It should be not possible for the Board to dispense with any of these conditions. In the case of Girls' institutions the condition may be relaxed to suit particular cases.

Condition 1—No middle school shall be recognized as a high school until it has obtained permanent recognition as a middle school, similarly no high school shall be recognized as an intermediate college until it has obtained permanent recognition as a high school.

When intermediate classes are opened an additional Rs.2,000 must be provided and each additional subject will require Rs.500 over a period of two years. These sums will not include the cost of text-books used in the schools.

4. *Staff*—One trained graduate or undergraduate teacher shall be employed for every section at the following rate:

7. The inspecting authority in forwarding its report shall state whether, and in what subjects or on what conditions, recognition should, in its opinion, be granted.

8. No institution shall be recognized unless it agrees to comply with the following requirements :

- (a) it shall, in the case of a High School, be open to inspection by the inspecting officers of the department, and in the case of an Intermediate College by the inspecting officer of the department with whom the Director of Public Instruction may, for purposes of formal inspection, associate one or more persons chosen from the list referred to in Regulation 4 ;

13. If the department is of opinion that any institution recognized by the Board has, by reason of deterioration, ceased to meet the requirements of the Board, the department shall make a report to the Board. On receipt of the department's report the Board may, through the Divisional Inspector, institute such inquiry as it thinks fit. The report of the Inspector will be submitted to the Board through the Director of Public Instruction, who will add his comments, if any, and the Board will take the report into consideration at its next meeting and inform the department of its decision. In the case of an Intermediate College the Director of Public Instruction may associate with the Inspector for the purpose of the inquiry one or more persons chosen from the list referred to in Regulation 4.

14. In any case in which the Board may decide that action is necessary upon the report, it will first call upon the authorities through the department to show cause why such action should not be taken.

15. No action shall be taken by the Board on any report by the department without first giving the institution concerned an opportunity of making any representation it may wish to make through the department to the Board.

16. The Board shall, if satisfied that the institution is no longer fit for recognition, direct the Secretary to issue a warning to the governing body through the department that unless within a period fixed by the Board the institution removes the defect or defects to which attention has been called, it will be struck off the list of recognized institutions or that recognition will be withdrawn in one or more optional subjects. The Board shall have power to extend from time to time the period so fixed.

17. If within the time fixed by the Board, or within such further time as may be allowed by it, the institution fails to satisfy the Board that it is conforming to its requirements, the Board shall strike the institution off the list of recognized institutions or shall withdraw recognition in one or more optional subjects.

18. The Board may, at a subsequent date, after report by an Inspector, reinstate an institution on the list of recognized institutions, or, if recognition was withdrawn in one or more optional subjects, restore to it the privileges of preparing candidates therein.

19. No institution shall be recognized in any branch of experimental science* unless it satisfies the Board—

- (a) that the number of students assigned to a single teacher in practical work at one time does not exceed 20 ;

*The Board has ruled that recognition in General Science, not Science, should be granted to new institutions for the High School Examination.

- (b) that suitable and, in the case of Intermediate classes, separate laboratories for each branch of experimental science are provided, and that each of them is adequately equipped.

20. Notwithstanding anything contained in these regulations, heads of recognized institutions may admit to the optional subjects except those in which the Board has already prescribed a limit, for the High School Examination in classes IX and X students reading in those classes in other recognized institutions in which those optional subjects are not taught. The number of the students to be so admitted shall be fixed by the heads of the institutions concerned, subject to the maximum limit prescribed for the class.
