WITH- and the parallelism of OE. *wiþcuman* and *wiþercuman* to reject, *wiþstandan* and *wiþerstandan* to withstand, etc.).

As an adv., *with* occurs as the second element in composition with other advs. denoting direction, motion, or extension : FORWITH (FOROUTH, FORNOW), FORTHWITH, INWITH, OUTWITH (OUTOUTH), DOWNWITH, UPWITH.]

The prevailing senses of this prep. in the earliest periods are those of opposition (‘against’) and of motion or rest in proximity (‘towards’, ‘alongside’), which are now current only in certain traditional collocations or specific applications. These notions readily pass into fig. uses denoting various kinds of relations, among which those implying reciprocity are at first prominent. The most remarkable development in the signification of *with* consists in its having taken over in the M.E. period the chief senses belonging properly to OE. *mid* MID *prep.*$^{1}$ (cognate with Gr. *μετά* with). These senses are mainly those denoting association, combination or union, instrumentality or means, and attendant circumstance. These are all important senses of ON. *við*, to which fact their currency and ultimate predominance in the English word are partly due. The last important stage was the extension of *with* from the instrument to the agent, in which use it was current for different periods along with *of* and *through*, and later with *by*, which finally superseded the other three. The range of meanings in general has no doubt been enlarged by association with L. *cum*. The interaction of senses and sense-groups has been such that the position of a particular sense in the order of development is often difficult to determine.

In common with other preps. *with* can be postponed to the end of an interrogative or relative clause introduced by its regimen ; but in ME. it was freq. placed immediately after the verb in relative clauses, *e.g.* *þes rentis þat þe fend hab dowed *with* clerkis = these revenues with which the Devil has endowed clerics. In postposition it was for a long period extensively replaced by WITHAL (q.v. B).

[Com. Indo-European interjection, used as a natural exclamation of lament; its forms fall into types distinguished by variety of vocalism, and reduplicated forms are characteristic of several of the Germanic langs.; most of these langs. have developed a substantival use of the simple forms (through such constructions as that in A. 6), and English and German have developed an adj. use.

OE. *wá*, also *wǽ*, corresp. to OS., MLG. *wē*, (M)Du. *wee*, OHG., MHG. *wē* (G. *weh*, also *wehe*), ON. *vei*, *vá* (Sw., Da. *ve*), Goth. *wai ohai*, and further to L. *væ*, Lett. *wai*, Olr. *fé*, W. *gwae*. (Arm. *vay* and late Gr. *οὐά*, *οὐά*, *οἰαί* are new formations.) Teut. *wai-* is the source of the exclamations F. *ouais*, It. *guai*, Sp. *guay*.

The γ-forms are from ON. *vei* (cf. Wellaway). The spelling *wo* has been long prevalent in exclamatory use, and is still affected in poetry.

The forms properly substantival (as distinct from the above forms, which belong primarily to the int. and adv.) are :—OE. *wá*, also the reduplicated *wǽwa*, MLG. *wēwe*, OHG. *wēwa* m., *wēwa* f. (MHG. *wē*, gen. *wēwes* str. n., *wēwe*, *wēwa* wk. m., str. and wk. f.); otherwise the orig. interjectional forms are used as sbs.

OE. *wēa* entered into compounds in the sense of 'grievous, evil, bad'; one of these, *wēamdæl* peevish, survived into ME., see Wamdi ; so Gothic *wai* in *waidēdjis* Ἀφρῳ̃ν (f.

**woaldþ* = OE. *wōaldād* crime), OHG *wō* in *wōuwrt* evil fate misfortune, cf Lett *waajsch* weak, ill

C. *adj.* (orig. and chiefly predicative).

This use has developed by a process common to the history of impersonal expressions in which an original dative has been converted into a nominative: *me is woe* became *I am woe*, as *me longeth* became *I long*.

1. Grieved, wretched, miserable, sorrowful. *Obs.* exc. *Sc.* and *north. dial.*

The first instance, like many more in early ME., is doubtful, because it is impossible to determine whether *saucte paul* is dative (900 A. 3) or nominative.

**Woe-begone** (wōˑbigɒn), *a.* (*sb*) [The construction out of which this word arose is illustrated by the quots. immediately following, in which an objective pron. is governed by a compound tense of Bego (q. v. sense 8) with Woe *sb.* as subject (*Me is woe bigon* = Woe has beset me) —

c 1330 *Arth. & Merl.* 1150 Me nas neuer so woe bigon, Yif thou it wost vnderstond ! For . almost schaue him slon. c 1386 Chaucer *Franklt T.* 588 Noght wolde I telle how me is woe bigon But cas ten outher mistes I dye or pleyne

Subsequently a change of construction took place, parallel to the passing of *me is woe* into *I am woe* (see Woe *a.*), *woe* and *begone* becoming consequently so individually associated as to form a compound.

In the following quot. there seems to be a blend of the old and new construction :

1592 T. Watson *Tears of Fancie* xxxvii, My hart doth whisper I am woe begone me.]

1. ' Beset with woe' ; oppressed with misfortune, distress, sorrow, or grief. *Obs.* or *arch.*

2. Of persons in respect of their looks, appearance, or manner : Exhibiting or betraying a state of distress, misery, anguish, or grief. Also *transf.* of inanimate objects.

The rise of this sense in the modern period was due to an academic revival of the word, with a certain special reference to such contexts as that of quot 1597 in sense 1.

The regular ME. descendants of OE. *wifman*, *-men*, *viz. wimman*, *wimmen* (cf. OE. *lēofman*, *lēofmen*, Leman), continued in use until the 16th century, from the rounding of *wi-* to *wu-* is clearly established, and is at that time characteristic of western ME. texts. The form *wummon* appears in the late 13th century (first in western texts), and the corresponding pl. *wommen* in the late 14th. The simplification of *mm* in *wo(m)man*, *-en* and *wo(m)man*, *-en*, and the consequent conversion of the first syllable into an open syllable gave rise to forms with *ō* and *ŏ*, which, continuing to the early modern period, provided the occasion for punning analyses of *woman* as *wo* (*two*) *man* (*male*). From *c* 1400 *woman* and *women* became regular spellings for sing. and pl., and have been retained as a properly corresponding pair to *man* and *men* ; but in the modern speech the pronunciation (wu·) was ultimately appropriated to the sing. and (wi·) to the pl., probably through the associative influence of pairs like *foot* and *feet*.

From at least the 13th century, and partly in the pronunciation of the pl. has been in respect of the quantity of the first vowel, which was either short or long in the 16th and 17th centuries ; but in the same period we have the pronunciations of the sing. are recognised by orthoepists, viz. wu·man, *wŭ*·man, *wo*·man, and u·man, *ŭ*·man, of which all but the first have now given way to dialectal usage.

[ Examples of the *δ*-forms of the sing., without initial *w*, follow here ; for illustration of the more normal forms see sense 2.

**Work** (wǝ̈k), *v.* Pa. t. and pple. **worked** (wǝ̈kt), *arch.* **wrought** (rɔt). Forms: see below. [(1) OE. *wyrcan*, pa. t. *worhte*, pa. pple. *geworht*, = OS. *wirkian*, OHG. *wurchen*, *worhta*, *wurhta*, *giworht*, *gewurchet* (MHG. *wurken*, *wirken*, *worhte*, *geworht*, *gewirket*), ON. *yrkja*, *orta*, *ortr*, Goth. *waurkjan*, *waurhta*, *-waurhts*:—OTeut. **wurkjan*, *wurxt-*; (2) OE. (Mercian) *wircan*, = OFris. *werkia*, *wirka*, *worachte*, *worcht*, OS. *wirkian*, *war(a)hta*, *war(a)ht*, OHG. *wirchen*, *warahta* (MHG. *wirken*, *warhte*, G. *wirken*, *wirkte*, *gewirkt*), ON. *verkja*, *virkja* to feel pain :— OTeut. **werkjan*, **warxt-* (**wurxt-*). A third OE. type represented by late *wercan*, *weorc(e)an* seems to point to early influence of the sb. *we(o)rc* (see **Work** *sb.*) upon the vowel of the vb.

Other Teut. forms are OFris. *werka*, OS. *-werkian*, (*werkhot*), (MD)Du. M(L)G. *werken*, (*verachte*, etc.), OHG. *wer.khen* (MHG. *wurchen*, *werken*), ON. *verka* (*-að*) in certain technical uses, *erka* to manage, effect, contrive (Sw. *verka* to do, perform, *virka* to crochet, Da. *virke* to operate, act, weave, etc.).

The Indo-Eur. base *werg-*, *worg-*, *wrg-* is represented outside Germanic by Zend *varəzaiti* to work, Gr. *ἔργον* (=**wergjō*), *ῥέζω* (=**wrgjō*) I do, perf. *ἔοργα*, *ὄργανον* Organ, *ὄργανα* Orgy, Olr. *fairgid* they made, *dofairci* prepare, and the forms of Skt. *sīk* and *v.*, and Welsh *gwe*.

The normal representative of OE. *wyrcan* would be **worch* (for the vocalism cf. *worm*, *worse*, *wort*); the substitution of *k* for *ch*, producing the modern standard form (*wǝ̈k*) instead of (*wǝ̈f*), is shown in north-midland areas *c* 1200, and is due mainly to Work *sb.*, though Scandinavian influence (see various forms above) is possible.

The new pa. t. and pa. pple. *worked*, formed directly on the inf. stem, became established in the 13th century; it is now the normal form except in archaic usage (in which the older form *wrought* may appear in any sense), and in senses which denote fashioning, shaping, or decorating with the hand or an implement: see Wrought.]
