the lives of men which is not fitting to be spoken, you will keep inviolably secret These things do you swear Let each man bow the head in sign of acquiescence And now, if you will be true to this, your oath, may prosperity and good repute be ever yours, the opposite, if you shall prove yourselves forsworn "

Hippodamus (hĭpŏ'dumus), fl 5th cent B C , Greek architect, probably b Miletus He is the earliest known planner of cities, for which he originated geometrical layouts For Pericles he designed Piraeus (the port of Athens) He also planned the city of Rhodes (408 B C) and went with the Athenian colonists to replan the new city of Thurii (c 440 B C) in Italy Other cities of the ancient world followed his methods

Hippolyte (hĭpŏ'lĭtē), in Greek mythology, queen of the Amazons, daughter of Ares One legend says that she was the wife of THESEUS, another, that he married her sister ANTIOPE Either she or Antiope was the mother of Hippolytus One of the 12 labors of Hercules was to capture the girdle of Hippolyte

Hippolytus, Saint (hĭpŏ'lĭtus), fl c 211, martyr bishop of Porto, a suburbicarian diocese Feast Aug 22

Hippolytus, Saint, c 160–235, antipope (217–235), a theologian A disciple of St Irenaeus, he advocated a Neoplatonic theology of the Logos which paralleled that of TERTULLIAN Popes Zephyrinus and Calixtus I rejected his philosophy, particularly his doctrine of the Trinity. Upon the election of Calixtus, Hippolytus separated himself from the Church to become the first antipope His *Philosophumena* was a brilliant refutation of those contemporary heresies which were opposed to his philosophy At the time of Maximin's persecution, Hippolytus was sentenced to the mines of Sardinia There he was officially reconciled with the Church and died a martyr together with St Pontian, who was pope of that time Feast Aug 13

Hippolytus, in Greek myth, son of THESEUS and Antiope or HIPPOLYTE His stepmother, PHAEDRA, instigated perhaps by the angry Aphrodite, fell in love with him, rebuffed by Hippolytus, she accused him to Theseus of trying to dishonor her At Theseus' prayer, Poseidon destroyed Hippolytus by raising a monster to frighten his horses. The story is treated in the *Hippolytus* of Euripides and the *Phèdre* of Racine.

Hippomedon (hĭpŏm'ĕdŏn), in Greek legend, one of the SEVEN AGAINST THEBES

Hippomenes. see ATALANTA

Hipponax (hĭpŏ'năks), fl 6th cent B C , Greek iambic poet He was said by some to be the inventor of the choliambic, or "limping" iambic, verse Ugly, coarse, and malicious, he wrote bitter satire, fragments of which are extant

Hipponoüs. see BELLEROPHON

hippopotamus (hĭpupŏ'tŭmŭs) [Gr ,=river horse], herbivorous mammal of Africa, related to the pig The large hippopotamus has a short-legged, broad body with a tough gray or brown hide The mouth is wide and the incisors and lower canines are large tusks, from which ivory is obtained It is hunted for meat, and the natives use the hide for shields and whips The fat is also useful Much of the animal's time is spent in the water, where it feeds on aquatic plants Once widespread in Africa it is now rare except in the interior and on reserves The pygmy hippopotamus is found in W Africa

Hippo Regius see BÔNE, Algeria

Hirado (hĕrä'dō), town (pop 16,397) on Hirado island, off NW Kyushu, Japan It is known for its fine porcelain Its port was opened in the 16th cent to foreign trade, early in the 17th cent Dutch and English factories were built here

Hirah (hī'ru), Judah's father-in-law Gen 38

Hiram (hī'-) **1** Fl 1000 B C , king of Tyre, a friend of David and Solomon Solomon and Hiram shared in the trade with India and the Mediterranean, and they constantly exchanged gifts Hiram sent much fine material for the Temple 2 Sam 5 11, 1 Kings 5, 9, 10 Huram 2 Chron 2, 8, 9 **2** Artisan in metals, sent to Solomon by Hiram king of Tyre to work on the ornamentation of the Temple 1 Kings 7 13–45 Huram 2 Chron 4 11–22

Hiram College, at Hiram, Ohio, SE of Cleveland, coeducational, chartered and opened 1850 as a Disciples of Christ institute, renamed 1867 James A Garfield was a principal Its plan of intensive study of one subject for nine weeks is well known

Hiranuma, Kuchiro, Baron (kō"ĕ'chĭrō hĕrä'nōōmä), 1865–, Japanese statesman, leader of the Kokuhonsha, a powerful militarist and reactionary society After serving as a judge and director of the civil criminal-affairs bureau, he became vice minister of justice in 1911 and minister of justice in 1923 He was for many years vice president of the privy council and became its president in 1936 He was appointed prime minister in Jan , 1939, but resigned in August when the German-Soviet pact temporarily discredited Japan's ties with Germany Later he served as home minister (1940) under Fumimaro Konoye In March, 1946, he was arrested as a war criminal, and in Nov , 1948, he was condemned to life imprisonment

Hirohito (hĭ"rōhē'tō, hĕrō'hētō), 1901–, emperor of Japan He was made regent in 1921, and in 1926 he succeeded his father, YOSHIHITO, with the reign name Shoa In 1924 he married Princess Nagako Kuni, a son and heir, Prince Akihito (Tsugu), was born in 1933 He interested himself in various studies, notably in marine biology, and as crown prince he broke tradition by traveling in Europe His own views were reputedly moderately liberal and his personal influence on state affairs was slight, but the fact that Japan embarked on the Second World War under an imperial rescript has caused the question of his responsibility for Japan's war policy to be much debated On Jan 1, 1946, he publicly rejected the idea of imperial divinity, and the new constitution of 1947 deprived him of all but ceremonial powers The majority of Japanese, however, continued to revere the emperor

Hirosaki (hĕrō'sakē), city (1947 pop 63,669) Aomori prefecture, N Honshu, Japan It has a 17th-century Buddhist temple and the remains of a feudal castle

Hiroshige, Ando (an'dō hĕrō'shēgā"), 1797–1858, Japanese landscape painter and color-print artist His first success was won with a series of landscapes (1825) He painted flowers, fish, and birds, but his important prints are landscapes, frequently snow scenes or rain, mist, and moonlight subjects He showed a knowledge of perspective It was from him that Whistler drew inspiration for his moonlight interpretations Hiroshige is represented in the print collections of various large museums, as in Tokyo, London, New York, and Boston, and also in many important private collections. *Mishima in Morning Fog* and *Rain at Shono* are typical prints Hiroshige II and Hiroshige III were pupils who used the name of their master after his death See E F Fenollosa, *The Masters of Ukiyoye* (1896), E F. Strange, *Colour-Prints of Hiroshigé* (1926).

Hiroshima (hĭ"rōshē'mŭ, hĕrō'shmä), city (1940 pop. 343,968, 1947 pop. 224,100), capital of

Hiroshima prefecture, SW Honshu, Japan, a port on Hiroshima Bay, an arm of the Inland Sea. Founded (c 1594) as a castle city on the delta of the Ota river, the city is divided by the seven mouths of the river into six islands connected by 81 bridges It produces textiles, rubber goods, canned foods, and machinery The sacred island of Itsukushima is near by Hiroshima was the target (Aug 6, 1945) of the first atomic bomb ever dropped on a populated area Some 150,000 people were killed or wounded, and 75 percent of the buildings were destroyed or badly damaged (see John Hersey, *Hiroshima*, 1946) Hiroshima prefecture is generally mountainous, with fertile valleys Raw silk is widely produced Kure and Onomichi are among the principal cities of the prefecture

Hirota, Koki (kō'kē hē'rōtä), 1878–1948, Japanese statesman A career diplomat, he served as ambassador to Russia (1930–32) and as foreign minister (1933–36) He became prime minister in March, 1936, after the military revolt of Feb 26, the composition and policies of his cabinet were dictated by the army Military appropriations were increased, repression of "dangerous thoughts" was intensified, state control of economy was strengthened, and the anti-Comintern Pact was signed with Germany and Italy Nevertheless, he was forced to resign by army pressure in Jan , 1937. Later he was (1937–38) foreign minister under Fumimaro Konoye After the war he was arrested as a war criminal, and in 1948 he was convicted and hanged

Hirsch, Emil Gustav (hûrsh), 1852–1923, American rabbi, b Luxembourg, grad Univ of Pennsylvania, 1872, and studied in Europe He was rabbi in Baltimore, Md , and Louisville, Ky , but is best known for his work as rabbi of the Sinai congregation of Chicago In 1892 he became professor of rabbinical literature and philosophy at the Univ of Chicago, and he was president (1885–97) of the Chicago Public Library board He was an influential exponent of advanced thought and reformed Judaism He edited the Milwaukee *Zeitgeist* (1880–87) and the *Reform Advocate* (1891–1923)

Hirsch, Maurice, baron de (mōrēs' barō' dü hĭrsh'), 1831–96, Jewish philanthropist, b Munich His most ambitious project, to which he contributed about $50,000,000, was the Jewish Colonization Association, a colonization plan for the emigration of Russian Jews to Argentina, where land was bought in Buenos Aires, Santa Fe, and elsewhere The association later established other important colonies His other charities included immense sums to the Alliance Israélite Universelle, to Galician schools, and to an American fund for Jewish education His offer of $10,000,000 to Russia for the amelioration of Jewish educational conditions was not accepted

Hirschberg (hĭrsh'bĕrk) or **Jelenia Gora,** Pol *Jelenia Góra* (yĕlĕ'nya gōō'rä), city (pop 39,050), Lower Silesia, SW of Breslau, transferred to Polish administration in 1945 (see SILESIA) Founded in 1280, Hirschberg passed to Bohemia in 1368 and to Prussia in 1741 It is situated on the Bober river at the foot of the Giant Mts , the Kavalierberg, 1,352 ft high, rises to the south Chiefly a tourist and trade center, it also has several industries

Hirta, Outer Hebrides, Scotland see SAINT KILDA

Hirtius, Aulus (ô'lus hûr'shĭəs), d 43 B C , Roman soldier He was a friend of Julius Caesar, with whom he served in Gaul After Caesar's assassination (44 B C) Hirtius and Caius Vibius Pansa were consuls and in that capacity took sides with the senate against Marc Antony, who was at Mutina (Modena) besieging Decimus Junius BRUTUS Hirtius was killed in the successful lifting of the siege He was probably the author of the eighth book of Caesar's *Gallic Wars*

His, Wilhelm (vĭl'hĕlm hĭs'), 1831–1904, German biologist, b Basel He stressed the importance of mechanical principles in embryological development and pioneered in the use of the microtome for preparing tissues for microscopic study He taught at the universities of Basel (1857–72) and Leipzig (from 1872)

Hishigawa Moronobu (hĭshĭgä'wu mōrō'nōbōō), fl 1659–95, Japanese genre painter Beginning as an embroiderer, he became a dress-pattern designer for silk manufacturers He was a pioneer in designing and executing woodcuts for book illustration and popular sheet prints, first done in black and white and later hand-colored About 1659 he drew 12 designs for a book of etiquette and hygiene for women His paintings were largely in the collections of his chief patrons, the daimyo and samurai

Hispanic America: see SPANISH AMERICA

Hispaniola (hĭ"spänyō'lä), Span *Española* (äspānyō'lä), island (c 30,000 sq mi), West Indies, between Cuba and Puerto Rico, of which HAITI occupies the western third and the DOMINICAN REPUBLIC the remainder The island is largely mountainous. On the northeast is a coastal range, separated from a central cordillera by lowlands known as the Cibao and Vega Real in the Dominican Republic and as the Plaine-du-Nord in Haiti. The southeastern part of the island is a dry plain. More than half of Hispaniola is dominated by a rugged cordillera Separating this from a southwestern range is the Cul-de-Sac, a structural depression sinking to c 150 ft below sea level Both ranges, extending far westward like the claws of a giant crab, form the Gulf of Gonaïves Except on the southeastern plain and in the Cul-de-Sac, which are irrigated, rainfall is abundant and agriculture flourishes Discovered by Columbus in 1492, the island was early called Española, though the aboriginal name seems to have been Haiti Later the French colony was called Saint-Domingue from the Spanish colony's SANTO DOMINGO in the east After French obtained the whole island in 1795 and particularly during the periods when the sections were united, the names Haiti and Santo Domingo were popularly used interchangeably in English, but in the late 19th cent the entire island was called Haiti, while the eastern part, officially the Dominican Republic, was commonly called Santo Domingo In modern English usage the tendency has been to revert to Hispaniola

Hiss, Alger, 1904–, American public official, b Baltimore, grad Johns Hopkins, 1926, and Harvard Law School, 1929 After serving (1929–30) as secretary to Justice Oliver Wendell Holmes, Hiss practiced law (1930–33) in Boston and New York city He then was attached to the Agricultural Adjustment Administration (1933–35) and to the Dept of Justice (1935–36) He entered the Dept of State in 1936 and rose rapidly to become an adviser at various international conferences and a coordinator of American foreign policy In 1947 Hiss resigned his government post to become president of the Carnegie Endowment for International Peace In Aug , 1948, J D Whittaker Chambers—a magazine editor who confessed to having been a Communist party courier—accused Hiss of having helped in transmitting confidential government documents to the Russians Hiss denied these charges and was indicted (Dec , 1948) on two counts of perjury by a grand jury When he was first brought to trial in New York city in 1949, the jury was unable to reach a decision (July , 1949) At a second trial Hiss was found guilty (Jan , 1950) and sentenced to a five-year prison term. He appealed the case

Hissarlik, Turkey see TROY

history, in its broadest sense, the story of man's past More specifically it means the records of that past, not only in chronicles and treatises on the past, but in all sorts of forms (e g , monuments, buildings, artifacts, business papers, and newspapers) The early time for which those records do not exist in any organized form is prehistory, although that term is more generally used for the period in any civilization before inscriptions and other written records were preserved, this, of course, varies from one culture to another and in some continues late (e g , the story of some North American Indian tribes is prehistory until well into the 19th cent) In the older civilizations, as in Egypt, Mesopotamia, and China, historical records appear immediately after the appearance of writing, for conquering kings wished to record their triumphs for all of posterity to see There was also some interest in the remote past, particularly genealogical interest in the glorification of royal ancestors and their achievements There appears early, too, a strain of religious interest in showing the lessons of history, religious and ethical Thus the early historical sections of the Bible are concerned with the manifestation of God's will in the events of man's existence, while they show the same genealogical interests as the king lists of other peoples It was not until the time of the Greeks, however, that writing of organic history emerged The compilations of the *logographoi* in the 6th cent B C. were organized records It is with some justice, however, that HERODOTUS is considered the first historian, because in his work appears the conscious desire to record all the significant and noteworthy circumstances surrounding a set of events and motivating the actions of people in those events The element of causation was strong Herodotus was remarkable, too, for the scope of his interests, he recorded myths, described customs, and made speculations In later ages, when the fashion was to favor rigidly circumscribed political and military history, he was criticized for his discursiveness, but believers in social history in recent times have heaped admiration upon him The second great Greek historian, THUCYDIDES, in writing the history of the Peloponnesian War was of a different stamp He did limit himself to matters of state and war; he tried to establish chronology with some exactitude, avoiding the vague wanderings of Herodotus, and he wrote a neat, grave work, conveying the lessons he drew from his story The third of the great Greek historians, XENOPHON, was more devoted to the purely narrative aspects of history, he had and expressed opinions and justified them from history, but to the reader the narrative is paramount These types of history writing, set thus early, were to persist and are to be seen in various writers today The influence of Thucydides was early in the ascendant, and the two important Greek historians of the Roman period, POLYBIUS and DION CASSIUS, more or less modeled themselves on that master The Roman historian LIVY tended more to the narrative form The great commentaries of Julius CAESAR were more like inspired reporting rather than pure history writing, and the personal element in them was as strong as in Xenophon TACITUS followed more or less the pattern of Thucydides but with a brooding moral interest in the decay of Roman society He showed a tremendous regard for accuracy and for testing the value of his sources that was not evident in many of the ancient historians, both the greater and the less It did appear to some extent in the scrupulous work of the Jewish historian, JOSEPHUS, but it was to disappear almost totally in medieval historiography Medieval works tended to divide into two types of history writing One was the universal history, which found some of its inspiration in St Augustine's *City of God* and was outstandingly illustrated by OROSIUS and continued by such lesser men as ISIDORE OF SEVILLE The other was the chronicle, which ranged from the crude and simple annals of local monasteries to more orderly and organized accounts such as those of SAXO GRAMMATICUS, OTTO OF FREISING, ROGER OF WENDOVER, and MATTHEW OF PARIS The two forms were not infrequently mixed, and there are chronicles with short sketches of universal history as introduction Attempts at broader histories of peoples such as the history of the Goths by CASSIODORUS (preserved only in the compendium of JORDANES) and the history of the Franks by GREGORY OF TOURS were early and had few successors The chronicles tended to be parochial Since learning was restricted to the Church, the chroniclers were also, naturally, generally biased in favor of the Church They were criticized most by the humanists of the Renaissance and later generations for their readiness to supply without evidence facts which should have been true according to their opinions, for their unquestioning attitude toward evidence however fraudulent, and for their credulous acceptance of many stories of miracles These strictures, however, fail to take into account the genuine contributions that even the poor (and largely anonymous or pseudonymous) histories made, for they retained at least in shadowy form some idea of the universal history of the world as it was then known in their most parochial moments and they show some idea of pattern in history It was a theological and imposed pattern, it is true, but paradoxically it gave the inaccurate, nearly barren chronicles broader horizons Furthermore, there were works of decided merit Bede's *Ecclesiastical History* was an early model in a branch of history writing that has been of great importance The biographical or semibiographical accounts of knightly deeds in the CRUSADES gave rise to the critical history of WILLIAM OF TYRE Contact with the Byzantines and the Moslems broadened history writing by showing the Westerners other points of view Byzantine history writing had also early fallen into the writing of chronicles, though the greater unity of the Byzantine Empire and the persistence of a unified culture gave somewhat more literary quality to the Byzantine works from PROCOPIUS through ANNA COMNENA to the 13th-century writings of ACROPOLITA and the brothers ACOMINATUS How much effect the works of the most celebrated Moslem historians, MASUDI, TABARI, and IBN KHALDUN had on the West is debatable The new learning of the 12th cent did, however, effect all writing and attitudes The emergence of the secular historian, shown in the work of one of the leaders of the Fourth Crusade, VILLEHARDOUIN, was to become more pronounced in the chronicles of Jean, sire de JOINVILLE, Jean FROISSART, and Philippe de COMINES in successive centuries The humanism of the Renaissance revolutionized historiography, for it placed emphasis on textual criticism and on a critical attitude toward documents and sources Men such as PETRARCH, Lorenzo VALLA, MARSILIUS OF PADUA, and Juan Luis VIVES did much to sweep away old myths and produce a more critical attitude Revival of classical learning immediately affected historians, and in one sense MACHIAVELLI and GUICCIARDINI were following in the steps of Greek and Roman historians, though their work was original and immediate Critical methods in history were forwarded in the 17th cent by Jean BODIN and Jean MABILLON, and great critical collections of sources were begun (e g , the *Acta sanctorum*), while busy antiquaries everywhere discovered, questioned, and amended old texts The way was prepared for the beginning of modern history The men of the Enlightenment lifted history writing to a new level VOLTAIRE not only stressed accuracy and refused to accept the judgments of conventional historiographers but cultivated the wider, universal view of history, stressing its social and moral aspects The attempt to get back to the fundamental natural bases of human development was implicit in the *Esprit des lois* of MONTESQUIEU The 18th cent saw, too, the great attempt made by Giovanni Battista VICO to synchronize history into meaningful general patterns. From England came the masterful

work of Edward GIBBON The end of the century also brought the budding of archaeology out of antiquarianism and of philology out of classical scholarship These two sciences were essential to the development of critical objective history in the 19th cent The prophet of the new objective school was the great Leopold von RANKE His efforts and those of his successors, notably Theodor MOMMSEN, J G DROYSEN, and Heinrich von TREITSCHKE, established canons of criticism and historical methods Thus was the "German school" that made history writing into a profession and created the graduate study of history It was to be developed in other lands In France, serious modern history began with FUSTEL DE COULANGES It was continued by such men as LAVISSE, Charles SEIGNOBOS, and Achille LUCHAIRE, who were among those who turned history into a wide study In the United States, earlier historians such as George BANCROFT were followed by the thorough Edward CHANNING and such brilliant and questioning men as Henry ADAMS and Frederick J TURNER, they in quite different ways developed the study of history In England such men as Samuel R GARDINER and Charles H FIRTH challenged the older Whig historians such as Thomas B MACAULAY Meanwhile, however, the broader interest in the philosophy of history had not died, and the philosophy of HEGEL had created a whole school of idealistic historians, his influence continues Other philosophical views were reflected in general theories, some of the towering later figures being Henry Thomas BUCKLE, Oswald SPENGLER, Benedetto CROCE, and Arnold TOYNBEE The theories of Karl MARX not only set in motion a continuing series of interpretations of history from the Marxist economic point of view but also affected historians of all other schools There were, too, other schools of economic history, such as the "new history" of James Harvey ROBINSON and Charles A BEARD in the United States The trend was toward broader social and economic history, and that trend continued in the 20th cent Anthropology and sociology contributed new ideas to history and opened the way to the history of cultures in the round (related to, but different from, such theories of spiritual cultural history as that of Karl LAMPRECHT) History writing became too complex, too filled with schools, to be covered in any brief summary (there are, however, articles on most leading historians) It can only be noted that in the middle of the 20th cent the tendency was to reassert the principle of history as an art as well as a scientific study and to extend the boundaries of history to study mass movements and society as a whole See E R A Seligman, *The Economic Interpretation of History* (2d ed rev, 1924), Allen Johnson, *The Historian and Historical Evidence* (1926), Charles V Langlois and Charles Seignobos, *An Introduction to the Study of History* (Eng tr, 1928), W A Dunning, *Truth in History, and Other Essays* (1937), Allan Nevins, *Gateway to History* (1938), James T Shotwell, *A History of History* (1939)

Hitchcock, Albert Spear, 1865–1935, American botanist, b Owosso, Mich, grad Iowa State Agricultural College, 1884 He taught chemistry in the State Univ of Iowa (1886–89) and botany in Kansas State Agricultural College (1892–1901) He joined the U S Dept of Agriculture in 1901 and from 1924 was principal botanist in charge of systematic agrostology He wrote *Manual of the Grasses of the United States* (1935)

Hitchcock, Alfred Joseph, 1899–, English moving-picture director He was a scenario writer, an art director, and a production manager before he began to direct in 1925 Hitchcock's brilliant technique in creating suspense is seen in such films as *The Lodger, Blackmail, The Thirty-nine Steps, The Lady Vanishes, Rebecca, Foreign Correspondent, Shadow of a Doubt,* and *Spellbound*

Hitchcock, Edward, 1793-1864, American geologist and educator, b Deerfield, Mass, grad Yale Theological Seminary, 1820 After serving (1821–25) as pastor of a Congregational church at Conway, Mass, he was professor of chemistry and natural history at Amherst (1825–54), president (1845–54), and professor of theology and geology until his death In 1830 he made a geological survey of Massachusetts (the first of its kind to be completed); he surveyed the Connecticut valley and was state geologist of Vermont (1857–61) His numerous works include *Elementary Geology* (1840), which went into 30 editions and was rewritten in 1860 with his son, **Charles Henry Hitchcock,** 1836–1919, b Amherst, Mass, grad Amherst College, 1856, He assisted his father on the Vermont survey He was state geologist of New Hampshire (1868–78) and professor of geology at Dartmouth (1868–1908). He made studies of fossil footprints in New England, compiled geological maps, and established a meteorological station on Mt Washington He wrote *Hawaii and Its Volcanoes* (1909) A brother of Charles, **Edward Hitchcock,** 1828–1911, b Amherst, grad. Amherst College, 1849, M D Harvard, 1853, was professor of physical education at Amherst from 1861 and acting president in 1898–99. He organized the department of physical education at Amherst and made significant studies in anthropometry

Hitchcock, Ethan Allen, 1835–1909, U S Secretary of the Interior (1898–1907), b. Mobile, Ala., educated in New Haven, Conn He was appointed minister to Russia in 1897, but was called into McKinley's cabinet the next year. Under McKinley and Theodore Roosevelt, Hitchcock prosecuted a vigorous program for the conservation of natural resources and for reclamation (see RECLAMATION, BUREAU OF) and reorganized the administration of Indian affairs

Hitchcock, Frank Harris, 1869–1935, U S Postmaster General (1909–13), b Amherst, Ohio, grad Harvard, 1891, and Columbian Univ (now George Washington Univ) law school, 1894 A lawyer of Washington, D C, he was chief of the division of foreign markets in the Dept of Agriculture (1897–1903), then, as a protégé of George B Cortelyou, chief clerk of the Dept of Commerce and Labor (1903–5) He served (1905–8) as Assistant Postmaster General In William Howard Taft's campaign in 1908, Hitchcock showed remarkable ability as a political manager As Postmaster General he organized the parcel post and the postal savings bank system and promoted the founding of the air mail A practicing lawyer in New York, he managed the preconvention campaign of Charles E Hughes in 1916 After 1928 he published a newspaper in Tucson, Ariz

Hitchcock, Gilbert Monell, 1859–1934, American newspaper publisher and political leader, b Omaha, Nebr, grad Univ of Michigan law school, 1881 He founded (1885) the Omaha *Evening World,* combined it (1889) with the *Morning Herald,* and was proprietor of the *World-Herald* until his death He was a supporter of William Jennings Bryan until in 1910 the two broke in a quarrel that shook Democratic politics He was a U S Representative (1903–5, 1907–11), and, as Senator (1911–23), he was notable for his strong support of Wilson's policies in the First World War Chairman of the Committee on Foreign Affairs, he stoutly defended the Treaty of Versailles in the losing fight in the Senate From 1919 to 1920 he was the Democratic leader in the Senate

Hitchcock, Lambert, 1795–1852, American chairmaker In the town of Barkhamsted, Conn, in 1818 Hitchcock established a factory, employees of which came to number about a hundred The village that the factory created was named Hitchcockville, in 1806 the name was changed to Riverton Hitchcock at first made parts of chairs and sold the parts to chairmakers Later he discontinued this business and manufactured complete chairs, which were sold throughout the United States The **Hitchcock chair** is characteristic of the time and has come to be sought by collectors They are a factory product, typically not carved or upholstered, and are painted black over red, often with designs stenciled in colors and bronze They are of good wood and are sturdily built The legs and rungs are simply and well turned The seats are of wood, cane, or rush The name of L Hitchcock or of a firm that he formed (Hitchcock, Alford & Company) is stenciled on the back edge of the seat Hitchcock chairs include rocking chairs, said to have been the first to be designed and made as rocking chairs, i e, not made by adding rockers to a chair first made without them See M R Moore, *Hitchcock Chairs* (1933)

Hitchcock, Thomas, Jr., 1900–1944, American polo player and aviator, b Aiken, S C, grad Harvard, 1922 Trained at polo at an early age by his parents, both of whom were outstanding polo players, Tommy Hitchcock played in his first tournament at the age of 13 In the First World War he joined the Lafayette Escadrille, distinguished himself in aerial combat, and became a hero after he was shot down behind the German lines and escaped to Switzerland Hitchcock's polo playing in 1921 won for the United States the International Polo Challenge Cup, and later he excelled in several international tournaments. Probably the outstanding polo player of all time, Hitchcock received from the U S Polo Association its highest polo rating, the 10-goal handicap, from 1922 until 1940 (except in 1935, when he received a 9-goal rating) In 1937 he became a partner in a prominent banking firm In the Second World War, Hitchcock was killed in an airplane crash in England while commanding a U. S. fighter-plane group

Hitchcock chair: see HITCHCOCK, LAMBERT

Hitler, Adolf (ä'dôlf hit'lur), 1889–1945?, German dictator, founder and leader of National Socialism. He was born at Braunau, a small town in Upper Austria near the German border, the son of Alois Hitler (1837–1903), an Austrian customs official. His father appears to have been the illegitimate son (later legitimized) of Maria Anna Schicklgruber, a peasant girl, and one Johann Georg Hiedler or Hitler, who married her several years after Alois's birth Contrary to widespread belief, Hitler's real name was not Schicklgruber. Hitler briefly took art courses in Munich and in 1907 moved to Vienna, where he was refused admission to the academy and where he spent years of utmost poverty and frustration. It was here that Hitler accumulated his grudge against society and fell under the influence of the anti-Semitic mayor, Karl LUEGER (without adopting Lueger's stout Catholicism) He left Vienna in 1913 and settled in Munich Throughout these years he lived partly on charity, partly on the meager proceeds obtained by selling water colors, by painting commercial posters, and by doing odd jobs. After the outbreak of the First World War he enlisted in the Bavarian army as a volunteer He never rose above the rank of corporal, but he received the Iron Cross, first class, for bravery in Flanders and later was gassed. After the armistice of Nov., 1918, Hitler returned to Munich. Resolved on a political career, he joined with several malcontent and nationalist veterans in the minuscule German Workers' party and in 1920 founded his own party with a handful of followers This was to blossom into the National Socialist German Workers' party (see NATIONAL SOCIALISM) Though his party grew slowly, Hitler won the support of many prominent nationalists, notably of Field Marshal LUDENDORFF, and he gathered strength by organizing an armed militia, the "storm troopers" Judging the time ripe for a coup d'état which, with the help of the army, was to bring all Germany under his power, he took advantage of a memorial celebration for the war dead to organize the so-called Munich "beer-hall putsch" of Nov 8–9, 1923 He counted on winning for his side the monarchist Bavarian premier, Gustav von Kahr, as well as the commander of the Reichswehr in Bavaria, Gen Otto von Lossow, and the commander of the Bavarian police, Hans von Seisser On Nov 8 his storm troopers made themselves masters of the Bürgerbrau Keller, a large beer hall, where Kahr and the other Bavarian leaders were addressing a political meeting Overwhelmed, Kahr, Lossow, and Seisser swore loyalty to the revolution, but as soon as they regained their freedom they proceeded to put down the putsch with the Reichswehr. The coup had failed, but on Nov 9 Ludendorff decided to stage a march. with 3,000 storm troopers, and to challenge the Reichswehr to join them or to fire at them Ludendorff and Hitler led the march Despite Ludendorff's prestige, the Reichswehr fired, 14 of Hitler's followers were killed and some (among them Hermann GÖRING) were wounded Hitler fled, but was soon arrested and sentenced to five years' confinement in the fortress of Landsberg He was released after 13 months, during which he wrote his political testament, *Mein Kampf* [my battle], the bible of National Socialism His comrade Rudolf HESS shared his imprisonment Hitler had been forgotten, and when he reentered politics on a nation-wide scale he was long considered a comical figure rather than a serious threat

The "Legal Revolution," 1932–33 The economic crisis that began in 1929 resulted in the spectacular growth of Hitler's party His demagogic appeal, ably exploited by his chief propagandist, Paul Joseph GOEBBELS, won over large segments of the working class and of the ruined bourgeoisie, while his promise to crush Communism (which was also on the rise) won him the financial support of such great industrialists as Fritz Thyssen and the banking house of Schroeder Lacking German citizenship, Hitler was not a member of the Reichstag, in which the National Socialists now were one of the major parties However, he decided to run in the presidential elections of 1932 and obtained German citizenship by a devious procedure the state of Brunswick appointed him as attaché to its legation in Berlin, an official post which conferred automatic citizenship in Brunswick and, thus, in Germany He lost the election, but polled a vote of 11,300,000 against the 18,600,000 votes cast for HINDENBURG. A second election was run off, Hindenburg having fallen short of the required majority, and Hitler increased his vote to 13,400,000 against Hindenburg's 19,300,000 Franz von PAPEN, the new chancellor, lifted the ban on Hitler's storm troops in June, 1932, and in the Reichstag elections (July) the National Socialists emerged as the largest party, with 230 seats Hitler, demanding all or nothing, refused, despite Hindenburg's request, to serve in Papen's cabinet. The Reichstag, being without a workable majority, was dissolved, in the new elections (Nov, 1932), the National Socialists lost 33 seats but remained the strongest party Hitler, unwilling to accept Hindenburg's conditions and unable to secure the support of the German National party, led by HUGENBERG, declined to accept the chancellorship, which passed to Kurt von SCHLEICHER Hitler's star seemed on the wane. Yet while his party was torn by internal struggles and while daily street fights were taking place between National Socialists and Communists, Hitler succeeded (Jan, 1933), in paralyzing the Schleicher cabinet with the help of the Communist members in the Reichstag Civil war seemed imminent. On Jan 28 Hindenburg, having refused Schleicher's request for emergency powers and accepted his resignation, called on Hitler to form a cabinet, which included Papen and Hugenberg. It was not as dictator that Hitler was appointed chancellor, but as the sole man capable

of commanding a parliamentary majority. That he was in no mood to cooperate for long with either the Reichstag or Hugenberg soon became obvious Confident of an electoral triumph, he dissolved the Reichstag and set new elections for March 5 On Feb 27 the REICHSTAG building was reported on fire Without any investigation Hitler immediately accused the Communists of the crime For weeks his brown-shirted storm troops had terrorized the country, and now a wave of anti-Communist hysteria swept Germany Yet, despite all intimidation, the National Socialists polled only 17,200,000 votes (44 percent of the total) The Social Democrats obtained 7,100,000 votes, the Communists, 4,800,000, the Catholic Center, 4,400,000, the German National party, 3,100,000 The outlawing of the Communist party gave Hitler a full majority An attempted Bavarian separatist coup was brutally put down (March 9–10), and on March 23 the Reichstag voted an enabling law which gave Hitler dictatorial powers Thus was the National Socialist "revolution" accomplished by "legal means" *The Third Reich* Hitler promised that the Third Reich, successor to the Holy Roman and Hohenzollern empires, would endure for 1,000 years Within the first two years of its existence (12 years in all), Hitler's power became absolute, the history of his actions was that of GERMANY His authority was largely based on terror, but he undoubtedly was supported by the vast majority of the German people Many former opponents or doubters became his enthusiastic followers as his bold decisions, beginning with the rearmament of Germany and culminating in the triumph of the MUNICH PACT, went unchallenged by the other powers In the single-slate Reichstag elections of Nov , 1933, more than 90 percent of the electorate approved the candidates and endorsed the withdrawal of Germany from the League of Nations In 1934, after Hindenburg's death, a majority of 88 percent voted for the union of the presidency and the chancellorship in the person of the Führer [leader] of the National Socialist party These electoral victories were undoubtedly bolstered by intimidation of the voters and by dishonest counting of the ballots, but outside the Catholic Church and a segment of the Lutheran Church, led by NIEMOELLER, there were few outspoken opponents of the Hitler regime within Germany Within his own party Hitler crushed all opposition in the "blood purge" of June, 1934 Goebbels's propaganda machine soon raised Hitler to a quasi-divinity *Heil Hitler!* became the obligatory form of greeting, and the Führer became the object of hysterical worship, the embodiment of the coming greatness of Germany and of the rule of the master race By 1936 he had fulfilled his promise to restore German military might, by 1938 he had made good a large part of his program for bringing all German-speaking people under the roof of the fatherland The alliance (see AXIS) with Italy gave Mussolini, till then considered Hitler's mentor, the part of a subordinate To Hitler's retreat at BERCHTESGADEN the leaders of Europe were flocking to hear his will (and, usually, their doom), while the whole world listened to his increasingly violent speeches over the radio in order to learn his fateful and capricious pronouncements Hitler's annexation (1939) of Bohemia and Moravia and his threats against Poland at last convinced the world of the futility of further appeasement In Aug , 1939, Hitler secured the neutrality of the USSR, which until then he had denounced as an archenemy of European civilization, he concluded the Russo-German nonaggression pact On Sept 1, 1939, he ordered the invasion of Poland, and the Second WORLD WAR began After the German triumphs of 1939–41, the war began to slow down without a prospect of early victory Trusting in a quick victory against Russia and in desperate need of Russian resources, Hitler launched his attack on the USSR in June, 1941. In December, he dismissed Gen Walther von Brauchitsch and assumed the personal command of the army. His "intuition" was responsible for the German disaster at STALINGRAD By July, 1944, the military situation was desperate, and a group of high military and civil officials (including Field Marshal Erwin von Witzleben and the mayor of Leipzig, Karl Goerdeler) put into execution a long-fomented plot to overthrow the Hitler regime. The bomb placed under Hitler's chair, however, failed to kill the Führer, who escaped with some injury and the loss of his trousers Heinrich HIMMLER, head of the German police, drowned the revolt in blood and assumed actual control of the government During the final German collapse in Jan – April, 1945, Hitler apparently suffered from a nervous breakdown, aggravated by the ministrations of his personal physician, a quack Denouncing his former collaborators as traitors, Hitler remained in Berlin when it was stormed by the Russians On April 29 he made his will and married his mistress, Eva Braun. On April 30, according to most reports, he and his wife committed suicide in an underground shelter of the chancellery building, and their gasoline-soaked bodies were burned beyond recognition. In one of his last acts he had appointed Admiral Doenitz as his successor. Neither Hitler's body nor Eva Braun's body could be identified, and it has been suggested that Hitler actually escaped into hiding (Wild rumors even designated his hiding place, S Argentina) Until proof to the contrary, however, his death may be accepted as a fact for all practical purposes It is doubtful that it will be possible for many years to take an unemotional view of Adolf Hitler. His insane hatred and his sadism were the gigantic outgrowths of the petty resentments of a petty man. His political and philosophical notions were the product of a half-tutored, pseudo-intellectual personality and a wild hodgepodge of borrowed and ill-digested ideas Long admired for his shrewdness, Hitler was a believer in astrology Even the myth of his saintly private life has been exploded by revelations after his death The hugeness of the crimes and cruelties perpetrated by, or on the order of, Hitler is almost inconceivable to the human mind Hitler's accomplishment in the end was almost exclusively destructive, and it was his destructive spirit that made him drag his own nation into his personal ruin The primary source for study of Hitler's personality remains his own *Mein Kampf* (complete Eng tr by John Chamberlain and others, 1940) See Konrad Heiden, *Der Führer* (Eng tr , 1944), which, though it does not cover Hitler's last years, is the most authoritative biography

Hitopadesa see SANSKRIT LITERATURE

Hittites (hĭ'tīts), ancient people of Asia Minor and Syria, who flourished from 2000 B C to 1200 B C Their chief center was at the modern Boghazkeui, where the chief archaeological finds have been made Relics of the Hittites have been found in other parts of Asia Minor The artistic work of the Hittites, as in reliefs, round sculptures, and seals, shows a high state of talent and considerable Babylonian and Assyrian influence A great number of inscriptions have been uncovered in the Hittite area, these are for the most part in cuneiforms Besides the Babylonian inscriptions, there are many in Hittite or Kanesian The Hittite language is Indo-European in relationship (see LANGUAGE, table) There are several other languages meagerly represented in the Hittite archives the so-called Luish (similar to Hittite), Khattish, and Khurrish (both non-Indo-European and apparently unrelated to one another) There is also a hieroglyphic alphabet (or syllabary) liberally represented, this largely undeciphered script is also Hittite, according to Friedrich Hrozny, the chief authority on Hittite The recurrence of the language and the mention of corresponding peoples have led to the supposition that c 2000 B C a people of Indo-European connection (Hittites) entered Cappadocia and ousted the Mesopotamian rulers To the southwest (in the Taurus and Cilicia) were the Lutes, relatives of the Hittites, to the southeast (in the upper Euphrates), the Khurrites In the country the Hittites now occupied, the aboriginal inhabitants were apparently the Khatti, and the later empire was called the land of the Khatti or Hatti From Babylonian, Assyrian, and Egyptian sources some outstanding facts of Hittite history are gained About 1800 B C the Hittites ruled an empire centering in Cappadocia, their chief opponents being the Syrians (probably of Indo-European connection) who overthrew the dynasty of Hammurabi From 1400 B C the Hittite empire was the chief power and cultural force in W Asia, and c 1290 B C the Hittites came into battle with RAMSES II himself, at Kadesh on the Orontes Ramses II married a Hittite princess The Hittite empire was at best a loose confederation which broke up under the invasions of the Thracians, Phrygians, and Assyrians in the late 12th cent B C Several small states arose, of which CARCHEMISH became an outstanding city Among the chief Hittite rulers were Mursilish I (fl 1750 B C), Tuakhalijash II (fl 1500? B C), Supiluhumash (fl 1380 B C), Mursilish II (fl 1335 B C), and Hattusilish (fl 1300 B C) The civilization of the Hittites clearly had many foreign elements, notably from Mesopotamia, this is especially visible in the religion and mythology, which were remarkably eclectic The Hittite pantheism borrowed most of its concepts from Babylonian, Assyrian, and Khurrish sources The Hittite law codes are interesting, partly because they are to some extent independent of the Babylonians See D G Hogarth, *Hittite Seals* (1920) and *Kings of the Hittites* (1926), D G Hogarth and C L Wooley, *Carchemish* (1921), A E Cowley, *The Hittites* (1920), John Garstang, *The Land of the Hittites* (1910), E H Sturtevant, *Comparative Grammar of Hittite* (1933), the numerous works in French and German of Friedrich Hrozny

Hittorff, Jacques Ignace (hĭ'tôrf, Fr shäk' ēnyäs' ētôrf'), 1792–1867, French architect He became a leading exponent of the classic revival in France, and his chief work is the Neo-Greek Church of St. Vincent de Paul, in Paris, which he built (1824–44) with his father-in-law, J. B Lepère He was appointed (1833) architect for the embellishments in Paris of the Place de l'Étoile, the Champs Élysées, and the Place de la Concorde For the last he designed the fountains, the locations of the sculptures of the cities of France, and the pedestal for the obelisk He also designed the column in the Place Vendôme and other civic adornments A pioneer in the study of the color ornament used in ancient Greek buildings, he published *Restitution du temple d'Empédocle à Sélinonte, ou, L'Architecture polychrome chez les Grecs* (1851)

Hiva Oa (hē'vä ō'ä) or **Hivaoa**, volcanic island (pop 847), S Pacific, second in size but most important of the MARQUESAS ISLANDS. It is the seat of Atuona, capital of the Marquesas Islands dist The island, formerly called Dominica, has a circumference of c 60 mi The Bay of Traitors, protected by ridges 3,000 ft high, provides a good harbor The chief export is copra

hives or **urticaria**, skin eruption characterised by the formation of raised areas (wheals) which burn and itch The elevations are white in the center, surrounded by a halolike border of red It is thought that urticaria results from an antigen-antibody reaction (allergy) and that a substance (histamine) is released which dilates the arterioles and affects the permeability of the capillary walls, thus releasing serum and resulting in edema and the formation of a wheal Among the many causes of urticaria are bacterial infections, malaria, tapeworm, insect bites, foods and drugs When the condition is correctly diagnosed, treatment consists of removing or avoiding the cause The injection of epinephrine, the oral use of benadryl or pyribenzamine, or the external application of calamine lotion may give temporary relief

Hivites (hī'–), peaceful tribe probably living in the vicinity of Jerusalem They were crushed in the Hebrew occupation Gen 10 17, Ex 3 8,17, Joshua 9 1,7 11 3,19, 2 Sam 24 7

Hizkiah (hĭzkī'ä) [Heb , variant of HEZEKIAH], ancestor of Zephaniah Zeph 1 1

Hizkijah (hĭzkī'jə) [Heb , variant of HEZEKIAH], one who returned from captivity to Palestine Neh 10 17 Hezekiah Ezra 2 16, Neh 7 21

Hjalmaren, Swed *Hjälmaren* (yĕl'märən), lake, 190 sq mi , central Sweden It is drained into Malaren Lake past the city of Eskilstuna and connects with Arboga by an 8-mile canal

Hjorring, Dan *Hjørring* (both yûr'ĭng), city (pop 13,346), N Jutland, Denmark The center of an agricultural district, it also has textile mills and machine shops Hjorring dates from the 12th cent

Hjort, Johan (yōhän' yôrt'), 1869-1948, Norwegian oceanographer and biologist, an authority on fisheries He was director of fisheries in Norway (1900–17) and professor at the Univ of Oslo (1921-39) His works include *The Depths of the Oceans* (with Sir John Murray, 1912) and *The Human Value of Biology* (1938)

Ho, chemical symbol of the element HOLMIUM

Hoadley, David (hōd'lē), American architect, 1774-1839, b Waterbury, Conn He began as a house carpenter, and his natural talent turned him to designing without any specialized training He was the architect for many houses and churches in Waterbury and New Haven, some of which are preserved His most famous work is the United Church (1814–15) in New Haven, the entrance to the mansion (c 1802) for Judge William Bristol is in the Metropolitan Museum and shows a masterly grasp of classical principles

Hoadly, Benjamin (hōd'lē), 1676–1761, English prelate, center of the BANGORIAN CONTROVERSY He was a leader in the Low Church group of the Church of England In 1715 he became bishop of Bangor and chaplain to George I His pamphlet, *A Preservative against the Principles and Practices of Non-Jurors* (1716), and especially his sermon (1717) before the king on the text "My kingdom is not of this world," in which he maintained that Christ had not delegated authority to ecclesiastics, started the Bangorian Controversy Some 200 pamphlets were published, the ablest replies to Hoadly were those of William LAW Hoadly was translated to Hereford (1721), to Salisbury (1723), and to Winchester (1734)

Hoan, Daniel Webster (hōn), 1881–, American public official, Socialist mayor of Milwaukee (1916–40), b Waukesha, Wis grad Univ of Wisconsin, 1905 He became a Milwaukee lawyer and, as attorney for the state federation of labor, was influential in the successful fight for the first state workmen's compensation act in the United States He was city attorney (1910–16) before serving as mayor at the head of an efficient administration He was afterward an official in the Office of Civilian Defense in the Second World War He wrote *City Management* (1936)

Hoangho see YELLOW RIVER

Hoar, Ebenezer Rockwood, 1816–95, American lawyer, U S Attorney General (1869–70), b. Concord, Mass , grad Harvard (B A , 1835, LL B., 1839). While serving (1846) in the Massachusetts senate, he declared that he would rather be a "Conscience Whig" than a "Cotton Whig," thus originating an antislavery slogan Hoar, a judge of the court of common pleas (1849–55) and an associate justice of the Massachusetts supreme court (1859–69), was appointed U S Attorney General by President Ulysses S Grant A man of wit, learning, intellectual power, and integrity, he was one of Grant's few

excellent appointments. The President, early in 1870, nominated him as an Associate Justice of the U S Supreme Court, but the Senate, hostile to Hoar because he had insisted on filling nine new judgeships in the Federal circuit courts with able, experienced men rather than with the political hacks sponsored by Senators, rejected the nomination. Some of them used the excuse that Grant and Hoar had already packed the Supreme Court in order to obtain a reversal of the decision on legal tender Grant, seeking Senate support for his pet project to annex Santo Domingo, in June, 1870, abruptly requested Hoar's resignation as Attorney General In 1871 Hoar was one of the five U S commissioners in negotiating with Britain the Treaty of Washington providing for settlement of the *Alabama* claims, and in 1873–75 he served in Congress, along with his brother, George F. Hoar See biography by Moorfield Story and E W Emerson (1911)

Hoar, George Frisbie, 1826–1904, American statesman, b Concord, Mass , grad Harvard, 1846, and Harvard Law School, 1849 He practiced law at Worcester, Mass , became a Republican in politics, and was U S Representative (1869–77) and U S Senator (1877–1904) He fought political corruption and avoided much of the partisan bitterness of the day Hoar was a leader among those New Englanders who opposed the McKinley expansionist policy His *Autobiography of Seventy Years* (2 vols , 1903) is an excellent commentary on American political history See biography by F H Gillett (1934)

Hoare, Samuel. see TEMPLEWOOD, SAMUEL JOHN GURNEY HOARE, 1ST VISCOUNT

hoarfrost · see FROST

hoarseness, harsh quality of the voice Causes include inflammation of the vocal cords or associated structures, excessive use of the voice, pressure on the laryngeal nerves, e g , by a tumor or goiter, functional disturbances of the vocal cords, singer's node (a small growth on the vocal cords), and diseases of the larynx, e g , tuberculosis or cancer Treatment depends upon the cause

Hobab (hō'băb) [Heb ,=beloved] see JETHRO

Hobah (hō'bu) [Heb ,=hiding place], place, not certainly identified, to which Chedorlaomer fled Gen 14 15

Hoban, James (hō'bŭ), c 1762–1831, American architect, b Ireland, educated in Dublin He settled at Charleston, S C before the Revolution There he designed the South Carolina statehouse (1786–91), which was later burned He moved to Washington, D C , in 1792 and won the competition for the design of a mansion for the President, later called the White House He built this in 1792–99 and rebuilt it after its burning by the British in 1814. He was one of the supervising architects who served at the Capitol in the execution of Dr William Thornton's design and he worked upon public buildings, in the employ of the government, for more than 25 years

Hobart, Garret Augustus (hō'burt), 1844–99, Vice President of the United States (1897–99), b Long Branch, N J , grad Rutgers College, 1863 A lawyer, he was prominent in New Jersey Republican politics for many years Elected Vice President on the ticket with McKinley, he died in office

Hobart (hō'burt, hō'bûrt), city (pop 56,668, metropolitan pop 76,567), capital and principal port of Tasmania, Australia, on the west shore of the Derwent estuary at the foot of Mt Wellington (4,166 ft high) A bridge (1941) links the city with its eastern suburbs Hobart is the seat of the Univ of Tasmania and of Roman Catholic and Anglican cathedrals It was founded in 1804 and named for the British colonial secretary There are woolen mills, meat-packing plants, fruit canneries, and a zinc refinery

Hobart (hō'burt) 1 City (pop 7,166), NW Ind , SE of Chicago near Gary, settled c 1849, inc 1921 It is a business and industrial center 2 City (pop 5,177), co seat of Kiowa co , SW Okla , N of the Wichita Mts , settled c 1901 It is in a diversified farm area producing also some oil

Hobart College see COLLEGES OF THE SENECA, THE

Hobbema, Meindert (mīn'dûrt hō'bumä), 1638–1709, great Dutch landscape painter, second only to his contemporary Jacob van Ruisdael, with whom he probably studied Little is known of Hobbema's life Most of it was spent in a poor district of Amsterdam, where he died a pauper Although such noted contemporaries as Van de Velde and Berchem are said to have painted some of the figures in his pictures, Hobbema seems to have been little appreciated in his day, and his pictures sold for trifling sums even a century after they were painted Nevertheless he is now recognized as one of the greatest of landscape painters While lacking Ruisdael's scope and imagination, Hobbema equals him in draughtsmanship, bold execution, and color His scenes are full of life and luminosity and loving observation of nature He painted chiefly woodland scenes, country villages, water mills, and kindred subjects in a style at once bold and painstaking, his great mastery of detail never detracting from the general effect of his large and vigorous compositions Much of his work is in England, where it received perhaps the earliest and warmest recognition. Its influence on the later English landscapists was great Among his famous works are *Avenue, Middelharnis* (National Gall , London), *The Mill* (Louvre), *Water Mill* (Rijks Mus), and *Entrance to a Village* (Metropolitan Mus) The National Gallery, London, has the best collection of his work, but splendid examples exist in many American collections, notably the Frick, New York, and those of the Metropolitan Museum, the Art Institute of Chicago, and the National Gallery of Art, Washington, D C See study by Georges Broulhiet (1938, in French).

Hobbes, John Oliver. see CRAIGIE, PEARL

Hobbes, Thomas (hŏbz), 1588–1679, English philosopher, grad Magdalen College, Oxford, 1608. For many years a tutor in the Cavendish family and briefly the instructor of Prince Charles, Hobbes took great interest in mathematics, physics, and the current rationalism In 1640, after his political writings had brought him into disfavor with the parliamentarians, he went to France There he had rich association with French intellectuals, including Gassend His work, however, aroused the antagonism of the English group in France, and his thorough materialism offended the churchmen, so that in 1651 he felt impelled to return to England, where he was able to live peacefully Among his important works, which appeared in several revisions under differing titles (see Sir W Molesworth's edition of the complete works, 11 vols , 1839–45), are *De Cive* (1642), *Leviathan* (1651), *De Corpore Politico* (1650), *De Homine* (1658), and *Behemoth* (1680) In the *Leviathan*, Hobbes developed his political philosophy He argued mechanistically that life is simply the motions of the organism and that man is by nature a selfishly individualistic animal at constant war with all other men In a state of nature, men are equal in their self-seeking and live out lives which are "nasty, brutish, and short " To escape the natural anarchy, men contract with each other to surrender their selfish rights and secure peace in a created state When men create the state they form a compact among themselves to submit absolutely to the sovereign, who is outside of the agreement and whose only obligation to the people is to protect them Failing this obligation, the sovereign is liable to legitimate opposition Temporal power is always superior to ecclesiastical power, Hobbes strongly attacked the Roman Catholic Church It should be noted that the power of the sovereign derived originally from the people, a subtle challenge to the doctrine of divine right of kings Further, the right of citizens to revolt was implicitly recognized, and the logic of Hobbes's position could apply equally well to king or parliament He argued that the sovereign must support truth and freedom of thought, since these promoted peace In psychology Hobbes was a strict sensationalist and forerunner of the associationist theory He strongly influenced English philosophy in the direction of mechanical interpretations of human development, and he was the first of the great English political theorists See biographies by A E Taylor (1908) and John Laird (1934), Leo Strauss, *The Political Philosophy of Hobbes* (1936), Clarence De Witt Thorpe, *The Aesthetic Theory of Thomas Hobbes* (1940)

hobblebush or American wayfaring tree, a VIBURNUM (*Viburnum alnifolium*) of E North America, with long straggling branches which often root at the tip, whence the name The heart-shaped leaves are colorful in the fall The flat-topped clusters of small white flowers are edged with larger sterile flowers Birds are fond of the edible berrylike fruits that turn from red to purple or black There is an Old World species (*Viburnum lantana*) called wayfaring tree that is similar but lacks the larger marginal flowers

Hobbs, city (pop 10,619), SE N Mex , near the Texas line, founded 1907, inc 1929 The city is a trade center for an oil, livestock, and farm area, the discovery of rich oil fields in the region in 1927 made it a headquarters for oil-well supplies and brought the railroad in 1930.

hobgoblin, FAIRY creature, generally the same as GOBLIN He is identified at times with ROBIN GOODFELLOW

Hobhouse, Leonard Trelawney, 1864–1929, English philosopher, sociologist, and journalist, studied at Oxford He later taught at Oxford and at the Univ. of London He tried to show, with evidence from anthropology and comparative psychology, that biological evolution and spiritual evolution were concurrent His books include *The Theory of Knowledge* (1896), *Morals in Evolution* (2 vols , 1906), and *Social Development* (1924) See J A. Hobson and Morris Ginsberg, *L. T Hobhouse His Life and Work* (1931)

Hobkirks Hill, battle of: see CAROLINA CAMPAIGN.

hobo. see VAGRANCY

Hoboken (hō'bōkun), town (pop 31,770), Antwerp prov , N Belgium, on the Scheldt (Escaut) Forming part of greater Antwerp, it has shipyards, copper, tin, and silver refineries, and wool-processing plants

Hoboken (hō'bōkun, hō'bŭkŭn), city (pop. 50,115), NE N J., on the Hudson opposite lower Manhattan, with which it is connected by ferry and by subway under the river. It is a commercial and industrial center and an ocean port Food products are packed A brewery was built as early as 1642 The Dutch traded with the Indians and farmed here from c 1630 Stuyvesant procured deeds to the land from the Indians in 1658, in 1711 it passed to a New York merchant, Samuel Bayard His Tory descendant, William Bayard, had possession when the land was confiscated in the Revolution John STEVENS bought the site in 1784, established his home at Castle Point, and laid out the town in 1804 It became a city in 1855 Stevens operated between New York and Hoboken the first steam ferry (1811) He built (1824) and ran on his estate the first locomotive to pull a train on tracks The John Jacob Astor home (1828) was a gathering place for authors, including Fitz-Greene Halleck, Washington Irving, and William Cullen Bryant Bryant, Sands, and Verplanck edited the *Talisman* in Hoboken The STEVENS INSTITUTE OF TECHNOLOGY is here

Hobson, John Atkinson (hŏb'sun), 1858–1940, English economist and journalist He achieved wide popularity as a lecturer in university extension classes for workingmen and as a writer on economic and social problems Criticizing the concepts of classical "pure" economics, especially Alfred Marshall's work, he held that economic theory was bound with the ethical problems of social welfare and should be a guide to reform He advocated partial socialization, but was never a thoroughgoing socialist His many books include *The Evolution of Modern Capitalism* (1894), *The Economics of Distribution* (1900), *Imperialism* (1902), *Work and Wealth* (1914), *The Economics of Unemployment* (1922), and the autobiographical *Confessions of an Economic Heretic* (1938)

Hobson, Richmond Pearson, 1870–1937, American naval officer, b Greensboro, Ala , grad Annapolis, 1889 He first gained notice by his effort to sink the collier *Merrimac* to block the harbor of Santiago in the Spanish-American War He resigned from the navy and was a U S Representative for Alabama (1905–15) Subsequently he wrote and lectured in the prohibition cause He also advocated naval expansion

Hoccleve or **Occleve, Thomas** (hŏk'lēv, ŏk'–), c 1368–c 1450, English poet, of the Chaucerian tradition His chief work is *The Regiment of Princes*, a didactic poem addressed to Henry, prince of Wales (later King Henry V) He caused to be painted in one of his manuscripts the most authentic extant portrait of Chaucer

Hoche, Lazare (läz.u'zōsh'), 1768–97, French general in the French Revolutionary Wars He fought under DUMOURIEZ, and when Dumouriez deserted (1793), Hoche was briefly arrested on suspicion of treason Later he was given command on the Rhine and the Moselle Again accused of treason—by Pichegru—Hoche was in prison from March, 1794, until the fall of Robespierre in July, 1794, when he was given the command in the VENDÉE He pacified that province His attempted invasion of Ireland (1796) was thwarted by bad weather After defeating the Austrians at Neuwied (1797), he was for a time minister of war

Hochelaga (hō"shulä'gu, –la'gu), former Indian village, Canada, discovered by Jacques Cartier on his second voyage (1535) It was situated at the foot of Mt Royal in what is today the central part of the city of Montreal The town was the capital of the Hochelagan people (of Iroquoian stock probably), the chief inhabitants of the St Lawrence valley Recent excavations in Montreal have unearthed old hearths, kitchen middens, and burial places of the ancient village

Ho Chi-minh (hō' chē-mīn'), 1890?–, Indo-Chinese revolutionary leader After several years' residence in France, he spent two years in Moscow (1925–27) He later returned to Asia and was active in organizing Communist and nationalist revolutionary movements among Annamese outside of Indo-China, where he sent agents In 1941 he emerged as the organizer and leader of the Viet Minh (the League for the Independence of Viet Nam), and in 1945 he headed the VIET NAM provisional government In 1946 open warfare broke out between France and the regime of which Ho was the dominant figure Despite Ho's Communist affiliations his policy is stated primarily in terms of aspirations for independence and improved economic conditions

Hochkirch (hōkh'kirkh), village, Saxony, E Germany, near Bautzen Here in 1758 the Austrians under Daun defeated Frederick II of Prussia

Höchst (hûkhst, hûkst), suburb (pop 51,452) of Frankfurt, Hesse, W Germany. It is the seat of the I G. Farben chemical industry, which has large plants here Here, in the Thirty Years War, Tilly defeated (1622) Christian of Brunswick

Höchstädt (hûkh'shtĕt), village, W Bavaria, on the Danube The battle of BLENHEIM (1704) took place near by In 1800 the French under Moreau defeated the Austrians at Höchstädt

hock: see WINE.

hockey, game played on a field or on ice. Field hockey was played in England for several cen-

turies, and after it was standardized by the Wimbledon Hockey Club (organized 1883), it spread to other European countries The game has been played since 1890 in the United States and since 1901 has been a popular sport, especially among college girls In 1922 the U S Field Hockey Association was formed as the ruling body of the game It is played on a level field, measuring 50 to 60 yd by 90 to 100 yd , by two teams of 11 players each (five forwards, three halfbacks, two fullbacks, and a goalkeeper) A face-off in the center of the field starts the game Teams direct their play toward advancing the ball (made of cork and twine, covered with white leather, and about 9 in in circumference) down the field with their sticks (wooden and with a flat head which has rounded edges) A point is scored by delivering the ball past the goalkeeper through the goal posts, which are 7 ft high, 12 ft apart, and enclosed behind by nets Illegal use of the stick and roughness are penalized by temporarily relegating a player to the penalty corner (See Anne B Townsend, *Field Hockey*, 1936) Ice hockey, although played on similar principles, is a far faster and more rugged game, which has received more popular acclaim than field hockey Ice hockey, played exclusively by men, originated in Canada and probably was standardized by students of McGill Univ in the 1870s The first ice-hockey league was formed (1885) in Kingston, Ont The game spread throughout Canada and became a popular sport in the NE United States The first professional hockey league was founded (1903) in Michigan, and after the National Hockey League (1908) and the Pacific Coast Hockey League (1911) were organized, postseason play-offs for the Stanley Cup began (1912) Since 1926 the cup-winning team has been decided by play-offs among the four leading teams of the National Hockey League This league, reorganized in 1917 with four Canadian teams, was further reorganized in 1926 to consist of 10 Canadian and American teams in two divisions The number of teams, however, was reduced by 1941 to 6—the Boston Bruins, the Chicago Black Hawks, the Detroit Red Wings, the Montreal Canadiens, the New York Rangers, and the Toronto Maple Leafs Amateur hockey, like professional hockey, has progressively gained in popularity Several amateur hockey leagues were in existence in Canada early in the 20th cent , and in the United States the first important amateur league was started in 1913 The Pacific Coast League (1944) and the Eastern League (1945) are styled amateur Colleges and high schools in Canada and the N United States also play ice hockey, which spread to European countries after 1910 The game is played on a regulation ice rink which should be 200 ft long and 85 ft wide, but the measurements vary from rink to rink Six players—a goalie, a center, two defense men, and two forwards—all of whom are on ice skates, make up a team The rink is surrounded on all sides by walls between 3½ ft and 4 ft high The goal nets (4 ft high and 6 ft wide) are set 10 ft out from each end of the rink, which is divided by colored lines under the ice into three equal zones (attacking, neutral, and defending), each 60 ft long A vulcanized rubber puck, 1 in thick and 3 in in circumference, is used, and the weight, size, and shape of ice-hockey sticks are standardized After the face-off, teams concentrate on defending their own goals or, when in possession of the puck, on hitting this disk into the attacking zone and from there maneuvering advantageously in order to hit it past the obstructing goalie and the red line between the goal posts into the nets Each goal counts a point The game is divided into three 20-minute periods, overtime periods in case of ties are only used in Stanley Cup play-off games In this swift and body-bruising game players use heavy protective equipment, and unlimited substitution is allowed A player detected by the referee in roughing, tripping, high-sticking, or other violations is removed from the game to the penalty box for two minutes (a minor penalty) or more (major penalties), and his team must continue play short-handed A linesman, goal judges, timekeeper, and scorer also officiate in ice hockey Among the famous names past and present in professional ice hockey (almost all are Canadian) are Sydney Abel, Hobey Baker, Douglas and Max Bentley, Frank and George Boucher, Frank Brimsek, William ("Turk") Broda, Aubrey ("Dit") Clapper, Sprague Cleghorn, Neil Coville, Charles and Lionel Conacher, William Duman, Ivan ("Ching") Johnson, Edgar Laprade, Howie Morenz, Lester and Lynn Patrick, Charles Rayner, Maurice Richard, Arthur Ross, Milton Schmidt, Eddie Shore, and Georges Vezina See T K Fischer, *Ice Hockey* (1926), Mervyn Dutton, *The Fastest Game on Earth* (1938), E J Jeremiah, *Ice Hockey* (1942)

Hocking, William Ernest, 1873–, American idealist philosopher, b Cleveland, grad. Harvard (B A , 1901; Ph.D , 1904). He was professor of philosophy at Harvard from 1914 until his retirement in 1943 His writings, which emphasize in particular the religious aspects of philosophy, include *The Meaning of God in Human Experience* (1912), *Man and the State* (1926), *The Lasting Elements of Individualism* (1937), *Science and the Idea of God* (1944), and *Preface to Philosophy* (1947)

Hod [Heb., =splendor], Asherite 1 Chron. 7.37.

Hodaiah (hōdā'yu) [Heb , =Hodaviah], descendant of David 1 Chron 3 24.

Hodaviah (hōduvī'u) [Heb , =splendor of God] 1 Chief Manassite 1 Chron 5 24 **2** Benjamite 1 Chron 9.7 **3** Levitical family Ezra 2 40 Hodevah Neh 7 43 Judah Ezra 3 9

Hoddesdon (hŏdz'dŭn), urban district (1931 pop 6,811, 1943 estimated pop 12,500), Hertfordshire, England, N of London It was once noted as a coach stop and in Izaak Walton's time as a fishing resort

Hodeida (hōdā'du), city (pop c 50,000), Yemen, a port on the Red Sea The mixed population includes Arabs, African Negroes, and Indians. Among the exports are hides and coffee

Hodesh (hō'-) [Heb , =new moon], wife of Shaharaim 1 Chron 8 9

Hodevah (hōdē'vu), the same as HODAVIAH **3.**

Hodgdon, rural town (pop 1,076), E Maine, near the N B line S of Houlton, inc 1832

Hodge, Charles, 1797–1878, American theologian, b Philadelphia He was associated with Princeton Theological Seminary, where, after graduation, he taught first Oriental and biblical literature and later theology for 58 years His chief work is his *Systematic Theology* (3 vols , 1872–73) He also wrote *The Constitutional History of the Presbyterian Church in the United States of America* (1839–40), *Discussions of Church Polity* (1878), and several widely used volumes of commentaries and contributed the equivalent of many volumes to the *Princeton Review*, which he founded and edited for over 40 years His biography was written (1880) by his son **Archibald Alexander Hodge,** 1823–86, who succeeded to his place at the seminary

Hodge, Frederick Webb, 1864–, American anthropologist, b Plymouth, England He came to the United States at the age of seven He entered the field of archaeology through service (1884–86) in the Southwest with the U S Geological Survey and as secretary (1886–89) to the Hemenway Archaeological Expedition He became associated with the Bureau of Ethnology in 1889, led many of its expeditions in the Southwest, edited its *Handbook of the American Indian* (2 vols , 1907–10), and was ethnologist (1910–18) in charge of the bureau After serving with the Museum of the American Indian (Heye Foundation), New York city, from 1918 to 1931, he became (1931) director of the Southwest Museum, Los Angeles He wrote many monographs and scientific papers and edited *The American Anthropologist* (1899–1910, 1912–14) and many historical source narratives relating to the Southwest

Hodge, village (pop 1,445), N La , SSW of Ruston It is built around a large paper mill

Hodgenville (hŏj'nvĭl), town (pop 1,348), co seat of Larue co , central Ky , S of Louisville and near the Nolin river, settled 1789 It is in a farm area which also has limestone quarries and gas wells Near by is Abraham Lincoln National Historical Park (116 5 acres, est 1939), containing the log cabin in which Lincoln is said to have been born

Hodges, George, 1856–1919, Protestant Episcopal clergyman While at Calvary Church, Pittsburgh (1881–94) he attracted attention by the quality of his preaching He was an early exponent of the "social gospel" and founder of Kingsley House and other philanthropic agencies in Pittsburgh From 1894 until his death he was dean of the Episcopal Theological School, Cambridge, Mass He was the author of many books and articles See biography by Julia Shelley Hodges (1926)

Hodgson, Ralph (hŏj'sun), 1872?–, English poet The facts of his life are obscure, but he taught at the university in Sendai, Japan, in 1924 and 1928 His first book, *The Last Blackbird and Other Lines* (1907), was followed in 1917 by his collected *Poems* He treats his subject matter, nature, lyrically and simply His long silence was broken in 1941 with *Silver Wedding and Other Poems* and in 1942 by *Muse & the Mastiff*, both slim volumes "Eve," one of the most highly acclaimed poems of its time, is only slightly better known than "The Bull" and the short catch, "Time, You Old Gypsy Man "

Hodgson, Shadworth Hollway 1832–1912, English philosopher In 1880 he helped found the Aristotelian Society in London and until 1894 was its president His works include *Time and Space* (1865), *The Philosophy of Reflection* (1878), and *The Metaphysic of Experience* (1898), which contains a full exposition of his philosophy

Hodiah (–dī'ù) [Heb , =splendor of God], name in an obscure passage. 1 Chron 4 19.

Hodijah (–dī'jù) [Heb , =Hodiah] 1 Levite in the return from the Exile Neh. 8.7; 9.5, 10 10 **2, 3** Sealers of the covenant. Neh. 10 13,18

Hodler, Ferdinand (hōd'lùr), 1853–1918, Swiss painter and lithographer. After 30 years' hard struggle he gained a high reputation. His painting is characterized by simplicity, clarity, and vigor His notable works include *La Nuit, La Vérité, Cortège des lutteurs,* and *L'Amour* The best collection is in the art museum of Zurich

Hodmezovasarhely, Hung *Hódmezővásárhely* (hōd'-mĕzûvă"shărhă), agricultural city (pop 61,776), S Hungary, near the Tisza river and NE of Szeged A typical Hungarian "peasant city," it occupies 294 sq. mi.

Hoe, Richard March (hō), 1812–86, American inventor and manufacturer of printing presses, b. New York city. The eldest son of the founder of R. Hoe & Company, he entered his father's press manufacturing business at 15 years and directed or helped direct its affairs for 56 years. He was the chief inventor of the family, and his improvements on the cylinder press invented by Napier soon made his company the leading makers of cylinder presses in the United States He designed and manufactured the first flat bed and cylinder press to be used in the United States. In 1846 and 1847 he designed the first Hoe rotary press, based on his inventions for securely fastening the type to a large central cylinder around which a number of impression cylinders revolved This quadrupled the speed of printing, and these presses dominated the market for 20 years or until the press invented by William A Bullock, which first printed both sides and fed from a continuous roll of paper, replaced it Hoe turned to the manufacture of similar presses and, with his mechanics, devised the triangular folder to fold the papers as they came from the press, which completed the evolution of the main features of the modern printing press See Robert Hoe, *A Short History of the Printing Press* (1902)

Hoe, Robert, 1839–1909, American manufacturer of printing presses and book collector, grandson of the founder of the firm R Hoe & Company He entered the firm at 17 and became its head in 1886, succeeding Richard March Hoe Under his guidance inventions and improvements were made which enabled the firm to retain its lead in its field and by its double-supplement, quadruple, and sextuple presses increase the speed of newspaper production many times. He similarly improved presses for periodicals, did pioneer work with color presses, and developed web presses for half-tone work He wrote *A Short History of the Printing Press,* founded the Grolier Club, and collected one of the largest and finest private libraries of rare books in the country, catalogued in eight volumes (1911–12)

hoe, usually a flat blade, variously shaped, set in a long handle and used for weeding and for loosening the soil It was the first distinctly agricultural implement The spade (first in the form of the digging stick) is older than agriculture and is much used outside that occupation The gathering of wild foods, as by hunting and fishing, is done in different places at different times in the year, but agriculture encourages fixed habitations This fact gave the hoe a chief part in a fundamental revolution in the life of mankind—the establishment of permanent communities (in the Neolithic period) The earliest hoes were forked sticks The pick is a variety of the same implement Antlers of animals have been used as hoes, and hoes have been made by fastening suitable shells to sticks The hoe shared in man's progress in the use of wrought stone, copper, bronze, iron, and steel When the blade became good enough, a variety of the hoe—the adz—was used for working wood, which was often charred to make the adz more efficient The PLOW (an invention of the Bronze Age) is another development of the hoe The use of the hoe has continued It symbolizes agriculture, as do the plow and the sickle Edwin Markham's poem, "The Man with the Hoe," interprets exploitation of agriculture, from which mechanized farming has not been wholly free The use of the hoe as a means of bringing plenty to households and communities has been associated with festivals All the staple farm crops were domesticated with the hoe That a high civilization can be sustained by the hoe was shown by pre-Columbian America. See H J Peake, *Early Steps in Human Progress* (1933), R U Sayce, *Primitive Arts and Crafts* (1933)

Hoefnagel, Joris (yō'rĭs hōō'nagl), 1542?–1600?, Flemish miniature painter and illustrator He traveled and sketched extensively, spent eight years in the service of the elector of Bavaria at Munich, was employed by Emperor Rudolph II at Prague, and finally settled in Vienna Hoefnagel's talent as a draughtsman is evidenced by his illustrations for the *Civitates orbis terrarum* of G Braun and F. Hogenberg He is best known, however, for his miniatures, most celebrated of which are a view of Seville (Brussels) and his masterpiece, a Roman missal (imperial library, Vienna)

Hoek van Holland, Netherlands see HOOK OF HOLLAND

Hoel, Sigurd (sē'gōōr hō'ul), 1890–, Norwegian novelist and critic He is the author of witty, sophisticated novels as well as sensitive stories of childhood His translations of English and American writers include novels by William Faulkner and Erskine Caldwell. His own novels include *Sinners in Summertime* (1927, Eng. tr , 1930) and *One Day in October* (1931, Eng tr , 1932).

Hof (hōf), city (pop 54,645), Upper Franconia, NE Bavaria, near the Czech border. It has textile and other manufactures. Founded in the 13th cent ,

the city passed (1373) to the Hohensollern and (1810) to Bavaria. An important rail center, Hof was repeatedly bombed during the Second World War, but its medieval buildings (notably the Lorenzkirche and Michaeliskirche) were not seriously damaged.

Hofei or **Ho-fei** (both hŭ'fā'), city, capital of Anhwei prov, China Cotton and silk textiles are manufactured

Hofer, Andreas (ändrā'ās hō'fur), 1767–1810, Austrian patriot, son of a Tyrolean innkeeper When in 1809 Austria made war on Napoleon I and on Bavaria (which had been given the Tyrol in 1805), Hofer led the Tyrolean peasants who had risen in rebellion against Bavaria After several military successes he was made governor of the Tyrol by the Austrians In Oct, 1809, Austria was obliged by the Treaty of Schönbrunn to abandon the Tyrol, but Hofer continued to instigate resistance He was betrayed to the French, court-martialed, and shot at Mantua

Hoffding, Harald, Dan *Høffding* (hä'räl hŭf'dĭng), 1843–1931, Danish philosopher He was a professor at Copenhagen from 1883 to 1915 Hoffding worked in many philosophical fields, but his histories of philosophy have reached the widest audience His books have been widely translated Among them are *Outlines of Psychology* (1882), *History of Modern Philosophy* (1894), *Modern Philosophers* (1902), and *Leading Conceptions of the 19th Century* (1920)

Hoffman, Charles Fenno, 1806–84, American author He was associated with many New York periodicals, among them the *Knickerbocker*, which he founded and edited briefly in 1833, and the *American Monthly Magazine*, which he edited in 1835–37 A travel book on Michigan and Illinois called *A Winter in the West* (1835) and his novel, *Greyslaer a Romance of the Mohawk* (1840), were widely acclaimed Only slightly less popular were his several volumes of lyrical poetry Mental illness forced his retirement in 1849 See biography by H F Barnes (1930)

Hoffman, Malvina, 1887–, American sculptor, b New York city She was a pupil of Rodin Of her spirited figures representative examples are *Bacchanale russe* (Luxembourg Mus, Paris), *Pavlowa gavotte* (Stockholm, Sweden), and *Russian Dancers* Her portraits include those of John Muir (American Mus of Natural History, New York) and Ivan Mestrovic (Brooklyn Mus) and busts of Paderewski as artist and as statesman Other important works are the large group over the entrance of Bush House, London, *The Sacrifice*, a recumbent Crusader, for the War Memorial, Harvard Univ, and the unique collection of 100 portraits of racial types (Hall of Man, Field Mus, Chicago) To procure material for this anthropological gallery, Miss Hoffman traveled about the world for five years She wrote an account in *Heads and Tales* (1936), her *Sculpture Inside and Out* was published in 1939

Hoffmann, Ernst Theodor Amadeus (ĕrnst' tā'ōdōr ämädā'ōōs hōf'man), 1776–1822, German romantic novelist, composer, and artist Accomplished in all these fields, at one time an opera director at Bamberg and a gifted music critic, he is one of the acknowledged masters of fantastic fiction His tales of madness, grotesquerie, horror, and the supernatural include *Fantasiestücke in Callots Manier* (1814), *Die Serapionsbrüder* (1819–22, Eng tr, *The Serapion Brethren*, 1886–92), *Die Elixiere des Teufels* (1815–16, Eng tr, *The Devil's Elixir*, 1824–26), and *Lebensansichten des Katers Murr* (1820–21, Eng tr, *Kater Murr, the Educated Cat*, 1892) Miscellaneous translations include *The Nutcracker and the Mouse-King* (1930) and *Tales of Hoffmann* (1946) Offenbach's opera, *Tales of Hoffmann*, is based on three of his stories He greatly influenced the composer Robert Schumann See H. W Hewett-Thayer, *Hoffmann, Author of the Tales* (1948)

Hoffmann, Friedrich (frē'drĭkh hōf'män), 1660–1742, German physician Influential as teacher (from 1693) and practitioner at Halle, he formulated a mechanistic view of physiology He was one of the first to describe certain diseases, including appendicitis and German measles He introduced into medical practice many drugs, notably Hoffmann's anodyne (compound spirit of ether)

Hoffmann, Max (mäks hōf'män), 1869–1927, German general in the First World War A brilliant strategist, he was partly responsible for the German victory at Tannenberg and in 1916 became chief of staff of the eastern armies In his war diary and later books he bitterly criticised the German high command

Hoffmann-Donner, Heinrich (hīn'rĭkh hōf'mändō'nur), 1809–94, German humorist and physician He was head of the hospital for the insane at Frankfurt He wrote various works, of which the best known is *Struwwelpeter [slovenly Peter]* (1845), long a popular children's book, various English editions of which include one translated and illustrated by Mark Twain

Hofmann, August Wilhelm von (ou'gōōst vĭl'hĕlm fŭn hōf'män), 1818–92, German organic chemist He was professor at the Univ of Berlin from 1865 and was a founder (1868) of the German Chemical Society He studied the constitution of aniline and was the first to prepare rosaniline and its derivatives, thereby laying the basis for the aniline dye industry He also discovered a reaction for deriving amines from amides, developed the Hofmann method of finding the vapor densities, and from these the molecular weights, of liquids

Hofmann, Heinrich (Johann Michael Ferdinand Heinrich Hofmann) (hīn'rĭkh hōf'män, yō'hän mĭkh'ĕl fĕr'dēnänt), 1824–1911, German painter He studied in Dresden and in Rome, where he was influenced by Peter von Cornelius He settled in Dresden and taught at the academy there Hofmann is best known for his popular paintings of scenes from the life of Christ He also painted portraits and a ceiling decoration for the Dresden Theater

Hofmann, Joseph (hōf'mŭn), 1876–, Polish-American pianist, b near Cracow, pupil of Anton Rubinstein He toured Europe as a child prodigy, making his American debut in 1887 at the Metropolitan Opera House The same year he ceased giving concerts, but resumed his career in 1894 He later returned to the United States, where he was director (1924–38) of the Curtis Institute of Music, Philadelphia He composed under the pseudonym Michel Dvorsky, but is best known for his great virtuosity as a performer

Hofmannsthal, Hugo von (hōō'gō fŭn hōf'mänstäl), 1874–1929, Austrian dramatist and poet His first verses were published when he was 16, and his play *The Death of Tizian* (1892, Eng tr, 1913) when he was 18 His varied gifts as poet and as dramatist are shown in his adaptation of Sophocles' *Electra* (1903, Eng tr, 1908) and in his comedies *Der Rosenkavalier* (1911, Eng tr, *The Rose Bearer*, 1912) and *Ariadne at Naxos* (1912, Eng tr, 1913), which were set to music by Richard Strauss He also wrote for Strauss *Die Frau ohne Schatten* [the woman without a shadow] (1919) and *Die ägyptische Helena* (1928) Also notable are his *Poems* (1903, Eng tr, 1919), his adaptation of *Everyman* (1911, Eng tr, 1917), and his correspondence with Richard Strauss (1926, Eng tr, 1927)

Hofmeister, Wilhelm (vĭl'hĕlm hōf'mī'stur), 1824–77, German botanist Although self-taught, he made such valuable studies of the reproduction and development of plants that he was appointed professor successively at the universities of Heidelberg (1863) and Tübingen (1872). He demonstrated alternation of generations, especially in nonflowering plants, and described the behavior of the nucleus in cell formation

Hofstra College see HEMPSTEAD, N Y

Hofuf (hōfōōf'), town (pop c 30,000), Saudi Arabia, chief town of El Hasa. It is a caravan center with trade in wool and silk.

hog see SWINE

Hogan, Ben (hō'gun), 1912–, American golfer, b Stephenville, Texas A former caddy, Hogan taught (1932–36) golf before he began playing in professional tournaments in 1937 In the succeeding years he became one of the greatest money winners of the game, winning over $42,500 at tournament play in 1946 After service (1943–45) in the army air force in the Second World War, Hogan won the Professional Golfers Association championship in 1946 and again took the P G A title in 1948, when he also won the U S open golf crown with the tournament record of 278 strokes After sustaining a broken collar bone and fractured pelvis in an automobile accident (Feb, 1949) near Van Horn, Texas, Hogan made a dramatic comeback by tying (Jan, 1950) Sam Snead for first place in the Los Angeles open tournament He wrote *Power Golf* (1948)

Hoganasville, industrial city (pop 3,886), W Ga, near the Chattahoochee river SW of Atlanta, inc 1870 It is a cotton center, with textile mills Near by is a large tree nursery

Hogarth, David George (hō'gärth), 1862–1927, English archaeologist, keeper (1909–27) of the Ashmolean Museum, Oxford An eminent scholar, Hogarth had been director of the British School at Athens and, in 1916, directed the Arab Bureau, Cairo He explored in several countries and excavated (1887–1907) in Cyprus, Crete, Egypt, Ephesus, Carchemish, and other places Among his published works are *A Wandering Scholar* (1896), *Archaic Artemisia of Ephesus* (1908), *Ancient East* (1914), *Hittite Seals* (1920), *Arabia* (1922), *Kings of the Hittites* (1926), and a biography of Charles M Doughty (1929)

Hogarth, William (hō'garth), 1697–1764, English painter, satirist, and engraver, b London; son of a schoolmaster As a child he was given to drawing and at 15 was apprenticed to a silver-plate engraver From this employment he began engraving on copper, making bookplates, show cards, and illustrations—notably those for Butler's *Hudibras* Meanwhile in spare moments he studied drawing with Thornhill, whose daughter he married (1729) He attempted to earn a living with small portraits and portrait groups (the famous "conversation pieces") But his first real success came in 1732 with a series of "moral" pictures, *The Harlot's Progress*. He first painted the six pictures and then engraved them, selling subscriptions for the prints. These last had a great success. Three years later appeared *The Rake's Progress*, a similar series Hogarth made a good living from these and other salable prints, but his constant ambition to be recognised as a serious painter met with little success, although he continued to produce magnificent canvases In 1745 appeared the series of engraved pictures *Marriage à la Mode*, often considered his masterpiece In this group, in which Hogarth takes a fling at high life, his satire is incomparable With a wealth of detail and brilliant characterization he depicts the profligate and inane existence of a fashionable young couple In 1753 was published *The Analysis of Beauty*, an interesting, if unpolished, essay which has commanded the respectful attention of many thinking artists but which was greeted with derision by the wits of the London art world In old age as in youth Hogarth was forced to depend upon his prints for a livelihood Unfortunately, one of these, a political cartoon, brought down upon him the savage persecution of John Wilkes and Charles Churchill, and his last days were embittered by a quarrel in which, to be sure, he acquitted himself manfully, lampooning his adversaries to the bitter end As a pictorial artist Hogarth's great powers are never fully employed in his prints His satirical genius insisted upon many intellectually significant details and upon explicit clarity, and his composition suffered for it At first he made them purely for money However, such prints as *Gin Lane* and *Four Stages of Cruelty* are very sincerely didactic, and he himself said that he would rather have checked the progress of cruelty than have been the author of Raphael's cartoons Whatever his intentions, he remains above all a great satirist, closer akin to Cervantes than to Raphael Nevertheless, his *Shrimp Girl* (National Gall, London) and *Captain Coram* are two of the masterpieces of British painting Hogarth's major works are in England In New York the Metropolitan Museum and the Frick Collection possess beautiful examples of his work See John Nichols, comp, *Anecdotes of William Hogarth* (1833), biographies by Austin Dobson (1883) and Marjorie Bowen (1936), S F Read, *A Bibliography of Hogarth Books and Studies* (1947)

Hogben, Lancelot Thomas (hŏg'bĕn), 1895–, English scientist and author, educated at Cambridge and the Univ of London After teaching in several universities he served as professor of zoology (1941–47) at the Univ of Birmingham, where, in 1947, he became professor of medical statistics He is noted for his work in genetics and endocrinology His works include *Comparative Physiology of Internal Secretion* (1927), *Nature of Living Matter* (1930), *Introduction to Mathematical Genetics* (1946), and a number of more popular books, among which are *Mathematics for the Million* (1936), *Science for the Citizen* (1938), *Dangerous Thoughts* (1939), and *Author in Transit* (1940)

hog cholera, infectious, very contagious, and often fatal disease of hogs, caused by a virus Symptoms include fever, weakness, loss of appetite, and constipation followed by diarrhea The skin becomes purple Hemorrhages are seen in lungs kidneys, and other organs after death The high death rate and the rapid spread of the disease from one animal to another through infected discharges make cholera a cause of great losses in hog raising There is no cure for the disease, once developed, but vaccination is a preventive See *Hog Cholera* (U S Dept of Agriculture, Farmers' Bul 834)

Hogg, James, 1770–1835, Scottish poet, called the Ettrick Shepherd Hogg had no formal education, he was discovered by Sir Walter Scott, who used his work in *Border Minstrelsy* Hogg's best-known works are *The Mountain Bard* (1807), *The Queen's Wake* (1813), and *The Poetic Mirror* (1816), in prose, *The Brownie of Bodsbeck* (1818) and his recollections of Scott (1834) He has a rustic music and a faculty for rhyme See his *Private Memoirs and Confessions of a Justified Sinner* (1824), Andrew Lang, *Life and Letters of J G Lockhart* (1896)

Hogg, James Stephen, 1851–1906, governor of Texas (1891–95), b Cherokee co, Texas At the age of 12 he was left an orphan, and he worked at various jobs to earn his living He studied law after 1871, was admitted (1875) to the Texas bar, and was county attorney (1878–80) and district attorney (1880–84) As attorney general (1886–90) of Texas, he recovered for the state much land fraudulently taken by railroad companies and championed several political and economic reforms As soon as he became (1891) governor of Texas, Hogg established (1891) a state railroad commission with broad powers of regulation and then successfully pushed through other sweeping economic reforms He was reelected governor of Texas in 1893, but retired from political life in 1895 to practice law

Hogg, Thomas Jefferson, 1792–1862, friend and biographer of Percy Bysshe Shelley He was dismissed in 1811 from Oxford for defending Shelley and was with him at intervals thereafter Authorized by Mary Shelley to write a life of her husband, Hogg issued the first two volumes (1858), which were so disappointing that the family withdrew the materials from his use See his letters to Jane Williams, *After Shelley* (ed. by Sylva Norman, with biographical introduction, 1934).

Hoggar (hŏ'gŭr, hŭgär'), area, SE Algeria, a high plateau attaining nearly 10,000 ft The Tuareg population grazes livestock Before pacification by the French in 1901, there were frequent raids from Hoggar into adjoining territories

Hog Island, small island in the Delaware river near Philadelphia, important during the First World War as the chief emergency shipyard of the government In 1930 Philadelphia acquired the island for an airport, shipping point, and industrial center

Hoglah (-lä) [Heb ,=partridge], daughter and coheiress of Zelophehad Num 26 33, 27 1–11.

Hogue, La (lä hōg'), or **La Hougue** (lä ōōg'), harbor, NW France, on the northeast coast of the Cotentin peninsula, in the English Channel Here in 1692 a French fleet under Tourville was defeated by superior English and Dutch forces in the War of the GRAND ALLIANCE

Hoham (hō'hăm), king, whom Joshua defeated. Joshua 10 3

Hohenasperg (hōunäs'pĕrk), mountain, 1,166 ft. high, Württemberg, S Germany In a fortress here in the 18th and 19th cent many political prisoners were confined, among them the poet Schubart and the economist Friedrich List In 1883 the fortress became a penitentiary

Hohenfriedberg (hōunfrēt'bĕrk), commune (pop 7,421), Lower Silesia, SW of Breslau, placed (1945) under Polish administration Here in 1745 Frederick II of Prussia decisively defeated the Austrian and Saxon forces in the War of the Austrian Succession

Hohenlinden (hōunlĭn'dŭn), village, Upper Bavaria, E of Munich Here in 1800 the French under Moreau decisively defeated the Austrians Thomas Campbell's poem on the battle was long popular

Hohenlohe-Schillingsfürst, Chlodwig Karl Viktor, Fürst zu (klōt'vĭkh kärl' vĭk'tôr fürst' tsōō hō'unlōu-shĭ'lĭngsfürst), 1819–1901, German statesman As premier of Bavaria (1866–70), he favored German unification, and in 1871 he entered the service of the German Empire and became one of Bismarck's staunchest supporters He was ambassador to Paris (1874–80) and governor of Alsace-Lorraine (1885–94) Succeeding Caprivi as chancellor in 1894, he delegated most of his duties to his cabinet, especially the foreign ministers MARSCHALL VON BIEBERSTEIN and Bernhard von BÜLOW The latter succeeded Hohenlohe when he retired in 1900 See his memoirs (Eng tr , 1906)

Hohensalza, Poland see INOWROCLAW

Hohenstaufen (hō"unshtou'fun), German princely family In 1079 Frederick, count of Staufen, married Agnes, daughter of Emperor Henry IV, and was created duke of Swabia The line of German kings and emperors began (1138) with his son, CONRAD III, who was succeeded by FREDERICK I, HENRY VI, and PHILIP OF SWABIA Their chief rivals were the Guelphs (see GUELPHS AND GHIBELLINES), whose scion, Otto IV, was emperor from 1209 to 1215, but the Hohenstaufen heir, FREDERICK II, was elected king by a rival party in 1212 The most spectacular representative of the house, Frederick shifted the center of the family interests to Sicily and S Italy The nearness of the head of Ghibelline strength to Rome intensified the enmity of the popes, who worked at bringing about the fall of the house CONRAD IV and CONRADIN, the last legitimate Hohenstaufen, and MANFRED and ENZIO, illegitimate sons of Frederick II, all came to harm, and with Enzio's death (1272) the family came to an end The ruined ancestral castle is near Stuttgart in Württemberg

Hohentwiel (hōuntvēl'), mountain, 2,260 ft high, Württemberg, S Germany, overlooking the Lake of Constance In the 9th and 10th cent the counts and dukes of Swabia had their castle here

Hohenwald (hō'ŭnwôld), town (pop 1,086), co seat of Lewis co , central Tenn , SW of Nashville, in a farm and timber area Meriwether Lewis National Monument is near by

Hohenzollern (hō"untsō'lurn), German princely family which ruled Brandenburg (1415–1918), Prussia (1525–1918), and Germany (1871–1918) Originating in S Germany, the Hohenzollern took their name from a castle in Swabia and can be traced to the 11th cent Frederick of Hohenzollern (d c 1200) became (1192) burgrave of Nuremberg His sons founded the two main lines of the house, the Swabian and the Franconian (For the Swabian line, see HOHENZOLLERN-HECHINGEN and HOHENZOLLERN-SIGMARINGEN) The Franconian line acquired territories in Franconia, notably the margraviates of Ansbach (1331) and Kulmbach (1338), and in 1415 Emperor Sigismund bestowed the electorate of BRANDENBURG on Frederick VI of Hohenzollern (see FREDERICK I, elector of Brandenburg) The genealogical tree of the prolific house of Brandenburg is very complex, because the various branches of the family held their territories separately (e g , Brandenburg, Bayreuth-Kulmbach, and Ansbach) Elector ALBERT ACHILLES (1470–86) enunciated a family law by which Brandenburg remained indivisible. Bayreuth and Ansbach, however, were reunited with Brandenburg-Prussia only in 1791 and 1793 respectively and in the Napoleonic Wars passed to Bavaria The main line of Brandenburg accepted the Reformation ALBERT OF BRANDENBURG, grand master of the Teutonic Knights, secularized the domain of his order in 1525 and created the duchy of PRUSSIA, which in 1618 was inherited by the elector of Brandenburg FREDERICK WILLIAM the Great Elector (1640–88) acquired part of POMERANIA, the archbishopric of MAGDEBURG, and the bishoprics of Halberstadt and Minden and made good his claims on the duchy of CLEVES His son was crowned (1701) king of Prussia as FREDERICK I His successors, FREDERICK WILLIAM I and FREDERICK II, made Prussia a major European power and extended its borders FREDERICK WILLIAM II (1786–97), FREDERICK WILLIAM III (1797–1840), and FREDERICK WILLIAM IV (1840–61) were mediocre kings, but under WILLIAM I the old struggle between Austria and Prussia ended with the triumph of Prussia in the Austro-Prussian War (1866) In 1871 William was proclaimed emperor of Germany His successors were FREDERICK III (1888) and WILLIAM II (1888–1918)

Hohenzollern, former province (441 sq mi , pop 75,951) of Prussia, SW Germany, in Swabia, an enclave between Wurttemberg and Baden After the Second World War it became part of the French-occupied state of Württemberg-Hohenzollern Sigmaringen is the chief city of this mountainous region Agriculture and forestry are its chief resources The impressive castle of Zollern or Hohenzollern in the north gave its name to the ruling house of Prussia About 1600 the territory was split into two counties, later principalities, which were ruled by two branches of the Swabian line of the Hohenzollern—**Hohenzollern-Hechingen** and **Hohenzollern-Sigmaringen**. Both houses renounced their rights in 1849 in favor of Prussia Charles of Hohenzollern-Sigmaringen was chosen (1866) prince of Rumania as Carol I and later assumed the royal title, his successors in Rumania were Ferdinand, Carol II, and Michael The candidature (1870) of Leopold of Hohenzollern-Sigmaringen to the Spanish throne helped to precipitate the Franco-Prussian War

Hohe Tauern (hō'ĕ tou'ĕrn), range of the Eastern Alps, S Austria, extending c 70 mi along the frontiers of Salzburg, Carinthia, and E Tyrol It rises to 12,460 ft in the GROSSGLOCKNER and includes the Grossvenediger (12,008 ft), the Dreiherrnspitze (11,499 ft), the Hochalmspitze (11,007 ft), and the Ankogel (10,705 ft) There are ancient silver and gold mines and deposits of precious stones The Tauern railroad (built 1901–8) traverses the range through a tunnel 5 mi long

Hohokus or **Ho-Ho-Kus** (hōhō'kus), borough (pop 1,626), NE N J , near Ridgewood, inc 1908 There are two distinguished 18th-century houses

Hoihow (hoi'hou'), Mandarin *Hai-k'ou*, city (pop 60,000), chief port of Hainan island, Kwangtung prov , China Hoihow is on Hainan Strait, near the island's capital, Kiungshan

Hoisington (hoi'zĭngtun), city (pop 3,719), central Kansas, N of Great Bend, inc 1886

Hojeda, Alonso de see OJEDA, ALONSO DE

Hokan (hō'kun), hypothetical linguistic family of North America This is a wide, unproven unification of a numer of Western and Eastern stocks (see LANGUAGE, table) They were brought together in a series of suggestions, mainly by Edward Sapir, R B DIXON, and A L Kroeber First, there is what Sapir called Hokan-Coahuiltecan, embracing several groups Kurok, Chumariko, Shasta-Achomawi, Pomo, Yana, Esselen, and YUMAN, Salinan, Chumashan, Seri, Tequistlatec, and Washo, the Texan families of Tonkawa, Coahuiltecan, and Karankawa, and Subtiaba-Tlapanec of Nicaragua and Mexico To this are joined Yuki, Keresan, Tunica-Atacapa-Chitimacha, IROQUOIAN and CADDOAN, and SIOUAN, with Yuchi and NATCHEZ-MUSKOGEAN The whole group has been called Hokan-Siouan

Hokiang (hŭ'jyung'), Mandarin *Ho-chiang*, province (52,280 sq mi , pop 6,949,405), NE China The capital is Kiamusze The province, a part of Manchuria, was created in 1945, largely out of the former province of Kirin Hokiang is bordered on the north by the Amur river and on the east by the Usuri —both separate it from the USSR It is predominantly hilly to mountainous The main agricultural area is the valley of the Sungari river, a tributary of the Amur Soybeans and grains are the principal crops, and lumbering is the chief industry The southern and western sections have rail service

Hokkaido (hōkĭ'dō), island (c 30,000 sq mi , 1947 pop 3,852,821), N Japan It is 260 mi long and 280 mi wide and is second in size, northernmost, and most sparsely populated of the four major islands of Japan It lies N of Honshu, from which it is separated by Tsugaru Strait The island is sometimes called by its ancient name of Yeso or Yesso, another appellation is Hokushu Its rugged interior, with many volcanic peaks, rises to 7,513 ft in Mt Asahi The Ishikari, second longest river of Japan, traverses W Hokkaido Forests, covering about 60 percent of the island, are the source of lumber, pulp, and paper (milled in Hokkaido) Coal and iron are mined; the Ishikari coal field produces an important part of Japan's supply Although large areas of the island are unsuited to agriculture, some farming is carried on, the principal crops being beans, potatoes, and sugar beets Hokkaido is one of the major fishing centers of the world, coastal and deep-sea waters yield great quantities of cod, herring, and sardines The population is concentrated largely in W and SW Hokkaido, here lie Asahigawa, Sapporo (the capital), Otaru, Muroran, and Hakodate Kushiro is the main port for the east portion of the island Until 1800 the Ainus, aboriginal inhabitants of the island, outnumbered the Japanese, who had begun settling on the southwest peninsula in the 16th cent , and there are still more than 15,000 Ainus in Hokkaido With the Meiji restoration in Japan in 1868 began the serious effort to people the island In 1885 when Hokkaido was made an administrative unit and was granted a central government, some 287,000 Japanese had settled there The growth of railroads helped speed settlement, but the severe winters discouraged emigration from S Japan despite subsidies The government of Hokkaido embraces a number of small offshore islands, until 1945 it included the Kurile Islands, now a part of the USSR

Hokusai (hō'kōōsī), 1760–1849, **Japanese** painter, draughtsman and wood engraver, the foremost figure of the ukiyoye (popular school) After engaging in wood engraving for several years, he became a pupil of the celebrated designer Shunso, who expelled him for persistently pursuing an independent style He subsequently turned to book illustration and industrial art and to the teaching of drawing His industry was prodigious and his fame widespread, but to the end of his life Hokusai lived in poverty and retained his simplicity His art was entirely original and distinguished for its extraordinary technical excellence and its accurate and observant delineation of Japanese scenes and of contemporary life and types His landscapes are of singular beauty and delicacy, and his influence upon the art of the West has been marked. Among his best-known productions are the famous *Mangwa*, or *Ten Thousand Sketches*, in 15 volumes, the color-print series, *Views of Famous Bridges* and *Views of Lu-chu Islands*, and the *Hundred Views of Mount Fuji* His drawings are said to number over 30,000 See biography by C J Holmes (1898) and the biographical play, *Hokusai*, by Gustav Eckstein (1936)

Hokushu see HOKKAIDO

Holbach, Paul Henri Thiry, baron d' (pôl' ärē' tērē' bärō' dôlbäk'), Ger *Paul Heinrich Dietrich, Baron von Holbach* (poul' hīn'rĭkh dē'trĭkh bärōn' fŭn hôl'bäkh), 1723–89, French philosopher, one of the Encyclopedists Though a native of the Palatinate, he lived from childhood in Paris, a member of a group of notable thinkers and literary men including Diderot, Helvétius, Condorcet, and Rousseau Known as the supporter of naturalistic and materialistic views and as the opponent of Christianity and all positive forms of religion, he believed that man, although innately moral in his original state, is perverted by society His best-known work is *Système de la nature* (1770), published first over the name Mirabaud See W H Wickwar, *Baron d'Holbach a Prelude to the French Revolution* (1935)

Holbein, Hans (hans' hôl'bīn), the elder, c 1460–1524, German painter and draughtsman Little is known of his life except that he worked in Augsburg and seems to have had a fairly extensive practice painting altarpieces for churches Of these, such early examples as the one in the Cathedral at Augsburg depicting the life of the Virgin, the *Coronation of the Virgin* (Basel), and the large *Basilica of Santa Maria Maggiore* (Augsburg) all show little divergence from the common practice of the Swabian school, which imitated the Flemish style without approaching its distinction In his later work, however, such as the *Basilica of St Paul* and *Altarpiece of St Catherine* (Augsburg) and especially in his masterly *Altarpiece of St Sebastian*, Holbein's art shows the liberating influence of Italy and rises to a much higher plane In addition to his paintings Holbein designed stained glass windows for the cathedral at Eichstatt and for the Church of St Ulrich at Augsburg He also produced a number of remarkable portrait drawings in silverpoint which show something of the same talent for sensitive characterization for which his son became renowned Holbein seems to have spent his last years fleeing his numerous creditors It is not known where or how he died, and his two sons were early obliged to fend for themselves Of these, **Ambrosius** Holbein (ämbrō'syōōs), c 1494–c 1519, is best known for his book illustrations and portraits Examples of the portraits are in the museums of Basel, Augsburg, and **Darmstadt.** *Christ Crowned with Thorns* is in the Basel Museum The other son, **Hans Holbein, the younger**, 1497–1543, outstanding portrait and religious painter of the German Renaissance, studied with his father and with Hans Burgkmair The early half of his life was spent in Basel except for short intervals in Lucerne and possibly Lombardy He early showed a diversity of talents—illustrating books, making

designs for woodcuts and glass painting, and painting portraits and altarpieces From youth he enjoyed the friendship of the great humanist Erasmus, and he made 83 pen drawings illustrating Erasmus' *Praise of Folly* Of this period also are the portrait of Jacob Meyer and his wife and the beautiful preliminary drawing for it in red chalk and silverpoint and a *Last Supper* and *Flagellation* (all Basel) In 1519 he was admitted to the painters' guild of Basel Between 1519 and 1526 he decorated numerous houses, including the town hall, and painted the *Passion Scenes* and the celebrated *Dead Christ* (Basel), the altarpiece *Madonna with SS Ursus and Nicolas* (Solothurn), and the famous altarpiece *Madonna of Burgomaster Meyer* (Darmstadt) Also of this period is the first of his numerous portraits of Erasmus (Louvre) and a portrait of Boniface Amerbach (Basel) In these works the artist, now mature, shows his full genius Without relinquishing the polished surface and enameled color of the earlier painters he shows the influence of Italy in his larger conception and monumental composition and in the dignity and idealism of his characterization A bold and subtle line, at once precise and flowing, distinguishes these works About 1526 Holbein made his first trip to England, driven from Germany by the depression attendant on the profound religious disturbances There he recouped his fortunes by painting a fine series of portraits, including those of Sir Thomas More (Frick Coll , New York), and Sir Henry Guildford and his wife (Windsor Castle) After a brief return to Basel, where he decorated the town hall with frescoes (since destroyed), he settled in England, and his fame as a portrait painter steadily increased Among the many famous portraits of these last years are those of Archbishop Warham of Canterbury (Louvre and Lambeth Palace) and Christine of Denmark and *The Ambassadors* (National Gall , London) In 1536 he became painter to Henry VIII, making numerous portraits and drawings of the king and his wives His own wife and children remained in Basel, where he bought them a house and supported them A beautiful group portrait of them is in the Basel Museum At 46 Holbein died of the plague in London In addition to his paintings he left to the world a magnificent series of preliminary portrait drawings in which he combined red chalk, silverpoint, pen and ink, and other mediums Today they are treasured as highly as his paintings and possibly constitute a freer expression of his gift for exquisite characterization In the beautiful simplicity of their design and in their subtle suggestion at once of form and of character they are unsurpassed Also famous are his woodcuts, which include the *Dance of Death* series and the illustrations for Luther's Bible Fine examples of Holbein's work are to be seen in many European galleries Windsor Castle has 87 portrait drawings In America the Metropolitan Museum has four fine portraits, the Museum of Fine Arts, Boston, one, the Frick Collection, New York, two, and the National Gallery of Art, Washington, D C , two See study by A B Chamberlain (1913), Paul Ganz, *The Work of Hans Holbein* (Eng tr , 1913), containing 252 illustrations and a biographical introduction

Holberg, Ludvig, Baron (lōōdh'vē, hōl'bĕr), 1684–1754, Danish dramatist and historian, b Norway He began studying divinity in Bergen, but at 19 went to Denmark and never returned to Norway One of the great figures in the literature of Denmark, he was the first to use Danish as a literary medium. An early work was *Pedar Poors* (1719–20), a mock-heroic epic For the National Theater at Copenhagen he wrote in a little more than one year (1722–24) 15 comedies, including *The Political Tinker*, *Ulysses of Ithaca*, *Witchcraft*, *Erasmus Montanus*, and *Henrik and Pernille* These were published under the title *The Danish Stage* (1731) He wrote histories—of Denmark and of the Jews—a political novel, *Niels Klem's Subterranean Journey* (1742), which was translated into most European languages, and an autobiography (1754) A translation of some of his comedies was made by O J. Campbell (1914), and of four others by Henry Alexander (1946)

Holborn (hō'bûrn), metropolitan borough (1931 pop 38,860, 1948 estimated pop 24,960) of central London, England It includes part of the district of Bloomsbury and has within its area the British Museum, the Univ. of London, Gray's Inn and Lincoln's Inn, the Royal College of Surgeons, and Hatton Garden, all of which received some damage in air raids in the Second World War It is known for its diamond trade

Holbrook, Josiah (hōl'brŏōk), 1788–1854, American educator, founder of the LYCEUM movement, b Derby, Conn , grad Yale (1810) He experimented with various schools where manual training, farming, and formal instruction were combined After the failure of his Agricultural Seminary (1825), he began lecturing on popular scientific subjects. In 1826, at Millbury, Mass , he organized the first lyceum that became a part of a national system He manufactured scientific apparatus for schools and lyceums and edited *Scientific Tracts* (1830–32) and *The Family Lyceum* (1832–33). In 1837, at Berea, Ohio, he established the Lyceum Village, which failed after a few years He continued to promote the lyceum movement until his death.

Holbrook (hōl'brŏōk) **1** Town (1940 pop 1,184, 1946 special census pop 2,288), co. seat of Navajo co , E central Ariz , on the Little Colorado river and SE of Winslow, inc 1917 Settled as a cow town, Horsehead Crossing, in 1870, it was renamed in 1880 The Petrified Forest is SE of Holbrook. **2** Town (pop 3,330), E Mass , S of Boston, settled 1710, set off from Randolph 1872 Shoes are made

Holbrooke, Joseph or **Josef** (hōl'brōōk), 1878–, English composer, educated at the Royal Academy of Music, London After graduating there, he appeared frequently as a pianist and as a conductor Somewhat influenced by Wagner and Richard Strauss, he is a prolific composer Three choral symphonies—*The Raven* (1900), *The Bells* (1906), and *Homage to E A Poe* (1908)—employ poems by Poe for their texts His operatic trilogy *The Cauldron of Anwen* is based upon Welsh mythology His most popular work is his orchestral variations (1901) on *Three Blind Mice* He is noted as the champion of the British composer and the adversary of the critic See his *Contemporary British Composers* (1925), George Lowe, *Josef Holbrooke and His Work* (1920)

Holcomb, Thomas (hōl'kum), 1879–, commandant of the U S Marine Corps, b New Castle, Del He entered (1900) the Marine Corps as a second lieutenant and served in the United States, the Philippines, and China As a lieutenant colonel, Holcomb fought in France in First World War He took command of the Marine Corps in 1936 and remained commandant in the Second World War until Dec 31, 1943, when he retired as the first general of the Marine Corps He later served (1944–48) as minister to South Africa

Holcroft, Thomas (hōl'krôft), 1745–1809, English actor, dramatist, and novelist, friend of Thomas Paine and William Godwin His novels include *Alwyn* (1780) and two in defense of social revolution, *Anna St Ives* (1792) and *Hugh Trevor* (1794–97) *The Road to Ruin* (1792), a melodrama, became popular overnight His memoirs were edited by his friend Hazlitt (reedited by Elbridge Colby, 1925) See study by V R Stallbaumer (1936)

Holden, Edward Singleton (hōl'dun), 1846–1914, American astronomer and educator, b St Louis, grad West Point, 1870 He became (1873) professor of mathematics at the U S Naval Observatory As director (1881–85) of Washburn Observatory, Madison, Wis , he headed its solar expedition to the Caroline Islands in 1883 He was president (1885–88) of the Univ of California and director (1888–98) of Lick Observatory His work in lunar photography was important From 1901 to 1914 he was librarian at West Point Among his publications are *Bastion System of Fortification* (1872), *Sir William Herschel* (1881), *Mountain Observatories* (1896), *Elementary Astronomy* (1899), *Essays in Astronomy* (1900), *The Sciences* (1903), and *Galileo* (1905)

Holden, Oliver, 1765–1844, American composer and compiler of hymns, b Shirley, Mass He later made his home in Charlestown, which he helped to rebuild after it was burned by the British His popular tune *Coronation*, to Edward Perronet's hymn *All Hail the Power of Jesus' Name*, first appeared in his *Union Harmony* (1793) With Samuel Holyoke and Hans Gram he edited *The Massachusetts Compiler* (1795), an important collection and study of sacred vocal music

Holden. 1 Town (pop 3,924), central Mass , settled 1723, set off from Worcester 1741 **2** City (pop 1,818), W Mo , SE of Kansas City, in a coal and farm area, laid out 1857 Carrie Nation lived here

Holdenville, city (pop 6,632), co seat of Hughes co , SE central Okla , SE of Shawnee, laid out 1895, inc 1898 It is the trading point for a farm and oil region Near by is the site of historic Fort Holmes

Hölderlin, Johann Christian Friedrich (yō'hän krĭs'tyän frē'drĭkh hûl'durlĭn), 1770–1843, German lyric poet Befriended and influenced by Schiller, he produced, before the failure of his mind at 36, intensely subjective poetry of lofty style (modeled on the classic Greek) and of harmonious versification Little known outside of Germany, his verse is highly regarded by critics and is generally considered a link between the classic and romantic schools Besides his lyrics (1820), he wrote an elegiac novel in prose, *Hyperion* (1797–99, Eng tr in Pierce and Schreiber, *Fact and Fancy of German Romance*, 1927), and a dramatic fragment, *Der Tod des Empedokles* [the death of Empedocles] (1799) A selection of his verse was translated (1943) by Frederic Prokosch See Ronald Peacock, *Hölderlin* (1938)

holding company. see CORPORATION.

Holdrege (hōl'drĭj), city (pop 3,360), co. seat of Phelps co , S Nebr , SW of Kearney, in a grain area; settled 1883, inc 1884.

Holdsworth, Sir William Searle, 1871–1944, British legal historian. He was (1903–8) professor of constitutional law at University College, London. After 1922 he was Vinerian professor of English law at Oxford. Holdsworth's greatest achievement is his *History of English Law* (new ed , 9 vols., 1922–38), of which the first preliminary volume appeared in 1903. The work begins with Anglo-Saxon times, and it is an account of legal procedure and court organization down to the Judicature Acts of 1875 and of the important phases of substantive law through the 18th cent Many authorities consider Holdsworth's history among the most thorough scholarly accounts of English law ever written His other books include *The Historians of Anglo-American Law* (1927) and *Charles Dickens as a Legal Historian* (1928)

Holgate, village (pop 1,050), NW Ohio, SW of Toledo

Holguín (ōlgēn'), city (pop 35,865), NE Cuba It is in a hilly region producing sugar and tobacco Although connected with Santiago de Cuba by rail, it sends most of its exports through its port, Gibara

holiday. For religious holidays, see FEAST Some of the important public holidays celebrated generally or in parts of the United States are Armistice Day, ARBOR DAY, CHRISTMAS, COLUMBUS DAY, Election Day, FLAG DAY, FOREFATHERS' DAY, the FOURTH OF JULY, Halloween, LABOR DAY, the birthday of Abraham LINCOLN, MAY DAY, MEMORIAL DAY, NEW YEAR'S DAY, THANKSGIVING DAY, St Valentine's Day, and the birthday of George WASHINGTON They are "legal holidays" only when, by law, business and schools are closed DOMINION DAY is a national holiday in Canada See BANK HOLIDAYS See M E Hazeltine, *Anniversaries and Holidays* (1928), G W Douglas, *The American Book of Days* (1937)

Holinshed, Raphael (hŏ'lĭnz-hĕd", hŏ'lĭn-shĕd"), d c 1580, English chronicler He was a translator who also assisted one Reginald Wolfe in the preparation of a universal history, never finished In 1577, long after Wolfe's death, appeared Holinshed's *Chronicles of England, Scotland, and Ireland*, in the writing of which he had been assisted by William Harrison and Richard Stanihurst Many Elizabethan dramatists drew plots for plays from the book in this and later editions Shakespeare used it for his history plays, especially *Macbeth*, *Lear*, and part of *Cymbeline*

Holl, Frank (Francis Montague Holl) (hōl), 1845–88, English genre and portrait painter He first became known for his somber paintings of melodramatic subjects such as *No Tidings from the Sea*, *Deserted*, and *Ordered to the Front* Later he established a reputation as a good portrait painter, counting among his sitters the prince of Wales, Lord Roberts, W E Gladstone, Joseph Chamberlain, and Sir John Millais His portrait of Samuel Cousins (National Gall , London) and a self-portrait (National Portrait Gall , London) are outstanding

Holland, George, 1791–1870, English actor He played minor roles at Drury Lane in 1817 and came to the United States in 1827, where he was successful in comedy His most popular parts were Tony Lumpkin in Goldsmith's *She Stoops to Conquer* and Sunnyside in Boucicault's *Octoroon* See Montrose J Moses, *Famous Actor Families in America* (1906)

Holland, Henry Richard Vassall Fox, 3d **Baron,** 1773–1840, English Whig statesman A nephew of Charles James Fox, he emulated his uncle's liberal politics, he opposed the suspension of the Habeas Corpus Act and fought the union with Ireland He later was critical of the regency of Prince George and the repressive acts of 1817–18 He favored abolition of the slave trade, the corn laws, and the Test Act and Corporation Act, and he forwarded reform of the Penal Laws Holland served as lord privy seal (1806–7), and chancellor of the duchy of Lancaster (1830–34, 1835–40) He is, perhaps, best known for his influence on literature, politics, and letters through the hospitality that HOLLAND HOUSE in London provided for brilliant and distinguished people of his day His son, the 4th baron, edited Holland's *Foreign Reminiscences* (1850) and *Memoirs of the Whig Party* (1852)

Holland, Josiah Gilbert, 1819–81, American journalist and author, b Belchertown, Mass , studied medicine After a period as superintendent of schools at Vicksburg, Miss , he became associate editor (1849–57) of the Springfield *Republican* and also part owner In 1870 he helped found *Scribner's Monthly* (later the *Century Magazine*), which he edited until his death Under the pseudonym Timothy Titcomb his work was serialized in *Scribner's*, including his most popular novel, *Sevenoaks* (1875) He is also known for his narrative poem *Bitterswee*t (1858). See biographies by H M Plunkett (1894) and H H Peckham (1940)

Holland, Sir Thomas Erskine, 1835–1926, English jurist He was (1874–1910) professor of international law at Oxford He wrote *Studies in International Law* (1899) and *Elements of Jurisprudence* (12th ed , 1924).

Holland, William Jacob, 1848–1932, American zoologist, paleontologist, and clergyman, b Jamaica, West Indies He served in the ministry of the Moravian church (1872–92) and was chancellor (1891–1901) of the Western Univ. of Pennsylvania (later the Univ. of Pittsburgh) and director of

Carnegie Institute, Pittsburgh (1898–1922). He was known for his broad scientific interests and was the author of the classic *Butterfly Book* (1898) and *Moth Book* (1903)

Holland, former county of the Holy Roman Empire and, from 1579 to 1795, the chief member of the United Provs of the Netherlands Its name is popularly applied to the entire Netherlands Holland has been divided since 1840 into two provinces—NORTH HOLLAND, with the cities of Amsterdam, Haarlem, Hilversum, Zaandam, and Alkmaar, and SOUTH HOLLAND, with Rotterdam, The Hague, Leiden, Dordrecht, Delft, and Gouda The county was created in the early 10th cent and originally controlled not only present North and South Holland, but also ZEELAND and the whole of medieval FRIESLAND. William II (see WILLIAM, COUNT OF HOLLAND) was elected (1247) German king, but was unable to exert his authority He was killed (1255) in a campaign against the Frisians, who always were difficult to control In 1299 John of Avesnes, count of HAINAUT, seized Holland, which continued to be ruled by his successors until 1433, when Philip the Good, duke of Burgundy, wrested it from Jacqueline, countess of Hainaut, Holland, Zeeland, and Friesland In the civil strife that accompanied this event the party of the Kabeljaauws [codfish], representing the cities, fought the Hoeks [fish hooks], the nobles who supported Jacqueline. The Hoeks again rebelled when Archduke Maximilian (later Emperor Maximilian I) assumed the guardianship over the Netherlands after the death (1482) of Mary of Burgundy, their fleet was annihilated and their leaders were executed in 1490 The cloth industry and commerce of Holland, though they developed later than those of Flanders and Brabant, began to rival those of Bruges and Antwerp in the 15th cent The Dutch ports were closely linked with the Hanseatic League and later became, after the Netherlands gained independence, the chief entrepôts and shipbuilding centers of the N European continent Holland led in the struggle (16th–17th cent) for Dutch independence, and its history became virtually identical with that of the NETHERLANDS

Holland, resort city (pop 14,616), S Mich , near Lake Michigan SW of Grand Rapids, on the Black River and Black Lake, in a fruit and farm area, founded 1847 by Dutch, inc 1867 Its furnaces have been widely used since 1906 Other manufactures include metal products, chemicals, and leather Tulip growing is an important industry, and the town's Dutch descendants hold an annual tulip festival The Netherlands Museum (1937) contains historical relics The Dutch Reformed Church controls Hope College (coeducational, 1851) and Western Theological Seminary here and manifests itself in the city's laws

Holland, Parts of, administrative division see LINCOLNSHIRE, England

Hollandale, town (pop 1,606), W Miss , SE of Greenville and on Deer Creek, in a farm and timber area Near by is a state park

Hollander, Jacob Harry (hŏ'lundur), 1871–1940, American economist, b Baltimore He received his Ph D in 1894 from Johns Hopkins, where he served as professor of political economy from 1904 to 1940 Hollander organized (1900–1901) the treasury of Puerto Rico, and served as financial adviser (1908–10) to the Dominican Republic His books include *Studies in State Taxation* (1900), *The Abolition of Poverty* (1914), and *Want and Plenty* (1932) He also wrote a biography of David Ricardo (1911) and edited his letters

Holland House, residence of the Holland family in Kensington, London, made famous in the first 40 years of the 19th cent by the hospitality of Henry Richard Vassall Fox, 3d Baron HOLLAND, and his lady, Elizabeth Built in 1607 for Sir Walter Cope, the mansion changed hands several times and was bought in 1767 by Henry Fox, grandfather of the 3d Baron Holland Though relatively unimportant himself in politics, Lord Holland did much for English liberalism by providing an intellectual headquarters for liberals, mainly Whig, and for other distinguished men Reformers such as Jeremy Bentham, Samuel Romilly, James Mackintosh, and Henry Brougham, scientists such as Michael Faraday and Humphry Davy, writers such as Thomas Moore, Lord Byron, and Walter Scott, and statesmen such as Lord Melbourne, George Canning, and Lord Palmerston were influenced by contacts made at the famous dinners at Holland House Foreign dignitaries, such as Talleyrand and Adolphe Thiers, were also visitors there See Giles Fox-Strangways, earl of Ilchester, *The Home of the Hollands, 1605–1820* (1937) and *Chronicles of Holland House, 1820–1900* (1938)

Hollandia (hŏlăn'dēù), trading post (district pop 6,228), capital of Netherlands New Guinea, on N New Guinea. It is on Humboldt Bay, an inlet of the Pacific, near the border of the Australian Territory of New Guinea In the Second World War, Hollandia was an important Japanese air base, captured by U S troops in April, 1944

Holland Land Company, a Dutch venture active in the settlement of much of W New York and some of NW Pennsylvania. Organized by Dutch bankers in 1796, it secured lands in New York (known as the Holland Purchase) through foreclosure on Robert MORRIS, who had assembled them as part of a gigantic land speculation. The company developed its holdings, planned town sites, and sold the lands directly to settlers on liberal terms. Its main land office was opened (1801) in Batavia, N Y , with Joseph ELLICOTT as agent. About 1846 the affairs of the company in America were liquidated. See P D. Evans, *The Holland Land Company* (1924)

Hollar, Wenzel or **Wenceslaus** (hŏ'lär, -lär), Czech. *Václav Holar*, 1607–77, Bohemian etcher After working in Strasbourg and Cologne he accompanied (1637) Thomas Howard, earl of Arundel, to England, where he worked for Charles I Despite his distinguished patrons and extraordinary ability and industry, he was often in want and died in poverty Much of his best work was done during a sojourn in Antwerp (1645–52) Hollar produced some 2,740 plates of great variety, including portraits, landscapes, religious compositions, still life, ships, and architectural studies Such collections as his *Theatrum Mulierum* are interesting documents on the costumes of the period Other famous works include *Views of London, Edinburgh*, a portrait of the duke of York, and illustrations for John Ogilby's editions of Vergil and Homer and for Sir William Dugdale's *Antiquities of Warwickshire Illustrated, Monasticon Anglicanum*, and *The History of St Pauls Cathedral in London*

Holley, Alexander Lyman, 1832–82, American engineer, b Lakeville, Conn , grad Brown, 1853 An expert on locomotives and railway practices, he served as technical editor of the *American Railway Review* for many years and wrote *American and European Railway Practice* (1861) and other books on the subject He became interested in the new Bessemer steel process in England, purchased the American rights, and after securing also the rights of William Kelly in the United States, built at Troy, N Y , the first Bessemer steel plant of commercial significance in the United States He built other plants and contributed by his inventions to the design of steel plants and their machinery

Holley, Marietta, 1836–1926, American humorist, b Jefferson co , N Y Her first book, *My Opinions and Betsy Bobbet's*, appeared in 1873 and was followed by a long series of "Samantha" books by "Josiah Allen's Wife " As the simple but shrewd farm wife, Miss Holley voiced her approval of woman suffrage, temperance, and other reforms

Holley, village (pop 1,230), W N Y , on the Barge Canal and NW of Rochester, inc 1867

Hollidaysburg, industrial borough (pop 5,910), co seat of Blair co , S Pa , S of Altoona and on the Juniata river, settled 1768, laid out 1820 It has boiler factories and machine works and is a trading center Charles Dickens described travel here in 1842 in his *American Notes*

Hollidays Cove, W Va see WEIRTON

Hollingworth, Leta Stetter, 1886–1939, American educator and psychologist, b Chadron, Nebr , grad Univ of Nebraska, 1906 After further study at Columbia Univ she was for three years a clinical psychologist in Post Graduate and Bellevue hospitals, New York city From 1916 until her death she taught at Teachers College, Columbia, becoming professor of education in 1929 She was noted for her outstanding studies in child psychology, which culminated in her experimental work with gifted children at Speyer School in New York city Her books include *The Psychology of Subnormal Children* (1920), *Gifted Children Their Nature and Nurture* (1927), and *The Psychology of the Adolescent* (1928) See biography by H L Hollingworth (1943)

Hollins, George Nichols, 1799–1878, American naval officer, b Baltimore His active career spanned the years from the War of 1812, in which he served under Decatur, to the end of the Civil War, in which he fought for the Confederacy In 1854, while commanding the *Cyane*, he shelled SAN JUAN DEL NORTE, Nicaragua, in retaliation for outrages on American life and property With a few hastily assembled vessels, he defeated part of the Union blockading squadron of the southwest pass of the Mississippi, Oct , 1861 Hollins commanded Confederate naval forces in the heavy fighting on the upper Mississippi in 1862

Hollins College, at Hollins College, Va , N of Roanoke, nonsectarian, for women, opened 1842 It was named Hollins Institute in 1855 for its benefactors and became a college in 1911

Hollis. 1 Town (pop 1,111), SW Maine, near the Saco W of Portland, inc 1798 It was long the home of Kate Douglas Wiggin **2** City (pop 2,732), co seat of Harmon co , extreme SW Okla , near Texas, in a cattle-raising area, inc as a town 1905, as a city 1929

Holly, industrial village (pop 2,343), S Mich , on the headwaters of the Shiawassee and NW of Pontiac, in a lake area, settled 1836, inc 1865. Automobile parts and pianos are made

holly, any plant of the genus *Ilex*, trees or shrubs of many species, widely distributed through the world They include both deciduous and evergreen kinds with berrylike fruits of various colors and with the male and female flowers sometimes on different plants The English holly (*Ilex aquifolium*), the common holly of Europe, cultivated also in America, is closely associated with Christmas tradition It has glossy, mostly spiny evergreen leaves and bright red berries and is a popular hedge plant in England The American holly (*I opaca*), which is very similar, is native to the E United States but has been so cut for Christmas decorations that it is becoming scarce Both of these species have a hard white wood, valued for cabinetwork and woodenware and sometimes stained to imitate ebony Species of *Ilex* have been used for medicine and tea, several having stimulant properties, those used as a beverage include the yaupon, inkberry, and WINTERBERRY and the commercially important MATE

Holly Hill. 1 Town (pop 1,665), NE Fla , on the Atlantic coast near Daytona Beach, in a farm area noted for its flowers **2** Town (pop 1,062), S central S C , NNW of Charleston, in a truck, livestock, and cotton area, inc 1887 The Santee-Cooper hydroelectric and navigation project is near by

hollyhock (hŏl'ēhŏk'), tall-flowering plant (*Althaea rosea*) with large leaves and showy single or double flowers of various colors, widely used in background plantings and against fences Originally a Chinese perennial, it is now usually cultivated as a biennial, sometimes as an annual The rust which attacks the leaves is best controlled by spraying and sulphur dusting

Holly Springs, city (pop 2,750), co seat of Marshall co , N Miss , near the Tenn line and SE of Memphis, Tenn , inc 1837 This market town in a cotton area, which has suffered somewhat from erosion, ships dairy and clay products as well as cotton In the Civil War, Confederate General Van Dorn captured the town and seized a large quantity of federal supplies (Dec , 1862), thus delaying Grant's advance against Vicksburg An agricultural experiment station and Rust College (Negro, Methodist, coeducational, 1866) are here. There are a number of fine ante-bellum houses

Hollywood. 1 Part (pop c 185,000) of Los Angeles, S Calif , founded in the late 1880s, inc 1903, consolidated with Los Angeles 1910 It is the center of the moving-picture industry The making of Hollywood's first moving picture in 1911 by the Nestor Company was followed quickly by an influx of other companies Although many of the major production studios are now near by (in Culver City, Burbank, and Los Angeles proper), Hollywood is still the industry's focal point The name Hollywood has come to mean the American moving-picture industry in general—its morals, manners, and characteristics Hollywood is also a western radio-broadcasting center The Hollywood Bowl, Griffith Park (with an observatory and planetarium), the Japanese Gardens, and the estates of many moving-picture stars are here. **2** City (pop 6,239), SE Fla , on the Atlantic coast N of Miami, founded 1921, inc 1925 It began and developed as a planned resort city

Holmes, John Haynes, 1879–, American clergyman (undenominational), b Philadelphia, grad Harvard, 1902, and Harvard Divinity School, 1904. For 42 years (1907–49) he was minister of the Community Church, New York city, in 1949 he became pastor emeritus The church belonged to the Unitarian denomination until 1919, when it became independent The causes supported by Dr Holmes's effective public addresses include the abolition of intolerance and of war A founder of the National Association for the Advancement of Colored People and of the American Civil Liberties Union, he has been actively associated with both organizations since their inception Among his many books are *A Sensible Man's View of Religion* (1932) and *Affirmation of Immortality* (1947)

Holmes, Oliver Wendell, 1809–94, American author and physician, b Cambridge, Mass , grad Harvard (B A , 1829, M D , 1836) His first important poem, "Old Ironsides," appeared in 1830 when he was studying law Shifting to medicine, he studied at Harvard and in 1833–35 in Paris After his first volume of *Poems* (1836) came out, he devoted himself to his profession for some years, as professor of anatomy and physiology at Dartmouth (1838–40), as a founder of the Tremont Medical School in Boston (1838), and as author of two important medical pamphlets, *Homeopathy and Its Kindred Delusions* (1842) and *The Contagiousness of Puerperal Fever* (1843) The latter was the first American attempt to correlate the experiences of many doctors with this frequent cause of death From 1847 to 1882 he was Parkman professor of anatomy and physiology at Harvard and from 1847 to 1853 dean of the medical school He was a stimulating, popular lecturer in his classes, in demand for years

as a lyceum speaker, he talked on both scientific and literary subjects His wit and gift for rhyming made him a master of occasional verse In 1857 he began to contribute to the *Atlantic Monthly* (which he named) the famous series of "breakfast-table" sketches, continued from earlier ones which had appeared in the *New England Magazine* in 1831–32 These *Atlantic* writings were collected as *The Autocrat of the Breakfast-Table* (1858), *The Professor at the Breakfast-Table* (1860), *The Poet at the Breakfast-Table* (1872), and *Over the Teacups* (1891) and contained many poems, among them "The Chambered Nautilus" and "The Deacon's Masterpiece, or, The Wonderful One-Hoss Shay" He was less successful in his three anti-Calvinist "medical" novels, *Elsie Venner* (1861), *The Guardian Angel* (1867), and *A Mortal Antipathy* (1885), although they show an understanding of psychology quite ahead of his time Among his other writings are biographies of his friends Motley (1879) and Emerson (1885) and several collections of his verse Among his later poems are "Dorothy Q" and the hymn beginning, "Lord of all being, Throned afar" See *Oliver Wendell Holmes Representative Selections* (ed by S I Hayakawa and H M Jones, 1939) and a condensed annotated edition of his novels (ed by C P Oberndorf, 2d ed , 1946) See also biography by J T Morse, Jr (1896), a later one, *Amiable Autocrat*, by E M Tilton (1947), and an excellent study by M A De Wolfe Howe, *Holmes of the Breakfast Table* (1939)

Holmes, Oliver Wendell, 1841–1935, Associate Justice of the U S Supreme Court (1902–32), b Boston, grad Harvard, 1861, son of the poet Oliver Wendell Holmes He served (1861–64) with distinction in the Civil War, took a law degree at Harvard (1866), and began practice in Boston in 1867 Holmes taught (1870–73) constitutional law and jurisprudence at Harvard while editing (1870–73) the *American Law Review* and the 12th edition (1873) of Kent's *Commentaries* He was a lecturer (1880) on common law at Lowell Institute and professor of law (1882–83) at Harvard Associate justice (1882–99) and chief justice (1899–1902) of the Massachusetts supreme court, he was appointed to the U S Supreme Court by President Theodore Roosevelt Holmes, a true liberal, believed in respecting human rights more than property rights He was particularly zealous in defending the citizen's guarantees under the Bill of Rights The Supreme Court during his 30-year tenure was generally dominated by less democratic jurists, with whom he differed so often that he became known as the "great dissenter" His dissenting opinions, many of them masterpieces of clear, forceful legal writing, were widely hailed by the nation's liberals Holmes retained his interest in educating young men for the law, and it became a tradition that one of the top men of the graduating class of Harvard Law School serve as his private secretary He thus had a great influence on many who rose to be the foremost lawyers and jurists in the United States His published works include *The Common Law* (1881), *Speeches* (1891, 1913), and *Collected Legal Papers* (1920) See Felix Frankfurter, ed , *Mr Justice Holmes* (1931) and *Mr Justice Holmes and the Constitution* (1938), Silas Bent, *Justice Oliver Wendell Holmes* (1932), M A DeWolfe Howe, ed , *Holmes-Pollock Letters the Correspondence of Mr Justice Holmes and Sir Frederick Pollock, 1874–1932* (1941) and *Touched with Fire Civil War Letters and Diary of Oliver Wendell Holmes, Jr , 1861–1864* (1946), Francis Biddle, *Mr Justice Holmes* (1942), Max Lerner, ed , *The Mind and Faith of Justice Holmes His Speeches, Essays, Letters, and Judicial Opinions* (1943), Catherine Drinker Bowen, *Yankee from Olympus Justice Holmes and His Family* (1944)

Holmes, Samuel Jackson, 1868–, American biologist, b Henry, Ill , grad Univ of California (B S , 1893) He became professor of zoology at the Univ of California in 1917 and is known for his work in comparative psychology and in evolution and eugenics His works include *The Evolution of Animal Intelligence* (1911), *Studies in Animal Behavior* (1916), *Studies in Evolution and Eugenics* (1923), *Human Genetics and Its Social Import* (1936), and *The Negro's Struggle for Survival* (1937)

Holmes, William Henry, 1846–1933, American geologist, anthropologist, and museum director, b Harrison co , Ohio. In 1872 he became an artist with the F V. Hayden survey and after it was absorbed (1879) into the U S Geological Survey was appointed geologist. He contributed pioneer reports on the phenomena of Yellowstone Park, the classic illustrative material in the famous Grand Canyon atlas, and reports of much geological reconnaissance work in Colorado He was a noted mountain climber, and peaks in Yellowstone Park and the Henry Mts of Utah were later named in his honor While directing the reconnaissance survey of the San Juan river district of SE Utah in 1875, he was fascinated by the cliff-dwelling remains in the region, and more and more he turned to that field, becoming one of the great pioneers of Southwest archaeology His *Art in Shell of the American Indians* (1883), *Pottery of the Ancient Pueblos* (1886), and many essays on Indian textiles were among the first serious contributions to the study of Indian art His work in ceramics was especially important in view of its aid in the study of ethnographical relationships He left the Geological Survey in 1889 to become archaeologist of the Bureau of American Ethnology, and from 1902 to 1909 he served as its chief From 1910 to 1920 he was chief curator of anthropology at the U S National Museum In 1910 he became curator of the National Gallery of Art and from 1920 served as its director He was internationally recognized for his work in museum science His later books included the important *Handbook of Aboriginal American Antiquities* (1919).

holmium (hōl'mēum), a metal of the RARE EARTHS, an element (symbol = Ho, for physical constants, see ELEMENT, table) With oxygen it forms the oxide holmia, a rare earth Discovery of the element is usually credited to Per T Cleve (1879)

Holofernes (hŏlŏfûr'nēz, hōlō'fûrnēz), invading general killed by Judith to save her city, Bethulia Judith 2–13

Holon (hō'–) 1 Unidentified city, apparently near Hebron Joshua 15 51, 21 15 Hilen 1 Chron 6 58 2 Unidentified town of Moab Jer 48 21

Holon (hōlōn'), town (pop c 9,000), central Israel, near Tel-Aviv It was founded in 1940 Manufactures include textiles, metal and leather goods, and processed foods

Holst, Gustav (hōlst), 1874–1934, English composer, studied at the Royal College of Music Neuritis made a career as a pianist impossible From 1898 until 1903 he played the trombone in the Carl Rosa Opera Company and the Scottish Orchestra He taught from 1903 to 1920 at the James Allen Girls' School and was musical director from 1905 until 1934 of St Paul's Girls' School and from 1907 until 1924 of Morley College Grieg, Richard Strauss, and Wagner were influences on his early work, but most of his music is highly original Outstanding compositions are *The Mystic Trumpeter* (1904), a setting for voice and orchestra of Walt Whitman's poem, *Savitri* (1908), a chamber opera, settings (1907–12) of his own translations of hymns from the Rig Veda, *The Planets* (1914–16), a suite for orchestra, *The Hymn of Jesus* (1917), for chorus and orchestra, *The Perfect Fool* (1920–22), an opera, and *At the Boar's Head* (1924), an interlude See biography by his daughter, Imogen Holst (1938)

Holst, Hermann Eduard von (fŭn hōlst'), 1841–1904, American historian, b Livonia, Ph D Univ of Heidelberg, 1865 Born of German parents settled in Russia, he was barred from that country because of a pamphlet attacking the tsarist government and emigrated (1867) to the United States Poverty and physical labor undermined his health while he studied American institutions, and in 1872 he returned to Europe to teach in the universities of Strasbourg (1872–74) and Freiburg (1874–92) His work entitled *The Constitutional and Political History of the United States* (7 vols , 1876–92), written in German and translated, is more the constitutional and political history of slavery and the struggle to preserve the Union than a systematic study of constitutional development He was a strong believer in the justice of the Union cause His other important works were a biography of John C Calhoun (1882) and *The French Revolution Tested by Mirabeau's Career* (2 vols , 1894) From 1892 to 1900 he was head of the history department at the new Univ of Chicago

Holstebro (hōl'stubrō″), city (pop 13,212), W Jutland, Denmark It is a railroad junction and an agricultural center

Holstein, Friedrich von (frē'drĭkh fŭn hōl'shtīn), 1837–1909, "mystery man" of the German foreign office, called the "Gray Eminence" After the Congress of Berlin he became a powerful figure in shaping German foreign policy, and after the fall of his enemy, Bismarck, he seems to have been the guiding spirit of the foreign office His official position was subordinate, and during his life he was almost unknown outside government circles Holstein sought to play off Russia and England against each other, to break the Anglo-French entente, and to make the German-Austrian alliance the strongest in Europe He often opposed Emperor William II, of whom he had a low opinion In the crisis over MOROCCO, largely promoted by him, his advice was ignored by the chancellor, Bülow, and Holstein resigned See S B Fay, *Origins of the World War* (1928)

Holstein (hōl'stīn, Ger hōl'shtīn), former duchy, N Germany, the part of Schleswig-Holstein S of the Eider river Kiel, Rendsburg, and Lübeck (a free city until 1937) are the chief cities (for a description of Holstein and for its history after 1814, see SCHLESWIG-HOLSTEIN) Holstein was created (1111) a county of the Holy Roman Empire and was bestowed on Adolf of Schauenburg In 1386 the count of Holstein received the duchy of SCHLESWIG as a hereditary fief On the death (1459) of Adolf VIII, last of the Schauenburg line, Schleswig and Holstein passed to Christian I of Denmark, son of Adolf's sister and the count of OLDENBURG. Christian in two charters (1460) established the relationship of Denmark, Schleswig, and Holstein as a personal union; the opposition of the German nobles in the two territories to direct Danish rule was a powerful factor in this arrangement, which lasted for four centuries In 1474 Emperor Frederick III awarded DITHMARSCHEN to Christian and raised Holstein to a duchy under the immediate suzerainty of the Holy Roman Empire (as distinct from Schleswig, which was outside the imperial jurisdiction). Both duchies were divided in the 16th cent into a royal portion, ruled by the Danish kings, a ducal portion, ruled by the dukes of Holstein-Gottorp, a younger branch of the Danish royal line; and a common portion, ruled jointly by the kings and dukes In 1658 the Treaty of Roskilde abolished Danish suzerainty over the ducal portion, but in 1721 the ducal portion of Schleswig was united with the royal portion, and in 1773 Grand Duke Paul (later Paul I) of Russia, heir of the Gottorp line, ceded the ducal portion of Holstein to the Danish dynasty in exchange for the county of Oldenburg Thus all Schleswig-Holstein was once more united under the Danish kings

Holstein (hōl'stēn), town (pop. 1,296), NW Iowa, E of Sioux City, settled 1882

Holstein-Friesian cattle (hōl'stēn-frē'zhŭn, –stĭn–) [from the former north German duchy of Holstein and from Friesland], commonly called Holsteins, a breed of dairy cattle originated in Friesland, the Netherlands It is one of the oldest existing breeds, having been bred for at least 2,000 years The region from which they come was famous even in Caesar's time for its cattle The cattle are black and white and are largest in size of the dairy breeds In milk production the cows average a higher yield than do those of any other breed and they are the most numerous of the dairy cattle in the United States

Holt, Hamilton (hōlt), 1872–, American educator From 1897 to 1921 he was connected with the *Independent*, a New York city weekly He was a strong advocate of the League of Nations and was active in peace organizations In 1925 he became president of Rollins College in Florida

Holt, Henry, 1840–1926, American author and publisher, b Baltimore, grad Yale, 1862 In 1866 he became a partner in the publishing firm which became (1873) Henry Holt & Company, and in 1913 he founded the *Unpopular Review* (later the *Unpartisan Review*) See his autobiographical *Garrulities of an Octogenarian Editor* (1923)

Holt, Joseph, 1807–94, judge advocate general of the U S army (1862–75), b Breckinridge co , Ky Educated at St Joseph's and Centre colleges, he began to practice law in Elizabethtown, Ky , and became a widely known lawyer and political speaker in the old Southwest For his services to the Democratic party, President James Buchanan appointed him commissioner of patents in 1857, and in 1859 he was promoted Postmaster General On Jan 1, 1861, he succeeded John B FLOYD as Secretary of War After the secession movement set in, Holt, who had previously been sympathetic to the South, gave unhesitating allegiance to the Union and influenced Kentucky's ultimate loyal stand In Sept , 1862, President Abraham Lincoln appointed him to the new office of judge advocate general In that position Holt supported and carried out Lincoln's desires for an extension of military jurisdiction over many civil matters, including the trials of political prisoners The trial and punishment of John Wilkes Booth's accomplices, however, especially the hanging of Mary E SURRATT, on questionable evidence and with evidence favorable to the defendants suppressed, brought a reaction against Holt and the power he had assumed However, the radical Republicans in Congress kept him in office until 1875

Holt, Luther Emmett, 1855–1924, American physician and specialist in children's diseases, b Webster, N Y , M D Columbia, 1880 He was professor at New York Polyclinic (1881–1901), and at Columbia (1901–21) His *Care and Feeding of Children* (1894), written for nurses, became a household classic, and his *Diseases of Infancy and Childhood* (1896) was a standard text See biography by R L Duffus and L Emmett Holt, Jr (1940)

Holtby, Winifred (hōlt'bē), 1898–1935, English novelist and journalist, grad Somerville College, Oxford She served in the First World War in the Women's Auxiliary Army Corps and came back to finish her college course She lectured for the League of Nations Union and from 1926 directed the periodical *Time and Tide*. Her earlier novels, *Poor Caroline* (1931) and *Mandoa, Mandoa!* (1933), a story of the effect of industrialism on African natives, foreshadowed the fine novel of her native Yorkshire, *South Riding*, published in 1936, after her early death It was successfully filmed See her *Letters to a Friend* (ed by her mother, Alice Holtby, and by Jean McWilliam, 1938), Vera Brittain, *Testament of Friendship* (1940).

Holton, city (pop 2,885), co seat of Jackson co , NE Kansas, N of Topeka, in an agricultural region, laid out 1857 by Free Staters, inc 1870. Near by is the Potawatomi Indian Reservation

Holtville, city (1940 pop 1,772; 1948 special census pop 2,785), SE Calif., SE of the Salton Sea in the IMPERIAL VALLEY; inc. 1908.

Holy Alliance. Strictly defined, the Holy Alliance was the agreement among the emperors of Russia and Austria and the king of Prussia, Sept 26, 1815. It was quite distinct from the Quadruple Alliance (Quintuple, after the admission of France) of Great Britain, Russia, Austria, and Prussia, arrived at first in 1814 and revived in 1815 Nevertheless both were a part of the resettlement of European political boundaries after the fall of the Napoleonic empire The Holy Alliance was the product of the religious zeal of Tsar ALEXANDER I Specifically, it accomplished nothing, since it was merely a vague agreement that the sovereigns would conduct themselves in consonance with Christian principles Ultimately all the princes of Europe signed the alliance except three George IV of England, who could not, for constitutional reasons, the pope, who could not, for religious reasons; and the sultan, who was not a Christian prince Though the agreement itself was not important, the name was applied to the cooperation of Russia, Austria, and Prussia, particularly in the period of the European conferences of Aachen, Troppau, Lubach, and Verona The Holy Alliance became the symbol of reaction, the reaction dominated by METTERNICH Austria repressed revolution in Italy, France interfered in Spain, in the name of the Holy Alliance It was against that reactionary solidarity that the British foreign policy under George CANNING was directed The MONROE DOCTRINE was, in part, an outgrowth of this same fear of the European reactionary powers The revolutions in 1848 more or less effectively destroyed that ogre of the liberals, but the original Holy Alliance which had been nothing but an ineffectual attempt by the tsar to supply a spiritual basis for the Quadruple Alliance, continued as a model of conduct for the tsars

Holy City see ALLAHABAD, BENARES, JERUSALEM, MECCA, ROME

Holy Cross, College of the see WORCESTER, Mass

Holy Cross National Monument see NATIONAL PARKS AND MONUMENTS (table)

holyday of obligation see FEAST

Holy Family, term referring to the Child Jesus, Mary, and Joseph In the Roman Church the feast in its honor falls usually on the Sunday after Epiphany There are paintings of the Holy Family by Fra Bartolomeo (Corsini, Rome), Anthony Van Dyck (Vienna), El Greco (Prado and Metropolitan Mus), Michelangelo (Uffizi), Murillo (*Holy Family with the Bird*, Prado), Rubens (*Holy Family under an Apple Tree*, Vienna), Andrea del Sarto (Pitti Palace, Florence), and Luca Signorelli (Uffizi)

Holy Ghost or **Holy Spirit** [*ghost*, i e spirit, a translation of Gr *pneuma*=breath, air], in Christian doctrine, the third Person of the TRINITY The Holy Ghost is sometimes defined as the aspect of God immanent in this world, in men, and in the Church Jesus' promise to his disciples of a Comforter (or Paraclete, i e , advocate), in John 14, is considered his principal reference to the Holy Ghost, and the descent of the Holy Ghost on the apostles and the gift of tongues, as told in Acts 2, is thought to be the chief manifestation of the Holy Ghost in time This incident is commemorated on Whitsunday (Pentecost) Certain Christian groups, such as the Montanists and the Society of Friends, have attributed utterances of their members to the inspiration of the Holy Ghost The dove is the symbol of the Holy Ghost For the procession of the Holy Ghost and the *filioque*, see CREED

Holy Ghost flower see DOVE FLOWER

Holy Grail, see GRAIL, HOLY

Holyhead (hŏ'lēhĕd), urban district (pop 10,700), on Holyhead Island or Holy Island, Wales, a small island off the west coast of Anglesey island, with which it has rail and road connection Holyhead is the chief port for mail and passenger service to Dublin It is a fishing port and a resort The islets North Stack and South Stack, near Holyhead, are noted for their scenery

Holy Island, England see LINDISFARNE

Holy Island or **Inisaltra** (ĭn'ĭsôl'trə), islet in Lough Derg, W Ireland It has a 10th-century round tower and the remains of several 7th-century churches and monastic buildings which were destroyed by the Danes and rebuilt by Brian Boru

Holy Land: see PALESTINE

Holy League, in French history see LEAGUE

Holy League, in Italian history, alliance formed in 1510 by Pope JULIUS II in the ITALIAN WARS for the purpose of expelling LOUIS XII of France from Italy Venice, the Swiss cantons, Ferdinand V of Spain, Henry VIII of England, and Emperor Maximilian I were the chief members of the league The Swiss, who did most of the fighting, routed the French at Novara (1513), but in the same year Julius II died and the league fell apart The French victory (1515) at MARIGNANO reestablished the French in Lombardy

Holyoke. **1** Town (pop 1,150), co seat of Phillips co , NE Colo , on Frenchman Creek near the Nebr line, in a farm area, inc 1888. **2** City (pop 53,750), SW Mass , on the Connecticut above Springfield; settled 1745, set off from West Springfield 1850, inc as a city 1873 Its industrialization began before 1850, the Connecticut being dammed for power. Paper products and cotton and other textiles are leading manufactures; machinery is also produced See C W M Green, *Holyoke, Massachusetts* (1939)

holy orders see ORDERS, HOLY

Holy Roman Empire, the political entity which came into being at the coronation (962) of OTTO I in Rome and endured until the resignation (1806) of the imperial title by FRANCIS II From the Western European point of view the Roman Empire founded by AUGUSTUS had been suspended but not ended by the abdication of the last Roman emperor in 476, it had been revived by CHARLEMAGNE in 800 and was again revived by Otto I in 962, who were the legitimate successors of Augustus This claim was contrary to the claim of the Eastern emperors (see BYZANTINE EMPIRE), who held that in 476 they had become the sole legitimate possessors of the imperial title In practice the Byzantine and the Western emperors generally recognized each other in their respective spheres, intermarriages between the Eastern and Western imperial houses were not uncommon From Charlemagne the imperial title had passed to LOUIS I, LOTHAIR I, LOUIS II, CHARLES II, CHARLES III, and ARNULF (d 899) Louis III (d 924), king of Provence, and Berengar I (d 924), king of Italy, bore the imperial title but exercised no authority, and the unity of Christian Western Europe, as established by Charlemagne, gave place to chaos The never-extinguished memory of a universal Roman Empire and of Carolingian greatness, the generally felt need for Christian unity against pagan and Moslem onslaughts, the abysmal indignity to which the PAPACY had sunk in the absence of a strong defender—these were among the factors that made possible the rebirth of the imperial idea when Otto I, king of the Germans, descended into Italy to punish BERENGAR II and to be crowned emperor by the pope ITALY and GERMANY were thus united under a single ruler, and the kingdom of Arles (see ARLES, KINGDOM OF) was added in 1033 In theory, the emperor was to be the temporal vicar of God on earth, just as the pope was the vicar of God in spiritual matters He was the supreme temporal ruler of Christendom, invested with the insignia of his office—the imperial crown and scepter and the orb (representing the world)—by the pope Actually the imperial power never reached such completeness The emperors were recognized until the 18th cent as ranking above other monarchs, but this became only a matter of diplomatic etiquette Their suzerainty early ceased to be recognized in France, S Italy, Denmark, Poland, and Hungary and probably never was seriously considered in England, Sweden, and Spain Nevertheless, the Holy Roman Empire remained, at least until the 16th cent , a European commonwealth, and English, French, and Spanish princes on various occasions sought the crown in the imperial elections The authority of the emperors in Germany and Italy was sometimes nonexistent, sometimes real, in the kingdom of Arles it was gradually usurped by France The limits of the Holy Roman Empire varied in the course of its history, some countries (e g , Hungary), though ruled by the emperors or by princes of the empire, were outside its limits, others (e g , at different periods, Flanders Pomerania, Schleswig, and Holstein) were part of the empire but were ruled by foreign monarchs (who however, took part in the imperial diets and held their lands from the emperor) Roughly speaking, the empire included Germany, AUSTRIA, BOHEMIA and Moravia, parts of N Italy, modern BELGIUM the NETHERLANDS (until 1648), and SWITZERLAND (until 1648) The emperors were elected by a procedure which was regularized in 1356 by the Golden Bull (see ELECTORS) Like most other offices until recent times, the imperial office tended to be hereditary, the electors often choosing the heir of the deceased emperor as his successor, from 1438 the crown remained in the hands of the house of HAPSBURG The imperial dignity was, in theory, obtained only after its incumbent was crowned by the pope, it became therefore customary for the German kings to proceed to Rome after their election in order to be crowned and, on the same occasion, to reassert their authority in Italy Many emperors had their heirs elected and crowned kings of the Romans (i e , German kings) during their own lifetime in order to insure their succession The coronation as German king usually took place at AACHEN Several of the earlier emperors were also crowned kings of Italy, with the iron crown of the Lombards, at MONZA or at Milan Many emperors-elect were never crowned by the pope, and after the imperial coronation (1530) of Charles V the practice ceased; later emperors took the title without papal confirmation and were crowned at FRANKFURT The ambiguities of the imperial position were manifold from the start As priest-kings the emperors entered in conflict with the papacy, a conflict which devolved not only from the question of INVESTITURE (settled in 1122, see WORMS, CONCORDAT OF), but from the whole relationship between spiritual and temporal power It culminated in the titanic struggle of the emperors FREDERICK I (1152–90) and FREDERICK II (1212–50) against the popes ALEXANDER III, GREGORY IX, and INNOCENT IV The papacy won out, and the emperors ceased—except during the Great Schism of the 15th cent —to interfere seriously with papal affairs The second ambiguity, intimately connected with the first, was the untenable dual position of the emperors as rulers of two countries—Germany and Italy—which were deeply separated by geography, culture, and political conditions In Germany, FEUDALISM prevailed From Otto I until Frederick I, Germany was divided into several large duchies—e g , BAVARIA, SAXONY, FRANCONIA, THURINGIA, Upper and Lower Lorraine (see LOTHARINGIA)—whose lords often exercised greater power than their liege After the rebellion of HENRY THE LION the duchies broke up and subdivided into smaller units—some 300 by 1648 While the emperors were hardly capable of holding Germany together and defending it from foreign attacks, they attempted again and again to establish their authority in Italy against the opposition of the virtually independent towns (see COMMUNE), of the temporal claims of the popes (see PAPAL STATES), and of the unruly nobles Frederick I failed to put down the LOMBARD LEAGUE, which was supported by the pope Frederick II, who had inherited Naples and Sicily, was an Italian rather than a German ruler, while he resided at Palermo, Germany went its own way His conflict with the papacy, paralleled by the struggle between GUELPHS AND GHIBELLINES all over Italy, ruined the imperial authority in Italy as well After the death (1254) of his heir, CONRAD IV, an interregnum of 19 years followed Neither Richard, earl of Cornwall, nor Alfonso X, king of Castile, whom opposing factions had elected German kings, actually held any power Anarchy resulted, and the robber barons and feuding nobles, who had been somewhat curbed since the 11th cent again terrorized the land The election (1273) of RUDOLF I, first German king of the Hapsburg line, restored a measure of order, but after his death rival kings again began to contest the elections Social turmoil was aggravated by the HUSSITE WARS of the 15th cent and ended only in the 16th cent when the petty nobles, championed by FRANZ VON SICKINGEN, were put down and when the rebellious peasantry was reduced to subjection in the PEASANTS' WAR In the meantime the German towns had grown in wealth and power and, in imitation of the Italian cities, had organized into communes and leagues for self-defense As a counterbalance to the nobles they were generally favored by the emperors, who granted them generous charters Many of these (e g , Frankfurt, Nuremberg, and Augsburg) emerged as free imperial cities—republics under the direct jurisdiction of the emperor —and gained a voice in the DIET It was chiefly with the help of the cities, which were the richest elements in the empire, and of the great ecclesiastic princes (e g , the archbishops-electors of MAINZ, TRIER, and COLOGNE and the bishops of WÜRZBURG, BAMBERG, and SALZBURG), who were imperial appointees, that the emperors succeeded in keeping a measure of authority Their power also depended, of course, on the size and wealth of their own hereditary domains Thus the Luxemburg dynasty (HENRY VII, CHARLES IV, WENCESLAUS, and SIGISMUND) was primarily concerned with Bohemia, its hereditary kingdom, and the Hapsburgs became increasingly interested in the aggrandizement and preservation of their immense hereditary empire at the expense of the unity of the Holy Roman Empire Charles IV, however, through the Golden Bull, greatly enhanced the imperial dignity, and MAXIMILIAN I instituted important constitutional reforms at the request of the diet Those were the creation of a council of regency (see REICHSREGIMENT) which acted as a cabinet, and of an imperial court of justice Actually, however, these two bodies turned out to be less important than the Austrian chancellery at Vienna (since 1438 the emperors had usually resided in Vienna) and the aulic council (the emperor's privy council) With the accession of CHARLES V (1519) and more particularly that of FERDINAND I (1558), the affairs of the empire became virtually identical with those of the house of Austria This development was furthered by the REFORMATION, which aligned the German Protestant princes against the emperors, who were committed to the defense of Catholicism Charles V defeated (1547) the Protestant SCHMALKALDIC LEAGUE, but his victory did not last In the THIRTY YEARS WAR (1618–48, see also FERDINAND II, FERDINAND III, WALLENSTEIN; PROTESTANT UNION) the emperor, allied with Spain, faced the Protestant princes and their chief allies, Sweden and France It ended with the virtual dissolution of the empire (see WESTPHALIA, PEACE OF) The more than 300 territorial princes of the empire all attained territorial sovereignty, limited only by vague provisions against their joining alliances di-

rected against the emperor The diet was reduced to impotence, and the imperial title became largely honorific Nevertheless, the outward forms of the empire were preserved and the emperors, thanks to their hereditary lands, remained powerful monarchs The peace merely legalized the state of things such as it had been since the success of the Reformation, which had shattered the dream of a politically united Christian Europe and forwarded the principle of nationality, a principle entirely alien to the Holy Roman Empire In their wars against Louis XIV (see DUTCH WARS, GRAND ALLIANCE, WAR OF THE, SPANISH SUCCESSION, WAR OF THE), the emperors further lost prestige, a loss which could not be offset by the reconquest of Hungary from the Turks The meaninglessness of the imperial concept became flagrant in the War of the AUSTRIAN SUCCESSION (1740–48) and the SEVEN YEARS WAR (1756–63) The death (1740) of Emperor CHARLES VI ended the male line of the Hapsburg dynasty, the elector of Bavaria was chosen (1742) as Emperor Charles VII, while MARIA THERESA, who by virtue of the PRAGMATIC SANCTION had inherited the Hapsburg lands, defended her inheritance against Prussian, Bavarian, and Saxon claims and against France and Spain By 1745 FREDERICK II of Prussia and the electors of Saxony and Bavaria had dropped out of the war and supported the election of Maria Theresa's husband, FRANCIS I, but in 1756 PRUSSIA again joined in the alliance against Austria, and in the Peace of Hubertusburg (1763) Prussia emerged as the leading power in the empire FRANCIS I's successor, JOSEPH II, was a brilliant monarch who took his position as emperor seriously and sought to reorganize and centralize the remnants of imperial administration He failed, partly because of his impetuosity, but mainly because of Prussian opposition Two years after his death began the FRENCH REVOLUTIONARY WARS The Treaty of Lunéville (1801) with victorious France provided for a complete reorganization and prepared the final dissolution of the empire In 1803 the diet deposed and indemnified the majority of the princes, creating a smaller number of larger states, which eventually joined (1806) the CONFEDERATION OF THE RHINE, under the protection of Napoleon I In 1804 Emperor FRANCIS II took the title Francis I, emperor of Austria, and in 1806 he renounced the crown of the Holy Roman Empire The empire of NAPOLEON I, who meant to assume the succession of Charlemagne, was short-lived The German Empire of 1871–1918 and the Third Reich [*Reich*-empire] of Hitler were in no manner successors of the Holy Roman Empire, being based on nationality instead of universality The following is a list of emperors and German kings from 936 to 1806, the dates in parentheses refer to their reigns as German kings

Saxon dynasty Otto I (936–73), Otto II (973–83), Otto III (983–1002), Henry II (1002–24)

Salian or Franconian dynasty Conrad II (1024–39), Henry III (1039–56), Henry IV (1056–1105), Henry V (1105–25)

Lothair II (1125–37, duke of Saxony)

Hohenstaufen dynasty and rivals Conrad III (1138–52), Frederick I (1152–90), Henry VI (1190–97), Philip of Swabia (1198–1208) and Otto IV (anti-king, 1198–1208, king, 1208–12, emperor, 1209–15, Guelph), Frederick II (king, 1212–37, emperor, 1220–50), Conrad IV (1237–54) and antikings Henry Raspe (1246–47) and William, count of Holland (1247–56)

Interregnum (1254–73) Richard, earl of Cornwall, and Alfonso X (of Castile), rivals

Hapsburg, Luxemburg, and other dynasties Rudolf I (1273–91, Hapsburg), Adolf of Nassau (1292–98), Albert I (1298–1308, Hapsburg), Henry VII (1308–13, Luxemburg), Louis IV (1314–46, Wittelsbach), Charles IV (1346–78, Luxemburg), Wenceslaus (1378–1400, Luxemburg), Rupert (1400–1410, Wittelsbach), Sigismund (1410–37, Luxemburg)

Hapsburg dynasty Albert II (1438–39), Frederick III (1440–93), Maximilian I (1493–1519), Charles V (1519–58); Ferdinand I (1558–64), Maximilian II (1564–76), Rudolf II (1576–1612), Matthias (1612–19), Ferdinand II (1619–37), Ferdinand III (1637–57), Leopold I (1658–1705), Joseph I (1705–11); Charles VI (1711–40)

Interregnum (1740–42)

Charles VII (1742–45, Wittelsbach-Hapsburg)

Francis I (1745–65, Lorraine, husband of Maria Theresa)

Hapsburg-Lorraine dynasty· Joseph II (1765–90), Leopold II (1790–92), Francis II (1792–1806)

Thompson, *Feudal Germany* (1928), T F Tout, *Empire and Papacy* (Vol II of *Periods of European History*, ed by Arthur Hassall, 1893–1901) See also bibliographies under MIDDLE AGES and GERMANY

Holyrood (hō'lērōōd) [i.e., holy cross], former residence of Scottish kings, in Edinburgh. In 1128 David I founded Holyrood Abbey on this site, where according to legend he was saved from an infuriated stag by the miraculous interception of a cross. The abbey's Chapel Royal, still standing, contains the remains of David II, James II, James IV, Lord Darnley, and others James IV began the present building in 1501, Charles II, with designs by Sir William Bruce of Kinross, rebuilt it in 1670–79 The palace was partially destroyed by the English in 1544, was the scene of the murder of David RIZZIO, favorite of Mary Queen of Scots, in 1566, and was almost completely destroyed by fire in 1650

Holy Sepulcher (sĕp'ŭlkur), church in Jerusalem, officially the Church of the Resurrection It is in the east central part of the Christian quarter, occupying the supposed site of Jesus' tomb Steps connect it with chapels of St Helena and of the Invention of the Cross, St HELENA pointed out these sites (see CROSS) The center of the church is Romanesque, the shrine itself being at the west end of the nave in a great rotunda, the entrance of the church is from the south The fabric built by the Crusaders is preserved, somewhat disguised, in the present building The church has been much quarreled over by various Christian groups, and the Orthodox got control of most of it from the Turks There are partitioned areas for the use of Roman Catholics (in the custody of the Franciscans), the Copts, the Syrian Jacobites, and the Gregorian Armenians

Holy Spirit: see HOLY GHOST

Holy Spirit plant see DOVE FLOWER

Holy Thursday, see ASCENSION

holy water, in Christian churches, water blessed to symbolize spiritual cleansing In Roman Catholic churches there is a bowl (stoup or font) of holy water near the doors, so that the faithful may bless themselves with it on entering Holy water is used in formal blessings, including the ASPERGES

Holy Week, week before EASTER Its chief days are named PALM SUNDAY, MAUNDY THURSDAY, GOOD FRIDAY, and Holy Saturday In Christian life it is a week of devout observance, commemorating the Passion and Jesus' death on the cross The liturgies have special features and services, e.g., TENEBRAE In the West these rise to a climax with the ceremonies of Holy Saturday On this day the paschal CANDLE is blessed with the hymn *Exsultet*, and Lent ends at noon

Holywell (hō'lēwĕl, -wul), urban district (1931 pop 3,424, 1943 estimated pop 6,500), Flintshire, Wales, NW of Chester near the Dee estuary It is named for St Winifred's Well, which, according to legend, sprang up on the spot where St Winifred was beheaded A Gothic chapel, built by Margaret, mother of Henry VII, covers the well and is a place of pilgrimage for Roman Catholics Holywell is a livestock market with paper and woolen mills

Holywood (hō'lēwōōd), urban district (pop 5,078), Co Down, Northern Ireland, on the southeast coast of Belfast Lough It is a seaport and resort St Laserian founded a monastery here in the 7th cent, there are ruins of the Franciscan monastery (burned 1572) which followed it in the 13th cent

holy year. see JUBILEE

Holz, Arno (är'nō hōlts'), 1863–1929, German critic and poet His influence as critic and as founder of the naturalist school is more important than his original work, for he was influential in the development of Hauptmann Among his works are the literary experiment *Papa Hamlet* (with Johannes Schlaf, 1889), the drama *Die Familie Selicke* (also with Schlaf, 1890), *Die Kunst* [art] (1891), and the volume of poems *Phantasen* (1899)

homage· see FEUDALISM

Homam (hō'-), the same as HEMAM

Homburg (hōm'bōōrk), town (pop 24,714), Hesse, W Germany, N of Frankfurt, a famous spa and long a fashionable resort It was until 1866 the capital of the landgraviate of Hesse-Homburg Its official name is Bad Homburg

Home, Daniel Dunglas, 1833–86, American spiritualist medium, b Edinburgh, Scotland He was brought to the United States when a small child and was brought up in Connecticut At 13 he claimed to have discovered his gifts for dealing with spirits, and from 1850 to his death he had a triumphant career as a medium, always retaining his amateur status but growing well-to-do from gifts showered on him by the great and near-great of Europe and America In his drawing-room séances furniture moved with no apparent cause, ghostly hands appeared, and furniture and Home himself would rise in the air There was much dispute about the validity of these highly physical manifestations of spirits, Robert Browning, for instance, attacked Home scathingly as Mr Sludge, the Medium, but Elizabeth Barrett Browning admired him Though numerous efforts were made to expose him, none was successful See Jean Burton, *Heyday of a Wizard* (1944)

Home, Henry: see KAMES, HENRY HOME, LORD.

Home, John, 1722–1808, Scottish dramatist His tragedy *Douglas* (1756), containing the much-quoted speech beginning, "My name is Norval, on the Grampian hills," was a great success, the character of Lady Randolph was portrayed by Peg Woffington and later by Mrs Siddons. See biography by A E Gipson (1917).

Homedale, village (pop. 857), SW Idaho, SW of the Snake and S of Parma, on the Idaho portion of the OWYHEE river project.

home economics deals with homemaking and the relation of the home to the community. Formerly limited to problems of food (nutrition and COOKERY), clothing, sewing, textiles, household equipment, cleaning, housing, hygiene, and household economics, today it includes many aspects of family relations, parental education, consumer education, and institutional management The scientific aspects were developed under the leadership of Ellen H RICHARDS, more recent is the emphasis on the social, economic, and aesthetic phases Although called in the past home science, household arts, domestic science, and domestic economy, the subject as a whole is known today as home economics, and specialized terms are used for its subdivisions The education of women has in many ages and conditions of society emphasized a training in such household arts as needlework, cookery, the management of servants, the preparation of medicines, and food preservation, such instruction was once given mainly in the home and from a practical rather than a scientific standpoint In the United States the teaching of cooking and sewing in the public schools was coincident with manual training for boys, dating from the '80s State institutions, notably in Iowa, Kansas, and Illinois in the '70s, pioneered in introducing home economics courses on the college level The widening scope of the field has created professional careers for women in teaching, research, extension work, dietetics, institutional administration, writing, and social service In 1914 the Smith-Lever Act made Federal funds available for extension work in home economics and agriculture in cooperation with the states, through this provision, supplemented by later acts, home demonstration work is carried on in many rural localities The Smith-Hughes Act of 1917 instituted secondary school vocational education in home economics and other fields See H T Craig, *The History of Home Economics* (1945), publications of the U S Bureau of Human Nutrition and Home Economics

home missions see MISSIONS

Home of Polwarth, Sir Patrick, or **Sir Patrick Hume of Polwarth** (both hūm, pōl'wŭrth), 1641–1724, Scottish statesman Devoted to Presbyterianism, he opposed the government of Charles II, aided the rebellion (1685) of the duke of MONMOUTH, fled to France, and returned when William III ascended the throne William made him Baron Polwarth (1689), sheriff of Berwick (1692–1710), lord chancellor of Scotland (1696–1702), and earl of Marchmont (1697) See G H Rose, ed, *The Marchmont Papers* (1831)

homeopathy (hōmēŏ'pŭthē) [Gr, =similarity of feeling], system of medicine based upon certain observations of Samuel HAHNEMANN It was opposed to the established medical system, which was called by Hahnemann allopathy The observation that quinine, effective in treating malaria, induces some of the symptoms of malaria if given to a person in normal health, led to experimentation with other drugs and to the principle that disorders are cured by drugs which produce effects in the body similar to the disorder This is expressed by the phrase *Similia similibus curantur* (or *curentur*) Very small doses of drugs are used in treatment Schools of medicine teaching the homeopathic system are recognized in Europe and the United States See C E Wheeler, *An Introduction to the Principles and Practice of Homeopathy* (1919)

Home Owners' Loan Corporation, established in the U S government in 1933 to help stabilize real-estate depreciated during the depression and to refinance the urban mortgage debt The HOLC, granting long-term mortgage loans amounting to over $3,000,000,000 at low interest rates (5 per cent and later 4 5 per cent) to some 1,000,000 homeowners facing loss of their property, ceased its lending activities in June, 1936, by the terms of the Home Owners' Loan Act, Later the corporation made additional advances to borrowers, and by the end of 1948 all but $368,936,082, or 10 percent, of the HOLC's total investments was liquidated

Homer, principal figure of ancient GREEK LITERATURE, the first European poet Two poems are attributed to him, the ILIAD and the ODYSSEY, written in a literary type of Greek, Ionic in basis with Aeolic admixtures During most of the 19th cent the "Homeric question" was the great dispute of scholarship—trying to analyze the two works by various tests, usually to show they were simply concatenations of older narrative poems. The problem is now generally abandoned, modern scholars generally agree that there was a poet named Homer, who lived before 700 B C , probably in Asia Minor, that he wrote for an aristocratic society, and that the *Iliad* and the *Odyssey* are each the product of one poet's work, developed out of older legendary matter. Some assign the *Odyssey* to a poet who lived slightly after the author of the *Iliad* Legends about Homer were numerous in ancient times. He was said to be blind Seven different cities claimed him—Athens, Argos, Chios, Colophon, Rhodes, Salamis, and Smyrna. Homer's influence is peculiarly transcendent, e.g., he was the *sine qua non* of Athenian education and his heroes were worshiped in many parts of Greece. The *Iliad*

and the *Odyssey* make together the epic prototype; they are written in dactylic hexameter and are of nearly the same length The *Iliad* is a highly unified work, splendid in its dramatic action, colorful in its detail, and majestic in its movement Matthew Arnold's statement of the characteristics of Homeric "grand style" is well known—rapidity, plainness in thought and action, and nobility The *Odyssey* is episodic, its parts skillfully connected The atmosphere of adventure and beneficent fate in the *Odyssey* contrasts with the heavier tone and tragic grandeur of the *Iliad* The two poems are among the most widely read literary works today as in the ages past For other poems attributed to Homer, see HOMERIC HYMNS

Homer, Louise, 1871?–1947, American operatic contralto, whose maiden name was Louise Dilworth Beatty, b Pittsburgh She studied in Philadelphia, Boston, and Paris and made her debut (1898) in Vichy, France She sang at Covent Garden, London, in 1899 and was a member (1900–1919) of the Metropolitan Opera Company, afterward singing with the Chicago Opera Company until 1925 She sang the principal contralto roles in Verdi's *Aïda* and *Il Trovatore*, Ponchielli's *La Gioconda*, Humperdinck's *Hansel and Gretel* and *Königskinder*, and various of Wagner's operas, but she considered Orpheus, in Gluck's opera, her greatest role In 1895 she married her harmony teacher, **Sidney Homer,** 1864-, American song composer He studied in Boston with G W Chadwick and in Munich and Leipzig He composed some chamber music and two works for organ, but is principally known as the composer of over 100 songs, to poems by such poets as TENNYSON, Stevenson, Browning, W E Henley, Vachel Lindsay, and Christina Rossetti See Homer's *My Wife and I* (1939)

Homer, Winslow, 1836–1910, American landscape, marine, and genre painter He was born in Boston, where he later worked as lithographer and illustrator In 1861 he was sent to the battle front as war correspondent for *Harper's Weekly* His war pictures and studies of Negro life after the war won him international popularity Many of his studies of everyday life, such as *Crack the Whip* (Metropolitan Mus), date from this period, during which he was a popular magazine illustrator In 1876 Homer abandoned illustration to devote himself to painting He made some short trips to Europe but found his inspiration in the American scene and, eventually, in the sea, which he painted at Prouts Neck, Maine, in the summer and in Florida or the Bahamas in the winter His oils and water colors alike are characterized by their directness, realism, objectivity, and splendid color But it is above all as a water-colorist that Homer excelled After 1884 he lived the life of a recluse His powerful and dramatic interpretations of the sea in water color have never been surpassed in their kind and hold a unique place in American art They are in leading museums throughout the United States Characteristic water colors are *The Gulfstream*, *Breaking Storm*, and *Maine Coast* (all Art Inst, Chicago) and *The Hurricane* (Metropolitan Mus) Characteristic oils include *The Gulf Stream* and *Moonlight—Wood's Island Light* (Metropolitan Mus), *Eight Bells* (Addison Gall, Andover, Mass), and *A Summer Night* (Luxembourg Mus, Paris) See biographies by W H Downes (1911) and Lloyd Goodrich (1944)

Homer 1 Town (pop 3,497), parish seat of Claiborne parish, NW La, NE of Shreveport, settled 1830, inc 1850 It is an oil, lumber, and cotton center 2 Village (pop 1,145), S Mich, on the Kalamazoo and SE of Battle Creek, settled 1832, inc 1871 Flour and dry-milk products are made 3 Village (pop 2,928), central N Y, SW of Syracuse, settled 1791, inc 1835 It is a farm trade center with some manufactures

Homer City, agricultural borough (pop 2,078), SW Pa, NW of Johnstown, inc 1872

Homeric Hymns (hōmĕ'rĭk), name applied to hexameter poems anciently attributed to HOMER Composed probably between 800 and 400 B C, they are complimentary verses to the various gods, principally Aphrodite, Apollo, Demeter, and Hermes Although sometimes of great beauty, they are important mainly as prime sources for Greek religion and cults The *Margites* (7th or 6th cent B C), a comic poem, and *The Battle of the Frogs and Mice* (5th–2d cent B C), a mock epic, were also attributed to Homer.

Home Rule. The Home Rule movement in Ireland was started in 1870 under the leadership of Isaac Butt, who advocated Irish autonomy in purely Irish matters Ireland at this time was governed under the provisions of the Union of 1800, which granted Ireland representation in the English Parliament. The miserable economic conditions of the Irish people and the work of propagandists of the '50s convinced many of the Irish that their prosperity was dependent upon home control of economic policies by their own governing body The sentiment grew slowly in the '70s, but received a tremendous impetus from the depression of 1877–79 and from the rise of Charles Stewart PARNELL, who unified the Irish party in Parliament and by resorting to obstructionist tactics and opposing all legislation whatsoever drew attention to the Irish question At the same time many Irish felt that the question could not be settled constitutionally and resorted to violence The Phoenix Park murder of two British officials in 1882 was one incident in a long-growing campaign of violence In 1886 GLADSTONE, who held his office as prime minister by an alliance with Parnell, introduced the First Home Rule Bill, which would have granted the Irish a unicameral legislature, but kept many powers vested in the British Parliament, including that of taxation The bill, despite the meagerness of its concessions, was generally acceptable to the Irish Its failure to pass resulted in more extreme demands by the Home Rulers The government turned to land legislation (see IRISH LAND QUESTION) to mollify the country After the Irish group in Parliament split over the Parnell scandal in 1890 it lost much of its effectiveness, despite increasing agitation in Ireland In 1893 the Liberals passed in the House of Commons the Second Home Rule Bill providing for a bicameral legislature for purely local matters and Irish representation in Parliament to vote on Irish taxation This was generally considered by Home Rule advocates as less satisfactory than the 1886 bill, but it was, in any event, defeated by the House of Lords The Home Rule movement as such was losing ground in Ireland and the Gaelic League and Irish Ireland ideals of an increasingly self-conscious Irish people culminated in the founding of SINN FEIN c 1900 The Irish Council Bill of 1907, which was to establish a purely Irish body to direct the spending of Irish tax proceeds, failed because of Irish opposition In 1912 the Third Home Rule Bill Passed the House of Commons The most notable difference from the bill of 1893 was that it would have eventually given control of the police to Ireland A tremendous outcry arose in Protestant Ulster, which feared Catholic domination Private armies—the Ulster Volunteers and, in the South, the Irish Volunteers—were raised, and civil war threatened if the bill became law In 1914 Commons again passed the bill, the House of Lords excluding Ulster from its provisions Commons voted to allow Ulster to vote itself out of Home Rule for six years At the outbreak of the First World War the bill was passed once again with the proviso that it should not go into effect until after the war, the government pledging to pass a new law for Ulster's benefit The law never took effect for, in 1916, the Easter Rebellion gave Sinn Fein its greatest impulse In 1918 S Ireland elected to Parliament only Sinn Fein members pledged to republicanism instead of Home Rule Lloyd George entered into negotiations with the *de facto* Irish government headed by Eamon De Valera The Irish Free State, with a dominion status, was recognized by an Anglo-Irish treaty in 1921 The remaining ties with Great Britain were gradually discarded In 1936 the office of governor general was abolished, in 1938 the new Irish constitution declared the Irish Free State to be the sovereign country of Ireland, or Eire, associated with the British Commonwealth of Nations in external policy, and on April 18, 1949, the country became the republic of Ireland, completely independent of any legal ties to Britain The six counties of Northern Ireland are now governed under the provisions of the Fourth Home Rule Bill of 1920, which was meant to set up two parliaments, but which was rendered void in the South by the establishment of the Irish Free State The modern descendants of the Home Rule movement in Ireland continue to agitate for an end of this partition of the country See James O'Connor, *History of Ireland* (2 vols, 1925), F H O'Donnell, *History of the Irish Parliamentary Party* (1910), Thomas Ireland, *Ireland Past and Present* (1942)

home rule, municipal, system adopted in many states of the United States by which a city is given the right to draft and amend its own charter and to regulate purely local matters without the interference of the state legislature The phenomenal growth of urban centers in the latter part of the 19th cent brought new and complex problems, the state legislatures, which had controlled most CITY GOVERNMENT, found themselves incapable of handling the fast-growing cities In 1875 Missouri adopted the first municipal home rule clause in her constitution, other states have followed her lead Local and general concerns cannot, of course, be strictly delimited, and the tendency of the courts has been to restrict city powers For this reason and others, municipal home rule has not, in general, effected all the improvement expected of it The form of the rule varies greatly from state to state The term "municipal home rule" applies strictly only to the system when embodied in a state constitution, but it is also loosely used by cities to which relative independence has been granted by special legislative act See H L McBain, *The Law and Practice of Municipal Home Rule* (1916), J D McGoldrick, *Law and Practice of Municipal Home Rule, 1916–1930* (1933)

Homerville, town (pop 1,522), co seat of Clinch co, SE Ga, SW of Waycross near the Okefenokee Swamp, founded 1859 on the railroad, inc 1869. It is the center of a farm area (tobacco, cotton) and a pine region producing turpentine.

Homestead. 1 City (pop. 3,154), SE Fla., SSW of Miami With the arrival of the railroad in 1904, the city developed as a trade and shipping center for the extremely productive Redlands area, which yields many varieties of citrus fruits and winter vegetables There is an agricultural experiment station Near by is Royal Palm State Park, a wildlife sanctuary 2 Industrial borough (pop 19,041), W Pa., on the Monongahela adjoining Pittsburgh, inc 1880 It is noted for large iron and steel works (chiefly in the neighboring borough of Munhall today) The works, formerly owned by the Carnegie company, in 1892 saw the outbreak of the **Homestead strike,** one of the most bitterly fought industrial disputes in U S labor history, lasting nearly five months. Henry C FRICK, manager of the plant, hired about 300 men from the Pinkerton agency to protect property and nonunion workers whom he had employed, and on July 6 an armed battle broke out between the Pinkertons and strikers in which a number of men were killed or wounded The governor called out the state National Guard, under the protection of which the company kept their nonunion men at work and broke the strike

homestead. In addition to its earlier meaning of the home and the home grounds, the word has acquired special meanings in the United States Homestead laws have been enacted in many of the states exempting homesteads from seizure for debt, with some exceptions The object is to save families from destitution Federal homestead laws enabled settlers to acquire farms on generous terms In the financial depression that began in 1929, it was observed that a home with a small piece of land, even a fraction of an acre, was at least partial insurance against want, and efforts to secure such "subsistence homesteads" were encouraged by the government The subsistence homestead effectively supplements earnings from some other source, e g, from home industries See Ralph Borsodi, *Flight from the City* (1933)

Homestead Act, 1862, passed by the U S Congress The U S government sold land to settlers in the West for purposes of revenue As the West became politically stronger, however, pressure was increased upon the U S Congress to guarantee free land to settlers (see FOOT RESOLUTION, FREE-SOIL PARTY, PREEMPTION ACT) In 1852 a bill providing for free distribution of land was defeated in Congress, and in 1859 another such bill was passed in Congress but was vetoed (1860) by President Buchanan With the ascendancy of the Republican party (which had committed itself to homestead legislation) and with the secession of the South (which had opposed free distribution of land), the Homestead Act, sponsored by Galusha A GROW, became law The Homestead Act provided for the transfer of a quarter section of unoccupied public land to each homesteader on payment of a nominal fee after five years of residence

Homestead National Monument of America: see NATIONAL PARKS AND MONUMENTS (table)

Homestead strike see HOMESTEAD, Pa

Homewood. 1 City (pop 7,397), N central Ala, a suburb of Birmingham, inc 1921 as Edgewood, named Homewood 1926 2 Village (pop 4,078), NE Ill, south residential suburb of Chicago, platted 1852, inc 1893 Glenwood Manual Training School for boys is here Washington Park race track is near by

homicide (hō'mĭsīd), taking of human life Homicides which are neither justifiable nor excusable are crimes Such homicide if committed with MALICE aforethought IS MURDER, otherwise it is MANSLAUGHTER A homicide is excusable if it is the result of accident not amounting to culpable negligence Justifiable homicides are intentional killings done in accordance with legal obligation or in circumstances where the law recognizes no wrong They include the execution of criminals, killings necessary to prevent a felony or to arrest a suspected felon, and killings in self-defense The plea of self-defense is allowable only when the slayer reasonably feared death or serious bodily injury to himself at the hands of the person slain In some states one may lawfully use killing force, if needed, in resisting an invasion of his home or his real property Other states require that the home or property be abandoned if homicide is needed to protect it

Hominy (hŏm'ĭnē), city (pop 3,267), NE Okla., NW of Tulsa, in an agricultural and oil-producing area Established as an Indian subagency in 1874, it was laid out in 1905 and incorporated in 1908.

hominy [Algonquian], hulled corn, coarsely broken or ground into small pieces of about the same size It was an important pioneer food and was prepared by soaking the grains in weak wood lye until the hulls came free and floated to the top, after which it was washed and boiled till tender, it was often served with meat It is now usually marketed under the name of hominy grits Hominy, especially when it is very coarse, is sometimes called samp

Homma, Masaharu (masä'härōō hōmä'), 1888?–1946, Japanese general He led the invasion of the Philippines in 1941. After the war he was convicted of responsibility for war atrocities and executed in April, 1946.

Homoeans, homoion, homoiousion, and **homoousion:** see ARIANISM.

Homs (hōms), city (pop. 69,000), W Syria, on the Orontes river and S of Hama It is on the trade route from Damascus to Alep and is on a fertile plain It has therefore been of importance from ancient times, when it was Emesa There was a great temple to **Baal** (or Helios-Baal), the sun-god Emesa became of startling prominence in the 3d cent A D when one of the priests of the temple became Roman emperor as Heliogabalus for a short and discreditable period Aurelian here defeated the forces of Zenobia of Palmyra in 272 The Arabs took the town in 636, and an old Arab castle is in ruins there It finally passed into Turkish hands and remained there—except for the short period after 1832 when Ibrahim Pasha defeated the Turks and took the city—until the creation of modern Syria. The name is also written as Hems and Hims

Honan or **Ho-nan** (both hō'năn', hŭ'nan'), province (63,760 sq mi , pop 26,994,209), E China The *capital* is Kaifeng The surface is largely hilly to mountainous Through the northern part of this well-watered province the Yellow River flows, and in the east is the Hwai river, both are generally navigable The principal north-south and east-west lines of China, the Peiping-Canton RR and the Lung-Hai RR respectively, cross Honan, which also has many good highways The province is densely populated and prosperous Though the climate is dry, loess provides fertile soil, wheat, millet, kaoliang, and cotton are raised Coal is the most abundant mineral, and iron, lead, and pottery clay are found The Lungmen valley, near Loyang, contains colossal carvings of the Buddha, some 60 ft high, and many ruined temples

Honanfu, China see LOYANG

Honda (ōn'da), city (pop 12,424), N central Colombia Founded c 1565 and formerly a major shipping point because of the near-by rapids on the MAGDALENA, Honda has declined since the building of the railroad (1884), from a point down the river, to Bogotá and GIRARDOT

Hondecoeter, Melchior d' (mĕl'kyôr dŭ hōn'dukōōtur), 1636–95, Dutch animal painter His grandfather was Gillis d'Hondecoeter (d c 1637), Flemish landscape and bird painter, his father was Gysbert d'Hondecoeter (c 1604–1653), animal painter After four years at The Hague, where he painted the menagerie at Loo for Wilham III, Melchior settled in Amsterdam He painted all forms of animal life, but it is as a painter of birds and fowl that he is especially known, and in this field he has few equals Among the best are *Peacock and Turkey* (Louvre), *Game and Poultry* (Brussels), *Peacocks* (Metropolitan Mus), and the very fine *Floating Plumage* (Amsterdam)

Hondo, Japan see HONSHU

Hondo (hŏn'dō), unincorporated town (pop c.3,000), co seat of Medina co , SW Texas, W of San Antonio, in a farm and livestock area

Honduras (hŏndōō'rus,–dyōō'–), republic (59,160 sq mi , pop. 1,200,542), Central America The capital is TEGUCIGALPA Honduras is bounded on the north by the Caribbean, on the east and the south by Nicaragua (the boundary is disputed), on the south by the Gulf of Fonseca, on the southwest by Salvador, and on the west by Guatemala Principally along the western half of the narrow northern coast of Honduras (c 400 mi long) are the vast banana plantations established by U S companies, whose exports provide the nation with its main source of revenue The plantations are linked by the only railroads in the country to SAN PEDRO SULA and the principal ports, TRUJILLO, LA CEIBA, TELA, and PUERTO CORTÉS The short stretch of southern coast on the Gulf of Fonseca, traversed from Salvador to Nicaragua by the INTER-AMERICAN HIGHWAY, is semiarid and unproductive, with a small port, AMAPALA, the sole Pacific outlet Between the coasts are long ranges extending from west to east at altitudes of 5,000 to 7,000 ft., which limit heavy rainfall to the north, they end in the jungles and swamps of the MOSQUITO COAST, where most of the present Indian population (about 9 percent of the total) lives Two large river systems, the PATUCA and the ULÚA, drain most of the north The rugged terrain was not easily colonized. First visited by Columbus in 1502, the region was reached (1524) by Cortés, who ordered Pedro de ALVARADO to found some of the coastal towns Silver mining developed COMAYAGUA and Tegucigalpa Among the Latin American countries exporting silver, Honduras ranks third, but bananas are the republic's chief export Other exports include abacá, cigarettes, and hardwoods. Honduras, potentially wealthy in resources, is undeveloped, with half the mestizo population (about 87 percent of the total) illiterate Roads are few, but air transport has opened remote areas In 1821 Honduras gained independence from Spain and became part of Iturbide's Mexican Empire, from 1825 to 1838 it was a member of the CENTRAL AMERICAN FEDERATION, of which the Honduran patriot, Francisco MORAZÁN, was president Thereafter, political factions fought bloody wars to control the republic, and Honduras was subjected to interference from its Central American neighbors. Great Britain long controlled the Mosquito Coast and the BAY ISLANDS, and William WALKER attempted a "liberation" in 1860 Although Honduras often sought, with Salvador and Nicaragua, to reestablish a Central American federation, the attempts were frustrated by political and personal animosities In 1933 the boundary with Guatemala was finally fixed While the country is generally self-sufficient in foodstuffs, foreign capital is the basic factor in the nation's economy See D G Munro, *Five Republics of Central America* (1918), Samuel Crowther, *The Romance and Rise of the American Tropics* (1929), Ralph Hancock, *The Rainbow Republics* (1947)

Hone, Philip, 1780–1851, American diarist, b New York city With his brother he built up an auctioneering business which brought him money, prestige, and an intimate knowledge of New York city He left business for politics, becoming mayor of New York in 1825 His diary (1828–51), opinionated and shrewd, contains invaluable records of life in New York city and the development of the Whig party during this period See selections from his diary, ed by Bayard Tuckerman (2 vols , 1889) and by Allan Nevins (2 vols , 1927)

Hone, William, 1780–1842, English political satirist and pamphleteer His satires, illustrated by Cruikshank, were widely read, in 1817 he was tried for publishing parodies on the Creed and the Litany, but was acquitted He is remembered for his compilations, among them the *Every Day Book* (1826–27) See biography by F W Hackwood (1912)

hone, a fine stone or an artificial substitute, used as an abrasive for sharpening edge tools, e g , the chisel, knife, and razor It is used dry, with water, or with oil The whetstone is similarly used but is coarser The oilstone is a hone or a whetstone used with oil

Honea Path (hŭn'ē), textile town (pop 2,765), NW S C , near the Saluda S of Greenville

Honegger, Arthur (hŭ'nĕgur, Fr artür ônĕgĕr'), 1892–, Swiss-French composer, studied at the Paris Conservatoire He was one of *Les Six* (see SATIE, ERIK) His music, which ranges from suite to the intensely religious, is marked by incisive rhythms and sharp dissonances which often are the result of his use of polytonality Besides *Pacific 231* (1923)—the first of three *mouvements symphoniques* —his outstanding works are of a theatrical nature, such as ballets, the opera *Judith* (1926), music for the moving picture *Mayerling* (1937?), and the oratorio *King David* (1921–23) In the opera *Antigone* (1927), Jean Cocteau was his librettist. He has also set texts of Paul Claudel

Honeoye Falls (hŭn'ēoi'), village (pop 1,274), W N Y , S of Rochester, inc 1838

Honesdale (hōnz'dāl), industrial borough (pop 5,687), co seat of Wayne co , NE Pa , on the Lackawaxen river and NE of Scranton, settled 1803, laid out 1826, inc 1831 Its manufactures include shoes, hoists, and textiles On Aug 8, 1829, the first trial run of a locomotive in the United States was made here Honesdale was the terminus of the Delaware and Hudson Canal The borough was named for Philip Hone

honey, sweet, viscid fluid produced by the bee from the nectar of flowers The nectar is lapped from the flower by the tongue of a worker bee and is carried in the crop or honey sack back to the hive Enzymes in the crop convert the nectar into the glucose and fructose sugars of honey The sugary fluid is stored in open beeswax cells, which are capped with wax when the material has reached the consistency of honey through evaporation of the excess water in air circulated by the moving wings of workers At least 20,000 (some observers say 37,000) trips to the field are necessary to make one pound of honey The honey required for an average colony to maintain itself through a year has been estimated at between 400 and 500 lb That in excess of the hive's requirement is used by man Honey is marketed both in the comb and with the comb removed either by straining or by centrifugal force or gravity The flavor and color depend upon the kind of flower from which the nectar is taken Much of that produced in the United States is the pale, delicately flavored alfalfa and clover honey Among the numerous other blossoms yielding nectar are those of the basswood, buckwheat, orange, palmetto, sage, and tupelo California sage honey is said to resemble the anciently praised honey of Mt Hymettus in Greece Among the states which produce honey on a commercial scale are California, Florida, Illinois, Iowa, Michigan, Minnesota, New York, Ohio, and Wisconsin Some is imported From earliest times until sugar became commercially important, honey was a major sweetening agent Honey is nutritious and easily absorbed and utilized by the body It contains about 70 to 80 percent sugar, the rest is water, minerals, and traces of protein, acids, and other substances

honeycomb moth: see BEE MOTH.

honeydew melon: see MELON.

Honey Grove, city (pop. 2,456), E Texas, NE of Dallas and near the Red River; inc. 1872 It is in a dairy and cotton area A large game and reforestation preserve is near by

honey locust, leguminous deciduous tree (*Gleditsia triacanthos*) native to the eastern half of the United States but planted as a shade tree in many regions of the United States and in other countries, where it is sometimes naturalized. It has heavily fragrant flowers much visited by bees, compound leaves made up of small leaflets, and large branching thorns The pods are brown, flat, about 12 to 18 in. long, usually twisting with age, and have a sweet and edible pulp that has been used to make a beer. Pulp of Oriental species has substituted for soap Wood of the honey locust is durable and used chiefly for fence posts and cross ties.

honeysuckle, any plant of the genus *Lonicera*, widely distributed shrubs or woody climbing plants, many native to North America, hardy in the North, and easily cultivated The climbing kinds frequently are weedy ground covers More or less tubular in shape, the usually fragrant flowers range in color from white or yellow to red and purple, one of the most beautiful being the scarlet trumpet honeysuckle Also of various colors are the berries, often attractive, sometimes edible A few species are evergreen or nearly so Woodbine is another name, particularly for *Lonicera periclymenum*, occasionally called eglantine, while the name bush honeysuckle is shared with species of the related genus *Diervilla* (with capsular fruits), other plants have been called honeysuckle, e g , the swamp honeysuckle or swamp azalea

Honfleur (ôNflûr'), town (pop 7,733), Calvados dept , N France, at the mouth of the Seine Founded in the 11th cent , it was once an important port on the English Channel

Hong Kong (hông' kông'), Mandarin *Heiang-chiang*, British crown colony (391 sq mi , pop 1,750,000), adjacent to Kwangtung prov , China It comprises Hong Kong island (32 sq mi), ceded by China in 1841, Kowloon or Cowloon (Mandarin *Chiu-lung*), a peninsula (3 sq mi), ceded in 1860, and the New Territories, an adjoining mainland area, with Mirs Bay, a near-by inlet of the China Sea, both leased in 1898 for 99 years The administrative center, officially named Victoria but commonly called Hong Kong, is on the northern shore of the island With a large natural harbor, Hong Kong is a naval base and the principal distributing center for S China. Behind the city rises Victoria Peak, 1,825 ft high, it is the culminating point of an extensively quarried granite range which covers much of the island Large crops are raised on the mainland Industries include tobacco, rope, and cement manufacturing, sugar refining, cotton spinning, and shipbuilding The colony was surrendered on Dec 25, 1941, to the Japanese It has remained under British control since the end of the Second World War despite repeated Chinese demands for its return In 1948 and 1949 refugees from the Communist-held areas of China swelled the population of the colony The Univ of Hong Kong is a coeducational institution under government control, opened in 1912 and organized on the model of the British universities

Honister Hause (hŏn'istur hôs), pass, 1,190 ft high, Cumberland, England, above Buttermere and Crummock Water near Keswick Honister Crag (1,750 ft) rises sharply on one side of the pass

Honiton (hŭn',–hŏn'–), municipal borough (pop 3,008), Devonshire, England, on the Otter river and ENE of Exeter It is in a farm and dairy region The manufacture of Honiton lace was introduced by Flemish refugees

Honolulu (hŏnulōō'lōō), city (metropolitan pop 179,426), capital of the Territory of Hawaii, on the southeast shore of OAHU With Palmyra it constitutes Honolulu co (pop 257, 696) The principal port of the Hawaiian Islands, it has steamship connections with mainland, Oriental, and Australasian ports, and airplane service to the mainland and the Orient. The city lies in a narrow plain between the sea and the Koolau Range and climbs the slopes of PUNCHBOWL, there are fine estates on Mt. Tantalus Kapiolani and Moana are the largest of the many parks, notable institutions are the Univ of Hawaii (see HAWAII, UNIVERSITY OF), Bishop Museum (1889), with important collections pertaining to the ethnography, zoology, and history of Polynesia, the Academy of Arts (1926), Punahou Academy (1841), and the Hawaiian Church (Kawaiahao) The Lunalilo Home for the Aged, Queen's Hospital, and Kamehameha Schools were founded by Hawaiian royalty Near the bathing beach at WAIKIKI is an aquarium A statue of Kamehameha I by T R Gould stands in front of Iolani Palace, the territorial capitol and former home of Hawaiian kings Another landmark is Aloha Tower The capital, formerly at Lahaina, Maui, was moved here in 1845. Honolulu is well guarded, with Fort De Russy at Waikiki and the near-by naval base at PEARL HARBOR Sugar refineries, pineapple canneries, and ironworks are the chief industries, sugar, fruits, and coffee, the principal exports.

Honorius I (hōnô'rēus), pope (625–38), an Italian; successor of Boniface V and predecessor of Severinus He showed great interest in the Church in Spain and the British Isles, and he did much to improve the churches in Rome. In the course

of the dispute over MONOTHELETISM the pope was asked for an opinion as to its orthodoxy In reply he wrote a letter using the words "one will" to express the reality of the hypostatic union, apparently confirming the heresy Pope and letter were both declared heretical at the Third Council of Constantinople The letter is no longer cited as an argument against infallibility of the pope, however, as he was not speaking *ex cathedra*

Honorius II, d 1130, pope (1124–30), an Italian (b near Imola) named Lamberto, successor of Calixtus II and predecessor of INNOCENT II He was the chief adviser of Paschal II and spent several years in Germany adjusting the quarrel between HENRY V and the papacy, which ended with the Concordat of Worms (1122) He was important in the victory of LOTHAIR II over Conrad of Hohenstaufen in the imperial election, and Lothair conceded the Church's demands in the matter of episcopal elections Honorius had an extended dispute with Henry I of England over the pope's right to send special legates to England

Honorius III, d 1227, pope (1216–27), a Roman named Cencio Savelli, successor of INNOCENT III and predecessor of GREGORY IX He was created cardinal in 1197 and was an able administrator of the papal treasury He also was very learned, and Innocent made him the tutor of FREDERICK II On his accession Honorius tried to persuade Frederick to join the new crusade He crowned Frederick in 1220 and received another promise to go, but throughout Honorius's pontificate Frederick postponed departure Honorius intervened in English politics to force the barons to support the young Henry III, a papal ward Elsewhere he worked for peace in Christendom—in Italy, Spain, Hungary, and Denmark

Honorius, 384–423, Roman emperor of the West (395–423) At the death (395) of Theodosius I the Roman Empire was divided between his elder son, ARCADIUS, who received the East, and his younger son, Honorius, who received the West The division proved to be permanent At first the government was wholly in the hands of Honorius' guardian, the general STILICHO, whose daughter he married Stilicho defended the empire against the Visigoths, but in 408 Honorius ordered the murder of his general, against whom a new favorite had aroused his animosity In 409 ALARIC I, king of the Visigoths, again invaded Italy Honorius held out at Ravenna, his capital, while Alaric installed a puppet emperor at Rome (409). Honorius mishandled his negotiations with Alaric, who in 410 stormed Rome and sacked it Conveniently for Honorius, Alaric died in that year and the Visigoths under ATAULF left Italy to invade Gaul Honorius made peace (412) with Ataulf, whom he reluctantly accepted (414) as husband for his sister GALLA PLACIDIA A rival emperor, CONSTANTINE, was defeated in 411 by Honorius' general Constantius, who soon exercised the actual power and who married the widowed Galla Placidia In 421 Honorius was obliged to accept Constantius as joint emperor (see CONSTANTIUS III), but Constantius died in the same year During his last year, Honorius quarreled with Galla Placidia, who took refuge at Constantinople He was succeeded by Valentinian III, son of Galla Placidia and Constantius Honorius' reign marked an important stage in the decline of the Western Empire Honorius showed some activity in suppressing heresy and proclaimed the abolition of gladiatorial games

Honshu (hŏn'shōō), island (c 88,000 sq mi , 1940 pop 55,993,219, 1947 pop 58,769,968), central Japan It is c 800 mi long and c 30 to 150 mi wide and is the largest and most important island of Japan It is separated from Hokkaido on the north by La Pérouse Strait, from Kyushu on the southwest by Shimonoseki Strait, and from Shikoku on the south by the Inland Sea The island was formerly sometimes called Hondo, other forms of its name are Honshu and Honsyu It is predominantly mountainous, rising to 12,389 ft at Fujiyama, with valuable forests and only a limited amount of arable land The Shinano, second longest river of Japan, traverses central and N Honshu Most of the rivers are short and swift, feeding many small hydroelectric plants The population, which is still largely agricultural, is concentrated in the lowland areas Most important of these is the Kwanto or Kanto Plain (c 5,000 sq mi) in the central part of the island, it contains the Tokyo-Yokohama industrial belt. Other large industrial areas include Nagoya (on the Nobi Plain) and the Osaka-Kobe region (in the Kinki district) Kyoto, in the Kinki district, is an ancient seat of culture, and also the chief handicraft center of Honshu Shipbuilding and metallurgical, chemical, and textile industries rank high in Honshu's economy, though the great cities have enormously diverse industries The climate has a wide range from the north with its snowy winters to the subtropical south, and agriculture varies likewise Rice, other grains, tea, silk, cotton, and all sorts of fruits and vegetables are grown

Honthorst, Gerard van (gĕr'ärt vän hŏnt'hôrst), 1590–1656, Dutch portrait, genre, and allegorical painter. In 1610 he visited Italy and was much influenced by the work of Caravaggio. On his return he became dean of the painters' guild of Utrecht In 1628 Charles I invited him to England, where he decorated Whitehall and painted portraits of the king and nobility. Several of these are now in the National Portrait Gallery, London. Because of his preference for painting night scenes he was nicknamed Gerardo dalle Notti (jĕrär'dō dăl'lä nôt'tē) Honthorst was prolific, and numerous works are to be seen in European galleries His *Christ before Pilate* (National Gall , London) is characteristic

Hooch or **Hoogh, Pieter de** (both pē'tur dŭ hōkh), b c 1629, d after 1677, one of the most noted of the Dutch genre painters Little is known of his life, although he seems to have enjoyed a high reputation, working in Delft, Leiden, and Amsterdam As a painter of intimate little interiors he rivals Vermeer Usually he preferred to paint rooms opening into other rooms or to the out-of-doors, intriguing the eye with half-seen vistas, thus he displayed his great ability to handle complicated lighting effects His characteristic themes are quiet domestic interiors, often with housewives and children His pictures frequently express a happy security and humble contentment, raised above the commonplace by his exquisite color and fine sincerity His warm tone and subtle values show Rembrandt's influence Characteristic are *In the House* (Rijks Mus), *Mother Seated near a Cradle,* and *Woman and Child* (National Gall , London) His works are prized in many celebrated European galleries The Metropolitan Museum has four

Hood, John Bell, 1831–79, Confederate general, b Owingsville, Bath co , Ky , grad West Point, 1853 After serving in California and Texas, he resigned from the army (April, 1861) and entered the Confederate service, being made a brigadier general in March, 1862 Hood fought in the PENINSULAR CAMPAIGN and at the second battle of Bull Run (Aug , 1862) and was promoted major general in October As a division commander under James LONGSTREET, he distinguished himself at Antietam, Fredericksburg, and Gettysburg and at Chickamauga, where he won his lieutenant generalcy (Sept , 1863) In the ATLANTA CAMPAIGN of 1864 he fought under J E JOHNSTON until President Davis, displeased with that general's retreat, made Hood commander Hood, faring no better against W T SHERMAN, was obliged to abandon Atlanta on Sept 1 To prevent a farther Union advance Hood moved against Sherman's long line of communications (Oct) Sherman followed, but later, satisfied that G H THOMAS at Nashville could cope with Hood, returned to Atlanta and marched to the sea Hood then began to advance through Tennessee J M Schofield slowly withdrew before him, repulsing his attack in a bloody battle at Franklin (Nov 30) before joining Thomas Hood went on to Nashville, where he entrenched his greatly depleted forces Thomas attacked and in the battle of Nashville (Dec 15–16) won the most complete victory of the war, virtually annihilating the Confederates Hood resigned his command (Jan , 1865) and surrendered himself at Natchez, Miss , in May See his *Advance and Retreat* (1879), T R Hay, *Hood's Tennessee Campaign* (1929), S F Horn, *The Army of Tennessee* (1941), D S Freeman, *Lee's Lieutenants* (3 vols , 1942–44), Richard O'Connor, *Hood Cavalier General* (1949)

Hood, Raymond Mathewson, 1881–1934, American architect, b Pawtucket, R I , studied at Brown Univ , Massachusetts Institute of Technology, and the École des Beaux-Arts, Paris He was the winner (1922), with John Mead Howells, of the international competition for the design of the Tribune Tower, Chicago (completed 1925) He practiced from 1927 to 1931 in the firm of Hood, Godley, and Fouilhoux In New York, Hood was architect for the American Radiator Building and for the Daily News Building (with J M Howells) He was a consultant in the rebuilding of the Univ of Brussels, and his firm was one of the three firms associated in the Radio City development in New York He designed buildings for the Century of Progress Exposition in Chicago

Hood, Samuel, 1st **Viscount Hood,** 1724–1816, British admiral Entering the navy in 1741, he rose to be second in command of Lord Rodney's North American fleet in the American Revolution He fought in many engagements, including the repulse of the French fleet under the comte de Grasse and its severe defeat off Dominica As commander in chief in the Mediterranean he captured Toulon (1793) and demolished Corsica's fortifications He was made viscount in 1796

Hood, Thomas, 1799–1845, English poet and humorist He was editor of the *Gem* (1829), in which he printed his "Dream of Eugene Aram," of the *Comic Annual* (1830–42), *Hood's Magazine and Comic Miscellany* (1844–45), and other periodicals The comic "Miss Kilmansegg and Her Precious Leg" and other humorous verse and prose almost eclipsed such serious work as "The Bridge of Sighs" and "The Song of the Shirt," poems of social protest; "The Elm Trees", "The Haunted House", "The Plea of the Midsummer Fairies " Hood suffered from tuberculosis and poverty throughout his life, but always maintained his cheerfulness and his industry See two studies by W. C Jerrold (1907, 1930).

Hood, Mount, peak, 11,245 ft high, N Oregon, in the Cascade Range ESE of Portland, highest point in the state A symmetrical, snow-capped, extinct volcano, it is a favorite climb and ski center See Federal Writers' Project, *Mount Hood* (1941)

Hood College see FREDERICK, Md

Hood River, city (pop 3,280), co seat of Hood River co , N Oregon, on the Columbia, E of Portland and NNE of Mt Hood, settled 1854, inc 1895 Apples, pears, cherries, strawberries, and walnuts are grown and shipped from here An agricultural experiment station of Oregon State College is here A music festival, to be an annual event, started in 1948

hoof, horny epidermal casing at the end of the digits of an ungulate MAMMAL In some animals, e g , the pig, sheep, and cattle, the hoof is cloven, in others, e g , the horse and zebra, it is solid Hoofs are adapted to suit the habits and habitat of the animal

Hooft, Pieter Corneliszoon (pē'tûr kôrnā'lĭsŏn hôft'), 1581–1647, Dutch historian, poet, and dramatist He is author of the classic *Nederlandsche Historiën* (1642), a Tacitean history of the Netherlands from 1555 to 1584, left incomplete Hooft was also a lyric poet of the first order, he introduced into Dutch the sweet tones of French and Italian Renaissance love poetry Hooft's plays are on Latin models

Hoogh, Pieter de. see HOOCH, PIETER DE

Hooghly (hōō'glē), town (pop 49,081), West Bengal state, India, on the Hooghly river, founded 1537 by the Portuguese It was of commercial importance during the 16th and 17th cent but declined with the rise of Calcutta Today it is a rice-milling center

Hooghly, river, c 200 mi long, West Bengal state, India, an arm of the Ganges river, flowing S to the Bay of Bengal Navigable to large ocean-going steamers up to Calcutta, c 50 mi from its mouth, it is an important shipping artery through one of the major industrial zones of India

Hoogstraten, Samuel van (sä'mūĕl vän hōkh'strätun), 1627–78, Dutch portrait painter and etcher, studied with his father, Dirk van Hoogstraten (dĭrk) (1596–1640), and with Rembrandt His best works, such as *The Old Jew* (Vienna), reflect the influence of Rembrandt Hoogstraten was director of the Dordrecht mint and author of a book on art which contains interesting material on Rembrandt and other artists of the period The Metropolitan Museum contains his *Portrait of a Lady and a Gentleman*

Hook, Theodore Edward, 1788–1841, English novelist A founder and an editor of *John Bull* (1820), Hook had a gift for light, witty verse *Gilbert Burney* (1836), *Jack Brag* (1837), and his numerous other novels, popular in their day, are no longer read The influence of Hook is observed in the early works of Thackeray and Dickens See M F Brightfield, *Theodore Hook and His Novels* (1928)

hookah see PIPE, TOBACCO

Hooke, Robert (hōōk), 1635–1703, English physicist, mathematician, and inventor In 1662 he became curator of experiments for the Royal Society, London, in 1665, professor of geometry at Gresham College, and in 1667, city surveyor Considered the greatest mechanic of his age, he made many improvements in astronomical instruments and in watches and clocks, was the first to formulate the theory of planetary movements as a mechanical problem, and glimpsed universal gravitation In 1684 he devised a practicable system of telegraphy He invented the spiral spring in watches and the first screw-divided quadrant and constructed the first arithmetical machine and Gregorian telescope He stated HOOKE'S LAW In his *Micrographia* (1665) he described cells in plant tissues See his *Posthumous Works* (ed by Richard Waller, 1705) and his *Life and Work* (ed by R W T Gunther (1930)

Hooker, Joseph, 1814–79, Union general in the Civil War, b Hadley, Mass , grad West Point, 1837 He fought against the Seminoles and, as a staff officer in the Mexican War, was thrice brevetted for gallantry Hooker resigned from the army in 1853 and was for several years a farmer in California At the outbreak of the Civil War he became a brigadier general of volunteers He distinguished himself in subordinate commands in the PENINSULAR CAMPAIGN, at the second battle of **Bull Run,** and in the ANTIETAM CAMPAIGN, and was made a brigadier general in the regular army in Sept , 1862 After the battle of **FREDERICKSBURG,** Hooker severely criticized Ambrose BURNSIDE, whom he succeeded in command of the Army of the Potomac (Jan , 1863) His advance on Lee was well executed, but in the resulting battle of CHANCELLORSVILLE, "Fighting Joe" failed to justify his sobriquet He followed Lee closely in the subsequent Confederate invasion of Pennsylvania, but, angered at Halleck's refusal to send him reinforcements from Harpers Ferry, he asked to be relieved on June 28, 1863 A few days later his successor,

G G MEADE, fought the battle of Gettysburg Hooker ably commanded reinforcements from the East in the CHATTANOOGA CAMPAIGN, and in 1864, he fought in the ATLANTA CAMPAIGN until Sherman passed him over in favor of O O Howard as successor to J B MCPHERSON He then commanded various departments in the North until his retirement in 1868 See W H Hebert, *Fighting Joe Hooker* (1944)

Hooker, Sir Joseph Dalton. see HOOKER, SIR WILLIAM JACKSON

Hooker, Richard, 1554?–1600, noted English theologian and Church of England clergyman He studied and lectured at Oxford and preached at Drayton-Beauchamp, Buckinghamshire, at the Temple Church London at Boscombe, Wiltshire, and at Bishopsbourne, Kent His famous *Of the Laws of Ecclesiastical Polity* (in eight books, of which only five were published in his lifetime) was an epoch-making discussion of church government, written in an excellent prose style It helped to formulate the intellectual concepts of Anglicanism, and its influence on the theory of government (civil as well as ecclesiastical) as based on rules of reason was widely felt in England An edition of Hooker's works (1666) contained a celebrated biography by Isaak Walton (1665), the standard edition of the complete works is by John Keble (3 vols , 1836, revised by R W Church and Francis Paget, 1888) See also *Of the Laws of Ecclesiastical Polity* (Everyman's Library, 2 vols , 1907) and edition of Book VIII by R A Houk (1931), studies of Hooker by L S Thornton (1924), A P D'Entreves (in *Mediaeval Contribution to Political Thought*, 1939), and E T Davies (1946)

Hooker, Thomas, 1586–1647, Puritan clergyman in the American colonies, chief founder of Hartford, Conn , b Leicestershire, England, grad Emmanuel College, Cambridge Univ (B A , 1608, M A , 1611) Ordered before the court of high commission for nonconformist preaching in England, he fled (1630) to Holland and in 1633 emigrated to Massachusetts, where he was pastor at Newtown (the present Cambridge) He had a dispute with John Cotton and apparently was discontented with the strict theological rule in Massachusetts After a group of settlers had been sent ahead in 1635, he and many of his flock moved in 1636 to found Hartford, where he was pastor until his death Hooker was one of the drafters of the Fundamental Orders (1639) under which Connecticut was long governed and which probably represent his political views He promoted the New England Confederation

Hooker, Sir William Jackson, 1785–1865, English botanist A leading authority of his time on ferns, he formed a famous herbarium and built up the Glasgow and Kew botanical gardens In Kew Gardens he founded the first museum of economic botany Among his many works are *British Jungermanniae* (1816), *Flora Scotica* (1821), *British Flora* (1830–31), and a number of works on ferns, including *Genera Filicum* (1842), *Species Filicum* (1846–64), and *Synopsis Filicum* (1868) He edited many botanical journals His son, **Sir Joseph Dalton Hooker,** 1817–1911, was also a botanist After his first scientific expedition he wrote on the flora of New Zealand and Tasmania Sir Joseph's great works include *Antarctic Flora* (1843), *Genera Plantarum* (1862–83), and *Flora of British India* (1892–97) He edited the *Index Kewensis* (1892–95) by B. Daydon Jackson He was a friend of Darwin and a supporter of his theories See biography by Leonard Huxley (1918)

Hooker, city (pop 1,146), NW Okla , in the Panhandle wheat area, inc 1907

Hooke's law [for Robert Hooke] states that, within the limit of ELASTICITY (or the elastic limit of a body), the stress on a body is directly proportional to the strain The ratio between a force exerted upon a body (i e , the stress) and the change in shape of the body (i e , the strain) is therefore constant (see YOUNG'S MODULUS)

Hook of Holland, Dutch *Hoek van Holland* (hōōk' vän hô'länt), port (pop 2,536), South Holland prov , SW Netherlands, on the North Sea An outer port of Rotterdam, with which it is connected by the New Waterway, it is also the terminus of boats crossing the English Channel from Harwich, England The port is named after the cape on which it is located

Hooksett (hŏŏk'sĭt), town (pop 2,273), S N H , at falls of the Merrimack between Concord and Manchester, inc 1822 Mt St Mary College for girls is here The village suffered in the 1936 flood

hookworm or **ancylostomiasis** (ăn"sĭlŏ'stōmī'ăsĭs,) infection in man, caused by two species of worms, the Old World species (*Ancylostoma duodenale*) and the New World species (*Necator americanus*) The worms are found in tropical and subtropical regions and in certain temperate zones where there is warmth and moisture The life history is similar in both species The ova (eggs) are passed from the intestines of the infected person, and they develop into the larva stage in warm, moist earth Persons who come in contact with infected soil when walking without shoes or stockings develop a "ground itch" caused by the larvae of the hookworm which burrow through the skin in a few minutes From here, they enter the veins or the lymphatics and are carried to the lungs, thence through the bronchi to the trachea and pharynx, where they are swallowed. They reach the intestine about one week from the time of the initial infection The larvae grow, molt, and mature, attaching themselves to the mucosa of the intestine, sucking blood, and causing some bleeding Because of this blood loss, severe anemia results There is general debility and chronic ill-health Infected children are retarded in their physical and mental development Diagnosis usually depends upon finding the ova in the feces Treatment consists of the use of anthelmintics, which loosen or destroy the worms The anemia must also be treated

Hoopa Indians (hōō'pä), tribe of North American Indians of the Athapascan linguistic stock In the 19th cent they occupied the valley of the Trinity river from Hoopa valley to the Klamath river in NW California They then numbered some 1,000 Although their cedar plank houses, dugout canoes, basket hats, and many points in their mythology show them to be the southernmost efflorescence of the Pacific Northwest coast culture, their use of a sweat house for ceremonies and manufactured "acorn bread" are typical of the California culture In 1864 the U S government made their lands a reservation (Hoopa Valley), where they now reside, with their neighbors, the Yurok Indians, numbering some 650 The Hoopa Indians are sometimes called the Hupa Indians See P E Goddard, *Life and Culture of the Hupa* (1903)

Hooper, William, 1742–90, American Revolutionary patriot, signer of the Declaration of Independence, b Boston, grad Harvard, 1760 He became a lawyer and moved (1764) to Wilmington, N C Hooper served on the local committee of correspondence and was a delegate (1774–77) to the Continental Congress

Hoopeston (hōōp'stun), city (pop 5,381), E Ill , E of Bloomington near the Ind line, platted 1871, inc 1877 It is a canning center and manufactures canning machinery

Hoorn or **Horn, Philip de Montmorency, count of** (both hôrn), 1518?–1568, Netherlands nobleman, member of the council of state during the regency of Margaret of Parma In 1562 he joined with Egmont and William the Silent in opposition to Cardinal GRANVELLE, who had introduced Spanish troops and the Spanish Inquisition into the Netherlands When the duke of Alba replaced (1567) Margaret of Parma, he had Egmont and Hoorn arrested and, after an irregular trial, beheaded (see EGMONT, LAMORAL, COUNT OF)

Hoorn (hôrn), municipality (pop 13,888), North Holland prov , NW Netherlands, a port on the Ijsselmeer It is the center of a vegetable-growing and dairy-farming area Founded in 1311, Hoorn was the capital of medieval West Friesland Willem Schouten, first to round Cape Horn, was born here and named the cape after his birthplace A J Tasman also was a native of Hoorn

Hoosac Range (hōō'săk), NW Mass and SW Vt , E of the Berkshires It is a southern continuation of the Green Mts A railroad tunnel 5 mi long (built 1852–73) pierces the range

Hoosic (hōō'sĭk), river, c 70 mi long, rising in NW Massachusetts in the Hoosac Range and flowing N, then NW (cutting across a corner of Vermont), and W to the Hudson above Troy, N Y It passes Adams, North Adams, and Williamstown, Mass , and Hoosick Falls, N Y , where it is utilized for power

Hoosick Falls (hōō'sĭk), industrial village (pop 4,279), E N Y , on the Hoosic river near the Vt line, inc 1827 Knit underwear, electrical supplies, and paper are made here

Hooton, Earnest Albert (hōō'tun), 1887–, American anthropologist, b Clemansville, Wis , grad Lawrence College, 1907, Ph D Univ of Wisconsin, 1911, Rhodes scholar, 1910 13 He went to Harvard as instructor in 1913 and became professor of anthropology in 1930 In addition to his researches on early man and primates, Hooton has studied the physical traits of criminals He is the author of *The Indians of Pecos Pueblo* (1931), *Ancient Inhabitants of the Canary Islands* (1925), *Up from the Ape* (1931, rev ed , 1946), *Apes, Men, and Morons* (1937), *Crime and the Man* (1939), *The American Criminal* (Vol I, 1939), *Man's Poor Relations* (1942), and *Young Man, You Are Normal* (1945).

Hoover, Herbert Clark, 1874–, 30th President of the United States (1929–33), b West Branch, Cedar co , Iowa, grad Stanford, 1895 Between 1895 and 1914 he engaged in world-wide mining and engineering activities and established offices in New York, San Francisco, and London When the First World War erupted, Hoover, then in London, was made chairman of the American Relief Commission In this post he aided Americans stranded in Europe to return to the United States As chairman (1915–19) of the Commission for Relief in Belgium, he secured food and clothing for inhabitants of war-devastated Belgium and N France. After the United States entered the First World War, he became U S food administrator (in that day to *hooverize* meant to conserve food), a member of the War Trade Council, and chairman of the Interallied Food Council After the armistice, as chairman of the food section of the Supreme Economic Council, he helped supply food to the countries of Central and Eastern Europe In 1920 he also served as chairman of the American Relief Administration and as chairman of the European Relief Council As Secretary of Commerce (1921–29) under Warren G Harding and Calvin Coolidge, he reorganized and expanded the department, sponsored conferences on unemployment, fostered trade associations, and gave his support to such engineering projects as the St Lawrence Waterway and the Hoover Dam He was elected President in the Republican ticket in 1928, defeating Democratic candidate Alfred E Smith The stock-market crash of Oct and Nov , 1929, ushered in an economic depression which continued throughout his administration To combat the bad conditions, Hoover recommended an extensive public-works program and conducted a vigorous campaign against what he termed the "unjustified fear" of the business world Hoover appointed many commissions—e g , the National Law Enforcement Commission, with George W WICKERSHAM as chairman—to study the various problems confronting the administration Relief was extended by act of Congress to the victims of the great drought of 1930 Destitute farmers were aided by the Federal Farm Board, a bureau which resulted from the HAWLEY-SMOOT TARIFF ACT As a measure against the depression the Reconstruction Finance Corporation was created to stimulate industry by giving loans unobtainable elsewhere Congress, which had a Democratic majority after the election of 1930, passed the Emergency Relief Act and created the Federal home loan banks An unpleasant incident arose when veterans marched on Washington in what was called the Bonus Expeditionary Force to urge laws for immediate payment of bonus certificates, Hoover ordered Federal troops to oust them from Federal property Throughout his administration, furthermore, Hoover was confronted in foreign affairs with the problems of disarmament, reparations, and war debts In disarmament, the London Conference and the Geneva Conference did not prove effective (see NAVAL CONFERENCES), the debt moratorium which Hoover proposed (1931) to alleviate Germany's financial situation had no practical results The spirit of apathy and gloom over domestic and foreign prospects deepened In the 1932 election Hoover was overwhelmingly defeated by Franklin D Roosevelt Three weeks before Hoover left office a serious banking crisis developed throughout the country The day after his inauguration President Roosevelt declared a general bank holiday Hoover retired for many years, but returned to public view after the Second World War when he undertook (1946) the coordination of food supplies to 38 countries which were badly affected by the Second World War He then headed (1947–49) the "Hoover Commission"—a committee of 12 men empowered by Congress to study and advise on matters of organization of the executive branch of government Among his writings are *Principles of Mining* (1909), *The Challenge to Liberty* (1934), and *The Basis for Lasting Peace* (1945) With his wife he translated Agricola's *De re metallica* (1912) from the first Latin edition of 1556 See biographies by Vernon L Kellogg (1920) and Will H Irwin (1928), Rexford Guy Tugwell, *Mr Hoover's Economic Policy* (1932)

Hoover, John Edgar, 1895–, American administrator, director of the FEDERAL BUREAU OF INVESTIGATION, b Washington, D C , grad George Washington Univ (LL B , 1916) After he was admitted (1917) to the bar, he entered (1917) the Dept of Justice and served (1919–21) as special assistant to the Attorney General Director of the Bureau of Investigation in the Dept of Justice after 1924, J Edgar Hoover built an efficient crime-detection agency and led in the capture of major criminals in the early '30s After the bureau was reorganized (1933) with wider powers and renamed (1935) the Federal Bureau of Investigation, Hoover led investigations of crimes directed against the internal security of the United States

Hoover Dam, at the Nev.–Ariz border, in the Colorado river, ESE of Las Vegas, Nev , initiated 1928 by the Federal government, dedicated 1935 It is one of the largest dams in the world, 727 ft high and 1,282 ft long Early named Hoover Dam, it was later called Boulder Dam until the former name was restored in 1947 It is used for hydroelectric power, flood control, and irrigation and is the key unit of the projects on the COLORADO river Most of the power has been used by S California, but some belongs to Arizona and Nevada Lake Mead, 115 mi long and from 1 to 8 mi wide, created by the dam, not only stores water but also attracts many vacationers Boulder City, Nev , was built to house workers on the project

Hoover Library on War, Revolution, and Peace, at Stanford Univ , Palo Alto, Calif It was established in 1919 as the Hoover War Library by Herbert Hoover to extend his collection of documents of the First World War, but its scope has been ex-

panded to include source material on social and political developments arising from both First and Second World Wars. Research, publication, and advanced study are conducted under the Hoover Research Institute The library occupies Hoover Tower, opened in 1941

Hooversville, borough (pop 1,364), SW Pa , S of Johnstown; inc 1896

hop, herbaceous twining vine widely cultivated since early times for brewing purposes The hop commonly grown is *Humulus lupulus*, a perennial naturalized in North America The ripened female flowers or "hops" are conelike and are borne on different plants from the male, their large loose papery scales contain lupulin, a yellow powder added to BEER to impart a bitter flavor and used medicinally as a tonic and a soporific There is also a hop considered native to America that is similarly used The Japanese hop is an annual ornamental vine The fruit of the hop tree (*Ptelea trifoliata*) has been used as a substitute for hops See *Production of Hops* (Dept of Agriculture, Farmers' Bul 1842)

Hopatcong, Lake (hōpăt'kŏn, -kŏng), c.7 mi long and 3 mi wide, N N J , NW of Newark It is a resort

Hope, Anthony, pseud of **Sir Anthony Hope Hawkins,** 1863–1933, English novelist, b London, grad Oxford (M A , 1885) He was called to the bar in 1887 His first great success was *The Prisoner of Zenda* (1894), a romantic novel of an imaginary kingdom It was translated into many languages and adapted for both stage and screen A sequel, *Rupert of Hentzau* (1898), was also widely read, but none of his later novels or plays approached the enormous success of *The Prisoner of Zenda* He was knighted in 1918 See his *Memories and Notes* (1927), biography by Sir C E Mallet (1935)

Hope. 1 City (pop 7,475), co seat of Hempstead co , SW Ark , settled 1874, inc 1875 The city is the commercial and shipping center for a diversified farm area especially noted for watermelons Its industries include cotton processing and woodworking A state university agricultural experiment station is near by **2** Town (pop 1,046), Bartholomew co , SE Ind , near Columbus **3** Village, NW N J , near Jenny Jump Mt NW of Hackettstown It is the site of a stone mill built in 1768 by Moravian settlers

Hopewell. 1 Borough (pop 1,078), W N J , N of Trenton, settled before 1700, inc 1891 It was the home of John Hart There is a historical museum Lindbergh deeded his estate near here to New Jersey in 1941, it is being used for the rehabilitation of juvenile delinquents **2** City (pop 8,679), E Va , at the confluence of the James and the Appomattox, inc 1916 Founded in 1913 as a munitions center, it had a wartime population of 40,000, which shrank to 3,000 after the First World War It developed as an industrial center, producing synthetic textiles and chemicals In 1926 it absorbed contiguous City Point (settled 1613), Grant's base of operations in 1864–65

Hopewell Village, national historic site, near Birdsboro, Pa This restored iron-making village of the 18th and 19th cent has ruins of the old forge. Bird manor house was built in 1744

Hophni (hŏf'nī), son of Eli With his brother he met death because of sacrileges 1 Sam. 1–4

Hophra. see APRIES

Hopi Indians (hō'pē), tribe of PUEBLO INDIANS, formerly called Moki, or Moqui, Indians, who speak the Hopi language (Uto-Aztecan family) at all their pueblos except Hano, where the language is Tanoan. They occupy several mesa pueblos in NE Arizona and number some 3,550. In 1540 they were visited by some of Coronado's men under Pedro de Tovar, but because of their geographical isolation they remained more independent of white influence than the other Pueblo tribes. At this time their population, with the Zuni, was estimated to be between 3,000 and 4,000 In 1629 a Roman Catholic mission was established at the pueblo of Awatobi, but because of the rebellion of 1680 the missionaries fled Later, the Indians of this pueblo invited the missionaries to return, and this so infuriated the other Hopi that they destroyed Awatobi Further missionary efforts were opposed until recent times ORAIBI is the only one of the pueblos which has remained on the same site since 1540 The other pueblos were built after 1540, several being villages moved from the foothills below for protection from the Spanish and the pillaging of the nomadic Apache and Navaho The pueblo of Hano is chiefly occupied by Tewa Indians, who after the rebellion moved from the upper Rio Grande valley in dread of Spanish retribution Hopi culture, one of the high points of North American Indian civilization, is typical of the Southwestern area The Hopi are peaceful, sedentary farmers, mainly dependent on corn, beans, and squash, they also raise wheat, cotton, and tobacco and herd sheep They are noted for embroidered blankets, and the pueblo of Hano is especially famous for its pottery. Each village is divided into clans and is governed by a chief. In the past this chief supervised irrigation projects and other peacetime tasks A war chief trained warriors and led them in combat and a chief priest, who in many ways was the most powerful man in the village, performed such duties as stamping out of witchcraft. Political and religious duties devolved upon clans, e g , the Badger clan, which still conducts the *kachina* (fertility) ceremony, and the Antelope and Snake clans, which perform the famous snake dance on alternate years at the pueblo of WALPI See M R Coolidge, *The Rain-Makers* (1929), L. M Thompson and Alice Joseph, *The Hopi Way* (1945)

Hopkins, Arthur Melancthon, 1878–1950, American theatrical producer, b Cleveland His productions, having a high percentage of excellence, include *The Poor Little Rich Girl*, *Hamlet*, with John Barrymore, O'Neill's *Hairy Ape* and *Anna Christie*, Sherwood's *Petrified Forest*, and the war play, *What Price Glory?* See his autobiography, *Letters to a Lonely Boy* (1937)

Hopkins, B. Smith, 1873–, American chemist, b Owosso, Mich , grad Albion College (B A , 1896), Ph D Johns Hopkins, 1906 . He taught at the Univ of Illinois from 1912, serving as professor of inorganic chemistry from 1923 He is known as an authority on the rare earths and, with collaborators, discovered the element illinium, named after Illinois Besides textbooks and manuals, he wrote *Chemistry of the Rarer Elements* (1923)

Hopkins, Edward, 1600–1657, colonial governor of Connecticut, b England He migrated (1637) to Hartford, where his wealth and ability made him a leader at once He became governor of the Connecticut colony in 1640 and was governor, assistant governor, or deputy governor every year until 1656, the law not allowing the office of governor to be held two years in succession As a delegate from Connecticut he helped to form the New England Confederation, and he was elected one of the confederation commissioners He returned to England shortly before his death to become warden of the fleet, keeper of the palace at Westminster, and member of Parliament, but left bequests to Connecticut for grammar schools

Hopkins, Esek, 1718–1802, American Revolutionary naval hero, b Scituate, R I , brother of Stephen Hopkins He commanded a privateer in the French and Indian War, and in Dec , 1775, as the Revolution was well begun, he was appointed commander in chief of the newborn Continental navy In 1776 he made a successful raid on New Providence in the Bahamas After a dispute with the Continental Congress, he was dismissed from the service in 1778

Hopkins, Sir Frederick Gowland, 1861–1947, English biochemist, educated at Cambridge and the Univ of London. He was professor of biochemistry at Cambridge (1914–43) Among his contributions were important studies in carbohydrate metabolism and muscular activity, including the discovery of the relationship of lactic-acid formation to muscular contraction. He isolated glutathione (believed to be concerned with oxidation in the tissues) Through his feeding experiments with laboratory animals he concluded that "accessory food factors" (later named vitamins) are essential to health For his pioneer work on vitamins he shared with Christian Eykman the 1929 Nobel Prize in Physiology and Medicine He was knighted in 1925 His works include *Newer Aspects of the Nutrition Problem* (1922), *The Problems of Specificity in Biochemical Catalysis* (1931), and *Chemistry and Life* (1933)

Hopkins, Gerard Manley, 1844–89, English poet, educated at Oxford. He embraced the High Church movement and ultimately followed Newman into the Roman Catholic Church (1866) He entered a Jesuit novitiate and was ordained in 1877 His life was marked by inner conflict, partially between mystic-priest and poet, the paradox underlined on the one hand by his asceticism, contemplation, self-discipline, and subordination to holy demands and on the other by his non-acceptance of poetic convention and by the magical sensuousness of his verse Hopkins for a time abandoned poetry as an expression of his baser self and a hindrance to his communion with Christ A shipwreck, in which all of the crew and five Franciscan nuns were lost, shocked Hopkins into writing "The Wreck of the Deutschland," one of his greatest poems, and the first in seven years, thereafter he wrote some of his best poetry His *Poems*, edited by his friend Robert Bridges, did not appear until 1918, since Hopkins never gave permission for the volume during his life The poems reflect his rules of prosody—sprung rhythm based on word stress rather than syllabic count The second edition (1930) adds a few poems to the scanty volume of his work The "terrible" sonnets, six of his most magnificent poems, show with startling power his realization of human loneliness and struggle See his letters (ed by C C Abbott, 1935 and 1938) and his notebooks and papers (ed by Humphrey House, 1937), biographies by G F Lahey (1930), John Pick (1942), and Eleanor Ruggles (1944), study by W H Gardner (1944–49), *Gerard Manley Hopkins*, a collection by the Kenyon Critics (1946), *Immortal Diamond* (ed by Norman Weygand, 1949)

Hopkins, Harry Lloyd, 1890–1946, American public official, b Sioux City, Iowa. A social worker after his graduation from Grinnell College (1912), he was appointed Federal Emergency Relief Administrator in 1933 Two years later he was made head of the Works Progress Administration Hopkins succeeded Daniel C ROPER as Secretary of Commerce in Dec , 1938, but resigned in Aug , 1940, because of ill-health He was an intimate friend of President Roosevelt and held high posts as special assistant to the President, he was administrator of LEND-LEASE (March–July, 1941), a member of the War Mobilization Committee, and an official of the War Production Board He was also sent on special missions to Europe, notably to Great Britain and Russia in July–Aug , 1941, and again to London in 1942 After Roosevelt's death, he went as Truman's representative to Moscow to settle the vexed question of Poland, but in July, 1945, he retired from public life See Robert E Sherwood, *Roosevelt and Hopkins* (1948)

Hopkins, Johns, 1795–1873, American financier and philanthropist, b Anne Arundel co , Md In 1812 he went to Baltimore to work for his uncle Gerard Hopkins, a commission merchant In 1819 he founded his own commission firm, later known as Hopkins Brothers, and also went into banking. He later had a large part in the growth of the Baltimore & Ohio RR, of which he became a director in 1847 In 1867 he established a free hospital and Johns Hopkins Univ See biography by H H. Thom (1929)

Hopkins, Lemuel, 1750–1801, American poet and physician, b Waterbury, Conn One of the CONNECTICUT WITS, he collaborated with several others in writing popular political satires, including *The Anarchiad* (1786–87) Hopkins was a founder of the Medical Society of Connecticut

Hopkins, Mark, 1802–87, American educator, b Stockbridge, Mass , grad Williams, 1824, and Berkshire Medical School, 1829 After a few months of medical practice he returned (1830) to Williams as professor of moral philosophy and rhetoric President of the college from 1836 to 1872 and professor of intellectual and moral philosophy until his death, he was renowned as a great teacher and excellent administrator He was ordained in the Congregational Church in 1833, preached frequently, and was president of the American Board of Commissioners for Foreign Missions (1857–87) His works include the Lowell Institute lectures for 1844 which appeared later as *Evidences of Christianity* (1863, revised for text use), *Lectures on Moral Science* (1862), *The Law of Love and Love as a Law* (1869), and *The Scriptural Idea of Man* (1883) See his *Early Letters* (1929); biography by Franklin Carter (1892), M. A. DeWolfe Howe, *Classic Shades* (1928)

Hopkins, Mark, 1813–78, American railroad builder and merchant, b Henderson, N Y A clerk in a village store and later a commission merchant in New York city, he was past 35 years old when he went to California There he became a partner of Collis P HUNTINGTON in 1853 and was later one of the incorporators of the Central Pacific Railroad Company, of which he became treasurer See Oscar Lewis, *The Big Four* (1938).

Hopkins, Samuel, 1721–1803, New England clergyman and theologian, b. Waterbury, Conn , grad Yale, 1741 He was a leading disciple of Jonathan EDWARDS, whose theology was the foundation for his own system which became known as Hopkinsianism For 60 years Hopkins held pastorates at Great Barrington, Mass , and at Newport, R.I His preaching, noninspirational and severely logi-

cal, was less influential than his writings, notably his *System of Doctrines* (2 vols, 1793). His views remained potent in American religious life until after the Civil War Hopkins was a pioneer among New England ministers in his denunciation of slavery and the slave trade

Hopkins, Stephen, 1707–85, colonial governor of Rhode Island and American Revolutionary patriot, b. Providence, R I A member of the colonial assembly for many years, he also served as assistant justice (1747–49) and chief justice (1751–55) of the superior court Between 1755 and 1768 he held the office of governor for nine years The period was one of bitter strife in the colony between Newport and Providence, with Hopkins leading the Providence faction His feud with Samuel Ward for the governorship was finally settled in 1768 by the election of a compromise candidate In 1754 Hopkins was a delegate to the Albany Congress, where he energetically supported Benjamin Franklin's plan of union, writing *A True Representation of the Plan Formed at Albany* (1755) in hope of converting the opposition in Rhode Island He was an early and strenuous defender of colonial rights, and his *Rights of Colonies Examined* (1765), attacking the sugar and stamp acts, was widely distributed and read Again chief justice of the superior court, Hopkins refused to allow the burners of the *Gaspee* to be prosecuted He was a member (1774–76) of the First and Second Continental congresses, a member of the committee that prepared the Articles of Confederation, and a signer of the Declaration of Independence, as well as an active member of conventions and committees working for independence He helped found the first public library in Providence and the Providence *Gazette* (1762) and was the first chancellor of Rhode Island College (now Brown Univ.) See biography by W E Foster (2 vols, 1884)

Hopkins, village (pop 4,100), E Minn, southwest suburb of Minneapolis, in a truck-farming region, settled c 1850 It is the site of the Hennepin County Fair Farm machinery is made here

Hopkinson, Francis, 1737–91, American writer and musician, signer of the Declaration of Independence, b Philadelphia, grad College of Philadelphia (now Univ of Pennsylvania), 1757 A practicing lawyer, Hopkinson was also an accomplished musician and wrote a number of musical compositions including *My Days Have Been So Wondrous Free* (1759) He is considered the first native American composer During the American Revolution, he wrote propaganda supporting the colonial cause, best displayed in *The Battle of the Kegs* (1778) Hopkinson represented (1776) New Jersey in the Continental Congress and later (1776–77) served as chairman of the navy board (as such he may have designed the American flag) and as treasurer of the Continental loan office (1778) Returning to public office in Pennsylvania, he served as judge of admiralty (1779–89) and was judge of the U S district court (1789–91) He later wrote in support of the adoption of the U S Constitution and also issued *Seven Songs for the Harpsichord* (1788) See biography by G E Hastings (1926)

Hopkinson, Joseph, 1770–1842, American jurist, b Philadelphia, grad College of Philadelphia (now the Univ of Pennsylvania), 1786, son of Francis Hopkinson A successful lawyer, he helped to defend Justice Samuel Chase in impeachment proceedings and was associated with Webster in the Dartmouth College Case, he also was a Federalist Congressman (1815–19) and a Federal judge He had many posts of importance but is widely remembered only as the author (1798) of the words of *Hail, Columbia*. See biography by B A Konkle (1931).

Hopkinsville, city (pop 11,724), co. seat of Christian co., S Ky., WSW of Bowling Green, inc 1804 It is an important tobacco and livestock market and has food-processing plants and clothing factories. **Bethel Woman's College** (junior) is here **Jefferson Davis Memorial Park** is near by

Hopkinton. 1 Town (pop 2,697), E Mass., WSW of Boston, settled c 1715, inc 1744 Daniel Shays was born here. **2** Town (pop 1,587), S N H., W of Concord, inc 1765 The collection of the New Hampshire Antiquarian Society is in the Long Memorial Library In the 18th-century Congregational church is a Paul Revere bell **3** Rural town (pop 3,230), SW R.I., set off from Westerly and inc 1757. Its villages include Rockville, Hope Valley, Hopkinton, and Ashaway. Prudence Crandall was born in the town.

Hoppe, William Frederick (Willie Hoppe) (hŏ'pē), 1887–, American billiards champion, b Cornwall, Orange co., N.Y He practiced billiards from a very early age and gave exhibitions before he won (1906) his first world championship in Paris Hoppe subsequently won many balk-line and three-cushion billiard championships, and in 1940 he was named the top player by the National Billiards Association He wrote *Thirty Years of Billiards* (1925) and *Billiards as It Should Be Played* (1941)

Hopper, DeWolf, 1858–1935, American singer and comedian, b. New York city. He made his debut (1879) in *Our Boys*, appeared with Frohman's Madison Square Company as Pittacus Green in Steele MacKaye's *Hazel Kirke*, and became a star actor and singer in 1890. He was associated with Weber and Fields at their Broadway Music Hall (1895–1904) and later achieved fame in such Gilbert and Sullivan roles as Bunthorne in *Patience* (1912) and the Lord Chancellor in *Iolanthe* (1913) He appeared in *The Better 'Ole* (1918), *Erminie* (1921), and *The Student Prince* (1925–28) Hopper made famous the recitation "Casey at the Bat," first presented in 1888 With W. W Stout he wrote *Once a Clown Always a Clown* (1927)

Hopper, Edward, 1882–, American painter and graver, b. Nyack, N Y, studied in New York with William Chase, Henri, and Kenneth Hayes Miller Then came a year in Paris followed by exhibitions of oils and of etchings His etchings gained him an early reputation and remain some of his most popular works Hopper excels in realistic pictures of clear-cut, sunlit streets and houses, usually without figures His work in oil and water color is slowly and carefully painted, with light and shade used rather for pattern than for modeling He exhibited widely and won awards at Chicago, Los Angeles, and Baltimore He is represented in many leading galleries *Early Sunday Morning* (Whitney Mus., New York) is a characteristic oil

Hopper, Isaac Tatem, 1771–1852, American humanitarian, father of Abigail Hopper GIBBONS An active abolitionist, he worked for the Underground Railroad and defended Negro slaves in court For these activities he and his son-in-law, James Sloan Gibbons, were disowned (1842) by the Hicksite Quakers Hopper also worked for prison reform See biography by L M Child (1853)

Hoppe-Seyler, Felix (fā'lĭks hŏ'pu-zī'lûr), 1825–95, German physiological chemist He was Virchow's assistant at Berlin and later professor at the universities of Tübingen and Strasbourg He is noted for his studies of the blood (especially of hemoglobin), of chlorophyll, and of the process of metabolism, he was the first to obtain lecithin in a pure state He introduced the term *protein* He wrote a notable treatise, *Physiologische Chemie* (1881).

Hoppin, Augustus, 1828–96, American illustrator and author, b Providence, R I He studied law, but soon abandoned it for illustrating His drawings appeared in *Illustrated American News*, *Putnam's Magazine*, and *Yankee Notions*, and he illustrated Holmes's *Autocrat of the Breakfast Table*, William Allen Butler's *Nothing to Wear*, Shillaber's *Life and Sayings of Mrs Partington*, and G W Curtis's *Potiphar Papers* His amiable sarcasm and craftsmanship created a wide interest in his works He also wrote and illustrated several travel volumes and a romance, *Married for Fun* (1885)

Hoppner, John, 1758–1810, English portrait painter, protégé of George III, whose natural son he was thought to be He studied with Sir Joshua Reynolds and imitated his style Hoppner early devoted himself to portraiture, achieving a lifelong popularity rivaled only by that of Sir Thomas Lawrence He was particularly successful with portraits of women and children, whom he idealized readily He had great facility and lively color Today many of his pictures have faded badly but they are still greatly prized Under the patronage of the prince of Wales, many of his best works were hung in St James's Palace, where they still are Among his famous portraits are those of the countess of Oxford (National Gall., London), the three Godsal children (H L Satterlee Coll., New York), and the duke of Kent (Windsor Castle) The Metropolitan Museum has several fine Hoppners See study by William McKay and William Roberts (1914 ed.)

Hoquiam (hō'kwēum), city (pop 10,835), W Wash., at the mouth of the Hoquiam river on Grays Harbor, adjacent to ABERDEEN, settled 1859, inc 1890.

Hor, mountain, c 4,800 ft high, SW Jordan It is the highest summit of the vicinity and rises E of the Araba depression Petra lies at its eastern foot Mt. Hor was the place of Aaron's death Num 20 It is called Jebel Nebi Harun in Arabic Some deny the identification of biblical Hor with this mountain The Hor of Num 34 7, 8 is probably Mt Hermon

Horace (Quintus Horatius Flaccus) (hŏ'rĭs), 65 B C–8 B C, Latin poet, one of the greatest of lyric poets, son of an educated freedman of Venusia, S Italy. He studied at Rome and Athens and joining Brutus and the republicans, fought at Philippi After his return to Rome he held a clerkship Several years later he was introduced by Vergil to MAECENAS, who became his intimate friend and constant benefactor In 35 B C his first book of *Satires* appeared, c 30 B C. his *Epodes*, and 29 B C. his second book of *Satires*. These placed him as the leading lyric poet in Rome. Before 30 B C, Maecenas had given him a new home, the famous Sabine farm, where he lived thereafter, except for lengthy visits to Rome. The principal work of his maturity was contained in three books of *Odes* (c 24 B C.); later the first book of *Epistles* (c.20 B C), a fourth book of *Odes* (c.13 B C), a second book of *Epistles*, a hymn (the *Carmen saeculare*), and the *Ars poetica*, or *Epistle to the Pisos*, appeared. After the death of Vergil, Horace was the chief literary figure in Rome and the critical arbiter He represents especially the spirit of the Augustan Age of Rome, a time of peace, when the arts were cultivated earnestly without pretense, when Rome had ceased to be the intellectual handmaid of Greece Horace's early poems show the vitalizing influence of the Greek Archilochus, but his later verse shows complete and individualized adaptions of Greek meters to Latin, Horace was a master of poetic form As his genius matured, Horace's themes turned from personal vilification to more generalized satire and to literary criticism. An urbane Epicurean, Horace offered self-portraits that are among the most delightful of his poems. He gives a vivid picture of contemporary Roman society, and his descriptions of Italian scenery are uniquely beautiful. His complete articulateness and the exactitude and pungency of his phrases have made him always admired He had much influence on English poetry, and there are many translations See A W Verrall, *Studies in Horace* (1884), W Y Sellars, *Horace and the Elegiac Poets* (1892); A Y Campbell, *Horace: a New Interpretation* (1924); Tenney Frank, *Catullus and Horace* (1928); L P. Wilkinson, *Horace and His Lyric Poetry* (1945); H. D. Sedgwick, *Horace a Biography* (1947)

Horae (hō'rē) [Latin from Gr, =seasons], three Greek symbolic personages, controlling the order of nature and the recurrence of the seasons Daughters of Zeus and THEMIS and attendants of Aphrodite, they were personifications—Irene (ĭrē'nē), peace, Dice (dĭ'sē) or Dike (dī'kē), justice, and Eunomia (ūnō'mēu), order

Horam [Heb., =elevated], king of Gezer He was defeated and killed by Joshua Joshua 10 33

Horatii (hōrā'shēī), in Roman legend, three brothers, triplets, who represented Rome in a war with Alba Their opponents were the Curiatii (kyōōrī'ā'shēī), also triplets When two of the Horatii had been killed, the third Horatius pretended flight As the Curiatii pursued him, they became divided, and the surviving Horatius killed the Curiatii separately After the battle Horatius heard his sister mourn her lover, one of the Curiatii, and he stabbed her To do penance he was led, veiled, under a yoke

Horatius (Horatius Cocles) (hōrā'shŭs, -hu), in Roman legend, hero With only two companions, he held Lars Porsena's Etruscan army at bay while the Romans cut down the Sublician Bridge (connecting Rome with the road westward) behind them He swam the Tiber safely and received as much land as he could plow around in a day

Hordaland (hôr'dälän"), county (6,125 sq mi, pop 188,389), SW Norway Bergen is the capital and only large city Hordaland comprises the HARDANGER FJORD region, one of the favorite tourist areas of Norway

Horeb (hō'rĕb) [Heb., =desert], mountain, in which God is said to have resided Ex 3 1 From a comparison of parallel passages Mt Horeb and Mt SINAI seem the same, but this is not sure

horehound, aromatic Old World perennial herb (*Marrubium vulgare*), naturalized in North America It has woolly-white foliage and tiny white clustered flowers and is called the common or white horehound It is a member of the mint family The dried leaves and flower tops are used in making horehound candy and remedies for coughs and colds The black horehound and the water horehound belong to other genera of the mint family

Horem (hō'rĕm) [Heb., =sacred], unidentified fortified city, N Palestine Joshua 19 38

Horemheb: see HARMHAB

Hor-hagidgad (-gĭd'-), wilderness camp of the Israelites Num. 33 32. The camping place called Gudgodah may have been the same Deut 10 7.

Hori (hō'rī) **1** Edomite Gen. 36 22, 1 Chron 1 39 **2** Simeonite. Num 13 5

Horicon (hŏr'ĭkŏn), city (pop 2,253), central Wis., on the Rock River and SSW of Fond du Lac, inc 1897 Farm machinery is made here

Horims (hō'rĭmz) or **Horites** (-rīts), inhabitants of Seir, who were conquered by the Edomite invaders Gen 14 6; 36 20–30, Deut 2.12,22.

horizon (hurī'zŭn), roughly circular line bounding the observer's view of the surface of the earth where sky and earth seem to meet This is called the visible horizon At sea this line is a perfect circle with the observer at its center, but on land it assumes the irregularities of the topographic features The distance of the horizon, i e, the length of the circle's radius, depends on the elevation of the point from which observation is being made Thus at an altitude of 100 ft the distance is c 14 mi. if obstructions are disregarded and refraction is allowed for This distance varies as the square root of the height of the observer. The sensible horizon, referred to in astronomy, is a plane tangent to the earth at the point of observation. The true, rational, or geometrical horizon is a plane parallel to the sensible horizon which passes through the earth's center. In geology, horizon refers to sedimentary deposits of a certain period, usually marked by characteristic fossils.

Hormah (hôr'mŭ) [Heb.,=devoted, accursed], unidentified city, extreme S Palestine, earlier called Zephath. Here the invading Jews were defeated by the Canaanites Later the Jews destroyed it Num 14 45, 21 3, Deut 1 44, Joshua 12 14, 15 30; 19,4; Judges 1.17, 1 Sam 30 30

hormone (hôr'mōn), chemical substance formed in one part of the body and carried in the blood stream to other organs or tissues, influencing and coordinating their activity Such substances are secreted by the various ductless glands—the thyroid, parathyroid, adrenal, pituitary, thymus, ovary, testis, and pancreas See also GLAND

Hormuz (hôr'mŭz", hôrmōōz') or **Ormuz** (ôr'mŭz", ôrmōōz'), island, off S Iran, in the Strait of Hormuz between the Persian Gulf and the Gulf of Oman The town of Hormuz, originally built on the mainland, was moved to the island at the time of the invasion of Jenghiz Khan It was taken by the Portuguese under Afonso de Albuquerque in 1507 and held by them after 1515 It then had great importance but later declined

Horn, Philip de Montmorency, count of see HOORN, PHILIP DE MONTMORENCY, COUNT OF

horn, organ projecting from the head of an animal and used chiefly in offense and defense Among mammals there are three main types of horns Those of cattle, sheep, buffalo, musk oxen, Old World antelopes, and related animals have hollow, permanent, unbranched horns containing keratin Each horn overlies a bony core which grows on the skull The branched horns of the DEER family are known as antlers, are composed of true bone, and are usually shed annually Those of the PRONGHORN have characteristics of both the bovine and deer types Rhinoceros horns are derived entirely from the epidermis of the skin of the snout and are probably modified hairs Horns have been used for many purposes, such as drinking vessels and trumpets Some of our earliest art (from the time of the cave man) has come down to us preserved on pieces of horn In religion and art, horns symbolize power (Jer 48 25) The "horns of the altar" (Amos 3 14), the four corner projections, symbolized divine protection

horn, brass wind instrument see FRENCH HORN

Horn, Cape, headland, 1,391 ft high, S Chile southernmost point of South America, in the archipelago of Tierra del Fuego It was discovered and first rounded by Willem Schouten on Jan 29, 1616, and named after Hoorn in the Netherlands Lashing storms and strong currents made "rounding the Horn" one of the great hazards of sailing-ship days See Felix Riesenberg *Cape Horn* (1939)

Hornaday, William Temple (hôr'nudā), 1854–1937, American naturalist, b Plainfield, Ind He was educated at Iowa State College continued his study of zoology and museology in Europe, and was chief taxidermist (1882–90) of the U S National Museum As the first director (1896–1926) of the New York Zoological Park and as an author, Hornaday was a leader in wildlife conservation His book *Extermination of the American Bison* (1887) helped to save the bison from extinction His works include also the classic *American Natural History* (1904), books on wild animals, and *Thirty Years' War for Wild Life* (1931)

hornbeam see IRONWOOD

hornbook, a primer of a kind in use from the 15th to the 18th cent On one side of a sheet of parchment or paper the matter to be learned was written or printed, over the sheet, for its protection, a transparent sheet of horn was placed, and the two were fastened to a thin board, which usually projected to form a handle, perforated so that the hornbook might be attached to a girdle The matter printed or written included the alphabet in capitals and small letters and other material, varying in different specimens, such as numerals and the Lord's Prayer Sometimes the base and handle were made of metal, stone, or ivory and had letters carved or cast on them See A W Tuer, *History of the Hornbook* (2 vols, 1896)

Horncastle, urban district (pop 4,496), in the Parts of Lindsey, Lincolnshire, England, E of Lincoln and near the confluence of the Bain and Waring rivers It is famous for the August horsefair described by George Borrow in *The Romany Rye* There are remains of a Roman wall

Horne, Richard Henry, or **Richard Hengist Horne,** 1803–84, English poet He served in the Mexican navy and later as commissioner of crown lands in Australia He edited the *Monthly Repository* (1836–37) and contributed to other periodicals His chief work, the epic poem *Orion* (1843), was followed by *A New Spirit of the Age* (1844), written with Robert Bell and Elizabeth Barrett, later Mrs Browning (his correspondence with Miss Barrett was published in 1877) Among his tragedies are *Cosmo de' Medici* and *The Death of Marlowe* (both 1837) In 1846, under the pseudonym Mrs. Fairstair, he wrote two stories for children, *The Good-natured Bear* and *Memoirs of a London Doll*

horned toad, a lizard, several species of which live in the deserts of the SW United States and Mexico The body is from 3 to 5 in long, broad and flattened; it has a short thin tail and short legs. There are spines on the head and some of the scales on the sides and back are large and sharp. Horned lizards are protectively colored, usually in dull grays and browns They eat insects When alarmed some species can eject a thin jet of blood from the eye The young hatch from the female's body

Hornell (hôrnĕl'), city (pop 15,649), S N Y, on the Canisteo and S of Rochester, settled 1789, inc as a village 1852, as a city 1888 It has railroad shops, and its varied manufactures include woodwork and silk products

hornet see WASP

Horne Tooke, John: see TOOKE, JOHN HORNE

Horney, Karen, 1885–, American psychiatrist, b Germany, M D Univ of Berlin, 1913 She married Oscar Horney in 1909 Previous to her arrival (1932) in the United States, she was secretary of the Berlin Psychoanalytic Institute, where she taught for 12 years Associate director (1932–34) of the Chicago Institute for Psychoanalysis, Horney then came to New York, where she lectured at the New School for Social Research Her deviation from orthodox Freudian analysis, by assigning social factors a more important place in the production of neurosis than biological ones, resulted in her becoming (1941) founder and dean of the American Institute of Psychoanalysis These environmental disturbances cause what she calls the basic anxiety, which forces the individual to find new ways of coping with his problems The new methods are neurotic in that they are of a compulsive or rigid nature Her works include *The Neurotic Personality of Our Time* (1937), *Self-Analysis* (1942), and *Our Inner Conflicts* (1945)

Horniman, Annie Elizabeth Fredericka, 1860–1937, English theatrical manager She built and managed the ABBEY THEATRE, Dublin, for the Irish National Theatre Society in 1904, acquired the Gaiety Theatre, Manchester, England, in 1908, which she operated successfully for 14 years, and from 1912 to 1913 managed the Court Theatre London A pioneer in modern English drama, she was the first to produce and direct many of the plays of Synge, Yeats, O'Casey, Lady Gregory, Galsworthy, and others See Lady Gregory, *Our Irish Theatre* (1913), W G Fay and Catherine Carswell, *The Fays of the Abbey Theatre* (1935)

hornpipe, English folk dance known since the 16th cent, when it obtained its name from the wind instrument which accompanied it The hornpipes of the 17th and 18th cent have moderato 3-2 time and 4-4 time As a solo dance it was popular with sailors, who performed it with folded arms and numerous gestures and steps The hornpipe appears in the works of Purcell and Handel

Hornsby, Rogers, 1896–, American baseball player and manager, b Winters, Texas He started in major-league baseball in 1915 as a shortstop for the St Louis Cardinals and later (1920) became a second baseman He was the National League batting champion seven times (1920–25, 1928) and in 1924 had a batting average of .424, which is still the major-league record for the 20th cent As manager (1925–26) of the Cardinals, "Rajah" Hornsby led the team to the pennant and world-series victories in 1926 He was traded to the New York Giants in 1927 and then was player-manager with the Boston Braves (1928) and Chicago Cubs (1930–32) After another short stay with the Cardinals in 1933, Hornsby went over to the American League as manager (1933–37) of the St Louis Browns A right-handed batter, he maintained a record .358 lifetime batting average in 19 years He was voted the most valuable player in 1925 and 1928 and was elected in 1942 to the National Baseball Hall of Fame

Hornsey, municipal borough (1931 pop 95,523, 1947 estimated pop 99,280), Middlesex, England It is a residential suburb NW of London

horology (hôrŏl'ujē), the science of measuring time and of the construction of instruments for its measurement or recording Early measurements of the passage of time were based on observations of seasonal cycles and of the apparent motion of celestial bodies Shorter intervals were measured by observing the shadow cast by an upright object, the shadow clock and the SUNDIAL were probably the first devices constructed Later came the HOURGLASS and the CLEPSYDRA and finally the CLOCK and the WATCH The setting of timepieces depends on astronomical observations with transit telescopes Synchronization is achieved by corrections (especially for longitude) based on nautical or other tables or by time signals sent electrically from the Royal Observatory at Greenwich or from the U S Naval Observatory

Horonaim (hŏrōnā'ĭm) [Heb.,=two caverns], unlocated Moabite town Isa 15 5, Jer 48 3,5,34

Horonite (hŏ'rŏn, hŏ'rŏn) see SANBALLAT

horoscope see ASTROLOGY

Horowitz, Vladimir (hŏ'rōwĭts), 1904–, Russian-American pianist, b Kiev, studied at the Kiev Conservatory He made his European debut in 1925, and his American debut in 1928 with the New York Philharmonic Possessing remarkable technical virtuosity, he soon became one of the most popular pianists in the United States He is the son-in-law of Toscanini

Horrocks or **Horrox, Jeremiah** (both hŏ'ruks), 1617?–1641, English astronomer He made the first observation of the transit of Venus. His *Venus in sole visa*, which narrates this experience, was printed by Hevelius in 1662 The transit occurred on Nov 24, 1639, Horrocks watched the small shadow of the planet move part way across the disk of light on a sheet of paper, where the sun's image was focused through a telescope adjusted to an aperture in the shutter Other fragments of his works besides the *Venus* were edited by John Wallis (1672) From his observations Horrocks estimated more correctly than any one else had yet done the distance of the sun from the earth

Horsa see HENGIST AND HORSA

horse. The horse family (Equidae) is now represented by one genus only (*Equus*), which includes the horse, the ASS, and the ZEBRA The QUAGGA, of this genus, became extinct in 1872 The horse family, the rhinoceros family, and the tapir family are believed to be descended from a common ancestor with five toes on each foot and with the middle toe in line with the axis of the leg In the horse genus, the other toes have disappeared or have become vestigial, the foot being now what was once the middle one of five toes The horse's hoof corresponds to the nail of man's big finger or third toe The horse genus is descended from the *Eohippus* genus of the EOCENE EPOCH, about 45,000,000 years ago The Eohippus (ē"ōhĭ'pŭs) [Gr.,=dawn horse] was about 11 in high, or about the size of a fox It had four toes on each front foot and three toes on each hind foot Its home was the region that is now the Great Plains of North America Similar animals of the horse family lived in the Old World at the same time These became extinct The development through 45,000,000 years from *Eohippus* to *Equus* occurred in North America Fossil bones show the development through various stages to larger size and to the foot of one toe that is now characteristic of the genus *Equus* While horses essentially like modern horses in size and structure developed in North America, they became extinct here about the time when the Indians first reached this continent Whether the Indians ever saw these horses is not known Such horses were then also in the Old World, to which they are believed to have crossed by some land bridge that once connected the two hemispheres There is no evidence to explain why horses did not survive in America An adequate explanation is not found in the presence of carnivorous animals or in a change in climate The best guess may be that the horses were attacked by some disease to which they had not developed resistance In the Old World, several kinds of horses were hunted by men of the Old Stone Age (Paleolithic period), around the campsite of Solutré, in France, the bones of about a hundred thousand horses have been found The condition of the bones gives evidence that the horses were eaten Horses are among the game animals of which Old Stone Age men made likenesses by drawing, engraving, and modeling The horse was one of the last animals to be domesticated Probably it was first tamed by nomads of central Asia who taught uses of tamed horses, directly and indirectly, to the Chinese and to peoples of Asia Minor, Egypt, and Europe In farm work, the horse did not supersede the ox until the 19th cent The first uses of the domesticated horse were in hunting and in war The clumsy oxcart with solid wheels was not suited to the horse and the light chariot with spoked wheels was devised The horse greatly increased the distance over which military operations could be conducted It was instrumental in founding and controlling empires The chariot was followed by a wide range of horse-drawn vehicles, from the racing sulky to the coach and the CONESTOGA WAGON Riders of horses rode bareback and on saddlecloths before the SADDLE and the STIRRUP were invented The different types of domestic horses are believed to result partly from the dominance in them of corresponding types of wild horses The wild forest horse of Europe was relatively large, and the modern draft breeds probably are his descendants A more slender and swift wild horse was probably the dominant ancestor of the Arabian and the racing horses The Shetland and some other ponies are believed to be descendants of wild ponies Heavy horses were used as chargers by medieval knights, to whose weight was added the weight of armor and whose lance was more effective if the knight's horse was heavy Modern draft horses no doubt owe much of their quality to the breeding of chargers in the Middle Ages The best-known draft horse of England is the Shire A lighter English draft horse is the Suffolk, bred for use on farms and seldom sent to cities Other draft breeds vary in color, but the Suffolk is regularly chestnut The Clydesdale, of Scotland, is heavier than the Suffolk but lighter than the Shire The Clydesdale, like the Shire, has a "feather," a shock of long hair, at the fetlock The Belgian ranks with the Shire in weight Its docility and its freedom from feather are among the characteristics that have made it popular in America By far the most

popular draft breed in America is the Percheron, of French origin It is a heavy horse, though lighter than the Shire or the Belgian Its legs, like those of the Belgian and the Suffolk, are free from feather Its walk and trot are faster than those of other draft breeds This quality is attributed to an admixture of Arabian blood The Arab and the thoroughbred are primarily saddle horses, the special use of the thoroughbred being in running races The American saddle horse is distinguished for its easy gaits rather than its speed Jumping fences and ditches is required of the hunter The Morgan shows great endurance as a saddle horse Typical of light-harness horses are the trotter and the pacer The two are not sharply differentiated Typical heavy-harness horses are the Cleveland Bay, the French coach horse, and the German coach horse The hackney is a heavy-harness horse valued especially for its style The favorite pony is the Shetland, best known as a children's pet All wild horses now living are descended from tame horses except Przhevalsky's horse (see TARPAN), found only in the desert of Gobi The wild horse of the Great Plains, known as the MUSTANG, is descended from horses that escaped from Spanish explorers and conquerors The breed of horses with the longest record is the Arabian Its blood is dominant in the modern racing breeds The importation of Arabian horses to America began before the Revolutionary War The gray horse used by George Washington during that war was half Arabian See also MULE, RACING, RIDING See C S Plumb, *Types and Breeds of Farm Animals* (1906), C W Gay, *Productive Horse Husbandry* (1914), *National Geographic Magazine*, Nov, 1923, P D Stong, *Horses and Americans* (1939), Arthur Vernon, *The History and Romance of the Horse* (1939), Margaret Cabell Self, *The Horseman's Encyclopedia* (1946), R M Denhardt, *The Horse of the Americas* (1947)

Horse Cave, town (pop 1,278), S Ky, just E of Mammoth Cave National Park It is a tourist center in a farm area Hidden River Cave lies under a part of the town

horse chestnut, handsome deciduous tree (*Aesculus hippocastanum*), native to the Mediterranean region but widely planted elsewhere as an ornamental and shade tree It has long pyramidal clusters of flowers, usually white but in one variety salmon colored, and sometimes double The nuts, somewhat resembling chestnuts, are regarded as poisonous The horse chestnut belongs to the same genus as the BUCKEYE

horsefly, large, hairy fly of strong, swift flight, belonging to the family Tabanidae It is a common pest of stock and sometimes of humans Some horseflies transmit diseases The male horsefly drinks the nectar of flowers but the female sucks blood as well There are nearly 200 North American species of the genus *Tabanus*, to which the larger species, such as the common mourning horsefly, belong The genus *Chrysops* includes the smaller horseflies, some of which attack man The deer flies belong to this group Horseflies are most abundant in hot weather The eggs are laid on plants or stones close to water The predaceous larvae are wholly or partly aquatic

horsehair worm see HAIRWORM

Horseheads, village (pop 2,570), S N Y, N of Elmira, settled 1789, inc 1837 Bricks and optical goods are made here

horse latitudes, two belts of calms about the earth between the trade winds and the prevailing westerlies, at about 35° N and 30° S, sometimes called the tropical belts of calms in distinction from the equatorial belt of calms or DOLDRUMS The horse latitudes are characterized by high barometric pressure, descending air, low humidity, light variable winds, frequent calms, and cloudlessness, conditions are like those in the center of an ANTICYCLONE

horse mackerel, name applied to various large fishes, especially to the tuna and the bluefish

horse nettle, prickly perennial NIGHTSHADE (*Solanum carolinense*) with white or bluish flowers resembling those of the potato The berries are orange-yellow and have been used medicinally The plant, called also sand brier and bull nettle, is native to the SE United States but has become a pest over much of the country

Horsens (hôr'suns), city (pop 32,400), E Jutland, Denmark, a port on Horsens Fjord, an inlet of the Kattegat A commercial and industrial center, it has textile mills, meat-packing and dairy plants, and various manufactures

horsepower, unit of POWER, i e, of the rate of doing work The term originated with James Watt, who by experiment determined the amount of work a horse could do in a minute in drawing coal from a coal pit The figure at which he arrived, 33,000 foot-pounds per minute, is used as a standard in computing the power which engines of various kinds can generate For example, an engine generates 2 hp when it is doing 66,000 foot-pounds of work (2x33,000 foot-pounds) per minute A so-called 60-horsepower engine is one calculated to do 60x33,000 foot-pounds of work per minute when working at full capacity. The horsepower of a single-action reciprocating steam engine can be computed by dividing by 33,000 the product of the length of the stroke (in feet), the area of the piston (in inches), the steam pressure (in pounds per square inch), and the number of revolutions per minute For the double-action steam engine, the figure obtained as above is doubled

horse racing. see RACING

horse-radish, perennial herb (*Armoracia rusticana* or *Radicula armoracia*), native to central and S Europe (where it has long been cultivated in gardens) and naturalized in many parts of America It is grown mainly for its roots, which in olden times were used medicinally, particularly as an antiscorbutic Today the roots make a popular condiment and are usually grated and mixed with vinegar to make a sauce or relish for meats and sea food Horse-radish is propagated from root cuttings, as it does not make seed It is hard to eradicate, since the whole root sends out buds The lively pungency of the root is caused by its volatile oil, which resembles mustard oil It is stimulating, exciting the action of the stomach and promoting secretions The wilted foliage may be used as a poultice to relieve toothache and facial neuralgia An old name for it is German mustard See *Production and Preparation of Horse-radish* (U S Dept of Agriculture, Leaflet 129)

horseshoe. The horseshoe, commonly of iron or steel, varies from the light plate worn by race horses to the heavy shoe with sharp calks worn by horses of logging camps in drawing heavy loads over roads of ice The earliest extant shoe dates from the 6th cent B C A horseshoe used by the Romans was a leather boot with a metal plate at the bottom Before the advent of motor vehicles, shoeing horses was an important trade, often combined with general blacksmithing Often the horseshoer's skill cured lameness, and before veterinary medicine became a profession the horseshoer, or farrier, treated horses for all their diseases The horseshoe is an emblem and talisman of good luck Horseshoes are often used as QUOITS, the game of pitching them, also called horseshoes, is popular in the United States

Horseshoe Bend see WEATHERFORD, WILLIAM

horseshoe crab see KING CRAB
