opsiuria (*op-se-ū'-re-ah*) [ὀψέ, late; οὖρον, urine]. Condition in which more urine is excreted during fasting than after a meal.

opsogen (*op'-so-jen*). See *opsinogen.*

opsomania (*op-so-ma'-ne-ah*) [ὄψον, dainty food; μανία, mania]. Insane desire for dainty or some special food.

opsomaniac (*op-so-ma'-ne-ak*). One affected with opsomania.

opsonic (*op-son'-ik*). Pertaining to opsonins. **o. index,** the ratio of the number of bacteria ingested by the leukocytes of a healthy person compared with that ingested by the leukocytes of the patient; *e. g.*, if the ratio of the healthy is 10 and that of the patient 15, then the index is 1½. **negative phase,** the decrease in opsonic power that follows the injection. **positive phase,** the subsequent increase of opsonic power.

opsonin (*op'-so-nin*) [ὀψώνιον, provisions]. An element in normal serum and to a greater degree in the serum of a patient successfully inoculated with dead cultures of the bacteria responsible for the disease which are thereby made susceptible to phagocytosis. **o. immune.** A thermolabile opsonin in the serum resulting from infection or inoculation with dead microbes of the same species. It is active only against the microbe that created it. See *bacteriotropin.*

opsonist (*op'-son-ist*). One versed in the technique of opsonotherapy.

opsonization (*op-son-i-za'-shun*). The process by which bacteria are rendered susceptible to phagocytosis.

opsonize (*op'-son-īz*). To prepare microorganisms for phagocytosis.

opsonogen (*op-son'-o-jen*). Trade name of an attenuated vaccine, said to generate opsonins.

opsonometry (*op-son-om'-et-re*) [*opsonin*; μέτρον, measure]. The estimation of the opsonic index.

opsonotherapy (*op-son-o-ther'-ap-e*). The treatment of disease by increasing the opsonic power of the blood.

opsophagia (*op-so-fa'-je-ah*) [ὄψον, dainty food; φαγεῖν, to eat]. Morbid daintiness of food.

optesthesia (*op-tes-the'-ze-ah*) [*optic*; αἴσθησις, sensation]. Visual sensibility.

optic, optical (*op'-tik, op'-tik-al*) [ὀπτικός, from the base. ὀπ-, to see]. Pertaining to vision or to the science of optics. **o. atrophy,** atrophy of the optic nerve. **o. axis,** the axis of the eye. **o. capsule,** the embryonic structure forming the sclera. **o. center.** 1. The point in the main axis of the crystalline lens at which the rays of light meet. 2. The nerve-center concerned in the visual function. **o. chiasm, o. commissure.** See *commissure, optic.* **o. cup,** the concave area formed by the involution of the distal extremity of the primary optic vesicle. **o. disc,** the optic papilla. **o. foramen.** See *foramen, optic.* **o. groove,** the groove on the sphenoid bone for the optic chiasm. **o. lobes,** the corpora quadrigemina. **o. nerve.** See under *nerve.* **o. neuritis.** See *papillitis.* **o. papilla,** the circular prominence formed by the optic nerve after its entrance into the eyeball. **o. radiations,** a large bundle of nerve-fibers joining the optic thalamus and the occipital lobe of the cerebrum. **o. thalamus.** See *thalamus.* **o. tract,** the fibers between the visual center and the optic chiasm. **o. vesicle,** a diverticulum from each side of the primary anterior vesicle of the embryo, forming the basis of the future eye.

optician (*op-tish'-un*) [*optic*]. A maker of optical instruments.

opticociliary (*op-tik-o-sil'-e-a-re*) [*optic; ciliary*]. Pertaining to the optic and ciliary nerves.

opticocinerea (*op-tik-o-sin-e'-re-ah*) [*optic; cinereus*, resembling ashes]. The gray matter of the optic lobes.

opticopupillary (*op-tik-o-pū'-pil-a-re*) [*optic; pupillary*]. Pertaining to the optic nerve and the pupil.

optics (*op'-tiks*) [*optic*]. That branch of physics treating of the laws of light, its refraction and reflection, and of its relation to vision. See *dioptrics.*

optimal (*op'-tim-al*) [*optimus*, best]. The best, the most favorable.

optimeter (*op-tim'-et-er*). Optometer.

optimism (*op'-tim-izm*) [*optimus*, best]. Delusional exaltation; delirium of grandeur.

optimum (*op'-tim-um*) [*optimus*, best]. The temperature or other condition at which vital processes are carried on with the greatest activity. Midway between the minimum and maximum temperatures or other conditions.

opto- (*op-to-*). Relation to the eye or to vision.

optochin (*op'-to-kin*). Ethyl-hydrocuprein hydrochloride; see under *ethyl*.

optogram (*op'-to-gram*) [*opto-*; γράμμα, a writing]. A faint image on the retina, for a brief period after death, of the object last seen.

optolactin (*op-to-lak'-tin*). Trade name of a tablet containing the *Bacillus acidophilus* and *Bacillus bulgaricus;* to produce lactic acid.

optomeninx (*op-to-men'-inks*). Synonym of *retina*.

optometer (*op-tom'-et-er*) [*opto-*; μέτρον, a measure]. An instrument for determining the strength of vision, especially the degree of refractive error that is to be corrected.

optometrist (*op-tom'-et-rist*). One who measures the degrees of visual powers without the aid of a cyclopegic or mydriatic; a refractionist.

optometry (*op-tom'-et-re*) [ὀπτός, visible; μέτρον, measure]. Measurement of the visual powers.

optomyometer (*op-to-mi-om'-et-er*) [*opto-*; *myometer*]. An instrument for measuring the strength of the muscles of the eye.

optostriate (*op-to-stri'-āt*) [*opto-*, *striatum*, striped]. Pertaining to the optic thalamus and the corpus striatum.

optotype (*op'-to-tīp*) [ὀπτός, visible; τύπος, type]. A test-type used in testing the acuity of vision.

Opuntia (*o-pun'-te-ah*) [*opuntius*, relating to *Opous*, a town of Greece]. Prickly pear; a genus of cactaceous plants represented by numerous species, many of which, as *O. reticulata* and *O. tuna*, have slight medicinal properties, the former being anthelmintic, purgative, and locally sedative, the latter has been used for cardiac palpitation.

ora (*o'-rah*) [L.]. Margin. **o. serrata**, the jagged anterior margin of the retina.

orad (*o'-rad*) [*os*, *oris*, mouth]. Toward the mouth, or the oral region.

oral (*o'-ral*) [*os*, the mouth]. Pertaining to the mouth. **o. whiff**, a peculiar sound heard during expiration from the open mouth, principally in cases of thoracic aneurysm.

orale (*o-ra'-le*) [L.]. The point at the end of the alveolar process, on the lingual side.

oralogy (*o-ral'-o-je*) [*os*, *oris*, the *mouth;* λόγος, treatise]. Science pertaining to the hygiene of the mouth.

orange (*or'-anj*). See *aurantium*.

orargol (*or'-ar-gol*). Trade name of a gold-silver colloidal preparation, used as an antiseptic.

orbicular (*or-bik'-ū-lar*) [*orbicularis*, dim. of *orbis*, circle]. Circular. A term applied to circula, muscles, as the *orbicular* muscle of the eye or or the mouth (orbicularis palpebrarum, oris).

orbiculare (*or-bik-ū-la'-re*). The orbicular bone a tubercle at the end of the long process of the incus; it is separate in early fetal life.

orbicularis (*or-bik-ū-la'-ris*). See under *muscle*.

orbiculostapedial (*or-bik-ū-lo-sta-pe'-de-al*). Relating to the orbicular process of the incus and to the stapes.

orbiculus ciliaris (*or-bik'-ū-lus sil-e-a'-ris*). The ciliary disc; same as *annulus ciliaris*.

orbit (*or'-bit*) [*orbita*, from *orbis*, a circle]. The bony cavity containing the eye, and formed by the frontal, sphenoid, ethmoid, nasal, lacrimal superior maxillary, and palatal bones.

orbita (*or'-bit-ah*) [*orbis*, a circle, orbit: *pl.*, *orbitæ*]. The same as *orbit*.

orbital (*or'-bit-al*). Pertaining to the orbit. **o. height**, in craniometry, the greatest vertical width of the external opening of the orbit. **o. index**, the orbital height multiplied by 100 and divided by the orbital width. If the orbital index is above 89, it is called megaseme; if under 84, microseme; if between, mesoseme.

orbitocele (*or'-bit-o-sēl*) [*orbita*, orbit; κήλη, tumor]. 1. A tumor of the orbit. 2. The same as *exophthalmos*.

orbitotomy (*or-bit-ot'-om-e*). Incision into the orbit.

orcein (*or'-se-in*) [*Orcus*, Pluto, from its dark color]. A dark-red substance derived from orcin.

orchectomy, orchiectomy (*or-kek'-to-me, or-ki-ek'-to-me*). See *orchidectomy*.

orcheitis (*or-ke-i'-tis*). Synonym of *orchitis*.

orchemphraxis (*or-kem-fraks'-is*). Same as *orchidemphraxis*.

orcheocele (*or'-ke-o-sēl*). See *orchiocele*.

orcheodesmosarcoma (*or'-ke-o-dez-mo-sar-ko'-mah*) [δσχεα, scrotum; δεσμος, bond; σάρξ, flesh; ὄμα, tumor]. Scrotal elephantiasis.

orcheoplasty (*or'-ke-o-plas-te*). See *orchioplasty*.

orcheotomy (*or-ke-ot'-o-me*). See *orchotomy*.

orchestromania (*or-kes-tro-ma'-ne-ah*) [ὀρχεῖσθαι, to dance; μανία, madness]. Dancing mania; chorea, or St. Vitus' dance.

orchi-, orchid-, orchio- (*or-ke-, or-kid-, or-ke-o-*) [ὄρχις, a testicle]. Prefixes signifying connection with or relation to the testicle.

orchialgia (*or-ke-al'-je-ah*) [*orchis-*; ἄλγος, pain]. Neuralgia of the testicle.

orchiatrophy (*or-ke-at'-ro-fe*). Orchidatrophia.

orchiauxe (*or-ke-awks'-e*). Orchidauxe.

orchic (*or'-kik*) [ὄρχις, testicle]. Pertaining to the testicle.

orchichorea (*or-ke-ko-re'-ah*) [*orchis-*; *chorea*]. Irregular movements of the testicles due to contraction of the cremaster muscle.

orchidalgia (*or-kid-al'-je-ah*). Syn. of *orchialgia*.

orchidatonia (*or-kid-at-o'-ne-ah*) [*orchis-*; ἀτονία, atony]. Atony of the testicle; laxness of the testicle.

orchidatrophia (*or-kid-at-ro'-fe-ah*) [*orchis-*; ἀτροφία, atrophy]. Atrophy of the testicle.

orchidauxe (*or-kid-awks'-e*) [*orchi-*; αὔξη, growth]. Hypertrophy of the testicle.

orchidectomy (*or-kid-ek'-to-me*) [*orchis-*; ἐκτομή, excision]. Castration.

orchidemphraxis (*or-kid-em-fraks'-is*) [*orchis-*; ἔμφραξις, stoppage]. Obstruction of the vessels of the testis.

orchidin (*or'-kid-in*). A proprietary fluid from the testicle; used as a nervine.

orchidion (*or-kid'-e-on*) [dim. of ὄρχις, testicle]. A small testicle.

orchiditis (*or-kid-i'-tis*). Synonym of *orchitis*.

orchidocatabasis (*or-kid-o-kat-ab'-as-is*) [*orchido-*, καταβασις, a going down]. Descent of the testicle into the scrotum.

orchidocele (*or-kid'-o-sēl*). Syn. of *orchiocele*.

orchidocelioplasty (*or-kid-o-se-le-o-plas'-te*) [*orchido-*; κοιλια, belly; πλάσσειν, to form]. Operation of replacing in the abdomen an imperfectly descended testicle; it is claimed that while there is no spermatogenesis yet the internal secretion of the testis is not lost.

orchidodynia (*or-kid-o-din'-e-ah*). Synonym of *orchiodynia*.

orchidoncus (*or-kid-ong'-kus*) [*orchido-*; ὄγκος, tumor]. A tumor or tumefaction of the testicle.

orchidopexia (*or-kid-o-peks'-e-ah*). See *orchidopexy*.

orchidopexy (*or'-kid-o-peks-e*) [*orchido-*; πῆξις, fixation]. Same as *orchidorrhaphy*.

orchidorrhaphy (*or-kid-or'-a-fe*) [*orchido-*; ῥαφή, suture]. Suturing of the testicle to the surrounding tissue.

orchidoscheocele (*or-kid-os'-ke-o-sēl*) [*orchido-*; ὄσχη, scrotum; κήλη, tumor]. A scrotal hernia with enlargement of the testicle.

orchidospongioma (*or-kid-o-spun-je-o'-mah*) [*orchido-*; σπογγία, sponge; ὄμα, tumor]. A tuberculous tumor of the testicle.

orchidotherapy (*or-kid-o-ther'-ap-e*). The therapeutic use of testicular extracts.

orchidotomy (*or-kid-ot'-o-me*) [*orchido-*; τομή, a cutting]. Incision of the testicle.

orchidotuberculum (*or-kid-o-tū-ber'-kū-lum*). See *orchidospongioma*.

orchidotyloma (*or-kid-o-ti-lo'-mah*) [*orchido-*; τύλος, callus; ὄμα, tumor]. A callous nodule of the testicle

orchiectomy (*or-ke-ek'-to-me*). Synonym of *orchidectomy*.

orchiepididymitis (*or-ke-ep-id-id-im-i'-tis*) [*orchi-*; *epididymitis*]. Inflammation of both testis and epididymis.

orchilytic (*or-kil-it'-ik*) [ὄρχις, testicle; λύτικος, dissolving]. Disorganization of testicular tissue.

orchio-. See *orchi-*.

orchiocele (*or'-ke-o-sēl*) [*orchio-*; κήλη, tumor]. 1. A tumor of the testicle. 2. Scrotal hernia.

orchiodynia (*or-ke-o-din'-e-ah*) [*orchio-*; ὀδύνη, pain]. Pain in the testicles.

orchioncus (*or-ke-ong'-kus*). Synonym of *orchidoncus*.

orchioneuralgia (*or-ke-o-nū-ral'-je-ah*). Synonym of *orchialgia*.

orchiopexy (*or-ke-o-pek'-se*). Synonym of *orchidopexy*.

orchioplasty (*or'-ke-o-plas-te*) [*orchio-*; πλάσσειν, to form]. Any plastic operation on the scrotum.

orchiorrhaphy (*or-ke-or'-af-e*). Synonym of *orchidorrhaphy*.

orchioscheocele (*or-ke-os'-ke-o-sēl*). Synonym of *orchidoscheocele*.

orchioscirrhus (*or-ke-os-kir'-us*) [*orchio-*; σκιῤῥός, induration]. A hard carcinomatous tumor of the testicle.

orchiotomy (*or-ke-ot'-o-me*). Synonym of *orchidotomy*.

orchis (*or'-kis*) [ὄρχις, a testicle]. 1. A genus of plants furnishing salep and vanilla. 2. The testicle.

orchitic (*or-kit'-ik*). Relating to orchitis.

orchitin (*or'-kit-in*). A sterilized testicular extract.

orchitis (*or-ki'-tis*) [*orchis-*; ῖτις, inflammation]. Inflammation of the testicle.

orchitomy (*or-kit'-o-me*). Synonym of *orchotomy*.

orchizyl (*or'-kiz-il*). A proprietary preparation containing pituitary, thyroid, suprarenal, thymus, testicle and pineal substance.

orchocele (*or'-ko-sēl*). Synonym of *orchiocele*.

orchos (*or'-kos*) [ὄρχος, tarsus]. The tarsal cartilage.

orchotine (*or'-kot-in*). Trade name of a preparation claiming to be a sexual stimulant.

orchotomy (*or-kot'-o-me*) 1. [ὄρχις, testis; τομή, a cutting]. Castration. 2. [ὄρχος, tarsus; τομή, a cutting]. Removal of the tarsal cartilages.

orcin, orcinol (*or'-sin, or'-sin-ol*) [*Orcus*, Pluto, from its dark color], $C_7H_6(OH)_2$. A substance found in many lichens of the genera *Roccella* and *Lecanora*. It is an antiseptic and has been used instead of resorcinol. **o. reaction for xylose in the urine,** heat the urine with an equal volume of hydrochloric acid and a trace of orcin. As soon as a green color is apparent, cool the solution and shake with amyl-alcohol. The amyl-alcohol takes on a green color and in the spectroscope shows the characteristic band between C and D, and, in addition, a more uncertain band, more toward the red.

orcinol (*or'-sin-ol*). Orcin.

ordeal bark (*or'-de-al*). Casca-bark. **o. bean o. nut.** See *physostigma*.

order (*or'-der*) [*ordo*, a rule]. Systematic arrangement. In biology, the taxonomic group below a class and above a family.

orderly (*or'-der-le*). A male hospital attendant.

orectic (*or-ek'-tik*) [ὄρεξις, appetite]. Stimulating appetite.

orexin (*o-reks'-in*) [ὄρεξις, appetite], $C_{14}H_{18}N_2 \cdot HCl.2H_2O$. Phenyldihydroquinazolin hydrochloride used as a stomachic. Dose 4–7 gr. (0.26–0.45 Gm.). **o. tannate,** a light yellow powder, used as an appetizer and stomachic. Dose 4–8 gr. (0.25–0.5 Gm.).

orexis (*o-reks'-is*) [ὄρεξις, appetite]. Appetite.

orexoids (*o-reks'-oids*). Trade name of 5-gr. orexin tannate tablets.

organ (*or'-gan*) [ὄργανον, an organ]. Any part of the body having a definite function to perform. **o. of Corti.** See under *ear*. **o., enamel-,** a club-shaped process of epithelium growing from the dental ridge and forming a cap over the dental papilla. From it the enamel of the tooth is developed. **o. of Giraldès.** See *Giraldès' organ*. **o., Jacobson's.** See *Jacobson's organ*. **o.s of reproduction,** the testicles and penis and its glands in the male, the uterus and its appendages and the vagina and its glands in the female. **o. of Rosenmueller.** See *parovarium*. **o., segmental,** a mesoblastic embryonic structure consisting of three parts—the pronephros, the mesonephros, or Wolffian body, and the metanephros.

organa (*or'-gan-ah*) [L.]. Plural of *organum*. **o. genitalia,** genital organs. **o. genitalia muliebria,** female genital organs. **o. genitalia virilia,** male genital organs. **o. oculi accessoria,** accessory organs of eye. **o. palpantia,** tactile organs. **o. sensuum,** sense organs. **o. uropoetica,** uropoietic organs. **o. urticantia,** the nematophores or nematillæ of Cœlenterates.

organacidia (*or-gan-as-id'-e-ah*). The presence of organic acids, especially in the stomach. **o. gastrica,** the presence of large quantities of organic acids in the gastric contents.

organelle (*or'-gan-el*). Any one of those parts of the protozoan protoplasm having a special function.

organic (*or-gan'-ik*) [*organ*]. Having, pertaining to, or characterized by organs; pertaining to the animal and vegetal worlds; affecting the structure of organs. **o. acid,** any acid containing the carboxyl group COOH. **o. chemistry,** the chemistry of the carbon compounds, carbon being the central element of compounds occurring in organized beings. **o. compound,** any chemical compound containing carbon. **o. disease,** disease of an organ attended with structural changes.

organidin (*or-gan'-id-in*). Trade name of a preparation of an iodine compound with an organic base.

organism (*or'-gan-izm*) [*organ*]. A body consisting of an aggregation of organs having a definite function; any living organized being, either animal or vegetable.

organization (*or-gan-iz-a'-shun*) [*organ*]. 1. The orderly arrangement of organs or parts. 2. An organism. 3. The conversion into an organ, or

into something resembling an organ, or into living tissue.

organo- (*or-gan-o-*) [*organ*]. A prefix meaning relating to the organs.

organofaction (*or-gan-o-fak'-shun*) [*organo-*; *facere*, to make]. The development of an organ of the body.

organoferric (*or-gan-o-fer'-ik*). Consisting of iron and some organic substance.

organogel (*or-gan'-o-jel*). A hydrogel in which the dispersion medium is an organic liquid instead of water.

organogenesis (*or-gan-o-jen'-es-is*) [*organo-*; γένεσις, origin]. The development process of an organ.

organogenetic (*or-gan-o-jen-et'-ik*) [*organogenesis*]. Pertaining to organogenesis.

organogeny (*or-gan-oj'-en-e*). Same as organogenesis, *q. v.*

organography (*or-gan-og'-ra-fe*) [*organo-*; γράφειν, to write]. A descriptive treatise of the organs of an animal or plant.

organoid (*or'-gan-oid*) [*organo-*; εἶδος, like]. Resembling an organ.

organoleptic (*or-gan-o-lĕp'-tik*) [*organo-*; ληπτικός, taking]. 1. Making an impression upon some organ, chiefly of special sense. 2. Plastic; capable of receiving organization.

organology (*or-gan-ol'-o-je*) [*organo-*; λόγος, science]. The science that treats of the organs of plants and animals.

organoma (*or-gan-o'-mah*) [*organo-*; ὄμα, tumor]. A tumor containing distinct organs or parts of organs, but not so arranged as to form a body or part of one.

organometallic (*or-gan-o-met-al'-ik*). Applied to a combination of an alcoholic radical with a metal or metalloid.

organon (*or'-gan-on*) [ὄργανον, an organ; instrument]. 1. An *organ*, *q. v.* 2. A code of principles. **o. auditus**, the organ of hearing. **o. gustus**, the organ of taste. **o. olfactus**, the organ of smell. **o. spirale**, the organ of Corti. **o. tactus**, the organ of touch. **o. visus**, the organ of vision. **o. vomeronasale**. See *Jacobson's organ*.

organonomy (*or-gan-on'-o-me*) [ὄργανον, organ; νόμος, law]. The totality of the natural laws of the conduct and functions of organic life.

organonym (*or-gan'-o-nim*) [ὄργανον, an organ; ὄνομα, name]. The name of an organ or part.

organonymy (*or-gan-on'-im-e*) [ὄργανον, organ; ὄνομα, name]. A system of nomenclature of the organs.

organopathism (*or-gan-op'-ath-izm*) [ὄργανον, an organ; πάθος, disease]. The doctrine of special study and investigation of the pathology of each and every organ by itself.

organopathy (*or-gan-op'-ath-e*) [ὄργανον, organ; πάθος, disease]. 1. The disease of an organ. 2. A term used by Sharp to express the local action of drugs. 3. The same as *organopathism*.

organopexia, organopexy (*or-gan-o-peks'-e-ah, organ'-o-peks-e*) [*organo-*; πῆξις, a fixing]. The surgical fixation of a misplaced organ.

organoplastic (*or-gan-o-plas'-tik*) [ὄργανον, an organ; πλάσσειν, to form, to mold]. Applied to cells or tissues from which organs develop.

organoplasty (*or'-gan-o-plas-te*) [ὄργανον, organ; πλάσσειν, to form, to mold]. The origin or development of plant and animal organs.

organopoiesis (*or-gan-o-poi-e'-sis*) [ὄργανον, an organ; ποίησις, formation]. See *organoplasty*.

organopoietic (*or-gan-o-poi-et'-ik*). Relating to organopoiesis.

organosol (*or-gan'-os-ol*). A proprietary preparation of colloidal silver with an organic solvent; used in gonorrhea.

organotherapeutic (*or'-gan-o-ther-ap-ŭ'-tik*). Relating to the treatment of disease by means of animal extracts.

organotherapy (*or-gan-o-ther'-ap-e*) [*organo-*; θεραπεία, treatment]. The treatment of diseases by means of animal organs or extracts from them. **o., empirical**, organotherapy the results of which cannot be explained scientifically. **o., homostimulative**, organotherapy as illustrated by Hallion's law, *q. v.* **o., substitutive**, organotherapy to replace a missing secretion.

organotrophic (*or-gan-o-tro'-fik*) [ὄργανον, organ; τροφή, nourishment]. Relating or belonging to the nourishment of organized tissue.

organotropic (*or-gan-o-trop'-ik*) [*organo-*; τρέπειν, to turn]. 1. Pertaining to substances which act on the organs of the body. 2. Producing degeneration of organs. See *plasmotropic*.

organotropy (*or-gan-ot'-ro-pe*) Combining affinity which exists between certain chemical agents and cells of the body.

organum (*or'-gan-um*) [L.]. See *organ*.

orgasm (*or'-gazm*) [ὀργασμός, swelling]. Intense excitement, especially that occurring during sexual intercourse; the culmination, of the sexual act and ejaculation of the seminal fluid.

orgastic (*or-gas'-tik*) [ὀργάειν, to swell]. Pertaining to, or characterized by, orgasm.

oridine (*or'-id-ĕn*). Trade name of the calcium salt of the iodized fatty acids of cottonseed oil; it contains 23–25% of iodine in organic combination.

oriental (*o-re-en'-tal*) [*oriens*, the east]. Pertaining to the orient or east. **o. boil.** See *furunculus orientalis*. **o. plague.** See *plague*.

orientation (*o-re-en-ta'-shun*) [see *oriental*]. 1. The act of determining one's position in space (*subjective orientation*), or the position of surrounding objects with reference to each other (*objective orientation*). 2. The relative position of the substitution elements or radicals in the benzene ring

orifacial (*or-if-a'-shal*) [*os, oris*, mouth; *facies*, face]. Pertaining to the mouth and face. **o. angle**, in craniometry, the angle formed by the junction of the plane passing through the masticating surface of the superior maxilla with the facial line.

orifice (*or'-if-is*) [*orificium*, an opening]. An opening.

orificial (*or-if-ish'-al*) [*orifice*]. Pertaining to an orifice. **o. surgery.** See *Pratt's operation*.

orificialist (*or-if-ish'-al-ist*). One who treats disease by the practice of orificial surgery.

orificium (*or-if-ish'-e-um*) [L.]. Orifice. **o. epiploicum**, a synonym of *foramen of Winslow*. **o. externum uteri**, external orifice or os of uterus. **o. infundibuli**, a synonym of *helicotrema*. **o. internum uteri**, internal orifice or os of uterus. **o. urethræ externum**, external orifice of urethra. **o. urethræ internum**, internal orifice of urethra. **o. ureteris**, orifice of ureter. **o. vaginæ**, orifice of vagina.

oriform (*or'-if-orm*) [*os, oris*, mouth; *forma*, form]. Having the shape of a mouth.

Origanum (*o-rig'-an-um*) [ὀρίγανον, marjoram]. A genus of plants of the order *Labiatæ*. *O. majorana*, sweet marjoram, is used as a condiment. *O. vulgare*, wild marjoram, contains a pungent oil (*oleum origani*), consisting chiefly of terpene, $C_{10}H_{16}$. Origanum is tonic, excitant, diaphoretic, emmenagogue, and locally

anodyne. It is also employed as a clearing-agent in microscopy.

origin (*or'-ij-in*) [*oriri*, to arise]. The beginning or starting-point of anything. **o., deep,** or **ental,** of a nerve, its beginning in the cells of the nerve-center. **o. of a muscle,** the point of attachment of a muscle which remains relatively fixed during contraction of the muscle. **o., superficial,** or **ectal,** of a nerve, the point at which it emerges from the brain or cord.

orinasal (*o-ri-na'-zal*). See *oronasal.*

orizabin (*o-riz'-ab-in*). Same as *jalapin.*

ormosine (*or'-mo-sēn*). A crystalline alkaloid from the seeds of *Ormosia dasycarpa,* of South America. It is hypnotic, sedative, and narcotic. The hydrochloride is also used.

ornus (*or'-nus*) [L.]. See *fraxinus.*

oro-. For words beginning thus, see also under **orrho-.**

oroanal (*o-ro-a'-nal*) [*os, oris,* mouth; *anus*]. Extending from the mouth to the anus.

orolingual (*o-ro-lin'-gwal*) [*os,* mouth; *lingua,* tongue]. Pertaining to the mouth and the tongue.

oronasal (*o-ro-na'-zal*). Pertaining to the mouth and the nose.

oronosus (*o-ron'-o-sus*) [ὄρος, mountain; νόσος, disease]. A disease prevalent in mountain regions. See *mountain sickness.*

oropharyngeal (*o-ro-far-in'-je-al*) [*os, oris,* mouth; *pharynx*]. Pertaining to, or situated in, the orpharynx.

oropharynx (*o-ro-far'-inks*) [*os,* mouth; *pharynx*]. The pharynx proper, situated below the level of the lower border of the soft palate, as distinguished from the nasopharynx.

orotherapy (*or-o-ther'-a-pe*). See *orrhotherapy.*

oroxylon (*or-oks'-il-on*) [ὄρος, mountain; ξύλον, wood]. A genus of the *Bignoniaceæ. O. indicum* is indigenous to tropical Asia. The root-bark is tonic and astringent and a powerful sudorific. The leaves are applied to ulcers.

Oroya fever (*o-roi'-yah*) [S. Amer.]. The febrile stage of *verrugas, q. v.*

orphol (*or'-fol*). See *bismuth betanaphtholate.*

orpiment (*or'-pim-ent*). Arsenic trisulphide.

orrhagogus (*or-ag'-o-gus*) [ὀρρός, serum; ἄγειν, to lead]. Synonym of *hydragogue.*

orrhochezia (*or-o-ke'-ze-ah*) [ὀρρός, serum; χέζειν, to relieve oneself] Serous diarrhea.

orrhodermitis (*or-o-der-mi'-tis*). See *serodermitis.*

orrhodiagnosis (*or-o-di-ag-no'-sis*) [ὀρρος, serum]. Serodiagnosis.

orrhoimmunity (*or-o-im-ū'-nit-e*). Passive immunity.

orrhology (*or-ol'-o-je*) ὀρρος, serum; [λόγος, science]. Serology.

orrhoreaction (*or-o-re-ak'-shun*). Seroreaction.

orrhorrhea, orrhorrhœa (*or-or-e'-ah*) [ὀρρός, serum; ῥοία, a flow]. An abnormally great flow of serum. Also, a watery discharge; rice-water discharges.

orrhos (*or'-ros*) [ὀρρός, serum]. Serum; whey.

orrhosis (*or-o'-sis*) [ὀρρός, serum]. The production of serum.

orrhotherapeutic (*or-ro-ther-ap-ū'-tik*). Pertaining to serum therapy.

orrhotherapy (*or-o-ther'ap-e*) [ὀρρός, serum; θεραπεία, therapy]. 1. The treatment of disease by the use of human or animal blood-serum containing antitoxins; serum therapy. 2. Whey-cure.

orris (*or'-is*). See *iris* (2).

orsudan (*or'-sū-dan*). Trade name for sodium methylacetylaminophenylarsonate. It contains 25.4% of arsenic, and is used in the treatment of syphilis.

ortharthragra (*orth-arth-ra'-grah*) [*ortho-;* ἄρθρον, joint; ἄγρα, seizure]. True gout.

orthiauchenus (*orth-e-awk'-en-us*) [ὀρθιος, upright; αὐχήν, neck]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the basion and the inion is between 38° and 49°.

orthin (*or'-thin*), $C_7H_8N_8O_3$. An antiseptic derivative of phenylhydrazin.

orthiochordus (*orth-e-o-kord'-us*) [ὀρθιος, upright; χορδή, cord]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the hormion and the basion is between 33.2° and 52°.

orthiocoryphus (*orth-e-o-kor'-if-us*) [ὀρθιος, upright; κορυφή, head]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the bregma and the lambda is between 29° and 41°.

orthiodontus (*orth-e-o-don'-tus*) [ὀρθιος, upright; ὀδόυς, a tooth]. Lissauer's term for a skull in which the angle between the radius fixus and the line joining the alveolar and subnasal points is between 88° and 121°.

orthiometopus (*orth-e-o-met-o'-pus*) [ὀρθιος, upright; μέτωπον, forehead]. Lissauer's term for a skull in which the angle between the radiue fixus and the line joining the bregma and the nasal point is between 47° and 60°.

orthiopisthius (*orth-e-o-pis'-the-us*) [ὀρθιος, upright, ὄπισθεν, behind] Lissauer's term for a skull in which the angle between the radius fixus and the line joining the lambda and the inion is between 84° and 95°.

orthiopisthocranius (*orth-e-o-pis-tho-kra'-ne-us*) [ὀρθιος, upright; ὄπισθεν, behind; κρανίον, skull]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the lambda and the opisthion is between 107° and 119°.

orthioprosopus (*orth-e-o-pros-o'-pus*) [ὀρθιος, upright; πρόσωπον, face]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the nasion and the alveolar point is between 89 4° and 100°.

orthiopylus (*orth-e-op'-il-us*) [ὀρθιος, upright; πύλη, gate]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the middle point of the anterior margin of the foramen magnum and the middle point of the posterior margin of the foramen magnum is between 15.5° and 24°.

orthiorrhinus (*orth-e-or-i'-nus*) [ὀρθιος, upright; ῥίς, nose]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line joining the nasion and the subnasal point is between 87.5° and 98°.

orthiuraniscus (*orth-e-ū-ran-is'-kus*) [ὀρθιος, upright; οὐρανίσκος, canopy]. Lissauer's term for a skull in which the angle formed between the radius fixus and a line joining the posterior border of the incisor foramen and the alveolar point is between 40° and 60°.

ortho- (*or-tho-*) [ὀρθός, right; straight]. 1. A prefix denoting straight, normal, or true. 2. In chemistry, a prefix denoting that one among several compounds of the same elements which is considered the normal compound. Among derivatives of the benzol-ring it refers to those formed by the substitution of two adjacent hydrogen atoms.

orthoacid (*or'-tho-as-id*). An acid in which the hydroxyl groups are equal in number to the valence of the acidulous element; when this acid is not known, the one whose number of hydroxyl groups most nearly equals the valence of the acidulous element is improperly called an orthoacid.

orthoarteriotony (*or-tho-ar-te-re-ot'-on-e*) [*ortho-; arteria*, artery; τόνος, tension]. Normal blood pressure.

orthobiosis (*or-tho-bi-o'-sis*) [*ortho-; βίος*, life]. Correct living; living in accordance with all the laws of hygiene.

orthocardiac sign (*or-tho-kar-de-ak*). See *Linerato's sign*.

orthocephalic (*or-tho-sef-al'-ik*) [*ortho-; κεφαλή*, head]. Pertaining to orthocephaly.

orthocephalism (*or-tho-sef'-al-izm*). Synonym of *orthocephaly*.

orthocephalous (*or-tho-sef'-al-us*) [*ortho-; κεφαλή*, head]. Having a skull with a vertical index of from 70.1 to 75.

orthocephaly (*or-tho-sef'-al-e*) [*ortho-; κεφαλή*, head]. The condition of having a skull with a vertical index of from 70 1° to 75°.

orthochorea (*or-tho-ko-re'-ah*) [*ortho-; chorea*]. Choreic movements in the erect posture.

orthochlorphenol (*or-tho-klor-fe'-nol*). Ortho-monochlorphenol.

orthochromatic (*or-tho-kro-mat'-ik*) [*ortho-; χρῶμα*, color] A term used in photography to denote correctness in the rendering of colors.

orthochromophil, orthochromophile, (*or-tho-kro'-mo-fil, or-tho-kro'-mo-fēl*) [*ortho-; χρώμα*, color; *φίλος*, loving]. Staining correctly with neutral dyes.

orthocrasia (*or-tho-kra'-ze-ah*) [*ortho-; κράσις*, temperament]. A condition in which there is no idiosyncrasy.

orthocresol (*or-tho-kre'-sol*), C_7H_8O. One of the forms of cresol, *q. v.* It occurs in small amounts in urine.

orthocytosis (*or-tho-si-to'-sis*) [*ortho-; κύτος*, cell]. Condition of the blood in which only the normal corpuscles are present.

orthodactylous (*or-tho-dak'-til-us*) [*ortho-; δάκτυλος*, a finger]. Having straight digits.

orthodiagram (*or-tho-di'-ah-gram*). The record made by an orthodiagraph

orthodiagraph (*or-tho-di'-ah-graf*) [*ortho-; diagraph*]. A radiographic apparatus which records accurately and quickly the dimension, form, and position of internal organs of the body or the location of foreign bodies.

orthodiagraphy (*or-tho-di-ag'-raf-e*). The mode of determining by the aid of the roentgen-rays the exact dimensions of an internal organ by the shadow which it throws upon the fluorescent screen.

orthodolichocephalous (*or-tho-do-lik-o-sef'-al-us*) [*ortho-; δολιχός*, long; *κεφαλή*, head]. Having a long and straight head; having a vertical index between 70.1° and 75°, and a transverso-vertical index between 70° and 74.9°.

orthodontia (*or-tho-don'-she-ah*) [*ortho-; ὀδούς*, tooth]. The correction of irregularities of the teeth.

orthodontics (*or-tho-don'-tiks*) [*orthodontia*]. "That branch of dentistry which deals with the principles and practices involved in the prevention and correction of malocclusion of the teeth, and such other malformations and abnormalities as may be associated therewith."

orthoform (*or'-tho-form*), $C_6H_3(OH)(NH_2)COOH_3$. A white, crystalline, odorless, tasteless powder, slightly soluble in water, soluble in alcohol or ether; used as a local anesthetic and antiseptic and internally in cancer of the stomach. Dose 7½–15 gr. (0.5–1.0 Gm.). Syn., *methylparaamidometaoxybenzoate*. **o. emulsion,** orthoform, 25 parts, in olive-oil, 100 parts. It is recommended in subcutaneous injection in laryngeal tuberculosis. **o., new,** metaamidoparaoxybenzoic-methylester—a cheaper product, used as is the original orthoform.

orthognathic (*or-thog-na'-thik*). Same as *orthognathous*.

orthognathism (*or-thog'-na-thizm*) [*ortho-; γνάθος*, jaw]. The quality of being orthognathous, or of having jaws with little or no forward projection.

orthognathous (*or-thog'-na-thus*) [*ortho-; γνάθος*, the jaw]. Straight-jawed; having a gnathic angle of from 83° to 90°.

orthograde (*or'-tho-grād*) [*ortho-; gradus*, a step]. Walking or standing in the upright position.

ortholiposis (*or-tho-li-po'-sis*) [*ortho-; λίπος*, fat]. Condition in which the relation of a person's weight to his height is normal.

orthomesocephalous (*or-tho-mez-o-sef'-al-us*) [*ortho-; μέσος*, middle; *κεφαλή*, the head]. In craniometry, a term applied to a skull with a transversovertical index between 75.1° and 79.9°, and a vertical index between 70.1° and 75°.

orthometer (*or-thom'-et-er*) [*ortho-; μέτρον*, a measure]. An instrument for measuring the relative degree of protrusion of the eyes.

orthomethylacetanilid (*or-tho-meth-il-as-e-tan'-il-id*). Exalgine.

orthomonochlorphenol (*or-tho-mon-o-klor-fe'-nol*). An anesthetic drug used in rhinitis; also an antiseptic used in lupus.

orthomorphia (*or-tho-mor'-fe-ah*) [*ortho-; μορφή*, form]. The surgical correction of deformity.

orthonal (*or'-tho-nal*). A local anesthetic said to contain cocaine hydrochloride, alypin, and epinephrine.

orthopedia, orthopædia (*or-tho-pe'-de-ah*). Orthopedics.

orthopedic, orthopædic (*or-tho-pe'-dik*) [*ortho-; παῖς*, child]. Pertaining to the correction of deformities, especially in children. **o. surgery,** the branch of surgery devoted to the correction of deformities.

orthopedics, orthopædics (*or-tho-pe'-diks*). See *orthopedic surgery*.

orthopedist, orthopædist (*or-tho-pe'-dist*). One who practises orthopedic surgery.

orthopercussion (*or-tho-per-kush'-un*). Percussion in which the distal phalanx of the percussing finger is held at right angles to the surface being percussed.

orthophoria (*or-tho-fo'-re-ah*) [*ortho-; φόρος*, a tending]. 1. A tending of the visual lines in parallelism. 2. Normal balance of the eye muscles.

orthophosphoric acid (*or-tho-fos-for'-ik*). See *acid, orthophosphoric*.

orthoplasy (*or'-tho-plaz-e*) [*ortho-; πλάσις*, a forming]. The directive or determining influence of organic selection in evolution.

orthopnea, orthopnœa (*or-thop-ne'-ah*) [*ortho-; πνεῖν*, to breathe]. A condition marked by quick and labored breathing, in which the patient finds relief only by maintaining an upright position.

orthopneic (*or-thop-ne'-ik*) [*orthopnea*]. Characterized by orthopnea.

orthopraxis, orthopraxy (*or-tho-praks'-is, or'-tho-praks-e*) [*ortho-; πρᾶξις*, doing]. Correction of the deformities of the body.

orthopsychiatry (*or-tho-sy-ki'-at-re*) [*ὀρθός*, right; *ψυχή*, mind; *ἰατρεία*, healing art]. Disorders of behavior, and their treatment.

orthoptic (*or-thop'-tik*) [*ortho-; optic*]. Pertaining to normal binocular vision. **o. training**, a method of correcting the defective vision of those having strabismus or muscular insufficiency, by stereoscopic and other ocular exercises of a gymnastic kind.

orthopygium (*or-tho-pij'-e-um*) [*ortho-; πυγή*, the rump]. Synonym of *coccyx*.

orthoroentgenography (*or-tho-rent-gen-og'-ra-fe*). Orthodiagraphy.

orthoscope (*or'-tho-skōp*) [*ortho-; σκοπεῖν*, to see]. 1. An instrument for examination of the eye through a layer of water, whereby the curvature, and hence the refraction, of the cornea is neutralized and the cornea acts as a plane medium. 2. An instrument, for use in drawing the projections of skulls.

orthoscopic (*or-tho-skop'-ik*) [*orthoscope*]. 1. Pertaining to an orthoscope or to orthoscopy. 2. Applied to lenses cut from the periphery of a large lens. 3. Having normal vision.

orthoscopy (*or-thos'-ko-pe*) [*orthoscope*]. The examination of the eye with the orthoscope.

orthosis (*or-tho'-sis*) [*ὀρθώσις*, a making straight]. The process of straightening a distorted part.

orthostatic (*or-tho-stat'-ik*) [*ortho-; στατός*, standing]. Pertaining to or caused by standing upright. **o. albuminuria**, albuminuria which occurs when the patient stands on his feet or exercises for long periods of time, but which disappears after a period of rest in bed.

orthotast (*or'-tho-tast*) [*ortho-; τάσσειν*, to arrange]. A device for straightening curvatures of long bones. It has also been used as a tourniquet.

orthoterion, orthoterium (*or-tho-te'-re-on, or-tho-te'-re-um*) [*ortho-*]. An apparatus for straightening curved limbs.

orthotic (*or-thot'-ik*). 1. Pertaining to orthosis. 2. Orthostatic.

orthotonus (*or-thot'-o-nus*) [*ortho-; τόνος*, tension]. Tetanic cramp in which the body lies rigid and straight.

orthotrophy (*or-thot'-ro-fe*) [*ortho-; τροφή*, nourishment]. Correct or normal nourishment; the normal process of nutrition.

orthotropic (*or-tho-trop'-ik*) [*ortho-; τρέπειν*, to turn]. Pertaining to orthotropism.

orthotropism (*or-thot'-ro-pizm*) [*ortho-; τρέπειν*, to turn]. Vertical, upward, or downward growth.

oryza (*o-ri'-zah*). See *rice*.

oryzanin (*o-ri'-zan-in*). An antineuritic vitamin from rice, bran, etc.

O. S. Abbreviation for *oculus sinister*, left eye.

Os. The chemical symbol of *osmium*.

os [L.: *gen., oris; pl., ora*]. The mouth. **o. tincæ** ("tench's mouth"), the os uteri, or mouth of the uterus. **o. uteri.** Same as *o. uteri internum*. **o. uteri externum**, the external opening or entrance to the uterus. **o. uteri internum**, the internal orifice of the uterus.

os [L.; gen., *ossis*; pl., *ossa*]. A bone. **o. acromiale**, the acromion when not united to the scapula. **o. alæforme**, the sphenoid bone. **o. alare, o. alatum**, the sphenoid bone and alisphenoid bone. **o. ballistæ**, the astragalus. **o. brachii**, the humerus. **ossa bregmatis**, the parietal bones. **o. calcis**, the bone of the heel. **o. breve**, a short bone. **o. capitatum.** See *o. magnum*. **o. convolutum**, the turbinated body. **o. coronale**, the frontal bone. **o. coxæ.** See *o. innominatum*. **o. cubitale**, the cuneiform bone of the wrist. **o. femoris**, the femur. **o. hamatum**, the unciform bone. **o. humeri**, the humerus. **o. ilii**, the ilium. **o. innominatum**, the innominate bone. **ossa intercalaria**, the Wormian bones. **o. ischii**, the ischium. **o. japonicum**, the divided malar bone, a racial characteristic of the Japanese. **o. jugale, o. jugamentum**, the malar bone. **o. juguli**, the clavicle. **o. longum**, a long bone. **o. lunatum**, the semilunar bone. **o. magnum**, the third bone of the second row of the carpus. **o. maxillaris**, the upper jaw. **o. multangulum majus**, the trapezium. **o. multangulum, minus**, the trapezoid. **o. multiforme**, the sphenoid bone. **o. naviculare**, the scaphoid bone. **o. orbiculare.** 1. The pisiform bone. 2. The lenticular process of the incus. **o. orbitale**, the upper of two portions into which the malar bone is sometimes divided by a horizontal suture. **o. pectinis**, the os pubis. **o. pectoris**, the sternum. **o. planum.** 1. A flat bone. 2. Part of the ethmoid bone. **o. pneumaticum**, a hollow bone. **o. præmaxillare**, the intermaxillary bone. **o. pubis**, the pubis. **o. sepiæ**, cuttlefish bone. **o. scutiforme**, the patella. **ossa suturarum**, the Wormian bones. Syn., *ossa triquetra; ossa Wormiana*. **o. tetragonum**, the parietal bone. **o. triangulare.** See *o. cubitale*. **o. trigonum**, an ossicle due to the separation of the external tubercle of the posterior surface of the astragalus and ossification from a distinct center. **o. triquetrum.** See *o. cubitale*. **o. unguis**, the lacrimal bone. **o. ypsiloides**, the hyoid bone. **o. zygomaticum**, the malar bone.

osazone (*o'-saz-ōn*). A compound formed when solutions of sugar are warmed for some time with a solution of phenylhydrazin and dilute acetic acid.

oscedo (*os-e'-do*) [L.]. 1. Yawning. 2. Aphthæ.

oschea (*os'-ke-ah*) [*ὄσχεον*, scrotum]. Syn. of *scrotum*.

oscheal (*os'-ke-al*). Pertaining to the scrotum

oscheitis (*os-ke-i'-tis*) [*oschea; ιτις*, inflammation] Inflammation of the scrotum.

oscheo- (*os-ke-o-*) [*oschea*]. A prefix meaning relating to the scrotum.

oscheocele (*os'-ke-o-sēl*) [*oscheo-; κήλη*, hernia]. Scrotal hernia.

oscheohydrocele (*os-ke-o-hi'-dro-sēl*) [*oscheo-; hydrocele*]. A hydrocele occupying the sac of a scrotal hernia after the return of the bowel to the peritoneal cavity and the shutting off of the sac from the latter.

oscheolith (*os'-ke-o-lith*) [*oscheo-; λίθος*, stone]. Scrotal calculus.

oscheoma (*os-ke-o'-mah*) [*oscheo-; ὄμα*, tumor]. A scrotal tumor.

oscheoncus (*os-ke-ong'-kus*) [*oscheo-; ὄγκος*, swelling]. A swelling or tumor of the scrotum.

oscheoplasty (*os'-ke-o-plas-te*) [*oscheo-; πλάσσειν* to form]. Plastic surgery of the scrotum.

oschitis (*os-ki'-tis*). See *oscheitis*.

oscillation (*os-il-a'-shun*) [*oscillatio; oscillare*, to sway to and fro]. A swinging or vibration; also any tremulous motion.

oscillator (*os'-il-a-tor*) [see *oscillation*]. An apparatus used in mechanical therapeutics.

oscillometer (*os-il-om'-et-ur*) [*oscillare*, to sway to and fro; *μέτρον*, measure]. An instrument for measuring oscillations, such as those seen in taking blood-pressure.

oscilloscope (*os-sil'-o-skōp*) [*oscillation*, σκόπειν, to see] A vacuum tube so constructed as to show whether a current is directional or oscillatory, and in the latter case roughly in which direction the greater quantity of current is flowing.

oscine (*os-ēn*) A derivative of hyoscine

oscitancy (*os'-it-an-se*) [*oscitare*, to yawn] The disposition to yawn, drowsiness

oscitation (*os-it-a'-shun*) The act of yawning

oscodal (*os -ko-dal*) Trade name of a preparation of cod liver oil in tablet form

osculation (*os-kū-la'-shun*) [*osculum*] 1 The union of vessels by their mouths 2 Kissing

osculum (*os'-ku-lum*) [L , "a little mouth] A small aperture

-ose (*-ōs*) [*-osus*] A suffix denoting a member of the carbohydrate group

Osiander's sign of pregnancy (*o-ze-an'-der*) Vaginal pulsation, which may frequently be detected early in pregnancy

-osis (*-o-sis*) A suffix signifying condition of, or state caused by

Osler's disease (*ōz'-ler*) [Sir William *Osler*, English physician, 1849–1919] See *Polycythæmia cyanotica* **O.'s phenomenon**, the agglutination of the blood-platelets observed in blood immediately after its withdrawal from the body **O.'s sign, O.'s spots,** small painful erythematous swellings found in the skin and subcutaneous tissues of the hands and feet, and said to be indicative of subacute or chronic malignant endocarditis

osmate (*oz'-māt*) [*osmium*] A salt of osmic acid

osmatic (*oz-mat' ik*) [*ὀσμη* smell] Characterized by a keen sense of smell, having a highly developed rhinencephalon

osmazome (*oz'-maz-ōm*) [*ὀσμή*, smell, *ζωμός*, broth] A brownish-yellow substance developed by heat in muscular fibers

osmesis (*oz-me'-sis*) [*δσμησις*, a smelling] The act of smelling

osmesthesia (*oz-mes-the'-ze-ah*) [*ὀσμή*, smell, *αἴσθησις*, sensation] Olfactory sensibility

osmic (*oz'-mik*) [*osmium*] Pertaining to or containing osmium **o acid.** See *acid, osmic*

osmicate (*oz'-mik-āt*) To stain with osmic acid

osmics (*oz'-miks*) [*ὀσμη*, smell] The science of odors Pertaining to odors

osmidrosis (*oz-mid-ro'-sis*) [*ὀσμή*, smell, *ἵδρωσις* sweat] The secretion of a malodorous perspiration, bromidrosis

osmium (*oz'-me-um*) [*ὀσμή*, smell] A heavy metallic element belonging to the platinum group Symbol Os, specific gravity 22 48, atomic weight, 190 9, quantivalence II, IV, VI, VIII See *acid, osmic*

osmodysphoria (*oz-mo-dis-fo'-re-ah*) [*ὀσμη*, smell, *δυς*, difficult, *φέρειν*, to bear] Intolerance of certain odors

osmogen (*os'-mo jen*) [*ωσμός*, impulse, *γεννᾶν*, to produce] A substance from which a ferment or enzyme is developed

osmology (*oz-mol'-o-je*). 1 The science of odors and the sense of smell 2 That part of physical science treating of osmosis

osmometer (*oz-mom'-et-er*) [*ὀσμή*, smell; *μέτρον*, a measure] 1 An instrument for testing the sense of smell 2 [See *osmosis*] An apparatus for measuring osmosis

osmophobia (*oz-mo-fo'-be-ah*) [*ὀσμή*, smell; *φόβος*, fear]. A morbid dread of strong smells.

osmoregulatory (*oz-mo-reg'-ū-la-tor-e*). Affecting or regulating the extent and rate of osmosis.

osmos (*oz'-mos*) Trade name of an artificial mineral water, similar to Hunyadi Janos

osmose (*oz-mōs'*) 1 Same as *osmosis*. 2 To undergo osmosis

osmosis (*oz-mo'-sis*) [*ὠσμός*, impulsion]. The passage of liquids and substances in solution through a porous septum. See *endosmosis* and *exosmosis*

osmotherapy (*oz-mo-ther'-a-pe*) [*osmosis; therapy*] Treatment of disease by the administration of hypertonic solutions by intravenous injection

osmotic (*oz mot'-ik*) [*ωσμός*, impulse] Pertaining to osmosis **o. equivalent,** "that figure which indicates the weight of water which replaces by osmosis one part by weight of the substance subjected to the process" **o. pressure,** the pressure exerted by the particles of compounds when dissolved, directly expressed or shown by osmotic phenomena It is equal to that which would be exerted by an equal amount of the substance if it were converted into gas and occupied the same volume at the same temperature as the solution

osphrasia (*os fra'-ze-ah*) Synonym of *osphresis*

osphresiological (*os-fre-ze-o-loj'-ik al*). Pertaining to osphresiology, or to the sense of smell.

osphresiology (*os fre ze-ol'-o je*) [*δσφρησις*, smell, *λόγος*, science] The science of the sense of smell and its organs, also of odors and perfumes

osphresiometer (*os-fre ze-om'-et-ur*) [*δσφρησις*, smell, *μετρον*, measure] Osmometer, *q v*

osphresis (*os fre'-sis*) [*δσφρησις*, smell] The sense of smell, olfaction

osphretic (*os fret'-ik*) [*δσφρητικος*, capable of smelling] Same as olfactory

osphus (*os'-fus*) [*ὀσφύς*, loin] The loin

osphyalgia (*os-fe-al'-je-ah*) [*osphus*, *ἄλγος* pain] Any pain in the hip or loins, sciatica

osphyitis (*os-fi-i'-tis*) [*ὀσφύς*, loin, *ιτις*, inflammation] Lumbar inflammation, coxitis

osphyomyelitis (*os-fi o-mi-el-i'-tis*) [*ὀσφύς* loin, *myelitis*] Myelitis of the lumbar portion of the spinal cord

ossa (*os'-ah*) [L , pl of *os*, a bone] Bones See *os* **o. innominata,** the irregular bones forming the sides and anterior wall of the pelvis **o. lata,** the broad or flat bones forming the walls of cavities **o. longa,** the long bones *e g*, those of the limbs **o. suturarum, o. triquetra, o. wormiana.** See *Wormian bones*

ossagen (*os'-aj-en*) A proprietary remedy used in rickets, said to be the calcium salt of the fatty acids of red bone-marrow Dose 30–60 gr (2–4 Gm) twice daily.

ossalin (*os'-al-in*) A hygroscopic ointment-base prepared from bone-marrow It occurs as a grayish fat with the odor of tallow Syn , *adeps ossium*

ossalinate (*os-al'-in-āt*) A proprietary substitute for cod-liver oil said to be the sodium compound of the acid of ox-marrow

ossature (*os'-at-ūr*) [*os*. a bone]. The arrangement of the bones of the body

ossein, osseine (*os'-e-in*) [*os*, a bone] The organic base of osseous tissue

osselet (*os'-el-et*) [dim of *os*, a bone] A small bone, also a hard nodule on the inner aspect of the horse's knee

osseoalbumoid (*os-e-o-al'-bū-moid*). A proteid substance resembling elastin, obtained from bone after hydration of the collagen

osseoaponeurotic (*os-e-o-ap-on-ū-rot'-ik*) [*os, aponeurosis*] Bounded by bone and the aponeurosis of a muscle

osseocartilaginous (*os-e-o-kar-til-aj'-in-us*). Pertaining to or composed of both bone and cartilage.

osseomucoid (*os-e-o-mū'-koid*). A mucin discovered in bone and having the composition $C_{47.07}H_{6.69}N_{11.81}S_{2.41}O_{21.85}$.

osseous (*os'-e-us*) [*os*]. Bony; composed of or resembling bone.

ossicle (*os'-ik-l*) [*ossiculum*, dim of *os*]. A small bone. **o., Andernach's,** the Wormian bones. **o., auditory,** one of a chain of small bones found in the tympanic cavity of the ear. **o., epactal,** a Wormian bone. **o., Kerkring's,** a point of ossification in the occipital bone, immediately behind the foramen magnum. **o.s, Riolan's,** small bones sometimes found in the suture between the inferior border of the occipital bone and the mastoid portion of the temporal bone.

ossicula (*os-ik'-ū-lah*) [L.]. Plural of *ossiculum*. **o. auditus.** Auditory ossicles; see *ossicle*.

ossiculectomy (*os-ik-ū-lek'-to-me*) [*ossicle*; ἐκτομή, excision]. The excision of an ossicle or of the auditory ossicles.

ossiculotomy (*os-ik-ū-lot'-o-me*) [*ossicle*; τέμνειν, to cut]. Surgical incision of the ossicles of the ear

ossiculum (*os-ik'-ū-lum*) [L.: pl., *ossicula*]. Synonym of *ossicle*. **ossicula calcoidea,** the cuneiform bones of the foot. **ossicula epactalia,** the Wormian bones. **o. hamuli,** a horny nodule in the trochlea near the ventral border of the lacrimal groove. **o. jugulare,** one frequently found in the posterior lacerated foramen **ossicula tritucea,** the lesser cornua of the hyoid bone.

ossiferous (*os-if'-er-us*) [*os, ferre*, to bear]. Containing or producing bone tissue.

ossific (*os-if'-ik*) [*os; facere*, to make] Producing bone.

ossification (*os-if-ik-a'-shun*) [see *ossific*]. The formation of bone.

ossifluence (*os-if'-lū-ens*). Osteolysis.

ossifluent (*os-if'-lū-ent*) [*os; fluere*, to flow] Breaking down and softening bony tissue, as an *ossifluent* abscess.

ossiform (*os'-if-orm*) [*os; forma*, form]. Bone-like.

ossify (*os'-if-i*) [*os*, bone; *facere*, to make]. To turn into bone.

ossifying (*os'-if-i-ing*) [*os, facere*, to make]. Changing into bone. **o. chondroma,** a chondroma that is undergoing ossification. **o. myositis,** inflammation of muscle attended with, or followed by, deposition of bone-like masses.

ossin (*os'-in*) [*os*, a bone]. An extract made from bone-tissue, and used in organotherapy, *q. v.*

ostagra (*os-ta'-grah*) [*osteo-; ἄγρα*, seizure]. A bone-forceps.

ostalgia (*os-tal'-je-ah*) [*osteo-; ἄλγος*, pain]. Pain in a bone.

ostalgic (*os-tal'-jik*). Pertaining to, or characterized by, pain in a bone.

ostalgitis (*os-tal-ji'-tis*) [*osteo-; ἄλγος*, pain; *itis*, inflammation]. Inflammation of a bone attended by pain.

ostarthritis (*ost-ar-thri'-tis*). See *osteoarthritis*.

osteal (*os'-te-al*) [*osteo-*]. Osseous, bony; pertaining to bone.

ostealbumoid (*os-te-al'-bū-moid*). Osseoalbumoid.

ostealgia (*os-te-al'-je-ah*). See *ostalgia*.

ostealgic (*os-te-al'-jik*). Ostalgic.

ostealeosis (*os-te-al-e-o'-sis*) [*osteo-; ἀλλοίωσις*, alteration]. A metamorphosis of the substance of bone, as exemplified in osteosarcoma.

osteameba, osteamœba (*os-te-am-e'-bah*) [*osteo-; amœba*]. A bone-cell or osteoblast regarded as an organism.

osteanabrosis (*os-te-an-ab-ro'-sis*) [*osteo-; ἀναβρώσις*, eating up]. Absorption or atrophy of bone.

osteanagenesis (*os-te-an-aj-en'-es-is*) [*osteo-; ἀναγεννᾶν*, to regenerate]. Regeneration of bone.

osteanaphysis (*os-te-an-af'-is-is*) [*osteo-; ἀναφύειν*, to reproduce]. The reproduction of bone-tissue. Synonym of *osteanagenesis*.

ostearthritis (*os-te-ar-thri'-tis*). See *osteoarthritis*.

ostearthrocace (*os-te-ar-throk'-as-e*) [*osteo-; ἄρθρον*, joint; *κακός*, bad]. Malignant caries of the bones of a joint.

ostearthrotomy (*os-te-ar-throt'-o-me*). See *osteoarthrotomy*.

osteauxe (*os-te-awks'-e*) [*osteo-; αὔξη*, growth]. Abnormal enlargement of a bone.

ostectomy (*os-tek'-to-me*). See *osteectomy*.

ostectopy (*os-tek'-to-pe*) [*osteo-; ἐκτοπός*, placed]. Displacement of bone.

osteectomy (*os-te-ek'-to-me*) [*osteo-; ἐκτομή*, excision]. Excision of a portion of a bone.

ostein, osteine (*os-te'-in*). The same as *ossein*.

osteitic (*os-te-it'-ik*) [*osteo-; itis*, inflammation] Pertaining to osteitis.

osteitis, ostitis (*os-te-i'-tis, os-ti'-tis*) [*osteo-; itis*, inflammation]. Inflammation of bone. **o. carnosa,** inflammation of bone, attended with the presence of an excess of fungous granulations. **o., condensing,** a form usually involving the whole of a hollow bone, and resulting in the filling of the medullary cavity with a dense bony mass; new bone usually forms on the surface, so that the bone becomes heavier and denser than normal. **o. deformans,** a rare form characterized by the production of deformity. **o. fungosa,** a simple inflammatory hyperplasia of the medulla and of the compact substance of bone characterized by fungoid granulations and leading to new ossification or destructive chronic inflammation **o., gummatous,** a chronic form due to syphilis and characterized by the formation of gummata in the cancellous tissue of the epiphysis, in the shaft of a bone, or in the periosteum. **o. fibro'sa cys'tica.** See *Recklinghausen's disease*. **o., rarefying.** See *osteoporosis*. **o., sclerosing.** See *osteosclerosis*.

ostelin (*os'-tel-in*) Trade product of cod-liver oil said to promote normal calcium metabolism.

ostembryon (*os-tem'-bre-on*) [*osteo-; ἔμβρυον*, fetus]. Synonym of *lithopedion*.

ostemia, ostæmia (*os-te'-me-ah*) [*osteo-; αἷμα*, blood]. A morbid condition of bone distinguished by its turgescence with blood.

ostempyesis (*os-tem-pi-e'-sis*) [*osteo-; ἐμπύησις*, suppuration]. Suppuration of bone.

osteo- (*os-te-o-*) [*ὀστέον*, bone]. A prefix signifying connection with or relation to bone.

osteoanabrosis (*os-te-o-an-ab-ro'-sis*) [*osteo-; ἀνά*, up; *βρῶσις*, eating]. Absorption of bone or its destruction, as by osteoclasts.

osteoanagenesis (*os-te-o-an-aj-en'-es-is*). Osteanagenesis.

osteoaneurysm (*os-te-o-an'-ū-rizm*) [*osteo-; aneurysm*]. Aneurysm of the arteries of a bone; a pulsating tumor of a bone.

osteoarthritis (*os-te-o-ar-thri'-tis*) [*osteo-; arthritis*]. 1. An inflammation of the bones forming a joint. 2. Chronic rheumatoid arthritis.

osteoarthropathy (*os-te-o-ar-throp'-ath-e*) [*osteo-; ἄρθρον*, joint; *πάθος*, disease]. Any disease of bony articulations. **o., hypertrophic pulmonary,** a disease characterized by a bulbous enlargement of the terminal phalanges of the fingers and toes, a thickening of the articular ends of the bones, and a peculiar curvation of the nails. The condition is usually associated

with disease of the lungs or pleura (whence the name *osteoarthropathie pneumonique hypertrophiante* given to it by Marie), and results from the absorption of toxic products from the diseased foci.

osteoarthrotomy (*os-te-o-ar-throt'-o-me*) [*osteo-; arthrotomy*]. Excision of the joint-end of a bone.

osteoblast (*os'-te-o-blast*) [*osteo-; βλαστός*, a germ]. Any one of the cells of mesoblastic origin concerned in the formation of bony tissue.

osteoblastic (*os-te-o-blas'-tik*). Pertaining to osteoblasts, or to the formation of bone.

osteocachexia (*os-te-o-kak-eks'-e-ah*). Cachexia due to disease of the bones.

osteocampsia (*os-te-o-kamp'-se-ah*) [*osteo-; κάμπτειν*, to bend]. Curvature of a bone without fracture, as in osteomalacia.

osteocarcinoma (*os-te-o-kar-sin-o'-mah*). 1. Ossifying carcinoma. 2. Carcinoma of bone.

osteocartilaginous (*os-te-o-kar-tĭl-aj'-in-us*). Pertaining to or composed of both bone and cartilage.

osteocele (*os'-te-o-sēl*) [*osteo-; κήλη*, hernia]. A bone-like substance found in old hernial sacs; also marked hardening of the testicle

osteocephaloma (*os-te-o-sef-al-o'-mah*) [*osteo-; κεφαλή*, head; *ὄμα*, tumor; *pl., osteocephalomata*]. Encephaloma or encephaloid sarcoma of bone.

osteochondritis (*os-te-o-kon-drī'-tis*). Inflammation involving both bone and cartilage.

osteochondroma (*os-te-o-kon-dro'-mah*). A tumor that is in part bony and in part cartilaginous.

osteochondromatosis (*os-te-o-kon-dro-mat-o'-sis*). The presence of several osteochondromata at the same time.

osteochondrophyte (*os-te-o-kon'-dro-fīt*). A bone tumor in which the proportions of bone and cartilage are nearly equal.

osteochondrosarcoma (*os-te-o-kon-dro-sar-ko'-mah*). An osteochondroma with sarcomatous features.

osteochondrous (*os-te-o-kon'-drus*). Pertaining to, or composed of, both bone and cartilage

osteoclasia (*os-te-o-kla'-ze-ah*). See *osteoclasis*.

osteoclasis (*os-te-ok'-la-sis*) [*osteo-; κλάσις*, a breaking]. 1. Fracture of bones for purposes of remedying deformity. 2. The destruction of bony tissue by osteoclasts.

osteoclast (*os'-te-o-klast*) [see *osteoclasis*]. 1. An instrument for performing osteoclasis. 2. One of the large multinuclear cells found against the surface of bone in little eroded depressions (Howship's lacunæ), and concerned in the removal of bone.

osteoclastic (*os-te-o-klas'-tik*) [*osteo-; κλαστός*, broken]. Of the nature of an osteoclast; concerned in the breaking down and absorption of bone.

osteoclastoma (*os-te-o-klas-to'-mah*) [*osteoclast* (2); *ὄμα*, a tumor.] Myeloid sarcoma of bone.

osteoclasty (*os'-te-o-klas-te*). Osteoclasis (1).

osteocomma (*os-te-o-kom'-ah*) [*osteo-; κόμμα*, segment: *pl., osteocommata*]. Any one of a series of bone-segments; in the adult skeleton, a vertebra is an example.

osteocope (*os'-te-o-kōp*). See *osteocopic pain*.

osteocopic pain (*os-te-o-kop'-ik*) [*osteo-; κόπος*, a beating]. A severe pain in a bone, usually worse at night. It is a symptom of osteitis or periostitis, especially of syphilitic origin.

osteocranium (*os-te-o-kra'-ne-um*). The ossified cranium as distinguished from the chondro cranium.

osteocystoma (*os-te-o-sis-to'-mah*). A cystic bone-tumor.

osteodentine (*os-te-o-den'-tēn*) [*osteo-; dens*, tooth]. A tissue of the nature of, and intermediate in structure between bone and dentine.

osteodermatoplastic (*os-te-o-der-mat-o-plas'-tik*) [*osteo-; δέρμα*, skin; *πλάσσειν*, to mold]. Pertaining to the formation of osseous tissue in dermal structures.

osteodermatous (*os-te-o-der'-mat-us*). Having an ossified integument. Pertaining to osteodermia.

osteodermia (*os-te-o-der'-me-ah*) [*osteo-; δέρμα*, skin]. Bony formations in the skin.

osteodiastasis (*os-te-o-di-as'-ta-sis*) [*osteo-; διάστασις*, separation]. Separation of bone (as an epiphysis) without true fracture.

osteodiclis (*os-te-o-dik'-lis*). See *diclidostosis*.

osteodynia (*os-te-o-din'-e-ah*) [*osteo-; ὀδύνη*, pain]. A chronic pain in a bone.

osteoencephaloma (*os-te-o-en-sef-al-o'-mah*). Osteocephaloma.

osteoepiphysis (*os-te-o-e-pif'-is-is*). A bony epiphysis.

osteofibrolipoma (*os-te-o-fi-bro-lip-o'-mah*). A tumor of bony, fibrous, and fatty elements.

osteofibroma (*os-te-o-fi-bro'-mah*). A combined osteoma and fibroma.

osteogen (*os'-te-o-jen*) [*osteo-; γεννᾶν*, to produce]. The substance of which osteogenic fibers are made up.

osteogenesis (*os-te-o-jen'-es-is*) [*osteo-; γένεσις*, origin]. The development of bony tissue. **o. imperfecta.** 1. Condition in which bones are prone to fracture. 2. Achondroplasia.

osteogenetic (*os-te-o-jen-et'-ik*) [see *osteogenesis*]. Pertaining to osteogenesis. **o. cell,** an osteoblast **o. layer,** the deep layer of periosteum from which bone is formed.

osteogenic (*os-te-o-jen'-ik*). Synonym of *osteogenetic*.

osteogenous (*os-te-oj'-en-us*). Osteogenetic.

osteogeny (*os-te-oj'-en-e*). See *osteogenesis*.

osteography (*os-te-og'-ra-fe*) [*osteo-; γράφειν*, to write]. Descriptive anatomy of the bones and their articulations.

osteohalisteresis (*os-te-o-hal-is-ter-e'-sis*) [*osteo-; ἅλς*, salt; *στέρησις*, privation]. A loss of the mineral constituents of bone.

osteohelcosis (*os-te-o-hel-ko'-sis*) [*osteo-; ἕλκωσις*, ulceration]. Caries of bone.

osteoid (*os'-te-oid*) [*osteo-; εἶδος*, like]. 1. Resembling bone. 2. An osteoma. **o. sarcoma,** a sarcoma in which non-calcified bony tissue is found.

osteolipochondroma (*os-te-o-lip-o-kon-dro'-mah*) [*osteo-; λίπος*, fat; *chondroma*]. A chondroma with osseous and fatty elements.

osteolith (*os'-te-o-lith*) [*osteo-; λίθος*, stone]. A petrified bone.

osteologist (*os-te-ol'-o-jist*). One versed in osteology.

osteology (*os-te-ol'-o-je*) [*osteo-; λόγος*, science]. Science of anatomy and structure of bones.

osteolysis (*os-te-ol'-is-is*) [*osteo-; λύσις*, dissolution]. 1. Absorption of bone. 2. Degeneration of bone.

osteolytic (*os-te-o-lit'-ik*) [*osteo-; λύσις*, dissolution]. Pertaining to, or concerned in, osteolysis.

osteoma (*os-te-o'-mah*) [*osteo-; ὄμα*, a tumor]. A bony tumor. **o., cavalryman's,** one occurring at the insertion of the long adductor muscle of the thigh. **o. durum,** a tumor consisting of hard bony tissue. **o. eburneum.** See *o. durum*. **o. medullare,** an osteoma containing marrow-spaces. **o. spongiosum,** an osteoma containing cancellated bony tissue.

osteomalacia (*os-te-o-mal-a'-she-ah*) [*osteo-*; μαλακία, softening]. Softening of bone from loss of its earthy constituents. Occurs chiefly in adults, especially in pregnancy.

osteomalacial osteomalacic (*os-te-o-mal-a'-se-al, os-te-o-mal-a'-sik*) [*osteo-*; μαλακία, softening]. Pertaining to, or affected with, osteomalacia.

osteomalacosis (*os-te-o-mal-ak-o'-sis*). Synonym of *osteomalacia*.

osteomalactic (*os-te-o-mal-ak'-tik*). Pertaining to osteomalacia.

osteomatoid (*os-te-o'-mat-oid*) [*osteoma*; εἶδος, form]. Resembling an osteoma.

osteomere (*os'-te-o-mēr*). Same as *osteocomma*.

osteometry (*os-te-om'-et-re*) [*osteo-*; μέτρον, measure]. The study of the proportions and measurements of the skeleton.

osteomiosis (*os-te-o-mi-o'-sis*) [*osteo-*; μείωσις, diminution]. Disintegration of bone.

osteomyelitis (*os-te-o-mi-el-i'-tis*) [*osteo-*; *myelitis*]. Inflammation of the marrow of bone.

osteomyelum (*os-te-o-mi'-el-um*) [*osteo-*; μυελός, marrow]. The marrow of bone.

osteonabrosis (*os-te-on-ab-ro'-sis*). See *osteoanabrosis*.

osteonagenesis (*os-te-on-aj-en'-es-is*). See *osteogenesis*.

osteoncus (*os-te-ong'-kus*) [*osteo-*; ὄγκος, tumor]. 1. A tumor of a bone. 2. An exostosis.

osteonecrosis (*os-te-o-ne-kro'-sis*). Necrosis of bone.

osteoneuralgia (*os-te-o-nū-ral'-je-ah*). Neuralgia of bone.

osteonosus (*os-te-on'-o-sus*) [*osteo-*; νόσος, disease]. Disease of bone.

osteoparectasis (*os-te-o-par-ek'-tas-is*) [*osteo-*; παρέκτασις, a stretching out]. Abnormal lengthening of a bone; overextension in the treatment of fracture.

osteopath, osteopathist (*os'-te-o-path*) [*os-te-op'-athist*]. One who practises osteopathy.

osteopathic (*os-te-o-path'-ik*). Pertaining to osteopathy.

osteopathy (*os-te-op'-ath-e*) [*osteo-*; πάθος, suffering]. 1. Any disease of bone. 2. A school of medicine based upon the theory that the body is a vital mechanical organism whose structural and functional integrity are coordinate and that the perversion of either is disease, while its therapeutic procedure is chiefly manipulative correction, its name indicating the fact that the bony framework of the body largely determines the structural relation of its tissues (*Committee on Osteopathic Terminology*).

osteopedion (*os-te-o-pe'-de-on*). See *lithopedson*.

osteoperiosteal (*os-te-o-per-e-os'-te-al*) [*osteo-*; *periosteum*]. Pertaining to bone and its overlying periosteum.

osteoperiostitis (*os-te-o-per-e-os-ti'-tis*) [*osteo-*; *periostitis*]. Combined inflammation of the bone and periosteum.

osteophage (*os'-te-o-fāj*) [*osteo-*; φαγεῖν, to eat]. A myeloplax, or osteoclastic cell.

osteophagia (*os-te-o-fa'-je-ah*) [*osteo-*; φαγεῖν, to eat]. Eating of bones, a perverted appetite.

osteophlebitis (*os-te-o-fle-bi'-tis*). Inflammation of the veins of a bone.

osteophone (*os'-te-o-fōn*) [*osteo-*; φωνή, sound]. An apparatus for the transmission of sounds through the bones of the face; it is miscalled *audiphone*.

osteophony (*os-te-off'-on-e*) [*osteo-*; φωνή, sound]. The transmission of sound through bone.

osteophore (*os'-te-o-fōr*) [*osteo-*; φέρειν, to bear]. A heavy tooth-forceps for crushing bone.

osteophthisis (*os-te-off'-this-is*) [*osteo-*; φθίσις, a wasting]. Wasting of the bones.

osteophyma (*os-te-o-fi'-mah*) [*osteo-*; φῦμα, swelling]. Any tumor or swelling of a bone.

osteophyte (*os'-te-o-fīt*) [*osteo-*; φυτόν, a plant]. A bony outgrowth of dendritic character.

osteoplaque (*os'-te-o-plak*) [*osteo-*; πλάξ, plate]. A layer of bone; a flat osteoma.

osteoplast (*os-te-o-plast*). Same as *osteoblast*.

osteoplastic (*os-te-o-plas'-tik*) [see *osteoplasty*]. 1. Pertaining to the formation of bone. 2. Pertaining to plastic operations upon bone. o. resection, a portion of bone, is cut loose from its attachments except at one point, is laid back, the underlying diseased structure removed, and the bone replaced.

osteoplasty (*os'-te-o-plas-te*) [*osteo-*; πλάσσειν, to form]. Plastic operations on bone.

osteoporoma (*os-te-o-por-o'-mah*) [*osteo-*; πόρος, passage]. The changes produced by osteoporosis.

osteoporosis (*os-te-o-por-o'-sis*) [*osteo-*; πόρος, a pore]. An enlargement of the spaces of bone whereby a porous appearance is produced.

osteopsathyrosis (*os-te-o-sath-ir-o'-sis*) [*osteo-*; ψαθυρός, friable]. Fragility of the bones.

osteorrhagia (*os-te-or-a'-je-ah*) [*osteo-*; ῥηγνύναι, to burst forth]. Hemorrhage from a bone.

osteorrhaphy (*os-te-or'-a-fe*) [*osteo-*; ῥαφή, suture]. The suturing of bones.

osteosarcoma (*os-te-o-sar-ko'-mah*). A sarcoma containing bone.

osteosarcomatous (*os-te-o-sar-ko'-mat-us*). Of the nature of an osteosarcoma.

osteosarcosis (*os-te-o-sar-ko'-sis*) [*osteo-*; σάρξ, flesh]. The conversion of bone into sarcomatous tissue.

osteoscirrhus (*os-te-o-skir'-us*) [*osteo-*; σκλῆρος, a hardening]. A scirrhous carcinoma of bone.

osteosclerosis (*os-te-o-skle-ro'-sis*). A condition in which the bone becomes hard and heavy; it is seen in sclerosing or condensing osteitis. o. fragilis. See *Albers-Schonberg's disease*.

osteoscope (*os'-te-o-skōp*) [*osteo-*; σκοπεῖν, to view]. An instrument used for testing an x-ray machine by examining certain bones which are used as a standard.

osteoseptum (*os-te-o-sep'-tum*) [*osteo-*; *septum*]. The bony nasal septum.

osteosis (*os-te-o'-sis*) [*osteo-*]. Bone formation.

osteospongioma (*os-te-o-spun-je-o'-mah*). A tumor consisting of a spongy or highly cancellous growth of bony tissue.

osteosteatoma (*os-te-o-ste-at-o'-mah*). A fatty tumor of bone.

osteostixis (*os-te-o-stiks'-is*) [*osteo-*; στίξις, a pricking]. Surgical puncturing of a bone.

osteosuture (*os-te-o-sū'-tūr*). See *osteorrhaphy*.

osteosynovitis (*os-te-o-sin-o-vi'-tis*). Synovitis complicated with osteitis of adjacent bones.

osteosynthesis (*os-te-o-sin'-thes-is*) [*osteo-*; σύνθεσις, joining]. The fixation of fragments of fractured bones by means of wires, plates, etc.

osteotabes (*os-te-o-ta-bēz*). Bone degeneration of infants beginning with the destruction of the cells of the lymphoid or splenoid bone-marrow, which disappears in parts and is replaced by soft gelatinous tissue; later the spongy bone diminishes, and lastly the compact bone.

osteoteleangiectasis (*os'-te-o-tel-e-an-je-ek'-tas-is*) [*osteo-*; τέλος, end; ἀγγεῖον, vessel; ἔκτασις, dilatation]. Dilatation of the blood-vessels of a bone; also a telangiectatic osteosarcoma.

osteothrombosis (*os'-te-o-throm-bo'-sis*). Thrombosis of the veins of a bone.

osteotome (*os'-te-o-tōm*) [*osteo-*; τομή, a cutting]. 1. An instrument for cutting bone. 2. An instrument used in cutting the bones of the fetal head in embryotomy.

osteotomist (*os-te-ot'-o-mist*) [*osteo-*; τομή, a cutting]. One who performs osteotomy.

osteotomy (*os-te-ot'-o-me*) [see *osteotome*]. 1. The division of a bone. 2. Making a section of a bone for the purpose of correcting a deformity. **o., cuneiform,** an osteotomy in which a wedge of bone is removed. **o., linear,** a simple division of a bone. **o., Macewen's.** See *Macewen's osteotomy.*

osteotribe (*os'-te-o-trīb*). Same as *osteotrite.*

osteotrite (*os-te-o-trīt*) [*osteo-*; τρίβειν, to rub]. An instrument for scraping away carious bone.

osteotrophy (*os-te-ot'-ro-fe*) [*osteo-*; τρόφη, nourishment]. Nutrition of bony tissue.

osteotylus (*os-te-o-ti'-lus*) [*osteo-*; τύλος, callus]. Bone-callus.

osteotympanic (*os-te-o-tim-pan'-ik*). See *craniotympanic.*

osteulcus (*os-te-ul'-kus*) [*osteo-*; ἕλκειν, to draw]. A bone-forceps.

osthelcus (*ost-hel'-kus*) [*osteo;* ἕλκος, an ulcer]. Caries of bone.

osthexia (*os-theks'-e-ah*) [*osteo-*; ἕξις, a habit]. Formation of bony tissue in abnormal sites.

osthistos (*ost-his'-tos*) [*osteo-*; ἱστός, tissue]. Osseous tissue.

ostia (*os'-te-ah*) [L.]. Plural of *ostium, q. v.*

ostial (*os'-te-al*) [*ostium*]. Pertaining to an opening or orifice.

ostiary (*os'-te-a-re*) [*ostium*]. Same as *ostial.*

ostitis (*os-ti'-tis*). See *osteitis.*

ostium (*os'-te-um*) [L.: *pl. ostia*]. A mouth or aperture. **o. abdominale,** the orifice of the oviduct communicating with the peritoneal cavity. **o. internum,** the uterine opening of the oviduct. **o. pharyngeum,** the pharyngeal opening of the Eustachian tube. **o. tympanicum,** the tympanic opening of the Eustachian tube. **o. vaginæ,** the external orifice of the vagina.

ostoid (*os'-toid*). See *osteoid.*

ostosis (*os-to'-sis*). Osteosis.

ostracosis (*os-trak-o'-sis*) [ὄστρακον, oyster-shell; νόσος, disease]. The degenerative change that sometimes takes place in a portion of bone and causes it to resemble an oyster-shell.

ostreotoxismus (*os-tre-o-toks-iz'-mus*) [ὄστρεον, oyster; τοξικόν, poison]. Poisoning due to eating diseased or deteriorated oysters.

O. T. Abbreviation for *old term* in Anatomy; in opposition to B. N. A. term.

otacoustic (*o-ta-koos'-tik*) [οὖς, ear; ἀκούειν, to hear]. 1. Pertaining to hearing. 2. An ear-trumpet.

otacousticon (*o-tak-oos'-tik-on*) [*oto-*; ἀκουστις, hearing]. An otacoustic, or ear-trumpet.

otagra (*o-ta'-grah*). Synonym of *otalgia.*

otalgia (*o-tal'-je-ah*) [οὖς, ear; ἄλγος, pain]. Earache.

otalgic (*o-tal'-jik*) [*oto-*; ἄλγος, pain]. Affected with or pertaining to, otalgia.

otaphone (*o'-taf-ōn*). See *otophone.*

otectomy (*o-tek'-to-me*) [*oto-*; ἐκτομή, excision]. Ossiculectomy.

othelcosis (*o-thel-ko'-sis*) [*oto-*; ἕλκωσις, ulceration]. Ulceration of the ear.

othematoma, othæmatoma (*o-them-at-o'-mah*) [οὖς, ear; *hematoma*]. Hematoma of the external ear, usually the pinna; comparatively frequent in the insane. Syn., *Hæmatoma auris; insane ear.*

othemorrhagia, othæmorrhagia (*o-them-o-raj'-e-ah*) [*oto-*; *hemorrhage*]. Hemorrhage from the ear.

othemorrhea, othæmorrhœa (*ōt-hem-or-e'-ah*) [*oto-*, αἷμα, blood; ῥοία, flow]. A sanguineous discharge from the ear.

othygroma nephriticum (*ōt-hi-gro'-mah nef-rit' ik-um*) [οὖς, ear; *hygroma; nephritic*]. Elongation of the lobule of the ear following edema from acute nephritis.

otiatric (*o-te-at'-rik*) [*oto-*; ἰατήρ, surgeon]. Pertaining to the treatment of diseases of the ear.

otiatrics (*o-te-at'-riks*) [οὖς, ear; ἰατρικός, of healing]. The study of diseases of the ear and their treatment.

otic (*o'-tik*) [ὠτικός, from οὖς, ear]. Pertaining to the ear. **o. ganglion.** See *ganglion, otic.*

oticodinia (*o-tik-o-din'-e-ah*) [*otic;* δίνη, a whirling]. Vertigo from ear disease.

otitic (*o-tit'-ik*). Relating to otitis.

otitis (*o-ti'-tis*) [οὖς, ear; ιτις, inflammation]. Inflammation of the ear. **o. externa,** inflammation of the external ear. **o., furuncular,** the formation of furuncles in the external meatus. **o. interna,** that affecting the internal ear. **o. labyrinthica,** inflammation of the labyrinth. **o. mastoidea,** inflammation confined to the mastoid cells; mastoid disease. **o. media,** that affecting the middle ear. **o. parasitica,** that caused by a parasite. **o. sclerotica,** inflammation of the inner ear with hardening of the tissues.

oto- (*o-to-*) [οὖς, ear]. A prefix signifying connection with or relation to the ear.

otoantritis (*o-to-an-tri'-tis*) [*oto-*; *antritis*] Inflammation of the mastoid antrum.

otoblenorrhea, otoblennorrhœa (*o-to-blen-or'-e-ah*) [*oto-*; βλέννα, mucus; ῥοία, flow] Any abnormal discharge of mucus from the ear.

otocatarrh (*o-to-kat-ar'*) [*oto-*; *catarrh*]. Catarrh of the ear.

otocephalus (*o-to-sef'-al-us*) [*oto-*; κεφαλή, head]. A monster characterized by a union or close approach of the ears, by absence of the lower jaw, and an ill-developed mouth.

otocerebritis (*o-to-ser-e-bri'-tis*) [*oto-*; *cerebrum*, brain; ιτις, inflammation]. Inflammation of the brain from disease of the ear.

otocleisis (*o-to-kli'-sis*) [*oto-*; κλεῖσις, closure]. Occlusion of the ear.

otoconia (*o-to-ko'-ne-ah*) [*oto-*; κόνις, dust]. Otolith; ear dust.

otoconial (*o-to-ko'-ne-al*) [*oto-*; κόνις, dust] Pertaining to, or of the nature of, otoconia.

otoconite (*o-tok'-o-nīt*). See *otoconium.*

otoconium (*o-to-ko'-ne-um*) [*oto-*; κόνις, dust]. An otolith.

otocrane, otocranium (*o'-to-krān, o-to-kra'-ne-um*) [*oto-*; κρανίον, skull]. The cavity of the petrous portion of the skull holding the organ of hearing.

otocranial (*o-to-kra'-ne-al*). Pertaining to the otocranium.

otocyst (*o'-to-sist*) [*oto-*; κύστις, bladder]. An auditory vesicle, otocell, or otidium in invertebrates, or an otolithic sac in vertebrates.

otodynia (*o-to-din'-e-ah*) [*oto-*; ὀδύνη, pain]. Pain in the ear.

otoencephalitis (*o-to-en-sef-al-i'-tis*) [*oto-*; *encephalon*; ιτις, inflammation]. Otocerebritis.

otoganglion (*o-to-gang'-gle-on*). See *ganglion, otic.*

otogenous (*o-toj'-en-us*) [*oto-*; γεννᾶν, to produce]. Originating in the ear.

otography (*o-tog'-ra-fe*) [*oto-*; γράφειν, to write]. Descriptive anatomy of the ear.

otohemineurasthenia (*o-to-hem-e-nū-ras-the'-ne-ah*) [*oto-*; *hemi*, half; *neurasthenia*]. A condition in which hearing is limited exclusively to one ear,

without the evidence of any material lesion of the auditory apparatus.

otolith (*o'-to-lith*) [*oto-*; λίθος, stone]. 1. One of the calcareous concretions within the membranous labyrinth of the ear. 2. One of the ossicles of the ear.

otological (*o-to-loj'-ik-al*). Pertaining to otology.

otologist (*o-tol'-o-jist*) [*oto-*; λόγος, science]. One versed in otology; an aurist.

otology (*o-tol'-o-je*) [*oto-*; λόγος, science]. The science of the ear, its anatomy, functions, and diseases.

otomassage (*o-to-mas-ahzy'*) [*oto-*; *massage*]. The application of passive motion to the tympanic membrane and auditory ossicles.

otomyasthenia (*o-to-mi-as-the'-ne-ah*). 1. Weakness of the muscles of the ear. 2. Defective hearing due to a paretic condition of the tensor tympani and stapedius muscles.

otomyces (*o-to-mi'-sēz*) [*oto-*; μύκης, fungus]. A fungous growth within the ear. **o. Hageni**, a fungus with green conidia, sometimes found in the external canal of the ear. **o. purpureus**, a dark-red fungous growth in the ear.

otomycosis (*o-to-mi-ko'-sis*). The growth of fungi within the ear, or the diseased condition caused by the same.

otoncus (*o-tong'-kus*) [*oto-*; ὄγκος, tumor]. A swelling or tumor of the ear.

otonecrectomy (*o-to-ne-krek'-to-me*). See *otonecronectomy*.

otonecronectomy (*o-to-nek-ro-nek'-to-me*) [*oto-*; νεκρός, dead; ἐκτομή, excision]. Surgical removal of necrosed sound-conductors from the ear.

otoneuralgia (*o-to-nū-ral'-je-ah.*) Synonym of *otalgia*.

otoneurasthenia (*o-to-nū-ras-the'-ne-ah*). A condition of deficient tone of the auditory apparatus.

otopathy (*o-top'-ath-e*) [*oto-*; πάθος, disease]. Any affection of the ear.

otopharyngeal (*o-to-far-in'-je-al*). Pertaining to the ear and the pharynx. **o, tube**, the Eustachian tube.

otophone (*o'-to-fōn*) [*oto-*; φωνή, voice]. 1. An ear-trumpet or other device for gathering and intensifying sound-waves. 2. An auscultating tube used in ear diseases.

otophthalmic (*o-tof-thal'-mik*) [*oto-*; ὀφθαλμός, eye]. Pertaining to the ear and the eye.

otopiesis (*o-to-pi'-es-is*) [*oto-*; πίεσις, pressure]. Pressure on the labyrinth sufficient to cause deafness. Depression of the tympanic membrane by atmospheric pressure, owing to the rarefaction of the air within the tympanic cavity.

otoplasty (*o'-to-plas-te*) [*oto-*; πλάσσειν, to form]. Plastic surgery of the external ear.

otopolypus (*o-to-pol'-ip-us*). A polypus occurring in the ear.

otopyorrhea, otopyorrhœa (*o-to-pi-or-e'-ah*) [*oto-*; πύον, pus; ῥοία, a flow]. A purulent discharge from the ear.

otopyosis (*o-to-pi-o'-sis*) [*oto-*; πύον, pus]. Suppuration within the ear.

otorhinolaryngology (*o-to-ri-no-lar-in-gol'-o-je*) [*oto-*; ῥίς, nose; *laryngology*]. The anatomy, physiology, and pathology of the ear, nose, and throat.

otorrhagia (*o-tor-a'-je-ah*) [*oto-*; ῥηγνύναι, to burst forth]. A discharge of blood from the external auditory meatus.

otorrhea, otorrhœa (*o-tor-e'-ah*) [*oto-*; ῥοία, a flow]. A discharge from the external auditory meatus.

otosalpinx (*o-to-sal'-pinks*) [*oto-*; σάλπιγξ, tube]. The Eustachian tube.

otoscleronectomy (*o-to-skle-ro-nek'-to-me*) [*oto-*; σκληρός, hard; ἐκτομή, excision]. Surgical removal of sclerosed and ankylosed conductors of sound in chronic otitis media.

otosclerosis (*o-to-skle-ro'-sis*) [*oto-*; σκληρός, hard]. Sclerosis of the tissues of the labyrinth and middle ear.

otoscope (*o'-to-skōp*) [*oto-*; σκοπεῖν, to examine]. An instrument for examining the ear, especially a rubber tube, one extremity of which is inserted into the ear of the subject, and the other extremity into the ear of the examiner, a current of air being passed by means of a Politzer bag and a Eustachian catheter through the middle ear. In case of tympanic perforation the rushing sound made by the passing air is audible to the examiner.

otoscopic (*o-to-skop'-ik*) [*oto-*; σκοπεῖν, to view]. Pertaining to otoscopy.

otoscopy (*o-tos'-ko-pe*) [see *otoscope*]. Examination of the ear, especially by means of the otoscope.

otosis (*o-to'-sis*) [*oto-*]. A mishearing; a false impression as to sounds or words heard.

otosteal (*o-tos'-te-al*) [see *otosteon*]. Pertaining to the bones of the ear.

otosteon (*o-tos'-te-on*) [*oto-*; ὀστέον, bone]. 1. An auditory ossicle, or ear-bone. 2. An otolith.

otostylic (*o-to-sti'-lik*) [*oto-*; στύλος, pillar]. Relating to the ear and to the styloid process.

ototomy (*o-tot'-o-me*) [*oto-*; τομή, a cutting]. Dissection of the ear.

ottar, otto (*ot'-ar, ot'-o*). See *attar*.

O. U. Abbr. for *oculus uterque*, (L) for each eye.

ouabain (*oo-ah'-ba-in*), $C_{30}H_{46}O_{12}$. A poisonous glucoside from the wood of *Carissa schimperi* and of *Acocanthera venenata*. Introduced into the stomach it is nonpoisonous, but injected into the blood it is extremely virulent. It is a depressant to the heart and the respiration. As a local anesthetic it has ten times the power of cocaine. It has been recommended for whooping-cough in doses of $\frac{1}{100}$ gr. (0.000065 Gm.), repeated with caution.

Oudin's current (*oo-dan'*) [Paul *Oudin*, French physician, 1851–1923]. A high frequency current from only one pole or terminal

oudinization (*oo-din-i-za'-shun*). The therapeutic application of the Oudin current.

oulachon (*oo'-lak-on*). See *eulachon*.

oulectomy (*oo-lek'-to-me*). See *ulectomy*.

oulitis (*oo-li'-tis*). See *ulitis*.

ouloid (*oo'-loid*) [οὐλή, scar; εἶδος, like]. Resembling a scar. Also, a form of cicatrix characteristic of lupus, elephantiasis, and syphilis.

oulorrhagia (*oo-lor-a'-je-ah*) [οὖλον, gum; ῥηγνύναι, to burst forth]. Hemorrhage from the gums.

oulotomy (*oo-lot'-o-me*). See *ulotomy*.

ounce (*ouns*) [*uncia*, a contraction of *undecia*, a twelfth part]. A unit of measure of weight. **o., avoirdupois**, the sixteenth part of the avoirdupois pound, or 437.5 gr. (31.1 Gm.). **o., troy**, the twelfth part of the troy pound, or 480 gr. (31.08 Gm.).

ourari (*oo-rah'-re*). Same as *curare*.

ouro- (*oo-ro-*). See *uro-*.

ourology (*oo-rol'-o-je*) [οὖρον, urine; λόγος, science]. The science of the nature and secretion of urine.

ouroscopy (*oo-ros'-ko-pe*). See *uroscopy*.

-ous. A suffix which denotes the lower of two degrees of valency assumed by an element and

incidentally indicates, in many cases, a small amount of oxygen.

outlet. 1. The lower aperture of the pelvic canal 2. The passage that removes the air from a room in ventilation. **o. of pelvis.** See *outlet* (1).

outpatient (*out'-pa-shent*). A hospital patient who is not treated in the wards of the institution.

ova (*o'-vah*) [L.]. Plural of *ovum*, an egg.

ovadin (*o'-vad-in*). A proprietary preparation of the ovaries of animals containing iodine.

oval (*o'-val*) [*ovum*]. 1. Egg-shaped. 2. Pertaining to an ovum.

ovalbumin (*o-val-bū'-min*) [*ovum; albumen*]. The albumin of the egg.

ovaltine (*o'-val-tēn*). A proprietary food beverage. a concentrate of the nutritive principles of barley-malt, milk and eggs, flavored with cocoa.

ovaraden (*o-var-ad'-en*). An organotherapeutic preparation from animals ovaries; used as a nervine. Dose 45–90 gr. (3–6 Gm.) daily, **o. triferrin,** trade name of an ovaraden combined with triferrin.

ovaralgia (*o-var-al'-je-ah*). See *ovarialgia*.

ovarialgia (*o-va-re-al'-je-ah*) [*ovary; ἄλγος*, pain]. Neuralgic pain in the ovary.

ovarian (*o-va'-re-an*) [*ovary*]. Pertaining to the ovaries. **o. residue preparations,** medicinal preparations made from ovarian tissue after removal of the corpus luteum.

ovariectomy (*o-va-re-ek'-to-me*) [*ovary; ἐκτομή*, excision]. Excision of an ovary; oophorectomy.

ovarilin (*o-var'-e-in*). An organotherapeutic preparation from the ovaries of cows; used in ovarian disorders. Dose 15–24 gr. (1.0–1.6 Gm.) 3 times daily in pills.

ovarin (*o'-var-in*). The sterilized extract of the ovaries of the pig; used in diseases of women, sterility, etc.

ovario- (*o-va'-re-o-*) [*ovarium*, ovary]. A prefix denoting relation to the ovary.

ovariocele (*o-va'-re-o-sēl*) [*ovario-; κήλη*, tumor]. Tumor of the ovary; hernia of an ovary. **o., vaginal,** invasion of the vaginal wall by one or both ovaries.

ovarocientesis (*o-va-re-o-sen-te'-sis*) [*ovario-; κέντησις*, puncture]. Puncture of the ovary or of an ovarian cyst.

ovariocyesis (*o-va-re-o-si-e'-sis*) [*ovario-; κύησις*, pregnancy]. Ovarian pregnancy.

ovariodysneuria (*o-va-re-o-dis-nū'-re-ah*) [*ovario-; δυς*, painful; *νεῦρον*, nerve]. Ovarian neuralgia.

ovarioepilepsy (*o-va-re-o-ep'-il-ep-se*). See *hystero-epilepsy*.

ovariohysterectomy (*o-va-re-o-his-ter-ek'-to-me*)[*ovario-; ὑστέρα*, womb; *ἐκτομή*, excision]. Surgical removal of the ovaries and uterus.

ovariolytic (*o-var-e-o-lit'-ik*). Disorganization of ovarian tissue.

ovarioncus (*o-va-re-ong'-kus*) [*ovario-; ὄγκος*, tumor]. An ovarian tumor.

ovariorrhexis (*o-va-re-or-eks'-is*) [*ovario-; ῥῆξις*, rupture]. Rupture of an ovary.

ovariosalpingectomy (*o-va-re-o-sal-pin-jek'-to-me*). See *oophorosalpingectomy*.

ovariosteresis (*o-va-re-o-ster-e'-sis*) [*ovario-; στέρησις*, deprivation]. Extirpation of an ovary.

ovariostomy (*o-va-re-os'-to-me*). See *oophorostomy*.

ovariotomist (*o-va-re-ot'-o-mist*) [see *ovariotomy*]. One who performs ovariotomy.

ovariotomy (*o-va-re-ot'-o-me*) [*ovario-; τομή*, a cutting]. Literally, incision of an ovary. As generally used, removal of an ovary; oophorectomy. **o., normal,** the removal of an ovary that is free from disease. Syn., *Battey's operation*.

ovariotubal (*o-va-re-o-tū'-bal*) [*ovario-; tuba*, tube] Pertaining to the ovary and the oviduct.

ovaritis (*o-var-i'-tis*). See *oophoritis*.

ovarium (*o-va'-re-um*) [L., ovary: *pl., ovaria*]. An ovary or oophoron. **o. masculinum,** Morgagni's hydatid.

ovary (*o'-var-e*) [*ovarium*, an egg-holder, from *ovum*, egg]. One of a pair of glandular organs giving rise to ova. It consists of a fibrous framework or stroma, in which are embedded the Graafian follicles, and is surrounded by a serous covering derived from the peritoneum.

ovaserum (*o-va-se'-rum*). The serum of an animal which has acquired specific precipitating action by the inoculation of egg-albumen; it may be used as a test for egg-albumen.

ovazyl (*o'-vas-il*). A proprietary preparation containing ovary, corpus luteum, pituitary, thyroid, suprarenal and thymus substance.

overbite. Lack of coaptation of upper and lower teeth.

overcrowding. The dwelling together of too many persons in a locality, house, or apartment, with the consequent failure in sanitary and hygienic arrangements, whence result conditions favorable to the development and spread of certain diseases.

overdetermination. Attributing too much to a symptom or dream.

overeat. To surfeit with eating.

overextension. Excessive extension; extension beyond the normal point or line.

overfeed. To feed to excess.

overflow (*o'-ver-flo*). A continuous escape of liquid.

overgrown. Grown too large.

overgrowth. Hypertrophy, or hyperplasia.

overlaid. Said of a child suffocated by the parent lying on it.

overlying of children. A frequent cause of death in infants from suffocation from one of the parents lying upon the child while in an intoxicated condition or intentionally.

overmaximal. Beyond the normal maximum, as the over-maximal contraction of a muscle.

overpressure. Applied chiefly to the school-system that forces too long and continuous periods of study upon the pupils, with consequent unhealthy conditions of mind and body.

overproduction theory. Weigert's law.

overreach. To strike the toe of the hind-foot against the heel or shoe of the fore-foot; said of a horse.

overriding (*o-ver-ri'-ding*). The slipping of an end of a fractured bone over the other fragment.

oversight. See *hypermetropia*.

overstrain. To strain to excess; a condition resulting from exhausting effort.

overtoe. A variety of *hallux varus* in which the great toe overlies its fellows.

overtone. A harmonic tone heard above the fundamental tone.

overtones. The notes represented by the vibrating subdivisions of a string; harmonics.

overwork, mental. See *parathymia*.

ovi- [*ovum*]. A prefix denoting relating to the ovum.

ovicapsule (*o-vik-ap'-sūl*) [*ovi-; capsula*, capsule]. An egg-case, ovisac, or Graafian follicle.

ovicell (*o'-vis-el*) [*ovi-; cella*, a cell]. An unimpregnated ovum.

oviducal, oviducent (*o-vid-ū'-kal, o-ve-dū'-sent*) [*ovi-; ducere*, to lead]. Pertaining to the oviduct or its functions.

oviduct (*o'-ve-dukt*); [*o-ve-ductus*, a canal]. The Fallopian tube; a small tube upon each side of the uterus, through which the ovule passes to the uterus.

oviferous (*o-vif'-er-us*) [*ovi-; ferre*, to bear]. Producing or bearing ova.

ovification (*o-vif-ik-a'-shun*) [see *oviferous*]. The production of ova.

oviform (*o'-vif-orm*) [*ovi-; forma*, form]. Egg-shaped; oval.

ovigenesis (*o-ve-jen'-es-is*). Oogenesis.

ovigenetic (*o-vi-jen-et'-ik*). Ovigenous.

ovigenous (*o-vij'-en-us*) [*ovi-; γενής*, producing]. Producing ova, as an ovary. **o. layer,** the outer layer of the ovary, in which the ovisacs containing the ova are situated

ovigerm (*o'-vij-erm*) [*ovi-; germen*, sprout; bud]. A cell producing or developing into an ovum.

ovigerous (*o-vij'-er-us*) [*ovi-; gerere*, to carry]. Producing or carrying ova.

ovination (*o-vin-a'-shun*) [*ovis*, a sheep]. Inoculation with the virus of sheep-pox.

ovinia (*o-vin-e-ah*) [*ovis*, a sheep]. Sheeppox, a disease related to cowpox.

oviparous (*o-vip'-ar-us*) [*ovi-; parere*, to bring forth]. Laying eggs; bringing forth young in the egg-stage of development.

oviposit (*o-vip-oz'-it*) [*ovi-; ponere*, to place]. To lay or deposit eggs, especially with an ovipositor, as an insect.

oviposition (*o-vip-o-zish'-un*) [*ovi-; ponere*, to place]. The act of laying or depositing eggs by the females of oviparous animals.

ovipositor (*o-vip-oz'-it-or*) [*ovi-; positor*, placer]. An organ, common among insects, composed of several modified rings of somites, forming the end of the abdomen, and employed in depositing the eggs in places fit for development.

oviprotogen (*o-vi-pro'-to-jen*). A proprietary dietetic, said to be a methylene compound of albumin, given in milk to infants, and used hypodermatically also.

ovis (*o'-vis*) [L.]. Sheep.

ovisac (*o'-vis-ak*) [*ovi-; saccus*, sac]. The capsule of an ovum; a Graafian follicle.

oviscapt (*o'-vis-kapt*) [*ovi-; σκαπτειν*, to dig]. Same as *ovipositor*.

ovi vitellus (*o'-vivi-tel'-lus*). Latin for *yolk of egg;* used in pharmacy as an emulsifying agent.

ovo-. The same as *ovi-*.

ovoblast (*o'-vo-blast*) [*ovo-; βλαστός*, germ]. The primordial ovum.

ovocenter (*o'-vo-sen-ter*) [*ovo-; center*]. The centrosome of the ovarian egg during fertilization.

ovocyte (*o'-vo-sīt*). The same as *oocyte*.

ovoferrin (*o-vo-fer'-in*). Trade name of a preparation of organic iron.

ovogal (*o'-vo-gal*). Trade name of a proprietary cholagogue.

ovogenesis (*o-vo-jen'-es-is*) [*ovo-; γένεσις*, genesis]. The process of the development or production of the ovum.

ovoglobulin (*o-vo-glob'-ū-lin*) [*ovo-; globulin*]. The globulin of white of egg.

ovogonium. See *oogonium*.

ovoid (*o'-void*) [*ovo-; εἶδος*, like]. Egg-shaped. **o., fetal,** the fetal ellipse, or the ellipse formed by the bending of the fetal body in the uterus.

ovolecithin (*o-vo-les'-ith-in*). See *lecithin*.

ovomucin (*o-vo-mū'-sin*). A glycoprotein composing about 7% of the protein matter of egg-white.

ovomucoid (*o-vo-mū'-koid*). A glycoprotein obtained from white of egg.

ovoplasm (*o'-vo-plazm*) [*ovo-; plasm*]. The protoplasm of the unimpregnated ovum or ovicell.

ovoprotogen (*o-vo-pro'-to-jen*). Protogen.

ovos (*o'-vos*). A proprietary substitute for meat-extract, prepared from yeast.

ovovitellin (*o-vo-vit-el'-in*). A protein contained in yolk of egg; a white, granular substance, soluble in dilute acids, alkalies, and a 10% solution of common salt.

ovoviviparous (*o-vo-vi-vip'-ar-us*) [*ovo-; viviparus*, bringing forth alive]. Reproducing by means of eggs hatched within the body.

ovula (*o'-vū-lah*) [L.]. Plural of *ovulum*. **o. of Naboth.** See *ovule*.

ovular (*o'-vū-lar*) [*φόν, ovum*, egg]. Relating to an ovule or ovum.

ovulation (*ov-ū-la'-shun*) [*ovulum*, dim. of *ovum*]. The maturation and escape of the ovum.

ovule (*ov'-ūl*) [*ovum*]. 1. The ovum before its escape from the Graafian vesicle. 2. A small egg; especially a small, egg-like body, as the *ovule* of Naboth, one of the small cysts resulting from obstruction of the ducts of the glands of the cervix uteri. **o., migration of,** the transfer of the ovule from the ovary to the oviduct.

ovulin (*ov'-ū-lin*). An internal secretion of the ovary.

ovulogenous (*o-vū-loj'-en-us*) [*ovulum; γεννᾶν*, to produce]. Originating from, or producing, ovules or ova.

ovulum (*o'-vū-lum*) [L.: *pl., ovula*]. An ovule. See *ovule*.

ovum (*o'-vum*) [L., "an egg:" pl *ova*]. The reproductive cell of an animal or vegetable; an egg. A human ovum is a cell consisting of a large amount of protoplasm (*vitellus*) and a large spherical nucleus, the *germinal vesicle*, within which is a bright spot, the *nucleolus*, or germinal spot. It is surrounded by an inner zone, the *zona pellucida*, and an outer, the *vitelline membrane*. **o., alecithal,** one in which the food-yolk is entirely absent or present only in very small quantity. **o., apoplectic,** one the seat of a hemorrhagic extravasation. **o., blighted,** an impregnated ovum the development of which has been arrested by disease or by hemorrhage into the chorion or amniotic cavity. **o., centrolecithal,** one in which the formative yolk is arranged in a regular layer around the whole ovum, as well as in a mass at the center in which lies the germinal vesicle. **o., holoblastic,** one in which the food-yolk is scant and more or less thoroughly intermingled with the formative yolk, and in which germination is accompanied by a practically uniform segmentation. **o., meroblastic,** an ovum with a large amount of food-yolk that takes no active part in the development of the embryo. **o., permanent,** a fully developed ovum ready for fertilization. **o., telolecithal,** one in which the food-yolk and the formative yolk divide the egg into two hemispheres, or in which the quantity of the nutritive yolk is greatly in excess.

oxacid (*oks'-as-id*). See *oxyacid*.

oxalate (*oks'-al-āt*) [*oxalis*]. A salt of oxalic acid.

oxalemia, oxalæmia (*oks-al-e'-me-ah*) [ὀξαλίς, sorrel; *αἷμα*, blood]. Excess of the oxalates, or of oxalic acid, in the blood

oxalethylin (*oks-al-eth'-il-in*), $C_6H_{10}N_2$. An oily liquid boiling at 213° C. It is soluble in water, in chloroform, and in alcohol, is poisonous, and stimulant to the cardiac centers.

oxalic acid (*oks-al'-ik*). See *acid, oxalic*.

oxalism (*oks'-al-izm*). Poisoning by oxalic acid or potassium binoxalate. It is characterized by gastroenteritis with nephritis, collapse, cyanosis, mydriasis, labored breathing and dyspnea.

oxalium (*oks-a'-le-um*). Potassium binoxalate.

oxaluria (*oks-al-ū'-re-ah*) [*oxalis; οὖρον*, urine]. The presence of an excessive amount of calcium oxalate in the urine.

oxalylurea (*oks-a-lil-ū-re'-ah*) [*oxalic; urea*]. Parabanic acid, a substance produced by oxidizing uric acid or alloxan with nitric acid.

oxaphor (*oks'-a-for*). A 50% alcoholic solution of oxycamphor; used in dyspnea. Dose 15 min. (1 Cc.) 2 or 3 times daily.

oxatyl (*oks'-at-il*). See *carboxyl*.

oxhydryl (*oks-hi'-dril*). Same as *hydroxyl*.

oxidant (*oks'-id-ant*) [*oxide*]. An oxidizing agent.

oxidase (*oks'-id-ās*). 1. The inherent substance of the living cell-nucleus that possesses the power of setting free active oxygen. Columnar epithelium and glandular tissue are rich in oxidase. 2. A group of ferments whose action is marked by oxidation processes.

oxidase reaction (*oks'-id-ās*). Leucocytes of myeloid origin cause the formation of indol blue when brought in contact with alpha-naphthol and dimethylparaphenyl-diamine; the leucocytes of lymphoid origin do not thus react.

oxidasis (*oks-id-a'-sis*). Oxidation of an organic body by an oxidase.

oxidation (*oks-id-a'-shun*) [*oxide*]. 1. The act or process of combining with oxygen. 2. The introducing or increasing the proportion of the negative element in a compound.

oxide, oxid (*oks'-id*, or *oks'-id*) [*ὀξύς*, sharp]. A binary compound of oxygen and another element or radical. **o., acid,** an oxide which produces an acid when combined with water; an anhydride. **o., basic,** an oxide which produces a base when combined with water. **o., indifferent, o., neutral,** an oxide which is neither acid nor basic. **o., saline,** (1) same as *o., indifferent* or *neutral;* (2) an oxide which is formed by the union of an acid and a basic oxide.

oxidize (*oks'-id-īz*). To combine or to cause to combine with oxygen.

oximes (*oks'-īmz*). A series of chemical compounds for the most part the product of the action of hydroxylamine upon aldehydes and ketones.

oxinhalator (*oks-in'-hal-a-tor*). A portable apparatus for the ready production of oxygen gas, for the purpose of being inhaled by the patient.

oxols (*oks'-olz*). A collective name for antiseptic fluid mixtures of a 3% solution of hydrogen dioxide, 32 to 38% alcohol, and 1% naphthol, menthol, or other substance. Cf. *camphoroxol; menthoxol; naphthoxol.*

oxolyin (*oks-ol'-e-in*) [*ὀξύς*, sharp; *λύειν*, to dissolve]. According to Le Conte, that one of two substances contained in globulin, casein, albumin, and fibrin which dissolves in glacial acetic acid. Cf. *anaxoluin.*

oxone (*oks'-ōn*). Trade name of a preparation of sodium dioxide in a solid form, used for the manufacture of oxygen.

oxy- (*oks-e-*) [*ὀξύς*, sour; sharp]. 1. A prefix denoting sharp or acid. 2. A prefix denoting combined with oxygen.

oxyacanthine (*oks-e-ak-an'-thēn*) [*oxy-; ἄκανθα*, spine], $C_{28}H_{34}NO_{11}$ (?). An alkaloid of barberry, occurring in small quantities.

oxyacid (*oks'-e-as-id*). Any acid containing oxygen.

oxyacusis (*oks-e-ak-ū'-sis*). Syn. of *hyperacusis.*

oxyæsthesia (*oks-e-es-the'-ze-ah*). See *oxyesthesia.*

oxyakoia, oxyacoa (*oks-e-a-koi'-ah, oks-e-a-ko'-ah*) [*oxy-; ἀκοή*, hearing]. Increased acuteness of hearing, or sensitiveness to noises.

oxyaphia (*oks-e-a'-fe-ah*) [*ὀξύς*, acute; *ἁφή*, touch]. Abnormal acuteness of the sense of touch.

oxyarteritis (*oks-e-ar-ter-i'-tis*) [*oxy-; arteritis*]. An acute arteritis.

oxyarthritis (*oks-e-ar-thri'-tis*) [*oxy-; arthritis*]. An acute arthritis.

oxyblepsia (*oks-e-blep'-se-ah*) [*oxy-; βλέπειν*, to see]. Acuteness of vision.

oxybolia (*oks-e-bo'-le-ah*) [*ὀξύς*, quick; *βολή*, a throw]. Premature ejaculation of semen.

oxybromide (*oks-e-bro'-mīd*). A compound of an element or radical with oxygen and bromine.

oxybutyria (*oks-e-bū-tir'-e-ah*). 1. The presence of oxybutyric acid in the blood. 2. The excretion of oxybutyric acid in the urine.

oxybutyric acid (*oks-e-bū-tir'-ik*) [*oxy-; butyrum*, butter], $C_4H_8O_3$. A fatty acid found in the urine in certain fevers and in diabetes. Its presence in the body in diabetes, simultaneously with that of diacetic acid, is supposed to be the cause of diabetic coma.

oxycamphor (*oks-e-kam'-for*), $C_{10}H_{18}O(OH)$. An oxidation-product of camphor. It is used in dyspnea. Dose 8–16 gr. (0.5–1.0 Gm.) 2 or 3 times daily.

oxycephalia (*oks-is-ef-a'-le-ah*) [*oxy-; κεφαλή*, head]. The character of a skull that is high and pointed, hypsicephaly.

oxycephalus (*oks-is-ef'-al-us*). See *oxycephalia.*

oxycephaly (*oks-is-ef'-al-e*). See *oxycephalia.*

oxychinaseptol (*oks-e-kin-ah-sep'-tol*). See *diaphtherin.*

oxychinoline (*oks-e-kin'-o-lēn*). See *oxyquinoline.*

oxychloride (*oks-e-klo'-rīd*) [*oxy-; χλωρός*, green]. A compound of a basic element or radical with both oxygen and chlorine.

oxychromatin (*oks-e-kro'-mat-in*). That part of the chromatin having an affinity for acid dyes.

oxycinesis (*oks-is-in-e'-sis*). Same as *acrocinesis.*

oxydase (*oks'-id-ās*). See *oxidase.*

oxydases (*oks'-e-dā-sēs*). See *ferment, oxidation,* and *oxidase.*

oxydendron (*oks-e-den'-dron*) [*oxy-; δένδρον*, tree]. The leaves of the sorrel tree, *Oxydendrum arboreum;* used in ascites and disturbed portal circulation.

oxydol (*oks'-ed-ol*). A solution of hydrogen dioxide.

oxydum (*oks'-id-um*). *See oxide.*

oxyecoia (*oks-e-e-koi'-ah*). Synonym of *oxyakoia.*

oxyencephalitis (*oks-e-en-sef-al-i'-tis*) [*oxy-; ἐγκέφαλος*, brain; *ιτις*, inflammation]. Acute encephalitis.

oxyendocarditis (*oks-e-en-do-kar-di'-tis*) [*oxy-; endocarditis*]. Acute endocarditis.

oxyesthesia (*oks-e-es-the'-ze-ah*) [*oxy-; αἴσθησις*, sensation]. A condition of increased acuity of sensibility.

oxygen (*oks'-ij-en*) [*ὀξύς*, acid; *γεννᾶν*, to produce]. A colorless, tasteless, odorless gas, one of the nonmetallic elements, having an atomic weight of 16.00; quantivalence II; symbol O, and constituting one-fifth of the atmosphere, eight-ninths of water, three-fourths of organized bodies, and about one-half the crust of the globe; it supports combustion, and is essential to the respiration of animals and plants. It

combines with most elements, its combination with the nonmetallic substances giving rise to acids (*oxyacids*). It has been employed by inhalation in the treatment of pneumonia, pulmonary tuberculosis, grave anemias, asphyxia, and poisoning by opium. **o.-carrier,** a katalytic substance capable of absorbing molecules of oxygen and then of splitting these to give off atomic oxygen; the nucleoproteids are the oxygen-carriers of living matter. **o. debt,** (at end of exercise), the amount of oxygen required to restore the body to its previous resting condition. **o. powder,** sodium peroxide containing 20 % of active oxygen.

oxygenated (*oks'-e-jen-a-ted*) [*oxygen*]. Containing or impregnated with oxygen.

oxygenation (*oks-ij-en-a'-shun*) [*oxy-; γεννᾶν*, to produce]. The saturation of a substance with oxygen, either by chemical combination or by mixture.

oxygenium (*oks-e-je'-ne-um*). Oxygen.

oxygeusia (*oks-ig-ū'-se-ah*) [*oxy-; γεῦσις*, taste]. Marked acuteness of the sense of taste.

oxyhaloid (*oks-e-hal'-oid*) [*oxy-; haloid*]. A compound of an element or radical with oxygen and a halogen.

oxyhematoporphyrin, oxyhæmatoporphyrin (*oks-e-hem-at-o-por'-fir-in*). A substance found in urine and closely allied to urohematoporphyrin, but producing red instead of orange color

oxyhemoglobin, oxyhæmoglobin (*oks-e-hem-o-glo'-bin*) [*oxygen; hemoglobin*]. Oxidized hemoglobin; that found in arterial blood.

oxyhydrogen (*oks-e-hi'-dro-jen*) [*oxy-; hydrogen*]. A mixture, in gaseous form of oxygen and hydrogen **o. blowpipe,** a blowpipe in which an intense heat is obtained by the combustion of a mixture of oxygen and hydrogen.

oxyiodide (*oks-e-i'-o-dīd*) [*oxy-; iodine*]. A salt formed by the combination of an element with both oxygen and iodine.

oxylalia (*oks-e-lal'-e-ah*) [*oxy-; λάλια*, speech]. Rapid speech.

oxyleukotin (*oks-il-ū'-ko-tin*) [*oxy-; λευκός*, white], $C_{34}H_{32}O_{12}$. A substance found in *paracotobark*.

oxylith (*oks'-e-lith*). Cubes of sodium peroxide, used for generating oxygen.

oxymel (*oks'-im-el*) [*oxy-; μέλι*, honey]. 1. A mixture of honey and vinegar or dilute acetic acid. 2. Any preparation containing honey and vinegar (or acetic acid) as a vehicle, as *oxymel* of squill.

oxymethylene (*oks-e-meth'-il-ēn*). Formaldehyde.

oxynarcotine (*oks-e-nar'-ko-tēn*). An alkaloid derived from narceine.

oxyneurine (*oks-in-ū'-rēn*). See *betaine*.

oxyntic (*oks-in'-tik*) [*ὀξύς*, acid]. Secreting acid. **o. cells,** cells of the fundus glands of stomach, supposed to secrete hydrochloric acid. **o. gland,** any acid-secreting gland.

oxyntin (*oks-in'-tin*). Trade name of a preparation said to contain 5% of hydrochloric acid in combination with albumin.

oxyopia (*oks-e-o'-pe-ah*) [*oxy-; ὤψ*, eye]. Increased acuity of vision.

oxyopter (*oks-e-op'-ter*) [*oxyopia*]. The unit of acuity of vision; it is the reciprocal of the visual angle (in degrees).

oxyosis (*oks'-e-o-sis*). Acidosis.

oxyosphrasia (*oks-e-os-fra'-ze-ah*). Same as *oxyosphresia*.

oxyosphresia (*oks-e-os-fre'-ze-ah*) [*oxy-; ὀσφρησις*, smell]. Marked or abnormal acuteness of smell.

oxypathy (*oks-ip'-ath-e*) [*oxy-; πάθος*, suffering]. 1. A constitutional condition due to faulty elimination of unoxidized acids which unite with fixed alkalies of the body. Cf. *arthritism, lithemia*. 2. An acute disease.

oxyphenylethylamine (*oks-e-fen-il-eth-il'-am-in*). A product of pancreatic digestion.

oxyphenylsulphonic acid test for albumin. Make a solution of 3 parts of oxyphenylsulphonic acid, 1 part salicylsulphonic acid, water 20 parts. To 1 drop of this add 1 Cc. of urine, and in the presence of albumin a white, transparent precipitate will be formed.

oxyphil, oxyphile (*oks'-if-il*) [*oxy-; φίλος*, loving]. Histological elements that attract acid dyes.

oxyphonia (*oks-if-o'-ne-ah*) [*oxy-; φωνή*, voice]. Shrillness of voice.

oxyphor (*oks'-e-fōr*). Oxaphor.

oxypodia (*oks-e-po'-de-ah*). See *talipes equinus*.

oxypropylenediisoamylamine (*oks-e-pro-pil-ēn-dis-is-o-am-il'-am-in*). A synthetic clear fluid alkaloid, soluble in alcohol, ether, or oils, insoluble in water, with action similar to atropine.

oxypurin (*oks-e-pū'-rin*). Any compound derived from purin by the addition of one or more atoms of oxygen.

oxyqua (*oks'-e-kwah*) [*oxygen; aqua*, water]. An oxygenated water, used to combat nausea and vomiting; also used in acidosis, pneumonia, etc.

oxyquinaseptol (*oks-e-kwin-ah-sep'-tol*). Same as *diaphtherin*.

oxyquinoline (*oks-e-kwin'o-lēn*), C_9H_7NO. A compound prepared by digesting quinolin with a bleaching lime-solution. Syn., *carbostyril*.

oxyrygmia (*oks-ir-eg'-me-ah*) [*oxy-, ἐρυγμός*, eructation]. Acid eructation.

oxyrhine (*oks'-ir-in*) [*oxy-; ῥίς*, nose]. Possessing a sharp-pointed nose, or snout; having an acute olfactory sense.

oxysalt (*oks'-e-sawlt*) [*oxy-; salt*]. A salt of an oxyacid.

oxysepsin (*oks-e-sep'-sin*). An oxidized toxin prepared from cultures of *Bacillus tuberculosis*.

oxysparteine (*oks-e-spar'-te-in*) [*oxy-; spartein*]. A derivative of sparteine; it is a cardiac stimulant. **o. hydrochloride,** $C_{15}H_{24}N_2O.2HCl$, is used hypodermatically in heart disease. Dose ¾ – 1½ gr. (0 05–0.1 Gm.).

oxyspore (*oks'-e-spōr*). See *exotospore*.

oxytocia (*oks-e-to'-she-ah*) [*oxy-; τόκος*, labor]. Rapid childbirth.

oxytocic (*oks-e-to'-sik*) [*oxy-; τόκος*, labor]. 1. Hastening parturition. 2. A drug that hastens parturition.

oxytocin (*oks-e-to'-sin*). Trade name of a preparation of pituitary gland, which causes violent contraction of the muscular tissue of the uterus.

oxytoxin (*oks-e-toks'-in*). An oxidized toxin.

oxytropism (*oks-il'-ro-pizm*) [*oxygen; τρόπη*, a turning]. The tendency of certain organisms to be attracted by oxygen.

oxytuberculin (*oks-e-tū-ber'-kū-lin*). An oxidized tuberculin. Dose 5 dr. '20 Cc.) daily.

oxyuriasis (*oks-e-ū-ri'-as-is*). Infestation with Oxyuris.

oxyuricide (*oks-e-ū'-ris-id*) [*oxyuris; cædere*, to kill]. Any anthelmintic that is destructive to worms of the genus *Oxyuris*, or pinworms.

oxyurid (*oks-e-ū'-rid*). A pinworm; see *Oxyuris vermicularis*.

Oxyuris (*oks-e-ū'-ris*) [*oxy-; οὐρά*, tail]. A genus of nematode worms—the pinworms. **O. vermicularis,** the common seatworm or pinworm infesting the rectum of children.

oxyvaseline (*oks-e-vas'-el-ēn*). Vasogen.

oxyzymol (*oks-e-zi'-mol*). See *carvacrol*.

oz. Abbreviation for *ounce*.

ozalin (*o'-za-lin*). A proprietary disinfectant consisting of a mixture of sulphates of calcium, magnesium, and iron with caustic soda and magnesia.

ozena, ozœna (*o-ze'-nah*) [ὄζειν, to smell]. Chronic disease of the nose accompanied by a fetid discharge, and depending on atrophic rhinitis, syphilitic ulceration, or caries.

ozocerite, ozokerite (*o-zo-se'-rīt, o-zo-ke'-rīt*) [ὄζειν, to smell; κηρός, wax]. A solid paraffin found free in Galicia and Rumania, and used in diseases of the skin.

ozochrotia (*o-zo-kro'-she-ah*) [ὄζειν, to smell; χρώς, skin]. An offensive odor of the skin.

ozochrotous (*o-zok'-ro-tus*) [ὀζη, stench; χρώς, skin]. Having a bad-smelling skin.

ozogen (*o'-zo-jen*) [*ozone*; γεννάν, to produce]. Trade name of a preparation of hydrogen dioxide, used in the manufacture of ozone.

ozomulsion (*oz-o-mul'-shun*). Trade name of a preparation of ozonized cod-liver oil and guaiacol; recommended in tuberculosis and other wasting diseases.

ozonator (*o'-zo-na-tor*). An apparatus for generating onone.

ozone (*o'-zone*) [ὄζειν, to smell]. An allotropic form of oxygen, the molecule of which consists of three atoms. It occurs free in the atmosphere, and is a powerful oxidizing agent. In medicine it is employed as a disinfectant.

ozonization (*o-zo-niz-a'-shun*) [*ozone*]. The act of ozonizing, or of impregnating with ozone.

ozonized (*o'-zo-nīzd*) [*ozone*]. Containing ozone.

ozonoform (*o-zo'no-form*). A proprietary disinfectant said to consist of ozone and a distillate of the fir tree.

ozonometer (*o-zo-nom'-et-er*) [*ozone*; μέτρον, measure]. A device for use in estimating the proportion of ozone in the atmosphere.

ozonometry (*o-zo-nom'-et-re*) [*ozone*; μέτρον, measure]. The estimation of the amount of ozone in the atmosphere.

ozonophore (*o-zo'-no-fōr*) [*ozone*; φέρειν, to bear]. 1. A granule of cell-protoplasm. 2. A red blood-corpuscle.

ozonoscope (*o-zo'-no-skōp*) [*ozone*; σκοοπεῖν, to view]. A test-paper saturated with starch and iodine used in determining the amount of ozone in the air.

ozostomia (*o-zo-sto'-me-ah*) [ὄζειν, to smell; στόμα, mouth]. A foul odor from the mouth or on the breath.

P

P. 1. The chemical symbol for *phosphorus*. 2. An abbreviation for *pharmacopœia*, *position*, *pugillus*, and *punctum proximum*.

p. A abbr. for *para*, for *pupil*, and optic *papilla*.

pabular (*pab'-ū-lar*) [*pabulum*, food]. Of, pertaining to, or of the nature of, pabulum.

pabulin (*pab'-ū-lin*) [*pabulum*, food]. An albuminous and fatty substance present in the blood immediately after the process of digestion.

pabulum (*pab'-ū-lum*) [L.]. Food; any nutrient.

Pacchionian bodies, P. glands (*pak-e-o'-ne-an*) [Antonio *Pacchioni*, Italian anatomist, 1665–1726]. Hypertrophied villi of the arachnoid, occupying the convex surface of the meninges, chiefly along the superior longitudinal sinus and over the convexity of the cerebrum. **P. depressions,** the depressions produced by the Pacchionian bodies on the inner surface of the skull. **P. foramen,** the opening in the tentorium for the passage of the encephalic isthmus.

pace maker. That portion of the auricles of the heart near the openings of the great veins where the stimulus for the heart beat originates.

pachemia, pachæmia (*pak-e'-me-ah*). *Pachyemia*, *q. v.*

pachismus (*pak-iz'-mus*) [*pachy-*]. Thickening; induration.

pachometer (*pak-om'-et-ur*). See pachymeter.

Pachon's method (*pash-ong'*) [Michel Victor *Pachon*, French physician, 1867–]. A method of cardiography with the patient lying on his left side.

pachulosis (*pak-ū-lo'-sis*). See *pachylosis*.

pachy- (*pak-e-*) [παχύς, thick]. A prefix meaning thick.

pachyacria (*pak-e-ak'-re-ah*) [*pachy-*; ἄκρος, extremity]. Synonym of *akromegaly*.

pachyæmia (*pak-e-e'-me-ah*). See *pachyemia*.

pachyblepharon (*pak-e-blef'-a-ron*) [*pachy-*; βλέφαρον, the eyelid]. Thickening of the eyelids.

pachyblepharosis (*pak-e-blef-ar-o'-sis*) [*pachy-*; βλέφαρον, eyelid]. Chronic thickening and induration of the eyelids.

pachycephalia (*pak-e-sef-a'-le-ah*). See *pachycephaly*.

pachycephalic (*pak-e-sef-al'-ik*) [*pachy-*; κεφαλή, head]. Having unusual thickness of the skull.

pachycephalous (*pak-e-sef'-al-us*) [*pachy-*; κεφαλή, head]. One having a thick skull from union of the parietal and occipital bones.

pachycephaly (*pak-e-sef'-al-e*) [*pachy-*; κεφαλή, head]. Abnormal thickness of the skull.

pachychilia (*pak-e-ki'-le-ah*) [*pachy-*; χεῖλος, lip]. Increased thickness of one or both lips.

pachycholia (*pak-e-ko'-le-ah*) [*pachy-*; χολή, bile]. An inspissated condition of the bile.

pachychromatic (*pak-e-kro-mat'-ik*) [*pachy-*; *chromatin*]. Having a coarse chromatin network.

pachychymia (*pak-e-ki'-me-ah*) [*pachy-*; χυμός, juice]. Greater concentration of the body fluids.

pachydactyl (*pak-e-dak'-til*) [*pachy-*; δάκτυλος, finger]. A thick digit.

pachydactylia (*pa-ke-dak-til'-e-ah*) [*pachy-*; δάκτυλος, a finger]. A condition characterized by great thickness of the fingers.

pachydactylous (*pak-e-dak'-til-us*) [*pachy-*; δάκτυλος, finger]. Having thick fingers.

pachyderm (*pak'-e-derm*) [*pachy-*; δέρμα, skin]. Thick-skinned.

pachyderma, pachydermia (*pak-e-der'-mah*, *pak-e-der'-me-ah*) [*pachy-*; δέρμα, skin]. 1. Thickening of the skin. 2. Elephantiasis. **p. laryngis,** extensive thickening of the mucous membrane of the larynx.

pachydermatocele (*pak-e-der-mat'-o-sēl*) [*pachy-*; *dermatocele*]. A tumor due to the thickening of the skin.

pachydermatosis (*pak-e-der-mat-o'-sis*) [*pachy-*; *dermatosis*]. Hypertrophic rosacea.

pachydermatous (*pak-e-der'-mat-us*) [*pachyderma*]. Thick-skinned.

pachyemia, pachyæmia (*pak-e-e'-me-ah*) [*pachy-*; αἷμα, blood]. Morbid thickening of the blood.

pachyemic, pachyemous. Having thick blood.

pachygastrous (*pak-e-gas'-trus*) [*pachy-*; γαστήρ, the belly]. Having a large abdomen.

pachyglossal, pachyglossate (*pak-e-glos'-al*, *pak-e-glos'-āt*) [*pachy-*; γλῶσσα, tongue]. Having a thick tongue.

pachyglossia (*pak-e-glos'-e-ah*) [*pachy-*; γλῶσσα, tongue]. Thickness of the tongue.

pachygnathous (*pak-ig'-na-thus*) [*pachy-*; γνάθος, jaw]. Having thick or heavy jaws.

pachyhymenia (*pak-e-hi-me'-ne-ah*). See *pachymenia*.

pachyleptomeningitis (*pak-e-lep-to-men-in-ji'-tis*) [*pachy-*; *leptomeningitis*]. Combined inflammation of the pia and dura.

pachylosis (*pak-e-lo'-sis*) [παχύς, thick]. A thick, dry, harsh, and scaly skin, especially of the legs.

pachymenia (*pak-e-me'-ne-ah*) [*pachy-*; ὑμήν, a membrane]. Thickening of skin or membrane.

pachymenic (*pak-e-men'-ik*) [*pachy-*; ὑμήν, membrane]. Affected with pachymenia.

pachymeningitic (*pak-e-men-in-jit'-ik*). Affected with, or pertaining to, pachymeningitis.

pachymeningitis (*pak-e-men-in-ji'-tis*) [*pachy-*; *meningitis*]. Inflammation of the dura of the brain (*cerebral pachymeningitis*) or the spinal cord (*spinal pachymeningitis*). **p. cervicalis hypertrophica,** a form of primary inflammation of the spinal dura producing pain and partial paralysis of one arm. **p., external,** that affecting the external layer of the dura. **p., hemorrhagic, p. hemorrhagica interna,** an effusion of blood on the inner surface of the dura. **p., internal,** that involving the internal layer of the dura. **p., syphilitic,** that due to syphilis.

pachymeninx (*pak-e-me'-ninks*) [*pachy-*; μῆνιγξ, membrane]. The dura.

pachymeter (*pak-im'-et-er*) [*pachy-*; μέτρον, measure]. An instrument for measuring thinnesses.

pachynsis (*pak-in'-sis*) [πάχυνσις, thickening]. A thickening, as of a membrane.

pachyntic (*pak-in'-tik*) [παχυντικός, making thick]. Pertaining to an abnormal thickening or hardening of a part; increasing the thickness.

pachyonychia (*pak-e-o-nik'-e-ah*) [*pachy-*; ὄνυξ, nail]. Thickening of the nails.

pachyote (*pak'-e-ōt*) [*pachy-; οὖς*, ear]. Having thick ears.

pachyotia (*pak-e-o'-te-ah*) [*pachy-; οὖς*, the ear]. Thick ears.

pachyotous (*pak-e-o'-tus*) [*pachy-; οὖς*, the ear]. Having thick ears.

pachypelviperitonitis (*pak-e-pel-ve-per-it-on-i'-tis*) [*pachy-; pelvis; peritonitis*]. Pelvic peritonitis with a fibrous deposit over the uterus.

pachyperitonitis (*pak-e-per-it-on-i'-tis*) [*pachy-; peritonitis*]. Thickening of the membrane of the peritoneum by inflammation.

pachypleuritis (*pak-e-plu-ri'-tis*) [*pachy-; pleura; ιτις*, inflammation]. Inflammation of the pleura, with a fibrinous deposit.

pachypodous, pachypous (*pak-ip'-o-dus, pak'-ip-us*) [*pachy-; πούς*, foot]. Having thick feet.

pachyrhinic (*pak-e-ri'-nik*) [*pachy-; ῥίς*, nose]. Have a thick or unusually broad and flat nose.

pachysalpingitis (*pak-e-sal-pin-ji'-tis*). Chronic parenchymatous salpingitis.

pachysalpingo-oothecitis (*pak-e-sal-ping-go-o-o-thes-i'-tis*). Same as *pachysalpingo-ovaritis*.

pachysalpingo-ovaritis (*pak-e-sal-ping-go-o-var-i'-tis*). Inflammation of the ovary and oviduct with thickening of the parts.

pachysomia (*pak-e-so'-me-ah*) [*pachy-; σῶμα*, body]. Abnormal growth in thickness of the soft parts of the body, as in akromegaly.

pachytes (*pak'-it-ēz*) [*pachy-*]. Thickness; pachyblepharon.

pachytic (*pak-it'-ik*) [*παχύτης*, thickness]. Fat; thick; obese; also having the power of thickening the fluids of the body.

pachytrichous (*pak-it'-rik-us*) [*pachy-; θρίξ*, the hair]. Furnished with thick hair.

pachyvaginalitis (*pak-e-vaj-in-al-i'-tis*) [*pachy-; vagina; ιτις*, inflammation]. Chronic hemorrhagic inflammation of the tunica vaginalis of the testicle, leading to hematocele.

pachyvaginitis (*pak-e-vaj-in-i'-tis*) [*pachy-; vagina; ιτις*, inflammation]. Vaginitis accompanied by thickening of the vaginal walls.

Pacini's fluid (*pah-tshe'-nē*). A conserving and diluting fluid used in counting the red blood-corpuscles: Corrosive sublimate, 1 part; sodium chloride, 2 parts; glycerol, 13 parts; distilled water, 113 parts; allow it to stand two months. For use, mix one part of this solution with three parts of water and filter.

Pacini's method (*pah-tshe'-ne*). *For resuscitating asphyxiated infants:* the child lying on its back, the operator stands at its head and grasps the axillary structures, pulling the shoulders forward and upward to compress the thorax, and allowing them to fall to expand the chest.

Pacinian bodies or **corpuscles** (*pah-tshin'-e-an*) [Filippo *Pacini*, Italian anatomist, 1812–1883]. Elliptical, semitransparent bodies, that occur along the nerves supplying the skin, especially of the hands and feet, the external genitalia, the points of the extremities, the periosteum of certain bones and many other localities in man and other mammals; the so-called *corpuscles of Vater*, or *Krause's corpuscles*.

pacinitis (*pah-tshin-i'-tis*). Inflammation of the Pacinian bodies.

pack (*pak*). A blanket, either dry or soaked in hot or cold water, and wrapped about the body. **p., cold**, a blanket wrung out of cold water and wrapped about the body. **p., hot**, a blanket wrung out of hot water and wrapped about the body. **p., wet**, a blanket wrung out of warm or cold water.

packer (*pak'-er*). Device for inserting tampons or dressings into a cavity, such as the vagina.

packing (*pak'-ing*). 1. The act of filling a wound or cavity with gauze or other material. 2. The material used for filling the cavity.

pacolol (*pak'-ol-ol*). Trade preparation somewhat like liquor cresolis saponatus of the B. P. C.; in properties and uses it is similar to lysol.

Pacquelin cautery. See *Paquelin*.

pad. 1. A small cushion stuffed with cotton, hair, etc., for supporting any part of the body. See *liver-pad*. 2. Syn. of *compress*. **p. of corpus callosum**, the splenium of the callosum. **p., dinner**, a folded towel laid over the region of the stomach in applying a plaster-of-Paris jacket, to give space for the distention of the stomach by the food. **p., sucking**, a fatty mass situated between the masseter and the buccinator muscles; well developed in infancy.

pæ-. For words so beginning, see *pe-*.

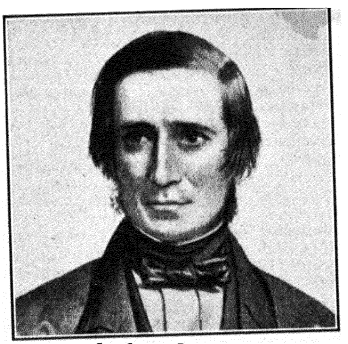
Pagano's reaction (*pah-gah'-no*). A preparation of tuberculin when applied to the urethral meatus gives a reaction something like the conjunctival reaction of Calmette.

Page's disease (*pāj*). See *Erichsen's disease*.

pageism (*pa'-jizm*) [*pagius*, a servant]. A manifestation of masochism; the person revels in the idea of being a page to a beautiful girl.

Pagenstecher's ointment (*pah'-gen-stek-er*) [Alexander *Pagenstecher*, German ophthalmologist, 1828–1879]. An ophthalmic ointment. It consists of from one to three grains of the yellow oxide of mercury to the dram of vaselin. **P.'s thread**, a flax thread coated with celluloid.

Paget's abscess (*paj'-et*) [Sir James *Paget*, English surgeon, 1814–1899]. A residual abscess. **P.'s disease.** 1. Malignant dermatitis, attacking most often the nipple and areola. 2. Osteitis deformans; hypertrophic deforming osteitis. **P.'s recurrent fibroid**, spindle-celled sarcoma of the subcutaneous tissue.



Sir James Paget

pagiorrheumatism (*paj-e-or roo'-mat-izm*) [*πάγιος*, firm; *rheumatism*]. Chronic rheumatism.

pagoplexia (*pa-go-pleks'-e-ah*) [*πάγος*, frost; *πλῆξις*, stroke]. Numbness from cold. Frost-bite; *q. v.*

paidology (*pi-dol'-o-je*). Pedology.

paidonosology (*pi-don-os-ol'-o-je*) [*παῖς*, child; *νόσος*, disease; *λόγος*, science]. The science of diseases of children; pediatrics.

pain (*pān*) [*pœna*, punishment; pain]. 1. Bodily suffering due to irritation of a sensory nerve, or possibly, in rare cases, to changes in the central nervous system. 2. One of the rhythmic

contractions of the uterus during labor. **p., after-,** that following labor, and caused by the uterus contracting to expel clots, etc. **p., bearing-down,** pain with a sensation of dragging or bearing down of the pelvic organs, occurring in labor and in various inflammatory affections of the female pelvic organs. **p., boring,** severe pain of a boring character. **p., false,** that occurring in the latter part of pregnancy and resembling labor pain, although not immediately followed by labor. **p., fulgurant, p., fulgurating,** the intense shooting pain affecting principally the limbs of patients suffering from locomotor ataxia. Syn, *lancinating pain*. **p., girdle-,** a painful sensation as of a cord tied about the waist; it is a symptom of organic disease of the spinal cord. **p., growing,** a popular term for the soreness about the joints in young persons at puberty. Some attribute it to increased vascularity of the epiphyses of long bones; others, to rheumatism. **p., intermenstrual,** pains occurring regularly between successive menstrual periods. **p.-joy,** hysterical enjoyment of suffering. **p., labor.** See *pain* (2). **p., lancinating.** See *p., fulgurant*. **p., osteocopic,** the boneache that characterizes syphilis. **p., referred,** pain situated in a part more or less remote from the cause of the pain. **p., starting,** pain caused by a spasmodic contraction of the muscles just before the onset of sleep. It occurs in joint diseases when the cartilages are ulcerated. **p., sun,** occurs chiefly in the frontal region early in the morning; it is found in cases of acute purulent inflammation of the frontal cells. **p., terebrating, p., terebrant,** boring pain

painful (*pān'-ful*). Characterized by pain. **p. heel.** See *pododynia* and *achillodynia*.

painless (*pān'-les*). Without pain. **p. tic.** See *tic*.

painter's colic. Lead colic.

pair (*pār*). Two similar organs, one right and the other left, occupying the same relative position on either side of the body; as a pair of nerves.

Pajot's hook (*pah-zho'*) [Charles *Pajot*, French obstetrician, 1816–1896]. A hook used in decapitating the fetus; see *P.'s method*. **P.'s law,** the law governing the rotating movements of the child during labor. It is expressed as follows: When a solid body is contained within another, if the receptacle is the seat of alternations of movement and repose, and its surfaces are slippery and but slightly angular, the contained body will tend increasingly to accommodate its form and dimensions to the form and capacity of the receptacle. **P.'s maneuver.** Same as *P.'s method*. **P.'s method,** a method of decapitation of the fetus in embryotomy. It consists in passing a strong cord around a groove in a hook which is passed over the child's neck, and by a sawing movement cutting through the parts. The vagina should be protected by a speculum.

pala (*pa'-lah*) [L., a "spade"]. 1. A thin lamella connecting the fimbria and the tenia of the brain. It has a shape like the blade of a turf-cutter. 2. [Native Hawaiian.] The Hawaiian word for syphilis.

Paladino's phonophore (*pal-ah-de'-nōs fo'-no-fōr*). An instrument to facilitate hearing, consisting in a rod which connects the larynx of the speaker with the teeth of the listener.

palæo- (*pa'-le-o-*) [παλαιός, old]. A prefix denoting old, early, long ago, etc. For words thus beginning see *paleo-*.

palatal (*pal'-at-al*) [*palate*]. Pertaining to the palate.

palate (*pal'-āt*) [*palatum*, palate]. The roof of the mouth. It is composed of the *hard palate*, formed by the palatal processes of the superior maxillary bones and the palatal bones, and the *soft palate*, or velum palati, consisting of an aggregation of muscles—the tensor palati, azygos uvulæ, palatoglossus, and palatopharyngeus. **p., artificial,** a plate of hard material used as an obturator to close a fissure in the palate. **p. bone,** an L-shaped bone back of the nasal fossæ; it helps to form the floor and outer wall of the nose, roof of the mouth, and floor of the orbit; also sphenomaxillary and pterygoid fossæ and the sphenomaxillary fissure. **p., cleft,** a congenital deformity characterized by incomplete closure of the lateral halves of the palate. The soft palate and the uvula, the hard palate, or all together may be involved. **p., hard.** See *palate*. **p.-hook,** an instrument used in rhinoscopy. **p.-myograph,** an instrument for taking a tracing of the movements of the soft palate. **p. plates,** the horizontal portions of the superior maxillæ that unite to form the hard palate. **p., soft.** See *palate*.

palatic (*pal-at'-ik*) [*palatum*, the palate]. Palatal; palatine.

palatiform (*pal-at'-if-orm*) [*palatum*, palate; *forma*, form]. Resembling the palate.

palatine (*pal'-a-tīn*) [*palate*]. 1. Pertaining to the palate, as the *palatine* arteries. 2. Conveying the palatine vessels or nerves. **p. arches,** the arches posterior and anterior, upon each side of the beginning of the pharynx. **p. bone,** the palate bone. **p. canals,** several canals in the palatal portion of the superior maxilla. **p. fossa,** a small fossa immediately behind the upper incisor teeth. **p. glands.** See *gland*.

palatinoid (*pal-at'-in-oid*). Trade name of a gelatin capsule used for the administration of unpalatable drugs.

palatitis (*pal-at-i'-tis*) [*palatum*, palate; ῖτις, inflammation]. Inflammation of the palate.

palato- (*pal-a-to-*) [*palate*]. A prefix denoting relation to the palate.

palatoglossal (*pal-a-to-glos'-al*) [*palato-*; γλῶσσα, tongue]. Pertaining to the palate and the tongue.

palatoglossus (*pal-a-to-glos'-us*). See under *muscle*.

palatognathous (*pal-at-og'-na-thus*) [*palato-*; γνάθος, jaw]. Affected with palatognathus.

palatognathus (*pal-at-og'-na-thus*) [*palato-*; γνάθος, jaw]. Cleft palate.

palatograph (*pal-at'-o-graf*). Palatomyograph.

palatolabial (*pal-at-o-la'-be-al*) [*palato-*; *labium*, lip]. Pertaining to the palate and the lips.

palatomaxillary (*pal-at-o-maks'-il-a-re*) [*palato-*; *maxilla*, jaw]. Pertaining to the palate and the maxilla.

palatomyograph (*pal-at-o-mi'-o-graf*). See *palate-myograph*.

palatonasal (*pal-a-to-na'-sal*) [*palato-*; *nasal*]. Pertaining to the palate and the nose.

palatopharyngeal (*pal-a-to-far-in'-je-al*) [*palato-*; *pharynx*]. Pertaining conjointly to the palate and the pharynx.

palatopharyngeus (*pal-a-to-far-in'-je-us*). See under *muscle*.

palatoplasty (*pal'-at-o-plas-te*) [*palato-*; πλάσσειν, to form]. Plastic surgery of the palate.

palatoplegia (*pal-at-o-ple'-je-ah*) [*palato-*; πληγή, a stroke]. Paralysis of the soft palate.

palatopterygoid (*pal-at-o-ter'-ig-oid*) [*palato-; pterygoid*]. Pertaining to the palate bone and the pterygoid processes of the sphenoid bone; pterygopalatine.

palatorrhaphy (*pal-a-tor'-a-fe*). See *staphylorrhaphy*.

palatosalpingeus (*pal-a-to-sal-pin'-je-us*). The tensor palati muscle.

palatoschisis (*pal-a-tos'-kis-is*) [*palato-; σχίσις*, cleft]. Cleft palate.

palatostaphylinus (*pal-a-to-staf-il-i'-nus*). See *azygos uvulæ* under *muscle*.

palatouvularis (*pal-a-to-ū-vū-la'-ris*). See *azygos uvulæ* under *muscle*.

palatum (*pal'-a-tum*) [L.]. The palate. **p. durum**, hard palate. **p. fissum**, cleft palate. **p. mobile**, **p. molle**, **p. pendulum**, the soft palate.

paleontology (*pa-le-on-tol'-o-je*) [*παλαιός*, ancient; *ὤν*, being; *λόγος*, science]. The science of the early life-forms of the earth.

paleopathology (*pa-le-o-path-ol'-o-je*) [*παλαιός*, old; *pathology*]. "The science of the diseases which can be demonstrated in human and animal remains of ancient times" (Ruffer).

palikinesia, palikinesis (*pal-e-kin-e'-se-ah, pal-e-kin-e'-sis*) [*πάλιν*, again; *κίνησις*, movement]. Constant and involuntary repetition of movements.

palilallia (*pal-e-lal'-e-ah*) [*πάλιν*, again; *λάλια*, speech]. Needless repetition of words or phases.

palimbolous (*pal-im'-bo-lus*)[*πάλιν*, back; *βάλλειν*, to cast]. Changing often; applied to diseases with very inconstant symptoms.

palimptosis (*pal-imp-to'-sis*) [*πάλιν*, back; *πτῶσις*, a fall]. The falling back; properly, a falling back to a former position, whether after a proptosis, or abnormal forward displacement, or after the rectification of backward displacement.

palinal (*pal'-in-al*) [*πάλιν*, backward]. Moving or moved backward.

palindromia (*pal-in-dro'-me-ah*) [*πάλιν*, again; *δρόμος*, a course]. Recurrence or growing worse of a disease; a relapse.

palinesthesia (*pal-in-es-the'-ze-ah*) [*πάλιν*, again; *αἴσθησις*, sensation]. Restoring sensation in the anesthetized by injecting weak hydrochloric acid into the blood.

palingenesis (*pal-in-jen'-es-is*) [*πάλιν*, back; *γένεσις*, production]. The form of development of an individual germ in which the development of its ancestors is succinctly repeated.

palinodia (*pal-in-o'-de-ah*) [*πάλιν*, back; *ὁδός*, a way]. A recurrence or relapse of a disease.

paliphrasia (*pal-e-fra'-ze-ah*) [*πάλιν*, again; *φράσις*, speech]. Needless repetition of words or phases.

palirrhea, palirrhœa (*pal-ir-e'-ah*) [*πάλιν*, again; *ῥοία*, flow]. 1. The return of a mucous discharge. 2. Regurgitation.

palisade-cell (*pal-is-ād'*). A constituent cell of palisade-tissue. **p.-parenchyma. p.-tissue**, applied to certain cells which are elongated at right angles to the surface, occurring especially on the upper side of leaves.

palladium (*pal-a'-de-um*) [*παλλάδιον*, a statue of Pallas]. A rare metal sometimes used in making instruments of precision. **p. chloride**, a drug used in the treatment of tuberculosis. Dose 10 drops of a 3% solution.

pallamine (*pal'-am-ēn*). Colloidal palladium.

pallanesthesia (*pal-an-es-the'-ze-ah*) [*πάλλειν*, to quiver; *anesthesia*]. Absence of pallesthesia.

pallesthesia (*pal-es-the'-ze-ah*) [*πάλλειν*, to quiver; *αἴσθησις*, sensation]. Sensation similar to that felt when a vibrating tuning fork is touched.

palliation (*pal-e-a'-shun*) [*palliare*, to cloak]. The act of soothing or moderating, without really curing.

palliative (*pal'-e-a-tiv*) [*palliare*, to cloak]. 1. Relieving or alleviating suffering. 2. A drug relieving or soothing the symptoms of a disease without curing it.

pallidal (*pal'-id-al*). Pertaining to the pallidum.

pallidum (*pal'-id-um*) [*pallidus*, pale]. The globus pallidus of the lenticular nucleus of the brain.

pallium (*pal'-e-um*) [L., "a cloak"]. Of the brain, the fissured portion of each cerebral hemisphere, exclusive of the caudatum and the rhinencephalon.

pallor (*pal'-or*) [L.]. Paleness, especially of the skin and mucous membranes. **p. chloroticus**, the peculiar paleness of chlorotic persons. **p. eximius**, abnormal paleness, usually due to anemia. **p. luteus**, chlorosis. **p. pathematicus**, the pallor due to terror or fright. **p. virginum.** Synonym of *chlorosis*.

palm (*pahm*) [*palma*, palm]. 1. The inner or flexor surface of the hand; the hollow of the hand. 2. A palm-tree. **p.-oil** (*oleum palmæ*), a fixed oil obtained from the fruit of *Elæis guineensis*. It is employed in making soap.

palma (*pal'-mah*) [L.]. 1. The palm of the hand. 2. Palm tree. **palmæ plicatæ**, the arborescent rugæ of the anterior of the vagina.

palmar (*pal'-mar*). Pertaining to the palm of the hand. **p. abscess**, an abscess in the palm of the hand, usually situated beneath the palmar fascia. **p. arch**, one of the two curved arches, *superficial* and *deep*, formed by the anastomosis of the radial and ulnar arteries in the hand. **p. fascia**, the sheath investing the muscles of the hand.

palmaris (*pal-ma'-ris*). See under *muscle*.

palmature (*pal'-mat-ūr*) [*palm*]. Union of the fingers, congenital or from burns, wounds, or other trauma.

Palmella (*pal-mel'-ah*). A genus of fresh-water algæ.

palmellin (*pal-mel'-in*). A red coloring-principle of a fresh-water alga, the *Palmella cruenta*, resembling hemoglobin.

palmetto (*pal-met'-o*). See *saw palmetto*.

palmiacol (*pal-mi'-ak-ol*), $C_{23}H_{40}O_2$. A proprietary remedy for tuberculosis, asthma, etc., said to be a derivative of guaiacol. Dose 3 min. (0.18 Cc.) 3 or 4 times daily.

palmic (*pal'-mik*) [*palm*]. 1. Referring to the palm; palmitic. 2. [*παλμός*, throb.] Pertaining to the pulse or palpitation. 3. Relating to palmus or jumpers' disease.

palmin (*pal'-min*). Palmitin.

palmiped (*pal'-mip-ed*) [*palma*, palm; *pes*, foot]. Having webbed feet.

palmitate (*pal'-mit-āt*) [*palm*]. A salt of palmitic acid.

palmitic (*pal-mit'-ik*). 1. Relating to or derived from palm-oil. 2. Relating to palmitin. **p. acid.** See *acid, palmitic*.

palmitin (*pal'-mit-in*) [*palm*], $C_3H_5(C_{16}H_{31}O_2)_3$. Glyceryl tripalmitate, a solid, crystallizable substance which, with stearin, constitutes the greater proportion of solid fats.

palmitone (*pal'-mit-ōn*). A ketone of palmitic acid resulting when it is distilled with slaked lime.

palmityl (*pal'-mit-il*) [*palm*, the palm tree; *ὕλη*, the stuff of which a thing is made]. The radical, $C_{16}H_{31}O_2$, of palmitic acid.

palmodic (*pal-mod'-ik*) [παλμώδης, like palmus]. Pertaining to, resembling, or affected with, palmus.

palmoform (*pal'-mo-form*). Methylene guaiacol, made by the action of formic acid on guaiacol.

palmoplantar (*pal'-mo-plan'-tar*) [*palma*, palm; *planta*, the sole of the foot]. Pertaining to both the palms of the hands and the soles of the feet. **p.-plantar sign,** *Filipowicz' sign;* said to be diagnostic of typhoid fever. It consists of an orange or saffron coloration of the prominent parts of the palms of the hands and the soles of the feet. The change in color is attributed to feebleness of the action of the heart, causing incomplete filling of the capillaries, and dryness of the skin.

palmoscopy (*pal-mos'-ko-pe*) [παλμός, throb; σκοπεῖν, to observe]. The observation of the heart-beat and the pulse.

palmus (*pal'-mus*) [παλμός, a twitch]. 1. Jumpers' disease; lata, or miryachit; a convulsive tic, with echolalia and abulia. 2. Subsultus; palpitation; throbbing; pulsation; twitching; jerkiness. 3. The heart-beat.

palpable (*pal'-pa-bl*). 1. That which can be touched or palpated. 2. Evident.

palpate (*pal'-pāt*) [*palpare*, to feel]. 1. To examine by touch. 2. Furnished with tactile organs.

palpation (*pal-pa'-shun*) [*palpate*]. In physical diagnosis, the laying of the hand on a part of the body or the manipulation of a part with the hand for the purpose of ascertaining its condition or that of underlying organs. **p., bimanual,** the use of the two hands in examining an organ. **p., mediate,** a method of physical examination performed by placing the phonendoscope on the chest after removing the tubes and resting the palmar surface of the hand upon the instrument, thus intensifying the vibrations.

palpatometer (*pal-pat-om'-et-er*) [*palpare*, to feel; μέτρον, a measure]. An instrument for measuring arterial tension.

palpatometry (*pal-pat-om'-et-re*) [*palpare*, to feel; μέτρον, measure]. A measuring of the greatest pressure that can be borne without pain.

palpatopercussion (*pal-pat-o-per-kush'-un*). Combined palpation and percussion.

palpatorium (*pal-pa-to'-re-um*). An apparatus to aid in detecting tender spots in the abdomen during a fluoroscopic examination.

palpebra (*pal'-be-brah*) [L.: *pl.*, *palpebræ*]. The eyelid **p. inferior,** the lower eyelid. **p. superior,** the upper eyelid.

palpebral (*pal'-pe-bral*) [*palpebra*]. Pertaining to the eyelid. **p. angle.** See *canthus.* **p. cartilage.** See *cartilage.* **p. conjunctiva,** the conjunctiva of the eyelid. **p. fascia,** the tarsal ligament of the eyelids. **p. fissure,** the opening between the upper and lower eyelids. **p. follicles,** the Meibomian glands. **p. muscle,** the orbicularis palpebrarum muscle.

palpebralis (*pal-pe-bra'-lis*). An old term for the orbicularis palpebrarum muscle.

palpebrate (*pal'-pe-brāt*) [*palpebra*]. 1. Furnished with eyelids. 2. To wink.

palpebration (*pal-pe-bra'-shun*) [*palpebra*]. The act of winking; nictitation.

palpebrin (*pal'-peb-rin*). A proprietary remedy used externally in eye diseases; it is said to consist of boric acid, mercury bichloride, zinc sulphate, and glycerol.

palpebritis (*pal-pe-bri'-tis*) [*palpebra*, eyelid; ιτις, inflammation]. Synonym of *blepharitis.*

palpebrofrontal (*pal-pe-bro-front'-al*). Relating to the eyelid and the brow.

palpitate (*pal'-pit-āt*) [*palpitare*, to quiver]. To flutter, to tremble or to beat abnormally fast; applied especially to the heart.

palpitation (*pal-pit-a'-shun*) [*palpitare*, to quiver]. A fluttering or throbbing, especially of the heart, of which the person is conscious.

palsy (*pawl'-ze*) [from *paralysis*]. Paralysis. **p., Bell's.** See *Bell's palsy.* **p., birth-.** See *birth-palsy.* **p., bulbar.** See *bulbar paralysis.* **p., crutch-.** See *crutch paralysis.* **p. drops,** compound tincture of lavender. **p., Erb's.** See *Erb's palsy.* **p., hammer-,** that due to excessive use of the hammer. **p., lead,** paralysis of the muscles of the forearm, due to lead poisoning. **p., local,** progressive muscular atrophy. **p., night,** paresthesia of the hands occurring at night. **p., painter's,** lead paralysis. **p. scriveners',** writers' cramp. **p., shaking.** Synonym of *paralysis agitans.* **p., wasting,** progressive muscular atrophy.

Paltauf's nanism (*pahl'-towf*) [Arnold *Paltauf*, German physician, 1860–1893]. Dwarfism with lymphatism.

paludal (*pal'-ū-dal*) [*palus*, a marsh]. Pertaining to or originating in marshes; malarial.

paludein (*pal-ū'-de-in*) [*Paludina*, a genus of freshwater snails]. The mucus of the snail *Paludina vivipara*, which has been used to make a pectoral syrup.

paludide (*pal'-ū-dīd*). A cutaneous eruption supposed to be due to malaria.

paludism (*pal'-ū-dizm*) [*palus*, a marsh]. Malarial poisoning.

palustral (*pal-us'-tral*) [see *paludism*]. Pertaining to, or having the nature of, marsh-fever; paludal.

pampiniform (*pam-pin'-i-form*) [*pampinus*, tendril; *forma*, form]. Having the form of a tendril. **p. plexus.** See *plexus, pampiniform.*

pampinocele (*pam-pin'-o-sēl*) [*pampinus*, tendril; κήλη, hernia]. A varicocele of the veins of the pampiniform plexus.

pamplegia (*pam-ple'-je-ah*) [*pan-*; πληγή, stroke]. General paralysis.

pan. A low, flat-bottomed vessel. **p., bed,** a large, flat oval pan, usually of agate, or enameled ware or china, serving as a receptacle for the fecal discharges and urine of bed-patients. **p., brain, p., head,** the skull. **p., knee,** the patella.

pan- [πᾶς, πᾶν, all]. A prefix signifying all, every, the whole of anything.

panacea (*pan-a-se'-ah*) [πανάκεια, all-healing, from πᾶς, all; ἄκος, a cure]. A remedy curing all diseases; a cure-all; a quack remedy.

panado (*pan-a'-do*) [Sp. *panada*, from *panis*, bread]. Bread softened in water. Also a bread-poultice.

Panama bark. Quillaja bark. **P. fever.** 1. A pernicious form of malarial fever occurring in Panama; Chagres fever. 2. Yellow fever. **P. paralysis,** beriberi.

panaris (*pan'-ar-is*). See *paronychia.*

panaritium (*pan-ar-ish'-e-um*). See *paronychia.*

panarteritis (*pan-ar-ter-i'-tis*) [*pan-*; *arteritis*]. 1. Inflammation of several arteries at the same time. 2. Inflammation of all the coats of an artery.

panarthritis (*pan-ar-thri'-tis*). Inflammation of all the structures of a joint.

Panas' operation (*pan-ah'*) [Photinos *Panas*, French ophthalmologist, 1832–1903]. See under *operations.* **P.'s solution.** A mild antiseptic

collyrium, serviceable in conjunctivitis, blepharitis, etc. It contains mercuric iodide 1 part, absolute alcohol 400 parts, distilled water sufficient to make 20,000 parts.

panase (*pan'-āz*). Trade name of a combination of the digestive enzymes derived from the pancreas of the pig.

panasthenia (*pan-as-the'-ne-ah*) [*pan-; asthenia*]. Neurasthenia.

panatrophy (*pan-at'-ro-fe*) [*pan-; atrophy*]. 1. Atrophy affecting every part of a structure. 2. General atrophy.

Panax (*pan'-aks*) [πάναξ, all-healing]. A genus of araliaceous plants. Ginseng was formerly classed as *Panax*. See *aralia*, also *ginseng*.

panbioma (*pan-bi-o'-ma*) [*pan-; βίος*, life]. The general principle of life. Cf. *bionergy*.

panblastic (*pan-blas'-tik*) [*pan-; βλαστός*, a germ]. Connected with all the layers of the blastoderm.

pancarditis (*pan-kar-di'-tis*). General inflammation of the heart.

panchrestous (*pan-kres'-tus*) [*pan-; χρηστός*, useful]. Useful for everything; relating to a panacea.

panchrestus (*pan-kres'-tus*) [*pan-; χρηστός*, useful]. Same as *panacea*.

Pancoast's operation (*pan'-kōst*) [Joseph *Pancoast*, American surgeon, 1805–1882] See under *operations*.

pancolpohysterectomy (*pan-kol-po-his-ter-ek'-to-me*). See *panhysterokolpectomy*.

pancreaden (*pan'-kre-ad-en*). The direct extract of pancreas attenuated with calcium carbonate; used in pancreatic diabetes. Dose 4–6 dr. (15–23 Gm.) daily.

pancreas (*pan'-kre-as*) [*pan-; κρέας*, flesh]. A compound racemose gland, from six to eight inches in length, lying transversely across the posterior wall of the abdomen; the sweetbread of animals. Its right extremity, the *head*, lies in contact with the duodenum; its left extremity, the *tail*, is in close proximity to the spleen. It secretes a limpid, colorless fluid that digests proteids, fats, and carbohydrates. The secretion is conveyed to the duodenum by the pancreatic duct, or duct of Wirsung. **p., accessory,** a small mass of glandular structure similar to the pancreas and adjacent to it. **p. Aselli,** a collection of lymph-glands in the mesentery of some mammals, resembling a pancreas. **p. glomeruli,** the islands of Langerhans. **p., lesser,** a small, partially detached portion of the gland, lying posteriorly to its head, and having occasionally a separate duct that opens into the pancreatic duct proper.

pancreatalgia (*pan-kre-at-al'-je-ah*) [*pancreas; ἄλγος*, pain]. Pain in the pancreas.

pancreatectomy (*pan-kre-at-ek'-to-me*) [*pancreas; ἐκτομή*, excision]. Excision of a portion or all of the pancreas.

pancreatemphraxis (*pan-kre-at-em-fraks'-is*) [*pancreas; ἔμφραξις*, stoppage]. Obstruction of the pancreatic duct.

pancreathelcosis (*pan-kre-ath-el-ko'-sis*) [*pancreas; ἕλκωσις*, ulceration]. Ulceration of the pancreas.

pancreatic (*pan-kre-at'-ik*) [*pancreas*]. Pertaining to the pancreas, as the *pancreatic* duct; depending upon disease of the pancreas, as *pancreatic* diabetes. **p. duct,** the duct of Wirsung. **p. fluid, p. juice,** the secretion of the pancreas, a thick, transparent, colorless, odorless fluid, of a salty taste, and strongly alkaline.

pancreaticoduodenal (*pan-kre-at-ik-o-dū-o-de'-nal*) [*pancreas; duodenum*]. Pertaining to the pancreas and the duodenum, as the *pancreaticoduodenal* arteries.

pancreaticosplenic (*pan-kre-at'-ik-o-splen'-ik*). Pertaining to the pancreas and the spleen.

pancreatin (*pan-kre'-at-in*) [*pancreas*]. The active elements of the juice of the pancreas; also the commercial extract of the pancreas, supposed to possess a fermentative action similar to that of the pancreatic juice.

pancreatinokinase (*pan-kre-at-i-no-kin'-ās*). Trade name of a compound of pancreatin and eukinase said to be a powerful digestant.

pancreatism (*pan'-kre-at-izm*). The proper performance of its functions by the pancreas.

pancreatitic (*pan-kre-at-it'-ik*). Pertaining to pancreatitis.

pancreatitis (*pan-kre-at-i'-tis*) [*pancreas; itis*, inflammation]. Inflammation of the pancreas. It may be hemorrhagic, suppurative, or gangrenous. The onset of pancreatitis is usually sudden, with severe abdominal pain, vomiting, tympanites, and tenderness of the abdomen.

pancreatoduodenectomy (*pan-kre-at-o-dū-o-de-nek'-to-me*) [*pancreas; duodenum; ἐκτόμη*, excision]. Excision of the head of the pancreas with the surrounding loop of the duodenum.

pancreatolipase (*pan-kre-at-o-lip'-ās*). Lipase found in the pancreatic juice.

pancreatolith (*pan-kre-at'-o-lith*) [*pancreas; λίθος*, a stone]. A calculus of the pancreas

pancreatolithotomy (*pan-kre-at-o-lith-ot'-o-me*). Operation for the removal of a calculus from the pancreas.

pancreatolysis (*pan-kre-at-ol'-is-is*) [*pancreas; λύσις*, solution]. Destruction of the substance of the pancreas.

pancreatolytic (*pan-kre-at-o-lit'-ik*). Pertaining to pancreatolysis.

pancreatomy (*pan-kre-at'-o-me*). See *pancreatotomy*.

pancreatoncus (*pan-kre-at-ong'-kus*) [*pancreas; ὄγκος*, tumor]. A tumor of the pancreas.

pancreatopathy (*pan-kre-at-op'-a-the*) [*pancreas; πάθος*, suffering]. Any disease of the pancreas.

pancreatorrhagia (*pan-kre-at-or-a'-je-ah*) [*pancreas; ῥηγνύναι*, to burst forth]. Hemorrhage from the pancreas.

pancreatotomy (*pan-kre-at-ot'-o-me*) [*pancreas; τομή*, a cutting]. Incision of the pancreas.

pancreazymose (*pan-kre-az-i'-mōs*) [*pancreas; ζύμη*, leaven]. One of the pancreatic ferments.

pancreectomy (*pan-kre-ek'-to-me*). See *pancreatectomy*

pancreobismuth (*pan-kre-o-biz'-muth*). Trade name of a combination of pancreatic ferments and bismuth.

pancreodigestin (*pan-kre-o-di-jes'-tin*). Trade name of a combination of some of the digestive ferments with lactic and hydrochloric acids.

pancreolith (*pan'-kre-o-lith*). Pancreatolith.

pancreolithotomy (*pan-kre-o-lith-ot'-o-me*). Pancreatolithotomy.

pancreolysis (*pan-kre-ol'-is-is*). Pancreatolysis.

pancreolytic (*pan-kre-o-lit'-ik*). Destructive to pancreatic tissue.

pancreon, pankreon (*pan'-kre-on*). Trade name of a digestant derived from pancreatin. It is a grayish, odorless powder having a strong tryptolytic power. Dose 7½ gr. (0.5 Gm.) 3 times daily.

pancreopathia (*pan-kre-o-path'-e-ah*) [*pancreas; πάθος*, disease]. Disease of pancreas

pancreopathy (*pan-kre-op'-ath-e*) [*pancreas; πάθος*, disease]. Disease of the pancreas.

pancril (*pan'-kril*). Trade name of a combination of enzymes, said to be capable of digesting nitrogenous, starchy, and fatty foods.

pancrobilin (*pan-kro-bi'-lin*). Trade name of a preparation of oxgall and pancreatin.

pandemia (*pan-de'-me-ah*) [*pan-; δῆμος*, people]. An epidemic that attacks all persons.

pandemic (*pan-dem'-ik*) [*pan-; δῆμος*, people]. Epidemic over a wide area.

pandemy (*pan'-dem-e*). Same as *pandemia*.

Pander's islands (*pan'-der*) [Heinrich Christian von *Pander*, German anatomist, 1794–1865]. 1. The reddish-yellow patches in Pander's layer which consist of corpuscles containing hemoglobin. 2. A collection of nerve cells found beneath the optic thalamus. **P.'s layer**, the splanchnopleural layer of the mesoblast in which the blood-vessels are first formed.

pandiculation (*pan-dik-ū-la'-shun*) [*pandiculari*, from *pandere*, to stretch out]. The act of stretching the limbs, especially on waking from sleep, accompanied by yawning.

pandocheum, pandochium (*pan-do'-ke-um*) [*pan-; δέχεσθαι*, to receive]. A hospital receiving all diseases.

panelectroscope (*pan-e-lek'-tro-skōp*). An inspection apparatus for use in proctoscopy, esophagoscopy, urethroscopy, etc. It throws concentrated light through the whole tube, thus illuminating the spot that is to be inspected.

panesthesia (*pan-es-the'-ze-ah*) [*pan-; αἴσθησις*, perception]. 1. General or total sensation; cenesthesia. 2. The undifferentiated sensory capacity of the supposed primal germ.

panesthetism (*pan-es'-thet-izm*). Same as *panesthesia*.

Paneth's cells (*pah'-nāth*) [Josef *Paneth*, German physician, 1857–]. Coarsely granular cells found in the crypts of Lieberkuhn in the jejunum and ileum, especially the latter.

pang. A momentary sharp pain. **p., breast-,** angina pectoris. **p., brow-,** hemicrania.

pangaduin (*pan-gad'-ū-in*). A crystalline solid said to contain the basic principles of cod-liver oil; indicated in all affections due to faulty elimination.

pangen (*pan'-jen*) [*pan-; γένεσις*, birth, production]. One of the primary bearers of the individual qualities or characters of the cell, *i. e.*, the constituent qualities of the species; one of the ultimate vital particles; a biophor.

pangenesis (*pan-jen'-es-is*) [*pan-; γένεσις*, origin]. Darwin's theory of heredity, which supposes the existence of gemmules or minute particles separated from the body-cells and segregated from the circulation by the reproductive glands. These preformed constituents of all parts of the fully formed animal or plant become aggregated in the germ, and give rise by a process of evolution to the new organism.

pangenetic (*pan-jen-et'-ik*). Pertaining to pangenesis.

panglossia (*pan-glos'-e-ah*) [*πανγλωσσία*, wordiness]. Excessive or insane garrulity.

panhidrosis (*pan-hid-ro'-sis*). See *panidrosis*.

panhydrometer (*pan-hi-drom'-et-er*). An instrument for determining the specific gravity of any liquid.

panhygrous (*pan-hi'-grus*) [*pan-; ὑγρός*, moist]. Damp as to the entire surface.

panhyperemia, panhyperæmia (*pan-hi-per-e'-me-ah*). Plethora.

panhysterectomy (*pan-his-ter-ek'-to-me*). Total extirpation of the uterus.

panhysterokolpectomy (*pan-his-ter-o-kol-pek'-to-me*) [*pan-; ὑστέρα*, womb; *κόλπος*, vagina; *ἐκτομή*, excision]. Complete removal of the uterus and vagina.

panicula (*pan-ik'-ū-lah*) [L.]. A swelling or tumor.

panidrosis (*pan-id-ro'-sis*) [*pan-; ἱδρώς*, sweat]. General perspiration.

panis (*pan'-is*) [L.]. Bread.

panivorous (*pan-iv'-or-us*) [*panis*, bread; *vorare*, to devour]. Subsisting on bread.

Panizza's plexuses. Two lymphatic plexuses lying in the lateral fossa of the preputial frenum; they are formed by the deeper lymphatic vessels of the integument of the glans penis.

panmeristic (*pan-mer-is'-tik*) [*pan-; μέρος*, a part]. Relating to an ultimate protoplasmic structure composed of independent vital units.

panmixia (*pan-miks'-e-ah*) [*pan-; μίξις*, mingling]. Indiscriminate sexual crossing.

panmnesia (*pan-ne'-se-ah*) [*pan-; μνῆσις*, remembrance]. A potential remembrance of all impressions

panmyelophthisis (*pan-mi-el-off'-this-is*) [*pan-; μύελος*, marrow; *φθίσις*, wasting]. A general wasting of the bone-marrow.

panmyelosis (*pan-mi-el-o'-sis*) [*pan-; μύελος*, marrow]. Proliferation of all the constituents of bone marrow.

pannecrotomy (*pan-nek-rot'-o-me*) [*pan-; νεκρός*, dead; *τομή*, a cutting]. The dissection of all dead bodies, suggested as the best method to prevent burial of living persons.

panneuritis (*pan-nū-ri'-tis*). Multiple neuritis. **p. epidemica,** beriberi.

panniculitis (*pan-ik-ū-li'-tis*) [*panniculus; itis*, inflammation]. Inflammation of the abdominal panniculus adiposus

panniculus (*pan-ik'-ū-lus*) [dim. of *pannus*]. A membrane or layer. **p. adiposus,** the layer of subcutaneous fat. **p. carnosus,** the layer of muscles contained in the superficial fascia. It is well developed in the lower animals, but in man is represented mainly by the platysma. **p. cordis,** the pericardium. **p. hymeneus, p. virginis,** the hymen. **p. subtilis,** the pia mater **p. transversus,** the diaphragm.

pannosity (*pan-os'-it-e*) [*pannus*]. Softness of skin.

pannus (*pan'-us*) [L., "a cloth"]. 1. Vascularization of the cornea, usually due to the irritation of trachoma granulations. 2. Chloasma. **p. carateus,** pinta. **p. carnosus, p. crassus,** one that has acquired a considerable thickness. **p. hepaticus,** chloasma. **p. phlyctenular,** the vascularizena dd cloudy condition of the cornea induced by phlyctenular inflammation. **p. siccus,** an old pannus composed of connective tissue and poor in vessels. **p. tenuis,** slight pannus

panodic (*pan-od'-ik*). See *panthodic*.

panopeptone (*pan-o-pep'-tōn*). Trade name of a dietetic said to consist of bread and beef, cooked, peptonized, sterilized, concentrated, and preserved in sherry.

panophobia (*pan-o-fo'-be-ah*) [*pan-; φόβος*, fear]. Morbid fear of everything; a symptom present in some cases of neurasthenia.

panophthalmia, panophthalmitis (*pan-of-thal'-me-ah, pan-of-thal-mi'-tis*). Inflammation of all the tissues of the eyeball. **p. purulenta,** a severe form with great protrusion of the eyeball and formation of pus, usually resulting in blindness.

panoptosia (*pan-op-to'-se-ah*) [*pan-*; πτώσις, a falling]. A condition in which several viscera are prolapsed.

panosteitis (*pan-os-te-i'-tis*). An inflammation of all the structures of a bone.

panotitis (*pan-o-ti'-tis*). An inflammation involving all the structures of the ear.

panpeptin (*pan-pep'-tin*). Trade remedy said to contain several digestive ferments.

panpharmacon (*pan-far'-mak-on*) [*pan-*; φάρμακον, drug]. A panacea.

panphobia (*pan-fo'-be-ah*) [*pan-*; φόβος, dread]. Synonym of *panophobia*.

panplegia (*pan-ple'-je-ah*) [*pan-*; πληγή, stroke]. Generalized paralysis.

Pansch's fissure (*pahnsh*) [Adolf *Pansch*, German anatomist, 1841–1887]. A cerebral fissure extending from the lower end of the central fissure to the occipital lobe.

pansclerosis (*pan-skle-ro'-sis*) [*pan-*; σκλερος, hard]. Complete sclerosis or hardening of a part.

pansinusitis (*pan-si-nus-i'-tis*). Inflammation of all the sinuses of a part or region.

panspermatism (*pan-sper'-mat-izm*). The theory that germs are omnipresent.

panspermia (*pan-sper'-me-ah*). See *panspermatism*.

pansphygmograph (*pan-sfig'-mo-graf*). An instrument by means of which tracings can be taken simultaneously of the cardiac movements, the arterial pulse, and the respiration.

pansymmetry (*pan-sim'-et-re*). Entire symmetry.

pant. To breathe hard or quickly.

pantachromatic (*pan-tak-kro-mat'-ik*) [*pan-*; *achromatic*]. Colorless throughout.

pantalgia (*pan-tal'-je-ah*) [*pan-*; ἄλγος, pain]. Generalized pain over the whole body.

pantamorphia (*pan-tam-or'-fe-ah*) [*pan-*; μορφή, form] General deformity.

pantamorphic (*pan-tam-or'-fik*) [*pan-*; ἀμορφία, shapelessness]. Completely deformed.

pantanencephalia (*pan-tan-en-sef-a'-le-ah*) [*pan-*; ἀνεγκέφαλος, brainless]. Total congenital absence of the brain.

pantanencephalic (*pan-tan-en-sef-al'-ik*) [*pan-*; ἀ, priv.; ἐγκέφαλος, brain]. Congenitally destitute of brain.

pantanencephalus (*pan-tan-en-sef'-al-us*). A brainless monster.

pantankyloblepharon (*pan-tang-kil-o-blef'-ah-ron*) [*pan-*; ἀγκύλη, noose; βλέφαρον, eyelid]. Complete ankyloblepharon.

pantaphobia (*pan-taf-o'-be-ah*) [*pan-*; ἀ, priv.; φόβος, fear]. Total absence of fear.

pantatrophia, pantatrophy (*pan-tat-ro'-fe-ah, pan-tat'-ro-fe*) [*pan-*; *atrophy*]. Complete or general atrophy.

pantatrophous (*pant-at'-ro-fus*). Without nourishment.

panteric (*pan-ter'-ik*) [pancreatin; *enteric*]. Trade name of a tablet containing pancreatin with an enteric coating.

pantherapist (*pan-ther'-ap-ist*) [*pan-*; θεραπεία, therapy]. See *eclectic*.

panthodic (*pan-thod'-ik*) [*pan-*; ὁδός, way]. Of nervous impulses, radiating to all parts of the body.

panto- (*pan'-to-*). See *pan-*.

pantogamy (*pan-tog'-am-e*) [*pan-*; γάμος, marriage]. Indiscriminate sexual intercourse.

pantograph (*pan'-to-graf*) [*pan-*; γράφειν, to write]. An instrument for the mechanical copying of diagrams, etc., upon the same scale, or upon an enlarged or a reduced scale.

pantography (*pan-tog'-ra-fe*) [*pan-*; γράφειν, to write]. 1. General description. 2. The process of copying by a pantograph.

pantomorph (*pan'-to-morf*) [*pan-*; μορφή, form]. That which assumes, or exists in, all shapes.

pantomorphia (*pan-to-mor'-fe-ah*) [*pan-*; μορφή, form]. 1. The condition of assuming or existing in all shapes. 2. General or complete symmetry. Cf. *pantamorphia*.

pantophobia (*pan-to-fo'-be-ah*) [*pan-*; φόβος, fear]. Insane dread of all things.

pantoplethora (*pan-to-pleth'-or-ah*) [*pan-*; πληθώρη, fulness]. General hyperemia.

pantopon (*pan'-top-on*) [*pan-*; *opium*]. Trade name of a preparation of opium said to contain all the alkaloids of opium in the form of hydrochlorides.

pantoscopic (*pan-to-skop'-ik*). See *bifocal*.

Panum's casein (*pah'-noom*) [Peter Ludwig *Panum*, Danish physiologist, 1820–1885]. Serum globulin.

panus (*pa'-nus*) [L., "a swelling"]. An inflamed, nonsuppurating lymphatic gland. **p. faucium**, an inflamed gland in the throat. **p. inguinalis**, a bubo.

panzyme (*pan'-zim*) [*pan-*; ζύμη, leaven]. Trade name of a preparation containing several enzymes.

pap. 1. The nipple. 2. A soft, semiliquid food for infants. **p. pox.** Same as *cowpox*.

papain (*pa-pa'-in*). See under *papaya*.

papaver (*pa-pa'-ver*). The poppy. See *opium*.

papaverine (*pa-pa'-ver-ēn*) [*papaver*], $C_{21}H_{21}NO_4$. A crystalline alkaloid found in opium and thought to possess narcotic properties. Dose ½ gr. (0.016 Gm.).

papaw (*pa-paw'*) [a name of Malabar origin]. 1. The seed of *Asimina triloba;* it is a prompt emetic. Dose of the *fluidextract* 10–30 min. (0.6–1.9 Cc.). 2. See *papaya*.

papaya (*pa-pa'-yah*). Melon-tree; papaw—the *Carica papaya*, a tree of the order *Passiflorace*æ. The unripe fruit yields a milky juice containing an albuminous substance, *papain* or *papayotin*, capable of digesting fibrin and other proteid bodies. Papain in commerce occurs as a grayish powder, and has been used as a digestant in dyspepsia, as an application to false membranes, warts, epitheliomata, etc. Dose 5–10 gr. (0.32–0.65 Gm.).

papayotin (*pap-a'-yo-tin*). The concrete active principle of the milky juice of the papaw; it is an enzyme similar to pepsin.

paper (*pa'-per*) [*papyrus*]. See *charta*. **p., helianthin, p., methyl-orange, p., tropæolin D,** paper charged with methyl-orange and used in testing for acids and alkalies. **p., indigo-carmin.** See under *indigo*.

papescent (*pap-es'-ent*). Having the consistence of pap.

papilla (*pap-il'-ah*) [L., "a nipple;" *pl., papillæ*]. 1. The nipple. 2. A small, nipple-like eminence. 3. Synonym of *optic disc*. 4. A pimple or pustule. **p., acoustic,** the organ of Corti. **p., bile,** the caruncula major of Santorini at the summit of which the bile and pancreatic ducts open. **p., circumvallate,** one of the large papillæ at the root of the tongue, arranged like the letter V opening forward. **p., clavate.** Synonym of *p., fungiform*. **p., conical.** See *p., filiform*. **p., dental.** See *organ, enamel-*. **p., duodenal,** the elevation at the point where the common bile-duct enters the duodenum. **p., filiform,** any one of the papillæ occurring on all parts of

the tongue, consisting of an elevation of connective tissue covered by a layer of epithelium. **p., fungiform,** any one of the low, broad papillæ found on the surface of the tongue, consisting of a connective-tissue elevation, covered by secondary papillæ. **p., genital,** the primitive penis or clitoris. **papillæ, gustatory,** those papillæ of the tongue which are furnished with taste-buds. Syn., *papillæ gustus.* **p., lacrimal,** a small conical eminence on the eyelid at the inner canthus, pierced by the lacrimal punctum. **p., lenticular.** Same as *p., fungiform.* **p., lingual,** one of the elevations of the mucous membrane of the dorsum of the tongue. **p. mammæ,** the nipple. **papillæ maximæ,** the circumvallate papillæ. **papillæ mediæ,** the fungiform papillæ. **papillæ minimæ,** conical or filiform papillæ. **papillæ, nerve-.** See under *nerve.* **p., renal,** the summit of any one of the renal pyramids projecting into the renal pelvis. **p. spiralis,** the convex spiral ridge formed by Corti's organ. **p., tactile,** a little eminence of the true skin containing tactile corpuscles. **papillæ, vascular,** papillæ of the skin containing capillary loops.

papillary (*pap'-il-a-re*). 1. Pertaining to the nipple. 2. Composed of or containing papillæ; resembling a papilla. **p. body,** the papillary layer of the skin. **p. muscles,** the musculi papillares, *q. v.* **p. tumor,** a papilloma.

papillectomy (*pap-il-ek'-to-me*) [*papilla*; ἐκτομή, excision]. Surgical removal of papillæ.

papilledema (*pap-il-e-de'-mah*). Choked disc, papillitis.

papilliferous (*pap-il-if'-er-us*) [*papilla*; *ferre*, to bear]. Bearing or containing papillæ, as a *papilliferous* cyst.

papilliform (*pap-il'-if-orm*) [*papilla*; *forma*, form]. Shaped like a papilla.

papillitis (*pap-il-i'-tis*) [*papilla*; ῖτις, inflammation]. Inflammation of the optic disc. Syn., *choked disc; optic neuritis.*

papilloadenocystoma (*pap-il-o-ad-en-o-sist-o'-mah*). Papilloma adenoma and cystoma combined.

papillocarcinoma (*pap-il-o-kar-sin-o'-mah*) [*papilla; carcinoma*]. 1. A carcinoma in which there is the formation of papillary excrescences. 2. A papilloma which has become malignant.

papilloma (*pap-il-o'-mah*) [*papilla*; ὅμα, tumor]. A growth on the skin or mucous membrane resembling hypertrophied papillæ. It is a benign tumor, occurring in two forms, the *hard papilloma*, one growing from squamous epithelium, and the *soft papilloma*, one developed from columnar epithelium. **p. diffusum,** multiple papillomata occurring on the legs and buttock. **p. neuroticum,** a painless, mostly congenital affection characterized by warty or papillomatous growths occurring on one side of the body along the course of a nerve.

papillomatosis (*pap-il-o-mat-o'-sis*) [*papilla*; ὅμα, tumor; νόσος, disease]. The widespread formation of papillomata; also the state of being affected with multiple papillomata.

papillomatous (*pap-il-o'-mat-us*) [*papilla*; ὅμα, tumor]. Pertaining to a papilloma.

papilloretinitis (*pap-il-o-ret-in-i'-tis*). Inflammation of the papilla and retina.

papillose (*pap'-il-ōs*). Bearing papillæ.

papillula (*pap-il'-ū-lah*). 1. A small papilla. 2. Nipple.

Papin's digester (*pap-an'*) [Denis *Papin*, French physicist, 1647–1714]. A contrivance for boiling under pressure in a closed vessel.

papine (*pap-en'*). A proprietary anodyne said to contain the pain-relieving principle of opium.

papoid (*pap'-oid*). A proprietary preparation resembling papain.

papoose-root (*pah-poos'*). *Caulophyllum thalictroides*, the blue cohosh.

pappataci fever (*pap-at-ash'-e*). An infectious disease probably of protozoal origin, somewhat resembling dengue, but less severe and of shorter duration. Found in Malta, Bosnia, Herzegovina, Dalmatia, Italy and S. America.

Pappenheim's method (*pap'-en-hīm*) [Arthur *Pappenheim*, German physician, 1870–1917]. For differentiating tubercle bacilli from smegma bacilli: Stain the specimen with hot carbol-fuchsin solution, then treat it with an alcoholic solution of rosolic acid and methylene blue. glycerin being added. Tubercle bacilli are stained bright red while smegma bacilli are decolorized.

pappus (*pap'-us*) [πάππος, down]. The fine down first appearing on the cheeks and chin.

paprica, paprika (*pap'-re-kah*). The dried and pulverized capsules of *Capsicum annuum.* Syn., *Spanish pepper; Turkish pepper.*

papula (*pap'-ū-lah*). See *papule.*

papular (*pap'-ū-lar*) [*papula*, papule]. Of the nature of a papule.

papulation (*pap-ū-la'-shun*) [*papula*, a pimple]. The stage, in certain eruptive diseases, marked by the formation of papules.

papule (*pap'-ūl*) [*papula*, a pimple. pl., *papulæ*]. A small circumscribed, solid elevation of the skin; a pimple. **p., moist,** the syphilitic condyloma.

papuliferous (*pap-ū-lif'-er-us*) [*papula*, a pimple; *ferre*, to bear]. Pimply; covered with papulæ.

papulopustular (*pap-ū-lo-pus'-tū-lar*). Characterized by both papules and pustules.

papulosquamous (*pap-ū-lo-skwa'-mus*). Characterized by both papules and scales.

papulovesicular (*pap-ū-lo-ves-ik'-ū-lar*). Characterized by both papules and vesicles.

papyraceous (*pap-ir-a'-se-us*) [*papyrus*, paper]. Resembling paper. **p. bone,** the ethmoid bone.

Paquelin's cautery (*pak-lan'*) [Claude André *Paquelin*, French surgeon, 1836–1905]. A hollow platinum point kept at a uniform temperature by a current of benzene vapor; a thermocautery.

par [L.]. A pair. **p. vagum,** the vagus nerves.

para- (*par-ah-*) [παρά, beyond; beside]. 1. A prefix signifying beyond, beside, near, the opposite of, etc. 2. In chemistry, prefixed to a derivative of the benzol ring, it indicates the substitution of two atoms of hydrogen situated opposite each other.

para-acetphenetidin (*par-ah-as-et-fen-et'-id-in*). Phenacetin.

para-acetophenolethyl carbonate (*par-ah-as-et-o-fe-nol-eth'-il kar'-bon-āt*). A crystalline powder without color or taste, used as an analgesic and hypnotic. Dose 8 gr. (0.5 Gm.).

para-amidoacetanilide (*par-ah-am-id-o-as-et-an'-il-id*). See *paraphenylendiamine.*

para-analgesia (*par-ah-an-al-je'-se-ah*) [*para-; analgesia*]. Analgesia limited to the lower half of the body.

para-anesthesia (*par-ah-an-es-the'-se-ah*). Anesthesia of the body below the waist.

para-appendicitis (*par-ah-ap-en-dis-i'-tis*). Suppurative inflammation of the connective tissue adjacent to that part of the appendix not covered with the peritoneum.

parabanic acid (*par-ab-an'-ik*). See *oxalylurea.*

parabiosis (*par-ah-bi-o'-sis*) [*para;* βίωσις, living]. 1. Union of two individuals in such a way that there is some physiological intimacy between them. 2. Temporary suppression of conductivity in a nerve.

parabiotic (*par-ah-bi-ot'-ik*). Pertaining to or characterized by parabiosis.

parablast (*par'-ah-blast*) [*para-;* βλαστός, a germ]. That part of the mesoblast from which the blood-vessels, lymphatic vessels, and other connective tissues are developed.

parablastic (*par-ah-blas'-tik*) [*parablast*]. Pertaining to the parablast.

parablastoma (*par-ah-blas-to'-mah*) [*parablast;* ὅμα, tumor]. A tumor composed of parablastic tissue.

parablepsis (*par-ah-blep'-sis*) [*para-;* βγέψις, vision]. False or perverted vision.

parabulia (*par-ab-ū'-le-ah*) [*para-;* βουλή, will]. Abnormality of volitional action.

paracanthoma (*par-ak-an-tho'-mah*) [*para-;* ἄκανθα, prickle; ὅμα, tumor]. A new growth affecting the prickle-cell layer of the skin.

paracanthosis (*par-ak-an-tho'-sis*) [*para-;* ἄκανθα, prickle; νόσος, disease: *pl., paracanthoses*]. Any skin-disease characterized by some anomaly of the prickle-cell layer.

paracarmine (*par-ah-kar'-mīn*). A staining solution containing calcium chloride and carminic acid in 75 % alcohol.

paracasein (*par-ah-ka'-se-in*). A substance closely resembling casein in composition and split off from it during the coagulation of milk. Syn., *curd.*

paracele, paracœle (*par'-as-ēl*) [*para-;* κοιλία, a hollow] A lateral ventricle of the brain.

paracellulose (*par-ah-sel'-ū-lōs*). A variety of cellulose found in pith.

Paracelsian (*par-as-el'-se-an*). 1. Relating to the Swiss physician and alchemist, Aurelius Phillippus Theophrastus Bombastus *Paracelsus* von Hohenheim, Swiss physician, 1493–1541. 2. A follower of Paracelsus. **P. method,** the use of chemical agents alone in the treatment of disease.

Paracelsus's proprietary elixir (*par-ah-sel'-sus*) [see *Paracelsian*]. Tincture of aloes and myrrh.

paracentesis (*par-ah-sen-te'-sis*) [*para-;* κέντησις, puncture]. Puncture; especially puncture of the wall of a cavity of the body, such as the thoracic wall, cornea, tympanic membrane. **p. abdominis,** paracentesis of the abdomen. **p. capitis,** paracentesis of the skull. **p. cordis,** paracentesis of the heart. **p. pericardii,** paracentesis of the pericardium. **p. pulmonis,** paracentesis of the lung. **p. thoracis,** paracentesis of the thorax. **p. tympani,** paracentesis of the tympanic cavity. **p. vesicæ,** paracentesis of the bladder.

paracentetic (*par-ah-sen-tet'-ik*). Pertaining to paracentesis.

paracentral (*par-ah-sen'-tral*) [*para-;* κέντρον, a center]. Situated near the center. **p. lobule,** convolution on the mesial surface of the cerebral hemisphere uniting the upper ends of the ascending frontal and ascending parietal convolutions.

paracephalus (*par-ah-sef'-al-us*) [*para-;* κεφαλή, head]. A monster characterized by a rudimentary, misshapen head and defective trunk and limbs.

paraceratosis (*par-ah-ser-at-o'-sis*). Parakeratosis.

parachloralose (*par-ak-lor'-al-ōs*) [*para-; chloral*]. A product of the action of chloral upon sugar. It is insoluble in water and is practically inert.

parachlorphenol (*par-ah-klōr-fe'-nol*), $C_6H_4(Cl)OH$. A substitution-product of phenol. It is antiseptic, disinfectant, and is employed in a 2 to 3% ointment in erysipelas. **p. paste,** a paste of equal parts of lanolin, vaselin, starch, and parachlorphenol; it is used in lupus.

parachlorsalol (*par-ah-klōr-sa'-lol*). Parachlorphenol salicylate; used as an internal and external antiseptic like phenyl salicylate. Dose 60–90 gr. (4–6 Gm.) daily.

paracholera (*par-ah-kol'-er-ah*) [*para-; cholera*]. A disease resembling Asiatic cholera but caused by a different organism.

paracholesterin (*par-ak-o-les'-ter-in*) [*para-;* χολή, bile; στέαρ, fat], $C_{26}H_{44}O$. One of the vegetable cholesterins.

paracholia (*par-ak-o'-le-ah*) [*para-;* χολή, bile]. 1. Any abnormality in the secretion of bile. 2. The prodrome of disturbed liver-cell activity in consequence of which the bile pours over the blood-vessels and lymph-vessels.

parachordal (*par-ak-or'-dal*) [*para-;* χορδή, a string, specifically the chorda or notochord]. 1. One of two bars of cartilage extending alongside the occipital notochord in the human fetus. 2. Adjoining the cephalochord; situated at the side of the cranial part of the notochord of the embryo. 3. Pertaining to the cartilaginous basis of the cranium in the embryo.

parachrea, parachroia (*par-ak-re'-ah, par-ak-roi'-ah*) [*para-;* χροιά, color]. Morbid discoloration or change of complexion.

parachroma (*par-ak-ro'-mah*) [*para-;* χρῶμα, color]. Change in color, especially in the natural color of the skin.

parachromatin (*par-ak-ro'-mat-in*) [*para-; chromatin*]. That part of the nucleoplasm which forms the spindle-threads during karyokinesis.

parachromatism (*par-ak-ro'-mat-izm*) [*para-;* χρῶμα, color]. False, or incorrect perception of color. It is not the same as true color-blindness, which it may approach more or less completely.

parachromatoblepsia (*par-ak-ro-mat-o-blep'-se-ah*). See *parachromatism.*

parachromatopsia (*par-ak-ro-ma-top'-se-ah*) [*para-;* χρώμα, color, ὄψις, vision]. Color-blindness.

parachromatosis (*par-ak-ro-mat-o'-sis*) [*para-;* χρῶμα, skin; νόσος, disease]. Any one of the pigmentary skin-diseases.

parachromophore (*par-ak-ro'-mo-fōr*) [*para-;* χρῶμα, color; φορός, bearing]. Applied to chromogenic bacteria that produce the pigment as an excretion-product, but retain it in the organism.

parachromophoric, parachromophorous (*par-ah-kro-mo-for'-ik, par-ah-kro-mof'-or-us*) [*para-,* χρῶμα, color; φορός, bearing]. Possessing color which remains within the cell as a passive metabolic product, as in some bacteria.

parachrosis (*par-ak-ro'-sis*) [*para-;* χρῶσις, coloring]. The existence of a pigmentary skin-disease.

parachymosin (*par-ah-ki'-mo-sin*) [*para-;* χυμός, juice]. The chymosin or rennin found in the human stomach and in that of the pig.

parachymosis (*par-ak-i-mo'-sis*) [*para-;* χυμός, juice]. A morbid state of a secretion or a secreting organ.

paracinesis (*par-as-in-e'-sis*) [*para-;* κίνησις, motion]. Morbid movement of the voluntary

muscles, arising from disease of the motor nerves or centers.

paraclonus (*par-ak'-lo-nus*). Synonym of *paramyoclonus*.

paracmasis (*par-ak'-mas-is*). Synonym of *paracme*

paracmastic (*par-ak-mas'-tik*) [*paracme*]. Pertaining to the declining stage.

paracme (*par-ak'-me*) [*para-*; ἀκμή, point, prime]. 1. The degeneration or decadence of a group of organisms after they have reached their acme of development. 2. The period of decline of a disease.

paracnemion, paracnemis (*par-ak-ne'-me-on, par-ak-ne'-mis*) [*para-*; κνήμη, tibia]. Synonym of *fibula*.

paracœle (*par'-as-ēl*). See *paracele*.

paracolitis (*par-ak-o-lī'-tis*) [*para-*; *colon*; ιτις, inflammation]. Inflammation of the outer coat of the colon.

paracolon (*par-ah-ko'-lon*). A term applied to a group of bacilli intermediate between the typhoid and colon group.

paracolpitis (*par-ah-kol-pī'-tis*) [*para-*; κόλπος, vagina; ιτις, inflammation]. Inflammation of the connective tissue about the vagina.

paracolpium (*par-ah-kol'-pe-um*) [*para-*; κόλπος, vagina] The connective tissue lying around the vagina

paracondylar (*par-ak-on'-dil-ar*) [*para-*; κόνδυλος, knuckle]. Situated alongside a condyle or a condylar region.

paracondyloid (*par-ak-on'-dil-oid*) [*para-*; κόνδυλος, knuckle; εἶδος, form]. Adjoining the condyles.

paracone (*par-ak-ōn*). The mesio-buccal cusp of an upper molar tooth.

paraconid (*par-ah-kon'-id*). The mesio-buccal cusp of a lower molar tooth.

paracoto (*par-ah-ko'-to*) [*para-*; Sp., *coto*, a cubit]. A South American tree the bark of which contains a neutral substance, *paracotoin*, closely resembling cotoin.

paracotoin (*par-ah-ko'-to-in*). See under *paracoto*.

paracousia, paracousis (*par-ah-koo'-se-ah, par-ah-koo'-sis*) [*para-*; ἀκούειν, to hear]. See *paracusia*.

paracresalol (*par-ah-kres'-al-ol*). Cresalol.

paracresol (*par-ah-kre'-sol*), C_7H_8O. A compound of cresolsulphonate and potassium hydroxide used as a disinfectant.

paracresotate (*par-ah-kres'-o-tāt*), $C_6H_3(OH)\text{-}(CH_3)CO_2Na$. A crystalline powder obtained by heating sodium cresylate with carbonic acid; used in acute articular rheumatism. Dose 45–90 gr (3–6 Gm.) daily.

paracresylol (*par-ah-kres'-il-ol*) [*para-*; *cresol*]. A derivative of cresol.

paracrisis (*par-ak'-ris-is*) [*para-*; κρίνειν, to secrete; *pl.*, *paracrises*]. Disorder of the secretory function.

paracrusis (*par-ak-roo'-sis*) [*para-*; κρούειν, to strike]. 1. Insanity, delirium. 2. The checking or "driving in" of an eruption or exanthem.

paracusia, paracusis (*par-ak-oo'-ze-ah, par-ak-oo'-sis*) [*para-*; ἀκούειν, to hear]. Any perversion of the sense of hearing. **p. acris**, excessively acute hearing, rendering the person intolerant of sounds. **p. duplicata**, a condition in which all or only certain sounds are heard double. **p. localis, p. loci**, difficulty in estimating the direction of sounds met with in unilateral deafness, or when the two ears hear unequally. **p. obtusa**, hardness of hearing. **p. perversa**, synonym of *p. Willisiana*. **p. imaginaria**, tinnitus aurium, *q. v.* **p. Willisiana**, deafness in quiet places with increased acuteness of hear · g in the midst of noise.

paracyclesis (*par-ah-si-kle'-sis*) [*para-*; κύκλησις, a revolution]. A disturbance of the circulation.

paracyesis (*par-as-i-e'-sis*) [*para-*; κύησις, pregnancy]. Extra-uterine pregnancy.

paracystic (*par-ah-sis'-tik*) [*para-*; κύστις, bladder]. Situated near or alongside the bladder.

paracystitis (*par-ah-sis-ti'-tis*). Inflammation of the connective tissue surrounding the bladder.

paracystium (*par-ah-sis'-te-um*) [*para-*; κύστις, a bladder]. The connective tissue which surrounds the bladder.

paracytic (*par-a-si'-tik*) [*para-*; κύτος, cell]. Lying among cells.

paradenitis (*par-ad-en-i'-tis*) [*para-*; ἀδήν, gland; ιτις, inflammation]. Inflammation of the areolar tissue about a gland.

paradental (*par-ah-den'-tal*) [*para-*; *dens*, tooth]. Around or beside a tooth.

paradiagnosis (*par-ah-di-ag-no'-sis*). A diagnosis that is almost correct.

paradidymis (*par-ah-did'-im-is*) [*para-*; δίδυμος, testicle]. The organ of Giraldès, the atrophic remains of the tubules of the Wolffian body, lying among the convolutions of the epididymis

paradiphtherial, paradiphtheritic (*par-ah-dif-the're-al, par-ah-dif-ther-it'-ik*). Remotely or indirectly related to diphtheria.

paradox (*par'-ad-oks*). See *paradoxia*. **p., Weber's**, a muscle when so loaded as to be unable to contract, may elongate.

paradoxia (*par-ad-oks'-e-ah*) [παράδοξος, incredible]. An absurd or contradictory statement or proposition. **p. sexualis**, sexual excitement occurring independently of the period of the physiological processes in the generative organs; the abnormal exhibition of sexual instincts in childhood or prior to puberty.

paradoxical ankle reflex, an ankle reflex in which percussion over the flexor surface induces an extensor response, and *vice versa*. **p. contraction.** A slow tonic contraction occurring in a muscle when suddenly relaxed or when its length is suddenly shortened. **p. pulse.** See *pulse, paradoxic*.

paradysentery (*par-ah-dis'-en-ter-e*). A mild form of dysentery.

paraeccrisis (*par-ah-ek'-ris-is*) [*para-*; ἐκκρίσις, excretion]. Any abnormality of excretion.

paraenteric fever (*par-ah-en-ter'-ik*). Paratyphoid fever.

paraepilepsy (*par-ah-ep'-il-ep-se*). An abortive epileptic attack, consisting of the aura only.

paræsthesia. See *paresthesia*.

paraffagar (*par-af'-ag-ar*). Trade name of a preparation containing a hydrocarbon oil and agar agar, used as an antiseptic electuary.

paraffin, paraffinum (*par'-af-in, par-af-i'-num*) [*parum*, little; *affinis*, affinity]. 1. Any saturated hydrocarbon of the marsh-gas series, having the formula C_nH_{2n+2}. 2. A white, odorless, translucent hydrocarbon (*paraffinum*, U. S. P.), obtained from coal-tar or by the destructive distillation of wood. **paraffinum durum** (B. P.), hard or solid paraffin, a mixture of several of the harder members of the paraffin series of hydrocarbons. It is usually obtained by distillation from shale. **p., liquid**, a liquid hydrocarbon of the paraffin series. **paraffinum molle**, soft paraffin; the *petrolatum* of the U. S. P. See *petrolatum*. **p. oil**, petrolatum liquidum.

paraffinoma (*par-ah-fin-o'-mah*). A tumor supposed to be due to the injection of paraffin into the tissues.

parafibrinogen (*par-ah-fi-brin'-o-jen*). A substance derived from fibrinogen when the latter is precipitated by sodium chloride.

paraflagellate (*par-af-laj'-el-āt*) [*para-; flagellum*, a flagellum]. Provided with paraflagella.

paraflagellum (*par-af-laj-el'-um*) [*para-; flagellum*, a whip; *pl., paraflagella*]. A small supplementary flagellum.

parafloccŭlus (*par-af-lok'-ū-lus*). See *flocculus*.

paraform, paraformaldehyde (*par'-ah-form, par-ah-form-al'-de-hīd*). See *formaldehyde, para-*.

paraformaldehydum (*par-ah-form-al-de-hī'-dum*). Paraformaldehyde.

parafuchsin (*par-ah-fūk'-sin*). A basic triphenylmethane dyestuff.

parafunctional (*par-ah-fungk'-shun-al*). Denoting any abnormality of function.

paragammacismus (*par-ah-gam-ah-siz'-mus*) [*para-; γάμμα*, the Greek letter γ]. Inability to pronounce the hard "*g*," and also "*k*," other consonants being substituted, as "*d*" or "*t*."

paraganglia cells (*par-ah-gan'-gle-ah*). Masses or cords which originate in the embryonic sympathetic ganglia. See *chromaffin cells*.

paragangline (*par-ah-gang'-lēn*). A proprietary extract of the myelinic part of the suprarenal gland of the ox.

paraganglioma (*par-ah-gang-gle-o'-mah*). A tumor found in the paraganglion (2).

paraganglion (*par-ah-gang'-le-on*) [*para-; ganglion; pl., paraganglia*]. 1. Anything in the neighborhood of a ganglion. 2. A collection of cells situated in the medullary portion of the adrenal bodies.

parageusia, parageusis (*par-ah-gū'-se-ah, par-ah-gū'-sis*) [*para-; γεῦσις*, taste]. Perversion of the sense of taste.

paragglutination (*par-ag-gloo-tin-a'-shun*). Agglutination of typhoid bacilli by paratyphoid serum.

paraglobin (*par-ag-lo'-bin*). Same as *paraglobulin*.

paraglobulin (*par-ah-glob'-ū-lin*) [*para-; globulus*, a little ball]. A globulin found in blood-serum and other fluids of the body. Syn., *fibrinoplastin; fibroplastin; serum-globulin*.

paraglobulinuria (*par-ah-glob-ū-lin-ū'-re-ah*) [*paraglobulin; οὖρον*, urine]. The presence of paraglobulin in the urine.

paraglossa (*par-ah-glos'-ah*) [*para-; γλῶσσα*, the tongue]. Swelling of the tongue; also, a hypertrophy of the tongue, usually congenital.

paraglossia (*par-ag-los'-e-ah*) [*para-; γλῶσσα*, tongue]. Inflammation of the muscles and connective tissues under the tongue.

paragnathous (*par-ag'-na-thus*) [*para-; γνάθος*, jaw]. 1. Having both mandibles of equal length, their tips falling together, as in certain birds. 2. Pertaining to paragnathus.

paragnathus (*par-ag'-na-thus*) [*para-; γνάθος*, jaw]. A double monster having a supernumerary mandible situated laterally.

paragomphosis (*par-ag-om-pho'-sis*) [*para-; γόμφωσις*, a nailing]. Impaction of the fetal head in the pelvic canal.

paragonimiasis (*par-ah-go-ne-mi'-a-sis*). The condition of being infected by the *Paragonimus*.

Paragonimus (*par-ag-on'-im-us*). A genus of trematode worms. **p. Westermanii**, the *distoma pulmonale*.

paragonorrheal (*par-ah-gon-o-re'-al*). Having an indirect relation to gonorrhea.

paragraphia (*par-ah-graf'-e-ah*) [*para-; γράφειν*, to write]. 1. A form of aphasia in which the person writes the improper word or misplaces the words. 2. Inability to express ideas in writing.

Paraguay tea (*par'-ah-gwī*). See *maté*.

parahemoglobin (*par-ah-hem-o-glo'-bin*). 1. Nencki's name for a polymeric modification of oxyhemoglobin. 2. A proprietary preparation of blood containing 5% of iron.

parahepatic (*par-ah-he-pat'-ik*) [*para-; ἧπαρ*, liver]. About or near the liver.

parahepatitis (*par-ah-hep-at-i'-tis*). Inflammation of structures about or near the liver.

parahidrosis (*par-ah-hid-ro'-sis*). Paridrosis.

parahormone (*par-ah-hor'-mōn*). A substance which is the product of ordinary metabolism and which has a hormone-like action in affecting the functional activity of some other organ; a substance which is not a hormone, but which acts like a hormone.

parahydropin (*par-ah-hi'-dro-pin*). A proprietary diuretic containing theobromine.

parahypnosis (*par-ah-hip-no'-sis*) [*para-; ὕπνος*, sleep]. Abnormal sleep, like that of hypnotism or of narcosis.

parahypophysis (*par-ah-hi-pof'-is-is*). An inconstant piece of pituitary tissue sometimes found in the diaphragma sellæ.

parainfection (*par-ah-in-fek'-shun*). The presence of symptoms which simulate those of an infectious disease, without the specific microorganism of that disease being present.

parainfectious (*par-ah-in-fek'-shus*). Pertaining to or characteristic of pathological states attributable to infection, which occur as accessory or by-conditions to some already existing disease.

parainfluenzal (*par-ah-in-floo-en'-zal*). Remotely connected with influenza

paraiodoxyanisol (*par-ah-i-o-doks-e-an'-is-ol*). Isoform.

parakanthosis (*par-ak-an-tho'-sis*). See *paracanthosis*.

parakeratosis (*par-ak-er-at-o'-sis*) [*para-; κέρας*, horn; *νόσος*, disease]. Any disease of the skin characterized by an abnormal quality of the horny layer. **p. variegata**, a rare skin-affection characterized by the presence upon the entire surface of the body of a red exanthem leaving small, irregular, sunken patches of normal skin, and giving to the surface a reticulated appearance.

parakinesis (*par-ak-in-e'-sis*). See *paracinesis*.

paralactate (*par-ah-lak'-tāt*). A salt of paralactic acid.

paralactic acid (*par-ah-lak'-tik*). See *acid, sarcolactic*.

paralalia (*par-ah-la'-le-ah*) [*para-; λαλιά*, speech]. Disturbance of the faculty of speech.

paralambdacism, paralambdacismus (*par-al-am'-das-izm, par-al-am-das-iz'-mus*) [*para-;* lambda, the letter λ]. Inability to pronounce the letter *l*, or the substitution of other consonants as *t, r, s, w* for *l*.

paralbumin (*par-al-bū'-min*) [*para-; albumin*]. A protein substance found in ovarian cysts.

paraldehyde (*par-al'-de-hīd*) [*para-; aldehyde*], $C_6H_{12}O_3$. A polymeric form of aldehyde, occurring as a colorless liquid of repulsive odor and unpleasant taste, with powerful hypnotic properties. It is used in delirium tremens, mania, tetanus, and other nervous affections. Dose 30–60 min. (2–4 Cc.).

paraldehydum (*par-al-de-hi'-dum*). Paraldehyde.

paraldol (*par-al'-dol*) [*para-; aldehyde*], $(C_4H_8O_2)_n$. A polymer of aldol that melts at between 80° and 90° C.

paraleipsis (*par-al-ip'-sis*) [*para-;* ἀλειφεῖν, to anoint]. A disorder of the sebaceous secretion.

paraleprosis (*par-ah-lep-ro'-sis*). Attenuated or modified form of leprosy.

paralepsy (*par'-al-ep-se*). Psycholepsy.

paralerema (*par-al-er-e'-mah*) [*para-;* λήρημα, utterance]. Delirium, or delirious utterance.

paraleresis (*par-al-er-e'-sis*) [*para-;* ληρήσις, speech]. Delirium, or moderate mental disturbance.

paralexia (*par-ah-leks'-e-ah*) [*para-;* λέξις, speech]. Disturbance of the power of reading, consisting in the transposition or substitution of words or syllables.

paralgesia (*par-al-je'-ze-ah*) [*para-;* ἄλγος, pain]. An abnormal painful sensation; painful paresthesia.

paralgia (*par-al'-je-ah*) [*para-;* ἄλγος, pain]. Any perverted and disagreeable cutaneous sensation, as of formication, cold, burning, etc.

paralinin (*par-al-i'-nin*) [*para-; linin*, parachromatin]. In biology, the nuclear sap or matrix, a protein of the globulin class, similar to those found in the cell-protoplasm. Cf. *paramitome, paraplasm.*

parallactic (*par-al-ak'-tik*). Pertaining to a parallax.

parallagma (*par-al-ag'-ma*) [παράλλαγμα, alternation]. The overriding or overlapping of the ends of a fractured bone.

parallax (*par'-al-aks*) [*para-;* ἄλλος, other]. The apparent displacement of an object due to a change in the position of the observer, or by looking at it alternately with one eye and then with the other. **p., binocular,** the angle of convergence of the visual axes. **p., crossed, p., heteronymous,** that in which the object moves away from the uncovered eye. **p., homonymous,** that in which the object moves toward the uncovered eye. **p., mental,** a slight personal equation in observation due to one's standpoint. **p., stereoscopic.** See *p., binocular.* **p. test,** for locating opacities in the cornea, lens, and vitreous. It is used with the plane mirror at ten to twelve inches. A body situated anterior to the plane of the pupil will move in the direction taken by the eye, while one posterior to the plane of the lens will move against the direction taken by the eye. Bodies lying about the same plane as the pupil will show little if any movement. **p., vertical,** that in which the object moves upward or downward.

parallelism (*par'-al-el-izm*). See *isopathy.* **p. of disease,** the tendency in diseases to simulate others.

paralogia (*par-ah-lo'-je-ah*) [*para-;* λόγος, reason]. Difficulty in thinking logically. **p., thematic,** a condition in which the thought is unduly concentrated on one subject.

paralogism (*par-al'-o-yism*) [*para-;* λόγος, reason]. The logical error of considering effects or unrelated phenomena as the cause of a condition.

paralysant (*par-al-i'-sant*). See *paralysant.*

paralysin (*par-al'-is-in*). See *agglutinin.*

paralysis (*par-al'-is-is*) [*para-;* λύειν, to loosen]. A loss of motion or of sensation in a part. **p., acute ainyotrophic spinal.** Same as *p., infantile.* **p., acute ascending.** See *Landry's disease.* **p., acute atrophic.** See *p., infantile.* **p., acute progressive.** See *Landry's disease.* **p. agitans,** an affection marked by tremor or alternate contraction and relaxation of the muscles of the part involved. It usually begins in one hand and seldom affects the head. The movements persist during rest and are little influenced by voluntary motion. Late in the disease there is a typical gait (festination), which consists in progressive increase of the gait until the patient breaks into a run which grows faster and faster until he falls or seizes some support. The disease is most common in males over forty and may last thirty or forty years. Syn., *Parkinson's disease; shaking palsy.* **p., alcoholic,** multiple neuritis from alcoholism. **p., amyotrophic,** that occurring as the sequel of some acute disease, and attended by atrophy of certain muscles. **p., angio-.** See *angioparalysis.* **p., ascending,** a form of paralysis marked by loss of motor power in the legs, gradually extending upward. **p., asthenic bulbar.** See *myasthenia gravis pseudoparalytica.* **p., atrophic bulbar.** Same as *p., bulbar.* **p., atrophic muscular.** See *p., amyotrophic.* **p. atrophic spinal** See *p. infantile.* **p., atrophospastic.** See *amyotrophic lateral sclerosis.* **p., Bell's.** See *p., facial.* **p., bifacial,** paralysis of both sides of the face. **p., birth-.** See *paraplegia, infantile spasmodic.* **p., brachial,** palsy affecting one or both arms. **p., brachiofacial,** that affecting both arm and face. **p., Brown-Séquard's,** a motor paralysis of one side of the body with sensory paralysis of the other side. **p., bulbar,** a form due to the degeneration of the nuclei of origin of the nerves arising in the oblongata. **p., central,** a paralysis due to a lesion of the brain or spinal cord. **p., cerebral,** a paralysis due to a brain-lesion. **p., cortical,** that due to lesion of the cerebral cortex. **p., crossed,** a paralysis of the arm and leg of one side, associated with either a facial paralysis or a paralysis of the oculomotor nerve of the opposite side. **p., crural,** that chiefly affecting the thighs. **p., crutch.** See *crutch paralysis.* **p., Cruveilhier's,** progressive muscular atrophy. **p., diphtheritic,** a motor paralysis due to the action of the diphtheria toxin on the nervous system, chiefly on the peripheral nerves. **p., divers'.** See *caisson disease.* **p., Duchenne's.** See *Duchenne's paralysis.* **p., Erb's,** a partial paralysis of the brachial plexus, involving the nerves supplying the deltoid, biceps, brachialis anticus, and supinator longus, often the supinator brevis, and occasionally the infraspinatus and subscapularis muscles. **p., facial,** a paralysis of the muscles of the face, usually of one side only, due to central disease or due to a lesion of the facial nerve. **p. festinans,** a phase of paralysis agitans in which the patient walks as if hurried forward. **p., general, of the insane,** an organic disease of the brain characterized by progressive loss of power and by a deterioration of the mental faculties, ending eventually in dementia and death. The main symptoms may be divided into psychic, motor, and sensory. The psychic symptoms are principally a change of character and delusions of grandeur; the motor are weakness, tremor, disturbance of speech, apoplectiform or epileptiform seizures, and finally motor paralysis; there is often inequality of the pupils, with miosis or mydriasis; sensory symptoms are slight and consist chiefly in paresthesias. The causes are obscure—syphilis and severe nervous strain are important factors. Syn., *general paresis; paralytic dementia; paretic dementia; progressive paralysis of the insane.*

p., glossolabial. Same as *p., bulbar.* **p., glossolabiolaryngeal,** bulbar paralysis. **p., histrionic,** a name for Bell's facial palsy, because it destroys the power of facial expression. **p., hysterical,** that associated with hysteria, but without any causative lesion. **p., incomplete,** partial loss of power. **p., infantile,** a disease peculiar to childhood, and characterized by sudden paralysis of one or more limbs or of individual muscle-groups, and followed by rapid wasting of the affected parts, with reaction of degeneration and deformity. The paralysis is due to changes in the anterior cornua of the gray matter of the spinal cord, and is probably the result of infection. Syn., *acute anterior poliomyelitis; acute atrophic paralysis; atrophic spinal paralysis; essential paralysis.* **p., ischemic,** paralysis of a part due to stoppage of the circulation, *e. g.*, paralysis of the lower limb following embolism or thrombosis of the femoral artery. **p., Klumpke's,** a paralysis involving the lower portion of the brachial plexus, the eighth cervical and first dorsal nerves, and characterized by paralysis of the small muscles of the hand, of some of the muscles of the forearm, with anesthesia in the distribution of the ulnar and median nerves. Pupillary changes may be present. **p., Landry's.** See *Landry's disease.* **p., lead-,** a paralysis due to lead, usually of the extensors of the wrist, causing wrist-drop. It is nearly always bilateral, and is caused by a peripheral neuritis induced by the lead-poisoning. **p., Little's,** infantile spasmodic paraplegia. **p., local,** that confined to one muscle or one group of muscles. **p., mimetic.** See *Bell's paralysis.* **p., morning,** infantile paralysis of sudden manifestation, the child being apparently well at night and paralyzed the following morning. **p., motor,** paralysis of the voluntary muscles. **p., musculospiral,** paralysis of the extensors and supinators of the wrist, due to an injury or to inflammation of the musculospiral nerve. **p., myosclerotic.** See *p., pseudohypertrophic muscular.* **p., narcosis,** pressure paralysis in the region of the brachial plexus due to prolonged narcosis, during which the arm is elevated with the head resting upon it or it is pressed against the edge of the table. **p., nuclear,** one due to a lesion of the nuclei of origin of a cranial nerve. **p., obstetrical,** any paralysis of the child resulting from injuries received during delivery. **p., oculomotor,** that attacking the oculomotor nerve. **p., peripheral,** loss of power due to a lesion of the nervous motor mechanism between the nuclei of origin and peripheral termination. **p., postdiphtheritic.** See *p., diphtheritic.* **p., pressure,** paralysis of a group of muscles supplied by a nerve which has been subjected to prolonged pressure. **p., pseudobulbar,** a symmetrical lesion of the halves of the cerebrum producing paralysis of the lips, the tongue, and the larynx or the pharynx. **p., pseudohypertrophic muscular,** a chronic disease characterized by progressive muscular weakness, associated with an apparent hypertrophy of the affected muscles. The disease usually begins in the muscles of the calf, and spreads over the body, the muscles of the hand almost always escaping. There are marked lordosis and a peculiar gait, with wide separation of the legs and swaying of the body from side to side. The characteristic symptom is the manner in which the patient arises from the floor—he "climbs" up on his legs, on account of the weakened state of the extensor muscles of the back. It is most common in young male children. The disease is entirely myopathic, no adequate nerve-lesion having as yet been discovered. The muscles are the seat of hypertrophy and atrophy of muscular fibers, hyperplasia of the connective tissue, and fatty infiltration. **p., reflex,** the paralysis sometimes following immediately upon a wound of a nerve, or the paraplegia sometimes due to irritation of an adherent prepuce. Other so-called reflex palsies, as that from renal calculus, are probably due to secondary changes in the spinal cord or nerves. **p., segmental,** that of a segment of a limb produced by hypnotism. **p., sensory,** anesthesia. **p., spastic,** a paralysis associated with rigidity of the muscles and heightened tendon-reflexes. **p., spastic spinal,** lateral sclerosis. **p. spinalis,** paraplegia. **p. vacillans,** chorea. **p., vasomotor,** paralysis of the vasomotor center or of the vasomotor nerves; it leads to dilatation of the blood-vessels. **p., wasting,** progressive muscular atrophy. **p., writers',** writers' cramp.

paralytic (*par-al-it'-ik*). 1. Of the nature of paralysis; affected with paralysis. 2. A person suffering from paralysis; also one suffering from general paralysis of the insane. **p. dementia,** general paresis. **p. flail-joint,** flail-joint the result of paralysis.

paralyzant (*par'-al-i'-zant*) [*paralysis*]. 1. Causing paralysis. 2. An agent or drug that induces paralysis. **p., motor,** a drug paralyzing any part of the motor apparatus: the motor cells of the spinal cord, the motor nerves, or the muscles.

paralyzer (*par'-al-i-zer*). 1. Anything that will produce paralysis. 2. Any agent which will inhibit a chemical reaction.

paralyzing vertigo. See *Gerlier's disease.*

paramagnetic (*par-ah-mag-net'-ik*). Exhibiting a polarity in the same direction as the magnetizing force.

paramagnetism (*par-ah-mag'-net-izm*) [*para-; magnet*]. The phenomena exhibited by paramagnetic substances.

paramastitis (*par-ah-mas-ti'-tis*) [*para-; mastitis*]. Inflammation of the connective tissue about the mamma.

paramastoid (*par-am-as'-toid*) [*para-; mastoid*]. 1. Situated near the mastoid process. 2. The jugular process of the occipital bone.

paramecium (*par-am-e'-se-um*) [*para-; μῆνος*, length: *pl., paramecia*]. A longitudinal fissure.

Paramecium or **Paramœcium** (*par-ah-me'-se-um*). A genus of ciliate protozoa. **P. coli,** a species found in normal and diarrheal stools. Also called *Balantidium coli.*

paramedian (*par-am-e'-de-an*) [*para-; medius*, middle]. Situated near the median line. **p. sulcus,** a fissure present in the cervical portion of the spinal cord, not far from the posterior median fissure, and separating the column of Goll from the funiculus cuneatus.

paramenia (*par-ah-me'-ne-ah*) [*para-; μῆνες*, menses]. Difficult or disordered menstruation

parameningococcus (*par-ah-men-in-go-k ɔk'-us*). A microorganism somewhat similar in appearance to the *Diplococcus intracellularis meningitidis*, but different serologically and biologically.

paramesial (*par-ah-me'-ze-al*) [*para-; μέσος*, middle]. Located near the mesial line.

parametric (*par-ah-met'-rik*) [*parametrium*]. Pertaining to the tissues about the uterus.

parametrism (*par-ah-met'-rizm*) [*parametrium*]. Painful spasm of the smooth muscular fibers of the broad ligament.

parametritic (*par-am-et-rit'-ik*) [*para-*; *μήτρα*, uterus; *ιτις*, inflammation]. Relating to, of the nature of, or affected with, parametritis.

parametritis (*par-ah-met-ri'-tis*) [*parametrium*; *ιτις*, inflammation]. Inflammation of the cellular tissue about the uterus; pelvic cellulitis. **p., anterior,** that in which the inflammation is limited to the loose vesicouterine cellular tissue or that between the symphysis and the bladder. The swelling is anterior, and the pus generally tracks into the bladder, vagina, or inguinal region. **p. chronica atrophicans,** inflammatory hypertrophy of the connective tissue of the pelvis progressing to cicatricial atrophy. **p. chronica posterior,** chronic inflammatory processes in Douglas' folds, causing fixation of the uterus at the level of the internal os and anteflexion by shortening of the folds and torsion of the uterus when only one fold is shortened. **p., remote,** parametritis marked by formation of abscesses in places more or less remote from the focus of the disease.

parametrium (*par-ah-me'-tre-um*) [*para-*; *μήτρα*, womb]. The connective tissue surrounding the uterus.

paramidophenylarsenoxid (*par-am-i-do-fen-il-ar-sen-oks'-id*). A reduction product of atoxyl, to which is due the effects of atoxyl in trypanosomiasis.

paramimia (*par-ah-mim'-e-ah*) [*para-*; *μιμεῖοθαι*, to mimic]. A form of aphasia characterized by the faulty use of gestures.

paramitome (*par-ah-mi'-tōm*) [*para-*; *μίτος*, a thread]. The fluid portion of the cell-substance contained in the meshes of the mitome.

paramnesia (*par-am-ne'-ze-ah*) [*para-*; *amnesia*] Illusion of memory, especially the illusion of feeling, as if one had already undergone the experience which may be passing.

paramœba hominis (*par-am-e'-ba-hom'-in-is*). A species of amœba occasionally found in the feces.

paramœcium. See *paramecium.*

paramonochlorphenol (*par-ah-mon-o-klor-fe'-nol*), $C_6H_4(Cl).OH(1:4)$. A crystalline body obtained by the chlorination of phenol; it is antiseptic and employed in erysipelas, tuberculous diseases of throat, etc., in 5 to 20% solution in glycerol.

paramorphia (*par-am-or'-fe-ah*) [*para-*; *μορφή*, form]. Abnormality of form.

paramorphic (*par-am-or'-fik*) [*para-*; *μορφή*, form]. Pertaining to paramorphism.

paramorphine (*par-ah-mor'-fēn*). See *thebaine.*

paramorphism (*par-am-orf'-izm*) [*para-*; *μορφή*, form]. In chemistry, a variety of pseudomorphism in which there is a change of molecular structure without alteration of external form or chemical constitution.

paramorphosis (*par-am-or-fo'-sis*) [*para-*; *μορφή*, form]. Same as *paramorphism.*

paramucin (*par-ah-mū'-sin*). A colloid isolated from ovarian cysts; it differs from mucin and pseudomucin by reducing Fehling's solution before boiling with acid.

paramusia (*par-ah-mū'-ze-ah*) [*para-*; *μουσική*, music]. A form of aphasia in which there is perversion of the musical sense, resulting in the production of improper notes and intervals.

paramyoclonus multiplex (*par-ah-mi-ok'-lo-nus mul'-tip-leks*). A neurosis marked by sudden, shock-like muscular contractions, which are bilateral and do not, as a rule, affect the hands or face. The etiology is unknown, and the disease is believed to be analogous to chronic adult chorea.

paramyosinogen (*par-ah-mi-o-sin'-o-jen*). One of the proteins of muscle-plasma, coagulating at 47° C.

paramyotonia (*par-ah-mi-o-to'-ne-ah*) [*para-*; *μῦς*, muscle; *τόνος*, tone]. A perversion of muscular tonicity characterized by tonic spasms. It is usually congenital. **p. congenita,** congenital paramyotonia. See *Thomsen's disease.*

paranalgesia (*par-an-al-je'-ze-ah*). See *para-analgesia.*

paranea (*par-an-e'-ah*). Paranoia.

paranephrin (*par-ah-nef'-rin*). A preparation obtained from the suprarenal gland. See also *adrenalin chloride.*

paranephritis (*par-ah-nef-ri'-tis*). 1. Inflammation of the paranephros. 2. Inflammation of the connective tissue about the kidney.

paranephros (*par-ah-nef'-ros*) [*para-*; *νεφρός*, kidney]. The suprarenal capsule.

paranesthesia (*par-an-es-the'-ze-ah*). See *para-anesthesia.*

paraneural (*par-ah-nū'-ral*) [*para-*; *νεῦρον*, nerve]. Beside or near a nerve. **p. analgesia,** analgesia resulting from injection of an analgesic solution into the immediate vicinity of a nerve trunk.

paraneurismus (*par-an-ū-riz'-mus*) [*para-*; *νεῦρον*, nerve]. A nerve disorder, or perversion of nerve-function.

parangi (*par-an'-je*). See *frambesia.*

paranœa (*par-an-e'-ah*). See *paranoia.*

paranoia (*par-ah-noi'-ah*) [*para-*; *νοῦς*, mind]. Mental aberration, especially a chronic disease characterized by systematized delusions.

paranoiac (*par-ah-noi'-ak*) [*paranoia*]. 1. Affected with paranoia. 2. A person who is affected with paranoia; a "crank."

paranoid (*par'-an-oid*). Resembling paranoia.

paranoidism (*par-ah-noi'-dizm*). The condition of a person affected with paranoia.

paranomia (*par-ah-no'-me-ah*) [*para-*; *ὄνομα*, a name]. See *aphasia, optic,* and *a., tactile.*

paranuclear (*par-an-ū'-kle-ar*). Pertaining to the paranucleus.

paranucleate (*par-an-ū'-kle-āt*). Provided with a paranucleus.

paranuclein (*par-ah-nū'-kle-in*). A combination of albumin with metaphosphoric acid, split off from the nucleoalbumins by action of pepsin hydrochloric acid.

paranucleolus (*par-ah-nū-kle'-o-lus*) [*para-*; *nucleolus*]. An irregular body sometimes found inside the nucleus of a cell prior to the division of the latter.

paranucleon (*par-ah-nū'-kle-on*). Phosphocarnic acid, a complex body supposed to constitute the source of muscle energy. It gives rise to lactic acid and CO_2 on hydrolysis.

paranucleoprotein (*par-ah-nū-kle-o-pro'-te-in*). A synonym of *nucleoalbumin.*

paranucleus (*par-ah-nū'-kle-us*) [*para-*; *nucleus*, kernel]. An irregular spherical body lying in the protoplasm of a cell near the nucleus and perhaps extruded by the latter.

paraomphalic (*par-ah-om-fal'-ik*). Near the navel; paraumbilical.

paraoperative (*par-ah-op'-er-a-tiv*). Pertaining to all the details of the accessories of an operation, such as the care of the patient, the operating room, instruments, asepsis, dressings, ligatures, etc.

paraoxyethylacetanilide (*par-ah-oks-e-eth-il-as-et-an'-il-id*). Acetphenetidin.

parapancreatic (*par-ah-pan-kre-at'-ik*). Situated beside or near the pancreas. **p. abscess,** an abscess in the tissue alongside of the pancreas.

paraparesis (*par-ah-par'-es-is*, or *par-ah-par-e'-sis*). Partial paralysis of the lower extremities.

paraparetic (*par-ap-ar-et'-ik*) [*para-; paresis*]. Pertaining to, or affected with, paraparesis.

paraparisol (*par-ah-par'-is-ol*). An antiseptic preparation similar to parisol, *q. v.*

parapathia (*par-ap-ath'-e-ah*) [*para-; πάθος*, affection]. Moral insanity.

parapedesis (*par-ah-ped-e'-sis*) [*para-; πέδησις*, a bending]. Passage of any secretion or excretion through other than the normal channel.

parapeptone (*par-ah-pep'-tōn*). See *peptone.*

paraperitoneal (*par-ah-per-it-o-ne'-al*). Situated near the peritoneum.

parapestis (*par-ah-pes'-tis*). Pestis minor.

paraphasia (*par-ah-fa'-ze-ah*) [*para-; φάσις*, speech]. A form of aphasia in which there is inability to connect ideas with the proper words to express the ideas.

paraphasic (*par-ah-fa'-sik*). Pertaining to paraphasia.

paraphemia (*par-ah-fe'-me-ah*) [*para-; φήμη*, speech]. Paraphasia in which the same words are often used wrongly.

paraphenetolcarbamide (*par-ah-fe-net-ol-kar'-bam-id*). Sucrol.

paraphenylendiamine (*par-ah-fen-il-en-di'-am-in*), $C_6H_4N_2$. A crystalline substance obtained by the nitration of acetanilide and reduction with tin and hydrochloric acid. It is used in the manufacture of certain hair-dyes, and gives rise to eczema of the scalp and eyelids, or poisoning marked by vomiting, diarrhea, etc.

paraphia (*par-af'-e-ah*) [*para-; ἁφή*, touch]. Abnormality of the sense of touch.

paraphimosis (*par-ah-fi-mo'-sis*). 1. Retraction and constriction of the prepuce behind the glans penis. 2. Retraction of the eyelid behind the eyeball.

paraphobia (*par-ah-fo'-be-ah*) [*para-; φόβος*, fear]. A slight degree of phobia.

paraphonia (*par-ah-fo'-ne-ah*) [*para-; φωνή*, voice]. Any abnormal condition of the voice. **p. clangens,** shrillness of the voice. **p. puberum, p. pubescentium,** the harsh, deep, irregular voice noticed in boys at puberty.

paraphora (*par-af'-o-rah*) [*παραφορά*, wandering] 1. Slight mental derangement or distraction. 2. Unsteadiness due to intoxication.

paraphrasia (*par-ah-fra'-ze-ah*) [*para-; φράσις*, utterance]. A form of aphasia characterized by incoherence of speech. **p. præceps,** precipitant utterance of incoherent speech. **p. tarda,** abnormal delay in the expression of thoughts. **p. verbalis,** the interpolation of an inappropriate word. **p. vesana,** jumbling of words and ideas.

paraphrenesis (*par-af-ren-e'-sis*) [*para-; φρήν*, mind]. Amentia; delirium, or insanity.

paraphrenia, paraphrenitis (*par-ah-fre'-ne-ah, par-ah-fren-i'-tis*) [*para-; φρήν*, mind; diaphragm]. 1. Delirium; a mental disease. 2. Inflammation of the diaphragm.

paraphrenitis (*par-ah-fre-ni'-tis*) [*para-; φρήν*, diaphragm; *itis*, inflammation]. Inflammation of the tissues adjacent to the diaphragm.

paraphronesis (*par-af-ro-ne'-sis*) [*para-; φρήν*, mind]. Insanity.

paraphysis (*par-af'-is-is*) [*para-; φύειν*, to produce: *pl.*, *paraphyses*]. 1. In biology, sterile filaments among reproductive bodies of various kinds in certain cryptogams. 2. A mesal outgrowth from the roof of the brain cephalad of the epiphysis or conarium.

paraphyton (*par-ah-fi'-ton*) [*para-; φύτον*, a plant]. A vegetable parasite.

paraplasm (*par'-ah-plazm*) [*para-; πλάσμα*, a thing formed]. 1. The fluid substance in the meshes of the cell-protoplasm. 2. A heteroplasm or false growth.

paraplast (*par'-ah-plast*). A proprietary plaster mass.

paraplastic (*par-ah-plas'-tik*) [*paraplasm*]. 1. Of the nature of paraplasm. 2. Having morbid formative powers. 3. Mis-shapen. **p. formations,** the contractile substance of the muscular fibrils, the nervous fibers, and the red blood-corpuscles.

paraplectic (*par-ap-lek'-tik*) [*para-; πληγή*, a stroke]. Stricken with paraplegia.

paraplegia (*par-ah-ple'-je-ah*) [*para-; πληγή*, stroke]. Paralysis of the lower half of the body or of the lower extremities. **p., ataxic** a disease characterized clinically by a combination of ataxia and exaggerated tendon-reflexes, and anatomically by sclerosis of the posterior and lateral columns of the cord. **p. diabetica,** a peripheral paralysis of the extensor muscles of the feet in diabetic subjects. It differs from tabes in absence of disturbance of coordination and sensibility. **p. dolorosa,** painful pressure-paraplegia due to neoplasms in the spinal cord. **p., ideal,** reflex paraplegia due to emotion. **p., infantile spasmodic,** a spastic paralysis coming on in early childhood, and usually dependent on a cerebral lesion with failure of proper development or secondary sclerosis of the motor tracts of the spinal cord. The causes are injuries during birth, intrauterine cerebral inflammation, or anomalies of brain-development. Syn., *birth-palsy; spasmodic tabes dorsalis; spastic cerebral paraplegia.* **p., Pott's,** paralysis of the lower extremities due to pressure on the spine in Pott's disease. **p., simplex senilis,** that dependent upon disturbed nutrition of the cortex, causing, in advanced age, paralysis of the legs without muscular atrophy. **p., spastic,** lateral sclerosis. **p., tetanoid,** lateral sclerosis.

paraplegic (*par-ah-ple'-jik*) [*paraplegia*]. Pertaining to, or affected with, paraplegia.

paraplegiform (*par-ah-ple'-je-form*). Resembling paraplegia.

parapleuritis (*par-ah-ploo-ri'-tis*). 1. Pleurodynia. 2. A slight degree of pleuritis. 3. Inflammation of the wall of the chest.

paraplexus (*par-ap-leks'-us*) [*para-; plexus*, a braid]. The choroid plexus of the paracele or lateral ventricle of the brain.

parapneumonia (*par-ah-nū-mo'-ne-ah*). A disease presenting the symptom of lobar pneumonia, but not due to the pneumococcus.

parapophysis (*par-ap-off'-is-is*) [*para-; ἀπόφυσις*, offshoot]. In comparative anatomy, the process homologous to the lower process of a vertebra.

parapoplexy (*par-ap'-o-pleks-e*) [*para-; apoplexy*]. A masked or slight form of apoplexy.

parapraxia (*par-ah-praks'-e-ah*) [*para-; πράξις*, a doing]. A condition in which certain intentional acts are imperfectly accomplished.

paraproctitis (*par-ah-prok-it'-is*). Inflammation of the connective tissue about the rectum.

paraproctium (*par-ap-rok'-te-um*) [*para-; πρωκτός*, anus]. The connective tissue that surrounds the rectum.

paraprostatitis (*par-ah-pros-ta-ti'-tis*) [*para-; prostate*]. Inflammation of tissues surrounding or in the neighborhood of the prostate gland.

parapsis (*par-ap'-sis*) [*para-; ἅψις*, a touching]. Perversion of the sense of touch.

parapsori asis (*par-ah-so-ri'-as-is*). A group of skin lesions whose sole characteristic is that they are scaly.

parapyknomorphous (*par-ah-pik-no-mor'-fus*) [*para-; πυκνός*, thick; *μορφή*, form]. A term applied to nerve-cells in which the arrangement of the stainable portion of cell-body is intermediate between that of pyknomorphous and apyknomorphous cells.

paraqueduct (*par-ak'-we-duct*) [*para-; aqueduct*]. The lateral portion of the aquæductus cerebri.

pararectal (*par-ar-ek'-tal*) [*para-; rectum*]. Beside or near the rectum. **p. pouch**, a peritoneal depression behind the broad ligament and beside the rectum.

parareducine (*par-ah-re-dū'-sēn*) [*para-; reducere*, to lead back]. A leukomaine found in conjunction with reducine in the urine.

pararegulin (*par-ah-reg'-ū-lin*). A proprietary laxative said to be composed of paraffin and cascara sagrada.

pararhotacism (*par-ah-ro'-tas-izm*) See *rhotacism*.

pararhythmus (*par-ar-ith'-mus*) [*para-; rhythm*]. Disturbed rhythm.

pararosaniline (*par-ah-ro-zan'-il-en*). Parafuchsin.

pararthrema, pararthresis (*par-ar-thre'-mah, par-ar-thre'-sis*) [*para-; ἄρθρον*, joint]. Subluxation.

pararthria (*par-ar'-thre-ah*) [*para-; ἄρθρον*, articulation]. A disorder of articulate speech.

parasacral (*par-ah-sa'-kral*). Beside or near the sacrum. **p. analgesia**, analgesia induced by injection of a solution into the intervertebral foramina of the lower dorsal or iliohypogastric or ilioinguinal nerves.

parasalpingitis (*par-ah-sal-pin-ji'-tis*). Inflammation of the tissues around an oviduct.

parasecretion (*par-as-e-kre'-shun*) [*para-; secernere*, to secrete]. Any abnormality of secretion; any substance abnormally secreted.

paraserum reaction (*par-ah-se'-rum*). Paragglutination.

parasigmatism (*par-ah-sig'-mat-izm*) [*para-; σίγμα*, the Greek letter ς]. The inability to pronounce "*s*" or "*sh*," another letter, as "*f*," being substituted.

parasinoidal (*par-ah-sin-oi'-dal*) [*para-; sinus*]. Lying near or along a cerebral sinus. **p. spaces**, the expansion of the cerebral veins just before emptying into the superior longitudinal sinus.

parasite (*par'-ah-sīt*) [*para-; σῖτος*, food]. 1. An animal or vegetable living upon or within another organism, termed the host. 2. In teratology, a fetus or fetal parts attached to or included in another fetus; an autosite. **p., autochthonous**, a parasite which is descended from the tissues of the host. **p., endophytic**, one living within the tissues of its host. **p., epiphytic**, one living on the surface. **p., facultative**, one usually parasitic, but able to live alone. **p., incidental**, one which generally lives on another than its present host. **p., obligate**, one that dies without its host. **p., specific**, one which always lives on its present host.

parasitic (*par-ah-sit'-ik*) [*parasite*]. 1. Of the nature of a parasite; living upon or in an animal or vegetable, as *parasitic* bacteria, *parasitic* worms. 2. Caused by parasites, as *parasitic* skin diseases.

parasiticide (*par-ah-sit'-is-id*) [*parasite; cædere*, to kill]. 1. Destructive to parasites. 2. An agent capable of destroying parasites, especially the parasites living upon or in the skin.

parasitifer (*par-ah-sit'-if-er*) [*parasite; φέρειν*, to bear]. The host of a parasite.

parasitism (*par'-ah-si-tizm*) [*parasite*]. Relation a parasite bears to its host; infested by parasites.

parasitize (*par'-as-it-īz*) [*para-; σῖτος*, food]. To infest; the act of one organism becoming parasitic within or upon another.

parasitogenesis (*par-as-it-o-jen'-es-is*) [*para-; σῖτος*, food; *γένεσις*, genesis]. 1. The formation of parasites. 2. A bodily condition favoring the development of parasites.

parasitogenic (*par-ah-si-to-jen'-ik*). Parasitogenetic.

parasitogenetic (*par-ah-si-to-jen-et'-ik*) [*parasite; γεννᾶν*, to beget]. 1. Produced by parasites; depending for its origin upon parasites. 2. Favoring parasitism.

parasitologist (*par-as-it-ol'-o-jist*). One versed in parasitology.

parasitology (*par-ah-si-tol'-o-je*) [*parasite; λόγος*, science]. The study of parasites.

parasitophobia (*par-ah-si-to-fo'-be-ah*) [*parasite; φόβος*, fear]. Morbid dread of parasites.

parasitosis (*par-as-it-o'-sis*) [*para-; σῖτος*, food; *νόσος*, disease]. Any disease dependent upon the presence of parasites. The development of a parasitic disease.

parasitotrope, parasitotropic (*par-ah-si'-to-trōp, par-ah-si-to-trop'-ik*). A substance in the blood with a special affinity for parasites.

parasitotropic (*par-ah-si-to-trop'-ik*) [*parasite; τρόπος*, a turn]. Pertaining to a substance which is attracted by a (micro-) parasite.

parasitotropy (*par-ah-si-tot'-ro-pe*) Combining affinity which exists between certain parasites and chemical agents.

parasmallpox (*par-ah-small-pox*). Alastrim.

parasoma (*par-ah-so'-mah*) [*para-; σῶμα*, body]. An irregular body found in cell-protoplasm and situated near the nucleus.

paraspadia (*par-ah-spa'-de-ah*) [*para-; σπάειν*, to draw]. A condition in which the urethra opens on one side of the penis.

paraspasm (*par'-ah-spazm*). 1. Spasm involving both lower extremities. 2. Spastic paraplegia.

paraspecific (*par-ah-spes-if'-ik*). Possessing properties other than the specific one.

parastata (*par-as'-tat-ah*) [*para-; ἱστάναι*, to stand]. 1. The epididymis. 2. The prostate gland. **p. adenoides**, the prostate. **p. cirsoides**, the epididymis. **p. glandulosa**, the prostate. **p. varicosa** (1) the epididymis; (2) Fallopian tube.

parastatadenitis (*par-as-tat-ad-en-i'-tis*). 1. Epididymitis. 2 Prostatitis.

parastatitis (*par-as-tat-i'-tis*). 1. Epididymitis. 2. Prostatitis.

parasteatosis (*par-as-te-at-o'-sis*) [*para-; στέαρ*, a hard fat]. An altered condition of the sebaceous secretion.

parasternal (*par-ah-ster-nal*) [*para-; sternum*]. Beside or near the sternum. **p. line**, an imaginary vertical line midway between the margin of the sternum and the line passing through the nipple. **p. region**, the region between the sternal margin and the parasternal line.

parasthenia (*par-as-the'-ne-ah*) [*para-; σθένος*, strength]. Condition characterised by functioning of tissue at abnormal times.

parastramnia, parastremma (*par-as-tram'-ne-ah, par-as-trem'-ah*) [*παραστρέφειν*, to twist]. Distortion of the mouth or face.

parastruma (*par-ah-stru'-mah*) .A goiter-like tumor due to enlargement of a parathyroid gland.

parasympathetic system (*par-ah-sim-path-et'-ik*). The autonomic nervous system.

parasynapsis (*par-ah-sin-ap'-sis*) [*para-*; συναπτειν, to unite]. The union of chromosomes side by side. Cf. *telosynapsis*.

parasynovitis (*par-ah-sin-o-vi'-tis*). Inflammation of the structures about a joint.

parasyphilis, parasyphilosis (*par-ah-sif'-il-is, -sif-il-o'-sis*). A series of morbid manifestations not having the anatomicopathological characteristics of syphilis, but apparently of syphilitic origin.; *e. g.* tabes, general paralysis, etc

parasyphilitic (*par-as-if-il-it'-ik*) [*para-*; *syphilis*]. Pertaining to parasyphilis q.v.

parasystole (*par-as-is'-to-le*) [*para-*; *systole*]. 1. The interval between the cardiac systole and the diastole. 2. Such an interval when it is abnormally prolonged.

paratarsium (*par-ah-tar'-se-um*) [*para-*; *tarsus*]. The covering and connecting tissues of the tarsus of the foot.

parateresiomania (*par-at-er-es-e-o-ma'-ne-ah*) [παρατήρησις, observation; μανία, madness]. A mania for observing, or seeing new sights.

parathelioma (*par-ah-the-le-o'-mah*) [*para-*; θηλή, nipple; ὄμα, a tumor]. A tumor located near the nipple.

parathenar (*par-ath-e'-nar*) [*para-*; θέναρ, the sole of the foot]. Applied to the abductor and flexor brevis muscles of the little toe.

parathormone (*par-ah-thor'-mōn*) [*parathyroid, hormone*]. A hormone derived from the parathyroids.

parathymia (*par-ath-i'-me-ah*) [*para-*; θυμός, mind]. Mental strain, or overwork.

parathyrine (*par-ah-thi'-rēn*) [*para-*; *thyroid*]. The active principle of the parathyroid glands.

parathyroid (*par-ah-thi'-roid*). 1. Lying beside the thyroid gland. 2. An accessory thyroid gland.

parathyroidectomy (*pra-ah-thi-roid-ek'-to-me*) [*para-*; *thyroid*; ἐκτομή, an excision]. Excision of a parathyroid gland.

parathyroidin (*par-ah-thi-roi'-din*). Trade preparation made from the parathyroid glands.

parathyroprivic (*par-ah-thi-ro-priv'-ik*) [*parathyroid*; *privus*, deprived of]. Pertaining to the condition due to loss of function of or removal of the parathyroid glands.

paratoloid (*par-at'-o-loid*). A name given to the fluid used by Koch in the treatment of tuberculosis; tuberculin.

paratonia (*par-ah-to'-ne-ah*) [*para-*; τόνος, tension]. 1. Overextension; excessive tension. 2. A form of paralysis in which there is hypertonia of certain groups of muscles with hypotonia of their antagonists.

paratony (*par-at'-on-e*). See *paratonia*.

paratophan (*par-at'-o-fan*). Trade name of an atophan derivative; said to be tasteless.

paratopia (*par-at-o'-pe-ah*) [*para-*; τόπος, place]. Displacement.

paratoxin (*par-ah-toks'-in*). A bile preparation containing cholesterin, but without bile-pigments; it has been used in tuberculosis

paratrichosis (*par-ah-trik-o'-sis*) [*para-*; θρίξ, hair]. A condition in which the hair is either imperfect in growth or develops in abnormal places.

paratrimma (*par-ah-trim'-ah*) [*para-*; τρίβειν, to rub]. Intertrigo.

paratripsis (*par-at-rip'-sis*) [*para-*; τρίβειν, to rub]. 1. A rubbing. 2. A retardation of waste.

paratriptic (*par-at-rip'-tik*) [*para-*; τρίβειν, to rub]. 1. Rubbing together. 2. Retarding waste.

paratrope (*par-at'-ro-pe*) [*para-*; τρέπειν, to turn]. Twisting of a limb.

paratrophic (*par-at-rof'-ik*) [*para-*; τρόφη, nourishment]. Parasitic; obtaining nourishment from living organic matter.

paratrophy (*par-at'-ro-fe*) [*para-*; τροφή, nutrition]. 1. Perverted or abnormal nutrition; hypertrophy. 2. Adiposis dolorosa.

paratuberculosis (*par-ah-tū-ber-kū-lo'-sis*). A disease with symptoms similar to tuberculosis, but in which the tubercle bacillus cannot be found.

paratuberculous (*par-ah-tū-ber'-kū-lus*). Pertaining to paratuberculosis.

paratyphilitis (*par-ah-tif-il'-tis*). Inflammation of the connective tissue behind the cecum.

paratyphoid (*par-ah-ti'-foid*). An affection produced by the paracolon bacillus, presenting all the characteristic symptoms of typhoid, but in which the Widal reaction is negative; the serums, however, react promptly to other bacteria of the colon-typhoid group, which may be isolated from the blood or from the excrement.

paratyphus (*par-ah-ti'-fus*). Synonym of *paratyphoid*.

paratypical, paratypicus (*par-ah-tip'-ik-al, -us*). Irregular; not typical in character.

paraumbilical (*par-ah-um-bil-ik-al*) [*para-*; *umbilicus*]. Near the navel.

paraundulant fever (*par-ah-un'-dū-lant*). A fever similar to undulant (or Mediterranean) fever, but of a milder or abnormal type.

paraurethral (*par-ah-ū-re'-thral*). Beside the urethra.

paravaginal (*par-ah-vaj'-in-al*). Beside the vagina;

paravaginitis (*par-av-aj-in-i'-tis*) [*para-*; *vagina*. ιτις, inflammation]. Inflammation of the connective tissue surrounding the vagina.

paravertebral (*par-av-er'-te-bral*) [*para-*; *vertebra*]. Situated near the spinal column. **p. analgesia**, analgesia induced by injection of a fluid into the intervertebral foramina of the lower dorsal or iliohypogastric or ilioinguinal nerves.

paravesical (*par-av-es'-ik-al*) [*para-*; *vesica*, bladder]. Situated near the urinary bladder. **p. pouch**, the peritoneal pocket on either side of the bladder.

paraxanthine (*par-ah-zan'-thin*) [*para-*; *xanthine*], $C_7H_8N_4O_2$. Dimethylxanthine, a crystalline leukomaine occurring in normal urine and isomeric with theobromine, which it resembles in its action upon the organism, producing muscular rigidity, dyspnea, and diminution in reflex excitability.

paraxial (*par-aks'-e-al*) [*para-*; *axis*]. Lying near the axis of the body.

paraxon (*par-aks'-on*) [*para-*; *axon*]. A lateral branch of the axis-cylinder process of a nerve-cell; a collateral fiber.

parazoon (*par-ah-zo'-on*) [*para-*; ζῶον, an animal] An organism parasitic upon an animal; an ectoparasite.

parazygosis (*par-az-i-go'-sis*) [*para-*; ζυγεῖν, to yoke]. The condition of a double monster in which there is union of the trunks above the umbilicus. It includes xiphopagus, thoracopagus, and pleuropagus.

parchment-crackling. The peculiar sound elicited by pressure on the cranial bones in children the subjects of rickets and congenital syphilis. It is due to a localized hypertrophy of the bones.

parchment-induration. A form of chancre, or primary lesion of syphilis, in which the induration is parchment-like in feel.

parchment-skin. See *xeroderma.*

parecceloma (*par-ek-se-lo'-mah*) [*para-*; ἐκ, out κοῖλος, hollow]. A cavity produced by disease;

pareccrisis (*par-ek'-rĭs-ĭs*) [*para-*; ἐκ, out; κρίνειν, to separate]. A disorder of a secretion.

parecious, parœcious (*par-e'-she-us*) [*para-*; οἶκος, house]. In biology, having male and female organs developed side by side.

parectama (*par-ek'-tam-ah*). Syn. *c pareciasis.*

parectasis (*par-ek'-ta-sĭs*) [*para-*; ἔκτασις, a stretching out]. Excessive stretching or dilatation.

paregoric (*par-e-gor'-ik*) [παρηγορικός, soothing]. 1. Soothing or assuaging. 2. A soothing remedy, as *paregoric elixir*, or paregoric, the *tinctura opii camphorata* (U. S. P.).

pareira (*par-a'-rah*). The root of *Chondrodendron tomentosum*, of the natural order *Menispermaceæ*. It was formerly called *pareira brava*. It contains a resin, an alkaloid, *pelosine*, identical with berberine, a bitter principle, a nitrogenous substance, calcium malate, potassium nitrate, and other salts. **p., decoction of** (*decoctum pareiræ*, B. P.). Dose 1–2 oz. (32–64 Cc.). **p., extract of** (*extractum pareiræ*, B. P.). Dose 10–20 gr. (0.65–1.3 Gm.). **p., fluidextract of** (*fluidextractum pareiræ*, U. S. P.). Dose ½–1 dr. (2–4 Cc.). **p., liquid extract of** (*extractum pareiræ liquidum*, B. P.). Dose 1 dr. (4 Cc.).

parelectronomic (*par-e-lek-tro-nom'-ik*) [*para-*; ἤλεκτρον, amber; νόμος, law]. Unresponsive to electromotive stimulus.

parelectronomy (*par-e-lek-tron'-o-me*) [*para-*; ἤλεκτρον, amber; νόμος, law]. The electric condition of a transverse section of a muscle and its tendon, compared with that of the natural surface of the muscle. The former is negative, the latter positive.

paremptosis (*par-emp-to'-sis*) [*para-*; ἐμπίπτειν, to sink in]. 1. Dislocation. 2. A form of amaurosis.

parencephalia (*par-en-sef-a'-le-ah*)[*para-*; ἐγκέφαλος, brain]. Congenital malformation of the brain.

parencephalis (*par-en-sef'-al-ĭs*). See *parencephalon.*

parencephalitis (*par-en-sef-al-ī'-tĭs*). Inflammation of the cerebellum.

parencephalocele (*par-en-sef-al'-o-sēl*) [*para-*; ἐγκέφαλος, brain; κήλη, hernia]. Hernia of the parencephalon.

parencephalon (*par-en-sef'-al-on*) [*para-*; ἐγκέφαλος, brain]. The cerebellum.

parencephalous (*par-en-sef'-al-us*). Pertaining to (1) parencephalia, or (2) parencephalon, or (3) parencephalus.

parencephalus (*par-en-sef'-al-us*) [see *parencephalon*]. One with congenital malformation of the brain.

parenchyma (*par-eng'-kim-ah*) [*para-*; ἐγχεῖν, to pour in]. The essential or specialized part of an organ as distinguished from the supporting connective tissue.

parenchymal (*par-eng'-kim-al*). Pertaining to, or of the nature of, parenchyma.

parenchymatic (*par-eng-kim-at'-ik*). Parenchymatous.

parenchymatitis (*par-eng-ki-mat-ī'-tis*) [*parenchyma*; ῖτις, inflammation]. Inflammation of parenchyma.

parenchymatous (*par-eng-ki'-mat-us* or *par-eng-kim'-at-us*) [*parenchyma*]. Pertaining to or affecting the parenchyma. **p. degeneration,** cloudy swelling. **p. inflammation,** inflammation of the parenchyma, as distinguished from that of the interstitial tissue.

parenchymula (*par-eng-ki'-mū-lah*) [dim. of *parenchyma*; *pl.*, *parenchymulæ*]. The embryonic stage immediately succeeding that of the closed blastula. Synonym of *Metschnikoff's larva.*

parenol (*par'-en-ol*). A stable emulsion of soft paraffin, which is non-irritant and is readily absorbed by the skin.

parenteral (*par-en'-ter-al*) [*para-*; ἔντερον, intestine]. Outside of the intestine. **p. digestion,** digestion or dissolving of foreign proteins or other substances by the cells of the body, opposed to *enteral digestion* which occurs in the alimentary canal.

parepicele (*par-ep'-ĭs-ēl*) [*para-*; ἐπί, upon; κοῖλος, hollow]. The lateral recess of the epicele or fourth ventricle extending latero-ventrad.

parepididymal (*par-ep-id-id'-im-al*). Pertaining to the parepididymis.

parepididymis (*par-ep-id-id'-im-is*). *Paradidymis.*

parepithymia (*par-ep-ith-ī'-me-ah*) [*para-*; ἐπιθυμία, desire]. A morbid or depraved desire or habit.

parerethisis (*par-er-eth'-is-ĭs*) [*para-*; ἐριθίζειν, to excite]. Abnormal excitement, or stimulus,

parerethism (*par-er'-eth-izm*). See *parerethisis.*

paresis (*par'-es-ĭs*) [*para-*; ἱέναι, to let go]. A slight paralysis; incomplete loss of muscular power. **p., general.** See *paralysis, general, of the insane.*

paresoanalgesia (*par-es-o-an-al-je'-se-ah*) [*paresis; analgesia*]. Paresis with analgesia; a symptom of Morvan's disease.

paresthesia (*par-es-the'-ze-ah*) [*para-*; αἴσθησις, sensation]. 1. Morbid or perverted sensation, as numbness, formication, "pins-and-needles." 2. See *acroparesthesia.*

paresthetic (*par-es-thet'-ik*) [*paresthesia*]. Pertaining to, affected with paresthesia.

paretic (*par-et'-ik*) [*paresis*]. Pertaining to or affected with paresis. **p. dement,** a person suffering from paretic dementia. **p. dementia.** See *paralysis, general, of the insane.*

pareunia (*par-oo'-ne-ah*) [*para-*; εὐνή, a bed]. Coitus.

parfocal (*par-fo'-kal*). A term used to designate microscopic oculars and objectives which are so constructed or so mounted that in changing from one to another the image will remain in focus.

parhedonia (*par-he-do'-ne-ah*) [*para-*; ἡδονή, pleasure]. Freud's term for sexual abnormalities, such as exhibitionism, morbid desire to see or touch the sexual organs of one's self or another.

parhidrosis (*par-hid-ro'-sis*). Same as *paridrosis.*

parhormone (*par-hor'-mōn*) [*para-*; *hormone*]. Waste matter of tissues which is supposed to have an action similar to that of a hormone.

paricine (*par'-is-ēn*) [*par*, equal; *cinchona*], $C_{18}H_{18}N_2O$. An amorphous alkaloid of the cinchonas.

paridrosis (*par-id-ro'-sis*) [*para-*; ἱδρως, sweat]. Any abnormal condition of the secretion of sweat.

paries (*par'-e-ēz*) [*paries*, a wall: *pl.*, *parietes*]. An enveloping or investing structure or wall. **p. anterior,** anterior wall. **p. carotica tympani,** carotid or anterior wall of the tympanic cavity. **p. jugularis tympani,** the jugular wall or floor of the tympanic cavity. **p. inferior,** inferior wall. **p. labyrinthica tympani,** labyrinthic or inner wall of the tympanic cavity. **p. lateralis,** lateral wall. **p. mastoidea tympani,** the mastoid or posterior wall of the tympanic cavity. **p. medialis,** the medial wall. **p. membranacea tympani,** the membranous or outer wall of the tympanic cavity. **p. posterior,** posterior wall. **p. superior,** superior wall. **p. tegmentalis tympani,** the tegmental wall of the tympanic cavity.

parietal (*par-i'-et-al*) [*paries*, wall]. 1. Forming or situated on a wall, as the *parietal* layer of the peritoneum. 2. Pertaining to or in relation with the parietal bone of the skull, as the *parietal* foramen, *parietal* lobe of the brain. **p. angle.** See under *Broca, Lsssauer,* and *Quatrefages.* **p. angle, posterior,** in craniometry, that included between two lines tangent to the parietal eminence and the most prominent points of the zygomatic arch. **p. bones.** See *bones, table of.* **p. cells,** cells found in the periphery of the peptic glands of the stomach, immediately beneath the basement-membrane. Their function is supposed to be the secretion of hydrochloric acid. **p. lobe,** the cerebral lobe above the horizontal Sylvian fissure. **p. section,** a transverse vertical section through the ascending parietal convolution.

parietale (*par-i-et-a'-le*) [*parietalis*, belonging to walls]. One of the parietal bones.

parietalia (*par-i-et-a'-le-ah*) [see *parietal*]. The bones that collectively form the vault of the cranium.

parieten (*par-i'-et-en*) [*paries*, wall]. Belonging to the parietal bone in itself.

parietes (*par-i'-et-ēz*) [pl. of *paries*, a wall]. The walls of a cavity.

parieto- (*par-i-et-o-*) [*parietal*]. A prefix meaning relating to the parietal bone.

parietofrontal (*par-i'-et-o-frun'-tal*) [*paries*, a wall; *frons*, front]. Of, pertaining to, or representing both the parietal and frontal bones; frontoparietal.

parietomastoid (*par-i-et-o-mas'-toid*) [*paries*, a wall; *mastoid*]. Pertaining to the parietal bone and the mastoid process of the temporal bone; mastoparietal.

parieto-occipital (*par-i-et-o-ok-sip'-it-al*) [*parieto-; occipital*]. Pertaining to the parietal and occipital bones or lobes.

parietosphenoid (*par-i-et-o-sfe'-noid*) [*parieto-; sphenoid*]. Pertaining to the parietal and sphenoid bones.

parietosplanchnic (*par-i-et-o-splangk'-nik*) [*paries*, a wall; *σπλάγχνα*, viscera]. Of or pertaining to the walls of the alimentary canal, as the nervous ganglia of certain molluscs.

parietosquamosal (*par-i-et-o-skwa-mo'-sal*) [*parieto-; squamosal*]. Of or pertaining to the parietal bone and the squamous portion of the temporal bone. **p. suture,** a suture between the squamous portion of the temporal bone and the parietal bone.

parietotemporal (*par-i-et-o-tem'-po-ral*) [*parieto-; temporal*]. Pertaining to the parietal and temporal bones. **p. suture,** the suture between the parietal and temporal bones.

parietovisceral (*par-i-et-o-vis'-er-al*) [*parieto-; visceral*]. Pertaining to the walls of a body-cavity and the contained viscera.

parigenin (*par-ij'-en-in*). See *parillin.*

pariglin (*par'-ig-lin*). See *smilacin* (2).

parillin (*par-il'-in*) [*parilla*, dim. of *parra*, a trained vine]. A glucoside obtained from sarsaparilla; if treated by dilute mineral acids it yields *parigenin* and sugar.

Parinaud's conjunctivitis (*par-en-o'*) [Henri *Parinaud*, French ophthalmologist, 1844–1905]. A severe form of mucopurulent conjunctivitis due to infection from animals. **P.'s ophthalmoplegia,** paralysis of the external rectus of one side and spasm of the internal rectus of the other side; it is of peripheral origin.

Paris' disease. Acrodynia.

Paris green (*par'-is*), $Cu(C_2H_3O_2)_2.3Cu(AsO_2)_2$. Copper acetoarsenite, a poisonous substance used in the arts and for the destruction of the potato-bug.

parisol (*par'-is-ol*). Formaldehyde in an alcoholic soap solution.

paristhmia (*par-ist'-me-ah*) [*para-; ἰσθμός*, throat]. The tonsils.

paristhmic (*par-ist'-mik*) [*para-; ἰσθμός*, throat]. Relating to the tonsils.

paristhmion (*par-isth'-me-on*) [*para-; ἰσθμός*, throat]. A tonsil.

paristhmitis (*par-ist-mi'-tis*) [*para-; ἰσθμός*, throat; *ῖτις*, inflammation]. Tonsillitis.

Parish's camphor mixture (*par'-ish*). Mistura camphoræ aromatica (N. F.). **P.'s syrup,** compound syrup of ferrous phosphate.

parity (*par'-it-e*) [1. *par*, equal]. Equality. 2. [*parere*, to bring forth]. The condition of being able to bear children.

Park's aneurysm [Henry *Park*, English surgeon, 1745–1831]. Arteriovenous aneurysm, the arterial dilatation communicating with two contiguous veins.

Parker's fluid (*par'-ker*) [George Howard *Parker*, American zoologist, 1864–]. Formaldehyde 1 part in 100 of 70% alcohol; used for hardening tissues.

parkesin (*park'-es-in*). A mixture of linseed-oil and chlorine sulphide in a solution of collodion in nitrobenzol. It is used as a substitute for caoutchouc.

Parkinson's disease (*par'-kin-sun*) [James *Parkinson*, English physician, 1755–1824]. Paralysis agitans. **P.'s facies** or **mask,** in paralysis agitans the face is expressionless, "wooden;" movements of the lips slow; eyebrows elevated.

Park-Williams bacillus [William Hallock *Park*, American bacteriologist, 1863– ; Anna Wessels *Williams*, American bacteriologist]. A strain of diphtheria bacillus from which the antitoxin is made.

Parnum's test for albumin. Add to the filtered urine one-sixth of its volume of a concentrated solution of magnesium or sodium sulphate. On acidulating with acetic acid and boiling, the albumin is precipitated.

paroarium, paroarion (*par-o-a'-re-um, par-o-a'-re-on*) [*para-; ᾠάριον*, dim. of *ᾠόν*, egg]. Same as *parovarium.*

paroccipital (*par-ok-sip'-it-al*). 1. Beside the occipital region. 2. The mastoid process.

parodinia (*par-o-din'-e-ah*). See *parodynia.*

parodontid (*par-o-don'-tid*). Epulis.

parodontis (*par-o-don'-tis*). Synonym of *epulis.*

parodontitis (*par-o-don-ti'-tis*) [*para-; ὀδούς*, a tooth; *ῖτις*, inflammation]. Inflammation of the tissues surrounding a tooth.

parodynia (*par-o-din'-e-ah*) [*parere*, to bring forth; *ὀδύνη*, pain]. Difficult parturition; dystocia.

parogen (*par'-o-jen*). A preparation used as a basis for ointments and liniments, said to contain liquid paraffin, 40 parts, oleic acid, 40 parts, and 5% ammoniated alcohol, 20 parts.

paroleine (*par-o'-le-in*). Trade name of a preparation of petroleum oil, used as a solvent and vehicle.

parolivary (*par-ol'-iv-a-re*) [*para-; oliva*, olive]. Situated near the olivary body. **p. body.** See *nucleus, olivary, accessory.*

parolive (*par-ol'-iv*). An accessory olive.

paromphalocele (*par-om-fal'-o-sēl*) [*para-; ὀμφαλός*, navel; *κήλη*, tumor]. Hernia in the region of the navel.

paroniria (*par-o-ni'-re-ah*) [*para-*; ὄνειρος, dream]. Depraved or morbid dreaming. **p. ambulans,** sleep walking. **p. salax,** restlessness with nocturnal emissions and lascivious dreams.

paronychia (*par-o-nik'-e-ah*) [*para-*; *onychia*]. Whitlow, felon, panaris. Superficial or deep septic inflammation about the margin and base of a nail. **p. tendinosa,** inflammation of the flexor tendons and tendinous sheaths of fingers.

paronychial (*par-o-nik'-e-al*). Having the character of paronychia.

paronychosis (*par-o-nik-o'-sis*) [*para-*; ὄνυξ, nail; νόσος, disease]. A diseased condition of the structures about the nails; also growth of a nail in unusual places.

paronym (*par'-o-nim*) [*para-*; ὄνομα, name]. A word that exactly represents a word in another language, differing from it, if at all, only in some slight modification. Thus *nerve* is a paronym of Latin *nervus; muscle* of *musculus; canal* of *canalis*. A related synonym. See *heteronymous*.

paronymy (*par-on'-im-e*) [*para-*; ὄνομα, name]. 1. The relation of a word in one language to its antecedent in another. 2. The principle of using in modern languages paronyms or derivations of Latin or Greek words rather than heteronyms that have no common antecedent.

paroophoritis (*par-o-off-or-i'-tis*) [*para-*; *oophoron*; ιτις, inflammation]. 1 Inflammation of the parovarium. 2. And of tissues about the ovary.

paroophoron (*par-o-of'-o-ron*) [*para-*; *oophoron*]. The persistent tubules of the posterior part of the Wolffian body in the female, corresponding to the organ of Giraldès in the male.

parophobia (*par-o-fo'-be-ah*) [πάρος, before (intensive); φόβος, fear]. Hydrophobia.

parophthalmia (*par-off-thal'-me-ah*) [*para-*; ὀφθαλμός, eye]. Inflammation about the eye.

parophthalmoncus (*par-of-thal-mong'-kus*) [*para-*; ὀφθαλμος, the eye; ὄγκος, a tumor]. A tumor near the eye.

paropia (*par-o'-pe-ah*) [*para-*; ὤψ, eye]. The angle of the eyelid toward the temple.

paropion (*par-o'-pe-on*) [*para;* ὤψ, eye]. An eye-screen

paroplexia (*par-o-pleks'-e-ah*) [*para-*; πλήσσειν, to strike]. Paraplegia.

paropsia, paropsis (*par-op'-se-ah, par-op'-sis*) [*para-*; ὄψις, vision]. Disordered or false vision.

paroptesis (*par-op-te'-sis*) [*para-*; ὄπτησις, a roasting]. A hot-air bath.

paroptic (*par-op'-tik*) [*para-*; ὄψις, vision]. Applied to colors produced by the diffraction of light-rays.

paroral (*par-o'-ral*) [*para-*; *os, oris*, mouth]. In biology, alongside the mouth or oral aperture.

parorasis (*par-o-ra'-sis*) [*para-*; ὁράειν, to see]. Any perversion of vision or of color-perception; an hallucination.

parorchid (*par-or'-kid*). Same as *parorchis*.

parorchidium (*par-or-kid'-e-um*) [*para-*; ὄρχις, a testicle]. Abnormal position of a testicle or its non-descent.

parorchidoenterocele (*par-or-kid-o-en'-ter-o-sēl*) [*para-*; ὄρχις, testicle; ἔντερον, intestine; κήλη, tumor]. Inguinal hernia combined with displacement of the testis.

parorchis (*par-or'-kis*) [*para-*; ὄρχις, testicle]. See *epididymis*.

parorexia (*par-or-eks'-e-ah*) [παρά, aside; ὄρεξις, appetite]. A perverted appetite.

parorganum (*par-org'-an-um*) [*para-*; ὄργανον, an instrument]. A growth the tissue of which resembles that of some organ.

parosmia (*par-os'-me-ah*) [*para-*; ὀσμή, smell]. A perversion of the sense of smell.

parosphresis (*par-os-fre'-sis*). Same as *parosmia*.

parosteitis (*par-os-te-i'-tis*). *Parostitis*.

parosteosis (*par-os-te-o'-sis*). See *parostosis*.

parostia (*par-os'-te-ah*) [*para-*; ὀστέον, bone]. Disorder or defect of ossification.

parostitis (*par-os-ti'-tis*) [*para-*; ὀστέον, bone; ιτις, inflammation]. Inflammation of the outer surface of periosteum.

parostosis (*par-os-to'-sis*) [*para-*; ὀστέον, bone]. The abnormal formation of bone outside of the periosteum, or in the connective tissue surrounding the periosteum.

parotic (*par-o'-tik*) [*para-*; οὖς, ear] Situated near or about the ear.

parotid (*par-ot'-id*) [see *parotic*]. 1. Situated near the ear, as the *parotid* gland. 2. Pertaining to or affecting the parotid gland. **p. abscess,** an abscess of the parotid gland. The term is sometimes also applied to abscess of the lymphatic gland lying upon the parotid. **p. gland,** one of the salivary glands in front of and below the external ear. It is a compound racemose gland and secretes saliva containing ptyalin, a globulin-like body, potassium sulphocyanide, a trace of urea, and mineral salts. Its duct is Stenson's duct.

parotidectomy (*par-ot-id-ek'-to-me*) [*parotid;* ἐκτομή, excision]. Excision of the parotid gland.

parotiditis (*par-ot-id-i'-tis.*) See *parotitis*.

parotidoauricularis (*par-ot-id-o-aw-rik-ū-la'-ris*) [*parotid; aura*, ear]. A muscle, well-developed in lower animals, arising from the surface of the parotid gland and inserted into the base of the concha. Its function is to abduct and depress the pinna.

parotidoscirrhus (*par-ot-id-o-skir'-us*) [*parotid;* σκιῤῥός, hard]. Scirrhous carcinoma of the parotid gland.

parotidosclerosis (*par-ot-id-o-skle-ro'-sis*) [*parotid;* σκλήρωσις, a hardening]. Fibrous induration of the parotid gland.

parotis (*par-o'-tis*) [L.]. The parotid gland. **p. accessoria,** a small lobule near the parotid gland.

parotitic (*par-o-tit'-ik*). Having the mumps; affected with parotitis.

parotitis (*par-o-ti'-tis*) [*parotid;* ιτις, inflammation]. Inflammation of the parotid gland, especially the specific infectious disease known as mumps; the name is also given to inflammation of the lymphatic gland overlying the parotid (parotid bubo). **p., metastatic,** that secondary to disease elsewhere; it occurs in infectious fevers, as typhoid fever, and usually goes on to suppuration.

parous (*par'-us*) [*parere*, to bear]. Having borne one or more children.

parovarian (*par-o-va'-re-an*) [*para-; ovarium*, ovary]. 1. Situated near the ovary. 2. Pertaining to the parovarium.

parovariotomy (*par-o-va-, e-ot'-o-me*). Excision of a parovarian cyst.

parovaritis (*par-o-var-i'-tis*). Inflammation of the parovarium.

parovarium (*par-o-va'-re-um*) [*para-; ovarium*, ovary]. The remnant of the Wolffian body of the female; the organ of Rosenmüller.

paroxia (*par-oks'-e-ah*). See *pica*.

paroxyntic (*par-oks-in'-tik*) [παροξύνειν, to excite]. Paroxysmal.

paroxysm (*par'-oks-izm*) [*para-*; ὀξύνειν, to sharpen]. 1. The periodic increase or crisis in

the progress of a disease; a sudden attack, a sudden reappearance of symptoms, or a sudden increase in the intensity of existing symptoms. 2. A spasm or fit; a convulsion.

paroxysmal (*par-oks-iz'-mal*) [*paroxysm*]. Of the nature of or resembling a paroxysm; occurring in paroxysms.

parresine (*par'-es-ĕn*). Trade name of a mixture of paraffins, gum, wax; used as a protective dressing for burns and wounds.

Parrish's camphor mixture (*par'-ish*). It contains sugar 3.5, compound tincture of lavender 25, camphor water to make 100 parts; used as a diarrhea mixture in dose of 2 drams.

Parrot's atrophy of the newborn (*par-ro'*) [Joseph Marie Jules *Parrot*, French physician, 1829–1883]. Primary infantile atrophy or marasmus. Syn., *athrepsia*. **P.'s disease,** pseudoparalysis of the extremities due to epiphyseal separation which prevents spontaneous movements, in hereditary syphilis of the newborn. **P.'s nodes,** osteophytes of the frontal and parietal bones, around the anterior fontanel, in hereditary syphilis. **P.'s sign,** dilatation of the pupil when the skin is pinched; it is noted in meningitis. **P.'s ulcers,** the whitish or yellowish patches of thrush.

parrot disease. See *psittacosis*.

parrot-beak nails. Nails that are curved strongly anteroposteriorly, like the beak of a parrot.

Parry's disease (*par'-e*) [Caleb Hillier *Parry*, English physician, 1755–1822]. Exophthalmic goiter.

pars (*parz*) [L.]. A part. **p. basilaris,** basilar process of the occipital bone. **p. calcaneocuboidea,** the internal calcaneocuboid ligament. **p. calcaneonavicularis,** the superior or external calcaneonavicular ligament. **p. cavernosa,** the cavernous or spongy portion of the male urethra. **p. centralis,** the central part or body of the lateral ventricles of the brain. **p. ciliaris retinæ,** the part of the retina in front of the ora serrata. **p. convoluta,** the convoluted part or labyrinth of the kidney. **p. flaccida,** Shrapnell's membrane. **p. horizontalis,** the horizontal plate of the palate bone. **p. intercartilaginea,** the respiratory glottis. **p. intermembranacea,** the true glottis. **p. iridica retinæ,** the uveal tract. **p. laryngea,** the laryngopharynx. **p. mastoidea,** the mastoid portion of the temporal bone. **p. membranacea,** the membranous portion of the male urethra. **p. nasalis,** the nasopharynx. **p. oralis,** the oropharynx. **p. papillaris,** the papillary layer of the skin. **p. perpendicularis,** the vertical plate of the palate bone. **p. petrosa,** the petrous portion of the temporal bone. **p. prostatica,** the prostatic portion of the male urethra. **p. pylorica,** the pyloric portion of the stomach. **p. radiata,** the pyramids of Ferrein. **p. sphincteria inferior,** the lowest portion of the esophagus. **p. spongiosa.** Same as *p. cavernosa*. **p. triangularis,** the preoperculum. **p. tympanica,** the tympanic portion of the temporal bone.

parsley (*pars'-le*) [πέτρος, rock; σέλινον, a kind of parsley]. The *Carum petroselinum*, a plant of the order *Umbelliferæ*, containing a volatile oil. From the seed a peculiar oily liquid, termed *apiol* (*q. v.*), is obtained. The root is used in renal diseases and dropsy; the juice of the fresh herbs and the seeds are employed as antiperiodics; apiol is an emmenagogue. **p. camphor,** apiol.

Parsons' disease (*par'-sunz*) [James *Parsons*, English physician, 1705–1770]. Exophthalmic goiter.

part [*pars*, a part]. 1. A segment or section; a member or organ. 2. A portion of a cadaver allotted to a student, for dissection.

Parthenium (*par-the'-ne-um*) [παρθένος, a virgin]. A genus of herbs of the order *Compositæ*. *P. hysterophorus* contains several alkaloids, one of which, called *parthenine*, seems to be the active principle of the plant and has been used as an antipyretic and antineuralgic. *P. integrifolium*, prairie-dock, a perennial plant of the southern United States, is used as an antiperiodic.

parthenochlorosis (*par-then-o-klo-ro'-sis*) [παρθένος, virgin; χλωρός, green]. The chlorosis of young maidens.

parthenogenesis (*par-then-o-jen'-es-is*) [παρθένος, a virgin; γένεσις, production]. The development of an organism from an unfertilized ovum.

particle (*par'-tik-l*) [dim. of *pars*, part]. A small part. The smallest visible portion of any substance.

particulate (*par-tik'-ū-lāt*) [*pars*, part]. Composed of minute particles; applied to various contagia.

partigen (*par'-te-jen*). A partial antigen. The antigen is supposed to consist of a number of partigens.

Partridge's hernia. Femoral hernia external to the femoral vessels.

partridge-berry. 1. A trailing plant, *Mitchella repens*, with medical uses like those of pipsissewa. 2. See *gaultheria*.

parturiency (*par-tū'-re-en-se*) [*parturire*, to bring forth]. The state of being parturient; parturition.

parturient (*par-tū'-re-ent*) [*parturition*]. 1. Being in labor; giving birth; as a *parturient* woman. 2. Traversed during birth, as the *parturient* canal.

parturifacient (*par-tū-re-fa'-se-ent*) [*parturition; facere*, to make]. 1. Promoting parturition. 2. An agent that induces parturition.

parturiometer (*par-tū-re-om'-et-er*) [*parturition; μέτρον*, a measure]. An instrument for determining the progress of labor by measuring the expulsive force of the uterus.

parturition (*par-tū-rish'-un*) [*parturitio*, from *parturire*]. The act of giving birth to young. See *labor*.

partus (*par'-tus*) [*parturire*, to bring forth]. The bringing forth of offspring; labor. **p. agrippinus,** labor with breech presentation. **p. cæsarius,** cesarean section. **p. difficilis,** dystocia. **p. immaturus,** premature labor. **p. maturus,** labor at term. **p. præcipitatus,** precipitate labor. **p. serotinus,** labor unduly prolonged. **p. siccus,** dry labor.

parulis (*par-ū'-lis*) [*para-; οὖλον*, the gum]. Abscess of the gum; a gum-boil.

parumbilical (*par-um-bil'-ik-al*) [παρά, beside; *umbilicus*, navel]. Situated or occurring near the umbilicus.

paruria (*par-ū'-re-ah*) [*para-; οὖρον*, urine]. Abnormality in the excretion of the urine.

parurocystis (*par-ū-ro-sis'-tis*). See *bladder, supplementary*.

parvicellular (*par-ve-sel'-ū-lar*) [*parvus*, small; *cellula*, a small cell]. Pertaining to, or composed of, small cells.

parvoline (*par'-vo-lin*), $C_9H_{13}N$. A synthetic liquid base; also a ptomaine isomeric with it, occurring in decomposing fish and horse-flesh.

parvule (*par'-vūl*) [*parvus*, small]. A small pill or pellet, or granule.

Pascal's law (*pas-kal'*) [Blaise *Pascal*, French scientist, 1623–1662]. Pressure exerted anywhere on a mass of fluid at rest is transmitted equally in all directions.

paschachurda (*pas-kah-koor'-dah*). See *Sartian disease.*

Paschutin's degeneration (*pas-kū-tĭn*). A special degeneration peculiar to diabetes; hydrocarbonaceous degeneration.

pasma (*paz'-mah*) [πασμα; πάσσειν, to sprinkle; *pl.*, *pasmata*]. 1. A powder for sprinkling on a surface. 2. A powder mixed up into a paste.

paspalism (*pas'-pal-izm*). Poisoning by the seeds of *Paspalum scrobiculatum*, a kind of grass.

pass (*pas*) [*passus*, step]. 1. To go, or to put through, or by. 2. To discharge from the intestinal canal. 3. To void. 4. To introduce an instrument into a cavity or channel.

passage (*pas'-āj*) [*passare*, to pass]. 1. A channel. 2. The act of passing from one place to another. 3. The introduction of an instrument into a cavity or channel. 4. An evacuation of the bowels. **p. false**, a false channel, especially one made by the unskilful introduction of an instrument into the urethra.

Passavant's cushion (*pahs'-af-ant*) [Gustav *Passavant*, German physician, 1815–1893]. The bulging of the posterior pharyngeal wall, produced during the act of swallowing by the upper portion of the superior constrictor pharyngis.

passiflora (*pas-if-lo'-rah*) [*passio*, passion; *flos*, a flower]. Passion-flower, a genus of climbing plants. *P. incarnata*, of North America, is used as a narcotic and anodyne. Dose of *fluidextract* 2–5 min. (0.13–0.3 Cc.). *P. quadrangularis*, of the West Indies; the root causes vomiting, convulsions, and paralysis, but has been prescribed as an anthelmintic.

passion (*pash'-un*) [*passio*, from *pati*, to suffer]. 1. Pain; suffering; as *ileac passion*, a synonym of volvulus. 2. An intense emotion of the mind. 3. Intense sexual excitement.

passional (*pash'-un-al*). Pertaining to passion.

passive (*pas'-iv*) [see *passion*]. Not active; not performed or produced by active efforts, but by causes coming from without. **p. congestion**, congestion due to retention of blood in a part, and not to an active flow of blood toward the part. **p. immunity.** See *immunity, passive.* **p. interval**, the period of cardiac rest. **p. motion**, the movement produced by external agency and not by the person himself.

passivism (*pas'-iv-izm*). A form of sexual perversion in which there is a subjugation of the will of one person to that of another, with an erotic end.

passivist (*pas'-iv-ist*) [*pati*, to suffer]. One who is the subject of passivism, *q. v.*

passula (*pas'-ū-lah*) [L.]. A raisin.

pasta (*pas'-tah*) [L.: pl., and gen., *pastæ*]. A paste.

paste (*pāst*) [πάστη, mess]. Any soft, sticky substance, especially a mixture of starch or flour and water. **p., arsenical**, a caustic paste containing arsenic. **p., Canquoin's.** See *Canquoin's paste.* **p., fruit**, inspissated fruit juice. **p., London**, a mixture of equal parts of sodium hydroxide and slaked lime, moistened with alcohol. **p., phosphorus**, a rat poison made of phosphorus and flour. **p., Piffard's**, copper sulphate, 1 part; tartrated soda, 5 parts; caustic soda, 2 parts. It is used as a test for sugar in urine. **p., serum**, a sterilized mixture of serum from ox-blood with 25% of zinc oxide; used as a film on abrasions or diseased surfaces. **p., sulphuric-acid**, a caustic mixture of equal parts of sulphuric acid and powdered saffron. **p., Vienna**, a mixture of potassium hydroxide and caustic lime moistened with water.

paster (*pās'-ter*). The oval or circular portion of a bifocal lens, which is used for near work.

pastern (*pas'-tern*). That part of a horse's foot between the fetlock-joint and the coronet of the hoof. **p.-bone**, either of the two proximal phalanges of a horse's foot. **p.-joint**, the articulation between the proximal phalanx (great pastern-bone) of the horse's foot and the cannon-bone.

Pasteur's exhaustion theory (*pahs-ter'*) [Louis *Pasteur*, French bacteriologist, 1822–1895]. See *immunity, theory of, exhaustion hypothesis.* **P.'s fluid, P.'s liquid**, an artificial liquid for the cultivation of bacteria, composed of water, 100 parts; crystallized sugar, 10 parts; ammonium carbonate and ashes of yeast, each, 1 part. **P.'s method**, treatment of rabies by injecting attenuated virus of gradually increased virulence.

Pasteur-Chamberland's filter (*pahs'-ter-shom'-ber-lahn*) [Louis *Pasteur*; Charles *Chamberland*, a pupil of Pasteur]. A hollow column of unglazed porcelain through which solutions are filtered by means of a vacuum exhaust or by pressure.

pasteurella (*pas-tur-el'-ah*). A group of polymorphic coccobacteria destitute of spores and cilia.

pasteurellose (*pas-tur-el'-ōs*). Hemorrhagic septicemia in animals.

pasteurism (*pas'-tur-izm*) [Louis *Pasteur*, French chemist and bacteriologist, 1822–1895]. Prophylactic or protective inoculation; a synonym for the word vaccination.

pasteurization (*pas-tur-i-za'-shun*). The checking of fermentation in milk, wine, and other organic fluids by heating them to 60° or 70° C.

pasteurizer (*pas'-tur-i-zer*). An instrument employed in pasteurization.

Pastia's sign (*pas'-te-ah*) [C. *Pastia*, Roumanian physician]. At the commencement of scarlatina, prior to the eruption, red or pink lines are to be seen at the bend of the elbow.

pastil, pastille (*pas'-til, pas-tēl'*) [dim. of *pasta*, paste]. 1. A small mass composed of aromatic substances and employed in fumigation. 2. A troche. 3. A paper disk, chemically coated, which changes color on exposure to x-rays; used to determine the dosage.

past pointing. A diagnostic procedure in diseases of the cerebrum, cerebellum and medulla. If the semi-circular canals of a healthy person are stimulated by injection of cold (68° F.) or warm water (112° F.) or by rotatory movements or galvanic stimulations, vertigo and nystagmus are caused and the muscles of the trunk and extremities are affected, as shown by inability of the patient, seated, with eyes closed, to touch a given point with extended arm and finger. The arm is held upright and then swung down toward the given point which it swerves past: to the right if the left canal is stimulated, and *vice versa.* The absence of these manifestations indicates possible intracranial disease.

patch [Prov. Ger., *Patschen*]. An irregular spot or area. **p., moth-**, chloasma. **p., mucous**, one of the characteristic lesions of syphilis, occur-

ring in the so-called secondary stage, and appearing as a whitish papule or patch on mucous membranes and at mucocutaneous junctions. Syn., *condyloma latum; mucous papule.* **p., opaline.** See *opaline patch.* **p.s, Peyer's.** See *Peyer's glands.*

patchouli, patchouly (*pat-choo'-le*). The labiate herb, *Pogostemon heyneanus.*

pate (*pāt*). The crown or top of the head.

patella (*pat-el'-ah*) [dim. of *patina*, a shallow dish]. The knee-pan, a small, round, sesamoid bone in front of the knee, developed in the tendon of the quadriceps extensor cruris muscle.

patellapexy (*pat-el-ah-peks'-e*) [*patella;* πῆξις, a fixing]. Fixing the patella to the lower end of the femur in order to stabilize the knee joint; used in cases of infantile paralysis.

patellar (*pat-el'-ar*) [*patella*]. Pertaining to the patella. **p. fossa.** See *fossa.* **p. reflex, p. tendon-reflex.** See *reflex, knee-.*

patelliform (*pat-el'-if-orm*) [*patella; forma*, form]. Shaped like a patella.

patellofemoral (*pa-tel-o-fem'-o-ral*). Pertaining to the patella and the femur.

patelloid, patelloidean (*pat-el'-oid, pat-el-oid'-e-an*). Disc-like; shaped like a knee-pan; patelliform.

patency (*pa'-ten-se*) [*patent*]. The state of being open.

patent (*pat'-ent*) [*patere*, to be open]. Open; exposed. **p. medicine.** See under *medicine.*

paternity test. See *Landsteiner's blood test;* also *Mayoral and Jiminez.*

pathabolism (*path-ab'-ol-izm*) [*patho-; metabolism*]. Diseased condition due to perverted metabolism.

pathema (*path-e'-mah*) [πάθημα; πάθος, disease]. Any disease or morbid condition.

pathemate (*path'-em-āt*) [πάθημα, a suffering]. Pertaining to emotional excitement.

pathematology (*path-em-at-ol'-o-je*). See *pathology.*

pathetic (*path-et'-ik*) [πάθος, disease]. Arousing pity; indicating sadness or sorrow; appealing; that which appeals to or stirs the passions; applied to the fourth cranial nerve (*pathetic nerve*), which innervates the *pathetic* muscle (*patheticus*, superior oblique) of the eye, by which the eye is rolled outward and downward.

pathetism (*path'-et-izm*) [see *pathetic*]. Hypnotism, mesmerism, animal magnetism.

pathetist (*path'-et-ist*). A mesmerizer, a hypnotist.

pathfinder (*path'-fin-der*). A filiform bougie used for finding the openings of a urethral stricture.

pathic (*path'-ik*) [παθικός, passive]. 1. Diseased; pathological; pertaining to a morbid condition. 2. Also, one who tolerates the commission of an unnatural crime upon the person.

patho- (*pa-tho-*) [πάθος, disease]. A prefix denoting disease.

pathoamine (*path-o-am'-in*). A basic substance found in disease; a ptomaine.

pathoanatomy (*path-o-an-at'-o-me*) [*patho-; anatomy*]. Pathological anatomy.

pathobiology (*path-o-bi-ol'-o-je*). *Pathology, q.v.*

pathodixia (*path-o-dik'-se-ah*) [πάθος, suffering; δεικνύναι, to exhibit]. The ostentatious and constant exhibition of an affection or injury, found in some war neuropaths; the opposite of anosognosia.

pathogen (*path'-o-jen*) [*patho-;* γεννᾶν, to produce]. Any microorganism or substance which produces disease.

pathogenesis (*path-o-jen'-es-is*) [*patho-;* γένεσις, generation]. The origin or development of disease.

pathogenic, pathogenetic (*path-o-jen'-ik, path-o-jen-et'-ik*) [*patho-;* γεννᾶν, to produce]. Producing disease. **p. microorganism,** one that when introduced into the system causes disease.

pathogenicity (*path-o-jen-is'-it-e*). The condition of being pathogenic.

pathogeny (*path-oj'-en-e*) [*patho-;* γενής, producing]. See *pathogenesis.*

pathognomonic (*path-og-no-mon'-ik*) [*patho-;* γνώμη, a sign]. Characteristic of a disease, distinguishing it from other diseases.

pathognomy (*path-og'-no-me*) [*patho-;* γνώμη, a sign]. The science of the signs by which disease is recognized.

pathognostic (*path-og-nos'-tik*). Synonym of *pathognomonic.*

pathography (*path-og'-ra-fe*) [*patho-;* γράφειν, to write]. A description of diseases.

pathologic, pathological (*path-o-loj-ik', al*) [*pathology*]. Pertaining to pathology; pertaining to disease. **p. anatomy.** See *anatomy, morbid.* **p. histology,** the microscopic study of diseased tissues.

pathologist (*path-ol'-o-jist*) [*pathology*]. One versed in pathology.

pathology (*path-ol'-o-je*) [*patho-;* λόγος, science]. The branch of medical science that treats of the modifications of function and changes in structure caused by disease. **p. cellular,** pathology that makes the cell the basis of all vital phenomena. **p. comparative,** a study of pathological processes in lower animals, for purposes of tracing resemblances and differences among them and between them and those of the human body. **p., experimental,** the study of pathological processes artificially induced in lower animals. **p., general,** that department of pathology which takes cognizance of those morbid processes that may be observed in various diseases and in any organ, *e. g.*, inflammation, hypertrophy. **p. geographical,** pathology in its relation to climatic and geographical conditions. **p., humoral,** the old doctrine that disease is due to abnormal conditions of the blood It has been revived in recent times in a modified form, and is now based on the theory that both immunity and susceptibility to disease reside in the juices of the body. **p., solidistic.** See *solidism.* **p., medical,** pathology of diseases not amenable to surgical treatment. **p., special,** that treating of changes in function and structure occurring in special diseases, *e. g.*, pneumonia. **p., surgical,** the pathology of diseases treated by the surgeon.

patholysis (*path-ol'-is-is*) [*patho-;* λύειν, to dissolve]. A morbid dissolution of tissues.

pathomaine (*path'-o-mān*). A ptomaine.

pathomania (*path-o-ma'-ne-ah*) [*patho-;* μανία, madness]. Moral insanity.

pathometric (*path-o-met'-rik*). Pertaining to pathometry.

pathometry (*path-om'-et-re*) [πάθος, suffering; μέτρον, measure]. Estimation of the number of people suffering from a disease and the conditions which increase or decrease this number.

pathomimesis (*path-o-mim-e'-sis*) [πάθος, disease; μιμήσις, imitation]. Imitation of the symptoms and signs of a disease.

pathomimicry (*path-o-mim'-ik-re*). Pathomimesis.

pathomorphism (*path-o-mor'-fism*) [πάθος, suffering; μόρφη, form]. Abnormal morphology.

pathone (*path'-ōn*). Trade name of a disinfectant said to contain 50 % of cresols, and to be twice as effective as phenol.

pathonomia (*path-o-no'-me-ah*) [*patho-*; *νόμος*, law]. The study of the laws of pathological conditions.

pathophobia (*path-o-fo'-be-ah*) [*patho-*; *φόβος*, fear]. Exaggerated dread of disease.

pathophoric (*path-o-for'-ik*) [*πάθος*, disease; *φόρειν*, to carry]. Carrying or transmitting disease, said of certain insects.

pathophorous (*path-off'-or-us*). Pathophoric.

pathopoiesis (*path-o-poi-e'-sis*) [*patho-*; *ποιεῖν*, to make]. The causation of disease.

pathopsychology (*path-o-si-kol'-o-je*) [*patho-*; *psychology*]. The branch of science dealing with the mental processes during disease.

patient (*pa'-shent*) [*pati*, to suffer]. A person under the care of a physician; a sick person.

patten (*pat'-en*) [Fr., *patin*, a clog]. An iron support placed under a sound foot to remove pressure from and permit extension of the diseased limb in hip-joint disease.

Patterson's corpuscles (*pat'-er-sun*). The molluscum bodies; oval, shiny bodies found in the contents of the tubercles of molluscum contagiosum.

Patterson's powder (*pat'-er-sun*). A mixture of bismuth subnitrate and magnesia.

patulous (*pat'-ū-lus*) [*patere*, to lie open]. Expanded; open.

Paul's sign (*pawl*) [Constantin Charles Théodore *Paul*, French physician, 1833–1896] Feeble apex-beat with forcible impulse over the body of the heart, in adherent pericardium.

Paul's test (*pawl*). The cornea of a rabbit is inoculated with the contents of a pustule in a case of suspected smallpox; in 36 to 48 hours the site of the inoculation is examined; if the case is one of smallpox the cornea in the neighborhood of the inoculation remains clear, and shows fine elevations at the site of the inoculation only.

Paullinia (*paw-lin'-e-ah*). See *guarana*.

Paul-Mixter tube (*pawl'-miks'-ter*) [Frank Thomas *Paul*, English surgeon, 1851– ; Samuel Jason *Mixter*, American surgeon, 1855–]. A large glass drainage tube, flanged, used in intestinal surgery for a temporary anastomosis.

paulocardia (*paw-lo-kar'-de-ah*) [*παῦλα*, pause; *καρδία*, heart]. A subjective sensation of intermission or momentary stoppage of the heart-beat.

paunch (*pawnch*). The abdominal cavity and its contents.

pausimenia (*paw-sim-e'-ne-ah*). See *menopause*.

Pauzat's disease (*po-zah'*) [Jean Eugène *Pauzat*, French physician]. Osteoplastic periostitis of the metatarsal bones.

pavement-epithelium. Epithelium consisting of flattened, scale-like cells fitted together by their edges like the tiles of a pavement.

pavilion (*pa-vil'-yon*) [*papilio*, a butterfly, a tent]. 1. The expanded extremity of a canal or tube, as the *pavilion* of the ear—the auricle; the *pavilion* of the Fallopian tube—the fimbriated extremity of the Fallopian tube. 2. In anatomy, a tent-shaped structure. **p. of pelvis,** the false pelvis, the expanded part above the iliopectineal line.

pavimentum (*pav-im-en'-tum*) [L.]. A floor. **p. orbitæ,** the floor of the orbit. **p. ventriculi,** the floor of a ventricle.

pavinol (*pav'-in-ol*). Trade name of a preparation of poppy seed oil combined with flavoring agents, used as a substitute for cod liver oil.

pavitation (*pav-it-a'-shun*) [*pavitatio*; *pavere*, to quake]. Terror, or fear, with trembling.

pavor (*pa'-vor*) [L.]. Fright; fear. **p. nocturnus.** night-terrors. *Nightmare; incubus.*

Pavy's disease (*pa'-ve*) [Frederick William *Pavy*, English physician, 1829–1911]. Cyclic albuminuria. **P.'s joint,** arthritis occurring during typhoid fever. **P.'s solution for glucose,** make a solution by mixing 120 Cc. of the ordinary Fehling's solution with 300 Cc. of strong ammonia (specific gravity, 0.88) and 400 Cc. of sodium hydroxide solution of specific gravity of 1.14; dilute with 1000 Cc. of water. This solution becomes decolorized on boiling with a glucose solution. One hundred Cc. of this solution is reduced by glucose to the same extent as 10 Cc. of Fehling's solution.

Pawlik's folds (*paw'-lik*) [Karl *Pawlik*, Austrian surgeon, 1849–1914]. The anterior columns of the vagina, which form the lateral boundaries of Pawlik's triangle and serve as landmarks in locating the opening of the ureters. **P.'s triangle,** extravesical or vaginal triangle. The triangular space formed by two divergent columns of the vagina and the transverse ridge below the external orifice of the neck of the bladder. It corresponds line for line to the trigonum vesicæ.

pawpaw (*paw'-paw*). See *Carica papaya*.

Paxton's disease (*paks'-tun*). Tinea nodosa.

Pb. Chemical symbol for *plumbum*, lead.

P. B. Abbreviation of *Pharmacopœia Britannica*, British Pharmacopeia.

$Pb(C_2H_3O_2)_2$. Lead acetate.

P. B. E. [Abbreviation of German *perlsucht bacillenemulsion*]. A tuberculin prepared from bovine tubercle bacilli; similar to Koch's new tuberculin.

$Pb(NO_3)_2$. Lead nitrate.

PbO. Lead oxide.

PbO_2. Lead dioxide.

PbS. Lead sulphide.

$PbSO_4$. Lead sulphate.

Pd. The chemical symbol for *palladium*.

P. D. Abbreviation of *Pharmacopœia Dublinensis*, Dublin Pharmacopeia.

P. E. Abbreviation for *Pharmacopœia Edinensis*, Edinburgh Pharmacopeia.

Peacock's bromides (*pe'-kok*). A mixture containing the bromides of potassium, sodium, lithium, calcium, and ammonium.

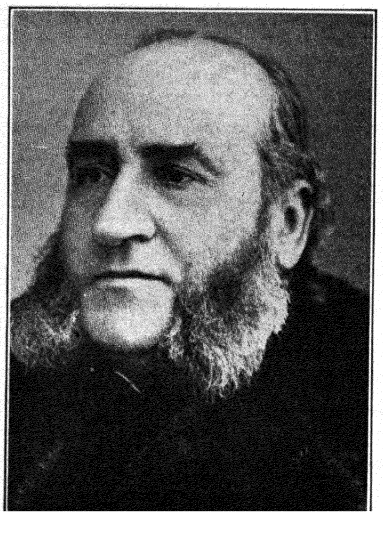
Péan's method (*pa-an'*) [Jules *Péan*, French surgeon, 1830–1898]. Removal of a tumor in pieces when it is larger than the opening through which it is to be removed. See portrait p. 1064.

peanut (*pe'-nut*). An edible fruit of *Arachis hypogæa*. **p.-oil.** See *ground-nut oil*.

pearl (*perl*) [Fr., *perle*, from L., *pirula*, a little pearl]. 1. In pharmacy, a small, hollow glass body containing a dose of a volatile liquid medicine, as a *pearl* of amyl nitrite. 2. A cataract. 3. A peculiar arrangement of the epithelial cells. **p. ash,** crude potassium carbonate. **p.-disease,** tuberculosis of serous membranes in the lower animals, especially cattle, so called on account of the most manifest lesion, the pearly nodules or tumors, which are often pendulous. **p., epidermic, p., epithelial,** one of the spheroidal concentric masses of epithelial cells often seen in hard papilloma, in squamous epithelioma and in cholesteatoma. Syn., *pearly body*. **p. tumor.** See *cholesteatoma*. **p.-white,** bismuth oxychloride.

pearly body. See *pearl, epidermic*.

Pearson's solution (*pēr'-sun*) [George *Pearson*, English physician, 1751–1828]. An aqueous solution of sodium arsenate, containing 1 gr. of sodium arsenate in 600 Cc. of distilled water. It is one-tenth the strength of the official liquor sodii arsenatis.



JULES PÉAN.

peat (*pēt*). The product of the spontaneous decomposition of plants, especially swamp-plants, in many cases mixed with sand, loam, clay, lime, iron pyrites, ocher, etc.

pebbles (*peb'-lz*). Lenses for eyeglasses cut from rock crystal.

pebeco (*peb'-ek-o*). Trade name of a tooth-paste containing potassium chlorate.

pébrine (*pa-brēn'*) [Fr.]. An infectious epidemic disease of silkworms.

peccant (*pek'-ant*) [*peccare*, to sin]. Pathogenic; morbid; unhealthy; offensive.

pechyagra (*pek-i-a'-grah*) [πῆχυς, forearm; ἄγρα, seizure]. Gout in the elbow-joint.

peciloblast (*pe-sil'-o-blast*). See *poikiloblast*.

pecilocyte (*pes'-il-o-sīt*). See *poikilocyte*.

pecilocythemia (*pe-sil-o-si-the'-me-ah*). See *poikilocythemia*.

pecilocytosis (*pe-sil-o-si-to'-sis*). See *poikilocytosis*.

pecilonymy (*pe-sil-on'-im-e*) [ποικίλος, various; ὄνυμα, name]. The use in one publication of different names for the same part. Syn., *poikilonymy*.

pecilothermal (*pe-sil-o-ther'-mal*). See *poikilothermic*.

Pecklin's glands. See *Peyer's glands*.

Pecquet, cistern of, P., reservoir of (*pek-a'*) [Jean *Pecquet*, French anatomist, 1622–1674]. The receptaculum chyli. **P.'s duct,** the thoracic duct.

pectase (*pek'-tās*) [πηκτός, fixed]. A hypothetical ferment of plants which converts pectose into pectin.

pecten (*pek'-ten*) [*pecten*, a comb: pl., *pectines*]. The os pubis. In biology, a comb-like structure or organ.

pectin (*pek'-tin*) [πηκτός, congealed]. A white, amorphous carbohydrate contained in ripe fleshy fruits and in certain roots, and believed to be formed from the pectose found in unripe fruits by the action of acids. Syn., *vegetable jelly*.

pectinal (*pek'-tin-al*) [*pecten*, a comb]. Comb-like.

pectinase (*pek'-tin-ās*). The enzyme capable of transforming pectin.

pectinate (*pek'-tin-āt*) [*pecten*]. Arranged like the teeth of a comb. **p. ligament,** fibers of connective tissue at the angle of the anterior chamber of the eye, between the iris and the cornea. **p. muscles,** the musculi pectinati, muscular ridges in the auricles of the heart.

pectineal (*pek-tin-e'-al*) [*pecten*]. 1. Comb-shaped. 2. Pertaining to the pecten or os pubis. **p. line,** that part of the iliopectineal line found on the os pubis.

pectineus (*pek-tin-e'-us*). See under *muscle*.

pectiniform (*pek-tin'-if-orm*) [*pecten*; *forma*, a form]. Comb-shaped.

pectization (*pek-ti-za'-shun*) [πήκτος, congealed]. Coagulation; term used in colloidal chemistry.

pectoral (*pek'-tor-al*) [*pectus*, breast]. 1. Pertaining to the chest, as the *pectoral* muscles. 2. Useful in diseases of the chest. 3. A remedy useful in diseases of the chest. **p. ridge,** the external bicipital ridge of the humerus. **p. species,** a combination of pectoral herbs.

pectoralgia (*pek-tor-al'-je-ah*) [*pectus*, breast; ἄλγος, pain]. Neuralgic pain in the chest.

pectoralis (*pek-tor-a'-lis*). See under *muscle*.

pectoriloquy (*pek-tor-il'-o-kwē*) [*pectus*, breast; *loqui*, to speak]. The distinct transmission of articulate speech to the ear on auscultation. It may be heard over cavities in the lung, over areas of consolidation near a large bronchus, over a pneumothorax when the opening in the lung is patulous, and over some pleural effusions. **p. aphonic.** 1. The sound heard in auscultating a lung in which there is a cavity. 2. The sound heard in auscultation in pleuritic effusion when the subject speaks in a low tone. **p., whispering,** the transmission of the whispered words to the auscultating ear. The sounds seem to emanate directly from the spot auscultated.

pectorophony (*pek-tor-off'-o-ne*) [*pectus*, breast; φωνή, sound]. Exaggerated vocal resonance, as heard in auscultating the chest.

pectose (*pek'-tōs*) [πηκτός, congealed]. A compound occurring in unripe fruits, and giving rise to pectin.

pectous (*pek'-tus*). Relating to pectin or pectose.

pectunculi (*pek-tunk'-ū-li*) [*pecten*, comb]. Plural of *pectunculus*. Longitudinal striations in the walls of the Sylvian aqueduct.

pectus (*pek'-tus*) [L., "breast"]. The chest or breast. **p. carinatum,** a narrow chest projecting anteriorly in the region of the sternum. Syn., *keeled breast; pigeon-breast*.

pedal (*ped'-al*) [*pes*, *pedis*, foot]. 1. Pertaining to the foot. 2. Pertaining to the pes or crusta of the crus cerebri and pons. **p. system,** a ganglionic system of the brain.

pedarthrocace (*ped-arth-rok'-as-e*) [παῖς, child; ἄρθρον, a joint; κακός, evil]. A necrotic ulceration or caries of the joints of children.

pedatrophia, pedatrophy (*ped-at-ro'-fe-ah, ped-at'-ro-fe*) [παῖς, child; *atrophy*]. 1. Any wasting disease of childhood. 2. Tabes mesenterica.

pederast (*ped'-er-ast*). One who practices pederasty.

pederasty (*ped'-er-as-te*) [παῖς, boy; ἐραστής, lover]. Sexual intercourse with boys, through the anus.

pedesis (*pe-de'-sis*) [πήδησις, leaping or bounding]. The dancing oscillating motion of the particles of any substance sufficiently powdered and suspended in a suitable liquid. Brownian movement.

pedialgia (*pe-de-al'-je-ah*) [πεδίον, foot; ἄλγος, pain]. Pain in the foot.

pediatrician (*ped-e-at-rish'-un*). Same as *pediatrist*.

pediatrics, pediatry (*pe-de-at'-rıks, pe-dı'-at-re*) [παῖς, child; ἰατρεία, therapeutics]. The branch of medicine dealing with the diseases of children.

pediatrist (*ped-e-at'-rıst*). A specialist in children's diseases.

pedication (*ped-ı-ka'-shun*) [παιδικά, a darling]. Sodomy with a boy.

pedicle (*ped'-ık-l*) [*pedıculus*, dim. of *pes*, foot]. 1. A slender precess acting as a foot or stem, as the *pedicle* of a tumor. 2. Of a vertebra, the portion of bone projecting backward from each side of the body and connecting the lamina with the body. **p., vertebral.** See *pedicle* (2). **p., vitelline,** the pedicle uniting the umbilical vesicle to the embryo.

pedicterus (*ped-ık'-ter-us*) [παῖς, a child; ἴκτερος, jaundice]. Icterus neonatorium.

pedicular (*ped-ık'-ū-lar*) [*pedicle*]. 1. Pertaining to a pedicle; peduncular. 2. [*pedıculus*, louse]. Lousy. 3. Belonging to the genus *Pedıculus*.

pediculation (*ped-ık-ū-la'-shun*) [*pediculus*]. The state of one suffering from pediculosis. 2. The process of developing a pedicle.

pediculi (*pe-dik'-ū-lı*) [L.]. Plural of *pediculus, q. v.*

pediculin (*ped-ık'-ū-lın*) [*pedıculus*]. A proprietary insecticide said to consist of limestone, 65%, and crude naphthalin, 35%.

pediculofrontal (*ped-ık-ū-lo-front'-al*]. Relating to the pedicles of the frontal convolutions.

pediculoides ventricosus (*ped-ık-ū-lo'-id-ēz ventrık-o'-sus*). A mite found in the straw of mattresses and producing straw itch.

pediculoparietal (*ped-ık-ū-lo-par-ı'-et-al*). Relating to the pedicles of the cerebral convolutions and the parietal region.

pediculophobia (*ped-ık-ū-lo-fo'-be-ah*) [*pedıculus*; φόβος, fear]. Morbid dread of lice.

pediculosis (*ped-ik-ū-lo'-sıs*) [*pediculus*]. Lousiness; a skin affection characterized by the presence of pediculi or lice.

pediculous (*ped-ık'-u-lus*) [*pediculus*]. Infested with pediculi.

pediculus (*ped-ık'-u-lus*) [L., "a louse"]. A small parasitic hemipterous insect, the louse. **p. capitis,** the head-louse. **p. corporis,** the body-louse. **p. pubis,** a species infesting the pubic region of unclean persons, occasionally spreading over other hairy parts of the body—eyebrows, axillæ, etc. Syn., *crab-louse*. **p. vestimenti.** Synonym of *p. corporis*.

pedicure (*ped'-ık-ūr*) [*pes*, foot; *cura*, care]. 1. Care of the feet. 2. A chiropodist.

pediluvium (*ped-il-oo'-ve-um*) [*pes*, foot; *lavare*, to wash]. A foot-bath.

pediococcus (*ped-e-o-kok'-us*) [*pes*, a foot; κόκκος, a berry]. A term formerly given to a genus of micrococci.

pedion, pedium (*pe'-de-on, -um*) [παῖς, child]. 1. A child; also, a fetus. 2. [πεδίον, sole]. The sole of the foot.

pedionalgia (*ped-e-on-al'-ie-ah*) [πεδίον, sole of the foot; ἄλγος, pain]. Pain in the sole of the feet.

pediphalanx (*ped-e-fa'-lanks*) [*pes*, the foot]. A phalanx of the foot; a bone of a toe.

pedistibulum (*ped-e-stib'-ū-lum*) [*pes*, foot; *stabulum*, stall]. Stapes.

peditis (*pe-dı'-tis*) [*pes*, foot; ıτıς, inflammation]. A serious complication of laminitis of the horse's foot, in which not only the laminæ, but the periosteum and the coffin-bone also, are involved in the inflammatory process.

pedobaromacrometer, pædobaromacrometer (*pe-do-bar-o-mak-rom'-et-er*). An instrument for weighing and measuring infants.

pedobarometer, pædobarometer (*pe-do-bar-om'-et-ur*) [παῖς, a child; βάρος, weight; μέτρον, a measure]. An instrument for determining the weight of a child.

pedodontia (*pe-do-don'-she-ah*) [παῖς, child; ὀδούς, tooth]. The branch of dentistry which treats of the oral and dental conditions occurring in childhood.

pedodontist (*pe-do-don'-tist*). One who specializes in pedodontia.

pedodynamometer (*ped-o-dı-nam-om'-et-er*) [*pes*, foot; δύναμις, power; μέτρον, measure]. An instrument intended to measure the muscular strength of the leg.

pedologist (*pe-dol-o-jist*). One versed in pedology.

pedology (*pe-dol'-o-je*) [παῖς, child; λόγος, science]. The science, or sum of knowledge, regarding childhood, its diseases, hygiene, etc.

pedometer (*pe-dom'-et-er*) ɪ. [παῖς, child; μέτρον, measure]. An instrument for determining the weight and height of a new-born child. 2. [*pes*, foot; μέτρον, a measure]. An instrument for automatically measuring any distance traveled. As formerly constructed, it registered the number of footsteps.

pedometry (*pe-dom'-et-re*) [*pedometer*]. 1. The measurement of the newborn child. 2. The use of the pedometer.

pedonosology (*pe-do-nos-ol'-o-je*) [παῖς, child; νόσος, disease; λόγος, science]. The nosology of disease peculiar to infancy and childhood. Pediatrics.

pedonosos, pedonosus (*pe-don'-o-sos, pe-don'-o-sus*) [παῖς, child; νόσος, disease]. A disease of childhood.

pedopathy (*pe-dop'-ath-e*) [παῖς, child; πάθος, suffering]. The science of the diseases of children, their treatment, etc.

pedophilia (*ped-o-fil'-e-ah*) [παῖς, child; φίλειν, to love]. Fondness for children.

pedophobia (*ped-o-fo'-be-ah*) [παῖς, child; φόβος, fear]. Morbid dislike of children.

pedotrophy (*pe-dot'-ro-fe*) [παῖς, child; τροφή, nourishment]. The hygiene of childhood; the care, nursing, and regimen of children.

peduncle (*pe'-dung-kl*) [*pedunculus*, dim. of *pes*]. A narrow part acting as a support. **p., callosal,** the anterior perforated space. **p., cerebellar, inferior,** one of two bands of white matter passing up from the medulla oblongata, connecting the medulla with the cerebellum, and forming the lower lateral wall of the fourth ventricle. **p., cerebellar, middle,** one of the bands of white matter joining the pons and the cerebellum. **p., cerebellar, posterior.** Synonym of *p., cerebellar, inferior*. **p., cerebellar, superior,** one of the two bands of white matter that pass from the cerebellum to the testes of the corpora quadrigemina. **p., cerebral,** the crus cerebri.

p. of the pineal gland, a delicate white band passing forward from each side of the pineal gland along the edge of the third ventricle.

peduncular (*ped-ung'-kū-lar*) [*peduncle*]. Pertaining to a peduncle.

pedunculate, pedunculated (*pe-dung'-kū-lāt, pe-dung'-kū-la-ted*) [*pedunculus*, dim. of *pes*, foot]. Having a peduncle; stalked.

pedunculus (*pe-dung'-kū-lus*). Same as *peduncle*.

peeling (*pēl'-ing*) [*pellis*, skin]. A term applied to the process of desquamation, as in scarlet fever.

peenash (*pe'-nash*) [E. Ind.]. The Eastern name for *myiasis*, produced by *Lucilia macellaria*.

peg. 1. A pointed pin of wood, metal or other material. 2. A wooden leg. **p.-leg,** a wooden leg of the simplest form. **p.-teeth,** a name given by Hutchinson to the teeth of children with hereditary syphilis, from the peg-like appearance of the crowns.

pegmatic (*peg-mat'-ik*) [πῆγμα, a concrement]. Pertaining to or producing coagulation.

pegnin (*peg'-nin*) [πήγνυναι, to congeal]. A preparation containing the milk-curdling enzyme of calf's rennet.

peinotherapy (*pi-no-ther'-ap-e*) [πεῖνα, hunger; θεραπεία, cure]. The cure of disease by deprivation of food.

Pekelharing's theory of blood-coagulation. Thrombin (fibrin-ferment) is composed of nucleoalbumin and calcium; the calcium leaves the nucleoproteid and unites with fibrinogen, the compound of the two being fibrin.

pelada, pelade (*pel'-a-dah, pel-ahd'*) [Fr.]. 1. Alopecia areata of the scalp. 2. A disease resembling pellagra, due to eating infected maize.

pelage (*pel-ahj'*) [*pilus*, the hair]. The hairy system of the body.

pelagin (*pel'-aj-in*). A proprietary remedy for sea-sickness, said to consist of a solution of antipyrine, caffeine, and cocaine.

pelargonic acid (*pel-ar-gon'-ik*) [πελαργός, a stork], $C_9H_{18}O_2$. A monobasic crystalline acid obtained from the essential oil of *Pelargonium roseum* and from other oils. It is employed in the flavoring of wines.

pelatina (*pel-at-i'-nah*). See *pelada* (2).

Pel-Ebstein disease (*pel'-eb'-stīn*) [Pieter Klazes *Pel*, Dutch physician, 1852– ; Wilhelm *Ebstein*, German physician, 1836–1912]. Lymphadenoma with intermittent, but regularly occurring, fever.

pelicochirometresis (*pel-ik-o-ki-ro-met-re'-sis*) [πελίκη, a wooden bowl; χείρ, the hand; μέτρον, a measure]. Digital pelvimetry.

pelicometer (*pel-ik-om'-et-er*). Synonym of *pelvimeter*.

pelidisi (*pel-id-e'-ze*). According to Pirquet, the cube of the sitting height of a person expressed in centimeters is approximately the weight in grams of a normal person. The ratio, as expressed in the following formulæ is called the "*pelidisi*."

$$\frac{10 \text{ times the weight}}{\text{Sitting height}^3} = 100\,\%$$

or

$$\frac{\sqrt[3]{10 \text{ times the weight}}}{\text{Sitting height}} = 100\,\%$$

pelidnoma (*pēl-id-no'-mah*). Synonym of *ecchymosis*.

pelioma (*pel-e-o'-mah*) [πελίωμα, a livid spot]. A livid spot, as seen in peliosis.

peliosis (*pel-e-o'-sis*) [see *pelioma*]. Purpura. **p. rheumatica,** purpura rheumatica; a disease characterized by a purpuric rash, with arthritis and fever.

pellagra (*pel-lah'-grah, pel-a'-grah*) [πέλλα, skin; ἄγρα, a seizure]. A disease occurring in Italy, southern France, Spain, and in the southern States. It was formerly believed to be due to the use of diseased maize, but is now thought by some to be of protozoan origin, by others to be a deficiency disease; see *vitamin*. It is characterized in the early stages by debility, spinal pains, and digestive disturbances; later erythema develops, with drying and exfoliation of the skin. In severe cases various nervous manifestations arise, such as spasms, ataxic paraplegia, and mental disturbances In cases presenting ataxic paraplegia the spinal cord has shown combined posterior and lateral sclerosis. Syn., *Lombardian leprosy*. **p. sine pellagra,** pellagra without the erythematous rash.

pellagracein (*pel-a-gra'-se-in*) [*pellagra*]. A poisonous substance found in decomposed corn-meal. Syn., *pellagrazein, pellagrocein, pellagrozein*.

pellagraphobia (*pel-a-graf-o'-be-ah*). Morbid dread of becoming affected with pellagra.

pellagrin (*pel'-a-grin*) [It., *pella*, skin; *agra*, rough; or πέλλα, skin; ἄγρα, seizure]. One who is afflicted with pellagra.

pellagrous (*pel-a'-grus*) [πέλλα, skin; ἄλρα, seizure]. Affected with pellagra; pertaining to pellagra.

pellant (*pel'-ant*) [*pellare*, to drive]. Depurative.

pellentia (*pel-en'-she-ah*) [*pellere*, to drive]. Abortifacient drugs.

pellet (*pel'-et*) [*pila*, ball]. A small pill.

pelletierine (*pel-et-e-er-ēn'*) [Bertrand *Pelletier*, French chemist, 1761–1797], $C_8H_{15}NO$. A liquid alkaloid obtained together with an isomeric body, *isopelletierine*, also a liquid alkaloid, from pomegranate-bark. It is used as a teniafuge, chiefly in the form of the tannate. **p. hydrobromide,** used in paralysis of the eye-muscles. Dose 4–6 gr. (0.25–0.4 Gm.). **p. hydrochloride,** used as a teniafuge. Dose 4½–8 gr. (0.3–0.5 Gm.). **p. sulphate,** used as an anthelmintic. Dose 6 gr. (0.4 Gm.) with 8 gr. (0.52 Gm.) of tannin in 1 oz. (30 Cc.) of water, followed by a cathartic. **p. tannate** (*pelletierinæ tannas*, U. S. P.), a mixture of the tannates of four alkaloids obtained from *Punica granatum*. Dose 4 gr. (0.25 Gm.).

pellicle (*pel'-ik-l*) [*pellis*, skin]. 1. A thin membrane, or cuticle. 2. A film on the surface of a liquid.

pellicula (*pel-ik-ū-lah*) [*pellicula*, dim. of *pellis*, skin]. Epidermis.

pellicular, pelliculous (*pel-ik'-ū-lar, pel-ik'-ū-lus*) [*pelliscula*, dim. of *pellis*, skin]. Of the nature of, or resembling a pellicle; thin-skinned. **p. enteritis,** mucomembranous enteritis.

pelliculate (*pel-ik'-ū-lāt*) [*pellicula*, a small skin]. Covered with a pellicle.

pellidol (*pel'-id-ol*). Trade name of a diacetyl derivative of amido-azotoluol. It is used, like scarlet red, for the treatment of ulcerations. Is used as a 2 % ointment for ulcers and as an epithelial regenerator; soluble in alcohol, ether and vaseline.

pellis (*pel'-is*) [L.]. The skin.

pellitory (*pel'-it-or-e*). See *pyrethrum*.

pellotine (*pel'-ot-ēn*), $C_{13}H_{19}NO_3$. An alkaloid from the Mexican cactus, *Anhalonium williamsi;*

it is hypnotic, and is used chiefly in the form of the hydrochloride. Dose ⅛–1 gr. (0.056–0.06 Gm.); subcutaneously ⅛–⅔ gr. (0.02–0.048 Gm.).

pellous (*pel'-us*) [*pellis*, skin]. Dark-skinned.

pellucid (*pel-ū'-sid*) [*pellucere*, to shine through]. Transparent; translucent; not opaque. **p. zone**, the zona pellucida, or inclosing membrane of the mammalian ovum. Also called *zona radiata*.

pelma (*pel'-mah*) [πέλμα, sole]. The lower surface of the toes; also the entire sole of the foot.

pelmatic (*pel-mat'-ik*) [πέλμα, sole]. Relating to the sole of the foot.

pelmatogram (*pel-mat'-o-gram*) [πέλμα, the sole of the foot; γράμμα, a writing]. An imprint of the sole of the foot.

pelohemia, pelohæmia (*pe-lo-he'-me-ah*) [πηλός, mud; αἷμα, blood]. Excessive thickness of the blood.

pelopathist (*pe-lop'-ath-ist*) [πηλός, mud; πόθος, disease]. One who practises pelopathy.

pelopathy (*pe-lop'-ath-e*). The treatment of diseases by the application of mud.

pelor (*pel'-or*) [πέλωρ, a monster]. A fetal monstrosity with some parts abnormally large.

pelosine (*pel'-os-ēn*). An alkaloid derived from *Cissampelos paneira;* thought to be the same as bebeerine.

pelotherapy (*pe-lo-ther'-ap-e*). See *pelopathy*.

peltation (*pel-ta'-shun* [πέλτη, a shield]. The protection afforded by inoculation with a serum.

pelveoperitonitis (*pel'-ve-o-per-it-on-i'-tis*) [*pelvis; peritoneum;* ITIS, inflammation]. Inflammation of the pelvic peritoneum.

pelveoscope (*pel'-ve-o-skōp*) [*pelvis*, σκοπεῖν, to examine]. An instrument for examining the pelvis; a pelvimeter.

pelveoscopy (*pel-ve-os'-ko-pe*). See *pelvioscopy*.

pelvic (*pel'-vik*) [*pelvis*]. Pertaining to the pelvis. **p. abscess**, a suppurative inflammation of the connective tissue of the pelvic cavity, most common in women, and usually associated with puerperal or gonorrheal infection. **p. arch.** Same as *p. girdle*. **p. cellulitis**, inflammation of the connective tissue of the pelvis. **p. fascia**, the fascia lining the pelvic cavity. **p. girdle**, the arch formed by the ilium, ischium, and pubis, or in the higher vertebrates by the two innominate bones. **p. index**, the relation of the anteroposterior to the transverse diameter of the pelvis. **p. inlet**, the superior strait. **p. outlet**, the inferior strait. **p. region**, the region within the true pelvis.

pelvicellulitis (*pel-vis-el-ū-li'-tis*). *Pelvic cellulitis*.

pelvicliseometer (*pel-vik-liz-e-om'-et-er*) [*pelvis;* κλίσις, inclination; μέτρον, measure]. An instrument for determining the inclination and the diameters of the pelvis.

pelvifixation (*pel-ve-fiks-a'-shun*). Surgical fixation of a misplaced pelvic organ.

pelvigraph (*pel'-vig-raf*) [*pelvis;* γράφειν, to write]. An apparatus that automatically records the outline of the pelvic wall.

pelvilithotomy (*pel-ve-lith-ot'-o-me*) [*pelvis;* λίθος, stone; τόμη, cutting]. Removal of a renal calculus from the pelvis of the kidney.

pelvimeter (*pel-vim'-et-er*) [*pelvis;* μέτρον, a measure]. An instrument for measuring the pelvic dimensions.

pelvimetry (*pel-vim'-et-re*) [see *pelvimeter*]. *Pelycometresis*. The measurement of the dimensions of the pelvis. **p. combined**, a combination of external and internal pelvimetry. **p. digital**, pelvimetry by means of the hand. **p., external**, measurement of external diameters of pelvis, to estimate the dimensions of the internal parts. **p., internal**, measurement of the internal dimensions of the pelvis by the hand or by the pelvimeter. **p., manual.** See *p., digital*. See *pelvis*.

Table of Measurements of the Female Pelvis Covered by the Soft Parts

Between iliac spines	26	cm.
Between iliac crests	29	"
External conjugate diameter	20½	"
Internal conjugate diagonal	12¾	"
True conjugate, estimated	11	"
Right diagonal	22	"
Left diagonal	22	"
Between trochanters	31	"
Circumference of pelvis	90	"

pelviolithotomy (*pel-ve-o-lith-ot'-o-me*). Pelvilithotomy.

pelvioperitonitis (*pel-ve-o-per-it-on-i'-tis*). Pelviperitonitis.

pelvioplasty (*pel-ve-o-plas'-te*) [*pelvis;* πλάσσειν, to form]. 1. Pelviotomy for the purpose of enlarging the pelvic outlet. 2. Incision into the pelvis of the kidney.

pelvioscopy (*pel-ve-os'-ko-pe*) [*pelvis*, σκοπεῖν, to examine]. The examination of the pelvis.

pelviostomy (*pel-ve-os'-to-me*) [*pelvis;* στόμα, mouth]. Resection of the pelvis of the kidney, with implantation of ureter into the lower end of the pelvis.

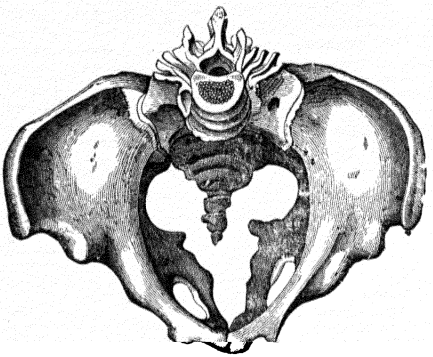
pelviotomy (*pel-ve-ot'-o-me*) [*pelvis*, τομή, a cutting]. Section or cutting of the bones of the pelvis, especially the division of the symphysis pubis in case of difficult labor.

pelviperitonitis (*pel-vi-per-e-ton-i'-tis*) [*pelvis; peritonitis*]. Pelvic peritonitis.

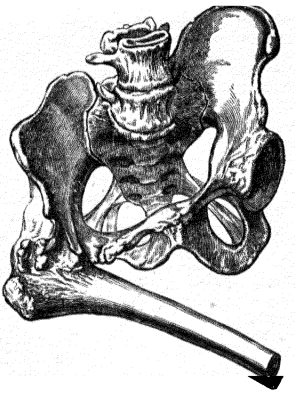
pelvirectal (*pel-ve-rek'-tal*). Relating to the pelvis and the rectum.

pelvis (*pel'-vis*) [L., "a basin"]. 1. A basin or basin-shaped cavity, as the *pelvis* of the kidney. 2. The bony ring formed by the two innominate bones and the sacrum and coccyx. 3. The cavity bounded by the bony pelvis. The pelvis consists of two parts—the *true pelvis* and the *false pelvis*, which are separated by the illiopectineal line. The entrance of the true pelvis, corresponding to this line, is known as the *inlet* or *superior strait;* the *outlet* or *inferior strait* is bounded by the symphysis pubis, the tip of the coccyx, and the two ischia. In measuring the pelvis the *cardinal points of Capuron* are used as landmarks. They are the two illiopectineal eminences and the two sacroiliac joints. **p. æquabiliter justo major**, one equally enlarged in all diameters. **p. æquabiliter justo minor**, a pelvis with all its diameters reduced below the normal. **p., anatomic.** See *p., dynamic*. **p., axis of** (*of inlet or outlet*), a perpendicular to the middle of the anteroposterior diameter. **p., beaked**, one in which the pubic bones are compressed laterally so as to approach each other, and are pushed forward; a condition seen in osteomalacia. **p., brim of**, the entrance to the pelvic cavity, called the inlet, superior strait, margin, or isthmus. **p., cordate**, one with heart-shaped inlet. **p., diameters of**, imaginary lines drawn between certain bony points. (*a*) Of the *inlet:* the *anteroposterior* (sacropubic, or conjugate), from the upper edge of the promontory of the sacrum to a point ¼ of an inch below the upper border of the pubic symphysis; it measures 11 cm.; the *transverse*, from side to side at the widest point, measuring

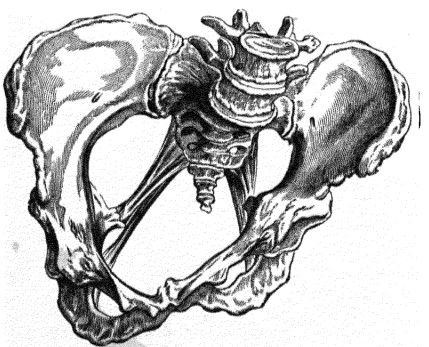
13½ cm.; the *oblique* (right and left), measuring 12¾ cm. (*b*) Of the *outlet:* the *anteroposterior*, from the tip of the coccyx to the subpubic ligament, measuring 9½ cm.; the *transverse*, between the ischial tuberosities, measuring 11 cm.; the *oblique*, from the under surface of the sciatic ligaments to the junction of the ischiopubic rami. **p., dried.** See *p., dynamic.* **p., dynamic,** the pelvis of a living person (in opposition to the *anatomic* or *dried* pelvis). **p., false,** that part above the iliopectineal line. **p., floor of,** the mass of skin, connective tissue, muscles, and fascia forming the inferior boundary of the pelvis. **p., inclination of.** See *p., obliquity of.* **p., inlet of.** See *inlet.* **p., justo-major.** See *p. æquabiliter justo major.* **p., justominor.** See *p. æquabiliter justo minor.* **p., kyphotic,** one characterized by increase of the conjugate diameter of the inlet, but decrease of the transverse diameter of the outlet, through approximation of the tuberosities of the ischium. **p., malacosteon.** See *p., osteomalacic.* **p., masculine,** one narrowed progressively from above. **p., Naegele's oblique,** a pelvic deformity with ankylosis of one sacroiliac synchondrosis, lack of development of the associated lateral sacral mass, and other defects that distort the diameters and render the conjugate oblique in direction. **p., obliquity of, p., inclination of,** the angle between the axis of the pelvis and that of the body. **p., osteomalacic,** a distorted pelvis characterized by a lessening of the transverse and oblique diameters, with great increase of the anteroposterior diameter. **p., planes of,** imaginary surfaces touching all points of the circumference. The plane of pelvic expansion perforates the middle of the symphysis, the tops of the acetabula, and the sacrum between the second and third vertebræ. Its anteroposterior diameter is 12¾ cm.; its transverse diameter is 12½ cm. The plane of pelvic contraction passes through the tip of the sacrum, the spines of the ischia, and the under surface of the symphysis. Its anteroposterior diameter is 11½ cm.; its transverse diameter is 10½ cm. **p., rhachitic,** one characterized by a sinking in and forward of the sacrovertebral angle, with a flaring outward of the iliac crests and increased separation of the iliac spines. **p., Robert's,** one in which there is an ankylosis



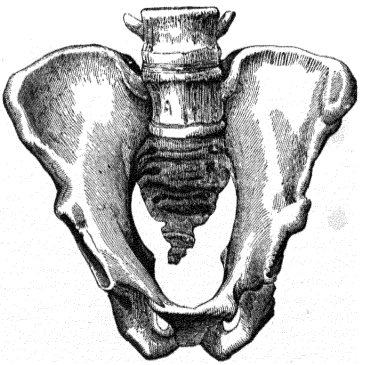
KYPHOTIC PELVIS.



OBLIQUE PELVIS FROM ANKYLOSIS OF HIP JOINT AND DISUSE OF RIGHT LEG.

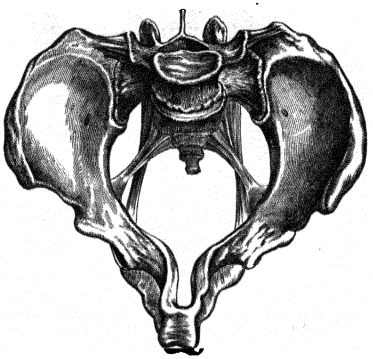


OBLIQUE PELVIS OF NAEGELE.



TRANSVERSLY CONTRACTED PELVIS OF ROBERT.

of both sacroiliac joints, with a rudimentary sacrum, both lateral sacral masses being undeveloped, the oblique and transverse diameters being much narrowed. **p., rostrate.** Same as *p., beaked.* **p., simple flat,** one in which the only deformity consists in a shortening of the anteroposterior diameter. **p., spinosa,** a rhachitic pelvis in which the crest of the pubis is very sharp, and presents a spine at the insertion of the psoas parvus. **p., split,** a form in which there is congenital separation of the pubic bones at the symphysis. It is often associated with exstrophy of the bladder. **p., straits of** (*superior* and *inferior*), the planes of the inlet and outlet. **p., true,** the part below the iliopectineal line.



ROSTRATED MALACOSTEON PELVIS IN EARLY STAGE OF DEFORMITY.

pelvisacral (*pel-ve-sa'-kral*) [*pelvis; sacrum*]. Pertaining to the pelvis and the sacrum.

pelvisacrum (*pel-ve-sa'-krum*). The pelvis and sacrum taken conjointly.

pelvisection (*pel-ve-sec'-shun*) [*pelvis; sectio*, a cutting]. A cutting through of one or more of the bones of the pelvis.

pelvisternum (*pel-ve-ster'-num*). The cartilage of the symphysis pubis, supposed to be analogous to the sternum in the thorax.

pelvitherm (*pel'-ve-thurm*) [*pelvis; θέρμη*, heat]. An electrical apparatus for applying heat to the pelvic viscera.

pelvitomy (*pel-vit'-o-me*) [*pelvis; τομή*, a cutting]. Synonym of *pelviotomy*.

pelvitrochanterian (*pel-ve-tro-kan-te'-re-an*). Relating to the pelvis and the great trochanter of the femur.

pelviureterography (*pel-ve-ū-re-ter-og'-ra-fe*). Radiography of pelvis of the kidney, and ureter, after injection of some substance like argyrol.

pelvoscopy (*pel-vos'-ko-pe*). See *pelvioscopy*.

pelycalgia (*pel-ik-al'-je-ah*) [πέλυξ, pelvis; ἄλγος, pain]. Pelvic pain in general.

pelycochirometresis (*pel-ik-o-ki-ro-met-re'-sis*). See *pelycocheirometresis*.

pelycogram (*pel-ik'-o-gram*) [πέλυξ, pelvis; γράμμα, a writing]. A roentgenogram of the pelvis.

pelycography (*pel-ik-og'-ra-fe*) [πέλυξ, pelvis; γράφειν, to write]. A description of the pelvis.

pelycology (*pel-ik-ol'-o-je*) [πέλυξ, pelvis; λόγος, science]. A treatise upon the pelvis.

pelycometer (*pel-ik-om'-et-er*) [πέλυξ, pelvis; μέτρον, measure]. Same as *pelvimeter*.

pelycometresis (*pel-ik-o-met-re'-sis*). *Pelvimetry*.

pelycometry (*pel-e-kom'-et-re*) [πέλυξ, pelvis; μέτρον, measure]. Pelvimetry.

pelycotomy (*pel-ik-ot'-o-me*) [πέλυξ, pelvis; τομή, a cutting]. Division of the os pubis; symphyseotomy. See *pelviotomy*.

pelyocheirometresis (*pel-e-o-ki-ro-met-re'-sis*) [πέλυξ, pelvis; χείρ, hand; μέτρον, measure]. Synonym of *pelvimetry, digital*.

pelyometer (*pel-e-om'-et-er*) [πέλυξ, pelvis; μέτρον, measure]. Same as *pelvimeter*.

pelyometresis (*pel-e-o-met-re'-sis*) [πέλυξ, pelvis; μέτρον, measure]. Same as *pelvimetry*.

pemmican (*pem'-ik-an*) [Amer. Ind.]. A concentrated food consisting of a mixture of the best beef and fat dried together. Sugar is sometimes added, as well as raisins and currents.

pemphigoid (*pem'-fig-oid*) [see *pemphigus*]. Resembling or having the nature of pemphigus.

pemphigus (*pem'-fig-us*) [πέμφιξ, a blister]. An acute or chronic disease of the skin characterized by the appearance of bullæ or blebs. **p. benignus.** Same as *p. vulgaris*. **p. circinatus,** a kind with the bullæ in circles. **p. foliaceus,** a rare form characterized by crops of flaccid blebs containing a turbid fluid. The disease is usually of long duration, but eventually ends fatally. **p. hystericus.** Same as *p. pruriginosus*. **p. malignus.** Same as *p. pruriginosus*. **p. neonatorum,** an acute form occurring in infants and supposed to be due to a microorganism. **p. pruriginosus,** that associated with severe itching, purulent bullæ, and wheals. **p. solitarius,** a form with single blebs. **p. syphiliticus,** a bullous eruption due to syphilis. **p. vegetans,** an affection characterized by sore mouth, followed by some form of dermatitis attended by vesication and then by papillary growths, gradual emaciation and death. Syn., *Neumann's disease*. **p. vulgaris,** a form that is usually chronic, the blebs appearing in successive crops; on healing they leave a pigmented spot. Itching and pain may be present.

pencil (*pen'-sil*) [*penicillus*, pencil]. 1. In pharmacy, a medicated cylindrical stick, as a menthol pencil, is used for local application. 2. An aggregation of light rays meeting in a point.

pendinski ulcer (*pen-din'-ske*). See *furunculus orientalis*.

pendulous (*pen'-dū-lus*) [*pendere*, to hang]. Hanging down loosely.

pendulum-motion. A to-and-fro movement like that of a pendulum sometimes observed in the arms in obscure nervous diseases.

penetrating (*pen'-e-tra-ting*) [see *penetration*]. Entering beyond the surface. **p. power.** See *focal depth*. **p. wound,** one that pierces the wall of a cavity or enters an organ.

penetration (*pen-e-tra'-shun*) [*penetrare*, to pierce]. 1. The act of penetrating or piercing into. 2 Of a microscope, the focal depth. 3. The entrance of the penis into the vagina.

penetrometer (*pen-e-trom'-et-er*). An instrument for measuring the penetrating power of the x-rays.

pengawar, panghawar djambi. The long soft hairs, used as a mechanical styptic, obtained from rhizomes of various ferns of Sumatra and Java, particularly from the genus *Cibotium*.

penial (*pe'-ne-al*) [*penis*]. Pertaining to the penis.

penicillate (*pen'-is-il-āt*) [*penicillus*, a painter's brush or pencil]. Shaped like a pencil of hairs.

penicilliform (*pen-is-il'-if-orm*) [*penicillus*, a pencil, *forma*, form]. Resembling a pencil.

Penicillium (*pen-is-il'-e-um*) [see *penicillate*]. A genus of fungi, of which the *Penicillium glaucum*, or common blue-mold, is a familiar example

penicillus (*pen-is-il'-us*) [*penicillus*, a painter's brush; pl., *penicilli*]. One of the tufts of fine twigs into which the arteries of the spleen subdivide.

penile (*pe'-nīl*) [*penis*]. Pertaining to the penis.

penis (*pe'-nis*) [*pendere*, to hang]. The male organ of copulation. It consists of the corpus spongiosum, inclosing the urethra, the two corpora cavernosa, largely composed of erectile tissue, and the glans. **p. captivus**, one held in the vagina during copulation by spasm of the perineal muscles of the female. **p. cerebri**, the pineal gland. **p. factitious**, an artificial penis. Syn., *fascinum*; *dildoe*. **p. feminis**, the clitoris. **p. lipodermus**. See *paraphimosis*. **p. lunatus**, chordee. **p. muliebris**. Synonym of *p. femininis*. **p. palmatus**, one inclosed by the skin of the scrotum. Syn., *webbed penis*. **p. succedaneus**. See *p. factitious*.

penischisis (*pen-is'-kis-is*) [*penis*; σχίσις, a splitting]. A comprehensive term for epispadias and hypospadias.

penitis (*pe-nī'-tis*) [*penis*; ῖτις, inflammation]. Inflammation of the penis.

penjavar yambi. See *penghawar djambi*.

Penjdeh sore (*penj'-deh*) [*Penjdeh*, a village of Russian Turkestan]. See *furunculus orientalis*.

penniform (*pen'-if-orm*) [*penna*, feather; *forma*, form]. Shaped like a feather; said of certain muscles.

pennyroyal (*pen-e-roi'-al*). See *hedeoma*.

pennyweight (*pen'-e-wāt*) [AS., *pening*, penny; *wegan*, weigh]. A weight of 24 grains.

penologist (*pe nol'-o-jist*). One who makes a study of crime and its cause and prevention.

penology, pœnology (*pe-nol'-o-je*) [ποινή, penalty; λόγος, science]. The science treating of crime, its punishment and prevention; the study of the management of prisons, etc.

penoplasty (*pē'-no-plas-te*) [*penis*; πλάσσειν, to mold]. A plastic operation on the penis.

penoscrotal (*pe-no-skro'-tal*). Pertaining to the penis and the scrotum.

pensioner, Chelsea. See under *Chelsea*.

pent-. A prefix used to signify *five*.

pentabasic (*pen-tab-a'-sik*) [πέντε, five; *basis*, base]. Having five replaceable hydrogen atoms.

pentabromides (*pen-tah-bro'-mīdz*). Trade name of a combination of the bromides of potassium, sodium, lithium, calcium, and ammonium.

pentad (*pen'-tad*) [πέντε, five]. An element or radical having a valence of five.

pentaglucose (*pen-tah-glu'-kōs*). Pentose.

pental (*pen'-tal*) [πέντε, five], C_5H_{10}. Trimethylethylene; it is used os an anesthetic.

pentamethylendiamine (*pen-tah-meth-il-en-di'-amin*). See *cadaverine*.

pentane (*pen'-tān*) [πέντε, five], C_5H_{12}. The fifth member of the paraffin series of hydrocarbons. It is a liquid and occurs in naphtha.

Pentastoma (*pen-tas-to'-mah*) [πέντε, five; στόμα, mouth]. A genus of entozoa, worm-like parasites, generally classed as arthropoda. There are many species, several of which have been found encysted in the human liver and lungs. See *linguatula*.

pentatomic (*pen-tat-om'-ik*) [πέντε, five; ἄτομος, atom]. 1. Containing five atoms. 2. Having five replaceable hydrogen atoms in the molecule.

pentavaccine (*pen-tah-vak'-sēn*) [πέντε, five; *vaccine*]. A vaccine of the dead cultures of typhoid, paratyphoid A. and B., cholera, and Mediterranean fever.

pentavalent (*pen-tav'-al-ent*) [πέντε, five; *valens*, having power]. Having a valence of five.

pentene (*pen'-tēn*) [πέντε, five], C_5H_{10}. Amylene, one of the olefin series of hydrocarbons.

pentosan (*pen'-to-san*). A complex carbohydrate capable of forming a pentose by hydrolysis.

pentosazon (*pen-to'-saz-ōn*). A body occurring in urine, possessing marked reducing qualities, but incapable of fermentation; it represents an abnormality in the total metabolism of the body.

pentose (*pen'-tōs*) [πέντε, five]. Any one of a class of carbohydrates containing five atoms of carbon. The pentoses are not fermentable, and on boiling with dilute hydrochloric acid yield furfurol.

pentosuria (*pen-to-sū'-re-ah*) [*pentose*; οὖρον, urine]. The presence of pentose in the urine. Urine containing pentose reduces Fehling's solution, but does not ferment.

pentoxide (*pen-toks'-id*) [πέντε, five; *oxide*]. An oxide containing five atoms of oxygen.

pentyl (*pen'-til*) [πέντε, five; ὕλη, matter], C_5H_{11}. A univalent hydrocarbon. **p. hydride**, same as *amyl hydride*.

Penzoldt's test for acetone (*pen'-tsōlt*) [Franz *Penzoldt*, German physician, 1849–]. Treat a warm saturated solution of orthonitrobenzaldehyde with the liquid to be tested for acetone, and alkalinize with sodium hydroxide. If acetone is present, the liquid becomes first yellow, then green, and lastly indigo separates, which may be dissolved with a blue color on shaking with chloroform. **P.'s test for glucose in urine**, to a few cubic centimeters of urine add some caustic potash, and enough of a weakly alkaline solution of diazobenzol sulphonic acid to equal the amount of urine. Shake for one-fourth to one-half of an hour to produce foam. A light Bordeaux-red or yellowish-red coloration will result, with a red foam.

Penzoldt and Fischer's test for phenol. Treat a strongly alkaline solution of phenol with a solution of diazobenzol sulphonic acid; a deep red coloration is produced.

peonin (*pe'-o-nin*), $C_{19}H_{18}O_2(NH_2)$. An indicator for alkalies.

peotillomania (*pe-o-til-o-ma'-ne-ah*) [πέος, penis; τίλλειν, to pluck; *mania*]. The habit of constantly pulling the penis; it is not masturbation, but a nervous habit.

peotomy (*pe-ot'-o-me*) [πέος, penis; τομή, a cutting]. Amputation of the penis.

pepana (*pep'-an-ah*). Trade name of a preparation of pepsin and pancreatin so arranged and coated that the pepsin is released in the stomach and the pancreatin in the intestine.

pepo (*pe'-po*) [πέπων, ripe; mellow]. Seed of the pumpkin, *Cucurbita pepo*; it is a teniafuge.

peporesin (*pe-po-rez'-in*). A hard substance in the husk of pumpkin-seeds; it is a vermicide.

pepper (*pep'-er*) [*piper*, from Skt., *pippala*]. The fruit of various species of *Piper*, of the order *Piperaceæ*. **p., black**, the *piper* of the U. S. P.; *piper nigrum* of the B. P., contains a neutral principle, *piperin* (*piperina*, U. S. P.), an acrid resin, and a volatile oil, and is used as a condiment and as a carminative stimulant, and to a slight extent is antiperiodic. Dose 5–20 gr. (0.32–1.3 Gm.). **p., Cayenne**. See *capsicum*. **p., oleoresin of** (*oleoresina piperis*, U. S. P.). Dose ¼–1 min. (0.016–0.065 Cc.). **p., white**, similar to black pepper, but less active.

pepperette (*pep-er-et'*). Olive pits used for adulterating pepper.

peppermint. See *mentha piperita.*

peppermint test. A method of discovering defective drain-pipes by pouring oil of peppermint down the pipes or trap connected with the drain; the odor of the peppermint enters the house if the drain pipe leaks.

pepsalia (*pep-sa'-le-ah*). A digestive salt, probably a mixture of pepsin and sodium chloride.

pepsencia (*pep-sen'-she-ah*). A preparation containing the enzymes of the gastric glands.

pepsic (*pep'-sik*). Same as *peptic.*

pepsin [πέψις, digestion]. A ferment found in the gastric juice, and capable of digesting proteids in the presence of an acid. It splits albumin into antialbumose and hemialbumose, the former of which it separates into two molecules of antipeptone, while the latter is acted upon by trypsin and split into two molecules of hemipeptone. Pepsin is used in medicine to aid digestion. The *pepsinum* of the U. S. P. and B. P. is obtained from the stomach of pigs. Dose 10–15 gr. (0.65–1.0 Gm.). **pepsinum saccharatum,** pepsin mixed with sugar of milk. **pepsini, vinum,** contains 0.3 % of hydrochloric acid. Dose ½–1 oz. (16–32 Cc.).

pepsinate (*pep'-sin-āt*) [πέψις, digestion]. To mix, or prepare, with pepsin.

pepsiniferous (*pep-sin-if'-er-us*) [*pepsin; ferre,* to bear]. Producing pepsin.

pepsinogen (*pep-sin'-o-jen*) [*pepsin;* γεννᾶν, to beget]. The antecedent substance or zymogen of pepsin, present in the cells of the gastric glands, and which during digestion is converted into pepsin.

pepsinogenous (*pep-sin-oj'-en-us*). See *pepsiniferous.*

pepsinum (*pep-si'-num*). See *pepsin.*

pepsis (*pep'-sis*) [πέψις, digestion]. Digestion.

peptamine (*pep'-tam-ēn*). An amine derived from a polypeptide containing a histidine radical.

peptic (*pep'-tik*) [*pepsin*]. 1. Pertaining to pepsin. 2. Pertaining to digestion. **p. glands,** the glands situated in the cardiac and middle thirds of the stomach, and secreting pepsin and hydrochloric acid. **p. ulcer,** the round ulcer of the stomach, due to erosion of the mucous membrane by the gastric juice.

pepticity (*pep-tis'-it-e*) [πέπτειν, to digest]. The state of being peptic; eupepsia.

peptid (*pep'-tid*). A compound of amino-acids intermediate between peptones and the individual amino-bodies.

peptidase (*pep'-tid-ās*). An enzyme which splits peptides to amino-acids.

peptidolytic (*pep-tid-o-lit'-ik*) [*peptid;* λύτικος, solvent]. Causing the digestion or splitting up of peptids into amino-acids.

peptinotoxin (*pep-tin-o-toks'-in*). See *peptotoxin.*

peptization (*pep-ti-za'-shun*). The process by which a piece of a solid material is converted into a colloidal solution, or is dispersed into a liquid medium.

peptobromeigon (*pep-to-brōm'-ig-on*). Trade name of a compound of protein and bromine, suggested as a substitute for bromides.

peptocrinine (*pep-to-krin'-ēn*). An extract derived from the mucosa of the intestine, said to resemble secretin.

peptogaster (*pep-to-gas'-ter*) [πέπτειν, to digest; γαστήρ, belly]. The intestinal canal, or digestive apparatus as a whole.

peptogastric (*pep-to-gas'-trik*) [πέπτειν, to digest; γαστήρ, belly]. Pertaining to the peptogaster; peptic.

peptogen (*pep'-to-jen*) [πέψις, digestion; γεννᾶν, to beget]. A substance that favors the production of pepsin.

peptogenic (*pep-to-jen'-ik*) [*pepsin;* γεννᾶν, to produce]. Producing pepsin or peptones.

peptogenous (*pep-toj'-en-us*) [πέψις, digestion; γεννᾶν, to produce]. Producing pepsin or peptones.

peptoiodeigon (*pep-to-i'-ō-de-gon*). Trade name of a compound of protein and iodine, suggested as a substitute for iodoform.

peptolysis (*pep-tol'-is-is*) [*peptone;* λύσις, destruction]. The hydrolysis or splitting up of peptones.

peptomangan (*pep-to-man'-gan*). A proprietary compound said to consist of iron, manganese, and peptone; used in tuberculosis, etc.

peptone (*pep'-tōn*) [πέπτειν, to cook]. A protein body formed by the action of ferments on albumins during gastric and pancreatic digestion. It may be considered a hydrated albumin. Before the final formation of peptone several similar intermediate compounds are produced, as *hemipeptone* and *antipeptone.* See *pepsin. Amphopeptone* is a mixture of these two. *Propeptone* or hemialbumose is a mixture of several intermediate products. *Parapeptone* is also an intermediate product of digestion and is closely allied to syntonin. *Gelatin-peptone* is a peptone formed in the digestion of gelatin. Peptones are soluble, readily diffusible, are not precipitated by boiling, by nitric acid, or by potassium ferrocyanide; they are precipitated by mercury bichloride, by tannic acid, and by phosphomolybdic acid; they give Millon's test, and the xanthoproteic and biuret reactions; they are levorotatory. **p., albumin-,** a light yellow powder obtained from white of egg by action of pepsin with a little hydrochloric acid; used as a nutrient. **p. anhydride.** See *albuminate.* **p., beef,** true peptone from beef; a light brown powder, soluble in water, used as a nutrient in dyspepsia. **p., casein,** peptonized casein from milk; a yellow, hygroscopic powder used as a nutrient. **p., milk.** See *p., casein.* **p. powder,** a nutrient containing 91 % of peptone. **p.s., test for.** See *Hofmeister.*

peptonemia, peptonæmia (*pep-to-ne'-me-ah*) [*peptone;* αἷμα, blood]. The presence of peptone in the blood.

peptonization (*pep-to-ni-za'-shun*) [*peptone*]. The process of converting proteins into peptones.

peptonic (*pep-ton'-ik*). Pertaining to, or containing, peptone.

peptonize (*pep'-to-nīz*) [*peptone*]. To digest with pepsin; to predigest; to convert into peptones.

peptonoid (*pep'-to-noid*) [πέπτειν, to digest; εἶδος, like]. A substance resembling or claimed to resemble peptones.

peptonoids (*pep'-to-noids*). Trade name of a predigested food.

peptonuria (*pep-to-nū'-re-ah*) [*peptone;* οὖρον, urine]. The presence of peptones in the urine. **p. enterogenous,** peptonuria due to disease of the intestine. **p. hepatogenous,** that accompanying certain liver-affections. **p. nephrogenous,** peptonuria of renal origin. **p., puerperal,** the peptonuria of the puerperal state. **p., pyogenic,** that produced by suppuration in the body.

peptosin (*pep'-to-sin*). Trade preparation of pepsin.

peptothyroid (*pep-to-thi'-roid*). A proprietary peptonized preparation of thyroid extract.

peptotoxin (*pep-to-toks'-in*) [*peptone; τοξικόν*, a poison]. A poisonous ptomaine found in peptones and in putrefying albuminous substances, such as fibrin, casein, brain, liver, and muscle. **p., cholera,** a toxic substance generated by cholera bacillus, and chemically allied to peptone.

peptovarin (*pep-to'-va-rin*). Extract of peptonized ovaries.

pepule (*pep'-ūl*). Trade name for a pill.

per [L.]. A preposition meaning through. **p. anum,** by way of the anus. **p. os,** by the mouth. **p. rectum,** by the rectum. **p. vaginam,** by the vagina. **p. viam,** by the way of.

per-. A prefix with an intensive meaning denoting "very;" also in chemistry denoting the highest of a series

peracephalus (*per-as-ef'-al-us*) [*πέρα*, more than; *ἀκέφαλος*, without a head]. A fetal monstrosity characterized by want of upper extremities, also by malformation or absence of the thorax

peracidity (*per-as-id'-it-e*) [*per*, very; *acidus*, acid]. Excessive acidity.

peracute (*per-ak-ūt'*) [*per*, very; *acutus*, sharp]. Very acute.

peralga (*per-al'-gah*) [*per-*; *ἄλγος*, pain] Trade name of a preparation to prevent pain. said to be amidopyrine diethylbarbiturate.

perarticulation (*per-ar-tik-ū-la'-shun*) [*per; articulation*]. Synonym of *diarthrosis*.

peratodynia (*per-at-o-din'-e-ah*) [*πέρας*, end; *ὀδύνη*, pain]. Pain at the cardiac extremity of the stomach.

perborax (*per-bōr'-aks*). A compound of sodium polyborate and perborate, containing about 4 % of active oxygen; used like borax.

perboric acid. Pyroboric acid.

percaine (*per-ka'-ēn*). A local anesthetic derived from quinoline claimed to be less toxic than stovaine.

perception (*per-sep'-shun*) [*per, capere*, to receive]. 1. The act of receiving impressions through the medium of the senses 2 The faculty receiving such impressions.

perceptive (*per-sep'-tiv*). Pertaining to, or characterized by, perception.

perceptivity (*per-sep-tiv'-it-e*) [*per*, through; *capere*, to receive] The faculty or capability of receiving impressions.

perceptorium (*per-sep-to'-re-um*) *Sensorium.*

perchlorate (*per-klo'-rāt*). See *perchloric* acid.

perchlorhydria (*per-klor-hi'-dre-ah*). See *hyperchlorhydria*.

perchloric acid (*per-klo'-rik*) [*per; χλωρός*, green], $HClO_4$. The highest oxyacid of chlorine. It is a volatile liquid decomposing in contact with organic substances, and forming salts called *perchlorates*.

perchloride (*per-klo'-rīd*). A chloride with the highest chlorine content.

perclusion (*per-kloo'-shun*) [*per*, through; *claudere*, to shut up]. Inability to execute any movement.

percolate (*per'-ko-lāt*) [*percolare*, to strain through]. 1. To submit to the process of percolation. 2. The solution obtained by percolation.

percolation (*per-ko-la'-shun*) [see *percolate*]. The process of extracting the soluble constituents of a substance by allowing the solvent to trickle through a powdered mass placed in a long conical vessel—the *percolator*.

percolator (*per'-ko-la-tor*) [*percolare*, to strain through]. A long conical vessel with a delivery-tube at the lower extremity, employed for the purpose of extracting the soluble constituents of a substance, packed in a percolator, by means of a liquid poured over it.

percuss (*per-kus'*) [*percutere*, to strike]. To perform percussion upon.

percussion (*per-kush'-un*) [*percutere*, to strike through]. A method of physical diagnosis applied by striking upon any part of the body, with a view to ascertaining the conditions of the underlying organs by the character of the sounds elicited. **p., auscultatory,** percussion combined with auscultation. It is best performed by placing a double stethoscope at a fixed point and percussing gently all around. **p., finger,** mediate percussion in which a finger is used as a pleximeter, and a finger of the other hand as a plessor. **p., immediate,** percussion in which the surface is struck directly, without the interposition of a pleximeter. **p., instrumental,** the use of a special hammer as a plexor, either alone or with a plate as a pleximeter. **p., mediate,** percussion in which a pleximeter is used **p.-note,** the sound elicited on percussion. **p., threshold,** percussion in which a glass rod is used as the plessimeter, the glass rod touching the surface of the body by only one extremity. **p.-wave,** the term given to the chief ascending wave of the sphygmographic tracing.

percussopunctator (*per-kus-o-pungk-ta'-tor*) [*percutere*, to beat, *punctare*, to mark]. An instrument resembling a plexor or hammer, consisting principally of a group of needles by means of which multiple punctures are made into the tissues in rheumatism, lumbago, and neuralgia.

percussor (*per-kus'-or*) [*percutere*, to strike through]. He who or that which percusses; a percutor or plessor.

percutaneous (*per-kū-ta'-ne-us*) [*per; cutaneous*]. Performed through the skin, as *percutaneous* faradization **p. reaction,** the reaction given in the Moro test when positive.

percutor (*per-kū'-tor*) [*percutere*, to strike]. An instrument used in the percussion of massage and in therapeutic flagellation

Percy's operation (*per'-se*) [J F *Percy*, American surgeon, 1864–]. A method of destroying cancer tissue by the use of carefully regulated heat The following agents are employed. radiant energy, hot air, hot water, steam, electro-coagulation, fulguration, and the actual cautery.

pereirine (*per-i'-rēn*). An amorphous alkaloid found in the bark of *Geissospermum læve*. Its hydrochloride and valerianate are used as antipyretics.

perencephalia, perencephaly (*per-en-sef-a'-le-ah, per-en-sef'-al-e*) [*πήρα*, a pouch, *ἐγκέφαλος*, brain]. A condition marked by multiple cystic brain tumors.

Perez's bacillus. The supposed microorganism of ozena. **P.'s sign.** A loud friction-murmur heard over the sternum when the patient raises his arms, especially the left, over his head and lets them fall again, it is noted in cases of aneurysm of the arch of the aorta and in mediastinal tumors.

perflation (*per-fla'-shun*) [*perflare*, to blow through]. 1. A method of ventilation by which a current of air blowing against a dwelling is made to force its way in. 2 The act of forcing air into a cavity for the purpose of evacuating fluid.

perforans (*per'-for-anz*) [*perforate*]. Penetrating or perforating, a term applied to a muscle or nerve perforating a part.

perforate (*per'-for-āt*) [*per; forare*, to bore]. In biology, pierced with small holes.

perforated (*per'-for-a-ted*) [*perforate*]. Pierced through. **p. space**, a part of the base of the brain pierced with many small holes for the passage of blood-vessels. The *anterior perforated space* is situated on the inner side of the fissure of Sylvius; the *posterior perforated space*, between the corpora albicantia in front, the pons behind, and the crura cerebri on either side.

perforating (*per'-for-a-ting*) [*perforate*]. Piercing. **p. ulcer.** See *ulcer, perforating.*

perforation (*per-for-a'-shun*) [*perforate*]. 1 The act of piercing or boring into a part; especially the piercing of the fetal head during labor. 2. A hole made through a part or the wall of a cavity.

perforator (*per'-for-a-tor*) [*perforate*]. An instrument for boring through the fetal skull; also for perforating other bones

perforatorium (*per-for-a-to'-re-um*). 1. The pointed process of the spermatozoon head. 2. Same as *cephalotome.*

perforatus (*per-for-a'-tus*) [*perforate*]. Perforated, applied to a muscle which is perforated by another muscle or by a nerve

perfrication (*per-frik-a'-shun*) [*per*, through; *fricare*, to rub] Inunction.

perfrigeration (*per-frij-er-a'-shun*) [*per; frigus*, cold]. Mild frostbite.

perfusion (*per-fū'-zhun*) [*per; fundere*, to pour]. A pouring of fluid into or through; the passage of a fluid through spaces.

pergenol (*per'-jen-ol*). A solid compound of hydrogen dioxide which dissolves in water, forming a solution of H_2O_2

perhydrase milk (*per-hī'-drās*). Milk which has been treated with hydrogen peroxide.

perhydrol (*per-hī'-drol*). Trade name of a 30 per cent solution of hydrogen dioxide

peri- (*per-e-*) [περί, around] A prefix signifying around or surrounding

periacinal, periacinous (*per-e-as'-in-al, per-e-as'-in-us*) [*peri-; acinus*, a grape]. Lying around an acinus.

periadenitis (*per-e-a-den-i'-tis*) [*peri-; ἀδήν*, gland, *itis*, inflammation]. Inflammation of the tissues that surround a gland.

periadventitial (*per-e-ad-ven-tish'-al*) [*peri-; adventitia*] Situated, or occurring, around the adventitia, or external coat of a vessel.

perialgia (*per-e-al'-je-ah*) [*peri*, very, ἄλγος, pain]. A condition of excruciating pain.

perialienitis (*per-e-āl-yen-i'-tis*) [*peri-; alienus*, foreign]. Noninfectious inflammation due to a foreign body. Syn., *perialientis cirrhosa.*

periamygdalar (*per-e-am-ig'-dal-ar*) [*peri-; ἀμύγδαλη*, tonsil]. Around a tonsil.

periamygdalitis (*per-e-am-ig-dal-i'-tis*) [*peri-; ἀμύγδαλη*, tonsil; *itis*, inflammation]. Inflammation around the tonsil; peritonsillitis.

perianal (*per-e-a'-nal*) [*peri-; anus*]. Situated or occurring around the anus

periangiocholitis (*per-e-an-je-o-ko-li'-tis*) [*peri-; ἀγγεῖον*, vessel; *χολή*, bile; *itis*, inflammation]. Inflammation of the connective tissues surrounding the biliary ducts.

periangioma (*per-e-an-je-o'-mah*) [*peri-; ἀγγεῖον*, vessel; *ὄμα*, tumor]. A tumor surrounding a vessel.

periangitis (*per-e-an-ji'-tis*) [*peri; ἀγγεῖον*, a vessel; *itis*, inflammation]. Inflammation of the outer coat of or the tissues surrounding an artery or vein; or inflammation of the tissues surrounding a lymphatic vessel

periaortitis (*per-e-a-or-ti'-tis*) [*peri-; aorta; itis*, inflammation]. Inflammation of the tissues surrounding the aorta

periapical (*per-e-a'-pik-al*) [*peri-; apex*]. About, or adjacent to, the apex of a tooth.

periappendicitis (*per-e-ap-en-dis-i'-tis*). Inflammation of the tissue around the vermiform appendix.

periappendicular (*per-e-ap-en-dik'-ū-lar*). Surrounding the vermiform appendix, or any other appendix.

periapt (*per'-e-apt*) [περίαπτος, hung upon]. An amulet.

periarterial (*per-e-ar-te'-re-al*). Surrounding an artery.

periarteritis (*per-e-ar-ter-i'-tis*). Inflammation of the external sheath of an artery. **p. nodosa**, a thickening of the arterial coats in localized areas, producing nodular swellings.

periarthric (*per-e-ar'-thrik*) [*peri; ἄρθρον*, a joint]. Periarticular.

periarthritis (*per-e-ar-thri'-tis*). Inflammation of the tissues about a joint.

periarticular (*per-e-ar-tik'-ū-lar*). About a joint.

periatrial (*per-e-a'-tre-al*) [*peri-; atrium*]. Situated around the atrium, or auricle, of the heart.

periauricular (*per-e-aw-rik'-ū-lar*) [*peri; auricle*]. 1. Periatrial. 2 Surrounding the external ear.

periaxial (*per-e-aks'-e-al*) [*peri-, axis*] Surrounding an axis. **p. neuritis**, inflammation of the myelin sheath but not of the axis-cylinder of a nerve

periaxillary (*per-e-aks'-il-a-re*). Around the axilla.

periaxonal (*per-e-aks'-on-al*) [*peri-; axon*]. Around an axone.

periblast (*per'-e-blast*) [*peri-; βλαστός*, a germ]. The protoplasm surrounding the nucleus of a cell; periplast.

periblastic (*per-e-blas'-tik*) [*peri-; βλαστός*, a germ]. Pertaining to the periblast. Germinating from the surface of an ovum

periblepsia, periblepsis (*per-e-blep'-se-ah, -sis*) [*peri-; βλέπειν*, to look]. The wild look of a patient in delirium

peribronchial (*per-e-brong'-ke-al*) [*peri-; bronchus*]. Surrounding a bronchus; occurring about a bronchus.

peribronchiolar (*per-e-brong'-ke-o-lar*) [*peri; bronchiole*]. Surrounding the bronchioles

peribronchiolitis (*per-e-brong-ke-o-li'-tis*) Inflammation around the bronchioles.

peribronchitis (*per-e-brong-ki'-tis*). Inflammation of the tissue immediately surrounding the bronchi.

peribrosis (*per-ib-ro'-sis*) [*peri-; βρῶσις*, a feeding]. Ulceration at the canthi of the eyelids.

peribulbar (*per-e-bul'-bar*) [*peri; bulb*]. Surrounding any bulb. See *bulb.*

peribursal (*per-e-bur'-sal*). Surrounding a bursa.

pericæcal (*per-is-e'-kal*). See *pericecal.*

pericanalicular (*per-e-kan-al-ik'-ū-lar*). Surrounding a canaliculus.

pericardiac, pericardial (*per-e-kar'-de-ak, per-e-kar'-de-al*) [*pericardium*]. Pertaining to the pericardium.

pericardicentesis (*per-e-kar-de-sen-te'-sis*) [*pericardium; κέντησις*, a pricking]. Puncture of the pericardium.

pericardiectomy (*per-e-kar-de-ek'-to-me*) [*pericardium; ἐκτόμη*, excision]. Excision of a part of the pericardium.

pericardiolysis (*per-e-kar-de-ol'-is-is*) [*pericardium; λύσις*, loosening]. Cardiolysis.

pericardiophrenic (*per-e-kar-de-o-fren'-ik*) [*pericardium; φρήν*, diaphragm]. Pertaining to the pericardium and the diaphragm.

pericardiopleural (*per-e-kar-de-o-ploo'-ral*). Relating to the pericardium and to the pleuræ.

pericardiorrhaphy (*per-e-kar-de-or'-af-e*) [*pericardium; ῥαφή*, suture]. The suturing of a wound in the pericardium.

pericardiotomy (*per-ik-ar-de-ot'-o-me*) [*pericardium; τομή*, a cutting]. Incision of the pericardium.

pericarditic (*per-ik-ar-dit'-ik*). Pertaining to pericarditis.

pericarditis (*per-e-kar-di'-tis*) [*pericardium; ιτις*, inflammation]. Inflammation of the pericardium. The symptoms are slight fever, precordial pain and tenderness, cough, dyspnea, and rapid pulse. The physical signs vary—in the early stage there is a distinct friction-sound on auscultation, and sometimes a fremitus on palpation. In the stage of effusion there are bulging of the precordia and a triangular area of dulness, the base of which is downward; the heart-sounds are muffled. In chronic pericarditis with adhesions there is often systolic retraction of the precordia. The causes of pericarditis are rheumatism, the acute and chronic infectious diseases, Bright's disease, and extension of inflammation from neighboring parts. **p., adhesive,** that in which the two layers of pericardium tend to adhere. **p., carcinomatous,** that due to carcinoma of the pericardium. **p., dry,** a form without effusion. **p., external,** that affecting the outer layer of the pericardium. **p., fibrinous,** a form in which the membrane is covered with a fibrinous exudate, first soft and buttery in consistence, but later organizing. **p., hemorrhagic,** a form in which the fluid is hemorrhagic. This is the case most often in tuberculous pericarditis, also in scorbutus and in cachectic conditions. **p., localized,** a form giving rise to whitish areas, the so-called milk spots. **p., moist,** that attended by an effusion. **p. obliterans,** a form leading to obliteration of the cavity by the adhesions of the layers. **p., purulent,** a variety in which the effused fluid becomes purulent. **p., serofibrinous,** a form in which there is but little lymph or fibrin, but a considerable quantity of serous fluid. **p., tuberculous,** a form due to tuberculous infection of the pericardium. **p., typhoid,** that in which there are high fever and typhoid symptoms.

pericardium (*per-e-kar'-de-um*) [*peri-; καρδία*, heart]. The closed membranous sac enveloping the heart. Its base is attached to the central tendon of the diaphragm; its apex surrounds for a short distance the great vessels arising from the base of the heart. It consists of an outer fibrous coat, derived from the cervical fascia, and an inner serous coat. The sac normally contains from 5 to 20 Gm. of clear serous liquid. The part in contact with the heart (*visceral pericardium*) is termed the *epicardium;* the other is the *parietal pericardium.* **p., bread-and-butter,** a peculiar appearance produced in fibrinous pericarditis by the rubbing of the two surfaces of the membrane over each other. **p., shaggy,** a pericardium upon which, as the result of fibrinous pericarditis, thick, loose, shaggy layers of fibrin are deposited.

pericardosis (*per-e-kar-do'-sis*). Microbic infection of the perdicarium.

pericardotomy (*per-e-kar-dot'-o-me*) [*pericardium; τομή*, a cutting]. The operation of opening the pericardium.

pericarp (*per'-e-karp*) [*peri; καρπος*, fruit]. The ripe ovary of a flower.

pericaryon (*per-e-kar'-e-on*). Perikaryon.

pericecal (*per-e-se'-kal*) [*peri-; cecum*]. Surrounding the cecum.

pericecitis (*per-e-se-si'-tis*). Perityphlitis.

pericellular (*per-is-el'-ū-lar*) [*peri-; cellula*, a small cell]. Surrounding a cell.

pericemental (*per-e-se-men'-tal*). Pertaining to the pericementum.

pericementitis (*per-e-sem-ent-i'-tis*) [*peri-; cementum*, cement; *ιτις*, inflammation]. Fauchard's disease; progressive necrosis of the dental alveoli.

pericementoclasia (*per-e-se-men-to-kla'-ze-ah*) [*pericementum; κλάσις*, a breaking]. Breaking down of the pericementum with absorption of the alveolar bone.

pericementum (*per-e-sem-ent'-um*). A dense fibrous tissue covering the fang of a tooth.

pericentral (*per-ss-en'-tral*). Situated around a center, or centrum.

pericerebral (*per-e-ser'-e-bral*) [*peri; cerebrum*]. Around the cerebrum.

perichareia (*per-ik-ar-i'-ah*) [*περιχαρής*, very glad]. Sudden vehement, or morbid rejoicing; a symptom in certain insanities.

pericholangitis (*per-e-ko-lan-ji'-tis*). See *periangiocholitis.*

pericholecystitis (*per-ik-ol-e-sis-ti'-tis*) [*peri-; χολή*, bile; *κύστις*, bladder; *ιτις*, inflammation]. Inflammation near or around the gall-bladder.

pericholous (*per-ik'-o-lus*) [*peri-; χολή*, bile]. Excessively bilious.

perichondral (*per-e-kon'-dral*). Relating to the perichondrium.

perichondrial (*per-ik-on-dre'-al*). Pertaining to or resembling perichondrium.

perichondritic (*per-ik-on-drit'-ik*). Pertaining to or affected with perichondritis.

perichondritis (*per-e-kon-dri'-tis*) [*perichondrium; ιτις*, inflammation]. Inflammation of the perichondrium.

perichondrium (*per-e-kon'-dre-um*) [*peri-; χόνδρος*, cartilage]. The fibrous connective tissue covering the surface of cartilage.

perichondroma (*per-ik-on-dro'-mah*) [*peri-; χόνδρος*, cartilage; *ὄμα*, tumor]. A tumor of the perichondrium.

perichord (*per'-ik-ord*) [*peri-; χορδή*, cord]. The sheath of the notochord.

perichordal (*per-ik-or'-dal*). Pertaining to the perichord.

perichoroid, perichoroidal (*per-ik-o'-roid, per-ik-o-roi'-dal*) [*peri-; χόριον, chorion; εἶδος*, like]. Surrounding the choroid.

periclasia (*per-e-kla'-ze-ah*) [*peri; κλάσις*, a breaking]. Synonym of periodontoclasia, *q. v.*

periclasis (*per-ik'-las-is*) [*περικλᾶν*, to twist around]. A comminuted fracture.

periclaustral (*per-e-klaws'-tral*) [*peri; claustrum*]. Surrounding the claustrum of the brain.

pericolitis (*per-e-ko-li'-tis*) [*peri-; colitis*]. Inflammation of the peritoneum or tissues around the colon.

pericolonitis (*per-ik-o-lon-i'-tis*). Same as *pericolitis.*

pericolpitis (*per-e-kol-pi'-tis*). See *paracolpitis.*

periconchal (*per-ik-ong'-kal*) [*peri-; κόγχη*, a shell]. Surrounding the concha of the ear. **p. sulcus,** a

sulcus separating the helix and the convex hinder surface of the concha.

periconchitis (*per-e-kon-ki'-tis*) [*peri-; κόγχη*, the socket of the eye]. Inflammation of the periosteum or lining membrane of the orbit.

pericorneal (*per-e-kor'-ne-al*) [*peri-; cornea*]. Surrounding the cornea.

pericowperitis (*per-e-kow-per-i'-tis*). Inflammation of the tissues about Cowper's glands.

pericoxitis (*per-e-koks-i'-tis*). Inflammation of the tissues around the hip-joint

pericranial (*per-e-kra'-ne-al*) [*pericranium*]. Pertaining to the pericranium.

pericranitis (*per-ik-ra-ni'-tis*). Inflammation of the pericranium.

pericranium (*per-e-kra'-ne-um*) [*peri-; κρανίον*, skull]. The periosteum of the skull. **p. internum.** See *endocranium*.

pericystic (*per-e-sis'-tik*). 1. Surrounding a cyst. 2. Surrounding a bladder either gall-bladder or urinary bladder.

pericystitis (*per-e-sis-ti'-tis*). Inflammation of the peritoneum or other tissue surrounding the bladder.

pericystium (*per-e-sis'-te-um*) [*peri-; κύστις*, a cyst]. 1. The vascular wall of a cyst. 2. The tissues surrounding a bladder.

pericytial (*per-e-sit'-e-al*) [*peri-; κύτος*, a cell]. Surrounding a cell.

peridectomy (*per-e-dek'-to-me*). Same as *peritomy*.

peridendritic (*per-e-den-drit'-ik*). Surrounding a dentrite.

peridental (*per-e-den'-tal*) [*peri-; dens*, a tooth]. Surrounding a tooth or its root; periodontal.

peridentitis (*per-e-den-ti'-tis*) [*peri-; dens*, tooth; *ιτις*, inflammation]. Pyorrhea.

periderm (*per'-id-erm*) [*peri-; δέρμα*, skin]. 1. The cuticle. 2. The Malpighian layer of the skin.

peridermal, peridermic (*per-id-er'-mal, per-id-er'-mik*). Cuticular; pertaining to the periderm.

peridesmic (*per-e-dez'-mik*). Pertaining to the peridesmium; periligamentous.

peridesmitis (*per-id-es-mi'-tis*). Inflammation of the peridesmium.

peridesmium (*per-e-dez'-me-um*) [*peri-; δεσμός*, a band]. The delicate membrane that invests a ligament.

peridiastole (*per-e-di-as'-to-le*) [*peri-; diastole*]. The pause between the systole and diastole.

peridiastolic (*per-e-di-as-tol'-ik*). Prediastolic.

perididymis (*per-e-did'-im-is*) [*peri-; δίδυμος*, a testicle]. The tunica albuginea testis.

perididymitis (*per-e-did-im-i'-tis*) [*perididymis; ιτις*, inflammation]. Inflammation of the perididymis.

peridiverticulitis (*per-e-di-ver-tik-ū-li'-tis*) [*peri; diverticulum; ιτις*, inflammation]. Inflammation of the structures surrounding a diverticulum of the intestines.

periduodenitis (*per-e-dū-od-en-i'-tis*) [*peri-; duodenum; ιτις*, inflammation]. Condition in which the duodenum is adherent to surrounding peritoneum.

periencephalitis (*per-e-en-sef-al-i'-tis*). Inflammation of the pia mater.

periencephalomeningitis (*per-e-en-sef-al-o-men-in-ji'-tis*). See *periencephalitis*.

periendothelioma (*per-e-en-do-the-le-o'-mah*). A tumor originating in the endothelium of the lymphatics and the perithelium of the blood-vessels.

periendymal (*per-e-en'-dim-al*). Same as *periependymal*.

perienteric (*per-e-en-ter'-ik*). Situated around the enteron; perivisceral.

perienteritis (*per-e-en-ter-i'-tis*) [*peri-; ἔντερον*, intestine; *ιτις*, inflammation]. Inflammation of the intestinal peritoneum.

perienteron (*per-e-en'-ter-on*) [*peri-; ἔντερον*, intestine]. The primitive perivisceral cavity; the space between the entoderm and the ectoderm, the forerunner of the schizocele or enterocele.

periependymal (*per-e-ep-en'-dim-al*) [*peri-; ependyma*]. Situated, or occurring, outside the ependyma.

periepithelioma (*per-e-ep-e-the-le-o'-mah*). A tumor originating in the endothelium lining the blood-vessels or lymphatics.

Perier's operation (*per-e-a'*) [Charles *Perier*, French surgeon, 1836–1914.] See under *operations*.

perieresis (*per-e-er'-es-is*) [*περιαιρῖν*, to take off]. A circular incision around a tumor or abscess.

periesophageal, pericesophageal (*per-e-e-so-faj'-e-al*) [*peri-; esophagus*]. Situated, or occurring, just outside of, or around, the esophagus.

periesophagitis, pericesophagitis (*per-e-e-sof-aj-i'-tis*) [*peri-; esophagus; ιτις*, inflammation]. Inflammation of the tissues that surround the esophagus.

perifascicular (*per-e-fas-ik'-ū-lar*) [*peri-; fasciculus*, a fascicle]. Surrounding a fasciculus.

perifibral, perifibrous (*per-if-i'-bral, per-if-i'-brus*) [*peri-; fibra*, a fiber]. Surrounding a fiber.

perifistular (*per-e-fis'-tū-lar*). Around a fistula.

perifolliculitis (*per-if-ol-ik-ū-li'-tis*) [*peri-; folliculus*, follicle, *ιτις*, inflammation]. Inflammation around the hair-follicles.

perifolliculosis (*per-if-ol-ik-ū-lo'-sis*) [*peri-; folliculus*, a follicle; *νόσος*, disease]. A follicular skin-affection.

perigangliitis (*per-ig-ang-gle-i'-tis*) [*peri-; ganglion; ιτις*, inflammation]. Inflammation of the tissues surrounding a ganglion.

periganglionic (*per-ig-ang-gle-on'-ik*) [*peri-; ganglion*]. Situated, or occurring, around a ganglion.

perigastric (*per-ig-as'-trik*) [*peri-; γαστήρ*, stomach]. Surrounding or in the neighborhood of the stomach.

perigastritis (*per-e-gas-tri'-tis*). Inflammation of the peritoneal coat of the stomach.

perigemmal (*per-e-jem'-al*) [*peri-; gemma*, a bud]. Around a bulb or bulb-like structure; a mode of termination of certain nerve fibrils.

periglandulitis (*per-e-gland-ū-li'-tis*). Inflammation of the tissues about a small gland.

periglottic (*per-ig-lot'-ik*) [*peri-; γλῶσσα*, the tongue]. Situated around the base of the tongue and the epiglottis.

periglottis (*per-e-glot'-is*) [*peri-; γλῶττις*, the tongue]. The mucous membrane or villous coating of the tongue.

perignathic (*per-ig-na'-thik*) [*peri-; γνάθος*, jaw]. Situated about the jaw.

perihepatic (*per-e-he-pat'-ik*) [*peri-; ἧπαρ*, liver]. Surrounding, or occurring around, the liver.

perihepatitis (*per-e-hep-at-i'-tis*). Inflammation of the peritoneum surrounding the liver.

perihernial (*per-e-her'-ne-al*). Surrounding a hernia.

perihernary, perihernious (*per-e-her'-ne-a-re, -ne-us*). Applied to tissue immediately about a hernia.

perihysteric (*per-e-his-ter'-ik*) [*peri-; ὑστέρα*, the womb]. Around the uterus; periuterine.

perijejunitis (*per-e-jej-ū-nī'-tis*) [*peri; jejunum; itis*, inflammation]. Inflammation of the tissues surrounding the jejunum.

perikaryon (*per-e-kar'-e-on*) [*peri-; κάρυον*, a nut]. The cytoplasm of a neuron; the cell-body of a nerve.

perikeratic (*per-ik-er-at'-ik*) [*peri-; κέρας*, cornea]. Surrounding the cornea.

perilabyrinthitis (*per-e-lab-ir-inth-ī'-tis*). Inflammation of the part surrounding the labyrinth.

perilaryngeal (*per-e-lar-in'-je-al*) [*peri-; larynx*]. Situated, or occurring, around the larynx.

perilaryngitis (*per-e-lar-in-jī'-tis*) [*peri-; larynx; itis*, inflammation]. Inflammation of the areolar tissue surrounding the larynx.

periligamentous (*per-e-lig-am-en'-tus*). Surrounding a ligament.

perilymph (*per'-e-limf*). The fluid separating the membranous from the osseous labyrinth of the ear.

perilymphangial (*per-il-im-fan'-je-al*) [*peri-; lymph; ἀγγεῖον*, vessel] Situated, or occurring, around a lymphatic vessel.

perilymphangitis (*per-e-lim-fan-jī'-tis*) [*peri-; lymph; ἀγγεῖον*, vessel; *itis*, inflammation]. Inflammation of the tissues surrounding a lymphatic vessel.

perilymphatic (*per-e-lim-fat'-ik*). 1. Pertaining to the perilymph. 2. Situated or occurring about a lymphatic vessel.

perimadarous (*per-e-mad'-ar-us*) [*peri-; μαδαρός*, bald]. Applied to a spreading ulcer with the epiderm peeling off before its advance.

perimandibular (*per-e-man-dib'-ū-lar*) [*peri-; mandible*]. Situated or occurring around or in the neighborhood of the lower jaw.

perimastitis (*per-e-mast-ī'-tis*). Inflammation of the connective tissue surrounding the breast.

perimeningitis (*per-e-men-in-jī'-tis*). Inflammation of the dura mater.

perimeter (*per-im'-et-er*) [*peri-; μέτρον*, a measure]. 1. Circumference or border. 2. An instrument for measuring the extent of the field of vision It consists ordinarily of a flat, narrow, metal plate bent in a semicircle, graduated in degrees, and fixed to an upright at its center by a pivot, on which it is movable. Variously colored discs are moved along the metal plate, and the point noted at which the person, looking directly in front of him, distinguishes the color.

perimetric (*per-im-et'-rik*) [*peri-; μήτρα*, uterus; *μέτρον*, measure]. 1. Situated around the uterus 2. Pertaining to perimetry.

perimetritic (*per-im-et-rit'-ik*). Pertaining to perimetritis.

perimetritis (*per-e-met-rī'-tis*) [*perimetrium; itis*, inflammation]. Inflammation of the peritoneal covering of the uterus.

perimetrium (*per-e-me'-tre-um*) [*peri-; μήτρα*, the womb]. The serous covering of the uterus.

perimetrosalpingitis (*per-e-met-ro-sal-pin-jī'-tis*). A collective name for periuterine inflammations.

perimetry (*per-im'-et-re*) [*perimeter*]. The measuring of the field of vision.

perimyelis (*per-im-ī'-el-is*) [*peri-; μυελός*, marrow]. The medullary membrane or endosteum; the areolar envelope of the bone-marrow; the pia mater of the spinal cord.

perimyelitis (*per-e-mi-el-ī'-tis*). Inflammation of the pia mater of the spinal cord.

perimyoendocarditis (*per-e-mi-o-en-do-kar-dī'-tis*). Combined pericarditis, myocarditis, and endocarditis.

perimyositis (*per-e-mi-o-sī'-tis*). Inflammation of the cellular tissue around a muscle.

perimysial (*per-e-mis'-e-al*) [*peri-; μῦς*, muscle]. Of the nature of, or pertaining to, perimysium; enveloping a muscle.

perimysiitis (*per-im-is-e-ī'-tis*) [*peri-; μῦς*, muscle; *itis*, inflammation]. Inflammation of the perimysium.

perimysium (*per-e-mis'-e-um*) [*peri-; μῦς*, muscle]. The connective tissue enveloping the primary bundles of muscle-fibers. **p. externum**, the epimysium. **p. internum**, the endomysium.

perineal (*per-in-e'-al*) [*perineum*]. Pertaining to the perineum. **p. body**, the mass of tissue composed of skin, muscle, and fascia, occupying the interval between the vagina and the rectum of the woman. **p. cystotomy**, cystotomy performed through a perineal incision. **p. fossa**, the ischiorectal fossa. **p. hernia**, a hernia perforating the perineum by the side of the rectum or between the rectum and the bladder or the vagina. **p. section**, incision through the perineum for the relief of urethral stricture, the removal of calculi from the bladder, or the relief of other morbid conditions.

perineauxesis (*per-in-e-awks-e'-sis*) [*perineum; ἄυξησις*, growth]. Any operation for the repair of a lacerated perineum.

perineo- (*per-in-e-o-*) [*perineum*]. A prefix meaning relating to the perineum.

perineocele (*per-in-e'-o-sēl*) [*perineo-; κήλη, hernia*]. Perineal hernia.

perineocolporectomyomectomy (*per-in-e-o-kol-po-rek-to-mi-o-mek'-to-me*). Excision of a myoma by incision of the perineum, vagina, and rectum.

perineoplasty (*per-in-e'-o-plas-te*) [*perineo-; πλάσσειν*, to form]. Plastic operation upon the perineum.

perineorrhaphy (*per-in-e-or'-a-fe*) [*perineo-; ῥαφή*, suture]. Suture of the perineum, usually for the repair of a laceration caused during labor.

perineoscrotal (*per-in-e-o-skro'-tal*). Relating to the perineum and scrotum.

perineosynthesis (*per-in-e-o-sin'-thes-is*) [*perineum; συνθέσις*, a placing together]. A plastic operation upon the perineum in which a graft of vaginal mucosa is made to cover the wound; a variety of perineorrhaphy.

perineotomy (*per-in-e-ot'-o-me*) [*perineo-; τομή*, a cutting]. Incision through the perineum.

perineovaginal (*per-in-e-o-vaj'-in-al*). Relating to the perineum and vagina.

perineovaginorectal (*per-in-e-o-vaj-in-o-rek'-tal*). Relating to the perineum, vagina, and rectum.

perinephral (*per-in-ef'-ral*). Same as *perinephric*.

perinephrial (*per-in-ef'-re-al*). Pertaining to the perinephrium

perinephric (*per-e-nef'-rik*) [*peri-; νεφρός*, kidney]. Situated or occurring around the kidney, as *perinephric* abscess.

perinephritic (*per-e-nef-rit'-ik*) [*perinephritis*]. 1. Pertaining to perinephritis. 2. Improperly used instead of perinephric.

perinephritis (*per-e-nef-rī'-tis*). Inflammation of the tissues surrounding the kidney.

perinephrium (*per-e-nef'-re-um*) [*peri-; νεφρός*, kidney]. The connective and adipose tissue surrounding the kidney.

perinephros (*per-e-nef'-ros*). See *perinephrium*.

perineum, perinæum (*per-in-e'-um*) [*περίνεον*, the perineum]. That portion of the body included in the outlet of the pelvis, bounded in front by the pubic arch, behind by the coccyx

and great sacrosciatic ligaments, and at the side by the tuberosities of the ischium. It is occupied by the terminations of the rectum, the urethra, and the root of the penis, together with their muscles, fasciæ, vessels, and nerves.

perineural analgesia (*per-e-nū-ral*) [*peri; νεῦρον*, nerve]. Analgesia resulting from injection of an analgesic solution into the immediate vicinity of a nerve trunk.

perineurial (*per-e-nū'-re-al*) [*peri-; νεῦρον*, nerve]. Relating to the perineurium. **p. lymph-channels,** lymph-spaces surrounding the nerve-trunks, as in the cornea.

perineuritis (*per-e-nū-rī'-tis*) [*perineurium; itis*, inflammation]. Inflammation of the perineurium.

perineurium (*per-e-nū'-re-um*) [*peri-; νεῦρον*, a nerve]. The connective-tissue sheath investing a funiculus or primary bundle of nerve-fibers.

perinuclear (*per-e-nū'-kle-ar*). Surrounding the nucleus.

periocular (*per-e-ok'-ū-lar*) [*peri-; oculus*, eye]. Surrounding the eye. **p. space,** the space between the globe of the eye and the orbital walls.

period (*pē'-re-od*) [*peri-; ὁδός*, way]. The space of time during which anything is in progress or an event takes place. **p. childbearing,** the period, from puberty to the menopause, during which the female is capable of reproducing offspring. **p., dodging,** a colloquial term for the menopause. **p., incubation-.** See *incubation* (2). **p., menstrual, p., monthly,** the menses. **p., reaction.** See *reaction-period*. **p., respiratory,** the interval between two successive inspirations.

periodic (*pe-re-od'-ik*). Recurring at more or less regular intervals

periodicity (*pe-re-od-is'-it-e*) [*period*]. Recurrence at regular intervals

periodocasein (*pe-re-o-do-ka'-se-in*). A proprietary compound of iodine and casein, used in myxedema.

periodology (*pe-re-od-ol'-o-je*) [*period*; *λόγος*, science]. The sum of what is known concerning the tendency of certain diseases and morbid phenomena to recur at stated periods.

periodontal (*per-e-o-don'-tal*) [*peri-; ὀδούς*, tooth]. 1. Surrounding a tooth, as the *periodontal* membrane, that lining the cement of a tooth. 2. Pertaining to the periodontium or to periodontia.

periodontia (*per-e-o-don'-she-ah*) [*peri; ὀδούς*, tooth]. That branch of dentistry concerned in the prevention and treatment of periodontoclasia.

periodontic (*per-e-o-don'-tik*) [*peri; ὀδούς*, tooth]. Same as periodontal, *q. v.*

periodontist (*per-e-o-don'-tist*) [*peri; ὀδούς*, tooth]. One who is versed in and practises periodontia.

periodontitis (*per-e-o-don-tī'-tis*) [*periodontium; itis*, inflammation]. Inflammation of the periodontal membrane.

periodontium (*per-e-o-don'-she-um*) [*peri-; ὀδούς*, tooth]. The membrane surrounding a tooth; the periodontal membrane.

periodontoclasia (*per-e-o-don-to-kla'-se-ah*) [*peri; ὀδούς*, tooth; *κλάσις*, a breaking]. A disease process which produces or tends to produce a breaking down of the periodontium.

periodontology (*per-e-o-don-tol'-o-je*) [*peri; ὀδούς*, a tooth; *λόγος*, discourse]. The science of all that appertains to the periodontium.

periodoscope (*pe-re-od'-o-skōp*) [*period; σκοπεῖν*, to inspect]. A calendar in the form of a movable dial, used in determining the probable date of confinement.

periods (*pe'-re-ods*). The menses.

periodynia (*per-e-o-din'-e-ah*) [*peri-; ὀδύνη*, pain]. Severe general pain throughout the body.

pericœsophageal. Periesophageal.

pericœsophagitis (*per-e-e-sof-aj-ī'-tis*). See *periesophagitis*.

periomphacous (*per-e-om'-fak-us*) [*peri-; ὀμφακωδής*, like unripe grapes]. Immature, unripe; applied to abscesses.

periomphalic (*per-e-om-fal'-ik*) [*peri; ὀμφάλος*, the navel]. Around, or near, the umbilicus.

perion (*per'-e-on*) [*peri-; ᾠόν*, egg]. The decidua.

perionychia (*per-e-o-nik'-e-ah*) [*peri-; ὄνυξ*, nail]. Inflammation around the nails

perionychium (*per-e-on-ik'-e-um*) [*peri-; ὄνυξ*, nail]. The border of epiderm at the root of the nail.

perionyxis (*per-e-o-niks'-is*). Synonym of *perionychia*.

peri-oophoritis (*per-e-o-of-or-ī'-tis*) [*peri-; oophoron; itis*, inflammation] Inflammation of the peritoneum and connective tissue covering the ovary

peri-oophorosalpingitis (*per-e-o-of-or-o-sal-pin-jī'-tis*) [*peri-; oophoron, salpinx; itis*, inflammation]. Inflammation of the tissues surrounding the ovary and oviduct.

peri-oothecitis (*per-e-o-o-thes-ī'-tis*) [*peri; ᾠον*, egg; *θήκη*, a case, *itis*, inflammation]. Perioophoritis.

peri-oothecosalpingitis (*per-e-o-o-the-ko-sal-pin-jī'-tis*). Peri-oophorosalpingitis

periophthalmic (*per-e-off-thal'-mik*). Around the eye.

periophthalmitis (*per-e-off-thal-mī'-tis*) [*peri-; ὀφθαλμός*, eye; *itis*, inflammation]. Inflammation of the tissues surrounding the eye.

periople (*per-e-op'-le*) [*peri-, ὁπλή*, a hoof]. The bands of horny matter which run obliquely inward from the heel of a horse's foot, including the frog between them. Syn., *bar; coronary frog band; perioplic band*

perioptic (*per-e-op'-tik*) [*peri-; ὀπτικός*, seeing]. 1. Surrounding the orbit, or the eye. 2. Of, or pertaining to, the tissues about the eye.

perioptometry (*per-e-op-tom'-et-re*) [*peri-; ὀπτός*, visible; *μέτρον*, a measure]. The measurement of the limits of the visual field.

perioral (*per-e-o'-ral*) [*peri-; os, oris*, the mouth]. Surrounding the mouth, circumoral.

periorbit, periorbita (*per-e-or'-bit, per-e-or'-bit-ah*) [*peri-; orbita*, orbit]. The periosteum of the eye-socket

periorbital (*per-e-or'-bit-al*). 1. Surrounding the orbit 2. Pertaining to the periorbita.

periorbitis (*per-e-or-bit-ī'-tis*) [*peri-; orbita*, orbit; *itis*, inflammation] Inflammation of the periorbita.

periorchitis (*per-e-or-kī'-tis*). Inflammation of the tissues surrounding the testicle. **p. adhæsiva,** a form in which adhesions are formed between the two layers of the tunica vaginalis. **p. prolifera,** periorchitis associated with proliferation of the connective-tissue elements of the tunica albuginea.

periost (*per'-e-ost*). Same as *periosteum*.

periosteal (*per-e-os'-te-al*) [*periosteum*]. Pertaining to the periosteum.

periosteitis (*per-e-os-te-ī'-tis*). See *periostitis*.

periosteoma (*per-e-os-te-o'-mah*) [*peri-; ὀστέον*, bone; *ὄμα*, tumor]. An osteoma developed from the periosteum

periosteomedullitis, periostomedullitis. See *periosteomyelitis.*

periosteomyelitis (*per-e-ost-e-o-mi-el-i'-tis*) [*periosteum; osteomyelitis*]. Inflammation of the periosteum and medulla of a bone.

periosteophyma (*per-e-os-te-o-fi'-mah*) [*peri-; ὀστέον*, bone; *φῦμα*, growth]. Swelling of the periosteum; also, a periosteophyte.

periosteophyte (*per-e-os'-te-o-fīt*) [*peri-; ὀστέον*, bone; *φυτόν*, growth]. A morbid osseous formation upon or proceeding from the periosteum.

periosteorrhaphy (*per-e-os-te-or'-af-e*) [*periosteum; ῥαφή*, a suture]. Suturing together the edges of a severed periosteum.

periosteosis (*per-e-os-te-o'-sis*). 1. Synonym of *persostosis*. 2. See *periosteoma*. 3. The formation of a tumor of the periosteum.

periosteosteitis, periostitis (*per-e-ost-e-os-te-i'-tis, per-e-ost-i'-tis*). Simultaneous periostitis and osteitis.

periosteotome (*per-e-os'-te-o-tōm*) [*persosteum; τομή*, a cutting]. An instrument for incising the periosteum and scraping it from the bone.

periosteotomy (*per-e-os-te-ot'-o-me*) [see *periosteotome*]. The operation of incising the periosteum.

periosteous (*per-e-os'-te-us*). Same as *periosteal.*

periosteum (*per-e-os'-te-um*) [*peri-; ὀστέον*, bone]. A fibrous membrane investing the surfaces of bones, except at the points of tendinous and ligamentous attachment and on the articular surfaces, where cartilage is substituted. **p. alveolare,** periodontium. **p. cranii,** pericranium.

periostitic (*per-e-os-tit'-ik*) [*peri-; ὀστέον*, bone; *itis*, inflammation]. Pertaining to, resembling, or affected with, periostitis

periostitis (*per-e-os-ti'-tis*) [*periosteum; itis*, inflammation]. Inflammation of the periosteum. It may be acute or chronic, the latter being the more frequent form. Acute periostitis is either traumatic or the result of infection; the chronic is due to traumatism, syphilis, tuberculosis, or actinomycosis. In the acute there are swelling and diffuse suppuration, with fever and other constitutional symptoms; in the chronic, pain, which is usually worse at night, swelling, and tenderness. **p. albuminosa,** a mild form of inflammation characterized by the formation of a clear, ropy, albuminous liquid resembling synovia. It is most common in the young, and is unaccompanied by fever. **p., dental,** inflammation of the investing membrane of the roots of the teeth. **p., diffuse,** a serious inflammation usually involving the periosteum of long bones. **p., hemorrhagic,** that accompanied by bleeding between the periosteum and the bone.

periostoma (*per-e-os-to'-mah*) [*peri-; ὀστέον*, bone; *ὄμα*, tumor]. Any morbid osseous growth occurring on or surrounding a bone.

periostosis (*per-e-os-to'-sis*) [*peri-; ὀστέον*, bone]. An osseous formation on the exterior of a bone.

periostosteitis (*per-e-os-tos-te-i'-tis*) [*periosteum; osteitis*]. Inflammation of bone with its periosteum.

periostotome (*per-e-os'-to-tōm*). Periosteotome.

periostotomy (*per-e-os-tot'-o-me*). Synonym of *periosteotomy.*

periotic (*per-e-o'-tik*) [*peri-; οὖς*, ear]. 1. Situated about the ear. 2. Of or pertaining to the parts immediately about the internal ear. 3. The petrous and mastoid parts of the temporal bone.

periovaritis (*per-e-o-var-i'-tis*). See *perioophoritis.*

periovular (*per-e-o'-vŭ-lar*) [*peri-; ovum*, egg]. Surrounding the ovum.

peripachymeningitis (*per-e-pak-e-men-in-ji'-tis*) [*peri-; pachymeningitis*]. Inflammation of the connective tissue between the dura mater and the bone.

peripancreatitis (*per-e-pan-kre-at-i'-tis*). Inflammation of the tissues about the pancreas.

peripapillary (*per-ip-ap'-il-a-re*) [*peri-; papilla*, a papilla]. Occurring or situated around the circumference of a papilla, and especially of the optic disc.

peripatetic (*per-ip-at-et'-ik*) [*peri-; πατεῖν*, to walk]. Walking about, as in "walking typhoid."

peripenial (*per-ip-e'-ne-al*) [*peri-; penis*]. Surrounding the penis.

peripenic muscle (*per-e-pe'-nik*) [*peri; penis*]. A continuation of some of the fibers of the dartos of the scrotum beneath the skin of the penis.

periphacitis (*per-if-a-si'-tis*). Inflammation of the periphacus.

periphacus (*per-if-a'-kus*) [*peri-; φακός*, crystalline lens]. The capsule surrounding the crystalline lens.

peripharyngeal (*per-if-ar-in'-je-al*) [*peri-; φάρυγξ*, the throat]. Surrounding the pharynx.

peripherad (*per-if'-er-ad*) [*periphery; ad*, toward]. Toward the periphery.

peripheral, peripheric (*per-if'-er-al, per-if-er'-ik*) [*periphery*]. Pertaining to or placed near the periphery.

peripheraphose (*per-if'-er-a-fōz*). See under *phose.*

peripheric (*per-if-er'-ik*). Synonym of *peripheral.*

peripherocentral (*per-if-er-o-sen'-tral*). Relating to the center and periphery.

peripherophose (*per-if'-er-o-fōz*). See under *phose.*

periphery (*per-if'-er-e*) [*peri-; φέρειν*, to carry]. Circumference; the external surface.

periphlebitic (*per-if-leb-it'-ik*). Pertaining to, affected with, or of the nature of, periphlebitis.

periphlebitis (*per-if-leb-i'-tis*). Inflammation of the tissues about a vein.

periplasm (*per'-i-plazm*) [*peri-; πλάσμα*, anything formed]. A delicate hyaline layer around animal cells.

periplast (*per'-ip-last*) [*peri-; πλάσσειν*, to mold, form]. 1. The periblast or matrix of a part or organ. 2 The intercellular substance, or stroma. 3. The attraction-sphere. **p., daughter,** the centrosome.

periplastic (*per-ip-las'-tik*). 1. Of or pertaining to or resembling the matrix or periplast of a part or organ. 2. The cell-substance about the nucleus or endoplast; perinuclear protoplasm.

peripleuritis (*per-e-ploo-ri'-tis*). Inflammation of the tissues surrounding the pleura.

Periploca (*per-ip'-lo-kah*) [*peri-; πλέκειν*, to twine]. A genus of plants of the order *Asclepiadeæ. P. græca* is a European species naturalized in western New York. The leaves are used as an emollient; the milky juice has been used to poison animals; the bark contains a glucoside, *periplocin.*

periplocin (*per-ip'-lo-sin*), $C_{30}H_{48}O_{12}$. A crystalline glucoside from the bark of *Periploca græca.* It is a powerful cardiac poison used subcutaneously in heart disease. Maximum daily dose $\frac{1}{64}$ gr. (0.001 Gm.).

peripneumonia, peripneumonitis (*per-e-nū-mo'-ne-ah, per-e-nū-mo-ni'-tis*). 1. Pneumonia. 2. Pleuropneumonia. **p. notha,** the false pneumonia of the older writers; congestion of the lungs.

peripolar (*per-e-po'-lar*) [*peri-; pole*]. Surrounding a pole or the poles.

periportal (*per-e-por'-tal*) [*peri-; porta*, door]. Surrounding the portal vein. **p. carcinoma, a**

primary carcinoma developing around the portal vein, beginning at its entrance into the liver, thence, extending along the portal vessels to the remote branches.

periproctal, periproctic (*per-ip-rok'-tal, per-ip-rok'-tik*) [*peri-; πρωκτός*, anus]. Surrounding the anus or rectum.

periproctitis (*per-e-prok-ti'-tis*). Inflammation of the areolar tissue about the rectum or anus.

periprostatic (*per-ip-ros-tat'-ik*) [*peri-; prostate*]. Situated or occurring around the prostate.

periprostatitis (*per-ip-ros-tat-i'-tis*) [*peri-; prostate; ιτις*, inflammation]. Inflammation of the tissue situated around the prostate.

peripyemia (*per-ip-s-e'-me-ah*) [*peri-; pyemia*]. Suppuration about an organ or tissue.

peripylephlebitis (*per-ip-i-le-fleb-i'-tis*) [*peri-; πύλη*, gate, porta; *phlebitis*]. Inflammation of the tissues surrounding the portal vein, or of its ectal coat.

peripylic (*per-e-pi'-lik*) [*peri; πύλη*, gate, porta]. Surrounding the portal vein.

peripyloric (*per-e-pi-lor'-ik*) [*peri; pylorus*]. Surrounding the pylorus.

perirectal (*per-e-rek'-tal*) [*peri-; rectum*]. About the rectum.

perirectitis (*per-e-rek-ti'-tis*). See *periproctitis*.

perirenal (*per-e-re'-nal*) [*peri-; ren*, kidney]. Around the kidney.

perirhinal (*per-ir-i'-nal*) [*peri-; ῥίς*, nose]. Situated about the nose or nasal fossæ.

perisalpingitis (*per-e-sal-pin-ji'-tis*). Inflammation of the peritoneal covering of the Fallopian tube.

perisalpingo-ovaritis (*per-e-sal-pin-go-o-va-ri'-tis*). See *peri-oophorosalpingitis*.

perisalpinx (*per-is-al'-pingks*) [*peri-; σάλπιγξ*, tube]. The peritoneum covering the upper border of the Fallopian tube.

periscelis (*per-is'-kel-is*) [*peri-; σκέλος*, leg]. Herpes occurring around the leg where the garter binds it.

periscleritis (*per-e-skle-ri'-tis*). See *episcleritis*.

periscopic (*per-e-skop'-ik*) [*peri-; σκοπεῖν*, to see]. Designed for looking around, as a *periscopic* lens. See *lens, periscopic*.

perisigmoiditis (*per-is-sg-moi-di'-tis*) [*peri-; sigmoid; ιτις*, inflammation]. Inflammation of the tissues, especially the peritoneum, covering the sigmoid flexure of the colon.

perisinal, perisinous, perisinuous (*per-e-si'-nal, -nus, -sin'-ū-us*). Surrounding a sinus.

perisinuitis, perisinusitis (*per-e-ss-nū-i'-tis, -si'-tis*). Inflammation of the tissue about a sinus, especially a cerebral sinus.

perispermatitis (*per-is-per-mat-i'-tis*). Inflammation around the spermatic cord, with an effusion of fluid; a funicular hydrocele.

perisplanchnic (*per-e-splank'-nik*) [*peri; σπλάγχνα*, viscera]. Surrounding a viscus or viscera.

perisplanchnitis (*per-e-splank-ni'-tis*) [*peri; σπλάγχνα*, viscera; *ιτις*, inflammation]. Inflammation of the peritoneum or other tissues immediately surrounding a viscus or viscera.

perisplenic (*per-is-plen'-ik*) [*peri-; spleen*]. Situated or occurring near the spleen.

perisplenitis (*per-e-splen-i'-tis*). Inflammation of the peritoneal coat of the spleen.

peri pondylic (*per-e-spon-dil'-ik*) [*peri; σπόνδυλος*, a vertebra]. Around a vertebra.

perispondylitis (*per-e-spon-dil-i'-tis*). Inflammation of the tissues around a vertebra. **p., Gibney's**, a painful condition of the muscles of the spine.

perissad (*per'-is-ad*) [*περισσός*, odd]. 1. Having an uneven quantivalence, as nitrogen, the quantivalence of which is three or five. 2. An element having such a quantivalence.

peristalsis (*per-e-stal'-sis*) [*peri-; στάλσις*, constriction]. A peculiar wave-like movement seen in tubes provided with longitudinal and transverse muscular fibers. It consists in a narrowing and shortening of a portion of the tube, which then relaxes, while a lower portion becomes shortened and narrowed. By means of this movement the contents of this tube are forced toward the opening. **p., reversed**, peristaltic movement opposite to the normal direction.

peristaltic (*per-e-stal'-tik*) [*peristalsis*]. Pertaining to or resembling peristalsis. **p. unrest**, a common symptom of neurasthenia, consisting in increased peristaltic movements of the stomach coming on shortly after eating, with borborygmus and gurgling.

peristaltin (*per-e-stal'-tin*). A glucoside, readily soluble in water, derived from *Rhamnus purshiana*.

peristaphyline (*per-e-staf'-il-in*) [*peri-; σταφυλή*, uvula]. Situated near the uvula.

peristaphylitis (*per-e-staf-il-i'-tis*) [*peri-; σταφυλή*, uvula; *ιτις*, inflammation]. Inflammation of the tissues surrounding the uvula.

peristerna (*per-e-ster'-nah*) [*peri-; sternum*]. A name for the lateral portions of the chest.

peristole (*per-ss'-to-le*). Peristalsis.

peristoma (*per-is-to'-mah*). See *peristome*.

peristomal (*per-is-to'-mal*) [*peri-; στόμα*, mouth]. Surrounding the mouth.

peristomatous (*per-is-to'-mat-us*) [*peri-; στόμα*, mouth]. Surrounding the mouth.

peristome (*per'-is-tōm*) [*peri-; στόμα*, the mouth]. In biology; (*a*) the parietal region surrounding the mouth, as the oral disc of a polyp; (*b*) the fringe of hair-like appendages about the orifice of a moss capsule.

peristroma (*per-e-stro'-mah*) [*peri-; στρῶμα*, covering]. The internal layer of a tube-like covering. The villous coat of the intestine.

peristrumitis (*per-e-stru-mi'-tis*) [*peri-; struma*, goiter]. Inflammation of the tissues around a goiter.

peristrumous (*per-e-stru'-mus*) [*peri-; struma*, goiter]. Situated around or alongside a goiter.

perisynovial (*per-is-i-no'-ve-al*) [*peri-; synovial*]. Situated or occurring around a synovial membrane.

perisystole (*per-e-sis'-to-le*). The slight interval between the diastole and systole.

perisystolic (*per-e-sis-tol'-ik*). Presystolic.

peritectomy (*per-it-ek'-to-me*) [*περι*, around; *ἐκτόμη*, excision]. Excision of a ring of conjunctiva around, and near to, the cornea.

peritendineum (*per-e-ten-din'-e-um*) [*peri-; tendo*, tendon]. The tissue surrounding the tendons like a sheath.

peritendonitis (*per-e-ten-don-i'-tis*) [*peri-; tendon; ιτις*, inflammation]. 1. Peritenonitis. 2. Inflammation of the tissues surrounding a tendon. 3. Specifically, such an inflammation around the tendo Achillis.

peritenon (*per-e-ten'-on*) [*peri-; τενών*, tendon]. Sheath of a tendon.

peritenonitis (*per-e-ten-on-i'-tis*) [*peri-; τενών*, tendon; *ιτις*, inflammation]. Inflammation of the sheath of a tendon.

perithelial (*per-e-the'-le-al*). Relating to the perithelium.

perithelioma (*per-e-the-le-o'-mah*) A tumor originating in the perithelium of a vessel

perithelium (*per-e-the'-le-um*) [*peri-*, θηλή, nipple] The layer of cells surrounding the capillaries and smaller vessels

perithoracic (*per-e tho-ras'-ik*) [*peri-*, *thorax*] Situated or occurring around the thorax

perithyroiditis (*per-e-thi-roid-i'-tis*) [*peri-*, *thyroid*, *itis*, inflammation] Inflammation of the capsule of the thyroid gland

peritome (*per-it'-om-e*) [*peri-*, τομη, a cutting] Circumcision

peritomist (*per-it'-o-mist*) [see *peritome*] One who performs peritomy

peritomize (*per-it'-om-īz*) [see *peritome*] To perform peritomy upon a person

peritomy (*per-it'-om-e*) [see *peritome*] 1 The removal of a strip of conjunctival and subconjunctival tissue from about the cornea for the relief of pannus 2 Circumcision

peritonæum (*per-it on-e'-um*) See *peritoneum*

peritoneal (*per-it-on-e'-al*) [*peritoneum*] Pertaining to the peritoneum

peritonealgia (*per it-on e al'-je-ah*) [*peritoneum*, ἄλγος, pain] Neuralgia of the peritoneum

peritoneopathy (*per-it on-e op'-a-thē*) [*peritoneum*; πάθος, suffering] Any disease of the peritoneum

peritineopericardial (*per-it in e o-per-e kar'-de-al*) [*peritoneum*, *pericardium*] Pertaining to the peritoneum and the pericardium

peritoneopexy (*per-it-on-e-o-peks'-e*) [*peritoneum*, πῆξις a fixing in] Fixation of the uterus by the vaginal route in the treatment of retroflexions of this organ

peritoneorrhexis (*per-it-on-e-or-eks'-is*) [*peritoneum*, ῥῆξις, rupture] Rupture of the peritoneum

peritoneotomy (*per-it-on-e-ot'-o-me*) [*peritoneum*, τομή, a cutting] Incision into the peritoneum

peritoneum (*per it-on-e'-um*) [*peri-*, τείνειν, to stretch] The serous membrane lining the interior of the abdominal cavity and surrounding the contained viscera

peritonism (*per'-it-on-izm*) 1 A false peritonitis soon yielding to treatment 2 A complex of serious phenomena complicating peritonitis or diseases of those parts covered by peritoneum

peritonitic (*per-it-on-it'-ik*) [*peritoneum*, *itis*, inflammation] Pertaining to or affected with peritonitis

peritonitis (*per-it-on-it'-is*) [*peritoneum*, *itis*, inflammation] Inflammation of the peritoneum It may be acute or chronic *Acute peritonitis* may be due to exposure to cold and wet (*idiopathic peritonitis*), traumatism, perforation of an abdominal viscus, extension from neighboring parts, rheumatism, or Bright's disease The symptoms are moderate fever, a wiry pulse, abdominal pain, tenderness, and distention, the patient lies on his back with the thighs flexed, there are vomiting and constipation *Chronic peritonitis* is due to tuberculosis, syphilis, carcinoma, nephritis, or it may be the sequel of an acute attack **p., adhesive,** peritonitis with adhesion between the parietal and visceral layers **p., diffuse,** that affecting the entire peritoneum **p., parietal,** inflammation of the serous lining of the peritoneal cavity **p., permeation,** that produced by the penetration of the healthy intestinal wall by bacteria **p., puerperal,** that following labor, and usually due to septic infection **p., septic,** peritonitis due to the microorganisms of suppuration **p., serous, p. serosa,** that accompanied by liquid exudation **p., tuberculous,** that due to the deposit of miliary tubercles upon the peritoneum

peritonsillar (*per-e-ton'-sil-ar*) [*peri-*, *tonsil*] About the tonsil

peritonsillitis (*per-e-ton-sil-i'-tis*) [*peri-*, *tonsilla*, tonsil, *itis*, inflammation] Inflammation of the tissues surrounding the tonsil

peritracheal (*per-it-ra'-ke-al*) [*peri-*, *trachea*] Surrounding the trachea

peritracheitis (*per-it-ra-ke-i'-tis*) [*peri-*, *trachea*, *itis*, inflammation] Inflammation of the connective tissue about the trachea

Peritricha (*per-it'-rik-ah*) [*peri-*, θρίξ, hair] A group of bacteria having flagella projecting from the sides as well as the poles

peritrichous (*per-it'-rik-us*) [*peri-*, θρίξ a hair] Having a band of cilia or flagella around the body

peritrochanteric (*per-e-tro kan ter' ik*) Situated about a trochanter

perityphlic (*per-e-tif'-lik*) [*peri-*, τυφλός, cecum] Surrounding the cecum

perityphlitic (*per-e tif-lit'-ik*) [*peri-*, τυφλός, cecum, *itis*, inflammation] Of the nature of or affected with perityphlitis

perityphlitis (*per-e-tif li' tis*) Inflammation of the peritoneum surrounding the cecum and appendix

periumbilical (*per e-um bil' ik-al*) Surrounding the umbilicus

periungual (*per-e-ung'-wal*) [*peri-*, *unguis*, a nail] Around the nail

periureteric (*per-e-u-re ter'-ik*) [*peri-*, *ureter*] Surrounding one or both ureters

periureteritis (*per-e-ū-re-ter-i' tis*) Inflammation of the tissues around a ureter

periurethral (*per-e-ū-re' thral*) Surrounding the urethra

periurethritis (*per-e ū-re thri'-tis*) [*peri-*, *urethra*, *itis*, inflammation] Inflammation of the connective tissue about the urethra

periuterine (*per-e-u'-ter in*) [*peri-*, *uterus*] About the uterus

periuvular (*per-e-ū'-vū-lar*) [*peri-*, *uvula*] Situated near the uvula

perivaginal (*per-e-vaj'-in-al'*) About the vagina

perivaginitis (*per-e-vaj in-i' tis*) Synonym of *paracolpitis*

perivascular (*per-e-vas'-kū lar*) About a vessel.

perivasculitis (*per iv-as-kū li'-tis*) [*peri-*, *vasculum*, vessel *itis*, inflammation] Inflammation of the vessel-walls, or of the perivascular sheaths

perivenitis (*per iv e-ni'-tis*) [*peri-*, *vena*, vein, *itis*, inflammation] Inflammation around a vein

perivenous (*per-iv-e'-nus*) [*peri-*, *vena*, vein] Investing a vein, occurring around a vein

pervertebral (*per-e-ver'-te-bral*) Surrounding a vertebra

perivesical (*per-iv es'-ik-al*) [*peri-*, *vesica*, bladder] Situated about or surrounding the bladder

perivisceral (*per-iv-is'-er-al*) [*peri-*, *viscus*, viscus] Surrounding a viscus or viscera, occurring about a viscus

perivisceritis (*per-e-vis-er-i'-tis*). Perisplanchnitis

perivitelline (*per-iv-it'-el-in*) [*peri-*, *vitellus*, yolk] Surrounding the vitellus or yolk **p. space,** the space between the zona pellucida and vitellus

perixenitis (*per-e-zen-i'-tis*) [*peri-*, ξένος, a stranger, *itis*, inflammation] Inflammation around a foreign body embedded in the tissues

perizona (*per-iz-o'-nah*) [*peri-*, ζώνη, girdle] 1. A girdle, *q. v.*, also, a truss 2 Herpes zoster.

Perkinism (*per'-kin-izm*) [Elisha *Perkins*, American physician, 1740–1810]. Drawing over the affected part the ends of two rods of different metals. Syn., *tractoration*.

perle (*perl*) [Fr. and Ger., "a pearl"; pl., *perles*]. A capsule for administration of medicine. See *pearl*. **p.s, Laennec's.** See under *Laennec*.

perlèche (**la**) (*lah pehr-lāsh*) [Fr.]. A peculiar contagious disease occurring in the mouth of children. It consists in a thickening and desquamation of the epithelium at the angles of the mouth, with occasionally the formation of small fissures, giving rise to a smarting sensation in the lips. The disease is probably microbic in origin.

Perles' anemia-bodies ((*per'-lāz*) [Max *Perles*, German pathologist, 1843–1881]. Club-shaped, actively motile bodies, 3–4μ long, found by Perles in the blood in some cases of pernicious anemia.

Perlia's nucleus (*per'-le-ah*) [Richard *Perlia*, German ophthalmologist]. See *Spitzka's nucleus*.

perloids (*per'-loydz*) [*perle*]. A form of capsule for the administration of medicine.

perlsucht (*pasrl'-zoocht*). A form of tuberculosis of the pleura or peritoneum seen in cattle.

permanent (*per'-man-ent*) [*per*, through; *manere*, to remain]. Lasting; fixed; enduring. **p. teeth,** the teeth of the second dentition.

permanganate (*per-man'-gan-āt*). A salt of permanganic acid. See *manganese*.

permanganic acid (*per-man-gan'-ik*), $HMnO_4$. A monobasic acid known chiefly in its salts.

permeable (*per'-me-a-bl*) [*per*, through; *meare*, to pass]. Affording passage. **p. stricture,** one that permits the passage of an instrument.

permeation (*per-me-a'-shun*) [*permeare*, to pass through]. The extension of cytomata by continuous growth along natural channels.

permixion (*per-mik'-shun*) [*permiscere*, to mingle]. A perfect chemical mixture.

permutite (*per-mū'-tīt*). A synthetic aluminium silicate; used in the estimation of ammonia (in urine).

perna disease (*per'-nah*). Chlorine acne.

pernambuco wood. The wood of *Cæsalpinia echinata*. It is an astringent and roborant, and contains brasilin, a coloring-matter.

pernicious (*per-nish'-us*) [*perniciosus*, destructive]. Highly destructive; of intense severity; deadly; fatal. **p. anemia,** a disease of the blood characterized by a great diminution in the number of red corpuscles, and a relatively smaller diminution of the hemoglobin, by the presence in the blood of poikilocytes, macrocytes, microcytes, and nucleated red corpuscles. The disease most common in middle life is usually fatal, although recoveries are reported in several instances. **p. malaria.** See under *malarial fever*. **p. vomiting,** persistent, uncontrollable vomiting occurring in pregnancy.

pernio (*per'-ne-o*) [L.]. Synonym of *chilblain*.

pernoctation (*per-nok-ta'-shun*) [*pernoctatio*, wakefulness]. Wakefulness; insomnia.

pernocton (*per-nok'-ton*). A barbital derivitive of secondary butylbrompropenylbarbituric acid: not basically satisfactory as a general anesthetic.

pero (*pe'-ro*) [*pero*, boot]. The soft ectal layer of the olfactory bulb whence the olfactory nerves arise.

perobrachius (*pe-ro-bra'-ke-us*) [πηρός, maimed; βραχίων, arm]. A developmental defect in which the forearms and hands are malformed or wanting.

perocephalus (*pe-ro-sef'-al-us*) [πηρός, maimed; κεφαλή, head]. A monster with an abnormality of the conformation of the head.

perochirus, perocheirus (*pe-ro-ki'-rus*) [πηρός, maimed; χείρ, hand]. A defect in the development consisting in absence or stunted growth of the hand.

perocormus (*pe-ro-kor'-mus*) [πηρός, maimed; κορμός, trunk]. A monster characterized by defective development of the trunk.

perodactylia (*pe-ro-dak-til'-e-ah*) [πηρός, maimed; δάκτυλος, finger]. Defective development of the fingers or toes.

perodynia (*pe-ro-din'-e-ah*) [πήρα, pouch; ὀδύνη, pain]. Cardialgia.

perogen (*per'-o-jen*). Trade name of a catalyzer and sodium perborate.

peromelia (*pe-ro-me'-le-ah*) [πηρός, maimed; μέλος, limb]. Teratic malformation of the limbs.

peromelus (*pe-rom'-el-us*) [πηρός, maimed; μέλος, limb]. A monster with deficient, stunted, or misshapen limbs

peromoplasty (*pe-rom'-o-plas-te*) [πήρωμα, a maiming; πλάσσειν, to form] The formation of a new stump after an amputation when the end of a bone projects.

peronæus, (*per-o-ne'-us*). Same as *peroneus*.

peronarthrosis (*per-on-ar-thro'-sis*) [περόνη, pin; ἄρθρον, joint]. A saddle-joint; a joint in which the articular surfaces are both concave and convex, as in the carpometacarpal joint of the thumb.

perone (*per'-o-ne*) [περόνη, pin]. The fibula.

peroneal (*per-o-ne'-al*) [*perone*]. Pertaining to the fibula.

peroneo- (*per-o-ne'-o-*) [*perone*]. A prefix denoting connection with or relation to the fibula.

peroneotibial (*per-o-ne-o-tib'-e-al*). Pertaining to the fibula and tibia.

peroneum (*per-o-ne'-um*). Synonym of *perone*.

peroneus (*per-o-ne'-us*) [see *perone*]. Pertaining to the fibula. **p. muscles.** See under *muscle*.

peronia (*pe-ro'-ne-ah*) [πηρόω, to maim]. Mutilation; malformation.

peronin (*per-o'-nin*), $C_{24}H_{21}NO_3.HCl$. Benzylmorphine hydrochloride; a substitution-product of morphine possessing feeble narcotic properties, but useful as a somnifacient and in allaying cough. Dose ¾–1½ gr. (0.04–0.1 Gm.); maximum daily dose 6 gr. (0.3 Gm.).

Peronospora (*per-o-nos'-po-rah*) [περόνη, a pin; σπόρος, spore]. A genus of fungi producing mildew. *P. ferrani* is a species that was supposed to cause cholera; *P. lutea*, one that was once held to be the cause of yellow fever.

peroplasia (*pe-ro-pla'-ze-ah*) [πηρός, maimed; πλάσσειν, to mold]. A malformation due to an error of development.

peropus (*pe'-ro-pus*) [πηρός, maimed; πούς, foot]. A developmental defect in which the feet are malformed.

peroral (*per-or'-al*) [*per*, through; *os, oris*, the mouth]. Performed through the mouth.

per os [L.]. By way of, or through the mouth.

perosis (*pe-ro'-sis*) [πηρός, maimed]. The condition of abnormal or defective formation.

perosomus (*pe-ro-so'-mus*) [πηρός, maimed; σῶμα, body]. A monster presenting malformation of the entire body.

perosplanchnica (*pe-ro-splank'-nik-ah*) [πηρός, maimed; σπλάγχνον, viscus]. Malformation of the viscera.

perosseous (*per-os'-e-us*) [*per*, through; *os*, bone]. Through bone.

peroxidase (*per-oks'-e-dās*). Catalase.

peroxidate, peroxidize (*per-oks'-id-āt, per-oks'-id-īz*) [*peroxide*]. To oxidize completely.

peroxide, peroxid (*per-oks'-id*) [*per*, through; *oxide*]. That oxide of any base which contains the most oxygen.

peroxol (*pur-oks'-ol*). A combination of 3% solution of hydrogen peroxide with camphor (camphoroxol), menthol (menthoxol) or naphthol (naphthoxol).

peroxydase (*pur-oks'-e-dās*). An enzyme found in tobacco; it is capable of producing all the phenomena of fermentation. Cf. *oxydases*.

perparin (*per'-par-in*) A synthetic antispasmodic, thought to be more effective than papaverin.

perpendicular (*per-pen-dik'-ū-lar*) [*perpendicularis*, vertical]. A term applied to a line forming a right angle with another line or plane. **p. plate**, the mesal vertical plate of the ethmoid bone.

perplication (*per-plik-a'-shun*) [*per*, through; *plicare*, to fold]. The operation of turning an incised vessel upon itself by drawing its end through an incision in its own wall.

perpœna (*per-pe'-nah*). A proprietary analgesic said to be a coal-tar derivative. Dose 5–8 gr.

per rectum (*per-rek'-tum*). Through the rectum.

perrheunal (*per-roo'-nal*). A salve used in rheumatism and gout, or as a lubricant in massage.

persalt (*per'-sawlt*). A salt which contains the maximum amount of the acid radical.

perseveration (*per-sev-er-a'-shun*) [*preseverare*, to persist]. A senseless repetition of plainly spoken words or of imperfect speech.

persimmon (*per-sim'-on*). The tree *Diospyros virginiana*, also its fruit, edible when fully ripe, but otherwise highly astringent; it is useful in diarrheas. From the fruit a beer is made, and whiskey is distilled.

persistence-time. The period succeeding the contraction of the ventricle of the heart, but prior to the occurrence of relaxation.

persodine (*per'-so-dēn*). The proprietary name for a solution of 2 parts of sodium persulphate in 300 parts of water.

personal (*per'-son-al*) [*persona*, a person]. Pertaining to a person. **p. equation**, the peculiar difference of individuals in their relation to various orders of stimuli.

personeer (*per-son-ēr'*). One who projects, creates, controls, directs and perfects personal character of surpassing superiority.

perspiration (*per-spir-a'-shun*) [*perspire*]. 1. The secretion of sweat. 2. The sweat. **p., insensible**, that which takes place constantly, the fluid being evaporated as fast as excreted. **p., sensible.** Visible drops or beads of sweat.

perspire (*per-spīr'*) [*perspirare*, to breathe everywhere]. To sweat.

perstriction (*per-strik'-shun*) [*per*, through; *stringere*, to bind]. The arrest of hemorrhage by ligating the bleeding vessel.

persulphate (*per-sul'-fāt*). The sulphate which contains a greater proportion of the sulphuric acid radical than the other sulphates of the same radical.

persulphide (*per-sul'-fīd*). The compound of sulphur with an element or radical which contains more sulphur than the other compounds of sulphur with the same element or radical.

Perthes' disease (*pār'-tās*) [Georg *Perthes*, German surgeon, 1869–1927]. Osteochondritis of the hip.

Pertik's diverticulum (*per'-tik*) [Otto *Pertik*, Hungarian pathologist, 1852–1913]. A diverticulum of the nasopharyngeal space which may occur close to Rosenmueller's fossa and show itself as an enlargement of the latter.

per tubam (*per tū'-bam*) [L.]. Through a tube.

perturbation (*per-ter-ba'-shun*) [*perturbare*, to disturb]. Restlessness or disquietude. The employment of means that arrest or modify the development of a morbid state.

pertussal (*per-tus'-al*) [*per*, intensive; *tussis*, a cough]. Pertaining to or of the nature of whooping-cough.

pertussin (*per-tus'-in*). A proprietary remedy for whooping-cough said to consist of the fluid-extract of thyme mixed with syrup to procure an infusion in the strength of 1:7.

pertussis (*per-tus'-is*). See *whooping-cough*.

Peru, balsam of. See *balsam*.

perucognac (*pe-roo-kōn'-yak*). A preparation employed in tuberculosis said to consist of the active principle of balsam of Peru, 25 gr.; cinnamic acid, 10 %, in a liter of cognac.

perugen (*per-oo'-jen*). Trade name of a preparation resembling balsam of Peru.

peruol (*pe'-roo-ol*). A mixture of peruscabin and castor-oil. It is used in scabies.

peruscabin (*pe-roo-ska'-bin*). Synthetic benzoic-acid benzylester. It is used in scabies.

Peruvian (*pe-roo' ve-an*) [*Peru*]. Pertaining to Peru. **P. bark.** See *cinchona*. **P. wart.** See *verruga peruana*.

peruvin (*pe-roo'-vin*) [*Peru*]. The name given to the cinnamic alcohol derived from balsam of Peru.

perversion (*per-ver'-shun*) [*per*, through; *vertere*, to turn]. The state of being turned away from the normal course, as in the modifications of function in disease. **p., sexual**, abnormality of the sexual instinct; desire for unnatural methods of sexual gratification.

pervert (*per'-vert*) [*per*, through; *vertere*, to turn]. One who has turned from the right way. **p., sexual**, a person whose sexual instincts are perverted.

pervigilium (*per-vij-il'-e-um*) [*per*, through; *vigilium*, a watch]. Insomnia; wakefulness.

pervious (*per'-ve-us*) [*per*, through; *via*, way]. Open; permeable.

pes (*pēz*) [L.]. A foot or foot-like structure. **p. accessorius**, the eminentia collateralis, a smooth white eminence in the brain, situated at the junction of the posterior and descending cornua of the lateral ventricle. **p. anserinus**, goose's foot; the radiate branching of the facial nerve after its exit at the side of the face. **p. calcaneovalgus**, talipes calcaneovalgus. **p. calcaneus**, talipes. **p. cavus**, **p. excavatus**, talipes cavus. **p. equinus**, talipes equinus. **p. fibricitans**, elephantiasis. **pes gigas**, macropodia. **p. hippocampi**, the lower portion of the hippocampus major. **p. olfactorius**, the inner root of the olfactory lobe. **p. planus**, talipes planus. **p. valgus**, talipes valgus. **p. varus**, talipes varus.

pessary (*pes'-ar-e*) [*πεσσός*, an oval-shaped stone]. 1. An instrument placed in the vagina to hold the uterus in position. 2. A vaginal suppository.

pessima (*pes'-im-ah*) [L.]. A skin-affection characterized by pustular lesions, hard and yellowish and surrounded by areolæ of inflammation, appearing over the whole surface of the body.

pessulum, pessum (*pes'-ū-lum, pes'-sum*). A pessary.

pest [*pestis*, a pest]. A plague; pestilence. **p.-house**, a hospital for persons sick with pestilential diseases. **p., Siberian**, anthrax.

pesticemia (*pes-ti-se'-me-ah*) [*pestis*, plague; *αἷμα*, blood]. 1. The presence of the bacillus

pestis in the blood. 2. The septicemic form of plague.

pestiferous (*pes-tif'-er-us*) [*pestis*, pest; *ferre*, to bear]. Causing pestilence.

pestilence (*pes'-til-ens*) [*pest*]. Any deadly epidemic disease, especially the plague.

pestilential (*pes-til-en'-shal*) [*pestilence*]. Having the nature of or producing a pestilence.

pestis (*pes'-tis*) [L.]. A plague. **p. americana**, yellow fever. **p. bubonica, p. inguinaria, p. orientalis**, the plague. **p. minor**, an oriental disease resembling the plague but not necessarily fatal. It is believed to have been a mild or modified form of bubonic plague. **p. variolosa.** Synonym of *variola*.

pestle (*pes'-l*) [*pistillum*, a pounder]. The device for rubbing substances in a mortar.

pestology (*pest-ol'-o-je*). The study of pests.

petalobacteria (*pet-al-o-bak-te'-re-ah*) [πέταλον, leaf; *bacterium*]. Bacteria in the zooglea stage.

petanelle (*pet'-an-el*). A patented preparation of fibrous peat used as an absorbent.

petaplasm (*pe'-tah-plasm*). Trade name of a plastic preparation of Irish peat and glycerin.

petechia (*pet-e'-ke-ah*) [It., *peteche*, a flea-bite: *pl.*, *petechiæ*]. A small spot beneath the epidermis, due to an effusion of blood.

petechial (*pet-e'-ke-al*) [*petechia*]. Characterized by or of the nature of petechiæ. **p. fever.** (1) typhus fever, (2) cerebrospinal meningitis.

Peter's law. Atheromatous changes in blood-vessels are most likely to occur where there are angles and projections.

Petersen's bag (*pe'-ter-sen*) [F. *Petersen*, German surgeon, 1845–]. A rubber bag inserted into the rectum, and then inflated, for the purpose of pushing the bladder forward; used in suprapubic cystotomy.

petiolus (*pet-i'-o-lus*) [*petiolus*, a stem or stalk of fruit; *pl.*, *petioli*]. 1. In biology, a stem, stalk, or petiole; as the petiolus of the epiglottis. 2 The manubrium of the malleus. **p. glandulæ pinealis.** See *peduncle of the pineal gland*.

Petit's canal (*ptē*) [1. François Pourfour du *Petit*, French anatomist and surgeon, 1664–1741; 2. Jean Louis *Petit*, French surgeon, 1674–1750]. [1]. A space, intersected by numerous fine interlacing fibers, existing between the anterior and posterior laminæ of the suspensory ligament of the crystalline lens. It extends from the periphery of the lens nearly to the apices of the ciliary processes, and transmits the secretion from the posterior chamber. **P.'s hernia** [2], lumbar hernia. **P.'s ligament** [2], the concave fold formed back of the vagina by the union of Douglas' ligaments. **P.'s sinus.** [1]. See *Valsalva's sinus*. **P.'s triangle,** [2], the trigonum lumbale The space bounded in front by the posterior border of the external oblique, behind by the anterior border of the latissimus dorsi, its base being formed by the iliac crest. Lumbar hernia usually occurs in this triangle.

petit mal (*pet-e mahl*) [Fr., "little illness"]. A slight epileptic seizure characterized by a momentary, scarcely recognizable loss of consciousness, often with an upward staring of the eyes and fibrillary movements of the facial muscles.

petralol (*pet'-ral-ol*). Trade name of petrolatum liquidum.

Petri's capsules, P.'s dishes, P.'s saucers (*pa'-tre*) [Julius *Petri*, German bacteriologist, 1852–]. Shallow, cylindrical, covered glass vessels for bacterial culture, in which the colonies may be counted without removing the cover. **P.'s test for proteins,** a faint yellow coloration is produced by treating a protein or peptone solution with a solution of diazobenzolsulphonic acid; but if the solution is rendered alkaline by the addition of caustic alkali, the color changes to orange or brown according to concentration, and a red froth is formed on shaking.

JEAN LOUIS PETIT.

petrifaction (*pet-re-fak'-shun*) [πέτρα, a stone; *facere*, to make]. Change to stone, as *petrifaction* of the fetus. See lithopedion.

petrissage (*pa-tre-sahzy'*) [Fr., kneading]. Malaxation, the kneading movement in massage.

petro (*pet'-ro*). Trade name of petrolatum liquidum.

petrobasilar (*pet-ro-baz-il-ar*) [*petrosa-; basilar*]. Pertaining to the petrous portion of the temporal bone and the basilar portion of the occipital bone.

petrobran (*pet'-ro-bran*). Trade name of a preparation containing petrolatum, bran, powdered licorice, and ethyl butyrate.

petroccipital (*pet-rok-sip'-it-al*). *Petro-occipital.*

petrogen (*pet'-ro-jen*). Trade name of a mineral oil preparation used as a vehicle and solvent for various drugs.

petrojel (*pet'-ro-jel*). Trade name of a preparation of paraffin.

petrolagar (*pe'-rol-ag'-ar*). Trade name of a preparation of mineral oil and agar agar; used for constipation.

petrolate (*pet'-ro-lāt*). Same as *petrolatum*.

petrolatum (*pet-ro-la'-tum*) [*petroleum*]. A jelly-like preparation obtained from the residuum of petroleum, soluble in ether, insoluble in water and alcohol, and known commercially as vaseline or cosmoline. It is used as a basis for ointments and as an emollient. **p. album,** white petrolatum. **p. liquidum** (U. S. P.), liquid petro-

latum. **p. molle,** soft petrolatum. **p. spissum,** hard petrolatum.

petrolax (*pet'-ro-laks*). Trade name of petrolatum liquidum.

petrolene (*pet'-ro-lēn*) [πέτρα, rock; *oleum*, oil] A liquid hydrocarbon mixture obtained from petroleum.

petroleum (*pet-ro'-le-um*) [πέτρα, rock, *oleum* oil]. An oily liquid issuing from the earth in various places, and consisting of a mixture of hydrocarbons with small amounts of oxidation-products. The hydro-carbons belong chiefly to the paraffin series. **p. ether,** a product of petroleum obtained by fractional distillation; it has a specific gravity of from 0.665 to 0.67, distilling at from 50° to 60° C.; it consists of pentane and hexane. **p.-jelly,** petrolatum.

petrolia (*pet-ro'-le-ah*). Trade name of petrolatum liquidum.

petrolin (*pet'-ro-lin*) [πέτρα, a rock; *oleum*, oil]. The commercial name for a combination of hydro-carbons derived from petroleum.

petrolization (*pet-rol-ı-za'-shun*) [*petroleum*]. The act or process of treating waters with kerosene for the extermination of mosquitoes.

petrolize (*pet'-rol-ız*). See *petrolization*.

petromastoid (*pet-ro-mas'-toid*) [*petrosa; mastoid*]. Pertaining to the petrous and mastoid portions of the temporal bone. **p. canal,** a short passage connecting the mastoid sinuses and the tympanic cavity. **p. foramen,** the tympanic orifice of the petromastoid canal.

petromortis (*pet-ro-mor'-tis*) [*petroleum; mors*, death]. Poisoning by automobile gas.

petronol (*pet'-ro-nol*). Trade name of petrolatum liquidum.

petro-occipital (*pet-ro-ok-sip'-it-al*) [*petrosa; occiput*]. Pertaining to the petrous portion of the temporal bone and to the occipital bone.

petropharyngeus (*pet-ro-far-in'-je-us*) [*petrosa; pharynx*]. A small muscle arising from the lower surface of the petrous portion of the temporal bone, and blending with the constrictors of the pharynx.

petrosa (*pet-ro'-sah*) [πέτρα, rock]. The petrous portion of the temporal bone.

petrosal (*pet-ro'-sal*) [*petrosa*]. 1 Pertaining to the petrosa, as the *petrosal* sinus (superior and inferior), *petrosal* nerves. 2. The petrosa

petrosalpingostaphylinus (*pet-ro-sal-ping-go-staf-il-ı'-nus*). Synonym of *levator palati*. See *muscles, table of*.

petrosapol (*pet-ro-sa'-pol*). A proprietary combination said to consist of soap and certain constituents of petroleum residue; used in scalp diseases.

petroselinum (*pet-ro-se-lı'-num*). See *parsley*.

petrosio (*pet-ro'-se-o*). Trade name of petrolatum liquidum.

petrosomastoid (*pet-ro-so-mas'-toid*). Synonym of *petromastoid*.

petrosphenoid (*pet-ro-sfe'-noid*) [*petrosa; sphenoid*]. Pertaining to the petrous portion of the temporal bone and the sphenoid bone. **p. suture,** the suture between the temporal bone and the great wing of the sphenoid bone.

petrosquamosal, petrosquamous (*pet-ro-skwa-mo'-sal, pet-ro-skwa'-mus*) [*petrosa; squamosa*]. Pertaining to the petrous and squamous portions of the temporal bone. **p. fissure, p. suture,** the line of juncture of the squamous and petrous portions of the temporal bone. **p. sinus,** a venous passage formed in the dura mater at the junction of the petrous and squamous portions of the temporal bone. It opens into the lateral sinus.

petrostaphylinus (*pet-ro-staf-il-ı'-nus*). Synonym of *levator palati muscle*. See *muscles, table of*.

petrosulfol (*pet-ro-sul'-fol*). A proprietary product resembling ichthyol, but with less disagreeable odor; used as is ichthyol.

petrous (*pet'-rus*) [πέτρα, rock]. 1. Stony; of the harness of stone, as the *petrous* portion of the temporal bone. 2. See *petrosal* (1).

petrox (*pet'-roks*). A mixture of paraffin-oil, 100 parts; oleic acid, 50 parts; and alcoholic ammonia solution, 25 parts; a substitute for vasogen.

petroxolins (*pet-roks'-o-lins*). Preparations intended for external application. They are listed in the National Formulary.

Pettenkofer's soil-water or ground-water theory (*pet'-en-kof-er*) [Max von *Pettenkofer*, German chemist, 1818–1901]. Cholera never prevails epidemically where the soil is impermeable to water, or where the level of the soil-water is not liable to fluctuations. **P.'s test for bile acids,** dissolve in concentrated sulphuric acid a small quantity of bile in substance in a small glass dish, or mix some of the liquid containing the bile acids with concentrated sulphuric acid and warm; in either case great care must be exercised that the temperature does not rise above 60° to 70° C. Add drop by drop a 10% solution of cane sugar, constantly stirring with a glass rod In the presence of bile a beautiful red coloration is produced, which becomes bluish-violet in the course of the day. This red liquid shows an absorption band at F and another near D, between D and E.

petuning (*pet-ū'-ning*). A process of sprinkling tobacco with some special preparation to aid in the fermentation and flavoring.

Petzetaki's test (*pet'-zet-ak-e*). In typhoid fever: To 15 Cc. of urine in a test tube a few drops of a 5% solution of iodine in alcohol are added carefully so that the liquids do not mix. The reaction is considered positive if the upper portion of the urine assumes a yellowish golden color. The test may be obtained earlier than the Widal reaction.

peucine (*pū'-sēn*) [πεύκη, the fir]. Resin; pitch.

peucinous (*pū'-sin-us*) [see *peucine*]. Relating to or like the fir-tree; resinous.

pexin (*pek'-sin*) [πῆξις, a curdling]. Rennin or lab.

pexinogen (*peks-in'-o-jen*). See *renninogen*.

pexuloid (*peks'-ū-loyd*). A preparation of celluloid used in the making of splints that are light, strong and not inflammable.

Peyer's glands, P.'s patches (*pı'-er*) [Johann Conrad *Peyer*, Swiss anatomist, 1653–1712]. Aggregations of lymph-follicles situated in the mucous membrane of the lower part of the small intestine, opposite the mesenteric attachment.

Peyerian fever (*pı-e'-re-an*). Typhoid fever.

peyote (*pa-yo'-ta*). Same as *mescal*. See *anhalonine* and *mescal button*.

Peyrot's thorax (*pa-ro'*) [Jean Joseph *Peyrot*, French surgeon, 1843–1918]. In large pleural effusions, the thorax is obliquely misshapen.

Pfannenstiel's incision (*fahn'-en-stēl*) [J. *Pfannenstiel*, German gynecologist, 1862–1909]. A method of entering the abdominal cavity to avoid scar and hernia by a long horizontal cut, convex downward, in the region just above the mons Veneris where pubic hair is normally present.

Pfaundler's reaction (*found'-ler*) [Meinhard *Pfaundler*, German physician, 1872–]. Under certain conditions bacteria grown in an immune serum will develop in long interlaced thread-like groups.

Pfeiffer's glandular fever (*pfi'-fer*) [Richard Friedrich Wilhelm Pfeiffer, German physician, 1858–]. An acute infectious fever characterized by inflammatory swelling of the lymph-glands, anemia, and prostration. **P.'s phenomenon.** See *P.'s reaction*, and *bacteriolysis*. **P.'s reaction,** the mixing of some of the peritoneal effusion provoked in a guinea-pig by inoculating it with a mixture of blood-serum of an animal immune to cholera, and of bouillon to which a small portion of a culture of the *Spirillum choleræ asiaticæ* has been added, causes these organisms to become nonmotile and to agglutinate. The absence of this phenomenon proves that the spirillum under investigation is of a different species. The same phenomenon has been observed in the case of the typhoid bacillus and typhoid antitoxic serum, and is a valuable differential sign.

Pflueger's law of contraction (*pfle'-ger*) [Eduard Friedrich Wilhelm *Pflueger*, German physiologist, 1829–1910]. Galvanic stimulaton of a nerve causes muscular contraction, which varies uniformly according as the kathode or the anode is applied, or as the current is closed or opened. Certain deviations from this law constitute the reaction of degeneration. The law may be briefly stated as follows.

Strength of Current Used	Descending Current		Ascending Current	
	Make	Break	Make	Break
Very Weak	Yes.	No	No	No
Weak .	Yes	No	Yes.	No
Moderate. ..	Yes	Yes	Yes	Yes
Strong	Yes	No	No	Yes

P.'s law of reflex action. 1. If stimulation of a sensory nerve is followed by a unilateral reflex movement, the latter always occurs on the side to which the sensory nerve belongs. 2. If the stimulus received by a sensory nerve extends, to motor nerves of the opposite side, contraction occurs only in the corresponding muscles. 3. If the contraction is unequal on the two sides, the stronger contraction always takes place on the side which is stimulated. 4. If the reflex excitement extends to other motor nerves, the direction of the impulse from the sensory to the motor nerve is from before backward in the brain and from below upward in the spinal cord—*i.e.*, always in the direction of the oblongata. **P.'s tubes,** ovarian tubes; sacciform or tubular ingrowths of the germ epithelium on the antero-internal surface of the Wolffian body; they ultimately form the cortex of the ovary.

Pfuhl's sign, P.-Jaffe's sign (*pfool, yah'-fa*), [Eduard *Pfuhl*, German physician, 1852– ; Max *Jaffe*, German physician, 1841–1911]. In subphrenic pyopneumothorax the liquid issues from the exploratory puncture or incision with considerable force during inspiration, while the contrary occurs in true pneumothorax.

P. G. Abbreviation of *Pharmacopœia Germanica* German Pharmacopeia.

pH. Symbol for hydrogen-ion concentration

phace, phacea (*fa'-se, fa-se'-ah*) [φακός, a lens]. The crystalline lens.

phacentocele (*fa-sen'-to-sēl*) [φακός, a lens; ἐντός, within; κήλη, hernia]. Displacement of the crystalline lens into the anterior chamber of the eye.

phacicous (*fa'-sik-us*) [φακός, a lens]. 1. Belonging to the crystalline lens. 2. Lentil-shaped.

phacitis (*fa-si'-tis*). See *phakitis*.

phaco- (*fa-ko-*) [φακός, a lens]. A prefix meaning pertaining to a lens or to the lens of the eye.

phaco-anaphylaxis (*fa-ko-an-af-al-aks'-is*) [*phaco-; anaphylaxis*]. Anaphylaxis of the crystalline lens.

phacocele (*fa'-ko-sēl*). See *phacentocele*.

phacocyst (*fa'-ko-sist*) [*phaco-;* κύστις, bladder]. The capsule of the crystalline lens.

phacocystectomy (*fa-ko-sis-tek'-to-me*) [*phaco-*, κύστις, cyst; ἐκτομή, excision]. Excision of a part of the capsule of the crystalline lens.

phacocystitis (*fa-ko-sis-ti'-tis*) [*phaco-;* κύστις, cyst; ιτις, inflammation]. Inflammation of the capsule of the crystalline lens.

phacoglaucoma (*fa-ko-glaw-ko'-mah*) [*phaco-; glaucoma*]. Structural changes in the crystalline lens induced by glaucoma.

phacohymenitis (*fa-ko-hi-men-i'-tis*) [*phaco-;* ὑμήν, membrane; ιτις, inflammation] Inflammation of the capsule of the crystalline lens.

phacoid (*fa'-koid*) [φακός, lens; εἶδος, like]. Lens-shaped.

phacoiditis (*fa-koid-i'-tis*). See *phakitis*.

phacoidoscope (*fa-koid'-o-skōp*). Synonym of *phacoscope*.

phacolysis (*fa-kol'-is-is*) [*phaco-;* λύειν, to loosen]. 1. Dissolution or disintegration of the crystalline lens. 2. An operation for relief of high myopia consisting in discission of the crystalline lens followed by extraction.

phacolytic (*fs-kol-it'-ik*). Pertaining to phacolysis

phacomalacia (*fa-ko-mal-a'-se-ah*) [*phaco-;* μαλακία, softness]. Soft cataract.

phacometachoresis (*fa-ko-met-ak-or-e'-sis*) [*phaco-;* μεταχώρησις, change of place]. Dislocation of the crystalline lens.

phacometecesis (*fa-ko-met-es-e'-sis*) [*phaco-;* μετοικήσις, migration] Displacement of the crystalline lens into the anterior chamber of the eye.

phacometer (*fa-kom'-et-er*) [*phaco-;* μέτρον, a measure]. 1. An instrument for determining the refractive power of lenses. 2. Phacoscope.

phacopalingenesis (*fa-ko-pal-in-jen'-es-is*) [*phaco-;* πάλιν, again; γένεσις, genesis]. Reproduction of the crystalline lens.

phacoplanesis (*fa-ko-plan-e'-sis*) [*phaco-;* πλάνησις, a making to wander]. Displacement of the lens of the eye from the posterior to the anterior chamber and back again.

phacosclerosis (*fa-ko-skle-ro'-sis*) [*phaco-; sclerosis*]. Hardening of the crystalline lens.

phacoscope (*fa'-ko-skōp*) [*phaco-;* σκοπεῖν, to inspect]. An instrument for observing the accommodative changes of the lens.

phacoscopy (*fa-kos'-ko-pe*). The observation and estimation of the changes in the lens of the eye caused by accommodative influences.

phacoscotasmus (*fa-ko-sko-tas'-mus*) [*phaco-;* σκότος, darkness]. Clouding of the crystalline lens.

phacotherapy (*fa-ko-ther'-ap-e*) [*phaco-;* θεραπεία, therapy]. Heliotherapy.

phænogam (*fe'-no-gam*) [φαίνειν, to show; γάμος, marriage]. Phanerogam.

phæoretin (*fe-or-et'-in*) [φαιός, dusky; ῥητίνη, resin], $C_{14}H_8O_7$. A resinous extract from rhubarb-root, various species of the genus *Rheum*. It occurs as a yellowish brown powder soluble in alcohol and alkalies.

phagedena, phagedæna (*faj-ed-e'-nah*) [φαγέδαινα, a cancerous sore]. A rapidly spreading destructive ulceration of soft parts. **p., sloughing,** hospital gangrene. **p. tropica,** tropical ulcer.

phagedenic (*faj-ed-en'-ik*) [*phagedena*]. Of the nature of phagedena. **p. chancroid,** a chancroid that spreads rapidly and destroys a large amount of tissue.

phagedenism (*faj'-ed-en-izm*). Rapidly progressive ulcerative processes of the soft parts, frequently complicated with chancroid buboes.

phagedenoma, phagedœnoma (*faj-ed-en-o'-mah*). A phagedenic ulcer.

phagocaryosis. Phagokaryosis.

phagocytal (*fag'-o-si-tal*). Pertaining to a phagocyte.

phagocyte (*fag'-o-sit*) [φαγεῖν, to eat; κύτος, a cell]. A cell having the property of englobing and digesting foreign or other particles harmful to the body. Phagocytes are either fixed—endothelial cells, fixed connective-tissue cells—or free—the wandering cells or leukocytes. A large phagocyte is termed a *macrophage;* a small one, a *microphage.*

phagocytic (*fag-o-sit'-ik*) [*phagocyte*]. Of, pertaining to, or caused by phagocytes. **p. index,** see *Arneth's leukocyte count.*

phagocytoblast (*fag-o-si'-to-blast*) [*phagocyte;* βλαστός, a germ]. A cell giving rise to one or more phagocytes.

phagocytolysis (*fag-o-si-tol'-is-is*) [*phagocyte;* λύσις, solution]. 1. Destruction or dissolution of phagocytes. 2. Loss of the phagocytic action of leukocytes.

phagocytolytic (*fag-o-si-to-lit'-ik*). Pertaining to phagocytolysis.

phagocytosis (*fag-o-si-to'-sis*) [*phagocyte*]. The ingestion of foreign or other particles, principally bacteria, by certain cells.

phagodynamometer (*fag-o-di-nam-om'-et-er*) [φάγειν, to eat; δύναμις, force; μέτρον, measure]. An apparatus for estimating the force exerted in chewing.

phagoid (*fag'-oid*). A preparation that creates immunity to scarlet fever.

phagokaryosis (*fag-o-kar-e-o'-sis*) [φαγεῖν, to eat; κάρυον, nucleus]. The assumption by the cell-nucleus of phagocytic action.

phagolysis (*fag-ol'-is-is*) [φαγεῖν to eat; λύειν, to loosen]. Destruction or dissolution of phagocytes; phagocytolysis

phagomania (*fag-o-ma'-ne-ah*) [φαγεῖν, to eat; μανία, madness]. An insatiable craving for food.

phagotaxine (*fag-o-taks'-ēn*). Trade name of a saturated aqueous solution of oxygen, said to be transformed into ozone under the influence of ultra-violet rays; used as an antiseptic application in burns, boils, etc.

phagotherapy (*fag-o-ther'-ap-e*) [φαγεῖν, to eat; θεραπεία, therapy]. Treatment by superalimentation.

phakitis (*fa-ki'-tis*) [φακός, lens + ιτις inflammation]. Inflammation of the crystalline lens of the eye; a condition that has, however, not been observed.

phako- (*fa'-ko-*). See also *phaco-*.

phakoerisis (*fa-ko-er'-is-is*). See *erisophake.*

phalacrosis (*fal-ak-ro'-sis*) [φαλακρός, bald]. Baldness.

phalacrotic, phalacrous (*fal-ak-rot'-ik, fal-ak'-rus*) [*phalacrosis*]. Bald.

phalangeal (*fa-lan'-je-al*) [*phalanx*]. Pertaining to a phalanx.

phalanges (*fa-lan'-jēz*). Plural of *phalanx.*

phalangette, phalanget (*fal-an-jet'*) [Fr.]. The last phalanx or terminal bone of a finger or toe.

phalangitis (*fal-an-jī'-tis*) [*phalanx;* ιτις, inflammation]. Inflammation of a phalanx. **p. syphilitica.** See under *dactylitis syphilitica.*

phalangization (*fal-an-ji-za'-shun*). Construction of a stump to serve as a finger.

phalangophalangeal (*fa-lan-go-fa-lan'-je-al*) [*phalanx*]. Pertaining to the successive phalanges of the digits. **p. amputation,** removal of a finger or toe at the first or second phalangeal joints.

phalangosis (*fal-an-go'-sis*) [*phalanx*]. 1. A disease of the eyelids in which the lashes are arranged in rows. 2. Ptosis.

phalanx (*fa'-lanks*) [φάλαγξ, phalanx, *pl.* *phalanges*]. 1. One of the bones of the fingers or toes. 2. One of the delicate processes of the headplate of the outer rod of Corti projecting beyond the inner rod.

phallalgia (*fal-al'-je-ah*) [*phallus;* ἄλγος, pain]. Pain in the penis.

phallanastrophe (*fal-an-as'-tro-fe*) [φαλλός, penis; ἀναστροφή, upturning]. Twisting or distortion of the penis.

phallaneurysm (*fal-an'-ū-rizm*) [*phallus; aneurysm*]. Aneurysm of a vessel of the penis.

phallic (*fal'-ik*) [*phallus*]. Pertaining to the penis.

phalliform (*fal'-if-orm*) [*phallus; forma,* form]. Resembling the penis.

phallin (*fal'-in*). A toxalbumin contained in the death cup fungus, *Amanita phalloides.*

phallitis (*fal-i'-tis*) [*phallus;* ιτις, inflammation]. Inflammation of the penis.

phallocampsis (*fal-o-kamp'-sis*) [*phallus;* κάμψις, a bending]. Chordee.

phallocarcinoma (*fal-o-kar-sin-o'-mah*) [*phallus; carcinoma*]. Carcinoma of the penis.

phallocrypsis (*fal-o-krip'-sis*) [*phallus;* κρύψις, concealment]. Concealment of the penis by retraction.

phallodynia (*fal-o-din'-e-ah*) [*phallus;* ὀδύνη, pain]. Pain in the penis.

phalloid (*fal'-oid*) [*phallus;* εἶδος, like]. Resembling the penis.

phalloncus (*fal-ong'-kus*) [*phallus;* ὄγκος, a tumor]. Any tumor or swelling of the penis.

phalloplasty (*fal'-o-plas-te*) [*phallus;* πλάσσειν, to mold]. Plastic or restorative surgery of the penis.

phallorrhagia (*fal-or-a'-je-ah*) [*phallus;* ῥηγνύναι, to burst forth]. Hemorrhage from the penis.

phallus (*fal'-us*) [φαλλός, penis]. Penis.

phanerogam (*fan'-er-o-gam*) [φαίνειν, to show; γάμος, marriage]. Flowers which bear seed.

phanerogenic (*fan-er-o-jen'-ik*) [φανερός, visible; γεννᾶν, to produce]. Noting a disease of obvious origin; the opposite of *cryptogenic, q. v.*

phaneromania (*fan-er-o-ma'-ne-ah*) [φανερός, evident; μανία, madness]. A neurotic condition in which a person pays undue attention to some external part or growth, such as a pimple, a hair or a hangnail.

phaneroscope (*fan'-er-o-skōp*) [φανερός, visible; σκοπεῖν, to see]. An instrument for rendering the skin transparent; it is used in examining for diseases of the skin, such as lupus.

phaneroscopy (*fan-er-os'-ko-pe*). The use of the phaneroscope.

phanerosis (*fan-er-o'-sis*) [φανερόs, visible]. The act of becoming visible or transparent.

phantasia (*fan-ta'-ze-ah*) [φαντασία, a showing]. An imaginary appearance.

phantasm (*fan'-tasm*) [φαντάζειν, to render visible]. An illusive perception of an object that does not exist; an optical illusion; an apparition.

phantasmatomoria (*fan-taz-mat-o-mo'-re-ah*) [φάντασμα, phantasm; μωρία, folly]. Childishness, or dementia, with absurd fancies.

phantasmology (*fan-taz-mol'-o-je*) [φάντασμα, phantasm; λόγος, science]. The science of phantasms.

phantasmoscopia (*fan-taz-mo-sko'-pe-ah*) [φάντασμα, phantasm; σκοπεῖν, to see]. The seeing of phantasms, in insanity or delirium.

phantom (*fan'-tum*) [*phantasm*]. 1. An apparition. 2. A model of a part or the whole of the human body used in practising various operations and procedures. **p. corpuscle.** See *corpuscle.* **p. tumor,** a tumor-like swelling produced artificially by the contraction of a muscle or by other causes.

phaochrome (*fa'-o-krōm*). Same as *chromaffin;* see *chromaffin cells.*

phaochromoblast (*fa-o-kro'-mo-blast*). One of the two varieties of cells into which the primary sympathetic cells become differentiated.

pharbitin, pharbitisin (*far-bit'-in, far-bit'-is-in*). The kalandana of the Indian pharmacy, a resinous substance isomeric with convolvulin contained in *Ipomœa hederacea.* It is used as a cathartic. Dose, 7–10 gr. (0.45–0.64 Gm.).

parcidous (*far'-sid-us*) [φαρκίs, a wrinkle]. Wrinkled; rugose; full of wrinkles.

Phar. D. Abbreviation for *Pharmaciæ Doctor,* Doctor of Pharmacy.

pharmacal (*far'-mak-al*) [φάρμακον, a drug]. Pertaining to pharmacy.

pharmaceutic, pharmaceutical (*far-ma-sū'-tik, -al*) [*pharmacy*]. Pertaining to pharmacy.

pharmaceutics (*far-mas-ū'-tiks*). Pharmacy.

pharmaceutist (*far-mas-ū'-tist*). Synonym of *pharmacist.*

pharmacist (*far'-ma-sist*) [*pharmacy*]. An apothecary.

pharmaco- (*far-ma-ko-*) [φάρμακον, a drug]. A prefix meaning pertaining to drugs.

pharmacodynamics (*far-ma-ko-di-nam'-iks*) [*pharmaco-;* δύναμις, force]. The science of the action of drugs.

pharmacognosis, pharmacognosy (*far-ma-kog-no'-sis, far-ma-kog'-no-se*) [*pharmaco-;* γνῶσις, knowledge]. The science of crude drugs.

pharmacognosist (*far-ma-kog'-no-sist*) [*pharmacognosy*]. One versed in pharmacognosy.

pharmacognostics (*far-mak-og-nos'-tiks*). Synonym of *pharmacognosy.*

pharmacography (*far-ma-kog'-ra-fe*). See *pharmacognosis.*

pharmacologist (*far-ma-kol'-o-jist*) [*pharmacology*]. One versed in pharmacology.

pharmacology (*far-ma-kol'-o-je*) [*pharmaco-;* λόγος, science]. The science of the nature and properties of drugs.

pharmacomania (*far-mak-o-ma'-ne-ah*) [φάρμακον, drug; μανία, madness]. A morbid craving for medicines, or for self-medication.

pharmacopedics (*far-mak-o-pe'-diks*) [φάρμακον, drug; παιδεία, instruction]. That branch of pharmacology which treats of the science of drugs and the art of their preparation.

Pharmacopeia, Pharmacopœia (*far-ma-ko-pe'-ah*) [*pharmaco-;* ποιεῖν, to make]. A collection of formulas and methods for the preparation of drugs, especially a book of such formulas recognized as a standard, as the United States or the British Pharmacopeia. The former is issued every ten years under the supervision of a national committee.

pharmacopeial (*far-ma-ko-pe'-al*) [*pharmacopeia*]. Contained in or sanctioned by the pharmacopeia.

pharmacophobia (*far-mak-o-fo'-be-ah*) [φάρμακον, drug; φόβος, fear]. Morbid dislike of taking medicine.

pharmacopsychosis (*far-mak-o-si-ko'-sis*) [φάρμακον, drug; *psychosis*]. Drug addiction.

pharmacotherapeutic (*far-mak-o-ther-ap-ū'-tik*) [φάρμακον, drug; θεραπεία, treatment]. Pertaining to treatment with drugs.

pharmacotherapy (*far-mak-o-ther'-a-pe*) [φάρμακον, drug; θεραπεία, therapy]. The treatment of disease by means of drugs.

pharmacy (*far'-ma-se*) [φαρμακεία, the use of drugs]. 1. The art of preparing, compounding, and dispensing medicines. 2. A drug-store.

pharmozon salts (*far'-mo-sŏn*). A series of mixtures said to contain magnesium dioxide.

pharyngalgia (*far-in-gal'-je-ah*) [*pharynx;* ἄλγος, pain]. Pain in the pharynx.

pharyngeal (*far-in'-je-al*) [*pharynx*]. Pertaining to the pharynx. **p. tonsil.** See *Luschka's tonsil.* **p. spine, p. tubercle,** a small elevation near the middle of the inferior surface of the basilar process of the occipital bone, for the attachment of the pharynx.

pharyngectomy (*far-in-jek'-to-me*) [*pharynx;* ἐκτομή, excision]. Excision of a part of the pharynx.

pharyngemphraxis (*far-in-gem-fraks'-is*) [*pharyngo-;* ἔμφραξις, obstruction]. Obstruction of the pharynx.

pharyngeus (*far-in-je'-us*). See *constrictor of pharynx,* etc., under *muscles, table of.*

pharyngismus (*far-in-jiz'-mus*) [*pharynx*]. Spasm of the pharynx.

pharyngitic (*far-in-jit'-ik*). Pertaining to, affected with, or of the nature of, pharyngitis.

pharyngitis (*far-in-ji'-tis*) [*pharynx;* ιτις, inflammation]. Inflammation of the pharynx. **p., acute, p., catarrhal,** a form due to exposure to cold, to the action of irritant substances, or to certain infectious causes, and characterized by pain on swallowing, by dryness, later by moisture, and by congestion of the mucous membrane. **p. apostematosa,** abscess of the pharynx. **p., atrophic,** a form attended with atrophy of the mucous membrane. **p., chronic,** a form that is generally the result of repeated acute attacks, and is associated either with hypertrophy of the mucous membrane (*hypertrophic pharyngitis*) or with atrophy (*atrophic pharyngitis*). **p., croupous, p., diphtheritic,** that characterized by the presence of a false membrane, the product of the action of the diphtheria bacillus. **p., follicular,** clergyman's sore throat. **p., granular,** a form of chronic pharyngitis in which the mucous membrane has a granular appearance. **p., lithemic,** a sense of fulness in the throat with a feeling of rigidity associated with heat and dryness; it is due to the gouty diathesis. **p. sicca,** the chronic form with a dry state of the mucous membrane.

pharyngo- (*far-in-go-*) [*pharynx*]. A prefix signifying pertaining to the pharynx.

pharyngoamygdalitis (*far-ın-go-am-ig-dal-ı'-tis*) [*pharyngo-*; *ἀμύγδαλη*, almond, tonsil; *ιτις*, inflammation]. Inflammation of pharynx and tonsils.

pharyngocele (*far-in'-go-sēl*) [*pharyngo-*; *κήλη*, hernia]. A hernia or pouch of the pharynx projecting through the pharyngeal wall.

pharyngodynia (*far-ın-go-din'-e-ah*) [*pharyngo-*; *ὀδύνη*, pain]. Pain referred to the pharynx.

pharyngoepiglottic (*far-in-go-ep-ig-lot'-ik*). Pertaining to the pharynx and the epiglottis.

pharyngoepiglotticus (*far-in-go-ep-ig-lot'-ik-us*) [*pharyngo-*; *epiglottis*]. Muscular fibers derived from the stylo-pharyngeus and inserted into the side of the epiglottis and the pharyngo-epiglottic ligament.

pharyngoesophageal (*far-ın-go-e-sof-aj'-e-al*). Pertaining to the pharynx and esophagus

pharyngoesophagus (*far-in-go-e-sof'-ag-us*). The pharynx and esophagus considered as one organ.

pharyngoglossal (*far-ın-go-glos'-al*) [*pharyngo-*; *γλῶσσα*, tongue]. Pertaining conjointly to the pharynx and the tongue.

pharyngoglossus (*far-in-go-glos'-us*). Muscular fibres extending from the superior constrictor of the pharynx to the base of the tongue.

pharyngokeratosis (*far-in-go-ker-at-o'-sis*) [*pharyngo-*; *κέρας*, horn]. Thickening of the mucous lining of the pharynx with formation of a tough and adherent exudate.

pharyngolaryngeal (*far-ın-go-lar-ın'-je-al*) [*pharyngo-*; *larynx*]. Pertaining both to the pharynx and to the larynx.

pharyngolaryngitis (*far-ın-go-lar-ın-jı'-tis*) [*pharyngo-*; *laryngitis*]. Simultaneous inflammation of the pharynx and larynx.

pharyngolith (*far-in'-go-lith*) [*pharyngo-*; *λίθος*, stone]. A calcareous concretion in the walls of the pharynx.

pharyngology (*far-ın-gol'-o-je*) [*pharyngo-*; *λόγος*, science]. The science of the pharyngeal mechanism, functions and diseases.

pharyngolysis (*far-in-gol'-is-is*) [*pharyngo-*; *λύσις*, a loosing]. Paralysis of the pharyngeal muscles.

pharyngomaxillary (*far-ın-go-maks'-il-a-re*). Relating to the pharynx and the maxilla.

pharyngomycosis (*far-in-go-mi-ko'-sis*). Disease of the pharynx due to the action of fungi.

pharyngonasal (*far-in-go-na'-sal*) [*pharyngo-*; *nasus*, nose]. Pertaining to the pharynx and the nose. **p. cavity**, the upper portion of the pharynx; the naso-pharynx.

pharyngooral (*far-in-go-o'-ral*) [*pharyngo-*, *os*, *oris*, mouth]. Oropharyngeal; pertaining to both pharynx and mouth. **p. cavity**, the oropharynx; the middle portion of the pharynx, communicating with the mouth.

pharyngopalatine (*far-ın-go-pal'-a-tin*). Relating to the pharynx and the palate.

pharyngopalatinus (*far-in-go-pal-at-ı'-nus*). Synonym of *palatopharyngeus*. See *muscles, table of*.

pharyngoparalysis (*far-in-go-par-al'-ıs-is*). See *pharyngoplegia*.

pharyngopathy (*far-in-gop'-ath-e*) [*pharyngo-*; *πάθος*, disease]. Any disease of the pharynx.

pharyngoperistole (*far-ın-go-per-is'-to-le*). Synonym of *pharyngostenia*.

pharyngoplasty (*far-ın'-go-plas-te*) [*pharyngo-*; *πλάσσειν*, to form]. Plastic surgery of the pharynx.

pharyngoplegia (*far-in-go-ple'-je-ah*) [*pharyngo-*; *πληγή*, a stroke]. Paralysis of the muscles of the pharynx.

pharyngorhinitis (*far-ın-go-ri-nı'-tis*) [*pharyngo-*; *ῥίς*, nose; *ιτις*, inflammation]. Pharyngitis with rhinitis; inflammation of the pharynx and the nose.

pharyngorhinoscopy (*far-in-go-ri-nos'-ko-pe*). Synonym of *rhinoscopy, posterior*.

pharyngorrhagia (*far-ın-gor-a'-je-ah*) [*pharyngo-*; *ῥηγνύναι*, to burst forth]. Hemorrhage from the pharynx.

pharyngorrhea (*far-in-gor-ē'-ah*) [*pharyngo-*; *ῥοία*, a flow]. A mucous discharge from the pharynx.

pharyngoscleroma (*far-ın'-go-skle-ro'-mah*). Pharyngeal scleroma.

pharyngoscope (*far-in'-go-skōp*) [*pharyngo-*; *σκοπεῖν*, to inspect]. An instrument for use in examining the pharynx.

pharyngoscopy (*far-ın-gos'-ko-pe*) [*pharyngoscope*]. Examination of the pharynx with the pharyngoscope.

pharyngospasm (*far-ın'-go-spazm*) [*pharyngo-*; *σπασμός*, a spasm] Spasmodic contraction of the pharynx.

pharyngospasmodic (*far-ın-go-spas-mod'-ik*). Relating to spasmodic contraction of the pharynx.

pharyngostaphylinus (*far-ın'-go-staf-il-ı'-nus*). Synonym of *palatopharyngeus*. See *muscles, table of*.

pharyngostenia (*far-ın-go-ste'-ne-ah*) [*pharyngo-*; *στενός*, narrow]. Narrowing or stricture of the pharynx.

pharyngostenous (*far-in-go-ste'-nus*) [*pharyngo-*; *stenosis*]. Relating to stricture of the pharynx.

pharyngotherapy (*far-ın-go-ther'-a-pe*) [*pharyngo-*; *θεραπεία*, therapy] The treatment of diseases of the pharynx by direct applications or irrigations

pharyngotome (*far-ın'-go-tōm*) [*pharyngo-*; *τομή*, a cutting]. An instrument for incising the pharynx

pharyngotomy (*far-in-got'-o-me*) [see *pharyngotome*] Incision into the pharynx. **p., inferior**, that in which the tissues between the hyoid bone and the cricoid cartilage are divided. **p., lateral**, incision into one side of the pharynx. **p., subhyoidean**, that through the thyrohyoid membrane.

pharyngotonsillitis (*far-ın-go-ton-sil-ı'-tis*) [*pharyngo-*; *tonsillitis*]. Inflammation of the pharynx and the tonsil.

pharyngotyphoid (*far-in-go-ti'-foyd*) [pharyngo-; typhoid]. Typhoid fever in which angina or pharyngeal pain is an early symptom.

pharyngoxerosis (*far-ın-go-zer-o'-sis*) [*pharyngo-*; *xerosis*]. Dryness of the pharynx.

pharynx (*far'-ingks*) [*φάρυγξ*, the throat]. The musculomembranous pouch situated back of the nose, mouth, and larynx, and extending from the base of the skull to a point opposite the sixth cervical vertebra, where it becomes continuous with the esophagus. It is lined by mucous membrane, covered in its upper part with columnar ciliated epithelium, in its lower part with stratified epithelium. On the outside of this is a layer of fibrous tissue—the *pharyngeal aponeurosis*. This in turn is surrounded by the muscular coat. The upper portion of the pharynx communicates with the nose through the posterior nares, is known as the *nasopharynx*, and functionally belongs to the respiratory tract; the lower portion is divided into the *oropharynx* and *laryngopharynx*, and is a part of the digestive tract The pharynx communicates with the middle ear by means of the Eustachian tube.

phase (*fāz*) [*φάσις*, appearance]. The condition or stage of a disease or physiological function at a given time.

phaselin (*fas'-el-in*). A proprietary digestant said to be a constituent of a wild bean of Mexico.

phatne (*fat'-ne*) [*φάτνη*, socket]. Same as *alveolus*.

phatnorrhagia (*fat-nor-a'-je-ah*) [*φάτνη*, socket; *ῥηγνύναι*, to burst forth]. Hemorrhage from a tooth-socket.

Ph. B. Abbreviation for (1) *British Pharmacopœia;* (2) Bachelor of Philosophy.

Ph. D. Abbreviation for (1) Doctor of Pharmacy; (2) Doctor of Philosophy.

phecine (*fe'-sēn*), $C_6H_4(OH)_2SO_4$. Sulphometadihydroxybenzene, a sulphate of the dihydrate of benzene; it is said to be a nonirritant antiseptic and prophylactic, and is indicated in diseases of the skin.

Phelps' operation [Abel Mix *Phelps*, American surgeon, 1851–1902]. 1. *For club-foot:* a direct open incision is made through the inner and plantar surfaces of the foot. 2. *For hare-lip:* a loop is passed through the margin of the lip on either side of the cleft; the incision is curved on both sides, and a V-shaped flap is allowed to remain in the middle line, beneath the septum of the nose; the wound is closed with silk sutures.

phenacaine (*fen'-ak-ān*). Trade name of ethenyl-paradiethoxy-diphenyl-amidine hydrochloride; used as a local anesthetic.

phenacetin (*fe-nas'-et-in*). See *acetphenetidin*.

phenacodin (*fen-ak'-o-din*). Trade name of a combination of phenacetin, caffeine, codeine and guarana.

phenakistoscope, phænakistoscope (*fe-nak-is'-to-skōp*) [*φενακιστής*, an impostor; *σκοπεῖν*, to view] That form of stroboscope in which the figures and slits revolve in the same direction. Syn., *direct stroboscope; zoetrope.*

phenalette (*fen-al-et'*). An effervescing headache powder, containing phenacetin.

phenalgene (*fe-nal'-jēn*). A proprietary analgesic said to contain acetanilide, sodium bicarbonate, etc.

phenalgin (*fe-nal'-jin*). A proprietary antipyretic and analgesic said to be an ammoniated combination of phenyl and acetanilide Syn., *ammoniophenylacetamide*

phenalin (*fen'-al-in*). Trade name of a preparation of phenolphthalein.

phenamine (*fen-am'-ēn*). Phenocoll.

phenanthrene (*fe-nan'-thrēn*) [*phenol; ἄνθραξ*, coal], $C_{14}H_{10}$. A hydrocarbon isomeric with anthracence, and found with it in the last fraction of coal-tar.

phenarsenamine (*fen-ar-sen'-am-ēn*). A Canadian make of arsphenamine.

phenate (*fe'-nāt*) [*phenol*]. A compound of phenol and a base; a carbolate.

phenatol (*fe'-nat-ol*). A proprietary antipyretic and anodyne said to be a combination of sodium carbonate, bicarbonate, sulphate, and chloride, with acetanilide and caffeine.

phenazone (*fe'-naz-ōn*). Antipyrine.

phene (*fēn*). Benzene.

phenedin (*fe'-ned-in*). Acetphenetidin.

phenegol (*fe'-ne-gol*), $C_6H_5.O.NO_2.SO_3K$. Mercury potassium nitroparaphenol sulphonate. It is antiseptic and bactericidal.

phenetidin (*fe-net'-id-in*) [*phenol*], $C_8H_{11}NO$. The base from which acetphenetidin is prepared by substitution. **p. citrate,** a condensation-product of paraamidophenetol with citric acid; sedative and antipyretic.

phenetidinuria (*fe-net-id-in-ū'-re-ah*). A condition marked by the presence of phenetidin in the urine.

phenetol (*fen'-et-ol*) [*phenol; oleum*, oil], $C_2H_5.O.C_6H_5$. Ethyl phenyl ether; a volatile aromatic-smelling liquid.

phenetsal (*fen-et'-sal*). Trade name of the salicylic ester of acetaminophenol; it resembles salol.

phengophobia (*fen-go-fo'-be-ah*) [*φέγγος*, light; *φόβος*, fear]. See *photophobia*.

phenic (*fe'-nik*) [*phenol*]. Obtained from coal-tar. **p. acid.** See *acid, carbolic,* and *phenol.*

phenicate (*fen'-ik-āt*) To charge with phenol or phenic acid.

phenicism (*fe'-nis-izm*). A synonym of *rubeola, q. v.*

phenidin, phenin (*fe'-nid-in, fe'-nin*). See *acetphenetidin.*

phenigmus (*fe-nig'-mus*) [*φοῖνιξ*, purple-red]. A skin disease characterized by diffuse redness, without fever.

phenmethylol (*fen-meth'-il-ol*). Trade name of benzyl alcohol, $C_6H_5.CH_2OH$.

phenobarbital (*fen-o-bar'-bit-al*). Same as luminal, or phenyl-ethyl-malonyl-urea.

phenocaine (*fen'-o-kān*). Synonym of holocaine hydrochloride, an anesthetic used in ophthalmology; not available for hypodermic use.

phenoco (*fen'-o-ko*). Trade name of a mixture of coal tar creosote and higher phenol homologues, in a solution of soap; antiseptic and germicide.

phenocoll (*fe'-no-kol*) [*phenol*], $C_{10}H_{14}N_2O_2$. Amidophenacetin, a substance resembling acetphenetidin; the hydrochloride is used as an antipyretic. Dose 10–15 gr. (0.65–1.0 Gm.).

phenocreosote (*fe-no-kre'-o-sōt*). A preparation of creosote and phenol

phenodin (*fe'-no-din*) [*φοινώδης*, blood-red]. The same as *hematin, q. v.*

phenofax (*fe'-no-fax*). Trade name of an antiseptic surgical dressing.

phenol (*fe'-nol*) [*φοινιξ*, purple-red] 1. C_6H_5OH. Hydroxybenzene, obtained either from coal-tar by fractional distillation or made synthetically. More commonly known as *carbolic acid.* 2. Any derivative of benzene homologous with phenol. **p.-camphor,** camphorated phenol. **p. celluloid,** a protective varnish for wounds, prepared from pyroxylin, phenol, and camphor. **p. diiodide,** a precipitate from a combination of solutions of sodium, phenol, and iodopotassium iodide, recommended as a wound antiseptic. Syn., *diiodophenolsodide.* **p., glycerite of** (*glyceritum phenolis*, U. S. P.), a mixture of liquefied phenol and glycerol. **p., liquefied** (*phenol liquefactum*, U. S. P.), a liquid containing not less than 86.4% by weight of absolute phenol. Dose 1 min. (0.06 Cc.). **p., ointment of** (*unguentum phenolis*, U. S. P.), an ointment made of white petrolatum and phenol. **p., orthomonobromo-,** C_6H_5BrO, an oily, violet-colored liquid with strong odor, soluble in ether, chloroform, or 100 parts of water; used as a wound antiseptic and in erysipelas, 1 to 2% in petrolatum, twice daily. **p., orthomonochlor-,** C_6H_5ClO, a colorless antiseptic liquid, soluble in alcohol or ether, used with petrolatum in skin diseases, etc. **p. sulphoricinate,** a solution of phenol in sulphoricinic acid, used in 20% solution in tuberculosis of the throat. **p., tests for.** See *Allen, Berthelot, Davy, Esjkman, Jacquemin, Landolt, Penzoldt and Fischer, Plugge.* **p. trichloride.** See *trichlorphenol.*

phenolate (*fe'-no-lāt*) [*phenol*]. A salt of carbolic acid.

phenolax (*fe'-no-laks*). Trade name of a preparation of phenolphthalein; used as a purgative.

phenolid (*fe'-nol-id*). A proprietary preparation said to be a mixture of acetanilide and sodium salicylate or sodium bicarbonate. Dose 5–10 gr. (0 3–0.6 Gm.).

phenolin (*fen'-ol-in*). An antiseptic prepared from crude cresols.

phenolipoids (*fe-no-lip'-oids*). Compounds of phenol with lipoids.

phenology, phænology (*fe-nol'-o-je*) [*φαίνειν*, to bring to light; *λόγος*, science]. In biology, the science of the behavior of plants and animals to the periodic changes in meteorologic conditions.

phenoloid (*fe'-nol-oid*). A preparation containing phenol and its higher homologues, used as a disinfectant.

phenolphthalein (*fe-nol-tha'-le-in*) [*phenol; phthalic acid*], $C_{20}H_{14}O_4$. A substance produced by the action of phenol on phthalic acid and used generally in a 1% solution in 50% alcohol, as a delicate test for acids and alkalies. It is turned red by alkalies and decolorized by acids It has been recommended as a purgative. Dose 1½–4 gr. (0.09–0 2 Gm.).

phenolphthalin (*fe-nol-tah'-lin*). Dioxytriphenylmethane carbonic acid, used in Meyer's reagent for testing for blood.

phenolsulphonephthalein (*fe-nol-sul-fōn-tah'-le-in*). A substance whose monosodic salt is soluble in water, giving a red solution. This is used as a diagnostic agent in kidney trouble. Injected hypodermically, it appears in the urine in 10 to 15 minutes if the kidneys are normal; where any disorder exists elimination is less rapid.

phenolsulphonic acid (*fe-nol-sul-fon'-ik*). Sulphocarbolic acid.

phenoltetrachlorphthalein test (*fe-nol-tet-rah-klor-tah'-le-in*). A freshly prepared physiological solution of sodium chloride solution containing 400 mg. of the disodium salt of phenoltetrachlorphthalein is injected intravenously; brisk purgation follows, and the feces have a bright color. Delay in the appearance or brightness of the color is said to indicate deficiency of liver function.

phenomenon (*fe-nom'-en-on*) [*φαινόμενον*, that which is seen; from *φαίνειν*, to shine: *pl., phenomena*]. An event or manifestation, generally of an unusual character. **p. Aubert's etc.** For this and other proper names see under the proper name. **p., diaphragm.** See *Litten's sign.* **p., face.** See *Chvostek's sign.* **p., great toe.** See *Babinski's reflex.* **p., knee.** Synonym of *patellar tendon-reflex.*

phenone (*fe'-nōn*) [*phenol*]. A ketone formed by the union of phenyl and a hydrocarbon of the marsh-gas series.

phenophobia (*fe-no-fo'-be-ah*). Synonym of *photophobia.*

phenophthalein (*fe-no-tha'-le-in*). See *phenolphthalein.*

phenopyrine (*fe-no-pi'-rēn*). A mixture of equal parts of phenol and antipyrine.

phenoresorcin (*fe-no-re-sor'-sin*). A mixture of 67 parts of phenol with 33 parts of resorcin.

phenosal (*fe'-no-sal*). Phenetidin acetosalicylate; an antipyretic compound of acetphenetidin and salicylic acid; used in acute articular rheumatism. Dose 8 gr. (0.5 Gm.) 2 to 6 times daily. Syn., *paraphenetidin salicylacetic acid.*

phenosalyl (*fe-no-sal'-il*). A compound of phenol, salicylic acid, lactic acid, and menthol, mixed with heat. It is an external antiseptic, used in conjunctivitis in 0.2 to 0.4% solution; in eczema, in 1% solution.

phenosuccin (*fe-no-suk'-sin*), $C_6H_4(OC_2H_3)N(COCH_3)_2$. Colorless needles derived from paramidophenol by action of succinic acid; antipyretic and antineuralgic. Dose 15–45 gr. (1–3 Gm.) daily. Syn., *pyrantin.*

phenosuccinate (*fe-no-suk'-sin-āt*). The sodium salt of phenosuccin, forming a white, soluble powder. It is preferred to phenosuccin. Dose 7½–46 gr.

phenotype (*fe'-no-tīp*) [*φαίνειν*, to display; *τύπος*, type]. The obvious characteristics common to a number of persons.

phenoxin (*fe-noks'-in*). A trade name for carbon tetrachloride.

phenoxycaffeine (*fe-noks-e-kaf'-e-in*), $C_8H_9OC_6H_2N_4O_2$. It is anesthetic and narcotic and is used subcutaneously in sciatica. Dose 4 gr. (0.26 Gm.).

phenyl (*fe'-nil*) [*phenol; ὕλη*, matter]. The univalent radical, C_6H_5, of phenol. **p. alcohol.** Synonym of *phenol.* **p. cinchoninic acid**, preferred name for atophan. **p. hydrate**, phenol. **p. salicylate** (*phenylis salicylas*, U. S. P.), the salicylic ester of phenyl, a white, crystalline substance, used as an intestinal and urinary antiseptic, and as a substitute for salicylic acid. It is decomposed in the intestine into salicylic acid and phenol. Dose 5–25 gr. (0.32–1.0 Gm.). Syn., *salol.*

phenylacetamide. Same as *acetanilide.*

phenylalanin (*fen-il-al'-an-in*). Phenylamidopropionic acid, a derivative from protein.

phenylamine (*fen-il-am'-in*). Same as *aniline.*

phenylaniline (*fen-il-an'-il-in*). Same as *diphenylamine.*

phenylate (*fe'-nil-āt*). A carbonate.

phenylchinaldin. See *phenylquinaldin.*

phenylchinolin. A derivative of chinolin by the entrance of the phenyl-group into its pyridin molecule.

phenylene (*fen'-il-ēn*), C_6H_4. A bivalent radical.

phenylglucosazone (*fe-nil-gloo-ko'-saz-ōn*), $C_{18}H_{22}N_4O_4$. A yellow, crystalline compound produced in the phenylhydrazine test for glucose.

phenylglycuronic acid (*fe-nil-glik-ū-ron'-ik*). A crystalline body, a compound of phenol and glycuronic acid, occurring in the urine after the ingestion of phenol.

phenylhydrazine (*fe-nil-hi'-dra-zēn*), $C_6H_8N_2$. A liquid base, crystallizing in plates, the hydrochloride of which is used as a test for sugar. **p. tests.** See *v. Jaksch, Neumann, Riegler.*

phenylhydroxylamine, C_6H_5NHOH, a product of nitrobenzol by reduction; very poisonous.

phenylic (*fe-nil'-ik*) [*phenyl*]. Pertaining to or containing phenyl. **p. acid**, carbolic acid, phenol.

phenylmethane. A crystalline analgesic and antipyretic substance.

phenylon (*fe'-nil-on*). Antipyrine.

phenylquinaldin (*fe-nil-kwin-al'-din*), $C_9H_5(C_6H_5)N$, an antiperiodic prepared by the action of hydrochloric acid on a mixture of aniline, acetophenone, and aldehyde. Dose 1½–3 gr. (0.1–0.2 Gm.). It is also used externally as a local irritant.

phenylquinolin (*fe-nil-kwin'-o-lin*). A derivative of quinolin by the entrance of the phenyl groups into its pyridin molecule. It is more active than quinine.

phenylsulphonic (*fen-il-sul-fon'-ik*). Pertaining to phenylsulphone, a radical $C_6H_5SO_2$ which combines with mercury and arsenic to form treponemicidal products.

phenylurethane (*fe-nil-ū'-reth-ān*). See *euphorin*.

pheochrome, pheochromoblast. See *phaochrome, phaochromoblast*.

phesin (*fe'-sin*). $C_6H_5.O.C_2H_3SO_3Na.NH.CO.CH_3$. A proprietary antipyretic sulpho-derivative of acetphenetidin.

Ph. G. Abbreviation for (1) Graduate in Pharmacy; (2) German Pharmacopœia.

phial (*fī'-al*). See *vial*.

philanthropist (*fil-an'-thro-pist*) [φιλάνθρωπος, humane]. One who loves mankind.

philanthropy (*fil-an'-thro-pe*) [φιλάνθρωπος, humane]. The love of mankind; benevolence.

philiater (*fil-s'-at-er*) [φίλος, fond of; ἰᾶτρευσις, practice of medicine]. 1. A student of medicine. 2. A dabbler in medicine.

Phillips' muscle. A small muscle extending from the styloid process of the radius and the external lateral ligament to the proximal portion of the phalanges.

Phillyrea (*fil-ir'-e-ah*). A genus of the *Oleaceæ*. The leaves of *P. latifolia* are diuretic and emmenagogue and are used in ulcerations of the mouth. It contains *phillyrin*.

phillyrin (*fil'-i-rin*) $C_{27}H_{34}O_{11} + H_2O$. A crystalline glucoside found in the bark and leaves of *Phillyrea latifolia, P. angustifolia*, and *P. media*. It is anti-malarial.

philocytase (*fil-o-sī'-tās*) [φιλεῖν, to love; κύτος, a cell]. Metchnikoff's name for the intermediate body of Ehrlich; an amboceptor.

philoneism (*fil-o-ne'-izm*) [φιλεῖν, to love; νέος, new]. Abnormal love of novelty; the reverse of misoneism.

philopatridomania (*fil-o-pa-trid-o-ma'-ne-ah*) [φιλεῖν, to love; πατρίς, fatherland; μανία, madness]. An insane desire to return home; excessive nostalgia, or homesickness.

philter, philtre (*fil-ter*) [φίλτρον, a love-charm]. A love-potion; a preparation supposed to be efficacious in exciting sexual passion.

philtrum (*fil'-trum*) [φίλτρον, a love-charm]. 1. The depression on the surface of the skin of the upper lip immediately below the septum of the nose. 2. A *philter, q. v.*

phimosientomy (*fi-mo-si-en'-to-me*) [φιμοῦν, to constrict; ἐντομή, incision]. Incision of a constricted prepuce.

phimosiotomy (*fi-mo-si-ot'-o-me*). See *phimosientomy*.

phimosis (*fi-mo'-sis*) [φιμοῦν, to constrict]. Elongation of the prepuce and constriction of the orifice, so that the foreskin cannot be retracted to uncover the glans penis. **p. adnata, p. puerilis**, congenital phimosis. **p. circumligata.** See *paraphimosis*. **p. œdematodes**, phimosis with edema of the prepuce. Syn., *hydrophimosis*. **p. oris**, narrowing of the opening of the mouth. **p. palpebrarum.** Synonym of *blepharophimosis*. **p. vaginalis**, atresia of the vagina.

phimotic (*fi-mot'-ik*). Relating to phimosis.

phisiotherapy. This word is incorrectly spelled. See *physiotherapy*.

phleb- (*fleb-*) [φλέψ, vein]. A prefix meaning vein.

phlebalgia (*fleb-al'-je-ah*) [*phleb-*; ἄλγος, pain]. Pain in venules or varices in connection with a nerve.

phlebangioma (*fleb-an-je-o'-mah*) [*phleb-*; ἀγγεῖον, vessel; ὄμα, tumor]. A venous aneurysm.

phlebarteriectasia (*fleb-ar-te-re-ek-ta'-ze-ah*) [*phleb-*; ἀρτηρία, artery; ἔκτασις, dilatation]. Varicose aneurysm.

phlebarteriodialysis (*fleb-ar-te-re-o-di-al'-is-is*) [*phleb-*; ἀρτήρια, artery; διάλυσις, separation]. Arteriovenous aneurysm.

phlebectasia, phlebectasis (*fleb-ek-ta'-ze-ah, fleb-ek'-tas-is*) [φλέψ, vein; ἔκτασις, dilation]. Dilation of a vein; varicosity.

phlebectomy (*fleb-ek'-to-me*) [φλέψ, vein; ἐκτομή, excision]. Excision of a vein or a portion of a vein.

phlebectopia (*fleb-ek-to'-pe-ah*) [*phleb-*; ἐκ, out, τόπος, place]. The displacement or abnormal position of a vein.

phlebemphraxis (*fleb-em-fraks'-is*) [*phleb-*; ἔμφραξις, obstruction]. Plugging of a vein.

phlebepatitis (*fleb-ep-at-i'-tis*) [φλέψ, vein; *hepatitis*]. Inflammation of the portal or hepatic veins.

phlebeurisma (*fleb-ū-ris'-mah*). See *varix*.

phlebexairesis (*fleb-eks-i-re'-sis*) [φλέψ, vein; ἐξαιρεῖν, to take out]. The extraction of a vein.

phlebin (*fleb'-in*) [*phleb-*]. A term for the venous blood-pigment as contained in the erythrocytes.

phlebismus (*fleb-iz'-mus*) [φλέψ, vein]. Undue prominence or swelling of a vein.

phlebitic (*fleb-it'-ik*). Pertaining to, of the nature of, or affected with phlebitis.

phlebitis (*fleb-i'-tis*) [φλέψ, vein; ῖτις, inflammation]. Inflammation of a vein. This is generally suppurative (*suppurative phlebitis*), and is the result of the extension of suppuration from adjacent tissues. It leads to the formation of a thrombus within the vein (*thrombophlebitis*), which may break down and cause the distribution of septic emboli to various parts of the body. When not due to a suppurative process the phlebitis, called *plastic, adhesive*, or *proliferative*, may give rise to obliteration of the vein. The symptoms of phlebitis are pain and edema of the affected part, redness along the course of the vein, the latter appearing as a hard, tender cord. **p. sclerosing.** See *sclerosing phlebitis*. **p., sinus-**, phlebitis of the sinuses of the dura mater.

phlebo- (*fleb-o-*) [φλέψ, vein]. A prefix denoting pertaining to a vein.

phlebocarcinoma (*fleb-o-kar-sin-o'-mah*) [*phlebo-; carcinoma*]. Extension of carcinoma to the walls of a vein.

phlebocholosis (*fleb-o-ko-lo'-sis*) [*phlebo-*; χώλωσις, lameness]. Paralysis or disease of the veins.

phleboclysis (*fleb-o-kli'-sis*) [*phlebo-*; κλύσις, injection]. Injection of saline solution into a vein.

phlebogram (*fleb'-o-gram*) [*phlebo-*; γράμμα, a writing]. A tracing of the movements of a vein by the sphygmograph.

phlebograph (*fleb'-o-graf*) [*phlebo-*; γράφειν, to write]. An instrument for recording the venous pulse.

phlebography (*fleb-og'-ra-fe*) [*phlebo-*; γράφειν, to write]. The anatomy and physiology of the veins; a description of the veins.

phleboid (*fleb'-oid*) [*phebo-*; εἶδος, resemblance]. 1. Pertaining to a vein, venous. 2. Resembling a vein.

phlebolite, phlebolith (*fleb'-o-lit, fleb'-o-lith*) [*phlebo-*; λίθος, a stone]. Vein-stone, a hard concretion sometimes found in veins, and produced by calcareous infiltration of a thrombus.

phlebolithiasis (*fleb-o-lith-ī'-as-is*) [*phlebo-*; λίθος, stone]. The formation of phleboliths.

phlebolitic (*fleb-o-lit'-ik*) [*phlebo-*; λίθος, a stone]. Pertaining to or characterized by phlebolites.

phlebology (*fleb-ol'-o-je*) [*phlebo-*; λόγος, science]. Study of the anatomy and physiology of veins.

phlebopexy (*fleb'-o-peks-e*) [*phlebo-*; πῆξις, a fixing in]. Longuet's term for the preservation of the venous reticulum which results from the extraserous transplantation of the testicle in cases of varicocele.

phlebophlebostomy (*fleb-o-fleb-os'-to-me*). An operation in which an anastomosis is made between veins

phlebophlogosis (*fleb-o-flo-go'-sis*). *Phlebitis.*

phlebophthalmotomy (*fleb-off-thal-mot'-o-me*) [*phlebo-*; ὀφθαλμός, eye; τομή, a cutting]. Scarification of the conjunctival vein.

phleboplasty (*fleb'-o-plas-te*) [*phlebo-*; πλάσσειν, to mold]. Plastic operation for the repair of veins.

phleboplerosis (*fleb-o-ple-ro'-sis*) [*phlebo-*; πλήρωσις, a filling]. Distention of the veins.

phleborrhagia (*fleb-or-a'-je-ah*) [*phlebo-*; ῥηγνύναι, to burst forth]. Venous hemorrhage.

phleborrhaphy (*fleb-or'-af-e*) [*phlebo-*; ῥαφή, suture]. Suture of a vein.

phleborrhexis (*fleb-or-eks'-is*) [*phlebo-*; ῥῆξις, rupture]. Rupture of a vein.

phlebosclerosis (*fleb-o-skle-ro'-sis*) [*phlebo-*; σκληρός, hard]. 1. Sclerosis of a vein 2 Chronic phlebitis

phlebostasis (*fleb'-os-tas-is*) [*phlebo-*; στάσις, a standing still]. The temporary removal of some of the blood from the general circulation by means of compression in the veins in the extremities; also called "bloodless phlebotomy."

phlebostenosis (*fleb-o-sten-o'-sis*) [*phlebo-*; στένος, narrow]. Constriction of a vein.

phlebostrepsis (*fleb-o-strep'-sis*) [*phlebo-*; στρέψις, a twisting]. Torsion, or twisting, of a vein.

phlebothrombosis (*fleb-o-throm-bo'-sis*) [*phlebo-*; *thrombosis*]. Formation of a thrombus in a vein.

phlebotome (*fleb'-o-tōm*). A cutting-instrument used in phlebotomy; a fleam.

phlebotomist (*fleb-ot'-o-mist*) [*phlebo-*; τομή, a cutting]. One who lets blood; a bleeder

phlebotomize (*fleb-ot'-o-mīz*). To bleed; to perform phlebotomy

phlebotomus fever (*fleb-ot'-om-us*). A fever of brief duration met with in the countries around the Mediterranean, also in India; it is apparently conveyed by sand-flies.

phlebotomy (*fleb-ot'-o-me*) [*phlebo-*; τομή, a cutting]. Opening of a vein for the purpose of bloodletting. The vein most often selected is the median cephalic at the bend of the elbow. **p., bloodless.** See *phlebostasis.*

phledonia (*fle-do'-ne-ah*) [φλεδονεία, babble]. Delirium, or delirious utterance.

phlegm (*flem*) [φλέγμα, phlegm]. 1. A viscid, stringy mucus, secreted by the mucosa of the upper air-passages. 2. One of the four humors of the old writers.

phlegmasia (*fleg-ma'-se-ah*) [φλέγμα, a flame]. Inflammation. **p. adenosa.** See *adenitis.* **p. alba dolens,** milk-leg, a painful swelling of the leg beginning either at the ankle and ascending, or at the groin and extending down the thigh, its usual cause being septic infection after labor. **p. cellularis,** cellulitis. **p. dolens.** Same as *p. alba dolens.* **p. lactea.** See *p. alba dolens.* **p. malabarica.** Synonym of *elephantiasis arabum.* **p. membranæ mucosæ gastropulmonalis.** See *aphthæ tropicæ.* **p. myoica,** myositis.

phlegmatic (*fleg-mat'-ik*) [*phlegm*]. Full of phlegm; hence, indifferent; apathetic; slow, dull; lymphatic.

phlegmon (*fleg'-mon*) [φλεγμονή, inflammation]. An inflammation characterized by the spreading of a purulent or fibrinopurulent exudate within the tissues. **p., gas,** that in which more or less offensive gas is formed with the pus. **p. ligneux,** a peculiar form of chronic inflammation of the skin and subcutaneous tissue marked by a slow clinical course and a consistence resembling wood. It occurs most frequently on the neck.

phlegmonodœa (*fleg-mon-o-de'-ah*) [φλεγμονή, inflammation]. 1. See *erythematica* 2. Peritonitis.

phlegmonoid (*fleg'-mon-oid*). Resembling phlegmon.

phlegmonous (*fleg-mon-us*) [*phlegmon*]. Of the nature of or pertaining to phlegmon.

phloem (*flo'-em*) [φλοιός, bark] In botany that portion of a fibrovascular bundle which consists of bast-tissue and sieve-tissue; leptome. Cf. *xylem.* **p.-ray,** a plate of phloem-tissue between two medullary rays. **p.-sheath,** a layer of thin-walled cells surrounding the phloem-tissue; bast-sheath; periphloem; vascular bundle sheath. **p.-tissue,** phloem.

phlogetan (*flog'-et-an*). A preparation containing nucleinic acid, said to be of value in the treatment of mental diseases.

phlogistic (*flo-jis'-tik*) [φλογιστός, burnt]. Inflammatory.

phlogogen, phlogogon (*flog'-o-jen, flog'-o-gon*) [φλόγωσις, inflammation; γεννᾶν, to produce]. Any substance having the property of exciting inflammation in a tissue with which it comes in contact; an irritant.

phlogogenic (*flog-o-jen'-ik*) [see *phlogogen*]. Causing inflammation.

phlogogenous (*flo-goj'-en-us*) [φλογός, burning; γενής, producing]. Producing inflammation

phlogosin (*flog'-o-sin*) [φλόγωσις, inflammation]. A crystalline body isolated from cultures of pyogenic staphylococci, and causing suppuration when injected beneath the skin or introduced into the eye.

phlogosis (*flog-o'-sis*) [see *phlogosin*]. 1. Inflammation. 2. Erysipelas.

phlogotic (*flo-got'-ik*) [φλογός, burning]. Pertaining to or marked by phlogosis, or inflammation.

phlogozelotism (*flo-go-zel'-ot-izm*) [φλογός, burning; ζηλοῦν, to be eager]. A mania for ascribing to every disease an inflammatory origin.

phloretin (*flor-e'-tin*) [φλοιός, bark; ῥίζα, root]. A product of the treatment of phloridzin by dilute acids. Like that of phloridzin, its administration in suitable doses is followed by glycosuria or true diabetes.

phloridzin, phlorizin, phlorrhizin (*flor-id'-zin, flor-i'-zin*) [φλοιός, bark; ῥίζα, a root], $C_{21}H_{24}O_{10}.2H_2O$. A bitter crystalline glucoside occurring in the root and trunk of apple, pear, and other fruit-trees. It is said to possess antipyretic properties. Dose 5–10 gr. (0.32–0.65 Gm.). Given to lower animals it produces glycosuria. **p.-diabetes,** the glycosuria induced in lower animals, especially dogs, by the administration of phloridzin.

phloroglucin (*flo-ro-gloo'-sin*) [φλοιός, bark; γλυκύς, sweet], $C_6H_3(OH)_3$. A crystalline substance found in the bark of the cherry, pear, apple, and other trees, and used as a test for woody tissue (lignin) and hydrochloric acid.

phloroglucinol (*flo-ro-glu'-sin-ol*). Phloroglucin.

phlorol (*flo'-rol*) [φλοιός, bark; *oleum*, oil], $C_8H_{10}O$. A phenol found in creosote.

phlorose (*flo'-rōs*) [φλοιός, bark]. A glucose which is probably identical with dextrose.

phlorrhizin (*flor'-iz-in*). Synonym of *phloridzin*.

phlyctena, phlyctæna (*flik-te'-nah*) [φλύκταινα, a blister]. A vesicle.

phlyctenar (*flik'-ten-ar*) [φλύκταινα, blister] Affected with phlyctena; pertaining to phlyctena.

phlyctenoid (*flik'-ten-oid*). See *phlyctenular*.

phlyctenosis (*flik-ten-o'-sis*) [φλύκταινα, blister]. An eruption characterized by vesicles. **p. aggregata,** an herpetic eruption in which the vesicles are situated closely together. **p. labialis.** Synonym of *herpes labialis*. **p. sparsa,** a form in which the vesicles are few and at considerable distances from each other.

phlyctenula (*flik-ten'-ū-lah*) [dim. of φλύκταινα, blister]. A little vesicle or blister.

phlyctenular (*flik-ten'-ū-lar*) [*phlyctena*]. Resembling a phlyctenule; characterized by the formation of phlyctenules, as *phlyctenular* conjunctivitis.

phlyctenule (*flik-ten'-ūl*) [*phlyctena*]. A minute phlyctena; a little vesicle or blister.

phlysis (*fli'-sis*) [φλύσις, eruption]. 1. A phlyctenule. 2. A whitlow.

phlysoremid (*fli-so-rem'-id*). Trade name for capsules containing Koch's bacilli emulsion.

phlyzacion, phlyzacium (*fli-za'-se-on, fli-za'-se-um*) [φλύζειν, to inflame]. A pustular vesicle on an indurated base. **p. acutum.** See *ecthyma*.

phobia (*fo'-be-ah*) [φόβος, fear]. Any obsession of fear characteristic of insanity.

phobodipsia (*fo-bo-dip'-se-ah*) [φόβος, fear, δίψα, thirst]. Hydrophobia.

phobophobia (*fo-bo-fo'-be-ah*) [φόβος, fear] Dread of being afraid.

Phocas' disease (*fo-kah'*) [B. G. *Phocas*, French physician]. Chronic fibrous mastitis, characterized by the presence of multiple fibrous nodules in both breasts.

phocomelus (*fo-kom'-el-us*) [φώκη, a seal; μέλος, a limb]. A monster with rudimentary limbs, the hands and feet being attached almost directly to the trunk.

phonacoscope (*fo-nak'-o-skōp*) [φωνή, voice; ἀκούειν, to listen; σκοπεῖν, to examine]. An instrument for combined auscultation and percussion; it increases the intensity of the sounds heard.

phonacoscopy (*fo-nak-os'-ko-pe*). Examination of the chest with a phonoscope.

phonal (*fo'-nal*) [φωνή, voice]. Pertaining to the voice or to sound.

phonation (*fo-na'-shun*) [φωνή, voice]. The production of vocal sound or articulate speech. **p., subenergetic,** hypophonia. **p., superenergetic,** hyperphonia.

phonatory (*fon'-a-to-re*) [*phonation*]. Pertaining to phonation. **p. band.** Same as *vocal band*.

phonautogram (*fo-naw'-to-gram*) [φωνή, voice; αὐτός, self; γράμμα, inscription]. The diagram of a phonautograph.

phonautograph (*fo-naw'-to-graf*) [φωνή, voice; *autograph*]. An apparatus for recording automatically the vibrations of the air produced by the voice.

phone (*fōn*) [φωνή, sound, voice]. A vocal sound.

phoneme (*fo'-nēm*) [φώνημα, a sound]. An auditory hallucination.

phonendoscope (*fo-nen'-do-skōp*) [φωνή, voice; ἔνδον, within; σκοπεῖν, to view]. A variety of stethoscope which intensifies the auscultatory sounds

phonetic (*fo-net'-ik*) [φωνή, voice]. 1. Pertaining to or representing sounds. 2. Pertaining to the voice.

phonetics (*fo-net'-iks*). The science dealing with the mode of production of sounds.

phonic (*fon'-ik*) [φωνή, voice]. Pertaining to the voice. **p. spasm,** a spasm of the laryngeal muscles occurring on attempting to speak.

phonica (*fon'-ik-ah*). Diseases affecting the vocal organs.

phonism (*fo'-nizm*) [φωνή, voice]. A sensation, of sound or hearing, due to the effect of sight, touch, taste, or smell, or even to the thought of some object, person, or general conception.

phono- (*fo-no-*) [φωνή, voice]. A prefix denoting relating to the voice or to sound.

phonocardiogram (*fo-no-kar'-de-o-gram*) [*phono-*; καρδία, heart; γράμμα, a writing]. An instrument for registering the sounds of the heart.

phonocardiography (*fo-no-kar-de-og'-ra-fe*). Registration of the sounds of the heart.

phonochorda (*fo-no-kor'-dah*) [*phono-*; χορδή, cord: *pl*, *phonochordæ*]. A vocal band

phonogram (*fo'-no-gram*) [φώνη, voice; γράμμα, a writing]. A written record of a sound.

phonograph (*fo'-no-graf*) [*phono-*; γράφειν, to record]. An instrument consisting of a wax-coated cylinder revolving under a stylus attached to a diaphragm. The vibrations of the diaphragm, set in motion by the voice, cause the cylinder to be indented by the stylus. When the cylinder is again revolved, the movement of the stylus upon the cylinder throws the diaphragm into vibration and reproduces the original sounds of the voice

phonologist (*fo-nol'-o-jist*). Proposed term for a person versed in phonology, and who may, in addition, be skilled in applying the science.

phonology (*fo-nol'-o-je*) [φώνη, sound; λόγος, discourse]. Proposed name for the science of sound.

phonomania (*fo-no-ma'-ne-ah*) [φονή, slaughter; μανία, madness]. Homicidal mania.

phonomassage (*fo-no-mas-ahzh'*) [*phono-*, *massage*]. Action upon the tympanum by sound vibrations conducted into the auditory canal.

phonometer (*fo-nom'-et-er*) [*phono-*; μέτρον, a measure]. 1 An instrument for measuring the intensity of the voice. 2 An instrument for studying the arterial blood pressure when taken by the auscultatory method.

phonomyoclonus (*fo-no-mi-ok'-lo-nus*) [*phono-*; μῦς, muscle; κλόνος, tumult]. A condition in which a sound is heard on auscultation over a muscle, denoting fibrillary contractions; these latter may be so fine as to be invisible.

phononosus (*fo-non'-o-sus*). Synonym of *phonopathy*.

phonopathy (*fo-nop'-ath-e*) [*phono-*; πάθος, disease]. Any disorder or disease of the voice.

phonophobia (*fo-no-fo'-be-ah*) [*phono-*; φόβος, fear]. 1. A fear of speaking, in paresthesia of the larynx, because of the painful sensation produced during phonation. 2. Morbid dread of any sound or noise.

phonophore (*fo'-no-fōr*) [φωνή, sound; φορος, bearing; *pl.*, *phonophori*]. An auditory ossicle, viewed as a transmitter of sound. See *Paladino's phonophore*.

phonopneumomassage (*fo-no-nū-mo-mas-ahzj'*) [*phono-*; πνεῦμα, air; *massage*]. The exercise of the muscles, ligaments, and articulating surfaces of the inner ear by means of an electric apparatus.

phonopsia (*fo-nop'-se-ah*) [*phono-*; ὄψις, vision]. The perception of color-sensations by auditory sensations.

phonoscope (*fo'-no-skōp*) [*phono-*; σκοπεῖν, to examine]. A stethoscope for intensifying the tone in auscultation.

phonoscopy (*fo-nos'-kop-e*) [*phonoscope*]. The recording of the sounds heard by the phonoscope.

phonotherapy (*fo-no-ther'-ap-e*) [*phono-*; *therapy*]. The curative power of music.

phoria (*fo'-re-ah*) [φορά, motion]. A colloquialism used to represent one or more of the terms *orthophoria, heterophoria, exophoria, esophoria, etc.*

phoro- (*fo-ro-*) [φορά, motion]. A prefix meaning motion.

phoroblast (*for'-o-blast*) [φορεῖν, to bear; βλαστός, germ]. Connective tissue.

phorocyte (*for'-o-sīt*). A connective-tissue cell.

phorocytosis (*for-o-si-to'-sis*). Increase in the number of connective-tissue cells.

phorology (*fo-rol'-o-je*) [φορεῖν, to carry; λόγος, discourse]. Science pertaining to disease carriers.

phorometer (*for-om'-et-er*) [*phoro-*; μέτρον, a measure]. An instrument for measuring the relative strength of the ocular muscles.

phorone (*fo'-ron*). A substance prepared by saturating acetone with HCl and permitting it to stand.

phoro-optometer (*for-o-op-tom'-et-er*) [*phoro-*; ὀπτός, visible; μέτρον, a measure]. An apparatus for optical testing of muscular defects.

phoroplast (*for'-o-plast*). Connective tissue.

phorotone (*for'-o-tōn*) [*phoro-*; τόνος, strength]. An apparatus for exercising the eye-muscles.

phose (*fōz*) [φῶς, light]. A subjective sensation of light or color, as, scotoma scintillans. An *aphose* is a subjective sensation of shadow or darkness, as, muscæ volitantes. *Centraphoses* and *Centrophoses* are phoses originating in the optic centers. A *chromophose* is a subjective sensation of color. *Peripheraphoses* are peripheral aphoses. *Peripherophoses* are phoses originating in the peripheral organs of vision (the optic nerve or eyeball).

phosgen, phosgene (*fos'-jen, -jēn*) [φῶς, light; γεννᾶν, to produce]. Producing light. **p. gas,** $COCl_2$, carbonyl chloride; a colorless gas formed by the action of light on a mixture of carbonic oxide and chlorine.

phosgenic (*fos-jen'-ik*). See *photogenic*.

phosis (*fō-sis'*). The formation of a phose.

phosote (*fo'-sōt*). A syrupy liquid, consisting of creosote, 80%, and phosphoric anhydride, 20%. Dose 30 min. (2 Cc.) daily.

phosphagon (*fos'-fag-on*). Trade name of an elixir of various glycerophosphates.

phosphatase (*fos'-fat-ās*). An enzyme which splits up phosphoric acid esters.

phosphate (*fos'-fāt*) [*phosphorus*]. A salt of phosphoric acid. The phosphates are used in medicine as tonics and alteratives in conditions associated with malnutrition of the bones (rickets, scrofula). **p., acid,** one in which one or two of the hydrogen atoms only have been replaced by metals. **p., ammoniomagnesium,** a double salt of ammonium and magnesium and phosphoric acid. **p., earthy,** a phosphate of one of the alkaline earths. **p., normal,** one in which the three hydrogen atoms, or the six of two molecules, are substituted by metals, *e. g.*, Na_2PO_4, $Ca_3(PO_4)_2$. **p., triple,** ammoniomagnesium phosphate.

phosphatic (*fos-fat'-ik*) [*phosphate*]. Containing phosphates; characterized by the excretion of large amounts of phosphates.

phosphatide (*fos'-fa-tīd*) [*phosphorus*]. Any one of a large group of phosphorus-compounds found in brain-substance, and resembling the phosphates; they are esters of orthophosphoric acid.

phosphatol (*fos'-fat-ol*). A thick liquid obtained by action of phosphorus trichloride on creosote in an alcoholic solution of soda. It contains 90% of creosote; used in tuberculosis.

phosphatometer (*fos-fa-tom'-et-er*). Device for estimating amount of phosphates in urine.

phosphatoptosis (*fos-fat-o-to'-sis*) [*phosphate*; πτῶσις, a falling]. Spontaneous precipitation of phosphates in the urine.

phosphaturia (*fos-fat-ū'-re-ah*) [*phosphate*; οὖρον, urine]. A condition in which an excess of phosphates is passed in the urine.

phosphene (*fos'-fēn*) [φῶς, light; φαίνειν, to show]. A subjective luminous sensation caused by pressure upon the eyeball. **p. of accommodation,** a phosphene produced by the effort of accommodation. **p., pressure.** See *phosphene*.

phosphergot (*fos-fer'-got*). Sodium phosphate and ergot mixture; it is used in general debility.

phospherrin (*fos-fer'-in*). A mixture said to consist of ferric chloride, phosphoric acid, and glycerol.

phosphide (*fos'-fīd*) [*phosphorus*]. A compound of phosphorus and another element or radical acting as a base. The phosphides are used in medicine as substitutes for phosphorus.

phosphin, phosphine (*fos'-fin, fos'-fēn*) [*phosphorus*]. 1. Hydrogen phosphide, PH_3, a poisonous gas of alliaceous odor. 2. A substitution-compound of PH_3, bearing the same relation to it that an amine does to ammonia.

phosphite (*fos'-fīt*) [*phosphorus*]. A salt of phosphorous acid.

phospho- (*fos-fo-*) [*phosphorus*]. A prefix meaning relating to phosphorus or to its compounds.

phosphobion (*fos-fo'-be-on*). Trade name of a pill said to contain zinc phosphide and iron glycerophosphate; they are coated with graphite and keratin.

phosphoglyceric acid (*fos-fo-glis-e'-rik*) [*phospho-*; γλυκύς, sweet], $C_3H_9PO_6$. A liquid body obtained from lecithin.

phosphoglycoproteins (*fos-fo-gli-ko-pro'-te-ins*). The same as *nucleoalbumins*.

phosphoguaicol (*fos-fo-gwi'-ak-ol*). See *guaiacol phosphite*.

phosphomolybdic acid (*fos-fo-mol-ib'-dik*)[*phospho-*; *molybdenum*]. A compound of phosphoric acid and molybdenum trioxide. Test for alkaloids.

phosphonecrosis, phosphornecrosis (*fos-fo-ne-kro'-sis, fos-for-ne-kro'-sis*). See under *necrosis, phosphorus-*.

phosphonium (*fos-fo'-ne-um*) [*phosphorus*]. The hypothetical univalent radial PH_4; it is analogous to ammonium, NH_4.

phosphoprotein (*fos-fo-pro'-te-in*). A conjugated protein consisting of a compound of protein with a phosphorus-containing substance other than nucleic acid or lecithin.

phosphorated (*fos'-fo-ra-ted*) [*phosphorus*]. Containing phosphorus. **p. oil,** a 1% solution of phosphorus in expressed oil of almonds, with the addition of a small quantity of ether.

phosphorcin (*fos'-for-sin*). Trade name of a preparation of glycerophosphates with nux vomica and pepsin.

phosphorescence (*fos-for-es'-ens*) [*phosphorus*]. The spontaneous luminosity of phosphorus and other substances in the dark.

phosphorescent (*fos-for-es'-ent*) [*phosphorus*]. Possessing the quality of phosphorescence.

phosphoreted (*fos'-for-et-ed*) [*phosphorus*]. Combined with phosphorus.

phosphoric acid (*fos-for'-ik*). See *acid, phosphoric.*

phosphoridrosis, phosphorhidrosis (*fos-for-id-ro'-sis*) [*phospho-; ἱδρωσις*, sweat]. The secretion of phosphorescent sweat.

phosphorism (*fos'-for-izm*) [*phosphorus*]. Chronic phosphorus-poisoning.

phosphorized (*fos'-for-izd*) [*phosphorus*]. Containing phosphorus.

phosphorous acid (*fos-fo'-rus*). See under *acid.*

phosphoruria (*fos-for-ū'-re-ah*) [*phospho-; οὖρον*, urine]. 1. Phosphorescence of the urine. 2. Urine containing an excess of phosphates.

phosphorus (*fos'-for-us*) [*φῶς*, light; *φέρειν*, to bear] A nonmetallic element having a quantivalence of III or V, and an atomic weight of 31.04. Symbol P. In commerce it is prepared from bone-ash or from sombrerite, an impure calcium phosphate found in West Indian guano. Phosphorus may be obtained in several allotropic forms. *Ordinary phosphorus* is a yellowish-white, waxy solid, of a specific gravity of 1.837; it is exceedingly poisonous; it causes a widespread fatty degeneration, most marked in the liver. *Red* or *amorphous phosphorus* is a dark-red powder, having a specific gravity of 2.11, insoluble in carbon disulphide, noninflammable, nonluminous, non-poisonous. *Metallic* or *rhombohedral phosphorus* is an allotropic form produced by heating phosphorus in a sealed tube with melted lead. Its specific gravity is 2.34. Phosphorus is used as an alterative in osteomalacia; in rickets; in sexual impotence, threatened cerebral degeneration, neuralgia, chronic alcoholism, morphinomania, furunculosis, etc. Dose $\frac{1}{100}$ gr. (0.00065 Gm.). **p., pills of** (*pilulæ phosphori*, U. S. P.). Dose 1 pill. **p. trichloride,** a colorless liquid of unpleasant odor

phosphosucride (*fos-fo-su'-krid*). A substance containing phosphoric acid, a sugar, and fatty acids; it is derived from the waxy coating of the tubercle bacillus.

phosphotal (*fos'-fo-tal*). Creosote phosphite. See *phosphatol.*

phosphotungstic acid (*fos-fo-tung'-stik*). A crystalline compound of phosphoric and tungstic acids, used as a test for alkaloids and peptones.

phosphuret (*fos'-fū-ret*). A phosphide.

phosphureted, phosphuretted (*fos'-fū-ret-ed*). Synonym of *phosphoreted.*

phossy jaw (*fos'-e*). See *jaw, phossy.*

phosphuria (*fos-fū'-re-ah*). Syn of *phosphaturia.*

photalgia (*fo-tal'-je-ah*) [*photo-; ἄλγος*, pain]. Pain arising from too great intensity of light.

photaugiophobia (*fo-taw-je-o-fo'-be-ah*) [*photo-; αὐγή*, glare; *φοβός*, fear]. A shrinking from the glare of light.

phote (*fōt*) [*photo-*]. The unit of photochemical energy employed in connection with determination of the solidity of colors to average solar light at noon.

photesthesia, photæsthesia (*fo-tes-the'-ze-ah*) [*photo-; αἴσθησις*, sensation]. 1. Sensitiveness to light. 2. Photophobia.

photic (*fo'-tik*) [*photo-*]. Relating to light.

photism (*fo'-tizm*) [*φωτισμός*, an enlightening]. A sensation, as of color or light, produced by hearing, taste, smell, touch, or temperature, or even by the thought of some object, person, or general conception. Cf. phonism.

photo- (*fo-to-*) [*φῶς*, light]. A prefix denoting relation to light.

photoactinic (*fo-to-ak-tin'-ik*). Emitting both luminous and actinic rays.

photobacterium (*fo-to-bak-te'-re-um*). A genus or form of bacteria whose cultures are phosphorescent.

photobiotic (*fo-to-bi-ot'-ik*) [*photo-; βίος*, life]. Living in the light exclusively.

photocampsis (*fo-to-kamp'-sis*) [*photo-; κάμψις*, a bending]. Refraction of light.

photoceptor (*fo-to-sep'-tor*) [*photo-; ceptor*]. A nerve ending which is sensitive to rays of light.

photochemical (*fo-to-kem'-ik-al*) [*photo-; chemical*]. Pertaining to the chemical action of light.

photochemistry (*fo-to-kem'-is-tre*). That branch of chemistry treating of the chemical action of light.

photochromatic (*fo-to-kro-mat'-ik*) [*photo-; χρῶμα*, color]. Pertaining to colored light. **p. treatment,** treatment of disease by colored light.

photocinetic. Photokinetic.

photodynamic (*fo-to-di-nam'-ik*) [*photo-; δύναμις*, power] Pertaining to the energy of light.

photodynia (*fo-to-din'-e-ah*) [*photo-; ὀδύνη*, pain]. Pain arising from too great intensity of light; extreme photophobia.

photodysphoria (*fo-to-dis-fo'-re-ah*) [*photo-; δυσφορία*, excessive pain]. Intolerance of light; photophobia.

photoelectricity (*fo-to-e-lek-tris'-it-e*). Electricity produced under the influence of light.

photoelement (*fo-to-el'-e-ment*). The element of a galvanic battery which by decomposition gives photoelectricity.

photofluoroscope (*fo-to-floo'-o-ro-skōp*). See *fluoroscope.*

photogen (*fo'-to-jen*) [*photo-; γεννᾶν*, to produce]. A microorganism which produces phosphorescence or light.

photogene (*fo'-to-jēn*) [*photo-; γεννᾶν*, to produce]. 1. A retinal impression; an after-image. 2. A liquid derived from bituminous shale.

photogenesis (*fo-to-jen'-e-sis*) [*photo-; γεννᾶν*, to produce]. The production of light or of phosphorescence.

photogenic (*fo-to-jen'-ik*) [see *photogene*]. Light-producing.

photogenous (*fo-toj'-en-us*) [*photo-; γενής*, producing]. Producing light.

photogram (*fo'-to-gram*) [*photo-; γράμμα*, a writing]. A photographic representation of an enlargement obtained by the microscope.

photography (*fo-tog'-ra-fe*) [*photo-; γράφειν*, to write]. The art of producing an image of an object (*photograph*) by throwing the rays of light reflected from it upon a surface coated with a film of a substance, such as a silver salt, that is readily decomposed by light, subsequently treating the film with certain agents (developers) that bring out the image, and then dissolving the salt unacted upon by the light.

photohemotachometer, photohæmotachometer (*fo-to-hem-o-tak-om'-et-er*) [*photo-; αἷμα*, blood; *τάχος*, swiftness; *μέτρον*, a measure]. A hemotachometer in which the changes in level of the column of blood are photographed.

photokinetic (*fo-to-kin-et'-ik*) [*photo-; κινητικός*, causing movement]. Causing movement by means of light.

photologist (*fo-tol'-o-jist*). Proposed term for a person versed in photology, and who may, in addition, be skilled in applying the science.

photology (*fo-tol'-o-je*) [φῶς, light; λόγος, discourse]. Proposed name for the science of light.

photolysis (*fo-tol'-is-is*) [*photolyte*]. Decomposition by the action of light.

photolyte (*fo'-to-lit*) [*photo-*; λύειν, to loosen]. A substance that is decomposed by the action of light.

photomagnetism (*fo-to-mag'-net-izm*) [*photo-*; *magnetism*]. Magnetism produced by the action of light.

photomania (*fo-to-ma'-ne-ah*) [*photo-*; μανία, madness]. 1. The increase of maniacal symptoms under the influence of light. 2. A morbid desire for light.

photometer (*fo-tom'-et-er*) [*photo-*; μέτρον, a measure]. An instrument for measuring the intensity of light.

photometry (*fo-tom'-et-re*) [see *photometer*]. The measurement of the intensity of light.

photomicrograph (*fo-to-mi'-kro-graf*). A photograph of a small or microscopic object, usually made with the aid of a microscope, and of sufficient size for observation with the naked eye. Cf. *microphotograph*.

photomicrography (*fo-to-mi-krog'-ra-fe*) [*photomicrograph*]. The art of producing photomicrographs.

photonosus (*fo-ton'-o-sus*) [*photo-*; νόσος, disease]. A diseased condition arising from continued exposure to intense or glaring light, *e. g.*, snow-blindness, etc.

photoparesthesia (*fo-to-par-es-the'-ze-ah*) [*photo-*; παρά, beside; αἴσθησις, sensation]. Defective, or perverted, retinal sensibility.

photopathy (*fo-top'-ath-e*) [*photo-*; πάθος, suffering]. Same as photonosus, *q. v.*

photoperceptive (*fo-to-per-sep'-tiv*) [*photo-*; *percipere*, to perceive]. Capable of receiving and perceiving rays of light.

photophilic (*fo-to-fil'-ik*) [*photo-*; φιλεῖν, to love]. Seeking or loving light.

photophobia (*fo-to-fo'-be-ah*) [*photo-*; φόβος, fear]. Intolerance of light.

photophobic (*fo-to-fo'-bik*) [*photo-*; φόβος, fear]. Affected with, or pertaining to, photophobia.

photophone (*fo'-to-fōn*) [*photo-*; φωνή, sound]. An apparatus for the graphic representation of the character of sound-waves by means of flames.

photophore (*fo'-to-fōr*) [*photo-*; φέρειν, to bear]. An instrument for examination of the cavities of the body by means of the electric light.

photopsia (*fo-top'-se-ah*) [*photo-*; ὄψις, sight]. Subjective sensations of sparks or flashes of light occurring in certain morbid conditions of the optic nerve, the retina, or the brain.

photoptic (*fo-top'-tik*) [*photopsia*]. Relating to photopsia.

photoptometer (*fo-top-tom'-et-er*) [*photo-*; ὤψ, eye; μέτρον, a measure]. An instrument for determining visual acuity.

photoptometry (*fo-top-tom'-et-re*) [*photo-*; ὤψ, eye; μέτρον, measure]. The measurement of the perception of light.

photoradiometer (*fo-to-ra-de-om'-et-er*). An instrument for the measurement of the quantity of x-rays passing through a given surface.

photoreceptive (*fo-to-re-sep'-tiv*) [*photo-*; *recipere*, to receive]. Capable of receiving and perceiving rays of light.

photoreceptor (*fo-to-re-sep'-tor*). Photoceptor.

photoscope (*fo-to'-skōp*) [*photo-*; σκοπεῖν, to view]. 1. A fluoroscope. 2. An instrument used in inspecting the antrum of Highmore as regards the translucency of its walls.

photoscopy (*fo-tos'-ko-pe*) [*photo-*; σκοπεῖν, to view]. The same as *skiascopy*.

photoskioptic (*fo-to-ski-op'-tik*) [*photo-*; σκία, shadow; ὀπτικός, pertaining to sight]. Skiagraphic.

photosyntax (*fo-to-sin'-taks*) [*photo-*; συντασσεῖν, to arrange]. The process of the manufacture of carbohydrates by plants.

photosynthesis (*fo-to-sin'-the-sis*) [*photo-*; σύνθεσις, putting together]. The building up of an organic compound by the action of light through the agency of chlorophyll, considered to be due to a soluble ferment, the chlorophyll acting simply as a chemical screen or sensibilizer.

phototachometer (*fo-to-tak-om'-et-ur*) [*photo-*; τάχος, speed; μέτρον, measure]. An apparatus for determining the velocity of light rays.

phototactic (*fo-to-tak'-tik*). Pertaining to phototaxis.

phototaxis (*fo-to-taks'-is*) [*photo-*; τάξις, arrangement]. Same as phototropism. See *tropism*.

phototherapy (*fo-to-ther'-ap-e*) [*photo-*; θεραπεία, treatment]. 1. The treatment of disease by light. 2. Finsen's light-treatment: the treatment of skin diseases by the application of the concentrated chemic rays (blue, violet, and ultraviolet) of light. 3. The treatment of smallpox by red light.

phototonus (*fo-tot'-o-nus*) [*photo-*; τόνος, tension]. In biology, a condition of increased vital irritability or motility due to exposure to light, in contrast with the rigidity or quiescence produced by darkness.

phototropism (*fo-tot'-ro-pizm*) [*photo-*; τρόπος, a turning]. See *tropism*.

photoxylin, photoxylon (*fo-toks'-il-in, fo-toks'-il-on*) [*photo-*; ξύλον, wood]. A substance produced from wood-pulp by the action of sulphuric acid and potassium nitrate. It serves as a substitute for collodion in minor surgery, and as a medium for mounting microscopic specimens.

photuria (*fo-tū'-re-ah*) [*photo-*; οὖρον, urine]. The passage of phosphorescent urine.

Phragmidiothrix (*frag-mid'-i-o-thriks*) [φραγμός, a fence; θρίξ, hair]. A genus of bacteria belonging to the *Chlamidobacteriaceæ*; filaments unbranched; divisions in three directions; sheath scarcely visible. Cf. Table p 856.

phren (*fren*) [φρήν, the mind, also the diaphragm]. 1. The diaphragm. 2. Mind.

phrenalgia (*fren-al'-je-ah*) [*phren*; ἄλγος, pain]. 1. Melancholia; psychalgia. 2 Neuralgia of the diaphragm

phrenasthenia (*fren-as-the'-ne-ah*) [*phreno-*; ἀσθένεια, weakness]. 1. Paresis of the diaphragm. 2. Congenital mental weakness.

phrenasthenic (*fren-as-then'-ik*). 1. Relating to phrenasthenia; idiotic, imbecile. 2. A feeble-minded person.

phrenasthesia (*fren-as-the'-ze-ah*). Idiocy.

phrenatrophia (*fren-at-ro'-fe-ah*) [*phreno-*; *atrophy*]. Atrophy of the brain; idiocy.

phrenauxe (*fren-awks'-e*) [*phren*; αὔξη, enlargement]. Hypertrophy of the brain.

phrenesiac (*fren-e'-ze-ak*) [*phreno-*]. One who is affected with phrenesis; an insane person.

phrenesis (*fren-e'-sis*) [φρένησις, insanity]. Frenzy; delirium; insanity.

phrenetic (*fren-et'-ik*) [*phren*]. Maniacal; delirious.

phrenic (*fren'-ik*) [*phren*]. 1. Pertaining to the diaphragm, as *phrenic* nerve, *phrenic* artery. 2. Pertaining to the mind.

phrenicectomy (*fren-is-ek'-to-me*) [*phrenic-*; ἐκτόμη, excision]. Resection of a piece of the phrenic nerve.

phrenico-exeresis (*fren-ik-o-eks-er-e'-sis*) [*phrenic*; ἐξ, out; αἱρέειν, to take.] Extraction of the phrenic nerve.

phrenicocolic (*fren-ik-o-kol'-ik*). See *phrenocolic*.

phrenicogastric (*fren-ik-o-gas'-trik*). *Phrenogastric.*

phrenicosplenic (*fren-ik-o-splen'-ik*). *Phrenosplenic.*

phrenicotomy (*fren-ik-ot'-o-me*) [*phrenic-*; τόμη, incision]. Division of the phrenic nerve in the neck for the purpose of causing a one-sided paralysis of the diaphragm with consequent immobilization.

phrenitic (*fren-it'-ik*). 1. Pertaining to, or affected with phrenitis. 2. Relating to the mind.

phrenitis (*fren-i'-tis*) [*phren*; ιτις, inflammation]. 1. Inflammation of the brain. 2. Inflammation of the diaphragm. 3. Acute delirium.

phreno- (*phren-o-*) [*phren*] A prefix meaning relating either to the mind or to the diaphragm.

phrenoblabia (*fren-o-bla'-be-ah*) [*phreno-*; βλάβη, hurt]. Any disorder of the mind.

phrenocardia (*fren-o-kar'-de-ah*) [*phreno-*; κάρδια, heart]. A neurasthenic condition associated with dyspnea and with pain in the region of the heart.

phrenocolic (*fren-o-kol'-ik*) [*phreno-*; *colon*] Pertaining to the diaphragm and the colon.

phrenocolopexy (*fren-o-ko'-lo-peks-e*) [*phreno-*; *colon*; πῆξις, fixation]. The operation of suturing a prolapsed or displaced colon to the diaphragm.

phrenocostal (*fren-o-kos'-tal*) [*phreno-*; *costa*, rib]. Pertaining to the diaphragm and the ribs.

phrenogastric (*fren-o-gas'-trik*) [*phreno-*; γαστήρ, stomach]. Pertaining conjointly to the stomach and the diaphragm.

phrenoglottic (*fren-o-glot'-ik*). Pertaining to the diaphragm and the glottis.

phrenoglottismus (*fren-o-glot-iz'-mus*). Spasm of the glottis ascribed to disease of the diaphragm.

phrenograph (*fren'-o-graf*) [*phreno-*; γράφειν, to write]. An instrument for registering the movements of the diaphragm.

phrenohepatic (*fren-o-hep-at'-ik*) [*phreno-*; ἧπαρ, liver]. Pertaining to the diaphragm and the liver.

phrenolepsia (*fren-o-lep'-se-ah*) [*phreno-*; λῆψις, seizure]. Insanity.

phrenologist (*fren-ol'-o-jist*). One versed in phrenology.

phrenology (*fren-ol'-o-je*) [*phreno-*; λόγος, science]. The theory that the various faculties of the mind occupy distinct and separate areas in the brain-cortex, and that the predominance of certain faculties can be predicted from modifications of the parts of the skull overlying the areas where these faculties are located.

phrenoparalysis (*fren-o-par-al'-is-is*). See *phrenoplegia*.

phrenopath (*fren'-o-path*) [*phreno-*; πάθος, disease]. One who devotes himself to phrenopathy; an alienist.

phrenopathy (*fren-op'-ath-e*) [*phreno-*; πάθος, disease]. Mental disease.

phrenoplegia (*fren-o-ple'-je-ah*) [*phreno-*; πληγή, stroke]. 1. A sudden failure of mental power. 2. Paralysis of the diaphragm.

phrenoptosis (*fren-op-to'-sis*) [*phreno-*; πτῶσις, falling]. Prolapse of the diaphragm.

phrenosin (*fren'-o-sin*) [*phren*]. A nitrogenous body obtained from brain tissue.

phrenosplenic (*fren-o-splen'-ik*) [*phreno-*; *spleen*]. Pertaining to the diaphragm and the spleen.

phricasmus (*frik-as'-mus*) [φρίκη, shivering]. Gooseskin.

phrictopathic (*frik-to-path'-ik*) [φρίκη, shivering; πάθος, disease]. Pertaining to, or accompanied by, a shuddering sensation.

phronemophobia (*fron-e-mo-fo'-be-ah*) [φρόνημα, a thought; φόβος, fear]. Morbid dread of thinking.

phronesis (*fron-e'-sis*) [φρονεῖν, to think]. Soundness of mind, or of judgment.

phrynin (*frin'-in*). A substance from the skin of the toad. See *bufidine*.

phrynolysin (*frin-ol'-is-in*) [φρύνη, a toad; λύσις, a solution]. The lysin or toxin of the fire toad, *Bombinator igneus;* it is hemolytic for the blood of various animals, and is destroyed by digestive ferments, by alkalies or by heating to 50° C.

phthalate (*thal'-āt*). Any salt of phthalic acid.

phthalic acid (*thal'-ik*) [from *naphthalene*], $C_8H_6O_4$. A crystalline substance derived from naphthalene.

phtheiriasis, phthiriasis (*thi-ri'-as-is*) [φθείρ, a louse]. See *pediculosis*.

phthinoid (*thi'-noid*) [*phthisis*; εἶδος, likeness]. Having tuberculous characteristics.

phthiremia, phthiræmia (*thi-re'-me-ah*) [φθείρειν, to corrupt; αἷμα, blood]. A depraved state of the blood, with diminished plasticity.

phthiriophobia (*thi-re-o-fo'-be-ah*) [φθείρ, a louse; φόβος, fear]. Morbid dread of being infested with lice.

Phthirius (*thi'-re-us*) [φθείρ, a louse]. A genus of *Pediculidæ* or true lice. **P. inguinalis**, pediculus pubis

phthisic (*tiz'-ik*) [*phthisis*]. 1. Affected with or of the nature of phthisis or asthma. 2. A person affected with phthisis or asthma. 3. Pertaining to phthisis or asthma.

phthisical (*tiz'-ik-al*) [φθίσις, a wasting]. 1. Pertaining to or affected with phthisis, or tuberculosis. 2. Popularly, same as asthmatic. **p. frame, p. habit**, a long, narrow flat chest, with depressed sternum, acute costal angle, a fair, transparent skin, light complexion, blue eyes, winged scapulæ, slender limbs. As to internal organs, the heart is relatively small, the arteries narrow, the pulmonary artery relatively wider than the aorta, and the lung-volume rather large.

phthisin (*tiz'-in*). A proprietary preparation of the bronchial glands of animals; used in diseases of the lungs.

phthisiogenesis (*tiz-e-o-jen'-es-is*) [φθίσις, wasting; γένεσις, genesis]. The production of phthisis or wasting.

phthisiology (*tiz-e-ol'-o-je*) [*phthisis*; λόγος, science]. The study or science of phthisis or tuberculosis; its causes, pathology, hygiene, and therapeutics.

phthisiomania (*tiz-e-o-ma'-ne-ah*) [φθίσις, wasting; μανία, madness]. An unalterable and unfounded conviction that one is suffering from phthisis.

phthisiophobia (*tiz-e-o-fo'-be-ah*) [*phthisis*; φόβος, dread]. Morbid dread of pulmonary consumption or tuberculosis.

phthisiotherapy (*tiz-e-o-ther'-ap-e*) [*phthisis*; θεραπεία, therapy]. Therapeutic measures for the cure of pulmonary tuberculosis.

phthisis (*ti'-sis, te-sis*, or *thi'-sis*) [φθίειν, to waste]. 1. A wasting away or consumption. 2. Any disease characterized by emaciation and loss of strength, especially pulmonary tuberculosis.

3. Asthma. **p., black,** anthracosis. **p. bulbi,** shrinking of the eyeball. **p., fibroid.** 1. Interstitial pneumonia. 2. Chronic tuberculosis of the lungs attended with the formation of fibrous tissue, which contracts, causes shrinking of the affected part, and sometimes bronchiectasis by traction on the bronchi. **p., file-cutter's,** siderosis. **p. florida,** an acute, rapidly fatal pulmonary tuberculosis. Syn., *galloping consumption.* **p., glandular,** tuberculosis of the lymphatic glands. **p., grinder's,** siderosis. **p., hepatic,** tuberculosis of the liver. **p., laryngeal,** tuberculosis of the larynx. **p., nodosa,** miliary tuberculosis of the lungs. **p. pancreatica,** emaciation and cachexia from disease of the pancreas. **p., phlegmatic,** phthisis without loss of flesh. **p., pulmonary.** 1. Tuberculosis of the lung. 2. Any one of a variety of interstitial pneumonias, such as *grinder's phthisis, miner's phthisis, stone-cutter's phthisis,* etc. **p., tuberculous,** that due to the bacillus of tuberculosis. **p. ventriculi,** atrophy of the mucous membrane and thinning of the coats of the stomach

phthisopyrin (*tiz-o-pi'-rin*). A proprietary remedy of sodium arsenate, aspirin, and camphoric acid, used in the treatment of tuberculosis.

phthora (*tho'-rah*) [φθορά, decomposition]. 1. Corruption. 2. Syn. of the *plague.* 3. Abortion.

phtioic acid (*ti'-o-ik*). See under *acid.*

phycochrome (*fi'-ko-krōm*) [φῦκος, seaweed; χρῶμα, color]. The complex blue-green pigment that masks the pure green of the chlorophyl in certain Algæ, (*Cyanophyceæ*). It is composed of phycocyanin, scytonemin, etc.

phycocyanin (*fi-ko-si'-an-in*) [φῦκος, seaweed; κυανός, blue]. In biology, a beautiful blue pigment, characteristic of the *Cyanophyceæ* among *Algæ.*

Phycomycetes (*fi-ko-mi-se'-tēz*) [φῦκος, seaweed; μῦκης, fungus]. An order of fungi, with a one-celled thallus which becomes septate only during sporulation.

phygogalactic (*fi-go-gal-ak'-tik*) [φυγεῖν, to avoid; γάλα, milk]. 1. Stopping the secretion of milk. 2. An agent that checks the secretion of milk.

phylacagogic (*fi-lak-a-goj'-ik*) [φύλαξ, a guardian; ἀγώγος, leading]. Stimulating the production of protective antibodies.

phylacogen (*fi-lak'-o-jen*) [φύλαξ, a guard]. Trade name of a modified vaccine.

phylactic agent (*fi-lak'-tik*). An agent possessing phylactic power.

phylactic power (*fi-lak'-tik*) φύλαξ, a guardian]. The power of an organism to defend itself against infection.

phylaxin (*fi-laks'-in*) [φύλαξ, a guardian]. A defensive protein found in animals that have acquired an artificial immunity to a given infectious disease. The phylaxins are of two varieties: one having the power to destroy pathogenic microorganisms, called *mycophylaxin;* one that counteracts the poisons of the microorganisms, called *toxophylaxin.*

phylaxiology (*fi-laks-e-ol'-o-je*) [*phylaxis;* λόγος, science]. The science of protection against infection.

phylaxis (*fi-laks'-is*) [φύλαξ, a guardian]. The activity of the body in defending itself against infection.

phyletic (*fi-let'-ik*) [φῦλον, a tribe]. Pertaining to phylogenesis.

phylogenesis, phylogeny (*fi-lo-gen'-es-is, fi-loj'-en-e*) [φῦλον, a tribe; γεννᾶν, to beget]. The evolution of a group or species of animals or plants from the simplest form; the evolution of the species, as distinguished from *ontogeny,* the evolution of the individual.

phylogenetic (*fi-lo-jen-et'-ik*) [*phylogenesis*]. Pertaining to phylogenesis.

phylum (*fi'-lum*) [φῦλον, a tribe; *pl.*, *phyla*]. In biology, a primary division of the animal or vegetable kingdom.

phyma (*fi'-mah*) [φῦμα, a growth]. 1. Formerly, any one of a variety of swellings of the skin. 2. A localized plastic exudate larger than a tubercle; a circumscribed swelling of the skin.

phymatiasis (*fi-mat-i'-as-is*). Same as *tuberculosis.*

phymatoid (*fi'-mat-oid*) [*phyma;* εἶδος, like]. Resembling a phyma or tubercle.

phymatorhusin (*fi-mat-or-oo'-sin*). A pigment found in the metastatic deposits of a melanotic sarcoma of the skin.

phymatosis (*fi-mat-o'-sis*) [*phyma*]. 1. Any disease characterized by the formation of phymata or nodules. 2. Tuberculosis.

phyone (*fi'-ōn*) [φύω, cause to grow]. A growth-promoting hormone from the anterior pituitary body.

phyraliphore (*fi-ral'-if-ōr*). A cavity containing vesicles produced in endogenous cell-formation.

physalides (*fis-al'-id-ēz*). Plural of *physalis.*

physaliphorous (*fis-al-if'-or-us*) [φυσαλλίς, a bladder; φέρειν, to bear]. Furnished with vesicles or bladders; relating to or containing physaliphores.

physalis (*fis'-al-is*) [φυσαλλίς, a bladder]. A large giant epithelial cell of giant-cell carcinoma.

physconia (*fis-ko'-ne-ah*) [φύσκων, paunch]. Any abdominal enlargement, especially from tympanites. **p. adiposa,** corpulency. **p. aquosa,** ascites. **p. biliosa,** distention of the gall-bladder. **p. mesenterica.** Synonym of *tabes mesenterica.*

physiatrics (*fiz-e-at'-riks*) [φύσις, nature; ἰατρεία, treatment]. The power of nature in curing disease: *vis medicatrix naturæ.*

physiautotherapia (*fiz-e-aw-to-ther-a'-pe-ah*) [φύσις, nature; αὐτος, self; θεραπεύειν, to cure]. Strictly expectant treatment.

physic (*fiz'-ik*) [φύσις, nature]. 1. The science of medicine. 2. A medicine, especially a cathartic. 3. To administer medicines; also to purge.

physical (*fiz'-ik-al*) [see *physic*]. 1. Pertaining to nature; also pertaining to the body or material things. 2. Pertaining to physics. **p. diagnosis,** the investigation of disease by direct aid of the senses, sight, touch, and hearing. **p. examination,** examination of the patient's body to determine the condition of the various organs and parts. **p. signs,** the phenomena observed on inspection, palpation, percussion, auscultation, mensuration, or combinations of these methods.

physician (*fiz-ish'-an*) [φύσις, nature]. One who practises medicine. **p., house,** the chief among the medical internes in a hospital.

physicist (*fiz'-is-ist*). 1. One skilled in physics. 2. One who holds that vital phenomena are purely physical and chemical.

Physick's encysted rectum (*fiz'-ik*) [Philip Syng *Physick,* American surgeon, 1768–1837]. Hypertrophic dilatation of the rectal pouches

physiochemic, physicochemical (*fiz-e-o-kem'-ik, fiz-ik-o-kem'-ik-al*) [φύσις, nature; *chemic*]. Pertaining to both physics and chemistry.

physicogenic (*fiz-ik-o-jen'-ik*). Produced by physical causes.

physics (*fiz'-iks*) [*φύσις*, nature]. The science of nature, especially that treating of the properties of matter and of the forces governing it.

physinosis (*fiz-in-o'-sis*) [*φύσις*, nature; *νόσος*, disease]. Any disease due to physical causes.

physiobathmism (*fiz-e-o-bath'-mism*). Inherited growth-energy which has been interfered with by physical energy.

physiognomy (*fiz-e-og'-no-me*) [*φύσις*, nature; *γνώμη*, knowledge]. 1. The science treating of the methods of determining character by a study of the face. 2. The countenance.

physiologic, physiological (*fiz-e-o-loj'-ik, -al*) [*physiology*]. 1. Pertaining to physiology. 2. Pertaining to natural or normal processes, as opposed to those that are pathological. **p. antidote,** an antidote that neutralizes a poison by effects on the system that are antagonistic to those of the poison. **p. unit.** See *unit, physiological.*

physiologico-anatomical (*fiz-e-o-loj'-ik-o-an-at-om'-ik-al*). Pertaining to physiology and anatomy.

physiologist (*fiz-e-ol'-o-jist*) [*physiology*]. One versed in physiology.

physiology (*fiz-e-ol'-o-je*) [*φύσις*, nature; *λόγος*, science]. The science that treats of the functions of organic beings, as distinguished from *morphology*, etc. **p., animal,** the physiology of animals. **p., cellular,** the physiology of cells. **p., comparative,** the comparative study of the physiology of different animals and plants. **p., morbid,** the study of diseased functions or of functions modified by disease. **p., pathogenetic, p., pathological,** pathology. **p., special,** the physiology of special organs. **p. vegetable,** the physiology of plants.

physiolysis (*fiz-e-ol'-is-is*) [*φύσις*, nature; *λύειν*, to dissolve]. The disintegration of dead tissue by, natural processes.

physiomedicalism (*fiz-e-o-med'-ik-al-izm*) [*φύσις* nature; *medicari*, to heal]. The professed use of natural remedies only, poisons and minerals being rejected.

physiopathology (*fiz-e-o-path-ol'-o-je*). The study of function as affected by disease.

physiotherapy (*fiz-e-o-ther'-ap-e*) [*φύσις*, nature; *θεραπεία*, therapy] The use of the forces of nature in the treatment of disease; for example heat, light, electricity, exercise, air, water. See *physiatrics, physiautotherapia*

physique (*fiz-ēk'*) [Fr.]. Physical structure or organization.

physocele (*fi'-so-sēl*) [*φῦσα*, air; *κήλη*, tumor]. 1. A swelling containing air or gas. 2. Emphysema of the scrotum; a hernia filled with flatus.

physocephalus (*fi-so-sef'-al-us*) [*φῦσα*, air; *κεφαλή*, head]. Emphysematous swelling of the head.

physohematometra (*fi-so-hem-at-o-me'-trah*) [*φῦσα*, air; *αἷμα*, blood; *μήτρα*, uterus]. An accumulation of gas, or air, and blood in the uterus, as in decomposition of retained menses, or placental tissue.

physohydrometra (*fi-so-hi-dro-me'-trah*) [*φῦσα*, air; *hydrometra*]. An accumulation of gas and water in the uterus.

physometra (*fi-so-me'-trah*) [*φῦσα*, air; *μήτρα*, uterus]. A distention of the uterus with gas.

physoncus (*fi-song'-kus*) [*φῦσα*, air; *ὄγκος*, tumor]. A swelling due to the presence of air.

physopyosalpinx (*fi-so-pi-o-sal'-pinx*) [*φῦσα*, air; *pyosalpinx*]. Pyosalpinx with formation of gas in the Fallopian tube.

physoscheocele (*fi-sos'-ke-o-sēl*) [*φῦσα*, air; *ὀσχεον*, scrotum; *κήλη*, tumor]. Emphysema of the scrotum.

physospasmus (*fi-so-spas'-mus*) [*φῦσα*, air, flatus; *σπασμός*, spasm]. Flatulent colic.

physostigma (*fi-so-stig'-mah*) [*φῦσα*, air; *stigma*]. Calabar bean; ordeal-nut. The seed of *Physostigma venenosum*, of the natural order *Leguminosæ*, which is used by the natives of Africa as an ordeal poison. It contains two alkaloids —*eserine* or *physostigmine* and *calabarine*. It acts as general depressant, producing motor paralysis, and in poisonous doses causing death by paralysis of the respiration. It is a miotic, and in small doses stimulates the heart and intestinal peristalsis. In medicine it is employed as a motor depressant in tetanus and other spasms; as a stimulant in intestinal atony and dilatation, in asthma and emphysema. **p., extract of** (*extractum physostigmatis*, U. S. P., B. P.). Dose ¼–½ gr. (0.008–0.016 Gm.). **p. tincture of** (*tinctura physostigmatis*, U. S. P.). Dose 5–20 min. (0.32–1.3 Cc.).

physostigmine (*fi-so-stig'-mēn*) [*physostigma*], $C_{15}H_{21}N_3O_2$. An alkaloid found in the seed of *Physostigma venenosum*, Calabar bean. It is used in traumatic tetanus, tonic convulsions, strychnine poisoning, neuralgia, muscular rheumatism; chronic bronchitis, etc. Dose $\frac{1}{100}$–$\frac{1}{60}$ gr. (0.0003–0.001 Gm.); maximum dose $\frac{1}{60}$ gr. (0.001 Gm.), single. Syn., *eserine.* **p. salicylate** (*physostigminæ salicylas*, U. S. P.), eserine salicylate, is used internally in doses of $\frac{1}{80}$ gr. (0.0008 Gm.), but its chief use is for instillation into the eye as a miotic in conditions of mydriasis, and to lessen intraocular tension in glaucoma. It is used in these conditions in solution of the strength of from 1 to 2 gr. to the ounce. **p. sulphate** (*physostigminæ sulphas*, U. S. P.), eserine sulphate, is used in the same manner as the salicylate.

physostol (*fi-sos'-tōl*). A 1% sterilized solution of physostigmine in olive oil, sold in sealed tubes containing five grammes.

phytalbumose (*fi-tal'-bū-mōs*) [*φυτόν*, a plant; *albumose*]. A vegetable albumose.

phytin (*fi'-tin*). The potassium magnesium salt of inosit-phosphoric acid. It is found in a phosphorus compound contained in the seeds of plants.

phyto-(*fi-to*) (*φυτόν*, a plant]. A prefix signifying relation to plants.

phytobezoar (*fi-to-be'-zōr*) [*phyto-; bezoar*]. A hairball or ball of vegetable fiber sometimes found in the stomach.

phytochemistry (*fi-to-kem'-is-tre*) [*phyto-; chemistry*]. Vegetable chemistry.

phytogenesis (*fi-to-jen'-es-is*) [*phyto-; genesis*]. The science of the origin and development of plants.

phytogenetic (*fi-to-jen-et'-ik*). Pertaining to phytogenesis.

phytogenous (*fi-toj'-en-us*) [see *phytogenesis*]. Produced by plants.

phytogeny (*fi-toj'-en-e*). Same as *phytogenesis.*

phytoid (*fi'-toid*) [*phyto-; εἶδος*, like]. Plant-like; *e. g.*, certain animals and organs.

phytolacca (*fi-to-lak'-ah*) [*phyto-; lacca*, lac]. The dried root of *P. decandra*, a plant of the natural order *Phytolaccaceæ*. It is emetocathartic and slightly narcotic, and has been used in rheumatism and locally in granular conjunctivitis and parasitic skin diseases. Dose 10–30 gr. (0.65–1.9 Gm.). **p. fluid-extract of** (*fluidextractum*

phytolaccæ, U. S. P.). Dose 5–30 min. (0.32–1.9 Cc.).

phytolaccin (*fi-to-lak'-sin*) [*phyto-*; *lacca*, lac]. A resinoid, or the precipitate from a tincture of the root of *Phytolacca decandra*. It is alterative, anti-syphilitic, laxative, etc. Dose 1 to 3 gr.

phytolin (*fi'-tol-in*). A proprietary liquid said to be prepared from berries of *Phytolacca decandra*, used in obesity.

phytomelin (*fi-tom'-el-in*). See *rutin*.

phytoparasite (*fi-to-par'-as-it*) [*phyto-*; *parasite*]. A vegetable parasite.

phytopathogenic (*fi-to-path-o-jen'-ik*) [*phyto-*; *πάθος*, disease; *γεννᾶν*, to produce]. Causing disease in plants.

phytopathology (*fi-to-path-ol'-o-je*) [*phyto-*; *pathology*]. 1. The science of diseases of plants. 2. The science of diseases due to vegetable organisms.

phytophagous (*fi-toff'-ag-us*) [*phyto-*; *φάγειν*, to eat]. 1. Plant-eating. 2. Vegetarian.

phytoplasm (*fi'-to-plazm*) [*phyto-*; *plasma*]. Vegetable protoplasm.

phytoprecipitin (*fi-to-pre-sip'-it-in*). A precipitin produced by immunization with albumin of vegetable origin.

phytosis (*fi-to'-sis*) [*phyto-*; *νόσος*, disease. *pl.*, *phytoses*]. 1. Any disease due to the presence of vegetable parasites. 2. The production of disease by vegetable parasites. 3. The presence of vegetable parasites.

phytostearin (*fi-to-ste'-ar-in*) [*phyto-*; *στέαρ*, fat]. A fat-like substance, similar to cholesterin, present in plant-seeds and sprouts.

phytosterin (*fi-tos'-ter-in*). Phytostearin.

phytosterol (*fi-tos'-ter-ol*). Phytostearin.

phytosyntax (*fi-to-sin'-taks*) [*phyto-*; *συντάσσειν*, to put together]. A term designating the process of formation of complex carbon compounds out of simple ones under the influence of light. Cf. *photosynthesis*.

phytotoxin (*fi-to-toks'-in*) [*phyto-*; *toxin*]. A toxin derived from a plant, such as abrin, ricin and crotin

phytovitellin (*fi-to-vit-el'-in*) [*phyto-*; *vitellus*, yolk]. A vegetable albumin resembling vitellin.

phytoxylin (*fi-toks'-il-in*) [*phyto-*; *ξύλον*, wood]. A substance resembling pyroxylin.

phytozoon (*fi-to-zo'-on*) [*phyto-*; *ζῷον*, animal]. A plant-like animal; a zoophyte.

pia, pia mater (*pi-a ma'-ter*) [L., "kind or tender mother"]. The vascular membrane enveloping the surface of the brain and spinal cord, and consisting of a plexus of blood-vessels held in a fine areolar tissue. **p. m. encephali**, the pia mater of the brain **p. m. spinalis**, the pia mater of the spinal cord.

pia-arachnitis (*pi-ah-ar-ak-ni'-tis*). See *piarachnitis*.

pia-arachnoid (*pi-ah-ar-ak'-noid*). See *piarachnoid*.

pial (*pi'-al*) [*pia*]. Pertaining to the pia.

pialyn (*pi'-al-in*) [*πίαρ*, fat; *λύειν*, to split up, or decompose]. See *steapsin*.

piamatral (*pi'-ah-ma'-tral*). See *pial*.

pian (*pi'-an*). See *frambesia*.

piano-player's cramp. A painful spasm of the muscles occurring in piano-players as the result of overuse of the muscles in playing; a form of occupation neurosis.

piarachnitis (*pi-ah-rak-ni'-tis*) [*piarachnoid*; *itis*, inflammation]. Inflammation of the piarachnoid. Syn., *leptomeningitis*.

piarachnoid (*pi-ah-rak'-noid*) [*pia*; *arachnoid*]. The pia and arachnoid considered as one structure.

piarolytic (*pi-ar-o-lit'-ik*) [*πίαρ*, fat; *λυτικός*, dissolving]. Forming emulsions with fat.

piarrhemia, piarrhœmia (*pi-ar-e'-me-ah*) [*πίαρ*, fat, *αἷμα*, blood]. See *pemia*.

Piazza's fluid (*pe-az' ah*). Sodium chloride and ferric chloride, each, 1 Gm.; water, 4 Cc. It is used as a means of coagulating blood.

piblokto (*pe-blok'-to*) [Eskimo]. A form of hysteria found among Eskimo women in Greenland.

pica (*pi'-kah*) [L., "magpie"]. A craving for unnatural and strange articles of food; a symptom present in certain forms of insanity, hysteria, and chlorosis, and during pregnancy.

Picea (*pis'-e-ah*) [L., "the pitch-pine"]. A genus of coniferous trees. *P. alba* is the white spruce. *P. excelsa*, or *P. vulgaris*, the common fir or pitch-pine, yields resin and turpentine. *P. nigra* is the black spruce.

picein (*pis'-e-in*) [*picea*] A glucoside from the leaves of the Norway spruce, *Picea excelsa*.

piceol (*pi'-se-ol*). A decomposition product of picein, by action of emulsion.

piceous (*pis'-e-us*) [*pix*, pitch]. Resembling pitch.

pichi (*pe'-che*) [native Chilean]. The stems and leaves of *Fabiana imbricata*, growing in Chile. It is a terebinthin having tonic properties, and is of repute in the treatment of catarrhal inflammations of the genito-urinary tract. Dose of the fld ext. ʒj; of the extract gr. v–x.

Pick's bundle (*pik*). [Friedel *Pick*, Austrian physician, 1867–1926] An anomalous bundle of nerve-fibers in the oblongata connected with the pyramidal tract. **P.'s disease**, pseudocirrhosis of the liver, met occasionally as a complication of adhesive pericarditis. **P.'s syndrome**, enlargement of the liver, recurring ascites, but with no jaundice and no cardiac symptoms.

picoline (*pik'-o-lin*) [*picea*; *oleum*, oil], C_6H_7N. Methylpyridine, a liquid obtained by distillation from coal-tar.

picotement (*pe-kōt-mon(g)*) [Fr.]. A pricking sensation; tingling, formication.

picraconitine (*pik-ra-kon'-it-in*) [*πίκρος*, bitter; *aconitine*]. A very bitter but not poisonous powder derived from aconitine.

picradonidin (*pik-ra-don'-id-in*). A glucoside derived from adonis.

Picræna (*pik-re'-nah*) [*πικρός*, bitter]. A genus of the *Simarubeæ*, indigenous to the West Indies. *P. excelsa* furnishes Jamaica quassia. *P. vellozii*, quina quassia, is a Brazilian species; the bark is used in intermittent fever.

picramic acid (*pik-ram'-ik*) [*πικρός*, bitter; *amine*], $C_6H_5N_3O_5$ Picric acid in which one NO_2 radical has been replaced by NH_2.

picramin (*pik-ram'-in*). A synonym of *amarin*.

Picramnia (*pik-ram'-ne-ah*) [*πικρός*, bitter; *θάμνος*, shrub] A genus of the *Simarubæ*. The bark of the root and stem (*Honduras bark*) is used in colic, syphilis, and cholera.

Picrasma (*pik-raz'-mah*) [*πικρός*, bitter]. A genus of the *Simarubeæ*. The bark of *P. javanica*, of Java, and of *P. quassioides*, of India, is used as an antipyretic, and the wood as a substitute for quassia; the wood contains quassin.

picrate (*pik'-rāt*) [*picric acid*]. A salt of picric acid

picratol (*pik'-rat-ol*). See *silver trinitrophenolate*.

picric acid (*pik'-rik*) [*πικρός*, bitter]. See *acid, picric*. **p.-acid test.** See *Braun's reaction for glucose*.

picrin (*pik'-rin*) [πικρός, bitter]. A bitter substance from digitalis. Dose. ¼–½ gr. (0.016–0.033 Gm.).

picroaniline (*pik-ro-an'-il-in*). A histologic stain consisting of a mixture of saturated solutions of picric acid and aniline-blue.

picrocarmine (*pik-ro-kar'-min*) [πικρός, bitter; *carmine*]. A preparation for staining specimens for the microscope. Its composition is as follows carmine, 1; ammonia, 5; distilled water, 50 parts. After solution 50 parts of a saturated water solution of picric acid are added, and the mixture allowed to stand in a wide-mouthed bottle until the ammonia has evaporated. It is then filtered.

picroformal (*pik-ro-form'-al*). A fixing agent consisting of a mixture of a saturated solution of picric acid and a 6% aqueous solution of formal.

picroglycin, picroglycion (*pik-ro-gli'-sin, pik-ro-gli'-se-on*) [πικρός, bitter; γλυκύς, sweet]. A crystalline, bitter substance, found in *Solanum dulcamara*. It may be impure solanine.

picrol (*pik'-rol*), $C_6HI_2(OH)_2SO_3K$. A white, odorless powder containing 52% of iodine, soluble in alcohol and ether; used as a wound antiseptic. Syn., *potassium diiodoresorcin-monosulphate*.

picromel (*pik'-ro-mel*) [πικρός, bitter; μέλι, honey]. A mixture of unknown composition containing salts of glycocholic and taurocholic acids.

picronigrosin (*pik-ro-ni'-gro-sin*). A stain consisting of picric acid and nigrosin in alcohol.

picropodophyllin (*pik-ro-po-do-fil'-in*). A crystalline substance obtained from *Podophyllum peltatum*.

picropyrine (*pik-ro-pi'-rēn*). A derivative of picric acid and antipyrine occurring in yellow inflammable needles.

picrosclerotine (*pik-ro-skle'-ro-tēn*). A poisonous alkaloid occurring in ergot.

picrotoxin (*pik-ro-toks'-in*) [πικρός, bitter; τοξικόν, a poison]. A bitter neutral principle prepared from *Anamirta paniculata* (*Cocculus indicus*). Picrotoxin stimulates the motor and inhibitory centers in the medulla, especially the respiratory and vagus centers, it causes epileptiform spasms by irritation of the motor centers of the cerebrum or cord. Its action is much like that of strychnine. It has been used in an ointment (10 gr. to 1 oz.) in pityriasis capitis and in pediculosis. It is useful in the night-sweats of phthisis and in the complex of symptoms known as vasomotor ataxia. Dose $\frac{1}{60}$–$\frac{1}{20}$ gr. (0.001–0.003 Gm.).

picrotoxinism (*pik-ro-toks'-in-izm*). Poisoning by picrotoxin; characterized by spasms of an epileptiform nature or resembling tetanus, followed by loss of consciousness and coma.

Pictet's chloroform (*pik-tet'*). See *chloroform*.

pictet liquid (*pik'-tet*) [*pix*, pitch]. A liquid consisting of a mixture of sulphurous acid gas and carbon dioxide liquefied under pressure.

piebald skin. See *leukoderma* and *vitiligo*.

piedra (*pe-a'-drah*) [S. A.]. A disease of the hair marked by the formation of hard, pinhead-sized nodules on the shaft of the hair; it is thought to be due to a micrococcus.

piesesthesia (*pi-es-es-the'-se-ah*) [πίεσις, pressure; αἴσθησις, sensation]. Perception of the sense of pressure.

piesimeter, piesmeter (*pi-es-im'-et-er, pi-es'-me-ter*). See *piezometer*.

Pietrowski's reaction for proteins (*pe-at-rof'-ske*). The biuret reaction; a violet color is produced on heating a protein with an excess of a concentrated solution of sodium hydroxide and one or two drops of a dilute solution of copper sulphate. This color is deepened by boiling.

piezometer (*pi-e-zom'-et-er*) [πιέζειν, to press; μέτρον, a measure]. An apparatus for measuring the degree of compression of gases or fluids. 2. An apparatus for testing the sensitiveness of the skin to pressure.

Piffard's paste (*pif'-ard*) [Henry Granger *Piffard*, American dermatologist, 1842–1910]. A paste composed of 5 parts of sodium tartrate, 2 of caustic soda, and one of copper sulphate.

pigeon-breast (*pij'-un*). See under *breast*.

pigment (*pig'-ment*) [*pingere*, to paint]. 1. A dyestuff; a coloring-matter. Pigments may be in solution or in the form of granules or crystals. 2. Any organic coloring matter of the body. 3. Any stain used in microscopical work. 4. Any medicinal agent applied externally to the skin, like paint. **p., blood-.** See *p., hematogenous*. **p., cholera-blue,** a color-base obtained by dissolving cholera-red in concentrated sulphuric acid and then neutralizing with caustic soda. **p., cholera-red,** a color-base found in cultures of cholera bacilli which, upon addition of mineral acids, gives a beautiful violet color. On rendering the solution alkaline and shaking it with benzol the cholera-red is obtained in brownish-red lamellæ. Distillation of cholera-red with zinc dust gives indol. **p.-granule,** one of the minute structureless masses of which pigment consists. **P., hematogenous,** any pigment derived from the blood. Hematogenous pigments are hemoglobin, hematoidin, hemosiderin, and the bile-pigments (*hepatogenous pigments*) which are indirectly derived from the blood-pigment. **p., metabolic,** a pigment formed by the metabolic action of cells. Melanin is the type of metabolic pigments.

pigmentary (*pig'-men-ta-re*) [*pigment*]. Pertaining to or containing pigment; characterized by the formation of pigment.

pigmentation (*pig-men-ta'-shun*) [*pigment*]. Deposition of or discoloration by pigment.

pigmentodermia (*pig-ment-o-der'-me-ah*). See *chromodermatosis*.

pigmentolysin (*pig-men-tol'-is-in*). An antibody which causes destruction of pigment.

pigmentophage (*pig-ment'-o-fāj*) [*pigment*; φάγειν, to eat]. A phagocyte which destroys pigment, especially that of hairs.

pigmentum nigrum (*pig-men'-tum ni'-grum*) [L., black pigment]. The dark coloring-matter which lines the choroid coat of the eye.

Pignet's formula (*pēn-ya'*) [——*Pignet*, French surgeon]. A standard of physical condition: $F = H - (C + W)$; where F is the empirical factor, H the height in centimeters, C the chest measurement in centimeters at deep inspiration, and W the weight in kilograms. When F is less than 10, a man is said to be *very strong*, between 10 and 15 he is strong, between 15 and 20 he is *good*, between 20 and 25 he is *fair*, between 25 and 30 he is *weak*, and above 35 *very weak*. See *Black's formula*

piitis (*pi-i'-tis*) [*pia*, pia; ιτις, inflammation]. Inflammation of the pia mater; leptomeningitis.

pil. Abbreviation of Latin *pilula*, pill.

pilar, pilary (*pi'-lar, pi'-lar-e*) [*pilaris; pilus*, hair]. Pertaining to the hair.

pilaster (*pi-las'-ter*) [*pila*, a pillar]. See *pilastered femur*.

pilastered (*pi-las'-terd*) [*pila*, a pillar]. Flanged so as to have a fluted appearance; arranged in pilasters or columns. **p. femur,** a condition of the femur in which the backward concavity of the shaft is exaggerated and the linea aspera prominent.

pilatio (*pi-la'-she-o*) [*pilus*, hair]. A cranial fissure.

pilation (*ps-la'-shun*). See *fracture, capillary.*

pile (*pīl*) [*pilus*, a hair]. 1. The hair or hairs collectively of any part of the integument. 2. A hemorrhoid. 3. A battery. **p., prostatic,** a condition of enlarged prostate in which hemorrhage results. **p., sentinal,** the thickened wall of the anal pocket at the lower end of an anal fissure. **p., thermo-electric,** a battery in which an electric current is generated on heating the bars of two kinds of metal soldered together, of which the pile consists. An index registering the exact degree of heat is moved by the current.

pileous (*pi'-le-us*) [*pilus*, a hair]. Pertaining to hair; hairy.

piles (*pīlz*). Hemorrhoids, *q. v.*

pileum (*pil'-e-um*) [*pileum*, a cap: *pl.*, *pilea*]. 1. In biology, the cap or whole top of the head of a bird, from bill to nape, including the forehead, vertex, and occiput. 2. A lobe of the cerebellum lying between the vermis and the paraflocculus. Its relation to the peduncle is like that of a cap.

pileus (*pil'-e-us*) [*pileus*, a cap: *pl.*, *pilei*]. 1. The disc of the *Medusæ*, for which many writers have substituted the name umbrella or disc. It is also applied to the cap-like or umbrella-like summit of the stipe of many fungi. The hymenium-bearing portion is the same as *cap.* 2. A nipple shield. **p. hippocraticus,** the capeline bandage. **p. ventriculi,** the cap of the stomach; the pyloric cap, or first portion of the duodenum.

pili (*pi'-li*) [plural of *pilus*, a hair]. Hairs. **p., annulati,** ringed hairs, leukotrichia annularis. **p. congenital,** hair existing at birth. **p., postgenital,** that appearing some time after birth.

piliation (*pil-e-a'-shun*) [*pilus*, hair]. The formation and production of hair.

piliform (*pi'-lif-orm*) [*pilus*, hair; *forma*, a form]. Having the form or appearance of hair; filiform.

piliganine (*ps-lig'-an-ēn*), $C_{11}H_{24}N_2O$(?). An alkaloid obtained from *Lycopodium saururus;* it is emetic, cathartic, drastic, anthelmintic, antispasmodic. Dose ½–¼ gr. (0.01–0.02 Gm.). The hydrochloride is used in the same way.

pilimiction (*pi-lim-ik'-shun*) [*pilus*, hair; *mingere*, to urinate]. The passing of urine containing hair-like filaments.

pilin (*pi'-lin*). A proprietary cosmetic said to be 60% alcohol, perfumed and colored and containing benzoic acid.

pill [*pilula*, dim. of *pila*, a ball]. A small, round mass containing one or more medicinal substances and used for internal administration. **p., Blaud's.** See *ferrous carbonate, pills of.* **p., blue.** See *mercury mass.* **p.'s compound cathartic.** See *compound cathartic pills.* **p., Griffith's.** Synonym of *p., Blaud's.* **p., Lady Webster's,** pill of aloes and mastic. **p.-mass,** a cohesive mass used to hold together the medicinal ingredients of a pill.

pillar (*pil'-ar*) [*pila*, a pillar]. A columnar structure acting as a support. **p. of the abdominal ring,** one of the columns on each side of the abdominal ring. **p. of the fauces,** one of the folds of mucous membrane on each side of the fauces. **p. of the fornix, anterior,** a band of white matter on each side passing from the anterior extremity of the fornix to the base of the brain. **p. of the fornix, posterior,** one of two bands passing from the posterior extremities of the fornix into the descending horn of the lateral ventricle.

pillet (*pil'-et*). A little pill, or pellet.

pilleus, pilleum (*pil'-e-us, pil'-e-um*) [L. a cap or caul]. The caul or membrane which sometimes covers a child's head during birth. **p. ventriculi,** the cap of the stomach; the pyloric cap, or first portion of the duodenum.

pillion (*pil-yong'*). An artificial leg, usually in the form of a wooden stump. Also called *pylon.*

pilo- (*pi-lo-*) [*pilus*, a hair]. A prefix meaning relating to the hair or hairy.

pilocarpidine (*pi-lo-kar'-pid-ēn*). An alkaloid from jaborandi similar in physiological effect to pilocarpine but weaker.

pilocarpine (*ps-lo-car'-pēn*) [see *pilocarpus*]. An alkaloid isolated from pilocarpus. Used locally as a miotic. See *pilocarpus.* **p. hydrochloride** (*pilocarpinæ hydrochloridum*, U. S. P.). Dose ¼ gr. (0.008 Gm.). **p. nitrate** (*pilocarpinæ nitras*, U. S P.). Dose ¼ gr. (0.008 Gm.).

pilocarpus (*ps-lo-kar'-pus*) [*pilo-*; καρπός, fruit]. The leaflets of *Pilocarpus jaborandi*, a South American shrub of the natural order *Rutaceæ:* it yields *pilocarpine*, $C_{11}H_{16}N_2O_2$, which resembles atropine in action. Jaborandi and its alkaloid pilocarpine taken internally produce salivation, perspiration, and contraction of the pupil. They are employed as diaphoretics in dropsy, Bright's disease, uremia, rheumatism, and in the early stage of cold. Dose 20–40 gr. (1.3–4.0 Gm.). **p., fluidextract of** (*fluidextractum pilocarpi*, U. S. P.). Dose 10–30 min. (0.6–2.0 Cc.).

pilocerine (*pi-los'-er-ēn*). A poisonous alkaloid, from a cactus, *Pilocereus.*

pilocystic (*pi-lo-sis'-tik*) [*pilo-*; κύστις, a sac]. Applied to encysted tumors containing hair and fat.

pilomotor (*pi-lo-mo'-tor*) [*pilo-*; *movere*, to move]. Causing movement of the hair. **p. nerves,** nerves causing contraction of the arrectores pili. **p. reflex,** the appearance of "goose-skin" when the skin is irritated.

pilonidal (*pi-lo-ni'-dal*) [*pilo-*; *nidus*, a nest]. Containing an accumulation of hairs in a cyst. **p. fistula,** a fistula in the neighborhood of the rectum depending upon the presence of a tuft of hair in the tissues. **p. sinus,** pilonidal fistula.

pilose, pilous (*pi'-lōs, pi'-lus*) [*pilosus*, hairy]. Hairy.

pilosebaceous (*pi-lo-se-ba'-shus*). Pertaining to the hair follicles and sebaceous glands.

pilosis (*pi-lo'-sis*) [*pilus*, a hair]. The abnormal or excessive development of hair.

pilosity (*pi-los'-it-e*) [*pilus*, a hair]. The state of being pilose.

Piltz's reflex. Alteration of the size of the pupil when the attention is suddenly fixed.

pilula (*pil'-ū-lah*) [L., pl., *pilulæ*]. A pill.

pilular (*pil'-ū-lar*) [*pilula*, dim. of *pila*, a ball]. Of the nature of or pertaining to pills.

pilule (*pil'-ūl*) [*pilula*, a small pill]. A small pill.

pilus (*pi'-lus*) [*pilus*, a hair; *pl.*, *pili*]. 1. A hair. 2. In biology, a fine, slender, hair-like body. **pili gossypii,** cotton staple. **pili tactiles,** tactile hairs.

pimeladen (*pim-el'-ad-en*) [πιμελή, fat; ἀδήν, gland; *pl.*, *pimeladenes*]. Any sebaceous gland.

pimelecchysis (*pim-el-ek'-kis-is*) [πιμελή, fat; ἔκχυσις, a pouring out]. An excessive discharge of fat or of sebaceous matter.

pimelitis (*pim-el-i'-tis*) [πιμελή, fat; ιτις, inflammation]. Inflammation of any adipose tissue; also, of connective tissue in general.

pimeloma (*pim-el-o'-mah*) [πιμελή, fat; ὄμα, tumor; *pl.*, *pimelomata*]. A fatty tumor; lipoma.

pimelopterygium (*pim-el-o-ter-ij'-e-um*) [πιμελή, fat; πτερύγιον, a small wing]. A fatty outgrowth on the conjunctiva.

pimelorrhea (*pim-el-or-e'-ah*) [πιμελή, fat; ῥοία, a flow]. An excessive fatty discharge. Fecal discharge of undigested fat.

pimelorthopnea (*pim-el-or-thop'-ne-ah*) [πιμελή, fat; *orthopnea*]. Orthopnea due to obesity.

pimelosis (*pim-el-o'-sis*) [πιμελή, fat; νόσος, disease]. Conversion into fat. The fatty degeneration of any tissue; obesity, or corpulence.

pimelotic (*pim-el-ot'-ik*). Affected with pimelosis.

pimeluria (*pim-el-ū'-re-ah*) [πιμελή, fat; οὖρον, urine]. The excretion of fat in the urine; lipuria.

pimenta (*pi-men'-tah*) [Sp., *pimiento*]. Allspice, the nearly ripe fruit of *P. officinalis*, a tree of the natural order *Myrtaceæ*. It has a fragrant aromatic odor, due to the presence of a volatile oil. Pimenta is used as an aromatic carminative in flatulence and locally in chilblains. Dose 10–40 gr. (0.65–2.6 Gm.). **p., oil of** (*oleum pimentæ*, U. S. P.). Dose 2–5 min. (0.13–1.32 Cc.).

pimento (*pi-men'-to*). Synonym of *pimenta*.

Pimpinella (*pim-pin-el'-ah*). A genus of umbelliferous plants. *P. anisum* yields anise. *P. saxifraga* is said to be diaphoretic, diuretic, and stomachic, and has been employed in asthma, dropsy, amenorrhea, etc. Dose ½ dr. (2 Cc.).

pimple (*pim'-pl*) [AS., *pipel*]. A small pustule or papule.

pinacoline (*pi-nak'-ol-ēn*). A liquid derived from acetone; it has an odor of peppermint and a yellow color.

pinapin (*pin'-ap-in*). A fermented pineapple-juice, recommended in catarrh of the stomach, also as a spray in nasal catarrh.

Pinard's sign (*pe-nar'*) [Adolphe *Pinard*, French obstetrician, 1844–]. After the sixth month of pregnancy a sharp pain upon pressure over the fundus uteri is frequently a sign of breech presentation.

pincement (*pans'-mo(n)g*) [Fr., "pinching"]. In massage, a pinching or nipping of the tissues.

pincers (*pin'-cers*) [Fr., *pince*]. Forceps.

pincet, pincette (*pan-set'*) [Fr.]. A small forceps.

Pinckneya (*pingk'-ne-ah*). A genus of the *Rubiaceæ*. *P. pubens* is a small tree of the southern United States. The bark is astringent and tonic and is used in intermittent fevers.

pine (*pīn*) [*pinus*]. A genus of trees of the order *Coniferæ*, yielding turpentine, pitch, tar, and other substances.

pineal (*pin'-e-al*) [*pinus*, a pine-cone]. Belonging to or shaped like a pine-cone. **p. body, p. gland**, the epiphysis, a small, reddish-gray, vascular body situated behind the third ventricle, which is embraced by its two peduncles; it is also called the *conarium*, from its conical shape. **p. eye**, a rudimentary third, median, or unpaired eye of certain lizards, with which the pineal body of the mammalia is homologous. **p. habena, p. habenula**, the stalk of the pineal body. **p. peduncle**, a narrow white band on each side of the pineal body. **p. ventricle**, the cavity occasionally found within the pineal body.

pinealectomy (*pin-e-al-ek'-to-me*) [*pineal*; ἐκτομή, excision]. Surgical removal of the pineal body.

pinealism (*pin-e'-al-izm*). Disturbances due to abnormality in the secretion of the pineal gland.

pineapple (*pīn'-apl*). The fruit of the *Ananas sativa*, or *Bromelia ananas;* it contains an enzyme *bromelin*, resembling trypsin.

Pinel's system (*pe-nel'*) [Philippe *Pinel*, French alienist, 1745–1826]. In the treatment of the insane, suppression of all forceful proceedings.

pinenchyma (*pin-en'-kim-ah*) [πίναξ, tablet; ἔγχυμα, infusion]. Tissues composed of flat cells.

pinene (*pi'-nēn*) [*pinus*, pine], $C_{10}H_{16}$. A hydrocarbon, the chief constituent of many essential oils.

pineoline (*pin'-e-o-lēn*). A proprietary extract of the needles of *Pinus pumilio*, combined with vaseline and lanolin; it is used as an application in skin diseases.

pinguecula, pinguicula (*pin-gwek'-ū-lah, pin-gwik'-ū-lah*) [dim. of *pinguis*, fat]. A small, yellowish-white patch situated on the conjunctiva, between the cornea and the canthus of the eye; it is composed of connective tissue.

pinguedo cordis (*pin-gwe'-do-kor'-dis*) [L. "fatness of heart"]. Fatty deposit in the heart.

pinguid (*ping'-gwid*) [*pinguis*, fat]. Fat; unctuous.

pinguoleum (*ping-gwo'-le-um*) [*pinguis*, fat; *oleum*, oil]. A fatty or fixed oil.

pinhole (*pin'-hōl*). A minute perforation like that made by a pin. **p. os**, an extreme degree of atresia of the os uteri, seen in young and undeveloped women. **p. pupil, pin-point pupil**, contraction of the iris to an extent that the pupil is scarcely larger than a pin's head. It is seen in opium-poisoning, after the use of miotics, in certain cerebral diseases, in locomotor ataxia, etc.

piniform (*pin'-if-orm*) [*pine; forma*, form]. Shaped like a pine-cone.

pink disease. A form of erythroedema found in infants; the hands and feet are red and cold, vesicles are found about the fingers and toes, sweating is present; insomnia and itching are constant, and the inguinal and axillary glands may be involved.

pink-eye. 1. A contagious, mucopurulent conjunctivitis occurring especially in horses. 2. Acute contagious conjunctivitis in man.

pink powders. Powders containing calomel and sugar, colored with a little carmine.

pinkroot. See *spigelia*.

pink salt. Stannic chloride with ammonium chloride.

pinna (*pin'-ah*) [L., "feather;" "wing"]. The projecting part of the external ear; the auricle. **p. nasi.** Synonym of *ala nasi*.

pinnal (*pin'-al*). Pertaining to the pinna.

pinocytosis (*pin-o-si-to'-sis*) [πίνειν, to drink; κύτος, a cell]. A name for the property exhibited by phagocytes of imbibing and absorbing liquid substances.

pinol (*pi'-nol*). The commercial name for the oil distilled from the needles of *Pinus pumilio*. It is recommended in tuberculosis, rheumatism, etc., and may be used externally and internally.

pinoleum (*pin-o'-le-um*) [*pine; oleum*, oil]. Trade name of a preparation said to contain menthol, camphor, oil of eucalyptus, oil of cinnamon, and pine-needle oil in liquid petrolatum.

pinotherapy (*pi-no-ther'-ap-e*) [πεῖνα, hunger; θεραπεία, therapy]. Hunger-cure or nestotherapy.

pint (*pīnt*). The eighth part of a gallon; 16 fluidounces; an *imperial pint* contains 20 fluidounces. Symbol O (*octarius*)

pinta disease (*pin'-tah*) [Sp., "spot"]. Parasitic skin disease of the tropics. Also called *pinto, mal de los pintos,* and *spotted sickness.*

Pinus (*pi'-nus*). The pine (*q. v.*). *P. pumilio* of the Alps, yields a turpentine and an oil used in medicine. The bark of *P. strobus,* white pine of the northern United States, is astringent and antiseptic, and is used in diarrhea and dysentery. Dose of the *fluidextract* 30–60 min. (1.8–3.7 Cc.). An oil distilled from the leaves of *P. sylvestris,* Scotch pine or fir, is used in medicine; the young pine-cones are diuretic. An extract from the leaves is used as a diuretic and antiseptic.

pinus (*pi'-nus*). 1. The pineal body. 2. Pine.

pinworm. See *Oxyuris* and *Ascaris.*

pioepithelium (*pi-o-ep-ith-e'-le-um*) [πίων, fat; *epithelium*]. Epithelium containing fat.

pion (*pi'-on*) [πίων, fat]. Fat.

pionemia, pionæmia (*pi-on-e'-me-ah*). See *lipemia*

piorthopnea (*pi-or-thop-ne'-a*) [πίων, fat; ὀρθός, upright; πνόη, breath]. Orthopnea due to obesity.

pioscope (*pi'-o-skōp*) [πίων, fat; σκοπεῖν, to see]. A variety of galactoscope.

Piotrowski's reaction for proteins. Add a drop of copper sulfate solution and potassium hydroxide, —a violet color denotes the presence of biuret.

pip. A contagious disease of fowls characterized by a secretion of thick mucus in the throat and mouth

piper (*pi-per'*) [L.]. Pepper (*q. v.*).

piperazidin (*pi-per-az'-id-in*). See *piperazin.*

piperazin (*pi-per'-ă-zin*), $C_4H_{10}N_2$. Diethylendiamine, a crystalline substance produced by the action of ammonia on ethylene bromide or chloride. It is readily soluble in water. In watery solutions it acts as an excellent solvent of uric acid. It is used internally in cases of gout, lithemia, diabetes, and as a solvent for uric-acid calculi. Dose 15 gr. (1 Gm.) a day; for hypodermatic use it is best employed in a 2% solution. **p. quinate,** a form used in gout. Dose 75–120 gr. (5–8 Gm.) daily in broken doses. **p. water,** a combination of equal parts of piperazin and phenocoll in water.

piperic (*pi-per'-ik*) [*peper*]. Pertaining to or containing pepper. **p. acid,** $C_{12}H_{10}O_4$, a monobasic acid obtained by decomposing piperin.

piperidine (*pi-per'-id-ēn*) [*piper*], $C_5H_{11}N$. A liquid base produced in the decomposition of piperine. **p. bitartrate,** is recommended in uratic diathesis. Dose 10–16 gr. (0.65–1.03 Gm.) 3 times daily. **p. guaiacolate,** $C_5H_{11}N.(C_7H_8O_2)_2$, is used in tuberculosis. Dose 10 gr. (0.65 Gm.) twice daily.

piperine (*pi'-per-ēn*). A neutral principle (*piperina,* U. S. P.) obtained from pepper.

piperism (*pi'-per-izm*). Poisoning by pepper, marked by acute gastritis.

piperovatine (*pi-per-o'-va-tēn*), $C_{16}H_{21}NO_2$. A crystalline alkaloid isolated from *Piper ovatum.* A heart-poison and depressant of motor and sensory nerves. Acts like strychnine.

pipet, pipette (*pip-et'*) [Fr., dim. of *pipe*]. A glass tube open at both ends, but usually drawn out to a smaller size at one end.

pipmenthol (*pip-men'-thol*) [*piper,* pepper; *mentha,* mint]. A name for the menthol obtained from peppermint.

pipsissewa (*pip-sis'-e-wah*). See *chimaphila.*

piptonychia (*pip-to-nik'-e-ah*) [πίπτειν, to fall; ὄνυξ a nail]. Shedding of the nails.

piqûre (*pe-kūr'*) [F.]. Puncture. **p. glycosuria,** experimental glycosuria produced by puncture of the diabetic center in the medulla.

Piria's test for tyrosin (*pir'-e-ah*). Moisten the substance on a watch-glass with concentrated sulphuric acid, and warm two to ten minutes on a water-bath. Dilute with water, warm, neutralize with barium carbonate, filter while warm, and add a dilute solution of ferric chloride. In the presence of tyrosin a violet color results. An excess of ferric chloride destroys the color.

piriform (*pir'-if-orm*). Synonym of *pyriform.*

Pirogoff's formula (*pir'-o-gof*) [Nikolai Vanovich *Pirogoff,* Russian surgeon, 1810–1881]. Sublimed sulphur, ½ oz.; potassium carbonate, 1 oz.; distilled water, ½ oz.; tincture of iodine, 1 oz.; lard, 3 oz. Used for the treatment of favus. **P.'s operation** or **amputation,** *for amputation through the foot;* a partial osteoplastic operation in which the os calcis is sawed through obliquely from above downward and forward, and the posterior portion is brought up and secured against the surface made by sawing off the lower ends of the tibia and fibula.

Piroplasma (*pi-ro-plaz'-mah*) [πῦρ, fire; πλάσσειν, to form] A genus of hematozoa. **P. bigeminum,** a species found in Texas fever. **P. canis,** a species causing the bilious fever or malignant jaundice of dogs. **P. donovani.** Same as *Leishman-Donovan bodies, q. v.* **P. equi,** a South African species causing a bilious fever in horses. **P. hominis,** the species responsible for Rocky Mountain spotted fever in man. **P. ovis,** a species affecting sheep. **P. parvum,** a species causing the Rhodesian red-water fever of cattle in Western Africa.

piroplasmosis (*pi-ro-plaz-mo'-sis*). Infection with piroplasma.

Pirquet's (von) reaction (*pēr-ka'*) [Clemens von *Pirquet,* Austrian physician 1874–]. Apply a few drops of a 4% solution of old tuberculin to a slightly scarified area; if positive, a number of papules appear surrounded by a hyperemic area.

piscidia erythrina (*pis-id'-e-ah er-e-thri'-nah*) [*piscis,* fish; *cædere,* to kill]. Jamaica dogwood, a tree of the order *Leguminosæ,* the bark of which has been used for stupefying fish. It contains a neutral principle, *piscidin.* Piscidin has been used as an anodyne in neuralgia, whooping-cough, and insomnia. Dose of the *fluidextract* 1 dr. (4 Cc.).

piscidin (*pis'-id-in*). See under *Piscidia erythrina.*

pisiform (*pis'-if-orm*) [*pisum,* a pea; *forma,* form]. Pea-shaped. **p. bone,** a small bone on the inner and anterior aspect of the carpus.

pit [AS., *pyt,* from *puteus,* a well or pit]. 1. A depression, as the *pit* of the stomach; the armpit. 2. To indent by pressing. **p., auditory,** the embryonic depression preceding the labyrinth. **p., basilar,** the depression upon the palatal surfaces of the upper incisor teeth, at the base of the cingula. **p. of the stomach:** (1) a name popularly given to that abdomen just below the sternum and between the cartilages of the false ribs; it is also termed *scrobiculus cordis;* (2) any one of the openings of gastric tubules visible on the mucous surface of the stomach. **p., tear,** the lacrimal sinus.

pitch [ME., *picchen,* to throw]. 1. The height of a sound; that quality which depends upon the relative rapidity of the vibrations that produce the sound. 2. [AS., *pic,* from *pix,* pitch]. A hard but viscous, shining substance, breaking with a conchoid fracture, obtained from various species of pine and from tar. **p. blende,** an oxide of uranium, the source of the radium

salts known to commerce. It occurs in pitchy black masses, rarely in octahedrons Syn., *pechurane; uraninite.* **p. Burgundy,** the prepared resinous exudation of *Abies excelsa,* used in the form of various plasters as a counterirritant in chronic rheumatism. **p., Canada,** a resin obtained from *Abies canadensis,* and formerly used for making plasters. **p., Jew's or mineral,** asphalt. **p., liquid** (*pix liquida,* U S P, B. P.), tar. See *tar.* **p. plaster,** a plaster composed of Burgundy pitch, frankincense, resin, yellow wax and olive oil.

pitglandin (*pit-glan'-din*). Trade name of an extract of the anterior lobe of the pituitary gland, said to be nontoxic; tethelin.

pith [AS, *pitha*]. 1. The soft cellular tissue in the center of plant stalks. 2. Marrow of bones 3. Spinal marrow. 4 To cut off all connection of the brain-centers with the periphery by piercing the brain and spinal cord

pithecoid (*pith'-e-koid*) [πίθηκος, an ape; εἶδος, likeness]. Resembling an ape. **p. theory,** the theory of man's descent from the ape

pithiatic (*pith-e-at'-ik*). Pertaining to pithiatism.

pithiatism (*pith'-e-at-izm*). 1. Same as *hysteria.* 2. Treatment of disease by suggestion *q v*

pithiatric (*pith-e-at'-rik*). Capable of being relieved by suggestion or persuasion; term employed with reference to hysterical condition.

pithing (*pith'-ing*). The destroying of the central nervous system by piercing the brain and cord; decerebration.

pithode (*pith'-ōd*). See *karyokinesis.*

pitibulin (*pit-ib'-ū-lin*) Trade name of a solution of infundibular extract from the pituitary body.

pitocin (*pit'-os-in*). A hormone derived from the posterior lobe of the pituitary gland It has an oxytocic action.

pitometer (*pit-om'-et-er*). An instrument for detecting the waste from water pipes

Pitre's sections (*pētr*) [Albert *Pitres,* French physician, 1848–]. A series of nearly vertical sections through the brain for postmortem examinations. **P.'s sign.** 1. "Signe du cordeau;" the angle formed by the axis of the sternum and the line of a cord dropped from the suprasternal notch to the symphysis pubis indicates the degree of deviation of the sternum in cases of pleuritic effusion 2. Hypesthesia of the scrotum and testis in tabes dorsalis.

pitrenalin (*pit-ren'-al-in*). Trade name of a preparation containing adrenalin and pituitrin.

pitted (*pit'-ed*). Marked by indentations or pits, as from smallpox.

pitting (*pit'-ing*). The formation of pits; also the quality of preserving, for a short time, indentations made by pressing with the finger.

pituglandol (*pit-ū-glan'-dol*). Trade name of a liquid preparation of the infundibulum of the pituitary gland.

pituita (*pit-ū'-it-ah*) [L.]. Phlegm; mucus; stringy, frothy sputum.

pituital (*pit-ū'-it-al*). Relating to pituita.

pituitary (*pit-ū'-it-a-re*) [*pituita*]. Secreting or containing mucus. **p. body, p. gland,** a small, reddish-gray vascular body, weighing about ten grains, contained within the sella turcica of the skull. It consists of two portions—the large *anterior* or *oval,* and the small *posterior* or *cerebral* division. The *anterior lobe* is derived as a diverticulum from the primitive oral cavity; the *posterior lobe* descends as an outgrowth from the brain, communicating in fetal life with the third ventricle. The stalk of this outgrowth remains as the infundibulum. The pituitary body is attracting attention on account of pathological changes in its structure in such obscure diseases, as akromegaly, myxedema, and others. In some cases of akromegaly it has been much enlarged. Syn., *hypophysis cerebri.* **p. membrane,** the Schneiderian membrane.

pituitin (*pit-ū'-it-in*). A preparation made from the posterior lobe of the pituitary body.

pituitol (*pit-ū'-it-ol*). Trade name of an extract of the posterior lobe of the pituitary body.

pituitotrope (*pit-ū'-it-o-trōp*). A person with a constitution tending to pituitotropism.

pituitotropic (*pit-ū-it-o-trop'-ik*). Pertaining to, or characterized by, pituitotropism.

pituitotropism (*pit-ū-it-ot'-ro-pizm*). The condition in which the pituitary body has an abnormally strong influence.

pituitous (*pit-ū'-it-us*) [*pituita*]. Containing or resembling mucus.

pituitrin (*pit-ū'-it-rin*). Trade name of a preparation made from the posterior lobe of the pituitary gland.

pituri (*pit'-ū-re*). The leaves and twigs of *Duboisia hopwoodii,* used as a narcotic stimulant.

piturine (*pit'-ū-rēn*). A liquid alkaloid obtained from *Duboisia hopwoodii.* It is probably identical with nicotine.

pityriasic (*pit-ir-i-as'-ik*) Relating to or affected with pityriasis.

pityriasis (*pit-ir-i'-as-is*) [πίτυρον, bran] 1. A term applied to various skin affections characterized by fine, branny desquamation. 2. Seborrhea. **p. capitis, p. capillitii,** alopecia furfuracea *p capitis* is Sabouraud's name for dandruff. **p. circinata et marginata,** a disease characterized by an eruption of rose-colored spots on the trunk, the limbs, and in the axillæ, associated with slight fever and itching. **p. furfuracea,** seborrhœa sicca. **p. gravidarum.** Same as *chloasma uterinum* **p. pilaris.** See *keratosis pilaris.* **p. rosea.** See *p circinata et marginata.* **p. rubra,** a chronic inflammatory skin disease, beginning in one or more localized patches, which coalesce and gradually invade the whole body The skin is deep red in color, and covered by whitish vesicles that constantly reform. The disease lasts months or years, and generally ends fatally. Syn., *dermatitis exfoliativa* **p. tabescentium,** a form of seborrhea covering the greater part of the body. **p. versicolor.** See *tinea versicolor.*

pityroid (*pit'-ir-oid*) [πίτυρον, bran] Branny.

pivot (*piv'-ot*). A pin on which a wheel turns. **p., clack, p., clacking,** a means devised by Magiola for attaching an artificial crown to the root of a natural tooth. **p.-joint.** See *cyclarthrosis.* **p. tooth,** an artificial crown, designed to be applied to the root of a natural tooth, by means of what is usually termed a pivot, but more properly a dowel or tenon

pivoting (*piv'-ot-ing*). The fixation of an artificial crown to a tooth by means of a pivot or pin.

pix (*piks*). See *pitch* (2). **p. burgundica,** an exudate from *Picea* (*Abies*) *excelsa,* Norway spruce, used as rubefacient **P. canadensis,** that obtained from the hemlock tree, *Tsuga* (*Abies*) *canadensis.* **P. liquida,** tar, an oleoresin obtained by the destructive distillation of the pine.

pixalbol (*piks-al'-bol*). Same as *anthrasol, q. v.*

pixine (*piks'-ēn*). A surgical dressing said to consist of Burgundy pitch with a wool-fat base.

pixol (*piks'-ol*). A disinfectant preparation of tar and soft soap.

P. L. Abbreviation for (1) *Pharmacopœia Londinensis*, London Pharmacopœia; (2) perception of light.

placebo (*pla-se'-bo*) [L., "I will please," from *placere*, to please]. A medicine given for the purpose of pleasing or humoring the patient, rather than for its therapeutic effect.

placenta (*pla-sen'-tah*) [πλακοῦς, a cake]. The organ on the wall of the uterus to which the embryo is attached by means of the umbilical cord and from which it receives its nourishment. It is developed, about the third month of gestation, from the chorion of the embryo and the decidua serotina of the uterus. The villi of the chorion enlarge and are received into depressions of the decidua, and around them blood-sinuses form, into which, by diffusion, the waste-materials brought from the fetus by the umbilical arteries pass, and from which the blood receives oxygen and food-material being returned to the fetus by the umbilical vein. At term the placenta weighs one pound, is one inch thick at its center, and seven inches in diameter. **p. accreta**, a placenta which has grown into the wall of the uterus and which cannot be separated from it. **p., adherent**, one that is abnormally adherent to the uterine wall after childbirth. **p., annular**, one extending around the interior of the uterus in the form of a belt. **p., battledore**, one in which the insertion of the cord is at the margin of the placenta. **p., circumvallate**, a thickening or fungiform enlargement of the placenta at the point at which the decidua vera and the decidua reflexa would have united in cases in which such union has been thwarted by hypersecretion of the former or by endometritic processes. **p. cirsoides**, one in which the umbilical vessels have a cirsoid arrangement. **p., discoid**, one shaped like a disc. **p., duplex**, one divided into two parts. **p., fundal**, one attached at the fundus. **p., horse-shoe**, in twin pregnancy, a condition in which two placentæ are joined. **p., incarcerated**, one retained by irregular contraction of the uterus. **p., maternal**, the external layer developed from the decidua serotina. **p. membranacea**, one abnormally thin. **p. prævia**, a placenta that is fixed to that part of the uterine wall that becomes stretched as labor advances, so that it precedes the advance of the presenting part of the fetus. Being detached before the birth of the child, it generally causes grave hemorrhage. **p., retained**, one not expelled by the uterus after labor. **p., sanguinis**, a blood-clot. **p. student's**, a retained placenta due to improper manipulation. **p. succenturiata**, an accessory placenta.

placental (*pla-sen'-tal*) [*placenta*]. Pertaining to the placenta. **p. bruit, p. murmur, p. souffle**, a sound attributed to the circulation of blood in the placenta. **p. transmission**, the conveyance of drugs and disease-products through the fetoplacental circulation from mother to offspring.

placentation (*pla-sen-ta'-shun*) [*placenta*]. Formation and mode of attachment of the placenta.

placentin (*plas-en'-tin*). Placental extract used in the cuti-reaction for pregnancy.

placentitis (*pla-sen-ti'-tis*) [*placenta*; ιτις, inflammation]. Inflammation of the placenta.

placentoid (*pla-sen'-toid*) [*placenta*; εἶδος, like]. Resembling a placenta.

placentolysin (*pla-sen-tol'-is-in*) [*placenta*; λύσις, solution]. A cytolysin formed in the blood of an animal which has received injections of placental animal which has received injections of placental tissue emulsions from some other animal.

placentoma (*pla-sen-to'-mah*). A neoplasm springing from a retained portion of a placenta.

placentotherapy (*pla-sen-to-ther'-ap-e*) [*placenta*; *therapy*]. The remedial use of preparations of the placenta of animals.

placentula (*pla-sen'-tū-lah*) [dim. of *placenta*]. A small placenta.

Placido's disc (*plas-e'-do*) [*G. Placido*, Portuguese oculist]. A keratoscope composed of a disc with concentric circles.

placodes (*plak'-ōdz*). Cellular thickenings of the ectoderm in the region of the head; they contribute to the formation of the ganglia of the cranial nerves.

placuntitis (*plak-un-ti'-tis*). Synonym of *placentitis*.

placuntoma (*plak-un-to'-mah*). Syn. *placentoma*.

pladaroma (*plad-ar-o'-mah*) [πλαδάρωμα, wetness; softness]. A soft wart or tumor of the eyelid.

pladarosis (*plad-ar-o'-sis*) [πλαδαρός, soft]. Synonym of *pladaroma*.

plagiobolia (*pla-je-o-bol'-e-ah*) [πλάγιος, oblique; βάλλειν, to throw]. Imperfect or indirect emission of spermatic fluid into the vagina.

plagiocephalic (*pla-je-o-sef-al'-ik*) [*plagiocephaly*]. Having a skull exhibiting plagiocephaly.

plagiocephalism. See *plagiocephaly*.

plagiocephalous (*pla-je-o-sef'-al-us*). Synonym of *plagiocephalic*.

plagiocephaly (*pla-je-o-sef'-al-e*) [πλάγιος, oblique; κεφαλή, head]. Malformation of head caused by the closing of half of the coronal suture, giving an oblique growth to the cranial roof.

plague (*plāg*) [πληγή, a stroke]. 1. Any contagious malignant, epidemic disease. 2. A contagious disease endemic in eastern Asia, and in former times occurring epidemically in Europe and Asia Minor. After a period of incubation of from three to eight days the disease begins with fever, pain, and swelling of the lymphatic glands, chiefly the femoral inguinal, axillary, and cervical. Headache delirium, vomiting, and diarrhea may be present. When recovery is probable, the temperature falls in about a week. The cause of the disease is the *Bacillus pestis*, found by Kitasato in the blood, buboes, and internal organs of the victims of the plague. **p., black**, the plague which decimated the European nations in the 14th century. **p., bubonic**, the usual form of plague formerly prevalent in various parts of the world. **p., cold**, a fatal form of bilious pneumonia. **p., hunger**, relapsing fever. **p., levantine**, the plague of the eastern part of Europe. **p., lung**, pleuropneumonia of cattle. **p., Siberian cattle.** Synonym of *anthrax*. **p.-sore**, a sore resulting from the plague. **p.-spot**, a spot characteristic of the plague. **p., swine**, hog-cholera. **p., Syrian.** Synonym of *Aleppo boil*.

plaister. Plaster.

planarthragra (*plan-ar-thra'-grah*) [πλανᾶν, to cause to wander; ἄρθρον, a joint; ἄγρα, a seizure]. Gout which wanders from joint to joint.

plancus (*plang'-kus*) [*planca*, a board]. 1. A person with flat feet. 2. Flat-footed.

plane (*plān*) [*planus*, flat]. Any flat, smooth surface, especially any assumed or conventional surface, whether tangent to the body or dividing it.

planiceps (*pla'-ni-seps*) [*planus*, flat; *caput*, a head]. Flat-headed.

planimeter (*pla-nim'-et-ur*). 1. See *perimeter*. 2. An instrument which measures a plane by tracing the periphery.

planipes (*pla'-ne-pēz*) [*planus*, flat; *pes*, foot]. Having flat feet.

planithorax (*plan-e-thō'-raks*). A diagram of the chest showing the anterior and posterior surfaces in plane projection.

plano- (*pla-no-*). 1. [*planus*, flat]. A prefix signifying flat or level; also a lens having no refracting power. 2. [πλάνος, wandering]. A prefix signifying wandering.

planocellular (*pla-no-sel'-ū-lar*) [*plano-*; *cellula*, cell]. Flat-celled.

Planococcus (*plan-o-kok'-us*) [πλάνη, a wandering, κόκκος, a berry]. A genus of bacteria of the family *Coccaceæ*, having cell division in two planes; cells separate and flagellated.

planocompressed (*pla-no-kom-prest'*). So compressed that the opposite sides are flat.

planoconcave (*pla-no-kon'-kāv*). Concave on one surface and flat on the opposite side.

planoconic (*pla-no-kon'-ik*). Having one side flat and the other conical.

planoconvex (*pla-no-kon'-veks*). Plane on one side and convex on the other.

planocyte (*plan'-o-sīt*) [*plano-*; κύτος, a cell]. A wandering cell.

planodia (*plan-o'-de-ah*) [πλάνη, a wandering; ὁδός, a way]. Any false or artificial passage made by an instrument.

planomania (*plan-o-ma'-ne-ah*) [πλάνος, wandering; μανία, madness]. A morbid and insane desire for wandering.

planorheumatism (*plan-o-roo'-mat-izm*) [*plano-*; *rheumatism*]. Wandering or metastatic rheumatism.

Planosarcina (*pla-no-sar'-sin-ah*) [πλάνη, wandering; *sarcina*]. A genus of motile bacteria whose cells are flagellated and divide in three planes.

planta (*plan-tah*) [L.]. The sole of the foot.

plantar (*plan'-tar*) [*planta*]. Pertaining to the sole of the foot. **p. arch.** See *arch, plantar*. **p. fascia**, the dense triangular shaped aponeurosis occupying the middle and sides of the sole of the foot beneath the integument. **p. reflex.** See under *reflex*.

plantaris (*plan-ta'-ris*). See under *muscle*.

plantigrade (*plan'-te-grād*) [*planta*; *gradi*, to walk]. Bringing the entire length of the sole of the foot to the ground in walking, as is seen in the bear.

plantose (*plan'-tōs*). A pale-yellow dietectic powder prepared from the oil-cake of rape-seed, containing 12 % of nitrogen.

planum (*pla'-num*) [L. flat]. A plane or surface. **p. nuchale**, nuchal plane. **p. occipitale**, occipital plane. **p. orbitale**, orbital plane. **p. popliteum**, popliteal plane or space. **p. sternale**, sternal plane or anterior surface of the sternum. **p. temporale**, temporal plane.

planuria (*plan-ū'-re-ah*) [πλάνος, straying; οὖρον, urine]. The discharge of urine through abnormal passages.

plaque (*plak*) [Fr.]. A patch. **p.s. blood-.** See *blood-platelets*. **p.s, opaline**, scattered white spots, like those caused by silver nitrate, seen on the fauces, hard palate, cheeks, and lips; an early affection in syphilis.

plasm (*plazm*). Same as *plasma*.

plasma (*plaz'-mah*) [πλάσμα, a thing molded]. 1. The fluid part of the blood and the lymph. See *blood-plasma*. 2. Glycerite of starch. 3. Protoplasm. **p.-cells**, large granular cells found in the connective tissue. **p., lymph-**, the fluid part of the lymph. **p., muscle-.** See *muscle-plasma*.

plasmacules (*plaz'-ma-kūls*). See *hemokonia*.

plasmameba, plasmamœba (*plaz-mam-e'-bah*) [*plasma; amœba*]. An ameba-like parasite found in the blood in dengue.

plasmapheresis (*plaz-maf-e'-res-is*) [*plasma; ἀφαίρεσις*, a withdrawal]. The operation of venesection into sodium citrate solution, centrifugalization, washing the corpuscles in physiological salt solution and returning them (without the plasma) into the patient's circulation.

plasmasome (*plaz'-mas-ōm*) [πλάσμα, a molded figure; σῶμα, body]. A protoplasmic corpuscle.

plasmatic (*plaz-mat'-ik*) [*plasma*]. 1. Pertaining to plasma. 2. Plastic. **p. layer**, the layer of plasma next to the wall of a capillary.

plasmatorrhexis (*plaz-mat-o-reks'-is*) [*plasma; ῥῆξις* a bursting]. Same as *plasmorrhexis*.

plasmatosis (*plaz-mat-o'-sis*) [*plasma*]. The liquefaction of cell-substance as seen in the cells of the secreting milk-gland and in the cells of secreting glands of the cervix uteri.

plasment (*plaz'-ment*). A proprietary emollient application made from Iceland moss.

plasmexhidrosis (*plaz-meks-hi-dro'-sis*) [*plasma; ἐξ*, out of; *hidrosis*]. The exudation of plasma from the blood-vessels.

plasmic (*plaz'-mik*) [*plasma*]. Of or pertaining to protoplasm; formative, protoplasmic; plasmatic.

plasmin (*plaz'-min*) [*plasma*]. 1. The precipitate obtained from blood by treating it with a saturated solution of sodium sulphate, allowing the corpuscles to subside, then precipitating the plasma with sodium chloride, and washing the precipitate with a saturated solution of sodium chloride. 2. Plasmatic cell fluid prepared from the bacilli of cholera, typhus, etc.

plasmo- (*plaz-mo*) [*plasma*]. A prefix meaning relating to the plasma.

plasmochin (*plaz'-mo-kin*). Trade name of a synthetic drug more powerful than quinine.

plasmocyte (*plaz'-mo-sīt*) [*plasmo-*; *κύτος*, a cell]. 1. Any cell, other than blood-corpuscles, free in the blood-plasma. 2. A protozoan parasite in the blood plasma.

plasmocytoma (*plaz-mo-si-to'-mah*). Myeloma with numerous plasma cells.

plasmodial (*plaz-mo'-de-al*). Pertaining to a plasmodium.

plasmodiblast (*plaz-mo'-dib-last*). See *trophoblast*.

plasmodium (*plaz-mo'-de-um*) [*plasmo-*; *εἶδος*, form: *pl., plasmodia*]. The mass of protoplasm formed by the fusion of two or more amebiform bodies. **p. falciparum**, the parasite of estivoautumnal or pernicious malaria. **p. malariæ**, a protozoan parasite found in the blood of persons suffering from malaria. **p. præcox**, the malarial parasite of birds. **p. tenue**, a malarial parasite, said to be found in cases of malignant malaria in India. **p. vivax**, the parasite of tertian malaria.

plasmogen (*plaz'-mo-jen*) [*plasmo-*; *γεννᾶν*, to produce]. Formative protoplasm; germ-plasm; bioplasm.

plasmology (*plaz-mol'-o-je*) [*plasmo-*; *λόγος*, science]. The study of cells and cell-stuff, or plasma; histology.

plasmolysis (*plaz-mol'-is-is*) [*plasmo-*; *λύειν*, to loose]. 1. The separation of cell-protoplasm from the inclosing cell-wall. 2. The contraction of living protoplasm under the influence of reagents. 3. The escape of the soluble substances of the blood-corpuscle.

plasmolytic (*plaz-mo-lit'-ik*). Exhibiting or characterized by plasmolysis.

plasmolyze (*plaz'-mo-līz*). To bring about dissolution or shrinkage of cell protoplasm.

plasmoma (*plaz-mo'-mah*) [*plasmo-*; δμα, tumor]. A tumor which shows a tendency toward the formation of fibers.

plasmon (*plaz'-mon*) [*plasma*]. The unaltered proteid of milk. **p.,-butter,** a mixture of plasmon (6.58%) with butter (51.5%), water (41.2)% and salt (0.72%). It resembles clotted cream in appearance and taste and serves as a substitute for cod-liver oil.

plasmophagous (*plaz-mof'-ag-us*) [*plasmo-*; φαγεῖν, to eat]. Living upon protoplasm; applied to organisms causing decomposition of organic matter.

plasmoptysis (*plaz-mop'-tis-is*) [*plasmo-*; πτύσις, a spitting]. The escape of protoplasm from a cell due to rupture of the cell-wall

plasmorrhexis (*plaz-mor-eks'-is*) [*plasmo-*; ὁῆξις, a bursting]. The rupture of a cell and the escape or loss of the plasma.

plasmoschisis (*plaz-mos'-kis-is*) [*plasmo-*; σχίσις, cleavage]. The splitting of a cell, as the formation of disc-shaped bodies, by red blood-corpuscles.

plasmosome (*plaz'-mo-sōm*) [*plasmo-*; σῶμα, body]. 1. One of the granular structural elements of cells. 2. The nucleolus of a cell.

plasmotropic (*plaz-mo-trop'-ik*) [*plasmo-*; τροπή, a change]. Producing protoplasmic degeneration; applied to hemolytic action which leaves the red corpuscles intact in the circulation, but through the influence of poisons on the liver, spleen, and bone-marrow causes excessive destruction of them in these organs

plasmozyme (*plaz'-mo-zīm*). Thrombogen.

plasom (*plaz'-ōm*). A proprietary preparation from milk.

plasome (*plaz'-ōm*) [*plasma*; σῶμα, body, matter] The hypothetical unit of protoplasm.

plasson (*plas'-son*) [πλάσσειν, to form or mold]. Primitive or undifferentiated protoplasm; the protoplasm of the cell in the nonnucleated or cytode stage.

plastauxia (*plas-tawks'-e-ah*) [πλάσσειν, to mold, αὔξη, increase]. An increase of plasticity.

plaster (*plas'-ter*) [ME., *plastre*]. 1. An adhesive, semisolid substance spread upon cloth or other flexible material for application to the surface of the body 2. Calcined gypsum or calcium sulphate. **p., adhesive** (*emplastrum adhesivum*, U. S P.), a plaster prepared by melting rubber and adding petrolatum and lead plaster. **p.-bandage,** a bandage stiffened with plaster of Paris **p., belladonna.** See *belladonna plaster.* **p., blistering,** cerate of cantharides. **p., capsicum.** See *capsicum plaster.* **p., court-,** a mixture of isinglass, glycerine, and alcohol spread upon silk. **p., diachylon, p., lead.** See *plumbi, emplastrum,* under *plumbum.* **p. jacket,** a bandage of plaster of Paris for the trunk. **p., mercurial.** See *mercury plaster.* **p.-mull,** a plaster made by incorporating with mull or thin muslin a mixture of guttapercha and some medicament dissolved in benzine. It is used in skin diseases. **p., mustard-,** one made by spreading upon muslin powdered mustard, or a mixture of mustard and flour reduced to the consistence of paste by the addition of water. **p., opium.** See *opium plaster.* **p.-of-Paris,** a mixture of calcium sulphate (gypsum) and water, having the property of becoming hard during drying. It is used for surrounding parts, such as joints, fractured limbs, etc., with a stiff casing, to prevent mobility. **p., resin,** a lead-plaster with the addition of resin and wax. **p., soap.** See *soap plaster* **p., spice-,** a plaster composed of yellow wax. suet, turpentine, oil of nutmeg, olibanum, benzoin, oil of peppermint, and oil of cloves, and used to relieve abdominal pain in children. **p., strengthening,** one containing iron. **p., warming,** a plaster of pitch and cantharides.

plastic (*plas'-tik*) [πλάσσειν, to mold]. 1. Formative; building up tissues; repairing defects, as *plastic* surgery, *plastic* operation. 2. Capable of being molded. **p., bronchitis,** pseudomembranous bronchitis. **p. force,** the generative force of the body. **p. linitis,** cirrhosis of the stomach. **p. lymph,** the inflammatory exudate that covers wounds or inflamed serous surfaces, and becomes organized by the development in it of blood-vessels and connective tissues.

plasticity (*plas-tis'-it-e*) [*plastic*]. 1. Plastic force. 2 The quality of being plastic.

plastics (*plas'-tiks*). Plastic surgery.

plasticule (*plas'-tik-ūl*) [πλάσσειν, to mold] A molecule of plastic material not yet fully organized; a plastidule.

plastid (*plas'-tid*) [πλάσσειν, to mold]. An elementary organism; a cell or cytode.

plastidule (*plas'-tid-ūl*) [dim. of *plastid*, an elementary organism]. A protoplasmic molecule; one of the physical units of which living matter is composed.

plastin (*plas'-tin*) [πλάσσειν, to mold] A phosphorized protein, constituting the chief proteid of protoplasm.

plastodynamia (*plas-to-di-nam'-e-ah*) [*plasto-*; δύναμις, power]. Nutritive plastic power

plastogamy (*plas-tog'-am-e*) [*plasma*; γάμος, marriage]. Permanent conjugation of cells which is limited to the cytoplasm.

plastron (*plas'-tron*) [French. *plastron*, a breastplate]. The sternum and costal cartilages.

plate (*plāt*) [πλατύς, broad]. 1. A flattened part, especially a flattened process of bone. 2. A thin piece of metal or some other substance to which false teeth are attached. **p., approximation-,** one of the plates of decalcified bone or other material that are used in enterectomy to bring the resected ends of intestine together. **p., auditory,** the bone-plate forming the roof of the auditory meatus. **p., axial,** the primitive streak of the embryo. **p.s, blood-.** See *blood-platelets.* **p., bone-.** See *p., approximation-* **p., cribriform,** the horizontal plate of the ethmoid bone constituting the floor of the olfactory fossa and perforated for the passage of the olfactory nerves. **p.-culture,** a method of obtaining pure cultures of bacteria by pouring the inoculated culture-medium upon sterile glass plates and allowing it to solidify. **p., dorsal,** one of the two longitudinal ridges on the dorsal surface of the embryo which subsequently join to form the neural canal. **p., end-.** See *end-plate.* **p. equatorial,** the compressed mass of chromosomes aggregated at the equator of the nuclear spindle during karyokinesis. **p.s, facial,** the frontonasal and external group of nasal and maxillary plates of the embryo. **p., foot,** the flat part of the stapes. **p., Franklin,** a glass plate partly covered on both sides with tin-foil, used as a condenser in frictional electricity. **p., frontal,** in the fetus, a cartilaginous plate interposed between the lateral parts of the ethmoid cartilage and the lesser wings and anterior portion of the sphenoid bone. **p., frontonasal,** the middle of the facial plates, which subsequently forms the external nose.

p., lateral mesoblastic, the thick portion of the mesoblast situated one on each side of the notochord. Each plate splits into two portions, the outer divisions coalescing to form the body-wall, or somatopleure, the inner, to form the splanchnopleure, or visceral covering. **p.s, maxillary, p.s, maxillary, inferior,** the first pair of subcranial plates from which the mandible is developed. **p., medullary** or **neural.** Same as *p., dorsal* **p., nuclear.** See *nuclear plate.* **p., palate,** the part of the palate-bone which, with its opposite fellow, forms the roof of the mouth. **p.s, pterygoid,** two plates into which the pterygoid process of the sphenoid bone divides. **p.s, subcranial.** See *arches, postoral.* **p., tympanic,** the bony sides and floor of the auditory meatus.

platelets, blood (*plāt'-lets*). Small light gray discs in the blood, of uncertain function

platetrope (*plat'-e-trōp*). See *platytrope.*

platiculture (*pla-ti-kul'-chur*). The cultivation of bacteria on plates.

plating (*pla'-ting*). See *platiculture.*

platinic (*plat-in'-ik*) [*platinum*]. Containing platinum as a quadrivalent element.

platinode (*plat'-in-ōd*) [*platinum, ὁδός*, way]. The negative or receiving plate of an electric battery, so-called because formerly often made of platinum.

platinous (*plat'-in-us*) [*platinum*]. Containing platinum as a bivalent element.

platinum (*plat'-in-um*) [Sp., *platina*, dim of *plata*, silver]. A silver-white metal occurring native or alloyed with other metals, atomic weight 195 2, sp. gr 21 5, quantivalence II and IV; symbol Pt. It is fusible only at very high temperatures, and is insoluble in all acids except nitrohydrochloric On account of these properties it is extensively used for chemical apparatus—crucibles, foils, wire, etc ; it is also employed as a reagent. Platinum occurs, aside from its ordinary metallic form, as a spongy mass (*spongy platinum*) and as a fine metallic powder (*platinum-black*), which is capable of condensing a great deal of oxygen, and hence acts as a powerful oxidizing agent. Platinum forms two sets of compounds—a platinous series, in which it acts as a diad, and a platinic series, in which it acts as a tetrad **p. chloride,** $PtCl_4$, is used as a reagent to detect potassium and ammonium; also in syphilis, in doses of ⅛–½ gr. (0 008–0.03 Gm)

Platner's crystals (*plat'-ner*). Crystals of sodium glycocholate and sodium taurocholate obtained by evaporation from urine which contains bile.

platode, platoid (*plat'-ōd, plat-oid'*) [*πλατύς*, broad, *εἶδος*, form] In biology, broad or flat, as a worm.

platradon (*plat-ra'-don*) Trade name for platinum radon seeds.

Platt's chlorides. A disinfectant liquid said to be a solution of the chlorides of magnesium, potassium, sodium, zinc, and aluminum.

platy- (*plat-e-*) [*πλατύς*, broad]. A prefix signifying broad.

platycelian, platycelous (*plat-is-el'-e-an, plat-is-el'-us*) Concave in front and convex behind.

platycephalic, platycephalous (*plat-is-ef-al'-ik, plat-is-ef'-al-us*) [*platy-; κεφαλή*, head]. Having a broad skull with a vertical index of less than 70.

platycephaly (*plat-is-ef'-al-e*) [*platy-; κεφαλή*, head]. The quality of being platycephalous.

platycnemia (*plat-ik-ne'-me-ah*) [*platy-; κνήμη*, leg]. The stage of being platycnemic.

platycnemic (*plat-ik-ne'-mik*) [see *platycnemia*]. Having a tibia which is exaggerated in breadth; broad-legged.

platycnemism (*plat-ik-ne'-mism*). Platycnemia.

platycoria, platycoriasis (*plat-ik-o'-re-ah, plat-ik-o-ri'-as-is*) [*platy-; κόρη*, pupil]. Expansion of the pupil; mydriasis.

platycrania (*plat-e-kra'-ne-ah*) [*platy-; κρανίον*, skull]. The flattened condition of the skull produced artificially among savage tribes.

platycyte (*plat'-is-īt*) [*platy-; κύτος*, a cell]. A cell intermediate in size between a giant-cell and a leukocyte, found in tubercle nodules.

platyglossal (*plat-e-glos'-al*) [*platy-; γλῶσσα*, tongue]. Having a broad tongue.

Platyhelminthes (*plat-e-hel-min'-thēz*) [*platy-; ἕλμινς*, a worm]. Flat-bodied, more or less elongated worms, usually containing both sexual elements at the same time. They include flat-worms, flukes, and tapeworms.

platyhieric (*plat-e-hi-er'-ik*) [*platy-; ἱερός*, sacrum]. Having a broad sacrum; having a sacral index of more than 100.

platymeric (*plat-e-me'-rik*) [*platy-; μήρος*, thigh]. Having a broad femur.

platymorphia (*plat-e-mor'-fe-ah*) [*platy-; μορφή*, form]. A flatness in the formation of the eye and shortening of the anteroposterior diameter, resulting in hyperopia

platymyoid (*plat-e-mi'-oid*) Applied to muscle-cells in which the contractile layer presents an even surface.

platyopia (*plat-e-o'-pe-ah*) [*platy-, ὤψ*, face] Broad of face; the quality of being platyopic.

platyopic (*plat-e-op'-ik*) [*platy-; ὤψ*, face]. In biology, having a face wide across the eyes, as in the Mongolian races, having the naso-malar index below 107.5°

platypellic (*plat-e-pel'-ik*) [*platy-; πέλλα*, basin]. Having a broad pelvis

platypodia (*plat-e-po'-de-ah*) [*platy-; πούς*, foot]. Flat-footedness.

platyrrhine (*plat'-ir-in*) [*platy-; ῥίς*, nose]. Having a broad and flat nose; having a nasal index above 53.

platyrrhiny, platyrhiny (*plat'-ir-i-ne*) [*platy-, ῥίς*, nose]. The condition of having a platyrrhine skull.

platysma (*plat-iz'-mah*) [*πλατύς*, broad]. Anything of considerable superficial dimensions. also, a plaster. **p. myoides.** See under *muscle.*

platystencephalia, platystencephaly (*plat-is-ten-sef-a'-le-ah, plat-is-ten-sef'-al-e*) [*πλατύστατος*, widest; *ἐγκέφαλος*, brain]. The condition of a skull very wide at the occiput and with prominent jaws.

platytrope (*plat'-et-rōp*) [*platy-; τρέπειν*, to turn]. In biology, one of two symmetrically related parts on opposite sides of the meson, a lateral homologue.

Plaut's angina (*plowt*). See *Vincent's angina.*

Playfair's treatment (*pla'-fār*) [William Smoult *Playfair*, English physician, 1836–1903]. See *Mitchell's treatment.*

plectrum (*plek'-trum*) [*πλῆκτρον*, a spur *pl., plectra*]. The styloid process of the temporal bone; the tongue; the uvula; the malleus.

pledget (*plej'-et*) [origin obscure, perhaps dim. of *plug*]. A small flattened compress.

plegaphonia (*pleg-af-o'-ne-ah*) [*πληγή*, stroke; *φωνή*, sound]. The sound produced in auscultatory percussion of the larynx, the glottis being open.

plegometer (*pleg-om'-et-er*). Syn. of *pleximeter*.

Plehn's karyochromatophilic granules (*plān*) [Albert *Plehn*, German physician, 1861–]. Basophile granules observed in the protozoan parasite of malaria.

pleiades (*plī'-ad-ēz*). An aggregation of enlarged lymph nodes.

pleochroic (*ple-o-kro'-ik*). See *pleochromatic*.

pleochroism (*ple-ok'-ro-izm*) [πλέων, more; χρόα, color]. The property possessed by some bodies, especially crystals, of presenting different colors when viewed in the direction of different axes.

pleochromatic (*ple-o-kro-mat'-ik*) [see *pleochroism*]. Pertaining to or exhibiting pleochroism.

pleocytosis (*ple-o-si-to'-sis*). Increase of lymphocytes in the cerebrospinal fluid.

pleomastia, pleomazia (*ple-o-mas'-te-ah, ple-o-ma'-ze-ah*) [πλέων, more; μαστός, or μαζός, breast]. The condition of having more than two mammæ. See *polymastia*.

pleomastic (*ple-o-mas'-tik*). Pertaining to, or characterized by, pleomastia.

pleomazia (*ple-o-ma'-ze-ah*) [πλέων, more; μάζος, breast]. Pleomasia.

pleomorphic (*ple-o-mor'-fik*) [see *pleomorphism*]. Having more than one form.

pleomorphism (*ple-o-mor'-fizm*) [πλέων, more; μορφή, form]. The state of being pleomorphic, *i. e.*, of existing in widely different forms.

pleomorphous (*ple-o-mor'-fus*). Pleomorphic.

pleonasm (*ple'-o-nazm*) [πλεοναστός, an exaggeration]. Any deformity marked by superabundance of certain organs or parts.

pleonectic (*ple-o-nek'-tik*) [πλέων, more; ἔχειν, to have]. 1. Pertaining to, or characterized by, pleonexia. 2. Pertaining to blood having more than the normal saturation of oxygen.

pleonexia (*ple-on-eks'-e-ah*) [πλέων, more; ἔχειν, to have] Excessive desire to have or possess. 2. Increased body resistance.

pleonosteosis (*ple-on-os-te-o'-sis*) [πλέων, more; ὀστέον, bone]. Excessive or premature ossification.

plerosis (*ple-ro'-sis*) [πλήρωσις, a filling]. 1. The restoration of lost tissue. 2. Plethora.

plesiomorphic (*ples-e-o-mor'-fik*) [πλησίης, near; μορφή, form]. Almost identical in form.

plesiomorphous (*ples-e-o-mor'-fus*) [πλησίος, near; μορφή, form]. Crystallizing in similar forms but differing in chemical composition.

plesiopia (*ples-e-o'-pe-ah*) [πλησίος, near; ὤψ, eye]. Increased convexity of the crystalline lens, producing myopia, and due to long-continued accommodation-strain.

plessesthesia, plessesthesia (*ples-es-the'-ze-ah*) [πλήσσειν, to strike; αἴσθησις, perception by the senses]. Palpatory percussion performed by placing the left middle finger firmly against the body surface and percussing with the index-finger of the right hand, allowing it to remain in contact with the left finger for a few seconds.

plessigraph (*ples'-e-graf*) [πλήσσειν, to strike; γράφειν, to write]. A form of pleximeter which permits of close distinctions in the quality of the sounds elicited, and by means of a crayon attached to the stem, organs or dull areas may be mapped on the surface of the skin.

plessimeter (*ples-im'-et-er*). See *pleximeter*.

plessimetric (*ples-im-et'-rik*). Pertaining to a plessimeter.

plessor (*ples'-or*). See *plexor*.

plethora (*pleth'-or-ah*) [πλῆθος, fulness]. A state characterized by excess of blood in the vessels, and marked by redness of the face, a full pulse, a feeling of fulness and tension in the head, drowsiness, and a tendency to nosebleed.

plethoric (*pleth'-or-ik*) [*plethora*]. Pertaining to or characterized by plethora.

plethysmograph (*pleth-iz'-mo-graf*) [πληθυσμός, increasing; γράφειν, to write]. An instrument for ascertaining changes in the volume of an organ or part, dependent upon changes in the quantity of the blood.

plethysmography (*pleth-iz-mog'-ra-fe*). The determination of the size of an organ by means of the plethysmograph.

pleura (*ploo'-rah*) [πλευρά, a side]. The serous membrane which envelops the lung (*p., pulmonary*), and, which being reflected back, lines the ental surface of the thorax (*p., costal*). **p. costalis.** See *p., costal.* **p., diaphragmatica,** the reflection of the pleura upon the upper surface of the diaphragm. **p. mediastinalis,** a continuation of the costal pleura covering the side of the mediastinum. **p., parietalis.** Synonym of *p., costal.* **p., pericardiaca,** the portion of the pleura contiguous to the pericardium. **p. phrenica.** Synonym of *p., diaphragmatica.* **p. pulmonalis.** Synonym of *p., pulmonary.* **p., visceralis.** Synonym of *p., pulmonary.*

pleuracentesis (*ploo-rah-sen-te'-sis*). Same as *pleurocentesis*.

pleuracotomy (*ploo-rak-ot'-om-e*) [*pleura*; τόμη, an incision]. Incision of the thoracic wall with insertion of a drainage tube into the pleura.

pleural (*ploo'-ral*) [*pleura*]. Pertaining to the pleura.

pleuralgia (*ploo-ral'-je-ah*) [*pleura*; ἄλγος, pain]. Pain in the pleura or in the side; intercostal neuralgia.

pleuralgic (*ploo-ral'-jik*) [*pleura*; ἄλγος, pain]. Pertaining to or affected with pleuralgia.

pleurapophyseal (*ploo'-rap-off-iz'-e-al*) [*pleura*; ἀπόφυσις, offshoot]. Pertaining to a pleurapophysis.

pleurapophysis (*ploo-rap-of'-is-is*) [*pleura*; *apophysis*]. One of the lateral processes of a vertebra, having the morphologic valence of a rib.

pleurapostema (*ploo-rap-os-te'-mah*) [*pleura*; ἀπόστημα, abscess]. A collection of pus in the pleural cavity.

pleurarthrocace (*ploo-rar-throk'-as-e*) [*pleura*; ἄρθρον, joint; κακός, evil]. Disease of the costovertebral joints; also, caries of the ribs

pleurarthron (*ploo-rar'-thron*) [*pleura*; ἄρθρον, joint]. The articulation of a rib.

pleurectomy (*ploo-rek'-to-me*) [*pleura*; ἐκτομή, a cutting out]. Excision of one or more ribs, in whole or in part.

pleurisy (*ploo'-ris-e*) [*pleura*]. Pleuritis; inflammation of the pleura. It may be acute or chronic. Three chief varieties are usually described, depending upon the character of the exudate: (1) Fibrinous or plastic; (2) serofibrinous; (3) purulent. In *fibrinous pleurisy* the pleura is covered with a layer of lymph of variable thickness, which, in the acute form, can be readily stripped off. *Serofibrinous pleurisy* is characterized by the presence of a considerable quantity of fluid containing flocculi of lymph, and the deposit of some fibrin on the pleural surface. *Purulent pleurisy*, or empyema, is characterized by the presence of a purulent exudate. *Acute pleurisy* is marked by sharp and stabbing pain (stitch) in the side, increased by breathing and coughing; by fever, and by a friction-fremitus felt on palpation and a to-

and-fro friction-sound heard on auscultation. In the serofibrinous variety a liquid effusion takes place, the signs of which are: bulging of the intercostal spaces and chest-wall, absence of vocal fremitus, displacement of the heart, movable dulness with a curved upper line, and a tympanitic percussion-note (Skodaic resonance) beneath the clavicle and above the level of the effusion. *Chronic pleurisy* may be dry or serofibrinous. **p., diaphragmatic,** that restricted to the pleural surface of the diaphragm. **p., dry,** that attended with little or no effusion of fluid. **p., encysted,** pleurisy in which the effusion is circumscribed by adhesions. **p., false,** pleurodynia. **p., fetid,** that marked by the presence of fetid fluid. **p., hemorrhagic,** a variety in which the exudate contains blood. **p., humid, p., moist,** that accompanied by expectoration. **p., ichorous.** Same as *p., fetid.* **p., interlobar,** that affecting the pleural layers between the lobes. **p., latent,** a form without the subjective symptoms. **p., mediastinal,** inflammation of the pleural layers about the mediastinum. **p., metapneumonic,** pleurisy dependent upon a pneumonia. **p., plastic,** that marked by a deposit of a layer of semisolid exudate. **p., purulent.** Same as *empyema.* **p., serofibrinous,** a form marked by fluid exudate containing flocculi and the deposit of some fibrin. **p. sicca.** See *p., dry.* **p., typhoid,** pleurisy with some of the symptoms of typhoid. **p., wet,** pleurisy with effusion.

pleurisy-root (*ploo'-ris-e*). *Asclepias tuberosa,* milkweed, butterfly weed.

pleuritic (*ploo-rit'-ik*) [*pleurisy*]. Pertaining to, affected with, or of the nature of pleurisy.

pleuritis (*ploo-ri'-tis*). See *pleurisy.*

pleuro- (*ploo'-ro-*) [πλευρά, side]. A prefix denoting connection with the pleura or with a side or rib.

pleurocele (*ploo'-ro-sēl*) [*pleuro-*; κήλη, hernia]. 1. Hernia of the lung. 2. A serous effusion into the pleural cavity.

pleurocentesis (*ploo-ro-sen-te'-sis*) [*pleuro-*; κέντησις, a pricking] Puncture of the pleura.

pleurocentral (*ploo-ro-sen'-tral*). Pertaining to a pleurocentrum.

pleurocentrum (*ploo-ro-sen'-trum*) [*pleuro-*; κέντρον, center: *pl., pleurocentra*]. A hemicentrum; the lateral element in a vertebral centrum.

pleurocholecystitis (*ploo-ro-ko-le-sist-i'-tis*) [*pleuro-*; χολή, bile; *cystitis*]. Simultaneous inflammation of the pleura and the gall-bladder.

pleuroclysis (*ploo-rok'-lis-is*) [*pleuro-*; κλύσις, a wash]. The injection of fluids into, or the washing out of the pleural cavity.

pleurocolic (*ploo-ro-kol'-ik*) [*pleuro-*; *colon*]. Costocolic; joining the side and the colon.

pleurocollesis (*ploo-ro-kol-e'-sis*) [*pleuro-*; κόλλησις, a glueing]. Adhesion of the pleural layers.

pleurocutaneous (*ploo-ro-kū-ta'-ne-us*) [*pleuro-*; *cutis,* skin]. In relation with the pleura and the skin, as pleurocutaneous fistula.

pleurodont (*ploo'-ro-dont*) [*pleuro-*; ὀδούς, tooth]. In biology, a tooth, or animal with teeth, fixed to the jaw by a lateral ankylosis; as certain lizards.

pleurodynia (*ploo-ro-din'-e-ah*) [*pleuro-*; ὀδύνη, pain] A sharp pain in the intercostal muscles, of rheumatic origin.

pleurogenic, pleurogenous (*ploo-ro-jen'-ik, ploo-roj'-en-us*) [*pleuro-*; γεννᾶν, to produce]. Originating in the pleura.

pleurohepatitis (*ploo-ro-hep-at-i'-tis*) [*pleuro-*; ἧπαρ, liver; *itis,* inflammation]. Inflammation of the pleura and the liver.

pleurolith (*ploo'-ro-lith*) [*pleuro-*; λίθος, a stone]. A calculus occurring in the pleura.

pleurolysis (*ploo-rol'-is-is*) [*pleuro-*; λύσις, a loosening]. Same as *pneumolysis, q. v.*

pleuropericardial (*ploo-ro-per-e-kar'-de-al*). Pertaining to both pleura and pericardium.

pleuropericarditis (*ploo'-ro-per-ik-ar-di'-tis*). Pleurisy associated with pericarditis.

pleuroperitoneal (*ploo'-ro-per-i-ton-e'-al*) [*pleuro-*; *peritoneum*]. Pertaining to the pleura and the peritoneum. **p. cavity,** the body-cavity.

pleuroperitonitis (*ploo'-ro-per-it-on-i'-tis*) [*pleuro-*; *peritonitis*]. The simultaneous existence of pleurisy and peritonitis.

pleurophorous (*ploo-rof'-or-us*) [*pleuro-*; φέ. ν, to bear]. Furnished with a membran

pleuropneumonolysis (*ploo-ro-nū-mon-ol'-is-is*) [*pleuro-*; πνευμών, lung; λύσις, a loosening]. Resection of one or more ribs on one side to bring about collapse of lung in unilateral pulmonary tuberculosis.

pleuropneumonia (*ploo-ro-nū-mo'-ne-ah*). Combined inflammation of the pleura and of the lung, especially a variety occurring in cattle.

pleuropulmonary (*ploo-ro-pul'-mo-na-re*). Pertaining to the pleura and the lungs.

pleuropyesis (*ploo-ro-pi-e'-sis*) [*pleuro-*; πύησις, suppuration]. Purulent pleurisy.

pleurorrhagia (*ploo-ror-a'-je-ah*) [*pleuro-*; ῥηγνύναι, to burst forth]. Hemorrhage from the pleura.

pleurorrhea (*ploo-ror-e'-ah*) [*pleuro-*; ῥοία, a flow]. An effusion of fluid into the pleura.

pleuroscopy (*ploo-ros'-ko-pe*) [*pleura;* σκοπεῖν, to view]. Examination of the pleural cavity through an incision in the thorax.

pleurosoma (*ploo-ro-so'-mah*) [*pleuro-*; σῶμα, a body]. A monster of the species *Celosoma,* in which there is a lateral eventration with atrophy or imperfect development of the upper extremity on the side of the eventration.

pleurosomus (*ploo-ro-so'-mus*). A monster exhibiting pleurosomia.

pleurospasm (*ploo'-ro-spasm*) [*pleuro-*; σπασμός, spasm]. Cramp, or spasm in the side.

pleurosthotonos (*ploo-ros-thot'-o-nos*). See *pleurothotonos.*

pleurothotonos (*ploo-ro-thot'-o-nos*). A form of tetanic spasm of the muscles in which the body is bent to one side.

pleurotomy (*ploo-rot'-o-me*) [*pleuro-*; τομή, a cutting]. Incision into the pleura.

pleurotyphoid (*ploo-ro-ti-foid'*). Typhoid fever with involvement of the pleura.

pleurovisceral (*ploo-ro-vis'-er-al*). Pertaining to the pleura or side, and to the viscera.

plexal (*pleks'-al*) [*plectere,* to knit]. Pertaining to or of the nature of a plexus.

plexiform (*pleks'-if-orm*) [*plexus; forma,* form]. Resembling a network or plexus.

pleximeter (*pleks-im'-et-er*) [πλῆξις, a stroke; μέτρον, a measure]. A disc placed on the body to receive the stroke in mediate percussion.

pleximetric (*pleks-im-et'-rik*) [*pleximeter*]. Pertaining to or performed with a pleximeter.

pleximetry (*pleks-im'-et-re*). Percussion by means of a pleximeter.

plexitis (*pleks-i'-tis*) [*plectare,* to knit; *itis,* inflammation]. Inflammation of a plexus.

plexor (*pleks'-or*) [πλῆξις, stroke]. A hammer used for performing percussion.

plexus (*pleks'-us*) [*plectere,* to knit]. A network, especially an aggregation of vessels or nerves forming an intricate network. **p., aortic,**

(1) a nerve plexus on each side and in front of the abdominal aorta; (2) one surrounding the thoracic aorta. **p., basilaris,** the basilar sinus, consisting of a number of veins connecting the two subpetrosal sinuses. **p., brachial,** a plexus formed in the neck by the union of the anterior branches of the lower four cervical and the greater part of the first dorsal nerves. Its branches are the rhomboid, subclavian, suprascapular, external anterior thoracic, musculocutaneous, subscapular, median musculospiral, posterior thoracic, internal anterior thoracic, internal cutaneous, lesser internal cutaneous, and ulnar nerves **p., cardiac,** a plexus of nerves connected with the heart. **p., cardiac, deep** or **great,** the deep portion of the superficial cardiac plexus. **p., cardiac, superficial,** or **anterior,** one in the upper part of the chest, between the arch of the aorta and base of the heart. It is derived from the sympathetic nerve and is reinforced by branches of the inferior, middle, and superior cardiac, hypoglossal, and pneumograstric nerves. **p., carotid, external,** one around the external carotid artery. **p., carotid, internal,** one surrounding the internal carotid artery. **p., cavernous,** a sympathetic plexus in the cavernous sinus; it furnishes branches to the internal carotid artery and connects with the motor oculi, patheticus, and trigeminus nerves. **p., celiac,** one close to the celiac axis. **p., cervical,** a plexus in the neck formed by the anterior branches of the upper four cervical nerves Its branches are the *superficial,* to skin of the head and neck; and the *deep,* the phrenic, communicans noni, two muscular, and two communicating branches. **p., choroid.** See *choroid plexus.* **p., coccygeal,** one on the dorsal surface of the coccyx and caudal end of the sacrum. **p., coronary, anterior,** one between aorta and pulmonary artery. **p., coronary, gastric,** one at the lesser curvature of the stomach. **p., coronary, posterior,** one accompanying the posterior coronary artery on the dorsum of the heart **p., crural,** one surrounding the upper portion of the femoral artery **p., cystic,** one near the gall-bladder. **p., dental, inferior,** one around the roots of the teeth of the lower jaw. **p., diaphragmatic,** one near the phrenic artery. **p., epigastric.** Same as *p. solar.* **p., esophageal,** one around the esophagus. **p., facial,** one enveloping part of the facial artery. **p., gangliform,** one formed from roots of origin of the inferior maxillary nerve. **p., gastric,** a branch of the celiac plexus accompanying the gastric artery. **p., gastroduodenal,** a branch of the celiac plexus. **p., hemorrhoidal, inferior** and **middle,** nerve-plexus derived from the pelvic plexus near the rectum. **p., hepatic,** a branch of the celiac plexus attending the hepatic artery to the liver. **p., hypogastric,** one before the promontory of the sacrum. **p., hypogastric, inferior.** Same as *p., pelvic.* **p., infraorbital,** one under the levator labii superioris muscle. **p., intestinal, submucous,** Meissner's, in the submucosa of the small intestine. **p., lingual,** one around the lingual artery. **p., lumbar,** one formed by the anterior divisions of the lumbar spinal nerves in the psoas muscle. **p. magnus profundus.** Same as *p., cardiac, deep.* **p., mesenteric, inferior,** one around the inferior mesenteric artery. **p., mesenteric, superior,** one around the superior mesenteric artery. **p., myenteric,** Auerbach's, one between the circular and longitudinal muscular coats of the small intestine. **p., nasopalatine,** one uniting the nasopalatine nerves in the incisor foramen. **p., obturator,** one around the obturator nerve. **p., occipital,** one around the occipital artery. **p., ophthalmic,** one around the ophthalmic artery and the optic nerve. **p., ovarian,** (1) a venous plexus in the broad ligament; (2) a nerve plexus distributed to the ovaries. **p., pampiniform,** a venous plexus of the spermatic cord. **p., pancreatic,** one that supplies the pancreas. **p., pancreaticoduodenal,** one near the head of the pancreas **p., parotid,** the pes anserinus, *q. v.* **p., patellar,** one in front of the patella. **p., pelvic,** one at the side of the rectum and bladder, distributed to the viscera of the pelvis and plexuses of the pelvis. **p., pharyngeal,** (1) nerve-plexuses supplying the pharynx; (2) venous plexus at the side of the pharynx. **p., phrenic,** one accompanying the phrenic arteries to the diaphragm. **p., prostatic,** one occupying the sides of the prostate. **p., pterygoid,** a plexus of veins which accompanies the internal maxillary artery between the pterygoid muscles. **p., pulmonary, anterior,** one in front of the bronchus, whence branches are distributed through the lung. **p., pulmonary, posterior,** one at the back of the bronchus, whence branches are distributed through the lung. **p., pyloric,** one near the pylorus. **p., renal,** a plexus derived from the solar and abdominal aortic plexuses; it accompanies the renal artery and is distributed to the kidney. **p., sacral,** one ventrad of the sacrum. **p., semilunar, p., solar.** See *solar plexus.* **p., spermatic,** a nerve-plexus around the spermatic vessels, supplying the testes (ovaries in females). **p., sphenoid,** the upper part of the internal carotid plexus. **p., splenic,** one around the splenic artery. **p., subsartorial,** one at the posterior border of the sartorius muscle. **p., subtrapezial,** one beneath the trapezius muscle. **p., sympathetic,** a plexus formed by the branches of the sympathetic nerve. **p., thyroid, inferior,** one around the external carotid and inferior thyroid arteries, distributed to the larynx, pharynx, and thyroid gland. **p., thyroid, superior,** one around the thyroid gland. **p., tonsillar,** one in the tonsil. **p., tympanic,** the tympanic portion of the tympanic nerve. **p., uterine,** (1) a venous plexus on the walls of the uterus, extending into the broad ligament; (2) a nerve-plexus supplying the cervix and lower part of the uterus. **p., vaginal,** (1) a nerve-plexus supplying the walls of the vagina; (2) a venous plexus near the entrance of the vagina. **p., vertebral,** one surrounding the vertebral and basilar arteries. **p., vesical,** one surrounding the vesical arteries.

pli (*plē*) [Fr.]. 1. A gyrus or convolution. 2. A fold. 3. Plica.

plica (*plī'-kah*) [L.]. 1. A fold. 2. See *p. polonica.* **p. chorioidea,** the transverse fold of invaginated roof-plate produced by the metencephalic flexure of the primitive brain. 3. A false membrane. **p. epigastrica,** fold of peritoneum covering the deep epigastric artery. **p. fimbriata,** a fold of mucous membrane having a fringed free edge on either side of the frenum linguæ. **p. gubernatrix,** a fold of peritoneum containing the lower part of the gubernaculum testis. **p. hypogastrica.** Same as *p. umbilicalis lateralis.* **p. lacrimalis.** See *Hasner's valves.* **p. neuropathica,** a curling of the hair from a

nervous derangement. **plicæ palmatæ,** radiating folds in the mucous membrane of the cervix. **p. polonica,** a matted, entangled condition of the hair, due to want of cleanliness in certain diseases of the scalp. Syn., *Polish plait.* **p. salpingopalatina,** a fold of mucous membrane stretching from the torus tubarius to the palate. **p. salpingopharyngea,** a vertical fold of mucous membrane stretching from the torus tubarius to the pharynx. **p. semilunaris,** a conjunctival fold in the inner canthus of the eye, the rudiment of the nictitating membrane of birds. **p. sublingualis,** a fold of mucous membrane caused by the projection of the sublingual gland. **p. triangularis,** a triangular membrane extending from the upper posterior portion of the anterior faucial pillar backward and downward until lost in the tissues at the base of the tongue. **p. umbilicalis lateralis,** fold of peritoneum covering the obliterated hypogastric artery. **p. umbilicalis media,** a fold of peritoneum covering the urachus. **p. urachi.** Same as *p. umbilicalis media.* **p. vascularis,** a fold of peritoneum containing the spermatic vessels.

plicate (*pli'-kāt*) [*plicare*, to fold]. Folded, plaited.

plication (*pli-ka'-shun*). A plica or fold.

plicotomy (*pli-kot'-o-mē*) [*plica; τομή*, a cutting]. Division of the posterior fold of the tympanic membrane.

Plimmer's bodies (*plim'-er*) [Henry George *Plimmer*, English protozoologist, 1857–1918]. Intracellular bodies observed by Plimmer in cancerous tissue. **P.'s salt,** antimony and sodium tartrate, used in treatment of trypanosomiasis.

pliophite (*pli'-o-fīt*) [*πλείων*, more; *φύω*, produce]. Rich in reserve food-substance; said of a cell.

plomb (*plum*) [Fr., *plomber*, to plug a tooth]. A filling for a cavity. **p., iodoform** (of Mosetig-Moorhof), an antibacillary agent for filling bone-cavities after operations for tuberculosis or osteomyelitis. It consists of iodoform, spermaceti, and oil of sesame, which are sterilized, heated, and poured into the cavity, when the mixture solidifies and fills it.

ploration (*plo-ra'-shun*) [*plorare*, to weep]. Lacrimation.

plough-share (*plow'-shār*). The vomer.

plug. 1. Something that occludes a circular opening or channel. 2. To fill a tooth cavity 3 The filling of a tooth cavity. **p., cervical.** Synonym of *p., mucous.* **p., kite-tail,** a tampon resembling a kite-tail. **p., mucous,** the mass of inspissated mucus which occludes the cervix uteri during pregnancy and is discharged at the beginning of labor. **p.s, Dittrich's.** See under *Dittrich.*

Plugge's phenol reaction (*plu'-geh*). A dilute phenol solution is rendered intensely red on boiling with a solution of mercuric nitrate containing a trace of nitrous acid. Metallic mercury is separated at the same time, and an odor of salicylol is given off

plugger (*plug'-ur*). An instrument for the insertion and impaction of fillings in tooth cavities.

plugging (*plug'-ing*). See *tampon.* **p. instruments,** dental instruments for introducing and consolidating fillings. **p. teeth.** See *filling teeth.*

plumbago (*plum-ba'-go*). See *graphite.*

plumbi (*plum'-bi*). Genitive of Latin *plumbum*, lead.

plumbic (*plum'-bik*) [*plumbum*]. Pertaining to or containing lead.

plumbism (*plum'-bizm*) [*plumbum*]. Lead-poisoning.

plumbite (*plum'-bīt*). General term for a compound formed by union of lead oxide with a base.

plumbum (*plum'-bum*) [L.]. Lead, a bluish-white metal occurring in nature chiefly as the sulphide, PbS, known as galena; atomic weight 207.10; sp. gr. 11.38; quantivalence II and IV; symbol Pb. The salts of lead are poisonous, producing, in sufficient doses, gastroenteritis; ingested in small quantities over a long period of time chronic lead-poisoning is produced. See *lead-poisoning.* **plumbi acetas** (U. S. P.), lead acetate, $Pb(C_2H_3O_2)_2.3H_2O$. It is used as an astringent in diarrhea and dysentery, as a hemostatic, and as an astringent and sedative in gonorrhea, leukorrhea, conjunctivitis, etc. Dose 1–3 gr. (0.065–0.2 Gm.). Syn., *sugar of lead.* **plumbi carbonas,** lead carbonate, white lead, $(PbCO_3)_2.Pb(OH)_2$, is used as a local sedative in ointments and in face-powders. The prolonged use of the latter has caused poisoning. **plumbi chloridum,** lead chloride, $PbCl_2$, is used like the carbonate. **plumbi, emplastrum** (U. S. P.), lead plaster, is made of lead acetate, soap, and water, and is used as an external application to irritated surfaces, and in the arts for glazing pottery and as an ingredient of fluid glass. Combined with olive-oil it constitutes *unguentum diachylon* (U. S. P.). **plumbi iodidum** (U. S P.), lead iodide, PbI_2, is used as a local astringent and absorbent. **plumbi nitras** (U. S. P.), lead nitrate, $Pb(NO_3)_2$, is used locally as a sedative to excoriated surfaces, as sore nipples, chapped hands; in gonorrhea and leukorrhea; in onychia maligna, etc. *Ledoyen's disinfecting fluid* is a solution of lead nitrate of the strength of one dram to the ounce **plumbi oxidum** (U S. P.), lead oxide or litharge, PbO, is used in the making of lead plaster. **plumbi oxidum rubrum,** red lead, minium, is used extensively in the arts as a paint and in the manufacture of glass. **plumbi subacetas,** lead subacetate, is a basic salt. **plumbi subacetatis, ceratum** (U. S. P.), is made up of lead subacetate, wool-fat, paraffin, white petrolatum, and camphor **plumbi subacetatis, liquor** (U. S. P., B. P.), Goulard's extract. **plumbi subacetatis, liquor, dilutus** (U. S. P., B. P.), lead-water, is used as a sedative and astringent in inflammations and burns **plumbi tannas,** lead tannate, is used as a sedative astringent.

Plummer's disease (*plum'-er*) [Henry S *Plummer*, American physician, –1874]. Adenomata with hyperthyroidism

Plummer's pill (*plum'-er*) [Andrew *Plummer*, Scotch physician, –1756]. Compound pill of calomel and antimony. See under *antimony.*

plumose, plumous (*ploo'-mōs, ploo'-mus*) [*pluma*, feather]. Having feathers; feathery; feathered; denoting a feathery growth of bacteria.

plumper (*plum'-per*). One of a pair of pads worn in the hollow of the cheeks to give them a rounded appearance; sometimes attached to a set of artificial teeth.

plumula (*ploo'-mū-lah*) [*plumula*, a little feather; *pl., plumulæ*]. Minute transverse furrows on the roof of the aqueduct of Sylvius.

Plunkett's caustic, or **ointment** (*plunk'-et*). A caustic paste composed of the bruised plant of *Ranunculus acris* and of *R. flammula*, each 24 parts; arsenous acid, 3 parts; sulphur, 5 parts. These are mixed into a paste, rolled into balls.

and dried in the sun. When used the ball must be reduced to a pasty consistence by rubbing with yolk of egg.

pluriceptor (*ploo-re-sep'-tor*) [*plus*, more; *capere*, to take]. A receptor with more than two complementophile groups.

pluricordonal (*ploo-ri-kord'-on-al*) [*plus*, more; *horda*, a string]. Having several processes.

plurifetation (*ploo-ri-fe-ta'-shun*) [*plus*, more; *fetus*]. The conception of twins, triplets, etc.

pluriglandular (*ploo-re-glan'-dū-lar*). Referring to more than one gland or to the secretions of more than one gland. **p. extract**, a glycerin extract of the thyroid, parathyroids, pituitary, and ovaries of sheep, and testicles of cocks; it is given hypodermatically in the gluteal region in neu asthenia and similar conditions.

plurigravida (*ploo-re-grav'-id-ah*) [*plus*, more: *gravida*, pregnant]. Multigravida.

plurilocular (*ploo-ri-lok'-ū-lar*) [*plus*, more; *loculus*, a cell]. Having more than one cell or loculus; multilocular.

pluripara (*ploo-rip'-ar-ah*). See *multipara*.

pluriparity (*ploo-rip-ar'-it-e*) [*plus*, more; *parere*, to bring forth]. The condition of having borne several children.

pluriseptate (*ploo-ris-ep'-tāt*) [*plus*, more; *septum*, a partition]. Having more than one septum or partition.

plutomania (*ploo-to-ma'-ne-ah*) [μλοῦτος, wealth; μανία, madness]. An insane belief that one is the possessor of great wealth.

pluviometric (*ploo-ve-o-met'-rik*) [*pluvia*, rain; μέτρον, a measure]. Relating to the measurement of rain-falls.

pnein (*ne'-in*) [πνέιν, to breathe]. A thermostabile substance found in most tissues, and which accelerates their primary respiration processes.

pneocardiac reflex (*ne-o-kar'-de-ak*) [πνέιν, to breathe; κάρδια, heart]. The inhalation of an irritating vapor causes a change in the cardiac rhythm or the blood pressure.

pneodynamics (*ne-o-di-nam'-iks*) [πνεῖν, to breathe; δύναμις, power]. The dynamics of respiration.

pneogaster (*ne'-o-gas-ter*) [πνεῖν, to breathe; γαστήρ, stomach]. In biology, the respiratory tract.

pneograph (*ne'-o-graf*) [πνεῖν, to breathe; γράφειν, to write]. An instrument for recording the force and character of the current of air during respiration.

pneometer (*ne-om'-et-er*). Synonym of *spirometer*.

pneophore (*ne'-o-fōr*) [πνεῖν, to breathe; φορός, carrying]. An instrument to aid artificial respiration in the asphyxiated.

pneopneic reflex (*ne-op-ne'-ik*) [πνέιν, to breathe]. The inhalation of an irritating vapor causes a change in the respiratory rhythm.

pneoscope (*ne'-o-skōp*) [πνεῖν, to breathe; σκοπεῖν, to examine]. An instrument for measuring respiratory movements.

pneuma (*nū'-mah*) [πνεῦμα, breath]. 1. Air; a breath. 2. The vital principle.

pneumameter (*nū-mam'-et-er*) [πνεῦμα, air; μέτρον, measure]. An appliance for exercising the lungs, used in the after-treatment of empyema; it is fitted with scale which indicates the air capacity of the lungs.

pneumarthrosis (*nū-mar-thro'-sis*) [πνεῦμα, air; ἄρθρον, a joint]. A collection of air or gas in a joint.

pneumascope (*nu'-mah-skōp*). See *pneumatoscope*.

pneumascos (*nū-mas'-kos*) [πνεῦμα, air, σάκος; sack]. Air in the peritoneal cavity; pneumoperitoneum.

pneumatelectasis (*nū-mat-el-ek'-tas-is*). Atelectasis of the lungs.

pneumathemia (*nū-ma-the'-me-ah*) [πνεῦμα, air; αἷμα, blood]. The presence of air or gas in the blood-vessels.

pneumatic (*nū-mat'-ik*) [πνεῦμα, air]. 1. Pertaining to air or gas. 2. Pertaining to respiration. 3. Pertaining to compressed or rarefied air. **p. cabinet**, a cabinet for treating a part by compressed or rarefied air. **p. speculum**. See *Siegle's speculum*. **p. trough**, a trough partly filled with water for facilitating the collection of gases.

pneumatics (*nū-mat'-iks*) [πνεῦμα, air]. The branch of physics treating of the physical properties of air and gases.

pneumatinuria (*nū-mat-in-ū'-re-ah*). See *pneumaturia*.

pneumato- (*nū-mat-o-*) [πνεῦμα, air]. A prefix denoting pertaining to air, gas, or breath.

pneumatocardia (*nū-mat-o-kar'-de-ah*) [*pneumato-*; καρδία, heart]. The presence of air or gas in the chambers of the heart.

pneumatocele (*nū-mat-o-sēl*) [*pneumato-*; κήλη, tumor]. 1. A swelling containing air or gas. 2. See *pneumonocele*. 3. A swelling of the scrotum produced by the presence of gas.

pneumatochemical (*nū-mat-o-kem'-ik-al*). 1. Relating to the chemistry of gases. 2. Relating to the treatment of pulmonary disease by inhalation of medicated vapors. **p. apparatus of Priestley**. See *pneumatic trough*.

pneumatodyspnea, pneumatodyspnœa (*nū-mat-o-disp'-ne-ah*) [*pneumato-*; *dyspnea*]. Emphysematous dyspnea.

pneumatogeny (*nū-mat-oj'-en-e*) [*pneumato-*; γενν̄ᾶν, to produce]. Artificial respiration.

pneumatogram (*nū-mat'-o-gram*) [*pneumato-*; γράμμα, inscription]. A tracing showing the frequency, duration, and depth of the respiratory movements.

pneumatograph. See *pneumograph*.

pneumatology (*nū-mat-ol'-o-je*) [*pneumato-*; λόγος, science]. 1. The science of respiration. 2. The science of gases; also their use as therapeutic agents.

pneumatometer (*nū-mat-om'-et-er*). An instrument for measuring the pressure of inspiration or expiration by the force exerted upon a mercuric column contained in a U-tube.

pneumatometry (*nū-mat-om'-et-re*) [*pneumato-*; μέτρον, measure]. 1. The measurement of the force in respiration. It is used as a means of diagnosis. 2. The treatment of pulmonary and circulatory diseases by means of a pneumatic apparatus.

pneumatomphalocele (*nū-mat-om-fal'-o-sēl*) [*pneumato-*; ὀμφαλός, navel; κήλη, tumor]. An umbilical hernia containing flatus.

pneumatorrhachis (*nū-mat-or'-a-kis*) [*pneumato-*; ῥάχις, spine]. The presence of air in the spinal canal

pneumatoscope (*nū'-mat-o-skōp*) [*pneumato-*; σκοπεῖν, to examine]. 1. An apparatus for measuring the gas in expired air. 2. An instrument for internal auscultation of the thorax. 3. An instrument for determining the presence of foreign bodies in the mastoid sinuses. 4. See *pneumograph*.

pneumatosis (*nū-mat-o'-sis*) [πνεῦμα, air]. The presence of gas or air in abnormal places, or in

an excessive quantity where a little exists normally. **p. abdominis,** tympanites.

pneumatotherapy (*nū-mat-o-ther'-ap-e*) [*pneumato-; θεραπεία,* treatment]. The treatment of diseases by means of compressed or rarefied air.

pneumatothorax (*nū-mat-o-tho'-raks*). See *pneumothorax.*

pneumaturia (*nū-mat-u'-re-ah*) [*pneumato-; οὖρον,* urine]. The evacuation of urine containing free gas.

pneumatype (*nū'-mat-īp*) [*πνεῦμα,* air; *τύπος,* type]. Breath-picture. The deposit formed upon a piece of glass by the moist air exhaled through the nostrils when the mouth is closed. It is employed in the diagnosis of nasal obstruction. Slate-paper may be used, pulverized sulphur or boric acid being blown upon the moistened surface to make a permanent record.

pneumectomy (*nū-mek'-to-me*). See *pneumonectomy*

pneumin (*nū'-min*) [*πνεῖν,* to breathe]. A thermostabile substance found in most tissues, and which accelerates their primary respiration processes.

pneumo- (*nū-mo-*). The same as *pneumono-.*

pneumoarctia (*nū-mo-ark'-te-ah*) [*pneumo-; arctare,* to contract]. Contraction of the lungs; pneumonostenosis.

pneumobacillin (*nū-mo-bas-il'-in*). A toxic extract of pneumobacilli.

pneumobacillus (*nū-mo-bas-il'-us*). The *Bacillus pneumoniæ.*

pneumobacterine (*nū-mo-bak'-ter-ēn*). A vaccine obtained from cultures of the *pneumococcus.*

pneumobulbar (*nū-mo-bul'-bar*) [*pneumo-; bulb*]. Pertaining to the lungs and to the respiratory center in the medulla.

pneumocace (*nū-mok'-as-e*) [*pneumo-; κακός,* evil]. Gangrene of the lung.

pneumocele (*nū'-mo-sēl*). See *pneumatocele.*

pneumocentesis (*nū-mo-sen-te'-sis*) [*pneumo-; κέντησις,* puncture]. Paracentesis of the lung, especially for the purpose of evacuating a cavity.

pneumocephalus (*nū-mo-sef'-a-lus*) [*pneumo-; κεφαλή,* head]. The presence of air or gas within the cranial cavity.

pneumochemical. See *pneumatochemical.*

pneumochirurgia (*nū-mo-ki-rur'-je-ah*) [*pneumo-; χειρουργία,* surgery]. Surgery of the lungs.

pneumochysis (*nū-mok'-is-is*) [*pneumo-; χύσις,* a pouring]. Pulmonary edema.

pneumococcal (*nū-mo-kok'-al*). Pertaining to or caused by pneumococci.

pneumococcemia, pneumococcæmia (*nū-mo-kok-se'-me-ah*) [*pneumococcus; αἷμα,* blood]. The presence of pneumococci in the blood.

pneumococcia (*nū-mo-kok'-se-ah*). Generalized infection by pneumococci.

pneumococcus (*nū-mo-kok'-us*). Any micrococcus of the lung; especially the *micrococcus lanceolatus.*

pneumocolon (*nū-mo-ko'-lon*) [*πνεῦμα,* air; *colon*]. Distension of the colon, as a diagnostic measure.

pneumoconiosis (*nū-mo-kon-e-o'-sis*). See *pneumonokoniosis.*

pneumoderma (*nū-mo-der'-mah*) [*pneumo-; δέρμα,* skin]. Subcutaneous emphysema.

pneumodynamics (*nū-mo-di-nam'-iks*). Pneodynamics.

pneumoenteritis (*nū-mo-en-ter-i'-tis*) [*pneumo-; enteritis*]. Inflammation of the lungs and of the intestine. See hog-cholera.

pneumoerysipelas (*nū-mo-er-e-sip'-el-as*). Pneumonia associated with erysipelas.

pneumogalactocele (*nū mo-gal-ak'-to-sēl*) [*pneumo-; galactocele*]. A galactocele containing gas.

pneumogastric (*nū-mo-gas'-trik*) [*pneumo-; γαστήρ,* stomach]. 1. Pertaining conjointly to the lungs and the stomach. 2. Pertaining to the pneumogastric or vagus nerve. **p. nerve.** See under *nerve.*

pneumogram (*nū'-mo-gram*) [*pneumo- γράμμα,* writing]. The tracing afforded by the pneumograph.

pneumograph *nū'-mo-graf*) [*pneumo-; γράφειν,* to write]. An instrument for recording the movements of the chest in respiration.

pneumography (*nū-mog'-ra-fe*) [ee *pneumograph*]. A description of the lungs.

pneumohæmorrhagia, pneumohemorrhagia (*nū-mo-hem-or-aj'-e-ah*) [*pneumo-; hemorrhage*]. Hemorrhage into the air cells of the lung; pulmonary apoplexy.

pneumohemopericardium (*nū-mo-hem-o-per-e-kar'-de-um*) [*pneumo-; αἷμα,* blood; *pericardium*]. The presence of air and blood in the pericardium.

pneumohemothorax (*nū-mo-hem-o-tho'-raks*). A collection of air or gas and blood in the pleural cavity.

pneumohydrometra (*nū-mo-hi-dro-me'-trah*) [*pneumo-; hydrometra*]. Hydrometra associated with the generation of gas in the uterus.

pneumohydropericardium (*nū-mo-hi-dro-per-e-kar'-de-um*) [*pneumo-; ὕδωρ,* water; *pericardium*]. An accumulation of air and fluid in the pericardial sac.

pneumohydrothorax (*nū-mo-hi-dro-tho'-raks*). A collection of air or gas and fluid in the pleural cavity.

pneumohypoderma (*nū-mo-hi-po-der'-mah*) [*pneumo-; ὑπο,* under; *δέρμα,* skin]. Subcutaneous emphysema.

pneumokidney (*nū'-mo-kid-ney*) [*πνεῦμα,* air; *kidney*]. Pyclography in which oxygen is used instead of the ordinary opaque solution.

pneumokoniosis. See *pneumonokoniosis.*

pneumolith (*nū'-mo-lith*) [*pneumo-; λίθος,* a stone]. A calculus of the lung.

pneumolithiasis (*nū-mo-lith-s'-as-is*) [*pneumo-; λίθος,* stone]. The formation of pneumoliths.

pneumology (*nū-mol'-o-je*) [*pneumo-; λόγος,* science]. The sum of scientific knowledge concerning the lungs and air-passages.

pneumolysis (*nū-mol'-is-is*) [*pneumo-; λύσις,* a loosening]. Loosening from the intrathoracic fascia of thickened pleura which causes contraction of the lung.

pneumomalacia (*nū-mo-mal-a'-se-ah*) [*pneumo-; μαλακία,* softness]. Abnormal softness of the lung.

pneumomassage (*nū-mo-mas-sahzj'*) [*pneumo-; μάσσειν,* to knead]. The application of massage or passive motion to the tympanic membrane and auditory ossicles by pneumatic means.

pneumomelanosis. See *pneumonomelanosis.*

pneumometer, pneumatometer, pneumomometer (*nū-mom'-et-er, nū-mat-om'-et-er, nū-mo-mom'-et-er*). Synonyms of *spirometer.*

pneumometry, pneumatometry (*nū-mom'-et-re, nū-mat-om'-et-re*) [*pneumo-; μέτρον,* a measure]. 1. The measurement of the force of respiration. 2. The treatment of pulmonary and circulatory diseases by means of a pneumatic apparatus.

pneumomycosis (*nū-mo-mi-ko'-sis*). A disease of the lungs due to fungi.

pneumon- (*nū'-mon*) [*πνεύμων,* lung]. A prefix denoting connection with or relation to the lungs.

pneumonalgia (*nū-mo-nal'-je-ah*) [*pneumon-*, ἄλγος, pain]. Pain in the lung.

pneumonatelectasi (*nū-mon-at-el-ek'-tas-is*) [*pneumon-; atele tasis*]. Atelectasis of the lung.

pneumonectasia, pneumonectasis (*nū-mon-ek-ta'-ze-ah, nū-mon-ek'-tas-is*) [*pneumono-*; ἔκτασις, distention]. Emphysema of the lung.

pneumonectomy (*nū-mon-ek'-to-me*) [*pneumono-*; ἐκτομή, excision]. Excision of a portion of a lung.

pneumonedema (*nū-mon-e-de'-mah*) [*pneumon-; edema*]. Edema of the lungs.

pneumonemia, pneumonæmia (*nū-mon-e'-me-ah*) [*pneumon-; αἷμα*, blood]. Congestion of the lungs.

pneumonemphraxis (*nū-mon-em-fraks'-is*) [*pneumon-; ἔμφραξις*, obstruction]. Obstruction of the lungs or the bronchi.

pneumonemphysema (*nū-mon-em-fiz-e'-mah*) [*pneumo-; ἐμφύσημα*, inflation]. Emphysema of the lungs.

pneumonia (*nū-mo'-ne-ah*) [πνεύμων, lung]. Inflammation of the lung; pneumonitis Used without qualification, the term implies lobar pneumonia (*q. v.*). **p., abortive,** acute congestion not followed by other stages. **p., acute,** lobar pneumonia, most often due to a specific microorganism. **p., alcoholic,** the croupous pneumonia of drunkards, often associated with delirium, and very fatal. **p., anthrax,** pulmonary anthrax. **p., apex-, p., apical,** croupous pneumonia of the apex of a lung. **p., aspirations,** a bronchopneumonia due to the inspiration of food-particles or other irritant substances into the lung. **p., bronchial, p., catarrhal.** Synonym of *bronchopneumonia*. **p., central,** a croupous pneumonia beginning in the interior of a lobe of the lung. The physical signs are obscure until the inflammation reaches the surface. **p., cerebral,** a form associated with marked cerebral symptoms. It is most common in children, and in the beginning resembles meningitis. **p., cheesy.** See *p., desquamative*. **p., chronic.** See *p. interstitial*. **p., contusion,** that following contusion of the chest. **p., core,** central pneumonia. **p. croupous.** See *p. lobar*. **p., deglutition-.** Synonym of *p., aspiration-*. **p., desquamative,** a form characterized chiefly by an intense desquamation of the cells lining the air-vesicles, a proliferation of the connective-tissue cells of the septa between the vesicles, and the exudation of a scanty albuminous fluid. The exudate generally undergoes caseous degeneration. **p., disseminated,** bronchopneumonia. **p., double,** lobar pneumonia of both lungs. **p., embolic,** pneumonia due to embolism of the vessels of the lung. **p., ephemeral,** congestion of the lungs. **p., fibrinous.** See *p., lobar*. **p., fibroid, p., fibrous.** Synonym of *p., interstitial*. **p., gangrenous,** gangrene of the lung. **p., hypostatic,** a lobular pneumonia occurring in the dependent portions of the lungs of persons debilitated by age or disease, and depending on the weakened circulation and respiration and the dorsal decubitus. **p., indurative.** See *p., desquamative*. **p., insular.** Synonym of *bronchopneumonia*. **p., interstitial,** a chronic inflammation of the lung characterized by an increase of the connective tissue. Syn., *cirrhosis of the lung; fibroid pneumonia*. **p., larval,** that presenting only initial symptoms. **p., lobar,** an acute infectious disease characterized by an inflammation of one or more lobes of the lung, the affected parts becoming consolidated, owing to the exudation of cells and fibrin into the air-vesicles. The exciting cause is usually *Diplococcus pneumoniæ* of Fränkel, but other microorganisms may produce it. Syn., *croupous pneumonia; lung-fever*. **p., lobular.** Synonym of *bronchopneumonia*. **p., massive,** lobar pneumonia in which not only the air-cells, but the bronchi of an entire lobe, or even of a lung, are filled with the fibrinous exudate. **p. migrans, p., migratory,** a form involving one lobe after another. **p., pleuritic,** pleuropneumonia. **p., pleurogenic, p , pleurogenous,** pneumonia secondary to disease of the pleura. **p., purulent,** one characterized by the formation of pus, it appears under three forms, suppuration of the minute bronchi and air-vesicles—purulent catarrh; true abscess of the lung; suppurative lymphangitis and perilymphangitis. **p., septic,** lobular pneumonia due to the inspiration of septic material or to septic emboli. **p., superficial,** that restricted to parts near the pleura. **p., syphilitic,** inflammation of the lung due to syphilis and manifesting itself as the white pneumonia of the fetus; as gumma of the lung; as interstitial pneumonia, taking its origin at the root of the lung and passing along the bronchi and vessels; and as acute syphilitic phthisis, analogous to acute pneumonic phthisis. **p., tubular.** Synonym of *bronchopneumonia* **p., typhoid,** that attended with typhoid symptoms. **p. vera,** lobar pneumonia not complicated with other diseases or forms. **p., vesicular,** bronchopneumonia. **p. wandering,** that which affects different parts of the lung in succession and seems to be associated with erysipelas. **p., white,** a catarrhal form of pneumonia occurring in a syphilitic fetus and resulting in death. By an overgrowth of epithelium in the air-vesicles the cells die, and fatty degeneration follows, giving the lungs a white appearance, with the imprint of the ribs on their surface.

pneumonic (*nū-mon'-ik*) [see *pneumonia*] Pertaining to the lungs or to pneumonia. **p. phthisis,** tuberculosis affecting a whole lobe of the lung

pneumonitis (*nū-mon-i'-tis*). Pneumonia.

pneumono- (*nū-mon-o-*) [πνεύμων, lung]. A prefix denoting pertaining to the lungs.

pneumonocace (*nu-mon-ok'-as-e*) [*pneumono-*; κακός, evil]. Gangrene of the lung.

pneumonocele (*nū'-mon-o-sēl*) [*pneumono-*; κήλη, hernia]. Hernia of the lung.

pneumonocentesis (*nū-mon-o-sen-te'-sis*). Same as *pneumocentesis*.

pneumonochirurgia (*nū-mo-no-ki-rur'-ie-ah*) [*pneumono-*; χειρουργεια, surgery]. Surgery of the lungs.

pneumonocirrhosis (*nū-mon-o-sir-o'-sis*) [*pneumono-; cirrhosis*]. Cirrhosis of the lung, interstitial pneumonia.

pneumonodynia (*nū-mon-o-din'-e-ah*) [*pneumono-*; ὀδύνη, pain] Pain referred to the lungs.

pneumonoenteritis (*nū-mo-no-en-ter-i'-tis*) [*pneumono-*; enteritis]. Pneumonia associated with enteritis.

pneumonoerysipelas (*nū-mo-no-er-e-sip'-e-las*). Pneumonia associated with erysipelas.

pneumonokoniosis (*nū-mon-o-kon-e-o'-sis*) [*pneumono-*; κόνις, dust]. A general term applied to chronic induration or fibrous inflammation of the lungs due to the inhalation of dust. Various names are given to it according to the kind of dust causing the inflammation: *anthracosis*, that

due to the inhalation of coal-dust; *siderosis*, that due to inhalation of metallic dust; *chalicosis*, that due to the inhalation of mineral dust.

pneumonolithiasis (*nū-mon-o-lith-ī'-as-is*) [*pneumono-*; λίθος, stone]. The formation of pneumoliths.

pneumonolysis (*nū-mon-ol'-is-is*). Same as *pneumolysis*.

pneumonomelanosis (*nū-mon-o-mel-an-o'-sis*) [*pneumono-*, μέλας, black, νόσος, disease]. Anthracosis of the lung.

pneumonometer (*nū-mon-om'-et-er*). Synonym of *spirometer*.

pneumonomycosis (*nū-mon-o-mī-ko'-sis*). See *pneumomycosis*.

pneumonopaludism (*nū-mo-no-pal'-ū-dizm*). Same as *Bruns's disease*, *q. v.*

pneumonoparalysis (*nū-mon-o-par-al'-is-is*) [*pneumono-*; *paralysis*] Paralysis of the lung.

pneumonopathy (*nū-mon-op'-ath-e*) [*pneumono-*; πάθος, disease]. Any disease of the lung.

pneumonopexy (*nū-mon'-o-peks-e*) [*pneumono-*; πῆξις, a fixing] Fixation of a stump of lung tissue to the thoracic wall in connection with pneumonectomy for gangrene, hernia, or other pulmonary lesion.

pneumonophlebitis (*nū-mon-o-fleb-ī'-tis*) [*pneumono-*, φλέψ, vein, ῑτις, inflammation]. Inflammation of the pulmonary veins.

pneumonophthisis (*nū-mon-off'-this-is*) [*pneumono-*, φθίσις, a wasting]. A destructive process in the lungs.

pneumonopleuritis (*nū-mon-o-ploo-rī'-tis*). Synonym of *pleuropneumonia*.

pneumonorrhagia (*nū-mon-or-a'-je-ah*) [*pneumono-*; ῥηγνύναι, to burst forth]. Hemorrhage from the lungs.

pneumonorrhaphy (*nū-mon-or'-af-e*) [*pneumono-*; ῥαφή, a seam]. Suture of lacerations of the lung.

pneumonosepsis (*nū-mon-o-sep'-sis*) [*pneumono-*; σῆψις, putrefaction]. Septic inflammation of the lung.

pneumonosis (*nū-mon-o'-sis*) [*pneumo-*; νόσος, disease]. Any affection of the lungs.

pneumonostenosis (*nū-mon-o-sten-o'-sis*). Contraction of a lung.

pneumonotherapy (*nū-mo-no-ther'-ap-e*). See *pneumatotherapy* and *pneumotherapy*.

pneumonotomy (*nū-mon-ot'-o-me*) [*pneumo-*; τομή, a cutting]. Surgical incision of the lung.

pneumopaludism (*nū-mo-pal'-ū-dizm*) [*pneumo-*; *paludism*]. A manifestation of malaria characterized by the impairment of the percussion resonance at one apex, bronchial respiratory murmurs, bronchophony, without rales, friction, or expectoration; cough occurs in paroxysms.

pneumoparesis (*nū-mo-par'-es-is*) [*pneumo-*; *paresis*] Progressive congestion of the lungs apparently depending on vasomotor deficiency or other fault of innervation; simple respiratory failure.

pneumopericarditis (*nū-mo-per-ik-ar-dī'-tis*) [*pneumo-*; *pericarditis*]. Pericarditis with the formation of gas in the pericardial sac.

pneumopericardium (*nū-mo-per-e-kar'-de-um*). The presence of air in the pericardial sac. It is due to traumatism or to communication between the pericardium and the esophagus, stomach, or lungs, and is marked by tympany over the precordial region and peculiar metallic heart-sounds.

pneumoperitoneum (*nū-mo-per-it-on-e'-um*) [*pneumo-*; *peritoneum*]. The presence of gas in the peritoneal cavity.

pneumoperitonitis (*nū-mo-per-it-on-ī'-tis*) [*pneumo-*; *peritonitis*]. Peritonitis with the presence of gas in the peritoneal cavity.

pneumopexy (*nū'mo-peks-e*). See *pneumonopexy*.

pneumophthisis (*nū-moff'-this-is*) [*pneumo-*; φθίσις, wasting]. A destructive process in the lung.

pneumophyma (*nū-mo-fī'-mah*) [*pneumo-*; φύμα, growth; *pl.*, *pneumophymata*]. A tubercle of the lung.

pneumophymia (*nū-mo-fī'-me-ah*) [*pneumo-*; φύμα, growth]. Tuberculosis of the lung.

pneumopleuritis (*nū-mo-ploo-rī'-tis*) [*pneumo-*; *pleura*; ῑτις, inflammation]. Conjoined inflammation of the lungs and pleura.

pneumoprotein (*nū-mo-pro'-te-in*). A protein elaborated by pneumococci.

pneumoptysis (*nū-mop'-tis-is*). Same as *hemoptysis*.

pneumopyopericardium (*nū-mo-pi-o-per-e-kar'-de-um*) [*pneumo-*; πῦον, pus; *pericardium*]. The presence of air or gas and pus in the pericardial sac.

pneumopyothorax (*nū-mo-pi-o-tho'-raks*) [*pneumo-*; πῦον, pus; *thorax*]. The presence of air and pus in the pleural cavity.

pneumopyra (*nū-mo-pi'-rah*) [*pneumo-*; πῦρ, fire]. Malignant bronchitis.

pneumorrhachis. See *pneumatorrhachis*.

pneumorrhagia (*nū-mor-a'-je-ah*). See *hemoptysis*.

pneumosan (*nū'-mo-san*). Amyl-thio-trimethylamine chloride; used for intramuscular injection in pulmonary tuberculosis.

pneumoscrotum (*nū-mo-scro'-tum*) [*pneumo-*; *scrotum*]. Emphysema of the scrotum.

pneumosepticemia (*nū-mo-sep-tis-e'-me-ah*). A violent form of influenzal pneumonia.

pneumoserothorax (*nū'-mo-se-ro-tho'-raks*) [*pneumo-*; *serum*; θώραξ, chest]. The presence of air or gas and serum in the pleural cavity.

pneumotherapy (*nū-mo-ther'-ap-e*). 1. The treatment of diseases of the lung. 2. See *pneumatotherapy*.

pneumothermomassage (*nū-mo-ther-mo-mas-ahzy'*) [*pneumo-*; θέρμη, heat; *massage*]. The application to the body of currents of air of varying degrees of pressure and temperature.

pneumothorax (*nū-mo-tho'-raks*). The presence of air or gas in the pleural cavity. It is produced by perforating wounds of the chest, by the rupture of an abscess or tuberculous cavity of the lung, by the rupture of an emphysematous vesicle, or the evacuation of an empyema into the lung or through the chest-wall. It is marked by dyspnea, shock, pain, a tympanitic (sometimes a dull) percussion-note over the affected side, displacement of the heart, bell-tympany, and diminished respiratory murmur.

pneumotomy (*nū-mot'-o-me*) [*pneumo-*; τομή, a cutting]. Surgical incision of the lung. Synonym of *pneumonotomy*.

pneumotoxin (*nū-mo-toks'-in*) [*pneumo-*; τοξικόν, a poison]. A toxin produced by the pneumococcus, and believed to be the cause of many of the symptoms of lobar pneumonia. *Antipneumotoxin* is the antitoxin supposed to exist in the blood of persons convalescent from lobar pneumonia.

pneumotyphoid (*nū-mo-tī'-foid*). Synonym of *pneumotyphus*.

pneumotyphus (*nū-mo-tī'-fus*) [*pneumo-*; *typhus*]. 1. Typhoid fever beginning with pneumonia dependent upon the typhoid bacillus. 2. Pneumonia occurring in the course of typhoid fever

pneumouria (*nū-mo-ū'-re-ah*). See *pneumaturia*.

pneumoventriculography (*nū-mo-ven-trik-ū-log'-raf-e*) [*pneumo-; ventriculography*]. Same as ventriculography, *q. v.*

pneusimeter (*nū-sim'-et-er*) [πνεῦσις, a breathing; μέτρον, a measure]. An apparatus used as a spirometer to measure the vital capacity of the chest in respiration.

pneusis (*nū'-sis*) [πνεῖν, to breathe] Respiration. **p. pertussis.** Synonym of *whooping-cough*.

pnigma (*nig'-mah*) [πνίγειν, to choke]. Strangulation.

pnigophobia (*ni-go-fo'-be-ah*) [πνίγειν, to choke; φόβος, fear]. The fear of choking that sometimes accompanies angina pectoris.

pnigos, pnix, pnixis (*ni'-gos, niks, niks'-is*). Synonyms of *pnigma*.

pock (*pok*) [AS., *poc*, a pustule]. A pustule of an eruptive fever, especially of smallpox. **p.-marked,** marked with the cicatrices of the smallpox pustule.

pocked (*pokt*). Pitted; marked with pustules.

pocket (*pok'-et*). In anatomy, a blind sac, or sac-shaped cavity. A diverticulum communicating with a cavity.

pocketing (*pok'-et-ing*). A mode of treating the pedicle in the operation of ovariotomy. It is accomplished by bringing the extremity of the pedicle between the inner lips of the incision, at its lower angle, thus securing its attachment to the raw surface of the abdominal wall.

pocky (*pok'-e*). Having pocks or pustules; infected with variola or syphilis.

poculent (*pok'-ū-lent*) [*poculum*, a goblet]. Drinkable; potable.

poculum (*pok'-ū-lum*) [*potare*, to drink]. 1. A drinking cup. 2. A draught or potion. **p. Diogenis** (*di-oj'-en-is*), the palm of the hand when held so as to form a cup-like cavity.

podagra (*pod-ag'-rah*) [πούς, foot; ἄγρα, seizure]. Gout, especially of the great toe or the joints of the foot.

podagral (*pod'-ag-ral*) [*podagra*]. Pertaining to podagra; gouty.

podalgia (*pod-al'-je-ah*) [πούς, foot; ἄλγος, pain]. Pain in the foot.

podalic (*pod-al'-ik*) [πούς, foot]. Pertaining to the feet. **p. version,** the operation of changing the position of the fetus in the uterus so as to bring the feet to the outlet.

podarthral (*pod-ar'-thral*) [πούς, foot; ἄρθρον, a joint]. Pertaining to the podarthrum.

podarthritis (*pod-ar-thri'-tis*) [πούς, foot; ἄρθρον, joint; ῖτις, inflammation]. Inflammation of the joints of the feet.

podarthrocace (*pod-ar-throk'-as-e*) [πούς, foot; ἄρθρον, joint; κακός, evil]. Caries of the articulations of the feet.

podarthrum (*pod-ar'-thrum*) [πούς, foot; ἄρθρον, a joint; *pl.*, *podarthra*]. In biology, the foot-joint or metatarso-phalangeal articulation.

podedema (*pod-e-de'-mah*) [πούς, foot; *edema*]. Edema of the foot.

podelcoma (*pod-el-ko'-mah*). See *Madura foot*.

podencephalus (*pod-en-sef'-al-us*) [πούς, foot; ἐγκέφαλος, brain]. A variety of monster of the species exencephalus, in which there is a protrusion of the cranial contents from the top of the head.

podiater (*pod-i'-at-er*). Podiatrist.

podiatrist (*pod-i'-at-rist; pod-e-at'-rist*) [πούς, a foot; ἰατρός, physician]. A specialist in the treatment of diseases of the feet.

podiatry (*pod-i'-at-re*). Treatment of disorders of the feet; chiropody.

podobromidrosis (*pod-o-brom-id-ro'-sis*) [πούς, foot; βρῶμος, stench; ἱδρῶς, sweat]. Offensive sweating of the feet.

pododynamometer (*pod-o-di-nam-om'-et-ur*) [πούς, a foot; *dynamometer*]. An apparatus for testing the strength of the muscles of the feet or legs.

pododynia (*pod-o-din'-e-ah*) [πούς, foot; ὀδύνη, pain]. Pain in the foot, especially a neuralgic pain in the heel unattended by swelling or redness.

podogram (*pod'-o-gram*) [πούς, foot; γράμμα, a drawing]. An outline tracing or imprint of the sole of the foot.

podograph (*pod'-o-graf*) [πούς, foot; γράφειν, to write]. An apparatus for recording an outline of the sole of the foot.

podology (*pod-ol'-o-je*) [πούς, foot; λόγος, science]. Study of anatomy and physiology of the foot.

podometer. See *pedometer*.

podophyllin (*pod-o-fil'-in*). See *podophyllum*.

podophylloresin (*pod-o-fil-o-rez'-in*). See *podopodophyllum, resin of*.

podophyllotoxin (*pod-o-fil-o-toks'-in*). See under *podophyllum*.

podophyllum (*pod-o-fil'-um*) [πούς, foot; φύλλον, leaf] The dried rhizome of *P. peltatum*, the May-apple or mandrake, of the family *Berberidaceæ*. Its resin, commonly called *podophyllin*, contains *podophyllotoxin* ($C_{21}H_{22}O_8 + 2H_2O$), which upon treatment with ammonia yields podophyllic acid and picropodophyllin. It is used in medicine as a laxative in chronic constipation and as a cathartic in hepatic congestion and bilious fever. Dose of *podophyllotox n* ¼–½ gr. (0.016–0.03 Gm.). **p., fluidextract of** (*fluidextractum podophylli*, U. S. P.). Dose 2–20 min. (0.13–1.3 Cc). **p., pills of, belladonna, and capsicum** (*pilulæ podophylli, belladonnæ et capsici*, U. S. P.). Dose 1 pill. **p., resin of** (*resina podophylli*, U. S. P.). Dose ¼–½ gr. (0.008–0.03 Gm.). **p., tincture of** (*tinctura podophylli*, B. P.). Dose 15 min.–1 dr. (1–4 Cc.).

podotrochilitis (*pod-o-trok-il-i'-tis*) [πούς, foot; τροχίλια, pulley; ῖτις, inflammation]. Navicular disease; an inflammatory disease of the fore-foot in the horse. Naviculararthritis.

pœ-. For words commencing thus, see *pe-*.

Poehl's test (*pēl*) [Alexander Vasilyevich von *Poehl*, Russian chemist, 1850–]. *For products of bacillus choleræ:* the addition of concentrated sulphuric acid to a culture of cholera bacilli produces a rose color deepening into purple.

pogoniasis (*po-go-ni'-as-is*) [πώγων, beard]. Excessive growth of the beard; growth of beard in a woman.

pogonion (*po-go'-ne-on*) [πώγων, beard]. The most anterior point of the chin on the symphysis of the mandible.

pogonium (*po-go'-ne-um*) [πώγων, beard]. 1. A small beard. 2. Same as *pogonion*.

Pohl's test for globulus. Saturate the solution to one-half with ammonium sulphate, which precipitates the globulins. After several hours filter, and add to the filtrate a saturated solution of ammonium sulphate.

-poietic (*poi-et'-ik*) [ποίησις, a making]. A termination denoting making or producing, as in *hematopoietic*.

poikilionia (*poi-kil-i-o'-ne-ah*) [ποικίλος, varied *ion*]. Variation in the hydrogen ion concentration of the blood.

poikiloblast (*poi'-kil-o-blast*). A nucleated red corpuscle of irregular shape and size.

poikilocyte (*poi'-kil-o-sīt*) [ποικίλος, varied; κύτος, a cell]. A large red blood-corpuscle of irregular shape.

poikilocythemia (*poi-kil-o-si-the'-me-ah*) [ποικίλος, varied; κύτος, cell; αἷμα, blood]. The presence of poikilocytes in the blood.

poikilocytosis (*poi-kil-o-si-to'-sis*) [*poikilocyte*]. A condition of the blood characterized by the presence of poikilocytes; variation in the shape of the red blood corpuscles.

poikiloderma atrophicans vasculare (*poi-kil-o-der'-mah at-rof'-e-kans vas-kū-la'-re*) [ποικίλος, varied; δέρμα, skin]. A pigmented skin lesion, with petechiæ, telangiectasis, ulceration and atrophy; etiology is unknown.

poikilonymy (*poi-kil-on'-im-e*). See *pecilonymy*.

poikilothermal (*poi-kil-o-ther'-mal*). Synonym of *poikilothermic*.

poikilothermic (*poi-kil-o-ther'-mik*) [ποικίλος, varied; θέρμη, heat]. Varying in temperature according to the surroundings; cold-blooded.

poikilothermism (*poi-kil-o-ther'-mizm*). The condition of cold-blooded animals.

point [*punctum*, point, from *pungere*, to prick]. 1. The sharp end of an object, especially one used to pierce anything. 2. The limit at which anything occurs, as the melting-*point*, freezing-*point*. 3. A mark made by a sharp object; a minute spot or area; of an abscess, to come to the surface. **p., boiling,** the degree of temperature at which a liquid passes into the vaporous state with ebullition. **p., cardinal,** one of the six optical points that determine the direction of the rays entering or emerging from a series of refracting media. **p., craniometric.** See *craniometric point*. **p., critical,** *of gases*, a temperature at or above which a gas cannot be liquefied by pressure alone; *of liquids*, that temperature at which a liquid, regardless of the pressure to which it is subjected, assumes a gaseous form. **p., dew-,** the temperature at which the atmospheric moisture is deposited as dew. **p., disparate,** one of those points on the retina whence images are projected, not to the same, but to different points in space. **p. of election,** in surgery, that point at which a certain operation is done by preference. **p., far-,** the remotest point of distinct vision. **p., freezing,** the degree of temperature at which a liquid becomes solid. **p., hysteroepileptogenous, p., hysterogenous.** See *zone, hysterogenous*. **p.'s, lacrimal,** minute orifices of the lacrimal canals upon the eyelids near the inner canthus. **p., malar,** the most prominent point on the outer surface of the malar bone. **p., McBurney's.** See *McBurney's point*. **p., melting,** the degree of temperature at which fusible solids begin to melt. **p., motor.** See *motor*. **p., near-,** the nearest point at which the eyes can accommodate to see distinctly. **p., nodal,** the center of curvature of a spherical lens or refracting surface, through which rays of light pass joining conjugate points. **p., principal,** one of the two points in the optical axis of a lens that are so related that lines drawn from these points to the corresponding points in the object and its image are parallel. **p. of reflection,** the point from which a ray of light is reflected. **p. of refraction,** the point at which a ray of light is refracted. **p., spinous,** a sensitive point over a spinous process. **p., subnasal,** the middle point of the lower border of the nasal orifice. **p., supraclavicular,** the point, stimulation of which causes contraction of the arm muscles. **p.s., Valleix's.** See *Valleix's points*. **p., vital,** a spot in the oblongata corresponding to the seat of the respiratory center, puncture of which causes instant death.

pointillage (*pwan'-te-yahzj*) [Fr.]. Massage by means of the finger-tips.

pointing (*point'-ing*). The coming to a point. **p. of an abscess,** the process by which pus from the deeper structures reaches the surface.

points douloureux (*pwan(g)-doo-loo-roo*). See *Valleix's points*.

Poirier's line. (*pwar-e-a'*) [Paul *Poirier*, French surgeon, 1853–1907]. The nasolambdoid line used in craniocerebral topography. It begins at the nasofrontal groove, and extends outward around the base of the skull, passing 0.5 cm. above the external auditory meatus to a point 1 cm. above the lambdoid suture, or to a point 7 above the inion if the suture cannot be felt. This line passes over Broca's convolution, 4 to 6 cm. of the posterior limb of the Sylvian fissure, the lower border of the supramarginal gyrus, the base of the angular gyrus, and terminates at the occipital fissure.

Poiseuille's law (*pwah-zoo-e'*) [Jean Léonard Marie *Poiseuille*, French physiologist, 1799–1869]. The rapidity of the current in capillary tubes is proportional to the square of their diameter. **P.'s layer, or space** the "inert" layer of the blood-current of the capillaries, in which the leukocytes roll along slowly while the red corpuscles move more rapidly in the axial stream.

poison (*poi'-zn*) [Fr., from *potio*, a draught]. A substance that, being in solution in the blood or acting chemically on the blood, either destroys life or impairs seriously the functions of one or more of its organs. (See the table under this head.) **p., acrid.** See *p., irritant*. **p., acronacrotic,** one that is irritating to the part to which it is applied, but acts on the brain or myelon or both. **p.s., cellular,** cytolysins. **p., irritant,** one that causes irritation at the point of entrance or at the point of elimination. **p., muscle-.** 1. A substance that impairs or destroys the proper functions of muscles 2. A poisonous albumin developed during muscular activity. **p., narcotic,** one affecting the cerebral centers, producing stupor. **p., ordeal-,** any one of the vegetable poisons, such as physostigma, used by savages in the trial of accused persons to determine their guilt or innocence. TABLE OF POISONS (*the antidotes are in italics*): **acid, carbolic.** See *phenol* in this table. **acid, chromic.** See *chromium trioxide* in this table. **acid, hydrochloric** (*muriatic*), *symptoms*, pain throughout digestive tract, vomiting, feeble pulse, clammy skin, collapse, eschars externally, yellow stains on clothing, but none on skin; *treatment, alkalies;* demulcent drinks; oil; stimulants (intravenous injection). **acid, hydrocyanic** (*prussic*), *symptoms*, sudden unconsciousness, slow, labored respirations, slow pulse, staring eyes, purple face, general convulsions, then relaxation and collapse, odor of peach-kernels; death may be almost instantaneous; *treatment*, stomach-tube if possible; dilute ammonia; alternate cold and warm effusions; atropine and cardiac stimulants; artificial respiration. **acid, nitric,** *symptoms*, yellow stains on skin; otherwise similar to *acid, sulphuric; treatment, alkalies; soap;* demulcents; stimulants. **acid, oxalic,** *symptoms*, hot, acrid

taste, burning, vomiting, collapse, sometimes general paralysis, numbness, and stupor; *treatment, lime* or *chalk*. **acid, salicylic,** *symptoms*, mydriasis, quick and deep respiration, delirium, dyspnea, lessened arterial pressure, deafness, olive-green urine. **acid, sulphuric,** *symptoms*, black stains, pain throughout digestive tract, vomiting, often of tarry matter, feeble pulse, clammy skin, profuse and bloody salivation; *treatment, chalk; magnesia; soap;* demulcent drinks. **aconitum napellus** (*monkshood*), **aconite,** *symptoms*, sudden collapse, slow, feeble, and irregular pulse and respirations, tingling in the mouth and extremities, giddiness, great muscular weakness, sometimes pain in the abdomen, pupils generally dilated, but may be contracted, marked anesthesia of skin, mind clear, convulsions at times, *treatment, tannic acid* solution for washing out stomach; *digitalis*, atropine and stimulants; artificial respiration; warmth and friction; absolute quiet in recumbent position. **alcohol,** *symptoms*, confusion of thought, giddiness, tottering gait, slight cyanosis, narcosis from which patient can be aroused; full pulse; deep, stertorous breathing; injection of eyes, dilatation of pupils, low temperature; convulsions may occur; *treatment*, evacuate stomach; coffee; battery; amyl nitrite; hot and cold douches. **ammonium and its compounds,** *symptoms*, intense gastroenteritis, often with bloody vomiting and purging, lips and tongue swollen and covered with detached epithelium, violent dyspnea, characteristic odor; *treatment, vegetable acids*, demulcents **antimony and its compounds,** *symptoms*, metallic taste, violent vomiting, becoming bloody, feeble pulse, pain and burning in the stomach, violent serous purging, becoming bloody, cramps in extremities, thirst, great debility, sometimes prostration, collapse, unconsciousness, and convulsions without vomiting or purging, *treatment, tannic acid;* demulcent drinks; opium; alcohol; external heat **antipyrine** (*phenazon*), *symptoms*, headache, nausea, vomiting, a rash like that of measles, vertigo, drowsiness, deafness, confusion of ideas, cyanosis, collapse; *treatment*, recumbent position; warmth; strychnine; stimulants; oxygen; artificial respiration. **apomorphine,** *symptoms*, violent vomiting, paralysis of motor and sensory nerves, delirium, depression of respiration and of heart; *treatment*, cardiac and respiratory stimulants. **arsenic and its compounds,** *symptoms*, violent burning pain in the stomach, retching, thirst, purging of blood and mucus with flakes of epithelium, tenesmus, suppression of urine; sense of constriction in throat; pulse small and frequent; *treatment, hydrated iron sesquioxide; precipitated iron carbonate;* emetics; castor-oil; demulcents. **atropa belladonna** (*deadly nightshade*) (**atropine belladonna, homatropine**), *symptoms*, heat and dryness of the mouth and throat, pupils widely dilated, scarlet rash, noisy delirium, quick pulse, at first corded, later feeble; rapid respirations, early strong, late shallow and feeble; retention of urine; sometimes convulsions, collapse, and paralysis; *treatment*, evacuate stomach; *tannic acid;* stimulants; coffee; pilocarpine; artificial respiration; physostigmine may be of benefit; evacuation of bladder. **caffeine,** *symptoms*, burning pain in the throat, giddiness, faintness, nausea, numbness, abdominal pain, great thirst, dry tongue, tremor of extremities, diuresis, weak pulse, cold skin, collapse; *treatment*, emetics; stimulants; warmth; morphine and atropine. **calabar-bean.** See *physostigma venenosum* in this table. **camphor,** *symptoms*, characteristic odor, languor, giddiness, disturbance of vision, delirium, convulsions, clammy skin, smarting in the urinary organs, pulse quick and weak, no pain, no vomiting, no purging; *treatment*, evacuate stomach; stimulants; warmth; hot and cold douches, **cannabis indica** (*Indian hemp*), *symptoms*, pleasurable intoxication, sense of prolongation of time, anesthesia with loss of strength, especially in legs, pupils dilated, rapid pulse, heavy sleep; *treatment*, evacuate stomach; stimulants. **cantharis vesicatoria** (*Spanish fly*) (**cantharides**), *symptoms*, burning in mouth and stomach, vomiting and purging, soon becoming bloody, tenesmus, salivation, aching pains in back, strangury, priapism, unconsciousness only very late; convulsions at times; *treatment*, evacuate stomach; demulcent drinks; morphine; hot bath for the strangury; anesthetics may be necessary for the pain. **carbolic acid.** See *phenol* in this table **chloral hydrate,** *symptoms*, deep sleep, loss of muscular power, lividity, reflexes diminished, pulse weak, respirations slowed, pupils contracted during sleep, but dilated on waking, temperature low; *treatment*, evacuate stomach, heat to the extremities; massage; coffee by the rectum; strychnine, amyl nitrite; artificial respiration. **chloroform,** *symptoms*, excitement and intoxication followed by anesthesia and unconsciousness, later profound narcosis; pulse and respirations fail progressively or suddenly; *treatment*, draw tongue forward; artificial respiration, faradic current; hot and cold douches; amyl nitrite; ammonia injected into a vein, evacuation of the stomach if chloroform has been taken by mouth. **chromium trioxide,** *symptoms*, dark-yellow stains, abdominal pain, vomiting and purging, collapse, *treatment*, evacuate stomach; *chalk*, milk, or albumin; demulcent drinks **coal-gas,** *symptoms*, headache, giddiness, loss of muscular power, unconsciousness, pupils dilated, breathing labored, coma, odor of the gas; *treatment*, fresh air; artificial respiration, ammonia; stimulants; oxygen; coffee; hot and cold douches **cocaine,** *symptoms*, faintness, giddiness, nausea, pulse small, rapid, intermittent, dilated pupils, severe prostration, respiration slow and feeble, *treatment*, stimulants, amyl nitrite; artificial respiration. **colchicum autumnale** (*meadow-saffron*), *symptoms*, not unlike those of malignant cholera, griping pain in the stomach, vomiting and continuous purging of seromucous material, intense thirst, muscular cramps, great prostration, collapse, dilated pupils, pain in the extremities; *treatment*, evacuate stomach; *tannic* or *gallic acid;* demulcent drinks; stimulants; morphine. **conium maculatum** (*hemlock*), *symptoms*, weakness of the legs, gradual loss of all voluntary power, nausea, ptosis, dilatation of pupils, inability to speak or swallow; *treatment*, evacuate stomach; *tannic* or *gallic acid;* stimulants; warmth; artificial respiration; atropine **croton tiglium** (*croton oil*), *symptoms*, intense pain in abdomen, vomiting, purging, watery stools, pinched face, small and thready pulse, moist skin, collapse; *treatment*, evacuate stomach; demulcent drinks; camphor; stimulants; morphine; poultices to abdomen. **cyanogen and its compounds.** Similar to *acid, hydrocyanic*, which see in this table. **datura stramonium**

(*thorn-apple, Jamestown weed*), symptoms and treatment similar to those of *atropine*, which see under *atropa belladonna* in this table. **digitalis purpurea** (*Foxglove*), purging, with severe pain, violent vomiting, vertigo, feeble pulse, although heart's action is tumultuous, eyes prominent, pupils dilated, sclera blue, delirium and convulsions, *treatment*, evacuate stomach, *tannic* and *gallic acids;* stimulants, aconite, recumbent position **erythroxylon coca.** See *cocaine* in this table **fly, Spanish.** See *cantharis* in this table **gelsemium sempervirens** (*yellow jasmine*), *symptoms* appear in about twenty minutes, great muscular weakness, diplopia, ptosis, internal squint, widely dilated pupils, dimness of vision, labored respiration, weak pulse, *treatment*, evacuate stomach, atropine, stimulants, artificial respiration, hot and cold douches **hellebore, green and white.** See *veratrum* in this table **hemlock.** See *conium* in this table **iodine and its compounds,** *symptoms*, pain in throat and stomach, vomiting, purging, vomit yellow from iodine, or blue if starch is present in stomach, giddiness, faintness, convulsive movements, *treatment*, evacuate stomach, *starch*, amyl nitrite, morphine **iodoform,** *symptoms*, slight delirium, drowsiness, high temperature, rapid pulse, symptoms resemble meningitis **jaborandi** (*pilocarpine*), *symptoms*, copious sweating, dizziness, salivation, vomiting, diarrhea, tearing pain in eyeballs, myopia, pupils much contracted, *treatment*, evacuate stomach, stimulants, atropine **lead acetate,** *symptoms*, sweet metallic taste, vomiting of white matter, great thirst, pain in abdomen, abdominal muscles usually rigid, constipation or diarrhea with black stools, cramps in the legs, paralysis of the extremities, convulsions, in the chronic forms, a blue line at margin of the gums, *treatment*, evacuate stomach, *dilute sulphuric acid, Epsom* or *Glauber's salts*, milk, morphine, potassium iodide to eliminate the poison **lobelia inflata** (*Indian tobacco*), *symptoms*, severe vomiting, with intense depression and prostration, giddiness, tremors convulsions collapse, *treatment*, evacuate stomach, *tannic* or *gallic acid*, stimulants, strychnine, warmth, recumbent position **mercury bichloride,** *symptoms*, acrid metallic taste, burning heat in throat and stomach, vomiting diarrhea with bloody stools, lips and tongue white and shriveled, pulse small and frequent death in coma or convulsions, pain may be absent, secondary *symptoms*, hectic fever, coppery taste, fetid breath, gums swollen, salivation, *treatment*, albumin in some form raw white of egg or flour, evacuate stomach, opium, potassium iodide **morphine,** See *opium* in this table **nitric acid.** See *acid, nitric*, in this table **nitroglycerin,** *symptoms*, throbbing headache, pulsation over entire body, dicrotic pulse, flushed face, mental confusion, anxiety, sudden collapse, *treatment*, recumbent position, cold to head, ergot, atropine **nux vomica.** See *St Ignatius bean* in this table **opium (morphine, narceine, codeine, laudanum),** *symptoms*, preliminary mental excitement, acceleration of heart, soon weariness, sensation of weight in the limbs, sleepiness, diminished sensibility, pin-point pupils, pulse and respiration slow and strong; patient can be roused with difficulty, later this becomes impossible, reflexes abolished, respiration slow, irregular, and stertorous, pulse rapid and feeble, *treatment* 1 Evacuate stomach with mustard or stomach-tube 2 Arouse patient to maintain respiration by exercise, flagellation with wet towels, cold and hot douches alternately. 3 Stimulate by *atropine*, coffee, alcohol, if pulse fails, external heat; inhalations of oxygen, injection of dilute solution of *potassium permanganate* **oxalic acid.** See *acid, oxalic*, in this table **Paris-green.** See *arsenic* in this table. **phenol,** *symptoms*, immediate burning pain from mouth to stomach, giddiness, loss of consciousness, collapse, partial suppression of urine, which is smoky in color, characteristic odor, white, corrugated patches in mouth; *treatment*, stomach-pump, *magnesium sulphate* or *sodium sulphate*, atropine. **phosphorus,** *symptoms*, vomiting and pain, vomit may be luminous in the dark, characteristic odor, after several days deep jaundice, coffee-colored vomit, hepatic tenderness, albuminuria, marked fall in temperature, coma, failure of pulse and respiration, *treatment, sulphate of copper* as an emetic, then as an antidote in small doses with opium, purgation **physostigma venenosum** (*calabar-bean*), *symptoms*, giddiness, prostration, loss of power in the lower limbs, muscular twitching, contracted pupils, mind clear; *treatment*, evacuate stomach, *atropine*, strychnine, stimulants, artificial respiration **prussic acid.** See *acid, hydrocyanic*, in this table **santonin,** *symptoms*, disturbance of color-vision—objects first assume a bluish tinge, then yellow, tinnitus, dizziness, pain in the abdomen, failure of respiration, convulsions, stupor, *treatment*, evacuate stomach, stimulants, chloral **savin,** *symptoms*, pain, vomiting, bloody stools and tenesmus, disordered respirations, coma, convulsions, and collapse, *treatment*, evacuate stomach, castor-oil in large dose, morphine poultices to the abdomen **silver salts,** *symptoms*, pain, vomiting, and purging, vomit white and cheesy, rapidly turning black in the sunlight, vertigo, coma, convulsions, paralysis, and marked disturbance of respiration; *treatment, salt* and water, evacuate stomach, a large amount of milk **St. Ignatius bean, strychnos ignatii, strychnos nux-vomica (nux vomica, strychnine, brucine),** *symptoms*, tetanic convulsions in paroxysms at varying intervals of from five minutes to half an hour; opisthotonos during paroxysm, eyeballs prominent, pupils dilated, respiration impeded, pulse feeble and rapid, anxiety, *treatment*, evacuate stomach, *tannic acid* followed by an emetic, catheterize, keep patient quiet, bromides and chloral, amyl nitrite or chloroform to control convulsions, artificial respiration if indicated **tobacco (nicotine),** *symptoms*, nausea, vomiting, weakness, weak pulse, cold and clammy skin, collapse, pupils contracted, then dilated, *treatment*, evacuate stomach, *tannic acid*, strychnine; stimulants, warmth, recumbent position **veratrum album** (*white hellebore*), **veratrum viride** (*green hellebore*), *symptoms*, pain and burning in alimentary tract, vomiting and diarrhea, slow, weak pulse, labored respiration, pupils usually dilated; there may be convulsions; *treatment*, evacuate stomach, ether hypodermatically, opium, stimulants, coffee, warmth; recumbent position.

poison-ivy. Rhus toxicodendron.
poison-nut. Nux vomica
poison-oak. Rhus toxicodendron

poison-sumach. Rhus vernix.

poisonous (*poi'-zn-us*). Having the properties of a poison; venomous.

poitrinaire (*pwah-tre-nār'*) [Fr. *poitrine*, chest]. A patient with pulmonary tuberculosis or other chronic disease of the chest.

poker-back. Spondylosis rhizomelica.

poke-root. See *phytolacca*.

polar (*pō'-lar*) [*pole*]. Pertaining to or situated near a pole. **p. bodies, p. cells, p. globules,** two minute cells thrown off by the unfecundated ovum during maturation. **p. method,** a method of applying electricity, in which the pole the distinctive effect of which is wanted is placed over the part to be treated and the other pole over some indifferent part. **p. ray's,** the astral rays of the mitotic figure. **p. star,** a star of the diaster.

polarimeter (*pō-lar-im'-et-er*) [*polar*; *μέτρον*, a measure]. An instrument for determining the degree to which an optically active substance changes the plane of polarization to the right or to the left.

polarimetry (*pō-lar-im'-et-re*) [*polar*; *μέτρον*, measure]. The use of the polarimeter.

polariscope (*pō-lar'-is-kōp*) [*polar*; *σκοπεῖν*, to view]. An instrument for studying the polarization of light; a polarimeter.

polariscopic (*pō-lar-is-kop-ik*). Pertaining to the polariscope or polariscopy.

polaristrobometer (*pō-lar-is-tro-bom'-et-er*) [*polar*; *στρόβος*, a whirling round; *μέτρον*, measure]. A form of polarimeter or saccharimeter that furnishes a delicate means of fixing the plane of polarization as rotated by the sugar solution under examination.

polarity (*pō-lar'-it-e*). The state or quality of having poles or points of intensity with mutually opposite qualities. In electro-therapeutics, that condition of a nerve in which the part nearest the negative pole is in a state of increased, and that nearest the positive is in a state of decreased irritability.

polarization (*pō-lar-i-za'-shun*) [*polarize*]. 1. The act of polarizing or the state of being polarized. 2. A condition produced in a ray of light by absorption, reflection, or refraction, by means of which the vibrations are restricted and take place in one plane only (*plane polarization*) or in curves (*circular* or *elliptic polarization*). The plane of polarization is altered or rotated when the light is passed through a quartz-crystal or solutions of certain substances (*rotatory polarization*). 3. The deposit of gas-bubbles (hydrogen) on the electronegative plate of a galvanic battery, whereby the flow of the current is impeded, and, owing to the negative plate covered with hydrogen being more electropositive than the zinc plate, the difference in potential between the two plates is reduced.

polarize (*pō'-lar-īz*) [*polar*]. To endow with polarity; to place in a state of polarization.

polarizer (*pō'-lar-i-zer*). An object, such as a Nicol prism, by means of which light is polarized.

pole (*pōl*) [*πόλος*, a pole]. 1. Either extremity of the axis of the body, as of the fetus, the crystalline lens, etc. 2. One of two points at which opposite physical qualities, *e. g.*, electricity or magnetism, are concentrated; specifically, the electrode of a galvanic battery, which is positive (*positive pole*) when connected with the electronegative plate of the battery (carbon, copper, platinum), or negative (*negative pole*) when connected with the electropositive plate (zinc). **p., animal,** that pole of an egg at which the polar bodies are found. **p.-changer,** a switch or key for changing or reversing the direction of a current produced by an electric battery.

polemophthalmia (*pol-em-off-thal'-me-ah*) [*πόλεμος*, war; *ophthalmia*]. Military ophthalmia; the ophthalmia of soldiers.

poleozone (*pō'-le-o-zōn*). A bactericide said to be obtained from potassium chlorate by action of sulphuric acid.

police (*po-lēs'*) [*πόλις*, a city]. 1. Public order. 2. An organized civil force for maintaining order. **p. sanitary,** the body of officials in the employ of a city, state or nation, whose duty it is to look after the hygienic condition as it affects the public health.

policeman's disease. Synonym of *tarsalgia*.

policlinic (*pol-ik-lin'-ik*) [*πόλις*, city; *κλίνη*, couch]. A general city hospital. Cf. *polyclinic*.

polioencephalitis (*pol-e-en-sef-al-i'-tis*). See *polioencephalitis*.

polio- (*pol-e-o*) [*πολιός*, gray]. A prefix for gray.

polioencephalitis (*pol-e-o-en-sef-al-i'-tis*) [*πολιός*, gray; *ἐγκέφαλος*, brain; *ιτις*, inflammation]. Inflammation of the gray matter of the brain. **p. acuta,** an acute inflammation of the cerebral cortex, which, when in children, gives rise to infantile cerebral palsy. **p., anterior superior,** an inflammatory disease of the gray matter of the third ventricle, of the anterior portion of the fourth, and of that about the Sylvian aqueduct. It is characterized by ophthalmoplegia, chiefly external, and a peculiar somnolent state. **p., inferior,** bulbar paralysis

polioencephalomeningomyelitis (*pol-e-o-en-sef-al-o-men-ing-o-mi-el-i'-tis*) [*polio-*; *ἐγκέφαλος*, brain; *μηνίγξ*, membrane; *μύελον*, marrow; *ιτις*, inflammation]. Inflammation of the gray matter of the brain and spinal cord and of their meninges.

polioencephalomyelitis (*pol-e-o-en-sef-al-o-mi-el-i'-tis*) [*polio-*; *ἐγκέφαλος*, brain; *μύελον*, marrow; *ιτις*, inflammation]. Inflammation of the gray matter of the brain and spinal cord; Heine-Medin disease.

polioencephalopathy (*pol-e-o-en-sef-al-op'-ath-e*) [*polio-*; *ἐγκέφαλος*, brain; *πάθος*, disease]. Any disease of the gray matter of the brain.

poliomyelencephalitis (*pol-e-o-mi-el-en-sef-al-i'-tis*) [*polio-*; *μυελός*, marrow; *ἐγκέφαλος*, brain; *ιτις*, inflammation]. Poliomyelitis and polioencephalitis existing together.

poliomyeliticidal (*pol-e-o-mi-el-it-is-i'-dal*). Possessing the power of neutralizing or inactivating the virus of poliomyelitis.

poliomyelitis (*pol-e-o-mi-el-i'-tis*) [*polio-*; *myelitis*]. Inflammation of the gray matter of the spinal cord. **p., acute anterior,** infantile paralysis, an acute inflammation of the anterior horns of the gray matter of the spinal cord. It is most common in children, coming on during the period of the first dentition, and producing a paralysis of certain muscle-groups or of an entire limb. The onset is sudden, and the paralysis is usually most extensive in the beginning, a certain amount of improvement taking place subsequently. The affected muscles atrophy rapidly, the reflexes in them are lost, and reaction of degeneration develops. From contraction of antagonistic muscles deformities occur later in life. **p., chronic anterior.** Synonym of *progressive muscular atrophy*.

poliomyelopathy (*pol-e-o-mi-el-op'-ath-e*) [*polio-; μυελός*, marrow; *πάθος*, disease]. Disease of the gray matter of the spinal cord and medulla oblongata.

polioneuromere (*pol-e-o-nū'-ro-mēr*) [*polio-; νεῦρον*, nerve; *μέρος*, part]. A primitive segment from which the gray matter of the spinal cord is derived.

polioplasm (*pol'-e-o-plasm*) [*polio-; πλάσμα*, plasm]. Granular protoplasm.

poliosis (*pol-e-o'-sis*) [*πολιός*, gray]. A condition characterized by absence of pigment in the hair.

poliothrix (*pol'-e-o-thriks*) [*polio-; θρίξ*, hair]. Synonym of *canities*.

Polish plait (*po'-lish*). See *plica polonica*.

Politzer's bag (*pol'-its-er*) [Adam *Politzer*, Austrian otologist, 1835-1920]. A pear-shaped rubber bag used for inflating the middle ear. The tip is introduced into the nostril, and the bag compressed while the other nostril is closed and the patient performs the act of swallowing. The latter opens the Eustachian tube and allows the air to enter. **P.'s luminous cone**, a brightly illuminated area in the shape of an isosceles triangle which has its base near the lower circumference and its apex at the umbo of the membrana tympani. **P.'s method**, inflation of middle ear through the Eustachian tube. **P.'s test**, in cases of unilateral middle-ear disease, associated with obstruction of the Eustachian tube, the sound of a vibrating tuning fork (C_3) held before the nares during deglutition is perceived by the normal ear only; if the tube is patulous, the sound sensation is frequently stronger in the affected ear. In unilateral disease of the labyrinth the tuning-fork is heard in the normal ear whether or not deglutition occur.

politzeration (*pol-its-er-i-za'-shun*). The inflation of the middle ear by means of Politzer's bag.

poll (*pōl*). The head, especially the back portion, of an individual or of an animal. **p.-evil**, in farriery, an abscess behind the ears of a horse, producing a fistula.

pollakiuria (*pol-ak-i-ū'-re-ah*) [*πολλάκις*, often; *οὖρον*, urine]. Abnormally frequent micturition.

pollantin (*pol-an'-tin*) [*pollen; ἀντί*, against]. An antitoxin formerly used in hay-fever; an immune serum obtained from horses, and employed in fluid and powder form. Now discarded.

pollen (*pol'-en*) [*pollen*, fine dust]. The fecundating element produced in the anthers of flowering plants. **p. disease**, synonym of *hay fever*, *q. v.*

pollex (*pol'-eks*) [L. *gen. pollicis, pl., pollices*]. 1. The thumb. 2. The great toe. **p. pedis**, the great toe.

pollicar (*pol'-ik-ar*) [*pollex*]. Relating to the thumb.

pollinosis (*pol-in-o'-sis*). Same as *hay fever*, *q. v.*

Pollock's operation (*pol'-uk*) [*G. Pollock*]. *For amputation at the knee-joint:* a long anterior and a short posterior skin-flap, somewhat rectangular in outline, the patella being left.

pollution (*pol-ū'-shun*) [*polluere*, to defile]. 1. The act of defiling or rendering impure, as *pollution* of drinking-water. 2. The production of the sexual orgasm by means other than sexual intercourse. **p., nocturnal**, a nocturnal, involuntary, seminal discharge. **p., self**, masturbation.

polocyte (*po'-lo-sīt*). One of the polar bodies occurring in the maturation of the ovum.

polonica (*po-lon' ik-ah*). See *plica*.

polonium (*pol-o'-ne-um*) [*Poland*, home of the discoverers]. A radioactive element isolated by M. and Mme. Curie from pitch-blende.

poltophagy (*pol-tof'-a-je*) [*πολτός*, porridge; *φάγειν*, to eat]. Complete chewing of the food before swallowing it.

polus (*po'-lus*) [*polus*, a pole]. A pole. **p. frontalis**, the extreme anterior part of the cerebral hemispheres. **p. occipitalis**, the extreme posterior part of the cerebral hemispheres. **p. temporalis**, the most prominent part of the anterior end of the temporal lobes of the cerebrum.

poly- (*pol-e-*) [*πολύς*, many]. A prefix denoting many or much.

polyacid (*pol-e-as'-id*) [*poly-; acid*]. Applied to a base or basic radical capable of saturating several molecules of the acid radical.

polyacoustic (*pol-e-ak-oos'-tik*) [*poly-; acoustic*]. 1. Multiplying sound. 2. An instrument for intensifying sound.

polyadenia (*pol-e-ad-e'-ne-ah*) [*poly ; ἀδήν*, a gland]. Pseudoleukemia or Hodgkin's disease.

polyadenitis (*pol-e-ad-en-i'-tis*). Inflammation of many glands at once. **p., malignant**, bubonic plague.

polyadenoma (*pol-e-ad-en-o'-mah*) [*poly-; ἀδήν*, gland; *ὄμα*, tumor]. Multiple adenoma.

polyadenopathy (*pol-e-ad-en-op'-ath-e*) [*poly-; ἀδήν*, gland; *πάθος*, disease]. Any disease affecting many glands at once.

polyadenous (*pol-e-ad'-en-us*) [*poly-; ἀδήν*, gland]. Having or involving many glands.

polyæmia (*pol-e-e'-me-ah*). See *polyemia*.

polyæsthesia (*pol-e-es-the'-ze-ah*). See *polyesthesia*.

polyanemia (*pol-e-an-e'-me-ah*). Excessive anemia.

polyarteritis (*pol-e-ar-ter-i'-tis*) [*poly-; ἀρτήρια*, artery, *ιτις*, inflammation]. Inflammation of a number of arteries at the same time. **p. nodosa**, a polyarteritis in which nodules are formed on some of the smaller arterial branches.

polyarthric (*pol-e-ar'-thrik*) [*poly-; ἄρθρόν*, joint]. Pertaining to many joints.

polyarthritis (*pol-e-ar-thri'-tis*). Inflammation of many joints. **p. rheumatica acuta.** See *rheumatism, acute articular*. **p., vertebral**, inflammation of the intervertebral discs without caries of the bones of the vertebræ.

polyarticular (*pol-e-ar-tik'-ū-lar*) [*poly-; articulus*, joint]. Affecting many joints; the term multiarticular is preferable.

polyatomic (*pol-e-at-om'-ik*). 1. Containing several atoms. 2. Having several hydrogen atoms replaceable by bases.

polyaxon (*pol-e-aks'-on*). 1. In biology, having several axes of growth. 2. A neuron having more than two axons.

polyaxonic (*pol-e-aks-on'-ik*). Pertaining to a polyaxon.

polybasic (*pol-e-ba'-sik*) [*poly-; base*]. 1. Of acids, having several hydrogen atoms replaceable by bases. 2. Formed from a polybasic acid by the replacement of more than one hydrogen atom by a base.

polyblast (*pol'-e-blast*) [*poly-; βλαστός*, a germ]. A general term designating the various cells seen in newly developing connective tissue.

polycardia (*pol-e-kar'-de-ah*). See *tachycardia*.

polycellular (*pol-is-el'-ū-lar*) [*poly-; cellula*, a cell]. Having many cells.

polycentric (*pol-is-en'-trik*) [*poly-; κέντρον*, center]. Having many centers or nuclear points.

polyceptor (*pol-e-sep'-tor*) [*poly-*; *ceptor*]. A sensitizer or "amboceptor" possessing a number of complementophile groups.

polycholia (*pol-e-ko'-le-ah*) [*poly-*; χολή, bile] Excessive secretion of bile.

polychrest, polychrestus (*pol'-ik-rest, pol-ik-res'-tus*) [*poly-*; χρηστός, useful]. A medicine regarded as efficacious in many diseases. The word is chiefly used by homeopathic physicians.

polychrestic (*pol-ik-res'-tik*). Of the nature of a polychrest.

polychroism (*pol-ik-ro'-izm*) [*poly-*; χροιά, color]. A property possessed by certain crystals, of exhibiting two shades of color under polarized light, which vary as the polarizing instrument is rotated.

polychromasia (*pol-e-kro-ma'-ze-ah*). Same as *polychromatophilia*.

polychromatic (*pol-e-kro-mat'-ik*) [*poly-*; χρῶμα, color]. Many-colored.

polychromatophil, polychromatophile (*pol-e-kro-mat'-o-fil*) [*poly-*; χρῶμα, color; φιλεῖν, to love] 1 An erythrocyte which has lost its affinity for acid stain and which with mixtures of acid and basic dyes is stained atypically by either or both elements. 2 See *polychromatophilic*

polychromatophilia (*pol-e-kro-mat-o-fil'-e-ah*). The presence in the blood of polychromatophils.

polychromatophilic (*pol-e-kro-mat-o-fil'-ik*). Susceptible of staining with more than one dye.

polychromemia, polychromæmia (*pol-e-kro-me'-me-ah*) [*poly-*; χρῶμα, color; αἷμα, blood] The increase in coloring-matter in the blood as a sequel of polycythemia.

polychromia (*pol-e-kro'-me-ah*) [*poly-*; χρῶμα, color] Increased or abnormal pigmentation.

polychylia (*pol-ik-i'-le-ah*) [*poly-*; χυλός, chyle]. An excessive formation of chyle.

polychylic (*pol-e-ki'-lik*) [*poly-*; χυλός, chyle]. Relating to an excess of chyle

polyclinic (*pol-e-klin'-ik*). A hospital in which many diseases are treated.

polyclonia (*pol-e-klo'-ne-ah*) [*poly-*; κλόνος, commotion]. An affection said to be distinct from tic and cholera but marked by clonic spasms.

polycoria (*pol-e-ko'-re-ah*) [*poly-*; κόρη, pupil]. The existence of more than one pupil in the iris

polycrotic (*pol-e-krot'-ik*) [*poly-*; κρότος, pulse] Of the pulse, presenting several waves for each cardiac systole.

polycrotism (*pol-e-kro'-tizm*). Condition of being polycrotic.

polycyesia, polycyesis (*pol-is-i-e'-ze-ah, pol-is-i-e'-sis*) [*poly-*; κύησις, pregnancy]. 1. The occurrence of frequent pregnancy. 2 Multiple pregnancy.

polycystic (*pol-e-sis'-tik*) [*poly-*; κύστις, a sac]. Containing many cysts.

polycythemia, polycythæmia (*pol-e-si-the'-me-ah*) [*poly-*; κύτος, cell, αἷμα, blood]. A state of the blood characterized by an excess of corpuscles, generally red corpuscles. **polycythæmia cyanotica**, a form associated with chronic cyanosis, enlargement of the spleen, and constipation without any sign of disease of the heart, lungs, or kidneys and with no emphysema. **p. megalosplenica**, polycythemia cyanotica. **p. myelopathica**, Vaquez's disease. **p. rubra**, erythrocytosis.

polycytosis (*pol-e-si-to'-sis*) [*poly-*; κύτος, cell]. A condition in which the red and white blood corpuscles are increased in number, and the plasma is reduced in volume.

polydactylism (*pol-e-dak'-til-izm*) [*poly-*; δάκτυλος, a finger]. The existence of supernumerary fingers or toes.

polydipsia (*pol-e-dip'-se-ah*) [*poly-*; δίψα, thirst]. Excessive thirst.

polyembryony (*pol-e-em'-bre-o-ne*) [*poly-*; ἔμβρυον, an embryo]. In biology, the production of more than one embryo in a seed. Parthenogenesis occurs in most instances of polyembryony.

polyemia, polyæmia (*pol-e-e'-me-ah*) [*poly-*; αἷμα, blood] Abnormal increase of the total mass of the blood; plethora **polyæmia hyperalbuminosa**, an excess of albumin in the blood-plasma. **polyæmia polycythæmica**, an increase of the red corpuscles. **polyæmia serosa**, a condition in which the amount of blood-serum is increased.

polyergic (*pol-e-ur'-jik*) [*poly-*; ἔργον, work]. Capable of many different kinds of work.

polyesthesia, polyæsthesia (*pol-e-es-the'-ze-ah*) [*poly-*; αἴσθησις, sensation]. An abnormality of sensation in which a single touch is felt in two or more places at the same time.

polyformin (*pol-e-form'-in*). An antiseptic compound obtained by dissolving resorcinol in aqueous formaldehyde and adding an excess of ammonia; it is an insoluble, odorless powder used in the same manner as iodoform. **p., soluble**, $C_6H_4(OH_2)_2{-}(CH_2)_6N_4$, diresorcinol hexamethylentetramine, a combination of two molecules of resorcinol with one molecule of hexamethylentetramine (urotropin); white crystals, very soluble in water and alcohol, insoluble in ether, benzol, and oils. It is used internally as an antiferment; externally in skin diseases

Polygala (*pol-ig'-al-ah*) [*poly-*; γάλα, milk] A genus of herbaceous or shrubbery plants of some 260 species **P. senega**, of N. America, is therapeutically the most important. See *senega*

polygalactia (*pol-e-gal-ak'-te-ah*) [*poly-*; γάλα, milk] Excessive secretion or flow of milk.

polygalin (*pol-ig'-al-in*). See *senega*.

polyganglionic (*pol-e-gang-gle-on'-ik*) [*poly-*; *ganglion*] 1 Having several ganglia. 2. Affecting several lymphatic glands at once.

polygastria (*pol-ig-as'-tre-ah*) [*poly-*; γαστήρ, stomach]. Excessive production of gastric juice.

polygastric (*pol-e-gas'-trik*) [*poly-*; γάστηρ, belly, stomach]. 1. Having several bellies (as certain muscles) 2. Having more than one stomach

polyglandular (*pol-e-gland'-dū-lar*)[*poly-*; *gland*]. Pluriglandular.

polyglobulia (*pol-e-glob-ū'-le-ah*). An increase in the number of red blood corpuscles.

polyglobulism (*pol-e-glob'-ū-lizm*). Same as *polycythemia, q. v.*

polygnathus (*pol-ig'-na-thus*) [*poly-*; γνάθος, jaw]. A form of monster in which the parasite is attached to the jaws of the host.

polygonal (*pol-ig'-o-nal*) [*poly-*; γωνία, an angle]. Having many angles.

Polygonum (*pol-ig'-o-num*). A genus of polygonaceous plants. **P. hydropiperoides**, smart weed, water pepper, is a plant common in the United States. Its active principle is thought to be polygonic acid. It stimulates the action of the heart and increases arterial tension. It is diuretic, emmenagogue and aphrodisiac. Externally, it is a rubefacient and vesicant. It is valuable in amenorrhea and impotence. Dose of the ext. gr. j–v; of the fldext. ♏ x–ʒ j.

polygraph (*pol'-ig-raf*) [*poly-*; γράφειν, to record]. A cylindrical recording instrument for taking

simultaneous sphygmographic tracings It is made to rotate upon its axis by clockwork

polygroma (*pol-ig-ro'-mah*) [*poly-*, ὑγρός, moist, ὄμα, tumor] A large hygroma

polygyria (*pol-e-jir'-e-ah*) [*poly-*, γύρος, gyre] The existence of an excessive number of convolutions in the brain

polyhedral (*pol-e-he'-dral*) [*poly-*; ἕδρα, a seat, a base] Having many surfaces

polyhemia (*pol-e hem'-e-ah*) See *polyemia*

polyhidria (*pol-e-hi'-dre-ah*) See *polyidrosis*

polyhidrosis (*pol-e-hid-ro'-sis*) [*poly-*, ἱδρωσις, sweating] Excessive perspiration

polyhybrid (*pol-e-hi'-brid*) [*poly-*, *hybrid*] The offspring of parents differing in more than three characters

polyhydramnios (*pol e-hi-dram'-ne-os*) An excessive production of liquor amnii

polyhydruria (*pol-e-hi-droo'-re-ah*) [*poly-*, ὑδωρ, water, οὖρον, urine] Large increase in the fluid content of the urine

polyhygroma (*pol-e-hi-gro'-mah*) See *polygroma*

polyidrosis (*pol-e-id-ro'-sis*) Same as *polyhidrosis*

polyinfection (*pol-e-in-fek'-shun*) [*poly-*, *infection*] Infection resulting from the presence of more than one organism

polyleptic (*pol-e-lep'-tik*) [*poly-*, λαμβάνειν, to seize] Characterized by numerous remissions and exacerbations

polymastia (*pol-e-mas'-te-ah*) [*poly-*, μαστός, a breast] The presence of more than two breasts

polymastigate (*pol im-as' tig at*) [*poly-*, μάστιξ, a whip] In biology having several flagella

polymazia (*pol-im-a'-ze-ah*) Synonym of *polymastia*

polymelia (*pol-e-me'-le-ah*) [*poly-*, μέλος, a limb] A malformation consisting in the presence of more than the normal number of limbs

polymelus, polymelius (*pol-im'-el-us pol im-e' le-us*) [see *polymelia*] A monster having more than the normal number of limbs

polymenia (*pol e-me'-ne-ah*) [*poly* , μῆνες months] Menorrhagia

polymenorrhea (*pol-im-en-or-e'-ah*) [*poly-*, μην month, ῥοία a flow] Excessive menstrual flow

polymer (*pol'-im-ĕr*) [*poly-*, μερος, a part] A polymeric substance

polymeria (*pol-e-me'-re-ah*) [*poly-*; μέρος, part] 1 The presence of extra or supernumerary parts of the body 2 In chemistry, a chain of atoms

polymeric (*pol e mer' ik*) [see *polymerism*] 1 Exhibiting polymerism 2 Applied to muscles which are derived from two or more myotomes

polymerid (*pol im'-er-id*) [see *polymerism*] In chemistry, a compound having the property of polymerism Synonym of *polymer*

polymerism (*pol-im'-er izm*) [*poly-*, μέρος, a part] 1 The existence of more than a normal number of parts 2 A form of isomerism in which the molecular weights of the polymers are multiples of each other See *isomeric* and *polymerization*

polymerization (*pol-e-mer-i-za'-shun*) [see *polymerism*] The apparent fusion or union of two or more molecules of a compound, forming a more complex molecule, with a higher molecular weight and somewhat different physical and chemical properties

polymetameric (*pol-im et-am-ĕr'-ik*) Extending over or comprising two or more metameres

polymicrobic (*pol-im-i-kro'-bik*) [*poly-*, μικρός, small, βίος, life] Containing many kinds of microorganisms

polymicrotome (*pol-im-i'-kro-tōm*) [*poly-*, μικρός, small, τέμνειν, to cut] An instrument making many microscopic sections in a short time.

polymorph (*pol'-im-orf*) [*poly-*; μορφή, form] A polymorphonuclear leukocyte

polymorphic, polymorphous (*pol-e-mor'-fik, pol-e-mor'-fus*) [see *polymorphism*] Having or occurring in several forms, of a crystal crystallizing in several forms

polymorphism (*pol e-mor'-fizm*) [*poly-*, μορφή, form] The state of being polymorphous

polymorphocellular (*pol-im-or-fo-sel'-ū-lar*) [*poly-*; μορφή, form, *cellula*, cell] Having cells of many forms

polymorphocyte (*pol-e mor'-fo-sīt*) A narrow cell or myelocyte

polymorphonuclear (*pol-e-mor-fo-nū'-kle-ar*) Applied to multinuclear leukocytes which have nuclei exceedingly irregular in form, being twisted or knotted or presenting the appearance of being divided into distinct portions, though in reality a thin lamina of nuclear substance unites them

polymyoclonus (*pol e mi ok'-lo nus*) See *paramyoclonus*

polymyositis (*pol-e-mi o-si' tis*) Simultaneous inflammation of many muscles

polynesic (*pol e-ne'-sik*) [*poly-*, νησος, island] Occurring in several foci, *e g* , *polynesic* sclerosis

polyneural (*pol in-u'-ral*) [*poly-*, νεῦρον, nerve] Pertaining to, or supplied or innervated by several nerves

polyneuric (*pol-e-nū'-rik*) Polyneural

polyneuritis (*pol-e-nū-ri'-tis*) See *neuritis, multiple* **p. gallinarum,** beriberi

polynuclear (*pol-e-nū' kle ar*) See *multinuclear.*

polynuclearneutrophilic (*pol e-nū kle-ar-nū-tro-fil'-ik*) Relating to polynuclear leukocytes which are readily stainable with neutral dyes

polynucleate (*pol in u'-kle-āt*) Synonym of *multinuclear*

polynucleosis (*pol-e-nu-kle-o'-sis*) The condition of having many multinuclear cells in the blood or in a pathologic exudate, polymorphonuclear leukocytosis

polyodontia (*pol e o don' she ah*) [*poly* , ὀδούς, tooth] The presence of supernumerary teeth

polyonychia (*pol e-o-nik'-e-ah*) [*poly-*, ὄνυξ, nail] The presence of supernumerary nails, polonychia

polyopia, polyopsia (*pol-e-o'-pe ah, pol e op'-se ah*) [*poly* , ὄψις sight] A condition in which more than one image of an object is formed upon the retina **p. monophthalmica,** the phenomenon of multiple vision with a single eye

polyorchidism (*pol-e-or'kid-izm*) [*polyorchis*] The presence of more than two testicles in one person

polyorchis (*pol e-or'-kis*) [*poly* , ὄρχις, a testicle] One who has more than two testicles

polyorexia (*pol-e or eks'-e ah*) [*poly-*, ὄρεξις, appetite] Excessive hunger, or appetite, bulimia

polyorrhomeningitis (*pol-e-or-ro-men-in-ji'-tis*) Polyorrhomenitis

polyorrhomenitis (*pol-e-or-o-men i'-tis*) [*poly-*, ῥόος, serum, υμήν, membrane, ιτις, inflammation]. Concato s disease, a symptom-group defined by Concato as "a phthisis of serous membranes "

polyorrhomenosis (*pol-e-or-ro-men-o'-sis*). Polyorrhomenitis

polyotia (*pol-e-o'-she-ah*) [*poly-*, οὖς, ear] A condition in which there is more than one auricle on one or both sides of the head

polyp, polypus (*pol'-ip, pol'-e-pus*) [*poly-*, πούς, foot] A tumor having a pedicle, found espe-

cially on mucous membranes, as in the nose, bladder, rectum, uterus, etc. **p., blood-.** Synonym of *p., placental.* **polypus carnosus.** Synonym of *sarcoma.* **p., fibrinous,** a polypoid mass on the uterine wall, resulting from the deposition of fibrin from retained blood. The mass may be attached to portions of an ovum or to thrombi at the placental site. **p., fibrous,** a polyp composed chiefly of fibrous tissue. **p., mucous,** a soft polyp resulting either from a localized inflammatory hyperplasia of a mucous membrane or from the formation of a true myxoma. **p., placental,** a fibrinous polyp resulting from the deposit of fibrin upon a portion of retained placenta. **p., soft.** Syn. of *p., mucous.* **p., vascular,** a pedunculated angioma.

polypapilloma tropicum (*pol-e-pap-il-o'-mah*). Frambesia.

polyparesis (*pol-ip-ar'-es-is*) [*poly-*; πάρεσις, weakness]. General progressive paralysis of the insane, or paralytic dementia.

polypathia (*pol-ip-ath'-e-ah*) [*poly-*; πάθος, disease]. The presence of several diseases at one time, or the frequent recurrence of disease.

polypeptid (*pol-e-pep'-tid*). A complex compound of more than three amino-acids. See *peptid.*

polypeptidorrhachia (*pol-e-pep-tid-o-rak'-e-ah*) [*polypeptid*; ῥάχις, spine]. 1. The presence of polypeptids in the cerebrospinal fluid. 2. Toxic meningitis caused by the presence of polypeptids in the cerebrospinal fluid.

polyphagia (*pol-e-fa'-je-ah*) [*poly-*; φαγεῖν, to eat]. Bulimia.

polyphalangism (*pol-e-fal-an'-jism*) [*poly-*; *phalanx*]. An extra phalanx on a finger or toe.

polypharmacy (*pol-e-far'-mas-e*) [*poly-*; φάρμακον, a drug]. The prescription of many drugs at one time; the excessive use of drugs.

polyphobia (*pol-if-o'-be-ah*) [*poly-*; φόβος, fear]. Morbid fear of many things.

polyphrasia (*pol-e-fra'-ze-ah*) [*poly-*; φράσις, speech]. A morbid state characterized by excessive speaking; morbid loquacity; verbigeration.

polypiferous (*pol-ip-if'-er-us*) [*polypus*, polyp; *ferre*, to bear]. Bearing or originating polyps.

polyplasmia (*pol-e-plaz'-me-ah*) [*poly-*; πλάσμα, plasm]. Extreme fluidity of the blood.

polyplast (*pol'-e-plast*) [*poly-*; πλάστος, formed]. 1. Formed of many different structures. 2. Having undergone many modifications during the process of development.

polyplastic (*pol-e-plas'-tik*) [*poly-*; πλάσσειν, to mold]. 1. Of cells, having many substances in their composition. 2. Undergoing many modifications during development.

polypleurodiaphragmotomy (*pol-e-ploo-ro-di-af-ragmot'-o-me*) [*poly-*; πλευρα, rib; *diaphragm*; τόμη, a cutting]. Resection of several ribs and cutting through the diaphragm in order to gain access to the liver.

polypnea, polypnœa (*pol-ip-ne'-ah*) [*poly-*; πνοία, breathing]. Very rapid respiration; panting.

Polypodium (*pol-e-po'-de-um*) [*poly-*; πούς, foot]. A genus of ferns several species of which are asserted to have medical properties. The rhizome of *P. aureum,* of the West Indies, is used as a styptic; *P. calaguala,* the true calaguala, of Mexico and Peru, has a high reputation as a solvent and diaphoretic; the juice of the rhizome of *P. quercifolium,* of the East Indies, is used in inflammation of the eyes and in gonorrhea; the rhizome is used in malaria and as a tonic; *P. vulgare,* has been used as an expectorant in chronic catarrh and asthma.

polypoid (*pol'-e-poid*) [*polyp*; εἶδος, like]. Resembling a polyp.

Polyporus (*pol-ip'-o-rus*) [*poly-*; πόρος, pore]. A genus of fungi. **P. amanita,** a poisonous agaric, used for killing flies; is a marked excitant and narcotic and used topically in cancerous tumors and ulcers and internally in epilepsy, skin diseases, paralysis, and tuberculosis. It contains the alkaloids muscarine and amanitine. Syn., *Amanita muscaria; bug agaric; fly agaric.* **P. officinalis,** known as purging agaric; grows on the larch. It is used in night-sweats of tuberculosis. Dose of *fluid-extract* 1–15 min. (0.06–1.0 Cc.).

polyposis (*pol-ip-o'-sis*) [*poly-*; πόσις, draught]. 1. Excessive thirst; polydipsia. 2. [*polyp.*] Affected with polyps. **p. ventriculi,** a plicate, warty state of the gastric mucosa associated with hypertrophy and catarrh. Syn., *état mamelonné.*

polypotome (*pol-ip'-o-tōm*) [*poly-*; τομή, a cutting]. An instrument for the excision of polypi.

polypotrite (*pol-ip'-o-trīt*) [*polypus*; τρίβειν, to rub]. An instrument for crushing polypi.

polypous (*pol'-ip-us*). Of the nature of a polyp.

polypus (*pol'-e-pus*). See *polyp.*

polyrrhea, polyrrhœa (*pol-e-re'-ah*) [*poly-*; ῥοία, a flow]. An excessive secretion of fluid.

polysaccharid, polysaccharide (*pol-is-ak'-ar-id*). A carbohydrate which under the influence of dilute acids takes up more than 2 molecules of water and yields more than 3 sugar molecules. *E. g.* starches, gums. See *carbohydrate.*

polysarcia (*pol-e-sar'-se-ah*) [*poly-*; σάρξ, flesh]. Excessive corpulency; obesity.

polysarcous (*pol-e-sar'-kus*) [*polysarcia*]. Corpulent; exhibiting polysarcia.

polyscelia (*pol-e-skel'-e-ah*) [*poly-*; σκέλος, leg]. Excess in the number of legs.

polyscelus (*pol-is'-kel-us*) [see *polyscelia*]. A monster having supernumerary legs

polyscope (*pol'-is-kōp*) [*poly-*; σκοπεῖν, to observe]. An instrument provided with an electric light which is introduced into a cavity in order to illuminate its internal surfaces.

polyserositis (*pol-e-se-ro-si'-tis*). Progressive malignant inflammation of the serous membranes. See *Concato's disease.*

polysinuitis, polysinusitis (*pol-e-sin-ū-i'-tis, -sis'-nus-i'-tis*). Simultaneous inflammation of several sinuses.

polysolvol, polysolve (*pol-e-sol'-vol, pol'-e-solv*). A thick, clear liquid which has the property of dissolving large quantities of phenol, menthol, salycilic acid, etc. It is obtained by treating castor-oil successively with strong sulphuric acid and sodium chloride and neutralizing the sulphoricinic acid obtained with sodium hydroxide. Syn., *ammonium sulphoricinate; solvin sodium.* See *solvin.*

polysomia (*pol-e-so'-me-ah*) [*poly-*; σῶμα, body]. A monster having more than a single body or trunk.

polysomus (*pol-e-so'-mus*) [*poly-*; σῶμα, body]. A monster fetus having one head and several bodies.

polyspermia, polyspermism (*pol-e-sper'-me-ah, pol-e-sper'-mism*) [*poly-*; σπέρμα, seed]. The secretion and discharge of an excessive quantity of seminal fluid.

polyspermy (*pol-is-per'-me*) [*poly-*; σπέρμα, seed]. Impregnation of an ovum by more than one spermatozoon.

polystichia (*pol-e-stik'-e-ah*) [*poly-*; στίχος, row]. A condition in which the eyelashes are arranged in two or more rows.

polystomatous (*pol-is-to'-mat-us*) [*poly-*; *στόμα*, mouth]. Having many mouths or apertures.

polysuspensoid (*pol-e-sus-pen'-soid*). A colloid system in which there are many phases in different degrees of dispersion.

polysynovitis (*pol-e-si-no-vi'-tis*) [*poly-*; *synovitis*]. Simultaneous inflammation of several synovial membranes.

polysyphilide (*pol-e-sif'-il-īd*). The presence of many syphilitic lesions at the same time.

polythelia, polythelism (*pol-ith-e'-le-ah, pol'-ith-el-izm*) [*poly-*; *θηλή*, nipple]. The presence of supernumerary nipples.

polytrichia, polytrichosis (*pol-e-trik'-e-ah, pol-e-trik-o'-sis*) [*poly-*; *θρίξ*, hair]. Excessive development of hair.

Polytrichum (*pol-it'-rik-um*) [*πολύτριχος*, having much hair]. A genus of mosses; hair-moss. *P. juniperinum* is a species indigenous to the United States and Europe, and is a powerful diuretic. Dose of the *fluidextract* 20–60 min. (1.2–3.7 Cc.).

polytrophia, polytrophy (*pol-it-ro'-fe-ah, pol-it'-ro-fe*) [*poly-*; *τροφεία*, nourishment]. Abundant or excessive nutrition.

polyuria (*pol-e-ū'-re-ah*) [*poly-*; *οὖρον*, urine]. The passage of an excessive quantity of urine. **p spastica,** intermittent polyuria with hysterical symptoms accompanying convulsions.

polyuric (*pol-e-ū'-rik*) [*poly-*; *οὖρον*, urine]. 1. Pertaining to, or affected with polyuria. 2. One affected with polyuria.

polyvalent (*pol-iv'-al-ent*). Synonym of *multivalent*. **p. serum,** one obtained either by immunizing animals with different strains of the same bacterium, or a mixture of sera derived from different animals immunized with various strains.

pomade (*po-mād'*) [*pomum*, apple]. A perfumen ointment for applying to the scalp.

pomander (*po-man'-der*) [*pomum*, apple]. A ball composed of aromatics, formerly carried about the person to prevent infection; also, the globular case in which the same was kept.

pomatum (*po-ma'-tum*) [L.]. A pomade.

pomegranate (*pum-gran'-āt*). See *granatum*.

pommel joint (*pum'-el-joint*). Condyloid joint.

pompholyx, pompholix (*pom'-fo-liks*) [*πομφόλυξ*, a bubble]. 1. A rare disease characterized by bullous eruptions on the palms of the hands and between the fingers It occurs in depressed states of the nervous system, and is more common in women than in men. Syn., *chiropompholyx; dysidrosis*. 2. An old name for zinc oxide.

pomphus (*pom'-fus*). See *wheal*.

pomum (*po'-mum*) [L.]. Apple. **p. Adami,** Adam's apple, the prominence in the front of the neck caused by the projection of the thyroid cartilage.

Poncet's disease (*pon'-sa*) [Antonin *Poncet*, French surgeon, 1846–1913]. Tuberculous rheumatism. **P.'s operation.** 1. Perineal cystotomy. 2. Lengthening the tendo Achillis in talipes equinus.

Pond's extract. A fluidextract of *Hamamelis virginiana*.

ponderable (*pon'-der-ah-bl*) [*pondus*, weight]. Having weight.

ponderal index (*pon'-der-al*) [*pondus*, weight]. The relation of weight to height.

Ponfick's shadows. Achromacytes; colorless red corpuscles found in the blood in cases of hemoglobinemia.

Pongamia (*pon-ga'-me-ah*) [E. Ind. *pongam*]. A genus of East Indian trees. Kurung oil is the oil expressed from the seeds of *P. glabra*, native to India, China, and Australia. It is recommended in parasitic diseases of the skin, in pityriasis versicolor, herpes, rheumatism, and lepra.

ponogen (*pon'-o-jen*) [*πόνος*, work; *γεννᾶν*, to produce]. 1. Waste-matter of the nervous system; fatigue poison. 2. See *parhormone*.

ponogenic (*pon-o-jen'-ik*). Relating to *ponogen*. **p. toxins.** See under *toxin*.

ponograph (*pon'-o-graf*) [*πόνος*, pain; *γράφειν*, to write]. An apparatus for determining and registering sensitiveness to pain, or to fatigue.

ponopalmosis (*pon-o-pal-mo'-sis*) [*πόνος*, exertion; *πάλμος*, palpitation]. Condition in which slight exertion produces palpitation of the heart.

ponophobia (*pon-o-fo'-be-ah*) [*πόνος*, fatigue; *φόβος*, fear]. Morbid dread of work or fatigue; laziness.

ponos (*pon'-os*) [*πόνος*, pain]. A chronic febrile disease endemic on the Greek islands of Spezzia and Hydra. The disease bears some resemblance to pseudoleukemia and to tuberculosis.

pons [L., "a bridge"]. 1. A process or bridge of tissue connecting two parts of an organ. 2. The pons Varolii. **p. basilaris,** the basilar process of the occipital bone. **p. cerebelli.** Same as *p. Varolii*. **p. hepatis,** a port on of the liver substance sometimes extending from the quadrate lobe to the left lobe. **p. Sylvii,** the quadrigeminum. **p. Tarini,** the posterior perforated space. **p. Varolii,** a convex white eminence situated at the base of the brain, and serving to connect the various divisions with one another. It is placed in front of the medulla oblongata, behind the cerebrum, and beneath the cerebellum, and rests upon the sphenobasilar groove. In structure the pons consists chiefly of nerve-fibers, but contains also areas of gray matter—the *pontine nuclei*. The pons is connected with the medulla, with the cerebellum (by the middle peduncles), and with the cerebrum (by the crura cerebri). **p. zygomaticus,** the zygoma.

pontibrachium (*pon-tib-ra'-ke-um*) [*pons*, bridge; *brachium*, arm]. The middle peduncle of the cerebellum.

pontic (*pon'-tik*) [*pons*, bridge]. Same as *pontile*.

ponticinerea (*pon-ti-sin-e'-re-ah*). A collection of gray matter in the pons.

ponticulus (*pon-tik-ū-lus*) [dim. of *pons*., bridge]. A small, transverse ridge between the pyramids of the oblongata and the pons. Synonym, *propons*. **p. auriculæ,** a slight prominence on the eminentia conchæ for the attachment of the retrahens aurem muscle. **p. hepaticus, p. hepatis,** a bridge of tissue, containing a plexus of blood-vessels, and extending from the surface of the Spigelian to that of the right lobe of the liver. **p. promontorii,** a faint bony ridge on the inner wall of the tympanic cavity extending from the pyramid to the promontory and below the foramen ovale.

pontile, pontine (*pon'-til, pon'-tin*) [*pons*]. Pertaining to the pons Varolii. **p. hemiplegia,** a hemiplegia due to a lesion of the pons. When the lesion is situated low down in the pons, below the decussation of the fibers of the facial nerve, and above that of the pyramidal tracts, the hemiplegia is *alternate; i. e.*, the arm and leg on one side, and the face on the other, are

oscilloscope (*os-sĭl'-o-skōp*) [*oscillation*, *σκόπειν*, to see] A vacuum tube so constructed as to show whether a current is directional or oscillatory, and in the latter case roughly in which direction the greater quantity of current is flowing.

oscine (*os-ēn*) A derivative of hyoscine

oscitancy (*os'-sĭ-an-se*) [*oscitare*, to yawn] The disposition to yawn, drowsiness

oscitation (*os-sĭ-a'-shun*) The act of yawning

oscodal (*os -ko-dal*) Trade name of a preparation of cod liver oil in tablet form

osculation (*os-kū-la'-shun*) [*osculum*] 1 The union of vessels by their mouths 2 Kissing

osculum (*os'-ku-lum*) [L., "a little mouth"] A small aperture

-ose (*-ōs*) [*-osus*] A suffix denoting a member of the carbohydrate group

Osiander's sign of pregnancy (*o-ze-an'-der*) Vaginal pulsation, which may frequently be detected early in pregnancy

-osis (*-o-sis*) A suffix signifying condition of, or state caused by

Osler's disease (*ōz'-ler*) [Sir William *Osler*, English physician, 1849–1919] See *Polycythæmia cyanotica* **O.'s phenomenon**, the agglutination of the blood-platelets observed in blood immediately after its withdrawal from the body **O.'s sign**, **O.'s spots**, small painful erythematous swellings found in the skin and subcutaneous tissues of the hands and feet, and said to be indicative of subacute or chronic malignant endocarditis

osmate (*oz'-māt*) [*osmium*] A salt of osmic acid

osmatic (*oz-mat' ĭk*) [*ὀσμη* smell] Characterized by a keen sense of smell, having a highly developed rhinencephalon

osmazome (*oz'-maz-ōm*) [*ὀσμή*, smell, *ζωμός*, broth] A brownish-yellow substance developed by heat in muscular fibers

osmesis (*oz-me'-sis*) [*ὄσμησις*, a smelling] The act of smelling

osmesthesia (*oz-mes-the'-ze-ah*) [*ὀσμή*, smell, *αἴσθησις*, sensation] Olfactory sensibility

osmic (*oz'-mĭk*) [*osmium*] Pertaining to or containing osmium **o acid.** See *acid, osmic*

osmicate (*oz'-mĭk-āt*) To stain with osmic acid

osmics (*oz'-mĭks*) [*ὀσμη*, smell] The science of odors Pertaining to odors

osmidrosis (*oz-mĭd-ro'-sis*) [*ὀσμή*, smell, *ἱδρωσις* sweat] The secretion of a malodorous perspiration, bromidrosis

osmium (*oz'-me-um*) [*ὀσμή*, smell] A heavy metallic element belonging to the platinum group Symbol Os, specific gravity 22 48, atomic weight, 190 9, quantivalence II, IV, VI, VIII See *acid, osmic*

osmodysphoria (*oz-mo-dĭs-fo'-re-ah*) [*ὀσμη*, smell, *δυς*, difficult, *φέρειν*, to bear] Intolerance of certain odors

osmogen (*os'-mo jen*) [*ωσμός*, impulse, *γεννᾶν*, to produce] A substance from which a ferment or enzyme is developed

osmology (*oz-mol'-o-je*). 1 The science of odors and the sense of smell 2 That part of physical science treating of osmosis

osmometer (*oz-mom'-et-er*) [*ὀσμή*, smell; *μέτρον*, a measure] 1 An instrument for testing the sense of smell 2 [See *osmosis*] An apparatus for measuring osmosis

osmophobia (*oz-mo-fo'-be-ah*) [*ὀσμή*, smell; *φόβος*, fear]. A morbid dread of strong smells.

osmoregulatory (*oz-mo-reg'-ū-la-tor-e*). Affecting or regulating the extent and rate of osmosis.

osmos (*os'-mos*) Trade name of an artificial mineral water, similar to Hunyadi Janos

osmose (*os-mōs'*) 1 Same as *osmosis*. 2 To undergo osmosis

osmosis (*oz-mo'-sis*) [*ὠσμός*, impulsion]. The passage of liquids and substances in solution through a porous septum. See *endosmosis* and *exosmosis*

osmotherapy (*oz-mo-ther'-a-pe*) [*osmosis; therapy*] Treatment of disease by the administration of hypertonic solutions by intravenous injection

osmotic (*oz mot'-ĭk*) [*ωσμός*, impulse] Pertaining to osmosis **o. equivalent**, "that figure which indicates the weight of water which replaces by osmosis one part by weight of the substance subjected to the process" **o. pressure**, the pressure exerted by the particles of compounds when dissolved, directly expressed or shown by osmotic phenomena It is equal to that which would be exerted by an equal amount of the substance if it were converted into gas and occupied the same volume at the same temperature as the solution

osphrasia (*os fra'-ze-ah*) Synonym of *osphresis*

osphresiological (*os-fre-ze-o-loj'-ĭk al*). Pertaining to osphresiology, or to the sense of smell.

osphresiology (*os fre ze-ol'-o je*) [*ὄσφρησις*, smell, *λόγος*, science] The science of the sense of smell and its organs, also of odors and perfumes

osphresiometer (*os-fre ze-om'-et-ur*) [*ὄσφρησις*, smell, *μετρον*, measure] Osmometer, *q. v.*

osphresis (*os fre'-sis*) [*ὄσφρησις*, smell] The sense of smell, olfaction

osphretic (*os fret'-ĭk*) [*ὀσφρητικος*, capable of smelling] Same as olfactory

osphus (*os'-fus*) [*ὀσφύς*, loin] The loin

osphyalgia (*os-fe-al'-je-ah*) [*osphus*, *ἄλγος* pain] Any pain in the hip or loins, sciatica

osphyitis (*os-fi-ī'-tis*) [*ὀσφύς*, loin, *ιτις*, inflammation] Lumbar inflammation, coxitis

osphyomyelitis (*os-fi o-mi-el-ī'-tis*) [*ὀσφύς* loin, *myelitis*] Myelitis of the lumbar portion of the spinal cord

ossa (*os'-ah*) [L., pl of *os*, a bone] Bones See *os* **o. innominata**, the irregular bones forming the sides and anterior wall of the pelvis **o. lata**, the broad or flat bones forming the walls of cavities **o. longa**, the long bones *e. g.*, those of the limbs **o. suturarum**, **o. triquetra**, **o. wormiana.** See *Wormian bones*

ossagen (*os'-aj-en*) A proprietary remedy used in rickets, said to be the calcium salt of the fatty acids of red bone-marrow Dose 30–60 gr (2–4 Gm.) twice daily.

ossalin (*os'-al-in*) A hygroscopic ointment-base prepared from bone-marrow It occurs as a grayish fat with the odor of tallow Syn., *adeps ossium*

ossalinate (*os-al'-in-āt*) A proprietary substitute for cod-liver oil said to be the sodium compound of the acid of ox-marrow

ossature (*os'-at-ūr*) [*os*, a bone]. The arrangement of the bones of the body

ossein, osseine (*os'-e-in*) [*os*, a bone] The organic base of osseous tissue

osselet (*os'-el-et*) [dim of *os*, a bone] A small bone, also a hard nodule on the inner aspect of the horse's knee

osseoalbumoid (*os-e-o-al'-bū-moid*). A proteid substance resembling elastin, obtained from bone after hydration of the collagen

osseoaponeurotic (*os-e-o-ap-on-ū-rot'-ĭk*) [*os, aponeurosis*] Bounded by bone and the aponeurosis of a muscle

osseocartilaginous (*os-e-o-kar-tĭl-aj'-in-us*). Pertaining to or composed of both bone and cartilage.

porphyreus (*por-fi'-re-us*) [πορφύρα, purple]. In biology showing spots of purple upon a ground of another hue.

porphyrin (*por'-fir-in*) [see *prophyreus*]. 1. A white, amorphous substance, $C_{21}H_{28}N_4O_2$, from *Alstonia constricta*, Australian fever-bark. It is antipyretic. 2. Substances of variable composition found in hemoglobin and chlorophyll.

porphyrinuria (*por-fir-in-ū'-re-ah*). The discharge of porphyrin in the urine.

porphyrization (*por-fir-i-za'-shun*) [*porphyry*, a kind of rock]. Pulverization, so-called because generally performed on a tablet of porphyry.

porphyruria (*por-fir-ū'-re-ah*) [πορφύρα, purple; οὖρον, urine]. The discharge of urine colored with purpurin.

Porret's phenomenon. When a continuous current is passed through a living muscular fiber, the sarcous substance shows an undulating movement from the positive toward the negative pole.

porriginous (*por-ij'-in-us*). Relating to porrigo; scurfy.

porrigo (*por-ī'-go*) [L.]. An old term applied to several diseases of the scalp. **p. decalvans** alopecia areata. **p. favosa**, favus. **p. larvalis**, impetigo of the scalp conjoined with eczema,

Porro's operation, Porro-cesarean section (*por'-o*). [Edoardo *Porro*, Italian obstetrician, 1842–1902]. See under *operations*.

Porro-Muller's operation. *For otherwise impossible labor:* a modification of the Porro operation, in which the uterus is brought out of the abdomen before extracting the fetus.

Poro-Veit's operation (*por'-o-vīt'*). *For otherwise impossible labor:* a modification of the Porro operation· the strump is ligated and dropped.

porta (*por'-tah*) [L., "gate"]. The hilus of an organ through which the vessels enter. **p. hepatis, p. jecoris,** the transverse fissure of the liver through which the portal vein enters the organ. **p. labyrinthi,** the fenestra rotunda. **p. omenti,** the foramen of Winslow. **p. vestibuli,** a narrow orifice between the sinus venosus and the auricle in the embryonic heart.

portal (*por'-tal*) [*porta*]. Pertaining to the porta or hilum of an organ, especially to the porta hepatis or to the vein entering at the porta hepatis (*portal vein*) **p. circulation,** the passage of blood from the stomach, spleen, and intestine through the portal vein and the liver. **p. fissure.** See *fissure, transverse.* **p. vein,** the large vein entering the liver at the transverse fissure, and bringing to it the bload from the digestive tract and the spleen.

porte- or **port-** (*portare*, to carry). A carrier, or holder. **p.-acid,** an instrument for the local application of an acid. **p.-aiguille.** See *needle-holder.* **p.-caustique,** a holder for the stick of caustic. **p.-cordon,** an instrument for replacing a prolapsed funis. **p.-crayon.** See *p.-caustique.* **p.-fil.** Synonym of *p.-ligature.* **p.-fillet,** an instrument for applying a fillet to some part of the fetal body. **p.-ligature,** an instrument for applying a ligature to a deep part. **p.-mèche,** a probe for insertion of a drain. **p.-moxa.** See *moxa.* **p.-nœud,** an instrument for applying a ligature to the pedicle of a tumor. **p.-pierre.** Synonym of *p.-caustique.*

porter (*por'-ter*). See under *malt liquors.*

Porter's symptom. [William Henry *Porter*, Irish physician, 1790–1861]. Tracheal tugging. See *Oliver's symptom.*

portio (*por'-she-o*) [L.]. Portion. Also, an abbreviated expression for portio vaginalis uteri—the vaginal portion of the uterus. **p. alba cerebri,** the white substance of the brain. **p. aryvocalis,** a short muscle attached anteriorly to the vocal band and posteriorly to the vocal process of the arytenoid cartilage. **p. axillaris,** the second part of the subclavian artery. **p. corporis striati externa,** the lenticular nucleus. **p. corporis striati interna,** the caudate nucleus. **p. dura,** the facial nerve. **p. infravaginalis,** the vaginal portion of the neck of the uterus. **p. inter duram et mollem,** a small funiculus between the seventh and eighth cranial nerves. **p. intermedia Wrisbergii.** Synonym of *p. inter duram et mollem.* **p. mollis,** the auditory nerve. **p. muscularis,** the second division of the subclavian artery. **p. pectoralis,** the first division of the subclavian artery. **p. pylorica ventriculi,** the pyloric extremity of the stomach. **p. splenica ventriculi,** the cardiac extremity of the stomach. **p. thoracica,** the first part of the axillary artery. **p. ventriculi lienalis.** Synonym of *p. splenica ventriculi.*

portiplex, portiplexus (*por'-tip-leks, por-tip-leks'-us*) [*porta*, gate; *plexus*]. The plexus or vascular fringe that connects the two lateral choroid plexuses. It passes through the porta, or foramen of Monro, whence the name.

port-wine mark, p. stain. See *nevus* (2).

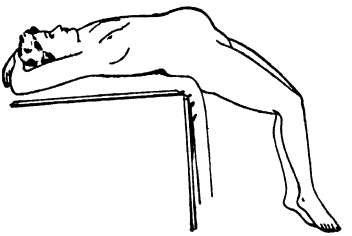
porus (*po'-rus*) [L.]. 1. A pore, foramen. 2. A callosity. **p. acusticus externus,** the opening of the external auditory canal. **p. acusticus internus,** the opening of the internal auditory canal into the cranial cavity. **p. opticus,** the opening in the center of the lamina cribrosa transmitting the central artery of the retina. **p. sudoriferus,** a sweat pore.

Posadas, protozoic disease of. See *dermatitis, blastomycetic.*

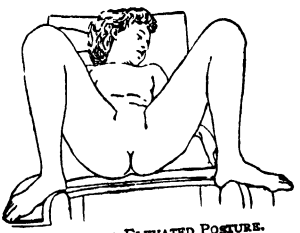
posiomania (*pos-e-o-ma'-ne-ah*) [πόσις, drinking; μανία, frenzy]. Dipsomania.

position (*po-zish'-un*) [*ponere*, to place]. Place; location; attitude; posture. **p., anatomical,** the person stands erect with the arms at the side and palms forward. **p., dorsal,** one in which the patient lies on the back. **p., Edebohls'.** See *Simon's position.* **p., English.** See *p. left lateral recumbent.* **p. of the fetus,** the relation of the presenting part of the fetus to the cardinal points of Capuron. For the *vertex*, the *face*, and the *breech* there are each four positions. a *right anterior*, a *right posterior*, a *left anterior*, and a *left posterior*. For each of the *shoulders* there is an *anterior* and a *posterior* position. In order to shorten and memorize these positions, the initials of the chief words are made use of, as follows: For vertex presentations the word occiput is abbreviated *O.*, and preceded by the letter *R.* or for right or left, and followed by *A.* or *P.*, according as the presenting part is anterior or posterior. We thus have the initials *L. O. A.*, left occipitoanterior, to indicate that the presenting occiput is upon the anterior left side. In the same way are derived the terms *L. O. P.*, *R. O. A.*, *R. O. P.* For facial presentations we have in the same way *L. F. A.* (left frontoanterior), *L. F. P.*, *R. F. A.*, *R. F. P.* For breech or sacral presentations, *L. S. A.*, *L. S. P.*, *R. S. A.*, *R. S. P.*, and for shoulder (*dorsal*) presentations, *L. D. A.*, *L. D. P.*, *R. D. A.*, *R. D. P.* **p., Fowler's.** See *Fowler's position.* **p., genucubital,** one in which the patient lies upon the knees and elbows, the head resting upon the hands. **p., high**

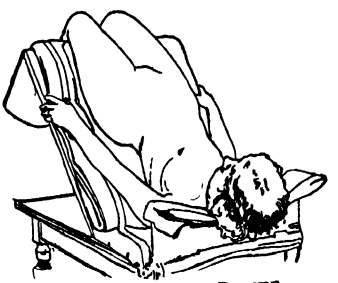
THE SEMIPRONE, OR SIMS' POSTURE. ANTERIOR VIEW.



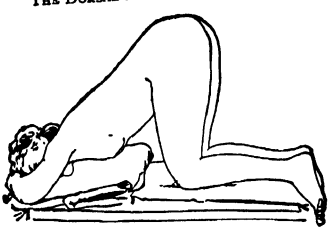
WALCHER'S POSITION.



THE DORSAL ELEVATED POSTURE.

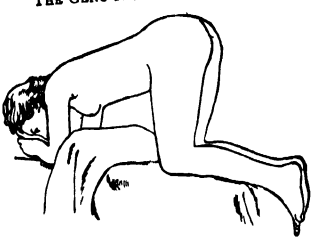


THE TRENDELENBURG POSTURE.

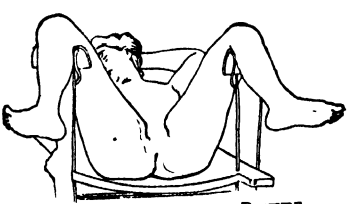


THE GENU-PECTORAL POSTURE.

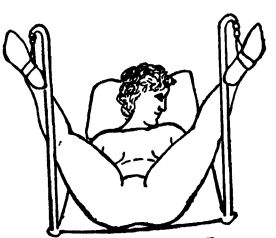
THE DORSO-SACRAL POSTURE. LATERAL VIEW.



THE KNEE-ELBOW POSTURE.



THE DORSAL RECUMBENT POSTURE.



EDEBOHLS' POSTURE.

pelvic. See *Trendelenburg's position*. **p., knee-chest, p., genupectoral,** one in which the patient rests upon the knees and chest, the arms being crossed above the head. **p., knee-elbow, p., left lateral recumbent, p., English, p., obstetric,** one in which the patient lies on the left side with the right thigh and knee drawn up. **p., lithotomy, p., dorsosacral,** one in which the patient lies on the back with the legs flexed on the thighs and the thighs flexed on the abdomen and abducted. **p., Simon's.** See *Simon's position*. **p., semiprone,** one in which the patient lies on the left side with the right knee and thigh drawn up and the left arm placed along the back; the chest is inclined forward so that the patient rests upon it. Syn., *Sims' position*. **p., Trendelenburg's.** See *Trendelenburg's position*. **p., Walcher's.** See *Walcher's position*.

positive (*poz'-it-iv*) [*positivus*, from *ponere*, to place]. Real; existing; actual. In mathematics and physiology, denoting one of two quantities or conditions assumed as primary or fundamental; opposed to one assumed as negative; denoting a quantity greater than zero; to be added; additive. **p. electricity,** the kind of electricity developed by rubbing glass with silk. **p. electrode, p. pole,** the electrode or pole connected with the negative plate of a battery. **p. element, p. plate,** that plate of a battery which is acted upon by the fluid, *e. g.*, the zinc plate in the zinc-carbon battery.

positive phase. See *opsonic index*.

positor (*pos'-it-or*) [*ponere*, to place]. See *repositor*.

Posner's reaction for peptones and albumins. Alkalinize the urine, pour it into a test-tube, and overlay it very carefully with a very dilute, almost colorless solution of copper sulphate. In the presence of peptone a violet zone will form even in the cold; the same reaction is yielded by albumin upon warming.

posological posologic (*po-so-loj'-ik-al, po-so-loj'-ik*) [πόσος, how much; λόγος, science]. Pertaining to posology or quantitative dosage.

posology (*pos-ol'-oj-e*) [πόσος, how much; λόγος, science]. That branch of medical science dealing with the dosage of medicines.

posset (*pos'-et*) [*posca*, sour wine and water]. A preparation of milk curdled with wine.

possetting (*pos'-et-ing*) [*posset*]. The regurgitation of infants.

post- (*pōst*) [L.]. A prefix denoting after; behind.

postaccessual (*pōst-ak-ses'-ū-al*) [*post-; accessio*, a paroxysm]. Occurring after a paroxysm.

postacetabular (*post-as-et-ab'-ū-lar*) [*post-; acetabulum*]. Situated behind the acetabulum.

postanal (*pōst-a'-nal*) [*post-; anus*]. Situated behind the anus.

postanesthetic (*pōst-an-es-thet'-ik*). Occurring after anesthesia.

postapoplectic (*pōst-ap-o-plek'-tik*) [*post-; apoplexy*]. Coming on, or occurring, after a stroke of apoplexy. **p. coma,** the coma that often succeeds an apoplectic stroke.

postauditory (*pōst-aw'-dit-o-re*) [*post-; audire*, to hear]. Situated behind the auditory nerve, or chamber. **p. fossa,** a crescentic notch on the temporal bone separating the temporal ridge from the auditory plate.

postaxial (*pōst-aks'-e-al*) [*post-; axis*]. Situated behind the axis: in the arm, behind the ulnar aspect; in the leg, behind the fibular aspect.

postbrachial (*pōst-bra'-ke-al*) [*post-; brachium*, arm]. Situated posterior to the arm.

postbrachium (*pōst-bra'-ke-um*) [*post-; brachium*] The posterior brachium of the corpus quadrigeminum, seen on the lateral slope of the mesencephal. It is between the prebrachium and the lemniscus.

postcava (*pōst-kav'-ah*) [*post-; cavus*, hollow]. The inferior or ascending vena cava.

postcaval (*pōst-kav'-al*). Pertaining to the inferior or ascending vena cava.

postcentral (*pōst-sen'-tral*) [*post-; center*]. 1. Situated behind a center. 2. Situated behind the fissure of Rolando, or central fissure of the brain, as the *postcentral* convolution.

postcerebellar (*pōst-ser-e-bel'-ar*) [*post-; cerebellum*]. Situated behind, or in the posterior portion of the cerebellum.

postcerebral (*pōst-ser'-e-bral*) [*post-; cerebrum*]. Situated behind, or in the posterior part of the cerebrum.

postcibal (*pōst-si'-bal*) [*post-; cibum*, food]. Occurring after meals.

postcisterna (*pōst-sis-ter'-nah*) [*post-; cisterna*, a vessel]. That portion of the spaces separating the ental layer of the arachnoid from the pia of the cerebellum, and communicating with the true encephalic cavities through the metapore, and also with the spinal subarachnoid space; the cisterna magna.

postclavicular (*pōst-kla-vik'-ū-lar*) [*post-; clavicle*]. Situated behind the clavicle.

postcommissure (*pōst-kom'-ss-ūr*) [*post-; commissure*]. The posterior commissure of the brain.

postconnubial (*pōst-kon-nū'-be-al*) [*post-; connubium*, marriage]. Coming on, or occurring, after marriage.

postconvulsive (*pōst-kon-vul'-siv*) [*post-; convulsion*]. Coming on after a convulsion.

postcordial (*pōst-kor'-de-al*) [*post-; cor*, heart]. Situated behind the heart.

postcornu (*pōst-kor'-nū*) [*post-; cornu*, horn: *pl., postcornua*]. The occipital horn of the lateral ventricle of the brain.

postcornual (*pōst-kor'-nū-al*) [*post-; cornu*, horn]. Pertaining to the postcornua (of the ventricles of the brain or of the spinal cord).

postcribrum (*pōst-krib'-rum*) [*post-; cribrum*, sieve]. The posterior perforated space of the brain.

postcubital (*pōst-kū'-bit-al*) [*post-; cubitus*, the forearm] Situated on the posterior aspect of the forearm.

postdiastolic (*pōst-di-as-tol'-ik*) [*post-; diastole*]. Occurring after the diastole.

postdicrotic (*pōst-di-krot'-ik*) [*post; dicrotic*]. Coming after the dicrotic wave of the pulse. **p. wave,** a second recoil-wave in the sphygmographic tracing. It is not always present.

postdigestive (*pōst-di-jes'-tiv*). Occurring after digestion.

postdural (*pōst-dū' -al*) [*post; dura*]. Situated behind the dura mater. **p. artery,** the posterior meningeal artery.

postdiphtheritic (*pōst-dif-ther-it'-ik*) [*post-; diphtheric*]. Occurring after an attack of diphtheria, as *postdiphtheritic* paralysis.

postembryonic (*pōst-em-bri-on'-ik*) [*post-; embryo*]. Occurring after the embryonic stage.

postepileptic (*pōst-ep-i-lep'-tik*) [*post-; epilepsy*]. Occurring after an epileptic attack.

posterior (*pōs-te'-re-or*) [*posterus*, after; behind]. Placed behind or to the back of a part. **p. chamber,** the space between the iris and the lens.

postero- (*pōs-te-ro-*) [*posterior*]. A prefix meaning posterior.

posteroexternal (*pŏs-ter-o-eks-ter'-nal*) [*postero-; external*]. Occupying the outer side of a back part, as the *posteroexternal* column of the spinal cord.

posterointernal (*pŏs-ter-o-in-ter'-nal*) [*postero-; internal*]. Occupying the inner side of a back part, as the *posterointernal* column of the spinal cord.

posterolateral (*pŏs-te-ro-lat'-er-al*) [*postero-; lateral*]. Situated behind and at the side of a part.

posteromedian (*pŏs-te-ro-me'-de-an*). Located in the middle of a posterior aspect.

posteroparietal (*pŏs-te-ro-par-ī'-et-al*) [*postero-; parietal*]. Situated at or opposite the posterior part of the parietal bone; posterior and parietal.

posterosuperior (*pŏs-te-ro-sū-pe'-re-or*) [*postero-; superior*]. Situated behind and above a part.

posterotemporal (*pŏs-te-ro-tem'-por-al*) [*postero-; temporal*]. Situated at or opposite the posterior part of the temporal bone; posterior and temporal.

posterula (*pŏs-ter'-oo-lah*) [*posterus*, posterior]. That portion of the nasopharynx between the posterior nares and the salpingo-palatal fold; a small space at the posterior ends of the turbinated bones of the nose.

postesophageal, postœsophageal (*pŏst-e-sof-aj'-e-al*) [*post-; esophagus*]. Situated behind the esophagus.

postfebrile (*pŏst-feb'-rĭl*) [*post-; febris*, a fever]. Occurring after a fever.

postfovea (*pŏst-fo'-ve-ah*) [*post-; fovea*, pit]. The posterior fovea, a depression in the floor of the fourth ventricle of the brain.

postganglionic (*pŏst-gang-gle-on'-ik*) [*post-; ganglion*]. Situated behind a ganglion, or after a ganglion.

postgeminum (*pŏst-jem'-ĭn-um*) [*post-; geminus*, twin]. The posterior pair of bodies of the corpora quadrigemina.

postgeniculatum, postgeniculum (*pŏst-jen-ik-ū-la'-tum, -jen-ik'-ū-lum*) [*post-; genuculum*]. The internal geniculate body.

postglenoid (*pŏst-gle'-noid*) [*post-; glenoid*]. Situated behind the glenoid fossa of the temporal bone, as the *postglenoid* tubercle, also called simply *postglenoid*.

postgracile (*pŏst-gras'-il*). Situated behind the gracilis lobe of the cerebellum.

postgraduate (*pŏst-grad'-ū-āt*). 1. Belonging to or prosecuting a course of study after graduating. 2. A graduate.

postgrippal (*pŏst-grip'-al*) [*post; grip*]. Occurring after the grip, or influenza.

posthalgia (*pos-thal'-je-ah*) [πόσθη, penis; ἄλγος, pain]. Pain in the penis.

posthemiplegic (*pŏst-hem-i-ple'-jik*) [*post-; hemiplegia*]. Occurring after or following an attack of hemiplegia. **p. chorea**, choreiform movements in paralyzed limbs.

posthemorrhagic (*pŏst-hem-o-raj'-ik*). Occurring after a hemorrhage.

posthepatic (*pŏst-he-pat'-ik*) [*post-; ἧπαρ*, liver]. Situated behind the liver.

posthetomy (*pos-thet'-o-me*) [πόσθη, prepuce; τομή, a cutting]. Circumcision.

posthioplastic (*pos-the-o-plas'-tik*) [*posthioplasty*]. Pertaining to, or involving, plastic surgery of the prepuce.

posthioplasty (*pos'-the-o-plas-te*) [πόσθη, foreskin; πλάσσειν, to mold]. Plastic surgery of the prepuce.

posthippocampal (*pŏst-hip-o-kam'-pal*) [*post-; hippocampus*]. Pertaining to the calcar or hippocampus minor.

posthitis (*pos-thi'-tis*) [πόσθη, prepuce; ῖτις, inflammation]. Inflammation of the prepuce.

posthocalymma (*pos-tho-kal-ĭm'-ah*) [πόσθη, penis; κάλυμμα, veil]. Synonym of *condom*.

postholith (*pos'-tho-lith*) [πόσθη, prepuce; λίθος, a stone]. A preputial calculus.

posthoncus (*pos-thong'-kus*) [πόσθη, prepuce; ὄγκος, swelling]. A swelling or tumor of the prepuce.

posthumeral (*pŏst-hū'-mer-al*) [*post-; humerus*]. Situated behind the humerus.

posthumous (*pos'-tū-mus*) [*postumus*, latest, last]. Occurring after death. **p. child**, one born after the death of the father, or taken by cesarean operation from the body of its mother after her death.

posthyoid (*pŏst-hi'-oid*). Posterior to the hyoid bone.

posthypnotic (*pŏst-hip-not'-ik*) [*post-; ὕπνος*, sleep]. Succeeding the hypnotic state; acting after the hypnotic state has passed off, as *posthypnotic* suggestion.

posthypophysis (*pŏst-hi-poff'-is-is*) [*post-; hypophysis*]. The posterior and cerebral portion of the hypophysis or pituitary body.

posticus (*pos-tĭ'-kus*) [L.]. Posterior.

postinfluenzal (*pŏst-in-flu-en'-zal*). Occurring after influenza.

postinsula (*pŏst-ĭn'-sū-lah*) [*post-; insula*]. 1. The posterior part of the insula. 2. Behind the insula.

postischial (*pŏst-ĭs'-ke-al*). Dorsad of the ischium.

postmalarial (*pŏst-mal-a'-re-al*). Occurring as a sequel of malaria.

postmastoid (*pŏst-mas'-toid*) [*post-; mastoid*]. Situated behind the mastoid process of the temporal bone.

postmedian (*pŏst-me'-de-an*) [*post-; medius*, the middle]. Behind the middle transverse line of the body.

postmediastinal (*pŏst-me-de-as-tĭ'-nal*) [*post-; mediastinum*]. Pertaining to the postmediastinum.

postmediastinum (*pŏst-me-de-as-tĭ'-num*) [*post-; mediastinum*]. The posterior mediastinal space.

postmortal (*pŏst-mor'-tal*) [*postmortem*]. After death.

postmortem (*pŏst-mor'-tem*) [*post-; mors*, death]. 1. Occurring after death. 2. An examination of the body after death; an autopsy. **p. wart.** See *verruca necrogenica*.

postnares (*pŏst-na'-rēz*) [*post-; naris*, nostril]. The posterior nares.

postnarial (*pŏst-na'-re-al*) [*post-; naris*, a nostril]. Pertaining to the posterior nares.

postnasal (*pŏst-na'-zal*) [*post-; nasus*, nose]. Situated behind the nose. **p. catarrh**, catarrhal inflammation of the nasopharynx.

postnatal (*pŏst-na'-tal*) [*post-; natus*, born]. Subsequent to birth, as a *postnatal disease*.

postnecrotic (*pŏst-ne-krot'-ik*) [*post-; νέκρος*, dead]. 1. Occurring after death. 2. Occurring after the death of a tissue or a part.

postneuritic (*pŏst-nū-rit'-ik*). Occurring after neuritis.

postnodular (*pŏst-nod'-ū-lar*). Situated behind the vermiform process of the cerebellum.

postoblongata (*pŏst-ob-long-ga'-tah*) [*post-; oblongata*]. The caudal or metencephalic portion of the oblongata, forming the floor of the metacele.

postocular (*pŏst-ok'-u-lar*) [*post-; oculus*, the eye]. Behind the eye.

postolivary (*pŏst-ol'-ĭv-a-re*) [*post-; olivary*]. Behind the oliva.

postoperative (*pōst-op'-er-a-tiv*) [*post-; operatio*, operation]. Occurring after an operation, as postoperative insanity.

postoperculum (*pōst-o-per'-kū-lum*) [*post-; operculum*]. That one of the folds covering the insula which is formed of a part of the supertemporal gyrus; the temporal operculum.

postopticus (*pōst-op'-tik-us*) [*post-; ὤψ*, eye; *pl., postoptici*]. Either one of the posterior pair of optic lobes, or corpora quadrigemina.

postoral (*pōst-o'-ral*) [*post-; os, oris*, mouth]. Situated either behind or in the posterior part of the mouth.

postorbital (*pōst-or'-bit-al*) [*post, orbita*, orbit]. Situated behind or below the orbit.

postotic (*pōst-o'-tik*) [*post-; οὖς*, ear]. Behind the auditory vesicle.

postpalatal (*pōst-pal'-at-al*) [*post-; palatum*, the palate]. Situated behind the palate bones.

postpallium (*pōst-pal'e-um*). That portion of the cerebral cortex which is behind the fissure of Rolando.

postpaludal (*pōst-pal'-ū-dal*). Postmalarial.

postparalytic (*pōst-par-ah-lit'-ik*) [*post-; paralysis*]. Following an attack of paralysis.

postpartum (*pōst-par'-tum*) [*post-; partus*, birth]. Following childbirth, as *postpartum* hemorrhage.

postpeduncle (*pōst-pe'-dunk-l*) [*post-; pedunculus*, peduncle]. The inferior cerebellar peduncle.

postperforatus (*pōst-per-for-a'-tus*) [*post-; perforare*, to perforate]. The posterior perforated space.

postpharyngeal (*pōst-far-in'-je-al*) [*post-; pharynx*] Situated behind the pharynx.

postpituitary (*pōst-pit-ū'-it-a-re*) [*post-; pituitary*]. Situated behind the pituitary body.

postpleuritic (*pōst-ploo-rit'-ik*). Following pleurisy.

postpneumonic (*pōst-nū-mon'-ik*). Following pneumonia

postpone (*pōst-pōn'*) [*post-; ponere*, to place]. Of a paroxysm, to occur after the regular time.

postponent (*pōst-po'-nent*) [see *postpone*]. Delayed in recurrence.

postpontile (*pōst-pon'-til*) [*post-; pons*]. Situated behind the pons Varolii. **p. recess**, the foramen cæcum.

postpubescent (*pōst-pū-bes'-ent*). Occurring subsequent to puberty.

postpycnotic (*pōst-pik-not'-ik*). Occurring subsequent to pycnosis, *q. v.*

postpyramidal (*pōst-pir-am'-id-al*) [*post-; pyramid*]. Situated behind the pyramidal tract. **p. nucleus**, the nucleus funiculi gracilis

postramus (*pōst-ra'-mus*) [*post-; ramus*, branch]. The caudal or horizontal branch of the stem of the arbor of the cerebellum.

postrhinal (*pōst-ri'-nal*) [*post-; ῥίς*, nose]. Posterior and rhinal. **p. fissure**, the basirhinal fissure.

postrolandic (*pōst-ro-lan'-dik*]. Situated behind the fissure of Rolando.

postsacral (*pōst-sa'-kral*) [*post-; sacrum*]. Situated behind or below the sacrum.

postscalenus (*pōst-ska-le'-nus*) [*post-; scalenus*]. The scalenus posticus muscle.

postscapula (*pōst-skap'-ū-lah*) [*post-; scapula*]. The part of the scapula below or posterior to the spine.

postscapular (*pōst-skap'-ū-lar*). Pertaining to the postscapula.

postscapularis (*pōst-skap-ū-la'-ris*) [*post-; scapula*]. Synonym of the infraspinatus muscle.

postscarlatinal (*pōst-skar-lat-e'-nal*). Occurring after scarlatina.

postsphenoid (*pōst-sfe'-noid*) [*post-; sphenoid*]. Situated behind the sphenoid bone; also, forming its posterior portion.

postsplenic (*pōst-splen'-ik*). Situated behind the spleen.

postsylvian (*pōst-sil'-ve-an*). Situated behind the Sylvian fissure of the brain.

postsyphilitic (*pōst-sif-il-it'-ik*). Following syphilis.

postsystolic (*pōst-sis-tol'-ik*) [*post-; systole*]. Occurring after the systole of the heart.

posttarsal (*pōst-tar'-sal*). Located behind the tarsus.

posttibial (*pōst-tib'-e-al*) [*post-; tibia*]. Situated upon the posterior aspect of the tibia.

posttyphoid (*pōst-ti'-foid*). Following typhoid.

postulate (*pos'-tū-lāt*) [*postulare*, to demand]. A well-known law; a basis of argument too obvious to require proof. **p.s, Koch's.** See *Koch.*

postum (*pōst'-um*). A cereal substitute for coffee.

postural (*pos'-tūr-al*) [*ponere*, to place]. Pertaining to posture or position; performed by means of a special posture, as *postural* treatment.

posture (*pos'-tūr*). See *position*. **p. sense**, the capability of recognizing (without seeing) the position in which a limb has been placed.

postuterine (*pōst-ū'-ter-in*) [*post-; uterus*]. Situated behind the uterus.

postvaccinal (*pōst-vaks'-sin-nal*). Following vaccination.

postvermis (*pōst-ver'-mis*) [*post-; vermis*]. The inferior vermiform process of the cerebellum.

potable (*po'-ta-bl*) [*potare*, to drink]. Drinkable; fit to drink.

Potain's apparatus (*po-tan'*) [Pierre Carl Edouard *Potain*, French physician, 1825–1901]. An aspirator. **P.'s solution.** *For use with the hemoglobinometer:* a mixture of a solution of gum acacia, sp. gr. 1020, 1 volume; equal parts of sodium sulphate and sodium chloride in solution of sp. gr. 1020, 3 volumes. **P.'s syndrome,** dyspepsia and dilatation of the right ventricle with accentuation of the pulmonary sound, observed during the digestive process in cases of gastrectasis.

potamophobia (*pot-am-of-o'-be-ah*) [*ποταμός*, river; *φόβος*, fear]. The morbid fear of sheets of water.

potash (*pot'-ash*). 1. Potassium hydroxide; caustic potash. 2. Potassium carbonate.

potassa (*po-tas'-ah*). Potash. See *potassium hydroxide.*

potassacol (*po-tas'-sa-kol*). The potassium salt of guaiacol-sulphonic acid.

potassic (*po-tas'-ik*) [*potassa*]. Containing potassium.

potassii (*po-tas'-e-i*). Genitive of potassium.

potassiocupric (*po-tas-e-o-kū'-prik*). Containing potassium and copper.

potassiomercuric (*po-tas-e-o-mer-kū'-rik*). Combined with potassium and mercury.

potassium (*po-tas'-e-um*) [*potassa*, potash]. A silver-white, soft, very ductile metal, belonging to the alkali group, and having a sp. gr. of 0.865; quantivalence I; atomic weight 39.10; symbol K (from the Latin *kalium*). It forms compounds with nearly all nonmetals. **p. acetate** (*potassii acetas*, U. S. P., B. P.), $KC_2H_3O_2$, used in rheumatism, as a diuretic in dropsy, and in cutaneous diseases. Dose 20 gr.–1 dr. (1.3–4.0 Gm.). **p. arsenate,** K_2HAsO_4, extremely poisonous crystals, soluble in water; used as an antiperiodic and alterative Dose $\frac{1}{10}$–$\frac{1}{10}$ gr. (0.003–0.006

Gm.). **p. arsenite, solution of** (*liquor potassii arsenitis*, U. S. P.), Fowler's solution. Dose 3 min. (0.2 Cc.). **p. bicarbonate** (*potassii bicarbonas*, U. S. P., B. P.), $KHCO_3$, used as an antacid. It is also highly recommended in influenza and to abort colds. Dose 20 gr.–1 dr. (1.3–4.0 Gm.). **p. binoxalate**, salt of sorrel, a constituent of wood-sorrel. **p. bisulphate**, $KHSO_4$, has been used as a laxative and refrigerant. Dose 1–2 dr. (4–8 Gm.). **p. bitartrate** (*potassii bitartras*, U. S. P., B. P.), cream of tartar, $KHC_4H_4O_6$, used as a cathartic, as a diuretic in dropsy, and for making refrigerant drinks in febrile affections. It is an ingredient of *pulvis jalapæ compositus* (U. S. P.). Dose 1 dr.–½ oz. (4–16 Cc.). **p. bromide.** See *bromidum, potassii*, under *bromine*. **p. camphorate**, $K_2C_{10}H_{14}O_4$, white, antiseptic crystals, soluble in water, used in night-sweats of tuberculosis, gonorrhea, etc. Dose 10–30 gr. (0.65–2.0 Gm.). **p. carbolate**, C_6H_5OK, white, antiseptic crystals, soluble in water; used in diarrhea and dysentery. Dose 1–5 gr. (0.065–0.32 Gm.). **p. carbonate** (*potassii carbonas*, U. S. P., B. P.), used as an antacid in dyspepsia and as an antilithic. **p. chlorate** (*potassii chloras*, U. S. P., B. P.), $KClO_3$, used locally and internally in various forms of stomatitis, in mercurial ptyalism, and in pharyngitis. Dose 10–20 gr. (0.65–1.3 Gm.). In overdoses it is an irritant poison. From it are prepared *trochisci potassii chloratis* (U. S. P.). **p. citrate** (*potassii citras*, U. S. P., B. P.), $K_3C_6H_5O_7 + H_2O$, used as a diaphoretic in fevers, in bronchitis, and in rheumatism, the uric-acid diathesis, etc. Dose 20–30 gr. (1.3–2.0 Gm.). **p. citrate, effervescent** (*potassii citras effervescens*, U. S. P.), is used like the preceding. Dose 1–2 dr. (4.8 Cc.). **p. citrate, solution of** (*liquor potassii citratis*, U. S. P.), an aqueous liquid containing 8 % of anhydrous potassium citrate with small amounts of citric and carbonic acids. *Neutral mixture* is prepared by substituting lemon-juice for the citric acid. Dose ½–1 oz. (16–30 Cc.). **p., cobaltinitrate**, has been employed in asthma, nephritis, and valvular heart disease. Dose ⅛–½ gr. (0.016–0.032 Gm.). **p. cyanide** (*potassii cyanidum*, U. S. P., B. P.), KCN, is similar in properties to hydrocyanic acid. It is also used locally in neuralgia. Dose ⅛ gr. (0.008 Gm.). **p. dichromate, p. bichromate** (*potassii dichromas*, U. S. P., B. P.), $K_2Cr_2O_7$, used as a caustic, and for the preparation of battery-fluids and of preserving-fluids for tissues; it was formerly employed as an alterative. **p. diiodoresorcinmonosulphate.** See *picrol*. **p. dithiocarbonate**, K_2COS_2, an orange-red, crystalline powder, used externally in skin diseases: eczema, 5 to 10 % ointment; psoriasis, 20 % ointment. **p. ferricyanide**, $K_6Fe_2(CN)_{12}$, is used in the arts and as a reagent. **p. ferrocyanide** (*potassii ferrocyanidum*, U. S. P., B. P.), $K_4Fe(CN)_6 + 3H_2O$, yellow prussiate of potash, has been used in the night-sweats of tuberculosis. Dose 10–15 gr. (0.65–1.0 Gm.). It is extensively employed in the arts, as a reagent, and in pharmacy to prepare diluted hydrocyanic acid. **p. fluoresceinate**, $K_2C_{20}H_{10}O_5$, the potassium salt of fluorescein; a yellowish-red powder, soluble in water. It is used to detect corneal ulcerations. **p.- guaiacol sulphonate**, a fine white powder, soluble in water, containing 60 % of guaiacol. Dose 5–15 gr. (0.32–0.97 Gm.). **p. hydroxide** (*potassii hydroxidum*, U. S. P., B. P.), KOH, caustic potash. This is a white solid, usually occurring in the form of pencils, and having powerful escharotic properties. **p. hypochlorite**, KOCl, a substance which in solution forms Javelle water. **p. hypophosphite** (*potassii hypophosphis*, U. S. P.), KH_2PO_2. Dose 10–30 gr. (0.65–2.0 Gm.). See *hypophosphite*. **p. iodate**, is used in stomatitis and pharyngitis as a substitute for potassium chlorate. Dose 4–8 gr. (0.26–0.52 Gm.). **p. iodide** (*potassii iodidum*, U. S. P., B. P.), KI, is used as an alterative in syphilis; in chronic poisoning by lead or mercury; as an absorbent of inflammatory exudates; in chronic rheumatism, etc. Dose 2–10 gr. (0.13–0.65 Gm.); in syphilis several drams may be administered daily. From it are prepared *unguentum iodi* and *unguentum potassii iodidi* (U. S. P.). **p. nitrate** (*potassii nitras*, U. S. P., B. P.), KNO_3, saltpeter, is used as a refrigerant diuretic and diaphoretic; in asthma the inhalation of fumes produced by burning niter-paper (paper dipped in a solution of the nitrate and dried) is useful. Dose 10–20 gr. (0.65–1.3 Gm.). From it is prepared *argenti nitras mitigatus* (U. S. P.). **p. nitrite**, KNO_2, white, amorphous sticks, soluble in water; used in asthma, epilepsy, etc. Dose ½–2 gr. (0.016–0.13 Gm.) several times daily. **p. nitroprusside**, $K_2F_2.NO.(CN)_5 + 2H_2O$, garnet-red crystals, soluble in water or alcohol, used as a test for albumin in urine. **p. perchlorate**, $KClO_4$, white crystals, slightly soluble in water, antipyretic, antiperiodic, sedative, and diuretic Dose 5–15 gr. (0.32–1.0 Gm.). Syn., *hyperchlorate of potassium*. **p. permanganate** (*potassii permanganas*, U. S. P., B. P.), $KMnO_4$, is a salt of permanganic acid, which is derived from the manganese heptoxide, Mn_2O_7. It is used as an antiseptic and deodorant, in amenorrhea, and as an antidote to opium-poisoning and poisoning by snake-bites. Dose as an emmenagogue 1–2 gr. (0.065–0.13 Gm.). It is also employed as a reagent. *Condy's fluid* is an aqueous solution of potassium permanganate 2 parts in 100. **p. phosphate**, K_2HPO_4, has been used as an alterative in scrofula and pulmonary tuberculosis. Dose 10–30 gr. (0.65–2.0 Gm.) **p. salicylate**, $KC_7H_5O_3$, a white powder, soluble in water or alcohol; antipyretic, analgesic, antirheumatic. Dose 6–15 gr. (0.4–1.0 Gm.). **p. silicate**, K_2SiO_3 (approximately), soluble glass, is used as is plaster-of-Paris for making fixed dressings for fractures. **p. and sodium tartrate** (*potassii et sodii tartras*, U. S. P., B P.), $KNaC_4H_4O_6 + 4H_2O$, Rochelle salt, is used as a saline cathartic; it is an ingredient of seidlitz powder. Dose ½–1 oz. (16–32 Cc.). **p. sozoiodolate**, $KHC_6H_2I_2OSO_3$, a white crystalline powder containing 58.8 % of iodine, 20 % of phenol, and 7 % of sulphur; soluble in hot water, melts at 120° C. It is bactericidal and is used externally in 3 % ointment. **p. sulphate** (*potassii sulphas*, U. S. P., B. P.), K_2SO_4, is used as a laxative and purgative. Dose ½–4 dr. (2–16 Gm.). **p. sulphite**, $K_2SO_3 + 2H_2O$, is antiseptic and laxative and used in acid fermentation of the stomach. Dose 15–60 gr. (1–4 Gm.). **p. sulphobenzoate**, $KC_7H_5SO_5 + 5H_2O$, soluble in water or alcohol; used as a wash, 4 to 5 % solution, in skin diseases. **p. sulphocarbolate**, $KC_6H_5SO_4 + H_2O$, white crystals, soluble in water or alcohol. It is antiparasitic, germicidal, and antiseptic. **p. sulphocarbonate**, K_2CS_3, yellow crystals, soluble in water, used in baths in skin diseases. **p. sulphocyanate**

KCNS, colorless needles, soluble in water or alcohol; it is a constituent of saliva; sedative, antispasmodic, and anodyne. Dose ¼–3 gr. (0.05–0.2 Gm.); maximum dose 4½ gr. (0.3 Gm.), single; 24 gr. (1.5 Gm.) daily. **p. sulphophenate.** See *p. sulphocarbolate.* **p. tartrate** (*potassii tartras*, B. P.), $K_2C_4H_4O_6.H_2O$, is used as a mild purgative in febrile affections. Dose 1 dr.–1 oz. (4–32 Cc.). **p. valerate,** $KC_5H_9O_2$, used as a stimulant in low fevers, hysteria, etc. Dose 2–5 gr. (0.13–0.32 Gm.) several times daily.

potato culture. A culture of microorganisms on potato. **p. oil,** crude amyl alcohol. **p. treatment** (of diabetes), a daily diet of 1–2½ pounds of potatoes and the exclusion of bread.

potency (*po'-ten-se*) [see *potential*]. 1. Power; efficacy. 2. In homeopathy, the degree of dilution of a drug **p., high,** in homeopathy, a drug above the 30th dilution.

potentia (*po-ten'-she-ah*) [L.]. Power, potency, ability, faculty. **p. coeundi,** capacity for copulation. **p. generandi,** procreance.

potential (*po-ten'-shal*) [*potens*, able]. 1. Capable of acting or doing work, as *potential* energy. 2. In electricity, a state of tension or of potential energy capable of doing work. If two bodies of different potential are brought together, a current is established between them that is capable of doing work.

potentialization (*po-tent-shal-i-za'-shun*). In homeopathy, the rendering of drugs potent by attenuation, dynamization, etc.

potentiation. See *potentialization.*

potentize (*po'-tent-īz*) [*posse*, to be able]. To render potent; in homeopathy, applied to drugs.

potentor (*po-tent'-or*) [*potentia*, power]. A device for the mechanical treatment of male impotence due to lack of penile erectility.

potio (*po'-she-o*) [L.]. A potion. **p. Rivièrii,** see *Rivière's potion.*

potion (*po'-shun*) [*potio*]. A drink or draught.

potocytosis (*po-to-si-to'-sis*) [*potio*; κύτος, cell]. The ability of cells to drink solutions.

potomania (*po-to-ma'-ne-ah*) [*potio*; μανία, madness]. Delirium tremens.

Pott's aneurysm [Percival *Pott*, English surgeon, 1714–1788]. Aneurysmal varix. **P.'s boss,** the projecting spinous process noticeable on palpation in Pott's disease or vertebral caries. **P.'s caries,** Pott's disease. **P.'s curvature, P.'s gibbus,** the deformity of Pott's disease. **P.'s disease,** caries of the vertebræ, generally of tuberculous origin. The symptoms are stiffness of the spinal column, pain on motion, tenderness on pressure, undue prominence of one or more of the spines; in certain cases spasmodic pain in the abdomen; formation of abscess; occasionally, in late stages, paralysis. **P.'s fracture,** fracture of the fibula about three inches above the ankle-joint, usually with a splitting-off of the tip of the inner malleolus, and at times rupture of the internal lateral ligament, with outward displacement of the foot. **P.'s gangrene,** senile gangrene. **P.'s paraplegia,** paraplegia caused by spinal caries. **P.'s puffy tumor,** circumscribed superficial swelling of the scalp connected with osteomyelitis of the skull.

potters' asthma. A form of pneumonokoniosis prevalent among potters. **p. bronchitis.** See *bronchitis.* **p. clay.** See *argilla.* **p. consumption,** a form of pneumonokoniosis prevalent among potters. **p. lung,** a chronic inflammation of the lungs common among potters, and due to the inhalation of dust.

potus (*po'-tus*) [*potus*, a drink]. A drink; a solution or mixture intended to be used at discretion. **p. imperialis,** imperial drink, *q. v.*

pouch [Fr., *poche*, a pocket]. A sac or pocket. **p., Broca's.** See *Broca's pouch.* **p., pressure,** a bulge in the wall of the esophagus due to weakness. **p. of Douglas, p., rectouterine.** See *Douglas' culdesac.* **p., laryngeal,** a blind pouch of mucosa opening into the ventral part of the ventricle of the larynx.

Poulet's disease (*poo-la'*) [Alfred *Poulet*, French physician, 1848–1888]. Rheumatoid osteoperiostitis.

poultice (*pōl'-tis*) [*puls*, porridge]. A soft, semiliquid mass made of some cohesive substance mixed with water, and used for application to the skin, for the purpose of supplying heat and moisture or acting as a local stimulant.

poultogen (*pōl'-to-jen*). A poultice said to contain oil of wintergreen, boric acid, salicylic acid, iodine (in organic combination), and pine oils in a base of calcined siliceous earth.

pound (*pownd*). A unit of measure of weight. The *troy pound* contains 12 oz., or 5760 grains; the *avoirdupois pound* contains 16 oz., or 7000 grains. Symbol lb. See *weights and measures.* **p., foot-,** the force necessary to raise one pound through the height of one foot.

poundal (*pown'-dal*). A unit of force; that force which applied to a pound of matter for one second generates in it a velocity of one foot per second. **p., foot.** See *poundal.*

Poupart's ligament (*poo-part'*) [François *Poupart*, French anatomist, 1661–1709]. The ligament extending from the anterior superior spine of the ilium to the spine of the pubis and the pectineal line. It is the lower portion of the aponeurosis of the external oblique muscle. **P.'s line,** a vertical line from the center of the clavicle to Poupart's ligament.

powder [Fr., *poudre*, from *pulvis*, powder]. 1. A collection of fine particles. 2. In pharmacy, a collection of fine particles of one or more substances capable of passing through a sieve having meshes of a certain fineness; also a single dose of such a substance. **p., aromatic.** See *pulvis aromaticus.* **p., Dover's** (*pulvis ipecacuanhæ et opii*, U. S. P.). See *opium, powder of ipecac and.* **p., Dupuytren's.** See *Dupuytren's powder.* **p., gray,** hydrargyrum cum creta. **p., Gregory's.** See *Gregory's powder.* **p., James'.** See *antimony, powder of.* **p., Portland,** a gout remedy consisting of equal parts of the tops and leaves of *Teucrium chamædrys*, and *Erythræa centaurium*, the leaves of *Ajuga chamæpitys*, and the roots of *Gentiana lutea*, and *Aristolochia rotunda.* Dose 1 dr. (3.8 Gm.) daily before breakfast for 6 months; 40 gr. (1.2 Gm.) for 3 months; ½ dr. (1.9 Gm.) for 6 months, and finally ½ dr. (1.9 Gm.) every other day for a year. **p., Seidlitz-.** See *pulvis effervescens compositus.* **p., Tully's.** See *Tully's powder.*

pox [*pocks*, pl. of *pock*, a vesicle or pustule]. 1. A term applied to any disease possessing a vesicular or pustular eruption. 2. Vulgarly, syphilis. **p., chicken-.** See *varicella.* **p., cow-.** See *cowpox.* **p., great,** syphilis. **p., horse-,** equina. **p., small-.** See *variola.*

Pozzi's syndrome (*pod'-se*) [Samuel J. *Pozzi*, French gynecologist, 1846–1918]. Backache and leucorrhea without enlargement of the uterus; found in some cases of endometritis.

P.p. Abbreviation for *punctum proximum*, Latin for near point.

P.P. factor. Goldberger's term for the pellagra-preventive substance in vitamin B.

Ppt. Abbreviation for *precipitate*.

Pr. 1. Abbreviation for *presbyopia*. 2. Symbol for the chemical element *praseodymium*.

P.r. Abbr. for *punctum remotum*, L. for far point.

practice (*prak'-tis*) [*practicare*, to practice]. The routine application of the principles of medicine to the diagnosis and treatment of disease.

practician (*prak-tish'-an*). See *practitioner*.

practise (*prak'-tis*) [see *practice*]. To perform the duties of a physician.

practitioner (*prak-tish'-on-er*) [see *practice*]. One who practises medicine.

præ- (*pre-*) [L.]. See *pre-*.

præcava (*pre'-ka-vah*). See *precava*.

præcordia (*pre-kor'-de-ah*). See *precordia*.

præcornu (*pre-kor'-nū*). See *precornu*.

præcribrum (*pre-krib'-rum*) [*præ, before; cribrum*, a sieve]. The anterior perforated space.

præcuneus (*pre-kū-ne'-us*). See *precuneus*.

prægeniculatum (*pre-jen-ik-ū-la'-tum*). See *pregenisculatum*.

præmaxilla (*pre-maks-il'-ah*). See *premaxilla*.

præmedulla (*pre-me-dul'-ah*). *Medulla oblongata*.

præperforatus (*pre-per-for-a'-tus*). *Preperforatus*.

præputium (*pre-pū'-she-um*). See *prepuce*.

prævermis (*pre-ver'-mis*). The upper or fore part of the vermis of the cerebellum.

prævia (*pre'-ve-ah*) [fem. of *prævius*, from *præ*, before; *via*, a way]. Coming before; standing before. **p., placenta.** See *placenta prævia*.

pragmatagnosia (*prag-mat-ag-no'-ze-ah*) [πρᾶγμα, an object; ἀγνωσία, want of recognition]. Inability to recognize an object. **p., visual**, a term suggested for object-blindness.

pragmatamnesia (*prag-mat-am-ne'-ze-ah*) [πρᾶγμα, an object; ἀμνήσια, forgetfulness]. Inability to remember the appearance of an object. **p., visual**, a term suggested for that mental condition in which there is inability to call up the visual image of an object.

Prague method (*prāg*, or *prahg*) [*Prague*, the capital of Bohemia]. A method of delivery of the aftercoming head. The child's ankles are grasped above the internal malleoli with the right hand. The index finger of the left hand is flexed over one clavicle, and the remaining fingers of the same hand over the other clavicle. Traction directly down is now made with both hands until the perineum is well distended. The right hand then loosens its hold upon the ankles and again grasps higher up the legs, the child's feet being in contact with the back of the right hand. By a circular movement the feet are now raised toward the mother's abdomen, the obstetrician using the left hand, as originally placed, as a fulcrum around which the head moves. **P. pelvis**, spondylolisthetic pelvis.

prairie-itch. A name applied to various forms of skin diseases associated with pruritus, occurring in men engaged in work on prairies, among lumbermen, and others, and either due to scabies or pruritus hiemalis.

Prana apparatus (*prah'-nah*). An apparatus for producing pencils of carbon dioxide snow.

praseodymium (*pras-e-o-dim'-e-um*). A metallic element, one of the constituents of didymium.

prasoid (*pra'-soid*). 1. A solution of globularin and globularetin; used in acute gout and rheumatism. Dose 15–20 drops 3 times daily. 2. [πράσον, the leek; εἶδος, likeness]. The color of a leek; leek-green.

Prat's symptom. In an injured limb the muscles become rigid before the occurrence of gangrene.

pratique (*prah-teek'*) [Fr.]. The bill-of-health given to vessels by a health officer.

Pratt's operation. The practice of orificial surgery, based on the belief that many chronic diseases are due to morbid conditions of the orifices of the body, particularly the anus and the urogenital canal. The operation consists in the dilatation of either or both of these orifices and the removal of any irritating condition present.

Pravaz's syringe (*prav-ahz'*) [Charles Gabriel *Pravaz*, French physician, 1791–1853]. A hypodermic syringe.

praxinoscope (*praks-in'-o-skōp*) [πρᾶξις, a doing; σκοπεῖν, to examine]. A modification of the zoetrope adapted to the purposes of laryngological instruction.

praxiology (*praks-e-ol'-o-je*) [πράξις, action; λόγος, discourse]. The science of conduct.

Pray's test-letters or test. A test for astigmatism, consisting of capital letters composed of strokes that run in different directions for each letter.

pre- [præ-]. A prefix signifying before.

preacetabular (*pre-as-et-ab'-ū-lar*) [*pre-; acetabulum*]. Situated in front of the acetabulum.

preagonal (*pre-ag'-on-al*). Immediately preceding the death agony.

prealbuminuric (*pre-al-bū-min-ū'-rik*). Occurring before the appearance of albuminuria.

preanal (*pre-a'-nal*) [*pre-; anus*]. Situated in front of the anus.

preanesthetic (*pre-an-es-thet'-ik*). Giving hypnotics before administering anesthetics so as to allay fear, etc.

preantiseptic (*pre-an-tis-ep'-tik*). Pertaining to the time before the adoption of antisepsis in surgical practice.

preaortic (*pre-a-or'-tik*) [*pre-; aorta*]. Situated in front of the aorta.

preaseptic (*pre-a-sep'-tik*) [*pre-; asepsis*]. Pertaining to the period before the introduction of aseptic surgery.

preatactic (*pre-ah-tak'-tik*). See *preataxic*.

preataxic (*pre-at-aks'-ik*) [*pre-; ataxia*]. Occurring before ataxia.

preauditory (*pre-aw'-dit-or-e*) [*præ*, before; *audire*, to hear] Situated in front of the auditory nerve or canal.

preauricular (*pre-aw-rik'-ū-lar*). Situated in front of the auricle.

preaxal (*pre-aks'-al*) [*præ*, before; *axis*]. Prechordal; placed in front of the axon.

preaxial (*pre-aks'-e-al*) [*pre-; axis*]. Situated in front of the axis of the body or of a limb.

prebacillary (*pre-bas'-il-a-re*) [*pre-; bacillus*]. Occurring before the invasion of the system by bacilli.

prebasilar (*pre-bas'-il-ar*) [*præ*, before; *basis*, base] Situated, or occurring, in front of any basilar structure, especially in front of the basilar process of the occipital bone.

prebrachial (*pre-bra'-ke-al*) [*præ*, before; *brachium*. arm]. Located on the anterior aspect of the brachium or upper arm, *e. g.*, the group of prebrachial muscles: biceps, coraco-brachialis, and brachialis anticus.

prebrachium (*pre-bra'-ke-um*). See *brachium quadrigeminum superius*.

precancerous (*pre-kan'-ser-us*) [*pre-; cancer*]. Occurring before the development of a carcinoma.

precapillary (*pre-cap'-il-ar-e*). An arteriole or venule.

precardiac (*pre-kar'-de-ak*) [*pre-*; *καρδία*, heart]. Anterior to the heart.

precava (*pre-ka'-vah*) [*præ*, before; *cavus*, hollow]. The superior, or descending vena cava.

precentral (*pre-sen'-tral*) [*pre-*; *centrum*, center]. Situated in front of the central fissure of the brain. **p. convolution**, a convolution in front of the central fissure of the brain; the ascending frontal convolution.

precerebellar (*pre-ser-e-bel'-ar*) [*præ*, before; *cerebellum*]. Situated before (above) the cerebellum.

precerebral (*pre-ser'-e-bral*) [*præ*, before; *cerebrum*]. Situated, or occurring before (above), the cerebrum.

prechordal (*pre-kor'-dal*) [*præ*, before; *chorda*, chord, string]. Situated in front of the notochord.

precipitant (*pre-sip'-it-ant*). Any reagent causing precipitation.

precipitate (*pre-sip'-it-āt*) [*precipitare*, from *præ*, before; *caput*, head]. 1. The solid substance thrown down from a solution of a substance on the addition of a reagent which deprives it of its solubility. 2. The product of the reaction between precipitinogen and precipitin. 3. To throw down in an insoluble form. 4. Headlong; hasty. **p. labor.** See *labor, precipitate.* **p., red,** hydrargyrum oxidum rubrum. See *mercury oxide, red.* **p., white,** $N_2(Hg_2)_3Cl_2$, hydrargyrum ammoniatum. See *mercury, ammoniated.*

precipitation (*pre-sip-it-a'-shun*) [*precipitate*]. 1. The process of throwing down solids from the liquids which hold them in solution. Precipitates are crystalline, amorphous, curdy, flocculent, granular, or gelatinous, according to the form assumed. 2. The process of clumping which occurs on the meeting of a specific antigen and its antibody.

precipitin (*pre-sip'-it-in*). A body produced in the blood-plasma of animals by repeated injections of bacterial filtrates or foreign organic substances (serum, milk, etc.) and causing a precipitation of the bacteria or foreign substance used in the preparation. **p. reaction,** Wassermann's test, *q. v.*

precipitinogen (*pre-sip-it-in'-o-jen*). Any substance capable of causing the production of a specific precipitin.

precipitinoid (*pre-sip'-it-in-oid*). An inactive precipitin modified by heating to 60° C.

precipitogen (*pre-sip'-it-o-jen*). Precipitinogen.

precipitophore (*pre-sip'-it-o-fōr*) [*precipitin*; *φόρος*, bearer]. That group in a precipitin which causes precipitation; in opposition to the haptophore group.

precipitum (*pre-sip'-it-um*). Same as precipitate (2), *q. v.*

preclavicular (*pre-kla-vik'-ū-lar*). Ventrad of the clavicle.

preclival (*pre-kli'-val*). In front of the clivus of the cerebellum.

precocity (*pre-kos'-it-e*) [*præ*, before; *coquere*, to ripen]. Early development or maturity. It is applied especially to great development of the mental faculties at an early age.

precommissure (*pre-kom'-is-ūr*) [*præ*, before; *commissura*, commissure]. The anterior commissure of the brain.

preconvulsant (*pre-kon-vul'-sant*). Relating to the stage of a disease preceding convulsions.

precordia (*pre-kor'-de-ah*) [*pre-*; *cor*, the heart]. 1. A name applied by the ancients to the diaphragm, the thoracic viscera, or the epigastric region. 2. The area of the chest overlying the heart.

precordial (*pre-kor'-de-al*) [*precordia*]. Pertaining to the precordia.

precordialgia (*pre-kor-de-al'-je-ah*) [*præ*, before; *cor*, heart; *ἄλγος*, pain]. Pain in the precordial region.

precordium (*pre-kor'-de-um*). Syn., *precordia.*

precornu (*pre-kor'-nū*) [*pre-*; *cornu*, a horn]. Anterior horn of lateral ventricle of the brain.

precostal (*pre-kos'-tal*) [*pre-*; *costa*, a rib]. Situated in front of the ribs.

precribrum (*pre-krib'-rum*) [*præ*, before; *cribrum*, sieve]. The anterior perforated space of the brain.

precuneal (*pre-kū'-ne-al*) [*præ*, before; *cuneus*, wedge] Situated in front of the cuneus; specifically, pertaining to the precuneus.

precuneate (*pre-kū'-ne-āt*) See *precuneal.*

precuneus (*pre-kū'-ne-us*) [*pre-*; *cuneus*, a wedge]. The quadrate lobule of the parietal lobe situated in front of the cuneus of the occipital lobe.

prediastole (*pre-di-as'-to-le*). The interval, in the cardiac rhythm, which immediately precedes the diastole.

prediastolic (*pre-di-as-tol'-ik*) [*pre-*; *diastole*]. Occurring before the diastole.

predicrotic (*pre-di-krot'-ik*). Preceding the dicrotic wave or elevation of the sphygmographic tracing.

predigested (*pre-dij-es'-ted*) [*præ*, before; *digerere*, to digest]. Partly digested by artificial means before being taken into the stomach. **p. foods,** foods that have been prepared by a process of artificial digestion through the agency of various ferments.

predigestion (*pre-di-jes'-chun*) [*præ*, before; *digerere*, to digest]. The partial digestion of food before it is eaten.

predisposing (*pre-dis-po'-zing*) [see *predisposition*]. Rendering susceptible or liable to attack.

predisposition (*pre-dis-po-zish'-un*) [*pre-*; *disponere*, to dispose]. The state of having a susceptibility to disease.

predormition (*pre-dor-mish'-un*) [*præ*, before; *dormition*]. Applied to the stage of unconsciousness immediately preceding actual sleep.

preepiglottic (*pre-ep-i-glot'-ik*). Ventrad of the epiglottis.

preeruptive (*pre-e-rup'-tiv*). Preceding eruption.

prefontanel (*pre-fon-tan-el'*) [*præ*, before; *fontanel*]. The anterior fontanel.

preforceps (*pre-for'-ceps*) [*præ*, before; *forceps*]. Those hooked or curved anterior fibers of the callosum that reach cephalad into the frontal lobe

preformation (*pre-for-ma'-shun*). In biology, the doctrine that the fully formed organism exists in the germ, and that development is merely its unfolding.

prefrontal (*pre-fron' tal*) [*pre-*; *frons*, forehead]. 1. Situated in the anterior part of the frontal lobe of the brain. 2. The middle part of the ethmoid.

preganglionic (*pre-gang-gle-on'-ik*). Situated in front of, or preceding a ganglion.

pregeminal (*pre-jem'-in-al*) [*præ*, before; *geminus*, twin]. Relating to the anterior pair of the corpora quadrigemina.

pregeminum (*pre-jem'-in-um*) [*pre-*; *geminus*, twin]. The anterior pair of the corpora quadrigemina, considered as forming a single organ.

pregeniculatum, pregeniculum (*pre-jen-ik-ū-la'-tum, pre-jen-ik'-ū-lum*) [*pre-*; *geniculatum*, geniculate]. The external geniculate body.

preglobulin (*pre-glob'-ū-lin*) [*pre-; globulin*]. An albuminous body found in cell-protoplasm, insoluble in water, soluble in a 10% sodium chloride solution and in dilute alkaline solution.

pregnancy (*preg'-nan-se*) [*prægnans*, from *præ*, before; *gignere*, to beget]. See *Table of Duration* p. 1143. Being with child; the state of the woman from conception to the expulsion of the ovum. **p., abdominal,** one in which the fetus lies in the abdominal cavity. **p., bigeminal,** twin pregnancy. **p., cornual,** that occurring in one of the horns of a two-horned uterus. **p., ectopic,** extrauterine pregnancy. **p., extrauterine,** ectopic gestation; the development of the ovum outside of the cavity of the uterus. **p., false,** any condition in the abdomen that simulates pregnancy. **p., hydatid,** pregnancy with the formation of a hydatid mole. **p., interstitial,** pregnancy occurring in the part of the tube that traverses the uterine wall. **p., intramural,** interstitial pregnancy. **p., mesenteric,** tuboligamentary pregnancy. **p., molar,** pregnancy in which the ovum is converted into a mole. **p., multiple,** that form in which the uterus contains two or more developing ova. **p., mural,** a variety of extrauterine pregnancy in which the ovum develops in the wall of the uterus. **p., ovarian,** pregnancy occurring in the ovary. **p., parietal,** interstitial pregnancy. **p., phantom,** in hysteria, abdominal enlargement simulating pregnancy. **p., plural,** multiple pregnancy. **p., sarcofetal,** that in which both a fetus and a mole are present. **p., sarcohysterical,** false pregnancy due to a mole. **p., signs of,** those clinical manifestations by which the existence of pregnancy may be demonstrated. There are three so-called absolute signs; ballottement, fetal movements, and the fetal heart-sounds. **p., tubal,** pregnancy which takes place within the Fallopian tube. **p., tuboabdominal,** that in which the ovum is developed in the ampulla and extends into the abdominal cavity. **p., tuboligamentary,** that in which there is secondary invasion of the broad ligament and subperitoneal tissues. **p., tuboovarian,** that in which the ovum is attached to the oviduct and ovary. **p., tubouterine.** See *p., interstitial.* **p., uteroabdominal,** where there is one fetus in the uterus and another in the abdominal cavity. **p., uteroovarian,** having one fetus in the uterus and another in the ovary. **p. uterotubal,** one fetus is in the uterus and another in the oviduct.

pregnant (*preg'-nant*). With child, gravid.

prehemiplegic (*pre-hem-i-ple'-jik*) [*pre-; hemiplegia*]. Occurring before an attack of hemiplegia, as *prehemiplegic* chorea.

prehensile (*pre-hen'-sil*). Adapted for grasping.

prehension (*pre-hen'-shun*) [*prehendere*, to lay hold of]. The act of grasping or seizing.

prehyoid (*pre-hi'-oid*). In front of the hyoid bone.

prehypophosis (*pre-hi-poff'-is-is*). The anterior and larger portion of the hypophysis.

preinsula (*pre-in'-sū-lah*) [*præ*, before; *insula*]. The cephalic region of the insula.

Preiser's disease (*pri'-zer*). Osteoporosis of the scaphoid bone of the wrist, caused by trauma.

prelacrymal (*pre-lak'-rim-al*). Situated in front of the lacrymal bone, or gland, or sac.

prelaryngeal (*pre-lar-in'-je-al*). Situated in front of the larynx.

prelimbic (*pre-lim'-bik*) [*pre-; limbus*, a border; a band]. Lying in front of a limbus. **p., fissure,** the anterior portion of the calloso-marginal fissure.

prelocomotion (*pre-lo-ko-mo'-shun*) [*pre-; locomotion*]. The movements of a child who has not yet learned to walk which indicate the intention of moving from one place to another.

prelum (*pre'-lum*) [L.]. A press. **p. abdominale,** the squeezing of the abdominal viscera between the diaphragm and the rigid abdominal wall, as in the processes of defecation, micturition, and parturition. **p. arteriale,** a tourniquet.

prelumbar (*pre-lum'-bar*) [*præ*, before; *lumbus*, loin]. Anterior to the lumbar vertebræ or the loins

premalignant (*pre-mal-ig'-nant*). Occurring before the development of malignancy.

premaniacal (*pre-ma-ni'-ak-al*) [*præ*, before; *μανία*, mania]. Previous to insanity, or to an attack or mania.

premature (*pre'-ma-tūr'*). Occurring before the proper time, as *premature* labor.

premaxilla (*pre-maks-il'-ah*). The intermaxillary bone.

premaxillary (*pre-maks'-il-a-re*). In front of the maxilla. **p. bone,** the incisive or intermaxillary bone.

premenstrual (*pre-men'-stroo-al*). Preceding menstruation.

premolar (*pre-mo'-lar*). 1. Situated in front of the molar teeth. 2. One of the two bicuspid teeth 3 A molar tooth of the temporary set.

premonitory (*pre-mon'-it-o-re*). Forewarning; foreboding, as *premonitory* symptoms, those which forbode the onset of an attack of a disease.

premonocyte (*pre-mon'-o-sīt*). An embryonic monocyte.

premyelocyte (*pre-mi'-el-o-sīt*). An embryonic myelocyte.

prenaris (*pre-na'-ris*) [*præ*, before; *naris*, nostril; *pl., prenares*]. The anterior naris.

prenasal (*pre-na'-zal*) [*præ*, before; *nasus*, nose]. In front of the nose or nasal passages.

prenatal (*pre-na'-tal*) [*pre-; natus*, born]. Existing or occurring before birth.

prenidatory (*pre-ni'-da-tor-e*) [*præ*, before; L., *Nidus*, nest]. Before nidation, *q. v.*

preoblongata (*pre-ob-lon-gah'-tah*). The cephalic portion of the oblongata; situated mainly between the pons and the fourth ventricle.

preoccipital (*pre-ok-sip'-it-al*) [*præ*, before; *occiput*]. Situated anterior to the occipital region. **p. fissure,** a fissure on the ventral, lateral surface of the cerebrum separating the occipital and sphenotemporal lobes. **p. notch,** a notch indicating the division between the occipital and temporal lobes of the brain.

preoperculum, præoperculum (*pre-o-per'-kū-lum*) [*præ*, before; *operculum*, a lid: *pl., preopercula*]. The frontal operculum of the brain, between the presylvian and subsylvian fissures.

preoptic (*pre-op'-tik*). Anterior to the optic lobes; pregeminal.

preopticus (*pre-op'-tik-us*) [*præ*, before; *ὀψ*, sight]. The anterior pair of the quadrigeminal bodies.

preoral (*pre-o'-ral*) [*præ*, before; *os, oris*, mouth]. Situated in front of the mouth; prebuccal.

prepalatal (*pre-pal'-at-al*). Situated in front, or in the anterior part, of the palate.

prepallium (*pre-pal'-e-um*). That part of the cerebral cortex which is in front of the fissure of Rolando.

preparation (*prep-ar-a'-shun*) [*præparare*, to make ready]. 1. The act of making ready. 2. Anything made ready, especially, in anatomy, any

ELY'S TABLE OF THE DURATION OF PREGNANCY

Explanation.—Find in the upper horizontal row the date of last menstruation; the figure beneath will show the expiration of 280 days or ten months of 28 days each.

January. . . .	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31

part of the body prepared or preserved for illustrative or other uses. 3. In pharmacy, any compound or mixture made after a formula.

preparative, preparator (*pre-par'-at-iv, prep'-ar-a-tor*). An immune body; amboceptor.

prepatellar (*pre-pat-el'-ar*) [*pre-; patella*]. Situated in front of the patella, as *prepatellar* bursa.

prepeduncle (*pre-pe'-dung-kl*) [*præ*, before; *pedunculus*, peduncle]. The anterior of the cerebellar peduncles.

preperforatus (*pre-per-for-a'-tus*) [*præ*, before; *perforare*, to perforate]. The anterior perforated space.

preperitoneal. See *properitoneal.*

prephthisis (*pre-ti'-sis, pre-te'-sis*) [*præ*, before; *phthisis*]. The pretuberculous state. The predisposition to tuberculosis.

prephyson (*pre-fi'-son*) [*præ*, before; *φύειν*, to grow]. Hormone from the anterior lobe of pituitary body, which stimulates metabolism.

prepituitary (*pre-pit-ū'-it-a-re*) [*præ*, before; *pituitary*]. Situated in front of the pituitary body.

preplacental (*pre-plas-en'-tal*) [*præ*, before; *placenta*]. Previous to the formation of the placenta.

prepontile (*pre-pon'-til*) [*præ*, before; *pons*, a bridge]. Situated in front of or above the pons Varolii.

prepotency (*pre-po'-ten-se*) [*præ*, before; *posse*, to be powerful]. The dominant "force of heredity." The power that one parent may have of impressing his or her own character upon the offspring, the peculiar characters of the other parent being less obviously transmitted.

prepotent (*pre-po'-tent*) [*præ*, before; *posse*, to be able]. Having a marked tendency to transmit individual characters to offspring.

prepuberal (*pre-pū'-ber-al*). Prior to puberty.

prepubescent (*pre-pū-bes'-ent*). Prepuberal.

prepuce (*pre'-pūs*) [*præputium*, prepuce]. The foreskin of the penis, a fold of skin lined by mucous membrane and covering the glans penis.

prepucectomy (*pre-pū-sek'-to-me*) [*prepuce; ἐκτομή*, an excision]. Removal of the prepuce; circumcision.

prepucotomy (*pre-pū-cot'-o-me*) [*prepuce; τομή*, a cutting]. An incision into the prepuce; an incomplete circumcision.

preputial (*pre-pū'-she-al*) [*prepuce*]. Pertaining to the prepuce.

preputiectomy (*pre-pū-she-ek'-to-me*) ¶ [*prepuce; ἐκτομή*, excision]. Excision of the prepuce.

prepyloric (*pre-pi-lor'-ik*) [*præ*, before; *pylorus*]. Placed in front of or preceding the pylorus.

prepyramid (*pre-pir'-am-id*) [*præ*, before; *pyramis*, pyramid]. One of the anterior (ventral) pyramids of the oblongata.

preramus (*pre-ra'-mus*) [*præ*, before; *ramus*, branch]. The vertical (anterior or cephalic) branch of the stem of the arbor of the cerebellum.

prerectal (*pre-rek'-tal*) [*præ*, before; *rectum*]. Situated in front of the rectum.

prerenal (*pre-re'-nal*) [*præ*, before; *ren*, kidney]. Situated in front of the kidney.

prereproductive (*pre-re-pro-duk'-tiv*). Relating to the period of life preceding puberty.

presbyacusia, presbyacousia (*prez-be-ah-koo'-se-ah*). Presbycusis.

presbyatrics (*prez-be-at'-riks*) [*πρέσβυς*, old; *ἰατρική*, treatment]. That branch of medicine which deals with the diseases of old age.

presbycusis, presbykousis (*prez-be-koo'-sis*) [*πρέσβυς*, old; *ἀκούειν*, to hear]. The lessening of the acuteness of hearing that occurs in old age.

presbyonosus (*prez-be-on'-o-sus*) [*πρέσβυς*, old; *νόσος*, disease]. Any disease peculiar to old age.

presbyope (*prez'-be-ōp*) [see *presbyopia*]. One who is presbyopic.

presbyophrenia (*prez-be-o-fren'-e-ah*) [*πρέσβυς*, old; *φρήν*, mind]. Senile dementia.

presbyopia (*prez-be-o'-pe-ah*) [*πρέσβυς*, old; *ὤψ*, eye]. The condition of vision in the aged, due to diminished power of accommodation from impaired elasticity of the crystalline lens, whereby the near-point of distinct vision is removed farther from the eye.

presbyopic (*prez-be-op'-ik*). Affected with presbyopia.

presbyosphacelus (*prez-be-o-sfas'-el-us*) [*πρέσβυς*, old; *σφάκελος*, gangrene]. Senile gangrene.

presbytia (*prez-bish'-e-ah*). Synonym of *presbyopia.*

presbytic (*prez-bit'-ik*). Suffering from presbyopia.

presbytism (*prez'-bit-izm*). Presbyopia.

prescapularis (*pre-skap-ū-la'-ris*) [*præ*, before; *scapula*]. The supraspinatus muscle.

presclerosis (*pre-skle-ro'-sis*). The vascular condition which precedes arteriosclerosis.

presclerotic (*pre-skle-rot'-ik*). Preceding the occurrence of sclerosis.

prescribe (*pre-skrīb'*) [*pre-; scribere*, to write]. To give instructions concerning a remedy to be used in case of sickness.

prescription (*pre-skrip'-shun*) [*pre-; scribere*, to write]. A formula written by the physician to the apothecary, designating the substances to be administered. A prescription consists of the heading, usually the symbol ℞ (standing for the Latin word *recipe*, imperative of *recipere*, to take), the names and quantities of the ingredients, the directions to the apothecary, the directions to the patient, the date and the signature. **p., shotgun,** a prescription containing several ingredients one of which it is hoped, will "hit the mark."

presecretion (*pre-se-kre'-shun*). A hormone.

presenile (*pre-se'-nīl*) [*pre-; senilis*, age]. Prematurely old.

presenility (*pre-sen-il'-it-e*). Premature old age. See *progeria.*

present (*pre-zent'*) [*præsentare*, to place before]. Of a part of the fetus, to appear first at the os uteri.

presentation (*prez-en-ta'-shun*) [see *present*]. In obstetrics, that part of the fetal body which presents itself to the examining finger at the os uteri.

preservalin (*pre-serv'-al-in*). A mixture of borax and boric acid used by dairymen.

presphenoid (*pre-sfe'-noid*). The anterior part of the body of the sphenoid bone.

presphygmic (*pre-sfig'-mik*) [*præ*, before; *σφυγμός*, pulse]. Pertaining to the period preceding the pulse-wave.

prespinal (*pre-spi'-nal*) [*præ*, before; *spina*, spine]. In anatomy, ventrad of the spine.

presse-artère (*pres'-ar-tār*) [Fr.]. An instrument for the compression or temporary occlusion of an artery.

pressor (*pres'-or*) [*premere*, to press]. 1. Stimulating. 2. A substance found in the unfundibular part of the hypophysis; it produces a rise in blood-pressure. Cf. *depressor.* **p. nerves.** Nerves which under stimulation cause the vasomotor centers to react.

pressure (*presh'-ur*) [*premere*, to press]. Force, weight, or tension. **p., after,** the sense of pres-

sure that remains for a brief period after the removal of an object from the surface of the body. **p., arterial,** the tension of the blood within the arteries. **p., atmospheric,** the pressure of the atmosphere; it equals about fifteen pounds to the square inch at sea-level. **p., bipolar,** pressure on the two ends of a bone. It is used in differentiating fractures from contusions, producing pain in the case of the former. **p., blood,** the pressure of the blood against the walls of the vessels or of the heart. It is measured by means of the manometer. **p., critical,** that pressure on a gas or vapor which will, at the critical temperature, convert it into a liquid. **p., endocardial,** the pressure of the blood within the heart **p., intra-abdominal,** the pressure exerted upon the parietes by the abdominal viscera. **p., intracranial,** the pressure of the contents of the cranium upon its walls. **p., intra-ocular.** See *tension, intraocular.* **p., intrathoracic,** the pressure of the intrathoracic organs upon the walls of the chest. **p.-myelitis,** myelitis from pressure on the cord. **p., negative,** the force of suction; also absence of pressure. **p., osmotic,** the force with which water is attracted by a solution in a semipermeable container. **p.-points** or **spots,** points of marked sensibility to pressure or weight, arranged like the temperature-spots, and showing a specific end-apparatus arranged in a punctated manner and connected with the pressure-sense. **p.-pouch.** See *pouch.* **p., pulse,** the difference between the systolic and diastolic blood-pressure. **p.-sense,** the sense by which knowledge is obtained of the amount of weight or pressure which is exerted upon a part of the body. **p. sore.** See *bedsore.*

presternum (*pre-ster'-num*). The manubrium or superior segment of the sternum.

Preston's salt. Ammonium carbonate.

presuppurative (*pre-sup'-ū-ra-tiv*). Pertaining to an early stage of inflammation, prior to suppuration.

presylvian fissure. The anterior branch of the Sylvian fissure

presystole (*pre-sis'-to-le*) [*præ,* before; *systole*]. The period of the heart's pause preceding the systole.

presystolic (*pre-sis-tol'-ik*) [*pre-; systole*]. Preceding the systole of the heart, as the *presystolic* murmur, *presystolic* thrill.

pretarsal (*pre-tar'-sal*). Located anterior to the tarsus

prethyroid (*pre-thi'-roid*). Situated in front of the thyroid gland or the thyroid cartilage.

pretibial (*pre-tib'-e-al*) [*pre-; tibia*]. Situated in front of the tibia.

pretuberculous (*pre-tū-ber'-kū-lus*). Preceding the development of tuberculosis.

pretympanic (*pre-tim-pan'-ik*) [*præ,* before; *tympanum*]. Situated in front of the tympanum or tympanic region.

preurethritis (*pre-ū-re-thri'-tis*) Inflammation of the vestibule of the vagina, around the urethral orifice.

preventive (*pre-ven'-tive*). Warding off. **p. medicine,** the department of medicine dealing with the means and methods of preventing disease.

preventorium (*pre-ven-to'-re-um*). A residence for the care of persons who are thought to be likely to acquire tuberculosis.

preventriculosis (*pre-ven-trik-ū-lo'-sis*) [*pre-;* ventriculus, stomach]. Cardiospasm.

prevermis (*pre-ver'-mis*) [*præ,* before; *vermis* worm]. The superior vermiform process of the cerebellum.

prevertebral (*pre-ver'-te-bral*) [*pre-; vertebra*]. Situated in front of the vertebræ.

prevertiginous (*pre-ver-tij'-in-us*) [*pre-; vertigo*]. Dizzy, with a tendency to fall prone.

prevesical (*pre-ves'-ik-al*) [*præ,* before; *vesica,* bladder]. Situated in front of the bladder.

Prévost's symptom (*pra-vo'*) [Jean Louis *Prévost,* Swiss physician, 1838–]. Conjugate deviation of the eyes and head, which look away from the palsied extremities and toward the affected hemisphere; it is noted in cerebral hemorrhage.

Preyer's test for carbon monoxide in the blood. Warm three or four drops of the suspected blood for five minutes at 30° C. with 10 Cc. of water and 5 Cc. of potassium cyanide solution (1:2). The spectrum of normal blood, when so treated, loses the absorption line of oxyhemoglobin and in its place shows a broad absorption band, while the spectrum of carbon monoxide blood remains unchanged.

prezygapophysis (*pre-zi-gap-off'-is-is*) [*præ,* before; ζυγόν, yoke; ἀπόφυσις, process]. An anterior or superior zygapophysis; a superior oblique, or articular process of a vertebra.

priapism (*pri'-ap-izm*) [Πρίαπος, the god of procreation]. Persistent erection of the penis, usually unaccompanied by sexual desire. It is caused by injuries to the spinal cord or to the penis, and by vesical calculus.

priapitis (*pri-ap-i'-tis*). Inflammation of the penis.

prickle-cell. A cell possessing delicate rod-shaped processes by which it is connected with neighboring cells.

prickle-layer. The lowest stratum of the epidermis. It is formed of prickle-cells.

prickly heat. See *miliaria.*

Priessnitz bandage (*prees'-nits*) [Vincenz *Priessnitz,* German "healer," 1799–1851]. A cold wet compress.

Priestley's mass (*prēst'-le*) [Joseph *Priestley,* English clergyman and scientist, 1733–1804]. A green or greenish-brown deposit sometimes seen, especially in young individuals, on the upper and lower incisor and canine teeth; it is due to a growth of chromogenic fungi in Nasmyth's membrane.

primæ viæ (*pri'-me vi'-e*) [L., "The primary passages"]. The alimentary canal, the lacteals being "the secondary passages."

primary (*pri'-ma-re*) [*primus,* first]. First in time or in importance. **p. amputation,** one that is done before the development of inflammation, usually within the first 24 hours. **p. anesthesia,** the transient anesthesia from a small amount of the anesthetic. **p. bubo,** a simple adenitis of an inguinal lymphatic gland, resulting from mechanical irritation. Syn., *bubon d'emblée.* **p. dementia,** a form of insanity occurring in young adults, and characterized by an extreme degree of apathy, the patient lying motionless, absolutely listless, without wants, and seemingly without preception of his surroundings. **p. lesion,** the original lesion which forms the starting-point for secondary lesions. **p. sore,** the initial sclerosis or chancre of syphilis.

primigravida (*pri-me-grav'-id-ah*) [*primus,* first; *gravidus,* pregnant]. A woman pregnant for the first time.

primipara (*pri-mip'-ar-ah*) [*primus,* first; *parere,* to bear]. A woman bearing or giving birth to her first child.

primiparity (*pri-mip-ar'-it-e*) [*primus*, first; *parere*, to bear]. The condition of being a primipara.

primiparous (*pri-mip'-ar-us*) [*primipara*]. Pregnant or in labor for the first time.

primisternal, primisternalis (*pri-me-ster'-nal, pri-me-ster-na'-lis*). Relating to the manubrium of the sternum.

primitiæ (*pri-mish'-e-e*) [*primus*, first]. The part of the liquor amnii discharged before the extrusion of the fetus at birth.

primitive (*prim'-it-iv*) [*primus*, first]. First-formed; original. **p. groove**, the enlargement and deepening of the primitive streak. **p. streak, p. trace**, a streak appearing at the end of the germinal disc, and indicating the first trace of the embryo.

primordial (*pri-mor'-de-al*) [*primus*, first; *ordiri*, to rise]. Existing in the beginning; first-formed; primitive; original; of the simplest character. **p. kidney**, the Wolffian body. **p. ova**, cells lying among the germ-epithelium of the surface of the embryonic ovary.

primordium (*pri-mor'-de-um*). An organ or structure in its earliest state.

Primula (*prim'-ū-lah*) [*primus*, first]. Primrose, a genus of the *Primulaceæ*. Many species contain saponin and other bitter principles and salicylates. *P. obconica* is a well-known irritant poison, the symptoms resembling those of saponin poisoning, and is used in the treatment of skin diseases.

princeps (*prin'-seps*) [L., "a leader"]. First; original. **p. cervicis**, a branch of the occipital artery supplying the trapezius muscle. **p. pollicis**, a branch of the radial artery going to the palmar surface of the thumb.

principle (*prin'-sipl*) [*principium*, from *princeps*] A constituent of a compound having a definite composition and representing its essential or characteristic properties. **p., proximate.** See *proximate principle.* **p., ultimate**, any one of the elements which a compound body contains.

prinos (*pri'-nos*) [L.]. Black alder, a shrub of the order *Aquifoliaceæ*. The bark and the berries of *P. verticillatus* have been employed as tonics and astringents in diarrhea, and locally as an application to ulcers Dose ½–1 dr. (2–4 Cc.); of a decoction 1–2 oz. (32–64 Cc.).

printers' palsy (*prin'-terz*). Chronic antimonial poisoning.

prism (*prism*) [πρίσμα, from πρίζειν, to saw]. A solid whose bases or ends are similar plane figures and whose sides are parallelograms. In optics, a transparent solid with triangular ends and two converging sides. It breaks up white light into its component colors, and bends the rays of light toward the side opposite the angle (the base of the prism), and is used to measure or correct imbalance of the ocular muscles. **p.-diopter, p. dioptry**, a unit of prismatic refractive power; the refractive power of a prism that deflects a ray of light one centimeter on a tangent plane situated at a distance of one meter. **p., enamel-**, one of the prismatic columns of from four to six sides composing the enamel of teeth, closely packed together and generally vertical to the surface of the underlying dentin. **p., Nicol's.** See *Nicol's prism.* **p.-optometer**, an instrument for prismatic testing of the refraction of the eye. **p.-verger**, an instrument used in the measurement and enlargement of the fusion power of the eyes.

prismatic (*priz-mat'-ik*) [*prism*]. Prism-shaped; produced by the action of a prism, as *prismatic* colors.

prismoid (*priz'-moid*) [πρίσμα, prism; εἶδος, like]. Resembling a prism.

prismoptometer (*priz-mop-tom'-et-er*) [*prism*; ὤψ, eye; μέτρον, a measure]. An instrument for estimating refractive defects of the eye by means of two prisms placed base to base.

prismosphere (*priz'-mo-sfēr*). A combination of a prism and a globular lens.

privates (*pri'-vets*) [*privatus*, private]. A common term for the genital organs.

p. r. n. Abbreviation of Latin *pro re nata*, according as circumstances may require.

pro- [L.]. A prefix meaning for, before, in front of,

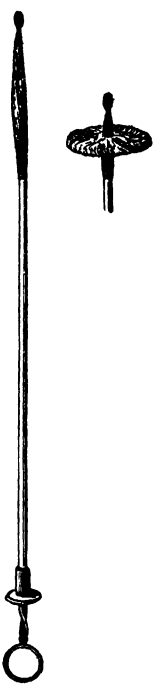
proagglutinoid (*pro-ag-loo'-tin-oid*). An agglutinoid having a stronger affinity for the agglutinogen than is possessed by the agglutinin.

proal (*pro'-al*) [*pro*]. Having a forward direction or movement. Cf. *palinal* and *propalinal.*

proamnion (*pro-am'-ne-on*) [*pro-; amnion*]. That part of the *area embryonalis* at the sides and in front of the head of the developing embryo, which remains without mesoderm for a considerable period.

proatlas (*pro-at'-las*) [*pro-; atlas*, the first cervica vertebra]. A primitive or rudimentary atlas

probable duration of life. The time, considering all circumstances, that a person of a given age may expect to live, as determined by statistics. The age at which any number of children born into the world will be reduced to one-half, so that there are equal chances of their dying before and after that age. The age at which a given population is reduced by one-half its number.



EXPANDING HORSE-HAIR PROBANG.

probang (*pro'-bang*) [*probare*, to test]. A rod of whalebone or other flexible material used for making local applications to the esophagus or larynx or for removing foreign bodies. **p., ball-**, a probang having an ivory bulb attached to one end. **p., bristle-, p., horse-hair-**, one having on the end a sheath of bristles or horse-hair that can be made to spread like an umbrella as the instrument is drawn out. **p., sponge-**, one provided with a small sponge at one end.

probe (*prōb*) [*probare*, to test]. A slender, flexible rod for exploring a channel. **p., Anel's**, see under *Anel.* **p., blunt**, one with a blunt extremity. **p., Bowman's**, see under Bowman. **p., drum-**, one provided with a drum or reverberator to enable the ear to detect contact with foreign bodies. **p., electric**, one having two insulated wires, so that contact with a bullet or metal completes the circuit, and thus indicates

the presence of such a foreign body. **p., eyed,** a probe having a slit at one end through which a tape or ligature can be passed. **p., lacrimal,** one used for dilating the lacrimal passages. **p., meerschaum,** a meerschaum tipped probe, which shows lead streaks where it has contacted with the bullet. **p., Nélaton's,** see under *Nélaton*. **p., vertebrated,** one made of small links so jointed together that it is very flexible.

probilin (*pro-bi'-lin*). Trade mark of a preparation of soft, mass pills containing salicylic acid, sodium oleate, sodium stearate, phenolphthalein, and camphorated menthol; said to be a cholagogue.

procaine (*pro'-ka-in, pro'-kān*). The base of procaine hydrochloride, U. S. P. It is a local anesthetic less toxic than cocaine. Novocain.

procatarctic (*pro-kat-ark'-tik*) [προκατάρχειν, to begin first]. Primary, predisposing.

procatarxis (*pro-kat-arks'-is*). The kindling of a disease into action by a procatarctic cause.

procelia, procœlia (*peo-se'-le-ah*) [*pro-*; κοιλία, hollow]. Same as *paracelia*.

procelous, procœlous (*pro-se'-lus*) [*pro-*; κοιλία, hollow]. Concave in front and convex behind.

procephalic (*pro-sef-al'-ik*) [*pro-*; κεφαλή, head]. In biology, of or pertaining to fore part of head.

procerus (*pro-se'-rus*) [*procerus*, stretched out, long]. The pyramidalis muscle; see *muscles*.

process (*pros'es*) [*processus*, from *procedere*, to go]. 1. A course of action; a group of phenomena, as the *inflammatory process*. 2. A prominence or outgrowth, as the spinous *process* of a vertebra, the axis-cylinder *process* of a nerve 3 In chemistry, a method of procedure, reaction, test. **p., acromion,** same as *acromion*. **p., alveolar.** See *alveolar process*. **p., anconeal,** the olecranon. **p., auditory,** the curved plate of bone surrounding the external auditory meatus for the greater part of its circumference, and serving for the attachment of the cartilage of the external ear. **p., axis-cylinder,** that process of a nerve-cell which becomes the axis-cylinder of a nerve. **p., basilar.** See *basilar process*. **p., caudate.** 1. The caudate lobe of the liver. 2. The lower end of one of the divisions of the antihelix of the external ear. **p., ciliary,** See *ciliary process*. **processes, clinoid,** projections on the body and lesser wings of the sphenoid bone. There are three: 1. The *anterior*, formed by the inner extremity of the lesser wings. 2. The *middle*, a small eminence on each side bounding the sella turcica anteriorly. 3. The *posterior*, a tubercle on each side of the posterior part of the sella turcica. **p. condyloid,** the posterior process on the upper border of the ramus of the lower jaw. **p., conoid.** See *conoid tubercle*. **p., coracoid.** See *coracoid process*. **p., coronoid.** 1. A thin, flattened process projecting from the anterior portion of the upper border of the ramus of the lower jaw, and serving for the attachment of the temporal muscle. 2. A triangular projection from the upper end of the ulna, forming the lower part of the greater sigmoid cavity. **p., cricoid,** a slight projection on the lower border of the thyroid cartilage. **p., cubital,** the lower and articular end of the humerus. **p., cuneiform.** 1. The unciform process of the ethmoid. 2. The basilar process of the occipital bone. **p., Deiters',** the axis-cylinder process of a nerve-cell. **p., dendritic.** See *p., protoplasmic* (1) **p., dentate,** the odontoid process. **p., ensiform,** the cartilaginous tip at the lower end of the sternum. **p., ethmoid,** one of the projections from the superior border of the inferior turbinate bone. **p., external angular,** the projection on the outer extremity of the supraorbital arch of the frontal bone. **p., falciform.** 1. A process of the fascia lata of the thigh, forming the outer and upper margin of the saphenous opening. Syn., *falciform process of Burns*. 2. The falx cerebri. **p., foliaceous,** a process of the ethmoid bone projecting into the frontal cells. **p., Folian.** See *Folian process*. **p., funicular.** See *funicular*. **p., hamate.** See *p., unciform*. **p. hamular.** 1. A hook-like process of bone on the lower extremity of the internal pterygoid plate, around which the tendon of the tensor palati turns. 2. Of the lacrimal bone, the hook-like termination of the lacrimal crest. **p., inferior vermiform,** the central projection on the lower surface of the cerebellum, between the two hemispheres. **p., internal angular,** the inner extremity of the supraorbital arch of the frontal bone. **p., jugal.** 1. The zygoma. 2. The external angular process 3. The malar process of the superior maxilla. **p., jugular.** See *jugular process*. **p., lacrimal,** a short process of the inferior turbinate bone that articulates with the lacrimal bone. **p., lenticular,** the extremity of the long process of the incus, covered with cartilage and articulating with the stapes. **p., long (of the incus),** a slender process that descends vertically from the body of the incus and articulates, by the lenticular process, with the head of the stapes. **p., long (of the malleus),** a long, delicate process that passes from the neck of the malleus outward to the Glaserian fissure, to which it is connected by cartilaginous and ligamentous fibers. **p., malar,** a triangular eminence of the superior maxilla by which it articulates with the malar bone. **p., mammillary,** one of the tubercles on the posterior part of the superior articular processes of the lumbar vertebræ. **p., mastoid.** See *mastoid process*. **p., maxillary,** a thin plate of bone descending from the ethmoid process of the inferior turbinate bone, and hooking over the lower edge of the orifice of the antrum. **p., nasal (of the superior maxilla),** a thick, triangular process of bone that projects upward, inward, and backward by the side of the nose, forming a part of its lateral wall. **p., odontoid,** the tooth-like process of the axis which ascends and articulates with the atlas. **p., olecranon,** the olecranon. **p., olivary,** a small oval eminence situated behind the optic groove of the sphenoid bone. **p., orbicular (of the incus).** See *p., lenticular*. **p., orbital (of the palate bone),** a process directed upward and outward from the upper portion of the palate bone. **p., orbital (of the superior maxilla),** a process projecting from the orbital margin of the superior maxilla. **p., palatal,** a thick process projecting horizontally inward from the inner surface of the superior maxillary bone, and forming part of the floor of the nostril and the roof of the mouth. **p., pineal,** the epiphysis. **p., postglenoid,** a small tubercle separating the glenoid fossa from the auditory process. **p., protoplasmic.** 1. Any one of the processes of nerve-cells that are not continued as axis-cylinders. 2. A pseudopod of an ameboid cell. **p., pterygoid (of the palate bone),** a pyramidal process projecting from the posterior border of

the palate bone and articulating with the sphenoid bone. **p., pterygoid (of the sphenoid bone)**, one descending perpendicularly from the point of junction of the body, with the greater wing of the sphenoid bone, and consisting of an external and an internal plate. **p. of Rau.** Synonym of *p., long (of the malleus)*. **p., short (of the incus)**, a conical process projecting almost horizontally backward from the body of the incus and attached by ligamentous fibers to the margin of the opening leading into the mastoid cells. **p., short (of the malleus)**, a slight projection from the root of the manubrium of the malleus, lying in contact with the tympanic membrane. **p., sphenoid**, a thin plate of bone directed upward and inward from the vertical plate of the palate bone. **p., sphenomaxillary**, an inconstant downward prolongation of the greater wing of the sphenoid. **p., spinous (of the ilium)**, a prominent eminence on the anterior or posterior border of the ilium. The upper process on the anterior border is the *anterior superior spinous process;* below it is *the anterior inferior spinous process*. On the posterior border there are also two processes—a *posterior superior* and a *posterior inferior*. **p., spinous (of the sphenoid bone)**, a rough prominence descending from the posterior part of the greater wing of the sphenoid bone. It receives the attachment of the internal lateral ligament of the jaw and the tensor palati muscle. **p., spinous (of the tibia)**, an eminence of bone on the upper surface of the tibia, between the two articular surfaces, and nearer to the posterior than the anterior border. **p., spinous (of a vertebra)**, the prominent backward projection from the middle of the posterior portion of the arch of a vertebra. **p., styloid (of the fibula)**, a pointed eminence projecting upward from the posterior portion of the head of the fibula. **p., styloid (of the radius)**, a projection from the external border of the lower extremity of the radius. **p., styloid (of the temporal bone)**, a sharp spine about an inch in length, descending downward, forward, and inward from the inferior surface of the petrous portion of the temporal bone. **p., styloid (of the ulna)**, a projection from the inner and posterior portion of the lower extremity of the ulna. **p., sulcate**, an inconstant process of the palate bone connecting the orbital process with the sphenoid process. **p., superior maxillary**, an eminence on the face of the embryo which gives rise to the superior maxilla and the malar bone. **p., superior vermiform**, the upper part of the median lobe of the cerebellum, connecting the two lateral hemispheres **p., temporal**, the posterior angle of the malar bone by which it articulates with the zygomatic process of the temporal bone. **p., transverse**, a process projecting outward from the side of a vertebra, at the junction of the pedicle and the lamina. **p., trochlear**, Hyrtl's name for a groove in a bone for the reception of a tendon **p., unbranched.** Synonym of *p., axis-cylinder*. **p., unciform (of the ethmoid bone)**, a hook-like projection from the inferior portion of each lateral mass of the ethmoid bone. It articulates with the ethmoid process of the inferior turbinated bone. **p. unciform (of the hippocampal gyrus)**, a hook-like projection from the anterior end of the hippocampal convolution. **p., unciform (of the uniform bone)**, a hook-like projection from the palmar surface of the unciform bone. **p., vaginal (of peritoneum)**, the process of peritoneum which the testicle in its descent carries in advance, and which in the scrotum forms the tunica vaginalis testis. **p., vaginal (of the sphenoid bone)**, a projection from the inferior surface of the body of the sphenoid bone, running horizontally inward from near the base of the pterygoid process. **p., vaginal (of the temporal bone)**, a sheath-like plate of bone which extends from the carotid canal to the mastoid process. It separates behind into two laminæ that inclose the styloid process. **p., vermiform, inferior and superior**, the inferior and superior surfaces of the middle lobe of the cerebellum. **p., vocal**, the anterior angle of the arytenoid cartilage. **p., xiphoid**, the ensiform cartilage. **p., zygomatic (of the malar bone)**, a long, serrated process which articulates with the zygomatic process of the temporal bone. **p., zygomatic (of the temporal bone)**, a long projection from the lower part of the squamous portion of the temporal bone, articulating with the malar bone.

processomania (*pro-ses-o-ma'-ne-ah*). An insane desire for litigation.

processus (*pro-ses'-us*) [L.]. A process. **p. accessorius**, accessory processes. **p. ad cerebrum**, the superior cerebellar peduncle. **p. ad medullam**, the inferior peduncle of the cerebellum. **p. ad pontem**, the middle peduncle of the cerebellum. **p. ad testes**, the superior cerebellar peduncles. **p. articulares inferiores**, inferior articular processes. **p. articulares superiores**, superior articular processes. **p. brevis**, the short arm of the malleus. **p. clavatus**, a thickening on the posterior pyramid of the medulla near the apex of the fourth ventricle. **p. cochleariformis**, a thin plate of bone separating the canal for the Eustachian tube from that for the tensor tympani muscle. **p. e cerebello ad cerebrum**, the superior cerebellar peduncle. **p. e cerebello ad medullam**, the inferior cerebellar peduncle. **p. e cerebello ad pontem**, the middle cerebellar peduncle. **p. e cerebello ad testes**, the superior peduncles of the cerebellum. **p. costarius**, costal process. **p. gracilis**, a long delicate process passing from below the neck of the malleus to the Glaserian fissure. **p. hamatus.** Synonym of *process, unciform*. **p. mammillaris**, mamillary process. **p. spinosus**, spinous process. **p. transversus**, transverse process. **p. vermiformis**, same as *appendix, vermiform*.

prochilon, procheilon (*pro-ki'-lon*) [*pro-*; χείλος, lip]. The prominence in the center of the lip.

prochondral (*pro-kon'-dral*) [*pro-*; χόνδρος, cartilage]. Prior to the formation of cartilage.

prochordal (*pro-kor'-dal*) [*pro-*; χορδή, cord]. Situated in front of the chorda dorsalis.

prochoresis (*pro-ko-re'-sis*) [προχώρησις, a going on or advancing]. The motor activity of the stomach.

Prochownik's diet (*pro-kov'-nik*) [Ludwig *Prochownik*, German obstetrician, 1851–]. A restricted diet for pregnant women with a narrow pelvis. **P.'s method**, resuscitation of an asphyxiated infant by compression of its chest and suspension with its head hanging backward.

prochromatin (*pro-kro'mat-in*). Paranuclein; the substance composing the nucleolus of a cell.

procident (*prŏs'-id-ent*) [*procidens*, falling forward]. Affected by prolapsus.

procidentia (*pro-se-den'-she-ah*) [*pro-*; *cadere*, to fall]. Prolapse.

procreate (*pro'-kre-āt*). To beget.

procreation (*pro-kre-a'-shun*) [*procreare*, to bring forth]. The act of begetting offspring.

proctagra (*prok-ta'-grah*) [*procto-*; ἄγρα, a seizure]. Sudden pain in the anal region.

proctalgia (*prok-al'-je-ah*) [*procto-*; ἄλγος, pain Neuralgic pain in the anus or rectum.

proctatresia (*prok-tat-re'-ze-ah*) [*procto-*; *atresia*]. An imperforate condition of the anus or rectum.

proctectasia, proctectasis (*prok-tek-ta'-se-ah, prok-tek'-tas-is*) [*procto-*; ἔκτασις, dilatation]. Dilatation of the anus or rectum.

proctectomy (*prok-tek'-to-me*) [*procto-*; ἐκτομή, excision]. Excision of the anus or rectum.

proctenclisis (*prok-ten'-kli-sis*) [*procto-*; ἔν, in; κλείειν, to close]. Stricture of the rectum or anus.

procteurynter (*prok-tū-rin'-ter*) [*procto-*; εὐρύνειν, to widen]. An instrument for dilating the anus or rectum.

proctitis (*prok-ti'-tis*) [*procto-*; ιτις, inflammation]. Inflammation of the anus or rectum.

procto- (*prok-to-*) [πρωκτός, anus]. A prefix signifying relating to the anus or rectum.

proctocele (*prok'-to-sēl*) [*procto-*; κήλη, hernia]. The extroversion or prolapse of the mucous coat of the rectum. **p., vaginal,** a hernia of the rectum appearing in the vagina.

proctoclysis (*prok-tok'-lis-is*) [*procto-*; κλύσις, a washing out]. The slow instillation of a liquid into the rectum.

proctococcypexy, proctoccypexia (*prok-to-kok'-se-peks-e, prok-to-kok-se-peks'-e-ah*) [*procto-*; *coccyx*; πῆξις, a fixing in]. Suturing of the rectum to the coccyx.

proctocolitis (*prok-to-ko-li'-tis*). Inflammation of the rectum and colon.

proctocolonoscopy (*prok-to-ko-lon-os'-ko-pe*) [*procto-*, colon; σκοπεῖν, to examine] Inspection of the interior of the rectum and lower colon.

proctocystoplasty (*prok-to-sis'-to-plas-te*) [*procto-*; κύστις, bladder; πλάσσειν, to form]. A plastic operation on the rectum and the bladder for repair of rectovesical fistula.

proctocystotome (*prok-to-sist'-o-tōm*) [*procto-*; κύστις, bladder; τομή, a cutting]. An instrument designed expressly for use in proctocystotomy.

proctocystotomy (*prok-to-sis-tot'-o-me*). Lithotomy in which the incision is made through the walls of the rectum.

proctodeum, proctodæum (*prok-to-de'-um*) [*procto-*, δδαῖος, by the way]. An invagination of the ectoderm in the embryo that grows inward toward the cloaca until the ectoderm and endoderm come into contact; the membrane formed between the two finally breaks through, the gut then opening externally. The primitive anus.

proctodynia (*prok-to-din'-e-ah*) [*procto-*; δδύνη, pain]. Pain about the anus or in the rectum.

proctoelytroplasty (*prok-to-el'-it-ro-plas-te*) [*procto-*; ἔλυτρον, vagina; πλάσσειν, to form]. A plastic operation on the rectum and the vagina for repair of a rectovaginal fistula.

proctological (*prok-to-loj'-e-kal*). Pertaining to proctology.

proctologist (*prok-tol'-o-jist*). One versed in diseases of the anus and rectum.

proctology (*prok-tol'-o-je*) [*procto-*; λόγος, science]. The science of the anatomy, functions, and diseases of the rectum.

proctoparalysis (*prok-to-par-al'-is-is*). Paralysis of the sphincter muscle of the anus

proctopexy, proctopexia (*prok'-to-peks-e, -e-ah*) [*procto-*; πῆξις, a fixing in]. The fixation of the rectum to another part by sutures.

proctophobia (*prok-to-fo'-be-ah*) [*procto-*; φόβος, fear]. A morbid dread or apprehension, common in persons with diseases of the rectum.

proctoplasty (*prok'-to-plas-te*) [*procto-*; πλάσσειν, to form]. Plastic surgery of the anus.

proctoplegia (*prok-to-ple'-je-ah*). *Proctoparalysis, q.v.*

proctopolypus (*prok-to-pol'-ip-us*) [*procto-*; *polyp*]. A polyp of the rectum.

proctoptoma (*prok-top-to'-mah*) [*procto-*; πτῶμα, fall]. Prolapse of the rectum.

proctoptosis (*prok-top-to'-sis*) [*procto-*; πτῶσις, a falling]. Prolapse of the rectum. Same as proctoptoma.

proctorrhaphy (*prok-tor'-a-fe*) [*procto-*; ῥαφή, suture]. Suture of the rectum or anus.

proctorrhea, proctorrhœa (*prok-tor-e'-ah*) [*procto-*; ῥοία, flow]. Escape of mucus through the anus.

proctoscope (*prok'-to-skōp*) [*procto-*; σκοπεῖν, to examine]. Instrument for inspecting the rectum.

proctoscopy (*prok-tos'-ko-pe*). Ocular inspection of the rectum with the aid of special instruments.

proctosigmoidectomy (*prok-to-sig-moid-ek'-to-me*) Excision of the anus and sigmoid flexure

proctospasm (*prok'-to-spazm*) [*procto-*; *spasm*]. Spasm or tenesmus of the rectum.

proctostasis (*prok-tos'-tas-is*) [*procto-*; στάσις, a standing still] Constipation due to non-response of the rectum to the defecation stimulus.

proctostenosis (*prok-to-sten-o'-sis*) [*procto-*; *stenosis*]. Stricture of the anus or rectum.

proctostomy (*prok-tos'-to-me*) [*procto-*; στόμα, a mouth]. The establishment of an opening into the rectum.

proctotome (*prok'-to-tōm*) [*procto-*; τομή, a cutting]. A cutting instrument used in proctotomy.

proctotomy (*prok-tot'-o-me*) [*procto-*; τομή, a cutting]. Incision into the rectum, especially for stricture. **p., external,** the operation of dividing the rectum and the anus and the tissue lying between the anus and the tip of the coccyx. **p., internal,** division of the parts as in external proctotomy, but without cutting the sphincters. **p., linear,** an incision of the dorsal rectal wall and of all the tissues lying between the anus and a subcutaneous opening made in front of the coccyx.

proctotoreusis (*prok-to-tor-ū'-sis*) [*procto-*; τορεύειν, to bore through]. The operation of making an opening into an imperforate anus.

proctotresia (*prok-to-tre'-ze-ah*) [*procto-*; τρῆσις, a boring]. The operation of making an opening into an imperforate anus.

proctovalvotomy (*prok-to-val-vot'-o-me*) [*procto-*; *valve*; τομή, a cutting]. Incision of the valves of the rectum

procursive (*pro-kur'-siv*) [*pro-*; *currere*, to run]. Running forward, as *procursive* epilepsy, a form in which the patient runs during the epileptic attack.

procurvation (*pro-kur-va'-shun*) [*procurvare*, to bend forward]. A forward inclination of the body.

prodigiosin (*pro-dij-e-o'-sin*). A red pigment formed by *Bacillus prodigiosus*.

prodigiosus toxin (*pro-dij-e-o'-sus*). See *Coley's fluid*.

prodromal (*pro-dro'-mal*) [*prodrome*]. Precursory; of the nature of a prodrome.

prodrome (*pro'-drōm*) [πρόδρομος, a running forward]. A forerunner of a disease; a symptom indicating the approach of a disease.

prodromic (*pro-dro'-mik*). See *prodromal*.
prodromous (*pro-dro'-mus*). Prodromal.
product (*prod'-ukt*) [*productive*]. Effect; result. **p., addition,** a compound resulting from the direct union of two bodies.
productive (*pro-duk'-tiv*) [*pro-; ducere,* to lead]. Forming, especially forming new tissue, as a *productive* inflammation.
proeminent (*pro-em'-in-ent*) [*pro-; eminens,* prominent]. Projecting. **p. vertebra,** the seventh cervical vertebra, so called because its spinous process projects beyond the others.
proencephalon (*pro-en-sef'-al-on*) [*pro-; ἐγκέφαλος,* brain]. Prosencephalon.
proencephalus (*pro-en-sef'-al-us*) [*pro-; ἐγκέφαλος,* brain]. A monster characterized by a protrusion of the brain through a fissure in the frontal region.
proenzyme (*pro-en'-zīm*). The substance which subsequently becomes an active ferment.
proerythroblast (*pro-er'-ith-ro-blast*). Same as *hematoblast*.
proferment (*pro-fer'-ment*). Zymogen.
proferrin (*pro-fer'-rin*) [*ferrum,* iron]. Iron nucleoproteinate.
professional (*profesh'-un-al*) [*profiteri,* to profess]. 1. Pertaining to a profession, especially to the medical profession; in keeping with medical ethics. 2. Produced by the practice of a profession, as *professional* neurosis (writers' cramp, telegraphers' cramp, etc.).
Profeta's law (*pro-fā'-tah*) [Giuseppe *Profeta,* Italian physician]. Healthy born children of syphilitic parents possess a certain immunity to syphilitic infection.
Profichet's disease (*pro-fe-sha'*) [Georges Charles *Profichet,* French physician, 1873–]. Calcareous nodules in the periarticular tissues.
proflavine (*pro-flā'-vēn*). Trade name of a form of acriflavine; it is diamino-acridine sulphate.
profluvium (*pro-floo'-ve-um*) [*profluere,* to flow forth]. A flux or discharge. **p. alvi,** diarrhea, **p. lactis,** excessive flow of milk. **p. muliebre.** Syn. of *leukorrhea*. **p. sanguinis,** hemorrhage **p. seminis.** 1. Syn. of *spermatorrhea* 2. Discharge of semen from the vagina after coitus.
profondometer (*pro-fon-dom'-et-ur*). An apparatus for ascertaining the site of a foreign body by the aid of the fluoroscope.
profundus (*pro-fun'-dus*) [L., "deep"]. Deep-seated; applied to certain muscles and nerves, and in the feminine, *profunda,* to certain arteries and veins. See under *artery*.
progamous (*prog'-am-us*) [πρό, before; γάμος, marriage]. Indicating that the sex of an individual is settled before the ovum is fertilized.
proganol (*pro-gan'-ol*). Trade name of a brand of protargin.
progaster (*pro-gas'-ter*). Same as *archenteron*.
progastrin (*pro-gas'-trin*). The precursor of the gastric secretin.
progenerate (*pro-jen'-er-āt*) [*progeny*]. One endowed with superior faculties. A genius
progenitalis (*pro-jen-it-a'-lis*) [*pro-; genital*]. Situated on the external genitals.
progenitor (*pro-jen'-it-or*) [*progeny*]. An ancestor.
progeny (*proj'-en-e*) [*pro-; gignere,* to beget]. Offspring; descendants.
progeria (*pro-je'-re-ah*) [πρόγερος, premature old age]. A rare form of senilism, of rapid onset, with retention of intelligence and without any perceptible cause, marked by loss of the hair, shriveling of the nails, and emaciation. Cf. *geromorphism*.
progestin (*pro-jes'-tin*) [*pro-; gestation*]. The corpus luteum hormone. It prepares the endometrium for the fertilized ovum.
proglossis (*pro-glos'-is*). The tip of the tongue.
proglottid (*pro-glot'-id*). Proglottis.
proglottis (*pro-glot'-is*) [*pro-; γλῶσσα,* tongue; pl., *proglottides*]. Mature segment of a tapeworm.
prognathic (*prog-na'-thik*). Syn. of *prognathous*.
prognathism (*prog'-na-thizm*) [*pro-; γνάθος,* jaw]. Having projecting jaws, or being prognathous. **p., alveolo-subnasal,** in craniometry, the prognathism measured by the angle included between the line joining the alveolar and subnasal points and the alveolo-condylean plane.
prognathous (*prog'-na-thus*) [*pro-; γνάθος,* jaw]. Having projecting jaws.
prognosis (*prog-no'-sis*) [*pro-; γνῶσις,* knowledge]. An opinion or judgment in advance concerning the duration, course, and termination of a disease. **p. anceps,** a doubtful prognosis. **p. fausta,** a favorable prognosis. **p. infausta,** an unfavorable prognosis. **p. quoad vitam,** a prognosis as regards life. **p. quoad restitutio ad integrum,** a prognosis as regards recovery.
prognostic (*prog-nos'-tik*) [*prognosis*]. Pertaining to prognosis.
prognosticate (*prog-nos'-tik-āt*) [*prognosis*]. To give a prognosis.
prognostician (*prog-nos-tish'-un*). One versed in prognosis.
progonic triad (*pro-gon'-ik*). Lobulation of the kidneys, indentation of the spleen, and a funnel-shaped appendix; said to be normal in the new-born. Called *progonism*.
progonism (*pro'-gon-izm*). See *progonic triad*.
progression (*pro-gresh'-un*) [*progredi,* to advance]. The act of advancing or moving forward. **p., backward,** a backward walking, a rare symptom of certain nervous lesions. **p., crosslegged,** walking with the legs almost crossing, a condition sometimes observed in bilateral hip-disease and in cerebral spastic palsy.
progressive (*pro-gres'-iv*) [see *progression*]. Gradually extending. **p. muscular atrophy,** chronic anterior poliomyelitis in which the large ganglion-cells of the anterior horns are gradually destroyed, which leads to atrophy of the muscles. **p. ossifying myositis,** a chronic inflammation of the muscles, associated with a tendency to bony deposits in them. **p. processes,** those which continue after the requirements of the organism have been satisfied.
progynon (*pro-ji'-non*). Steinach's name for a gland extract which rejuvenates. It is injected.
proiotia, proiotes (*pro-i-o'-she-ah, pro-i-o'-tēz*) [πρωιόρης, earliness]. Sexual precocity.
projectile (*pro-jek'-til*) [*pro-; jacere,* to throw]. Throwing forward. **p. vomiting,** a form sometimes observed in diseases of the brain; the vomitus is suddenly projected out of the mouth to some distance, generally without nausea.
projection (*pro-jek'-shun*) [see *projectile*]. 1. The act of throwing forward. 2. A part extending beyond the level of the surrounding surface. 3. The referring of impressions made on the organs of sense to the position of the object producing them. **p.-systems,** the name given to the pathways connecting the cerebral cortex with the periphery. The first projection system corresponds to the fibers passing through the corona radiata: the second, to the tracts proceeding downward to the gray matter from the third ventricle to the end of the spinal cord; the third, to the peripheral nerves.

Projicient (*pro-jish'-ent*) [*projiciens*, project]. Relating an organism to its environment, as by the neuromuscular senses.

prolabium (*pro-la'-be-um*) [*pro-*; *labium*, lip]. The red exposed part of the lip, also, the central prominence of the lip.

prolactin (*pro-lak'-tin*). A hormone from the pituitary gland which activates lactation

prolacto bread (*pro-lak'-to*). A bread for the use of diabetics said to contain over 33% of albuminoids, 17% of fats and no starches.

prolamine (*pro-lam'-ēn*). A gliadin, a vegetable protein, insoluble in water and in absolute alcohol, but soluble in dilute alcohol.

pro'lan. An ovarian activating hormone from the anterior lobe of the pituitary gland. One part, A, stimulates the secretion of estrin; the other, B, that of progestin. A-P-L.

prolapse (*pro-laps'*) [*prolabi*, to slip down]. The falling of a part. **p. of the cord,** premature expulsion of the umbilical cord during parturition. **p., frank,** uterine displacement in which the vagina is inverted and forms a bag hanging from the vulva, at bottom of which lies the uterus, generally retroverted, but otherwise unaltered. **p. of funis.** See *p. of the cord.* **p. of the iris,** protrusion of iris through a corneal wound.

prolapsus (*pro-lap'-sus*) [L.]. Prolapse, *q. v.* **p. ani,** prolapse of the anus.

prolepsis (*pro-lep'-sis*) [*pro-*; λαμβάνειν, to seize]. 1. The return of a paroxysm before the expected time. 2. Prognosis.

proleptic (*pro-lep'-tik*) [*pro-*; λαμβάνειν, to seize]. 1 Prognostic. 2. Returning sooner than expected

proleukemia (*pro-lū-ke'-me-ah*). Leukanemia.

proleukocyte (*pro-lū'-ko-sīt*). Leukoblast.

proliferate (*pro-lif'-er-āt*) [*proles*, offspring; *ferre*, to bear]. To multiply; to generate.

proliferation (*pro-lif-er-a'-shun*) [*proliferate*]. The act of proliferating or multiplying, as *proliferation* of cells. **p., atrophic,** the multiplication of cells in atrophic tissues.

proliferative, proliferous (*pro-lif'-er-a-tiv, pro-lif'-er-us*) [*proliferate*]. Multiplying; Formation of new tissues. **p. cyst,** a cyst in which the lining epithelium proliferates and produces projections from the inner surface of the cyst.

proliferin (*pro-lif'-er-in*). A hypothetical internal secretion, a possible causative factor in cancer.

prolific (*pro-lif'-ik*) [*proliferate*]. Fruitful.

proligerous (*pro-lij'-er-us*) [*proles*, offspring; *gerere*, to bear]. Germinating; producing offspring. **p. disc.** See *discus proligerus.*

prolin (*pro'-lin*). A product of hydrolysis by hydrochloric acid or by tryptic digestion of casein and gelatin.

promegaloblast (*pro-meg'-al-o-blast*). The precursor of a megaloblast.

prominence (*prom'-in-ens*). 1. A projection, especially on a bone. 2. The state of being prominent. **p., genital,** an accumulation of cells on the ventral aspect of the embryonic cloaca, from which the generative organs are developed.

prominentia (*prom-in-en'-she-ah*) [L.: *pl., prominentiæ*]. A prominence, or *projection.* **p. albicans.** Syn. of *corpus albicans.* **p. encephali.** Syn. of *corpora quadrigemina.* **p. laryngea.** Syn. of *pomum Adami.* **p. lentiformis.** Syn. of *nucleus, lenticular.* **p. natiformis.** Syn. of *nates of the corpora quadrigemina.* **prominentiæ orbiculares minores.** Syn. of the *testes of the corpora quadrigemina.* **p. semiovalis.** Syn. of *olivary body.* **p. sphærica,** a cerebral convolution. **p. spiralis,** a slight prominence on the outer wall of the cochlear duct, containing a small capillary vessel. **prominentiæ testiformes,** the testes of the corpora quadrigemina.

promnesia (*pro-ne'-se-ah*) [*pro-*; μνήσις, remembrance]. The paradoxical sensation of remembering things that never happened before.

promontory (*prom'-on-to-re*) [*pro-*; *mons*, a mountain]. A projecting prominence. **p. of the sacrum, p., sacrovertebral,** the prominence formed by the angle between the upper extremity of the sacrum and the last lumbar vertebra.

promyelocyte (*pro-mi'-el-o-sīt*). A neutrophile myelocyte.

pronæus (*pro-ne'-us*) [πρόναιος, the first room of a temple]. The vagina; also, its vestibule.

pronate (*pro'-nāt*) [see *pronation*]. Lying prone.

pronation (*pro-na'-shun*) [*pronare*, to bend forward]. 1. The condition of being prone; the act of placing in the prone position. 2. Of the hand, the turning of the palm downward.

pronatoflexor (*pro-na-to-fleks'-or*). Relating to the pronator and flexor muscles.

pronator (*pro-na'-tor*) [see *pronation*]. That which pronates, a term applied to some muscles. *q. v.*

pronaus (*pro'-na-us*) [*pro-*; νάος, temple]. The vestibule of the vagina.

prone (*prōn*) [*pronus*, prone]. Lying with the face downward; of the arm, having the palm directed downward; the opposite of supine.

pronephric (*pro-nef'-rik*) [*pro-*; νεφρός, a kidney]. In biology, of or pertaining to the peonephron, or the primitive kidney. **p. duct,** one of the four fundamental parts of the vertebrate urogenital system; the Wolffian duct.

pronephron, pronephros (*pro-nef'-ron, pro-nef'-ros*) [*pro-*; νεφρός, a kidney]. The primitive kidney; the anterior of the three segments of the Wolffian body, opening by means of the Muellerian duct into the cloaca. It is the first part of the urogenital system to be differentiated in the vertebrate embryo.

pronograde (*pro'-no-grād*) [*pronus*, inclined forward; *gradus*, a step]. Walking or standing on all fours, like quadrupeds See *orthograde*

pronucleus (*pro-nū'-kle-us*) [*pro-*; *nucleus*]. One of the two nuclear bodies of a newly fecundated ovum, the *male* pronucleus and the *female* pronucleus, the fusion of which results in the formation of the germinal nucleus.

proof-spirit. See *spirit.*

prootic (*pro-o'-tik*) [*pro-*; οὖς, ear]. In front of ear.

proovarium. See *parovarium.*

propæsin (*pro-pe'-sin*). Propyl ester of paraamidobenzoic acid; a local anesthetic. Trade name.

propagate (*prop'-ag-āt*) [*propagatus*]. To reproduce, procreate.

propagation (*prop-ag-a'-shun*). Reproduction.

propago (*pro-pa' go*) [L., "a slip or shoot;" pl., *propagines*]. An offset; applied to the smaller branches of vessels or nerves.

propaldehyde (*pro-pal'-de-hīd*). Propionic aldehyde, $CH_3.CH_2.CHO$.

propalinal (*pro-pal'-in-al*) [*pro-*; πάλιν, back, backward]. In biology, applied to the forward and backward action of the jaws of some animals.

propane (*pro'-pān*) [*propionic*], C_3H_8. A hydrocarbon, the third member of the marsh-gas series, occurring in petroleum.

prop-cells. Columnar or fusiform cells placed in the intervals of the rods and hair-cells of the organ of Corti. They are also known as supporting cells and cells of Deiters.

propedeutics, propædeutics (*pro-pe-dū'-tiks*) [*pro-; παιδεύειν*, to teach]. Preliminary instruction.

propene (*pro'-pēn*). Propylene.

propenyl (*pro'-pen-il*). See *glyceryl*.

propepsin (*pro-pep'-sin*) The zymogen of pepsin, found in the cells of the gastric glands.

propeptone (*pro-pep'-tōn*). See under *peptone*.

propeptonuria (*pro-pep-ton-ū'-re-ah*) [*propeptone; οὖρον*, urine]. The appearance of propeptone in the urine. It is said to occur in fevers, diphtheria, osteomalacia, and during the administration of styrax or phosphorus.

properitoneal (*pro-per-it-on-e'-al*) [*pro-; peritoneum*]. Situated in front of the peritoneum. **p. hernia**, a hernia the sac of which extends in various directions within the abdominal walls.

prophase (*pro'-fāz*) [*pro-; φαίνειν*, to show]. The first stage of karyokinesis or indirect cell-division.

prophylactic (*pro-fil-ak'-tik*) [see *prophylaxis*]. 1. Pertaining to prophylaxis. 2. A remedy or agent that prevents the development of disease. **p. forceps operation**, the routine delivery by forceps of the child in head presentations as soon as the head has come to rest on the pelvic floor, followed by the early removal of the placenta.

prophylactol (*pro-fil-ak'-tol*). A proprietary liquid said to consist of 20% of protargol and glycerol with the addition of mercury bichloride in the proportion of one part to 2000. It is used by injection in diseases of the urinary tract.

prophylaxis (*pro-fil-aks'-is*) [*προφυλάσσειν*, to keep guard before]. Prevention of disease; measures preventing the development or spread of disease.

propionate (*pro'-pe-on-āt*). A salt of propionic acid.

propione (*pro'-pe-ōn*) [*πρῶτος*, first; *πίων*, fat], $(C_2H_5)_2CO$. Diethyl ketone, a liquid obtained by the distillation of calcium propionate. Dose, as hypnotic, 8–45 gr. (0.5–3.0 Gm.); as sedative, 8 gr (0.5 Gm.).

propionic acid (*pro-pe-on'-ik*). See *acid, propionic*.

proplex (*pro'-pleks*). See *proplexus*.

proplexus (*pro-pleks'-us*) [*pro-; plexus*]. The choroid plexus of the lateral ventricles of the brain.

proponal (*pro'-pon-al*). Dipropylmalonylurea, used as an analgesic and hypnotic.

propons (*pro'-ponz*). The transverse white fibers in front of the pyramids and below the pons Varolii, the ponticulus.

proposote (*pro'-pos-ōt*). Creosote phenyl propionate, used as an intestinal antiseptic in capsules each containing 10 minims.

proprietary medicine. A medicine that is trademarked, patented, or secret.

proprioceptive impulses (*pro'-pre-o-sep-tiv*) [*proprius*, one's own; *capere*, to take]. Afferent nerve impulses which derive their stimulation from the tissues themselves.

proprioceptor (*pro-pre-o-sep'-tor*). A receptor which is stimulated by actions occurring within the organism. See *receptor*.

propriospinal (*pro-pre-o-spi'-nal*). Pertaining to the spine or spinal cord.

proprius (*pro'-pre-us*) [L.]. Individual; special, as flexor *proprius* pollicis, the special flexor of the thumb.

proptometer (*prop-tom'-e-ter*) [*proptosis; μέτρον*, a measure]. An instrument for measuring the amount of exophthalmos.

proptosis (*prop-to'-sis*) [*pro-; πτῶσις*, a falling]. A falling downward; prolapse.

propulsion (*pro-pul'-shun*) [*pro-, pellere*, to push]. 1. The act of pushing or driving forward. 2. A falling forward in walking, a condition seen in paralysis agitans. See *festination*.

propyl (*pro'-pil*) [*propionic*], C_3H_7. The radical of propane.

propylamine (*pro-pil'-am-in*) [*propyl; amine*]. 1; A liquid basic compound having the formula C_3H_9N, and existing in two forms, a *normal propylamine*, boiling at 47° C., and *isopropylamine*, boiling at 31.5° C. See under *ptomaine*. 2. A misnomer for an aqueous solution of trimethylamine, a colorless, caustic, antiseptic liquid.

propylene (*pro'-pil-ēn*) [*propyl*], C_3H_6. A gaseous hydrocarbon belonging to the series of the olefins.

pro re nata (*pro re na'-tah*) [L.]. A phrase signifying "according to the circumstances of the case."

prorennin (*pro-ren'-in*) [*pro-; rennin*]. The mother-substance, zymogen or preliminary material of rennin or chymosin.

prorsad (*pror'-sad*) [*prorsum*, forward]. Toward the anterior aspect.

prorsal (*pror'-sal*) [*prorsum*, forward]. Anterior; forward.

proscolex (*pro-sko'-leks*) [*pro-; σκώληξ*, a worm; pl., *proscolices*]. The embryo of a cestode worm immediately after leaving the egg.

prosecretin (*pro-se-kre'-tin*) [*pro-; secretin*] The precursor of secretin (*q. v.*); it is secreted by the epithelium of the small intestine.

prosect (*pro-sekt'*) [*pro-; secare*, to cut]. To dissect a subject or part for purposes of anatomical teaching or demonstration.

prosector (*pro-sek'-tor*) [*pro-; sector*, cutter]. One who prepares subjects for anatomical dissection or to illustrate didactic lectures.

prosectorium (*pro-sek-to'-re-um*). An anatomical laboratory; a dissecting room; a place where specimens are prepared for exhibition in a museum.

prosencephalon (*pros-en-sef'-al-on*) [*pro-; ἐγκέφαλος*, brain] The forebrain; that part of the anterior cerebral vesicle from which are developed the hemispheres, the corpus callosum, the anterior commissure, the fornix, the septum lucidum, the anterior perforated space, the olfactory lobes, and the corpus striatum.

prosocele, prosocœle (*pros'-o-sēl*) [*πρόσω*, forward; *κοῖλος*, a hollow]. The cavity of the prosencephalon. It is divided into three main divisions, a mesal cavity, the aula, and two lateral cavities, the paraceles, together with the rhinoceles (olfactory ventricles) or cavities of the olfactory bulbs

prosodemic (*pros-o-dem'-ik*) [*πρόσω*, forward; *δῆμος*, people]. Of a disease which is spread by individual contact as opposed to one which is spread by general means such as the water or milk supply.

prosogaster (*pros-o-gas'-ter*) [*πρόσω*, forward; *γαστήρ*, belly]. The foregut.

prosopalgia (*pros-op-al'-je-ah*) [*πρόσωπον*, the face; *ἄλγος*, pain]. Neuralgic pain in the distribution of the trigeminal nerve. Syn., *facial neuralgia; tic douloureux*.

prosopalgic (*pros-o-pal'-jik*) [*πρόσωπον*, face; *ἄλγος*, pain]. Affected with prosopalgia.

prosopantritis (*pros-op-an-tri'-tis*) [*πρόσωπον*, face; *ἄντρον*, cavity; *itis*, inflammation]. Inflammation of the frontal sinuses.

prosopantrum (*pros-op-an'-trum*) [*πρόσωπον*, face; *ἄντρον*, cavity]. A frontal sinus.

prosopectasia (*pros-o-pek-ta'-ze-ah*) [πρόσωπον, face; ἔκτασις, enlargement]. Morbid enlargement of the face.

prosopic (*pros-op'-ik*) [πρόσωπον, the face]. Relating to the face; facial.

prosopodiplegia (*pros-o-po-di-ple'-je-ah*) [πρόσωπον, the face; *diplegia*]. Double facial paralysis.

prosopodynia (*pros-o-po-din'-e-ah*) [πρόσωπον, face; ὀδύνη, pain]. Facial pain, or neuralgia.

prosoponeuralgia (*pros-o-po-nū-ral'-je-ah*). Synonym of *prosopalgia*.

prosopoplegia (*pros-o-po-ple'-je-ah*) [πρόσωπον, the face; πλήγη, stroke]. Facial paralysis.

prosopoplegic (*pros-o-po-ple'-jik*). Pertaining to, or suffering from, facial paralysis.

prosoposchisis (*pros-o-pos'-kis-is*) [πρόσωπον, face; σχίσις, fissure]. An oblique fissure or cleft of the face of a fetal monstrosity. It passes from the mouth to one of the orbits, and is usually associated with malformation of the brain.

prosopospasm (*pros'-o-po-spazm*) [πρόσωπον, face; *spasm*] Risus sardonicus.

prosoposternodymia (*pros-o-po-ster-no-dim'-e-ah*) [πρόσωπον, face; στέρνον, breast; δίδυμος, double]. A form of double monstrosity in which the twins are united by their faces and chests.

prosopothoracopagus (*pros-o-po-tho-rak-op'-ag-us*) [πόσωπον, the face; *thorax*; πάγος, that which is joined]. A double fetal monster in which the twins are united by the upper abdomen, chest, and face.

prosopotocia (*pros-o-po-to'-se-ah*) [πρόσωπον, face; τόκος, birth]. Face-presentation in parturition.

prosphysectomy (*pros-fiz-ek'-to-me*) [πρόσφυσις, a growing to; an appendage; ἐκτομή, excision]. Appendicectomy.

prostaden (*pros'-tad-en*) [*prostate*; ἀδήν, a gland]. An extract of prostate gland used in prostatic hypertrophy. Dose 30 gr. (2 Gm.) daily.

prostata (*pros'-tat-ah*). The prostate gland.

prostatalgia (*pros-ta-tal'-je-ah*) [*prostate*; ἄλγος, pain]. Pain in the prostate gland

prostatauxe (*pros-tat-awks'-e*) [*prostate*; αὔξη, increase]. Enlargement of the prostate gland

prostate, p. gland (*pros'-tāt*) [*pro-*; ἱστάναι, to stand]. The organ surrounding the neck of the bladder and beginning of the urethra in the male (*prostatic urethra*). It consists of two lateral lobes and a middle lobe, and is composed of muscular and glandular tissue; a distinct capsule surrounds it. The prostate often becomes enlarged in advanced life, and may then interfere with the emptying of the bladder.

prostatectomy (*pros-ta-tek'-to-me*) [*prostate*; ἐκτομή, excision]. Excision of part or all of the prostate

prostatelcosis, prostathelcosis (*pros-tat-el-ko'-sis, pros-tat-hel-ko'-sis*) [*prostate*; ἕλκωσις, ulceration]. Ulceration of the prostate.

prostatic (*pros-tat'-ik*) [*prostate*]. Relating to the prostate. **p. calculus**, a stone lodged in the prostate gland. **p. plexus.** 1. A collection of veins surrounding the neck and base of the bladder and the prostate gland. 2. A plexus of nerves derived from the pelvic plexus, and distributed to the prostate gland, seminal vesicles, and erectile tissue of the penis. **p. urethra**, that portion of the urethra surrounded by the prostate gland.

prostaticovesical (*pros-tat-ik-o-ves'-ik-al*). Pertaining to the prostate gland and the bladder.

prostatism (*pros'-tat-izm*). The condition caused by chronic disorders of the prostate.

prostatitic (*pros-tat-it'-ik*). Affected with prostatitis.

prostatitis (*pros-ta-ti'-tis*) [*prostate*; ιτις, inflammation]. Inflammation of the prostate gland.

prostatocele (*pros-tat'-o-sēl*) [*prostate*; κήλη, tumor]. An enlargement of the prostate gland, causing a tumor-like projection.

prostatocystitis (*pros-tat-o-sis-ti'-tis*) [*pvostate*; κύστις, bladder, ιτις, inflammation]. Inflammation of the prostate and urinary bladder.

prostatocystotomy (*pros-tat-o-sist-ot'-o-me*) [*prostate*; *cystotomy*]. Surgical incision of the prostate and bladder.

prostatodynia (*pros-tat-o-din'-e-ah*) [*prostate*; ὀδύνη, pain]. Prostatalgia.

prostatolith (*pros-tat'-o-lith*) [*prostate*; λίθος, a stone] A prostatic calculus.

prostatolysin (*pros-tat-ol'-is-in*). A cytotoxin obtained from prostatic tissue.

prostatomegaly (*pros-tat-o-meg'-al-e*) [*prostate*; μεγάλη, great]. Prostatic hypertrophy.

prostatometer (*pros-tat-om'-et-er*) [*prostate*; μέτρον, measure]. An instrument for estimating the size of an enlarged prostate.

prostatomy (*pros-tat'-o-me*). Prostatotomy.

prostatomyomectomy (*pros-tat-o-mi-o-mek'-to-me*) Removal of a prostatic myoma.

prostatoncus (*pros-tat-ong'-kus*) [*prostate*; ὄγκος, tumor]. A tumor of the prostate.

prostatorrhea (*pros-tat-or-e'-ah*) [*prostate*; ῥοία, flow] A thin urethral discharge coming from the prostate gland.

prostatotomy (*pros-ta-tot'-o-me*) [*prostate*; τομή, a cutting]. Incision into the prostate gland.

prostatotoxin (*pros-tat-o-toks'-in*). A cytotoxin obtained from the prostate gland.

prostatovesiculitis (*pros-tat-o-ves-ik-ū-li'-tis*). Inflammation of the seminal vesicles combined with prostatitis.

prostheon. See *prosthion*.

prosthesis (*pros'-thes-is*) [πρός, to; θέσις, a placing]. Replacement of a missing part by an artificial substitute. **p., Gersuny's paraffin**, the replacement of the cartilaginous portion of the nasal septum by paraffin.

prosthetic (*pros-thet'-ik*) [*prosthesis*]. Pertaining to prosthesis.

prosthetics (*pros-thet'-iks*) [*prosthesis*]. The branch of surgery that deals with prosthesis.

prosthetist (*pros'-thet-ist*). One who makes artificial limbs, or artificial dentures.

prosthion (*pros'-the-on*) [πρόσθιος, foremost]. Alveolar point. See *craniometric points*.

prosthodontist (*pros-tho-don'-tist*) [*prosthesis*; ὀδους, tooth]. A dentist who specializes in the mechanical line of his profession.

prostholytic (*pros-tho-lit'-ik*) [πρόσθεν, before; λύειν, to loosen]. Progressive change.

prostitution (*pros-tit-ū'-shun*) [*prostituere*, to expose publicly]. The condition or act of a person who indiscriminately lets the body for sexual intercourse, for pay.

prostrate (*pros'-trāt*) [*pro-*; *sternere*, to spread out]. Lying at full length.

prostrated (*pros'-tra-ted*) [*pro-*; *sternere*, to spread]. Exhausted; stricken down.

prostration (*pros-tra'-shun*) [*prostrate*]. 1. The condition of being prostrate. 2. Extreme exhaustion of nervous or muscular force. **p., nervous**, general exhaustion from excessive expenditure of nervous energy.

protagon (*pro'-tag-on*) [πρῶτος, first; ἄγειν, to lead], $C_{150}H_{308}N_5PO_{38}$. A crystalline glucoside found in nervous tissue, and yielding when boiled with baryta the decomposition-products of lecithin.

protagulin (*pro-tag'-ū-lin*). Trade preparation of prothrombin, used for checking hemorrhage.

protal (*pro'-tal*) [πρῶτος, first]. First; primary; initial; hereditary.

protalbumose (*pro-tal'-bū-mōs*). Same as *proto-albumose*. See under *albumose*.

protamine (*pro-tam'-in*) [πρῶτος, first; *amine*], $C_{15}H_{32}N_9O_2$. 1. A simple protein, soluble in water, uncoagulable by heat, and capable of precipitating aqueous solutions of other proteins. 2. An organic base found with nuclein in the spawn of salmon.

protan (*pro'-tan*). A preparation of tannin and casein, insoluble in water or dilute acid solutions; employed as an intestinal astringent.

protanopia (*pro-tan-o'-pe-ah*) [πρῶτος, first; *anopia*]. A defect in a first constituent, essential for color-vision, as in red-blindness.

protargin (*pro-tar'-jin*). Silver protein, a colloidal compound of silver with proteins.

protargol (*pro-tar'-gol*). A silver albumose occurring as a yellow powder, containing 8% of silver; freely soluble in water. It is recommended in gonorrhea in 0.25 to 1% solutions.

proteal (*pro'-te-al*). A hydrolyzed vegetable protein for hypodermic use.

protean (*pro'-te-an*) [*proteus*]. 1. Taking on many shapes, as a *protean* disease, *protean* eruption. 2. Any first hydrolytic derivative of a protein.

proteantigen (*pro-te-an'-te-jen*). A protein used as a therapeutic antigen.

protease (*pro'-te-ās*). An enzyme which digests proteins.

protectin (*pro-tek'-tin*). 1. A substance which develops in blood-serum when allowed to stand *in vitro*, and which protects the red blood corpuscles against hemolytic action. 2. Tissue paper with a coating of adhesive rubber mixture on one side.

protective (*pro-tek'-tiv*) [*protect*]. 1. A covering, so as to shield against harm; guarding against harm, as a *protective* dressing. 2. A surgical dressing made of oil-silk. **p. protein.** See *protein, defensive.*

proteic (*pro-te'-ik*). Relating to protein. **p. substances,** proteins.

proteid (*pro'-te-id*). 1. See *protein.*

proteiform (*pro-te'-if-orm*). Having various forms.

protein (*pro'-te-in*) [πρῶτος, first]. An organic substance, consisting essentially of C, H, N, O, and S, characteristic of living matter, and found, in various forms, in animals and plants; albumin. For tests, see *albumin.* **p.s., adequate,** those proteins which furnish the body with all nitrogenous compounds necessary for maintenance and growth. **p., autologous,** a protein found normally in the human body. **p., bacterial,** one formed by the action of a microorganism. **p., bacterial cellular,** any protein found in the bodies of bacteria. **p.s, coagulated.** See *coagulated proteins.* **p., complete,** same as *p., adequate, q. v.* **p.s, compound,** or **conjugated,** a class of bodies more complex than simple proteins, which yield as nearest splitting products, simple proteins on one side and non-protein bodies, such as coloring matters, carbohydrates, xanthin bases, etc., on the other. They are divided into three groups—the hemoglobins, glycoproteids, and nucleoproteids. **p., defensive,** one of the proteins existing in the blood and rendering the system immune to infectious diseases. **p., derivative,** a protein derived by hydrolysis from a protein molecule. **p., immune,** an antitoxin. **p., pyocyaneous,** a preparation made from cultures of *Bacillus pyocyaneus.* It is recommended in the treatment of suppurating ulcers. **p., tissue,** that portion of protein ingested which is used to replace tissue waste or to form new tissue.

protein-fat (*pro'-te-in-fat*). Soap-albumin.

proteinochromogen (*pro-te-in-o-kro'-mo-jen*) [*protein;* χρῶμα, color; γεννᾶν, to produce]. Same as tryptophan, *q. v.*

proteinol (*pro'-te-in-ol*) [*proto-; oleum,* oil]. A form of food for infants and invalids. It contains proteins, fats, carbohydrates and lime-salts.

protein-therapy (*pro-te-in-ther'-a-pe*). Treatment of disease by a protein not found normally in the body.

proteinuria (*pro-te-in-ū'-re-ah*). The passage of albumin, or other protein, in the urine.

proteogens (*pro'-te-o-jens*). Trade name of a class of preparations containing non-specific vegetable proteins, enzymes, lipoids, vitamins, and other derivatives from plants.

proteol (*pro'-te-ol*). Trade name of an antiseptic dressing powder made by the action of formaldehyde on casein.

proteolysis (*pro-te-ol'-is-is*), [πρῶτος, first; λύσις, solution]. The change produced in proteins by ferments that convert them into diffusible bodies.

proteolytic (*pro-te-o-lit'-ik*) [*proteolysis*]. Pertaining to, characterized by, or effecting proteolysis.

proteometabolic (*pro-te-o-met-ab-ol'-ik*). Pertaining to proteometabolism.

proteometabolism (*pro-te-o-met-ab'-ol-izm*) [*protein; metabolism*]. The processes of digestion, absorption, and utilization of proteins

proteopeptic (*pro-te-o-pep'-tik*). Pertaining to protein digestion.

proteopexic (*pro-te-o-pek'-sik*). Pertaining to the fixation of proteins within the body.

proteopexy (*pro-te-o-pek'-se*) [*protein;* πῆξις, a fixing]. The fixation of proteins within the body.

proteose (*pro'-te-ōs*) [πρῶ.ος, first]. Any one of a group of bodies formed in gastric digestion, intermediate between the food proteins and the peptones, called antipeptone, hemipeptone, etc.

Proteosoma (*pro-te-o-so'-mah*) [Πρωτεύς, a sea god, capable of assuming many forms, σῶμα, a body]. A genus of parasitic protozoa which infest the blood of birds.

proteosotherapy (*pro-te-o-so-ther'-ap-e*). Treatment of disease by proteoses given parenterally.

proteosuria (*pro-te-o-sū'-re-ah*) [*proteose;* οὖρον, urine]. The presence of proteoses in the urine.

proteuria (*pro-te-ū'-re-ah*). The presence of proteins in the urine.

Proteus (*pro'-te-us*) [L.]. A genus of *schizomycetes.*

prothesis (*proth'-es-is*). Prosthesis.

prothetic (*pro-thet'-ik*). See *prosthetic.*

prothrombase (*pro-throm'-bās*). Same as prothrombin, *q. v.*

prothrombin (*pro-throm'-bin*). Same as *thrombogen, q. v.*

prothyle, prothyl (*pro-thi'-le, pro'-thil*). See *protyle, protyl.*

prothymia (*pro-thi'-me-ah*) [προθῡμια, zeal, readiness]. Intellectual alertness.

protides (*pro'-tids*) [*proteid*]. Simple proteins or substances which on hydrolysis yield simple proteins or the products of their hydrolysis (Name proposed by the Union of Pure and Applied Chemistry for the name "protein.")

protiodide (*pro-ti'-o-dīd*) [πρῶτος, first; *iodide*]. A salt containing the least amount of iodine of the iodides of the same base. See *proto-.*

protista (*pro-tis'-tah*) [πρῶτος, first]. Haeckel's name for those lower organisms which are not readily referred to the plant or animal kingdom.

protistologist (*pro-tis-tol'-o-jist*). One versed in protistology.

protistology (*pro-tis-tol'-o-je*) [*protista*]. Microbiology; protozoology and bacteriology.

proto- (*pro-to-*) [πρῶτος, first]. 1. A prefix signifying first. 2. In chemistry, a prefix signifying the lowest of a series of compounds of the same elements, as *proto*iodide, *proto*chloride, *proto*xide.

protoalbumose (*pro-to-al'-bū-mōs*). See *albumose*.

protobe (*pro'-tōb*). d'Herelle's name for the bacteriophagic organism which is a parasite of parasites, and not a chemical factor.

protobion (*pro-to'-be-on*) [proto; βίος, life]. The first organism.

protoblast (*pro'-to-blast*) [*proto-*; βλαστός, germ]. A cell without a cell-wall.

protoblastic (*pro-to-blas'-tik*). Pertaining to a protoblast.

protocatechuic acid (*pro-to-kat-e-chū'-ik*) [*proto-*; *catechu*], $C_7H_6O_4$. Dioxybenzoic acid, an acid sometimes occurring in the urine.

protochloride (*pro-to-klo'-rid*). See *proto-* (*2*).

protocol (*pro'-to-kol*). 1. A clinical history. 2. Notes of various steps of an experiment.

protocone (*pro'-to-kōn*) [*proto-*; κώνος, cone]. The mesobuccal cusp on an upper premolar tooth.

protoconid (*pro-to-kon'-id*). The mesobuccal cusp on a premolar tooth of the lower jaw.

protocurarine (*pro-to-kū-rah'-rēn*). A poisonous alkaloid said to be derived from curare.

protodiaclisis, (*pro-to-di-ak-li'-sis*) [*proto-*; διά, through; συμφιλέω, sympathy]. In biology, a term to designate judgment and discrimination.

protoelastose (*pro-to-e-las'-tōs*). Hemielastin; one of the products of digestion of elastin

protogala (*pro-tog'-al-ah*) [*proto-*; γάλα, milk]. Synonym of *colostrum*.

protogaster (*pro-to-gas'-ter*) [*proto-*; γαστήρ, stomach]. The primitive intestinal cavity of a gastrula; the foregut.

protogen (*pro'-to-jen*) [*proto-*; γεννᾶν, to produce]. 1. Any albuminoid compound which does not coagulate when heated in aqueous solution. 2. A dietetic obtained by action of formaldehyde on egg-albumen.

protoglobulose (*pro-to-glob'-ū-lōs*). One of the primary products of the digestion of globulin.

protogonocyte (*pro-to-gon'-o-sit*) [*proto-*; *gonocyte*]. One of the two cells resulting from the separation or division of the impregnated ovum.

protoiodide (*pro-to-i'-o-did*). See *protiodide*.

protolac (*pro'-to-lak*). Trade name of a brand of calcium caseinate.

protoleukocyte (*pro-to-lū'-ko-sīt*). One of the minute lymphoid cells found in the red bone-marrow and also in the spleen.

protometer (*pro-tom'-et-er*) [*proto-*; μέτρον, a measure]. An instrument for measuring the forward projection of the eyeball.

protomyosinose (*pro-to-mi-o'-sin-ōs*) [*proto-*; *myosin*]. A product of the primary digestion of myosin.

proton (*pro'-ton*) [*proto-*]. 1. The primitive, undifferentiated mass of cells or rudiment of a part; the equivalent of *anlage*. 2. The nuclear positive corpuscle of electricity.

protonephron (*pro-to-nef'-ron*) [*proto-*; νεφρός, kidney]. The pronephron, metanephron, and mesonephron taken together; the primitive kidney.

protoneuron (*pro-to-nū'-ron*) [*proto-*; νεῦρον, nerve]. One of a peculiar type of bipolar neurons or ganglion-cells of the cerebrospinal system, characterized by the entrance of the axis-cylinder of an afferent nerve-fibril through one of its prolongations, terminating in its endoplasm. It constitutes a primary independent centripetal end-organ.

protonuclein (*pro-to-nū'-kle-in*), $C_{29}H_{49}N_{10}P_8O_{22}$. A preparation from the lymphoid tissues of animals with the addition of milk-sugar and gum-benzoin. Used as an invigorator. Dose. 3–10 gr. (0.2–0.65 Gm.) several times daily Applied also in substance to cancerous wounds.

protopathic (*pro-to-path'-ik*) [*proto-*; πάθος, disease]. 1. Primary; relating to the first lesion. 2. Pertaining to the first evidence of a return of function; said of the appearance of imperfect sensibility in a nerve after an injury. 3. Pertaining to nerves responding only to pain and extreme changes of temperature and in which the sensibility and localization are of a low order.

protopathy (*pro-top'-ath-e*) [*proto-*; πάθος, disease]. A primary disease.

protopepsia (*pro-to-pep'-se-ah*) [*proto-*; πέπτειν, to cook]. A primary process of digestion as that of starches by the saliva.

protophyte (*pro'-to-fīt*) [*proto-*; φυτόν, plant]. Any plant of the lowest and most primitive type. The *Schizomycetes*, or bacteria (*q. v.*), may be classed as protophytes, with other low vegetable forms. The protophytes have no visible reproductive organs.

protopine (*pro'-to-pīn*) [*proto-*; ὄπιον, opium], $C_{20}H_{19}NO_5$. A hypnotic and analgesic alkaloid from opium; dose 40–150 gr. (2.5–10 0 Gm.).

protoplasis (*pro-to-pla'-sis*) [*proto-*; πλάσσειν, to form]. The primary formation of tissue

protoplasm (*pro'-to-plazm*) [*proto-*; *plasma*]. 1. The viscid material constituting the essential substance of living cells, upon which all the vital functions of nutrition, secretion, growth, reproduction, irritability, and motility depend. When highly magnified, the protoplasm of most cells appears as a net-work (*spongioplasm*), containing a more fluid substance (*hyaloplasm*) in its meshes. 2. Those portions of the cell-body adjacent to the nucleus; or, the primary active portion of the cell as distinguished from the paraplasm or secondary and passive portion.

protoplasmatic (*pro-to-plaz-mat'-ik*). Synonym of protoplasmic.

protoplasmic (*pro-to-plaz'-mik*) [*protoplasm*]. 1. Pertaining to protoplasm. 2. Composed of protoplasm. **p. process.** See under *process*.

protoplast (*pro'-to-plast*) [*proto-*; πλαστός, formed, molded]. 1. An embryonic cell. 2. Protoplasm.

protoplastin (*pro-to-plast'-in*) [*protoplasm*]. The basal substance of protoplasm.

protoprotein (*pro-to-pro'-te-in*). That material which, converted into organized nucleoproteids, forms living matter.

protoproteose (*pro-to-pro'-te-ōs*) [*proto-*; *proteose*]. Primary proteose; further digestion changes it into deuteroproteose.

protosalt (*pro'-to-sawlt*) In chemistry, that one of two or more compounds of a metal with an acid which contains relatively the least quantity of metal.

protospasm (*pro'-to-spasm*). A spasm beginning in one part and extending to others.

protosulphate (*pro-to-sul'-fāt*). The one of a series of sulphates which contains relatively the smallest amount of sulphuric acid.

protosyphilis (*pro-to-sif'-il-is*). Primary syphilis.

prototh rombin. See *prothrombin.*

prototoxins (*pro-to-toks'-ins*) [*proto-; toxins*]. Dissociation-products of toxins differing from deuterotoxins and tritotoxins in having a stronger affinity than either for the antitoxins.

prototoxoid (*pro-to-toks'-oid*) [*proto-; toxoid*]. A transformation-product of prototoxin in which toxicity is lost, but the combining power retained.

prototrophic (*pro-to-tro'-fik*) [*proto-; τροφή*, nourishment]. Applied to organisms which do not require organic matter or have not the faculty of decomposing protein stuff.

prototype (*pro'-to-tīp*) [*proto-; τύπος*, a type]. An original type; a type after which others are copied.

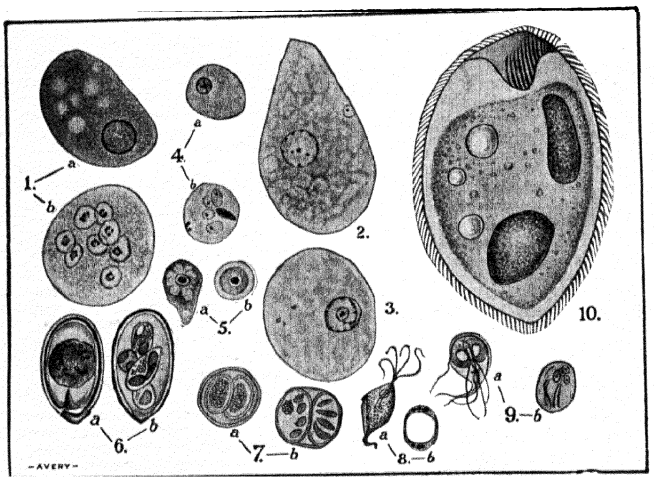
protozoologist (*pro-to-zo-ol'-o-jist*). One versed in protozoology.

protozoology (*pro-to-zo-ol'-o-je*). The study of protozoa.

protozoon (*pro-to-zo'-on*) [*proto-; ζῷον*, animal, pl., *protozoa*]. One of the lowest class of the animal kingdom, comprising organisms which consist of simple cells or colonies of cells, and which possess no nervous or circulatory system.

protractor (*pro-trak'-tor*) [*pro*, before; *trahere*, to draw]. 1. A surgical instrument used for drawing extraneous bodies from wounds. 2. A muscle that draws forward.

protrahens (*pro-tra'-henz*) [L.]. A drawing forward. **p. auriculæ**, a muscle drawing the pinna forward. It is known, also, as the *attrahens aurem*. See *muscles, table of.* **p. lentis**, the ciliary muscle of the eye.



IMPORTANT PATHOGENIC PROTOZOA OF THE INTESTINAL TRACT. (*Illustrations of amoebae from Walker—others from Doflein.*)

(1*a*) Motile *E. coli*. Note large amount and peripheral arrangement of chromatin in nucleus. (1*b*) Encysted *E. coli*. Note larger size than *E. histolytica* cyst, 8 ring-form nuclei and absence of chromidial bodies. (2) Motile *E. histolytica* from acute dysenteric stool. Note histolytica nucleus with scanty chromatin. (3) Tetragena type of *E. histolytica* from case of chronic dysentery. Note greater amount of chromatin and central karyosome with centriole. (4*a*) Preëncysted *E. histolytica* from carrier. Note small size and heavy peripheral ring of chromatin in nucleus, making this feature of chromatin in nucleus similar to the larger *E. coli*. (4*b*) Encysted *E. histolytica* from dysentery convalescent. Note small size, 4 ring nuclei and a dark chromatin-staining mass, "chromidial body." (5*a* and 5*b*) Motile and encysted cultural amoebae from Manila water supply. (6*a* and 6*b*) Oocyst and sporozoite production in 4 spores of *Eimeria stiedae*. (7*a* and 7*b*) Oocyst with 2 sporoblasts and oocyst with 2 spores containing 4 sporozoites of *Isospora bigemina*. (8*a*) Vegetative *Trichomonas intestinalis*. (8*b*) *Blastocystis hominis*. (9*a* and 9*b*) Vegetative and encysted *Giardia intestinalis* (10) *Balantidium coli*

protovertebra (*pro-to-ver'-te-brah*). A mesoblastic segment formed on the side of the embryonic notochord.

protovertebral (*pro-to-ver'-teb-ral*). Pertaining to a protovertebra.

protoxide (*pro-toks'-id*). See *proto-* (2).

protoxoid (*pro-toks'-oid*). Same as *prototoxoid.*

protoxyl (*pro-toks'-il*). An organic compound containing 37.69 % of arsenic.

protozoa (*pro-to-zo'-ah*). Plural of *protozoon.*

protozoacide (*pro-to-zo'-ah-sīd*) [*protozoa; cædere*, to kill]. 1. Causing destruction of protozoa. 2. An agent which will kill protozoa.

protozoal, protozoan (*pro-to-zo'-al, pro-to-zo'-an*) [*proto-; ζῷον*, animal]. 1. First, lowest, primitive. 2. Pertaining to protozoa.

protozoiasis (*pro-to-zo-i'-as-is*). The existence of protozoa in the stools.

protrusor (*pro-troo'-sor*) [*protrudere*, to thrust forward]. Anything protruded or which protrudes. **p. labii inferioris**, the corrugator muscle of the lower lip. **p. linguæ.** Synonym of *genioglossus.* See *muscles, table of.*

protrypsin (*pro-trip'-sin*). See *trypsinogen.*

protuberance (*pro-tū'-ber-ans*) [*protuberantia; pro*, forward; *tuber*, a swelling]. A knob-like projecting part. **p., annular.** Synonym of *pons Varolii.* **p., cerebral.** 1. Synonym of *pons Varolii.* 2. The prominence formed by the upper or anterior of the cerebral flexures of the embryo. **p., external occipital**, the central prominence on the outer surface of the flat portion of the occipital bone. **p., frontal.** 1. The prominence of the frontal bone. 2. The prominence formed by the lower of the two

flexures of the cephalic end of the embryo. **p., inferior maxillary,** in the embryo, a prominence formed on each side by a division of the first pharyngeal arch, and representing the rudiments of the lower jaw. **p., internal occipital,** a slight central prominence on the inner surface of the tabular portion of the occipital bone. **p., lateral frontal,** an elevation on either side of the frontal prominence of the embryo. **p., mental,** a synonym of *prominence, mental.* **p., natiform,** the nates of the corpora quadrigemina. **p., occipital.** See *p., external occipital,* and *p., internal occipital.* **p., parietal,** the eminence of the parietal bone, situated near the sagittal suture. **p., superior maxillary,** a prominence formed on each side of the embryo by a division of the first pharyngeal arch.

protyle, protyl (*pro-tī'-le- pro'-til*) [*proto-*; ὕλη, matter]. The hypothetical primal substance from which all living matter is supposed to be derived; the supposed primitive universal element.

protylin (*pro'-til-in*). A synthetic product containing 2 7% of phosphorus; used in neurasthenia. Dose 2–4 coffeespoonfuls

proud flesh. Exuberant granulation tissue

prove. To test the action of a drug on a normal healthy person, and to note the effects both subjective and objective.

provertebra (*pro-ver'-te-brah*). Protovertebra.

provisional (*pro-vizj'-on-al*) [*providere,* to provide]. For temporary use, as *provisional* callus.

provitamin (*pro-vī'-tam-in*). 1. A hypothetical precursor of a vitamin. 2 Ergosterol is sometimes called provitamin D.

Prowazek's bodies (*pro-vat'-sek*) [Stanislas Josef Mathias von *Prowazek,* German protozoologist, 1876–1915]. Structures occurring in Guarnieri's vaccine bodies.

proximad (*proks'-im-ad*) [see *proximal*]. Toward the proximal end.

proximal (*proks'-im-al*) [*proximus,* nearest]. Nearest to the body or the median line of the body, or some other point considered as the center of a system.

proximate (*proks'-im-āt*) [see *proximal*]. Nearest, immediate, as *proximate* cause **p. principle,** a substance existing under its own form in animal solids or fluids, that can be extracted without altering or destroying its chemical properties.

proximo-ataxia (*prok-se-mo-at-aks'-e-ah*) [*proximus,* nearest; *ataxia*]. Lack of coordination in the muscles of the proximal part of the limbs; in opposition to *acroataxia.*

proximobuccal (*proks-im-o-buk'-kal*). Pertaining to the proximal and buccal surfaces of a tooth.

proximolabial (*proks-im-o-lā-be-al*). Pertaining to the proximal and labial surfaces of a tooth.

proximolingual (*proks-im-o-ling'-gwal*). Relating to the proximal and lingual surfaces of a tooth.

prox. luc. Abbr. of *proxima luce,* the day before.

prozonal (*pro-zo'-nal*) [*pro-*; *zona,* a zone]. Applied to nerve-trunks lying in front of a sclerozone.

prozymogen (*pro-zi'-mo-jen*). An intranuclear substance which, after being discharged into the cytoplasm, becomes zymogen.

prual (*proo'-al*). A virulent toxic substance said to be obtained from the root of *Coptosapelta flavescens,* a rubiaceous plant of Malaya.

pruinate (*proo'-in-āt*) [*pruina,* hoar-frost]. Appearing as if covered with hoar-frost.

prune-juice expectoration (*proon-joos*). A peculiar bloody sputum, of a dark purple color, resembling prune-juice. It occurs in low forms of croupous pneumonia, in gangrene and carcinoma of the lung.

prunin (*proo'-nin*). A resinoid from *Cerasus serotina;* the dose is about 2 gr. (0 125 Gm.).

prunoids (*proo'-noids*). Trade name of a preparation containing prunes, phenolphthalein, cascara sagrada, and de-emetinized ipecac.

prunum (*proo'-num*) [L.]. Prune. The *prunum* of the U. S. P. is the partly dried fruit of *Prunus domestica,* of the order *Rosaceæ.* Prunes are laxative.

Prunus (*proo'-nus*) [L.]. A genus of trees of the order *Rosaceæ. P. domestica* is the source of the prune. The ripe seed of *P. amygdalus* is the *amygdala dulcis* of the U. S. P. *P. serotina* yields wild-cherry bark. **P. laurocerasus,** cherry laurel; its leaves yield hydrocyanic acid. **P. virginiana** (U. S. P.), wild-cherry, contains a volatile oil, hydrocyanic acid, tannic acid, a resin, and other substances. It is used as a tonic and sedative in gastric debility and general irritation of the system, and is a common ingredient of cough-mixtures. Dose of the *fluid-extract* of wild-cherry (*fluidextractum pruni virginianæ,* U. S. P.) 1 dr. (4 Cc.); of the *infusion* (*infusum pruni virginianæ,* U. S. P.) 2–3 oz. (64–96 Cc.); of the *syrup* (*syrupus pruni virginianæ,* U. S. P.) ½ oz. (16 Cc.).

pruriginous (*proo-rij'-in-us*) [*prurigo*]. Pertaining to or resembling prurigo.

prurigo (*proo-ri'-go*) [*prurire,* to itch]. 1. A chronic inflammatory disease of the skin, characterized by small pale papules and severe itching. The papules are deeply seated, and are most prominent on the extensor surfaces of the limbs. The disease begins in early life and is usually incurable. 2. Pruritus.

pruritic (*proo-rit'-ik*) [*pruritus*]. Pertaining to pruritus; itching.

pruritus (*proo-ri'-tus*) [*prurire,* to itch]. Itching, a peculiar uncomfortable sensation due to irritation of the peripheral sensory nerve, and leading to scratching. It may be a symptom of other diseases of the skin or an independent neurosis. The latter receives its name from the part affected, as *pruritus* ani, *pruritus* vaginæ **p., bath,** a burning sensation varying from a slight pricking to an intense itching experienced by some persons after a bath. **p. hiemalis,** a form affecting certain persons only in winter, especially in dry climates. **p. senilis,** the pruritus of the aged, at times due to degenerative changes in the skin. **p. senilis of the tongue,** a form of glossitis occurring in the aged, characterized by itching and burning of the tongue. **p. vulvæ,** hyperesthesia of the nerves of the vulva accompanied by intense itching.

Prussak's fibers (*proos'-ak*) [Alexander *Prussak,* Russian otologist, 1839–1907]. The bands which, coming from the roof of the external auditory canal, pass on to the membrana tympani and form the lateral boundaries of Shrapnell's membrane; they are made up of elastic and connective-tissue fibers and contain blood-vessels and nerves. **P.'s pouch, P.'s space,** the small space formed in the attic of the middle ear by the external ligament of the malleus above, the short process of the malleus below, the neck of the malleus internally, and Shrapnell's membrane externally.

Prussian blue. Ferric ferrocyanide; used in the arts as a dye; it was formerly employed in medicine as a febrifuge, tonic, and alterative. Dose 3–5 gr. (0.2–0 32 Gm.)

prussiate (*proos'-i-āt*). 1. Any salt of prussic or hydrocyanic acid; a cyanide. 2. Particularly a ferricyanide or ferrocyanide.

prussic acid. See *acid, hydrocyanic.*

psalis (*sa'-lis*) [ψαλίς, arch]. The cerebral fornix.

psalterial (*sawl-te'-re-al*). Pertaining to a psalterium.

psalterium (*sawl-te'-re-um*) [ψαλτήριον, a psaltery: *pl., psalteria*]. 1. Synonym of the *lyra.* 2. A group of longitudinal fibers on the floor of the Sylvian aqueduct. 3. In biology, the third compartment of the complicated stomach of the *pecora* or true ruminants; also called *manyplies.*

psamma (*sam'-ah*) [ψάμμος, sand]. Sand occurring as a urinary deposit.

psammocarcinoma (*sam-o-kar-sin-o'-mah*). See *carcinoma psammosum.*

psammoma (*sam-o'-mah*) [ψάμμος, sand; ὄμα, tumor]. A firm tumor found in the membranes of the brain, the choroid plexus, and in other parts, and characterized by the presence of peculiar calcareous particles. The tumor is generally a fibrosarcoma.

psammosarcoma (*sam-o-sar-ko'-mah*) [ψάμμος, sand; *sarcoma*]. A sarcoma containing areas of calcareous degeneration.

psammotherapy (*sam-o-ther'-ap-e*) [ψάμμος, sand; θεραπεία, treatment]. Ammotherapy; the therapeutic use of the sand-bath.

psammous (*sam'-us*) [ψάμμος, sand]. Sandy; sabulous.

pselaphesis (*sel-af-e'-sis*) [ψηλάφησις, touch]. 1. The act of groping with the fingers, seen in the low delirium of fevers; carphology. 2. Tickling, or ticklishness.

pselaphia (*sel'-a'-fe-ah*) [ψηλαφία, touch]. 1. Digital examination or exploration. 2. The same as *pselaphesis.*

psellism, psellismus (*sel'-izm, sel-iz'-mus*) [ψλλεισμός, a stammering]. 1. Stuttering or stammering. 2. Defective speech due to hare-lip or to cleft palate. **psellismus mercurialis,** the unintelligible, hurried, jerking speech accompanying mercurial tremor.

pseud-, pseudo- (*sūd-, sū-do-*) [ψευδής, false]. A prefix meaning false.

pseudaconitine (*sū-dak-on'-it-ēn*) [*pseud-; aconite*]. $C_{36}H_{49}NO_{12}$. An extremely poisonous alkaloid from *Aconitum ferox.*

pseudacousia, pseudacousma, pseudacusis (*sū-dak-oos'-e-ah, -mah, -ū'-sis*) [*pseud-;* ἄκουσις, a hearing]. A disturbance of hearing in which the person's own voice sounds strange or peculiar, being altered in pitch and quality.

pseudacromegaly (*sū-dak-ro-meg'-al-e*) [*pseud-; acromegaly*]. Enlargement of the face and extremities without any involvement of the pituitary gland.

pseudactinomycosis (*su-dak-tin-o-mi-ko'-sis*). A form of pulmonary tuberculosis in which the sputum contains actinomycosis-like bodies.

pseudæsthesia (*sū-des-the'-ze-ah*). See *pseudesthesia.*

pseudagraphia (*sū-dag-raf'-e-ah*). Incomplete agraphia, in which a person can copy correctly but can not write independently of an original.

pseudalbuminuria. See *pseudoalbuminuria.*

pseudamnesia (*sū-dam-ne'-ze-ah*) [*pseud-;* ἀμνησία, forgetfulness]. 1. Spurious amnesia; a condition resembling amnesia, but of a transient character. 2. An erroneous form of the word *pseudomnesia, q. v.*

pseudangina (*sū-dan'-jin-ah*). See *pseudoangina.*

pseudankylosis (*sū-dank-il-o'-sis*) [*pseudo-; ankylosis*]. A false joint; a false or fibrous ankylosis.

pseudaphe, pseudaphia (*sū'-da-fe, sū-da'-fe-ah*) [ψευδής, false; ἁφή, touch]. Pseudesthesia.

pseudarthritis (*sū-dar-thri'-tis*) [*pseud-; arthritis*]. Hysterical affection of a joint, simulating arthritis.

pseudarthrosis (*sū-dar-thro'-sis*) [*pseud-; arthrosis*]. A false joint.

pseudaxis (*sū-daks'-is*). Same as *sympodium, q. v.*

pseudelminth (*sū-del'-minth*) [*pseudo-;* ἕλμινθ, a worm]. Any worm-like object mistaken for an entoparasitic worm.

pseudencephalus (*sū-den-sef'-al-us*) [*pseud-;* ἐγκέφαλος, brain]. A species of monster characterized by a partial development of the frontal, parietal, and occipital bones, while the brain is represented by a bunch of membranes, blood-vessels, connective and possibly nervous tissue at the base of the skull.

pseudephedrin (*sū-def'-ed-rin*). See *pseudoephedrin.*

pseudesthesia, pseudæsthesia (*sū-des-the'-ze-ah*) [*pseud-;* αἴσθησις, feeling]. An imaginary sensation for which there is no corresponding object; a sensation referred to parts of the body that have been removed by accident or surgical operation.

pseudiater (*sū-de-a'-ter*) [*pseud-;* ἰάτρος, physician]. A quack, or charlatan.

pseudinoma (*sū-din-o'-mah*). Synonym of *scirrhus.*

pseudo- (*sū'-do-*). See *pseud-.*

pseudoaconitine (*sū-do-ak-on'-it-ēn*). Synonym of *pseudaconitine.*

pseudoactinomycosis, pseudactinomycosis (*sū-do-ak-tin-o-mi-ko'-sis, sū-dak-tin-o-mi-ko'-sis*). A form of pulmonary tuberculosis in which the sputum contains granular bodies resembling the grains of actinomycosis. They consist of a crystalline substance similar to leucin.

pseudoagraphia (*sū-do-ah-gra'-fe-ah*). The form of agraphia in which meaningless or disconnected words can be written.

pseudoakromegaly (*sū-do-ak-ro-meg'-al-e*). See *osteoarthropathy, hypertrophic pulmonary.*

pseudoalbuminuria (*sū-do-al-bū-min-ū'-re-ah*). False or physiological albuminuria.

pseudoalveolar (*sū-do-al-ve'-o-lar*). Simulating alveolar tissue.

pseudoangina (*sū-do-an'-ji-nah*). False angina; hysteric angina; an attack of cardiac pain somewhat resembling angina pectoris but less grave in character, longer in duration, and usually not associated with organic heart disease. It occurs in neurotic women, and is generally brought on by emotional excitement.

pseudoangioma (*sū-do-an-je-o'-mah*) [*pseudo-; angioma*]. The formation of a temporary angioma, as is sometimes seen in healing stumps. **p., urethral,** urethral caruncle.

pseudoanorexia (*sū-do-an-or-eks'-e-ah*). Rejection of food because of gastric distress.

pseudoapoplexy (*sū-do-ap'-o-pleks-e*) [*pseudo-; apoplexy*]. A diseased condition resembling apoplexy, but in which cerebral hemorrhage is not found post-mortem.

pseudoappendicitis (*sū-do-ap-en-dis-i'-tis*). 1. A condition simulating appendicitis, but with no lesion of the appendix. 2. A condition simulating appendicitis occurring in hysterical subjects or associated with secondary syphilis.

pseudoarthrosis (*sū-do-ar-thro'-sis*). See *pseudarthrosis.*

pseudoasthma (*sū-do-as'-mah*). Dyspnea.

pseudoataxia (*sū-do-ah-taks'-e-ah*). See *pseudotabes*.

pseudobacillus (*sū-do-bas-il'-us*). 1. One of the very fine fat crystals sometimes found in sputum, and which stain similarly to tubercle bacilli, from which they are distinguishable by their varying size and their solubility in ether and chloroform. 2. In the plural, *pseudobacilli* (of Hayem), very minute, rod-shaped products of corpuscular fragmentation observed in poikilocytosis.

pseudobacterium (*sū-do-bak-te'-re-um*). Any object resembling a bacterium.

pseudoblepsia, pseudoblepsis (*sū-do-blep'-se-ah, su-do-blep'-sis*) [*pseudo-; βλέψις*, seeing]. A visual hallucination; a distorted visual image.

pseudobulbar (*sū-do-bul'-bar*). Not really bulbar. **p. paralysis,** symmetrical disease of both cerebral hemispheres involving the centers or paths of the nerves of speech, and thus resembling disease of the medulla oblongata.

pseudocartilaginous (*sū-do-kar-til-aj'-in-us*). Simulating cartilage in structure.

pseudocataracta (*sū-do-kat-ar-ak'-tah*) [*pseudo-; cataract*]. Spurious cataract.

pseudocele (*sū-do-sēl*) [*pseudo-; κοῖλος*, a hollow] The fifth ventricle of the brain.

pseudoceliotomy (*sū-do-se-le-ot'-o-me*). The pretended performance of abdominal section.

pseudochalazion (*sū-do-kal-a'-ze-on*). A malignant lesion of the conjunctiva resembling chalazion.

pseudochancre (*sū-do-shang'-ker*). An indurated sore simulating chancre.

pseudochlorosis (*sū-do-klo-ro'-sis*). Leache's term for a form of chlorosis in which there was no diminution of the number of erythrocytes.

pseudochorea (*sū-do-ko-re'-ah*) [*pseudo-; χορεία*, dance]. Spurious chorea, usually hysterical in origin.

pseudochromesthesia (*sū-do-kro-mes-the'-ze-ah*) [*pseudo-; χρῶμα*, color; *αἴσθησις*, sense]. A condition in which the vowels of a word (whether seen, heard, or remembered) each seem to have a distinct visual tint. See *photism, phonism*.

pseudochromia (*sū-do-kro'-me-ah*) [*pseudo-; χρῶμα*, color]. A false or incorrect preception of color.

pseudocirrhosis (*sū-do-sir-o'-sis*). A condition marked by ascites, dyspnea, and cyanosis, believed to be due to combined cirrhosis and peritoneal disease.

pseudoclump (*sū-do-klump*). A clump of bacteria in broth typhoid cultures, which simulates closely the clumps formed by specific typhoid agglutinins.

pseudocodeine (*sū-do-ko'-de-in*), $C_{18}H_{21}NO_3$. A derivative of codeine, analogous to codeine but weaker.

pseudocœle, pseudocœlia (*sū-do-sēl, sū-do-se'-le-ah*). Synonym of *pseudocele* and of *pseudocœlom*.

pseudocoloboma (*sū-do-kol-o-bo'-mah*) [*pseudo-; κολόβωμα*, mutilation]. A scarcely noticeable fissure of the iris, the remains of the embryonic ocular fissure, which has almost, but not perfectly, closed.

pseudocoxalgia (*sū-do-koks-al'-je-ah*). Perthes' disease.

pseudocrisis (*sū-do-kri'-sis*). A false crisis; a sudden fall of temperature resembling the crisis of a disease, but subsequently followed by a rise of temperature and a continuation of the disease. It is common in pneumonia.

pseudocroup (*sū-do-kroop*). False croup; laryngismus stridulus.

pseudocyesis (*sū-do-si-e'-sis*) [*pseudo-; κύησις*, pregnancy]. False pregnancy; the belief, on the part of a woman, in the existence of pregnancy when none exists.

pseudocylindroid (*sū-do-sil'-in-droid*) [*pseudo-; cylindroid*]. A band of mucus or any substance in the urine simulating a renal cast.

pseudocyst (*sū'-do-sist*) [*pseudo-; κύστις*, a bladder]. In biology, a globular body produced by the breaking up of protoplasm in a filament, in certain of the lower plants; an asexual reproductive body.

pseudodesma (*sū-do-dez'-mah*) [*pseudo-; δεσμός*, bond]. A false or adventitious ligament.

pseudodiascope (*sū-do-di'-ah-skōp*) [*pseudo-; διασκοπεῖν*, to look through]. An instrument demonstrating the persistence of visual impressions made upon the retina.

pseudodiastolic (*sū-do-di-as-tol'-ik*). Apparently diastolic.

pseudodiphtheria (*sū-do-dif-the'-re-ah*) [*pseudo-; diphtheria*]. An inflammation characterized by the presence of a false membrane not due to the Klebs-Löffler bacillus. **p. bacillus,** a nonpathogenic bacillus resembling in form and growth the true diphtheria bacillus.

pseudodiphtheritic (*sū-do-dif-ther-it'-ik*). Simulating diphtheria; relating to pseudodiphtheria.

pseudodyspepsia (*sū-do-dis-pep'-se-ah*) [*pseudo-; dyspepsia*]. Nervous dyspepsia or gastric neurasthenia.

pseudoedema (*sū-do-e-de'-mah*). A condition simulating edema.

pseudoencephalitis (*sū-do-en-sef-al-i'-tis*) [*pseudo-; encephalitis*]. Hydrencephaloid disease.

pseudoendometritis (*sū-do-en-do-met-ri'-tis*) [*pseudo-; endometritis*]. A condition resembling endometritis marked by changes in the blood-vessels, hyperplasia of the glands, and atrophy.

pseudoephedrine (*sū-do-ef'-ed-rin*), $C_{11}H_{19}NO$. An alkaloid found in *Ephedra vulgaris* and isomeric with ephedrine.

pseudoepilepsy (*sū-do-ep'-il-ep-se*) [*pseudo-; epilepsy*] Disorders simulating epilepsy, wholly or partially of rhachitic origin.

pseudoepithelioma (*sū-do-ep-i-the-le-o'-mah*) [*pseudo-; epithelioma*]. An affection of the skin simulating epithelioma.

pseudoerysipelas (*sū-do-er-e-sip'-el-as*) [*pseudo-; erysipelas*]. Inflammation of the subcutaneous cellular tissue resembling erysipelas.

pseudoesophagism (*sū-do-e-sof'-a-jism*) [*pseudoesophagism*]. A condition resembling esophagismus but without any obstruction being found in the esophagus.

pseudoesthesia (*sū-do-es-the'-ze-ah*). See *pseudesthesia*.

pseudofever (*sū-do-fe'-ver*) [*pseudo-; fever*]. An hysterical elevation of temperature.

pseudofibrin (*sū-do-fi'-brin*) [*pseudo-; fibrin*]. The coagulative material of blood in cases of "buffy coat."

pseudofluctuation (*sū-do-fluk-tū-a'-shun*) [*pseudo-; fluctuation*]. A tremor simulating fluctuation, sometimes observed on tapping lipomata.

pseudofracture (*sū'-do-frak-chur*) [*pseudo-; fracture*]. A spontaneous fracture.

pseudoganglion (*sū-do-gang'-gle-on*) [*pseudo-; ganglion*]. A false ganglion, usually a slight thickening of a nerve.

pseudogastralgia (*sū-do-gas-tral'-je-ah*) [*pseudo-; γαστήρ*, stomach; *ἄλγος*, pain]. A pain resem-

bling gastralgia, but not caused by disease of the stomach. It may be dependent upon disease of the aorta.

pseudogelatin (*sū-do-jel'-at-in*) [*pseudo-; gelatin*]. Any gelatinous substance obtained from vegetable tissues.

pseudogeusesthesia, pseudogeusæsthesia (*sū-do-gū-zes-the'-ze-ah*) [*pseudo-; γεῦσις*, taste; *αἰσθησις*, sensation]. A condition in which color sensations accompany the sense of taste.

pseudogeusia (*sū-do-gū'-ze-ah*) [*pseudo-; γεῦσις*, taste]. A false perception, or hallucination, of taste.

pseudoglioma (*sū-do-gli-o'-mah*) [*pseudo-; glioma*]. A name given to inflammatory changes of the vitreous humor, due to iridochoroiditis, and resembling glioma of the retina.

pseudoglobulin (*sū-do-glob'-ū-lin*). A protein found in globulin; it is not precipitated by dialysis.

pseudoglucosazone (*sū-do-gloo-ko'-sa-zōn*). A crystalline substance sometimes in normal urine which gives the phenylhydrazine test for sugar.

pseudogonococcus (*sū-do-gon-o-kok'-us*) [*pseudo-; gonococcus*]. A diplococcus resembling the gonococcus found in the normal urethra.

pseudogonorrhea (*sū-do-gon-or-e'-ah*) [*pseudo-; gonorrhea*]. A simple nonspecific urethritis.

pseudohay-fever (*sū-do-ha'-fe-ver*). Vasomotor rhinitis.

pseudohematocele (*sū-do-hem-at'-o-sēl*) [*pseudo-; hematocele*]. Hematocele occurring outside of the peritoneal cavity.

pseudohemoglobin (*sū-do-hem-o-glo'-bin*) [*pseudo-; hemoglobin*]. A loose combination of hemoglobin and oxygen believed to be an intermediate step between hemoglobin and oxyhemoglobin, on the reduction of the latter.

pseudohemoptysis (*sū-do-hem-op'-tis-is*). Spitting up of blood which does not come from the lungs or the bronchial tubes.

pseudohermaphrodite (*sū-do-her-maf'-ro-dīt*) [*pseudo-; hermaphrodite*]. A person with a double sexual formation of the external genitals, but unisexual development of the reproductive glands (ovaries and testicles). According to the development of one or the other of the latter will the sex of the person be determined.

pseudohermaphroditism (*sū-do-her-maf'-ro-dit-izm*) [*pseudo-; hermaphroditism*]. A condition simulating hermaphroditism.

pseudohernia (*sū-do-her'-ne-ah*) [*pseudo-; hernia*]. An empty hernia sac resembling strangulated hernia when inflamed.

pseudoheterotopia (*sū-do-het-ur-o-to'-pe-ah*) [*pseudo-; ἕτερος*, other; *τόπος*, place]. Misplacement of cerebral alba or cinerea by unskillful manipulation in an autopsy.

pseudohydrarthrosis (*sū-do-hi-drar-thro'-sis*) [*pseudo-; hydrarthrosis*]. Apparent dropsy of the knee-joint from effusion into the ligament between the patella and the tuberosity of the tibia, and especially into the fat tissue of the synovial bursa.

pseudohydronephrosis (*sū-do-hi-dro-nef-ro'-sis*). The presence of a cyst near the kidney which resembles hydronephrosis.

pseudohydrophobia (*sū-do-hi-dro-fo'-be-ah*) [*pseudo-; hydrophobia*]. A condition resembling hydrophobia, at times produced by dread of the disease. Syn., *lyssophobia*.

pseudohyoscyamine. See *hyoscyamine pseudo-*.

pseudohypertrophic (*sū-do-hi-per-tro'-fik*). Pertaining to or characterized by pseudohypertrophy. **p. muscular paralysis,** loss or diminution of the power of motion, accompanied by enlarged, and apparently hypertrophied muscles. The types are the Leyden-Moebius, Zimmerlin, and Landouzy-Déjerine. See *paralysis, pseudohypertrophic*.

pseudohypertrophy (*sū-do-hi-per'-tro-fe*) [*pseudo-; hypertrophy*]. False hypertrophy; increase in the size of an organ on account of overgrowth of an important tissue. It is accompanied by diminution in function.

pseudoicterus (*sū-do-ik'-ter-us*). A discoloration of the skin not due to disturbances of the liver or biliary apparatus.

pseudoileus (*sū-do-il'-e-us*) [*pseudo-; ileus*]. 1. Reflex ileus due to constriction of the mesentery, or of a diverticulum, or from traction of a pedicled ovarian tumor, contusion of the testicle or abdomen, or from movable kidney. 2. Acute dilatation of the stomach. 3. Extreme constipation with paralysis of the intestinal wall.

pseudoinfluenza (*sū-do-in-floo-en'-zah*) [*pseudo-; influenza*]. A disease simulating influenza but not due to *Bacillus influenzæ*.

pseudoisochromatic (*sū-do-is-o-kro-mat'-ik*) [*pseudo-; ἴσος*, equal; *χρῶμα*, color]. Of different colors, yet apparently of the same color. Cf. *anisochromatic*.

pseudojaundice (*sū-do-jawn'-dis*). Hematogenous jaundice without hepatic disease.

pseudoleprosy (*sū-do-lep'-ro-se*). A disease with lesions of the feet resembling elephantiasis. Also known as *punudos*.

pseudoleukemia, pseudoleukæmia (*sū-do-lū-ke'-me-ah*) [*pseudo-; leukemia*]. See *Hodgkin's disease*. **p., infantile,** von Jaksch's disease, a form of anemia occurring in young children, usually dependent on a rhachitic diathesis, and not associated with much leukocytosis.

pseudoleukocythemia (*sū-do-lū-ko-si-the'-me-ah*). Synonym of *pseudoleukemia*.

pseudolien (*sū-do-le'-en*). See *spleen, accessory*.

pseudolipoma (*sū-do-lip-o'-mah*) [*pseudo-; lipoma*]. A localized edema resembling an accumulation of fat, occurring above the clavicle and about the knee, especially in cases of rheumatism.

pseudolupus (*sū-do-lū'-pus*) [*pseudo-; lupus*]. A disease simulating lupus **vulgaris,** produced by a species of oidium. **p. vulgaris.** See *dermatitis, blastomycetic*

pseudolyssa (*sū-do-lis'-ah*). Lyssophobia.

pseudomalady (*sū-do-mal'-ad-e*) [*pseudo-; malum*, evil]. An imaginary or simulated illness.

pseudomalaria (*sū-do-mal-a'-re-ah*) [*pseudo-; malaria*]. A toxemic disease simulating malaria.

pseudomamma (*sū-do-mam'-ah*) [*pseudo-; mamma*]. A mamma-like structure sometimes occurring in dermoid cysts.

pseudomania (*sū-do-man'-ne-ah*) [*pseudo-; μανία*, madness]. 1. A form of insanity in which the patient accuses himself of crimes of which he is innocent. 2. A mania characterized by lying.

pseudomelanosis (*sū-do-mel-an-o'-sis*) [*pseudo-; μέλας*, black; *νόσος*, disease]. The dark staining of gangrenous parts or the tissues after death, due to the deposit of ferrous sulphide, which is formed by a reaction of hydrogen sulphide and the hemoglobin of the blood.

pseudomembrane (*sū-do-mem'-brān*) [*pseudo-; membrane*]. A false membrane, as in diphtheria.

pseudomembranous (*sū-do-mem'-bran-us*). Characterized by, or pertaining to, false membranes. **p. inflammation,** any inflammation characterized by the formation of a false membrane.

pseudomeningitis (*sū-do-men-in-jī'-tis*) [*pseudo-; meningitis*]. A group of symptoms resembling that produced by meningitis, but with absence of the lesions of meningeal inflammation; meningism. **p., dental,** meningeal symptoms occurring in children during difficult dentition.

pseudomeninx (*sū-do-men'-inks*) [*pseudo-; μῆνιγξ*, membrane]. A false membrane.

pseudomnesia (*sū-do-ne'-ze-ah*) [*pseudo-; μνῆσις*, remembrance]. Perversion of the memory in which things that never occurred seem to be remembered.

Pseudomonas (*sū-do-mo'-nas*) [*pseudo-; μόνας*, monad]. A genus of microorganisms having polar flagella.

pseudomorphine (*sū-do-mor'-fēn*). A finely crystalline alkaloid of opium, insoluble in water, alcohol, ether, and chloroform; it is soluble in alkalies and lime-water, neutral, tasteless. It has the chemical but not the toxic properties of morphine.

pseudomucin (*sū-do-mū'-sin*) [*pseudo-; mucin*]. A substance allied to mucin, found in proliferative ovarian cysts.

pseudomyxoma (*sū-do-miks-o'-mah*) [*pseudo-; myxoma*]. A tumor containing colloid matter derived from a ruptured mucous cyst.

pseudonarcotic (*sū-do-nar-kot'-ik*). Sedative but not narcotic.

pseudonarcotism (*sū-do-nar'-ko-tizm*) [*pseudo-; ναρκοῦν*, to benumb]. An hysterical simulation of narcotism.

pseudoneoplasm (*sū-do-ne'-o-plazm*) [*pseudo-; neoplasm*]. 1. A phantom tumor. 2. A temporary swelling generally of inflammatory origin.

pseudoneuralgia (*sū-do-nū-ral'-je-ah*) [*pseudo-; neuralgia*]. A term given by Charcot to the pains of rickets.

pseudoneuritis (*sū-do-nū-ri'-tis*). A disease simulating a neuritis.

pseudoneuroma (*sū-do-nū-ro'-mah*) [*pseudo-; neuroma*]. A false neuroma. See *neuroma*.

pseudonuclein (*sū-do-nū'-kle-in*). See *paranuclein*.

pseudoosteomalacia (*sū-do-os-te-o-mal-a'-se-ah*) [*pseudo-; osteomalacia*]. Rhachitis in which the pelvic basin is distorted so as to resemble in form that of osteomalacia.

pseudoparalysis (*sū-do-par-al'-is-is*) [*pseudo-; paralysis*]. Paralysis of motion, apparently but not really due to a lesion of the nervous system. **p. agitans.** See *dystaxia agitans*. **p. myasthenica,** bulbar paralysis without apparent anatomic lesion. **p. of rickets,** the inability to walk in severe cases of rickets, due to distortion of the bones. **p., syphilitic,** an inflammatory condition of the epiphyses of the bones in syphilis causing a marked impairment of motion.

pseudoparanoia (*sū-do-par-an-oi'-ah*) [*pseudo-; paranoia*]. A condition in which there is a primarily more active mentality, as well as an increased responsivity to emotional impulses, associated with a heightened desire for activity.

pseudoparaplegia (*sū-do-par-ap-le'-je-ah*) [*pseudo-; paraplegia*]. Spurious paraplegia. **p., tetanoid.** Synonym of *paralysis, spastic*.

pseudoparasite (*sū-do-par'-ah-sīt*) [*pseudo-; parasite*]. 1. Any object resembling a parasite. 2. A commensal.

pseudoparesis (*sū-do-par'-es-is*) [*pseudo-; paresis*]. An affection resembling paresis, but regarded as distinct from the ordinary forms.

pseudopellagra (*sū-do-pel-a'-grah*) [*pseudo-; pellagra*]. An affection regarded by some authorities as distinct from pellagra, but presenting similar skin symptoms.

pseudopelletierine (*sū-do-pel'-et'-e-er-ēn*). $C_{18}H_{30}N_2O_2$. An alkaloid found in the root-bark of pomegranate.

pseudopeptone (*sū-do-pep'-tōn*). Same as *hemialbumose*.

pseudopericardial (*sū-do-per-e-kar'-de-al*). Appearing to be connected with the pericardium.

pseudoperitonitis (*sū-do-per-e-ton-i'-tis*). Peritonism.

pseudophlegmon (*sū-do-fleg'-mon*) [*pseudo-; phlegmon*]. A simulated furuncle due to trophic nerve lesion.

pseudophotesthesia (*sū-do-fo-tes-the'-ze-ah*) [*pseudo-; φῶς*, light; *αἴσθησις*, perception]. The seeing of photisms.

pseudophthisis (*sū-do-ti'-sis*) [*pseudo-; φθίσις*, wasting]. Emaciation and general wasting arising from other causes than pulmonary tuberculosis.

pseudoplasm (*sū'-do-plazm*) [*pseudo-; πλάσμα*, a thing molded]. Same as *pseudoneoplasm*.

pseudoplegia (*sū-do-ple'-je-ah*) [*pseudo-; πληγή*, stroke]. Simulated or hysterical paralysis.

pseudopneumococcus (*sū-do-nū-mo-kok'-us*). A diplococcus larger than the pneumococcus, but much like it in some respects.

pseudopneumonia (*sū-do-nu-mo'-ne-ah*). Any disease of the lung simulating pneumonia.

pseudopod, pseudopodium (*sū'-do-pod, sū-do-po'-de-um*) [*pseudo-; πούς*, foot]. A protrusion of a portion of the substance of an ameboid cell.

pseudopodiospore (*sū-do-po'-de-o-spōr*) [*pseudopodium; spore*]. A spore having pseudopodia; an amæbula.

pseudopregnancy (*sū-do-preg'-nan-se*) [*pseudo-; pregnancy*]. Synonym of *pregnancy*, false.

pseudopsia (*sū-dop'-se-ah*) [*pseudo-; ὤψ*, eye]. Visual hallucination, or error of visual perception.

pseudopterygium (*sū-do-ter-ij'-e-um*). False, or cicatricial, pterygium.

pseudoptosis (*sū-do-to'-sis*) [*pseudo-; ptosis*]. A condition resembling ptosis caused by a fold of skin and fat depending below the edge of the eyelid

pseudopus (*sū'-do-pus*) [*pseudo-; pus*]. A liquid that resembles pus in appearance only.

pseudorabies (*sū-do-ra'-be-ez*). See *lyssophobia*.

pseudoreaction (*sū-do-re-ak'-shun*) [*pseudo-; reaction*]. Agglutination not due to typhoid bacilli. Cf. *pseudoclump*.

pseudorexia (*sū-dor-eks'-e-ah*) [*pseudo-; ὄρεξις*, desire]. A perverted appetite.

pseudorhachitis (*sū-do-ra-ki'-tis*). Osteitis deformans.

pseudorheumatism (*sū-do-roo'-mat-izm*) [*pseudo-; rheumatism*] False rheumatism. **p., infectious,** a term given by Lapersonne to certain cases of multiple synovitis or arthritis, the prime cause of which it is impossible to discover.

pseudorhonchus (*sū-do-rong'-kus*) [*pseudo-; rhonchus*]. A false or spurious rhonchus; a deceptive auscultatory sound.

pseudoscarlatina (*sū-do-skar-lat-e'-nah*) [*pseudo-; scarlatina*]. A febrile disease associated with a rash like that of scarlatina, occurring as a result of gonorrhea or after puerperal infection.

pseudosclerosis (*sū-do-skle-ro'-sis*) [*pseudo-; sclerosis*]. An affection similar in symptoms to multiple sclerosis of the nervous system, but without the anatomical lesions.

pseudosmia (*sū-dos'-me-ah*) [*pseudo-; ὀσμή*, smell]. Perversion of the sense of smell; an olfactory hallucination.

pseudosphincter (*sū-do-sfink'-ter*) [*pseudo-; sphincter*]. An imperfect sphincter.

pseudospleen, pseudosplen (*sū'-do-splēn, -splen*). See *spleen, accessory*.

pseudosteogenesis (*sū-dos-te-o-jen'-e-sis*) [*pseudo-; ὀστέον*, bone; *γεννᾶν*, to produce]. Abnormal bone-formation.

pseudosteum (*sū-dos'-te-um*). An abnormal bony growth.

pseudostoma (*sū-dos'-to-mah*) [*pseudo-; στόμα*, a mouth]. An apparent aperture between endothelial cells that have been stained with silver nitrate.

pseudotabes (*sū'-do-ta-bēz*) [*pseudo-; tabes*]. 1. A disease simulating tabes dorsalis or tabes mesenterica. 2. The ataxic form of alcoholic multiple neuritis.

pseudotetanus (*sū-do-tet'-an-us*) [*pseudo-; tetanus*]. Escherich's symptom-complex. A rare type of tetanus in which the masseters and dorsal muscles are principally involved.

pseudotoxin (*sū-do-toks'-in*). A name given to extract of belladonna containing other substances.

pseudotrichinosis (*sū-do-trik-in-o'-sis*) [*pseudo-; trichinosis*]. Acute polymyositis resembling trichinosis of the muscles.

pseudotrichosis (*sū-do-trik-o'-sis*) [*pseudo-; trichosis*]. The growth of hair in an abnormal location.

pseudotropine (*sū-do-tro'-pēn*) [*pseudo-; tropine*], $C_8H_{15}NO$. An isomeric form of tropine.

pseudotuberculosis (*sū-do-tū-ber-kū-lo'-sis*) [*pseudo-; tuberculosis*]. A disease resembling tuberculosis, but not caused by the tubercle bacillus.

pseudotumor (*sū-do-tū'-mor*) [*pseudo-; tumor*]. A phantom tumor; one that changes its location is called an ambulant tumor.

pseudotyphoid (*sū-do-tī'-foid*) [*pseudo-; typhoid*]. Spurious typhoid, a disease simulating typhoid fever, but in which the true lesions of this disease as well as the typhoid bacilli are absent.

pseudovacuoles (*sū-do-vak'-ū-ōlz*) [*pseudo-; vacuole*]. Transparent bodies containing pigment found by Laveran in blood of malarial patients.

pseudoventricle (*sū-do-ven'-trik-l*). The fifth ventricle of the brain.

pseudovermicule (*sū-do-ver'-mik-ūl*) [*pseudo-; vermes*, worm]. The motile stage in the development of certain plasmodia, as that produced from the fertilized macrogamete in the case of the malarial parasite and allied organisms.

pseudovomiting (*sū-do-vom'-it-ing*). Passive regurgitation of material from the stomach, with no expulsive effort.

pseudoxanthine (*sū'-do-zan-thēn*) [*pseudo-; xanthine*]. 1. $C_4H_5N_5O$, a leukomaine isolated from fresh beef. 2. A body isomeric with xanthine, obtained by action of sulphuric acid upon uric acid.

pseudoxanthoma (*sū-do-zan-tho'-mah*) [*pseudo-; xanthoma*]. A rare chronic disease of the skin characterized by an eruption of yellowish plaques, slightly elevated, with an especial predilection for certain parts of the skin, *e. g.*, lower abdomen, axilla, sides of neck, etc., in which it differs from true xanthoma, which affects by preference the flexures of fingers, the extensor surfaces of elbows and knees, etc. It differs histologically from true xanthoma in being a degeneration of the elastic tissue of the skin. Syn., *pseudoxanthoma elasticum*.

pseudozoogloea (*sū-do-zo-og-le'-ah*) [*pseudo-; ζῷον*, animal; *γλοῖα*, glue]. A clump of bacteria something like a zooglœa mass, but not dissolving readily in water and not having the degree of compactness and gelatinization possessed by zooglœæ.

pseudulcus (*sūd-ul'-kus*). A false ulcer. **p. ventriculi**, a sensory neurosis of the stomach closely resembling gastric ulcer.

pseudydrops (*sūd-i'-drops*) [*pseudo-; ὕδρωψ*, dropsy]. False dropsy.

psicaine (*si'k-ān*). A synthetic alkaloid similar to cocaine.

psilon (*si'-lon*). Term suggested to represent the one-thousandth part of a cubic millimeter; represented by *ψ*.

psilosis (*si-lo'-sis*) [*ψιλός*, bare]. 1. The removal of the hair from a part; depilation. 2. See *aphthæ tropicæ*.

psilothin, psilothinum (*si-lo'-thin, si-lo-thi'-num*). A depilatory cerate containing elemi, 40%; benzoin, 10%; rosin, 8%; yellow wax, 10%; and diachylon plaster, 30%; applied warm, and when cool, removed with the hair adhering.

psilothric (*si-lo'-thrik*) [*ψίλωθρον*, a depilatory]. Depilatory.

psilothron (*sil'-o-thron*) [*ψίλωθρον*]. A depilatory.

psilotic (*si-lo'-tik*). Relating to pslosis.

psittacosis (*sit-ak-o'-sis*) [*ψιττακός*, a parrot]. A disease of birds, especially of parrots, transmissible to man, in whom it runs the course of a violent typhoid fever without abdominal symptoms but with pulmonary disorders resembling severe infectious pneumonia. It is due to *Bacillus psittacosis*.

psoadic (*so-ad'-ik*) [*psoas*]. Pertaining to a psoas muscle, or to the loin.

psoadotomia (*so-ad-o-to'-me-ah*) [*psoas; τομή*, a cutting]. Incision of the psoas muscle.

psoas (*so'-as*) [*ψόα*, loin]. One of two muscles—*psoas magnus* and *psoas parvus*—of the loins and pelvis. See under *muscle*. **p. abscess**, an abscess, usually dependent upon tuberculous disease of a vertebra, making its way along the sheath of the psoas muscle and pointing at the front of the thigh, below Poupart's ligament, to the outer side of the spine of the pubis

psodymus (*sod'-im-us*) [*psoas; δίδυμος*, double]. A monster with two heads and chests and conjoined abdominal and pelvic cavities.

psoitis (*so-i'-tis*) [*psoas; ῖτις*, inflammation]. Inflammation of the psoas muscles or of the region of the loins.

psomophagia, psomophagy (*so-mo-fa'-je-ah, so-mof'-a-je*) [*ψωμός*, a bit; *φαγεῖν*, to eat]. Swallowing the food after imperfect and inadequate mastication.

psora (*so'-rah*) [*ψώρα*, the itch]. 1. Scabies. 2. Psoriasis.

psorelcosis (*so-rel-ko'-sis*) [*psora; ἕλκωσις*, ulceration]. Ulceration during the progress of scabies.

psorenteria (*so-ren-te'-re-ah*) [*psora; ἔντερον*, intestine]. Inflammatory condition of solitary follicles of the intestine observed in Asiatic cholera.

psorenteritis (*so-ren-ter-i'-tis*) [*psora; enteritis*]. The intestinal condition in Asiatic cholera.

psoriasic (*so-ri-as'-ik*). See *psoriatic*.

psoriasiform (*so-ri-as'-e-form*). Like psoriasis.

psoriasis (*so-ri'-as-is*) [*psora*]. A chronic inflammatory disease of the skin characterized by the development of reddish patches covered with whitish scales. The disease affects especially the extensor surfaces of the body. **p. annu-**

laris. Synonym of *p. circinata.* **p. buccal, p. buccalis.** Synonym of *leukoplakia buccalis.* **p. circinata,** psoriasis in which the central part of the lesions has disappeared, leaving ring-shaped patches. **p. diffusa,** a form in which there is coalescence of large contiguous lesions. **p. guttata.** See *p. punctata.* **p. gyrata,** psoriasis with a serpentine arrangement of the patches. **p. lotricum,** a form attacking the hands and arms, particularly of washerwomen. Syn., *washerwoman's itch.* **p. osteacea,** psoriasis associated with affections of joints. **p. palmaris,** a form affecting the palms of the hands. **p. pistorum,** baker's itch. **p. punctata,** a form in which the lesions consist of minute red papules which rapidly become surmounted by pearly scales. **p. universalis,** a form in which the lesions are over all the body.

psoriatic (*so-ri-at'-ik*) [*psoriasis*]. Pertaining to or affected with psoriasis.

psoric (*so'-rik*). Pertaining to psora.

psorinum (*so-ri'-num*). A homeopathic preparation made from the vesicle of scabies.

psorocomium (*so-ro-ko'-me-um*) [*psora;* κομεῖν, to take care of]. A hospital for patients with the itch.

psoroid (*so'-roid*) [*psora;* εἶδος, like]. Similar to psora or scabies.

psorophthalmia (*so-rof-thal'-me-ah*) [*psora;* ὀφθαλμός, eye]. Marginal blepharitis.

psorosperm (*so'-ro-sperm*) [*psora;* σπέρμα, seed]. A unicellular organism belonging to the protozoa; a coccidium; a sporozoon.

psorospermial, psorospermic (*so-ro-sperm'-e-al, so-ro-sperm'-ik*) [*psorosperm*]. Pertaining to, or affected with, psorosperms.

psorospermiasis (*so-ro-sperm-i'-as-is*) [*psorosperm*]. A state characterized by the presence of psorosperms **p. mammillaris,** cancer of the nipple.

psorospermosis (*so-ro-sperm-o'-sis*) [*psorosperm*]. A diseased condition associated with the presence of psorosperms. **p., proliferative follicular.** Synonym of *keratosis follicularis* and *Darier's disease.*

psorous (*so'-rus*) [*psora*]. Pertaining to or affected with the itch.

psorozoa (*so-ro-so'-ah*) [*psora;* ζῷον, animal]. Animal psorosperms.

P. S. P. Abbreviation for phenolsulphonephthalein test, being the first letters of the three component words.

psychagogia (*si-kag-o'-je-ah*) [ψυχή, spirit; ἀγωγός, leading]. Mental excitement or activity.

psychagogic (*si-kag-oj'-ik*) [ψυχή, spirit; ἀγωγός. leading]. 1. Restorative of the consciousness. 2. A remedy that restores to consciousness, as in fainting.

psychalgia (*si-kal'-je-ah*) [ψυχή, mind; ἄλγος, pain]. Painful cerebration in melancholia.

psychalia (*si-ka'-le-ah*) [ψυχή, mind]. A morbid condition attended by hallucinations.

psychanalysis (*si-kan-al'-is-is*) [ψυχή, mind; *analysis*]. The mental processes comprise two groups. One controls the conscious daily ideas and acts; the other the subconscious ideas and wishes of the past. These two groups constantly merge, the conscious group dominating. When a break occurs in the process, through unusual cause, then a *psychŏneurosis* is created. If the patient is lead to relate unreservedly, up to the time of the break, all ideas, proper or improper, and long forgotten thoughts, then the *pathogenic link* is found, and the patient, realizing it, regains control and recovers. This method is called *psychanalysis.*

psychasthenia (*si-kas-the'-ne-ah*) [ψυχή, mind; *asthenia*]. Mental fatigue.

psychataxia (*si-kat-aks'-e-ah*) [*psyche;* ἀτάξια, confusion]. Impaired power of mental concentration.

psyche (*si'-ke*) [ψυχή, mind]. The brain and myelon considered as one organ; the cerebrospinal axis.

psycheclampsia (*si-kek-lamp'-se-ah*) [*psyche; eclampsia*]. 1. Acute mania. 2. Psychlampsia.

psycheism (*si'-ke-izm*). Hypnotism.

psychentonia (*si-ken-to'-ne-ah*) [ψυχή, mind; ἐντονία, tension]. Mental strain or overwork.

psychiater (*si-ki'-at-er*) [ψυχή, mind; ἰατρός, a physician]. An alienist; one who cures mind-diseases.

psychiatric (*si-ke-at'-rik*) [*psychiatry*]. Pertaining to psychiatry.

psychiatrics (*si-ke-at'-riks*). See *psychiatry.*

psychiatrist (*si-ki'-at-rist*). A specialist in psychiatry.

psychiatry (*si-ki'-at-re*) [*psyche;* ἰατρεία, healing art] The science and treatment of the diseases of the mind.

psychic, psychical (*si'-kik, si'-kik-al*) [*psyche*]. Pertaining to the mind. **p. blindness.** See *blindness, psychic.* **p. deafness.** See *deafness, psychic.* **p. infection,** mental infection; the development of a mental condition or disease through an influence acting upon the mind.

psychics (*si'-kiks*). The science of psychology.

psychinosis (*si-kin-o'-sis*) [*psyche;* νόσος, disease]. Any disease of the mind.

psychlampsia (*si-klamp'-se-ah*) [ψυχή, mind; λάμψις, a flashing]. Mania, viewed as a discharging phenomenon of perverted cerebral activity.

psycho- (*si-ko-*) [ψυχή, mind]. A prefix denoting connection with the mind.

psychoanalysis (*si-ko-an-al'-is-is*). See *psychanalysis.*

psychoauditory, psychauditory (*si-ko-aw'-dit-o-re, si-kaw'-dit-o-re*) [*psycho-; auditory*]. Pertaining to the psychic perception of sound. **p. area,** the cortical area concerned in the conscious perception of sound.

psychobiology (*si-ko-bi-ol'-o-je*). The science which treats of the mutual relations between the body and the mind.

psychocoma (*si-ko-ko'-mah*) [*psycho-; coma*]. Mental stupor.

psychocortical (*si-ko-kor'-tik-al*) *psycho-; cortex*]. Pertaining to that part of the cerebral cortex concerned in the conscious perception of sensations.

psychodometer (*si-ko-dom'-et-er*) [*psycho-;* ὁδός, way; μέτρον, measure]. An instrument for measuring the rapidity of psychic processes.

psychodometry (*si-ko-dom'-et-re*). The measurement of the rapidity of psychic processes.

psychodynamic (*si-ko-di-nam'-ik*). Pertaining to psychodynamics.

psychodynamics (*si-ko-di-nam'-iks*) [*psycho-;* δύναμις, power]. The science of the laws of mental activity.

psychoepilepsy (*si-ko-ep'-e-lep-se*). Psycholepsy.

psychogenesis (*si-ko-jen'-es-is*) [*psycho-;* γένεσις, generation]. The development of mental characteristics.

psychogenetic (*si-ko-jen-et-ik*). 1. Pertaining to psychogenesis. 2. Of psychic or mental origin.

psychogenic (*si-ko-jen'-ik*). Psychogenetic.

psychogeny (*si-koj'-en-e*) [*psycho-*; γενής, producing]. The development of mind.

psychogeusic (*si-ko-gū'-sik*) [*psycho-*; γεῦσις, sense of taste]. Pertaining to perception of taste.

psychognosis (*si-kog-no'-sis*) [*psyche*; γνῶσις, knowledge]. Diagnosis or recognition of mental and psychic conditions.

psychognostic (*si-kog-nos'-tik*). Pertaining to psychognosis.

psychokinesia (*si-ko-kin-e'-ze-ah*) [*psycho-*; κίνησις, movement]. Explosive or impulsive maniacal action, due to defective inhibition; psychlampsia.

psycholagny (*si-ko-lag'-ne*) [*psycho-*; λάγνεια, lust]. Lust induced by mental concepts.

psycholepsy (*si'-ko-lep-se*). A condition characterized by mental or psychic impairment.

psychologic, psychological (*si-ko-loj'-ik, si-ko-loj'-e-kal*). Pertaining to psychology, or to mental processes.

psychologist (*si-kol'-o-jist*). One versed in psychology.

psychology (*si-kol'-o-je*) [*psycho-*; λόγος, science]. The science having for its object the investigation of the mind or consciousness. **p., abnormal,** the study of all irregular or unusual mental phenomena, as illusions, hallucinations, trance, hypnotism, automatism, intoxication and psychic effects of drugs, telepathy, insanity, etc. Cf. *psychopathology; psychiatry.* **p., experimental.** See *psychophysics.*

psychometry (*si-kom'-et-re*) [*psycho-*; μέτρον, a measure]. The measurement of the duration of psychic processes.

psychomotor (*si-ko-mo'-tor*) [*psycho-*; *movere*, to move]. Pertaining to voluntary movement, as the *psychomotor* area, disposed chiefly along each side of the central fissure.

psychoneurology (*si-ko-nū-rol'-o-je*). That part of neurology treating of mental action.

psychoneurosis (*si-ko-nū-ro'-sis*) [*psycho-*; *neurosis*]. Mental disease independent of organic lesion. See *psychanalysis.*

psychonomics (*si-ko-nom'-iks*). Clinical psychology oriented toward the creation of a personal character of surpassing superiority.

psychonomic personeering. Psychonomics, *q. v*

psychonomy (*si-kon'-o-me*) [*psycho-*; νόμος, law]. 1. The science of the laws of mental action. 2. Same as psychonomics, *q. v.*

psychonosema (*si-ko-no-se'-mah*) [*psycho-*; νόσημα, disease]. Any mental disease.

psychonosis (*si-kon-o'-sis*) [*psyche*; νόσος, disease]. Any disease of the mind.

psychooptic (*si-ko-op'-tik*) [*psycho-*; ὤψ, sight]. Pertaining to the psychic perception of light. **p. area,** the cortical area concerned in conscious perception of retinal impulses.

psychoparesis (*si-ko-par'-es-is*) [*psycho-*; *paresis*]. Enfeeblement of the mind.

psychopath (*si'-ko-path*) [*psycho-*; πάθος, disease]. A morally irresponsible person.

psychopathia (*si-ko-pa'-the-ah*) [*psycho-*; πάθος, disease]. Psychopathy. **p. chirurgicalis,** a mania for being operated upon. **p. sexualis,** psychopathic perversion of sexual functions.

psychopathic (*si-ko-path'-ik*). Psychopathy, *q. v.*

psychopathist (*si-kop'-ath-ist*). Psychiatrist, *q v.*

psychopathologist (*si-ko-path-ol'-o-jist*). One versed in the **pathology** of mental diseases.

psychopathology (*si-ko-path-ol'-o-je*) [*psycho-*; *pathology*]. 1. The **pathology** of mental diseases. 2. The legal aspect of insanity.

psychopathy (*si-kop'-ath-e*) [*psycho-*; πάθος, disease]. Any disease of the mind.

psychophysical (*si-ko-fiz'-ik-al*). Pertaining to psychophysics. **p. law.** See *Fechner's law.*

psychophysics (*si-ko-fiz'-iks*) [*psycho-*; *physical*]. The study of mental processes by physical methods; the study of the relation of stimuli to the sensations which they produce, especially the determination of the differences of stimulus required to produce recognizable differences of sensation; experimental psychology.

psychophysiology (*si-ko-fiz-e-ol'-o-je*). Physiological psychology; mental physiology.

psychoplasm (*si'-ko-plazm*) [*psycho-*; πλάσμα, anything formed]. In biology: "The sentient material out of which all forms of consciousness are evolved, incessantly fluctuating, incessantly renewed." See *protyl.*

psychoplegia (*si-ko-ple'-je-ah*) [*psycho-*; πλήγη, stroke]. Mental impairment of sudden onset.

psychoplegic (*si-ko-ple'-jik*) [*psycho-*; πληγή, a blow]. 1. Pertaining to psychoplegia. 2. A drug which acts by an elective affinity for the gray matter of the brain, lessening its excitability and suppressing its receptivity.

psychoreaction (*si-ko-re-ak'-shun*). Much-Holzmann reaction, *q. v.*

psychorrhagia (*si-ko-raj'-e-ah*) [*psycho-*; ῥηγνύναι, to break forth]. The death agony

psychosensorial (*si-ko-sen-so'-re-al*). Psychosensory.

psychosensory (*si-ko-sen'-so-re*) [*psycho-*; *sensory*]. Pertaining to or concerned in the conscious perception of sensory impulses.

psychosexual (*si-ko-seks'-ū-al*). Relating to combined mental and sexual diseases.

psychosin (*si-ko'-sin*) [ψυχή, mind]. A cerebrosid resembling sphingosin, occurring in brain-tissue.

psychosis (*si-ko'-sis*) [*psyche; pl., psychoses*]. A disease of the mind, especially one without demonstrable organic lesions. Any morbid mental state. **p., Korsakoff's.** See *Korsakoff.*

psychosomatic (*si-ko-so-mat'-ik*) [*psycho-*; σῶμα, body]. Relating to both soul and body.

psychotherapeutic (*si-ko-ther-ap-ū'-tik*). Pertaining to psychotherapeutics.

psychotherapeutics (*si-ko-ther-ap-ū'-tiks*) [*psycho-*; θεραπεία, treatment]. The treatment of disease by mental influence, or by suggestion.

psychotherapy (*si-ko-ther'-ap-e*). Same as *psychotherapeutics.*

psychotic (*si-kot'-ik*). 1. Pertaining to psychosis. 2. Analeptic.

psychovisual (*si-ko-vizj'-ū-al*). Relating to subjective vision or to vision unaccompanied by stimulation of the retina.

psychovital (*si-ko-vi'-tal*). Psychic and vital.

psychralgia, psychroalgia (*si-kral'-je-ah, si-kro-al'-je-ah*) [ψυχρός, cold; ἄλγος, pain]. A morbid condition characterized by a painful subjective sense of cold.

psychrapostema (*si-krap-os'-te-mah*) [ψυχρός, cold; ἀπόστημα, abscess]. Cold abscess.

psychro- (*si-kro-*) [ψυχρός, cold]. Prefix for cold.

psychroesthesia (*si-kro-es-the'-ze-ah*) [*psychro-*; αἴσθησις, sensation]. Subjective sensation of cold.

psychrolusia (*si-kro-lū'-se-ah*) [ψυχρός, cold; λούειν, to wash]. Cold bathing.

psychrometer (*si-krom'-et-er*) [*psychro-*; μέτρον, a measure]. An instrument for determining the atmospheric moisture by estimating the amount of cold required to precipitate it.

psychrophilic (*si-kro-fil'-ik*) [*psychro-*; φιλειν, to love]. Applied to microorganisms which develop best from 15° to 20° C.

psychrophobia (*si-kro-fo'-be-ah*) [*psychro-*; φόβος, fear]. 1. Morbid dread of cold. 2. Morbid sensibility to cold.

psychrophore (*si'-kro-fōr*) [*psychro-*; φέρειν, to bear]. An instrument for applying cold to deeply seated parts, as a double-current catheter for applying cold to the posterior part of the urethra.

psychrotherapy (*si-kro-ther'-ap-e*) [*psychro-*; θεραπεία, treatment]. The treatment of disease by the use of cold.

psydracia (*si-dra'-se-ah*) [ψύδραξ, a blister; a pimple]. An old term for eczema.

psyllium (*sil'-e-um*). The seeds of *plantago psyllium;* a laxative sold under different trade names.

Pt. Chemical symbol of platinum. Abbr. for pint.

ptarmic (*tar'-mik*) [πταρμός, a sneezing]. 1. Pertaining to the act of sneezing; sternutatory. 2. A substance that produces sneezing.

ptarmus (*tar'-mus*) [πταρμός, a sneezing]. Sneezing.

ptelein (*te'-le-in*). An alcoholic extract from the root-bark of *Ptelea trifoliata*, used as a tonic and in dyspepsia. Dose 1–3 gr. (0.065–0.2 Gm.).

pteleorrhine (*tel'-e-or-in*) [πτελέα, elm; ῥίς, nose]. A term applied to the anterior nares when the aperture is asymmetric.

ptenium, ptenum (*te'-ne-um, te'-num*) [πτηνός, winged]. A name given to osmium because of its volatility.

pteric (*ter'-ik*). Pertaining to the pterion.

pterion (*te'-re-on*). See under *craniometric point.*

pterna (*ter'-nah*) [πτέρνα, the heel]. The calcaneum.

pternalgia (*ter-nal'-je-ah*) [πτέρνα, the heel; ἀλγός, pain]. Pain in the heel.

ptero- (*ter'-o-*) [πτερόν, wing]. A prefix to denote resemblance to a wing, or wing-shaped.

pterygial (*ter-ij'-e-al*) [dim. of πτέρυξ, wing]. Pertaining to a pterygium.

pterygium (*ter-ij'-e-um*) [dim. of πτέρυξ, wing]. A triangular patch of mucous membrane growing on the conjunctiva, usually on the nasal side of the eye The apex of the patch points toward the pupil, the fan-shaped base toward the canthus.

pterygo- (*ter'-ig-o*) [πτέρυξ, a wing]. A prefix denoting connection with or relating to the pterygoid process.

pterygoid (*ter'-ig-oid*) [πτέρυξ, wing; εἶδος, like]. 1. Wing-shaped, as the *pterygoid* plate of the sphenoid bone. 2. Pertaining to the pterygoid canal, pterygoid plate, pterygoid plexus, etc. **p. fossa,** the notch separating the external and internal plates of the pterygoid process of the sphenoid. See *muscles, table of.*

pterygoma (*ter-ig-o'-mah*) [*pterygo-*; ὄμα, tumor]. 1. A chronic swelling of the labia minora which interferes with coitus. 2. The lobe of the ear.

pterygomandibular (*ter-ig-o-man-dib'-ū-lar*). Pertaining to the pterygoid process and the mandible.

pterygomaxillary (*ter-ig-o-maks'-il-a-re*) [*pterygoid; maxillary*]. Pertaining to the pterygoid process and the maxilla. **p. fissure,** an elongated fissure formed by the divergence of the superior maxillary bone from the pterygoid process of the sphenoid bone. **p. ligament,** See *ligament, pterygomaxillary.*

pterygopalatine (*ter-ig-o-pal'-at-in*) [*pterygoid; palatine*]. Situated between the pterygoid plate of the sphenoid bone and the palate bone, as the *pterygopalatine* canal.

pterygopharyngeus (*ter-ig-o-far-in'-je-us*) [*pterygo-; pharynx*]. 1. Synonym of *palatopharyngeus.* 2. The part of the superior constrictor of the pharynx which arises from the internal pterygoid plate.

pterygospinous (*ter-ig-o-spi'-nus*) [*pterygo-; spinosus,* spinous]. Pertaining to a pterygoid process and to the spine of the sphenoid.

pterygotemporal (*ter-ig-o-tem'-po-ral*) [*pterygo-; tempus,* temple]. Pertaining to the pterygoid process and the temporal bone.

ptiloma (*ti-lo'-mah*) [πτίλον, down]. The part of the eyelid deprived of its cilia by ptilosis.

ptilosis (*ti-lo'-sis*) [πτίλον, feather]. Loss of the hair, especially loss of the eyelashes.

ptisan (*tiz'-an*) [πτισάνη, peeled barley]. 1. Barley-water. 2. A decoction of barley used as a medicinal drink. Syn., *tisane.*

P. T. O. Abbreviation of German Perlsucht-tuberculin original; a tuberculin prepared from bovine tubercle bacilli.

ptoma (*to'-mah*) [πτῶμα]. Cadaver.

ptomaine (*to'-ma-ēn,* or *to'-mān*) [πτῶμα, corpse]. A basic compound resembling the alkaloids, formed by the action of bacteria on animal and vegetable tissues; a putrefactive or animal alkaloid. Some ptomaines are highly poisonous.

ptomainemia, ptomainæmia (*to-ma-in-e'-me-ah*) [*ptomaine;* αἷμα, blood]. The presence of ptomaines in the blood.

ptomainotoxism (*to-ma-in-o-toks'-izm*). Poisoning by ptomaines.

ptomatine (*to'-mat-ēn*). Synonym of *ptomaine.*

ptomatinuria (*to-mat-in-ū'-re-ah*) [*ptomaine;* οὖρον, urine] The presence of ptomaines in the urine.

ptomatopsia (*to-mat-op'-se-ah*) [*ptoma;* ὄψις, view]. The examination of the cadaver; necropsy.

ptomatropine (*to-mat'-ro-pēn*). A ptomaine found in decomposing meat, in the organs of persons dead of typhoid fever, etc. It resembles atrophine in its physiological and chemical properties.

ptomatropism (*to-mat'-ro-pizm*). See *zootrophotoxism tropeinicus.*

ptosis (*to'-sis*) [πίπτειν, to fall]. Drooping of the upper eyelid, due to paralysis or atrophy of the levator palpebræ superioris. The term is also applied to abnormal depression of other organs; prolapse **p., abdominal,** enteroptosis; Glénard's disease. **p. iridis,** prolapse of the iris. **p. sympathetica,** ptosis in connection with paresis of the cervical sympathetic nerve and associated with miosis and vasomotor paralysis of the side of the face affected.

ptotic (*tot'-ik*). Affected with or pertaining to ptosis.

P. T. R. Abbreviation of German Perlsucht-tuberculin rest; a tub rculin prepared from bovine tubercle bacilli.

ptyalagogue (*ti-al'-a-gog*) [πτύαλον, spittle; ἀγώγος, leading]. A medicine producing an increased flow of saliva. A sialagogue.

ptyalin (*ti'-al-in*) [πτύαλον, saliva]. A diastatic ferment found in saliva, having the property of converting starch into dextrin and sugar. The starch first becomes converted into achroodextrin and erythrodextrin; these by hydration into maltose, and the latter, by further hydration, into dextrose.

ptyalinogen (*ti-al-in'-o-jen*) [*ptyalin;* γεννᾶν, to produce]. The hypothetical antecedent of ptyalin

ptyalism, p., mercurial (*ti'-al-izm*) [πτύαλον, saliva]. Salivation.

ptyalith (*ti'-al-ith*) [πτύαλον, saliva; λίθος, stone]. A salivary calculus.

ptyalize (*ti'-al-īz*) [πτύαλον, saliva]. To produce ptyalim.

ptyalocele (*ti'-al-o-sēl*) [πτύαλον, saliva; κήλη, tumor]. A cyst due to obstruction of the duct of a salivary gland. **p., sublingual,** ranula.

ptyalogogue (*ti-al'-o-gog*) [πτύαλον, spittle; ἀγωγός, leading]. A medicine causing a flow of saliva.

ptyalolith (*ti'-al-o-lith*) [πτύαλον, saliva; λίθος, stone]. A salivary calculus.

ptyalolithiasis (*ti-al-o-lith-i'-as-is*). The formation or presence of a salivary calculus.

ptyalorrhea (*ti-al-or-e'-ah*) [πτύαλον, saliva; ῥοιά, flow]. Excessive flow of saliva.

ptyalose (*ti'-al-ōs*) [πτύαλον, saliva]. A sugar found in saliva; it is identical with maltose.

ptyocrine (*ti'-o-krĭn*) [πτύω, spit; κρίνειν, separate]. Apocrine. Indirect secretion of a cell. Opposite of *exocrine; diacrinous.*

ptysis (*ti'-sis*) [πτύσις]. The act of spitting.

ptysma (*tiz'-mah*) [πτύσμα]. Saliva.

ptysmagogue (*tiz'-mag-og*) [πτύσμα, spittle; ἀγωγός, leading]. A drug that promotes the secretion of saliva; a ptyalagogue, or sialagogue.

puben (*pū'-ben*) [*pubes*]. Belonging to the pubes in itself.

puber (*pū'-bur*) [L., an adult]. One who has arrived at the age of puberty.

puberal (*pū'-ber-al*) [*puber*, adult]. Relating to puberty.

pubertas (*pū-ber'-tas*) [L.]. Puberty. **p. plena,** complete puberty. **p. præcox,** puberty at a very early age.

puberty (*pu'-ber-te*) [*pubertas*, from *puber*, adult]. 1. The period at which the generative organs become capable of exercising the function of reproduction, signalized in the boy by a change of voice and discharge of semen, in the girl by the appearance of the menses.

pubes (*pū'-bēz*) [L.]. 1. The pubic hair. 2. The hairy region covering the os pubis. 3. The os pubis or pubic bone; that portion of the innominate bone forming the front of the pelvis.

pubescence (*pū-bes'-ens*) [*pubescentia*]. 1. Hairiness; the presence of fine soft hairs. 2. Puberty, or the coming on of puberty.

pubescent (*pū-bes'-ent*) [*pubes*]. 1. Downy, or hairy. 2. Approaching or arriving at the age of puberty. **p. uterus,** an abnormality of the uterus in which the characters of that organ peculiar to the epoch preceding puberty persist in the adult.

pubetrotomy (*pū-be-trot'-o-me*) [*pubes;* ἦτρον, pelvis; τομή, a cutting]. Pelvic section through the pubes.

pubic (*pū'-bik*) [*pubes*]. Pertaining to the pubes. **p. bone,** the os pubis

pubiotomy (*pū-be-ot'-o-me*) [*pubes;* τομή, a cutting]. The operation of dividing the pubic bone to facilitate delivery in cases of pelvic malformation. See also *symphyseotomy.*

pubis (*pū'-bis*) [*gen.* of *pubes*]. 1. Os pubis; the pubic bone. 2. One of the pubic hairs.

pubo- (*pū'-bo-*) [pubes]. A prefix denoting relation to the pubes.

pubocapsular (*pū-bo-kap'-sū-lar*). Pertaining to the os pubis and the capsule of the hip-joint.

pubococcygeal (*pū-bo-kok-sij'-e-al*). Pertaining, or having relation to the os pubis and the cocyx.

pubofemoral (*pū-bo-fem'-or-al*) [*pubo-; femur*]. Pertaining to the os pubis and the femur.

puboprostatic (*pū-bo-pros-tat'-ik*) [*pubo-; prostate*]. Pertaining to the os pubis and the prostate gland.

pubotibial (*pū-bo-tib'-e-al*) [*pubo-; tibia*]. Pertaining to the os pubis and the tibia.

pubovesical (*pū-bo-ves'-ik-al*) [*pubo-; vesica*, bladder]. Pertaining to the os pubis and bladder.

puccin (*puk'-sin*). A substance from *Sanguinaria canadensis.* Its exact nature is unknown.

pudenda (*pu-den'-dah*). Plural of *pudendum, q. v.*

pudendagra (*pū-den-da'-grah*) [*pudenda;* ἄγρα, a seizure]. 1. Pain in the genital organs. 2. Primary syphilis, especially of the female genital organs. **p. pruriens,** pruritus vulvæ.

pudendal (*pū-den'-dal*) [*pudenda*]. Pertaining to the pudenda.

pudendum (*pū-den'-dum*) [*pudere*, to be ashamed]. The external genital organs especially of the woman, generally used in the plural, *pudenda.* **p. muliebre,** the vulva.

pudic (*pū'-dik*) [*pudenda*]. Pertaining to the pudenda, as the *pudic* artery.

puericulture (*pū-er-e-kul'-tūr*) [*puer*, a child; *cultura*, culture]. That branch of hygiene which deals with the rearing of children and the care of women during pregnancy that they may bring forth healthy offspring.

puerile (*pū'-er-il*) [*puer*, a child]. Pertaining to childhood. Childish. **p. respiration,** exaggerated breath-sounds with expiration prolonged and high-pitched, as in healthy children.

puerilism (*pū-er-il-izm*) [*puer*, a child]. Childishness.

pueritia (*pū-er-ish'-e-ah*) [*pueritia*, childhood]. The age of second childhood.

puerpera (*pū-er'-pe-rah*) [*puer*, child; *parere*, to bear]. A woman who is in labor or has recently been delivered.

puerperal (*pū-er'-pe-ral*) [*puerpera*]. Pertaining to, caused by, or following childbirth, as *puerperal* convulsions, *puerperal* eclampsia. **p. fever,** an acute, febrile disease of women in childbed, due to septic infection. **p. insanity,** insanity occurring during the puerperium, usually within five or ten days after delivery. It may take the form of mania (*puerperal mania*), melancholia (*puerperal melancholia*), or dementia (*puerperal dementia*).

puerperalism (*pū-er'-per-al-izm*). A comprehensive term for all the pathological conditions incident to the puerperal state. **p., infantile,** any pathologic condition incident to the newborn. **p., infectious,** puerperal disease due to infection.

puerperant (*pū-er'-per-ant*). See *puerpera.*

puerperium (*pū-er-pe'-re-um*) [*puerpera*]. 1. The state of a woman in labor or of one who has just been delivered. 2. The period from delivery to the time when the uterus has regained its normal size which is about six weeks.

puerperous (*pū-er'-per-us*). Same as *puerperal.*

puffball. See *Lycoperdon.*

puffiness (*puf'-in-es*). Swelling or intumescence of the tissues; an edematous condition.

pugil, pugillus (*pū'-jil, pū-jil'-us*) [L.]. A handful.

puking (*pū'-king*) [origin obscure]. Vomiting. **p. fever.** Synonym of *milk-sickness.*

Pulex (*pū'-leks*) [L., flea: *pl., pulices*]. A genus of insects partly parasitic on the skin of man and animals. **P. cheopis,** the rat flea, supposed to convey the plague infection from rats to man. **P. fasciatus,** the rat flea. **P. irritans,**

a species common in Europe and parasitic on the skin of man; its bite causes severe itching and localized swelling. **P. penetrans,** the chigoe, or jigger-flea, a species the female of which burrows under the skin of the feet to deposit its ova, producing a severe irritation that may proceed to serious inflammations.

pulicaris (*pū-lik-a'-ris*) [*pulex*]. Marked with little spots like flea-bites. **p. morbus,** a name for typhus, applied because of the petechiæ which occur in that disease.

pulicatio (*pū-lik a'-she-o*) [*pulex*, flea]. The state of being infested with fleas.

pulicicide, pulicide (*pū-lis'-is-īd, pū'-lis-īd*) [*pulex*, a flea; *cædere*, to kill]. An agent capable of killing fleas.

pulled elbow (*puld el'-bo*). A condition in which the head of the radius has been dislodged from the orbicular ligament.

pulling (*pul'-ing*). One of the Swedish movements that may be either active or passive.

pullulate (*pul'-ū-lāt*) [*pullulare*, to put forth]. To germinate, to bud.

pullulation (*pul-ū-la'-shun*) [*pullulare*, to put forth; to bud; to sprout]. The act of sprouting or budding, a mode of reproduction seen, *e. g.*, in the yeast-plant.

pulmo (*pul'-mo*) [L.: *pl.*, *pulmones*]. Lung.

pulmoaortic (*pul-mo-a-or'-tik*) [*pulmo; aorta*]. 1. Pertaining to the lungs and the aorta. 2. Pertaining to the pulmonary artery and the aorta.

pulmometer (*pul-mom'-et-er*). An instrument for measuring the lung capacity; a *spirometer*.

pulmometry (*pul-mom'-et-re*) [*pulmo; μέτρον*, measure]. The determination of the volume of the lungs; spirometry.

pulmonary (*pul'-mon-a-re*) [*pulmo*, a lung]. Pertaining to or affecting the lungs, as *pulmonary* arteries, *pulmonary* emphysema.

pulmonectomy (*pul-mon-ek'-to-me*). See *pneumonectomy*.

pulmonic (*pul-mon'-ik*) [*pulmonary*]. 1. Pertaining to the lungs; pulmonary. 2. Pertaining to the pulmonary artery, as *pulmonic* valves. 3. Produced at the pulmonic valve, as *pulmonic* murmur. **p. circulation,** the passage of the blood from the right ventricle to the lungs and back to the left auricle. **p. fever,** croupous pneumonia.

pulmonin (*pul'-mon-in*). An organotherapeutic preparation made from calves' lungs, and used in pulmonary affections

pulmonitis (*pul-mon-i'-tis*). Synonym of *pneumonia*.

pulmotone (*pul'-mo-tōn*). Trade name of a preparation containing creosote carbonate, ichthyol, dilute hydrocyanic acid, and malt extract.

pulmotor (*pul-mo'-tor*) [*pulmo*, lung; *motor*]. An apparatus for resuscitating persons who have been asphyxiated; it expels the gas from the lungs, introduces oxygen, and automatically establishes artificial respiration.

pulp [*pulp*]. 1. The soft, fleshy part of fruit. 2. The soft part in the interior of an organ, as the *pulp* of the spleen, the *pulp* of a tooth. 3. Chyme. **p.-cavity,** the hollow space in a tooth containing the dental pulp. **p.-cells,** cells found in the pulp-tissue of any organ. **p., dental,** a soft tissue filling the pulp-cavity of a tooth. It consists of loose connective tissue and cells, vessels, and nerves. Also the rudiment of a tooth. **p., digital,** the sensitive, elastic, convex prominence on the palmar or plantar surface of the terminal phalanx of a finger or toe. **p. of the finger.** See *p., digital.* **p., hair.** Synonym of *papilla, hair.* **p. of the intervertebral discs,** the soft substance in the center of the intervertebral discs, the remains of the chorda dorsalis. **p., spleen, p., splenic,** the substance filling the spaces formed by the trabeculæ of the spleen. See *spleen.* **p. of a tooth.** See *p., dental.*

pulpa (*pul'-pah*). Pulp. **p. dentis,** dental pulp, see *pulp*.

pulpal (*pul'-pal*). Pulpar.

pulpar (*pul'-par*). Pertaining to pulp.

pulpation (*pulp-a'-shun*). See *pulpefaction*.

pulpifaction (*pul-pe-fak'-shun*) [*pulp; facere*, to make]. Conversion into a pulpy substance.

pulpiform (*pul'-pe-form*) [*pulpa*, pulp; *forma*, form]. Pulpy.

pulpify (*pul'-pe-fi*). To reduce to a pulpy condition.

pulpitis (*pul-pi'-tis*) [*pulp; ιτις*, inflammation]. Inflammation of the dental pulp.

pulpy (*pul'-pe*) [*pulp*]. Resembling pulp; characterized by the formation of a substance resembling pulp.

pulque (*pul'-ka*) [Sp.]. A fermented beverage prepared in Mexico from the juice of various species of *Agave*. **p. brandy.** See *mezcal.* **p. plant.** See *Agave*.

pulsate (*pul'-sāt*) [*pulsare*, to beat]. To beat or throb.

pulsatile (*pul'-sat-il*) [*pulsare*, to strike]. Pulsating; throbbing.

pulsatilla (*pul-sat-il'-ah*) [L.]. The herb of *Anemone pulsatilla* and of *Anemone pratensis*, of the order *Ranunculaceæ*, containing a crystalline principle, *anemonin*, $C_{15}H_{12}O_3$. Pulsatilla is employed in amenorrhea, dysmenorrhea, and in inflammation of mucous membranes. Anemonin is used in bronchitis and asthma. Dose ¼ gr. (0.022 Gm.). Dose of pulsatilla in powder 2–3 gr. (0.13–0.2 Gm.).

pulsating (*pul'-sa-ting*) [see *pulsation*]. Exhibiting pulsation. **p. aorta,** the pulsation of the abdominal aorta seen in nervous and anemic persons. **p. empyema,** an accumulation of pus in the pleural cavity that transmits the pulsations of the heart.

pulsation (*pul-sa'-shun*) [*pulsatio*, from *pulsare*, to strike]. A beating or throbbing. **p., suprasternal,** pulsation at the suprasternal notch. It may be due to aneurysm, a dilated aortic arch, or the presence of an anomalous artery.

pulse, pulsus (*puls, puls'-us*) [*pulsus*, the pulse]. 1. The intermittent change in the shape of an artery due to an increase in the tension of its walls following the contraction of the heart. The pulse is usually counted at the wrist (*radial pulse*), but may be taken over any artery that is palpable, as the temporal, brachial, femoral, dorsalis pedis, etc. 2. [πόλτος, a thick pap made of meal.] Leguminous plants or their seeds, as beans, peas, etc. **p., alternating, pulsus alternans,** a variety in which a large pulsation alternates with a small one. **p., anacrotic,** one the sphygmographic tracing of which is characterized by notches in the ascending limb. **p., anatricrotic,** one with three breaks in the ascending limb. **p., angry.** Synonym of *p., wiry.* **p., ardent,** one with a quick, full wave which seems to strike the finger at a single point. **p., bigeminal, pulsus bigeminus,** one in which the beats occur in pairs, so that the longer pause follows every two beats. **pul-**

sus bisferiens, a pulse in which the systote has a double beat, the second being the more pronounced. **p.-breath,** a peculiar audible pulsation of the breath corresponding to the heartbeats; observed in cases of dry cavities of the lungs, with thick walls not separated from the heart by permeable lung tissue. **p., capillary,** an intermittent filling and emptying of the capillaries of the skin. It is common in aortic regurgitation, and is seen under the fingernail or on the forehead. **p., caprizant,** *goat-leap pulse, q. v.* **p., catacrotic,** one with an elevation in the line of descent in the sphygmographic tracing. **pulsus celer,** a quick, short pulse. **pulsus celer et altus,** a quick, full pulse, seen especially in aortic regurgitation. **p., contracted,** a small pulse with high tension. **p.-clock,** a sphygmograph. **p., cordy,** a tense pulse. **p., Corrigan's.** See *Corrigan's pulse.* **p.-curve,** the tracing of the pulse, called a sphygmogram, made by the sphygmograph. **pulsus debilis,** a weak pulse. **p., decurtate,** a progressively decreasing pulse. **p., depressed,** a pulse both deep and weak. **p., dicrotic,** one in which the dicrotic wave or recoil wave is exaggerated. It is observed when the arterial tension is low, and gives to the finger the impression of two beats. **pulsus duplex,** a dicrotic pulse. **pulsus durus,** a hard, incompressible pulse. **p., entoptic,** the subjective illumination of a dark visual field with each heart-beat, a condition sometimes noted after violent exercise, and due to the mechanical irritation of the rods by the pulsating retinal arteries. **p., febrile,** that characteristic of fever: full, soft, and frequent, and exhibiting a well-marked dicrotism. **p., formicant,** a small, feeble pulse likened to the movements of ants. **p., frequent, pulsus frequens,** one recurring at short intervals and differing from a quick pulse, in which the pulse-wave has a quick rise. **p., full,** one in which the artery is filled with a large volume of blood and conveys a feeling of being distended. **p., funic,** the arterial tide in the umbilical cord. **p., gaseous,** a full, compressible pulse. **p., goat-leap,** a pulse marked by a weak pulsation succeeding a strong one. **p., guttural,** one felt in the throat. **p., hard,** one characterized by high tension and rigidity, **p., high-tension,** one due to increase of the peripheral resistance, together with a corresponding increase in the force of the ventricular systole. It is gradual in its impulse, long in duration, slow in subsiding, with difficulty compressible, and the artery between the beats feels like a firm round cord. **p., hyperdicrotic, p., hyperdicrotous,** a pulse of which the aortic notch falls below the base line, indicating very low tension, a symptom of great exhaustion. **p., infrequent,** one the rhythm of which is slower than normal; *i. e.,* in which the heartbeats are fewer in a given time than normal. **p., intermittent,** one in which one or more beats are dropped. **p., intricate,** an irregular, small, infrequent pulse. **p., irregular,** one in which the beats occur at irregular intervals, or in which the force, or both rhythm and force, varies. **p., jarring.** See *p., vibrating.* **p., jerky,** a pulse in which the artery is suddenly and markedly distended, as in aortic regurgitation. **p., jugular,** pulsation of the jugular veins in the neck. It is due to tricuspid regurgitation. **p., locomotive.** Synonym of *Corrigan's pulse.* **p., low-tension,** one sudden in its onset, short, and quickly declining. It is easily obliterated by pressure. **p., monocrotic,** one in which dicrotism is entirely absent. **p., paradoxic, pulsus paradoxus,** one that is weaker during inspiration, a condition sometimes observed in adherent pericardium. **p., polycrotic,** one with more than two rhythms for each heart beat. **p.-pressure,** the difference between the systolic and diastolic pressure. **pulsus quadrigeminus, p. trigeminus,** a pulse in which a pause occurs after every fourth or third beat respectively. **p., quick,** one that strikes the finger rapidly, but also leaves it rapidly. **p.-rate,** the number of pulsations of an artery in a minute. **p., retrosternal,** a venous pulse believed to be due to the pulsation of the left innominate vein, perceived on depressing the integument of the suprasternal notch. **p., running,** a very weak, frequent pulse with low tension in the arteries, one pulse-wave running into the next with no apparent interval; it is observed after hemorrhage. **p., senile,** one characteristic of old age. The secondary waves on the descending line of the sphygmogram are prominent and the first descending wave relatively large. **p., shabby,** an ill-defined pulse due to weak heart and relaxed arteries. **p., shuttle,** one in which the wave passes under the finger as if floating something solid with a fluid. **p., slow,** one indicating a lengthened systolic contraction of the heart and prolonged diastole—often used to signify a pulse of slow rate. **p., soft,** a pulse that is readily compressed. **p., supradicrotic,** a dicrotic pulse in which the dicrotic wave resembles the cardiac beat. **pulsus tardus,** a slow pulse. **p., thready,** one that is scarcely perceptible, feeling like a thread under the finger. **p. tricrotic,** a pulse in which the three waves normally present are abnormally distinct. **p., venous,** a pulse observed in a vein. **p., vermicular,** a pulse imitating the movement of a worm. **p., vibrating, pulsus vibrans,** a tense pulse with a wave arising quickly, giving the impression under the finger of the vibrations of a piece of tense catgut. **p., water-hammer.** See *Corrigan's pulse.* **p. wave,** the condition of expansion that begins with each cardiac systole and is propagated along the aorta and the arteries ending normally at the capillaries. **p., wiry,** a small rapid, tense pulse, feeling like a cord, under the finger. It is observed in acute peritonitis.

pulseless (*puls'-les*). Devoid of pulse or pulsation.

pulsellum (*pul-sel'-um*) [*pulsellum,* dim. of *pulsus,* a beating: *pl., pulsella*]. A propulsive filament; a modified form of flagellum.

pulsimeter (*pul-sim'-et-er*) [*pulse; μέτρον,* a measure]. An instrument for determining the rate or force of the pulse.

pulsometer (*pul-som'-et-er*). Same as *pulsimeter.*

pulsus (*pul'-sus*). A pulse. *q. v.*

pultaceous (*pul-ta'-shus*) [*pulp*]. Having the consistence of pulp; mushy; soft.

pulv. Abbreviation of Latin *pulvis,* powder.

pulver (*pul'-ver*). See *pulvis.*

pulveres (*pul'-ver-ēz*). Plural of *pulvis.*

pulverflator (*pul'-ver-fla'-tor*) [*pulvis,* powder; *flare,* to blow]. An instrument designed for blowing or spraying impalpable powders.

pulverization (*pul-ver-i-za'-shun*) [*pulvis,* powder]. The act of reducing a substance to powder.

pulverize (*pul'-ver-īz*) [*pulvis,* powder]. To reduce to a powder.

pulverulence (*pul-ver'-oo-lens*). The condition of being reduced to powder.

pulverulent (*pul-ver'-oo-lent*). Resembling or of the nature of a powder.

pulvillus (*pul-vil'-us*) [L., "a little cushion"]. An olive-shaped pad of lint used in plugging deep wounds.

pulvinar (*pul-vi'-nar*) [L., "couch"]. 1. The posterior tubercle of the thalamus opticus. 2. The fatty mass that occupies a part of the acetabulum. 3. A surgical pad. 4. A medicated cushion.

pulvinate (*pul'-vin-āt*) [*pulvinus*, a cushion]. 1. With a convex surface said of bacterial cultures. 2. Same as *pulvinar*.

pulvis [L.; pl., *pulveres*]. A powder. **p. acetanilidi compositus** (U. S. P.), a mixture of acetanilid, caffeine, and sodium bicarbonate. **p. aromaticus** (U. S. P.), a mixture of cinnamon, ginger, nutmeg, and cardamom seeds; used as a carminative. Dose 10–30 gr. (0.65–2.0 Gm.). **p. cretæ compositus** (U. S. P.), consists of prepared chalk, powdered acacia, and sugar, and is used as a mild astringent. Dose 10 gr.–1 dr. (0.65–4.0 Gm.). **p. effervescens compositus** (U. S. P.), Seidlitz powder, a preparation consisting of two powders: the white paper contains 35 gr. of tartaric acid, the blue paper, 40 gr. of sodium bicarbonate and 2 dr. of Rochelle salt. **p. glycyrrhizæ compositus** (U. S. P.), consists of senna, licorice, oil of fennel, washed sulphur, sugar; it is used as a laxative. Dose ½–2 dr. (2–8 Gm.). **p. ipecacuanhæ et opii** (U. S. P.). See *opium, powder of ipecac and*. **p. jalapæ compositus** (U. S. P.), consists of jalap, 35 parts; potassium bitartrate, 65 parts; it is used as a hydragogue cathartic. Dose ½–1 dr. (2–4 Gm.). **p. morphinæ compositus** (U. S. P.), consists of morphine sulphate, camphor, glycyrrhiza, precipitated calcium carbonate, and alcohol. Dose 7½ gr. (0.5 Gm.). **p. rhei compositus** (U. S. P.), consists of rhubarb, magnesia, and ginger; it is used as a mild laxative. Dose ½–1 dr. (2–4 Gm.).

pulvule (*pul'-vūl*) [*pulvis*, powder]. Trade name of a capsule containing a powdered drug.

pumex (*pū'-meks*) [*spumex*, foam]. See *pumice*.

pumice (*pum'-is*) [*pumex*]. Pumice-stone, used as a detergent for the skin and an ingredient in some dentifrices.

pumiline (*pū'-mil-ēn*). The oil from the young branches of *Pinus pumilio*.

pump. An apparatus either drawing up a liquid into its hollow chamber, or, after sucking up the liquid, forcibly ejecting it from one end. **p., air-**, one used to exhaust the air from a chamber or to force more air into a chamber already filled with air. **p., Alvegniat's.** See under *Alvegniat*. **p., breast-**, a pump for removing milk from the breast. **p., dental**, one for removing saliva during dental operations. **p., stomach-**, one for removing the contents of the stomach in cases of poisoning.

pumpkin-seed. The seed of *Cucurbita pepo* of the order *Cucurbitaceæ*. The seed *pepo* (U. S. P.) is used against tape-worm. Dose 4 oz. (130 Cc.).

puncta (*punk'-tah*) [pl. of *punctum*, a point]. See *punctum*. **p. dolorosa**, tender or painful points at the exit or in the course of nerves the seat of neuralgia; also called Valeix's points. **p. lacrimalia**, the orifices of the lacrimal canaliculi in the eyelids near the inner canthus. **p. vasculosa**, minute red spots studding the cut surface of the white central mass of the brain. They are produced by the blood escaping from divided blood-vessels.

punctate, punctated (*punk'-tat, punk'-ta-ted*) [*punctum*, point]. Dotted; full of minute punctures.

puncticulum (*punk-tik'-u-lum*) [dim. of *punctum*, a point; pl., *puncticula*]. A small point; petechia.

punctiform (*punk'-tif-orm*) [*punctum*, point; *forma*, form]. 1. Having the nature or qualities of a point; seeming to be located at a point; as a *punctiform* sensation. 2. Denoting very minute colonies, in bacteriology.

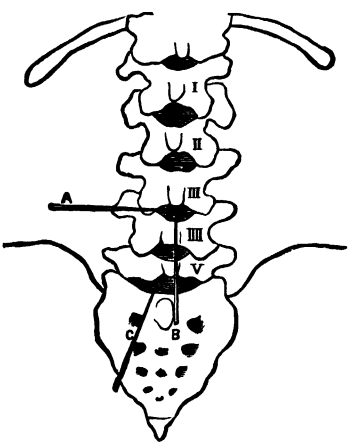
punctio (*punk'-she-o*). The act of making a puncture, or of dotting.

punctum (*punk'-tum*) [L.]. A point. **p. cæcum.** See *blind spot*, **p. lacrimale.** See *puncta lacrimalia*. **p. proximum.** See *near-point*. **p. remotum.** See *far-point*. **p. saliens**, the first trace of the embryonic heart.

punctura (*punk-tū'-rah*) [L.]. Puncture.

puncturatio (*punk-tū-ra'-she-o*). The act of puncturing.

puncture (*punk'-chur*) [*pungere*, to prick]. 1. A hole made by a pointed instrument. **p., diabetic**, puncture of the fourth ventricle, which produces glycosuria. **p., exploratory**, the puncture of a cyst or cavity for removal of a portion of its contents for examination. **p., lumbar**, puncture of the spinal canal for the withdrawal of cerebrospinal fluid for examination or for the relief of abnormal tension. **p., spinal.** See *p., lumbar*.



LUMBAR PUNCTURE.
A Quincke's site; B, Marin's site; C, Chipault's site.

punctured (*punk'-tūrd*) [*puncture*]. Produced by a prick, as a *punctured* wound.

pungent (*pun'-jent*) [*pungere*, to prick]. Acrid; penetrating; producing a painful sensation.

Punica (*pū'-nik-ah*) [*punicum*, the pomegranate]. A genus of polypelatous plants. **P. granatum.** See *pomegranate*.

puniceous (*pū-nish'-us*) [*puniceus*, red]. Bright-carmin color.

punicin (*pū'-nis-in*) [*puniceus*, reddish]. 1. A crystalline coloring-matter obtained from the colorless juices of certain kinds of shell-fish (*Purpura lapellus, P. patula*); on exposure to the sunlight it becomes of a purple color.

punicine (*pū'-nis-ēn*). Synonym of *pelletierine*.

punktograph (*punk'-to-graf*) [*punctum*, point; γράφειν, to record]. A radiographic instrument for the surgical localization of foreign bodies, as bullets embedded in the tissues.

punudos (*poo-noo'-dos*). A disease resembling leprosy, but without the leprosy bacillus, found in Guatemala; pseudoleprosy.

P. U. O. Abbreviation for Pyrexia of unknown origin; a form of trench fever.

pupa (*pū'-pah*) [*pupa*, a girl, doll, puppet: *pl.*, *pupæ*]. In biology, the second stage of development from the egg, of such insects as undergo complete metamorphosis.

pupal (*pū'-pal*) [*pupa*, a doll]. Pertaining to a pupa.

pupil (*pū'-pil*) [*pupilla*, a little girl; the name is believed to be derived from the small images seen in the pupil]. The aperture in the iris of the eye for the passage of light. **p., Argyll Robertson.** See *Argyll Robertson pupil*. **p., artificial,** an aperture made by iridectomy when the normal pupil is occluded. **p., cat's-eye,** an elongated slit-like pupil. **p., multiple,** the presence of bands dividing the pupil into several portions due to persistence of portions of the fetal pupillary membrane. **p., pinhole,** extreme miosis.

pupilla (*pū-pil'-ah*) [L.]. The pupil of the eye.

pupillary (*pū'-pil-a-re*) [*pupil*]. Pertaining to the pupil. **p. membrane.** See *membrane, pupillary*. **p. membrane, persistent.** See under *membrane, pupillary*. **p. reflex.** See under *reflex*.

pupillometer (*pū-pil-om'-et-er*) [*pupil*]. An instrument for measuring the pupil of the eye.

pupilloscopy (*pū-pil-os'-ko-pe*) [*pupil*; σκοπεῖν, to inspect]. 1. Examination of the pupil. 2. Retinoscopy.

pupillostatometer (*pū-pil-o-stat-om'-e-ter*) [*pupilla*, pupil; στάτος, placed; μέτρον, a measure]. An instrument for measuring the exact distance between the centers of the two pupils.

pural (*pū-ral*). Trade name of a disinfecting agent consisting of powdered wood charcoal, saturated with a mixture of menthol, carbolic and benzoic acids, and compressed into cylinders, which are ignited for disinfection.

Purdy's method (*pur'-de*) [Charles Wesley *Purdy*, American physician, 1846–1901]. Determination of salts and albumin in the urine by centrifuging the urine. **P.'s solution,** a modification of Fehling's solution for the quantitative estimation of glucose. Solution I: pure crystallized copper sulphate, 4.158 Gm.; distilled water, q. s. and 500 Cc. Solution II: Rochelle salt, 20.4 Gm.; pure potassium hydroxide, 20.4 Gm.; ammonium hydroxide (sp. gr. 0.88), 300 Cc.; distilled water, q. s. ad 500 Cc. Mix 5 Cc. of each solution and this mixture will indicate 0.005 Gm. of glucose.

purgament, purgamentum (*per'-gam-ent, per-gam-en'-tum*) [*purgare*, to purge: *pl.*, *purgamenta*]. 1. A purge. 2. In the plural, the lochia; also, excrement.

purgatin, purgatol (*pur-ga-tin,-ol*). See *anthrapurpurin diacetate*.

purgation (*pur-ga'-shun*) [*purge*]. 1. The evacuation of the bowels by means of purgatives. 2. Cleansing.

purgative (*pur'-ga-tiv*) [*purge*]. 1. Producing purgation. 2. A purge, *q. v.*

purge (*purj*) [*purgare*, to purge]. 1. To cause free evacuation of the bowel. 2. A drug that causes free evacuation of the bowel.

purgen (*pur'-jen*). See *phenolphthalein*.

purgerine (*pur-jer-en*). A proprietary syrup of senna; laxative.

purging nut. Curcas, the seed of *Jatropha purgans* or *J. curcas*, having cathartic properties. Syn., *Barbados nut*.

purgolax (*pur-go-lax*). Trade name of fruit pastilles containing phenolphthalein.

purified (*pū'-rif-id*) [*purus*, pure; *facere*, to make]. Cleansed; freed from extraneous matter.

puriform (*pū-re-form*) [*pus*; *forma*, form]. Resembling pus.

purin, purine (*pū'-rin*). A synthesized substance ($C_5H_4N_4$) from which may be derived a series of compounds known as xanthin bases, and uric acid. **p.-bases, p.-bodies,** those derived from purin by simple substitution of the various hydrogen atoms by hydroxyl, amide, or alkyl groups; *e. g.*, adenin, hypoxanthin, guanin, xanthin, and the methylxanthins, theobromine, caffeine, etc., together with uric acid. **p.s., endogenous,** those originating from nuclein cleavage during metabolic processes. **p.s., exogenous,** those derived from the purin-bodies of food-stuffs.

purinemia, purinæmia (*pū-rin-e'-me-ah*) [*purin*; αἷμα, blood]. The presence of purin bodies in the blood.

purinemic (*pū-rin-e'-mik*). Pertaining to, or suffering from, purinemia.

purinometer (*pū-rin-om'-et-er*) [*purin*; μέτρον, a measure]. An apparatus consisting of a graduated separator with a uniform bore for the clinical estimation of urinary purins.

Purkinje's cells (*poor-kin'-ye*) [Johannes Evangelista *Purkinje*, Bohemian anatomist and physiologist, 1787–1869]. Large ganglion-cells of the cerebellar cortex, disposed as a single row at the junction of the nuclear and the molecular layer, and presenting pyriform or flask-shaped bodies, 60–76 μ in their longest diameter. **P.'s corpuscles,** the lacunæ of bone. **P.'s fibers,** anastomosing muscular fibers found in the subendocardial tissue of some animals. They are made up of polyhedral nucleated cells, the margins of which consist of fine transversely striated fibers. **P.'s figures,** the dark lines which are seen on a yellow back-ground when a candle is held a short distance from the eye in a darkened room. They are produced by the retinal vessels. **P.'s granular layer.** See *Czermak's interglobular spaces*. **P.'s images,** three pairs of images of one object seen in an observed pupil: the first, erect, reflected from the anterior surface of the cornea; the second, erect, reflected from the anterior surface of the lens; the third, inverted, reflected from the posterior capsule of the lens. **P.'s network,** the network of beaded fibers (*Purkinje's fibers*) visible to the naked eye in the subendocardial tissue of the ventricles. **P.'s** vesicle, the germinal vesicle.

Purkinje-Sanson's images (*poor-kin'-ye san'-sun*) See *Purkinje's images*.

Purmann's method (*pur'-man*) [Matthæus Gottfried *Purmann*, German surgeon, 1648–1721]. For the treatment of aneurysm. by extirpating the aneurysmal sac.

puro (*pū'-ro*). A meat-juice, made by expression of the meat. It contains 21 % of unchanged albumin.

puroform (*pū'-ro-form*). A proprietary antiseptic and disinfectant said to be a combination of zinc and formaldehyde, thymol, menthol, and eucalyptol.

purohepatitis (*pū-ro-hep-at-i'-tis*) [*pus; ἧπαρ*, liver; *ιτις*, inflammation]. Purulent hepatitis.

puromucous (*pū-ro-mū'-kus*) [*pus; mucus*]. Purulent and mucous.

puronal (*pū'-ron-al*). A proprietary antiseptic compound said to contain acetanilid, 97.22%, and bismuth subiodide, 2.35%.

purple, visual. See *rhodopsin*.

purples (*pur'-plz*) [*purpureus*, purple]. 1. A popular name for purpura; also, 2. for petechial spots. 3. Swine fever.

purposive (*pur'-po-siv*). Functional; not vestigial, and not rudimentary; regarded as fulfilling an end or purpose in the economy. **p. acts**, those acts performed with the consent of the will.

purpura (*pur'-pūr-ah*) [L.]. A disease characterized by hemorrhages into the skin, taking the form of petechiæ, macules, or large patches. It may occur as an independent affection, or be symptomatic of other diseases. **p. annularis telangiectodes**, an eruption of purpuric spots, grouped in a ring-form, and accompanied by telangiectasis. **p. fulminans**, a grave form of purpura developing in young children as a sequel to acute infectious diseases. It is of short duration, is marked by extensive extravasations, grave constitutional symptoms, and usually ends fatally. **p. hæmorrhagica**, a systemic disease with marked constitutional symptoms, followed by an eruption of hemorrhagic petechiæ upon the legs, and extending in successive crops over the whole body-surface, coalescing to form extensive irregular ecchymotic patches or even raised bloody tumors. Hemorrhages may take place from the mucous surfaces or into the serous cavities. Syn., *land-scurvy; morbus maculosus Werlhofii; Werlhof's disease*. **p. rheumatica**, a form with fever and rheumatic pains. **p. simplex**, the mildest degree of purpura. **p. urticans.** See *urticaria hæmorrhagica*.

purpuraceous (*pur-pū-ra -se-us*) [*purpura*, purple]. Of a purple color.

purpuric (*pur-pū'-rik*) [*purpura*] Pertaining to or resembling purpura.

purpuriferous (*pur-pū-rif'-ur-us*) [*purpura*, purple; *ferre*, to bear]. Producing a purple pigment.

purpurigenous (*pur-pū-rij'-en-us*). Purpuriferous.

purpurin (*pur'-pū-rin*) [*purpura*], $C_{14}H_8O_5$. 1. A dye present with alizarin in madder-root, but also prepared artificially. 2. Uroerythrin, a red coloring-matter sometimes present in urinary deposits.

purpurinuria (*pur-pū-rin-ū'-re-ah*). The excretion of purpurin in the urine; porphyruria.

purr (*pur*). A low murmur.

purring thrill. A fine trembling vibration like the purring of a cat perceived by palpation over the precordium. It may be due to aneurysm or to valvular heart esion, especially mitral stenosis.

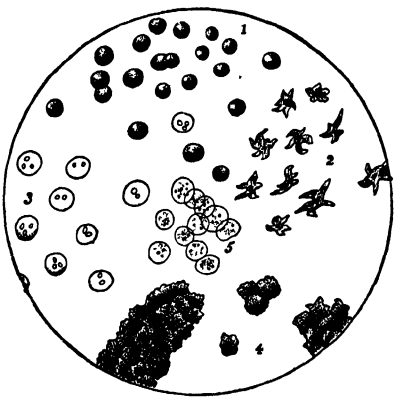
pursianin (*pur'-si-an-in*). A glucoside found in cascara sagrada.

purulence, purulency (*pūr'-ū-lens, pūr'-ū-len-se*) [*pus*]. The state of being purulent; suppuration.

purulent (*pūr'-ū-lent*) [*pus*]. Having the character of or containing pus; characterized by the formation of pus. **p. catarrh**, an inflammation of a mucous membrane accompanied by the production of pus. **p. edema**, a general infiltration of pus together with much fluid.

puruloid (*pūr'-ū-loid*) [*pus; εἶδος*, like]. Resembling pus; puriform.

pus [L.]. A liquid substance consisting of cells and an albuminous fluid (liquor puris), formed in certain kinds of inflammation. See *Donné's test*. **p., blue**, pus colored blue by *Bacillus pyocyaneus*. **p.-corpuscles**, the corpuscles found in pus. **p., curdy**, pus containing cheesy-looking flakes. **p., ichorous**, pus that is thin and acrid. **p., laudable**, a whitish, inodorous pus, formerly thought to be essential to the healing of wounds. **p., orange**, pus colored by the presence of hematoidin crystals. **p., sanious**, pus mixed with blood. **p.-tube.** See *pyosalpinx*.



PUS CORPUSCLES. (After *Ultzmann*.)

1, Normal; 2, showing ameboid movements; 3, nuclei rendered distinct by acetic acid, 4, as observed in chronic pyelitis; 5, swollen by ammonium carbonate.

pustula maligna (*pus-tū'-lah ma-lig'-nah*). Anthrax.

pustulant (*pus'-tū-lant*) [*pustule*]. 1. Causing the formation of pustules. 2. An irritant substance giving rise to the formation of pustules.

pustular (*pus'-tū-lar*) [*pustule*]. Characterized by the presence of pustules.

pustulation (*pus-tū-la'-shun*) [*pustule*] The formation of pustules.

pustule (*pus'-tūl*) [*pustula*, a pustule]. A small circumscribed elevation of the skin containing pus. **p., malignant**, anthrax.

pustuliform (*pus'-tū-lif-orm*) [*pustula, forma*, form]. Resembling a pustule.

pustulocrustaceous (*pus-tū-lo-krus-ta'-shus*) [*pustule; crusta*, crust]. Characterized by the formation of pustules and crusts.

pustuloderma (*pus-tū-lo-der'-mah*) [*pustule; δέρμα*, the skin]. Any skin disease characterized by the formation of pustules.

pustulose, pustulous (*pus'-tū-lōs, pus'-tū-los*) [*pustula*, pustule]. Characterized by pustules.

pusula (*pus'-ū-lah*) [L.]. 1. Pustule. 2. Erysipelas.

putamen (*pū-ta'-men*) [L., "a husk"]. The outer darker part of the lenticular nucleus of the brain.

Putnam-Dana's symptom-complex [James Jackson *Putnam*, American neurologist, 1846– ; Charles Loomis *Dana*, American neurologist, 1852–]. Combined sclerosis of the lateral and posterior columns of the spinal cord.

Putnam's sign (*put'-nam*) [James Jackson *Putnam*, American neurologist, 1846–]. Absolute increase of measurements from the anterior superior iliac spine to the internal malleolus; it is observed in hysterical hip disease.

putrefaction (*pū-tre-fak'-shun*) [*putrid; facere*, to make]. The decomposition of nitrogenous organic matter under the influence of microorganisms, accompanied by the development of disagreeable odors, due to the evolution of ammonia, hydrogen sulphide, and other gases, and the production of aromatic bodies. In addition, many other compounds are formed, among which ptomaines are the most important. The end-products are water, nitrogen, methane, and carbon dioxide.

putrefactive (*pū-tre-fak'-tiv*) [see *putrefaction*]. Pertaining to or causing putrefaction. **p. alkaloid**, a ptomaine.

putrefy (*pū'-tre-fi*). To render putrid.

putrescence (*pū-tres'-ens*) [*putrescere*, to become rotten]. The state or process of putrefaction.

putrescent (*pū-tres'-ent*) [see *putrescence*]. Undergoing putrefaction.

putrescentia (*pū-tres-en'-she-ah*). See *putrescence*. **p. uteri**, the severest form of puerperal endometritis, with sanious ulceration of the wall of the uterus extending to the peritoneum.

putrescibility (*pū-tres-e-bil'-it-e*) [*putrescere*, to grow rotton]. Capacity for undergoing putrefaction.

putrescine (*pū-tres'-in*) [see *putrescence*], $C_4H_{12}N_2$. Tetramethylenediamine. A poisonous ptomaine, a clear, rather thin liquid, of a disagreeable odor, boiling at 156°–157° C.

putrid (*pū'-trid*) [*putridus*, rotten]. Rotten; characterized by putrefaction. **p. fever**, Typhus, *q.v.*

putrify (*pū'-tre-fi*) [*putrefacere*, to putrefy]. To render putrid.

putrilage (*pū'-tril-āj*) [*putrid*]. Putrescent material.

putrilaginous (*pū-tril-aj'-in-us*) [*putrid*]. Gangrenous.

putromaine (*pū-tro-ma'-in*). A ptomaine developed in putrefactive processes.

Puzos' method (*pū-zo*) [Nicolas *Puzos*, French obstetrician, 1686–1753]. Early rupture of the membranes in case of placenta prævia.

pyæmia (*pi-e'-me-ah*). See *pyemia*.

pyapostasis (*pi-ap-os'-tas-is*) [πύον, pus; ἀπόστασις, a standing off]. Metastasis of pus.

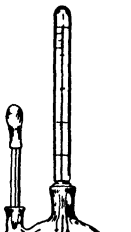
pyarthrosis (*pi-ar-thro'-sis*) [πῦον, pus; ἄρθρον, a joint]. Suppuration of a joint.

pycnic (*pik'-nik*). See pycnotic.

pycnocardia (*pik-no-kar'-de-ah*) [πυκνός, frequent; καρδία, heart]. See *tachycardia*.

pycnoepilepsy (*pik-no-ep'-il-ep-se*) [πυκνός, frequent; *epilepsy*]. Frequent epileptic attacks of slight severity.

pycnometer (*pik-nom'-et-er*) [πυκνός, thick; μέτρον, measure]. 1. An instrument for the determination of the specific gravity of fluids. 2. An instrument for the measurement of the thickness of objects.



PYCNOMETER

pycnomorphous, pyknomorphous (*pik-no-morf'-us*) [πυκνός, thick; μορφή, form]. Applied to nerve-cells in which the stained parts of the cell-body are compactly arranged.

pycnophrasia (*pik-no-fra'-se-ah*) [πυκνός, thick; φράσις, speech]. Thickness of speech.

pycnosis (*pik-no'-sis*) [πυκνός, thick]. 1. Thickening; inspissation. 2. A degenerative change in cells whereby the protoplasm is condensed and the cells shrink in volume.

pycnosphygmia (*pik-no-sfig'-me-ah*). See *tachycardia*.

pycnotic (*pik-not'-ik*). Pertaining to or characterized by pycnosis.

pyecchysis (*pi-ek'-is-is*) [πύον, pus; ἔκχυσις, effusion]. Effusion of pus.

pyedema, pyœdema (*pi-e-de'-mah*) [πῦον, pus; *edema*]. Edema due to purulent infiltration.

pyelectasia (*pi-el-ek-ta'-se-ah*) [*pyelo-*; ἔκτασις, stretching]. Dilatation of the renal pelvis.

pyelitic (*pi-el-it'-ik*). Relating to or affected with pyelitis.

pyelitis (*pi-el-i'-tis*) [πύελος, a trough; ῖτις, inflammation]. Inflammation of the pelvis of the kidney. **p., calculous**, that due to calculi.

pyelo- (*pi-e-lo*) [πύελος, a trough]. A prefix denoting relation to the kidney or to the pelvis of the kidney.

pyelocystitis (*pi-el-o-sis-ti'-tis*) [*pyelo-; cystitis*]. Pyelitis with cystitis.

pyelocystostomosis (*pi-e-lo-sist-o-sto-mo'-sis*) [*pyelo-; κύστις*, a bladder; στόμα, a mouth]. The establishment of direct communication between the kidney and the bladder.

pyelogram (*pi'-el-o-gram*). A skiagram of the renal pelvis and ureter.

pyelography (*pi-el-og'-ra-fe*). Skiagraphy of a renal pelvis and ureter which have been filled with a silver salt solution.

pyelolithotomy (*pi-el-o-lith-ot'-o-me*) [*pyelo-; lithotomy*]. Removal of a renal calculus through an incision into the pelvis of the kidney.

pyelometer (*pi-el-om'-et-er*). Same as *pelvimeter*.

pyelonephritic (*pi-el-o-nef-rit'-ik*). Pertaining to pyelonephritis.

pyelonephritis (*pi-el-o-nef-ri'-tis*) [*pyelo-; nephritis*]. Inflammation of the kidney and its pelvis.

pyelonephrosis (*pi-el-o-nef-ro'-sis*). 1. Synonym of *pyelonephritis*. 2. Any disease of the pelvis of the kidney.

pyeloplication (*pi-el-o-pli-ka'-shun*) [*pyelo-; plica*]. Operative infolding of a dilated renal pelvis.

pyeloscopy (*pi-el-os'-ko-pe*). Fluoroscopic examination of the pelvis of the kidney.

pyelotomy (*pi-el-ot'-o-me*) [*pyelo-; τομή*, a cutting]. Incision of the renal pelvis.

pyelovenous back flow (*pi-el-o-ve'-nus*) [*pyelo-; venous*]. The phenomenon of drainage from the renal pelvis into the venous system, due to back pressure.

pyemesis (*pi-em'-is-is*) [πῦον, pus; ἔμεσις, vomiting]. Vomiting of pus.

pyemia, pyæmia (*pi-e'-me-ah*) [πῦον, pus; αἷμα, blood]. A disease due to the presence of pyogenic microorganisms in the blood and the formation, wherever these organisms lodge, of embolic or metastatic abscesses. **p., arterial**, a name given to pyemia produced by disorganization of a cardiac thrombus and the dissemination of emboli through the arterial circulation. **p., cryptogenic**, a condition in which the primary suppuration occurs in the deeper tissues of the body. **p. otogenous**, pyemia originating in the ear.

pyemic (*pi-em'-ik* or *pi-e'-mik*) [*pyemia*]. Pertaining to or affected with pyemia.

pyemide (*pi'-em-īd*) [πῦον, pus; pl., *pyemides*]. A cutaneous manifestation the result of metastases in pyemia.

pyencephalus (*pi-en-sef'-al-us*). Suppuration within the cranium.

pyenin (*pi'-en-in*). Paranuclein.

pyesis (*pi'-e-sis*). Synonym of *suppuration*.

pygal (*pi'-gal*) [πυγή, buttock]. Pertaining to the buttocks.

pygalgia (*pi-gal'-je-ah*) [πυγή, rump; ἄλγος, pain]. Pain in the buttocks.

pygalopubic (*pi-gal-o-pū'-bik*) [πυγή, buttock; *pubes*]. Relating to the buttocks and the pubes.

pygmalionism (*pig-ma'-le-on-izm*) [*Pygmalion*, king of Cyprus, who fell in love with an ivory image of a maiden]. Falling in love with a statue, a form of erotomania.

pygodidymus (*pi-go-did'-im-us*) [πυγή, buttock; δίδυμος, twin]. A double monster united by the buttocks.

pygomelus (*pi-gom'-el-us*) [πυγή, buttock; μέλος, a member]. A monster with a parasite attached to the hypogastric region or to the buttock.

pygopagus (*pi-gop'-ag-us*) [πυγή, buttock; πάγος, joined]. A monster with conjoined buttocks or backs.

pyic (*pi'-ik*). Synonym of *purulent*.

pyin (*pi'-in*) [πῦον, pus]. An albuminous substance of complex constitution occurring in pus. It may be separated by adding sodium chloride and filtering.

pykno-. For words beginning thus, see *pycno-*.

pyknolepsy (*pik'-no-lep-se*). Pycnoepilepsy.

pyla (*pi'-lah*) [πύλη, gate]. Opening between the third ventricle and Sylvian aqueduct.

pylar (*pi'-lar*). Relating to the pyla.

pyle (*pi'-le*) [πύλη, a gate]. The portal vein.

pylema (*pi-le'-mah*) [*pyle*; αἷμα, blood]. The blood of the portal vein.

pylemphraxis (*pi-lem-fraks'-is*) [πύλη, gate; ἔμφραξις, obstruction]. Obstruction of the portal circulation.

pylephlebectasis, pylephlebectasia (*pi-le-fleb-ek'-tas-is, pi-le-fleb-ek-ta'-ze-ah*). [πῦλη, gate; φλέψ, vein]. Dilatation of the portal vein, which is usually caused by some obstruction in the liver, or it may be due to relaxation of the vessel-walls from some disturbance of innervation.

pylephlebitis (*pi-le-fleb-i'-tis*) [*pyle*; *phlebitis*]. Inflammation of the portal vein. The condition is usually secondary to disease of the intestine, is generally suppurative in character, and gives rise to the symptoms of pyemia

pylethrombophlebitis (*pi-le-throm-bo-fleb-i'-tis*) [*pyle*; *thrombosis*; *phlebitis*]. Inflammation and thrombosis of the portal vein.

pylethrombosis (*pi-le-throm-bo'-sis*) [*pyle*; *thrombosis*]. Thrombosis of the portal vein.

pylic (*pi'-lik*) [*pyle*]. Pertaining to the portal vein.

pylon (*pi'-lon*). An artificial leg, usually in the form of a wooden stump.

pyloralgia (*pi'-lor-al'-je-ah*) [*pylorus*; ἄλγος, pain] Pain in the region of the pylorus.

pylorectomy (*pi-lor-ek'-to-me*) [*pylorus*; ἐκτομή, excision]. Excision of the pylorus.

pyloric (*pi-lor'-ik*) [*pylorus*]. Pertaining to the pylorus. **p. glands**, glands situated in the region of the pylorus and secreting the gastric juice. **p. orifice**. See *pylorus* (1). **p. valve**. See *pylorus* (2).

pyloristenosis (*pi-lor-is-ten-o'-sis*) [*pyloro-*; στενός, narrow]. Contraction of the pylorus.

pyloritis (*pi-lor-i'-tis*) [*pyloro-*; ιτις, inflammation]. Inflammation of the pylorus.

pyloro- (*pi-lo-ro-*) [*pylorus*]. A prefix meaning relating to the pylorus.

pylorochesis (*pi-lor-o-ke'-sis*) [*pyloro-*; ὀχησις, a holding]. Obstruction of the pylorus.

pylorocolic (*pi-lor-o-kol'-ik*). Pertaining to or connecting the pyloric end of the stomach with the transverse colon.

pylorodilator (*pi-lor-o-di-la'-tor*). An appliance for dilating the pyloric orifice of the stomach.

pylorodiosis (*pi-lor-o-di-o'-sis*) [*pyloro-*; διωσις, a pushing through]. Loreta's operation: digital divulsion of the pyloric orifice following gastrotomy.

pylorogastrectomy (*pi-lor-o-gas-trek'-to-me*) [*pyloro-*; *gastrectomy*]. Resection of the pyloric end of the stomach.

pyloroplasty (*pi-lor'-o-plas-te*) [*pyloro-* πλάσσειν, to form]. Plastic operation upon the pylorus

pyloroptosis, pyloroptosia (*pi-lor-op-to'-sis, pi-lor-op-to'-se-ah*) [*pyloro-*; πτῶσις, falling]. Downward displacement of the pylorus.

pyloroscopy (*pi-lor-os'-ko-pe*) [*pyloro-*; σκοπεῖν, to view]. Inspection of the pylorus.

pyloroscirrhus (*pi-lor-o-skir'-us*) [*pyloro-*; σκίρρος, induration]. Scirrhus of the pylorus.

pylorospasm (*pi-lor'-o-spazm*). Spasm of the pylorus.

pylorostenosis (*pi-lor-o-ste-no'-sis*) [*pyloro-*; *stenosis*]. Stenosis, or stricture, of the pylorus.

pylorostomy (*pi-lor-os'-to-me*) [*pyloro-*; στόμα, mouth]. Making an opening through the abdominal wall into the pylorus.

pylorus (*pi-lo'-rus*) [πυλωρός, a gate-keeper]. 1. The circular opening of the stomach into the duodenum. 2. The fold of mucous membrane and muscular tissue surrounding the aperture between the stomach and the duodenum. **p., antrum of**, the portion of the stomach between the pyloric orifice and the sphincter antri pylorici or transverse band.

pyo- (*pi-o-*) [πῦον, pus]. A prefix denoting pertaining to pus.

pyoblenna (*pi-o-blen'-ah*) [*pyo-*; βλέννα, mucus]. Muco-pus.

pyoblennorrhea (*pi-o-blen-or-e'-ah*) [*pyo-*; βλέννα, mucus; ῥοία, a flow]. A muco-purulent discharge.

pyocele (*pi'-o-sēl*) [*pyo-*; κήλη, hernia]. Hernia with pus in its sac.

pyocelia, pyocœlia (*pi-o-se'-le-ah*) [*pyo-*; κοιλία, a hollow]. Pus in the abdominal cavity.

pyocenosis (*pi-o-sen-o'-sis*) [*pyo-*; κένωσις, emptying]. The evacuation of a pus-cavity.

pyocephalus (*pi-o-sef'-al-us*) [*pyo-*; κέφαλη, head]. Pus inside the cranium. **p., circumscribed**, abscess of the brain.

pyochezia (*pi-o-ke'-ze-ah*) [*pyo-*; χέζειν, to defecate]. Discharge of pus from the intestines.

pyococcus (*pi-o-kok'-us*). Any pus-producing coccus.

pyocolpocele (*pi-o-kol'-po-sēl*). A suppurating tumor of the vagina.

pyocolpos (*pi-o-kol'-pos*) [*pyo-*; κόλπος, vagina]. An accumulation of pus within the vagina.

pyoctanin (*pi-ok'-tan-in*). See *pyoktanin*.

pyocyanase (*pi-o-si'-an-ās*) [*pyo-*; κύανος, blue]. The specific bacteriolytic enzyme of *Bacillus pyocyaneus*. It is said to digest the bacilli of typhoid, diphtheria, anthrax and cholera, and also fibrin.

pyocyanic (*pi-o-si-an'-ik*). Pertaining to blue pus, or to pyocyanin.

pyocyanin (*pi-o-si'-an-in*) [see *pyocyanase*], $C_{14}H_{14}NO_2$. A colored substance derived from blue pus and from cultures of *Bacillus pyocyaneus*.

pyocyanogenic (*pi-o-si-an-o-jen'-ik*). Producing pyocyanin.

pyocyanolysin (*pi-o-si-an-ol'-is-in*) [*pyo-*; κύανος, blue; λύειν, to loosen]. A hemolysin produced in broth cultures by *Bacillus pyocyaneus*.

pyocyst (*pī'-o-sist*) [*pyo-; cyst*]. A cyst containing pus.

pyocyte (*pī'-o-sīt*) [*pyo-; κύτος*, a cell]. A pus cell.

pyodermatitis (*pī-o-der-mat-ī'-tis*). A skin-affection produced by inoculation with pyogenic material.

pyodermatosis (*pī-o-der-mat-o'-sis*). Pyodermia.

pyodermia (*pī-o-der'-me-ah*) [*pyo-; δέρμα*, skin]. Any cutaneous lesion due to pus-producing microorganisms.

pyodermitis (*pī-o-der-mī'-tis*) [*pyo-; δέρμα*, skin; *ιτις*, inflammation]. An inflammatory skin-affection attended by pus-formation.

pyogenes (*pī-oj'-en-ēz*). Synonym of *pyogenic*.

pyogenesis (*pī-o-jen'-es-is*) [*pyo-; γεννᾶν*, to produce]. The formation of pus.

pyogenic, pyogenetic (*pī-o-jen'-ik, pī-o-jen-et'-ik*) [*pyogenesis*]. Producing pus. **p. membrane.** See *membrane, pyogenic*. **p. microorganisms,** the microorganisms producing pus. The ordinary pyogenic microorganisms are staphylococci and streptococci. Under certain circumstances pus may be produced by the pneumococcus of Fraenkel, *Bacillus coli communis*, the bacillus of typhoid, the gonococcus and others.

pyogenin (*pī-oj'-en-in*). $C_{63}H_{128}N_2O_{18}$. A substance obtained from the cell-body of pus-cells.

pyogenous (*pī-oj'-en-us*). Pyogenic.

pyohemia, pyohæmia (*pī-o-he'-me-ah*). See *pyemia*.

pyohemothorax, piohæmothorax (*pī-o-hem-o-tho'-raks*). Pus and blood in the pleural cavity.

pyoid (*pī'-oid*) [*pyo-; εἶδος*, like]. Resembling pus.

pyoktanin (*pī-ok'-tan-in*) [*pyo-; κτείνειν*, to kill]. A name given to methyl-violet and methylene-blue on account of their germicidal properties. Pyoktanin has been used in diphtheria, cystitis, gonorrhea, ulcers, and inflammations of the conjunctiva, and as an injection in carcinoma. **p., blue,** $C_{24}H_{28}N_3Cl$, antiseptic, disinfectant, and analgesic. Dose 1–5 gr. (0.065–0.32 Gm.). Dusting-powder, 1:1000–1:100; aqueous solution, 1–4:10,000. **p.-mercury,** a compound of pyoktanin and mercury. Applied in 1:200 solution or with equal parts of starch. **p., yellow,** $C_{17}H_{24}N_3ClO$, antiseptic and disinfectant, but weaker than blue pyoktanin. Dose 1–8 gr. (0.065–0.52 Gm.); aqueous solution. 1–4· 10,000; dusting-powder, 1 to 2%; ointment, 2 to 10%.

pyolabyrinthitis (*pī-o-lab-ir-inth-ī'-tis*). Suppurative inflammation of the labyrinth of the ear.

pyolymph (*pī'-o-limf*) [*pyo-; lymph*]. Lymph containing pus-corpuscles.

pyometra (*pī-o-me'-trah*) [*pyo-; μήτρα*, womb]. A collection of pus in the uterus.

pyonephritis (*pī-o-nef-rī'-tis*) [*pyo-; nephritis*] Suppurative inflammation of the kidney.

pyonephrolithiasis (*pī-o-nef-ro-lith-ī'-as-is*) [*pyo-; νέφρος*, kidney; *λίθος*, stone]. The presence of pus and calculi in the kidney.

pyonephrosis (*pī-o-nef-ro'-sis*) [*pyo-; νεφρός*, kidney]. An accumulation of pus in the pelvis of the kidney.

pyonephrotic (*pī-o-nef-rot'-ik*). Pertaining to pyonephrosis.

pyonin (*pī'-on-in*). Trade name of a preparation said to be made of sulphur, sugar and an alkali; intended for skin affections.

pyo-ovarium (*pī-o-o-va'-re-um*) [*pyo-; ovarium*, ovary]. Ovarian abscess.

pyopericarditis (*pī-o-per-e-kar-di'-tis*). Suppurative pericarditis.

pyopericardium (*pī-o-per-e-kar'-de-um*). The presence of pus in the pericardium.

pyoperitoneum (*pī-o-per-it-on-e-um*). The presence of pus in the peritoneal cavity.

pyoperitonitis (*pī-o-per-it-on-ī'-tis*). Synonym of *peritonitis, purulent*.

pyophagia (*pī-o-fa'-je-ah*) [*pyo-; φαγεῖν*, to eat]. The swallowing of pus.

pyophthalmia (*pī-of-thal'-me-ah*) [*pyo-; ὀφθαλμός*, eye]. Purulent ophthalmia.

pyophylactic (*pī-o-fil-ak'-tik*) [*pyo-; φυλάσσειν*, to guard]. Protecting against pus. **p. membrane,** the lining membrane of an abscess cavity.

pyophysometra (*pī-o-fi-so-me'-trah*) [*pyo-; φύσα*, wind; *μήτρα*, womb]. The presence of pus and gas in the uterus.

pyoplania (*pī-o-pla'-ne-ah*) [*pyo-; πλανάειν*, to wander]. Infiltration of tissues with pus.

pyopneumocyst (*pī-o-nū'-mo-sist*) [*pyo-; πνεῦμα*, air; *cyst*]. A cyst containing pus and gas.

pyopneumopericarditis (*pī-o-nū-mo-per-e-kar-di'-tis*) [*pyo-; πνεῦμα*, air; *pericarditis*]. Pericarditis complicated by the presence of pus and gas in the pericardium.

pyopneumopericardium (*pī-o-nū-mo-per-ik-ar'-de-um*) [*pyo-; πνεῦμα*, air; *pericardium*]. Pus and air or gas in the pericardium.

pyopneumoperitoneum (*pī-o-nū-mo-per-it-on-e'-um*). Pus and air in the peritoneal cavity.

pyopneumoperitonitis (*pī-o-nū-mo-per-it-on-ī'-tis*) [*pyo-; πνεῦμα*, air; *peritonitis*]. Peritonitis complicated by the presence of pus and air in the peritoneal cavity.

pyopneumothorax (*pī-o-nū-mo-tho'-raks*). An accumulation of air or gas and pus in the pleural cavity. **p., subphrenic,** a collection of air and pus beneath the diaphragm. See *Pfuhl's sign*.

pyopoiesis (*pī-o-poi-e'-sis*). Syn. of *suppuration*.

pyopoietic (*pī-o-poi-et'-ik*) [*pyo-; ποιεῖν*, to make]. Secreting pus; suppurative.

pyoptysis (*pī-op'-tis-is*) [*pyo-; πτύειν*, to spit]. The expectoration of pus.

pyorrhagia (*pī-or-a'-je-ah*) [*pyo-; ῥηγνύναι*, to burst forth]. A profuse discharge of pus.

pyorrhea, pyorrhœa (*pī-or-e'-ah*) [*pyo-; ῥοία*, a flow]. A purulent discharge. **p., alveolaris.** Progressive necrosis of the dental alveoli; Riggs' disease, Fauchard's disease.

pyosalpingitis (*pī-o-sal-pin-ji-tis*) [*pyo-; σάλπιγξ*, tube; *ιτις*, inflammation]. Purulent inflammation of the Fallopian or Eustachian tube.

pyosalpingo-oophoritis (*pī-o-sal-ping-go-o-of-or-ī'-tis*) [*pyo-; σάλπιγξ*, a tube; *oophoritis*]. Combined suppurative inflammation of the ovary and oviduct.

pyosalpinx (*pī-o-sal'-pinks*) [*pyo-; σάλπιγξ*, tube]. An accumulation of pus in the oviduct.

pyosapremia, pyosapræmia (*pī-o-sap-re'-me-ah*) [*pyo-; sapremia*]. Same as pyemia.

pyoscheocele (*pī-os'-ke-o-sēl*) [*pyo-; ὄσχεον*, scrotum; *κήλη*, tumor]. A suppurative swelling of the scrotum.

pyoscope (*pī'-o-skōp*) [*πύος*, colostrum; *σκοπεῖν*, to examine]. An instrument for determining the richness of milk by its color.

pyosepticemia, pyosepticæmia (*pī-o-sep-tis-e'-me-ah*) [*pyo-; septicemia*]. The association of pyemia and septicemia.

pyosin (*pī'-o-sin*). $C_{57}H_{110}N_2O_{18}$. A substance obtained from the body plasma of pus-cells. Cf. *pyogenin*.

pyosis (*pī-o'-sis*) [*πῦον*, pus]. 1. Suppuration. 2. Suppuration of the eye. **p., Manson's.** See *Manson's pyosis*.

pyostatic (*pi-o-stat'-ik*) [*pyo-*; στατικός, causing to stand]. 1. Preventing the formation of pus. 2. An agent arresting the secretion of pus.

pyotherapy (*pi-o-ther'-a-pe*). The use of pus in the treatment of disease.

pyothorax (*pi-o-tho'-raks*). An accumulation of pus in the pleural cavity; empyema. **p., subphrenic,** an abscess beneath the diaphragm.

pyotorrhea, pyotorrhœa (*pi-o-tor-e'-ah*) [*pyo-*; οὖς, ear; ῥοία, aflow]. Purulent otorrhea.

pyoturia (*pi-o-tū'-re-ah*). See *pyuria.*

pyoureter (*pi-o-ū-re'-ter*). An accumulation of pus in a ureter.

pyoxanthin, pyoxanthose (*pi-o-zan'-thin, pi-o-zan'-thōs*) [πῦον, pus; ξανθός, yellow]. A yellow substance sometimes found in pus, and resulting from the oxidation of pyocyanin.

pyra (*pi'-rah*). Synonym of *anthrax.*

pyracetosalyl (*pi-ras-e-to-sal'-il*). A preparation of antipyrine and aspirin: used as an antipyretic and antineuralgic; dose 8 grains (0.5 Gm.).

pyracine (*pi'-ras-ēn*). Antipyrine.

pyraloxin (*pi-ral-oks'-in*). An oxidation-product of pyrogallol, used in skin-diseases.

pyramid (*pe'-ram-id*) [πυραμίς]. Any conical eminence of an organ; especially a body of longitudinal nerve-fibers on each side of the anterior median fissure of the oblongata. **p., anterior,** one of the two pyramidal bundles of white matter on each side of the anterior median fissure of the medulla. **p. of the cerebellum,** a conical projection forming the central portion of the inferior vermiform process. **p.s of Ferrein.** See *Ferrein's pyramids.* **p., lateral.** Same as *restiform body.* **p., Malpighian,** one of the conical masses composing the medullary substance of the kidney. **p., posterior,** one of the two narrow bundles of white matter placed on each side of the posterior median fissure of the medulla oblongata. They are continuous with the posterior median columns of the spinal cord. **p., renal.** See *p., Malpighian,* and *Ferrein's pyramids.* **p., temporal,** the petrosa. **p., thyroid.** See *Lalouette's pyramid.* **p. of the tympanum,** a hollow conical process on the inner wall of the tympanum; the stapedius muscle passes through an aperture at its apex.

pyramidal (*pe-ram'-id-al*) [*pyramid*]. Shaped like a pyramid. **p. bone,** the carpal cuneiform. **p. tract.** See *tract pyramidal.*

pyramidale (*pir-am-id-a'-le*) [pyramid]. The cuneiform bone of the carpus; the os pyramidale.

pyramidalis (*pe-ram-id-a'-lis*). Pyramidal, as *pyramidalis* muscle. See under *muscle.*

pyramidon (*pe-ram'-id-on*). Dimethylamidophenyldimethylpyrazolon, a yellowish-white powder, recommended as an antipyretic. Dose 5–8 gr. (0 32–0.51 Gm.) every 2 hours.

pyraminal (*pir-am'-in-al*). Trade name of a combination of pyramidon and luminal; used as an analgesic and hypnotic.

pyramis (*pir'-am-is*). 1. Synonym of *pyramid.* 2. The modiolus. 3. The pyramid of the thyroid. 4. The petrosa. 5. The anterior pyramid of the oblongata. 6. The penis. **p. cerebelli.** See *pyramid of the cerebellum.* **p. cochleæ,** the modiolus. **p. laminosa.** See *pyramid of the cerebellum.* **p. ossis temporis, p. trigona,** the petrosa. **p. vermis,** pyramid of the cerebellum. **p. vestibuli.** See *crista vestibuli.*

pyran (*pi'-ran*). Pyranum.

pyrantin (*pi-ran'-tin*). See *phenosuccin.* **p., soluble,** sodium salt of paraethoxylphenylsuccinamic acid. A antipyretic. Dose 15–45 gr. daily.

pyranum (*pir'-an-um*). The sodium salt of a combination of benzoic acid, thymol, and salicylic acid; used as an antirheumatic and analgesic. Dose 7–30 gr. (0.45–2.0 Gm.) 2 or 3 times daily.

pyrazine (*pi-ras'-ine*). Antipyrine. **p. hexahydride.** Piperazine.

pyrazol (*pi'-raz-ōl*) [πῦρ, fire; *azotum,* nitrogen]. $C_3H_4N_2$, a derivative of pyrrol. It is used as a diuretic. Dose 15–30 gr. (1–2 Gm.).

pyrazoline (*pi-ras'-ol-ēn*). Antipyrine.

pyrazolone (*pi-ras'-ol-ōn*). Antipyrine.

pyrectic (*pi-rek'-tik*). Pyretic, feverish.

pyrene (*pi'-rēn*) [πῦρ, fire]. Trade name of carbon tetrachloride when sold as a fire-extinguisher.

pyrenemia, pyrenæmia (*pi-ren-e'-me-ah*) [πυρήν, a fruit-stone; αἷμα, blood]. The existence of nucleated red cells in the blood.

pyrenin (*pi'-ren-in*). A substance found in the nucleolus of a cell.

pyrenoid (*pi'-ren-oid*) [πυρήν, the stone of a fruit; εἶδος, form]. One of the small, bright globules found imbedded in the chromatophores of green algæ and of certain invertebrates, and having the reactions of nuclein and the function of forming starch and similar carbohydrates.

pyrenol (*pir'-en-ol*). Pyranum.

pyrethrum (*pi-re'-thrum*). Pellitory; the root of *Anacyclus pyrethrum,* a plant of the order *Compositæ.* Pyrethrum is used as a sialagogue and masticatory in headache, toothache, and neuralgic affections of the face. It is employed either in powder or in the form of the tincture. **p., tincture of** (*tinctura pyrethri,* U. S. P.), is never given internally.

pyretic (*pi-ret'-ik*) [πυρετός, fever]. Pertaining to or affected with fever.

pyreticosis (*pi-ret-ik-o'-sis*) [πυρετός, feverl. Feverishness.

pyretin (*pi'-re-tin*). An antipyretic said to consist of acetanilide, caffeine, sodium, bicarbonate, and calcium carbonate. Dose 3–8 gr. (0.19–0.52 Gm.).

pyreto- (*pi-ret-o-*) [πυρετός, fever]. A prefix meaning fever.

pyretogen (*pi-ret'-o-jen*). Any agent which induces fever.

pyretogenesia, pyretogenesis (*pi-ret-o-jen-e'-ze-ah, pi-ret-o-jen'-es-is*) [*pyreto-*; γένεσις, origin]. The origin and process of fever.

pyretogenic, pyretogenous (*pi-ret-oj-en'-ik, pi-ret-oj'-en-us*) [*pyreto-*; γεννᾶν, to produce]. Causing or producing fever.

pyretogenin (*pi-ret-oj'-en-in*) [see *pyretogenic*]. A substance formed by microorganisms, and said to have the property of producing fever when inoculated into animals.

pyretography (*pi-ret-og'-ra-fe*) [*pyreto-*; γράφειν, to write]. A treatise on fevers.

pyretologist (*pi-ret-ol'-o-jist*) [*pyretology*]. A specialist in fevers.

pyretology (*pi-ret-ol'-o-je*) [*pyreto-*; λόγος, a science]. The science of the nature of fevers.

pyretolysis (*pi-ret-ol'-is-is*) [*pyreto-*; λύσις, a loosening]. Reduction of a fever.

pyretometer (*pi-ret-om'-et-ur*) [*pyreto-*; μέτρον, measure]. A clinical thermometer.

pyretotyphosis (*pi-ret-o-ti-fo'-sis*) [*pyreto-*; τύφωσις delirium]. The stupor or delirium of fever.

pyretotyposis (*pi-ret-o-ti-po'-sis*) [*pireto-*; τύπωσις, a forming]. Intermittent fever.

pyrexia (*pi-reks'-e-ah*) [πύρεξις, fever]. Elevation of temperature above the normal; fever.

pyrexial (*pi-reks'-e-al*). Pertaining to pyrexia.

pyrheliometer (*pir-he-le-om'-et-ur*) [πῦρ, fire; ἥλιος, sun; μέτρον, measure]. An instrument for measuring the heating and chemical effects of light; the measurements being expressed in calories per square centimeter per unit of time.

pyridine (*pir'-id-ēn*) [πῦρ, fire], C_5H_5N. A liquid base obtained as a distillation-product from tobacco, coal-tar, and other organic matter, and forming the first of a long and important series of homologous bases. **p. tricarboxylic acid**, $C_5H_2(CO_2H)_3N$, is antiseptic, antipyretic, antiperiodic, and antispasmodic. It has been used in malaria, asthma, and typhoid fever. Dose 2–10 gr. (0.13–0.65 Gm.).

pyridium (*pi-rid'-e-um*). Trade name of a colloidal condensation product of phenyl-azo-diamino-pyri-dine-hydrochloride.

pyriform (*pi'-rif-orm*) [*pyrus*, pear; *forma*, a form]. Pear-shaped.

pyriformis (*pe-rif-orm'-is*). Pyriform, as *pyriformis* muscle. See under *muscle*.

pyrimidine (*pir-im'-id-ēn*). A group of compounds derived from urea and certain unsaturated acids; to this group belong thymine, uracil, and cytosine, (constituents of nucleic acid). The toxic substance found in tobacco.

pyro (*pi'-ro*). Trade name for denatured alcohol.

pyro- (*pi-ro-*) [πῦρ, fire]. A prefix signifying fire or heat.

pyroacetic (*pi-ro-as-e'-tik*). Pertaining to or obtained from acetic acid by the action of heat. **p. spirit.** Synonym of *acetone*.

pyroacid (*pi-ro-as'-id*). A product obtained by subjecting certain organic acids to heat.

pyroarsenic acid (*pi-ro-ar-sen'-ik*) [*pyro-*; *arsenic*], $H_4As_2O_7$. A tetrabasic acid produced when arsenic is heated to 180° C.

pyroborate (*pi-ro-bo'-rāt*). A salt of pyroboric acid. Syn., *biborate*.

pyroboric acid (*pi-ro-bo'-rik*) [*pyro-*; *boron*], $H_2B_4O_7$. Tetraboric acid, a dibasic acid produced by heating boric acid.

pyrocatechin (*pi-ro-kat'-e-kin*) [*pyro-*; *catechu*], $C_6H_6O_2 = C_6H_4(OH)_2$. Catechol; a crystalline substance formed by the dry distillation of catechu and sometimes occurring in the urine. It has been used as an antipyretic. Dose 1 2–gr. (0.065–0.13 Gm.).

pyrocatechinuria (*pi-ro-kat-e-kin-ū'-re-ah*) [*pyrocatechin*; *οὖρον*, urine]. The presence of pyrocatechin in the urine.

pyrodextrin (*pi-ro-deks'-trin*) [*pyro-*; *dextrin*]. $C_{48}H_{74}O_{37}$. A brownish solid resulting from the action of heat upon dextrin.

pyrodin (*pi'-ro-din*) [πῦρ, fire], $C_6H_5.C_2H_3O.N_2H_2$. Acetylphenylhydrazine; a crystalline, poisonous substance, used as a substitute for chrysarobin in psoriasis and in other cutaneous affections; also as an antipyretic. Dose ½–3 gr. (0.93–0.02 Gm.).

pyroform (*pi'-ro-form*). Bismuth oxyiodopyrogallol; used in skin diseases and said to be less toxic than pyrogallol.

pyrogallic acid (*pi-ro-gal'-ik*). See *pyrogallol*.

pyrogallol (*pi-ro-gal'-ol*) [*pyro-*; *galla*, galls], $C_6H_3(OH)_3$. Pyrogallic acid; a phenol derivative produced by the action of heat on gallic acid. It is used locally in diseases of the skin. **p.-bismuth**, a dark-green powder containing equal parts of bismuth and pyrogallol; used as an intestinal disinfectant and wound antiseptic **p., oxidized**, a stable brown or black powder, slightly soluble in water, insoluble in alcohol or ether, used as a substitute for pyrogallol as less irritating and only slightly toxic. Dose ¼–15 gr. (0.05–1.0 Gm.) daily. Ointment in skin diseases 75 gr. (5 Gm.) to 375 gr. (25 Gm.) each of vaseline and lanolin.

pyrogen (*pi'-ro-jen*). Pyretogen.

pyrogenic (*pi-ro-jen'-ik*) [*pyro-*; γεννᾶν, to produce]. Producing fever.

pyrolagnia (*pi-ro-lag'-ne-ah*) [*pyro-*; λαγνεία, lust]. Pyromania accompanied by sexual gratification.

pyroleum (*pi-ro'-le-um*) [*pyro-*; *oleum*, *oil*]. 1. Petroleum. 2. An oil produced by dry distillation.

pyroligneous (*pi-ro-lig'-ne-us*) [*pyro-*; *lignum*, wood]. Pertaining to the destructive distillation of wood. **p. acid**, wood-vinegar. See *acid*, *pyroligneous*.

pyrolusite (*pi-ro-lū'-sīt*) [*pyro-*; λοῦσις, a washing]. Native manganese dioxide.

pyrolysis (*pi-rol'-is-is*) [*pyro-*; λύσις, a loosening]. Disorganization of organic n... ter due to rise in temperature.

pyrolytic (*pi-ro-lit'-ik*). Pertaining to pyrolysis.

pyromania (*pi-ro-ma'-ne-ah*) [*pyro-*; μανία, madness]. A monomania for incendiarism.

pyromaniac (*pi-ro-ma'-ne-ak*) [*pyro-*] One affected with pyromania.

pyrometer (*pi-rom'-et-er*) [*pyro-*; μέτρον, a measure]. An instrument for measuring the intensity of heat of too high a degree to be estimated by the ordinary thermometer.

pyronin (*pi'-ro-nin*). A basic triphenylmethane dyestuff.

pyronyxis (*pi-ro-niks'-is*) [*pyro-*; νύξις, a pricking]. Ignipuncture.

pyrophobia (*pi-ro-fo'-be-ah*) [*pyro-*; φόβος, dread]. Morbid dread of fire.

pyrophorus (*pi-rof'-or-us*). A mixture which ignites spontaneously when exposed to the air.

pyrophosphate (*pi-ro-fos'-fāt*). A salt of pyrophosphoric acid.

pyrophosphoric acid (*pi-ro-fos-for'-ik*). See *acid*, *pyrophosphoric*.

pyroptothymia (*pi-rop-to-thi'-me-ah*) [*pyro-*; πτοεῖν, to terrify; θυμός, mind]. A form of insanity in which the person imagines himself enveloped in flame.

pyropuncture (*pi-ro-pungk'-tūr*) [*pyro-*; *puncture*]. Puncturing with hot needles.

pyrosal (*pi'-ro-sal*). Antipyrine salicylacetate, $C_9H_8O_2C_{11}H_{12}N_2O$; antipyretic and antineuralgic. Dose 8 gr. (0.5 Gm.) 2 to 6 times daily.

pyroscope (*pi'-ro-skōp*) [*pyro-*; σκόπειν, to examine]. An instrument employed in determining the intensity of thermal radiation.

pyrosis (*pi-ro'-sis*) [πῦρ, fire]. An affection of the stomach characterized by a burning sensation, accompanied by eructations of an acrid, irritating fluid; heartburn.

Pyrosoma (*pi-ro-so'-mah*). See *Piroplasma*. **P. bigeminum** (*pi-ro-so'-mah bi-jem'-in-um*) [*pyrus*, pear; σῶμα, a body]. The parasite which is the cause of Texas fever in cattle.

pyrotic (*pi-rot'-ik*) [*pyrosis*]. 1. Inflammable. 2. Caustic.

pyrotoxic (*pi-ro-toks'-ik*) [*pyro-*; τόξικον, poison]. A caustic poison.

pyrotoxin (*pi-ro-toks'-in*) [*pyro-*; τοξικόν, a poison]. A toxic agent generated in the course of the febrile process.

pyrotoxina bacterica (*pi-ro-toks'-in-ah bak-ter'-ik-ah*) [see *pyrotoxin*]. A pyogenic substance believed to be produced by many forms of bacteria.

pyroxylin (*pi-roks'-il-in*) [*pyro-*; ξύλον, wood]. Gun-cotton; cotton-fiber treated with a mixture of nitric and sulphuric acids, by which the cellulose is changed into various nitro-compounds. Soluble gun-cotton (*pyroxylinum*, U. S. P.) is used in the preparation of collodion. The explosive gun-cotton is the hexanitrate of cellulose.

pyrozol (*pi'-ro-zol*). A proprietary antiseptic said to be a coal-tar derivative.

pyrozone (*pi'-ro-zōn*). A proprietary preparation of hydrogen dioxide, an external antiseptic. It is also used externally in a 5% and a 25% ethereal solution.

pyrrhol, pyrrol (*pir'-ol*) [*pyro-*; *oleum*, oil], $C_4H_4(NH)$. A liquid base obtained in the distillation of Dippel's oil and other organic substances. **p. tetraiodide.** See *iodol*.

pythogenesis (*pi-tho-jen'-es-is*) [πύθειν, to rot; γένεσις, genesis]. Production from decaying matter.

pythogenic (*pi-tho-jen'-ik*) [πύθειν, to rot; γεννᾶν, to produce]. Producing or arising from decomposition. **p. fever.** Synonym of *typhoid fever*

pythogenous (*pi-thoj'-en-us*). Pythogenic.

pyuria (*pi-ū-re-ah*) [πῦον, pus; οὖρον, urine]. The passage of urine containing pus.

pyxol (*pix'-ol*) [*pix*, pitch; *ol[eum]*, oil]. A proprietary preparation resembling the compound solution of cresol of the U. S. P.

Q

q. h. Abbreviation of *quaque hora*—every hour. **q. 2 h.,** abbreviation of *quaque secunda hora*—every second hour. **q. 3 h.,** abbreviation of *quaque tertia hora*—every third hour.

q. l. Abbreviation of *quantum libet*—as much as is desired.

q. p. Abbreviation of *quantum placet*—as much as you please.

q-P. Abbreviation of quanti-Pirquet's *reaction*, *q. v.*

q. s. Abbreviation of *quantum sufficit*—as much as suffices.

quack (*kwak*). A pretender of medical skill; a vender of nostrums; a medical charlatan.

quackery (*kwak'-er-e*). The practice of medicine by a quack; medical charlatanism.

quack-salver. A quack, or mountebank; a peddler of his own medicines and salves.

quader (*kwa'-der*) [Ger., square]. The precuneus, or quadrate lobe of the cerebrum.

quadrangular (*kwod-rang'-gū-lar*) [*quadrangulum*, a four-cornered figure]. Having four angles, as the *quadrangular* lobe, the square lobe of the cerebellum.

quadrant (*kwod'-rant*) [see *quadratus*]. 1. The fourth part of a circle, subtending an angle of 90 degrees. 2. One of the four regions into which the abdomen may be divided for purposes of physical diagnosis. **q. of Wilder,** such an area of the ventral aspect of the crus cerebri in the cat.

quadrantanopsia (*kwod-rant-an-op'-se-ah*). Loss of vision in, approximately, one-fourth of the visual field.

quadrate (*kwod'-rāt*) [*quadrant*]. Square; four-sided. **q. bone,** the bone which in birds and reptiles articulates with the squamosal above, the mandible below, the pterygoid internally, and the quadrojugal externally. **q. cartilages,** small quadrangular cartilaginous plates often found in the alæ of the nose. **q. lobe,** 1. A small lobe of the liver. 2. A lobe of the cerebellum. **q. lobule.** See *precuneus*.

quadratipronator (*kwod-ra-ti-pro-na'-tor*). Same as *pronator quadratus*. See *muscles, table of*.

quadratus (*kwod-ra'-tus*) [L.]. Squared; having four sides. **q. muscle.** See under *muscle*.

quadri- (*kwod-re-*) [L.]. A prefix denoting four or four times.

quadribasic (*kwod-re-ba'-sik*) [*quadri-; basis*, base]. In chemistry, applied to an acid having four replaceable hydrogen atoms.

quadriceps (*kwod'-re-seps*) [*quadri-; caput*, head]. Four-headed, as a *quadriceps* muscle. A large muscle of the thigh. See under *muscle*. **q. suræ** [L., the quadriceps muscle of the calf]. The muscle mass comprising the gastrocnemius, soleus, and plantaris. **q. artery of the femur,** descending branch of the external circumflex artery of the thigh.

quadrigeminal (*kwod-re-jem'-in-al*) [see *quadrigeminum*]. Fourfold; consisting of four parts, as the *quadrigeminal* bodies. See *corpora quadrigemina*.

quadrigeminum (*kwod-re-jem'-in-um*) [*quadrigeminus*, fourfold]. One of the corpora quadrigemina.

quadrilateral (*kwod-re-lat'-er-al*) [*quadri; latus*, a side]. Having four sides. **q., of Marie.** See under *Marie*.

quadrille (*kwad-ril'*) [Fr.]. An embryological term designating the complex movement undergone by the dividing centrosomes previous to the formation of the cleavage centrosomes.

quadripara (*kwod-rip'-ar-ah*) [*quadri*, four; *parere*, to bear]. A woman who is bearing or has borne, her fourth child, or has had her fourth confinement.

quadriparity (*kwod-re-par'-it-e*). The state of having borne four children.

quadriparous (*kwod-rip'-a-rous*). Pertaining to a quadripara, or to a fourth confinement.

quadriplegia (*kwod-ri-ple'-je-ah*) [*quadri*, four; πληγή, stroke]. Paralysis of all four limbs.

quadrisect (*kwod'-ri-sekt*) [*quadri*, four; *secare*, to cut]. To divide into four parts.

quadritubercular (*kwod-re-tū-ber'-kū-lar*). Having four tubercles or cusps.

quadriurate (*kwod-re-ū'-rāt*) [*quadri-; urate*). A term applied to the hyperacid urate of human urine and the urine of birds and reptiles. The quadriurates are mixtures of biurates and uric acid, and have the general formula of $MH(C_5H_3N_4O_3)H_3C_5H_3N_4O_3$.

quadrivalent (*kwod-riv'-al-ent*) [*quadri-; valere*, to be worth]. In chemistry, having a combining power equivalent to that of four hydrogen atoms. See *quantivalence*.

quadroon (*kwod-roon'*) [*quartus*, fourth]. Offspring of a white person and a mulatto.

quadruplet (*kwod-roo'-plet*) [*quadruplare*, to make fourfold]. Any one of four children born at one birth.

Quain's fatty heart (*kwān*). Fatty degeneration of the cardiac muscular fibers.

Quain's method of removing a foreign body (*kwān*). An incision is made at some little distance from the foreign body, the latter is then grasped with forceps at right angles to its long axis, and then pushed out through another incision at the point of entrance.

quaker's black drop. Vinegar of opium, acetum opii.

quaker-button. A popular name for nux vomica.

qualimeter (*kwol-im'-et-er*) [*qualis*, of what kind: μέτρον, a measure]. An instrument for measuring the degree of hardness of the Roentgen rays.

qualitative (*kwol'-it-a-tiv*) [*qualitas*, quality]. Pertaining to quality. **q. analysis.** See *analysis, qualitative*.

Quant's sign (*kvahnt*). In rickets, a T-shaped depression in the occipital bone is sometimes observed.

quantimeter (*kwon-tim'-et-er*). An instrument for measuring the dosage of the Roentgen rays.

quanti-Pirquet's reaction (*kwon'-te-pēr-ka*). A quantitative Pirquet's reaction undertaken

with the idea of estimating the degree of tuberculous infection.

quantitative (*kwon'-tit-a-tiv*) [*quantus*, how much]. Pertaining to quantity. **q analysis.** See *analysis, quantitative.*

quantivalence (*kwon-tiv'-al-ens*) [*quantus*, how much; *valere*, to be worth]. The combining power of an element or radical expressed in terms of the number of atoms of hydrogen with which it will unite. *Univalent* (monad) atoms, as chlorine, are saturated with one atom; *bivalent* (diad) atoms require two; *trivalent* (triad) as boron, take three; *quadrivalent* or tetrad, *quinquiv lent* (pentad) *sexvalent* (hexad) require four, five, and six atoms of hydrogen respectively.

quantum (*kwon'-tum*) [L.]. 1. As much as. 2. A certain prescribed amount. 3. The supposed atom of light and other radiants. **q. libet,** as much as you please. **q. sufficit,** as much as suffices. **q., normal,** a constant quantity or standard **q. vis.** as much as you wish.

quarantine (*kwor'-an-tēn*) [It., *quaranta*, forty]. 1. The time (formerly forty days) during which vessels or travelers from ports infected with contagious or epidemic diseases are required by law to remain outside the port of their destination, as a safeguard against the spreading of such diseases. 2. The place of detention. 3. The act of detaining vessels or travelers from suspected ports or places for purposes of inspection of disinfection. **q., land-,** the isolation of a person or district on land for purposes similar to those of detention of persons arriving at a place by sea. **q. period,** the length of time required to insure immunity after exposure, or the length of time necessary after an attack, to render the disease innocuous.

quart (*kwort*) [*quartus*, fourth]. The fourth part of a gallon. **imperial q.,** contains about 20 per cent. more than the ordinary quart.

quartan (*kwor'-tan*) [*quartus*]. 1. Recurring on the fourth day. 2. A form of intermittent fever the paroxysms of which occur every fourth day. **p., double,** quartan fever characterized by milder and severer paroxysms, each occurring every fourth day. **q. fever.** See *quartan* (2). **q. parasite,** the *Plasmodium malariæ.*

quarter-crack. In farriery, a fissure of the hoof on the inner side of the fore-foot of a horse.

quarter-evil (*kwor'-ter-e-vil*). A synonym of *black-leg.*

quartipara (*kwor-tip'-ar-ah*) [*quartus; parere*, to bring forth]. A woman in her fourth pregnancy. See *multipara.*

quartiparous (*kwor-tip'-ar-us*) [*quartipara*]. Pregnant four times.

quartisect (*kwor'-ti-sekt*). Quadrisect.

quartisternal (*kwor-te-ster'-nal*). Pertaining to the quartisternum.

quartisternum (*kwor-te-ster'-num*) [*quartus*, fourth; *sternum*]. A part of the sternum having a special center of ossification corresponding with the fourth intercostal space.

quartonol (*kwor'-ton-ol*). A proprietary mixture of calcium, sodium, quinine, strychnine, and glycerophosphates.

quartz (*kworts*). See *silica.*

quassation (*kwas-a'-shun*) [*quassatio*, a shaking or shattering]. The reduction of barks, roots, and other drugs to morsels, in preparation for further pharmaceutical treatment. Syn., *cassation.*

quassia (*kwosh'-e-ah*) [after *Quassi*, a negro slave in Surinam who first used it]. The wood of several trees of the order *Simarubaceæ.* The quassia of the U. S. P. and B. P. is the wood of *Picrasma excelsa*, known as *Jamaica quassia*, or of *quassia amara*, known as *Surinam quassia.* It is a simple bitter, and is used in dyspepsia and constipation; in the form of an enema it is employed against seatworms. **q., extract of** (*extractum quassiæ*, U. S. P.). Dose 1 gr. (0.065 Gm.). **q., fluidextract of** (*fluidextractum quassiæ*, U. S. P.). Dose 8 minims (0.5 Cc.). **q., infusum of** (*infusum quassiæ*, B. P.). Dose ½ to 1 ounce (15 to 30 Cc.). **q., tincture of** (*tinctura quassiæ*, U. S. P., B. P.). Dose ½ to 1 dram (2 to 4 Cc.).

quassia cup. A cup made of quassia wood, which is filled with water and allowed to stand; the water acquires the bitter taste of the quassia.

quassiin (*kwos'-se-in*). Same as *quassin.*

quassin (*kwos'-in*). The active principle of quassia; very bitter, white crystals, soluble in alcohol and chloroform; used as a tonic. Dose $\frac{1}{12}$–$\frac{1}{4}$ gr. (0.002–0.02 Gm.).

quaternary (*kwa-ter'-na-re*) [*quaterni*, four each]. 1. Consisting of four elements. 2. Fourth in order. **q. syphilis,** parasyphilis.

Quatrefages, parietal angle of (*katr-fahzh*) [Jean Louis Armand de *Quatrefages* de Bréau, French naturalist, 1810–1892]. In craniometry, that formed by the lines drawn through the extremities of the transverse maximum or bizygomatic diameter and the maximum transverse frontal diameter (called *positive* when it opens downward, and *negative* when it opens upward).

quatuor (*kwat'-ū-or*) [L.]. Four. **q. pills,** pills made up of iron sulphate, quinine, aloes, nux vomica and gentian.

quebrabunda (*ke-brah-bun'-dah*) [Port.]. Straddling disease, a tropical disease similar to beriberi which attacks horses and pigs.

quebrachamine (*ke-brah'-kam-ēn*). See under *quebracho.*

quebrachine (*ke-brah'-kēn*). An alkaloid of quebracho (*q. v.*). It is used internally and hypodermatically in dyspnea. Dose ⅔–1½ gr. (0.04–0.1 Gm.).

quebracho (*ke-brah'-ko*) [from Pg. *quebra-hacho*, ax-breaker]. The name of several hard-wooded trees of South America. The white quebracho (*quebracho blanco*) is *Aspidosperma quebracho*, of the order Apocynaceæ. It contains the following alkaloids: *Aspidospermine* $C_{22}H_{30}N_2O_2$; *aspidospermatine* $C_{22}H_{28}N_2O_2$, *aspidosamine*, $C_{22}H_{28}N_2O_2$; *quebrachine*, $C_{21}H_{26}N_2O_2$, and *quebrachamine* $C_{21}H_{26}N_2O_2$. It is used in emphysema, bronchitis, and in asthma. See *aspidospermine.*

quebrachol (*ke-brah'-kol*). A levorotary crystalline substance found in the bark of *Aspidosperma quebracho blanco.*

Queckenstedt's test (*kwek'-en-stet*). In healthy persons, pressure on the veins of the neck causes a prompt rise in the pressure of the cerebrospinal fluid, which disappears on release of the pressure on the veins. This is not noticed when there is any obstruction in the vertebral canal.

queen of the meadow. *Spiræa ulmaria; eupatorium*

queen's-delight, queen's-root. See *stillingia.*

queen's metal. An alloy of antimony, tin, etc.

Quénu's operation of thoracoplasty (*ka-noo'*) [E. *Quénu*, French surgeon, 1852–]. An operation for empyema, consisting in simple section of the ribs, without resection, to favor retraction of the chest walls.

Quénu-Mayo operation (*ka-noo'-ma'-o*) [see *Quénu*; William J. *Mayo*, American surgeon, 1861-]. See under *operations*.

quercetin (*kwur'-se-tin*). A neutral principle derived from quercitrin.

quercin (*kwer'-sin*) [*quercus*], $C_6H_8(OH)_8$. A bitter, crystallizable carbohydrate extracted from acorns and oak-bark.

quercitannic acid (*kwer-si-tan'-ik*) [*quercus; tannin*]. $C_{17}H_{16}O_9$. A variety of tannic acid found in oak-bark.

quercitannin (*kwer-sit-an'-in*). Quercitannic acid.

quercitannoform (*kwer-se-tan'-o-form*). A preparation made from quercitannic acid and formaldehyde, similar to tannoform.

quercite (*kwer'-sīt*) [*quercus*], $C_6H_7(OH)_5$. A sweet principle found in acorns.

quercitol (*kwer'-sit-ol*). See *quercite*.

quercitrin (*kwer'-sit-rin*) [*quercus; citrus*, lemon]. $C_{18}H_{18}O_{12}$. A glucoside found in the bark of *Quercus tinctoria* and in many other plants. It is tonic and astringent.

quercus (*kwer'-kus*) [L., oak]. The *quercus* of the U. S. P. is the dried bark of *Quercus alba*. Dose 15 gr. (1 Gm.). **q., fluidextract of** (*fluidextractum quercus*, U. S. P.). Dose 15 min (1 Cc.). See *oak*.

quercynol (*kwur'-sin-ol*). A proprietary remedy said to consist of extract of *Quercus alba* with cyanol and extract of hyoscyamus. It is used in vaginal wafers.

Quevenne's iron (*ke-ven'*) [Theodore Auguste *Quevenne*, French physician, 1805–1855]. Ferrum reductum.

quick (*kwik*) [As., *cwic*, alive]. 1. A sensitive, vital, tender part, as the flesh under a nail. 2. Pregnant, and able to feel the movements of the fetus.

quicken (*kwik'-en*). To experience the sensation of quickening, *q. v.*

quickening (*kwik'-en-ing*) [see *quick*]. The first feeling on the part of the pregnant woman of fetal movements, occurring between the fourth and fifth months of pregnancy.

quicklime [*quick; lime*]. Calcium oxid; unslacked lime See under *lime*.

quicksilver [*quick; silver*]. The popular name for mercury.

quickwater. Solution of mercuric nitrate.

quillaia, quillaja (*kwil-a'-yah*) [Chilian, *quillean*, to wash]. A genus of trees of the order *Rosaceæ*. The *quillaja* of the U. S. P. is the dried bark of *Quillaja saponaria*. It contains saponin and produces a froth when agitated in water. It is used in pulmonary affections and as a sternutatory, and in the arts as a substitute for soap. Syn., *soap-bark*. **Q., fluidextract of** (*fluidextractum quillajæ*, U. S. P.). Dose 3 min (0.2 Cc). **Q., tincture of** (*tinctura quillajæ*, U. S. P.), *tinctura quillaiæ*, B. P.). Dose 1 dr. (4 Cc.).

quill-suture. See *suture, quill-*.

quina (*kwin'-ah*). Same as *cinchona*. **q. calisaya**, yellow cinchona bark. **q. colorada**, red cinchona bark.

quinacetine sulphate (*kwin-as'-et-ēn*) $(C_{27}H_{31}NO_8)_2 \cdot H_2SO_4H_2O$. An antipyretic and anodyne. Dose 5–15 gr. (0.32–0.97 Gm.).

quinaldin (*kwin-al'-din*), $C_{10}H_9N$. Methylquinolin; formed by digesting anilin with paraldehyde and hydrochloric acid.

quinalgen (*kwin-al'-jen*). See *analgen*.

quinamicine (*kwin-am'-is-ēn*). An artificial alkaloid, $C_{19}H_{24}N_2O_2$, obtained from quinamine.

quinamidine (*kwin-am'-id-ēn*). An isomere of quinamicine.

quinamine (*kwin'-am-ēn*) [Sp. *quina*, bark; *amine*], $C_{19}H_{24}N_2O_2$. An alkaloid of the cinchonas.

quinaphenin (*kwin-a-fen'-in*). A white, tasteless powder, obtained by action of quinine on the hydrochlorate of eloxyphenylcarbamic acid. Used in whooping-cough. Dose for young children 1–2½ gr. (0.065–0.16 Gm.) daily; older children 3–5 gr. (0.02–0.3 Gm.).

quinaphthol (*kwin-af'-thol*). See *chinaphthol*.

quinaquina (*kwin-ah-kwin'-ah*). Cinchona.

quinaseptol (*kwin-ah-sep'-tol*). See *diaphtol*. **q., argentic**, an odorless, harmless antiseptic and hemostatic which promotes granulation.

quinate (*kwin'-āt*). A salt of quinic acid.

quince-seed (*kwins-sēd*). See *cydonium*.

Quincke's disease (*kving'-keh*) [Heinrich Irenaeus *Quincke*, German physician, 1842–1922]. Angioneurotic edema; acute circumscribed edema. **Q.'s edema.** See *Q.'s disease*. **Q.'s pulse**, rhythmic reddening and blanching of the finger-nails at each diastole of the heart, depending upon oscillations of blood-pressure which are propagated into the capillaries; it is found in aortic insufficiency. **Q.'s puncture**, lumbar puncture to examine or remove cerebrospinal fluid. **Q.'s sign.** See *Q.'s pulse*. **Q.'s space**, the space between the third and fourth lumbar vertebræ. **Q.'s spinal puncture.** See *puncture, lumbar*.

quincoca (*kwin-ko'-kah*). A tonic said to be a combination of quinine, coca-leaves, gentian, wild cherry, orange peel, and aromatics exhausted with port wine.

quinetine (*kwin'-et-ēn*). A mixture of cinchona alkaloids, similar to *febrifuge*.

quinetum (*kwin-e'-tum*). The mixed alkaloids from red cinchona bark used as a cheap febrifuge in India. Dose gr. j–v. It is an antiperiodic.

quinhydrone (*kwin-hi'-drōn*). A reaction product of an aqueous solution of quinone and hydroquinone; green prisms with pungent taste, soluble in hot water, alcohol, ether, or ammonium.

quinia (*kwin'-e-ah*). See *quinine*.

quinic (*kwin'-ik*) [Peruvian, *kina*, bark]. Pertaining to quinine. **q. acid**, $C_7H_{12}O_7$, an acid occurring in cinchona bark, in the ivy, oak, elm, ash, coffee-plant, etc. **q. fever**, febrile symptoms, with an eruption; it occurs among workmen making quinine.

quinicine (*kwin'-is-ēn*). A cinchona alkaloid, isomeric with quinine and quinidine.

quinidamine (*kwin-id'-am-ēn*). An alkaloid obtained from cinchona.

quinidine (*kwin'-id-ēn*) [*quinine*], $C_{20}H_{24}N_2O_2$. An alkaloid of cinchona bark isomeric with quinine, which it resembles in action, differing only in being less powerful. **q. sulphate**, is used as an antiperiodic in doses of 20–60 gr. (1.3–4.0 Gm.). **q. tannate**, is used in diarrhea, nephritis and malaria. Dose 2–12 gr. (0.1–0.8 Gm.) twice daily.

quinimetry (*kwin-im'-et-re*) [*quinia; μέτρον*, measure. See *quiniometry*.

quinina (*kwin-i'-nah*). See *quinine*.

quininæ (*kwin-i'-ne*). Genitive of quinina.

quinine (*kwin-een, kin'-een*) [Peruvian, *kina*, bark], $C_{20}H_{24}N_2O_2 + 3H_2O$. Quinine (*quinina*, U. S. P.) is a bitter amorphous or crystalline alkaloid obtained from the bark of various species of cinchona. It is soluble in 900 parts

of water, readily soluble in alcohol, ether, and chloroform, and gives a beautiful emerald-green color when it orits saltsare treated with a solution of chlorine and then with ammonia. Quinine acts as a stimulant to the nervous system, causing in large doses cerebral congestion and lessening of the reflexes; it is a slight respiratory stimulant and a depressant to the circulation; it lessens the ameboid movement of the white corpuscles, and during fever is strongly antipyretic; it also possesses antiseptic properties. In large doses it causes ringing in the ears, a feeling of fulness in the head, dizziness, slight deafness and at times disturbances of vision; occasionally also a rise of temperature (*quinine fever*). It is used as an antiperiodic in malaria, in which disease it has a specific action; it is also employed as an antipyretic in other febrile affections, as a tonic in convalescence, as a stimulant to the uterus during parturition, in whooping-cough, coryza, and hay-fever. **q. acetate,** $C_{20}H_{24}N_2O_2.C_2H_4O_2$. Dose 1–15 gr. (0.065–1.0 Gm.). **q. albuminate.** Dose 1–15 gr. (0.063–1.0 Gm.). **q. bisulphate** (*quininæ bisulphas*, U. S. P.). Dose same as that of the sulphate. **q. bromate,** $C_{20}H_{24}N_2O_2\ HBrO_3$, antiseptic and antipyretic. Dose 1–30 gr. (0.065–2.0 Gm.). **q. camphorate,** $(C_{20}H_{24}N_2O_2)_2.C_{10}H_{16}O_4$, antiseptic and antipyretic. Dose 1–30 gr. (0.065–2.0 Gm.). **q. carbolate,** $C_{20}H_{24}N_2O_2.C_6H_6O$, antiseptic and antipyretic. Dose 1–30 gr. (0.065–2.0 Gm.). **q. chlorate,** $C_{20}H_{24}N_2O_2.HClO_3 + 1\frac{1}{2}H_2O$, explosive white crystals, soluble in water and alcohol; used in fevers with symptoms of angina. **q. chlorophosphate,** $C_{20}H_{24}N_2O_2.HCl.2PO_4H_3 + 3H_2O$; used in obstinate cases of malaria. **q. cinnamate,** $C_{20}H_{24}N_2O_2.C_9H_8O_2$; antipyretic and antiseptic. Dose 1–30 gr. (0.065–2.0 Gm.). **q. citrate,** $(C_{20}H_{24}N_2O_2)_2.C_6H_8O_7 + 7H_2O$. Dose 2–20 gr. (0.13–1.3 Gm.). **q. ethylcarbonate,** same as euquinine, *q. v.* **q. ethylsulphate,** $C_{22}H_{30}N_2O_6$, obtained from a hot alcoholic solution of sodium sulphovinate and quinine sulphate; recommended for subcutaneous use. Dose 3–8 gr. (0.19–0.52 Gm.). **q. ferrocyanide,** $C_{20}H_{24}N_2O_2.H_4Fe(CN)_6 + 3H_2O$, used in night-sweats of tuberculosis. Dose 5–10 gr. (0.32–0.65 Gm.). **q. formate,** $C_{20}H_{24}N_2O_2.CH_2O_2$, used as is the sulphate. **q. glycerophosphate,** $(C_{20}H_{24}N_2O_2)_2.C_3H_7O_3.PO_3$; used in malaria, neuralgia, etc. Dose 2 gr. (0.1 Gm.). **q. hydrobromide** (*quininæ hydrobromidum*, U. S. P.), $C_{20}H_{24}N_2O_2.HBr + H_2O$. Used in the same doses as the sulphate. **q. hydrochloride** (*quininæ hydrochloridum*, U. S. P., B. P.), given as is the sulphate. **q. hydrochlorosulphate,** $C_{20}H_{24}N_2O_2.HCl.H_2SO_4 + 3H_2O$; for hypodermatic use as causing less pain than any other salt of quinine. **q. hydroiodate,** $C_{20}H_{24}N_2O_2.HI$, used as a nervous sedative and in neuralgia internally or subcutaneously. Dose 1–1½ gr. (0.06–0.1 Gm.). **q. lygosinate,** a combination of quinine and lygosine, a fine, orange-yellow powder. It is bactericide and antiseptic and is used as a dusting-powder. **q. muriate.** See *q. hydrochloride*. **q. oleate** (*oleatum quininæ*), a mixture of exsiccated quinine, 1 part, and oleic acid, 3 parts; used in the administration of quinine by inunction. **q. peptonate,** a brown powder containing 80 % of peptone and 20 % of quinine; nutrient and tonic. Dose 5–60 gr. (0.32–4.0 Gm.). **q. phenate, q. phenolate.** See *q. carbolate*. **q. phosphate,** $(C_{20}H_{24}N_2O_2)_3.H_3PO_4 + 8H_2O$, antiperiodic. Dose 1–30 gr. (0.065–2.0 Gm.). **q. phthalate,** $(C_{20}H_{24}N_2O_2)_2.C_8H_6O_4$; used as is the sulphate. Dose 1–30 gr. (0.065–2.0 Gm.). **q. quinate,** $C_{20}H_{24}N_2O_2.C_7H_{12}O_6 + 2H_2O$; used subcutaneously. Dose, as the sulphate. **q. quinovate,** $C_{20}H_{24}N_2O_2.C_{24}H_{38}O_4(?)$, antiperiodic. Dose 1–30 gr. (0.065–2.0 Gm.). **q. saccharate, q., saccharinate,** $C_{20}H_{24}N_2O_2.C_6H_{10}O_8$, antipyretic and antiseptic. Dose 1–30 gr. (0.065–2.0 Gm.). **q. salicylate** (*quininæ salicylas*, U. S. P.), $2C_{20}H_{24}N_2O_2.C_7H_6O_3 + H_2O$; antiperiodic, and used to relieve the pains of rheumatism and gout. Dose 4 gr. (0.25 Gm.). **q. stearate,** $C_{20}H_{22}N_2O_2.C_{18}H_{36}O_2$; used as is the sulphate, but by inunction. **q. sulphate** (*quininæ sulphas*, U. S. P., B. P.), is the salt most commonly employed. Dose in malaria 5–24 gr. (0.32–1.6 Gm.) before the paroxysms; as a prophylactic 2–4 gr. (0.13–0.26 Gm.); as a tonic 1–2 gr. (0.065–0.13 Gm.); in whooping-cough 1½ gr. (0.1 Gm.) for each year of the child's age, or locally in solution of 1–2 gr. (0.065–0.13 Gm.) to the ounce (32 Cc.) by the atomizer. **q. sulphochlorhydrate,** used by injection in carcinoma. Dose 0.50–0.60 cg. every other day. **q. sulphocresotate,** an intestinal antiseptic. **q. sulphoethylate.** See *q. ethylsulphate*. **q. sulphomuriate.** See *q. hydrochlorosulphate*. **q. sulphotartrate,** a compound of quinine sulphate and tartaric acid; antipyretic, antiseptic. Dose 1–30 gr. (0.065–2.0 Gm.). **q. sulphovinate.** See *q. ethysulphate*. **q. tannate,** used in whooping-cough. **q. thymate,** used as is the sulphate. Dose 1–30 gr. (0.065–2.0 Gm.). **q. and urea hydrochloride,** employed chiefly for hypodermatic use. **q.-urethane,** a nonirritant compound made by heating 3 parts of quinine hydrochloride with 15 parts of urethane and 3 parts of water; used for intravenous injection. **q. valerate,** used in doses of 1–2 gr. (0.065–0.13 Gm.) in nervous debility and hemicrania.

quininism, quinism (*kwin-ēn'-izm, kwin'-izm*) Cinchonism.

quiniometry (*kwin-e-om'-et-re*) [*quinia; μέτρον*, measure]. The determination of the amount of alkaloids contained in samples of cinchona bark.

Quinlan's test for bile (*kwin'-lan*). On examination through a spectroscope absorption lines appear in the violet end of the spectrum, in the presence of bile.

quinochloral (*kwin-o-klo'-ral*). See *chinoral*.

quinoform (*kwin'-o-form*). See *chinoform*.

quinoidine (*kwin-oi'-dēn*). See *chinoidine*. **q., animal-,** a basic substance obtained from animal tissues and having the property of fluorescence like quinine.

quinol (*kwin'-o*). See *hydroquinone*.

quinoline (*kwin'-o-lēn*) [*quinine*], C_9H_7N. A liquid alkaloid obtained in the destructive distillation of quinine, or cinchonine, with potassium hydroxide; it occurs also in coal-tar. It is antipyretic and antiseptic. Dose 4–10 min. (0.2–0.6 Cc.). **q.-bismuth sulphocyanate,** $(CH.N.HSCN)_3\ Bi(SCN)_3$, a granular, orange-red powder, insoluble in water, alcohol, or ether; melts at 76° C. It is used in the treatment of gonorrhea, skin diseases, and ulcers in 0.5 to 1 % solution. **q. monohypochlorite.** See *chinol*. **q. salicylate,** $C_9H_7N.C_7H_6O_3$, antiseptic and antirheumatic. Dose 8–15 gr. (0.5–1.0 Gm.). Application, 0.7 % aqueous solution. **q. sulphate,** $C_9H_7N.H_2SO_4$; anti-

septic and used as is quinolin. **q. tartrate,** $(C_9H_7N)_2(C_4H_6O_6)_4$, antipyretic and antiseptic. Dose 5–15 gr. (0.32–1.0 Gm.). Injection in gonorrhea, 0.7 % aqueous solution.

quinology (*kwin-ol'-o-je*) [Sp., *quina*, bark; λόγος, discourse]. The scientific study of the cinchona trees and of their alkaloids.

quinone (*kwin'-ōn*) [*quinine*], $C_6H_4O_2$. 1. A yellow, crystalline substance obtained by heating quinic acid with manganese dioxide and sulphuric acid. 2. A group in which two hydrogen atoms of a benzene nucleus are replaced by two oxygen atoms.

quinopyrine (*kwin-o-pi'-rēn*). A concentrated aqueous solution of quinine hydrochloride and antipyrin, used subcutaneously in malaria.

quinosol (*kwin'-o-sol*). 1. $C_9H_6N.OSO_3K + H_2O$. Oxyquinoline potassium sulphate, a yellow powder, soluble in water; antipyretic, antiseptic, styptic, and deodorant. Syn., *chinosol*. 2. The proprietary name for a neutral combination of tricresyl sulphonate and quinoline, with tricresol. It is not caustic, and is soluble in water to the extent of 1 in 25. A disinfectant for surgical instruments, and bactericide. Application, 0.1 to 2 % solutions.

quinotannic acid (*kwin-o-tan'-ik*) [*quinine; tannin*]. A form of tannic acid found in cinchona bark.

quinotoxin (*kwin-o-toks'-in*). A poisonous isomere of quinine.

quinotropine (*kwin-o-tro'-pēn*). Urotropine quinate.

quinovine (*kwin'-o-vin*) [Peruvian, *kina*, bark], $C_{28}H_{42}O_{11}$. Kinovin, a bitter glucoside found in cinchona bark.

quinoxin (*kwin-oks'-in*) [Sp., *quina*, bark; ὀξύς, acid]. Nitrosophenol; prepared by the action of nitrous acid upon phenols.

Quinquaud's disease (*kang-ko'*) [Charles Eugene *Quinquaud*, French physician, 1841–1894]. A disease of the hair-follicles attended with cicatrization of the skin. Syn., *acne decalvans; folliculitis decalvans*. **Q.'s panaris,** phlegmonous inflammation of the fingers and toes of neuropathic origin, differing from Morvan's disease in that it is painful and never accompanies paretic phenomena, and ordinarily does not entail necrosis of the phalanges. **Q.'s phenomenon** or **sign,** an involuntary crepitus of hand and fingers when extended, often found in alcoholics. **Q.'s sign of chronic alcoholism,** the subject for examination is directed to hold the tips of the outstretched fingers of one hand perpendicularly to the outspread palm of the examiner and to press upon it with only moderate firmness. In the course of two or three seconds, if the person is addicted to alcohol, crepitation of the phalanges will be perceptible, as if the bones of each finger impinged roughly upon each other. The sound ranges in intensity from a slight grating to crashing.

quinquetubercular (*kwin-kwe-tū-ber'-kū-lar*). Having five tubercles or cusps.

quinquevalent (*kwin-kwev'-al-ent*) [*quinque*, five; *valere*, to be worth]. Having a valence of five; capable of combining with or replacing five atoms of hydrogen or their equivalent.

quinquina (*kwin-kwi'-na*). Cinchona.

quinquinina (*kwin-kwe-ni'-nah*). A preparation containing alkaloids of cinchona bark, extracted by macerating in acidulated water, and precipitated by a soluble alkali.

quinquivalent (*kwin-kwiv'-al-ent*). See *quinquevalent*.

quinsy (*kwin'-se*) [κυνάγχη from κύων + ἄγχειν, to choke]. Acute inflammation of the tonsils, usually tending to suppuration. **q., lingual,** quinsy originating in the lingual tonsil and involving the tongue.

quintan (*kwin'-tan*) [*quintus*, fifth]. An intermittent fever, the paroxysms of which recur every four days, *i. e.*, on the fifth, ninth, thirteenth, etc.

quintessence (*kwin-tes'-ens*) [*quintus*, fifth; *essentia*, essence]. The active principle of any substance, concentrated to the utmost degree.

Quintin treatment (*kan-tan'*) [René *Quintin*, French physician]. Treatment of disease by the administration of diluted sea water.

quintipara (*kwin-tip'-ar-ah*) [*quintus*, fifth; *parere*, to bring forth]. A woman who has been in labor five times, or who is in labor for the fifth time.

quintisternal (*kwin-te-ster'-nal*). Pertaining to the quintisternum.

quintisternum (*kwin-te-ster'-num*) [*quintus*, fifth, *sternum*]. A part of the sternum having a special center of ossification corresponding with the fifth intercostal space.

quintuplet (*kwin-tū'-plet*) [*quintuplex*, five-fold]. One of five children born at one time.

quionine (*kwi'-o-nēn*). "Tasteless quinine." A mixture of cinchona alkaloids, principally cinchonidine.

quitenidine (*kwit-en'-i-dēn*). An alkaloid formed by the oxidation of quinidine.

quittor, quitter (*kwit'-or, kwit'-er*). In farriery, a fistulous wound upon the quarters or the heel of the coronet, caused by treads, pricks in shoeing, or other injuries which produce suppuration at the coronet or within the foot.

quiz (*kwiz*) [*quæso*, I ask] 1. A recitation, conducted by questions and answers, in which the student familiarizes himself with his studies. 2. To teach by this method of questions and answers.

quizzer (*kwiz'-er*) [*quiz*] One who conducts a quiz.

quotidian (*kwo-tid'-e-an*) [*quot*, as many as; *dies*, day]. 1. Recurring every day. 2. An intermittent fever, the paroxysms of which recur daily. **q., double,** a fever having two paroxysms a day, usually differing in character.

quotient (*kwo'-shent*) [*quoties*, how often]. The result of the process of division. **q., blood,** the result obtained by dividing the quantity of hemoglobin in the blood by the number of erythrocytes, expressed in each case as a percentage of the normal amount. **q.D-** the ratio of glucose to nitrogen in the urine. **q., protein,** the result of dividing the amount of globulin in the blood-plasma by the amount of albumin in it. **q. respiratory,** the result obtained by dividing the carbon dioxide expired by the oxygen absorbed. This is normally

$$\frac{4.5}{5} = 0.9.$$

q. v. Abbreviation for (1) *quantum vis*,—as much as you wish. (2) For *quod vide*—which see.

R. The abbreviation of *Réaumur*, of *resistance* (electric), of *residuum*, of *right*, and of *recipe*, take (generally written ℞.). **r. unit.** See under *unit*.

−R. Abbreviation for Rinne's test negative.

+R. Abbreviation for Rinne's test positive.

Ra. Chemical symbol of *radium*.

Raabe's test for albumin (*rah'-beh*) [Gutav *Raabe*, German physician, 1875–]. Place in a test-tube 1 Cc. of the liquid to be tested; on the addition of a small piece of trichloracetic acid a white zone or ring will be formed in the presence of albumin. The ring produced by uric acid is diffused and not sharply defined.

rabbeting (*rab'-et-ing*) [OF., *rabou er*, to push back]. The interlocking of the broken serrated edges of a fractured bone.

rabelaisin (*rab-el-a'-is-in*). A glucoside from the bark of *Lunasia amara*, of the Philippine Islands; the bark is used in inflammation of the eye and as an arrow-poison by the Negritos.

rabiate (*ra'-be-āt*) [*rabies*, rage]. Rabid.

rabic (*rab'-ik*) [*rabies*]. Pertaining to rabies, as *rabic* virus.

rabid (*rab'-id*) [*rabies*]. Affected with rabies or hydrophobia; pertaining to rabies, as *rabid* virus.

rabies (*rab'-e-ēz*) [L.]. Lyssa or hydrophobia. The latter term is generally applied to the human disease consequent upon the bite of a rabid dog or other animal. Rabies is an acute infectious disease of animals dependent upon a specific agent, *Bacillus lyssæ*, and communicable to man by inoculation. All animals are liable to the disease, but it occurs most frequently in the wolf, the cat, and the dog, and is chiefly propagated by the latter, which is specially susceptible. The toxin has a special affinity for the nervous system, and is found in the secretions, particularly in the saliva. See *hydrophobia*. **r., dumb,** rabies in rodents, in which the preliminary and second periods are absent, and the paralytic stage is pronounced from the onset (Osler). **r. canina, r. felina,** rabies in or acquired from the dog or cat respectively. **r., false.** See *r., pseudo*. **r. paralytic.** 1. Of Gamaleia, rabies in which the third stage is the only manifestation of the infection. 2. An acute ascending spinal paralysis due to infection, probably rabietic. **r., pseudo.** 1. A neurotic or hysterical manifestation closely simulating rabies, but of longer duration and amenable to treatment (Osler). 2. A morbid condition resembling rabies induced experimentally in animals, and occurring in dogs infested with the *Strongylus gigas*. **r., street,** Pasteur's term for the rabies of dogs infected naturally. Fr. *rage des rues*. **r. tanacetic,** a morbid condition resembling rabies induced in rabbits by the intravenous injection of oil of tanaectum.

rabietic (*ra-be-et'-ik*) [*rabies*, rage]. Pertaining to affected with, or of the nature of, rabies.

rabific (*ra-bif'-ik*) [*rabies*, rage]. Causing rabies; communicating hydrophobia.

RaBr₂. Radium bromide.

Rabuteau's test for hydrochloric acid in the contents of the stomach (*rab-oo-to'*). Make a solution containing 50 Cc. of starch mucilage, 1 Gm. of potassium iodate, and 0.5 Gm. of potassium iodide; add to it the filtered contents of the stomach. The solution will become blue in the presence of free HCl.

race (*rās*). 1. A genealogic, ethnic, or triba stock; a breed or variety of plants or animals made permanent by constant transmission of its characters through the offspring. 2. A root, especially of ginger. **r.-ginger,** ginger in the race or root. **r. suicide,** artificial prevention of conception.

raceme (*ra-sēm'*) [*racemus*, a cluster of grapes]. In biology, an indeterminate inflorescence having a common peduncle with one-flowered pedicels arranged along its sides. **r., compound,** a raceme in which the pedicels branch and form secondary racemes. **r., false,** a circinate, or scorpioid, eyme.

racemose (*ras'-e-mōs*) [*racemus*, a bunch of grapes]. Resembling a bunch of grapes, as a *racemose* gland. **r. aneurysm,** aneurysm by anastomosis. **r. cells,** clusters of cells arranged around a central duct. **r. varix,** anastomotic varix.

rachi- (*ra-ke-*) [*rhachis*]. A prefix meaning relating to the spine. For words beginning thus, see *rhach-*.

rachitamin (*rak-it'-am-in*). Antirachitic vitamin (D.).

racial (*ra'-se-al*) [origin obscure]. Pertaining or due to one's race.

raclage (*rak-lahzj'*) [Fr.]. The destruction of a soft growth by rubbing, as with a brush or harsh sponge; grattage.

raclement. See *raclage*.

rad. Abbreviation of Latin *radix*, root.

radal (*ra'-dal*). A 20% solution of protargol; used as a prophylactic in gonorrhea.

Radcliffe's elixir (*rad'-klif*). Compound tincture of aloes.

radectomy (*ra-dek'-to-me*) [*radix*, root; ἐκτόμη, excision]. Removal of the root of a tooth, in whole or in part.

rademanit (*rad-e-man'-it*). A radium charcoal preparation possessing a decided radioactivity, used in cancer.

radesyge (*rah-da-sü'-geh*) [Norwegian]. A disease also known as Scandinavian syphilis, or Norwegian leprosy, and characterized by ulceration and other cutaneous lesions.

radiability (*ra-de-ab-il-it'-e*). The property of being radiable.

radiable (*ra'-de-abl*). Capable of being penetrated by the x-rays, or other rays.

radiad (*ra'-de-ad*) [*radius; ad*, toward]. Toward the radial side.

radial (*ra'-de-al*) [*radius*]. 1. Radiating; diverging from a common center. 2. Pertaining to or in relation with the radius or bone of the forearm, as the *radial* artery.

radiale (*ra-de-a'-le*). The scaphoid bone of the carpus.

radialis (*ra-de-a'-lis*) [L.]. Pertaining to the radius. Various arteries, nerves and muscles are so called. See *extensor* and *flexor*, under *muscles, table of*.

radian (*ra'-de-an*). An arc whose length is equal to the radius of the circle of which it is a part.

radiant (*ra'-de-ant*) [*radius*]. 1. Radiate. 2. Emitting rays. r. **energy**, a form of energy emitted by all bodies in proportion to their temperature, and propagated by undulations in the luminiferous ether. When the body reaches 600° C., it begins to radiate light as well as heat. That portion of radiant energy which does not produce the sensation of light is generally spoken of as *radiant heat*, in distinction from *radiant light*. r. **matter**, matter in the ultragaseous state, as in a Crookes tube.

radiate (*ra'-de-āt*) [see *radiation*]. Diverging from a central point.

radiated substance of kidney. The medullary portion of the kidney.

radiatio (*ra-de-a'-she-o*) [L.]. See *radiation*.

radiation (*ra-de-a'-shun*) [*radiare*, to radiate]. 1. The act of radiating or diverging from a central point, as *radiation* of light; divergence from a center, having the appearance of rays. 2. In cerebral anatomy, certain groups of fibers that diverge after leaving their place of origin. r., **acoustic**, a tract of fibers extending from the medial geniculate body to the superior and transverse temporal gyri. r., **cortico-striate**, fibers running between the corpus striatum and the equatorial zone of the cortex. r., **occipitothalamic**, same as *optic radiation*. r., **optic**, a large strand of fibers continuous with those of the corona radiata, derived mainly from the pulvinar, the external and internal geniculate bodies, and the optic tract, and radiating into the occipital lobes. r., **striothalamic**, a system of fibers connecting the corpus striatum with the optic thalamus and the subthalamic region. r., **tegmental**, the radiating fibers of the hind portion of the internal capsule. r., **temporothalamic**, same as *acoustic radiation*. r., **thalamic**, certain tracts of fibers from the optic thalami that radiate into the hemispheres.

radical (*rad'-ik-al*) [*radix*, a root]. 1. Belonging to the root; going to the root, or attacking the cause of a disease; the opposite of conservative. 2. A group of atoms that acts in combination as a simple element, but is incapable of existence in the free state, as NH_4 ammonium, C_6H_5, phenyl. 3. The haptophore group of an antibody. r. **operation**, an operation for a complete cure of a morbid condition.

radices (*ra-di'-sēz*). Plural of *radix*.

radicle (*rad'-ik-l*) [dim. of *radix*]. 1. A little root, as the *radicle* of a nerve, one of the ultimate fibrils of which a nerve is composed; *radicle* of a vein, one of the minute vessels uniting to form a vein. r., **ascending** (*of the fornix*), the anterior crura or fibers, extending upward from the corpora albicantia. r., **descending** (*of the fornix*), the posterior crura or those fibers of the fornix extending from the optic thalami to the corpora albicantia. r., **electronegative**, the nonmetallic constituent of a compound which, in electrolysis, is evolved at the anode. r., **electro-positive**, that constituent of a salt which, in electrolysis, appears at the kathode, and which is either a base or a group of atoms having basic properties. r., **vascular**, vessels uniting to form a larger vessel. r.s., **venous**, the capillaries forming the smallest veins. Syn., *capillaries, venous*. 2. See *radical*.

radicotomy (*rad-ik-ot'-o-me*) [*radix*, root; τόμη, incision]. Same as rhizotomy, *q. v.*

radicula, radicule (*rad-ik'-ū-lah, rad'-ik-ūl*) [*radicula*, little root]. Same as *radicle*.

radiculalgia (*rad-ik-ū-lal'-je-ah*) [*radicula*, a little root; ἄλγος, pain]. Neuralgia affecting the nerve-roots.

radicular (*rad-ik'-ū-lar*). Pertaining to a root or to a radicle; specifically, pertaining to the roots of the spinal nerves. r. **arteries**, arteries which accompany nerve roots into the spinal cord.

radiculectomy (*rad-ik-ū-lek'-to-me*) [*radicula*; ἐκτομή, excision]. Excision of a nerve rootlet; resection of the posterior spinal nerve-roots.

radiculitis (*rad-ik-ū-li'-tis*) [*radicula*; ιτις, inflammation]. Inflammation of a nerve root.

radien (*ra'-de-en*) [*radius*]. Belonging to the radius in itself.

radii (*ra'-de-i*) [Plural of *radius*, a ray]. r. **auriculares**, lines projected on the cranium at right angles to a line passing through the auricular points. r. **ciliares**, the ciliary processes r. **frontis**, wrinkles of the forehead. r. **lentis**, lines radiating from the poles of the crystalline lens. r. **medullares**, bundles of receiving tubules of the kidney, beginning in one tubule at the apices of the papillæ, dividing dichotomously, and extending nearly to the cortical surface.

radio- (*ra-de-o-*) [*radiare*, to emit rays]. 1. A prefix meaning pertaining to radiant energy or to radium. 2. A prefix meaning relating to the radius.

radioactinium (*ra-de-o-ak-tin'-e-um*). A radioactive product of actinium.

radioactive (*ra-de-o-ak'-tiv*) [*radio-; active*]. Exhibiting radiant energy.

radioactivity (*ra-de-o-ak-tiv'-it-e*). A property possessed by certain substances of spontaneously emitting radiations which are capable of penetrating substances which are opaque to ordinary rays of light.

radiobe (*ra'-de-ōb*) [*radius*, a ray; βίος, life]. A peculiar, microscopic, radium formation, thought to be intermediate between a crystal and a living microorganism.

radiobicipital (*ra-de-o-bi-sip'-it-al*) [*radio-; biceps*]. Pertaining to the radius and the biceps.

radiocarpal (*ra-de-o-kar'-pal*) [*radio-; carpus*]. Pertaining to the radius and the carpus.

radiochemistry (*ra'-de-o-kem'-is-tre*). That branch of chemistry which deals with radioactive phenomena.

radiochronometer (*ra-de-o-kro-nom'-et-er*) [*radio-; chronometer*]. An instrument for testing the character of Roentgen-tubes, and the penetrating quality of the x-rays.

radiode (*ra'-de-ōd*) [*radio-*; ὁδός, a way]. An electric attachment for the application of radium.

radiodermatitis (*ra-de-o-der-mat-i'-tis*). See *actinodermatitis*.

radiodiagnosis (*ra-de-o-di-ag-no'-sis*) [*radio-; diagnosis*]. The diagnosis of a lesion by means of radiography or radioscopy.

radiodigital (*ra-de-o-dij'-it-al*) [*radio-; digital*]. 1. Pertaining to the radius and the fingers. 2. Pertaining to the fingers on the radial side of the hand.

radiodontia (*ra-de-o-don'-she-ah*) [*radio-; ὀδούς*, tooth]. Radiography of the teeth and adjacent tissues.

radiodontist (*ra-de-o-don'-tist*) [*radio-*; ὀδούς, tooth]. A specialist in radiography of the teeth and adjacent tissues.

radio-element (*ra'-de-o-el'-em-ent*). An element which possesses radioactivity.

radiogen (*ra'-de-o-jen*). A trade name for certain radioactive products.

radiogram (*ra'-de-o-gram*). See *skiagram*.

radiograph (*ra'-de-o-graf*) [*radio-*; γράφειν, to write]. 1. To obtain a picture by the action of radiant energy upon a sensitive plate. 2. Apparatus for obtaining such a picture. 3. A picture so produced.

radiographer (*ra-de-og'-raf-ur*). One skilled in radiography.

radiography (*ra-de-og'-ra-fe*). See *skiagraphy*.

radiohumeral (*ra-de-o-hū'-mer-al*) [*radio-*; *humerus*]. Pertaining to the radius and the humerus.

radiologist (*ra-de-ol'-o-jist*). Proposed term for a person versed in radiology, and who may, in addition, be skilled in applying the science.

radiology (*ra-de-ol'-o-je*) [*radio-*; λόγος, science]. The science of radiant energy.

radiolucency (*ra-de-o-lū'-sen-se*) [*radio-*; *lucere*, to shine]. State of being radiolucent.

radiolucent (*ra-de-o-lū'-sent*) [*radio-*; *lucere*, to shine]. Transparent to the x-ray; permitting the passage of radiant energy.

radiolus (*ra-di'-o-lus*) [dim. of *radius*, a ray] A probe or sound.

radiometacarpalis (*ra-de-o-met-ak-ar-pa'-lis*) [*radio-*; *metacarpus*]. The flexor carpi radialis brevis when the insertion is at a metacarpal bone.

radiometer (*ra-de-om'-et-er*) [*radio-*; μέτρον, a measure]. An instrument for testing the penetration in radiography; a skiameter.

radiomuscular (*ra-de-o-mus'-ku-lar*) [*radius; muscular*]. Relating to the radius and its muscles. The name of branches of the radial artery distributed to the forearm, and of filaments of the radial nerve going to the same muscles.

radion (*ra'-de-on*). A particle thrown off by a radioactive substance.

radioneuritis (*ra-de-o-nū-ri'-tis*). A form of neuritis observed in persons who have worked for a long time with x-rays.

radiopacity (*ra-de-o-pas'-it-e*). State of being radiopaque.

radiopalmar (*ra-de-o-pal'-mar*) [*radio-*; *palm*]. 1. Pertaining to the radius and the palm. 2. Pertaining to the outer side of the palm.

radiopaque (*ra-de-o-pāk'*) [*radio-*; *opacus*, shaded]. Not transparent to the x-ray; not permitting the passage of radiant energy.

radioparency (*ra-de-o-par'-en-se*). State of being radioparent

radioparent (*ra-de-o-par'-ent*) [*radio-*; *parere*, to appear]. Transparent to the x-ray; permitting the passage of radiant energy.

radiopraxis (*ra-de-o-praks'-is*) [*radio-*; πρᾶξις, action; practice]. The art of applying radiant energy either in therapeutics or for other purposes

radioscopy (*ra-de-os'-ko-pe*) [*radio-*; σκοπεῖν, to view]. The process of securing an image of an object upon a fluorescent screen by means of radiant energy.

radiostereoscopy (*ra-dē-o-ster-e-os'-ko-pe*) [*radius*, ray; στερεός, solid; σκοπεῖν, to view]. The application of the principle of the stereoscope, obtaining a view-point for the left eye and one for the right by lateral displacement of the tube along the plane of the plate, determining this displacement by the formula of Marie and Ribault for the purpose of demonstrating the different planes in which various objects shown by radioscopy are situated.

radiotellurium (*ra-de-o-tel-lū-re-um*). A radioactive product of tellurium; polonium.

radiotherapeutic (*ra-de-o-ther-ap-ū'-tik*) [*radiotherapy*]. Having reference to the therapeutic use of radiant energy.

radiotherapeutics (*ra-de-o-ther-ap-ū'-tiks*). See *radiotherapy*.

radiotherapy (*ra-de-o-ther'-a-pe*). The treatment of disease by means of x-rays, radium, and other radioactive substances.

radiothorium (*ra-de-o-thor'-e-um*). A radioactive substance which is neither radium nor thorium, but has properties like those of thorium.

radiotoxemia (*ra-de-o-toks-e'-me-ah*). Toxemia induced from excessive treatment with any radio-active substance.

radioulnar (*ra-de-o-ul'-nar*) [*radio-*; *ulna*]. Pertaining to the radius and ulna.

radium (*ra'-de-um*) [*radiare*, to emit rays]. An elementary body from pitch-blende, characterized by the phenomenon radioactivity. It is obtained by the fractional reprecipitation or recrystallization of the barium chloride prepared from pitch-blende. See *elements, table of*.

radiumization (*ra-de-um-i-za'-shun*). Exposure to x-rays.

radius (*ra'-de-us*) [L., "a spoke of a wheel"]. 1. A ray. 2. The outer of the two bones of the forearm. **r. fixus**, an imaginary line connecting the inion and the hormion.

radix (*ra'-diks*) [L.: *gen.*, *radicis*; *pl.*, *rad ces*]. A root Any spinal nerve root. **r. arcus vertebræ**, a root or pedicle of the vertebral arch.

radon (*ra'-don*). A radium emanation. See elements, table of.

raffinase (*raf'-in-ās*). The enzyme which decomposes raffinose; it is found in the seed of the cotton plant, in the root of the sugar beet, in certain yeasts, and in barley and wheat during germination.

raffinose (*raf'-in-ōs*), $C_{18}H_{32}O_{16} + 5H_2O$. A trisaccharid derived from beets.

rafle (*ra'-fl*) [Fr.]. A pustular disease of cattle.

Ragazzoni's injection (*rah-gaz-sō-ne*). A solution of mercury iodide and sodium iodide, used hypodermatically in syphilis.

rag-picker's disease. An acute febrile disease occurring in workmen engaged in sorting rags in paper-factories. It is supposed to be due to the inhalation of anthrax bacilli or spores, and is characterized by an exudation into the pulmonary tissue, bronchial glands, and pleural cavity. Syn. *hadernkrankheit*.

rage (*rāj*) [ME.]. 1. Violent passion or anger. 2. Any intensely painful affection. 3. (*rahzj*) [Fr.]. Hydrophobia; rabies.

ragle (*rahgl*) [Fr.]. A hallucination due to isolation and insomnia, observed in French troops while in the desert, in which they imagined they saw prairie and water.

railway sickness. See *car-sickness*. **r. kidney**, a renal affection said to be due to the constant jar of railway journeys. **r.-spine**, a term given by Erichsen to a varied group of spina symptoms consequent on slight injuries or concussions received in railway accidents. The condition is classed with the traumatic neuroses and is a form of neurasthenia. It is frequently a cause for litigation. See *Erichsen's disease*.

Rainey's capsules, corpuscles, or **tubes** (*ra'-ne*) [George *Rainey*, English anatomist, 1801–1884]. See *Miescher's tubes*.

raise (*rāz*) [ME. *rassen*, to raise]. To expectorate.

raised (*rāzd*) [ME., *raisen*, to raise]. Elevated. **r. base** (*for artificial teeth*), a term applied in mechanical dentistry to a metallic base, surmounted by a box or chamber soldered to it, and designed to compensate for the loss of substance which the parts have sustained. A base thus constructed is usually termed by dentists a raised plate.

raising (*ra'-zing*). 1. Expectoration. 2. One of the Swedish movements, either active or passive. It is used for deformities of the back, to relieve constipation, to act upon the abdomen, etc.

raisins (*ra'-zins*). Dried grapes; passu æ. **r., Corinth,** currants.

rake teeth. A term applied to teeth separated by intervals, like those of a rake.

rale (*rahl*) [Fr., *râler*, to rattle]. An adventitious sound heard over the chest during respiration and indicating some local disturbance. Rales are either *dry* or *moist* (produced by the bubbling of air through liquid, *sonorous*) or *sibilant*. They are also classified according to their place of production into *laryngeal, tracheal, bronchial, vesicular, cavernous, pleural, pericardial.* **r., amphoric,** a large, musical, tinkling rale, heard in inspiration and expiration, in tuberculous and abscess cavities; produced by movement of air in a tense-walled cavity containing air and communicating with a bronchus. **r., bubbling, large,** a moist rale, larger than the medium bubbling, heard in inspiration and expiration in bronchitis and pulmonary engorgement; produced by passage of air through frothy mucus in the trachea and larger bronchi. **r., bubbling, medium,** a moist rale larger than the small bubbling, heard in inspiration and expiration in capillary bronchitis, especially in children; produced by the passage of air through mucus in the larger tubes. **r., bubbling, small,** a small, moist rale, sounding like the bursting of small bubbles, heard in inspiration and expiration in capillary bronchitis, especially in children; produced by the passage of air through mucus in the bronchioles. **r., cavernous,** a hollow, metallic rale, heard in inspiration and expiration in the third stage of pulmonary tuberculosis; produced by the passage of air through a small cavity with flaccid walls that collapse with expiration **r., clicking,** a small, sticky rale heard in inspiration in the early stage of pulmonary tuberculosis; caused by passage of air through softening material in the smaller bronchi. **r., consonating,** a bright, clear, ringing rale, heard in inspiration and expiration in tuberculous pneumonia; produced when the bronchial tubes are surrounded by a consolidated tissue. **r., crackling, dry,** a sharp, short, clicking rale, heard in inspiration in the second or softening stage of pulmonary tuberculosis and in pulmonary gangrene; produced by the breaking down of lung tissue. **r., crackling, large,** a dry rale larger than the medium crackling, heard in inspiration and expiration, in pulmonary tuberculosis and pneumonia, after the formation of small cavities; produced by fluid in very small cavities. **r., crackling, medium,** a dry rale, larger than the small crackling, heard chiefly in inspiration, in softening of tuberculous deposit or pneumonic exudation; caused by fluid in the finer bronchi. **r., crackling, small,** a small, dry rale, sounding like the breaking of small shells, heard chiefly in inspiration, in softening of tuberculous deposit or pneumonic exudation; produced by fluid in the finer bronchi. **r., crepitant,** a small rale, sounding like the rubbing of hair between the fingers, heard at the end of inspiration in pneumonia, early stage, edema of the lungs, hypostatic pneumonia; localized in pulmonary tuberculosis. Produced by the passage of air into vesicles, collapsed or containing fibrinous exudation; usually at the base of the lungs. **r. de retour.** Same as *rale redux*. **r., dry,** a large and sonorous, or small and hissing or whistling rale heard in inspiration and expiration in bronchitis and asthma, localized in beginning pulmonary tuberculosis; produced by narrowing of the bronchial tubes from thickening of the mucous lining, from spasmodic contraction of the muscular coat, viscid mucus within, or pressure from without. **r., extrathoracic,** one produced in the trachea or larynx. **r., friction,** a grazing, rubbing, grating, creaking, or crackling rale heard in inspiration and expiration, most distinct at the end of inspiration, in pleurisy and pericarditis; produced by the rubbing together of serous surfaces, roughened by inflammation or deprived of their natural secretion. **r., gurgling,** a moist rale, larger than the large bubbling, sounding like the bursting of large bubbles, heard in inspiration and expiration in pulmonary tuberculosis after the formation of large cavities. **r., guttural,** one produced in the throat. **r., moist,** one produced by the passage of air through bronchi containing fluid. **r., mucous** (of Laennec), a modification of the subcrepitant rale, heard in inspiration and expiration in pulmonary emphysema; produced by viscid bubbles bursting in the bronchial tubes. **r. redux,** return of the crepitant rale heard in the resolution stage of pneumonia; produced by the passage of air through fluid in a bronchial tube. Syn., *rale de retour*. **r., sibilant,** a high-pitched and even hissing or piping rale, heard in inspiration and expiration in bronchitis, asthma, and localized in beginning pulmonary tuberculosis; produced by narrowing of the smaller bronchi from viscid mucus adhering to the walls, from thickening of the lining membrane, or spasmodic contraction. **r., sonorous,** a low-pitched, snoring rale, heard in inspiration and expiration, most frequently in bronchitis and spasmodic asthma; produced by lessened caliber of the larger bronchi, from spasm, tumefaction of mucous lining, or external pressure. **r., subcrepitant,** a small, moist rale heard in inspiration and expiration in capillary bronchitis; produced by the passage of air through mucus in the capillary bronchial tubes. **r., subcrepitant, Hirtz's,** a moist, metallic rale, pathognomonic or tuberculous softening. **r. vesicular.** Same as *r. crepitant*.

Ralfe's test [Charles Henry *Ralfe*, English physician, 1842–1896]. 1. *For acetone in urine:* Boil 4 Cc. of liquor potassæ with 1.5 Gm. of potassium iodide; overlay it with 4 Cc. of urine; a yellow ring studded with specks of iodoform appears at the line of contact. 2. *For peptones in urine:* Place 4 Cc. of Fehling's solution in a test-tube, and overlay it with an equal amount of urine; a rose-colored halo appears above the zone of phosphates.

ramal (*ra'-mal*) [*ramus*, a branch]. Pertaining to a ramus; branching. **ramalis vena,** the portal vein and its branches.

ramaninjana (*ram-an-in-yah'-nah*). A nervous disease of Madagascar.

R. A. M. C. Abbreviation for Royal Army Medical Corps.

Ramdohr's operation (*ram'-dōr*) [C. A. von *Ramdohr*, American surgeon, 1855–1912]. *For enterorrhaphy;* the insertion of the proximal within the distal end of the intestine, and suturing. **R.'s suture,** invagination of the upper portion of the intestine into the lower, followed by suture.

ramenta (*ra-men'-tah*) [L.; *pl., filings, scrapings*]. Shreds, filings, or shavings. **r. ferri,** iron filings. **r. intestinorum,** shreds of intestinal mucus discharged with the evacuations in severe dysentery.

ramex (*ra'-meks*) [*gen., ramicis: pl., ramices*]. A hernia, or hernial or scrotal tumor. **r. varicosus,** variococele.

rami (*ra'-mi*) [L.]. Plural of ramus, *q. v.* **r. accelerantes,** accelerator nerves. **r. alares,** branches of the lateral nasal artery supplying the nasal pinnæ. **r. anteriores nervorum spinalium,** the anterior divisions of the spinal nerves. **r. cardiaci (nervi vagi),** the cardiac branches of the pneumogastric nerve. **r. communicantes noni,** the branch of the descendens noni which join the communicating branches of the second and third cervical nerves. **r. emissaria,** branches of the anterior spinal plexuses which emerge through the intervertebral and anterior sacral foramina. **r. intestinales,** branches of the cerebrospinal nerves supplying the abdominal viscera. **r., ischiopubic,** the descending rami of the ischium and the pubes taken as one. **r. linguales (nervi glossopharyngei),** the terminal branches of the ninth nerve. **r. marginales,** the branches of the palpebral arteries which aid in forming the arcus arteriosus palpebræ. **r. musculares,** unnamed branches of nerves or blood-vessels distributed to the muscles. **r. olfactorii,** the olfactory nerve. **r. pharyngei (nervi vagi),** the branches of the vagus going to the pharynx **r. ventrales,** the branches of the intercostal arteries distributed to the intercostal muscles and to the ribs

ramie (*ram'-e*) [Malay]. See *r. fiber.* **r. fiber,** China-grass. The bast fiber from two varieties of *Boehmeria nivea,* known in India as *Rhea,* and in the Malay Archipelago as *Ramie.* The properly prepared fiber is of fine, silky lustet, soft, and extraordinarily strong. It is the most perfect of all the vegetable fibers, and is composed of pure cellulose.

ramification (*ram-if-ik-a'-shun*) [*ramus; facere,* to make]. 1. The act or state of branching. 2. A branch.

ramify (*ram'-e-fi*) [see *ramification*]. To form branches; to branch.

ramisection (*ram-e-sek-shun*) [*ramus; secare, to cut*]. Resection of some of the rami of the sympathetic nervous system; suggested in treatment of spastic paralysis.

Rammstedt's operation (*rahm'-stet*). Splitting the anterior aspect of the circular muscle of the pylorus by a longitudinal incision, and leaving the mucous membrane untouched; advocated in pyloric stenosis.

ramolescence (*ram-o-les'-ens*) [Fr. *ramollir,* to soften]. A softening; mollification.

ramollissement (*rah-mo-lēs-mon(g)*) [Fr.]. Morbid softening of any tissue or part.

Ramón y Cajal's cells (*rah-mōn'-e-kah-hahl'*). See *Cajal.*

ramose (*ra'-mōs*) [*ramus*]. Having many branches; branching.

ramous (*ra'-mus*). Having many branches; branching.

Ramsden's eye-piece [Jesse *Ramsden,* English optician, 1735–1800]. An eye-piece having two plano-convex lenses, used with a micrometer.

Ramsden's operation (*rams'-den*). *For ligation of the third part of the subclavian artery:* A transverse incision three inches long is made across the base of the posterior triangle of the neck, about one-half inch above the clavicle.

ramulus (*ram'-ū-lus*) [L.; *pl., ramuli*]. A small branch, or ramus.

ramus (*ra'-mus*) [L.; pl., *rami*]. 1. A branch, especially of a vein, artery, or nerve. 2. A slender process of bone projecting like a branch or twig from a large bone, as the ramus of the lower jaw; ascending ramus of the ischium; ascending or horizontal ramus of the pubes. **r. abdominalis,** the hypogastric nerve. **r. acetabuli,** a branch of the internal circumflex artery supplying the hip-joint. **r. anastomoticus,** the branch of an artery by which an anastomosis is established. **r. anterior ascendens, r. anterior nervi acustici.** See *cochlear nerve.* **r. ascendens,** the anterior branch of the fissure of Sylvius. **r. ascendens glabellaris,** the branch of the angular artery going to the inner angle of the orbit. **r. ascendens nervi vagi,** a branch of the superior laryngeal nerve going to the epiglottis. **r. ascendens (inferior) ossis ischii,** the ascending branch of the ischium. **r., ascending** (*of the ischium*), the portion between its tuberosity and the acetabulum. **r. ascending** (*of the pubic bone*), the portion between its body and the acetabulum. **r. auricularis nervi vagi.** See *nerve of Arnold.* **r. bulbocavernosus.** See *artery of the bulb of the urethra.* **r. canalis spinalis,** the branch of the intercostal artery supplying the walls of the spinal canal. **r. cardiacus nervi vagi inferior,** inferior cardiac nerve. **r. cardiacus nervi vagi superior,** superior cardiac nerve. **r. cervicofacialis** (*nervi facialis*), cerviofacial nerve. **r. cochleæ, r. cochlearis,** the cochlear nerve. **r. communicans,** a branch of a spinal nerve connecting it with the sympathetic ganglia. **r. communicans anterior,** anterior communicating artery of the brain. **r. communicans medullæ spinalis,** a branch of a spinal nerve uniting it with the sympathetic. **r. communicans posterior,** the posterior communicating artery of the brain. **r. cruralis,** lumbo-inguinal nerve. **r. cutaneous nervi radialis.** See *radial nerve.* **r. cutaneous palmaris longus.** See *r. palmaris longus nervi medsani.* **r. descendens.** 1. The descendens noni nerve. 2. The inferior division of the inferior maxillary nerve. **r. descendens nervi hypoglossi,** the descendens noni nerve. **r. descendens (superior) ossis ischii,** the descending branch of the ischium. **r. descendens ossis pubis,** the descending branch of the pubic bone. **r., descending** (*of the ischium*), the portion between its body and tuberosity. **r., descending** (*of the pubic bone*), the portion included between its body and its junction with the ischium. **r. dexter arteriæ pulmonalis,** the right pulmonary artery. **r. dorsalis nasi,** the dorsal artery of the nose. **r. dorsalis nervi radialis.** See *radial nerve.* **r. dorsalis nervi ulnaris.** See *ulnar nerve.* **r. dorsalis pollicis radialis,** that part of the radial artery which winds round the outer side of the carpus and

crosses the thumb beneath the extensor tendons. **r. duræ matris vagi,** a branch from the jugular ganglion going to the meninges. **r. externus, r. femoralis,** lumbo-inguinal nerve **r. hepaticus dexter,** the right hepatic artery. **r. hepaticus sinister,** the left hepatic artery. **r., horizontal** (*of the pubic bone*). See *r., ascending* (of the pubic bone). **r. horizontalis fissuræ Sylvii,** the posterior limb of the fissure of Sylvius. **r. horizontalis mandibulæ,** the body of the inferior maxilla. **r. horizontalis (superior) ossis pubis (pectinis),** the horizontal ramus of the pubic bone. **r. of the inferior maxilla,** the portion ascending from the angle, and terminating in the condyle and coronoid process. **r. intermedius.** See *r. anastomoticus.* **r. lingualis recurrens.** See *r. ascendens nervi vagi.* **r. magnus nervi mediani,** the musculocutaneous nerve **r. major nervi maxillaris inferioris,** the greater of the two primary branches of the inferior maxillary nerve. **r. malaris,** the inferior branch of the orbital nerve. **r. marginalis,** the dorsal branch of the radial nerve supplying the thumb. **r. mastoideus.** 1. The small occipital nerve. 2. The occipital branch of the posterior auricular artery. 3. The posterior division of the great auricular nerve. **r. maxillaris, inferior nervi trigemini.** See *inferior maxillary nerve.* **r. maxillaris superior (medius) nervi trigemini.** See *superior maxillary nerve.* **r. medullæ spinalis,** the spinal branch of the intercostal artery supplying the spinal cord. **r. meningeus posterior.** See *r. duræ matris vagi.* **r. minor nervi vidiani,** the great superficial petrosal nerve. **r. muscularis nervi radialis,** the radial nerve. **r. nasalis nervi ophthalmici.** See *nasociliary nerve.* **r. nutriens,** the nutrient artery of a bone. **r. ophthalmicus (quinti),** the ophthalmic nerve. **r. ossis maxillæ inferioris.** See *r. of the inferior maxilla.* **r. ovarii.** See *artery, ovarian.* **r. palmaris longus nervi mediani,** a branch of the median nerve distributed to the integument of palm of the hand. **r. perpendiculares (mandibulæ).** See *r. of inferior maxilla.* **r. posterior.** 1. The iliolumbar artery. 2. The posterior limb of the fissure of Sylvius. **r. primus nervi trigemini (primus quinti).** See *ophthalmic nerve.* **r. profundus nerve radialis.** See *radial nerve.* **r. recurrens vagi,** a branch of the jugular ganglion which goes to the transverse sinus through the jugular foramen. **r. secundus (ganglii Gasserii), r. secundus nervi trigemini (quinti paris),** the superior maxillary nerve. **r. sinister arteriæ pulmonalis,** the left pulmonary artery. **r. sinualis,** the recurrent branch of the ophthalmic nerve going to the tentorium. **r. sublimis (volaris superficialis) arteriæ radialis,** the superficial volar artery. **r. superficialis nervi radialis,** the radial nerve. **r. superior ossis ischii,** the descending ramus of the ischium. **r. superioris nervi trigemini, r. superioris quinti,** the ophthalmic nerve. **r. supraspinatus,** the suprapinous artery. **r. tertius nervi trigemini,** the inferior maxillary nerve. **r. vestibularis,** the vestibular nerve. **r. volaris nervi ulnaris,** the volar distribution of the ulnar nerve.

ramuscule (*ra-mus'-kūl*) [*ramusculus*]. A little branch, especially of the pial arteries.

rancid (*ran'-sid*) [*rancidus*, sour]. Having a rank or musty smell or taste; a term applied to fats and oils that have undergone decomposition with the development of volatile principles.

rancidity (*ran-sid'-it-e*) [*rancid*]. The state of being rancid.

Randia (*ran'-de-ah*) [Isaac *Rand*, an English botanist of the eighteenth century]. A genus of cinchonaceous shrubs. **R. aculeata,** of West India; ink-berry, indigo plant. The juice of the fruit is astringent. **R. dumetorum,** of India; has a poisonous and strongly emetic fruit. **R. longiflora,** of Bengal; the cortex is used in intermittent fever.

Randolph's test for peptones in urine [Nathaniel Archer *Randolph*, American physician, 1858–1887]. To 5 Cc. of faintly acid urine add 2 drops of saturated solution of potassium iodide and 3 or 4 drops of Millon's reagent; a yellow precipitate indicates the presence of peptones.

range (*rānj*) [Fr., *ranger*, to dispose]. Scope; extent. **r. of accommodation.** See *accommodation, range of relative.*

ranine (*ra'-nin*) [*rana*, a frog]. 1. Pertaining to a frog. 2. Pertaining to a ranula or to the region in which a ranula occurs, as *ranine* artery. **r. tumor,** ranula.

Ranke's angle (*ran'-keh*) [Hans Randolph *Ranke*, Dutch anatomist, 1849–1887]. The angle between the horizontal plane of the head and a line from the center of the alveolar border to the center of the frontonasal suture.

Ransohoff's operation (*ran'-so-hof*) [Joseph *Ransohoff*, American surgeon, 1853–1921]. Discission of the pulmonary pleura, employed as a substitute for decortication.

ranula (*ran'-ū-lah*) [*rana*, a frog]. A cystic tumor beneath the tongue, due to the occlusion of the duct of the sublingual or submaxillary gland, or of a mucous gland of the floor of the mouth. Syn., *frog-tongue.* **r. apidea,** salivary calculi. **r. pancreatica,** a dilated saccular condition of the larger pancreatic ducts due to calculous obstruction. **r., suprahyoid,** a cystic tumor situated above the hyoid bone.

ranular (*ran'-ū-lar*). Pertaining to a ranula.

ranunculaceous (*ra-nung-kū-la'-se-us*) [*ranunculus*, a medicinal plant]. Noting or relating to plants of the order *Ranunculaceæ.*

ranunculus (*ra-nung'-kū-lus*) [L.]. A genus of acrid herbs. Many of the species are poisonous and have been used as a counterirritants and vesicants. *R. acris* is very irritant and causes erythema æstivum.

Ranvier's accessory plexus (*ron(g)-ve-a*) [Louis Antoine *Ranvier*, French histologist, 1835–1922]. The superficial stroma plexus of the cornea. **R.'s cells,** connective-tissue corpuscles occurring in tendon. **R.'s crosses,** black, crucial figures seen at Ranvier's nodes on staining with silver nitrate. The transverse branch of the cross is represented by the line of constriction, and the longitudinal branch by the axis-cylinder. **R.'s membrane,** a thin layer separating the dermis from the epidermis. **R.'s nodes,** annular constrictions of the neurilemma, with discontinuity of the medullary sheath of the nerve-fiber. **R.'s tactile discs,** nerve-endings consisting of small, cup-shaped bodies, the concave side of which is directed toward the free surface of the epidermis.

rape (*rāp*) [*rapere*, to seize] Sexual intercourse with a woman without her free consent. **r.-seed,** the seed of wild turnip, *Brassica competris.*

raphania (*raf-a'-ne-ah*) [βαφανίς, radish.] A nervous affection attended with spasmodic dis-

order of the joints and the limbs. It has been attributed to a poisonous principle in the seeds of the wild radish, which become mixed with grain. The affection is allied to ergotism and pellagra.

raphe (*raf'-a*) [*βαφή*, a seam]. A seam or ridge, especially one indicating the line of junction of two symmetrical halves. **r. of the ampulla,** longitudinal ridge on the roof of the ampulla of the semicircular canal. **r. exterior,** the stria longitudinalis medialis. **r. inferior corporis callosi,** the raphe on the inferior surface of the corpus callosum. **r. palati duri.** Same as *r. palatine*. **r., palatine,** the narrow ridge of mucosa in the mesial line of the palate. **r. of the penis,** a continuation of the raphe of the scrotum upon the penis. **r., perineal,** the ridge of skin in the middle line of the perineum. **r. of the pharynx,** a fibrous band in the median line of the posterior wall of the pharynx. **r. of the pons,** the intersection of the fibers at the meson as seen in transection. **r. postoblongata,** the posterior median fissure of the medulla oblongata. **r. of the scrotum,** a median ridge dividing the scrotum into two lateral halves; it is continuous posteriorly, with the raphe of the perineum, anteriorly with the raphe of the penis. **r. Stilling's,** a narrow band connecting the pyramids of the oblongata. **r. superior corporis callosi,** the longitudinal raphe in the middle of the superior surface of the corpus callosum. **r. of the tongue,** a median furrow on the dorsal surface of the tongue corresponding to the fibrous septum which divides it into symmetrical halves.

raphidiospore (*ra-fid'-e-o-spōr*). See *exotospore*.

raptus (*rap'-tus*) [*rapere*, to seize]. Any sudden attack or seizure; rape. **r. hæmorrhagicus,** a sudden hemorrhage. **r. maniacus,** transient frenzy. **r. melancholicus,** sudden and vehement melancholy. **r. nervorum,** cramp or spasm.

rarefaction (*rār-e-fak'-shun*) [*rarus*, thin; rare; *facere*, to make]. The act of rarefying or of decreasing the density of a substance, especially the air. **r. of bone,** the process of rendering bone more porous.

rarefy (*rār'-e-fi*) [see *rarefaction*]. To make less dense or more porous.

rarefying osteitis. See *osteoporosis*.

raritas (*rār'-it-as*) [L.]. Rarity. **r. dentium,** fewness of teeth; less than the usual number of teeth, with or without interspaces between them.

rasceta (*ras-e'-tah*) [L.]. The transverse lines or creases on the palmar surface of the wrist.

Rasch's sign [Hermann *Rasch*, German obstetrician, 1873–]. Fluctuation obtained by applying two fingers of the right hand to the cervix, as in ballottement, and steadying the uterus through the abdomen with the left hand. It depends upon the presence of the liquor amnii, and is an early sign of pregnancy.

rash [OF., *rasche*, from *radere*, to scrape]. A superficial eruption of the skin or mucous membrane. **r., amygdalotomy,** one that generally appears on the neck, chest, or abdomen two or three days after an operation on hypertrophied tonsils. **r., caterpillar-,** a localized eruption attributed to the irritant action of the hairs of certain caterpillars. **r., drug-,** one produced by drugs. **r., medicinal.** See *r., drug-*. **r., mulberry-,** an eruption resembling an exanthem of measles, sometimes occurring in typhus. **r., nettle-.** See *nettlerash*. **r., rose-.** See *roseola*. **r., scarlet.** See *scarlatina*. **r., tonsillotomy.** See *r., amygdalotomy*. **r., tooth-,** any rash attributed to dentition.

rasion (*ra'-zjun*) [*radere*, to scrape]. The scraping of drugs with a file.

Rasmussen's aneurysm (*ras'-mus-en*) [Fritz Waldemar *Rasmussen*, Danish physician, 1834–1881]. Dilatation of an artery in a tuberculous cavity; its rupture is a frequent cause of hemorrhage. **R.'s test for urobilin,** shake together thoroughly equal parts of urine and ether to which has been added 6 or 7 drops of tincture of iodine. Allow it to stand until the solution separates into an upper layer of ether and iodine and a lower one of urine. In the presence of bile the lower layer turns green if biliverdin also exists.

Rasorian (*ra-zo'-re-an*) [Giovanni *Rasori*, Italian physician]. Following the teachings of Rasori; contrastimulant. **R. method,** in phlebotomy, repeated bleeding.

Rasorianism, Rasorism (*ra-zo'-re-an-izm, ra-zo'-rizm*) [Giovanni *Rasori*, Italian physician]. The doctrine of Rasori; contrastimulism.

Raspail's reaction for albumins. These are colored red by sugar and concentrated sulphuric acid. **R.'s sedative water,** a lotion containing camphor and ammonia.

raspatory (*ras'-pa-to-re*) [*raspatorium*, from *adere*, to scrape]. A rasp or file for trimming the rough surfaces of bones or for removing the periosteum.

raspberry (*raz'-ber-e*). The fruit of *Rubus idæus*, a plant of the order *Rosaceæ*. A syrup is used as a vehicle and as a drink in fevers.

rasura (*ra-sū'-rah*) [L.]. 1. The process of rasping, shaving, or scraping. 2. Scrapings; filings.

rat [ME., *ratte*, rat]. A rodent of the family *muridæ*. **r.-tail sutures,** fibers from the rat's tail, used instead of silk or gut, for surgical sutures. **r.-tooth forceps.** See *forceps*.

ratafia (*rat-a-fe'-ah*) [Malay, *arag*, arrack; *tafia*, a spirit distilled from molasses] A name for various liqueurs, or aromatized and sweetened cordials.

ratany, ratanhia (*rat'-an-e, rat-an'-he-ah*) See *krameria*.

Rathke's duct (*rath'-keh*) [Martin Heinrich *Rathke*, German anatomist, 1793–1860]. That portion of Mueller's duct which intervenes between the latter and the sinus pocularis; it may persist after birth as a patulous duct. **R.'s folds,** two projecting folds of the fetal mesoderm which are placed between the orifice of the intestine and the allantois and unite in the median line to form Douglas' septum. **R.'s glands.** See *Jacobson's organ*. **R., investing mass of,** the membranous capsule covering the end of the chorda dorsalis in the developing embryo and forming the rudiment of the base of the skull. It molds itself on the cerebral vesicles, so as to constitute the membrane in which the vault of the skull is developed. The membranous capsule at the base of the skull presents two thickenings, the lateral trabeculæ of Rathke, directed forward and enclosing the pituitary opening. **R., lateral trabeculæ of.** See *R., investing mass of*. **R.'s pouch** in the embryo, the diverticulum of the pharyngeal membrane which is connected with the midbrain, and ultimately forms the anterior lobe of the hypophysis.

raticide (*rat'-is-id*) [*rat; cædere*, to kill]. A rat poison.

ratio (*ra'-she-o*) [L.]. 1. The mind or reasoning faculties. 2. In chemistry and pharmacy, the proportion of ingredients or of atomic composition. r. **medendi**, the theory or scheme of a course of medical treatment. r., **ocular micrometer**, the number obtained by finding the number of divisions on the ocular micrometer required to include the image of an entire millimeter of the stage micrometer.

ration (*ra'-shun*) [*ratio*, proportion]. The daily allowance of food or drink. r., **emergency**, one with high force-value and with sufficient available nitrogen for the needs of hard labor, prepared in compact form and designed for occasions when the use of the regular ration is impracticable.

rational (*rash'-un-al*) [*ratio*, reason]. Based upon reason; reasonable. In therapeutics, opposed to empirical. r. **formula**, a chemical formula which shows, either partly or completely, the constitution of a compound. r. **symptoms**, the symptoms elicited by questioning the patient, as opposed to those ascertained by physical examination.

ratsbane (*rats'-bān*). 1. Arsenic trioxide. 2. A name given to any rat-poison containing arsenic.

rattle (*rat'-l*). A rale. r., **death-**, a gurgling sound observed in dying persons, due to the passage of the air through mucus in the trachea.

Rau's process (*row*) [Johannes Jacobus *Rau*, Dutch anatomist, 1668–1719]. The longer process at the junction of the handle with the neck of the malleus. It is also called the *Folian process*.

Rauber's layer (*row'-ber*) [August Antinous *Rauber*, German anatomist, 1845–]. A superficial stratum of flat cells occurring in the center of the embryonal spot at an early stage in the development of the blastodermic membranes.

raucedo (*raw-se'-do*) [*raucus*, hoarse]. Hoarseness arising from inflammation of the mucosa of the larynx and throat. r. **catarrhalis**, hoarseness resulting from laryngitis. r. **potatorum**, hoarseness caused by drinking whisky or other distilled liquors. r. **syphilitica**, chronic hoarseness due to secondary syphilitic affections of the larynx.

Rauchfuss's triangle (*rowk'-foos*) [Charles Andreyevich *Rauchfuss*, Russian physician, 1835–1915]. Same as *Grocco's triangle*.

raucitas (*raw'-sit-as*). See *raucedo*.

rauschbrand (*rowsh'-brant*). The German name for black-leg.

Ravius's process (*ra'-ve-us*). Rau's process, *q. v.*

Ravogli's liniment (*ra-vōl'-ye*). A liniment containing phenol 1, glycerin 2, 90 % alcohol 16, and rose water to 32 parts; used in diseases of the skin.

ray (*rā*) [*radius*, a ray]. 1. A beam of light or heat; one of the component elements of light or heat. 2. One of a number of lines diverging from a common center. r.s, **actinic**. See *r s, chemical*. r.s, **alpha-**, rays discovered by Rutherford, emanating from uranium, thorium, and radium, and differing from kathode rays in having much less penetrating power and in not being deviated ordinarily either by a magnet or an electrically charged body. r.s, **Becquerel**, invisible radiations of electrified particles or ions projected from radioactive bodies, such as uranium, radium, polonium, or their salts, without evident cause, and persisting over long periods. r.s, **beta-**, Rutherford's name for the kathode rays emitted by radioactive substances. They differ from the alpha-rays in greater penetrating power, weaker electric power, and in carrying a negative charge. r.s, **chemical**, solar rays that produce chemical change; see *phototherapy*. r.s., **diakathodic**, bluish rays obtained by directing the ordinary kathode rays upon a piece of wire gauze or upon a spiral of wire which is itself negatively electrified. They are not directly affected by a magnet. r.-**fungus**. See *actinomyces*. r.s., **gamma-**, non-charged, hard x-rays; a type of Becquerel rays more highly penetrating than the alpha-rays and beta-rays, but insignificant in energy compared with them. r.s., **Goldstein**, kathode rays altered by being passed through a perforated metallic plate. r.s., **hard**, Roentgen rays from a tube sufficiently exhausted to cause considerable difference in the potential between the kathode and anode and in the velocity of the kathode rays. They have high penetrating powers. Cf. *r.s, soft*. r.s, **Hertzian**, radiant energy having the greatest wave length of any yet discovered in the spectrum, supposed to be several miles in length. These rays have the peculiar property of converting poor electric contacts into good ones when they fall upon them. r.s, **kathode**, the stream of negatively electrified particles emanating from the kathode of a Crookes tube and passing in straight lines regardless of the anode. They are capable of deflection with a magnet and produce fluorescence and heat wherever they impinge. r.s, **Lenard**, cathode rays outside the vacuum tube as described by Philipp Lenard (1894) and secured by him by means of an aluminum window. r., **medullary, of the kidney**, any one of the bundles of tubules that are the continuation into the cortex of the malpighian pyramids. r.s, **N-**, a form of ether-waves discovered by Blondlot (1903) and named after the initial letter of Nancy, in the university of which his researches were conducted. They increase the brightness of an electric spark or the luminosity of phosphorescent bodies; they are emitted by the Roentgen-ray tube, by an Auer-Welsbach incandescent gas-mantle, by the ordinary gas-flame, but not by a Bunsen burner; the sun emits these in abundance, as does the Nernst lamp. Compression, torsion, and strain of many solids will cause the emission of the rays; living bodies, plants, and animals emit them. r.s, **Niewenglowski's**, certain luminous rays emitted from phosphorescent substances which may pass through opaque screens and affect sensitive plates. Niewengloski was probably the first to establish the existence of such rays. r.s. **photographic**. See *r.s, ultraviolet*. r.s, **positive**, See *r.s, Goldstein*. r.s, **Roentgen-**, the ether-rays or waves discovered by Roentgen, and named by him x-rays. A vacuum-tube of glass (called a *Geissler tube*, a *Hittorf*, a *Crookes*, or *Coolidge, tube*) is used with two wires sealed through the glass. These wires are connected with the two poles of a battery, and Roentgen found that the rays from the kathode (*kathode rays*) had peculiar penetrative powers through matter opaque to other ether-rays, and that by means of these rays photographs ("*shadowgrams*") may be taken of bones, metallic substances, etc., situated in the tissues; they readily traverse living tissues and influence the nutrition of the deeper ones; they have no appreciable effect on the vitality of bacteria, but are effective in certain diseases. Hertz,

and especially Lenard, prior to Roentgen, had discovered this penetrating power of the kathode rays, but failed to make the application suggested by Roentgen. **r.s, of Sagnac,** secondary rays emanating from metals on which Roentgen rays fall and distinguish from the primary rays irregularly refracted by difference in character, not being nearly so penetrating; the lighter the metal struck by the primary rays, the more penetrating the secondary rays. **r.s, soft,** rays coming from a tube the pressure in which is fairly low; they are readily absorbed. Cf. *r.s, hard.* **r.s, ultraviolet,** waves of the luminiferous ether which do not affect the retina. They can be reflected, refracted, and polarized; they will not traverse many bodies that are pervious to the rays of the visible spectrum; they produce photographic and photochemical effects, and destroy rapidly the vitality of bacteria. Syn., *actinic rays; photographic rays.* **r.s, uranium.** See *r.s, Becquerel.* **r.s, X-.** See *r.s, Roentgen.*

Ray's mania. Moral insanity, regarded by Ray as a distinct form of mental disorder.

rayage (*ra'-ej*). The dosage of rays.

Raygat's test of live birth (*ra'-gat*). Place the lungs in water and note their specific gravity. If inflation has occurred they will float. Also called *hydrostatic test.*

Raynaud's disease (*ra-nō'*) [A. G. Maurice *Raynaud,* French physician, 1834–1881]. 1. A trophoneurosis characterized by three grades of intensity: (*a*) Local syncope, observed most frequently in the extremities, and producing the condition known as dead fingers or dead toes. (*b*) Local asphyxia, which usually follows local syncope, but may develop independently. The fingers, toes, and ears are the parts usually affected. In the most extreme degree the parts are swollen, stiff, and livid, and the capillary circulation is almost stagnant. (*c*) Local or symmetrical gangrene. Small areas of necrosis appear on the pads of the fingers and of the toes, also at the edges of the ears and tip of the nose. Occasionally symmetrical patches are seen on the limbs or trunk, and in severe cases terminate in extensive gangrene. Some cases are attended by hemoglobinuria. 2. Paralysis of the muscles of the throat following parotitis. **R.'s gangrene.** See *R.'s disease* (1). **R.'s phenomenon,** a white and cold condition of the fingers, alternating with burning heat and redness, occurring in Raynaud's disease (*q. v.*), and showing vasomotor disturbance.

Rb. Chemical symbol of *rubidium.*

R. C. P. Abbreviation for *Royal College of Physicians.*

R. C. S. Abbr. for *Royal College of Surgeons.*

R. D. Abbreviation for *reaction of degeneration.*

R. D. A. Abbreviation denoting the *right dorsoanterior* position of the fetus.

R. D. P. Abbreviation denoting the *right dorsoposterior* position of the fetus.

R. E. Abbreviation for *right eye.*

Re. Chemical symbol of Rhenium.

Ré. Abbrevation for *Réaumur,* or the degree of Réaumur's thermometer scale.

re-. A Latin prefix signifying back or again.

reabsorption (*re-ab-sorp'-shun*). See *resorption.*

reaching (*rēch'-ing*) [ME., *rechen,* to reach]. To attempt to vomit; to retch.

reacquired (*re-ak-wīrd'*) [*re,* again; *acquirere,* to acquire]. Acquired a second time. **r. movements.** See *acquired movements.*

reaction (*re-ak'-shun*) [*re,* again; *agere,* to act]. 1. Counteraction; opposite action; interaction. 2. The response of an organ or part to a stimulus. 3. In chemistry—(*a*) the process whereby original chemical substances are changed into others; (*b*) the response to a certain test, as *acid reaction, alkaline reaction,* responding to the test for acid and alkali respectively. **r., addition,** the direct union of two or more molecules to form a new molecule. **r., amphigenous, r., amphoteric,** a double reaction occurring occasionally in the urine, owing to the presence of substances by which the liquid responds to both the acid and alkaline tests. **r., chameleon,** the peculiar change of color observed in cultures of *Pseudomonas pyocyanea,* from green to brown and back again. **r., chemical.** See *reaction* (3). **r., clump,** the agglutination of bacteria or of leukocytes as the result of the action of certain enzymes, lysins, or toxins. **r., consensual,** reaction which is independent of the will. **r. of degeneration,** the reaction obtained when an electric stimulus is applied to a muscle deprived of its trophic nerve influence. It is characterized by the following conditions: diminution or abolition of the excitability of the muscles for the faradic current, with a temporary increase in excitability for the galvanic current. In the nerves there is a diminution or abolition of both faradic and galvanic excitability. The reactions of the muscle to the galvanic current (the true reaction of degeneration) may be formulated as follows:

AnClC < KaClC
AnOC > KaOC } Muscle normal.

AnClC = KaClC
AnOC = KaOC } Muscle in first stage of degeneration.

AnClC > KaClC
AnOC < KaOC } Muscle in more advanced stage of degeneration.

AnClC = anodal closing contraction; AnOC = anodal opening contraction; KaClC = kathodal closing contraction; KaOC = kathodal opening contraction.

See *Pflueger's law of contraction.* **r., electric,** a response in a muscle or a part produced by electric stimulation. **r. of exhaustion,** a variety of reaction to electric excitation seen in states of exhaustion, in which a certain reaction produced by a given current-strength cannot be reproduced without an increase of current-strength. **r., Franklinic, of degeneration** a rare form of reaction of degeneration produced by static electricity and similar to that obtained by the faradic current. **r., hemianopic pupillary,** of Wernicke, a reaction obtained in some cases of hemianopia in which a pencil of light thrown on the blind side of the retina gives rise to no movement in the iris, but thrown upon the normal side, produces contraction of the iris. It indicates that the lesion producing the hemianopia is situated at or anterior to the geniculate bodies. **r., mixed,** a reaction normal in the nerve and altered in the muscle. It is called by Erb the middle form of degenerative reaction. **r., myasthenic,** that in which the normal tetanic contraction of a muscle under faradic stimulation becomes less intense and of shorter duration with every consecutive stimulus and finally ceases, the muscle being exhausted. Syn., *Faradic exhaustibility.* **r., myotonic,** a reaction seen in Thomsen's disease, in which there is quantitative increase in the faradic excitability. See *Erb's waves.* **r., neurotonic,** in electrotherapy, a tonic persist-

ence of contraction, after the current has been broken, upon galvanic and faradic stimulation of the nerve alone, in contradistinction to the myotonic persistency that follows faradic stimulation of the muscle. **r., neutral,** a reaction indicating the absence of both acid and alkaline properties. **r.-period,** the period following a trauma or operation in which there is recovery from the incident shock. **r.-time,** the interval between the application of a stimulus and the beginning of the corresponding motor act. **r., thread,** a peculiar reaction, consisting in the formation of long interlacing threads, produced in certain bacteria, *Bacillus coli communis, Bacillus proteus,* etc., when brought in contact with blood-serum, especially that of the individual from whom the bacteria were obtained.

reactivate (*re-ak'-tiv-āt*). To render active again, as by the addition of fresh normal serum to an immune serum which has lost its activity.

reactivation (*re-ak-tiv-a'-shun*). The rendering active again a serum which has become inactivated; it is accomplished by the addition of complement.

reader's cramp. A spasm of the ocular muscles following prolonged reading.

readjustment (*re-ad-just'-ment*). See *advancement.*

reagent (*re-a'-jent*) [*re,* again; *agere,* to act]. In chemistry, anything used to produce a reaction; a test. **r., general,** a reagent that indicates the group of substances to which a body belongs, without determining which one of the group it is. **r., special,** a reagent which indicates the presence of an individual substance, and not only the group of which it is a member.

reagin (*re'-a-jin*). An antibody, *q. v.*

real focus. See *focus* (2). **r. image.** See *image, real.*

realgar (*re-al'-gar*) [Ar., *rahj al-ghar,* powder of the urine]. Arsenic disulphide, As_2S_2.

reamer (*re'-mer*) [ME., *remen,* to widen]. An instrument for gouging out holes.

reamputation (*re-am-pū-ta'-shun*) [*re-; amputation*]. An amputation upon a member on which the operation has been performed before.

reanimate (*re-an'-im-āt*) [*re,* again; *animare,* to animate]. To revive; to resuscitate; to restore to life, as a person apparently dead.

Réaumur's thermometer (*ra-o-mūr'*) [René Antoine Ferchault de *Réaumur,* French physicist, 1683–1757]. See *thermometer, Réaumur.*

recalcification (*re-kal-si-fi-ka'-shun*) [*re,* again; *calx,* lime; *facere,* to make]. The restoring to the tissues of the lime salts which they have lost.

Récamier's operation (*ra-kam-e-a'*) [Joseph Claude Anselme *Récamier,* French gynecologist, 1774–1852]. Curettage of the uterus.

receiver (*re-se'-ver*) [*recipire,* to receive]. 1. The vessel receiving the products of distillation. 2. In an air-pump, the jar in which the vacuum is produced.

receptacula (*re-sep-tak'-ū-la*). Plural of Latin *receptaculum, q. v.* **r. duræ matris,** the sinuses of the dura. **r. lactis,** the ampullæ of the galactophorous ducts.

receptacular (*re-sep-tak'-ū-lar*) [*receptaculum,* a receptacle]. Pertaining to a receptaculum.

receptaculum (*re-sep-tak'-ū-lum*) [L., "a receptacle"]. A receptacle. **r. chyli,** the sac-like beginning of the thoracic duct opposite the last dorsal vertebra. **r. Cotunni,** a triangular space near the middle of the posterior surface of the petrous portion of the temporal bone, at the termination of the aqueductus vestibuli. It is formed by the separation of the laminæ of the dura mater. **r. Pecqueti,** same as *r. chyli.* **r. seminis,** see *cistern, seminal.*

receptive (*re-sep'-tiv*) [*recipere,* to receive]. Having the quality of or capacity for receiving. **r. centers.** In physiology and psycho-physics, nerve-centers to which influences arrive that may excite sensations or some kind of activity not associated with consciousness.

receptor (*re-sep'-tor*) [*recipere,* to receive]. 1. A name given by Ehrlich to the atomic lateral chain or haptophorous group, which, existing in each cell in addition to its nucleus, combines with intermediary bodies such as toxins, food molecules, foreign substances. 2. Peripheral nerve endings in the skin and special sense organs. **r., free,** an antibody. **r. of the first order,** one with a single anchoring or haptophore group. **r. of the second order,** one containing a haptophore and a functional, fermentive, or zymophore group. **r. of the third order** one possessing two haptophore and a zymophore group.

recess, recessus (*re-ses', re-ses'-sus*) [*recessus,* a recess]. A fossa, ventricle, or ampulla; an anatomical depression. **r. acetabuli,** the cotyloid cavity. **r., ampullar,** the ampulla of the semicircular canal of the inner ear. **r. auditory,** a depression of the ectoderm on each side of the cephalic extremity of the embryo, constituting the first foreshadowing of the internal ear. It is the precursor of the auditory vesicle. **r. aulæ.** See *r., aulic.* **r. aulic,** Bergmann's name for a triangular recess between the columns of the fornix immediately dorsad of the anterior commissure. Syn., *r., triangular; recessus aulæ; foveola triangularis serrata.* **r. chiasmal,** a pit in front of the infundibulum bounded by the optic chiasm and the cinereous lamina. **r. chiasmatica.** See *lamina cinerea.* **r. cochlear,** an elliptic pit below the oval window of the vestibule, forming part of the cochlea. **r. cochlearis,** a shallow depression between the diverging portions of the crista vestibuli. **r. conarii,** the cavity at the base of the pineal body, situated between the supracommissure and postcommissure. **r., duodenojejunal,** a pouch of the mesentery on the right side of the jejunum and near its union with the duodenum. Syn., *duodenojejunal fossa.* **r. ellipticus.** See *fovea hemiellıptica.* **r., epiphyseal,** the preferred name for pineal recess. **r., epitympanic,** synonym of *attic.* **r. hemiellipticus.** See *fovea hemiellıptica.* **r. hemisphæricus,** a tiny perforated cavity in the inner wall of the vestibule, anterior to the crista vestibuli; it transmits the branches of the auditory nerve. **r. hepaticorenal,** that formed by the hepaticocolic ligament. **r ileocecal,** the ileocecal fossa. **r. incisive,** a depression on the nasal septum immediately above the anterior palatine canal. **r. infrapineal.** See *recessus conarii.* **r. infundibuliform.** See *fossa of Rosenmueller.* **r. intercruralis,** the interpeduncular space. **r. jugular,** see *jugular fossa.* **r. labyrinthi,** a cavity formed in the base of the fetal skull, developing into the primitive auditory vesicle, and finally into the internal ear. **r., laryngopharyngeal,** the lower pyramidal part of the pharynx from which the esophagus and larynx open. **r. lateral,** the lateral extension of the fourth ventricle in the angle between the cerebellum and the oblongata. **r. naso-palatinus,** the nasal

orifice of the naso-palatine canal **r. occipitalis,** the posterior horn of the lateral ventricle. **r. opticus,** the conical depression at the beginning of each optic nerve where it leaves the chiasma, the remnant of the cavity of the stalk of the aptic vesicle (Wilder). See *lamina cinerea.* **r., palatal.** See *fossa, supratonsillar.* **r. peritonæi,** the pocket-like processes formed by the peritoneum. **r. pharyngeus,** a pouch-like process of the mucosa of the pharynx situated below the opening of the Eustachian tube; Rosenmueller's fossa. **r. pineal.** See *recessus conarii.* **r., postpontile,** the foramen cæcum of the brain. **r. sacci lachrymalis,** an inconstant anterior pouch of the lacrimal sac. **r., salpingopharyngeal,** an inconstant pharyngeal diverticulum adjacent to the pharyngeal opening of the Eustachian tube. **r. sphæricus.** See *fovea hemisphærica.* **r. spheno-ethmoidalis,** a small depression or groove between the sphenoid bone and the superior turbinated bones. **r., Stensonian.** See *r., incisive* **r. subsigmoid,** the pouch made in the peritoneum by the mesentericomesocolic ligament. **r. sulciform.** See *fossa, sulciform.* **r. superior sacci omenti,** the cavity of the lesser omentum. **r. suprapinealis,** a space between the habenal commissures and the post-commissure **r. tecti,** a space beneath the valvula and velum of the cerebellum. **r., triangular.** See *r., aulic.* **r. utriculi,** a recess at the upper part of the utricle of the inner ear. **r. venosus.** See *fossa, Landzert's.* **r. vesicæ urinariæ,** the lower portion of the urinary bladder.

recession (*re-sesh'-un*) [*recedere,* to recede]. The gradual withdrawal of a part from its normal position, as the recession of the gums from the necks of the teeth.

recessive character (*re-ses'-iv*). In biology, an inherited character which remains undeveloped when mated with a dominant character.

recessus (*re-ses'-us*). See *recess.*

recidivation (*re-sid-iv-a'-shun*) [*recidivus,* a falling back]. The relapsing of a disease. In criminology, a relapsing into crime.

recidivist (*re-sid'-iv-ist*) [*recidivus,* falling back]. 1. A patient who returns to a hospital for treatment, especially an insane person who so returns. 2. In criminology, a confirmed or relapsed criminal; (*a*) one who for the most part has no mental or bodily signs of degeneration, caused by bad bringing up, society, poverty, sexual disorders, and who makes crime a trade or a vengeance; (*b*) one with inborn criminal inclinations and a positive tendency to insanity or epilepsy; and (*c*) one whose antecedents and environment lead him to crime by blunting his sense of honor and morality. The latter classes are inclined to coarseness, boldness, resistance, and wilful spoiling of their clothes; but are not legally regarded as insane.

recidivity (*re-sid-iv'-it-e*) [*recidivus,* a falling back]. Tendency to return or to relapse.

recipe (*res'-ip-e*). 1. The imperative of *recipere,* used as the heading of a physician's prescription, and signifying take. Symbol ℞. 2. Also the prescription itself.

recipiomotor (*re-sip-e-o-mo'-tor*) [*recipere,* to receive; *motor*] Receiving motor impulses.

reciprocal (*re-sip'-ro-kal*) [*recipere,* to receive]. In psychology, applied to those instances in which there is both agency and percipience at each end of the telepathic chain. **r. proportions, law of,** two elements combining with a third do so in proportions that are simple multiples or simple fractions of those in which they combine with each other. **r. reception,** a mode of articulation in which the articular surface is convex on one side and concave on the other.

Recklinghausen's canals (*rek'-ling-how-sen*) [Friedrich Daniel von *Recklinghausen,* German pathologist, 1833–1910]. Minute channels supposed to exist in all connective tissue, which are directly continuous with the lymphatic vessels, and hence may be said to form their origin. **R.'s disease.** 1. Neuro-fibromatosis. 2. Hemachromatosis; an affection characterized by bronzing of the skin, hypertrophic cirrhosis of the liver, enlargement of the spleen, and, in later stages, diabetes from pancreatic sclerosis.

reclinatio (*rek-lin-a'-she-o*). See *reclination.* **r. palpebrarum,** ectropion.

reclination (*rek-lin-a'-shun*) [*reclinare,* to recline]. An old operation for cataract, called also "couching," in which the lens was pushed back into the vitreous chamber.

Reclus' disease (*rek-loo'*) [Paul *Reclus,* French surgeon, 1847–1914]. Cystic disease of the mammary gland; chronic cystic or interstitial mastitis. **R.'s method,** producing local anesthesia by injection of cocaine.

recoil-atom. See *rest-atom.*

recomposition (*re-kom-po-zish'-un*) [*recomponere,* to reunite]. Reunion of parts or constituents after temporary dissolution.

recompression (*re-kom-presh'-un*). Subjection again to the action of compressed air; said of persons working in air under high pressure.

reconstituent (*re-kon-stit'-ū-ent*) [*re-; constituere,* to constitute]. A medicine which promotes continuous repair of tissue-waste or makes compensation for its loss.

reconstitution (*re-kon-stit-ū'-shun*) [*re,* again; *constituere,* to constitute]. Continuous repair of decaying tissue, or restoration to compensate loss by tissue-waste.

recrement (*rek'-re-ment*) [*recrementum,* from *re,* again; *crescere,* to grow]. A secretion that is reabsorbed after fulfilling its functions.

recrementitious (*rek-re-men-tish'-us*) [*recrement*]. Pertaining to or of the nature of a recrement.

recrudescence (*re-kroo-des'-ens*) [*re-; crudescere,* to become raw]. An increase in the symptoms of a disease after a remission or a short intermission.

rectal (*rek'-tal*). Pertaining to the rectum or performed through the rectum. **r. alimentation,** see *alimentation, rectal.* **r. crises,** attacks of rectal pain and tenesmus occurring in locomotor ataxia.

rectalgia (*rek-tal'-je-ah*) [*rectum;* ἄλγος, pain]. Pain in the rectum; proctalgia.

rectectomy (*rek-tek'-to-me*). See *proctectomy.*

rectification (*rek-tif-ik-a'-shun*) [*rectus,* straight; *facere,* to make]. 1. A straightening, as *rectification* of a crooked limb. 2. The redistillation of weak spirit in order to strengthen it.

rectified spirit. Alcohol containing 94.9% of ethyl-alcohol.

rectitis (*rek-ti'-tis*). See *proctitis.*

recto- (*rek-to-*) [*rectum*]. A prefix meaning relating to the rectum.

rectoabdominal (*rek-to-ab-dom'-in-al*). Relating to the rectum and the abdomen.

rectocele (*rek'-to-sēl*) [*recto-;* κήλη, hernia]. Propalse of the rectum into the vagina.

rectoclysis (*rek-tok'-lis-is*) [*rectum;* κλύσις, a washing out]. The slow instillation of a liquid into the rectum.

rectococcygeal (*rek-to-kok-sij'-e-al*) [*recto-; coccygeal*]. Pertaining to the rectum and the coccyx.

rectcoccypexia, rectococcypexy (*rek-to-koks-e-peks'-e-ah, rek-to-koks-e-peks'-e*) [*recto-; κόκκυξ*, coccyx; *πήξις*, a fastening]. Suturing of the rectum to the coccyx.

rectocolitis (*rek-to-kol-i'-tis*). Inflammation of the mucosa of the rectum and colon combined.

rectocolonic (*rek-to-ko-lon'-ik*) [*recto-; colon*]. Pertaining to the rectum and the colon.

rectocystotomy (*rek-to-sist-ot'-o-me*) [*recto-; cystotomy*]. Incision of the bladder through the rectum.

rectogenital (*rek-to-jen'-it-al*). Pertaining to the rectum and the genital organs.

rectolabial (*rek-to-la'-be-al*). Relating to the rectum and the labia pudendi.

rectopexia, rectopexy (*rek-to-peks'-e-ah, rek-to-peks'-e*) [*recto-; πήξις*, a fastening]. Surgical fixation of a prolapsed rectum.

rectophobia (*rek-to-fo'- be- ah*)[*rectum; φόβος*, fear], 1. A presentiment or sense of impending ill experienced by patients having rectal disease. 2. A morbid dread of rectal disease.

rectoplasty (*rek'-to-plas-te*) [*recto-; πλάσσειν*, to form]. See *proctoplasty*.

rectoromanoscope (*rek-to-ro-man'-o-skōp*) [*recto-; S romanum*, the sigmoid flexure; *σκοπεῖν*, to view]. A speculum used in examining the rectum and the sigmoid flexure

rectoscope (*rek'-to-skōp*) [*recto-; σκοπεῖν*, to inspect]. A rectal speculum.

rectoscopy (*rek-tos'-ko-pe*) [*rectum; σκοπεῖν*, to inspect]. An examination of the rectum.

rectosigmoidoscopy (*rek-to-sig-moy-dos'-ko-pe*) [*recto-; sigmoid; σκοπεῖν*, to inspect]. Ocular inspection of the rectum and sigmoid flexure of the colon with the aid of special instruments.

rectostenosis (*rek-to-sten-o'-sis*) [*recto-; stenosis*]. Stenosis of the rectum

rectostomy (*rek-tos'-to-me*). See *proctostomy*.

rectotome (*rek'-to-tōm*) [*recto-; τομή*, a cutting]. A cutting instrument used in rectotomy.

rectotomy (*rek-tot'-o-me*). See *proctotomy*.

rectourethral (*rek-to-ū-re'-thral*) [*recto-; urethra*]. Pertaining to the rectum and the urethra.

rectouterine (*rek-to-ū'-ter-in*) [*recto-; uterus*]. Pertaining to the rectum and the uterus.

rectovaginal (*rek-to-vaj'-in-al*) [*recto-; vagina*]. Pertaining to the rectum and the vagina. **r. fistula,** an opening between the vagina and the rectum.

rectovesical (*rek-to-ves'-ik-al*) [*recto-; vesica*, the bladder]. Pertaining to the rectum and the bladder.

rectum (*rek'-tum*) [*rectus*, straight]. The lower part of the large intestine, extending from the sigmoid flexure to the anus. It begins opposite the left sacroiliac synchondrosis, passes obliquely downward to the middle of the sacrum, and thence descends in the median line to terminate at the anus.

rectus (*rek'-tus*) [L.]. Straight; applied to anything having a straight course. **r. muscle,** see under *muscle*.

recumbent (*re-kum'-bent*) [*recumbere*, to recline]. Leaning back; reclining.

recuperate (*re-kū'-per-āt*) [*recuperate*, to regain]. To regain strength or health.

recuperation (*re-kū-per-a'-shun*) [*recuperatio; recuperare*, to recover]. Convalescence. Restoration to health.

recuperative (*re-kū'-per-a-tiv*) [*recuperativus*]. Pertaining to, or tending to, recovery of health or strength.

recurrence (*re-kur'-ens*) [*recurrere*, to run back]. The return, as of a disease.

recurrens (*re-kur'-ens*) [see *recurrent*]. Relapsing fever.

recurrent (*re-kur'-ent*) [*re*, back; *currere, to run*] 1. Returning. 2. In anatomy, turning back in its course, as *recurrent* laryngeal nerve. **r. fever,** relapsing fever.

recurring (*re-kur'-ing*) [*recurrere*, to run back] Returning; occurring again. **r. disease,** one that returns or relapses. **r. utterance,** the involuntary utterance of certain words, usually a symptom of motor aphasia.

recurvation (*re-kur-va'-shun*) [*recurvatus*, curved back]. The act or process of recurbing or of bending backward.

red. in pulv. Abbreviation of the Latin *redactus in pulverem*, reduced to powder.

red [AS., *rēad*]. The least refrangible of the spectral colors; of a color resembling that of the blood. **r. bark,** see *cinchona*. **r.-blindness,** see under *blindness, color-*. **r. blister,** unguentum hydrargyri iodidi rubri. **r. cerate,** calamine ointment. **r. chalk,** reddle; hydrated aluminum silicate containing a quantity of ferric oxide. **r., Chinese,** mercuric sulphide. **r. corpuscles,** see *corpuscles*. **R.-Cross Society,** an international society founded by Clara Barton, and intended to act upon the principles laid down in the Geneva convention of 1864. It furnishes nurses and supplies for service in wars, and relieves the distress, needs, or wants of those who suffer in floods, pestilences, and public calamities. **r. gum.** 1. A red, papular eruption of infants. Syn., *strophulus*. 2. Eucalyptus. **r. lead,** red lead oxide, formerly used in plasters. **r. lotion.** See *r. wash*. **r. mixture,** a combination of rock salt, potassium nitrate, sodium carbonate and molasses, used for injecting bodies for the dissecting room. It imparts a beautiful red color to the muscles. It is also called *Horner's mixture*. **r. nucleus,** see *nucleus, tegmental*. **r., oil,** oleic acid as a by-product in the manufacture of stearic acid candles. **r. pepper,** see *capsicum*. **r. plague,** a form of the plague characterized by a red spot, boil, or bubo. **r. precipitate,** see *mercury oxide, red*. **r. softening,** a form of acute softening of the brain or spinal cord, characterized by a red, punctiform appearance due to the presence of blood. **r. tartar,** argols, impure cream of tartar. **r. wash,** lotio rubra, a solution of zinc sulphate in compound tincture of lavender and water. **r.-water,** a common name for hemoglobinuria in cattle.

reddle (*red'-del*). Red chalk.

redia (*re'-de-ah*) [*Redi*, an Italian naturalist, 1626–1698]. *pl., rediæ*. In biology, the larval stage of a trematode, which results from the development of a parthenogenetic egg of the first larval stage (sporocyst). The rediæ have at the anterior extremity of their body a sucker-like formation, a pharynx, a simple intestinal tube, and a birth-aperture. The first rediæ give rise to a second and these to a third parthenogenetic generation and these finally to larvæ called *cercariæ*, *q. v.*

redintegration (*red-in-te-gra'-shun*) [*redintegrare*, to renew]. The complete restitution of a part that has been injured or destroyed.

redintol (*red'-in-tol*). Trade name of a paraffin preparation used in the treatment of burns.

redresser (*re-dres'-er*) [Fr. *re, dresseur*]. An instrument used to replace a displaced organ or part.

redressment (*re-dres'-ment*) [Fr., *redressment*]. Correction of a deformity or replacement of a dislocated part.

redressement forcé (*ra-dres-mon (g)for-sa*) [Fr.]. The forcible correction of a deformity or restoration of a displaced part.

reduce (*re-dūs'*) [*re*, back; *ducere*, to lead]. 1. To restore a part to its normal relations, as to *reduce* a hernia or fracture. 2. In chemistry, to bring back to the metallic form; to deprive of oxygen.

reduced (*re-dūsd'*) [*reduce*]. 1. Restored to the proper place. 2. In chemistry, brought back into the metallic form, as *reduced* iron. 3. Diminished in size. **r. eye,** see *eye, reduced, of Donders.* **r. hematin,** the product of the production of hematin in alkaline solution. **r. hemoglobin,** the result of deoxidation of oxyhemoglobin. **r. iron,** iron by hydrogen; ferrum reductum.

reducible (*re-dū'-si-bl*) [*reduce*]. Capable of being reduced.

reducin (*re-dū'-sin*). A leukomaine, $C_{12}H_{24}N_8O_8$, found in urine.

reductase (*re-duk'-tās*). A reducing ferment.

reduction (*re-duk'-shun*) [*reduce*]. The act of reducing. **r. en bloc, r. en masse,** the reduction of a strangulated hernia still surrounded by its sac, thus failing to relieve the strangulation.

reductor (*re-dukt'-or*) [L.]. 1. An instrument for effecting reduction. 2. A retractor muscle.

reduplicated (*re-dū'-plik-a-ted*) [see *reduplication*]. Doubled, as *reduplicated* heart-sounds. See *reduplication.*

reduplication (*re-dū-plik-a'-shun*) [*re*, again; *duplicare*, to double]. A doubling. **r. of the heart-sounds,** a doubling of either the first or the second sound of the heart.

redux (*re'-duks*) [L.]. Returning. **r., crepitus,** the small mucous rales heard in the early stage of the resolution of lobar pneumonia.

reed (*rēd*). See *Abomasum.*

Reed's bacillus (*rēd*) [Charles Alfred Lee *Reed*, American gynecologist, 1856–]. Bacillus epilepticus.

reef-knot (*rēf-not*). Sailor's knot used for ligaturing arteries. It is not likely to slip. See *knot.*

reel, cerebellar. The peculiar staggering gait in diseases of the cerebellum, particularly in tumor.

Rees' test for albumin [George Owen *Rees*, English physician, 1813–1889]. Small amounts of albumin are precipitated by an alcoholic solution of tannic acid.

reevolution (*re-ev-ol-ū'-shun*). Hughlings Jackson's term for a symptom following an epileptic attack, which consists of three stages: (1) Suspension of power to understand speech (word-deafness); (2) perception of words and echolalia without comprehension; (3) return to conscious perception of speech with continued lack of comprehension.

referred pain. That occurring at a distance from the actual place of origin.

refine (*re-fīn'*) [*re*, again; *finire*, to finish]. To purify a substance from foreign matter.

reflected (*re-flek'-ted*) [*reflectere*, to bend backward]. Cast or thrown back. In anatomy, turned back upon itself. **r. light,** see *light.*

reflection (*re-flek'-shun*) [*reflex*]. 1. A bending or turning back, specifically, the turning back of a ray of light from a surface upon which it impinges without penetrating. 2. When used in speaking of membranes such as the peritoneum it refers to the folds which it makes in passing from the wall of the cavity over an organ and back again to the wall which bounds such cavity.

reflector (*re-flek'-tor*). A polished surface by which light is reflected.

reflex (*re'-fleks*) [*re*, back; *flectere*, to bend]. 1. Anything reflected or thrown back. 2. A reflex act. **r., abdominal,** contraction of the muscles about the umbilicus, on sharp, sudden stroking of the abdominal wall from the margin of the ribs downward; it shows integrity of the spinal cord from the eighth to the twelfth dorsal nerve. **r., abdominocardiac,** cardiac dilatation occurs on stimulating the nerves of the abdominal aortic plexus. **r., accommodation,** the contraction and dilatation of the pupil during accommodation. **r., Achilles,** the muscles of the calf of the leg contract when the tendo Achilles is sharply struck. **r. act,** an act following immediately upon a stimulus without the intervention of the will. **r., anal,** a contraction of the sphincter ani on anal irritation. **r., ankle,** clonic contractions of the tendo Achillis, dependent upon alternate contraction and relaxation of the anterior, tibial, and calf-muscles; obtained by sudden complete flexion of the foot, by pressing the hand against the sole. Syn., *ankle-clonus.* **r. arc,** the mechanism necessary for a reflex action; it consists of an afferent or sensory nerve; a nerve-center to change this sensory impulse into a motor one; and an efferent or motor nerve to carry a motor impulse to the muscle or group of muscles. **r., biceps,** contraction of the biceps muscle on tapping the tendon of the biceps; a normal reflex, but increased by the causes which increase the knee-jerk. **r., bone,** a reflex muscular contraction evoked by blows over a bone. **r., bulbocavernous,** see *r., virile.* **r. center,** the nerve center in a reflex arc. **r., chemical,** vital activity produced by the presence of a hormone in the blood. **r., chin,** see *r., jaw.* **r., ciliary,** same as *r., accommodation.* **r., ciliospinal,** pupillary dilatation on irritation of the skin of the neck. **r., consensual,** same as *r., crossed.* **r., contralateral,** a flexion or extension of the leg on one side when the other leg is flexed passively; it occurs in children in meningitis. **r., corneal.** Same as *r., eyelid-closure.* **r., cranial,** any brain reflex. **r., cremasteric,** retraction of the testicle on the corresponding side, obtained on stimulation of the skin on the front and inner aspect of the thigh; it shows integrity of the cord between the first and second pairs of lumbar nerves. **r., crossed,** one in which stimulation of one side of the body produces a reflex on the opposite side. **r., cutaneous pupil,** dilatation of the pupils occurs on pinching the skin of the cheek or neck. **r., deep,** reflexes developed by percussion of tendons or bones. **r., delayed,** one which occurs at a considerable interval after the application of the stimulus. **r., direct,** one in which the reflex occurs on the same side as the stimulation. **r., dorsal,** same as *r., erector spinæ.* **r., elbow-jerk,** same as *r., biceps.* **r., epigastric,** dimpling in the epigastrium, due to contraction of the highest fibers of the rectus abdominis muscle, on stimulation of the skin in the fifth or sixth intercostal space near the axilla; it shows integrity of the cord from the fourth to the seventh dorsa

nerves. **r., erector spinæ,** local contraction of erector spinæ muscle on stimulation of the skin along the border, it shows integrity of the dorsal region of the cord. **r., eyelid-closure,** closure of the lid on irritation of the conjunctiva. **r., faucial,** vomiting on irritation of the fauces. **r., femoral,** plantar flexion of the first three toes and of the foot, and extension of the knee-joint upon irritation of the skin on the upper anterior aspect of the thigh; it occurs in disease of the spinal cord, *e. g.*, in some cases of transverse myelitis. **r., front-tap,** see *r., tendo Achillis.* **r., gastrocolic,** the introduction of food into the empty stomach produces a peristaltic wave in the colon. **r., gluteal,** contraction of the glutei upon firm, sudden stroking of the skin over the buttock; it shows integrity of the cord at the fourth and fifth lumbar nerves. **r., guttural,** a reflex observed in cases of diseased genitalia in women, in which the patient is desirous of spitting but cannot. **r., Haab's pupil-,** see *Haab's pupil-reflex.* **r., humoral,** same as *r., chemical.* **r., interscapular,** see *r., scapular.* **r., iris-contraction,** see *r., pupillary.* **r., jaw,** clonic movements of the inferior maxilla, obtained on a downward stroke with a hammer on the lower jaw hanging passively or gently supported by the hand; it is rarely present in health; increased in sclerosis of the lateral columns of cord. Syn., *jaw-clonus; jaw-jerk.* **r., knee,** contraction of the quadriceps muscle, the foot being jerked forward on striking the patellar tendon after rendering it tense by flexing the knee at a right angle; it is normal in health; *absent* in locomotor ataxia, destructive lesions of the lower part of the cord, multiple neuritis, affections of the anterior gray cornua, infantile paralysis, meningitis, diphtheric paralysis, atrophic palsy, pseudohypertrophic muscular paralysis, diabetes, etc.; *increased* in diseases of pyramidal tracts; spinal irritability; brain tumors, cerebrospinal sclerosis, lateral sclerosis after epileptic seizures or unilateral convulsions. **r., laryngeal,** coughing by irritation of the fauces, larynx, etc. **r., light,** see *r., pupillary.* **r., Loven,** stimulating the afferent nerve of an organ, dilates its vessels with blood. **r., lumbar,** see *r., erector spinæ.* **r., mandibular,** see *r., jaw.* **r., mass,** occurs over the whole of an area innervated from a part of the spinal cord by injury. **r. multiplicator,** a device for registering of tendon-reflexes. **r., muscular,** see *r., tendon.* **r., myenteric,** on irritation of the intestine the part above the stimulation contracts and the part below relaxes. **r., nasal,** sneezing, on irritation of the Schneiderian membrane. **r., nasomental,** irritation or percussion on the side of the nose causes a contraction of the muscle of the chin. **r., obliquus,** contraction of the fibers of the obliquus externus in females (corresponds to cremasteric in males, although it can also be caused in males) on irritation of skin below Poupart's ligament. **r., ophthalmic,** see *r., supraorbital.* **r., orthocardiac,** dilatation of the right side of the heart, occurring on changing from the recumbent to the erect position and lasting until the recumbent position is resumed. **r., palatal,** swallowing produced by irritation of the palate. **r., palmar,** contraction of the digital flexors upon tickling the palm; it shows that the cervical region of the cord is normal. **r., patellar.** Same as *r., knee.* **r., patellar, paradoxical,** contraction of the adductor but not of the quadriceps muscle on percussing the patellar tendon, with the patient in the dorsal decubitus. If the patient is in the sitting posture, the normal reflex is elicited; it shows spinal concussion. **r.s, pathic,** movements resulting from stimulation of a sensory nerve. **r., penile,** see *r., virile.* **r., periosteal,** sharp contractions of the muscles upon tapping the bones of the forearm or leg; it indicates disease of the lateral columns of the spinal cord. **r., peroneal,** reflex movements caused by a stroke on the peroneus muscles when tense or when the foot is turned inward. **r., pharyngeal,** swallowing produced by irritation of the pharynx. **r., plantar,** contraction of the toes upon stroking the sole of the foot. **r., platysmal,** dilatation of the pupil upon pinching the platysma myoides muscle. **r., pupillary,** contraction of the iris on exposure of the retina to light; it is absent in basal meningitis, etc. **r., pupillary, paradoxical,** dilatation of the pupil on stimulation of the retina by light. **r., rectal,** the reflex by which the aggregation of feces in the rectum induces defecation **r. renorenal,** pain felt in one kidney when the opposite one is diseased. **r., scapular,** contraction of the scapular muscles on irritation of the interscapular region; it shows integrity of the cord between the upper two or three dorsal and lower two or three cervical nerves. **r., senile,** in aged persons, a gray reflection from the pupil, attributed to hardening of the lens. **r., skin,** see *r., platysma.* **r., sole,** same as *r., plantar.* **r., spinal,** those reflex actions emanating from centers in the spinal cord. **r., superficial,** such as are developed from irritation of the skin. **r., supraorbital,** a slight contraction of the orbicularis palpebrarum muscle on striking the supraorbital nerve or one of its branches a slight blow. **r., tendo Achillis,** reflex contraction of the gastrocnemius muscle, produced by striking the muscles on the anterior part of the leg while in extension, the foot being extended by the hand upon the sole; it is considered a delicate test of heightened spinal irritability. Syn., *front-tap contraction.* **r., tendon,** muscle reflex action; myostatic reaction; deep reflex. **r., toe,** involuntary flexion of the foot, then flexion of the leg, and, lastly, flexion of the thigh on the pelvis upon strong flexion of the great toe; it is seen in cases in which the knee-jerk and other tendon-reflexes are strongly developed. **r., triceps,** extension of the forearm on tapping the tendon of the triceps muscle. **r., unconditioned,** a reflex which is invariable. **r., virile,** retraction of the bulbocavernous portion upon sharp percussion of the back of the penis, the sheath having been made tense; it occurs in health. **r., visceral,** one of a group of reflexes, as, *blinking,* from touching the cornea; *penile,* erection on slight contact or produced by passing a catheter; *rectal,* constriction of the bowel following introduction of a foreign body, as a suppository; *sneezing,* that produced by a draft of cold air or a brilliant light; *vesical,* contraction of the bladder following irritation of the urethral orifice, *e. g.*, incontinence of urine in children, by reason of a long prepuce; *vomiting,* from tickling the fauces **r., viscerotrophic,** chronic inflammation of thoracic or abdominal viscera is followed by degeneration in the skeletal peripheral struc-

tures. **r., watered-silk,** an appearance like watered-silk seen on the retina in children. **r., wrist,** a series of jerking movements of the hand produced by pressing the hand backward to extreme extension; observed in the late rigidity of hemiplegia. Syn, *wrist-clonus*. See under proper names. **r., zygomatic,** tapping the zygoma causes lateral movement of the mandible.

reflexa (*re-fleks'-ah*) [L.]. See *decidua reflexa*.

reflexio (*re-fleks'-e-o*) [L.]. See *reflection*. **r. palpebrarum,** see *ectropion*.

reflexogenic (*re-fleks-o-jen'-ik*) [*reflexus*, reflex; γεννᾶν, to produce]. Causing or increasing a tendency to reflex action; producing reflexes.

reflexograph (*re-fleks'-o-graf*) [*reflex*; γράφειν, to write]. An instrument for measuring, timing, and charting automatically knee-jerks and other tendon-reflexes.

reflexometer (*re-fleks-om'-et-er*) [*reflexus*, reflex; μέτρον, a measure]. An instrument used to measure the force required to produce myotatic movement.

reflexophile (*re-fleks'-o-fil*) [*reflex*; φιλεῖν, to love]. Attended by reflex activity.

reflexotherapy (*re-fleks-o-ther'-a-pe*) [*reflex-*; *therapy*]. A form of therapeutics based on stimulation of peripheral areas.

reflux (*re'-fluks*). A return flow.

refract (*re-frakt'*) [*re*, back; *frangere*, to break]. 1. To bend back. 2. To change direction by refraction. 3. To estimate the degree of ametropia, heterophoria, and heterotropia present in an eye.

refracta dosi (*re-frak'-tah do'-si*) [L.]. In broken or divided doses.

refraction (*re-frak'-shun*) [*refract*]. 1. The act of refracting or bending back. 2. The deviation of a ray of light from a straight line in passing obliquely from one transparent medium to another of different density. 3. The state or refractive power, especially of the eye; the ametropia, emmetropia, or muscle-imbalance present. 4. The act or process of correcting errors of ocular refraction. **r., angle of,** the angle formed by a refracted ray of light with the perpendicular at the point of refraction. **r., atomic,** the product of the refractive index of the constituent elements of a compound and their atomic weights. **r., coefficient of,** the quotient of the sine of the angle of refraction into the sine of the angle of incidence. **r., double,** the power possessed by certain substances, as Iceland spar, of dividing a ray of light and thus producing a double image of an object. **r., dynamic,** the static refraction of the eye, plus that secured by the action of the accommodative apparatus. **r. equivalent, r., specific.** See *refractive power, specific*. **r., errors of,** departures from the power of producing a normal or well-defined image upon the retina, because of ametropia. **r. of the eye,** the influence of the ocular media upon a cone or beam of light, whereby a normal or emmetropic eye produces a proper image of the object upon the retina. **r.-image,** see *image*. **r., index of,** the refractive power of any substance as compared with air. It is the quotient of the angle of incidence divided by the angle of refraction of a ray passing through the substance. **r., molecular,** the molecular weight of a compound. The molecular refraction of a liquid carbon compound is equal to the sum of the atomic refractions. **r., static,** that of the eye when accommodation is at rest.

refractionist (*re-frak'-shun-ist*) [*refrangere*, to break up]. One who corrects errors of ocular refraction, or ametropia.

refractive (*re-frak'-tiv*) [*refract*]. Refracting; capable of refracting or bending back; pertaining to refraction. **r., equivalent.** See *refractive power, specific*. **r. index,** same as refraction, index of, *q. v.* **r. power,** the measure of influence which a transparent body exercises on the light which passes through it. **r. power, specific,** an almost constant quantity representative of the relation between the coefficient of refraction, the temperature, and the specific gravity of a given fluid.

refractivity (*re-frak-tiv'-it-e*) [*refract*]. Power of refraction; ability to refract.

refractometer (*re-frak-tom'-et-er*) [*refract*; μέτρον, a measure]. 1. An instrument for measuring the refraction of the eye. 2. An instrument for the determination of the refractive indexes of liquids.

refractory (*re-frak'-tor-e*) [*refractarius*, stubborn]. 1. Resisting treatment. 2. Resisting the action of heat; slow to melt. **r. period,** the time of the cardiac contraction when the heart does not respond to stimuli.

refracture (*re-frak'-tūr*) [*re*, back; *frangere*, to break]. The breaking again of fractured bones that have joined by faulty or improper union.

refrangibility (*re-fran-jib-il'-it-e*) [see *refract*]. Capability of undergoing refraction.

refresh (*re-fresh'*) [*re*, again; *friscus*, new]. In surgery, to give to an old lesion the character of a fresh wound.

refrigerant (*re-frij'-er-ant*) [see *refrigeration*]. 1. Cooling; lessening fever. 2. A medicine or agent having cooling properties or lowering body-temperature.

refrigeration (*re-frij-er-a'-shun*) [*re*, again; *frigus*, cold]. The act of lowering the temperature of a body by conducting away its heat to a surrounding cooler substance.

refringent (*re-frin'-jent*) [*refringere*, to break]. See *refractive*.

refuse (*ref'-ūs*). Waste from manufacturing or other establishments, and all inorganic waste.

refusion (*re-fu'-zjun*) [*refusio*, an overflowing]. The act of withdrawing blood from the vessels, exposing it to the oxygen of the air, and passing it back again.

regenerate (*re-jen'-er-āt*) [*regenerare*, to generate again]. To generate anew; to reproduce.

regeneration (*re-jen-er-a'-shun*) [*re*, again; *generare*, to beget]. 1. The new growth or repair of structures or tissues lost by disease or by injury 2. In chemistry, the process of obtaining from the byproducts or end-products of an operation a substance which was employed in the earlier part of the operation. **r., cell-processes in,** these consist in either simple hypertrophy (increase in the size of existing cells), or numerical hypertrophy, hyperplasia (increase in the number of cells in the tissue). **r. after inflammation,** repair by multiplication of the tissue cells. **r. after necrosis,** repair by absorption of dead tissue and its replacement by newly formed normal tissue. **r., pathological,** the renewal of destroyed tissue by a pathological rather than a physiological process.

regenerin (*re-jen'-er-in*). A preparation of ovolecithin and iron.

regime (*ra-zhēm*) [Fr.]. See *regimen*.

regimen (*rej'-im-en*) [*regere*, to rule]. The regulated use of food and the sanitary arrangement of surroundings to suit existing conditions of health or disease.

regio (*re'-je-o*). Latin for *region*.

region (*re'-jun*) [*regio*, a region]. One of the divisions of the body possessing either natural or arbitrary boundaries. **r.s of the abdomen,** see under *abdomen*. **r., acromial,** the parts near the acromion. **r., anal,** pertaining to the anus. **r., aulic,** the area about the aula. **r., auricular,** the parts near the ear. **r., axillary,** a region upon the lateral aspect of the thorax, extending from the axilla to a line drawn from the lower border of the mammary region to that of the scapular region. **r., basilar,** the region at the base of the skull. **r., brachial,** the region of the arms. **r. of Broca,** the third left frontal convolution of the brain. **r., central gray,** the medullary substance of the cerebellar hemispheres. **r., cervical,** the parts around the neck. **r., ciliary.** 1. The zone of the eyeball in which the ciliary body is situated. 2. The part of the eyelid containing the cilia. **r., clavicular,** the area about the clavicle. **r., costal,** the lateral chest area. **r., diaphragmatic,** the region of the diaphragm **r., epicranial,** the region above the cranium. **r., epigastric,** the region over the stomach bounded laterally by two vertical lines passing through the middle of Poupart's ligament; above by a horizontal line touching the lower margin of the sternum, and below by a horizontal line touching the lowest part of the thorax, and including the pyloric end and middle of stomach, the left lobe of the liver, the lobulus Spigelii, the pancreas, the duodenum, parts of the kidneys, the aorta, vena cava, thoracic duct, semilunar ganglia. **r., femoral,** the parts about the femur **r., fibular,** the parts about the fibula. **r., gastric,** the region over the stomach. **r., gluteal,** the region of the gluteus muscle. **r., gustatory,** the tips, margins, and root of the tongue in the neighborhood of the circumvallate papillæ; also the lateral parts of the soft palate and the anterior surface of the anterior pillars of the fauces. **r., humeral,** the parts about the humerus. **r., hyo-mental,** see *r., supra-hyoid*. **r., hyo-sternal,** see *r., infra-hyoid*. **r., hypochondriac,** the region that joins the epigastric region laterally. The right hypochondriac region includes the surface of the abdomen covering the right lobe of the liver, the gallbladder, the hepatic flexure of the colon, and part of the right kidney; the left that covering the spleen, the splenic end of the stomach, the extremity of the pancreas, the splenic flexure of the colon, and part of the left kidney. **r., hypogastric,** that part of the abdominal surface between a horizontal line drawn through the anterior superior crests of the ilia above and on either side by vertical lines drawn through the center of Poupart's ligament. It overlies the small intestines, the bladder in children and in adults when distended, the uterus during pregnancy, sometimes the vermiform appendix, the cecum, and the sigmoid flexure of the colon. **r., iliac,** the region of the ilium; see also *r., inguinal*. **r., ilioinguinal,** the iliac region and the groin conjointly. **r., inferior sternal,** the space corresponding to the part of the sternum below the lower margin of the third costal cartilages. **r., infra-axillary,** the space between the anterior and posterior axillary lines. **r., infraclavicular,** the area circumscribed superiorly by the lower border of the clavicle, inferiorly by the lower border of the third rib, on one side by a line extending from the acromion to the pubic spine, and on the other side by the edge of the sternum. **r., infra-hyoid,** the space below the hyoid bone, between the sterno-cleido-mastoidei and the sternum. **r., inframammary,** the space between a line drawn along the upper border of the xiphoid cartilage and the margin of the false ribs, and between the middle line of the xiphoid cartilage and a vertical line passing through the pubic spine. **r., infrascapular,** the region on either side of the vertebral column below a horizontal line drawn through the inferior angle of each scapula. It is called also the subscapular region. **r., infraspinous,** that included between the spine of the scapula and a line passing through the angle of the scapula. **r., inguinal, r., iliac,** the right and left inguinal or iliac regions are two of the nine abdominal regions. The right includes the abdominal surface covering the cecum and the cecal appendix, the ureter, and the spermatic vessels; the left that covering the sigmoid flexure of the colon, the ureter, and the spermatic vessels. **r., interscapular,** the space between the scapulæ. **r., ischio-rectal,** the region corresponding to the posterior part of the pelvic outlet, between the ischium and the rectum. **r., jugal,** the space over the zygoma. **r., laryngo-tracheal,** the parts about the larynx and the trachea. **r., lenticulo-striate,** the anterior parts of the lenticular and caudate nuclei, and the intervening portion of the internal capsule. **r., lenticulo-thalamic,** the posterior part of the lenticular nucleus, the optic thalamus, and the part of the internal capsule which intervenes. **r., lingual,** the region of the tongue. **r., lumbar,** the surface of the abdomen between a curved line drawn parallel with the cartilage of each ninth rib above and a curved line parallel with the iliac crests below, and a vertical line through the center of Poupart's ligament anteriorly, and the lumbar vertebræ posteriorly. **r., mammary,** the space on the anterior surface of the chest between a line drawn through the lower border of the third rib, and one drawn through the upper border of the xiphoid cartilage. **r., maxillary,** the parts about the jaws. **r., mesogastric,** the umbilical and the right and left lumbar regions together. **r., middle cervical,** the area between the lower jaw, the sternum, and the anterior edges of the sterno-cleido-mastoidei. **r., motor,** see *area, motor*. **r., mylohyoid,** see *triangle, mylo-hyoid*. **r., nasal,** the parts around the nose. **r., olfactory,** the region of the nasal mucous membrane including the ramifications of the olfactory nerve. **r., orbital,** the region of the orbits. **r., palatal,** the parts about the palate. **r., palpebral,** the region of the eyebrows. **r., parasternal,** the space between the mid-axillary line and the edge of the sternum. **r., parotid,** see *r., retromaxillary*. **r., perineal,** the region of the perineum. **r., pharyngeal,** the parts about the pharynx. **r., popliteal,** see *popliteal space*. **r., precordial,** the surface of the chest covering the heart. **r., prefrontal,** the part of the frontal lobe anterior to the precentral fissure; it is also called prefrontal lobe. **r., prevertebral,** the ventral surface of the vertebral column. **r.,**

psycho-motor, the cerebral cortex. **r., pterygo-maxillary**, the parts connecting or lying between the pterygoid process of the sphenoid and the maxillary bone. **r., pulmo-cardiac**, the region of the left thorax in which the left lung overlaps the heart. **r., pulmo-gastric**, the portion of the left thorax in which the lung overlaps the stomach. **r., pulmo-hepatic**, the portion of the right thorax in which the lung overlaps the liver. **r., pulmovascular**, the part of the thorax in which the lung overlaps the origins of the large vessels. **r., respiratory** (*of the nose*), the portion of the nasal passages having to do with the act of respiration. **r., retromaxillary**, the area dorsad of the superior maxilla. Syn., *r., parotid.* **r., sacral**, therea above a the sacrum. **r., sacrococcygeal**, that part of the dorsal wall of the pelvis corresponding to the ventral surface of the sacrum and coccyx. **r., scapular**, the space over either scapula. **r., sensory**, see *sensorium.* **r., sternal**, the region overlying the sternum. **r., sternal, inferior**, the part of the sternal region lying below the margins of the third costal cartilages. **r., sternal, superior**, that portion of the sternal region lying above the lower margins of the third costal cartilages. **r., sub-auricular**, the space immediately below the ear. **r., subclavicular**, see *r., infraclavicular.* **r., submammary**, same as *r., inframammary.* **r., submaxillary**, same as *r., supra-hyoid.* **r., sub-mental**, the region just beneath the chin. **r., sub-ocular**, the anterior extremity of the temporo-sphenoidal lobe. **r., subscapular**, see *r., infrascapular.* **r., subthalamic**, the extension of the tegmentum beneath the posterior portion of the optic thalamus. **r., superior** (*of the skull*), the space between the superior curved line of the occipital bone behind, the supra-orbital ridge in front and, laterally, between the temporal lines. **r., supra-clavicular**, the space between the upper margin of the hyoid bone, the lower border of the inferior maxilla and the sternocleido-mastoid muscles. **r., supra-inguinal**, that bounded by the rectus abdominis muscle, Poupart's ligament, and a line through the iliac crest. **r., supra-mammary**, same as *r., infra-clavicular, q. v.* **r., supra-scapular**, the area above the spine of the scapula. **r., supra-spinous**, the region corresponding to the supra-spinous fossa of the scapula. **r., supra-sternal**, see *notch, supra-sternal.* **r. tegmental**, the tegmentum and corresponding parts of the pons and oblongata to the decussation of the pyramids. **r., temporo-maxillary**, the area over the junction of the temporal and maxillary bones. **r., thoracic**, relating to the entire surface of the thorax. **r., thyrohyoid**, the region around the thyroid cartilage and the hyoid bone. **r., umbilical**, the surface of the abdomen immediately about the umbilicus, bounded as follows: above, by a horizontal line connecting the cartilages of the ninth ribs; below, by a line joining the crests of the ilia, and laterally, by lines passing vertically through the center of Poupart's ligament. **r., vertebral**, relating to the region over the vertebral column.

regional (*re'-jun-al*) [*region*]. Pertaining to a region. **r. anatomy**, the branch of anatomy that treats of the relations of the structures in a region of the body to each other and to the body-surface.

register (*rej'-ist-er*) [*registrum*]. The compass of a voice; also a subdivision of its compass, consisting in a series of tones produced in the same way and of a like character.

registration (*rej-is-tra'-shun*) [*registratio*, a registering]. The act of recording, as of deaths, births, etc.

reglementation (*reg-le-men-ta'-shun*) [Fr., *reglementer*, to make regulations]. The legal restriction of prostitution.

regression (*re-gresh'-un*). Retrogression.

regressive (*re-gres'-iv*) [*re*, back; *gradi*, to go]. Going back; returning; subsiding.

regular (*reg'-ū-lar*) [*regere*, to rule]. According to rule or custom. **r. physician**, one belonging to the regular school. **r. school of medicine**, the great mass of the profession, whose practice is based on the results of experience and experimental research without adherence to any exclusive theory of therapeutics.

regulin (*reg'-ū-lin*). Trade name of a preparation said to consist of agar-agar and cascara sagrada; used in the treatment of constipation.

regulus (*reg'-ū-lus*). A metal reduced from its ore to the metallic state.

regurgitant (*re-gur'-jit-ant*). Flowing backward.

regurgitation (*re-gur-jit-a'-shun*) [*re*, again; *gurgitare*, to engulf]. 1. A back-flow of blood through a heart-valve that is defective. 2. The return of food from the stomach to the mouth soon after eating, without the ordinary efforts at vomiting. **r., aortic**, that of the blood-stream through the aorta from incompetence of the valves. **r., functional**, a form of mitral regurgitation due to contraction of the chordæ tendineæ and papillary muscles. **r., mitral**, see *mitral regurgitation.*

rehabilitation (*re-hab-il-it-a'-shun*). The rendering of a physically handicapped person fit to engage in a remunerative occupation.

Rehfuss method (*ra'-foos*). Examination of the stomach contents (after an Ewald test meal) in small quantities at frequent intervals.

Reichardt's test for arsenic in the urine. Concentrate 200 Cc. of urine with about 2 Gm. of caustic soda; dissolve the residue in a little water acidulated with hydrochloric acid, and then test in a Marsh's apparatus.

Reichel's cloacal duct (*rī'-kel*) [Friedrich Paul *Reichel*, German obstetrician, 1858–]. In the embryo the narrow cleft separating Douglas's septum from the cloaca.

Reichert's canal (*rī'-kert*) [Karl Bogislaus *Reichert*, German anatomist, 1811–1884]. See *Hensen's canal.* **R.'s cartilages**, the hyoid bars which constitute the skeletal elements of the hyoid branchial arch of the embryo and ultimately become the styloid processes, the stylohyal ligaments, and the lesser cornua of the hyoid bone. **R.'s membrane**, see *Bowman's membrane.* **R.'s scar**, an area over the embedded ovum consisting of a fibrinous lamella instead of decidual tissue as over the rest of the ovum.

Reichl's test for proteids. To the proteid solution add 2 or 3 drops of an alcoholic solution of benzaldehyde, and then some sulphuric acid, previously diluted with an equal bulk of water. Finally, add a few drops of a ferric sulphate solution, and a deep blue coloration will be produced in the cold after some time, or at once on warming. Solid proteids are stained blue by this reaction.

Reichl-Mikosch's reagent for albumins. Benzaldehyde and sulphuric acid containing ferric sulphate.

Reichmann's disease (*rīk'-mahn*). A chronic disease of the stomach characterized by permanent gastric hypersecretion, associated with marked dilatation of the stomach with thickening of its walls, and hypertrophy of the glands. It is accompanied by violent attacks of pain with vomiting, and may be followed by the formation of a round ulcer on the wall of the stomach; gastrosuccorrhea. **R.'s sign,** the presence in the stomach, before eating in the morning, of an acid liquid mixed with alimentary residues; it is indicative of gastrosuccorrhea and pyloric stenosis.

Reid's lines [Robert William *Reid*, Scotch anatomist 1851–]. Three imaginary lines serving for measurements in craniocerebral topography; one of them, the base line, is drawn from the lower margin of the orbit through the center of the external auditory meatus to just below the external occipital protuberance. The two others are perpendicular to it, one corresponding to the small depression in front of the external auditory meatus, the other to the posterior border of the mastoid process. The fissure of Rolando extends from the upper limit of the posterior vertical line to the point of intersection of the anterior line and the fissure of Sylvius.

Reil's ansa (*rīl*) [Johann Christian *Reil*, Dutch anatomist, 1759–1813]. A tract of fibers passing from the optic thalamus downward and outward toward the white substance of the hemisphere. Syn., *ansa pedunculars; goose's foot.* **R.'s covered band.** 1. The lateral longitudinal striæ; the longitudinal fibers which cross the transverse striæ beneath the fornicate convolution. 2. A fibromuscular fillet that frequently extends across the right ventricle of the heart. Syn., *moderator band.* **R.'s island,** the insula; a group of three to five small convolutions (gyri operti) situated at the bottom of the fissure of Sylvius. **R.'s line,** a ridge descending posteriorly from the summit of the pyramid of the cerellebum. **R.'s sulcus,** the sulcus in the bottom of the Sylvian fissure, separating the insula from the remainder of the hemisphere.

reimplantation (*re-im-plan-ta'-shun*) [*re,* again; *plantare,* to plant]. In dental surgery, the replacing of a drawn tooth into its socket.

reinfection (*re-in-fek'-shun*) [*re,* again; *infection*]. A second infection with the same kind of virus.

reinforcement (*re-in-fors'-ment*) [OF., *reinforcer,* to strengthen]. The act of reinforcing. Any augmentation of force. **r. of reflexes,** increased myotatic irritability (or reflex response) when muscular or mental actions are synchronously carried out, or other stimuli are coincidently brought to bear upon other parts of the body than that concerned in the reflex arc.

reinoculation (*re-in-ok-ū-la'-shun*) [*re,* again; *inoculare,* to inoculate]. Inoculation a second time with the same kind of virus

reins (*rānz*) [*ren; pl., renes*]. The kidneys.

Reinsch's test. A test for arsenic. The suspected fluid is strongly acidulated with hydrochloric acid and boiled, some slips of bright copper being added; a grayish coating on the copper may be shown to be arsenic by heating in a glass tube held obliquely, when, if it is arsenic a crystalline coating will be sublimated on the glass above the copper. A similar test, but with different end reactions may be used for antimony, bismuth, and mercury.

reinversion (*re-in-ver'-shun*) [*re,* again; *invert*]. The act of reducing an inverted uterus by the application of pressure to the fundus.

Reisseisen's muscles (*rīs'-īs-en*) [Francis Daniel *Reisseissen,* German anatomist, 1773–1828]. The muscular fibers of the bronchi.

Reissner's Canal (*rīs'-ner*) [Ernst *Reissner,* German anatomist, 1824–1878]. See *canal, membranous, of the cochlea.* **R.'s corpuscles,** the epithelial cells covering Reissner's membrane. **R.'s membrane,** the membrana vestibularis; a delicate membrane which separates the membranous cochlea (scala media) from the scala vestibuli.

rejuvenescence (*re-joo-ven-es'-ens*) [*re,* again; *juvenescere,* to grow young]. A renewal of youth; a renewal of strength and vigor.

relapse (*re-laps'*) [*re,* again; *labi,* to fall]. A return of an attack of a disease shortly after the beginning of convalescence.

relapsing fever. An acute infectious disease due to *Spirochæta Obermeieri.* After a period of incubation of from 5 to 7 days, the disease sets in with chill, fever, and pains in the back and limbs. The spleen enlarges, sweats and delirium occur, and the symptoms continue for 5 or 6 days, then suddenly cease by crisis. After a variable interval, usually in about a week, a second paroxysm occurs, which may be followed by a third and fourth. The disease prevails where conditions of overcrowding and defective food-supply obtain; hence the name sometimes given it, *famine-fever.*

relation (*re-la'-shun*) [*relatio*]. 1. Inter-dependence; mutual influence or connection between organs or parts. 2. Connection by consanguinity; kinship. 3. In anatomy, the position of parts of the body as regards each other.

relax (*re-laks'*) [see *relaxation*]. To loosen, or make less tense. To cause a movement of the bowels.

relaxant (*re-laks'-ant*) [see *relaxation*]. 1. Loosening; causing relaxation. 2. An agent that diminishes tension.

relaxation (*re-laks-a'-shun*) [*re,* again; *laxare,* to loosen]. A diminution of tension in a part; a diminution in functional activity, as *relaxation* of the skin.

relief (*re-lēf'*) [OF., *relef,* a raising]. 1. The partial removal of anything distressing; alleviation. **r. incision,** one to relieve tension, as in an abscess.

religiosus (*re-lij-e-o'-sus*) [L. "religious"]. A name given to the superior rectus muscle of the eye.

Remak's band (*rem'-ak*) [Robert *Remak,* German anatomist, 1815–1865; Ernst Julius *Remak,* German neurologist, 1849–1911]. The axis-cylinder of a nerve-fiber. **R.'s contractions,** so-called diplegic contractions occasionally seen in progressive muscular atrophy when an electric current is applied. The positive electrode is placed above and the negative below the fifth cervical vertebra, the contractions occurring on the side opposite to the anode. **R.'s fibers,** the non-medullated nerve fibers. **R.'s fibrils,** the fibrils composing a nonmedullated nerve-fiber. **R.'s ganglion,** a ganglion of nerve cells located in the tissue of the heart near the superior vena cava. **R.'s layer,** the inner longitudinal fibrous layer of the tunica intima of large arteries. **R.'s sign,** the production, by the pricking of a needle, of a double sensation, the second being painful; it is noted in tabes dorsalis. **R.'s type of palsy,** paralysis affecting the muscles of the arm—the deltoid, biceps, brachialis anticus, and supinator longus

remedial (*re-me'-de-al*) [*remedy*]. Having the nature of a remedy; relieving; curative.

remedy (*rem'-ed-e*) [*re*, again; *mederi*, to heal]. Anything used in the treatment of disease.

Remijia (*re-mi'-e-ah*) [*Remijō*, a Spanish surgeon]. A genus of rubiaceous shrubs and trees closely related to cinchona.

remineralization (*re-min-er-al-i-za'-shun*). Restoring to the body the mineral constituents which it has lost.

remission (*re-mish'-un*) [*re*, back; *mittere*, to send]. 1. Abatement or subsidence of the symptoms of a disease. 2. The period of diminution of the symptoms of a disease.

remittent (*re-mit'-ent*) [*remission*]. Characterized by remissions. **r. fever**, a malarial fever characterized by periods of remission without complete apyrexia.

remulus (*rem'-ū-lus*) [L., "a small oar"]. The narrow dorsal portion of a rib.

ren [L.: *gen.*, *renis*; *pl.*, *renes*]. The kidney. **r. amyloideus**, amyloid degeneration of the kidneys. **r. mobilis**, *movable kidney*, *q. v.* **r. unguiformis**, see *horseshoe kidney*.

renaden (*ren'-ad-en*). A proprietary preparation from kidneys; used in chronic nephritis. Dose 1½–2 dr. (6–8 Gm.).

renaglandin (*ren-ag-lan'-din*). Trade name of a preparation of suprarenal gland.

renal (*re'-nal*) [*ren*]. Pertaining to the kidney. **r. apoplexy**, ischuria, or suppression of urine from hemorrhage into the substance of the kidney or other renal lesion. **r. calculus**, a concretion in the kidney. **r. glands**, the suprarenal capsules. **r. inadequacy**, the condition in which the amount of urinary solids, and often the quantity of urine itself, is considerably diminished. It is probably due to an exhausted condition of the epithelial cells of the kidney. **r. plexus**, see *plexus, renal*. **r. storm**, Murchison's term for a peculiar form of neurosal attack referred to the kidney, frequently seen in patients suffering from aortic regurgitation. There is sudden excruciating pain over the region of the kidney, like renal colic, but without nausea or retraction of the testicle, and with the passage of normal urine.

renalina (*ren-al-e'-na*). Trade name for a preparation of suprarenal gland.

renastyptin (*ren-as-tip'-tin*). Trade name of a preparation of suprarenal gland.

Renaut's layer (*ren-o'*) [Joseph Louis *Renaut*, French physician, 1844–]. A thin membrane separating the dermis from the epidermis.

renculin (*ren'-kū-lin*) [*ren*]. An albuminoid said to exist in the suprarenal capsules.

renculus (*ren'-kū-lus*). See reniculus.

Rendu's type of tremor (*ron'-doo*) [Henri Jules Louis Marie *Rendu*, French physician, 1844–1902]. A hysterical tremor provoked or increased by volitional movements.

Rendu-Osler-Weber's disease. Heredofamilial angiomatosis with hemorrhages.

renicapsule (*ren-e-kap'-sūl*) [*ren; capsula*, a capsule]. A suprarenal capsule.

renicardiac (*ren-e-kar'-de-ak*) [*ren*; κάρδια, heart]. Nephrocardiac.

reniculus (*ren-ik'-ū-lus*) [L., dim. of *ren*, *kidney*]. A lobule of the kidney; renculus.

reniform (*ren'-e-form*), [*ren; forma* form]. Kidney-shaped.

renin (*ren'-in*) [*ren*]. A renal substance used in organotherapy.

reniportal (*ren-ip-or'-tal*) [*ren*, kidney; *porta*, gate]. 1. Pertaining to the hilus of the kidney. 2. Relating to the venous capillary circulation of the kidney.

renipuncture (*ren-e-punk'-chur*) [*ren; pungere*, to prick]. Puncture of the capsule of the kidney.

renitent (*ren'-it-ent*) [*reniti*, to resist]. Resistant to pressure.

renitis (*ren-i'-tis*) [*ren*; ῖτις, inflammation]. Inflammation of the kidney.

rennet (*ren'-et*) [AS., *rinnan*, to run]. 1 The prepared inner membrane of the fourth stomach of the calf, or an infusion of this membrane. It contains a milk-curdling ferment that decomposes casein. 2. Renin, *q. v.*

rennin (*ren'-in*). 1. The milk-curdling ferment of the gastric juice. 2. An internal secretion of the kidney with vasoconstrictor properties.

renninogen, rennogen (*ren-in'-o-jen, ren'-o-jen*) [*rennet*]. The zymogen whence rennin is formed; it exists in the cells of the mucous membrane of the stomach.

renocutaneous (*ren-o-kū-ta'-ne-us*) [*ren; cutaneous*]. Relating to the kidneys and the skin.

renoform (*ren'-o-form*). Trade name for a preparation of suprarenal gland.

renogastric (*ren-o-gas'-trik*) [*ren*; γαστήρ, stomach]. Relating to the kidney and the stomach.

renointestinal (*ren-o-in-tes'-tin-al*). Relating to the kidney and the intestines.

renopulmonary (*ren-o-pul'-mon-a-re*). Relating to the kidney and the lungs.

renostypticin (*ren-o-stip'-tis-in*). Trade name for a preparation of suprarenal gland.

renostyptin (*ren-o-stip'-tin*). Trade name for a preparation of suprarenal gland.

renovation (*ren-o-va'-shun.*) The repair or renewal of that which has been impaired.

renuent (*ren'-ū-ent*) [*renuens*, nodding back the head]. In anatomy, throwing back the head; applied to certain muscles.

renule (*ren'-ūl*) [*ren*, the kidney]. A small kidney.

renunculus (*ren-ung'-kū-lus*). Reniculus.

Reoch's test for albumin. See *Macwilliam*. **R.'s test for hydrochloric acid in the contents of the stomach**, on the addition of a mixture of citrate of iron and quinine and potassium sulphocyanide to the gastric juice or contents of the stomach, containing free hydrochloric acid, a red coloration will be produced.

reorganization (*re-or-gan-iz-a'-shun*) [*re*, again; *organization*]. Healing by the development of tissue elements similar to those lost through some morbid process.

rep. Abbreviation for *repetatur* [L.]. Let it be repeated.

repand (*re-pand'*) [*re*, back; *pandus* bent, crooked]. In biology, applied to a leaf-margin which is toothed like the margin of an umbrella. A bacterial culture with a wrinkled or wavy edge.

repatency (*re-pa'-ten-se*) [*re*, again; *patens*, open]. The reopening of a part or vessel. **r. of a vessel**, after ligation, the reopening of the lumen of a ligated vessel from too rapid absorption of the ligature, or from slipping of the knot.

repellent (*re-pel'-ent*) [*re*, back; *pellere*, to push]. 1. Driving back. 2. Causing resolution of morbid processes.

repercolation (*re-per-ko-la'-shun*) [*re*, again; *percolare*, to percolate]. Repeated percolation, *q. v.*

repercussion (*re-per-kush'-un*) [*re*, again; *percussion*]. 1. Ballottement. 2. A driving in or dispersion of a tumor or eruption.

repercussive (*re-per-kus'-iv*) [see *repercussion*.

1. Repellent. 2. A repellent drug.

repercutient (*re-per-kū'-she-ent*) [*re*, again; *percutere*, to percuss]. Effecting a repercussion; pertaining to a process or function of rebound, or reaction.

replantation (*re-plan-ta -shun*) [*replantare*, to plant again]. The act of planting again. **r. of the teeth**, the replacement of teeth which have been extracted or otherwise removed from their cavities; when diseased, the thickened periosteum is scraped off before returning such teeth to their sockets.

repletion (*re-ple'-shun*) [*re*, again; *plere*, to fill]. The condition of being full.

replication (*rep-lik-a'-shun*) [*re*, back; *plica*, a fold]. A refolding or turning back of a part so as to form a duplication Repetition of experiments to reduce errors from uncontrolled factors.

reposing (*re-po'-zing*) [see *reposition*]. Returning an abnormally placed part to its proper position.

reposing the features, in dentistry, a term including everything necessary to bring each and all of the visible parts of the face and mouth into harmony of relation to each other; this necessarily includes the teeth, the relation of the lower to the upper jaw, the lips, cheeks, and soft parts of the face that have assumed a wrong position by the loss of the natural organs.

reposition (*re-po-zish'-un*) [*re*, back; *ponere*, to place]. Return of an abnormally placed part to its proper position. Reduction of hernia, dislocation, uterus, etc.

repositor (*re-poz'-it-or*) [see *reposition*]. An instrument for replacing parts that have become displaced, especially for replacing a prolapsed umbilical cord; an instrument used in the replacement of a displaced uterus.

repoussoir (*ra-poo-swahr'*) [Fr.]. An instrument for extracting the roots of teeth.

réprise (*ra-prēz'*) [Fr. "recovery"]. That part of the cry of a child which is heard during the act of inspiration. The loud inspiration in pertussis. The "whoop."

reproduction (*re-pro-duk'-shun*) [*re*, again; *produce*]. 1. The conscious repetition of perceived sensations. 2. The act of producing again; the procreation of one's kind; the producing of something like that lost. **r., asexual**, that without sexual intercourse. **r., endogenous**, internal cell formation. **r., sexual**, that by the union of sexually distinct cells.

reproductive (*re-pro-duk'-tiv*) [*reproduction*]. Pertaining to reproduction, as the *reproductive* organs.

repullulation (*re-pul-ū-la'-shun*) [*re*, again; *pullulare*, to sprout]. The return of a morbid growth.

repulsion (*re-pul'-shun*) [*re*, back; *pellere*, to drive; to push]. 1. The act of repelling or driving back or apart. 2. The influence tending to drive two bodies apart; the opposite of attraction. **r., capillary**, repulsion due to the forces causing movements of liquids in small tubes.

resacetin (*rez-as'-et-in*). A salt of oxyphenylacetic acid.

resaldol (*rez-al'-dol*). An acetyl derivative of saliformin and resorcinol; an intestinal astringent and antiseptic. Dose 8 dr.–2½ oz. (30–75 Gm.) daily.

resalgin (*rez-al'-jin*). A compound of resorcin and antipyrin.

resect (*re-sekt'*) [*re;* again; *secare*, to cut]. 1. To cut out a piece of a tissue or organ. 2. To cut away the end of one or more of the bones entering into a joint.

resection (*re-sek'-shun*) [*re*, again; *secare*, to cut]. The operation of cutting out. **r. of a joint**, the cutting away of the ends of the bones forming a joint, or a portion of bone, nerve, or other structure.

reserve air. See *respiration*.

reservoir of Pecquet (*pek-a'*). See *receptaculum chyli*.

residual air (*re-zid'-ū-al*). See under *respiration*. **r. atmosphere**, the small amount of air or gas left in a vessel after it has been practically exhausted by an air pump or otherwise. **r. ear**, a middle ear which has been the seat of a suppurative process, which process has ceased and left the tympanic structures in a permanently damaged condition.

residue (*rez'-id-ū*) [*residere*, to remain]. That remaining after a part has been removed; balance or remainder.

residuum (*re-zid'-ū-um*). 1. See *residue* 2 Behring's term for the mass of tubercle bacilli used in the manufacture of tuberculase.

resilience (*re-zil'-e-ens*) [*resilient*]. 1. The quality of being elastic or resilient. 2. Healthy reaction.

resilient (*re-zil'-e-ent*) [*re*, back; *salire*, to leap]. Rebounding; elastic. **r. stricture**, one that contracts again immediately after being dilated.

resin (*rez'-in*) [*resina*]. 1. One of a class of vegetable substances exuding from various plants, and characterized by being soluble in alcohol, in ether, and in the volatile oils, and insoluble in water; they are readily fusible and inflammable. They are obtained in pharmacy by treating the substances containing them with alcohol, and then precipitating the alcoholic solution with water. 2. See *rosin*. **r., gum-**, one differing from a true resin only in containing some gum capable of softening in water. **r. of ipomœa** (*resina ipomœæ*). **r. of jalap** (*resina jalapæ*, U. S. P., B. P.). Dose 2–5 gr. (0.13–0.32 Gm.). **r.-plaster.** See *plaster*. **r. of podophyllum** (*resina podophylli*, U. S. P.). Dose ¼–½ gr. (0.008–0.032 Gm.). **r. of scammony** (*resina scammonii*, U. S. P., B. P.). Dose 4–8 gr. (0.26–0.52 Gm.).

resina (*rez-i'-nah*). Colophony. The residue left after distilling off the volatile oil of turpentine. See *rosin*.

resinate (*rez'-in-āt*). A compound of a resin with a base.

resineon (*rez-in'-e-on*). A volatile oil distilled from resin with potash and freed from phenol. It is used as a wound antiseptic and in the treatment of skin diseases.

resinoid (*rez'-in-oid*) [*resina*, a resin; εἶδος, like]. 1. Resembling a resin. 2. A substance which has some of the properties of a resin. Most of the so-called resinoids are of indefinite chemical composition; others are impure resins.

resinol (*rez'-in-ol*). See *retinol*.

resinous (*rez'-in-us*) [*resin*]. Having the nature of a resin.

resistance (*re-zis'-tans*) [*resistare*, to withstand]. 1. Opposition to force or external impression. 2. In electricity, the opposition offered by a conductor to the passage of the current. **r.-coil**, a coil of wire for increasing the resistance in a circuit. **r., essential, r., internal**, the resistance to conduction within the battery itself. **r., extraordinary, r., external**, the resistance to conduction outside of the battery. **r., Issaeff's period of**, a temporary power of resistance to inoculation by virulent cultures of bacteria,

conferred by the injection of various substances, such as salt solution, urine, serum, etc.

resistivity (*re-zis-tiv'-it-e*) [*resistance*]. The amount or character of electrical resistance exhibited by a body.

resol (*rez'-ol*). A disinfectant mixture of saponified wood-tar and methyl-alcohol.

resolution (*rez-o-lū'-shun*) [*resolvere*, to resolve]. The return of a part to the normal state after a pathological process.

resolve (*re-zolv'*) [*resolvere*, to resolve]. 1. To return to the normal state after some pathological process. 2. To separate anything into its component parts.

resolvent (*re-zol'-vent*) [*resolve*]. 1. Causing solution or dissipation of tissue. 2. An agent causing resolution

resolving power. The capability of a lens of making clear the finest details of an object.

resonance (*rez'-o-nans*) [*re*, again; *sonare*, to sound]. 1. The sound obtained on striking a hollow object, especially the note obtained on percussing the chest or abdomen. 2 The sound of the voice as transmitted to the ear applied to the chest. **r., amphoric,** a sound resembling that produced by blowing across the mouth of a bottle. **r., bandbox,** vesiculotympanitic r. **r., bell-metal,** a bell-like sound heard on auscultation in pneumothorax when the chest is percussed with two coins used as plexor and pleximeter. **r., cracked-pot,** a sound elicited by percussing over a pulmonary cavity communicating with a bronchus. **r., hydatid,** a peculiar sound heard in combined auscultation and percussion of hydatid cysts. It is not heard in other cystic conditions. **r., Skodaic,** the increased percussion resonance over the upper part of a lung when the lower part is compressed by a pleural effusion. **r., tympanitic,** a hollow sound elicited on percussion over the intestine and over large pulmonary cavities with thin yielding walls. **r., vesicular,** the normal pulmonary resonance. **r., vesiculotympanitic,** an admixture of vesicular and tympanitic resonance. **r., vocal,** the sound heard on auscultation of the chest during ordinary speech. **r., whispering,** the sound heard on auscultation of the chest during the act of whispering. **r., wooden,** vesiculotympanitic r.

resonant (*rez'-o-nant*) [*resonans*, resounding]. 1. Sounding or ringing in the nasal passages. 2. A resonant or nasal sound; see *consonant*.

resonator (*rez'-o-na-tor*) [see *resonance*]. An instrument used to intensify sounds.

resopyrine (*rez-o-pī'-rēn*). A compound of resorcinol and antipyrine. It is used in any condition in which antipyrine and resorcinol are indicated. Dose 5–10 gr. (0.32–0.65 Gm.).

resorbent (*re-sorb'-ent*) [*resorbere*, to draw to itself]. 1. Flavoring resorption. 2. A drug which aids in the process of resorption.

resorbin (*re-sorb'-in*). A penetrating ointment-base consisting of an emulsion of sweet almond oil, wax, and a dilute aqueous solution of gelatin or soap.

resorcin (*re-sor'-sin*). See *resorcinol*.

resorcinism (*re-sor'-sin-izm*) [*resorcin*]. A toxic condition caused by injudicious or excessive use of resorcin.

resorcinol (*re-sor'-sin-ol*) [*resin; orcin*]. 1. $C_6H_6O_2$. A crystalline substance isomeric with pyrocatechin and hydroquinone, and usually prepared by fusing sodium benzene disulphonate and sodium hydroxide. It is an antipyretic and antiseptic, but is chiefly used in ointments for chronic skin diseases. Dose 2–5 gr. (0.13–0.32 Gm.). 2. Equal parts of resorcinol and iodoform fused together; it is used as a surgical dusting-powder, 20 to 50 % with starch, or 7 to 15 % ointment.

resorcinopyrin (*re-zor-sin-o-pī'-rin*). See *resopyrin*.

resorcinum (*re-zor'-sin-um*) [L.: *gen.*, *resorcini*]. Resorcinol.

resorcylalgin (*re-zor-sil-al'-jin*). A crystalline derivative of β-resorcylic acid and antipyrin, soluble in alcohol, ether, or chloroform, or 150 parts of water; melts at 115° C. It is antipyretic and anodyne. Syn., *resalgin*.

resorption (*re-sorp'-shun*) [*re*, again; *sorbere*, to absorb]. 1. The absorption of morbid deposits, as of the products of inflammation. 2. The process through which the roots of temporary teeth disappear. Occasionally the roots of permanent teeth suffer resorption. **r., cutaneous.** See *absorption, cutaneous*. **r.-diabetes,** glycosuria due to absorption of sugar. **r.-infection,** a mode of infection marked by the development of bacteria at a distance from the point of introduction. **r., lacunar** (*of bone*), resorption of bone by osteoclasts forming and occupying Howship's lacunæ.

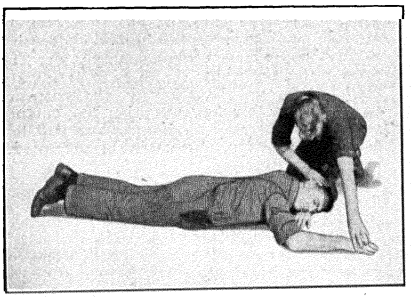
resorpyrine (*re-sor-pi'-rēn*). A derivative of resorcinol and antipyrine, used as an antipyretic and analgesic.

resosalyl (*re-so-sal'-il*). A proprietary antiseptic containing the salicylate ester of ethyl-resorcin with boric acid, benzoic acid, camphor, chloral, and other substances

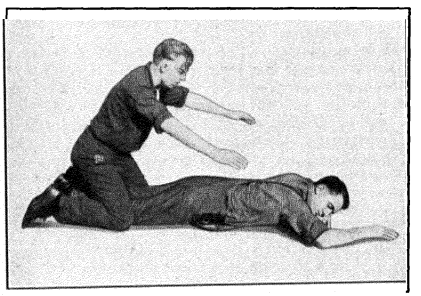
respirable (*res-pi'-rah-bl*) [see *respiration*]. Capable of being inspired and expired; capable of furnishing the gaseous interchange in the lungs necessary for life.

respiration (*res-pi-ra'-shun*) [*re*, again; *spirare*, to breathe]. 1. The interchange between the gases of living organisms and the gases of the medium in which they live, through any channel, as *cutaneous respiration*. 2. The act of breathing with the lungs; the taking into and the expelling from the lungs of air. It consists of two acts—*inspiration*, or the taking in of the atmospheric air, and *expiration*, the expelling of the modified air. Expired air contains less oxygen and more carbon dioxide than inspired air. The volume of air taken into the lungs and given out during an ordinary respiration (*tidal air*) is 500 Cc.; the volume that can be inspired in addition by a forcible inspiration (*complemental air*) is 1500 Cc.; that which remains in the chest after a normal expiration (*reserve* or *supplemental air*) is 1500 Cc.; the amount remaining in the chest after the most complete expiration (*residual air*) is from 1200–1600 Cc. The volume of air that can be forcibly expelled after the most forcible inspiration is termed *vital* or *respiratory capacity* and is equal to the tidal air, complemental air, and reserve air, or about 3500 Cc. See *breath* and *breathing*. **r., abdominal,** a type of respiration caused by the contraction of the diaphragm and the elasticity of the abdominal walls and viscera. It is more common in men than in women. **r., absent,** suppression of respiratory sounds. **r., accelerated,** when exceeding 25 respirations a minute. **r., aerial,** respiration in which the respiration membrane receives oxygen and is relieved of carbon dioxide by means of atmospheric air. **r., amphoric,** a blowing respiration

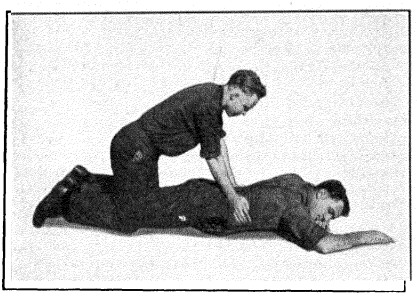
engendered in large cavities with firm walls. Its peculiar character is due to an echo from the walls of the cavity. **r., aquatic,** respiration in which the respiratory membrane, the branchial mucosa (gills), the skin, etc., receive oxygen and are relieved of carbon dioxide by means of water. **r., artificial,** artificial production of the normal respiratory movements; see *artificia. respiration*. **r., blowing.** See *r., bronchiall* **r., branchial,** respiration by means of gills or branchiæ as in aquatic animals. **r., bronchial,** respiration as heard over the trachea or bronchial tubes in health; it is high in pitch, equal in inspiration and expiration, blowing in character, especially the expiratory element, and is marked by a brief pause between inspiration and expiration. It is well defined only in case of pulmonary consolidation. **r., broncho-cavernous,** a form intermediate in character between bronchial and cavernous respiration. **r., bronchovesicular,** respiration having the characters of both bronchial and vesicular respiration. It is heard over areas of consolidation surrounded by patches of healthy lung-tissue. **r., buccal.** See *mouth-breathing*. **r., cavernous,** a blowing respiration of low pitch, circumscribed, alternating with gurgling, and deriving its chief character from the nature of the cavity in which it is generated. **r., center of,** the nervous center regulating the act of respiration is situated in the floor of the fourth ventricle near the point of the calamus. It is automatic in its action. **r., cerebral,** respiration in which the lips are closed, the cheeks distended, the nostrils dilate with each expiration, which is attended with a puffing sound; the respirations are irregular. It is observed especially in typhus fever and in apoplexy. **r., clavicular,** a form resorted to by singers and in which the clavicle is brought into play in the respiratory movements, the shoulders being elevated. **r., cogged** or **cogwheel.** See *r., interrupted*. **r., costal,** respiration in which the chest-movement predominates over the diaphragmatic movement. It is seen especially in women, and is supposed to be related to gestation or perhaps partially to the mode of dress. **r., costo-inferior,** respiration in which the elevation and depression (respiratory movements) are confined chiefly to the lower ribs. It is best seen in dogs. **r., costo-superior,** respiration in which the respiratory movements involve chiefly the upper ribs. It is most common in women. **r., cutaneous,** the giving off of carbon dioxide and taking up of oxygen through the skin. **r., diaphragmatic.** See *r., abdominal*. **r., direct,** respiration in which the living substance of an organism, as an ameba, takes oxygen directly from the surrounding medium and returns carbon dioxide directly to it, no respiratory blood being present. **r., divided,** respiration in which there exists a distinct interval between inspiration and expiration. It is seen in emphysema as a result of the distention of the air-vesicles and consequent reduction in expelling force. **r., exaggerated,** an increase in intensity, without alteration in character or rhythm of the respiratory movements. **r.,**



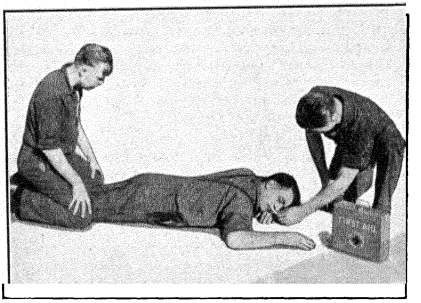
Placing in position.



The release.



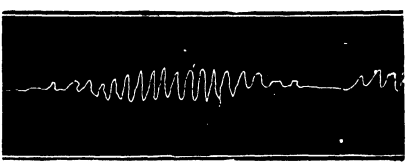
The pressure.



The interval.

PRONE PRESSURE METHOD ARTIFICIAL RESPIRATION. *Amer. Red Cross 1st Aid.*)

external. See *r., blood.* **r., extrinsic** (*of F. Hewitt*), the inspiration and immediate expiration of a gas, so that a portion that has once been inspired is not inspired again. **r., facial,** a term applied to all the movements of the face during inspiration and expiration. **r., feeble,** diminution in the intensity without alteration in the character or rhythm of therespiratory movements. **r., fetal,** the interchange of gases between the fetal and the maternal blood through the medium of the placenta. **r., forced,** respiration induced by blowing air into the lungs by means of a bellows, or in some other way, as in physiological experiments **r., harsh.** See *r., broncho-vesicular.* **r., hissing,** an increased vesicular murmur causing a hissing sound. **r., hollow.** See *r., amphoric.* **r., indeterminate,** the most pronounced vesicular grade of broncho-vesicular respiration. **r., indirect,** respiration in which the living substance of the organism, as in all the higher animals, gets rid of carbon dioxide and obtains oxygen by means of a circulating respiratory blood. **r., inner** or **internal,** the taking up of oxygen and giving off of carbon dioxide by the body-elements for their own requirements It occurs in man in the capillary system **r., interrupted,** respiration in which either inspiration or expiration is divided into two or more parts. It is most often heard at the apex of the right lung, anteriorly. **r., intestinal,** the interchange of respiratory gases in the mucous membrane of the intestines. **r., intra-uterine,** respiration by the fetus before delivery. **r., intrinsic** (*of F Hewitt*), the breathing over and over again of a limited volume of gas. **r., jerking.** See *r., interrupted.* **r., labored,** respiration in which, owing to lack of ability on the part of the ordinary muscles of respiration to sufficiently aerate the blood, the auxiliary muscles of respiration are called into play. **r., laryngeal,** the widening of the glottis during inspiration and its narrowing during expiration. **r., lung.** See *r., pulmonary.* **r., metamorphosing** (*of Seitz*), respiration in which the first part of the inspiratory sound is tubular and the last part cavernous; a cavernous element is also heard during expiration It is a certain sign of a cavity (Vierordt). **r., muscle,** respiration by a muscle when in action. **r., nasal,** nose-breathing. **r., nervous.** See *r., cerebral* **r., normal,** respiration as it occurs in a normal individual in a state of rest or moderate action **r., oral.** See *mouth-breathing* **r., ordinary.** See *r., normal.* **r., organs of,** any parts of the body by means of which certain constituents of the blood are exchanged for those of the surrounding air or water **r., pharyngeal** (*of Garland*), rhythmic expansions and contractions of the pharynx in connection with other movements of respiration. The expansion is pre-inspiratory and the contraction inspiratory **r., placental.** See *r., fetal* **r., puerile.** See *r., exaggerated.* **r., postural, r., prone.** See *artificial respiration, Hall's method.* **r., puerile.** See *r., exaggerated* **r., pulmonary,** respiration in which the interchange of gas between the blood and air occurs in the lungs. **r., rough,** a variety of broncho-vesicular respiration **r., rude.** See *r., rough.* **r., senile,** the feeble respiration of old age. **r., sighing,** deep respiration accompanied with sighing. It is seen in pulmonary congestion and dyspepsia **r., stertorous,** the sound produced by breathing through the nose and mouth at the same time, causing vibration of the velum pendulum palati between the two currents of air. **r. subsibilant** (*of Laennec*), a dull, whistling sound heard over the bronchi, and due to an obstruction by mucus. **r., superficial.** See *r., blood.* **r., supplementary.** See *r., exaggerated.* **r., thoracic.** See *r., costal.* **r., tissue.** See *r., internal.* **r., to-and-fro.** See *r., intrinsic.* **r., tracheal,** the respiratory murmur heard in a normal individual by placing a stethoscope over the supra-sternal fossa. **r., tranquil.** See *r., normal.* **r., tubular.** See *r., bronchial* **r., uremic.** See *Cheyne-Stokes' respiration* **r., vaginal,** the movements of the vagina caused by the movements of the diaphragm in respiration **r., ventral.** See *r., abdominal* **r., vesicular,** a soft, gradual, low-pitched inspiration immediately followed by a shorter and less distinct expiration-sound heard over the normal lung during respiration **r., vesiculo-bronchial.** See *r., bronchovesicular* **r., vesiculocavernous,** respiration that is both vesicular and cavernous **r., wavy.** See *r., interrupted*



TRACING OF CHEYNE-STOKES RESPIRATION

respirator (*res'-pi-ra-tor*) [*respiration*]. An appliance by which the inspired air, in passing through it, is warmed, purified, or medicated.

respiratory (*res'-pir-a-tor-e, res-pi'-ra-to-re*) [*respiration*] Pertaining to respiration **r. blood,** Huxley's name for the fluid present in the pseudohemal system of vessels of certain invertebrates (Annelida) It contains a dissolved red substance allied to hemoglobin **r. bundle,** the ascending root of the glossopharyngeal nerve, probably arising in the posterior horns of the cord **r. capacity,** the capacity of the blood for taking up oxygen in the respiratory organs and depositing it in the tissues, and of taking up carbon dioxide from the tissues and giving it off in the respiratory organs. **r. cavity,** the same as the thoracic cavity, also used as a general term to describe the air-passages **r. center.** See *center, respiratory* **r. chamber,** a respiratory cavity **r. coefficient.** See *r. quotient.* **r. excursion,** the entire movement of the chest during the complete act of respiration. **r. filaments,** thread-like organs arranged in tufts near the head of the larva of the gnat. **r. glottis,** that part of the glottis between the arytenoid cartilages. **r. murmur,** the sound produced by the air entering and escaping from the lungs during respiration. **r. nerve,** one of two nerves supplying important muscles of respiration: the *external* is the posterior thoracic nerve; the *internal,* the phrenic nerve **r. percussion,** Da Costa's term for the method of physical examination by noting the sound elicited by percussion of the chest while the breath is held after a full inspiration, and also after a prolonged expiration. **r. periods,** the time elapsing between the beginning of one inspiration and that of the next **r. pulse,** the modifications

in the pulse produced by respiration. **r. quotient,** the quotient resulting from dividing the quantity of carbon dioxide exhaled, by the amount of oxygen inhaled. **r. sound.** See *r. murmur.* **r. surface,** the entire surface of pulmonary tissue coming in contact with the respired air. **r. tract,** all the air-passages and air-cells concerned in respiration. **r. tubes,** a term applied to all tubular organs of respiration. **r. vesicular murmur,** the normal respiratory murmur; see *respiration, normal*

respire (*re-spīr'*) [*re,* back; *spirare,* to breathe]. To breathe.

respirometer (*res-pi-rom'-et-er*) [*respiration; μέτρον,* a measure]. A device to determine the character of the respiration.

response (*re-spons'*) [*respondere,* to answer] The reaction or movement of a muscle or other part due to the application of a stimulus.

responsibility (*re-spon-sib-il'-it-e*) [*respondere,* to answer]. In medical jurisprudence, the accountability of a person for an act committed. It usually turns upon the question as to whether or not the person was of sound mind and capable of controlling his actions and thoughts.

rest [ME., *resten,* to rest] 1. Cessation of labor or action, to sleep; to lie dormant. 2. A mass of embryonic cells which, having been misplaced during organic evolution, remain quiescent and fail to reach their normal evolution. They at times act as foci for the development of new growths or other pathologic phenomena. **r.s, adrenal, r.s, suprarenal,** masses of aberrant adrenal tissue occasionally observed beneath the capsule of the kidney. **r.-atom,** the part of an atom which remains after an alpha-ray has been discharged from it; also called **recoil-atom. r.-cure.** See *Mitchell's treatment*

restibrachium (*res-te-bra'-ke-um*) [*restis; brachium*] The inferior peduncles of the cerebellum.

restiform (*res'-te-form*) [*restis; forma,* form] Corded or cord-like. **r. body,** a part of the medulla oblongata, which as the inferior cerebellar peduncle connects the medulla with the cerebellum. It contains fibers from the lateral column of the spinal cord (the lateral cerebellar tract), from the posterior column, and from the inferior olivary nucleus.

resting (*rest'-ing*). Ceasing from motion; at rest. **r.-cell.** Same as *r.-spore* **r.-sporangium,** in biology, Pringsheim's term for peculiar resting-cells formed by the mycele of a few fungi (*e. g., Saprolegnia*), in which zoöspores are produced. **r.-spore,** in biology, a spore invested with a firm cell-wall, which remains dormant for a period, often during the whole winter, before it germinates. **r.-stage,** in biology, the period of dormancy in the history of a plant or germ. **r.-state,** in biology, a state of suspended activity, the condition of perennial plants, bulbs, seeds, and spores during their period of dormancy

restis (*res'-tis*) [L., "a rope"]. The restiform body.

restitutio ad integrum [L.]. Complete restoration to a healthy condition

restitution (*res-tit-ū'-shun*) [*re,* again: *statuere,* to set up]. 1. The act of restoring. 2. In obstetrics, a rotation of the fetal head immediately after its birth

restoration (*res-tor-a'-shun*) [*restaurare,* to restore]. The renewal of or return to a state of health.

restorative (*re-sto'-ra-tiv*) [*restore*]. A remedy that is efficacious in restoring health and strength.

restraint (*re-strānt'*) [*restringere,* to draw back]. 1. Hindrance of any action, physical, moral or mental. 2. The state of being controlled; specifically, abridgment of liberty in the care of the insane. **r.-bed** and **r.-chair.** See *r., mechanical.* **r., mechanical,** restraining the insane by mechanical means. **r., medicinal,** the use of narcotics and sedatives in quieting the insane.

restringent (*re-strin'-jent*) [*restringere,* to restrain]. An astringent or styptic.

resublimation (*re-sub-lim-a'-shun*) [*re,* again; *sublimare,* to raise on high]. The process of subliming a drug for the second time.

resudation (*re-sū-da'-shun*) [*re,* again; *sudor,* sweat]. The return of sweating as a symptom.

resupinate (*re-sū'-pin-āt*) [*re,* again; *supinare,* to bend backward]. Turned in a direction opposite to normal; as an ovary with its apex downward

resurrectionist (*res-ur-ek'-shun-ist*) [*resurgere,* to rise again]. Colloquially, one who steals dead bodies from the grave as subjects for dissection.

resuscitate (*re-sus'-it-āt*) [*resuscitare,* to revive]. To revive; to recover from apparent death.

resuscitation (*re-sus-it-a'-shun*) [*re,* again; *suscitare,* to raise up]. The bringing back to life of one apparently dead.

resuscitator (*re-sus'-it-a-tor*) [see *resuscitation*]. One who or that which resuscitates. **r., intragastric,** an apparatus devised by Fenton B. Türck for the purpose of reducing surgical shock and collapse. It consists simply of a double stomach-tube, at one end of which is attached a soft-rubber bag. By this means heat is applied in a uniform and diffuse manner, up to 135° F.

retainer (*re-tā'-nur*) [*retinere,* to keep back]. A dental appliance for holding in position teeth which have been moved.

retamine (*ret-am'-ēn*) [*retama,* the Spanish name for genista], $C_{14}H_{28}N_2O$. An alkaloid from the bark of *Genista sphærocarpa.*

retardation (*re-tar-da'-shun*) [*retardatio; retardare,* to delay]. Any hindering or delaying of a function. In obstetrics, delay in expelling the fetus. In biology, the change of structure during growth accomplished by the subtraction of parts. The opposite of *acceleration, q. v.*

retarding (*re-tar'-ding*) [*retardare,* to delay]. Hindering; delaying. **r. ague,** a variety of ague in which the paroxysm is postponed to a later hour each day.

retch [AS., *hræcan,* to clear the throat]. To strain at vomiting.

rete (*re'-tē*) [L., a net: *pl., retia*]. Any network or decussation and interlacing, especially of capillary blood-vessels. **r., acromiale,** a plexus of arteries on the surface of the acromial process, formed by anastomoses between the acromial branch of the acromiothoracic, the suprascapular, and the anterior and posterior circumflex. **r. arteriosum capitis,** a network over the upper part of the cranium formed by the anastomosis of the frontal, temporal, and occipital arteries. **r. arteriosum faciei,** a network formed by the terminal branches of the facial, infraorbital, ophthalmic, and internal maxillary arteries. **r. articulare cubiti,** an arterial anastomosis over the elbow. **r. articulare genu,** one formed by the anastomosis of the arteries over the anterior and lateral surfaces of the knee. **r., bipolare,** applied to blood-vessels that unite into larger stems and again divide and end in capillaries, **r. calcaneum,** an arterial anastomosis over the

os calcis. **r., carpal, anterior,** and **posterior,** two plexuses of arteries formed by the carpal branches of the radius and ulna, one in front and the other at the back of the wrist. **r. carpi dorsale,** the posterior carpal arch. **r. carpi volare,** an arterial meshwork made up of branches from the radial and ulnar arteries and deep palmar arch upon the anterior surface of the carpus. **r. choroideum,** vascular prolongations of the pia. **r., cubitale.** See *r. articulare cubiti.* **r. dorsalis pedis,** an arterial network on the dorsum of the foot formed by branches of the tarsal and metatarsal arteries joined by perforating plantar branches. **r. epidermal.** Same as *r. mucosum.* **r. Halleri,** the upper part of the Wolffian body by which the communication between the seminiferous tubules and the Wolffian duct is established and maintained. **r. majus,** the great omentum. **r. malleolare internum** and **externum,** the network surrounding the inner and the outer ankle. **r. Malpighii,** the layers of epithelial cells above the corium. **r. mirabile** (*pl., retia mirabilia*), is seen when an artery splits into branches and reunites in a trunk, without forming capillaries. **r. mirabile duplex.** See *r. mirabile geminum* or *conjugatum.* **r. mirabile** (*of Galen*), a network of vessels formed by the intracranial portion of the internal carotid artery in some animals. **r. mirabile geminum** or **conjugatum,** a plexus in which arteries and veins are combined. **r. mirabile of Malpighi,** the network formed by the ultimate ramifications of the pulmonary artery. **r. mirabile simplex,** a network involving only veins or arteries. **r. mirabile unipolar.** See *r., unipolar.* **r. mucosum,** the three lower layers of **living** cells of the epidermis. **r. olecrani,** the network of vessels around the olecranon and at the back of the elbow, formed by the divisions of the profunda and other arteries. **r. patellare,** the plexus of vessels surrounding the patella. **r. tarseum dorsale,** an arterial network upon the dorsal surface of the tarsus. **r. testis,** the network of seminal tubules in the corpus Highmori of the testicle. **r., unipolar,** the capillary divisions of blood-vessels which do not reunite. **r. vasculosum,** a network of blood-vessels. **r. vasculosum testis.** See *r. Halleri.* **r. venosum dorsale manus,** a venous network on the back of the hand. **r. venosum dorsale pedis,** a venous network on the dorsum of the foot. **r. venosum volare manus,** a palmar network of the hand.

retene (*re'-tēn*), $C_{18}H_{18}$. A hydrocarbon occurring in the highest fractions of coal-tar and also a derivative of phenanthrene. It occurs in the tar of highly resinous pines and in some mineral resins.

retentio mensium (*re-ten'-she-o men'-se-um*) [L.]. Retention of the menses; a condition in which menstruation occurs but its products are retained in consequence of atresia of the genital canal.

retention (*re-ten'-shun*) [*re,* back; *tenere,* to hold]. The act of retaining or holding back. **r. cyst.** See *cyst, retention.* **r.-hypothesis** (of Chauveau). See *immunity, theory of, Chauveau's retention.* **r. of urine,** the holding of the urine in the bladder on account of some hindrance to urination.

retia (*re'-te-ah*) [L., plural of *rete*]. See *rete.*

retial (*re'-te-al*) [*rete*]. Relating to, or of the nature of, a rete.

reticula (*ret-ik'-ū-lah*) [pl. of *reticulum,* a network.] The preferred name for formatio reticularis.

reticular (*ret-ik'-ū-lar*) [*reticulum*]. Resembling a net; formed by a network. **r. formation.** See *formatio reticularis.* **r. lamina,** the membrane covering the organ of Corti. **r. layer of the skin,** the deep layer of the skin, consisting of interlacing bands of white and yellow fibrous tissue. **r. tissue,** the stroma of adenoid tissue; adenoid tissue; cellular tissue in general

reticulated (*ret-ik-ū-la'-ted*). Having net-like meshes.

reticulin (*re-tik'-ū-lin*) A body found in the fibers of reticular tissue with a percentage composition: C, 52 88; H, 6.97; N, 15.63; S, 1 88, P, 0.34; ash, 2 27

reticulo-endothelial system (*ret-ik'-ū-lo-en-do-the'-le-al*). A term coined by Bischoff to cover a cell group with endothelial and reticular attributes, and a certain common behavior toward dyestuffs. These cells are found in the liver, spleen, bone-marrow, and hemolymph nodes.

reticulocyte (*ret-ik'-ū-lo-sīt*). A reticulated erythrocyte; one containing a skein or network; seen during the process of blood regeneration

reticulocytosis (*ret-ik-ū-lo-si-to'-sis*). Condition in which the normal percentage of reticulocytes in the peripheral blood is exceeded

reticulo-endotheliosis (*ret-ik-ū-lo-en-do-the-le-o'-sis*). Condition of hyperplasia of the reticulo-endothelial system.

reticulose (*ret-ik'-ū-lōs*) [*reticulum,* a net]. Minutely or finely reticulate.

reticulosis (*ret-ik-ū-lo'-sis*). Same as *reticulocytosis, q. v.*

reticulum (*ret-ik'-ū-lum*) [*reticulum,* dim. of *rete,* net]. A network.

retiform (*ret'-if-orm*). Net-shaped; reticular **r. tissue.** See *reticular tissue*

retina (*ret'-in-ah*) [*rete*] The delicate membrane of the eye representing the terminal expansion of the optic nerve, and extending from the point of entrance of the nerve forward to its termination in the ora serrata. It consists of the following layers, named from behind forward: (*a*) the pigment-layer; (*b*) the neuroepithelial layer, comprising the layer of rods and cones (Jacob's membrane; bacillary layer), the outer limiting membrane, and the outer nuclear layer; (*c*) the cerebral layer, comprising the outer reticular layer (outer granular layer), the inner nuclear layer, the inner reticular layer (inner granular layer), the ganglion-cell layer, the nerve-fiber layer. These layers are cemented together by a supporting framework of connective tissue, the fibers of Mueller, or radiating fibers. **r., central artery of,** a branch of the ophthalmic artery that pierces the optic nerve in the orbit, branching within the globe, and supplying the retina. **r., coarctate,** a term used to describe the morbid condition caused by an effusion of liquid between the retina and the choroid; it gives the retina a funnel shape. **r., detachment of,** disconnection from the choroid. **r. epilepsy of,** a symptom of migraine or of epilepsy, characterized by transient loss of sight. **r., fovea centralis of.** See *fovea.* **r. leopard** or **tiger,** the appearance of the retina in chronic retinitis pigmentosa. **r., limbus luteus of.** See *macula lutea.* **r., membrana limitans of.** See *membrana limitans.* **r., physiological,** middle point of. See *fovea centralis.* **r. pulsation of.** See *pulsation.* **r., shot-silk appearance of** See *reflex, watered silk.* **r., sustentacula, fibers of.** See *Mueller, fibers of.* **r. watered-**

silk appearance of. See *reflex, watered-silk.*

retinacula (*ret-in-ak'-ū-lah*) [L.]. Plural of *retinaculum, q. v.*

retinaculum (*ret-in-ak'-ū-lum*) [L., "a band"]. A band or membrane holding back an organ or part. **r. costæ ultimatæ.** Same as lumbocostal ligament, *q. v.* **retinacula cutis,** fibrous bands connecting the corium with the underlying fascia. **r. ligamenti arcuati,** the short external lateral ligament of the knee-joint. **r. Morgagni, r. of the ileocecal valve,** the ridge formed by the coming together of the valve-segments at each end of the opening between the cecum and the ileum. **r. musculare tendinis subscapularis majoris,** a name for the inconstant brachiocapsularis muscle originating in the shaft of the humerus and inserted into the capsular ligament of the shoulder joint. **retinaculum ossis brachii,** fibrous bands inserted into the neck of the humerus and having their origin in the capsule of the humeroscapular articulation. **r. patellæ externum,** the lateral patellar ligaments. **r. patellæ internum,** the ligamentum patellæ mediale. **r. peroneorum inferius,** a fibrous band running over the peroneal tendons as they pass through the grooves on the outer side of the calcaneum. **r. peroneorum superius,** the external annular ligament of the ankle-joint. **r. tendineum,** the annular ligament of the wrist or ankle. **retinacula valvulæ.** See *retinaculum Morgagni.*

retinal (*ret'-in-al*) [*retina*]. Pertaining to or affecting the retina. **r. apoplexy,** hemorrhage into the retina. **r. extract,** an extract of retina of the ox, suggested in cases of retinal atrophy and tobacco amaurosis. **r. horizon,** a term used by Helmholtz to describe the horizontal plane passing through the transverse axis of the eyeball. **r. image,** the image of external objects as reflected on the retina. **r. ischemia,** anemia of the retina. **r. melanin.** See *fuscin.* **r. purple.** Same as *rhodopsin.*

retinitis (*ret-in-ī'-tis*) [*retina, itis,* inflammation]. Inflammation of the retina. **r. albuminurica,** the form due to nephritis, usually chronic. **r. apoplectica,** retinal apoplexy **r., central punctate,** a form seen most in the aged. A great number of striæ or white spots are visible in the fundus. **r., central recurrent,** a rare form of syphilitic retinitis characterized by a central dark scotoma which disappears in a few days to return in a few weeks; the attacks becoming more frequent. **r., central relapsing,** a form of syphilitic retinitis in which there is a gray or yellow area in the muscular region, or numerous small yellowish-white spots and pigment-dots. **r. cerebralis,** retinitis due to intracranial inflammation. **r., choroido-,** a form of syphilitic retinitis with cellular infiltration, exudation, atrophy, and proliferation of the pigment-epithelium in the choroid, between the choroid and retina, and in the retinal layers. **r. circumpapillaris,** a form in which there is proliferation of the outer layers of the retina around the disc. **r., diabetic,** the form of retinitis occurring in diabetes. **r., diffuse.** See *r. serosa.* **r., diffuse parenchymatous,** the parenchymatous form affecting the limitans, the externa, the interna, and the adventitia. **r. exsudativa,** retinitis with parenchymatous exudation. **r., glycosuric.** Same as *r., diabetic, q. v.* **r. gravidarum,** a form occurring in pregnant women and which is similar to retinitis albuminurica, and is of grave prognostic import. **r. hæmorrhagica,** a form in which there is swelling of the papilla and opaque infiltration of the surrounding retina; there are distended, dark, and tortuous veins, and the arteries are small, there are hemorrhages, linear or irregular and round in appearance. **r. hepatica,** a rare form which sometimes occurs in cases of parenchymatous hepatitis. **r. leukæmica,** a form characterized by pallor of the retinal vessels and optic disc, the boundary of the latter being indistinct. Hemorrhages appear at various points of the membrane, while numerous white patches and round bodies are visible about the disc in the retina. **r. maculatis.** Same as *r., central relapsing, q. v.* **r. nephritica.** See *r albuminurica.* **r. nyctalopia,** a diffuse, streaked opacity of the retina and swelling of the disc, with central scotoma or color-scotoma, and more or less marked amblyopia. It indicates retrobulbar neuritis **r. paralytica** (*of Klein*), retinitis caused by paralysis affecting the optic nerve. **r., parenchymatous,** a simple chronic retinitis affecting the connective tissue of the retina. **r. pigmentosa,** an affection involving all the layers of the retina, and consisting in a slowly-progressing connective-tissue and pigment-cell proliferation of the entire membrane, with wasting of its nerve-elements **r. postica,** inflammation of the ectal retinal layer. **r. proliferating,** a development of connective tissue with the formation of dense bluish white masses within the retina, and extending into the vitreous humor. **r. punctata albescens.** Same as *r., central punctate.* **r., purulent,** a form in which there are small circumscribed white spots near the papilla and in the macular region. **r., renal.** See *r. albuminurica* **r., septic.** Same as *r., purulent.* **r. serosa,** a form characterized by an infiltration, most marked in the nerve-fiber and ganglionic layer of the retina, creating opacity, edema, and hyperemia, most marked in the veins. **r., simple syphilitic,** a form of syphilitic retinitis in which the ophthalmoscope shows a gray opacity surrounding the papilla, which is discolored and cloudy, and the veins darker than normal. **r. simplex.** Same as *r. serosa.* **r., solar,** retinal change from the effect of sunlight. **r. sympathetica,** retinitis of sympathetic origin, and attended with retinal hyperemia, redness of the disc, engorgement of the veins, and great disturbance of vision. **r., syphilitic,** the form occurring in syphilis; it is chronic, diffuse, and a late manifestation of the systemic disease.

retinochoroiditis (*ret-in-o-ko-roi-di'-tis*) [*retina; choroiditis*]. Inflammation of the retina and choroid.

retinoid (*ret'-in-oid*) [*ῥητίνη,* resin; *εἶδος,* form]. Resin-like, or in the form of a resin.

retinol (*ret'-in-ol*) [*resin*], $C_{32}H_{18}$. A liquid hydrocarbon obtained in the destructive distillation of resin. It is used as a solvent and has also been employed in gonorrhea.

retinopapillitis (*ret-in-o-pap-il-ī'-tis*) [*retina; papillitis*]. Inflammation of the retina and the papilla.

retinophotoscopy (*ret-in-o-fo-tos'-ko-pe*). Retinoscopy

retinoscopy (*ret-in-os'-ko-pe*) [*retina; σκοπεῖν,* to view]. A method of determining the refraction of the eye by observation of the movements of the retinal images and shadows through the ophthalmoscopic mirror. Syn., *skiascopy.*

retinoskioscopy (*ret-in-o-ski-os'-ko-pe*). Retinoscopy.

retort (*re-tort'*) [*re*, back; *torquere*, to twist]. A vessel employed in distillation, consisting of an expanded globular portion and a long neck, and containing the liquid to be distilled.

retract (*re-trakt'*) [*re*, back; *trahere*, to draw]. To draw back; to contract; to shorten.

retractile (*re-trak'-til*) [*retrahere*, to draw back]. That which may be drawn back. **r. carcinoma**, mammary carcinoma with retraction of the nipple.

retractility (*re-trak-til'-it-e*) [*retract*]. The power of retracting or drawing back.

retraction (*re-trak'-shun*) [*retract*]. The act of retracting or drawing back, as a retraction of the muscles after amputation. Shortening.

retractor (*re-trak'-tor*) [*retract*]. An instrument for drawing back the lips of a wound so as to give a better view of the deeper parts

retrad (*re'-trad*) [*retro*, backward]. In or toward the rear.

retrahens aurem (*re-tra'-henz aw'-rem*). Drawing back the ear. See under *muscle*

retrahent (*re'-tra-hent*) [*retrahens*, drawing back]. Drawing backward; retracting.

retrenchment (*re-trench'-ment*) [Fr , *retrenchment*]. A plastic operation the object of which is to obtain cicatricial contraction by the removal of superfluous tissue.

retro- (*re-tro-*). A prefix meaning back, backward, or behind.

retroaction (*re-tro-ak'-shun*) [*retro-; agere*, to do]. Reverse action

retroanteroamnesia (*re-tro-an-ter-o-am-ne'-ze-ah*). See *amnesia, retroanterograde*.

retroanterograde (*re-tro-ant'-er-o-grād*) [*retro-; anterius*, before; *gradi*, to go]. Reversing the order of succession. **r. amnesia.** See *amnesia, retroanterograde*.

retroauricular (*re-tro-aw-rik'-ū-lar*). Dorsad of the auricle of the ear or of the heart.

retrobuccal (*re-tro-buk'-al*) [*retro-; bucca*, the cheek]. Pertaining to the back part of the mouth or of the cheek.

retrobulbar (*re-tro-bul'-bar*) [*retro-; bulbar*]. 1. Situated or occurring behind the eyeball. 2. Behind the medulla oblongata. **r. neuritis**, inflammation in the orbital part of the optic nerve. **r. perineuritis**, inflammation of the sheath of the orbital part of the optic nerve

retrocecal (*re-tro-se'-kal*). Pertaining to the back of the cecum.

retrocedent (*re-tro-se'-dent*) [*retro-; cedere*, to go]. Going back; disappearing from the surface **r. gout**, a form of gout in which the joint-inflammation suddenly disappears and is replaced by affections of the internal organs.

retroceps (*re'-tro-seps*) [Fr.]. A variety of obstetrical forceps used to grasp the fetal head from behind.

retrocervical (*re-tro-ser'-vik-al*) [*retro-; cervix*, neck]. Situated behind the cervix uteri.

retrocession (*re-tro-sesh'-un*) [*retrocede*]. The act of going back.

retroclusion (*re-tro-kloo'-zhun*) [*retro-; claudere*, to shut]. A form of acupressure in which the pin is passed first above the artery into the tissues on the other side, then below the artery into the tissues upon the side first entered

retrocolic (*re-tro-kol'-ik*). Behind the colon.

retrocollic (*re-tro-kol'-ik*) [see *retrocollis*]. Pertaining to the muscles at the back of the neck. **r. spasm**, spasm of the muscles at the back of the neck, causing retraction of the head.

retrocollis (*re-tro-kol'-is*) [*retro-; collis*, the nape of the neck]. Torticollis.

retrocopulation (*re-tro-kop-ū-la'-shun*) [*retro-; copulare*, to copulate]. The act of copulating from behind or aversely.

retrodeviation (*re-tro-de-ve-a'-shun*) [*retro-; deviation*]. Any backward displacement; a retroflexion or retroversion.

retrodisplacement (*re-tro-dis-plās'-ment*) [*retro-; displacement*]. Backward displacement of a part or organ

retroesophageal (*re-tro-e-sof-aj'-e-al*) [*retro-; esophagus*]. Located behind the esophagus.

retroflected (*re-tro-flek'-ted*). Same as *retroflexed*.

retroflection (*re-tro-flek'-shun*). See *retroflexion*.

retroflex (*re'-tro-fleks*) [*retro-; flectere*, to turn]. Turning back abruptly.

retroflexed (*re-tro-flekst'*) [*retro-; flectere*, bend]. Bent backward.

retroflexion (*re-tro-flek'-shun*) [*retro-; flexion*]. The state of being bent backward. **r. of the uterus**, a condition in which the uterus is bent backward upon itself, producing a sharp angle in its axis.

retrograde (*ret'-ro-grād* or *re'-tro-grād*) [*retro-; gradi*, to go]. Going backward; undoing. **r. carcinoma**, a carcinoma which grows firmer and less in size and remains so. **r. embolism**, embolism in which the embolus has gone against the normal direction of the blood-stream. **r. metamorphosis**, katabolic change.

retrography (*re-trog'-ra-fe*) [*retro-; γράφειν*, to write]. Backward writing; mirror-writing.

retrogression (*re-tro-gresh'-un*) [*retro-; gredi*, to go]. 1. Degeneration. 2. Involution.

retroinfection (*re-tro-in-fek'-shun*). Infection of the mother by the fetus.

retroinsular (*re-tro-in'-sū-lar*) [*retro-; insula*, island]. Situated behind the island of Reil, as the *retroinsular* convolutions.

retroiridian (*re-tro-ir-id'-e-an*) [*retro-; iris*]. Behind the iris.

retrojection (*re-tro-jek'-shun*) [*retro-; jectio*, a throwing]. The washing out of a cavity from within outward.

retrojector (*re'-tro-jek-tor*) [*retro-; jacere*, to throw]. An instrument for washing out the uterus.

retrolingual (*re-tro-ling'-gwal*) [*retro-; lingua*, the tongue]. Relating to that part of the throat back of the tongue.

retromalleolar (*re-tro-mal-e'-o-lar*) [*retro-; malleolus*]. Located back of a malleolus.

retromammary (*re-tro-mam'-ar-e*) [*retro-; mamma*, breast]. Situated or occurring behind a mammary gland.

retromandibular (*re-tro-man-dib'-ū-lar*) [*retro-; mandible*]. 1. Situated behind the lower jaw. 2. Pertaining to a point in front of the mastoid process.

retromastoid (*re-tro-mas'-toid*). Behind the mastoid.

retromaxillary (*re-tro-maks'-il-a-re*) [*retro-; maxilla*]. Situated behind the maxilla.

retromorphosis (*re-tro-mor-fo'-sis*) [*retro-; μορφή*, form]. Katabolism; retrograde metamorphosis; katabolic change.

retronasal (*re-tro-na'-zal*) [*retro-; nasus*, nose]. Situated behind the nose or nasal cavities.

retro-ocular (*re-tro-ok'-ū-lar*). See *retrobulbar* (1).

retroperitoneal (*re-tro-per-it-on e'-al*) [see *retroperitoneum*]. Situated behind the peritoneum.

retroperitoneum (*re-tro-per-it-on-e'-um*) [*retro-; peritoneum*]. The space lying behind the peritoneum and in front of the spinal column and lumbar muscles.

retroperitonitis (*re-tro-per-it-on-i'-tis*) [*retro-; peritonitis*]. Inflammation of the retroperitoneal structures.

retropharyngeal (*re-tro-jar-in'-je-al*) [*retro-; pharynx*]. Situated behind the pharynx, as *retropharyngeal* abscess

retropharyngitis (*re-tro-far-in-ji'-tis*) [*retro-; pharyngitis*]. Inflammation of the retropharyngeal tissues.

retropharynx (*re-tro-far'-inks*). The posterior portion of the pharynx.

retroplacental (*re-tro-pla-sent'-al*). Behind the placenta

retroposed (*re'-tro-pōzd*) [*retro-; ponere*, to place]. Displaced backward.

retroposition (*re-tro-po-zish'-un*) [*retro-; position*]. Backward displacement of the uterus without flexion or version.

retropulsion (*re-tro-pul'-shun*) [*retro-; pellere*, to drive]. 1. A driving or turning back as of the fetal head. 2. A running backward; a form of walking sometimes seen in paralysis agitans.

retrostalsis (*re-tro-stal'-sis*) [*retro-; στάλσις*, compression]. Reversed peristalsis; peristaltic action that tends to drive the intestinal contents cephalad instead of caudad

retrosternal (*re-tro-ster'-nal*) [*retro-; sternum*]. Situated behind the sternum.

retrotarsal (*re-tro-tar'-sal*) [*retro-; tarsus*]. Situated behind the tarsus, as the *retrotarsal* fold of the conjunctiva **r. fold.** See *fornix conjunctivæ*.

retrotracheal (*re-tro-tra'-ke-al*) [*retro-; trachea*] Situated or occurring behind the trachea.

retrouterine (*re-tro-ū'-ter-in*) [*retro-; uterus*]. Behind the uterus. **r. hematocele,** a blood-tumor behind the uterus in the pouch of Douglas.

retrovaccination (*re-tro-vak-sin-a'-shun*) [*retro-; vaccination*]. Vaccination with virus from a cow that had been inoculated with the virus of smallpox from a human subject.

retrovaccine (*re-tro-vak'-sēn*) [*retro-; vaccine*]. The virus obtained after inoculating a cow with human virus.

retroversioflexion (*re-tro-ver-se-o-flek'-shun*). Combined retroversion and retroflexion.

retroversion (*re-tro-ver'-shun*) [*retro-; version*]. A turning back. **r. of uterus,** a condition in which the uterus is tilted backward without curvature of its axis.

retroverted (*re'-tro-ver-ted*). Tilted or turned backward, as a *retroverted* uterus.

Retzius' brown striæ (*ret'-se-us*) [1. Anders Adolf *Retzius*, Swedish anatomist, 1796–1860; and 2. Magnus Gustav *Retzius*, Swedish histologist, 1842–1919]. [2] Brownish concentric lines in the enamel of the teeth, running nearly parallel to the surface. **R.'s capsule,** [1] the fascial formation investing the intrapelvic and bulbous portions of the urethra and Cowper's glands. **R.'s fibers,** [1] the rigid filaments of Deiter's cells in the organ of Corti. **R.'s ligament,** [1] the outer portion of the anterior annular ligament af the ankle which forms a loop around the peroneus tertius and the extensor longus digitorum. **R.'s space,** [1] a triangular space the basis of which lies between the spines of the pubes, the apex being from 5 to 7 centimeters above. In this space, which is filled with connective tissue, the bladder is not covered by the peritoneum. Syn., *cavum Retzii*. **R.'s veins,** [1] the veins forming anastomoses between the mesenteric veins and the inferior vena cava.

reunient (*re-ūn'-yent*) [*re,* again; *unire,* to unite]. Uniting divided parts.

reuniol (*re-ūn'-e-ol*) [*Reunion,* an island in the Indian Ocean; *oleum,* oil]. A proprietary substitute for attar of rose, said to be derived from Algerine, French and Reunion geranium oil. It resists oxidation and has the perfume of the tea rose. It is soluble in alcohol, fats, and fixed oils.

reunion (*re-ūn'-yun*) [*re,* again; *unio,* to become one]. The joining of parts whose continuity has been destroyed. **r. of wound.** See *healing*.

Reusner's sign of early pregnancy (*royz'-ner*). An increase in the volume of the pulsation of the uterine arteries may be perceived through the vagina in the posterior culdesac as early as the fourth week

Reuss' formula (*royz*). The formula by means of which the amount of albumin contained in pathological exudates and transudates can be approximately calculated when the specific gravity, that depends upon the amount of albumin present, is known: $E = \frac{1}{4}(S - 1000) - 2.8$; E = percentage of albumin contained in the fluid· S = specific gravity of the fluid. **R.'s test for atropine,** heat the substance to be tested with sulphuric acid and an oxidizing agent; in the presence of atropine a fragrance as of roses and orange-flowers is given off

revaccination (*re-vak-sin-a'-shun*) [*revaccinatio*]. Renewed or repeated vaccination.

revalenta (*rev-al-en'-tah*). A commercial and proprietary food-preparation for invalids, said to be composed principally of lentil meal.

reveilleur (*ra-va'-yur*) [Fr.]. The instrument used in Baunscheidtism.

revellent (*re-vel'-ent*). See *revulsive*.

Reverdin's method, or **operation** (*re-vēr-dan'*) [Auguste *Reverdin,* Swiss surgeon, 1849–1908]. 1. *For blepharoplasty:* removal of the cicatricial tissue, suturing of the lid to the opposite one in its normal position, and skin-grafting of the raw surface. 2. *For skin-grafting:* a point of skin is raised on an ordinary sewing-needle, and shaved off with a scalpel or scissor; the graft is then transferred to the fresh surface next to the healthy granulations. 3. *For symblepharon:* detachment of the lid and transplantation of a small flap from the cheek.

reverie (*rev'-er-e*) [Fr., *reverie*]. A state of dreamy abstraction; visionary mental or ideational movement, the mind itself, at least so far as volition is concerned, being passive.

reverse (*re-vers'*) [*revertere,* to turn back]. In bandaging, a half-turn employed to change the direction of a bandage.

reversible reaction, or **equation.** One in which the displacement may occur in either direction.

reversion (*re-ver'-shun*) [*revertere,* to turn back]. In biology: 1. The appearance of characteristics which existed in remote ancestors. 2. The backward development of plant-organs, as stamens into petals, etc. 3. Becoming wild after having been domesticated or cultivated. 4. The chemical action opposed to inversion (the hydrolytic cleavage of compound sugars into monosaccharids) whereby monosaccharids are condensed into complicated carbohydrates. **r., neogenetic,** the anomalous adult development of an embryonic rudiment. **r., paleogenic,** reversion to an atavus so remote that the rudiment is not even represented in the embryo.

Révilliod's sign (*ra-ve-yo'*) [Henri *Révilliod,* Swiss physician]. Inability of the patient to close the eye of the affected side only; it is observed in

paralysis of the facial nerve. Syn., *signe de l'orbiculaire.*

revitalization (*re-vi'-tal-i-za'-shun*) [*re*, again; *vita*, life]. The act or process of refreshing or revitalizing.

revive (*re-viv'*) [*re*, again; *vivere*, to live]. To return to life after seeming death.

revivescence (*re-viv-es'-ens*) [*reviviscere*, inceptive of *revivere*, to revive]. The awaking from a period of dormancy; said of insects after hibernation.

revivification (*re-viv-if-ik-a'-shun*) [*revivificatio*]. 1. Restoration to consciousness. 2. The refreshening of surfaces by paring before placing them in apposition.

revulsant (*re-vul'-sant*) [*revellere*, to push away]. 1. Revulsive. 2. A medicine or agent that, by irritation, draws the blood from a distant part of the body

revulsion (*re-vul'-shun*) [*re*, back; *vellere*, to pluck]. A plucking or driving backward; specifically, the diverting of disease from one part to another by the sudden withdrawal of the blood from the part.

revulsive (*re-vul'-siv*) [see *revulsion*]. 1 Causing revulsion. 2. An agent that causes revulsion.

revulsor (*re-vul'-sor*). 1. An apparatus for effecting revulsion by the alternate application of heat and cold. 2. A plate or cylinder set with needles, used in producing counterirritation.

Reybard's suture (*ra'-bar*). An interrupted loop-suture for wounds of the intestine.

Reynold's test for acetone. To the liquid to be tested add freshly precipitated mercuric oxide, shake and filter. If acetone is present, the filtrate will contain mercury, owing to the acetone dissolving freshly precipitated mercuric oxide. The mercury may be detected by overlaying the filtrate with ammonium sulphide, which turns black.

R. F. A. Abbreviation for *right frontoanterior* position of the fetus.

R. F. P. An abbreviation for *right frontoposterior* position of the fetus.

Rh. Chemical symbol of rhodium.

Rhabditis (*rab-di'-tis*) [ῥάβδος, a rod]. A genus of nematode worms a few species of which are parasitic in man.

rhabdium (*rab'-de-um*) [dim. of ῥάβδος, a rod]. A fiber of striped or voluntary muscle

rhabdoid (*rab'-doid*) [ῥάβδος, a rod; εἶδος, like]. Rod-like. r. **suture**, the sagittal suture.

rhabdomyoma (*rab-do-mi-o'-mah*) [ῥάβδος a, rod; *myoma*]. A form of myoma characterized by the presence of striated muscular fibers.

rhabdomyosarcoma (*rab-do-mi-o-sar-ko'-mah*) [*rhabdomyoma; sarcoma*]. A tumor containing rhabdomyoma fibers and sarcoma cells.

Rhabdonema (*rab-do-ne'-mah*) ῥάβδος, a rod; νῆμα, a thread]. A genus of parasitic roundworms.

rhabdophobia (*rab-do-fo'-be-ah*) [ῥάβδος, a rod; φόβος, fear]. A morbid dread of being beaten, or fear excited by the sight of a stick.

rhachi- (*ra'-ke*) [*rhachis*]. A prefix meaning relating to the spine.

rhachiagra, rachiagra (*ra-ke-a'-grah*) [*rhachi-*; ἄγρα, a seizure]. Gouty or rheumatic pain in the muscles of the spine.

rhachial, rachial (*ra'-ke-al*) [ῥάχις, spine]. Pertaining to the spine.

rhachialbuminimetry (*rak-e-al-bū-min-im'-et-re*) [ῥάχις, spine; *albumin*; μέτρον, measure]. Estimation of the amount of albumin (globulin) present in the spinal fluid.

rhachialgia, rachialgia (*ra-ke-al'-je-ah*) [ῥάχις, spine; ἄλγος, a pain]. Any pain in the spine. Spinal irritation. r. **mesenterica.** Same as *tabes mesenterica, q. v.*

rhachialgitis, rachialgitis (*rak-e-al-ji'-tis*) [ῥάχις, spine; ἄλγος, pain; ιτις, inflammation]. Inflammatory rhachialgia.

rhachianalgesia (*rak-e-an-al-je'-se-ah*). Spinal anesthesia.

rhachianesthesia (*rak-e-an-es-the'-se-ah*) [ῥάχις, spine; *anesthesia*]. Spinal anesthesia.

rhachiasmus, rachiasmus (*ra-ke-az'-mus*) [ῥάχις, spine]. Spasm of the muscles at the back of the neck, as seen in the early part of many epileptic attacks.

rhachicentesis, rachicentesis (*ra-kis-en-te'-sis*) [*rhachi-*; κέντησις, puncture]. Puncture into the spinal canal.

rhachicocainization, rachicocainization (*ra-ke-ko-ka-in-i-za'-shun*) [*rhachi-*; *cocainization*]. The induction of anesthesia by the injection of a solution of cocaine hydrochloride into the subarachnoid space by means of a lumbar puncture.

rhachidial, rachidial (*ra-kid'-e-al*) [ῥάχις, spine]. Pertaining to a rhachis, or spine.

rhachidian, rachidian (*ra-kid'-e-an*) [see *rhachidial*]. Spinal; vertebral.

rhachilysis, rachilysis (*ra-kil'-is-sis*) [ῥάχις, spine; λύειν, to loose]. A method of treating lateral curvature of the spine by mechanical counteraction on the abnormal curves

rhachio- or **rachio-** (*ra'ke-o*) [ῥάχις, spine]. A prefix denoting connection with or relation to the spine.

rhachiocampsis, rachiocampsis (*ra-ke-o-kamp'-sis*) [ῥάχις, spine; κάμψις, a bending]. Curvature of the spine.

rhachiocentesis (*ra-ke-o-sen-te'-sis*). Rhachicentesis.

rhachiochysis, rachiochysis (*ra-ke-o-ki'-sis*) [ῥάχις, spine; χύσις, a pouring]. An accumulation of water or watery substance within the spinal canal

rhachiococainization (*ra-ke-o-ko-ka-in-i-za'-shun*). Rhachicocainization.

rhachiodynia, rachiodynia (*ra-ke-o-din'-e-ah*) [*rhachi-*; ὀδύνη, pain]. Spasmodic pain in the spinal column.

rhachiokyphosis, rachiokyphosis (*ra-ke-o-ki-fo'-sis*) [ῥάχις, spine; κύφωσις, a bending]. Gibbosity, or hunch of the back.

rhachiometer, rachiometer (*ra-ke-om'-et-er*) [ῥάχις, spine; μέτρον, a measure]. An instrument used to measure the degree of spinal deformities.

rhachiomyelitis, rachiomyelitis (*ra-ke-o-mi-e-li'-tis*) [ῥάχις, spine; μυελός, marrow; ιτις, inflammation]. Inflammation of the spinal cord. Myelitis.

rhachiomyelophthisis, rachiomyelophthisis (*ra-ke-o-mi-el-off'-this-is*) [ῥάχις, spine; μυελός, marrow; φθίσις, a wasting]. See *tabes dorsalis.*

rhachiomyelos, rachiomyelos (*ra-ke-o-mi'-el-os*) [ῥάχις, spine; μυελός, marrow]. See *spinal cord.*

rhachioparalysis, rachioparalysis (*ra-ke-o-par-al'-is-is*) [ῥάχις, spine; *paralysis*]. Spinal paralysis.

rhachiophyma, rachiophyma (*ra-ke-o-fi'-mah*) [ῥάχις, spine; φῦμα, a growth]. A spinal tumor.

rhachioplegia, rachioplegia (*ra-ke-o-ple'-je-ah*) [ῥάχις, spine; πληγή, stroke]. Spinal paralysis.

rhachiorrheuma, rachiorrheuma (*ra-ke-or-roo'-mah*) [ῥάχις, spine; *rheuma*]. Spinal rheumatism.

rhachioscolioma, rachioscolioma (*ra-ke-o-sko-le-o'-mah*) [ῥάχις, spine; σκολίωμα, a curve]. Lateral distortion and curvature of the spine.

rhachioscoliosis, rachioscoliosis (*ra-ke-o-sko-le-o'-sis*) [ῥάχις, spine, *scoliosis*] The condition and progress of curvature of the spine

rhachiostrophosis, rachiostrophosis (*ra ke-o-stro-fo'-sis*) [ῥάχις, spine, στρόφος, twisted] Curvature of the spine

rhachiotome, rachiotome (*ra'-ke-o-tōm*) [ῥάχις, spine, τομή, cutting] A cutting instrument used in rhachiotomy

rhachiotomy, rachiotomy (*ra-ke ot'-o-me*) [*rhachi-*, τομη, a cutting] 1 The operation of cutting into or through the vertebral column 2 The operation of cutting through the spine of the fetus to facilitate delivery

rhachipagus, rachipagus (*ra kip'-a gus*) [ῥάχις, spine, πάγος, anything fixed] A double fetal monstrosity in which the twins are joined back to back by any portion of the spinal column

rhachis, rachis (*ra'-kis*) [ῥάχις] The spinal column In biology, (*a*) the main petiole of a compound leaf, (*b*) the axis of inflorescence, (*c*) the shaft of a feather, (*d*) the arched middle area of the dorsal surface of a trilobite **r. nasi,** the line extending from the tip to the root of the nose

rhachischisis, rachischisis (*ra kis' kis-is*) [ῥάχις, spine, σχίζειν, to cleave] A cleft in the vertebral column Same as *spina bifida*

rhachistovainization, rachistovainization (*ra-ke-sto-va-in i za'-shun*) [*rhachi stovaine*] The induction of anesthesia by the injection of a solution of stovaine into the sabarachnoid space by means of a lumbar puncture

rhachitæ, rachitæ (*ra-ki' te*) [ῥαχίται] The muscles attached to the vertebral column

rhachitic, rachitic (*ra kit'-ik*) [*rhachitis*] Affected with, resembling, or produced by rhachitis, rickety **r. rosary,** the row of nodules appearing on the ribs, at their junction with the cartilages, in rhachitis

rhachitis, rachitis (*ra ki' tis*) [*rhachi-*, itis, inflammation] Rickets a constitutional disease of infancy, characterized by impaired nutrition and changes in the bones the symptoms being a diffuse soreness of the body slight fever and profuse sweating about the head and neck, and changes in the osseous system, consisting in a thickening of the epiphyseal cartilages and periosteum and a softening of the bones Through the action of the muscles on the soft bones various deformities are produced, while the periosteal hyperplasia leads to nodular hyperostoses, especially about the head, giving the latter a square appearance (caput quadratum) Dentition and closure of the fontanels are delayed Nervous symptoms are often present, as feverishness laryngismus stridulus and convulsions The liver and spleen are usually enlarged It is a deficiency disease, due to lack of vitamin D **r. adultorum,** osteomalacia, mollities ossium **r. annularis,** congenital rhachitis characterized by the production after birth, of furrows of the bones and fractures (Winckler) **r. micromelica,** intrauterine rhachitis, characterized by shortening of the limbs and thickening of the diaphyses (Winckler) **r. senilis** See *r adultorum*

rhachitism, rachitism (*ra'-kit-izm*) Rhachitis

rhachitol (*ra' kit-ol*) An extract of suprarenal glands, used in the treatment of rhachitis

rhachitome, rachitome (*ra'-kit-ōm*) [*rhachi-*, τέμνειν, to cut] An instrument for opening the spinal canal

rhachitomy, rachitomy (*ra-kit'-o-me*) [*rhachi-*, τέμνειν to cut] 1 Section of the spine. 2 Decollation of the fetus

rhachitropacocainization, rachitropacocainization (*ra ke-tro-pa-ko-ka-in-i za'-shun*) Subarachnoid cocainization by means of tropacocaine

rhachus (*rā'-kus*) [ῥάχος] A ragged wound

rhachiodynia, rachiodynia (*ra-ke-o din'-e ah*) [ῥάχις spine, ὀδύνη, pain] Pain in the spinal cord

rhacoma (*ra ko'-mah*) [ῥακόειν, to rend] Excoriation, rent, or chapping Also, a pendulous condition of the scrotum

rhacosis (*ra-ko'-sis*) [ῥάκος, a rag] The condition of one affected with rhacoma

rhacous (*ra'-kus*) [ῥάκος, a rag] Wrinkled, lacerated

rhæbocrania or **rhebocrania** (*re-bo-kra'-ne-ah*) [ῥαιβός, crooked, κρανιόν, the skull] The condition of wry-neck

rhæboscelia, rhæbosis, (*re bo se'-le ah re bo' sis*) [ῥαιβός, crooked, σκελος leg] Crooked-legged

rhæstocythemia (*rēs-to-si-the'-me-ah*) See *rhestocythemia*

rhagades (*rag' ad ēz*) [ῥαγάς, fissure] Linear cracks or fissures especially in the skin

rhagadia (*rag-a'-de-ah*) See *rhagades*

rhagadiformis (*rag-ad-e for'-mis*) [ῥάγας, fissure, *forma*, shape] Fissured

rhagiocrin (*raj'-e-o-krin*) Clasmatocyte

rhagoid (*rag' oid*) [ῥάξ, a grape εἶδος, likeness] Resembling a grape

rhamma (*ram'-ah*) Suture, *q v*

rhamnegin (*ram'-ne-jin*), $C_{12}H_6O_5$ A glucoside derived from buckthorn berries

rhamnetin (*ram-ne'-tin*) See *rhamnin*

rhamnin (*ram' nin*) [ῥάμνος the buckthorn] 1 A yellow neutral crystalline substance found in buckthorn It contains rhamnetin, a valuable yellow coloring matter 2 A proprietary fluidextract of cascara sagrada, recommended in the treatment of obstinate constipation

rhamnocathartin (*ram-no-kath-art'-in*) [ῥάμνος, buckthorn, καθαρτικός, purging] A yellow, amorphous, substance, a bitter principle contained in the berries of *rhamnus cathartica*

rhamnose (*ram'-nōs*) [*rhamnus*], $C_6H_{12}O_5$ One of the glucoses

rhamnoxanthin (*ram-no-zan' thin*) [ῥάμνος, buckthorn, ξανθός, yellow] See *frangulin*

Rhamnus (*ram'-nus*) [ῥάμνος buckthorn] A genus of trees and shrubs, buckthorns **R. purshiana** (U S P), cascara sagrada The dried bark of *R purshiana*, the California buckthorn It is used as a laxative in habitual constipation Dose 15 gr (1 Gm) Dose of the *extract* (*extractum rhamni purshianæ*, U S P) 4 gr (0 25 Gm), of the *fluid extract* (*fluidextractum rhamni purshianæ*, U S P) 15 min (1 Cc), of the *aromatic fluidextract* (*fluidextractum rhamni purshianæ aromaticum*, U S P) 15 min (1 Cc) See also *Cascara sagrada*

rhanter (*rant'-er*) [ῥαντηρ, a sprinkler] The inner canthus, *q v*

rhaphagra (*raf-a'-grah*) [ῥαφή, a seam, ἄγρα, a seizure] Pain in the cranial sutures

rhaphanedon (*raf-an'-ed-on*) [ῥαφανηδόν] A transverse fracture

rhaphania (*raf-a'-ne-ah*) See *raphania*

rhaphe (*raf'-e*) See *raphe*

rhaphidiospore (*raf-id'-e-o-spōr*) Sporozoite.

rhapontic (*rap-on'-tik*) Pertaining to rhubarb

rhatany (*rat'-an-e*) See *krameria*

rhebocrania. See rhæbocrania

rheboscelia. See rhæboscelia.

rhebosis (*re-bo'-sis*) [βαιβός, bent; σκέλος, leg]. Curvature of the legs.

rhegma (*reg'-mah*) [ῥῆγμα, a rent]. A rupture of the walls of a vessel or of the containing membrane of a tissue, as, for example, the coats of the eye, the walls of the peritoneum. Also, the bursting of an abscess.

rheic (*re'-ik*). Pertaining to rheum or to rhubarb. **r. acid,** chrysophanic acid.

rhein (*re'-in*) [*rheum*]. 1. The precipitate from a tincture of *Rheum palmatum;* it is cathartic, tonic, cholagogue, and antiseptic. Dose 1–4 gr. (0.065–0.25 Gm.). 2. Same as *chrysarobin.*

rhembasmus (*rem-baz'-mus*) [ῥεμβειν, to wander]. Mental distraction, or wandering.

rhenium (*re'-ne-um*) [River *Rhine*]. Name of a rare chemical element newly discovered. Symbol, Re.

rheo- (*re-o*) [ῥέος, current] A prefix denoting pertaining to a current.

rheobasis (*re-ob'-as-is*) [*rheo-;* βαίνειν, to go]. The minimum potential necessary for stimulation.

rheochord (*re'-o-kord*). An instrument serving to graduate the strength of the galvanic current. See *rheostat.*

rheometer (*re-om'-et-er*) [*rheo-;* μέτρον, a measure]. 1. A galvanometer. 2. An apparatus for measuring the velocity of the blood-current.

rheophore (*re'-o-fōr*) [*rheo-;* φέρειν, to bear]. An electrode.

rheoscope (*re'-o-skōp*) [*rheo-;* σκοπεῖν, to see]. An instrument for demonstrating the existence of an electric current; a galvanoscope.

rheostat (*re'-o-stat*) [*rheo-;* ἱστάναι, to stand]. An instrument introduced into an electric current and offering a known resistance, for the purpose of regulating the strength of the current.

rheotachygraphy (*re-o-tak-ig'-raf-e*) [*rheo-;* ταχύς, swift; γράφειν, to write]. The registration of the curve of variation in electromotive action of muscles.

rheotannic acid (*re-o-tan'-ik*). A glucoside, the form in which tannin is found in rhubarb.

rheotaxis (*re-o-taks'-is*) [*rheo-;* τάξις, orderly arrangement]. The reaction of a body to a current of fluid, whereby that body is induced to move either with or against the current of the fluid.

rheotome (*re'-o-tōm*) [*rheo-;* τέμνειν, to cut]. An instrument for breaking and making a galvanic circuit; an interrupter. **r., differential,** one for indicating the negative variation in muscle-currents.

rheotrope (*re'-o-trōp*) [*rheo-;* τρέπειν, to turn]. An apparatus for reversing the direction of an electric current.

rheotropism. Rheotaxis.

rhestocythemia, rhestocythæmia (*res-to-si-the'-me-ah*) [ῥαιστός, destroyed; κίτος, cell; αἷμα, blood]. The presence of broken-down erythrocytes in the blood.

rheum (*re'-um*). See *rhubarb.*

rheum (*room*) [ῥεῦμα, from ῥεῖν, to flow]. Any watery or catarrhal discharge. **r., salt-,** eczema.

rheuma (*roo'-mah*). Same as *rheum.* **r. epidemicum.** Synonym of *influenza.* **r. ventris.** Synonym of *dysentery.*

rheumagon (*roo'-ma-gon*) [*rheum;* ἄγειν, to carry off]. A proprietary preparation of sodium iodide and sodium phosphate for use in gout and syphilis.

rheumapyra. See *rheumatopyra.*

rheumarthritis, rheumarthrosis (*roo-mar-thri'-tis, roo-mar-thro'-sis*) [*rheum;* ἄρθρον, a joint; ιτις, inflammation]. Acute articular rheumatism.

rheumatalgia (*roo-mat-al'-je-ah*) [*rheum;* ἄλγος, pain]. Rheumatic pain.

rheumatic (*roo-mat'-ik*) [*rheum*]. Pertaining to, of the nature of, or affected with rheumatism **r. diathesis,** the condition of body tending to the development of rheumatism. **r. fever,** acute articular rheumatism. **r. gout.** Synonym of *rheumatoid arthritis.*

rheumatin (*roo'-mat-in*). See *saloquinine salicylate.*

rheumatisant (*roo-mat'-is-ant*). One affected with rheumatism.

rheumatism (*roo'-mat-izm*) [*rheum*]. A constitutional disease characterized by pain in the joints and muscles, tending to recur, and associated with exposure to cold and wet. **r., acute articular,** a form characterized by fever, by swelling of various joints, beginning usually in one and rapidly spreading to others, by acid sweats, and by a marked tendency to involve the endocardium, less frequently the pericardium, pleura, and peritoneum. The iris and conjunctiva may also become affected. **r., chronic,** a chronic form in which the symptoms are milder and in which the disease attacks either the muscles (*muscular rheumatism*) or the joints (*chronic articular rheumatism*). **r., gonorrheal,** joint-inflammation occurring in association with gonorrheal urethritis. It generally involves but one joint; if several are affected, it is usually the smaller joints. The course is chronic **r., inflammatory,** acute articular rheumatism. **r., muscular,** muscular pain with or without fever and other rheumatic symptoms. **r., synovial,** a rheumatic disorder of the synovial membranes with serous accumulation. **r., tuberculous,** arthritis due to the toxins of tuberculosis, Poncet's disease.

rheumatismal (*roo-ma-tiz'-mal*) [*rheumatism*]. Pertaining to rheumatism. **r. edema,** rheumatism with painful subcutaneous edema.

rheumatismoid (*roo-mat-iz'-moid*). See *rheumatoid.*

rheumatismus (*roo-ma-tiz'-mus*). Rheumatism.

rheumato-, rheumo- (*roo-mat-o-, roo-mo-*) [*rheumatism*]. Prefixes meaning relating to rheumatism.

rheumatocolica (*roo-mat-o-kol'-ik-ah*) [*rheumato-; colic*]. Rheumatic colic.

rheumatodynia (*roo-mat-o-din'-e-ah*) [*rheumato-;* ὀδύνη, pain]. A dull rheumatic pain.

rheumatoid (*roo'-ma-toid*) [*rheumato-;* εἶδος, like]. Resembling rheumatism. **r. arthritis.** See *arthritis, rheumatoid.*

rheumatokelis (*roo-mat-o-ke'-lis*) [*rheumato-;* κηλίς, a spot]. Purpura occurring in conjunction with rheumatism.

rheumatophthisis (*roo-mat-off'-this-is*) [*rheumato-; phthisis*]. Atrophy the result of rheumatism.

rheumatopyra (*roo-mat-o-pi'-rah*) [*rheumato-;* πῦρ, fire]. Rheumatic fever.

rheumatosis (*roo-mat-o'-sis*) [*rheum*]. The condition due to the action of poisons in the blood affecting the articular and endocardial parts.

rheumatospasm (*roo-mat'-o-spasm*) [*rheumato-;* σπασμός, a spasm]. Spasms due to rheumatism.

rheumic (*roo'-mik*) [*rheum*]. Pertaining to rheum. **r. diathesis,** one that gives rise to cutaneous eruptions.

rheumodontalgia (*roo-mo-don-tal'-je-ah*) [*rheumo-; odontalgia*]. Toothache of rheumatic origin.

rheumoparotiditis (*roo-mo-par-o-tid-i'-tis*). Rheumatic parotiditis.

rheumophthalmia (*roo-moff-thal'-me-ah*) [*rheumo-; ophthalmia*]. Ophthalmia due to rheumatism.

rheumorchitis (*roo-mor-ki'-tis*). Orchitis of rheumatic origin.

rheumotorrhea, rheumatorrhœa (*roo-mo-tor-e'-ah*). Rheumatic otorrhea.

rheumotylus (*roo-mo-til'-us*) [*rheumo-; τύλος*, a knob]. A callus the result of rheumatism.

rhexis (*reks'-is*) [*ῥῆξις*, rupture]. Rupture of a vessel or of an organ.

rhicnosis (*rik-no'-sis*) [*ῥικνός*, shriveled]. A wrinkling of the skin, the result of muscular atrophy.

rhigolene (*rig'-o'-lēn*) [*ῥῖγος*, cold]. A very volatile liquid obtained from petroleum by distillation, and used as a local anesthetic. Its rapid evaporation freezes and benumbs the part upon which it is sprayed.

rhigos (*ri'-gos*) [*ῥῖγος*, cold]. Synonym of rigor.

rhin-, rhino- (*rin-, ri-no-*) [*ῥίς*, nose]. A prefix signifying pertaining to the nose.

rhinæsthesia (*ri-nes-the'-ze-ah*). See *rhinesthesia*.

rhinæus (*ri-ne'-us*) [*rhin-*]. Synonym of *compressor naris*. See *muscles, table of*.

rhinal (*ri'-nal*) [*rhin-*]. Pertaining to the nose.

rhinalgia (*ri-nal'-je-ah*) [*rhin-; ἄλγος*, pain]. Pain in the nose.

rhinalgin (*ri-nal'-jin*). A nasal suppository, recommended in coryza, said to contain cacao-butter, 1 Gm.; alumnol, 0.01 Gm.; menthol, 0.025 Gm.; and oil of valerian, 0.025 Gm.

rhinanchone (*ri-nan'-ko-nē*) [*rhin-; ἀγχόνη*, strangulation]. Painful constriction of the nasal passages.

rhinantralgia (*ri-nan-tral'-je-ah*) [*rhino-; ἄντρον*, a cavity; *ἄλγος*, pain]. Pain in the cavities of the nose.

rhinedema, rhinœdema (*ri-ne-de'-mah*) [*rhin-; edema*]. Edema affecting the nose.

rhinelcos (*ri-nel'-kos*) [*rhin-; ἕλκος*, an ulcer]. A nasal ulcer.

rhinencephalia (*ri-nen-sef-a'-le-ah*) [*rhino-; ἐγκέφαλος*, the brain]. A monstrosity with an extreme elongation of the nose.

rhinencephalic (*ri-nen-sef-al'-ik*) [*rhino-; ἐγκέφαλος*, brain]. 1. Pertaining to or of the nature of a rhinencephalus. 2. Pertaining to the rhinencephalon.

rhinencephalon (*ri-nen-sef'-al-on*) [*rhin-; ἐγκέφαλος*, brain]. The olfactory lobe of the brain.

rhinencephalus (*ri-nen-sef'-al-us*). See *rhinocephalus*.

rhinenchysia (*ri-nen-ki'-ze-ah*) [*rhino-; ἔγχυσις*, a pouring in]. Douching of the nasal passages.

rhinenchysis (*ri-nen'-ki-sis*) [*rhin-; ἐγχεῖν*, to pour in]. The injection of liquid into the nasal cavities.

rhinenchyta (*ri-nen'-kit-ah*) [*rhino-; ἔγχυτος*, poured in]. A nasal syringe.

rhinenchytous (*ri-nen'-kit-us*) [*rhino-; ἔγχυτος*, poured in]. Pertaining to nasal injections.

rhinenchytum (*ri-nen'-kit-um*) [*rhino-; ἐγχεῖν*, to pour in]. A liquid used in nasal douching.

rhinesthesia, rhinæsthesia (*ri-nes-the'-ze-ah*) [*rhin-; αἴσθησις*, sensation]. The sense of smell.

rhineurynter (*ri-nū-rin'-ter*) [*rhin-; εὐρύνειν*, to dilate]. A distensible bag or sac which is inflated after insertion into the nostril.

rhinhematoma, rhinhæmatoma (*rin-hem-at-o'-mah*) [*rhin-; hematoma*]. An effusion of blood into the nasal cartilage.

rhiniatry (*ri-ni'-at-re*) [*ῥίς*, the nose; *ἰατρεία*, a medical treatment]. Synonym of *rhinology*.

rhinic (*rin'-ik*) [*rhino-*]. Pertaining to the nose.

rhinion (*rin'-e-on*) [*ῥίς*, nose]. The lower point of the suture between the nasal bones. See under *craniometric point*.

rhinism, rhinismus (*ri'-nism*) (*ri-nis'-mus*) [*rhino-*]. A nasal quality of voice.

rhinitis (*ri-ni'-tis*) [*rhin-; ιτις*, inflammation]. 1. Inflammation of the nasal mucous membrane. 2. A medicinal preparation of belladonna, camphor, and quinine. **r., acute,** coryza; cold in the head. **r., atrophic,** that followed by atrophy of the mucous membrane. **r. caseosa,** that marked by gelatinous fetid discharge. **r., chronic,** a form usually due to repeated attacks of acute rhinitis, and producing in the early stages hypertrophy of the mucous membrane (*hypertrophic rhinitis*) and in the later stages atrophy (*atrophic rhinitis*), and the presence of dark, offensively smelling crusts. **r., fibrinous,** a rare form of rhinitis characterized by the development of a false membrane in the nose. **r., hypertrophic,** that marked by hypertrophy of the nasal mucous membrane. **r., pseudomembranous.** See *r., fibrinous*. **r., syphilitic,** a chronic form due to syphilis, and usually attended by ulceration and caries of the bone and an offensive discharge (ozena). **r., tuberculous,** that due to the tubercle bacillus; it is usually associated with ulceration and caries of the bones. **r., vasomotor,** hay-fever.

rhino- (*ri'-no-*) [*ῥίς, ῥινος*, nose]. A prefix denoting relation to or connection with the nose

rhinoantritis (*ri-no-an-tri'-tis*) [*rhino-; antritis*]. Inflammation of the nasal mucous membrane and of the antrum of Highmore.

rhinoblennorrhea, rhinoblennorhœa (*ri-no-blen-or-e'-ah*) [*rhino-; blenorrhea*]. Synonym of *rhinorrhea*.

rhinobyon (*ri-no'-be-on*) [*rhino-; βύειν*, to stop]. A nasal plug or tampon.

rhinocace (*ri-nok'-as-e*) [*rhino-; κακός*, evil]. Fetid ulceration of the nose.

rhinocanthectomy (*ri-no-kan-thek'-to-me*). See *rhinommectomy*.

rhinocarcinoma (*ri-no-kar-sin-o'-mah*) [*rhino-; carcinoma*]. Nasal carcinoma.

rhinocatarrhus (*ri-no-kat-ar'-rus*) [*rhino-; catarrh*]. Synonym of *coryza*.

rhinocaul (*ri'-no-kawl*) [*rhino-; καυλός*, a stalk]. The crus, peduncle, or support of the olfactory bulb.

rhinocele, rhinocœle (*ri'-no-sēl*), or **rhinocœlia** (*ri-no-se'-le-a*) [*rhino-; κοιλία*, hollow]. The hollow, or ventricle, of the rhinencephalon, in man it is very small or quite obliterated.

rhinocephalus (*ri-no-sef'-al-us*) [*rhino-; κεφαλή*, head]. A monster in which the nose resembles a tube and the eyes are fused below the nose.

rhinocheiloplasty (*ri-no-ki'-lo-plas-te*) [*rhino-; cheiloplasty*]. Plastic surgery of the nose and lip.

rhinocleisis (*ri-no-kli'-sis*) [*rhino-; κλείσις*, fastening]. Nasal obstruction.

rhinocnesmus (*ri-nok-nez'-mus*) [*rhino-; κνησμός*, an itching]. Itching of the nose.

rhinoculin (*ri-nok'-ū-lin*) [*ῥίς*, nose]. Trade name of a preparation containing anesthesin, paranephrin, subcutin, glycerin, and boric acid; for use in hay fever.

rhinodacryolith (*ri-no-dak'-re-o-lith*) [*rhino-; dacryolith*]. A lacrimal stone in the nasal duct.

rhinoderma (*ri-no-der'-mah*). See *keratosis pilaris*.

rhinodyne (*ri'-no-dīn*) [ῥίς, nose; ὀδύνη, pain]. Trade name of a preparation containing extract of suprarenal gland, for use in hay fever.

rhinodynia (*ri-no-din'-e-ah*) [*rhino-*; ὀδύνη, pain]. Any pain in the nose.

rhinogenous (*ri-noj'-en-us*) [*rhino-*; γεννᾶν, to produce]. Having its origin in the nose.

rhinogramma (*ri-no-gram'-ah*) [*rhino-*; γράμμα, a line]. The nasal line.

rhinokyphosis (*ri-no-ki-fo'-sis*) [*rhino-*; κύφος, a hump]. A nose with a prominent bridge.

rhinolalia (*ri-no-la'-le-ah*) [*rhino-*; λαλιά, speech]. A nasal tone in the voice due to undue closure (*rhinolalia clausa*) or to undue patulousness (*rhinolalia aperta*) of the posterior nares.

rhinolaryngitis (*ri-no-lar-in-ji'-tis*). Simultaneous inflammation of the mucosa of the nose and larynx.

rhinolaryngology (*ri-no-lar-in-gol'-o-je*). The science of the anatomy, physiology and pathology of the nose and larynx.

rhinolerema (*ri-no-ler-e'-mah*) [*rhino-*; λήρημα, silly talk]. Same as *rhinoleresis*.

rhinoleresis (*ri-no-ler-e'-sis*) [*rhino-*; λήρησις, folly]. Perverted olfactory sense.

rhinolethrum (*ri-no-leth'-rum*) [*rhino-*; δλεθρος, destruction]. Destruction of the nose.

rhinolin (*ri'-no-lin*). A proprietary antiseptic and analgesic substance.

rhinolith (*ri'-no-lith*) [*rhino-*; λίθος, a stone]. A nasal calculus.

rhinolithiasis (*ri-no-lith-i'-as-is*) [*rhino-*; λίθος, stone]. The formation of nasal calculi.

rhinolite (*ri'-no-līt*). See *rhinolith*.

rhinological, rhinologic (*ri-no-loj'-ik-al*) (*ri-no-loj'-ik*) [*rhinology*] Pertaining to rhinology.

rhinologist (*ri-nol'-o-jist*) [*rhinology*]. A specialist in the treatment of diseases of the nose.

rhinology (*ri-nol'-o-je*) [*rhino-*; λόγος, science]. The science of the anatomy, functions, and diseases of the nose.

rhinomanometer (*ri-no-man-om'-et-er*) [*rhino-*; *manometer*]. A manometer used for measuring the amount of nasal obstruction.

rhinometaplasty (*ri-no-met-ap-las'-te*). Rhinoplasty, *q. v.*

rhinometer (*ri-nom'-et-er*) [*rhino-*; μέτρον, a measure]. An instrument for measuring the nose.

rhinomiosis (*ri-no-mi-o'-sis*) [*rhino-*; μείωσις, a lessening]. Operative shortening of the nose.

rhinommectomy (*ri-nom-ek'-to-me*) [*rhino-*; ὄμμα, the eye; ἐκτομή, a cutting out]. Excision of the inner canthus of the eye.

rhinomycosis (*ri-no-mi-ko'-sis*). The presence of fungi in the mucous membrane and secretion of the nose.

rhinonecrosis (*ri-no-ne-kro'-sis*). Necrosis of the nasal bones.

rhinopharyngeal (*ri-no-far-in'-je-al*). Pertaining to the nose and pharynx, or to the nasopharynx.

rhinopharyngitis (*ri-no-far-in-ji'-tis*) [*rhino-*; *pharyngitis*]. Inflammation of the nose and pharynx, or of the nasopharynx.

rhinopharyngolith (*ri-no-far-ing'-go-lith*) [*rhino-*; *pharynx*; λίθος, a stone]. A nasopharyngeal calculus.

rhinopharynx (*ri-no-far'-ingks*). See *nasopharynx*.

rhinophonia (*ri-no-fo'-ne-ah*) [*rhino-*; φωνή, sound]. A nasal tone in speaking.

rhinophyma (*ri-no-fi'-mah*) [*rhino-*; φῦμα, tumor]. A form of acne rosacea of the nose characterized by a marked hypertrophy of the blood-vessels and the connective tissue, producing a lobulated appearance of the nose.

rhinoplastic (*ri-no-plas'-tik*) [*rhino-*; πλάσσειν, to mold]. Pertaining to or having the character of rhinoplasty. **r. operation,** a surgical operation for creating an artificial nose or reconstructing a nose partially destroyed.

rhinoplasty (*ri'-no-plas-te*) [*rhino-*; πλάσσειν, to mold]. A plastic operation upon the nose, to replace lost tissue. **r., English,** Syme's operation, in which flaps are taken from the cheek. **r., German,** v. Graefe's modification of the Tagliacotian rhinoplasty. The entire operation is done at a single sitting. **r. of v. Graefe.** Same as *r., German.* **r., heteroplastic,** rhinoplasty in which the tissues are removed from some other than the one operated upon. **r. Indian,** an operation originating in India, in which the flap is taken from the forehead. **r., Italian.** Synonym of *r., Tagliacotian.* **r., Langenbeck's,** a modification of the Indian method, in which the periosteum is included in the frontal flap. **r., osteoplastic,** rhinoplasty with transplantation of a cartilaginous flap to replace the septum nasi. **r., periosteal.** See *r., Langenbeck's.* **r. of Post,** a modified Tagliacotian rhinoplasty, the flap being taken from the finger of the patient. **r. of Syme,** English rhinoplasty. **r., Tagliacotian,** rhinoplasty as performed by Tagliacozzi. The flap is taken from the skin of the arm. **r. of Wood.** See *Wood.*

rhinopolyp, rhinopolypus (*ri-no-pol'-ip, -us*) [*rhino-*; *polyp*]. Polyp of the nose.

rhinopsia (*ri-nop'-se-ah*) [*rhino-*; ὄψις, vision]. Internal strabismus.

rhinoreaction (*ri-no-re-ak'-shun*). A tuberculin test made on the mucous surface of the nose.

rhinorrhagia (*ri-nor-a'-je-ah*) [*rhino-*; ῥήγνυναι, to burst forth]. Hemorrhage from the nose.

rhinorrhaphy (*ri-nor'-a-fe*) [*rhino-*; ῥαφή, suture]. Reduction of the tissue of the nose by section, and by suturing the edges of the wound.

rhinorrhea, rhinorrhœa (*ri-nor-e'-ah*) [*rhino-*; ῥοία, a flow]. A mucous discharge from the nose.

rhinosalpingitis (*ri-no-sal-pin-ji'-tis*). Simultaneous inflammation of the nasal mucosa and the Eustachian tube.

rhinosclerin (*ri-no-skle'-rin*) [*rhinoscleroma*]. A preparation from cultures of *Bacillus rhinoscleromatis;* for treating rhinoscleroma.

rhinoscleroma (*ri-no-skle-ro'-mah*) [*rhino-*; σκληρός, hard; ὄμα, tumor]. A new growth of almost stony hardness, affecting the anterior nares and adjacent parts. The disease commences in the mucous membrane of the anterior nares and adjoining skin, the lesions consisting of flat, isolated, or coalescent nodules. It is thought to be due to *Bacillus rhinoscleromatis.*

rhinoscope (*ri'-no-skōp*) [*rhino-*; σκοπεῖν, to examine]. An instrument for examination of the cavities of the nose.

rhinoscopic (*ri-no-skop'-ik*) [*rhino-*; σκοπεῖν, to view]. Pertaining to the rhinoscope, or to rhinoscopy.

rhinoscopy (*ri-nos'-ko-pe*) [see *rhinoscope*]. Examination of the nasal fossæ by means of the rhinoscope; that of the anterior nares is termed *anterior rhinoscopy;* that of the posterior nares, *posterior rhinoscopy.*

rhinosis (*ri-no'-sis*). Synonym of *rhicnosis.*

rhinosporidiosis (*ri-no-spor-id-e-o'-sis*). Invasion of the nasal cavity by the *Rhinosporidium kinealyi.*

Rhinosporidium kinealyi (*ri-no-spor-id'-e-um, kin-e-al'-yi*). A neosporidium found in India in tumors of the septum nasi.

rhinostenosis (*rī-no-sten-o'-sis*) [*rhino-; στένωσις*, obstruction]. Nasal obstruction.

rhinothrix (*rī'-no-thriks*) [*rhino-; θρίξ*, a hair; pl., *rhinotriches*]. A hair growing in the nostril; a vibrissa.

rhinotomy (*rī-not'-o-me*) [*rhino-; τόμη*, a cutting]. Incision of the nose.

Rhipicephalus (*rī-pis-ef'-al-us*) [*ῥιπίς*, a fan; *κεφαλή*, head]. A genus of ticks. **R. shipleyi**, the brown tick of South Africa, the agent of transmission of Rhodesian cattle disease.

rhiptasmus (*rip-taz'-mus*). Synonym of *ballismus*.

rhizagra (*riz-a'-grah*) [*rhizo-; ἄγρα*, seizure]. An instrument for extracting the roots of teeth.

rhizo- (*rī-zo-*) [*rhizome*]. A prefix meaning root.

rhizodontropy (*rī-zo-don'-tro-pe*) [*rhizo-, ὀδούς*, tooth; *τροπή*, turn, pivot]. The pivoting of an artificial crown upon the root of a tooth.

rhizodontrypy (*rī-zo-don'-trip-e*) [*rhizo-; ὀδούς*, tooth; *τρύπη*, hole]. Surgical puncture of the root of a tooth.

rhizoid (*rī'-zoid*) [*rhizo-; εἶδος*, form]. 1. Like a root. 2. Slender, root-like filaments, the organs of attachment in many cryptogams. 3. A bacterial plate culture of an irregular branched or root-like character.

rhizoma (*rī-zo'-mah*) [*pl., rhizomata*]. See *rhizome*.

rhizome (*rī'-zōm*) [*ῥίζα*, root]. A subterranean stem having roots at its nodes and a bud or shoot at its apex.

rhizomelic (*rī-zo-mel'-ik*) [*rhizo-; μέλος*, a limb] Affecting or relating to the roots of members.

rhizomorphoid (*rī-zo-mor'-foid*) [*rhizo-; μορφή*, form; *εἶξος*, like]. Having the form of a root.

rhizoneure (*rī'-zo-nūr*) [*rhizo-; νεῦρον*, a nerve]. One of those cells that form nerve-roots.

rhizoneuron (*rī-zo-nū'-ron*) [see *rhizoneure*]. A neuron the nerve-processes of which leave the spinal cord through the anterior horn; a motor nerve-cell.

rhizonychia (*rī-zo-nik'-e-ah*) [*rhizo-; ὄνυξ*, the nail]. The root of the nail.

rhizonychium (*rī-zo-nik'-e-um*) [*rhizo-; ὄνυξ*, the nail]. The root of the nail.

rhizopod (*rī'-zo-pod*) [*rhizo-; πούς*, foot]. A member of the *Rhizopoda*, a subclass of protozoa.

rhizotomy (*rī-zot'-om-e*) [*rhizo-; τομή*, a cutting]. Section of the posterior spinal nerve roots.

rho 1, 2 (*ro*) [G]. Gonadotropic factors in a hormone derived from the anterior pituitary gland.

rhodalline (*ro-dal'-ēn*) See *thiosinamine*.

rhodanate (*ro'-dan-āt*). A sulphocyanate

rhodeorrhetin (*ro-de-or-re'-tin*). Syn. *convolvulin*.

Rhodesian cattle disease. African transmitted by the brown tick, *Rhipicephalus shipleyi*.

rhodium (*ro'-de-um*) [*ῥόδιος*, rosy]. A rare metal (symbol, Rh, at. wt., 102.9) of the platinum group. See *elements, table of*.

Rhodobacteriaceæ (*ro-dō-bak-te-re-a'-se-e*) [*ῥόδον*, rose; bacteria]. A group of sulphur and bacteriopurpurin bacteria. See *table* p. 860.

rhodogenesis (*ro-do-jen'-es-is*) [*ῥόδον*, rose; *γενᾶν*, to produce]. The regeneration of visual purple which has been bleached by light.

rhodophane (*ro'-do-fān*) [*ῥόδον*, rose; *φανής*, appearing]. A red pigment found in the retinal cones.

rhodophylactic (*ro-do-fil-ak'-tik*). Pertaining to rhodophylaxis.

rhodophylaxis (*ro-do-fil-aks'-is*) [*ῥόδον*, rose; *φύλαξις*, a guarding]. The property possessed by the retinal epithelium of producing rhodogenesis.

rhodopsin (*ro-dop'-sin*) [*ῥόδον*, rose; *ὤψ*, eye]. Visual purple; a retinal substance the color of; which is preserved by darkness, but bleached by daylight; it is contained in the retinal rods.

rhœadine (*re'-ad-in*) [*polaς*, a kind of poppy], $CHNO_8$. A crystallizable alkaloid obtained from *Papaver rhœas*.

rhœbdesis (*reb-de'-sis*) [*ῥοῖβδησις*]. Absorption, resorption.

rhois (*ro-is'*) [L.]. Genitive of *rhus, q. v.*

rhombencephalon (*rom-ben-sef'-al-on*) [*ῥόμβος*, a lozenge shaped figure; *ἐγκέφαλος*, brain]. The metencephalon or hind-brain together with the myelencephalon or after-brain.

rhomboatloideus (*rom-bo-at-loid'-e-us*). See under *muscle*.

rhombocele, rhombocœle (*rom'-bo-sēl*). Same as *rhombocœlia*.

rhombocœlia (*rom-bo-se'-le-ah*) [*ῥόμβος*, rhomb; *κοιλία*, hollow]. The *sinus rhomboidalis;* a dilatation of the cavity of the spinal cord in the sacral region.

rhomboid (*rom'-boid*) [*ῥόμβος*, a rhomb; *εἶδος*, resemblance]. Having a shape similar to that of a rhomb, a quadrilateral figure with opposite sides equal and parallel and oblique angles. **r. body.** See *r. fossa*. **r. fossa,** the fourth ventricle of the brain. **r. ligament.** See *ligament, rhomboid*. **r. muscle.** See under *muscle*. **r. sinus.** See *r. fossa*.

rhomboideus (*rom-boid'-e-us*). See under *muscle*.

rhoncal (*rong'-kal*). Same as *rhonchal*.

rhonchal, rhonchial (*rong'-kal, rong'-ke-al*) [*rhonchus*] Relating to or produced by a rhonchus, as *rhonchal* fremitus.

rhonchus (*rong'-kus*) [*ῥόγχος*, snore] A rattling sound produced in the throat or bronchial tubes during respiration. See *rale*.

rhotacism (*ro'-tas-izm*) [*ῥῶ*, the Greek *ρ, r*] The use of the *r* sound in place of other speech-sounds; the too strong utterance of the letter *r*.

rhubarb (*roo'-barb*) [*ῥῆον*, rhubarb]. The general name for plants of the genus *Rheum*, of the order *Polygonaceæ*. The official drug (*rheum*, U. S. P.; *rhei radix*, B. P.) is the bark of *Rheum officinale* or *Rheum palmatum;* it contains chrysophanic acid, tannic acid (rheotannic acid), and several coloring principles, and is used as a laxative, stomachic, and astringent. Its chief uses are in dyspepsia with constipation, in the diarrhea of children, and in the beginning of bilious fevers. Dose 5–30 gr. (0.32–2.0 Gm.). **r., extract of** (*extractum rhei*, U. S. P., B. P.). Dose 10–15 gr. (0.65–1.0 Gm.). **r., fluid extract of** (*fluidextractum rhei*, U. S. P.). Dose 10–30 min. (0.65–2.0 Cc.). **r., infusion of** (*infusum rhei*, B. P.) Dose 1–2 oz. (32–64 Cc.). **r., pills of, compound** (*pilulæ rhei compositæ*, U. S. P.), pills of rhubarb and aloes. Dose 2–4 pills. **r., powder of, compound** (*pulvis rhei compositus*, U. S. P., B. P.). Gregory's powder. Dose ½–1 dr. (2–4 Gm.). **r. and soda, mixture of** (*mistura rhei et sodæ*, U. S. P.). Dose ½–1 dr. (2–4 Gm.). **r., syrup of** (*syrupus rhei*, U. S. P., B. P.). Dose 1 dr. (4 Cc.). **r., syrup of, aromatic** (*syrupus rhei aromaticus*, U. S. P.). Dose 1 dr. (4 Cc.). Both the syrup and the aromatic syrup are used chiefly for children, in the doses given. **r., tincture of** (*tinctura rhei*, U. S. P., B. P.). Dose 1–2 dr. (4–8 Cc.). **r., tincture of, aromatic** (*tinctura rhei aromatica*, U. S. P.). Dose ½–1 dr. (2–4 Cc.). **r., wine of** (*vinum rhei*, B. P.). Dose 1–4 dr. (4–16 Cc.).

Rhus (*rus*) [gen., *rhois*]. [*ῥοῦς*, sumac]. A genus of shrubs or small trees of the order *Anacardiaceæ*. The *dried fruit of R. glabra*, sumac,

constitutes the *Rhus glabra* of the U. S. P., and is used as an astringent in inflammations of the mouth and throat, in the form of a decoction or the official *fluidextractum rhois glabræ*. *R. toxicodendron*, the poison-ivy, is a powerful irritant and produces in susceptible persons a violent dermatitis with vesicles and intense itching (ivy-poisoning). The active agent seems to be an acid called toxicodendric acid. In overdoses taken internally it acts as a narcotic poison. It has been employed in chronic rheumatism and in incontinence of urine. *R. venenata*, swamp-sumac, is also poisonous.

rhusin (*roo'-sin*). Precipitate from a tincture of the root-bark of sumach, *Rhus glabra;* tonic, astringent, and antiseptic. Dose 1 to 2 gr.

Rhynchota (*rin-ko'-tah*). An order of sucking insects, including the *Pediculidæ* and *Acanthiidæ*.

rhypophobia (*ri-po-fo'-be-ah*) [ῥύπος, filth; φοβεῖν, to fear]. A morbid dread of filth.

rhyptic (*rip'-tik*) [ῥύπτειν, to cleanse]. Detergent; cleansing; cathartic.

rhypus (*ri'-pus*) [ῥύπος]. Dirt; sordes.

rhysema (*ri-se'-mah*) [ῥύσημα]. Wrinkle.

rhythm (*rithm*) [ῥυθμός, rhythm]. Action or function recurring at regular intervals. **r., gallop,** a form of heart action in which the cardiac sounds occur in groups of three.

rhythmic (*rith'-mik*). Pertaining to or having the quality of rhythm. **r. segmentations,** Cannon's term for rhythmic localized contractions occurring in the small intestine during digestion.

rhythmophone (*rith'-mo-fōn*) [*rhythm;* θωνή, sound]. A form of microphone for studying the heart-beat and pulse-beat.

rhytidectomy (*rit-id-ek'-to-me*) [ῥυτίς, a wrinkle; ἐκτόμη, excision]. Excision of wrinkles

rhytidosis (*rit-id-o'-sis*). A wrinkling. *Cf. rutidosis.*

rib [AS., *ribb*]. One of the 24 long, flat, curved bones forming the wall of the thorax **r.s, abdominal.** 1. The floating ribs. 2. Ossifications of the inscriptiones tendineæ. **r.s, asternal,** the false ribs. **r.s, cervical,** rib-like processes extending ventrally from the cervical vertebræ. **r., false,** one of the five lower ribs not attached to the sternum directly. **r., floating,** one of the last two ribs which have one end free. **r.s, short,** the false ribs. **r., slipping,** excessive mobility of the lower intercostal joints. **r.s, sternal,** the true ribs. **r., true,** one of the seven upper ribs that are attached to the sternum. **r.s, vertebrochondral,** the highest three false ribs; they are united in front by their costal cartilages.

riba (*ri'-bah*). Trade name of an albumin preparation obtained from the flesh of fish, said to be of use in anemia.

Ribbert's theory (*rib'-ert*) [Moritz Wilhelm Hugo *Ribbert*, German pathologist, 1855–1920]. Tumors are believed to spring from cell-rests resulting from diminished tension of surrounding tissues.

Ribble's bandage (*ribl*). The spica bandage for the instep.

Ribes' bag (*rēb*) [Camille Champetier de *Ribes*, French obstetrician, 1848–]. A rubber bag used to dilate the cervix uteri.

Ribes' ganglion (*rēb*) [François *Ribes*, French physician, 1800–1864]. A small ganglion of the sympathetic system situated on the anterior communicating artery.

ribesin (*ri-be'-sin*) [*ribesium*, currant]. The juice of the black currant. *Ribes nigrum*, used for staining microscopic sections.

rice (*rīs*). A plant, *Oryza sativa*, of the *Gramineæ;* also its seed. Rice is used as a food, as a demulcent, and, in the form of rice-water, as a drink in fevers. **r.-seed bodies,** peculiar small, white bodies resembling grains of rice, found in the so-called ganglia occurring on tendons. **r.-water evacuations,** the name given to the bowel discharges in cholera.

Richardson's method of auscultation (*ritsh'-ard-son*) [Sir Benjamin Ward *Richardson*, English physician, 1828–1896]. The introduction into the esophagus of an elastic bougie or tube connected with the ear-pieces of a stethoscope. **R.'s sign,** a fillet applied to the veins of the arm will not cause filling of the veins on the distal side of the fillet if death be present. **R.'s spray-producer,** an apparatus for throwing a spray of ether for the production of local anesthesia.

Richet's aneurysm (*re'-sha*) [Didier Dominique Alfred *Richet*, French surgeon, 1816–1891]. Fusiform aneurysm. **R.'s bandage.** A form of plaster-of-Paris bandage to which a small amount of gelatin has been added.

Richter's hernia (*rik'-ter*) [August Gottlieb *Richter*, German surgeon, 1742–1812]. Partial enterocele; strangulated enterocele in which only part of the circumference of the gut is constricted.

Richter-Monro's line. See *Monro's line.*

ricin (*ris'-in*) [*ricinus*, castor oil]. A poisonous proteid found in the castor-oil bean.

ricini oleum. Castor oil; see *ricinus.*

ricinine (*ris'-in-ēn*) [*ricinus*]. A poisonous crystalline substance obtained from castor-oil.

ricinism (*ris'-in-izm*). Poisoning from the seeds of *Ricinus communis;* it is marked by hemorrhagic gastroenteritis and icterus.

ricinus (*ris'-in-us*) [L., "a tick," from the resemblance of the seed to that insect]. A plant or tree, *R. communis*, or castor-oil plant, of the order *Euphorbiacæ*. **ricini, oleum** (U. S. P.), castor-oil, the fixed oil expressed from the seeds of *R. communis;* it is used as a cathartic in constipation, colic, and irritative diarrheas. Dose ½ oz. (16 Cc.).

rickets (*rik'-ets*). See *rhachitis.*

Rickettsia (*rik-et'-se-ah*) [Howard Taylor *Ricketts*, American pathologist, 1871–1910]. A class of organisms, either bacterial or protozoal, found in typhus fever, trench fever, and Rocky Mountain spotted fever. Their exact nature and pathogenicity are undetermined.

rickety (*rik'-et-e*) [*rickets*]. Affected with or distorted by rickets.

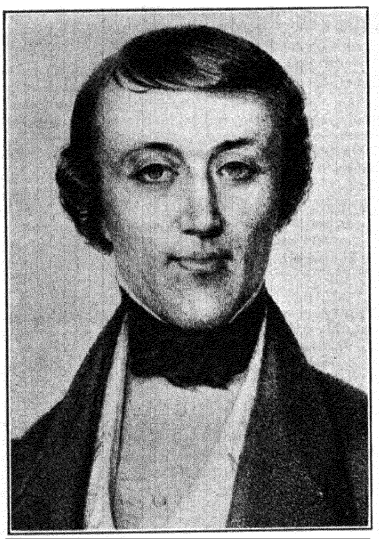
Ricord's chancre (*re-kor'*) [Philippe *Ricord*, French surgeon, 1800–1889]. The parchment-like initial lesion of syphilis. Syn., *chancre parcheminé.*

rictus (*rik'-tus*) [L., from *ringi*, to gape]. A fissure or cleft; a gaping, as of the mouth. Risus ardonicus. **r. lupinus,** cleft palate.

Ridell's operation (*rid-el'*). Removal of the anterior and inferior walls of the frontal sinus in cases of chronic inflammation of the sinus.

rider's bone. An osseous formation in the adductor muscles of the leg, from long-continued pressure of the leg against the saddle. **r.'s bursa,** an enlarged bursa, produced in the same way as the rider's bone. **r.'s leg,** strain of the adductor muscles of the thigh.

ridge (*rij*) [ME., *rigge*, the back of a man or



PHILLIPPE RICORD.

beast]. An extended elevation or crest. **r., genital,** the germ-ridge, in front of and internal to the Wolffian body, from which the internal reproductive organs are developed. **r., intervertebral,** that on the vertebral end of a rib dividing the articular surface into two portions. **r., maxillary,** the dental crest; a ridge of vascular fibrous tissue along the alveolar processes of the fetus. **r. oblique,** a ridge on the grinding surface of an upper molar tooth. **r.s, occipital,** the superior and inferior curved lines of the occipital bone. **r.s, palatine,** the central ridge together with the lateral corrugations of the mucosa of the hard palate; they are especially noticeable in the human fetus. **r., temporal,** that extending from the external angular process of the frontal bone, across the frontal and parietal bones, and terminating in the posterior root of the zygomatic process.

ridgel (*rij'-el*) [origin uncertain]. A male animal having one testicle removed or wanting.

ridgeling (*rij'-ling*). See *ridgel*.

riding of bones. In surgery, the displacement of the fractured ends of bones which are forced past each other by muscular contraction, instead of remaining end to end.

Ridley's sinus [Humphrey *Ridley*, English anatomist, 1653–1708]. The circular sinus.

Riedel's process, or **lobe** (*re'-del*) [Bernhard Moritz Carl Ludwig *Riedel*, German surgeon, 1846–1916]. A tongue-shaped process of the liver extending downward, and frequently felt over the enlarged gall-bladder in cases of cholelithiasis.

Riegel's pulse (*re'-gel*) [Franz *Riegel*, German physician, 1843–1904]. A pulse which becomes smaller during expiration. **R.'s syndrome,** Riegel's disease; the association of tachycardia with troubles simulating asthma.

Riegler's test for albumin. 1. Calcium naphtholsulphonate, 8; citric acid, 8; dissolve in distilled water, 200; 10 Cc. of urine is mixed with 10 to 20 drops of the reagent. Traces of albumin are indicated by a turbidity; larger quantities by a precipitate. Quantitative determination may be made with an albuminometer. 2. Ten Gm. betanaphthalinsulphonic acid are well shaken with 200 Cc. water and filtered. A turbidity or precipitate on adding 20 to 30 drops of reagent to 5 to 6 Cc. of fluid indicates albumin. Sensitiveness, 1:40,000. Albumoses and peptones react in a similar manner, but the precipitate disappears on warming and reappears on cooling. **R.'s test for albumoses and peptones,** dissolve 5 Gm. paranitranilin in 25 Cc. of water and 6 Cc. concentrated sulphuric acid; add 100 Cc. water, then a solution of sodium nitrite 3 Gm. in 25 Cc. water, and make up to 500 Cc. with water. Filter and preserve in the dark. Mix 10 Cc. reagent with 10 Cc fluid to be tested, then add 30 drops 10% solution NaOH—if very small quantities of albumoses or peptones are present, a yellowish orange color develops; with notable quantities a blood-red, even the froth on shaking being red. On now adding excess of H_2SO_4 an orange or brownish precipitate forms. **R.'s test for aldehydes and glucose,** heat 0.1 Gm. phenylhydrazin hydrochloride, 0.5 Gm. crystal sodium acetate, and 1 Cc. sugar solution until dissolved. When near boiling-point add 20 to 30 drops 10% NaOH without shaking—in a few seconds to 5 minutes liquid becomes violet-red, even if there is but 0.005% sugar present. If no sugar present, color will be a slight pink. For sugar in urine, color must develop within one minute to afford physiological significance. Reaction also occurs with aldehydes, hence absence of these must be assured. According to Jolles, absence of albumin must also be assured. Reaction uninfluenced by uric acid or creatinin. **R.'s test for bile-pigments,** on adding an excess of paradiozonitranilin solution to an alkaline solution of bilirubin or biliverdin intensely colored reddish-violet flocks are precipitated, soluble in chloroform, alcohol, or benzine, and affording reddish-violet or violet solution. **R.'s test for nitrites,** 15 Cc. of the fluid to be examined is mixed in a test-tube with 0.02 to 0.03 Gm. of the naphthol reagent (equal parts naphthionic acid and pure betanaphthol) and 2 or 3 drops concentrated HCl, shaken, and 1 Cc. strong NH_3 poured down the side of the tube, while held in a slanting position; presence of nitrites is indicated by appearance of a red zone, and on shaking the whole solution turns red. **R.'s test for uric acid,** paranitranilin, 0.5 Gm.; water, 10 Cc.; pure concentrated H_2SO_4, 15 drops. Put into a glass flask of 150 Cc. capacity, and heat with agitation until dissolved. Water 20 Cc. is now added, the mixture cooled quickly, 2.5% $NaNO_2$ solution 10 Cc. is added, and diluted, after 15 minutes, with water 60 Cc. The mixture is shaken up repeatedly and filtered. The formation of a blue or green color on adding the reagent and 10% NaOH solution indicates presence of uric acid.

Rieux's hernia (*re-oo*). Retrocecal hernia

Riga's disease (*re'-gah*). Papillomatous ulceration of the frenum of the tongue, covered with a whitish, diphtheroid exudate.

Rigal's suture (*re-gal'*) [Joseph Jean Antoine *Rigal*, French surgeon, 1797–1865]. Twisted rubber suture for harelip operations.

Riggs's disease [John M. *Riggs*, American dentist, 1810–1885]. Pyorrhœa alveolaris. See *Fauchard's disease*.

right (*rīt*). Belonging to or located upon that side which, with mammals contains less of the heart and is on the east when the face is toward the north; dextral. **r.-brained,** having the speech-center in the right instead of the left hemisphere. **r.-eared,** preferring the dextral ear as the one with which to hear sounds. **r.-eyed,** preferring the dextral eye as the dominant one. **r.-eyedness,** dextrocularity, the condition of using the right eye with more expertness and correctness than the left. **r.-footed,** choosing the dextral foot as the one to guide and base action, from which to spring in beginning to march, in spading, etc. **r. hand,** see *dexter*. **r.-handed,** using the right hand with more freedom and effect than the left; preferring the right hand for the more expert or intellectual tasks. **r.-handedness,** the condition of being right-handed.

rigid (*rij'-id*) [*rigidus*, stiff]. Stiff, hard. **r. os,** see *rigidity, anatomical*.

rigiditas (*rij-id'-it-as*) [L.]. Stiffness; rigidity. **r. articulorum,** spurious ankylosis. **r. cadaverica,** rigor mortis.

rigidity (*rij-id'-it-e*) [*rigidus*, stiff]. Stiffness; inflexibility; immobility; tonic contraction of muscles. **r., anatomical** (*of the cervix uteri*), rigidity in which the cervix, though neither edematous nor tender, is not wholly effaced in labor, but retains its length and dilates only to a certain extent, beyond which the contractions of the uterus are without effect. **r., cadaveric,** rigor mortis **r., cerebellar,** rigidity of the spinal muscles, due to tumor of the middle lobe of the cerebellum. The head is drawn backward, the spine curved, and the arms and legs made rigid. **r., hemiplegic,** spastic rigidity of the paralyzed limbs in hemiplegia. **r., muscular,** see *Thomsen's disease*. **r., pathological** (*of the cervix uteri*), rigidity due to organic disease or cicatricial contraction. **r., post-mortem,** rigor mortis. **r., spasmodic** (*of the cervix uteri*), rigidity due to spasmodic contraction of the cervix.

rigor (*rī'-gor*) [*rigor*, from *rigere*, to be cold]. Chill. **r. mortis,** the muscular rigidity that occurs a short time after death, due to chemical changes resulting in coagulation of the muscle-plasma and the development of an acid reaction. **r. nervorum,** tetanus.

rima (*rī'-mah*) [L., *pl.*, *rimæ*]. A chink or cleft. **r. glottidis,** the cleft between the true vocal bands; the glottis **r. laryngis,** see *r. glottidis*. **r. oris,** the line formed by the junction of the lips. **r. palpebrarum,** the palpebral fissure. **r. pudendi,** the fissure between the labia majora. **r. respiratoria,** the space back of the arytenoid cartilages. **r. vocalis,** see *r. glottidis*. **r. vulvæ,** see *r. pudendi*.

Rimini's test for formaldehyde (*re'-min-e*). Add to the suspected fluid 3 drops of a dilute solution of phenolhydrazine hydrochloride and then 3 drops of a 5% aqueous solution of sodium nitroprusside; then an excess of a saturated aqueous solution of sodium hydroxide; then warm. An intense blue color, gradually changing to green and then to ashy gray follows in the presence of formaldehyde even in minute quantity.

rimose (*rī'-mōs*) [*rimosus*, full of chinks]. In biology, full of crevices or furrows.

rimous (*rī'-mus*) [*rima*, a cleft]. Having cracks, clefts, or fissures.

rimula (*rim'-ū-lah*) [dim. of *rima*, a chink]. A small cleft or fissure, especially of the spinal cord or the cerebellum.

rinderpest (*rin'-der-pest*) [Ger., "cattle-pest"]. An acute infectious disease of cattle, appearing occasionally among sheep and other ruminants.

Rindfleisch's granule-cells (*rint'-flish*) [Georg Eduard *Rindfleisch*, German physician 1836–1908]. Eosinophile leukocytes with granulations.

ring [ME.]. A circular opening or the structure surrounding it. See *annulus*. **r., abdominal,** see *abdominal*. **r.-bodies,** peculiar ring-shaped bodies found in the erythrocytes in pernicious anemia, leukemia, and lead-poisoning. **r. contraction,** see *Bandl*.

ringed hair, a very rare form of canities, in which the hairs are white or colored in rings or bands.

Ringer's solution (*ring'-er*) [Sidney *Ringer*, English physiologist, 1835–1910]. An artificial blood serum, in two strengths: 1. sodium chloride, 7.500; calcium chloride, 0.125; potassium chloride, 0.075; sodium bicarbonate, 0.125; distilled water, 1000. 2. Sodium chloride 9.00; calcium chloride,0.24; potassium chloride, 0.42; sodium bicarbonate, 0.30; distilled water, 1000. Each of these solutions is to be sterilized.

ringworm. Tinea trichophytina, a contagious disease of the skin due to a vegetable parasite, the trichophyton. See *tinea*.

Rinmann's sign of early pregnancy. Slender cords radiating from the nipple; they are considered to be hypertrophic acini of the glands.

Rinne's test (*rin'-neh*) [Heinrich *Rinne*, German otologist 1819–1868] A test to determine the condition of the various parts of the ear, performed by applying a vibrating tuning-fork first over the mastoid process, leaving it there until the patient seems no longer to hear the sound, and then as quickly as possible bringing it immediately in front of the external meatus, avoiding all contact with the head or ear. If the patient is then able to hear the sound of the tuning-fork once more, it indicates that the conduction through the air is better than through the bone.

rinolite (*ri'-no-lit*). See *rhinolith*.

riodine (*ri'-o-din*). Trade name of a 66% solution in oil of an iodized glyceric ester of ricinoleic acid; it contains about 17% of iodine.

Riolan's arch (*re-ol-on(g)*) [Jean *Riolan*, French physcian, 1580–1657]. The arch of the mesentery which is attached to the transverse mesocolon. **R.'s bouquet,** the muscular bundle attached to the styloid process and composed of the styloglossus, stylohyoid, and stylopharyngeus. **R.'s muscle,** the ciliary portion of th orbicularis palpebrarum **R.'s ossicles,** small bones sometimes found in the suture between the inferior border of the occipital bone and the mastoid portion of the temporal bone.

ripa (*rī'-pah*) [*ripa*, a bank]. The line formed by the reflection of the endyma upon any plexus or tela of the brain.

Ripault's sign (*re-po'*) [Louis Henri Antonin *Ripault*, French physician, 1807–1856]. A change in the shape of the pupil on pressure upon the eye, transitory during life, but permanent after death.

ripe (*rīp*). Mature, completed.

ripples (*rip'-els*). Scotch vernacular term for locomotor ataxia.

risiccol (*riz'-ik-ol*). A preparation containing chiefly castor oil and magnesia.

risidontrophy (*riz-id-on'-tro-fe*) [*βλζα*, a root]. The operation of drilling the root of a tooth.

risipola lombarda (*riz-ip-o'-lah lom-bar' -dah*). Synonym of *pellagra*.

risorius (*ri-so'-re-us*) [*ridere*, to laugh]. Laughing. **r. muscle.** See under *muscle*.

ristin. The monobenzoic acid ester of ethylene glycoll; it has been recommended in scabies.

risus (*ri'-sus*) [L.]. A grin or laugh. **r. caninus,** see *r. sardonicus*. **r. sardonicus,** the sardonic grin, a peculiar grinning distortion of the face produced by spasm of the muscles about the mouth, seen in tetanus.

Ritgen's method [Ferdinand August Marie Franz *Ritgen*, German physician, 1787–1867]. A method of manual deliver of the fetal head. It consists in lifting the head upward and forward through the vulva, between the pains, by pressure made with the tip of the fingers upon the perineum behind the anus close to the extremity of the coccyx.

Ritter's disease (*rit'-er*) [Gottfried *Ritter* von Rittersheim, German physician, 1820–1883]. Dermatitis exfoliativa of the newborn. **R.'s fiber,** a delicate fiber regarded as a nerve-fiber, seen in the axis of a retinal rod, near the peripheral end of which it forms a small enlargement. **R.'s law of contraction,** stimulation of a nerve occurs both at the moment of closing and of opening of the electric current. **R.'s tetanus,** tetanic contractions occurring on the opening of the constant current which has been made to pass for some time through a long section of a nerve. In man the phenomenon does not occur under physiologic conditions, but it is seen in tetany

Ritter-Rollet's phenomenon (*rit'-er rol-a'*) [Johann Wilhelm *Ritter*, German physicist, 1776–1810]. Flexion of the foot following the application of a mild galvanic current, and extension following that of a strong current.

Ritter-Valli's law. [Johann Wilhelm *Ritter*, German physicist, 1776–1810. Eusebio *Valli*, Italian physiologist, 1726–1816]. Section of a living nerve is followed by a gradual loss of irritability, preceded by a slight increase, the phenomenon taking place centrifugally from the divided end.

Rivallie's paste. A caustic made by adding concentrated nitric acid to lint.

rivalry (*ri'-val-re*) [*rivales*, near neighbors who used the same brook]. A struggle for supremacy. **r. of colors,** a rivalry of the visual fields of the two eyes, a different color being presented to each. **r. of contours,** a rivalry of the contours of two objects, one of which is presented to each eye, when they overlap in the binocular field of vision. **r., retinal,** see *r., strife*. **r., strife,** the alternate mastery of one or the other sensation, color, contour, etc., in the eyes when the fields of vision of the two eyes are incapable of being combined into one image. **r. of visual fields,** see *r., strife*.

Rivalta's test (*re-val'-tah*) [Sebastiano *Rivalta*, Italian veterinary surgeon]. *For differentiating exudate from transudate:* A drop of the fluid is allowed to fall into a solution of acetic acid (2 drops of glacial acetic acid to 100 Cc. of distilled water). If the drop sinks and leaves a turbidity the fluid is an exudate.

Riverius' draft (*rev-e'-re-us*) [Lazarus *Riverius*, French physician, 1589–1655]. A solution of sodium citrate.

Rivinian canals, R. ducts [Augustus Quirinus *Rivinus*, German anatomist, 1652–1723]. The ducts of the sublingual gland. **R. foramen.** See *Bochdaleh's Canal*. **R. glands,** the sublingual glands. **R. ligament.** See *Shrapnell's membrane*. **R. notch, R. segment,** a notch of irregular outline at the upper border of the sulcus tympanicus; it is marked at each end by a small spine.

Rivolta's disease. Actinomycosis.

rivulose (*riv'-ū-lōs*) [*rivulus*, a small stream]. In biology, marked with small sinuate lines.

rixolin (*riks'-ol-in*). A mixture of petroleum and light oil of camphor.

riziform (*riz'-if-orm*). Resembling grains of rice.

rizine (*ri'-zēn*). Rice that has been acted upon by superheated steam.

R. M. A. An abbreviation for *right mentoanterior position* of the fetus.

R. M. P. An abbreviation for *right mentoposterior position* of the fetus.

R. N. Abbreviation for *Registered Nurse*.

R. O. A. An abbreviation for *right occipito-anterior* position of the fetus.

roaring (*rōr'-ing*). A disease of horses that causes them to make a singular noise in breathing under exertion. The disease is due to paralysis and wasting of certain laryngeal muscles, usually of the left side, resulting in a narrowing of the glottis.

rob. A confection made of fruit-juice, especially of that of the mulberry.

Robert's pelvis (*ro-bair'*) [César Alphonse *Robert*, French surgeon, 1801–1862]. The transversely contracted or doubly synostotic pelvis; ankylosis of both sacroiliac synchondroses, the sacrum being absent or undeveloped.

Roberts' test for albumin [Sir William *Roberts*, English physician, 1830–1899]. Float the urine on the surface of a saturated common salt solution containing 5% of hydrochloric acid, of specific gravity 1.052. A white ring or zone formed between the two liquids indicates albumin. Roberts suggests that a mixture of 1 part strong nitric acid and 5 parts saturated magnesium sulphate solution may be employed also. **R.'s test for glucose in urine,** find the specific gravity of the urine at a known temperature by means of a urinometer supplied with a thermometer. Acidify slightly with tartaric acid, and add a piece of yeast the size of a pea, and shake. Let it stand in a warm place (20°–25° C.) for 24 hours. Filter through a dry filter and cool to the same temperature at which the specific gravity was previously taken. Take the specific gravity again. Every degree of density lost represents 1 gr. of glucose to the ounce of urine.

Robertson's pupil. See *Argyll Robertson pupil*.

robin (*ro'-bin*). A toxic albuminoid from the bark of the locust tree, *Robinia pseudacacia;* its action is similar to that of abrin and ricin.

Robin's myelopaxes (*ro-ban'*) [Charles Philippe *Robin*, French physician, 1821–1885]. Osteoclasts. **R.'s spaces,** small lymphatic spaces found between the outer and middle coats of an artery. **R.'s sympexion,** concretions found in the seminal vesicles.

robinol (*rob'-in-ol*) [Albert *Robin*, French physician]. Trade name of a preparation of the glycerophosphates of lithium, calcium, sodium,

iron, manganese and quinine, with $\frac{1}{16}$ gr. of strychnine glycerophosphate in each fluidounce; it contains no sugar.

Robinson's circle (*rob'-in-sun*) [Byron *Robinson*, American surgeon, 1857–1910]. An arterial anastomosis consisting of the following arteries: uterine, ovarian, abdominal aorta, common iliacs and internal iliacs.

Robinson's disease (*rob'-in-sun*) [Andrew Rose *Robinson*, American dermatologist, 1845–]. Hydrocystoma.

Robiquet's paste (*rob-e-ka'*) [Pierre Jean *Robiquet*, French physician, 1780–1840]. A caustic paste consisting of equal parts of zinc chloride and flour with gutta-percha. It is firm and tenacious.

robor (*ro'-bor*) [L.]. Strength.

roborant (*ro'-bor-ant*) [*robor*, strength]. 1. Tonic, strengthening. 2. A tonic or strengthening remedy.

roborat (*ro'-bor-at*) [see *roborant*]. An albuminous dietetic prepared from maize, containing lecithin and glycerinophosphoric acid.

roborin (*ro'-bor-in*). A grayish-green powder or brown mass, obtained from blood, and said to consist of water, 7.6 %, calcium carbonate, 10 23 %, common salt, 1.7 %, iron oxide, 0.49 %, other mineral substances, 1.28 %, albuminoids, 78.63 %; the last are principally calcic albuminates.

Robson's point (*rob'-sun*) [A. W. Mayo *Robson*, English surgeon]. A point one-third of the way on a line from the umbilicus to the right nipple; it is the point of greatest tenderness in inflammation of the gall bladder.

Roccella (*rok-sel'-ah*). A genus of plants of the *Roccelleæ*. *R. tinctoria* is the litmus-plant.

Rochelle salt (*ro-shel'*). Potassium and sodium tartrate.

rock fever. Malta fever.

rock oil. Trade name of petrolatum liquidum.

Rocky mountain fever. A form of fever occurring at high altitudes; mountain fever; and see *Texas fever*.

rod [ME.]. One of numerous slender bacillary structures, as in the retina. **r.-and-cone layer, r. and cones,** see under *retina*. **r.-granules,** cells of the outer nuclear layer of the retina; they are characterized by transverse striæ and give off processes connected with the nerve-fiber layer of the retina. **r.'s, retinal,** cylindrical bodies found in the rods and cones of the retina.

rodagen (*rod'-ah-jen*). A proprietary preparation of the milk of thyroidectomized goats, for use in exophthalmic goiter.

rodent ulcer. See *ulcer, rodent*.

rodonalgia (*rod'-on-al-je-ah*) [*ῥόδον*, rose; *ἄλγος*, pain]. Erythromelalgia.

rodostrophone (*ro-dos'-tro-fōn*). An instrument for transmitting articular sounds from the skull of one person directly to that of another.

Rodriguez' aneurysm (*rod-re'-ga*). Varicose aneurysm in which the sac is immediately contiguous to the artery.

Roederer's ecchymoses [Johann Georg *Roederer*, German obstetrician, 1727–1763]. See *Bayard s ecchymoses*. **R.'s obliquity,** flexion of the chin when the child is engaged at the superior pelvic strait during labor.

Roentgen rays (*rent'-gen*) [Wilhelm Konrad *Roentgen*, German physicist, 1845–1922]. See *rays, Roentgen*.

roentgenism (*rent'-gen-izm*) [Wilhelm Konrad *Roentgen*, German physicist, 1845–1922]. 1. The application of the Roentgen-rays in therapeutics. 2. Disease or disability from misuse of the Roentgen rays.

roentgenization (*rent-gen-iz-a'-shun*). Exposure or subjection to the action of Roentgen rays.

roentgenogram (*rent'-gen-o-gram*). A Roentgen-ray photograph; a skiagram.

roentgenograph (*rent'-gen-o-graf*). To make a roentgenogram.

roentgenography (*rent-gen-og'-ra-fe*). Same as skiagraphy, *q. v.*

roentgenologist (*rent-gen-ol'-o-jist*). One who is expert in the diagnosis and treatment by the Roentgen rays.

roentgenology (*rent-gen-ol'-o-je*) [*Roentgen rays; λόγος*, treatise]. The study of the roentgen rays.

roentgenometry (*rent-gen-om'-et-re*). Measurement of the penetrating power or of the quantity employed of the Roentgen rays.

roentgenoscope (*rent'-gen-o-skōp*). Same as fluoroscope, *q. v.*

roentgenoscopy (*rent-gen-os'-ko-pe*) [*Roentgen rays; σκοπεῖν*, to view]. Examination of solid bodies by means of Roentgen rays.

roentgenotherapy (*rent-gen-o-ther'-ap-e*) [*Roentgen rays; θεραπεία*, treatment]. The treatment of disease by means of the Roentgen rays.

Roentgen-rays. See *rays, Roentgen*.

roetheln. See *rubella*.

Roger's disease [Henri Louis *Roger*, French physician, 1811–1892]. The presence of a congenital abnormal communication between the ventricles of the heart. **R.'s symptom,** subnormal temperature during the third stage of tuberculous meningitis, regarded by Roger as pathognomonic of the disease.

Rokitansky's disease (*rok-it-an'-ske*) [Carl Freiherr von *Rokitansky*, Austrian pathologist, 1804–1878]. Acute yellow atrophy of the liver. **R.'s pelvis,** pelvic deformity due to spondylolisthesis. **R.'s tumor,** an ovarian tumor made up of a large number of cysts.

Rolandic (*ro-lan'-dik*) [Louis *Rolando*, Italian anatomist, 1773–1831]. Described by Rolando, as the *rolandic* fissure. **R. angle,** the acute angle formed by the fissure of Rolando with the superior border of the cerebral hemisphere. **R. area,** the excitomotor area of the cerebral hemispheres, comprising the ascending frontal and ascending parietal convolutions.

Rolando's arciform fibers [see *Rolandic*]. The external arcuate fibers of the oblongata. **R.'s cells,** the ganglion-cells found in Rolando's gelatinous substance. **R.'s fissure,** a fissure on the lateral aspect of the cerebrum extending downward from near the longitudinal fissure at about its middle point. It separates the frontal from the parietal lobe. The central fissure. **R.'s funiculus,** the lateral cuneate funiculus, a longitudinal prominence caused by Rolando's gelatinous substance on the surface of the oblongata, between the cuneate funiculus and the line of roots of the spinal accessory nerve. **R.'s gelatinous substance,** the elongated column which forms a continuation of the apices of the posterior horns of the spinal cord, extending from the lumbar portion of the cord upward into the pons. It consists of neuroglia and a number of ganglion-cells. **R.'s tubercle,** a mass of gray matter forming the upper termination of Rolando's funiculus. The fibers given off from its cells go to make up the sensory root of the trigeminus.

rolandometer (*ro-land-om'-et-er*). A device for locating on the head the place of the fissure of Rolando.

Roller's nucleus (*rol'-er*) [Christian Friedrich Wilhelm *Roller*, German physician, 1802–1878]. 1. A nucleus situated near the hilum of the olivary body of the oblongata; it is connected with the fibers of the anterolateral fundamental tract of the spinal cord. 2. An aggregation of small ganglion-cells situated anteriorly to the nucleus of the hypoglossal nerve.

roller-bandage. A bandage made into a cylindrical roll.

Rollet's chancre. One partaking of the characteristics of both simple and true chancre. **R.'s nerve-corpuscles,** see *Golgi's corpuscles.* **R.'s secondary substance,** see *Engelmann's lateral disc.*

Rollet's delomorphous cells [Alexander *Rollet*, Austrian physiologist, 1834–1903] Large, well defined cells between the membrana propria and the chief cells of the fundus glands of the gastric mucous membrane. They are supposed to secrete the hydrochloric acid. **R.'s stroma,** an insoluble, spongy network forming the structure of an erythrocyte, within the interstices of which is embedded the hemoglobin.

Rollier's method (*rol'-e-ah*) [A. *Rollier*, German physician]. Treatment of tuberculosis by heliotherapy.

Roman-Delluc's test for urobilin in urine. Shake 100 Cc urine with 20 Cc. chloroform, after acidulating with 8 to 10 drops acetic acid. Overlay 2 Cc. of clear chloroformic solution with 4 Cc. of 1 1000 solution zinc acetate in 95% alcohol. At the line of separation a characteristic green fluorescence will appear if urobilin is present, more easily recognized against a black background. On shaking, fluorescence is more marked and the mixture acquires a pink tint.

romanoscope (*ro-man'-o-skōp*). A speculum for examining the sigmoid flexure.

Rombergism (*rom'-berg-izm*). Romberg's sign.

Romberg's disease [Moritz Heinrich *Romberg*, German physician, 1795–1873]. Progressive facial hemiatrophy. **R.'s sign.** 1. Swaying of the body and inability to stand when the eyes are closed and the feet placed together; it is seen in tabes dorsalis, hereditary cerebellar ataxia, etc. It is also called the Brauch-Romberg symptom. 2. Neuralgic pain in the course and distribution of the obturator nerve, pathognomonic of obturator hernia. **R.'s spasm,** masticatory spasm, a spasm affecting the muscles supplied by the motor fibers of the fifth nerve. **R.'s trophoneurosis,** see *Romberg's disease.*

Romershausen's eye-water (*ro'-merz-how-zen*). A wash employed in chronic ophthalmic catarrh. It is a mixture of fennel water and tincture of fennel.

Rommelaere's law [Guillaume A. V. *Rommelaere*, Belgian physician, 1836–]. Constant diminution of the nitrogen, phosphates and sodium chloride in the urine in cases of carcinoma. **R.'s sign,** diminution of the normal phosphates and sodium chloride in the urine is pathognomonic of cancerous cachexia.

rongeur forceps (*rōng-zjur*). A strong pair of forceps for breaking off pieces of bone, especially in enlarging a trephine opening.

roof-cell. A nerve-cell of the roof-nucleus.

roof-nucleus. A nucleus in the roof of the fourth ventricle.

root. 1. The descending axis of a plant. 2. The part of an organ embedded in the tissues, as the *root* of a tooth. **r.-arteries,** the radicular vessels. **r. of a nerve,** one of two bundles of nerve-fibers, the anterior and posterior roots, joining to form a nerve-trunk. **r.-sheath,** the epithelium of the hair-follicle. **r.-zone,** the column of Burdach of the spinal cord.

R. O. P. An abbreviation for *right occipitoposterior position* of the fetus.

rophetic (*ro-fet'-ik*) [ῥοφητικός, given to sopping up]. A mechanical absorbent agent, as a dusting-powder, sponge, etc

rosa (*ro'-zah*) [L.]. A rose; see *rose.*

rosacea (*ro-za'-se-ah*). See *acne rosacea.*

rosalia (*ro-sa'-le-ah*). 1. Scarlatina. 2. Measles. 3. Erythema.

rosanilin, rosaniline (*ro-zan'-il-in*) [*rose; anilin*], $C_{20}H_{19}N_3O$. A colorless, crystalline derivative of aniline. It is used as the basis of various dyes **r. acetate, r. hydrochloride,** the red dye fuchsin.

rosary, rhachitic. See *rhachitic rosary.*

rose (*rōz*) [ῥόδον, from Ar., *ward*, a rose]. A genus of plants of the order *Rosaceæ.* **r.s, attar of,** see *r., oil of.* **r. catarrh,** see *hay-fever.* **r.-cold,** see *hay-fever.* **r., confection of** (*confectio rosæ*, U. S. P.), a confection prepared from the petals of the red rose (*rosa gallica*, U. S. P.). **r., dog-,** the common wild rose of Europe. The fruit (*rosæ caninæ fructus*, B. P.) is used in Europe as a vehicle. **r., fluidextract of** (*fluidextractum rosæ*, U. S. P.), used as an astringent and vehicle. Dose 1–2 dr. (4–8 Cc.). **r., honey of** (*mel rosæ*, U. S. P.), a syrup made of fluidextract of rose and clarified honey. Dose 1 dr. (4 Cc.) **r., oil of** (*oleum rosæ*, U. S. P.), a volatile oil distilled from the petals of *Rosa damascena*, and employed as a perfume and flavoring agent Syn., *attar of roses* **r. rash,** see *roseola.* **r., red** (*rosa gallica*, U. S. P.; *rosæ gallicæ petala*, B. P.), the dried petals are slightly astringent and tonic, but are chiefly employed as a vehicle. **r., syrup of** (*syrupus rosæ*, U. S. P.), a syrup made of fluidextract of rose, diluted sulphuric acid, sugar, and water. **r.-water** (*aqua rosæ*, U. S. P.). Dose 4 dr. (16 Cc.). **r.-water, ointment of** (*unguentum aquæ rosæ* U. S. P.), cold cream. **r.-water, triple** (*aqua rosæ fortior*, U. S. P.), stronger rose-water

Rose's biuret reaction for albumins. Alkalinize the albumin solution with soda-lye and add, drop by drop, with constant shaking, a dilute copper sulphate solution (17 or 18 Gm. crystallized cupric sulphate in 1 liter of water). The solution will become rose-red, then violet, and finally blue; the blue appears of a reddish tint when compared with a normal alkaline copper solution.

Rose's operation (*rōz*) [William *Rose*, English surgeon, 1847–]. Removal of the Gasserian ganglion, for the relief of trifacial neuralgia.

Rose's position. With head dependent over the end of the table.

rosein, roseine (*roz'-e-in, roz'-e-ēn*). Fuchsin.

roselia (*ro-sel'-ah*). See *rubella.*

rosemary (*rōz'-ma-re*) [*rosmarinus*, marine dew; from *ros*, dew; *marinus*, marine]. The *Rosmarinus officinalis*, a plant of the order *Labiatæ.* **r., oil of** (*oleum rosmarini*, U. S. P.), a volatile oil used as a stimulant and in rubefacient liniments. Dose 3–6 min. (0.2–0.3 Cc.). **r., spirit of** (*spiritus rosmarini*, B. P.) prepared from the oil and used as a perfume and in liniments.

Rossen' liniment. A liniment composed of oil of nutmeg, spirit of juniper, and oil of cloves.

Rosenbach's disease (*ro'-zen-bakh*) [Ottomar *Rosenbach*, German physician, 1851–1907]. A nodular enlargement, painful to the touch, of the dorsal aspect of the proximal ends of the last phalanges. The affection is regarded as identical with Heberden's nodes. **R.'s law,** in nerve lesions paralysis of the extensor muscles occurs earlier than paralysis of the flexors. **R.'s modification of Gmelin's test for bile-pigments,** when the liquid has all been filtered through a very small filter, apply to the inside of the filter a drop of nitric acid containing only a very little nitrous acid, when a pale yellow spot will form, surrounded by colored rings, which are yellowish-red, violet, blue, and green. **r.'s sign.** 1. Loss of the abdominal reflex in inflammatory intestinal diseases. 2. Tremor of the eyelids when the patient is asked to close them, often associated with insufficient closure of the lids. It is seen in neurasthenia. 3. Tremor of the upper lids in exophthalmic goitre when the eyes are gently closed. **R.'s syndrome,** a variety of paroxysmal tachycardia consisting in the association of cardiac, respiratory, and gastric troubles. **R.'s test for indirubin,** boil the liquid with nitric acid, and indigo-blue will be formed from indirubin.

Rosenbach-Semon's law. See *Semon's law.*

Rosenberg's method. By requiring the patient to read aloud a difficult passage, the production of the knee-jerk is facilitated.

Rosenheim's sign (*ro'-zen-hīm*). A friction-sound heard on auscultation over the left hypochondrium n fibrous perigastritis.

Rosenmueller's fossa (*ro'-zen-mū-ler*) [Johann Christian *Rosenmueller*, German anatomist, 1771–1820]. A depression behind the pharyngeal orifice of the Eustachian tube, frequently the seat of morbid growths. **R.'s gland.** 1. The palpebral portion of the lacrimal gland. 2. The largest of the group of deep subinguinal glands in the crural ring. **R.'s organ,** the parovarium, a vestige of the Wolffian body and duct. **R.'s valve,** a semilunar fold of the mucous membrane seen occasionally in the lacrimal duct above its junction with the lacrimal sac.

Rosenthal's canal (*ro'-zen-thal*) [Friedrich Christian *Rosenthal*, German anatomist, 1780–1829; Isidor *Rosenthal*, German physiologist, 1836–]. The spiral canal of the modiolus. **r.'s hyperacid vomiting,** the vomiting of very acid material, indicative of exaggerated secretion of HCl in the gastric juice; Rossbach's disease. **R.'s method of artificial respiration,** compression of the knees, hips, and spine in rapid succession in order to induce expiration; inspiration is favored by stretching the body. **R.'s sign,** the application of a strong faradic current to the sides of the vertebral column causes burning and stabbing pains in cases of spondylitis. **R.'s vein,** the basilar vein, a branch of Galen's vein.

roseola (*ro-se'-o-lah*) [*roseus*, rosy]. 1. Rose-rash, a name given to any rose-colored eruption. 2. Synonym of *rubella.* **r. cholerica,** an eruption sometimes appearing in cholera. **r., syphilitica,** an eruption of rose-colored spots appearing early in secondary syphilis. **r. typhosa,** the eruption of typhoid or typhus fever. **r. vaccinia,** a general rose-colored eruption sometimes occurring during vaccinia.

roséoles à verre bleu. Faint syphilides discovered by means of cobalt-blue glasses worn close to the eyes, before they are revealed to the naked eye.

roseolous (*ro-se'-o-lus*) [*roseus*, rosy]. Having the character of roseola.

Roser-Braun's sign. Absence of pulsations of the dura in cases of cerebral abscess, tumors, etc.

Roser-Nélaton's line. See *Nélaton's line.*

roset, rosette (*ro-zet'*). 1. See *karyokinesis.* 2. A congery of cells from the neuroepithelial layer of the retina described by Wintersteiner as a characteristic of glioma of the retina. They correspond to the external limiting membrane of the retina, with rudimentary rods and cones projecting into the central cavity.

rosin (*roz'-in*). The residue left after distilling off the volatile oil from turpentine. See also *resina.* **r. cerate** (*ceratum resinæ*, U. S. P.), a mixture of rosin, yellow wax, and lard. **r. cerate, compound** (*ceratum resinæ compositum*, U. S. P.), a mixture of rosin, yellow wax, prepared suet, turpentine, and linseed-oil.

Rosin's test for indigo-red. Render the liquid alkaline with sodium carbonate and extract with ether, which is colored red by the indirubin.

rosinol (*roz'-in-ol*). See *retinol.*

rosin-weed, Compass plant. The plant *Silphium laciniatum* secretes an oleo-resin commonly used as a chewing-gum. Tonic, alterative, and emetic. Dose of fld. ext. ʒ ss-j.

rosmarinus (*roz-ma-rī'-nus*). See *rosemary.*

rosolene (*roz'-o-lēn*) [*rosin*, a variation of *resin; oleum*, oil]. The oily distillate of colophony.

rosolic acid (*ro-zol'-ik*), $C_{19}H_{16}O_3$. A substance used as a test for acids and alkalies: acids decolorize it; with alkalies it gives a red color.

Ross, cycle of. That phase of development of *plasmodium malariæ* which occurs in the mosquito. See *Golgi, cycle of.*

Ross's in vitro method. A method of studying, under the microscope, reproduction and other phenomena in living cells on glass slides covered with nutrient jelly.

Rossbach's disease (*ros'-bahk*) [Michael Joseph *Rossbach*, German physician, 1842–1894]. Gastroxynsis; a neurosis of the stomach attended with paroxysmal hypersecretion.

Rossell's test for blood in the stools (*ros-el'*) [Otto *Rossell*, Swiss physician]. To an ethereal extract of the feces are added oil of turpentine and solution of aloin. In the presence of blood the mixture assumes a red color.

rostellum (*ros-tel'-um*) [dim. of *rostrum*]. A little beak, especially the hook-bearing portion of the head of certain worms.

rostral (*ros'-tral*) [*rostrum*, beak]. 1. Pertaining to or resembling a rostrum. 2. See *cephalic.*

rostrate (*ros'-trāt*) [*rostrum*]. Furnished with a beak or beak-like process.

rostriform (*ros'-tri-form*) [*rostrum*, beak; *forma*, form]. Shaped like a rostrum.

rostrum (*ros'-trum*) [L.]. A beak; a projection or ridge. **r. corporis callosi,** the anterior tapering portion of the corpus callosum. **r. sphenoidale,** the vertical ridge on the inferior aspect of the body of the sphenoid bone, which is received in the upper grooved border of the vomer. Syn., *beak of the sphenoid.*

rot 1. To suffer putrefactive fermentation. 2. Decay; decomposition. 3. A disease of sheep. **r. potato-.** See *mildew.*

rotary (*ro'-ta-re*) [*rotation*]. Producing or characterized by rotation. **r. joint,** a pivot joint.

rotate (*ro'-tāt*) [*rotare*, to revolve]. Wheel-shaped. In dentistry, the term implies the turning of a tooth on its axis. **r.-plane**, in biology, wheel-shaped and flat.

rotating (*ro-ta'-ting*) [*rotare*, to revolve]. Revolving. **r. devices**, appliances, for correcting torsion of single-rooted teeth.

rotation (*ro-ta'-shun*) [*rotare*, to turn, from *rota*, a wheel]. 1. The act of turning about an axis passing through the center of a body, as *rotation* of the eye, *rotation* of the arm. 2. In dentistry, the operation by which a tooth is turned or twisted into its normal position. **r. joint**, a lateral ginglymus. **r.-stage of labor**, one of the stages of labor consisting in a rotatory movement of the fetal head or other presenting part, whereby it is accommodated to the birth-canal. It may be internal, occurring before the birth of the presenting part, or external occurring afterward. **r., specific**, the rotation as shown by a polariscope (and expressed in degrees) which is afforded by 1 Gm. of a substance dissolved in 1 Cc. of water in a tube 1 decimeter in length. **r., wheel**, of Helmholtz, the tilting of the vertical meridians of the eye.

rotator (*ro-ta'-tor*) [see *rotation*]. Anything, especially a muscle, that produces rotation.

Rotch's sign [Thomas Morgan *Rotch*, American physician, 1848–]. Dulness on percussion in the right fifth intercostal space in pericardial effusion.

Roth's disease, R.'s symptom-complex. "Meralgia paræsthetica." See *Bernhardt's paresthesia*. **R.'s spots**, white spots resembling those of albuminuric retinitis, seen near the optic disc and the macula in cases of septic retinitis. **R.'s vas aberrans**, an inconstant diverticulum of the middle portion of the rete testis.

rötheln (*ret'-eln*). See *rubella*.

Rothera's test a method for finding acetone bodies in the urine.

rottlera (*rot-le'-rah*). See *kamala*.

rottlerin (*rot'-ler-in*), $C_{22}H_{20}O_6$. A bitter principle from kamala; used as an anthelmintic.

rotula (*rot'-ū-lah*) [dim. of *rota*, a wheel]. 1. The patella. 2. A troche or lozenge.

rotulad (*rot'-ū-lad*) [*rotula*; *ad*, towards]. Toward the patella.

rotular (*rot-ū-lar*) [*rotula*, a little wheel]. Of or pertaining to the patella, *e. g.*, the patellar aspect of a limb; opposed to *popliteal*

Rouge's operation (*roozh*) (*for access to the nasal cavities*). See under *operations*.

Rouget's bulb. (*roo-zha'*) [Antoine D. *Rouget*, French physiologist]. The bulb of the ovary, a plexus of veins lying on the surface of the ovary and communicating with the uterine and pampiniform plexuses. **R.'s cells**, branched cells on the external wall of capillaries, which by their contraction can alter the lumen of the capillaries. **R.'s motorial end-plates**, small cellular elements connected, within the sarcolemma, with the endings of motor nerves. **R.'s muscle**, see *Mueller's muscle* (1).

Roughton's band. Collapse, from atrophy of the tissues, of the zone corresponding to the junction of the alæ nasi with the lateral cartilages. The resulting contact of this zone with the septum causes obstruction during inspiration

Rougnon-Heberden's disease (*roon-yong'-heb'-erden*) [Nicholas François *Rougnon*, French physician, 1727–1799; William *Heberden*, English physician, 1710–1801]. Angina pectoris.

rouleau (*roo-lō*) [Fr.; pl., *rouleaux*]. A roll, especially a roll of red blood-corpuscles, resembling a roll of coins.

round ligament. 1 One of the ligaments of the uterus passing through the inguinal canal. 2. One of the ligaments of the liver lying in the longitudinal fissure. 3. One of the ligaments of the hip-joint—ligamentum teres.

rounding (*rown'-ding*). A term given to that propensity manifested by certain hypochondriac individuals to run the round of all the free dispensaries in a vicinity. Such patients are termed "rounders."

roundworm. The ascaris.

roup (*roop*). An infectious respiratory disease of fowls.

Roussel's sign (*roo'-sel*). A sharp pain caused on light percussion, in the subclavicular region between the clavicle and the third or fourth rib, originating 3 to 4 cm. from the median line and extending to and beyond the shoulder and the supraspinal fossa; it is observed in incipient tuberculosis.

Rousselot's caustic (*roos-lo'*). A compound of arsenic trioxide 1, mercuric sulphide 5, and burnt sponge 2 parts.

routinist (*roo-te'-nist*) [*route*, a beaten path] A physician who does not deviate in his treatment from an unvarying routine

Roux's serum (*roo*) [Pierre Paul Emile *Roux*, French bacteriologist, 1853–] An antitetanic serum. **R.'s unit**, one mil of an antitoxic (antitetanic) serum should be sufficient to protect 1,000,000 Gm of guinea-pig against the minimum lethal dose of tetanus toxin.

Roux's sign of suppurative appendicitis (*roo*). On palpation the empty cecum presents a special soft resistance comparable to that of a wet pasteboard tube.

Rovighi's sign. Hydatid fremitus; a thrill observed on combined palpation and percussion in cases of superficial hydatid cyst of the liver.

Rovsing's sign (Niels Thorkild *Rovsing*, Danish surgeon, 1862–]. Pressure on the descending colon at a point corresponding to McBurney's point will, in case of appendicitis, cause pain at McBurney's point.

R. Q. Abbreviation of **Respiratory Quotient.**

R. S. A. An abbreviation for *right sacroanterior* position of the fetus.

R. S. B. Abbreviation for *regimental stretcher bearer*.

R. S. P. An abbreviation for *right sacroposterior* position of the fetus.

Ru. Chemical symbol for ruthenium.

rubber (*rub'-er*). The *elastica* of the U. S. P. The prepared milk-juice of several species of *Hevea*. Syn., *caoutchouc*; *India-rubber*; *Para rubber*. **r.-dam**, a sheet of rubber used to confine the flow of secretions or of discharges from a wound. **r. tissue**, gutta-percha in sheets.

rubedo (*roo-be'-do*) [*ruber*, red]. Any diffused redness of the skin

rubefacient (*roo-be-fa'-she-ent*) [*ruber*; *facere*, to make]. 1. Causing redness of the skin. 2. An agent that causes redness of the skin

rubefaction (*roo-be-fak'-shun*). Redness of the skin due to the action of a counterirritant.

rubella (*roo-bel'-ah*) [dim. of *rubeola*]. An acute contagious eruptive disease, of short duration and mild character. After a period of incubation varying from one to three weeks, the disease sets in abruptly with pains in the limbs, sore throat, and slight fever. The eruption appears

at the end of the first day, and consists of red papules, and disappears usually without desquamation in about three days. The disease is associated with enlargement of the superficial cervical and posterior auricular glands. Syn., *epidemic roseola; French measles; German measles; rötheln.*

rubeola (*roo-be'-o-lah*). See *measles.* **r. notha** same as *rubella.*

rubeolin (*roo-be'-ol-in*) [*rubeola*]. A name given to the specific toxin of measles.

ruber (*roo'-ber*) [L.]. Red.

rubescence (*roo-bes'-ens*) [*rubescere*, to become red]. Blushing; redness of countenance or complexion.

rubescent (*roo-bes'-ent*) [*rubescere*, to become red]. Growing red.

rubia (*roo'-be-ah*). The *Rubia tinctorum* or dyers' madder, containing the coloring principles alizarin and purpurin. It is used as a dye.

rubidium (*roo-bid'-e-um*) [*rubidus*, red]. A rare alkaline metal resembling potassium in physical and chemical properties, its salts are used in medicine. See *elements, table of.*

rubiginous (*roo-bij'-in-us*) [*rubiginosus*, rusty]. Rust-colored.

rubigo (*roo-bi'-go*) [L.]. Rust

rubijervine (*roo-bij-er'-vin*) [*rubeus*, red; *jerva*, green hellebore root]. $C_{28}H_{43}NO_2$ An alkaloid of veratrum album.

rubin (*roo'-bin*). Synonym of *fuchsin.*

Rubin's test (*roo'-bin*) Transuterine insufflation of the Fallopian tubes with carbon dioxide; to test the patency of the tubes.

Rubner's test for carbon monoxide in the blood (*roob'ner*) [Max *Rubner*, German physiologist, 1854–]. Agitate the blood with 4 or 5 volumes of solution of lead acetate for one minute. If the blood contains CO, it will retain its bright color; if it does not, it will turn chocolate-brown. **R.'s test for glucose,** add to the liquid an excess of lead acetate; filter, and add to the filtrate ammonium hydrate until no further precipitate is produced. Warm gently, when the precipitate will gradually become pink; this color decreases on standing.

rubor (*roo'-bor*) [L.]. Redness or discoloration due to inflammation. **r., regional,** isolated spots which become red, with elevation of temperature, observed after local cyanosis.

rubrescin (*roo-bres'-in*). A combination of resorcinol, 50 Gm., and chloral hydrate, 25 Gm It is used in 1% solution as an indicator for alkalimetry and acidimetry.

rubrin (*roo'-brin*). See *hematin.*

rubrol (*roo'-brol*). A solution used by injection in gonorrhea, and said to consist of boric acid, thymol, and a coal-tar derivative in water.

rubrospinal tract. Monakow's bundle.

rubrum (*roo'-brum*) [*ruber*, red]. The preferred name for the nucleus ruber.

rubus (*roo'-bus*) [L.]. Blackberry. A genus of plants of the order *Rosaceæ.* The *rubus* of the U. S. P is the dried bark of the rhizome of *R. villosus, R nigrobaccus* and *R. cuneifolius.* It is used as an astringent tonic in diarrhea. Dose 20–30 gr. (1.3–2 0 Gm.). **r., fluidextract of** (*fluidextractum rubi* U. S. P.). Dose ½–1 dr. (2–4 Cc). **r., syrup of** (*syrupus rubi*, U. S. P.). Dose 1–2 dr. (4–8 Cc.). The fruit of *R. idæus*, the raspberry, is used to prepare *syrupus rubi idæi*, which is used as a tonic.

ructation (*ruk-ta'-shun*). See belching.

ructus (*ruk'-tus*) [L.]. A belching of gas from the stomach. **r. hystericus,** hysteric belching, the gas escaping with a loud, sobbing, gurgling noise.

rudimentary (*roo-dim-en'-ta-re*) [*rudimentum*, a rudiment]. Undeveloped; unfinished.

rudimentum [L.; *pl., rudimenta*]. A rudiment.

rue (*roo*) [*ῥυτή*, rue]. A plant, *Ruta graveolens*, of the order *Rutaceæ*, yielding an oil (*oleum rutæ*, B. P.) which is a local irritant and has been employed in amenorrhea and menorrhagia. Dose 2–5 min. (0.13–0.32 Cc.).

Ruffini's end organs (*roof-fe'-ne*) [Angelo *Ruffini*, Italian anatomist]. Small bodies found in the skin where Pacinian corpuscles exist; they are made up of the terminal arborizations of a nerve and a fibrous framework.

Rufus's pills. Pills of aloes and myrrh.

ruga (*roo'-gah*) [L ; *pl* , *rugæ*]. 1. A wrinkle, furrow, crease, or ridge, as *e. g.*, in the mucosa of the stomach, vagina, etc. 2. A fold of pia on the ental surface of the piarachnoid. **rugæ, palatal,** the elevations upon the mucous covering of the hard palate; they assist in speech and deglutition.

Rugby knee (*rug'-be*) [*Rugby*, an English public school]. Same as Schlatter's disease, *q. v.*

rugine (*roo-zhēn'*) [French]. Raspatory, periosteum elevator.

rugitus (*roo-gi'-tus*). See *bombus.*

rugose (*roo'-gōs*) [*ruga*]. Characterized by folds.

rugosity (*roo-gos'-it-e*) [*ruga*]. A condition of being in folds.

rugous (*roo'-gus*). See *rugose.*

Ruhmkorff's coil (*room'-korf*) [Heinrich Daniel *Ruhmkorff*, German physicist, 1823–1887]. An induction coil.

rum [abb. from ME. *rumbooze*, alcoholic liquor]. A spirit obtained from the molasses of the sugarcane by fermentation and distillation.

rumbling (*rum'-bling*). See *borborygmus.*

rum-blossom, a pimple on the nose caused by excessive drinking; rum-bud; acne rosacea. **r.-bud,** see **r.-blossom.**

rumen (*roo'-men*) [L.]. The first stomach of ruminants, also called the paunch, from which the food is returned to the mouth for remastication.

rumenotomy (*roo-men-ot'-o-me*) [*rumen*, the gullet; *τέμνειν*, to cut]. Incision of the rumen or paunch of an animal.

rumex (*roo'-meks*) [L.]. Yellow dock, a genus of plants of the order *Polygonaceæ.* The root of *R. crispus* is astringent and tonic, and has been employed externally and internally in various diseases of the skin. Dose of the *extract* 1 dr. (4 Cc.).

rumicin (*roo'-mis-in*). Chrysophanic acid.

rumin (*roo'-min*) [*rumex*]. A precipitate from a tincture of the root of *Rumex crispus.* It is antiscorbutic, alterative and astringent.

ruminant (*roo'-min-ant*). An animal that chews the cud.

rumination (*roo-min-a'-shun*). See *merycism.*

Rummo's disease (*room'-mo*) [Gaetano *Rummo*, Italian physician]. Cardioptosis.

rump [Icel., *rumpr*]. The region near the end of the backbone; the buttocks or nates.

Rumpel-Leede sign (*room'-pel-la'-deh*) [O. *Rumpel*, C. *Leede*, German physicians]. A bandage is placed half way up the arm, drawn tight enough to produce a decided blue discoloration of the forearm, and left in place from three to eight minutes; petechiæ then appear on the anterior surface of the elbow joint. It is observed in scarlet fever and other exanthemata.

Rumpf's sign [Theodor *Rumpf*, German physician, 1851–]. Fibrillary twitching of muscles in traumatic neurosis.

run. In pathology, to discharge pus or purulent matter from a diseased part. **r.-around,** see *paronychia.*

Runeberg's type of pernicious anemia (*roo'-na-berg*) [Johan Wilhelm *Runeberg*, Finnish physician, 1843–1918]. A form of pernicious anemia with remissions.

Runge's method (*roon'-geh*). A method of dressing the umbilical cord. The stump is powdered with a mixture of boric acid and starch, one part to three.

Ruotte's operation (*roo-ot'*). Inserting the cut end of the internal saphenous vein into the peritoneal cavity, in cases of ascites.

r-unit. See under *unit.*

rupia (*roo'-pe-ah*) [ῥύπος, filth]. A form of eruption occurring especially in tertiary syphilis, and characterized by the formation of large, dirty-brown, stratified, conic crusts.

rupial (*roo'-pe-al*) [*rupia*]. Resembling or characterized by rupia.

rupophobia (*roo-po-fo'-be-ah*). See *rhypophobia.*

Ruppell's serum (*roop-el*). A serum prepared from several strains of meningococcus; used in cerebrospinal meningitis.

ruptio (*rup'-she-o*) [*rumpere*, to break]. Rupture of a vessel or organ.

rupture (*rup'-tūr*) [*rumpere*, to break]. 1. A forcible tearing of a part, as *rupture* of the uterus, *rupture* of the bladder. 2. Hernia.

ruptured (*rup'-tūrd*) [*rumpere*, to break]. Burst; affected with hernia.

Rusconi's anus (*roos-ko'-ne*) [Mauro *Rusconi*, Italian biologist, 1776–1849]. The blastopore.

Russell's bodies [William *Russell*, Scotch physician]. Fuchsin bodies. Roundish colloid or hyaline bodies, of varying size, found in a variety of conditions, notably in carcinomatous growths and certain morbid changes of the mucosa of the nose and stomach.

Russian oil. A pure petroleum, odorless and tasteless, and said to have been refined in Russia.

Russo's reaction (*roos'-so*) [Mario *Russo*, Italian physician]. To 4 or 5 Cc. of the patient's urine add four drops of a 0.1% aqueous solution of methylene blue; mix well and examine against the light; a mint or emerald green coloration is positive, but a bluish tinge renders the test negative. The reaction is said to be positive in typhoid, smallpox, measles, and advanced tuberculosis.

russol (*rus-ol'*). Trade name of liquid petrolatum.

russolax (*rus'-o-laks*). Trade name of a Russian oil which is distilled and refined in England.

rust [AS.]. 1. The oxide and hydroxide of iron formed on the surface of iron exposed to the air. 2. A disease common on cereals, causing rust-like masses to break out on the plant.

Rust's disease [Johann Nepomuk *Rust*, German physician, 1775–1840]. Tuberculous spondylitis affecting the first and second cervical vertebræ. **R.'s symptoms,** at every change of position of the body a patient suffering from caries or carcinoma of the upper cervical vertebræ supports his head with the hand.

rusty (*rus'-te*). Of the nature or appearance of rust. **r. expectoration,** the common name for the usual form of expectoration in croupous pneumonia, due to the presence of a small amount of blood in the sputa.

rut (*rut*) [OF., "a roaring"]. 1. The state of concomitant menstruation and ovulation in the lower animals. 2. The condition of a male animal in which it is capable of inseminating.

ruta (*roo'-tah*). See *rue.*

ruta graveolens. Rue; the leaves are used as an emmenagogue.

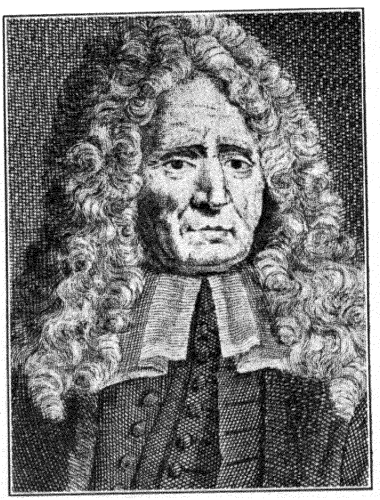
ruthenium (*roo-the'-ne-um*) [*Ruthenia*, a province of Russia]. A rare metal of the platinum group. Symbol, Ru; atomic weight, 101.7. Little is known of its medicinal properties. See *elements, table of.*

Rutherford's solution. A decalcifying and hardening solution for tissue-specimens: chromic acid 1 gm., water 200 Cc.; then add 2 Cc. nitric acid.

rutidosis (*roo-tid-o'-sis*) [ῥυτίς, a wrinkle]. A wrinkling; the contraction or puckering of the cornea that just precedes death.

rutin (*roo'-tin*) [*ruta*, rue]. A crystalline neutral substance obtained from the leaves of rue.

Ruysch's glomerulus (*rīsh*) [Fredericus *Ruysch*, Dutch anatomist, 1638–1731]. See *Malpighian tuft.* **R.'s membrane,** the middle or capillary layer of the choroid. **R.'s tube,** a minute tubular cavity in the nasal septum, opening by a small, round orifice a little below and in front of the nasopalatine foramen. It is best seen in the fetus, and represents the rudimentary homologue of Jacobson's organ. **R.'s uterine muscle,** the muscular tissue of the fundus uteri; it was believed by Ruysch to act independently of the rest of the uterine muscle.



FREDERICUS RUYSCH.

ryalfa (*ri-al'-fah*). A syrup containing corn syrup, cane sugar and alfalfa extract.

rye (*rī*) [AS., *ryge*]. The plant *Secale cereale* and its grain. The grain is used in the manufacture of bread.

rye asthma, a form of hay-fever occurring at the time of the flowering rye. **r., ergot of,** see *ergot.* **r., spurred,** same as *ergot.*

rypia (*ri'-pe-ah*). See *rupia.*

rytidosis corneæ. See *rutidosis.*

ryzon (*ri'-zon*). A baking powder containing monosodic phosphate

S

S. 1. The chemical symbol of *sulphur*. 2. An abbreviation in prescriptions, of *signa*, sign or label. 3. Abbreviation of *spherical* (*lens*). **S romanum**, the sigmoid flexure of the colon.

s. Abbreviation of *sinister*, left; also of *semis* half (usually *ss*).

Sa. The chemical symbol of *samarium*.

sabadilla (*sab-ad-il'-ah*). Cevadilla; *Schœnocaulon officinale* (*Asagræa officinalis*), a plant of the order *Melanthaceæ*, containing the alkaloids veratrine, sabadine, and sabadinine. It is an emetocathartic, and was formerly used as a teniacide and to destroy vermin in the hair.

sabadine (*sab'-ad-ēn*). $C_{29}H_{51}NO_8$ (Merck). An alkaloid from the seeds of *Schœnocaulon officinale*, occurring in white, acicular crystals, soluble in water, alcohol, and ether; melts at 240° C. Sternutatory.

sabal (*sab'-al*). Saw-palmetto. The *sabal* of the U. S. P. is the partly dried ripe fruit of *Serenoa serrulata*. A fluidextract has been recommended in inflammations of the genitourinary tract, atonic impotence, and in bronchitis and pulmonary tuberculosis. Dose 1–2 dr. (4–8 Cc.).

sabalol (*sab'-al-ol*). A substance prepared from active principles of saw-palmetto (*Serenoa serrulata*).

Sabbatia (*sab-a'-she-ah*) [after Liberatus *Sabati*, an Italian botanist]. A genus of the order *Gentianeæ*. *S. angularis* is the American centaury.

sabbattin (*sab'-at-in*). A glucoside obtained from *Sabbatia elliottii*, quinine flower; it is antiperiodic and antipyretic.

saber shin. Term applied to the anterior border of the tibia, which has a sharp convex edge; found in hereditary syphilis.

sabina (*sa-bi'-nah*). See *savin*.

Sabouraud's glucose agar (*sab-oo-ro'*). A culture medium composed of peptone, 10 Gm.; glucose, 40 Gm.; agar, 18 Gm.; and water, 1000 Cc.

sabromine (*sab-ro'-mēn*). Trade name of a preparation of calcium, bromine and behenic acid; used as bromides in general.

sabulous (*sab'-ū-lus*) [*sabulum*, sand]. Gritty; sandy.

sabulum conarii (*sab'-ū-lum ko-nar'-e-i*) [L., sand of the conarium]. A sandy substance contained in the pineal gland.

saburra (*sab-ur'-ah*) [L., "coarse sand"]. Foulness of the stomach or of the tongue or teeth; sordes.

saburral (*sab-ur'-al*) [*saburra*]. 1. Pertaining to or affected with saburra. 2. Resembling or pertaining to coarse sand.

sac (*sak*) [*saccus*, a bag]. The bag-like bulging or covering of a natural cavity, hernia, cyst, or tumor. **s.s, air-**, the air-cells of the lung. **s., allantoid**, synonym of *allantois*. **s., amniotic**, the amnion. **s.s, auditory**, the rudimentary organs of hearing of the embryo of certain vertebrates. **s., conjunctival**, that formed by reflection of the palpebral conjunctiva. **dental**, see *dental sac*. **s., dorsal**, a recess between the epiphysis cerebri and the roof of the third ventricle. Syn., *suprapineal recess*. **s., embryonic**, the sac-like stage of the embryo, which it presents early in its development, just after the abdominal plates have closed. **s., endolymphatic**, a sac of the dura included in the aqueduct of the vestibule. See under *duct, endolymphatic*. **s. of the epididymis**, the visceral layer of the tunica vaginalis covering the epididymis. **s., epiploic**, see *sac, omental*. **s., fetal**. See *s., gestation-*. **s., gestation-**, the sac inclosing the embryo in ectopic pregnancy. **s., hernial**, the peritoneal covering of a hernia. **s., lacrimal**, the dilated upper portion of the lacrimal duct. **s., omental**, the sac formed between the ascending and descending portions of the great omentum. **s., pericardial**, the pericardium. **s., peritoneal**, the cavity formed by the peritoneal serous membrane. **s., pleural**, the cavity formed by the pleura. **s. of the pulmonary veins**, the left auricle of the heart. **s., serous**, the closed cavity formed by any serous membrane. **s., tubotympanic**, the diverticulum of the primitive gut forming the tympanic cavity and the Eustachian tube. **s., umbilical**, the umbilical vesicle. **s. of the venæ cavæ**, the right auricle of the heart. **s., vitelline**, the sac inclosing the vitellus or yolk in the embryo.

saccade (*sak-ahd'*) [F., *saccade*, pull, draw]. The involuntary jerk of deglutition.

saccaneurysma (*sak-an-ū-riz'-mah*) [*σάκκος*, bag; *εὐρύνειν*, to dilate]. A sacculated aneurysm.

saccate, saccated (*sak'-āt, sak'-a-ted*) [*saccus*, a sac]. Sac-shaped; contained in a sac; encysted.

saccharate (*sak'-ar-āt*). A salt of saccharic acid.

saccharated (*sak'-ar-a-ted*)[*saccharin*]. Containing sugar. **s. ferrous carbonate** (*ferri carbonas saccharatus*, U. S. P.). Dose 4 gr. (0.25 Gm.).

saccharephidrosis (*sak-ar-ef-id-ro'-sis*) [*σάκχαρον*, sugar; *ἐφιδρῶσις*, ephidrosis]. A form of hyperidrosis characterized by the excretion of sugar in sweat.

saccharic (*sak-ar'-ik*). Pertaining to or obtained from sugar.

saccharide (*sak-ar'-id*) [*σάκχαρον*, sugar]. A compound of a base with sugar. A sucrate. See *casein saccharide*.

sacchariferous (*sak-ar-if'-er-us*) [*saccharum*, sugar; *ferre*, to bear]. Containing or producing sugar.

saccharification (*sak-ar-if-ik-a'-shun*) [*saccharin; facere*, to make]. The act of converting into sugar.

saccharimeter (*sak-ar-im'-et-er*) [*saccharin; μέτρον*, a measure]. An apparatus for determining the amount of sugar in solutions, either in the form of a hydrometer, which indicates the strength in sugar by the specific gravity of the solution; or of a polarimeter, which indicates the strength in sugar by the number of degrees of rotation of the plane of polarization. **s. test**, a solution of dextrose rotates the plane of polarized light to the right.

saccharimetry (*sak-ar-im'-et-re*) [*saccharum*; *μέτρον*, measure]. The operation or art of ascertaining the amount or proportion of sugar in solution in any liquid.

saccharin (*sak'-ar-in*) [*σάκχαρον*, sugar], $C_7H_5SO_3N$. A crystalline substance nearly 280 times sweeter than cane-sugar, and used as a substitute for the latter in diabetes. It is also employed as an antiseptic. Syn., *benzoyl sulphonicimide; glucusimide; glusside; orthosulphaminbenzoic anhydride; saccharinol; saccharinose; sycose; zuckerin.* **s.-sodium**, a soluble powder containing 90 % of saccharin; used as an intestinal antiseptic. Dose 15 gr. (1 Gm.) once or twice daily. **s. soluble.** Same as *sodium saccharin.*

saccharine (*sak'-ar-in*) [*saccharum*]. Containing sugar; sugary; as sweet as sugar.

saccharins (*sak-ar'-ins*). A name given to the lactones of the saccharic acids.

saccharobacillus (*sak-ar-o-bas-il'-us*). See *bacillus pasteurianus*, in *table of bacteria.*

saccharobiose (*sak-ar-o-bi'-ōs*). A disaccharid, with the formula $C_{12}H_{22}O_{11}$.

saccharogalactorrhea, saccharogalactorrhœa (*sak-ar-o-gal-ak-tor-e'-ah*) [*saccharum*; *γάλα*, milk; *ῥοία*, a flow]. The excretion of an excess of sugar with the milk.

saccharogen (*sak'-ar-o-jen*) [*σάκχαρον*, sugar; *γεννᾶν*, to produce]. A material found in milk and convertible into lactose. A glucoside

saccharoids (*sak'-ar-oidz*). Non-fermentable sugars.

saccharometabolic (*sak-ar-o-met-ab-ol'-ik*). Pertaining to the metabolism of sugar.

saccharometabolism (*sak-ar-o-met-ab'-ol-izm*). The metabolism of sugar.

saccharometer (*sak-ar-om'-et-er*). See *saccharimeter.*

Saccharomyces (*sak-ar-o-mi'-sēz*) [*saccharum*; *μύκης*, a fungus]. A genus of unicellular vegetable organisms, of which the yeast-plant is a common example **S. albicans,** same as *Oïdium albicans*, the fungus of thrush. **S. cerevisiæ,** the ferment of beer-yeast. **S. granulomatosus,** Sanfelice (1898) obtained from granulomatous nodule of a pig. Inoculated in swine, it produced similar lesions, but was not pathogenic to other animals. **S. lithogenes,** Sanfelice (1895), from a carcinomatous metastasis in an ox, the primary tumor occurring in the liver. It killed white mice in 8 days after subcutaneous inoculation. **S. neoformans,** Sanfelice (1895), isolated from fermenting grape-juice. It produced nodules in all organs of guinea-pigs except brain, heart, and suprarenals; death occurred in 20 to 30 days after inoculation. He emphasized the similarity of the organisms to the so-called coccidia of cancers. **S. niger,** isolated from the tissue of a guinea-pig which died of marasmus. It produced enlargement of lymph-glands and suppuration at the point of inoculation in guinea-pigs, rabbits, chickens, and dogs. **S. ruber,** Demme (1891), a red, budding fungus found in milk, which produced gastroenteritis in children. Shown by Casagrandi (1897) to be pathogenic for guinea-pigs, dogs, and mice when inoculated subcutaneously or into the abdomen. **S. septicus,** de Galtano, found in urinary sediment. An exceptionally virulent species producing fatal fibrinous peritonitis and septicemia in guinea-pigs in 12 hours **S. theobromæ,** the yeast causing the fermentation in the curing of cacao. **S. tumefaciens albus,** Poulerton, isolated from patients in cases of pharyngitis.

saccharomycetic (*sak-ar-o-mi-se'-tik*). Pertaining to, or caused by, saccharomyces.

saccharomycosis (*sak-ar-o-mi-ko'-sis*). A pathological condition due to yeasts or *saccharomyces.* **s. hominis,** a name given by Busse (1894) to pyemia produced by a pathogenic yeast. Syn., *saccharomycosis subcutaneous tumefaciens*, Curtis.

saccharorrhea, saccharorrhœa (*sak-ar-or-e'-ah*) [*σάκχαρον*, sugar; *ῥοία*, flow]. The secretion of saccharine fluid. Glycosuria. **s. cutanea.** See *saccharephidrosis.* **s. lactea.** See *saccharogalactorrhea.* **s. pulmonalis,** the exudation of sweetish sputa **s. urinosa.** See *diabetes mellitus.*

saccharoscope (*sak'-ar-o-skōp*) [*saccharum*; *σκοπεῖν*, to view]. An instrument for determining and registering the amount of sugar in the urine.

saccharose (*sak'-ar-ōs*) [*saccharum*]. 1. $C_{12}H_{22}O_{11}$. A crystalline carbohydrate, cane-sugar, occurring in the juice of many plants, chiefly in sugar-cane, in some varieties of maple, and in beet-root; it melts at 160° C.; at 190°–200° C. it changes into a brown, noncrystallizable mass called caramel, used in coloring liquids It is not directly fermentable, and does not reduce alkaline copper solutions. 2. Any one of a group of carbohydrates isomeric with cane-sugar.

saccharosuria (*sak-ar-o-sū'-re-ah*) [*saccharose*; *οὖρον*, urine] The presence of saccharose in the urine.

saccharum (*sak'-ar-um*) [*σάκχαρον*, sugar], $C_{12}H_{22}O_{11}$, sugar. The sugar of the pharmacopeia (*saccharum*, U. S P.; *saccharum purificatum*, B. P) is the refined sugar obtained from *s. officinarum* and from various species of *sorghum.* See *saccharose* (1). **s. album,** white or pure crystallized sugar. **s. canadense,** maple-sugar, obtained from *Acer saccharinum.* **s. candidum,** rock-candy. **s. lactis,** sugar of milk. **s. purificatum,** pure white sugar.

saccharure (*sak'-ar-ūr*) [*saccharum*]. A preparation obtained by saturating sugar with a tincture, then drying, and pulverizing.

sacchorrhea, sacchorrhœa (*sak-or-e'-ah*) [*saccharum*; *ῥεῖν*, to flow]. Glycosuria.

sacchulose (*sak'-ū-lōs*). A product resulting from the treatment of sawdust with a weak solution of sulphurous acid under a pressure of about 100 lb. to the square inch (Classen Process). It has been proposed as a food stuff.

sacciform (*sak'-si-form*) [*sac*; *forma*, form]. Resembling a sac. **s. disease of the anus,** distention and inflammation of the pouches of the rectum.

saccular (*sak'-u-lar*) [*sac*]. Sac-shaped, as a *saccular* aneurysm.

sacculated (*sak'-ū-la-ted*) [*sac*]. Divided into small sacs

sacculation (*sak-ū-la'-shun*) [*sac*]. 1. The state of being sacculated. 2. The formation of small sacs.

saccule (*sak'-ūl*) [*sacculus*, dim. of *sac*, a sac]. 1. A small sac. 2. The smaller of two vestibular sacs of the membranous labyrinth of the ear. See *sacculus labyrinthi.*

sacculocochlear (*sak-ū-lo-kok'-le-ar*). Relating to the saccule of the vestibule and the cochlea.

sacculus (*sak'-ū-lus*). A saccule. **s. alveolaris,** an air cell. **s. buccalis,** hanging cheek or pouch, in animals. **s. cæcalis, s. laryngis,** the laryngeal pouch between the superior vocal bands and the

inner surface of the thyroid cartilage. **sacculi chalicophori**, the lacunæ of bone. **s. chylifer**, **s. rorifer**, the receptaculum chyli. **s. cordis**, the pericardium. **s. ellipticus**, **s. hemiellipticus**. See *utricle*. **s.**, **Horner's**, the anal pocket; a saccular fold of the rectal mucosa. **s. labyrinthi**, **s. proprius**, **s. rotundus**, **s. sphæricus**, the saccule of the vestibule.

saccus (*sak'-us*) [L.]. A sac. **s. endolymphaticus**, a small sac contained in the aqueduct of the vestibule and serving to establish a communication between the endolymph and the subdural space. **s. lacrimalis**, the lacrimal sac. **s. reuniens**, the sinus venosus. **s. vitellinus**, the vitelline sac.

sacer (*sa'-ser*) [L.]. Sacred. **s. ignis**, erysipelas. **s. morbus**, epilepsy.

sachet (*sash-a'*) [*saccus*, a sac]. A small bag of perfumed or medicated substances. **s. resolutif** (Fr.), a sachet of equal parts of sal ammoniac, iron sulphate, and calcium sulphate.

Sachs-Georgi reaction (*sarks'-jor'-je*) [Hans *Sachs*, German bacteriologist, 1877– ; Walter *Georgi*, German bacteriologist, 1889–1920]. A precipitation test used in syphilis; if cholesterinized extract of beef heart is added to syphilitic blood serum, a flocculent precipitate is observed.

Sachsse's solution (*sak'-seh*) [Georg Robert *Sachsse*, German chemist, 1840–1895]. See under *S.'s test*. **S.'s test, a** quantitative test for the determination of sugar in urine, consisting in the reduction of the test solution, a solution of red iodide of mercury 18 Gm., potassium iodide 25 Gm., potassium hydroxide 80 Gm., water to make a liter. The end of the reaction is ascertained by means of a solution of stannous chloride, supersaturated with sodium hydroxide.

sack (*sak*) [*siccus*, dry]. 1. An old name for dry Spanish and Canary wine; sherry. 2. Synonym of *sac*.

sacrache (*săk'-răk*) [*sacrum; ache*]. Sacral pain in the gravid woman.

sacrad (*sa'-krad*) [*sacrum*, the sacrum]. Toward the sacral aspect.

sacral (*sa'-kral*) [*sacrum*]. Pertaining to the sacrum. **s. bone.** See *sacrum*. **s. canal.** See *canal*. **s. cornua.** See *cornu*. **s. flexure**, the curve of the rectum in front of the sacrum. **s. foramen.** See *foramen*. **s. groove.** See *groove*. **s. index**, the sacral breadth multiplied by 100, and divided by the sacral length. **s. nerves.** See *nerves*. **s. plexus.** See *plexus*.

sacralgia (*sa-kral'-je-ah*) [*sacrum*, sacrum; ἄλγος, pain]. Pain in the sacrum; hieralgia

sacralization (*sa-kral-i-za'-shun*). Fusion of the sacrum to the fifth lumbar vertebra.

sacra media (*sa'-krah me'-de-ah*) [*arteria*, understood]. The artery running down the middle of the anterior surface of the sacrum and representing the termination of the aorta.

sacrectomy (*sa-krek'-to-me*) [*sacrum; ἐκτομή*, excision]. Excision of part of the sacrum. See *operation, Kraske's*.

sacred (*sa'-kred*). Hallowed; holy. **s. bark.** See *cascara sagrada*. **s. malady.** Synonym of *epilepsy*.

sacren (*sa'-kren*) [*sacrum*, sacrum]. Belonging to the sacrum in itself.

sacriplex (*sa'-krip-leks*) [*sacrum, plexus*]. The sacral plexus of nerves.

sacro- (*sa-kro-*) [*sacrum*]. A prefix denoting relating to the sacrum.

sacroanterior (*sa-kro-an-te'-re-or*). Applied to a fetus having the sacrum directed forward.

sacrococcygeal (*sa-kro-kok-sij'-e-al*) [*sacro-; coccyx*]. Pertaining to the sacrum and the coccyx. **s. sinus**, *pilonidal sinus, q. v.*

sacrocoxalgia (*sa-kro-koks-al'-je-ah*). See *sacroiliac disease*.

sacrocoxitis (*sa-kro-koks-i'-tis*). See *sacroiliac disease*.

sacrodynia (*sa-kro-din'-e-ah*) [*sacro-; ὀδύνη*, pain]. Pain referred to the region of the sacrum in cases of hysteria or neurasthenia.

sacroiliac (*sa-kro-il'-e-ak*) [*sacro-; ilium*]. Pertaining to the sacrum and the ilium. **s. disease**, an inflammation, usually tuberculous, of the sacroiliac joint, characterized by pain, tenderness, and swelling and elongation of the limb. **s. synchondrosis**, the junction of the sacrum and ilium.

sacrolumbalis (*sa-kro-lum-ba'-lis*). See under *muscle*.

sacrolumbar (*sa-kro-lum'-bar*) [*sacro-; lumbus*, loin]. Pertaining to the sacrum and the loins. **s. angle**, the angle formed by the articulation of the sacrum and the last lumbar vertebra.

sacroposterior (*sa-kro-pŏs-te'-re-or*) [*sacro-; posterior*]. Of the fetus, having the sacrum directed backward.

sacropromontory (*sa-kro-prom'-on-to-re*). The promontory of the sacrum.

sacrosciatic (*sa-kro-si-at'-ik*) [*sacro-; sciatic*]. Pertaining to the sacrum and the ischium, as the *sacrosciatic* notch, *sacrosciatic* ligaments.

sacrospinal (*sa-kro-spi'-nal*) [*sacrum; spina*, spine]. Pertaining to the sacrum and the spine.

sacrospinalis (*sa-kro-spi-na'-lis*) [*sacro-; spine*]. The erector spinæ muscle.

sacrotomy (*sa-krot'-o-me*) [*sacro-; τέμνειν*, to cut]. Excision of the lower portion of the sacrum.

sacrouterine (*sa-kro-ū'-ter-in*). Pertaining to the sacrum and the uterus.

sacrovertebral (*sa-kro-ver'-te-bral*) [*sacro-; vertebra*]. Pertaining to the sacrum and the vertebræ. **s. angle**, the promontory of the sacrum.

sacrum (*sa'-krum*) [*sacer*, sacred; *os*, bone, understood]. A curved triangular bone composed of five united vertebræ, situated between the last lumbar vertebra above, the coccyx below, and the ossa innominata on each side, and forming the posterior boundary of the pelvis.

sactosalpinx (*sak-to-sal'-pinks*) [*σακτός*, crammed; *σάλπιγξ*, tube]. The obstruction of a Fallopian tube and consequent distention from retained secretion. **s. hæmorrhagica.** See *hematosalpinx*.

saddle (*sad'-l*) [ME., *sadel*]. A contrivance secured on the back of a horse or other animal to serve as a seat for a rider. **s.-arch**, that form of dental vault the section of which represents the shape of a saddle. **s.-back**, lordosis. **s.-bags**, a pair of leathern cases, formerly, and still locally, carried by physicians upon the saddle, and containing their medicines and instruments. **s.-head.** See *clinocephalus*. **s.-joint**, an articulation in which each surface is concave in one direction and convex in the other. **s.-nose**, a nose of which the bridge is sunken in. **s., Turkish.** See *sella turcica*.

sadism (*sa'-dism*) [Donatien Alphonse François, Comte de *Sade*, 1740–1814]. Sexual perversion in which pleasure is derived from inflicting cruelty upon another.

sadist (*sa'-dist*). One affected with sadism.

sadistic (*sa-dis'-tik*). Pertaining to sadism.

Saemisch's operation (*sa'-mish*) [Edwin Theodor *Saemisch*, Austrian ophthalmologist, 1833–1909]. *For hypopyon ulcer;* the cornea is transfixed, and the intervening tissue, including the base of the ulcer, is divided by cutting outward. **S.'s ulcer,** a serpiginous infecting ulcer of the cornea.

Saenger's macula (*seng'-er*) [Max *Saenger*, Austrian gynecologist and obstetrician, 1853–1903]. A bright red spot marking the orifice of the duct of Bartholin's gland in cases of gonorrheal vulvitis. Syn., *macula gonorrhœica*. **S.'s operation,** cesarean section with closure of the uterine wound by three layers of sutures.

Saenger's pupil reaction. For the differential diagnosis of cerebral syphilis and tabes; in amaurosis and optic atrophy of cerebral syphilis the pupil reflex to light may be preserved and even increased after a protracted stay in the dark, which is never the case in tabes dorsalis.

sæpimentum (*se-pe-men'-tum*) [*sæpire*, to fence]. 1. The tissue enclosing the three umbilical vessels. 2. Pons Varolii.

sæptum (*sep'-tum*). See *septum*.

safflower (*saf'-low-er*). See *carthamus*. **s. carmin.** Same as *carthamin*.

saffron (*saf'-ron*) [Ar., *zafarān*, saffron]. The *Crocus sativus*, a plant of the order *Iridæ*. Its stigma (*crocus*, B. P.) contains a glucoside, coloring matter (crocin), and a bitter principle. Saffron is used as a coloring and flavoring agent, and in the form of a tea to bring out the eruption of the exanthematous diseases. **s., American.** See *carthamus*. **s., meadow.** See *colchicum*. **s. substitute.** Same as *Victoria yellow*. **s.-tea.** See *carthamus*. **s.-yellow.** Same as Martius's yellow.

safranine, safranin (*saf'-ra-nin*) [*saffron*], $C_{18}H_{18}N_4$. A coal-tar dye used in microscopy, especially in studying karyokinesis. It is a powerful cardiac and respiratory poison.

safranophile (*sa-fran'-of-fil*) [Fr., *safron*, saffron; φιλεῖν, to love]. In bacteriology, or histology, applied to microbes or histological elements that show a peculiar affinity for safranine.

safrene (*saf'-rēn*) [*saffron*], $C_{10}H_{16}$. A hydrocarbon obtained from sassafras.

safrol (*saf'-rol*) [*saffron; oleum*, oil]. *Safrolum* (U. S. P.), $C_{10}H_{10}O_2$. The stearoptene of sassafras oil, used in headache, neuralgia, and rheumatism. Dose 10–20 min. (0.65–1.3 Cc.).

sagapenum (*sag-a-pe'-num*). A field gum-resin believed to be the concrete juice of *Ferula persica*. Its properties resemble those of asafetida and galbanum.

sage (*sāj*) [*salvia*]. *Salvia officinalis*, a plant of the order *Labiatæ*. Its leaves (*salvia*, U. S. P.) contain several terpenes, an oil, salviol, $C_{10}H_{18}O$, and camphor. Sage is tonic, astringent and aromatic, is used in dyspepsia. Was formerly employed in colliquative sweats. Dose 20–30 gr. (1.3–2.0 Gm.).

sage femme (*sahzj-fam'*) [Fr., literally, a wise woman]. A midwife.

sagittal (*saj'-it-al*) [*sagitta*, an arrow]. 1. Arrow-like, as the *sagittal* suture of the skull. 2. Pertaining to the anteroposterior median plane of the body. **s. furrow,** a channel extending along the median line of the inner surface of the vault of the cranium. **s. nucleus,** that of the oculo-motor nerve. **s. plane,** the median plane of the body. **s. section.** See *section*. **s. sinus,** the longitudinal sinus. **s. suture,** the suture uniting the parietal bones

Sagnac rays (*san-yak'*). Secondary rays caused by x-rays or gamma rays when they come in contact with a body; they are similar to the beta rays.

sago (*sa'-go*) [Malay, *sāgu*]. A food and demulcent. **s.-spleen,** a spleen presenting on section the appearance of sago-grains, as a result of amyloid degeneration of the Malpighian bodies. **s.-grain,** a vesicular granulation of the eyelid, seen in granular ophthalmia.

Sagotia racemosa (*sa-go'-she-ah ras-e-mo'-sah*). A South American species of the order *Euphorbiaceæ*, used as a tonic and aphrodisiac.

sagradin (*sag'-rah-din*). The proprietary name for a 20 % solution of extract of cascara sagrada with spirit of peppermint.

Sahli's desmoid test (*sah'-le*) [Hermann *Sahli*, German physician, 1856–]. For estimating the functional activity of the stomach. A pill of 0.05 Gm. of methylene-blue and 0.1 Gm. of iodoform is inclosed in a bag of rubber-dam and tied with dry catgut. The gut is digested by gastric juices and not by pancreatic juices. The pill is then absorbed and in about 6 hours the urine is green. The iodine will be found in the saliva in two hours.

SAHLI'S DESMOID BAG.

Saigon cinnamon. A variety of cinnamon (*cinnamomum saigonicum*, U. S. P.) obtained from Saigon, the capital of French Cochin-China. See *cinnamon*.

St. Anthony's fire. Erysipelas; anthrax.

St. Germain's tea. See under *tea*.

St. Gothard's disease. Ankylostomiasis.

St. Hubert's disease. Hydrophobia.

St. Ignatius' bean. See *ignatia*.

St. John Long's liniment [John *St. John Long*, English painter and quack, 1800–1837]. A liniment composed of oil of turpentine 1½ oz., acetic acid 1 oz., distilled water 3 oz., and the yolk of one egg.

St. Roch's disease. Bubo.

St. Sement's disease. Syphilis.

St. Vitus' dance. See *chorea* **St. Vitus' dance of the voice,** stammering.

saiodine (*sa-i'-o-den*). Trade name of a preparation containing calcium, iodine and behenic acid.

sajodin (*sah-yo'-din*). See *saiodine*.

saké (*sah'-ka*) [Jap.]. Japanese rice-beer or other alcoholic beverage.

sakushu fever (*sah-koo'-shoo*). An epidemic seven-day fever occurring in Japan.

sal [L.]. 1. Salt. 2. Any substance resembling salt. **s. acetosellæ,** potassium binoxalate. **s. aeratus.** 1. Sodium bicarbonate. 2. Potassium bicarbonate. **s. alembroth.** See *alembroth*. **s. amarum,** magnesium sulphate. **s. ammoniac,** ammonium chloride. **s. communis.** See *salt, common*. **s. de duobus,** potassium sulphate. **s. de duobus,** potassium sulphate. **s. diureticus,** potassium acetate. **s. enixum,** potassium bisulphate. **s. fossile,** sodium chloride. **s. Glauberi.** See *salt, Glauber's*. **s. kissingense,** a salt obtained from the mineral springs of Kissingen, in Bavaria. **s. marinum,** sodium chloride. **s. mirabile,** sodium sulphate. **s. perlatum,** sodium phosphate. **s. polychrest,** potassium sulphate with sulphur. **s. prunellæ, s. prunelle.** 1. A fused mixture of

potassium nitrate, 128 parts, and sulphur, 1 part. 2. Fused potassium nitrate. **s. rupium,** rock-salt. **s. seignette,** potassium and sodium tartrate. **s. sodæ.** See *salt of soda.* **s. vegetabile,** potassium tartrate. **s. volatile,** ammonium carbonate, or aromatic spirit of ammonia.

Sala's cells. Stellate connective-tissue cells found in the network of fibers forming the sensory nerve-endings in the pericardium.

salaam convulsion (*sa-lahm'*) [Ar , *salām,* saluting]. A clonic spasm of the muscles of the trunk, producing a bowing movement; it is usually due to hysteria.

salacetin (*sal-as'-et-in*). Trade name of phenylaminoacetosalicylate; said to be antiseptic and analgesic.

salacetol (*sal·as'-et-ol*) [*salix,* willow; *acetum,* vinegar]. The salicylic acid ester of acetone-alcohol. It is proposed as a substitute for sodium salicylate and salol. It has been recommended as an intestinal and genito-urinary antiseptic, and for the treatment of acute or chronic rheumatism Dose, 30–45 gr

salacious (*sa-la'-se-us*) [*salax,* lustful]. Lustful.

salacity (*sa-las'-it-e*) [*salax,* lustful]. Lustful or venereal desire.

salactol (*sal-ak'-tol*). A combination of the sodium salts of salicylic and lactic acids dissolved in a 1% solution of hydrogen dioxide; it is recommended in diphtheria. The solution is applied as a spray or with a brush, and given internally in doses of a tablespoonful (15 Cc.).

salamide (*sal'-am-id*). An amidogen derivative of salicylic acid, which it closely resembles in therapeutic properties, but acts more promptly and in smaller doses.

salantol (*sal-an'-tol*). See *salacetol.*

salazolon (*sal-az'-ol-on*). Salipyrine.

salborol (*sal-bo'-rol*). A compound of phenyl salicylate and boric acid, used in rheumatism.

salbromalide (*sal-bro'-mal-id*). See *antinervin.*

saldanin (*sal'-dan-in*). A local anesthetic said to be prepared from *Datura arborea.*

salen (*sal'-en*). Trade name of a mixture of methyl and ethyl glycolic esters; soluble in ether alcohol and castor-oil.

salenal (*sal'-en-al*). Trade name of an ointment containing 33 3% of salen.

salenders (*sal'-en-derz*). See *malandri.*

salep (*sal'-ep*) [Ar., *sahleb*]. The dried tubers of various species of the genus *Orchis* and the genus *Eulophia.* It is used as a food, like sago and tapioca.

saleratus (*sal-er-a'-tus*) [*sal, aeratus,* aerated salt]. Properly, sal-aeratus. Potassium bicarbonate; also, sodium bicarbonate.

salethyl (*sal-eth'-il*). A proprietary preparation said to be pure ethyl salicylate.

salhypnone (*sal-hip'-nōn*), $C_6H_4O(COC_6H_5)COOCH_3$. A benzoylmethylsalicylic ester; long colorless needles, insoluble in water, sparingly soluble in alcohol and ether; melts at 113°–114°. It is used as an antiseptic.

salicaine (*sal'-e-kān*). A brand of saligenin.

salicamar (*sal-ik'-am-ar*), $CH_2OH.CHOH.CH_2O.C_6H_4CO.CH_2.CHOH.CH_2OH$ A glycerol ether of glycerolsalicylic acid; recommended as a stomachic and antirheumatic.

salicin (*sal'-is-in*) [*salix,* willow], $C_{13}H_{18}O_7$. A crystalline glucoside found in the bark and leaves of the willow. Salicin (*salicinum,* U. S. P., B. P.) is used as a substitute for salicylic acid in doses of 5–30 gr. (0.3–2.0 Gm.); maximum daily dosage 150 gr. (9.7 Gm.).

salicitrin (*sal-is'-it-rin*). Novaspirin.

salicol (*sal'-ik-ol*). A proprietary solution said to consist of methyl-alcohol, salicylic acid, and oil of wintergreen in water; used as an antiseptic and cosmetic.

salicyl (*sal'-is-il*) [*salicylic acid*], $C_7H_5O_2$. The hypothetical radical of salicylic acid. **s. acetate,** $C_2H_3.O.C_7H_5O_2O$, acetosalicylic anhydride. **s. acetol,** salactol. **s.-anilide,** salifebrine. **s. bromanilide,** same as *antinervine.* **s.-creosote,** a paste prescribed by Unna in skin diseases, consisting of a mixture of salicylic acid, creosote, wax, and cerate. **s.-*p*-phenetidin.** See *malakin.* **s.-quinine salicylate.** See *saloquinine salicylate* **s.-resorcinol,** $C_{13}H_{10}O_4$, obtained from salicylic acid and resorcinol with heat. It occurs in plates slightly soluble in water; melts at 133° C. It is antiseptic, antipyretic, and analgesic, and used in typhoid, diarrhea, etc. Dose 5–15 gr. (0.32–1 0) Gm); maximum dose 15 gr. (1 Gm.) single; 60 gr. (4 Gm.) daily. **s. urate,** a salt of salicyluric acid.

salicylage (*sal'-is-il-āj*) [*salicylic acid*]. The addition of salicylic acid to foods for their preservation.

salicylamide (*sal-is-il'-am-id*) [*salicylic acid*], $C_6H_4(OH)CONH_2$. A tasteless compound produced by treating methyl salicylate with an alcoholic solution of ammonia, and used as a substitute for salicylic acid.

salicylate (*sal-is'-il-āt*) [*salicylic acid*]. A salt of salicylic acid The salicylates of lithium, methyl, and sodium, which are official, and those of ammonium and strontium, which are unofficial, are used in rheumatism, in doses of 10–15 gr. (0 65–1.0 Gm.). *Bismuth salicylate* is employed as an intestinal antiseptic; *naphthol salicylate* is betol; *phenyl salicylate* is salol.

salicylated (*sal-is'-il-a-ted*). Impregnated with salicylic acid.

salicylic acid (*sal-is-sil'-ik*). See *acid, salicylic.* **s.-acid, glycerolester,** recommended as a valuable antirheumatic remedy. **s. alcohol.** See *saligenin.* **s. aldehyde,** salicylous acid; used as an internal antiseptic. Dose 2–8 gr. (0 1–0.5 Gm.) daily. **s.-amide.** See *salicylamide.* **s. amylester.** See *amyl salicylate* **s. anhydride.** See s. *aldehyde.* **s. cream,** an antiseptic mixture of powdered salicylic acid, 2 dr.; phenol, 1 dr.; glycerol, 10 dr. **s. naphthylic ester.** See *betol.* **s. phenylester.** See *salol.* **s. silk,** a dressing made of silk waste impregnated with 10% salicylic acid and a little glycerol. **s. suet,** one part of salicylic acid in 49 parts of mutton-suet; used as a dressing for sores. **s. thymolester,** thymol acetate. **s. wool,** cotton impregnated with 4 to 10 % of salicylic acid and an equal amount of glycerol.

salicylid (*sal-is'-il-id*). An anhydride of salicylic acid. **s.-phenetidin.** See *malakin.*

salicylism (*sal'-is-il-izm*) [*salix,* willow]. A toxic condition, produced by the injudicious or excessive use of salicylic acid or its salts.

salicylize (*sal'-is-il-īz*). To treat with salicylic acid.

salicylol (*sal'-is-il-ol*). See *salicylic aldehyde.*

salicyluric acid (*sal-is-il-ū'-rik*). An acid found in the urine after the ingestion of salicylic acid or its derivatives.

salicylysin (*sal-is-il'-is-in*). Trade name of an English brand of thiosinamine salicylate, like fibrolysin.

salifebrin (*sal-e-feb'-rin*). Salicylanilide; $C_{13}H_{11}NO_2$, a white, permanent powder, insoluble in

water, freely soluble in alcohol; recommended as an antipyretic and antineuralgic. It colors blue litmus-paper red.

saliferous (*sal-if'-er-us*) [*sal*, salt; *ferre*, to bear]. Producing salt.

salifiable (*sal-if-i'-a-bl*) [*sal; fieri*, to become]. Forming a salt by union with an acid.

saliformin (*sal-if-orm'-in*), $(CH_2)_6N_4.C_6H_4(OH)$-COOH. A white, crystalline powder, of sour taste, soluble in water and alcohol. It is an antiseptic and uric-acid solvent. Dose 15–30 gr. (1–2 Gm.). Syn., *Formin salicylate; hexamethylentetramine-salicylate; urotropin salicylate.*

saligallol (*sal-e-gal'-ol*). Pyrogallol disalicylate, a resinous solid, soluble in acetone or chloroform. Used as a vehicle for cutaneous applications and as a varnish.

saligenin (*sal-ij'-en-in*) [*salicin; γεννᾶν*, to produce], $C_7H_8O_2$. Orthooxybenzylalcohol, a substance obtained from salicin by boiling with dilute hydrochloric or sulphuric acid.

salimenthol (*sal-e-men'-thol*). A compound of menthol and salicylic acid ether, used in rheumatism.

salimeter (*sal-im'-et-er*) [*sal*, salt; *μέτρον*, a measure]. A hydrometer for ascertaining the strength of saline solutions

salinaphthol (*sal-in-af'-thol*). Naphthyl salicylate.

saline (*sa'-līn*) [*sal*, salt]. 1. Salty; containing salt or substance resembling salt. 2. A salt of an alkali or alkaline earth. **s. solution**, a 0.6% solution of sodium chloride; physiological (wrongly called normal) salt solution.

salines (*sa'-līnz*) [*sal*, salt]. Salts of the alkalies or of magnesium, used as hydragogue cathartics. Magnesium sulphate and citrate, sodium sulphate and Rochelle salts are examples.

salinigrin (*sal-in-i'-grin*). A substance said to be a glucoside from the bark of *Salix nigra*.

salinofer (*sal-in'-o-fer*). A skin cream containing 15% of sodium chloride, used locally in rheumatic and neuralgic conditions.

salinometer (*sal-in-om'-et-er*). Synonym of *salimeter*.

saliodine (*sal-i-o'-dīn*). A proprietary preparation, said to be "an iodated, acetosalicylate, with adjuvants;" recommended in rheumatism, malaria, influenza, syphilis, etc. Dose 10 to 30 gr.

saliphen (*sal'-if-en*). Salicylphenetidin; a compound of salicylic acid and phenetidin.

salipyrine (*sal-i-pi'-rin*) [*salicylate; πῦρ*, fire]. $C_{11}H_{12}N_2O.C_7H_6O_3$. Antipyrine salicylate, consisting of 57.7 parts of salicylic acid and 42.3 parts of antipyrine; it is soluble in water, and is used in rheumatism, neuralgia, and as an antipyretic. Dose 15–30 gr. (–2 Gm.).

saliretin (*sal-e-ret'-in*) [*saligenin; ῥητίνη*, resin], $C_{14}H_{14}O_3$. An amorphous resinous body, produced by treating saligenin with acids.

Salisbury treatment (*sawls'-ber-e*). The treatment of obesity by meat diet and hot water.

salit (*sal'-it*). Borneol salicylate, used in rheumatism and neuralgic conditions.

salitannol (*sal-e-tan'-ol*), $C_{14}H_{18}O_7$. A condensation-product of salicylic and gallic acids by action of phosphorus oxychloride; a white, amorphous powder, soluble in solutions of caustic alkalies, slightly soluble in alcohol. Recommended as a surgical antiseptic.

salithymol (*sal-e-thi'-mol*). Thymol salicylate

salitonia (*sal-it-o'-ne-ah*). A saline tonic.

saliva (*sa-li'-vah*) [L.]. The mixed secretion of the parotid, submaxillary, sublingual, and mucous glands of the mouth. It is opalescent, tasteless, alkaline, and has a specific gravity of from 1004 to 1009, and contains serum-albumin, globulin, mucin, urea, an amylolytic ferment called ptyalin, and a proteolytic and a lipolytic ferment; also salts, among which is potassium sulphocyanate, derived especially from the parotid gland. Among formed elements are epithelial cells, salivary corpuscles, and bacteria. The functions of saliva are to moisten the food and lubricate the bolus, to dissolve certain substances, to facilitate tasting, to aid in deglutition and articulation, and to digest starches, which it converts into maltose, dextrin, and glucose. **s., chorda**, that produced by stimulation of the chorda tympani nerve. **s., ganglionic**, that produced by irritating the submaxillary glands. **s.-pump**, dental pump. **s., resting**, the saliva found in the mouth between meals. **s., sympathetic**, that produced by stimulation of the sympathetic nerve.

salivant (*sal'-iv-ant*) [*saliva*, saliva]. 1. Stimulating the secretion of saliva. 2. A drug which increases the flow of saliva.

salivary (*sal'-iv-a-re*) [*saliva*]. Pertaining to or producing saliva, formed from saliva. **s. calculus**, a calcareous concretion found in the salivary ducts. **s., corpuscles**, pale, spherical, nucleated bodies found in saliva. **s. diastase.** Same as *ptyalin*. **s. digestion**, the conversion of starches into dextrin and sugar by the action of saliva. **s. fistula**, an abnormal opening communicating with a salivary duct. **s. glands**, the glands, six in number, situated three on each side of the mouth, which secrete the saliva. See *parotid, submaxillary*, and *sublingual*.

salivate (*sal'-iv-āt*) [*salivare*, to spit out]. To cause an excessive discharge of saliva.

salivation (*sal-iv-a'-shun*) [*salivate*]. An excessive secretion of saliva; a condition produced by mercury, pilocarpin, and by nervous disturbances.

salivator (*sal'-iv-a-tor*) [*salivate*]. An agent causing salivation

salivatory (*sal-iv-a'-to-re*). Salivant; stimulating the secretion of saliva.

salivin (*sal'-iv-in*). Same as *ptyalin*.

salivolithiasis (*sal-iv-o-lith-i'-as-is*) [*saliva; λίθος*, stone]. Formation of a salivary calculus.

salix (*sa'-liks*) [L.]. The bark of the common white willow, *S. alba*. Its properties are due to a constituent, **salicin**, which is tonic and antiseptic. It is useful as an antipyretic in rheumatic fever. **s. nigra**, the bark of the black willow, recommended in nocturnal emissions and ovarian neuralgia.

Salkowski's modification of Hoppe-Seyler's test for CO in the blood (*sal-kow'-ske*) [Ernst Leopold *Salkowski*, German physician, 1844–1923]. Add to the blood to be tested 20 volumes of water and an equal quantity of a sodium hydroxide solution of specific gravity 1.34. In the presence of carbon monoxide the mixture will soon become milky, changing to bright red. On standing, red flakes collect on the surface. Normal blood treated in this way gives a dirty brown coloration. **S.'s reaction for cholesterin**, dissolve the substance in chloroform and add an equal volume of concentrated sulphuric acid. The cholesterin solution becomes bluish-red, changing gradually to violet red, while the sulphuric acid appears red with a green fluorescence. **S.'s test for indol**, to the indol solution add a

few drops of nitric acid, and then, drop by drop, a 2 % solution of potassium nitrite. The presence of indol is evinced by a red color, and finally by a red precipitate of nitrosoindol nitrate.

(de) Salle's line. A line beginning at the upper margin of the ala nasi, encircling the angle of the mouth, and ending at the edge of the orbicularis oris. For significance see *Jadelot's lines.*

sallenders (*sal'-en-durz*). See *malandria.*

salmester (*sal-mes'-ter*). Same as *mesotan, q. v.*

salmiac (*sal'-me-ak*). Ammonium chloride.

salmin (*sal'-min*), $C_{30}H_{57}N_{27}O_6 + 4H_2O$. A protamine from the spermatozoa of salmon, identical or isomeric with clupein

salmon (*sal'-mon*). A histon from the spermatozoa of salmon.

Salmon's back-cut. An incision along the track of an anal fistula.

salmon patch (*sam'-un*). See *Hutchinson's patch.*

salochinin. See *saloquinine.*

salocoll (*sal'-o-kol*). Phenocoll salicylate. A white powder, odorless and tasteless, only slightly soluble in cold water It is said to be antipyretic, antineuralgic, and antirheumatic. Dose 15 to 30 gr.

salocreol (*sal-o-kre'-ol*). Trade name of a compound of creosote and salicylic acid, used locally in rheumatic conditions.

salol (*sal'-ol*) [*salix*, willow]. See *pheny salicylate.* **s., camphorated,** a mixture of 75 % of phenyl salicylate with 25 % of camphor; an oily liquid, soluble in alcohol, ether, chloroform, or oils, a local anesthetic, antiseptic, and analgesic. Dose 3–10 gr. (0.2–0.65 Gm.) Syn, *camphor salol.* **s. tribromide,** $C_6H_4.OH\ COO.C_6H_2Br_3$, a white, odorless, tasteless powder, freely soluble in chloroform and glacial acetic acid, insoluble in ether, or alcohol. It is a combined hypnotic and hemostatic. Dose 32 gr. (2 Gm.). Syn.; *cordol.*

salolism (*sa'-lol-izm*). Poisoning by phenyl salicylate, a mixture of salicylism and carbolism in which the symptoms of the latter predominate

Salomon-Saxl's reaction (*sal'-om-on-saksl'*) [Hugo *Salomon*, Austrian physician]. Excess of neutral sulphates in the urine of patients with cancer. It is present in many cases of cancer, but it is not specific, and is even found in healthy individuals.

saloop (*sa-loop'*) [see *salep*]. A drink prepared from salep; also from sassafras bark and herbs. It is regarded as a cure for drunkenness.

salophen (*sal'-o-fen*) [*salix*, willow], $C_6H_4.OH.CO_2.C_6H_4.NH\ (C_2H_3O) = C_{15}H_{13}NO_4$ Acetylparamidophenyl salicylate, a crystalline substance containing 50 % of salicylic acid, and used as a substitute for the latter, and as an intestinal antiseptic. Dose 15 gr. (1 Gm.).

salophenin (*sal-o-fe'-nin*). Salophen.

saloquinine (*sal-o-kwin'-ēn*), $C_6H_4.OH.CO.O\ C_{20}H_{23}N_2O$ The quinine ester of salicylic acid; a crystalline, absolutely tasteless substance, insoluble in water, readily soluble in alcohol or ether; melts at 130° C. It is used as is quinine. Dose 10–30 gr. (0.65–2.0 Gm.) several times daily. **s. salicylate,** $C_6H_4.OH.COO.C_{20}H_{23}N_2O.C_6H_4.OH.COOH$, crystallizes in white needles, soluble with difficulty in water; melts at 179° C. It is tasteless and recommended in rheumatism. Dose 15 gr. (1 Gm.) 3 times daily. Syn, *rheumatin.*

salosantal (*sal-o-san'-tal*). A 33 % solution of phenyl salicylate in sandalwood oil with the addition of a little oil of peppermint. It is indicated in cystitis, prostatitis, etc. Dose 10–20 drops 3 times daily after meals.

salpingectomy (*sal-pin-jek'-to-me*) [*salpinx*; ἐκτομή, excision]. Excision of a Fallopian tube.

salpingemphraxis (*sal-pin-jem-fraks'-is*) [*salpinx*; ἐμφράξις, obstruction]. Closure of the Eustachian or Fallopian tube.

salpingian, or **salpingic** (*sal-pin'-je-an, sal-pin'-jik*) [σάλπιγξ, tube] Pertaining to a Eustachian or Fallopian tube.

salpingion (*sal-pin'-je-on*). The point at the inferior surface of the apex of the petrosa.

salpingitic (*sal-pin-jit'-ik*) [*salpinx*; ῖτις, inflammation]. Pertaining to or affected with salpingitis.

salpingitis (*sal-pin-ji'-tis*) [*salpinx*; ῖτις, inflammation]. 1. Inflammation of the Fallopian tube 2. Inflammation of the Eustachian tube **s., chronic parenchymatous,** pachysalpingitis, chronic interstitial inflammation and thickening of the muscular coat of the Fallopian tube. **s., chronic vegetating,** excessive hypertrophy of the mucosa of the Fallopian tube **s., gonorrheal,** that due to infection with gonococci. **s, hemorrhagic,** hematosalpinx. **s., interstitial,** that marked by excessive formation of connective tissue. **s., isthmic nodular,** follicular inflammation of the small constricted portion (isthmus) of the oviduct, with formation of small nodules of muscular and connective tissue. **s., mural.** See *s., chronic parenchymatous* **s., nodular,** a form marked by formation of solid nodules. Cf. *s., tuberculous.* **s., parenchymatous.** See *s., chronic parenchymatous* **s., pneumococcous,** that due to infection with pneumococci. **s., pseudofollicular,** adenomyoma originating in the tubal epithelium. **s., purulent,** salpingitis with secretion of pus instead of mucus or serum. **s., tuberculous,** that marked by the infiltration of the lining membrane and walls of the tube with tuberculous nodules.

salpingo- (*sal-ping'-go-*) [σάλπιγξ, tube]. A prefix denoting relation to the Fallopian or the Eustachian tube.

salpingocatheterism (*sal-ping-go-kath'-et-er-izm*). Catheterization of the Eustachian tube.

salpingocele (*sal-ping'-go-sēl*) [*salpingo-*; κήλη, a hernia]. Hernia of the oviduct.

salpingocyesis (*sal-ping-go-si-e'-sis*) [*salpingo-*; κύησις, pregnancy]. Tubal pregnancy.

salpingolysis (*sal-ping-gol'-is-is*) [*salpingo-*; λύειν, to loosen]. The breaking down of adhesions of the Fallopian tube.

salpingomallearis, salpingomalleus (*sal-ping-og-mal-e-a'-ris, sal-ping-go-mal'-e-us*). The tensor tympani muscle. See *muscles, table of.*

salpingo-oophorectomy (*sal-ping-go-o-o-for-ek'-to-me*) [*salpingo-; oophoron*; ἐκτομή, excision]. Excision of the Fallopian tube and the ovary.

salpingo-oophoritis (*sal-ping-go-o-of-or-i'-tis*) [*salpingo-; oophoron*; ῖτις, inflammation]. Inflammation of the Fallopian tube and the ovary.

salpingo-oophorocele (*sal-ping-go-o-of'-or-o-sēl*) [*salpingo-; oophorocele*]. Hernial protrusion of the ovary and oviduct.

salpingo-oothecectomy (*sal-ping-go-o-o-the-sek'-to-me*). Same as *salpingo-oophorectomy.*

salpingo-oothecitis (*sal-ping-go-o-o-the-si'-tis*). Same as *salpingo-oophoritis.*

salpingo-oothecocele (*sal-ping-go-o-o-the'-ko-sēl*). Same as *salpingo-oophorocele.*

salpingo-ovariectomy (*sal-pĭng-go-o-va-re-ek'-to-me*) Same as *salpingo-oophorectomy*

salpingo-ovariotomy (*sal-pĭng-go-o-var-e-ot'-om-e*). Same as *salpingo-oophorectomy*

salpingo-ovaritis (*sal pĭng-go o-var-ī'-tis*) See *salpingo-oophoritis*

salpingopalatal (*sal-pĭng go-pal'-at-al*) [*salpingo-, palatum*, palate] Pertaining to the Eustachian tube and the palate **s. fold,** a fold of mucosa covering the levator palati muscle

salpingoperitonitis (*sal-pĭng-go-per-ĭt-on-ī'-tis*) Inflammation of the peritoneum lining the oviduct

salpingopexy (*sal'-pĭng-go-pek-se*) [*salpingo-, πήξις*, fixation] Operative fixation of one or both Fallopian tubes

salpingopharyngeal (*sal-pĭng go far-ĭn'-je-al*) [*salpingo-, pharynx*] Pertaining to the Eustachian tube and the pharynx

salpingopharyngeus (*sal-pĭng-go-far-ĭn-je'-us*) [*salpingo-, pharynx*] A muscular bundle passing from the Eustachian tube downward to the constrictors of the pharynx

salpingorrhaphy (*sal pĭng-gor'a-fe*) [*σάλπιγξ*, tube, *ῥαφη*, suture] Suture of the Fallopian tube

salpingosalpingostomy (*sal-pĭng go-sal-pĭng-gos'-to-me*) The operation of uniting the two Fallopian tubes

salpingoscope (*sal-pĭng'-go-skop*) [*salpingo , σκοπεῖν*, to look] A modified cystoscope provided with an electric lamp of low voltage for exploration of the nasopharynx

salpingostaphylinus (*sal-pĭng go-staf-ĭl-ī'-nus*) [*salpingo , σταφυλή*, uvula] The abductor muscle of the Eustachian tube **s internus** Synonym of *levator palati* See under *muscle*

salpingostenochoria (*sal-pĭng-go-ste-no-ko'-re-ah*) [*salpingo-, στενός*, narrow, *χωρα*, space] Stenosis or stricture of the Eustachian tube

salpingostomatomy (*sal-pĭng go-sto-mat'-om-e*) Salpingostomy

salpingostomy (*sal pĭng-gos'-to-me*) [*salpingo-, στόμα* mouth] The operation of making an artificial fistula between a Fallopian tube and the body surface

salpingotomy (*sal pĭng-got' o-me*) [*salpingo , τομή*, a cutting] The operation of cutting into a Fallopian tube

salpingysterocyesis (*sal-pĭng-gis ter-o-sī-e' sis*) [*σάλπιγξ*, tube, *ὑστερα*, womb, *κύησις*, gestation] Interstitial pregnancy

salpinx (*sal'-pĭnks*) [*σάλπιγξ*, tube] A tube, especially the Eustachian or the Fallopian tube

salpyrine (*sal-pī'-rēn*) See *salipyrine*

salt [*sal*, salt] 1 Sodium chloride 2 Any compound of a base and an acid **s , acid,** a salt formed from a dibasic or polybasic acid in which only a part of the replaceable hydrogen atoms has been replaced by the base **s., alkaline.** See *s , basic* **s., aperient, of Frederick,** sodium sulphate **s. of barilla,** sodium carbonate **s., basic,** a salt containing an excess of the basic element, and formed by the union of a normal salt with a basic oxide or hydroxide **s , bay-,** sodium chloride, also the sea-salt obtained by the evaporation of sea-water by solar heat **s. of bones,** ammonium carbonate **s., Carlsbad,** a salt prepared from one of the springs at Carlsbad or made in imitation of it. Each spring contains in varying degrees carbonates of magnesium, iron, manganese, calcium, strontium, lithium, and sodium, sulphates of sodium and potassium, sodium chloride, sodium fluoride, sodium borate, and calcium phosphate **s. of colcothar,** sulphate of iron. **s., common,** sodium chloride **s., crab orchard,** a mild saline purgative produced from the evaporated water of springs at Crab Orchard, Kentucky It contains magnesium, sodium, and potassium sulphates and a little iron and lithium **s., diuretic,** potassium acetate **s., double,** one in which the hydrogen atoms of an acid are replaced by two metals **s., Epsom-,** magnesium sulphate **s fever,** fever caused by giving salt solution intravenously or otherwise **s.-frog,** a frog from whose vascular system all blood has been artificially removed and replaced by physiological salt solution Syn , *Cohnheim's frog* **s , Glauber's,** sodium sulphate **s., halogen, s , haloid,** any salt of the halogen elements, fluorine, chlorine, bromine, and iodine, **s.s of lemon,** potassium binoxalate **s., Monsel's,** subsulphate of iron, used chiefly in solution as a styptic **s , neutral** 1 A salt which has a neutral action towards litmus 2 Often used as the equivalent of *s normal, q v* **s., normal,** a salt in which all of the available hydrogen has been replaced by a metal or its equivalent **s oxy-,** a salt of an oxyacid, one containing oxygen **s.s, Preston's,** English smelling salts **s , purging, tasteless,** sodium phosphate **s.-rheum,** chronic eczema **s., Rochelle,** sodium and potassium tartrate. **s., rock-,** native sodium chloride, occurring in crystalline masses **s., sea-,** the sodium chloride obtained by the evaporation of sea-water **s., secondary.** Same as *s , neutral* **s.-sickness** See *sickness, salt-* **s , smelling-,** any pungent, irritant salt which when inhaled usually acts reflexly as a respiratory or circulatory stimulant Ammonium carbonate is generally used. **s. of soda,** sodium carbonate. **s. solution,** a solution of sodium chloride in distilled water One containing from 0 6 to 0 75 % of sodium chloride is known as a *physiological* or (incorrectly) *normal salt solution,* and is used in physiological experiments on living tissues In medicine it has been employed to restore to the system the fluids lost by severe hemorrhage or profuse diarrheal discharges The solution is introduced into the subcutaneous tissues or into a vein, sometimes also into the rectum **s. of sorrel,** potassium binoxalate derived from species of *Oxalis* and *Rumex* **s s, spirit of,** hydrochloric acid **s.-starvation.** See *hypochlorization* **s., sweet spirit of,** ethyl chloride **s., table,** sodium chloride **s. of tartar,** pure potassium carbonate. **s. of urine** ammonium carbonate **s. of vitriol,** zinc sulphate **s. of wisdom,** sal alembroth. **s of wormwood,** potash prepared from wormwood

saltans rosa. Urticaria

saltation (*sal ta'-shun*) [*saltare*, to dance] The dancing or leaping sometimes noticed in chorea

saltatory, saltatoric (*sal'-tat-o-re, sal-tat-or'-ik*) [*saltare*, to dance] Dancing or leaping **s. spasm,** a clonic spasm that causes the patient to leap or jump when he attempts to stand

salted. A term applied to animals that have recovered from South African horse-sickness

Salter's incremental lines [Sir James A. *Salter*, English dentist] Dentinal lines more or less parallel to the surface of the tooth. Caused by imperfectly calcified dentin

salting out. A method of precipitating unchanged certain proteins (albumins and albumoses) by the addition of certain neutral salts either in the form of a solid or of a saturated solution

saltpeter (*sawlt-pe'-tre*) [*salt; petra*, a rock]. Potassium nitrate. **s., Chili**, sodium nitrate. **s., wall**, calcium nitrate.

salts. A saline cathartic, especially magnesium sulphate, sodium sulphate, or Rochelle salt.

salubrin (*sal-ū'-brin*) [*salubritas*, healthfulness]. A compound said to contain 2 % of anhydrous acetic acid, 25 % of acetic ether, 50 % of alcohol, and the remainder distilled water; it is antiseptic, astringent, and hemostatic; used diluted with water as a gargle and on compresses.

salubrious (*sa-lū'-bre-us*) [*salus*, health]. Healthful.

salubrity (*sa-lū'-brit-e*) [*salubritas*, healthfulness]. The state or character of being wholesome.

salubrol (*sal-ū'-brol*). Tetrabromomethylenediantipyrine. An inodorous, antiseptic powder used in the same way as iodoform.

salufer (*sal'-ū-fer*). Sodium silicofluoride.

salumin (*sal'-ū-min*). See *aluminum salicylate*. **s., soluble**, ammoniated aluminum salicylate.

salutarium (*sal-ū-ta'-re-um*) [*salus*, health]. A sanitarium.

salutary (*sal'-ū-ta-re*) [*salus*, health]. Promotive of health

salvarols (*sal'-var-olz*). Trade preparation of arsphenamine for intra-rectal application.

salvarsan (*sal'-var-san*). Ehrlich's "606" Dioxydiamidoarsenobenzol, $C_{12}H_{13}O_2N_2As_2$. A sulphur-yellow powder furnished by Ehrlich as a remedy for syphilis. **s. milk**, milk from a goat that has been subjected to injections of salvarsan; used for syphilitic children.

salvatella (*sal-vat-el'-ah*) or **vena salvatella** [*salvatus*, from *salvare*, to save]. The vein on the back of the little finger See *vein*.

salve (*sahv*) [AS., *sealf*]. Ointment. **s., Deshler's**, compound rosin cerate. **s. pencil**, ointment in the form of pencil or stick.

salveol (*sal'-ve-ol*). Trade name of an antiseptic solution of sodium creosotate in cresol

salvia (*sal'-ve-ah*) [L.]. Official name for the dried leaves of *Salvia officinalis*. See *sage*.

salviol (*sal'-ve-ol*) [*salvia*, sage; *oleum*, oil], $C_{10}H_{16}O$. A liquid substance from oil of sage.

salyrgan (*sal-er'-gan*). Trade name of a solution of mercury salicylalbylamide acetate of sodium; used as a diuretic and antisyphilitic; also known as *mersalyl*

Salzer's operation [Fritz Adolf *Salzer*, Austrian surgeon, 1858–]. Excision of the whole of the third division of the fifth nerve.

samadera or **samandura** (*sam-ad-e'-rah* or *sa-man'-dū-rah*) [E. Ind.]. A genus of old-world trees of the simarubaceous type. **s. indica** produces a bitter, febrifugal bark.

samarium (*sam-a'-re-um*) [L.]. A metallic element belonging to the didymium group. Symbol Sa; atomic weight 150 4.

sambucin (*sam-bū'-sin*) [*Sambucus*, the elder]. An alcoholic fluidextract of the bark of *Sambucus nigra*. It is a diuretic.

sambucus (*sam-bū'-kus*) [L.]. Elder; a shrub or tree of the order *Caprifoliaceæ*. The flowers of *S. canadensis* and the berries are sudorific; the latter have been used as an alterative in rheumatism and syphilis. The inner bark has been employed in epilepsy, dropsy, and various chronic diseases. *Aqua sambuci* (B. P.) is used as a vehicle.

samol (*sam'-ol*). Trade name of an ointment containing 25 % of salimenthol.

samshu (*sam'-shoo*) [Chinese]. An alcoholic drink distilled in China from rice or millet, or both.

sanative (*san'-a-tiv*) [*sanare*, to heal]. Promoting health; healing.

sanatogen (*san'-at-o-jen*). A proprietary food said to contain 95 % of casein and 5 % of sodium glycerophosphate. Dose 2 teaspoonfuls three times daily in milk, soups, etc.

sanatol (*san'-at-ol*). The trade name of a disinfectant said to consist of sulphuric acid, esters of phenol, and its homologues.

sanatolyn (*san-at'-ol-in*). A disinfectant said to consist of phenol and sulphuric acid with a percentage of ferrous sulphate.

sanatorium (*san-at-o'-re-um*) [*sanare*, to heal]. An establishment for the treatment of the sick; especially a private hospital. See *sanitarium*.

sanatory (*san'-at-o-re*). See *sanative*.

sanatose (*san'-at-ōs*). A proprietary preparation said to consist of sodium glycerophosphate and casein.

sand [AS.]. An aggregation of fine grains of silicic oxide. **s., auditory**, otoliths **s.-bath.** 1. A vessel containing dry sand in which a substance requiring a slowly rising or uniform temperature may be heated. **s.-blind.** See *metamorphopsia*. **s.-bodies.** See *corpora arenacea*. **s., brain.** See *acervulus*. **s.-crack**, a crack or fissure in the hoof of a horse, extending from the coronet toward the sole, and due to a diseased condition of the horn-secreting membrane **s.-flea.** See *chigoe*. **s., intestinal**, gritty material passed with the stools. **s., pineal.** See *acervulus*. **s.-tumor.** See *psammoma*

sandalwood. 1. Red sanders (*Santalum rubrum*, U. S. P.; *Pterocarpi lignı*, B. P.), the wood of *Pterocarpus santalinus*, of the order *Leguminosæ*. It is used as a coloring agent. 2. The wood of *Santalum album*, of the order *Santalaceæ*, containing a volatile oil. **s. oil** (*oleum santali*, U. S. P., B. P.), used in bronchitis and gonorrhea. Dose 15–20 min. (1.0–1.3 Cc.).

sandarac (*san'-dar-ak*). A white, transparent resin produced by *Callitris quadrivalvis*, a tree of North Africa. It is now little used except as a varnish and incense **s. varnish**, in dentistry a solution of sandarac in alcohol used as a separating medium in making plaster casts.

sandaracin (*san-dar'-as-in*) Giese's name for sandarac which has been exposed to the action of alcohol. It is a mixture of two of the three resins of which sandarac is said to be composed.

sanders (*san'-durz*). Sandalwood.

Sanders' sign [James *Sanders*, English physician, 1777–1843]. Undulatory character of the cardiac impulse, most marked in the epigastric region, in adherent pericardium. **S.'s type of paranoia**, paranoia appearing in youth. Syn. *paranoia originaria*.

Sanderson's method of attenuation. The passing of virus through the system of another animal (*e. g.*, the guinea-pig, in anthrax) so that it becomes modified in virulency.

Sandstroem's bodies or **glands** (*sant'-strēm*) [Ivar *Sandstroem*, Norwegian physician]. The parathyroid glands; also called Gley's glands

sandyx (*san'-diks*). Red oxide of lead.

sane (*sān*) [*sanus*, whole]. Of sound mind.

sangaree (*sang-ga-re'*) [Sp., *sangria*]. A sweetened and flavored drink, consisting essentially of diluted wine or porter.

Sanger's macula. A bright red spot marking the orifice of the duct of Bartholin's gland in cases of gonorrheal vulvitis. Syn., *macula gonorrhœica*.

Sanger's operation. *A method of performing cesarean section:* a modification of the usual

operation in which the uterus is brought out through a long abdominal incision before extraction of the fetus

Sanger's pupil-reaction. *For the differential diagnosis of cerebral syphilis and tabes* in amaurosis and optic atrophy of cerebral syphilis the pupil-reflex to light may be preserved and even increased after a protracted stay in the dark, which is never the case in tabes dorsalis

S.-angle. See angle, sigma

sangrenal (*sang'-gre-nal*). A preparation made from adrenal glands, used as an astringent, hemostatic, and cardiac stimulant

sanguicolous (*sang-gwik'-o-lus*) [*sanguis*, blood, *colere*, to inhabit] Living in the blood as a parasite

sanguiferous (*san-gwif'-er-us*) [*sanguis*, blood *ferre*, to carry] Carrying, or conveying, blood

sanguiferrin (*sang gwif'-er in*) Trade name of a preparation said to contain hemoglobin and manganese

sanguification (*sang gwif-ik-a'-shun*) [*sanguis*, blood, *facere*, to make] 1 The formation of blood 2 Conversion into blood, as the *sanguification* of substances absorbed from the intestinal tract

sanguimotion (*sang-gwi mo' shun*) [*sanguis, motion*] The circulation of the blood

sanguimotory (*sang-gwi mo' tor-e*) Relating to the circulation of the blood

sanguinal (*sang'-gwin al*) A hematinic consisting of evaporated blood and hemoglobin in liquid form, and free from the intermediate products of the degeneration of albuminous bodies It consists of natural blood-salts 46 parts, oxyhemoglobin 10 parts, and peptonized muscle albumin 44 parts

sanguinaria (*sang gwin-a'-re-ah*) [*sanguis*] Bloodroot, a genus of plants of the order *Papaveraceæ* The rhizome of *S canadensis* (*sanguinaria*, U S P) is emetic and narcotic, in large doses it is an irritant and convulsant It is used chiefly as an expectorant in bronchitis Dose, as an expectorant 1–5 gr (0 065 0 32 Gm), as an emetic, 5–10 gr (0 32–0 65 Gm) **s., fluid-extract of** (*fluidextractum sanguinariæ*, U S P) Dose 1–10 min (0 065–0 65 Cc) **s, tincture of** (*tinctura sanguinariæ* U S P) Dose 30–60 min (2–4 Cc)

sanguinarine (*sang-gwin'-ar-ēn*), $C_{20}H_{18}NO_4$, the most important alkaloid derived from the rhizome of *Sanguinaria canadensis* Dose $\frac{1}{12}$–$\frac{1}{6}$–$\frac{1}{4}$ gr (0 005–0 011–0 05 Gm) in solution Small doses expectorant, large doses emetic **s. nitrate,** $C_{17}H_{18}NO_4HNO_3$, a red, crystalline powder soluble in water and alcohol Dosage and uses the same as the alkaloid **s. sulphate,** $(C_{17}H_{18}NO_4)_2H_2SO_4$, red crystalline powder, soluble in water and alcohol Dosage and uses the same as the alkaloid

sanguine (*sang'-gwin*) [*sanguis*] 1 Resembling blood, bloody 2 Hopeful, active, as *sanguine* temperament

sanguineous (*sang-gwin' e-us*) [*sanguis*] 1 Pertaining to the blood, containing blood. 2 Sanguine **s cyst,** a cyst containing blood-stained fluid

sanguino (*sang'-gwin-o*) A proprietary preparation said to contain all iron salts, albumins, fats, and carbohydrates formed in the animal organism

sanguinoform (*sang-gwin'-o-form*). A therapeutic preparation of blood said to be obtained from the embryonic blood-forming organs of animals

sanguinolent (*sang-gwin'-o-lent*) [*sanguis*] Tinged with blood

sanguis (*sang'-gwis*) [L] Blood

sanguisuction (*sang-gwis-uk'-shun*) [*sanguis*, blood, *suctus*, p p of *sugere*, to suck] Abstraction of blood by suction, as by a leech or other parasite

sanguisuga (*sang-gwi-sū'-gah*) See *leech*

sanies (*sa'-ne-ēz*) [L] A thin, fetid, greenish, seropurulent fluid discharged from an ulcer, wound, or fistula

sanious (*sa'-ne-us*) [*sanies*] Pertaining to or resembling sanies, **as** *sanious* pus

sanitarian (*san-it-a'-re-an*) [*sanitas*, health] One skilled in sanitary science and matters of public health

sanitarium (*san-it-a'-re-um*) [*sanitas*, health] A place where the conditions are such as especially to promote health, a resort for convalescents **s., ocean,** a ship so constructed as to be specially adapted to the requirements of invalids or convalescents and to making long cruises

sanitary (*san'-it-a-re*) [*sanitas*] Pertaining to health **s. cordon,** a line of guards to control ingress to or egress from an infected locality **s police.** See *police, sanitary* **s. science,** the science that includes a consideration of all that can be done for the prevention of disease and the promotion of the public health

sanitas (*san'-it-as*) 1 Health 2 A class of proprietary antiseptic solutions, made from turpentine

sanitation (*san it a' shun*) [*sanitary*] The act of securing a healthful condition, the application of sanitary measures

sanitol (*san'-it-ol*) Trade name of an antiseptic mouth-wash

sanity (*san'-it e*) [*sanitas*, from *sanus* sound] Soundness of mind

sanmethyl (*san-meth'-il*) A proprietary preparation said to consist of methylene-blue, copaiba, phenyl salicylate, oils of sandalwood and cinnamon, and the oleoresins of cubebs and matico It is used in gonorrhea. Dose in capsules 10 min (0 66 Cc)

sanmetra (*san-met'-rah*) [*sanus*, sound, *μητρα*, womb] A combination of zinc sulphate, 1 gr, antipyrine, 2 gr, ichthyol 5 gr, fluidextract of hydrastis, 5 gr, creosote 1–2 gr, extract of hyoscyamus, 1–2 gr, menthol and thymol, each, 1–25 gr, oil of eucalyptus, 1 gr It is indicated in vaginal uterine, and pelvic diseases, and is used in suppositories

sanmetto (*san met'-o*) A proprietary preparation recommended in genitourinary diseases and said to consist of sandalwood and saw-palmetto Dose 1 teaspoonful (5 Cc) 4 times daily

sano (*san' o*) A proprietary dietetic remedy said to consist of dextrinized barley flour with a high percentage of proteins

sanocrysin (*san-ok'-ris-in*) Trade name of a preparation of sodium and gold thiosulphate Used for treating tuberculosis

sanoderma (*san-o der'-mah*) A sterilized muslin bandage saturated with bismuth subnitrate

sanoform (*san'-o form*), $C_6H_2I_2OHCOOCH_3$ The methyl ether of diiodosalicylic acid It is a white tasteless, odorless, permanent powder, containing 62 7% iodine, melts at 110° C, soluble in alcohol, ether, or vaseline It is used as a surgical dressing in powder or 10% ointment

sanogyl (*san'-o-jil*) Proprietary name of a tooth paste containing fluorine and neosalvarsan.

sanose (*san'-ōs*) A proprietary dietetic said to contain 80% of casein and 20% of albumose; a

white, odorless, tasteless powder forming an emulsion when stirred with water or milk. Dose 5 dr.–1½ oz (20–50 Gm.) in a pint of milk.

sanosin (*san'-o-sin*). A mixture of sulphur, charcoal, and eucalyptus leaves. The fumes of this when ignited are used by inhalation in the treatment of pulmonary tuberculosis.

Sansom's sign (*san'-sum*) [Arthur Ernest *Sansom*, English physician, 1839–1907]. 1. Considerable extension of dulness in the second and third intercostal spaces in pericardial effusion. 2. A rhythmic murmur transmitted through the air in the mouth when the lips of the patient are applied to the chestpiece of the stethoscope; it is heard in cases of aortic aneurysm. 3. Reduplication of the second sound of the heart, heard at the base, in mitral stenosis.

Sanson's images [Louis Joseph *Sanson*, French physician, 1790–1841]. See *Purkinje's images*.

santal (*san'-tal*). Santalum, white sandalwood. See *sandalwood* (2).

santalal (*san'-tal-al*), $C_{15}H_{24}O$. A constituent of santal oil found by Chapoteau.

santalin (*san'-tal-in*) [*santalum*, sandalwood]. The coloring-matter of red sandalwood, obtained by evaporating the alcoholic infusion to dryness. It is a red resin, fusible at 212° F., and is very soluble in acetic acid as well as in alcohol, essential oils, and alkaline lyes.

santalol (*san'-tal-ol*), $C_{15}H_{26}O$. A constituent of oil of santal found by Chapoteau.

Santa Lucia bark. The bark of *Exostemma floribundum*, a rubiaceous tree of the Antilles.

santalum (*san'-tal-um*) [L.]. *Pterocarpi lignum* (B. P.). White sandalwood. The wood of a species of *S. album* and *S. citrinum*, or yellow sandalwood. It yields oil of santal, an astringent oil, useful in chronic bronchitis and gonorrhea. It is often adulterated with oil of cedar. Dose of the volatile oil dr. xxxx, in emulsion or capsule. **s. rubrum**, red sanders, the wood of *Pterocarpus santolinus*, imparts a brilliant-red color to ether and alcohol.

santheose (*san'-the-ōz*). Same as theobromine, *q. v.*

Santini's booming (*sahn-te'-ne*). A booming sound heard on auscultatory percussion over a hydatid cyst.

santol (*san'-tol*). 1. A crystalline substance $C_8H_8O_3$, found by H. Weidel (1870) in white sandalwood. 2. A proprietary preparation of sandalwood, used for gonorrhea, etc.

santonica (*san-ton'-ik-ah*) [σαντονικόν, wormwood]. Levant wormseed, the unexpanded flower-heads of *Artemisia paucifiora* (U. S. P.) or *A. maritima*, var., *Stechmanniana* (B. P.), of the order *Compositæ*, the essential constituent of which is *santonin*, $C_{15}H_{18}O_3$ (*santoninum*, U. S. P., B. P.). Santonin is a neutral crystalline principle, producing, in overdoses, xanthopsia, giddiness, stupor, at times convulsions, and death from failure of respiration. The urine is colored yellow. Santonica and santonin are used as vermicides against the lumbricoid worm. Dose of *santonica* 10–30 gr. (0.65–2.0 Gm.); of *santonin* 1–2 gr. (0.065–0.13 Gm.). Sodium santoninate was formerly used as a substitute for santonin, but has produced poisoning.

santonin (*san'-to-nin*). See under *santonica*. **s., troches of** (*trochisci santonini*, U. S. P., B. P.), those of the U. S. P. contain each about ½ gr. (0.033 Gm.) of santonin; those of the B. P. contain 1 gr. (0.065 Gm.) of the drug.

santoninoxime (*san-ton-in-oks'-im*), $C_{15}H_{18}O_3(N{\cdot}OH)$. A derivative of santonin by action of an alcoholic solution of hydroxylamine hydrochloride with sodium; a white, crystalline powder, less toxic than santonin, and used as a vermicide. Dose for adults 5 gr. (0.32 Gm.) divided into two doses and taken at intervals of one to two hours, followed by a cathartic. Repeat for 2 or 3 days.

santonism (*san'-ton-izm*). Poisoning from overdosage of santonin.

Santorini's canal (*san-to-re'-ne*) [Giovanni Domenico *Santorini*, Italian anatomist, 1681–1737]. See *Bernard's canal*. **S.'s cartilages**, cornicula laryngis; the cartilaginous nodules on the tips of the arytenoid cartilages. **S.'s circular muscle**, involuntary muscular fibers encircling the urethra beneath the constrictor urethræ. **S.'s concha**, a small, supernumerary, spongy bone sometimes found above the superior turbinated bone of the ethmoid. **S.'s duct**, same as *S.'s canal*. **S.'s fissures**, two fissures separating the cartilaginous portions of the external auditory canal into three incomplete rings. Syn., *incisuræ Santorini*. **S.'s muscle.** 1. The risorius *q. v.*, under *muscles, table of*. 2. Same as Santorini's circular muscle. **S.'s papilla**, the papilla of the duodenum. **S.'s plexus.** 1. The vesicoprostatic plexus of veins in the male; the venous plexus surrounding the front and sides of the urethra in the female. 2. An anastomotic network formed at the foramen ovale by the filaments of the two roots of the inferior maxillary nerve. **S.'s tubercle**, the cornicula laryngis. **S.'s veins**, the emissary veins forming a communication between the cerebral sinuses and the veins of the scalp; especially, the small veins passing through the parietal foramen and connecting the parietal with the superior longitudinal sinus.

santozea (*san-to-ze'-ah*). Trade name of a preparation said to contain santal, saw-palmetto, etc.; used for cystitis and other genitourinary disorders.

santyl (*san'-til*). Santalyl salicylate, a proprietary gonorrhea remedy.

sap. The nutritive fluid which circulates by endosmosis in plants.

saphena (*sa-fe'-nah*) [σαφηνής, manifest· pl., *saphenæ*]. A name given two large veins of the leg—the internal or long, and the external, or short saphena.

saphenectomy (*saf-e-nek'-to-me*) [*saphena*; ἐκτομη, excision]. Excision of part of the saphenous vein for cure of varicose veins.

saphenous (*sa-fe'-nus*) [σαφηνής, manifest]. Apparent; superficial, manifest, applied to two veins of the lower limb, the internal or long saphenous vein and external or short saphenous vein, situated just beneath the surface; also applied to the nerves accompanying these veins. **s. nerves.** See *nerves*. **s. opening**, an opening in the fascia lata at the upper part of the thigh through which the long saphenous vein and nerve pass. **s. veins.** See above and also *veins*.

sapid (*sap'-id*) [*sapere*, to taste]. Capable of being tasted.

sapidity (*sap-id'-it-e*) [*sapid*]. The property or quality of a substance which gives it taste.

sapientia (*sa-pe-en'-she-ah*) [L.]. Wisdom. **sapientiæ dentes**, the posterior or third molar teeth.

sapo (*sa'-po*) [L.]. Soap. See *soap*. **s. animalis**, tallow soap. **s. domesticus**, tallow soap. **s. durus**, hard soap. **s. mollis**, soft soap, green soap. **s. viridis**, green soap, soft soap.

sapocarbol (*sa-po-kar'-bol*) A disinfectant solution of cresol and soft soap

sapodermin (*sap-o-der'-min*) An antiseptic soap containing albuminate of mercury, used in the treatment of parasitic and fungoid diseases

sapogenin (*sap oj'-en-in*), $C_{34}H_{54}O_9$ (Hesse) A derivative of saponin by action of dilute acids with heat It occurs in needles grouped in stars soluble in alcohol or ether Syn , *saporetin*

sapolan (*sap' ol an*) A compound said to consist of a naphtha product, 2 5 parts, soap, 3 to 4 %, lanolin 1 5 parts, it is used in skin diseases

sapolanolin (*sa-po lan'-o-lin*) A preparation of soft soap and lanolin, used in eczematous conditions

saponaceous (*sap-o-na' se-us*) [*sapo*, soap] Having the nature of soap

saponal (*sap'-o-nal*) A cleansing compound said to consist of soap, 20 %, sodium carbonate, 60 %, sodium chloride 2 2 %, and water 11 %

Saponaria (*sap-o-na'-re ah*) [*sapo*, soap] A genus of plants of the order *Caryophylleæ S officinalis*, or soapwort, bouncing bet, is a species growing wild abundantly in the United States and Europe in the vicinity of houses The root, rhizome, and stolons are used in gout, syphilis, and as an expectorant It contains saponin, sapotoxin sapogenin etc

saponarius (*sap o na'-re-us*) Of a soapy character

saponatus (*sap o na'-tus*) [L] Mixed with soap

saponetin (*sap-on et'-in*) A microcrystalline body, $C_{40}H_{66}O_{15}$ obtained by heating saponin with dilute acids

saponification (*sa-pon-if ik a' shun*) [*sapo*, *facere*, to make] The act of converting into soap, the process of treating a neutral fat with an alkali, which combines with the fatty acid, forming a soap **s equivalent**, a term used to indicate the number of grams of an oil saponified by one equivalent in grams of an alkali **s , fermentation**, saponification brought about by the action of a ferment

saponiform (*sap on' e form*) Soap like in appearance and consistence

saponify (*sa pon' e fi*) [see *saponification*] To convert into soap, to convert a neutral fat by the action of an alkali into free glycerol and a salt of the alkali the latter forming a soap

saponiment (*sap on' im-ent*) [*sapo*, soap] A term denoting a medicinal compound of soap

saponin (*sap'-o-nin*) [*sapo*], $C_{32}H_{54}O_{18}$ A glucoside contained in the roots of soapwort and other plants and in aqueous solution forming a strong lather **s , coal-tar.** See *liquor carbonis detergens*

saponule, saponulus (*sap'-on ūl, sap on'-ū-lus*) Imperfect soaps formed by combination of essential oils with bases

saporetin (*sap-or-e'-tin*) See *sapogenin*

saporific (*sap-o rif' ik*) [*sapor*, savor, *facere*, to make] Producing taste, flavor, or relish

saporosity (*sap or os'-it-e*) [*sapid*] Sapidity

sapotin (*sap'-o-tin*) A glucoside, $C_{29}H_{42}O_{20}$, extracted from the seed of the sapodilla-plum, the fruit of *Achras sapota*, occurring in minute crystals which melt at 240° C It is readily soluble in water, less so in alcohol, and insoluble in ether, benzine, or chloroform

sapotiretin (*sap-o-tir-et'-in*), $C_{17}H_{32}O_{10}$ A product obtained from sapotin by boiling it with dilute sulphuric acid, insoluble in water, readily soluble in alcohol

sapotoxin (*sap-o-toks'-in*) [*sapo*, *τοξικόν*, poison], $C_{17}H_{30}O_{10}$ A poisonous glucoside obtained from saponin

sappan-wood (*sap-an' wood*) The wood of *Cæsalpinia sappan*, used as a dye as a substitute for hematoxylon

sappanin (*sap'-an-in*) A substance obtained by the fusion of an extract of the wood of *Cæsalpinia sappan* with caustic soda

Sappey's accessory portal veins (*sap'-e*) [Marie Philibert Constant *Sappey*, French anatomist, 1810–1896] A system of venules uniting to form small trunks, which redivide in the liver and empty into the sublobular veins It consists of the minute nutrient veins of the portal veins, hepatic artery, and bile-ducts, of venules lying in the gastrohepatic omentum, the suspensory ligament of the liver, and about the fundus of the gall-bladder, and of the group of small veins in the umbilical region. Through the branches lying in the suspensory ligament of the liver and through the parumbilical group the portal vein communicates with the venæ cavæ **S.'s fibers**, smooth muscular fibers found in the check ligaments of the eyeball close to their orbital attachment

sapphism (*saf'-izm*) [from *Σαπφω*, Sappho, a Greek poetess] Tribadism Unnatural passion of one woman for another

sapremia, sapræmia (*sap rem'-e-ah*) [*σαπρός*, putrid, *αἷμα*, blood] The intoxication produced by absorption of the results of putrefaction

sapremic (*sap re'-mik*) [*sapremia*] Affected with, of the nature of, or pertaining to, sapremia

saprine (*sap'-rin*) [*σαπρός*, putrid] A ptomaine nonpoisonous ptomaine formed in the putrefaction of animal tissues

sapro- (*sap-ro-*) [*σαπρός*, putrid] A prefix signifying decay, putridity, etc

saprodontia (*sap-ro-don'-she-ah*) [*sapro-*, *ὀδούς*, tooth] Caries or rottenness of the teeth

saprogen (*sap'-ro-jen*) [*sapro-*, *γεννᾶ*, to beget] A putrefactive microorganism

saprogenic, saprogenous (*sap ro jen'-ik, sap roj'-en us*) [*sapro-*, *γεννᾶν*, to beget] 1 Causing putrefaction 2 Produced by putrefaction.

saprol (*sap'-rol*) [*σαπρός*, putrid] A mixture of crude cresols with hydrocarbons, used as a disinfectant

Saprolegnia (*sap-ro-leg' ne-ah*) [*sapro-*, *λεγνον*, an edge] Fly fungus A genus of fungi of the order *Saprolegniaceæ* Four species are known: *S monoica*, *S dioeca*, *S asterophora*, and *S. ferox* They are all saprophytes on dead plants and animals, especially flies, in water, with the exception of the last named species, which is both saprophyte and facultative parasite It is the cause of fish or salmon disease

saprophagous (*sap-rof'-a-gus*) [*sapro-*, *φαγεῖν*, to eat] Subsisting on decaying matter

saprophilous (*sap-roff' il us*) [*sapro-*, *φιλεῖν*, to love] Infesting decaying matter Saprophytic

saprophyte (*sap'-ro-fīt*) [*sapro-*, *φυτόν*, a plant], A vegetable organism living on dead organic matter

saprophytic (*sap-ro-fit'-ik*) [*saprophyte*] Growing in dead organic matter, as *saprophytic* bacteria.

sapropyra (*sap ro-pi'-rah*) [*sapro-*, *πῦρ*, fire], 1 Malignant typhus, or putrid fever 2 Any fever due to putrid infection

saprostomous (*sap-ros'-to-mus*) [*sapro-*, *στόμα*, mouth] Having offensive breath

saprotyphus (*sap-ro-ti'-fus*) [*sapro-; typhus*]. Malignant or putrid typhus fever.

saprozoic (*sap-ro-zo'-ik*) [*sapro-; ζῳον*, an animal]. Living in decaying organic matter.

sapucainha oil (*sah-pū-ca-in'-hah*). An oil derived from *Carpotroches brazziliense*, and containing carpotrochic and carpotrochinic acids. It has been used in leprosy, as a substitute for chaulmoogra oil.

sar, sara [E. Ind., "rotten"] Vernacular for trypanosomiasis (surra) (*q. v.*).

sarapus (*sar'-ap-us*) [σαίρειν, to sweep; πούς, foot]. A flat-footed person.

Sarbo's sign. Analgesia of the peroneal nerve, occasionally observed in tabes dorsalis

sarc (*sark*) [σάρξ, flesh]. The belly, body, or fleshy portions of a muscle.

sarcepiplocele (*sar-sep-ip'-lo-sēl*) [σάρξ, flesh; ἐπίπλοον, omentum, κήλη, tumor]. An omental hernia with sarcocele, or with great thickening of the omentum.

sarcidium (*sar-sid'-e-um*) [σάρξ, flesh]. A fleshy excrescence.

Sarcina (*sar'-sin-ah*) [L., "a bundle;" pl., *sarcinæ*] A genus or schizomycetes consisting of cocci dividing in three directions, thus producing cubic masses. See *micrococci, table of.*

sarcine (*sar'-sēn*). 1. See *hypoxanthine.* 2 Sarcina, *q. v.*

sarcinic (*sar-si'-nik*) [*sarcina*]. Pertaining to or caused by sarcinæ.

sarcinuria (*sar-sin-ū'-re-ah*) [*sarcin; οὖρον*, urine]. The discharge of sarcin with the urine.

sarcitis (*sar-si'-tis*) [σάρξ, flesh; ιτις, inflammation] Inflammation of fleshy tissue; especially inflammation of muscle.

sarco- (*sar-ko-*) [σάρξ, flesh]. A prefix denoting composed of or pertaining to flesh.

sarcoadenoma (*sar-ko-ad-en-o'-mah*) [*sarco-; ἀδήν*, gland; ὀμα, tumor]. A fleshy glandular tumor. See *adenosarcoma.*

sarcoblast (*sar'-ko-blast*) [*sarco-; βλαστός*, a germ]. 1. In biology, a protoplasmic germinal mass. 2. Marchesini's term for *sarcoplast.*

sarcocarcinoma (*sar-ko-kar-sin-o'-mah*). A tumor composed of malignant growth of both carcinomatous and sarcomatous types.

sarcocele (*sar'-ko-sēl*) [*sarco-; κήλη*, a tumor]. Any fleshy swelling of the testicle. **s. malleosa,** that due to *Bacillus mallei* **s., syphilitic,** syphilitic orchitis

Sarcocephalus (*sar-ko-sef'-al-us*) [*sarco-; κεφαλή*, head] A genus of the *Rubiaceæ. S. esculentus,* a shrub of western Africa, the Guinea or Sierra Leone peach, yields an astringent antipyretic bark, doundaki or doundaké (*q. v.*); it is the quinquina africane or kina du Rio Nuñez of the French. It contains the alkaloid doundakine.

sarcocol, sarcocolla (*sar'-ko-kol, sar-ko-kol'-ah*) [σάρξ, flesh; κόλλα, glue]. 1. A gum-like drug supposed to be the product of some species of *Astragalus.* 2. An African resin with purgative qualities, the product of various plants of the genera *Penæa* and *Sarcocolla.* It is acrid and nauseous

Sarcocystis (*sar-ko-sis'-tis*) [*sarco-; κύστις*, a cyst]. A group of the sporozoa **S. miescheri,** a parasite found in pork and beef.

sarcocyte (*sar'-ko-sīt*). See *ectoplasm.*

sarcode (*sar'-kōd*) [σάρξ, flesh]. Animal protoplasm.

Sarcodina (*sar-ko-di'-nah*) [*sarco-; δίνη*, a whirling]. A class of protozoa moving and feeding by means of pseudopodia, *e. g.* ameba.

sarcoenchondroma (*sar-ko-en-kon-dro'-mah*). A combined sarcoma and enchondroma

sarcoepiplomphalus (*sar-ko-ep-e-plom'-fal-us*) [*sarco-; ἐπίπλοον*, caul, ὀμφαλός, navel]. An umbilical hernia forming a fleshy mass, from great thickening of the omentum.

sarcogenic (*sar-ko-jen'-ik*) [*sarco-; γεννᾶν*, to beget]. Producing flesh or muscle.

sarcoglia (*sar-kog'-le-ah*) [*sarco-; γλία*, glue]. Sarcoplasm; a protoplasmic substance containing the granules and nuclei composing the eminence of Doyen, or the point of entrance of a motor nerve into musuclar fiber.

sarcohydrocele (*sar-ko-hi'-dro-sēl*) [*sarco-; ὕδωρ*, water; κήλη, tumor]. A sarcocele complicated with hydrocele of the tunica vaginalis

sarcoid (*sar'-koid*) [*sarco-; εἶδος*, shape]. 1. Resembling or having the nature of flesh. 2. An oil tumor, or encapsulated mass of oil (such as paraffin oil, coal tar, liquid petrolatum).

sarcolactic acid (*sar-ko-lak'-tik*). See *acid, sarcolactic.*

sarcolemma (*sar-ko-lem'-ah*) [*sarco-; λέμμα*, husk]. The delicate sheath enveloping a muscle-fiber.

sarcolemmic, sarcolemmous (*sar-ko-lem'-ik, sar-ko-lem'-us*) [*sarco-; λέμμα*, covering] Pertaining to or of the nature of sarcolemma.

sarcology (*sar-kol'-o-je*) [*sarco-; λόγος*, science]. 1. The anatomy treating of the soft tissues, as distinguished from osteology. 2. Myology.

sarcolyte (*sar'-ko-lit*) [σάρξ, flesh; λυεῖν, to dissolve]. A cell which actively affects the retrograde metamorphosis of soft tissues

sarcoma (*sar-ko'-mah*) [*sarco-; ὅμα*, tumor]. A tumor made up of embryonal connective tissue. It is characterized by a great preponderance of cells and very little homogeneous or fibrillar intercellular substance. **s. of Abernethy.** See *s., adipose.* **s., adipose,** one containing fatty elements. **s., alveolar,** one in which groups of sarcoma-cells are contained in alveolar spaces **s., angiolithic.** Synonym of *psammoma.* **s., angioplastic,** a tumor of the testicle first described by Malazzez and Monod as composed of a protoplasmic network with irregular spaces and trabeculæ, the latter made up of anastomosing giant-cells. The name *epithelioma syncytiomatodes testiculi* is proposed for it. **s. botryoides,** a grape-like variety of sarcoma found in the cervix uteri. **s. carcinomatodes,** a scirrhous cancer **s. deciduocellulare.** See *deciduoma malignum.* **s., encephaloid,** a soft, rapidly growing sarcoma, usually of the round-celled variety. **s. epulis.** See *epulis, malignant.* **s., giant-celled,** one containing giant-cells as a prominent feature. **s., glandular,** Hodgkin's disease. **s., granulation.** See *s., round-celled.* **s. lipomatodes, s., lipomatous,** one characterized by infiltration of fat. **s. lymphadenoides.** See *lymphosarcoma.* **s., mastoid,** a sarcoma of the mammary gland. **s., melanotic,** a sarcoma, usually spindle-celled, in which the cells contain melanin. **s. molle.** See *lymphosarcoma.* **s. molluscum,** multiple connective-tissue tumors of the skin containing few spindle-cells. **s., mucous.** See *myxosarcoma.* **s., Mueller's,** "sarcoma phyllodes;" adenofibroma of the breast. **s., myeloid.** See *s., giant-celled.* **s. myxomatodes,** a myxosarcoma (*q. v.*). **s. phyllodes.** See *s., Mueller's.* **s., round-celled,** one made up of round-cells. There are two varieties, the small round-celled and the large round-celled. **s. scroti,** a sarcocele. **s.,**

spindle-celled, one made up of spindle cells Syn , *recurrent fibroid*

sarcomatoid (*sar-ko'-mat-oid*) [*sarcoma*, *εἶδος*, resemblance] Resembling a sarcoma

sarcomatosis (*sar ko mat o'-sis*) [*sarcoma*] The formation of multiple sarcomatous growths in various parts of the body **s. generalis.** Synonym of *granuloma fungoides*

sarcomatous (*sar ko'-mat-us*) [*sarcoma*] Of the nature of or resembling sarcoma

sarcomere (*sar' ko-mēr*) [*sarco-*, *μερός*, a part] One of the segments into which a muscle-fibril appears to be divided by transverse septa

sarcomoscheocele (*sar-ko-mos'-ke-o-sēl*) [*sarco-*, *ὀσχέον*, scrotum, *κηλη*, tumor] A fleshy scrotal tumor.

sarcomphalocele, sarcomphalon (*sar kom fal'-o-sēl*, *sar-kom' fal-on*) [*sarco* , *ὀμφαλός* navel, *κηλη*, tumor] A fleshy tumor at the umbilicus

sarcomyces (*sar-ko-mi'-sēz*) [*sarco-*, *μύκης*, fungus] A fleshy growth of a fungous appearance

sarcophyma (*sar-ko-fi'-mah*) [*sarco* , *φυμα*, a tumor] A fleshy tumor, sarcoma

sarcoplasm (*sar' ko plazm*) [*sarco-*, *πλάσσειν*, to mold] The hyaline or finely granular interfibrillar material of muscle tissue, the term is opposed to the *myeloplasm* or contractile substance

sarcoplasmic (*sar-ko-plaz' mik*) Containing or relating to sarcoplasm

sarcoplast (*sar'-ko plast*) [*sarco* , *πλάσσειν*, to mold] A cell lying between muscular fibrils and capable of developing into a muscular fiber

sarcoplastic (*sar ko-plas'-tik*) [*sarcoplast*] Forming flesh

sarcopoietic (*sar ko poi et'-ik*) [*σάρξ* flesh, *ποιεῖν*, to make] Producing flesh or muscle

Sarcopsylla (*sar-kop-sil'-ah*) [*σάρξ*, flesh, *ψύλλα*, flea] A genus of siphonapterous or aphanipterous insects **S. penetrans,** the chigoe

Sarcoptes (*sar kop' tēz*) [*sarco-*, *κόπτειν* to cut] A genus of mites **S. hominis,** the itch-mite. **S. scabiei** See *acarus scabiei*

sarcosepsis (*sar-ko-sep'-sis*) [*sarco* , *sepsis*] The presence of bacteria directly in the tissues

sarcosin (*sar' ko sin*) [*sarcin*], $C_3H_7NO_2$ Methylglycocoll, a crystalline substance produced when creatin and caffeine are heated with baryta

sarcosis (*sar-ko'-sis*) [*σάρξ*, flesh] 1 Diffuse sarcomatosis 2 Undue increase of flesh

Sarcosporidia (*sar ko-spor-id' e-ah*) [*sarco-*, *Sporsdia*] A variety of psorosperms found in the muscles of cattle, sheep, swine, and other mammals

sarcosporidiosis (*sar-ko-spo-rid-e-o'-sis*) [*Sarcosporidia*, a genus of psorosperms] A disease produced by sporozoa of the order *Sarcosporideæ*

sarcostosis (*sar-kos-to'-sis*) 1 Bone formation in muscular tissues 2 See *osteosarcoma*

sarcostroma (*sar-ko-stro'-mah*) [*sarco-*, *στρῶμα*, a covering] A thick, fleshy, false membrane

sarcostyle (*sar'-ko-stil*) [*sarco* , *στῦλος*, a pillar] One of the fine longitudinal fibrils of which a striated muscle-fiber is composed and into which it can be split up

sarcotherapeutics (*sar-ko-ther-ap-ū'-tiks*) [*sarco-*; *θεραπεία*, treatment] The treatment of disease by means of animal extracts or substances. See *organotherapy*

sarcothlasis (*sar-ko-thla'-sis*) [*sarco-*, *θλάσις*, a bruising] A bruise on flesh

sarcotic (*sar kot'-ik*) [*σάρξ* flesh] Pertaining to, or causing fleshy formation or sarcosis

sarcotome (*sar'-ko-tōm*) [*sarco-*, *τομή*, a cutting] A surgical instrument for the division of soft tissues

sarcotripsy (*sar'-ko-trip-se*) See *écrasement*

sarcous (*sar'-kus*) [*σάρξ*, flesh] Pertaining to flesh or muscle **s. element,** one of the dark prisms of the ultimate fibrils of striped muscle-fibers **s. substance,** the substance of a sarcous element

sardonic grin (*sar-don'-ik*) See *risus sardonicus.*

sarkine (*sar'-kin*) Same as *sarcine* (1)

Sarracenia (*sar'-as-e'-ne-ah*) [Dr *Sarrazin*, of Quebec] A genus of American insectivorous plants, *e g* , side saddle flower, or pitcher-plant, remarkable for their trumpet shaped leaves **S. purpurea, S. flava,** and **S. variolaris,** are said to afford roots serviceable in dyspepsia and gout **S. purpurea** and **S. violaris** have been vaunted as a cure for smallpox· They are diuretic, diaphoretic, and stimulant Dose of the fidext gtt xxv

sarsa (*sar'-sah*) Same as *sarsaparilla*

sarsaparilla (*sar sap-ar il'-ah*) [Sp , *zarza*, a bramble] The *Smilax officinalis* and other species of *Smilax*, of the order *Liliaceæ* The dried root (*sarsaparilla*, U S P , *sarsæ radix*, B P) contains a crystalline glucoside, *parillin*, $C_{40}H_{70}O_{18}$ Sarsaparilla has been employed as an alterative in syphilis, rheumatism, and scrofulous affections **s , decoction of** (*decoctum sarsæ*, B P) Dose 4–6 oz 128–192 Cc). **s , decoction of, compound** (*decoctum sarsæ compositum*, B P) Dose 4–6 oz (128–192 Cc) **s , fluidextract of** (*fluidextractum sarsaparillæ*, U S P) Dose 30–60 min (2–4 Cc). **s , fluidextract, compound** (*fluidextractum sarsaparillæ compositum*, U S P) Dose 30–60 min (2–4 Cc) **s , liquid extract of** (*extractum sarsæ liquidum*, B P) Dose 2–4 dr (8–16 Cc) **s., syrup of, compound** (*syrupus sarsaparillæ compositus*, U S P) Dose 1–4 dr. (4–16 Cc)

sarsasaponin (*sar-sah-sap'-on-in*), $12(C_{32}H_{56}O_{10}) + 2H_2O$ A glucoside found by Kobert (1892) in sarsaparilla It is the most poisonous of its constituents

sartian disease (*sar'-shun*) An endemic affection of the tropics, characterized by red indurated spots that finally ulcerate, probably *furunculus orientalis q v*

sarton (*sar'-ton*) Trade name of a preparation of soya bean, used as a food in diabetes

sartorius (*sar to'-re-us*) [*sartor*, tailor] The tailor s muscle, so called from being concerned in crossing the one leg over the other See under *muscle*

sassafras (*sas a fras*) [Sp , from *saxifraga*, from *saxum*, rock, *frangere*, to break] The *S variifolium*, a tree of the order *Laurineæ* The root-bark (*sassafras*, U S P , *sassafras radix*, B P) is employed as an aromatic stimulant. The pith (*sassafras medulla*, U S P) yields a mucilage (*mucilago sassafras medullæ*, U S P) that is used as an application to inflamed eyes, and as a demulcent drink in inflammation of the mucous membranes and kidneys **s. nuts,** pichurim beans, the seeds of *Nectandra pichury-major* and *N pichury-minor*

sassafrid (*sas'-ah frid*) A peculiar principle of *Sassafras officinale*, irolated by Reinach

sassafrol (*sas'-af-rol*) See *safrol*

sassolin [It] Boric acid extracted from the deposits in lagoons of Tuscany

sassy bark (*sas'-e*) The bark of *Erythrophlæum.*

sat. Abbreviation of saturated. **sat. sol.,** abbreviation of saturated solution.

satamuli (*sat-ah-moo'-le*). The native name in India for *Asparagus racemosus* It is used as a diuretic and as a sedative in nervous pain.

satellite (*sat'-el-it*) [*satelles*, an attendant]. In anatomy, the vein accompanying an artery.

satellitism (*sat'-el-ĭt-izm*). Mutualism; symbiosis.

satellitosis (*sat-el-i-to'-sis*). A condition in which there is an accumulation of free nuclei around the ganglion cells of the cortex of the brain; it is found in general paralysis and other affections.

sathe, sathon (*sa'-the, sa'-thon*) [σάθη]. The penis.

satiety (*sa-ti'-e-te*) [*satis*, enough]. Fulness beyond desire

satisfied hydracarbon. One that has no free valences; and see *saturated.*

Satterthwaite's method of artificial respiration (*sat'-er-thwāt*). Pressure upon the abdomen alternating with relaxation to allow descent of the diaphragm.

Sattler's vascular layer. The layer of blood-vessels of the choroid lying internally to Haller's tunica vasculosa.

saturated (*sat'-ū-ra-ted*) [*saturare*, to fill]. 1. Of a liquid, containing in solution all of a substance that it can dissolve. 2. Of a chemical compound, having all the affinities of its component atoms satisfied, with the maximum number of hydrogen atoms or their equivalents; a term especially applied to the hydrocarbons. And see *satisfied hydrocarbon.*

saturation (*sat-ū-ra'-shun*) [*saturate*, to fill]. 1. A state in which a liquid holds in solution all of a substance that it can dissolve; the state of being or becoming saturated. 2. Of a chemical compound, a state in which the affinities of all its atoms are *saturated.* **s. of the atmosphere,** that condition in which any reduction of temperature will be followed by a precipitation of the aqueous vapor mingled with the atmosphere. **s-. points,** the temperature at which the atmosphere contains as much moisture as it can possibly hold, in the form of vapor.

Saturday night paralysis. Paralysis of the musculospiral nerve.

satureia (*sa-tur-e'-ya*). A plant of the order *Labiatæ. S. hortensis* resembles thyme and is used as a culinary herb.

saturnine (*sat'-ur-nīn*) [*Saturnus*, a Roman deity; the alchemists' name for lead] 1. Pertaining to or produced by lead. 2. Of gloomy nature. **s. breath,** the peculiar sweet breath characteristic of lead-poisoning. **s. encephalopathy.** See *lead encephalopathy.*

saturnism (*sat'-ur-nizm*). Lead-poisoning; plumbism.

satyria (*sat-i'-re-ah*). A genitourinary tonic said to consist of saw palmetto (*Serenoa serrulata*), false bittersweet (*Celastrus scandens*), muriapuama (*Liriosoma ovata*), couch-grass (*Agropyron repens*), and phosphorus, administered in an aromatic vehicle. Dose 1 teaspoonful (5 Cc.) 4 times daily after meals.

satyriasis (*sat-ir-i'-as-is*) [σάτυρος, a satyr]. Excessive venereal desire in the man. Erotic insanity. See *priapism.* 2. Leprosy.

satyromania (*sat-ir-o-ma'-ne-ah*). Same as *satyriasis* (1).

Sauerbruch's chamber (*zow'-er-brook*) [Ferdinand *Sauerbruch*, German surgeon, 1875–]. An air-tight cabinet allowing operation on the thorax under negative pressure; the patient lies within the cabinet with his head outside.

sauerin (*zow'-er-in*). Trade name of a preparation of active culture of Massol's bacillus of Bulgarian lactic acid; used in gonorrhea and other conditions.

saunders (*sawn'-derz*). See *sandalwood.*

sauriasis (*saw-ri'-as-is*). Ichthyosis.

sauriderma (*saw-re-der'-mah*) [σαῦρα, lizard; δέρμα, skin]. Ichthyosis

sauriosis (*saw-re-o'-sis*) [σαῦρα, lizard]. Ichthyosis.

saurodermia (*saw-ro-der'-me-ah*). Ichthyosis.

saurolo (*saw-ro'-lo*). Trade name of a form of ichthyol.

sausage-poisoning. A state of gastroenteritis produced by the ingestion of decomposed sausage. Syn., *allantiasis; botulism.*

sausarism (*saw'-sar-izm*) [σαυσαρισμός]. 1. Paralysis of the tongue. 2. Dryness of the tongue.

sauterne (*so'-tern*) [*Sauterne*, a place in France]. A certain white wine

Sauvineau's ophthalmoplegia (*so-vin-o*). [Charles *Sauvineau*, French ophthalmologist, 1862–]. Paralysis of the internal rectus muscle of one side and spasm of the external rectus of the opposite side This affection is the reverse of Parinaud's ophthalmoplegia.

Savill's disease [Thomas Dixon *Savill*, English physician, 1856–1910]. An epidemic skin disease characterized by the appearance of a papular rash, followed by a branny desquamation and by marked constitutional symptoms. A fatal result may follow. Syn., *dermatitis exfoliativa epidemica; epidemic eczema.*

savin, savine (*sav'-in*). A shrub, *Juniperus sabina*, of the order *Coniferæ.* The tops (*sabina*, U. S. P.; *sabinæ cacumina*, B. P.) contain a volatile oil (*oleum sabinæ*, U. S. P.) and possess marked irritant properties. Savin is employed in amenorrhea, chronic rheumatism, gout, and as a local application to warts, ulcers, and parasitic affections of the skin. **s., fluid-extract of** (*fluidextractum sabinæ*, U. S. P.). Dose 3–8 min. (0.2–0.5 Cc.). **s., oil of** (*oleum sabinæ*, U. S. P.). Dose 2–5 min. (0.13–0.32 Cc.) **s., ointment of** (*unguentum sabinæ*, B. P.). **s., tincture of** (*tinctura sabinæ*, B. P.). Dose 20 min.–1 dr. (1.3–4.0 Cc).

Saviotti's canals (*sah-ve-ot'-e*). Fine artificial passages formed between the secreting cells of the pancreas by the forcible injection of a colored fluid into the ducts of that organ

savonal (*sav'-on-al*). Trade name of a soap mixture, used as a base for ointments.

savory (*sa'-vo-re*) [*savor*, odor, or flavor]. Having a pleasant odor or flavor. See *summer savory.*

saw. An instrument having a thin blade with sharp teeth on one edge, and used for dividing bones and other hard substances. **s., Adams',** a small straight saw with a long handle. **s., Butcher's,** one in which the blade can be fixed at any angle. **s., chain-,** one in which the teeth are set in links movable upon each other, the saw being moved by pulling alternately upon one and the other handle. **s., crown-.** See *trephine.* **s., Gigli's,** a wire with a serrated edge, used in cranial operations. **s., Hey's,** a serrated disc affixed to a handle, and used for enlarging an opening in a bone.

saw-palmetto. The fruit of *Serenoa serrulata;* sedative; nutritive and tonic. Dose of the fluidextract, ʒ ss-ij.

Sawyer's ointment (*saw'-yer*). An ointment composed of powdered ipecac, croton liniment,

and adeps benzoinatus, used as a counter-irritant

saxifragant (*saks-if' rag-ant*) [*saxum*, a stone, *frangere*, to break] Having the power of dissolving or breaking up calculi

saxifrage (*saks'-if-raj*) [*saxum*, a rock, *frangere*, to break] Any plant of the genus *Saxifraga*, including many species of herbs, to some of which doubtful medicinal properties are ascribed

saxin (*saks'-in*) Trade name of a sweetening agent more powerful than saccharin and about 600 times sweeter than sugar

saxol (*saks'-ol*) Trade name of a preparation of liquid petrolatum

saxoline (*saks' ol en*) A proprietary soft petrolatum

Sayre's apparatus, S 's jacket (*sair*) [Lewis Albert *Sayre*, American surgeon, 1820–1900] A jacket of plaster of paris molded to support the spine in diseases of the vertebral column

Sb. Chemical symbol of antimony (*stibium*)

$SbCl_3$. Antimony trichloride

Sb_2O_3 Antimony trioxide

Sb_2O_5 Antimony pentoxide

Sb_2S_3 Antimony trisulphide

Sc. Chemical symbol of scandium

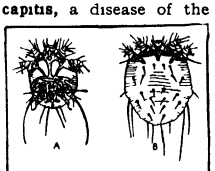
scab [*scabere*, to scratch] 1 The crust formed by the desiccation of the secretion of an ulcer 2 Scabies

scabbard (*skab'-ard*) [ME , *scauberd*, a sheath] A veterinary term for the prepuce of the horse

scabbed (*skabd*) [*scabere*, to scratch] Mangy, affected with scabies

scabby (*skab'-e*) Same as *scabbed*

scabies (*ska be ēz*) [*scabere*, to scratch] Itch, a disease of the skin caused by an animal parasite, *Sarcoptes scabiei*, or itch-mite The insect forms burrows or cuniculi beneath the skin and causes irritation, with vesicles, papules, or pustules, which are frequently modified by scratching **s. agria**, lichen **s , Boeck's**, scabies crustosa, Norwegian itch **s capitis**, a disease of the hairy scalp marked by exudation and formation of crusts Syn , *achores capitis* **s capitis favosa**, favus **s. crustosa**, an extreme form of general scabies of the body resulting in fish-scale like desquamation Syn *Norway itch* Cf *radesyge* **s. fera.** See *ecthyma* **s. ferina**, mange **s. humida, s miliaris**, eczema **s. lymphatica**, that accompanied by vesicular eruption Syn , *watery itch* **s. papuliformis, s. papulosa**, a form marked by papular efflorescence Syn , *rank itch* **s. pecorina**, a form affecting sheep Syn , *sheep-itch* **s. purulenta, s. pustulosa**, that in which there is formation of large pustules resembling those of smallpox, occurring on the wrists of children Syn , *Rocky itch*



SARCOPTES SCABIEI A MALE B FEMALE

scabiophobia (*ska-be-o-fo'-be-ah*) [*scabies*, itch, *φόβος*, fear] Morbid or insane fear of scabies

scabiosus (*ska-be-o'-sus*) Pertaining to, or suffering from, scabies

scabious (*ska' be-us*) [*scabiosus*, rough, scabby] 1 Scabby or scaly 2 As a noun, a plant of the genus *Scabiosa;* popularly regarded as useful in skin diseases and gout, and as a vulnerary

scabrities (*ska brish'-e ēz*) [*scaber*, rough] Roughness, scabbiness **s. unguium,** abnormal thickening and roughness of the nails

scala (*ska'-lah*) [L] A staircase or ladder **s. anterior cochleæ, s. externa cochleæ.** See *s vestibuli* **s. clausa, s. inferior cochleæ, s. interna cochleæ.** See *s tympani* **s. media,** the space between the membrane of Reissner and the basilar membrane, containing the essential peripheral organs of hearing **s. rhythmica.** See *nucleus, hypoglossal* **s. tympani,** the canal lying below the osseous lamina and the basilar membrane of the internal ear **s. vestibuli,** the canal bounded by the osseous lamina and the membrane of Reissner

scald (*skawld*) [*excaldere*, to wash in hot water] 1 The burn caused by hot liquids or vapors 2 [Icel , *skalli*, a bare head] A disease of the skin accompanied by the formation of scabs. **s -head,** see *favus*

scale (*skāl*) [AS , *scealu*, a husk, a scale] 1 The dry, semiopaque lamina of horny epidermis, shed from the skin in health and in various diseases 2 [*scala*, a ladder] Anything bearing marks placed at regular intervals and used as a standard in measuring as *barometric scale.* 3 To remove the tartar from the teeth

scalene (*ska'-len*) [*σκαληνός*, uneven] Having unequal sides **s muscle** See *scalenus* under *muscle* **s tubercle,** a tubercle on the upper surface of the first rib for the insertion of the scalenus anticus muscle

scalenotomy (*ska-lēn-ot'-o-me*) [*scalene* muscles, *τόμη*, incision] Incision of one or more of the scalene muscles near their insertion, suggested in tuberculosis of the apex of the lung

scalenus (*ska le'-nus*) See *muscles, table of*

scaler (*ska'-ler*) [ME , *scale*, scale] An instrument for removing the tartar from the teeth

scaling (*ska' ling*) [*scale*] 1 Desquamating, producing scales 2 A pharmaceutical method consisting of drying concentrated solutions of drugs on glass plates **s the teeth,** an old name for the operation, in dentistry, which consists in the removal of salivary calculus, commonly called tartar, from the teeth.

scall (*skawl*) [ME , *skalle*, a scab] Favus, impetigo, psoriasis, eczema, or other skin diseases **s , dry,** psoriasis, scabies **s , milk,** crusta lactea **s , moist,** eczema

scallard (*skal'-lard*) Porrigo

scalled (*skawld*) [ME , *skalle*, a scab] Affected with scall

scalp [ME , *scalp*, the top of the head] The hairy integument covering the cranium

scalpel (*skal' pel*) [*scalpere*, to cut] A small knife having a convex edge

scalping operation (*skal'-ping*) See *operation, Gerdy's*

scalpriform (*skal'-pre-form*) [*scalprum*, a chisel, *forma*, shape] Like a chisel

scalprum (*skal'-prum*) [*scalpere*, to scrape] 1. A toothed raspatory used in trephining and in removing carious bone 2 A strong and large scalpel

scaly (*ska'-le*) [*scale*] 1 Resembling scales, characterized by scales, as *scaly* desquamation 2 Covered with or having scales **s.-skin,** a contagious disease common in the Louisiade, Marshall, and Gilbert groups of South Sea Islands It is an eruption of small, dry, horny scales, giving the sufferers a repulsive appearance It is probably mycetogenic in origin **s. tetter,** see *psoriasis*

scamma (*skam'-ah*) [σκάμμα, a trench]. Same as *fossa*.

scammonia (*skam-o'-ne-ah*). See *scammony*.

scammonin (*skam'-o-min*) [*scammony*]. A glucoside found in scammony. It may be identical with jalapin.

scammony (*skam'-o-ne*) [σκαμμωνία, scammony] The dried juice of the root of *Convolvulus scammonium*. It is a drastic cathartic, and is generally given in combination with other drugs. **s., resin of** (*resina scammonii*, U. S. P.). Dose as an active purge for adults 5–15 gr. (0.3–1.0 Gm.).

scandium (*skan-de-um*) [*Scandia, Scandinavia*]. A rare metal belonging to the aluminum group. Symbol Sc; atomic weight 44.1. See *elements, table of*.

scanning, s. speech [*scandere*, to climb]. A peculiar slow and measured form of speech, occurring in various nervous affections, especially in multiple sclerosis.

scansorius (*skan-so'-re-us*). See *muscles, table of*.

Scanzoni's operation (*skan-zo'-ne*) [Friedrich Wilhelm *Scanzoni*, German obstetrician, 1821–1891] A method of rotating the fetal head with the forceps in order to hasten delivery. **S.'s second os**, Bandl's ring.

scapha (*ska'-fah*) [σκάφη, trough]. 1. A trough. 2. The scaphoid fossa.

scaphocephalic, scaphocephalous (*skaf-o-sef-al'-ik, skaf-o-sef'-al-us*) [see *scaphocephaly*]. Having a boat-shaped head, from early ossification of the saggital suture, which projects like the keel of a boat.

scaphocephalus (*skaf-o-sef'-al-us*) [σκάφη, a skiff; κεφαλή, head]. A boat-shaped appearance of the cranium, due to a premature union of the sagittal suture, or abnormal development.

scaphocephaly (*skaf-o-sef'-al-e*) [σκάφη, boat; κεφαλή, head]. The condition of having a skull characterized by a projecting, keel-like sagittal suture, due to its premature ossification.

scaphocuboid (*skaf-o-kū'-boid*) [σκάφη, boat; *cuboid*]. Pertaining to the scaphoid and cuboid bones

scaphohydrocephalus, scaphohydrocephaly (*skaf-o-hi-dro-sef'-al-us, skaf-o-hi-dro-sef'-al-e*) [σκάφη, boat; *hydrocephalus*]. Scaphocephaly due to hydrocephalus.

scaphoid (*skaf'-oid*) [σκάφη, boat; εἶδος, like]. Boat-shaped. **s. abdomen**, the sunken abdomen seen in meningitis and in great emaciation. **s. bone**, a name given to a boat-shaped bone of the tarsus and of the carpus. **s. fossa**. See *fossa, scaphoid*.

scaphoideum (*skaf-oid'-e-um*) [L.]. The scaphoid bone of the wrist or ankle.

scaphoiditis (*skaf-oid-i'-tis*) [*scaphoid*; ιτις, inflammation]. Inflammation of the scaphoid bone.

scaphoidoastragalan (*skaf-oid-o-as-trag'-al-an*). Relating to the scaphoid bone and the astragalus.

scaphoidocuboid (*skaf-oid-o-kū'-boid*). Relating to the scaphoid and cuboid bones.

scapholunar (*skaf-o-loo'-nar*) [σκάφη, boat; *luna*, moon]. Pertaining to the scaphoid and semilunar bones.

scaphula (*skaf'-ū-lah*) [σκάφη, boat]. The fossa navicularis.

scapula (*skap'-ū-lah*) [L.]. The shoulder-blade, the large, flat, triangular bone forming the back of the shoulder. See *bones, table of*. **scapulæ alatæ**, of Galen and Aristotle, a wing-like appearance of the shoulder-blade in thin persons of weak musculature, especially in paralysis of the serratus magnus.

scapulacromial (*skap-ū-lak-ro'-me-al*) [*scapula*, shoulder-blade; *acromion*]. Pertaining to the acromion process of the scapula.

scapulalgia (*skap-ū-lal'-je-ah*) [*scapula*, the shoulder-blade; ἄλγος, pain]. Pain in the neighborhood of the shoulder-blade.

scapular (*skap'-ū-lar*) [*scapula*]. Pertaining to the shoulder-blade. **s. line**, a vertical line drawn on the back through the inferior angle of the scapula. **s. point**, a tender point developed in neuralgia of the brachial plexus and situated at the inferior angle of the scapula. **s. reflex**. See under *reflex*. **s. region**, the region of the back corresponding to the position of the scapula, the spine of which divides it into a supraspinous and an infraspinous region.

scapulary (*skap'-ū-la-re*). A bifuracted bandage, the two ends of which pass over the shoulders, while the single end passes down the back, all three being fastened to a body-bandage.

scapulectomy (*skap-ū-lek'-to-me*) [*scapula*; ἐκτομή, excision]. Surgical removal of the scapula.

scapulen (*skap-ū-len*) [*scapula*, the shoulder-blade]. Belonging to the scapula in itself.

scapulo- (*skap'-ū-lo-*) [*scapula*, scapula]. A prefix denoting relation to the shoulder or scapula.

scapuloclavicular (*skap-ū-lo-kla-vik'-ū-lar*) [*scapula; clavicle*]. Pertaining to the scapula and the clavicle.

scapulocoracoid (*skap-ū-lo-ko'-rak-oid*) [*scapula, coracoid*]. Pertaining to the scapula and the coracoid process.

scapulodynia (*skap-ū-lo-din'-e-ah*). Synonym of *scapulalgia*.

scapulohumeral (*skap-ū-lo-hū'-mer-al*) [*scapula; humerus*]. Pertaining to the scapula and the humerus. **s. amputation**, removal of the arm at the shoulder-joint.

scapulopexy (*scap-ū-lo-pek'-se*) [*scapulo-*; πῆξις, fixation]. The operation of fixing the scapula to the ribs.

scapulothoracic (*skap-ū-lo-tho-ras'-ik*) [*scapulo-; thoracic*]. Pertaining to the scapula and the thorax.

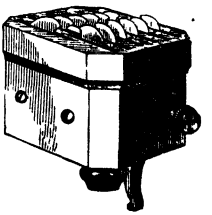
scapulovertebral (*skap-ū-lo-ver'-te-bral*) [*scapula; vertebra*]. Pertaining to the scapula and the spine.

scapus (*ska'-pus*) [L.: pl., *scapi*]. A stem, shaft. **s. penis**, the body of the penis. **s. pili**, the hair-shaft.

scar (*skar*). See *cicatrix*.

scarfskin, scurfskin (*skarf'-skin, skerf'-skin*) [AS., *sceorfe*, a fragment; *skin*]. The epidermis or cuticle.

scarification (*skar-if-ik-a'-shun*) [*scarify*]. The operation of making numerous small, superficial incisions.



SCARIFICATOR.

scarificator (*skar'-if-ik-a-tor*) [*scarify*]. An instrument used in scarification, consisting of a number of small lancets operated by a spring.

scarify (*skar'-if-i*) [*scarificare*, to scratch]. To make a number of small, superficial incisions.

scarlatina (*skar-lat-e'-nah*) [*scarlatinus*, scarlet]. Scarlet fever. An acute, contagious, febrile

disease, having a period of incubation varying from several hours to a week, setting in with vomiting or a chill, which is followed by high fever, rapid pulse, sore throat, and the appearance, at the end of the first or the second day of the disease, of a punctiform, scarlet-red eruption The tongue, at first heavily coated and red at the tip and edges, soon shows prominence of the papillæ, which are red and swollen (strawberry tongue) The eruption, at the appearance of which all the symptoms become intensified, gradually fades after five or six days, and is followed by a scaly desquamation A peculiarity of scarlatina is the tendency it has to involve the kidneys **s anginosa,** scarlatina with marked inflammation of the throat **s cynanchica,** see *s anginosa* **s. gastrica,** scarlet fever complicated with gastro enteritis **s. gravior,** malignant scarlet fever **s. hæmorrhagica,** scarlet fever, or more usually septic fever with hemorrhagic spots **s lævis,** mild scarlet fever **s. latens,** scarlet fever without eruptions **s. papulosa,** scarlet fever in which there are prominent papules, due to involvement of the hair follicles **s. prurigínosa,** synonym of *urticaria* **s. puerperalis,** see *s puerperal* **s pustulosa,** scarlet fever with a pustular eruption **s. rheumatica,** synonym of *dengue* **s. septica,** a grave form of scarlet fever characterized by symptoms of septic intoxication **s. simplex,** mild scarlet fever **s. sine angina,** scarlet fever without throat symptoms **s. sine eruptione, s. sine exanthemate,** scarlet fever without the rash **s. traumatica,** the eruption similar to that of scarlet fever, accompanied by febrile symptoms, which sometimes follow wounds or surgical operations **s. typhosa,** malignant scarlet fever with grave nervous symptoms **s urticata,** urticaria **s. maligna, s , malignant,** a form characterized by an abrupt onset, high fever, convulsions, coma, and death, usually before the appearance of the eruption **s , puerperal,** Littre s name for a rash resembling scarlatina sometimes followed by vesication and pustulation of the affected parts but without fever, observed in puerperants Syn , *erythema diffusum* (Braun), *porphyra* (Retzius)

scarlatinal, scarlatinoid, scarlatinous (*skar lat e'-nal, skar-lat' in oid, skar-lat'-in-us*) [*scarlatina*] 1 Pertaining to or caused by scarlatina 2 A disease simulating scarlatina **s nephritis,** the acute catarrhal nephritis arising in the course of or during the convalescence from scarlatina

scarlatinella (*skar-lat-in-el'-lah*) Same as *fourth disease, q v*

scarlatiniform (*skar-lat in' if orm*) Synonym of *scarlatinoid*

scarlatinosis (*skar-lat-in-o'-sis*) The toxic state due to the specific toxin of scarlatina

scarlet fever See *scarlatina*

scarlet red. A synthetic dye, the sodium salt of amidoazobenzeneazobetanaphtholdisulphonic acid It has been used to heal wounds, in addition to its uses as a staining reagent

Scarpa's fascia [Antonio *Scarpa,* Italian anatomist, 1747–1832]. The deep layer of the superficial abdominal fascia. **S.'s fluid,** endolymph. **S.'s foramina,** the nasopalatine foramina, bony canals opening into the incisor canal, transmitting the nasopalatine nerves **S.'s ganglion,** a ganglion near the internal auditory meatus, at the point of junction of the facial nerve and the vestibular branch of the auditory nerve; *roots,* facial and auditory nerves, *distribution,* internal ear **S.'s habenula.** See *Haller's habenula* **S.'s hiatus.** 1 See *Breschet's helicotrema* 2 See *foramen of Winslow.* **S.'s liquor,** the endolymph of the labyrinth **S.'s membrane,** the membrane which closes the fenestra rotunda of the tympanic cavity **S.'s nerve,** the nasopalatine nerve **S.'s shoe,** an apparatus used in the treatment of equinovarus It consists of a metal support with adjustable angle **S.'s staphyloma,** posterior staphyloma, staphyloma of the posterior segment of the sclera **S.'s triangle,** a triangular space having for its base Poupart's ligament, and for its apex the point of intersection of the sartorius and adductor longus muscles.

scat (*skat*) A hermaphrodite

scatacratia (*skat ak-ra'-she-ah*) See *scoracratia*

scatemia, scatæmia (*skat e'-me-ah*) [σκῶρ, σκατός, dung, αἷμα blood] Autointoxication from retained fecal matter

scatiatria (*skat-i-at' re ah*) [σκῶρ, σκατός, dung, ἰατρεία, a healing] Medical treatment directed to the condition of the feces

scatocyanin (*skat-o-si'-an in*) [σκῶρ, σκατός, dung, κύανος dark-blue] A derivative of chlorophyll, resembling but not identical with phyllocyanin It crystallizes in rhombic plates, pale brown by transmitted light, purplish blue with brilliant metallic luster by reflected light decomposed by heat, insoluble in ether, alcohol, or benzol, soluble in chloroform

scatol (*ska'-tol*) See *skatol*

scatologia, scatology (*skat-o-lo'-je-ah, shat-ol'-o-je*) [σκῶρ σκατός, dung, λογος, science] The science or study of excreta

scatologic (*skat-ol-oj'-ik*) [σκῶρ, σκατός, dung, λόγος science] Pertaining to scatologia

scatophagous (*skat of'-ag-us*) [σκῶρ, σκατός, dung; φαγεῖν, to eat] Coprophagous, excrement-eating

scatoscopy (*ska-tos' ko-pe*) [σκῶρ, σκατός, dung, σκοπεῖν, to inspect] Inspection of the excreta

scatosin (*skat'-o-sin*) [σκῶρ, σκατός, dung] A base isolated from the products of pancreatic autodigestion, probably related to skatol

scatt (*skat*) See *anthrax*

scatula (*skat'-u-lah*) [L] An oblong, flat box for powders or pills

scavenger (*skav'-en-jer*) [AS , *sceáwian,* to show] One who cleans, a remover of waste and filth **s -cells,** wandering cells that take up debris, they are common in the nervous system

Sc. D Abbreviation for *Scientiæ Doctor,* Doctor of Science

Sc. D A Abbreviation for right scapulo-anterior position of the fetus

Sc. D. P. Abbreviation for right scapulo-posterior position of the fetus

scelalgia (*se lal'-je ah*) [σκέλος, leg, ἄλγος, pain] Pain in a leg **s puerperarum,** synonym of *phlegmasia alba dolens*

scelotyrbe (*sel-o ter'-be*) [σκέλος, leg, τύρβη, vacillation] Weakness or indecision in stepping, often due to a palsied condition. **s. agitans, s. festinans** (Sauvages), paralysis agitans **s fibrilis.** See *subsultus tendinum* **s. pituitosa.** See *enteritis, pseudomembranous* **s. spastica,** chronic spasms affecting the lower limbs and causing lameness **s. tarantismus,** chorea

scent (*sent*) [ME , *senten,* to smell] An effluvium from any body capable of affecting the olfactory sense; odor, fragrance **s.-bag,** same as *s -organ* **s. gland,** an odoriferous gland, or one

secreting an odoriferous substance. **s.-pore,** the orifice of a scent-gland. **s.-test,** for plumbing It is made by putting into the pipes a quantity of some pungent chemical, such as peppermint oil, the odor of which will escape from the defects in the pipes if there are any [Price]. **s.-vesicle,** a vesicle containing odoriferous matter.

Schacher's ganglion (*shah'-ker*) [Polycarp Gottlieb *Schacher*, German physician, 1674–1751]. The ophthalmic ganglion.

Schachowa's spiral tube (*shak-ko'-vah*) [Seraphina *Schachowa*, Russian histologist]. The section of a uriniferous tubule that lies between a convoluted and a looped tubule.

Schaefer's dumb-bells. The dumb-bell shaped elements regarded by Schaefer as constituting the primitive fibrils of striped muscular tissue. **S.'s reflex,** pinching of the Achilles tendon at its middle or upper third causes slight flexion of the foot and toes in cases of organic hemiplegia The significance of this reflex is the same as that of Babinski's toe phenomenon. **S.'s sign.** 1. *Of pregnancy:* a characteristic discoloration in stripes, reddish on a livid background, which appears in the neighborhood of the urethra or on the vestibule of the vagina. The stripes run for the most part crosswise or oblique. The condition is regarded as due to a vasomotor reaction dependent upon the life of the child as the stripes disappear as soon as the child within the womb is dead. 2. *Of hemiplegia:* See *Schaefer's reflex.*

Schaefer's method (*sha'-fer*) [Edward Albert *Schaefer*, British physiologist, 1850–]. *Method of resuscitation in asphyxia or drowning:* the patient is placed face downward, and pressure is made intermittently over the lower part of the thorax to induce natural breathing.

Schapiro's sign (*shah-pe'-ro*). The pulse rate is not reduced when the patient lies down, observed in myocardial weakness.

Schede's method (*sha'-deh*) [Max *Schede*, German surgeon, 1844–1902]. A method of treating caries of bone. The diseased tissue is scraped away and the cavity allowed to fill with a blood-clot. The latter is kept moist and aseptic by a covering of gauze and protective. **S.'s operation,** a radical thoracoplasty in which the ribs from the second down and from their tubercles to the costal cartilages are excised with intercostal structures and parietal pleura. The skin and muscle flap is then sutured and in contact with the collapsed lung.

Scheele's acid (*sheel*) [Karl Wilhelm *Scheele*, Swedish chemist, 1742–1783]. A 4 per cent. solution of hydrocyanic acid **S.'s green,** cupric arsenite, $CuHAsO_3$.

Scheiner's experiment (*shi'-ner*) [Christopher *Scheiner*, German physicist, 1575–1650]. An experiment illustrating refraction and accommodation of the eye. The person looks through two pinholes made in a card and placed at a less distance than the diameter of the pupil. If the eye is emmetropic, or if accurately focused, the two sets of rays, passing through the pinholes, unite and form a single image. In a myopic or a hyperopic eye the object appears double

schema (*ske'-mah*) [σχῆμα, form]. 1. A simple design to illustrate a complex mechanism. 2. An outline of a subject.

schematic (*ske-mat'-ik*) [*schema*]. Pertaining to or of the nature of a schema. **s. eye,** one showing the proportions of a normal or typical eye.

schemograph (*ske'-mo-graf*) [*schema*; γράφειν, to write]. An apparatus for tracing the outline of the field of vision, the measurement of the field is made with the perimeter.

Schenk's method (*shenk*) [Leopold *Schenk*, Austrian physiologist, 1842–1902]. The determination of sex of infants by regulation of the mother's diet before and during pregnancy; that it is possible to govern the process of gestation so as to determine the sex of human offspring: "When no sugar is secreted, not even the smallest quantity, then the ovum will be developed which is qualified to become a male child."

Scherer's test for inosite (*sha'-rer*) [Johan Joseph von *Scherer*, 1814–1869]. Evaporate the substance to dryness on a platinum foil with nitric acid, add ammonia and one drop of calcium chloride solution, and carefully reevaporate to dryness. In the presence of inosite a rose-red residue is obtained. **S.'s test for leucin,** carefully evaporate the leucin to dryness on platinum foil with nitric acid. Add a few drops of sodium hydroxide and warm, and the colorless residue changes to a color varying from pale yellow to brown, according to the purity of the leucin; and further evaporation agglomerates it into an oily drop, which rolls about on the foil. **S.'s test for tyrosin,** carefully evaporate the substance to dryness on platinum foil with nitric acid A yellow residue is formed (nitrotyrosin), which becomes a deep reddish-yellow color on the application of caustic soda.

scherlievo (*skair-le-a'-vo*) [Ital.]. A form of ulcerative syphilis prevalent in the Austrian seaports during the last century.

scheroma (*ske-ro'-mah*) [σχερος, dry]. Xerophthalmia.

Scheurlen's bacillus (*shoir'-lenz*). A bacillus at one time thought to be the cause of carcinoma.

Schick's reaction (*shik*) [——— *Schick*, Austrian physician]. Schick uses a diphtheria toxin in a dilution of such strength that 0.1 Cc. equals $\frac{1}{10}$ of the lethal dose of a 250 Gm. guinea pig. Of this toxin he injects 0.1 Cc. of a $\frac{1}{100}$ dilution In those who react positively there is a reddening and infiltration developing in twenty-four hours and reaching a maximum in forty-eight hours; this indicates susceptibility to diphtheria, a negative reaction indicating immunity.

Schiefferdecker's intermediate discs (*she'-fer-dek-er*). The substance which is assumed to fill in the space existing at Ranvier's nodes between Schwann's sheath and the axis-cylinder. It appears as a black line on staining with silver nitrate and forms the horizontal branch of Ranvier's Latin cross.

Schiff's reaction for cholesterin [J. Moritz *Schiff*, German physiologist, 1823–1896]. Evaporate the substance over a small flame in a porcelain dish with a few drops of a mixture consisting of 1 part of a medium solution of ferric chloride and 2 or 3 parts of concentrated hydrochloric or sulphuric acid. In the presence of cholesterin a reddish-violet residue is first obtained and then a bluish-violet. **S.'s test for carbohydrates in urine,** dip strips of paper in a mixture of equal parts of glacial acetic acid and xylidin, with a very little alcohol, and dry. Warm the urine with sulphuric acid, and expose the paper to the fumes. In the presence of carbohydrates

the paper will be stained red **S.'s test for urea,** add to the urea a drop of a concentrated watery solution of furfurol, and next a drop of hydrochloric acid of specific gravity 1 10 A play of color is produced, changing from yellow, green and blue to purple The same reaction is given by allantoin, but it is less intense **S.'s test for uric acid,** dissolve the substance in sodium carbonate, then on the addition of a solution of silver nitrate a reduction of black silver oxide is obtained If a piece of filter paper previously treated with silver nitrate solution is treated with a drop of the solution of the substance in sodium carbonate a reduction of black silver oxide will also be formed on the paper

Schilder's disease Encephalitis periaxialis diffusa See under *encephalitis*

Schimmelbusch's disease (*shim'-el boosh*) [Curt *Schimmelbusch*, German surgeon, 1860–] Cystic degeneration of the mammary gland associated with adhesion of the Fallopian tube or ovary to the cecum

schindylesis (*skin dil-e'-sis*) [σχινδύλησις, a cleavage] A form of articulation in which a plate of one bone is received into a fissure of another bone

schirrus (*skir'-us*) Synonym of *scirrhus*

schisto-, schiz-, schizto- (*skis to , skiz-, skiz to*) [σχιστός, cleft] Prefixes meaning split or fissured

schistocelia, schistocœlia (*skis to se'-le-ah*) [*schisto-*, κοιλία, cavity] Abdominal fissure

schistocephalus (*skis to sef'-al-us*) [*schisto* , κεφαλή, head] 1 Having a fissured skull 2 A monster with a fissured skull

schistocormus (*skis to-kor mus*) [*schisto* , κορμός, trunk] A monstrosity having a cleft thorax, neck, or abdominal wall

schistocystis (*skis to-sis'-tis*) [*schisto-*, κύστις, bladder] Fissure of the bladder

schistocyte (*skis'-to-sīt*) [*schisto-*, κύτος, a cell] 1. A blood corpuscle in process of segmentation 2 Ehrlich s name for a poikilocyte

schistocytosis (*skis to si to' sis*) [*schistocyte*] 1 An aggregation of schistocytes in the blood 2 The splitting process of blood corpuscles

schistoglossia (*skis to glos'-e ah*) [*schisto* , γλῶσσα, tongue] Cleft tongue

schistomelus (*skis-tom' el us*) [*schisto* , μέλος, limb] A monstrosity with a cleft lower extremity

schistometer (*skis tom'-et er*) [*schisto-*, μέτρον, a measure] A device for measuring the distance between the vocal cords

schistoprosopia (*skis-to-pros o'-pe ah*) [*schisto-*, πρωσωπον, face] Congenital fissure of the face

schistoprosopus (*skis-to-pros-o'-pus*) [see *schistoprosopia*] 1 Having a cleft or fissured face 2 A monster having a fissure of the face

schistorrhachis, schistorrachis (*skist or'-a-kis*) [*schisto-*, ῥάχις, spine] Spina bifida

Schistosoma (*skis to-so'-meh*) A genus of trematode worms of flukes **S hæmatobium,** a blood-fluke causing Egyptian hematuria. **S. japonicum,** an Asiatic blood-fluke the cause of a disease endemic in certain parts of China and Japan, there are enlargement of the liver and spleen, increased appetite, diarrhea, and frequently mucous, bloody stools Syn , *Schistosoma cattoi*

schistosomiasis (*skis-to-so-mi'-as-is*). Infestation with schistosoma.

Schistosomum (*skis-to-so'-mum*) See *Schistosoma*

schistosomus (*skis-to-so'-mus*) [*schisto-*, σῶμα, a body] A variety of monster in which there is a lateral or median eventration extending the whole length of the abdomen, the lower extremities being absent or rudimentary

schistosternia (*skis-to-ster'-ne-ah*) [*schisto-*, στέρνον, sternum] Sternal fissure Syn. of *schistothorax.*

schistothorax (*skis-to-tho'-raks*) [*schisto-*, *thorax*]. Fissure of the thorax

schistotrachelus (*skis-to tra'-kel-us*) [*schisto-*, τράχηλος, neck] Fissured neck or cervix

schizaxon (*skiz aks'-on*) [*schiz-*, *axis*] An axon which divides in its course into equal or nearly equal branches

schizo- (*skiz zo*) [σχίζειν, to split] A prefix denoting split or cleft

schizoblepharia (*skiz o blef-a'-re-ah*) [σχίζειν, to split, βλέφαρον, eyelid] Fissure of the eyelid

schizocyte. See *schistocyte*

schizocytosis See *schistocytosis*

schizogenesis (*skiz-o-jen -es-is*) [*schizo-*, γένεσις, production] Reproduction by fission

schizognathism (*skiz og'-na-thizm*) [*schizo-*, γνάθος, jaw] Cleavage of the jaw

schizogonic (*skiz-o-gon'-ik*) Relating to schizogony

schizogony (*skiz-og'-o-ne*) [*schizo-*, γονία, generation] 1 Same as *schizogenesis.* 2 A form of multiple division in which the contents of the oocyst eventually split up into swarm spores. Cf *sporogony*

schizoid (*skiz'-oid*) [*schizo-*, εἶδος, form] Pertaining to dementia praecox

Schizomycetes (*skiz-o-mi-se'-tēz*) [*schizo-*, μύκης, a fungus] The cleft fungi or bacteria, so called because multiplying by fission

schizomycetic (*skiz-o-mi-se'-tik*). Pertaining to, or caused by, schizomycetes

schizomycosis (*skiz-o mi ko'-sis*) [*schizo-*, μύκης, fungus] A disease due to schizomycetes.

schizont (*skiz'-ont*) [σχίζειν, to divide] Schaudinn's term for the mother-cell in coccidia which, by multiple division, gives rise to the crescentic swarm spores called merozoites Syn , *oudeterospore* (E R Lankester, 1900), *sporocyte* (Ron, 1899) Cf *sporont.*

schizophrenia (*skiz o fre'-ne ah*) [*schizo* , φρήν, mind] Dementia præcox

schizophrenic (*skiz-o-fren'-ik*). Pertaining to, or suffering from, schizophrenia

schizophyta (*skiz-o-fi' tah*) [*schizo* , φυτόν, plant] Dried viable schizomycetes Fission plants

schizothorax (*skiz-o-tho'-raks*) Synonym of *schistothorax*

Schizothymic (*skiz-o-thi'-mik*) See *schizophrenic*

schizotrichia (*skiz o trik'-e-ah*) [*schizo-*, θρίξ, hair] Splitting of the hair

Schizotrypanum (*skiz-zo-tri'-pan-um*) [*schizo-*, τρύπανον, a borer] A genus of Trypanosomes.

Schlange's sign. In fecal blocking, the intestine is dilated above the obstruction and peristaltic movements are absent below that point

Schlatter's disease (*shlahl'-er*) [Carl *Schlatter*, Swiss surgeon, 1864–] A condition characterized by pain in the tubercle of the tibia, increased by extension and pressure, it occurs in athletes and is said to be due to separation of the tubercle of the tibia

Schleich's infiltration anesthesia (*shlīkh*) [Carl Ludwig *Schleich*, German surgeon, 1859–] A local anesthesia produced by the hypodermatic injection of cocaine combined with a weak salt solution, by the addition of a little morphine the anesthetic action is prolonged **S. method of producing general anesthesia,** the administration of small doses of chloroform, petroleum ether,

and sulphuric ether. **S.'s solution,** 1½ gr. of cocaine hydrochloride ½ gr. of morphine hydrochloride, 3 gr. common salt, dissolved in 3 oz. and 3 dr. of sterilized water.

Schlemm's canal (*shlem*) [Friedrich *Schlemm*, German anatomist, 1795–1858]. An irregular space or plexiform series of spaces occupying the sclero-corneal region of the eye; it is regarded by some as a venous sinus, by others as a lymph-channel. **S.'s ligament,** one of two ligaments connected with the shoulder-joints; the glenoideobrachial ligament.

Schlesinger's type of syringomyelia. The dorso-lumbar type.

Schlippe's salt (*shlip'-peh*) [K. F. *Schlippe*, 1799–1867]. Sodium thioantimonate.

Schmalz's operation (*shmolts*). *For stricture of the lacrimal duct:* the introduction of a thread through the sac, and as far into the duct as possible.

schmerzfreude (*schmärts'-froy'-deh*) [Ger., *pain-joy*]. A rare symptom of hysteria, in which pain or normally painful operations seem to the patient pleasant.

Schmidel's anastomoses (*shme'-del*) [Casimir Christopher *Schmidel*, German anatomist, 1716–1792]. An abnormal anastomosis between the vena cava and one of the veins of the portal system.

Schmidt's blood-coagulation theory. Para-globulin under the influence of fibrin-ferment enters into combination with fibrinogen, the result being fibrin. **S.'s incisions.** See *Lantermann's incissions* **S.'s (Ad.) method for demonstrating disturbances in the functions of the intestine,** it is formed upon the amount of the fermentation of the feces. The patient is given daily 1560 Gm. milk, 4 eggs, 3 pieces (100 Gm.) of zwieback, a plate of oatmeal-soup (40 Gm.), with 10 Gm. of sugar, a plate of flour soup made with 25 Gm. of wheat flour and 10 Gm. of sugar, and a cup of bouillon; 120 Gm. of potatoes are also given A small amount (0.3 Gm.) of carmin is given to color and designate the first stool to be examined. A small portion of the stool is dried to constant weight and weighed. It is then mixed with water and placed in a fermentation-tube and kept at 37° C. Fermentation with the evolution of gases sets in and is divided into an early and a late fermentation. Early fermentation occurs during the first 24 or 48 hours. Later fermentation begins slowly on the second or third day. In the early fermentation it is the starch that is acted upon, while in the late it is the albuminous cellulose materials. Early fermentation can be considered as present only when in the first 24 hours an evident amount of gas is formed. Normally after the diet described there should be no such fermentation. Its occurrence indicates faulty starch digestion and an abnormal condition of the bowels, especially of the small intestine. **S.'s nodes,** a term for the medullated interannular segments of a nerve-fiber.

Schmidt syndrome. Unilateral paralysis of the soft palate, larynx, and sternomastoid and trapezius, in cases of associated paralysis of larynx.

Schmiedel's ganglion. The inferior carotid ganglion.

Schneiderian membrane (*shni-de'-re-an*) [Conrad Victor *Schneider*, German anatomist, 1614–1680]. The nasal mucus membrane.

Schoeler's method (*she'-ler*) [Heinrich Leopold *Schoeler*, German ophthalmologist, 1844–]. Injection of tincture of iodine into the vitreous body in case of detachment of the retina.

Schoen's theory of accommodation. See under *accommodation*.

Schoenbein's reaction for copper (*shen'-bīn*) [Christian Friedrich *Schoenbein*, German chemist, 1799–1868]. On the addition of potassium cyanide and tincture of guaiac to a solution of a copper salt a blue coloration is produced.

Schoenlein's disease (*shen'-līn*) [Johann Lucas *Schoenlein*, German physician, 1793–1864]. Peliosis rheumatica. **S.'s triad,** purpuric exanthem, rheumatic phenomena, and gastro-intestinal disorders in peliosis rheumatica.

Schott's method (*shot*) [Theodor *Schott*, German physician, 1852–]. 1. A method of treating heart disease by resisted exercise and special forms of baths. 2. A system of gymnastic movements, accompanied by baths containing Nauheim salts, for the treatment of heart disease, anemia, and chronic rheumatism.

Schreger's lines (*shra'-ger*) [Christian Heinrich Theodor *Schreger*, Danish anatomist, 1768–1833]. Curved lines in the enamel of the teeth, parallel to the surface; they are due to the optical effect produced by the simultaneous curvature of the dentinal fibers.

Schreiber's maneuver (*shri'-ber*) [Julius *Schrieber*, German physician, 1849–]. Friction of the skin of the thigh and leg to reinforce the pateller and Achilles tendon-reflexes

Schreiner's base (*shri'-ner*). See *spermin*.

Schridde's granules (*shrid'-eh*) [H. *Schridde*, German physician]. Chondroconia.

Schroeder's contraction ring (*shro'-der*). See *Bandl's ring*. **S.'s test for urea,** when added to a solution of bromine in chloroform the urea will decompose, with the formation of gas.

Schroeder's method (*shro'-der*). *For resuscitation of asphyxiated infants:* the babe while in a bath is supported by the operator on the back, its head, arms, and pelvis being allowed to fall backward; a forceful expiration is then effected by bending up the body over the belly, thereby compressing the thorax.

Schroen's bacillus (*shro'-en*) [Otto von *Schroen*, German pathologist, 1837–1917]. A bacillus, other than Koch's bacillus of tuberculosis claimed to be pathogenic of tuberculosis.

Schroetter's catheters (*shret'-er*) [Leopold von *Schroetter*, Austrian laryngologist, 1837–1908]. Instruments of hard rubber and of varying caliber, somewhat triangular on section, used for the dilatation of laryngeal strictures. **S.'s chorea,** laryngeal chorea.

Schroth's cure (*shrōt*) [Johann *Schroth*, German physician, 1800–1856]. Dipsotherapy; a method of treating certain diseases by reducing to a minimum the liquid ingested by the patient.

Schuchardt's operation (*shoo'-kart*). **Paravaginal** hysterectomy; hysterectomy through a perineal incision involving the lower part of the wall of the vagina.

Schueffner's dots (*shoof'-ner*) [Wilhelm *Schueffner*, German pathologist]. Red granules seen in erythrocytes, after Romanowski staining, in benign tertian malarial infections.

Schuegner's granules (*shēg'-ner*). Plehn's granules, *q. v.*

Schuele's sign (*shoo'-leh*) [Heinrich *Schuele*, German neurologist 1839–1916]. Vertical folds between the eyebrows, forming the Greek letter

omega (*omega melancholicum*) frequently seen in subjects of melancholia

Schueller's ducts The ducts of Skene's glands

Schultz and Charlton test. An intracutaneous injection of serum from a convalescent scarlet fever patient produces in patients with scarlet fever a local area of blanching

Schultze's cells. The olfactory cells **S.'s comma-shaped tract,** a small tract of descending fibers in the posteroexternal column of the spinal cord near the gray commissure **S.'s fold,** a fold formed by the amnion near the insertion of the umbilical cord when the cephalic end of the fetus encroaches upon the latter **S.'s granules,** finely granular masses in the blood formed by the breaking-up of the blood-plaques **S.'s method or resuscitation,** the child is seized from behind with both hands by the shoulders, in such a way that the right index finger of the operator is in the right axilla of the child from behind forward, and the left index finger in the left axilla, the thumbs hanging loosely over the clavicles The other three fingers hang diagonally downward along the back of the thorax The operator stands with his feet apart and holds the child as above, practically hanging on the index fingers in the first position, with the feet downward, the whole weight resting on the index fingers in the axillæ the head being supported by the ulnar borders of the hands At once the operator swings the child gently forward and upward When the operator s hands are somewhat above the horizontal, the child is moved gently so that the lower end of the body falls forward toward its head The body is not flung over but moved gently until the lower end rests on the chest In this position the chest and upper end of the abdomen are compressed tightly The child's thorax rests on the tips of the thumbs of the operator As a result of this forcible expiration the fluids usually pour out of the nose and mouth of the infant The child is allowed to rest in this position one or two seconds The operator gradually lowers his arms, the child s body bends back, and he again holds the infant hanging on his index fingers with its feet downward These movements are repeated 15 or 20 times in the minute **S.'s position of the placenta,** the position assumed by the placenta when its central portion bulges downward and is expelled in advance of the periphery **S.'s reagent for cellulose,** iodine dissolved to saturation in a zinc chloride solution of specific gravity 1 8, and the addition of 6 parts of potassium iodide This reagent turns cellulose blue **S.'s test for cholesterin,** evaporate to dryness with nitric acid, using a porcelain dish on the water-bath In the presence of cholesterin a yellow residue is obtained, which changes to yellowish-red on the addition of ammonia **S.'s test for proteins,** to a solution of the protein add a few drops of a dilute cane-sugar solution and then concentrated sulphuric acid On warming and keeping the temperature at 60° C a bluish-red color is produced

Schultze-Chvostek's sign. See *Chvostek s symptom*

Schwabach's test (*shvah'-bak*) [Dagobert *Schwabach*, German otologist, 1846–] The duration of the perception of a vibrating tuning-fork placed upon the cranium is prolonged beyond the normal in cases of middle-ear disease, but shortened when the deafness is due to a central cause

Schwalbe's convolution (*shval'-beh*) [Gustav Albert *Schwalbe*, German anatomist, 1844–1916] The first occipital convolution **S.'s fissure,** one between the lower portion of the temporosphenoidal and the occipital lobes **S.'s nucleus,** the principal vestibular nucleus **S.'s sheath,** the delicate sheath which covers elastic fibers **S.'s space,** the subvaginal space of the optic nerve

Schwann, primitive bundle of [Theodor *Schwann*, German anatomist, 1810–1882] A muscular fiber **S , sheath of,** the neurilemma of a nerve-fiber **S , white substance of,** the myelin of a medullated nerve fiber

Schwarz's reaction for sulphonal [Karl Leonhard Heinrich *Schwarz*, German chemist, 1824–1890]. Upon heating sulphonal with charcoal the odor of mercaptan is evolved

Schwediauer's disease (*shva'-de-ow-er*) [François Xavier *Schwediauer* Austrian physician, 1748–1824] Same as Albert s disease

Schweinfurth green (*shvin foort*) Synonym of *Paris-green*

Schweitzer's reagent for cellulose (*shvi'-tser*) [Matthias Eduard *Schweitzer*, German chemist, 1818–1860] Copper sulphate, 10 parts, water, 100 parts Add potasssium hydroxide, 5 parts, in water 50 parts Wash the precipitate and dissolve in 20% ammonia solution This reagent dissolves cellulose

schwelle (*shvel' eh*) [Ger , 'threshold'] The threshold, or limen, of any sensation, nerve-excitation which just fails of producing a sensation

sciage (*se' ahzj*) [Fr , sawing] A to-and-fro sawing movement in massage, practised with the ulnar border, or with the dorsum of the hand

sciagram See *skiagram*

sciagraphy See *skiagraphy*

sciameter. See *skiameter*

sciascopia, sciascopy (*ski as ko' pe ah ski-as'-ko pe*) See *retinoscopy*

sciatic (*si at'-ik*) [σχίον ischium] 1 Pertaining to the ischium, as the *sciatic* notch 2 Pertaining to the sciatic nerve, as *sciatic* neuralgia **s nerve,** see *nerve* **s notch,** see *notch* **s spine,** a triangular eminence on the dorsal border of the body of the ischium **s scoliosis,** see *scoliosis*

sciatica (*si at'-ik ah*) [*ischiaticus*, from *ischium*] A disease characterized by neuralgic pain along the course of the sciatic nerve It usually follows exposure to cold and wet, and is dependent upon inflammation of the nerve In addition to pain there are numbness and tingling, tenderness along the course of the nerve and eventually wasting of the muscles See *Felt treatment of sciatica*

science (*si'-ens*) [*scire*, to know] Systematized and classified knowledge **S , Christian,** a method of treating disease upon principles similar to those upon which faith-cure rests.

scientific (*si-en-tif'-ik*) [*scientia*, knowledge, *facere*, to make] Relating to science That which is based upon science

scientist (*si'-en-tist*) [*scientia*, science] A savant, one versed in science

scieropia (*si-er-o'-pe-ah*) [σκιερός, shady, ὤψ, eye] Defective vision in which all objects appear dark

scilla (*sil'-ah*) See *squill*

scillain (*sil'-a-in*) See *scillitoxin*

scillin (*sil-in*) An inactive substance obtained from squills

scillipicrin (*sil-ip-ik'-rin*) [*scilla*; *πικρός*, bitter]. A yellowish-white, amorphous, hygroscopic powder obtained from squill. It is used as a diuretic in doses of 8–45 gr. (0.5–3.0 Gm.) daily

scillism (*sil'-izm*) [*scilla*]. Poisoning from extracts or tinctures of squill due to the contained glucoside scillitoxin. It is marked by vomiting, retarded pulse, and stupor.

scillitic (*sil-it'-ik*). Pertaining to or containing squill.

scillitin (*sil'-it-in*). A white or yellowish resinous substance, the bitter principle of squill.

scillitoxin (*sil-it-oks'-in*) [*scilla*; *τοξικόν*, poison]. An amorphous, light-brown, bitter, active principle of squill. It is soluble in alcohol, insoluble in ether and water, and a cardiac poison somewhat resembling digitalis. It is used as a diuretic in doses of $\frac{1}{60}$–$\frac{1}{30}$ gr. (0.001–0.002 Gm.) several times daily, maximum daily dose $\frac{1}{4}$ gr. (0.05 Gm.).

scillocephalus (*sil-o-sef'-al-us*) [*σκίλλα*, squill; *κεφαλή*, head]. 1. Congenital deformity o, the head, in which it is small and conically pointed, or squill-shaped. 2. A person with a squill-shaped head, usually an idiot.

scillopicrin (*sil-o-pik'-rin*). See *scillipicrin*.

scillotoxin (*sil-o-toks'-in*). See *scillitoxin*.

scintillascope (*sin-til'-ah-skōp*) [*scintilla*, a spark; *σκοπεῖν*, to observe]. Same as spintharıscope, *q. v.*

scintillation (*sin-til-a'-shun*) [*scintillare*, to sparkle]. An emission of sparks. Also a subjective visual sensation as of sparks.

scirrhencanthis (*skir-en-kan'-this*) [*σκιῤῥός*, hard; *ἐν*, in, *κάνθος*, canthus]. Scirrhus of the lacrymal gland.

scirrhoblepharoncus (*skir-o-blef-ar-ong'-kus*) [*σκιῤῥός*, hard; *βλέφαρον*, eyelid; *ὄγκος*, tumor]. A hard tumor of the eyelid.

scirrhocele (*skir'-o-sēl*) [*σκιῤῥός*, hard; *κήλη*, tumor]. Scirrhous tumor of the testicle.

scirrhoid (*skir'-oid*) [*scirrhus*; *εἶδος*, like]. Resembling a scirrhus.

scirrhoma (*skir-o'-mah*). See *scirrhus*. **s. cam-inariorum,** chimney-sweep's carcinoma.

scirrhophthalmia (*skir-off-thal'-me-ah*) [*σκιῤῥός*, hard; *ὀφθαλμός*, eye] Scirrhus of the eyeball.

scirrhosarca (*skir-o-sar'-kah*) [*scirrhus*; *σάρξ*, flesh]. Hardening of the flesh, especially of new-born infants; sclerema neonatorum.

scirrhosis (*skir-o'-sis*) [*σκιῤῥός*, hard]. The formation of a scirrhous carcinoma.

scirrhous (*skir'-us*) [*scirrhus*]. Hard.

scirrhus (*skir'-us*) [*σκίῤῥος*, hard]. A hard carcinoma.

scissile (*sis'-il*) [*scindere*, to divide]. Capable of being divided.

scission (*sish'-un*) [*scindere*, to cut]. A cutting or splitting of anything; fission.

scissiparity (*sis-ip-ar'-il-e*) [*scissus*, p. p. of *scindere*, cut, divide; *parere*, to bring forth]. In biology, generation by fission; schizogenesis.

scissor-leg (*siz'-or-leg*). A deformity that sometimes follows double hip-joint disease; the legs are crossed in walking.

scissors (*siz'-orz*) [*scindere*, to cut]. An instrument consisting of two blades held together by a rivet, and crossing each other so that in closing they cut the object placed between them. The blades may be straight, angular, or curved. **s., artery,** a scissors, one blade of which is probe-pointed, for introduction into a duct or canal. **s., canalicular,** delicate scissors, one blade of which is probe-pointed, used in slitting the lacrymal canal. **s., cannula,** scissors for slitting any canal or tube longitudinally. **s., craniotomy,** a strong S-shaped instrument used in craniotomy for perforating the skull and cutting away portions of bone. **s., iris,** one having flat blades which are bent in such a manner that they may be applied to the eyeball. Also, scissors used in iridectomy. **s., perforator,** see *s., craniotomy*. **s., skin-grafting,** an instrument consisting of a forceps and a scissors, the former for seizing a small piece of skin, and the latter for cutting it off. **s., uvula,** one designed for removal of the uvula. **s., de Wecker's,** a peculiar modification of iris-scissors.

scissura (*sis-ū'-rah*) [*scindere*, to cut]. A fissure; a splitting. **s. pilorum,** a splitting of the ends of the hairs.

scissure (*sish'-ūr*). Scissura.

Sclavo's serum (*sklah'-vo*). A serum used in the treatment of anthrax, it may be given hypodermically, intravenously, or by mouth; the average dose is 40 Cc.

sclera (*skle'-rah*) [*σκληρός*, hard]. The sclerotic coat of the eye; the firm, fibrous, outer membrane of the eyeball, continuous with the sheath of the optic nerve behind and with the cornea in front. **s. testis,** the tunica albuginea of the testis.

scleracne (*skle-rak'-ne*) [*σκληρός*, hard; *acne*]. Acne indurata.

scleradenitis (*skle-rad-en-i'-tis*) [*σκληρός*, hard; *ἀδήν*, a gland; *ῖτις*, inflammation]. See *adenosclerosis*.

scleral (*skle-ral'*) [*sclera*]. Pertaining to the sclera.

sclerangia (*skle-ran'-je-ah*) [*sclera*, *ἀγγεῖον*, a vessel]. 1. A sense of hardness yielded by a vessel. 2. See *angiosclerosis*.

scleratitis (*skle-rat-i'-tis*). Same as *scleritis*.

sclerectasia (*skle-rek-ta'-ze-ah*) [*sclera*; *ἔκτασις*, extension]. Localized bulging of the sclera.

sclerectoiridectomy (*skle-rek-to-ir-id-ek'-to-me*). Excision of a portion of the sclera and of the iris, for glaucoma.

sclerectomy (*skle-rek'-to-me*) [*sclero-*; *ἐκτομή*, excision]. 1. Excision of a portion of the sclera. 2. The excision of the sclerosed and ankylosed conductors of sound in chronic catarrhal otitis media.

scleredema (*skle-re-de'-mah*). See *sclerema œdematosum*.

sclerema (*skle-re'-mah*) [*sclera*]. Sclerosis, or hardening, especially of the skin. **S. adiposum,** a grave form of sclerema neonatorum marked by extreme hardness of the skin, atrophy, and adherence to the subcutaneous tissues. **s. adultorum,** see *morphea*. **s. cutis,** scleroderma. **s. neonatorum,** a disease of the newborn characterized by a hardening of the subcutaneous tissue, especially of the legs and feet, and probably dependent on a coagulation of the fat. **s. œdematosum,** a generally fatal form of sclerema neonatorum marked by edema of the skin with induration, impairment of muscular action, and subnormal temperature. Syn., *compact edema of infants*. **s., partial,** Schwimmer's name for scleroderma occurring in limited areas. Syn., *Sclérème en plaques*. **s. universale,** Schwimmer's name for scleroderma affecting at once the whole surface of the body, or from single areas of sclerosis of the skin gradually diffusing itself over the entire body. Syn., *Carcinus eburneus* (Alibert); *Cutis tensa chronica* (Fuchs); *Elephantiasis sclerosa* (Rasmussen); *Sclerosis cutis* (Wilson).

scleremia, scleremus (*skle-re'-me-ah -mus*) Same as *sclerema*

sclerencephalia (*skle ren-sef-a'-le-ah*) [σκληρός, hard, ἐγκέφαλος, brain] Sclerosis of brain-tissue

sclerenchyma (*skle ren' ki mah*) [*sclera*, ἐγχέω, pour in] 1 Sclerosed 2 The hard fibrous woody tissue or covering of plants

sclererythrin (*skle rer'-ith-rin*) [σκληρός hard, ἐρύθρος red] A red substance obtained from ergot

scleriasis (*skle ri'-as-is*) [*sclera*] Scleroderma

sclerin (*skle'-rin*) Rhinosclerin

scleriritomy (*skle-rir-it'-o-me*) [σκληρός, hard, sclera, τομή, a cutting] Incision of the conjunctiva sclera and iris followed by excision of a piece of the iris and anterior capsule, in staphyloma of the cornea and secondary glaucoma

scleritic (*skle-rit' ik*) [σκληρός, hard] Sclerous

scleritis (*skle-ri' tis*) [*sclera*, ῖτις, inflammation] Inflammation of the sclerotic coat of the eye It may exist alone (simple scleritis or episcleritis) or involve the cornea iris, or choroid

sclero- (*skle ro-*) [σκληρός, hard] 1 A prefix meaning hard 2 A prefix denoting connection with the sclera

scleroblastema (*skle-ro-blas-te'-mah*) [*sclero-*, βλάστημα, sprout] Embryonic tissue from which bones are formed

sclerocataracta (*skle ro kat-ar ak' tah*) [*sclero*, κατ αράκτης cataract] A hard cataract

sclerochoroiditis (*skle-ro-ko-roid-i'-tis*) [*sclero-, choroiditis*] Inflammation of the choroid and the sclerotic coat of the eye

scleroconjunctival (*skle ro kon jungk ti' val*) [*sclero, conjunctiva*, conjunctiva] Pertaining conjointly to the sclerotic coat of the eye and the conjunctiva

scleroconjunctivitis (*skle-ro-kon junk-ti vi' tis*) Simultaneous conjunctivitis and scleritis

sclerocornea (*skle-ro kor'-ne-ah*) The sclera and cornea regarded as one

sclerocorneal (*skle-ro-kor'-ne-al*) [*sclero, cornea*] Pertaining conjointly to the sclerotic coat and the cornea of the eye

sclerocyclotomy (*skle ro si-klot'-o-me*) [*sclero-*, κύκλος, a circle, τομή a cutting] Hancock's operation of division of the ciliary muscle

sclerodactylia, sclerodactyly (*skle-ro-dak-til'-e-ah, skle-ro-dak' til e*) [*sclero-*, δάκτυλος, finger] A disease of the fingers (or toes) allied to scleroderma It is usually symmetrical, occurs chiefly in women and leads to marked deformity

scleroderma (*skle ro-der'-mah*) [*sclero-*, δερμα, skin] A disease characterized by a progressive induration of the skin, occurring either in circumscribed patches (see *morphea*) or diffusely The skin becomes hard, pigmented, and firmly attached to the underlying tissues, destructive changes may also occur, and joints may become immobile from adhesions of the skin The cause is unknown **s. circumscribed.** See *morphea* **s. neonatorum.** See *sclerema neonatorum* **s oedematosa.** See *sclerema œdematosum*

sclerodermatitis (*skle-ro-der-mat-i' tis*) [*sclero-*, δέρμα, skin, ῖτις, inflammation] Inflammatory thickening and hardening of the skin

sclerodermatous (*skle ro-der'-mat-us*) [*sclero-*, δέρμα, skin] Having a hard outer covering

sclerodermitis (*skle-ro-der-mi'-tis*). Sclerodermatitis

sclerogenous (*skle-roj'-en-us*) [*sclero-*, γεννᾶν, to beget] Producing a hard substance

sclerogeny (*skle-roj'-en-e*) [see *sclerogenous*] The formation of sclerous tissue

scleroid (*skle'-roid*) [σκληρός, hard, εἶδος, form]. Hard or bony in texture

scleroiritis (*skle-ro-i-ri'-tis*) [*sclero-*; ἶρις, iris; ῖτις, inflammation] Inflammation of the sclera and the iris

sclerokeratitis (*skle-ro-ker-at-i'-tis*) [*sclero-*; *keratitis*] Inflammation of the sclera and cornea.

sclerokeratoiritis (*skle ro-ker-at-o-i-ri'-tis*) Combined inflammation of the sclera, cornea, and iris

scleroma (*skle-ro'-mah*) [*sclero-*, ὄμα, tumor]. Abnormal hardness or induration of a part **s. adultorum.** Synonym of *scleroderma* **s respiratory,** rhinoscleroma

scleromatocystis (*skle-rom'-at-o-sist is*) [*sclero ; κύστις*, a bladder] Induration of a cyst, but especially of the gall bladder or urinary bladder.

scleromeninx (*skle ro-me'-ninks*) [*sclero*, μήνιγξ, membrane] The dura mater

scleromere (*skle'-ro-mēr*) [*sclero*, μέρος, a part]. Any metamere or segment of the skeleton, such as a primitive vertebra

sclerometer (*skle-rom'-et-er*) [*sclero-*, μέτρον, a measure] A device for determining hardness

scleromucin (*skle-ro mū'-sin*) [*sclero, mucus*] A gummy substance obtained from ergot, and considered one of its active principles

scleronychia (*skle ro-nik'-e ah*) [*sclero-*, ὄνυξ nail]. Induration and thickening of the nails

scleronyxis (*skle-ron-ik'-sis*) [*sclero-*, νύξις, a pricking] Puncture of the sclera

sclero-öophoritis (*skle-ro o-o-for-i' tis*) [*sclero*, ᾠόν egg, φορός bearing, ῖτις, inflammation]. Sclerosis of the ovary

sclero-oothecitis (*skle-ro o o thes i'-tis*) Sclero-oöphoritis

sclerophthalmia (*skle-roff thal'-me ah*) [*sclero-*; ὀφθάλμος, eye] Xerophthalmia

scleroproteins (*skle-ro-pro'-te ins*) Albuminoids, a class of proteins insoluble in all neutral solvents The chief members are keratin, elastin, collagen, reticulin, spongin, and fibroin

sclerosal (*skle-ro'-sal*) [σκληρός, hard] Of the nature of sclerosis

sclerosarcoma (*skle-ro-sar-ko'-mah*) [*sclero*, *sarcoma*] A hard, fleshy tumor See *epulis*

sclerose (*skle'-rōz*) [σκληρός, hard] To affect with sclerosis, to become affected with sclerosis

sclerosed (*skle' rōzd*) [*sclerosis*] Affected with sclerosis, hardened

sclérose en plaques (*skla rohz' ahn plahk*) Synonym of *sclerosis multiple*

sclerosing phlebitis (*skle-ro'-zing, fle-bi'-tis*) [*sclerosis*, φλεψ, vein, ῖτις, inflammation] Hardening of the veins

sclerosis (*skle-ro' sis*) [σκληρός, hard] Hardening, especially a hardening of a part from an overgrowth of fibrous tissue, applied particularly to hardening of the nervous system from atrophy or degeneration of the nerve-elements and hyperplasia of the interstitial tissue, also to a chronic inflammation of the arteries characterized by thickening of their coats **s., amyotrophic lateral,** a combination of chronic anterior poliomyelitis with lateral sclerosis **s., annular** a chronic myelitis, in which the sclerosis extends about the cord like a ring **s., arterio-.** See *endarteritis* **s., atrophic,** sclerosis with atrophy **s., cerebrospinal.** See *s disseminated.* **s. combined,** simultaneous sclerosis of the posterior and the lateral columns

of the spinal cord. **s., corii.** Synonym of *scleroderma*. **s. dermatis.** Synonym of *scleroderma*. **s., diffuse,** one extending through a large part of the brain and cord. **s., disseminated,** a form in which numerous sclerotic patches are scattered through the brain and cord. **s., focal,** one confined to a particular region of the brain or cord. **s., general,** a connective tissue hyperplasia affecting an entire organ. **s., initial,** the syphilitic chancre. **s., insular.** See *s., multiple*. **s., lateral.** See *lateral sclerosis*. **s. lobar,** sclerosis of a lobe of the brain. **s. of the lung.** Synonym of *pneumonia, interstitial*. **s. of middle ear,** v. Troeltsch's name for otitis media hypertrophica. **s., miliary,** small sclerotic patches such as have been observed in the spinal cord in some cases of pernicious anemia. **s. multilocular.** See *sclerosis, disseminated*. **s., multiple,** chronic induration occurring in patches in different parts of the nervous system. The principal symptoms are muscular weakness and tremor upon essaying voluntary action. **s., multiple cerebral,** multiple sclerosis affecting only the brain. **s., multiple cerebrospinal,** multiple sclerosis affecting both the brain and the spinal cord. **s., neural,** sclerosis attended by chronic neuritis. **s. ossium.** Synonym of *ostitis, condensing*. **s., posterior spinal,** locomotor ataxia; tabes dorsalis, *q. v* **s., posterolateral.** See *Friedreich's ataxia*. **s., progressive muscular.** Synonym of *pseudohypertrophic muscular paralysis*. **s., renal.** Synonym of *nephritis, interstitial*. **s., syphilitic, arterio-,** the arterial sclerosis due to syphilis It affects chiefly the intima, but also the adventitia **s. telæ cellularis et adiposæ,** scleroderma. **s. testis,** sarcocele. **s., tuberous,** a form marked by hypertrophy and increased density of the involved areas. **s., ulcerating,** the primary lesion of syphilis; Hunterian or indurated chancre. **s., vascular,** sclerosis of the walls of blood-vessels; arteriosclerosis

scleroskeletal (*skle-ro-skel'-et-al*) [*sclero-*; σκελετόν, a dry body]. Pertaining to a scleroskeleton.

scleroskeleton (*skle-ro-skel'-et-on*) [*sclero-*; *skeleton*]. In biology, ossifications other than the bones of the main endoskeleton.

sclerostenosis (*skle-ro-sten-o'-sis*) [*sclero-*; *stenosis*]. 1. Sclerosis with stenosis. 2. *Scleroderma*. **s. cutanea,** scleroderma

sclerosteous (*skle-ros'-te-us*) [*sclero-*; ὀστέον, bone]. A bony formation resulting from osseous deposit in a tendon.

Sclerostoma (*skle-ros'-to-mah*) [σκληρός, hard; στόμα, mouth]. A genus of nematoid worms. **S. duodenale.** Same as *Ankylostoma duodenale*.

sclerostomy (*skle-ros'-to-me*) [*sclero-*; στόμα, mouth]. Making an artificial opening in the sclera for the relief of glaucoma.

Scleroth's cure (*skla'-rōt*). The treatment of pleuritic effusions by diet, *i. e.*, the withdrawal of fluids for the purpose of causing absorption of the effusion.

sclerothrix (*skle'-ro-thriks*) [*sclero-*; θρίξ, hair]. 1. Abnormal hardness of the hair. 2. Of Metchnikoff, a genus of *Mycobacteriaceæ* included in *Mycobacterium*, Lehmann and Neumann.

sclerotic (*skle-rot'-ik*) [*sclera*]. 1. Hard; indurated. 2. Pertaining to the outer coat of the eye. 3. Related to or derived from ergot. **s. coat.** See *sclera*.

sclerotica (*skle-rot'-ik-a*). See *sclera*.

scleroticectomy (*skle-rot-ik-ek'-to-me*) [*sclero-*; ἐκτόμη, excision]. The removal of a part of the sclera.

scleroticochoroiditis (*skle-rot-ik-o-ko-roid-i'-tis*). See *sclerochoroiditis*

scleroticonyxis (*skle-rot-ik-on-ik'-sis*). See *scleronyxis*.

scleroticopuncture (*skle-rot-ik-o-punk'-tūr*). Same as scleronyxis, *q. v.*

scleroticotomy (*skle-rot-ik-ot'-o-me*) [*sclero-*; τομή, a cutting]. Incision of the sclerotic.

sclerotidectomy (*skle-rot-id-ek'-to-me*). See *scleronyxis*.

sclerotis (*skle-ro'-tis*) [σκληρός, hard]. The ergot of rye, *q. v.*

sclerotitic (*skle-ro-tit'-ik*) [*sclero-*; ιτις, inflammation]. Affected with sclerotitis.

sclerotitis (*skle-ro-ti'-tis*). See *scleritis*.

sclerotium (*skle-ro'-she-um*) [*sclera*]. A thick mass of hyphæ constituting a resting-stage in the development of some fungi, as the ergot.

sclerotome (*skle'-ro-tōm*) [*sclero-*; τέμνειν, to cut]. 1. A knife used in sclerotomy. 2. A hard tissue separating successive myotomes in certain of the lower vertebrates. 3. The skeletal tissue of an embryonic metamere.

sclerotomy (*skle-rot'-o-me*) [see *sclerotome*]. The operation of incising the sclera **s., anterior,** the making of an incision through the sclera anterior to the ciliary body, and entering the anterior chamber, as is done in glaucoma. **s., posterior,** sclerotomy by an incision through the sclera behind the ciliary body, and entering the vitreous chamber.

sclerotonyxis (*skle-ro-to-niks'-is*) [*sclero-*; νύξις, a pricking]. An operation for cataract formerly practised, in which a broad needle was introduced into the sclera, behind the ciliary region, passed between the iris and the lens, and the latter depressed into the vitreous.

sclerotrichia (*skle-ro-trik'-e-ah*) [*sclero-*; θρίξ, hair]. A harsh and dry state of the hair.

sclerous (*skle'-rus*) [σκληρός, hard]. Hard; indurated.

sclerozone (*skle'-ro-zōn*) [*sclero-*; *zone*]. That portion of the surface of a bone giving attachment to the muscle derived from a given myotome.

sclopetarius (*sklo-pet-a'-re-us*) [L]. Relating to a gun. **sclopetaria vulnera,** gunshot wounds. Syn., *sclopetica vulnera*.

scobinate (*sko'-bin-āt*) [*scobus*, a file]. Having a rough surface.

scoleciasis (*sko-le-si'-as-is*) [*scolex*]. Infestation of the intestinal tract by scolices.

scoleciform (*sko-les'-if-orm*) [σκώληξ, a worm; *forma*, form]. Having the form or character of a scolex.

scolecitis (*sko-le-si'-tis*) [*scolex*; ιτις, inflammation] Appendicitis.

scolecoid (*sko'-le-koid*) [σκωληκοειδής, worm-like]. 1. Vermiform. 2. Resembling a scolex.

scolecoidectomy (*sko-le-koid-ek'-to-me*). Removal of the vermiform appendix.

scolecoiditis (*sko-le-koid-i'-tis*) [*scolex*; εἶδος, likeness; ιτις, inflammation]. Appendicitis.

scolecology (*sko-le-kol'-o-je*). See *helminthology*.

scolectomy (*sko-lek'-to-me*). Appendicectomy.

scolex (*sko'-leks*) [σκώληξ, a worm]. The head of a tape-worm, giving rise to the chain of proglottides.

scolices (*sko'-lis-ēz*). Plural of *scolex*.

scolicoiditis (*sko-le-koid-i'-tis*). Gerster's name for appendicitis.

scoliocoiditis (*sko-le-o-koid-ī'-tis*) Appendicitis
scoliolordosis (*sko-le-o-lor-do'-sis*) Combined scoliosis and lordosis
scolioma (*sko-le-o'-mah*) See *scoliosis*
scoliometer, scoliosometer (*sko le-om'-et er, sko-le-o-som'-et-er*) [σκολιός, bent, μετρον, measure]. An instrument for measuring the extent of a scoliosis.
scolioneirosis (*sko le-o-ni ro'-sis*) [σκολιός, bent, ὄνειρος, a dream] Oppressive, disagreeable dreaming
scoliorrhachitic, scoliorachitic (*sko-le-o-ra-kit'-ik*) [*scoliosis, rachitis*] Pertaining to or produced by scoliosis and rickets
scoliosiometry (*sko-le-o-se-om'-et-re*) [*scoliosis, μέτρον*, a measure] The estimation of the degree of deformity in scoliosis
scoliosis (*sko le-o'-sis*) [σκολιός, curved] A morbid lateral curvature of the spine **s, cicatricial,** scoliosis due to cicatricial contraction, such as occurs after costal necrosis **s, empyematic,** that due to empyema **s., habit,** scoliosis as a result of faulty posture **s, inflammatory,** scoliosis due to caries of the vertebræ **s., myopathic,** a form due to paresis of the muscles of the spine **s, osteopathic,** spinal curvature caused by disease of the vertebræ **s, paralytic,** the same as *s, myopathic* **s, rhachitic,** spinal curvature due to rhachitis **s, rheumatic,** temporary scoliosis caused by rheumatism of the muscles of the spine **s, sciatic,** scoliosis in sciatica with the convexity toward the affected side Frequently there is compensatory curvature higher up, and the leg is slightly flexed and supported on the toe **s, static,** scoliosis from inequality in the length of the legs
scoliosometer (*sko-le-os-om'-e-ter*) [σκολιός, curved, μέτρον, measure] An instrument for measuring the amount of deformity in scoliosis
scoliotic (*sko le-ot'-ik*) [*scoliosis*] Pertaining to or marked by scoliosis
scoliotone (*sko'-le-o-tōn*) [*scoliosis*, τονος a stretching] An apparatus for elongating the spine and lessening the rotation in lateral curvature
scolopsia (*sko lop'-se-ah*) [σκόλοψ, anything pointed] A suture between two bones having reciprocal movement
scombrin (*skom'-brin*) [*Scomber*, a genus of fishes] A protamine obtained from mature spermatozoa of mackerel
scombron (*skom'-bron*) Bang's name for a histon obtained from immature spermatozoa of mackerel
scoop [AS, *skopa*] An instrument resembling a spoon, for the extraction of bodies from cavities, as an *ear-scoop, lithotomy scoop*
scooper's pneumonia. Chronic pneumonia in grain-scoopers from exposure to cold and dust.
scoparin (*sko'-par-in*) See under *scoparius*
scoparius (*sko-pa'-re-us*) [*scopa*, a broom] The *Cytisus scoparius*, a shrub of the order *Leguminosæ* The dried tops constitute the *scoparius* of the U S P (*scoparii cacumina*, B P); they contain the alkaloid *sparteine*, $C_{15}H_{26}N_2$, and a neutral principle, *scoparin*, $C_{21}H_{22}O_{10}$. Scoparius is diuretic and cathartic, these actions probably depending upon scoparin Dose of the *fluidextract* 20–40 min (1 3–2 6 Cc) For properties of sparteine, see *sparteine*
-scope (*skop*) [σκοπεῖν, to examine] A suffix, signifying to see or examine, usually forming a part of the name of some instrument
scopola (*sko'-po-lah*) [after Giovanni Antonio *Scopoli*, Italian naturalist and physician, 1723–1787] The dried rhizome of *Scopola carniolica*. Dose 1–3 gr (0 05–0 15 Gm) The rhizomes of *S. japonica* and *S carniolica* contain the alkaloid scopolamine or scopoleine A mydriatic
scopolamine, scopoleine (*sko-pol'-am-ēn, sko-pol'-e-in*) The active principle of *Scopola carniolica*, $C_{17}H_{21}NO_4$, an alkaloid apparently identical with hyoscine, used with morphine in producing anesthesia by Schneiderlin's and Korff's method (see under *anesthetic, local*)
s. hydrobromide (*scopolaminæ hydrobromidum*, U S P), $C_{17}H_{21}NO_4HBr$, hygroscopic crystals, used as a mydriatic and sedative Externally in ophthalmology, $\frac{1}{10}$–$\frac{1}{4}$ % solution, subcutaneously for the insane, $\frac{1}{2}\frac{1}{100}$–$\frac{1}{8}\frac{1}{4}$ gr **s. narcophine anesthesia** Same as twilight sleep, *q v*
scopolia (*sko-po'-le-ah*) See *scopola*
scopomannit (*sko-po-man'-it*) Trade name of a solution of scopolamine hydrobromide with 10 % of mannite to prevent decomposition
scopometer (*sko-pom -et-er*) [σκοπεῖν, to view, μετρον, measure] An instrument for measuring the turbidity and concentration of solutions without disturbing the sample
scopometry (*sko-pom'-et-re*) [scopometer] A method of estimating the turbidity of solutions without disturbing the sample
scopomorphinism (*sko-po-mor'-fin-izm*) Associated chronic addiction to scopolamine and morphine.
scopophobia (*sko po fo'-be-ah*) [σκοπεῖν, to examine, φόβος, fear] Morbid dread of being seen
-scopy [σκοπεῖν, to examine] A suffix denoting inspection or examination
scoracratia (*sko rak ra'-she ah*) [σκῶρ, feces, ἀκρατία want of control] Involuntary evacuation of the bowels
scorbutic (*skor bu' tik*) [*scorbutus*] Pertaining to, affected with, or caused by scorbutus or scurvy.
s. cancer. Synonym for *cancrum oris*
scorbutus (*skor-bu' tus*) [L] See *scurvy* **s. alpinus.** See *pellagra* **s. nauticus.** See *scurvy* **s oris** See *cancrum oris*
scordinema (*skor-din-e'-mah*) See *pandiculation.*
scoretemia, scoretæmia (*skor-e-te'-me-ah*) See *scatemia.*
scotodinia (*skot-o-din'-e-ah*) [σκότος, darkness, δῖνος a whirl] Vertigo associated with the appearance of black spots before the eyes
scotogram (*skot' o gram*) [σκότος, darkness, γράφειν, to write] See *skiagram*
scotograph (*skot'-o-graf*) [σκότος, darkness, γράφειν, to write] 1 An instrument for aiding the blind to write 2 A Roentgen-ray See *rays, Roentgen-*
scotography (*skot-og'-raf-e*) Skiagraphy
scotoma (*skot-o'-mah*) [σκότωμα, darkness *pl*, *scotomata*] A dark spot in the visual field **s., absolute,** scotoma with perception of light entirely absent **s., annular.** See *s, ring.* **s., central,** one limited to the region of the visual field corresponding to the macula lutea. **s, color-,** color-blindness limited to a part of the visual field, and which may exist without interruption of the field for white light **s., flittering.** See *s scintillans* **s., negative,** a defect due to the destruction of the retinal center, and which is not noticeable to the patient **s, positive,** a scotoma perceptible to the patient as a dark spot before his eyes **s., relative,** a scotoma within which perception of light is only partially impaired **s., ring-,** a zone of scotoma surrounding the center of the visual field **s.**

scintillans, s., scintillating, a scotoma with serrated margins extending peripherally and producing a large defect in the visual field. Syn., *fortification-spectrum.*

scotomatous (*skot-o'-mat-us*). Pertaining to or affected with scotoma.

scotometer (*skot-om'-et-ur*) [σκότος, darkness; μέτρον, a measure]. 1. An instrument for detecting, locating, and measuring scotomata. 2. An instrument used in the detection of central scotomata.

scotoscopy (*skot-os'-ko-pe*) [σκοτός, darkness; σκοπεῖν, to inspect]. See *retinoscopy.*

scotosis (*skot-o'-sis*). See *scotoma.*

scototherapy (*skot-o-ther'-ap-e*) [σκότος, darkness; θεραπεία, therapy]. The treatment of malaria and other diseases by keeping the patient in a dark room and in the intervals between the attacks of the disease clothing him in garments impenetrable by light.

Scott's dressing, S.'s ointment. Compound mercury ointment. It is composed of mercury ointment 6, yellow wax 3, olive oil (by weight) 3, and camphor 1½ parts.

scourge (*skerj*) [ME., *scourge,* scourge]. 1. Any severe epidemic disease of a fatal character. 2. To strike the skin with light whips or with knotted cords in order to produce counter-irritation.

scouring (*skowr'-ing*) [ME., *scouren,* to scour]. Purging; also, diarrhea. **s. rush,** the stalks of *Equisetum hyemale.* Diuretic and astringent. Dose of fldext. ♏ xx–℥j. See *equisetum.*

scraper (*skra'-per*) [ME., *scrapien,* to scrape]. An instrument used to produce an abrasion. **s., tongue,** an instrument used to remove accumulations of exfoliated epithelium and other foreign material from the tongue.

scrattage (*skrat-ahzj*) [Fr.]. Ophthalmoxysis, the oldest method of mechanical treatment of trachoma, the scratching out of the granules; revived in 1890. Syn., *brassage.*

screatus (*skre-a'-tus*) [L.]. 1. A hawking. 2. A neurosis characterized by paroxysms of hawking.

screw-worm. The larva of the fly *Chrysomyia macellaria* It is found in tropical America where it may cause fatal results in man by burrowing into the nasal or aural cavities.

scrivener's palsy. See *writer's cramp.*

scrobiculate (*skro-bik'-ū-lat*) [*scrobiculus,* a little ditch or trench]. Pitted or grooved. Possessing minute or shallow depressions.

scrobiculus (*skro-bik'-ū-lus*) [L.]. A small pit. **s. cordis,** the depression at the epigastrium; the pit of the stomach. **s. variolæ,** a scar made by a smallpox pustule.

scrofula (*skrof'-ū-lah*) [*scrofa,* a sow]. A term formerly applied to a peculiar condition characterized by enlargement of the lymphatic glands and necrosis of the bones; it is at present considered a form of tuberculosis.

scrofulelcosis (*skrof-ū-lel-ko'-sis*) [*scrofula;* ἕλκωσις, ulceration]. Scrofulous ulceration.

scrofulide (*skrof'-ū-lid*). See *scrofuloderm.*

scrofulism (*skrof'-ū-lizm*). The scrofulous diathesis or condition.

scrofuloderm (*skrof'-ū-lo-derm*) [*scrofula;* δέρμα, the skin]. A disease of the skin due to scrofula, and generally characterized by superficial irregular ulcers with undermined edges. The cause is probably the tubercle bacillus.

scrofulome (*skrof'-ū-lōm*) [*scrofula;* ὄμα, tumor]. A tumor of a supposed scrofulous nature or origin.

scrofulonychia (*skrof-ū-lo-nik'-e-ah*) [*scrofula;* ὄνυξ, nail]. Onychia maligna.

scrofulophyma (*skrof-ū-lo-fi'-mah*) [*scrofula;* φυμά, growth]. Scrofuloderma tuberculosum. **s. diffusum,** elephantiasis scrofulosa.

scrofulosis (*skrof-ū-lo'-sis*) [*scrofula*]. The state characterized by the presence of scrofula; a scrofulous diathesis.

scrofulotuberculosis (*skrof-ū-lo-tū-ber-kū-lo'-sis*). Attenuated tuberculosis.

scrofulous (*skrof'-ū-lus*) [*scrofula*]. Having the nature of, affected with, or produced by scrofula.

scroll (*skrōl*) [ME., *scrolle*]. A roll of paper, or anything folded so as to resemble a roll. **s.-bone,** a turbinate bone. **s. ear,** an ear, the pinna of which is rolled forward. **s.s, olfactory,** the turbinate bones.

scrophularin (*skrof-ū-la'-rin*). A principle obtained by Walz from *Scrophularia nodosa.*

scrotal (*skro'-tal*) [*scrotum*]. Pertaining to or contained in the scrotum, as *scrotal* hernia.

scrotitis (*skro-ti'-tis*) [*scrotum;* ιτις, inflammation]. Inflammation of the scrotum.

scrotocele (*skro'-to-sēl*) [*scrotum;* κήλη, tumor]. Same as *scrotal hernia.*

scrotopexy (*skro'-to-peks-e*) [*scrotum;* πῆξις, a fixing in]. Longuet's term for the preservation of the scrotum which results from the extraserous transplantation of the testicle in cases of varicocele. Cf. *orchidopexy; vaginopexy.*

scrotum (*skro'-tum*) [L.]. The pouch containing the testicles, consisting of skin, dartos, spermatic fascia, cremasteric fascia, infundibuliform fascia, and parietal tunica vaginalis. **s. cardis,** the pericardium. **s., lymph,** dilatation of the scrotal lymphatics, elephantiasis of the scrotum.

scruff (*skruf*) [origin obscure]. A popular name for the nape, or back of the neck.

scrumpox (*skrum'-poks*). A name used in England among school-children for impetigo contagiosa.

scruple (*skroo'-pl*) [*scrupulus,* dim. of *scrupus,* a sharp stone]. In apothecaries' weight, 20 gr., represented by the sign ℈.

scrupulosity (*skroo-pū-los'-it-e*) [*scrupulosus,* exact]. An over-precision, or morbid conscientiousness as to one's thoughts, words, and deeds. It is somewhat common among insane persons of a certain type.

sculcopin (*skul'-ko-pin*). The proprietary name for a preparation of hydrastis and skull-cap, used as a local astringent.

Scultetus' bandage (*skul-te'-tus*) [Johann *Scultet,* German surgeon, 1595–1645]. A bandage used in compound fractures, so arranged that the short pieces of which it is composed may be removed without motion of the limb. **S.'s position,** lying on an inclined plane with the head low.

scurf (*skerf*) [AS.]. A bran-like desquamation of the epidermis, especially from the scalp; dandruff. **s.-skin,** the epidermis.

scurvy (*sker'-ve*) [*scurf*]. A disease observed among persons who have been deprived of proper food for a length of time; it is characterized by spongy gums, extravasations of blood beneath the skin, hemorrhages from the mucous membranes, fetor of the breath, and painful contractions of the muscles. It is most common among sailors living on salt meats. **s. of the Alps,** pellagra. **s.-grass,** *Cochlearia officinalis,* a plant of the order *Cruciferæ,* the properties of which reside in a volatile oil resembling oil of mustard. It is

used in scurvy and in chronic rheumatism **s., land-.** See *purpura hæmorrhagica*

scute (*skūt*) [*scutum*, a shield] A crescentic plate forming the outer wall of the attic

scutellaria (*skū tel-a'-re-ah*) [*scutellum*, a little shield] A genus of the *Labiatæ* The dried plant of *S lateriflora*, skullcap, is the scutellaria of the U S P , and is employed in neuralgia, chorea, delirium tremens and other nervous affections **s., fluidextract of** (*fluidextractum scutellariæ*, U S P) Dose 1–2 dr (4–8 Cc)

scutellarin (*skū-tel-ar'-in*) 1 An impure precipitate from an alcoholic tincture of scutellaria Dose 3–4 gr (0 2–0 26 Gm) 2 $C_{16}H_8O_8$ A nontoxic principle derived from the root of *Scutellaria lateriflora* forming flat yellow needles soluble in alcohol, ether or alkalies melting at 199° C It is used as a tonic and sedative in nervous diseases Dose $\frac{3}{4}$–4 gr (0 05 0 26 Gm)

scutiform (*skū' tif-orm*) [*scutum*, a shield] Shield-shaped **s. leaf**, the first-formed leaf or cotyledon in *Salvinia*, so named from its peculiar shape

scutular (*skū'-tū lar*) Pertaining to a scutulum

scutulate (*skū'-tu lat*) [*scutulum*] Shaped like a lozenge

scutulum (*skū' tū lum*) [dim of *scutum*, a shield] 1 Any one of the thin plates of the eruption of favus 2 The scapula

scutum (*skū' tum*) [*scutum* a shield, pl , *scuta*] 1 A shield-like plate of bone 2 The thyroid cartilage 3 The patella **s cordis**, the sternum **s genu**, the patella **s pectoris**, the thorax **s. thoracis**, the sternum **s tympanicum**, the semilunar plate or bone separating the attic of the tympanum from the outer mastoid cells

scybala (*sib'-al-ah*) Plural of *scybalum* (*q v*)

scybalous (*sib'-al-us*) [*scybalum*] Of the nature of a scybalum

scybalum (*sib'-al-um*) [*σκύβαλον*, fecal matter] A mass of abnormally hard fecal matter

scymnol (*sim'-nol*) [*Scymnus*, a genus of sharks], $C_{27}H_{46}O_3$ or $C_{32}H_{54}O_6$ An organic base obtained by Hammarsten from the bile of sharks

scyphoid (*si'-foid* or *ski'-foid*) [*σκυφος*, a drinking-cup] Cup shaped

Scythian disease (*sith'-e-an*) Atrophy of the male genital organs with loss of strength

scythrospasmus (*si-thro-spaz'-mus*) [*σκυθρός*, angry; *σπασμός*, spasm] A heavy or fatigued expression, regarded as an evil symptom in grave disease

scytitis (*si-ti'-tis*) [*σκῦτος*, skin, *ιτις*, inflammation] Inflammation of the skin, dermatitis

scytoblasta (*si-to-blas'-tah*) See *scytoblastema*

scytoblastema (*si to-blas-te'-mah*) [*σκῦτος*, skin, *βλάστημα*, germ] The primitive or embryonic stage of the development of the skin

scytoblastesis (*si-to blas-te'-sis*) [*σκῦτος*, skin, *βλάστημα*, germ] The condition and progress of scytoblastema

scytodephic, scytodepsic (*si-to-de'-fik, si-to-dep'-sik*) [*σκῦτος*, a hide, *δέψειν*, to soften] Relating to tannin, tannic

scytomorphosis (*si-to-mor-fo'-sis*) [*σκῦτος*, skin, *μόρφωσις*, shaping] An abnormal development of the skin

Se. Chemical symbol of selenium

seal (*sēl*) [ME , *seel*, seal] A body of water, or other material, placed in the trap of a house-drain for the purpose of preventing the ingress of sewer air

seal-fin deformity (*sēl-fin*) The fingers bent outwards, in rheumatoid arthritis

seam (*sēm*) See *suture* and *raphe*

seamstress's cramp. A painful cramp affecting the fingers of seamstresses, an occupation-neurosis analogous to writer s cramp

searcher (*serch'-er*) A sound used for the detection of stone in the bladder

sea-onion. See *squill*

sea-sickness A condition occurring in persons aboard ship produced by the rolling of the ship, and characterized by vertigo, nausea, retching, and prostration A similar state may be induced by riding in cars, elevators etc

sea-tangle See *laminaria*

seat-worm See *oxyuris*

sebaceofollicular (*se-ba-se-o fol ik'-ū-lar*) Relating to a sebaceous follicle

sebaceous (*se-ba'-shus*) [*sebum*, fat] Pertaining to sebum, secreting sebum **s. crypt**, *sebaceous gland* **s cyst**, a cystic tumor formed by occlusion of the duct of a sebaceous gland, with retention of the secretion, dilatation, and thickening of the wall of the gland It contains a grayish-white cheesy material **s glands, s. follicles,** compound saccular glands associated with the hair-follicles, and secreting a semifluid substance, the sebum, composed of oil-droplets and broken down epithelial cells

sebadilla (*seb-ad-il' ah*) See *sabadilla*

sebastomania (*se bas-to-ma' ne-ah*) [*σεβαστός*, revered, *μανία* madness] Religious insanity

sebiferous (*se-bif er-us*) [*sebum*, fat, *ferre* to bear], Same as *sebiparous*

Sebileau's sublingual hollow (*seb-il-o*) A pyramidal area with its base upward, extending along beneath the tongue, and formed by the oral mucosa and the sublingual glands, the apex below at the point where the mylohyoid muscle covers the geniohyoid

sebiparous (*seb ip'-ar us*) [*sebum parere* to produce] Secreting sebum

sebolith (*seb'-o lith*) [*sebum*, λίθος, a stone] A concretion in a sebaceous gland

seborrhagia (*seb-or-a'-je-ah*) See *seborrhea*

seborrhea, seborrhœa (*seb or e' ah*) [*sebum ῥοία*, a flow] A functional disease of the sebaceous glands, characterized by an excessive secretion of sebum, which collects upon the skin in the form of an oily coating or of crusts or scales **s. congestiva,** lupus erythematosus **s. capillitii,** **s. capitis,** seborrhea of the scalp **s. corporis,** seborrhea of the trunk **s. faciei,** seborrhea of the face **s. flavescens.** See *s nasi* **s. ichthyosis,** a variety characterized by the formation of large, plate-like crusts **s. nasi,** seborrhea of the sebaceous glands of the nose **s. nigra, s. nigricans,** seborrhea with the formation of dark-colored crusts, the coloration being usually from dirt **s. oleosa,** a form characterized by an excessive oiliness of the skin, especially about the forehead and nose **s. sicca,** the commonest form of seborrhea, characterized by greasy, brownish-gray scales

seborrheal (*seb-or-e'-al*). Pertaining to seborrhea

seborrheic, seborrhoic (*seb-or-e'-ik, seb-or-o'-ik*), 1 Affected with seborrhea 2. One suffering with seborrhea

sebum (*se'-bum*) [L]. 1. The secretion of the sebaceous glands 2 Suet, see also *sevum*. **s. palpebrale,** the dried glandular secretion of the eyelids **s. præputiale, s. præputii,** smegma præputii.

sec (*sek*) [Fr.]. Dry; said of bloodless surgical operations.

secacornin (*sek-ak-or'-nin*). A solution of the active principles of ergot in water, glycerin, and alcohol.

secale (*se-ka'-le*) [L.]. Rye. **s. cereale,** common rye. **s. cornutum.** See *ergot.*

secaline (*sek'-al-ēn*). An inert alkaloid found in ergot.

secalintoxin (*sek-a-lin-toks'-in*). A substance found in ergot, it is composed of secaline and sphacelotoxin.

secalose (*sek'-al-ōs*). A carbohydrate from green rye, soluble in water.

secernment, secerning (*se-sern'-ment, se-sern'-ing*) [*secernere,* to separate]. Secreting, applied to the function of a gland or a follicle.

Sechenoff's center (*sesh'-en-of*). See under *Setschenow.*

secohm (*sek'-ōm*) [*secundus,* following; *ohm*]. A unit of electric self-induction.

second intention. See under *healing.* **s. nerve,** the optic nerve. **s. sight.** See *clairvoyance.*

secondaries (*sek'-un-da-rēz*) [*secundus,* second). A name sometimes applied to the secondary symptoms of syphilis, in contradistinction from the primaries.

secondary (*sek'-un-da-re*) [*secundarius,* from *secundus,* second]. 1. Second in the order of time or development, as the *secondary* lesions of syphilis. 2 Second in relation, subordinate; produced by a cause considered primary. **s. amputation,** an amputation done after the subsidence of inflammatory symptoms. **s. cataract.** See *cataract, recurrent capsular.* **s. coil,** the coil of wire in which the induced current is generated. **s. degeneration** (of nerve-fibers), a degeneration following injury or disease of the trophic centers. **s. hemorrhage.** See *hemorrhage, secondary.*

secreta (*se-kre'-tah*) [*secernere,* to separate]. The substances secreted by a gland, follicle, or other organ; products of secretion.

secretagogue, secretagog (*se-kre'-tag-og*) [*secretion; ἀγωγός* leading]. 1. Stimulating the secretory function. 2. An agent which stimulates secretion

secrete (*se-krēt'*) [*secernere,* to separate]. To separate, specifically, to separate from the blood, or form out of materials furnished by the blood a certain substance termed secretion.

secretin (*se-kre'-tin*) [see *secrete*]. A hormone produced in the epithelial cells of the duodenum by the contact of acid. It is absorbed from the cells by the blood and excites the pancreas to activity; it also stimulates the secretion of bile.

secreting (*se-kre'-ting*) [*secernere,* to separate]. Effecting secretion. **s. fringes,** synovial fringes.

secretion (*se-kre'-shun*) [*secrete*]. 1. The act of secreting or forming from materials furnished by the blood a certain substance which is either eliminated from the body or used in carrying on special functions. 2. The substance secreted. **s. antilytis,** the saliva secreted by a submaxillary gland with intact nerves, as distinguished from that which flows from a gland which has had its nerves divided. **s., external,** a secretion thrown out upon the external or internal surface of the body. **s., internal,** a secretion that is not thrown out upon a surface, but is absorbed into the blood. **s., menstrual,** menstrual blood. **s., paralytic,** the abnormal discharge from a gland after section of its motor nerve. **s., sebaceous,** sebum.

secretodermatosis (*se-kre-to-der-mat-o'-sis*) [*secretio,* a secretion; *δέρμα,* skin; *νόσος,* disease]. An affection of the secretory apparatus of the skin.

secretogen (*se-kre'-to-jen*). Trade name of a preparation containing the active principles of the gastric and duodenal mucosa.

secretomotor (*se-kre'-to-mo'-tor*), [*secretio,* a secretion; *motor,* a mover]. Applied to nerves intermediating the function of secretion.

secretory (*se'-kre-to-re*) [*secretion*]. Pertaining to secretion; performing secretion. **s. capillaries,** minute canaliculi into which gland-cells discharge their secretion; they are simple or branched, sometimes anastomose, forming a network enveloping the gland-cell, and open individually or united in a single trunk into the lumen of the gland. They occur in the fundus glands of the stomach, where the capillary networks envelop the parietal cells, in the liver, and in other glands. **s. fibers,** centrifugal nerve-fibers exciting secretion.

sectarian (*sek-tār'-e-an*). "One who in the practice of medicine follows a dogma, tenet or principle based on the authority of its promulgator to the exclusion of demonstration and experience."

sectile (*sek'-til*) [*secare,* to cut]. Capable of being cut.

sectio (*sek'-she-o*) [L.]. See *section.* **s. abdominis.** See *celiotomy.* **s. agrippina,** cesarean section. **s. alta,** suprapubic cystotomy **s. cadaveris,** an autopsy. **s. cæsarea,** cesarean section. **s. franconiana,** suprapubic cystotomy. **s. lateralis,** lateral lithotomy **s. mariana, s. mediana,** median lithotomy. **s. nympharum,** nymphotomy.

section (*sek'-shun*) [*secare,* to cut]. 1 The act of cutting or dividing. 2. A cut; a cut surface. **s., abdominal.** See *celiotomy.* **s., cesarean.** See *cesarean section.* **s.-cutter,** a microtome. **s., frontal,** a section dividing the body into dorsal and ventral parts. **s., occipital,** a transverse section through the middle of the occipital lobe. **s., parietal,** a transverse vertical section through the ascending parietal convolution. **s., perineal,** external urethrotomy without a guide. **s.s, Pitres',** a series of sections through the brain for postmortem examination. **s., sagittal,** a section parallel with the sagittal suture, and hence with the median plane of the body, and serving to divide the body into equal parts. **s., Sigaultian,** symphyseotomy.

sector (*sek'-tor*) [*secare,* to cut]. An area of a circle included between two radii and an arc

secundigravida (*se-kun-de-grav'-id-ah*) [*secundus,* second; *gravidus,* pregnant]. A woman pregnant the second time.

secundina (*se-kun-di'-nah*) [*secundinus,* from *secundus,* second]. 1. Something following. 2. The afterbirth, generally used in plural *secundinæ;* see *secundines.* **s. cerebri,** the arachnoid and pia. **s. oculi,** the middle coat of the choroid. **s. uteri,** the chorion.

secundines (*sek'-un-dēnz*) [*secundus,* second]. The placenta, part of the umbilicus, and the membranes discharged from the uterus after the birth of the child.

secundipara (*se-kun-dip'-ar-ah*) [*secundus,* second; *parere,* to bring forth]. A woman who has borne two children (not twins).

secundiparity (*se-kun-dip-ar'-it-e*). The state of being a secundipara.

secundiparous (*se-kun-dip'-ar-us*). Having borne two children.

secundum artem (*se-kun'-dum ar'-tem*) [L , "according to art"] In the approved, professional, or official manner

sedans (*se'-danz*) [L pl , *sedantia*] Sedative; a sedative medicine.

sedatin (*sed'-at-in*) See *valeryl phenetidin*

sedatine (*sed'-at-ēn*) See *antipyrine*

sedation (*se-da'-shun*) [*sedare*, to soothe] 1 A state of lessened functional activity 2 The production of a state of lessened functional activity

sedative (*sed'-at-iv*) [see *sedation*] 1 Quieting or lessening functional activity 2 An agent lessening functional activity **s salt,** boric acid

sedeff (*sed'-ef*) Trade name of a preparation containing opium, bismuth, and digestive ferments

sedentaria (*sed-en ta'-re-ah*) [L , plural (neuter) of *sedentarius*, sedentary] **s. ossa,** the ischia and coccyx, the bones on which the body rests while in a sitting posture

sedentary (*sed'-en ta-re*) [*sedentarius, sedere*, to sit] Occupied in sitting, sitting at one s work Pertaining to the habit of sitting

sediment (*sed'-im-ent*) [*sedimentum*, from *sedere*, to sit] The material settling to the bottom of a liquid

sedimentation (*sed-im-en ta'-shun*) [*sediment*] The process of producing the deposition of a sediment especially the rapid deposition by means of a centrifugal machine **s test,** Widal s reaction

sedimentator (*sed i ment'-at-or*) A centrifugal apparatus for producing a rapid deposit of the sediment of urine

sedimentum (*sed im-en'-tum*) [L] Sediment, deposit **s lateritium,** brickdust deposit

Sedlitz (*sed'-litz*) See *Ssidlitz*

sedobrol (*sed'-o-brol*) Trade name of a bromine preparation, said to have a pleasant taste and to be free from sodium chloride

sedol (*sed'-ol*) A proprietary preparation containing morphine, scopolamine and sparteine, said to be analgesic and sedative

sedox (*se'-doks*) A proprietary preparation used as a dressing for wounds, etc

Seebeck-Holmgren's test. See *Holmgren s test*

seed (*sēd*) 1 A fertilized ovule or ovum, as the egg of the silkworm-moth 2 Seminal fluid, sperm or milt 3 Offspring **s -coat,** the testa or exterior coat of the seed **s.-lac** See *lac*

Seegen's dietetic regimen. A regimen for diabetics, consisting of meats of all kinds, eggs, corn, vegetables, cheese, and gluten bread

seehear (*se'-hēr*) Of W Rollins, a stethoscope fitted with a sound chamber and fluorescent screen by means of which the heart and lungs are rendered both visible and audible

Seeligmueller's sign (*za' lik-mū ler*) [Otto Ludwig Adolf *Seeligmueller*, German neurologist, 1837–1912] Mydriasis on the affected side in cases of neuralgia

see-saw eczema. A form of eczema alternating with some other disease

Seessel's pocket (*za'-sel*) [A *Seessel*, German embryologist] A slight depression in the epithelial lining of the pharyngeal membrane of the embryo, behind Rathke s hypophyseal pouch

segestor (*se-jes'-tor*) [*se*, self, *gerere*, to carry] A proprietary embalming fluid, introduced into the vessels of the cadaver by a syringe, so-called because it has the alleged property of finding its way to all parts of the dead organism

Séglas' type of paranoia (*sa-glah'*) [Jules *Séglas*, French physician, 1856–] Psychomotor type of paranoia

segment (*seg'-ment*) [*segmentum*, from *secare*, to cut]. 1 A small piece cut from the periphery of anything, a part bounded by a natural or imaginary line 2 A natural division, resulting from segmentation, one of a series of homologous parts, as a myotome, the part of a limb between two consecutive joints A subdivision, ring, lobe, somite, or metamere of any cleft or articulated body **s. of Bandl.** See *Bandl's ring* **s., interannular,** the portion of a nerve included between two consecutive nodes of Ranvier **s., intermediate** (*of a cilium*), the isotropous, delicately striated portion of a cilium between the cilium proper and its pedicle **s , lower** (*of the uterus*), all that portion of the uterus situated below the ring of Bandl **s.s, medullary,** the incisures of Schmidt and Lantermann, or oblique markings in the medullary sheath of a nerve fiber **s , primitive,** Minot s word for a primitive division of the vertebrate celom **s., pubic** (*of the pelvic floor*), this "consists of what extends from the symphysis pubis to the anterior vaginal wall, inclusive of the latter, and is chiefly made up of bladder " (D B Hart) **s., Rivinian** (*of the tympanic ring*), that portion of the temporal bone between the two points of attachment of its tympanic portion to its squamous portion **s , sacral** (*of the pelvic floor*), that portion which ' extends from the sacrum to the posterior vaginal wall " (D B Hart) **s., Schmidt-Lantermann's,** the elongated pieces making up the medullary substance of nerve-fibers several pieces being included within each internode **s. vertebra.** 1 See *somatome* 2 The cusps of the heart-valves

segmental (*seg-men' tal*) [*segment*] 1 Pertaining to a segment, made up of segments 2 Undergoing or resulting from segmentation **s duct,** the duct of the pronephron **s organs,** a tubular structure found in the embryos of amniotic animals, and comprising the pronephron, the mesonephron, and the metanephron

segmentation (*seg-men-ta'-shun*) [*segmentum*, a piece cut off] The process of cleavage or division In embryology, the term is restricted by usage ' to the production of cells up to the period of development when the two primitive germ layers are clearly differentiated and the first trace of organs is beginning to appear ' (Minot) Merogenesis **s -cavity,** the central space in the blastula stage of the segmentation of an ovum **s -cells,** homogeneous indifferent cells formed by the repeated division of the fecundated egg-cell, and which compose first of all the solid mulberry germ (Haeckel) **s , centro-lecithal,** a form of segmentation in which the spheres enclose a central nutritive yolk **s., complete,** holoblastic segmentation **s direct,** amitosis, or direct cell-division **s , discoidal,** a form of segmentation in which the germinal disc alone is involved **s., duplicative,** segmentation peculiar to the gonococcus, marked by an interval between the two segments **s., free,** cleavage of gymnoplasts **s., germ,** segmentation of the impregnated ovum, or of the first embryonic segmentation-sphere, or blastosphere **s., holoblastic,** segmentation in which all the contents of the ovum undergo cleavage **s., incomplete, s., meroblastic,** segmentation in which only a portion of the contents of the ovum, the formative yolk, undergoes cleavage

the other portion, or food-yolk, being a reserve store of food for the developing embryo. **s., metameric,** division of the embryo into metameres **s.-nucleus.** See under *nucleus.* **s., partial.** See *s., incomplete.* **s., protovertebral,** division of the mesoblast on each side of the notochord into somites, or protovertebræ. **s., regular,** segmetation in which the spheres are equal in size and symmetrically arranged. **s.-sphere,** one of the cells of an ovum during the early stages of segmentation. **s., total.** See *s., holoblastic.* **s., unequal,** segmentation, in which, after cleavage of the ovum into four equal segments, the spheres of one pole are smaller and more numerous than those of the other

segregation (*seg-re-ga'-shun*) [*segregare,* to separate). Separation of unlike genes at miosis.

segregator (*seg'-re-ga-tor*) [*segregare,* to separate]. An instrument by means of which urine from each kidney may be secured without danger of admixture.

Seguin's signal symptom [Edouard *Seguin,* French alienist, 1812–1880] The initial convulsion of an attack of Jacksonian epilepsy, which indicates the seat of the cortical lesion.

seiage (*sa'-ahzh*) [Fr.]. In massage, a pressing with a to-and-fro movement, similar to the action of a saw. It is practised with either the ulnar border, or the palmar side of the hand.

Seidel's reaction for inosite (*si'-del*). Evaporate to dryness a little of the substance in a platinum crucible with nitric acid of specific gravity 1 1–1.2, and treat the residue with ammonia and a few drops of a solution of strontium acetate. If inosite is present, a green color and a violet precipitate are obtained.

Seidlitz powder (*sed'-litz*). Pulvis effervescens compositus.

Seignette salt (*sān-yet'*) [Pierre *Seignette,* French apothecary, 1660–1719]. Rochelle salt; potassium and sodium tartrate

Seiler's cartilage (*si'-ler*) A small cartilaginous rod attached to the vocal process of the arytenoid cartilage. It is more developed in the female than in the male

seisesthesia (*si-zes-the'-ze-ah*) [σεῖσις, a concussion; αἴσθησις, sensation]. Perception of concussion.

seismotherapy (*sīs-mo-ther'-ap-e*) [σεισμός, a shaking; θεραπεία, therapy]. The therapeutic use of mechanical vibration; vibrotherapeutics. Syn , *shaking cure*

seizure (*sēz'-ūr*) [ME., *seisen,* to seize]. The sudden onset of a disease or an attack. In surgery, the grasping of a part to be operated upon.

sejunction (*se-junk'-shun*) [*sejungere,* to disunite]. In psychology the interruption of the continuity of association-complexes, tending to break up personality.

sel [Fr.]. Salt. **s. alembroth,** a solution of mercuric chloride and ammonium chloride, each gr. x, in one pint of distilled water. **s. amarum, s. amer,** magnesium sulphate. **s. ammonia, s. ammoniac, s. ammoniacum,** ammonium chloride. **s. ammoniac martial,** ammonia-chloride of iron. **s. de Chrestien,** gold and sodium chloride. **s. commune, s. culinare,** sodium chloride. **s. digestif,** potassium chloride. **s. digestif de Vichy,** sodium bicarbonate. **s. d'-Epsom,** magnesium sulphate. **s. de Figuier.** See *s. de Chrestien.* **s. de Glauber,** sodium sulphate. **s. de Perse,** sodium borate. **s. de saturne,** lead acetate. **s. secret de Glauber,** ammonium sulphate. **s. de Seidlitz,** magnesium sulphate. **s. de Seignette,** potassium and sodium tartrate. **s. de soude,** sodium carbonate. **s. vegetale,** potassium tartrate.

selection (*se-lek'-shun*) [*seligere,* to choose]. The act of choosing. **s., artificial,** the artificial choice, definitely planned, of such forms of animals or plants as will by differentiation develop and produce given or desired characteristics. **s., natural,** the selective action of external conditions, whereby characters favorable to the species of animal or plant are preserved. **s., physiological,** the selection of those varieties, the individuals of which are fertile among themselves, but sterile or less fertile with other varieties and with the parent stock. **s., sexual,** the selection produced by preferences of the one sex for a member of the other sex in some way specially endowed.

selector (*se-lek'-tor*) [*selection*]. A device for selecting or separating. **s., cell-,** an appliance for regulating the current strength in galvanic electricity. A good selector must admit of an increase or a decrease of electromotive force through the introduction of one cell at a time; it must permit of such increase or decrease without producing any interruption in the flow of the current. All selectors are constructed upon one of three principles· the crank, the rider, or the plug system.

selene (*se-le'-ne*) [σελήνη, moon] The white spot sometimes occurring on the finger-nails. Cf. *lunula.*

seleniasis (*sel-en-i'-as-is*) [σελήνη, moon] Lunacy, epilepsy; somnambulism.

seleniate (*sel-en'-e-āt*) A salt of selenic acid.

selenic (*se-len'-ik*) [*selenium*]. A compound containing selenium combined directly with three atoms of oxygen. **s. acid,** H_2SeO_4, a dibasic acid resembling sulphuric acid in its properties.

seleniferous (*sel-en-if'-er-us*) [*selenium, ferre,* to bear] Containing selenium

selenin B (*sel'-en-in*) [*selenium*] The active toxic element in cultures of *Diplococcus semilunaris.*

seleniol (*sel-e'-ne-ol*). An electrolytic colloid of selenium.

selenite (*se'-len-īt*) [*selenium*]. 1 A salt of selenous acid. 2. A translucent form of calcium sulphate.

selenitic (*se-len-it' ik*). Containing selenite

selenium (*se-le'-ne-um*) [σελήνη, the moon]. Se = 79 2 usually bivalent, sometimes quadrivalent or hexivalent. A rare element resembling sulphur in its properties.

selenogamia (*sel-en-o-gam'-e-ah*) [σελήνη, the moon; γαμός, marriage]. Somnambulism.

selenoplegia (*sel-e-no-ple'-je-ah*) [σελήνη, moon; πλῆγή, stroke]. A kind of apoplexy said to be caused by exposure to the moon's rays.

selenoplexia (*sel-e-no-pleks'-e-ah*). See *selenoplegia.*

selenopyrine (*sel-en-o-pi'-rin*). A reaction product of potassium selenide with a so-called antipyrine chloride.

self. Same; identical; own; personal. **s.-abuse.** See *masturbation.* **s.-differentiation,** the theory that cells control themselves; that is to say, the fate of the cells is determined by forces situated within them, and not by external influences. **s.-digestion.** See *autodigestion.* **s.-fertilization,** fertilization of a flower by its own pollen. **s.-heal,** *Prunella vulgaris;* heal all; a perennial herb growing in North America, Europe, and Asia. **s.-incasement,** a condition in which the small intestine is inclosed, as in a pouch,

between the layers of the mesentery **s.-infection,** the spread of infectious material from a circumscribed area to others or to the entire organism **s.-inflation,** a process by which a person in danger of drowning may render himself buoyant After having made a puncture in the mucous membrane of the mouth, at the reflection of the cheek from the lower jaw, air is forced into the subcutaneous tissue of the neck by vigorous blowing efforts with the mouth and nose closed **s -limited,** a term applied to certain diseases, which even without treatment run a definite course within a given time **s -pollution.** See *masturbation* **s.-repositor, pneumatic,** a curved and bulbous glass tube used at bed time for the reposition of the displaced uterus, the instrument being used by the patient, and operated by air pressure **s.-suggestion.** See *autosuggestion* **s - uspension,** suspension of the body for the purpose of stretching or making extension on the vertebral column see *suspension* **s s, axillo-cephalic,** suspension by the axillæ and the head **s s, cephalic,** suspension by the head

sella (*sel'-ah*) [L] A saddle **s. turcica,** the pituitary fossa of the sphenoid bone lodging the pituitary body

sellanders, sellenders (*sel' an-derz sel' en derz*) [origin obscure] A kind of eczema occurring on the tarsus of the horse See *mallenders*

Selters, Seltzer water (*sel' ters, selts' er*) An effervescent mineral water obtained at Selters in Prussia

semeiography (*sem-i-og'-ra fe*) [σημεῖον sign, γράφειν to write] Symptomatology

semeiology (*sem i ol'-o-je*) [σημεῖον sign λόγος, discourse] Symptomatology

semeiotic (*sem-i-ot' ik*) [σημεῖον, sign] Pertaining to symptoms

semeiotics (*sem-i-ot'-iks*) [see *semeiotic*] Symptomatology

semelincident (*sem-el-in' sid-ent*) [*semel,* once, *incidere* to happen] Happening only once in the same person, as a *semelincident* disease

semen (*se' men*) 1 A seed 2 The fecundating fluid of the male, chiefly secreted by the testicles composed of liquor seminis, seminal granules, oil-globules, and spermatozoa **s contra,** worm seed

semenuria See *seminuria*

semester (*se mes' ter*) [*semestris* half yearly *sex* six, *mensis,* month] A period of six months

semi- (*sem i-*) [L] A prefix denoting half

semiarticulate (*sem-e-ar-tik'-u-lāt*) [*semi articulus,* a joint] Loose-jointed

semicanal (*sem e-kan al'*) [*semi , canal*] A canal open on one side, a sulcus or groove

semicanalis (*sem-e-kan-a'-lis*) See *semicanal* **s. humeri,** the bicipital groove **s. nervi vidiani,** the groove on the temporal bone for the passage of the Vidian nerve **s. tensor tympani,** a depression situated close to the hiatus of Fallopius in the anterior wall of the tympanum The tendon of the tensor tympani is transmitted through an aperture at its apex **s tubæ Eustachii.** See *sulcus tubæ Eustachii* **s tympanicus,** the tympanic canal

semicartilaginous (*sem-ik-ar til-aj'-in-us*) [*semi-, cartilago,* gristle] Gristly, partially cartilaginous

semicircular (*sem-e-sir'-kū-lar*) [*semi-, circulus,* a circle] Having the form of a half circle **s. canals** See under *ear*

semicoma (*sem-e-ko'-mah*) A condition of mild or partial coma

semiconscious (*sem-ik-on'-shus*) [*semi-; conscius,* knowing] Half-conscious, partially conscious

semicordate (*sem-e-kor'-dāt*) [*semi-; cor,* the heart] Shaped like the half of a heart that has been divided longitudinally

semicretin (*sem-e-kre'-tin*) [*semi-; cretin*] A person having a form of cretinism in which the rudiments of language have been developed. Intellection reaches only to the most ordinary bodily wants

semicretinism (*sem-e-kre'-tin-izm*) The condition of being a semicretin

semicrista (*sem-e-kris'-tah*) An incomplete crest or ridge **s. incisiva,** the nasal crest

semidecussation (*sem-e-de-kus-a'-shun*) Partial decussation

semiflexion (*sem-e-flek'-shun*) [*semi-, flexion,* a flexion] A posture half-way between flexion and extension

semiglutin (*sem-e-gloo'-tin*), $C_{88}H_{88}N_{17}O_{22}$ A derivative of gelatin resembling a peptone

semilunar (*sem e-lu'-nar*) [*semi-, luna* moon] Resembling a half-moon in shape **s. bone,** one of the carpal bones **s cartilages,** two interarticulating cartilages of the knee **s. fold,** the conjunctival folding at the inner canthus **s. ganglia.** See *ganglia* **s. lobe,** a lobe on the upper surface of the cerebellum **s. notch,** a notch in the scapula through which the suprascapular nerve passes **s. space of Traube,** that portion of the left inferior anterior thoracic region corresponding to the tympanitic resonance of the stomach **s valves** See *valves.*

semilunare (*sem-e loo na'-re*) [L] Semilunar. The semilunar bone of the carpus

semiluxation (*sem-e-luks a'-shun*) [*semi-, luxus,* a luxation] Subluxation

semimembranosus (*sem e-mem-bra no' sus*) See *muscles, table of*

semimembranous (*sem-e mem'-bra-nus*) Partly membranous, as the *semimembranous* muscle (*semimembranosus*) See under *muscle*

seminal (*sem' in al*) [*semen*] Pertaining to the semen **s cyst,** a cyst of the spermatic cord or testicle containing semen **s. fluid,** semen (2). **s. vesicle.** See *vesicle, seminal*

seminalism (*sem'-in al-izm*) [*seminalis,* relating to seed, primary] A vitalistic theory proposed by Bouchet, of Paris, which teaches that the vital forces of man and beasts are totally distinct and that beasts have an intelligence of instinct and man one of abstraction

semination (*sem in-a'-shun*) [*seminatio* a sowing] The intromission of semen into the uterus or vagina

seminervosus (*sem-in er-vo'-sus*) See *semi tendinosus*

seminiferous (*sem-in-if'-er-us*) [*semen, ferre,* to carry] Producing or carrying semen, as the *seminiferous* tubules of the testicle

seminific (*sem-in-if'-ik*) [*semen,* semen, *facere,* to make] Producing semen

seminormal (*sem-i-nor'-mal*) [*semi-, norma,* rule] Half-normal **s. solution,** one containing in solution half the quantity of the substance contained in the normal solution

seminuria (*sem-in-u'-re-ah*) [*semen,* seed, *οὖρον,* urine] The discharge of semen in the urine

semiography. See *semeiography*

semiology (*se-me-ol'-o je*) See *semeiology*

semiotic (*se-me-ot'-ik*) See *semeiotic*

semiplegia (*sem-ip-le'-je-ah*) See *hemiplegia*

semipronation (*sem-ip-ro-na'-shun*) [*semi-; pronatus*, prone]. The assumption of a semiprone, or partly prone position; an attitude of semisupination.

semiprone (*sem'-ip-rōn*) [*semi-; pronus*, bent]. Half prone. **s. posture.** See *positions, table of.*

semiptosis (*sem-ip-to'-sis*) [*semi-; πτώσις*, a falling]. Partial ptosis.

Semiramidian operation (*sem-ir'-am-id'-e-an*) [*Semiramis*, mythical founder and queen of Assyria]. Castration.

semis (*se'-mis*) [L.]. Half; abbreviated in prescriptions to *ss*, which is placed after the sign indicating the measure.

semisideratio (*sem-is-id-er-a'-she-o*). Synonym of *hemiplegia.*

semisomnous (*sem-e-som'-nus*). Relating to a comatose condition.

semisomnus (*sem-e-som'-nus*) [*semi-; somnus*, sleep]. Coma.

semisoporus (*sem-e-so'-por-us*) [*semi-; sopor*, sleep]. Coma.

semispinalis (*sem-e-spi-na'-lis*). See under *muscle.*

semissis (*sem-is'-is*) [L.]. One-half. See *semis.*

semisulcus (*sem-e-sul'-kus*). A half sulcus which, uniting with another sulcus, forms a complete sulcus.

semisupination (*sem-is-ū-pin-a'-shun*) [*semi-; supinare*, to bend backward]. A position half-way between supination and pronation.

semitendinosus (*sem-it-en-din-o'-sus*). See *muscles, table of.*

semitendinous (*sem-e-ten'-din-us*). Partly tendinous, as a *semitendinous* muscle (*semitendinosus*). See under *muscle.*

semitertian (*sem-it-er'-shan*) [*semi-; tertius*, third]. Partly tertian and partly quotidian (applied to intermittent fevers).

semivalent (*sem-iv'-al-ent*) [*semi-; valere*, to be able]. Of one-half the normal valency.

Semon's law [Sir Felix *Semon*, English laryngologist, 1849–1921]. In progressive organic lesions of the motor laryngeal nerves, the cricoarytenoidei postici—the abductors of the vocal cords—are the first, and sometimes the only muscles affected. **S.'s symptom,** impaired mobility of the vocal cords in carcinoma of the larynx.

Semon-Rosenbach's law. See *Semon's law.*

sempules (*sem'-pūls*). Suppositories shaped like a dumb-bell. It is said that this shape renders them more easy of introduction, and also more liable to remain *in situ* until they are absorbed.

senalbin (*sen-al'-bin*), $C_{30}H_{44}N_2S_2O_{16}$. A glucoside found in white mustard, *Brassica alba.*

senecin (*sen'-es-in*). 1. An oleoresin from *Senecio gracilis* and *S. vulgaris;* it is emmenagogue, emetic, and astringent. 2. A proprietary elixir of *Senecio jacobæa*, recommended as an emmenagogue.

Senecio (*se-ne'-se-o*) [*senex*, an old man]. Groundsel, a genus of composite-flowered plants, said to contain 960 species, many of them medicinal. *S. aureus* is the common liferoot. *S. canicida*, yerba del Puebla, a Mexican species, is diuretic and is recommended in treatment of epilepsy. *S. cineraria* is a species of South America; the fresh juice of the leaves, stems, and flowers is recommended in treatment of capsular and lenticular cataracts and other diseases of the eye. *S. gracilis* is a slender species, generally regarded as a variety of *S. aureus. S. jacobæa*, ragwort or ragweed, is tonic and astringent.

senecionin (*sen-e'-se-o-nin*). A resinoid from *Senecio gracilis.*

senectus (*se-nek'-tus*) [*senex*, old]. Old age.

senega (*sen'-e-ga*) [L.]. The *Polygala senega*, a plant of the *Polygaleæ*. Its root is official (*senega*, U. S. P.; *senegæ radix*, B. P.); it contains a bitter principle, senegin or polygalic acid (or polygalin), which is probably identical with saponin. It is used as a stimulant, expectorant and diuretic; in large doses it is emetocathartic. It is chiefly employed in bronchitis and laryngitis, as a diuretic in dropsy, and in amenorrhea. Dose 10–20 gr. (0.65–1.3 Gm.); of the *infusion* 1 oz. (30 Cc.). **s., fluid-extract of** (*fluidextractum senegæ*, U. S. P.). Dose 10–20 min. (0.65–1.3 Cc.). **s., syrup of** (*syrupus senegæ*, U. S. P.). Dose 1–2 dr. (4–8 Cc.). **s., tincture of** (*tinctura senegæ*, B. P.). Dose 1 dr. (4 Cc.).

senegin (*sen'-e-jin*), $C_{32}H_{52}O_{17}$ (Hesse). Polygallic acid, a saponin-like glucoside from senega; it is a yellowish powder, soluble in water; used as an expectorant and diuretic. Dose ½–2 gr. (0.032–0.13 Gm.).

senescence (*se-nes'-ens*) [*senex*, old]. The condition or time of growing old. Senility.

seng. A proprietary digestant said to be derived from ginseng, *Aralia quinquefolia.*

senile (*se'-nil*) [*senilis;* from *senex*, old]. Pertaining to or caused by old age. **s. gangrene.** See *gangrene.*

senilis (*se-ni'-lis*) [L.]. Old; pertaining to old age.

senilism (*se'-ni-lizm*) [*senile*]. A condition of premature old age. See *progeria.* Cf. *ateleiosis; infantilism.*

senility (*sen-il'-it-e*) [*senile*]. The state of being senile; the weakness of body and mind characteristic of old age.

seniocine (*sen-i'-o-sin*). An alkaloid obtained from *Senecio vulgaris* and *S. jacobæa.*

senium (*se'-ne-um*). Infirmity of old age. **s. præcox,** premature senility.

senki. A disease resembling lepra and associated with colic; peculiar to Japan.

NICHOLAS SENN.

Senn's bone-plates [Nicholas *Senn*, American surgeon, 1844–1908] Plates of decalcified bone used in intestinal anastomosis **S's test**, the introduction of hydrogen gas into the bowel through the rectum, for the detection and localization of an abnormal opening

senna (*sen'-ah*) [Ar., *sena*] The leaflets of various species of *Cassia*, a genus of the order *Leguminosæ* *Senna* of the U S P is derived from *Cassia acutifolia*, that of the B P is of two varieties—*Alexandrian senna*, from *Cassia acutifolia*, and *East India* or *Tinnevelly senna*, from *Cassia angustifolia* *Deresinate senna* is that from which the resin has been removed by maceration in alcohol to prevent griping Senna contains cathartic acid, a glucoside representing the purgative properties of senna the bitter principles *sennapicrin* and *sennacrol*, and a coloring-matter, *chrysophan* Senna is used as a purgative, generally in combination with an aromatic to prevent griping Dose ½–2 dr (2–8 Cc) **s, compound infusion of** (*infusum sennæ compositum*, U S P), black draught contains senna, manna, and magnesium sulphate Dose 4 oz (128 Cc) **s, confection of** (*confectio sennæ*, U S P, B P) Dose 2 dr (8 Gm) **s, fluidextract of** (*fluidextractum sennæ*, U S P) Dose 1–4 dr (4–16 Cc) **s, syrup of** (*syrupus sennæ*, U S P, B P Dose 1–4 dr (4–16 Cc) **s, tincture of** (*tinctura sennæ*, B P) Dose 1–4 dr (4–16 Cc)

sennacrol (*sen'-ak-rol*) See under *senna*

sennapicrin (*sen-ap ik'-rin*) See under *senna*

sennatin (*sen'-at-in*) A preparation of senna leaves used as a cathartic, but administered by subcutaneous or intramuscular injection

sennax (*sen'-aks*) A purgative glucoside obtained from senna leaves

sennin (*sen' in*) [Nicholas *Senna* American surgeon, 1844–1908] A proprietary antiseptic preparation described as a chemically pure product of boric acid, iodine and phenol It is a fine, white powder, odorless, slightly astringent, and of sweetish taste

sennit (*sen'-it*), $C_{21}H_{44}N_{19}$ A nonfermentable sugar found in senna, occurring in soluble warty crystals Syn., *cathartomannite*

sensation (*sen-sa'-shun*) [*sensatio*, from *sentire*, to feel] A feeling or impression produced by the stimulation of an afferent nerve **s., correlative,** stimulation of the cerebrum by a sensation carried by a single sensory nerve **s., cutaneous,** a sensation produced through the medium of the skin **s., eccentric,** the conception of locality **s., external,** a sensation transmitted from a peripheral sense organ **s, general.** See *subjective sensation* **s, girdle,** girdle-pain **s, internal.** See *subjective sensation* **s, objective,** an external sensation due to some objective agency **s.s, psychovisual,** sensations of sight without the stimulation of the retina, visions **s., radiating.** See *s., secondary* (1) **s., secondary.** 1 Mueller's name for the excitement of one sensation by another or the extension of morbid sensations in disease to unaffected parts 2 A sensation of one type attending a sensation of another type. Cf *audition colorée* **s., special,** any sensation produced by the special senses **s, subjective.** See *subjective sensation* **s., tactile,** one produced through the sense of touch **s, transference of,** clairvoyance

sense (*sens*) [*sensus*, from *sentire*, to feel]. 1. Any one of the faculties by which stimuli from the external world or from within the body are received and transformed into sensations The faculties receiving impulses from the external world are the senses of sight, hearing, touch, smell, and taste, which are the special senses, and the muscular and temperature-sense. Those receiving impulses from the internal organs (visceral senses) are the hunger-sense, thirst-sense, and others 2 A sensation **s.-body,** a peripheral sense-organ **s.-capsule,** the hollow cup-like receptacle of a peripheral sense-organ **s.-club** See *rhopalium* **s.-epithelium,** a tract of epithelium having some specialized function of sensation **s.-filament,** the thread like peripheral termination of a sensory nerve **s, genesic,** the sexual instinct **s.-scale** See *squama rhopalaris* **s.-seta,** the bristle like termination of a peripheral sensory nerve fiber **s, seventh,** visceral sense **s.-shock,** a condition observed in hysterical women and overworked men, and occurring at the moment of waking from sleep A sensation like an aura rises from the feet or hands, and, passing upward to the head, disappears in the sense of a blow or shock, or of a bursting in the head It is of no serious significance **s, sixth,** muscular sense

sensibilin (*sen'-sib il in*) A specific antibody derived from sensibilisinogen, toxogenin

sensibilisinogen (*sen sib-il is-in'-o jen*) One of the substances in an antigen, it produces a specific antibody called sensibilisin

sensibility (*sen-sib il'-it e*) [see *sense*] 1 The ability to receive and feel impressions 2 The ability of a nerve or end-organ to receive and transmit impulses **s, organic,** the capability of transmitting and receiving impressions without being conscious of them (Bichat) **s., range of.** See *Fechner's law* **s, recurrent,** Longet's and Magendie's term for the sensibility observed in the anterior roots of the spinal nerves which appeared to be dependent on the posterior root, and not inherent, like the sensibility of the posterior root itself The existence of recurrent sensibility was denied by Longet **s, transference** or **externalization of** See *sensitivization*

sensibilizer (*sen'-sib il-i-zer*) [see *sense*] A substance which, acting as a chemical screen, conduces to synthesis or other chemical processes

sensible (*sen'-si-bl*) [*sense*, to feel] Perceptible by the senses, as *sensible* perspiration capable of receiving an impression through the senses, endowed with sensation

sensiferous (*sen-sif' er-us*) [*sensus*, sense, *ferre*, to bear] Conveying a sensation, or sense-impression

sensigenous (*sen-sij'-en-us*) [*sensus*, sense, *gignere*, to produce] Giving rise to a sensory impulse

sensimeter (*sen-sim'-et er*) An instrument for determining the sensitiveness of the skin

sensitive (*sen'-sit-iv*) [*sensitivus*] 1 Capable of feeling, capable of transmitting sensation 2 Reacting to a stimulus

sensitization (*sen-sit-i-za'-shun*) Rendering cells (by the action of a specific amboceptor) amenable to destruction by a complement

sensitized (*sen'-sit-izd*) Rendered sensitive

sensitizer (*sen-sit-i' zer*) Bordet's name (1899) for the intermediary body of Ehrlich Syn., *substance sensibilisatrice* See *amboceptor*

sensomobile (*sen-so mo'-bil*) [*sensus*, feeling, *mobilis*, movable] Moving by stimulation

sensomobility (*sen-so-mo-bil'-it-e*) The capacity for movement in response to a sensory stimulus

sensomotor (*sen-so-mo'-tor*). Sensorimotor.

sensoparalysis (*sen-so-par-al'-is-is*). Paralysis of a sensory nerve.

sensorial (*sen-so'-re-al*) [*sensorium*]. Pertaining to the sensorium.

sensoriglandular (*sen-so-re-gland'-ū-lar*). Causing glandular action by stimulation of the sensory nerves.

sensorimetabolism (*sen-so-re-met-ab'-ol-izm*). Metabolism resulting from stimulation of the sensory nerves.

sensorimotor (*sen-so-re-mo'-tor*) [*sensus*, feeling; *motor*]. Both sensory and motor; concerned with the perception of sensory impulses and with motor impulses. **s. centers,** centers that are concerned both with the perception of sensation and with motor impulses.

sensorimuscular (*sen-so-re-mus'-kū-lar*). Producing muscular action in response to stimulation of the sensory nerves.

sensorium (*sen-so'-re-um*) [L.]. Perceptorium. A center for sensations, especially the part of the brain which receives and combines the impressions conveyed to the individual sensory centers. **s. commune,** a portion of the cerebral cortex dominating the sensory impulses.

sensorivolitional (*sen-so-riv-o-lish'-un-al*) [*sensus*, sense; *volitio*, willing] Pertaining to or conferred in sensation and volition.

sensory (*sen'-so-re*) [*sensus*, feeling]. Pertaining to or conveying sensation. **s. aphasia.** See under *aphasia*. **s. aura,** an aura affecting the special senses. **s. crossway,** the posterior third of the posterior limb of the internal capsule, where the afferent fibers conveying sensory impulses cross to the opposite side. **s. decussation,** the superior pyramidal decussation. **s. epilepsy,** various disturbances of sensation occurring in paroxysms that replace the epileptic convulsion. **s. nerve,** one that conveys sensations from the periphery to the centers.

sensualism (*sen'-shoo-al-izm*) [*sensus*, sense]. The condition or character of one who is controlled by the animal passions.

sensus (*sen'-sus*) [L.]. Sense; feeling. **s. communis,** the state of the consciousness or sense of normal sensations at any one time.

sentient (*sen'-she-ent*) [*sentire*, to feel]. Having sensation; capable of feeling.

sentina (*sen-ti'-nah*) [L., "the hold of a ship"]. The epiphysis cerebri.

sentinal-pile. The thickened wall of the anal pocket at the lower end of an anal fissure.

sentisection (*sen-tis-ek'-shun*) [*sentire*, to feel; *sectio*, section]. Painful vivisection; vivisection of an animal not under the influence of anesthetics.

separator (*sep'-ar-a-tor*) [*separare*, to separate]. 1. Anything that separates, especially an instrument for separating the teeth. 2. An instrument for detaching the pericranium or periosteum. 3. An appliance for preventing the urine from the two ureters from mixing in the bladder.

separatorium (*sep-ar-a-to'-re-um*) [*separare*, to separate]. In pharmacy, a strainer. In surgery, an instrument for separating the pericranium from the skull.

sepedogenesis (*se-ped-o-jen'-e-sis*) [*sepedon*; *γενᾶν*, to produce]. Putrescence.

sepedon (*se'-ped-on*) [*σήπειν*, to be rotten]. Putridity.

sepia (*se'-pe-ah*) [*σήπια*, the cuttle fish]. 1. The ink or black secretion of the common cuttle-fish; used as a pigment. 2. See *sepiost*.

sepiost (*se'-pe-ost*) [*σήπια*, the cuttle-fish; *ὀστνοέ*, bone]. The endoskeleton of the cuttle-fish (*sepia*); cuttle-fish bone, sepium, is sometimes prescribed as an antacid and used in dentifrices.

sepium (*se'-pe-um*) [*σήπιον*, the bone of the cuttle-fish]. Same as *sepiost*.

sepsine (*sep'-sēn*) [*sepsis*]. A poisonous ptomaine obtained from decomposed yeast and blood.

sepsis (*sep'-sis*) [*σῆψις*, putrefaction]. A state of poisoning produced by the absorption of putrefactive substances. **s., gas,** a septic condition due to the gas bacillus, *Bacillus aerogenes capsulatus*. **s., puerperal,** sepsis occurring after childbirth, from absorption of putrefactive products from the parturient canal.

sepsometer (*sep-som'-et-ur*). See *septometer* (2).

septa (*sep'-tah*). Plural of *septum*.

septal (*sep'-tal*) [*septum*, septum]. Pertaining to a septum. **s. gland.** See under *gland*.

septan (*sep'-tan*) [*septem*, seven]. Recurring every seventh day, as *septan* fever.

septate (*sep'-tāt*) [*septum*, a fence]. Possessing septa or partitions.

septatome (*sep'-tat-ōm*) [*septum*; *τόμη*, incision]. An instrument for incising the nasal (or other) septum.

septectomy (*sep-tek'-to-me*) [*septum*; *ἐκτόμη*, excision]. Excision of part of the nasal septum.

septemia, septæmia, septhemia (*sep-te'-me-ah sep-the'-me-ah*). See *septicemia*.

septentrionaline (*sep-ten-tre-on'-al-ēn*). An alkaloid obtained from *Aconitum lycoctonum*. It is a sensory paralyzant, resembling curara; it has been suggested as a local and general anesthetic, and is used as an antidote to strychnine and in treatment of tetanus and hydrophobia.

septic (*sep'-tik*) [*sepsis*]. Relating to sepsis. Pertaining to or produced by putrefaction. **s. fever,** septicemia. **s. intoxication,** a form of poisoning resulting from the absorption of products of putrefaction. **s. tank,** in sewage treatment a large closed chamber through which the sewage is allowed to pass slowly. Cf. *contact-bed*.

septicemia, septicæmia (*sep-te-se'-me-ah*) [*sepsis*; *αἷμα*, blood]. An infection characterized by the presence in the blood of bacteria; clinically the term is also used to include toxemia, whether or not there is invasion of the blood by bacteria. **s., bacillar, of chickens,** a disease of chickens described by Fuhrmann as due to a specific bacillus belonging to the colon group. **s., goose,** a rapidly fatal disease of geese due to a specific microbe. The infection takes place by way of the mucosa of the head. **s., mouse,** a form of septicemia occurring in mice and produced by *Bacillus murisepticus*. It is usually fatal in from 40 to 60 hours, the animal early becoming apathetic. **s., phlebitic.** See *pyemia*. **s., rabbit,** a form of septicemia occurring in rabbits and due to *Bacillus septicæmiæ hæmorrhagicæ* or bacillus of chicken cholera. **s., sputum,** a form of septicemia produced by inoculation with microorganisms found in sputum, especially the pneumococcus.

septicemic, septicæmic (*sep-te-sem'-ik* or *sep-te-se'-mik*) [*septicemia*]. Pertaining to or affected with septicemia.

septicine (*sep'-tis-in*) [*septic*]. A ptomaine obtained from decaying flesh.

septicogenic (*sep-tik-o-jen'-ik*) [*septic*; *γενᾶν*, to produce]. Applied to a group of microorganisms established by Cohn producing ordinary putrefaction as distinguished from that which produces disease. Cf. *pathogenic*.

septicophlebitis (*sep-tik-o-fleb-i'-tis*). Phlebitis due to septic poisoning.

septicopyemia, septicopyæmia (*sep-tik-o-pi-e'-me-ah*) [*septicemia; pyemia*]. Combined septicemia and pyemia. **s., primary,** that in which the general infection is produced by the same bacteria as those causing the primary lesion. **s., secondary,** that in which the general infection is due to other bacteria than those causing the primary lesion.

septicopyemic (*sep-tik-o-pi-e'-mik*). Pertaining to septicopyemia

septigravida (*sep-te-grav'-id-ah*) [*septem*, seven; *gravida*, pregnant]. A woman who is pregnant for the seventh time.

septimetritis (*sep-ti-met-ri'-tis*). Metritis due to septic poisoning.

septipara (*sep-tip'-ar-ah*) [*septem*, seven; *parere*, to bear]. A woman who has been in labor for the seventh time.

septivalent (*sep-tiv'-al-ent, sep-te-va'-lent*) [*septem*, seven, *valere*, to be worth] Having an atomicity of seven

septoforma (*sep-to-form'-ah*). A condensation-product of formaldehyde dissolved in an alcoholic solution of linseed-oil potassium soap. It is used as an antiseptic and antiparasitic in veterinary practice

septomarginal (*sep-to-mar'-jin-al*). Relating to the margin of a septum.

septometer (*sep-tom'-et-er*) [*septum; μέτρον*, a measure]. 1. An instrument for determining the thickness of the nasal septum. 2. [*sepsis.*] An apparatus for determining organic impurities in the air.

septonasal (*sep-to-na'-zal*) [*septum*, septum; *nasus*, nose]. Pertaining to the nasal septum.

septopyemia, septopyæmia (*sep-to-pi-e'-me-ah*). See *septicopyemia.*

septotome (*sep'-to-tōm*) [*septum; τομή*, a cutting]. An instrument for cutting the nasal septum.

septotomy (*sep-tot'-o-me*) [*septum; τομή*, a cutting]. The operation of cutting the nasal septum.

septula (*sep'-tū-lah*). Plural of *septulum* (*q. v.*). **s. fibrosa,** fibrous trabeculæ extending from the deep fascia of the penis into the corpus cavernosum. **s. interalveolaria,** the septa dividing the alveoli of the lungs. **s. medullaria,** processes radiating from the periphery of the gray substance of the spinal cord into the white substance. **s. renum.** See *columna Bertini.* **s. testis,** septules of the testis.

septulum (*sep'-tū-lum*) [L.; *pl., septula*] A small septum. **s. testis.** See *septula testis.*

septum (*sep'-tum*) [*sepire*, to hem in]. A partition; a division-wall. **s. atriorum, s. atrium, s. auricularum,** the septum between the right and left auricles of the heart. **s., Bigelow's,** the calcar femorale, an early vertical spur of compact tissue in the neck of the femur, a little in front of the lesser trochanter. **s. cordis,** the wall between the two sides of the heart. **s. crurale,** the layer of areolar tissue closing the femoral ring. **s., Douglas',** in the fetus the septum formed by the union of Rathke's folds transforming the rectum into a complete canal. **s. intermusculare,** septum between muscles. **s. linguæ,** the vertical mesal partition of the tongue, which divides the muscular tissue into two halves. **s. lucidum,** a thin, translucent septum forming the internal boundary of the lateral ventricles of the brain and inclosing between its two laminæ the fifth ventricle. **s., nasal,** the septum between the two nasal cavities. **s., pectiniform,** that between the corpora cavernosa of the penis. **s. pellucidum.** See *lucidum.* **s. of the pons,** the median raphe of the pons formed by the decussation of nerve-fibers. **s., rectovaginal,** the tissue forming the partition between the rectum and the vagina. **s. scalæ,** lamina spiralis. **s. scroti,** that dividing the scrotum into two cavities. **s. subarachnoid,** a partition formed by bands of fibroelastic tissue passing from the arachnoid to the pia along the posterior median line of the spinal cord. **s. thoracis.** See *mediastinum.* **s. transversum.** 1. The diaphragm. 2. The tentorium cerebelli. **s., triangular medullary.** See *s. lucidum.* **s., ventricular.** 1. See *s. lucidum.* 2. See *s. ventriculorum.* **s. ventriculorum,** the septum between the ventricles of the heart.

septuplet (*sep'-tū-plet*) [*septem*, seven]. One of seven offspring born from a single gestation.

sepulture (*sep'-ul-tūr*) [*sepultura; sepelire*, to entomb]. The disposal of the dead by burial.

séquardin (*sa-kwar'-din*) [Charles Edouard *Brown-Séquard*, French physiologist, 1817–1894]. A sterilized testicular extract.

sequel, sequela (*se'-kwel, se-kwel'-ah*) [*sequi*, to follow; *pl., sequels, sequelæ*]. An abnormal condition that follows a disease, and is directly or indirectly dependent upon it.

sequence (*se'-kwens*) [*sequentia*]. 1. The order of occurrence, as of symptoms. 2. A sequela.

sequential (*se-kwen'-shal*) [*sequentia*]. Occurring as a sequence, as sequential insanity.

sequester (*se-kwes'-ter*). Sequestrum.

sequestral (*se-kwes'-tral*) [*sequestrum*, sequestrum] Pertaining to, or of the nature of, a sequestrum.

sequestration (*se-kwes-tra'-shun*) [*sequestrum*]. 1. The formation of a sequestrum. 2. The isolation of persons suffering from disease for purposes of treatment or of protecting others **s. anesthesia,** anesthesia is produced by inhalation and then maintained by temporarily restraining a portion of the patient's circulation in two or more limbs from the main circulation, thereby producing cerebral anemia.

sequestrectomy (*se-kwes-trek'-to-me*). See *sequestrotomy.*

sequestrotomy (*se-kwes-trot'-o-me*) [*sequestrum; τομή*, a cutting]. The operation of removing a sequestrum.

sequestrum (*se-kwes'-trum*) [*sequestrare*, to separate; *pl., sequestra*]. A detached or dead piece of bone within a cavity, abscess, or wound. **s., primary,** that entirely detached and demanding removal. **s., secondary,** one that is partially detached, and that unless very loose may be pushed into place. **s., tertiary,** cracked or partially detached and remaining firmly in place.

sera (*se'-rah*) [L.]. Plural of serum, *q. v.*

seralbumin (*se-ral-bū'-min*) [*serum; albumin*] Serum-albumin, the albumin found in the blood.

serempion (*se-rem'-pe-on*). A form of epidemic measles in the West Indies, which causes great mortality, especially among children.

serenium (*se-re'-ne-um*). An azobenzene dye, used as a urinary antiseptic.

Serenoa (*ser-e-no'-ah*) [*Sereno* Watson, American botanist]. A genus of palms of one species, *S. serrulata*, the saw-palmetto of North and South America. The fruit is diuretic and sedative and used in diseases of the genitourinary tract. Dose of *extract* 8–20 gr (0.52–1.3 Gm.); of the *fluidextract* 57–114 min. (3.7–7.4 Cc.).

Sergent's white line [Emil *Sergent*, French physician]. A white line which appears on the skin

of the abdomen when lightly stroked with a pencil or the finger; said to occur in Addison's disease, and other conditions associated with low arterial tension.

serial (*se'-re-al*) [*series*, a succession]. Following in regular order; occurring in rows. **s. sections,** microscopic sections made in consecutive order and arranged in the same manner.

sériběle (*sa-re-bāl'*). A teniafuge said to consist of the seeds and root bark of *Connarus guianensis*. Dose 2 oz. (60 Gm.) in decoction.

sericeps (*ser'-is-eps*) [*sericum*, silken; *caput*, head]. A device made of loops of ribbon, used in place of the forceps in making traction upon the fetal head.

sericum (*ser'-ik-um*) [L.]. Silken, silk (*q. v.*). Sericum was formerly much prescribed as a cordial, tonic, nervine, and as a restorative of the memory, reason, and reproductive power. It was an ingredient of various electuaries

series (*se'-rēz*) [L.]. A succession or chain of similar parts, or activities **s., aliphatic,** the open chain series of organic compounds, derived from methane. **s., aromatic,** the organic compounds derived from benzene. **s., fatty.** Same as *s. aliphatic*. **s., homologous,** a series of organic compounds the consecutive members of which differ by a common ratio (generally CH_2). **s. dentium,** a row of teeth. **s., numbering parts in,** the rule almost universally followed is to commence with the part at the proximal, or at the cephalic aspect, *e. g.*, the most cephalic vertebra (atlas) is number one. The shoulder-girdle is the proximal segment of the pectoral limb.

seriflux (*se'-rif-luks*) [*serum; fluxus*, flow]. Any serous or watery discharge, or a disease characterized by such a discharge.

serin (*se'-rin*), $CH_2(OH).CH(NH_2).CO_2H$. 1. amidoglycerol, obtained by boiling serecin with dilute sulphuric acid It forms hard crystals, soluble in water, but insoluble in alcohol and ether. 2. Serum albumin.

serinuria (*se-rin-ū'-re-ah*). The excretion of serum albumin (without serum globulin) in the urine.

serious (*se'-re-us*) [*serius*, grave]. Applied to such morbid conditions or symptoms as indicate a grave prognosis.

seriscission (*ser-is-ish'-un*) [*sericum*, silken; *scisso*, a cutting]. Division of soft tissues by a silken ligature

sero- (*se-ro-*) [*serum*]. A prefix meaning relating to serum or serous.

serobacterins (*se-ro-bak'-ter-ins*). Emulsions of killed bacteria which have been sensitized by treatment with a specific immune serum.

serochrome (*se'-ro-krōm*) [*sero-*; χρῶμα, color]. Gilbert's name for the pigments (lipochrome, lutein) which serve to give color to normal serum.

serocolitis (*se-ro-ko-li'-tis*). Inflammation of the serous covering of the colon.

seroculture (*se'-ro-kul-tshur*). A bacterial culture on blood serum.

serocyst (*se'-ro-sist*). A tumor containing cysts filled with serum.

serocystic (*se-ro-sis'-tik*) [*sero-*; κύστις, a bladder]. Composed of cysts filled with a serous fluid.

serodermatosis (*se-ro-der-mat-o'-sis*) [*serum*; δέρμα, skin; νόσος, disease]. A skin-disease characterized by serous effusion into the tissue of the skin.

serodermitis (*se-ro-der-mi'-tis*) [*sero-*; *dermitis*]. An inflammatory skin affection attended with serous effusion.

serodiagnosis (*se-ro-di-ag-no'-sis*). Diagnosis based upon the reaction of blood-serum of patients. See *Widal's reaction*.

seroenteritis (*se-ro-en-ter-i'-tis*). Inflammation of the serous covering of the small intestine.

serofibrinous (*se-ro-fi'-brin-us*) [*sero-*; *fibrin*]. 1. Composed of serum and fibrin, *e. g.*, a *serofibrinous* exudate. 2. Characterized by the production of a serofibrinous exudate, as a *serofibrinous* inflammation.

serofibrous (*se-ro-fi'-brus*). Pertaining to a serous membrane and a fibrous tissue.

seroformalin (*se-ro-form'-al-in*). An antiseptic dusting-powder of dried coagulated blood-serum and formalin.

seroglobulin (*se-ro-glob'-ū-lin*) See *paraglobulin*.

serohepatitis (*se-ro-hep-at-i'-tis*) [*sero-*; *hepatitis*]. Inflammation of the hepatic peritoneum.

seroid (*se'-roid*) [*sero-*; εἶδος, likeness]. Resembling a serous membrane.

seroimmunity (*se-ro-im-ū'-nit-e*). Passive immunity; see under *immunity*.

serolactescent (*se-ro-lak-tes'-ent*) [*serum; lac, lactis*, milk] Having the characters of both serum and milk. The secretion of Montgomery's glands is said to be serolactescent.

serolemma (*se-ro-lem'-ah*) [*sero-*; λέμμα, a husk; a peel]. The embryonic external layer of the amnion.

serolin (*se'-ro-lin*) [*sero-*; *oleum*, oil]. A neutral fatty constituent of blood, occurring in small amount; its nature is undetermined.

serolipase (*se-ro-lip'-ās*). Lipase as found in blood-serum.

serologic, serological (*se-ro-loj'-ik, se-ro-loj'-ik-al*) Pertaining to serology.

serologist (*se-rol'-o-jist*). One versed in serology.

serology (*se-rol'-o-je*). That branch of science which deals with serum; especially immune and hemolytic sera.

seromembranous (*se-ro-mem'-bran-us*). Serous and membranous.

seromucous (*se-ro-mū'-kus*). Having the nature of or containing both serum and mucus.

seronal (*se'-ro-nol*). A mixture of guaicol, eucalyptol, camphor and olive oil, suggested for intramuscular injection in cases of influenza.

seroperitoneum (*se-ro-per-it-on-e'-um*). Hydroperitoneum, ascites.

serophyte (*sē'-ro-fīt*). A microorganism which can grow in the unaltered body fluids.

seropneumothorax (*se-ro-nū-mo-tho'-raks*) [*serum; πνεῦμα*, air; *thorax*]. Pleurisy with serous effusion, associated with pneumothorax.

seroprognosis (*se-ro-prog-no'-sis*). Prognosis of disease as determined by seroreactions.

seropurulent (*se-ro-pū'-roo-lent*) [*sero-*; *purulent*]. Composed of serum and pus, as a *seropurulent* exudate.

seropus (*se'-ro-pus*) [*sero-*; *pus*]. A fluid consisting of serum and pus.

seroreaction (*se-ro-re-ak'-shun*). 1. Any reaction occurring in a serum, such as complement fixation. 2. Serum disease.

serosa (*se-ro'-sah*) [*serous; membrana*, understood]. A serous membrane.

serosanguineous (*se-ro-san-gwin'-e-us*) [*sero-*; *sanguis*, blood]. Having the nature of, or containing, both serum and blood.

serosaprophyte (*se-ro-sap'-ro-fīt*). A microorganism which cannot grow in the normal body

fluids, but can do so when these fluids are changed (by disease or otherwise).

seroscopy (*se-ros'-ko-pe*) [*sero-*; σκόπειν, to view]. Examination of serum by means of the agglutinoscope.

seroserous (*se-ro-se'-rus*) [*serous*]. Pertaining jointly to two serous surfaces.

serosine (*se'-ro-sēn*). A proprietary remedy said to be antipyretic and antiseptic; same as *bromanilne*.

serositis (*se-ro-si'-tis*). Inflammation of a serous membrane.

serosity (*se-ros'-it-e*) [*serum*]. The quality of being serous; a serous fluid not the true secretion of serous membranes.

serosynovial (*se-ro-si-no'-ve-al*) [*sero-*; *synovia*]. Having the characters of both serum and synovia; pertaining to both a serous and a synovial membrane.

serosynovitis (*se-ro-si-no-vi'-tis*) [*sero-*; *synovitis*] A synovitis with increase of synovial fluid.

serotaxis (*se-ro-taks'-is*) [*sero-*; τάξις, arrangement] In diagnosis the determination of the blood to the skin by application of a solution of caustic potash.

serotherapy (*se-ro-ther'-ap-e*) [*sero-*; *therapy*]. 1. The treatment of disease by means of human or animal blood-serum containing antitoxins. 2. Whey cure.

serothorax (*se-ro-tho'-raks*). Hydrothorax

serotina (*ser-o-ti'-nah*). See *decidua serotina*

serous (*se'-rus*) [*serum*]. 1. Pertaining to, characterized by, or resembling serum. 2 Producing serum, as a *serous* gland; containing serum, as a *serous* cyst. **s. cavity,** a large lymph-space. **s. effusion,** an effusion of serum. **s. exudate,** an exudate consisting largely of serum. **s. fluid,** normal lymphatic fluid. **s. inflammation,** an inflammation characterized by the formation of a serous exudate. **s. membrane.** See *membrane*.

serovaccination (*se-ro-vak-sin-a'-shun*). A method of obtaining mixed immunity by injecting a serum (to secure passive immunity) and also vaccinating (to secure active immunity).

serozyme (*se'-ro-zīm*) [*serum*; ζύμη, leaven]. Same as thrombogen. *q v.*

serpedo (*ser-pe'-do*) [*serpere*, to creep]. Same as *psoriasis*.

serpens (*ser'-penz*) [L.]. Serpentine, sinuous; creeping. **s., ulcus,** a fistulous ulcer; a sinuous ulcer of the cornea.

serpentaria (*ser-pen-ta'-re-ah*) [L]. Virginia snake-root, the root of several species of *Aristolochia*, of the order *Aristolochiaceæ*. The rhizome and rootlets of *Aristolochia serpentaria* and *Aristolochia reticulata* constitute the *serpentaria* of the U. S. P. (*serpentariæ rhizoma*, B. P.). Serpentaria contains a volatile oil, a bitter principle, and a nitrogenous principle called *aristolochin*. It is a stimulant, tonic diaphoretic, and diuretic, and is used in intermittent fever and in dyspepsia **s., fluidextract of** (*fluidextractum serpentariæ*, U. S. P) Dose 20–30 min. (1.3–2.0 Cc.). **s., infusion of** (*infusum serpentariæ*, B. P). Dose 1 oz. (32 Cc). **s., tincture of** (*tinctura serpentariæ*, U. S. P., B. P.). Dose 1 dr. (4 Cc.)

serpentine (*ser'-pen-tīn*) [*serpens*, serpent]. Sinuous; snake-like.

serpes (*ser'-pēz*) [*serpere*, to creep] Herpes.

serpiginous (*ser-pij'-in-us*) [*serpiginosus*, from *serpere*, to creep]. Creeping **s. ulcer**, one that extends in one direction while healing in another.

serpigo (*ser-pi'-go*) [L.]. Ringworm, herpes.

serpol (*ser'-pol*). Serpyllum.

serpyllum (*ser-pil'-um*). The mild thyme, *Thymus serpyllum*.

serra (*ser'-ah*) [L., a saw]. In biology, a saw or sawlike structure. **s. salvia,** mountain sage, an herb of the U. S., introduced as a substitute for quinine in the treatment of periodic fevers. Also of service in rheumatism, scarlet fever, and diphtheria. Dose of the fluidextract ʒ j–ij.

serrago (*ser-a'-go*) [L., *gen.*, *serraginis*]. Sawdust.

serrate, serrated (*ser'-āt, ser'-a-ted*) [*serra*, a saw]. Provided with sharp projections like the teeth of a saw.

serratiform (*ser-at'-if-orm*) [*serra*, a saw; *forma*, a form]. Same as *serrated*.

serration (*ser-a'-shun*) [see *serrate*]. The state or condition of being serrate.

serratus (*ser-a'-tus*) [L.]. Serrated; applied to muscles arising or inserted by a series of processes resembling the teeth of a saw. See under *muscle*.

serre-fine (*sār-fēn*) [Fr.]. A small spring-forceps for seizing and compressing bleeding vessels.

serre-nœud (*sār-nēh'*) [Fr.]. An instrument used for drawing tight a ligature thrown around a part, as around the pedicle of a tumor.

Serres' glands (*sair*) [Etienne Rénaud Auguste *Serres*, French physician, 1787–1868]. Pearl-like masses frequently seen in the infant near the gum and resulting from the fragmentation of the dental epithelium. They may give rise to cysts or other abnormal growths.

serrulate (*ser'-roo-lāt*) [*serrula*, dim. of *serra*, a saw]. Minutely notched or serrated.

Sertoli's cells, S.'s columns (*ser'-to-le*) [Enrico *Sertoli*, Italian histologist]. The supporting cells of the seminiferous tubules, arranged radially on the membrana propria, and forming long columns between the spermatoblasts.

serum (*se'-rum*) [L.; *pl*, *sera*]. 1. The clear, yellowish fluid separating from the blood after the coagulation of the fibrin. 2. Any clear fluid resembling the serum of the blood. 3. An antitoxin for therapeutic use. **s., Adamkiewicz's.** See *cancrosin*. **s. adapted,** a serum produced by immunization. **s.-albumin,** the albumin found in the blood-serum and other animal fluids. **s., allergic,** one which produces hypersensitiveness to injections of serum. **s., anallergic,** one which does not produce hypersensitiveness to injections of serum. **s., anthrax,** one used in cattle in the form of protective inoculations. **s., anticancerous,** a serum provided by the inoculation of an ass previously infected with the filtered juice of a neoplastic tumor. **s., antidiphtheritic** (*serum antidiphthericum*, U. S. P.), one prepared by (1) the production of diphtheric toxin by means of boullion cultures; (2) the immunization of horses, and (3) the collection and separation of the blood-serum from the immunized animals. If 1 Cc. of this serum suffices to protect perfectly a guineapig against a fatal dose of the toxin, and without even the occurrence of a localized reaction at the site of the injection, the serum is said to contain one immunizing unit in the cubic centimeter; if 0.1 Cc. suffices, it has 10 units; if 0.01 Cc., it has 100 units per cubic centimeter. In Germany the least allowed by law is 100 units. **s., antiepitheliomatous,** one obtained from animals by inoculation with cultures of pathogenic yeast isolated from cancerous tumors. Syn., *serum of Hoffmann* and

of Villiers and Wlaeff. **s., antimorphine,** a resistance substance conferring immunity to the action of morphine poison, obtained by L. Hirschlaff from animals treated with increasing doses of morphine. **s., antiscarlatinal.** See *s., v. Leyden's,* and *s., Moser's.* **s., antistaphylococcic, s., antistaphylococcous,** a serum produced in the goat by Proscher that will immunize rabbits against from 5 to 7 times the lethal dose of culture of staphylococcus when used in doses of 1–5 Cc. **s., antistreptococcic, s., antistreptococcous.** 1. A specific serum obtained by Piorkowski against the streptococcus, which causes the disease called *pferdedruse,* a contagious catarrhal affection of the nasal and pharyngeal membranes of horses. The serum has protective and curative properties. It agglutinates the specific streptococcus of angina but slightly or not at all, and other pathogenic species in dilutions of less than 1.25. Piorkowski concludes that there are specific races of streptococci, and that success in the use of an antistreptococcous serum will be obtained only when an antiserum for the specific organism found in the particular group of cases is used. 2. See *s., Moser's.* **s., antitoxic,** that which acts upon the bacterial toxins and is not bactericidal **s., antityphoid,** a sterilized culture of typhoid bacilli used by vaccination as a prophylaxis against typhoid. Cf. *Jez's antityphoid extract.* **s., antivenomous,** see *antivenin.* **s., bactericidal,** that which destroys bacteria but has no effect upon toxins **s. bacteriolytic,** one which contains a lysin capable of destroying certain bacteria. **s., Bardel's,** sodium chloride, 1 Gm., phenol, 0.5 Gm ; sodium phosphate, 3 Gm.; sodium sulphate, 2 Gm.; water, to 100 Cc. **s., Behring's, s. of Behring-Roux,** see *s., antidiphtheric* **s., bichlorureted,** of Chéron, mercury bichloride, 0.5 cg., sodium chloride, 2 Gm ; distilled water, 200 Cc.; crystallized phenol added when the serum is quite cold, 2 Gm. Dose 300 gr. (20 Gm.) injected into the gluteal region every eight days for syphilis. **s., Calmette's,** see *antivenin* **s., cancer.** 1 Cancer-juice 2. See *cancroin.* **s., Cantani's,** sodium chloride, 4 Gm., sodium carbonate, 3 Gm.; water, 1000 Cc. **s.-casein,** Panum's name for paraglobulin. **s., cerebrospinal,** cerebrospinal fluid. **s., Chéron's,** phenol, 1 Cc.; sodium chloride, 2 Gm.; sodium phosphate, 4 Gm.; sodium sulphate, 8 Gm.; boiled distilled water, 100 Cc. **s., clumping,** a serum capable of producing agglutination of bacteria. **s., Crocq's,** sodium phosphate, 2 Gm ; distilled water, 100 Cc **s.-disease,** name given to various symptoms which appear some days after the injection of a serum; urticaria, fever. Swollen glands, edema, albuminuria, and arthralgia may thus be present. **s.-diagnosis,** see *serodiagnosis* **s., Flexner's,** serum used in the treatment of diplococcic cerebrospinal meningitis **s., globulicidal,** a hemolytic serum. **s.-globulin,** see *paraglobulin.* **s., Haffkine's,** a sterilized culture of cholera bacilli for conferring immunity against cholera. See *Haffkine's method* under *immunization.* **s., Haffkine's prophylactic,** a serum obtained by heating a virulent culture of plague bacilli to 70° C. It is used as a prophylactic against cholera. **s., Hayem's.** 1. Sodium chloride, 5 Gm.; sodium sulphate, 10 Gm.; sterilized water, 1 liter. 2. Sodium chloride, 7.5 Gm.; sterilized water, 1000 Cc. Syn., *physiological serum.* **s., hemolytic,** any blood-serum which produces hemolysis. **s., heterologous,** a serum obtained from an animal of another species. **s. of Hoffmann,** see *s., antiepitheliomatous.* **s., homologous,** a serum derived from an animal of the same species. **s., Huchard's,** sodium phosphate, 10 Gm.; sodium chloride, 5 Gm.; sodium sulphate, 2.5 Gm.; distilled water, to 100 Cc. **s., Huchard's concentrated,** sodium chloride, 5 Gm., sodium phosphate, 10 Gm., sodium sulphate, 2.5 Gm.; phenol, 1.5 Gm.; water, 100 Cc. **s., immune,** the serum of an immunized animal, containing a specific antibody. **s., inactivated,** see *inactivate.* **s., jequiritol,** an antitoxin prepared on the principle of Beyring's method, which has the power of rapidly and surely paralyzing the effects of jequiritol in the human system when applied locally in the conjunctival sac and when injected subcutaneously. **s., Kronecker and Lichtenstein's,** sodium chloride from 6 to 7.5 Gm.; sodium carbonate, 0.1 Gm.; water, 1000 Cc. **s. lactis,** whey. **s., Latta's,** sodium chloride, from 3 to 5 Gm.; sodium carbonate, 1.7 Gm.; water, 3400 Cc. **s., Leclerc's** (very strong), sodium chloride, 4 Gm.; sodium phosphate, sodium sulphate, of each, 0.5 Gm.; boiled distilled water, 100 Cc. **s., leukotoxic,** one which destroys the leukocytes. **s., v. Leyden's,** blood-serum taken from convalescent scarlatina patients. Cf. *s., Moser's.* **s., luetic,** emulsion of liver or kidney of a syphilitic fetus, cleared by filtration. **s.-lutein,** the pigment contained in the serum from the blood of most animals. **S., Luton's,** crystallized sodium phosphate, 5 Gm.; sodium sulphate, 10 Gm.; boiled distilled water, 100 Cc. **s., Maragliano's,** an antituberculous serum obtained from an ass or horse treated with repeated injections of tuberculous toxin. **s., Marmorek's,** a polyvalent serum obtained by the inoculation of animals with streptococci of various origin. **s., Mathieu's,** sodium sulphate, 6 Gm.; sodium phosphate, 4 Gm.; sodium chloride, 1 Gm.; glycerol, 20 Gm.; distilled water, to 100 Cc. **s., meningococcic,** serum used in the treatment of diplococcic cerebrospinal meningitis. **s., Moser's** (Paul), an antistreptococcus serum obtained by simultaneous inoculation of horses with several varieties of streptococci taken from the blood of scarlatina patients. **s., neurotoxic,** one which acts directly upon the nerve-tissues. **s., normal,** that of which 0.1 Cc. neutralizes 10 times the minimal lethal dose of a specific bacterial poison. **s., Paquin's,** an antitoxic serum of tuberculosis produced by successive inoculation of horses. It is injected in daily doses of from 10 to 150 drops. **s., Parascandolo's,** an immunizing serum produced by inoculation of animals with mixed cultures of streptococci and staphylococci. **s., physiological, s., pooled,** mixed serum from different individuals. **s., pneumococcic** serum used in the treatment of pneumonia. See *s., Hayem's (2.)* **s.s, polyvalent,** serums derived from animals infected by a number of different streptococci. **s., protective,** any immunizing serum. Cf. *s., Haffkine's.* **s., Renzi's,** iodine, 1 Gm.; potassium iodide, 3 Gm.; sodium chloride, 6 Gm.; water, 1000 Cc. **s., Richet and Héricourt's.** See *s., anticancerous.* **s., Roussel's,** sodium phosphate, 50 Gm.; water, 1000 Cc. **s., Roux's.** See *s., antidiphtheric.* **s., Sapellier's,** sodium chloride, 60 Gm.; potassium

chloride, 5 Gm.; sodium carbonate, 31 Gm.; sodium phosphate, 4.5 Gm., potassium sulphate, 3.5 Gm.; boiled water 100 Cc. **s., Schiess's,** sodium chloride, 75 Gm., sodium bicarbonate, 50 Gm.; water, 1000 Cc. **s., Schwartz's,** sodium chloride, 6 Gm.; solution of caustic soda, 2 drops; water, 1000 Gm. **s., Sclavo's,** a bactericidal serum used to produce passive immunization in anthrax. **s., seraphthin,** a proprietary prophylactic against foot-and-mouth disease. **s.-sickness,** see *s.-disease.* **s. specific** See *s., immune* **s., streptococcic** serum used in the treatment of streptococcic septicemia and pyemia. **s. sublimatum,** one part of corrosive sublimate to from 50 to 100 parts of serum. It is used subcutaneously as an antiseptic and for impregnating bandages. **s., Syndmann's,** sodium chloride, 6 Gm.; sodium bicarbonate, 1 Gm.; water, 1000 Cc. **s.-therapy.** See *serotherapy* **s.-thyroid,** serum used in the treatment of exophthalmic goiter. **s. of Tizzoni and Cattani,** obtained by evaporating in a vacuum the serum of an immunized horse. Each gram of the powdered residue corresponds to 10 Cc. of the serum. **s., Trunecek's,** for the treatment of symptoms caused by arteriosclerosis; sodium chloride, 4.92 Gm.; sodium sulphate, 0.44 Gm., sodium carbonate, 0.21 Gm.; potassium sulphate, 0.4 Gm ; sodium phosphate, 0.15 Gm. This is given in hypodermatic injections of 1 Cc every 3 or 4 days, increasing to 5 to 7 Cc , or in rectal injections of 35 Cc. **s.-unit.** See *unit.* **s., Vandervelde's.** 1. Sodium glycerophosphate, sodium chloride, of each, 3 Gm.; water, 1000 Cc. 2. Sodium chloride, potassium chloride, of each, 3 Gm.; sodium carbonate, 2.5 Gm.; sodium phosphate, 3 Gm.; potassium sulphate, 2 Gm.; water, to 100 Cc. **s. of Villiers and Wlaeff.** See *s., antiepitheliomatous* **s. of Wlaeff.** See *s., antiepitheliomatous.* **s., Yersin's,** serum of a horse immunized by intravenous injection of a virulent culture of the plague bacillus.

serumal (*se'-roo-mal*). Relating to or derived from serum. **s. calculus,** a calculus formed about the teeth by exudation from diseased gums.

serumuria (*se-rum-ū'-re-ah*). Same as *albuminuria.*

Servetus's circulation (*ser-ve'-tus*) [Michael *Servetus,* Spanish physician, 1509–1553]. The pulmonary circulation.

servol (*ser'-vol*). An alcohol soap solution containing 12% of formaldehyde; it is used as a disinfectant.

sesame (*ses'-am-e*). See *sesamum.*

sesamoid (*ses'-am-oid*) [*sesame;* εἶδος, like]. Resembling a sesame-seed. **s. bone,** a small bone developed in a tendon subjected to much pressure **s. cartilage,** small cartilages in the alæ of the nose.

sesamoiditis (*ses-am-oi-dī'-tis*) [*sesamoid;* ιτις, inflammation]. Inflammatory disease of the sesamoid bones of the fetlock of the horse.

sesamum (*ses'-am-um*) [σήσαμον, sesame]. A genus of plants of the order *Pedalineæ. S. indicum* and *S. orientale* yield a bland, sweetish oil. **s., oil of** (*oleum sesami*), sesame oil, employed like olive-oil. Syn., *benne oil; teel oil.*

sesqui- (*ses-kwe-*) [L.]. A prefix denoting one and one-half.

sesquibasic (*ses-kwe-ba'-sik*) [*sesqui,* one-half more; *basic*]. Applied to salts formed from a tribasic acid by the replacement of three atoms of hydrogen by two of a basic element or radical

sesquichloride (*ses-kwe-klor'-īd*). A compound of chlorine and another element containing three parts of chlorine to two of the other element.

sesquih. Abbr. of *sesquihora,* an hour and a half.

sesquioxide (*ses-kwe-oks'-īd*) [*sesqui-;* ὀξύς, acid]. A compound of three parts of oxygen to two of another element.

sesquisalt (*ses'-kwe-sawlt*) [*sesqui-; salt*). A salt containing one and one-half times as much of the acid as of the radical or base.

sesquisulphide (*ses-kwe-sul'-fīd*). A compound of sulphur and another element containing there parts of sulphur to two of the other element.

sessile (*ses'-il*) [*sessilis,* from *sedere,* to sit]. Attached by a broad base; not pedunculated, as a *sessile* tumor.

sesunc. Abbr. of *sesuncia,* an ounce and a half.

set [M.E., *setten*]. 1. To reduce the displacement in a fracture and apply suitable bandages. 2. To harden; to solidify—as a cement or amalgam.

seta (*se'-tah*) [*seta,* a bristle; *pl., setæ*]. A stiff, stout, bristle-like appendage; a chæta, vibrissa.

setaceous (*se-ta'-se-us*) [*seta,* a hair, a bristle]. Bristly, bristling, bristle-shaped

setaria (*se-ta'-re-ah*) [*seta,* a bristle] A genus of grasses including millet, *S. italica.*

setarin (*se-ta'-rin*). A toxic glucoside isolated by E. F. Ladd, 1899, from millet. *Setaria italica.*

Setchenow's inhibitory center (*setsh'-en-of*). See *Setschenow.*

setiform (*se'-tif-orm*) [*seta,* a bristle, *forma,* form]. Bristle-like in shape.

setigerous, or setiferous (*se-tij'-er-us, se-tif'-er-us*) [*seta,* bristle; *gerere* or *ferre,* to bear] Bearing bristles or stiff hairs.

seton (*se'-ton*) [*seta,* a bristle]. 1. A thread or skein of threads drawn through a fold of the skin, so as to produce a fistulous tract; it is used as a counterirritant. 2. The tract thus produced.

setose (*se'-tōs*). Beset with bristle-like appendages.

Setschenow's inhibitory center (*setch'-en-of*) [Ivan *Setschenow,* Russian physician]. A cerebral center for the inhibition of reflex movements, situated in the corpora quadrigemina and the medulla oblongata.

setula (*set'-ū-lah*) [dim. of *seta,* a bristle: *pl., setulæ*]. A diminutive bristle.

sevadilla, see *cebadilla.*

seven-day fever. Relapsing fever.

seventh nerve. The facial nerve. See *nerves.* **s. sense,** static sense or visceral sense.

Sever's disease (*se'-ver*) [James W. *Sever,* American orthopedic surgeon]. Epiphysitis of the os calcis.

sevetol (*sev'-et-ol*). Trade name of a preparation of predigested animal and vegetable fats.

seviparous (*se-vip'-ar-us*) [*sevum; parere,* to produce]. Sebiferous; fat producing.

sevum (*se'-vum*) [L.]. Suet. **s. præparatum,** the prepared suet of the U. S. P.

sewage (*sū'-aj*). The heterogeneous substances constituting the excreta and waste matter of domestic economy and the contents of drains. It consists mainly of putrescent animal and vegetable tissues, fecal matter, and urine—the latter in a state of ammoniacal fermentation—mixed with water or dissolved in it. **s.-farming,** use of sewage as a manure.

sewer (*sū'-er*). A canal for the removal of sewage. **s.-air throat,** acute tonsillitis. **s. -gas,** the mixture of air, vapors, and gases, which emanates from sewers. It varies greatly in respect

to its pathogenic qualities. **s.-g. pneumonia.** See *pneumonia.*

sewerage (*sū-er-aj*). 1. The collection and removal of sewage. 2. The system of pipes, etc., for the removal of sewage.

sewing spasm (*so'ing*). See *seamstress's cramp.*

sex- (*seks*) [L.]. A prefix, meaning six.

sex (*seks*) [*sexus*, also *secus*, sex]. The state or condition of being either male or female. **s.-limited,** occurring in one sex only.

sex cords (*seks kordz*) [*sexus*, sex; *chorda*, string]. Uriniferous tubules of large round epithelical cells, which grow from the wolffian ridge in an embryo.

sexidigital sexidigitate (*seks-e-dij'-it-al, seks-e-dij'-it-āt*) [*sex*, six; *digitus*, a finger]. Having six fingers or six toes.

sexivalent (*seks-iv-a'-lent*) [*sex*, six; *valere*, to be worth]. Having an atomicity of six as compared with that of hydrogen.

sexo-æsthetic inversion (*sek'-so-es-thet'-ik*). Transvestism, or eonism.

sexology (*seks-ol'-o-je*). The science or study of sex and sex relations

sextan (*seks'-tan*) [*sex*, six]. Occurring every sixth day, as a *sextan* fever

sextigravida (*seks-te-grav'-id-ah*) [*sextus*, sixth; *gravida*, pregnant]. A sixth pregnancy.

sextipara (*seks-tip'-ar-ah*) [*sextus*, sixth, *parere*, to produce]. A woman in labor for the sixth time.

sextonol (*seks'-to-nol*). Trade name of a mixture of the glycerophosphates of calcium, iron, manganese, quinine, sodium, and strychnine.

sextuplet (*seks-tū'-plet*) [*sex*, six]. One of the six offspring of a single gestation.

sexual (*seks'-ū-al*) [*sexus*, sex]. Pertaining to or characteristic of sex, as the *sexual* organs. **s. bondage** the dependence of one person upon another of the opposite sex that is abnormal but not perverse. **s. diseases,** diseases of the sexual organs. **s. intercourse,** copulation. **s. inversion,** a variety of sexual perversion in which there is an abnormal liking for a person of the same, instead of for one of the opposite sex. **s. involution,** the menopause. **s. metamorphosis,** a variety of sexual perversion in which the individual has the tastes and feelings and assumes the dress and habits of the opposite sex **s. selection.** See *evolution.*

sexuality (*seks-ū-al'-it-e*) [*sexus*, sex]. The collective differences which in an individual make one male or female.

sexually (*seks'-ū-al-e*) [*sexus*, sex]. In a sexual way.

sexvalent (*seks-va'-lent*). Sexivalent.

S. G. O. Abbr. for Surgeon-General's Office.

shackle (*shak-l*) [ME., *schakkyl*, shackle]. Something that hinders or confines. **s.-joint,** a variety of articulation formed by passing a bony ring of one part through a perforation of another part. It is seen in the exoskeleton of some fishes. **s.-vein,** a vein of the horse, probably the median antebrachial, from which blood was formerly abstracted.

shaddock (*shad'-ok*) [Captain *Shaddock*, who introduced the tree into the West Indies from Java in the early part of the 18*th.* century]. The fruit of *Citrus decumana*, grape fruit.

shadow (*shad'-o*) [ME., *schadowe*, shadow]. A phantom cell, or skeletonized blood-cell, formed by the removal of the hemoglobin from a red corpuscle. **s.-test.** See *retinoscopy.*

shadowgram. See *skiagram.*

shadowgraph (*shad'-o-graf*). See *skiagraph.*

shaft. The trunk of any columnar mass, especially the diaphysis of a long bone.

shakes (*shāks*). See *ague.*

shaking (*sha'-king*) [ME., *shaken*, to shake]. A passive Swedish movement used in the treatment of nervous affections. **s. cure,** the treatment of disease by a shaking or vibratory movement, advocated by Charcot in paralysis agitans, by means of a vibrating arm-chair. **s. palsy.** See *paralysis agitans.*

shampoo (*sham-poo'*) [Hind., *tshanpna*, shampoo]. 1. Synonym of *massage.* 2. To lather, rub, or wash the head.

shampooing (*sham-poo'-ing*). The performance of massage with the application of a liniment or other medicinal substance, and also in connection with the Turkish bath.

shank (ME., *shanke*, the chief bone of the leg). The leg from the knee to the ankle; the tibia.

share-bone. The os pubis.

Sharpey's intercrossing fibers (*shar'-pe*) [William *Sharpey*, English anatomist, 1802–1880]. The collagenous fibers forming the lamellæ which constitute the walls of the Haversian canals in bone; same as osteogenic fibers. **S.'s perforating fibers,** calcified white or elastic fibers which connect the lamellæ in the walls of the Haversian canals.

shaven-beard appearance. A peculiar appearance of the agminated glands of the intestine in typhoid fever, resembling that of a recently shaven beard.

shawl-muscle, the trapezius.

shears (*shērz*) [ME., *sheres*, shears]. A large pair of scissors. **s., bandage,** strong shears for cutting bandages, usually bent at an angle.

sheath (*shēth*) An envelope; a covering. In anatomy, applied to the coverings of arteries, muscles, nerves, fascia, etc. **s., arachnoidean,** a delicate partition lying between the pial sheath and the dural sheath of the optic nerve. **s., axis-cylinder.** See *Huxley's layer.* **s., capillary,** or **s., circumvascular,** a wide lymphatic tube surrounding some of the smallest blood-vessels **s. cellular.** See *epineurium.* **s., cortical,** the bast-bundles. **s., crural,** the femoral sheath, see under *femoral.* **s., dentinal,** the structure lining the dentinal canals **s., dural,** a strong fibrous membrane forming the external investment of the optic nerve; see *dura.* **s., femoral.** See *femoral.* **s., fibril,** a sheath formed by connective-tissue fibrils and surrounding individual nerve-fibers. **s. of Henle.** 1. An attenuated extension of the perineurium investing the fibers composing funiculi of a nerve-trunk; it consists of a delicate fibrous envelope lined with endothelial plates, which in some cases alone represent the entire sheath. 2. The cellular layer forming the outer portion of the inner root-sheath of the hair. **s., Huxley's.** See *Huxley's layer.* **s., lamellar.** See *perineurium* **s. of Mauthner,** a protoplasmic investing membrane beneath the neurilemma and the nodes of Ranvier, passing inward to separate the myelin from the axis-cylinder. **s., medullary,** the myelin-sheath surrounding the axis-cylinder. **s., myelin,** *medullary sheath* and *neurilemma.* **s., nerve.** See *perineurium.* **s., Neumann's.** See *s., dentinal.* **s., neural.** See *s., medullary.* **s., perivascular.** See *s., capillary.* **s. of the optic nerve.** See *s., dural.* **s., pial,** the extension of the pia which closely invests the surface of the optic nerve. See *pia.* **s., primitive.** See *neurilemma.* **s. of rectus,** that formed by

the aponeurosis of the external and internal oblique muscles and the transversalis **s., root.** See *root sheath* **s of Schwann.** See *neurilemma* **s, Schwalbe's,** the delicate sheath which covers elastic fibers **s, synovial,** a synovial membrane which lines the cavity attached to a bone and through which a tendon glides **s, tangential,** the fibro cellular sheath surrounding the carotids

shed To throw off

shedding (*shed'-ing*) Throwing off **s. teeth,** the teeth of the first dentition, the term is also applied to the loss of the first or temporary set of teeth

sheep-pox A contagious pustular disease of sheep similar to cow-pox

sheet (*shet*) A large piece of linen or cotton used as bed-clothing **s -bath.** See *bath* **s, draw,** a sheet so folded as to be placed, or removed, from beneath the patient with the least inconvenience

Sheldon's method of hemostasis in disarticulation of the hip-joint Consists in a preliminary disarticulation of the head of the femur, followed by the introduction of the artery forceps into the wound behind the femur and clamping of the femoral vessels

shellac (*shel'-ak*) See *lac* **s cement,** see *cement*

shells (*shelz*) [ME, schelle shell] Tinted spectacles for protection of the eyes Coquilles

shell shock See under *shock*

Shenton's arch or line (*shen'-tun*) A curved line formed by the top of the obturator foramen and the internal aspect of the neck of the femur, this curve is interfered with in many lesions of the hip joint

Shepherd's fracture A fracture of the outer portion of the astragalus

Sherrington's law [Charles Scott *Sherrington* English physiologist, 1859–] The peripheral branches of the spinal nerve roots—anterior and posterior—form anastomoses in such a manner as to supply any given region of the integument with the branches of three roots—a middle one and the ones next above and below **S 's solution,** *for use with the hemocytometer* methylene blue, 0 1 Gm, sodium chloride, 1 2 Gm, neutral potassium oxalate 1 2 Gm, distilled water 300 Cc

sherry wine (*sher'-e*) See *vinum xericum*

shield (*sheld*) [ME *sheeld*] 1 A protective structure or apparatus 2 In biology a protective plate scute lorica or carapace **s, antithermic,** a protective covering of the cautery to prevent destruction of the tissues about the field of operation **s bone,** the scapula **s, nipple-,** a protective covering for sore nipples **s -shaped,** shaped like a buckler or shield **s, Sims',** an instrument used in the application of wire sutures

Shiga's bacillus (*she'-ga*) [K *Shiga,* Japanese bacteriologist] The *bacillus dysenteriæ,* also called the *Shiga Krause bacillus*

shikimi, shikimia See *sskimin*

shima-mushi (*shi mah mush' e*) [Jap] A Japanese febrile disease supposed to be due to the bite of an insect

shimu-mushi See *shima-mushi*

shin [AS, *scina*] The sharp anterior margin of the tibia **s -bone,** the tibia

shingles (*shing'-gls*) Herpes zoster

ship-fever. Typhus fever

shirt-stud abscess See *abscess*

shiver (*shiv' er*) [ME, *chiveren,* to shiver] A slight tremor or shaking of the body due to cold, etc

shock [Fr, *shoc*] 1 A sudden grave depression of the system produced by operations, accidents, or strong emotion It is due to a profound influence on the nervous system If not fatal, it is followed by a stage of reaction 2 The agent causing a general or local depression, as an *electric shock* **s, deferred,** that curious condition in which the manifestations of shock, due not to severe bodily injury but to purely mental causes develop after the lapse of some time from the occurrence This variety of shock may be even more profound than that produced by bodily injury **s, discharging,** a shock produced by a discharge of electricity **s, electric,** the physiological effect produced upon an organism by the opening or closing of an electric circuit in which it is included **s, epigastric,** the result of a blow upon the epigastrium **s, erethismic,** a form of shock attended with symptoms of excitement **s, fetal,** the sensation produced by movements of the fetus in utero **s railway,** the mental impression produced by a railway accident **s secondary,** or **insidious,** a second attack occurring after the first **s, sexual,** shock caused by rape or coitus **s, shell,** shock (1) occurring in soldiers in action and characterized by excessive fear and other profound disturbances **s, torpid,** shock in which marked depression is a prominent symptom **s, traumatic,** shock due to traumatism

shoddy fever A diseased condition caused by the inhalation of the dust in shoddy factories, it is characterized by feverishness headache, nausea dryness of the mouth, dyspnea, cough, and expectoration

shoemaker's spasm An occupation neurosis, analogous to writer s cramp occurring in shoemakers

short circuit One in which an electric current encounters an abnormally small resistance **s.-circuiting,** a modification of Nélaton s operation for intestinal obstruction consisting either in lateral approximation and union or lateral implantation **s -sight, s-sightedness,** myopia **s.-windedness,** dyspnea

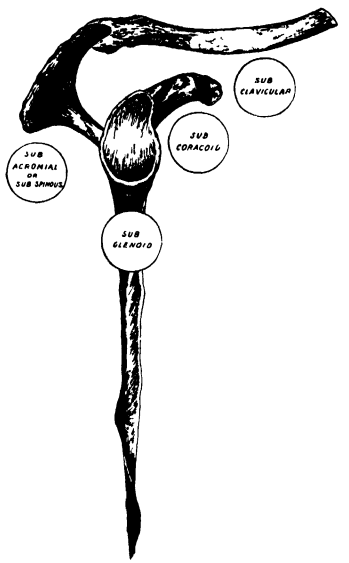
shot-gun prescription, one with many ingredients, written with the expectation that some one may prove curative **s -gun quarantine,** the extemporized and unauthorized establishment of a cordon against a place suspected of being the seat of an epidemic of a communicable disease **s.-silk.** See *retina*

shoulder (*shōl der*) [AS *sculder*] The region where the arm joins the trunk, formed by the meeting of the clavicle and the scapula and the overlying soft parts **s -blade,** the scapula **s -girdle** See *girdle, shoulder-* **s, noisy,** of R H Sayre a grating of the muscles over the scapula on moving the shoulder up and down, believed to be due to a snapping tendon between or a bursa beneath the scapula **s, slipped, s, splayed,** a dislocated shoulder **s -wrench,** a sprain or dislocation of the shoulder

show (*shō*) 1 A bloody discharge from the birth-canal prior to labor 2 The first appearance of a menstrual flow

shower (*shour*) [ME, *shour,* shower] A light fall of rain **s -bath,** see *bath* **s -bath, electric,** see *bath, electric* **s, uric acid,** a temporary increase in the amount of the uric acid in the urine, it occurs in gouty patients

Shrapnell's membrane (*shrap'-nel*) [Henry Jones *Shrapnell*, English anatomist]. A small portion of the drum-membrane filling the notch of Rivinus.



COMMON DISLOCATIONS OF THE SHOULDER. (*Thomson and Miles.*)

shreds. Patches of filmy material passed with the fecal discharges in some cases of enteritis and diarrhea. They may be composed of false membrane, or actual sloughs from the intestinal mucosa, or of flakes of hardened mucus.

shrivel (*shriv'-l*). To shrink in bulk and become wrinkled.

shucks. A strong tea of corn-shucks, used as a remedy for chronic malaria in the southern United States.

shudder (*shud'-er*). A convulsive but momentary tremor, caused usually by fright, disgust, or nervous shock.

shunt. In electricity, a conductor of low resistance, joining two points in an electric current, and completing a path through which the current will pass.

shuttle-bone. The scaphoid bone.

Si. The chemical symbol of *silicon*.

siagantritis (*si-ag-an-tri'-tis*). See *siagonantritis*.

siagon (*si'-ag-on*) [σιαγών, jaw-bone]. In biology, the mandible of a crustacean.

siagonagra (*si-ag-on-a'-grah*) [σιαγών, jaw-bone; ἄγρα, seizure]. Gouty pain in the maxilla.

siagonantritis (*si-ag-on-an-tri'-tis*) [σιαγών, the jaw-bone; ἄντρον, autrum]. Inflammation within the antrum of Highmore.

sialaden (*si-al'-ad-en*) [σίαλον, saliva; ἀδήν, a gland]. A salivary gland.

sialadenitis (*si-al-ad-en-i'-tis*) [σίαλον, saliva; ἀδήν, gland; ιτις, inflammation]. Inflammation of a salivary gland.

sialadenoncus (*si-al-ad-en-ong'-kus*) [σίαλον, saliva; ἀδήν, gland; ὄγκος, a tumor]. A tumor of a salivary gland.

sialagogue, sialagog (*si-al'-a-gog*). See *sialogogue*

sialaporia (*si-al-ap-o'-re-ah*) [σίαλον, spittle]. Deficiency in the amount of saliva.

sialemesis (*si-al-em-e'-sis*) [σίαλον, spittle; *emesis*]. The hysterical vomiting of saliva.

sialic, sialine (*si-al'-ik, si'-al-ĕn*) [*sialon*]. Having the nature of saliva.

sialism, sialismus (*si'-al-izm, si-al-iz'-mus*). See *ptyalism*.

sialoadenitis (*si-al-o-ad-en-i-tis*). Sialadenitis.

sialoaerophagy (*si-al-o-a-e-rof'-a-je*) [σίαλον, saliva; ἀήρ, air; φάγειν, to eat]. The habit of constantly swallowing and thus taking saliva and air into the stomach.

sialoangitis (*si-al-o-an-ji'-tis*) [σίαλον, saliva; ἀγγεῖον, vessel]. Inflammation of a salivary duct.

sialodochitis (*si-al-o-do-ki'-tis*) [σίαλον, spittle; δοχεῖον, receptacle; ιτις, inflammation]. Inflammation of the salivary ducts. **s. fibrinosa,** inflammation of a salivary duct obstructed by a fibrinous exudate.

sialodochium (*si-al-o-do'-ke-um*) [σίαλον, saliva; δοχεῖον, receptacle]. A salivary duct.

sialoductitis (*si-al-o-duk-ti'-tis*). Inflammation of Stenson's duct.

sialogenous (*si-al-oj'-en-us*) [σίαλον, spittle; γενν̃ᾶν, to produce]. Generating saliva.

sialogogic (*si-al-o-goj'-ik*) [σίαλον, spittle; ἀγωγός, leading]. 1. A sialogogue. 2. Promoting a flow of saliva.

sialogogue, sialogog (*si-al'-o-gog*) [σίαλον, spittle; ἀγωγός, leading]. 1. Producing a flow of saliva. 2. A drug producing a flow of saliva.

sialoid (*si'-al-oid*) [σίαλον, spittle; εἶδος, like]. Pertaining to, or like saliva.

sialolith (*si'-al-o-lith*) [σίαλον, spittle; λίθος, stone]. A salivary calculus.

sialolithiasis (*si-al-o-lith-i'-as-is*) [σίαλον, spittle; λίθος, stone]. The presence of salivary calculi.

sialon (*si'-al-on*). Saliva.

sialoncus (*si-al-ong'-kus*) [σίαλον, spittle; ὄγκος, a tumor]. A tumor under the tongue, arising from the obstruction of the duct of a salivary gland by calculus or other cause.

sialorrhea, sialorrhœa (*si-al-or-e'-ah*) [*sialon; ῥοία*, a flow]. Salivation. **s., pancreatic,** a flow of pancreatic juice.

sialoschesis (*si-al-os'-kes-is*) [σίαλον, spittle; σχέσις, holding]. Suppression of the secretion of saliva.

sialosemeiology (*si-al-o-se-mi-ol'-o-je*) [*sialon; semeiology*]. Diagnosis based upon examination of the saliva.

sialostenosis (*si-al-o-ste-no'-sis*) [σίαλον, spittle; στένος, narrow]. Occlusion of a salivary duct.

sialosyrinx (*si-al-o-si'-ringks*) [σίαλον, saliva; σῦριγξ, tube]. 1. A salivary fistula. 2. A syringe for washing out the salivary ducts. 3. A drainage-tube for the salivary ducts.

sialozemia (*si-al-o-ze'-me-ah*) [σίαλον, spittle; ζημία, loss]. Loss of saliva; salivation.

sib(s). See *sibling*.

sibbens (*sib'-enz*) [Gael., *subhan*, raspberries]. A disease formerly endemic in the Scotch highlands, and by some identified with syphilis, by others with yaws.

sibilant (*sib'-il-ant*) [*sibilare*, to hiss]. Hissing or whistling, as a *sibilant* rale.

sibilation (*sib-il-a'-shun*) [*sibilare*, to hiss]. Pronunciation in which the *s* sound predominates.

sibilismus (*sib-il-iz'-mus*) [*sibilare*, to hiss]. 1. A hissing sound. 2. A sibilant rale. **s. aurium,** tinnitus aurium.

sibilus (*sib'-il-us*) [*sibilare*, to hiss]. A sibilant rale.

sibling (*sĭb'-lĭng*) [Anglo Saxon, *sib*, related to; *-ling*, diminutive] A brother or sister having the same father and mother

sibred (*sĭb'-red*) The relationship existing between siblings, *q v*

Sibson's aortic vestibule (*sĭb'-sun*) [Francis *Sibson*, English physician, 1814–1876] The chamber formed by the left ventricle just below the aortic orifice for the reception of the semilunar valves during diastole **S 's groove**, a furrow formed in some individuals by a prominence of the lower border of the pectoralis major **S.'s notch**, the inward curve of the upper left border of precordial dulness in acute pericardial effusion

siccant, siccative (*sĭk -ant, sĭk'-at ĭv*) [*siccare*, to dry] 1 Drying, tending to make dry 2 A drying agent or medicine

sicchasia (*sĭk-a'-ze-ah*) [σιχαίνειν, to feel disgust] 1 Morbid loathing of food 2 Nausea 3 Nausea of pregnancy

sicco (*sĭk'-o*) Dried hematogen (*q v*), a black-brown, tasteless powder, soluble in water, indicated in anemia, chlorosis, etc Dose 75–105 gr (5–7 Gm) daily, children 4 gr (0 25 Gm)

siccolabile (*sĭk-o-lab'-il*) [*siccus*, dry, *labile*] Liable to be altered or destroyed by drying

siccostabile (*sĭk o sta'-bil*) [*siccus*, dry, *stabile*] Not altered by drying

siccus (*sĭk'-us*) [L] Dry

sick (*sĭk*) [ME , *sĭk* sick] 1 Ill, not well 2 Nauseated or "sick at the stomach " 3 Menstruating **s time**, popularly used for the period of menstruation **s -headache**, headache with anorexia, nausea, vomiting etc , migraine **s -list**, a list of persons especially in military or naval service, who are disabled by sickness **s.-report**, a sick-list **s. room**, a room occupied by one who is sick **s.-stomach**, synonym of *nausea* and of *milk sickness*

Sickingia (*sĭk ĭn' je-ah*) [Count v *Sickingen*, of Vienna] A genus of rubiaceous plants *S rubra* casca de ararıba, is a species found in Brazil and Japan, furnishes ararıba bark, used in intermittent fever It contains the alkaloid *aribine* and a red coloring-matter *S. virıdiflora*, casca de ararıba branca, of Brazil, furnishes a bark used in malaria

sickle-germs (*sĭk' l jermz*) A falciform stage in the development of *Coccidia*

sickliness (*sĭk'-le nes*) [ME , *sĭk* sick] Predisposition to easily contract disease, insalubrity of climate

sickly (*sĭk' le*) [ME , *sĭk*, sick] Predisposed to disease Unhealthy

sickness (*sĭk' nes*) [*sick*] 1 The state of being unwell 2 Nausea 3 Menstruation **s , African horse-**. See *edemamycosis* **s., African sleeping-** See *African lethargy* **s., bleeding**, hemophilia **s , Ceylon**, beriberi **s , country**, nostalgia **s., creeping**, chronic ergotism. **s., falling**, epilepsy **s , green**, chlorosis **s., jumping**, a form of choromania See *jumpers* **s , leaguer**, typhus **s., milk**, a form of poisoning due to the ingestion of diseased milk or meat **s., miners'**. See ankylostomiasis. **s., monthly**, the menstrual epoch **s., mountain-**, a sensation of nausea, with impeded respiration and irregular heart s action due to the rarefied air of high altitudes **s , painted**. See *pinta disease* **s., railway**. See *car-sickness* **s., salt**, a condition of starvation due to animals being confined on poor pastures consisting of dry wire grass and other inferior vegetation **s. sea-**. See *sea-sickness*. **s., serum**. See *serum disease* **s., spotted**. See *pinta disease* **s., sweating**. See *sweating-sickness*. **s., theater**, Paul's name for malaise with dyspnea and oppression followed by weak pulse and syncope, usually observed in women who have dined hurriedly and reached a crowded theater in a heated condition; frequently a result of eye-strain See *vertigo, stomachal*.

Sida (*sī'-dah*) [σίδη, a malvaceous plant] A genus of plants of the order *Malvaceæ* *S paniculata*, a species of Peru, is an active vermifuge Its action is believed to be due to the very minute but resisting bristles which cover its leaves. *S rhombifolia*, Queensland hemp, containing a great amount of mucilage, is used in Australia for snake-bite, pulmonary complaints, and in making poultices

side (*sīd*) [ME] A lateral half of the body or of any bilateral organ **s.-bone.** 1 The hip-bone 2 The diseased or disordered condition in horses which causes the lateral cartilages above the heels to ossify 3 An abnormal ossification of the lateral elastic cartilage in a horse s foot **s -chain**, see *receptor* **s -chain theory**, see under *lateral* and under *immunity*

siderant, siderante (*sĭd'-er-ant, sĭd-er-an'-te*) [*siderare* to be blasted or planet struck] Characterized by sudden and abrupt onset as though the result of malign astral influences

sideration (*sĭd-er a'-shun*) [*sideratio*, blight produced by the stars] 1 Apoplexy 2 Gangrene 3 Lightning-stroke 4 Therapeutic application of electric sparks

siderism (*sĭd'-er-izm*) [*siderites*, the lodestone] The curative influences long supposed to be exerted over the body by the lodestone, metallotherapy

siderodromophobia (*sĭd er-o dro-mo-fo'-be-ah*) [σιδήρος, iron, δρόμος way, φόβος, fear] Morbid dread of traveling by railway

siderol (*sĭd'-er-ol*) Trade name of a preparation said to be made of beef essence, iron and phosphorus

siderophilous (*sĭd-er-off' ĭl-us*) [σιδήρος, iron, φιλεῖν, to love] Applied to cells that show a tendency to take up iron, *e g* , the red blood-corpuscles

siderophone (*sĭd'-er-o fōn*) [σίδηρος, iron, φωνή, a sound] An electric appliance for detecting the presence of small splinters of iron

sideroscope (*sĭd er-o-skōp'*) [σίδηρος, iron, σκοπεῖν, to examine] An instrument for the detection of particles of iron or steel in the eyes

siderosis (*sĭd er o'-sĭs*) [σίδηρος, iron] 1 A pigmentation by a deposit of particles of iron, specifically, a chronic interstitial pneumonia caused by the inhalation of particles of iron 2 A recognized type of lung disease (pneumokoniosis) due to the inhalation of metallic dust. Cf *anthracosis, chalicosis, silicosis*. 3 An excess of iron in the system

siderous (*sĭd'-er-us*). Containing iron.

sidonal (*sĭ'-don-al*) See *piperazin quinate* **s., new**, quinic acid anhydride, a white, tasteless powder, soluble in water, used as a uric-acid solvent Dose 75–120 gr (5–8 Gm) daily, given in 4 or more doses

Siebold's operation (*se'-bolt*) [Eduard Caspar Jacob von *Siebold*, German surgeon, 1801–1861]. Hebotomy, *q v*

Siegle's otoscope, S.'s speculum (*se'-gleh*) [Emil *Siegle*, German otologist, 1833–1900]. An

instrument consisting of a glass-covered box with a conical projection and a rubber tube attached laterally. When the conical projection is inserted firmly into the external auditory canal, and the air is compressed or rarefied, the movements of the drum-membrane may be observed. It is also used for the purpose of rendering the articulations of the ossicles mobile.

Siemerling's nucleus (*se'-mer-ling*). The anteroventral nucleus of the anterior group of oculomotor nuclei in the gray matter below the Sylvian aqueduct.

Sieur's sign. "Signe du sou." A clear, metallic sound sometimes heard in cases of pleural effusion on percussing the chest in front with two coins and auscultating behind.

sieve (*siv*). A vessel with a reticulated bottom, used for the separation of pulverized from coarse substances. The gauge of the sieve is usually expressed in the number of meshes per square inch. **s., bone,** the ethmoid bone **s.-cells,** long cells of tubular or prismatic form constituting an essential element in fibro-vascular bundles of the inner bark of exogenous stems. They are peculiar in the possession of circumscribed panels, with fine perforations, which allow of communication between contiguous cells. **s.-disc.** See *s.-plate.* **s. graft.** See *graft.* **s.-hypha,** a hypha in which sieve-plates occur. **s.-plates,** the perforated panels of sieve-cells occurring at the points of contact of sieve-cells. **s.-pores,** the perforation in the panels of sieve-cells. **s.-tissue,** a cellular tissue made up of thin-walled cells which possess areas with sieve-like markings. The tissue is characteristic of the phloem. **s.-tubes.** See *s.-cells* **s.-vessel.** See *s.-cells.*

sig. (*sig*). Abbreviation for *signa,* "label it," or for "*signetur,*" "let it be labeled "

Sigault's, Sigaultian Operation (*se-go, se-go'-shun*) [Jean Réné *Sigault,* French obstetrician]. Symphyseotomy.

sigh (*sī*) [AS., *sican,* to sigh]. A prolonged and deep inspiration followed by a shorter expiration. Syn., *suspirium.*

sighing (*sī'-ing*) [ME., *sighen,* to sigh]. 1. The act of giving forth a sigh. 2. A deep respiration accompanied by sighs. 3. Characterized by sighs

sight (*sīt*) [AS., *siht*]. The act of seeing; the special sense concerned in seeing. **s., day-,** hemeralopia **s., far-, s., long,** hyperopia. **s., night-,** nyctalopia. **s., old,** presbyopia. **s., short-,** myopia. **s., weak,** asthenopia.

sigillation (*sij-il-a'-shun*) [*sigillum,* a seal]. The mark of a cicatrix.

sigma reaction (*sig'-mah*). A flocculation reaction used for the diagnosis of syphilis.

sigmatism (*sig'-mat-izm*) [see *sigmoid*]. 1. Defective utterance of the sound of *s.* 2. The too frequent use of the *s* sound in speech.

sigmoid (*sig'-moid*) [σίγμα, the Greek σ; εἶδος, likeness]. 1. Shaped like the letter S. 2. Pertaining to the sigmoid flexure of the colon, as the *sigmoid* artery, the *sigmoid* mesocolon. **s. catheter,** one shaped like an S, for passing into the female bladder. **s. cavities,** two depressions on the head of the ulna; the *greater* is for articulation with the humerus; the *lesser,* on the outer side of the coronoid process, is for articulation with the radius. **s. flexure,** an S-shaped bend in the colon between the descending portion and the rectum, usually occupying the left iliac fossa. **s. fossa,** an S-shaped groove on the mastoid process. **s. gyrus,** the S-shaped cerebral fold about and behind the cruciate fissure in carnivora. **s. kidney,** the upper pole of one kidney is fused with the lower pole of the other. **s. mesocolon,** the fold of the peritoneum attaching the sigmoid flexure of the colon to the left iliac fossa. **s. notch,** see *notch.* **s. valves,** the cardiac semilunar valves.

sigmoidectomy (*sig-moi-dek'-to-me*) [*sigmoid* (2); ἐκτόμη, excision] Excision of a part of the sigmoid flexure of the colon.

sigmoiditis (*sig-moi-di'-tis*) [*sigmoid;* ῖτις, inflammation]. Inflammation of the sigmoid flexure of the colon.

sigmoido- (*sig-moi-do-*) [*sigmoid*]. A prefix denoting relation to the sigmoid flexure.

sigmoidopexy (*sig-moid'-o-peks-e*) [*sigmoido-;* πῆξις, a fixing]. An operation for prolapse of the rectum by fixation of the sigmoid flexure.

sigmoidoproctostomy (*sig-moid-o-prok-tos'-to-me*) [*sigmoido-; proctostomy*]. Anastomosis of the sigmoid flexure of the colon with the rectum.

sigmoidoscope (*sig-moid'-o-skōp*) [*sigmoido-;* σκοπεῖν, to view]. An appliance for the inspection of the sigmoid flexure; it differs from the proctoscope in its greater length and diameter.

sigmoidoscopy (*sig-moid-os'-ko-pe*) [see *sigmoidoscope*] Visual inspection of the sigmoid flexure with the aid of special instruments.

sigmoidostomy (*sig-moid-os'-to-me*) [*sigmoido-;* στόμα, mouth]. The formation of an artificial anus in the sigmoid flexure of the colon.

sigmoidovesical fistula (*sig-moid'-o-ves'-ik-al*) [*sigmoido-; vesica,* bladder]. A fistula communicating the sigmoid flexure and urinary bladder.

Sigmund's glands (*zēg'-moond*) [K. L. *Sigmund,* Austrian physician, 1810–1883]. The epitrochlear lymph glands; their enlargement in syphilis was believed by Sigmund to be a pathognomonic sign.

sign (*sīn*) [*signum,* a mark]. 1. A mark or evidence, in a restricted sense, a physical sign. 2. A conventional character used in pharmacy or otherwise. **s., accessory,** a non-pathognomnic sign. **s., antecedent,** a sign which precedes an attack of a disease. **s., assident,** same as *sign, accessory.* **s., cling.** See *Gersuny's symptom.* **s., coin.** See *bell sound.* **s., commemorative,** a sign of some previous disease **s., echo,** the involuntary repetition of the last syllable, word, or clause of a sentence **s.-language,** the method of intercommunication employed by deaf-mutes, in which ideas are communicated by means of signs. **s., objective,** one apparent to the observer **s., palmoplantar.** See *Filipovitch's sign.* **s.s., physical,** the symptoms derived from auscultation, percussion, etc. **s., subjective,** one recognized only by the patient. See *signs and abbreviations p.* xiv.

signa (*sig'-nah*) [*sign*]. Mark. In prescription-writing, a term placed before the physician's directions to the patient concerning the medicine prescribed; abbreviated to S. or Sig.

signal (*sig'-nal*) [*signum,* a sign] A sign. **s., Marcel Duprez',** the interruption of an electric current produced by a tuning-fork of 100 vibrations per second.

signaletic (*sig-nal-et'-ik*). Relating to signalization.

signalization, signalment (*sig-nal-i-za'-shun, sig'-nal-ment*). See *Bertillonage* and *identification.*

signatura (*sig-nat-ū'-rah*) [L.]. 1. Signature. 2. A characteristic mark. 3. The directions showing how medicines are to be taken.

signature (*sig'-nat-ūr*) [*sign*] 1 The part of the prescription that is to be placed on the label 2 A distinguishing character **signatures, doctrine of,** a theory that the medicinal uses of plants or other objects can be determined from the signatures or peculiar characters

signaturist (*sig'-nat-ū-rist*). A believer in the doctrine of signatures

Signorelli's sign (*sēn-yor-el'-e*) [Angelo *Signorelli*, Italian physician] Pressure on the glenoid fossa, in front of the mastoid process, causes pain in cases of meningitis

signum (*sig'-num*) [L , *pl* , *signa*] A mark, sign, or indication

siguatera (*sig-wah-te'-rah*) [Sp , "fish poisoning"] 1 The name given by Spanish colonists to a complex of symptoms that resulted from eating poisonous fishes indigenous to certain hot countries 2 Poisoning from the ingestion of fresh food uninfected by bacteria, but in which the toxin is a leukomaine formed by the physiological activity of the tissues

sikimin (*sik'-im-in*) [*sikkim*, a region of the Himalaya] A poisonous principle derived from *Illicium religiosum*

silbamine (*sil'-bam ēn*) Fluoride of silver, used for irrigating the urethra and bladder

silberol (*sil'-ber-ol*) See *silver paraphenolsulphonate*

silex (*si'-leks*) [L] See *silica*

Silex's sign (*si'-leks*) Radial furrows about the mouth, and coincidently in other parts of the face, a pathognomonic sign of congenital syphilis **S 's test for glucose in urine** Add ammonia in excess to a strong solution of silver nitrate, add the urine, and boil In the presence of glucose a metallic silver mirror is deposited at the bottom of the tube Aldehyde and tartaric acid give the same reaction

silica (*sil'-ik-ah*) [*silex* flint] Silicon dioxide, SiO_2 occurring in nature in the form of quartz, flint, and other minerals

silicate (*sil'-ik-āt*) [*silica*] A salt of silicic acid

silicea (*sil-is'-e-ah*) A homeopathic preparation of silica and sugar of milk

silicic acid (*sil is' ik*) [*silica*) H_2SiO_4 A tetrabasic acid forming the silicates See *sodium silicate*

silicide (*sil'-is id*) [*silex*, flint] A combination of silicon with another element

silicious, siliceous (*sil-ish'-us*) [*silex* flint] Having the nature of or containing silicon

silicium (*sil ish'-e-um*) See *silicon*

silicofluoride (*sil-ik-o-flu'-o-rīd*) A compound of silicon and fluorine with some other element

silicol (*sil'-ik ol*) [*silex*, flint] An alcohol from a silicon or silicon carbon radical

silicon (*sil'-ik on*) [*silica*] A nonmetallic element occurring widely distributed in nature as silica, SiO_2, and in the form of silicates Atomic weight 28 3, symbol Si, valence IV It resembles carbon in its chemical behavior **s carbide,** a compound prepared by heating in an electric furnace silica and carbon in the presence of salt Next to the diamond it is the hardest substance known. The pure salt forms colorless, transparent laminæ of diamond-like luster Its specific gravity is 3 22 and its index of hardness 9 5 **s. tetracetate,** $Si(O\,C_2H_3O)_4$, aceto-orthosilicic anhydrid, a substance occurring in prismatic crystals

silicosis (*sil-ik-o'-sis*) [*silica*] A deposit of particles of silica in the tissues specifically, a chronic fibroid condition of the lung or the bronchial lymphatic glands, produced by the inhalation of particles of silica

siliform (*sil'-e-form*) Trade name of a preparation containing silicic acid and formic acid in colloidal solution.

siliqua (*sil-ik'-wah*) [*siliqua*, a husk or pod, pl., *siliquæ*] Same as *silique*, **s olivæ, s. olivæ externa,** the nerve-fibers encircling the olive **s. olivæ interna,** dentoliva

silique (*sil ēk'*) [*siliqua*, a husk or pod] In biology, the slender, two-valved capsule of some *Cruciferæ*

siliquose (*sil'-ik-wōs*) Resembling a silique **s. cataract,** see *cataract*

silk [ME] The simplest and most perfect of the textile fibers It differs from all other fibers in that it is found in nature as a continuous fine thread Silk is the product of the silkworm (*Bombyx mori*), and is simply the fiber that the worm spins around itself for protection when entering the pupa or chrysalis state The silk-fiber consists, to the extent of rather more than half its weight, of *fibroin*, $C_{15}H_{23}N_5O_6$ a nitrogenous principle Covering this is the silk glue, or *sericin*, $C_{15}H_{25}N_5O_8$ Besides the true silk, we have several socalled "wild silks ' the most important of which is the *tusser silk*, the product of the larva of the moth, *Antheræa mylitta*, found in India The cocoons are much larger than those of the true silkworm, are egg-shaped, and of a silvery drab color The cocoon is very firm and hard, and the silk is of a drab color Other wild silks are the *eria silk* of India, the *muga silk* of Assam, the *atlas* or *fagara silk* of China, and the *yama-mai silk* of Japan Silk has been used as a hemostatic **s , epipastic,** silk containing some vesicant. **s. floss, dentists',** untwisted filaments of fine silk prepared expressly for the purpose of cleaning the surfaces of the teeth, and used by some dentists for finishing the surfaces of fillings in the sides of teeth **s. gelatin,** a glutinous mass formed by boiling certain kinds of raw silk in water It is used in bacteriology as a culture medium for the majority of bacilli of water and air **s -grass,** pineapple fiber **s , saddler's,** a heavy silk used by saddlers and to some extent in surgery **s , Tait's,** cable twist, it differs from ordinary silk in containing the gums or animal matter imparted by the worm in the spinning process

silkworm-gut. The thread drawn from the silkworm killed when ready to spin the cocoon

sillonneur (*sil-on-ur'*) [Fr] A three bladed scalpel used by ophthalmologists

silphologic (*sil-fol-oj'-ik*) [*σίλφη*, an insect, *λόγος*, science] Larval

silphology (*sil-fol'-o-je*) [*σίλφη*, an insect, *λόγος*, science] The morphology and development of larvæ

silver. See *argentum* **s. arsenite,** Ag_3AsO_3, an alterative and antiseptic, used in skin diseases Dose $\frac{1}{100}$–$\frac{1}{60}$ gr (0 0006–0 0011 Gm) **s.-casein,** a fine white powder, soluble in hot water, obtained from sodium casein by action of silver nitrate and alcohol It is used in gonorrhea in 2 to 10 % solutions **s. chloride,** AgCl, a white powder, soluble in ammonium, potassium thiosulphate, or potassium cyanide It is used as an antiseptic and a nerve-sedative Dose $\frac{1}{2}$–$\frac{1}{4}$–1$\frac{1}{2}$ gr (0 02–0 05–0 1 Gm) Syn , *horn-silver, Luna cornea* **s. citrate,** $Ag_3C_6H_5O_7$, [a fine dry powder soluble in 3800 parts of water,

used as a surgical antiseptic and disinfectant. Application 1 to 2 % ointment or 1:4000 solution. Syn., *itrol*. **s., colloidal,** a form of metallic silver consisting of heavy greenish-black particles of metallic luster which, when triturated with water, form a greenish-black fluid. It is used in the treatment of septic diseases, applied in the form of an ointment. Syn., *argentum colloidale; argentum Credé; collargol*. **s. cyanide.** See *argenti cyanidum* under *argentum*. **s. fluoride,** AgFl, a brown, glassy, elastic solid, very soluble in water, discovered by Paterno in 1901. It is used as an antiseptic. Syn. *tachiol*. **s.-fork deformity,** a peculiar deformity of the wrist and hand in Colles' fracture, resembling the curve on the back of a fork. **s. gelatose,** albargin. **s. ichthyolate,** see *ichthargan*. **s. iodide,** see *argenti iodidum* under *argentum*. **s. lactate,** $AgC_3H_5O_3 + H_2O$, a white, soluble powder, recommended as a surgical antiseptic. Injection in erysipelas 5 gr. (0.3 Gm.) to $3\frac{1}{2}$ oz. (100 Cc.). of water; as a wash, 1 teaspoonful of solution 1:50 in a glass of water. Syn. *actol*. **s.-leaf,** stillingia. **s. nitrate,** see *argenti nitras* under *argentum*. **s. nucleate, s. nucleide,** see *nargol*. **s. oxide,** see *argenti oxidum* under *argentum* **s. paraphenol-sulphonate,** an external antiseptic. Syn., *silberol*. **s. and potassium cyanide,** $AgK(CN)_2$, very poisonous white crystals, soluble in 4 parts of water at 20° C. or 25 parts of 85% alcohol. It is antiseptic and bactericide One part in 50,000 destroys anthrax bacilli **s.-protalbin,** see *largin* **s.-protein, mild,** such as argyrol brand **s.-protein, strong,** same as protargol, *q. v.* **s. sulphocarbolate, s sulphophenate,** a fine, crystalline powder containing about 28 % of metallic silver; it is a noncorrosive antiseptic, used in eye diseases and wounds. **s. test for glucose in urine,** add ammonia in excess to a strong solution of silver nitrate; add the urine and boil In the presence of glucose a metallic silver mirror is deposited at the bottom of the tube. Aldehyde and tartaric acid give the same reaction. **s. thiohydrocarburosulphonate,** see *ichthargan*. **s. trinitrophenolate,** a compound containing 30 % of silver, used as an antiseptic on inflamed mucous surfaces. Syn., *picratol*. **s. vitellin,** see *argyrol*

Silvester's method of artificial respiration (*sil-ves'-ter*) [Henry Robert *Silvester*, English physician, 1828–1908]. It consists chiefly of movements of the arms; this method is valueless in asphyxia neonatorum, owing to nondevelopment of the pectoral muscles

silvol (*sil'-vol*). Trade name of a compound of colloidal silver with an alkaline protein; it contains about 20 % of silver.

Simaba (*sim-a'-bah*) [native name in Guiana] A genus of simarubaceous tropical trees. The seeds of *S. cedron* are antiperiodic and tonic. Dose of *fluidextract* 1–8 min. (0.06–0.5 Cc.). It contains, according to Tanret, the alkaloid *cedronine* and also *cedrin*. The bark also has tonic and febrifuge properties.

Simaruba (*sim-ar-oo'-bah*). A genus of trees of the order *Simarubaceæ*. The bark of the root of *S. officinalis* has been used as a simple bitter.

similia similibus curantur, doctrine of. A sophism formulated by Hippocrates, later by Paracelsus ("simile similis cura, non contrarium"), and later, as one of the results of the reaction against the heroic measures of venesection and drastic medication, by Samuel Christian Friedrich Hahnemann, the founder of homeopathy, whose doctrine that *like is to be cured by like* led naturally to the practice of *isopathy* (*q. v.*), according to which smallpox is to be treated by variolous pus, tapeworm by ingestion of proglottides, etc.

similimum (*sim-il'-im-um*) [L., "most like"]. The homeopathic remedy which will produce the symptom complex "most like" that of a given disease.

Simla trot (*sim'-lah*) [*Simla*, a town in Hindustan]. Synonym of hill diarrhea.

Simmond's disease. See *hypophysial cachexia* under *cachexia*.

Simon's operation. 1. Perineorraphy. 2. Colpocleisis. **S.'s posture,** the dorsal posture with the legs and thighs flexed, the hips elevated, and the thighs abducted. **S.'s symptom,** immobility or retraction of the umbilicus during inspiration, sometimes seen in tuberculous meningitis. **S.'s triangles,** two roughly triangular areas covering —(1) the lower portion of the abdomen, the inner surface of the thigh to a point 10 to 12 centimeters below the pubes, and the inguinal region as far outward as the trochanter (abdominocrural or femoral triangle); and (2) the axillary and pectoral regions and the inner surface of the arm (brachial triangle). They are frequently the seat of petechial or petechioerythematous rashes during the first three days of smallpox.

Simon's symptom-complex (*se'-mon*). In primary cancer of the female breast, metastasis may involve the hypophysis and produce polyuria

Simonart's bands, S.'s threads (*se-mo-nar'*) [Pierre Joseph Cécilien *Simonart*, Belgian obstetrician, 1817–1847]. Amniotic bands formed by drawn-out adhesions between the fetus and the amnion where the cavity has become distended through the accumulation of fluid.

Simonelli's test for renal inadequacy (*se-mo-nel'-le*) [Francesco *Simonelli*, Italian physician]. If the kidneys are healthy, iodine administered appears at the same time in the urine and the saliva.

simple (*sim'-pl*) [*simplex*, simple]. 1. Not complex; consisting of but one substance, or containing only one active substance; not compound. 2. Wanting in intellect. 3. A medicinal plant. See *simples*.

simpler, simplist (*sim'-pler, sim'-plist*). A herb-doctor.

simples (*sim'-plz*) [*simple*]. A term for herbs having a medicinal value.

Simpson's plug or **splint** [William Kelly *Simpson*, American laryngologist, 1855–1914]. A tampon or splint, cut to fit the nares, and inserted to stop epistaxis or to retain the parts in apposition after operation on the nasal septum.

Sims' depressor [James Marion *Sims*, American gynecologist, 1813–1883]. An instrument for depressing the anterior vaginal wall. **S.'s posture,** the semiprone position for vaginal operations. The patient lies on the left side with the right knee and thigh drawn up and the left arm placed along the back; the chest is inclined forward so that the patient rests upon it. **S.'s speculum,** the duckbill vaginal speculum.

simul (*si'-mul*) [L.]. At once; at the same time.

simulation (*sim-ū-la'-shun*) [*simulatio; simulare*, to feign]. In medicine, the feigning or counterfeiting of disease. The pretence of a malingerer.

simulo (*sim'-ū-lo*). The fruit of certain species of *Capparis*, especially *C. coriacea*, of Peru; it is recommended as a cure for epilepsy, and pos-

sesses antiscorbutic and stimulant properties. Dose of the tincture ℥ i–iij; of the fluidextract ℥ ss–iij.

sinal (*si'-nal*). Relating to or situated within a sinus.

sinalbin (*sin-al'-bin*). A white crystalline substance, found in *mustard, q. v.*

sinamine (*sin'-am-ēn*), C_3H_5CN. Allyl cyanamide, a substance obtained from crude oil of mustard.

sinapeleum (*sin-ap-el'-e-um*) [σίναπι, mustard; ἔλαιον, oil]. Mustard-oil.

sinapin (*sin'-ap-in*) [σίναπι, mustard], $C_{16}N_{22}O_5$. A substance occurring as a sulphocyanate in white mustard.

sinapis (*sin-a'-pis*). Mustard See *mustard.*

sinapiscopy (*sin-ap-is'-ko-pe*) [σίναπι, mustard, σκοπεῖν, to view]. The use of mustard as a test of sensory disturbances, analogous to a similar use of *metalloscopy.*

sinapism (*sin'-ap-izm*) [*sinapis*]. A mustard-plaster.

sinapize (*sin'-ap-īz*). To treat or mix with mustard.

sinapized (*sin'-ap-īzd*) [*sinapis*]. Containing mustard

sinapol (*sin'-ap-ol*). A mixture recommended as an application for neuralgia, rheumatism, etc., said to consist of spirit of rosemary (1·15), 780 Gm.; castor-oil, 120 Gm.; menthol, 30 Gm; essence of mustard, 30 Gm.; aconitine, 0.4 Gm.

sinapolin (*sin-ap'-ol-in*). Diallylurea, a substance obtained from mustard oil by heating with water and lead oxide

sincalin (*sing'-ka-lin*). A base found in mustard and identified with cholin

sincipital (*sin-sip'-it-al*) [*sinciput*]. Pertaining to the sinciput.

sinciput (*sin'-sip-ut*) [*semi*, half, *caput*, head] The superior and anterior part of the head Also, the top of the head; the bregma.

sinew (*sin'-ū*). A tendon (*q v.*). **s.-weeping,** ganglion

singers' nodes or **nodules.** *Chorditis nodosa* or *tuberosa a. v*

singult (*sin'-gult*) [*singultus*, a sobbing]. A sob.

singultation (*sin-gul-ta'-shun*) [*singultus*, hiccup]. Hiccupping.

singultient (*sin-gul'-she-ent*). Sobbing; sighing.

singultous (*sin-gult'-us*). Relating to or affected with hiccup.

singultus (*sin-gul'-tus*). See *hiccup.*

sinigrin (*sin'-ig-rin*). A glucoside found in black mustard.

sinister, sinistra, sinistrum [L.] Left.

sinistrad (*sin'-is-trad*) [*sinister*, left; *ad*, toward]. Toward the left.

sinistral (*sin'-is-tral*) [*sinister*]. 1. On the left side. 2. Showing preference for the left hand, eye, foot, etc., for certain acts or functions.

sinistrality (*sin-is-tral'-it-e*) [*sinister*]. The preference generally for the left hand, eye, foot, etc., in performing certain acts.

sinistration (*sin-is-tra'-shun*). 1. A turning to the left. 2. Sinistrality.

sinistraural (*sin-is-traw'-ral*) [*sinister; auris*, ear]. Left-eared; the reverse is *dextraural.*

sinistren (*sin'-is-tren*) [*sinister*, left]. Belonging to the sinistral side in itself.

sinistrin (*sin'-is-trin*) [*sinister*]. A substance resembling dextrin, found in squill. **s., animal.** See under *helicoprotein.*

sinistro- (*sin-is-tro-*) [*sinister*, left]. A prefix meaning left or toward the left side

sinistrocardial (*sin-is-tro-kar'-de-al*) [*sinistro-; καρδία*, heart]. Having the heart to the left of the median line; the reverse is *dextrocardial.*

sinistrocerebral (*sin-is-tro-ser'-e-bral*). 1. Located in the left cerebral hemisphere. 2. Functionating preferentially with the left side of the brain; the reverse is *dextrocerebral.*

sinistrocular (*sin-is-trok'-ū-lar*). Left-eyed; the reverse is *dextrocular.*

sinistrogyration (*sin-is-tro-ji-ra'-shun*) [*sinistro-; gyrare*, to turn]. Turning to the left; as the plane of polarization, or a movement of the eye.

sinistrogyric (*sin-is-tro-ji'-rik*). See *sinistrorse.*

sinistrohepatal (*sin-is-tro-hep'-at-al*) [*sinistro-; ἧπαρ*, liver] Having the liver to the left of the median line, the reverse is *dextrohepatal.*

sinistromanual (*sin-is-tro-man'-ū-al*) [*sinistro-; manus*, hand]. Left-handed; the reverse is *dextromanual*

sinistropedal (*sin-is-trop'-ed-al*) [*sinistro-; pes*, foot] Left-footed; the reverse is *dextropedal.*

sinistrophoria (*sin-is-tro-fo'-re-ah*). See *levophoria.*

sinistrorse (*sin'-is-trors*) [*sinistro-; vertere*, to turn]. In biology, turning from right to left.

sinistrose (*sin'-is-trōs*). A levorotatory sugar; levulose.

sinistrosis (*sin-is-tro'-sis*) [*sinister*, left, awkward]. Shell-shock.

sinistrosplenic (*sin-is-tro-splen'-ik*). Having the spleen to the left of the median line; the reverse is *dextrosplenic.*

sinistrotorsion (*sin-is-tro-tor'-shun*) [*sinistro-; torquere*, to turn] A twisting or turning toward the left, the reverse is *dextrotorsion.*

sinistrous (*sin'-is-trus*). Awkward; unskilled; the reverse is dextrous, skilled, expert

sinkaline, sinkoline (*sink'-al-ēn, sink'-ol-ēn*). An alkaloid found in mustard, identical with *choline, q. v*

sinual (*sin'-ū-al*) [*sinus*, a curve]. Possessing the characteristics of a sinus.

sinuate (*sin'-ū-āt*). Sinuous.

sinuation (*sin-ū-a'-shun*) [*sinuatus*, from *sinuare*, to bend]. 1. The state of being sinuate or sinuous. 2 A cerebral gyre.

sinuatrial. Same as *sinuauricular.*

sinuauricular (*si-nū-aw-rik'-ū-lar*) [*sinus; auricula*, auricle] Pertaining to the sinus venosus and the right auricle of the heart.

sinuitis. See *sinusitis.*

sinuose (*sin'-ū-ōs*). Same as *sinuous.*

sinuosity (*sin-ū-os'-it-e*) [*sinuare*, to bend]. Anfractuosity; the state of being sinuous or bent.

sinuous (*sin'-ū-us*) [*sinuosus; sinus*, a curve]. Wavy, applied especially to tortuous fistulæ and sinuses.

sinus (*si'-nus*) [L., "a gulf or hollow"]. 1. A hollow or cavity; a recess or pocket. 2. The space between the breasts. 3. A large channel containing blood, especially one containing venous blood. 4. A suppurating tract. 5. A cavity within a bone. **sinuses, accessory, of the nose,** the maxillary, frontal, ethmoid, and sphenoid sinuses. **s., air-,** a cavity within bones containing air, especially one communicating with the nasal passages. **s. alæ parvæ,** the sphenoparietal sinus situated along the posterior border of the lesser wing of the sphenoid bone. **s., aortic,** one of the pouch-like dilatations of the aorta opposite the segments of the semilunar valves. **s., cavernous,** a large venous sinus extending from the sphenoidal fissure to the apex of the petrous portion of the temporal

bone, communicating behind with the inferior and superior petrosal sinuses and receiving the ophthalmic vein in front. **s., circular,** a venous sinus surrounding the pituitary body, and communicating on each side with the cavernous sinus. **s. circularis iridis.** See *Schlemm's canal.* **s., common, of the vestibule.** See *utricle* (1). **s., coronary** (of the heart), a large venous sinus in the transverse groove between the left auricle and left ventricle of the heart. **s. ensiformis,** the sinus of Eternod, a vascular loop connecting the vessels of the chor on with the vessels on the under aspect of the yolk-sac. **s., ethmoid,** the ethmoid cells. **s., frontal,** one of the two irregular cavities in the frontal bone containing air and communicating with the nose by the infundibulum. **s. of the heart,** the chief cavity of either of the auricles. **s., inferior longitudinal,** a venous sinus which extends along the posterior half of the lower border of the falx cerebri and terminates in the straight sinus. **s., inferior petrosal,** a large venous sinus arising from the cavernous sinus running along the lower margin of the petrous portion of the temporal bone, and joining the lateral sinus to form the internal jugular vein. **s. intercavernosus, anterior and posterior,** sinuses extending across the hypophyseal fossa and connecting the cavernous sinuses of both sides. **s. irregularity,** a variability in the intervals of cardiac diastole. **s. of kidney,** the prolongation inward of the hilum of the kidney. **s. of the larynx,** the ventricle of the larynx. **s., lateral,** a venous sinus which begins at the torcular Herophili and runs horizontally on the inner surface of the occipital bone to the base of the petrous portion of the temporal bone, where it unites with the inferior petrosal sinus to form the internal jugular vein. **s., lymph,** spaces in the parenchyma of a lymphatic gland between the pulp of the gland and the dilatations of lymphatic vessels. **sinuses, mastoid,** the mastoid cells. **s., maxillary,** the antrum of Highmore. **s., occipital,** a small venous sinus in the attached margin of the falx cerebelli, opening into the torcular Herophili. **s., petrosquamosal.** See *petrosquamosal sinus.* **s.-phlebitis,** inflammation of one of the sinuses of the cranial cavity. **s., placental,** slanting venous channels issuing from the placenta at its uterine surface by piercing the decidua serotina. **s. pocularis,** a large lacuna in the center of the prostatic portion of the urethra. **sinuses, precaval.** See *ducts of Cuvier.* **s., precervical,** a recess between the lowermost branchial arch and the trunk of the embryo. **s., prostatic,** a fossa on each side of the verumontanum. **s. rectus.** Same as *s. straight.* **s., rhomboid, s. rhomboideus,** the fourth ventricle of the brain. **s., sagittal.** See *s., inferior* and *superior longitudinal.* **s., sphenoid,** the air-space in the body of the sphenoid bone, communicating with the nasal cavity. **s., sphenoparietal.** Same as *s. alæ parvæ.* **s., squamosopetrosal.** See *petrosquamosal sinus.* **s., straight,** a venous sinus running from the inferior longitudinal sinus along the junction of the falx cerebri and tentorium to the lateral sinus. **s., superior longitudinal,** a venous sinus which runs along the upper edge of the falx cerebri, beginning in front of the crista galli and terminating at the torcular Herophili. **s., superior petrosal,** a venous sinus running in a groove in the petrous portion of the temporal bone, extending from the posterior part of the cavernous sinus to the lateral sinus. **s., terminal, s. terminalis,** a vein that encircles the vascular area of the blastoderm, and empties either by one trunk, the anterior vitelline vein, into the left vitelline vein, or by two trunks into both vitelline veins. **s.-thrombosis,** thrombosis of the sinuses of the dura mater of the brain. It is usually septic in character, and is likely to lead to pyemia. The most frequent cause is disease of the middle ear. **s., transverse,** a sinus uniting the inferior petrosal sinuses. **s., urogenital,** the canal or duct into which, in the embryo, the Wolffian ducts and the bladder empty, and which opens into the cloaca. **s. venosus.** 1. The chamber of the lower vertebrate heart into which the veins return the blood from the body. 2. The vessel in the septum transversum of the embryonic mammalian heart into which open the vitelline, and allantoic veins, and the ducts of Cuvier. 3. That portion of the adult right auricle behind the crista terminalis.

sinusitis (*si-nus-ī'-tis*) Inflammation of a sinus. **s., serous, s., chronic catarrhal.** See *mucocele.*

sinusoid (*sī'-nus-oid*) [*sinus; εἶδος,* likeness]. 1. Resembling a sinus. 2. One of the relatively large spaces or tubes constituting the embryonic circulatory system in the suprarenal gland, liver, and other viscera.

sinusoidal (*si-nus-oid'-al*). Pertaining to a sinusoid. **s. current,** an alternating induced electrical current with equal current strokes.

sinusoidalization (*sīn-us-oi-dal-ī-za'-shun*). The application of a sinusoidal current.

sionagra (*si-on-a'-grah*) [*σιαγών,* the jaw-bone; *ἄγρα,* a seizure]. Gout in the jaw-bone.

siphon (*sī'-fon*) [*σίφων,* a tube]. A tube bent at an angle, one arm of which is longer than the other, for the purpose of removing liquids from a cavity or vessel

siphonage (*si'-fon-aj*) [*σίφων,* a siphon]. The action of a siphon, such as washing out the stomach, drainage of wounds, etc.

siphonoma (*sī-fon-o'-mah*) [*siphon; ὄμα,* tumor]. A tumor composed of fine tubes. Syn., *Henle's tubular tumor.*

Sippy's method (*sip'-e*) [Bertram Welton *Sippy,* American physician, 1866–1924]. To treat gastric ulcer by checking the acidity of the gastric juice, with the idea of preventing further corrosive action.

siren (*sī'-ren*). Same as sirenomelus.

sirenomelus (*si-ren-om'-el-us*) [*σειρήν,* mermaid; *μέλος,* a limb]. A monster whose lower extremities are intimately fused, the feet being absent.

siriasis (*sir-i'-as-is*). Sunstroke.

sirolin (*sir'-ol-in*). Thiocol, 10%, in a syrup of orange bark. It is used in tuberculosis, bronchitis, and intestinal catarrh. Dose 3 or 4 teaspoonfuls (15–20 Cc.) daily.

sirup (*sir'-up*). See *syrup.*

sistomensin (*sis-to-men'-sin*). A hormone from the *corpus luteum.* It restricts menstruation to normal limits.

Sisymbrium (*sis-im'-bre-um*) [*σισύμβριον,* from *σῦς,* a pig; *δύβριος,* rainy, wet; a plant growing in wet places where swine wallowed]. A genus of cruciferous plants. *S. officinale,* wild mustard, singer's herb, is a European species, laxative, diuretic, and expectorant, and is employed in laryngeal catarrh and laryngitis. Dose 3 cupfuls a day of a decoction of 30 Gm. of the leaves, sweetened with 60 Gm. of a syrup of the drug made in the usual way.

site (*sīt*) [*situs*, place]. Situation. **s., placental,** the area to which the placenta is attached.

sitfast. In farriery, a piece of dead tissue in the skin which would be thrown off but that it has formed firm connections with the fibrous skin beneath, or with the deeper tissues, and is thus bound in its place as a persistent source of irritation.

sitieirgia (*sit-e-ĭr'-je-ah*) [σιτίον, food; εἴργειν, to shut out]. Sollier's term for hysterical anorexia.

sitiology (*sĭ-te-ol'-o-je*). See *sitology*.

sitiomania (*sĭt-e-o-ma'-ne-ah*). See *sitomania*.

sitiophobia (*sĭt-e-o-fo'-be-ah*). See *sitophobia*.

sitogen (*si'-to-jen*). A vegetable food-product intended to replace meat-extracts.

sitology (*sĭ-tol'-o-je*) [σιτιόν, nourishment; λόγος, a treatise]. The science of nourishment or dietetics.

sitomania (*sĭ-to-ma'-ne-ah*) [σῖτος, food; μανία, madness]. 1. A periodic craving for food; periodic bulimia. 2. Sitophobia.

sitophobia (*sĭ-to-fo'-be-ah*) [σῖτος, food; φόβος, fear]. Morbid aversion to food.

sitotherapy (*sĭ-to-ther'-a-pe*) [σῖτος, food; θεράπεια, treatment]. Dietotherapy.

sitotoxicon (*sĭ-to-toks'-ĭk-on*) [σῖτος, food; τοξικόν, poison]. The active poisonous agent in sitotoxism.

sitotoxin (*sĭ-to-toks'-ĭn*) [see *sitotoxicon*]. Any basic poison generated in vegetable food by growth of bacteria or fungi.

sitotoxism (*sĭ-to-toks'-ĭzm*) [see *sitotoxicon*]. Poisoning with vegetable food infected with molds and bacteria.

situs (*sī'-tus*) [L., "site"]. A position. **s. perversus,** malposition of one or more of the viscera. **s. transversus.** Same as *s. inversus*. **s. viscerum inversus,** an anomaly in which the viscera of the body are changed from the normal to the opposite side of the body.

sitz-bath (*sĭts'-bath*) [Ger., *Sitz*, a seat; *bath*]. A hip-bath; a bath taken in a sitting posture.

six hundred and six. See *salvarsan*.

sixth nerve. The abducens nerve. See *nerves, table of*. **s. sense,** muscle-, joint-, and splanchnic sense.

Sjoeqvist's test for the quantitative estimation of free HCl in the gastric juice (*syo'-kvĭst*) [John August *Sjoeqvist*, Swedish physician, 1863–1917]. It depends upon the action of barium carbonate on the acid of the secretion, the hydrochloric acid being estimated as barium chloride by means of titration with a solution of potassium dichromate.

skatol (*skat'-ol*) [σκατός, gen. of σκῶρ, dung], C_9H_9N, methyl indol; it is a nitrogenous compound produced by the decomposition of proteids in the intestinal canal.

skatophagia (*skat-o-fa'-je-ah*). See *scatophagia*.

skatoxyl (*skat-oks'-ĭl*) [σκῶρ (σκατ-), dung; ὀξύς, acid]. A product of the oxidation of skatol. It is obtained from the urine in cases of disease of the large intestine.

Skeer's sign. A yellowish-brown ring near the pupillary margin of the iris, observed in the early stage of some cases of tuberculous meningitis.

skein (*skān*) [ME., *skeyne*, skein]. 1. A fixed length of any thread or yarn of silk or other material, doubled again and again and knotted. 2. A synonym of *spirem*. **s., close.** See *spirem*. **s., loose,** the thickened chromatin fibrils resulting from a loosening of the spirem or close skein in mitotic cell-division. **skeins, test.** See *Holmgren's test*.

skelalgia (*skel-al'-je-ah*) [σκέλος, leg; ἄλγος, pain]. Pain in the leg.

skeletal (*skel'-et-al*) [*skeleton*]. Pertaining to or connected with the skeleton or supporting structure of a body. **s.-muscle,** a muscle attached to the skeleton. **s.-tissue,** the tissue of the framework of the body.

skeletins (*skel'-et-ĭnz*) [*skeleton*]. A name given to a number of insoluble epithelial products found chiefly in invertebrates.

skeletization (*skel-et-ĭ-za'-shun*) [*skeleton*]. 1. The process of converting into a skeleton; gradual wasting of the soft parts, leaving only the skeleton.

skeleto- (*skel-et-o-*) [*skeleton*]. A prefix meaning relating to the skeleton.

skeletogenous (*skel-et-oj'-en-us*) [*skeleto-*; γεννᾶν, to produce]. Producing a skeleton or skeletal tissues.

skeletography (*skel-et-og'-ra-fe*) [*skeleto-*; γράφειν, to write]. A description of the skeleton.

skeletology (*skel-et-ol'-o-je*) [*skeleto-*; λόγος, science]. The branch of anatomy treating of the skeleton.

skeleton (*skel'-et-on*) [σκελετόν, a dried body, from σκέλλειν, to dry up]. A supporting structure, especially the bony framework (*osseous skeleton*) supporting and protecting the soft parts of an organism **s., appendicular,** the skeleton of the limbs. **s., axial,** the skeleton of the head and trunk. **s., cartilaginous,** the cartilaginous structure from which the bony skeleton is formed through ossification.

skeletopy (*skel-et'-op-e*). See *skeletotopy*.

skeletotopic (*skel-et-o-top'-ĭk*). Applied by Waldeyer to such topographic description as refers a part or organ to its relation to the skeleton.

skeletotopy (*skel-et-ot'-o-pe*) [*skeleto-*; τόπος, a place] Waldeyer's term for the relation of an organ or part to the osseous skeleton of the whole organism. Cf. *holotopy; idiotopy; syntopy*.

Skene's glands (*skēn*) [Alexander Johnston Chalmers *Skene*, American gynecologist, 1838–1900]. Two complex tubular glands in the mucosa of the female urethra opening by small ducts just within the meatus urinarius.

skeneoscope (*skē'-ne-skōp*) [see *Skene's glands*]. An endoscope for use in examining Skene's glands.

skeptophylaxis (*skep-to-fi-laks'-ĭs*) [σκεπτικός, doubtful; *phylaxis*]. A condition of brief, temporary, immunity produced by a minute dose of a poisonous substance, while the blood of the animal remains toxic.

skérljivo. See *scherlievo*.

skew muscles. Triangular-shaped or quadrilateral shaped muscles, the plane of whose line of origin intersects that of the insertion.

skiagram (*skĭ'-ag-ram*) [σκία, shadow; γράμμα, a writing]. The finished, printed Roentgen-ray picture. Syn., *inductogram; shadowgram*.

skiagraph (*skĭ'-ag-raf*). See *skiagram*.

skiagrapher (*skĭ-ag'-raf-er*). An adept in skiagraphy.

skiagraphy (*ski-ag'-ra-fe*) [σκία, shadow: γράφειν, to write]. Photography by the Roentgen-rays; skotography, skiography, radiography, electrography, electroskiography, Roentography, and the new photography are names that have been used to designate the method.

skiameter (*ski-am'-et-er*) [σκία, shadow; μέτρον, a measure]. An apparatus devised by Biesalski for measuring the intensity of the Roentgen-

rays and for the recognition of fine differences in the density of Roentgen-ray shadows.

skiametry (*ski-am'-et-re*). Shadow mensuration applied to a method of determining the density of Roentgen-ray shadows.

skiaporescopy (*ski-ap-or-es'-ko-pe*). See *retinoscopy*.

skiascope (*ski'-as-kōp*) [σκία, shadow; σκοπεῖν, to view]. An instrument employed in retinoscopy. **s.-optometer,** an optometer designed for the determination of the refraction of the eye by retinoscopy.

skiascopy, skiascopia (*ski-as'-ko-pe, ski-as-ko'-pe-ah*). 1. See *retinoscopy*. 2. Examination by either skiagraph or fluoroscope.

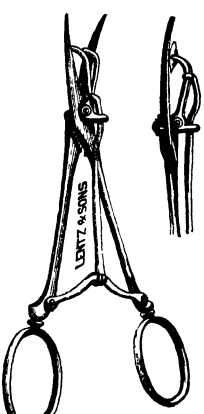
skiatherapy (*ski-ah-ther'-ap-e*) [σκία, shadow; θεραπεία, therapy]. The therapeutic application of Roentgen-rays.

skimmetin (*skim'-et-in*), $C_9H_8O_3$. A dissociation product of skimmin by action of dilute mineral acid with heat; it is perhaps identical with umbelliferone.

Skimmia (*skim'-e-ah*) [*mijama-skimmi*, Japanese name]. A genus of the *Rutaceæ*. *S. japonica* is a species of Japan; the flowers are used to flavor tea; the leaves contain an ethereal oil; the bark contains the glucoside *skimmin*.

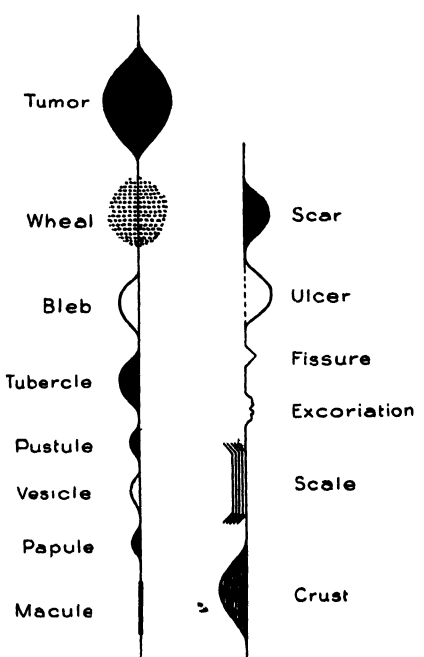
Skimmin (*skim'-in*), $C_{15}H_{16}O_8$. A glucoside similar to scopolein and esculin isolated from the bark of *Skimmia japonica*, occurring in long, colorless needles, soluble in hot water, alcohol, or alkalies, insoluble in chloroform or ether; melts at 210° C.

skin [ME.]. The protective covering of the body, composed of the epidermis, *scarf-skin*, or cuticle, and the corium, or *true skin*. The epidermis consists of a deep layer, the *stratum Malpighii*, and three superficial layers—the *stratum granulosum*, the *stratum lucidum*, and the *stratum corneum*. The corium, derma, or *true skin* consists of a papillary and reticular layer (*stratum papillare* and *stratum reticulare*), the former projecting upward in the form of papillæ. The true skin is made up of elastic tissue, white fibrous tissue, and nonstriped muscular tissue (the arrectores pili). The subcutaneous tissue consists of fibroelastic and adipose tissue. The *appendages of the skin* are the nails, hairs, and sweat- and sebaceous glands, which are derivatives of the epithelial layer of the skin. In the skin are also placed terminal nerve-organs subserving the sense of touch. **s., atrophy of the,** a wasting-away or retrogressive change in the skin. Syn., *dermatrophia*. **s.-bound.** See *scleroderma*. **s.-bound disease.** See *scleroderma neonatorum*. **s., bronzed.** See *Addison's disease*. **s., congestion of the,** engorgement of the blood-vessels of the skin. Syn., *dermathemia*. **s., deciduous,** keratolysis. **s., edema of the,** effusion of serum into the areolar tissue of the skin. Syn., *dermatochysis*. **s., fish.** See *ichthyosis*. **s., glossy,** a peculiar shiny, glazed skin seen in conditions in which the trophic nerve-supply to the skin is cut off, as after injury to a nerve. **s., goldbeaters',** a thin tenacious sheet from the cecum of cattle, occasionally used as a surgical dressing **s., goose-.** See *goose-flesh* **s.-grafting.** See also *graft*. The application of pieces of the outer layers of healthy skin to a granulating surface for the purpose of hastening its cicatrization (1) *Autoepidermic:* When the epithelial cells are taken from the patient, it includes—(*a*) scrapings from healthy skin; (*b*) corn shavings; (*c*) pellicles from blisters; (*d*) the Ollier-Thiersch method, in which one-half the skin thickness (epidermis, rete, and part of the cutis proper) is required; and (*e*) the Krause method, in which the whole thickness of the skin is used in grafting (2) *Heteroepidermic:* When the epithelial cells are furnished by another person. (3) *Zoodermic:* When the skin is removed from lower species, as the use of—(*a*) small pieces of sponge; (*b*) frog skin; (*c*) inner membrane of hens' eggs; (*d*) inner surface of pullets' wings; (*e*) skin of pups; (*f*) skin of guinea-pigs; (*g*) skin of rabbits. **s., hypertrophy of the,** excessive growth of the skin. Syn., *dermathypertrophia*. **s., neuralgia of the.** See *dermatalgia*. **s., parchment,** atrophy of the skin. **s., pigmentation of the.** See *dermatodyschroia*. **s.-shedding.** See *keratolysis*.



SKIN GRAFTING SCISSORS.

skinny (*skin'-e*) [ME.]. 1. Cutaneous. 2. Emaciated.



SKIN LESIONS.

skirt. The diaphragm.

sklerіasis (*skle-rі'-as-ıs*). See *scleroderma.*

sklerodactylia. See *sclerodactylia.*

Skoda, consonating rales of (*sko'-dah*) [Joseph *Skoda*, Austrian physician, 1805–1881]. Bronchial rales heard through the consolidated pulmonary tissue of pneumonia. **S.'s resonance sign, S.'s tympany,** a tympanitic note heard above the line of fluid in a pleuritic effusion, or above the line of consolidation in pneumonia.

Skodaic resonance. See *Skoda's sign*

skolikoiditis (*sko-le-koid-ı'-tıs*) [σκώληκοειδης, worm-like]. Synonym of *appendicitis.*

skoliosis. See *scoliosis*

skoliosometer (*sko-le-o-som'-et-er*) [σκολιός, curved; μέτρον, measure] See *scoliosometer*

skookum chuck [Amer. Ind., "good water"]. A homeopathic remedy for skin diseases consisting of a trituration of the salts of the spring of this name. Dose 2 gr. (1 03 Gm.) in one-half glass of water, teaspoonful every 2 or 3 hours.

skopophobia (*sko-po-fo'-be-ah*) [σκοπος, a spy; φόβος, fear] Insane dread of spies

skotograph (*skot'-o-graf*). See *skiagraph.*

skotography (*skot-og'-raf-e*). Synonym of *skiagraphy*

skrimshanking (*skrim'-shank-ing*). A mild form of malingering.

skull (*skul*) [Icel., *skāl*, a bowl]. The bony framework of the head, consisting of the cranium and the face. The cranium is made up of the occipital, frontal, sphenoid, and ethmoid bones, and the two parietal and two temporal bones The face is composed of two nasal, two superior maxillary, two lacrimal, two malar, two palate, and two inferior turbinated bones, and the vomer and inferior maxillary bone. *Modes of measuring the capacity of the skull: Broca's method:* 1. The skull, made impermeable, is filled with water, which can be weighed or measured. 2. The skull is packed with shot, which is then measured; but both the filling and measuring are aided by certain implements, and especially by a funnel of certain dimensions, which controls the flow of shot, and every step of the procedure follows definite rules. *Method of Busk, Flower, or Tiedemann:* the skull is filled with small, rounded seeds, beads, shot, or other substance, and the contents are then measured. The filling or the measuring (or both) is aided by certain manipulations (tilting, tapping, etc.). *Method of Schmidt or Matthews.* See *Broca's method* above. *Welcker's method:* the mode of filling the skull, so long as efficient and uniform, is immaterial; all that is required is that each worker should, with the aid of a standard skull, find the exact size of the funnel necessary to give him, in measuring, the correct result with his particular method and substance used for the filling of the skull. **s.-cap.** 1. The top of the skull. 2. See *scutellaria.* **s., natiform,** a skull covered with osteophytes. **s.-roof,** the roof of the skull; skull-cap. **s., tower.** See *oxycephalia*

skunk-cabbage. *Dracontium fœtidum*, the rhizome of which is stimulant, antispasmodic, and narcotic and has been used in asthma, rheumatism, hysteria, and dropsy.

slabber (*slab'-ur*) See *slaver*

slag wool [Sw., *slagg*, dross]. A product of blowing a jet of steam into melted slag; it is noninflammable and a nonconductor of heat.

slake (*slāk*) [AS. *sleccan*, to quench; extinguish]. 1. To quench or appease. 2. To disintegrate by the action of water.

slaver (*slav'-er*) [ME.] Drivel; saliva, especially such as is discharged involuntarily.

sleep. The periodic state of rest in which voluntary consciousness and activity cease. **s.-drunkenness.** See *somnolentia.* **s.-epilepsy.** See *narcolepsy.* **s., hypnotic, s., magnetic, s., mesmeric.** See *hypnotism* **s.-paralysis,** paralysis produced by pressure during sleep. **s., paroxysmal.** See *narcolepsy.* **s., twilight.** See *twilight.* **s.-walking.** See *somnambulance*

sleeping dropsy or **sickness.** 1. A disease characterized by increasing somnolence. See *African lethargy.* 2. Encephalitis lethargica.

sleeplessness (*slēp'-les-nes*). See *insomnia.*

slender column. See *funiculus gracilis.* **s. lobe of cerebellum,** a small lobe in the inferior surface of the cerebellum.

slide (*slīd*). A piece of glass, usually 3 × 1 in. on which objects are examined by the microscope.

slimming treatment. Any therapeutic measures that make one slim.

sling. A supporting bandage; usually slung from the back of the neck.

slit [ME.]. A narrow opening; a visceral cleft; the separation between the labia, the vulvar cleft **s., genitourinary, s., urinogenital, s., urogenital,** the urogenital opening. **s. of the microspectroscope,** the spectral ocular, in place of an ordinary diaphragm, has two movable knife edges so arranged that a slit-like opening of greater or less width and length may be obtained by the use of screws for that purpose.

slit lamp of Gullstrand. An apparatus which, in combination with the corneal microscope, enables the physician to observe the living endothelium on the posterior surface of the cornea.

slobber (*slob'-ur*) See *slaver.*

sloid, sloyd (*sloid*) [Sw., *slojd*, slight skill]. A system of manual training taught in elementary school; it is of Swedish origin.

slough (*sluf*) [ME., *slouh*, the skin of a snake]. The separated dead matter in an ulceration.

sloughing (*sluf'-ing*) [*slough*]. Pertaining to or characterized by sloughs.

slows (*slōz*). Synonym of *milk-sickness.*

Sluder's method (*sloo'-der*) [Greenfield *Sluder*, American laryngologist, 1865–]. *Of tonsillectomy:* Removal of the tonsil and its capsule.

sludge (*sluj*) [AS., *slog*, mud]. Sewage-deposit.

slumber (*slum'-ber*) [ME., *slumberen*, to slumber]. 1 To sleep lightly. 2 Light sleep.

smalarina (*smal-ar-ı'-nah*). A preparation of mercury and antimony, used in treating malaria.

smallpox. See *variola.* **s., West Indian,** alastrim.

smear-cultures (*smēr*). See *culture.*

Smee's battery [Alfred *Smee*, English surgeon, 1818–1877] Positive element, zinc; negative element, platinized silver; exciting agent, sulphuric acid, dilute; depolarizing agent, none; E. M. F., 0.5 to 1.0 volt.

smegma (*smeg'-mah*) [σμῆγμα, a cleansing substance]. 1. Sebum. 2. See *s. præputii.* **s. clitoridis,** the substance secreted by the sebaceous glands of the clitoris and labia minora. **s. embryonum.** See *vernix caseosa.* **s. præputii,** or simply **smegma,** the substance secreted by the sebaceous glands of the prepuce.

smegamatic (*smeg-mat'-ik*). Pertaining to, or of the nature of smegma.

smell. 1. The perception of odor. 2. Odor.

Smellie-Veit method (*smel'-e-vīt'*) [William *Smellie*, English obstetrician, 1697–1763;—*Veit*]. Same as Mauriceau's method, *q. v.*

smelling-salts. A name applied to various preparations of ammonium carbonate scented with aromatic substances.

smesches (*sme'-chez*). Puffs of arsenic trioxide gas which occasionally escape from the doors of the calcining furnaces in Cornish arsenic works, and which give rise to pulmonary irritation among the workmen.

smilacin (*smī'-las-in*) [*smilax*]. 1. The precipitate from a tincture of the root of sarsaparilla, *Smilax officinalis*, alterant, detergent, diaphoretic, and stimulant. Dose 2–5 gr. (0.13–0.32 Gm.). 2. $C_{40}H_{70}O_8$ (Flückiger) or $C_{18}H_{30}O_8$ (Poggiale) or $C_{15}H_{26}O_8$ (Peterson). Folchi's name for a saponin-like glucoside found by Palotta, in 1824, in sarsaparilla-root (various species of *Smilax*), and named by him *pariglin*. It forms a yellowish-white powder, soluble in water and alcohol; alterative, expectorant, and emetic, and used in syphilis and colds. Dose 1–3 gr. (0.065–0.2 Gm.). Syn., *parillin* (Batha); *salseparin* (Thubeuf).

smilax (*smī'-laks*). See *sarsaparilla*.

smile (*smīl*) [ME., *smil*]. A joyful expression. **s., levator, s., nasal,** W. R. Gowers' name for a peculiarity of expression in some patients affected with myasthenia, consisting in absence of normal movement at the corners of the mouth

smith's cramp. An occupation-neurosis occurring in smiths, and characterized by painful cramps in the arm or hand.

Smith's disease [Eustace *Smith*, English physician, 1835–1914]. Mucous colitis. **S.'s sign,** a murmur audible over the sternum when the chin is drawn up.

Smith's dislocation of the foot [Robert William *Smith*, Irish surgeon, 1807–1873]. Dislocation upward and backward of all the metatarsal bones, together with the internal cuneiform bone. **S.'s fracture,** transverse fracture about five centimeters above the lower extremity of the radius.

Smith's operation [Henry *Smith*, English surgeon]. 1. *For hemorrhoids:* crushing by means of a clamp, and applying the Paquelin cautery to the stump after cutting away the projecting part. 2. *For cataract:* Extraction of immature cataract with the capsule.

Smith's phenomenon [Theobald *Smith*, American scientist, 1859–]. Animals injected with a foreign serum or inert protein often die or show severe symptoms after a second injection, even in minute quantity.

Smith's reaction for bile-pigments. Pour tincture of iodine carefully over the liquid to be tested. A green ring appears between the two liquids.

smoker (*smo'-ker*). One who uses tobacco. **s.s' cancer.** See *cancer*. **s.s' dyspepsia.** See *dyspepsia*. **s.s' patch,** a chronic inflammation of a small spot of the mucous membrane of the mouth arising from an irritation produced by the pipe. It varies in size from a quarter to a half of an inch in diameter, and is smooth and red in appearance. **s.s' sore-throat,** the condition of catarrh of the pharynx and larynx, with hoarseness, common in habitual smokers. **s.s' vertigo.** See *vertigo*.

smoke test for plumbing. "By means of bellows, or some smoke-producing rocket, smoke is forced into the system of pipes, the ends plugged up, and the escape of the smoke watched for, as wherever there are defects in the pipes the smoke will appear" [Price].

smudging (*smuj'-ing*). A form of defective speech in which the difficult consonants are dropped.

Sn. Chemical symbol of tin [*L., stannum*].

snaggle-teeth (*snag'-l*). Irregular and oblique dentition.

snakeroot. See *cimicifuga*, *senega*, and *serpentaria*.

snake venum. See *venom*.

snap-finger. See *spring-finger*.

snare (*snār*). A light or small écraseur, or wire loop, used in removing polypi and small excrescences. **s. cold,** the ordinary snare. **s. galvanocaustic, s., hot,** a snare in which the wire is heated by a galvanic current.

sneeze (*snēz*) [AS., *fneósan*, to sneeze]. A sudden, noisy, spasmodic expiration through the nose.

sneezing. The act of expelling air violently through the nose. **s., pregnancy,** spasmodic fits of sneezing from hyperemia of the nasal mucosa, following a circulatory disturbance due to pregnancy

Snell's laws [Simon *Snell*, English ophthalmologist, 1851–1909] The two laws which govern single refraction (1) The sine of the incident angle bears a fixed ratio to the sine of the angle of refraction or the same two mediums, the ratio varying with different mediums. (2) The incident and the refracted ray are in the same plane, which is perpendicular to the surface separating the two mediums.

Snellen's types [Hermann *Snellen*, Dutch ophthalmologist, 1834–1908]. See *test-types*

snore, snoring [ME., *snoren*, to snore]. 1. To breathe through the nose in such manner as to cause a vibration of the soft palate, thereby producing a rough, audible sound. 2. The sound so produced.

Snow, external symptoms of (*sno*). Bulging of the sternum when the thymus gland and its lymphatics are involved secondary to cancer of the breast.

snow-blindness. See *blindness, snow-*.

snuff (*snuf*) [ME., *snuffen*, to snuff]. 1. Powdered tobacco, variously perfumed and mixed, used for inhalation into the nostrils. 2. A medicated powder to be insufflated into the nostrils. 3. To inhale; to smell. **s.-box, anatomist's,** the *foveola radialis*.

snuffles. Coryza, especially of infants, which is frequently due to inherited syphilis.

SO_2. Sulphur dioxide.

soamine (*so-am'-in*). Trade name of sodium para-aminophenylarsonate, an arylarsonate. It is similar to atoxyl, and is used in syphilis, trypanosomiasis and pellagra.

soap [*sapo*, soap]. A chemical compound made by the union of certain fatty acids with an alkali or other metal. According to the alkali used, the soap formed is a potash-soap, soda-soap, ammonia-soap, lead-soap, lime-soap, etc. **s., animal,** tallow soap. **s.-bark.** See *quillaia*. **s., Castile,** soap made from olive-oil. **s., gray,** soap to which mercury and benzoinated fat are added. Syn., *sapo cinereus*. **s., green** (*sapo mollis*, U. S. P.), soft soap, made from linseed-oil and potash. The *sapo mollis* of the B. P. is made from olive-oil and potash. Syn., *potash-soap*. **s., green, tincture of** (*linimentum saponis mollis*, U. S. P., B. P.), liniment of soft soap, used as an anodyne. **s., hard.** See *s., soda-*. **s. liniment** (*linimentum saponis*, U. S. P., B. P.).

liquid opodeldoc, used as a sedative liniment in rheumatic affections and sprains. **s. plaster** (*emplastrum saponis*, U. S. P., B. P.), used as a local sedative. **s., potash-.** See *s., green.* **s., soda-** (*sapo*, U. S. P.; *sapo durus*, B. P.), hard soap, made from sodium hydroxide and olive-oil. It enters into the composition of various pills, and from it are also prepared soap plaster and soap liniment. **s., soft.** See *s., green.* **s., Spanish,** castile soap.

sob. A convulsive inspiration due to contraction of the diaphragm and spasmodic closure of the glottis.

socaloin (*so-kal'-o-in*), $C_{18}H_{16}O_7$. Aloin obtained from Socotrine aloes.

socia parotidis (*so'-se-ah par-ot'-id-is*). A small separate lobe of the parotid gland.

social (*so'-shal*) [*socius*, a companion]. Gregarious, growing near, or together. **s. evil,** prostitution.

society screw. The screw at the lower end of the drawtube or body-tube of a microscope for receiving the objective.

sociology (*so-se-ol'-o-je*) [*socius*, a fellow-being, λόγος, a treatise]. A treatise on the mutual relations of people and of social organization.

sock (*sok*) [ME., *socke*]. 1. A short-legged stocking. 2. An insole. **s. instep arch,** a device to be worn inside the shoe in cases of flat-foot. **s.s, Neapolitan,** socks containing mercurial ointment, which are to be worn continuously for the purposes of inunction.

socket (*sok'-et*) [ME., *soket*]. The concavity into which a movable part is inserted. **s., tooth,** the alveolus in which the tooth is fixed.

socordia (*so-kor'-de-ah*) [*socors*, silly]. Hallucination.

soda (*so'-dah*) [Ital., from L., *solidus*, solid]. 1. Sodium oxide, Na_2O. 2. Sodium carbonate or sodium bicarbonate. See *sodium*. 3. Sodium hydroxide, NaOH. **s., baking-,** sodium bicarbonate. **s., caustic,** sodium hydroxide. **s., chlorinated,** a mixture of sodium chloride and sodium hypochlorite. **s.-soap.** See *soap, soda-*. **s., washing,** sodium carbonate. **s.-water,** water impregnated with carbon dioxide.

sodacol (*so'-dak-ol*). The sodium salt of guaiacol sulphonic acid.

sodic (*so'-dik*) [*soda*]. Derived from or containing soda or sodium.

sodii (*so'-de-i*) [L.; genitive of sodium]. Of sodium.

sodio-. A prefix denoting a compound containing sodium.

sodium (*so'-de-um*) [*soda*]. A metallic element of the alkaline group of metals, melting at 95.6° C., and having a specific gravity of 0.97, an atomic weight of 23, and a valence of one. Symbol Na, from the Latin *natrium*. Sodium occurs widely distributed in nature, and forms an important constituent of animal tissues. It has a strong affinity for oxygen and other non-metallic elements. It is also a constituent of many medicinal preparations. **s.-acetanilid sulphonate,** a white, crystalline mass, readily soluble in water, used as a substitute for antipyrin. **s. acetate** (*sodii acetas*, U. S. P.), $NaC_2H_3O_2 + 3H_2O$, is diuretic. Dose 20 gr.–2 dr. (1.3–8.0 Gm.). **s. acid sulphosalicylate.** See *s. sulphosalicylate, acid.* **s. anhydromethylenecitrate,** an antilithemic remedy depending for its action upon the liberation of formaldehyde in the blood. Syn., *citarin*. **s. anisate,** $2NaC_8H_7O_3 + H_2O$, small colorless scales, soluble in water; antipyretic and antirheumatic. Dose 5–15 gr. (0.32–1.0 Gm.). **s. arsenate** (*sodii arsenas*, U. S. P.), $NaH_2AsO_4 + 7H_2O$, clear, colorless, poisonous prisms, with mild alkaline taste, soluble in 4 parts of water; alterative, tonic, antiseptic. From it is prepared *liquor sodii arsenatis* (U. S. P.). Dose $\frac{1}{64}$–$\frac{1}{20}$–$\frac{1}{8}$ gr. (0.001–0.003–0.008 Gm.). Antidotes—emetics, stomach siphon, fresh ferric hydrate, dialyzed iron, ferric hydrate and magnesia, demulcents, stimulants, warmth. **s. arsenate, exsiccated** (*sodii arsenas exsiccatus*, U. S. P.), Na_2HAsO_4. Dose $\frac{1}{10}$ gr. (0.003 Gm.). **s. arseniate.** See *s. arsenate.* **s. arsenotartrate,** a soluble arsenic salt recommended as a substitute for potassium arsenite and arsenic trioxide. **s. aurochloride,** $AuCl_3NaCl + 2H_2O$, a golden-yellow powder said to contain 30% of gold and freely soluble in water, sparingly so in alcohol. It is used in syphilis. Dose $\frac{1}{6}$–1 gr. (0.01–0.06 Gm.). **s. benzoate** (*sodii benzoas*, U. S. P., B. P.), $NaC_7H_5O_2$, is used in gout, rheumatism, lithemia, influenza, etc. Dose 1–2 dr. (4–8 Gm.). **s.-benzoyl-sulphonicimide.** See *saccharin*. **s. biborate.** See *s. borate.* **s. bicarbonate** (*sodii bicarbonas*, U. S. P., B. P.), $NaHCO_3$, is used as an antacid in dyspepsia, gout, rheumatism, lithemia, and diabetes. Dose 10 gr.–1 dr. (0.65–4.0 Gm.). **s. biiodosalicylate.** See *s. diiodosalicylate.* **s. bismuth citropyroborate,** lustrous leaflets, soluble in water, insoluble in alcohol; used in gastralgia. **s. bisulphate,** $NaHSO_4 + H_2O$; it is used as a means of rendering water infected by typhoid bacilli drinkable and harmless for troops in the field. **s. bisulphite** (*sodii bisulphis*, U. S. P.), $NaHSO_3 + H_2O$, opaque prisms or granular powder of disagreeable taste, soluble in 4 parts o, water, 72 parts of alcohol, or 2 parts of boiling water. It is antipyretic and antiseptic, used in gastric fermentation and as a parasiticide in skin diseases. Dose 10–30 gr. (0.65–2.0 Gm.). Syn., *leucogen*. **s. biurate,** the deposit of this salt in or upon the tissues of the joints is held to be the etiological factor in arthritic manifestations of gout. **s. borate** (*sodii boras*, U. S. P., B. P.), borax, $Na_2B_4O_7.10H_2O$, is used in dysmenorrhea, in uric-acid diathesis, in stomatitis, and as an antiseptic. In over-doses it is a depressant poison. See *boron*. **s. borobenzoate,** a compound of borax, 3 parts, and sodium benzoate, 4 parts, dissolved in water and evaporated. **s. borosalicylate,** a hard mass obtained by triturating 32 parts of sodium salicylate and 25 parts of boric acid with a little water; it is a soluble antiseptic. Syn., *borsalicylate; borsalyl; borosalicyl*. **s. borosulphate,** $SO_2.OBO.Na$, odorless, vitreous masses of faint, harsh, acidulous taste, soluble in 5 parts of water. It is an internal and external antiseptic. Dose 5–10 gr. (0.3–0.6 Gm.) 5 or 6 times daily, in water. Application, 1 to 2% solution. Syn., *borol*. **s. bromide** (*sodii bromidum*, U. S. P., B. P.), NaBr, is used like the other bromides. Dose $\frac{1}{2}$–2 dr. (2–8 Gm.). **s. cacodylate, s. methylarsenate.** See *arrhenal* and *neoarsycodyl*. **s. caffeine sulphate, s. caffeine sulphonate, s. and caffeine sulphonate,** $C_8H_9N_4O_2.SO_3Na$, soluble in 50 parts of water, in 7 parts of boiling water; used as a diuretic in obesity and dropsy. Syn., *symphorol-sodium; symphorol N*. **s. cantharidinate,** a compound of cantharidin, 0.2 Gm., and sodium hydroxide, 0.3 Gm., dissolved in 20 Cc. of water with heat; the solution is

made up to 1000 Cc. It is used subcutaneously in tuberculosis of the throat. Dose 8 gr. (0.5 Gm.). **s. carbolate.** See *s. phenate.* **s. carbonate,** $Na_2CO_3.10H_2O$, is used as an antacid, and locally in diseases of the skin and in superficial burns. Dose 10 gr.–½ dr. (0.65–2.0 Gm.). *Dried sodium carbonate* is used like the carbonate. Dose 5–15 gr. (0.32–1.0 Gm.). **s. carbonate, monohydrated** (*sodii carbonas monohydratus*, U. S. P.), $Na_2CO_3 + H_2O$. Dose 4 gr. (0.25 Gm.). **s. cetrarate,** $Na_2C_{18}H_{14}O_8$, a microacicular powder, soluble in water and used as a tonic. Dose 2–15 gr. (0.13–1.0 Gm.). **s. chlorate** (*sodii chloras*, U. S. P.), $NaClO_3$, has medicinal properties similar to those of potassium chlorate, but is more soluble. Dose 5–15 gr. (0.32–1.0 Gm.). **s. chloride** (*sodii chloridum*, U. S. P., B. P.), NaCl, common salt, is a constituent of animal fluids and tissues and of food. In medicine it is used as a stomachic; in hemoptysis; as an application to sprains and bruises; as a tonic and stimulant in the form of salt-water baths; as a cathartic; and in the form of a 0.6-0.75% solution to replace the loss of fluids from hemorrhage or profuse diarrhea, being used as an intravenous, subcutaneous, or rectal injection. **s. chloroborate,** a combination of boric acid, borax, sodium chloride, and sodium sulphate used as an antiseptic in typhoid, etc. **s. choleate,** dried purified oxgall, a yellow powder, soluble in water, and used as a tonic and laxative in chronic constipation. Dose 5–10 gr. (0.32–0.65 Gm.). **s. cinnamate,** $NaC_9H_7O_2$, a white powder, soluble in water; used intravenously in tuberculosis. Dose ½–¼ gr. (0.005–0.009 Gm.) thrice weekly. Syn., *hetol.* **s. citrate** (*sodii citras*, U. S. P.), $2Na_3C_6H_5O_7 + 11H_2O$. Dose 15 gr. (1 Gm.). **s. citrate, neutral,** $2Na_3C_6H_5O_7 + 11H_2O$, white crystals, soluble in water; used as a purgative in diseases of genitourinary origin, fever, etc. Dose 10–60 gr. (0.65–4.0 Gm.). **s. citrobenzoate,** a white, bulky powder, soluble in water; diuretic, antiseptic, and antilithic. **s. citrophosphate.** See *melachol.* **s. citrotartrate** (*sodii citrotartras effervescens*, B. P.), is refrigerant and laxative. Dose 1–2 dr. (4–8 Gm.). **s. copaivate,** $NaC_{20}H_{19}O_2$, a yellow, powdery mass, soluble in water, used as antiseptic and diuretic. Dose 10–30 gr. (0.65–2.0 Gm.). **s. corallinate.** See *s. rosolate.* **s. cresylate,** used as in cresol. **s.-diiodoparaphenol sulphonate.** See *s. sozoiodolate.* **s. diiodosalicylate,** $2NaC_7H_3I_2O_3 + 5H_2O$, white needles or leaflets, soluble in 50 parts of water at 20° C. It is analgesic and antiseptic and used externally on parasitic and syphilitic sores. **s. dioxide,** Na_2O_2, a white powder, soluble in water, used as a bleaching agent and disinfectant in dentistry. Syn., *sodium peroxide.* **s. diphosphate,** same as sodium phosphate, *q. v.* **s. dithionate.** See *s. thiosulphate.* **s. α-dithiosalicylate,** $Na_2C_{14}H_8O_6S_2$, a yellowish powder, soluble in water, used in foot-and-mouth disease. **s. β-dithiosalicylate,** $Na_2C_{14}H_8O_6S_2$, a grayish powder, more soluble in water than the alpha salt. It is used internally in rheumatism, gonorrhea, etc. Dose 1–10 gr. (0.065–0.65 Gm.). Wash in foot-and-mouth disease 2.5 to 5% solution. **s.-ethoxyphenyl succinamide.** See *s. phenosuccinate.* **s. ethylate,** $NaOC_2H_5$, is used as a caustic. **s. ethylsulphate,** $NaC_2H_5SO_4 + H_2O$, flat, aromatic crystals, soluble in water or alcohol; used in constipation. Dose 60–300 gr. (4–20 Gm.). **s. fluoride,** NaF, shining crystals, soluble in water, used internally in malaria, epilepsy, etc. Dose ½–⅛ gr. (0.005–0.01 Gm.) in solution with sodium bicarbonate; externally as an antiseptic dressing for wounds. Syn., *fluorol.* **s. fluosilicate.** See *s. silicofluoride.* **s. glycerinoborate, s. glyceroborate,** glycerite of borax obtained by heating 40 parts of borax with 60 parts of glycerol and forming a translucent, brittle mass, soluble in water or alcohol; antiseptic. **s. glycerinophosphate, s. glycerophosphate,** $Na_2PO_4C_3H_5(OH)_2 + H_2O$, soluble in water; used in neurasthenia, Addison's disease, phosphaturia, etc. Injections, 3–4 gr. (0.2–0.26 Gm.) daily in solution of sodium chloride. **s. glycholate,** $NaC_{26}H_{42}NO_6$, a white powder, soluble in water or alcohol; used in chronic constipation and tuberculosis, and as a remedy for gall-stones. Dose 5 gr. (0.32 Gm.) thrice daily. **s.-guaiacol carbonate,** a white powder, soluble in water, similar to but milder than sodium salicylate in action. **s. gynocardate.** $NaC_{14}H_{21}O_2$, a yellow-white powder, soluble in water and alcohol; an antiseptic and alterative, used in leprosy. Dose 5–15 gr. (0.32–1.0 Gm.) twice daily in capsules containing 3 gr. each. **s. hippurate,** $NaC_9H_8NO_3$, a white powder, soluble in boiling water; a solvent for uric acid. **s. hydrate.** See *s. hydroxide.* **s. hydroxide** (*sodii hydroxidum*, U. S. P.; *soda caustica*, B. P.), NaOH, is an extremely corrosive substance, occurring in the form of white pencils; it is used as a caustic and as an antacid, like the bicarbonate. From it is prepared *liquor sodii hydroxidi* (U. S. P.). Dose 5–30 min. (0.32–2.0 Cc.). **s. hypochlorite,** NaOCl, is a constituent of *liquor sodæ chlorinatæ* (U. S. P., B. P.), Labarraque's solution. **s. hypophosphite** (*sodii hypophosphis*, U. S. P., B. P.), $NaPH_2O_2H_2O$, is used like the other hypophosphites in pulmonary tuberculosis, scrofula, rickets, etc. Dose 10–30 gr. (0.65–2.0 Gm.). **s. hyposulphite.** See *s. thiosulphate.* **s. ichthyol, s. ichthyolsulphonate,** a dark-brown mass prepared by neutralizing ichthyol-sulphonic acid with an aqueous solution of sodium hydroxide. **s. indigo-sulphate,** indigo-carmin. **s. iodide** (*sodii iodidum*, U. S. P., B. P.), NaI, is used like potassium iodide. **s. kussinate,** $NaC_{31}H_{37}O_{10}$, an intensely bitter, yellowish, amorphous mass, soluble in hot water and alcohol; used as a vermifuge. **s. lactate,** $NaC_3H_5O_3$, a thick syrup used as a hypnotic. Dose 2–4 dr. (8–16 Gm.) in sweetened water. **s. and magnesium borocitrate,** a white antiseptic powder used in lithiasis. Dose 5–30 gr. (0.32–2.0 Gm.). **s. mercurophenyl disulphonate.** See *hermophenol.* **s. metavanadate,** an alterative and succedaneum for arsenic. Dose $\frac{1}{30}$–⅛ gr. (0.001–0.008 Gm.). **s.-methoxysalicylate.** See *s.-guaiacol carbonate.* **s. methylarsenite.** See *neoarsycodil.* Cf. *arrhenal.* **s. β-naphtholate, s.-betanaphthol, s-naphthol,** microcidin. **s. nitrate** (*sodii nitras*, U. S. P., B. P.), $NaNO_3$, has been used in dysentery. Dose ½–1 oz. (16–32 Cc.). **s. nitrite** (*sodii nitris*, U. S. P., B. P.), $NaNO_2$, colorless crystals, soluble in water, used as a diuretic and antispasmodic like the other nitrites, but its effects are more slowly produced and more permanent. Dose ½–2 gr. (0.032–0.13 Gm.). Recommended for lowering blood-pressure in doses of 2–3 gr. (0.13–0.2 Gm.) every 2 to 4 hours. See *nitrite.* **s. nitroprusside,** $Na_2Fe(CN)_5NO$, is used as a reagent. **s.**

nucleinate, a white powder, soluble in water, used in puerperal affections and pneumonia and in diagnosing tuberculosis. Dose 30–46 gr. (2–3 Gm.). **s. oleate,** a compound of $NaC_{18}H_{33}O_2$, with excess of oleic acid, a yellowish mass, soluble in water. Syn., *eunatrol.* **s. orthodinitrocresylate.** See *antinonnin.* **s. orthophosphate.** See *s. phosphate.* **s. ossalinate,** a substitute for cod-liver oil; the sodium compound of the acid of ox-marrow. **s. α-oxynaphtholate,** $C_{10}H_6(OH).COONa$, a white, odorless powder, antiseptic and antithermic in action. **s. paracresotate,** $NaC_8H_7O_3Na$, a fine, microcrystalline, bitter powder, soluble in 24 parts of warm water, used as an antipyretic and antiseptic. Dose 1–20 gr. (0.065–1.3 Gm.). **s. parafluorobenzoate,** is used in tuberculous processes. Dose 8 gr. (0.5 Gm.) 3 times daily. **s. peroxide.** See *s. dioxide.* **s. persulphate,** $Na_2S_2O_8$, a bactericide and vulnerary, used in 3 to 10 % solution. It is also used as an aperient, 30 gr. (2 Gm.) in 10 oz. (295 Cc) of water, 1 tablespoonful daily before the principal meals. Syn., *persodine.* **s.-phenacetinsulphonate,** a soluble succedaneum for acetphenetidin. **s. phenate,** NaC_6H_5O, white crystals, soluble in water, used as an antiseptic. Dose 2–10 gr (0.13–0.65 Gm.). **s.-phenolphthaleinate.** See *s. phenolsulphonate.* **s. phenolsulphonate** (*sodii phenolsulphonas,* U. S. P.), $NaC_6H_5O_4S + 2H_2O$, is used locally as an antiseptic and internally as an antiseptic in intestinal fermentation. Dose 10–30 gr. (0.65–2 0 Gm.). **s.-phenolsulphoricinate,** synthetic phenol, 20 %, and sodium sulphoricinate, 80 %; used in 20 % aqueous solution in skin diseases and in painting false diphtheric membranes, etc. **s. phenosuccinate,** the sodium salt of phenosuccin, a white powder, soluble in water. It is antipyretic and antineuralgic. Dose 7½–16 gr. (0.5–1.0 Gm). **s. phosphate** (*sodii phosphas,* U. S. P., B. P.), disodium orthophosphate, $Na_2HPO_4 + 12H_2O$, occurs in colorless, translucent, monoclinic prisms, of a saline taste. It is soluble in boiling water and melts at 25° C. It is a mild cathartic and antilithic. Dose 5–40 gr. (0.32–2.6 Gm.). **s. phosphate, effervescing** (*sodii phosphas effervescens,* U. S. P., B P.), is used like the phosphate. Dose 2–4 dr. (8–16 Gm.). **s. phosphate, exsiccated** (*sodii phosphas exsiccatus,* U. S. P). Dose 15 gr. (1 Gm.). **s. polyborate.** See *s. tetraborate* **s. and potassium tartrate,** Rochelle salt; see *potassium and sodium tartrate.* **s. pyrophosphate** (*sodii pyrophosphas,* U. S. P.), $Na_4P_2O_7 + 10H_2O$, is used for preparing ferric pyrophosphate; soluble in boiling water; used in lithiasis. Dose 2–20 gr. (0.13–1.3 Gm.). **s.-rosanilinsulphonate,** $NaC_{20}H_{18}NO_{10}S_3$, crystals with green luster obtained from fuchsin by action of fuming sulphuric acid. Syn., *acid fuchsin; fuchsin-sodium; magenta; rubin.* **s. rosolate,** $NaC_{20}H_{15}O_3$, red masses with green luster used as a dye. Syn., *sodium corallinate.* **s. saccharinate,** the sodium salt of soluble saccharin; a white, crystalline powder containing 90 % of saccharin, soluble in water and having a sweetening capacity 450 times greater than cane-sugar. It is recommended as a valuable intestinal antiseptic. Dose 1 gr. (0.065 Gm.) once or twice daily. Syn., *crystallose.* **s. salicylate** (*sodii salicylas,* U. S. P., B. P.), $NaC_7H_5O_3$, has the properties and uses of salicylic acid. It occurs in shining white scales, soluble in 0 9 part of water or 6 parts of alcohol. It is antiseptic, antirheumatic, and antipyretic. Dose 2–30 gr. (0.13–2.0 Gm.); maximum dose 60 gr. (4 Gm.) single. **s. santoninate,** $2NaC_{15}H_{19}O_4 + 7H_2O$, bitter acicular crystals in stellate groups, soluble in 3 parts of water, 12 parts of alcohol, 0.5 of boiling water, 3.4 of boiling alcohol. It is given for intestinal worms. Dose for adults ½–1 gr. (0.016–0.065 Gm.). **s. silicate,** Na_2SiO_3, whitish crystals occurring in flat pieces, used in preparing *liquor sodii silicatis,* which is employed as a surgical dressing. Syn., *soluble glass.* **s. silicofluoride,** Na_2SiF_6, white crystals or granular powder soluble in 200 parts of water. It is used as a styptic, antiseptic, and germicide in aqueous solution of 2.1000. Its solution is known as *salufer.* **s. sozoiodolate,** $NaOC_6H_2I_2OHSO_3 + 2H_2O$, long crystals, soluble in 14 parts of water, alcohol, or 20 parts of glycerol. It is alterative and antiseptic. Dose 5–30 gr. (0.32–2.0 Gm.) daily. In whooping-cough 3 gr. (0.2 Gm) blown into the nose. Externally in skin diseases, syphilis, etc., ointment 10 %, or 1 % aqueous solution. **s. stearate, s. stearinate,** $NaC_{18}H_{35}O_2$, soapy, acicular crystals or scales, soluble in water; it is used in treatment of parasitic skin diseases. **s. succinate,** $Na_2C_4H_4O_4 + 6H_2O$, white crystals, freely soluble in water, recommended in catarrhal icterus. Dose 45 gr. (3 Gm.) daily. **s. sulphanilate,** $C_6H_4NH_2SO_3ONa.2H_2O$, white plates, soluble in water, recommended in coryza. **s. sulphantimonate,** $Na_3SbS_4 + 9H_2O$, large yellow or colorless crystals with alkaline reaction, soluble in water. Syn., *Schlippe's salt.* **s. sulphate** (*sodii sulphas,* U. S. P., B. P.), $Na_2SO_4.10H_2O$, Glauber's salt, is a hydragogue cathartic and diuretic. Dose ½–1 oz. (16–32 Gm.). **s. sulphate, effervescing** (*sodii sulphas effervescens,* B. P.), is used for the same purpose as the sulphate. Dose 2–4 dr. (8–16 Gm.). **s. sulphite** (*sodii sulphis,* U. S. P., B. P.), $Na_2SO_3 + 7H_2O$, is used as is sodium thiosulphate. **s. sulphite benzoate,** a white powder, soluble in water; it is used as a wound antiseptic in the form of a dusting-powder. **s. sulphocaffeate,** bitter crystals, slightly soluble in water; a nontoxic, nonirritating, powerful diuretic. Dose 15 gr. (1 Gm.) in capsules. Syn., *nasrol; symphorol.* **s. sulphocarbolate.** See *s. phenolsulphonate.* **s. sulphoricinate,** a compound of sulphoricinic acid and sodium hydroxide. A brown, syrupy liquid, soluble in alcohol and water; used as a solvent for iodine, iodoform, etc. Syn., *polysolve; solvin.* **s. sulphoricinate, phenolized.** See *s.-phenolsulphoricinate.* **s. sulphosalicylate, acid,** $NaC_7H_5O_3SO_3$, white, crystalline powder, soluble in water, used as an antiseptic and antipyretic. Dose 10–30 gr. (0.65–2.0 Gm.) **s. sulphovinate.** See *s. ethylsulphate.* **s. sulphurosobenzoate,** a clear, colorless liquid, said to be a harmless antiseptic for wounds. **s. tartrate,** $Na_2C_4H_4O_6 + 2H_2O$, white needles or prisms, soluble in water. Cathartic and diuretic. Used as an antacid and refrigerant in fevers. Dose 4–8 dr. (15–30 Gm.) once a day. **s. taurocholate,** $NaC_{26}H_{44}NSO$, a white powder, obtained from bile of herbivora, soluble in water or alcohol. It is used in deficient biliary secretion. Dose 2–6 gr. (0.13–0.4 Gm.). **s. tellurate,** $NaTeO_4 + 5H_2O$, a white powder, soluble in water. Used as an antipyretic, antiseptic, and antihidrotic. Dose ½–¾ gr. (0.016–

0.05 Gm.) in elixirs. **s. tetraborate,** a compound of equal parts of boric acid and sodium biborate, forming an unctuous, insipid powder, neither toxic nor caustic. It is used in conjunctivitis and keratitis. Syn., *antipyonin.* **s. thioantimonate.** See *s. sulphantimonate.* **s. thiophenate,** $C_6H_5S.SO_3Na$, a white powder, slightly soluble in water; used on prurigo in 0.5 to 1 % ointment. **s. thiophenesulphonate,** $NaC_4H_3S_2O_3 + H_2O$, a white, scaly powder, containing 33 % of sulphur; used as an antiseptic on prurigo and skin diseases in 5 to 10 % ointment. **s. thiosulphate** (*sodii thiosulphas*, U. S. P.), $Na_2S_2O_3 + 5H_2O$, is used to check fermentation, and locally in parasitic diseases of the skin and mouth. Dose 10–20 gr. (0.65–1.3 Gm.) **s. trichlorocarbolate, s. trichlorophenol,** $C_6H_2Cl_3.ONa$, white needles or crystalline powder, soluble in hot water; antiseptic. **s.-tumenol sulphonate,** a compound of sodium and sulphotumenolic acid. A dark-colored, dry powder, soluble in water. Syn., *tumenol.* **s. tungstate,** $Na_2WO_4 + 2H_2O$, colorless, rhombic, bitter crystals, soluble in 4 parts of water and 2 parts of boiling water Syn., *sodium wolframite.* **s. valerate, s. valerianate** (*sodii valerianas*, B. P.), is used as a nervous stimulant. Dose 1–5 gr. (0.065–0.32 Gm.) **s. xanthogenate,** $NaC_3H_5OS_2$, a compound obtained by adding a saturated alcoholic solution of soda to carbon disulphide It is antiseptic and germicide

sodokosis (*sod-o-ko'-sis*). Sodoku

sodoku (*sod-o'-koo*). A condition which follows the bite of rats; characterized by lymphangitis, rise of temperature, and a maculo-papular eruption.

sodomist, sodomite (*sod'-om-ist, sod'-om-it*) [*sodom*]. One guilty of sodomy

sodomy (*sod' om-e*) [*Sodom*, a city of ancient Palestine] Sexual connection by the anus.

sodor (*so'-dor*). Capsules of liquid carbonic acid for preparation of carbonated beverages.

Soemmering's bone (*sem'-er-ing*) [Samuel Thomas von *Soemmering*, German anatomist, 1755–1830] The marginal process of the malar bone. **S.'s crystalline swelling,** an annular swelling formed in the lower part of the capsule, behind the iris, after extraction of the crystalline lens. **S.'s foramen.** See *S.'s yellow spot.* **S.'s ganglion, S.'s gray substance,** the substantia nigra (locus niger) of the cerebral peduncles **S.'s ligament,** the suspensory ligament of the lacrimal gland. **S.'s nerve,** the long pudendal nerve. **S.'s yellow spot,** the macula lutea of the retina

sofos (*so'-fos*). Trade name of a preparation containing sodium phosphate and sodium bicarbonate.

soft. Yielding readily to pressure; not hard. **s. palate.** See *palate.* **s. parts,** the tissues of the body other than bone and cartilage. **s. soap.** See *soap, green.* **s. water,** one containing but little mineral matter and forming free lather with soap.

softening (*sof'-en-ing*) [ME.]. The act of becoming less cohesive, firm, or resistant. **s., acute gastric,** a disease of childhood in which the stomach and intestines are said to undergo softening. It is probably a post-mortem phenomenon. **s., anemic,** disintegration and liquefaction of the brain-substance from lack of blood-supply. **s. of the bones,** osteomalacia. **s. of the brain,** a disease of the cerebral tissue dependent upon inflammation or blood failure, the symptoms varying according to the part affected, but consisting in loss of function, partial or complete. According to the appearances presenting the softening has been distinguished as red, yellow, or white. See *general paralysis of the insane.* **s. colliquative,** the name applied to that condition in which the affected tissues liquefy. **s., esophageal,** softening of the lower portion of the esophagus due to the solvent action of the gastric juice. **s., gray,** an inflammatory softening of the brain or cord with a gray discoloration. **s., green,** a purulent softening of nervous matter. **s. of the heart,** myomalacia cordis, a softening of the cardiac muscle consequent on arterial anemia. **s., hemorrhagic,** the softening of parts involved in a hemorrhage. **s., mucoid,** myxomatous degeneration. **s., red** *or* **yellow** (of the brain), when hemorrhage accompanies the ischemic softening, and the products of disintegration of the blood mingle with the nerve substance, giving it a red or yellow hue. **s. of the spinal cord,** various stages in myelitis known by the terms gray, green, red, white, and yellow softening. **s. of the stomach,** gastromalacia, consequent upon highly acid contents with a feeble circulation in the walls, but usually a post mortem phenomenon. See *auto-digestion.* **s. of a thrombus,** may be *simple* or *red, purulent* or *yellow,* the latter resulting in the extremely unfavorable condition of *thrombophlebitis.* **s., white** (*of the brain*), when the ischemia is unaccompanied with hemorrhage.

soil [ME.]. The ground; earth **s.-diseases,** those diseases supposed to be produced by emanations from a decomposing organic soil, or arising from imperfect drainage of decaying animal matter. **s. pipe,** the main discharge-pipe of a system of house-plumbing; usually an upright, hollow cylinder of iron. **s. water.** See *subsoil-water.*

soja-beans, soy-beans (*so'-yah*). The edible seeds of *Glycine soja,* a leguminous plant of the East Indies. The meal of the soja-beans is used in diabetes They contain a diastatic ferment, casein, cholesterin, lecithin, asparagin, leucin, cholin, hypoxanthin bases, phenylamidopropionic acid, oil (18 %), sugar (12 %).

sokosho (*sok-o'-sho*). Rat-bite fever; see *sodoku.*

sokra [E Ind., "without flesh or blood; skeleton"]. Vernacular for trypanosomiasis (*q. v.*).

sol (*sol*). A colloid in solution.

sol. Abbreviation of *solution.*

solanidine (*so-lan'-id-in*) An alkaloid obtained by decomposing solanine.

solanine (*so'-lan-in*) [*solanum*, the nightshade]. An alkaloid found in various species of solanum.

solanism (*so'-lan-izm*). Nightshade poisoning from ingestion of berries of *Solanum dulcamara* or *S. nigrum,* or rarely through eating unripe potatoes; due partly to the contained glucoside causing vomiting, pain, and diarrhea, partly to tropeine, marked by symptoms of belladonna poisoning.

solanoid (*sol'-an-oid*) [*solanum*, nightshade; *εἶδος*, like]. Of a potato-like texture, as a solanoid carcinoma.

solanoma (*so-lan-o'-mah*). A solanoid tumor.

Solanum (*so-la'-num*) [L.]. A genus of the *Solanaceæ,* including the tomato, potato, bittersweet, and black nightshade. *S. carolinense,* horse-nettle, is indigenous to the United States.

a fluidextract from the fresh berries is recommended in epilepsy, tetanus, and convulsions of pregnancy. Dose 10–30 min. (0.6–1.8 Cc.). It is also used as an abortifacient. *S. crispum*, *S. gayanum*, and *S. tomatillo* are indigenous to Chili and Peru. *S. dulcamara*, bittersweet, is indigenous to Europe and Asia, and contains dulcamarine and solanine. An extract from the young branches is employed as an alterant and diuretic in dropsy, cutaneous diseases, and rheumatism. Dose 5–20 gr. (0.32–1.3 Gm.). *S. insidiosum* and *S. paniculatum*, jurubeba, are species of Brazil, and are alterative and antiblennorrheic. *S. nigrum*, night-shade, is found in Europe, Asia, and America, is used as a diuretic and emetic, and externally as a cataplasm. *S. tuberosum* is the potato, indigenous to Chili; it contains solanine, solanidine, solanemine, and a small amount of tropeine. The tubers contain the proteid tuberin.

solar ganglion (*so'-lar*) [*solaris*, from *sol*, the sun, so-called because of the radiating nerves]. See under *s. plexus*. **s. plexus,** a plexus consisting of a network of nerves and ganglia (*solar ganglia*), and situated behind the stomach and in front of the aorta and crura of the diaphragm. It receives the great splanchnic nerves and filaments from the right pneumogastric nerve, and supplies branches to all the abdominal viscera.

solarity (*so-lar'-it-e*) [*solar* plexus]. A malady due to a disordered condition of the solar plexus.

solarium (*so-la'-re-um*) [*solaris*, solar; *sol*, sun]. A room enclosed with glass, and arranged for the administration of sun-baths.

solarization (*so-lar-i-za'-shun*) [*sol*, the sun]. The application of solar or electric light for therapeutic purposes.

solaro (*so-la'-ro*) [*sol*, the sun]. A cloth, shot with an orange colored material, and recommended for use in tropical countries as a protection from the rays of the sun.

solation (*sol-a'-shun*). Conversion of a gel into a sol.

Solayrès' obliquity (*so-lār-a*) [François Louis Joseph *Solayrès de Renhac*, French obstetrician, 1737–1772]. Lateral obliquity. Descent of the child's head by its occipitomental diameter into the oblique diameter of the pelvis.

Soldaini's solution for glucose (*sol-dah-e'-ne*) [Arturo *Soldaini*, Italian chemist]. Fifteen Gm. of copper carbonate dissolved in 1400 Cc. of water, to which is added 416 Gm. of potassium bicarbonate. A reduction of copper suboxide is obtained by heating the foregoing solution with a glucose solution.

sole (*sōl*) [ME.]. The plantar surface of the foot. **s.-leather.** See *leather*. **s.-plate,** (*a*) the name given by Boas to the palmar side of claws and hoofs, as distinguished from the volar side (*Sohlenhorn*); (*b*) the flattened nucleated mass of soft, faintly granular protoplasm closely applied to the surface of a voluntary muscle to receive the ultimate fibrillæ of the medullated nerve-fibers composing its motor supply. It forms part of the motor disc or endplate. **s.-reflex.** See *reflex, plantar*.

solen (*so'-len*) [σωλήν, a channel]. 1. A channel. 2. The central canal of the spinal cord.

solenchalasis (*so-len-o-kal-a'-sis*) [σωλήν, channel; χαλαστικός, making supple]. Dilatation of a tubular organ.

solenoid (*so'-len-oid*) [σωλήν, a pipe; εἶδος, likeness]. A spiral of conducting wire wound into a cylindrical shape so that it is almost equivalent to a number of equal and parallel circuits arranged upon a common axis; in therapeutics the name is applied to a large cage used for holding the patients in teslaization in such manner that they are not in direct communication with the current.

solenstegnosis (*so-len-o-steg-no'-sis*) [σωλήν, a channel; στέγνωσις, stenosis]. Constriction of a tubular organ.

soleus (*so-le'-us*). A flat muscle of the calf. See under *muscle*.

solferino (*sol-fer-e'-no*) [an Italian city, the scene of a battle]. A synonym of *fuchsin*.

solicictus (*so-lis-ik'-tus*). Synonym of *heat-stroke*.

solid (*sol'-id*) [*solidus*, solid]. 1. Firm; dense; not fluid or gaseous. 2. Not hollow. 3. A firm body; a body the molecules of which are in a condition of strong mutual attraction.

Solidago (*sol-id-a'-go*) [*solidus*, solid: *gen.*, *solidaginis*]. Golden-rod, a genus of some 100 species of composite flowered plants, mostly American. **S. odora,** is carminative, diaphoretic, stimulant, diuretic, and antemetic. **S. rigida,** is tonic and astringent. **S. virgaurea,** of both continents, is astringent, tonic, and vulnerary.

solidarity (*sol-id-ar'-it-e*) [*solidus*, solid]. The unitary nature of the relations of the various parts of an organism, whereby all individual parts are subordinated to the welfare of the whole.

solidification (*sol-id-if-ik-a'-shun*) [*solidus*, solid; *facere*, to make] The act of becoming solid, or of possessing molecular attraction.

solidism (*sol'-id-izm*) [*solid*]. The theory that diseases depend upon alterations in the solids of the body.

solidist (*sol'-id-ist*) [*solidus*, solid]. The name given to one opposed to the doctrines of the humoralists.

solitary (*sol'-it-a-re*) [*solitarius*, solitary]. Single; existing separately; not collected together. **s. bundle, s. fasciculus,** a strand of nerve-fibers in the medulla. **s. follicles, s. glands,** minute lymphatic nodules in the mucous membrane of the intestine.

solium (*so'-le-um*). A variety of tape worm. See *taenia solium*.

sollunar (*sol-lū'-nar*) [*sol*, sun; *luna*, moon]. Influenced by or relating to the sun and the moon.

Solly's arciform band. See *Rolando's arciform fibers*.

solmides (*sol'-mīdz*). Trade name of a preparation of the bromides of ammonium, potassium and sodium.

soloid (*sol'-oid*). Trade name applied to chemical and other substances which are compressed.

Solomon's seal (*sol'-o-monz sēl*). The root of *Convallaria polygonatum*, a tonic, mucilaginous and slightly astringent. It was formerly a popular domestic remedy for rheumatism and gout, and is externally employed in contusions. Dose of the fldext. ʒ j–ij.

solphinol (*sol'-fe-nol*). A mixture of borax, boric acid, and sulphurous alkalies; a white, crystalline, odorless powder, soluble in 10 parts of water or in 20 parts of glycerol. It is used as an antiseptic.

Solpugidæ (*sol-pū'-je-de*) [*solpuga*, a venomous spider]. A group of spider-like arachnids having closer relationship to the scorpions than to the true spiders. Their bite is poisonous.

solubility (*sol-ū-bil'-it-e*) [*solubilis*, from *solvere*, to dissolve]. The state of being soluble.

soluble (*sol'-ū-bl*). Capable of being dissolved.

solubrol (*sol'-ū-brol*). Trade name of a preparation used as a substitute for iodoform.

solurol (*sol'-ū-rol*). Trade name of a preparation of thyminic acid; said to be a uric acid solvent.

solute (*so-lūt'*). The substance dissolved in a solution.

solutio (*so-lū'-she-o*). See *solution*.

solution (*so-lū'-shun*) [*solutio*, from *solvere*, to loosen]. 1. A separation or break, as *solution* of continuity. 2. The process of dissolving a solid or of being dissolved. 3. A liquid in which a substance has been dissolved. **s., acid,** one which has a preponderance of hydrogen ions over hydroxyl ions. **s., alkaline,** one which has an excess of hydroxyl ions over hydrogen ions. **s., colloidal,** one obtained by dipping bars of metal into pure water and passing a heavy electric current from one bar to the other through the water. The metal under these conditions is torn off in a state of such fine division that it remains suspended in the water in the form of a solution. Syn., *pseudosolution*. **s. of contiguity,** a dislocation. **s. of continuity,** the division of a tissue. **s. of cresol, compound** (*liquor cresolis compositus*, U. S. P.), cresol, 500 Gm.; linseed-oil, 350 Gm.; potassium hydroxide, 80 Gm.; water, to make 1000 Gm. **s. gram-molecular,** one in which each liter contains the weight of one molecule of the active chemical expressed in grams. **s.s, isotonic,** such as are equal in osmotic pressure. **solutio lithantracis acetonica,** a solution of coal-tar 10 parts, in benzol 20 parts, and acetone 77 parts. It is employed in skin diseases. **s., neutral,** one in which there are equal numbers of hydrogen ions and hydroxyl ions. **s., normal.** See *normal solution* **s., normal saline.** See *saline solution*. **s., potassium silicate,** a colorless, slightly turbid, syrupy liquid with alkaline reaction, consisting of 10 % of potassium silicate in water, $K_2SiO_3H_2O$. **solutio retinæ,** detachment of the retina. **s., saturated.** See *saturated* (1). **s., standard,** a solution containing a definite quantity of a reagent. **s., test-,** a standard solution. **s., volumetric,** a standard solution. **s., water-glass.** See *s., potassium silicate*. (For solutions not defined here see the qualifying word.)

solutol (*sol-ū'-tol*) [*solution*]. An alkaline solution of cresol in sodium cresylate; a disinfectant.

solv. Abbreviation of Latin *solve*, dissolve.

solvella (*sol-vel'-ah*) [pl., *solvellæ*] A soluble tablet.

solvent (*sol'-vent*) [*solvere*, to dissolve]. 1. Capable of dissolving. 2. A liquid capable of dissolving.

solveol (*sol'-ve-ol*) A neutral solution of cresol in sodium cresylate, used as a disinfectant.

solvin (*sol'-vin*). Sodium sulphoricinate: one of a series of liquids obtained from certain oils by the action of concentrated sulphuric acid; it is a powerful solvent, and also possesses the property of dissolving the red corpuscles.

soma (*so'-mah*) [σῶμα, the body: *pl.*, *somata*]. 1. The body alone, considered without the limbs. 2. The entire body with the exclusion of the germ-cells

somacule (*so'-mak-ūl*) [dim. of σῶμα, the body]. A physiological unit corresponding to, but greatly more complex than, the chemical molecule; the smallest possible division of protoplasm.

somæsthesia. *Somatesthesia*.

somal (*so'-mal*). Pertaining to the body.

somascesis (*so-mas-se'-sis*). See *gymnastics*.

somatesthesia, somatæsthesia [σῶμα, body; αἴσθησις, sensation]. Bodily sensation, the consciousness of the body.

somatic (*so-mat'-ik*) [σωματικός, from σῶμα, body]. 1. Pertaining to the body. 2. Pertaining to the framework of the body and not to the viscera. 3. Having two sets of chromosomes, one set normally coming from the female parent and one from the male; as contrasted with germ cells having a single set of chromosomes. **s. cavity,** the body-cavity or perivisceral cavity. **s. cells,** undifferentiated body-cells or parenchyma-cells. **s. death,** the final cessation of all vital activities in the body at large; see *death*. **s. mesoderm,** the upper or outer leaf of the mesoderm separated by the cœlomic fissure from the lower or inner leaf. **s. musculature,** the muscles of the outer wall of the body somatopleure, as distinguished from those of the splanchnopleure, the splanchnic musculature.

somaticosplanchnic (*so-mat-ik-o-splank'-nik*) [σῶμα, body; σπλάγχνα, viscera]. Same as somaticovisceral.

somaticovisceral (*so-mat-ik-o-vis'-er-al*) [σῶμα, body; *viscera*]. Relating to the body and the viscera.

somatoblast (*so-mat'-o-blast*) [σῶμα, body; βλαστός, a germ]. Any plastidule from which cell-material (in contradistinction to nuclear material) is built up or developed.

somatochrome (*so-mat'-o-krōm*) [σῶμα, body; χρῶμα, color]. Applied by Nissl to a group of nerve-cells possessing a well-defined cell-body completely surrounding the nucleus on all sides, the protoplasm having a distinct contour, and readily taking a stain. This group is divided into arkyochrome, stichochrome, arkyostichochrome, and gyrochrome nerve-cells.

somatodidymus (*so-mat-o-did'-im-us*) [σῶμα, body; δίδυμος, twin]. A monster with united trunks.

somatodymia (*so-mat-o-dim'-e-ah*) [σῶμα, body; δύειν, to enter]. A twin monstrosity in which the trunks are united. There are several varieties: *ischiodymia*, union by the hips; *infraomphalodymia*, union in the inferior umbilical region; *omphalodymia*, union in the umbilical region; *supraomphalodymia*, union in the superior umbilical region; *sternodymia*, by the sternum; *sternoomphalodymia*, union by the sternal and the umbilical regions; *vertebrodymia*, union by the vertebræ.

somatogenic (*so-mat-o-jen'-ik*) [σῶμα, the body; γεννᾶν, to produce]. Pertaining to somatogeny.

somatogeny (*so-mat-oj'-en-e*) [σῶμα, body; γεννᾶν, to produce]. The acquirement of bodily characters, especially the acquirement of characters due to the environment.

somatologic (*so-mat-o-loj'-ik*) [σῶμα, body; λόγος, science]. Pertaining to somatology.

somatology (*so-mat-ol'-o-je*) [σῶμα, body; λόγος, science]. The study of anatomy and physiology of organized bodies; biology apart from psychology.

somatome (*so'-mat-ōm*) [σῶμα, body; τομή, a cutting]. 1. A transverse segment of an organized body; a somite. 2. An embryotome.

somatomegaly (*so-mat-o-meg'-al-e*) [σῶμα, body; μεγα, large]. Gigantism.

somatomic (*so-mat-om'-ik*) [σῶμα, body; τεμνεῖν, to cut]. Pertaining to a somatome.

somatopagus (*so-mat-op'-ag-us*) [σῶμα, body; πάγος, fixed]. A monstrosity having two trunks.

somatoplasm (*so'-mat-o-plasm*) [σῶμα, the body, πλάσμα, anything formed] The protoplasm of the body-cells, Weismann's term for that form of living matter which composes the mass of the body, and which is the subject of death, as distinguished from germ-plasm, which composes the reproductive cells and is possessed of potential immortality

somatopleural (*so-mat-o-ploo'-ral*) [σῶμα, body; πλευρά, side] Pertaining to a somatopleure

somatopleure (*so-mat'-o-ploor*) [σῶμα, body, πλευρά, the side] The body-wall, the somatic mesoblast

somatopsychic (*so-mat-o-si'-kik*) [σῶμα, body, ψύχη, soul] Pertaining to both the body and mind

somatose (*so'-mat ōs*) [σῶμα, body] A proprietary albumose food-product **s, ferro-, s., iron,** a preparation of somatose containing 2 % of iron Dose 75–150 gr (5–10 Gm.) daily **s, milk,** a tasteless, inodorous food in the form of a powder prepared from milk with 5 % of tannic acid, used in chronic diseases of the digestive tract Dose for adults 2 or 3 tablespoonfuls (30–45 Cc.) daily

somatosplanchnopleuric (*so-mat-o-splank-no-ploo'-rik*) Relating to the somatopleure and the splanchnopleure

somatotomy (*so-mat-ot'-o-me*) [σῶμα, body, τομή, section] Anatomy, dissection

somatotridymus (*so-mat o trid'-im us*) [σῶμα body, τρίδυμος, triple] A monster with three trunks or bodies

somesthetic, somæsthetic (*so-mes thet'-ik*) [σῶμα, body, αἴσθησις, sensation] Pertaining to general sensory structures **s. area,** Munk's *Korperfühlsphäre,* the region of these cortex in which the axons of the general sensory conduction-path terminate **s path,** the general sensory conduction-path leading to the cortex

somiology (*so-mi-ol' o-je*) [σῶμα body, λόγος, science] A term proposed by Rafinesque, 1814, as a common name under which to consider the phenomena of organic nature, now covered by the term biology Syn., *organology, organomy*

somite (*so'-mīt*) [σῶμα, body] 1 A segment of the body of an embryo 2 One of a series of segments of the mesoblast on each side of the dorsal ridge of the embryo, a protovertebra, a protovertebral or mesoblastic somite

somitic (*so-mit'-ik*) [σῶμα, the body] Resembling or pertaining to a somite

somnacetin (*som-nas'-et-in*) [*somnus,* sleep] Trade name of a preparation said to contain phenacetin, sodium diethyl barbiturate and codeine phosphate, intended as a hypnotic and sedative.

somnal (*som' nal*) [*somnus,* sleep] A crystalline substance, a compound of chloral hydrate and urethane It is diuretic and hypnotic Dose 30 gr (2 Gm.).

somnambulance (*som-nam'-bū-lans*) Same as somnambulism

somnambulation (*som-nam-bū-la'-shun*) Same as somnambulism

somnambulator (*som-nam'-bū-la-tor*) Same as *somnambulist*

somnambulism (*som-nam' bū-lizm*) [*somnus,* sleep; *ambulare,* to walk] 1 The condition of half-sleep, in which the senses are but partially suspended, also sleep-walking, a condition in which the individual walks during sleep 2 The type of hypnotic sleep in which the subject is possessed of all his senses, often having the appearance of one awake, but whose will and consciousness are under the control of the hypnotizer **somnambulisme, provoque,** sleep-walking induced by mesmerism, hypnotism, or "electrobiology"

somnambulist (*som-nam'-bū-list*). One who walks in his sleep

somnial (*som'-ne-al*) [*somniatio,* dreaming] Relating to dreams

somniation (*som-ne-a'-shun*) [*somniatio*]. Dreaming

somniative, somniatory (*som'-ne-at iv, som'-ne-at-o-re*) Relating to dreaming, producing dreams

somniculous (*som-nik'-u-lus*) [*somnus,* sleep] Drowsy, sleepy

somnifacient (*som-ne fa'-shent*) [*somnus* sleep· *facere,* to make] 1 Producing sleep 2 A medicine producing sleep, a hypnotic

somniferin (*som-nif'-er-in*) [*somnus,* sleep, *ferre,* to bear] A morphine ether discovered by Bombelon, said to be stronger than morphine and without bad effects or influence upon the heart

somniferine (*som-nif' er ēn*) [*somnus* sleep *ferre,* to bear] An alkaloid derived from *Withania somnifera,* a solanaceous plant of Asia and the Mediterranean region It is said to be narcotic

somniferous (*som-nif'-er-us*) [*somnus,* sleep, *ferre,* to bear] Producing sleep

somnific (*som nif' ik*) [*somnus,* sleep] Causing sleep

somnifugous (*som nif'-ū gus*) [*somnus,* sleep, *fugere,* to flee] Driving away sleep

somniloquence, somniloquism somniloquy (*somnil' o kwens, som-nil'-o kwizm, som-nil'-o-kwe*) [*somnus,* sleep, *loqui* to talk] The act of talking during sleep

somniloquist (*som nil'-o-kwist*) One given to talking during sleep

somnipathist, somnipathy See *somnopathist, somnopathy*

somnoform (*som'-no form*) An anesthetic consisting of ethyl chloride 60 %, methyl chloride, 35 %, ethyl bromide 5 %

somnol (*som'-nol*) A synthetic product of chloralurethane with a polyatomic alcohol radical used as a hypnotic and cerebral sedative Dose 2–4 dr (7 7–15 5 Cc.)

somnolence (*som'-no-lens*) [*somnolentia, somnus,* sleep] A condition of drowsiness or sleep

somnolent (*som'-no-lent*) [*somnolentus*] Inclined to sleep

somnolentia (*som-no len' she-ah*) [L.] Sleep-drunkenness, a condition of incomplete sleep in which a part of the faculties are abnormally excited, while the others are in repose.

somnolescent (*som-no les' ent*) [*somnus,* sleep] 1 Drowsy 2 Inducing drowsiness

somnolism (*som'-no-lizm*) Hypnotism

somnone (*som'-nōn*) A proprietary hypnotic said to contain opium lupulin, and lactucarium Dose 16–32 min (1–2 Cc.)

somnopathist (*som-nop'-ath-ist*) [*somnus,* sleep, πάθος, disease] One subject to hypnotic trance

somnopathy (*som-nop'-ath-e*) 1 Any disorder of sleep 2 Hypnotic somnambulism

somnos (*som'-nos*) [*somnus,* sleep] A proprietary hypnotic formed by the chemical reaction between chloral hydrate and glycerol in certain proportions

somnovigil (*som-no-vij'-il*) See *coma-vigil*

somnus (*som'-nus*) [L.] Sleep, see *hypnosis*

sonifer (*son'-if-er*) [*sonus,* sound, *ferre,* to carry] A variety of ear-trumpet

sonitus (*son'-it-us*) See *tinnitus*

sonometer (*so-nom'-et-er*) [*sonus,* a sound, μέτρον, a measure] 1 An instrument for determining

the pitch of sounds and their relation to the musical scale. 2. An instrument for testing hearing.

sonorous (*so-no'-rus*) [*sonus*, sound]. Capable of producing a musical sound, resonant; of rales. low-pitched.

sonus (*so'-nus*). See *sound*.

soor. See *thrush*.

soot-cancer, soot-wart. Epithelioma of the scrotum; so-called from its frequency in chimney-sweeps.

sophisticate (*so-fis'-tik-āt*). To adulterate.

sophistication (*so-fis-tik-a'-shun*) [σοφιστικός, deceitful]. The adulteration or imitation of a substance.

sophol (*so'-fol*). Proprietary name of a compound of formaldehyde, nuclein and silver; silver methylene-nucleinate.

sophomania (*sof-o-ma'-ne-ah*) [σοφός, wise; μανία, madness]. Insanity in which the patient believes himself to excel in wisdom.

Sophora (*so-fo'-rah*) [Arab]. A genus of leguminous trees, shrubs, and herbs, mostly growing in warm regions. **S. sericea** (see *loco*) is a poisonous plant of the U. S.; its seeds contain sophorine **S. speciosa**, a tree of Texas, also yields sophorine.

sophorine (*so-fo'-rēn*) [Arab.]. A paralyzant, poisonous alkaloid which exists in the seeds of some species of *Sophora*.

sophronistæ dentes (*sof-ro-nis'-te-den'-tēz*). Wisdom teeth, or dentes sapientiæ.

sopor (*so'-por*) [L.]. Sleep, especially the profound sleep symptomatic of a morbid condition.

soporate (*so'-por-āt*) [*sopor*]. To stupefy; to render drowsy.

soporifacient (*so-por-if-a'-se-ent*) [*sopor*, sleep; *facere*, to make] A drug producing sleep, a hypnotic.

soporiferous (*so-por-if'-er-us*). See *soporific*.

soporific (*so-por-if'-ik*) [*sopor; facere*, to make] 1 Producing sleep. 2. A sleep producer. 3. Narcotic.

soporose, soporous (*so'-por-ōs, so'-por-us*) [*sopor*, sleep]. Sleepy, partaking of the nature of sound sleep.

sora (*so'-rah*). Synonym of *urticaria*.

sorbefacient (*sor-be-fa'-shent*) [*sorbere*, to suck; *facere*, to make]. 1. Promoting absorption 2. A medicine or agent that induces absorption

sorbefacin (*sor-be-fa'-sin*). Trade name of a paste said to consist of kaolin, glycerol, and antiseptics; intended for use in local inflammatory or painful conditions.

sorbic (*sor'-bik*) [*sorbus*, the sorb-tree] Pertaining to or derived from the mountain ash. **s. acid.** See *acid*.

sorbin (*sor'-bin*). See *sorbinose*.

sorbinose (*sor'-bin-ōs*) [*sorbus*, the sorb-tree]. *Sorbine*, a ketone alcohol, found in mountain-ash berries, and consisting of large crystals, which possess a very sweet taste. It reduces alkaline copper-solutions, but is incapable of fermentation under the influence of yeast.

sorbite (*sor'-bīt*) [*sorbus*, the sorb-tree]. $C_6H_{14}O_6 + H_2O$. A hexahydric alcohol occurring in mountain-ash berries, forming small crystals which dissolve readily in water. They melt at 110° C. Sorbite corresponds, in all probability, to grape-sugar.

sorbose (*sor'-bōs*). Same as *sorbinose*.

Sorby's cells (*sor'-be*). For *spectroscopic examination of blood;* a narrow-lumen glass receptacle made of barometer tubing, both ends of which are accurately ground to parallel surfaces, one end being cemented to a small polished glass plate.

sordes (*sor'-dēz*) [*sordere*, to be foul]. Filth, dirt, especially the crusts that accumulate on the teeth and lips in continued fevers. **s. aurium**, cerumen. **s. gastricæ**, undigested gastric debris. Syn., *saburra gastrica*.

sordid (*sor'-did*) [*sordidus*, dirty; filthy]. In biology, of a dull or dirty color.

sordidin (*sor'-did-in*), $C_{16}H_{18}O_7$ or $C_{18}H_{10}O_8$. A substance isolated from the lichen, *Zeora sordida*.

sore. 1. Painful; tender. 2. An ulcer or wound. **s., bed-.** See *bed-sores*. **s., Delhi, s., Penjdeh, s., natal.** See *furunculus orientalis*. **s. feet of coolies, s.s, water-.** See *itch, coolie*. **s., hard,** chancre. **s. mouth, Ceylon.** · See *aphthæ tropicæ*. **s. soft,** chancroid. **s. throat of Fothergill,** ulcerative angina of severe scarlatina (scarlatina anginosa). **s., Veld.** See under *Veld*. **s. venereal,** chancroid.

Soret's band. An absorption band in the extreme violet end of the spectrum of blood; it is characteristic of hemoglobin.

sorghum (*sor'-gum*). A variety of sugar-cane. **s. saccharatum** of the family Graminaceæ. Also a syrup made from the expressed inspissated juice of the same.

soroche (*so-ro'-cha*) [Sp]. Mountain sickness.

sororiation (*sor-or-e-a'-shun*) [*soror*, a sister]. The development which takes place in the female breasts at puberty.

sorrel (*sor'-el*). A plant of the genus *Rumex*, containing oxalates. **s., salt of,** potassium binoxalate.

sorrocco (*sor-ok'-o*). Puna. An affection resembling sea-sickness, common in the high regions of South America. See *soroche*.

sorts (*sorts*). In the drug-trade, refuse or culls; the poorest grade of any drug.

S. O. S. Abbreviation for *si opus sit*, if necessary.

soson (*so'-son*). Unaltered meat-albumin, 98.5 %, in powder. It is odorless and palatable

sostrum (*sos'-trum*) [*sostron*, a reward for saving life]. A physician's fee.

soterocyte (*so'-ter-o-sīt*) [σωτήρ, a preserver; κύτος, a cell]. A blood platelet.

sotopan (*so'-to-pan*). A proprietary remedy said to contain iron, quinine, bromine, calcium and phosphoric acid.

souffle (*soof'-fl*) [Fr.]. A blowing sound; an auscultatory murmur; a bruit. **s., cardiac.** See *heart-murmur*. **s., fetal,** an inconstant murmur heard over the uterus during pregnancy, and supposed to be due to the compression of the umbilical cord. **s., funic, s., funicular,** a hissing sound, synchronous with the fetal heart-sounds, heard over the abdomen of a pregnant woman, and supposed to be produced in the umbilical cord. **s., placental, s., uterine,** a sound heard in the latter months of pregnancy, and caused by the entrance of blood into the dilated arteries of the uterus. **s., splenic,** a sound said to be audible over the spleen in cases of malaria and leukemia. **s., umbilical.** See *s., funic*.

soul (*sōl*) [ME., *soule*]. The moral and emotional part of man's nature. **s.-blindness.** See *blindness, psychic*, and *apraxia*. **s.-deafness,** deprivation of all sensation of sound or reminiscence of it. **s., Stahl's,** according to the doctrine of George Ernst Stahl (1660–1734), the supreme, life-giving, life-preserving principle, distinct from the spirit: when hindered in its operation, disease resulted; it governed the

organism chiefly by way of the circulation. His doctrine was called *animism*, and was a reaction against the chemical and mechanical theories of the seventeenth century.

sound [*sonus*]. 1. The sensation produced by stimulation of the auditory nerve by aerial vibrations. 2. [Fr., *sonder*, to probe.] An instrument for introduction into a channel or cavity, for determining the presence of constriction, foreign bodies, or other morbid conditions, and for the purpose of treatment. **s., anasarcous,** a moist bubbling sometimes heard on auscultation when the skin is edematous. **s., bandbox,** the resonant percussion note sometimes heard in emphysema. **s., Bellocq's.** See *Bellocq's cannula*. **s., bellows,** an endocardial murmur which sounds like a bellows; see *bellows*. **s., blowing,** a blowing murmur. **s., bottle.** See *amphoric breathing*. **s., bronchial,** the large harsh sound of bronchial respiration. **s.s, cardiac.** See *s., heart*. **s., cracked-pot,** a form of tympanitic resonance indicative of a cavity. **s., esophageal,** a long flexible sound for examination of the esophagus. **s.s, fetal heart-,** the sounds produced by the beating of the fetal heart, best heard near the umbilicus of the mother. **s., flapping,** the clap made by the closure of the cardiac valves. **s.s, friction-,** the sounds produced by the rubbing of one rough surface upon another. **s., funicular bellows.** See *souffle*. **s.s, heart-,** the two sounds heard over the cardiac area. The first dull and prolonged, is said to sound like *lubb*, and is isochronous with the systole of the ventricles. The second, sharp and short, is said to sound like *dup*, and is isochronous with the closure of the semilunar valves. **s., kettle-singing,** a ches-sound sometimes heard in incipient pulmonary tuberculosis. It resembles water boiling in a kettle. **s., lacrimal,** a fine sound for exploring or dilating the lacrimal canal. **s., metallic heart-.** See *metallic tinkling*. **s., metamorphosing breath-,** a sound due to the passage of air through a narrow opening into and out of a pulmonary cavity. **s., muscle-,** the sound heard through the stethoscope when placed over a muscle in the state of contraction; sussurus. **s., osseous,** a high-pitched intense auscultatory sound having a slightly metallic timbre. **s., pulmonary,** the respiratory murmur. **s., respiratory,** respiratory murmur. **s., sawing,** a cardiac murmur resembling the sound produced by sawing. **s.-shadow,** the interference with a sound-wave caused by an object being placed between the ear and the source of sound. **s., subjective.** See *phonism*. **s., to-and-fro,** the friction-sound of pericarditis and pleuritis. **s., tubular,** the sound of tracheal respiration. **s., urethral,** an elongated steel instrument, usually slightly conical, for examination and dilatation of the urethra. **s., uterine,** a graduated probe for measurement of the uterine cavity.

STONE SOUND.

sour (*sowr*). Having an acid taste; fermented. **s. dough.** See *leaven*. **s.-wood,** sorrel tree; the leaves of *Oxydendron arboreum;* they are tonic, refrigerant and diuretic, and of reputed value in dropsy. Dose of the fldext. ♏ xxx–℥ ij.

Southern fever. Synonym of *Texas fever*.

southernwood. See *artemisia abrotanum*.

Southey's drainage-tubes [Reginald *Southey*, English surgeon, 1835–1899]. Tubes of small caliber, employed for draining away the fluid from limbs that are the seat of extensive anasarca.

Soxhlet's apparatus (*soks'-let*) [Franz *Soxhlet*, German chemist, 1848–]. 1. An apparatus for sterilizing milk. 2. An apparatus for the determination of the fat in milk.

soy bean, or **soya bean** (*soi* or *soi'-yah*) [Jap.]. A kind of bean, the seed of *Glycine soja* (also referred to as *Soja hispida* and *Dolichos sinensis*), a plant of Japan and China and India. Diabetic bread, biscuits, and cakes are prepared from its flour, which contains no starch. The sauce called *soy* is also made from this bean.

Soyka's plates (*soi'-keh*). Dishes employed in the cultivation of bacteria. They are similar to Petri's capsules, but differ from them in having from eight to ten depressions ground in the lower plate, which resemble the "wells" in hollow slides.

Soymida (*soi'-mid-ah*) [Telugu name]. A genus of the *Meliaceæ*. *S. febrifuga* is an East Indian tree that furnishes rotun bark, introduced as a medicine in 1807 and used as a tonic and antiperiodic.

sozal (*so'-zal*). See *aluminum sulphocarbolate*.

sozin (*so'-zin*) [σώζειν, to save; keep]. A defensive protein occurring naturally in the animal body. One capable of destroying microorganisms is termed a *mycososin*, one antagonizing bacterial poisons, a *toxososin*.

sozoborol (*so-zo-bo'-rol*). A mixture used in coryza said to consist of aristol, sozoiodol, and borates.

sozodont (*so'-zo-dont*) [σώζειν, to protect; ὀδούς, tooth]. A dentifrice supposed to be prepared mainly of Castile soap and alcohol.

sozoiodol, sozoiodolic acid (*so-zo-i'-o-dol, so-zo-i-o-dol'-ik*) [σώζειν, to save; *iodol*], $C_6H_2I_2(SO_3H)$-OH. A crystalline, odorless powder used as an ant septic, disinfectant, and parasiticide, chiefly in the form of its salts, of which the following have been employed: sodium sozoiodol, potassium sozoiodol, zinc sozoiodol, and mercury sozoiodol. **s., lead,** fine acicular crystals, sparingly soluble in water. **s., sodium.** See *sodium sozoiodolate*.

sozolic acid (*so-zo'-lik*). See *aseptol*.

sp. Abbreviation of Latin *spiritus*, spirit.

space (*spās*) [ME., from L., *spatium*, space]. A name given for purposes of description to sundra inclosed or semiinclosed spaces within or about the body. **s., anterior perforated,** a triangular space at the mesal side of the Sylvian fissure. **s., arachnoid.** See *s., subarachnoid*, and *s., subdural*. **s., axillary,** the axilla. **s., bregmatic,** the anterior fontanel. **s., circumlental,** the interspace between the ciliary body and the equator of the lens. **s.s, circumvascular lymph-,** channels surrounding the blood-vessels and communicating with lymphatic vessels. **s., complemental** (of pleura), the portion of the pleural cavity just above the attachments of the diaphragm which is not filled with lung during

inspiration. **s., corneal,** that between the corneal layers. **s., epidural** (of the spinal canal), a lymph-space between the spinal dura and the periosteum lining the canal. **s.-feelings,** Hering's term for the perceptions or inferences of space-relations resulting from the retinal image. **s., Haversian, s., medullary.** See *Haver's spaces.* **s., hypoprostatic,** the space between the rectum and the prostate. **s.s, intercellular,** cavities formed by the splitting or separation of the walls of adjoining cells. **s., intercostal,** the space between two contiguous ribs. **s., intercrural.** See *s., interpeduncular.* **s.s, interfascicular,** spaces between the bundles in fibrous tissue. **s., interglobular,** an apparent, irregular space in the interglobular substance of the dentine. **s.s, interlamellar,** the spaces between the lamellæ of the cornea. **s., intermesoblastic,** the cavity between the visceral and parietal laminæ of the mesoblastic plates of the embryo. **s.s, intermetarsal,** spaces between the metatarsal bones. **s.s, intermuscular,** in the popliteal region, the spaces between the quadriceps extensor and the posterior muscles of the thigh. **s., interosseous,** the space between two parallel bones. **s., interparietal.** See *Virchow-Robin's, s.* **s., interpeduncular,** a diamond-shaped depression at the base of the brain, lying between the optic tracts and the crura cerebri. **s., interpleural,** the mediastinum. **s., interproximate,** in dentistry, the V-shaped space between the proximate surfaces of the teeth and the alveolar septum which is filled by the gum. **s., intertunical.** See *Virchow-Robin's, s* **s., intervaginal** (of the optic nerve). See *s., sub-vaginal* **s.s, investing.** See *s, lymph-.* **s., ischiorectal.** See *fossa, ischiorectal.* **s., lacunar.** See *lacuna.* **s., lymph-,** a sinus or space through which lymph passes. **s., marrow-.** See *canal, medullary.* **s., mediastinal,** the mediastinum. **s.-nerves,** the fibers of the auditory nerve in the semicircular canals. **s., pelvirectal.** See *fossa, ischiorectal.* **s., perforated.** See *perforated space.* **s.s, pericellular,** lymph-spaces in the brain. **s., perichoroid,** a lymph-space between the sclera and the choroid. **s., perigastric,** the cavity surrounding the stomach and other viscera. **s., perilenticular,** the space surrounding the crystalline lens holding the zonule of Zinn. **s.s, perineural,** lymph-spaces between the lamellæ of the perineurium. **s., perivascular.** See *s., circumvascular lymph-.* **s., perivitelline.** See *s., yolk-.* **s., pituitary,** the space between the two cranial trabeculæ wherein the hypophysis appears. **s.s, placental blood-,** the intervillous lacunæ of the placenta. **s.s, pleuro-peritoneal.** See *s., intermesoblastic.* **s., pneumatic,** an accessory sinus of the nose. **s., popliteal,** a lozenge-shaped space at the back of the knee and thigh. **s., posterior perforated,** the depression just behind the albicantia at the base of the brain. **s., posterior triangular,** the space lying above the clavicle and between the sternomastoid and the trapezius muscle and toe occiput. **s., prevesical,** a space lying immediately above the pubis and between the transversalis fascia and the posterior surface of the rectus abdominis. **s., quadrilateral,** the anterior and posterior triangles of the neck taken together. **s., rectovesical,** the space between the bladder and the rectum. **s., retroperitoneal,** that behind the peritoneum, but in front of the spinal column and lumbar muscles. **s., retropharyngeal,** that behind the pharynx; it contains loose areolar tissue. **s., semilunar** (of Traube). See *semilunar space of Traube.* **s.-sense.** 1. The faculty by which the form of objects is recognized. 2. A sense by which we judge of the relation of objects in space; it is a part of the sense of sight. **s., subarachnoid,** the space between the arachnoid and the pia proper. It contains the cerebrospinal fluid. **s., subdural,** the space between the dura and the arachnoid. Normally it contains only a capillary layer of fluid. **s., subumbilical,** a triangular space in the body-cavity having its base at the umbilicus. **s., subvaginal,** a lymph-space within the sheath of the optic nerve. **s., suprachoroid,** the space between the velum interpositum and the fornix. **s., uterorectal, s., uterovesical.** See *Douglas' culdesac.* **s., visual,** the visual field. **s., yolk-,** the space formed by the retraction of the vitellus from the zona pellucida.

spagiric (*spaj-ir'-ik*) [σπάειν, to stretch or rend; ἀγείρειν, to collect]. Pertaining to the obsolete chemical, alchemistic or Paracelsian, school of medicine.

spagirism (*spaj'-e-rizm*) [σπάειν, to stretch; ἀγείρειν, to collect]. The Paracelsian, or spagiric school, or doctrine, of medicine.

spagirist (*spaj'-e-rist*) [σπάειν, to stretch; ἀγείρειν, to collect]. A Paracelsian; a physician of the obsolete alchemistic school.

Spahlinger treatment (*spah'-ling-er*) [Henry *Spahlinger,* Swiss bacteriologist]. The use of vaccine and serum therapy in tuberculosis; at present the method is only in the experimental stage.

Spallanzani's law (*spal-lan-tsah'-ne*) [Lazaro *Spallanzani,* Italian physiologist, 1729–1799]. The regenerative power of the cells depends on the age of the individual; it decreases with age

spamenorrhea (*spa-men-or-e'-ah*) [σπάνις, scarcity; μήν, month; ῥοία, flow]. Scantiness of menstruation.

spanamenorrhea (*span-ah-men-or-e'-ah*). See *spamenorrhea.*

spanemia, spanæmia (*span-e'-me-ah*) [σπάνις, scarcity; αἷμα, blood]. Poverty of the blood; anemia.

spanemic, spanæmic (*span-e'-mik*). See *anemic.*

spaniocardia (*span-e-o-kar'-de-ah*) [σπάνειος, seldom; καρδία, heart]. Landois' name for bradycardia.

Spanish fever. Synonym of *Texas fever.* **S fly.** See *cantharides.* **S. white,** bismuth subnitrate. **S. windlass.** See *windlass.*

spanomenorrhea (*span-o-men-or-re'-ah*). See *spamenorrhea.*

spanopnea, spanopnœa (*span-op'-ne-ah*) [σπάνις, scarcity; πνεῖν, to breathe]. Infrequency of respiratory action.

sparadrap (*spar'-a-drap*) [*sparadrapum*]. A plaster spread upon cotton, linen, silk, leather, or paper; adhesive plaster.

spargosis (*spar-go'-sis*) [σπαργᾶν, to be distended]. 1. Enlargement of a part. 2. Enlargement of the breasts from accumulation of milk. 3. Elephantiasis.

sparteine (*spar'-te-in*). An alkaloid found in scoparius. **s. hydrochloride,** $C_{15}H_{26}N_2.2HCl$, colorless crystals, soluble in water or alcohol, used as is the sulphate. **s. hydroiodide,** $C_{15}H_{26}N_2.HI$, white needles, soluble in water or alcohol; usage and dose the same as the sulphate. **s. sulphate,** $C_{15}H_{26}N_2.H_2SO_4 + 5H_2O$ (*sparteinæ sulphas,* U. S. P.), bitter, colorless prisms, soluble in water or alcohol, boiling at 136° C.

It is a heart stimulant and diuretic. Dose ¼–½ gr. (0.011–0.022 Gm.); maximum dose ½ gr. (0.032 Gm.) single; ½–2 gr. (0.05–0.13 Gm.) daily. **s. triiodide,** $C_{15}H_{26}N_2I_3$, a black powder obtained from an ethereal solution of iodine and sparteine; soluble in alcohol; usage and dosage the same as the sulphate.

spartism (*spar'-tizm*). Poisoning from sparteine; characterized by vomiting, somnolence, paralytic-like weakness, and accelerated pulse.

spartium (*spar'-te-um*). Same as *scoparius*.

spasm (*spazm*) [σπασμός, spasm]. A sudden muscular contraction. **s. of accommodation,** spasm of the ciliary muscles, producing accommodation for objects near by. **s., Bell's,** convulsive facial tic **s., bronchial,** asthma. **s., carpopedal,** a contraction causing flexion of the fingers and wrist or ankles and toes. **s., clonic,** a spasm broken by relaxations of the muscles. **s., clonic, in the area of the nervus accessorius.** Synonym of *torticollis, spasmodic*. **s., clonic, in the area of the portio dura.** Synonym of *tic, painless*. **s., cynic.** See *cynic spasm*. **s., deglutition,** a paroxysm of rapid swallowing, noted by Young (1901) as a symptom of whooping cough. **s., drivers',** one of the so-called professional neuroses, it consists of cramp-like pains in the arms of drivers upon taking the reins in the hands. **s., facial,** a peculiar clonic contraction of the muscles supplied by facial nerve, at times confined to the muscles surrounding the eye, or else involving one entire side of the face. **s.s, fatigue,** Poore's term for a group of affections characterized by spasmodic contractions, either clonic or tonic, brought about by voluntary movement, the exciting cause being limited to some particular action Syn., *business spasms; coordinated business neuroses; functional spasms; handicraft spasms; movement spasms, occupation spasms; professional spasms*. **s., fixed,** permanent or continuous tetanic rigidity of one or more muscles. **s.s, Friedreich's.** Synonym of *paramyoclonus multiplex*. **s.s, function, s.s, functional, s.s, handicraft.** See *s s, fatigue,* and *occupation-neurosis*. **s. of the glottis.** See *laryngismus stridulus* **s., habit-,** half voluntary spasmodic movements, the result of habit, sometimes called habit-chorea. **s., hammer.** See *palsy, hammer*. **s., histrionic,** a condition in which local involuntary twitchings of the face, acquired in childhood, persist during adult life, and are increased by emotional causes. **s., idiopathic muscular.** See *tetany*. **s., inspiratory,** a spasmodic contraction of nearly all the inspiratory muscles. **s., laryngeal congenital,** a peculiar stridor developing at birth, and disappearing after one or two years. **s., lingual.** See *aphthongia*. **s., lock-,** a form of writer's cramp in which the fingers become locked on the pen. **s., masticatory** (of the face). See *trismus*. **s., mimic,** facial neuralgia. **s., mobile,** slow, irregular movements depending upon hemiplegia. **s.s, movement.** See *s.s, fatigue*. **s., muscular, idiopathic.** See *tetany*. **s., myopathic,** one attending a disease of the muscles. **s., nictitating, s., nodding.** See *eclampsia nutans*. **s., occupation, s., professional.** See *s.s, fatigue*. **s., pantomimic.** Synonym of *tic, painless*. **s., penman's.** Synonym of *writers' cramp*. **s., perineal.** See *vaginodynia*. **s., phonetic** (*of the glottis*), spastic aphonia consisting of a spasm of the glottis, with elevation, resulting in interference with respiration. **s., retrocollic,** clonus of the deeper muscles of the back of the neck. **s., Romberg's,** masticatory spasm affecting the muscles supplied by the motor fibers of the fifth nerve. **s., salaam,** clonic spasm of the muscles of the leg, causing jumping movements. **s. saltatoric, s., saltatory, s., static reflex.** See under *saltatory*. **s., sewing,** an affection of tailors, seamstresses, and shoemakers, in which clonic and tonic spasms attack the muscles of the hands on attempting to use them in the regular work. **s., smiths',** a spasm that occurs in those engaged in penblade manufacturing, saw straightening, razor-blade striking, scissors-making, file-forging, etc. It consists in spasmodic movements of the arm used, and finally paralysis; see *hemiplegia, hephestic*. **s., spinal accessory.** See *tic rotatoire*. **s. synclonic,** tremulous agitation. **s., telegraphist's,** an affection described first by Onimus, 1875. See *s s, fatigue*. **s., tetanic.** See *s., tonic*. **s , tonic,** a spasm that persists without relaxation for some time. **s., toxic,** one due to poison. **s., winking.** See *spasmus nictitans*. **s., writer's,** writers' cramp, *q. v.*

spasmalgin (*spaz-mal'-jin*). Trade name of a combination of papaverine, omnopon, and a derivative of atropine; used as an analgesic.

spasmo- (*spaz-mo-*) [σπασμός, spasm]. A prefix denoting pertaining to a spasm.

spasmodermia (*spaz-mo-der'-me-ah*) [*spasmo-*; δέρμα, skin] A spasmodic skin-affection.

spasmodermic (*spaz-mo-der'-mik*). Relating to a spasmodic affection of the skin.

spasmodic (*spaz-mod'-ik*) [*spasm*]. Pertaining to or characterized by spasm. **s. spinal paralysis.** See *lateral sclerosis*.

spasmodism (*spaz'-mod-izm*) [*spasm*]. Fleury's term for those nervous states that originate in medullary excitation.

spasmodyspnea (*spaz'-mo-disp-ne-ah*) [*spasmo-*; *dyspnea*] Spasmodic difficulty of breathing.

spasmology (*spaz-mol'-o-je*) [*spasmo-*; λόγος, a treatise]. The sum of scientific knowledge of the nature and causes of convulsions

spasmolygmus (*spaz-mo-lig'-mus*). See *hiccough*.

spasmoneme (*spaz'-mo-nēm*) [*spasmo-*; νῆμα, a thread]. The central reticulum or undulating bundle of fibrils eccentrically located in the peduncle of a stalked infusorian (*Vorticella*) and derived from the myonemes of the body.

spasmophilia (*spaz-mo-fil'-e-ah*) [*spasmo-*; φιλεῖν, to love]. A morbid tendency to convulsions.

spasmophilic (*spaz-mo-fil'-ik*) Having a tendency to convulsions.

spasmorthopnea (*spaz-mor-thop-ne'-ah*) [*spasmo-*; ὀρθος, straight, πνεῖν, to breathe]. Spasmodic orthopnea.

spasmotin (*spaz-mo'-tin*). See *sphacelotoxin*.

spasmotoxin (*spaz-mo-toks'-in*) [*spasmo-*; τοξικόν, poison]. 1. A ptomaine base of composition yet undetermined, obtained by Brieger from cultures of the tetanus germ, together with other unnamed toxins, one of which induced complete tetanus, with salivation and lacrimation. Spasmotoxin induces in animals violent clonic and tonic convulsions. 2. See *sphacelotoxin*.

spasmous (*spaz'-mus*) [σπασμός, spasm]. Having the nature of a spasm.

spasmus (*spaz'-mus*) [σπαζμός, spasm]. A spasm. **s. bronchialis.** Synonym of *bronchial asthma*. **s. cynicus,** spasmodic contraction of muscles on both sides of the mouth, giving a grinning expression. **s. glottidis,** spasm of the glottis or larynx, laryngismus stridulus. **s. intestinorum.**

Synonym of *enteralgia*. **s. muscularis.** Synonym of *cramp*. **s. nictitans,** spasmodic action of the orbicularis palpebrarum muscle, causing a winking-like movement of the lid. **s. nutans,** salaam convulsions, nodding spasm **s. oculi.** Synonym of *nystagmus*. **s. ventriculi.** Synonym of *enteralgia* and of *gastrodynia*.

spastic (*spas'-tik*) [σπαστικός, spastic]. Pertaining to or characterized by spasm; produced by spasm. **s. diplegia.** See *paraplegia, infantile spasmodic*. **s. paralysis.** See *paralysis, spastic*.

spasticity (*spas-tis'-it-e*) [*spastic*]. The state of being spastic.

spathologic (*spath-o-loj'-ik*) [σπαθᾶν, to go fast; λόγος, science]. Relating to rapid proliferation of leukocytes

spatial (*spa'-shal*) [*spatium*, space]. Relating to space.

spatium (*spa'-she-um*). Latin for *space*.

spatula (*spat'-ū-lah*) [L.; dim. of *spatha*, a ladle]. A flexible blunt blade for spreading ointment.

spatule (*spat'-ūl*) [*spatula*, a blade]. A structure having a spatulate shape.

spavin (*spav'-in*). A disease of horses affecting the hock-joint, or joint of the hind leg between the knee and the fetlock. **s., blood,** a dilatation of the vein that runs along the inside of the hock of a horse, forming a soft swelling. **s., bog,** an encysted tumor on the inside of the hock of a horse, containing gelatinous matter. **s., bone,** a disease of the bones at the hock-joint. **s., high,** an enlargement on the upper and inner part of the hock

spay [Gael., *spoith*]. To remove the ovaries.

spearmint (*spēr'-mint*). See *mentha viridis*.

specialism (*spesh'-al-izm*). See *specialty*.

specialist *spesh'-al-ist*) [*specialis*, particular, special]. One, especially a physician or surgeon, who limits his practice to certain diseases, or to the diseases of a single organ or class.

specialoid (*spesh'-al-oid*). A physician who has acquired a local reputation as a specialist and either continues in general practice or reverts to general practice after practising as a specialist for a limited time.

specialty (*spesh'-al-te*) [*species*]. The branch of medicine or surgery pursued by a specialist.

species (*spe'-shēz*) [L.]. 1. A subdivision of a genus of animals or plants the individuals of which are either identical in character or differ only in unimportant and inconstant details. 2. A name in German and French pharmacy, and in the National Formulary, for certain mixtures of herbs, used in making decoctions and infusions. **s.-cycle,** the entire series of forms exhibiting or illustrating all the phases in the life-history of a species. **s. emollientes,** a mixture of the leaves of althea and mallow, of the leaves and branches of the melilot, of matricaria and flaxseed, in equal parts; used as an emollient cataplasm. **s. laxantes.** See *tea, Saint Germain*. **s., morphological,** one of "such living beings as constantly resemble one another so closely that it is impossible to draw any line of demarcation between them while they differ only in such characters as are associated with sex." (Huxley.) **s., nascent,** an incipient species; a form undergoing modification **s., origin of,** a term denoting the evolution of differentiated groups or species from groups of individuals characterized by general similarity or by homogeneity of structure.

specific (*spe-sif'-ik*) [*species; facere*, to make]. 1. Of or pertaining to a species, or to that which distinguishes a thing or makes it of the species of which it is. 2. A medicine which has a distinct curative influence on an individual disease. 3. Produced by a single microorganism, as a *specific* disease; in a restricted sense, syphilitic. **s. gravity.** See *gravity, specific*. **s. heat.** See *heat, specific*. **s. remedy,** a remedy peculiarly curvative of a certain disease.

specificity (*spes-if-is'-it-e*) [*specific*]. The quality of being specific.

specillum (*spe-sil'-um*) [L.: *pl., specilla*]. A probe, especially one of silver, armed with a button-shaped head, for exploring wounds, fistulæ, etc. 2. A lens.

specimen (*spes'-im-en*) [L.]. An example; a sample. **s.-cooler,** a small water-cell immediately under the specimen in microprojection, to prevent injury from the heat of the radiant.

spectacles (*spek'-tak-ls*) [*spectare*, to view]. Framed or mounted lenses for the correction of optical or muscular defects of the eye; see *lens*. **s., bifocal.** See *bifocal*. **s., orthoscopic.** See *orthoscopic*. **s., pantoscopic.** A synonym of *s., bifocal, q. v.* **s., periscopic.** See *periscopic*. **s., prismatic,** spectacles with prismatic lenses, either alone or combined with spherical or cylindrical lenses. **s., protective,** lenses that shield the eyes from light, dust, heat, etc.

spectral (*spek'-tral*) [*spectrum*]. Pertaining to a spectrum.

spectro- (*spek-tro-*) [*spectrum*]. A prefix meaning relating to the spectrum.

spectrocolorimeter (*spek-tro-kul-or-im'-et-er*) [*spectro-; color; μέτρον*, measure]. An apparatus for the isolation of a single spectral color. It is used for the detection of color-blindness.

spectrometer (*spek-trom'-et-er*) [*spectro-; μέτρον*, a measure]. An instrument for determining the deviation of a ray of light produced by a prism or diffraction-grating, or for ascertaining the wave-length of a ray of light.

spectrometry (*spek-trom'-et-re*) [*spectrometer*]. The use of the spectrometer.

spectromicroscope (*spek'-tro-mi'-kro-skōp*). See *microspectroscope*.

spectrophone (*spek'-tro-fōn*) [*spectro-; φωνή*, sound]. An apparatus devised by Painter and Bell (1881) for the production of sound by the rays of the spectrum.

spectrophotometer (*spek-tro-fo-tom'-et-er*) [*spectro-; φῶς*, light; *μέτρον*, a measure]. 1. An apparatus for determining the amount of color in spectrum-analysis. 2. Helmholtz's apparatus for mixing colors.

spectrophotometry (*spek-tro-fo-tom'-et-re*). The quantitative estimation of the coloring-matter in a substance by means of the spectroscope.

spectropolarimeter (*spek-tro-po-lar-im'-et-er*) [*spectro-; polus*, pole; *μέτρον*, measure]. An instrument in which a spectroscope and polarizing apparatus are combined for the purpose of determinating the concentration of solutions of substances that rotate the plane of polarized light.

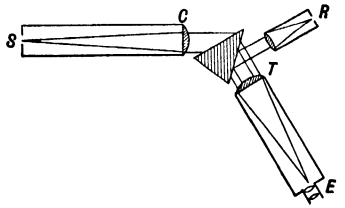
spectroscope (*spek'-tro-skōp*) [*spectro-; σκοπεῖν*, to see]. An instrument for the production and examination of the spectrum.

spectroscopic (*spek-tro-skop'-ik*) [*spectroscope*]. Pertaining to the spectroscope.

spectrotherapy (*spek-tro-ther'-ap-e*) [*spectro-; therapy*]. Apéry's term for the therapeutic employment of prismatically decomposed rays.

spectrum (*spek'-trum*) [L., *pl., spectra:* "an image"]. 1. The band of rainbow colors pro-

duced by decomposing light by means of a prism or a diffraction-grating. 2. An after-image or ocular spectrum. **s., absorption,** a



S. Narrow Slit. C. Collimating Lens. T. Telescope Lens. E. Eye Piece. R. Scale.

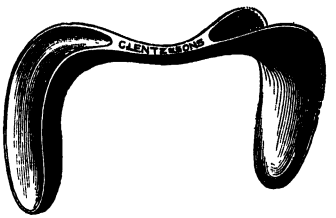
spectrum which contains dark lines or bands. These are produced in a continuous spectrum by the absorption of incandescent vapors, through which the light has passed, as in the solar atmosphere. **s.-analysis,** determination of the nature of bodies by the character of their spectra. **s., auditory.** See *phonism, photism.* **s., comparison,** the arrangement side by side of the spectra of two different substances. **s., complementary,** a spectrum derived from bodies which change in chemical or molecular constitution before reaching a sufficiently high temperature to become luminous. **s., continuous,** a spectrum without sudden variations of hue, in which the various rainbow or spectral colors merge gradually into one another. **s., double,** see *s., comparison.* **s., line,** the spectrum resulting from incandescent gas. It consists not of the various rainbow colors, but of sharp, narrow, bright lines, the color depending on the substance; all the rest of the spectrum is dark. **s., normal,** a spectrum in which the red color occupies about the same space as the blue and the violet. **s., solar,** the spectrum afforded by the refraction of a ray of sunlight.

speculum (*spek'-ū-lum*) [L.: *pl., specula*]. 1. A mirror. 2. An instrument for dilating the opening of a cavity of the body in order that the interior may be more easily visible, as *vaginal speculum, rectal speculum, nasal speculum,* etc. 3. A tendinous structure. **s. citrinum,** ointment. **s. helmontii,** the central tendinous part of the diaphragm, the centrum nerveum. **s. indicum,** iron filings. **s. lucidum.** Same as *septum lucidum.* **s. matricis,** womb-mirror; a vaginal speculum. **s.-metal,** an alloy of copper and tin. **s. oris,** an oral speculum or "mouth mirror." **s. rhomboideum,** a rhomboid area formed by the tendon of the trapezius muscles at the level of the upper dorsal and lower cervical spines. **s., Sims',** a vaginal speculum invented by J. Marion Sims.

Self Retaining Speculum. (Modification of Sims.)

spedalskhed (*sped-als'-ked*). A Scandinavian term for leprosy.

speech [AS., *sprecan,* to speak]. 1. The faculty of expressing thought by spoken words; the act of speaking. 2. The words spoken. **s. center,** the cerebral center for speech. See *center, speech.* **s., staccato,** see *scanning.*



Sims' Speculum.

spell-bone. The fibula.

spelter (*spel'-ter*). An alloy of zinc and copper. Crude zinc; **s. chills,** brass-founder's ague; see under *ague.*

Spence's test. A tumor of the mammary gland can be distinguished from an inflammatory enlargement by the absence, in the latter case, of any tumefaction, there being only the lumpy and wormy sensation of the swollen acini and ducts.

Spencer's area. A cortical area in the frontal lobe just outside of the olfactory tract and anterior to the point where it joins the temporosphenoid lobe, as indicated by the crossing of the Sylvian artery. Faradic stimulation of this area influences the respiratory movements, causing stoppage of the respiration when sufficiently intense.

spend [*dispendere,* to lay out, to expend]. To ejaculate the semen.

Spengler's bodies (*speng'-gler*) [Carl *Spengler,* Swiss physician, 1861–]. Small particles resembling fragments of bacilli, found in tuberculous sputum, and having the same staining reaction as tubercle bacilli. **S.'s method of examining sputum,** 5 Cc. of 0.4 % of soda are added to 5 Cc. of sputum; 0.1 Cc. trypsin or pancreatin, and two or three drops of chloroform are then added. This is corked and incubated at body temperature. The tube must be agitated occasionally during the first few hours. Next day the supernatant fluid is poured off, and the residue used for making smears which are then examined for the tubercle bacilli.

Spens' syndrome [Thomas *Spens,* Scotch physician, 1764–1842]. The same as Adams Stokes' disease, *q. v.*

spent (*spendere,* to spend]. Exhausted; impotent. **s. acid,** a battery-acid that has become too weak for efficient action.

sperm, sperma (*sperm, sper'-mah*) [σπέρμα, seed]. The semen. **s.-ball,** a spherical cluster of spermatozoa. **s.-blastoderm,** a blastodermic layer of formative spermatozoa. **s. blastophore,** the residual mass of the sperm-mother cell. **s.-blastula,** a spherical blastula whose surface is a sperm-blastoderm. **s.-cell,** a spermatoblast. **s.-morula,** a spermatic morula. **s.-mother cell,** Lankester's term for the spherical male germs of the malaria parasite as found in the mosquito. **s.-nucleus,** the nucleus of a spermatozoon. **s.-oil,** an oil procured from the deposits in the head of the sperm-whale. **s.-rope,** a string of spermatozoa.

sperm-cell. Spermatozoon.

spermaceti (*sper-mas-e'-te*) [σπέρμα, seed; κῆτος, whale], $C_{16}H_{31}O_2C_{16}H_{33}$. A white, semitrans-

parent substance (*cetaceum*, U. S. P., B. P.), consisting of a mixture of various fats of which cetyl palmitate, $C_{16}H_{33}(C_{16}H_{31}O_2)$, is the most important. It is obtained from the head of the sperm whale, and is used internally as an emollient and as an ingredient of various ointments. *Ceratum cetacei* and *unguentum cetacei* (B. P.) are prepared from it. See *cetaceum*.

spermacrasia (*sper-mak-ra'-ze-ah*) [σπέρμα, seed; *acrasia*]. 1. Imperfection of the semen. 2. Spermatorrhea.

spermaduct (*sper'-ma-dukt*) [*sperm; ductus*, a duct]. A sperm-duct, the vas deferens.

spermagone (*sper'-mag-ōn*) [σπέρμα, seed; γονεία, generation]. Same as *spermatogonium*.

spermagonium (*sper-mag-o'-ne-um*) [σπέρμα, seed; γονεία, generation: *pl.*, *spermagonia*]. Same as *spermogonium*.

spermalist (*sper'-mal-ist*). Same as *spermist*.

spermary (*sper'-ma-re*) [σπέρμα, seed]. The analogue in the male of the ovary; *i. e.*, the organ generating the sperm-cells; in the higher animals, called the testis, or testicle.

spermaster (*sper-mas'-ter*). A radiation found in the fecundated ovum, and proceeding from the head of the spermatozoon.

spermatanergia (*sper-mat-an-ur'-je-ah*) [σπέρμα, seed; *anergia*]. Sterility in the male.

spermatemphraxis (*sper-mat-em-fraks'-is*) [σπέρμα, seed; ἔμφραξις, obstruction] An obstruction to the discharge of semen.

spermathanaton (*sper-mah-than'-at-on*) [*sperm*; θάνατος, death]. Trade name of a contraceptive, containing tetraborates of sodium which liberate hydrogen dioxide.

spermatic (*sper-mat'-ik*) [*sperm*]. 1. Pertaining to the semen. 2. Conveying the semen, as the *spermatic* cord. 3. Pertaining to the spermatic ord, as the *spermatic* fascia. **s. artery**, a branch of the aorta supplying the testicle. **s. canal**, see inguinal canal. **s. cones.** See *cone*. **s. cord**, the cord of arteries, veins, lymphatics, nerves, and the excretory duct of the testicle passing from the testicle to the internal abdominal ring. **s. crystals**, a variety of crystals formed in seminal fluid after prolonged standing; see under *sperm in*. **s. fascia**, a thin fascia attached to the internal abdominal ring, and prolonged down over the outer surface of the spermatic cord. **s. gelatin**, a gelatinous substance found in the spermogonia of certain cryptogams. **s. plexus**, the pampiniform plexus. **s. rete.** See *rete testis*.

spermaticidal (*sper-mat-is-i'-dal*) [σπέρμα, seed; *cædere*, to kill]. Destructive to spermatozoa.

spermatid (*sper'-mat-id*) [σπέρμα, seed]. A seminal cell. A cell produced by fission of a secondary spermatocyte.

spermatin (*sper'-mat-in*) [*sperm*]. An odorless, mucilaginous substance found in semen.

spermatism (*sper'-mat-izm*) [σπέρμα, seed]. A discharge of semen.

spermatismus (*sper-mat-iz'-mus*) [σπέρμα, seed]. The emission of semen.

spermatitis (*sper-mat-i'-tis*) [σπέρμα, seed; ιτις, inflammation]. Same as *funiculitis*.

spermatize (*sper'-mat-īz*). To discharge semen.

spermato- (*sper-mat-o-*) [σπέρμα, seed]. A prefix meaning pertaining to the semen.

spermatoal (*sper-mat-o'-al*) [σπέρμα, seed; ᾠόν, an egg]. Pertaining to a spermatoon.

spermatoblast, spermoblast (*sper'-mat-o-blast, sper'-mo-blast*) [*spermato-*; βλαστός, a germ]. A cell resulting from the division of the spermatogenic cell and developing into a spermatozoon.

spermatoblastic (*sper-mat-o-blas'-tik*). Pertaining to spermatoblasts.

spermatocele (*sper'-mat-o-sēl*) [*spermato-*; κήλη, tumor]. A spermatic cyst or encysted hydrocele containing spermatozoa.

spermatocidal (*sper-mat-o-si'-dal*) [*spermato-*; *cædere*, to kill]. Destructive to spermatozoa.

spermatocide (*sper'-mat-o-sīd*) [*spermato-*; *cædere*, to kill]. An agent that destroys spermatozoa.

spermatoclemma (*sper-mat-o-klem'-ah*) [*spermato-*; κλέμμα, a stealing: *pl.*, *spermatoclemmata*]. Involuntary emission of semen. Syn. *pollution*.

spermatocratia (*sper-mat-o-kra'-she-ah*). Synonym of *spermatorrhea*.

spermatocyst (*sper'-mat-o-sist*) [*spermato-*; κύστις, cyst]. A seminal vesicle; a pathological cyst containing spermatozoa.

spermatocystectomy (*sper-mat-o-sist-ek'-to-me*) [*spermato-*; *cystectomy*]. Excision of a spermatic cyst.

spermatocystic (*sper-mat-o-sis'-tik*). Pertaining to a spermatocyst.

spermatocystitis (*sper-mat-o-sis-ti'-tis*). Inflammation of the seminal vesicles.

spermatocystotomy (*sper-mat-o-sis-tot'-o-me*) [*spermato-*; *cystotomy*]. Surgical incision of a seminal vesicle.

spermatocytal (*sper-mat-o-si'-tal*). Pertaining to a spermatocyte.

spermatocyte (*sper'-mat-o-sīt*) [*spermato-*; κύτος, cell]. The germinal cell from which the spermatozoon develops.

spermatogenesis, spermatogeny (*sper-mat-o-jen'-es-is, sper-mat-oj'-en-e*) [*spermato-*; γένεσις, origin]. The formation of spermatozoa.

spermatogenic (*sper-mat-o-jen'-ik*) [see *spermatogenesis*]. Producing spermatozoa, as the *spermatogenic* cells of the testicle.

spermatogenous (*sper-mat-oj'-en-us*) [*spermato-*; γενής, producing]. Producing spermatozoa.

spermatogeny (*sper-mat-oj'-en-e*). *Spermatogenesis*.

spermatogonium (*sper-mat-o-go'-ne-um*) [*spermato-*; γονή, generation]. A formative seminal cell or mass of spermatoblasts.

spermatoid (*sper'-mat-oid*). See *spermatozoon*.

spermatology (*sper-mat-ol'-o-je*) [*spermato-*; λόγος, a treatise]. The sum of what is known regarding the origin, nature, qualities and characteristics of the seminal fluid.

spermatolysin (*sper-mat-ol'-is-in*). A substance causing spermatolysis.

spermatolysis (*sper-mat-ol'-is-is*) [*spermato-*; λύσις, solution]. Destruction or solution of spermatozoa.

spermatolytic (*sper-mat-o-lit'-ik*). Pertaining to spermatolysis.

spermatomere (*sper'-mat-o-mēr*) [*spermato-*; μέρος, share]. Any one of the portions into which a pronucleus of the fertilized ovum may divide.

spermatoon (*sper-mat-o'-on*) [*spermato-*; ᾠόν, egg]. The nucleus of a sperm-cell or spermatozoon.

spermatopathy (*sper-mat-op'-ath-e*) [*spermato-*; πάθος, disease]. Disease of the sperm-cells or of their secreting mechanism.

spermatophobia (*sper-mat-o-fo'-be-ah*) [*spermato-*; φόβος, fear]. False spermatorrhea; morbid dread of spermatorrhea.

spermatophore (*sper'-mat-o-fōr*) [*spermato-*; φέρειν, to bear]. 1. The part of the spermatospore that is not converted into a spermatoblast. 2. A semitransparent capsule surrounding a group of spermatozoa.

spermatoplania (*sper-mat-o-pla'-ne-ah*) [*spermato-; πλάνη*, a wandering]. A supposed metastasis of the semen

spermatopoietic (*sper-mat-o-poi-et'-ik*) [*spermato-; ποιεῖν*, to make]. Pertaining to the production or secretion of semen.

spermatorrhea, spermatorrhœa (*sper-mat-or-e'-ah*) [*spermato-; ῥοία*, a flow]. Involuntary discharge of semen without sexual excitement. **s. dormientum**, a nocturnal emission of semen. **s., false**, when spermatozoids are not in the fluid, called also prostatorrhea. **s., true**, when spermatozoids are present.

spermatoschesis (*sper-mat-os'-kes-is*) [*spermato-; σχέσις*, suppression]. Suppression of the seminal fluid.

spermatóspore (*sper'-mat-o-spōr*) [*spermato-; σπόρος*, seed]. A primitive cell giving rise by division to spermatoblasts.

spermatotoxin, spermatoxin (*sper-mat-o-toks'-in, sper-ma-toks'-in*). See *spermolysin*.

spermatovum (*sper-mat-o'-vum*) [*spermato-; ovum*, egg *pl., spermatova*]. An impregnated ovum.

spermatozemia (*sper-mat-o-ze'-me-ah*). See *spermatorrhea*.

spermatozoa (*sper-ma-to-zo'-ah*). Plural of *spermatozoon, q. v*

spermatozoal, spermatozoan, spermatozoic (*sper-mat-o-zo'-al, sper-mat-o-zo'-an, sper-mat-o-zo'-ik*). Relating to a spermatozoon.

spermatozoicide (*sper-mat-o-zo'-is-īd*) [*spermatozoon; cædere*, to kill]. 1. Destructive to spermatozoa. 2. An agent destructive to spermatozoa.

spermatozoid or **spermatozooid** (*sper-mat-o-zo'-id, sper-mat-o-zo'-oid*). Same as *spermatozoon*

spermatozoon (*sper-mat-o-zo'-on*) [*spermato-; ζῷον*, animal]. The male element capable of fecundating the ovum. It consists of an oval head and a long, mobile cilium or tail. It is the essential element of the semen.

spermaturia (*sper-mat-ū'-re-ah*) [*spermato-; οὖρον*, urine]. The presence of semen in the urine.

spermectomy (*sper-mek'-to-me*). Resection of part of the spermatic duct.

spermic (*sper'-mik*). Same as *spermatic*.

spermicide (*sper'-me-sīd*) [*σπέρμα*, seed; *cædere*, to kill]. An agent that destroys spermatozoa. Spermatocide.

spermiduct (*sper'-mid-ukt*) [*σπέρμα*, seed; *ductus*, a duct]. A duct for the passage of semen; the vas deferens.

spermin (*sper'-min*) [*sperm*], C_7H_8N. A non-poisonous base from sputum, human semen, the organs of leukemic patients, etc. It has been used in neurasthenia, senile debility, diabetes mellitus, and pulmonary tuberculosis. 2. A preparation of the testicles of animals. **s. phosphate**, constitutes the Charcot-Leyden crystals.

spermism (*sper'-mizm*) [*σπέρμα*, seed]. The theory that the animal is the result of the development of a spermatozoon, the ovum acting only as an accessory matrix.

spermist (*sper'-mist*). A believer in spermism.

spermite (*sper'-mīt*) [*sperm.*]. The male form of a microbe in a gonite culture that has been exposed to sunlight.

spermium (*sper'-me-um*). Mature spermatozoon.

spermoblast (*sper'-mo-blast*). See *spermatoblast*.

spermocenter (*sper-mo-sen'-ter*). The sperm-centrosomes during fertilization of the egg.

spermolith (*sper'-mo-lith*) [*σπέρμα*, semen; *λίθος*, a stone]. A calculus in the spermatic duct or seminal vesicles.

spermolysin (*sper-mol'-is-in*) [*sperm; λύειν*, to loosen]. Metchnikoff's name for a cytolysin produced by inoculation with spermatozoa Syn., *spermatoxin*.

spermolysis (*sper-mol'-is-is*). Dissolution of spermatozoa.

spermoneuralgia (*sper-mo-nū-ral'-je-ah*) [*σπέρμα*, seed; *νεῦρον*, nerve; *ἄλγος*, pain]. Neuralgia of the testicles and spermatic cord.

spermophlebectasia (*sper-mo-fleb-ek-ta'-se-ah*) [*σπέρμα*, seed; *φλεψ*, vein; *ἔκτασις*, distention]. Varicosity of the spermatic vein.

spermoplasm (*sper'-mo-plazm*) [*sperm; πλάσσειν*, to mold]. The protoplasm of a spermatozoon.

spermorrhagia (*sper-mor-a'-je-ah*). See *spermatorrhea*.

spermorrhea (*sper-mor-e'-ah*). See *spermatorrhea*.

spermosphere (*sper'-mo-sfēr*) [*sperm; σφαῖρα*, sphere]. A mass of spermatoblasts.

spermospore (*sper'-mo-spōr*). See *spermatospore*.

spermotoxic (*sper-mo-toks'-ik*). Pertaining to spermotoxin.

spermotoxin (*sper-mo-toks'-in*). See *spermolysin*.

spes phthisca (*spēz-tiz'-ik-ah*) [*spes*, hope]. The hopeful temperament so frequently found in sufferers from tuberculosis.

sp. gr. Abbreviation of *specific gravity*.

sph. Abbr. for *spherical*, also for *spherical lens*

sphacelate, sphacelated (*sfas'-el-āt, sfas'-el-a-ted*) [*sphacelus*]. Necrosed; gangrenous; mortified.

sphacelation (*sfas-el-a'-shun*). The formation of a sphacelus; moist gangrene; necrosis.

sphacele (*sfas'-ēl*). The uncorticated apical cell of the branches of certain marine algæ.

sphacelinic acid (*sfas-e-lin'-ik*). Sphacelotoxin.

sphacelism (*sfas'-el-izm*) [*σφάκελος*, gangrene]. 1. The condition of being affected with sphacelus. 2. Necrosis. 3. Inflammation of the brain.

sphaceloderma (*sfas-el-o-der'-mah*) [*sphacelus; δέρμα*, skin]. Gangrene of the skin, especially symmetrical gangrene, or Raynaud's disease.

sphaceloid (*sfas'-el-oid*) [*σφάκελος*, gangrene; *εἶδος*, like]. Resembling a sphacelus or gangrene.

sphacelotoxin (*sfas-el-o-toks'-in*) [*sphacelus*, a stage in the growth of ergot; *toxicon*, a poison], $C_{20}O_{21}H_8$. A yellowish, pulverulent body obtained from ergot, insoluble in water, soluble in ether, chloroform, alcohol, and alkaline solutions. It is used as a tonic, astringent, and emmenagogue. Dose ¼–1½ gr. (0.032–0.1 Gm.). Syn., *spasmotin; spasmotoxin*.

sphacelous (*sfas'-el-us*) [*σφάκελος*, gangrene]. Pertaining to sphacelus; gangrenous; necrosed.

sphacelus (*sfas'-el-us*) [*σφάκελος*, gangrene]. A slough.

sphæræsthesia (*sfe-res-the'-ze-ah*). See *spheresthesia*.

sphærobacteria (*sfe-ro-bak-te'-rah*). See *sphærobacteria*.

sphærobacterium (*sfe-ro-bak-te'-re-um*). See *sphærobacterium*.

Sphærococcus (*sfe-ro-kok-us*) [*σφαῖρα*, a ball; *κόκκος*, a berry]. A genus of marine algæ of the order *Sphærococcoideæ*. **S. compressus**, said to furnish in part the Japanese isinglass or agar of commerce.

sphæroma (*sfe-ro'-mah*). See *spheroma*.

sphage (*sfāj*) [*σφαγή*, the throat]. The throat; the anterior portion of the neck.

sphagiasmus (*sfa-je-az'-mus*) [*σφαγή*, throat]. Epileptic spasm of the muscles of the neck.

sphagitis (*sfa-ji'-tis*) [*σφαγή*, the throat; *ιτις*, inflammation]. 1. Inflammation of the jugular vein. 2. Sore-throat.

sphenencephalus (*sfe-nen-sef'-al-us*). See *sphenocephalus*.

sphenethmoid (*sfe-neth'-moid*). Same as *spheno-ethmoid*.

sphenic (*sfe'-nik*) [σφήν, wedge]. Wedge-like.

sphenion (*sfe'-ne-on*) [σφήν, wedge]. The apex of the sphenoid angle of the parietal bone on the surface of the skull. See craniometric points.

spheno- (*sfe-no-*) [σφήν, a wedge]. A prefix denoting pertaining to the sphenoid bone.

sphenobasilar (*sfe-no-bas'-il-ar*) [*spheno-*; βάσις, base]. Pertaining conjointly to the sphenoid bone and the basilar portion of the occipital bone. **s. groove,** the depression on the body of the sphenoid bone and the basilar portion of the occipital bone, upon which the pons rests.

sphenoccipital (*sfe-nok-sip'-it-al*) [*spheno-*; *occiput*] Pertaining to the sphenoid and the occipital bones, sphenobasilar.

sphenocephalus (*sfe-no-sef'-al-us*) [*spheno-*; κεφαλή, head]. A variety of monster in which the two eyes are well separated, the ears united under the head, the jaws and mouth distinct, and the sphenoid bone altered in shape, so that it is analogous in form to what is found normally in birds.

sphenoethmoid (*sfe-no-eth'-moid*) [*spheno-*; *ethmoid*]. Relating to both the sphenoid and the ethmoid bones **s. recess,** the groove at the back of the roof of the nasal fossa.

sphenofrontal (*sfe-no-frun'-tal*). Belonging or relating to both the sphenoid and frontal bones.

sphenoid (*sfe'-noid*) [σφήν, wedge; εἶδος, like] 1. Wedge-shaped, as the *sphenoid* bone 2 The sphenoid bone. **s. bone,** see *sphenoidale* under *bones, table of*. **s. sinus,** see *sinus, sphenoid*

sphenoidale (*sfe-noid-a'-le*) [neuter of *sphenoidalis*, sphenoid]. The sphenoid bone. **s. basilare anterius,** the anterior portion of the body of the sphenoid. **s. basioposticum,** the lower portion of the body of the sphenoid **s. laterale posterius,** the lateral portion of the sphenoid. **sphenoidalia lateralia,** the greater wings of the sphenoid.

sphenoides (*sfe-noi'-dez*) [σφήν, wedge; εἶδος, like]. The sphenoid bone.

sphenoiditis (*sfe-noid-i'-tis*). Inflammation of the sphenoid sinus.

sphenoido- (*sfe-noi-do-*). The same as *spheno-*

sphenoidoauricular (*sfe-noi-do-aw-rik'-ū-lar*) [*sphenoid; auricula*, auricle]. Pertaining to the sphenoid and binauricular diameters of the skull. **s.-a. index,** the ratio of the minimum sphenoid diameter of the skull with the binauricular diameter, the latter being taken as 100

sphenoidofrontal (*sfe-noi-do-fron'-tal*) [*sphenoido-*; *frontal*]. 1. Pertaining to the sphenoid and frontal bones. 2. Pertaining to the sphenoid and frontal diameters of the skull. **s.-f. index,** the relation between the minimum sphenoid diameter of the skull and the minimum frontal diameter taken as 100

sphenoidoparietal (*sfe-noi-do-par-i'-et-al*) [*sphenoido-*; *parietal*]. 1. Pertaining to the sphenoid and parietal bones. 2. Belonging or relating to the sphenoid and parietal diameters of the skull. **s.-p. index,** the relation between the minimum sphenoid diameter of the skull and the maximum frontal diameter taken as 100.

sphenomalar (*sfe-no-ma'-lar*). Pertaining to the sphenoid and malar bones.

sphenomandibular (*sfe-no-man-dib'-ū-lar*). Pertaining to the sphenoid and inferior maxillary bones. **s. ligament.** See *sphenomaxillary ligament*.

sphenomaxillary (*sfe-no-maks'-il-a-re*) [*spheno-*; *maxilla*]. Pertaining to the sphenoid and maxillary bones, as the *sphenomaxillary* fossa. **s. fissure.** See *fissure, sphenomaxillary*. **s. fossa,** a triangular space at the angle of the sphenomaxillary and pterygomaxillary fissure. **s. ligament,** a ligament extending from the inferior maxilla, near the inferior dental foramen, to the spinous process of the sphenoid bone.

sphenometer (*sfe-nom'-et-er*) [σφήν, wedge; μέτρον, measure]. An instrument for measuring the wedge to be removed in osteotomy for curvature

spheno-occipital (*sfe-no-ok-sip'-it-al*). See *sphenoccipital*.

spheno-orbital (*sfe-no-or'-bit-al*) [*spheno-*; *orbit*]. Pertaining to the sphenoid bone and the orbit.

sphenopalatine (*sfe-no-pal'-a-tin*) [*spheno-*; *palatum*, palate] Pertaining to the sphenoid bone and the palate, as the *sphenopalatine* foramen. **s.-foramen,** the spheno-palatine notch converted into a foramen by articulation with the sphenoidal turbinated bone. **s.-p. ganglion.** See *ganglion* **s.-p. notch,** a deep notch separating the orbital and sphenoid process of the palate bone, see notch

sphenoparietal (*sfe-no-par-i'-et-al*) [*spheno-*; *parietal*] Pertaining to the sphenoid and parietal bones

sphenopetrosal (*sfe-no-pe-tro'-sal*) [*spheno-*; πέτρα, rock]. Pertaining to the sphenoid bone and the petrous portion of the temporal bone.

sphenopterygoid (*sfe-no-ter'-ig-oid*). Pertaining to the body of the sphenoid bone and to the pterygoid process

sphenorbital (*sfe-nor'-bit-al*). See *sphenoorbital*.

sphenosis (*sfe-no'-sis*) [σφήν, wedge]. The wedging of the fetus in the pelvis.

sphenosquamosal, sphenosquamous (*sfe-no-skwa-mo'-sal, sfe-no-skwa'-mus*). Belonging or relating to both the sphenoid bone and the squamous portion of the temporal bone.

sphenotemporal (*sfe-no-tem'-po-ral*). Pertaining conjointly to the sphenoid and temporal bones.

sphenotic (*sfe-no'-tik*) [*spheno-*; οὖς, ear]. A part of the sphenoid bone, existing as a distinct bone in the fetus, and forming the parts adjacent to the carotid groove. **s. foramen,** the foramen lacerum medium

sphenotresia (*sfe-no-tre'-ze-ah*) [σφήν, wedge; τρῆσις, perforation]. A variety of craniotomy in which the basal portion of the fetal skull is perforated.

sphenotribe (*sfe'-no-trib*) [*spheno-*; τρίβειν, to rub]. An instrument for crushing the basal portion of the fetal skull.

sphenotripsy (*sfe'-no-trip-se*) [see *sphenotribe*]. Crushing of the fetal skull.

sphenoturbinal, sphenoturbinate (*sfe-no-ter'-bin-al, sfe-no-ter'-bin-āt*). 1. Pertaining to the sphenoid and turbinate bones. 2. One of the sphenoidal spongy bones situated cephalad of the body of the sphenoid.

sphenovomerine (*sfe-no-vo'-mer-in*). Pertaining to the sphenoid bone and the vomer.

sphenozygomatic (*sfe-no-zi-go-mat'-ik*) [*spheno-*; *zygoma*]. Pertaining to the sphenoid and zygomatic (or malar) bones.

spheral (*sfe'-ral*) [σφαῖρα, sphere]. Like a sphere.

sphere (*sfēr*) [σφαῖρα, a sphere]. 1. A ball or globe. 2. A space. **s. of attraction,** a clear spot in the cell-plasma, outside and close to the nucleus of an ovum undergoing mitosis. It

contains the centrosoma of Boveri, and is the center of the formation of the amphiasters in karyokinesis (*q. v.*). **s., embryonic.** See *s., segmentation-*. **s.-granule,** a large granular corpuscle found in serous exudations. **s., hearing,** the area in the brain which is supposed to be the seat of hearing. It is in the temporal lobe. **s., motor,** a region in the central nervous system which, when stimulated, gives rise to motion. **s., protoplasmic primordial.** See *s., segmentation-*. **s., segmentation-,** a nucleated cell derived from division of the vitellus in the process of segmentation. **s., sensory,** a sensory area of the central nervous system. **s., vitelline, s., yolk-,** the mulberry-like mass of cells that results from the fission of the substance of the ovum after fertilization. **s., yeast-,** in biology, an aggregation of certain sprouting forms of the genus *Mucor*.

spheresthesia, spheræsthesia (*sfe-res-the'-ze-ah*) [σφαῖρα, globe; αἴσθησις, sensation]. Perverted feeling, as of the contact of a ball or globe-shaped body.

spheric, spherical (*sfer'-ik, sfer'-ik-al*). Having the shape of or pertaining to a sphere. **s. aberration.** See *aberration, spherical*.

spherobacteria (*sfe-ro-bak-te'-re-ah*) [σφαῖρα. sphere; *bacteria*]. The micrococci.

spherococcus (*sfe-ro-kok'-us*). Micrococcus.

spheroid (*sfe'-roid*) [σφαῖρα, sphere; εἶδος, like] Having the form of a sphere. A solid resembling a sphere **s., oblate,** one in which the polar axis is less than the equatorial diameter. **s., prolate,** one in which the polar axis exceeds the equatorial diameter.

spheroma (*sfe-ro'-mah*) [σφαῖρα, sphere; ὀμα, tumor]. Any spherical shaped tumor or protuberance.

spherometer (*sfe-rom'-et-er*) [σφαῖρα, sphere; μέτρον, a measure]. An instrument for determining the degree of curvature of a sphere or part of a sphere, especially of optic lenses, or of the tools used for grinding them.

spherospermia (*sfe-ro-spur'-me-ah*) [σφαῖρα, sphere; σπέρμα, seed]. Spermatozoa which do not have a long thread-like tail. See *hematospermia*.

spherule (*sfer'-ūl*). A minute sphere.

sphincter (*sfingk'-ter*) [σφίγγειν, to bind]. A muscle surrounding and closing an orifice, as the *anal sphincter*, the *pyloric sphincter*, etc. **s. ani.** See under *muscle*. **s. antripylorici.** See under *muscle*. **s. gulæ,** the constrictor of the pharynx. **s. ilei,** the ileocecal valve. **s. intestinalis.** See *s. ani* (*internal*) under *muscle*. **s. laborium,** the orbicularis oris muscle. **s. laryngis,** the arytenoepiglottideus muscles of both sides surrounding the laryngeal opening. **s. oculi, s. palpebrarum,** the orbicularis palpebrarum muscle. **s. œsophageus.** See *foramen, esophageal*. **s., oral,** the orbicularis oris. **s. pharyngolaryngeus,** the inferior constrictor of the pharynx, the anterior cricothyroid, and the thyroid muscles considered as one. **s. pyloricus.** See under *muscle*. **s., third,** of the rectum, a duplicature of the mucosa projecting well into the lumen of the gut from the right side, forming rather more than a semicircle, and involving more of the ventral than of the dorsal wall. It is also called *Kohlrausch's fold*. **s. vaginæ.** See under *muscle*.

sphincteral (*sfingk'-ter-al*). Pertaining to a sphincter.

sphincteralgia (*sfingk-ter-al'-je-ah*) [*sphincter*; ἄλγος, pain]. Pain in the sphincter ani muscle, or about the anus.

sphincterectomy (*sfingk-ter-ek'-to-me*) [*sphincter*; ἐκτομή, excision]. 1. Oblique blepharotomy; Stellwag's operation for the dilatation of the palpebral fissure, or for blepharospasm. 2. The surgical removal of the pyloric sphincter.

sphincterial, sphincteric (*sfingk-te'-re-al, sfingk-ter'-ik*). Pertaining to a sphincter or to its function.

sphincterismus (*sfingk-ter-iz'-mus*). A spasmodic contraction of the sphincter ani muscle, usually attendant upon fissure or ulcer of the anus, but occasionally occurring independently of such lesion.

sphincterolysis (*sfingk-ter-ol'-is-is*) [*sphincter*; λύσις, solution] The operation of freeing the iris in anterior synechia.

sphincteroplasty (*sfingk'-ter-o-plas-te*) [*sphincter*; πλάσσειν, to form]. The formation of an artificial sphincter by plastic operation.

sphincteroscope (*sfingk-ter'-o-skōp*) [*sphincter*; σκοπεῖν, to examine]. An instrument for making visual inspection of a sphincter.

sphincteroscopy (*sfingk-ter-os'-ko-pe*) [see *sphincteroscope*]. Visual inspection of a sphincter by means of special instruments.

sphincterotomy (*sfingk-ter-ot'-o-me*) [*sphincter*; τομή, a cutting]. The operation of incising a sphincter.

sphinctrate (*sfingk'-trāt*). Contracted or constricted as if by a sphincter.

sphingoine (*sfin'-go-in*) [σφίγγειν, to bind] A leukomaine derived from cerebral tissue.

sphingomyelin (*sfin-go-mi'-el-in*) [σφίγγειν, to bind, μυελός, marrow]. A brain-phosphatide allied to myelin. It is capable of being decomposed into neurin and a substance which is convertible into sphingosin.

sphingosine (*sfin'-go-sēn*) [σφίγγειν, to bind]. An alkaloidal cerebroside occurring in brain-tissue.

sphygmic, sphygmical (*sfig'-mik, sfig'-mik-al*) [σφυγμός, pulse]. Pertaining to the pulse.

sphygmo- (*sfig-mo-*) [σφυγμός, pulse]. A prefix signifying pertaining to the pulse.

sphygmobolometer (*sfig-mo-bo-lom'-et-er*) [*sphygmo-*; βόλος, a throw; μέτρον, a measure]. An instrument for measuring and recording the force of the pulse.

sphygmobolometry (*sfig-mo-bo-lom'-et-re*). Estimation of the force of the pulse, or the blood current.

sphygmocardiograph (*sfig-mo-kar'-de-o-graf*) [*sphygmo-*; κάρδια, heart; γραφεῖν, to record]. An instrument for the recording of the movements of the pulse and the heart.

sphygmocardioscope (*sfig-mo-kar'-de-o-skōp*) [*sphygmo-*; κάρδια, heart; σκοπεῖν, to examine]. Same as sphygmocardiograph.

sphygmochronograph (*sfig-mo-kro'-no-graf*) [*sphygmo-, chronograph*]. A registering sphygmograph

sphygmochronography (*sfig-mo-kro-nog'-raf-e*). The registration of the extent and oscillations of the pulse-wave.

sphygmodic (*sfig-mo'-dik*) [σφυγμός, pulse]. Like the pulse; throbbing.

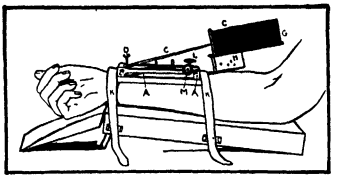
sphygmodynamometer (*sfig-mo-di-nam-om'-et-er*) [*sphygmo-*; δύναμις, power; μέτρον, measure]. An instrument for measuring the force of the pulse.

sphygmogenin (*sfig-moj'-en-in*) [*sphygmo-*; γεννᾶν, to produce]. A substance isolated by Frankel from the suprarenal capsule, which causes in-

crease of blood-pressure. It is used as an antidote in nicotine poisoning.

sphygmogram (*sfig'-mo-gram*) [*sphygmo-*; γράμμα, a writing]. The tracing made by the sphygmograph.

sphygmograph (*sfig'-mo-graf*) [*sphygmo-*; γράφειν, to write]. An instrument for recording graphically the features of the pulse and the variations in blood-pressure.



MAREY'S SPHYGMOGRAPH. (*Greene*)

A. Steel spring. *B*. First lever. *C*. Writing lever. *C'*. Its free writing end. *D*. Screw for bringing *B* in contact with *C*. *G*. Slide with smoked paper. *H*. Clockwork. *L*. Screw for increasing the pressure. *M*. Dial, indicating the pressure. *K*. *K*. Straps for fixing the instrument to the arm and the arm to the double inclined plane or support.

sphygmographic (*sfig-mo-graf'-ik*). Pertaining to the sphygmograph.

sphygmography (*sfig-mog'-ra-fe*) [σφυγμός, pulse; γράφειν, to write]. A description of the pulse, its pathological variations and their significance.

sphygmoid (*sfig'-moid*) [σφυγμός, pulse; εἶδος, resemblance]. Resembling or having the nature of continuous pulsation

sphygmology (*sfig-mol'-o-je*) [*sphygmo-*; λόγος, treatise]. The branch of medicine dealing with the characters of the pulse.

sphygmomanometer (*sfig-mo-man-om'-et-er*) [*sphygmo-*; *manometer*]. An instrument for measuring the tension of the blood-current or arterial pressure

sphygmomanometry (*sfig-mo-man-om'-et-re*). Estimation of the blood pressure by means of a sphygmomanometer.

sphygmometer (*sfig-mom'-et-er*). See *sphygmograph*.

sphygmometroscope (*sfig-mo-met'-ro-skōp*) [*sphygmo-*; μέτρον, measure, σκοπεῖν, to inspect]. An instrument used for listening to the pulse while the blood pressure is being estimated.

sphygmo-oscillometer (*sfig-mo-os-il-om'-et-er*). A form of sphygmomanometer in which the systolic and diastolic blood pressure are indicated by an oscillating needle

sphygmopalpation (*sfig-mo-pal-pa'-shun*). The palpation of the pulse.

sphygmophone (*sfig'-mo-fōn*) [*sphygmo-*; φωνή, sound]. A sphygmograph in which the vibrations of the pulse produce a sound.

sphygmoscope (*sfig'-mo-skōp*) [*sphygmo-*; σκοπεῖν, to examine]. A device that shows the heart movements or the pulsations of a blood-vessel.

sphygmoscopy (*sfig-mos'-ko-pe*) [*sphygmo-*; σκοπεῖν, to observe]. 1. The art of tracing the pulse-curve by the sphygmoscope. 2. Examination of the pulse.

sphygmosystole (*sfig-mo-sis'-to-le*) [*sphygmo-*; *systole*]. That part of the sphygmogram produced under the influence of the cardiac systole upon the pulse.

sphygmotechny (*sfig-mo-tek'-ne*) [*sphygmo-*; τέχνη, art]. The art of diagnosis and prognosis by means of the pulse.

sphygmotonograph (*sfig-mo-to'-no-graf*) [*sphygmo-*; τόνος, tension; γράφειν, to write]. An instrument which records simultaneously the blood pressure, the apex beat and the pulse.

sphygmotonometer (*sfig-mo-to-nom'-et-er*) [*sphygmo-*; τόνος, tone; μέτρον, measure]. A device for estimating elasticity of arterial walls.

sphygmous (*sfig'-mus*) [σφυγμός, pulse]. Pertaining to or having the nature of a pulse.

sphygmoviscosimetry (*sfig-mo-vis-co-sim'-et-re*). Estimation of the pressure and the viscosity of the blood.

sphygmus (*sfig'-mus*) [σφυγμός, pulse]. The pulse; a pulsation.

sphyra (*sfi'-rah*) [σφῦρα, a hammer]. The malleus.

sphyrectomy (*sfi-rek'-to-me*) [*sphyra*; ἐκτομή, excision]. Excision of the malleus.

sphyrotomy (*sfi-rot'-o-me*) [*sphyra*; τομή, a cutting]. Surgical removal of part of the handle of the malleus, or of the malleus or its handle together with a portion of the membrana tympani.

sphyxis (*sfiks'-is*). See *pulsation*.

spica (*spi'-kah*) [L.]. 1. A spike or spur. 2. A spiral bandage with reversed turns. **s.-bandage**. See under *bandage*.

spice (*spīs*) [ME., *spice*, spice]. An aromatic vegetable substance used for flavoring; a condiment. **s.-berry**, a popular name for *Gaultheria procumbens*. **s.-plaster**. See under *plaster*. **s.-poultice**, a poultice made from the mixture of a variety of spices. **s.-wood**. See *fever bush*.

spicula (*spik'-ū-lah*) [dim. of *spica*, a spike: pl., *spiculæ*]. A small spike-shaped bone or fragment of bone.

spicular (*spik'-ū-lar*) [*spicula*, a spicule]. Having the form of a spicule.

spicule (*spik'-ūl*) [dim. of *spica*, a spike]. A needle-shaped body; a spike. **s., bony**, a needle-shaped bone or fragment of bone. **s.-sheath**, the investment of a sponge-spicule.

spiculum (*spik'-ū-lum*) [L.]. See *spicula*; *spicule*.

spider (*spi'-der*) [ME., *spither*]. An arthropod of the class *Arachnida*. **s. cancer**, see *acne rosacea*. **s.-cells**, in biology—(*a*) Bacilli with such numerous flagellæ that they look like minute spiders. (*b*) The characteristic cells of the neuroglia. They have numerous long and delicate prolongations. **s., Menarody**, a poisonous species of *Latrodectus* found in Madagascar. **s. nevus**, see *acne rosacea* **s.-web**, the web spun by the spider, formerly much used as a hemostatic, and also in some systemic diseases; used also as a moxa with the blow-pipe.

Spiegelberg's sign (*spe'-gel-berg*). A sensation like that of passing over wet rubber, imparted to the finger which presses on, and moves along, the affected part; it is noted in cancer of the cervix uteri.

Spiegel's line, lobe. See *Spigelius' line, lobe*.

Spiegler's test for albumin (*spe'-gler*) [Edward *Spiegler*, Austrian dermatologist, 1863–1908]. Acidulate the solution by adding acetic acid to remove the mucin; filter, and overlay the filtrate with a solution prepared by dissolving 8 Gm. of mercuric chloride and 4 Gm. of tartaric acid in 200 Cc. of water, and adding 20 Gm. of glycerol to it. In the presence of albumin a white ring will form between the two liquids.

Spierer lens. A tiny mirror of gold or platinum placed on the inner side of the lowest lens of the microscope; ultramicroscopic.

Spigelia (*spi-je'-le-ah*) [after Adrian van der *Spiegel*; see *Spigelius*]. Pinkroot, a genus of plants of the order *Loganiaceæ*. The rhizome and rootlets of *S. marilandica* constitute the *spigelia* of the U. S. P.; they contain a volatile alkaloid,

spigelsne, and are used as an anthelmintic against the roundworm. Dose 10–20 gr. (0.65–1.3 Gm.) for a child; 1–2 dr. (4–8 Gm.) for an adult **s., fluidextract of** (*fluidextractum spigeliæ*, U. S. P.). Dose 10–20 min. (0.65–1.3 Cc.) for a child; 1–2 dr. (4–8 Cc.) for an adult.

Spigelian line, lobe (*spi-je'-le-an*). See *Spigelius' line, lobe*.

spigeline (*spi-je'-lēn*). An alkaloid said to exist in the anthelmintic species of *Spigelia*, of which it appears to be an active principle.

Spigelius' line [Adrian van der *Spiegel*, Belgian physician and anatomist, 1578–1625]. The semilunar line marking the insertion of the muscular fibers of the transversalis abdominis into its tendon. **S.'s lobe,** a small triangular lobe on the under surface of the right lobe of the liver.

spikenard (*spīk'-nard*). A name given to the rhizome of various species of *Valeriana*.

spiloma (*spi-lo'-mah*). Nevus.

spiloplania (*spi-lo-pla'-ne-ah*) [σπίλος, a stain; πλανή, wandering]. A condition characterized by transient or wandering maculæ of the skin. Also, a synonym of *elephantiasis græcorum*.

spiloplaxia (*spi-lo-plaks'-e-ah*) [σπίλος, spot; πλάξ, a broad surface]. 1. A condition marked by the spots symptomatic of elephantiasis 2. A synonym of leprosy

spilus (*spi'-lus*) [σπίλος, a spot]. A mole or colored mark on the skin; nevus.

spina (*spi'-nah*) [L.] 1. A thorn. 2. The spine. **s. accessoria ischii,** an inconstant projection into the great sciatic notch at the junction of the ischium and ilium. **s. angularis,** the spine of the sphenoid bone. **s. bifida,** a protrusion of the spinal membranes through a congenital cleft of the lower part of the vertebral column. **s. bifida occulta,** spina bifida in which there is no protrusion of the spinal membranes. **s. dorsalis,** the spinal column. **s. frontalis,** the nasal spine. **s. helicis.** See *crista helicis* **s. iliaca,** the iliac spine (anterior superior, anterior inferior, posterior superior and posterior inferior). **s. ischiadica, s. ischiatici, s. ischii.** See *spine of ischium*. **s. mentalis,** the mental spine; genial tubercle. **s. nasalis,** the nasal spine. **s. nodosa,** rhachitis. **s. scapulæ,** the spine of the scapula. **s. supra meatum,** an elevation just above the superior angle of the mastoid process of the temporal bone. It appears to be the posterior part of the zygomatic line. **s. tegminis,** a bony process in the tympanum, just above the entrance to the mastoid antrum. **s. ventosa,** a rarefying form of osteitis in which the bone is eroded or destroyed, and the subperiosteal tissue and osseous marrow contain numerous small cells with transuded red blood-corpuscles. It is frequently a result of syphilis.

spinacin (*spi'-nas-in*). A protein prepared from the cytoplasm of spinach leaves (*Spinacia oleracea*); it is insoluble in water and salt solutions, but is soluble in slight excess of acid or alkali.

spinal (*spi'-nal*). 1. Pertaining to the spine. 2. Pertaining to the spinal cord. **s. accessory nerve.** See under *nerve*. **s. canal.** See *canal, vertebral*. **s. column,** the vertebral column, composed of vertebræ, intervertebral cartilages, and ligaments. **s. cord,** the neural structure occupying the vertebral canal and extending from the atlas to the first lumbar vertebra, and terminating in the filum terminale. It is covered by the *spinal membranes* (the pia mater, arachnoid, and dura mater) and is divided into symmetrical halves by the anterior and posterior median fissures. These halves are joined together by the anterior white commissure and the gray commissure. In the middle of the latter is the central canal, a continuation of the ventricular cavities of the brain. Each half of the spinal cord consists of an internal mass of gray matter and an outer covering of white matter The former is subdivided into the anterior and posterior horns, which are made up of ganglion-cells, nerve-fibers, and delicate fibrils, and a modified neuroglia, the substantia gelatinosa. The white matter is divided by the two gray horns into three columns. the anterior, lateral, and posterior. These are again subdivided into distinct physiological tracts. Thus the anterior column includes the direct pyramidal tract (Türck's column) and the anterior ground-bundle, or anterior radicular zone, which is continuous with the adjacent part of the lateral column. In the latter the following tracts are distinguished the crossed pyramidal, direct cerebellar, anterolateral (Gowers' tract), and mixed lateral tract. The posterior column contains the posteromedian tract (Goll's column) and the posterolateral or posteroexternal tract (Burdach's column). The spinal cord is the conductor of impulses from and to the brain, as well as a center for reflex acts. **s. curvature.** See *lordosis, kyphosis*, and *scoliosis*. **s. epilepsy.** See *epilepsy, spinal*. **s. irritation,** a form of neurasthenia characterized by pain in the back, tenderness along the spines of the vertebræ, fatigue on slight exertion, and occasionally numbness and tingling in the limbs **s. marrow,** the spinal cord. **s. nerves,** the 31 pairs of nerves arising from the spinal cord, and grouped into 8 *cervical*, 12 *dorsal*, 5 *lumbar*, 5 *sacral*, 1 *coccygeal*. Each arises by two roots, a dorsal and a ventral. On the dorsal root is the spinal ganglion. Beyond the ganglion the two roots unite to form, in the spinal canal, the mixed trunk of a spinal nerve. The anterior roots supply efferent fibers to all the voluntary muscles of the trunk and extremities, to the smooth muscular fibers of the bladder, ureter, uterus, etc., vasomotor, inhibitory, secretory, and trophic fibers. The posterior roots carry afferent impulses.

spinalgia (*spi-nal'-je-ah*) [*spine*; ἄλγος, pain]. Tenderness of a vertebral spine to pressure

spinalis (*spi-na'-lis*) [*spine*]. 1. Spinal. 2. A muscle attached to the spinous processes of the vertebræ; see under *muscle*

spinant (*spi'-nant*) [*spine*]. A drug or other agent increasing the reflex excitability of the spinal cord; strychnine is a spinant.

spinate (*spi'-nāt*) [*spinatus*, having spines]. Armed with spines or thorn-shaped processes.

spindle (*spin'-dl*) [ME.]. A tapering rod or pin. A body having a fusiform shape. **s., achromatic, s., cleavage, s., karyokinetic, s., nuclear, s., segmentation,** the double cone-like appearance of the nucleus during certain stages of karyokinesis. **s.-cataract,** a form of cataract characterized by a spindle-shaped opacity extending from the posterior surface of the anterior portion of the capsule to the anterior surface of the posterior portion of the capsule, with a centra dilatation. **s.-cell,** a fusiform cell. **s.-celled** having fusiform cells, a form of cell typical of certain morbid growths, especially sarcoma; **fuso-**

cellular. **s., central,** the lining filaments spanning the interval between the centrosome at the completion of the prophase. **s.-legged,** having long, thin legs. **s., neuro-muscular,** small fusiform end-organs found in almost all the muscles of the body. **s., nuclear,** the cone-like appearance of the nucleus during certain stages of karyokinesis. **s.-oils,** lubricating oils. **s.-shanked,** same as *s.-legged* **s.-shaped,** shaped like a spindle; fusiform. **s.-tree,** see *euonymus.*

spine (*spīn*) [*spina,* a thorn]. 1. A sharp process of bone. 2. The backbone or spinal column. **s.-ache,** pain in or about the spine. **s., angular,** curvature of the spine. **s., cauda equina of.** See *cauda equina.* **s., cleft,** or **cloven.** See *spina bifida.* **s., cruciate.** See *s. of tibia* **s., ethmoid,** the spine on top of the sphenoid bone. **s., filum terminale of.** See *filum terminale.* **s., frontal.** See *frontal crest.* **s., hemal,** the part that closes in the hemal arch of a typical vertebra. **s., irritable.** See *spinal irritation.* **s., ischiatic.** See *s. of ischium* **s. of ischium,** a pointed eminence on the posterior border of the body of the ischium. It forms the lower border of the great sciatic notch **s., mental.** See *genial tubercles.* **s., navicular,** a pointed projection on the inner edge of the navicular bone **s., neural,** the part that closes in the neural arch of the typical vertebra. **s., occipital, external,** the external occipital crest. **s., palatine.** See *s., nasal.* **s., pharyngeal,** the ridge on the under surface of the basilar process of the occipital bone. **s. of the pubes,** the prominent tubercle on the upper border of the body of the pubes. **s., pubic.** See *s of the pubes.* **s., railway,** the designation given to a series of nervous symptoms developed from shock produced by a railway accident or from the concussion produced by constant travel **s. of the scapula,** the plate of bone crossing the dorsum of the scapula and dividing it into two unequal parts. **s., sciatic.** See *s of ischium.* **s., sphenoid,** the spinous process of the greater wing of the sphenoid bone **s. of the sphenoid.** See *s , sphenoid,* and *s., ethmoid.* **s. of the tibia,** the elevation upon the upper surface of the tibia between its two articulating surfaces. **s., trochlear,** a small projection on the upper ventral part of the inner wall of the orbit for the trochlea. **s., typhoid,** acute inflammation of one or more vertebræ following typhoid fever. **s., zygomatic,** a projection from the zygomatic process.

Spinelli operation (*spe-nel'-le*). Replacing a prolapsed uterus after incising its anterior wall and reversing the organ.

spinicerebrate (*spi-ni-ser'-e-brāt*). Furnished with a brain and spinal cord.

spinideltoid (*spi-ni-del'-toid*). The part of the deltoid muscle arising from the spine of the scapula.

spinifugal (*spi-nif'-ū-gal*) [*spine; fugere,* to flee]. Moving from the spinal cord.

spinipetal (*spi-nip'-et-al*) [*spine; petere,* to seek]. Moving toward the spinal cord.

spinitis (*spi-nī'-tis*). See *myelitis.*

spinitrapezius (*spi-ni-tra-pe'-ze-us*). The spinal part of the trapezius, not the cranial part.

spinobulbar (*spi-no-bul'-bar*) [*spine; bulbus,* the medulla oblongata]. Pertaining to the spinal cord and the medulla oblongata.

spinocellular (*spi-no-sel'-ū-lar*). Pertaining to, or like, prickle cells.

spinocortical (*spi-no-kor'-te-kal*). Pertaining to the spinal cord and the cerebral cortex.

spinocostalis muscle (*spi-no-kos-ta'-lis*). The two serratus posticus muscles regarded as one.

spinogalvanization (*spi-no-gal-van-i-za'-shun*). Galvanization of the spinal cord.

spinoglenoid (*spi-no-glen'-oid*). Relating to the spine of the scapula and the glenoid cavity.

spinol (*spin'-ol*). An extract of young, fresh spinach (*Atriplex hortensis*) leaves, containing about 2.6 % of iron and occurring both as a liquid and as a powder. It is used in the spinach cure for children. Dose 1–8 gr. (0.65–0.52 Gm.) several times daily. **s. siccum,** spinol in the form of a green powder.

spinomuscular (*spi-no-mus'-kū-lar*). Relating to the spinal cord and the muscles.

spinoneural (*spi-no-nū'-ral*). Pertaining to the spinal cord and the peripheral nerves.

spinose (*spi-nōs*) [*spinosus,* full of thorns]. Possessing thorns; or shaped like a thorn.

spinotectal (*spi-no-tek'-tal*). Pertaining to the spinal cord and the corpora quadrigemina.

spinous (*spī'-nus*) [*spine*] Pertaining to the spine, spiny or spiniform. **s. process,** the apophysis or prominence at the posterior part of each vertebra.

spinthariscope (*spin-thar'-is-kōp*) [*σπινθήρ,* a spark; *σκοπεῖν,* to view]. An instrument devised by Sir William Crookes for demonstrating the physical properties of radium. It consists of a fluorescent screen in front of which is placed a small quantity of radium bromide, with or without a lens for examining the scintillations.

spintherism (*spin'-ther-izm*) [*σπινθοερίζειν,* to emit sparks] Sensation of sparks before the eyes.

spintherometer (*spin-ther-om'-et-er*). Spintometer.

spintheropia (*spin-ther-o'-pe-ah*) [*σπινθήρ,* spark; *ὄψ,* sight]. Same as *spintherism.*

spintometer (*spin-tom'-et-er*) [*σπινθήρ,* spark; *μέτρον,* a measure]. An apparatus for measuring the length of sparks in the Roentgen tube.

spiradenitis (*spi-rad-en-ī'-tis*) [*σπεῖρα,* a coil; *adenitis*] Hidrosadenitis phlegmonous, *q. v.*

spiradenoma (*spi-rad-en-o'-mah*) [*σπεῖρα,* a coil; *ἀδήν,* a gland; *ὅμα,* a tumor]. Adenoma of the sweat-glands.

spiral (*spī'-ral*) [*σπεῖρα,* a coil]. 1. Winding like the threads of a screw, as a *spiral* bandage. 2. A curve having a *spiral* course. **s. bandage.** See *bandage.* **s. canal.** See *canal.* **s. lamina.** See *lamina spiralis.*

Spirasoma (*spi-rah-so'-mah*) [*σπεῖρα,* a coil; *σῶμα,* a body]. A genus of bacteria of the *Spirillaceæ* having rigid cells without flagella.

spirem, spirema, spireme (*spī'-rem, spi-re'-mah, spi-rēm'*) [*σπεῖρα,* a coil; a twist]. The close skein, or mother skein, or wreath, of chromatin-fibrils in a cell undergoing mitotic divisions.

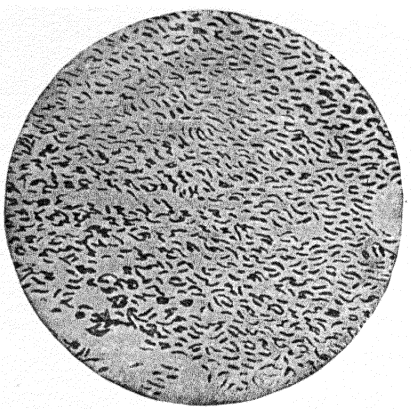
Spirillaceæ (*spi-ril-la'-she-e*) [see *Spirillum*]. A family of *Schizomycetes* or bacteria whose cells are spirally curved. See *table* p. 862.

spirillicidal (*spir-il-e-sīd'-al*) [*Spirillum; cædere,* to kill]. Said of an agent which is capable of destroying spirilla or spirochætes.

spirillosis (*spir-il-o'-sis*). 1 Any affection due to *Spirillum.* 2. A disease of cattle in the Transvaal. **s. of fowls,** a disease of geese, ducks, guinea-fowls, turtle-doves, pigeons, and sparrows. The affected fowls exhibit diarrhea, loss of appetite, pale combs, and in acute cases die suddenly of convulsions. It is due to a spirillum which is transmitted by *Argas persicus.* The serum of animals which have recovered

from a first attack possesses strong immunizing properties.

Spirillum (*spi-ril'-um*) [*spirillum*, dim. of *spira* a coil]. A genus of spiral bacteria. See *table of Spirillaceæ* p. 858. **s.-fever.** See *relapsing fever.*



SPIRILLA OF CHOLERA. CULTURE ON STARCHED LINEN.

spirit (*spir'-it*) [*spiritus*, breath, from *spirare*, to breathe]. 1. The soul. 2. An alcoholic solution of a volatile substance. 3. Alcohol. **s., adiaphorous,** a liquid obtained by the distillation of cream of tartar. **s., ammonia.** See *ammoniæ, spiritus*, under *ammonia*. **s., anise.** See *anisi, spiritus*, under *anisum*. **s., Columbian,** deodorized methyl alcohol. **s., corn-,** whisky obtained by the distillation of corn. **s., methylated,** denatured alcohol, ethyl alcohol with one-ninth its volume of methyl alcohol. **s. of Mindererus,** a solution of ammonium acetate, used as a diuretic. **s., potato-,** whisky obtained by the distillation of potatoes. **s., proof-,** diluted alcohol (*alcohol dilutum*, U. S. P.; *spiritus tenuior*, B. P.), containing about 41 % by weight of absolute ethyl-alcohol. **s., pyroligneous,** wood alcohol. **s., rectified** (*spiritus rectificatus*, B. P.), contains 16% of water. **s. of salt,** hydrochloric acid. **s. of wine,** alcohol.

spirituous (*spir'-it-ū-us*). Alcoholic; pertaining to alcoholic liquors.

spiritus (*spir'-it-us*) [L.]. See *spirit*. **s. ætheris nitrosi.** See *niter, sweet spirit of*. **s. chloroformi,** is used as a carminative. Dose 10–60 min. (0.65–4.0 Cc.). See also *chloroform, spirit of*. **s. frumenti,** whisky, a spirit obtained by the distillation of fermented grain. **s. juniperi,** gin or whisky with which juniperberries and hops have been distilled. **s. lethalis,** carbonic acid. **s. myrciæ,** bay-rum; a hydroalcoholic solution of various essential oils, and containing 0.8% of oil of myrcia. **s. odoratus,** Cologne-water. **s. vini gallici** (U. S. P.), brandy; a liquor obtained by the distillation of wine. (*For other spirits see the different drugs.*) **s. vini vitis,** same as *s. frumenti, q. v.*

Spiro's test (*spe'-ro*) [Karl *Spiro*, German chemist, 1867–]. A test for the determination of ammonia and urea in urine by the use of barium oxide and petroleum; it is based on the tests of Folin and Mörner-Sjoqvist.

spiro- (*spi-ro-*). 1. [σπεῖρα, a coil]. A prefix meaning spiral. 2. [*spirare*, to breathe.] A prefix meaning relating to respiration.

spirobacteria (*spi-ro-bak-te'-re-ah*) [*spiro-; bacteria*]. The spirilla, spirochetes, and vibrios bacteria.

Spirochete, Spirochæta (*spi'-ro-kēt, spi-ro-ke'-tah*) [*spiro-;* χαίτη, a bristle]. A genus of bacteria characterized by flexible spiral filaments. See under *spirillum*. **S. duttoni,** the casue of African tick fever. **S. eurygyrata** occurs in feces. **S. novyi,** found in relapsing fever in South America. **S. pallida,** same as *Treponema pallidum, q. v.* **S. pallidula,** same as *s. pertenuis*. **S. pertenuis,** believed to be the cause of yaws. **S. phagedenis,** an anaerobe obtained from phagedenic ulcers on the external genitals. **S. plicatilis,** occurs in stagnant water and is of large size, being about 0.75μ thick and 20 to 500μ long. **S. recurrentis,** the spirillum of Obermeier found in the blood in cases of relapsing fever. **S. refringens,** occurs in primary syphilitic lesions along with *s. pallida*. **S. vincenti,** found in Vincent's angina or ulcerative disease of the tonsils.

spirochaetaceæ (*spi-ro-ke-tā'-se-e*) [*spirochete*]. An order of flagellates generally parasitic; wavy, thread like, with and without indulating membrane. See *Table* p.863.

spirochetemia (*spi-ro-ke-te'-me-ah*) [*spirochete; αἷμα*, blood]. The presence of spirochetes in the blood.

spirocheticide (*spi-ro-ke'-tis-īd*) [*spirochæta; cædere*, to kill]. An agent used to kill spirochetes.

spirochetolysis (*spi-ro-ke-tol'-is-is*) [*spirochæta;* λύσις, solution]. Destruction of spirochetes by specific antibodies or by chemotherapy.

spirochetosis (*spi-ro-ke-to'-sis*). An infection caused by spirochete.

spirochetotic (*spi-ro-ke-tot'-ik*). Pertaining to spirochetosis; syphilitic.

spirocide (*spi'-ro-sīd*). Trade preparation said to contain mercury, copper and vegetable matter.

spirofibrillæ (*spi-ro-fi-bril'-ē*) [*spiro-; fibrilla*, a small fiber]. The term applied by Fayod in his theory of the structure of protoplasm to supposed long, twisted, hollow fibrils constituting the protoplasm and nuclei of vegetable cells and uniting to form the spirospartas (*q. v.*). Fayod asserts also that the blood-plasma consists of spirofibrillæ and that they penetrate here and there into the hematoblasts. In this case Bütschli holds that Fayod mistakes coagulation of fibrin for spirofibrillæ.

spiroform (*spi'-ro-form*). Trade name of acetyl phenyl salicylate.

spirograph (*spi'-ro-graf*) [*spiro-;* γράφειν, to write]. An instrument for registering the respiration.

spirographidin (*spi-ro-graf'-id-in*). The hyalin obtained from spirographin.

spirographin (*spi-ro-graf'-in*) [σπεῖρα, coil; γράφειν, to write]. A substance from the cartilage and skeletal tissues of worms. *Spirographis*.

spiroid (*spi'-roid*) [*spira*, spire]. Resembling a screw; having spiral convolutions.

spiroma (*spi-ro'mah*). Spiradenoma.

spirometer (*spi-rom'-et-er*) [*spiro-; μέτρον*, a measure]. An instrument for measuring the quantity of air taken in and given out in forcible respiration.

spirometric (*spi-ro-met'-rik*) [*spiro-; μέτρον*, measure]. Pertaining to the spirometer or to spirometry.

spirometry (*spi-rom'-et-re*) [see *spirometer*]. Pertains to the measurement of respiration.

Spiromonas (*spi-ro-mo'-nas*) [*spiro-*; *μονάς*, a unit]. A genus of biflagellate monads or free-swimming animalcules established by Perty (1852), now referred to *Bodo* (Ehrenberg), Stein.

spironema (*spi-ro-ne'-mah*) [*spiro-*; *νῆμα*, a thread], Treponema. **s. pallidum,** same as *Treponema pallidum, q. v.*

spirophore (*spi'-ro-fōr*) [*spiro-*; *φέρειν*, to bear]. An instrument for performing artificial respiration.

spirosal (*spi'-ro-sal*). Trade name of a monoglycolic ester of salicylic acid, used externally in rheumatism and similar conditions

Spiroschaudinnia (*spi-ro-shou-din'-e-ah*). A genus of spirochetes. **S. duttoni,** the cause of West African relapsing fever. **S. recurrentis,** the cause of European relapsing fever. **S. vincenti,** one of the causes of Vincent's angina.

spirospartæ (*spi-ro-spar'-te*) [*spiro-*; *σπάρτη*, a rope]. The term applied by Fayod in his theory to twisted hollow strings the walls of which are formed by the twisting together of the fibrils or spirofibrillæ. The cavities of the spirospartæ and spirofibrillæ are said to be filled in the normal condition by "granular plasma;" spirospartæ pass from the protoplasm into the nucleus and *vice versa*, and also may be traced frequently from one cell into a neighboring one, so that the cell loses its value as a morphological and physiological unit. These results were obtained in vegetable cells, chiefly by injection with quicksilver, by which method Fayod believes he filled the cavities of the spirospartæ and spirofibrillæ with metal. Cf. *spirofibrillæ*

spirulina (*spi-rū-li'-nah*) [*spirula*, from *spira*, a coil]. A spiral microorganism of spindle shape.

spissated (*spis'-a-ted*). Inspissated.

spissitude (*spis'-it-ūd*) [*spissare*, to thicken], The state of being inspissated.

spit [ME., *spitten*, to spit] 1. To eject sputum from the mouth. 2 Saliva 3. A frothy secretion produced by certain insects as a means of protection.

spittle (*spit'-l*). See *saliva*.

Spitzka's bundle (*spits'-kah*) [Edward Charles *Spitzka*, American neurologist, 1852–1914]. A tract of nerve-fibers which passes from the cerebral cortex through the pyramidal region of the crus cerebri to the oculomotor nuclei of the opposite side. **S.'s nucleus,** the central nucleus of the oculomotor group in the gray matter below the aqueduct of Sylvius. **S.'s postorbital limbus,** a welt-like projection of the orbital surface of the frontal lobe into the middle cranial fossa

Spitzka-Lissauer's tract. See *Lissauer's tract.* **S.-L.'s column,** in the spinal cord, a group of nerve fibers lying just in front of and just behind the posterior horns.

Spix, angles of (*spiks*) [Joannes Baptist *Spix*, German anatomist, 1781–1826]. In craniometry, those angles formed: (1) between the alveolo-nasal line and the coronal line; (2) between the alveolo-nasal line and the naso-basilar line. **S., horizontal plane of,** in craniometry, the alveolocondylean plane. **S.'s spine,** the bony spine at the inner border of the inferior dental foramen, giving attachment to the sphenomaxillary ligament; the lingula of the inferior maxillary bone.

splanchna (*splangk'-nah*) [*σπλάγχνα*, viscera]. 1. The intestines. 2. The viscera.

splanchnapophyseal (*splangk-nap-off-iz'-e-al*) [*splanchna; apophysis*]. Pertaining to a splanchnapophysis.

splanchnapophysis (*splangk-nap-off'-is-is*) [*σπλάγχνα*, viscera; *apophysis*]. An apophysis or out-growth of a vertebra on the opposite side of a vertebral axis from a neuropophysis, and inclosing some viscus.

splanchnectopia (*splank-nek-to'-pe-ah*) [*σπλάγχνα*, viscera; *ἐκτοπος*, displaced]. The abnormal position or dislocation of a viscus

splanchnemphraxis (*splangk-nem-fraks'-is*) [*σπλάγχνα*, viscera; *ἐμφράξις*, obstruction]. Obstruction of the intestine.

splanchnesthesia (*splangk-nes-the'-ze-ah*) [*σπλάγχνον*, a viscus; *αἴσθησις*, sensation]. Visceral sensation.

splanchnesthetic (*splangk-nes-thet'-ik*). Pertaining to visceral sensation.

splanchneurysma (*splangk-nū-riz'-mah*) [*splanchno-; aneurysm*] Distention of the intestines.

splanchnic (*splangk'-nik*) [*σπλάγχνα*, viscera]. 1. Pertaining to or supplying the viscera. 2. A remedy efficient in diseases of the bowels. **s. nerves,** three nerves, the great, lesser, and least, or renal splanchnic, derived from the sympathetic system.

splanchno- (*splangk-no-*) [*σπλάγχνα*, viscera] A prefix denoting pertaining to the viscera.

splanchnoblast (*splangk'-no-blast*) [*splanchno-; βλαστός*, a germ]. An anlage, proton, or incipient rudiment destined to take part in the formation of one or more of the viscera.

splanchnocele (*splangk'-no-sēl*) [*splanchno-; κοίλος*, hollow]. 1. A protrusion of any abdominal viscus. 2. Splanchnocœle

splanchnocœle (*splangk'-no-sēl*) [*splanchno-; κοίλος*, hollow]. That part of the cœlom which persists in the adult, and gives rise to the pericardial, pleural, and abdominal cavities; the ventral cœlom, or pleuroperitoneal space. It appears as a narrow fissure in the parietal zone of the mesoblast.

splanchnodiastasis (*splangk-no-di-as'-tas-is*) [*splanchno-; diastasis*]. Displacement or separation of the viscera.

splanchnography (*splank-nog'-raf-e*) [*splanchno-; γραφεῖν*, to write]. The descriptive anatomy of the viscera.

splanchnolith (*splangk-no'-lith*) [*splanchno-; λίθος*, a stone]. Calculus of a viscus.

splanchnolithiasis (*splangk-no-lith-i'-as-is*) [*splanchno-; λίθος*, stone] The condition of calculus of the intestine.

splanchnology (*splangk-nol'-o-je*) [*splanchno-; λόγος*, science]. The branch of medical science treating of the viscera.

splanchnomegaly (*splangk-no-meg'-al-e*) [*splanchno-; μέγας*, large]. Giant growth of the viscera.

splanchnopathy (*splangk-nop'-ath-e*) [*splanchno-; πάθος*, disease]. Disease of viscera.

splanchnopleural (*splangk-no-ploo'-ral*) [*splanchnopleure*]. Relating to the splanchnopleure.

splanchnopleure (*splangk'-no-ploor*) [*splanchno-; πλευρά*, the side]. The visceral layer of mesoderm forming the covering of the digestive tube.

splanchnoptosia, splanchnoptosis (*splangk-nop-to'-she-ah, -sis*) [*splanchno-; πτῶσις*, a falling]. A condition of relaxation of the abdominal viscera; it includes gastroptosis, enteroptosis, nephroptosis, less commonly hepatoptosis and splenoptosis.

splanchnosclerosis (*splangk-no-skle-ro'-sis*) [*splanchno-; σκληρός*, hard]. Visceral induration.

splanchnoscopy (*splangk-nos'-ko-pe*) [*splanchno-*; σκοπεῖν, to examine]. Visual examination of the viscera.

splanchnoskeleton (*splangk-no-skel'-et-on*) [*splanchno-*; *skeleton*]. That portion of the skeleton related to the viscera.

splanchnosomatic (*splangk-no-so-mat'-ik*) [*splanchno-*; σώμα, body]. Pertaining to the viscera and the body.

splanchnotomy (*splangk-not'-o-me*) [*splanchno-*; τέμνειν, to cut]. Dissection of the viscera.

splanchnotribe) (*splangk'-no-trīb*) [*splanchno-*; τρίβειν, to crush]. An instrument for crushing the intestine and so occluding its lumen, previous to resecting the intestine.

splashing (*splash'-ing*) [origin obscure]. Making a splashing sound. **s. fremitus,** a noise heard in succession in some cases of pleural effusion; it may be simulated by the presence of fluid in a distended stomach. **s. in the stomach,** a sign of atony of that organ.

splay-foot. See *talipes*.

spleen (*splēn*) [σπλήν, spleen] One of the abdominal viscera, situated just below the diaphragm on the left side, and connected with the hematopoietic system It is covered by a fibroelastic capsule from which trabeculæ radiate into the organ. In the spaces formed by these are found collections of lymphoid tissue (the Malpighian corpuscles) and the splenic pulp. The Malpighian corpuscles surround the small branches of the splenic artery. The splenic pulp consists of a delicate reticulum containing large connective-tissue cells, lymphoid cells, and red corpuscles. The spleen receives a large amount of blood, which in passing from the termination of the splenic artery to the beginning of the splenic vein is probably not held within walls, but comes in direct contact with the lymphoid tissue. The spleen normally weighs about 200 Gm. **s., accessory,** a detached portion of splenic tissue in the neighborhood of the spleen. Syn., *splenculus*. **s., bacon,** a uniformly lardaceous spleen. **s., floating.** See *s., wandering*. **s., Indian,** an indurated spleen sometimes found in Anglo-Indians. **s., lardaceous,** an enlargement of the spleen due to waxy degeneration. **s.-pulp,** the proper substance of the spleen. **s., sago-,** one of which the Malpighian follicles are the seat of amyloid change. **s., wandering,** one that, owing to relaxation of its attachments, is movable **s., waxy.** See *s., lardaceous*.

splen- (*splen-*) [σπλήν, spleen] A prefix denoting pertaining to the spleen.

splenadenoma (*splen-ad-en-o'-mah*) [*splen-; adenoma*] Hyperplasia of the lymphoid tissue of the spleen

splenæmia. See *aplenemia*.

splenalgia (*splen-sl'-je-ah*) [*splen-*; ἄλγος, pain]. Neuralgic pain in the spleen

splenauxe (*splen-awks'-e*) [*spleen; αὐξή*, increase]. Enlargement of the spleen.

splenculus (*splen'-kū-lus*) [*spleen*]. An accessory spleen.

splenectasia (*splen-ek-ta'-se-ah*). Splenectasis.

splenectasis (*splen-ek'-tas-is*) [*spleen; ἔκτασις*, enlargement]. Enlargement of the spleen.

splenectomize (*splen-ek'-tom-īz*) [*splenectomy*]. To excise the spleen.

splenectomy (*splen-ek'-to-me*) [*splen-; ἐκτομή*, excision]. Excision of the spleen.

splenectopia, splenectopy (*splen-ek-to'-pe-ah, splen-ek'-to-pe*) [*splen-; ἔκτοπος*, dislocated]. Displacement of the spleen.

splenelcosis (*splen-el-ko'-sis*) [*splen-; ἕλκωσις*, ulceration]. Ulceration of the spleen.

splenelcus (*splen-el'-kus*) [*splen-; ἕλκος*, ulcer.] An ulcer upon the spleen

splenemia, splenæmia (*splen-e'-me-ah*) [*splen-; αἷμα*, blood]. Splenic leukemia.

splenemphraxis (*splen-em-fraks'-is*) [*splen-; ἔμφραξις*, obstruction]. Congestion of the spleen from any cause

spleneolus (*splen-e'-o-lus*). Accessory spleen.

splenepatitis (*splen-ep-at-i'-tis*) [*splen-; ἧπαρ*, liver; *ιτις*, inflammation]. Inflammation involving both liver and spleen

splenetic (*splen-et'-ik*). Splenic. Pertaining to the spleen, ill-humored, fretful; hypochondriacal

splenial (*sple'-ne-al*) [σπλήνιον, bandage]. 1. Serving as a bandage or splint. 2. Pertaining to the splenium or to the splenius.

splenic (*splen'-ik*) [*spleen*] 1 Pertaining to or affecting the spleen 2 A remedy efficient in disorders of the spleen 3. Affected with splenitis. **s. apoplexy, s. fever.** See *anthrax*

splenicogastric (*splen-ik-o-gas'-trik*) [σπληνικός, splenic, γαστήρ, stomach] Belonging or pertaining to both the spleen and the stomach.

splenicopancreatic (*splen-ik-o-pan-kre-at'-ik*) [σπληνικός, splenic; *pancreas*]. Belonging or pertaining to both the spleen and the pancreas.

splenicterus (*splen-ik'-ter-us*) [*spleen; icterus*]. Inflammation of the spleen associated with jaundice

splenículus (*splen-ik'-ū-lus*). See *splenculus*.

splenicus (*splen'-ik-us*) [*spleen*]. 1. Splenic 2. A drug acting upon the spleen

spleniferrin (*splen-i-fer'-in*). An organic iron preparation said to be obtained from the spleen.

splenification (*splen-if-ik-a'-shun*). See *splenization*.

splenified (*splen'-if-īd*). Of a tissue, resembling the tissue of the spleen, as *splenified* bone-marrow

spleniform (*splen'-e-form*). Resembling the spleen.

splenin (*splen'-in*) An organotherapeutic preparation made from the spleen of animals.

splenserrate (*splen-is-er'-āt*) [σπλήνιον, bandage; *serra*, saw]. Pertaining to the splenius and serrate muscles

splenitic (*splen-it'-ik*) See *splenic*

splenitis (*splen-i'-tis*) [*splen-; itis*, inflammation]. Inflammation of the spleen. **s., spodogenous,** that due to accumulation of waste-matter

splenium (*sple'-ne-um*) [σπλήνιον, a bandage]. 1. A bandage. 2 The rounded posterior extremity of the corpus callosum.

splenius (*sple'-ne-us*) [*splenium*] Shaped like a splenium, as the *splenius* muscle or simply *splenius* See under *muscle*.

splenization (*splen-i-za'-shun*) [*spleen*] The change in an organ, especially the lung, produced by congestion, whereby it comes to resemble the tissue of the spleen.

spleno- (*splen-o-*) [σπλήν, spleen]. A prefix denoting pertaining to the spleen.

splenoblast (*splen'-o-blast*) [*spleno-*; βλαστός, a germ]. A cell from which a splenocyte is derived.

splenocele (*splen'-o-sēl*) [*spleno-*; κήλη, hernia]. 1. Hernia of the spleen 2. A tumor of the spleen.

splenocleisis (*splen-o-kli'-sis*) [*spleno-*; κλείειν, to shut in]. Causing the production of new fibrous tissue on the spleen, as by friction with **gauze.**

splenocolic (*splen-o-kol'-ik*) [*spleno-*; κόλον, colon]. Pertaining to the spleen and the colon.

splenocyte (*splen'-o-sīt*) [*spleno-*; κύτος, a cell]. The cell peculiar to splenic tissue.

splenodynia (*splen-o-din'-e-ah*) [*spleno-*; ὀδύνη, pain] Pain in the spleen.

splenogranulomatosis siderotica (*splen-o-gran-ū-lo-mat-o'-sis sī-der-ot'-ik-ah*). Same as *Gamna's disease, q. v.*

splenography (*splen-og'-ra-fe*) [*spleno-*; γράφειν, to write]. The descriptive anatomy of the spleen.

splenohemia, splenohæmia (*splen-o-he'-me-ah*) [*spleno-*; αἷμα, the blood]. Congestion of the spleen. Hyperemia of the spleen.

splenohepatomegaly (*splen-o-hep-at-o-meg'-al-e*) [*spleno-*; ἧπαρ, liver; μέγας, great]. Enlargement of the liver and spleen.

splenoid (*splen'-oid*) [*spleno-*; εἶδος, resemblance]. Resembling the spleen.

splenokeratosis (*splen-o-ker-at-o'-sis*) [*spleno-*; κέρας, horn]. Splenic induration

splenolaparotomy (*splen-o-lap-ar-ot'-o-me*). See *laparosplenotomy.*

splenology (*splen-ol'-o-je*) [*spleno-*; λόγος, science]. The sum of what is known of the splenic structure, function, and diseases.

splenolymph (*splen'-o-limf*). Intermediate in character between the spleen and a lymph-gland. See *glands, splenolymph.*

splenolymphatic (*splen-o-lim-fat'-ik*) Relating to the spleen and the lymph-glands.

splenolymphoma (*splen-o-lim-fo'-mah*). See *splen-adenoma.*

splenolysin (*splen-ol'-is-in*) [*spleno-*; *lysin*]. An antibody destructive to splenic tissue or cells.

splenolysis (*splen-ol'-is-is*) [*spleno-*; λύσις, solution]. Destruction of splenic tissue.

splenoma (*splen-o'-mah*) [*spleno-*; ὄμα, tumor]. Tumor of the spleen

splenomalacia (*splen-o-mal-a'-se-ah*) [*spleno-*; μαλακία, softness]. Softening of the spleen.

splenomedullary (*splen-o-med'-ul-a-re*) Relating to the spleen and the marrow of bones.

splenomegalia, splenomegaly (*splen-o-meg-a'-le-ah, splen-o-meg'-al-e*) [*spleno-*; μέγας, large]. Enlargement of the spleen, especially simple enlargement of the spleen without leukemia; by some it is considered merely as Hodgkin's disease of splenic type **s., tropical,** kala azar.

splenomyelogenous (*splen-o-mi-el-oj'-en-us*) Referring to the spleen and bone marrow; splenomedullary.

splenomyelomalacia (*splen-o-mi-el-o-mal-a'-se-ah*) [*spleno-*; μύελος, marrow; μαλάκια, softening]. Softening of the spleen and bone marrow.

splenoncus (*splen-ong'-kus*). See *splenoma.*

splenonephric (*splen-o-nef'-rik*). Pertaining to the spleen and the kidney.

splenopancreatic (*splen-o-pan-kre-at'-ik*). Pertaining to the spleen and the pancreas.

splenoparectama, splenoparectasis (*splen-o-par-ek'-ta-mah, splen-o-par-ek'-ta-sis*) [*spleno-*; ἔκτασις, distention]. Enlargement of the spleen.

splenopathia (*splen-o-path'-e-ah*). See *splenopathy.* **s. leukocythæmica,** splenic leukemia.

splenopathy (*splen-op'-ath-e*) [*spleno-*; πάθος, suffering]. Any disease of the spleen.

splenopexia, splenopexis, splenopexy (*splen-o-peks'-e-ah, splen'-o-peks-is, splen'-o-peks-e*) [*spleno-*; πῆξις, a fixing in]. Fixation of a wandering spleen to the abdominal wall by means of sutures.

splenophlegmone (*splen-of-fleg'-mon-e*) [*spleno-*; φλεγμονή, inflammation]. Phlegmonous inflammation of the spleen.

splenophrenic (*splen-o-fren'-ik*) [*spleno-*; φρήν, diaphragm]. Pertaining to the spleen and the diaphragm.

splenophthisis (*splen-off'-this-is*) [*spleno-*; φθίσις, wasting]. Atrophy of the spleen.

splenopneumonia (*splen-o-nū-mo'-ne-ah*) [*spleno-*; *pneumonia*]. Pneumonia with splenization of the lung.

splenoptosis (*splen-op-to'-sis*) [*spleno-*; πτῶσις, a falling] Downward displacement of the spleen.

splenorrhagia (*splen-or-a'-je-ah*) [*spleno-*; ῥηγνύναι, to burst forth]. Hemorrhage from the spleen.

splenorrhaphy (*splen-or'-af-e*) [*spleno-*; ῥάφη, suture]. Suture of the spleen.

splenoscirrhus (*splen-o-skir'-us*) [*spleno-*; σκῖρρος, hardness]. Cancer of the spleen.

splenotomy (*splen-ot'-o-me*) [*spleno-*; τέμνειν, to cut]. 1 The operation of incising the spleen. 2. Dissection of the spleen.

splenotoxin (*splen-o-toks'-in*). A cytotoxin with specific action on the cells of the spleen.

splenotyphoid (*splen-o-ti'-foid*) [*spleno-*; *typhoid*]. Typhoid fever with splenic complication.

splenule (*splen'-ūl*). An accessory or rudimentary spleen

splenulus (*splen'-ū-lus*). An accessory or rudimentary spleen.

splenunculus (*splen-ung'-kū-lus*). Accessory spleen; lienunculus

splint [Swedish, *splint*, a kind of spike]. A piece of wood, metal, or other material for keeping the ends of a fractured bone or other movable parts in a state of rest. **s., anchor,** a splint used for fracture of the jaw. Metal loops fit over the teeth, and are held in contact by a rod and nut. **s. bandage,** an immovable bandage. **s. Bavarian,** coarse flannel is cut to fit the part, and stitched over the limb. A thick paste of plaster of Paris is rubbed upon the cloth to secure immobility **s. bone,** the fibula. **s.-box.** See *fracture-box.* **s., bracketed,** a splint consisting of two pieces of wood or metal joined by brackets. **s., interdental,** an appliance used in the treatment of fractured jaws **s., poroplastic,** a splint which can be softened with hot water and molded upon the limb, to harden and retain the shape when dried.

splintage (*splint'-āj*). The application of splints.

splinter (*splin'-ter*) [ME., *splinteren*, to split]. See *sequestrum* Applied, also, popularly to a bit of wood or other material that pierces the skin. **s.-bone.** 1. The fibula. 2. A term applied to one of the two small bones extending from the knee to the fetlock of the horse, behind the shank-bone.

split. A longitudinal fissure. **s. cloth,** a bandage for the head with six or eight tails attached to a central part. **s. pelvis,** congenital non-union of the bones of the pubes at the symphasis.

splitting (*split'-ing*). A chemical change in which a compound is changed into two or more simpler bodies; hydrolysis.

spodiomyelitis (*spo-de-o-mi-el-i'-tis*) [σποδιός, gray; μυέλος, marrow; ιτις, inflammation]. An acute inflammation in the anterior cornua of the spinal cord, in which the larger multipolar ganglion-cells are destroyed. Poliomyelitis.

spodium (*spo'-de-um*) [σποδός, ashes]. An old term for animal charcoal.

spodogenous (*spo-doj'-en-us*) [σποδός, ashes; γεννᾶν, to produce]. Pertaining to or produced by waste-material, as *spodogenous* enlargement of the spleen, a swelling of the spleen produced

by the accumulation of the detritus of red corpuscles.

spodophagous (*spo-dof'-ag-us*) [*σποδός*, ashes; *φαγεῖν*, to eat]. Destroying the waste-material of the body.

spodophorous (*spo-dof'-or-us*) [*σποδός*, ashes; *φέρειν*, to bear]. Carrying or conveying waste-material.

Spoendel's foramen. A small opening in the cartilaginous base of the skull between the ethmoid and the lesser wings of the sphenoid and the anterior ethmoid.

spokebone (*spōk'-bōn*). See *radius*.

spoke-shave (*spōk'-shāv*). A ring-knife, devised by Carmalt Jones, for use in operations on the nasal cavities.

spondyl-, spondylo- (*spon-dil-*, *spon-dil-o-*) [*σπόνδυλος*, vertebra]. A prefix denoting pertaining to a vertebra.

spondylalgia (*spon-dil-al'-je-ah*) [*spondyl-*; *ἄλγος*, pain]. Pain referred to a vertebra.

spondylarthritis (*spon-dil-ar-thri'-tis*) [*spondyl-*; *ἄρθρον*, joint; *ιτις*, inflammation]. Inflammation of a vertebral articulation. **s. synovialis,** inflammation of the synovial membranes of the articular process of the vertebræ (Huter).

spondylarthrocace (*spon-dil-ar-throk'-as-e*) [*spondyl-*; *ἄρθρον*, joint, *κακή*, evil]. Caries of a vertebra.

spondyle (*spon'-dil*) [*σπόνδυλος*, a vertebra]. A vertebra.

spondylexarthrosis (*spon-dil-eks-ar-thro'-sis*) [*spondyl-*; *ἐξ*, out; *ἄρθρον*, joint]. Dislocation of a vertebra

spondylitic (*spon-dil-it'-ik*). Relating to spondylitis.

spondylitis (*spon-dil-i'-tis*) [*spondyl-*; *ιτις*, inflammation]. Inflammation of one or more vertebræ; Pott's disease. **s. cervicalis,** arthritis of one or more cervical vertebræ. **s. deformans,** chronic inflammation of the vertebræ, of a gouty or rheumatic nature, terminating in ankylosis and deformity. **s. tuberculosa,** tuberculous spondylitis; Pott's disease.

spondylizema (*spon-dil-i-ze'-mah*) [*spondyle*; *ζῆμα*, a subsiding]. The settling of a vertebra into the place of a subjacent one that has been destroyed.

spondylocace (*spon-dil-ok'-as-e*). See *spondylarthrocace*

spondylodiagnosis (*spon-di-lo-di-ag-no'-sis*) [*spondylo-*; diagnosis]. Diagnosis by means of vertebral percussion combined with study of the visceral reflexes.

spondylodidymia (*spon-dil-o-did-im'-e-ah*) [*spondyle*; *δίδυμος*, twin]. A form of somatodymia in which the union is in the vertebræ. Syn., *vertebradymia*.

spondylodymus (*spon-dil-od'-im-us*) [*spondyle*; *δῦειν*, to enter]. A twin monster united by the vertebræ.

spondylodynia (*spon-dil-o-din'-e-ah*) [*spondyle*; *ὀδύνη*, pain]. Pain in a vertebra.

spondylolisthesis (*spon-dil-o-lis-the'-sis*) [*spondyle*; *ὀλίσθησις*, a slipping]. Deformity of the spinal column produced by the gliding forward of the lumbar vertebræ in such a manner that they overhang the brim and obstruct the inlet of the pelvis; especially the separation of the last lumbar vertebra from, and its slipping forward on, the sacrum.

spondylolisthetic (*spon-dil-o-lis-thet'-ik*). Pertaining to or caused by spondylolisthesis.

spondylolizema (*spon-dil-o-liz-e'-mah*). Same as *spondylizema*.

spondylomyelitis (*spon-dil-o-mi-el-i'-tis*). See *spondylitis*.

spondylopathia (*spon-dil-o-pa'-the-ah*). See *spondylopathy*

spondylopathy (*spon-dil-op'-ath-e*) [*spondyle*; *πάθος*, a suffering]. Any disease of the vertebræ.

spondylopyosis (*spon-dil-o-pi'-o-sis*) [*spondyle*; *πῦον*, pus]. Suppurative inflammation of one or more vertebræ.

spondyloptosis (*spon-dil-op-to'-sis*). See *spondylolisthesis*.

spondyloschisis (*spon-dil-os'-kis-is*) Deficient ossification in the arch of the fifth lumbar vertebra; this is said to be one of the causes of spondylolisthesis. The condition may affect one or both sides of the vertebræ.

spondylosis (*spon-dil-o'-sis*) [*spondyle*] Vertebral ankylosis. **s., rhizomelic,** spondylose rhizomelique; Marie's term for a variety of arthritis deformans with ankylosis of the vertebræ and arthritis of the hips and shoulders.

spondylotherapy (*spon-dil-o-ther'-ap-e*). Spinal therapeutics; the treatment of diseased conditions by various manipulations applied to the spinal column.

spondylotomy (*spon-dil-ot'-o-me*) [*spondyle*; *τομή*, section] Section of a vertebra in embryotomy; section of a vertebra in correcting a deformity. Cf *rhachiotomy*.

spondylous (*spon'-dil-us*) [*spondyle*]. Vertebral; like a vertebra.

spondylus (*spon'-dil-us*) [*spondyle*]. A vertebra.

sponge (*spunj*) [*σπόγγος*, a sponge]. A marine animal of the class *Porifera*, having a porous, horny skeleton; also the skeleton itself, used as an absorbent. **s., animalcule,** a sponge cell. **s.-bath,** the application of water to the surface of the body by means of a sponge. **s., burnt,** sponge-charcoal made from fine sponges cleansed and burned, then powdered and sifted through a No. 100 silk sieve. **s., compressed,** a fine sponge cleansed, exposed to pressure, and dried. **s.-gatherer's disease,** a disease of divers due to a secretion of a species of *Actinia* found in waters where sponges grow. This viscid excretion causes at the point of contact upon the body a swelling and intense itching, followed by a papule surrounded by a zone of redness which later becomes black and gangrenous and forms a deep ulcer. **s.-graft.** See *graft, sponge-* **s. holder,** an instrument consisting of a rod which serves as a handle, furnished at the distal end with a device for clasping a sponge. **s. prepared,** a sponge rendered soft and elastic and suitable for surgical uses by soaking in cold water and separation of calcareous matter. **s.-tent.** See *tent, sponge-*. **s. test,** a hot sponge is passed up and down the spine; in the presence of caries, pain is felt as the sponge passes over the seat of the lesion.

spongework (*spunj-werk*). Synonym of *spongioplasm*.

spongia (*spun'-je-ah*). See *sponge*. **s. cerata.** See *sponge, waxed*. **s. compressa.** See *sponge, compressed*. **s. fluviatilis,** small sponges found on stones and on water-plants in streams, ponds, and marshy places. **s. lacustris,** a Russian variety used by homeopaths in the preparation of a tincture. **s. officinalis, s. præparata.** See *sponge, compressed*, and *s., prepared*. **s. usitatissima,** sponges with fine

pores cleansed and pressed. **s. usta.** See *sponge, burnt.*

spongiform (*spun'-je-form*) [*sponge; forma*, a form]. Resembling a sponge.

spongin (*spun'-jin*) [*sponge*]. The horny substance forming the skeletal fibers of the sponge.

spongioblast (*spun'-je-o-blast*) [*sponge; βλαστός*, a germ]. A variety of cell derived from the ectoderm of the embryonic neural tube, and forming later the neuroglia. **s. of inner molecular layer of retina.** See *cells, amacrine.*

spongiocyte (*spun'-je-o-sīt*) [*sponge; κύτος*, a cell]. Fish's term for the glia or neuroglia cell.

spongioid (*spun'-je-oid*) [*sponge; εἶδος*, resemblance]. Spongiform.

spongiopilin (*spun-je-o-pī'-lin*) [*sponge; πῖλος*, felt]. Felted or woven cloth into which tufts of sponge are incorporated and one side of which is coated with rubber; it is used as a poultice.

spongioplasm (*spun'-je-o-plazm*) [*sponge; πλάσσειν*, to mold]. The fine, elastic protoplasmic threads forming the reticulum of cells.

spongiosa (*spun-je-o'-sah*). The gray matter in the spinal cord except that which is found at the head of the posterior horn and around the central canal.

spongiose (*spun'-je-ōs*) [*σπόγγος*, sponge]. Full of pores, like a sponge.

spongiositis (*spun-je-o-si'-tis*). Inflammation of the corpus spongiosum.

spongy (*spun'-je*) [*σπόγγος*, sponge]. Having the texture of sponge, very porous. **s. body,** the corpus spongiosum. **s. bones,** bones having a porous, reticulated structure, especially the turbinated bones of the nose, and the sphenoid and ethmoid bones. **s. portion of the urethra,** that contained in the corpus spongiosum of the penis.

spontaneous (*spon-ta'-ne-us*) [*spons*, will]. Voluntary; occurring without extraneous impulse; automatic.

spoon. An instrument consisting of an oval or circular bowl fixed to a handle; it is used in surgery to scrape away dead tissue, granulations, etc. **s.-nail,** a nail with a concave outer surface.

spoonful. A spoon is full when the contained liquid comes up to but does not show a curve above the upper edge or rim of the bowl. A teaspoonful equals 5 Cc.; a dessertspoonful, 10 Cc.; a tablespoonful, 15 Cc

spora (*spo'-rah*) [L.]. See *spore.*

sporadic (*spor-ad'-ik*) [*σποραδικός*, scattered]. Scattered; occurring in an isolated manner. **s. cholera,** cholera morbus

sporadoneure (*spor-ad'-o-nūr*) [*σποράς*, scattered; *νεῦρον*, a nerve]. An isolated nerve-cell

sporangia (*spor-an'-je-ah*). Plural of *sporangium.*

sporangial (*spor-an'-je-al*). Relating to a sporangium.

sporangium (*spor-an'-je-um*) [*spore; ἀγγεῖον*, a vessel; pl., *sporangia*]. In biology, a capsule producing or inclosing spores.

sporation (*spor-a'-shun*) [*σπόρος*, seed]. See *sporulation.*

spore (*spōr*) [*σπόρος*, seed]. 1. A reproductive body of a cryptogam. 2. Any germ or reproductive element less organized than a true cell; also any spermatic or ovulary cell. **s.-capsule,** a spore-case. **s.-case,** the sporangium or covering of a spore. **s.-cell,** a spore. **s., compound,** a spore that produced secondary spores. **s., daughter,** a spore produced in a mother-cell. **s.-formation,** the origination of spores. **s.-group.** Same as *sporidesm.* **s., inactive,** a nonmotile fertile cell. **s., mother-,** a mother-cell. **s., naked,** a gymnospore. **s.-plasm,** the protoplasm of a sporangium. **s., primary,** a spore the germination of which produces a prothallium; a protospore. **s.-sac,** the sac lining the cavity of the sporangium of mosses; see *sporangium.* **s., secondary,** a merispore; cf. *s. compound.* **s., swarm,** a spore endowed with the power of locomotion.

sporicidal (*spor-is-ī'-dal*) [*spore; cædere*, to kill]. Destructive to spores

sporicide (*spor'-is-īd*) [*spore; cædere*, to kill]. Any agent which destroys spores.

sporidesm (*spor'-id-ezm*) [*spore; δέσμη*, a bundle]. In biology, a septate or compound spore.

sporidium (*spor-id'-e-um*) [*spore; ἰδιον*, a dim.; pl., *sporidia*]. 1. In biology, a spore borne upon a promycelium. 2. A provisional genus of *Sporozoa.* **S. vaccinale,** Funck, a species of sporozoa occurring as (1) small, spheric, highly refractive bodies (2–10μ), of green color and slow movement; (2) small refracting spheres inclosed in capsules; (3) morula masses or spore-casts. They can be cultivated and the culture produces typical vaccinia when inoculated in calves.

sporiferous (*spor-if'-er-us*) [*spore; ferre*, to bear]. Spore-bearing.

sporification (*spor-if-ik-a'-shun*). The formation of spores.

sporiparous (*spor-ip'-ar-us*) [*spore; parere*, to produce]. In biology, reproducing by means of spores.

sporo- (*spor-o-*) [*spore*]. A prefix meaning relating to a spore or seed.

sporoblast (*spor'-o-blast*) [*sporo-; βλαστός*, a germ]. 1. One of the four round bodies produced by the process of endogenous cell-formation in a coccidium. 2. A body that is about to give rise to spores.

sporocyst (*spor'-o-sist*) [*sporo-; κύστις*, a bag]. 1. The mother-cell of a spore. 2 That stage of a sporozoon resulting from the development of a sporoblast and in its turn giving rise to two sporozoites

sporocyte (*spor'-o-sīt*) [*spore; κύτος*, a hollow]. In biology, the mother-cell of a spore; a sporocyst.

sporoderm (*spor'-o-derm*) [*spore; δέρμα*, skin]. In biology, the coat of a spore, including exospore and endospore.

sporoduct (*spor'-o-dukt*) [*spore; ducere*, to lead]. A passage through which spores are conducted.

sporogenesis (*spor-o-jen'-es-is*) [*sporo-; γένεσις*, generation]. The development of spores; reproduction by spores.

sporogenous (*spor-oj'-en-us*) [*spore; γενής*, producing]. In biology, spore-producing

sporogeny (*spor-oj'-en-e*). Same as sporogenesis, *q. v.*

sporogone (*spor'-o-gōn*). Same as *sporogonium.*

sporogonium (*spor-o-go'-ne-um*) [*spore; γόνή*, generation; pl., *sporogonia*]. In biology, the nonsexual generation of a moss, proceeding from the fertilized oösphore; also called *sporogone.*

sporogony (*spor-ŏg'-o-ne*). 1. See sporogenesis. 2. A form of exogenous sporulation; an oöcyst containing a sporont divides into four sporoblasts, which ripen into sporocysts and in turn divide into a crescentic nucleated body, the sporozoite. It occurs among coccidia. Cf. *schizogony.*

sporont (*spor'-ont*) [*sporo-; ὤν*, being]. 1. In biology a gregarine without an epimerite, as distinguished from a cephalont. 2. Schaudinn's

term for the single-celled contents of the coccidial oocyst Cf *schizont*

sporophore (*spor'-o-fōr*) [*sporo-*, *φέρειν*, to bear] That portion of a fungus bearing the spores

sporophyl, sporophyll, sporophyllum (*spor'-o-fil, spor-o-fil'-um*) [*spore*, *φύλλον*, leaf] In biology, the modified leaf which bears the spores, or receptacles holding the spores, in many of the vascular cryptogams, the fertile leaf

sporophyte (*spor'-o-fīt*) [*spore*, *φυτόν*, plant] In biology, plants and lower animals exhibit various combinations of alternation of generations A diploid, spore forming generation (the sporophyte), produces spores asexually of an altogether different form the gametophyte which produces sex-cells that unite (fertilization) to start the development of a new sporophyte In higher plants the plant itself is the sporophyte and the gametophytes are rudimentary having a brief but important part in the reproductive cycle—the pollen grain and its latter development into the pollen tube, representing the male gametophytic generation

sporoplasm (*spor'-o-plazm*) [*sporo*, *πλάσσειν* to form] The cytoplasm of the asexual reproductive cell

sporotheca (*spor-o-the'-kah*) [*sporo*, *θηκη* a case] 1 See *sporangium* 2 The envelope of the sporulating cell

sporothrix. See *sporotrichum*

sporotrichosis (*spor-o trik o' sis*) Infection by sporothrix, producing indolent subcutaneous abscesses

Sporotrichum (*spo rot' rik um*) [*spore*, *θρίξ* hair] A genus of fungi some, such as *S beurmanni* and *S schenkii*, give rise to sporotrichosis

Sporozoa (*spor-o-zo'-ah*) [*sporo-*, *ζῷον*, an animal] A class of parasitic *Protozoa* subdivided into the *Gregarinidea*, parasitic in various worms and arthropods, the *Coccidiidea* or oviform psorosperms, parasitic in the hepatic and intestinal epithelium of various mammals including man; the *Sarcosporidia*, or tubuliform psorosperms, parasitic in the muscles of various animals, the *Myxosporidia*, the psorosperms of fishes, the *Microsporidia*, the psorosperms of articulates

sporozoan (*spor-o-zo'-an*) 1 Pertaining to Sporozoa 2 A sporozoon

sporozoite (*spor-o-zo'-īt*) [see *Sporozoa*] 1 The sickle shaped, nucleated organism which results from the division of a sporocyst among the sporozoa Syn, *germinal rod, zygotoblast, gametoblast* 2 An animal spore in contradistinction to a vegetable spore

sporozooid (*spor-o-zo'-oid*) [*spore*, *zooid*, animal-like] 1 One of the two 'sickle cells' or 'falci form bodies' produced by every spore of the true coccidia 2 Any oöspore

sporozoon (*spor-o-zo'-on*) [see *Sporozoa*] In biology, a member of the *sporozoa*

sport. An animal or plant that exhibits decided variation from the normal type

sporular (*spor'-oo lar*) Sporule-like in character

sporulation (*spor-ul a'-shun*) [*spore*] The production of spores **s, arthrogenous,** the change of bacteria into resistant forms, which may germinate again under favorable conditions

sporule (*spor'-ool*) [*σπόρος*, seed] A term applied to a minute spore, also sometimes to minute granules within a spore

sporuliferous (*spor-ul if'-er-us*) [*sporule, ferre*, to bear] Bearing sporules

spot [ME] See *macule* **s.s, acoustic.** See *maculæ acusticæ* under *macula* **s.s, Bitot's,** xerosis conjunctivæ, silver-gray, shiny, triangular spots on both sides of the cornea, within the region of the palpebral aperture, consisting of dried epithelium, flaky masses, and microorganisms They are observed in some cases of hemeralopia **s., blind** (of Mariotte), the entrance of the optic nerve where the rods and the cones are absent **s, blue** (of the integument), a tegumentary spot over the sacral region characteristic of the Mongolian race, due to aggregations of long, spindle-shaped, and stellate cells in the cutis containing pigment It appears in the fourth month of fetal life and persists sometimes to the seventh year **s., corneal,** an opacity of the cornea, leukoma **s.s, cribriform,** the perforations of the fovea hemisphærica for the passage of the filaments of the auditory nerve Syn, *macula cribrosa* **s.-disease.** See *Pĕbrine* **s., embryonic,** the nucleolus of the ovum **s s, genital,** nasal parts which show increased sensitiveness during menstruation **s., germinal, s, germ-** See *s, embryonic* **s, hectic,** the bright flush on the cheeks of a person suffering from hectic fever **s s, Koplik's** See *Koplik's spots* **s s, lenticular.** See *s s, rose* **s, light** (on the membrana tympani), a cone of light on the anterior and inferior part of the tympanic membrane with its apex directed inward **s, Mariotte's,** the optic disc **s, milk-,** a spot found postmortem on the external surface of the visceral layer of the pericardium, usually over the right ventricle, it varies from one half to one inch in diameter, and is of common occurrence in persons who have passed middle life **s, mother's,** nevus **s s, rose,** a red papulous eruption forming spots the size of a small lentil, effaced by pressure of the finger and occurring mostly on the abdomen and loins during the first seven days of typhoid fever They are due to inflammation of the papillary layer of the skin from invasion of typhoid bacilli Syn, *typhoid roseola, typhoid spots,* Fr *tache rosées lenticulaires* Cf *tache bleuâtre* **s s, soldiers'.** Same as *macula lutea.* **s, Soemmering's** See *macula lutea* **s.s, sun.** See *lentigo* **s s, typhoid** See *s s, rose* **s of Wagner,** the embryonic spot **s s, white,** grayish or yellowish-white elevated spots from the size of a pin-head to that of a one cent piece, of varying shape and distinctness of outline, often occurring on the ventricular surface of the anterior leaflet of the mitral valve **s, wine-,** port-wine mark, strawberry mark **s, yellow.** See *macula lutea*

spotted fever 1 Cerebrospinal fever 2 Typhus 3 Tick fever **s sickness** *Pinta disease*

sprain (*sprān*) [OF *espreindre*, from L, *exprimere*, to press out] A wrenching of a joint, producing a stretching or laceration of the ligaments **s.-fracture,** an injury in which a tendon together with a shell of bone is torn from its attachment **s, riders',** a sprain of the adductor longus muscle of the thigh, resulting from a sudden effort of the horseman to maintain his seat owing to some unexpected movement of his horse

spray cure, (*sprā, kūr*) A form of douche applied by means of a spraying apparatus

spreading (*spred'-ing*) Growth of bacteria several millimeters beyond the line of inoculation

Sprengel's deformity [Otto Gerhard Carl *Sprengel*, German surgeon, 1852–1914] Congenital upward displacement of one scapula

sprew (*sproo*) See *sprue.*

spring [ME.]. The first of the four seasons of the year; also, a device having resiliency. **s. conjunctivitis.** See *vernal conjunctivitis*. **s. fever,** lassitude. **s.-finger,** a condition in which there is an obstruction to flexion and extension of one or more fingers at a certain stage of these movements. It is due to injuries or may result from inflammation of the tendinous sheaths. **s.-halt,** an involuntary convulsive movement of the muscles of either hind leg in the horse, by which the leg is suddenly and unduly raised from the ground and lowered again with unnatural force. **s.-knee,** a condition of the knee similar in general features to the condition known as spring-finger. Just before full extension of the joint is reached there is a slight hitch, and then the limb straightens itself with a sharp, rather painful jerk. **s.-ligament,** the inferior calcaneoscaphoid ligament of the sole of the foot. **s.-nail,** a hangnail **s. ophthalmia.** See *vernal conjunctivitis*. **s.-worm.** See *oxyuris vermicularis*.

Spritz bottle. A laboratory wash-bottle.

sprue. 1. Thrush. 2. The name given by the Dutch in Java to aphthæ tropicæ (*q. v.*); a chronic catarrhal inflammation of the entire alimentary tract, especially prevalent in Malaya. Syn., *Ceylon sore mouth; diarrhœa alba; sprouw; tropical sprue*

sprung knee. In the horse an alteration in the direction and articulation of the bones which form the various carpal joints, so that instead of forming a vertical line from the distal end of the forearm to the cannon-bone, the knee (wrist) is more or less bent forward.

spud [Dan., *spyd*, a spear] 1. An instrument used in the detachment of the mucosa in flaps in operations necessitating the removal of bone. 2. A short flattened blade used to dislodge a foreign substance

spuman (*spū'-man*). A crayon containing thymol, resorcin and formaldehyde, used for gonorrhea in the female.

spunk (*spungk*). Surgeon's agaric saturated with potassium nitrate. See under *agaric*

spur (*sper*) [ME., *spure*] 1. A sharp point or projection. 2. The angle made by any branch with the main blood-vessel. 3 In biology, a pointed, spine-like outgrowth, either of the integument or a projecting appendage. 4. Ergot **s.-blind,** myopic. **s.-gall,** a callous and hairless place on the side of a horse, caused by the use of a spur **s. of the septum,** an outgrowth of the nasal septum.

spurge (*sperj*) [ME., *sporgeon*, spurge] A general name for plants of the genus *Euphorbia*.

spurious (*spū'-re-us*) [*spurius*, false]. Not legitimate, bastard. **s. labor,** see *false pains*. **s. melanosis,** see *miners' phthisis*. **s. pregnancy,** see *pseudocyesis*.

spurred (*sperd*) [ME., *spure*, spur]. Having spurs. **s. rye,** see *ergot*.

sputa (*spū'-tah*). Plural of *sputum, q. v.*

sputum (*spū'-tum*) [*spuere*, to spit; pl., *sputa*]. The secretion ejected from the mouth in spitting. It consists of saliva and mucus from the nasal fossæ and the fauces. In diseased conditions of the air-passages or lungs it may be purulent, mucopurulent, fibrinous, or bloody. **s., æruginous,** sputum of a green color. **s., black-pigmented,** having a black color from inhaled particles of carbon. **s., cavernous,** nummular sputum, from a pulmonary cavity. **s. coctum,** opaque, yellowish or greenish, viscid, generally partially confluent, through occasionally nummulated, sputum of the later stages of acute bronchitis. **s. crudum,** the scanty, viscid expectoration of the early stages of acute bronchitis. **s., egg-yolk,** sputum having a yellow color. **s., globular,** spherical masses of sputum of the later stages of bronchitis; yellow in color, and consisting of epithelium, pus-corpuscles, mucus, etc **s., green,** bloody sputum in which oxidation of the hemoglobin has taken place; it is seen in pneumonia. **s., hailstone,** spherical masses of sputum of the later stages of bronchitis. **s., icteric,** sputum tinged green or yellow, due to the presence of bile pigment; it is observed in icterus. **sputa margaritacea,** see *s., pearly*. **s., mucopurulent,** small lumps or pellets in a viscid, mucoserous fluid, seen in bronchitis **s., nummular,** a sputum characterized by round, coin-like masses; it is seen in pulmonary tuberculosis. **s., pearly,** sputum consisting of small translucent pellets. **s., prune-juice, s., rusty,** the typical, dark-colored sputum of the third stage of pneumonia; the color is due to the admixture of blood. **s. puriforme,** sputum having the appearance of pus. **s., rusty,** the dark-colored sputum of lobar pneumonia, the color of which is due to the admixture of blood. **s. septicemia,** see *septicemia, sputum* **s. tuberculosum,** a purulent or mucopurulent sputum containing tubercle-bacilli, occurring in pulmonary tuberculosis and in caseous pneumonia. **s., yellow,** sputum having a yellow color, due to the presence of fungi; the term is also applied to sputum rendered yellow by oxidation of the contained hemoglobin.

squalor (*skwol'-or*, or *skwa'-lor*) [L.] Filth. Disorder and uncleanliness.

squama (*skwa'-mah*) [L. pl., *squamæ*]. A scale or scale-like mass, as the *squama* of the temporal bone. **s. frontalis,** the vertical portion of the frontal bone **s. occipitalis,** the supraoccipital bone **s. temporalis,** the squamosa.

squamate (*skwa'-māt*) [*squama*, a scale] Scaly, or scale-like

squamo- (*skwa-mo-*) [*squama*] A prefix denoting relating to the squamous portion of the parietal or temporal bone

squamocellular (*skwa-mo-sel'-ū-lar*) [*squamo-; cellula*, a small cell]. Flat-celled.

squamofrontal (*skwa-mo-fron'-tal*). Pertaining to the part of the frontal bone which forms the forehead

squamoid (*skwa'-moid*) [*squama*, scale; εἶδος, like]. Resembling a squama.

squamomandibular (*skwa-mo-man-dib'-ū-lar*). Relating the squamosa and maxillary bone.

squamomastoid (*skwa-mo-mas'-toid*) [*squamo-; mastoid*]. Pertaining to the squamous and mastoid portions of the temporal bone.

squamoparietal (*skwa-mo-par-ī'-et-al*) [*squamo-; paries*, wall]. Pertaining to the squamous portion of the parietal bone.

squamopetrosal (*skwa-mo-pe-tro'-sal*) [*squamo-; πετρά*, rock]. Pertaining to the squamous and petrous portions of the temporal bone.

squamosa, squamosal (*skwa-mo'-sah, skwa-mo'-sal*]. The squamous portion of the temporal or occipital or frontal bone.

squamosphenoid (*skwa-mo-sfe'-noid*) [*squamo-; sphenoid*]. Pertaining to the squamous portion of the temporal bone and to the sphenoid bone.

squamotemporal (*skwa-mo-tem'-po-ral*) [*squamo-; temporal*]. Pertaining to the squamous portion of the temporal bone.

squamotympanic (*skwa-mo-tim-pan'-ik*) [*squamo-; tympanic*]. Pertaining to the squamosal and tympanic bones.

squamous (*skwa'-mus*) [*squamosus*, scaly]. 1. Of the shape of a scale, as the *squamous* portion of the temporal bone. 2. Scaly. **s. bone,** the circular plate forming the upper anterior portion of the temporal bone. **s. suture,** the suture between the squamous portion of the temporal bone and the frontal and parietal bones.

squamozygomatic (*skwa-mo-zi-go-mat'-ik*) [*squamo-; zygomatic*]. Pertaining to the squamous and zygomatic portions of the temporal bone.

square lobe. 1. The lobus quadratus of the liver. 2. A lobe on the upper surface of the cerebellar hemisphere.

squarious, squarrous, squarrose (*skwa'-re-us, skwar'-us, skwar'-ōs*) [*squarrosus*, scurfy]. Scurfy.

squarra (*skwar'-ah*) [ἐσχάρα, a scab]. A rough crust of *tinea* **s. tondens,** alopecia areata.

Squibb's diarrhea mixture [Edward Robinson *Squibb*, American manufacturing chemist, 1819–1900]. A mixture containing tincture of opium 25 Cc., tincture of capsicum 12.5 Cc., spirit of camphor 25 Cc., chloroform 10 Cc., and alcohol to make 125 Cc. Average dose 30 minims (2 Cc.).

squill (*skwil*) The bulb of *Urginea maritima* (U. S. P.) or *Urginea scilla* (B. P.), of the order *Liliaceæ* Squill (*scilla*, U. S. P., B P.) contains several bitter principles, *scillitin, scillipicrin, scillitoxin*, and *scillin*, a carbohydrate *sinistrin*, and other substances. It is expectorant, diuretic, and emetocathartic, and is used in dropsy and in croup Dose 1–2 gr. (0.065–0.13 Gm.). **s., fluidextract of** (*fluidextractum scillæ*, U. S. P.). Dose 2–3 min. (0.13–0 2 Cc.). **s., oxymel of** (*oxymel scillæ*, B P). Dose 1–2 dr. (4–8 Gm.). **s., pills of, compound** (*pilulæ scillæ compositæ*, B. P.). Dose 5–10 gr. (0.32–0 65 Gm.). **s., syrup of** (*syrupus scillæ*, U. S P., B. P.). Dose ½–1 dr. (2–4 Cc). **s., syrup of, compound** (*syrupus scillæ compositus*, U. S. P), hive-syrup. Dose 20–30 min. (1.3–2.0 Cc.) **s., tincture of** (*tictura scillæ*, U. S. P., B P). Dose 5–30 min. (0.32–2.0 Cc). **s., vinegar of** (*acetum scillæ*, U. S. P., B. P). Dose 10–30 min. (0.65–2.0 Cc).

squillitic (*skwil-it'-ik*). Pertaining to or containing squill.

squint (*skwint*) See *strabismus*.

Squire's catheter [Truman Hoffman *Squire*, American surgeon, 1823–1889]. A vertebrated catheter.

Squire's sign [G W. *Squires*]. A rhythmic dilatation and contraction of the pupil in basilar meningitis.

squirting cucumber. See *elaterium*

Sr. Chemical symbol of *strontium*.

S. romanum (*ro-ma'-num*). The sigmoid flexure.

ss. Abbreviation for Latin *semis*, one-half.

S. S. paste. A paste made of brown sugar changed to the consistency of condensed milk by the addition in water of nitrate of silver a 1 to 3000 solution. It is applied to septic and sloughing or gangrenous wounds

stab-culture, a culture in which the inoculating point is thrust into a tube of agar, or other suitable solid culture material; it is used for the propagation of anærobic bacteria; it is also called *stick-culture* or *thrust-culture*.

stabile (*sta'-bil*) [*stabilis*, from *stare*, to stand]. Not moving; fixed. **s. current,** an electric current produced by holding both the electrodes in a fixed position.

staccato speech. See *scanning*.

stachydrine (*sta-kid'-rēn*), $C_7H_{11}NO_2$. An alkaloid from the bulb of *Stachys palustris*, forming colorless crystals which liquefy on exposure; soluble in water and alcohol, melt at 210° C.

Stacke's operation (*stah'-keh*) [Ludwig *Stacke*, German otologist, 1859–]. Removal of the posterior and superior wall of the auditory meatus, so that the tympanum, attic, antrum and meatus make one cavity; this affords free exit for pus in suppurative disease of the middle ear.

stactometer (*stak-tom'-et-er*) [σταγτός, a dropping; μέτρον, a measure]. An instrument for measuring drops.

Staderini's nucleus. The nucleus intercalatus, an aggregation of ganglion-cells situated between the dorsal nucleus of the pneumogastric and the nucleus of the hypoglossal nerve.

stadium (*sta'-de-um*) [L]. Stage. **s. acmes,** the height of a disease **s. amphiboles,** see *stage amphibolic*. **s. annihilationis,** the convalescent stage. **s. augmenti,** the period in which there is increase in the intensity of the disease **s. caloris,** the period during which there is fever; the hot stage. **s. contagii,** the prodromal stage of an infectious disease **s. convalescentiæ,** the period of recovery from disease **s. decrementi,** defervescence of a febrile disease, the period in which there is a decrease in the severity of the disease. **s. decrustationis,** the stage of an exanthematous disease in which the lesions form crusts. **s. desquamationis,** the period of desquamation in an exanthematous fever. **s. eruptionis,** that period of an exanthematous fever in which the exanthem appears. **s. exsiccationis.** See *s. decrustationis*. **s. floritionis,** the stage of an eruptive disease during which the exanthem is at its height. **s. frigoris,** the cold stage of a fever; see *stage, algid*. **s. incrementi,** the stage of increase of a fever or disease. **s. incubationis,** see *stage, latent*. **s. maniacale,** the last stage of excitement in mania, after which the nervous manifestations gradually subside **s. nervosum,** the paroxysmal stage of a disease. **s. prodromorum,** in eruptive fevers, the stage prior to the appearance of the eruption. **s. staseos,** see *s. acmes*. **s. sudoris,** the sweating stage **s. suppurationis,** the period in the course of variola in which suppuration occurs. **s. ultimum,** the final stage of a febrile affection.

staff. An instrument for passing into the bladder through the urethra and used as a guide in operations on the bladder or for stricture.

staffa (*staf'-ah*). 1. The stapes. 2 A figure-of-8 bandage

Staffordshire knot. See *knot*.

stage (*stāj*) [*stare*, to stand]. 1. A definite period of a disease characterized by certain symptoms; a condition in the course of a disease. 2. The horizontal plate projecting from the pillar of a microscope for supporting the slide or object. **s., algid,** a condition characterized by subnormal temperature, feeble, flickering pulse, various nervous symptoms, etc. It occurs in cholera and other diseases marked by exhausting intestinal discharges. **s., amphibolic,** the stage of a disease intervening between its height and its decline. **s., asphyxial,** the preliminary

stage of Asiatic cholera, marked by extreme thirst, muscular cramps, etc., due to loss of water from the blood. **s., cold,** the rigor or chill of an attack of a malarial paroxysm. **s., defervescent,** stage of declining temperature. **s., eruptive,** that in which an exanthem makes its appearance. **s., expulsive** (of labor), the stage which begins when dilatation of the cervix uteri is complete and during which the child is expelled from the uterus. See *labor, stages of.* **s., first** (of labor), that stage in which the molding of the fetal head and the dilatation of the cervix are effected. **s., hot,** the febrile stage of a malarial paroxysm. **s. of invasion,** the period in the course of a disease in which the system comes under the influence of the morbific agent. **s. of latency,** the incubation-period of an infectious disease, or that period intervening between the entrance of the virus and the manifestations of the symptoms to which it gives rise. **s., placental** (of labor), the period occupied by the expulsion of the placenta and fetal membranes. **s., preeruptive,** the period of an eruptive fever following infection and prior to the appearance of the eruption. **s., pyrogenetic,** the stage of invasion in febrile diseases. **s., second** (of labor), see *s., expulsive.* **s., sweating,** the third or terminal stage of a malarial paroxysm, during which there is sweating. **s., third** (of labor), see *s., placental.*

staggers (*stag'-erz*). One of the various forms of functional and organic disease of the brain and spinal cord in domestic animals, especially horses and cattle. Enzootic cerebritis of horses, sheep, etc. **s. blind,** staggers due to cerebral disease. **s.-bush,** *Andromeda mariana;* a plant allied to the mountain laurel, growing in the seaboard States of North America. **s.-grass,** *loco,* or *loco disease, q. v.,* produced by eating various so-called loco-weeds. **s., mad, s., sleepy,** staggers due to inflammation of the cerebral envelopes. **s. stomach,** staggers due to cerebral disturbance dependent on gastric disorder.

stagnation (*stag-na'-shun*) [*stagnare,* to settle]. A cessation of motion. In pathology, a cessation of motion in any fluid; stasis.

stagnin (*stag'-nin*). Trade name of a styptic prepared from the spleen of a horse.

stagnum chyli. Same as *receptaculum chyli*

Stahl's ear [Friedrich Carl *Stahl,* German physician, 1811–1873]. A congenital deformity of the ear which consists in a broadening of the helix, the fossa ovalis and upper part of the scaphoid fossa being covered.

Stahlian (*stah'-le-an*). An animist, a follower of the doctrine of George Ernst Stahl, German chemist, 1660–1734.

stain (*stān*) [from *distain,* from *dis,* priv.; *tingere,* to color]. 1. A discoloration. 2. A pigment employed in microscopy to color the tissues or to produce certain reactions. The common microscopic stains are hematoxylin, carmin, osmic acid, and the anilin dyes. **s., intra vitam,** one that will act upon living material. **s., inversion, of Rawitz,** a process in which under the influence of a mordant, a basic anilin dye behaves as a plasma or acid dye. TABLE OF STAINS, REAGENTS, REACTIONS, STAINING METHODS, etc.: Appended are those most important to students of medicine. For a full definition of all the stains, etc., in use in special and general branches, see the Illustrated Dictionary and the Dictionary of New Medical Terms. **acid fuchsin,** a diffuse stain, having a special affinity for axis-cylinders. A solution of 2 Gm. in 40 Cc. of 90 % alcohol and 160 Cc. of distilled water is employed. Wash out in 90 % alcohol. Weigert stains sections of tissue hardened in Mueller's fluid in a saturated aqueous solution of acid fuchsin for from 1 to 24 hours, then rinses them quickly in water, immerses for a few minutes in a saturated solution of potassium hydroxide, 1 part, alcohol, 10 parts. Wash thoroughly to remove the alkali, dehydrate, clear, and mount This process differentiates the finer nerve-fibers in the spinal cord. **alcohol,** an excellent fixing medium, suitable for all tissues except those of the central nervous system and those undergoing fatty infiltration or degeneration. It is also used to harden and preserve objects that have been fixed in other fluids. As a preservative it is not without defects, as it alters the structure of tissues by continuously dehydrating their albuminoids. Toluol, ether, and xylol are recommended as substitutes (Kultschitzky). As a fixing agent alcohol is usually employed in gradually increasing strengths, beginning with 50 or 70 %. **alcohol, absolute,** one of the most penetrating fixing agents, which has the advantage of preserving the structure of glands and of nuclei It should be employed in large quantities. Hydration may be prevented by suspending in the alcohol strips of gelatin (Lowrie). After fixation, preserve the object in 90 % alcohol. **amyloid reaction** (*in tissues having undergone amyloid degeneration*). 1. With iodine: Dilute Lugol's solution with distilled water until it has the color of port-wine, and add 25 % of glycerol; in this stain the sections for 3 minutes, wash in water, and mount in glycerol. The amyloid substance is brown-red; the remaining tissues are light-yellow. (For permanent preparations see the method of Langhans for glycogen.) 2. With iodine-green: Stain for 24 hours in iodine-green (0.5 Gm. dissolved in 150 Cc. of distilled water) and wash in water. The amyloid masses are red-violet, the remaining tissues green. 3. With iodine and sulphuric acid. Place sections that have been treated with Lugol's solution (see *Iodine Reaction* in this table) in 1% sulphuric acid. The brown of the amyloid substance becomes intensified or it changes to a violet or blue to green color. 4. With methyl-green. Stain for from 3 to 5 minutes in 1% solution of the dye and wash in distilled water containing 1% of hydrochloric acid. Amyloid substance violet, nuclei, green. 5. With methyl-violet: The process of staining is the same as with methyl-green. The amyloid is purple-red, the remaining tissue blue. **anilin oil,** an important medium because of its ability to clear watery objects; it will even clear aqueous media without the intervention of alcohol, which sometimes renders it valuable as a penetrating medium prior to paraffin embedding. It is also used for clearing celloidin sections. **anilin water** (*Ehrlich*), shake up 3 Cc. of anilin oil with 97 Cc. of distilled water and filter. The filtrate should be clear. Used as a mordant for anilin dyes. It does not keep well, and should be freshly prepared. **Apathy cement, heat together, in a** porcelain capsule, equal parts of hard paraffin (60° C., 140° F.) (melting point) and Canada balsam until the mixture assumes a golden tint and no longer emits vapors of turpentine. On

cooling, this forms a firm mass, which for use is warmed and applied with a glass rod. This cement is suitable for closing glycerol mounts. **balsam-paraffin for cells** (*Julien*), this substance consists of paraffin saturated with balsam-cement, and is prepared as follows: Reduce commercial Canada balsam to a wax-like consistence by slow evaporation in a shallow tin pan over a low flame. Test by cooling a few drops from time to time Melt slowly one-fourth pound of paraffin, with a melting-point above 45° C. (113° F.); add a lump of balsam-cement about the size of a marble, and then digest at gentle heat, stirring frequently, for about an hour. The appearance of a slight yellow tinge indicates the saturation of the paraffin by the balsam. When it is desired to prepare a cell, the balsam-paraffin is cautiously heated to the melting point in a shallow porcelain capsule. These paraffin cells are suitable for dry or liquid mounts, excepting for the latter when Canada balsam, dammar, or oils are used as preservatives The great advantage of the balsam-paraffin is its chemic indifference to the reagents employed in the preservation mediums **Boston's mixture** (for the preservation of casts in urine), liquor acidi arsenosi (U. S. P), 1 oz.; salicylic acid, ½ gr.; glycerol, 2 dr. Dissolve by warming gently and add "whole tears" of acacia to saturation. Let the mixture settle, decant the supernatant liquid, and add a drop of formalin. Place a drop of urine containing casts on a slide, evaporate nearly to dryness, add a drop of the perservative, mix the two with a delicate needle, apply a cover-glass, and when the mount has hardened, seal with cement **Bremer's method** (*for diabetic blood*), fix the films for 6 minutes in the oven at 135° C. (275° F.). Stain for 3 minutes with 1 % solution of methyl-blue or with the Ehrlich-Biondi mixture The yellow-green reaction of the erythrocytes may also be obtained by using eosin, congo red, or biebrich scarlet in 1 % solution **Canada balsam,** evaporate the balsam in a water-bath to dryness, and dissolve in an equal volume of xylol, benzol, toluol, chloroform, or turpentine Filter through paper and keep in a "capped" bottle. If it gets too thick, dilute by adding more of the solvent employed. **carbolfuchsin,** fuchsin, 1 Gm.; phenol, 5 Gm ; alcohol, 10 Gm.; distilled water, 100 Gm. **celloidin,** stated to be a preparation of pure pyroxylin. It is nonexplosive and is soluble in ether and alcohol Celloidin should be used in thin (2 %) and in thick (6 %) solutions. The object is thoroughly dehydrated in absolute alcohol, placed in a mixture of equal parts of ether and alcohol for from 12 to 24 hours, or longer if the object is large. It is then placed for 24 hours in a thin solution of celloidin (8 Gm. in 100 Cc. each of alcohol and ether), and transferred from this to a thick solution of celloidin (8 Gm. in 50 Cc. each of alcohol and ether). Select a cork or a piece of soft, dry wood, and dip it in the thick celloidin solution; when dry, place the prepared tissue upon it and drop the thick celloidin solution upon this with a pipet until it is embedded in a jelly-like mass. Blocks or cylinders of glass or vulcanized fiber serve better than cork, as they sink in the liquids used Harden in 90 % alcohol, and preserve in 70 % alcohol. When making sections, keep the knife and section wet with alcohol. Apathy advises previous smearing of the knife with vaselin, as it cuts better and is protected from the alcohol. Use bergamot oil to clear. Sections may be kept in from 60 to 80 % alcohol. **Chenzinsky's stain** (*for blood*), concentrated aqueous solution of methylene-blue and distilled water equal parts. To this is added an equal quantity of 0.5 % solution of eosin in 60 % alcohol. Stain blood-films 4 to 5 minutes. Red blood-corpuscles stain a rose-red, nuclei of leukocytes blue, and malarial parasites blue. **Claudius' method** (*for bacteria*), stain in gentian or methyl-violet, after Gram (see *Gram's Method* in this table), differentiate in a saturated aqueous solution of picric acid diluted with an equal volume of water, decolorize in chloroform. **collodion,** prepared by dissolving gun-cotton or soluble cotton in equal parts of 95 % alcohol and sulphuric ether, it is in every way as good as celloidin, and considerably cheaper **Conn's method** (*for preserving cultures of bacteria as museum specimens*) Inoculate 2 % agar slants and seal the tubes with paraffin and plaster-of-paris. In a few days the cultures cease growing and remain indefinitely unaltered **copper acetate,** a solution of 1 Gm. of copper acetate and 4 Gm of mercuric chloride in 250 Cc. of glycerol and 1 Cc. of glacial acetic acid is used in preserving and mounting green algæ **corrosive sublimate,** a most excellent reagent, generally applicable, useful particularly for fixing glands and glandular structures. Saturated aqueous and alcoholic solutions are usually employed The tissues turn white when fixed. All the corrosive sublimate must be washed out in iodine or the sections will be sprinkled with crystals of the salt. The hardening is completed in alcohol. Glass, wood, or platinum should be used in manipulating objects immersed in this reagent. Sections may be stained with any of the usual reagents **cover-glass preparations,** such preparations are usually made in examining blood, sputum, or other fluid or semifluid substance. In the case of sputum, a tiny mass is placed on a cover-glass, another is pressed gently down upon this, and the two glasses are separated by sliding one over the other, the object being to secure a thin, even film on each glass. The film may also be spread with the edge of a cover-glass or with a platinum spatula. The preparations are then left to dry in air, or they may be dried by exposing them to a temperature of 120° for twenty minutes, or by passing them quickly thrice through the flame of a spirit-lamp or Bunsen burner When dry, they are ready to stain. To obtain a cover-glass preparation of blood, cleanse the finger, prick the pad, wipe off the first drop of blood that exudes, touch the apex of the second drop with a cover-glass, spread in the manner described, and dry in air. **Craig's method** (*for obtaining the flagellated malarial plasmodium*), cleanse the ear or finger, also the slide and cover-glass, with alcohol. Make a puncture with a sterile needle and wipe away the first drops of blood. Gently breathe upon the slide and take up on it the blood from the summit of the second drop and immediately apply the cover-glass. The brief exposure to air and the moisture on the slide are said to hasten flagellation. **creosote,** the properties of this agent are similar to those of phenol. Beechwood creosote is a good clearing medium for celloidin sections. **Czenzynke's double stain,** concentrated aqueous solution of methyl-

ene-blue, 40 Cc.; 0.5 % solution of eosin in 70 % alcohol, 20 Cc.; distilled water, 40 Cc. This is used to stain the blood, and colors the red corpuscles red, the leukocytes blue; also for *Plasmodium malariæ*, the gonococcus, and the influenza bacillus of Pfeiffer and Canon. **dahlia-violet,** a nuclear stain, recommended for demonstrating the granules in Ehrlich's mast-zellen. Tissues hardened in alcohol are stained for several hours in a solution of dahlia-violet 2 Gm , in 90 % alcohol 25 Cc. Wash in alcohol until nearly colorless. **Delafield's hematoxylin,** see under *Delafield*. **eau de Labarraque** (*sodium hypochlorite*), rub up 20 Gm. of chlorinated lime in 100 Cc. of distilled water and mix with 40 Gm. of crystallized sodium carbonate dissolved in the same quantity of water. Let the mixture stand for an hour and filter. This is used in the same way as Javelle water. With the aid of heat, chitin is dissolved in either of the solutions in a short time (Loos). Chitinous structures, macerated for 24 hours or more in these solutions diluted with 4 to 6 volumes of water, become soft and transparent, and permeable to staining fluids, aqueous or alcoholic. This method is especially applicable to nematodes and their ova **Ehrlich's acid hematoxylin,** used for staining sections and in the mass Dissolve 1 Gm of hematoxylin in 30 Cc of alcohol and add 50 Cc each of glycerol and water, alum in excess, and 4 Cc. of glacial acetic acid. Let the mixture ripen in the light until it acquires a deep-red color Objects stained in it should be washed in undistilled water. **Ehrlich's anilin gentian-violet,** a mixture of 5 Cc of a saturated alcoholic solution of gentian-violet and 100 Cc of anilin water. **Ehrlich-Biondi-Heidenhain triple stain,** to 100 Cc of a saturated aqueous solution of orange add, with continual agitation, 20 Cc. of a saturated, aqueous solution of acid fuchsin and 50 Cc. of a like solution of methyl-green; dilute with from 60 to 100 volumes of water A drop on blotting-paper should form a spot bluish-green in the center, orange at the periphery; a red zone outside the orange indicates that the mixture contains too much fuchsin. From 6 to 24 hours is required to stain. Wash out in alcohol and clear in xylol Chromatic elements are colored blue; cytoplasm, violet or orange-red; karyoplasm, the same but in lighter tones, and all the denser protoplasmic elements the same, but darker (Gilson). This is by far the best stain for photomicrography, except for connective tissue (Lindsay Johnson). A slightly acid reaction of the alcohol used for washing out will produce a relatively strong coloration by the methyl-green, while that by the fuchsin will be relatively pale; the opposite result will be obtained if the alcohol contains a trace of alkali The addition of very dilute acelic acid, until the red tint is markedly intensified, will restore the energy of the fuchsin, which is likely to decline after a time (Heidenhain). **Ehrlich's iodine method,** stain the fixed film in a syrupy solution of gum-arabic containing 1 % of Lugol's solution. leukocytes stained brown indicate a suppurative process. **Ehrlich's stains** (*for the granules of leukocytes*). 1. *Acidophilous or eosinophilous mixture:* Two parts each of indulin, aurantia, and eosin; glycerol, 30 parts. Suitable for staining sections and cover-glass preparations. This is also known as "Mixture C." 2. "*Triacid*" *mixture:* Dissolve—(*a*) 1 Gm. of orange-yellow (extra) in 50 Cc. of distilled water; (*b*) 1 Gm. of acid fuchsin extra in 50 Cc. of distilled water; (*c*) 1 Gm. of crystalline methyl-green in 50 Cc. of distilled water. Let the solutions settle. Then mix 11 Cc. of solution *a* with 10 Cc. of solution *b*; add 20 Cc. of distilled water and 10 Cc. of absolute alcohol; to this mixture add a mixture of 13 Cc. of solution *c*, 10 Cc. of distilled water, and 3 Cc. of absolute alcohol. Let the stain stand for one or two weeks before using **Farrant's solution.** See under *Farrant*. **Flemming's fluid.** 1. Chromium trioxide 0.2 Gm.; glacial acetic acid, 0.1 Cc.; water, 100 Cc. This is especially recommended for fixing the achromatic spindle-fibers in nuclei. (2) Chromium trioxide (1 %), 45 Cc.; 2 % osmic acid, 12 Cc.; glacial acetic acid, 3 Cc. This fixes small pieces (2–3 mm. thick) in from a few to 24 hours, and is useful for fixing the figures in cell-division and for many other purposes. A weaker solution is also used: 1 % osmic and glacial acetic acids, each, 100 Cc. The second formula is the one generally known as *Flemming's fluid*. **Frænkel-Gabbet method** (*for tubercle bacilli*). See under *Gabbet*. **Futcher-Lazear method** (*for the malarial parasite*), fix the film for one minute in a mixture of 10 Cc. of 95 % alcohol and 2 drops of formalin; wash, dry, and stain for 15 seconds in carbolthionin, prepared by mixing 20 Cc. of a saturated solution of the dye in 50 % alcohol and 100 Cc of 2 % aqueous solution of phenol. **gentian-violet.** 1. (*Concentrated alcoholic*). Gentian-violet, 25 Gm.-absolute alcohol, 100 Cc. 2. (*Aqueous*). Gentian-violet, 1 Gm., 90 % alcohol, 20 Cc.; distilled water, 80 Cc. A nuclear stain, prepared by dissolving 0.5 Gm. of the dye in 80 Cc. of distilled water, 20 Cc. of 90 % alcohol, and 1 Cc. of glacial acetic acid. Stains in 5 minutes. Dissolved in indifferent media it may be used for staining *intra vitam*, and in acid solutions colors the nuclei of fresh tissues It may be used according to Gram's method. **glycerin-jelly,** soak in 150 Cc of distilled water 25 Gm. of gelatin for two hours, and add 3 Cc. of phenol and 175 Cc. of glycerol; heat for 15 minutes and filter through spun glass. Wrap the cork of the bottle in which the jelly is preserved in linen dipped in dilute phenol. For use, melt it in hot water, place a drop on the section, upon which gently press a cover-glass. **glychemalum,** hematein, 0.4 Gm. (rubbed with a few drops of glycerol until it dissolves); alum, 5 Gm.; glycerol, 30 Cc.; distilled water, 70 Cc. (*Mayer*). **gold chloride,** recommended for tracing nerve-endings in fresh tissues and for staining connective tissue and cartilage-cells. Place small pieces of tissue, ½ inch square, in from 0.5 to 1 % solution of commercial gold chloride in distilled water. Keep in the dark, and when the tissue has become yellow, wash in distilled water Then expose to the light in 50 Cc. of water containing 2 drops of acetic acid for 48 hours, or until the tissue acquires a purple tint. Mount in glycerol. **Goldhorn's stain** (*for blood*), preparation of the solution of polychrome methylene-blue. Solution A (Merck's medicinal methylene-blue: Grübler's methylene-blue rectified, and methylene-blue—Koch): Dissolve 2 Gm. methylene-blue in 300 Cc. warm water. Add to this 4 Gm. lithium carbonate, shaking constantly. Heat in an evaporating dish on a water-bath, the water

touching the dish. Stir the solution occasionally. Remove in 15 to 20 minutes. Do not filter. Set aside for several days. Then add dilute acetic acid (5 %) until the solution is only *faintly* alkaline. Solution B: A 0.1 % *aqueous* solution of eosin. Fix blood-films in *methyl-alcohol* for 15 seconds. Wash in running water. Stain in solution B for 7 to 30 seconds. Wash. Stain in solution A for 30 seconds to 2 minutes. Wash *thoroughly* in running water. Dry by agitating in air, *not* between filter-paper. The eosin may be added to the methyl-alcohol (enough to make a 0.1 % solution); or solution B may be added to solution A (1 : 4), but this easily produces a precipitate (the neutral stain). These give good results. Mixtures of methyl-alcohol, eosin, and polychrome methylene-blue give poor results. The depth of the chromatin stain depends on the length of staining. To stain the chromatin of half-grown malarial parasites 1½ to 2 minutes is necessary while the chromatin of the hyaline forms stains in 10 seconds. Repeated staining may improve the chromatin violet To do this the blood-film may be stained with solution B for 5 seconds, with solution A for 10 seconds. **Golgi's method** (*for the restoration of over-hardened tissue*), wash in a half-saturated solution of copper acetate until it yields no precipitate, and return for 5 or 6 days to Golgi's mixture (see below). The tissue will then take the silver and the sections can be mounted in thickened cedar oil under a cover-glass **Golgi's mixture,** potassium dichromate (35 % solution), 54 Cc ; osmic acid (2 %), 6 Cc. **gonococcus,** the gonococci are seen in the pus-cells grouped around the nucleus. Watery solutions of aniline dyes, preferably methylene-blue, stain the cocci intensely. **Gram's method,** heat for from 2 to 5 minutes, or stain cold for from 20 to 30 minutes (tubercle bacilli, 12 to 24 hours), in saturated solution of gentian-violet aniline water; rinse quickly in absolute alcohol; transfer to Gram's solution (1 to 1½ minutes), in which the specimen turns black; wash in alcohol until the black color vanishes and a pale-gray color appears; dry and mount in Canada balsam. The decolorization may be hastened by adding 3 % nitric acid to the alcohol and then washing in pure alcohol. All the tissue-cells are decolorized by this method, while the bacteria are stained a deep blue. The cells may be subsequently stained with a watery or alcoholic solution of Bismarck brown for from 2 to 5 minutes, then washed in absolute alcohol until the section is yellowish-brown. This method is of diagnostic value, as certain bacteria are stained, others decolorized, by it. The bacteria that are stained by Gram's method are· tubercle bacillus; Fraenkel-Weichselbaum pneumococcus; *Streptococcus pyogenes;* streptococcus of erysipelas; *Staphylococcus pyogenes aureus, albus, citreus,* and *flavus;* anthrax bacillus; bacillus of hog erysipelas. The bacteria that are decolorized by Gram's method are. Typhoid bacillus; gonococcus; Friedländer's capsule bacillus; Koch's comma bacillus; glanders bacillus, and the spirillum of relapsing fever. Botkin advises washing the preparation in plain aniline water before decolorizing in the iodin solution. *Modifications of Gram's Method*: 1. *Guenther's modification:* Transfer from the iodine-potassium-iodide solution to alcohol, then to a mixture of alcohol, 1 volume, and nitric acid, 3 volumes, and from this again into alcohol. 2. *Nicolle's modification:* Decolorize in a mixture of alcohol, 2 volumes, and acetone, 1 volume. 3. *Ribbert's modification:* Decolorize in alcohol containing 10 % of acetic acid. 4. *Weigert's modification:* The sections, stained with gentian-violet or methyl-violet, are not transferred to alcohol from the iodine solution, but are laid upon slides and covered with anilin oil. This is removed with blotting-paper, and followed by xylol and xylol-balsam. The anilin oil dehydrates and differentiates. **Grenacher's alcoholic borax-carmin,** dissolve 4 Gm. of borax in 100 Cc. of distilled water; add 3 Gm. of carmin, warm, and dilute with 100 Cc. of 70 % alcohol. Filter before using, and transfer the tissue from the stain directly into alcohol acidulated with from 4 to 6 drops of hydrochloric acid, in which it should remain until it acquires a bright, transparent appearance. This solution is used for staining in bulk and gives a splendid color. **Gruber and Durham's method** (*for the agglutination of typhus and cholera bacilli*), place a drop of immunization serum on a cover-glass and beside it a drop of equal size of the culture, as finely divided as possible. Mix and examine on a slide with a ground cell. In doubtful cases put the preparation in the oven for from 15 to 30 minutes. **Haffkine's bouillon** (*for the culture of the bacilli of bubonic plague*), chop 1 kilo of goat's flesh and heat it at a pressure of 3 atmospheres for 6 hours in dilute hydrochloric acid. Filter, neutralize, dilute with water to 3 liters, and sterilize. **Haffkine's prophylactic,** inoculate a flask containing 3 liters of Haffkine's bouillon with a pure culture of pest bacilli; when the stalactite growth develops, shake the flask until the colony sinks to the bottom, and when the growth reappears, shake again; when the stalactite culture forms the third time, heat to 60° C. (140° F.) for 3 hours. Decant the clear fluid and preserve in hermetically sealed tubes. Dose 16–32 min. (1–2 Cc.) injected beneath the skin. **Harris' carboltoluidin,** dissolve 1 or 2 Gm. of toluidin-blue in a saturated solution of phenol. Before staining treat the sections with water; stain for from 5 minutes to 24 hours, wash, and differentiate in glycerol-ether (Grübler) diluted 15 times with water or in acidulated alcohol; after from 5 to 15 minutes wash in alcohol. Eosin in alcohol may be used as a counterstain. In this case omit the differentiation and stain for from ½ to 2 minutes and wash in alcohol. **Harris' hematoxylin,** dissolve 1 Gm of hematoxylin in 10 Cc. of alcohol and add to 200 Cc. of a saturated aqueous solution of alum; heat to boiling and add 0.5 Gm. of mercuric oxid; when the solution turns a dark purple, remove from the flame and cool quickly. For use dilute to the color of port-wine with aqueous solution of alum. **Haug's phloroglucin fluid.** One of the most rapid decalcifying agents, and without injurious action on the tissue-elements, with the exception of blood. It is prepared as follows: Warm slowly and carefully 1 Gm. of phloroglucin in 10 Cc. of pure nitric acid, and to the resulting ruby-colored solution add 50 Cc. of distilled water. If a larger quantity is desired, add nitric acid and water to the foregoing proportion until the volume measures 300 Cc., the limit of the protective influence of the phloroglucin. Previously to being brought into this fluid the tissues should be well fixed.

Fetal bones and those of lower vertebrates are decalcified in half an hour. Older and harder bones require several hours. When decalcification is completed, wash in running water for two days. The sections stain well. Another formula, useful for teeth when rapid action is necessary, consists of phloroglucin, 1 Gm.; nitric acid, 5 Cc.; 95 % alcohol, 70 Cc.; distilled water, 30 Cc. The function of the phloroglucin is to protect the organic tissue-elements against the action of the acid. **Heidenhain's fluid,** saturate hot 0 5 % sodium chloride solution with mercuric chloride. **Heller's method.** 1. *For the osmication of medullated nerve-fibers:* Harden the tissue in Mueller's fluid. Stain the sections in 1 % osmic acid—in the oven for 10 minutes, at room-temperature for a half-hour; wash in water; reduce in 5 % pyrogallic acid for a half-hour, oxidize in 2.5 % potassium permanganate for from 3 to 5 minutes, decolorize in 2 % oxalic acid for from 3 to 5 minutes. 2. *For mounting objects for sectioning:* Pin a piece of paper about the cork or block so that it projects and forms a trough into which the celloidin can be poured around the object. Harden in the vapor of alcohol by suspension in a closed cylinder containing a few centimeters of alcohol. **hemosiderin,** amorphous yellow to black-brown iron-containing fragments occurring in thrombi or hemorrhagic infarcts In sections of material hardened in alcohol or formalin, treated for a few minutes with a 2 % aqueous solution of potassium ferrocyanide and examined in glycerol containing 0.5 % of hydrochloric acid, the pigment appears in the form of dark-blue granules. **Hermann's fluid,** a modification of Flemming's fluid. Platinum chloride is used instead of chromium trioxide; in other respects the formulas are alike. **His' medium** (*for the differential culture of the typhoid bacillus*). 1. The tube culture-medium. triturate 5 Gm. of agar, 80 Gm. of gelatin, 5 Gm. of beef-extract, and 5 Gm. of salt; add a liter of water and enough hydrochloric acid or soda solution to produce a reaction of 1.5 % of normal acid, using phenolphthalein as the indicator. Clear with 1 or 2 eggs beaten in 25 Cc. of water; add 10 Gm. of glucose, boil for 25 minutes, and filter through absorbent cotton. 2. For the plate-culture use 10 Gm of agar, 25 Gm. of gelatin, 5 Gm each of beef-extract and salt, and 10 Gm. of glucose. The medium must contain not less than 2 % of normal acid. The typhoid bacillus alone has the power of clouding these media **Hofbauer's method** (*for staining the iodinophil granules of leukocytes*), dry the film and stain 1 minute in a solution of iodine, 1 part, potassium iodide, 3 parts, and water, 100 parts, brought to a syrupy consistence by the addition of gum-arabic. Remove the excess of the stain with filter-paper to prevent diffuse coloring. **iodine-alcohol,** alcohol, 90 %, to which enough tincture of iodine is added to impart the color of port-wine. See also *Zenker's fluid* in this table. **iron hematoxylin,** sections are treated with a weak aqueous solution of ferric acetate, washed in water, and stained in 0.5 % aqueous solution of hematoxylin. A blue-black or black-brown stain is obtained. This process is recommended by Bütschli for staining sections of protozoa 1μ thick. Another method is as follows: Treat sections for from ½ hour to 2 or 3 hours with a 1.5 to 4 % solution of ferric ammonium sulphate; wash in water, and stain for from 1 to 12 hours in an aqueous solution of hematoxylin, about 0.5 %. Rinse with water and treat again with the iron solution. As soon as differentiation is complete, wash for 15 minutes in running water and mount The results vary according to the duration of the treatment with the iron and hematoxylin solutions; short baths give a blue preparation, in which the nuclear structures are highly differentiated; prolonged baths give black preparations, showing connective-tissue fibers and red blood-corpuscles black, central and polar bodies intensely black, cytoplasm sometimes colorless, sometimes gray, in which case cell-plates and achromatic spindle-fibers are stained. Microorganisms are sharply stained. **Jenner's stain** (*for blood*) See under *Jenner*. **karyokinesis.** Place small pieces of tissue hardened in strong Flemming's solution in an alcoholic solution of safranin (2 Gm. to 60 Cc.) for from 24 to 48 hours. Wash for a few minutes in water, and carry to acidulated absolute alcohol (10 drops of acetic acid to 100 Cc.) for from ½ to 1 minute. When thick clouds of color are no longer given off, carry to absolute alcohol. After 1 or 2 minutes clear and mount. **Leishman's stain** (*for blood*). Preparation of the neutral stain. Solution A: The solution of polychrome methylene-blue. A 1 % aqueous solution of methylene-blue med. (Grübler) is made alkaline with 0.5 % Na_2CO_3. This is heated for 12 hours at 65° C., and then allowed to stand for 10 days before use. Solution B: A 0.1 % aqueous solution of eosin (extra BA Grübler). Equal parts of solutions A and B are mixed in an open vessel and allowed to stand for 5 or 6 hours, with occasional stirring. The precipitate formed is collected on a filter, washed with water, dried, and powdered. The staining solution: Dissolve 0.1 Gm. of the dry precipitate in 100 Cc. pure methyl-alcohol (Merck "for analysis"). To stain: Four drops of the solution are poured on the blood-film, and allowed to stain for ½ minute. Without pouring off the stain, 6 to 8 drops of distilled water are added and the mixture is allowed to stain for 5 minutes. Wash gently. Put a few drops of water on the blood-film for 1 minute. Then dry and mount. Staining reactions. Red blood-corpuscles stain pale pink or greenish; lymphocytes: nuclei, dark ruby red; protoplasm, pale blue; mononuclears: nuclei, ruby red; protoplasm, pale blue; polymorphonuclear neutrophils: nuclei, ruby red; granules, red; "coarse-grained eosinophils." nuclei, ruby red; granules, purplish black; blood-platelets stain deep ruby red; malarial parasites. nuclei, chromatin portion, ruby red; cytoplasm, blue. **lithia-water.** Saturated aqueous solution of lithium carbonate 1 Cc., and distilled water 30 Cc., used as an intermediate agent in staining microorganisms. **living cells.** Young larvæ of *Amphibia* are the best objects for the study of cells *intra vitam*. Place the larvæ of *Salamandra* in a watch-glassful of water containing 5 to 10 drops of a solution of 1 part curara in 100 parts each of water and glycerol. From ½ to 1 hour's immersion is required for curarization. It is not necessary to wait until the larvæ are motionless: they may be removed as soon as their movements have become slow. The gills and the caudal fin may then be studied. The tail may be excised from the living animal and studied for some time in 1 % salt solution or other

indifferent medium. The adult animal offers for study the thin, transparent bladder. Larvæ may be bred from adults, if well fed with aquatic worms, and supplied with a vessel of water. The larvæ will be deposited in the water. The cytoplasm of living cells may be stained with methylene-blue, dahlia, or gentian-violet dissolved in water or in an indifferent liquid. **Loeb's method** (*for producing artificial parthenogenesis*). Place the unfertilized eggs of sea-urchins in sea-water containing magnesium chloride in the proportion of 5000 ($\frac{1}{8}$n MgCl) to 5000 Cc. of water. After 2 hours restore them to normal sea-water. The eggs from normal gastrulæ and plutei. **Loeffler's methylene-blue.** Add 30 Cc of a concentrated alcoholic methylene-blue solution to 100 Cc. of a solution of caustic potash (0 01 · 100). Filter before using. **Loeffler's stain** (*for flagella*). Mix 10 Cc. of 20 % solution of tannin, 5 Cc. of saturated solution of ferrous sulphate, and 1 Cc. of aqueous or alcoholic solution of fuchsin, methyl-violet, or "Wollschwarz" For typhoid bacilli add 1 Cc. of 1 % solution of soda; for *Bacillus subtilis* add 30 drops, for bacilli of malignant edema, 36 drops, for cholera bacilli add 1 drop of sulphuric acid to the soda solution; for *Spirillum rubrum*, 9 drops. **McCrorie's method** (*for flagella*). Stain the cover-glass preparation in warmed mixture of equal parts of a saturated solution of night blue, a 10 % solution of tannin, and a 10% solution of alum. **Mallory's method.** 1. *For neuroglia:* Fix for 4 days in 10 % formalin, then for 4 days in a saturated solution of picric acid, after this mordant for 4 days in 5% solution of ammonium bichromate at 37° C. Stain the sections for 2 minutes in 1 % aqueous solution of acid fuchsin, rinse, and treat for 2 minutes with 1 % aqueous solution of phosphomolybdic acid; wash in two changes of water and stain for 2 minutes in a mixture of water-soluble aniline blue, 0 5 Gm.; orange G, 2 Gm.; oxalic acid, 2 Gm.; and water, 100 Cc.; wash in water and dehydrate in alcohol. Result· connective tissue, blue; neuroglia, deep red; ganglion-cells and axis-cylinders, light red. 2. *For neuroglia:* Fix the tissues after the method given in No. 1, and treat the sections for 15 minutes with a 0.5 aqueous solution of potassium permanganate, and after washing for the same time with 1 % solution of oxalic acid, wash, and stain in hematoxylin prepared by dissolving 0 1 Gm. of the dye in a little hot water, and when cool adding water up to 80 Cc., 20 Cc. of 10 % aqueous solution of phosphotungstic acid, and last 0 2 % of hydrogen dioxid. Wash in water, dehydrate in alcohol, clear in oil of origanum, and mount in balsam. Nuclei, neuroglia, and fibrin blue; axis-cylinders and ganglion-cells pale pink; connective tissue deep pink. 3 *For connective tissue:* Fix in Zenker's fluid or sublimate and stain the sections for 2 minutes in 0 1 % aqueous solution of acid fuchsin. For further treatment see No. 1. Result: fibrous tissue, mucus, amyloid and hyaline substances, blue; nuclei, cytoplasm, elastin, fibrin, neuroglia, and axis-cylinders, red; erythrocytes and myelin sheaths, yellow. 4. *For nuclei and fibrin:* Stain sections of tissue fixed in any medium except formaldehyde for 3 minutes in 10 % aqueous solution of ferric chloride; drain and dry and stain for 3 minutes in a 1 % aqueous solution of hematoxylin; wash and differentiate in a 0.25 % solution of ferric chloride. Result. nuclei, dark blue; fibrin, gray to dark blue. In sublimate preparations the erythrocytes are greenish gray; connective tissue, pale yellow. 5. *For staining Amœbæ coli in tissues:* Use alcohol material and treat the sections for from 5 to 20 minutes with saturated aqueous solution of thionin; wash, and differentiate for from 30 to 60 seconds in 2 % aqueous solution of oxalic acid; wash, dehydrate, clear, and mount in the usual way. **Mallory's phosphomolybdic-acid hematoxylin.** Mix 10 % solution of phosphomolybdic acid, 1 part; hematoxylin, 1 part, water, 100 parts; chloral, from 6 to 10 parts. Expose to sunlight for a week. Filter before using and save the used portions. Stain sections for from 10 minutes to an hour; wash in 40 to 50 % alcohol, changing it 2 or 3 times. Dehydrate and mount. If the solution does not stain readily, add a little hematoxylin The stain is blue, and in its general effect similar to nigrosin It is recommended for preparations of the central nervous system **Mallory-Wright method** (*for staining tubercle bacilli*) Stain lightly in alum-hematoxylin, then for 2 or 3 minutes in steaming hot carbolfuchsin, decolorize for 30 seconds in acid alcohol **Marchi's method.** Used to demonstrate early degeneration of nerves, prior to sclerosis. After hardening in Mueller's fluid place the tissue in a large quantity of a mixture of Mueller's fluid, 2 parts; 1 % osmic acid, 1 part The degenerated fibers are stained black; the normal are yellow or uncolored **Mayer's carmalum.** Take 1 Gm. of carminic acid, 10 Gm. of alum, and 200 Cc. of distilled water, heat the mixture and filter, adding an antiseptic to keep it clear. The fluid is light red in color, shading toward violet, and is said to have good penetrating powers, even in osmium preparations, and to be better than alum-carmin for staining *in toto* **Mayer's carmalum and indigo-carmin.** Dissolve 0.1 Gm of indigo-carmin in 50 Cc. of distilled water or of 5 % alum solution, add 1 volume of indigo-carmin solution to 4 volumes of carmalum. **Mayer's hemalum.** An excellent stain for large objects. It consists of two solutions—one of hematein, or ammonium hematein, 1 Gm , dissolved by the aid of heat in 50 Cc. of 90 % alcohol; the other of alum 50 Gm. and distilled water 1 liter. The solutions are mixed, left to cool, and then filtered A crystal of thymol may be added to prevent the formation of mold. For most purposes it is advisable to dilute this stain with water or alum solution. Hemalum plus 2 % glacial acetic acid gives a more precise nuclear stain. **Mayer's hemalum and indigo-carmin.** Add 1 volume of a 0 05 % aqueous solution of indigo-carmin to 4 volumes of hemalum. **Mayer's paracarmin.** Dissolve carminic acid, 1 Gm , aluminium chloride, 0.5 Gm., calcium chloride, 4 Gm., in 100 Cc. of 70 % alcohol, with or without heat Filter, after precipitation, and the solution will have a clear red color. Suitable for staining bulky objects with large cavities, such as *Salpa*. **methylene-blue.** An important reagent, which gives a specific stain for lymph-spaces and intercellular cement, closely resembling gold and silver impregnation, for medullated nerves, and for plasma-cells. It also stains *intra vitam*, and is a specific reagent for the axis-cylinders of sensory nerves in living animals (Ehrlich). Small and permeable aquatic organisms may be

stained during life by adding to the water containing them enough of the dye to give it a very pale tint. Nerve-tissue may be stained by injecting the dye into the vascular system of a living, narcotized animal or by removing the organ and immersing it in the solution. From 0.5 to 1 % solutions in physiological salt solution are employed for this purpose The color is not permanent, but may be fixed by ammonium picrate. Parker fixes the color by dehydrating in a solution of mercury bichloride, 1 Gm., in methylol 5 Cc ; washing in a mixture of 2 parts of the methylol and sublimate solution, 1 part pure methylol, 3 parts xylol. The object is then placed in xylol for 4 or 5 days, when it is ready to mount or embed. Mayer's albumin should not be used to fix sections to the slide, as it discharges the color A solution of 0.25 Gm. in 90 % alcohol, 20 Cc., and distilled water, 80 Cc , is used for tissue-staining. A 1% and a saturated alcoholic (15 Gm. to 100 Cc.) solution are used for staining microorganisms. **methyl-green.** This is chiefly used as a nuclear stain for fresh or recently fixed tissues; it is also a reagent for amyloid degeneration (Heschl), giving a violet color. Use 0.5 Gm. of methyl-green in 20 Cc. of 90 % alcohol, 80 Cc. of distilled water, and 1 Cc of acetic acid Stain the tissue for 5 minutes, wash in acidulated water, differentiate in 90 % alcohol, and dehydrate. The nuclein reaction depends on the presence of acetic acid. Arnold recommends a dilute solution of methyl-green containing 0.6% sodium chloride for staining cells and nuclei. Bizzozero has observed that the elements of blood and pus, also ciliated epithelium and spermatozoa, do not stain with methyl-green if the cells are highly alkaline. if the alkalinity is diminished, they are dyed violet; if the cells are acid, they are colored green. Carnoy regards methyl-green as the best stain for nucleoli. **methyl-violet.** A good chromatin stain. Dissolve 0.5 Gm. in 200 Cc. of distilled water and 5 Cc. of glacial acetic acid. Stain sections for 20 minutes, wash in distilled water, and then in equal parts of glycerol and water. Mount in Farrant's medium. This is also a reagent for tissues undergoing amyloid degeneration. The amyloid substance stains pink. 1. (*Alcoholic*) Methyl-violet, 25 Gm.; absolute alcohol, 100 Cc 2 (*Aqueous*) Methyl-violet, 1 Gm.; alcohol, 20 Cc , distilled water, 80 Cc. **muchematein.** A specific stain for mucin. 1. Pulverize 0 2 Gm. of hematin with a few drops of glycerol and then add 0.1 Gm. of aluminum chloride, 40 Cc. of glycerol, and 60 Cc. of water. 2. Dissolve 0.2 Gm. of hematin and 0.1 Gm. of aluminum chloride in 100 Cc of 70 % alcohol. Two drops of nitric acid may be added. **mucicarmin.** A specific stain for mucin. Rub 1 Gm. of carmin in a mortar with 0 5 Gm. of aluminum chloride and 2 Cc. of distilled water; heat for 2 minutes, until the light-red color changes to dark; stir and add a little 50 % alcohol; when dissolved, make up to 100 Cc. with 50 % alcohol, and after 24 hours filter. For use dilute tenfold with water or with 50 % alcohol. **Mueller's Berlin blue.** Precipitate a strong solution of Berlin blue with 90 % alcohol. The fluid is neutral and the precipitate finely divided. **Mueller's fluid.** This agent is very extensively used, as it penetrates well and hardens evenly. It has the following composition: potassium dichromate, 2.5 parts; sodium sulphate, 1 part; water, 100 parts. The addition of a little camphor, chloral, thymol, or naphthalene will prevent the formation of mold. The time required for hardening depends on the size of the object. This fluid diluted to 0.2 % is used as a macerating agent. **Nissl's method** (*for ganglion-cells*). 1. Stain sections of tissue hardened in 10 % formalin or in graded alcohols in hot concentrated aqueous fuchsin solution. 2. Stain in hot 0.5 % methylene-blue; when cool, transfer to a mixture of anilin (20 parts) and 90 % alcohol (200 parts); then treat with origanum oil, then with benzine, and mount in solution of colophonium in benzine. 3. Mount the hardened tissue on cork (without embedding), cut sections and stain them in hot Nissl's methylene-blue; treat with the anilin-alcohol mixture, then with cajeput oil, then as in 2. **Nissl's methylene-blue.** Methylene-blue (B patent), 3 75 parts; Venice soap, 1.75 parts; distilled water, 1000 parts. **nitric acid.** An efficacious agent, which causes no swelling and does not attack the tissue-elements. It is used in 1 and in 10 % solution, the latter for large, hard bones, the former for young bones. The specimens should previously have been fixed in absolute alcohol, and the decalcifying fluid changed daily They must be removed as soon as decalcification is complete or they will become discolored. They are then washed in running water for two hours and preserved in alcohol, which should be renewed in a few days **Nocht's stain** (*for blood*). Original method: Unna's polychrome methylene-blue is neutralized with dilute acetic acid Solution A 1 Cc. of this neutralized polychrome methylene-blue is mixed in a watch-crystal with a saturated aqueous solution of ordinary methylene-blue until its red color disappears and the solution becomes blue. Solution B: Dilute 3 or 4 drops of 1 % aqueous solution of eosin with 1 or 2 Cc. water Add solution A drop by drop to solution B until B is dark blue; a precipitate has then been formed. In this mixture blood-films are to be stained for several hours up to 24 hours. Fix films in alcohol or by heat. Subsequent modification· Solution A: The polychrome methylene-blue solution To a 1 % aqueous solution of methylene-blue add 1 or 0.5 % Na_2CO_3. Heat at 50° C. to 60° C. (122°–140° F.) for several days. Solution B· Dilute 2 or 3 drops of 1 % aqueous solution of eosin with 1 or 2 Cc. water To solution B add solution A drop by drop until the mixture is dark blue and has lost its eosin tint. To stain, float blood-films face down on this mixture for from 5 to 10 minutes. **normal salt solution.** Sodium chloride, 6–7.5 Gm.; distilled water, 1000 Cc. Used in the study of living structures. **paraffin infiltration and embedding.** The initial step in this process consists in the infiltration of the object with a clearing agent; that is, by some substance which is a solvent of paraffin. It is then immersed in melted paraffin until it is thoroughly saturated. The paraffin should be kept just at the melting-point and should be renewed if the object is large. The duration of the bath depends on the size of the object. When this second step in the process is completed, embed in paraffin, as in simple embedding. To prevent crystallization of the paraffin the embedded object should be quickly cooled, which may be done by floating it in the containing receptacle on cold water. **phenol and**

xylol. A mixture of 1 part of phenol and 3 parts of xylol is used to clarify celloidin sections, which may be taken from 70 % alcohol, and do not require further dehydration A layer of previously heated copper sulphate in the bottom of the bottle will keep the mixture free from water **pianese double stain.** Prepare a saturated solution of nigrosin in a saturated alcoholic solution of picric acid, mix 2 volumes of this with 1 volume of anilin water and evaporate in open air The crystals deposited are dissolved in absolute alcohol, and from this solution green crystals are obtained soluble in alcohol, ether, and water For tissues, make a 2% solution in alcohol, for microorganisms, in water Stain sections first in lithium-carmin, treat with acid alcohol, wash, and immerse in an alcoholic solution of picronigrosin until they assume a brown hue Decolorize in oxalic acid Nuclei are stained red, plasma, dark-yellow, cartilage, yellow, connective tissue, pale green, elastic fibers, violet **picric acid.** A fixing agent of great penetration, and, therefore, especially suitable for the preparation of chitinous structures A saturated solution is employed The time required for fixation varies from a minute to a day, and depends on the size of the object Wash out in alcohol and stain in alcoholic solutions **picric alcohol.** A saturated solution of picric acid in 50 % alcohol **picronigrosin.** A solution of 1 Gm of picric acid in 100 Cc of distilled water with the addition of 1 Gm of nigrosin **Plehn's method.** 1 *For the study of the living malarial parasite* Place a drop of fluid paraffin on a slide and a drop on a cover-glass, take up the drop of blood on the latter and so place it on the slide that the blood is between the drops of paraffin Examine on a warm stage The addition of a drop of methylene blue will stain the living organisms 2 *For malarial films fixed in absolute alcohol* Stain for 5 minutes in a mixture of concentrated aqueous solution of methylene-blue, 60 Cc 0 5 % solution of eosin in 75 % alcohol, 20 Cc , distilled water, 20 Cc , and 20 % potash lye, 12 drops **polychrome methylene-blue.** A reddish-violet dye sometimes present as an impurity in commercial methylene-blue, or that develops in old, ripened, or alkaline solutions of methylene-blue It is used for staining cell-granules See *Unna's Method* **potassium permanganate** (*Du Pleiss*) Useful for the study of isolated and very contractile cells, as spermatozoa It is said to kill more radiply than any other agent 2 % osmic acid not excepted A saturated aqueous solution is used It is also used for washing out overstaining with carmin, and in 1 % solution as a mordant for anilin dyes (Henneguy) and for reducing silver impregnations **Rosenberger's method.** 1 *For staining blood* Fix the films by heat or in absolute alcohol or alcohol and ether and stain in a mixture of 10 Cc of a saturated aqueous solution of methylene-blue 4 Cc of a saturated aqueous solution of phloxin, 6 Cc of 95 % alcohol, and 12 Cc of distilled water 2 *For staining the tubercle bacillus* The essential point in this process is the use of sweet spirit of niter for bleaching, it is also mixed with alcoholic solutions of methylene-blue, malachite green, Bismarck brown, and gentian-violet. **safranin.** *Pfitzner's formula:* Safranin (Grübler's), 1 part, absolute alcohol 100 parts, water, 200 parts *Flemming* uses a concentrated alcoholic solution diluted one-half with water *Babes' formula* (*a*) Equal parts of a concentrated alcoholic and a concentrated aqueous solution, (*b*) water, 100 parts, anilin oil, 2 parts, safranin, in excess The latter may be used according to the method of Gram, and is recommended for the demonstration of mitotic figures **Scheele's green mass.** (*a*) Mix 80 Cc of a saturated solution of potassium arseniate and 50 Cc of glycerol (*b*) Take 40 Cc of a saturated solution of copper sulphate and 50 Cc of glycerol Combine the two solutions with three volumes of the vehicle **substantive staining** A histological stain obtained by direct absorption of the pigment from the solution in which the tissue is immersed Dyes that combine directly with the substance acted on are called substantive dyes **subtractive staining.** A socalled theory of Heidenhain s based on the hypothesis that a general stain satisfies the affinities of some cell structures, that hold it in subsequent treatment with specific dyes, while the other structures give up the general stain and then take the specific stain **sudan III** A selective stain for fat Prepare a saturated solution in 95 % alcohol, dilute two thirds with 50 % alcohol, and filter Stain sections for from 5 to 10 minutes, wash for about the same time in 60 or 70 % alcohol, and mount in glycerol Small oil-drops yellow, large ones orange For staining the fat granules in the elements of tissues undergoing fatty degeneration use the undiluted stain The tissue may be fixed in Mueller s fluid or cut fresh on the freezing microtome **thionin.** The uses and technique are the same as for methylene-blue A saturated solution in 50 % alcohol diluted with 5 volumes of water is used for staining **Thoma's method** (*for the numeration of leukocytes*). Dilute the blood in the proportion of 1 10 with water containing 0 3 % anhydrous acetic acid This dissolves the colored blood-cells **Unna's hematoxylin.** A constant half-ripe stock solution Hematoxylin, 1 Gm , alum, 10 Gm , alcohol, 100 Cc , water, 200 Cc , sublimed sulphur, 2 Cc If the sulphur is added 2 or 3 days after preparing the hematoxylin solution, it will arrest oxidation and the stain will be ready for use at this stage The oxidation of alum-hematoxylin solutions can be instantaneously accomplished by adding a little neutralized hydrogen dioxid **Unna's method.** *For collagen:* 1 Stain sections of alcohol material for 5 minutes in strong solution of polychrome methylene-blue, then for 15 minutes in neutral 1 % solution of orcein in absolute alcohol, wash in alcohol, bergamot, balsam Collagen, dark red, nuclei, blue, granules of mast-cells, carmin red, cytoplasm of plasma-cells, blue 2 Stain sections for 20 seconds in 1 % solution of water-blue (Wasserblau), wash and stain for 5 minutes in neutral aqueous 1 % solution of safranin, wash in water and then treat with absolute alcohol until the blue color reappears, collagen, sky-blue, nuclei, red, cytoplasm, violet 3 *For collagen, elastin, and smooth muscle:* Stain with hot orcein for 10 minutes, wash in dilute alcohol, stain with hematein for 10 minutes, and treat for a few seconds with acid alcohol, wash, and place in a 2 % solution of acid fuchsin for 5 minutes, in saturated aqueous solution of picric acid for 2 minutes, then in saturated alcoholic solution of picric acid for 2

minutes; absolute alcohol; oil; balsam. Elastin, brown-red; collagen, red; muscle-fibers, yellow with gray-violet nuclei. 4. *For elastin and smooth muscle:* Stain as in 3, substituting polychrome methylene-blue for hematein and 1 % potassium permanganate for the acid alcohol. Elastin, brown-red; collagen, decolored; muscle-fibers, violet. 5. *For smooth muscle:* Stain sections for 10 minutes in polychrome methylene-blue; wash, and fix in 1 % red prussiate of potash, differentiate in acid alcohol for 10 minutes; absolute alcohol; oil; balsam. The collagen is decolored. 6. *For keratohyalin:* Overstain in hematoxylin, treat for 10 seconds with 0.5 % solution of potassium permanganate, and wash in alcohol; or place the stained sections in 33 % solution of iron sulphate for 10 seconds, or in 10 % solution of iron chloride. 7 *For epithelia:* Stain sections for 10 minutes in neutral aqueous 1 % solution of water blue; wash, and stain for 10 minutes in 1 % solution of orcein. Or overstain sections of alcohol material in polychrome methylene-blue and differentiate in Unna's glycerol-ether mixture (Grübler); or in a mixture of alcohol, 10 parts, xylol, 15 parts; anilin, 25 parts; and transfer to xylol; or in a mixture of xylol, 30 parts, alcohol, 20 parts, then transfer to xylol and then to anilin containing alum to saturation (agitated and filtered before using). 8. *For plasma-cells and mast-cells:* Apply the methods for epithelia. 9. *For overcoming the decoloration of bacteria in the process of dehydrating in alcohol:* Transfer the section from the decolorizing fluid to the slide, remove as much as possible of the water by means of filter-paper, and then heat the slide over flame until the section is dry; when cold, mount in balsam. **Waldeyer's method** (*for the fixing and decalcification of bone*). Fix the fresh object in chromium trioxide (1 600); decalcify in a mixture of chromium trioxide (1·200) 100 Cc. and nitric acid 2 Cc. Wash thoroughly and harden in alcohol. **Weigert's differentiating fluid.** Borax, 2 Gm.; potassium ferricyanide, 2 5 Gm.; distilled water, 200 Cc. Used after hematoxylin. **Weigert's method.** 1. *For fibrin:* Make celloidin sections and stain one minute in Weigert's fibrin stain (5 % solution of gentian-violet, 4 4 Cc.; 96 % alcohol, 6 Cc.; anilin oil, 1 Cc.). Dry with unsized printing paper and add a drop of Gram's solution saturated with iodine. Most of the stained parts are decolorized. Remove the iodine with printing paper; clear in equal parts of anilin oil and xylol, renewing it until all the water is removed. The water gives the section a white appearance. Dry with filter-paper, wash well with xylol, and mount in xylol balsam. 2. *For neuroglia:* Fix for 8 days in the following mixture: dissolve 2.5 Gm. chrome alum in 100 Cc. water, by heat, and while hot add 5 parts of acetic acid and pulverized copper acetate, when cold, 10 parts of formalin. Embed in celloidin. Treat the sections for 10 minutes with 0.3 % solution of potassium permanganate, wash in water, and reduce in the following: 5 parts each of chromogen and formic acid in 100 parts of water, to which, after filtering, add 10 parts of a 10 % solution of sodium sulphite. After 3 hours transfer to 5 % chromogen and after 24 hours stain in the following: saturate hot 75 % alcohol with methyl-violet, decant when cold, and to each 100 Cc add 5 Cc. of 5 % aqueous solution of oxalic acid; differentiate in a saturated solution of iodine in 5 % solution of potassium iodide; decolorize in a mixture of equal volumes of anilin and xylol, wash in xylol, and mount in balsam. 3. *Without decolorizing:* Tissues hardened in Mueller's fluid and alcohol are embedded in celloidin, and then put into a mixture of equal parts of a 10 % solution of sodium-potassium tartrate and a cold saturated solution of copper acetate, which is kept at from 38° to 40° C. (86°–104° F.). They are next placed in a half-saturated solution of copper acetate at the same temperature for 48 hours. The blocks, rinsed in water, may be kept in 80 % alcohol and cut at any time The staining fluid is composed of 1 part of an alcoholic hematoxylin solution (1.10) and 9 parts of a saturated solution of lithium carbonate; this fluid is to be freshly made. Stain for from 4 to 12 hours; wash, dehydrate in 90 % alcohol, and clear in anilin xylol (2 1), then in pure xylol, and mount in xylol balsam. The advantage of the method is the clearness with which the fine medullated fibers are distinguished from the cells and other parts, and it is less tedious than the old method **Wright's stain** (*for blood*). Preparation of the neutral stain. Solution A: Make a 0.5 % aqueous solution of the $NaHCO_3$, being careful to bring all the salt into solution before going on to the next step. Then add 1 % of methylene-blue (Grübler's methylene-blue, "Bx," "Koch," or "Ehrlich's rectified"). Steam this in an Arnold sterilizer for 1 hour after steam is up. Cool. Solution B 0.1 % aqueous solution of eosin (Grubler, "yellowish, soluble in water"). Add solution B to solution A until the mixture becomes purple, a metallic scum forms on the surface, and a finely granular black precipitate appears in suspension. (About 500 Cc. of solution B to 100 Cc of solution A.) Filter off the precipitate. Do not wash it. Dry. Preparation of the staining solution. Make a saturated solution of the precipitate in pure methyl-alcohol (0.3 Gm. in 100 Cc. methyl-alcohol). Filter, and add an additional 25 % of the original volume of methyl-alcohol used. This prevents precipitation of the stain on the film. Cover the film with the stain for 1 minute. Without pouring off the stain add water drop by drop until the mixture is translucent at the edges and a yellowish metallic scum forms on the surface. Stain in this diluted stain for 2 to 3 minutes. Wash in distilled water until the film becomes pink. Dry between filter-papers. Staining reactions. Lymphocytes: nuclei, dark purplish-blue; cytoplasm, robin's egg blue; large mononuclears· nuclei, blue; cytoplasm, pale blue; polymorphonuclear neutrophils: nuclei, blue; granules, reddish-lilac; eosinophils: nuclei, blue; granules, blue; mastzellen: nuclei, blue to purplish; granules, dark blue or purple; myelocytes: nuclei, dark blue or lilac; granules, dark or reddish-lilac: blood-platelets stain blue or purplish; malarial parasites: nuclei, chromatin portion, lilac-red to black; cytoplasm, blue. **xylol.** Used for paraffin and celloidin sections. It causes shrinkage if the sections are not thoroughly dehydrated. **Zenker's fluid.** Dissolve 25 Gm. potassium dichromate, 10 Gm. sodium sulphate, and 50 Gm. mercuric chloride in 1000 Cc. warm distilled water. At the time of using add to each 20 Cc. 1 Cc. of glacial

acetic acid Fix the tissue for from 25 to 48 hours, wash for 24 hours in running water Harden in the dark in the ascending series of alcohols For the removal of the precipitate add to the 90% alcohol enough tincture of iodine to impart the color of port-wine, and repeat the addition daily until the color does not fade Preserve in 90% alcohol **Ziehl-Neelsen method.** Float the cover-glass preparation upon Ziehl's carbolfuchsin, heat until vapor arises (about 3 to 5 minutes), wash in water and decolorize in 15% nitric or 5% sulphuric acid, then in 60 to 80% alcohol to remove the remnant of color Wash well, dry, and mount in balsam In the case of tissue-sections, stain cold for 15 minutes and decolorize as detailed, upon removal from the alcohol counterstain with methylene blue, wash, dehydrate, clear, and mount

staining, in vitro method of. A method of studying, under the microscope, the diffusion into living cells of dyes contained in agar jelly spread on glass slides

staircase (*stār'-kās*) [ME, *staire*, stair, *case*] A continuous series of responses to nerve-stimuli, varying from a minimal intensity to a maximum intensity (Romanes) See *summation*

stairs sign. Difficulty in descending stairs, one of the early symptoms of locomotor ataxia

stalagmometer (*stal-ag-mom'-et er*) [σταλαγμός, a dropping, μέτρον, a measure] An instrument for measuring the size of drops or the number of drops in a given volume of liquid It is used to measure the surface tension of liquids

stalagmometry (*stal-ag mom'-et re*) [*stalagmometer*] A method of diagnosis based upon the determination of the relative degree of surface tension or capillarity possessed by the body-fluids

stalk (*stawk*) [ME, *stalken*] Any lengthened support to an organ

staltic (*stal'-tik*) [στάλσις, constriction] Styptic,

stamen (*stā'-men*) The pollen-bearing organ of the flower, when complete consisting of a stalk of filament and a pollen-sac or anther

stamina (*stam'-in-ah*) Natural strength of constitution Vigor Inherent force

staminode (*stam'-in-ōd*) Same as *staminodium*

staminodium (*stam-in-o'-de-um*) [στημων a thread, εἶδος form] In biology, a stamen like organ, a rudimentary or aborted stamen, a parastemon See *lepal*

stammer (*stam'-er*) [AS, *stamur*, stammering] To speak interruptedly or with hesitation

stammering (*stam'-er-ing*) Interrupted or hesitating speech **s bladder.** See *bladder, stammering*

stamper (*stamp'-er*) A name for one affected with locomotor ataxia from the stamping gait incident to it

stamp-licker's tongue. An inflammatory condition of the mouth occurring in those who moisten stamps or other labels with the tongue

stanch (*stanch*, or *stawnch*) [ME, *staunche*, stanch] To check or stop (a flow), as to stanch a hemorrhage or a wound

stand. To have an upright posture Also, a frame or a table to place things upon **s., microscope,** the tripod or base of the microscope with the tube, but without eye-pieces and objectives

standard (*stan'-dard*) [*extendere*, to spread out]. 1 An established rule or model 2 Something used for comparison **s. candle,** a spermaceti candle used as a standard of light, it burns at the rate of 2 gr a minute **s. solution,** a solution containing a definite quantity of a reagent

standardization (*stan dar-diz-a'-shun*) Regulation by a standard, conformity to or use as a standard of comparison, the bringing of a preparation up to a definite standard

standstill (*stand'-stil*) A state of quiescence dependent upon suspended action **s., expiratory,** suspension of action at the end of expiration **s., inspiratory,** a halt in the respiratory cycle at the end of inspiration when the lungs are filled with air The condition can be produced by stimulating the central end of the cut vagus **s., respiratory,** suspended respiration

Stange's test (*stahng'-ah*) Same as *Henderson's test, q v*

stannate (*stan' āt*) A salt of stannic acid

stannic (*stan'-ik*) [*stannum*] 1 Pertaining to stannum, or tin 2 Containing tin as a tetrad element **s acid,** H_2SnO_3 A gelatinous white precipitate which on drying, forms a translucent vitreous mass It is dibasic **s chloride,** $SnCl_4$, a thin white liquid

stanniferous (*stan if'-er-us*) [*stannum, ferre*, to bear] Yielding or containing tin

stannite (*stan' īt*) Tin sulphide, bell metal

Stannius' ligature, or **experiments** (*stan' e us*) [Herman Friedrich *Stannius*, German physiologist, 1808–1883] 1 Separation by a ligature of the sinus venosus from the remainder of the frog's heart causes the latter to remain distended in diastole, while the former continues its rhythmic pulsations Mechanical excitation of the auricle or ventricle produces a single contraction which is repeated only when a new stimulus is applied 2 If a ligature is placed around the groove dividing the auricles from the ventricle, there occurs a rhythmic contraction of the ventricle, while the auricles remain quiescent

stannous (*stan'-us*) Containing tin as a bivalent element

stannoxyl (*stan-oks'-il*) [*stannum*, tin, *oxide*] Trade name of a preparation containing metallic tin and oxide of tin

stannum (*stan' um*) [L] Tin see *tin* **s cinereum,** bismuth **s glaciale,** bismuth **s. indicum,** zinc

stanolind (*stan'-o-lind*). Trade name of a brand of paraffin used for films or surgical dressings.

stapedectomy (*sta-pe-dek'-to-me*) [*stapes* ἐκτομή, excision] Excision of the stapes

stapedial (*sta-pē'-de-al*) [*stapes*] 1 Shaped like a stirrup 2 Relating to the stapes

stapediotenotomy (*sta-pe-di-o ten-ot'-om-e*) [*stapes*, tenotomy] Cutting of the tendon of the stapedius muscle

stapediovestibular (*sta-pe-de-o-ves-tib'-ū-lar*) [*stapes, vestibulum*, vestibule] Relating to the stapes and the vestibule

stapedius (*sta-pē'-de-us*) [*stapes*] See under *muscle*

stapes (*stā'pēz*) [L, "a stirrup"] The stirrup-shaped bone of the middle ear, articulating with the incus and the fenestra ovalis

staphisagria (*staf-is-ag'-re-ah*) [σταφίς, a dried grape, ἄγριος, wild] Stavesacre The *staphisagria* of the U S P is the ripe seed of *Delphinium staphisagria*, of the order *Ranunculaceæ*

It contains the alkaloids *delphinine*, $C_{28}H_{37}NO_6$, *delphinoidine*, $C_{21}H_{33}N_2O_7$, *delphisine*, $C_{17}H_{31}N_2O_4$, and *staphisagrine*, $C_{32}H_{33}NO_6$. It has been used locally as an application in rheumatism, and as an ointment to destroy lice and itch-mites. **s., fluidextract of** (*fluidextractum staphisagriæ*, U. S. P.). Dose 1 min. (0.06 Cc.).

staphisagrine (*sta-fis-a'-grēn*) [σταφίς, dried grape; ἄγριος, wild]. An amorphous alkaloid obtained from staphisagria.

staphylagrum, staphylagra (*staf-il-a'-grum, staf-il-a'-grah*) [σταφυλή, uvula; ἀγρεῖν, to take hold of]. An instrument formerly used to hold the uvula during amputation of that body.

staphyle (*staf'-i-le*) [σταφυλή, a bunch of grapes]. The uvula

staphylectomy (*staf-il-ek'-to-me*) [σταφυλή, the uvula; ἐκτομή, excision]. Removal of the uvula or soft palate.

staphyledema (*staf-il-e-de'-mah*) [*staphylo-*; *edema*]. Edema of the uvula Any morbid enlargement of the uvula.

staphyleus (*staf-il-e'-us*) [σταφυλή, the uvula]. Pertaining to the uvula.

staphylhematoma, staphylhæmatoma (*staf-il-hem-at-o'-ma*) [σταφυλή, uvula; αἷμα, blood; ὄμα, tumor]. An extravasation of blood into the uvula.

staphyline (*staf'-il-in*) [σταφυλή, uvula]. Pertaining to the uvula or to the entire palate. **s. glands.** Synonym of *palatine glands*.

staphylinopharyngeus (*staf-il-i-no-far-in'-je-us*) [*staphyle; pharynx*]. 1. Relating to the palate and pharynx. 2. The palatopharyngeus. See under *muscle*.

staphylinus (*staf-il-i'-nus*) [*staphyle*]. 1 Palatal. 2. See *s. medius*. **s. externus**, the tensor palati. **s. internus**, the levator palati. **s. medius**, the azygos uvulæ muscle See under *muscle*

staphylion (*staf-il'-e-on*) [σταφυλή, uvula]. The middle point of the posterior nasal spine

staphylitis (*staf-il-i'-tis*) [*staphyle*; ιτις, inflammation]. Inflammation of the uvula.

staphylo- (*staf-il-o-*) [σταφυλή, uvula]. A prefix denoting pertaining to the uvula.

staphyloangina (*staf-il-o-an'-jin-ah*). Walsh's term of pseudomembranous inflammations of the throat due to infection by staphylococci.

staphylococcal (*staf-il-o-kok'-al*). Pertaining to, or caused by, staphylococci.

staphylococcemia, staphylococcæmia (*staf-il-o-kok-se'-me-ah*) [*staphylococcus*; αἷμα, blood]. A morbid condition due to the presence of staphylococci in the blood.

staphylococcia (*staf-il-o-kok'-se-ah*). General infection with staphylococci

staphylococcic (*staf-il-o-kok'-ik*). Pertaining to, or caused by staphylococci.

Staphylococcus (*staf-il-o-kok'-us*) [σταφυλή, grape; κόκκος, berry]. A micrococcus; a genus of *Schizomycetes* in which the cocci are irregularly clustered like a bunch of grapes. See *Micrococci, table of*.

staphylocosis (*staf-il-o-ko'-sis*). Infection by staphylococci.

staphylodermatitis (*staf-il-o-der-mat-i'-tis*). Dermatitis due to staphylococci.

staphylodialysis (*staf-il-o-di-al'-is-is*) [*staphylo-*; διάλυσις, relaxation]. Relaxation of the uvula.

staphylohemia, staphylohæmia (*staf-il-o-he'-me-ah*). See *staphylococcemia*.

staphylolysin (*staf-il-ol'-is-in*) [*staphylococcus*; λύειν, to loosen]. Neisser and Wechsberg's name for a hemolysin produced by *Staphylococcus aureus* and *S. albus*.

staphyloma (*staf-il-o'-mah*) [σταφύλωμα, a defect in the eye]. A bulging of the cornea or sclera of the eye. **s. æquatoriale, s. æquatoris, s., equatorial,** staphyloma of the sclera in the equatorial region. **s., annular,** one surrounded on all sides by atrophic choroid. **s., anterior.** See *keratoglobus*. **s., ciliary,** one in the region of the ciliary body. **s. corneæ,** a bulging of the cornea due to a thinning of the membrane with or without previous ulceration **s., intercalary,** one developing in that region of the sclera which is united with the periphery of the iris. **s., posterior, s. posticum,** a backward bulging of the sclerotic coat at the posterior pole of the eye. **s., Scarpa's,** posterior staphyloma; staphyloma of the posterior segment of the sclera. **s. uveale,** thickening of the iris. Syn., *iridoncosis*.

staphylomatic, staphylomatous (*staf-il-o-mat'-ik, staf-il-o'-mat-us*). Pertaining to, of the nature of, or affected with, staphyloma.

staphylomycosis (*staf-il-o-mi-ko'-sis*) [*staphylococcus, mycosis*]. A morbid condition due to staphylococci.

staphyloncus (*staf-il-ong'-kus*) [σταφυλή, uvula; ὄγκος, tumor]. Swelling of the uvula.

staphylo-opsonic index (*staf-il-o-op-son'-ik*). The opsonic index in relation to a staphylococcus infection.

staphylopharyngeus (*staf-il-o-far-in'-je-us*). The pharyngopalatinus muscle.

staphylopharyngorrhaphy (*staf-il-o-far-in-gor'-af-e*) [*staphylo-, pharynx*; ῥαφή, a suture]. See *Passavant's operation*

staphyloplasmin (*staf-il-o-plaz'-min*) [*staphylococcus; plasmin*] Staphylococcus toxin.

staphyloplasty (*staf'-il-o-plas-te*) [*staphylo-*; πλάσσειν, to mold]. A plastic operation on the soft palate or uvula

staphyloptosis (*staf-il-op-to'-sis*) [*staphylo-*; πτῶσις, falling]. Abnormal elongation of the uvula.

staphylorrhaphy (*staf-il-or'-a-fe*) [*staphylo-*; ῥαφή, suture]. Suture of a cleft soft palate.

staphylostreptococcia (*staf-il-o-strep-to-kok'-se-ah*). Infection by both staphylococci and streptococci.

staphylotome (*staf'-il-o-tōm*) [*staphylo-*; τομή, a cutting]. A cutting instrument used in staphylotomy.

staphylotomy (*staf'-il-ot-o-me*) [*staphylo-*; τομή, a cutting]. 1. The operation of incising or removing the uvula 2. The operation of incising a staphyloma.

staphylotoxin (*staf-il-o-toks'-in*). See *staphylolysin*.

staphylygroma (*staf-il-ig-ro'-mah*) [σταφυλή, the uvula; ὑγρός, wet]. Synonym of *staphyledema*.

staphysina (*staf-is-i'-nah*) [σταφίς, a dried grape]. A product obtained by Thompson from the seeds of *Delphinium staphisagria*.

star [ME., *starre*]. In biology applied to various radiate structures, granules, cells, groups of cells, or organisms. **s.-anise.** See *illicium*. **s.-cells,** endothelial cells of vessels, first described by Kupffer, and regarded as nervous elements on account of their shape and thin, elongated processes, but afterward shown to belong to the endothelial tissues; they have the power of inclosing various granules. Syn., *Kupffer's cells*. **s., daughter-.** See *diaster*. **s.-grass.** See *aletris*. **s.s of Verheyn,** the star-shaped figures formed by the stellate veins of the **kidney,** beneath the capsule. **s. operation,** for *trans-*

versely lacerated perineum, after denudation of a transverse strip, a median triangular or bilateral figure is denuded across the transverse strip **s.s., Winslow's,** capillary whorls which form the beginning of the vorticose veins of the choroid Syn, *Stellæ vasculosæ winslowii*

starblind [AS, *stærblind*] Half blind, blinking

starch [AS, *stearc* stiff] A carbohydrate $(C_6H_{10}O_5)_n$, widely distributed in the vegetable kingdom, occurring in peculiar concentrically marked granules or grains When heated with water, the granules swell up, burst, partially dissolve, and form starch paste The soluble portion is called granulose, the insoluble is cellulose Iodine produces a characteristic blue coloration with starch The most important varieties of starch are potato-starch, leguminous starch, wheat-starch (*amylum*, U S P, B P), sago-starch, rice-starch **s., animal.** 1 See *glycogen* 2 See *bodies, amylaceous* **s, corn-** See *corn-starch* **s -enema,** an enema consisting of starch-water **s., glycerite of.** See *amyli, glyceritum*, under *amylum* **s, iodized,** iodide of starch, a dark powder containing 2 % of iodine, a disinfectant and internal and external antiseptic Dose 3–10 gr (0 2–0 66 Gm) **s, soluble,** a white powder obtained by heating starch and glycerol and adding strong alcohol during the cooling, used as an emulsifier Syn, *amylodextrin* **s.-water,** wheat-starch and water, used chiefly as an emollient enema

Starck's position (*stark*) The patient is placed on his right side with the head thrown back (used in esophagoscopy)

starter (*start' er*) [ME, *starten* to start] A pure culture of bacteria employed to start some particular fermentation, as in the ripening of cream

Startin's bandage (*star' tin*) A bandage impregnated with a mixture of paraffin and stearin

Startin's mixture (*star'-tin*) Magnesium sulphate 4 drams, dried iron sulphate 1 dram, dilute sulphuric acid 3 drams, syrup of ginger 6 drams, water to 3 ounces, dose 1 dram in water

starvation (*star-va'-shun*) [AS, *steorfan*, to die] Deprivation of food, the state produced by deprivation of food **s treatment,** *in diabetes* certain days of fasting followed by limited diet with very little carbohydrate

stasibasiphobia (*sta-se-ba-se fo' be ah*) [στασις standing, βάσις a step, walk φόβος fear] A peculiar fear in consequence of which the act of walking or of standing becomes impossible

Stas's process (*stahs*) See *Stas Otto method*

stasimetry (*stas-im' et re*) [*stasis, μετρον* a measure] Bitot's term for the estimation of the consistence of soft organic bodies

stasimorphy (*stas'-e-mor fe*) [*stasis μορφη* form] Deviation from the normal from arrest of development

stasiphobia (*stas-i-fo'-be-ah*) [*stasis, φόβος*, fear] Fear of standing upright

stasis (*sta'-sis*) [στάσις, from ἱστάναι, to stand] A standstill of the current of any of the fluids of the body, especially of the blood **s., diffusion,** stasis in which there occurs diffusion of serum or lymph **s., intestinal,** an undue delay in the passage of fecal material along the intestines **s., venous,** stasis due to venous congestion

Stas-Otto method (*stahs'-ot'-o*) [Jean Servais *Stas*, Belgian chemist, 1813–1891] A method of extracting the putrefactive alkaloids from tissues. It depends upon the fact that the salts of the alkaloids are soluble in water and in alcohol, and generally insoluble in ether, and may be removed from alkaline fluids by agitation with ether The method is applied as follows 'Treat the mass with twice its weight of pure 90% alcohol, and from 10 to 30 gr of tartaric or oxalic acid, digest the whole for some time at about 70° C and filter Evaporate the filtrate at a temperature not exceeding 35° C, either in a strong current of air or in vacuo over sulphuric acid Take up the residue with absolute alcohol, filter, and evaporate again at a low temperature Dissolve the residue in water, alkalinize with sodium bicarbonate, and agitate with ether After separation remove the ether and allow it to evaporate spontaneously The residue may be further purified by redissolving in water and again extracting with ether The method has been modified in some of its details, especially by Selmi and Marino Zuco

state (*stāt*) [*status, stare*, to stand] A condition **s. medicine,** that department of medical study that concerns public health, and is in part occupied with the statistics of disease

statement (*stāt'-ment*) [*stare*, to stand] A declaration **s, ante-mortem,** a declaration made immediately before death and which if made with the consciousness of impending death is legally held as binding as a statement sworn to.

static (*stat'-ik*) [στατικός, causing to stand] At rest In equilibrium **s ataxia.** See *ataxia.* **s. breeze,** a method of administration of static electricity, consisting in the withdrawal of a static charge from a patient by means of a pointed electrode. **s. electricity.** See *electricity* **s pelvis,** the bony pelvis **s shock,** a mode of applying Franklinic electricity, placing the patient on an insulated stool, and applying one pole of a static machine to this platform, while the other pole is applied to the body of the patient by the operator **s. test,** this consists in ascertaining the *absolute* weight of the lungs and comparing this weight with the average lung-weights of still born children, and of children who have died soon after birth Foderé fixes the weight of the lungs of still born children born at term at 480 gr, and 960 gr as the weight of the lungs soon after breathing has been established This test is of but slight value **s. theory** (*of Goltz*) every position of the head causes the endolymph of the semicircular canals to exert the greatest pressure upon some part of the canals, thus in varying degree exciting the nerve terminations of the ampullæ

Statice (*stat'-is-e*) [στατική, an astringent herb] A genus of plants of the order *Plumbagineæ* *S antarctica* and *S brasiliensis*, baycuru or guaycura, South American species, are used to produce uterine contractions *S gmelini*, a species indigenous to southern Russia, is used as a gargle and in diarrhea *S limonium* grows upon the coasts of Europe and North America, the entire plant is used as an astringent

statics (*stat'-iks*) [see *static*] The science relating to forces in a condition of equilibrium

statim (*stat-im*) [L] Immediately, at once

station (*sta'-shun*) [*statio*, from *stare*, to stand] 1 Standing position or attitude 2 In obstetrics, the location of the head or presenting part, *e g*, it may be the outlet of the pelvis, or above the inlet **s.-test,** the patient is made to stand with his eyes shut and feet together, an unusual swaying of the body denotes ataxia

stationary (*sta'-shun-a-re*) [see *station*]. Standing still; not moving **s. air,** the amount of air which is constantly in the lungs during normal respiration.

statistics (*sta-tis'-tiks*) [*status*, a state]. A numerical collection of facts relating to any subject. **s., medical,** that part of medicine pertaining to details of mortality, climate, and the geographical distribution of diseases. **s., vital.** Same as *s., medical*

statocyst (*stat'-o-sist*) [στατός, standing; κύστις, cyst]. One of the vestibular sacs of the labyrinth which is supposed to act as the nervous mechanism on which static equilibrium depends.

statometer (*stat-om'-et-er*) [στατός, standing; μέτρον, a measure]. An instrument for measuring the degree of exophthalmos.

stature (*stat'-ūr*) [*statura*, stature]. The height of any animal when standing. In quadrupeds, it is measured at a point over the shoulders In man, it is the measured distance from the heel to the top of the head.

status (*sta'-tus*) [L]. A state. **s. arthriticus,** the nervous manifestations preceding an attack of gout **s. catarrhalis,** a condition characterized by a succession of catarrhs or chronic catarrhal processes. **s. cribrosus,** a scarcely macroscopic sieve-like condition of the brain or nerve-substance, due to absorption of minute vessels; observed in autopsies. Fr., *état criblé*. **s. epilepticus,** a condition in which epileptic attacks occur in rapid succession, the patient not regaining consciousness during the interval. **s. gastricus,** gastritis **s. hypoplasticus.** See **s. lymphaticus. s. lymphaticus,** a condition in which all the lymphatic tissues, the thymus, the spleen, and the bone marrow are hyperplastic; sudden death is liable to occur especially in surgical anesthesia Syn , *lymphatism; lymphotoxemia; status thymicus* **s. parathyreoprivus,** a pathological state caused by complete loss of parathyroid tissue. **s. præsens,** the state of a patient at the time of examination. **s. raptus,** ecstasy. **s. thymicolymphaticus, s. thymicus.** See *s lymphaticus*. **s. typhosus.** See *typhoid state* **s. verminosus.** See *helminthiasis*. **s. vertiginosus,** persistent vertigo

statuvolence (*sta-tū-vo'-lens*) [*status*, state, *volens*, willing]. Autohypnotism; voluntary somnambulism or clairvoyance; a trance into which one voluntarily enters without aid from another.

statuvolent (*sta-tū-vo'-lent*). Pertaining to, or characterized by, statuvolence.

staurion (*staw'-re-on*) [σταυρός, cross]. The craniometric point where the transverse palatine suture crosses the median suture.

stauroplegia (*staw-ro-ple'-je-ah*) [σταυρός, crossed; πληγή, a stroke] Crossed hemiplegia.

stave of the thumb. See *Bennett's fracture.*

stavesacre (*stāvz-a'-ker*). See *staphisagria.*

staxis (*staks'-is*). See *stillicidium.*

stay knot. See *knot.*

steam (*stēm*). The vapor of water; water in a gaseous state. **s.-atomizer.** See *atomizer.* **s.-doctor,** an old name for a Thompsonian physician, from the extensive use of steaming and sweating made by that school. **s.-tug murmur,** the double murmur of aortic obstruction and insufficiency It may be expressed by the word *hoo-chee, hoo* representing the obstructive murmur, and *chee* the regurgitant murmur.

steapsin (*ste-ap'-sin*) [στέαρ, fat]. A ferment of the pancreatic juice which causes fats to combine with an additional molecule of water and then split into glycerin and their corresponding acids; lipase.

stear (*ste'-ar*) [στέαρ, fat]. See *adeps.*

stearate (*ste'-ar-āt*) [*stearin*]. A salt of stearic acid Glycerol stearate is called stearin (*q. v.*).

stearerin (*ste-ar'-er-in*) [στέαρ, fat]. A fatty substance found in the oil of sheeps' wool and which is analogous to stearin.

stearic acid (*ste-ar'-ik*). See *acid, stearic,* and *stearin.*

steariform (*ste-ar'-if-orm*) [στέαρ, fat; *forma*, form]. Having the appearance of or resembling fat.

stearin (*ste'-ar-in*) [στέαρ, fat], $C_3H_5O_3(C_{18}H_{35}O_2)_3$. 1. A compound of stearic acid and glyceryl occurring in the harder animal fats, especially in tallow It crystallizes in white, pearly scales. 2. Stearic acid.

stearoconotum (*ste-ar-ok-on-o'-tum*) [στέαρ, fat; κόνις, dust]. An insoluble but fusible solid yellowish fat occurring in brain tissue; it contains sulphur and phosphorus.

stearodermia (*ste-ar-o-der'-me-ah*) [στέαρ, fat; δέρμα, the skin]. An affection of the sebaceous glands of the skin

stearodine (*ste-ar'-o-din*). Trade name of a preparation of calcium iodostearate; used in prophylaxis of goiter.

stearol (*ste'-ar-ol*) [στέαρ, fat]. A medicament having fat as an excipient.

stearone (*ste'-ar-ōn*) [στέαρ, fat], $C_{35}H_{70}O$. A volatile liquid obtained by partial decomposition of stearic acid.

stearoptene (*ste-ar-op'-tēn*) [στέαρ, fat; πτηνός, winged; volatile]. The crystalline substance occurring naturally in solution in a volatile oil.

stearosan (*ste'-ar-o-san*). Trade name for santalyl stearate, used as a substitute for oil of santal in genitourinary affections of a catarrhal type.

stearrhea, stearrhœa (*ste-ar-e'-ah*) [στέαρ, fat; ῥοία, a flow]. See *seborrhea.* **s. congestiva.** Synonym of *seborrhœa congestiva.* **s. flavescens,** a seborrhea in which the sebaceous matter turns yellow after being deposited upon the skin. **s. nigricans.** See *chromidrosis.* **s. simplex,** ordinary seborrhea.

stearyl (*ste'-ar-il*) [στέαρ, fat; ὕλη, matter], $C_{18}H_{35}O$. The radical of stearic acid.

steatin (*ste'-at-in*) [στεάτινον, pertaining to suet]. 1. Same as *stearin.* 2. Any cerate containing a considerable proportion of tallow.

steatinum (*ste-at-i'-num*) [στεάτινον, pertaining to suet] A name given to certain pharmaceutical preparations similar to cerates.

steatite (*ste'-at-īt*). See *talc.*

steatitis (*ste-at-i'-tis*) [στέαρ, fat]. Inflammation of the fatty tissues.

steato- (*ste-at-o-*) [στέαρ, fat]. A prefix for fatty.

steatocele (*ste'-at-o-sēl*) [*steato-*; κήλη, tumor]. A fatty swelling in the scrotum.

steatocryptosis (*ste-at-o-krip-to'-sis*) [*steato-*; κρύπτη, a crypt, or sac] Abnormality of function of the sebaceous glands.

steatodes (*ste-at-o'-dēz*) [στέαρ, fat; εἶδος, resemblance]. Fatty.

steatogenous (*ste-at-oj'-en-us*) [*steato-*; γενής, produced]. Producing steatosis.

steatolysis (*ste-at-ol'-is-is*) [*steato-*; λύσις, solution]. The emulsifying process by which fats are prepared for absorption and assimilation.

steatolytic (*ste-at-o-lit'-ik*). Relating to steatolysis.

steatoma (*ste-at-o'-mah*) [*steato-*; ὅμα, tumor]. 1. A sebaceous cyst. 2. A lipoma. **s., Mueller's,** a lipofibroma.

steatopathic (*ste-at-o-path'-ik*) [*steato-*; *πάθος*, disease]. Pertaining to diseases of the sebaceous glands

steatopygia (*ste-at-o-pi'-je-ah*) [*steato-*; *πυγή*, buttock]. Enormous fatness of the buttock, common among the women of some African tribes.

steatopygous (*ste-at-op'-ig-us*) [see *steatopygia*]. Characterized by excessive development of the buttocks.

steatorrhea, steatorrhœa (*ste-at-or-e'-ah*) [*steato-*; *ῥοία*, flow]. 1. An increased flow of the secretion of the sebaceous follicles; see *seborrhea* 2. Fatty stools. **s. amianthaca,** a form of seborrhea in which the excess of solid constituents gives the appearance of scaliness of the skin; see, also, *seborrhea.* **s. nigricans.** Same as *seborrhœa nigricans.* **s. simplex,** excess of sebaceous excretion of the face.

steatosis (*ste-at-o'-sis*). 1. Fatty degeneration. 2. An abnormal accumulation of fat. **s. cordis,** fatty heart.

steatozoon (*ste-at-o-zo'-on*) [*steato-*; *ζῷον*, an animal]. The parasite, *Demodex folliculorum,* contained in comedones.

stechiology, stœchiology, stoicheiology (*stek-e-ol'-o-je*) [*στοιχεῖον*, a first principle; *λόγος*, science]. The doctrine of elements and of elementary principles.

stechiometry, stœchiometry, stoichiometry (*stek-e-om'-et-re, stoi-ke-om'-et-re*) [*στοιχεῖον*, a first principle; *μέτρον*, a measure] 1 The mathematical side of chemistry. 2. The estimation of the proportions in which elements combine to form compounds

steel (*stēl*). Iron chemically combined with a certain proportion of carbon. It holds an intermediate position between white cast iron and wrought iron, partaking of the most valuable qualities of both Steel of good quality is fine-grained, elastic, and tough; see, also, *ferrum.* **s. drops,** tincture of chloride of iron. **s.-grinders' phthisis.** See *pneumonokoniosis.* **s. mixture,** *mistura ferri composita.* **s.-pen palsy.** See *writers' cramp.* **s. tincture.** See *ferric chloride, tincture of* **s. wine.** Synonym of *vinum ferri*

Steele's sign (*stēl*). Exaggerated pulsation over the whole area of the cardiac region, it is noted in intrathoracic tumor

steep. 1 A name for rennet. 2 To stand in water for making an infusion.

steeple-skull. Oxycephaly.

stege (*ste'-je*) [*στέγος*, roof]. The inner layer of the rods of Corti.

stegmonth (*steg'-munth*) [*στέγειν*, to cover] The period (about a month) between childbirth and complete return to health; the puerperium.

stegnosis (*steg-no'-sis*) [*στέγνωσις*, a checking of a discharge; a soldering] Constipation, or costiveness; the checking of a discharge; the closing of a passage; stenosis.

stegnotic (*steg-not'-ik*). Effecting stegnosis. Astringent.

Stegomyia (*steg-o-mi'-e-ah*) [*στεγανός*, covered; *μυῖα*, a fly]. A genus of mosquitos or *Culicidæ,* represented in most tropical and subtropical countries. The adults are usually very vicious biters, both by day and night. According to the experiments of the American Commission on Yellow Fever *S. calopus* or *fasciata* is the agent which spreads the germs of this disease. **S. calopus, S. fasciata,** a very distinct and common species, easily distinguished by the thoracic ornamentation and by the last hind tarsal joint being white. It is one of the most troublesome and annoying of mosquitos; the bite is very irritating. It is the intermediate host of the germ of yellow fever and of the hematozoon *Filaria Bancrofti,* which also occurs in *Culex fatigans,* and in *Anopheles.* Syn., *Brindled* or *Tiger mosquito*

Stein's test (*stīn*) [Stanislav Alexander Fedorovich von *Stein,* Russian otologist, 1855–]. In diseases of the labyrinth, the patient (with his eyes closed) is unable to stand or to hop on one foot.

Steinach's operation (*stī'-nahk*) [Eugen *Steinach,* Austrian physiologist, 1861–] Ligation or subcutaneous division of the vas deferens for the purpose of causing increased growth of the interstitial cells of the testicle It is claimed that this will rejuvenate the old

Steiner's tumors (*stī'-ner*). Jeanselme s nodules, *q. v.*

stella (*stel'-ah*) [L., "star"]. A star-shaped bandage, stellate bandage **stellæ vasculosæ Winslowii.** See *Winslow's stars*

stellate (*stel'-āt*) [*stella,* a star] Star-shaped, or with parts radiating from a center. **s. bandage,** one that is wound crosswise on the back. **s. cells,** small polyaxonic nerve-cells in the molecular layer of the cortex cerebri. **s. fracture,** a fracture in which there are numerous fissures radiating from the central point of injury. It usually occurs in flat bones. **s. hair,** a hair which divides at the end in a star-shaped fashion **s. laceration,** one involving the tissues in several directions, as a stellate laceration of the cervix uteri. **s. ligament,** the anterior costovertebral ligament. **s. veins,** minute venous radicles arranged in stellate fashion and located just beneath the capsule of the kidney

stellula (*stel'-ū-lah*) [dim of *stella,* a star]. In anatomy, a plexus of veins in the cortex of the kidney. **stellulæ Verheynii,** a stellate network of veins in the outer part of the cortex of the kidney **s. Winslowii.** See *Winslow's stars*

Stellwag's sign (*stel'-vahg*) [Carl *Stellwag* von Carion, Austrian ophthalmologist, 1823–1904]. Absence or diminution in frequency of the winking movements of the eyelids and abnormal width of the palpebral aperture; it is seen in exophthalmic goiter.

stem. The pedicle of a tumor; the shaft of a hair; the supporting stalk of a leaf or plant. **s., brain,** the brain, less the fissured portion of the cerebrum. **s.-eelworm.** See *s. sickness.* **s., gland,** a gland-duct **s. of hair.** Synonym of *hair-shaft* **s.-pessary,** a pessary having a stem or rod which enters the os uteri. **s.-sickness,** a parasitic disease of clover, due to the presence of the stem-eelworm. (*Tylenchus devastatrix.*)

stenagma (*sten-ag'-mah*) [*στενάζειν*, to sigh]. Synonym of *sigh.*

stenagmus (*sten-ag'-mus*) [*στενάζειν*, to sigh]. Sighing.

stench [ME., *stench,* a smell] An ill smell; an offensive odor. **s.-pipe,** an upright pipe that reaches above the roof of a house; it is intended to give vent to foul vapors that accumulate in waste-pipes, and water-closets. **s.-trap,** in sewerage and plumbing, a device for preventing a reflux of foul vapors and gases

Stender dish (*sten'-der*) [Wilhelm P. *Stender,* German manufacturer of scientific apparatus]. A vessel used in staining sections of tissues.

stenion (*sten'-e-on*) [στενός, narrow]. A craniometric point at the extremity of the smallest transverse diameter in the temporal fossa.

Steno's duct. See *Stensen's duct.*

steno- (*sten-o-*) [στενός, narrow]. A prefix meaning narrow or constricted.

stenobregmate (*sten-o-breg'-māt*) [*steno-*; βρέγμα, the bregma]. The condition in which the upper and fore-part of the head is narrow.

stenocardia (*sten-o-kar'-de-ah*) [*steno-*; καρδία, heart]. Angina pectoris.

stenocephalous (*sten-o-sef'-al-us*) [*steno-*; κεφαλή, head]. Having a head narrow in one or more of its diameters.

stenocephaly (*sten-o-sef'-al-e*) [see *stenocephalous*]. Narrowing of the head in one or more of its diameters.

stenochasmus (*sten-o-kaz'-mus*) [*steno-*; χάσμα, a chasm]. Lissauer's term applied to a skull in which a line drawn from the point upon the rostrum of the sphenoid where it is included between the alæ vomeris, to the center of the posterior nasal spine and to the basion, intersects with an angle of 74° to 94°

stenochoria (*sten-o-ko'-re-ah*) [*steno-*; χῶρος, space] Narrowing, stenosis; partial obstruction, particularly of the lacrymal duct. **s. saccilacrimalis,** stenosis of the lacrymo-nasal duct.

stenocompressor (*ste-no-kom-pres'-or*) [*Steno's duct, compressor*]. An instrument used to compress Stenson's ducts during dental operations.

stenocoriasis (*sten-o-ko-ri'-as-is*) [*steno-*, κόρη, pupil]. Narrowing of the pupil.

stenocrotaphia, or **stenocrotaphy** (*sten-ok-ro-ta'-fe-ah*, or *sten-o-kro'-ta-fe*) [*steno-*; κρόταφος, the temple] A narrowing of the temporal region of the skull

stenodont (*sten'-o-dont*) [*steno-*; ὀδόυς, tooth]. Provided with narrow teeth

stenomycteria (*sten-o-mik-te'-re-ah*) [*steno-*; μύκτηρ, the nose]. Nasal stenosis

Stenon's duct. See *Stensen's duct.*

Stenonian, Stenonine (*sten-o'-ne-an, sten'-o-nēn*). Named for Nicholas Stenson (latinized Stenonianus), a Danish anatomist, 1638–1686.

stenopeic (*sten-o-pe'-ik*) [*steno-*; ὀπή, an opening]. Pertaining to or having a narrow slit; applied to lenses that allow the passage of rays only through a narrow slit

stenosal (*sten'-o-sal*). Pertaining to stenosis.

stenosed (*sten-ōzd'*). Constricted, narrowed.

stenosin (*sten'-o-sin*), $AsCH_3O_3Na_2{\cdot}2H_2O$, disodic methylarsenate, discovered by Baeyer, said to be a nontoxic arsenical salt. Dose 1 cg. 1 to 5 times daily

stenosis (*sten-o'-sis*) [στενός, narrow]. Constriction or narrowing, especially of a channel or aperture. **s., aortic,** a narrowing of the aortic orifice at the base of the heart or a narrowing of the aorta itself. **s., cardiac,** as a consequence of inflammation of the connective tissue in the myocardium, the conus arteriosus upon either side of the heart may become diminished in diameter, with consequent hindrance to the free passage of blood from the ventricle into its corresponding artery. This constitutes what is called stenosis of the heart The second sound is fully formed and sharply defined, thus distinguishing the condition from valvular stenosis. **s., cicatricial,** stenosis due to a contracted cicatrix. **s., granulation,** narrowing caused by encroachment of contraction of granulations. **s., mitral,** stenosis of left auriculoventricular orifice. **s., post-tracheotomy,** stenosis after tracheotomy. **s., Dittrich's,** stenosis of the conus arteriosus.

stenostegnosis, stenostenosis (*sten-o-steg-no'-sis, sten-o-sten-o'-sis*) [*stenononsianus,* or *Stensen; στενωσις,* constriction]. Stenosis of Stensen's duct.

stenostomatous (*sten-o-sto'-mat-us*) [*steno-*; στόμα, mouth]. Having a small mouth.

stenostomia (*sten-o-sto'-me-ah*) [*steno-*; στόμα, mouth]. A narrowing or closure of the mouth.

stenostomy (*sten-os'-to-me*) [*steno-*; στόμα, a mouth]. Contraction of any mouth or aperture.

stenothermal (*sten-o-ther'-mal*) [*steno-*; narrow; θέρμος, heat]. Capable of sustaining a small range of temperature.

stenothorax (*sten-o-tho'-raks*) [*steno-*; *thorax*]. Having a straight, short thorax.

stenotic (*sten-ot'-ik*) [*stenosis*]. Characterized by stenosis; produced by stenosis

Stensen's (Steno's) duct [see *Stenonian*]. The duct of the parotid gland. **S.'s experiment,** temporary ligation of the aorta of the rabbit immediately below the point at which the renal arteries are given off, for the purpose of cutting off the blood-supply of the lower portion of the spinal cord. **S.'s foramina,** the incisive foramina which transmit the anterior branches of the descending palatine vessels. **S.'s plexus,** the venous plexus surrounding Stensen's duct. **S.'s veins,** the venæ vorticosæ of the choroid.

stent [Dr *Stent,* dental surgeon]. 1. A compound used for immobilizing some forms of skin graft. 2. A mould made from 1. and used for the same purpose

Stent's mass. Plastic material for taking an impression of the mouth; used by dentists when about to make a dental plate.

stentorin (*sten'-to-rin*). A blue pigment obtained from infusorians of the genus *Stentor.*

stentorophonous (*sten-tor-of'-on-us*) [Στέντωρ, a loud-voiced Greek in the Trojan war, φωνή, sound] Having a loud voice.

stephanial, stephanic (*stef-an'-e-al, stef'-an-ik*) [στεφανος, a wreath]. Relating to stephanion.

stephanion (*stef-an'-e-on*) [στέφανος, a wreath; crown]. The point of intersection of the temporal ridge and coronal suture. See under *craniometric point.*

Stephenson's wave (*ste'-ven-son*) [William *Stephenson,* Scotch obstetrician, 1837–1908]. Pelvic congestion increasing just before menstruation, remaining constant during menstruation, and diminishing after menstruation.

steppage-gait (*step'-āj-gāt*). The peculiar high-stepping gait seen in tabes dorsalis and certain forms of multiple neuritis.

stercobilin (*ster-ko-bi'-lin*) [*stercus,* dung; *bilis,* bile]. A brown coloring-matter found in feces, and identical with hydrobilirubin.

stercolith (*ster'-ko-lith*) [*stercus;* λίθος, stone]. A fecal concretion sometimes found in the vermiform appendix.

stercoraceous (*ster-ko-ra'-shus*) [*stercus*]. Fecal; having the nature of feces; containing feces as, *stercoraceous* vomiting.

stercoral (*ster'-ko-ral*). See *stercoraceous.*

stercorary (*ster'-ko-ra-re*) [*stercus*]. Fecal.

stercoremia, stercoræmia (*ster-ko-re'-me-ah*) [*stercus; αἷμα,* blood]. A condition of the blood resulting from arrest of intestinal excretion and the absorption of toxic matters from the feces.

stercorin (*ster'-ko-rin*) [*stercus*]. An extractive from the feces resembling cholesterin.

stercorous (*ster'-kor-us*). Stercoreal, stercoraceous.

Sterculia (*ster-kū'-le-ah*) [*stercus*, dung] A genus of some 85 species of tropical trees **S. urens** of India, and **S. tragacantha** of Africa afford some part of the gums known as tragacanth **S acuminata** produces the kola-nut, see *kola*

stercus (*ster'-kus*) [L , "dung"] Feces

stere (*stēr*) [*στερεός*, solid] A measure of 1000 liters, a kiloliter

stereo (*ste'-re-o*). Cubes for making bouillon

stereo- (*ster-e-o-*) [*στερεός*, solid] A prefix meaning solid or relating to solidity

stereoagnosis (*ster-e-o-ag no'-sis*) See *astereognosis*

stereoanesthesia (*ster-e-o-an-es-the'-ze-ah*) [*stereo-; anesthesia*] Inability to ascertain the form or shape of objects by feeling them

stereo-arthrolysis (*ster-e-o-ar-throl'-is-is*) Loosening stiff joints and producing new mobile joints in cases of ankylosis

stereochemic, stereochemical (*ster-e-o-kem'-ik, ster-e-o-kem'-ik-al*). Pertaining to stereochemistry

stereochemistry (*ster-e-o kem'-is tre*) [*στερεός*, solid, *chemistry*] Stereo isomerism, theoretical explanations of close isomerisms, by which it is assumed that the differences between the various isomers are due to the different positions of the same atoms or radicals in tri-dimensional representations of the molecules Ordinary structural formulæ involve only two dimensions length and breadth, but these are not sufficient to explain numerous cases of isomerism, so a "spatial" or "solid" conception of the molecule is necessary Also called alloisomerism

stereocyst (*ster'-e-o sist*) [*stereo* , *κύστις* cyst] A hard cyst, or cystic growth

stereognosis (*ster-e-og-no'-sis*) [*stereo* , *γνωσις* knowledge] The faculty of recognizing the nature and use of objects by contact and handling them Cf *astereognosis*

stereognostic (*ster-e-og-nos'-tik*) [see *stereognosis*] 1 Pertaining to the cognition of solidity. 2 Recognizing by sense of touch

stereogram (*ster'-e-o gram*) [*stereo-*, *γράμμα*, a writing] A stereoscopic picture

stereograph (*ster'-e-o-graf*) [*stereo-*, *γράφειν*, to write] 1 Of Broca, an instrument used to make outline drawings of parts of the cranium 2 Same as *stereogram*

stereography (*ster-e-og'-ra-fe*) [*stereo-*, *γράφειν*, to write] Graphic representation of the skull, a branch of craniometry

stereoisomeric (*ster-e-o-i-som-er'-ik*) Pertaining to stereoisomerism

stereoisomerism (*ster-e-o-i-som'-er-izm*) [*stereo* , *isomerism*] The condition in which two or more substances having the same molecular formulæ have different properties, these differences are due to the different relative positions of the atoms in the molecule

stereometer (*ster e-om'-et-er*) [*stereo-*, *μέτρον*, a measure] An apparatus for the determination of the specific gravity of liquids, porous substances, powders, etc , as well as solids

stereometry (*ster-e-om'-et-re*) [see *stereometer*] 1 The determination of the specific gravity of substances 2 The measurement of volume

stereomonoscope (*ster-e-o-mon'-o-skōp*) [*stereo-*, *μόνος*, single, *σκοπεῖν*, to view] An instrument with two lenses for producing a single picture giving the effect of solidity

stereoneura (*ster-e-o-nū'-rah*) [*stereo-*, *νεῦρον*, nerve] A term proposed by Wilder for the invertebrates whose nervous axis, when it exists, presents no cavity as in the vertebrates or celoneura

stereophantoscope (*ster-e-o-fan'-to-skōp*) A panorama stereoscope using rotating discs in place of pictures

stereophoroscope (*ster-e o for'-o-skōp*) [*stereo-*, *φέρειν*, to carry *σκοπεῖν*, to see] A stereoscopic zoetrope, an instrument for producing a series of images apparently in motion

stereoplasm (*ster'-e-o-plazm*) [*stereo-*, *πλάσσειν*, to mold] The solid part of the protoplasm of cells

stereopsis (*ster-e-op'-sis*) [*stereo-*; *ὄψις*, vision] Stereoscopic vision

stereoroentgenography (*ster-e-o-rent-gen-og'-ra-fe*). Stereoskiagraphy.

stereoscope (*ster'-e-o-skōp*) [*stereo-*, *σκοπεῖν*, to see] An instrument by which two similar pictures of the same object are made to overlap so that the images are seen as one, thereby giving the appearance of solidity and relief

stereoscopic (*ster-e-o-skop'-ik*) [*stereoscope*] Pertaining to stereoscopy **s. vision,** binocular vision See *stereoscope*

stereoscopy (*ster-e-os' ko-pe*) [*stereoscope*] The use of the stereoscope

stereoskiagraphy (*ster-e-o-ski-ag'-ra-fe*) [*stereo* , skiagraphy] The use of the stereoscope in the study of skiagrams

stereostroboscope (*ster-e-o-stro'-bo-skōp*) [*stereo* , *στρόβος*, a twisting, *σκοπεῖν*, to view] An apparatus for the experimental study of points moving in three dimensions

stereotics (*ster-e-ot'-iks*) Lesions or deformities affecting the harder portions of the body

stereotypy (*ster e-ot'-o-pe*) [*stereo-*, *τύπος*, a type] Morbid persistence of a volitional impulse when once started

steresol (*ster' e sol*) A liquid said to be an alcoholic solution of gum lac, benzoin, tolu balsam, phenol, oil of ginger and saccharin It is used in diphtheria and skin diseases

steriform (*ster'-e-form*) An almost tasteless and odorless powder consisting essentially of sugar of milk and 5 % of formaldehyde **s. chloride,** a mixture of formaldehyde, 5 parts, ammonium chloride 10 parts, pepsin, 20 parts, and milk-sugar, 65 parts **s. iodide,** formaldehyde, 5 parts, ammonium iodide, 10 parts, pepsin, 20 parts and milk-sugar, 65 parts

sterigma (*ster ig'-mah*) [*στήριγμα*, a prop support, pl , *sterigmata*] In biology, a stalk or support

sterile (*ster'-il*) [*sterilis*, barren] 1 Not fertile, not capable of reproducing 2 Free from germs

sterility (*ster-il'-it-e*) [*sterile*] The condition of being sterile, infertile, or incapable of reproducing **s., facultative,** sterility caused by the prevention of conception **s., idiopathic** See *azoopermia* **s , one-child,** sterility occurring in a woman after she has given birth to one child **s , relative,** sterility due to other causes than abnormality of the sexual organs **s , revocable,** see Gräfenburg s ring

sterilization (*ster-il i za'-shun*) [*sterile*] The act of rendering anything sterile, the destruction of microorganisms, particularly by means of heat **s. fractional, s., intermittent,** a method of sterilization in which an interval of time is allowed to elapse between the several heatings, giving an opportunity for any spores present to develop into adult microorganisms, in which form they readily succumb to heat

sterilized (*ster'-il-izd*) Rendered sterile

sterilizer (*ster'-il-izer*) [*sterile*] An apparatus for destroying the microorganisms attached to an object, especially by means of heat

sterisol (*ster'-is-ol*). A preparation containing sugar of milk, 2.98 parts; sodium chloride, 0.672 part; potassium phosphate, 0.322 part; formaldehyde, 0.520 part; water, 95.506 parts. Used as an antiseptic in infectious diseases.

Stern's position in heart examination [Heinrich *Stern*, American physician, 1868–1918]. The murmur is heard better in cases of tricuspid regurgitation if the patient is placed on his back with his neck extended and head lowered.

Stern's test, a form of Wassermann test in which a fresh active serum is used with the patient's complement, and the non-specific reactions are overcome by excess of the amboceptor unit.

sternad (*ster'-nad*) [*sternum*]. Toward the sternal aspect

sternal (*stern'nal*). Pertaining to the sternum.

sternalgia (*ster-nal'-je-ah*) [*sternum; ἄλγος*, pain]. Pain in the sternum.

sternalgic (*ster-nal'-jik*) [*sternum; ἄλγος*, pain]. Affected with sternalgia.

sternalis (*ster-na'-lis*) [*sternum*]. Connected with the sternum; sternal.

Sternberg's disease. The tuberculous form of pseudoleukemia. Chloroma.

sternebra (*ster'-ne-brah*) [*sternum; vertebra;* pl. *sternebræ*] Any one of the serial segments of the sternum.

sternebral (*ster'-ne-bral*) [*sternum; vertebra*]. Pertaining to or of the nature of a sternebra

sternen (*ster'-nen*) [*sternum*]. Belonging to the sternum in itself

sterniform (*ster'-nif-orm*) [*sternum; forma*, form]. Shaped like a sternum

sterno- (*ster-no-*) [*sternum*]. A prefix denoting connection with the sternum.

sternoabdominalis (*ster-no-ab-dom-in-a'-lis*). The triangularis sterni and the transversus abdominis considered as a single muscle.

sternochondroscapularis (*ster-no-kon-dro-skap-ū-la'-ris*) [*sterno-; χόνδρος*, cartilage; *scapula*]. An inconstant muscle arising from the sternum and the first costal cartilage and extending to the upper border of the scapula

sternoclavicular (*ster-no-kla-vik'-ū-lar*) [*sterno-; clavicle*]. Pertaining to the sternum and the clavicle.

sternocleidal (*ster-no-kli'-dal*). Same as *sternoclavicular*.

sternocleidomastoid (*ster-no-kli-do-mas'-toid*) [*sterno-; κλείς*, key; *mastoid*]. Pertaining to the sternum, the clavicle, and the mastoid process, as the *sternocleidomastoid* muscle. See under *muscle*.

sternocoracoid (*ster-no-kor'-ak-oid*). Relating to the sternum and the coracoid.

sternocostal (*ster-no-kos'-tal*) [*sterno-; costa*, a rib]. Pertaining to the sternum and the ribs.

sternodymia (*ster-no-dim'-e-ah*) [*sterno-; δύειν*, to enter]. A form of somatodymia in which the union is in the sternum.

sternodynia (*ster-no-din'-e-ah*) [*sterno-; ὀδύνη*, pain]. Sternalgia; pain in the sternum.

sternofacial (*ster-no-fa'-shal*) [*sterno-; facies*, face]. Pertaining to the sternum and the face.

sternoglossal (*ster-no-glos'-al*) [*sterno-; γλῶσσα*, tongue] Pertaining to the sternum and the tongue.

sternohyoid (*ster-no-hi'-oid*) [*sterno-; hyoid*]. Pertaining to the sternum and the hyoid bone, as the *sternohyoid* muscle. See under *muscle*.

sternoid (*ster'-noid*) [*sternum; εἶδος*, resemblance]. Resembling the sternum.

sternomastoid (*ster-no-mas'-toid*). Relating to the sternum and the mastoid process of the temporal bone.

sternomaxillary (*ster-no-maks-il'-ar-e*) [*sterno-; maxilla*, jaw]. Pertaining to the sternum and the mandible.

sterno-omphalodymia (*ster-no-om-fal-o-dim'-e-ah*) [*sterno-; ὀμφαλός*, a navel; *δύειν*, to enter]. A form of somatodymia in which the union is in both the sternal and umbilical regions.

sternopagia (*ster-no-pa'-je-ah*) [*sterno-; πάγος*, fixed]. The condition of a sternopagus.

sternopagus (*ster-nop'-ag-us*) [*sterno-; πάγος*, fastened]. Double monster united at the sternum.

sternopericardiac (*ster-no-per-e-kar'-de-ak*). Relating to the sternum and the pericardium.

sternoscapular (*ster-no-skap'-ū-lar*) [*sterno-; scapula*]. Pertaining to sternum and scapula.

sternothyroid (*ster-no-thi'-roid*) [*sterno-; thyroid*]. Pertaining to the sternum and the thyroid cartilage, as the *sternothyroid* muscle. See under *muscle*.

sternotomy (*ster-not'-o-me*) [*sterno-; τόμη*. a cutting]. Cutting through the sternum.

sternotracheal (*ster-no-tra'-ke-al*) [*sterno-; trachea*]. Pertaining to the sternum and the trachea.

sternotrypesis (*ster-no-tri-pe'-sis*) [*sterno-; τρύπησις*, a boring]. Perforation of the sternum.

sternovertebral (*ster-no-ver'-te-bral*). Pertaining to the sternum and the vertebræ **s. ribs**, the true ribs.

sternoxiphoid (*ster-no-zif'-oid*). Relating to or connecting the sternum and the xiphoid process.

sternum (*ster'-num*) [*στερνον*, breast-bone]. The flat, narrow bone in the median line in the front of the chest, composed of three portions—the manubrium, the gladiolus, and the ensiform or xiphoid appendix.

sternutament (*ster-nū'-tam-ent*) [*sternutamentum; sternutare*, to sneeze]. A substance causing sneezing

sternutatio (*ster-nū-ta'-she-o*) [L.]. Sneezing. **s. convulsiva**, paroxysmal sneezing, as in hay fever.

sternutation (*ster-nū-ta'-shun*) [*sternutatio*, a sneezing]. The act of sneezing.

sternutator (*ster'-nū-ta-tor*) [*sternutare*, to sneeze]. Sneezing gas, diphenylchlorarsine.

sternutatory (*ster-nu'-tat-o-re*) [see *sternutation*]. 1. Producing sneezing. 2. An agent that causes sneezing.

sterochemistry (*ste-ro-kem'-is-tre*). See *stereochemistry*.

sterol (*ster'-ol*). A class of compounds which are non-saponifiable, but are soluble in ether; they are derived from plants and animals; cholesterol is an example.

stertor (*ster'-tor*) [L., "a snoring"]. Sonorous breathing or snoring; the rasping, rattling sound produced when the larynx and the air-passages are obstructed by mucus.

stertorous (*ster'-to-rus*) [*stertor*]. Characterized by stertor, as *stertorous* breathing.

sterule (*ster'-ūl*). Trade name for a glass capsule containing a sterile solution.

stetharteritis (*steth-ar-ter-i'-tis*) [*στῆθος*, chest; *ἀρτήρια*, artery; *ιτις*, inflammation]. Inflammation of the arteries of the thorax.

stethemia, stethæmia (*steth-e'-me-ah*) [*στῆθος*, chest; *αἷμα*, blood]. An accumulation of blood in the pulmonary vessels.

stethendoscope (*steth-en'-do-skōp*) [*stetho-; ἔνδον*, within; *σκοπεῖν*, to view]. A variety of fluoroscope used for examining the chest.

stetho- (*steth-o-*) [*στῆθος*, chest]. A prefix denoting pertaining to the chest.

stethocatharsis (*steth-o-kath-ar'-sis*). Synonym of *expectoration*.

stethocele (*steth'-o-sēl*). See *pneumonocele*.

stethocelodyspnea (*steth-o-se-lo-disp'-ne-ah*) [*stetho-*; *κήλη*, hernia; *dyspnea*]. Dyspnea due to hernia of the lung.

stethochysis (*steth-ok'-is-is*). See *hydrothorax*.

stethocyrtograph. See *stethokyrtograph*

stethogoniometer (*steth-o-go-ne-om'-et-er*) [*stetho-*; *γωνία*, angle; *μέρον*, measure]. An instrument for measuring the curvature of the chest.

stethograph (*steth'-o-graf*) [*stetho-*; *γράφειν*, to write]. An instrument recording the respiratory movements of the chest.

stethokyrtograph (*steth-o-kir'-to-graf*) [*stetho-*; *κύρτος*, curved; *γράφειν*, to write]. An apparatus designed for measuring and recording the dimensions of the chest.

stethomenia (*steth-o-me'-ne-ah*) [*stetho-*; *μήν*, month]. Vicarious menstruation by way of the bronchial tubes.

stethometer (*steth-om'-et-er*) [*stetho-*; *μέτρον*, a measure]. An instrument fo measuring the degree of expansion of the chest.

stethomyitis (*steth-o-mi-i'-tis*) [*stetho-*; *μῦς*, muscle; *ῑτις*, inflammation]. Inflammation of the muscles of the chest

stethonoscope (*steth-on'-o-skōp*) [*stetho-*; *σκοπεῖν*, to view]. An apparatus for use in auscultation which may be attached to a binaural stethoscope.

stethoparalysis (*steth-o-par-al'-is-is*). Paralysis of the muscles of the chest.

stethophone (*steth'-o-fōn*) [*stetho-*; *φωνή*, sound]. (1) Stethoscope. (2) An electrical stethoscope capable of transmitting heart murmurs and lung sounds to a large group of listeners

stethophonometer (*steth-o-fo-nom'-et-er*) [*stetho-*; *φωνή*, sound; *μέτρον*, a measure]. An instrument for measuring the phenomena elicited by auscultation.

stethophonometry (*steth-o-fo-nom'-et-re*) [see *stethophonometer*]. The determination of the intensity of the acoustic phenomena associated with the lungs and heart

stethopolyscope (*steth-o-pol'-is-kōp*) [*stetho-*; *πολύς*, many, *σκοπεῖν*, to view] A stethoscope having several tubes for the simultaneous use of several observers.

stethoscope (*steth'-o-skōp*) [*stetho-*; *σκοπεῖν*, to view]. An instrument for ascertaining the condition of the organs of circulation and respiration by the sounds made by these organs. It consists of a hollow tube, one end being placed over the locality to be examined, the other at the ear of the examiner. The *binaural* stethoscope consists of a Y-shaped tube, the flexible branches being applied each to an ear of the listener. **s., differential,** one determining the time rather than the quality of the sounds heard, so that murmurs at two localities may be compared.

stethoscopic (*steth-o-skop'-ik*). Pertaining to or detected by means of the stethoscope.

stethoscopy (*steth-os'-ko-pe*) [see *stethoscope*]. Examination with the aid of the stethoscope.

stethospasm (*stĕth'-o-spazm*) [*stetho-*; *spasm*]. Spasm of the pectoral muscles.

sthenia (*sthen'-e-ah*) [*σθένος*, strength]. Normal or excessive force or vigor (opposed to asthenia).

sthenic (*sthen'-ik*) [*σθένος*, strength]. Strong; active. **s. fever,** a form of fever marked by high temperature, quick and tense pulse, and highly colored urine.

sthenopyra (*sthen-o-pi'-rah*) [*σθένος*, strength; *πῦρ*, fever]. Sthenic fever.

stibenyl (*stib'-en-il*) [*stibine*; *-yl*]. A modification of acetyl paraamidophenyl stibiate of sodium, used in some forms of trypanosomiasis.

stibiacne (*stib-e-ak'-ne*) [*stibium*; *acne*]. Acne caused by the use of antimony.

stibial (*stib'-e-al*) [*stibium*]. Pertaining to stibium, or antimony.

stibialism (*stib'-e-al-izm*) [*stibium*]. Antimonial poisoning.

stibiated (*stib'-e-a-ted*) [*stibium*, antimony]. Containing antimony.

stibiation (*stib-e-a'-shun*). Excessive use of antimonials.

stibine (*stib'-ēn*). Antimony trihydride; antimoniureted hydrogen, SbH_3

stibium (*stib'-e-um*) Antimony.

stibogram (*stib'-o-gram*) [*στίβος*, a beaten path; *γράμμα*, a writing]. A record of footsteps.

stibonium (*stib-o'-ne-um*). The radical SbH_4; similar in constitution to ammonium, NH_4

stichochrome (*stik'-o-krōm*) [*στίχος*, a row; *χρῶμα*, color] Applied by Nissl to a somatochrome nerve-cell in which the chromophilic substance is arranged in striæ running in the same direction and usually parallel with the contour of the cell-body, partly also with the surface of the nucleus Cf. *arkyostichochrome*

Sticker's disease [G. *Sticker*, German physician, 1860–]. Erythema infectiosum

sticking plaster. Adhesive plaster.

sticta (*stik'-tah*). A lichen *sticta pulmonaria*, used in rheumatism and chronic coughs by homeopaths and eclectics.

stictacne (*stik-tak'-ne*) [*στίκτος*, punctated; *acne*]. Acne punctata; acne in which the pustules have a red, raised base, with a central black point.

Stifel's figure (*sti'-fel*). An apparatus used to determine the position and size of the blind spot in the eye.

stiff (*stif*). Inflexible, unyielding, immovable in continuity; applied especially to normally movable parts. **s. joint.** See *ankylosis*. **s. neck.** See *torticollis*.

stiff-neck fever. Epidemic cerebrospinal meningitis

stifle (*sti'-fl*) [ME., *stifle*, to choke]. 1. To choke; to kill by impeding respiration. 2. The *stifle-joint*, *q. v.* 3. Disease or other affection of the stifle-bone, *q. v.* **s.-bone,** the patella of the horse **s.-joint,** the knee-joint of the horse.

stigma (*stig'-mah*) [*στίγμα*, a point, pl., *stigmata*]. 1. A small spot or mark, especially a spot of hemorrhage in the palm or sole, occurring in hysterical persons 2. Any one of the marks or signs characteristic of a condition; generally used in the plural, as *hysterical stigmata*. 3. That part of a pistil which receives the pollen. **stigmata, bakers',** nodules on the backs of the fingers caused by kneading dough. **stigmata, Cohn's,** minute gaps in the interalveolar walls of the normal lung. **s., Giuffrida-Rugieri's, of degeneration,** the absence or incompleteness of the glenoid fossa. **s. of Graafian follicle,** the point where the blood-vessels of the walls are absent and where it finally ruptures. **stigmata, hereditary,** psychical stigmata resembling those of an ancestor and supposed to be inherited. **stigmata, hysterical,** the specific, peculiar phenomena or symptoms of hysteria as the anesthesia, hyperesthesia, hysterogenic zones, reversal of the color field, contraction of the visual field, the phenomena of transport

amblyopia, impairment of the sense of hearing, of taste, and of muscular sense, etc. **stigmata, Malpighi's,** the orifices of the capillary veins that join the branches of the splenic vein at right angles. **stigmata maydis,** zea mays. See under *zea*. **stigmata, neurasthenic.** See *stigmata, hysterical*. **stigmata nigra,** the black spots caused by the presence of grains of gunpowder in the skin. **stigmata ovariorum,** small cicatrixes seen in the ovaries after the escape of the ova. **stigmata, psychical,** certain mental states characterized by susceptibility to particular suggestions. **stigmata rubra,** petechiæ due to various causes. **stigmata, somatic,** the objective signs of certain nervous affections. **stigmata, venous,** varicose veins.

stigmal (*stig'-mal*) [στιγμα, stigma]. Pertaining to a stigma.

stigmata (*stig'-mat-ah*). Plural of *stigma, q. v.*

stigmatic (*stig-mat'-ik*) [*stigma*]. Pertaining to a stigma.

stigmatism (*stig'-mat-ism*) [στιγμα, point]. 1. A condition of the refractive media of the eye in which rays of light from a point are accurately brought to a focus on the retina Synonymous with emmetropia. See, also, *astigmatism*. 2 The condition of having stigmata.

stigmatization (*stig-mat-i-za'-shun*) [*stigma*]. The formation of stigmata.

stigmatodermia (*stig-mat-o-der'-me-ah*) [στιγμα, a prick; δέρμα, skin]. Disease of the prickle-cell layer of the skin.

stigmatose (*stig'-mat-ōs*) [στιγμα, stigma]. Marked with stigmata

stilet, stilette (*stil-et'*) [Fr., dim. of *stilus*, a point]. 1. A small, sharp-pointed instrument inclosed in a cannula. 2. A wire passed into a flexible catheter.

still-birth. The birth of a dead child.

still-born. Born lifeless.

Still-Chauffard symptom-complex (*stil'-sho-far'*) [see *Still's disease;* A. *Chauffard*, French physician]. The symptoms of Still's disease, *q. v.*, observed in pseudotuberculosis.

Still's disease [George Frederic *Still*, English physician, 1868–]. A form of polyarthritis with enlargement of spleen and lymph-glands; it occurs in infancy and childhood.

Stiller's sign [Berthold *Stiller*, Austrian physician, 1837–]. Marked mobility or fluctuation of the tenth rib in neurasthenia and enteroptosis.

stillicidium (*stil-is-id'-e-um*) [*stilla*, a drop; *cadere*, to fall down]. The flow of a liquid drop by drop. **s. lacrimarum,** overflow of tears from obstruction of the canaliculus or nasal duct; epiphora. **s. narium,** coryza. **s. urinæ,** dribbling of urine.

Stilling's bundle [Benedict *Stilling*, German anatomist, 1810–1879]. See *Krause's respiratory tract*. **S.'s canal.** 1. The central canal of the spinal cord 2. See *canal, hyaloid*. **S.'s cells, S.'s columns,** groups of multipolar cells near the gray commissure in the posterior cornua of the cervical and lumbar spinal cord. They correspond to Clarke's vesicular columns. **S.'s fibers,** the association fibers of the cerebellum. **S.'s fleece,** the meshwork of fibers formed around the dentate nucleus of the cerebellum. **S.'s gelatinous substance,** the gelatinous substance surrounding the central canal of the spinal cord. **S.'s nucleus.** 1. The nucleus ruber of the subthalamic region. 2. The nucleus of the hypoglossal nerve in the fourth ventricle. **S.'s raphe,** a narrow band connecting the pyramids of the oblongata. **S.'s sacral nucleus,** an island of ganglion-cells in the region of the spinal cord. **S.'s scissors of the brain,** the supposed resemblance to the outline of a pair of scissors seen in a horizontal section of the brain through the thalamus, nucleus ruber, and the nucleus dentatus cerebelli.

Stilling-Clarke's cells or **dorsal nucleus.** See *Clarke's column*.

Stillingia (*stil-in'-je-ah*) [Benjamin *Stillingfleet*, English botanist, 1702–1771]. A genus of plants of the order *Euphorbiaceæ*. The *stillingia* of the U. S. P. is the root of *S. sylvatica*, queen's root or queen's delight, and is used as an alterative in syphilis, scrofula, diseases of the skin, etc. **s., fluidextract of** (*fluidextractum stillingiæ*, U. S. P.). Dose ½–1 dr. (2–4 Cc.).

stillingin (*stil-in'-jin*) [Benjamin *Stillingfleet*, English botanist, 1702–1771]. A precipitate from a tincture of the root of *Stillingia sylvatica;* resolvent, stimulant, diuretic, antisyphilitic. Dose 1 to 3 gr.

stilus (*sti'-lus*) [*stilus*, a point]. 1. A more correct form of the word *stylus*, used as an anatomical term 2 A small tube or a bit of wire sometimes retained in the obstructed lacrymal duct, with a view to the restoration of its function. 3 An ointment or other medicament in the shape of a pencil or stick.

stimulant (*stim'-ū-lant*) [*stimulus*, a goad]. 1 Stimulating. 2. An agent that causes stimulation **s., cardiac,** one that increases the heart's action. **s., cerebral,** one that exalts the action of the cerebrum **s., cutaneous,** one that increases the activity of the skin, producing diaphoresis. **s., diffusible** or **diffusive,** one that has a prompt but transient effect. **s., hepatic,** one that excites the activity of the liver. **s., intestinal,** one that acts upon the intestinal tract. **s., local,** one acting directly on the end organs of the sensory nerves of the skin. **s., renal,** one producing diuresis. **s., spinal,** one exciting the spinal cord. **s., stomachic,** one giving tone to the stomach, aiding digestion, etc. **s., vasomotor,** one exciting the vasomotor apparatus

stimulate (*stim'-ū-lāt*) [see *stimulant*] To quicken; to stir up; to excite; to increase functional activity

stimulation (*stim-u-la'-shun*) [see *stimulant*]. 1 The act of stimulating. 2. The effect of a stimulant.

stimulator (*stim'-ū-la-tor*). A stimulating drug or agent.

stimulin (*stim'-ū-lin*). Metchnikoff's name for substances supposed to stimulate the phagocytes to destroy germs.

stimulus (*stim'-ū-lus*) [L.; pl., *stimuli*]. A goad; an impulse; anything capable of causing stimulation. **s., adequate.** See *s., homologous*. **s., chemical,** one due to or produced by chemical means. **s.-difference,** the difference in activity between two stimuli. **s., heterologous,** one acting upon the nervous elements of the sensory apparatus along their entire course. **s., homologous,** one acting only upon the end-organ. **s., maximal,** a stimulus, increase above which cannot be appreciated. **s., mechanical,** one acting by mechanical means, as pinching or striking. **s., minimal,** the smallest stimulus which can be appreciated. **s., subminimal,** one too weak to produce any obvious effect. **s., summation of.** See *summation*. **s., thermal,** the application of heat.

Stipa (*stī'-pah*) [*στύπη*, tow] A genus of grasses *S vaseyi*, sleepy grass, is a species found in New Mexico in the Sacramento Mountains, the ingestion of which causes in horses a stupor which endures for several days

stipate (*stī'-pat*) [*stipare*, to press together] Packed, crowded

stipatio (*stī pa'-she-o*) [L] An aggregation forming an obstruction **s. telæ cellulosæ infantum,** sclerema neonatorum

stipolac (*stip' o lak*) Trade preparation used in examining the gall bladder

stirp (*sturp*) [*stirps*, a stock, root, race] 1 The sum-total of hereditary organic units in the fertilized ovum 2 A race lineage, or family

stirpicultural (*stur-pik-ul'-tu-ral*) [*stirps*, a race *cultura*, culture] Pertaining to stirpiculture

stirpiculture (*stur-pik-ul'-tur*) [*stirps* stock, race, *cultura*, culture] The proposed improvement of man by attention to the laws of breeding

stirrup, stirrup-bone (*stir'-up*) The stapes

stitch. 1 A sudden, sharp lancinating pain 2 See *suture* (2) **s - abscess,** an abscess forming in a suture **s, Marcy's cobbler** See *suture, cobbler's* **s, sclerocorneal,** a peculiar stitch devised by Kalt to secure rapid union of the wound and to prevent prolapse of the iris after simple extraction of cataract Syn *Kalt-stitch* **s in the side,** intercostal neuralgia

stith, stithe (*stith, stīth*) The incus

stizolobin (*stī-zol'-ob-in*) A globulin found in the Chinese velvet bean

stock (*stok*) A quantity of solution, or other material, kept on hand for use as occasion requires **s vaccine,** a bacterial vaccine made from any of the species and not from one individual strain (as is the case with an *autogenous vaccine*)

stocking, elastic A stocking of elastic fibers for the compression of a limb affected with varicose veins and other diseases

stœchiology (*stek e ol'-o je*) [*στοιχεῖον* an element, *λόγος* a treatise] The study of the chemical elements of the gases, fluids and solids of the body, see *stechiology*

Stoerk's blennorrhea [Karl *Stoerk*, Austrian laryngologist 1832–1899] Profuse chronic suppuration and consequent hypertrophy of the mucosa of the nose, pharynx and larynx

stoichiometry See *stechiometry*

Stokes, astigmatic lens of, an apparatus consisting of two plano cylindrical lenses one concave, the other convex, the two of equal focal distance, it is used in the diagnosis of astigmatism

Stokes' disease [William *Stokes*, Irish physician, 1804–1878] See *goiter, exophthalmic* **S 's expectorant,** a preparation used in the treatment of bronchitis It consists of pulverized carbonate of ammonium 16 gr , fluidextract of senega and squills each ½ dram, paregoric 3 drams, syrup of Tolu sufficient to make 2 ounces A dram of this is given p r n **S 's law,** inflammation of serous or mucous membranes leads to paralysis of subjacent muscles **S.'s liniment,** a liniment containing turpentine acetic acid, oil of lemon, egg, and rose water **S.'s pulse.** See *Corrigan's pulse* **S.'s sign** 1 A violent abdominal throbbing felt on palpation to the right of the umbilicus in acute enteritis 2 Marked feebleness of the first heart-sound, when occurring during fevers, calls for alcoholic stimulation **S 's syndrome** See *Adams-Stokes' disease*

Stokes-Adams' symptom-complex or **disease.** See *Adams-Stokes' disease*

Stokes' operation [Sir William *Stokes*, Irish surgeon, 1839–1900] 1 *For amputation above the knee* the same as Gritti's operation, except that section of the femur is made above the condyles 2 *For excision of the tongue* a modification of Jaeger's operation 3 *For flat-foot* by removing a wedge-shaped piece of bone from the head and neck of the astragalus 4. *For single hare-lip* the prolabium is formed by tissue from both sides of the cleft by means of incisions skirting the red margin, the upper part of the cleft is incompletely pared and the partially dissected flaps turned back, while the edges of the skin are brought together and the prolabial flaps drawn downward and outward

Stokes's reagent for reducing hemoglobin [William Royal *Stokes*, American pathologist, 1870–] Add some citric or tartaric acid to a solution of ferrous sulphate and ammonia enough to make it alkaline

Stokvis' test for bile-pigments [Barend Joseph *Stokvis*, Dutch physician, 1834–1902] To 20 to 30 Cc of urine add 5 to 10 Cc of a zinc acetate solution (1 5) Wash the precipitate on a small filter with water, and dissolve in a little ammonia When filtered, the filtrate will give, after standing in the air, a brownish green color, and show the absorption bands of bilicyanin, one between C and D, the second at D, and the third between D and E

stolidity (*stol-id'-it e*) [*stoliditas*] A term designating stupidity of various degrees, even to amentia, or complete imbecility—oftener, however, signifying merely a phlegmatic or immobile temperament

Stoll's pneumonia. Bilious pneumonia, a variety of pneumonia with gastrohepatic symptoms

stolon (*sto' lon*) In biology (*a*) a slender, prostrate branch, taking root, or bearing a bulb at the tip, where it forms one or more new plants, (*b*) an analogous budding stock in certain compound animals

stolonization (*sto-lon-iz-a'-shun*) [*stolo*, a shoot] The process of transforming, in certain organisms one organ into another through external influences, such as gravitation, contact, light, etc

stoma (*sto' mah*) [*στόμα*, mouth, pl , *stomata*] 1 A mouth 2 A pore, as that between endothelial cells establishing direct communication between adjacent lymph-channels

stomacace (*sto-mak'-as e*) [*στόμα*, mouth, *κάκος*, evil] Canker of the mouth Fetor of the mouth with ulcerated gums, also scorbutic sore mouth

stomach (*stum-ak'*) [*στόμαχος*, the stomach] The most dilated part of the alimentary canal, situated below the diaphragm in the left hypochondriac, the epigastric, and part of the right hypochondriac regions It is connected at one end (cardiac end) with the esophagus, at the other (pyloric end) with the duodenum Its wall consists of four coats—the serous, muscular, submucous, and mucous The mucous coat contains the gastric glands (cardiac and pyloric glands), which secrete the gastric juice and mucus **s.-bed,** the shelf like support upon which the stomach rests, formed by the portion of the pancreas situated to the left of the median line This is quite thick anteroposteriorly, and its upper surface (anterior surface of His) makes

a large portion of the shelf. **s.-bucket**, a small bucket for extracting some of the gastric contents. **s.-cough**, a reflex cough excited by irritation of the stomach. **s.-pump**, a pump for withdrawing the contents of the stomach. **s.-reefing.** Synonym of *gastrorrhaphy*. **s., thoracic**, the congenital development of the stomach above the diaphragm. **s.-tooth**, a lower canine tooth, especially one of the first dentition. **s.-tube**, a flexible tube for irrigation or evacuation of the stomach. **s.-worm disease**, a disease of cattle due to species of *Stongylus—S. contortus, S. osterfagi, S. curticei, S. parkeri, S. retortæformis, S. fillicollis, S. oncophorus.*

stomachal (*stum'-ak-al*) [*stomach*]. Pertaining to the stomach

stomachalgia (*stum-ak-al'-je-ah*) [*stomach; ἄλγος*, pain]. Pain in the stomach.

stomachic (*stum-ak'-ik*) [*stomach*]. 1. Pertaining to the stomach. 2. Stimulating the secretory activity of the stomach. 3. One of a class of substances which have an influence upon the work of the digestive organs.

stomachodynia (*stum-ak-o-din'-e-ah*). Gastrodynia, pain in the stomach.

stomachoscopy (*stum-ak-os'-ko-pe*) [*stomach, σκοπεῖν*, to view]. Examination of the stomach; gastroscopy.

stomata (*sto'-mat-ah*) Plural of *stoma, q. v.*

stomatal (*sto'-mat-al*) [*στόμα*, mouth]. Relating to stomata.

stomatalgia (*sto-mat-al'-je-ah*) [*στόμα*, mouth; *ἄλγός*, pain]. Pain in the mouth.

stomatic (*sto-mat'-ik*) [*στόμα*, mouth]. Relating or belonging to the mouth.

stomatitis (*stom-at-i'-tis*) [*stoma; ιτις*, inflammation]. Inflammation of the mouth. **s. aphthosa, s., aphthous.** See *aphtha*. **s., catarrhal**, a simple form characterized by swelling of the mucous membrane, pain, and salivation. **s., epidemic**, an acute infectious stomatitis, which occurs in epidemic. **s., gangrenous.** See *cancrum oris*. **s., mercurial**, that arising from poisoning by mercury. **s., mycotic.** See *thrush*. **s., parasitic.** See *thrush*. **s., scorbutic**, that due to scurvy. **s., ulcerative**, a form characterized by the formation of small ulcers on the cheeks, lips, and tongue with copious salivation, pain, fetid breath, slight fever, and at times great prostration. **s., vesicular.** Same as *s, aphthous*.

stomato- (*sto-mat-o-*) [*στόμα*, mouth]. A prefix meaning pertaining to the mouth.

stomatocace (*sto-mat-ok'-as-e*) [*stomato-; κάκος*, evil]. Fetid ulceration of the mouth.

stomatocatharsis (*sto-mat-o-kath-ar'-sis*). Synonym of *salivation*.

stomatodynia (*sto-mat-o-din'-e-ah*) [*stomato-; ὀδύνη*, pain]. Pain in the mouth

stomatodysodia (*sto-mat-o-dis-o'-de-ah*) [*stomato-; δυσωδία*, foul odor]. A foul odor of the breath; ill smelling breath.

stomatogastric (*sto-mat-o-gas'-trik*) [*stomato-; γαστήρ*, stomach]. In biology, applied to the nerves; pertaining to the mouth and the stomach.

stomatol (*sto'-mat-ol*). An antiseptic compound said to consist of terpineol, 4 parts; soap, 2 parts; alcohol, 45 parts; aromatics, 2 parts; glycerol, 5 parts; water, 42 parts.

stomatologic, stomatological (*sto-mat-o-loj'-ik, sto-mat-o-loj'-ik-al*) [*stomato-; λόγος*, science]. Pertaining to stomatology.

stomatologist (*sto-mat-ol'-o-jist*) [*stomato-; λόγος* science]. One versed in stomatology.

stomatology (*sto-mat-ol'-o-je*) [*stomato-; λόγος*, science]. The sum of what is known about the mouth.

stomatomalacia (*sto-mat-o-mal'-a-se-ah*) [*stomato-; μαλακία*, softening]. Sloughing or softening of parts of the mouth.

stomatomenia (*sto-mat-o-me'-ne-ah*) [*stomato-; μήν*, month]. Vicarious menstruation by way of the mouth.

stomatomia (*sto-mat-o'-me-ah*) [*stomato-; τέμνειν*, to cut]. A general term for the incision of a mouth, as of the uterus.

stomatomy (*stom-at'-o-me*) [*stoma; ρομή*, a cutting]. Incision of the os uteri.

stomatomycosis (*stom-at-o-mi-ko'-sis*) [*stomato-; mycosis*]. A disease of the mouth due to fungi, especially *Oidium albicans*. See *thrush*.

stomatonecrosis, stomatonoma (*stom-at-o-ne-kro'-sis, stom-at-on'-o-mah*). See *cancrum oris*.

stomatonoma (*sto-mat-o-no'-mah*) [*stomata-; noma*]. Gangrene of the mouth; noma.

stomatopathy (*stom-at-op'-ath-e*) [*stomato-; πάθος*, disease]. Any disease of the mouth.

stomatoplastic (*sto-mat-o-plas'-tik*). Pertaining to stomatoplasty.

stomatoplasty (*sto'-mat-o-plas-te*) [*stomato-; πλάσσειν*, to form]. A plastic operation upon the mouth.

stomatopoiesis (*sto-mat-o-poi-e'-sis*). See *stomatoplasty*.

stomatorrhagia (*sto-mat-or-a'-je-ah*) [*stomato-; ῥηγνύναι*, to burst forth]. Copious hemorrhage from the mouth.

stomatoscope (*stom'-at-o-skōp*) [*stomato-; σκοπεῖν*, to inspect]. An instrument for inspecting the cavity of the mouth.

stomatosis (*sto-mat-o'-sis*) [*στόμα*, mouth]. Disease of the mouth.

stomatosyrinx (*sto-mat-o-sir'-ingks*) [*stomato-; σῦριγξ*, a tube]. The Eustachian tube.

stomatotomy (*sto-mat-ot'-o-me*) [*stomato-; τομή*, a cutting]. Incision of the os uteri.

stomatotyphus (*sto-mat-o-ti'-fus*) [*stomato-; typhus*]. A form of typhus in which the beginning lesions are found in the mouth.

stomenorrhagia (*sto-men-or-a'-je-ah*) [*στόμα*, mouth; *menorrhagia*]. Vicarious menstruation from the mouth.

stomocephalus (*stom-o-sef'-al-us*) [*stoma; κεφαλή*, head]. A variety of monster in which there is the same deformity as in rhinocephalus or in cyclocephalus, associated with a defect of the maxillary bones, so that the skin hangs in folds around the mouth.

stomodæal (*sto-mo-de'-al*) [*στόμα*, mouth; *ὁδαῖος*, by the way]. Having the character of a stomodæum.

stomodæum (*stom-o-de'-um*) [*stoma; ὁδαῖος*, by the way] The primitive oral cavity of the embryo, formed by a depression of the ectoderm and afterward forming the mouth and upper part of the pharynx.

stomonal (*sto'-mon-al*). A preparation of nitroglycerin, ammonium nitrate, sodium nitrate, sodium chloride, and flour.

stomoschisis (*sto-mos'-kis-is*) [*στόμα*, mouth; *σχίσις*, fissure]. Fissure of the mouth, particularly of the soft palate.

Stomoxys calcitrans (*sto-moks'-is kal'-sit-ranz*) The common stable fly which, by its bite, is believed to spread trypanosomes.

stone. 1. A hardened mass of mineral matter. See *calculus*. 2. An English unit of weight, 14 pounds. **s., blue,** copper sulphate crystals. **s.-bruise,** a bruise of the foot consequent on walking barefoot over loose stones. **s., gall-,** a biliary calculus; see *gall-stone*.

stool. The evacuation of the bowels. **s.s, acholic.** 1. Light gray or clay-colored stools having the consistence of putty, which follow stoppage of the flow of bile into the duodenum. The color is due to the presence of the normal urobilin. The stools show, under the microscope, an abnormal amount of fat. This form of alholic stool is accompanied by icterus and choluria. 2. Stools of the same color may occur in the absence of interference with the flow of bile, but when the stool contains an excessively large amount of fat and fatty acids. **ss., bilious,** the discharge is bilious diarrhea, as after large doses of calomel. **ss., caddy,** yellow-fever stools which resemble fine, dark, sandy mud. **ss., fatty,** stools in which fat is present, due to pancreatic disease. **s., insulated,** in electricity, a stool provided with insulated legs. **s.s, lead-pencil,** fecal discharges of a very small caliber. They occur independent of any general nervousness or local intestinal spasm, and cannot be regarded as evidence of stricture or stenosis of the colon. **ss., mucous,** stools containing mucus. They indicate the existence of intestinal inflammation. **ss., pea-soup,** the peculiar liquid evacuation of typhoid fever. **ss., rice-water,** the stools of cholera, in which there is a copious serous exudation containing detached epithelium. **ss., Schafkoth,** see *s.s, sheep-dung*. **s.s, sheep-dung,** the small round fecal masses (similar to the dung of sheep) due to atony of the intestine; this form of passage may occur in the socalled "starvation" or "hunger" evacuation which is found in cases of inanition, *e g*, after carcinomatous cachexia when the intestine becomes very much contracted. **s.-sieve of Boas,** an apparatus by means of which feces may be thoroughly and conveniently washed, so that undigested remains of food, bits of mucus, concretions, and parasites are readily seen and isolated.

stop [ME., *stoppen*, to stop]. To plug up; to hold back; to hinder. **s.-cock,** a turning cock, connected with a pipe, for regulating the flow of gases or liquids. **s.-needle,** a lance-pointed needle used in the operation of discission, having an enlargement or shoulder upon the shank to prevent too deep penetration.

stoppage (*stop'-aj*) [ME., *stoppen*, to stop]. Cessation of flow or action; closure or stegnosis.

stopper, stopple (*stop'-er, stop'-l*) [ME., *stoppen*, to stop]. A plug or other closure for a bottle, commonly made of cork, rubber, or glass. **s.-dropper,** a combination of stopper and medicine pipet in one piece.

stopping (*stop'-ing*). See *filling*.

storax (*sto'-raks*). See *styrax*.

storesin (*sto-rez'-in*) [*storax*]. An amorphous resin forming the largest ingredient of storax.

Stoughton's elixir (*stow'-ton*). Tinctura absinthii composita; a tincture of wormwood, germander, gentian, rhubarb, orange-peel, cascarilla, and aloes; used as a flavor in alcoholic drinks and as a general tonic.

stovaine (*sto'-va-ēn; sto'-vān*) $C_{14}H_{21}NO_2HCl$. Amylene hydrochloride. A local anesthetic, also used in spinal anesthesia.

stovainization (*sto-va-ni-za'-shun*). The production of local anesthesia by the subarachnoid injection of stovaine.

stovarsol (*sto-var'-sol*). Trade name of acetylaminohydroxyphenylarsonic acid; the acetyl derivative of 3-amino-4-hydroxyphenyl-1-arsonic acid. Stovarsol contains 27 % of arsenic.

strabilismus (*strab-il-iz'-mus*). See *strabismus*.

strabism (*strab'-izm*). See *strabismus*

strabismal, strabismic (*strab-iz'-mal, strab-iz'-mik*) [*strabismus*]. Relating to strabismus.

strabismometer (*strab-iz-mom'-et-er*). See *strabometer*.

strabismometry (*strab-iz-mom'-et-re*) [*strabismus; μέτρον*, measure]. The measurement of the degree of strabismus

strabismus (*strab-iz'-mus*) [*στραβισμός*, from *στραβός*, crooked]. Squint; that abnormality of the eyes in which the visual axes do not meet at the desired objective point, in consequence of incoordinate action of the external ocular muscles **s., alternating,** one in which either eye fixes alternately. **s., bialteral,** same as *s., alternating* **s., concomitant,** one in which the squinting eye has full range of movement. **s., convergent,** one in which the squinting eye is turned to the nasal side. **s., divergent,** one in which the squinting eye is turned to the temporal side. **s., external,** see *s., divergent*. **s., Hirschberg's test for,** a rough estimate of the amount of strabismus is made by observing the position of the corneal reflection of a candle-flame held one foot in front of the eye to be tested, the examiner placing his own eye near the candle and looking just over it **s., internal,** see *s , convergent* **s., paralytic,** due to paralysis of one or more muscles. **s., spastic,** due to a spastic contraction of an ocular muscle. **s., sursumvergens,** one in which the visual axis is directed upwards.

strabometer (*strab-om'-et-er*) [*strabismus; μέτρον*, measure]. An instrument for the measurement of the deviation of the eyes in strabismus.

strabometry (*strab-om'-et-re*) [*strabismus; μέτρον*, measure]. The determination of the degree of ocular deviation in strabismus

straboscopic (*strab'-o-skop'-ik*) [*strabismus;* crooked; *σκοπεῖν*, to see]. Pertaining to the appearance of objects as seen by one with strabismus **s. disc,** an instrument producing distortion of objects.

strabotome (*strab'-o-tōm*) [*strabismus; τέμνειν*, to cut]. A knife used in strabotomy.

strabotomy (*strab-ot'-o-me*) [see *strabotome*]. An operation for the correction of strabismus.

Strachan's disease (*strorn*) [William Henry Williams *Strachan*, English physician]. Pellagra.

strain (*strān*) [OF., *estraindre*, from L., *stringere*, to draw tight]. 1. Excessive stretching; overuse of a part. 2. The condition produced in a part by overuse or wrong use, as eyestrain. 3. To overexert; to use to excess; to make violent efforts. 4. A subvariety of any domestic animal, often locally called breed. 5. In pharmacy, to separate insoluble substances from the liquid in which they occur, to filter.

strait (*strāt*) [Fr., *étroit*, from *strictus*, drawn tight]. A narrow or constricted passage, as the inferior or superior *strait* of the pelvis. **s., inferior** (of the pelvis), see under *pelvis* (3). **s.-jacket,** a strong jacket placed on the insane or delirious to prevent injury to themselves or to others. **s., superior** (of the pel-

vis), see under *pelvis* (3). **s.-waistcoat,** see *s.-jacket.*

stramonium (*stra-mo'-ne-um*). The thorn-apple. The *stramonium* of the U. S. P is the dried leaves of *Datura stramonium,* Jamestown weed or jimson-weed, a plant of the order *Solanaceæ.* It contains two alkaloids, *daturine,* identical with atropine, and *hyoscyamine.* The action of stramonium resembles that of belladonna. In asthma the leaves may be smoked in a tobacco pipe. Locally stramonium is employed as an ointment or cataplasm in irritable ulcers and inflamed surfaces. **s., extract of** (*extractum stramonii,* U. S. P.). Dose ½ gr. (0.01 Gm.). **s., fluidextract of** (*fluidextractum stramonii,* U. S. P.). Dose 1 min. (0 05 Cc.). **s. ointment** (*unguentum stramonii,* U. S. P.), an ointment made of stramonium extract, diluted alcohol, hydrous wool-fat, and benzoinated lard. **s., tincture of** (*tinctura stramonii,* U. S. P) Dose 8 min. (0.5 Cc).

strangalesthesia, strangalæsthesia (*stran-gal-es-the'-ze-ah*). See *zonesthesia.*

strangles (*strang'-lz*) [σταγγάλη, a halter]. An infectious catarrh of the upper air-passages especially of the nasal cavity, of the horse, ass, and mule, associated with suppuration of the submaxillary and other lymphatic glands.

strangling. See *strangulation.*

strangulated (*strang'-gū-la-ted*). 1. Choked. 2. Compressed so that the circulation is arrested, as *strangulated* hernia.

strangulation (*strang-gū-la'-shun*) [*strangulare,* to choke]. 1 The act of choking 2. Constriction of a part producing arrest of the circulation, as *strangulation* of a hernia.

strangury (*strang'-gū-re*) [στράγξ, a drop; οὖρον, urine] Painful urination, the urine being voided drop by drop.

strap. 1. A long band, as of adhesive plaster. 2. To compress a part by means of bands, especially bands of adhesive plaster.

Strasburger's cell-plate [Edward *Strasburger,* German histologist, 1844–]. The equatorial plate in which division of the nucleus occurs during karyokinesis

Strassburg's test for bile-acids (*strahs'-boorg*) [Gustav Adolf *Strassburg,* German physiologist, 1848–]. Dip filter-paper into urine to which cane-sugar has been added; dry it, and apply a drop of sulphuric acid. In the presence of bile-acids a red coloration will be shown on the paper. For this test the liquid must be free from albumin.

stratification (*strat-e-fik-a'-shun*) [*stratum; facere,* to make]. Arrangement in layers.

stratified (*strat'-e-fīd*) [see *stratification*]. Arranged in layers.

stratiform (*strat'-e-form*) [*stratum; forma,* form]. Formed into a layer. **s. fibrocartilage,** fibrocartilage lining bony grooves through which the tendons of muscles pass.

stratum (*stra'-tum*) [L., from *sternere,* to strew]. A layer. **s. albocinereum,** the alternate white and gray matter of the corpus striatum. **s. bacillatum, s. bacillosum, s. bacillorum,** the bacillary layer, the layer of rods and cones of the retina. **s. choriocapillare,** see *tunica ruyschiana.* **s. cinereum,** the most superficial layer of the cortex of the cerebellum; also of the anterior lobes of the corpora quadrigemina and of the floor of the fourth ventricle. **s. compactum,** the surface layer (about one-fourth) of the decidua vera. **s. corneum, s. granulosum, s. lucidum, s. Malpighii,** see under *skin.* **s. corticale,** see *cortex* (3). **s. cutaneum,** the outer dermic layer of the tympanic membrane. **s. cylindrorum,** the bacillary layer of the retina. **s. episclerata,** the part of Tenon's capsule on the sclerotic coat. **s. epitrichiale,** see *epitrichium.* **s. gelatinosum,** the fourth layer in the olfactory bulb, composed of large ganglion-cells with branched processes. Syn. *ganglion-cell layer.* **s. glomerulorum,** the layer of the olfactory lobe (the second from the ventral side) containing the olfactory glomerules. **s. granulosum,** a layer of minute cells or one of cells containing many granules. 1. The external granular layer of the retina. 2. Meynert's name for the layer of small, irregular cells composing the fourth stratum of the cortex in the five-stratum type. 3. The layer of the olfactory lobe lying between the medullary ring and the stratum gelatinosum. 4. The layer of the epidermis covering the rete mucosum. 5. A histological appearance in that portion of the dentin immediately underlying the enamel and cementum of a tooth. **s. griseum centrale,** see *entocinerea.* **s. lacunosum,** the inner portion of the fifth or outer layer of the hippocampus. **s. lucidum,** a translucent layer of the epidermis consisting of irregular transparent cells with traces of a nucleus **s. moleculare,** see *layer, molecular.* **s. mucosum,** see *rete mucosum* **s. nerveum of Henle,** the layers of the retina exclusive of the rods and cones Syn., *Bruecke's tunica nervea.* **s. oriens,** the third layer, counting from within outward, of the hippocampus. **s. nucleare,** that part of the gray matter of the medulla forming the floor of the fourth ventricle. **s. proligerum,** the discus proligerus and cumulus proligerus regarded as one. Syn., *membrana cumuli.* **s. reticulatum, Arnold's,** the network formed by the fibers connecting the occipital lobe with the thalamus before they enter the latter. **s. spinosum,** see *prickle-layer* Consecutive hypertrophy of this layer constitutes acanthosis. **s. spongiosum,** the deeper layer (about three-fourths) of the decidua vera **s. vasculosum,** see *tunica vasculosa.* **s. vasculosum cutis,** the subpapillary layer of the derma; the part of the corium immediately below the papillæ. **s. zonale,** the superficial portion of the fifth or outer layer of the hippocampus.

Straus' sign (*strows*) [Isidore *Straus,* French physician, 1845–1906]. In facial paralysis from a central cause the hypodermatic injection of pilocarpine causes no appreciable difference in the perspiration of the two sides, either as to time or quantity, whereas there is a marked retardation of the secretion on the affected side in severe peripheral paralysis. **s.'s reaction.** The injection of material containing the bacillus of glanders into the abdominal cavity of a male guinea pig is followed in a few days by a characteristic, generally purulent, inflammation of the testes.

Strauss's sign (*strows*) [Hermann *Strauss,* German physician, 1868–]. The administration of fatty food by the mouth causes an increase in the amount of fatty constituents in the effusion of chylous ascites.

strawberry-marks. Same as mother's marks, *q. v.*

strawberry-tongue. The characteristic tongue of scarlatina, in which the vessels of the fungiform papillæ become turgid, causing the papillæ

to stand out as red points, in marked contrast with the thick coating of fur on the filiform papillæ

streak (*strēk*) A furrow, line, or stripe **s., culture,** a bacterial culture in streaks **s.s, Knapp's angioid,** pigment streaks appearing occasionally in the retina after hemorrhage **s., medullary,** see *medullary groove* **s., meningitic,** see *tache cérébrale* **s., primitive,** an opaque band extending some distance forward from the posterior margin of the area pellucida, and forming the first noticeable sign of the development of the blastoderm **s, reflex,** a shining white streak running along the center of the vessels in the retina It is due to the reflection of the light from the anterior surface of the column of blood

stream (*strēm*) [ME, *streem*] To flow, applied to movement in protoplasm and in blood corpuscles

stremma (*strem'-ah*) [*στρέμμα*, a sprain twist] A sprain

strengthening plaster. Emplastrum roborans or iron-plaster

strephosymbolia (*stref o sim bol'-e-ah*) [*στρέφειν*, to twist, *σύμβολον*, symbol] 1 Word blindness 2 Difficulty in learning to read 3 Tendency to reverse the direction of reading

strephotome (*stref'-o tōm*) [*στρέφειν*, to twist, *τεμνειν* to cut] An instrument shaped like a corkscrew, formerly used to secure union in the operation for the radical cure of hernia

strepitus (*strep'-ī-tus*) [L, noise] A sound, a noise **s. aurium,** see *tinnitus aurium* **s. coriaceous,** an auscultatory sound resembling the creaking of leather **s. uteri,** see *souffle, uterine* **s. uterinus,** the *uterine bruit, q v*

strepto- (*strep-to-*) [*στρεπτός*, twisted] A prefix signifying twisted

streptoangina (*strep to-an'-jin-ah*) A pseudomembranous deposit in the throat due to streptococci (J E Walsh) Cf *diphtheroid* (2)

streptobacillus (*strep to-bas-il'-us*). A bacillus forming twisted chains

streptobacteria (*strep-to-bak-te'-re-ah*) [*strepto-*, *βακτηριον*, bacterium] Short, rod-shaped bacteria forming chains

streptococcal, streptococcic, streptococcous (*strep-to-kok'-al, -ik, -us*) Relating to or due to streptococci

streptococcemia, streptococcæmia (*strep-to-kok-se'-me-ah*) [*streptococcus, αἷμα*, blood] The presence of streptococci in the blood

streptococcolysin, streptocolysin (*strep-to-kok-ol'-is-in, strep-to-kol'-is-in*) [*streptococcus, λύειν*, to loosen] A hemolysin produced in cultures of streptococci

Streptococcus (*strep to-kok'-us*) [*strepto-, κόκκος*, a kernel] A genus of schizomycetes of which the cocci are arranged in strings See *table* p 799 **s -angina,** angina due to streptococci **s -curve,** the remitting temperature-curve in hectic fever, supposed to depend upon the streptococcus (Petruschky)

streptocolysin (*strep-to-kol'-is-in*) [*streptococcus, λύειν*, to loose]. A hemolysin produced in cultures of streptococci

streptocosis (*strep-to-ko'-sis*) Infection by streptococci

streptocyte (*strep'-to-sīt*) [*strepto-; κύτος*, cell] A cell presenting a twisted appearance or occurring with others in twisted chains, a streptococcus

sterptodermatitis (*strep-to-der-mat-i'-tis*) Inflammation of the skin due to streptococci.

streptomycosis (*strep-to-mis-ko'-sis*) [*streptococcus; μύκης*, fungus] Infection with streptococci

Streptopus (*strep'-to-pus*) [*strepto-, πούς*, foot]. Twisted stalk, a genus of liliaceous plants *S distortus* is indigenous to Europe and America, and is used in infusion as a gargle

streptosepticemia, streptosepticæmia (*strep-to-sep-tis-e'-me-ah*) Septicemia due to streptococci

streptothrical (*strep-to-thrik'-al*) Relating to or due to members of the genus *Streptothrix*

streptothricosis (*strep-to-thrik o'-sis*) Infection with streptothrix

Streptothrix (*strep'-to-thriks*) A class of *schizomycetes*

stress A dental term to denote the force with which the jaws are closed during mastication

stretch. To draw out to full length **s.-walk,** a position in walking for physical development, with the arms stretched upward

stretcher (*stretsh'-er*) See litter.

stria (*strī'-ah*) [L a streak, *pl*, *striæ*] **s. cornea,** a narrow white streak interpolated between the thalamus and the caudatum on the ventricular floor A streak or white line **s. medullaris,** a band of white matter adjacent to the tænia thalami (Barker) **s medullaris thalami,** an oblique furrow on the superior aspect of the thalamus **s., pineal,** the habena or habenula **s. terminalis,** tænia semicircularis **s. vascularis,** the vascular upper part of the spiral ligament of the scala media

striæ (*strī'-e*) [L, *pl* of *stria*] **s. acusticæ,** transverse white lines on the lower part of the floor of the fourth ventricle, which unite with the auditory nerve roots **s atrophicæ,** whitish, cicatricial lines of the skin caused by the contractions of skin that have been stretched by fat, pregnancy, etc **s. gravidarum,** the atrophic striæ observed upon the abdomen in pregnant women **s longitudinales,** long, slightly elevated lines on the upper surface of the corpus callosum **s. medullares,** see *s acusticæ* **s. musculares,** the transverse markings of striated muscles **s. Schreger's,** Schreger's lines, *q v*

striatal (*strī'-a-tal*) Pertaining to the corpus striatum

striate, striated (*strī'-āt, strī'-ā-ted*) [*stria*] Striped **s. body,** the corpus striatum **s. muscle,** see under *muscle*, and *muscular tissue*

striation (*strī-a'-shun*) [*stria*] 1 The state of being striated 2 A striated structure **s, tabby-cat,** see *tabby-cat striation*

striatum. 1 See *stratum* 2 The corpus striatum **s. oriens,** see *stratum oriens*

stricture (*strik'-tur*) [*strictura*, from *stringere*, to draw tight] A narrowing of a canal from external pressure, or as a result of inflammatory or other changes in its walls **s., annular,** a ring-like obstruction produced by a fold of mucous membrane or constriction all around the urethra, gut, etc **s., bridle,** a fold of mucous membrane forming a crescentic obstruction, or perforated in its center, called, also, *s, linear, s, pack thread, s, valvular,* and *s, hour-glass,* according to the peculiar appearances **s., cicatricial,** a stricture due to cicatricial tissue **s, congestive,** a temporary obstruction of the urethra from subacute prostatitis or other passing inflammation. **s -cutter,** an instrument for dividing a stricture **s.-fever,** the constitutional disturbances sometimes the result of acute stricture **s., functional,** see *s, spasmodic* **s., impermeable,**

or **s., impassable,** one not permitting the passage of a bougie or catheter. **s., irregular,** or **s., tortuous,** so named from the complications or peculiarities. **s., irritable,** one in which the passage of the instrument causes great pain. **s., organic,** narrowing of a canal due to tissue-change, to deposits, or to pressure from without. **s., permeable** or **passable,** one permitting the passage of an instrument. **s., recurrent** or **contractile,** one in which the constriction returns after dilatation. **s., simple,** one that produces no interruption of function, pain, etc. **s., spasmodic,** a stricture due to muscular spasm and not to organic change

stricturotome (*strik'-tū-ro-tōm*) [*stricture; τέμνειν*, to cut]. An instrument for dividing a stricture.

stricturotomy (*strik-tū-rot'-o-me*) [see *stricturotome*]. The operation of incising a stricture.

stridor (*stri'-dor*) [*stridere*, to make a creaking sound]. A peculiar, harsh, vibrating sound produced during expiration. **s. dentium,** grinding of the teeth. **s., inspiratory,** the sound heard in inspiration through a spasmodically closed glottis. **s., laryngeal,** stridor due to laryngeal stenosis. **s., laryngeal, congenital.** Respiratory croaking (in babies). **s. serraticus,** a sound like that of sharpening a saw, sometimes produced by expiration through a tracheotomy-tube.

stridulous (*strid'-ū-lus*) [*stridor*]. Characterized by stridor. **s. laryngismus,** see *laryngismus stridulus*.

stringent (*strin'-jent*) [*stringere*, to bind]. Binding.

string-galvanometer. Same as electrocardiograph, *q. v.*

stringhalt (*string'-hawlt*) [a corruption of *springhalt*]. A popular name for a nervous affection manifested in involuntary, convulsive movements of one or both hind legs of a horse. See *springhalt*.

striocellular (*stri-o-sel'-ū-lar*). Relating to or composed of striated muscle-fiber and cells.

stripe (*strīp*) [ME., *stripe*, a stripe]. A streak; a discolored mark.

stripping (*strip'-ing*) [ME., *stripen*, to rob]. Uncovering; unsheathing In the plural, the last and richest milk given at any one milking; so called because it is slowly removed by the milker, who strips the teats between the fingers. **s. of the pleura,** removal of the lining membrane of the thorax of an animal used for food, to remove the traces of pleurisy and of tuberculosis.

strobic (*strob'-ik*) [*στρόβος*, a top]. Resembling or pertaining to a top **s. discs,** discs drawn with concentric circles, so as to produce an illusory impression as if they were revolving.

strobila (*strob-i'-lah*) [*στρόβιλος*, a pine-cone. *pl.*, *strobilæ*]. 1. A form of development occurring in the *cnidaria* and *cestoda*, in which the products of asexual generation by a sort of fission remain attached to the proliferating organism or to each other. 2. A name given to a tapeworm as a whole. **s., monodisc,** the simplest form of strobilation, in which the disc (*scyphistoma*) separates from its peduncle. **s., polydisc,** that form in which successively formed discs remain attached.

strobilation (*strob-il-a'-shun*) [*στρόβιλος*, a pine-cone]. The formation of zooids, discs or joints by metameric division, gemmation, or fission.

strobile (*strob'-il*) [*στρόβιλος*, a pine-cone]. 1. A multiple fruit in which the seeds are enclosed by prominent scales, as a pine-cone. 2. A strobila.

strobiloid (*stro'-bil-oid*) [*στρόβιλος*, a pine-cone; *εἶδος*, like]. Like a strobile.

strobilus (*stro-bi'-lus*) [*strobilus*, a pine-cone]. The tape-worm.

stroboscope (*stro'-bo-skōp*) [*στρόβος*, a twisting; *σκοπεῖν*, to view]. An instrument by which a series of slightly different pictures presented rapidly in succession is made to appear as a continuous object in motion; a zoetrope. **s., direct,** one in which the figures and slits revolve in the same direction; a phenakistoscope **s., reverse,** one in which the figures and slits revolve in opposite directions; a dedalum.

stroboscopic (*strob-o-skop'-ik*) [*stroboscope*]. Pertaining to the stroboscope.

strobostereoscope (*stro-bo-ster'-e-o-skōp*). See *stereostroboscope*.

Stroganoff's method (*stro-gan'-off*) [Vasilii Vasilovich *Stroganoff*, Russian obstetrician]. Management of cases of puerperal eclampsia by, narcotics, protection from all external stimuli, and immediate delivery.

stroke (*strōk*). 1. In pathology, a sudden and severe seizure or fit of disease. 2. A popular term for apoplexy. 3. To pass the hands gently over the body. **s., apoplectic,** see *apoplexy*. **s., back,** of the heart, the supposed "reaction-impulse," or recoil of the ventricles at the moment the blood is discharged into the aorta. **s., heat,** see *hyperpyrexia*. **s., paralytic,** sudden loss of muscular power from lesion of the brain or spinal cord.

stroma (*stro'-mah*) [*στρῶμα*, a bed]. The tissue forming the framework for the essential part of an organ. **s., cancer,** the fibrous tissue element of a cancer

stroma fibrin. Landois' term for fibrin formed directly from stroma, as distinguished from plasma-fibrin or that formed in the usual way. **s.-plexus,** a plexus of axis-cylinders formed by the corneal nerves.

stromal (*stro'-mal*). Pertaining to stroma.

stromatic (*stro-mat'-ik*). Resembling a stroma.

stromatolysis (*stro-mat-ol'-is-is*) [*stroma; λύειν*, to loosen]. A dissolution of the stroma or surrounding membrane of a cell, without the cell body being affected.

strombodes jenneri (*strom-bo'-dēz jen'-er-i*). A name proposed by Sjöbring for the micro-organism of vaccinia.

Stromeyer's cephalhematocele (*stro'-mi-er*) [Georg Friedrich Louis *Stromeyer*, German surgeon, 1804–1876]. Subperiosteal cephalhematoma communicating with veins and becoming tensely filled during strong expiratory efforts. **S.'s splint,** one used to prevent stiffness of the joints in case of fracture It consists of two hinged parts that can be fixed at any angle.

stromuhr (*stro'-moor*) [Ger.]. An instrument for measuring the velocity of blood-flow.

strongylosis (*stron-jil-o'-sis*). Infection with worms of the genus *Strongylus*.

Strongylus (*stron'-jil-us*) [*στρογγύλος*, round]. A genus of nematode worms found in the lower animals, and occasionally in man.

strontia (*stron'-she-ah*). Strontium oxide.

strontium (*stron'-she-um*) [*Strontian*, a town in Scotland]. A metallic element belonging to the group of alkaline earths. It has a specific gravity of 2.5, an atomic weight of 87.63, and a valence of two. Symbol Sr. **s. acetate,** $2Sr(C_2H_3O_2)_2 + H_2O$, a white crystalline powder, soluble in water, used as an anthelmintic. Dose ¼–¾ gr. (0.016–0.05 Gm.). **s. arsenite,**

$Sr(AsO_2)_2 + 4H_2O$, a white powder soluble in water, used as an alterative and tonic in skin diseases and malarial conditions Dose $\frac{1}{30}$–$\frac{1}{15}$ gr (0 002–0 004 Gm) **s bromide** (*strontii bromidum*, U S P), $SrBr_2\,6H_2O$, has been used in epilepsy, diabetes gastrectasis, rheumatoid arthritis, and lithemia Dose 15–30 gr (1–2 Gm) **s. and caffeine sulphonate,** $(C_8H_9N_4O_2\text{-}SO_3)_2Sr$, soluble in water, used as a diuretic Syn *symphorol strontium* **s glycerinophosphate,** a white powder, soluble in water, containing 26–27 % of phosphoric acid **s. iodide** (*strontii iodidum*, U S P), $SrI_2\,6H_2O$, is used like the other oxides **s lactate,** $Sr(C_3H_5O_3)_2\text{-}3H_2O$, is used in nephritis albuminuria rheumatism, and gout Dose 10–30 gr (0 65–2 0 Gm) **s loretinate** (basic), Sr I O $C_9H_4N\text{-}SO_3$ fine, bright needles, slightly soluble in water, decomposed at 300° C **s. loretinate** (normal), Sr(I OH C_9H_4N $SO_3)_2\,H_2O$, orange-red, prismatic crystals, sparingly soluble in water **s oxide,** strontia SrO, strontium combined with oxygen **s. phosphate,** $Sr_3(PO_4)_2$, a white powder devoid of taste, soluble in acids, used as a nutritive and tonic Dose 10–30 gr (0 65–2 0 Gm) **s. salicylate** (*strontii salicylas*, U S P), $Sr(C_7H_5O_3)_2\,2H_2O$, white crystals, soluble in water, used in gout, chorea etc Dose 10–40 gr (0 65–2 6 Gm)

strophanthin (*strof-an'-thin*) [*strophanthus*] *Strophanthinum* (U S P), $C_{20}H_{34}O_{10}$ A toxic glucoside, soluble in water and alcohol, derived from strophanthus Dose $\frac{1}{300}$–$\frac{1}{200}$ gr (0 0002–0 0003 Gm) **s tannate,** a yellowish, amorphous powder containing 59% of strophanthin, soluble in water, used as a heart tonic Dose $\frac{1}{150}$–$\frac{1}{100}$ gr (0 0004–0 001) Gm

strophanthone (*stro-fan'-thōn*) Trade name of a preparation containing the active principles of strophanthus

Strophanthus (*strof an' thus*) [στρόφος, a twisted band, ἄνθος, flower] A genus of plants of the order *Apocynaceæ*, some of the species of which are used for the preparation of arrow-poison in Africa The strophanthus of the U S P is the ripe seed of *S kombé*, it contains a crystalline glucoside *strophanthin*, and an alkaloid, *sneine* Strophanthus is a muscle-poison, but in small doses is a cardiac and perhaps a vascular stimulant It is used in the same cases as digitalis **s , tincture of** (*tinctura strophanthi*, U S P, B P Dose 5–15 min (0 32–1 0 Cc)

strophantism (*stro-fan'-tizm*) Poisoning from strophanthin, the symptoms resemble those of digitalism

strophium (*strof'-e-um*) [στρόφος a cord] A bandage

strophocephalus (*strof o sef'-al-us*) [στρόφος twisted, κεφαλη head] A monster having displacement of the parts forming the head and face

strophocephaly (*strof o sef'-al-e*) [*strophocephalus*] Distortion of the head, the condition of having a distorted head

strophulus (*strof'-u-lus*) [στρόφος, a twisted band] A form of miliaria occurring in infants Syn , *red gum, tooth-rash* **s. albidus,** same as *milium* **s. confertus,** see *s intertinctus* **s. infantum,** an urticarial disease of infants **s. intertinctus,** a popular dermatitis of more or less acute form, a variety of eczema common in infants **s. puriginosus,** an eruption occurring in children, and characterized by disseminated, intensely itching papules **s. volaticus,** an acute skin disease a typical erythema papulatum, characterized by slight maculæ

structural (*struk'-tū-ral*) [*structura*, structure]. Pertaining to or affecting the structure.

structure (*struk'-tūr*) [*structura, struere*, to build] The manner or method of the building up, arrangement, and formation of the different tissues and organs of the body or of a complete organism Also an organ, a part, or a complete organic body

Struempell's disease (*strūm'-pel*) [Adolf von *Struempell*, German physician, 1853–1925] 1. Poliencephalitis 2 Chronic ankylosing inflammation of the vertebral column **S.'s type of spastic paralysis,** the hereditary, familiar form of spastic spinal paralysis

Struempell-Leichtenstern's disease (*strum'-pel-lik'-ten-stern*) Acute encephalitis of infancy.

Struempell-Marie's disease (*strūm-pel-ma-re'*) Rhizomelic spondylosis

struma (*stroo' mah*) [L] 1 Scrofula 2 Goiter, **s aberrate,** a goiter of an accessory thyroid gland **s. maligna,** carcinoma of the thyroid gland **s suprarenalis,** a peculiar fatty tumor of the suprarenal bodies **strumæ lipomatodes aberratæ renis,** Grawitz s term for a group of new-growths of kidney, usually benign, but, at times, serving, as the foci of origin of malignant tumors Regarded by some pathologists as endotheliomata, by others as adrenal rests (cf under *rest*)

strumectomy (*stroo-mek'-to-me*) [*struma*, ἐκτομή, excision] Excision of an enlarged or strumous gland, or of a goiter

strumiform (*stroo'-mif orm*) [*struma, forma*, form]. Having the appearance of struma

strumiprival, strumiprivous (*stroo-mi-pri'-val, -vus*) [*struma, privare*, to deprive] Deprived of the thyroid, due to removal of the thyroid, thyroprival

strumitis (*stroo mi'-tis*) [*struma*, ιτις, inflammation] Inflammation of a goitrous thyroid gland

strumoderma, strumoderm (*stroo-mo-der'-mah, stroo'-mo-derm*) See *scrofuloderma*

strumose (*stroo'-mōs*) [*struma*] Swollen on one side, possessing a wen like protuberance

strumosis (*stroo-mo'-sis*) See *strumositas*

strumositas (*stroo-mos'-it-as*) [*struma*] The tendency toward, or diathesis of, goiter or of scrofula

strumous (*stroo'-mus*) [*struma*] 1 Scrofulous 2 Goitrous

Struve's test for blood in urine (*stroo'-veh*) [Heinrich *Struve*, German physician] To the urine, previously treated with ammonia or caustic potash, add tannin and acetic acid until the mixture has an acid reaction In the presence of blood a dark precipitate is formed When this is filtered and dried, the hemin crystals may be obtained from the dry residue by adding ammonium chloride and glacial acetic acid.

strychnia (*strik'-ne-ah*) Same as *strychnine*

strychnine, strychnina (*strik'-nēn, strik-ni'-nah*) [see *strychnos*] *Strychnina* (U. S P), $C_{21}H_{22}N_2O_2$ One of the alkaloids of nux vomica. Dose $\frac{1}{60}$–$\frac{1}{30}$ gr (0 0011–0 0033 Gm), hypodermatically in chronic alcoholism, $\frac{1}{30}$–$\frac{1}{10}$ gr. (0 003–0 006 Gm) **s. acetate,** $C_{21}H_{22}N_2O_2\text{-}C_2H_4O_2$, small white crystals, soluble in 96 parts of water Use and doses the same as the alkaloid **s. arsenate,** $C_{21}H_{22}N_2O_2.As_2O_5$, a white, crystalline powder with bitter taste, soluble in 14 parts of cold water, 5 parts of hot water.

It is used as a tonic and alterative in tuberculosis, malaria, etc. Dose $\frac{1}{64}$–$\frac{1}{4}$ gr. (0.001–0.004 Gm.); hypodermatically, 0.5 % in liquid paraffin; of this 4–15 min. (0.25–0.9 Cc.) daily. **s. arsenite,** $(C_{21}H_{22}N_2O_2)_2As_2O_3$, a white crystalline powder, soluble in 10 parts of boiling water. It is tonic, alterative, and antiperiodic. Dose $\frac{1}{10}$–$\frac{1}{15}$ gr. (0.001–0.004 Gm.); subcutaneous dose 4–15 drops of a 0.5 % solution in liquid paraffin **s. bisaccharinate, s.-diorthosulphamin-benzoate,** used as is the arsenite. **s. camphorate,** $C_{21}H_{22}N_2O_2.C_{10}H_{16}O_4$, small white crystals or crystalline powder soluble in water, used as is the alkaloid. **s. citrate,** $C_{21}H_{22}N_2O_2$-$C_6H_8O_7$, white crystals, soluble in water; usage and dosage the same as the alkaloid **s. ferricitrate,** iron and strychnine citrate. **s. hydride,** obtained by the action of metallic sodium on strychnine in a boiling alcoholic solution and differing in physiological action from strychnine, it may, therefore, be used as a physiological antidote in strychnine poisoning. **s. hydrobromide,** $C_{21}H_{22}N_2O_2$ HBr, white acicular crystals, soluble in 32 parts of water, used as a tonic and sedative. Dose $\frac{1}{2}$–$\frac{1}{2}$ gr (0.002–0.005 Gm.). **s. hydrochloride,** $C_{21}H_{22}$-$N_2O_2.HCl + 3H_2O$, white needles, soluble in 50 parts of water at 22° C. Usage and doses the same as the alkaloid. **s. hydroiodide,** $C_{21}H_{22}N_2O_2$ HIO_3, white crystals, soluble in water. Used as is the alkaloid. **s. hypophosphite,** a white powder, used as a tonic in tuberculosis Dose $\frac{1}{32}$–$\frac{1}{12}$ gr. (0.002–0.005 Gm.). **s. with iron and quinine citrate,** iron and quinine citrate with strychnine; greenish-brown, transparent scales, soluble in water, and containing 3.4 % of pure strychnine It is tonic and antiperiodic. Dose 3–7 gr. (0.2–0.45 Gm.). **s. lactate,** $C_{21}H_{22}N_2O_2.C_3H_6O_3$, a white, crystalline powder, soluble in water. Usage and dosage the same as the alkaloid **s. nitrate** (*strychninæ nitras*, U. S. P.), $C_{21}H_{22}N_2O_2.NHO_3$, silky needles, soluble in 50 parts of water, 60 parts of alcohol, or 2 parts of boiling water or alcohol. Usage and dosage the same as the alkaloid **s. oleate,** a mixture of strychnine in oleic acid, soluble in ether and oleic acid, it is used in the external administration of strychnine. **s.-orthosulphamin-benzoate,** see *s. saccharinate*. **s. phenolsulphate,** see *s. sulphocarbolate*. **s. phosphate,** $(C_{21}H_{22}N_2O_2)_2H_3PO_4$ $+ 9H_2O$, a white, crystalline powder, soluble in water. Usage and dosage the same as the alkaloid **s. saccharinate,** $C_{21}H_{22}N_2O_2.C_6H_4$-$(SO_2)$ (CO)NH, a true salt of strychnine and saccharin; a white sweet powder, used in all cases where the alkaloid is indicated in doses one-third larger. **s. salicylate,** $C_{21}H_{22}N_2O_2$ - $C_7H_6O_3$, a white powder, soluble in water, recommended in rheumatism and chorea. Dose about the same as the alkaloid. **s. sulphate** (*strychninæ sulphas*, U. S. P.), $(C_{21}H_{22}N_2O_2)_2.H_2SO_4 + 5H_2O$, white, odorless, very bitter prisms, which effloresce in dry air; soluble in 50 parts of water, 109 parts of alcohol, 2 parts of boiling water, or 8.5 parts of boiling alcohol; melt at 200° C. The action differs but slightly from the alkaloid. Dose $\frac{1}{32}$–$\frac{1}{12}$ gr. (0.002–0.005 Gm.). **s. sulphocarbolate, s. sulphophenate,** a white crystalline powder, soluble in water or alcohol. **s. and zinc hydroiodide,** $C_{21}H_{22}N_2O_2.HI.ZnI_2$, small white crystals, soluble in water.

strychninism (*strik'-nin-izm*) [*strychnine*]. The state of being under the influence of strychnine.

strychninization (*strik-nin-iz-a'-shun*) [*strychnine*]. The condition produced by large doses of strychnine or nux vomica.

strychninize, strychnize (*strik'-nin-īz, strik'-nīz*). To bring under the influence of strychnine.

strychninomania (*strik-nin-o-ma'-ne-ah*) [*strychninæ; μανια*, madness]. Delirium from the use of strychnine or nux vomica.

strychnism (*strik'-nizm*) Same as *strychninism*.

Strychnos (*strik'-nos*) [*στρυχνος*, the nightshade]. A genus of the *Loganiaceæ*. *S. icaja* is found in the Gaboon region; it contains strychnine in the bark, leaves and root. From the stem the arrow-poison, tarfa, toomba, M'boundou, n'caza, icaja, or akanga, is prepared. The seeds of *S. ignatii* (St. Ignatius' beans) of the Philippines act in the same manner as nux vomica, but contain more strychnine and less brucine than it does. *S. potatorum* is indigenous to the East Indies. The seeds, nirmali, chilli, chilbing, are used largely to clear muddy water. They contain no strychnine or brucine, and are used as a remedy in diabetes and gonorrhea. The fruit is employed in dysentery. The bark of *S. pseudoquina*, of South America, contains no poisonous alkaloid, but a bitter substance, and is used as a substitute for quinine. *S. tieuté* is a species of Java; from the root-bark the Javanese arrow-poison, upas radju or tschetsik, containing 1.5 % strychnine and a little brucine, is prepared. The seed and leaves contain 1.4 % of strychnine and only traces of brucine. *S. toxifera*, of Guiana, furnishes curara.

stub-thumb. Abbreviation and clubbing of the phalanx of the thumb.

student's placenta. A retained placenta from improper manipulation.

Stuetz's test (*stūts*). See *Fuerbringer's test*.

stultitia (*stul-tish'-e-ah*) [*stultus*, a fool]. Foolishness; dulness of intellect.

stump. The extremity, pedicle, or basis of the part left after surgical amputation, excision, or ablation. **s. of eyeball,** the remainder of the globe after excision of an anterior staphyloma or after other capital operation on the globe that deprives it of vision **s.-foot,** synonym of *club-foot*. **s., sugar-loaf,** a conical stump due to undue retraction of the muscles, called, also, *conical stump*. **s. of tooth,** that part remaining after removal or destruction of the corona.

stun [AS. *stunian*, to make a din]. To render temporarily insensible, as by a blow.

stupe (*stūp*) [*stupa*, tow]. A cloth used for applying heat or counterirritation; especially a cloth wrung out of hot water and sprinkled with a counter-irritant as *turpentine-stupe*.

stupefacient, stupefactive (*stū-pe-fa'-shent, stū-pe-fak'-tiv*) [*stupor; facere*, to make]. Narcotic.

stupefaction (*stū-pe-fak'-shun*) [see *stupefacient*]. Stupor, and the process of reaching it.

stupemania (*stū-pe-ma'-ne-ah*) [*stupor; mania*]. Mental stupor with insanity

stupor (*stū'-por*) [L.]. The condition of being but partly conscious or sensible. Also a condition of insensibility. **s., anergic,** acute dementia. **s., delusional,** melancholic dulness of mind, with delusions; it is sometimes a kind of auto-hypnotism. **s., epileptic, s., post-convulsive,** the stupor following an epileptic convulsion. **s. formicans,** formication. **s., lethargic,** see *trance*. **s. melancholicus,** the stupor found in association with melancholia. **s. miliaris,** paresthesia

of the fingers and toes in connection with miliary fever **s. vigilans,** catalepsy.

stuporous (*stū'-por-us*) [*stupor*] In a condition of, or attended with stupor **s. insanity,** see *insanity, confussional*

stupration, stuprum (*stū-pra'-shun, stū'-prum*) [*stuprum*, defilement] Rape

sturdy (*stur'-de*) 1 Vigorous, hardy. 2 See *gid* and *staggers*

sturin (*stu'-rin*) [*sturio*, sturgeon] A protamine obtained from the sperm of the sturgeon

Sturm's focal interval (*stoorm*) [Johann Christoph *Sturm*, 1635–1703] The interval between the principal focal lines of a cylindrical lens

stutter (*stut'-er*) [Ger., *stottern*, to stutter] To hesitate or make repeated efforts to articulate a syllable Stuttering is a variety of stammering, see *stammering* **s -spasm,** see *lalophobia*

stuttering (*stut'-er-ing*) [Icel., *stauta*, to stutter] A hesitation in speech due to an inability to enunciate the syllables without repeated efforts **s, urinary,** hesitancy and involuntary interruptions in urination

sty, stye (*st*) See *hordeolum* **s., Meibomian,** abscess of a Meibomian gland **s, Zeissian,** abscess of one of Zeiss s glands

style, stylet (*stīl, stīs-let'*) [στῦλος, pillar] 1 A probe 2 A wire inserted into a catheter or cannula in order to stiffen the instrument or to perforate the tissues

styliform (*stī' lif-orm*) [*stilus*, stake, *forma*, form] Shaped like a style

styliscus (*stī-lis'-kus*) [στῦλος, a pillar *pl*, *stylisci*] 1 A slender cylindrical talent 2 In biology, the passage leading from the stigma to the ovary through the style

stylo- (*stī-lo-*) [στῦλος, pillar] A prefix denoting pertaining to the styloid process of the temporal bone

styloglossal (*stī lo-glos'-al*) [*stylo-, glossal*] Connected with or relating to the styloid process of the temporal bone and the tongue

styloglossus (*stī-lo-glos'-us*) See under *muscle*

stylohyal (*stī lo-hī'-al*) [*stylo-, hyoid*] One of the bones of the hyoid arch of vertebrates

stylohyoid (*stī-lo-hī'-oid*) [*stylo-; hyoid*] 1 Pertaining to the styloid process of the temporal bone and the hyoid bone, as the *stylohyoid* muscle See under *muscle* 2 Pertaining to the stylohyoid muscle

styloid (*stī'-loid*) [στῦλος, pillar, εἶδος, like] Resembling a stylus See under *process*

styloiditis (*stī-loid-ī'-tis*) [*styloid-; itis*, inflammation] Inflammation of the styloid process

stylomandibular (*stī-lo-man-dib'-ū-lar*) [*stylo-; mandible*] Pertaining to the styloid process and the mandible

stylomastoid (*stī-lo-mas'-toid*) [*stylo-, mastoid*] Pertaining to the styloid and mastoid processes

stylomaxillary (*stī-lo-maks'-il-a-re*) Pertaining to the styloid process and the maxilla

stylomyloid (*stī-lo-mī'-loid*). Stylomandibular.

stylopharyngeus (*stī-lo far-in-je'-us*) See under *muscle*

stylostaphyline (*stī lo-staf'-il-īn*) [*stylo-, staphyle*] Connected with or relating to the styloid process of the temporal bone and the velum palati

stylosteophyte (*stī-los'-te-o-fīt*) [*stylo-, φῦτον*, plant] A style-shaped exostosis

stylostixis (*stī-lo-stiks'-is*) See *acupuncture*

stylus (*stī'-lus*) [L., "a stake"] A pointed instrument for making applications A stylet

stym (*stī'-mah*) See *priapism*

stymatosis (*stī-mat-o'-sis*) [στῦμα, stiffness] A violent erection of the penis attended with hemorrhage

stype (*stīp* or *stī-pe*) [στύπη, tow] A tampon or pledget.

styphage, stypage (*ste-fahzh, ste-pahzh*) The production of local anesthesia by an application made with a stype **s., Bailly's,** a revulsive, the application of cotton pledgets wet with methyl chloride

stypsis (*stip'-sis*) [στυπτικός, astringent] 1 Constipation 2 The use of a styptic

styptase (*stip' tās*) Trade name of a styptic said to contain tannin, hamamelis, calcium chlorate and fluorides

styptéria (*stip-te'-re-ah*) Alum

styptic (*stip'-tik*) [στυπτικός, astringent] 1 Checking hemorrhage by contracting the blood-vessels 2 An agent that checks hemorrhage by causing contraction of the blood-vessels

styptícin (*stip'-tis in*) See *cotarnine hydrochloride*

styptícity (*stip tis'-it-e*) [στυπτικός, astringent] The quality of being styptic

styptol (*stip'-tol*) Cotarnine phthalate, an internal styptic

styracin (*stī'-ra-sin*) See under *styrax*

styracol (*stī'-ra kol*) Guaiacol cinnamate, $C_6H_4(OCH_3)C_9H_7O_2$ It is given internally in catarrhal affections of the digestive tract and in pulmonary tuberculosis

styrax (*stī'-raks*) [στύραξ, storax] Storax, a balsam obtained from the inner bark of *Liquidambar orientalis*, or oriental sweet-gum It contains a volatile oil, styrol, several resins, an amorphous substance called storesin, cinnamic acid, and styracin (the cinnamate of cinnamyl). It is stimulant, expectorant, and antiseptic, acting like benzoin and tolu, and is used in bronchial affections and catarrh of the urinary passages Externally it is an antiseptic and parasiticide It is a constituent of friars' balsam Dose 5–20 gr (0 32–1 3 Gm.)

styrene (*stī'-rēn*) [στύραξ, storax], $C_8H_{10}O$ Styryl alcohol, cinnamyl-alcohol, a substance obtained by saponifying styracin, its cinnamic ester, with potassium hydroxide It crystallizes in shining needles, is sparingly soluble in water, possesses a hyacinth-like odor, melts at 33° C., and distils at 250° C

styrol (*stī'-rol*), C_8H_8 Cinnamene, phenylethylene A colorless, highly refractive liquid hydrocarbon, obtained by heating styracin with calcium hydrate

styrolene (*stī'-ro-lēn*) Same as *styrol, q v*

styrone (*stī'-rōn*) [*sturax*] Cinnamic alcohol $C_9H_{10}O$ **s. crystals, s., crystallized,** cinnamic alcohol

styryl alcohol (*stī'-ril*) See *styrone*

sub- [L.] A prefix denoting under or beneath or deficiency, in chemistry, a prefix denoting—(1) the lower of two compounds of the same elements, (2) a basic salt

subabdominal (*sub-ab-dom'-in-al*) [*sub-, abdomen*] Beneath the abdomen

subabdominoperitoneal (*sub-ab-dom-in-o-per-it-o-ne'-al*) Beneath the abdominal peritoneum.

subacetabular (*sub-as-et-ab'-ū-lar*) Below the acetabulum

subacetate (*sub-as'-et-āt*) [*sub-; acetum*, vinegar]. A basic acetate

subacid (*sub-as'-id*) [*sub-, acidum*, acid] Moderately acid or sour

subacidity (*sub-as-id'-it-e*) [*subacid*] A condition of moderate acidity

subacromial (*sub-ak-ro'-me-al*) [*sub-*; *acromial*]. Below the acromion.

subacute (*sub-ak-ūt'*) [*sub-*; *acutus*, sharp]. 1. Moderately acute. 2. The stage of a disease when it is intermediate between an acute and a chronic form.

subagitatrix (*sub-aj-it-a'-triks*) [L.]. One who practises tribadism.

subalimentation (*sub-al-im-en-ta'-shun*). A condition of inadequate or deficient nourishment.

subanal (*sub-a'-nal*) [*sub-*; *anus*]. Situated below the anus.

subancestral (*sub-an-sest'-ral*). Not in the direct line of descent.

subanconeal (*sub-an-ko-ne'-al*) [*sub-*; *anconeus*]. Beneath the anconeus muscle.

subanconeus (*sub-an-ko-ne'-us*). See under *muscle*.

subapical (*sub-a'-pik-al*) [*sub-*; *apex*]. Beneath the apex.

subaponeurotic (*sub-ap-on-ū-rot'-ik*) [*sub-*; *aponeurosis*]. Beneath an aponeurosis.

subaqueous (*sub-a'-kwe-us*) [*sub-*; *aqua*, water]. Living beneath the water.

subarachnoid (*sub-ar-ak'-noid*) [*sub-*; *arachnoid*] Beneath the arachnoid membrane, as the *subarachnoid* space.

subarcuate (*sub-ar'-kū-āt*) [*sub-*; *arcus*, an arc]. Slightly arcuate.

subareolar (*sub-ar-e'-o-lar*) [*sub-*; *areola*]. Situated, or occurring beneath the mammary areola.

subastragalar, subastragaloid (*sub-as-trag'-al-ar, sub-as-trag'-al-oid*) [*sub-*; *astragalus*]. Below the astragalus. **s. amputation,** a partial removal of the foot, in which only the astragalus is left.

subastringent (*sub-as-trin'-gent*) [*sub-*; *astringens*, astringent]. Only slightly astringent.

subatloidean (*sub-at-loid'-e-an*). Located beneath the atlas.

subatomic (*sub-at-om'-ik*). Underlying atoms.

subaudition (*sub-aw-dish'-un*) [*sub-*; *audire*, to hear]. The act or ability of comprehending what is not expressed.

subaural (*sub-aw-ral*) [*sub-*; *aura*, ear]. Beneath the ear.

subauricular (*sub-aw-rik'-ū-lar*). Below the auricle of the ear.

subaxial (*sub-aks'-e-al*) [*sub-*; *axis*]. Lying below the axis.

subaxillary (*sub-aks'-il-a-re*) [*sub-*; *axilla*]. Situated below the axilla.

subbasal (*sub-ba'-sal*) [*sub-*; *base*]. Situated below or near the base or basal membrane.

subbrachial, aubbrachiate (*sub-bra'-ke-al, sub-bra'-ke-āt*) [*sub-*; *βράχιον*, arm]. 1. Under the pectoral muscles. 2. Beneath the brachium.

subbrachycephalic (*sub-bra-ke-sef-al'-ik*). Having a cephalic index from 80° to 84°.

subcalcareous (*sub-kal-ka'-re-us*) [*sub-*; under; *calx*, lime]. Somewhat calcareous.

subcalcarine (*sub-kal'-ka-ren*). Situated beneath the calcarine fissure, as the *subcalcarine* convolution. **s. convolution,** a narrow convolution ventrad of the cuneus and lying between the collateral and calcarine fissures.

subcallosal (*sub-kal-lo'-sal*) [*sub-*; *callosum*]. Below the corpus callosum.

subcapital (*sub-kap'-it-al*) [*sub-*; *caput*, head]. Beneath the head. **s. fracture of the femur,** fracture situated immediately below the head of the femur, *i. e.*, between the head and the neck.

subcapsular (*sub-kap'-sū-lar*) [*sub-*; *capsula*, capsule]. Beneath a capsule.

subcarbonate (*sub-kar'-bon-āt*) [*sub-*; *carbonate*]. A basic carbonate.

subcartilaginous (*sub-kar-til-aj'-in-us*) [*sub-*; *cartilago*, cartilage]. 1. Situated beneath cartilage. 2. Partly cartilaginous.

subcecal (*sub-se'-kal*) [*sub-*; *cecum*]. Lying below the cecum.

subcentral (*sub-sen'-tral*) [*sub-*; *center*]. 1. Situated near the center. 2. Ventrad of the central fissure of the brain.

subcerebellar (*sub-ser-e-bel'-ar*) [*sub-*; *cerebellum*]. Situated beneath the cerebellum.

subcerebral (*sub-ser-e'-bral*) [*sub-*; *cerebrum*]. Situated beneath the cerebrum.

subchloride (*sub-klor'-id*). That chloride of a series which contains relatively the least chlorine.

subchondral (*sub-kon'-dral*) [*sub-*; *χόνδρος*, cartilage]. Lying beneath cartilage.

subchordal (*sub-kor'-dal*) [*sub-*; *chorda*, cord]. Beneath the notochord.

subchorionic (*sub-ko-re-on'-ik*) [*sub-*; *chorion*]. Lying beneath the chorion.

subchoroidal (*sub-ko-roid'-al*) [*sub-*; *choroidal*]. Situated or occurring under the choroid.

subchronic (*sub-kron'-ik*) [*sub-*; *chronic*]. More nearly chronic than is indicated by the term subacute.

subclavian (*sub-kla'-ve-an*) [*sub-*; *clavis*, key]. Lying under the clavicle, as the *subclavian* artery.

subclavicula (*sub-kla-vik'-ū-lah*). The first rib.

subclavicular (*sub-kla-vik'-ū-lar*). Beneath the clavicle.

subclavius (*sub-kla'-ve-us*). See under *muscle*.

subcollateral (*sub-kol-at'-er-al*) [*sub-*; *collateral*]. Ventrad of the collateral fissure of the brain. **s. gyrus,** a convolution connecting the occipital and temporal lobes.
