GOULD'S
MEDICAL DICTIONARY

"Dr. George M. Gould is the Johnson of medical lexicography. His various dictionaries, adapted to the needs of student, practitioner, and scholar respectively, have had a commercial success that of itself is sufficient to prove their practical usefulness."

The British Medical Journal.

GOULD'S
MEDICAL DICTIONARY

THE WORDS AND PHRASES GENERALLY USED IN MEDICINE AND THE ALLIED SCIENCES, WITH THEIR PRONUNCIATION AND DERIVATION

by

GEORGE M. GOULD, A.M., M.D.

AUTHOR OF "AN ILLUSTRATED DICTIONARY OF MEDICINE, BIOLOGY, AND ALLIED SCIENCES," "THE PRACTITIONER'S MEDICAL DICTIONARY," "POCKET PRONOUNCING DICTIONARY," "BIOGRAPHIC CLINICS," ETC.

edited by

R. J. E. SCOTT, M.A., B.C.L., M.D.

and

C. V. BROWNLOW

FOURTH REVISED EDITION

WITH ILLUSTRATIONS AND ONE HUNDRED AND SEVENTY-FOUR TABLES

INCLUDING NEW TABLES OF PREFIXES, AND SUFFIXES; THE TABLES OF BACTERIA, METAZOA AND PROTOZOA PATHOGENIC TO MAN AND ANIMALS, BY D. H. BERGEY, M. D., LATE PROFESSOR OF HYGIENE AND BACTERIOLOGY, UNIVERSITY OF PENNSYLVANIA, ALSO THE INTERNATIONAL TABLE OF THE CAUSES OF DEATH

LONDON

H. K. LEWIS AND CO., LTD.

1935

COPYRIGHT, 1935, BY P. BLAKISTON'S SON & CO., INC.

"The use in this volume of certain portions of the text of the United States Pharmacopoeia, Tenth Edition, is by virtue of permission received from the Board of Trustees of the United States Pharmacopoeial Convention. The said Board of Trustees is not responsible for any inaccuracy nor for any errors in the statement of quantities or percentage strengths."

"Permission to use for comment parts of the text of the National Formulary, Fifth Edition, in this volume, has been granted by the Committee on Publication by authority of the Council of the American Pharmaceutical Association."

PRINTED IN U. S. A.
BY THE MAPLE PRESS COMPANY, YORK, PA.

PREFACE TO THE FOURTH EDITION

In this edition there are a large number of new words which elucidate the new conditions and methods that gave them birth. There are also many corrected older definitions which the advances in medicine and chemistry have made necessary. Room for these changes and additions (many of which are not yet to be found in any other medical dictionary) has been made by careful and skilful condensations in the resetting of the type of the pages on which the changes were made. Thus we have avoided adding more pages to the book. Mention should also be made of the fact that among the new inclusions will be found a four page table of medical and chemical Prefixes and Suffixes.

The frequent reprintings of Gould's dictionaries afford unusual opportunities for making timely additions and corrections. Thus it comes that these dictionaries are in the vanguard of the ever onward march of medicine and its allied sciences.

It is hoped that Gould's dictionaries will continue to deserve the confidence of the profession—a confidence that has manifested itself through the years by a world-wide sale which, in number, is now on the road to nine hundred thousand.

PREFACE TO THE FIRST EDITION

The year 1890 saw the birth of the first of Dr. George M. Gould's medical dictionaries under the title "A New Medical Dictionary." Two years later "A Pocket Medical Dictionary" of 12,000 words was published (the current edition contains 40,000 words), and this was followed, in 1894, by Dr. Gould's monumental work entitled "An Illustrated Dictionary of Medicine, Biology, and Allied Sciences," the current (6th) edition of which comprises 1700 double columned pages. Then, ten years later, a supplement to the Illustrated Dictionary, containing 38,000 words, was published under the title, "A Dictionary of New Medical Terms."

The title of the first dictionary, namely: "A New Medical Dictionary" was, in a later revision, changed to "The Student's Medical Dictionary," which contained a much larger vocabulary. Under this title the book was continued with revisions until 1906, when it gave place to a new and larger issue entitled "The Practitioner's Medical Dictionary," which has served the profession for a number of years and may still continue to do so. Now we come to the present issue "Gould's Medical Dictionary," which may be said to be the sum of all of Gould's dictionaries.

Important features of this dictionary, when compared with its immediate predecessor "The Practitioner's Medical Dictionary" should be self-evident: first, the larger and bolder type; second, the additional pictures; third, the increase in size of the volume; fourth, the added biographic detail, as well as many abbreviations now employed in current medical literature. What will not be evident is its aggregation of about 76,000 words; about 5,000 of these being entirely new—words that are not ostensible combinations of old words that merely take up room without adding to the value of the work, but legitimate *new* terms.

The skilful plan, wide scope, and distinctive qualities of the previous lexicons have been maintained, and the interests and needs of the busy practitioner and the active general medical reader kept in mind. No matter has been inserted that is not appropriate, and few pictures are included that are in the well used text and reference books. By thus avoiding mere embellishment or padding for the sake of size or pretentiousness, we believe the work will be found concisely serviceable and practical.

Eponymic terms are in their proper alphabetic order so that one no longer need be in doubt whether to look under test, reaction, phenomenon, syndrome, sign, or symptom, for the information sought. The tabulation and systematic classification of other correlated terms, established in usefulness, have been continued.

The spelling conforms to the standard requirements, and the terse definitions define. They are based upon the standard literature and authoritative textbooks of the day, therefore are not copies from the older vocabularies.

The pronunciation is clearly shown by a phonetic arrangement of letters, which saves time.

Proper names and their derivatives only have been capitalized in the title-words. This is in accord with present usage which is a revival of the custom of some of the lexicographers of the last century.

With the exception of the signs and symbols which have no letter equivalents, all of the matter has been placed in alphabetic order.

While "The Practitioner's Medical Dictionary" is a middle of the road work, this latest book, "Gould's Medical Dictionary," may be said to cover the broad high-way of the medical sciences.

New words seem to be coined almost daily. Rarely may one take up a medical paper or a new scientific book without encountering new words or various modifications of old words. In some cases the authors adopt a new vocabulary; and this involves much extra work on their readers.

In gathering and arranging new words, it has been interesting to note that the majority fall readily into three classes; (1) Really new words, which express new ideas, inventions, or discoveries—words which represent a genuine addition both to science and to language; these, of course, are the most important, but, unfortunately, they constitute numerically the smallest of the three groups. (2) There is a steadily growing increase of Proper names (Eponymic)—"so and so's" operation, or test, which quite frequently might more correctly be expressed as "so and so's modification of some-one else's" operation, or test; and, we may add in parenthesis, that very often the modification is of the slightest. (3) The largest class includes the long list of new remedies, with the large number of proprietary, patent, and other articles which, somehow, manage to get their names into current medical literature.

When a discoverer of a new gas, or operation, or test, etc. is viewing his offspring with parental pride, he should remember to exercise due care in the selection or production of an appropriate name. The code recognized by zoologists (as stated by Stiles in a publication of the United States Public Health and Marine Hospitals Service), is a good one; and while applicable as a whole only to zoologic terms .ts rules are particularly useful, and should be observed, whenever possible, by all who are reponsible for new terms. One rule, in particular, is capable of universal application, and should receive as wide recognition: that "No name should be allowed to be changed simply because it is inappropriate." The suitableness of a name should be canvassed thoroughly *before* the name is given. Thus would be avoided much of the confusion which exists in modern medical terminology Scientists, when about to assume the role of parents of new words, should, whenever necessary, seek the aid of the man with a knowledge of Greek, rather than undergo (without the help of a specialist) the pangs of etymologic labor, with the resulting birth of a linguistic monstrosity.

Nearly every printing of Gould's Medical Dictionaries contains additions, yet such printings have not been called new editions. Revisions have had to be more or less extensive before the publisher has felt justified in issuing a new edition. If, for instance, every printing of "The Pocket Medical Dictionary" had been called a new edition, the current edition would be the 55th instead of the 8th.

The constant aim of the publisher and editor has been to make even more accurate, more comprehensive, and more helpful this new member of the series of Gould's Medical Dictionaries, of which over 700,000 volumes, distributed over the world, attest their intrinsic enduring value; and this, as Dr. Gould was glad to feel, "evidences something of usefulness in the great cause of medical science and progress."

R. J. E. Scott.

NOTES CONCERNING THE HISTORY OF LEXICOGRAPHY*

Nomina si nescis perit cognitio rerum, said Coke with the acumen of the legal mind, and it is generally true that the knowledge of things depends upon the knowledge of their names. Discoveries of new facts, or new standpoints for viewing old facts, demand new tags or "nicking" symbols whereby their status may be fixed and their recognition insured and made more clear for distant or future students. Few philosophic and scientific minds may exhibit an aloofness and a freedom from the tyranny of words to enable them to study things without the aid of words and namings. But nothing, it is admitted, is more blundering in a personal sense, and more harmful to the progress of science, than the exhaustion of interest so soon as a classification and nomenclature have been made. The ridiculous is only needed to end in the absurd, and this is generally supplied by their wrong pigeon-holing and false ticketing. A diagnosis once made, a mere word, long, mysterious, and meaningless, pinned upon the bunched symptoms, and further study of etiology, prophylaxis, or therapeutics is with too many at an end. Over 200 years ago Dr. South tried to check this "fatal imposture and force of words" by showing how "the generality of mankind is governed by words and names," not by things as they are, but as they are called—in a word, by "verbal magic."

And yet in a groping science like medicine, one that inductively, slowly, and tentatively is feeling its way toward the truth, this need of naming every step forward is peculiarly necessary. It is the condition of securing the step in itself, and of guiding the aftercomers. It is the blazing of trails into the wilderness of the unknown. Of course no one can tell what lines of research may finally prove the best and true, and none, therefore, what blazes will be useful or useless. New trails shorter, easier, and better, may indeed be discovered, and when the wilderness country is settled, all trails will either be abandoned or become well-known roads. But even then good sign-posts and pointing index-fingers will be helpful for strangers, and some of the old names will never be discarded. None can surely foretell what words may die and what ones become a part of the language. Hence the lexicographer may not too recklessly exclude

The history of lexicography finds its first data about 700 or 800 A. D , in glosses, or the more common explanatory words annexed or superposed over "hard" terms, and made either in Latin or in the glossator's own vernacular. A list of such glosses was called a *glossarium*, or as we say, a glossary. It soon became the custom for children and students to learn by heart the classified lists of the names of things, such as those of the parts of the body, of animals, trades, tools, virtues and vices, diseases, etc. Such a list constituted a *vocabularium* or vocabulary. These glosses and vocabularies were in time thrown together in bundles, at first without any order, and as lists, without losing their individuality. Then came the "first letter order," in which all words and terms beginning with the letter A were bundled together, still without discrimination, so that the entire list of words beginning with A, or B, had to be scanned in order to find a special word. The classification proceeded to an arrangement of the items also according to the second letter, then the third, etc.,

* From the preface to Gould's "A Dictionary of New Medical Terms."

until after hundreds of years complete alphabetization came into use. At first the aim had been to explain difficult Latin words by easier Latin ones; then by English ones, and in the tenth and eleventh centuries the English equivalents were the rule, and the glossaries were Latin-English. The first book of this kind to be called a *dictionarium*, that is a repertory of *dictiones* or sayings, was that of Sir Thomas Elyot in 1538, and from that time the word *dictionary* has supplanted all others; so much so that it is now the title of any alphabetic gathering not only of words but of any kind of knowledge whatsoever.

Our modern language of medicine is unique in that it is made up of the unchanged and undigested materials and relics used or contributed during its entire history. The persisting substratum is Latin, upon which has been placed a mass of pseudo-greek words not physiologicly created nor grown by natural philologic methods, but springing Minervalike from the brains of thousands of modern Jupiters. These largely bear the marks of their parentage in characteristics that do not, or should not, beget a spontaneous pride of lineage. From a highly variegated medievalism that has, indeed, never ended, we have taken over another unassimilable conglomerate, and superadded are thousands of dissimilar terms derived from modern chemistry, biology, bacteriology, and many other sciences. Each single group of contemporaneous nationalities contributes to the others its share of names, and is itself hard at work endeavoring to fuse the whole heritage into homogeneity and unity with the amalgam of the spirit of the general language dominant among its people. The result is a strange hodge-podge of the medical language of two or more thousand years and of many special national tongues, in mechanic, not chemic mixture, with modern sounds and symbols, the whole amazingly heterogenous and cacophonous. The thirtieth century medical student will probably be compelled to memorize *iter a tertio ad quartum ventriculum*, etc , and to write his orders for drugs in a sad mixture of sorry Latin so far as his knowledge will carry, and then to end it in despair in the vulgar manner of speech of his contemporaries. In general biology the law holds that the ontogeny epitomizes and repeats the phylogeny; but only at the different successive stages of its individual development. In medical language the phylum is always present, and there are no successive stages; there has been no rebirth or inheritance; the ontogeny goes on preserving all the old origins and accretions, and simply adding the new to them. For this sort of evolution there is no name (unless Weissmann's immortality theory is applicable), and its study may be commended to the Darwins and Spencers of the future as a noteworthy exception to hitherto formulated laws. The result is before us: a huge and unassimilated philologic mass, many times greater than it should be, the despair of medical students and of the makers of dictionaries. These word-books, of course, reproduce the phylogenetic history in the same way, and there is no escape from the republication of all the methods and most all the words gathered and found useful in the course of ages. Here with some modifications of detail must be repeated the glosses and vocabularies of a thousand years ago, the foiled attempts together with the partial successes at alphabetic arrangement, and lastly the addition of the modern encyclopedia.

The functions of the dictionary-maker have thus become multipled and varied. As the gloss-lists and vocable-lists grew into dictionariums and as alphabetization became thoroughgoing, as one after another subject was added to the word-gatherer's work so our technical dictionary has at last become in part encyclopedic and expository, its plan and outworking still somewhat subject to the personality, scholarship, and judgment of the author. It will always remain an

open question how far the author should or may go in giving individual color to his dictionary. Johnson's famous definitions of *excise*, *lexicographer*, *oats*, *pension*, *pensioner*, *tory*, *whig*, etc.; Webster's "Americanism" in spelling; the Century's seconding in various ways the obvious trending of philologic progress,—these, and many such illustrate the lexicographer's belief in his own, at least, "limited" free-will.

"Johnson's great work," says Dr. Murray, "raised English lexicography altogether to a higher level. In his hands it became a department of literature." The technical dictionary of to-day may indeed claim a higher office than that, because no monograph or text-book comes near the far-reaching and lasting influence of modern encyclopedic dictionaries. They help more than teacher or text-book to bring order into the student's forming mind, and to systematize and make definite his knowledge. In postgraduate life and practice there is no book that is so frequently consulted, and the teachings of which are so clearly kept in memory. This is because of the validity of the maxim of Coke.

Solely upon condition, however, that the author has put heart, intellect, and labor into his work! If he has been content to repeat, copy, and adopt, it will not be so. And even then only if other repeaters, copiers, and adopters "do not break through and steal." As has often happened since, dictionary-theft is an ancient story. As long as 250 years ago Phillips plagiarized the *glossographia* of Blount. The robbed author indignantly exposed the shamelessness of the cribber, even of misprints and errors. But he was not ashamed! *More suo* the thief, having no defense, made none, and instead proceeded to correct all the errors pointed out by Blount, and in many subsequent editions, the quack-lexicographer reaped the reward given by a too careless public.

The ancient injustice would be much manifolded in modern times, with an intensely progressing science which demands that, if to be of the best service, new editions of its word-books shall be made every few years. The system must become systematic and the professing truly professional. No spasmodic, incidental, or amateur methods will nowadays avail. Revisions are required, and continuous labor, not only of one but of many, so that helpers, a large corps of them, must be organized, and paid Over 300 years ago a great worker in this field, one who "contrived and wrought not onelie for our owne private use, but for the common profet of others," even with the patronage of great men "who encouraged in this wearie worke" was grieved that "the charges were so great and the losse of time" so much that he came near having "never bene able alone to have wrestled against so manie troubles." Finding that "his spiritual substance had vanished," old Simon Browne "took to an employment which did not require a soul, and so became a dictionary-maker," piously adding that we should "thank God for everything and therefore for dictionary makers."

Weights (and Measures)

SIGNS AND ABBREVIATIONS

Wt .....Weight.
℔.....Minimum.....Minim.
ʒ.....Drachma.....Dram.
℈.....Scrupulum.....Scruple.
℥.....Uncia.....Ounce.

=.....Equal to.
∞.....Infinity, 20 ft. distance. } Optics.
⌔.....Combined with. } Optics.

ꝭ.....Applied to Zygoma.
o͞o.....Heard, but not Understood.

H.....Intensity of Magnetic Force.
I.....Intensity of Magnetism.

Z.....Contraction (Zuckung).
Z. Z.′ Z.″..Increasing strengths of contraction.
κ.....Magnetic Susceptibility.
μ.....Magnetic Permeability. Unit of Microscopic Measurement.
ω.....Ohm.
ρ.....Specific Resistance.
Ω.....Megohm (one million ohms).
⊣ ⊢ .....Battery.
+.....Plus. Anode or Positive Pole.
−.....Minus. Kathode or Negative Pole.
>.....Greater than, as K > A.
<.....Less than.
°.....Degree.
′.....Foot
″.....Inches. Lines; each one-twelfth of an inch or about two millimeters.
ı.....A mark of affirmation or authentication.
?.....A mark of doubt.
-.....Figures or words separated by a short dash indicate the extremes of variations, as 5-10″ long, few-many flowered; *i. e.*, varying from 5 to 10 lines in length, and with few to many flowers.
× .....Used to express magnification, thus × 1000 indicates a magnification of $\frac{1000}{1}$ diameters. The improper fraction $\frac{1000}{1}$ indicates the same thing, but is rarely used.
①.....An annual Herb.
②.....A biennial Herb.
♃ .....A perennial Herb.
♄ .....An Undershrub, deciduous.
♄ .....An Undershrub, evergreen.
♄ .....A Shrub, deciduous.
♄ .....A Shrub, evergreen.
♄ .....A Tree, deciduous.
♄ .....A Tree, evergreen.
♄ .....An herbaceous Vine, annual or biennial.
♄ .....A woody Vine, deciduous.
♄ .....A woody Vine, evergreen.
♄ .....A trailing Herb, annual or biennial.
♄ .....A trailing Herb, perennial.
♄ .....An aquatic plant.
☿.....Flowers perfect.

♂.....A male animal, or a plant or flower bearing only stamens or antheridia.
♀.....A female animal or a plant or flower bearing only pistils or archegonia.
◯.....A young animal of undetermined sex, thus ♂o, young male, or ♀yg for young female, but ◯ *juv* (*juvenis*, young).
⊙.....A monocarpic plant.
◯= .....Cotyledons accumbent.
◯‖ .....Cotyledons incumbent.
§.. .....A plant introduced and naturalized.
†. .....A plant cultivated for ornament.
‡.....A plant cultivated for use.
8.....Monecious.
♂♀.....Diecious.
♂☿♀ .....Polygamous.
0.....Wanting or none.
∞.....Numerous or indefinite; more than twenty when applied to stamens.
σ.. .....The microsecond represents .001 second or the unit of time in experiments or psychophysical reactions.

PREFIXES AND SUFFIXES USED IN MEDICAL TERMS

PREFIXES.

A-, an-, called *alpha privative* (Gr. α, αν, or αμ), the equivalent of our prefix, *un-*, or *in-*, denotes an absence or want of the thing or quality expressed by the principal; *e. g., adynamia, anaërobic, aphasia, apraxia, apyrexia, astigmatism, atony,* etc. *a* is used before consonants, *an* before vowels, and, rarely, *am* before *bl* or *br*. (To be distinguished from *ana*.)

Ad- (ad), to, at, toward, as, *adduction, adhesion.* The *d* is often changed in the compound to correspond to the next letter, as *accretion, appendix.*

Al-(Arab.) article *the; e. g., alchemy,* the secret art; *alcohol,* the very subtle.

Amphi- (or **amph-**) (ἀμφί), upon both sides, in two ways, as in *amphiarthrosis, amphibia,* etc.

Ana- (ἀνά). Up, through, again; *e. g., anabolism, anasarca, anatomy,* etc.

Anti- (or **ant-**) (ἀντί). Against, opposed to, opposite of; as *antaphrodisiac, antibrachium, antipyretic, antiseptic,* etc.

Apo- (ἀπό). Off, away, upon; *e. g., aponeurosis, apoplexy,* etc.

Auto- (αὐτός). Self; as *autopepsia, autopsy.*

Bary- (βαρύς). Heavy, difficult; as *barymezia, baryphonia,* etc.

Bi-, bin- (bis). Twice, twofold; *e. g., bicuspid, bivalent, binocular, binaural.*

Bio- (βίος). Life, *e. g., bioplasm, biology, biolysis.*

Brach- (βραχίων). Arm, pertaining to the arm; as *brachialgia, brachioncus.*

Broncho- (βρόγχος). Pertaining to the trachea; as *bronchorrhagia, bronchotomy.*

Cardi-, cardio- (καρδία). Pertaining to the heart, as *cardiodynia, cardialgia.*

Celio-, cœlio- (κοιλία). Pertaining to the belly, as *celiotomy, cœliac.*

Chiro- (χείρ). The hand. *Chiragra, chiropodist.*

Co-, con-. Together, along with; *e. g., coitus, congenital.*

Dacryo- (δάκρυον). A tear, pertaining to a tear; as *dacryoid, dacryo-cystitis.*

Dactyl- (δάκτυλος). A finger; pertaining to the fingers; as *dactylitis, dactylion, dactylate.*

Dermo-, dermato- (δέρμα). The skin; pertaining to the skin; *e. g., dermotomy, dermatolysis.*

Di- (δίς). Twice, double; as *dimorphism, digastric.*

Dia- (διά). Through. Examples: *diabetes, diagnosis, diaphragm, diarrhea,* etc.

Dyn- (δύναμις). Force, power; *dynamogeny, dynamograph.*

Dys- (δυς). Difficult, defective, painful; *e. g., dysentery, dyspnea, dysuria.*

Ec-, ex-, ecto- (ἐκ, ἐξ, ἐκτός). Out, outside, away from; as in *ecchymoses, ecdemic, eclampsia, Ectostosis, exanthema, ectropion, ectoderm.*

En-, em- (ἐν, ἐμ) In, within; as in *embryo, emphysism, endemic,* etc.

En-, ento- (ἐντός). Within, internal; *e. g., Endarteritis, endoscope, entoblast, entoptic.*

Ento- (ἔντερον). The intestine; as in *enterocele, Enterostomy,* etc.

Epi- (ἐμί). Upon, over, above; *e. g., epiblast, epicranium, epistaxis, epidemic,* etc.

Extra- (*Lat.*). Outside; *e. g., extravasation, extroversion.*

Galact- (γάλα). Milk; as *galatocele, galactozemia, galacturia.*

Gastro- (γαστήρ). The stomach; relation to the stomach; *e. g., gastrocele, gastrocnemius, gastroenterostomy,* etc.

Genio- (γενεῖον). Pertaining to the chin; *e. g., geniohyoglossus, geniohyoid.*

Glosso- (γλῶσσα). Pertaining to the tongue. See *glossology, glossoplegia, glossophytia.*

Hæma-, hæmato- or **hemo-** (αἷμα). The blood; pertaining to the blood. See *hematemesis, hematoma, hemorrhage,* etc.

Hemi- (ἡμι-ἥμισυς). Half; as in *hemiachromatopsia, hemicrania, hemiplegia.*

Hepat- (ἧπαρ). The liver; pertaining to the liver. See *hepatemphraxis, hepatization, hepatopostema.*

Hetera- (ἕτερος). Different; opposite; *e. g., heteroinfection, heterologous, heteropathy.*

Hydro-, hydr- (ὕδωρ). Water; resembling or relating to water, dropsy, etc.; as in *hydremia, hydragogue, hydrate, hydrocephalus,* etc.

Hyper- (ὑπέρ). Excess; exaggerated abnormality in amount, size, quality, etc. See *hyperesthesia, hypermetropia, hyperprexia, hypertrophy,* and others.

Hypno- (ὕπνος). Sleep. See *hypnopathy, hypnotism.*

Hypo- (ὑπό). Diminution as to degree, amount, size, quality, etc., or that located under or beneath; *e. g., hyposthenia, hypoblast, hypochondriac, hypodermatic, hypoglossal.*

Hystera-, hystero- (ὑστέρα). The uterus or womb; relation to the uterus; *e. g., hysterectomy, hystero-epilepsy, hysteropexia,* etc.

Ileo- (*Ileum*). Pertaining to the ileum; *e. g., ileo-colitis, ileotyphus.*

Ilio- (*Ilium*). Pertaining to the ilium; *e. g., ilio femoral, ili lumbar.*

Im-, in- (*In*). Privative, negative; as *imperforate-incarceration, insane, incontinence.*

In- (εν). In, within, upon, by; as *incubation, infarction, inflammation, inoculation,* etc.

Infra- (*Infra*). Beneath, below; *e. g., infra, maxillary, infrascapular.*

Inter- (*Inter*). Between. See *intercellular, intercostal, intertrigo,* and others.

Intra- (*Intra*). Within, inside of, as *intra-articular, intrauterine.*

Iso- (ἴσος). Equal, like; *e. g., isometric, isothermal, isopathy.*

Kata-, kath- (κατά). Down, through; as *katabolism, katatonia, kathode.*

Leuko- (λευκός). Whiteness; *e. g., leukemia, leukocyte, leukomain, leukorrhea.*

Lith-, litho- (λιθος). Pertaining to stone, calculus, or lithic acid. See *lithemia, lithiasis-lithotripsy,* etc.

Macro- (*μακρός*). Largeness, hypertrophy; as in *macroglossia, macromelia.*

Mal- (*Malus*). Bad; as *malformation, malpractice, malaria.*

Melano- (*μέλας*). Blackness, pigmentation; *e. g., melancholia, melano-sarcoma.*

Meso- (*μέσος*). The middle; *e. g., mesoblast, mesocolon,* etc.

Meta- (*μετά*). With, after, over, between, transition, change.

Micro- (*μικρός*). Smallness; *e. g., micrococcus, microglossia, microscope.*

Mon-, mono- (*μόνος*). Singleness. For example, *monamin, monomania, monorchis.*

Morpho- (*μορφή*). Shape, form; *e. g., morphography, morphology, morphometry.*

Multi- (*multus*). Number, many; *e. g., multilocular, multiparous.*

Myelo- (*μυελός*). Referring to the brain or spinal cord; as *myeloid, myelitis.*

Myo- (*μῦς*). Pertaining to a muscle or to muscularity. See *myocarditis, myoma, myopathy.*

Neo- (*νέος*). New, recent, young; as *neogala, neomembrane, neoplasm.*

Nephr- (*νεφρος*). Pertaining to the kidney, *e. g., nephrapostasis, nephria, nephritis.*

Neuro- (*νεῦρον*). Relating to a nerve or to neurology. In the original Greek the word meant a cord or tendon,—*neurosis*, the stringing of the bow. It is now applied only to nerve-structure; as, *e. g., neuralgia, neurasthenia, neurilemma, neuroglia.*

Ob- (*Ob*). In front of, against, denoting hindrance or obstruction; *e. g., obstruent, obturator, occlusion, opponens.*

Odonto- (*ὀδούς*). Of the teeth, as *odontology, odontalgia.*

Oligo- (*ὀλίγος*). Fewness or lack of, as *oligocythemia.*

Ophthalmo- (*ὀφθαλμός*). Pertaining to the eye, as *ophthalmia, ophthalmoplegia.*

Ortho- (*ορθός*). Straight, upright, correct. See *orthoscope, orthopedia, orthopraxis.*

Osteo- (*ὀστεον*). Referring to bone. See *osteoblast, osteomyelitis, osteoplastic.*

Oto- (*οὖς*). Pertaining to the ear, as *otorrhea, otophone.*

Oxy- (*ὀξυς*). Denoting the presence of oxygen, or acidity; as *oxygen, oxyhemoglobin.*

Pan-, Pant- (*πᾶς, πᾶν*). All, every, universal; as *pancreas, pangenesis, pantomorphic.*

Para- (*παρά*). Through, near, by, by the side of-abnormality. Examples: *paracentesis, pares, thesia, parenchyma, parotid.*

Peri- (*περί*). About, around. See, *e. g., pericardium, perimeter, perilymph, periosteum.*

Pod- (*πούς*). Pertaining to the foot, as *podalgia-podedema.*

Poly-, pol- (*πολύς*). Many, much; *e. g., polycoria, polygalactia, polyuria.*

Præ-, pre- (*Præ*). Before; *e. g., præcordia, prepuce.*

Pro- (*πρό*). Before, down; as in *process, procidentia, prolapse, proptosis.*

Proc-, procto- (*πρωκτός*). The anus, pertaining to the anus; *e. g., proctitis, proctoplegia.*

Pseudo- (*ψευδής*). False; spurious; as in *pseudarthrosis, pseudocyesis.*

Pyo- (*πῦον*). Pertaining to pus or purulency; *e. g., pyogenic, pyosalpinx.*

Pyr-, pyro- (*πῦρ*). Concerning fire or heat, or inflammation; *e g, pyrogenous, pyrexia.*

Retro- (*Retro*). Backward, behind, *e. g., retroflex, retroversion.*

Rhin-, Rhino- (*ῥίς*). Pertaining to the nose, as *rhinoplasty, rhinitis.*

Semi- (*Semis*). Half, partly, almost, as *semicapsum, semilunar.*

Sphyg- (*πφυγμός*). Pertaining to the pulse, as *sphygmometer, sphygmotechny.*

Sub- (*Sub*). Beneath, under; and also partialty or deficiency of, as *subclavian, subluxation.*

Super- (*Super*). Above, upon; excess of, *e. g., superciliium, superfecundation.*

Supra- (*Supra*). Above, upon, superior to, as *supraorbital, supraspinatus.*

Sym-, syn- (*πύν*). With, together, same. See, *e. g, symblepharon, symphysis, synalgia, synchondrosis.*

Zoo- (*σῶον*). Animal. See *zoology, zoochemia.*

SUFFIXES.

-ago (agere). Gives the idea of activity, presentation, etc.; as *lumbago.*

-agogue (*ἄγειν*, to bear off, carry away). Signifies an agent stimulating the function of excretion or secretion of the product. Thus, *emmenagogue, hydragogue, sialagogue.*

-agra (*ἄγρα*, an attack, seizure). Denotes an acute attack of pain in the part, as *arthragra, podagra.*

-algia (*ἄλγος*, pain). Pain in a part, expressed by the chief word; *e. g., cephalalgia, gastralgia.*

-atresia (*ἀτρησια*). Imperforate, as in *proctatresia.*

-cele (*κήλη*). A tumor, hernia, or protrusion. See *cystocele, hydrocele, meningocele.*

-cele, cœle (*κοιλία*). A cavity, ventricle; *e. g., mesocele.*

-ectomy (*εκτέμνειν*). Excision, exsection; as in oöphorectomy, *nephrectomy, splenectomy.*

emia, (*αἷμα*, blood). Denotes a condition of the blood, or an ingredient in the same, expressed by preceding word; *e.g., hydremia, lithemia, pyemia, uremia.*

-etin (*ῥητίνη*). Used in the names of certain resins, as *abietin.*

-fuge (fugare, to expel). Driving off, an expeller, as *vermifuge, febrifuge,* etc.

-graph, graphy (*γράφειν*, to write). An instrument; a treatise or description; *e. g., sphygmograph, demography.*

-ia, often contracted to **-y,** denotes the quality of the root-word as an abstract noun, as *akromegalia, akromegaly.*

-idæ (*-ίδης*). The suffix to the name of a genus forming the name of a family, *bovidæ, equidæ.*

-igo. A variation of *-ago; e. g., pruligo, vertigo.*

-is, -sis. Present the abstract idea of activity of the root-word

-ism (*-ισμος*). Implies the doctrine, practice, or theory of the principal word; *Darwinism, tribadism.*

-ite (*-ίτης*). Of the nature of. In anatomy, denoting a constituent part of an organ; as *sergite, sternite.* In chemistry, any salt of an -ous acid; as *sulphite, phosphite.*

-itis (*-ῖτις*). Originally the feminine ending of Greek substantives and denotes an especial activity of the root-word. By habit and general use it is now limited to inflammatory activity; *gastritis, otitis,* etc.

-logy (λόγος, discourse). A treatise upon; as *bacteriology, dermatology, pathology.*
-lysis (λυσις, a loosening). A separation into constituent parts, or the setting free of some part; as *hydrolysis, analysis.*
-malacia (μάλακος, soft). Abnormal softness; as in *osteomalacia.*
-mania (μανία, madness). The chief word denotes the principal symptom of the mental affection; *e. g., erotomania, kleptomania,* etc.
-meter (μέτρου, a measure). An instrument for measuring; *e. g , aerometer, urinometer.*
-odynia (οδύνη, excessive pain). The principal word denotes the seat of great pain, as *coccygodynia.*
-oid (εἶδος, form). Similar in shape, etc.; as in *choroid, cuboid, sphenoid, xiphoid.*
-oma (ωμα). A tumor, *e. g., glioma, sarcoma.*
-opia (ὤψ). Pertaining to the eye or vision; as in *amblyopia, myopia,* etc.
-orium, -torium, -sorium (τήριον). Designate places, tools, etc., as *tentorium, auditorium,* etc.
-osis, -osus, derived from Greek words in *-όω,* and usually denote fulness, redundancy, excess.
-pathy (πάθος). A condition or disease, and also a method of cure; as *adenopathy, psychopathy, homeopathy, hydropathy.*
-phobia (φοβος, fear). Morbid or exaggerated fear or dread, as *agoraphobia, photophobia.*
-plasty (πλάσσειν, to form). Surgical plastic operation upon a part; *e. g , blepharoplasty, rhinoplasty.*
-rhagia (ῥήγννμι, to burst forth). A hemorrhage or excessive discharge; *e. g., blennorrhagia, metrorrhagia.*
-rhaphy (ῥαφή, a suture). A stitching or suturing of a part; as *enterorrhaphy, perineorrhaphy.*
-rhea (ῥεῖν, to flow). An excessive discharge or excretion; as *blennorrhea, diarrhea, leukorrhea.*
-scope (σκοπεῖν, to look). An instrument for making an examination; as *laryngoscope, microscope.*
-scopy (σκοπέειν). An examination; as *ophthalmoscopy.*
-stomy (στόμα, mouth). A suffix seen in the names of those surgical operations in which an artificial opening or passage is formed, as *enterostomy.*
-tas, -ty. Derived originally from the Greek *-της,* denote abstract quality or idea, as *immunity, acidity.*
-tio, -atio, -tion. A suffix of verbal roots denoting an action or function as taking place—an occurrence. The *n* was added to the original *-tio* by Roman and French influence.
-tomy (τέμνειν, to cut). Incision; *e g., laparotomy, tenotomy.*
-ulus, -ula, -ulum, -ola, -ion, -ellus, -illus, -leus Diminutives.
-uria (ουρεειν, to urinate) Abnormalities of the urine or of urination; as *albuminuria, polyuria.*

PREFIXES AND SUFFIXES USED IN CHEMISTRY

Prefixes

Am- indicates the group —NH_2.
Amylo- pertaining to starch.
Azo-, diazo-, hydrazo-, tetrazo- indicates compounds with two nitrogen atoms linked in various ways; as, —N:N— or > N—N<.
Bi- signifies two
Bisazo- Same as tetrazo-.
Bisdiazo- Same as tetrazo-.
Demi- Same as semi-.
Di- signifies two.
Diazo- indicates a bivalent —N:N— radical.
Endo- indicates a "bridge" linkage.
Hemi- same as semi-
Hydroxy- indicates the presence of a —OH group.
Im- indicates the group > NH.
Iso- signifies an isomeric compound.
Keto- indicates the bivalent >CO group.
Mono- signifies one.
Neo- meaning "new" or "recent."
Nitro- indicates the group —NO_2.
Normal- (1) A neutral salt in which all available hydrogen of the acid is replaced by metal. (2) An organic compound in its simpler, straight chain form, as compared with iso-.
Oleo- denotes an oil
Oxy- (1) Indicates the presence of oxygen in a compound. (2) Same as hydroxy-.
Penta- signifies five
Per- denotes "more than ordinary.
Phen- indicates a derivative of phenol or benzene.
Quadri- Same as tetra-.
Semi-, demi-, hemi-. indicates one-half.
Sesqui- indicates the proportion of two to three.
Sub- signifies deficiency or less than normal.
Sulf- indicates the presence of sulfur. Cf. thio-.
Sulfo- denotes the presence of the > SO_3 group.
Tauto- indicates a tautomeric form.
Ter- same as tri-.
Tetra- Quadri- indicates four-.
Tetrazo, Bisdiazo, Bisazo- indicates the presence of two azo groups, 2(—N:N—).
Thermo- indicates heat.
Thio- signifies sulfur in the form analogous to oxygen, having a valency of two. Cf. sulfo-.
Tri- ter- indicates three.
Uni- Same as mono-.

Suffixes

-al indicates an aldehyde.
-an signifies a compound of the starch or sugar group.
-ane indicates a saturated hydrocarbon, methane series.
-ase indicates (1) an enzyme; (2) an ore.
-ate indicates a salt of an -ic acid.
-ein indicates an internal anhydride.
-ene indicates an unsaturated hydrocarbon; ethene and benzene series.
-enyl indicates a bivalent unsaturated hydrocarbon radical; ethenyl.
-fen -phen indicated a sulfurcontaining hydrocarbon; thiofen.
-ic indicates the higher valency of an element; as, ferric or sulfuric. Antonym -ous.
-ide indicates (1) a binary compound of a metal and non-metal; as, hydride, sulfide, etc. (2) a glucoside.
-in denotes (1) a neutral nitrogenous substance; as, proteins and bitter principles. (2) an ester; as palmitin. (3) a hydrocarbon containing a triple bond; as, ethin,
-ine indicates (1) an alkaloid or a basic amino compound; as, morphine, purine. (2) a halogen, as bromine.

nene indicates a hydrocarbon of the acetylene series.
-ino signifies substitution by $—NH_2$, —NHR, —NR, or by > NH and > NR.
-ite indicates (1) a natural ore or mineral. (2) the salt of an -ous acid. Cf. ate.
-ium indicates the presence of a metal or a non-metal in a salt-forming capacity; as, ammonium, sodium, and iodonium.
-oid denoting a resemblance or likeness.
-ol indicates an alcohol or phenol.
-ole denotes a substance to which the suffix -ol was originally given, but which is not an alcohol; as, indole.
-on denotes a ketone.
-one indicates (1) a ketone. (2) a substance related to starches and sugars. (3) a protein split product, as, peptone.
-onic indicates an acid produced by oxidation of an aldehyde group in a carbohydrate.
-ose indicates a carbohydrate; as, glucose. It is occasionally applied to split products of proteins; as, albumose.
-phen same as fen.
-uret an obsolete suffix, now replaced by -ide.
-yl indicates a monovalent hydrocarbon radical.
-ylene indicates a bivalent hydrocarbon radical.

CHEMICAL SYMBOLS

frequently used in the chemical formulae:
Ac* acetyl, CH_3CO—. AcH-acetaldehyde; AcOH acetic acid.
Am* amyl, C_5H_{11}—. i-Am iso-amyl.
Bu butyl, C_4H_9—. i-Bu iso-butyl, Me_2CH.
Bz benzoyl, PhCO—. BzH benzaldehyde; BzOH benzoic acid.
Et ethyl, C_2H_5—. EtOH ethyl alcohol; Et_2O ethyl ether.
Me methyl, CH_3—. MeOH methylalcohol; Me_2O methyl ether.
Ph phenyl, C_6H_5—. PhH benzene; PhOH phenol.
Pr propyl, C_3H_7—.
M Any (monovalent) metal
R Any (monovalent) radical
X Any halogen or (monovalent) anion.

For other abbreviations, signs, and symbols consult the classified lists given under *notation, nomenclature, symbols, constants*, etc., or the alphabetical order of the text.

* Sometimes used: *Ac* for acetate, *Am* for ammonium and *Cy* for cyano, CN—.

PRONUNCIATION

The key to the pronunciation is the alphabetic sound of the letters. A vowel at the end of a phonetic syllable, has its true sound. Any change in that sound, brought about by the collocation of consonants to form the phonetic pronunciation is indicated by a short stroke (the macron) over it. Example: dōm is pronounced as in home; dom as in from. This simple method avoids the use of a number of diacritic marks which are confusing, so confusing that the Oxford, Webster's and the Standard dictionaries differ in the use of them.

The stressed part of a word is indicated by the mark ′ placed just after it, thus; acetic (*as-e′-tik*); putrefaction (*pu-tre-fak′-shun*); purpurin (*pur′-pu-rin*). A *u* after *r*, *j*, and sometimes *l*, is sounded as *oo*; example, rubeola—*roo-be′-o-lah;* juvantia (*joo-van′-she-ah*); lucas (*loo′kas*). But, student (*stu′-dent*, not *stoo′dent*); tumor (*tu′-mor*, not *too-mor*); Newton, (*nu′-ton*, not *noo′-ton*), etc.

ba, la, etc. as in day; bah, lah, etc. as far;
bi, ti, etc. as mite; bu, du, etc. as you; to, do,
etc. as go; doo, loo, etc. as boot; ōl = pole;
ol = doll; āl, = pale; al, = alley; awl, = fall;
ēl, = feel; el = fell; īl, = file; il = fill; ūl, = mule;
ul = dull; g is hard, as in go; s is soft as in ass.

GOULD'S MEDICAL DICTIONARY

A

a. Chemical symbol of *argon*.

[*ἀ, ἀν*, or *ἀμ*, without]. 1. The Greek letter *alpha*, called alpha privative, equivalent to the prefix *un-* or *in-*. It denotes absence or want of the thing or quality expressed by the root of the word. 2. Abbreviation for *accommodation, ampere, anode, anterior, aqua, arteria, total acidity*.

aa [*ἀνά*, of each]. An abbreviation, written *āā*, used in prescriptions to denote repetition of the same quantity for each item.

ȧȧȧ. Abbreviation for *amalgam*.

aaa disease. The endemic anemia or ankylostomiasis of ancient Egypt.

Aaron's sign (*ār'-un*) [Charles D. *Aaron*, American physician, 1866–]. In appendicitis, pressure over McBurney's point causes distress in the region of the stomach or heart.

aasmus (*a-as'-mus*) [*ἀασμός*, a breathing out]. Asthma.

A.B. Abbreviation of *Artium Baccalaureus*, Bachelor of Arts.

ab [*ab*, from]. A Latin preposition signifying *from*.

abaca (*ab'-ak-ah; Sp. pron., ah-vah-kah'*). Manila hemp; also *Musa textilis*, the plant which produces it. See *hemp*.

abactio (*ab-ak'-she-o*) [*abigere*, to drive away]. An abortion, or labor, artificially induced.

abactus venter (*ab-ak'-tus-ven'-ter*) [*abigere*, to drive out; *venter*, the belly]. An abortion procured by artificial means.

Abadie's sign (*ab-ad-e'*) 1. [J. M. *Abadie*, French ophthalmologist, 1842–]. Spasm of the levator palpebræ superioris in exophthalmic goiter. 2. [Charles Jean Marie *Abadie*, French physician]. Pressure over the tendo Achillis is not felt in cases of tabes dorsalis.

Abadie's symptom (*ab-ad-e'*). Insensibility to pain when the tendo Achillis is vigorously pressed upon; an inconstant sign in locomotor ataxia.

abaissement (*ah-bās'-mon(g)*) [Fr.]. 1. Depression, falling. 2. Couching.

abalienated (*ab-āl'-yen-a-ted*) [*abalienatus*, alienated, estranged]. 1. Deranged, or insane. 2. Gangrenous, or so severely injured as to require amputation or extirpation.

abalienatio mentis (*ab-āl-yen-a'-she-o*) [see *abalienation*]. Insanity.

abalienation (*ab-āl-yen-a'-shun*) [*ab*, away; *alienare*, to transfer]. Decay, especially mental decay, insanity.

abanet. See *abnet*.

abaptiston (*ah-bap-tis'-ton*) [*ἀ*, priv.; *βάπτιστος* immersed]. A trephine so shaped that penetration of the brain is impossible.

abarthrosis (*ab-ar-thro'-sis*) [*ab*, from; *arthrosis*, a joint]. Same as *diarthrosis* or *abarticulation*.

abarticular (*ab-ar-tik'-u-lar*) [*ab*, from; *articulus*, joint]. Not connected with or not situated near a joint.

abarticulation (*ab-ar-tik-u-la'-shun*) [*ab*, from; *articulatio*, joint]. 1. Same as *diarthrosis*; sometimes also a synonym of *synarthrosis*. 2. A dislocation.

abasia (*ah-ba'-ze-ah*) [*ἀ*, priv.; *βάσις*, a step]. Motor incoordination in walking. See *astasia*. **a. astasia**, inability to walk or stand in a normal manner. **a. atactica**, a form marked by awkwardness and uncertainty of movement. **a., choreic**, that due to choreic cramps in the legs. **a., paralytic**, that form in which the legs give way under the weight of the body and walking is impossible. **a., paroxysmal trepidant**, a form of astasia-abasia (*q. v.*) in which trepidation similar to that of spastic paraplegia stiffens the legs and prevents walking. **a., trembling**, incapacity to walk on account of trembling of the legs.

abasic (*ah-ba'-sik*) [see *abasia*]. Pertaining to, or affected with, abasia.

abatage (*ah-bah-tazj'*) [Fr.]. 1. The slaughter of an animal to prevent the infection of others. 2. The art of "casting" an animal preparatory to an operation.

abatardissement (*ah-bah-tar-dees'-mon(g)*) [Fr.]. The gradual degeneration or deterioration of a breed or race.

abatement (*a-bāt'-ment*). Mitigation or decrease in severity of pain, or of any untoward symptom or condition.

abattoir (*ah-bat-war'*) [Fr.]. A slaughter-house or establishment for the killing and dressing of animals.

abaxial (*ab-ak'-se-al*) [*ab*, from; *axis*, an axle]. Not situated in the line of the axis.

Abbe's catgut rings (*ab'-e*) [Robert *Abbe*, New York sugreon, 1851–1928]. Rings composed of 8 or 10 turns of heavy catgut in the shape of an oval, with inside diameter of two inches, for use in intestinal anastomosis. **A.'s operation**, (1) lateral anastomosis of intestine with catgut rings. (2) Same as *Dana's operation; q. v.* **A.'s string-method**, cutting through an esophageal stricture by the sawing action of a string one end of which passes through the mouth and the other end through an opening in the stomach.

Abbé's condenser, A.'s illuminator (*ab'-ba*) [Ernst *Abbé*, German physicist, 1845–1905]. A system of lenses attached to a microscope for condensing the light upon an object. **A.'s, lenses, apochromatic,** see *apochromatic lens*. **A.'s test-plate,** an instrument for testing microscopic objectives for spherical and chromatic aberration, composed of a microscopic slide with 6 cover-glasses ranging from 0.09 to 0.024 mm. thick, silvered on one side. Delicate, parallel, ruled lines are cut through the silver film, thus making a kind of micrometer with transparent rulings. **A.-Zeiss apparatus,** an instrument for estimating the number of corpuscles in the blood; also known as *Thoma-Zeiss apparatus*.

Abbey's salt (*ab'-e*). A proprietary laxative salt, containing tartaric acid, sodium bicarbonate, magnesium sulphate, and sugar.

Abbot's paste (*ab'-ot*) [William *Abbot*, English physician, 1831–]. A paste made of arsenic trioxide, morphine and creosote; used to kill the nerve of a tooth.

Abbott's method (*ab'-ot*) [Edville G. *Abbott*, American orthopedist, 1872–]. *For treatment of scoliosis:* overcorrection by means of plaster jackets and bandages.

A. B. C. liniment. Compound liniment of aconite. It contains liniment of aconite 40, liniment of belladonna 40, and chloroform 20.

A. B. C. powder. A powder containing equal parts of boric acid, bismuth subnitrate and calomel.

A. B. C. process. A process for the deodorization of sewage by the addition of a mixture of alum, blood, and charcoal.

Abderhalden's test for pregnancy (*ab'-der-hahl-den*) [Emil *Abderhalden*, Swiss physiologist and chemist, 1877–]. During pregnancy microscopic portions of the chorionic villi enter the maternal blood and cause the production of protective ferments which may be detected in the serum by an optical method and a dialyzation method. The ferments disappear within a short time after delivery or abortion.

abdomen (*ab-do'-men*) [*abdere*, to hide]. The large inferior cavity of the trunk, extending from the brim of the pelvis to the diaphragm, and bounded in front and at the sides by the lower ribs and abdominal muscles, and behind by the vertebral column, the psoas and the quadratus lumborum muscles. It is artificially divided into 9 regions by two circular lines, the upper parallel with the cartilages of the ninth ribs, the lower with the iliac crests, and by two lines drawn vertically upwards from the center of Poupart's ligament. These lines are differently situated by different writers. The regions thus formed are, above, the right hypochondriac, the epigastric, and the left hypochondriac; in the middle, the right lumbar, umbilical, and left lumbar; and below, the right inguinal, the hypogastric, and the left inguinal. **a., accordion,** Kaplan's term for a swelling of the abdomen attended with flattening of the arch of the diaphragm and increased respiration. It is not due to the presence of gas or to tumor, and disappears under anesthesia; nervous pseudotympany. **a., acute,** any acute abdominal condition requiring prompt operation. **a., boat-shaped, a., carinate,** see under *scaphoid*. **a., navicular,** same as *a., scaphoid*. **a. obstipum,** congenital shortening of the rectus abdominis muscle. **a., pendulous,** a relaxed condition of the abdominal walls in which the latter hang down over the pubis. **a., scaphoid,** see under *scaphoid*. **a., uncinate,** one in which the terminal segments and those next to them are turned under the others.

abdominal (*ab-dom'-in-al*) [*abdomen*]. Pertaining to or connected with the abdomen. **a. aneurysm,** see *aneurysm*. **a. aorta,** the part of the aorta below, the diaphragm. **a. aponeurosis,** see *aponeurosis*. **a. bandage,** see *a. binder*. **a. binder,** a broad bandage of muslin or flannel applied to the abdomen for making pressure after delivery or after an operation. Sometimes a many-tailed bandage is used. **a. brain,** the solar plexus. **a. breathing,** see *a. respiration*. **a. cavity,** the cavity within the peritoneum. **a. compress,** a form of local pack, made by forming folds of a coarse linen towel of sufficient breadth to reach from the ensiform cartilage to the pubis; one of the folds is then wrung out of cold water, applied, and the remainder is rolled around the body so as to retain it in position. **a. dropsy,** ascites. **a. fever,** same as typhoid fever. **a. ganglia,** the semilunar ganglia. **a. gestation,** see *pregnancy, extrauterine*. **a. hysteria,** a hysteric condition simulating peritonitis, in which the abdomen becomes extremely painful to the touch, swollen, and distended with gas. **a. line,** the linea alba. **a. lines,** muscle tracings on the abdominal walls. **a. muscles,** the internal and external obliques, the transversalis, rectus, pyramidalis, and quadratus lumborum. **a. phthisis,** tuberculous disease of the intestines or peritoneum. **a. press,** see *prelum abdominale*. **a. reflex,** see *reflexes*. **a. regions,** see *abdomen*. **a. respiration,** respiration carried on chiefly by the diaphragm and abdominal muscles. **a. ring, external,** a triangular opening in the fibers of the aponeurosis of the external oblique muscle, transmitting the spermatic cord of the male and the round ligament of the female. **a. ring, internal,** an oval aperture in the fascia transversalis that transmits the spermatic cord of the male and the round ligament of the female. **a. section,** see *celiotomy*. **a. surgery,** the branch of surgery that deals with lesions of the abdominal viscera and the operations performed upon them through incisions in the abdominal walls. **a. typhus,** enteric fever. **a. viscera,** the organs contained in the abdominal cavity.

abdominoanterior (*ab-dom-in-o-an-te'-re-or*). Having the belly forward (used of the fetus in the womb).

abdominocardiac sign (*ab-dom-in-o-kar'-de-ak*). See *Luvierato's sign*.

abdominocentesis (*ab-dom-in-o-sen-te'-sis*). Paracentesis of the abdominal cavity.

abdominocystic (*ab-dom-in-o-sis'-tik*) [*abdomen; κύστις*, bladder]. Relating to the abdomen and bladder.

abdominogenital (*ab-dom-in-o-jen'-it-al*). Relating to the abdomen and the genitalia. **a. nerve, inferior,** the ilioinguinal nerve. **a. nerve, superior,** the iliohypogastric nerve.

abdominohysterectomy (*ab-dom-in-o-his-ter-ek'-to-me*). Removal of the uterus through an abdominal incision.

abdominohysterotomy (*ab-dom-in-o-his-ter-ot'-o-me*). Hysterotomy through an abdominal incision.

abdominoposterior (*ab-dom-in-o-pos-te'-re-or*). Having the belly toward the mother's back (used of the fetus in the womb).

abdominoscopy (*ab-dom-in-os'-ko-pe*) [*abdomen; σκοπεῖν*, to examine]. Examination of the

abdomen for diagnostic purposes, by inspection, palpation, measurement, percussion, etc. Also endoscopic method of examining the abdominal cavity.

abdominoscrotal (*ab-dom-in-o-skro'-tal*). Relating to the abdomen and the scrotum. **a. muscle,** the cremaster muscle.

abdominothoracic (*ab-dom-in-o-thro-ras'-ik*). Relating to the abdomen and thorax.

abdominous (*ab-dom'-in-us*). Having a large abdomen.

abdominouterotomy (*ab-dom-in-o-u-ter-ot'-o-me*). See *abdominohysterotomy.*

abdominovaginal (*ab-dom-in-o-vaj'-in-al*). Relating to the abdomen and the vagina.

abdominovesical (*ab-dom-in-o-ves'-ik-al*). Relating to the abdomen and the urinary bladder. **a. pouch,** a fold of the peritoneum in which are comprised the urachal fossæ.

abduce (*ab-dūs'*) [*ab,* away; *ducere,* to lead]. To draw away, as by an abductor muscle.

abducens (*ab-dū'-senz*) [L., "leading away"]. A term applied to certain muscles, or their nerves, that draw a part from the median line of the body. Also, the sixth pair of cranial nerves. **a. labiorum,** same as *a. oris.* **a. oculi,** the external rectus muscle of the eye. **a. oris,** the levator anguli oris muscle.

abducent (*ab-dū'-sent*). 1. The same as abducens. 2. Abducting.

abduct (*ab-dukt'*) [*abducere,* to lead away]. To draw away from the median line.

abduction (*ab-duk'-shun*) [*ab,* from; *ducere,* to lead]. 1. The withdrawal of a part from the axis of the body. 2. Recession or separation from each other of the parts of a fractured bone or the sides of a wound. 3. **a. of the foot,** rotation of the foot outward, on its own axis.

abductor (*ab-duk'-tor*). See *abducens.* **a. auris,** the abductor muscle of the ear **a. digiti quin'ti, hallu'cis, in'dicis, min'imi digiti, pol'licis,** see *muscles, table of.*

Abegg rule of (*ab'-eg*). All atoms have the same total number of valencies, namely eight.

abelin (*ab'-el-in*). A compound of caffeine and theobromine.

Abel's bacillus (*a'-bel*). A bacillus found in the nasal secretion in ozena

abenteric (*ab-en-ter'-ik*) [*ab,* from; *ἐντέρον,* intestine]. Outside the intestine; involving or pertaining to organs or parts other than intestinal. **a. typhoid,** see under *typhoid.*

abepithymia (*ab-ep-e-thi'-me-ah*) [*ab,* from; *ἐπιθυμία,* longing]. 1. A perverted longing, or desire. 2. Paralysis of the solar plexus (the diaphragm formerly was regarded as the seat of the soul [*θυμός*], and of the desires).

Abercrombie's degeneration [John *Abercrombie,* Scotch physician, 1780–1844]. Amyloid degeneration.

Abernethy's fascia [John *Abernethy,* English surgeon, 1764–1831]. The subperitoneal areolar tissue that separates the external iliac artery from the iliac fascia overlying the psoas. **A.'s operation,** for ligation of *the external iliac artery.* In the earlier operation an incision was made in the line of the artery for about three inches, commencing nearly four inches above Poupart's ligament. Later the incision was less nearly vertical and more curved, with the convexity downward and outward, extending from about one inch within and one inch above the anterior superior spine to one and one-half inches above, and external to, the center of Poupart's ligament. **A.'s sarcoma,** a circumscribed fatty tumor found chiefly on the trunk.

Abernethy's pills (*ab-er-ne'-the*). Pills containing 2 gr. of compound extract of colocynth, and 3 gr. of blue pill.

aberrans (*ab-er'-anz*). Same as vas aberrans; *q. v.*

aberrant (*ab-er'-ant*) [*ab,* from; *errare,* to wander]. Deviating from the normal or regular type in appearance, structure, course, etc., as the *aberrant* duct of the testis or liver, *aberrant* arteries, etc. **a. arteries,** long, slender vessels connected with the brachial or axillary artery.

aberratio humorum (*ab-er-a'-she-o*) [see *aberrant*]. An abnormal tendency or direction of blood or other fluid to a part; as in vicarious menstruation. **a. lactis,** milk metastasis; see *galactoplania.* **a. mensium, a. menstruorum,** see *menstruation,* vicarious. **a. testis,** the presence of the testis elsewhere than in the path of its normal descent.

aberration (*ab-er-a'-shun*) [see *aberrant*]. Deviation from the normal; mental derangement; fetal malformation; vicarious menstruation; escape of the fluids of the body by an unnatural channel. In optics, any imperfection of focalization or refraction of a lens. **a., chromatic,** the dispersion arising from unequal refraction of light of different parts of the spectrum. The violet rays, being more refrangible than the red rays, are brought to a focus nearer the lens, and the image is surrounded by a halo of colors. **a., dioptric,** see *a., spherical.* **a., distantial,** indistinct vision due to distance. **a., lateral,** a deviation of a ray in any direction from the axis measured in the focal plane perpendicularly to the axis. **a., longitudinal,** a deviation of a ray from the focus, measured along the axis above or below the focal plane. **a., mental,** a degree of paranoia that may or may not amount to insanity. **a., Newtonian,** same as *a., chromatic.* **a., spherical,** the excess of refraction of the peripheral part of a convex lens which produces an imperfect focus and a blurred image.

aberrometer (*ab-er-om'-et-er*) [*aberration; μέτρον,* measure]. An instrument for measuring aberration.

abevacuation (*ab-e-vak-u-a'-shun*) [*ab,* from; *evacuation*]. 1. A morbid evacuation; an excessive or deficient discharge. 2. Metastasis, *q. v.*

abeyance (*ab-a'-ans*) [O. Fr., for "open-mouthed expectation"]. A suspension of activity, or of function; a state of suspended animation, or action.

Abies (*a'-be-ēz*) [L.]. A genus of coniferous plants including the fir, hemlock, and spruce. **A. balsamea,** silver fir, balsam-fir, or balm of Gilead, a tree of the nat. ord. *Coniferæ,* from which is derived Canada balsam. **A. canadensis,** hemlock-spruce; bark of the Canadian fir-tree. It is used as an astringent in various local and internal conditions. It yields Canada pitch. **A. excelsa,** Norway spruce. It yields Burgundy pitch. **A. pectinata,** the European silver fir. Its buds are resinous, balsamic, and sudorific.

abietate (*ab-i'-et-āt*). Any salt of abietic acid.

abietene (*ab-i'-et-ēn*). C_7H_{16}. A hydrocarbon obtained from *Pinus sabiniana,* a California nut-pine. It is an aromatic, volatile liquid, agreeing in composition with normal heptane. Syn., *erasene.*

abietic, abietinic (*ab-i-et'-ik, ab-i-et-in'-ik*) [*Abies*]. Pertaining to the genus *Abies,* as *abietic* acid, $C_{44}H_{64}O_5$ or $C_{20}H_{30}O_2$, occurring in the resin of *Abies excelsa* and *Larix europæa.*

abietin (*ab-i'-et-in*) [*Abies*]. A resinous principle obtained from the turpentine of various species of pine and fir. **a. anhydride**, $C_{44}H_{62}O_4$, the main constituent of resin.

abietite (*ab-i'-et-īt*), $C_6H_8O_3$. A sugar resembling mannite, found in the needles of the European silver fir, *Abies pectinata*.

abiochemistry (*ab-i-o-kem'-is-tre*) [ἀ, priv.; *biochemistry*]. Inorganic chemistry.

abiogenesis (*ab-i-o-jen'-es-is*) [ἀ, priv.; βίος, life; *genesis*]. The (theoretic) production of living by nonliving matter. Old term, *spontaneous generation*.

abiogenetic, abiogenous (*ab-i-o-jen-et'-ik, ab-i-oj'en-us*). Pertaining to abiogenesis; characterized by spontaneous generation.

abiogeny (*ab-i-oj'-en-e*). See *abiogenesis*.

abiological (*ah-bi-o-loj'-ik-al*) [ἀ, priv.; βίος, life; λόγος, treatise]. Not pertaining to biology.

abionergy (*ab-i-on'-ur-je*) [ἀ, priv.; βίος, life; ἐνέργεια, action]. Same as abiotrophy, *q. v.*

abiosis (*ab-i-o'-sis*) [ἀ, priv.; βίος, life]. The absence of life.

abiotic (*ab-i-ot'-ik*). Opposed to, or incapable of, or incompatible with life.

abiotrophy (*ab-i-ot'-ro-fe*) [ἀ, priv.; βίος, life; τρόφή, nourishment]. Degeneration or decay due to defective vital endurance.

abirritant (*ab-ir'-it-ant*) [*ab*, from; *irritare*, to irritate]. 1. Tending to diminish irritation; soothing. 2. Relating to diminished sensitiveness. 3. A remedy or agent that allays irritation.

abirritate (*ab-ir'-it-āt*) [see *abirritant*]. To diminish irritation; to soothe.

abirritation (*ab-ir-it-a'-shun*) [see *abirritant*]. Diminished tissue-irritability; atony or asthenia.

abiuret (*ab-i'-ū-ret*) [ἀ, priv.; *biuret*]. Not biuret; not giving the biuret reaction.

abiuretic (*ab-i-ū-ret'-ik*) [*abiuret*]. Pertaining to abiuret; not giving the biuret reaction; specifically, digestive products of proteins which have passed the peptone stage, and no longer give the biuret reaction.

abjoint (*ab-joint'*) [*abjungere*, to separate]. To separate by means of a joint or septum.

abjunction (*ab-jungk'-shun*) [see *abjoint*]. The separation by means of a joint or septum, as of spores from a growing hypha in some fungi.

ablactation (*ab-lak-ta'-shun*) [*ab*, from; *lactare*, to give suck]. The weaning of a child. The end of the sucking period.

ablastemic (*ah-blas-tem'-ik*) [ἀ, priv.; βλάστημα, a shoot]. Non-germinal; not related to germination.

ablastous (*ah-blas'-tus*) [ἄβλαστος, not budding, sterile]. In biology, producing no germs or buds.

ablate (*ab-lāt'*) [*ab*, from; *latum*, from *ferre*, to carry]. To remove; to cut off.

ablatio (*ab-la'-she-o*) [see *ablate*]. Detachment; removal; ablation. **a. placentæ**, premature detachment of the placenta. **a. retinæ**, detachment of the retina.

ablation (*ab-la'-shun*) [see *ablate*]. Removal of a part, as a tumor, by amputation, excision, etc.

ablepharia, ablepharon, ablephary (*ah-blef-a'-re-ah, ah-blef'-ar-on, ah-blef'-ar-e*) [ἀ, priv.; βλέφαρον, the eyelid]. A congenital condition in which there is a total absence either of eyelids or of the interpalpebral fissure. **a., partial**, a congenital defect in one or more of the eyelids. **a., total**, a congenital condition in which there is either a total absence of eyelids or the interpalpebral fissure.

ablepharous (*ah-blef'-ar-us*) [see *ablepharia*]. Without eyelids.

ablepharus (*ah-blef'-ar-us*). An individual affected with ablepharia.

ablepsia, ablepsy (*ah-blep'-se-ah, ah-blep'-se*) [ἀβλεψία, without sight]. 1. Blindness. 2. Dulness of perception.

abluent (*ab'-lu-ent*) [*abluere*, to wash away]. Detergent. That which cleanses or washes away.

ablution (*ab-lu'-shun*) [see *abluent*]. Washing or cleansing the body. Separation of chemical impurities by washing.

abmortal (*ab-mor'-tal*) [*ab*, from; *mors*, death]. Passing from dead or dying to living muscular fiber (used of electric currents).

abnerval (*ab-ner'-val*) [*ab*, from; *nervus*, a sinew]. Passing from a nerve (used of electric currents in muscular fiber).

abnet (*ab'-net*) [Hebr., a girdle]. A girdle, or girdleshaped bandage.

abneural (*ab-nū'-ral*) [*ab*, from; νεῦρον, nerve]. Pertaining to a part remote from the neural or dorsal aspect; ventral.

abnormal (*ab-nor'-mal*) [*ab*, away from; *norma*, a rule]. Not normal; not conformable with nature or with the general rule.

abnormalism (*ab-nor'-mal-izm*). 1. Abnormality. 2. An abnormal thing or structure.

abnormality, abnormity (*ab-nor-mal'-it-e, ab-nor'-mit-e*). The quality of being abnormal; a deformity or malformation.

aboiement (*ah-bwah-mon'* (*g*)) [Fr.]. Barking; the involuntary utterance of barking sounds.

abolition (*ab-o-lish'-un*) [*abolitio*]. Destruction; cessation; suspension, as of a function.

abolitionism (*ab-o-lish'-un-izm*) [*abolitio*, an abolishing]. A movement originating in England to abolish the regulation and control of prostitution by the health-officers. Also applied to the movement to abolish vivisection.

abomasum, abomasus (*ab-o-ma'-sum, ab-o-ma'-sus*) [*ab*, away; *omasum*, paunch]. The reed or proper digestive stomach of ruminating mammals; also called "fourth," or "true," stomach.

aborad (*ab-o'-rad*) [*ab*, away from; *os*, mouth]. An aboral situation, or direction from the mouth.

aboral (*ab-o'-ral*) [*ab*, away from; *os*, the mouth]. Opposite to, or remote from, the mouth.

aboriginal (*ab-or-ij'-in-al*) [see *aborigines*]. Autochthonous.

aborigines (*ab-or-ij'-in-ēz*) [*ab*, from; *origo*, origin, beginning]. Primitive, autochthonous, native, indigenous.

abort (*ab-ort'*) [*ab*, from; *ortus*, from *oriri*, to grow]. 1. To miscarry; to expel the fetus before it is viable. 2. To prevent full development, as of a disease. 3. To come short of full development.

aborticide (*ab-or'-tis-īd*) [*abortus; cædere*, to kill]. 1. The killing of the unborn fetus. 2. The means of killing the fetus. 3. Causing the destruction of a fetus.

abortient (*ab-or'-shent*) [see *abort*]. Abortive; abortifacient.

abortifacient (*ab-or-te-fa'-shent*) [*abortus; facere*, to make]. 1. Causing abortion. 2. A drug or agent inducing the expulsion of the fetus.

abortin reaction (*ab-or'-tin*). Animals infected with *Bacterium abortin* show rise of temperature, diarrhea, and loss of appetite.

abortion (*ab-or'-shun*) [*abortus*, a miscarriage]. The expulsion of the ovum before the child is

viable; that is, any time before the end of the sixth month. By some authors expulsion of the ovum during the first 3 months is termed *abortion;* from this time to viability it is termed *immature delivery*, or *miscarriage*, and from the period of viability to that of maturity, *premature delivery.* **a., accidental,** see *a., spontaneous.* **a., artificial,** that produced intentionally. **a., criminal,** that not demanded for therapeutic reasons. **a., embryonic,** abortion up to the fourth month. **a., epidemic,** the occurrence of many cases at about the same time, due to widespread distress, excitement, or privation, or to some form of poisoning, such as ergotism. **a., fetal,** abortion after the fourth month. **a., habitual,** repeated abortion in successive pregnancies, usually due to syphilis. **a., incomplete,** when the membranes or the placenta is retained. **a., induced,** see *a., artificial.* **a., inevitable,** when the embryo or fetus is dead, or when there is an extensive detachment or rupture of the ovum. **a., justifiable,** same as *a., therapeutic.* **a., missed,** the death of the fetus and not followed within two weeks by its expulsion. **a., ovular,** abortion within three weeks after conception. **a., partial,** the premature loss of one fetus in a case of multiple gestation. **a., spontaneous,** that not induced by artificial means. **a., therapeu'tic,** induced abortion to save the mother's life. **a., tubal,** the escape of a fertilized ovum through the abdominal opening of the oviduct into the peritoneal cavity.

abortionist (*ab-or'-shun-ist*) [*abortion*]. One who criminally aborts.

abortive (*ab-or'-iv*) [see *abortion*]. Prematurely born; coming to an untimely end; undeveloped; cutting short a disease; abortifacient.

abortus (*ab-or'-tus*). Aborted fetus; abortion.

abouchement (*ab-oosh-mahn'*) [Fr.]. The termination of a small vessel in a larger one.

aboulia (*ah-boo'-le-ah*). See *abulia.*

aboulomania (*ah-boo-lo-ma'-ne-ah*). *Abulomania*

abrachia (*ah-bra'-ke-ah*) [*ἀ*, priv.; *βραχίων*, arm]. The condition of an armless monster.

abrachiocephalia (*ah-bra-ke-o-sef-a'-le-ah*) [*abrachia; κεφαλή*, head]. Headless and armless.

abrachiocephalus (*ab-rak-e-o-sef'-al-us*) [*abrachia; κεφαλή*, head]. Headless and armless monster.

abrachius (*ah-bra'-ke-us*). See *abrachia.*

abrade (*a-brad'*) [*abradere*, to rub off]. To remove by friction or chafing; to roughen by friction.

abraham (*a'-bra-ham*). To sham; to feign sickness or lunacy. **A.-man,** 1. A mendicant lunatic from the Abraham Ward of Bethlehem Hospital, London; they bore a distinctive badge.

Abrams' Reflex [Albert Abrams, American physician 1864–1924]. **A's heart r.** The myocardium contracts, also the area of cardiac dulness when the skin of the precordial area is irritated. **A's lung r.** Enlargement of the area of lung when the skin of chest wall is irritated. **A's treatment** of aortic aneurysm is percussing the spine.

abrasio (*ab-ra'-se-o*) [L.]. An abrasion. **a. corneæ,** a scraping off of the superficial epithelium of the cornea. **a. dentium,** wearing away of teeth.

abrasion (*ab-ra'-shun*) [*ab*, priv.; *radere*, to rub]. Excoriation of the cutaneous or mucous surface by mechanical means. In dentistry, the wearing away of the dentine and enamel, or the cutting edges of the teeth, whether by mechanical or chemical means.

abrasor (*ab-ra'-sor*) [L., "abrader"]. A surgeon's rasp or xyster; any file or instrument used in the surgical or dental abrasion of a surface; also, a rasp used in pharmacy.

abrastol (*ab-rast'-ol*). See *asaprol.*

abreaction (*ab-re-ak'-shun*) [*ab*, priv.; *re*, again; *action*]. The working off of something by living through it again. Freud's term for the elimination of a mental trauma or psychoneurosis by the process of re-enacting it, and at the same time allowing free play to the emotions, and thus relieving the patient's mind of the mental effect which it produced; also called *catharsis.*

abrin (*ab'-rin*). A phytotoxin obtained from the *Abrus precatorius;* its action is similar to that of ricin, but is less poisonous.

abrosia (*ab-ro'-se-ah*) [*ἀβρωσία*, fasting]. Want of food; fasting.

abrotanum (*ab-rot'-an-um*) [*ἀβρότονον*, an aromatic plant] The plant called southern-wood, *Artemisia abrotanum.* A vermifuge and tonic.

abruptio [L.]. Abruption; a tearing away. **a. placentæ,** premature detachment of the placenta.

abruption (*ab-rup'-shun*) [*ab*, away from; and *rumpere*, to break]. 1. A rupture or tearing asunder. 2. A transverse fracture.

Abrus (*a'-brus*) [*ἁβρός*, pretty]. Jequirity; Indian licorice. The seeds of *A. precatorius*, or wild licorice. Its properties are thought to be due to the presence of certain ferments. See *abrin.* Infusions applied to the conjunctiva or to any mucous surface induce violent purulent inflammation with growth of false membrane. It is used in producing artificial conjunctivitis.

abscess, abscessus (*ab'-ses, ab-ses'-us*) [*abscessus*, a departure or separation]. A localized collection of pus surrounded by a wall of lymph. Syn., *ecpyema; gathering.* According to location, abscesses are named *dorsal, mammary, ischiorectal, perityphlitic, retropharyngeal,* etc. **a., acute,** one resulting from an acute inflammation of the part in which it is formed. Syn., *abscessus per fluxum.* **a., alveolar,** abscess in the gum or alveolus. **a. amebic,** a variety of abscess found in the liver and lung and containing amebæ. **a., anorectal,** one of the cellulo-adipose tissue near the anus. **a., appendiceal, a., appendicular,** pus formation about the vermiform appendix. **a., arthrifluent,** a wandering abscess having its origin in a diseased joint. **abscessus arthriticus,** Musgrave's term for intestinal abscesses due to "gouty dysentery." **a., atheromatous,** an area of softening in the wall of a vessel the result of sclerotic endarteritis. **a., bicameral,** one with two pockets. **a., biliary,** one connected with the gall-bladder or a bile-duct. **a., blind,** dental granuloma. **a., bursal,** abscess in a bursa. **a., canalicular,** mammary abscess that communicates with a milk-duct. **abscessus carniformis,** Severinus' name for a hard sarcoma of the joints. **a., caseous,** an abscess in which the pus has a cheesy appearance. **a., cheesy,** same as **a., caseous.** **a., chronic, a., cold,** one of slow and apparently noninflammatory development, generally about a bone, joint, or gland. It is usually tuberculous and contains cheesy material. **a., circumscribed,** one that is limited by an exudation of lymph. **a., circumtonsillar,** quinsy. **a., cold,** see *a., chronic.* **a., congestive,** one in which the pus appears at a point distant from where it is formed. **a., embolic,** one formed at the seat of a septic embolus. **a., fecal,** one in the rectum or large intestine. **a., fixation,** an abscess produced by the subcutaneous injection of an irritant as a treatment of grave septicemia. **a., follicular,** one arising

in a follicle. **a., glandular,** one formed about a lymph-gland. **a., gravitation,** one in which pus formed in one part of the body tends to migrate, usually to portions deeper or lower down, in the direction gravity would take it. **a., hematic,** one due to an extravasated blood-clot. **a., hemorrhagic,** one containing blood. **a., idiopathic,** one not attributable to any disease. **a., iliac,** a wandering abscess of the iliac region. **a., infecting mitral,** one due to a lymph embolus caused by endocarditis. **a., intramastoid,** one of the mastoid process of the temporal bone. **a., ischiorectal,** one in the ischiorectal fossa. **a., lacunar,** one in the urethral lacunæ. **a., lumbar,** a wandering abscess of the lumbar region. **a., lymphatic.** 1. The suppuration of a lymphatic gland. 2. An enlarged bursa mucosa. **a., mammary,** one in the female breast. **a., marginal,** one located near the anal orifice. **a., mastoid,** suppuration occurring in the cells of the mastoid portion of the temporal bone. **a., metastatic,** an abscess secondary to pyemia and ulcerative endocarditis, but not occurring through septicemia. It is usually of embolic origin and generally located in the lungs and liver. **a., miliary,** a small embolic abscess. **a., milk,** a mammary abscess occurring during lactation. **a., ossifluent,** one arising from diseased bone. **a., otic cerebral, a., otitic cerebral,** an abscess of the brain following a purulent disease of the inner ear. **a., parametric, a., parametritic,** a form occurring frequently between the folds of the broad ligament of the uterus or in the neighboring cellular tissue. **a., paranephric, a., paranephritic,** one occurring in the tissues about the kidney. **a., perimetric, a., perimetritic,** pus within the peritoneum originating from inflammation of the peritoneal covering of the uterus. **a., perinephric, a., perinephritic,** one occurring in the region immediately surrounding the kidney. **a., peripleuritic,** one that occurs beneath the parietal pleura as the result of pleurisy, a diseased rib, or an injury. **a., periproctitic,** one in the loose areolar tissue surrounding the lower part of the rectum. **a., peritoneal,** a collection of softened exudate which has become encysted in cases of peritonitis. **a., peritonsillar,** one that forms in acute tonsillitis around one or both tonsils. **a., phlegmonous,** an acute abscess. **abscessus pneumococcalis,** one due to infection by pneumococci. **a., postcecal,** one located back of the cecum. **a., posttyphoid,** chronic abscess following typhoid. **a., prelacrimal,** an abscess due to caries of the lacrimal or the ethmoid bone, producing a swelling at the inner canthus immediately below the upper margin of the orbit. **a., primary,** one formed at the seat of pyogenic infection. **a., psoas,** one arising from disease of the lumbar or lower dorsal vertebræ, the pus descending in the sheath of the muscle, and usually pointing beneath Poupart's ligament. **a., pyemic,** see *pyemia*. **a., residual,** one formed in or about the residues of former inflammation. **A.-root,** the root of *Polemonium reptans;* alterative, astringent, and expectorant. **a., scrofulous,** one due to tuberculous degeneration of bone or lymph-glands. **a., secondary,** same as *a., embolic*. **a., septicemic,** one resulting from septic infection or accompanying septicemia. **a., shirtstud,** two abscesses communicating by means of a sinus. **a., spermatic,** one involving the seminiferous tubules. **a., spinal,** one due to necrosis or disease of a vertebra. **a., spirillar,** Verneuil's name for an abscess containing spirilla from the saliva. **a., stitch,** one formed about a stitch or suture. **a., subaponeurotic,** one beneath an aponeurosis or fascia. **a., subareolar,** one beneath the alveolar epithelium of the nipple. **a., subfascial,** one beneath a fascia; postfascial abscess. **a., submammary,** one lying between the mammary gland and the chest-wall. Syn., *postmammary abscess; retromammary abscess*. **a., subpectoral,** one beneath the chest muscles. **a., subperitoneal,** one arising between the parietal peritoneum and the abdominal wall. Syn., *preperitoneal abscess*. **a., subphrenic,** one located beneath the diaphragm. **a., sudoriparous,** an abscess due to inflammation of obstructed sweat-glands. **a., sympathetic,** a secondary or metastatic abscess at a distance from the part of which the exciting cause has acted (*e. g.*, a bubo). **a., thecal,** one in the sheath of a tendon. **a., tropical,** amebic abscess (of the liver) found in conjunction with amebic dysentery. **a., tuberculous,** see *a., chronic*. **a., tympanitic,** one containing gas generated by putrefaction. Syn., *abscessus flatuosus; gas abscess* **a., urethral.** 1. Suppuration of a urethral lacuna; a lacunar abscess. 2. One involving the circumurethral tissue. **a., urinary,** one resulting from extravasation of urine. **a., urinous,** one containing urine mingled with the pus. **a., verminous, a., worm,** one containing intestinal worms, from the intestine. **a., wandering,** one in which the pus has traveled along the connective tissue spaces and points at some locality distant from its origin. Syn., *hypostatic abscess, abscessus per congestun; abscessus per decubitum*.

bscessed (*ab'-sesd*). Affected with or caused by an abscess, as "abscessed teeth."

abscession (*ab-sesh'-un*) [*abscessio*, departure] 1. An abscess; critical discharge. 2. Metastasis.

abscissæ (*ab-sis'-se*) [*ab*, away; *scindere*, to cut]. The transverse lines cutting vertical ones at right angles, to show by a diagram the relations of two series of facts, as, *e. g.*, the number of pulse-beats or the temperature record in given periods of time.

abscission (*ab-sish'-un*) [see *abscissæ*]. Removal of a part by cutting; or the suppression of a physiological function.

absconsio (*ab-skon'-se-o*) [*abscondere*, to hide]. A sinus or cavity whether normal or pathological.

absence (of mind) (*ab'-sens*) [*absentia*, absence]. Inattention to surroundings; in marked instances it may be a result of central lesions. It is often seen in epileptics and melancholiacs.

absentia epileptica (*ab-sen'-she-ah ep-il-ep'-tik-ah*). Brief losses of consciousness occurring in the mild form of epilepsy.

abs. feb. Abbreviation of *absente febre* [L.]. In the absence of fever.

absinthe (*ab'-sinth*). See under *absinthium*.

absinthiate (*ab-sin'-the-āt*). A salt of absinthic acid.

absinthiated (*ab-sin'-the-a-ted*). 1. Mixed with absinthe. 2. Containing wormwood.

absinthin (*ab-sinth'-in*) [*absinthium*]. A bitter crystalline principle obtainable from wormwood. See *absinthium*.

absinthism (*ab-sinth'-izm*). A disease similar to alcoholism, the result of the excessive use of absinthe. It is characterized by general muscular debility and mental disturbances, that may proceed to convulsions, acute mania, or general paralysis.

absinthium (*ab-sinth'-e-um*) [L.]. Wormwood. The leaves and tops of *Artemisia absinthium*. Absinthium contains a volatile oil and an intensely bitter principle, *absinthin*, $C_{20}H_{28}O_4$, which is a narcotic poison. Absinthium increases cardiac action and produces tremor and epileptiform convulsions. Dose 20–40 gr. (1.3–2.6 Gm.) in infusion. It is used as a stomachic tonic. *Absinthe*, a French liqueur, is an alcoholic solution of the oil exhibited with oils of anise, marjoram, and other aromatic oils.

absinthol (*ab-sinth'-ol*), $C_{10}H_{16}O$. The principal constituent of oil of wormwood; it is isomeric with ordinary camphor.

absolute (*ab'-so-lūt*) [*absolvere*, to complete]. Perfect, entire, unconditional. **a. alcohol**, see *alcohol*. **a. temperature**, see *temperature*. **a. zero**, see *zero*.

absorb (*ab-sorb'*) [*absorbere*, to suck up]. To suck up or imbibe; to take within one's self; to stop the passage of radiant heat.

absorbefacient (*ab-sorb-e-fa'-shent*) [*absorptio*, absorption; *facere*, to make]. Favoring or tending to produce absorption.

absorbent (*ab-sor'-bent*) [see *absorb*]. 1. Absorbing; capable of absorbing 2. An organ or part that absorbs. 3. A term applied to the lacteals and lymphatics 4. In materia medica, a drug or medicine that produces absorption of diseased tissue. **a. cotton**, see *cotton*. **a. glands**, see *lymphatics*. **a. system**, the lacteals and lymphatics with their associated glands.

absorptio (*ab-sorp'-she-o*) [see *absorb*]. **a. morbosa**, see *absorption, excrementitial* (2). **a. pulmonalis**, see *absorption, pulmonary*. **a. sana**, see *absorption, physiological*.

absorptiometer (*ab-sorp-she-om'-et-er*) [*absorption*; *μέτρον*, a measure] A device for measuring the thickness of the layer of liquid that is taken up between two glass plates by capillary attraction. Used in conjunction with a spectrophotometer, it serves as a hematoscope.

absorption (*ab-sorp'-shun*) [see *absorb*]. The permeation or imbibition of one body by another. The neutralization of an acid. **a., chylous**, the act or process of the entrance of the oil-globules of the chyle into the central canals of the intestinal villi. **a., coefficient of**, that number which represents the volume of a gas absorbed by a unit volume of water at 0° C. and at a barometric pressure of 760 mm. **a., cutaneous**, absorption by the skin. **a., disjunctive**, the removal of living tissue around a necrosed mass, and its consequent separation from its surroundings. **a., excrementitial.** 1. The absorption of fluid excretions by the mucosa. 2. The absorption of excretions or morbid products (bile, pus) by the blood. Syn., *pathological absorption*, *absorptio morbosa*. **a., external**, the taking up by the skin or mucous surfaces of pabulum or medication applied to the exterior of the body or of an organ. **a., internal.** 1. The absorption of waste-products by the tissues; absorption of decomposition of dissimilation. 2. The taking up of pabulum by the tissues; absorption of nutrition; molecular, nutritive, organic absorption. **a., interstitial**, the removal by the absorbent system of effete matters. **a. lines, a. bands**, dark lines of the spectrum, called Fraunhofer's lines, caused by the arrest or absorption of the ethereal waves of certain lengths and rapidities, mainly by vapors of the sun's atmosphere. **a., lymphatic**, that which occurs in lymphatic vessels. **a. method**, to determine whether or not hematuria is due to lesion of the bladder. It is based on the fact that the undenuded surface of the bladder will not absorb foreign substances. Fifteen grains of potassium iodide are injected into the bladder, and fifteen minutes later the saliva is examined for iodine. If found, it is an indication of an unhealthy state of the bladder. **a., molecular, a., nutritive, a., organic**, see *a., internal* (2). **a., pathological**, see *a., excrementitial* (2). **a., physiological**, a phenomenon forming an important part of the digestive process, caused in part by the vital activity of the epithelial cells and in part by the physical laws of imbibition, diffusion, and osmosis. Syn., *absorptio sana*. **a., progressive**, atrophy of a part due to pressure. **a., pulmonary**, the taking up of oxygen, or of vapors (as of ether), by the lungs. **a., purulent**, 1. *a., excrementitial* (2). 2. pyemia. **a., recrementitial**, the absorption of surplus secretions. **a., respiratory**, see *a., pulmonary*. **a. spectrum**, a spectrum showing black lines where colors have been absorbed by the transmitting medium. **a. tube**, see under *tube*. **a., ulcerative**, that by which an ulcer forms or extends its area. **a., venous**, absorption by the veins.

absorptive (*ab-sorp'-tiv*) [see *absorb*]. Having the power or function of absorbing.

abstergent (*ab-ster'-jent*) [*abs*, from; *tergere*, to cleanse]. 1. Cleansing; detergent. 2. A cleansing agent. See *detergent*. 3. A purgative.

abstersive (*ab-ster'-siv*) [*abstersivus*]. Abstergent.

abstinence (*ab'-stin-ens*) [*abs*, from; *tenere*, to hold or keep]. Privation or self-denial in regard to food, alcoholic liquors, sexual intercourse, etc. See *fasting*.

abstract (*ab'-strakt*) [*abstrahere*, to draw away]. In pharmacy, a solid preparation containing the soluble principles of a drug evaporated and mixed with sugar of milk.

abstraction (*ab-strak'-shun*) [*abstractio*, a drawing away]. 1. Blood-letting. 2 Attention to one idea to the exclusion of others. 3. In pharmacy, the process of distillation.

abstractum (*ab-strak'-tum*) [pl., *abstracta*]. An abstract. See *abstract*.

abterminal (*ab-ter'-min-al*) [*ab*, from; *terminus*, end]. Passing from tendinous into muscular tissue (used of electric currents).

abulia (*ah-boo'-le-ah*) [*ἀ*, priv.; *βουλή*, will]. Loss or defect of will-power.

abulic (*ah-boo'-lik*) [see *abulia*]. Characterized by or affected with abulia.

abulomania (*ah-boo'-lo-ma'-ne-ah*) [*abulia*; *μανία*, madness]. A disease of the mind characterized by imperfect or lost will-power.

abuse (*ab-ūs'*) [*abusus*, a using up]. 1. Misuse or overuse. 2. Rape. **a., self-**, masturbation.

abutment (*ab-ut'-ment*). A tooth to which a dental bridge is attached.

abvacuation (*ab-vak-u-a'-shun*). Same as *abevacuation, q. v.*

A. C. Abbreviation of anodal closing.

a. c. Abbreviation of the Latin *ante cibum*, before meals. Also abbreviation of air-conduction.

acacanthrax (*ak-ah-kan'-thraks*) [*ἀ*, priv.; *κακός*, bad; *ἀνθραξ*, a carbuncle: pl., *acacanthraces*]. Non-malignant anthrax.

Acacia (*ah-ka'-she-ah*) [L.]. 1. A large genus of leguminous trees, shrubs, and herbs, many of them Australian or African. A number of the species are medicinal, and some are poisonous. The bark is usually very astringent. 2. Gum-arabic, which is produced by various species—

A. lebbek, *A. nilotica*, *A. vera*, and *A. verek*. *A. senegal* also furnishes gum-arabic, a nearly white, transparent gum, soluble in water. It is used in the manufacture of mucilage, and contains *arabin*, $C_{12}H_{22}O_{11}$, identical in composition with cane-sugar. **a. anthelmintica**, see *mussanin*. **a. catechu**, see *catechu*. **a., mucilage of** (*mucilago acaciæ*, U. S. P.), acacia, 34; water, to make 100 parts; incompatible with alcoholic tinctures. **a., syrup of** (*syrupus acaciæ*, U. S. P.), mucilage, 25; simple syrup, 75. It is used in various mixtures as a demulcent and to suspend insoluble powders.

acalculia (*ah-kal-ku'-le-ah*) [ἀ, priv.; λοχίζομαι, calculate]. An aphasic condition. Inability to do simple arithmetic.

Acalypha (*ah-kal'-if-ah*) [ἀκαλύφης, unveiled]. A genus of euphorbiaceous plants. *A. fruticosa*, of India, is useful in dyspepsia and diarrhea, and is tonic and alterant. *A. hispida* has similar uses. *A. indica* is a plant common in India. The leaves are expectorant, emetic, laxative. *A. virginica*, of North America, is diuretic and expectorant. Dose of the *fluid-extract* 10 min.–1 dr. (0.6–4.0 Cc.); of the *juice* (*succus acalyphæ*), for an infant, 1 dr. (4 Cc.).

acampsia (*ah-kamp'-se-ah*) [ἀ, priv.; κάμπτειν, to bend]. Inflexibility of a limb.

acantha (*ak-an'-thah*) [ἄκανθα, a thorn]. 1. A vertebral process. 2. The spinal column. 3. Spina bifida.

acanthesthesia, acanthæsthesia (*ak-anth-es-the'-se-ah*) [ἄκανθα, a prickle; αἴσθησις, sensation]. A sensation as of pricking with needles.

Acanthia lectularia (*ak-an'-the-ah-lek-chu-la'-re-ah*) [L.]. The common bedbug.

acanthial (*ak-an'-the-al*) [see *acanthion*]. Pertaining to the acanthion.

acanthion (*ak-an'-the-on*) [ἀκάνθιον, a little thorn]. A point at the base of the nasal spine.

Acanthocephala (*ak-an-tho-sef'-al-ah*) [ἄκανθα, spine; κεφαλή, head]. An order of parasitic worms, characterized by a thorny armature of the head and proboscis. They are generally grouped in one genus, *Echinorrhynchys*. They infest pigs, birds, and fishes, and in their larval stage live in crustaceans.

acanthocephaliasis (*ak-an-tho-sef-al-i'-as-is*) [*Acanthocephala*]. Infestation by Acanthocephala.

acanthoid (*ak-an'-thoid*) [ἄκανθα, a spine]. Resembling a spine, or spicula; spinous.

acanthokeratodermia (*ak-an-tho-ker-at-o-der'-me-ah*) [ἄκανθα, spine; κέρας, horn; δέρμα, skin]. Thickening of the horny layer of the skin of the hands or feet.

acantholysis (*ak-an-thol'-is-is*) [ἄκανθα, prickle; λύσις, a loosening, a wasting]. Any skin disease in which there is an atrophy of the prickle-layer. **a. bullosa**, see *epidermolysis*.

acanthoma (*ak-an-tho'-mah*) [ἄκανθα, a thorn; ὄμα, tumor]. A neoplasm, or localized excessive growth in any part of the prickle-cell layer of the skin. 1. Cutaneous cancer. 2. Papilloma.

acanthopelvis (*ak-anth-o-pel'-vis*) [ἄκανθα, thorn; *pelvis*]. Same as *acanthopelys*.

acanthopelys (*ak-anth-op'-el-is*) [ἄκανθα, thorn; πέλυς, pelvis]. A pelvis that is encroached upon by exostoses.

acanthosis (*ak-an-tho'-sis*) [ἄκανθα, a spine]. Any skin disease marked by abnormities in the prickle-cell layer. **a. nigricans**, a general pigmentation of the skin, with papillary, mole-like growths.

acanthulus (*ak-an'-thu-lus*). An instrument for removing thorns from wounds.

acapnia (*ah-kap'-ne-ah*). A condition of diminished carbon dioxide in the blood.

acapsular (*ah-kap'-su-lar*) [ἀ, priv.; *capsula*, a small box or capsule]. In biology, destitute of a capsule.

acardia (*ah-kar'-de-ah*) [ἀ, priv.; καρδία, heart]. Congenital absence of the heart.

acardiac (*ah-kar'-de-ak*). 1. Having no heart. 2. A fetus with no heart.

acardiacus (*ah-kar-di'-ak-us*) [see *acardia*]. A synonym employed by German writers for omphalosite. **a. acephalus**, one in which the head is wanting, the thorax rudimentary, the pelvis and contiguous parts perfectly formed. **a. amorphus**, **a. anceps**, a shapeless lump with only rudiments of organs.

acardiohemia, or **acardiohæmia** (*ah-kar-de-o-he'-me-ah*) [ἀ, priv.; καρδία, heart; αἷμα, blood]. Lack of blood in the heart.

acardionervia (*ah-kar-de-o-ner'-ve-ah*) [ἀ, priv. καρδία, heart; *nervus*, a sinew]. Diminished nervous action or nerve-stimulus in the heart.

acardiotrophia (*ah-kar-de-o-tro'-fe-ah*) [ἀ, priv.; καρδία, heart; τροφή, nutrition]. Atrophy of the heart.

acardius (*ah-kar'-de-us*). Congenital absence of the heart. An acardiac monster.

acarian (*ah-ka'-re-an*). Of or pertaining to the acarids or mites.

acariasis (*ah-kar-i'-as-is*). A disease due to mites. See *mange*.

acaricide (*ak-ar'-is-id*) [*acarus*; *cædere*, to kill]. An agent that destroys acarids.

acarid, acaridan (*ak'-ar-id, ak-ar'-id-an*) [ἀκαρής, small; tiny]. Pertaining to *acarus*.

Acarina (*ak-ar-i'-na*). An order of *Arachnida*, which includes the ticks and mites. They may cause severe symptoms from their bites, apart from the introduction of any parasite such as *Spirochæta*.

acarinosis (*ak-ar-in-o'-sis*) [*acarus*, a mite]. Any disease, as the itch, produced by a mite or acarid.

acarodermatitis (*ak-ar-o-der-mat-i'-tis*) [*acarus*, a mite; *dermatitis*]. Dermatitis caused by acari, or mites.

acaroid (*ak'-ar-oid*) [*acarus*; εἶδος, like]. Mite-like. **a. gum**, Botany Bay gum; resina lutea. An aromatic resin used in Australia as a remedy for gastric troubles, intestinal catarrhs, diarrheas, etc. Dose 8–16 gr. (0.5–1.0 Gm.) in alcoholic solution. Benzoic acid is made from it, and it is said to have the properties of storax and balsam of Peru. **a. resin.** See *a. gum*.

acarophobia (*ak-ar-o-fo'-be-ah*) [*acarus*; φόβος, fear]. Morbid fear of the itch.

acarotoxic (*ak-ar-o-toks'-ik*) [*acarus*, a mite; τοξικόν, a poison]. Poisonous, or destructive, to acari.

acarpæ (*ah-kar'-pe*) [ἀ, priv.; καρπός, fruit]. A name proposed for a group of skin diseases in which there are no papules, tubercles, or elevated points.

acarpia (*ah-kar'-e-ah*) [ἀκαρπία]. Sterility; barrenness; unfruitfulness.

acarpous (*ah-kar'-pus*) [ἀ, priv.; καρπός, fruit]. 1. Having no elevations; not nodular. 2. Producing no fruit; sterile, barren.

Acarus (*ak'-ar-us*) [ἀ, priv.; κείρειν, to cut (because so small)]. The mite, or tick, a parasite of man and animals. **A. scabiei**, *Sarcoptes scabiei*, the

itch-mite, a small parasite with numerous sharp tubercles, spines, and hairs on the dorsal surface. See *scabies*.

acatalepsia, acatalepsy, (*ah-kat-al-ep'-se-ah, ah-kat'-al-ep-se*) [ἀ, priv.; καταλαμβανειν, to understand]. 1. Uncertainty in diagnosis. 2. Mental impairment; dementia.

acataleptic (*ah-kat-al-ep'-tik*) [ἀ, priv.; καταλαμβανειν, to understand]. 1. Uncertain; doubtful (used of a prognosis or a diagnosis of a disease). 2. A person affected with acatalepsy.

acatamathesia (*ah-kat-am-ath-e'-ze-ah*) [ἀ, priv.; καταμάθησις, understanding]. 1. Inability to understand conversation, due to mental disorder. 2. A morbid blunting of the perceptions; as in psychical deafness, or psychical blindness.

acataphasia (*ah-kat-af-a'-ze-ah*) [ἀ, priv.; κατά, after, φάσις, utterance]. A disorder in the syntactical arrangement of uttered speech, due to some central lesion.

acataposis (*ah-kat-ap-o'-sis*) [ἀ, priv.; κατά, down; ποσις, a drinking, a swallowing]. A difficulty in swallowing; dysphagia.

acatastasia (*ah-kat-as-ta'-ze-ah*) [ἀκαταστασία]. Absence of regularity, or of fixed character, in the course of a disease, or in the nature of an excretion

acatastatic (*ah-kat-as-tat'-ik*). Marked or characterized by acatastasia; irregular; not of definite type.

acatharsia (*ah-kath-ar'-se-ah*) [ἀκαθαρσία, uncleansed state]. Impurity; foulness; need of purgation, or cleansing.

acathectic (*ah-kath-ek'-tik*) [ἀκάθεκτικος, ungovernable]. Not able to retain. **a. jaundice,** see *jaundice*.

acathexia (*ak-ath-eks'-e-ah*) [ἀ, priv.; κάθεξις, a holding back]. A condition in which a person is not able to retain his secretions or excretions.

acathisia (*ah-kath-iz'-e-ah*) [ἀ, priv.; κάθιζειν, to be seated]. Not able to remain seated.

acaudal, acaudate (*ah-kaw'-dal, ah-kaw'dāt*) [ἀ, priv.; *cauda*, a tail]. Tailless.

acauline (*ak-aw'-lin*) [ἀ, priv.; καυλός, a stalk]. Pertaining to stemless fungi.

acaulinosis (*ak-aw-lin-o'-sis*) [*acauline*]. A lesion of the skin caused by an acauline fungus.

A C C. Abbreviation for *anodal closing contraction*.

accelerans nerve (*ak-sel'-er-ans*) [L.]. A nerve that increases the rate and force of the heart's action.

acceleration (*ak-sel-er-a'-shun*) [*accelerare*, to hasten]. Quickening, as of the rate of the pulse or of the respiration.

accelerator (*ak-sel'-e-ra-tor*) [see *acceleration*]. 1. That which accelerates. 2. A muscle which hastens a physiological discharge. **a. nerves,** nerves passing from the medulla to the heart and conducting stimuli that cause acceleration of the heart's action. **a. partus,** an abortifacient or ecbolic agent. **a. urinæ,** a muscle of the penis the function of which is to expel the last drops in urination, to expel the semen, and to assist erection. The sphincter vaginæ is its analogue in the female.

accentuated (*ak-sent'-u-a-ted*). Abnormally or unusually distinct, as respiratory or heart sounds.

accentuation (*ak-sen-tu-a'-shun*) [*accentuare*]. Increased loudness or distinctness.

acceptor (*ak-sep'-tor*) [*accipere*, to accept]. A substance or body which receives another substance (or gas) and unites with it.

access (*ak'-ses*) [*accessus*, an approach]. 1. An attack of a disease. 2. The return of a fit, or paroxysm. 3. Cohabitation. And see *non-access*.

accession (*ak-sesh'-un*) [*ad*, to; *cedere*, to go]. The assault, beginning, or onset of a disease, or of a stage of the same; applied especially to a recurrence of periodical disease.

accessorius (*ak-ses-o'-re-us*) [pl., *accessorii*]. 1. Contributory in a secondary degree; accessory. 2. An accessory. **a. ad iliocostalem,** see *muscles, table of*. **a. Willisii,** the spinal accessory nerve.

accessory (*ak'-ses-o-re-* or *ak-ses'-o-re*) [*accessorius*]. Auxiliary; assisting. A term applied to certain glands, muscles, ducts, nerves, arteries, etc., that are auxiliary in function, course, etc., to the principal. Certain small muscles, as the lumbricales, are regarded as accessory to more important muscles. **a. food factors,** the vitamins, *q. v.* **a. nu'cleus,** the origin of the spinal accessory nerve. **a. of the parot'id,** the socia parotidis, a small gland. **a. pancreatic duct,** the duct of Santorini.

accident (*ak'-se-dent*) [*accedere*, to occur]. 1. In legal medicine, an event occurring to an individual without his expectation, and without the possibility of his preventing it at the moment of its occurrence. 2. An intercurrent or complicating symptom or event, not to be looked for in the regular progression of an attack of disease.

accidental (*ak-se-dent'-al*) [*accidentalis*]. 1. Due to, or caused by, an accident. 2. Intercurrent; having no essential connection with other conditions or symptoms. **a. images,** after-images. **a. murmur,** a murmur due to anemia.

accipiter (*ak-sip'-it-er*) [L., "a hawk"]. A facial bandage with tails radiating like the claws of a hawk. **a. quinqueceps,** a five-headed accipiter bandage. **a. triceps,** a three-headed accipiter bandage.

acclimatation, acclimation, acclimatization (*ak-li-mat-a'-shun, ak-lim-a'-shun, ak-li-mat-iz-a'-shun*) [*ad*, to; *clima*, climate]. The process of becoming accustomed to the climate, soil, water, etc., of a country to which a plant, animal, person, or a people has removed.

accoine (*ak'-ko-in*). A milk preservative containing sodium benzoate and sodium carbonate.

accommodation (*ak-om-o-da'-shun*) [*accommodare*, to adjust]. Adaptation or adjustment, particularly the adjustment of the eye for different distances. **a., absolute,** the accommodation of either eye separately. **a., asthenopia of,** subnormal power of the function of accommodation, or the pain or discomfort from accommodative effort. **a., binocular,** the combined accommodation of the two eyes. **a., histological,** the occurrence of changes in the morphology and function of cells following changed conditions. **a., negative,** the opposite of positive accommodation, the refractive power of the eye being lessened. **a. of the eye,** that function of the ciliary muscle and lens whereby objects at different distances are clearly seen. It depends upon the inherent elasticity of the lens, which when the ciliary muscle of an emmetropic eye is at rest is adapted to the proper focalization of theoretically parallel rays of light. Objects nearer, to be clearly seen, require a greater refracting power on the part of the eye because the rays from such objects are more divergent. This additional refracting power is gained by an increased anteroposterior diameter of the

lens, brought about by the contraction of the ciliary muscle, which occasions a loosening of the suspensory ligament and a thickening of the lens by its own elasticity. **a. phosphenes,** the peripheral light-streak seen in the dark after the act of accommodation. **a., positive,** that when the eye being focused for a more distant object is required for fixation upon a nearer point. **a., range of relative,** the range of accommodation at the command of the eye for any particular degree of convergence. **a., reflex,** Argyll Robertson pupil. **a., region of,** the extent controlled by the eye within which it distinguishes objects clearly from the state of rest to that of maximum accommodation. **a., spasm of,** a term used to express excessive or persistent contraction of the ciliary muscle, following the attempt to overcome error of refraction. It stimulates myopia. **a., subnormal,** deficient power of accommodation. **a., supernormal,** excessive power of accommodation. **a., theory of, Helmholtz's,** that the increased convexity of the lens is produced by a relaxation of the suspensory ligament, thus removing the influence which tends to flatten the lens and permitting the latter by its elasticity to become more convex. **a., theory of, Schoen's,** that the contraction of the ciliary muscle produces the same effect on the lens as is produced upon a rubber ball when held in both hands and compressed with the fingers. **a., theory of, Tscherning's,** by the contraction of the anterior part of both the radiating and circular fibers of the ciliary muscle the ciliary processes are drawn backward, and the suspensory ligament pulled backward and outward; pressure of the anterior portion of the muscle causes increased convexity of the lens.

accommodative (*ak-om'-o-da-tiv*) [*accommodare*, to adjust]. Pertaining to the function of accommodation, or resulting from it. **a. iridoplegia,** inability of the iris to respond to accommodative effort.

accouchée (*ah-koo-shay*) [Fr., à, to; *couche*, a bed]. A woman delivered of a child.

accouchement (*ah-koosh-mon(g)*) [Fr.]. The French term for childbirth. **a. forcé,** rapid and forcible delivery with the hand. It includes dilatation of cervical canal, version or forceps, and immediate extraction of the child.

accoucheur (*ah-koo-shur*) [Fr.]. A professional male assistant at childbirth.

accoucheuse (*ah-koo-shuz*) [Fr.]. A professional female assistant at childbirth; the term should not be applied to the ordinary midwife.

accrementitial (*ak-re-men-tish'-al*) [*accrescere*, to increase]. In biology, of or pertaining to the process of accrementition.

accrementition (*ak-re-men-tish'-un*) [*ad*, to; *crescere*, to grow]. A growth in which increase takes place by interstitial development from blastema, and also by reproduction of cells by fission. The production or development of a new individual by the separation of a part of the parent; gemmation.

accrete (*ak-rēt'*). In biology, grown together.

accretion (*ak-re'-shun*) [*ad*, to; *crescere*, to increase]. 1. A term denoting the manner by which crystalline and certain organic forms increase their material substance. 2. The adherence of parts normally separate. 3. An accumulation of foreign matter in any cavity. **a. lines,** lines showing the successive layers in the enamel of the teeth, seen only in microscopic section.

accubation (*ak-u-ba'-shun*) [*accubare*, to recline]. 1. A reclining posture; the taking to one's bed. 2. The act of lying in bed with another person.

accumulation (*ak-u-mu-la'-shun*) [*accumulare*, to heap up]. An amassing or collecting together. **a., fecal,** an excessive aggregation of feces in the large intestine; coprostasis.

accumulator (*ak-u'-mu-la-tor*) [*accumulare*, to heap up]. An apparatus to store electricity.

-aceæ. A suffix used in botany to designate a family, the name chosen being one of the principal genera. Ex., *Rosa*, *Rosaceæ*, *Ranunculus*, *Ranunculaceæ*.

acedia (*ah-se'-de-ah*) [ἀκηδία]. A certain form of melancholia.

acelia, acœlia (*ah-se'-le-ah*) [ἀ, priv.; κοιλια, a cavity]. The absence of a natural cavity. Syn., *acelosis*.

acelious (*ah-se'-le-us*) [ἀ, priv.; κοιλια, the belly]. Without a belly; applied to those extremely emaciated.

acelosis, acœlosis (*ah-sel-o'-sis*). See *acelia*.

acelous (*ah-se'-lus*) [ἀ, priv.; κοῖλος, hollow]. Without intestines; anenterous

A. C. E. mixture. An anesthetic mixture composed of alcohol, 1 part; chloroform, 2 parts; ether, 3 parts. See *anesthetic*.

acenaphthene (*as-en-af'-thēn*) [*aceticus*; *naphthalene*], $C_{12}H_{10}$. A hydrocarbon that occurs in coal tar, and separates on cooling from the fraction boiling at 260–280° C. It crystallizes from hot alcohol in long needles melting at 95° C. and boiling at 277° C.

acenesthesia (*as-e-nes-the'-ze-ah*) [ἀ, priv.; κοινός, common, αἴσθησις, feeling]. Absence of the sensation of existence. See *cenesthesis*.

acentric (*ah-sen'-trik*) [ἀ, priv.; κέντρον, center]. Not eccentric; not originating in, or pertaining to, a nerve-center; peripheric.

aceognosia (*as-e-og-no'-se-ah*) [ἄκος, a remedy; γνῶσις, knowledge]. A knowledge of remedies.

aceology (*as-e-ol'-o-je*) [ἄκος a remedy; λόγος, a discourse]. Therapeutics; medical and surgical treatment of disease; acology.

acephalemia, acephalæmia or **acephalhemia, acephalhæmia** (*ah-sef-al-e'-me-ah*) [ἀ, priv.; κεφαλή, head; αἷμα, blood]. Deficiency of blood in the head

acephalia (*ah-sef-a'-le-ah*) [ἀ, priv.; κεφαλή. head]. Absence of the head.

acephalism (*ah-sef'-al-izm*). See *acephalia*.

acephalobrachia (*ah-sef-al-o-bra'-ke-ah*) [ἀ priv.; κεφαλή, head; βραχίων, arm]. Absence of the head and arms.

acephalobrachius (*ah-sef-al-o-bra'-ke-us*). A monster with neither head nor arms.

acephalocardia (*ah-sef-al-o-kar'-de-ah*) [ἀ, priv.; κεφαλή, head; καρδία, heart]. Absence of the head and heart.

acephalocardius (*ah-sef-al-o-kar'-de- s*). A monster with neither head nor heart.

acephalocheiria, acephalochiria (*ah-sef-al-o-ki'-re-ah*) [ἀ, priv.; κεφαλή, head; χείρ, hand]. Absence of the head and hands.

acephalocheirus, acephalochirus (*ah-sef-al-o-ki' rus*) [see *acephalocheiria*]. A monster with neither head nor hands.

acephalocyst, acephalocystis (*ah-sef'-al-o-sist, ah-sef-al-o-sist'-is*) [ἀ, priv.; κεφαλή, head; κύστις, a bladder]. The bladderworm. A headless, sterile hydatid, found in the liver and other organs. **acephalocystis plana,** Laennec's name for certain concretions found in the sheaths of

tendons and in muscles. **acephalocystis racemosa**, the hydatid mole of the uterus.

acephalogaster (*ah-sef-al-o-gas'-ter*) [ἀκέφαλος, headless; γαστήρ, belly]. A monster with neither head nor belly.

acephalogasteria (*ah-sef-al-o-gas-te'-re-ah*) [see *acephalogaster*]. Absence of the head and belly.

acephalophorous (*ah-sef-al-of'-or-us*) [ἀ, priv.; κεφαλή, head; φέρειν, to bear]. Destitute of a distinct head.

acephalopodia (*ah-sef-al-o-po'-de-ah*) [ἀ, priv.; κεφαλή, head; πούς, foot]. Absence of the head and feet.

acephalopodius (*ah-sef-al-o-po'-de-us*) [see *acephalopodia*]. A monster with neither head nor feet.

acephalorrhachia, acephalorachia (*ah-sef-al-or-a'-ke-ah*) [ἀ, priv.; κεφαλή, head; ῥάχις, spine]. Absence of the head and vertebral column.

acephalorrhachus (*ah-sef-al-or-a'-kus*) [ἀ, priv.; κεφαλή, head; ῥάχις, spine]. A monster destitute of head and vertebral column.

acephalostomia (*ah-sef-al-o-sto'-me-ah*) [ἀ, priv.; κεφαλή, head; στόμα, mouth]. Absence of the head, with a mouth-like opening on the superior aspect.

acephalostomus (*ah-sef-al-os'-to-mus*) [see *acephalostomia*]. A monster without a head, but with a mouth-like aperture.

acephalothoracia (*ah-sef-al-o-tho-ra'-se-ah*) [ἀ, priv; κεφαλή, head; θώραξ, chest]. Absence of the head and thorax.

acephalothorax (*ah-sef-al-o-tho'-raks*). A monster destitute of head and thorax. Syn., *acephalothorus*.

acephalothorus (*ah-sef-al-o-tho'-rus*). A monster without head or thorax. See *acephalothoracia*.

acephalous (*ah-sef'-al-us*) [ἀκέφαλος, headless]. Headless.

acephalus (*ah-sef'-al-us*) [see *acephalia*]. A species of omphalositic monsters characterized by complete absence of the head and usually of the upper extremities. It is the commonest condition among the omphalosites. **a. dibrachius**, an acephalus with two upper limbs in a more or less rudimentary state. **a. dipus**, an acephalus with two more or less developed lower extremities. **a. monobrachius**, one with one upper extremity, a cervical vertebra, and one or two more or less developed lower extremities. **a. monopus**, one with only one lower extremity, more or less developed. See *acephalopodius*. **a. sympus**, one in which the trunk ends in a long conic point at the end of which are attached one or two feet.

acerate (*as'-er-āt*) [*acer*, sharp]. 1. A salt of aceric acid. 2. Sharp-pointed, acicular.

aceratosis (*ah-ser-at-o'-sis*) [ἀ, priv.; κέρας, horn]. Deficiency or imperfection of corneous tissue. Akeratosis.

acerbity (*a-serb'-it-e*) [*acerbitas*, sharpness, sourness]. Acidity combined with astringency.

acercus (*ah-ser'-kus*) [ἀκερκος, without a tail]. A monstrosity without the coccygeal vertebræ.

acerdol (*as'-er-dol*), MnO_2K_2KOH. An oxidation-product of potassium and manganese. It is used as an oxidizer and disinfectant.

aceric (*as-er'-ik*) [*acer*, ā maple tree]. Pertaining to, or found in the maple; as aceric acid.

aceride (*as'-er-id*) [ἀ, priv.; *cera*, wax]. An ointment or plaster containing no wax.

acerotous (*ah-ser'-o-tus*) [ἀ, priv.; κηρός, wax]. Waxless; said of ointments and plasters.

acervuline (*as-er'-vu-lin*) [*acervulus*, a heap]. Agminated, or aggregated; as certain mucous glands.

acervuloma (*ah-ser-vu-lo'-mah*) [*acervulus*, little heap; pl. *acervulomata*]. See *psammoma*.

acervulus, a. cerebri (*as-er'-vu-lus ser'-e-bri*). Concretionary matter near the base of the pineal gland, consisting of alkaline phosphates and carbonates, with amyloid matter.

acescence (*as-es'-ens*) [*acescere*, to grow sour]. 1. The process of becoming sour; the quality of being somewhat sour. 2. A disease of wines, whereby they become sour, owing to the agency of *Mycoderma aceti*.

acescent (*as-es'-ent*). Acid or tart; acidulous.

acesodyne, acesodynous (*ah-ses'-o-dīn, ah-ses-od'-in-us*) [ἀκεσώδυνος]. Allaying pain; anodyne.

acestoma (*as-es-to'-mah*) [ἀκεστός, curable]. The mass of young granulation tissue which later forms the cicatrix.

aceta (*as-e'-tah*). Plural of *acetum*, *q. v.*

acetabular (*as-et-ab'-u-lar*) [*acetabulum*, a vinegar cup]. Pertaining to the acetabulum.

acetabulum (*as-et-ab'-u-lum*) [see *acetabular*]. A cup-shaped depression on the outer aspect of the innominate bone for the reception of the head of the femur. **a. cotyle**, articular cavity of the innominate bone. **a. humeri**, glenoid cavity.

acetabulectomy (*as-et-ab-u-lek'-tom-e*) [*acetabular*; ἐκ, out, τέμνειν, to cut]. Excision of the hip-joint The acetabular part being dealt with as radically as the femoral

acetal (*as'-et-al*) [*acetum*, vinegar]. 1. $C_6H_{14}O_2$. Ethidene diethylate, a colorless liquid with an ethereal odor, produced by the imperfect oxidation of alcohol under the influence of platinum black. It is sparingly soluble in water; boils at 104° C.; sp. gr. at 20° is 0.8304. Its action is that of a soporific. Dose 1 dr. (4 Gm.). 2. A mixture said to consist of acetic ether and oils of cloves, bergamot, lavender, lemon, menthol, orange, rosemary, thyme, and absolute alcohol. **a., dimethyl**, see *methylal*

acetaldehyde (*as-et-al'-de-hīd*). The normal aldehyde; ethaldehyde. See *aldehyde*.

acetals (*as'-et-alz*) [*acetum*, vinegar]. Products of the combination of aldehydes with alcohols at 100° C.

acetamide, acetamid (*as-et-am'-id*), $CH_3.CO.NH_2$. A white, crystalline solid produced by distilling ammonium acetate, or by heating ethyl acetate with strong aqueous ammonia. It combines with both acids and metals to form unstable compounds.

acetamidoantipyrine (*as-et-am-id-o-an-tip-i'-rin*). A crystalline compound used as antipyrine.

acetamidophenol (*as-et-am-id-o-fen'-ol*). $C_6H_4OH.NH.C_2H_3O$. An oxidation-product of acetanilide; *hydroxyantifebrin*.

acetaminol (*as-et-am'-in-ol*), $C_{15}H_{13}NO_4$. A reaction-product of paranitrobenzoyl chloride with eugenol-sodium, followed by reduction and acetylization. It occurs as white scales or crystalline powder, soluble in alcohol and insoluble in water, and melting at 160° C. It is used in pulmonary tuberculosis. Syn., *para-acetamido-benzoyleugenol; acetamido-benzoyl*.

acetanilid (*as-et-an'-il-id*), C_8H_9NO. Phenylacetamide. A white, crystalline solid, produced by boiling anilin and glacial acetic acid together for several hours, the crystalline mass being then distilled. It melts at 114° and boils at 259°. It is soluble in hot water, alcohol, and ether. Under the name *antifebrin* it is pre-

scribed as an antipyretic. Dose 2–10 gr. (0.13–0.65 Gm.), not exceeding 30 gr. (2 Gm.) in the 24 hours; of the *compound powder* (*pulvis acetanilidi compositus*, U. S. P.) 7½ gr. (0.5 Gm.). **a., ammoniated,** a mixture of acetanilide, 25 parts; ammonium carbonate, 10 parts; sodium bicarbonate, 5 parts; sugar of milk, 60 parts. It is recommended as causing less depression than acetanilide alone. **a., monobromated,** see *antisepsin*.

acetannin (*as-et-an'-in*). Same as acetyl tannin.

acetas (*as'-et-as*). Acetate or salt of acetic acid.

acetate (*as'-et-āt*) [see *acetic*]. Any salt of acetic acid. **a. of lead,** plumbi acetas; see *plumbum*.

acetated (*as'-et-a-ted*). Treated with or containing an acetate, acetic acid, or vinegar.

acetbromanilid (*as-et-brō-man'-il-id*). Same as antisepsin, *q. v.*

acetic (*as-e'-tik*) [*acetum*, vinegar]. Pertaining to *acetum* or vinegar; sour. See *acid, acetic*. **a. acid amide,** see *acetamide*. **a. acid esters,** see *methyl acetate* and *ether, acetic*. **a. acid salts.** 1. Readily soluble crystalline salts formed from the bases. 2. Basic salts formed from iron, aluminum, lead, and copper; sparingly soluble in water. 3. Alkali salts, which have the property of combining with a molecule of acetic acid to produce acid salts. **a. aldehyde,** see under *aldehyde*. **a. anhydride,** $C_4H_6O_3$, a colorless, mobile liquid, highly refractive, and with an odor of acetic acid. Sp. gr. 1.080 at 15° C.; boils at 136°–138° C. Syn., *acetyl oxide; acetic oxide;* socalled *anhydrous acetic acid*. **a. ether,** see under *ether*. **a. fermentation,** the development of acetic acid by the activity of the *Mycoderma aceti*. **a. fungus,** any one of several minute fungoid organisms capable of inciting and maintaining acetic fermentation, as first proved by Pasteur in 1864.

acetification (*as-et-e-fi-ka'-shun*) [*acetum*, vinegar; *facere*, to make]. The production of vinegar by acetic fermentation.

acetimeter, acetimetric, acetimetry. See *acetometer; acetometry; acetometric*.

acetin (*as'-et-in*) [*acetum*, vinegar], $C_3H_5(C_2H_3O_2)_3$. A chemical compound formed by the union of glycerol and acetic acid.

acetoacetate (*as-et-o-as'-et-āt*). A salt of acetoacetic acid.

acetoacetic acid (*as-et-o-as-e'-tik*). A monobasic acid formed from acetic acid by replacing one of the hydrogen atoms of the acid radical with the acetic-acid radical, acetyl; also called diacetic acid. See *Gerhardt*. **a. esters,** $CH_3.CO.CH_2.CO_2R$, liquids possessing an ethereal odor, produced by the action of metallic sodium upon acetic esters; they dissolve with difficulty in water and can be distilled without decomposition.

acetoarsenite (*as-et-o-ar'-sen-īt*). A salt composed of an acetate and an arsenite of the same base.

acetobromide (*as-et-o-bro'-mid*). An acetic-acid salt in which part of the hydrogen of the acid radicle has been replaced by bromine.

acetochloride (*as-et-o-klor'-id*). A salt composed of an acetate and a chloride of the same base.

acetoglycocoll (*as-et-o-glī'-ko-kol*),

$$CH_3{<}\begin{matrix}NH.C_2H_3O.\\CO_2H.\end{matrix}$$

A substance resembling a monobasic acid, obtained from the action of acetyl chloride on glycocoll silver and of acetamide on monochloracetic acid; it is soluble in alcohol; melts at 206° C Syn., *acetamidoacetic acid; aceturic acid*.

acetoiodide (*as-et-o-ī'-o-did*). A double salt containing the acetate and iodide of the same radical.

acetol (*as'-et-ol*). 1. See *acetyl carbinol*. 2. A remedy for toothache, said to consist of acetic acid, 8.46%; alum, 3.07%; water, 88.5%; with a small proportion of essential oils of sage, clove, and peppermint.

acetoluid (*as-e-tol'-u-id*), $C_7H_7NH.C_2H_3O$. Acetoorthotoluid. An antipyretic resembling acetanilid. The dose is not accurately determined.

acetomel (*as-et'-o-mel*). See *oxymel*.

acetometer (*as-et-om'-et-er*) [*acetum*, vinegar; *μέτρον*, a measure]. An instrument used in the quantitative determination of acetic acid.

acetometric (*as-et-o-met'-rick*). Pertaining to acetometry.

acetometry (*as-et-om'-et-re*) [*acetum*, vinegar; *μέτρον*, measure]. The quantitative estimation of the amount of acetic acid in vinegar. Usually made by an *acetometer*.

acetomorphine (*as-e-to-mor'-fēn*). Heroine, *q. v.*

aceton. 1. See *acetone*. 2. A proprietary remedy for headache and influenza.

acetonasthma (*as-et-on-as'-mah*) [*acetone; asthma*]. Attacks of dyspnea similar to uremic asthma, accompanied, with restlessness, headache, nausea, vomiting, transient amaurosis, and acetonuria.

acetone, aceton (*as'-et-ōn*) [*acetum*, vinegar], $CH_3.CO\,CH_3$. Dimethylketone. A colorless, mobile liquid, of peculiar odor and burning taste, present in crude wood-spirit; it occurs in small quantities in the blood and in normal urine, and in considerable quantities at times in the urine of diabetic patients. It is miscible with ether, alcohol, and water. It is used as an anesthetic and anthelmintic. Dose 15–20 min (0.9–1.2 Cc.). Syn., *mesitic alcohol; mesityl alcohol; methyl acetyl; acetyl methyl*. See *Chautard, Gunning, Legal, Lieben, Malerba, le Nobel, Penzoldt, Reynolds*. **a. chloroform,** $HO.C(CH_3)_2.CCl_3$, a compound formed by the addition of potash to equal weights of acetone and chloroform. It occurs as white crystals, sparingly soluble in water, more freely in alcohol and glycerol. Its 1% aqueous solution is called *aneson*. It is used as a hypnotic and anesthetic. Dose 15–20 gr. (1.0–1.3 Gm.); for sea, air, or train sickness, dose 5 gr. capsules. A sat. sol. (3 grs. to 1 pint water) per atomizer, relieves hay fever for several hours Syn., *chloretone; trichlortertiary butyl alcohol; trichlorpseudobutyl alcohol*. **a. diethylsulphone,** see *sulphonal*. **a., monochlorated,** C_3H_5ClO, a colorless liquid having a pungent odor, obtained by chlorinating acetone. **a. phenylhydrazone,** $(CH_3)_2C:N_2HC_6H_5$, one of the nitrogen derivatives of ketone. **a. resorcinol,** $C_{15}H_{16}O_4 + H_2O$, a combination of resorcinol with acetone and fuming hydrochloric acid added hot. It occurs in small anhydrous prisms, soluble in alkaline solutions, insoluble in water, alcohol, ether, and chloroform. It melts at 212°–213° C. It is used in the same manner as resorcinol.

acetonemia, acetonæmia (*as-et-on-e'-me-ah*) [*acetone; αἷμα*, blood]. Acetone in the blood.

acetonemic (*as-et-on-e'-mik*) [*acetone; blood*]. Pertaining to acetonemia.

acetones (*as'-et-ōnz*). A class of compounds that may be regarded as consisting of two alcoholic radicals united by the group CO, or as aldehydes in which hydrogen of the group COH has been replaced by an alcoholic radical.

acetonin (*as-et'-on-in*). 1. A body produced by the action of ammonia on acetone. 2. Dihydrotriacetonamine.

acetonitrate (*as-et-o-ni'-trāt*). A double salt, the acetate and nitrate of the same radical.

acetonitril (*as-et-on-i'-tril*), CH_3CN or C_2H_3N. Methyl cyanide. It is a colorless liquid, having an agreeable odor, and is prepared by distilling acetamide with P_2O_5. It may also be produced from prussic acid and diazomethane. It melts at −41° C., boils at 81.6° C., and has a sp. gr. of 0.789 at 15° C. Syn., *carbamine*.

acetonoresorcinol. See *acetone resorcinol*.

acetonum (*as-e-to'-num*). Same as acetone, *q. v.*

acetonuria (*as-et-o-nu'-re-ah*) [*acetone*; οὖρον, urine]. The presence of acetone in the urine.

acetonyl (*as-et'-on-il*), $CH_3—CO—CH_2$. A univalent radical obtained from acetone by taking away one atom of hydrogen.

acetophenetidin (*as-et-o-fen-et'-id-ĕn*). See *phenacetin*.

acetophenone (*as-et-o-fe'-nōn*), $C_6H_5(CO)(CH_3)$. Phenyl methyl ketone; also called hypnone; a hypnotic and antiseptic. It results from the action of zinc methyl upon benzoyl chloride and crystallizes in large plates, melts at 20.5° and boils at 202°. It is without satisfactory action. Dose 4–15 min. (0.26–1.0 Cc.).

acetophenoneorthooxyquinolin (*as-et-o-fē-non-or-tho-oks-e-kwin'-ol-in*), $C_2H_6NO.CH_2.CO.C_6H_5$. A base obtained by interaction between a halogen compound of acetophenone and orthoquinolin in the presence of solvents and an alkali. It forms well-defined salts, is soluble in volatile solvents, and melts at 130° C. It is said to have hypnotic and antineuralgic properties; is odorless, tasteless, and nonirritating.

acetophenonephenetidine (*as-et-o-fē-nōn-fen-et'-id-in*). A condensation-product of acetophenone and paraphenetidine. **a. citrate,**

$$C_6H_4<\begin{matrix}OC_2H_5\\ N=C(CH_3)(C_6H_5).H_3C,\end{matrix}$$

lemon-yellow needles, soluble in ether and hot alcohol, insoluble in water. It melts at 88° C.; is antipyretic and antineuralgic. Dose 8–15 gr. (0.5–1.0 Gm.). Syn., *malarin*.

acetopyrine, acetopyrin (*as-et-o-pi'-rēn, -rin*). A mixture of antipyrine and acetyl salicylic acid, occurring as a whitish, crystalline powder, soluble with difficulty in cold water, ether, and petroleum ether, readily soluble in warm water, alcohol, chloroform, and warm toluol. It is antipyretic. Dose 7 gr. (0.4 Gm.) 6 times daily. Syn., *antipyrine acetylsalicylate*. **a. acetosalicylate,** antipyretic, analgesic, sedative; employed in influenza, bronchitis, rheumatic headache, sciatica, hemicrania, and acute articular rheumatism.

acetorthotoluid (*as-et-or-tho-tol'-ū-id*). An isomere of acetparatoluid, *q. v.*

acetosal (*as-et'-o-sal*). Same as acetyl salicylic acid, *q. v.*

acetosoluble (*as-et-o-sol'-ū-bl*). Soluble in acetic acid.

acetous (*as-e'-tus*) [*acetum*, vinegar]. Resembling vinegar; pertaining to or charged with vinegar or acetic acid.

acetozone (*as-et'-o-zōn*). See *benzoylacetylperoxide*.

acetparaphenetidine (*as-et-par-a-fe-net'-id-ĕn*). Same as *phenacetine*.

acetparatoluid (*as-et-par-ah-tol'-u-id*). $C_9HN_{11}O$. Antipyretic, colorless crystals, slightly soluble in water, moderately soluble in alcohol; it melts at 149° C. Dose 15–30 gr. (1–2 Gm.). Syn., *acetparamidotoluol; paratolylacetamide*.

acetphenetidin, acetphenetidinum (*as-et-fe-net'-id-in, as-et-fe-net-id-i'-num*) [*acetum; phenol*]. A compound derived from phenol, having antipyretic and antineuralgic properties. It is crystalline, tasteless, and almost insoluble in water. Dose 4–30 gr. (0.26–2.0 Gm.). Syn., *phenacetin*.

acetract (*as'-e-trakt*). A non-alcoholic preparation of a drug made with a menstruum containing acetic acid.

acettheocin-sodium (*as-et-the-o-sin-so'-de-um*). Soluble theocin.

acetum (*as-e'-tum*) [L.; gen., *aceti*; pl., *aceta*]. Vinegar. An impure, dilute acetic acid produced by acetous fermentation of wine, cider, or other fruit-juice. In pharmacy, a solution of the active principles of certain drugs in dilute acetic acid. See *vinegar*. **a. acerrimum,** concentrated acetic acid. **a. aromaticum** (N. F.) ["aromatic vinegar"], a mixture of alcohol, water, and acetic acid, aromatized with the oils of rosemary, lavender, juniper, peppermint, cassia, lemon, and cloves. **a. britannicum,** an aromatic vinegar consisting of glacial acetic acid, 600; camphor, 60; oil of cloves, 2; oil of cinnamon, 1; oil of lavender, 0.5. **a. Saturni,** solution of lead subacetate.

acetyl (*as'-et-il*) [*acetum*, vinegar], C_2H_3O. A univalent radical supposed to exist in acetic acid and its derivatives. Aldehyde may be regarded as the hydride, and acetic acid as the hydrate, of acetyl. Syn., *acetosyl; acetoyl; acetoxyl; othyl*. **a.-anhydride,** see *acetic anhydride*. **a.-atoxyl,** an atoxyl substitution product, better known as *arsacetin, q. v.* **a. benzene,** see *acetophenone*. **a. bioxydamide,** see *acetamide*. **a. bromide,** C_2H_3BrO, a reaction-product of acetic acid with phosphorus pentabromide; it is a fuming liquid which turns yellow in the air; it boils at 81° C. It is used as a reagent. **a. carbinol,** $CH_3.CO.CH_2OH$, a saturated ketol produced by the action of water and barium carbonate upon chloracetone, also by fusing cane-sugar and grape-sugar with caustic potash. It is a colorless oil with a feeble, peculiar odor; boils at 145°–150° C. Syn., *pyroracemic alcohol; acetone alcohol; oxyacetone; methyl ketol; acetol*. **a. chloride,** C_2H_3ClO, a reaction-product of acetic acid with phosphorus trichloride; it is a colorless, highly refracting, fuming liquid; sp. gr. 1.1305 at 0° C.; boils at 55° C. It is used as a reagent. **a. ethylphenylhydrazin,** $C_{14}H_{22}N_4O_2$, colorless needles obtained by heating a solution of ethylenephenylhydrazin with an excess of acetic anhydrid. It is recommended as an antipyretic. Syn., *phenylhydrazinacetylethyl*. **a. formyl,** see *aldehyde, pyroracemic*. **a. hydrate,** acetic acid. **a. hydride,** same as *acetic aldehyde*. See under *aldehyde*. **a. iodide,** C_2H_3OI, a reaction-product of acetic acid with iodine and phosphorus; it is a brown, fuming liquid; sp. gr. 1.98 at 17° C.; boils at 105°–108° C. **a. isocyanide,** $(C_2H_3O) - N \equiv C$, a liquid in its simple form, but capable of polymerization as a crystalline solid. It boils at 93° C. Syn., *acetic isocyanide; cyanacetyl*. **a. isoeugenol,** the direct antecedent of vanillin in the manufacture of the synthetic product, and is used as a substitute for vanillin. **a. leukomethylene-blue,** a colorless form of methylene-blue for internal use. **a. methyl,** see *acetone*. **a. oxide,** same as *acetic anhydride*. **a.-paraamidophenylsalicylate,** see *salophen*. **a. peroxide,** $(C_2H_3O)_2O_2$, a thick

liquid, insoluble in water, but readily dissolved by ether and alcohol. It is a powerful oxidizing agent. It is decomposed in sunlight and explodes violently when heated. **a. phenylhydrazid, a. phenyldrazin,** same as *hydracetin* and *pyrodin*. **a. salicylic acid,** same as aspirin, *q. v.* **a. tannin,** a grayish-yellow, slightly hygroscopic, odorless, tasteless powder, soluble in alcohol, dilute sodium phosphate, sodium carbonate, or sodium borate; slightly soluble in hot water and ether; insoluble in cold water; melting at 190° C. It is an astringent and is used internally in chronic diarrhea. Externally, it is used in chronic pharyngitis. Dose 3–7½ gr. (0.2–0.5 Gm.). Application, 3 % solution in 5 % sodium phosphate. Maximum dose 60 gr. (4 Gm.) daily. Syn., *acetannin, tannigen*. **a. thymol,** $C_{12}H_{16}O_2$, a colorless antiseptic liquid with a pungent taste having a specific gravity of 1.009 at 0° C. and boiling at 244.4° C. Syn., *thymol acetate*. **a. tribromsalol,** fine, white acicular crystals which melt at 108 5°; insoluble in water; soluble in alcohol. Syn., *cordyl*. **a. urethane,** see *urethane*.

acetylene (*as-et'-il-ēn*) [*acetum*, vinegar]. C_2H_2. A colorless gas, with a characteristic, unpleasant odor, burning with a luminous, smoky flame. It is formed by the imperfect combustion of illuminating gas and other hydrocarbons.

acetylization (*as-et-il-i-za'-shun*). Act of combining with or producing compounds of acetic acid or acetyl.

acetysal (*as-et'-is-al*). Same as acetosalicylic acid, *q. v.*

achalasia of the cardia (*ak-al-ā-ze-ah*) [ἀ, priv.; χαλάειν, to relax]. Cardiospasm (2), *q. v.*

Achalmé's bacillus (*ak-al'-ma*). An anaerobic bacillus, probably identical with Welch's *Bacillus aerogenes capsulatus;* it has been regarded as the cause of acute articular rheumatism.

ache (*āk*) [AS., *acan*, to ache]. Any continuous or throbbing pain.

acheilia (*ah-ki'-le-ah*) [ἀ' priv.; χείλος, a lip]. The congenital absence of lips.

acheilous (*ah-ki'-lus*) [see *acheilia*]. Lipless.

acheilus (*ah-ki'-lus*) [ἀ. priv.; χείλος, a lip]. A person affected with acheilia.

acheir (*ah'-kir*) [ἀ, priv.; χείρ, the hand]. 1. Acheirous. 2. Said of fishes lacking pectoral fins.

acheiria (*ah-ki'-re-ah*) [ἀ, priv.; χείρ, a hand]. The congenital absence of hands.

acheirous (*ah-ki'-rus*) [see *acheiria*]. Affected with acheiria.

acheirus (*ah-ki'-rus*). An acheirous person, or fetus; one who was born without hands.

achene (*a-kēn'*). Same as *achenium*.

achenium (*ah-ke'-ne-um*) [ἀ, priv.; χαίνειν, gape; pl., *achenia*]. In biology, a small, dry, one-seeded, indehiscent fruit.

achibromine (*ak-e-bro'-mēn*). Trade name of monobromovaleryl-glycolurea; recommended as a substitute for the bromides, and said to be also sedative and hypnotic.

achiiodine (*ak-e-i'-o-dēn*). Trade name of monoiodovaleryl-glycolurea, recommended as a substitute for the alkaline iodides, and said to be also sedative.

achilia (*ah-ki'-le-ah*). See *acheilia*.

Achillea (*ak-il-e'-ah*) [*Achilles*, its reputed discoverer]. Milfoil; yarrow. The herb *A. millefolium*. Its properties are due to a bitter, aromatic, astringent, tonic extractive, *achillein*, and a volatile oil. It has long been used as a vulnerary, and has been highly recommended for intermittent and low exanthematous fevers. Dose 1 oz.–1 pint infusion *ad lib.;* of the *extractive*, 1–3 dr. (4–12 Gm.); of the *volatile oil*, 5–15 min. (0.3–1.0 Cc.). To the genus *Achillea* belong various other unofficial medicinal plants, as *A. moschata*, of the Alps, used in preparing cordials and a diaphoretic medicine, and *A. ptarmica*, or sneezewort, a strong sialagogue.

achillein, achilleinum (*ak-il-e'-in, -i'-num*), $C_{20}H_{28}N_2O_{16}$. A glucoside obtained from *Achillea millefolium* and *A. moschata*. Occurs as a brownish-red, amorphous mass, of a strongly bitter taste, soluble in water, less soluble in alcohol, insoluble in ether. It is stated that divided doses up to 30–75 gr. (2–5 Gm.) cause marked irregularity of the pulse.

Achilles tendon (*ak-il'-ēz ten'-don*). The tendon of the gastrocnemius and soleus muscles, inserted into the back of the heel. **A t. reflex,** contraction of the calf of the leg on tapping the tendo Achillis

achillobursitis (*ak-il-o-bur-si'-tis*) [*Achilles tendon; bursitis*]. Inflammation of the bursæ lying approximate to the Achilles tendon.

achillodynia (*ak-il-o-din'-e-ah*) [*Achilles tendon;* ὀδύνη, pain]. Pain referred to the insertion of the Achilles tendon.

achillorrhaphy (*ak-il-or'-af-e*) [*Achilles tendon;* ῥαφή, suture]. Suture of the Achilles tendon; practised by C. Bayer instead of achillotomy for the sake of lengthening the tendon. This is exposed, the length divided in half, the upper end of one side, the lower end of the other, cut across, and both the cut surfaces united by a suture.

achillotenotomy (*ak-il-o-ten-ot'-o-me*). Same as *achillotomy*.

achillotomy (*ak-il-ot'-o-me*) [*Achilles tendon;* τομή, a cutting]. The subcutaneous division of the Achilles tendon.

achilous (*ah-ki'-lus*). See *acheilous*.

achiria (*ah-ki'-re-ah*). See *acheiria*.

achirous (*ah-ki'-rus*). See *acheirous*.

achirus (*ah-ki'-rus*). See *acheirus*.

Achlea (*ak'-le-ah*). A genus of fungi found on animals.

achlorhydria (*ah-klor-hi'-dre-ah*) [ἀ, priv.; *chlorhydric (acid)*]. Absence of free hydrochloric acid from gastric juice.

achlorides (*ah-klor'-idz*) [ἀ, priv.; *chlorides*]. Salts which are not chlorides; specifically, such salts occurring in the urine.

achloropsia (*ah-klor-op'se-ah*) [ἀ, priv.; χλωρός, green; ὄψις, vision]. Green-blindness.

acholia (*ah-ko'-le-ah*) [ἀ, priv.; χολή, bile]. 1. Absence of biliary secretion. 2. Any condition obstructing the escape of the bile into the small intestine. 3. Asiatic cholera. 4. A mild temperament. **a., pigmentary,** that in which there are deficiency of bile and lack of color in the feces, but no jaundice.

acholic (*ah-kol'-ik*). 1. Affected with acholia. 2. Able to cure jaundice. 3. Due to acholia.

acholous (*ah'-ko-lus*). Pertaining to or affected with acholia.

acholuria (*ah-kol-u'-re-ah*) [ἀ, priv.; χολή, bile; οὖρον, urine]. The absence of bile-pigment in the urine.

achondroplasia (*ah-kon-dro-pla'-ze-ah*) [ἀ, priv.; χόνδρος, cartilage; πλάσσειν, to form]. Lack of development in a cartilaginous structure; the absorption of cartilage during its transformation

into bone. 2. Parrot's term for a form of fetal rickets in which the limbs are short, the curves of the bones exaggerated, and there is an absence of the proliferating zone of cartilage at the junction of the epiphyses. The children are generally still-born. This condition is very much like a fetal cretinism. Also known as *chondrodystrophia fetalis*.

achondroplastic (*ah-kon-dro-plas'-tik*). Pertaining to achondroplasia.

achondroplasty (*ah-kon-dro-plas'-te*). Same as achondroplasia, *q. v.*

achor (*a'-kor*) [ἀχωρ, chaff, scurf, or dandruff: pl., *achores* (*a-kor'-ēz*)]. Crusta lactea, a small pustule, followed by a scab, upon the heads of infants; milk-crust. **a. barbatus,** barber's itch.

achordal (*ah-kor'-dal*) [ἀ, priv.; χόρδη, cord]. Not derived from the notochord.

achoresis (*ah-kor-e'-sis*) [ἀ, priv.; χωρεῖν, to make room; pl., *achoreses*]. Grossi's term for the diminished capacity of a hollow organ, as of the bladder. Syn., *achoria*. Cf. *stenochoria*.

Achorion (*a-ko'-re-on*) [dim. of ἄχωρ, chaff]. A genus of fungous organisms, including several species (possibly modified forms of *Penicillium glaucum*) found in the skin, especially the hair-follicles. **A. keratophagus,** the form causing *onychomycosis*. **A. lebertii,** the parasite of *Tinea tonsurans*. **A. schoenleinii,** the species occurring in ringworm, or *Tinea favosa*.

Achras (*ak'-ras*) [ἀχράς, the wild pear]. A genus of arboraceous plants of the order *Sapotaceæ*. **A. sapota** [*tzochtzapotl*, Mex.], the sapodilla plum; a species indigenous to South America. The fruit is edible, sweet, cloying; said to be beneficial in strangury. The seeds are laxative and diuretic; they are exhibited in emulsion in cases of gravel and renal colic. The bitter astringent bark (*cortex jamaicensis*) has been used as a substitute for cinchona bark. The bark and seeds yield the glucoside *sapotin*. The sap yields chicle-gum.

achreocythemia (*ah-kre-o-si-the'-me-ah*) [ἄχροος, colorless; κύτος, cell; αἷμα, blood]. Lack of coloring matter in the blood.

achroa, achroia (*ah-kro'-ah, ah-kroi'-ah*). Same as *achroma, q. v.*

achroacyte (*ah-kro'-as-īt*) [ἄχροος, colorless; κύτος, cell]. A colorless cell, or lymphocyte.

achroacytosis (*ah-kro-ah-si-to'-sis*) [ἄχροος, colorless; κύτος, cell]. Abnormal development of lymph-cells.

achroiocythemia (*ah-kroi-o-si-the'-me-ah*), or **achrœocythæmia** (*ah-kre-o-si-the'-me-ah*) [ἄχροος, colorless; κύτος, cell; αἷμα, blood]. A deficiency of hemoglobin; also, the diseased state that is associated with such deficiency.

achroiocytosis (*ah-kroi-o-si-to'-sis*). Same as *achroacytosis*.

achroma (*ah-kro'-mah*) [ἀ, priv.; χρῶμα, color]. Absence of color; albinism. Syn., *achromasia; achromatia; achromatosis; achromodermia; vitiligo*. **a., congenital,** see *albinism*. **a. cutis,** see *leukoderma*.

achromacyte (*ah-kro'-mas-it*) [ἀ, priv.; χρῶμα, color; κύτος, cell]. A degenerated, decolorized erythrocyte; a "phantom" or shadow corpuscle. Syn., *Ponfick's shadow corpuscle; Brizzozero's blood-platelet; Hayem's corpuscle* or *hematoblast*.

achromasia (*ah-kro-ma'-ze-ah*) [ἀ, priv.; χρῶμα, color]. (1) An absence of color in the body; cachectic pallor. (2) Loss of stain from a cell, a phenomenon occurring in the *in vitro* method of staining living cell. See *achroma*.

achromate (*ak'-rō-māt*) [ἀ, priv.; χρῶμα, color]. A person who is color blind.

achromatia (*ah-kro-ma'-she-ah*). See *achroma*.

Achromatiaceæ (*ak-ro-mat-e-a'-se-e*) [ἀ, priv.; χρῶμα, color]. Schizomycetes or bacteria which do not form pigment. See *table* p. 835.

achromatic (*ah-kro-mat'-ik*) [ἀ, priv.; χρῶμα color]. 1. Without color. 2. Colorblind. 3. Relating to achromatin. **a. lens,** one the dispersing power of which is exactly neutralized by another lens with the same curvature, but having a different refractive index. **a. spindle,** see *nuclear spindle*.

achromatin (*ah-kro'-mat-in*) [ἀ, priv.; χρῶμα, color]. The groundwork of the nucleus of a cell; it is so called because it is not readily stained by coloring agents.

achromatinic (*ah-kro-mat-sn'-ik*) [*achromatin*]. Pertaining to or containing achromatin.

achromatism (*ah-kro'-mat-izm*) [ἀ, priv.; χρῶμα, color]. 1. Absence of chromatic aberration. 2. Absence of color.

achromatocyte (*ah-kro-mat'-o-sit*) [ἀ, priv.; χρῶμα, color; κύτος, cell]. A decolorized erythrocyte.

achromatolysis (*ah-kro-mat-ol'-is-is*) [ἀ, priv.; χρῶμα, color; λύσις, a solution]. Dissolution of the achromatin of a cell; plasmolysis.

achromatophil (*ah-kro-mat'-o-fil*) [ἀ, priv.; χρῶμα, color; φιλεῖν, to love]. 1. Showing no affinity for stains. 2. A microbe or histologic element which does not stain readily.

achromatophilia (*ah-kro-mat-o-fil'-e-ah*) [*achromatophil*]. The condition of being refractory to staining.

achromatopsia (*ah-kro-mat-op'-se-ah*) [ἀ, priv.; χρῶμα, color; ὄψις, sight]. Color-blindness; daltonism. **a., partial,** a form in which only one pair of colors, which to the normal eye are complementary, appear gray or white. **a., total,** that in which all colors appear white or gray.

achromatosis (*ah-kro-mat-o'-sis*) [ἀ, priv.; χρῶμα, color]. Any disease characterized by deficiency of pigmentation in the integumentary tissues.

achromatous (*ah-kro'-mat-us*) [ἀ, priv.; χρῶμα, color]. Deficient in color.

achromaturia (*ah-kro-ma-tu'-re-ah*) [ἀ, priv.; χρῶμα, color; οὖρον, urine]. A colorless state of the urine.

achromia (*ah-kro'-me-ah*). See *achroma*.

achromic point (*ah-kro'-mik*) [*achroma*]. The point when iodine ceases to give a color when brought in contact with starch undergoing the action of amylolytic enzymes. It occurs when all the erythrodextrin disappears, having been converted into achroö-dextrin and maltose.

achromodermia (*ah-kro-mo-der'-me-ah*) [ἀ, priv.; χρῶμα, color; δέρμα, skin]. An albinotic or colorless state of the skin.

achromophilous (*ah-kro-mof'-il-us*) [ἀ, priv.; χρῶμα, color; φίλειν, to love]. Not readily stained; not chromophilous.

achromotrichia (*ah-kro-mo-trik'-e-ah*) [ἀ, priv.; χρῶμα, color; θρίξ, hair]. Absence of pigment from the hair

achromous (*ah-kro'-mus*) [ἀ, priv.; χρῶμα, color]. Pale, colorless; having no color.

achronizoic (*ah-kron-e-zo'-ik*) [ἀ, priv.; χρονίζειν, to hold out]. A term applied to drugs which are incapable of remaining unchanged for any length of time.

achronychous (*ak-ron'-ik-us*). See *acronychous*.

achroodextrin (*ah-kro-o-deks'-trin*) [ἄχροος, colorless; *dexter*, right]. A reducing dextrin formed by the action of the diastatic ferment of saliva

upon starch. It is a modification of dextrin and may be precipitated by alcohol; it is not converted into sugar by ptyalin, nor colored by iodine.

achylia (*ah-ki'-le-ah*) [ἀ, priv.; χυλός, juice]. Absence of chyle. Syn., *achylosis*. **a. gastrica,** Einhorn's term for a condition of the stomach marked by destruction of the glandular structures with resulting absence of chyme ferment, and even mucus; called *anadenia gastrica* by Ewald. **a. pancreatica,** absence of the pancreatic secretion, resulting in lack of nutrition.

achylosis (*ah-ki-lo'-sis*) [ἀ, priv.; χυλός, juice]. Deficient chylification. See *achylia*.

achylous (*ah-ki'-lus*) [see *achylia*]. Deficient in chyle or in one of the digestive juices.

achymia, achymosis (*ah-ki'-me-ah, ah-ki-mo'-sis*) [ἀ, priv.; χυμός, chyme]. Deficient formation of chyme.

achymous (*ah-ki'-mus*) Deficient in chyme.

acicular (*as-ik'-u-lar*) [*acus*, a needle]. Needle-like.

acid, acidum (*as'-id, -um*) [*acere*, to be sour]. 1. A name applied to any substance having a sour taste. 2. A compound of an electronegative element with one or more atoms of hydrogen which can be replaced by electropositive atoms, when a salt is formed. The majority of acids contain oxygen, and are known as *oxyacids;* those not containing oxygen are termed *hydrogen acids* or *hydracids*. Acids vary in their terminations according to the quantity of oxygen or other electronegative constituent. Those having the maximum of oxygen end in *-ic;* those of a lower degree, in *-ous*. When there are more than two combinations, the prefix *per-* is joined to the highest, and *hypo-* to the lowest. Acids that end in *-ic*, as sulphuric acid, form salts terminating in *-ate;* those ending in *-ous* form salts terminating in *-ite*. **a., abietic, abietinic,** see *abietic*. **a., abric,** $C_{12}H_{24}N_2O$, a crystallizable acid, said to exist in jequirity. **a., absinthic,** an acid obtained from wormwood; said to be identical with succinic acid. **a., acetic,** an acid solution composed of 36 parts of absolute acetic acid, $C_2H_4O_2$, and 64 parts of water. It has strongly acid properties. **a., acetic, dilute,** contains 6% of absolute acid. Dose 1–2 dr. (4–8 Cc.). An impure form, obtained by the destructive distillation of wood, is known as wood-vinegar, or pyroligneous acid. **a., acetic, glacial,** the absolute acid occurring in crystals melting at 22.5° C. It is an escharotic. **a., acetoacetic,** same as *a., diacetic* **a., acetylsalicylic,** same as aspirin. **a., achilleic,** same as *a., aconitic*. **a., aconitic,** $C_6H_6O_6$, occurs in different plants, as *Aconitum napellus*, sugar-cane, and beet-root. It crystallizes in small plates that dissolve readily in alcohol, ether, and water, and melt at 186°–187°. **a., acrylic.** 1. $CH_2 = CH.CO.OH = C_3H_4O_2$. A monobasic acid which may be considered as the oxide of acrolein, a colorless liquid. 2. A general term for organic acids of the group $C_nH_{2n-2}O_2$, comprising two groups, the normal acrylic and the isoacrylic acids. Normal acrylic acids occur in vegetable or animal organisms or are derived from natural products. Isoacrylic acids are formed synthetically by the abstraction of the elements of water from certain acid ethers, which in turn are derived from oxalic acid by substituting 2 molecules of an alcohol radical of the series $C_nH_{2n} + 1$ for an atom of hydrogen. **a., adipic,** $C_6H_{10}O_4$, obtained by oxidizing fats with nitric acid. It crystallizes in shining leaflets or prisms; is soluble in 13 parts of cold water; melts at 148°. It is dibasic. **a., agaric, a., agaricic,** $C_{16}H_{30}O_5 + H_2O$, a resin acid obtained from the fungus *Polyporus officinalis*, growing on larch trees. The acid has been recommended for checking night-sweats. It also checks the other excretions and diminishes thirst. It is mildly cathartic. **a. albumin,** syntonin, *q. v.* **a. s., alcohol,** $CnH_{2n}<^{OH}_{CO_2H}$, monobasic acids having the properties of the monohydric alcohols. They are distinguished as primary, secondary, and tertiary, according as they contain, in addition to the carboxyl group, the group $-CH_2OH$, the radical $=CHOH$, or the group $\equiv C.OH$. Syn., *oxyacids; hydroxy-fatty acids*. Cf. *a., glycollic*. **a. s., aldehyde,** bodies which combine the properties of a carboxylic acid and of an aldehyde. **a., aldepalmitic,** $C_{16}H_{30}O_2$, the chief component of the butter of the cow. **a., alginic,** an organic substance from algæ that combines with bases to form soluble and insoluble compounds. **a., aliphatic,** same as *a., fatty*. **a., allanturic,** $C_7H_{10}N_8O_6$, from allantoin, by the action of dilute nitric acid. **a., alloxanic,** $C_4H_2N_2O_4$, a crystalline acid obtained by treating alloxan with alkalies. **a., alloxypro'teic,** a neutral sulphur compound found in the urine. **a., amidoacetic,** see *glycin*. **a., amidobenzoic,** $C_7H_7NO_3$, occasionally found in the urine. **a., amidosuccinamic,** same as *asparagin*. **a. s., amino,** a large group of nitrogen-holding substances derived from the decomposition of proteins. **a., aminoacetic,** same as *glycocoll, q. v.* **a., anacardic,** $C_{22}H_{32}O_3$, a tetratomic acid obtained by Städler from the cashew-nut. It is used as an anthelmintic in the form of ammonium anacardate. **a., angelic,** $C_5H_8O_2$, a crystalline monobasic acid. It exists free along with valeric and acetic acids in the roots of *Angelica archangelica*, and as butyl and amyl esters in Roman oil of cumin. It crystallizes in shining prisms, melts at 45°, and boils at 185°. It has a peculiar odor and taste. **a., anisic,** $C_8H_8O_3$, obtained by oxidizing anisol and anethol with HNO_3, and from aniseed by the action of oxidizing substances. It is antiseptic and antipyretic, and is used in the treatment of wounds and acute articular rheumatism. Dose of the sodium salt 15 gr. (1 Gm.). Syn., *methylparaoxybenzoic acid*. **a., anisuric,** $C_{10}H_{11}NO_2$, an acid formed by the action of anisyl chloride on the silver compound of glycocoll; it also occurs in the urine after the ingestion of anise. **a., anticyclic,** a white fragrant powder with pleasant, acid taste, readily soluble in water, alcohol, and glycerol; it is used as an antipyretic. It is said to be a mixture of antipyrin and salicylic acid. Dose $\frac{1}{100}$ gr. (0.0006 Gm.). **a., antirrhinic,** an acid from the leaves of digitalis. **a., apiolic,** decomposition product of apiol. **a., apocrenic,** Berzelius' term for a brown, amorphous substance obtained from the sediment of chalybeate waters. **a., arabic,** see *arabin*. **a., arachic, a., arachidic, a., arachinic,** $C_{20}H_{40}O_2 = C_{19}H_{39}.COOH$, a monobasic fatty acid obtained from oil of peanut, *Arachis hypogæa*. **a., argentic,** silver monoxide. **a., aromatic,** a name applied to certain organic acids occurring in the balsams, resins, and other odoriferous principles. Also, in pharmacy, a dilute mineral acid reinforced by aromatic substances in order to modify its flavor. **a.,**

arsenic, a., arsenous, see *arsenic trioxide*. **a., arsinic,** any of the acids formed by the oxidation of arsins or arsonium compounds. **a., ascorbic,** vitamin C. **a., aseptic,** an antiseptic solution consisting of an aqueous solution of 5 Gm. of boric acid in 1000 Gm. of hydrogen dioxide (1.5 %); 3 Gm. of salicylic acid may be added. **a., asparagic, a., asparaginic, a., asparamic,** see *a., aspartic*. **a., aspartic,** $C_4H_7NO_4$, occurs in the vinasse obtained from the beet-root, and is procured from albuminous bodies in various reactions. It is prepared by boiling asparagin with alkalies and acids; crystallizes in rhombic dibasic prisms or leaflets, and dissolves with difficulty in water. **a., aspartic, inactive,** $NH_2C_2H_3(CO_2H)_2$, formed by heating aspartic acid with water or with alcoholic ammonia to 140°–150° C., or with HCl to 170°–180° C. Syn., *asparacemic acid*. **a., atrolactic,** $C_9H_{10}O_3$, a monobasic acid from acetophenone by means of prussic acid and H_2SO_4 or dilute HCl. **a., auric,** $Au(OH)_3$, gold trihydroxide. **a., azelaic, a., azelainic,** $C_9H_{16}O_4$, an oxidation-product of oleic acid, Chinese wax, castor oil, or cocoanut oil; soluble in water, alcohol, and ether, melts at 106°–107° C., and boils at 360° C. Syn., *anchoic acid; lepargylic acid; azelic acid; azeloinic acid*. **a., azotic,** nitric acid. **a. barbituric,** $C_4H_4O_3N_2$, malonyl urea. Colorless crystals, slightly soluble in water and alcohol. See *barbital*. **a., benzamic,** see *a., amidobenzoic*. **a., benzoic,** $C_7H_6O_2$, occurs free, chiefly in gum benzoin and in coal-tar. It crystallizes in white, shining needles or leaflets, melts at 120°, and distils at 250°. It volatilizes readily, its vapor has a peculiar odor. **a., blattic,** see *antihydropin*. **a., blue,** hydrocyanic acid. **a., boric, a., boracic,** see *boron*. **a. of borax,** orthoboric acid. **a., boroboracic, a., boroboric,** a mixture of equal parts of boric acid and borax. **a., borocitric,** a combination of boric and citric acid forming a white powder which is a solvent for urates and phosphates in urinary calculi, gout, etc. Dose 5–20 gr. (0.3–1.3 Gm.). **a., borophenylic,** $C_6H_7BO_2$, obtained by the action of phosphorus oxychyloride upon a mixture of boric acid and phenol. An antiseptic white powder with mild aromatic taste, not easily soluble in water, melting at 204° C. It is fatal to lower forms of life, but does not affect the higher forms Syn., *phenylboric acid*. **a., borasalicylic,** $B(OH)(OC_6H_4.CO_2H)_2$, a combination of boric and salicylic acids in molecular proportion. Used externally instead of salicylic acid. **a., borussic,** hydrocyanic or prussic acid. **a., brom-,** one in which bromine has replaced one or more atoms of hydrogen in the acid radical. **a., bromacetic,** see *a., monobromacetic*. **a., bromhydric,** hydrobromic acid. **a., bromic,** $HBrO_3$, a colorless, acid liquid. **a., bursic, a., bursinic,** a yellow, hygroscopic mass; an aqueous extract of *Capsella bursa-pastoris* produced by the action of lead acetate and ammonia and evaporating. Its aqueous solution is used the same as ergotin, hypodermatically and internally. **a., butic, a., butinic,** see *a., arachic*. **a., butyric,** $C_4H_8O_2$, a viscid acid with a rancid smell. Obtained commercially by fermentation of a mixture of sugar and butter or cheese in an alkaline carbonate, but occurs in various plants, cod-liver oil, juice of meats, and in perspiration. Combined with glycerol as glyceryl butyrate, it is essentially butter. **a., cacodylic,** see *a., dimethylarsenic*. **a., caffeic,** $C_9H_8O_4$, obtained when the tannin of coffee is boiled with potassium hydroxide. **a., cahincic** or **caincic,** see *cahincin*. **a., camphoric,** $C_{10}H_{16}O_4$, a dibasic acid, obtained by boiling camphor with HNO_3; it crystallizes from hot water in colorless leaflets; melts at 178°, and decomposes into water and its anhydride, $C_8H_{14}(CO)_2O$. It is used in night-sweats of phthisis. Dose 10–30 gr. (0.06–2.0 Gm.). **a., capric** or **caprinic,** $C_9H_{19}CO.OH$, occurs in small quantity as a glycerid in cow's butter. It crystallizes in fine needles, melting at 30° C., and is very insoluble in boiling water. **a., caproic,** $C_6H_{12}O_2$, the sixth in the series of fatty acids; a clear, mobile oil, colorless, inflammable, and with a very acid and penetrating taste. **a., caprylic** or **caprillic,** $C_7H_{15}CO.OH$, an acid combined with glycerol, forming a glycerid existing in various animal fats; it is liquid at ordinary temperatures. **a., carbamic,** $H_2N.CO.OH$, carbonic acid in which NH_2 replaces OH; it is not known in the free state; its ammonium salt is contained in commercial ammonium carbonate. The esters of carbamic acid are called urethanes. **a., carbazotic,** see *a., picric*. **a., carbolic,** C_6H_5OH, phenol,—the official designation of this substance,—is procured from coal-tar by fractional distillation. It has a very peculiar and characteristic odor, a burning taste, is poisonous, and has antiseptic properties. The sp. gr. at the melting-point is 1.060–1.066; it crystallizes in colorless rhombic needles that melt at about 40° C., boiling at about 180°, and it is not decomposed upon distillation. At ordinary temperatures it dissolves in water with difficulty (1:19.6 at 25° C.), but is soluble in alcohol, ether, glacial acetic acid, and glycerol in all proportions. It unites with bases to form salts, known as *carbolates*. Upon exposure to light and air it deliquesces and acquires a pinkish color. It is used in the manufacture of many of the artificial coloring-matters, *e. g.*, picric acid, It is a powerful antiseptic and germicide. Internally it is useful in vomiting, fermentation in the stomach, and as an intestinal antiseptic. locally, as a caustic. Dose, internally, ½–2 gr. (0.03–0.13 Gm.). **a., carbolic, camphorated;** a mixture of phenol 1 part and camphor 3 parts. **a., carbolic, chlorinated,** see *trichlorphenol*. **a., carbolic, iodized,** a solution of 20 parts of iodine in 76 parts of phenol with the addition of 4 parts of glycerol. It is used as an antiseptic and escharotic. **a. carbolic, liquefactum** (B. P.). Dose 1–2 min. (0.06–0.13 Cc.). **a., carbolsulphuric,** a mixture of equal parts of phenol and concentrated sulphuric acid. It is used as a disinfectant in 2 to 3 % solution. **a., carbonaceous,** see *carbon dioxide*. **a., carbonaphtholic,** see *a., oxynaphthoic*. **a., carbonic,** CO_2, carbon dioxide; an ultimate product of the combustion of carbon compounds; a colorless, odorless gas, heavier than air, incapable of sustaining respiration. **a., carminic,** $C_{17}H_{18}O_{10}$, a coloring-matter found in the buds of certain plants, and especially in cochineal, an insect inhabiting different varieties of cactus. It is an amorphous, purple-red mass, readily soluble in water and alcohol, and yields red salts with the alkalis. **a., carthamic,** see *carthamin*. **a., caseic,** lactic acid (*q. v.*). **a., catechinic,** or **catechuic,** same as *catechin*. **a., cathartic, a., cathartinic,** an active principle from several species of *cassia*. **a., cerebric,** or **cerebrinic,** $C_{69}H_{113}NO_8$, from brain tissue. **a., cerotic,** or **cerotinic,** $C_{27}H_{54}O_2$,

a fatty acid existing in beeswax and in Chinese wax. **a.-characteristic,** the replaceable hydrogen and the elements immediately bound to it in the molecule of an acid, as the CO.OH of organic acids. **a., chloracetic** [*chlorine and acetic*], an acid, called also *monochloracetic acid* produced by the substitution of chlorine for the hydrogen of the radical in acetic acid. It is sometimes used as a caustic. **a., chloric,** $HClO_3$, an acid known only in its compounds (*chlorates*) and its aqueous solution. **a., cholalic,** see *a., cholic.* **a., choleic,** $C_{24}H_{40}O_4$, from ox-bile. **a., cholesteric,** $C_{12}H_{10}O_7$, an acid obtained by Tappeiner from the oxidation of cholic acid with potassium dichromate and sulphuric acid. This must not be confounded with cholesterinic acid. **a., cholesterinic,** $C_8H_{10}O_3$, a dibasic acid obtained from cholesterin and from cholic acid by action of nitric acid; it occurs as a gum-like, yellow, hygroscopic body with an acrid taste. **a., cholic, a., cholalic,** $C_{24}H_{40}O_5$, from glycocholic and taurocholic acids; it crystallizes from out of a hot solution in small anhydrous prisms, sparingly soluble in water, and melting at 195°. **a., choloidic,** derived from cholalic, acid. **a., chondroitic,** $C_{13}H_{27}SNO_{17}$, from cartilage. **a., chromic** (*chromii trioxidum*, U. S. P.), strictly, the compound H_2CrO_4; it forms salts called chromates. It is a crystalline solid; escharotic. **a., chrysophanic,** $C_{15}H_{10}O_4$, exists in the lichen, *Parmelia parietina*, in senna leaves, and in the rhubarb root. It crystallizes in golden-yellow needles or prisms, melting at 162°. Syn., *rheinic acid.* See *chrysarobin.* **a., cinchotannic,** see *cinchotannin.* **a., cinnamic, a., cinnamylic,** $C_9H_8O_2$, occurs in peru and tolu balsams, in storax, and in some benzoin resins. It has been used in tuberculosis, both internally and externally. Dose 1–10 min. (0.06–0.65 Cc.) hypodermatically. **a., citric,** $C_6H_8O_7$, occurs free in lemons, black currants, bilberries, beets, and in various other acid fruits. It crystallizes with one molecule of water in large rhombic prisms that melt at 100°, are colorless, inodorous, and extremely sharp in taste. It is refrigerant, antiseptic, and diuretic. **a., colopholic, a., colophonic,** an acid obtained from turpentine; it is used in plasters. **a., copahuvic, a., copaivic,** $C_{20}H_{30}O_2$, an almost colorless, coarsely crystalline powder, obtained from copaiba; it is soluble in alcohol, ether, and benzene. Sometimes written *copaibic A.* **a., cresolsulphuric,** $C_7H_7O.SO_2.OH$, exists in the urine in small traces. **a., cresotic, a., cresotinic,** $C_8H_8O_3$, an aromatic acid of which 3 isomeric compounds may be formed by the action of sodium and carbonic anhydride on the 3 modifications of cresol. They all occur in acicular crystals. The para compound, melting at 151° C. is used as an antipyretic in the form of sodium cresolate. Dose 2–20 gr. (0.13–1.3 Gm.); maximum dose 60 gr. (4 Gm.). Syn., *oxytoluic acid; homosalicylic acid.* **a., cresylic,** see *cresol.* **a., cryptophanic,** $C_{16}H_{18}N_2O_{16}$, said to exist in small quantities in human urine. **a., cubebic,** $C_{15}H_{14}O_7(?)$, a white, waxy mass, turning brown on exposure, obtained from cubeb berries, the unripe fruit of *Piper cubeba*, soluble in alcohol, ether, and alkaline solutions, and used as a diuretic. Dose 5–10 gr. (0.3–0.6 Gm.) in pills several times daily. **a., cumic,** $C_{10}H_{12}O_2$, produced by the oxidation of cuminic alcohol with dilute HNO_3. Very soluble in water and alcohol; crystallizes in colorless needles or leaflets; melts at 116° and boils at about 290°. **a., cyanic,** CONH, obtained by heating polymeric cyanuric acid. **a., cyanuric,** see *a., tricyanic.* **a., cynureinic,** $C_{10}H_{14}N_2O_6$, decomposition product of proteids found in dogs' urine. **a., damaluric,** $C_7H_{12}O_3$, found in urine. **a., dextrotartaric,** tartaric acid. **a., diacetic,** $C_4H_6O_3$, an acid present in the urine in certain stages of diabetes and other diseased conditions. **a., dichloracetic,** $CHCl_2.CO_2H$, produced when hydrated chloral is heated with CNK or potassium ferrocyanide and water. At ordinary temperature it occurs as a caustic, colorless liquid, but crystallizes at a low temperature. Sp. gr., 1.522 at 15° C.; boils at 189°–191° C.; soluble in water and alcohol. It is used as an escharotic in skin diseases. **a., diiodosalicylic,** $C_7H_4I_2O_3$, a white, crystalline powder, soluble in alcohol and ether, slightly soluble in water, and melting at 220°–230° C. It is antipyretic, analgesic, and antiseptic, and is used in rheumatism and gout. Dose 8–20 gr. (0.5–1.3 Gm.) 3 or 4 times daily in wafers; maximum dose 30 gr. (2 Gm.). **a., dimethylarsenic,** $As(CH_3)_2OOH$, a substance formed by the oxidation of cacodyl, occurring in large, permanent prisms, odorless and slightly sour. It is soluble in water and alcohol and melts at 200° C. It is considered not to be toxic, and because of its solubility is easily absorbed. Syn., *cacodylic acid.* **a., dithiochlorsalicylic,** $SC_6H.Cl.OH\ COOH$, a reddish-yellow powder obtained by heating a mixture of salicylic acid and sulphur chloride to 140° C. It is recommended as an antiseptic. **a., dithiosalicylic,** $C_{14}H_{10}S_2O_6$, obtained from salicylic acid and sulphur chloride heated to 150° C., and existing in two modifications differing in the solubility of their salts. It is an antiseptic, analgesic, antipyretic, yellowish-gray powder, partly soluble in water. Its lithium and sodium salts only are used in medicine as substitutes for salicylic acid. **a., doeglic,** $C_{15}H_{16}O_2$, a crystalline monobasic acid obtained from the oil of the doegling, or bottle-nosed whale. **a., dracic, a., draconic, a., draconylic,** see *a., anisic.* **a., ethylenelactic,** $CH_2\ (OH).CH_2.CO_2H = C_3H_6O_3$, an acid isomeric with ethidene lactic acid or the lactic acid of fermentation; is obtained from acrylic acid by heating with aqueous sodium hydroxide to 100° C. and in various other ways. It is a thick, uncrystallizable syrup; on heating it loses water and is converted into acrylic acid. Syn., *hydracrylic acid; β-oxypropionic acid; β-hydroxypropionic acid.* **a., ethylenephenylhydrazinsuccinic,** $C_{20}H_{22}N_4O_6$, an acid obtained from an alcoholic solution of ethylenephenylhydrazin and succinic anhydride by boiling. It occurs in acicular crystals, soluble in water. It is used as an antipyretic. **a., ethylidenelactic,** lactic acid. **a., excretolic,** fatty acid from feces. **a.-fast,** a term applied to bacteria (such as the bacilli of tuberculosis and of leprosy) which are not decolorized by mineral acids after having been stained with the ordinary aniline dyes. **a., fatty,** a monobasic acid formed by the oxidation of a primary alcohol. The fatty acids have a general formula of $C_nH_{2n}O_2$. Syn., *aliphatic acid.* **a., fellic,** $C_{25}H_{40}O_4$, a crystalline cholic acid obtained by Schotten from human bile; it is due to admixture with this acid that cholic acid from human bile differs in appearance from that obtained from other sources. **a., filicic,** $C_{14}H_{16}O_5$, from rhiz-

ome of *Dryopteris filix-mas.* **a., fluoric** hydrofluoric acid in aqueous solution; a strong escharotic. **a., formic,** CH_2O_2, an acid obtained from a fluid emitted by ants when irritated; it is also found in stinging nettles, in shoots of the pine, and in various animal secretions. It is prepared by heating oxalic acid and glycerol. It is a colorless, mobile fluid, with a pungent odor; it is a vesicant. **a., gallic,** $C_7H_6O_5$, occurs free in nutgalls, in tea, and in the fruit of various other plants. It is obtained from ordinary tannic acid by boiling it with dilute acids. It crystallizes in fine, silky needles containing one molecule of water. It dissolves slowly in water and readily in alcohol and ether; has a faintly acid, astringent taste; melts at near 220°. It is astringent and disinfectant; useful in night-sweats, diabetes, and chronic diarrhea. **a., gallotannic,** the tannin of nut-galls. **a., gaultheric,** see *methyl salicylate.* **a., gentianic,** *gentisin, q. v.* **a., gluconic,** $C_6H_{12}O_7$, formed by the oxidation of dextrose, cane-sugar, dextrin, starch, and maltose with chlorine or bromine water. Most readily obtained from glucose. It is dextrorotatory, but does not reduce Fehling's solution. Melts at 200°. **a., glutamic, a., glutaminic,** $C_5H_9NO_4$, decomposition product of proteids. **a., glutaric,** $C_5H_8O_4$, found in decomposing pus. **a., glycerinophosphoric, a., glycerinphosphoric,** $C_3H_9PO_6$, a dibasic acid in combination with the fatty acids and cholin as lecithin in the yolk of eggs, in bile, in the brain, and in the nervous tissue. It is formed by mixing glycerol with metaphosphoric acid. It is a pale yellow, oily liquid, without odor, having a sour taste; soluble in water and alcohol; is used in the treatment of neurasthenia, tabes, etc. Dose 1½–5 gr. (0.1–0.3 Gm.) 3 times daily. **a., glycerin-sulphuric,** $C_3H_8SO_6$, a monobasic body forming a series of salts called glycerosulphates. Syn., *sulphoglyceric acid.* **a., glycerophosphoric,** a decomposition product of lecithin. **a., glycerosulphuric,** see *a., glycerinsulphuric.* **a., glycocholic,** $C_{26}H_{43}NO_6$, a monobasic acid found in bile; sparingly soluble in water and crystallizing in minute needles. **a., glycollic,** $C_2H_4O_3$, oxyacetic acid, produced by the action of nascent hydrogen upon oxalic acid. It is a thick syrup that gradually crystallizes on standing over sulphuric acid; the crystals melt at 80° and deliquesce in the air. It dissolves readily in alcohol, water, or ether. **a., glycosuric,** an acid sometimes occurring in urine. **a., glycuronic,** $C_6H_{10}O_7$. This acid has been found in urine; it probably does not exist there normally, but appears after taking certain drugs, as benzol, indol, nitrobenzol, and the quinine derivatives. **a., guaiacolcarbonic, a., guaiacolcarboxylic,** $C_8H_8O_4$, a monobasic crystalline acid, melting at 150° C. It is antiseptic and antipyretic. **a., gummic,** see *arabin.* **a., gymnemic,** $C_{32}H_{52}O_{12}$, a greenish-white, amorphous powder with a harsh acid taste, soluble in alcohol and chloroform and slightly soluble in water and ether. It is obtained from the leaves of *Gymnema sylvestre,* and obtunds the taste for bitter or sweet things, but not for sour, pungent, or astringent ones. It is used as a mouth-wash in 12% hydroalcoholic solution before taking nauseous medicines. **a., helvellaic,** an acid which destroys red blood-corpuscles, obtained by Böhm from juice of the mushrooms belonging to the genus *Helvella.* **a., helvellic,** $C_{13}H_{22}O_3$, an acid from fresh belladonna. It is a yellow, transparent, syrupy liquid of strong acid reaction. **a., hexuronic,** vitamin C. **a., hippuric,** $C_9H_9NO_3$, occurs in large amount in urine of herbivorous animals, sometimes in that of man. It crystallizes in rhombic prisms, and dissolves readily in hot water and alcohol. Syn., *benzoyl glycocoll.* **a., homogentisic,** $C_8H_8O_4$, same as *a., oxymandel,* an acid separated by Baumann from highly-colored urine, believed to be formed by the action of bacteria on the tyrosin normally found in pancreatic digestion. **a., hydra-,** see *hydrogen acids* under *acid.* **a., hydracrylic,** $C_3H_6O_3$, an acid isomeric with lactic acid. See *a., ethylenelactic.* **a., hydriodic,** HI, a gaseous acid. Its solution (*acidum hydriodicum dilutum,* U. S. P.) and a syrup prepared from it, *syrupus acidi hydriodici* (U. S. P.), are used as alteratives, with the general effects of iodine. Dose of the *syrup* 1–4 dr. (4–16 Cc.). **a., hydriodic, dilute,** a 10% solution of hydriodic acid in 90% of water; an alterative of especial value in scrofulosis of children. **a., hydrobromic,** HBr; the dilute acid, which is the chief form used, consists of 10 parts acid and 90 parts water. It is a solvent for quinine, is useful in hysteria, congestive headaches, and neuralgia, and is recommended as a substitute for potassium and sodium bromides. Dose 20 min.–2 dr. (1.3–8.0 Cc.). **a., hydrochloric,** HCl, a liquid consisting of 31.9% by weight of HCl gas in 68.1% of water. It is colorless, pungent and intensely acid. Syn., *muriatic acid.* **a., hydrochloric, dilute,** a 10% solution of absolute acid in water. Valuable as an aid to digestion. Dose 3–10 min. (0.19–0.65 Cc.). **a., hydrocyanic, aqueous,** the hydrocyanic acid obtained by distillation, which contains a certain percentage of water before removal by fractional distillation and desiccation. **a., hydrocyanic, dilute,** HCN, a liquid consisting of 2% of the acid with 98% of water and alcohol. It possesses an odor like that of bitter almonds. Prussic acid is found in the bitter almond, the leaves of the peach, and in the cherry-laurel, from the leaves of which it is distilled. It is one of the most active poisons known, death from complete asphyxia being almost instantaneous. It is valuable for its sedative effects in vomiting, whooping-cough, and spasmodic affections. Dose 1–3 min. (0.06–0.2 Cc.). Syn., *prussic acid.* **a., hydrocyanic, vapor,** 1 part of dilute acid in 4–6 parts of water, warmed, and the vapor inhaled to relieve irritable coughs. **a., hydrofluoric,** HF, a compound of hydrogen and fluorine; powerfully corrosive, used for etching on glass. **a., hydroparacumaric,** $C_9H_{10}O_3$, occurs in urine in minute quantities. **a., hydrosulphuric,** H_2S, a gas formed during the putrefaction of albuminous substances; it occurs in sulphur mineral waters, and is produced by the action of mineral acids on metallic sulphides. It has the odor of rotton eggs. Syn., *hydrogen sulphide; sulphureted hydrogen; sulphhydric acid.* **a., hypochlorous,** HClO, an unstable compound, important as a disinfecting and bleaching agent. **a., hypogeic, a., hypogæic,** $C_{16}H_{30}O_2$, a monobasic acid found in peanut (*Arachis hypogæa*) oil, occurring as fine, colorless, stellate groups of needles which melt at 33° C. and solidify again at 28°–30° C.; soluble in alcohol and ether; insoluble in water. **a., hyponitrous,** HNO, forms hyponitrites. **a., hypophosphorous,** H_3PO_2; its salts (hypophosphites), also the dilute acid, and a syrup prepared from it, are

used as remedial agents. **a., ichthyolsulphonic,** $C_{28}H_{38}S_4O_4$, an acid produced from Tyrolean bituminous mineral by the action of sulphuric acid; it is strongly acid and contains about 16.4% of sulphur. It is antiphlogistic and astringent, and is used in the form of its salts, chiefly "ichthyol," the ammonium salt. **a., igasuric,** from seeds and surrounding pulp of nux vomica. **a., indigosulphuric,** $C_{16}H_{10}S_2N_2O_8$, from indigo by the action of sulphuric acid. **a., indoxylsulphonic,** $C_8H_7NSO_4$, found in urine. **a., indoxylsulphuric,** an acid that, combined with potassium, occurs in the urine as indican. **a., inorganic,** a mineral acid or one in which the carboxyl group CO.OH is absent. **a., inosic, a., inosinic,** $C_{10}H_{14}N_4O_{11}$, found in muscle tissue. **a., iodic,** HIO_3, a monobasic acid. Its solution (2%) has been recommended as an alterative by subcutaneous injection. **a., iodosobenzoic,** $C_6H_4.OI.COOH_2$, a compound analogous in action to iodoform. **a., isobutylcarbonic, a., isobutylcarboxylic,** see *a., valeric, normal.* **a., isobutylformic, a., isopropylacetic,** see *a., isovaleric.* **a., isovaleric,** $(CH_3)_2.CH.CH_2.CO_2H$, an isomer of valeric acid, obtained from oil of valerian or from oxidation of amyl-alcohol; occurs as a transparent, colorless, oily liquid with odor of valerian and old cheese; melts at 51° C.; boils at 174° C. Sp. gr., 0.9470 at 0° C. Used in nervous affections. Maximum dose 10 drops; a day, 40 drops. Syn., *monohydrated valeric acid; valeric acid; primary pentoic acid; isobutyl carboxyl; isopropylacetic acid.* **a., jecoleic,** an acid forming one of the essential constituents of cod-liver oil and isomeric with doeglic acid. **a., kombic,** a compound obtained by Fraser in the lead precipitate from an aqueous solution of alcoholic extract of strophanthin. It is freely soluble in water and of strongly acid reaction. **a., kynureic,** see *a., cynurenic.* **a., lactic,** $HC_3H_5O_3$, a liquid containing 75% of absolute acid in 25% of water, produced in the fermentation of milk. It is useful in aiding digestion, in diabetes, in tuberculosis of the larynx, and as a solvent of false membrane in diphtheria. Dose ½ dr.–½ oz. (2–16 Cc.) in the 24 hours. **a., lactic,** diluted (B. P.), lactic acid, 3 oz., distilled water, sufficient to make one pint. Dose ½–2 dr. (2–8 Cc.). **a., lactolactic, a., lactyllactic,** $C_6H_{10}O_5$, a monobasic acid obtained from a solution of lactic acid heated to 130° to 140° C. Syn., *lactyl lactate; lactic anhydride; lactyl anhydride.* **a., lanoceric,** $C_{26}H_{52}O_4$, an acid resulting from the saponification of lanolin; it melts at 104° C. **a., lanopalmitic,** $C_{16}H_{32}O_2$, resulting from the saponification of lanolin. It melts at 87°. **a., leucamic,** see *leucin.* **a., levulinic,** $C_5H_8O_3$, obtained from levulose, cellulose, cane-sugar, etc.; a very hygroscopic crystalline substance, soluble in water, ether, or alcohol, and melting at 33.5° C. **a., linoleic,** $C_{18}H_{32}O_2$, occurs as a glycerid in drying oils, such as linseed oil, hemp oil, poppy oil, and nut oil. **a., lupamaric,** the bitter acid of hops. **a., lysuric,** $C_6H_{12}(COC_6H_5)_2N_2O_3$, a substance obtained by Drechsel from lysin by action of benzoyl chloride. **a., maleic, a., maleinic,** $C_4H_4O_4$, obtained from malic acid by distillation; it occurs in prisms, soluble in water, alcohol, and ether, melting at 130° C., boiling at 160° C. **a., malic,** $C_4H_6O_5$, a bibasic acid, occurring free or in the form of salts in many plant-juices, in unripe apples, in grapes, and in mountain-ash berries. It forms deliquescent crystals that dissolve readily in alcohol, slightly in ether, and melt at 100°; it has a pleasant acid taste. **a., malonic,** $C_3H_4O_4$, occurs in the deposit found in the vacuum pans employed in beet-sugar manufacture; it may be obtained by the oxidation of malic acid with chromium trioxide. **a., mandelic,** $C_6H_5.CH(OH).CO_2H$, formed from benzaldehyd by the action of prussic acid and HCl. **a., mannitic,** $C_6H_{12}O_7$, from sugars by oxidation. **a., margaric, a., margarinic,** $C_{11}H_{34}O_2$, a monobasic acid existing in nearly all animal fats and occurring as a solid substance melting at about 60° C. It is believed by some to be a mere mixture of palmitic and stearic acids. **a., marine,** hydrochloric acid. **a., meconic,** $C_7H_4O_7$, a tribasic acid, occurring in opium in union with morphine. It crystallizes with $3H_2O$ in white laminæ. **a., mephitic,** carbon dioxide. **a., mesotartaric,** inactive tartaric acid obtained by heating 30 parts of tartaric acid with 4 parts of water for 2 hours to 165° C. **a., metaphosphoric,** HPO_3, a glassy solid, freely soluble in cold water, and converted by boiling into orthophosphoric acid. It is used as a test for albumin in the urine. **a., mineral,** see *a., inorganic.* **a., monobromacetic,** $C_2H_3BrO_2$, produced by heating acetic acid with bromine; it is escharotic and antiseptic. Syn., *bromacetic acid.* **a., monochloracetic,** $C_2H_3ClO_2$, from chlorine by action of boiling acetic acid containing sulphur and iodine; used in xanthoma. **a., monoiodosalicylic,** $C_7H_5IO_3$, produced by boiling salicylic acid with iodine and alcohol. It is used in acute articular rheumatism. Dose 15–45 gr. (1–3 Gm.) a day. **a., mononitrosalicylic,** $C_6H_3(NO_2)OH.CO_2H$, an acid obtained by action of nitric acid on indigo or on salicylic acid. Syn., *indigotic acid; nitrospiroylic acid; nitroanilic acid; anilic acid.* **a., morphoxylacetic,** $C_{17}H_{21}NO_3.C_2H_3CO_2H$, a narcotic similar to morphine but weaker. **a., mucic,** $C_6H_{10}O_8$, from gums and sugars. **a., muriatic,** see *a., hydrochloric.* **a., muriatic, dephlogisticated, a., muriatic, oxygenated,** chlorine. **a., muriatic, superoxygenated,** chloric acid. **a., myoctonic,** an acid obtained from *Palicourea marcgrafii*, occurring as a yellowish, oily, narcotic, and extremely poisonous liquid. **a., myristic,** $C_{14}H_{28}O_2$, from nutmegs. **a., myronic,** $C_{10}H_{19}NS_2O_{10}$, an acid that occurs as a potassium salt in the seeds of black mustard. **a., β-naphthalinsulphonic,** $C_{10}H_7.SO_3H$, an acid occurring in white, opalescent scales with generally a tinge of red; freely soluble in water and alcohol, slightly in ether. It is a sensitive reagent for albumin. **a., naphthionic,** $C_{10}H_6(NH_2).SO_3H$, an acid obtained from naphthylamine by action of ammonium sulphite. It is recommended as an antidote for nitrite poisoning; also in the treatment of acute iodism and in troubles of the bladder originating in the alkalescence of the urine. Dose 40–60 gr. (2.5–4.0 Gm.) daily. Syn., *a-naphthylaminsulphonic acid.* **a., naphthoic,** $C_{11}H_8O_2$, a crystalline substance of which 2 isomeric compounds may be formed by saponification of the 2 modifications of naphthonitril. **a., narcotic,** see *narcotin.* **a., neurostearic,** $C_{18}H_{36}O_2$, from brain-tissue. **a., nicotinic,** $C_5H_5NO_2$, from tobacco **a., nitric,** HNO_3, a liquid consisting of 68% absolute acid in 32% of water. The pure acid is colorless, fuming, and highly caustic. It is used in cauterization of chancres and phagedenic ulcers and as a reagent. **a., nitric, anhydrous,** nitrogen

pentoxide. **a., nitric, dilute,** contains 10% absolute acid. It is used internally to aid digestion, to stimulate the hepatic function, etc. Dose 3–15 min. (0.2–1.0 Cc.), well diluted. **a., nitric, monohydrated,** pure nitric acid. **a., nitro-,** an acid produced from another acid by replacing the hydrogen with nitryl (NO_2). **a., nitroanilic,** same as *a., mononitrosalicylic.* **a., nitrohydrochloric, a., nitromuriatic,** a golden-yellow, fuming mixture of 4 parts of nitric and 15 of hydrochloric acid. It is a solvent of gold; it is valuable in affections of the liver. Dose 1–7 min. (0.06–0.45 Cc.), very dilute. Syn., *aqua regia.* **a., nitrohydrochloric, dilute,** consists of 4 parts nitric acid, 18 parts hydrochloric acid, and 78 parts water. Dose 5–20 min. (0.3–1.3 Cc.), well diluted. **a., nitrosonitric,** fuming nitric acid. **a., nitrospiroylic,** see *a., mononitrosalicylic.* **a., nitrous,** HNO_2, from decomposing nitrites. **a., Nordhausen,** brown, fuming sulphuric acid, first manufactured at Nordhausen. **a., nucleic, a., nucleinic,** any one of a group of organic acids containing C, H, O, N, and a large proportion of P. The nucleic bases are present in the nucleic acid radicals as organic compounds. The nucleic acids occur in nature, free or in combination with albumins, when they are called primary acids. On decomposition they yield nucleic bases, and according to their origin are termed *sperma*-nucleic acid, *thymono*-nucleic acid, *yeast*-nucleic acid, etc. According to Kossel, there are in reality only 4 true nucleic acids, viz., adenylic acid, guanylic acid, sarcylic (hypoxanthylic) acid, and xanthylic acid. On decomposition the primary acids give rise to secondary acids which contain more phosphorus than the primary acids, and may or may not give rise to xanthin bases on further decomposition; according to Simon, they may be divided into acids of the type of *plasminic acid* and of *thyminic acid* respectively. **a. number,** see *number.* **a., oleic, a., oleinic,** $C_{18}H_{34}O_2$, an acid present in many fats and oils. It is a colorless oil, crystallizing on cooling, soluble in alcohol, benzol, and the essential oils; insoluble in water. It saponifies when heated with alkaline bases. It is used in making the oleates. **a., organic,** an acid characterized by the presence of the carboxyl group, CO.OH. **a., orthoamidosalicylic,** $C_6H_3(NH_2)$-(OH)COOH, a gray, amorphous, slightly sweet, inodorous powder obtained by reduction of orthonitrosalicylic acid and insoluble in water, alcohol, and ether. It is employed in chronic rheumatism. Dose 3–7 gr. (0.25–0.5 Gm.). **a., orthoboric,** see *boron.* **a., orthophosphoric,** H_3PO_4, ordinary phosphoric acid, as distinguished from metaphosphoric and pyrophosphoric acids. **a., osmic,** OsO_4, the oxide of *osmium,* one of the rarer elements; it occurs as yellow, acrid, burning crystals, yielding an intensely irritating vapor; has been recommended for hypodermatic use in sciatica, strumous glands, and cancer; is used in histology as a fixing agent and stain for fat. **a., otoic,** same as *a., caprylic.* **a., oxalic,** $C_2H_2O_4$, a colorless, crystalline solid, obtained by treating sawdust with caustic soda and potash. Occurs in many plants, chiefly as potassium oxalate; with 2 parts of water it crystallizes in fine, transparent monoclinic prisms. Is soluble in 9 parts of water at moderate temperature and quite easily in alcohol. Has been recommended in amenorrhea. In large doses it is a violent poison. **a., oxaluric,** $C_3H_4N_2O_4$, oxidation product of uric acid. **a., oxuric,** Vauquelin's name for impure alloxanic acid. **a., oxybutyric,** see *oxybutyric.* **a., oxygen,** an acid containing more oxygen than is requisite for saturation. **a., oxymandelic,** $C_8H_8O_4$, occurs in urine in acute yellow atrophy of the liver. **a., oxymuriatic.** 1. Hydrochloric acid. 2. Chloric acid. 3. Chlorine. **a., β-oxynaphthoic,** $C_{11}H_8O_3$, obtained from sodium betanaphthol by the action of carbon dioxide with heat. It is a surgical antiseptic. Syn., *β-naphtholcarboxylic acid; β-carbonaphthoic acid.* **a., oxypropionic,** lactic acid. **a., oxypro'teic,** a neutral sulphur compound found in the urine. **a., palmitic,** $C_{16}H_{32}O_2$, an acid existing as a glycerol ether in palm-oil and in most solid fats. **a., paracresotic,** $C_8H_8O_2$, an intestinal antiseptic. **a., parafumaric,** see *a., maleic.* **a., paralac'tic,** see *sarcolactic.* **a., paraoxyphenylacetic,** $C_8H_8O_3$, found in small quantities in urine. **a. of pearls,** acid phosphate of sodium. **a., pectic,** $C_{16}H_{22}O_{16}$, from pectin. **a., perchloric,** $HClO_4$, a volatile liquid; it forms perchlorates. **a., periodic,** $HIO_4 + 2H_2O$, obtained from iodine by the action of concentrated perchloric acid; is soluble in water and alcohol, slightly in ether, and melts at 130°–133° C. Is a powerful oxidizer. Syn., *heptaiodic acid.* **a., permanganic,** $HMnO_4$, a monobasic acid. **a., perosmic,** see *a., osmic.* **a., phenacetu'ric,** found in urine of herbivorous animals, sometimes in human urine. **a., phenic,** carbolic acid. **a., phenolsulphonic,** see *a., sulphocarbolic.* **a., phenylic,** phenol. **a., phenylsalicylic,** $C_{13}H_{10}O_4$, a white, antiseptic powder, soluble in alcohol, ether, and glycerol, but very slowly in water; used as a dressing like iodoform. Syn., *orthooxydiphenylcarbolic acid; phenylorthooxybenzoic acid.* **a., phenylsulphuric,** see *a., sulphocarbolic.* **a., phocenic,** see *a., valeric.* **a., phosphoantimonic,** a yellowish, very acid substance, obtained from antimonium pentachloride by the action of concentrated aqueous solution of sodium phosphate. Used as an alkaloid reagent. **a., phosphocarn'ic,** $C_{10}H_{17}N_3O_8$, a nitrogenous extraction of muscle. **a., phosphoric,** H_3PO_4, contains 50% each of acid and of water; is obtained from bones or by oxidation of phosphorus. Syn., *orthophosphoric acid.* **a., phosphoric, anhydrous,** P_2O_5, obtained from phosphorus by complete combustion, it is a bulky, light, white deliquescent powder, soluble in water. Used as a chemical agent. **a., phosphoric, dilute,** contains 10% of absolute acid. Used in digestive disturbances, in strumous diseases, and to dissolve phosphatic deposits. Dose 5–30 min. (0.32–2.0 Cc.). **a., phosphoric, glacial, a., phosphoric, monobasic,** see *a., metaphosphoric.* **a., phosphorous,** H_3PO_3, a dibasic oxyacid of phosphorus, containing one atom of oxygen less than phosphoric acid. **a., phosphotungstic,** $H_3PO_4.12WO_3$, used as an alkaloid and peptone test. **a., phtioic,** one isolated from the fat of the tubercle bacilli; it causes the formation of tubercular tissue. **a., picric,** $C_6H_2(NO_2)_3OH$, obtained by nitration of phenol. Forms pale yellow, shining, prismatic, laminar, or columnar crystals, very bitter to taste. Is readily soluble in hot water; its solution dyes silk and wool a beautiful yellow color. It is an antiperiodic and anthelmintic. Is a test for albumin and sugar. Dose 5–15 gr. (0.32–1.0 Gm.) a day. Syn., *carbasotic acid; trinitrophenol.* **a., pimentic,** see *eugenol.* **a., pipitzahoic, a., pipitzahoinic,** C_{18}-

$H_{20}O_3$, a purgative principle discovered by Rio de la Loza in species of *Peresia*, and also obtained from *Trixis radiale*. Used as a mild drastic. Dose 3–5 gr. (0.2–0.3 Gm.). **a., pivalic**, see *a., valeric, tertiary*. **a., plasminic**, a secondary nucleic acid obtainable from yeast. Is soluble in water and precipitates albumins in acid solution. Its phosphoric acid radical is capable of forming a true organic iron compound containing 1 % of iron. On decomposition with mineral acids by boiling it yields nucleic bases and phosphoric acid. **a., plumbic**, PbO_2, lead dioxide. **a., polybasic**, acids containing several carboxyl groups. **a., polychromic**, see *a., aloetic*. **a.-proof**, same as acid-fast, *q. v.* **a., propionic**, $C_3H_6O_2$, an oxidation-product of propylic alcohol; it is a clear, colorless liquid, with an odor like butyric and acetic acids, and a specific gravity of 1.013 at 0° C.; is miscible with water and boils at 141° C. **a., propionylsalicylic**, a compound obtained from salicylic acid by action of anhydrous propionic acid. Used in gout and rheumatism. **a., prussic**, see *a., hydrocyanic*. **a., pyridintricarboxylic, a., pyridintricarbonic**, $C_8H_5NO_6$, an oxidation-product of cinchona alkaloids; it is a white, crystalline powder, soluble in water and alcohol, and melting at 250° C. Is antipyretic, antiseptic, and antiperiodic; used in whooping-cough, typhoid and intermittent fevers, etc., and externally as an injection in urethral inflammation. Dose 10 gr. (0 6 Gm) 5 times daily. Syn., *carbocinchromeronic acid*. **a., pyro-**, an acid formed from another acid by action of heat. **a., pyroboric**, $H_2B_4O_7$, from boric acid by heat. **a., pyrogallic**, $C_6H_6O_3$, pyrogallol, formed by heating gallic acid with water to 210°. It forms white leaflets or needles, is readily soluble in water, less so in alcohol and ether. Useful in the treatment of certain skin diseases; is poisonous and must be used with caution. **a., pyroligneous**, crude acid obtained in the destructive distillation of wood. It is a clear liquid, of reddish-brown color and strong acid taste, with a peculiar penetrating odor described as empyreumatic, due largely to the furfurol it contains. It contains from 4 to 7 % of real acetic acid. **a., pyrophosphoric**, the dihydric phosphate, $2H_2O.P_2O_5$, one of the forms of phosphoric acid. It is poisonous. Its iron salt is used in medicine. The pure acid is a soft glassy mass. **a., pyrosorbic**, see *a., malesic*. **a., quinic**, $C_7H_{12}O_6$, from cinchona bark. **a., rheinic**, see *a., chrysophanic*. **a., ricinoleic**, $C_{18}H_{34}O_3$, the active principle of castor oil. **a., rosolic**, $C_{20}H_{16}O_3$, from rosanilin by action of nitric acid used as a dye and test for acids. **a., rutic**, same as *a., capric*. **a., rutinic**, $C_{27}H_{32}O_{16}$, the coloring principle of rue. **a., salicylacetic, a., salicyloacetic**, $C_9H_8O_5$ a reaction-product of sodium salicylate in a soda solution with sodium monochloracetate; soluble in boiling water and alcohol, slightly in cold water, ether, chloroform, and benzene. It is antiseptic and used in the same manner as salicylic acid. Syn., *acetosalicylic acid; salicyloxyacetic acid; salicylhydroxyacetic acid*. **a., salicylic**, $C_7H_6O_3$, occurs in the buds of *Spiræa ulmaria*, in the oil of wintergreen, and in other varieties of gaultheria. It forms either a white crystalline powder, or white prismatic and acicular prisms without odor or taste. It is soluble in water and in chloroform, and is antiseptic; it is used in the treatment of acute articular rheumatism and myalgia. Dose 5–20 gr. (0.3–1.3 Gm.), not exceeding 1 dr. (4 Gm.) daily. Syn., *orthooxybenzoic acid*. **a., salicylsulphonic, a., salicylsulphuric**, see *a., sulphosalicylic*. **a., salicyluric**, $C_9H_8(OH)NO_3$, a compound found in urine after taking salicylic acid, **a. of salts**, hydrochloric acid. **a., sarcolactic**. $C_3H_6O_3$, occurs in blood and in muscles, to which it gives their acid reaction, especially after the muscles have been in a state of activity. It is also found in urine in phosphorus-poisoning. **a., sclerotic, a., sclerotinic**, an acid found in ergot, of which it is one of the active principles. **a., scoparic**, see *scoparin*. **a. of sea-salt**, hydrochloric acid. **a., septic**, nitric acid. **a. solution**, see *solution*. **a., sphacelinic**, an acid, regarded as the constituent of ergot, which causes gangrene and develops the cachexia of that disease. **a., stearic, a., stearinic**, $C_{18}H_{36}O_2$, associated with palmitic and oleic acids as a mixed ether, in solid animal fats, the tallows. **a., stibious**, $SbCl_3$, a colorless, transparent mass, soluble in alcohol and carbon disulphate, and melting at 73.2° C. It is a caustic. Syn., *antimonious oxide of antimony; antimony trichloride*. **a., stibous**, $C_{18}H_{12}O_3$ (Gmelin), a crystalline substance obtained from oil of bitter almonds by action of fuming sulphuric acid. **a., succinic**, $C_4H_6O_4$, an acid obtained in the distillation of amber, and also prepared artificially. **a., sulphanilic**, $C_6H_4(NH_2).SO_3H$, obtained by heating anilin (1 part) with fuming H_2SO_4 (2 parts) to 180° until SO_3 appears. It crystallizes in rhombic plates which effloresce in the air. It is used as a reagent. **a., sulphazotized**, a class of acids formed from potassium nitrite by action of sulphurous acid. **a., sulphocarbolic**, $C_6H_5HSO_4$, phenyl bisulphate, formed by the union of phenol and sulphuric acid. Its salts, the sulphocarbolates, are used in medicine as intestinal antiseptics, etc. **a., sulphoindigotic, a., sulphoindylic**, see *a., indigosulphuric*. **a. s., sulphonic**, a class of acids of the general formula $Rn.(SO_2.OH)_n$ when Rn is a radical whose quantivalence is N. Such acids are derived from sulphuric acid by the substitution of a radical for hydroxyl; or they may be regarded as acid sulphites derived from sulphurous acid, H_2SO_3, by the replacement of half of its hydrogen by a basic radical. **a., sulphonilic**, see *a., sulphanilic*. **a., sulphophenic**, see *a., sulphocarbolic*. **a., sulphophenolic**, same as *phenolsulphonic acid*. **a., sulphosalicylic**, $C_7H_6SO_6$, an acid obtained from salicylic acid by the action of sulphuric anhydride, occurring as white crystals, soluble in water and alcohol, melting at 120° C., and colored an intense violet-red by ferric chloride. It is used as a test for albumin in urine. Syn., *salicylsulphonic acid*. **a., sulphothiocarbonic**, see *a., xanthogenic*. **a., sulphuric**, H_2SO_4, a heavy, oily, corrosive acid, consisting of not less than 92.5 % sulphuric anhydride and 7.5 % of water. It is used as a reagent and as a caustic. Syn., *oil of vitriol*. **a., sulphuric aromatic**, contains 20 % acid, diluted with alcohol and flavored with cinnamon and ginger. It is used as an astringent in diarrhea and in night-sweats; also in hemoptysis. Dose 5–15 min. (0.32–1.0 Cc.). **a., sulphuric, dilute**, contains 10 % strong acid to 90 % of water. It is used as an astringent. Dose 10–15 min. (0.65–1.0 Cc.), well diluted. **a., sulphuric, fuming**, $H_2SO_4.SO_3$, an oily liquid, fuming in the air, obtained by roasting ferrous sulphate. Syn., *Nordhausen oil of vitriol; Nordhausen acid*. **a., sulphurous**, H_2SO_3, a colorless acid containing

about 6.4 % of sulphurous anhydride in 93.6 % of water. The gas, SO_2, is a valuable disinfectant. The acid is used as a spray or lotion in diphtheria, stomatitis, and as a wash for indolent and syphilitic ulcers. The various hyposulphites are mainly valuable in that they decompose and give off sulphur dioxide. Dose 5 min.–1 dr. (0.32–4.0 Cc.). **a., sulphydric,** see *a., hydrosulphuric.* **a., sumbulic, a., sumbulolic,** see *a., angelic.* **a., sylvic,** $C_{20}H_{16}O_2$, from resin. **a., tannic,** $C_{14}H_{10}O_9$, an astringent acid from nutgalls, occurring in yellowish, scaly crystals. It is soluble in water and alcohol. It is an antidote in poisoning by alkaloids and tartar emetic, and is used as an astringent in catarrh of mucous membranes, and externally in many skin diseases and burns. Dose 1–20 gr. (0.065–1.3 Gm.). Syn., *tannin.* (For preparations of *tannic acid* see respective headings.) **a., tanningenic, a., tanningic,** see *catechin.* **a., tartaric,** $H_2C_4H_4O_6$, an astringent acid widely distributed in the vegetable world, occurring principally in the juice of the grape, from which it deposits after fermentation in the form of acid potassium tartrate (argol). It is chiefly employed in refrigerant drinks and in baking-powders; 20 gr neutralize 27 of potassium bicarbonate, 22 of sodium bicarbonate, and 15½ of ammonium carbonate. Dose 10–30 gr. (0.65–2.0 Gm.). **a., tartaric, inactive,** see *a., mesotartaric.* **a., taurocholic,** $C_{26}H_{45}NSO_7$, occurs in bile; it is very soluble in water and alcohol and crystallizes in fine needles. **a., telluric,** $H_2TeO_4 + 2H_2O$, the dibasic acid of tellurium. **a., tetraboric,** $H_2B_4O_7$, boric acid heated to 160° C., forming a glassy mass. Syn., *pyroboric acid.* **a., tetrathiodichlorsalicylic,** $(S_2.C_6HCl[OH]COOH)_2$, obtained from salicylic acid by the action of sulphuryl chloride, and heat; it occurs as a reddish-yellow powder, soluble in aqueous alkalies. It is antiseptic and used as a dusting-powder. **a., thiacetylenic,** see *a., thioacetic.* **a., thio-,** an acid in which sulphur is substituted for oxygen. **a., thioacetic,** C_2H_4OS, a clear, pungent, sour liquid with a sulphureted hydrogen odor, obtained from glacial acetic acid and phosphorus pentasulphide. It is used as a substitute for sulphureted hydrogen in analysis. Syn., *ethanethiolic acid; thiacetylenic acid; thiacetic acid; acetosulphuric acid.* **a., thiolinic,** a dark mass, consisting of linseed oil and sulphur dioxide, used in skin diseases. Syn., *sulphurated linseed oil; thiolin.* **a., thioncarbonthiol,** see *a., xanthogenic.* **a., thiosalicylic,** $C_7H_6SO_2$, a brownish-yellow mass obtained from amidobenzoic acid by the successive action of nitrous acid and sulphureted hydrogen; a surgical antiseptic. **a., trichloracetic,** $HC_2Cl_3O_2$, an acid formed from acetic acid, 3 atoms of the hydrogen of which are, in the new acid, replaced by chlorine. It is used as a reagent for the detection of albumin in the urine and as a caustic. **a., trichlorcarbolic, a., trichlorphenic,** see *trichlorphenol.* **a., tricyanic,** $H_3C_3N_3O_3$, obtained from tricyanogen chloride by boiling it with water and alkalies. It crystallizes from aqueous solution with two molecules of water in large rhombic prisms; soluble in 40 parts of cold water; easily soluble in hot water and in alcohol. Syn., *cyanuric acid.* **a., trimethacetic, a., trimethylacetic, a., trimethylcarbincarbonic,** see *a., valeric, tertiary.* **a., tropic,** $C_9H_{10}O_3$, from atropine. **a., tumenolsulphonic,** a substance obtained from tumenol by action of fuming sulphuric acid; used as a dusting-powder. **a. s. uramic,** a series of carbamide—CONH— compounds occurring in the urine after the ingestion of amido-acids. They comprise methylhydantoic acid, taurocarbamic acid, uramidobenzoic acid, and tyrosinhydantoinic acid or hydantoin hydroparacumaric acid. They are found after the ingestion of sarcosin or methylglycocoll, of taurin, amidobenzoic acid, and tyrosin respectively. **a., ureous,** see *xanthin.* **a., uric,** $C_5H_4N_4O_3$, an acid found in the urine of all animals, especially man and the carnivora,—rarely in the herbivora,—abundantly in the excrement of birds, reptiles, and mollusks. It exists usually in combination with the metals of the alkaline group. It is separated from urine by adding hydrochloric acid and allowing the crystals to settle. **a. of urine.** 1. Phosphoric acid. 2. Uric acid. **a., urobenzoic,** see *a., hippuric.* **a., urocanic, a., urocaninic,** $C_6H_6N_2O_2 + 2H_2O$, from dogs' urine. **a., uroproteic,** $C_{68}H_{116}N_{20}SO_{24} + nH_2O$, from dogs' urine. **a., valeric, a., valerianic,** $C_5H_{10}O_2$, is formed by oxidizing normal amyl-alcohol. It is a mobile liquid with caustic acid taste and the pungent smell of old cheese. **a., valeric, active,** see *a., methylethylacetic.* **a., valeric, normal,** $CH_3(CH_2)_3CO_2H$, an isomer of valeric acid, first prepared by Lieben and Rossi from pentonitril (C_4H_9CN); it is a liquid with odor of normal butyric acid, boiling at 186° C., melting at 59° C. Sp. gr., 0.9568 at 0° C. Syn., *pentoic acid; normal propylacetic acid; isobutyl carbonic acid.* **a., valeric, tertiary,** $(CH_3)_3C.CO_2H$, a fatty crystalline acid containing a tertiary alcohol radical, discovered by Butlerow, who obtained it synthetically from tertiary butyl alcohol; melts at 35° C.; boils at 163° C. Syn., *pivalic acid; trimethylacetic acid; pseudovaleric acid; trimethacetic acid; pinalic acid; trimethylcarbincarbonic acid.* **a., veratric,** $C_9H_{10}O_4$, occurs with veratrine in sabadilla seeds; soluble in water and alcohol. **a., viburnic,** ordinary valeric acid discovered in *Viburnum opulus.* **a. s., vinic,** acids obtained from alcohol by action of acids. **a., vitriolic,** sulphuric acid. **a., xanthogenic,** HO.CS.SH, an acid not existing in the free state; the xanthates are obtained from it. Syn., *sulphothiocarbonic acid; thioncarbonthiol acid.* **a. s., xanthoproteic,** nitrogenous substances obtained from solutions of proteids by action of nitric acid. **a., xanthylic,** a primary nucleic acid yielding xanthin on decomposition. **a., yeast-nucleic,** $C_{40}H_{59}N_{16}O_{22}.2P_2O_5$, a primary nucleic acid occurring in yeast; it contains a carbohydrate group, as Kossel was able to obtain from it a hexose and a pentose.

acida (*as'-id-ah*) [L.]. Plural of *acidum, q. v.*

acidalbumin (*as-id-al-bu'-min*). A proteid acted upon or dissolved in the stronger acids, and yielding an acid reaction.

acidaminuria (*as-id-am-in-ū'-re-ah*). The presence of an excess of amino-acids in the urine when voided.

acidemia (*as-id-e'-me-ah*). A condition of decreased alkalinity of the blood.

acid-fast (*as'-id-fast*). Not easily decolorized by acids when stained.

acidifiable (*as-id-i-fī'-a-bl*) [*acidum*, acid; *fieri*, to become]. Capable of becoming sour.

acidifiant (*as-id-if'-i-ant*). See *acidifiable.*

acidification (*as-id'-if-ik-a-shun*) [*acidum*, acid; *facere*, to make]. Conversion into an acid; the process of becoming sour.

acidify (*as-id'-if-i*). 1. To convert into an acid. 2. To render sour, to acidulate.

acidimeter (*as-id-im'-et-er*) [*acidum*, acid; *μέτρον*, a measure]. An instrument for performing acidimetry.

acidimetric (*as-id-e-met'-rik*). Pertaining to acidimetry.

acidimetry (*as-id-im'-et-re*) [see *acidimeter*]. Determination of the free acid in a solution by an acidimeter or by chemical reactions.

acidism (*as'-id-izm*). Same as *acidosis, q. v.*

acidity (*as-id'-it-e*) [*acidum*, acid]. The quality of being acid; sourness; excess of acid.

acidity of the stomach, sourness of the stomach due to oversecretion of acid or to fermentation of the food.

acidol (*as'-id-ol*). Trade name of betaine hydrochloride, $C_5H_{11}NO_2Cl$.

acidology (*as-id-ol'-o-je*) [*ἀκίς*, a bandage, a point; *λόγος*, a treatise]. The science of surgical appliances.

acidometer (*as-id-om'-et-ur*). See *acidimeter*.

acidometric (*as-id-o-met'-rik*). See *acidimetric*.

acidometry (*as-id-om'-et-re*). See *acidimetry*.

acidophil, acidophile (*as-id'-o-fil*) [*acidum*, acid; *φίλος*, loving]. 1. Susceptible of imbibing acid stains. 2. A substance having an affinity for acid stains.

acidophilus milk (*as-id-off'-il-us*). Milk fermented with cultures of *Lactobacillus acidophilus*.

acidosis (*as-id-o'-sis*) [*acidum*, acid]. Acid intoxication caused by an abnormal production of acids in the body and their faulty elimination.

acidosteophyte (*as-id-os'-te-o-fīt*) [*ἀκίς*, a point; *osteophyte*]. A sharp, or needle-shaped, osteophyte.

acidoxyl (*as-id-oks'-il*). A compound of an acidyl or acid radical with oxygen.

acid-proof (*as'-id-prūf*). Same as *acid-fast, q. v.*

acidulate (*as-id'-u-lāt*). To render acid or sour.

acidulated (*as-id'-u-la-ted*). Somewhat sour or acid.

acidulous (*as-id'-u-lus*) [see *acidulated*]. Moderately sour.

acidulum (*as-id'-u-lum*) [L. dim of *acidum*]. An acid salt.

acidum (*as'-id-um*) [L.]. See *acid*.

aciduric (*as-id-ū'-rik*). Referring to bacteria which can grow in an acid medium, but which grow better in an alkaline medium.

acidyl (*as'-id-il*). The radical of an organic acid, particularly those hydrocarbons of the formula C_nH_{2n+3}.

acidylated (*as-id'-il-a-ted*). Combined with the residue of a fatty acid (acidyl).

acies (*a'-se-ēz*) [*acies*, edge]. Edge, border.

acinesia (*as-in-e'-ze-ah*). See *akinesia*.

acinesic, acinetic. See *akinetic*.

acinetatrophia (*as-in-et-at-ro'-fe-ah*) [*acinesis; atrophia*]. Atrophy due to lack of exercise.

acini (*as'-in-i*) [L.]. Plural of *acinus, q. v.*

aciniform (*as-in'-if-orm*) [*acinus*, a grape]. Grape-like.

acinose (*as'-in-ōs*). See *acinous*.

acinotubular (*as-in-o-tu'-bu-lar*). Applied to a gland or any structure having tubular acini or secreting sacs.

acinous, acinic (*as'-in-us, as-in -ik*). 1. Relating to an acinus or having acini. 2. Resembling a grape or a cluster of grapes; composed of granular concretions.

acinus (*as'-in-us*) [*acinus*, a grape; pl., *acini*]. Any one of the smallest lobules of a compound gland.

acitrin (*as'-it-rin*). Trade name of the ethyl ester of phenyl-cinchoninic acid.

aciurgia (*as-e-er'-je-ah*), or **aciurgy** (*as'-e-er-je*) [*ἀκίς*, point; *ἔργειν*, to work]. Operative surgery.

ackee (*ak'-e*). The fruit of *Blighia sapida*, a tree common in Jamaica. When eaten unripe it gives rise to poisoning, known as the "vomiting sickness of Jamaica."

acladiosis (*ah-kla-de-o'-sis*). A dermatomycosis due to the presence of the *Acladium castellanii*.

aclastic (*ak-las'-tik*). Not refracting.

acleidian (*ah-kli'-de-an*) [*ἀ*, priv.; *κλείς*, the collarbone]. Without clavicles.

acleitocardia (*ah-kli-to-kar'-de-ah*) [*ἀ*, priv.; *κλείειν*, to close; *καρδία*, the heart]. Imperfect closure of the foramen ovale.

acmastic (*ak-mas'-tik*) [*acme*]. Pertaining to disease with regular increase and decrease. (*Epacmastic;* first period. *Paracmastic;* period of decline.)

acme (*ak'-me*) [*ἀκμή*, a point]. 1. The highest point. 2. The crisis or critical stage of disease. 3. Acne; an acne papule; a wart.

acmon (*ak'-mon*) [*ἄκμων*, an anvil]. The incus.

acne (*ak'-ne*) [*ἀκμή*, a point]. A common, usually chronic, inflammatory disease of sebaceous glands, occurring mostly about face, chest, back. Lesions may be papular, pustular, tubercular. Occurs usually between ages of puberty and 24 years, generally worse in winter, and associated with menstrual and gastrointestinal troubles. Individual lesions consist of minute pink, acuminate papules or pimples, in center of which is black-topped comedo (*a. punctata, a. papulosa*). Syn., *acne varus; acne vulgaris; whelk; stone pock; acne boutonneuse; acné éruptive.* **a., adenoid**, see *lupus, disseminated follicular.* **a. adolescentium**, synonym of *a. vulgaris.* **a. agminata**, see *a. coagminata.* **a. albida**, synonym of *milium.* **a., arthritic**, a form common in adults, especially in women at the climacteric, and thought to be connected with the arthritic diathesis. **a. artificialis**, that form that disappears when the cause is removed. **a. atrophica**, synonym of *a. varioliformis.* **a., bromine**, see *a. coagminata.* **a. cachecticorum**, a form occurring in debilitated, cachectic persons after prolonged wasting diseases, as phthisis. The eruption occurs usually on the trunk or legs, and is characterized by flat, dull-red papules and pustules of the size of a pin-head to that of a lentil. **a. cheloidienne**, see *dermatitis papillaris capillitii.* **a., chlorine**, a form occurring among men engaged in manufacturing hydrochloric acid. The skin of the face is pigmented, comedones and pustules of varying size are thickly scattered over the face, brow, scalp, neck, back, upper thorax, genitals, and inner surface of the thighs. Atheromata and curious cornifications resembling those of Darier's disease are present on the scalp. **a. ciliaris**, acne at the edges of the eyelids. **a. coagminata**, a form in which the lesions occur in clusters. The name is generally applied to the acne due to the internal use of bromine or its compounds; the groups of closely aggregated pustules form thick patches covered with scabs of dried pus, presenting beneath a dusky red and often moist surface. **a., concrete**, see *seborrhœa sicca.* **a., congestive**, see *a. rosacea.* **a. contagiosa**, an incoulable pustular disease of horses, said to differ from horse-pox. **a. cornea**, conic, discolored outgrowths, grouped or solitary, consisting of hard plugs of sebaceous matter projecting from the follicles. Syn.,

ichthyosis follicularis. **a. decalvans,** an inflammatory disease of hair-follicles with destruction of the hairs and atrophy or cicatrization of the skin. **a. disseminata,** synonym of *a. vulgaris.* **a., elephantiasic,** see *a., hypertrophica.* **a. erythematosa** see *a. rosacea.* **a., fluent,** see *seborrhœa oleosa.* **a. frontalis,** see *a. varioliformis.* **a. generalis,** acne that has become general over the surface of the body. **a. granulosa,** see *a. cachecticorum.* **a. hordeolans, a. hordeolaris,** a form with the pustules arranged in linear groups. **a. hypertrophica,** a stage of acne rosacea in which there is a permanent, intensely red, non-inflammatory, nodulated thickening of the tips and sides of the nose, expanding it both laterally and longitudinally. **a. indurata,** a variety of acne vulgaris characterized by chronic, livid indurations, the result of extensive perifollicular infiltration. It is especially seen in strumous subjects. **a., iodine,** acne due to the prolonged use of an iodide. **a. keratosa,** a rare form in which a horny plug takes the place of the comedo, and by its presence excites inflammation. **a. luposa,** see *a. telangiectodes.* **a. medicamentosa,** acne due to the internal administration of certain drugs—as iodine, bromine, etc. **a. mentagra,** see *sycosis.* **a. miliaris.** 1. Milium. 2. A pustular variety of acne rosacea. **a., miliary arthritic,** see *a. cachecticorum.* **a., miliary scrofulous,** a variety of the disease usually occurring on the forehead; the pustules are small, discrete, or confluent, and often arranged in geometric figures. **a. molluscoidea, a. molluscum,** see *molluscum contagiosum.* **a. necrotica,** see *a. varioliformis.* **a. pancreat'ica,** small cysts in the pancreas due to obstructions of the smaller ducts. **a. papulosa,** see *acne.* **a., penicilliform,** see *tinea asbestina.* **a. picealis,** a form of dermatitis common in fiber-dressers who work with paraffin and in persons otherwise brought in contact with tar or its vapor. It involves chiefly the extensor surfaces of the limbs. Syn., *tar acne.* **a., pilous,** a variety in which the pustules involve the hair-bulbs **a., pilous, umbilicated,** a variety in which each pustule is umbilicated and pierced by a hair. **a. punctata,** a variety of acne vulgaris. **a. punctata albida,** see *milium.* **a. pustulosa,** a variety of acne vulgaris characterized by abscesses. **a. rhinophyma,** same as *a. hypertrophica.* **a. rodens,** synonym of *a. varioliformis.* **a. rosacea,** a chronic hyperemic or inflammatory affection of the skin, situated usually upon the face, especially the nose, cheeks, forehead, and chin. Syn., *rosacea; telangiectasis faciei; nævus araneus; brandy nose; whisky nose; spider nevus; spider cancer.* **a. rosacea congestiva,** see *a. hypertrophica.* **a., scorbutica,** acne associated with scurvy. **a. scrofulosa,** a variety of acne cachecticorum, occurring in strumous children. **a. sebacea,** synonym of *seborrhea.* **a. sebacea cornea,** see *Darier's disease.* **a. sebacea molluscum,** see *atheroma.* **a., sebaceous, crusty,** see *seborrhœa sicca.* **a., sebaceous, dry, a. sebacea exsiccata,** see *xeroderma.* **a., sebaceous, fluent,** see *seborrhœa oleosa.* **a. simplex,** a variety of acne vulgaris. **a. solaris,** a form due to exposure to the sun, marked by red papules that seldom suppurate, occurring on the nose, lower eyelids, and cheeks. **a. sycosiformis,** same as *sycosis non-parasitica.* **a., syphilitic, a. syphilitica,** a form with inflammation in the follicles, appearing in scattered, pointed pustules with copper-colored base. Syn., *acneiform syphiloderm.* **a. tarsi,** an inflammatory affection of the large sebaceous glands of the eyelashes (Meibomian glands). **a. telangiectodes, a. teleangeiectodes,** Kaposi's name for a nonpustular disease having its origin in the hair-follicles and presenting smooth, shining, circumscribed, hemispheric nodules, pale-pink to brownish-red in color, from a pinhead to a cherry-stone in size. Epithelial cyst formation and degeneration of the hair-follicle attend it. Syn., *disseminated follicular lupus simulating acne; acne luposa; lupus miliaris; lupus follicularis acneiformis; acute disseminated nodular tuberculous lupus.* **a. tuberata, a. tuberculosa,** see *a. indurata.* **a., tuberculoid, a., tuberculous, umbilicated, a. umbilicata,** see *molluscum contagiosum.* **a., varicose,** a form characterized by dilated superficial capillaries. **a. varioliformis,** a somewhat rare disease, situated chiefly about the forehead, at the junction with the hairy scalp, and extending into the hair. The pustules appear in groups. Its etiology is unknown. **a. vulgaris,** see *acne.*

acneform, acneiform (*ak'-ne-form, ak-ne'-e-form*). Resembling acne.

acnemia (*ak-ne'-me-ah*) [ἀ, priv.; κνήμη, leg]. 1. Deficiency in the calf of the leg. 2. A condition marked by total absence of legs.

acnemous (*ak'-ne-mus*) [ἀ, priv.; κνήμη, leg]. Having imperfect calves; having no legs.

acnitis (*ak-ni'-tis*) [ἀκμή, a point; ῖτις, inflammation]. See *hydrosadenitis phlegmonosa.*

Acocanthera (*ak-o-kan-the'-ra*) [ακωκή, a point; ἀνθηρός, blooming]. A genus of plants of the order *Apocynaceæ. A. abyssinica* yields an African arrow-poison, *mshangu,* secured from a decoction of the branches, the toxic property being due to a crystalline glucosid, $C_{39}H_{46}O_{12}$. *A. deflersii* and *A. schimperi* are used as arrow-poisons in Africa. The poisonous principles are crystalline glucosides. *A. venenata* is a species indigenous to southern Africa; a decoction of the bark is used by the natives to poison arrows. The poisonous principle is a glucoside, *acocantherin,* similar to or identical with *ouabain.*

acocantherin (*ak-o-kan'-ther-in*). A glucoside found in Acocanthera, *q. v.*

acœlius (*ah-se'-le-us*). See *acelius.*

acœsis (*ak-o-e'-sis*). See *audition.*

acognosia (*ak-og-no'-ze-ah*) [ἄκος, remedy; γνῶσις, knowledge]. A knowledge of remedies or therapeutics. See *aceognosia.*

acography (*ak-og'-raf-e*) [ἄκος, a remedy; γράφειν, to write]. A description of remedies.

acoin (*ak'-o-in*). Hydrochloride of diparaanysilmonoparaphenetylguanidin, a white powder, used in infiltration anesthesia by Schleich's method in a 1:1000 solution of 0.8 % solution of sodium chloride; also in 1 % aqueous solution in ophthalmology.

acolasia (*ak-o-la-ze-ah*) [ἀκολασία, intemperance]. Unrestrained self-indulgence; lust; intemperance.

acolastic (*ak-o-las'-tik*) [ἀκολασία, intemperance]. Due to, or characterized by, acolasia.

acology (*ak-ol'-o-je*) [ἄκος, remedy; λόγος, a discourse]. *Aceology, q. v.*

acolous (*ah-ko'-lus*) [ἀ, priv.; κῶλον, limb]. Having no limbs.

acomia (*ah-ko'-me-ah*) [ἀ, priv.; κόμη, hair]. Baldness. A deficiency of hair arising from any cause.

acomous (*ah-ko'-mus*) [ἀ, priv.; κόμη, hair]. Hairless, bald.

aconine (*ak'-o-nin*). $C_{36}H_{59}NO_{11}$. A decomposition product of aconitine.

aconite (*ak'-on-īt*). See *aconitum*.

aconitia (*ak-o-nish'-e-ah*). Aconitine or aconitina.

aconitic acid (*ak-on-it'-ik*). See *acid, aconitic*.

aconitin (*ak-on'-it-in*). See *aconitine*.

aconitina (*ak-on-it-i'-nah*). 1. See *aconitine*. 2. An impure aconitine or combination of principles obtained from the root of *Aconitum napellus*, as prepared by Morson. Its salts do not crystallize, but form gum-like masses.

aconitine (*ak-on'-it-ēn*), $C_{33}H_{45}NO_{12}$, *aconitina* (U. S. P.). An intensely poisonous alkaloid from *Aconitum napellus* and other species; it occurs as white, flat crystals of slightly bitter taste. Dose $\frac{1}{100}$ gr. (0.0003 Gm.). Syn., *aconiticum; aconitinum*. **a., amorphous**, a mixture of several bases found in the bulbs of *Aconitum napellus*. Its principal constituents are aconitine and picroaconitine. It is 15 or 20 times less poisonous than pure crystallized aconitine. **a., British**, $C_{34}H_{47}NO_{12}$ (Wright), the alkaloid prepared by Morson from *Aconitum ferox*. It is a yellowish-white, crystalline powder. Dose $\frac{1}{100}$ gr. (0.0002 Gm.). Also called *English aconitine; acraconitine; Morson's napelline or pure aconitine; Hubschmann's pseudaconitine; Flückiger's nepaline*. **a., Duquesnel's**, see *a. nitrate*. **a. hydrobromide**, $C_{33}H_{43}NO_{12}HBr + 2\frac{1}{2}H_2O$ (Jürgens), from crystalline aconitine, occurring as small white tablets, soluble in water and alcohol. Dose the same as the crystalline alkaloid. **a. hydrochloride**, $C_{33}H_{43}NO_{12}HCl + 3H_2O$ (Jürgens), a white, crystalline powder from crystalline aconitine, soluble in water and alcohol. Dose about the same as the alkaloid. Syn., *aconitine chlorhydrate; aconitine hydrochlorite*. **a. nitrate**, $C_{33}H_{43}NO_{12}HNO_3$, fine white prisms or rhombic crystals; it is highly poisonous and is used in neuralgia and rheumatism. Dose about the same as the alkaloid. Syn., *Duquesnel's aconitine*. **a. phosphate**, a salt of aconitine. It occurs as a white, crystalline powder or as a yellowish-white, amorphous powder. **a. salicylate**, a salt of aconitine occurring as a white, crystalline powder or as a yellowish-white, amorphous powder. **a. sulphate**, $(C_{33}H_{45}NO_{12})_2H_2SO_4$, a salt of aconitine occurring as a crystalline powder, in glass-like lumps, or as a yellowish-white, amorphous powder.

aconitum (*ak-on-i'-tum*) [L.]. The root of *Aconitum napellus*. It possesses a bitter, pungent taste, and produces numbness and persistent tingling in the tongue and lips. Is very poisonous. It depresses the heart, respiration, circulation, and paralyzes the sensory nerves. Is antipyretic, diaphoretic, and diuretic. The active principle is *aconitine*. As a diaphoretic and depressant to the circulation it is highly beneficial in fevers, acute **throat** affections, and inflammation of the respiratory organs. Dose $\frac{1}{2}$–2 gr. (0.03–0.13 Gm.). **a. aconiti, abstractum**, has double the strength of the powdered drug or its fluid extract. Dose $\frac{1}{2}$–1 gr. (0.016–0.065 Gm.). **a., extractum**. Dose $\frac{1}{6}$–$\frac{1}{3}$ gr. (0.011–0.022 Gm.). **a., fluidextractum** (U. S. P.), has a strength of 1 drop to the grain of the powdered drug. Dose $\frac{1}{2}$–2 min. (0.03–0.13 Cc.). **a., linimentum** (B. P.), aconite root, camphor, and rectified spirit. **a., oleatum**, a 2% solution of aconite in oleic acid. **a., tinctura** (U. S. P.), contains aconite 10, alcohol and water each sufficient to make 100 parts. Dose 10 min. (0.6 Cc.). **a., unguentum** (B. P.), 8 grains to the ounce.

aconuresis (*ah-kon-u-re'-sis*) [ἀ, priv.; *conari*, to strive; οὔρησις, urination]. Involuntary discharge of urine.

acoprosis (*ah-kop-ro'-sis*) [ἀ, priv.; κόπρος, excrement]. Deficient formation of feces.

acoprous (*ah-kop'-rus*). Characterized by the absence of excrement in the bowels.

acopyrine (*ak-o-pi'-rin*). A combination of aspirin and antipyrine; it is used in rheumatism. Dose, 0.5 gm. 5 or 6 times daily.

acor (*a'-kor*) [L.]. Acrimony: acidity, as of the stomach.

acorea (*ah-ko-re'-ah*) [ἀ, priv.; κόρη, pupil]. Absence of the pupil.

acoria (*ah-ko'-re-ah*) [ἀ, priv.; κόρος, satisfaction]. 1. A greedy or insatiable appetite. 2 Temperance in eating. 3. A nervous stomach affection characterized by a sense of fulness.

acorin (*ak'-o-rin*). A bitter glucoside obtained from *Acorus calamus*, or sweet flag.

acormus (*ah-kor'-mus*) [ἀ, priv.; κορμός, the trunk]. A monster without a trunk or body.

acorus (*ak'-o-rus*). See *calamus*.

acosmia (*ah-kos'-me-ah*) [ἀ, priv.; κόσμος, order]. 1. Poor health. 2. Irregularity in the course of a disease. 3. Ataxia. 4. Baldness. 5. Any deformity causing irregularity of the features. Syn., *acosmy*.

acoulalion (*ah-koo-la'-le-on*). An instrument used in teaching speech to deaf-mutes.

acoumeter, acouometer (*ah-koo'-me-ter, ah-koo-om'-e-ter*) [ἀκούειν, to hear; μέτρον, a measure]. 1. An instrument for measuring the acuteness of hearing. 2. An instrument arranged to give a typical sound of a vowel, which may be used as a standard to which other sounds may be referred.

acoumetric, acoumometric (*ah-koo-met'-rik, ah-koo-mo-met'-rik*). Pertaining to the auditory sense or to the power of estimating the relative distance of sounds. Syn., *acusmetricus; acusmometricus*.

acoumetry (*ah-koo'-met-re*) [ἀκούειν, to hear; μέτρον, a measure]. The measurement or testing of the acuteness of the hearing.

acouophony (*ah-koo-of'-on-e*) [ἀκούειν, to hear; φωνή, sound]. Same as auscultatory percussion.

acouoxylon (*ah-koo-oks'-il-on*) [ἀκούειν, to hear; ξύλον, wood]. A wooden (pine) stethoscope.

acouphone (*ah-koo'-fōn*) [ἀκούειν, to hear; φωνή, sound]. A mechanism to aid defective hearing.

acousia (*ah-koo'-se-ah*) [ἀκουσία, constraint]. 1. Involuntary action. 2. The faculty of hearing; audition.

acousma (*ah-koos-* or *kows'-mah*) [ἀκουσμα, thing heard; pl., *acousmata*]. An auditory hallucination; a condition in which imaginary sounds are noticed by the patient, are believed by him to be real.

acousmatagnosis (*ah-koos-mat-ag-no'-sis*). Inability to memorize sounds.

acousmatamnesia (*ah-koos-mat-am-ne'-se-ah*). Inability to remember sounds.

acousmetric (*ah-koos-met'-rik*). See *acoumetric*.

acoustic (*ah-koos'-tik*, or *a-kows'-tik*) [ἀκουστικός]. Relating to the ear or science of sound. **a. duct**, the external meatus of the ear. **a. nerve**, the eighth cranial nerve. **a. tetanus**, the rapidity of the induction shocks in a frog's nerve-muscle preparation, as measured by the pitch of a

vibrating rod. **a. tubercle,** a rounded elevation on either side of the floor of the fourth ventricle.

acousticon (*ah-koos'-tik-on*). An ear-trumpet.

acoustics (*ah-koos'-tiks* or *a-kows'-tiks*). The science of sound.

acquired (*ak-wīrd*). Pertaining to some habit, disease, etc. which is not congenital.

acquired character. A change in one or more organs of the body which has occurred during the lifetime of the individual, and which is due to disease, or use, or misuse of the organ or organs so affected.

acquired movements (*ak-wi'-erd moov'-ments*). Those brought under the influence of the will only after conscious and attentive effort and practice, in distinction from reacquired movements, those reinstated in their former proficiency after injury to the motor regions of the brain.

acracholia (*ak-ra-ko'-le-ah*) [ἀκρᾰχολία]. A fit of passion; passionateness.

acraconitine. See *pseudaconitine.*

acrania, acranial (*ah-kra'-ne-ah, ah-kra'-ne-al*) [ἀ, priv.; κρανίον, skull]. The condition of a monster with partial or complete absence of the cranium.

acranius (*ah-kra'-ne-us*) [ἀ, priv.; κρανίον, cranium]. A monster wholly or partly destitute of cranium.

acrasia (*ah-kra'-ze-ah*) [ἀ, priv.; κρασις, moderation]. 1. Intemperance; lack of self-control. 2. Acratia.

acratia (*ah-kra'-she-ah*) [ἀκράτειν: ἀ, priv.; κράτος, force]. Impotence, loss of power.

acraturesis (*ah-krat-u-re'-sis*) [ἀκράτεια, lack of strength; οὔρησις, micturition]. Inability to micturate from atony of the bladder.

Acree-Rosenheim formaldehyde reaction in testing for proteins. Put a few drops of a solution of formaldehyde (1:5000) in a solution of protein and mix well. After 2–3 minutes allow a little concentrated sulphuric acid to flow into the test-tube slowly, so that the two solutions do not mix. A violet color appears at the line of contact.

Acrel's ganglion (*ak'-rel*) [Olaf *Acrel*, Swedish surgeon, 1717–1807]. Ganglion on the extensor tendons of the wrist.

acribometer (*ak-re-bom'-et-ur*) [ἀκριβής, accurate; μέτρον, a measure]. A device for measuring minute objects.

acrid (*ak'-rid*) [*acer*, sharp]. Pungent; irritating.

acridine (*ak'-rid-in*) [*acrid*], $C_{13}H_9N$. A substance with a very pungent odor, produced by heating anilin and salicylic aldehyde to 260° with $ZnCl_2$. It dissolves in dilute acids with a beautiful green fluorescence.

acriflavine (*ak'-re-fla-vēn*). See *flavine.*

acrimony (*ak'-rim-o-ne*) [*acrimonia*]. Irritation, pungency, corrosiveness; an acrid quality or state

acrinia (*ah-krin'-e-ah*) [ἀ, priv.; κρίνειν, to separate]. Diminution or suppression of a secretion or excretion.

acrinyl sulphocyanate (*ak'-rin-il*). An acrid and vesicating substance found in white mustard.

acrisia (*ah-kris'-e-ah*) [ἀ, priv.; *crisis*]. The absence of a crisis from a disease; an unfavorable crisis or turn in the course of an attack of disease.

acritical (*ah-krit'-ik-al*) [ἀ, priv.; κρίσις, a crisis]. Without a crisis; not relating to a crisis.

acritochromacy (*ah-krit-o-kro'-mas-e*) [ἄκριτος, undistinguished; χρῶμα, color]. Color-blindness, achromatopsia.

acroæsthesia. See *acroesthesia.*

acro-agnosis (*ak-ro-ag-no'-sis*) [ἄκρον, extremity; γνῶσις, knowledge]. Absence of sense perception in a limb.

acroanesthesia (*ak-ro-an-es-the'-ze-ah*) [ἄκρον, extremity; ἀναλσθησια, want of feeling]. Anesthesia of the extremities.

acroarthritis (*ak-ro-ar-thri'-tis*). Arthritis of the extremities.

acroasphyxia (*ak-ro-as-fiks'-e-ah*) [ἄκρον, extremity; ἀ, priv.; σφύξις, pulse]. Asphyxia of the extremities. Phenomenon of Raynaud.

acro-ataxia (*ak-ro-at-aks'-e-ah*) [ἄκρον, extremity; *ataxia*]. Impairment of the intrinsic muscles of the hands and feet, as distinguished from ataxia of the proximal muscles of the upper and lower extremities; see *proximo-ataxia.*

acroblast (*ak'-ro-blast*) [ἄκρον, extremity; βλαστός, a germ]. That part of the germinal membrane of the embryo which gives rise to blood-vessels filled with blood and probably connective tissue.

acrobystia (*ak-ro-bis'-te-ah*) [ἀκροβυστία, the foreskin]. 1. The prepuce. 2. Circumcision.

acrobystiolith (*ak-ro-bis'-te-o-lith*) [ἀκροβυστία, the prepuce; λίθος, a stone]. A preputial calculus.

acrobystitis (*ak-ro-bis-ti'-tis*). Inflammation of the prepuce.

acrocarpous (*ak-ro-kar'-pus*) [ἄκρον, extremity; καρπός, fruit]. In biology, fruiting at tips.

acrocephalia (*ak-ro-sef-a'-le-ah*) [ἄκρον, the summit; κεφαλή, the head]. Deformity of the head, the top of which is more or less pointed.

acrocephalic, acrocephalous (*ak-ro-sef'-al-ik, ak-ro-sef'-al-us*). Characterized by or affected with acrocephalia.

acrocephalosyndactylia (*ak-ro-sef-al-o-sin-dak-til'-e-ah*) [ἄκρον, the summit; κέφαλη, the head; *syndactylia*]. Congenital malformation consisting of a pointed top of the head and syndactylism of hands and feet.

acrocephaly (*ak-ro-sef'-al-e*) [ἄκρον, a point; κεφαλή, the head]. Same as *acrocephalia.*

acrocheir (*ak'-ro-kīr*) [ἄκρον, point; χείρ, hand]. The ends of the fingers considered together; the forearm and hand.

acrochordon (*ak-ro-kor'-don*) [ἀκροχορδών, literally, the end of a catgut cord]. A pedunculated wart. Synonym of *molluscum fibrosum.*

acrocinesis, acrocinetic. See *acrokinesis, acrokinetic.*

acrocontracture (*ak-ro-con-trak'-chūr*) [ἄκρον, extremity; *contracture*]. Contracture of the joints of one or both extremities.

acrocyanosis (*ak-ro-si-an-o'-sis*) [ἄκρον, extremity; κύανος, blue]. Blueness of the extremities due to vasomotor disturbance.

acrodermatitis (*ak-ro-der-mat-i'-tis*) [ἄκρον, extremity; δέρμα, skin; ιτις, inflammation]. Inflammation of the skin of an extremity. **a., perstans,** acrodermatitis which constantly recurs.

acrodigitalins (*ak-ro-dij'-it-al-ins*). Digitalis substances which do not possess the general characteristics of glucosides.

acrodont (*ak'-ro-dont*) [ἄκρον, summit; ὀδους, tooth]. A term applied to a tooth which is ankylosed by its root to a bony point.

acrodynia, acrodyny (*ak-ro-din'-e-ah, ak'-ro-din-e*) [ἄκρον, extremity; ὀδύνη, pain]. 1. Epidemic erythema; a disease closely allied to pellagra. Characterized mainly by pricking pains in the palm and soles, hyperesthesia followed by anesthesia of these parts, and an erythematous eruption, preceded by bullæ, chiefly on hands and feet. Followed by exfoliation and dark-brown or black pigmentation. Syn., *pedional-*

gia epidemica; erythema epidemicum. 2. Clarus' term for a rheumatic disorder of the nerves. 3. Multiple neuritis of the fingers or toes.

acroesthesia (*ak-ro-es-the'-ze-ah*) [*ἄκρος*, extreme; *ἄκρον*, extremity; *αἴσθησις*, sensation]. 1. Exaggerated sensitiveness or sensibility. 2. Pain in the extremities.

acrognosis (*ak-rog-no'-sis*) [*ἄκρον*, extremity; *γνῶσις*, knowledge]. Cenesthesis of the extremities.

acrokinesis (*ak-ro-kin-e'-sis*) [*ἄκρος*, extreme; *κίνησις*, movement]. Abnormal freedom of action, as in certain cases of hysteria.

acrokinetic (*ak-ro-kin-et'-ik*). Characterized by acrokinesis.

acrolein (*ak-ro'-le-in*) [*acer*, sharp; *oleum*, oil], C_3H_4O. Acrylic aldehyde. A colorless, mobile liquid, of pungent odor, derived from the decomposition of glycerol.

acromania (*ak-ro-ma'-ne-ah*) [*ἄκρος*, extreme; *μανία*, madness]. Incurable insanity.

acromastitis (*ak-ro-mas-ti'-tis*) [*ἄκρον*, extremity; *μαστός*, breast; *ιτις*, inflammation]. Inflammation of the nipple.

acromastium (*ak-ro-mas'-te-um*) [*ἄκρον*, extremity; *μαστός*, breast]. The nipple.

Acromatiaceæ (*ak-ro-mat-e-a'-se-e*). See table p. 839.

acromegaly, acromegalia (*ak-ro-meg'-a-le, ak-ro-me-ga'-le-ah*) [*ἄκρον*, extremity; *μεγάλη*, large]. A disease characterized by an overgrowth of the extremities and of the face, including the bony as well as the soft parts. The etiology is unknown. In a number of cases the pituitary body has been enlarged; disease of the thyroid gland has also been found in some instances. Also known as *Marie's disease.*

acromelalgia (*ak-ro-mel-al'-je-ah*). See *erythromelalgia.*

acrometagenesis (*ak-ro-met-ah-jen'-es-is*) [*ἄκρον*, extremity; *μέτα*, beyond; *γένεσις*, origin]. Undue growth of the extremities.

acromial (*ak-ro'-me-al*) [*ἄκρον*, the summit, *ὦμος*, the shoulder]. Relating to the acromion. **a. process,** the acromion.

acromicria (*ak-ro-mik'-re-ah*) [*ἄκρον*, extremity; *μικρός*, small]. Abnormal smallness of the extremities. A condition in which there is a reduction in the size of the nose, ears, and face, as well as hands and feet.

acromioclavicular (*ak-ro-me-o-kla-vik'-u-lar*) [*acromion; clavicle*]. Relating to the acromion and the clavicle.

acromiocoracoid (*ak-ro-me-o-kor'-ak-oid*). Pertaining to the acromion and the coracoid process.

acromiohumeral (*ak-ro-me-o-hu'-mer-al*) [*acromion; humerus*]. Relating to the acromion and the humerus. **a. muscle,** the deltoid.

acromion (*ak-ro'-me-on*) [*ἄκρον*, the summit; *ὦμος*, the shoulder]. The triangular-shaped process at the summit of the scapula.

acromiothoracic (*ak-ro-me-o-tho-ras'-ik*) [*acromion; θώραξ*, thorax]. Relating to the shoulder and thorax.

acromphalus (*ak-rom'-fal-us*) [*ἄκρον*, point; *ὀμφαλός*, the navel]. 1. The center of the umbilicus, to which the cord is attached. 2. The first stage of umbilical hernia, marked by a pouting of the navel. 3. The remains of the umbilical cord attached to the child.

acromyle (*ak-rom'-il-e*) [*ἄκρον*, point; *μύλη*, patella]. The patella.

acromyotonia (*ak-ro-mi-o-to'-ne-ah*) [*ἄκρον*, extremity; *myotonia*]. Myotonia of the extremities.

acronarcotic (*ak-ro-nar-kot'-ik*) [*acer*, sharp; *narcotic*]. 1. Both acrid and narcotic. 2. An agent which combines an irritating and obtunding effect; acting directly upon the peripheral nerves when applied externally, or upon the brain and spinal cord, producing paralysis, convulsions, and narcosis.

acroneurosis (*ak-ro-nū-ro'-sis*) [*ἄκρον*, extremity; *νεῦρον*, a nerve]. Any neurosis manifesting itself in the extremities.

acronychous (*ak-ron'-ik-us*) [*ἀκρόνυχος*]. Having claws, nails, or hoofs; achronychous.

acronyx (*ak'-ro-niks*) [*ἄκρον*, extremity; *ὄνυξ*, a nail]. Ingrowing of the nail.

acropachy (*ak-ro-pak-e*) [*ἄκρον*, extremity; *παχύς*, thick]. Synonym of acromegaly, *q. v.*

acroparalysis (*ak-ro-par-al'-is-is*) [*ἄκρον*, extremity; *παράλυσις*, palsy]. Paralysis of the extremities.

acroparesthesia (*ak-ro-par-es-the'-ze-ah*) [*ἄκρον*, extremity; *παρά*, around; *αἴσθησις*, sensation]. 1. Abnormal or perverted sensation in the extremities. 2. Extreme or confirmed paresthesia.

acropathology (*ak-ro-path-ol'-o-je*) [*ἄκρον*, extremity; *πάθος*, disease; *λόγος*, treatise]. The pathology of the extremities.

acropathy (*ak-rop'-a-the*) [*ἄκρον*, extremity; *πάθος*, disease]. Any disease of the extremities.

acrophobia (*ak-ro-fo'-be-ah*) *ἄκρον*, a height; *φόβος*, fear]. Morbid dread of being at a great height.

acroposthia (*ak-ro-pos'-the-ah*) [*ἄκρος*, extreme; *πόσθη*, foreskin]. The distal part of the prepuce.

acroposthitis (*ak-ro-pos-thi'-tis*) [*ἄκρος*, extreme; *πόσθη*, foreskin]. Inflammation of the prepuce. Posthitis.

acrorrheuma (*ak-ro-ru'-mah*) [*ἄκρον*, an extremity; *ῥεῦμα*, a flux]. Rheumatism of the extremities.

acroscleriasis (*ak-ro-skle-ri'-as-is*) [*ἄκρον*, extremity; *σκληρός*, hard]. Sclerotic changes in the extremities.

acroscleroderma (*ak-ro-skler-o-der'-mah*). See *sclerodactylia.*

acrose (*ak'-rōz*). A substance isolated from condensation-products of glycerose (an oxidation-product of glycerol) and formaldehyde, forming the starting-point for the synthesis of fruit-sugar, grape-sugar, and mannose.

acrosome (*ak'-ro-sōm*) [*ἄκρον*, extremity; *σῶμα*, body]. A small body at the front part of the head of the spermatozoon.

acrosphacelus (*ak-ro-sfas'-el-us*). Gangrene of the digits.

acrostealgia (*ak-ros-te-al'-je-ah*) [*ἄκρον*, extremity; *ὀστέον*, bone; *ἄλγος*, pain]. Pain in one or more of the bones of an extremity.

Acrostichum (*ak-ros'-tik-um*) [*ἄκρον*, a point; *στίχος*, a line of writing]. A genus of ferns of the order *Polypodiaceæ.* *A. aureum*, a tropical species; the rhizome is used in decoction for dysentery and disease of the spleen. A salt prepared from the leaves is applied to ulcers. *A. dicholomum*, an Arabian species [*medjabese* or *mejahoese*]; the leaves are applied to burns. *A. flavens*, a South American species, used as a laxative. *A. furcatum*, an Australian species having edible rhizomes. *A. huacsaro*, a Peruvian species. It is said to be sudorific and anthelmintic. *A. sorbifolium*, a West Indian species. The juice is mixed with oil, ginger, and pepper, and used as a cataplasm in sick headache.

acrosyl (*ak'-ro'sil*). Trade name of a saponified cresol preparation containing 50 to 55 % of cresols.

acrotarsium (*ak-ro-tar'-se-um*) [ἄκρον, the summit; ταρσός, the tarsus]. The instep.

acroteria (*ak-ro-te'-re-ah*) [ἀκρωτῆρια]. The extremities.

acroteriasis (*ak-ro-te-ri'-a-sis*) [ἀκρωτηριάζειν, to cut off the extremities]. Mutilation by the loss of an extremity, especially a hand or foot. In teratology, the absence of such a part.

acroteriasmus (*ak-ro-te-ri-as'-mus*). Same as *acroteriasis*.

acroteric (*ak-ro-ter'-ik*) [ἀκρωτήρια, the extremities]. Relating to the extremities; applied to conditions in which the extremities are most affected.

acrothymion, or acrothymum (*ak-ro-thi'-me-on ak-ro-thi'-mum*) [ἄκρον, summit; *thyme*]. A rugose wart with a broad top.

acrotic (*ah-krot'-ik*) [ἀ, priv.; κρότος, a striking]. 1. Any defective beating of the pulse; failure of the pulse. 2. [ἄκρος, extreme, outmost]. Relating to the glands of the skin; affecting the surface.

acrotism (*ak'-ro-tizm*) [ἀ, priv.; κρότος, a striking]. Same as acrotic (1), *q. v.*

acrotizum (*ah'-krot-izm*). See *acrotic* (1).

acrotrophoneurosis (*ak-ro-trof-o-nu-ro'-sis*) [ἄκρον, an extremity; τροφή, nourishment; νεῦρον, nerve]. A trophic disturbance of the extremities of central origin.

acrylaldehyde (*ak-ril-al'-de-hīd*). See *acrolein*.

act (*akt*) [*agere*, to put in motion]. The fulfilment of a purpose or function. **a., imperative,** the act of an insane person in response to an imperative morbid impulse. **a., sexual,** see *coitus*.

Actæa (*ak-te'-ah*) [ἀκτῆ, the elder]. A genus of ranunculaceous plants having active medicinal qualities. *A. alba*, the white cohosh, has much the same qualities as *A. spicata*. *A. cimicifuga* and *A. racemosa* are more important. See *cimicifuga*. *A. rubra*, red cohosh, and *A. spicata* are purgative and emetic.

acterol (*ak'-ter-ol*). Trade name of viosterol.

actinic (*ak-tin'-ik*) [ἀκτίς, a ray]. Those rays of the spectrum capable of producing chemical changes; found in the violet and ultraviolet parts.

actinism (*ak'-tin-izm*) [ἀκτίς, a ray]. 1. The chemical quality of light, or of the sun's rays. 2. The radiation of heat or light, or that branch, of science which treats of it.

actinium (*ak-tin'-e-um*) [see *actinic*]. A radioactive substance, thought to be an element; found in pitchblende.

actinobacillosis (*ak-tin-o-bas-il-o'-sis*) [ἀκτίς, ray. *bacillus*]. A disease of cattle and other domestic animals due to a bacillus which produces radiate structures in the affected tissues.

actinobolia (*ak-tin-o-bo'-le-ah*) [ἀκτινοβολεῖν, to radiate]. 1. A term formerly used to express the process by which the impulses of the will are conveyed to the different parts of the body. 2. Von Helmont's term for the phenomena now included under hypnotism.

actinobolism, actinobolismus (*ak-tin-ob'-o-lizm, ak-tin-ob-o-liz'-mus*). See *actinobolia*.

actinocerate, actinocerous (*ak-tin-os'-er-āt, -us*) [ἀκτίς, a ray; κέρας, a horn]. Having horn-like processes radiately arranged.

actinochemistry (*ak-tin-o-kem'-is-trē*) [ἀκτίς, a ray; χημεία, chemistry]. Chemistry dealing with decomposition of substances by light.

actinocongestin (*ak-tin-o-kon-jes'-tin*). A substance derived from the tentacles of *Actinia;* it consists of a toxin and a proteid and when injected into animals causes congestion of the viscera.

actinocutitis (*ak-tin-o-kū-ti'-tis*) [ἀκτίς, a ray; *cutis*, skin; ιτις, inflammation]. Same as actinodermatitis, *q. v.*

actinodermatitis (*ak-tin-o-der-mat-i'-tis*) [ἀκτίς, a ray; *dermatitis*]. Cutaneous lesions produced by application of the roentgen-rays. Syn., *radiodermatitis*.

actinogram (*ak-tin'-o-gram*) [ἀκτίς, a ray; γράφειν, to write]. The record made by the actinograph. Skiagram.

actinograph (*ak-tin'-o-graf*). An apparatus to measure the actinism of sunlight. Skiagraph.

actinography. See *actinology*.

actinoid (*ak'-tin-oid*) [ἀκτίς, a ray; εἶδος, like]. Shaped like a ray or star.

actinology (*ak-tin-ol'-o-je*) [ἀκτίς, a ray; λόγος, a discourse]. 1. In biology, that kind of homological relation that exists between the successive segments, regions, or divisions of a part or organ, in that they radiate or spring from it. 2. The science of the chemical action of radiant light: actinography. 3. The part of zoology which treats of the *radiata*.

actinolyte (*ak-tin'-o-lit*) [ἀκτίς, a ray; λύειν, to loose]. An apparatus designed for use in actinotherapy.

actinomere (*ak-tin'-o-mēr*) [ἀκτίς, a ray; μέρος, a part]. A radial segment.

actinometer (*ak-tin-om'-et-er*) [ἀκτίς, a ray; μέτρον, measure]. An apparatus for determining the intensity of actinic rays.

actinomyces (*ak-tin-o-mi'-sēz*) [ἀκτίς, a ray; μύκης, a fungus; pl., *actinomycetes*]. A vegetable parasite, the cause of the disease actinomycosis. It is also called the *ray-fungus*. It probably belongs to the cladothrix group of schizomycetes. As seen in tissues it presents itself in the form of a roset of fine filaments clubbed at their outer ends; in the center are numerous coccus-like bodies, the spores of the organism. See *table Actinomycetaceæ* p. 840.

actinomycoma (*ak-tin-o-mi-ko'-mah*) [*actinomyces;* ὄμα, tumor]. A tumor produced by the actinomyces.

actinomycosis (*ak-tin-o-mi-ko'-sis*) [ἀκτίς, a ray; μύκης, a fungus]. A parasitic, infectious, inoculable disease, first observed in cattle, and also occurring in man, and characterized by the manifestations of chronic inflammation, with or without suppuration, often resulting in the formation of granulation tumors, especially about the jaws. The disease is due to the presence of a parasite, the *ray-fungus*, or *actinomyces*. Syn., *lumpy-jaw; holdfast; wooden tongue*.

actinomycotic (*ak-tin-o-mi-kot'-ik*). Pertaining to actinomycosis.

actinomycotin (*ak-tin-o-mi'-kot-in*). An extract of cultures of actinomyces, prepared on the analogy of tubercle, and used in cases of actinomycosis.

actinon (*ak'-tin-on*). An actinium emanation.

actinoneuritis (*ak-tin-o-nū-ri'-tis*) [ἀκτίς, a ray; νεῦρον, a nerve; ιτις, inflammation]. Neuritis due to exposure to x-rays or radium.

actinopraxis (*ak-tin-o-prak'-sis*) [ἀκτίς, a ray; πράξις, a doing]. Same as actinotherapy, *q. v.*

actinoscopy (*ak-tin-os'-ko-pe*) [ἀκτίς, a ray; σκοπεῖν, to examine]. Examination of the body by the x-rays.

actinotherapy (*ak-tin-o-ther'-ap-e*) [*ἀκτίς*, a ray; *θεραπεία*, therapy]. The therapeutic use of violet and ultraviolet rays.

action (*ak'-shun*) [*agere*, to do or perform]. A doing; a working; especially the performance of a function. **a.**, **after-**, the brief persistence of negative variation of the electric current in a tetanized muscle. **a. s.**, **animal**, voluntary movements. **a. of arrest**, see *inhibition*. **a.**, **automatic**, see *a.*, *reflex*. **a.**, **capillary**, see *attraction, capillary*. **a.**, **catalytic**, **a.**, **contact**, see *catalysis*. **a.**, **chemical**, see *reaction*. **a.**, **diastaltic**, see *a.*, *reflex*. **a.**, **electro-capillary**, electric phenomena resulting from chemical reaction between dissimilar fluids connected by a capillary medium. **a.**, **inhibitory**, see *inhibition*. **a.**, **local**, the production of currents between different parts of the same cell of a galvanic battery. **a. s.**, **natural**, the vegetative functions. **a. s.**, **pseudomotor**, Heidenhain's term for phenomena resulting from stimulation of the chorda tympani after section of the hypoglossal nerve; movements due to vascular or lymphatic engorgement. **a.**, **reflex**, an involuntary movement of part of the body resulting from an impression carried by a sensory of afferent nerve to a center, and then sent back by an efferent nerve to the part, usually at or near the source of irritation. **a.**, **safety-valve**, the incomplete closure of the tricuspid valve, especially in cases of resistance in the pulmonary circulation. **a.**, **sexual**, functioning of the generative apparatus. **a. s.**, **vital**, those essential to the continuance of vitality, as of the heart and lungs.

activate (*ak-tiv-āt*). To render active.

activation (*ak-tiv-a-shun*). The process of activating. 2. The transformation of an inactive zymogen into an active zymogen.

activator (*ak'-tiv-a-tor*). 1. An agent which renders active some other chemical agent such as an enzyme. Also known as *kinase*, or *coenzyme* in the case of ferments. The term is generally applied to biochemical reactions. 2. The internal secretion of the pancreas.

active (*ak'-tiv*) [see *action*]. 1. Energetic; decisive; as *active* treatment. 2. Due to an intrinsic force as distinguished from passive—*e. g.*, *active* hyperemia. **a. optically**, possessing optic rotatory power.

activin (*ak'-tiv-in*). Trade preparation containing organic iodine and purified casein

activity (*ak-tiv'-it-e*) [*agere*, to do or perform]. Capacity for acting; sensibility; vitality; potency; energy. **a.**, **optic**, the property of certain chemical molecules to rotate the plane of polarization, due to the presence of one or several asymmetric carbon atoms in the molecule of every optically active body. Cf. *rotatory power*. **a.**, **sense of muscular**, see *muscular sense*, under *muscular*.

actol (*ak'-tol*). Trade name for silver lactate.

actual (*ak'-chu-al*) [*agere*, to do or perform]. Real; effective. **a. cautery**, see *cautery*.

actuation (*ak-chu-a'-shun*). The mental function that is exercised between the impulse of volition and its performance.

acuclosure (*ak-u-klo'-shūr*) [*acus*, a needle; *claudere*, to close]. A method of arresting hemorrhage by the aid of a needle which holds the artery closed for a day. It embraces *acupressure* and *acutorsion*.

acuductor (*ak-u-duk'-tor*) [*acus*, a needle; *ducere*, to lead]. A needle carrier.

acufilopressure (*ak-u-fi'-lo-pres-ur*) [*acus*, needle; *filum*, a thread; *pressure*]. A combination of acupressure and ligation.

acuition (*ak-u-ish'-un*) [*acuere*, to sharpen]. Increased effect of a drug's action by the addition of another drug.

acuity (*ak-u'-it-e*) [see *acuition*]. Acuteness or clearness, as *acuity* of vision.

aculeate (*ak-u'-le-āt*) [*aculeus*, a sting, prickle]. In botany, armed with prickles, *s.e.*, *aculei;* as the rose and brier. In biology, having a sting.

acumeter (*ak-u'-me-ter*). See *acoumeter*.

acuminate (*ak-u'-min-āt*) [*acuminatus*, pointed; acute]. Sharp-pointed.

acupression, acupressure (*ak-u-presh'-un, ak'-u-presh-ūr*) [*acus*, a needle; *pressura*, pressure]. The operation to stop hemorrhage by compressing the artery with a needle inserted into the tissues upon either side.

acupuncture (*ak'-u-punk-chur*) [*acus*, a needle; *pungere*, to prick]. Puncture of the skin or tissue by one or more needles for the relief of pain, the exit of fluid, the coagulation of blood in an aneurysm, etc.

acus (*a'-kus*) [L.]. A (surgical) needle.

acusection (*ak-u-sek'-shun*) [*acus*, a needle, *secare*, to cut] Sectioning with an electrosurgical needle.

acusia (*ah-koo'-ze-ah*). See *acousia* (2).

acusimeter, acusiometer (*ah-koo-sim'-et-er, ah-koo-se-om'-et-er*). Same as *acoumeter*.

acustica (*ah-koos'-tik-ah*). See *acoustics*.

acusticus (*ah-koo'-stik-us*) [L.]. The auditory, or eighth cranial, nerve.

acute (*ak-ūt'*) [*acutus*, sharp]. Having a rapid onset, a short course, and pronounced symptoms and termination; not chronic. Sharp, severe.

acutenaculum (*ak-u-ten-ak'-u-lum*) [*acus*, a needle; *tenaculum pl.*, *acutenacula*]. A needle-holder

acuteness (*ak-ūt'-nes*) [*acutus*, sharp]. The quality of being acute, rapid or sharp. Referring to vision, used as a synonym of keenness or acuity.

acuticostal (*ak-ūt-i-kos'-tal*) [*acutus*, sharp; *costa*, a rib]. Having projecting ribs.

acutorsion (*ak-u-tor'-shun*) [*acus*, a needle; *torsion*]. The twisting of an artery with a needle as a means of controlling hemorrhage.

acyanoblepsia (*ah-si-an-o-blep'-se-ah*) [*ἀ*, priv.; *κύανος*, blue; *βλέπειν*, to look]. See *acyanopsia*.

acyanoblептic (*ah-si-an-o-blep'-tik*). Affected with or pertaining to acyanoblepsia.

acyanopsia (*ah-si-an-op'-se-ah*) [*ἀ*, priv.; *κύανος*, blue; *ὄψις*, sight]. Inability to see blue colors.

acyclia (*ah-sīk'-le-ah*) [*ἀ*, priv.; *κυκλεῖν*, to circulate]. Arrested circulation of body-fluids.

acyclic (*ah-sik'-lik*) [*ἀ*, priv.; *κυκλικός*, circular] 1. In botany, not whorled. 2. Not characterized by a self-limited course. Cf. *Cyclic*. 3. In chemistry, aliphatic, having the structure of the open chain compounds.

acyesis (*ah-si-e'-sis*) [*ἀ*, priv.; *κύησις*, pregnancy]. 1. Sterility of the female. 2. Non-pregnancy 3. Incapacity for natural delivery. Syn., *aciesis*.

acyeterion (*ah-si-et-e'-re-on*) [see *acyesis*]. An agent to prevent conception.

acyetic (*ah-si-et'-ik*) [*ἀ*, priv.; *κύησις*, pregnancy]. Relating to acyesis.

acyl (*as'-il*). An acid organic radical derived from an organic acid by the removal of a hydroxyl group (OH).

acyoblepsia (*as-i-o-blep-se-ah*). See *acyanoblepsia*.

acystia (*ah-sis'-te-ah*) [*ἀ*, priv.; *κύστις*, bladder]. Absence of the bladder.

acystinervia (*ah-sis-tin-er-ve-ah*) [*ἀ*, priv.; *κύστις*, bladder; *nervus*, a nerve]. Paralysis or lack of nerve stimulus in the bladder.

acystonervia, acystoneuria (*ah-sis-to-nur'-ve-ah, -nu'-re-ah*). See *acystsnervia.*

a. d. Abbreviation for Latin *auris dextra,* right ear.

ad [*ad,* to]. A Latin preposition signifying *to, toward, at,* etc.; as, *ad libitum,* at pleasure or according to discretion.

ad., or **add.** A contraction of *adde,* or *additur,* meaning, add, or let there be added; used in prescription writing.

A. D. A. Abbreviation of American Dental Association.

adacrya (*ah-dak'-re-ah*) [ἀ, priv.; δάκρυον, tear]. Absence or deficiency of the secretion of tears.

adactyl (*ah-dak'-til*) [ἀ, priv.; δάκτυλος, digit]. 1. Without fingers or without toes. 2. A monstrosity that has an absence of digits.

adactylia (*ah-dak-til'-e-ah*) [ἀ, priv.; δάκτυλος, a finger]. Absence of the digits.

adactylism (*ah-dak'-til-izm*) [ἀ, priv.; δάκτυλος, a finger] The absence of the digits.

adactylous (*ah-dak'-til-us*), see *adactylism.*

adactylus (*ah-dak'-til-us*) [ἀ, priv.; δάκτυλος, digit]. Same as adactyl (*2*), *q. v.*

adalin (*ad'-al-in*). A proprietary preparation used as a sedative and hypnotic. It is said to be bromodiethylacetyl urea.

adamantin (*ad-am-an'-tin*) [ἀδάμας, adamant]. Pertaining to adamant. **a. cement,** a substance used for filling teeth, consisting of finely powdered silex or pumice stone mixed with an amalgam of mercury and silver. See *amalgam.* **a. substance,** the enamel of the teeth.

adamantinoma (*ad-am-an-tin-o'-mah*) [ἀδάμας, adamant; ὄμα, tumor]. An epithelial tumor resembling in structure the enamel organ of a developing tooth.

adamantoblast (*ad-am-an-to-blast*). An enamel-cell; a columnar epithelial cell from which the enamel of the teeth is developed. Ameloblast

adamantoblastoma (*ad-am-an-to-blas-to'-mah*) [*adamantoblast;* ὄμα, tumor]. Hyperplasia of the adamantoblast.

Adamkiewicz, demilune cells of (*ad-ahm'-ke-a-vits*) [Albert *Adamkiewicz,* Austrian pathologist, 1850–]. A peculiar form of nerve-corpuscle lying below the neurilemma of medullated nerve-fibers; it is stained yellow by safranin. **A.'s reaction for proteins.** To a mixture of one volume concentrated sulphuric acid and two volumes glacial acetic acid add the protein. At the ordinary temperature a reddish-violet color is obtained slowly but more quickly on heating. The liquid has also a feeble fluorescence, and gives an absorption band between the lines B and F in the solar spectrum.

adamon (*ad'-am-on*). A preparation used as a substitute for valerian; it is a sedative.

Adam's apple. The laryngeal prominence; see *Pomum Adami.*

Adams's operation (Sir William *Adams,* English surgeon, 1760–1829: William *Adams,* English surgeon, 1820–]. *Osteotomy for ankylosis of the hip-joint,* the neck of the femur being divided subcutaneously, within the capsule. *2. Corectopy;* the iris is drawn into a small, corneal incision, in order to change the position to the natural pupil. 3. For *deviated nasal septum;* the bent cartilaginous septum is forcibly straightened by means of special flat, parallel-bladed forceps. 4. For *Dupuytren's contraction,* when the bands extend far down the sides of the finger. It consists in multiple subcutaneous section of the palmar fascia from without inward. 5. For *ectropion;* a triangular wedge is removed from the whole thickness of the lower lid, and the edges are united by sutures. 6. *Iliac colotomy;* a modification of Cripps' operation, in which a vertical incision is made external to the epigastric artery. 7. For *prolapsus uteri,* see *Alexander's operation.* **A.'s saw,** a saw with a long handle and a short blade, used in osteotomy.

Adams-Stokes syndrome or disease [Robert *Adams,* Scotch physician, 1794–1861; William *Stokes,* Irish physician, 1804–1878]. A symptom-complex consisting of bradycardia in association with epileptiform or apoplectiform seizures. Heart-block is often present.

Adams's disease. See *Adams-Stokes' disease.*

Adansonia digitata (*ad-an-so'-ne-ah dij-it-a'-tah*) [Michel *Adanson,* French naturalist, 1727–1806]. The baobab-tree, a native of Africa. The bark is used as a remedy for intermittent fever.

adansonine (*ad-an'-so-nin*). A febrifugal alkaloid from the leaves and bark of *Adansonia digitata.*

adanto blaka. A malady common to the Gold Coast negroes and of frequent prevalence in the tropic zone; due to an animal parasite.

adaptation (*ad-ap-ta'-shon*) [*adaptare,* to adjust]. In biology, favorable organic modifications suiting a plant or animal to its environment. **a. of the retina,** the faculty possessed by the retina of accommodating the power of vision to a diminished amount of light, as in a darkened room.

adapter (*ad-ap'-ter*) [*adaptare,* to adjust]. 1. Anything which serves the purpose of fitting one thing to another. An instrument by means of which the direct electric current may be adapted to the various forms of electrotherapeutic treatment 2. A piece of tubing used to connect the neck of a retort with a receiver. 3. A microscope attachment for centering or decentering the illuminating apparatus. 4. A collar used to fit an objective to a different nose-piece than that for which it was made.

adaptometer (*ad-ap-tom'-et-er*). An instrument for measuring the time taken in retinal adaptation.

adarticulation (*ad-ar-tik-u-la'-shun*). See *arthrodia.*

adde (*ad'-e*) [imperative sing. of *addere,* to add]. Add; a direction used in prescription writing.

ad deliq. Abbreviation of *ad deliquium* [L.]. To the point of fainting.

addephagia (*ad-e-fa'-je-ah*) [L.]. See *bulimia.*

addict (*ad'-dikt*). One who is given to some addiction, *q. v.* **a., drug.** "One who uses habitually a narcotic drug for the comfort such indulgence affords, and who has no illness or other legitimate reasons for such practice."

addiction (*ad-dik'-shun*). Habitual indulgence in some habit or habitual usage of some drug or liquor.

addiment (*ad'-im-ent*) [*addere,* to add]. Ehrlich's and Morgenroth's term (1899) for an active thermolabile substance (destroyed by a temperature of 56° C.) contained in normal serum and capable of rendering active the immune body of Ehrlich and setting up bacteriolysis and hemolysis. See *complement.*

addimentary (*ad-im-ent'-ar-e*). Pertaining to addiment.

Ad'disin, Ad'disonin. See *Biermerin.*

Addison's anemia [Thomas *Addison,* English physician, 1793–1860]. Pernicious anemia. **A.'s disease,** a disease of the suprarenal capsules, first described by Addison, and characterized by tuberculous infiltration of the capsules, dis-

coloration of the skin, progressive anemia, and asthenia, ending in death from exhaustion. Bronzed skin may occur without disease of the suprarenal capsules, and the latter have been the seat of morbid processes without an accompanying change in the skin. Syn., *melasma suprarenale; dermatomelasma suprarenale; cutis æreа; bronzed skin.* **A.'s keloid,** morphea. **A.'s pill,** Guy's pill.

additamentum (*ad-it-am-en'-tum*) [L.]. Any appendix, as an epiphysis. **a. ad sacrolumbalem,** see *muscles.* **a. coli,** the appendix vermiformis. **a. necatum,** the olecranon. **a. suturæ lambdoidalis,** the occipitomastoid suture. **a. ulnæ,** the radius. **a. uncatum ulnæ,** the olecranon.

addition (*ad-ish'-un*) [*addere,* to add]. The formation of a molecule by the direct union of two or more different molecules without decomposition. **a. compound,** see under *compound.* **a. diet,** see under *diet.* **a. product,** see under *product.* **a. reaction,** see under *reaction.*

adducens (*ad-dū'-senz*) [*adducere,* to bring toward]. An adductor, a term applied to certain muscles. **a. oculi,** the internal rectus muscle of the eye.

adducent (*ad-dū'-sent*) [see *adducens*]. Performing adduction.

adduct (*ad-ukt'*) [*adducere,* to bring forward]. To draw toward the median line of a body.

adduction (*ad-uk'-shun*) [see *adducens*]. Any movement whereby a part is brought toward another or toward the median line of the body.

adductor (*ad-duk'-tor*) [*adducere,* to bring forward]. Any muscle effecting adduction. **a. brevis, hallucis, longus, magnus, minimus, obliquus hallucis, obliquus pollicis, transversus hallucis, transversus pollicis;** see *muscles, table of.*

adelodermatous, adelodermous (*ad-el-o-der'-matus, ad-el-o-der'-mus*) [ἄδηλος, not seen; δέρμα, skin]. Having concealed integument, as invaginated tracts.

adelomorphic (*ad-el-o-mor'-fik*). Same as adelomorphous, *q. v.*

adelomorphous (*ad-el-o-mor'-fus*) [ἄδηλος, not seen; μορφή, form]. Not clearly defined; applied to certain cells in the gastric glands.

adelphia (*ad-el'-fe-ah*). A form of monstrosity characterized by the union of two organisms above, the lower portions being separated.

adelphotaxy (*ad-el-fo-taks'-e*) [ἀδελφός, brotherhood; τάσσειν, to arrange]. The tendency of motile cells to arrange themselves into definite positions.

ademonia (*ad-e-mo'-ne-ah*) [ἀ, priv.; δημονία, trouble, distress]. Mental distress.

ademosyne (*ad-e-mos'-in-e*) [ἀδημοσύνη, trouble, distress]. Depression of spirits; home-sickness.

aden (*a'-den*) [ἀδήν, an acorn, a gland]. A gland; a bubo.

adenalgia (*ad-en-al'-je-ah*) [*aden;* ἄλγος, pain]. Glandular pain.

adenase (*ad'-en-ās*). A deamidizing enzyme which converts adenin to hypoxanthin.

adenasthenia (*ad-en-as-the'-ne-ah*) [*aden;* ἀσθένεια, weakness]. 1. Functional weakness of a gland. 2. A stomach disorder characterized by diminished and enfeebled secretion without anatomic lesion. **a. gastrica,** see *adenasthenia* (2).

adendric (*ah-den'-drik*) [ἀ, priv.; δένδρον, tree]. Unprovided with dendrons.

adendritic (*ah-den-drit'-ik*) [ἀ, priv.; δένδρον, tree]. Without dendrites.

adenectomy (*ad-en-ek'-to-me*) [*aden;* ἐκτομή, excision]. The excision of a gland.

adenectopia (*ad-en-ek-to'-pe-ah*) [*aden;* ἔκτοπος, away from a place]. A condition in which the gland does not occupy its proper position.

adenectopic (*ad-en-ek-top'-ik*). Pertaining to adenectopia.

adenemphratic (*ad-en-em-frat'-ik*). Pertaining to adenemphraxis.

adenemphraxis (*ad-en-em-fraks'-is*) [*aden;* ἐμφράξω, a stoppage]. Glandular obstruction.

Aden fever. See *dengue.* **A. ulcer.** See *phagedena tropica.*

adenia (*ad-e'-ne-ah*) [*aden*]. 1. A S. African bulb which contains a poison, 1–10.000*th* of a grain of which kills and leaves no trace in the body. 2. A hyperplasia of the tissue of lymphatic glands leading to the formation of tumors. See *lymphadenoma.* **a.s., angibromic,** Piorry's term for diseases of the glandular adnexa of the digestive tract **a., leukemic,** adenia associated with a leukemic condition. **a., simple,** that form which is unaccompanied by any increase in the number of the white blood-corpuscles. Syn. of *Hodgkin's disease.*

adenic (*ad-en'-ik*) [*aden*]. Relating to or of the nature of a gland.

adeniform (*ad-en'-e-form*) [*aden; forma,* resemblance]. Shaped like a gland.

adenin (*ad'-en-in*). See *adenine.*

adenine (*ad'-en-ēn*) [*aden*], $C_5H_5N_5$. 6 aminopurin. The simplest member of the uric-acid group of leukomaines, apparently formed by polymerization of hydrocyanic acid, first discovered in the pancreas. It occurs, with other bases, as a decomposition-product of nuclein, and may be obtained from all animal and vegetable tissues rich in nucleated cells. It crystallizes in leaflets with pearly luster. It exists abundantly in the liver and urine of leukocythemic patients. Adenine is not poisonous.

adeninehypoxanthine (*ad-en-ēn-hi-po-zanth'-ēn*). $C_5H_5N_5 + C_5H_4N_4O$. A compound of adenine and hypoxanthine first observed by Kossel and isolated by Bruhns, occurring in thick, starch-like, semi-transparent masses, becoming white and chalky.

adenitis (*ad-en-i'-tis*) [*aden;* ιτις, inflammation]. Inflammation of a gland. Syn., *phlegmasia adenosa; phlegmasia glandulosa.* **a. cervicalis syphilitica,** an engorgement of the cervical lymphatic glands; a sign of syphilitic infection. **a. cubitalis,** Grünfeld's term for inflammation of the epitrochlear lymphatic gland. **a. hyperplastica,** Grünfeld's term for a bubo in which plastic exudation predominates. **a. pubica,** bubo of the pubic region, often accompanied by suppurative lymphangitis of the dorsum of the penis. **a., syphilitic, primitive,** see *bubo, syphilitic.* **a. universalis,** widespread induration of lymphatic glands accompanying primary syphilis.

adenization (*ad-en-i-za'-shun*) [*aden*]. 1. The assuming of a glandular appearance. 2. Adenoid degeneration.

adeno- [ἀδήν, a gland]. A prefix denoting relation to glands.

adenoblast (*ad'-en-o-blast*) [*adeno-;* βλαστός, a germ]. 1. Any functionally active gland-cell; a cell that assists in the glandular action. 2. Haeckel's name for an embryonic cell which forms a gland.

adenocarcinoma (*ad-en-o-kar-sin-o'-mah*) [*adeno-; carcinoma*]. Adenoma blended with carcinoma.

adenocele (*ad'-en-o-sēl,*) [*adeno-;* κήλη, a tumor]. A cystic tumor containing adenomatous elements. See *adenoma.*

adenocellulitis (*ad-en-o-sel-u-li'-tis*) [*adeno-; cellulitis*]. Inflammation of a gland and the surrounding cellular tissue.

adenochirapsology (*ad-en-o-ki-rap-sol'-o-je*) [*aden; χείρ*, hand; *ἅπτειν*, to touch; *λόγος*, treatise]. The obsolete doctrine of the healing of scrofula by the touch of a king's hand.

adenochondroma (*ad-en-o-kon-dro'-mah*) [*aden; χόνδρος*, cartilage; *pl., adenochondromata*]. A tumor consisting of both glandular and cartilaginous tissue.

adenochondrosarcoma (*ad-en-o-kon-dro-sar-ko'-mah*) [*adeno-; chondro-; sarcoma*]. A tumor composed of adenomatous, cartilaginous and sarcomatous tissue.

adenocyst (*ad'-en-o-sist*) [*adeno-; κύστις*, a cyst]. A cystic lymphatic gland; a glandular cyst. Cf. *adenocystoma*.

adenocystoma (*ad-en-o-sis-to'-mah*) [*adeno-; κύστις*, a cyst; *ὄμα*, a tumor]. A cystic adenoma.

adenodermia (*ad-en-o-dur'-me-ah*) [*aden; δέρμα*, skin]. Disease of the glands of the skin.

adenodiastasis (*ad-en-o-di-as'-tas-is*) [*aden; διάστασις*, separation]. 1. Displacement of a gland. 2. Abnormal separation of a gland into distinct parts.

adenodynia (*ad-en-o-din'-e-ah*) [*aden; ὀδύνη*, pain]. See *adenalgia*.

adenofibroma (*ad-en-o-fi-bro'-mah*) [*adeno-; fibroma*]. A combination of adenoma and fibroma.

adenofibrosis (*ad-en-o-fi-bro'-sis*) [*adeno-; fibrosis*]. Fibroid degeneration of a gland, particularly the inflammatory neoplasms involving sudoriparous glands, due to infection with *Botryomyces*.

adenogenesis (*ad-en-o-jen'-es-is*) [*adeno-; γένεσις*, a creation]. The development of a gland.

adenogenous (*ad-en-oj'-en-us*) [*adeno-; γεννᾶν*, to produce]. Originating from a gland.

adenographer (*ad-en-og'-ra-fur*). A writer on glands.

adenographic (*ad-en-o-graf'-ik*). Pertaining to adenography.

adenography (*ad-en-og'-ra-fe*) [*adeno-; γράφειν*, to write]. 1. That part of descriptive anatomy which treats of the glandular system. 2. A treatise on glands and the glandular system.

adenohypersthenia (*ad-en-o-hi-per-sthe'-ne-ah*) [*adeno-; ὑπέρ*, over; *σθένος*, strength]. Excessive activity of the glands. **a. gastrica,** a condition characterized by the secretion of gastric juice abnormally rich in hydrochloric acid or excessive in quantity.

adenoid (*ad'en-oid*) [*adeno-; εἶδος*, resemblance]. 1. Resemb-ling a gland. 2. In the plural, the same as *adenoid vegetations*. **a. acne,** see *lupus, disseminated follicular*. **a. body.** 1. The prostate gland. 2. A melanotic tumor. **a. disease,** synonym of *Hodgkin's disease*. **a. muscle,** see *thyroadenoideus* under *muscle*. **a. tissue,** lymphadenoid tissue. **a. tumor,** see *adenoma*. **a. vegetations,** a term applied to a hypertrophy of the adenoid tissue that normally exists in the nasopharynx.

adenoidectomy (*ad-en-oi-dek'-to-me*) [*adenoid; ἐκτομή*, xcision]. An operation for the removal of adeenoids.

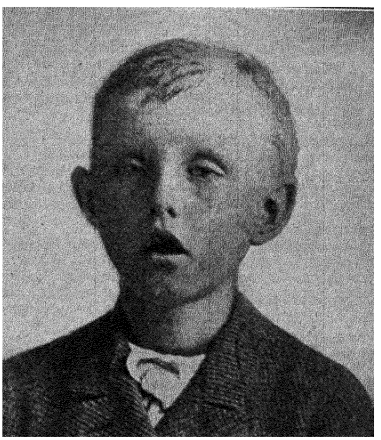
adenoiditis (*ad-en-oid-i'-tis*) [*adenoid; ιτις*, inflammation]. Inflammation of adenoids.

adenoids. See *adenoid vegetations*.

adenoliomyofibroma (*ad-en-o-li-o-mi-o-fi-bro'-mah*). A liomyofibroma containing gland tissue.

adenolipoma (*ad-en-o-lip-o'-mah*) [*adeno-; lipoma*]. A combination of adenoma and lipoma.

adenolipomatosis (*ad-en-o-lip-o-mat-o'-sis*) [*adenolipoma*]. A diseased condition of the lymphatic system characterized by fatty deposits in the neighborhood of the neck, axillæ, and groins. It is generally unattended with pain. Syn., *multiple lipomata*.



FACIES OF ADENOIDS.

adenologaditis (*ad-en-o-log-ad-i'-tis*) [*adeno-; λογάδες*, whites of the eyes; *ιτις*, inflammation]. 1. Ophthalmia neonatorum. 2. Inflammation of the glands and conjunctiva of the eyes.

adenology (*ad-en-ol'-o-je*) [*adeno-; λόγος*, a discourse]. The science of or a treatise on the glandular system.

adenolymphitis (*ad-en-o-lim-fi'-tis*) [*adeno-; lymph, ιτις*, inflammation]. Lymphadenitis.

adenolymphocele (*ad-en-o-limf'-o-sēl*) [*adeno-; lymph; κήλη*, tumor]. Dilatation of the lymphvessels and enlargement of the lymphatic glands.

adenolymphoma (*ad-en-o-lim-fo'-mah*) [*adeno-; lymphoma*]. A combined adenoma and lymphoma. See *lymphadenoma*.

adenom (*ad'-en-om*). A preparation used as a genitourinary sedative and anaphrodisiac.

adenoma (*ad-en-o'-mah*) [*adeno-; ὄμα*, a tumor: pl., *adenomata*]. 1. An epithelial tumor constructed after the type of a secreting gland. 2. Any tumor which has as its characteristic feature tubes or spaces lined with epithelium, whether or not it arises from or is connected with a gland. **a. carcinomatodes renis,** a renal neoplasm probably derived from aberrant adrenal tissue in the kidney. **a. destruens,** a destructive form of adenoma. **a. diffusum,** hyperplasia of the mucous membrane with predominance of glandular elements. **a. fibrosum,** a fibrous growth in the stroma of a gland. **a., heteropodous,** one arising from the metastasis of normal glandular tissue. **a., lupiform,** see *lupus erythematosus*. **a., malignant,** an adenomatous carcinoma. **a., papillary, a., papilliferum,** a form arising from either the alveolar or the tubular adenoma through stronger growth of the epithelium and the formation of papillæ of connective tissue. **a., racemose,** an adenoma after the type of a racemose gland. **a., renal,** glandular carci-

noma of the kidney. **a. sebaceum,** a fatty tumor of the face composed of sebaceous glands. **a. simplex,** a tumor-like hyperplasia of a gland. **a. sudoriparium,** a cutaneous tumor involving hyperplasia of the sweat-glands. Cf. *hidrosadenitis.* **a., tubular,** an adenoma after the type of a tubular gland. **a., umbilical,** a tumor at the navel originating through the coalescence of Meckel's diverticulum with the umbilical ring, through which the intestinal mucosa appears in the navel. Syn., *intestinal ectropia.*

adenomalacia (*ad-en-o-mal-a'-she-ah*) [*adeno-*; μαλακία, softening]. Abnormal softening of a gland.

adenomatome (*ad-en-o'-mat-ōm*) [*adenoma*; τομή, a cutting]. Cutting forceps or scissors for use in the removal of adenomatous growths.

adenomatosis (*ad-en-o-mat-o'-sis*). A condition characterized by diffuse overgrowth of glandular tissue.

adenomatous (*ad-en-o'-mat-us*). Pertaining to an adenoma; characteristic of glandular hyperplasia.

adenomeningeal (*ad-en-o-men-in'-je-al*) [*adeno-*; μῆνιγξ, a membrane]. Pertaining to or affecting the glands of a membrane.

adenomesenteritis (*ad-en-o-mes-en-ter-i'-tis*) [*adeno-*; *mesentery*; ιτις, inflammation]. Inflammation of the mesenteric glands.

adenomycosis (*ad-en-o-mi-ko'-sis*). Hodgkin's disease, *q. v.*

adenomyoma (*ad-en-o-mi-o'-mah*) [*pl., adenomyomata*]. A tumor composed of glandular and muscular tissues. **a., branchiogenic,** cyst-formation in consequence of inflammation of the mucous bursa in the median line of the neck.

adenomyxoma (*ad-en-o-miks-o'-mah*). A growth having the characters of adenoma and myxoma.

adenomyxosarcoma (*ad-en-o-miks'-o-sar-ko-mah*). A rare combination of malignant tumor forms (observed in the cervix uteri); a primary adenoma with secondary sarcoma and finally myxomatous degeneration of the stromas.

adenoncosis (*ad-en-on-ko'-sis*) [*adeno-*; ὄγκωσις, swelling]. The enlargement of a gland.

adenoncus (*ad-en-ong'-kus*) [*adeno-*; ὄγκος, a mass]. A glandular tumor.

adenopathy, adenopathia (*ad-en-op'-a-the, ad-en-o-pa'-the-ah*) [*adeno-*; πάθος, disease]. Any disease of a gland. **a., angiobromic,** see *adenias, angibromic.* **a., primary,** the lymphadenitis resulting from primary syphilitic infection. **a., syphilitic,** the enlarged and indurated cervical, inguinal, and cubital glands symptomatic of syphilitic infection. **a., tracheobronchial, a., tracheobronchic,** hypertrophy of the peribronchial lymphatic glands observed in the course of various diseases, causing spasmodic cough. **a., tracheolaryngeal,** inflammation and hypertrophy of the tracheolaryngeal lymphatic glands.

adenopharyngeal (*ad-en-o-far-in'-je-al*) [*adeno-*; φάρυγξ, pharynx]. Pertaining to the thyroid gland and the pharynx.

adenopharyngitis (*ad-en-o-far-in-ji'-tis*) [*adeno-*; φάρυγξ, pharynx; ιτις, inflammation]. Inflammation of the tonsils and pharynx.

adenophlegmon (*ad-en-o-fleg'-mon*) [*adeno-*; φλέγμονη, inflammation]. Suppurative inflammation of a gland. Phlegmonous lymphadenitis.

adenophthalmia (*ad-en-of-thal'-me-ah*) [*adeno-*, ὀφθαλμός, the eye]. Inflammation of the Meibomian glands.

adenophyma (*ad-e-no-fi'-ma*) [*adeno-*; φῦμα, a tumor or growth]. A soft swelling of a gland.

adenosarcoma (*ad-en-o-sar-ko'-mah*) [*adeno-*; *sarcoma*]. A tumor with the characters of adenoma and sarcoma combined.

adenosarcorhabdomyoma (*ad-en-o-sar-ko-rab-do-mi-o'-mah*). A neoplasm composed of the elements of sarcoma, adenoma, and rhabdomyoma.

adenoscirrhus (*ad-en-o-skir'-us*) [*adeno-*; *scirrhus*]. Adenoma with scirrhous or carcinomatous elements.

adenosclerosis (*ad-en-o-skle-ro'-sis*) [*adeno-*; σκληρός, hard]. A hardening of a gland, with or without swelling.

adenose (*ad'-en-ōs*) [ἀδήν, gland]. Glandular; abounding in glands; gland-like.

adenosis (*ad-en-o'-sis*) [ἀδήν, a gland]. 1. Any glandular disease. 2. Any chronic glandular disorder. **a. scrofulosa,** see *scrofula.*

adenosynchitonitis (*ad-en-o-sin-ki-ton-i'-tis*) [*adeno-*; σύν, with; χιτών, a covering; ιτις, inflammation]. 1. Inflammation of the Meibomian glands. 2. Ophthalmia neonatorum.

adenotome (*ad'-en-o-tōm*) [*adeno-*; τομή, a cutting]. An instrument for incising a gland or for removing adenoids.

adenotomy (*ad-en-ot'-o-me*) [*adeno-*; τομή, a cutting]. The anatomy of the glands; dissection or incision or removal of a gland.

adenotyphoid fever (*ad-en-o-ti'-foid*) [*adeno-*; *typhoid*]. Malta fever.

adenotyphus (*ad-en-o-ti'-fus*). Typhoid fever.

adenous (*ad'-en-us*) [ἀδήν, gland]. See *adenose.*

adenyl (*ad'-en-il*). The radical, $C_5H_4N_4$, contained in adenin.

adephagia (*ad-e-fa'-je-ah*) [ἀδηφάγος, eating one's fill; gluttonous]. Voracious appetite; bulimia.

adeps (*ad'-eps*) [L.; gen., *adipis*]. 1. Lard. The fat obtained from the abdomen of the hog, composed of 38 % stearin and margarin and 62 % olein. It forms 70 % of ceratum and 80 % of unguentum. 2. Fatness. 3. Animal fat. **a. anserinus, a. anseris,** goose-grease. **a. benzoatus, benzoinatus** (U. S. P.), benzoinated lard; contains 2 % of benzoin. **a. curatus,** a preparation of lard, 48 parts, and 1 part of Peruvian balsam. **a. ex fele,** cat's grease. **a. lanæ** (U. S. P.), lanolin. **a. lanæ hydrosus** (U. S. P.), hydrous wool-fat, the purified fat of the wool of the sheep. **a. ovillus, a. ovis,** mutton suet. A fixed oil (*oleum adipis*) is expressed from lard. **a. præparatus** (B. P.), purified fat of the hog. **a. suillus,** hog's lard; adeps.

adepsin (*ad-ep'-sin*) [*adeps*, lard]. A petrolatum much like vaselin.

adermia (*ah-der'-me-ah*) [ἀ, priv.; δέρμα, skin]. Absence or defect of the skin.

adermogenesis (*ah-der-mo-jen'-es-is*) [ἀ, priv.; δέρμα, skin; γένεσις, generation]. Deficient cutaneous development.

adermotrophia (*ah-der-mo-tro'-fe-ah*) [ἀ, priv.; δέρμα, skin; τροφή, nutrition]. Atrophy of the skin.

adesmosis (*ah-des-mo'-sis*) [ἀ, priv.; δεσμός, a band]. Atrophy of the cutaneous connective tissue.

adgenic, adgenicus (*ad-jen'-ik, ad-jen'-ik-us*) [*ad*, to; *gena*, the chin]. Attached to the genial tubercles or apophyses.

Adhatoda (*ad-ha-to'-da*) [from the Tamil name]. A genus of plants of the order *Acanthaceæ*. *A. hyssopifolia,* a species native of South Africa; the willow-leaved Malabar nut; bitter, aromatic.

A. vasica, a species native of tropical Asia; the Malabar nut. The juice of the leaves is used as an expectorant. The leaves, flowers, and root are considered antispasmodic and are given in asthma, intermittent fever, and rheumatism. The fresh flowers are bound over the eyes in cases of ophthalmia. In decoction the leaves with other remedies are used as an anthelmintic. The nut is emmenagogue used to expel the dead fetus.

adhesion (*ad-he'-zhun*) [*adhærere*, to stick to]. 1. The attractive force between two dissimilar bodies that are in contact. 2. Abnormal union of two surfaces as a result of inflammation, etc. **a., primary**, called also *healing by first intention* and by *immediate union*, a method of healing of wounds by the production of lymph, followed by the vascularization and cicatrization of the exudate. **a., secondary**, or *healing by second intention*, or *by granulation*, is that mode of healing attended by the production of pus and the formation of granulations.

adhesive (*ad-he'-siv*) [see *adhesion*]. 1. Sticky; tenacious. 2. Resulting in or attended with adhesion. **a. inflammation**, inflammation accompanied by plastic exudation, and tending to the union of apposed surfaces. **a. plaster**, resin plaster, see *resin* and *emplastrum*.

adhesol (*ad-he'-sol*). A surgical dressing said to contain copal resin, 350 parts; benzoin, 30 parts; oil of thyme, 20 parts; alphanaphthol, 3 parts; tolu balsam, 30 parts; ether, 1000 parts.

adhyoid (*ad-hi'-oid*). Adherent to the hyoid bone.

adiadochokinesis (*ah-di-ad-o-ko-kin-e'-sis*) [ἀ, priv.; διάδοχος, succeeding]. Inability to perform rapidly alternating movements, such as pronation and supination.

Adiantum (*ad-e-an'-tum*) [ἀ, priv.; διαντός, capable of being wetted]. A genus of ferns; the maidenhair. *A. capillus-veneris* and *A. pedatum*, of North America, are serviceable in coughs and as demulcents.

adiaphoresis (*ah-di-af-o-re'-sis*) [ἀ, priv.; διαφορεύειν, to perspire]. Deficient sweat.

adiaphoretic (*ah-di-af-o-ret'-ik*) [ἀ, priv.; διαφορεύειν, to perspire]. Reducing the sweat; anidrotic.

adiaphorous (*ad-i-af'-or-us*) [ἀδιάφορος, indifferent]. Neutral; inert; doing neither harm nor good.

adiapneustia (*ah-di-ap-nūs'-te-ah*) [ἀ, priv.; διαπνευστεῖν, to perspire]. A stoppage of perspiration.

adiarthrotos (*ah-di-ar-thro'-tos*) [ἀδιάρθρωτος, not jointed]. 1. Without joints; unjointed. 2. Inarticulate (applied to speech).

adiathermancy (*ah-di-ath-er'-man-se*) [ἀ, priv.; διά, through; θέρμη, heat]. Impermeability to radiant heat.

adiathermic (*ah-di-a-thur'-mik*) [ἀ, priv.; διά, through; θερμή, heat]. Impervious to radiant heat.

adiathesia (*ah-di-ath-e'-se-ah*) [ἀ, priv.; διάθεσις, condition]. A condition or particular disease that is not congenital.

adiathesic (*ah-di-ath-e'-sik*) [ἀ, priv.; διάθεσις, condition]. Not connected with any diathesis.

adiathetic (*ah-di-ath-et'-ik*) [ἀ, priv.; διάθεσις, condition]. Adiathesic.

adiemorrysis, adiæmorrhysis (*ah-di-e-mor'-e-sis*) [ἀ, priv.; διά, through; αἷμα, blood; ῥυσις, flowing]. Failure of the circulation of the blood through the veins, due to some obstruction.

adietetic (*ah-di-et-et'-ik*). 1. Unwholesome for food. 2. Unmindful of dietetic requirements.

adigan (*ad'-ig-an*). A digitalis preparation which has been freed from digitonin and other saponin-like constituents; it is said to be nontoxic.

adipatum (*ad-ip'-a-tum*). An ointment-base said to consist of lanolin, vaselin, paraffin, and water.

adipectomy (*ad-ip-ek'-to-me*) [*adipose*; ἐκτομή, excision]. Excision of fatty tissue.

adipic (*ad-ip'-ik*) [*adeps*, lard]. Of or belonging to fat. **a. acid**, see *acid, adipic*.

adipocele (*ad'-ip-o-sēl*) [*adeps*; κήλη, hernia]. A true hernia with hernia sac, containing only fatty tissue.

adipocellular (*ad-ip-o-sel'-u-lar*). Made up of fat and connective tissue.

adipoceration (*ad-ip-os-er-a'-shun*) [*adeps*, fat; *cera*, wax]. The formation of adipocere.

adipocere (*ad'-ip-o-sēr*) [*adeps; cera*, wax]. A wax-like substance formed by the exposure of fleshy tissue to moisture, with the exclusion of air; *i. e.*, in the earth or under water. It consists of the fatty acids in combination with the alkaline earths and ammonium.

adipofibroma (*ad-ip-o-fi-bro'-mah*) [*adeps; fibroma*]. A combined fatty and fibrous tumor.

adipogenous (*ad-ip-oj'-en-us*) [*adeps*, fat; *gignere*, to produce]. Producing fat and adipose tissue.

adipol (*ad'-ip-ol*). Trade name of a mineral substance used as a base for ointments.

adipolysis (*ad-ip-ol'-is-is*) [*adeps*; λύσις, dissolution]. The cleavage or hydrolysis of fats in the process of digestion by the action of a fat-splitting enzyme.

adipolytic (*ad-ip-o-lit'-ik*). 1. Efficacious in the digestion or cleavage of fats. 2. An agent efficient in fat-digestion. Cf. *steapsin*.

adipoma (*ad-ip-o'-mah*) [*adeps*; ὄμα, a tumor]. A fatty tumor; lipoma.

adipometer (*ad-ip-om'-et-ur*) [*adeps*, fat; μέτρον, a measure]. An instrument for the estimation of fat.

adipopexis (*ad-ip-o-peks'-is*) [*adeps*; πῆξις, fixation]. Fixation of fats; storage of fats.

adipose (*ad'-ip-ōs*) [*adeps*]. Fatty. **a. tissue**, fatty tissue distributed extensively through the body. Consists of areolar connective tissue, the cells of which contain fat-globules.

adiposis (*ad-ip-o'-sis*) [*adeps*]. Corpulence; fatty infiltration. **a. dolorosa**, Dercum's disease, characterized by the formation of soft nodules throughout the connective tissue of the body, accompanied by neuralgic pains. **a. hepatica**, fatty degeneration or infiltration of the liver. **a. tuberosa simplex**, Anders' disease, *q. v.*

adipositas (*ad-ip-os'-it-as*) [L.]. Fatness; corpulency. **a. cordis**, a fatty condition of the heart. **a. universa'lis**, obesity.

adiposity (*ad-ip-os'-it-e*). Fatness; corpulency.

adiposuria (*ad-ip-o-su'-re-ah*). The presence of fat in the urine. Lipuria.

adipsa (*ad-ip'-sah*) [neut. pl. of *adipsus*, without thirst]. 1. Remedies to allay thirst. 2. Foods which do not produce thirst.

adipsia (*ah-dip'-se-ah*) [ἀ, priv.; δίψα, thirst]. Absence of thirst.

adipsous (*ah-dip'-sus*) [ἀ, priv.; δίψα, thirst]. Quenching thirst.

aditus (*ad'-it-us*) [*adire*, to go to]. In anatomy, an entrance. **a. ad antrum**, the outer side of the attic, opening upward, backward, and outward into the mastoid antrum. It gives lodgment to the head of the malleus and the greater part of the incus. **a. ad aquæductum Sylvii**, the

entrance to the ventricular aqueduct situated at the lower posterior angle of the third ventricle of the brain. **a. ad infundibulum,** a smaller canal extending from the third ventricle into the infundibulum; it is also called *vulva.* **a. ad laryngem, a. laryngis,** the entrance to the larynx. **a. glottidis,** one of the openings (superior or inferior) of the glottis.

adjuster (*ad-jus'-ter*) [Fr., *adjuster,* to adjust]. 1. A device formerly used for forcible reduction of dislocations. 2. One for holding together the two ends of a silver wire suture, to secure approximation of the parts without strain on the tissues.

adjustment, coarse. Commonly, the rack and pinion for raising or lowering the tube of a microscope a considerable distance without lateral deviation. **a., fine,** the micrometer screw generally at the top of the column of a microscope for raising or lowering the tube slowly through a short distance.

adjuvant (*ad'-ju-vant*) [*adjuvare,* to assist]. A medicine that assists the action of another to which it is added.

Adler's benzidine reaction for blood. Mix equal parts of a saturated solution of benzidine in alcohol or glacial acetic acid and of hydrogen dioxide (3 %). Add to this 1 Cc. of an aqueous solution of blood: a green or blue color develops. The blood solution should be acid in reaction.

ad lib. Abbreviation of *ad libitum* [L.]. At pleasure; as much as you please.

admaxillary (*ad-maks'-il-a-re*). Pertaining to maxillary structures. Cf. *gland, admaxillary.*

adminic'ulum lin'eæ al'bæ. See *Cooper's ligament.*

admortal (*ad-mor'-tal*) [*ad,* to; *mors, mortis,* death]. Moving from living muscular tissue toward that which is dead or dying, as electric currents.

admove, admoveatur (*ad'-mo-ve, ad-mo-ve-a'-tur*) [imper. sing. and 3d pers. sing., subj., pass., of *admovere,* to apply]. Apply; let there be applied; directions used in prescription-writing.

adnasal (*ad-na'-sal*) [*ad,* near to; *nasus,* the nose]. Pertaining to the nose.

adnata (*ad-na'-tah*) [*ad,* to; *nasci,* to be born, to grow]. 1. The *tunica adnata;* the conjunctiva; more correctly, a tendinous expansion of the muscles of the eye; it lies between the sclerotic and the conjunctiva. 2. One of the coats of the testicle.

adnate (*ad'-nāt*) [*adnatus,* grown to]. Congenitally attached or united.

adnephrin (*ad-nef'-rin*). Trade name of a preparation similar to epinephrin.

adnerval (*ad-ner'-val*) [*ad,* to; *nervus,* a nerve]. Moving toward a nerve; said of electric currents in muscular fiber.

adneural (*ad-nū'-ral*) [*ad,* to; *νεῦρον,* a nerve]. 1. A term used to describe a nervous affection in which the disease is at the very point where the symptoms appear. 2. Adnerval.

adnexa (*ad-neks'-ah*) [*ad,* to; *nectere,* to join]. Adjunct parts, as the *adnexa* of the uterus. **a. bulbi,** the appendages of the bulb of the eye. **a. oculi,** the appendages of the eye, as the lids and lacrimal apparatus. **a. uteri,** the Fallopian tubes and the ovaries.

adnexitis (*ad-nek-si'-tis*). Inflammation of the adnexa uteri.

adnexopexy (*ad-neks'-o-pek-se*). The operation of raising and fixing the uterine adnexa to the abdominal wall.

adolescence (*ad-o-les'-ens*) [*adolescere,* to grow]. The period between puberty and maturity, in males from about 14 to 25 years; in females, from 12 to 21 years.

adonidin (*ad-on'-id-in*) [*Adonis*]. A glucoside derived from *Adonis vernalis,* a plant indigenous in Europe and Asia. It is recommended in cardiac dropsy. Dose ¼–½ gr. (0.008–0.016 Gm.). **a. tannate,** a yellowish-brown powder, soluble in alcohol, slightly soluble in water; it is used in the same manner as the glucoside.

Adonis (*ad-o'-nis*). A genus of European herbs belonging to the order *Ranunculaceæ.* **A. æstivalis,** a plant much used in Italy as a cardiac tonic. Dose of *fluidextract* 1–2 min. (0.06–0.12 Cc.); of the *tincture* 10–30 min. (0.6–2.0 Cc.). **A. vernalis,** is used as a cardiac stimulant, antipyretic, and diuretic. Dose of the *tincture* 3–20 min. (0.2–1.3 Cc.).

adoral (*ad-o'-ral*) [*ad,* near to; *os,* the mouth]. Situated near the mouth.

adorbital (*ad-orb'-it-al*) [*ad,* near to; *orbita,* orbit]. Pertaining to the orbit. **a. bone,** *lacrimal bone.*

adosculation (*ad-os-ku-la'-shun*) [*ad,* to; *osculari,* to kiss]. 1. Impregnation by external contact without intromission. 2. An articulation in which one part is inserted into the cavity of another.

adrenal (*ad-re'-nal*) [*ad,* near to; *ren,* the kidney]. 1. Adjacent to the kidney. 2. The suprarenal capsule. 3. A substance, $C_{10}H_{15}NO_3$, derived from the suprarenal glands; it is crystalline, and a vasoconstrictor. It is used as a hemostatic.

adrenalectomy (*ad-re-nal-ek'-to-me*) [*adrenal;* ἐκτομη, excision]. Excision of the adrenal body.

adrenalin (*ad-ren'-al-in*), $C_{10}H_{15}NO_3$. Trade preparation containing the active principle of the suprarenal gland. **a. chloride,** used in solution of 1: 10,000 to 1. 1000 in surgical operations on the eye, ear, nose, urethra, etc.; it is a powerful astringent, hemostatic, and heart tonic.

adrenalinemia (*ad-ren-al-in-e'-me-ah*) [*adrenalin; αἷμα,* blood]. Presence of adrenalin in the blood.

adrenalinuria (*ad-ren-al-in-ū'-re-ah*) [*adrenalin; urine*]. Presence of adrenalin in voided urine.

adrenalitis (*ad-ren-al-i'-tis*). Inflammation of the suprarenal glands.

adrenals (*ad-re'-nalz*) [*ad,* near to; *ren,* the kidney]. The suprarenal capsules.

adrenamine (*ad-ren'-am-ēn*). See epinephrin.

adrenine (*ad-ren'-ēn*). A preparation of the medulla of the suprarenal gland.

adrenitis (*ad-ren-i'-tis*). Inflammation of the adrenals.

adrenol (*ad-re'-nol*). An oily solution of adrenalin.

adrenotoxin (*ad-ren-o-toks'-in*). An antibody produced when adrenal tissue is injected into an animal.

adrenotrope (*ad-ren'-o-trōp*). A person with the adrenal type of endocrine diathesis.

adrenoxidase (*ad-ren-ok'-sid-ās*). Oxygenized adrenal secretion, said to be in blood plasma.

adrenoxin (*ad-ren-oks'-in*) [*adrenal; oxygen*]. An organic compound or oxidizing substance formed in the lungs by the internal secretion of the adrenals combined with the atmospheric oxygen. This substance endows the blood-plasm with its oxidizing properties (Sajous).

adrephine (*ad'-ref-ēn*). Trade name of an adrenalin-ephedrine compound.

Adrian's mixture. A hemostatic mixture containing chloride of iron 25 parts, chloride of sodium 15 parts, and water 60 parts.

adrin (*ad'-rin*). Epinephrin hydrate, an active principle of the suprarenal gland; used as a local hemostatic and vasomotor stimulant.

adrocaine (*ad'-ro-kān*). Trade name of an adrenalin-procaine compound. Said to produce local anesthesia and to inhibit hemorrhage.

adrovaine (*ad'-ro-vān*). A preparation containing adrenalin and stovaine.

adrue (*ad-ru'-e*). Antiemetic root. The root of *Cyperus articulatus;* it is anthelmintic, aromatic, stomachic. Dose of the *fluidextract* 20–30 min. (1.3–2.0 Cc.).

adscititious (*ad-si-tish'-us*). Additional; added from without.

adsorption (*ad-sorp'-shun*). 1. The power possessed by certain substances of taking up fluids (apart from capillary attraction). 2. The process whereby a substance becomes a part of another and remains in a state midway between mechanical mixture and chemical combination.

adsternal (*ad-stern'-al*) [*ad*, near to; *sternum*]. Pertaining to or situated near the sternum.

adstrictio (*ad-strik'-she-o*) [*adstringere*, to draw together; pl., *adstrictiones*.] 1. Retention of natural excretion. 2. Action of an astringent. 3. Ligation of blood-vessel. **a. alvei,** constipation.

ADTe. Abbreviation of *anodal duration tetanus;* symbol for tetanic contraction, produced by an application of the positive pole with the circuit closed.

adterminal (*ad-ter'-min-al*) [*ad*, near to; *terminus*, the end]. Moving toward the insertion of a muscle; said of electric currents in muscular fiber.

adult (*ad'-ult*) [*adultus* from *adolescere*, to grow]. Mature; of full legal age. One of mature age. **a. sporadic cretinism,** see *myxedema.*

adulterant (*ad-ul'-tur-ant*). 1. The substance that adulterates. 2. One who adulterates.

adulteration (*ad-ul-ter-a'-shun*) [*adulterare*, to corrupt or falsify]. The admixture of inferior, impure, inert, or less valuable ingredients to an article for gain, deception, or concealment.

adustion (*ad-us'-chun*) [*adustus*, burned up]. 1. The quality of being scorched or parched. 2. Cauterization.

advancement (*ad-vans'-ment*) [Fr., *avancer*, to advance]. An operation to remedy strabismus, generally in conjunction with tenotomy, whereby the opposite tendon from the over-acting one, having been cut, is brought forward, so that, growing fast in a more advanced position, it shall have more power to act upon the globe of the eye. **a., capsular,** an operation similar to that on the tendon upon Tenon's capsule. It differs from advancement in that the tendon itself is not divided. **a. of the round ligaments,** an operation for replacement of the uterus by taking up "the slack of the round ligaments." See *Alexander's Operation.* **a. of Tenon's capsule,** see *a., capsular.*

adventitia (*ad-ven-tish'-e-ah*) [*adventitius*, foreign]. The external coat of a blood-vessel.

adventitious (*ad-ven-tish'-us*) [*adventitius*, foreign]. Accidental, foreign, acquired, as opposed to natural or hereditary; occurring out of the ordinary or normal place or abode.

advitant (*ad'-vi-tant*). Same as vitamin, *q.v.*

adynamia, adynamy (*ah-din-a'-me-ah, ah-din'-a-me*) [*ἀ*, priv.; *δύναμις*, power]. Loss of vital or muscular power; prostration.

adynamic (*ah-din-am'-ik*). See *adynamia.*

adynamicoataxic (*ad-in-am-ik-o-at-aks'-ik*). Pertaining to adynamia and ataxia.

adynatus (*ad-in'-at-us*). Weakly, sickly.

æ-. See *e* for English words beginning with æ.

Aeby, plane of. (*a'-be*) [Christoph Theodor *Aeby*, Swiss anatomist, 1835–1885]. In craniometry, one passing through the nasion and basion perpendicular to the median plane.

Aëdes (*ah-e'-dēz*) [*ἀηδής*, annoying]. A genus of mosquitoes. **A. calopus,** the mosquito of yellow fever, also called *Stegomyia calopus.*

ædœagra (*e-de-a'-grah*). See *edeagra.*

ædœitis (*e-de-i'-tis*). See *edeitis.*

ædœodynia (*e-de-o-din'-e-ah*). See *edeodynia.*

ædœology (*e-de-ol'-o-je*). See *edeology.*

ædœomania (*e-de-o-ma'-ne-ah*). See *edeomania.*

ædœoscopy (*e-de-os'-ko-pe*). See *edeoscopy.*

ædœotomy (*e-de-ot'-o-me*). See *edeotomy*

ægagropilus (*e-gag-rop'-il-us*) [*αἰγάγρος*, a wild goat; *πῖλος*, felt]. An intestinal concretion formed of hair, found in animals and occasionally in man. A bezoar.

ægilops (*e'-jil-ops*). See *egilops.*

ægobronchophony (*e-go-brong-kof'-o-ne*). See *egobronchophony.*

ægonia (*e-go'-ne-ah*) [L.]. A minor egophony.

ægophony (*e-gof'-o-ne*). See *egophony.*

aeipathia (*ah-ip-ath'-e-ah*) [*ἀεί*, always; *πάθος*, a suffering]. Constant and incurable suffering.

æluropsis (*el-u-rop'-sis*) [*αἴλουρος*, cat; *ὄψις*, appearance]. Obliquity of the eye or of the palpebral fissure.

æquabiliter juste major, or **minor pelvis** (*e-kwa-bil'-it-er*). See *pelvis.*

æquator. See *equator.*

aer (*a'-er*). 1. See *atmos.* 2. See *air.* **a. dephlogisticus,** oxygen. **a. fixus,** carbon dioxide.

aerate (*a'-er-āt*). To charge with air or gas; to oxygenate, carbonate, etc.; to arterialize.

aerated (*a'-er-a-ted*) [*ἀήρ*, atmosphere]. Charged with gas or air; arterialized. **a. waters,** waters charged with a greater amount of carbon dioxide than they will absorb under ordinary conditions.

aeration (*a-er-a'-shun*) [*ἀήρ*, air]. Charging with air or gas, such as carbon dioxide; the state of being supplied with air or gas.

aerator (*a'-er-a-tor*). A machine for forcing gas or air into liquids.

aerendocardia (*a-er-en-do-kar'-de-ah*) [*ἀήρ*, air; *ἔνδον*, within; *καρδία*, heart]. The existence of air within the heart.

aerenterasic (*a-er-en-tur-a'-sik*) [*ἀήρ*, air; *ἔντερον*, the intestine]. Flatulent, tympanitic.

aerenterectasia (*a-er-en-ter-ek-ta'-se-ah*) [*ἀήρ*, air; *ἔντερον*, intestine; *ἔκτασις*, distention]. Flatulence; distention of the abdomen by gas within the intestines.

aerial (*a-e'-re-al*). Pertaining to the air. **a. conduction,** hearing through air-vibrations.

aerhemoctonia (*a-er-hem-ok-to'-ne-ah*) [*ἀήρ*, air; *αἷμα*, blood; *κτόνος*, killing]. Death by the entrance of air into the veins.

aericolous (*a-er-ik'-ol-us*) [*aer*, air; *colere*, to inhabit]. Living in the open air.

aeriferous (*a-er-if'-er-us*) [*ἀήρ*, air; *ferre*, to bear]. Conveying air, as the trachea and its branches.

aerification (*a-er-if-ik-a'-shun*) [*ἀήρ*, air; *facere*, to make]. 1. The process of charging with air; the state of being charged with air. 2. Emphysema.

aerifluxus (*a-er-if-luks'-us*) [*ἀήρ*, air; *fluxus*, flow]. Any abnormal escape of air, as by bel hing, flatulence, etc.

aeriform (*a-e'-re-form*) [*ἀήρ*, air; *forma*, form]. Resembling air or gas.

aerify (*a-er'-e-fi*) [*ἀήρ*, air; *facere*, to make]. 1. To fill or combine with air. 2. To make gaseous.

aeris (*a'-er-is*). A name proposed by Bellamy Gardner for nitrous oxide and its admixtures.

aeroanaerobic (*a-er-o-an-a-er-o'-bik*). Applied to organisms which are both aerobic and anaerobic.

aerobe (*a'-er-ōb*) [ἀήρ, air; βίος, life]. One of the aerobia. See *aerobsc.*

aerobia (*a-er-o'-be-ah*) [ἀήρ, air; βίος, life]. Plural or *aerobion.* Organisms that require air or free oxygen for the maintenance of life. **a., facultative,** organisms normally or usually anaerobic, but under certain circumstances acquiring aerobic power. **a., obligate,** organisms dependent upon free oxygen at all times; never anaerobic.

aerobic (*a-er-o'-bik*) [ἀήρ, air; βίος, life]. Requiring oxygen (air) in order to live. A term applied to bacteria requiring free oxygen. Those which do not grow in oxygen are called *anaerobic.* There are forms that are able to grow without oxygen under favorable conditions, though they make use of it when present; others that may grow in its presence, but flourish best without; these are called respectively *facultative aerobic* or *jacultative anaerobic,* while those first mentioned are called *obligatory aerobic* or *obligatory anaerobic.*

aerobion (*a-er-o'-be-on*) [ἀήρ, air; βίος, life]. An aerobe. See *aerobia,* and *aerobic.*

aerobioscope (*a-er-o-bi'-o-skōp*) [ἀήρ, air; βίος, life; σκοπεῖν, to examine]. An apparatus for collecting and filtering bacteria from the air.

aerobiosis (*a-er-o-bi-o'-sis*) [ἀήρ, air; βίος, life]. Life that requires the presence of air, or free oxygen.

aerobiotic (*a-er-o-bi-ot'-ik*) [ἀήρ, air; βιωτικός, pertaining to life]. Thriving only in the presence of air.

aerocele (*a-er'-o-sēl*) [ἀήρ, air; κήλη, tumor]. A tumor varying with respiration, found in the thyroid region, usually unilateral, with walls resembling mucosa and containing mucous or mucopurulent matter. Sometimes congenital, but oftener the result of violent coughing or straining. When acquired, it may disappear spontaneously. Syn., *aerial bronchocele; aerial goiter; pneumatocele; tracheocele; hernia of the trachea.*

aerocolpos (*a-er-o-kol'-pos*). Distention of the vagina with air or gas.

aerocystoscope (*a-er-o-sist'-o-skōp*). Same as *aerourethroscope.*

aerocystoscopy (*a-er-o-sist-os'-ko-pe*). Examination of the bladder with the aerourethroscope, the bladder being distended with air.

aerodermectasia (*a-er-o-der-mek-ta'-ze-ah*) [ἀήρ, air; δέρμα, skin; ἔκτασις, distention]. Surgical emphysema; distention of the subcutaneous connective tissue by air.

aeroductor (*a-er-o-duk'-tor*) [ἀήρ, air; *ducere,* to lead]. An apparatus to prevent asphyxia of the fetus if the after-coming head is retained.

aerodynamics (*a-er-o-di-nam'-iks*) [ἀήρ, air; δύναμις, power]. The branch of physics that deals with gases in motion.

aeroenterectasia (*a-er-o-en-ter-ek-ta'-ze-ah*) [ἀήρ, air; ἔντερον, intestine; ἔκτασις, dilatation]. Distention of the bowels with gas.

aerogen (*a'-er-o-jen*) [ἀήρ; air; γεννᾶν, to produce]. Any gas-producing microorganism.

aerography (*a-er-og'-ra-fe*) [ἀήρ, air; γράφη, writing]. Description of air and its qualities.

aerohydropathy (*a-er-o-hi-drop'-a-the*) [ἀήρ, air; ὕδωρ, water; πάθος, disease]. Pneumatic treatment of disease, combined with hydropathy.

aerohydrotherapy. See *aerohydropathy.*

aerology (*a-er-ol'-o-je*) [ἀήρ, air; λόγος, treatise]. The science of the air and its qualities.

aerometer (*a-er-om'-et-er*) [ἀήρ, air; μέτρον, a measure]. An instrument for ascertaining the density of gases.

aeromicrobe, aeromicrobion (*a-er-o-mi'-krōb, -kro'-be-on*). See *aerobe.*

aeropathy (*a-er-op'-ath-e*). Caisson disease, *q. v.*

aeroperitoneum (*a-er-o-per-it-o-ne'-um*). Air or gas in the peritoneal cavity.

aeroperitonia (*a-er-o-per-it-o'-ne-ah*) [ἀήρ, air; *peritoneum*]. Air or gas in the peritoneal cavity.

aerophagia, aerophagy (*a-er-o-fa'-je-ah, a-er-of'-a-je*) [ἀήρ, air; φαγεῖν, to eat]. The imbibing and swallowing of air, especially observed in hysterical patients. **a., rectal,** aspiration of air by the rectum.

aerophil (*a-er'-o-fil*) [ἀήρ, air; φιλεῖν, to love]. 1. An open-air-loving person or creature. 2. Aerobic.

aerophobia (*a-er-o-fo'-be-ah*) [ἀήρ, air; φόβος, fear]. Dread of a current of air.

aerophone (*a'-er-o-fōn*) [ἀήρ, air; φωνή, sound]. An instrument for increasing the amplitude of sound-waves.

aerophore (*a'-er-o-fōr*) [ἀήρ, air; φέρειν, to carry]. 1. A device for inflating the lungs of a still-born child with air. 2. A breathing apparatus, used by firemen and others, to prevent the inhalation of noxious gases.

aerophysic (*a-er-o-fiz'-ik*) [ἀήρ, air; φυσᾶν, to inflate]. Inflated, distended with air; flatulent.

aerophyte (*a-er-o-fīt*) [ἀήρ, air; φύτον, plant]. A plant living exclusively in the air.

aeroplethysmograph (*a-er-o-pleth-iz'-mo-graf*) [ἀήρ, air; πληθυσμός, an enlargement; γράφειν, to write]. An apparatus for registering graphically the expired air; the latter raises a very light and carefully equipoised box placed over water, and this moves a writing-style.

aeropleura (*a-er-o-ploo-rah*) [ἀήρ, air; *pleura*]. Air or gas in the pleural cavity. Pneumothorax.

aeroporotomy (*a-er-o-por-ot'-o-me*) [ἀήρ, air; πόρος, a pore; τομή, a cutting]. The operation of admitting air to the lungs, as by intubation or tracheotomy.

aeroscope (*a'-er-o-skōp*) [ἀήρ, air; σκοπεῖν, to observe]. An instrument for estimating the purity of the air; also an instrument for the examination of air-dust.

aeroscopy (*a-er-os'-ko-pe*) [see *aeroscope*]. The investigation of atmospheric conditions.

aerosialophagy (*a-er-o-si-al-of'-o-je*) [ἀήρ, air; σίαλον, saliva; φαγεῖν, to eat]. The habit of constantly swallowing, and so taking air and saliva into the stomach.

aerostatics (*a-er-o-stat'-iks*) [ἀήρ, air; στατικός, standing]. The branch of physics that treats of the properties of gases at rest.

aerotaxis (*a-er-o-taks'-is*) [ἀήρ, air; τάξις, order]. A form of taxis in which living organisms are attracted or repelled by oxygen.

aerotherapeutics, aerotherapy (*a-er-o-ther-a-pū'-tiks, a-er-o-ther'-ap-e*) [ἀήρ, air; θεραπεύειν, to heal]. A mode of treating disease by varying the pressure or the composition of the air breathed.

aerothermotherapy (*a-er-o-ther-mo-ther'-ap-e*) [ἀήρ, air; θέρμη, heat; θεραπεία, therapy]. Treatment with hot air.

aerothorax (*a-er-o-tho'-raks*). See *pneumothorax.*

aerotonometer (*a-er-o-ton-om'-et-er*) [ἀήρ, air; τόνος, tension; μέτρον, a measure]. An instrument for estimating the tension of gases in the blood.

aerotonometry (*a-er-o-ton-om'-et-re*). Measurement of the tension or pressure of gases in the blood.

aerotropism (*a-er-ot'-ro-pism*) [ἀήρ, air; τρέπειν, to turn]. 1. In biology, the deflection of roots from the normal direction of growth by the action of gases. 2. The tendency of certain protozoa to mass around a bubble of air.

aerotympanal (*a-er-o-tim'-pan-al*) [ἀήρ, air; τύμπανον, a drum]. Pertaining to the air and the tympanum. Cf. *air, innate.*

aerourethroscope (*a-er-o-u-rēth'-ro-skōp*) [ἀήρ, air; οὐρήθρα, urethra; σκοπεῖν, to examine]. An instrument modified from the endoscope used in aerourethroscopy. Syn., *aerocystoscope.*

aerourethroscopy (*a-er-o-u-rē-thros'-ko-pe*) [ἀήρ, air; οὐρήθρα, urethra; σκοπεῖν, to examine]. Urethroscopy conjoined with inflation of the urethra with air.

aerozol (*a'-er-o-zol*) [ἀήρ, air; ὄζειν, to smell]. A mixture of essential oils said to contain 75% of ozone; it is used by inhalation in catarrhal affections.

aerterиversion (*a-er-ter-iv-er'-shun*). See *arterioversion.*

aerteriverter (*a-er-ter-iv-er'-ter*). See *arterioverter.*

ærugo (*e-ru'-go*) [L., gen., *ærugĭnis*]. 1. Rust of a metal. 2. Copper rust; verdigris. **æ. ferri,** the subcarbonate of iron. **æ. plumbi,** lead carbonate or subcarbonate.

ærumna (*e-rum'-nah*) [L.]. Mental distress, or mental and physical distress combined.

Aerva (*a-er'-vah*) [Ar.]. A genus of plants of the order *Amarantaceæ.* **A. lanata,** a species native of tropical Asia and Arabia. It furnishes chaya-root, which contains a mucilaginous principle and has been used as a diuretic, in strangury, and as a depurative

æs (*ēz*) [L.]. Copper or brass. See *copper.*

æsculetin. See *esculetin.*

æsculin (*es'-ku-lin*). See *esculin.*

Æsculus (*es'-ku-lus*) [L.]. A genus of sapindaceous shrubs and trees; buckeye. **Æ. glabra,** Ohio buckeye. The bark is tonic, astringent, and antiperiodic. Dose of *fluid-extract* 10–20 min. (0.6–1.2 Cc.). **Æ. hippocastanum,** horse-chestnut. The bark is tonic, astringent, antiperiodic. Dose of *fluid-extract* 20–60 min. (1.2–3.7 Cc.). **Æ. pavia,** red buckeye. The bark has been used as a febrifuge. The fruit is said to be an active convulsant.

æstates (*es-ta'-tēz*) [L., pl.]. Freckles or sunburn.

æsthema (*es-the'-mah*) [αἰσθημα; pl. *æsthemates*]. A perception, sensation, sense.

æsthematology (*es-the-mat-ol'-o-je*). See *esthematology.*

æsthesia (*es-the'-ze-ah*). See *esthesia.*

æsthesin (*es'-the-sin*). See *esthesin.*

æsthesiogen (*es-the'-se-o-jen*). See *esthesiogen.*

æsthesiography (*es-the-se-og'-ra-fe*). See *esthesiography.*

æsthesiology (*es-the-se-ol'-o-je*). See *esthesiology.*

æsthesiomania (*es-the-se-o-ma'-ne-ah*). See *esthesiomania.*

æsthesiometer (*es-the-se-om'-et-er*). See *esthesiometer.*

æsthesiometry (*es-the-se-om'-et-re*). See *esthesiometry.*

æsthesioneurosis (*es-the-se-o-nu-ro'-sis*). See *esthesioneurosis.*

æsthesis (*es-the'-sis*). See *esthesis.*

æsthetica (*es-thet'-ik-ah*) [αἰσθησις, perception by the senses]. Diseases characterized by impairment or abolition of any of the senses.

æsthophysiology (*es-tho-fiz-e-ol'-o-je*). See *esthophysiology.*

æstival (*es'-tiv-al*). See *estival.*

æstivation (*es-tiv-a'-shun*). See *estivation.*

æstuarium (*es-tu-a'-re-um*). See *estuarium.*

æstuation (*es-tu-a'-shun*). See *estuation.*

æstus (*es'-tus*) [L.]. Heat; especially a flushing, or sudden glow of heat. **æ. volaticus,** wildfire rash; strophulus.

ætas (*e'-tas*) [L.]. Age; a period of life. See *age.*

æther (*e'-ther*). See *ether.*

ætherism (*e'-ther-izm*). See *etherism.*

æthiopification (*e-the-op-if-ik-a'-shun*). See *ethiopification.*

æthiopiosis (*e-the-op-e-o'-sis*). See *ethiopification.*

æthiops (*e'-the-ops*) [Αἰθίοψ, Ethiopian]. An old term for any black mineral powder used in medicine. **æ. antimonialis,** a black triturate of mercury, antimony, and sulphur, made after several distinct formulæ. **æ. martialis,** black oxide of iron. **æ. mineralis,** black amorphous triturate of mercury with sulphur, in various proportions.

æthol (*e'-thol*). Cetyl alcohol

æthomma (*eth-om'-ah*) [αἰθός, of a burnt color; ὄμμα, the eye]. 1. Paré's term for a pigmented condition of the humors and tunics of the eye. 2. Kühn's term for a morbid condition marked by flashes of light and flame appearing before the eye.

æthyl (*eth'-il*). See *ethyl.*

Æthusa cynapium (*e-thu'-zah si-na'-pe-um*). Fool's parsley, or lesser hemlock; it contains a volatile alkaloid somewhat like coniine, also a volatile oil.

ætiology (*e-te-ol'-o-ej*). See *etiology.*

afebrile (*ah-feb'-ril*) [*a*, priv.; *febrilis*, feverish]. Without fever.

afenil (*af'-en-il*). A compound of calcium chloride and urea.

afetal (*ah-fe'-tal*) [*a*, priv.; *fetus*, an offspring]. Without a fetus.

affectability (*af-ek-tab-il'-it-e*). The power of responding to a stimulus.

affection (*af-ek'-shun*) [*afficere*, to affect]. Disease. **a., parainfectious,** one in which the symptoms or conditions are only indirectly related to the disease named; a by-condition or accessory infection of certain diseases characterized by the appearance of symptoms attributable to an intercurrent or secondary infection, as in the case of noma occurring in cases of measles and due to infection with diphtheria **a., pneumogastropituitous,** see *pertussis.* **a., polyuric,** see *luthuria.* **a., primary,** one independent of any preceding disease. **a., secondary,** one that is a complication or sequel of a preexisting disease. **a., vaporous,** see vapors.

affective (*af-ek'-tiv*) [see *affection*]. Exciting emotion. **a. faculties,** the emotions and propensities, especially those peculiar to man. **a. insanity,** emotional or impulsive insanity.

affenspalte (*ahf'-en-spahl-ta*) [German for ape's split]. The parietooccipital fissure; ape-fissure.

afferent (*af'-er-ent*) [*afferens*, carrying to]. Carrying toward the center. Of *nerves:* conveying impulses toward the central nervous system; sensory; centripetal. Of *blood-vessels:* those, as the arteries, conveying blood to the tissues. Of *lymphatics,* those conveying lymph to a lymphatic gland.

afferentia (*af-er-en'-she-ah*). See *vasa.*

affiliation (*af-il-e-a'-shun*) [*ad*, to; *filius*, son]. In medical jurisprudence, the act of imputing or

affixing the paternity of a child in order to provide for its maintenance.

affinity (*af-in'-it-e*) [*affinis*, akin to]. 1. Relationship. 2. Attraction. 3. In biology, morphologic, physiologic, and phylogenetic relationship between organisms. **a. of aggregation,** cohesive attraction; the mechanical affinity of similar molecules tending to the formation of masses. Syn., *quiescent affinity; affinitas quiescens.* **a., chemical,** the force, exerted at inappreciable distances, that unites atoms. **a. of composition,** the tendency of substances to unite directly without previous decomposition. Syn., *affinitas compositionis; simple affinity; single affinity; compound affinity; mixing affinity.* **a., developed,** that exhibited by compounds, but which is not possessed by the constituents separately. Syn., *affinitas producta; resulting affinity; secondary affinity.* **a., divellent,** the tendency to form new compounds at the expense of decomposition of those previously existing. Syn., *affinitas divellens; separating affinity.* **a., elective,** the preference of one substance for another over a second or third. **a., elementary.** 1 That which exists between the elements of two or more compounds. 2. Physicochemical relationship of elementary substances. **a., mediating,** that by virtue of which a substance lacking the power of combination with a certain substance secures it by preliminary combination with another. Syn., *appropriate affinity; imparted affinity; intermediate affinity; inducing affinity; inductive affinity; affinity of an intermedium; affinitas adjuta; affinitas appropriata; affinitas approximata.* **a., morbid,** the tendency of certain affections to exist synchronously or as sequels. **a., reciprocal,** chemical attraction between the elements of a secondary compound, tending, under altered conditions, to the reformation of the primary compound. Syn., *alternating elective affinity; affinitas reciproca.* **a., simple elective,** that exhibited by a simple body for a single element of a compound. Syn., *single elective affinity.* **a. of solution,** that existing between a dissolved substance and its solvent. **a., vital,** the selective action or chemiotaxis exhibited by the several tissues of an organism for their peculiar pabulum.

affion, affioni [Turkish]. Crude opium; it contains regularly 10% of morphine. Syn., *offium.*

affixion (*af-ik'-shun*) [*affigere*, to fasten]. Adhesion.

afflatus (*af-la'-tus*) [L., "a blowing upon"]. 1. A draft or blast of air. 2. A sudden attack. 3. A supposed inspiration or divine influence.

affluence (*af'-lu-ens*) [*affluentia*, from *affluere*, to flow to]. A determination or influx, as of blood to a part.

affluent (*af'-lu-ent*) [*affluens*, flowing to]. Producing a congestion; determinant; flowing in or upon.

afflux, affluxion (*af'-luks, af-fluk'-shun*) [*affluere*, to flow toward]. The flow of the blood or other liquid to a part.

affuse (*af-ūz'*) [*affundĕre*, to pour upon]. To sprinkle or pour upon from a height; to shower.

affusio (*af-u'-se-o*) [L.; pl., *affusiones*]. 1. An affusion. 2. Suffusion. 3. Infusion. 4. Cataract.

affusion (*af-u'-zhun*) [*affundere*, to pour upon]. The pouring of water upon an object, as upon the body in fever, to reduce temperature and calm nervous symptoms. **a., cold.** Currie's method of treating fevers by pouring cold water over the patient. Syn., *affusio frigida.*

afibroma (*ah-fi-bro'-mah*) [*ă*, priv.; *fibroma*]. A mass of fibrous tissue which is not arranged so as to form a tendon or fascia.

African arrow-poison. See *strophanthus.* **A. fever,** synonym of *dengue.* **A. gum,** gum-arabic. **A. lethargy,** a "sleeping-sickness" affecting west African coast negroes. Increasing somnolence is the characteristic symptom. It is very fatal—death from exhaustion follows in from 3 to 6 months. Syn., *nēlavan.*

afridol (*af'-rid-ol*). An antiseptic, said to be an orthotoluate of mercury and sodium.

afrodyn (*af'-ro-din*) [*ἀφροδίσια*, venery]. An aphrodisiac, the principal ingredient of which is said to be the tincture of myorapuama.

aftannin (*af'-tan-in*). An infusion of herbs with formaldehyde and glycerin used in veterinary practice.

after (*af'-ter*) [AS., *æfter*, back]. 1. The anus; the buttocks. 2. Next in succession.

after-action, the negative variation in an electrical current continuing for a short time in a tetanized muscle. **a., inner,** that involving the whole muscle or muscular fiber **a., terminal,** that affecting only the ends of the muscular fibers.

after-birth, the popular designation of the placenta, cord, and membranes, sometimes called the *secundines.*

after-brain. See *hindbrain* and *metencephalon.*

after-care, the care or nursing of convalescents; specifically, the treatment of patients discharged as cured from lunatic asylums.

after-cataract, *cataracta secundaria;* an opacity of the media of the eye after operation for cataract due to opacification of the capsule or to nonabsorption of the remains of the lens-substance.

after-current (*af-ter-kur'-ent*). See under *current.*

after-damp, a poisonous mixture of gases, such as carbon monoxide and carbon dioxide, found in coal mines after an explosion of inflammable gases.

after-gilding (*af-ter-gild'-ing*). A term introduced by Apathy to designate the process of treating nerve-tissues with salts of gold after fixation and hardening. Cf. *foregilding.*

after-hearing, a neurotic condition in which sounds are heard after the wave-motion that produces them has ceased.

after-images, continued retinal impressions after the stimulus of the light or image has ceased to act. A *positive after-image* is a simple prolongation of the sensation; a *negative after-image* is the appearance of the image in complementary colors. After sensations may be also experienced with other senses

afterings (*af'-ter-ingz*). See *after-milk.*

after-milk, the strippings; the last milk taken from the teat at any one milking. It is peculiarly rich in butter, as compared with the foremilk.

after-pains. See *pains.*

after-perception, the perception of a sensation after the stimulus has passed away.

after-production (*af-ter-pro-duk'-shun*). A new growth; neoplasm.

after-sensation, a sensation lasting longer than the stimulus producing it.

after-sound. See *after-hearing.*

after-taste, a gustatory sensation produced some time after the stimulus has been removed.

after-treatment. See *after-care.*

after-vision (*af-ter-vish'-on*). The perception of an after-image.

Ag. Abbreviation for *argentum*, Latin for silver.

agalactia (*ah-gal-ak'-te-ah*) [ἀ, priv.; γάλα, milk]. Non-secretion or imperfect secretion of milk after child-birth.

agalactous (*ah-gal-ak'-tus*) [ἀ, priv.; γάλα, milk]. 1. Without milk. 2. Not suckled; not nourished with milk. 3. Capable of diminishing the secretion of milk.

agal-agal (*ah'-gal-ah'-gal*). See *agar-agar*.

agalasia (*ah-gal-a'-ze-ah*). See *agalactia*. **a. contagiosa**, an epidemic, contagious disease of sheep and goats, marked by drying-up of the milk.

agalorrhea, or **agalorrhœa** (*ah-gal-o-re'-ah*) [ἀ, priv.; γάλα, milk; ῥέειν, to flow]. A cessation of the flow of milk.

agamete (*ag'-am-ēt*) [ἀ, priv.; γαμέτης, a spouse]. Any protozoal body which reproduces asexually.

agamic (*ah-gam'-ik*) [ἀ, priv.; γάμος, marriage]. In biology, not sexual; not pertaining to the sexual relation; asexual reproduction; parthenogenesis.

agamogenesis (*ah-gam-o-jen'-es-is*) [ἀ, priv.; γάμος, marriage; γένεσις, generation]. Reproduction without fecundation, as, *e. g.*, by gemmation. See *parthenogenesis*.

agamogenetic (*ah-gam-o-jen-et'-ik*) [ἀ, priv.; γάμος, marriage; γένεσις, generation]. Pertaining to agamogenesis.

agamont (*ag'-am-ont*) [*agamic*]. A body characterized by agamogenesis.

agamospore (*ah-gam'-o-spor*) [ἀ, priv.; γάμος, marriage; σπορά, offspring]. In biology, an asexually produced spore.

agamous (*ah'-gam-us*), [ἀ, priv.; γάμος, marriage]. Without genital organs.

aganactesis (*ag-an-ak-te'-sis*) [ἀγανάκτησις, physical pain]. Irritation; physical pain or uneasy sensation.

aganoblepharon (*ag-an-o-blef'-ar-on*) [ἀγανοβλέθορος, mild-eyed]. Adhesion of the eyelids to each other.

agar-agar (*ag'-ar-ag'-ar*) [Ceylon]. A kind of glue made from certain sea-weeds, such as *Gracilaria lichenoides* and *Gigartina speciosa*, used in medicine to make suppositories, and in bacteriological studies to make a solution in which microorganisms are bred or kept. See *gelose*.

agar hanging block (*ag'-ar*). In bacteriology a small block of nutrient agar cut from a poured plate, and placed on a cover-glass, the surface next the glass having been first touched with a loop from a young fluid culture or with a dilution from the same. It is examined upside down, the same as a hanging drop.

agaric (*ag-ar'-ik*). Touchwood; spunk; tinder; the product of different species of *Boletus*, a genus of mushrooms. *Boletus laricis*, *Polyporus officinalis*—is the *white* or *purging agaric*. *Agaric* or *agaricinic acid*, in doses of $\frac{1}{16}$–$\frac{1}{4}$ gr. (0.004–0.02 Gm.), is also useful in night-sweats. Dose of the *extract* 3–6 gr. (0.19–0.38 Gm.); of the *tincture* 3–20 min. (0.18–1.2 Cc). *Agaricus chirurgorum*, *Boletus chirurgorum*, surgeon's agaric, a parasitic fungus formerly used for *moxa*. Soaked in solution of potassium nitrate it forms *spunk*. *Agaricus muscarius*, fly agaric, poisonous mushroom, contains an alkaloid, *muscarine*. Dose of the *alkaloid* $\frac{1}{2}$–2 gr. (0.008–0.13 Gm.). *Muscarine nitrate* is used hypodermatically. Dose $\frac{1}{10}$–$\frac{1}{4}$ gr. (0.006–0.048 Gm.).

agaricin (*ag-ar'-is-in*) [see *agaricus*]. 1. $C_{16}H_{32}O_3 + H_2O$. A white, crystalline substance, the active principle of *Agaricus albus*. It has proved useful in the night-sweats of pulmonary tuberculosis. Dose $\frac{1}{10}$–$\frac{1}{10}$ gr. (0.003–0.006 Gm.). Unof. 2. An impure alcoholic extract of the agaric, *Polyporus officinalis;* used as an anhidrotic.

Agaricus (*ag-ar'-ik-us*) [ἀγαρικόν, of Dioscorides, from *Agaria*, a former district of Poland or Sarmatia, whence the Greeks derived the larch agaric]. A large genus of hymenomycetous fungi; mushrooms and toadstools. Cf. *Polyporus amanita*. **A. chirurgorum**, see under *agaric*. **A. rubra, A. sanguinea**, these species, indigenous to France, were formerly included under *A. rubra*. They yield the alkaloid *agarythrine* and the rose-red coloring-matter *ruberin*.

agarol (*ag'-ar-ol*). A modified mineral oil with phenolphthalein and agar agar, emulsionized without saponification; used for constipation.

agarythrine (*ag-ar'-ith-rin*). A yellowish-white alkaloid extracted by ether from *Agaricus rubra* and *A. sanguinea*. It has a bitter taste and leaves a burning sensation in the mouth.

agaster (*ah-gas'-ter*) [ἀ, priv.; γαστήρ, the stomach]. One without a stomach.

agastric (*ah-gas'-trik*) [see *agaster*]. Without an intestinal canal, as the tape-worms.

agastronervia (*ah-gas-tro-ner'-ve-ah*) [ἀ, priv.; γαστήρ, the stomach; *nervus*, a nerve or sinew]. See *agastroneuria*.

agastroneuria (*ah-gas-tro-nū'-re-ah*) [ἀ, priv.; γαστήρ, the stomach; νεῦρον, a nerve]. Deficiency in the nerve-stimulus sent to the stomach.

agathin (*ag'-ath-in*) [ἀγαθός, good], $C_6H_4(OH).CH.N.N.(CH_3).C_6H_5$. A greenish-white, crystalline substance, obtained by the interaction of salicylic aldehyde and α-methylphenylhydrazine. It is used as an antineuralgic in doses of 8 gr. (0.52 Gm.) 2 or 3 times daily. Its action is cumulative.

Agave (*a-ga'-ve*) [ἀγαυή, noble]. A large genus of amaryllidaceous plants, natives of North America. *A. americana*, American aloe, the leaves of a plant growing in North America. It is diuretic and antisyphilitic. Dose of the *fluidextract* $\frac{1}{2}$–1 dr. (2–4 Cc.). The fresh juice is also similarly employed. The fermented juice, called *pulque*, is a moderately stimulant drink, very popular in Mexico.

AgCl. Silver chloride.

AgCN. Silver cyanide.

age (*āj*). The length of time a being has existed; also, a certain stage in life. **a. of consent**, in medical jurisprudence the age at which a minor is considered capable of consenting to sexual intercourse; it is usually placed at 16 years. **a. critique**, the climacteric. **a., marriageable, a., nubile**, see *nubility*. **a. of puberty**, see *puberty*.

agenesia, agenesis (*ah-jen-e'-se-ah, ah-jen'-es-is*) [ἀ, priv.; γένεσις, generation]. 1. Incomplete and imperfect development. 2. Impotence, barrenness.

agenetic (*ah-jèn-et'-ik*) [ἀ, priv.; γένεσις, generation]. Denoting or pertaining to characters or units which tend to destroy the race or cause it to deteriorate.

agenitalism (*ah-jen'-it-al-izm*). The symptom complex found in persons who lack testicles or ovaries.

agenosomia (*ah-jen-o-so'-me-ah*) [ἀ, priv.; γεννᾶν, to beget; σῶμα, body]. Defective development of the genitals.

agenosomus (*ah-jen-o-so'-mus*) [ἀ, priv.; γεννάν, to beget; σῶμα, body]. A variety of single autositic monsters, of the species *Celosoma*, in which there is a lateral or median eventration occupying principally the lower portion of the abdomen, while the genital and urinary organs are either absent or very rudimentary.

agent (*a'-jent*) [*agree*, to act, to do]. A substance or force that by its action effects changes in the human body.

agerasia (*aj-er-a'-ze-ah*) [ἀγηρασία, eternal youth]. Vigorous healthy old age.

ageusia, ageustia (*ah-gu'-se-ah, ah-gu'-ste-ah*) [ἀ, priv.; γεῦσις, taste]. Abolition of the sense of taste. **a., central,** that due to lesion of the cerebral centers of the gustatory nerves. **a., conduction,** that due to lesion in the nerves between their origin and distribution. **a., peripheral,** that due to disorder of the ends of the nerves of taste.

agger (*aj'-er*) [L.]. In anatomy, a pile or mound. **a. nasi,** an oblique ridge on the inner surface of the nasal process of the maxilla; also called *crista ethmoidalis*. **a. valvulæ venæ** [*pl. aggeres valvularum venarum*], the eminence of a venous valve; a projection within the lumen of a vein at the junction of a valve.

agglomerate (*ag-lom'-er-āt*) [*agglomerare*, to wind into a ball]. Grouped or clustered.

agglutinant (*ag-gloo'-tin-ant*). A substance which causes agglutination.

agglutinatio (*ag-gloo-tin-a'-she-o*). Agglutination. **a. maxillæ inferioris** trismus.

agglutination (*ag-gloo-tin-a'-shun*) [*ad*, to; *glutinare*, to paste]. 1. A joining together. 2. A copulative phenomenon accompanying hemolysis or bacteriolysis, thought by Gruber to be due to some deleterious effect on the membrane of the bacteria or blood-corpuscles which makes it sticky. **a. test,** see *Widal's test*.

agglutinative (*ag-gloo'-tin-a-tiv*) [see *agglutination*] 1. Favoring agglutination; adhesive. 2. Any adhesive substance that retains the edges of wounds in apposition. 3. A remedy that promotes repair of wounds by favoring nutrition.

agglutinin (*ag-gloo'-tin-in*) [see *agglutination*]. A specific principle occurring in the blood-serum of an animal affected with a disease of microbic origin and capable of causing the clumping of the bacteria peculiar to that disease, as exemplified in the Widal reaction. In *iso-agglutinin*, the reaction is wider, the agglutinin proving more or less active with all bacteria belonging to a certain group.

agglutinogen (*ag-gloo'-tin-o-jen*). 1. A substance which when introduced into the body is capable of causing the formation of an agglutinin. 2. An inheritable substance which agglutinates the blood of parent and child only.

agglutinoid (*ag-gloo'-tin-oid*). An agglutinin with the zymotoxic group deficient or absent.

agglutinophore (*ag-gloo-tin'-o-fōr*). Same as *zymophore, q. v.*

agglutinoscope (*ag-gloo'-tin'-o-skōp*) [see *agglutination; σκοπεῖν*, to view]. An instrument used to observe the process of agglutination in a test-tube, and to facilitate the reading of the result.

agglutitio (*ag-gloo-tish'-e-o*) [*ad*, against; *glutire*, to swallow]. Difficult deglutition; an obstruction to swallowing.

agglutogen (*ag-gloo'-to-jen*). See *agglutinogen*.

agglutogenic (*ag-gloo-to-jen'-ik*) [*agglutinin; generare*, to produce]. Relating to substances from which agglutinins originate.

agglutometer (*ag-gloo-tom'-et-er*). An apparatus used in performing the agglutination or Widal test.

aggregate (*ag'-re-gāt*) [*ad*, to; *gregare*, to collect into a flock]. Grouped into a mass. **a. glands,** Peyer's patches.

aggregation (*ag-re-ga'-shun*) [*ad*, to; *gregare*, to collect into a flock]. 1. The massing of materials together. 2. A congeries or collection of bodies, mostly of such as are similar to each other.

aggressin (*ag-res'-in*) [*aggressio*, an attack]. A substance produced in the body by bacteria, having the property of weakening the normal protective substances of the body. By some it is held that this substance increases the virulence of the bacteria.

aggressinogen (*ag-res-in'-o-jen*). An antigen which gives rise to aggressins.

aggressivity (*ag-res-iv'-it-e*). The degree of activity displayed by an invading microorganism against the protective forces of the host.

AgI. Silver iodide.

agitation (*aj-it-a'-shun*) [*agitare*, to excite, arouse]. 1. Fatiguing restlessness with violent motion; mental disturbance. 2. Stirring or shaking, as in pharmacy.

agitographia (*aj-it-o-graf'-e-ah*) [*agitare*, to excite; γράφειν, to write] A condition in which the hand-writing is defective, owing to omission or slurring or distortion of letters, syllables, or words.

agitophasia (*aj-it-o-fa'-ze-ah*) [*agitare*, to excite; φάσις, speech]. A condition of excessive rapidity of speech with sounds or syllables slurred, omitted or distorted.

aglandular (*ah-glan'-du-lar*) [ἀ, priv.; *glandula*, a gland]. Having no glands; without glands

aglaucopsia, see *aglaukopsia*.

aglaukopsia (*ag-law-kop'-se-ah*) [ἀ, priv.; γλαυκός, green; ὄψις, vision]. Green-blindness.

aglia (*ag'-le-ah*) [L.]. A speck or spot upon the cornea or on the white of the eye.

aglobulia (*ah-glo-bu'-le-ah*). A decrease in the number of red blood-corpuscles.

aglobulism (*ah-glob'-u-lizm*) [ἀ, priv.; *globulus*, a globule]. Aglobulia; oligocythemia.

aglossia (*ah-glos'-e-ah*) [ἀ, priv.; γλῶσσα, the tongue]. 1. Absence of the tongue. 2. Dumbness; senile impairment of speech

aglossostomia (*ah-glos-o-sto'-me-ah*) [ἀ, priv.; γλῶσσα, the tongue; στόμα, mouth]. The condition of a mouth without a tongue.

aglossus (*ah-glos'-us*) [see *aglossia*]. A person without a tongue.

aglutition (*ah-glu-tish'-un*) [ἀ, priv.; *glutire*, to swallow]. Difficulty in swallowing; inability to swallow.

aglycosuric (*ah-gli-ko-sū'-rik*) [ἀ, priv.; *glycosuria*]. Free from glycosuria.

agmatine (*ag'-mat-ēn*). A protein derivative having a direct action upon the uterine muscle, inducing contractions, but it is less potent than ergamine.

agmatology (*ag-mat-ol'-o-je*) [ἄγμός, a fracture; λόγος, a discourse]. The science or study of fractures.

agmel (*ag'-mel*). Concentrated juice of the Agave.

agmen (*ag'-men*) [*agmen*, a multitude]. A collection, a crowd. **a. peyerianum,** Peyer's patches.

agminate, agminated (*ag'-min-āt, ag'-min-a-ted*) [*agmen*, a multitude]. Aggregated; clustered. **a. gland,** see *gland, Peyer's*.

agnail (*ag'-nāl*). 1. Hangnail. 2. Whitlow. 3. A corn.

agnathia (*ah-gna'-the-ah*) [ἀ, priv.; γνάθος, a jaw]. Absence or defective development of the jaws.

agnathus (*ag'-na-thus*) [ἀ, priv.; γναθος, a jaw]. A monster with no lower jaw.

agnea, or agnœa (*ag-ne'-ah*) [ἀγνοια, want of perception]. A condition in which the patient does not recognize things or persons.

Agnew's splint (*ag'-nū*) [David Hayes *Agnew*, American surgeon, 1818–1892]. *For hip-joint disease;* a long splint with a perineal band (fitted closely against the tuber ischii) and a foot-piece; used after the disappearance of acute symptoms and designed to support the weight of the trunk.

agnin (*ag'-nin*) [*agnus*, a lamb]. A fatty substance derived from sheep's wool.

agnina membrana (*ag-ni'-nah mem-bra'-nah*) [L.]. The ammion.

$AgNO_3$. Silver nitrate.

agnolin (*ag'-no-lin*). Purified wool fat; adeps lanæ.

agnosia (*ah-gno'-se-ah*) [ἀ, priv ; γνῶσις, a recognizing]. Loss of the perceptive faculty which gives recognition of persons and things.

Ag_2O. Silver oxide.

agocholan (*ag-ok'-ol-an*). Trade name of cholosalicylate of strontium; used as a cholagogue.

-agoga, -agogue [ἀγωγός, one who leads]. A suffix, denoting agents that drive out other substances, as emmenagogues, lithagogues, etc.

agomensin (*ag-o-men'-sin*). A preparation from the corpus luteum; used to increase the menstrual flow, and to aid development in retarded sexual cases.

agomphiasis (*ah-gom-fi'-as-is*) [ἀ, priv.; γομφίος, a tooth]. Same as *agomphosis*.

agomphious (*ah-gom'-je-us*) [ἀ, priv.; γομφίος, a tooth]. Without teeth.

agomphosis (*ah-gom-fo'-sis*) [see *agomphious*]. 1. Absence of teeth. 2. A loosening of the teeth.

agonal (*ag'-on-al*) [ἀγωνία, a struggle]. 1. Struggling; relating to the death-struggle. 2. Santalol benzoate.

agonia (*ag-o'-ne-ah*) [ἀγωνία, a contest or struggle]. 1. Distress of mind; extreme anguish. 2. The death struggle. [ἄγονος, barren]. Barrenness; sterility; impotence. **a. bark**, see *agonada*.

agoniadin (*ag-on-i'-ad-in*), $C_{10}H_{14}O_6$. A glucoside in Agonia bark. Used as an anti-periodic.

agonous (*ag'-o-nus*) [ἄγονος, unfruitful]. Barren; impotent.

agony (*ag'-o-ne*) [see *agonal*]. Violent pain; extreme anguish; the death-struggle.

agopyrine (*ag-o-pi'-rin*). An influenza remedy said to contain salicin, 4 gr.; ammonium chloride ½ gr.; cinchonine sulphate, ½ gr.

agoraphobia (*ag-o-ra-fo'-be-ah*) [ἀγορά, a marketplace, assembly; φόβος, fear]. A morbid fear of open places or spaces.

agoriadin (*ag-o-ri'-ad-in*) [Sp.]. $C_{10}H_{14}O_6$. A glucoside, probably the active principle of *agoriada*.

Agostini's reaction for glucose. To 5 drops of the urine add 5 drops of 0.5% solution of gold chloride and 3 drops of 20% potash solution, and heat gently. In the presence of glucose a red color will be produced.

Ag_3PO_4. Silver phosphate.

-agra (ἄγρα, a seizure]. A Greek word added as a suffix to various roots to denote *seizure, severe pain;* as podagra, etc.

agraffe (*ag-raf'*) [Fr. *agrafe*, a hook, clasp]. An instrument to keep the edges of a wound together.

agrammatism (*ah-gram'-at-ism*) [ἀ, priv.; γράμμα, a word]. A phenomenon of aphasia, consisting in the inability to form words grammatically, or the suppression of certain words of a phrase.

agranulocytosis (*ah-gran-u-lo-si-to-sis*). Absence, or great decrease in number of granulocytes.

agraphia (*ah-graf'-e-ah*) [ἀ, priv.; γράφειν, to write]. Inability to express ideas by writing. **a., absolute**, a variety in which no letters can be formed. Syn., *literal agraphia*. **a., acoustic**, loss of capacity to write from dictation. **a. amnemonica**, a form in which letters can be written, but without conveying any meaning. **a. atactica**, that form in which letters cannot be formed from lack of muscular coordination. **a., literal, a. literalis**, see *a., absolute*. **a., motor**, inability to recall the movements of the hand necessary in writing. **a., musical**, pathological loss of the ability to write musical notes. **a., optic**, inability to copy writing, but ability to write from dictation. **a., verbal**, a variety in which a number of words without meaning can be written. Cf. *paragraphia*.

agraphic (*ah-graf'-ik*) [see *agraphia*]. Affected with or pertaining to agraphia.

agremia (*ag-re'-me-ah*) [ἄγρα, seizure; αἷμα, blood]. The condition of the blood in gout; the gouty diathesis.

agria (*ag'-re-ah*) [ἄγριος, wild]. A pustular eruption; malignant pustule; herpes.

agridinium (*ag-rid-in'-e-um*). A dye-stuff used with arsenophenylglycin, as a trypanocide.

agrielcosis (*ag-re-el-ko'-sis*) [ἄγριος, wild; ἕλκωσις, ulceration]. A malignant ulceration.

agrilin (*ag'-ril-in*). Trade name of a preparation containing mineral oil and agar-agar.

agrimony (*ag'-rim-o-ne*) [ἀγρός, a field; μόνος, alone]. The root of *Agrimonia eupatoria*, a mild astringent. Dose of *fluidextract* ½–2 dr. (2–8 Cc.).

agriopsoria (*ag-re-op-so'-re-ah*) [ἄγριος, wild; ψώρα, itch]. An incurable or severe attack, or variety, of itch.

agriothymia (*ag-re-o-thi'-me-ah*) [ἄγριος, wide; θυμός, mind; will]. Maniacal fury.

agrippa (*ag-rip'-ah*) [L.]. One born with the feet foremost.

agromania (*ag-ro-ma'-ne-ah*) [ἀδρός, a field; μανία, madness]. A mania for living in the country.

agron [East Indian]. A disease which occurs in India, marked by roughening of the tongue, with fissures.

agrypnetic (*ah-grip-net'-ik*) [ἀγρύπνος, sleepless] 1. Sleepless; wakeful. 2. Preventing sleep; agrypnotic.

agrypnia (*ah-grip'-ne-ah*) [ἀγρύπνος sleepless]. Loss of sleep; insomnia.

agrypnocoma (*ah-grip-no-ko'-mah*) [ἀγρύπνος, sleepless; κῶμα, coma]. Coma vigil; wakeful lethargy, with low-muttering delirium.

agrypnotic (*ah-grip-not'-ik*) [ἀγρύπνος, sleepless]. 1. Preventing sleep; causing wakefulness. 2. A medicine that prevents sleep.

Ag_2S. Silver sulphide.

$AgSO_4$. Silver sulphate.

aguamiel (*ah-goo-ah-me-el'*) [Sp.]. The sap of the pulque magueys, *A. gave atrovirens*, and *A. Mexicana*. From it is made the fermented drink pulque. It is said to have diuretic, laxative, galactagogue, and nutrient properties.

ague (*a'-gū*) [*acutus*, sharp; acute; Fr., *aigu*]. 1. Malarial or intermittent fever; characterized by paroxysms consisting of chill, fever, and sweating, at regularly recurring times, and followed by an interval or intermission the

length of which determines the epithets quotidian, tertian, etc. In some cases there is a double paroxysm, and hence these are called double quotidian, double tertian, etc. The duration of each paroxysm varies from 2 to 12 hours. Syn., *fever and ague; intermittent fever; periodic fever; malarial fever; marsh fever; paludal fever; miasmatic fever.* 2. A chill. **a., Aden,** see *dengue.* **a., brass-founders',** a disease common among brass-founders, characterized by symptoms somewhat resembling an imperfect attack of intermittent fever, the recurrence of the paroxysms, however, being irregular. The direct cause is generally thought to be the inhalation of the fumes of deflagrating zinc or "spelter." **a., brow-,** intermittent neuralgia of the brow. **a.-cake,** chronic enlargement of the spleen in diseases of malarial origin. **a., catenating,** ague associated with other diseases. **a.-drop,** see *Fowler's solution.* **a., dumb,** ague without well-marked chill, and with at most only partial or slight periodicity. Syn., *dead ague; irregular ague; latent ague; masked ague.* **a., face,** tic douloureux. **a., partial,** ague attended with pain which is limited to some part or organ. **a.-tree,** common sassafras. **a.-weed.** 1. See *Gentiana.* 2. *Eupatorium perfoliatum,* or thoroughwort.

aguish (*a'-gu-ish*). Resembling or relating to ague; affected with ague.

agurin (*ag'-ū-rin*). A compound of sodium theobromate and sodium acetate; it is recommended as a diuretic in doses of 24 gr. (1 5 Gm).

Ah. Abbreviation of hypermetropic astigmatism.

Ahlfeld's sign (*ahl'-felt*) [Johann Friedrich *Ahlfeld,* German obstetrician, 1843–]. Irregular tetanic contractions affecting localized areas of the uterus, observed after the third month of pregnancy.

ahypnia (*ah-hip'-ne-ah*) [ἀ, priv.; ὕπνος, sleep]. Sleeplessness.

ahypnosis (*ah-hip-no'-sis*) [ἀϋπνία, sleeplessness]. Entire absence of the capacity to sleep, most marked in insanity.

aichmophobia (*āk-mo-fo'-be-ah*) [ἀιχμή, a spear point; φοβέιν , to fear]. An extravagant dread of sharp or pointed instruments.

Aich's metal (*īk*). An alloy of iron and zinc.

aidoio- (*a-doi'-o*). See *edeo-.*

aidoiomania (*a-doi-o-ma'-ne-ah*). See *edeomania.*

ail (*āl*) [ME., *eyle*]. 1. To be out of health. 2. A slight indisposition. 3. Garlic. **a., Wetherbee,** a popular name for progressive muscular atrophy, from the fact that several successive generations of a Massachusetts family of that name were affected with the disease.

Ailanthus (*a-el-an'-thus*). See *Ailantus.*

ailantus (*a-el-an'-tus*) [Malacca, *aslanto,* "tree of heaven"]. The bark of *A. glandulosa,* commonly known as "tree of heaven." Its properties are due to an oleoresin and a volatile oil. It is a nauseant and drastic purgative and an excellent anthelmintic against tape-worm. Dose of *fluidextract* 10 min.–1 dr. (0.6–4.0 Cc.); of *tincture* 10 min.–2 dr. (0.6–8.0 Cc.).

ailing (*āl'-ing*). Indisposed; out of health; not well.

ailment (*āl'-ment*) [ME., *eyle*]. A disease; sickness; complaint.

ailurophilia (*a-lū-ro-fil'-e-ah*) [αἴλουρος, a cat; φιλεῖν, to love]. An excessive fondness for cats.

ailurophobia (*a-lu-ro-fo'-be-ah*) [αἴλουρος a cat; φόβος, fear]. A morbid fear of cats.

ainhum (*in'-hoom*) [negro word, meaning to *saw*]. A disease of Guinea and Hindustan, peculiar to negroes, in which the little toes are slowly and spontaneously amputated at about the digito-plantar fold. The process is very slow, is unaccompanied by any constitutional symptoms, and its cause is unknown. It sometimes attacks the great toe.

aiodine (*ah-i'-o-din*). A preparation of the thyroid gland and tannin. It is a tasteless powder, of which each gram is said to represent 10 Gm. of the fresh glands and to contain 0.4 % of iodine. It is used in myxedema.

air [ἀήρ, the lower, dense air as distinguished from αἰθήρ, the upper and purer air]. The atmosphere. *Atmospheric air* consists of a mixture of 77 parts by weight, or 79.19 by volume, of nitrogen, and 23 parts by weight, or 20.81 by volume, of oxygen, with 0.03 to 0.06 parts by volume of CO_2. It also contains traces of ammonia, argon, nitrites, and organic matter. By virtue of its oxygen it is able to sustain respiration. One hundred cubic inches weigh 30.935 gr. The pressure of the air at sea-level is about 14¾ pounds upon the square inch. **a., alkaline,** free or volatile ammonia. **a., azotic,** nitrogen. **a.-bag,** see *a.-cushion.* **a.-bath,** therapeutic exposure to air, which may be heated, condensed, or variously medicated. **a.-bed,** an air-tight rubber mattress, inflated with air, employed in conditions requiring prolonged confinement to bed. **a.-bladder,** see *a.-vesicles.* **a.-cell,** an air-sac; an air-vesicle of the lung. **a., complemental,** the amount of air that can still be inhaled after an ordinary inspiration. **a. conduction,** a method of testing the hearing-power by means of a watch held at varying distances from the ear, or by the employment of a number of tuning-forks of varying pitch. **a.-cure,** the therapeutic employment of air. **a.-cushion,** a cushion filled with air, and usually made of soft india-rubber. **a., dephlogisticated,** an old name for oxygen. **a.-douche,** the inflation of the middle ear through the nose. **a.-embolism,** the entrance of free air into the blood-vessels during life. **a., expired,** that driven from the lungs in expiration. **a., factitious,** carbon dioxide. **a., fixed,** an old name for carbon dioxide. **a., hepatic,** hydrogen sulphide. **a.-hunger,** dyspnea on both inspiration and expiration. **a., inspired,** that taken into the lungs on inspiration. **a., liquid,** air which has been liquefied by intense pressure; an extreme cold is produced by its evaporation. **a., mephitic,** carbon dioxide. **a.-passages,** the nares, mouth, larynx, trachea, and bronchial tubes. **a., phlogisticated,** an old name for nitrogen. **a.-pump,** an apparatus for exhausting or compressing air. **a., reserve, a., supplemental,** the air that can still be exhaled after an ordinary expiration. **a., residual,** that remaining in the lungs after the most complete expiration possible. **a.-sac,** see *a.-vesicles.* **a., solid, of Hales,** carbon dioxide; so called because of its property of forming solid carbonates with metallic oxides. **a.-space,** a space in tissues filled with air or other gases. **a., stationary,** that remaining in the lungs during normal respiration. **a., supplemental,** see *a., reserve.* **a.-tester,** an instrument for testing the purity of the air. **a., tidal,** that taken in and given out at each respiration. **a.-trap,** a trap to prevent the escape of sewer gas. **a.-vesicles,** the alveoli of the lung, the ultimate division of

the air-passages. **a., vital**; old name for oxygen.

air-break wheel, air-breaking wheel. An arrangement by means of which the sparks may be promptly extinguished when using a 110-volt continuous current to excite a coil; the spark formed at the contact-brushes when the coil is energized is blown out instantaneously by the air-blast.

airoform (*ār'-o-form*). Same as *airol.*

airogen (*ār'-o-jen*). See *airol.*

airol (*ār'-ol*). Trade name for *bismuth iodosubgallate. q. v.*

Aitken's pill (*ait'-ken*) [Sir William *Aitken*, Scotch physician, 1825–1892]. It contains reduced iron gr. ⅔, quinine sulphate, gr. j, strychnine and arsenic trioxide āα gr. $\frac{1}{10}$.

Aitkin's operation (*āt'-kin*) [John Aitkin, Scotch surgeon, –1790]. A double hebotomy in case of dystocia resulting from a narrow pelvis.

ajakol (*aj'-ak-ol*). Trade name of a disinfectant containing pyrocatechin ethyl ether.

akamathesia, akamathesis. See *akatamathesia.*

akamushi disease (*ah-kah-mu'-she*) [Jap. *aka*, red; *mushi*, bug, or insect]. Japanese river fever.

akanthesthesia (*a-kan-thes-the'-ze-ah*) [ἄκανθα, a thorn; αἰσθησις, sensation]. A form of paresthesia or perverted sensation in which there is a feeling as of a sharp point.

akanthion (*a-kan'-the-on*). See *acanthion.*

akaralgia (*ak-ar-al'-je-ah*). A proprietary "headache cure." It contains sodium salicylate, sodium sulphate, magnesium sulphate, lithium benzoate, and nux vomica.

akarkine (*ak-ar'-kin*). Trade name for arsenic albuminate; it is used as a cancer cure.

akatamah (*ak-ah-tah'-mah*). The native West Central African name for an endemic peripheral neuritis of obscure origin marked by numbness and intense prickling and burning in the presence of cold or damp.

akatamathesia (*ah-kat-am-ath-e'-ze-ah*) [ἀ, priv.; καταμάθησις, understanding]. Inability to understand.

akathisia (*ah-kath-e'-ze-ah*) [ἀ, priv.; καθίζειν, to be seated]. A name given by Lad Haskovec to a form of rhythmic chorea in which the patient is unable to remain seated; the affection resembles astasiaabasia.

Äkerlund deformity. A deformity of the duodenal cap, caused by an ulcer.

akidopeirastic (*ak-id-o-pi-ras'-tik*) [ἀκή, ἀκίς, needle; πειραστικός, proving]. Relating to the exploratory puncture of a diseased area by means of a stout needle.

akidopeirastica (*ak-id-o-pi-ras'-tik-ah*) [ἀκίς, a point; πειράζειν, to make a trial of]. Exploratory incision or puncture.

akinesia, akinesis (*ah-kin-e'-se-ah, ah-kin-e'-sis*) [ἀ, priv.; κίνησις, motion]. Lack of or imperfect motion; motor paralysis. **a. algera**, an affection characterized by abstinence from voluntary movement on account of pain, which any active muscular effort causes. The condition is probably a form of neurasthenia. **a., crossed**, a motor paralysis on the side opposite that in which the lesion exists. **a., reflex**, impairment or loss of reflex action.

akinesis, cerebral, that in which the lesion is in the cerebrum. **a. iridis**, rigidity or immobility of the iris. **a., spinal**, motor impairment due to a lesion of the cord.

akinetic (*ah-ki-net'-ik*) [*akinesia*]. 1. Relating to or affected with akinesia. 2. An agent lessening muscular action.

akiyama (*ak-e-yah'-mah*). An infectious disease caused by a leptospira.

akoulalion (*ah-koo-la'-le-on*) [ἀκούειν, to hear; λάλος, speech]. A mechanical contrivance to aid defective audition, used in training the deaf and dumb to speak.

akouphone (*ah'-koo-fōn*) [ἀκούειν, to hear; φωνή, sound]. A mechanism to aid defective hearing.

SPADE HAND OF ACROMEGALY.

akromegaly, akromegalia (*ak-ro-meg'-a-le, ak-ro-me-ga'-le-ah*). See *acromegaly.*

Al. Chemical symbol of aluminum.

al. 1. The Arabic definite article *the*, prefixed to many words to designate preeminence, etc., as alkali, alcohol. 2. A chemical suffix denoting similarity to or derivation from an aldehyde, as chlor*al*, butyr*al*, etc.

ala (*a'-lah*) [L., "a wing:" *pl.*, *alæ*]. 1. A wing. 2. Any wing-like process. 3. The arm or shoulder; in animals, the shoulder-blade. **a. alba lateralis**, the nucleus of the glossopharyngeal nerve. **a. alba medialis**, the hypoglossal nucleus. **a. auris**, the pinna of the ear. **a. cinerea**, a triangular space of gray matter in the fourth ventricle of the brain, probably giving origin to the pneumogastric nerves. **a. descendens**, the pterygoid process of the sphenoid bone. **a. ethmoidalis**, the alar process of the ethmoid. **alæ laterales.** 1. The great wings of the sphenoid bone. 2. Wing-like processes on each side of the nasal spine of the frontal bone. **a. lob'uli antra'lis**, the lateral part of the median cerebellar lobe. **a. mag'na**, the great wing of the sphenoid. **a. par'va**, the small wing of the sphenoid. **a. pon'tis**, the posterior part of the roof of the fourth ventricle. **alæ majores.** 1. The greater wings of the sphenoid. 2. The external labia pudendi. **alæ minores.** 1. The lesser wings of the sphenoid. 2. The labia minora pudendi. **a. nasi**, the lateral cartilage of the nose. **alæ parvæ**, the lesser wings of the sphenoid. **alæ pulmonum**, the lobes of the lung. **a., of sacrum**, the flat, triangular surface of bone extending outward from the base of the sacrum, supporting the psoas magnus muscle. **a. uvulæ**, a medullary layer running from the posterior part of the uvula of the cerebellum to the amygdalæ. **a. vespertilionis**, the broad ligament of the uterus. **alæ vulvæ**, the labia of the pudendum.

alabaster (*al-a-bas'-ter*). 1. Hydrous calcium sulphate. 2. Calcium carbonate.

alabastrine (*al-a-bas'-trēn*). 1. Relating to or resembling alabaster. 2. Naphthalene.

alacet (*al'-as-et*). A preparation containing 60% of formic acid; it is used as a food preservative.

alalia (*al-a'-le-ah*) [ἀ, priv.; λαλιά, talk]. 1. Impairment of articulation from paralysis of the muscles of speech or from local laryngeal disease. 2. Aphasia due to a psychic disorder. **a., mental**, a form observed in children, which consists in inability to speak through excessive stammering. Cf. *dyslalia, lalophobia, mogilalia, paralalia.* **a., relative**, same as *a., mental.*

alalic (*al-a'-lik*) [ἀ, priv.; λαλιά, talk]. Characterized by or pertaining to alalia.

alangine, alanginum (*al-an'-jin, -um*). An alkaloid obtained from *Alangium lamarkii*, soluble in alcohol, in ether, and in chloroform; it is used as a febrifuge and emetic.

alanin (*al'-an-in*), $C_3H_7NO_2$. Lactamic acid. An organic base obtained by heating aldehyde ammonia with hydrocyanic acid in the presence of an excess of HCl. It occurs in aggregated hard nodules with a sweetish taste. It is soluble in 5 parts of cold water; less soluble in alcohol; insoluble in ether. **a., mercury,** mercury amidopropionate.

alant camphor. A camphor from elecampane. See *helenin.*

alantic (*al-an'-tik*) [Ger., *alant*, elecampane]. Pertaining to or derived from elecampane. **a. anhydride,** $C_{15}H_{10}O_2$, a crystalline substance derived from the root of elecampane.

alantin (*al-an'-tin*). Same as *inulin.*

alantol (*al-an'-tol*). $C_{20}H_{32}O$. Inulol. An aromatic liquid obtained from elecampane; used like creosote in pulmonary tuberculosis.

alar (*a'-lar*) [*ala*, a wing]. 1. Wing-like. 2. Relating to the shoulder, or axilla. **a. ligaments,** lateral synovial folds of the ligament of the knee-joint. **a. ligaments, odontoid,** lateral ligaments of the odontoid process.

alares [pl. of *alaris*]. 1. The pterygoid muscles. 2. The wings of the sphenoid.

alaris (*al-a'-ris*) [*ala*, a wing]. Wing-shaped. See *alar.*

alastrim (*al-as'-trim*). A specific, contagious disease, somewhat resembling smallpox, found in Brazil, the West Indies, and Africa. See *amaas.*

alate (*a'-lāt*) [*ala*]. Winged.

alatus (*al-a'-tus*). 1. Winged. 2. An individual in whom there is a marked backward projection of the shoulder blades.

alaxa (*al-ak'-ser*). Trade name of an aperient preparation, the chief constituent of which is cascara sagrada.

alba (*al'-bah*) [L., "white"]. The white fibrous tissue of the brain and nerves. **a., reticular,** the reticulated layer of alba on the anterior half of the uncinate gyrus. Syn., *substantia reticularis alba*

albaras, albarras [Ar.]. A skin disease characterized by the formation of white, shining patches. Syn., *white leprosy; baras; barras.*

albargin (*al-bar'-jin*) [*album*, white; *argentum*, silver]. A compound of silver (15 %) and gelatose (a transformation-product of glue). A yellow powder, freely soluble in water, used in treatment of gonorrhea in injections of 0.2 % solution 4 or 5 times daily.

Albee's operation (*awl'-be*) [Fred Houdlett *Albee*, American surgeon, 1876–]. To cause ankylosis of the hip: the upper end of the head of the femur is removed and the corresponding part of the edge of the acetabulum is also cut off, and the freshened edges are approximated.

albedo (*al-be'-do*) [L., "whiteness"]. Whiteness. **a. retinæ,** retinal edema. **a. unguis,** or **unguium,** the lunula of the nail.

albefaction (*al-be-fak'-shun*) [*albus*, white; *facere*, to make]. The act or process of blanching or rendering white.

Albers-Schönberg disease (*al'-bers-shern'-berg*). [Heinrich Ernst Albers-Schönberg, German Surgeon, 1865–1921]. Osteosclerosis fragilis.

Albert's disease [Eduard *Albert*, Austrian surgeon, 1841–1900]. Achillodynia; inflammation of the retrocalcanean bursa, generally secondary to osteitis of the os calcis. **A.'s operation,** removal of the articular ends of the femur and tibia, to produce ankylosis of the knee.

albescent (*al-bes'-ent*) [*albescere*, to become white]. Whitish.

albicans (*al'-be-kans*) [*albicare*, to grow white]. 1. One of the corpora albicantia of the brain. 2. White; whitish.

albicantia (*al-be-kan'-she-ah*) [L.]. Plural of *albicans* (1).

albiduria (*al-bid-u'-re-ah*) [*albidus*, white; οὖρον, urine]. White urine. Chyluria.

Albini's nodules (*ahl-be'-ne*) [Giuseppe *Albini*, Italian physiologist, 1830–]. Small nodules found on the free edge of the auriculoventricular valves in some infants.

albinism, albinismus, albinoism (*al'-bin-izm, al-bin-iz'-mus, al-be'-no-izm*) [*albus*, white]. That condition of the skin in which there is a congenital absence of pigment involving its entire surface, including the hair and the choroid coats and irises of the eyes. It is usually associated with nystagmus, photophobia, and astigmatism. Syn., *alphosis; congenital achroma; congenital leukoderma; leukæthiopia; achromatosis; leukopathia; albitudo.* **a., acquired, a. acquisita,** see *vitiligo.* **a., partial,** congenital absence of pigmentation in certain parts of the skin, appearing in irregular, white, sharply defined spots. Especially characteristic are the changes of color in the hair, often observed in negroes. The hairs are white and grow upon skin devoid of pigment, or normally colored. Syn., *poliosis circumscripta.*

albino (*al-bi'-no*) [Sp.]. A person affected with albinism.

albinotic (*al-bin-ot'-ik*). Affected with albinism.

albinuria (*al-bin-u'-re-ah*) [*albus*, white; οὖρεον, urine]. 1. Chyluria; whiteness of the urine. 2. Albuminuria.

albocinereous (*al-bo-sin-e'-re-us*) [*albus*, white; *cinereus*, gray]. Having both white and gray matter.

alboferrin (*al-bo-fer'-in*). An odorless, light-brown powder, readily soluble in cold water. It is said to consist of albumin, 90.14 %; iron, 0.68 %; phosphorus, 0.324 %; amidonitrogen, 0.13 %; and mineral substances, 9.5 %. It is indicated in chlorosis, anemia, etc. Dose 15–45 gr. (1–3 Gm.) for children; 45–75 gr. (3–5 Gm.) for adults, a day.

albolene (*al'-bo-lēn*) [*albus*, white; *oleum*, oil]. A hydrocarbon oil, colorless, tasteless, odorless, used as an application to inflamed surfaces.

albor (*al'-bor*) [*albus*]. 1. A whiteness. 2. Egg-albumen. 3. [Ar., *al bûl.*] Urine. **a. cutis, a. nativus,** albinism. **a. ovi,** white of egg

albromin (*al-bro'-min*). Trade name of a local anesthetic.

albuco (*al-bū'-ko*). Trade name of an albuminous milk.

albuginea (*al-bū-jin'-e-ah*) [*albus*]. 1. White or whitish. 2. A layer of white fibrous tissue investing an organ or part. **a. oculi,** the sclerotic coat of the eye. **a. ovarii,** the tunica albuginea of the ovary. **a. testis,** the tunica albuginea of the testicle.

albugineotomy (*al-bū-jin-e-ot'-o-me*) [*albuginea; τομή*, cutting]. Incision of any tunica albuginea (*q. v.*).

albugineous (*al-bū-jin'-e-us*). 1. Whitish. 2. Belonging to a tunica albuginea.

albuginitis (*al-bū-jin-i'-tis*) [*albuginea; ιτις*, inflammation]. Inflammation of a tunica albuginea.

albugo (*al-bū'-go*) [L.]. 1. A white spot, as upon the cornea. 2. A whitish, scaly eruption. 3. The white of an egg.

albukalin (*al-bū'-kal-in*), $C_8H_{17}N_3O_6$. A substance found in leukemic blood.

albulactin (*al-bū-lak'-tin*). See *lactalbumin*.

album (*al'-bum*) [*albus*, white]. A substance characterized by whiteness. **a. candiense,** bismuth subnitrate. **a. canis,** see *a. græcum*. **a. ceti,** spermaceti **a. græcum,** the feces of dogs fed upon bones, and whitened by exposure. It was formerly used in medicine. **a. hispaniæ, a. hispanicum,** blanc d'Espagne, bismuth subnitrate. **a. nigrum,** the feces of rats and mice, formerly used as a diuretic and purgative. **a. ovi,** white of egg.

albumen (*al-bū-men*) [*albus*]. The white of an egg. See *albumin*.

albumimeter (*al-bū-mim'-et-er*) [*albumin; μέτρον*, a measure]. See *albuminimeter*.

albumin (*al-bū'-min*) [*albus*, white]. A protein substance, the chief constituent of the animal tissues. Its molecule is highly complex. It is soluble in water and coagulable by heat. It contains the following elements Carbon, 51.5 to 54.5, hydrogen, 6 9 to 7 3, nitrogen, 15.2 to 17 0; oxygen, 20 9 to 23.5, sulphur, 0 3 to 2 0 Albumen, white of egg, often called albumin, is largely composed of it. Other varieties are called after their sources or characteristic reactions, as acid-albumin, alkali-albumin, muscle-albumin, serum-albumin, ovum-albumin, vegetable-albumin, etc. Syn., *coagulable animal lymph; coagulable lymph of the serum*. See *Axenfeld, Barral, Boedeker, Cohen, Furbringer, Heller, Heynsius, Hindenlang, Johnson, MacWilliam, Méhu, Millon, Oliver, Oxyphenylsulphonic Acid, Parnum, Raabe, Rees, Roberts, Spiegler, Tanret, Zouchlos*. **a., acid,** that changed by the action of acid. **a., blood-,** see *serum-albumin*. **a., caseiform,** that variety not coagulated by heat, but precipitated by acids **a., circulating,** that found in the fluids of the body. **a., derived,** a modification of albumin resulting from the action of certain chemicals upon native albumin. **a., egg,** albumin of which white of egg is the type. **a., floating,** same as *a., circulating*. **a., imperfect,** one which fails to give all the ordinary reactions. **a., lacto-,** see *lactalbumin*. **a., milk,** see *eiweiss milch*. **a., muscle-,** a variety found in muscle-juice. **a., native,** any albumin occurring normally in the tissues. **a., organic,** that forming an integral part of the tissue. **a., serum-,** see *serum-albumin*. **a., tannate,** same as protan, *q. v.* **a. vegetable,** that found in various vegetable juices.

albuminate (*al-bū'-min-āt*). A compound of albumin and certain bases, as *albuminate* of iron.

albuminaturia (*al-bū-min-at-u'-re-ah*) [*albuminate; οὖρον*, urine]. The abnormal presence of albuminates in the urine.

albuminid (*al-bū-min-id*). Acidalbumin; syntonin.

albuminiferous (*al-bu-min-if'-er-us*) [*albumin; ferre*, to bear]. Yielding albumin.

albuminimeter (*al-bū-min-im'-et-er*) [*albumin; μέτρον*, a measure]. An instrument for the quantitative estimation of albumin in urine.

albuminimetry (*al-bū-min-im'-et-re*). The quantitative estimation of the albumin in a liquid.

albuminiparous (*al-bū-min-ip'-ar-us*) [*albumin; parere*, to produce]. Yielding albumin.

albuminofibrin (*al-bū'-min-o-fi'-brin*). A compound of albumin and fibrin.

albuminogenous (*al-bū-min-oi'-en-us*) [*albumin; γενναῶ*, to produce]. Producing albumin.

albuminoid (*al-bū'-min-oid*) [*albumin; εἶδος*, likeness]. 1. Resembling albumin. Applied to certain compounds having many of the characteristics of albumin. 2. Any nitrogenous principle of the class of which normal albumin may be regarded as the type. 3. Any simple protein characterized by being insoluble in neutral solvents. **a. degeneration,** or **disease,** see *amyloid degeneration*.

albuminolysin (*al-bū-min-ol'-is-in*). A lysin which causes destruction of albumins.

albuminolysis (*al-bū-min-ol'-is-is*). Proteolysis, *q. v.*

albuminometer (*al-bū-min-om'-et-er*). See *albuminimeter*.

albuminometry. See *albuminimetry*.

albuminone (*al-bū-min-ōn*) [*albumin*]. A principle derived from certain albuminoids; it is soluble in alcohol and is not coagulable by heat

albuminorrhea (*al-bū-min-or-e'-ah*) [*albumin; ῥοία*, a flow]. Excessive discharge of albumins.

albuminose (*al-bū'-min-ōs*) [*albumin*]. 1. A product of the digestion of fibrin or of any albuminoid in very dilute hydrochloric acid; acidalbumin. 2. Albumose, or one of the products of the digestion of albumin by the gastric juice.

albuminosis (*al-bū-min-o'-sis*) [*albumin*]. Abnormal increase of the albuminous elements in the blood, or the condition resulting therefrom

albuminous (*al-bū'-min-us*) [*albumin*]. Containing, or of the nature of, albumin.

albuminuria (*al-bū-min-u'-re-ah*) [*albumin; οὖρον*, urine]. The presence in the urine of albumin, usually serum-albumin. Albumin in the urine may result from disease of the kidneys or from the admixture of blood or pus with the urine. Its presence is sometimes not accounted for by either of these causes. See *a., cyclic*. **a., accidental,** same as *a. false, q. v.* **a. acetonica,** albuminuria due to asphyxia. Syn., *anoxemic albuminuria*. **a. of adolescence,** see *a., cyclic*. **a., adventitious,** see *a., pseudo-* **a., alimentary,** that following the ingestion of a heavy protein meal. **a., cardiac,** that due to chronic valvular disease. **a., cicatricial,** a form in which epithelial desquamation is assumed to be replaced by tissue incapable of restraining the transudation of albumin from the blood. **a., colliquative,** that due to great disassimilation of the blood-corpuscles or adipose tissue. **a., consumptive,** see *a., colliquative*. **a., cyclic,** a condition, also known as physiological, simple, functional, or transient albuminuria, or the albuminuria of adolescence, in which a small quantity of albumin appears in the urine, especially of the young, at stated times of the day; hence the term, "cyclic." **a., dietetic,** that due to the ingestion of certain forms of food. **a., dystrophic,** that dependent upon imperfect formation of the blood-corpuscles. **a., emulsion,** that in which the urine has a milky turbidity due to minute corpuscular elements. **a., exudative,** Gubler's name for albuminuria partially due to the filtration of albumin through the membranes of the kidney and also to the presence in the urine of products of inflammation, as in cases of nephritis. **a., false,** a mixture of albumin with the urine during its transit through the urinary passages, where it may be derived from blood, pus, or special secretions that contain albumin. **a., febrile,** that due to fever, or associated with acute infectious diseases, slight changes occurring in the glomerules without organic lesion.

a., functional, see *a., cyclic.* **a., globular,** that due to destruction of blood-corpuscles or dependent upon the presence of blood in the urine. **a., gouty,** albumin in the urine of elderly persons, who secrete a rather dense urine containing an excess of urea. **a., hematogenous,** that occurring in diseases which cause some change in the quality and quantity of the normal protein of the blood. **a., hypostatic,** that which is present when the patient lies flat on his back, but which disappears when he is erect. **a., intermittent,** that which is present for a time, then disappears, and later on reappears This cycle may be repeated. **a., intrinsic,** see *a., true.* **a., mixed,** the presence of a true with a pseudo-albuminuria. **a., mixed,** that in which albumose is present as well as albumin. **a., nephrogenous,** that due to renal disease. **a., neurotic,** that which is present in epilepsy, exophthalmic goiter, apoplexy, neurasthenia, injuries to the brain, and various psychoses. **a., orthostatic,** a form dependent upon an upright posture **a., paroxysmal,** *a., cyclic.* **a., partial,** a form in which it is assumed that only certain tubules are affected. Syn., *albuminuria parcellaire.* **a., physiological,** albumin in normal urine, without appreciable coexisting renal lesion or diseased condition. **a., pretuberculous,** a condition in young persons, a premonitory stage of tuberculosis, believed to be due to the congestive action of the tuberculous virus upon the renal structure. **a.: pseudo-,** albuminuria dependent upon the presence of such fluids as blood, pus, lymph, spermatic fluid, or the contents of an abscess cavity, in the urine. Syn , *adventitious albuminuria.* **a., residual,** a form in which a small amount of albumin may persist after nephritis. **a., true,** that due to the excretion of some albuminous constituents of the blood with the water and salts of the urine. Syn , *intrinsic albuminuria*

albuminuretic (*al-bū-min-ū-ret'-ik*). 1. Causing albuminuria. 2. A drug which causes albuminuria. 3. Albuminuric

albuminuric (*al-bū-min-ū'-rik*) [see *albuminuria*]. Associated with, or pertaining to albuminuria

albuminurophobia (*al-bū-min-ū-ro-fo'-be-ah*) [*albuminuria; φόβος*, fear]. Undue fear of acquiring albuminuria; or undue importance being given to the presence of albuminuria.

albumoid (*al'-bū-moid*). A protein found in cartilage and in the crystalline lens; it is but slightly soluble in acid and alkaline solutions, and insoluble in neutral solutions.

albumone (*al-bū'-mōn*). A protein found in the blood; it cannot be coagulated by heat.

albumoscope (*al-bū -mo-skōp*) [*albumin; σκοπεῖν*, to examine]. Appliance for determining the presence and amount of albumin in urine.

albumose (*al'-bū-mōs*) [*albumin*]. Any albuminoid substance ranking among the first products of the splitting-up of proteins by enzymes, and intermediate between the food-albumins and the typical peptones. According to Kühne, there are at least two albumoses, *antialbumose* and *hemialbumose.* Hemialbumose yields the following: *Protalbumose, deuteroalbumose, heteroalbumose,* and *dysalbumose.*

albumosemia (*al-bū-mo-se'-me-ah*) [*albumose; αἷμα*, blood]. Albumose in the blood.

albumosuria (*al-bū-mos-ū'-re-ah*) [*albumose; οὖρον*, urine]. The presence of albumose in the urine. **a., Bence-Jones',** see *a., myelopathic.* **a., myelopathic,** a condition marked by persistent occurrence of albumose in the urine, accompanied by softening of the bones, owing to sarcomatous disease.

alburnum (*al-ber'-num*) [L., "sap-wood"]. In biology, young wood, sap-wood.

albus (*al'-bus*) [L.]. White.

albutannin (*al-bū-tan-in*). Same as tannalbin, *q. v.*

alcali (*al'-ka-li*). See *alkali.*

Alcaligenes (*al-kal-ij'-en-ēz*) [Ar., *al*, the; *qalīy*, soda-ash]. A genus of the Bacteriaceæ family. See *table of micro-organisms.* **a. fœcal'-is,** motile rods of medium length, single or in chains. Found in feces. Suspected in diarrhœa of children; found in blood of suspected typhoid.

alcaptonuria (*al-kap-ton-ū'-re-ah*). *Alkaptonuria.*

alcarnose (*al-kar'-nōz*). A nutrient preparation containing maltose combined with albumoses.

alcarsin (*al-kar'-sin*). See *alkarsin.*

alchemy (*al'-kem-e*) [Ar., of doubtful derivation]. Supposed art of transmuting metals into gold and of finding a remedy for all diseases.

Alcock's canal [Thomas *Alcock,* English anatomist, 1784–1833]. A canal formed by the separation of the layers of the obturator fascia for the transmission of the pudic nerve and vessels.

alcogel (*al'-ko-jel*). A jelly-like combination of alcohol and silicic acid.

alcohol (*al'-ko-hol*) [Ar., *al-koh'l*, the fine powder for staining eyelids]. 1. Any compound of an organic hydrocarbon radical with hydroxyl. Alcohols are classed as *monacid* (monatomic), *diacid* (diatomic), and *triacid* (triatomic), according to the number of hydroxyl radicals present in the molecules. 2. Ethyl-alcohol, C_2H_5OH. A liquid obtained by the distillation of fermented grain or starchy substance. It is inflammable, colorless, and possesses a pungent odor and burning taste. Internally, it is a cerebral excitant and cardiac stimulant; in large doses a depressant, narcotic poison, producing muscular incoordination, delirium, and coma. It exists in wine, whisky, brandy, beer, etc., and gives to them their stimulant properties. Commercial alcohol contains 92.3% of absolute alcohol with 7.7% of water. It is valuable as a cardiac stimulant in acute failure of the heart's action and in adynamic conditions. **a., absolute** (*alcohol absolutum,* U. S. P.), ethyl-alcohol deprived of water. **a., benzyl,** C_7H_8O, obtained from benzaldehyde by the action of sodium amalgam **a., caustic,** sodium ethylate. **a., chlorethyl,** C_2H_5OCl, a substitution-product of ethyl-alcohol in which one atom of hydrogen is replaced by one atom of chlorine. **a., cinnamic, a., cinnamyl, a., cinnamylic,** $C_9H_{10}O$, yellowish needles or crystalline masses obtained from the distillation of styracin. It is soluble in alcohol, ether, water, glycerol, and benzine; melts at 30°–33° C.; boils at 250° C. It is antiseptic and is a deodorizer in a 12.5% glycerol solution. Syn., *styrilic alcohol; crystallized styrone.* **a. dehydratum,** dehydrated alcohol, absolute alcohol. **a., denatured,** alcohol into which some other substance has been introduced, rendering it unfit for drinking but still useful for other purposes. **a. deodoratum,** ethyl-alcohol from which odorous and coloring-matters have been removed by filtration through charcoal. **a., diatomic,** one containing two OH groups. **a., dilute** (*alcohol dilutum,* U. S. P.) contains 41.5%, by weight, of alcohol. **a., ethyl-,** see *alcohol* (2). **a., fatty,** one obtained from a hydrocarbon of the fatty series. **a., homeopathic,** ethyl alcohol of 87% strength; it is used

in making attenuations. **a., iso-,** an alcohol derived from a hydrocarbon containing carbon atoms which unite directly with more than two other carbon atoms. **a., methyl-,** CH_4O, commonly known as "wood spirit." **a., monoatomic,** one containing one OH group. **a., phenic,** same as *phenol*. **a., primary, a., secondary, a., tertiary,** an alcohol produced by the replacement of 1, 2, or 3 hydrogen atoms in carbinol by alkyls. **a., triatomic,** one containing three OH groups. **a., unsaturated,** that derived from the unsaturated alkylens in the same manner as the normal alcohols are obtained from their hydrocarbons. In addition to the general character of alcohols, they are also capable of directly binding two additional affinities. **a., wood-,** see *a., methyl-*.

alcoholase (*al'-ko-hol-ās*). A ferment which converts lactic acid into alcohol.

alcoholate (*al'-ko-hol-āt*). 1. A chemical compound, as a salt, into which an alcohol enters as a definite constituent. 2. A preparation made with alcohol.

alcoholature (*al-ko-hol'-at-chur*) [Fr., *alcoolature*]. An alcoholic tincture.

alcoholic (*al-ko-hol'-ik*) [Arabic: *al*, the; *koh'l*, finely powdered antimony]. 1. Pertaining to, containing, or producing alcohol. 2. One addicted to the use of spirituous drinks. **a. radicals,** the name applied to the univalent hydrocarbon radicals which unite with OH to form alcohols.

alcoholica (*al-ko-hol'-ik-ah*). In pharmacy, alcoholic preparations.

alcoholimeter (*al-ko-hol-im'-et-er*). See *alcoholometer*.

alcoholism (*al'-ko-hol-izm*). The morbid results of excessive or prolonged use of alcoholic liquors. The term *acute alcoholism* has been used as a synonym for inebriety. The *chronic* form is associated with severe disturbances of the digestive and nervous systems.

alcoholist (*al-ko-hol'-ist*). An individual affected with alcoholism.

alcoholization (*al-ko-hol-iz-a'-shun*). The process of alcoholizing, the state of being alcoholized.

alcoholize (*al'-ko-hol-īz*). 1. To impregnate with alcohol. 2. To convert into an alcohol. 3. To reduce to a very subtle powder.

alcoholomania (*al-ko-hol-o-ma'-ne-ah*). Morbid craving for intoxicating beverages.

alcoholometer (*al-ko-hol-om'-et-er*) [*alcohol; μέτρον*, a measure]. A hydrometer or other instrument for determining the amount of alcohol in a liquid.

alcoholometry (*al-ko-hol-om'-et-re*) [*alcohol; μέτρον*, a measure]. The determination of the proportion of alcohol present in any liquid.

alcoholophilia (*al-ko-hol-o-fil'-e-ah*) [*alcohol; φιλεῖν*, to love]. The appetite for strong drink; a craving for intoxicants.

alcoholuria (*al-ko-hol-u'-re-ah*) [*alcohol; οὖρον*, urine]. The presence of alcohol in the urine when voided.

alcolene (*al'-ko-lēn*). A mixture of ethyl and methyl alcohols.

alcometrical (*al-ko-met'-rik-al*). Relating to the estimation of the amount of alcohol in a liquid.

alcosol (*al'-ko-sol*). An alcoholic colloidal solution.

alcresol (*al-kre'-sol*). Trade name for an antiseptic said to contain cresylic acid.

alcresta (*al-kres'-tah*). Trade name of a preparation of ipecac which is said not to excite nausea or vomiting.

aldehydase (*al-de-hi'-dās*). An oxydase, capable of oxidizing certain aldehydes to the corresponding acids.

aldehyde (*al'-de-hīd*) [*al*, the first syllable of alcohol; *dehyde*, from *dehydrogenatum*]. 1. A class of compounds intermediate between alcohols and acids, derived from their corresponding primary alcohols by the oxidation and removal of 2 atoms of hydrogen, and converted into acids by the addition of an atom of oxygen. They contain the group COH. 2. C_2H_4O. Alcohol deprived of 2 atoms of hydrogen, or *acetic aldehyde*. It is a colorless, limpid liquid with a characteristic odor. **a.-alcoholate,** $C_4H_{10}O_2$, an addition compound of acetic acid and ethyl-alcohol. **a.-ammonia,** $C_2H_4ONH_3$, obtained from aldehyde by action of dry ammonia; soluble in water, slightly soluble in ether. Syn., *ammoniated ethylic aldehyde; acetylammonium; ammonium aldehydate; ethidene hydramine*. **a., anisic,** $C_8H_8O_2$, results on oxidizing various essential oils (anise, fennel, etc.) with dilute HNO_3. **a., aromatic,** an aldehyde obtained as an oxidation-product of a primary aromatic alcohol and in turn giving rise by oxidation to a monobasic aromatic acid. **a., benzoic,** C_7H_6O, the oil of bitter almonds. Syn., *benzaldehyde*. **a. characteristic,** the univalent radical, C(H) = O, common to the aldehydes. **a., cinnamic,** C_9H_8O, the chief ingredient of the essential oil of cinnamon and cassia. **a., collidin, a., collinic,** an oxidation-product of albuminoids and gelatin; a colorless, viscid oil with odor like oil of cinnamon. **a., formic,** CH_2O or HCHO is microbicidal and antiseptic. Syn., *formaldehyde*. **a., glycolyl,** $CH_2(OH).CHO$, an oxidation-product of tartaric acid when digested with water at 50°–60° C. **a., isobutylic, a., isobutyryl,** C_4H_8O, a transparent, colorless, highly refractive, pungent liquid; sp. gr., 0.797 at 15° C.; soluble in alcohol; boils at 61° C. **a., isovaleral, a., isovaleric,** $C_5H_{10}O$, a pungent, oily liquid, with an odor of apples, obtained from oxidation of amyl-alcohol; sp. gr., 0.804 at 15° C.; miscible in alcohol and ether; boils at 92.5° C. **a., pyroracemic,** $CH_3.CO.CHO$, a yellow volatile oil obtained by boiling isonitrosoacetone with dilute sulphuric acid. Syn., *acetylformyl; methylglyoxal; propanalon*. **a., thio-,** an aldehyde in which the oxygen in the aldehyde characteristic is replaced by sulphur. **a., toluic, a., toluylic,** C_8H_8O, a substance occurring in 3 isomeric forms, all of which are liquids.

aldemint (*al'-de-mint*). Trade name of a preparation containing formaldehyde and lactose.

alder (*al'-der*). See *alnus*.

aldin (*al'-din*) [see *aldehydes*]. An amorphous basic chemical substance, formed from an ammonia compound of aldehyde. Several aldins are known.

aldol (*al'-dol*) [see *aldehyde*], $C_4H_8O_2$. A colorless, odorless liquid, obtained by the action of dilute HCl on crotonaldehyde and acetaldehyde. It is miscible with water, and at 0° has a sp. gr. of 1.120; upon standing, it changes to a sticky mass that cannot be poured.

v. Aldor's method of testing for proteose in urine. Use 10 Cc. of urine; acidify with hydrochloric acid, and add phosphotungstic acid until no more precipitate occurs. Centrifugate the solution; wash the precipitate with absolute alcohol until the latter is free from color.

Dissolve the precipitate in water to which is added a little potassium hydroxide. If the solution turns blue, heat gently until colorless. When cool apply the biuret test; if positive, proteoses are present

aldoses (*al'-do-sez*) [see *aldehyde*] Carbohydrates which contain the aldehyde group, CHO The aldehyde alcohols, containing the atomic group CH(OH) CHO

aldoxim, or aldoxime (*al-doks'-im*) [see *aldehyde*] Products derived from aldehydes by the substitution of the oxim group N OH for oxygen

ale (*āl*) [AS , *ealu*] Beverage brewed from malt and hops It contains from 3 to 7 % of alcohol

alecithal (*ah-les'-ith-al*) [*ἀ*, priv , *λεκίθος*, yolk] A term for certain ova having the food yolk absent, or present only in very small quantity.

alegar (*a'-le-gar*) Vinegar made of ale

aleipsis (*al-īp'-sis*) [*ἀλειψις*, an anointing] Steatosis, fatty degeneration

alembic (*al-em'-bik*) [Ar , *al*, the, *ἄμβιξ*, a cup] A vessel used for distillation

alembroth (*al-em'-broth*) [origin unknown] An old name for a compound of the chlorides of ammonium and mercury Its solution has been used as an antiseptic

alemmal (*ah-lem' al*) [*ἀ*, priv , *λέμμα*, sheath] Denoting a nerve fiber devoid of a neurilemma

Aleppo boil, A. button, A. evil, A. pustule, A. ulcer. See *furunculus orientalis*.

alepton P (*al-ep'-ton*) Colloidal ferromanganese peptonate

alepton S. Colloidal ferromanganese saccharate

aletocyte (*al-e' to sīt*) [*ἀλήτης*, wanderer, *κυτίς*, a small box, a cell] A wandering cell

aletrin (*al'-et-rin*) See *aletris*

aletris (*al'-et-ris*) Star-grass, unicorn root, star-wort, colic root The root of *A farinosa* It is tonic, diuretic, and anthelmintic Was formerly a popular domestic remedy in colic, dropsy, and chronic rheumatism Dose of *fluidextract* 10–30 min (0 65–2 0 Cc), of *tincture* (1 in 8 proof spirit) 1–2 dr (4–8 Cc) of *aletrin*, the extractive, ½–4 gr (0 016–0 26 Gm)

aleudrin (*a-lū'-drin*) A white crystalline substance, used as a hypnotic and sedative It is sparingly soluble in water, but dissolves readily in alcohol, chloroform, ether, and fatty oils

aleukemia (*ah-lū-ke'-me-ah*) [*ἀ*, priv , *λευκός*, white, *αἷμα*, blood] Deficiency in the proportion of white cells in the blood

aleukemic leukemia (*ah-lū ke'-mic*) A form of leukemia in which the total leukocyte count is normal, despite leukemic changes in the tissues and qualitative changes in the blood

aleukia hæmorrhagica (*ah lu ke-ah hem o raj -ik ah*) Synonym of aplastic anemia See under *anemia*

aleukocytic (*ah-lū ko sīt'-ik*) [*ἀ*, priv , *leukocyte*]. Absence of leucytosis

aleukocytosis (*ah-lū-ko-si to'-sis*) [*ἀ*, priv ; *λευκός*, white, *κύτος*, cell] A diminished or insufficient formation of leukocytes

aleurometer (*al-ū-rom'-et-er*) [*aleuron; μέτρον*, a measure] An instrument used for the examination of crude gluten as to its power of distending under the influence of heat, as a means of judging of the value of a flour for bread-making

aleuron (*al-ū'-ron*) [*ἄλευρον*, flour] 1 Wheat flour 2 Small, round protein particles in seeds

aleuronat (*al-ū'-ro-nat*) [*aleuron*] A vegetable albumin used as a substitute for bread in cases of diabetes.

aleuroscope (*al-ū'-ro skōp*) See *aleurometer.*

Alexander's operation or **Alexander-Adams's operation** [William *Alexander*, English surgeon, –1919, James A *Adams*, Scotch surgeon] See under *operations*

alexanderism (*al-eks-an'-der-izm*) [*Alexander the Great*] The insanity of conquest

alexeteric (*al-eks-e-ter'-ik*) [*ἀλεξητηρ*, defender] Good against poison, venom, or infection

alexeterium (*al-eks-e-te'-re-um*) [*ἀλεξητηρ*, a defender] An external defensive remedy against poison or infection, as distinguished from *alexipharmac*, an internal remedy The plural *alexeteria* was formerly used to designate remedies in general, but applied later to those used against the poisonous bites of animals

alexia (*ah-leks'-e-ah*) [*ἀ*, priv , *λεξις*, word] Word-blindness A form of aphasia in which the patient is unable to recognize written or printed characters **a., cortical**, a variety of Wernicke's sensory aphasia produced by lesions of the left gyrus angularis **a., motor**, inability to read aloud what is written or printed, although it is comprehended **a., musical**, loss of the ability to read music **a., optic**, inability to comprehend written or printed words **a , subcortical**, that due to interruption of the direct connection between the optic center and the gyrus angularis

alexin (*al-eks'-in*) [*ἄλεξις*, help] 1 A defensive proteid existing normally in the blood, any phylaxin 2 Any antibacterial substance, found in the blood of certain animals and giving immunity to certain toxins See *immunity*

alexipharmac, alexipharmic (*al eks-e-jar'-mak, -mik*) [*ἀλεξειν*, to repel, *φάρμακον*, a poison] 1 A medicine neutralizing a poison 2 Acting as an internal antidote See *alexiterium*

alexipharmacon (*al eks-e-far'-mak on*) [see *alexipharmac*] Any alexipharmic medicine

alexipyretic (*al-eks-e-pī'-ret-ik*) [*ἀλεξειν*, to ward off, *πυρετός*, a fever] 1 A febrifuge 2 Acting as a febrifuge

alexiterium (*al-eks-it-e'-re um*) See *alexeterium*

alexocyte (*al-eks'-o-sīt*) [*αλεξειν*, to ward off, *κύτος*, a cell] 1 Hankin's name for an amphophile leukocyte 2 A protective cell of the body which is said to secrete alexins

alexofixogen (*al eks-o fik'-so-jen*) An antigen which causes the production of complement-fixing antibodies

aleze (*ah-lēz*) [Fr , *alèze*] A cloth to protect the bed from becoming soiled by excreta, etc

alga (*al'-ga*) [*alga*, a seaweed, pl , *algæ*] A seaweed, one of a group of acotyledonous plants living mostly in the water

alganesthesia, alganæsthesia (*al-gan-es-the'-ze-ah*) [*ἀλγός*, pain, *ἀν*, priv , *αισθησις*, sensation]. Analgesia

algaroth (*al'-gar-oth*) [Victor *Algarotus*, Veronese physician] Oxychloride of antimony

algebra chirurgica (*al'-je brah ki-rur'-je-kah*) [Arabic *al*, the, *jabara* to reunite, *χειρουργεία*, surgery] Bonesetting

algefacient (*al-je-fa'-shent*) [*algor*, cold, *facere*, to make]. Cooling, refrigerant

algesia (*al-je'-ze-ah*) [*ἀλγος*, pain] 1 Pain, suffering 2 Hyperesthesia as regards the sensation of pain, also neuralgia

algesic (*al-je'-zik*) [*ἀλγός*, pain]. Painful, hyperesthetic

algesichronometer (*al-je-ze-kro-nom'-et-er*) [*ἀλγος*, pain; *χρόνος*, time, *μέτρον*, a measure] An instrument used to note the lapse of time before a nerve center responds to a painful stimulus

algesimeter (*al-jes-im'-et-er*) [ἄλγος, pain; μέτρον, a measure]. An instrument for determining the acuteness of the sense of pain. **a., Björnström's,** one to test the sensibility of the skin. **a., Boas',** an instrument consisting of a pad and spring, used to determine the relative sensitiveness over the epigastrium. The normal tolerance is 9 to 10 kilograms; in cases of gastric ulcer, 1 to 2 kilograms.

algesthesis (*al-jes-the'-sis*) [ἄλγος, pain; αἴσθησις, feeling]. The perception of pain; painful disease.

algetic (*al-jet'-ik*) [ἀλγεῖν, to have pain]. Pertaining to, or producing, pain.

-algia (*al'-je-ah*) [ἄλγος, pain]. A suffix denoting pain, as odontalgia, neuralgia, etc.

algicide (*al'-jis-īd*) [*alga; cædere,* to kill]. An agent which destroys algæ.

algid (*al'-jid*) [*algidus,* cold]. Cold; chilly. **a. cholera,** the cold stage of Asiatic cholera. **a. fever,** a pernicious intermittent fever, with great coldness of the surface of the body. **a. state,** the cold stage of a disease.

algidism, algidity (*al'-jid-izm, al-jid'-it-e*) [see *algid*]. A marked sense of coldness, chilliness. **a., progressive,** see *sclerema neonatorum.*

algin (*al'-jin*). A polysaccharide derived from marine algæ of the *Fucus* type; on hydrolysis it yields pentoses.

algiomotor (*al-je-o-mo'-tor*) [ἄλγος, pain; *movere,* to move]. Causing movements attended with pain.

algiomuscular (*al-je-o-mus'-ku-lar*) [ἄλγος, pain; *musclus,* a muscle]. Causing pain in the muscles.

algiron (*al-ji'-ron*). Synonym of alginoid iron, *q. v.* (under *iron*).

algogenic (*al-go-jen'-ik*) [ἄλγος, pain; γεννᾶν, to produce]. 1. Causing neuralgic pain. 2. [*algidus,* cold; γεννᾶν, to produce.] Lowering the body-temperature below the normal.

algolagnia (*al-go-lag'-ne-ah*) [*algos;* λαγνεία, venery]. Sexual perversion in which pain enjoined or endured plays a part.

algometer (*al-gom'-et-er*) [*algos;* μέτρον, a measure]. An instrument for testing the sensibility of a part to pain.

algometry (*al-gom'-et-re*) [ἄλγος, pain; μέτρον, a measure]. The testing of pain. **a., electric,** a comparative estimation of the pain produced by an induced electric current.

algophobia (*al-go-fo'-be-ah*) [ἄλγος, pain; φόβος, dread]. Unreasonable or morbid dread of pain.

algopsychalia (*al-go-si-ka'-le-ah*). See *psychoalgalia.*

algor (*al'-gor*) [L.]. A sense of chilliness or coldness.

algos (*al'-gos*) [ἄλγος, pain]. Pain; a painful disease, or attack.

algoscopy (*al-gos'-ko-pe*) [*algor,* cold; σκοπεῖν, to see]. Same as *cryoscopy.*

algospasm (*al'-go-spazm*) [ἄλγος, pain; σπασμός, spasm]. Painful spasm or cramp.

algospastic, algospasticus (*al-go-spast'-ik, -us*) [ἄλγος, pain; σπαστικός, a pulling]. Resembling or of the nature of painful cramps.

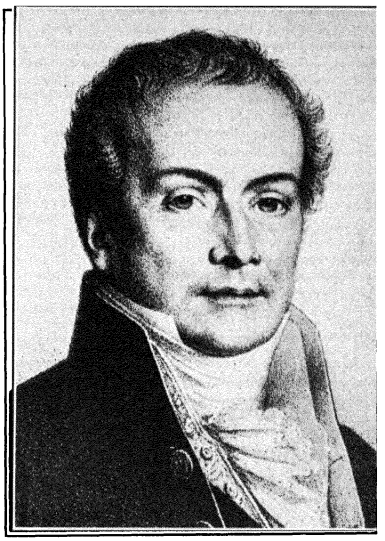
Alibert's disease (*al-e-bār'*) [Jean Louis *Alibert,* French physician, 1776-1837]. 1. Scleroderma. 2. Mycosis fungoides. **A.'s keloid,** true keloid.

alible (*al'-e-bl*) [*alibilis,* nutritive]. Nutritive; absorbable and assimilable.

alibour water (*al'-ib-oor*). A lotion containing copper sulphate, zinc sulphate, camphor, powdered saffron, and water. Used (well diluted) as a wet dressing in eczema.

alices (*al'-is-ēz*) [L.]. Red spots preceding the pustulation in smallpox.

alicyclic (*al-i-si'-klik*) [ἄλειφαρ, fat; κύκλος, a circle]. Having the properties of both aliphatic (open-chain) and cyclic (closed-chain) compounds.



J. L. Alibert.

alienatio (*āl-yen-a'-she-o*). See *alienation.* **a. partis,** gangrene.

alienation (*āl-yen-a'-shun*) [*alienus,* strange]. Mental derangement.

alienism (*āl-yen-izm*) [*alienare,* to deprive of reason]. The study and treatment of mental disorders.

alienist (*āl'-yen-ist*) [see *alienation*]. One who treats mental diseases; a specialist in the treatment of insanity.

aliform (*al'-if-orm*) [*ala,* wing; *forma,* shape]. Wing-shaped. **a. process,** the wing of the sphenoid.

alima (*al-i'-mah*) [ἄλιμος, without hunger]. Alimentary substances.

aliment (*al'-im-ent*) [*alimentum,* from *alimentare,* to nourish]. Nourishment; food. **a., accessory, a., adjective,** a condiment. **a., substantive,** a food with nutritive value as distinguished from a condiment.

alimentary (*al-im-en'-ta-re*) [see *aliment*]. Nourishing. **a. bolus,** the food after mastication and just prior to swallowing. **a. canal, a. system, a. tract, a. tube,** the digestive tube, from the lips to the anus, with its accessory glands. **a. duct,** the thoracic duct.

alimentation (*al-im-en-ta'-shun*) [*alimentare,* to nourish]. The act of supplying with food. The process of nourishment. **a., artificial.** See *feeding, artificial.* **a., artificial-, forced,** see *feeding, forced.* **a., iodic-,** the administration of iodine with the food. **a., rectal,** the nourishing of a patient by the administration of small quantities of concentrated food through the rectum. **a., voluntary-,** the nourishment of

those who are willing to be fed, but are incapacitated

alimentotherapy (*al-im-ent-o-ther'-ap-e*) The treatment of disease by systematic feeding

alinasal (*al-i-na'-sal*) [*ala*, a wing, *nasus*, the nose] Pertaining to the *ala nosi*, or wing of the nose

alinit (*al'-in-it*) Trade name of a bacterial preparation sold for the alleged purpose of increasing the yield of bacteria in certain cultures

alinjection (*al in-jek'-shun*) [*alcohol*, *inicere*, to inject] A process of preserving anatomical specimens by repeated injections of alcohol

aliphatic (*al-e-fat'-ik*) [ἀλειφαρ, fat] 1 Pertaining to a fat 2 Belonging to the open chain series of organic compounds **a. acid**, see *acid*, *fatty* **a. cyclic.** See *alicyclic*

aliptic (*al-ip'-tik*) 1 Relating to inunction 2 Gymnastic, pertaining to physical culture

aliquot (*al'-e-kwot*) [*alius*, some, *quot*, how many] A part of a number or quantity which will measure it without a remainder, as 4 is an aliquot of 12

alisphenoid (*al is fe'-noid*) [*ala*, a wing, *sphenoid*] 1 Pertaining to the greater wing of the sphenoid bone 2 The bone that in adult life forms the main portion of the greater wing of the sphenoid

alizaramid (*al iz-ar' am id*), $C_{14}H_8O_3\begin{cases}OH\\NH_2\end{cases}$ A brown crystalline substance obtained from boiling a dilute solution of alizarin in ammonia Syn *amidoanthraquinon*

alizarimid (*al iz ar' im id*), $C_{14}H_7NO_2$ A violet-red substance obtained from flocculent precipitated alizarin by action of ammonia with heat, it becomes nearly black on drying

alizarin (*al iz'-ar-in*) [Ar., *al*, the, *'açārah*, to extract] $C_{14}H_8O_4$, dihydroxyanthraquinone The red coloring principle occurring in *Rubia tinctorum* and in anthracene It occurs in red prismatic crystals readily soluble in ether and alcohol The alizarins form a group of the anthracene colors **a -blue,** a crystalline blue coloring matter formed by heating nitroalizarin in combination with H_2SO_4 and glycerol

alkadermic (*al-ka-der'-mik*) [*alkali*, δέρμα, skin] Pertaining to or containing an alkaloid used in subcutaneous injection

alkagen (*al'-ka jen*) Trade name of a preparation containing magnesium hydroxide and oil of peppermint

alkalemia (*al kal e'-me-ah*) [*alkali*, αἷμα, blood] Diminution in the hydrogen-ion concentration in the blood, increase alkalinity of the blood

alkalescence (*al-ka les'-ens*) [Ar., *al qalyi*, soda-ash] Slight or commencing alkalinity

alkalescent (*al-ka-les'-ent*) [see *alkalescence*] Somewhat alkaline

alkali (*al'-ka li*) [see *alkalescence*] The term includes the hydroxides of the alkali metals, these are electropositive, are strong bases, uniting with acids to form salts, turn red litmus blue, and saponify fats **a.-albumin,** a derived albumin, a proteid that has been acted upon by dilute alkalies and yields an alkaline reaction **a.-albuminate,** a soluble powder used as a culture-medium in bacteriology. **a., caustic,** the solid hydroxide of potassium or sodium **a., fixed,** potassium or sodium hydroxide **a. metals,** sodium, potassium, lithium, cesium, and rubidium **a., organic,** one forming an essential constituent of an organism **a., vegetable,** potash or potassium carbonate; also applied to the alkaloids **a., volatile,** ammonium hydroxide, which is decomposed by heat with the evolution of **ammonia,** also ammonium carbonate

alkaligenous (*al ka-lij'-en-us*) [*alkali*, γενής, producing] Affording or producing an alkali

alkalimeter (*al-ka-lim'-et-er*) [*alkali* μέτρον, a measure] An instrument for estimating the alkali in a substance

alkalimetry (*al-ka lim'-et-re*) [see *alkalimeter*] The measurement of the amount of an alkali in a substance

alkaline (*al'-ka-lin*) [*alkali*] Having the qualities of or pertaining to an alkali **a air,** ammonia **a earths,** the oxides of calcium, barium, strontium, and magnesium **a metals,** those whose hydroxides are alkalies **a reaction,** one in which red litmus paper is turned blue **a. solution,** see *solution*

alkalinity (*al ka lin'-i-te*) [*alkali*] The quality of being alkaline

alkalinize (*al' kal in-iz*) To render alkaline

alkalinuria (*al ka-lin-u'-re-ah*) [*alkali*, οὖρον, urine] Alkalinity of the urine

alkalipenia (*al-ka li pe'-ne-ah*) [*alkali*, πενης, poor] A condition in which the blood is less alkaline than usual

alkalithia (*al-ka lith' e-ah*) A proprietary effervescent preparation used in rheumatism, said to contain 1 gr (0 065 Gm.) caffeine, 5 gr (0 32 Gm.) lithium bicarbonate, 10 gr (0 65 Gm.) sodium bicarbonate, in each heaping teaspoonful Dose 1 heaped teaspoonful 3 times daily in a large glass of water

alkalization (*al-ka li-za'-shun*) [*alkali*] The act of rendering a thing alkaline, the state or quality of being rendered alkaline

alkaloid (*al'-ka-loid*) [*alkali*, εἶδος, likeness] Any one of the nitrogenous compounds occurring in plants, and resembling ammonia in being basic and in their method of forming salts with acids Alkaloids are believed to be substituted ammonias Alkaloids are, as a rule, the most active parts of plants, many are used in medicine **a s, animal,** substances chemically like alkaloids formed in the decomposition of animal tissues See *leukomaine* **a., artificial,** one produced synthetically **a., cadaveric, a., putrefactive,** see *ptomaine* **a., excrementitious,** leucomaine **a., fixed,** the solid alkaloids, they contain carbon hydrogen, nitrogen and oxygen **a., glucoside,** a substance which exhibits the characteristics of an alkaloid, but is capable of decomposition into sugar and another substance when acted upon by dilute acid **a., volatile,** the liquid alkaloids, they contain no oxygen

alkaloidal (*al-ka loid'-al*) [*alkali*, εἶδος, likeness] Having the qualities of an alkaloid

alkalometry (*al-kal-om'-e tre*) Administering alkaloids See *dosimetry*

alkalosis (*al-kal-o'-sis*) [*alkali*, αἷμα, blood] A condition in which the carbonate content of the blood is relatively high

alkaluretic (*al-ka-lu-ret'-ik*) [*alkali*, οὖρον, urine] 1 Causing or tending to cause a flow of alkaline urine 2 A drug rendering the urine alkaline

alkamin (*al'-kam-in*) See *alkine*

alkane (*al'-kān*) See *paraffin* (2).

alkanet (*al'-kan-et*) [Sp., dim of *alcana*, henna] The root of the herb, *Alkanna* (*Anchusa*) *tinctoria* yielding a red dye that is used in staining wood, coloring adulterated wines, and in pharmacy to give a red color to salves, etc

alkanin (*al'-kan in*) See *alkannin*

alkanna-red. See *alkannin*

alkannin (*al'-kan-in*) [see *alkanet*] Alkanna-red, a valuable coloring-matter obtained from alkanet

alkapton(e) (*al-kap'-ton*). A yellowish, resinous, nitrogenous body occasionally found in urine.

alkaptonuria (*al-kap-ton-'-ū'-re-ah*) [*alkapton; οὖρον*, urine]. The presence of alkapton in the urine. It has been found in cases of pulmonary tuberculosis and in other instances in which there were no local lesions or general disease. Urine containing alkapton turns dark on standing or on the addition of an alkali.

alkargen (*al-kar'-jen*) [*alkarsin; γεννᾶν*, to produce]. Dimethylarsenic acid, obtained from alkarsin by the action of water.

alkarhein (*al-kar-e'-in*). A proprietary alkaline preparation of rhubarb and pancreatin.

alkarsin (*al-kar'-sin*) [*alcohol; arsenic*]. "Cadet's fuming liquid," an extremely poisonous liquid containing cacodyl. It is of a brown color, and on exposure to the air ignites spontaneously.

alkasal (*al'-ka-sal*). See *aluminum-potassium salicylate*

alkatrit (*al'-ka-trit*) [*alkali; triturare*, to rub together]. A triturate made from an alkaloid.

alkeins (*al'-ke-inz*). A collective name for the ethers formed from the alkines.

alkermes (*al'-kur-mēz*). See *kermes*.

alkine (*al'-kin*). Any member of the acetylene series of hydrocarbons. Syn., *alkomin*.

alkresol (*al-kre'-sol*). Alcresol.

AlK(SO$_4$)$_2$ + 12H$_2$O. Aluminum sulphate, alum.

alkyl (*al'-kil*) [*alkali*]. The name applied to any of the univalent alcohol radicals, C_nH_{2n+1}; methyl, ethyl, etc., are alkyls. **a.-sulphides**, thioethers; sulphur analogues of the ethers. They are colorless liquids, generally insoluble in water, and possessing a disagreeable odor resembling that of garlic.

alkylamine (*al-kil-am'-in*). A body having the constitution of ammonia in which an alkyl replaces hydrogen, 1, 2, or 3 hydrogen atoms of the ammonia molecule may suffer this replacement, thus yielding *primary* or *monalkylamines*, having the general formula $NH_2(C_nH_{2n+1})$· *secondary* or *dialkylamines*, having the general formula $NH(C_nH_{2n+1})$ (C_pH_{2p+1}); and *tertiary* or *trialkylamines*, of the general formula $N(C_nH_{2n+1})$ (C_pH_{2+p1}) (C_qH_{2q+1})

alkylate (*al'-kil-āt*). A compound derived from a montaomic alcohol by replacement of the hydroxyl hydrogen by a metal

alkylation (*al-kil-a'-shun*). The exchange of hydroxylic hydrogen atoms for alkyls.

alkylene (*al'-ki-lēn*). See *olefin*.

alkylogen (*al-kil'-o-jen*). A haloid salt of an alcohol radical.

allachesthesia, allachæsthesia (*al-ah-kes-the'-ze-ah*) [*ἀλλαχή*, in another place; *αἴσθησις*, sensation]. Erroneous localization of tactile impressions, differing from allocheiria in the respect that the sensation is felt on the same side of the body, but in a different place from that in which the irritation occurs.

allage. See *allaxis*

allantiasis (*al-an-ti'-as-is*) [*ἀλλᾶς*, a sausage]. Sausage-poisoning, due to the ingestion of sausages in which putrefactive changes have taken place.

allantochorion (*al-an-to-ko'-re-on*). The allantois and chorion fused together and so forming a single structure.

allantoic (*al-an-to'-ik*) [*ἀλλᾶς*, a sausage; *εἶδος*, resemblance]. Pertaining to the allantois. **a. circulation**, the fetal circulation through the cord and the umbilical vessels. **a. vesicle**, the hollow allantois of certain animals.

allantoid (*al-an'-toid*) [see *allantoic*]. 1. Resembling a sausage. 2. Relating to the allantois. **a. liquid**, see *liquor amnii spurius*.

allantoides (*al-an-to'-id-ēz*). 1. Allantoid. 2. A sausage. 3. The great toe. 4. The allantois.

allantoin (*al-an'-to-in*) [see *allantoic*]. $C_4H_6N_4O_3$. A crystalline substance occurring in traces in normal urine, and prepared from uric acid by oxidation. Also the characteristic constituent of the allantoic fluid, and likewise found in fetal urine and amniotic fluid.

allantois (*al-an'-to-is*) [see *allantoic*]. One of the fetal membranes derived from the mesoblastic and hypoblastic layers. Its function is to convey the blood-vessels to the chorion The lower part finally becomes the bladder, the upper, the urachus.

allantotoxicon (*al-an-to-toks'-ik-on*) [*ἀλλᾶς*, a sausage; *τοξικόν*, a poison]. A poisonous substance, probably a ptomaine, that develops during the putrefactive fermentation of sausage.

allaxis (*al-aks'-is*) [*ἀλλασσειν*, to vary]. Metamorphosis; transformation.

allelomorph (*al-e'-lo-morf*) [*ἀλλήλων*, of one another; *μορφή*, form]. Mendelian characters are inherited in alternative pairs, or in alternative series These genes are called alleomorphs. Eg., albinism (recessive), normal (dominant). Horns (recessive), Hornless (dominant).

allelomorphic (*al-e-lo-mor'-fik*). Pertaining to, or characteristic of an *allelomorph*, *q. v.*

allelomorphism (*al-e-lo-mor'-fizm*). The presence, in Mendelian inheritance, of allelomorphic characters.

allelotaxis (*al-e-lo-tak'-sis*) [*ἀλλήλων*, of one another; *τάξις*, arrangement]. The development of a part from different embryonic structures.

Allen's iodine test [Charles Warrenne *Allen*, American physician, 1854–1906]. See under *linea versicolor*.

Allen's paradoxical law (*al'-en*) [Frederick M. *Allen*, American physician, 1879–]. "Whereas in normal individuals the more sugar given the more is utilized, the reverse is true in diabetes." **A.'s treatment**, the starvation treatment in diabetes.

Allen's reaction for phenol. Add to one or two drops of the liquid to be tested a few drops of hydrochloric acid and then one drop of nitric acid. A cherry-red coloration is produced.

allene (*al-ēn'*), $CH_2 = C = CH_2$. An isomere of allylene. Syn., *β-allylene; isoallylene*.

allenthesis (*al-en'-the-sis*) [*ἄλλος*, other; *ἔνθεσις*, insertion]. The presence in or the introduction of foreign bodies into the organism.

alleosis, or **allœosis** (*al-e-o'-sis*) [*ἀλλοίωσις*, change]. 1. Change; alterative effect; recovery from illness. 2. Mental disorder.

alleotic, or **allœotic** (*al-e-ot'-ik*) [*ἀλλοίωσις*, change]. 1. Alterative. 2. An alterative remedy or agent.

allergen (*al'-er-jen*). Same as *allergin*, *q. v.*

allergin (*al'-er-jin*) [*allergy; γεννᾶν*, to produce]. A hypothetical substance of a toxic nature, supposed to produce allergy.

allergy, allergia (*al'-er-je, al-er'-je-a*) [*ἄλλος*, other; *ἐνέργεια*, energy (from *ἔργον*, work)]. A form of acquired immunity, in which a person reinfected reacts differently from the way in which he reacted after the primary infection. It is associated with anaphylaxis. **a., food**, hypersensitivity to certain food.

allesthesia (*al-es-the'-se-ah*) [*ἄλλος*, other, *αἴσθησις*, feeling]. Synonym of *allocheiria*.

allevation (*al-e-va'-shun*) [*ad*, to; *levare*, to lift up]. 1. The relief or palliation of pain. 2. The raising or lifting of a patient from the bed or from the reclining posture.

alleviator (*al-e'-ve-a-tor*) [*allevare*, to lighten]. A device for lifting a sick person from the bed.

allex (*al'-eks*) [L.]. Same as *hallux*.

alliaceous (*al-e-a'-shus*) [*allium*, garlic]. Resembling garlic, or pertaining to the same.

alligator-forceps (*al'-e-ga-tor-for'-seps*). A surgeons' toothed forceps, one of the jaws of which works with a double lever.

Allingham's operation [1. William *Allingham*, English surgeon, 1830–1908. 2. Herbert William *Allingham*, English surgeon]. 1. *For excision of the rectum;* the patient in the lithotomy position, an oval incision is made into both ischio-rectal fossæ, around the bowel, and prolonged backward to the coccyx; the bowel is isolated, and separated with the ecraseur, scissors, or Paquelin cautery. 2. *For hemorrhoids;* the pile is dissected off from the muscular tissue with scissors, the pedicle ligated, and the mass cut off. 3. *For inguinal colotomy;* the incision is from one and one-half to three inches long, and is made parallel with the outer third of Poupart's ligament, and about one-half inch above. **A.'s painful ulcer,** anal fissure. **A.'s rectal plug,** an appliance for controlling hemorrhage from the rectum.

WILLIAM ALLINGHAM.

Allis' inhaler [Oscar H. *Allis*, American surgeon]. An apparatus for the production of general anesthesia by the inhalation of ether. **A.'s sign,** relaxation of the fascia lata between the iliac crest and the trochanter major is indicative of fracture of the neck of the femur.

alliteration (*al-it-er-a'-shun*) [*ad*, to; *litera*, letter]. A form of dysphrasia in which the patient arranges his words according to the sound.

allium (*al'-e-um*) [L.]. Garlic. The undried bulb of *A. sativum*. It contains a pungent, volatile oil that is found also in the leek and the onion. In small amounts garlic acts as a condiment and aids in the digestion and absorption of food. In chronic bronchitis garlic applied as a poultice to the chest and internally in boiled milk is beneficial. Poultices of garlic applied to the spine are recommended in infantile convulsions and may be applied over the abdomen in gastro-intestinal catarrh. *A. cepa*, the common onion, and *A. porrum*, the leek, have similar qualities. **A., syrup of** (*syrupus allii*), contains fresh garlic, 20 Gm.; sugar, 80 Gm.; dilute acetic acid, a sufficient quantity to make 100 Cc. Dose 1–4 dr. (4–16 Cc.).

allo-. A prefix used in chemistry to designate a body which has been rendered more stable by heat; also used to represent isomerism when there is "relative asymmetry."

allocain (*al'-o-kān*). Trade name of a local anesthetic containing procaine hydrochloride, alypin, epinephrine and thymol.

allocheiria. See *allochiria*.

allochesthesia (*al-ok-es-the'-ze-ah*). *Allachesthesia.*

allochezia, allochetia (*al-o-ke'-ze-ah, al-o-ke'-she-ah*) [ἄλλος, other; χέζειν, to desire to go to stool]. 1. The passage of feces from the body through an abnormal opening. 2. The passing of non-fecal matter from the bowels.

allochiria (*al-o-ki'-re-ah*) [ἄλλος, other; χείρ, hand]. An infrequent tabetic symptom, in which, if one extremity be pricked, the patient locates the sensation in the corresponding member of the other side.

allochroic (*al-lo-kro'-ik*) [ἄλλος, another; χρῶμα, color]. Of changeable or diversified color.

allochroism (*al-ok'-ro-izm*) [ἄλλος, other; χρῶμα, color]. 1. Variation in color. 2. A change of color.

allochromasia (*al-o-kro-ma'-ze-ah*) [ἄλλος, other; χρῶμα, color]. 1. Change of color in a part or tissue. 2. Color-blindness.

allocinetic (*al-o-sin-et'-ik*). See *allokinetic.*

allogamy (*al-og'-am-e*) [ἄλλος, other; γάμος, marriage]. In biology, cross fertilization.

allogotrophia (*al-o-go-tro'-fe-ah*) [*allos;* τρέφειν, to nourish]. The nourishment of one part of the body at the expense of some other part.

alloisomerism (*al-o-i-som'-er-izm*) [ἄλλος, other; ἰσομερής, having equal parts]. The application of the same structural formula to many different compounds; a variety of isomerism.

allokinesis (*al-o-kin-ē'-sis*) [ἄλλος, other; κίνησις movement]. Forced and passive movement.

allokinetic (*al-o-kin-et'-ik*) [ἄλλος, other; κίνησις, motion]. Moved or set in motion by external impressions or forces; not autokinetic.

allolalia (*al-o-la'-le-ah*) [*allos;* λαλεῖν, to speak]. Impairment of the faculty of speech. See *alalia.*

allolalic (*al-o-lal'-ik*) [ἄλλος, other; λαλεῖν, to speak]. Affected with allolalia.

allomerism (*al-om'-er-izm*) [ἄλλος, other; μέρος, shape]. In chemistry, the property of retaining a constant crystalline form while the chemical constituents present, or their proportions, vary.

allomorphic, allomorphous, allomorphus (*al-o-mor'-fic, -us*). Affected with allomorphism.

allomorphism (*al-o-morf'-izm*) [ἄλλος, other; μορφή, shape]. The property possessed by certain substances of assuming a different form while remaining unchanged in constitution.

allonal (*al'-on-al*). The registered trademark for a non-narcotic hypnotic and analgesic; a bitter yellowish powder only slightly soluble in water.

allopath, allopathist (*al'-o-path, al-op'-ath-ist*) [ἄλλος, other; πάθος, affection]. One who practises allopathy. A common, but incorrect designation for a regular practitioner.

allopathy (*al-op'-a-thē*) [ἄλλος, *other;* πάθος, affection]. According to Hahnemann, the inventor of the term, that method of the treatment of disease consisting in the use of medicines the action of which upon the body in health produces morbid phenomena different from those of the disease treated; erroneously used of the regular medical profession; opposed to homeopathy.

allophasis (*al-off'-as-is*) [ἄλλος, other; φάσις, speech]. Incoherency of speech; delirium.

allophemy (*al-off'-e-me*) [ἄλλος, other; φήμι, to speak]. See *heterophemy*.

alloplast (*al'-o-plast*) [ἄλλος, other; πλασνός, form, mold]. In biology, a plastid composed of several tissues; the opposite of homoplast.

allorrhythmia (*al-or-rith'-me-ah*) [*allos;* ῥυθμός, rhythm]. Variation in intervals of the pulse.

allosan (*al'-o-san*). The allophanic acid ester of santalol. It is a white, crystalline powder, used as santalol.

allosteatodes (*al-o-ste-at-o'-dēz*) [ἄλλος, other; στεατώδης, fat-like]. Marked by perversion or morbidity of the sebaceous secretion.

allotherm (*al'-o-therm*) [ἄλλος, *other;* θέρμη, heat]. An organism whose temperature is directly dependent on its culture-medium.

allotoxin (*al-o-toks'-in*) [ἄλλος, *other;* τοξικόν, poison]. Any substance, produced by tissue-metamorphosis within the organism, that tends to shield the body by destroying microorganisms or toxins that are inimical to it.

allotriodontia (*al-ot-re-o-don'-she-ah*) [ἀλλότριος, strange; ὀδούς, tooth]. 1. The transplanting of teeth from one person to another. 2. The existence of teeth in abnormal situations, as in tumors.

allotriogeustia (*al-ot-re-o-gūs'-te-ah*) [ἀλλότριος, strange; γεῦσις, taste] Perversion of the sense of taste, abnormity of the appetite.

allotriolith (*al-ot'-re-o-lith*) [ἀλλότριος, strange, λίθος, stone]. A calculus composed of unusual material or formed in an abnormal situation.

allotriolithiasis (*al-ot-re-o-lith-i'-as-is*) [ἀλλότριος, strange; λίθος, a stone]. The formation or existence of a calculus of unusual material, or composed entirely or in part of a foreign body.

allotriophagy (*al-ot-re-off'-a-je*) [ἀλλότριος, strange; φαγεῖν, to eat]. Depraved or unnatural appetite.

allotriotexis (*al-ot-re-o-teks'-is*) [ἀλλότριος, strange; τέξις, birth]. 1. Abnormality in delivery. 2. The birth or delivery of a monstrosity.

allotriuria (*al-ot-re-u'-re-ah*) [ἀλλότριος, strange; οὖρον, urine]. Abnormality of the urine.

allotrope (*al'-o-trōp*) [see *allotropic*]. One of the forms in which an element capable of assuming different forms may appear.

allotrophic (*al-o-trof'-ik*) [ἄλλος, other; τροφή, nourishment]. Having perverted or modified characters as a nutrient.

allotropic (*al-o-trop'-ik*) [ἄλλος, other; τρόπος, manner]. 1. Characterized by allotropism. 2. Relating to or marked by isomerism.

allotropism (*al-ot'-rop-izm*) [see *allotropic*]. 1. The term expresses the fact of certain elements existing in two or more conditions with differences of physical properties; thus, carbon illustrates allotropism by existing in the forms of charcoal, plumbago, and the diamond. 2. Appearance in an unusual or abnormal form.

allotropy (*al-ot'-ro-pe*). Allotropism.

allotrylic (*al-o-tril'-ik*) [ἀλλότριος, foreign; ὕλη-matter]. Due to the presence of a foreign principle or material; enthetic. **a. affections,** morbid states caused by the lodgment of foreign substances in the organism. The foreign substance may be animate or inanimate, organic or inorganic.

alloxamide (*al-oks-am'-id*) [*alloxan; amide*]. A substance, $C_8H_4N_4O_4$, obtained from alloxan by the action of ammonia.

alloxan (*al-oks'-an*) [*allantoin; oxalic*], $C_4H_2N_2O_4$. A crystalline substance produced by the oxidation of uric acid.

alloxantin (*al-oks-an'-tin*) [*alloxan*]. $C_8H_4N_4O_7 + 3H_2O$. A substance obtained by reducing alloxan with $SnCl_2$, zinc, and HCl, or H_2S in the cold. It occurs in small, hard, colorless prisms that turn red when treated with ammonia.

alloxin (*al-oks'-in*) [*allantoin*]. Any of a series of xanthin bases, the result of the splitting-up of chromatin, and which on oxidation produce uric acid.

alloxur, alloxuric (*al-oks'-ur, al-oks-u'-rik*) [ἄλλος, other; ὀξύς, sharp]. A term applied by Kossel and Krüger to the xanthin bases, from the fact that these, like uric acid, contain alloxan and urea groups. **a. bases, a. bodies, xanthin,** hypoxanthin, guanin, paraxanthin, adenin.

alloxuremia (*al-oks-u-re'-me-ah*) [*alloxur; uremia*]. Toxemia due to the resorption of the xanthin or alloxur bases.

alloxuria (*al-oks-u'-re-ah*) [*alloxur;* οὖρον, urine]. The pathological secretion of alloxur bodies (uric acid, xanthin, hypoxanthin, paraxanthin, adenin, carnin, etc.) in the urine.

alloy (*al-oi'*) [Fr. *aloyer*, from L. *alligare*, to combine]. 1 A compound of two or more metals by fusion. 2. The least valuable of two or more metals that are fused together.

allspice (*awl'-spīs*). The fruit of *Eugenia pimenta*. **a., Carolina,** the leaves of *Calycanthus floridus*, having the properties of an aromatic stimulant. See *pimenta*.

allus (*al'-us*) [L.]. The great toe. **a. pollex,** the thumb.

allyl (*al'-il*) [*allium*, garlic,]. C_3H_5. A univalent alcohol radical. Syn., *allylum; acryl.* **a acetate.** 1. $C_3H_5.C_2H_3O$, an aromatic liquid with sharp taste, boiling at 103°–104° C. 2. A salt of allylacetic acid. **a. alcohol,** C_3H_5HO. A colorless, inflammable liquid, with pungent odor, boiling at 97° C. **a. aldehyde,** C_3H_4O. A synonym of *acrolein.* **a. borate,** $(C_3H_5)_3BO_3$, a liquid giving off pungent, irritating vapors which cause a flow of tears; it boils at 168°–175° C. **a. bromide,** C_3H_5Br, a liquid with pungent odor; sp. gr., 1.436 at 15° C.; soluble in alcohol and ether; boils at 70°–71° C. Syn., *bromopropylene.* **a. carbamine,** $CN.C_3H_5$, a liquid obtained by heating allyl iodide with silver cyanide; it has an extremely foul and penetrating odor; boils at 96°–106° C. Syn., *allyl cyanide; allyl isocyanide.* **a carbimide,** CO. NC_3H_5, a foul liquid causing flow of tears, formed by the action of potassium pseudocyanate upon allyl iodide. Syn., *allyl isocyanate; allyl carboxylamine; allyl pseudocyanate.* **a. chloride,** C_3H_5Cl, a pungent liquid; sp. gr., 0.937 at 20° C.; boils at 45° C. Syn., *chlorotritylen.* **a. cyanamide.** See *sinamine.* **a. dioxide,** $C_3H_{12}O_8$, a colorless liquid obtained from allyl alcohol by action of glycerol and oxalic

acid; sp. gr., 1.16 at 16° C.; boils at 171°–172° C.; soluble in water, alcohol, and chloroform. Syn., *diallyl oxide.* **a. iodide,** C_3H_5I, a pungent liquid; sp. gr., 1.848 at 12° C.; soluble in alcohol; boils at 100°–102° C. It is a reaction-product of phosphorus, iodine, and allyl alcohol. **a. mustard oil,** $CS.N.C_3H_5$ The principal constituent of ordinary mustard oil. Syn., *allyl pseudosulphocyanate; allyl pseudothiocyanate; allyl isothiocyanate; allyl isosulphocyanate; allyl thiocarbimide.* **a. nitrate,** $C_3H_5.NO_3$, a mobile liquid of pungent odor, boiling at 106° C., formed from silver nitrate by action of allyl bromide. **a. phenol,** $C_9H_{10}O$, a body obtained from anisic aldehyde by action of potash; it forms laminar crystals. **a. sulphate,** $C_3H_5HSO_4$, a substance acting as a monobasic acid and forming salts called allyl sulphates. Syn., *allyl-sulphuric acid; allyl and hydrogen sulphate.* **a. sulphide,** $(C_3H_5)_2S$, the essential oil of garlic. It is stomachic and sedative. **a. thiocyanate,** $NC\,SC_3H_5$, a colorless, strongly refracting, oily liquid, with odor of garlic and hydrocyanic acid, isomeric with allyl mustard oil and producing headache, nervous excitement, and nausea when inhaled. Syn., *artificial oil of mustard; allyl sulphocyanide.* **a. tribromide,** $C_3H_5Br_3$, a colorless liquid used as an antispasmodic. Dose 5 drops.

allylamine (*al-il'-am-in*) [*allium; amide*], $NH_2(C_3H_5)$. Ammonia in which a hydrogen atom is replaced by allyl It is a caustic liquid.

allylcocaine (*al-il-ko'-kān*) A local anesthetic used in operations on the eye, 5 per cent solution is employed.

almatein (*al-mat'-e-in*). An odorless compound of hematoxylin and formaldehyde; has been recommended as a substitute for iodoform

Alménʼs reagent for blood [August *Almén*, Swedish physiologist, 1833–1903]. A liquid containing blood or blood-coloring matters, if well shaken with a mixture of equal parts of tincture of guaiacum and oil of turpentine, becomes blue **A.ʼs test for glucose,** heat the liquid with a solution of bismuth subnitrate dissolved in caustic soda and Rochelle salts; if it contains glucose, the liquid becomes cloudy, dark brown, or nearly black in color, and finally a black deposit appears.

almond (*ah'-mond*) [ME., *almonde*]. See *amygdala.* **a.-bran,** a cosmetic powder consisting of perfumed powdered almonds and borax. **a.-bread,** a variety of bread made from almond flour, for use in diabetes as a substitute for ordinary bread. **a.-eyed,** applied to the Mongolian race on account of the peculiar elliptical form and slanting appearance of the eyelids. **a. of the ear, a. of the throat,** the tonsil. **a. mixture,** see under *amygdala.* **a. oil,** oleum amygdalæ. See *amygdala.* **a. oil, bitter,** oleum amygdalæ amaræ. See under *.amygdala.* **a.-paste,** a magma of bitter almonds, alcohol, white of egg, and rose-water, used to soften the skin and prevent the hands and lips from chapping.

alnuin (*al'-nü-in*) [Celtic, *al,* near; *lan,* a river-bank]. A precipitate from the tincture of *Alnus rubra.* Said to be alterative and resolvent. Dose gr. ii–x.

Alnus (*al'-nŭs*) [L.]. 1. Alder-bark. 2. A genus of shrubs and trees of the order *Cupuliferæ. A. glutinosa,* common European alder, has astringent bark and leaves, which are used in intermittent fever and as an application in wounds and ulcers. *A. serrulata* contains tannic acid. The decoction of bark and leaves is astringent and used as a gargle and as a lotion for wounds and ulcers. Dose of *powdered bark* 10 gr. (0.65 Gm.); of the *fluidextract* 30–60 min. (2–4 Cc.). *A. incana* has qualities similar to *A. serrulata.* It is recommended as a hemostatic.

Al_2O_3. Aluminum oxide.

alochia (*ah-lo'-ke-ah*) [*ἀ,* priv.; λόχια, the lochia] Absence of the lochia.

Aloe (*al'-o*). A genus of liliaceous plants. See *aloes.* **a. americana,** see *agave.* **a.-resin,** an amorphous resinous constituent of aloes obtained as a deposit from a hot aqueous solution of aloes on cooling.

aloedary (*al'-o-ed-a-re*). A compound aloetic purgative medicine.

aloeretin (*al-o-e-re'-tin*). See *aloe-resin.*

aloes (*al'-oz*) [ἀλόη, the aloe]. The inspissated juice of several species of aloe, of which *Aloe socotrina, A. barbadensis,* and *A. capensis* are most commonly used. Its properties are due to a glucoside, *aloin,* $C_{17}H_{18}O_7$. It is a tonic astringent, useful in amenorrhea, chronic constipation, and atonic dyspepsia. It is also an emmenagogue and anthelmintic. Dose 2–5 gr. (0.13–0.32 Gm.). **a.-bitter,** a bitter principle obtained from aloes by evaporation of the aqueous extract from which the aloe-resin has been extracted. **a.-bitter, artificial,** a body obtained from aloes by action of nitric acid. **a., decoctum, compositum** (B. P.), Socotrine aloes, myrrh, and saffron, of each, 2 parts, potassium carbonate, 4 parts; licorice-juice, 24 parts; water, 768 parts; reduce by boiling to 642 parts and add 192 parts of compound tincture of cardamom. Dose ½–2 gr. (0.032–0.13 Gm.). **a., enema** (B. P.), aloes, potassium carbonate, and mucilage of starch. **a. et asafœtidæ, pilulæ** (B. P.), aloes and asafetida, of each, 1½ gr. (0.1 Gm.). **a. et ferri, pilulæ** (U. S. P., B. P.), contain 1 gr. (0.065 Gm.) each of aloes, ferrous sulphate, and aromatic powder, incorporated with confection of roses. **a. et mastiches, pilulæ** (U. S. P., B. P.), "Lady Websterʼs pills," contain aloes, 2 gr. (0.13 Gm.); mastic and red rose, ½ gr. (0.032 Gm.). **a. et myrrhæ, pilulæ** (U. S. P., B. P.), each contains aloes, 2 gr. (0.13 Gm.); myrrh, 1 gr. (0.065 Gm.); aromatic powder, ½ gr. (0.032 Gm.), mixed with syrup. **a. et myrrhæ, tinctura** (U. S. P., B. P.), aloes, 10; myrrh, 10; alcohol, 100 parts Dose ½–2 dr. (2–8 Cc.). **a., extractum** (U. S. P.). Dose 2 gr. (0.12 Gm.). **a., extractum, aquosum,** prepared by mixing aloes 1 part with 10 parts boiling water, straining and evaporating. Dose ½–5 gr. (0.032–0.32 Gm.). **a., hepatic,** dark, liver-colored aloes, mostly Barbadian. **a., pilulæ** (U. S. P., B. P.), aloes and soap, of each, 2 gr. (0.13 Gm.). **a. purificata** (U. S. P.), the common drug purified by solution in alcohol and evaporation Dose 1–5 gr. (0.065–0.32 Gm.). **a. socotrinæ, pilula** (B. P.), contains Socotrine aloes, hard soap, oil of nutmeg, and confection of roses. Dose 5–10 gr. (0.32–0.65 Gm.). **a., tinctura** (U. S. P., B. P.), consists of aloes, 10; licorice, 10; dilute alcohol, 100 parts. Dose ½–2 dr. (2–8 Cc.). **a., vinum** (B. P.), has aloes, 6; cardamom, 1; ginger, 1; white wine, 100 parts. Dose 1–4 dr. (4–16 Cc.).

aloetic (*al-o-et'-ik*) [*aloes*]. Containing or pertaining to aloes.

aloetin (*al-o-e'-tin*). 1. Aloe-resin. 2. A yellow crystalline principle obtainable from aloes.

alogia (*ah-lo'-je-ah*) [ἀ, priv.; λόγος, word, reason]. 1. Inability to speak, due to some psychical defect. 2. Stupid or senseless behavior.

alogotrophy (*al-o-got'-ro-fe*) [ἄλογος, strange, absurd; τροφή, nutrition]. Irregular and perverted nutrition, leading to deformity.

aloin (*al'-o-in*) [*aloes*] A bitter principle found in aloes. It forms fine needles, possesses a very bitter taste, and acts as a strong purgative. Several glucosides of this name are described, as, *barbaloin*, *nataloin*, *zanaloin*, *socaloin*. Dose ½–2 gr. (0.032–0.13 Gm.).

aloisol (*al-o-is-ol'*). An oily liquid obtained from the distillation of aloes with quicklime.

alopecia (*al-o-pe'-she-ah*) [ἀλωπεκία, a disease of foxes resembling mange]. Deficient hair; baldness. It may be universal or partial, congenital or acquired. It follows a large number of systemic affections. Syn., *lapsus capillorum; defluxio capillorum; vulpis morbus*. **a. adnata**, see *a , congenital*. **a. areata**, that condition in which, suddenly or slowly, one or several, usually asymmetrically distributed, patches of baldness appear upon the hairy regions of the body, more often upon the scalp and parts covered by the beard. Syn., *area Celsi, tinea decalvans; porrigo decalvans; alopecia circumscripta*. **a., cachectic**, that due to general malnutrition. **a. circumscripta**, see *a. areata*. **a., congenital**, a rare form, seldom complete, due to absence of air-bulbs **a. furfuracea**, a form of baldness associated with a disorder of the scalp, marked by hyperemia, itching, and exfoliation of dry or fatty scales from its surface. It may be acute or chronic, and produce a dryness, brittleness, and lack of luster in the hair. Syn., *alopecia pityroides capillitii; pityriasis capitis; seborrhœa capillitii, pityriasis simplex*. **a. localis**, that form occurring in one or more patches at the site of an injury or in the course of a nerve. Syn , *alopecia neuritica*. **a. neurotica**, a name given to baldness of trophoneurotic origin. **a. orbicularis**, same as *a. circumscripta*. **a. pityroides capillitii**, see *a. furfuracea* **a pityroides universalis**, a rapid and general denudation of hair occurring in debilitated states, preceded by abundant desquamation of fatty scales. **a. senilis**, that occurring in old age. **a. simplex**, the idiopathic premature baldness of young adults. It is most common in males, and is often associated with premature grayness. **a. syphilitica**, that due to syphilis. **a. unguis**, **a. unguium**, the falling-off of the nails. Syn., *onychoptosis*. **a. universalis**, that in which there is a general falling-out of the hairs of the body.

alophen (*al'-o-fen*). Trade name of a laxative pill said to contain aloin, strychnine, belladonna, ipecac, and phenolphthalein.

alopon (*al'-op-on*). Trade name of a mixture of the hydrochlorides of the opium alkaloids.

aloxanthin (*al-oks-an'-thin*). $C_{15}H_{10}O_6$. A yellow substance obtained from barbaloin and socaloin by the action of potassium bichromate.

alpenstich (*alp'-en-stik*) [Ger.]. A form of severe pleurisy or pleuropneumonia with typhoid symptoms peculiar to mountainous regions.

alpha (*al'-fah*) [ἄλφα, the first letter of the Greek alphabet]. The Greek letter *α*, used in combination with many chemical terms to indicate the first of a series of isomeric bodies, as alpha-apbthol. **a.-eigon**, a compound of iodine and albumin containing 15% of iodine and soluble in water. **a.-leukocyte**, one disintegrating during blood-coagulation. **a.-hypophamine**. Same as *oxytocin*.

alphanaphthol (*al-fah-naf'-thol*). A variety of naphthol.

alphasol (*al'-fa-sol*). Trade name of an antiseptic used in rhinology and laryngology.

alphenols (*al'-fe-nolz*). A class of compounds having the characteristics of both alcohols and phenols.

alphodeopsoriasis (*al-fo-de-o-so-ri'-a-sis*)[ἀλφώδης, leprous; ψωρίασις, psoriasis]. A form of psoriasis resembling leprosy.

alphodermia (*al-fo-der'-me-ah*) [ἀλφός, white; δέρμα, the skin]. Achromatosis; any disease marked by lack of pigmentation.

alphogen (*al'-fo-jen*). Trade name of *alphozone*, *q. v.*

alphol (*al'-fol*), $C_{17}H_{12}O_2$. The salicylic ether of alphanaphthol, a white, crystalline powder, soluble in alcohol, in ether, and in fatty oils, and insoluble in water; melts at 83° C. It is an internal antiseptic. Dose 8–15 gr. (0.52–1.0 Gm.) 3 times daily.

alphos (*al'-fos*) [ἀλφός, vitiligo]. 1. An old name for leprosy. 2. Psoriasis.

alphosis (*al-fo'-sis*) [see *alphos*]. Albinism; leukoderma.

alphozone (*al'-fo-zōn*). Succinic dioxide. A white crystalline powder derived from hydrogen dioxide by action of succinic acid. It is used as a germicide in dilute aqueous solutions

alphus (*al'-fus*). 1. See *alphos*. 2. A scrofulous pustular disease of the skin attended with the formation of white crusts. **a. confertus**, a scrofulous form of impetigo with clustered lesions attended with formation of white crusts. **a. leuce**, Plenck's name for a skin disease marked by white spots, which penetrate the skin deeply and involve the hairs, and if pricked, a milky fluid exudes. Syn., *vitiligo leuce; leuce*. **a. simplex**, Plenck's name for a skin disease marked by white patches not involving the hairs and wandering from one part to the other, with roughening of the skin. **a. sparsus**, a scrofulous disseminated ecthyma attended with formation of white crusts.

Alpinia (*al-pin'-e-ah*) [Prosper *Alpinus*, Italian botanist, 1553–1617]. A genus of zingiberaceous tropical plants. *A. chinensis*, *A. officinarum*, and other species furnish galangal.

Alquié's operation (*al-ke-a'*) [Alexis Jacques *Alquié*, French surgeon, 1812–1865]. Alexander's operation.

Alsace gum (*al-sās'*). See *dextrin*.

alsol (*al'-sol*). A preparation of aluminum acetate and tartaric acid; used as an astringent and disinfectant.

Alstonia (*al-sto'-ne-ah*) [Charles *Alston*, Scotch physician, 1683–1760]. A genus of apocynaceous trees and shrubs. *A. constricta*, the Australian fever-tree, yields the alkaloid *alstonine*. The bark is tonic, antiperiodic, and antipyretic, and is used in intermittent fevers. Dose of *fluidextract* 30–60 min. (2–4 Cc.). *A. scholaris*, the devil-tree, a native of the East Indies, furnishes dita-bark; it is tonic, astringent, antiperiodic, and anthelmintic.

alstonidin (*al-ston'-id-in*). An amorphous substance contained in a variety of dita-bark.

alstonin (*al-sto'-nin*). An amorphous substance contained in a variety of dita-bark.

alstoninine. A crystalline alkaloid, $C_{21}H_{18}N_2O_4$, obtained from *Alstonia constricta*.

alt. dieb. Abbreviation for the Latin *alternis diebus*, every other day.

alter (*awl'-ter*). To castrate or spay.

alterant (*awl'-ter-ant*). Same as *alterative*.

alterative (*awl'-ter-a-tiv*) [*alterativus*]. 1. A medicine that alters the processes of nutrition, restoring, in some unknown way, the normal functions of an organ or of the system. The most important alteratives are arsenic, iodine, the iodides, mercury, and gold. 2. Changing; alterant; reestablishing healthy nutritive processes.

altering (*awl'-ter-ing*). A syn. for *menstruation*.

alternate (*awl'-ter-nāt*) [*alternare*, to do by turns]. Occurring successively in space or time. **a. hemiplegia,** see *hemiplegia*.

alternating (*awl'-ter-na-ting*) [see *alt nate*] Occurring successively. **a. currents,** electric currents the direction of which is constantly changing. **a. insanity,** a form of insanity in which there are regular cycles of exaltation and depression. **a. pulse,** an irregularity in the force of the heart beats, each second beat varying in strength, a strong beat alternating with a weak beat; the rhythm is regular

alternation (*awl-ter-na'-shun*) [see *alternate*] Repeated transition from one state to another. **a., of generations.** 1. In biology, a generative cycle in which the young do not resemble the parent, but like forms are separated by one or more unlike generations 2. That form of reproduction in which some of the members of the cycle can produce new beings non-sexually, while in the final stage reproduction is always sexual. Tapeworm, is an example

alternator (*awlt'-er-na-tor*). An apparatus for converting the direct dynamo current into an alternating current.

Althaus' oil. An oil made as follows· Metallic mercury, 1 part, pure lanolin, 4 parts; 2% phenol, 5 parts It is used in the treatment of syphilis in injections of 5 min. (0.3 Cc.) at a dose.

Althea, Althæa (*al-the'-ah*) [L.]. Marshmallow. The peeled root of *Althæa officinalis*, a plant of the mallow family. It consists of about one-third of vegetable mucus and starch, together with the alkaloids *asparagine* and *altheine* (laterally regarded as identical). Its decoction is employed as a mucilaginous drink. **a., ointment of** (*unguentum althææ*), an ointment composed of marshmallow root, 2 parts, turmeric, flaxseed, and fenugreek, each, 1 part; water, 70 parts; lard, 44 parts; yellow wax, 6 parts **a., syrup of** (*syrupus althææ*), contains 4% althea. Dose indefinite. *Asparagine* possesses sedative and diuretic properties, and is useful in ascites and gout. Dose 2–3 gr. (0 13–0.19 Gm.).

alt. hor. Abbreviation for the Latin *alternis horis*, every other hour.

althose (*al'-thōs*). Trade name of a preparation containing senega, squill, and codeine; used as an expectorant.

altitude (*al'-te-tūd*) [*altitudo*, height]. The height, as of an individual. In climatology, the elevation of a place above the sea-level. **a.-staff,** a device employed for measuring the exact height of recruits. It consists of a rigid upright with a vertex-bar moving without play at right angles to the upright.

Altmann's granules (*ahlt'-man*) [Richard *Altmann*, German histologist, 1852–1900]. Round bodies staining readily with carbolfuchsin, and regarded as cell-derivatives which have grown through the assimilation of fat. Their absence is supposed to indicate cancer. They are probably allied to Russell's bodies. According to Ross, the substance which forms chromosomes.

altricious (*al-trish'-us*) [*altrix*, a nurse]. Requiring a long nursing; hence, slow of development (the reverse of precocious).

alum (*al'-um*) [*alumen*, alum]. Any one of a class of double sulphates formed by the union of one of the sulphates of certain non-alkaline metals with a sulphate of some alkaline metal. The standard (or common commercial) alum, the official *alumen* (U. S. P.), is the aluminum-and-potassium sulphate, $AlK(SO_4)_2 + 12H_2O$. It is a powerful astringent and styptic, and is also extensively used in the arts. **a., alumina-,** a mixture of alum and aluminum sulphate. **a., aluminum-,** an alum composed of a double sulphate of aluminum and another radical. **a., ammonia,** the same as the standard, except that the potassium is replaced by ammonium. It is official in Great Britain, and is extensively used on account of its cheapness. What is known as *concentrated* or *patent* alum is the normal aluminum sulphate (*aluminis sulphas*, U. S. P.), which is not a true alum. **a, ammonio-ferric** (*ferri et ammonii sulphas*, U. S P), is strongly styptic, and is useful in leukorrhea. Dose 5–10 gr. (0 32–0 65 Gm.). **a., burnt,** alum dried by heat; a spongy, pulverizable substance. It is used as an astringent and on fungous growths. Dose 5–30 gr. (0.333–2.0 Gm.). Syn , *calcined alum; alumen exsiccatum; alumen ustum.* **a., feather, a., feathered** 1. Alum occurring in a fibrous form. 2. Asbestos. **a -hematoxylin,** a purple stain for tissues, obtained from an alcoholic solution of hematoxylin by addition of an aqueous solution of potash alum. **a., potash, a., potassa, a., potassic, a., potassium,** an alum containing potassium, particularly ordinary alum, or aluminum-and-potassium sulphate. **a., potassioferric,** is similar to ammoniоferric alum. **a., soda,** double sulphate of sodium and aluminum; it is too soluble for ordinary uses. **a.-whey,** a preparation obtained by boiling 2 dr. of alum in a pint of milk and straining. It is used as an astringent and internal hemostatic in wineglassful doses.

alumen (*al-ū -men*) [L., gen., *aluminis*]. See *alum*. **a. exsiccatum** (U. S. P.), burnt or dehydrated alum. See *alum, burnt*.

alumil (*al'-ū-mil*). Alumina in combination with acids.

alumina (*al-ū'-min-ah*) [L.], Al_2O_3. Aluminum oxide. the principal ingredient of clay and of many stones, earths, and minerals.

aluminated (*al-ū'-min-a-ted*). Combined with alum, alumina, or aluminum.

aluminated copper. See *lapis divinus*.

aluminic, aluminicus (*al-ū-min'-ik-us*). Relating to or having the nature of alum

aluminiferous (*al-ū-min-if'-er-us*) [*alum; ferre*, to bear]. Yielding alum.

aluminium See *aluminum*.

aluminol, alumnol (*al-ū'-min-ol, al-um'-nol*) [*aluminum*]. The aluminum salt of betanaphthol sulphonic acid. It is an astringent and antiseptic; and is used in gonorrhea, endometritis, and diseases of the ear, nose, skin, etc.

aluminosis (*al-ū-min-o'-sus*) [*alum; νόσος*, disease]. A chronic catarrhal inflammation of the lungs found in pottery workers.

aluminous (*al-ū'-mĭn-us*). Relating to or containing alum, alumina, or aluminum. **a. chalybeate,** a term applied to mineral waters containing alum and iron.

aluminum, aluminium (*a-lū'-min-um, a-lū-mĭn'-e-um*) [L.], Al = 27. Quantivalence II, IV. A silver-white metal distinguished by its low sp. gr.—about 2.6. It is largely used in the arts and for certain surgical instruments. **a. acetate,** $Al_2O \cdot 4C_2H_3O_2 + 4H_2O$. Used as an internal and external disinfectant. Dose 5–10 gr. (0.3–0.6 Gm.) 3 times daily. **a. acetoborate,** antiseptic and disinfectant. **a. acetoglycerinate,** glycerite of aluminum acetate. It has one-fifth the strength of aluminum acetotartrate; used in 50 % solution in diseases of the nose, throat, and ear. **a. acetotartrate,** an energetic nontoxic disinfectant and astringent. It is applied in 0.5 to 2 % solutions in diseases of the air-passages; for chilblains, in 50 % solution. **a. boroformate,** prepared from freshly precipitated aluminium hydroxide dissolved in 2 parts of formic acid, 1 part of boric acid, and 7 parts of water. It is used as an astringent and antiseptic. **a. borotannate,** a reaction-product from tannic acid with borax and aluminum sulphate, containing 76 % tannin, 13 23 % alumina, 10 71 % boric acid, used as a disinfectant and astringent in skin diseases, applied pure or attenuated in ointment or dusting-powder. Syn., *cutal; cutol.* **a. borotannotartrate,** a compound of aluminum borotonnate and tartaric acid; is used externally in skin diseases and in gonorrhea in 0 5 to 10 % solution. Syn., *soluble cutal* or *cutol.* **a. borotartrate,** an energetic, astringent, nonirritant antiseptic, used externally in inflammatory diseases of the throat and nose, and applied in substance or in solution with the addition of glycerol. Syn., *boral.* **a. bromide,** Al_2Br_6. In combination with aluminum chloride it is used as a gargle in diphtheria or taken internally. **a. caseinate,** an intestinal astringent. Dose 4–5 gr. (0.25–0.3 Gm.). **a. chloride,** Al_2Cl_6, colorless hexagonal plates which fume in moist air. It is astringent and antiseptic, and is also used in bleaching teeth. **a. gallate, basic,** a brown, antiseptic dusting-powder made by precipitating a solution of aluminum sulphate with a solution of gallic acid to which sodium hydroxide has been added. **a. hydroxide** (*aluminis hydroxidum,* U. S. P.), $Al_2(HO)_6$, a tasteless white powder, feebly astringent. Dose 3–20 gr. (0 2–1 3 Gm.). Syn., *aluminum hydrate.* **a. oleate,** $Al(C_{18}H_{33}O_2)_2$, a yellowish mass, soluble in alcohol, in ether, in benzene, and in oleic acid. It is used as an antiseptic in skin diseases. **a.-and-potassium sulphate,** $AlK(SO_4)_2 + 12H_2O$, a valuable astringent, used in catarrh, leukorrhea, gonorrhea. Dose 10–20 gr. (0.65–1.3 Gm.). In teaspoonful doses it is an emetic. Syn., *alum.* **a.-and-potassium sulphocarbolate,** $Al_2K_2(C_6HSO_4)_6$, an antiseptic, astringent, and styptic; it is used externally in a 5 to 20 % aqueous solution in cases of cancer and putrid ulcerations, and as a mouth-wash. **a. salicylate,** $Al(C_7H_5O_3)_3$, a reddish-white antiseptic powder used in nasal catarrh and ozena. Syn., *salumin.* **a. salicylate, ammoniated,** a yellowish-white powder used as an antiseptic and astringent in inflammation of the nose and throat by dry insufflations or painting with a 20 % solution in 50 % of glycerol and 30 % of water. Syn., *soluble salumin.* **a.-and-sodium silicate,** $Na_2Si_2O_8Al_4(Si_1O_4)_8$, obtained by adding aluminum hydroxide to a boiling solution of sodium silicate and sodium hydroxide. It is used in surgical dressings. **a sozoiodolate,** is used as an antiseptic wash in 2 to 3 % solution. **a. sulphate** (*aluminis sulphas,* U. S. P.), $Al_2(SO_4)_3$, an antiseptic and astringent used as a lotion in 5 % solution. **a. sulphocarbolate,** $Al_2(C_6H_4 \cdot HSO_4)_6$, white crystals, soluble in water, in glycerol, and in alcohol. It is recommended as an antiseptic in cystitis and suppurating sores. Syn. *sozal.* **a. tannate,** a compound of aluminum and tannic acid. **a. tannotartrate,** yellowish-white plates or powder, soluble in water; used as an astringent and antiseptic insufflation or gargle in laryngeal or catarrhal troubles. Syn., *soluble tannal.* **a.-and-zinc sulphate,** $Al_2(SO_4)_3ZnSO_4$, a white, crystalline powder, soluble in water; used as a caustic.

alumnol. See *aluminol.*

alumozal (*al-um'-o-zal*). Aluminum salicylate; used as an intestinal antiseptic.

alumroot. The root of *Heuchera americana.* Its properties are due to gallic and tannic acids. It is very astringent. Dose of the *fluidextract* 10–20 min. (0 65–1.3 Cc). Also the root of *Geranium maculatum,* a mild astringent.

alundum (*al-un'-dum*). A preparation of alumina used for making appliances which are to be subjected to severe heat in the laboratory.

alusia (*al-ū'-se-ah*) [ἀλύειν, to wander]. Hallucination; morbid state of mind.

alv. adstrict. Abbreviation for the Latin *alvo adstricta,* the bowels being confined.

alv. deject. Abbreviation for the Latin *alvi dejectiones,* the intestinal evacuations.

alvearium (*al-ve-a'-re-um*) [L.] The external auditory canal or meatus.

alveated (*al'-ve-a-ted*) [*alveatus,* hollowed out like a trough]. Honeycombed; channeled; vaulted.

Alvegniat's pump (*al-vān'-yah*). A mercurial air-pump used in estimating the gaseous constituents of the blood.

alveloz (*al-vel-ōth'*) [Sp.]. An extract from *Euphorbia icterodoxa,* having diuretic properties. It is highly recommended as a topical application in cancer.

alveobronchiolitis (*al-ve-o-brong-ke-o-li'-tis*) [*alveolus; bronchiole;* ῖτις, inflammation] Inflammation of the bronchioles and alveoli of the lungs; the broncho-pneumonia.

alveola (*al-ve'-o-la*) [*alveolus,* a small hollow]. A little depression.

alveolar (*al-ve'-o-lar*) [see *alveola*]. Pertaining to an alveolus. **a. abscess,** a gum-boil. **a. arch,** the alveolar surface of the jaw. **a. artery,** a branch of the internal maxillary artery. **a. border,** the margin of the jaws. **a. index,** in craniometry, the gnathic index; the ratio of the distance between the basion and alveolar point, to the distance between the basion and the nasal point, multiplied by 100. (Sometimes the basilar index is called the alveolar index.) **a. passages,** the ultimate division of the bronchi, emptying into the infundibula. **a. points,** see *craniometric points.* **a. process,** the border of the superior maxilla, in which the alveoli are placed. **a. sarcoma,** see *sarcoma.* **a. structure,** having small, superficial cavities, as in the mucous membrane of the stomach.

alveolarium (*al-ve-o-la'-re-um*) [*alveus,* a bee-hive]. A name sometimes applied to the external meatus of the ear. It is so called because the wax of the ear gathers in that place.

alveolate (*al-ve'-o-lāt*, or *al'-ve-o-lāt*) [*alveolatus*, hollowed out like a little tray]. In biology, pitted, honeycombed.

alveolectomy (*al-ve-o-lek-'to-me*) [*alveolus*; *ἐκτομή*, excision]. 1. Making an opening into the alveolus of a tooth, for drainage or some therapeutic purpose. 2. The surgical removal of part of the alveolar process of the upper or lower jaw.

alveoli (*al-ve'-o-li*). Genitive and plural of *alveolus*.

alveolin (*al-ve'-o-lin*). A chemical substance obtained from the alveolar network in the deutomerites of gregarines.

alveolitis (*al-ve-o-li'-tis*) [*alveolus*; *ῑτις*, inflammation]. 1. Inflammation of the alveolus of a tooth. 2. Pyorrhœa alveolaris; Riggs' disease.

alveolocondylean (*al-ve'-o-lo-kon-dil'-e-an*) [*alveolus*, a hollow; *κόνδυλος*, a knuckle]. In craniometry, pertaining to the alveolus and condyle **a. plane.** See *plane*.

alveolodental (*al-ve'-o-lo-den'-tal*) [*alveolus*; *dens*, a tooth]. Pertaining to the teeth and their sockets.

alveololabial (*al-ve'-o-lo-la'-be-al*). Pertaining to the alveolar processes and the lips.

alveololabialis (*al-ve-o-lo-lab-e-a'-lis*) [*alveolus*, a hollow; *labium*, the lip]. The buccinator muscle.

alveolomaxillary (*al-ve'-o-lo-maks-il'-a-re*). The buccinator muscle.

alveolosubnasal (*al-ve'-o-lo-sub-na'-sal*) [*alveolus*, a hollow, *sub*, under; *nasus*, nose]. In biology, pertaining to the alveolar and subnasal points of the skull. **a. prognathism,** see *prognathism*.

alveolus (*al-ve'-o-lus*) [L.]. 1. The bony socket of a tooth. Syn., *phatne*; *phatnia*; *phatnion*. 2. A cell. 3. An air-cell of the lung. 4. A cavity, depression, pit, cell, or recess **a. of a gland,** the terminal lobule of a racemose gland **a. laryngeus,** see *pouch, laryngeal*. **a. of the stomach,** one of the honeycomb-like depressions found in the stomach.

alveus (*al'-ve-us*) [*alveus*, a trough]. 1. A trough, tube, or canal, applied to ducts and vessels of the body. 2. A cavity or excavation. **a. ampullascens, a. ampullescens, a. ampullosus,** see *receptaculum chyli*. **a. communis,** the utricle of the ear. **a. cornu ammonis,** see *a. hippocampi*. **a. hippocampi,** a certain structure in the cerebral hemisphere investing the convexity of the hippocampus major. **a. urogenitalis,** see *uterus masculinus*.

alvine (*al'-vin* or *al'-vin*) [*alvus*, belly]. Pertaining to the belly. **a. concretion,** an intestinal calculus. **a. dejections, a. discharges,** the feces. **a. obstruction,** constipation.

alvus (*al'-vus*) [L., pl. and gen., *alvi*]. 1. The belly or its contained viscera. 2. Diarrhea. **a. adstricta, a. astricta,** an extreme degree of constipation **a. dura,** constipation. **a. renis,** the pelvis of the kidney.

alymphia (*ah-limf'-e-ah*) [*ἀ*, priv.; *lympha*, lymph]. A deficiency of lymph.

alypin (*al'-e-pin*). The hydrochloride of tetramethyl-diamino-dimethyl-ethyl-carbinol-benzoate. It is a synthetic preparation, similar to cocaine and stovaine, and is used as a local anesthetic. It is less toxic than cocaine. For the eye and urethra, a 2 % solution is used; elsewhere, a stronger solution.

alyssus (*al-is'-us*) [*ἀ*, priv.; *λύσσα*, madness]. Preventing or curing rabies.

Alzheimer's disease (*als'-hi-mer*). A mental disorder generally occurring in middle life; it is characterized by insidious onset, a rapidly progressive course, and final dementia.

Am. Abbreviation for *ametropia*, and for *mixed astigmatism*.

am-. A prefix indicating the group NH_2.

A. M. Abbreviation of *Artium Magister*, Master of Arts.

ama (*ah'-ma*) [*ἄμη*, a water-pail]. An enlargement at the end opposite the ampulla of a bony canal of the labyrinth of the internal ear.

A. M. A. Abbreviation for *American Medical Association*.

amaas (*ah'-mahs*) [Kaffir, soured milk]. A mild form of small-pox prevalent in South Africa and elsewhere; milk-pox. See *alastrim*.

amacrine (*am'-ak-rin*) [*ἀ*, priv.; *μακρός*, long; *ἴς*, a fiber]. Applied to nerve-cells entirely devoid of axis-cylinder processes.

amadou (*am'-a-doo*) [Fr., *amadouer*, to coax]. German tinder or touchwood; *Boletus igniarius*, a fungus found on old tree-trunks, used to stanch local hemorrhage and as a dressing for wounds, etc. **a. de Panamá,** a hemostatic prepared from the leaf-hairs of *Micronia mucronata*.

amalgam (*am-al'-gam*) [*μάλαγμα*, a soft mass]. 1. A combination of mercury with any other metal. 2. Any soft alloy. **a.-carrier** and **-plugger,** an instrument designed for carrying and introducing amalgam into the cavity of a tooth. **a., dental,** compounds of a basal alloy of silver and tin with mercury, used for filling teeth. Gold, platinum, copper, zinc, or bismuth is frequently added as a third metal to the basal alloy. **a.-manipulator,** an instrument used by dentists for preparing amalgam fillings.

amalgamate (*am-al'-gam-āt*). To unite a metal in an alloy with mercury. To unite two dissimilar substances. To cover the zinc elements of a galvanic battery with mercury.

amalgamation (*am-al-gam-a'-shun*) [see *amalgam*]. In metallurgy, the process of combining mercury with some other metal, as practised in separating silver and gold from ores.

amandin (*am-an'-din*) [Fr., *amande*, almond]. A proteid contained in sweet almonds.

Amanita (*am-an-e'-tah*). A genus of fungi, *Agaricus*. **A. muscaria,** fly agaric.

amanitin (*am-an'-it-in*) [*ἀμανῖται*, a kind of fungi]. 1. A principle identical with cholin, obtained from the fly-agaric. 2. A poisonous glucoside obtainable from various species of agaric.

amara (*am-a'-ra*) [*amarus*, bitter]. 1. Bitters. 2. The bitter alkaloids. 3. [*ἀμάρα*, a trench]. A sewer, drain, or stream. In the plural, *amaræ*, the hollows of the outer ear.

amaril (*am'-ar-il*) [Sp., *amarillo*, *yellow*]. The poison induced by *Bacillus icteroides*.

amarillic (*am-ar-il'-ik*). Pertaining to yellow fever. Cf. *amarylism*.

amarin (*am'-ar-in*) [see *amara*], $C_{21}H_{18}N_2$, triphenyl-dihydroglyoxalin. It results from boiling hydrobenzamide with caustic potash. It has a poisonous effect on animals.

amaroidal (*am-ah-roi'-dal*). 1. Possessing a slightly bitter taste. 2. Pertaining to, or resembling, the bitters.

amaroids (*am'-ah-roids*). All distinctly bitter vegetable extractives of definite chemical composition other than alkaloids and glucosides. Their names end in *-in* or *-inum*. Also called "bitter principles."

amarthritis (*am-ar-thri'-tis*) [*ἄμα*, together; *ἄρθρον*, a joint; *ῑτις*, inflammation]. Arthritis affecting many, or several joints at once.

amarum (*am-a'-rum*) [see *amara*]. 1. A bitter. 2. Magnesium sulphate. **a., genuine,** magnesium sulphate. **a. purum,** any simple bitter.

amarylism (*am'-ar-il-szm*) [see *amaril*]. Yellow fever.

amasesis (*ah-mas-e'-sis*) [ἀ, priv.; μάσησις, chewing]. Inability to chew.

amasthenic (*am-as-then'-ik*) [ἅμα, together, σθένος, strength]. Uniting the chemical rays of light in a focus, as a lens.

amastia (*ah-mas'-ti-ah*) [ἀ, priv.; μαστός, breast]. Congenital absence of the mammæ or nipples.

amativeness (*am'-at-iv-nes*) [*amare*, to love]. The sexual passion.

Amato bodies (*am- h'-to*). Bodies seen in the leucocytes during scarlet fever.

amatol (*am'-at-ol*). Trinitrotoluene mixed with 40 to 60% of ammonium nitrate.

amatory (*am'-at-o-re*) [*amator*, a lover]. Pertaining to love. **a. fever,** love-sickness; chlorosis. **a. muscles,** the oblique muscles of the eye, used in ogling.

amaurosis (*am-au-ro'-sis*) [ἀμαύροειν, to darken]. Partial or total blindness, especially that occurring without demonstrable lesion of the eye. Syn., *paropsis amaurosis, gutta serena; cataracta nigra.* **a., albuminuric,** that due to renal disease. **a. arthritica,** that due to gout. **a. atonica,** that due to physical debility. **a. centralis,** that due to disorder of the central nervous system. **a., cerebral,** that due to disease of the brain **a. compressionis,** cerebral amaurosis caused by pressure upon the optic nerve. **a., congenital,** that existing from birth. **a., congestiva,** that due to cerebral congestion. **a., diabetic,** that associated with diabetes **a., dimidiate,** that occurring in only one half of the visual field. **a., epileptiform, a., epileptoid,** sudden blindness not confined to epileptics, but considered by some to be epileptic in its nature. Dilatation of the retinal veins has been noted, but no changes in the retinal arteries have been observed. Syn., *retinal epilepsy; ophthalmemcrania.* **a. ex hæmorrhagia, a. ex hyperopsia,** an incurable, inexplicable blindness occurring suddenly after hemorrhages, especially of the stomach. **a., hysterical,** that accompanying hysteria. **a. intermittens larvata,** a blindness, often unilateral, occurring with mild intermittent fever, which is frequently followed by atrophy of the optic nerve. **a., intermittent,** bilateral amaurosis occurring as a complication of intermittent fever. It usually begins with the chill and continues until the sweating stage. **a. partialis fugax,** temporary blindness found with headache, nausea, etc.; attacks may recur. **a., progressive,** the progressive atrophy of the intraocular optic nerve-endings. **a., reflex,** that resulting from a reflex action upon the optic nerve from some remote source of irritation. **a., saburral,** sudden temporary blindness occurring in an attack of acute gastritis. **a., spasmodic,** blindness due to convulsions. **a., spinal,** that caused by atrophy of the optic nerve, due to lateral or multiple sclerosis. Syn., *rachialgic amaurosis.* **a. sympathica, a., sympathetic,** functional disorder of one eye from reflex transmission of disease of the other eye. **a., uremic,** that due to uremia.

amaurotic (*am-au-rot'-ik*) [see *amaurosis*]. Relating to or affected with amaurosis. **a. cat's-eye,** a light-reflex through the pupil in suppurative choroiditis.

amaxophobia (*am-aks-o-fo'-be-ah*) [ἅμαξα, a car; φόβος, fear]. Morbid dread of being in, or riding upon, a car or wagon.

amazia (*ah-ma'-ze-ah*) [ἀ, priv.; μαζός, the breast]. Congenital absence of the mammary gland.

Ambard's coefficient (*ahm-bar'*) [Leo *Ambard*, French physician]. *For estimating renal activity:* it shows the relation between the amount of urea in the blood and that excreted by the kidneys.

$$K = \frac{Ur}{\sqrt{D \times \frac{70}{P} \times \frac{\sqrt{C}}{25}}}$$

Ur = the quantity of urea in a liter of blood; D = the total urea excreted in 24 hours; C = the amount of urea in the urine; P = the weight of the patient in kilograms.

amber (*am'-ber*). See *succinum.*

ambergris (*am'-ber-gris*) [*amber;* Fr., *gris*, gray]. A biliary or intestinal concretion of the sperm-whale, *Physeter macrocephalus.* It exhales a fragrant, musky odor when warmed, and is used in adynamic fevers, chronic catarrh, and nervous diseases. Dose 1–3 gr. (0.065–0.2 Gm.).

ambidexter (*am-be-deks'-ter*) [*ambo*, both; *dexter*, the right hand]. An ambidextrous person.

ambidexterity (*am-be-deks-ter'-it-e*). Ability to use both hands equally well; ambidextrousness.

ambidextrous (*am-be-deks'-trus*) [see *ambidexter*]. Able to use both hands equally well.

ambilateral (*am-be-lat'-er-al*) [*ambo*, both; *latus*, side]. Relating to or affecting both sides.

ambilevous (*am-be-le'-vus*) [*ambo*, both; *lævus*, on the left side]. Unskilful in the use of both hands.

ambiocularity (*am-be-ok-ū-lar'-it-e*) [*ambo*, both; *oculus*, eye]. Able to use both eyes equally well.

ambiopia (*am-bi-o'-pe-ah*). See *diplopia.*

ambisinister (*am-be-sin'-is-ter*) [*ambo*, both; *sinister*, left]. Same as ambilevous.

ambitus (*am'-bit-us*) [*ambire*, to surround] A circumference. **a. cerebelli,** Burdach's term for the cerebellum, pons, and oblongata taken together.

ambloma (*am-blo'-mah*) [ἀμβλωμα, an abortion: *pl., amblomata*]. An amblosis or abortion; an aborted fetus.

amblosis (*am-blo'-sis*) [ἀμβλωσις, an abortion]. An abortion.

amblotic (*am-blot'-ik*) [ἀμβλωτικός]. Abortifacient.

amblyacousia (*am-ble-ah-koo'-se-ah*) [ἀμβλυς, dull; ἀκουεῖν, to hear]. Dulness of hearing.

amblyaphia (*am-ble-a'-fe-ah*) [ἀμβλύς, dull; ἁφή, touch]. Dulness of the sense of touch

amblygeustia (*am-ble-jūs'-te-ah*) [ἀμβλύς, dull; γεῦσις, taste]. A diminution or blunting of the sense of taste.

Amblyomma (*am-ble-om'-ah*) [ἀμβλύς, dull; ὄμμα, eye]. A genus of ticks.

amblyope (*am'-ble-ōp*). A person with amblyopia.

amblyopia (*am-ble-o'-pe-ah*) [ἀμβλύς, dulled; ὤψ, eye]. Dimness of vision, especially that not due to refractive errors or organic disease of the eye. It may be *congenital* or *acquired*, the *acquired* being due to the use of *tobacco* (*amblyopia nicotinica*), *alcohol*, or other *toxic* influences; to *traumatism;* or it may be *hysterical. Nyctalopia* and *hemeralopia* are other forms; it may arise from *entoptic phenomena*, such as *muscæ volitantes, micropsia, megalopsia, metamorphopsia,* etc. It may take the form of *contracted fields of vision*, of *color-blindness*, or *anesthesia of the retina.* Syn., *obfuscatio; offuscatio* **a., color,** partial color-blindness. **a., crossed, a. cruciata,**

amblyopia occurring through lesion of the brain, in which a dimness of vision with contraction of the field of vision exists in the eye on the side opposite to the lesion. **a. ex anopsia,** amblyopia from disuse or from nonuse. **a., postmarital,** that due to sexual excess, called also *Burn's amaurosis.* **a., toxic,** a chronic optic neuritis due to poisons, such as wood alcohol, tobacco, etc.

amblyopiatrics (*am-ble-o-pe-at'-riks*) [*amblyopia; ἰατρικός,* belonging to medicine]. The therapeutics of amblyopia.

amblyoscope (*am'-ble-os-kōp*) [*amblyopia; σκοπεῖν,* to look]. An instrument by means of which an amblyopic eye is trained to take its share in vision.

ambo (*am -bo*). See *ambon.*

amboceptoid (*am-bo-sep'-toid*). A degenerated amboceptor which has lost its binding group (haptophore) on the one hand for the cell, or, on the other hand, for the complement.

amboceptor (*am-bo-sep'-tor*) [*ambo,* both; *capere,* to receive]. A hypothetical thermostabile substance found in blood-serum after inoculation. It possesses two haptophore groups, *viz,* a cytophile and a complementophile Synonyms. *immune body, reparative, sensitizer, desmon, fixative, fixator, philocytase, receptor of the third order.* **a. unit,** the smallest quantity of amboceptor in the presence of which a given quantity of red blood corpuscles will be dissolved by an excess of complement

amboceptorgen (*am-bo-sep'-tor-jen*). An antigen giving rise to amboceptors.

ambomalleal (*am-bo-mal'-e-al*). Pertaining to the ambos or incus and the malleus.

ambon (*am'-bon*) [ἄμβων, the lip of a cup]. The fibrocartilaginous ring that surrounds a socket in which the head of a large bone is received, such as the acetabulum, or the glenoid cavity.

ambos (*am'-bos*) [Ger]. The incus, or anvil bone.

Amboyna button (*but'-un*). See *frambesia.*

ambra (*am'-bra*) [L]. 1. Amber. 2. Ambergris. 3. Spermaceti. **a. alba.** 1 Spermaceti. 2. A light-colored amber obtained in Brazil. **a. atra,** see *a. nigra* **a. cineracea, a. cineria, a. cineritia,** see *ambergris.* **a. flava, a. fulva,** see *succinum.* **a. grisea,** see *ambergris.* **a. nigra,** general name for any dark-colored amber or ambergris or dark, resinous substance; also lignite and jet.

ambrein (*am'-bre-in*) [Fr., *ambre*]. A substance much resembling cholesterin; it is obtained from ambergris by digestion in hot alcohol.

ambrine (*am'-brēn*) [*amber*]. A dressing for burns and wounds. It consists of a mixture of paraffin and resin.

ambrosia (*am-bro'-zhe-ah*) [ἀμβροσία, the food of the gods]. A genus of composite-flowered herbs. *A. artemisiæfolia,* common hog-weed of North America; stimulant, tonic, antiperiodic, and astringent. *A. trifida* has properties similar to *A. artemisiæfolia.* The pollen of these plants is by some regarded as a cause of hay-fever.

ambulance (*am'-bu-lans*), [*ambulare,* to walk about]. 1. In Europe the term is applied to the surgical staff and arrangements of an army in service. 2. In the United States the word is restricted to a vehicle for the transference of the sick or wounded from one place to another. 3. In Europe a portable military hospital and its equipments accompanying the army in its movements. **a. chaser,** a "shyster" lawyer who drums up accident damage cases against firms and corporations.

ambulant, ambulating, ambulatory (*am'-bu-lant, am'-bu-lā-ting, am'-bu-la-to-re*). Relating to walking or changing location; not confined to bed. **a. blister,** a blister that changes its location. **a. clinic,** a clinic for patients that can walk; a dispensary. **a. erysipelas,** erysipelas that shifts from place to place. **a. tumor,** a pseudotumor. **a. typhoid,** walking typhoid; enteric fever in which the patient does not, or will not, take to his bed.

ambulatorium (*am-bu-la-to'-re-um*) [L.]. A dispensary.

ambustial (*am-bust'-she-al*) [*amburere,* to scorch]. Caused by a burn.

ambustion (*am-bus'-chun*) [*ambustio,* a burn]. A burn or scald.

ameba, amœba, (*am-e'-bah*) [ἀμοιβή, a change]. A colorless, single-celled, jelly-like, protoplasmic organism found in sea and fresh waters, constantly undergoing changes of form and nourishing itself by englobing surrounding objects. **a. bucca'lis,** found in dental caries. **a. coli,** the ameba of dysentery. This is a protoplasmic mass, resembling the water ameba, 20 to 30μ in diameter, and composed of a nucleus and a highly granular protoplasm containing vacuoles It is found in large numbers in the stools of certain forms of dysentery, in the intestinal mucous membrane, and at times in the socalled dysenteric abscess of the liver. Whether it is the real cause of the disease is not definitely established. **a. dysenter'iæ,** the organism responsible for amebic dysentery. **a.-enteritis,** chronic enteritis due to invasion of *amœba coli.* **a. gingiva'lis,** one species found about the gums. **a. histolyt'ica,** same as the *a. dysenteriæ.*

amebaphobia (*am-e-bah-fo'-be-ah*) [*ameba; φόβος,* fear]. A morbid fear of becoming infected with amebæ.

amebiasis (*am-e-bi'-as-is*). The state or condition of being infected with amebæ.

amebic (*am-e'-bik*) [see *ameba*] Pertaining to or characterized by amebæ. **a. dysentery,** dysentery caused by the presence in the bowel of *amœba coli.*

amebicide (*am-e'-bis-id*) [*ameba; cædere,* to kill]. 1. Destructive of amebæ. 2. A remedy that destroys amebæ.

amebiform (*am-e'-be-form*). See *ameboid.*

amebism, amœbism, amebaism, amœbaism (*am'-e-bizm, am-e'-ba-izm*). A pathological condition due to the invasion of the system by amebæ.

amebocyte (*am-e'-bo-sīt*). A leukocyte.

ameboid (*am-e'-boid*) [*ameba; εἶδος,* resemblance]. 1. Resembling an ameba in form or in movement, as the white blood-cells. 2. In bacteriology, of cultures which assume various shapes.

amebula, amœbula (*am-e'-bu-lah*). A merozoite having the power of ameboid movement.

ameburia (*am-e-bu'-re-ah*). The occurrence of amebæ in the urine.

a m e l e i a (*am-el-i'-ah*) [ἀμέλεια, indifference]. Morbid apathy; indifference.

amelia (*ah-me'-le-ah*) [*ἀ,* priv.; *μέλος,* limb]. Congenital absence of the limbs.

amelification (*am-el-if-ik-a'-shun*). The formation of the enamel of the teeth by means of the enamel cells—ameloblasts.

amelioration (*am-ēl-yo-rā'-shun*) [*ad,* to; *melior,* better]. Improvement.

ameloblast (*am-el'-o-blast*) [Anglo-French, *amel,* enamel; *βλαστός,* a germ]. An enamel-cell, one

of the cylindrical cells covering the papilla of the enamel organ of the teeth, and forming a beautifully regular epithelial layer that produces the enamel.

amelus (*am'-el-us*) [ἀ, priv.; μέλος, limb]. A monstrosity without limbs.

amenia (*ah-me'-ne-ah*). See *amenorrhea*.

amenomania (*am-en-o-ma'-ne-ah*) [*amœnus*, agreeable; μανία, madness]. A mild form of mania in which the symptoms are manifested under the form of gaiety, fondness of dress, exaggeration of social condition, etc; a cheerful, or joyous delirium; a morbid elevation of the spirits.

amenorrhea, amenorrhœa (*ah-men-or-e'-ah*) [ἀ, priv.; μήν, month; ῥεῖν, to flow]. Abnormal absence of menstruation. Syn., *paramenia obstructionis; amenia*. **a., ovarian, a., radical,** that due to nonovulation. **a., physiologic,** absence of menstruation during pregnancy. **a., primitive,** a term applied to those cases in which the catamenia have not appeared at the proper time. **a., secondary,** that in which the discharge has been arrested after it has existed during the reproductive period.

amenorrheal (*ah-men-or-e'-al*) [see *amenorrhea*]. Pertaining to amenorrhea.

ament (*am'-ent*) [*ab*, from; *mens, mentis*, the mind]. A person affected with amentia; an idiot.

amentia (*ah-men'-she-ah*) [ἀ, priv.; *mens*, mind]. Defective intellect; idiocy.

amenyl (*am'-en-il*). Methylhydrastimide It is a vasodilator and is used as an emmenagogue. Dose gr. ¼ (0.05 Gm.) twice daily.

amerism (*am'-er-izm*) [ἀ, priv.; μέρος, a part]. The quality or condition of not dividing into segments or fragments.

ameristic (*ah-mer-is'-tik*) [ἀ priv.; μέρος, a part]. Not segmented.

amesiality (*ah-me-ze-al'-it-e*). The throwing of a part, as the pelvis, to one side of the mesial line of the figure.

ametabolic (*ah-met-ab-ol'-ik*) [ἀ, priv.; μεταβόλος, changeable]. Not due to, or causing, or undergoing, metabolism.

ametamorphosis (*ah-met-ah-mor'-fo-sis*) [ἀ, priv.; μεταμορφωσις, change]. The absence of metamorphosis.

ametria (*ah-met'-re-ah*) [ἀ, priv; μήτρα, womb]. 1. Congenital absence of the uterus 2. [ἀ, priv; μέτρον, a measure]. Immoderation; asymmetry.

ametrohemia, ametrohæmia (*ah-met-ro-he'-me-ah*) [ἀ, priv.; μήτρα, womb; αἷμα, blood]. A defective uterine blood-supply.

ametrometer (*ah-met-rom'-et-er*) [ἀ, priv.; μέτρον, a measure]. An instrument for measuring ametropia.

ametrope (*ah'-met-rōp*) [ἀ, priv; μέτρον, a measure; ὄψις, sight]. An individual affected with ametropia.

ametropia (*ah-met-ro'-pe-ah*) [ἀ, priv.; μέτρον, a measure; ὄψις, sight]. The condition when an imperfect image is formed upon the retina, due to defective refractive power of the media or to abnormities of form of the eye. In *myopia* the anteroposterior diameter is too great or the power of the refractive media is too great; *hyperopia* (or *hypermetropia*) is the exact reverse; *astigmatism* is due to imperfect curvature of the cornea or of the retina, or to inequality of refracting power in different parts of the lens; *presbyopia* is due to inelasticity of the lens, producing insufficient accommodation; *aphakia*, or absence of the lens, produces both insufficient refracting power and loss of accommodation.

ametropic (*ah-met-rop'-ik*) [see *ametropia*]. Affected with or pertaining to ametropia.

ametrous (*ah-met'rus*) [ἀ, priv.; μήτρα, womb]. Lacking a uterus.

amianthinopsy (*am-e-an-thin-op'-se*) [ἀ, priv.; ἀνθινος, violet-colored; ὄψις, sight]. Violet-blindness; incapacity to distinguish violet rays.

amic (*am'-ik*) [*ammonia*]. Pertaining to or having the nature of ammonia, or of an amine.

Amici's disc, A.'s stria. See *Krause's disc*.

amicrobic (*ah-mi-kro'-bik*) [ἀ, priv.; *microbion*, microbe]. Not due to, or associated with, microbes.

amicron (*ah-mik'-rŏn*) [ἀ, priv.; μικρον, small]. A particle which is too small to be observed with the ultramicroscope.

amicroscopic (*ah-mi-kro-skop'-ik*). Too small to be observed by the ultramicroscope.

amide (*am'-id*) [*ammonia*]. A chemical compound produced by the substitution of an acid radical for one or more of the hydrogen atoms of ammonia. The amides are primary, secondary, or tertiary, according as 1, 2, or 3 hydrogen atoms have been so replaced. They are white, crystalline solids, often capable of combining with both acids and bases. **a., acid.** 1. An amido-acid. 2. An amide as distinguished from amine or alkamide. **a., allophanic,** see *biuret*. **a. bases,** see *amine, primary*.

amidine (*am'-id-in*) [Fr., *amidon*, starch]. 1. Starch altered by heat into a horny, transparent mass; soluble starch; the part of starch that is soluble in water. 2. [*ammonia*]. One of a class of monacid bases produced from the nitrites by heating with ammonium chloride. In the free condition they are quite unstable. They contain the group $C.NH.NH_2$.

amido- (*am'-id-o*) A prefix denoting a chemical compound containing the univalent radical NH_2. And see *amino-*.

amidoacetic acid (*am-id-o-as-e'-tik*). See *glycocoll* and *glycin*.

amidoacetophenetidin (*am-id-o-as-et-o-fe-net'-id-in*). See *phenocoll*.

amidoacid (*am-id-o-as'-id*) [*ammonia; acid*]. An acid containing the amido-group NH_2.

amidoazotoluol (*am-id-o-az-o-tol'-u-ol*). A reddish-brown powder, allied to scarlet-red; it is soluble in alcohol, ether, and fatty oils, but is insoluble in water. It is used as an ointment to promote the growth of epithelium on granulating surfaces.

amidobenzene, amidobenzol (*am-i-do-ben'-zēn, -zol*). See *aniline*.

amidocaffeine (*am-id-o-kaf'-e-in*), $C_8H_9(NH_2)N_4O$. Fine acicular crystals obtained by heating bromcaffeine with alcoholic ammonia.

amidocaproic acid. Same as leucin.

amidogen (*am-id'-o-jen*) [*amide; γεννᾶν*, to produce]. The hypothetical univalent radical, NH_2, replacing one atom of H in amido-compounds. See *amide*.

amidoguaiacol (*am-id-o-gwi'-ak-ol*). A product of acetoanisidin by nitration and reduction. It melts at 184° C. The salts are employed in the preparation of colors and medicines.

amidopyrine (*am-i-do-pi'-rēn*). Same as *pyramidon, q. v.*

amidosuccinamic acid (*am-id-o-suk-sin-am'-ik*). Same as *asparagin*.

amidosulphonal (*am-id-o-sul'-fon-al*). Amidoacetone ethyldisulphone, a sedative.

amidoxim, or amidoxime (*am-id-oks'-im*). A substance derived from an amidine (2) by the substitution of an OH group for an atom of H.

amidulin (*am-id'-u-lin*) [see *amidine*]. Soluble starch; prepared by the action of H_2SO_4 on starch, thus removing the starch-cellulose.

amimia (*ah-mim'-i-ah*) [ἀ, priv.; μῖμος, a mimic]. Loss of the power of imitation or of making gestures.

amine, amin (*am'-in*) [*ammonia*]. The *amines* are chemical compounds produced by the substitution of a basic atom or radical for one or more of the hydrogen atoms of ammonia, or basic derivatives of carbon, containing nitrogen and viewed as ammonia derivatives. They are called *monamines, diamines, triamines*, etc., according to the number of amidogen molecules, NH_2, substituted for H. **a., primary**, an amine in which one hydrogen atom is replaced by a univalent alkyl. **a. secondary**, an amine in which two hydrogen atoms are replaced by univalent alkyls. **a., tertiary**, an amine in which three hydrogen atoms are replaced by univalent alkyls.

amino-. A prefix denoting a chemical compound containing the univalent radical NH_2. And see *amido-*. **a.-acid**, an organic acid in which one of the hydrogen atoms is replaced by NH_2

amino-acidemia (*am-in-o-as-id-e'-me-ah*) Decreased alkalinity of the blood due to the presence of an amino-acid.

aminoform (*am-in'-o-form*). See *urotropin*.

aminol (*am'-in-ol*) [*amine*] A gaseous substance derived from the methylamine of herring-brine mixed with milk of lime. It is disinfectant, and has been used in the purification of sewage.

aminopurin (*am-in-o-pu'-rin*). Any compound derived from purin by substitution of one of the hydrogen atoms by the amino group, NH_2; adenin.

aminosis (*am-in-o'-sis*) The presence of amino-acids in the body; the production of amino-acids in the body.

aminosuria (*am-in-o-sū'-re-ah*) [*amine; οὖρον*, urine]. The presence of amines in the urine when voided.

amitosis (*ah-mit-o'-sis*) [ἀ, priv.; *μίτος*, a thread]. Cell-multiplication by direct division or simple cleavage.

amitotic (*ah-mit-ot'-ik*) [see *amitosis*] Of the nature of, or characterized by, amitosis. **a. cell-division**, direct cell-division, as distinguished from karyokinesis.

amma (*am'-ah*) [ἄμμα, a tie: *pl., ammata*]. A truss or girdle for hernia.

ammeter (*am'-et-er*) [*ampère; μέτρον*, a measure]. A form of galvanometer in which the value of the current is measured directly in ampères.

ammic (*am'-ik*). See *ammoniacum*.

ammism (*am'-izm*) [ἄμμος, sand]. Ammotheraphy; psammism.

Ammon's fissure (*am'-on*) [Friedrich Agust von *Ammon*, German ophthalmologist 1799–1861]. A pyriform fissure, occurring during the early fetal period in the lower portion of the sclerotic coat of the eye. **A.'s operation.** 1. *Blepharoplasty;* removal of all cicatricial tissue and freeing of the remains of the lid, followed by transplantation of a flap from the cheek. 2. For *destruction of the lacrimal sac;* incision into, and excision of, a portion of the anterior wall of the sac; closure by adhesive inflammation. 3. For *ectropion* (from caries); an incision is made, around the cicatrix, the tissues are dissected free, and after closing the lid the wound is closed over the cicatrix. 4. *For symblepharon;* the lid is divided by two converging incisions, into three portions—two lateral and a central wedge-shaped portion; the former are united by sutures, and after union the central, wedge-shaped part is dissected out. **A.'s posterior scleral protuberance**, a variety of posterior ectasia of the sclera of the eye.

Ammon's horn (*am'-on*) [*Ammon*, an Egyptian diety represented with a ram's head]. The hippocampus major of the brain.

ammonal (*am'-on-al*). Trinitrotoluene mixed with 20% of ammonium nitrate.

ammonemia (*am-o-ne'-me-ah*). The presence of ammonium carbonate in the blood.

ammonia (*am-o'-ne-ah*) [from the name of Jupiter *Ammon*, from the neighbourhood of whose temple in Libya ammonium chloride was obtained]. A colorless, pungent gas, NH_3, very soluble in water. The preparations are used as antacids and as gastric and cardiac stimulants. **ammoniæ, aqua** (U. S. P.), water of ammonia, a solution containing 10% of the gas in water Dose 5 min.–½ dr. (0.3–2 0 Cc.), well diluted. **ammoniæ, aqua, fortior** (U. S P.), contains 28% of the gas in solution. **ammoniæ, linimentum** (U. S. P.), ammonia-water, 35; cottonseed oil, 60; alcohol, 5%. **ammoniæ, spiritus** (U. S. P.), a 10% solution of ammonia water in alcohol. Dose 10 min –1 dr. (0.65–4 0 Cc), diluted. **ammoniæ, spiritus, aromaticus** (U. S. P.), aromatic spirit of ammonia, an alcoholic solution of ammonium carbonate flavored with lemon, lavender, and pimenta. Dose½–2 dr. (2–8 Cc.).

ammoniac (*am-o'-ne-ak*). 1. See *ammoniacum*. 2 Relating to ammonia. 3. Relating to ammoniacum.

ammoniacal (*am-o-ni'-ak-al*) [*ammonia*]. Containing or relating to ammonia

ammoniacum (*am-o-ni'-ak-um*) [*ammonia*]. Ammoniac A gum obtained from a Persian plant, *Dorema ammoniacum* It is a stimulating expectorant and laxative, resembling asafetida, employed in chronic bronchial affections. Dose 10–30 gr. (0.65–2 0 Gm.). **ammoniaci cum hydrargyro, emplastrum**, ammoniac, 72; mercury, 18%, with sulphur, acetic acid, and oil, q. s. **ammoniaci, emplastrum**, 100 parts of ammoniac digested with 140 parts of acetic acid, diluted, strained, and evaporated. **ammoniaci, emulsum**, a 4% emulsion in water. Dose ½–1 oz (15–30 Cc.).

ammoniameter (*am-o-ne-am'-et-er*) [*ammonia; μέτρον*, a measure]. An instrument for testing the strength of ammonia solutions.

ammoniated (*am-o'-ne-a-ted*) [*ammonia*]. Combined with ammonia.

ammoniemia, or ammoniæmia (*am-o-ne-e'-me-ah*) [*ammonia; αἷμα*, blood]. The theoretical decomposition of urea in the blood, yielding ammonium compounds.

ammonin (*am'-o-nin*). A soda deposit used in the making of soap.

ammonionitrometry (*am-o-ne-o-ni-trom'-et-re*) [*ammonium; nitrogen; μέτρον*, a measure]. An analytic method of estimating separately the amount of ammonia, nitrogen, and nitric acid contained in a compound.

ammonium (*am-o'-ne-um*) [*ammonia*]. A hypothetic univalent alkaline base, having the composition NH_4. It exists only in combination. **a. acetate, solution of** (*liquor ammonii acetatis*, U. S P.), spirit of Mindererus, dilute acetic acid

neutralized with ammonia. Dose 1 dr.–1 oz. (3.75–30.0 Cc.). **a. anacardate,** an ammonium compound of the resinous acids of cashew-nut. It is a doughy mass, soluble in alcohol, and used as a hair-dye. **a. arsenate,** $(NH_4)_2HAsO_4$. It is used as an alterative in skin diseases. Dose ½ gr. (0.03 Gm.), gradually increased, 3 times daily. **a. benzoate** (*ammonii benzoas*, U. S. P.), $NH_4C_7H_5O_2$. Dose 5–15 gr. (0.32–1.0 Gm.). **a. bisulphate,** NH_4HSO_4. Dose 10–30 gr. (0.65–2.0 Gm.). **a. bisulphite,** NH_4HSO_3. It is antiseptic and used internally in fermentative dyspepsia, externally in skin diseases. Dose 10–30 gr. (0.65–2.0 Gm.). **a. bitartrate,** $NH_4HC_4H_4O_6$, a white, crystalline acid powder. It is used in the manufacture of baking-powder. **a. borate,** $2(NH_4HB_2O_4) + 3H_2O$, used in renal colic; in combination with codeine it is used in tuberculosis of the lungs. Dose 10–20 gr (0.65–1.3 Gm.) every hour in water with licorice. **a. borobenzoate,** an intestinal antiseptic. **a. bromide** (*ammonii bromidum*, U. S. P.), NH_4Br, used in epilepsy, cough, and rheumatism. Dose 10 gr – ½ dr. (0.65–2.0 Gm.). **a. carbamate,** $NH_4NH_2CO_2$, a white, crystalline, volatile powder, stimulant, a reaction-product of carbon dioxide and ammonia gas. Syn., *ammonium carbonate anhydrine.* **a. carbazotate,** see *a. picrate.* **a. carbolate,** $C_6H_5O.NH_4$, antiseptic and antipyretic. Dose 2–6 gr. (0.13–0.4 Gm.). Syn., *ammonium phenate; ammonium phenylate.* **a. carbonate** (*ammonii carbonas*, U. S. P.), $C_2H_{11}N_3O_5$, a compound of ammonium and carbonic acid. It is a stimulant expectorant and cardiac stimulant. Dose 5–10 gr. (0.32–0.65 Gm.). **a. chloride** (*ammonii chloridum*, U. S. P.), NH_4Cl, sal ammoniac, is used in bronchitis, rheumatism, and liver disease. Dose 1–20 gr. (0.065–1.3 Gm.). **a. chloride, troches of** (*trochisci ammonii chloridi*, U. S. P), each lozenge contains 2 gr. (0.13 Gm.) of the salt. **a. embelate,** the ammonium salt of embellic acid, $NH_4C_9H_{13}O_2$. It is a teniacide. Dose for children 3 gr. (0.2 Gm); for adults 6 gr. (0.4 Gm.). **a. fluoride,** used in enlargement of the spleen. Dose $\frac{1}{4}$ – ½ gr. (0.003–0.032 Gm.). It is recommended in dyspeptic flatulence, 16 gr. (1 Gm.) dissolved in 10 oz (300 Cc.) of distilled water, 1 tablespoonful after each meal. **a. formate,** NH_4CHO_2 used in chronic paralysis. Dose 5 gr. (0.32 Gm). **a. glycerinophosphate,** $(NH_4)_2PO_4C_3H_5(OH)_2$, soluble in water. It is used in neurasthenia, Addison's disease, etc. Dose 3–4 gr. (0.2–0.26 Gm.) several times daily. **a. glycyrrhizate,** an expectorant. **a. hypophosphite,** $NH_4PH_2O_2 + H_2O$, white, laminate crystals, soluble in water. Dose 10–30 gr. (0.65–2.0 Gm.) 3 times daily. **a. iodide** (*ammonii iodidum*, U. S. P.), NH_4I. Dose 2–10 gr. (0.13–0.65 Gm.). **a. nitrate,** NH_4NO_3, used in preparing nitrous oxide. **a. persulphate,** $(NH_4)_2S_2O_8$, colorless crystals, soluble in water with turbidity. It is a disinfectant and deodorizer. Application, 0.5 to 2 % solution. **a. phosphate,** $(NH_4)_2HPO_4$. Dose 5–20 gr. (0.32–1.3 Gm.). **a. phosphate, dibasic,** $(NH_4)_2HPO_4$. Used in rheumatism and gout. Dose 5–20 gr. (0.32–1.3 Gm.) 3 or 4 times daily in ½ oz. water. **a. picrate,** $C_6H_2(NH_4)(NO_2)_3O$, a salt in yellow needles, of bitter taste; like other picrates, it is explosive, and must be handled with care. It is antipyretic and antiperiodic, and tends to correct gastric disturbances. Dose 5 gr. (0.32 Gm.) in 24 hours. Syn., *Ammonium carbazotate.* **a. salicylate** (*ammonii salicylas*, U. S. P.), $NH_4C_7H_9O_3$, an antirheumatic, antipyretic germicide and expectorant. Dose 2–10 gr. (0.13–0.65 Gm.). **a. [silicofluoride,** $2NH_4F.SiF_4$, an energetic antiseptic and reconstituent. It is used by inhalation in diseases of the nose and throat. **a. succinate,** $(NH_4)C_4H_4O_4$; recommended, 1 part in 120 parts of water, as a specific in colic. Dose 1 tablespoonful every 15 minutes. **a. sulphate,** $(NH_4)_2SO_4$, used in the preparation of other ammonium salts. **a. sulphite,** $(NH_4)_2SO_3$, an antiseptic used in fermentative dyspepsia. Dose 5–20 gr. (0.3–1.3 Gm.). Applied externally in skin diseases, 1 part in 10 parts of water. **a. sulphocarbolate,** $NH_4C_6H_4HSO_4$, antiseptic. Dose 1–5 gr. (0 06–0.3 Gm.). **a. sulphoricinate,** brown, ointment-like masses, soluble in alcohol and water. It is antiseptic and deodorant, and applied in 20 % solution in skin diseases or on ulcerated mucous membranes. **a. tartrate,** $(NH_4)_2C_4H_4O_6$, clear crystals, soluble in water. It is an expectorant. Dose 5–30 gr. (0.3–2.0 Gm.). **a. thiosulphate,** $(NH_4)_2S_2O_3$, soluble in water, antiseptic. Dose 5–30 gr. (0.3–2.0 Gm.) in water **a. tungstate,** fine white crystalline powder or needles, soluble in water. **a. urate,** $(NH_4)C_5H_3N_4O_3$, white crystalline powder, slightly soluble in water. It is antiseptic and used in 4 % ointment in chronic eczema. Ammonium urate occurs in alkaline urine and at times in urinary calculi. **a. valerate,** $NH_4C_5H_9O_2$ is used as a sedative in hysteria. Dose 1–5 gr. (0.065–0.32 Gm.).

ammoniuria (*am-o-ne-ū'-re-ah*) [*ammonia; οὖρον*, urine]. A condition marked by excess of ammonia in the urine.

ammonol (*am'-on-ol*), $C_6H_5NH_2$. A proprietary remedy said to be ammoniated phenylacetamide; pale-yellow crystals, said to be analgesic and antipyretic. Dose 5–20 gr. (0.3–1.3 Gm.). **a. salicylate,** a remedy for headache. Dose 8 gr. (0.5 Gm.).

ammotherapy (*am-o-ther'-a-pe*) [*ἄμμος*, sand; *θεραπεύειν*, to heal]. The use of sand-baths in the treatment of disease.

amnemonic (*am-ne-mon'-ik*) [*ἀ*, priv.; *μνημονικός*, relating to the memory]. Accompanied by or resulting in impairment of the memory.

amnesia (*am-ne'-se-ah*) [*ἀμνησία*, forgetfulness]. Loss of memory, especially of the ideas represented by words. **a., auditory,** word-deafness. **a., retroanterograde,** a perversion of memory in which recent events are referred to a far-removed past, while the occurrences of the remote past seem recent. **a., retrograde,** loss of memory for incidents and events which occurred a shorter or longer time before the attack of the disease. Besides that which may result from severe infectious disease or from epilepsy, it may be due to trauma or to hysteria. **a., visual,** word-blindness, or inability to recognize printed or written words.

amnesic (*am-ne'-sik*). Relating to amnesia. **a. aphasia,** see *amnesia.*

amnestia (*am-nes'-te-ah*) [*ἀμνηστεία*, forgetfulness]. Amnesia.

amnestic (*am-nes'-tik*) [*ἀμνηστεία*, forgetfulness]. 1. Amnesic. 2. Causing amnestia.

amnia (*am'-ne-ah*) [*ἀμνίον*, a young lamb]. Plural of *amnion, q. v.*

amnial (*am'-ne-al*). See *amniotic.*

amniochorial (*am-ne-o-ko'-re-al*) [*amnion; χόριον*, a membrane]. Pertaining to both amnion and chorion.

amnioclepsis (*am-ne-o-klep'-sis*) [ἀμνίον, amnion; κλεπτειν, to steal away]. The slow and unnoticed escape of the liquor amnii.

amnioclептic, amnioclepticous (*am-ne-o-klep'-tik-us*) [*amnion*; κλεπτειν, to steal away]. Relating to the unmarked escape of the liquor amnii.

amnioma (*am-ne-o'-mah*) [*amnion*; ὄμα, a tumor]. A tumor on the skin caused by antenatal adhesion of the amnion.

amnion (*am'-ne-on*) [ἀμνίον, a young lamb]. The innermost of the fetal membranes; it is continuous with the fetal epidermis at the umbilicus, forming a complete sheath for the umbilical cord and a sac or bag in which the fetus is inclosed. It contains one or two pints of *liquor amnii*. It is a double, non-vascular membrane, the inner layer or *sac* derived from the epiblast, the outer from the mesoblast. The cavity of the inner folds is called the *true amnion*, that of the outer, the *false*. Syn., *agnina membrana; agnina pellicula; membrana agnina; agnina tunica; abgas; abghas.* **a., dropsy of,** excessive secretion of liquor amnii.

amnionic (*am-ne-on'-ik*) [*amnion*]. Relating to the amnion

amniorrhea (*am-ne-o-re'-ah*) [*amnion*; ῥοία, a flow]. The discharge of the liquor amnii.

amnios (*am'-ne-os*). 1. The liquor amnii. 2. The amnion

amniota (*am-ne-o'-tah*) [ἀμνίον, a young lamb]. Animals with an amnion and allantois, comprising mammals, birds, and reptiles. Those without an amnion are called *anamnia*.

amniotic (*am-ne-ot'-ik*) [*amnion*]. Relating to the amnion. **a. cavity,** the sac of the amnion. **a. fluid,** the liquor amnii. See *amnion*.

amniotitis (*am-ne-o-ti'-tis*) [ἀμνίον, a young lamb; ῖτις, inflammation]. Inflammation of the amnion.

amniotome (*am'-ne-o-tōm*) [ἀμνίον, a young lamb; τόμη, a cut]. An instrument for puncturing the fetal membranes.

amnitis (*am-ni'-tis*). Same as *amniotitis*.

amœba (*am-e'-bah*). See *ameba*.

amœbiasis (*am-e-bi'-as-is*). See *amebiasis*.

amœbiform. Same as *ameboid*.

amœbism, amœboism. See *amebism*.

amœboid (*am-e'-boid*). See *ameboid*.

amœbula. See *amebula*.

amok, amuck (*am-ok', a-muk'*) [A Malay word denoting "an impulse to murder"]. In a state of murderous frenzy; in Oriental regions persons, mostly hashish eaters, often attack and kill those whom they meet while in a state of wild fury. In some cases the infuriated persons take this method of seeking death, for they are shot down at sight.

Amomum (*am-o'-mum*) [ἄμωμον, an Eastern spice plant]. A genus of scitaminaceous plants to which the cardamom (*A. cardamomum*) and "grains of paradise" (*A. granum paradisi*) belong.

amor (*am'-or*) [L.]. Love. **a. insanus,** see *erotomania*. **a. sui,** love of self; vanity. **a. veneris,** Columbus' term for the clitoris.

amoralia (*a-mo-ra'-le-ah*) [ἀ, priv.; *moralis*, moral]. Moral imbecility.

amoralis (*a-mo-ra'-lis*) [α, priv.; *moralis*, moral]. A moral imbecile.

amorpha (*ah-morf'-ah*) [ἀ, priv.; μορφή, shape]. 1. A cutaneous eruption having no definite form. 2. A macula. 3. Apparent diseases in which no lesions can be discovered. 4. Intertrigo. **a. infantilis, a. lactantium,** infantile intertrigo. **a. vulgaris,** intertrigo.

amorphia (*ah-mor'-fe-ah*) [see *amorpha*]. Shapeless condition.

amorphinism (*ah-mor'-fin-izm*) [ἀ, priv.; *morphine*]. The condition resulting from the withdrawal of morphine from one habituated to the drug.

amorphism (*ah-mor'-fizm*) [see *amorpha*]. The state of being amorphous or without shape; want of crystalline structure.

amorphous (*ah-mor'-fus*) [see *amorpha*]. Formless; shapeless; not crystalline.

amorphus (*ah-mor'-fus*) [ἀ, priv.; μορφή, a form]. An acardiacus without head or extremities. See also *anideus*. **a. globulus,** see *anideus*.

amotio (*am-o'-she-o*) [L.] A detachment. **a. retinæ.** See *ablatio retinæ*.

amp. Abbreviation for *ampère*.

ampelopsin (*am-pel-op'-sin*). A tonic extract made from *Ampelopsis quinquefolia*, Virginia creeper.

ampelotherapy (*am-pel-o-ther'-a-pe*) [ἄμπελος, a grape-vine; θεραπεύειν, to heal]. The grape-cure (*q. v.*).

amperage (*am-pār'-ahj*) [André Marie *Ampère*, French physicist, 1775–1836]. The number of ampères passing in a given circuit.

ampére (*am'-pār*) [see *amperage*]. A unit of measurement of an electric current. It is the electromotive force of one volt produced in a circuit having one ohm of resistance. **A.'s law,** same as Avogadro's law, *q. v.*

amperemeter (*am-pār'-me-ter*) [*ampère*; μέτρον, a measure]. An instrument for estimating the strength of the current of an electric circuit in ampères.

amphamphoterodiplopia (*am-fam-fo-ter-o-dip-lo'-pe-ah*). See *amphodiplopia*.

ampharkyochrome (*am-far-ke'-o-krōm*). Same as amphiarkyochrome.

amphauxesis, amphauxis (*am-fawks-e'-sis, am-fawks'-is*) [ἀμφί, around; αὔξησις, increase]. Growth or increase by concentric circles. Syn., *amphiphya*.

amphemeros, amphemerus (*am-fem'-er-os, -us*). 1. Quotidian. 2. A quotidian fever.

amphi- (*am'-fe*) [ἀμφί, around]. A prefix signifying *about, on both sides, around, etc.*, as amphiarthrosis, amphibia, *etc.*

amphiarkyochrome (*am-fe-ar'-ke-o-krōm*) [ἀμφί, both; ἄρκυς, net; χρῶμα, color]. A term applied by Nissl to a nerve-cell the stainable portion of whose cell-body is in the form of a pale network, the nodal points of which are joined by an intensely staining network.

amphiarthrodial (*am-fe-ar-thro'-de-al*). Relating, to *amphiarthrosis*.

amphiarthrosis (*am-fe-ar-thro'-sis*) [*amphi*; ἄρθρον, a joint]. A form of mixed articulation in which the surfaces of the bones are connected by broad discs of fibrocartilage or else are covered with fibrocartilage and connected by external ligaments. It is distinguished by limited motion, as, *e. g.*, between the vertebræ.

amphiaster (*am'-fe-as-ter*) [*amphi-*; ἀστήρ, a star]. The figure formed in indirect cell-division by the achromatin threads and chromatin granules united to form the socalled nuclear spindle, together with the threads of cell-protoplasm radiating from a rounded clear space at each end of the spindle, known as the stars or suns.

amphibia (*am-fib'-e-ah*) [*amphi-*; βίος, life]. A class of *Vertebrata*, living both in the water and upon the land, as the frog, newt, etc.

amphibious (*am-fib'-e-us*) [see *amphibia*]. Living both on land and in water.

amphiblastic (*am-fe-blas'-tik*) [*amphi-*; βλαστός, a germ]. Pertaining to that form of complete segmentation that gives rise to an amphiblastula.

amphiblastula (*am-fe-blas'-tu-lah*) [*amphi-*; *blastula*, dim. of βλαστός, a germ]. The mulberry-mass or morula-stage in the development of a holoblastic egg. It follows the stage known as amphimorula.

amphiblestritis (*am-fe-bles-tri'-tis*) [ἀμφιβλήστρον, a net, ιτις, inflammation]. Inflammation of the retina.

amphiblestrodes (*am-fe-bles-tro'-dēz*) [ἀμφιβλήστρον, a net; εἶδος, form]. The retina.

amphiblestroid (*am-fe-bles'-troid*) [ἀμφιβλήστρον, a net; εἶδος, form]. Net-like. **a. apoplexia,** apoplexy of the retina. **a. membrane,** the retina.

amphibolia (*am-fe-bo'-le-ah*) [ἀμφιβολία, uncertainty]. The vacillating period of a fever or disease.

amphibolic (*am-fe-bol'-ik*) [see *amphibolia*]. Uncertain; doubtful. Applied to a period in the febrile process occurring between the fastigium and the defervescence, and marked by exacerbations and remissions.

amphicelous (*am-fe-se'-lus*) [ἀμφί, at both ends; κοῖλος, hollow]. In biology, biconcave, as the center of the vertebræ of fishes.

amphicentric (*am-fi-sen'-trik*) [ἀμφί, both, κέντρον, a point]. Originating and ending in the same vessel.

amphichroic (*am-fe-kro'-ik*) [ἀμφι, on both sides; χρόα, color]. Amphichromatic, *q. v.*

amphichromatic (*am-fe-kro-mat'-ik*) [ἀμφι, on both sides; χρῶμα, color]. Denoting an amphoteric reaction.

amphicrania (*am-fe-krā'-ne-ah*) [*amphi-*; κρανίον, the skull]. Headache affecting both sides of the head.

amphicreatine (*am-fe-kre-at'-in*) [*amphi-*; κρέας, flesh], $C_7H_{19}N_7O_4$. One of the muscle-leukomaines. It crystallizes in brilliant oblique prisms of a yellowish-white color, and is faintly basic.

amphicreatinine (*am-fe-kre-at'-in-in*) [see *amphicreatin*], $C_9H_{19}N_7O_4$ A member of the creatinin group of leukomaines derived from muscle.

amphicroic (*am-fe-kro'-ik*) [*amphi-*; κρούειν, to test]. Having the power to turn blue litmus-paper red and red litmus-paper blue.

amphicytula (*am-fe-sit'-u-lah*) [ἀμφί, on both sides; κύτος, cell]. The parent cell of an amphiblastic ovum.

amphidesmic, amphidesmous (*am-fe-des'-mik, -mus*) [ἀμφί, on both sides; δεσμός, a bond, a fetter]. Furnished with a double ligament.

amphidiarthrosis (*am-fe-di-ar-thro'-sis*) [*amphi-*; διάρθρωσις, articulation]. A mixed articulation such as that of the lower jaw, which partakes of the nature both of amphiarthrosis and diarthrosis.

amphigastrula (*am-fe-gas'-tru-lah*) [ἀμφί, on both sides; γαστήρ, belly]. The gastrula of an amphiblastic ovum.

amphigony (*am-fig'-o-ne*) [*amphi-*; γόνος, offspring]. The sexual process in its broadest sense; gamogenesis.

amphimicrobian (*am-fe-mi-kro'-be-an*) [*amphi-*; μῑκρος, small: βίος, life]. Both aerobian and anaerobian.

amphimixis (*am-fi-miks'-is*) [*amphi-*; μῖξις, mixing]. The mingling of two individuals or their germs; sexual reproduction.

amphimorula (*am-fe-mor'-u-lah*) [*amphi-*; *morula*, a mulberry]. The morula, or globular mass of cleavage cells resulting from unequal segmentation, the cells of the hemispheres being unlike in size.

Amphioxus (*am-fe-oks'-us*) [ἀμφί, both; ὀξύς, sharp]. A genus of fishes tapering at both ends, the lancelet.

amphipyrenin (*am-fe-pi'-ren-in*) [ἀμφί, around; πυρήν, mass]. The nuclear membrane of a cell.

amphismela (*am-fis-me'-lah*) [ἀμφί, both; μήλη, a probe]. A double-edged surgical knife.

Amphistoma (*am-fis'-to-mah*) [*amphi-*; στόμα, mouth]. A genus of trematode worms, named from the mouth-like apparatus at either end, also called *amphistomum*. One species, *A. hominis*, has been found in the large intestine

amphistomiasis (*am-fis-to-mi'-as-is*). The condition of being infested with Amphistoma.

amphitrichous (*am-fit'-ri-kus*) [*amphi-*; θρίξ, a hair]. Applied to the type of flagellation in certain bacteria having a flagellum or flagella single at each pole.

amphodiplopia (*am-fo-dip-lo'-pe-ah*) [ἀμφω, both; διπλόος, double; ὤψ, eye]. Double vision affecting each of the eyes

amphogenous (*am-fo'-en-us*). See *amphoteric*.

ampholyte (*am'-fo-līt*) [ἀμφω, both; *electrolyte*]. An amphoteric electrolyte; one which can function as an acid and also as a base.

amphopeptone (*am-fo-pep'-tōn*). A mixture of hemipeptone and antipeptone.

amphophil, amphophilous (*am'-fo-fil, am-fof'-il-us*) [ἀμφω, both; φιλεῖν, to love]. Readily stainable alike with acid and with basic dyes.

amphoric (*am-for'-ik*) [*amphora*, a vase with two handles]. Resembling the sound produced by blowing across the mouth of a bottle. **a. breathing,** breath-sounds with musical quality heard in diseased conditions of the lung, especially in pulmonary tuberculosis with cavity-formation. **a. resonance,** in auscultation, a metallic sound like that of blowing into a bottle, caused by the reverberation of sound in a cavity of the lung. **a. respiration,** see *a. breathing*.

amphoricity (*am-for-is'-i-te*) [*amphoric*]. The quality of being amphoric

amphoriloquy (*am-for-il'-o-kwe*). The production of amphoric sounds in speaking.

amphorophony (*am-for-of'-o-ne*) [*amphoric*; φωνή, a sound]. An amphoric resonance or sound.

amphoteric, amphoterous (*am-fo-ter'-ik, am-fot'-er-us*) [ἀμφότεροι, both of two]. Double-sided; having the power of altering the color of both red and blue litmus test-paper; a condition sometimes presented by the urine. **a. elements,** elements whose oxides unite with water, some to form acids, others to form bases.

amphoterodiplopia (*am-fot-er-o-dip-lo'-pe-ah*) [L.]. Amphodiplopia.

amphotropin (*am-fo-tro'-pin*). Hexamethylenetetramine camphorate. It acts as a urinary antiseptic, is said to promote the regeneration of sloughing epithelium, and to increase diuresis.

amphycyte (*am'-fe-sīt*) [ἀμφί, on both sides; κύτος, a cell]. 1. Amphicytula. 2. A capsule cell.

amplexatio (*am-pleks-a'-she-o*) [L., an embrace]. Sexual intercourse.

amplexation (*am-pleks-a'-shun*) [*amplexatio*, an embrace]. The treatment of a fractured clavicle by an apparatus that fixes the shoulder and covers a part of the chest and neck.

amplexus (*am-pleks'-us*) [L., an embrace]. 1. An embracing; coitus. 2. Embraced, surrounded.

ampliation (*am-ple-a'-shun*) [*ampliare*, to increase]. Dilatation or distention of a part or cavity.

amplification (*am-plif-ik-a'-shun*) [*amplificare*, to enlarge]. 1. In microscopy, increase of the visual area. 2. Enlargement, as of a diseased organ.

amplifier (*am'-ple-fi-er*) [see *amplification*]. An apparatus used in microscopy for increasing the magnification. It consists of a diverging lens or combination placed between the objective and the ocular, and gives to the image-forming rays from the objective an increased divergence.

amplitude (*am'-ple-tūd*) [*amplus*, broad]. The range or extent, as of vibrations and undulations, the pulse-wave, etc.

ampoule (*am-pool'*) [see *ampulla*]. A small, sealed, glass capsule, usually holding one dose of a hypodermic solution, sterile and ready for use.

ampsalvs (*amp'-salvs*). Trade name of a preparation containing neo-salvarsan and distilled water in two separate compartments.

ampul (*am-pool'*). See *ampoule*.

ampulla (*am-pul'-ah*) [L., "a Roman wine-jug": *pl. ampullæ*]. 1. The trumpet-mouthed or dilated extremity of a canal, as of the lacrimal canal, the receptaculum chyli, the Fallopian tubes, mammary ducts, semicircular canals, vas deferens, etc. 2. A bulla or blister. **a. chyli**, the receptaculum chyli. **a. of rectum**, the portion above the perineal flexure. **a. vitrea**, a glass bottle.

ampullaceous (*am-pul-a'-shus*). 1. Flask-shaped; big-bellied; gibbous. 2. Relating to an ampulla 3. Attended with the formation of bullæ or blebs.

ampullar, ampullate (*am-pul'-ar, am'-pul-āt*) Relating to an ampulla; shaped like an ampulla.

ampullitis (*am-pul-ī'-tis*). Inflammation of an ampulla, more especially that of the vas deferens.

ampullula (*am-pul'-ū-lah*) [dim. of *ampulla*]. A small ampulla, as in the lymphatic or lacteal vessels

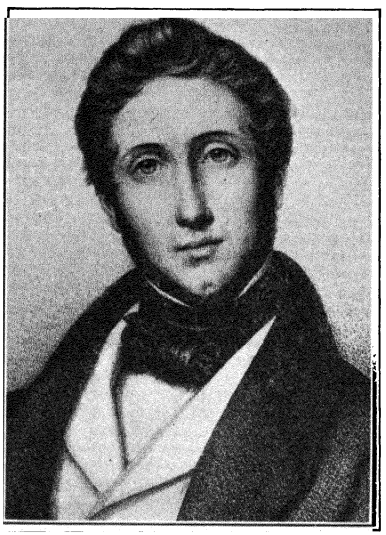
amputation (*am-pu-ta'-shun*) [*amputare*, to cut away]. The removal of a limb or any projecting part of the body. Amputation may be by the knife, ligature, or other means, or it may be the result of pathological processes, as gangrene, constriction (*e. g.*, of the cord in the fetus). **a., accidental,** the separation of a limb by some form of accident. **a., aperiosteal,** one in which the periosteum is completely removed from the end of the cut bone or bones. **a., bloodless,** one in which there is but slight loss of blood, on account of the circulation being controlled by mechanical means. **a., central,** one in which the scar is situated at or near the center of the stump. **a., chop,** one without flaps. **a., circular,** that performed by making a single flap, by circular sweeps of a long knife, through skin and muscles, in a direction vertical to the long axis of the limb. **a., circular skin-flap,** a modification of the circular, in which the skin-flap is dissected up, and the muscles divided at a higher level **a., coat-sleeve,** a modification of the circular, in which the cutaneous flap is made very long, the end being closed by being gathered together by means of a tape. **a., congenital,** amputation of fetal portions, due to constriction by amniotic bands. **a., consecutive,** an amputation during the period of suppuration or later. **a. in contiguity,** amputation at a joint. **a. in continuity,** amputation of a limb elsewhere than at a joint. **a., cutaneous,** one in which the flaps are composed exclusively of the integuments. **a., diclastic,** one in which the bone is broken with an osteoclast and the soft tissues divided by means of an écraseur. Its object is to avoid hemorrhage and purulent infection. **a., double flap,** one in which two flaps are formed from soft tissues. **a., dry,** see *a., bloodless*. **a., eccentric,** one in which the scar is situated away from the center of the stump. **a., elliptic,** one that may be performed by a single sweep, as in the circular method; the wound, however, having an elliptic outline, on account of the oblique direction of the incision. **a. of expediency,** one performed for cosmetic effect. **a., flap,** one in which one or more flaps are made from the soft tissues, the division being made obliquely. **a., flapless,** one in which, on account of destruction of the soft parts, flaps cannot be formed, the wound healing by granulation. **a., galvanocaustic,** one in which the soft parts are divided with the galvanocautery, followed by division of the bone by the saw. **a., immediate,** one done within 12 hours after the injury, during the period of shock. **a., intermediary, a., intermediate, a., intrapyretic,** one performed during the period of reaction and before suppuration. **a., intrauterine,** see *a., congenital*. **a., major,** amputation of an extremity above the wrist- or ankle-joint. **a., mediate,** see *a., intermediary*. **a., mediotarsal.** 1. Chopart's amputation. 2. An amputation through the tarsus, preserving the scaphoid bone. **a., minor,** amputation of a small part, as a finger. **a., mixed,** a combination of the circular and flap methods. **a., multiple,** amputation of two or more members at the same time. **a., musculocutaneous,** one in which the flaps consist of skin and muscle. **a., musculotegumentary,** see *a., musculocutaneous*. **a., natural,** see *a., congenital*. **a., oblique,** see *a., oval*. **a., osteoplastic,** one in which there are section and apposition of portions of bone in addition to the amputation. **a., oval,** a modification of the elliptic, in which the incision consists of two reversed spirals instead of the one oblique. **a., partial.** 1. One in which but a portion of the extremity is removed. 2. An incomplete congenital amputation. **a., pathological,** one done for tumor or other diseased condition. **a., primary,** one done after the period of shock and before the occurrence of inflammation. **a., racket,** a variety of the oval amputation in which there is a single longitudinal incision continuous below with a spiral incision on either side of the limb. **a., secondary,** one performed during the period of suppuration. **a., spontaneous,** see *a., congenital;* it also occurs in the disease, ainhum. **a., subastragalar,** a partial amputation of the foot, leaving only the astragalus. **a., subperiosteal,** one in the continuity, the cut end of the bone being covered by periosteal flaps. **a., supracondylar,** see *Gritti's operation*. **a., synchronous,** amputation of two or more members at the same time but by different operators. **a., tertiary,** that performed after the inflammatory reaction stage has passed. **a. by transfixion,** one done by thrusting a long knife completely through a limb and cutting the flaps from within out.

amuck. See *amok*.

amusia (*ah-mū'-se-ah*) [ἀ, priv.; μοῦσα, muse]. Loss of the ability to produce or comprehend music or musical sounds; an abnormity as

regards music analogous to aphasia as regards the faculty of speech. **a., motor,** that in which music is understood, but the power of singing or otherwise reproducing music is lost. **a., sensory,** musical deafness, or the loss of the power of comprehension of musical sounds.

Amussat's operation (*am-oo-sah'*) [Jean Zuléma *Amussat*, French surgeon. 1796–1856]. 1. A method of arresting hemorrhage by torsion of the arteries by means of two forceps. 2. For *atresia vaginæ;* dilatation by the use of the finger or a dull instrument, without cutting. 3. For



J. Z. Amussat.

castration; by incision upon the posterior surface of the scrotum. 4. For *enterorrhaphy;* in cases of completely divided intestine, each end is invaginated and passed over a cork, with a groove at either end, and the intestine is tied in the grooves. 5. For *imperforated rectum;* the formation of an artificial anus in the perineum, with or without excision of the coccyx. 6. For *lumbar colotomy;* a transverse incision is made, crossing the outer border of the quadratus lumborum muscle. **A.'s valves,** see *Heister's valves.*

amussis (*am-us'-is*) [L., "a carpenter's rule or level;" pl., *amusses*]. One of two portions into which a median fissure divides the posterior commissure of the brain.

amyasthenia (*am-i-as-the'-ne-ah*). Same as *amyosthenia.*

amycaine (*am'-e-kān*). Trade name of a local anesthetic containing bihydrochloride of amylene and novocaine. It is said to be less toxic than cocaine.

amyctic (*am-ik'-tik*) [ἀμυκτικός, mangling]. 1. Caustic; irritating. 2. A caustic or corrosive drug.

amydriasis (*ah-mid-ri'-ah-sis*). See *mydriasis.*

amydricaine (*am-id'-re-kān*). Same as alypin, *q. v.*

amyelencephalia (*ah-mi-el-en-sef-a'-le-ah*) [ἀ, priv.; μυελός, marrow; κεφαλή, the head]. Absence of both brain and spinal cord.

amyelencephalus (*ah-mi-el-en-sef'-al-us*) [ἀ, priv.; μυελός, marrow; κεφαλή, the head]. A fetal monster having neither brain nor spinal cord.

amyelia (*ah-mi-e'-le-ah*) [ἀ, priv.; μυελός, marrow]. Congenital absence of the spinal cord.

amyelic (*ah-mi-e'-lik*) [see *amyelia*]. Relating to amyelia.

amyelinic (*ah-mi-el-in'-ik*). Without myelin.

amyelonervia (*ah-mi-el-o-ner'-ve-ah*). See *amyeloneuria.*

amyeloneuria (*ah-mi-el-o-nū'-re-ah*) [ἀ, priv.; μυελός, marrow; νεῦρον, a nerve]. Paresis of the spinal cord.

amyelonic (*ah-mi-el-on'-ik*). 1. Amyelic. 2. Without marrow.

amyelotrophy (*ah-mi-el-ot'-ro-fe*) [ἀ, priv.; μυελός, marrow; τροφή, nourishment]. Atrophy of the spinal cord.

amyelous (*ah-mi'-el-us*). See *amyelic.*

amyelus (*ah-mi'-el-us*) [ἀ, priv.; μυελός, marrow]. A fetal monstrosity with partial or complete absence of the spinal cord.

amyencephalus (*ah-mi-en-sef'-al-us*). See *amyelencephalus.*

amygdala (*am-ig'-dal-ah*) [ἀμυγδάλη, almond]. 1. The tonsil. 2. A small lobule on the lower surface of each cerebellar hemisphere, projecting into the fourth ventricle. 3. Almond. The seeds of *A. amara* and *A. dulcis,* containing the principle *emulsin.* The former contains *amygdalin.* The expressed oil of the sweet almond is a demulcent and is useful in skin affections, in doses of 1–2 dr. (4–8 Gm.), a mild laxative; that of *A. amara* is used in cosmetics. **a. amara** (U. S. P.), the bitter almond. **a. dulcis** (U. S. P.), the sweet almond. **amygdalæ amaræ, aqua** (U. S. P.), a 1:1000 solution of the oil of bitter almonds in water. Dose 1 dr. (4 Cc.). **amygdalæ amaræ, oleum** (U. S. P.), contains 3–14% of hydrocyanic acid and has similar uses. Dose ½–1 min. (0.016–0.065 Cc.). **amygdalæ amaræ, spiritus** (U. S. P.), the spirit of bitter almonds. **amygdalæ, emulsum** (U. S. P.), oil of sweet almonds 6%; sugar, water, and acacia q. s. **amygdalæ expressum, oleum** (U. S. P.), expressed oil of almonds. Dose 1 oz. (30 Cc.). **amygdalæ, syrupus** (U. S. P.), syrup of almond; demulcent and slightly sedative. Dose 1–2 dr. (4–8 Cc.).

amygdalæ (*am-ig'-dal-e*) [L., *pl.* of *amydala*]. The tonsils.

amygdalectomy (*am-ig-dal-ek-to-me*) [*amygdala;* ἐκτομή, a cutting-out]. Excision of a tonsil.

amygdalin (*am-ig'-dal-in*) [see *amygdala*], $C_{20}H_{27}NO_{11} + 3H_2O$. A glucoside formed in bitter almonds, in various plants, and in the leaves of the cherry-laurel. Under the influence of emulsin, contained in the almond, it splits up into glucose and hydrocyanic acid.

amygdaline (*am-ig'-dal-ĕn*) [see *amygdala*]. 1. Almond-like. 2. Pertaining to the tonsil.

amygdalitis (*am-ig-dal-i'-tis*) [*amygdala;* ιτις, inflammation]. Tonsillitis.

amygdaloid (*am-ig'-dal-oid*) [*amygdala;* εἶδος, form]. Resembling an almond. **a. fossa,** the depression for the lodgment of the tonsil. **a. tubercle,** a projection of gray matter at the end of the descending cornu of the lateral ventricle of the brain. It is attached to the temporal lobe, and appears to be nearly isolated by white substance.

amygdalolith (*am-ig-dal'-o-lith*) [*amygdala;* λίθος, a stone]. A concretion or calculus found in the tonsil.

amygdaloncus (*am-ig-dal-ong'-kus*) [*amygdala*; ὄγκος, a mass]. Any tumor or swelling of the tonsil.

amygdalopathy (*am-ig-dal-op'-ath-e*) [*amygdala*; πάθος, a disease]. Any disease of the tonsils.

amygdalothrypsis (*am-ig-dal-o-thrip'-sis*) [*amygdala*; θρύψις, a crushing]. Crushing a hypertrophied tonsil and then excising the crushed portion.

amygdalotome (*am-ig'-dal-o-tōm*) [*amygdala*; τέμνειν, to cut]. An instrument used in cutting the tonsils.

amygdalotomy (*am-ig-dal-ot'-o-me*) [see *amygdalotome*]. Tonsillotomy. Partial or complete abscission of a tonsil.

amygmus (*am-ig'-mus*) [ἀμυγμός]. Scarification.

amygodophenin (*am-ig-dof'-en-in*) $C_6H_4(OC_2H_5)$-$NH.OC.CH(OH)C_6H_5$ A grayish-white, crystalline powder, derived from paramidophenol. It is antirheumatic. Dose 15 gr. (1 Gm.) from 1 to 6 times daily in powder. Syn., *phenylglycolphenetidin.*

amykos (*ah-mi'-kos*) [ἀ, priv.; μῦκος, a fungus]. An antiseptic fluid composed of boric acid, glycerin and infusion of cloves. Of reputed service in gonorrhea. dental caries, and catarrhs.

amyl (*am'-il*) [ὄμυλον, starch]. The radical, C_5H_{11}, of amylic alcohol, the fifth member of the series of alcohol radicals, C_nH_{2n+1}. **a.-alcohol,** see *amylic alcohol.* **a. bromide,** $C_5H_{11}Br$, a transparent, colorless liquid, soluble in alcohol. It is antiseptic and germicidal. **a. colloid,** a fluid preparation consisting of amyl hydride, 480 parts; aconitine, 1 part; veratrine, 6 parts; collodion, to 960 parts. It is painted on the skin in neuralgia, sciatica, etc. Syn, *anodyne colloid.* **a. hydrate,** see *amylic alcohol* **a. hydride,** a fractional product of petroleum ether, it is an antiseptic. Syn., *hydramyl; pentylene; pentylhydride.* **a. iodide,** $C_5H_{11}I$, the reaction-product of isoamylic alcohol, iodine, and phosphorus. It is sedative and antiseptic, and is used as an inhalation in dyspnea **a. nitrite,** $C_5H_{11}NO_2$, a clear, yellowish, volatile liquid, of a penetrating odor. It produces vascular dilation and stimulates the heart's action, and is useful in angina pectoris, respiratory, neuroses, etc. Dose, *internally,* ½–1 min. (0.016–0.065 Cc.) dissolved in alcohol; by *inhalation,* 2–5 min (0.12–0.3 Cc.). **a. nitrite, carbureted,** amyl nitrite saturated with carbon monoxide It is suggested as a substitute for pure amyl nitrite, to obviate pressure in the head and other secondary objectionable properties. **a. salicylate,** a compound obtained from the action of chlorine on a saturated solution of salicylic acid in amylic alcohol. It is said to have the sedative properties of the amylic derivatives as well as antirheumatic qualities. Dose in acute rheumatism 10 capsules of 3 gr. (0 2 Gm) each, daily. **a. valerate, a. valerianate,** $C_{10}H_{20}O_2$. It is a cholesterin solvent and is used as a sedative in gall-stone colic. Dose 2–3 gr. (0.13–0.2 Gm.). Syn., *apple oil.*

amylaceous (*am-il-a'-se-us*) [see *amyl*]. Containing starch; starch-like. See *corpora amylacea.*

amylamine (*am-il'-am-in*). See *isoamylamine.* **a. hydrochlorate,** $C_5H_{14}HCl$, a reaction-product of amyl cyanate, potassium hydrate, and hydrochloric acid, occurring as deliquescent scales or crystals. It is an antipyretic. Dose 7–15 gr. (0.45–1.0 Gm.).

amylase (*am'-il-ās*) [ἄμυλον, starch; *-ase*]. Any amylolytic enzyme, causing hydrolytic cleavage of the molecules of starch.

amylate (*am'-il-āt*). 1. A combination formed by the replacement of the hydrogen of the hydroxyl molecule in amylic alcohol with a metal or basic radical. 2. A compound of starch with a radical.

amylene (*am'-il-ēn*) [see *amyl*], C_5H_{10}. A liquid hydrocarbon having dangerous anesthetic properties. **a.-chloral,** $CCl_3.CH.OH.O.C.(CH_3)_2C_2H_5$, dimethyl-ethyl-carbinol-chloral. It is hypnotic. Syn., *dormiol.* **a. hydrate,** $C_5H_{12}O$, a tertiary alcohol used as a hypnotic Dose 30 min.–1 dr. (2–4 Cc.).

amylenization (*am-il-en-iz-a'-shun*). The production of anesthesia by means of amylene.

amylenol (*am-il'-en-ol*). Amyl salicylate; used externally in rheumatism.

amylic (*am-il'-ik*) [see *amyl*]. Pertaining to amyl. **a. alcohol,** fusel oil; potato-starch alcohol; amyl hydrate. An alcohol having the composition $C_5H_{12}O$, produced in the continued distillation of fermented grain. It was formerly used to adulterate whisky. It is a solvent and reagent.

amylin (*am'-il-in*) [see *amyl*). The insoluble wall of the starch-grain.

amylism (*am'-il-izm*). The toxic condition produced by amyl alcohol.

amylobacter (*am-il-o-bak'-tur*) [ἄμυλον, starch; βακτήριον, a little rod]. A genus of schizomycetes characterized by a period of development in which it contains starch in its interior

amylodextrin (*am-il-o-deks'-trin*). Same as *erythrodextrin.* See *soluble starch.*

amylodyspepsia (*am-il-o-dis-pep'-se-ah*) [ἄμυλον, starch, *dyspepsia*] Inability to digest starchy foods.

amyloform (*am-il'-o-form*). An odorless white powder produced by the chemical combination of starch with formaldehyde. It is non-toxic, quite insoluble, and is not decomposed under 180° C. It is recommended as a surgical antiseptic.

amylogen (*am-il'-o-jen*) [ἄμυλον, starch; γενής produce]. Soluble starch.

amylogenic (*am-il-o-jen'-ik*) [ἄμυλον, starch; γενάν, to produce] Starch-producing.

amylohydrolysis (*am-il-o-hi-drol'-is-is*) [ἄμυλον, starch, ὕδωρ, water, λύσις, solution]. The hydrolysis of starch.

amylohydrolytic (*am-il-o-hi-dro-lit'-ik*). Relating to the hydrolysis of starch.

amyloid (*am'-il-oid*) [ἄμυλον, starch; εἶδος, form]. 1. Starch-like 2. A starchy substance. 3. Glycogen. 4. Virchow's name for a waxy body found in animal tissue as a result of disease and resembling starch only in the one particular that it is stained by iodine. Cf *amyloid degeneration.* **a. bodies,** bodies resembling starch-grains, found in the nervous system, the prostate, etc. They are the result of a localized amyloid degeneration. **a. degeneration,** waxy or lardaceous degeneration. A degeneration characterized by the formation of an albuminous substance, resembling starch in its chemical reactions. The process affects primarily the connective tissue of the blood-vessels of various organs, and is connected with or due to chronic suppuration in the body. Amyloid substance gives a brown color with iodine, a red color with gentian-violet, and turns blue on being treated with iodine and sulphuric acid. **a. kidney,** see *Bright's disease.*

amyloidosis (*am-il-oid-o'-sis*). See *amyloid degeneration*.

amylolysis (*am-il-ol'-is-is*) [ἄμυλον, starch; λύσις, solution]. The digestion of starch, or its conversion into sugar.

amylolytic (*am-il-o-lit'-ik*) [see *amylolysis*]. Pertaining to or effecting the digestion of starch, as the ferments in the saliva and pancreatic juice that convert starch into sugar.

amylon (*am'-il-on*) [ἄμυλον, starch]. 1. Starch. 2. Glycogen. 3. A principle in grape-juice.

amyloplast (*am'-il-o-plast*) [ἄμυλον, starch; πλάσσειν, to form]. A leukoplast; a starch-forming protoplasmic granule.

amylopsin (*am-il-op'-sin*) [ἄμυλον, starch; ὄψις, appearance] A ferment found in the pancreatic juice which changes starch into sugar.

amylose (*am'-il-ōs*) [ἄμυλον, starch] Any of the carbohydrate groups, starch, glycogen, dextrin, inulin, gum, cellulose, and tunicin.

amylosis (*am-il-o'-sis*). Albuminoid degeneration of cells.

amylum (*am'-il-um*) [L.], $C_6H_{10}O_5$. Starch. **amyli, glyceritum** (U. S. P.), contains starch, 10; water, 10; glycerol, 80%; used for external application. **a. iodatum,** contains starch, 95%; iodine, 5%, triturated with distilled water and dried. Dose 1 dr.–½ oz. (4–16 Gm.). **amyli, mucilago** (B. P.), used in making enemas.

amyluria (*am-il-u'-re-ah*) [ἄμυλον, starch; οὖρον, urine]. Presence of starch in the urine.

amylzyme (*am'-il-zim*). An extract containing all of the digestive ferments of the fresh pancreas of the hog.

amyocardia (*am-i-o-kar'-de-ah*) [ἀ, priv.; μύς, muscle, καρδία, the heart] Lack of muscular power in the heart's contractions

Amyoesthesis (*ah-mi-o-es-the'-sis*) [ἀ-, priv., without; μῦς, muscle; αἴσθησις, sense] Without muscle sense, lack of sense of motion, weight and position upon which adjustment of the body depends

amyostasia (*am-i-os-ta'-ze-ah*) [ἀ, priv.; μύς, muscle, στάσις, standing]. An abnormal trembling of the muscles while in use, often seen in locomotor ataxia

amyosthenia (*am-i-os-the'-ne-ah*) [ἀ, priv.; μύς, muscle; σθένος, force]. Deficient muscular power.

amyosthenic (*am-i-o-sthen'-ik*) [ἀ, priv.; μύς, muscle; σθένος, force]. Pertaining to amyosthenia. Also, that depressing muscular action.

amyotaxia (*ah-mi-o-taks'-e-ah*) [ἀ, priv.; μύς, muscle; τάξις, arrangement]. Motor disturbance of the muscles, of spinal or cerebral origin. Muscular ataxia.

amyotonia (*am-i-o-to'-ne-ah*) [ἀ, priv.; μύς, muscle; τόνος, tone]. Lack of muscular tone; myatonia.

amyotrophia (*am-i-o-tro'-fe-ah*) [ἀ, priv.; μύς, muscle; τροφή, nourishment]. Muscle atrophy.

amyotrophic (*am-i-o-tro'-fik*) [see *amyotrophia*]. Characterized by muscular atrophy. **a. lateral sclerosis,** lateral sclerosis combined with muscular atrophy. The lesion is in the pyramidal tracts and in the ganglion-cells of the anterior gray horns of the spinal cord. The disease has a marked tendency to involve the medulla. **a. paralysis,** that due to muscular atrophy.

amyotrophy (*am-i-ot'-ro-fe*). See *amyotrophia*.

amyous (*am'-i-us*) [ἀ, priv.; μύς, muscle]. Weak; deficient in muscle or muscular strength.

amyrin (*am'-e-rin*) [*amyris*], $C_{16}H_{48}O$. A resinous principle derived from Mexican Elemi.

Amyris (*am'-e-ris*) [L.]. A genus of tropical trees and shrubs producing fragrant resins and gums, such as Elemi, etc.

amytal (*am'-it-al*). Trade term for isomylethylbarbituric acid, a local anesthetic. As a general anesthetic it is still *subjudice*.

amyxia (*am-iks'-i-ah*) [ἀ, priv.; μύξα, mucus]. Absence or deficiency of mucous secretion.

amyxis (*ah-miks'-is*) [ἀμύσσειν, to scarify]. Scarification.

amyxodes (*ah-miks-o'-dēz*). 1. Deficient in mucus; relating to amyxia. 2. Scarified; relating to amyxis.

amyxorrhea (*am-iks-o-re'-ah*) [ἀ, priv.; μύξα, mucus; ῥοία, flow]. Absence of the normal mucous secretion.

An. Abbreviation of *anode*.

-an, a suffix applied to a class of bodies related to the starch and sugar group.

ana (*an'ah*) [ἀνά, so much each]. A Greek preposition meaning *through, up, again,* etc. In prescriptions, contracted to *āā*, meaning *of each*.

-ana. A termination preferably used as a suffix to the name of a species around which others naturally cluster, in the naming of subsections or groups of species; *e. g.*, the group of species of *Helix* related to *H. pomatia* may be indicated by the term *pomatiana*

anabasis (*an-ab'-as-is*) [ἀναβαίνειν, to go up]. The increasing stage of acute disease

anabatic (*an-ab-at'ik*) [see *anabasis*] Increasing; growing more intense; as the *anabatic* stage of a fever

anabiosis (*an-ab-i-o'-sis*) [ἀναβιόειν, to come to life again] Renewed vitality in an apparently lifeless organism. Resuscitation; reanimation.

anabiotic (*an-ab-i-ot'-ik*) [ἀνά, again; βιός, life]. 1. Relating to anabiosis. 2. Restoring the strength or activity.

anabole (*an-ab'-o-le*) [ἀναβάλλειν, to throw up]. A throwing up; what is thrown up; vomit; vomiting; expectoration; regurgitation.

anabolergy (*an-ab-ol'-er-je*) [ἀναβάλλειν, to throw up; ἔργον, work] The force expended or work performed in anabolism or in anabolic processes.

anabolic (*an-ab-ol'-ik*) [ἀναβάλλειν, to throw up.] Pertaining to or characterized by anabolism.

anabolin (*an-ab'-o-lin*) [see *anabolic*]. Any substance formed during the anabolic process.

anabolism (*an-ab'-o-lizm*) [see *anabolic*]. Synthetic or constructive metabolism. Activity and repair of function; opposed to katabolism.

anabrosis (*an-ab-ro'-sis*) [ἀνάβρωσις, an eating up]. Corrosion, or superficial ulceration.

anabrotic (*an-ab-rot'-ik*) [ἀνάβρωσις, an eating up]. Pertaining to anabrosis; corrosive.

anacampsis (*an-ah-kamp'-sis*) [ἀνακάμπτειν, to bend back]. A flexure.

anacamptic (*an-ah-kamp'-tik*) [see *anacampsis*]. Reflected, as sound or light; pertaining to or causing a reflection.

anacamptics (*an-ah-kamp'-tiks*). The study of reflection of light or of sound.

anacamptometer (*an-ah-kamp-tom'-et-er*) [ἀνακάμπτειν, to bend back; μέτρον, a measure]. An apparatus for measuring reflexes.

Anacardium (*an-ah-kar'-de-um*) [ἀνά, up; καρδία, the heart, from its heart-shaped seeds]. 1. A genus of tropical trees. *A. occidentale* yields cashew-gum and the cashew-nut. 2. The oil of the pericarp of the cashew-nut, known as cardol, and used as an escharotic. It is said to be of value in leprosy. **a., ointment of,** 1 part of the tar to 8 of lard or vaselin, used as a blistering ointment. **a., tincture of,** 1 to 10 of rectified spirit. Dose 2–10 min. (0.12–0.6 Cc.).

anacatadidymous (*an-ak-at-ad-id'-im-us*) [ἀνά, up; κατά, down; δίδυμος, a twin]. Divided above

and below, but joined centrally into one; said of certain twin monsters.

anacatadidymus (*an-ak-at-ad-id'-im-us*) [*ἀνά*, up; *κατά*, down; *δίδυμος* a twin]. An anacatadidymous monstrosity.

anacatharsis (*an-ak-ath-ar'-sis*) [*ἀνά*, up; *κάθαρσις*, purgation]. Expectoration; vomiting.

anacathartic (*an-ak-ath-ar'-tik*) [*ἀνά*, up; *κάθαρσις*, purgation]. 1. Causing anacatharsis. 2. An expectorant, emetic, or sternutatory.

anachlorhydria (*an-ah-klor-hid'-re-ah*). The lack of hydrochloric acid in the gastric juice.

anacid (*an-as'-id*) [*ἀν*, priv.; *acidum*, acid]. Slightly acid; subacid; not having the normal amount of acidity.

anacidity (*an-as-id'-it-e*). The lack of normal acidity; subacidity; inacidity.

anacin (*an'-as-in*). Trade name of a preparation containing acetylsalicylic acid, acetphenetidin, quinine and caffeine; it is said to be antirheumatic, antipyretic, and analgesic.

anaclasimeter (*an-ak-las-im'-et-er*) [*anaclasis*; *μέτρον*, measure] An instrument for measuring the refraction of the eye

anaclasis (*an-ak'-las-is*) [*ἀνάκλασις*, a breaking-off or back]. 1. Reflection or refraction of light or sound. 2. A fracture. 3. Forcible flexion of a stiff joint.

anaclastic (*an-ak-las'-tik*) Pertaining to refraction, or to anaclasis.

anaclisis (*an-ak'-lis-is*) [*ἀνάκλισις*, reclining]. Decubitus; the reclining attitude

anacroasia (*an-ak-ro-a'-ze-ah*) [*ἀν*, priv.; *ἀκρόασις*, hearing]. Inability to understand words that are heard, while the same words if read by the patient are understood

anacrotic (*an-ak-rot'-ik*) [*ἀνά*, up; *κρότος*, a stroke]. Relating to or characterized by anacrotism.

anacrotism (*an-ak'-ro-tizm*) [see *anacrotic*]. The condition in which there is one or more notches on the ascending limb of the pulse-curve.

anacusia, anacusis (*an-ak-oo'-se-ah, an-ak-oo'-sis*) [*ἀν*, priv., *ἀκούειν*, to hear]. Complete deafness.

anadenia (*an-ad-e'-ne-ah*) [*ἀν*, priv.; *ἀδήν*, gland]. Insufficiency of glandular function. Chronic want of gastric secretion. **a. gastrica,** Ewald's name for achylia gastrica. **a. ventriculi,** see *achylia gastrica*

anadesma (*an-ah-dez'-mah*) [*ἀναδέσμη*, a fillet]. A band or fascia.

anadicrotic (*an-ah-di-krot'-ik*) [*ἀνά*, up; *δίς*, twice; *κρότος*, a stroke]. Characterized by anadicrotism.

anadicrotism (*an-ah-di'-krot-izm*) [see *anadicrotic*]. Dicrotism of the pulse-wave occurring in the upward stroke.

anadidymous (*an-ad-id'-im-us*) [*ἀνά*, up; *δίδυμος*, a twin] Cleft upward into two, while single below—said of certain joined twins.

anadidymus (*an-ad-id'-im-us*) [see *anadidymous*]. An anadidymous monster.

anadiplosis (*an-ah-dip-lo'-sis*) [*ἀνά*, up, back; *διπλόειν*, to double]. The reduplication or redoubling of a fever paroxysm.

anadiplotic (*an-ah-dip-lot'-ik*) [*ἀνά*, up; *διπλόειν*, to double]. Characterized by anadiplosis.

anadipsia (*an-ah-dip'-se-ah*) [*ἀνά*, intensive; *δίψα*, thirst]. Intense thirst.

anadrome (*an-ad'-ro-me*) [*ἀναδρομή*, a running up]. 1. An upward determination of the blood. 2. A pain ascending from the lower to the higher portion of the body. 3. See *globus hystericus.*

anæmatopoiesis (*an-e-mat-o-poi-e'-sis*). See *anematopoiesis.*

anæmatosis (*an-e-mat-o'-sis*). See *anematosis.*

anæmia (*an-e'-me-ah*). See *anemia.*

anæmic (*an-e'-mik*). See *anemic.*

anaerobe (*an-a'-er-ōb*). See *anaerobion.*

anaerobia (*an-a-er-o'-be-ah*) [*ἀν*, priv.; *ὁήρ*, air; *βίος*, life]. Plural of *anaerobion.* Microorganisms having the power of living without air or free oxygen. **a., facultative,** applied to organisms normally or usually living in the presence of oxygen, but capable of becoming anaerobic.

anaerobic (*an-a-er-o'-bik*) [see *anaerobia*]. Living in the absence of the oxygen or air. See *aerobic.*

anaerobion (*an-a-er-o'-be-on*). See *anaerobia.*

anaerobiosis (*an-a-er-o-bi-o'-sis*) [see *anaerobia*]. Life sustained in the absence of free oxygen; the power of living where there is no free oxygen.

anaerobiotic, anaerobious (*an-a-er-o-bi-ot'-ik, an-a-er-o'-be-us*) [see *anaerobia*] Capable of existing without free oxygen.

anaerophyte (*an-a'-e-ro-fit*) [*ἀν*, priv.; *ἀήρ*, air; *φυτόν*, a plant]. In biology, a plant capable of living without a direct supply of oxygen.

anaeroplastic (*an-a-er-o-plas'-tik*) [*ἀν*, priv.; *ἀήρ*, air; *πλάσσειν* to shape]. Pertaining to anaeroplasty.

anaeroplasty (*an-a'-er-o-plas-te*) [*ἀν*, priv.; *ἀήρ*, air; *πλάσσειν*, to shape]. The treatment of wounds by immersion in warm water, so as to exclude the air.

anæsthesia (*an-es-thē'-ze-ah*). See *anesthesia*

anæsthesin (*an-es'-thes-in*). Same as *anesthesin.*

anæsthetic (*an-es-thet'-ik*). See *anesthetic.*

anagenesis (*an-aj-en'-e-sis*) [*ἀναγέννησις*, regeneration]. Reparation or reproduction of tissues.

anagnosasthenia (*an-ag-nos-as-the'-ne-ah*) [*ἀνάγνωσις*, reading; *asthenia*]. Neurasthenia in which any attempt to read is accompanied by distressing symptoms.

anagoge, anagogia (*an-a-go'-je, an-a-go -je-ah*) [*ἀναγωγή*, a bringing up]. Vomiting **a. hæmatis, a. sanguinis,** a rush of blood to the head.

anagraph (*an'-a-graf*) [*ἀναγραφή*, a writing out]. A physician's prescription or recipe.

anagyrine (*an-aj-i'-rin*) [*ἀνά*, backward; *γῦρος*, a circle], CHN_2O_2. An alkaloid from the seeds of *Anagyris fœtida*, a leguminous shrub of Southern Europe. Its hydrochloride is poisonous, slowing the respiration, and interfering with the heart's action. **a. hydrobromide,** $C_{14}H_{18}N_2O_2 \cdot HBr$. Small, white, shining scales, soluble in water and alcohol, melting at 265° C. It is used as a heart stimulant.

anahæmatopoiesis (*an-ah-hem-at-o-poi-e'-sis*). Condition of hypofunction of the bone marrow.

anakhre (*an-ak'-er*). Synonym of *goundou* (*q. v.*).

anakroasia (*an-ak-ro-a'-ze-ah*). See *anacroasia.*

anakusis (*an-ak-oo'-sis*). See *anacusia.*

anal (*a'-nal*) [*anus*]. Pertaining to the anus.

analdia (*an-al'-de-ah*). See *marasmus.*

analepsia (*an-al-ep'-se-ah*). See *analepsis.*

analepsis (*an-al-ep'-sis*) [see *analeptic*]. 1. Recovery of strength after disease. 2. Suspension, as in a swing. 3. Epilepsy with gastric aura.

analeptic (*an-al-ep'-tik*) [*ἀναληπτικός*, restorative]. 1. Restorative. 2. Any agent restoring health after illness.

analeptol (*an-al-ep'-tol*). A tonic said to contain phosphorus, $\frac{1}{150}$ gr.; nux vomica extract, $\frac{1}{2}$ gr.; cinchona, 2 gr.; coca leaves, 1 gr., and aromatics.

analgecising solution (*an-al'-je-sis-izing*). A solution which produces analgesia.

analgecize (*an-al'-je-siz*) [*ἀνα*, priv.; *ἄλγος*, pain]. To render analgesic.

analgen (*an-al'-jen*) [ἀν, priv.; ἄλγος, pain], $C_{18}H_{14}N_2O_4$. A white, tasteless, crystalline powder, almost insoluble in water, soluble with difficulty in cold alcohol, but more readily in hot alcohol and dilute acids. It melts at 406.4° F. It is employed as an analgesic, antineuralgic, and antipyretic. Dose 10–30 gr. (0.65–2.0 Gm.).

analgesia (*an-al-je'-ze-ah*) [see *analgen*]. Insensibility to or absence of pain. **a. algera, a. dolorosa,** severe pain in a part with loss of general sensibility. **a. endoneural,** analgesia resulting from injection of an analgesic solution through the fibrous sheath of the nerve and directly into the nerve fibers. **a. intraneural,** same as *a. endoneural.* **a. panaris,** synonym of *Morvan's disease.*

analgesic (*an-al-je'-sik*) [see *analgen*]. 1. Anodyne; relieving pain. 2. Affected with analgesia. 3. A remedy that relieves pain.

analgesin (*an-al'-je-sin*). See *antipyrine.*

analgetic (*an-al-je'-tik*). See *analgesic.*

analgia (*an-al'-je-ah*) [ἀν, priv.; ἄλγος, pain]. Absence of pain.

analgic (*an-al'-jik*) [see *analgen*]. Analgesic.

analgin (*an-al'-jin*). Synonym of *creolin.*

anallergic (*an-al-er'-jic*) [ἀ, priv.; *allergy*]. Not allergic; denoting a serum which does not produce anaphylaxis.

analogue, analog (*an'-al-og*) [ἀνάλογος, conformable]. A part or organ having the same function as another, but with a difference of structure. The correlative term, *homologue,* denotes identity of structure with difference of function. The wing of the butterfly and that of the bird are *analogous,* but the wing of a bird and the arm of a man are *homologous.*

analogous (*an-al'-o-gus*) [see *analogue*] Conforming to, proportionate, answering to.

analogy (*an-al'-o-je*) [ἀνάλογος, comformable]. Similarity in function or origin between parts or organs, without identity.

analosis (*an-al-o'-sis*) [ἀνάλωσις, expenditure]. A wasting away, atrophy.

analysis (*an-al'-is-is*) [ἀναλύειν, to unloose]. The resolution of a compound body into its constituent parts. **a., absorptiometric,** the determination of the composition of gaseous bodies by observation of the amount of absorption which occurs on exposure to a liquid in which the coefficient of absorption of different gases is already known. **a., clinical,** a thorough examination of symptoms, lesions, and history to determine the nature of a disease and its cause. **a., densimetric,** analysis of a subject by means of determining the specific gravity of the solution and thus estimating the amount of dissolved matter. **a., dry,** that by means of blowpipe, etc.; also spectral analysis. **a., eudiometric,** see *a., gasometric.* **a., gasometric,** the determination of the constituents of gaseous compounds, especially the determination of the amount of oxygen in specimens of atmospheric air. **a., gravimetric,** the quantitative determination, by weight, of the elements of a body. **a., immediate,** see *a., proximate.* **a., indirect,** a quantitative estimation of the elements of a compound obtained not by isolating them, but by causing them to form new combinations and observing the relation of the molecular weight of these to that of the original body. **a., inorganic,** that of inorganic matter. **a., microchemical,** chemical analysis with the aid of a microscope. **a., organic,** the determination of the elements of matter formed under the influence of life. The analysis of animal and vegetable tissues. **a., polariscopic,** analysis conducted with the polariscope. **a., prismatic,** spectral analysis. **a., proximate,** the determination of the simpler compound into which a substance may be resolved. **a., qualitative,** the determination of the nature of the elements that compose a body. **a., quantitative,** the determination of the proportionate parts of the various elements of a compound. **a., radiation,** a method of analysis based upon discoveries of Becquerel and taking advantage of the comparative radioactivity of various metals. **a., spectrum,** the determination of the composition of a body by means of the spectroscope. **a., thermometric,** analysis by means of observation of the varying temperature produced by the interaction of substances mixed or combined together. **a., ultimate,** the resolution of a compound into its ultimate elements. **a., volumetric,** the quantitative determination of a constituent by volume. **a., wet,** analysis conducted by means of solutions and precipitations.

analyst (*an'-al-ist*). The person who makes an analysis; analyzer.

analytic (*an-al-it'-ik*) [*analysis*]. Pertaining to analysis.

analyzer (*an'-al-i-zer*) [see *analysis*]. 1. An analyst. 2. In a polariscope, the Nicol prism, which exhibits the properties of light after polarization. 3. An apparatus for recording the excursions of tremor movements.

Anam ulcer. A form of phagedena, common in hot countries; Oriental boil.

Anamirta (*an-am-er'-ta*). A genus of *Menispermaceæ. A. paniculata,* or *Menispermum cocculus,* is the source of cocculus indicus.

anamirtin (*an-am-er'-tin*) [*Anamirta,* a genus of plants], $C_{15}H_{16}O_2$. A glycerid derived from cocculus indicus, the berry-like fruit of *Anamirta paniculata.*

anamnesia (*an-am-ne'-ze-ah*). See *anamnesis.*

anamnesis (*an-am-ne'-sis*) [ἀνάμνησις, a recalling to mind]. 1. The faculty of memory; recollection. 2. That which is remembered; information gained from the patient and others regarding the past history of a case.

anamnestic (*an-am-nes'-tik*) [see *anamnesis*]. 1. Pertaining to the anamnesis, or history of a case. 2. Remembering. 3. Restorative of the memory.

anamnionic (*an-am-ne-on'-ik*). Same as *anamniotic.*

anamniotic (*an-am-ne-ot'-ik*) [ἀν, priv; ἀμνίον, amnion]. Without an amnion.

anamorphosis (*an-am-orf-o'-sis*) [νάά, again; μορφοέιν, to form]. 1. Distortion or anomaly of development. In biology, gradual change of form in successive members of a group. 2. In optics, that process by which a distorted image is corrected by means of a curved mirror. **a., catoptric,** correction of a distorted image by means of a conic or cylindric mirror. **a., dioptric,** correction of a distorted image by means of a pyramidal glass.

ananabasia (*an-an-ab-a'-ze-ah*) [ἀν, priv.; ἀνάβασις, an ascending]. A form of abulia manifested by incapacity to ascend heights.

ananaphylaxis (*an-an-ah-fil-ak'-sis*). A condition which neutralizes anaphylaxis; it is wrongly termed antianaphylaxis.

ananastasia (*an-an-as-ta'-ze-ah*) [ἀν, priv.; ἀνάστασις, a rising up]. An abulistic inability to rise from a sitting posture.

anandria (*an-an'-dre-ah*) [ἀν, priv.; ανήρ, man]. Lack of virility; impotence.

anangioplasia (*an-an-je-o-pla'-se-ah*) [ἀν, priv.; ἀγγεῖον, a vessel; πλάσσειν, to form]. Congenital narrowing of the caliber of the blood vessels.

anangioplasm (*an-an'-je-o-plasm*) [ἀν, priv.; ἀγγεῖον, a vessel; πλάσμα, something formed]. Imperfect vascular development.

anapausis (*an-ah-paws'-sis*) [ἀνάπαυσις, rest]. Hypnotic inducement of calm sleep by allaying excitement

anapeiratic (*an-ap-i-rat'-ik*) [ἀναπειρᾶσθαι, to do again]. A condition due to excessive exercise, as in writers' cramp.

anaphalantiasis (*an-af-al-an-ti'-as-is*) [ἀνά, up; φάλαθος, bald in front]. The falling out of the eyebrows.

anaphase (*an'-af-āz*) [ἀνά, up; φάσις, a phase]. The phenomenon of karyokinesis immediately preceding the formation of the daughter-stars, and up to the formation of the resting daughter-nuclei.

anaphia (*an-a'-fe-ah*) [ἀν, priv.; ἀφή, touch]. 1. Defective sense of touch. 2. A state of abnormal sensitiveness to touch. 3. A state in which nothing is learned by palpation.

anaphora (*an-af'-or-ah*) [ἀναφορά, a bringing up]. 1. A bringing up, as by coughing 2. Recovery from illness. 3 Rush of blood to the head. 4. A violent inspiration or respiration.

anaphoresis (*an-af-or-e'-sis*) [ἀν, priv ; φέρειν, to carry] Diminished activity of sweat-glands.

anaphoretic (*an-ah-for-et'-ik*). 1. Checking perspiration 2. An agent that checks the secretion of sweat.

anaphoria (*an-af-o'-re-ah*). An upward tendency of the eyes and of the visual axes.

anaphrodisia (*an-af-ro-diz'-e-ah*) [ἀν, priv.; Ἀφροδίτη, Venus] Impairment of sexual appetite

anaphrodisiac (*an-af-ro-diz'-e-ak*). 1. Relating to, affected by, or causing anaphrodisia. 2 An agent that allays the sexual desire

anaphrodite (*an-af'-ro-dīt*). An individual affected with anaphrodisia.

anaphylactic (*an-ah-fil-ak'-tik*) [ἀν, priv.; φύλαξ, a guardian]. 1 Having the property of diminishing immunity instead of reinforcing it. 2. A serum which diminishes immunity. **a. shock**, the general condition produced by the repeated injections of foreign serum.

anaphylactin (*an-ah-fil-ak'-tin*). A substance supposed to produce anaphylaxis; "a toxic, or irritating nonassimilable substance, assumed to be part of the proteid introduced on first injection, which renders the tissue cells abnormally susceptible to reinjections of the same substance."

anaphylactogen (*an-ah-fil-ak'-to-jen*). A substance which is capable of inducing the state of anaphylaxis.

anaphylatoxin (*an-ah-fil-ah-tok'-sin*). The poisonous substance which produces the symptoms in anaphylaxis; it is non-specific, and is supposed to be formed by anaphylactin and the newly injected protein.

anaphylaxis (*an-ah-fil-ak'-sis*). Induction of disease; specifically, an intoxication due to the union of a foreign substance with antibodies produced by previous introduction of the same substance; an animal showing such acquisition of susceptibility is said to have become sensitized to that particular substance. The condition is the opposite to immunity.

anaphylaxy (*an-ah-fil-aks'-e*). See *anaphylaxis*. The stage of growth and development; the period before full maturity.

anaphylodiagnosis (*an-ah-fil-o-di-ag-no'-sis*). Diagnosis by the aid of anaphylactic reactions.

anaplase (*an'-ap-lāz*) [ἀνά, up; πλάσσειν, to build].

anaplasia (*an-ah-pla'-ze-ah*). 1. The tendency of certain tissues toward reversion to an earlier or embryonal type. 2. A similar tendency in cells to revert to a less differentiated condition, prior to cell division.

anaplasis (*an-ah-pla'-sis*). See *anaplasty*.

anaplasm (*an'-ah-plazm*). See *anaplasty*.

anaplast (*an'-ap-last*) [ἀναπλάσσειν, to shape]. See *leukoplast*.

anaplastic (*an-ap-las'-tik*) [ἀναπλάσσειν, to build up]. 1. Relating to anaplasty, restoring a lost or defective part. 2. Agent that facilitates repair. **a. surgery**, anaplasty.

anaplasty (*an'-ap-las-te*). An operation for the restoration of lost parts; plastic surgery.

anaplerosis (*an-ap-le-ro'-sis*) [ἀνά, up; πληρόειν, to fill]. The restoration or repair of a wound, sore, or lesion in which there has been a loss of substance.

anaplerotic (*an-ap-le-rot'-ik*) [ἀνά, up; πληρόειν, to fill]. 1 Promotive of repair, favoring granulation. 2. A remedy or application that promotes repair.

anapnograph (*an-ap'-no-graf*) [ἀναπνοή, respiration; γράφειν, to write]. An apparatus registering the movements of (1) inspiration and expiration, (2) the quantity of air inhaled.

anapnoic (*an-ap-no'-ik*) [ἀνά, against; ἄπνοια, want of breath]. 1. Relieving dyspnea. 2. Favoring respiration.

anapnometer, anapneometer (*an-ap-nom'-et-er, an-ap-ne-om'-et-er*) [ἀναπνοή, respiration; μέτρον, a measure]. An anapnograph.

anapophysis (*an-ap-of'-is-is*) [ἀνά, back; ἀπόφυσις, an offshoot]. An accessory process of a lumbar or dorsal vertebra, corresponding to the inferior tubercle of the transverse process of a typical dorsal vertebra.

anaptic (*an-ap'-tik*) [ἀν, priv.; ἀφή, touch]. Pertaining to or marked by anaphia: loss of the tactile sense.

anarcotine (*ah-nar'-ko-tin*) [ἀ, priv ; narcotic]. Narcotine, which from its lack of narcotic power is mis-named.

anarithmia (*an-ar-ith'-me-ah*). An inability to count.

anarrhea, or **anarrhœa** (*an-ar-e'-ah*) [ἀνά, up; ῥοία, flow]. Afflux to an upper part, as of blood to the head

anarrhexis (*an-ar-eks'-is*) [ἀνά, up; ῥῆξις, fracture]. Surgical refracture of a bone.

anarthria (*an-ar'-thre-ah*) [ἀν, priv.; ἄρθρον, articulation]. 1. Defective articulation. 2. Absence of vigor. 3. Without joints. **a. centralis**, partial aphasia due to central lesion. **a. literalis**, stammering.

anarthrous (*an ar'-thrus*) [ἀν, priv.; ἄρθρον, a joint]. Jointless. So corpulent that no joints are visible. 2. Lacking vigor. 3. Inarticulate.

anasarca (*an-ah-sar'-kah*) [ἀνά, through; σάρξ, the flesh]. An accumulation of serum in the subcutaneous areolar tissues of the body. Syn. *catasarca; epsarcidium; hydrodermus; intercus; hydrops cellularis.* **a., acute**, a form in which the flesh preserves its normal color and the depression made by the finger disappears quickly. **a. a fluxu**, that due to loss of body-fluids, as in diarrhea or diabetes. **a. americana**, South American disease marked by sleepiness, headache, debility, and swelling of the abdomen,

said to be due to the ingestion of sea-crabs. **a., essential,** that due to malnutrition. **a. exanthematica,** that attributed to the suppression of an exanthem, especially erysipelas. **a. urinosa,** that due to suppression of urine. Syn., *urinary leukophlegmasia.*

anasarcin (*an-ah-sar'-sin*). A remedy for dropsy, said to consist of the active principles of *Oxydendron arboreum, Sambucus nigra,* and *Urginea scilla.* Trade name of a remedy claiming to be a heart tonic and diuretic.

anasarcous (*an-ah-sar'-kus*) [see *anasarca*]. Affected with anasarca.

anasomia (*an-ah-so'-me-ah*) [ἀνά, up; σῶμα, body]. A deformed condition in which the limbs are abnormally adherent to the body.

anaspadiac (*an-ah-spa'-di-ak*). A person affected with anaspadias.

anaspadias (*an-as-pa'-de-as*) [ἀνά, up; σπάειν, to draw]. A urethral opening upon the upper surface of the penis.

anaspasis (*an-ah-spa'-sis*) [see *anaspadias*]. 1. A contraction. 2. Revulsion.

anastalsis (*an-as-tal'-sis*). A term suggested by Cannon for the upward moving wave of contraction occurring in the first part of the colon during digestion There is no preceding wave of inhibition.

anastaltic (*an-as-tal'-tik*) [ἀναστολικός, checking; putting back]. 1. Strongly astringent. 2. Centripetal; afferent

anastasis (*an-as'-tas-is*) [ἀνάστασις, a setting up]. 1. Recovery; convalescence. 2. An upward afflux of the body humors. 3. Resuscitation of one apparently dead.

anastate (*an'-as-tāt*) [ἀνάστατος, caused to rise]. Any substance that appears in or is characteristic of an anabolic process.

anastatic (*an-as-tat'-ik*) [see *anastasis*]. Tending to recovery; restorative

anastigmatic (*an-ah-stig-mat'-ik*). Free from astigmatism; said especially of photographic objectives which are corrected for astigmatism as well as for spheric and chromatic aberration.

anastole (*an-as'-to-le*) [ἀνασταλή, retracted]. Retraction; shrinking away, as of the lips of a wound.

anastomose (*an-as'-to-mōz*) [see *anastomosis*]. To produce anastomosis, to communicate by anastomosis.

anastomosis (*an-as-to-mo'-sis*) [ἀναστομόειν, to bring to a mouth]. 1. The intercommunication of blood-vessels. 2. The establishment of a communication between two hollow parts or between two distinct portions of the same organ. See *a., intestinal.* 3. A whetting of the appetite. **a., crucial,** an arterial anastomosis in the upper part of the thigh, formed by the anastomotic branch of the sciatic, the first perforating, the internal circumflex, and the transverse branch of the external circumflex arteries. **a., entero-.** See *enteroanastomosis.* **a., intestinal,** an operation consisting in establishing a communication between two parts of the intestine.

anastomotic (*an-as-to-mot'-ik*) [see *anastomosis*]. 1. Pertaining to anastomosis. 2. Sharpening the appetite. 3. Aperient. 4. Causing dilation of the peripheral blood-vessels. 5. A communicating artery or vein. See under *artery* and under *vein.*

anastomotica (*an-as-to-mot'-ik-ah*). 1. A communicating artery or vein. 2. Tonic, aperient, or deobstruent medicines. **a. magna,** see under *artery.*

anastomotris (*an-as-to-mo'-tris*) [L.; pl., *anastomotrides*]. Any kind of a dilating instrument.

anastrophe (*an-as'-tro-fe*) [ἀναστρέφειν, to turn upside down]. Inversion, particularly of the viscera.

anatherapeusis (*an-ath-er-ap-u'-sis*) [ἀνά, up; θεραπεύσις, medical treatment]. Treatment by increasing doses.

anathrepsis (*an-ath-rep'-sis*) [ἀναθρεψις, a fresh growth]. A renewal of lost flesh after recovery.

anathreptic (*an-ath-rep'-tik*) [ἀναθρεψις, a fresh growth]. Restorative of lost flesh; nutritive.

anatomical, anatomic (*an-at-om'-ik-al, an-at-om'-ik*) [*anatomy*]. Pertaining to anatomy. **a. tubercle,** see *verruca necrogenica.*

anatomicochirurgical (*an-a-tom-ik-o-ki-rur'-jik-al*). Relating to anatomy and surgery.

anatomicomedical (*an-at-om-ik-o-med'-ik-al*). Relating to medicine and anatomy or to medical anatomy.

anatomicopathological (*an-at-om-ik-o-path-o-loj'-ik-al*). Pertaining to anatomy and pathology.

anatomicophysiological (*an-at-om-ik-o-fiz-e-o-loj'-ik-al*). Relating to anatomy and physiology.

anatomicosurgical (*an-at-om-ik-o-sur'-je-kal*). Relating to anatomy and surgery.

anatomist (*an-at'-om-ist*) [see *anatomy*]. One who is expert in anatomy. **a.'s snuff-box,** the triangular space between the tendons of the extensor of the metacarpal bone of the thumb and the extensor of the first phalanx on the back of the hand.

anatomize (*an-at'-om-īz*). To dissect.

anatomy (*an-at'-o-me*) [ἀνά, up; τέμνειν, to cut]. The science of the structure of organs or of organic bodies **a., applied,** anatomy as concerned in the diagnosis and treatment of pathological conditions. **a., artificial,** the study of anatomy from artificial models. **a., artistic,** that branch of anatomy treating of the external form of men and animals, their osseous and muscular systems, and the relative size of different parts and members of their bodies. **a., clastic,** the study of anatomy by means of models in which the different layers can be removed to show the position and relations of the structures underneath. **a., comparative,** the investigation and comparison of the anatomy of different orders of animals or of plants, one with another. **a., descriptive,** a study of the separate and individual portions of the body, apart from their relationship to surrounding parts. **a., general,** that branch of descriptive anatomy treating of the structure and physiological properties of the tissues and their arrangement into systems without regard to the disposition of the organs of which they form a part. **a., gross,** anatomy dealing with the naked-eye appearance of tissues. **a., homological,** the study of the correlations of the several parts of the body. **a., medical,** the application of anatomy to a study of the causation and symptomatology of nonsurgical diseases. **a., microscopical, a., minute,** that studied under the microscope. **a., morbid, a., pathological,** a study of diseased structures. **a., physiognomonical,** the study of expressions depicted upon the exterior of the body, especially upon the face. **a., physiological,** an anatomical study of tissues in respect to their functions. **a., practical,** dissection. **a., regional,** a study of limited parts or regions of the body, the divisions of which are collectively or peculiarly affected by disease, injury, operations, etc.

a., surgical, the application of anatomy to surgery. **a., topographical,** the anatomy of a part in its relation to other parts. **a., transcendental,** the study of the general design of the body, and of the particular design of the organs. Anatomy as related to theories of type, and evolution. **a., vegetable,** the branch of botany which treats of the relative position, form, and structure of the organs of plants. **a., veterinary,** anatomy of domestic animals.

anatoxic (*an-at-ox'-ik*). Same as *anaphylactic.*

anatoxin (*an-at-ox'-in*). Diphtheria toxin so modified that the toxic properties are reduced while the antigenic properties are retained.

anatresis (*an-at-re'-sis*) [*ἀνατιτρᾶν*, to bore through]. Perforation; trephining.

anatricrotic pulse (*an-ah-trī-krot'-ik*). A pulse wave with three breaks on the ascending curve.

anatripsis (*an-at-rip'-sis*) [*ἀνατριψις*, a rubbing]. 1. Rubbing; removing a part or growth by scraping or rubbing; inunction. 2 Upward or centripetal massage movement. 3. A crushing, as of calculi. 4 Itching, scratching to allay itching

anatriptic (*an-at-rip'-tik*) [see *anatripsis*]. A medicine to be applied by rubbing.

anaxon, anaxone (*an-aks'-on*) [*ἀν*, priv.; *axis*]. A neuron devoid of axis-cylinder processes.

anazotic (*an-az-ot'-ik*) [*ἀν*, priv.; *azotum*, nitrogen]. Without azote or nitrogen.

anazoturia (*an-az-ot-ū'-re-ah*) [*ἀν*, priv.; *azotum*, nitrogen; *οὖρον*, urine]. A condition of deficient excretion of nitrogen in the urine, the urea being chiefly diminished.

anazyme (*an'-a-zīm*). The commercial name for a combination of carbolic and boric acids; it is a substitute for iodoform.

AnCC. Abbreviation for anodal closure contraction.

anchilops (*an'-kil-ops*). See *anchylops.*

anchone (*an'-ko-nē*) [*ἄγχειν*, to strangle]. A spasmodic constriction of the throat in hysteria.

anchorage (*an'-kor-aj*). 1. The fixation of a floating or displaced viscus, whether by a natural process or by surgical means. 2. In dentistry, the means adopted for the retention of a dental filling, particularly its initial portion.

anchoralis (*an-ko-ra'-lis*) [*ancora*, an anchor]. The coronoid process of the ulna.

anchusin (*an'-kū-sin*) [*ἄγχουσα*, alkanet], $C_{31}H_{16}O_8$. The red coloring-matter found in alkanet-root. See *alkanet.*

anchyloblepharon (*an-kil-o-blef'-ar-on*). See *ankyloblepharon.*

anchyloglossia (*an-kil-o-glos'-e-ah*). See *ankyloglossia.*

anchylops (*an'-kil-ops*) [*ἄγχι*, near; *ὤψ*, the eye]. Abscess at inner angle of eye, prior to rupture.

anchylosis (*an-kil-o'-sis*). See *ankylosis.*

anchylostomiasis (*an-kil-o-sto-mi'-as-is*). See *ankylostomiasis.*

anchylostomum (*an-kil-os'-to-mum*). See *ankylostoma.*

ancipital (*an-sip'-it-al*) [*anceps*, double]. Two-edged.

ancistrum (*an-sis'-trum*) [*ἄγκιστρον*, a fish-hook]. A surgical hook.

ancon (*an'-kon*) [*ἀγκών*, the elbow]. Originally the olecranon process; applied to the elbow generally.

anconad (*an'-ko-nad*) [*ἀγκών*, the elbow]. Toward the olecranon, or elbow.

anconagra (*an-kon-a'-grah*) [*ἀγκών*, the elbow. *ἄγρα*, a seizure]. Arthritic pain at the elbow.

anconal, anconeal (*an'-kon-al, an-ko'-ne-al*) [*ἀγκών*, the elbow]. Pertaining to the elbow.

anconen (*an'-kon-en*) [*ἀγκών*, the elbow]. Belonging to the ancon in itself.

anconeus (*an-ko-ne'-us*). See under *muscle.*

anconitis (*an-kon-ī'-tis*) [*ἀγκών*, the elbow; *ιτις*, inflammation]. Inflammation of elbow joint.

anconoid (*an'-kon-oid*) [*ἀγκών*, the elbow]. Resembling the elbow.

ancyloglossum (*an-sil-o-glos'-um*). See *tongue-tie.*

ancylomele (*an-sil-o-me'-le*). See *ankylomele.*

Ancylostoma. See *Ankylostoma.*

ancyra (*an'-si-rah*) [*ἄγκυρα*, an anchor]. A hook.

ancyroid (*an'-sir-oid*) [*ἄγκυρα*, anchor; *εἶδος*, form]. Shaped like an anchor.

Andernach's ossicles. See *Wormian bones.*

Anders' disease (*an'-ders*) [James M. *Anders*, American physician, 1854–]. Adiposis tuberosa simplex.

Andersch's ganglion [Carl Samuel *Andersch*, German anatomist]. The petrosal ganglion. **A.'s nerve,** see *Jacobson's nerve.*

Anderson's ointment, an ointment made of bismuth oxide 1 part, oleic acid 8 parts, white wax 3 parts, soft white paraffin 9 parts; used as an antipruritic. **A.'s pill.** The compound gamboge pill. **A.'s reaction for distinguishing between quinoline and pyridine salts,** the chloroplatinates of the latter, when boiled with water, are changed into insoluble double salts with the elimination of hydrogen chloride, whereas the former remain in solution.

andolin (*an'-do-lin*). Trade name for a mixture of anesthetics for spinal analgesia. It is said to contain eucaine, stovaine, adrenalin hydrochloride and saline solution.

Andral's decubitus [Gabriel *Andral*, French physician, 1797–1876] The position usually assumed in the early stage of pleurisy by the patient, who seeks to alleviate the pain by lying on the sound side.

andranatomy (*an-dra-nat'-o-me*) [*ἀνήρ*, a man; *ἀνατομία*, anatomy]. Human anatomy; the anatomy or dissection of a man.

Andreasch's reaction for cystein. To the hydrochloric acid solution add a few drops of dilute ferric chloride solution and then ammonia. The liquid will become a dark purplish red.

androgalactozemia (*an-dro-gal-ak-to-ze'-me-ah*) [*ἀνήρ*, man; *γάλα*, milk; *ζημία*, loss]. The oozing of milk from the male mamma.

androgenous (*an-droj'-en-us*) [*ἀνήρ*, a man; *γεννᾶν*, to bear]. Giving birth to males.

androgyna (*an-droj'-in-ah*) [*ἀνήρ*, a man, *γυνή*, woman]. A hermaphrodite; a female in whom the genital organs are similar to those of the male.

androgyneity (*an-droj'-in-e-it-e*) [see *androgyna*]. Hermaphroditism.

androgynism (*an-droj'-in-izm*) [*ἀνήρ*, man; *γυνή*, woman]. Hermaphroditism.

androgynous (*an-droj'-in-us*) [*ἀνήρ*, man; *γυνή*, woman]. • Hermaphrodite. Having the characteristics of both sexes.

androgynus (*an-droj-in-us*) [see *androgyna*]. A hermaphrodite. A male with genital organs similar to those of the female.

androgyny (*an-droj'-in-e*) [*androgyna*]. Hermaphroditism.

androkin (*an'-dro-kin*) [*ἀνήρ*, man; *κινεῖν*, to move]. A hormone, $C_{19}H_{30}O_2$, derived from the oil in human urine. It is the regenerative principle of the testis. Also *androk'inin; androk'ynin.*

androlepsia (*an-dro-lep'-si-ah*) [*ἀνδρολῆψια*, a seizure of men]. The process of fecundation in the female.

andrology (*an-drol'-o-je*) [ἀνήρ, man; λόγος, science]. 1. The science of man, especially of the male sex. 2. The science of the diseases of the male genitourinary organs.

andromania (*an-dro-ma'-ne-ah*) [ἀνήρ, a man; μανία, madness]. Nymphomania.

andrometoxin (*an-drom-et-oks'-in*) [*Andromeda*; τοξικόν, poison]. A poisonous anodyne principle found in *Andromeda japonica*, occurring in *Kalmia latifolia* and some other ericaceous plants and found in poisonous honey from Trebizond.

andromorphous (*an-dro-mor'-fus*) [ἀνήρ, man; μορφή, form]. Shaped like a man.

androphobia (*an-dro-fo'-be-ah*) [ἀνήρ, a man; φόβος, fear]. Fear or dislike of the male sex.

androphonomania (*an-dro-fo-no-ma'-ne-ah*) [ἀνδροφόνος, man-killing; μανία, madness]. Homicidal insanity.

androsymphysia, androsymphysis (*an-dro-sim-fiz'-e-ah, an-dro-sim'-fiz-is*) [ἀνήρ, a man; σύν, together; φύειν, to grow]. 1. A monstrosity formed by the fusion of two male fetuses. 2. The growing together of the male genitalia.

-ane. A suffix for a saturated hydrocarbon.

androtin (*an'-dro-tin*). See *androkin*.

anebous (*an-e'-bus*) [ἀνηβος]. Not come to man's estate; not having reached puberty; immature.

anecpyetous (*an-ek-pi-e'-tus*) [ἀνεκπύητος]. 1. Not suppurating. 2. Preventing suppuration; insuppurable.

anectasia (*an-ek-ta'-se-ah*). See *anectasis*.

anectasin (*an-ek'-ta-sin*) [ἀν, priv.; ἐκ, out of; τείνειν, to stretch]. A product of bacterial action with an influence on the vasomotor nerves contrary to *ectasin* (*q. v.*).

anectasis (*an-ek'-tas-is*) [ἀν, priv.; ἔκτασις, extension]. Deficient size of an organ or part.

anedemin (*an-e-de'-min*). Trade name of a dropsy remedy. It is said to contain squill, strophanthus, apocynum, and sambucus.

anedeus (*an-e'-de-us*)[ἀ, priv.; αἰδοια, the genitals]. Lacking genital organs.

aneilema (*an-i-le'-mah*) [ἀνά, up; εἰλεεῖν, to roll]. Flatulence; air or wind in the bowels; colic.

aneilesis (*an-i-le'-sis*) [ἀνειλεεῖν, to roll together]. 1. See *aneilema*. 2. Twisting of the body in athletics. 3. Evolution.

Anel's operation for aneurysm [Dominique *Anel*, French surgeon, 1628–1725]. Ligation on the cardiac side close to the aneurysm. See *ligation*. **A.'s probe, A.'s sound,** a fine probe used for exploring or dilating the lacrimal puncta and lacrimal canals. **A.'s syringe,** a syringe used in injecting fluids into the lacrimal passages.

anelectric (*an-el-ek'-trik*) [ἀν, priv.; ἤλεκτρον, amber]. 1. Readily giving up electricity. 2. A good conductor; a substance which readily parts with electricity.

anelectrode (*an-el-ek'-trōd*) [ἀνά, upward; *electrode*]. The positive pole of a galvanic battery; anode.

anelectrotonic (*an-el-ek-tro-ton'-ik*) [ἀν, priv.; ἤλεκτρον, electricity; τόνος, tension]. Relating to anelectrotonus.

anelectrotonus (*an-el-ek-trot'-o-nus*) [see *anelectrotonic*]. The decreased irritability that is present in a nerve in the neighborhood of the anode.

anematosis, anæmatosis (*an-e-ma-to'-sis*). 1. General anemia. 2. Idiopathic anemia.

anemia (*an-e'-me-ah*) [ἀν, priv.; αἷμα, blood]. Deficiency of blood as a whole, or deficiency of the number of the red corpuscles or of the hemoglobin. It may be *general* or *local*. Local anemia, or *ischemia*, is the result of mechanical interference with the circulation of the affected part. General anemia is either idiopathic or symptomatic. **a., aplastic,** anemia in which the formative processes in the bone marrow do not take place. **a., cytogenic,** synonym of *a., idiopathic*. **a., drepanocytic,** sickle cell anemia. **a., essential,** synonym of *a., idiopathic*. **a., idiopathic,** a form in which the lesion is in the blood or in the blood-making organs. **a., infantum pseudoleukæmia,** a form of primary anemia described by von Jaksch as peculiar to the young child. Morse holds that chlorosis is a condition wholly foreign to infantile life and that von Jaksch's disease does not represent a distinct clinical entity. **a., lymphatic,** synonym of *Hodgkin's disease;* see *lymphadenoma*. **a., malignant,** see *pernicious anemia*. **a., miners,** see *uncinariasis*. **a., myelogenous,** anemia attended with hyperplasia of myelogenous tissue. **a., negative,** an anemia associated with erythroblasts but without diminution in the number of red cells per cubic millimeter. **a., paludal,** anemia associated with or caused by malaria. **a., pernicious,** see *pernicious anemia*. **a., primary,** see *a., idiopathic*. **a., secondary,** that due to a distinct cause, as hemorrhage, cancer, wasting discharges, poisons, etc. Syn., *symptomatic anemia*. **a., septic,** one which is septic to secondary conditions, usually about the mouth. **a., sickle cell,** one occurring in the negro race and characterized by the red blood cells assuming a crescent-shape or sickle-shape. **a., splenic,** chronic anemia with enlarged spleen, blood-changes, chloranemia, leukopenia, hemorrhages from the stomach, and pigmentation of the skin. **a., symptomatic,** see *a., secondary*. **a., tunnel,** see *uncinariasis*.

anemic (*an-em'-ik*) [see *anemia*]. Pertaining to anemia. **a. infarct,** a wedge-shaped area of coagulation-necrosis occurring in organs possessing terminal arteries. **a. murmur,** a murmur heard in anemic conditions, soft and blowing in character, and disappearing with the anemia. It is generally heard over the base of the heart. **a. necrosis,** the coagulation-necrosis of tissues resulting from the sudden stoppage of the supplying artery.

anemometer (*an-e-mom'-et-er*) [ἄνεμος, wind; μέτρον, a measure]. An instrument for measuring the velocity of the wind.

Anemone (*an-em'-on-ne*) [ἀνεμώνη, the windflower]. A genus of ranunculaceous herbs, most of which have active medicinal and poisonous qualities. See *pulsatilla*.

anemonin (*an-em'-o-nin*) [see *anemone*]. $C_{15}H_{12}O_6$. The active principle of the anemone. It is given in bronchitis, asthma, and spasmodic cough. Dose ½–¾ gr. (0.016–0.048 Gm.) twice daily.

anemonol (*an-em'-on-ol*) [ἀνεμώνη, wind-flower; *oleum*, oil]. The volatile oil extracted from anemone; it is a powerful vesicant.

anemopathy (*an-em-op'-ath-e*) [ἄνεμος, wind; πάθος, disease]. Therapeutic treatment by inhalation.

anemophobia (*an-e-mo-fo'-be-ah*) [ἄνεμος, wind; φόβος, fear]. Dread of draughts or of winds.

anemotrophy, or anæmotrophy (*an-em-ot'-ro-fe*) [ἀν, priv.; αἷμα, blood; τροφη, nourishment]. A deficiency of blood nourishment; an impoverished state of the blood.

anempeiria (*an-em-pi'-re-ah*). Anempiria.

anempiria (*an-em-pir'-e-ah*) [ἀν, priv.; ἐμπειρία, experience]. Lack of experience or practical knowledge.

anemydria, anæmydria (*an-em-id'-re-ah*) [ἀ, priv.; αἷμα, blood; ὕδορ, water]. Insufficiency of the watery element in blood.

anencephalia (*an-en-sef-a'-le-ah*) [ἀν, priv.; ἐγκέφαλος, brain]. Congenital absence of the brain.

anencephalic (*an-en-sef-al'-ik*) [ἀν, priv.; ἐγκέφαλος, brain]. Pertaining to or characterized by anencephalia.

anencephalohemia (*an-en-sef-al-o-he'-me-ah*) [ἀν, priv.; ἐγλέφαλος, brain; αἷμα, blood]. Insufficiency of blood in the brain.

anencephaloid (*an-en-sef'-al-oid*) [ἀν, priv.; ἐγκέφαλος, brain] Pertaining to anencephalia.

anencephaloneuria (*an-en-sef-al-on-ū -re-ah*) [ἀν, priv.; ἐγκέφαλος, brain; νεῦρον, a nerve]. Imperfect nerve-action of the brain.

anencephalotrophia, or **anencephalotrophy** (*an-en-sef-al-o-tro -je-ah* or *-lot'-ro-fe*) [ἀν, priv.; ἐγκέφαλος, brain; τροφή, nutrition]. Atrophy, or lack of nutrition of the brain.

anencephalus (*an-en-sef'-al-us*) [see *anencephalia*]. A species of single autositic monsters in which there is no trace of the brain.

anenergia (*an-en-er'-je-ah*) [ἀν, priv.; ἐνέργεια, energy]. Lack of vigor or power.

anenteremia (*an-en-ter-e'-me-ah*)[ἀν, priv.; ἔντερον, an intestine; αἷμα, blood]. Bloodless condition of the bowels.

anenteroneuria (*an-en-ter-o-nu'-re-ah*) [ἀν, priv.; ἔντερον, an intestine; νεῦρον, a nerve]. Intestinal atony.

anenterotrophia (*an-en-ter-o-tro'-fe-ah*) [ἀν, priv.; ἔντερον, an intestine; τροφή, nourishment]. Defective intestinal nutrition.

anenterous (*an-en'-ter-us*) [ἀν, priv.; ἔντερον, intestine]. In biology, having no intestine, as a tapeworm or a fluke.

anepia (*an-ep'-e-ah*) [ἀνεπής, speechless]. Inability to speak.

anepiploic (*an-ep-ip-lo'-ik*) [ἀν, priv.; ἐπίπλοον, the caul]. Having no epiploon or omentum.

anepithymia (*an-ep-e-thim'-e-ah*) [ἀν, priv.; ἐπιθυμία, desire]. Loss of any natural appetite.

anerethisia (*an-er-eth-iz'-e-ah*) [ἀν, priv ; ἐρεθίζειν, to excite]. Imperfect irritability, as of a muscle or nerve.

anergasia, anergasis (*an-er-ga'-ze-ah, an-er'-ga-sis*) [see *anergia*]. Absence of functional activity.

anergia (*an-er -je-ah*) [ἀν, priv ; ἔργον, work]. Sluggishness; inactivity.

anergic (*an-er'-jik*) [see *anergia*]. Characterized by sluggishness; as, *anergic* dementia.

anergy (*an'-ur-je*). Antianaphylaxis.

aneroid (*an'-er-oid*) [ἀ, priv ; νηρός, wet; εἶδος, form]. Working without a fluid. **a. barometer,** see *barometer*.

anerythroblepsia (*an-er-ith-ro-blep-se-ah*). Same as *anerythropsia*.

anerythrocyte (*an-er'-ith-ro-sīt*) [ἀν, priv.; *erythrocyte*]. An erythrocyte without hemoglobin.

anerythropsia (*an-er-ith-rop'-se-ah*) [ἀν, priv.; ἐρυθρός, red; ὄψις, sight]. Impaired color-perception of red.

anesin, aneson (*an'-es-in, an'-es-on*). A proprietary aqueous solution of acetone-chloroform; used as a hypnotic and local anesthetic.

anesis (*an'-es-is*) [ἄνεσις, remission]. An abatement or relaxation in the severity of symptoms.

anesthecinesis, anæsthecinesis (*an-es-the-sin-e'-sis*) [ἀ, priv.; αἴσθησις, feeling; κίνησις, movement]. A condition marked by loss of sensibility and motor capacity.

anesthesia, anæsthesia (*an-es-the'-ze-ah*) [ἀναισθησία, want of feeling]. A condition of total or partial insensibility, particularly to touch. **a. angiospas'tica,** loss of sensibility due to spasm of blood-vessels. **a., bul'bar,** that due to a lesion in the medulla oblongata. **a., central,** due to disease in the nerve-centers. **a., cerebral,** that due to disease of the cerebrum. **a., crossed,** anesthesia on one side of the body, due to a central lesion of the other side. **a., disso'ciated,** loss of pain and temperature sensations, the tactile sense being still present. **a. dolorosa,** severe pain experienced after the occurrence of complete motor and sensory paralysis, a symptom observed in certain diseases of the spinal cord. **a., dolorous** (of Liebreich), the transient but painful anesthesia produced by the injection of water in sufficient quantity to edematize the papillary layer of the derma and subjacent layers. The pain is due to the inhibitory swelling of the cells. **a., efferent,** that due to disorder of the nerve-terminations, disturbing their conductivity. **a., electric,** anesthesia caused by the passage of an electric current through a part. **a., facial,** anesthesia of those parts to which the sensory branches of the fifth cranial nerve are distributed. **a., gauntlet,** anesthesia of the entire hand. **a., general,** anesthesia of the entire body, including the abolition of all perceptive power with consequent loss of consciousness. **a., girdle,** a zone of anesthesia encircling the body, due to circumscribed disease of the spinal cord. **a., induced,** anesthesia produced by drugs. **a., infiltration-,** local anesthesia effected by subcutaneous injections. **a., intraneural,** local anesthesia effected by injection into a nerve trunk. **a., Javanese,** that produced by pressure upon the carotids. **a., local,** that limited to a part of the body. **a., mixed,** that partially produced and prolonged by the administration of morphine or other cerebral anodyne before the anesthetic is given. **a., muscular,** loss of the muscular sense. **a., olfactory,** anosmia. **a., optic,** amaurosis. **a., partial,** anesthesia in which some degree of sensibility is still present. **a., peripheral,** that depending upon changes in the peripheral nerves. **a., primary,** a temporary insensibility to slight pain occurring in the beginning of anesthesia and during which minor operations can be performed. **a., rectal,** that produced by the injection of an anesthetic agent into the rectum. **a., regional,** that limited to a part of body supplied by an afferent nerve which has been cocainized. **a., sexual,** anaphrodisia. **a., spinal,** (1) that due to a lesion of the spinal cord; (2) that produced by the injection of an anesthetic into the spinal subarachnoid space. **a., surgical,** that induced by the surgeon by means of anesthetics for the purpose of preventing pain, producing relaxation of muscles, or for diagnostic purposes. **a., tactile,** loss of sense of touch. **a., thermic,** loss of temperature sense. **a., unilateral,** hemianesthesia.

anesthesimeter, anesthesiometer (*an-es-thes-im-et-er, an-es-the-ze-om'-et-er*) [*anesthesia; μέτρον,* a measure]. An instrument to measure the amount of an anesthetic administered in a given time.

anesthesin (*an-es'-thes-in*). Paramidobenzoic acid ester; it is used as a local anesthetic, also, internally, for gastralgia.

anesthesiology (*an-es-the-ze-ol'-o-je*) [*anesthesia*; λόγος, science]. The science of anesthesia and anesthetics.

anesthetic (*an-es-thet'-ik*) [see *anesthesia*]. 1. Without feeling; insensible to touch or pain. 2. A substance that produces insensibility to touch or to pain, diminished muscular action, and other phenomena. Anesthetics may be general, local, partial, and complete. **a., general,** one used for securing general anesthesia. **a. (general) mixtures,** contain combinations of substances for producing anesthesia. **a., local,** an anesthetic that, locally applied, produces absence of sensation in the organ or tissue so treated. **a. sequence,** "the use of anesthetics in a pre-arranged order, to meet certain indications or conditions; the shift from one anesthetic to another in the course of anesthesia to meet some special indication or to avoid some special danger is an *alternation*."

anestheticism (*an-es-thet'-is-izm*) [*anesthetic*]. The quality of being anesthetic.

anesthetization (*an-es-thet-iz-a'-shun*) [ἀναίσθητος, insensible] The act of placing under the influence of an anesthetic.

anesthetize (*an-es'-thet-iz*) [see *anesthetization*]. To put under the influence of an anesthetic.

anesthetist, anesthetizer (*an-es'-thet-ist, an-es'-thet-i-zer*) [see *anesthetization*]. One who administers an anesthetic.

anesthetometer (*an-es-thet-om'-et-er*). Same as *anesthesimeter, q. v.*

anesthol (*an-es'-thol*). A trade mixture of ether, chloroform and ethyl chloride. A general anesthetic

anesthone (*an-es'-thōn*). Trade name of para-amido-ethyl-benzoate; a local anesthetic.

anesthyl (*an-es'-thil*). A local anesthetic said to consist of ethyl chloride, 5 parts; methyl chloride, 1 part.

anestile (*an'-es-til*). Trade name of a local anesthetic which is a mixture of methyl chloride and ethyl chloride; it evaporates at a lower temperature than ethyl chloride, and its anesthetic action is of longer duration and of more rapid onset than is the case with ethyl chloride.

anestrus (*an-es'-trus*) [ἀν, priv; ὄιστρος, gadfly]. The time between the estruation (heat) periods of animals.

anethol (*an'-eth-ol*) [*anethum; oleum*, oil], $C_{10}H_{12}O$. The chief constituent of the essential oils of anise and fennel. It is employed in preparing the *elixir anethi* (N. F.), being more fragrant and agreeable than the anise oil. **a., liquid,** an isomeric modification of anethol; it is an antiseptic, oil-like liquid. Syn., *isanethol*.

anethum (*an-e'-thum*) [ἀνά, up; αἴθειν, to burn, from the pungency of the seeds]. Dill; the dried fruit of *Peucedanum graveolens*, indigenous to southern Europe. It is aromatic, carminative, and stimulant Dose of the *oil* (*oleum anethi*, B. P.) 1–4 min. (0.06–0.24 Cc.); of the *water* (*aqua anethi*, B. P.) 1–2 oz. (30–60 Cc.).

anetic (*an-et'-ik*) [ἀνετικός, relaxing]. Soothing; calmative; anodyne.

anetiological (*an-e-te-o-loj'-ik-al*) [ἀν, priv.; αἰτία, cause; λόγος, word]. Having no known cause; dysteleological.

anetodermia (*an-et-o-der'-me-ah*) [ἀνετός, relaxed; δέρμα, skin]. Relaxation of the skin.

anetus (*an'-et-us*) [ἀνετός, loosened]. Any intermittent fever.

aneuria (*ah-nū'-re-ah*) [ἀ, priv.; νεῦρον, a nerve]. Lack of nervous power.

aneuric (*ah-nū'-rik*) [see *aneuria*]. Characterized by aneuria.

aneurilemmic (*an-ū-ril-em'-ik*) [ἀ, priv.; *neurilemma*]. Without a neurilemma.

aneurism (*an'-ū-rizm*). See *aneurysm*.

aneuros (*ah-nū'-ros*) [ἀνευρος, without sinews] Feeble, inelastic, relaxed.

aneurosis (*ah-nū-ro'-sis*) [ἀ, priv.; νεῦρον, a nerve]. A lack of nerves.

aneurysm (*an'-ū-rizm*) [ἀνεύρυσμα, a widening]. A circumscribed dilatation of the walls of an artery. Syn., *Abscessus spirituosus*. **a., abdominal,** an aneurysm of the abdominal aorta. **a., active,** cardiac dilatation with hypertrophy. **a., acute,** an ulceration of the heart-wall which, by communicating with one of the chambers of the heart, forms an aneurysmal pouch. **a., ampullary,** a small saccular aneurysm; it is most common in the arteries of the brain. **a. by anastomosis,** a dilatation of a large number of vessels,—small arteries, veins, and capillaries,—the whole forming a pulsating tumor under the skin. This form of aneurysm is especially seen upon the scalp. **a., arteriovenous,** the simultaneous rupture of an artery and a vein, the blood from both being poured out into the cellular tissue and forming a false aneurysm. A *varicose aneurysm* is produced by the rupture of an aneurysm into a vein. An *aneurysmal varix* results from the establishment of a communication between an artery and a vein, the latter becoming dilated and pulsating. **a., cardiac,** an aneurysm of the heart. **a., circumscribed,** an aneurysm, either true or false, in which the contents are still within the artery though there may be rupture of one or two of its coats. **a., cirsoid,** a tortuous lengthening and dilatation of a part of an artery **a., compound,** one in which one or several of the coats of the artery are ruptured and the others merely dilated. **a., consecutive, a., diffused,** follows rupture of all the arterial coats, with infiltration of surrounding tissues with blood. **a., dissecting,** one in which the blood forces its way between the coats of an artery. **a., ectatic,** an expansion of a portion of an artery due to yielding of all the coats. **a., endogenous,** one formed by disease of the vessel-walls. **a., exogenous,** one due to traumatism. **a., external.** 1. One remote from the great body-cavities. 2. One in which the cavity of the tumor is entirely or chiefly outside of the inner coat of the artery. **a., false, a., spurious,** one due to a rupture of all the coats of an artery, the effused blood being retained by the surrounding tissues. **a., fusiform,** a spindle-shaped dilatation of an artery. **a., hernial,** one in which the internal coat of the artery, with or without the middle coat, forms the aneurysmal sac which has forced its way through an opening in the outer coat. **a., lateral,** an aneurysm projecting on one side of a vessel, the rest of the circumference being intact. **a., miliary,** sac-like dilatation of an arteriole, often the size of a pin's head. **a., mycotic,** one due to growth of bacteria in a vessel-wall. **a., osteoid,** pulsating tumor of a bone. **a., partial.** 1. See *a., lateral*. 2. Aneurysmal dilatation of a portion of the heart. **a., passive, a., passive cardiac,** cardiac dilatation with thinning of the heart-wall. **a., peripheral, a., peripheric,** one involving the circumference of an artery. **a., racemose,** see *a., cirsoid*. **a., sacculated,** a sac-like dilatation of an artery communicating

with the main arterial trunk by an opening that is relatively small. **a., spurious,** see *a., false.* **a., subclavicular,** an aneurysm of the axillary artery at a point too high to admit of ligation below the clavicle. **a., surgical,** see *a., external.* **a., true,** one in which the sac is formed of one, two, or all of the arterial coats **a., varicose,** see under *a., arteriovenous.*

aneurysmal (*an-ū-riz-mal*) [see *aneurysm*]. Of the nature of or pertaining to an aneurysm. **a. diathesis,** a body-condition favoring the development of aneurysms. **a. varix,** see under *aneurysm, arteriovenous.*

aneurysmatic (*an-ū-riz-mat'-ik*) [*ἀνεύρυσμα,* a widening]. Affected with or of the nature of aneurysm.

aneurysmectomy (*an-ū-riz-mek'-to-me*) [*ἀνεύρυσμα,* aneurysm; *ἐκτομή,* excision]. Excision of the sac of an aneurysm.

aneurysmoplasty (*an-ū-riz'-mo-plas-te*]. Restoration of the artery in aneurysm; reconstructive endoaneurysmorrhaphy.

aneurysmorrhaphy (*an-ū-riz-mor'-af-e*). The suturing of an aneurysm.

aneurysmotomy (*an-ū-riz-mot'-o-me*). Incision into the sac of an aneurysm.

aneurysmus (*an-ū-riz-mus*). 1 Dilatation; for formation of an aneurysm. 2. Aneurysm.

aneuthanasia (*an-ū-than-a'-se-ah*) [*ἀ,* priv.; *εὐθανασία,* an easy death]. A painful or difficult death.

an. ex. (*an'-eks*). An abbreviation of *anode excitation.*

anfract (*an'-frakt*) [*anfractus,* a winding]. An anfractuosity or sinuosity; an anfractuous organ or structure.

anfractuosity (*an-frak-tū-os'-it-e*) [*anfractus,* a bending round]. 1. Any one of the furrows or sulci between the cerebral convolutions. 2. Any spiral turn or winding; an interruption; a detour. **a., ethmoidal,** an ethmoidal cell.

anfractuous (*an-frak'-tū-us*) [*anfractus,* a bending round]. Characterized by windings and turnings; sinuous.

angeial (*an-je'-al*) [*ἀγγεῖον,* a vessel]. Vascular.

angeio- (*an-je-o*). See *angio-.*

Angelica (*an-jel'-ik-ah*) [L.]. The seeds and root of *Angelica archangelica.* It is an aromatic stimulant and emmenagogue. Dose of the *seeds* or *roots* 30 gr.–1 dr. (2–4 Gm.).

angel's wing (*ān'-jelz wing*). A deformity of the scapula in which it turns forward and then backward, giving the shoulder a peculiar dorsal bulge.

angi (*an'-jī*). Inguinal buboes.

angiectasia, angiectasis (*an-je-ek-ta'-ze-ah, an-je-ek'-tas-is*) [*ἀγγεῖον,* a vessel; *ἔκτασις,* dilatation]. Abnormal dilatation of a vessel; enlargement of capillaries.

angiectaticus (*an-je-ek-tat'-e-kus*) [*angiectasia*]. Denoting the presence of dilated blood-vessels.

angiectopia (*an-je-ek-to'-pe-ah*) [*ἀγγεῖον,* a vessel; *ἐκτόπος,* displaced]. Displacement or abnormal position of a vessel.

angielcosis (*an-je-el-ko'-sis*). See *angielcus.*

angielcus, or **angeielcus** (*an-je-el'-kus*) [*ἀγγεῖον,* a vessel; *ἕλκος,* an ulcer]. An ulcer in the walls of a vessel.

angiemphraxis (*an-je-em-fraks'-is*) [*ἀγγεῖον,* a vessel; *ἔμφραξις,* obstruction]. Obstruction of a vessel or of vessels.

angiitis, angeitis (*an-je-i'-tis*) [*ἀγγεῖον,* a vessel; *ῖτις,* inflammation]. Inflammation of a lymph-vessel or of a blood-vessel.

angileucitis (*an-je-lū-si'-tis*). Same as *angioleucitis.*

angina (*an'-jin-ah*) or (incorrectly) (*an-ji'-nah*) [*angere,* to strangle]. Any disease attended by a sense of choking or suffocation, particularly an affection of the fauces or pharynx presenting such symptoms. **a. abdominis,** a condition due to aneurysm or arteriosclerosis of the celiac plexus, and accompanied by severe paroxysms of abdominal pain. **a. acuta,** simple sore throat. Syn., *angina simplex.* **a., agranulocytic,** a rare form with ulcerative lesions in mouth or throat resembling lesions of *Vincent's a.,* but without the presence of the organisms found in the latter. **a. aphthosa, a., aphthous,** a form attended with the formation of aphthæ in some part of the throat **a. arthritica,** sore throat of gouty or rheumatic origin. **a. canina,** croup. **a., cardiac,** angina pectoris. **a. cruris,** intermittent lameness. **a. exsudativa,** croup. **a. epiglottidea,** inflammation of the epiglottis. **a. externa,** synonym of *mumps.* **a., fibrinous,** a non-infectious disease of the throat simulating diphtheria, marked by the formation of a layer of fibrinous exudation which is chiefly confined to the tonsils. The constitutional symptoms are slight. **a., follicular,** clergyman's sore throat; see *pharyngitis, granular.* **a., herpetic,** angina observed in connection with smallpox and herpes, marked by formation of vesicles in the throat which may be attended with patches of exudation. **a. laryngea,** synonym of *laryngitis.* **a. lingualis,** same as *glossitis* **a. Ludovici, a., Ludwig's,** see *Ludwig's angina* **a. maligna,** *diphtheria* **a. maxillaris,** mumps. **a. membranacea,** synonym of *diphtheria.* **a. parotidea,** the mumps, or parotitis. **a. minor,** "a transient or mild attack of anginal pain, but of so moderate and mitigated a severity that there is a risk of its being passed over as of little moment." **a. pectoris,** a paroxysmal neurosis with intense pain and oppression about the heart. It usually occurs in the male after 40 years of age, and is generally associated with diseased conditions of the heart and aorta. There is a sense of impending death, and frequently there is a fatal termination. **a. pectoris vasomotoria,** a term given by Nothnagel and Landois to an angina associated with vasomotor disturbances, coldness of the surface, etc. **a., phlegmonous.** 1. An inflammation of the mucous and submucous tissues of the throat, with a tendency to extend more deeply, attended by edematous swelling. 2. Acute inflammation of the deep-seated structures of the throat, with a tendency to pus-formation. **a., pseudo-,** a neurosis occurring in anemic females, simulating angina pectoris, but characterized by a less grave set of symptoms and never resulting fatally. **a., pultaceous,** an affection of the throat marked by the presence of whitish or grayish patches which are easily detached, as they are not true exudations. **a., rheumatic,** a form of catarrhal angina in rheumatic persons, marked by sudden onset of intense pain on swallowing. **a. serosa, a., serous.** 1. Catarrhal angina. 2. Edema of the glottis. **a. simplex,** see *a., acuta.* **a. suffocativa,** diphtheria. **a., thymic.** 1. Laryngismus stridulus. 2. Bronchial asthma. **a. tonsillans,** quinsy. **a. trachealis,** croup. **a., ulceromembranous,** see *tonsillitis, herpetic.* **a. varicosa,** dyspnea due to enlarged tonsillar vessels. **a. vera, a. vera et legitima,** quinsy.

anginal (*an'-jin-al*). Relating to angina.

anginoid (*an'-jin-oid*). Resembling angina.

anginophobia (*an-ji-no-fo'-be-ah*) [*angina*; *φόβος*, fear]. Morbid fear of angina pectoris.

anginose (*an'-jin-ōs*). Pertaining to angina; characterized by symptoms of suffocation.

anginosis (*an-jin-o'-sis*). Any condition pertaining to, or resembling angina.

angio- (*an-je-o-*). A prefix relating to a vessel.

angioasthenia (*an-je-o-as-the'-ne-ah*) [*angio-*; *ἀσθένεια*, weakness]. Atony of the blood-vessels.

angioataxia (*an-je-o-at-aks'-e-ah*) [*angio-*; *ἀταξία*, want of order]. An irregularity in the tension of the blood-vessels.

angioblast (*an'-je-o-blast*) [*angio-*; *βλαστός*, a germ]. An embryonic cell developing into vascular tissue.

angiocardiokinetic (*an-je-o-kar-de-o-kin-et'-ik*) [*angio-*; *καρδία*, heart; *κινεῖν*, to move]. 1. Stimulating or affecting the action of movements of the heart and blood-vessels. 2. A drug which stimulates or affects the movements of the heart and blood-vessels.

angiocarditis (*an-je-o-kar-di'-tis*) [*angio-*; *καρδία*, the heart, *ιτις*, inflammation]. An inflammation of the heart and blood-vessels.

angiocavernous (*an-je-kav'-er-nus*) Relating to cavernous angioma.

angioceratodeitis. See *angiokeratodsitis*.

angiochalasis, or **angeiochalasis** (*an-je-o-kal'-as-is*) [*angio-*; *χάλασις*, relaxation]. Dilatation or relaxation of the blood-vessels

angiocheiloscope (*an-je-o-ki'-lo-skōp*) [*angio-*; *χείλος*, a lip; *σκοπεῖν*, to look]. An instrument by means of which the blood-circulation in the capillaries of the mucosa of the lips is magnified for observation.

angiocholitis (*an-je-o-ko-li'-tis*) [*angio-*; *χολή*, bile; *ιτις*, inflammation]. Inflammation of the biliary ducts

angiocrine (*an'-je-o-krin*) [*angio-*; *endocrine*]. Vasomotor disturbances resulting from disorders of the endocrine glands.

angioderma pigmentosum (*an-je-o-der'-mah pig-men-to'-sum*). See *atrophoderma*.

angiodermatitis (*an-je-o-der-mat-i'-tis*). Inflammation of the vessels of the skin.

angiodiastasis (*an-je-o-di-as'-tas-is*) [*angio-*; *διάστασις*, a separation]. 1. Displacement or dilatation of a vessel. 2. Retraction of the severed ends of a blood-vessel

angiodystrophia, angiodystrophy (*an-je-o-dis-tro'-fe-ah, -dis'-tro-je*) [*angio-*; *δυς*, bad; *τροφή*, nourishment]. Defective nutrition of the vessels.

angioelephantiasis (*an-je-o-el-efan-ti'-as-is*). See *elephantiasis telangiectodes*.

angiofibroma (*an-je-o-fi-bro'-mah*). A fibrous degenerating angioma

angiogenesis, angiogeny (*an-je-o-jen'-es-is, an-je-og'-en-e*) [*angio-*; *γεννᾶν*, to produce]. The development of the vessels.

angiogliamatosis (*an-je-o-gli-o-mat-o'-sis*) [*angioglioma*]. The presence of numerous areas of proliferating capillaries and neuroglia.

angioglioma (*an-je-o-gli-o'-mah*) [*angio-*; *glioma*]. A glioma rich in blood-vessels.

angiograph (*an'-je-o-graf*) [*angio-*; *γράφειν*, to write]. A variety of sphygmograph.

angiography (*an-je-og'-ra-fe*) [see *angiograph*] A description of the vessels; angiology.

angiokeratoditis (*an-je-o-ker-at-o-di'-tis*) [*angio-*; *κέρας*, cornea; *ιτις*, inflammation]. Vascular keratitis.

angiokeratoma (*an-je-o-ker-at-o'-mah*) [*angio-*; *κέρας*, horn; *δμα*, tumor]. Lymphangiectasis; telangiectatic wart; a very rare disease of the extremities, characterized by warty-looking growths that develop on dilated vessels in persons with chilblains, etc. Dark vascular spots the size of pin-points or pin-heads develop as an attack of chilblains is subsiding. The disease is peculiar to childhood.

angiokinesis (*an-je-o-kin-e'-sis*) [*angio-*; *κινεῖν*, to move]. Excitation or action of the blood-vessels.

angioleucitis (*an-je-o-lū-si'-tis*) [*angio-*; *λευκός*, white; *ιτις*, inflammation]. Inflammation of the lymphatic vessels.

angioleukasia (*an-je-o-lū-ka'-zhe-ah*) [*angio-*; *λευκός*, white; *ἔκτασις*, dilation]. Dilation of the lymphatics.

angiolith (*an'-je-o-lith*) [*angio-*; *λίθος*, stone]. A venous calculus, phlebolith.

angiolithic (*an-je-o-lith'-ik*) [*angio-*; *λίθος*, a stone]. A term applied to neoplasms in which crystalline or mineral deposits take place, with hyaline degeneration of the coats of the vessels.

angiology (*an-je-ol'-o-je*) [*angio-*; *λόγος*, science]. The science of the blood-vessels and lymphatics.

angiolymphitis (*an-je-o-limf-i'-tis*). *Angioleucitis*.

angiolymphoma (*an-je-o-limf-o'-mah*) [*angio-*; *lympha*, lymph; *δμα*, tumor]. A tumor formed of lymphatic vessels.

angioma (*an-je-o'-mah*) [*angio-*; *δμα*, a tumor]. A tumor formed of blood-vessels. **a., cavernous,** an angioma with communicating blood-spaces, like the cavernous tissue of the penis, originating chiefly from the distended veins. Syn., *angioma cavernosum; angioma circumscriptum.* **a., fissural,** Virchow's name for a nevus which he judged, from its location, corresponding to that of a fetal fissure, might be due to a disposition to form anomalies on the part of the region adjacent to the fissures. **a., plexiform,** one consisting of enlarged, tortuous capillaries forming a patch varying in color from claret to steel-blue; if there is a great increase of blood-vessels, the growth has the character of a tumor, and large examples of this variety are lobular in structure. **a. serpiginosum,** infective angioma; nevus, lupus. **a., telangiectatic,** an angioma composed of dilated blood-vessels. **a., tuberose, a., tuberous,** one occurring in subcutaneous tissue and presenting the appearance of a lipoma as it gradually replaces the adipose tissue, or it may be accompanied by a true fatty growth.

angiomalacia (*an-je-o-mal-a'-she-ah*) [*angio-*; *μαλακία*, a softening]. Softening of the blood-vessels.

angiomatosis (*an-je-o-mat-o'-sis*). A condition favoring the production of angioma.

angiomatous (*an-je-o'-mat-us*). Pertaining to or resembling an angioma.

angiomegaly (*an-je-o-meg'-al-e*) [*angio-*; *μέγας*, large]. Enlargement of blood-vessels; chiefly noted in the eyelid.

angiometer (*an-je-om'-et-er*). See *sphygmograph*.

angiomyces (*an-je-o-mi'-sēz*) [*angio-*; *μύκης*, a fungus; an excrescence]. A fungoid or spongy dilation of the capillaries.

angiomyocardiac (*an-je-o-mi-o-kar'-de-ak*) [*angio-*, *μῦς*, muscle; *καρδία*, the heart]. Pertaining to the blood-vessels and the muscle of the heart.

angiomyoma (*an-je-o-mi-o'-mah*) [*angio-*; *μῦς*, a muscle; *δμα*, a tumor: *pl., angiomyomata*]. A vascular and erectile muscular tumor.

angiomyopathy (*an-je-o-mi-op'-a-the*) [*angio-*; *μῦς*, muscle; *πάθος*, disease]. Any affection of the vessels involving the musculature.

angiomyosarcoma (*an-je-o-mi-o-sar-ko'-mah*). A tumor containing elements of angioma, myoma, and sarcoma.

angioneoplasma (*an-ie-o-ne-o-plaz'-mah*) [*angio-; νεός*, new; *πλασμα*, moulded substance; pl., *angioneoplasmata*]. A neoplasm made up of blood-vessels or lymph-vessels.

angioneurectomy (*an-je-o-nū-rek'-to-mē*) [*angio-; νεῦρον*, nerve; *ἐκτομή*, excision]. Resection of all the cord-elements of the prostate except the vas, with its artery and vein.

angioneuredema (*an-je-o-nū-red-e'-mah*). Same as *angioneurœdema*.

angioneuroedema (*an-je-o-nū-ro-e-de'-mah*). See *angioneurotic edema*.

angioneurosis (*an-je-o-nū-ro'-sis*) [*angio-; neurosis*]. A neurosis of the blood-vessels; a disturbance of the vasomotor system, either of the nature of a spasm of the blood-vessels (*angiospasm*) or of paralysis (*angioparalysis*).

angioneurotic (*an-je-o-nū-rot'-ik*) [see *angioneurosis*]. Pertaining to angioneurosis. **a. edema**, an acute circumscribed swelling of the subcutaneous or submucous tissues, probably due to vasomotor lesion. The disease often runs in families. It is at times periodic, and is associated with colic and gastric disturbances.

angioneurotomy (*an-je-o-nū-rot'-o-me*) [*angio-; νεῦρον*, nerve; *τομή*, a cutting]. Division of the nerves and vessels of a part.

angionoma (*an-je-on-o'-mah*) [*angio-; νομή*, ulcer]. Ulceration of a vessel.

angionosis (*an-je-o-no'-sis*) [*angio-; νόσος*, a disease]. See *angiopathy*.

angiopancreatitis (*an-je-o-pan-kre-at-i'-tis*). Inflammation of the vascular tissue of the pancreas

angioparalysis (*an-je-o-par-al'-is-is*) [*angio-; παράλυσις*, paralysis] Vasomotor paralysis

angioparalytic (*an-je-o-par-al-it'-ik*) [see *angioparalysis*]. Relating to or characterized by angioparalysis.

angioparesis (*an-je-o-par'-es-is*) [*angio-; πάρεσις*, paresis]. Partial paralysis of the vasomotor apparatus.

angiopathy (*an-je-op'-a-the*) [*angio-; πάθος*, disease]. Any disease of the vascular system.

angiophorous (*an-je-of'-or-us*) [*angio-; φερεῖν*, to bear]. Applied to tissue which accompanies and supports vessels.

angioplania (*an-je-o-pla'-ne-ah*) [*angio-; πλάνη*, a wandering]. Irregularity or abnormality in the course of a vessel.

angioplasty (*an'-je-o-plas-te*) [*angio-; πλάσσειν*, to form]. Plastic surgery upon blood-vessels.

angioplerosis (*an-je-o-pler-o'-sis*) [*angio-; πλήρωσις*, a filling-up]. Engorgement of the vessels.

angiopoietic (*an-je-o-poi-et'-ik*) [*angio-; ποιεῖν*, to make]. Pertaining to cells which cause the formation of blood-vessels in new tissue.

angiopressure (*an-je-o-presh'-ur*). The production of hemostasis by means of angiotribe and forceps without ligation.

angiorhigosis (*an-je-o-ri-go'-sis*) [*angio-; ῥῖγος*, cold]. Rigidity of the vessels.

angiorrhagia, or **angeiorrhagia** (*an-je-or-a'-je-ah*) [*angio-; ῥηγνύναι*, to break]. Bleeding from a vessel.

angiorrhaphy (*an-je-or'-af-e*) [*angio-; ῥάφη*, suture]. Suture of a vessel or vessels. **a., arteriovenous**, the suturing of an artery to a vein, so as to turn the arterial blood into the vein.

angiorrhea (*an-je-or-e'-ah*) [*angio-; ῥεῖν*, to flow]. An oozing of blood.

angiorrhexis (*an-je-or-eks'-is*) [*angio-; ῥῆξις*, a bursting]. Rupture of a blood-vessel.

angiosarcoma (*an-je-o-sar-ko'-mah*) [*angio-; σάρξ*, flesh; *ὄμα*, a tumor]. A vascular sarcoma.

angiosclerosis (*an-je-o-skle-ro'-sis*) [*angio-; σκληρός*, hard]. The induration and thickening of the walls of the blood-vessels.

angioscope (*an'-je-o-skōp*) [*angio-; σκοπεῖν*, to inspect]. An instrument for examining the capillary vessels

angiosialitis (*an-je-o-si-al-i'-tis*) [*angio-; σίαλον*, saliva; *ιτις*, inflammation]. Inflammation of the duct of a salivary gland.

angiosis (*an-je-o'-sis*) [*ἀγγεῖον*, a vessel]. Any disease of blood-vessels or of lymphatics.

angiospasm (*an'-je-o-spazm*) [*angio-; σπασμός*, a spasm]. A vasomotor spasm.

angiospastic (*an-je-o-spas'-tik*) [see *angiospasm*]. Characterized by or of the nature of angiospasm.

angiosperm (*an'-je-o-sperm*) [*angio-; σπέρμα*, seed]. In biology, a plant the seeds of which are produced within a closed vessel.

angiostegnosis (*an-je-o-steg-no'-sis*) [*angio-; στέγνωσις*, stoppage]. Stoppage or constriction of a vessel.

angiostenosis (*an-je-o-sten-o'-sis*) [*angio-; στένωσις*, a narrowing]. Narrowing of a vessel.

angiosteogenic, angiosteogenous (*an-je-o-ste-oj'-en-ik, -us*) [*angio-; ὀστέον*, a bone; *γενναν*, to produce]. Relating to, producing, or produced by calcification of the vessels

angiostrophe, angiostrophy (*an-je-os'-tro-fe*) [*angio-; στροφή*, a twist]. Torsion of a vessel for the arrest of hemorrhage.

angiosymphysis (*an-je-o-sim'-fiz-is*) [*angio-; σύμφυσις*, a growing together]. The growing together of vessels.

angiosynizesis (*an-je-o-sin-e-ze'-sis*) [*angio-; συμιζάνειν*, to collapse]. The collapse of the walls of a vessel and subsequent growing together.

angiotasis (*an-je-ot'-as-is*) [*angio-; τάσις*, tension]. The tension of the vessels.

angiotatic (*an-je-ot-at'-ik*) [*angio-; τάσις*, tension]. Relating to angiotasis.

angiotelectasia, angiotelectasis (*an-je-o-tel-ek-tā'-ze-ah, an-je-o-tel-ek'-ta-sis*). See *telangiectasis*.

angiotenic (*an-je-o-ten'-ik*) [*angio-; τείνειν*, to stretch]. Due to or marked by distention of the blood-vessels.

angioteria (*an-je-o-te'-re-ah*) [*angio-; τέρας*, a wonder]. Over-development of the vascular system.

angiothlipsis (*an-je-o-thlip'-sis*) [*angio-; θλίβειν*, to rub; to gall]. The abrasion of a vessel.

angiotitis (*an-je-o-ti'-tis*) [*angio-; οτιτις*]. Inflammation of the blood-vessels of the ear.

angiotome (*an'-je-o-tōm*) [*angio-; τομή*, a cutting]. The vascular tissue of an embryonic metamere.

angiotomy (*an-je-ot'-o-me*) [see *angiotome*]. 1. Incision into a vessel. 2. That branch of anatomy relating to the vascular system.

angiotonic (*an-je-o-ton'-ik*) [*angio-; τονος*, tension]. Pertaining to increase of arterial tension.

angiotribe (*an-je-o-trib*) [*angio-; τρίβειν*, to grind or bruise]. A clamp furnished with powerful jaws used by Tuffier to occlude arteries in vaginal hysterectomy.

angiotripsy (*an-je-o-trip'-sē*) [see *angiotribe*]. Vascular torsion and compression by means of the angiotribe.

angioxyl (*an'-je-oks-il*) [angio-, *ὀξύς*, sharp]. An acidified alcoholic pancreatic extract, which is beneficial in hyperpiesia.

angitis (*an-ji'-tis*). See *angiitis*.

angle, angulus (*ang'-gl, ang'-gu-lus*) [*angulus*, an angle]. 1. A corner. 2. The degree of divergence of two lines or planes that meet each other; the space between two such lines. **a. of**

aberration, see *a. of deviation.* **a., acromial,** that formed between the head of the humerus and the clavicle. **a., alpha,** in optics, that formed by the intersection of the visual line and optic axis. **a., alveolar,** that formed between a line passing through a spot beneath the nasal spine and the most prominent point of the lower edge of the alveolar process of the superior maxilla and the cephalic horizontal line. **a. of aperture,** in optics, that included between two lines joining the opposite points of the periphery of a lens and the focus. **a., biorbital,** in optics, that formed by the intersection of the axes of the orbits. **a., cardio-hepatic,** the angle formed by the junction of the upper limit of hepatic dullness with the right lateral line of cardiac dullness **a., carrying,** angle between the longitudinal axis of the forearm and that of the arm, when the forearm is extended. **a., costal,** the angle formed by the meeting of ribs at the ensiform cartilage. **a., critical,** that made by a beam of light passing from a rarer to a denser medium, with the perpendicular, without being entirely reflected. **a. of deviation.** 1. In magnetism, the angle traversed by the needle when disturbed by some magnetic force. 2 In optics, that formed by a refracted ray and the prolongation of the incident ray. **a. s., distal,** the angles formed by the union of the other surfaces of the tooth crown with the distal surface. **a. of elevation,** in optics, that made by the visual plane with its primary position when moved upward or downward. **a., epigastric,** same as *a., costal.* **a., gonial,** the angle formed by the ascending and horizontal rami of the mandible. **a., great, of the eye,** the inner angle of the eye **a. of incidence,** in optics, the angle at which a ray of light strikes a denser medium and undergoes reflection or refraction. **a. s, incisal,** in dentistry, the angles of the various lateral surfaces of the tooth crowns at their junction with the incisal surface. **a. of inclination (of pelvic canal),** in obstetrics, that formed by the anterior wall of the pelvis with the conjugate diameter. **a. of inclination (of pelvis),** in obstetrics, that formed by the pelvis with the general line of the trunk, or that formed by the plane of the inferior strait with the horizon. **a. of jaw,** the junction of the lower border of the ramus of the mandible with its posterior border. **a. s, labial.** 1. See *a. s of the lips.* 2. In dentistry, the angles of the labial surface of the tooth crown which join the other surfaces. **a., limiting,** see *a., critical.* **a. of the lips,** that formed by the union of the lips at each extremity of the mouth. **a., Louis',** that between the manubrium and gladiolus of the sternum. **a., Ludwig's,** see *a., Louis'.* **a., mesial,** the angles formed at the junction of the mesial surfaces of a tooth crown with the other surfaces. **a., meter-,** in optics, the degree of convergence of the eyes when centered on an object one meter distant from each. **a., nasal** (of the eye), the inner angle of the eye. **a., optic,** that included between lines joining the extremities of an object and the nodal point. The smallest is about 30 seconds. **a., pelvivertebral,** same as *a. of inclination* (of pelvis). **a. of polarization,** in optics, the angle of reflection at which light is most completely polarized. **a., principal,** the angle formed by that side of a prism receiving the incident ray with the side from which the refracted ray escapes. **a. of pubes,** that formed by the junction of the pubic bones at the symphysis. **a. of reflection,** in optics, that which a reflected ray of light makes with a line drawn perpendicular to the point of incidence. **a. of refraction,** in optics, that which exists between a refracted ray of light and a line drawn perpendicular to the point of incidence. **a., Rolandic,** the acute angle formed by the fissure of Rolando with the superior border of the cerebral hemisphere. **a., sacrovertebral,** that which the sacrum forms with the last lumbar vertebra. **a., sigma,** one between the radius fixus and a line from the hormion to the staphylion. **a., sternoclavicular,** that existing between the clavicle and the sternum. **a., subcostal,** see *a., costal.* **a., subpubic,** that formed at the pubic arch. **a. of supination of the hand, a. of supination of the radius,** the extent to which the hand is capable of being supinated; about 180°. **a., Sylvian,** the angle formed by the posterior limb of the Sylvian fissure with a line perpendicular to the superior border of the hemisphere. **a., temporal** (of the eye), the outer canthus of the eye. **a., visual,** see *a., optic.* **a., xiphoid,** that formed by the sides of the xiphoid notch.

Anglesey leg (*an'-gl-se*) [Marquis of *Anglesey,* 1768–1854]. An artificial limb formed from a solid piece of wood hollowed out to receive the stump and provided with a steel joint at the knee. The ankle-joint was made of wood, to which motion was communicated by strong catgut strings posteriorly and a spiral spring anteriorly.

anglicus sudor (*ang'-lik-us sū'-dor*) [L.]. English sweating fever. A contagious malignant fever, also known as *ephemera maligna,* characterized by black or dark-colored sweat.

angophrasia (*an-go-fra'-ze-ah*) [ἄγχειν, to choke; φράσις, utterance]. A speech-defect consisting of a choking, drawling utterance, occurring in paralytic dementia.

angor (*an'-gor*) [*angor,* a strangling]. Syn., *angina.* **a. animi,** a sense of imminent dissolution. **a. pectoris,** angina pectoris.

angostura (*an-gos-tū'-rah*) [Sp., *Angostura,* a S. A. town] Cusparia bark. The bark of *Galipea cusparia* It is a stimulant tonic and febrifuge, In large doses it is emetic. Dose of *fluidextract* 10–30 min. (0.6–2 0 Cc.); of the *bark* 10–40 gr. (0 6–25 Gm.); of the *infusion* 1–2 oz. (30–60 Cc.).

Ångstrom's unit (*ŏng'-strum; ang'*). [Anders Jonas *Ångstrom,* Swedish physicist, 1814–1874]. A unit of length equal to one one-hundred-millionth of a centimeter or one ten-thousandth of a micron: used for measuring wave lengths.

Anguillula (*an-gwil'-ū-lah*) [dim. of *anguilla,* an eel: *pl., anguillulæ*]. A genus of very small nematode worms. **A. aceti,** the common vinegar eel. **A. intestinalis et stercoralis,** *Strongyloides intestinalis,* a worm found in the intestines and feces of persons in tropical and subtropical countries.

anguilluliasis (*an-guil-ū-li'-as-is*). Infestation with Anguillula intestinalis.

angular (*an'-gū lar*) [*angulus,* an angle]. Pertaining to an angle. **a. artery,** the terminal branch of the facial artery. **a. gyrus, a. convolution,** a convolution of the brain; see *convolution.* **a. movement,** the movement between two bones that may take place forward and backward or inward and outward. **a. processes,** the external and internal extremities of the orbital arch of the frontal bone.

angulation (*an-gū-la'-shun*). The formation of angular loops in the intestine.

angulus (*an'-gū-lus*) [L.]. See *angle*.

angustura. See *angostura*.

anhalonine (*an-hal-o'-nēn*) [*Anhalonium*, a genus of cacti], $C_{12}H_{15}NO_3$. A poisonous alkaloid from *Anhalonium lewinii*. It forms salts with the ordinary acids. **a. hydrochloride**, $C_{12}H_{15}NO_3HCl$, is a cardiac and respiratory stimulant and is used as is strychnine in angina pectoris, asthma, and pneumothorax.

anhaphia (*an-ha'-fe-ah*). See *anaphia*.

anhedonia (*an-hed-o'-ne-ah*). Complete loss of the sensation of pleasure.

anhelation (*an-hel-a'-shun*) [*anhelare*, to pant]. Shortness of breath; dyspnea.

anhelitus (*an-hel'-it-us*) [L.]. 1. Respiration. 2. Difficult respiration; asthma.

anhelose, anhelous (*an'-hel-ōs, -us*). Panting.

anhematosis (*an-hem-at-o'-sis*) [ἀν, priv; αἱματόειν, to make bloody]. Defective formation of the blood.

anhemolytic (*an-he-mo-lit'-ik*) [ἀν, priv.; αἷμα, blood; λύσις, a setting free]. Not hemolytic.

anhepatogenic (*an-hep-at-o-jen'-ik*) [ἀν, priv.; ἧπαρ, liver; γεννᾶν, to produce]. Not originating in or produced by the liver.

anhidrosis (*an-hid-ro'-sis*) [ἀν, priv.; ἱδρώς, sweat]. Partial or complete absence of sweat secretion.

anhidrotic (*an-hid-rot'-ik*) [see *anhidrosis*]. 1 Tending to check sweating. 2. An agent that checks sweating.

anhistic, anhistous (*an-his'-tik, an-his'-tus*) [ἀν, priv.; ἱστός, a web]. Structureless, not organized; plasmic.

anhistozoa (*an-his-to-zo'-ah*) [ἀν, priv.; ἱστός, a web ξῷον, animal]. Protozoa, *q. v.*

anhydration (*an-hi-dra'-shun*) [ἀν, priv ; ὕδωρ, water]. 1. See *dehydration*. 2. The state or condition of not being hydrated.

anhydremia (*an-hi-dre'-me-ah*) [ἀν, priv.; ὕδωρ, water; αἷμα, blood]. The opposite of hydremia. Diminution of the watery constituents of blood.

anhydric (*an-hi'-drik*). See *anhydrous*.

anhydride (*an-hi'-drid*) [ἀν, priv.; ὕδωρ, water]. A chemical compound, derived from an acid by the withdrawal of a molecule of water; or an oxide, which on combination with water forms an acid. Carbon dioxide and sulphur dioxide are examples.

anhydrite (*an-hi'-drīt*). Anhydrous calcium sulphate.

anhydromyelia (*an-hi-dro-mi-e'-le-ah*) [ἀν, priv.; ὕδωρ, water; μυελόν, marrow]. A deficiency of the fluid that normally fills the spinal cavity.

anhydrous (*an-hi'-drus*) [see *anhydride*]. In chemistry, a term used to denote the absence of water, especially of water of crystallization.

anhypnia (*an-hip'-ne-ah*) [ἀν, priv.; ὕπνος, sleep]. Sleeplessness, insomnia.

anhypnosis (*an-hip-no'-sis*) [ἀν, priv.; ὕπνος, sleep]. Insomnia.

anhysteria (*an-his-te'-re-ah*) [ἀν, priv.; ὑστέρα, the uterus]. Absence of the uterus.

anianthinopsy (*an-e-an-thin-op'-se*) [ἀν, priv.; ἁνθινος, violet-colored; ὄψις, sight]. An inability to recognize violet tints.

anidean (*an-id'-e-an*) [See *anideus*]. Without shape or form; a formless monster.

anideus (*an-id'-e-us*) [ἀν, priv.; εἶδος, form]. The lowest form of omphalosite, in which the parasitic fetus is reduced to a shapeless mass of flesh covered with skin.

anidous (*an-i'-dus*) [ἀν, priv.; εἶδος, form]. Formless, from general arrest of development; used of fetal monsters.

anidros, anidrus (*an-id'-ros, -rus*). Marked by the absence of perspiration.

anidrosis (*an-id-ro'-sis*). See *anhidrosis*.

anidrotic (*an-id-rot'-ik*). See *anhidrotic*.

anile (*an'-il*) [*anus*, an old woman]. Imbecile; like an old woman.

anilide anilid, (*an'-il-id*) [Ar., *al*, the; *nīl*, dark blue]. A compound formed by the action of acid chloride or acid anhydride upon aniline. The anilides are very stable derivatives.

anilidmetarsenite (*an-il-id-met-ar'-sen-īt*), $C_6H_5NO_2AsC_6H_5NHAsO_2$. A white, odorless powder containing 37.69 % of arsenic, about half as much as arsenic trioxide. It dissolves in water up to 20 %, and is used by subcutaneous injection in skin diseases. Dose ½–3 gr. (0.05–0.2 Gm.) of 20 % solution a day. Syn., *atoxyl*.

aniline, anilin (*an'-il-in*) [see *anilide*], C_6H_7N. Amidobenzene; phenylamine; formed in the dry distillation of bituminous coal. bones, indigo, isatin, and other nitrogenous substances. It is made by reducing nitrobenzene. It is a colorless liquid with a faint, peculiar odor, boiling at 183°; its sp. gr. at 0° is 1.036. When perfectly pure, it solidifies on cooling, and melts at − 8°. It is slightly soluble in water, but dissolves readily in alcohol and ether. Combined with chlorine, the chlorates, and hypochlorites, it yields the various aniline dyes known by the names of *a. purple, a. green, a. black, a. blue*, etc. It is used in chorea and epilepsy in ½ gr. (0.03 Gm.) doses. Syn., *phenylamine; crystallin; cyanol*.

anilinophile (*an-il-in'-o-fil*) [*anilin*; φιλεῖν, to love]. 1. Readily stained with anilin. 2 A tissue or element staining readily with anilin.

anilipyrine (*an-il-i-pi'-rin*). A feebly toxic white powder, consisting of acetanilide, 1 part, antipyrine, 2 parts, melted together. It is more soluble in water than either of its constituents. Dose, 8–16 gr.

anilism (*an'-il-izm*) [*anilin*]. An acute or chronic disease produced in workmen in aniline factories by the poisonous fumes. The symptoms are debility, vertigo, gastrointestinal disturbance, and cyanosis.

anility (*an-il'-it-e*) [*anilis*, an old woman]. The state of being imbecile or childish.

anima (*an'-im-ah*) [L.; spirit]. 1. The soul; the vital principle. 2. Formerly, the active principle of a drug or medicine. 3. A current of air; the breath; the mind; consciousness. In the plural, *animæ*, the swimming-bladders of herring, used as a diuretic. **a. aloes,** refined aloes. **a. brutalis,** the blood. **animæ deliquium,** syncope. **animæ gravitas,** an offensive breath. **a. hepatis,** iron sulphate, from its supposed efficacy in liver disease. **animæ pathemata,** mental affections. **a. stahliana, a., Stahl's,** the vital principle of plants or animals.

animal (*an'-i-mal*) [*anima*, the spirit, breath, or life]. An organism capable of ingesting and digesting food. No sharp line of distinction exists between the lowest animals and certain vegetables. The higher animals are distinguished by the power of locomotion and the possession of a nervous system. **a., charcoal,** bone-black, ivory-black, etc., is the product of the calcining of bones in closed vessels. **a. chemistry,** that concerned with the composition of animal bodies. **a. electricity,** electricity gen-

erated in the body. **a.-gum,** $C_{12}H_{10}O_{10} + 2H_2O$. A substance prepared from mucin by Landwehr, and so named on account of its resemblance to the gum of commerce. It occurs in many tissues of the body, is soluble in water, and in alkaline solution readily dissolves cupric oxide, the solution not being reduced on boiling. It yields no coloration with iodine, and is very feebly dextrorotatory. **a. heat,** the normal temperature of the body in man—about 98.5° F. (37° C.). **a. magnetism,** mesmerism; hypnotism. **a. starch,** see *glycogen*. **a. tissue,** the textures of the body. **a. velum.** See *cargile membrane*.

animalcule (*an-im-al'-kūl*) [*animalculum*, a minute animal]. An animal organism so small as to require the microscope for its examination.

animality (*an-im-al'-it-e*). The state of having an animal nature.

animalization (*an-im-al-iz-a'-shun*) [*animalis*, animate]. The process of assimilating food to the tissues of the body.

animation (*an-im-a'-shun*) [*animare*, to have life or existence]. To be possessed of life. Formerly used to denote the effect of the vital principle by which the fetus acquires the power of continuing its existence. **a., suspended,** a condition marked by interrupted respiration and consciousness; caused by strangulation, the inhalation of carbon dioxide or other gases, etc.

anime (*an'-im-e*) [Fr., *animé*, origin doubtful]. A name of various resins, especially that of *Hymenæa courbaril*, a tree of tropical America, sometimes used in plaster, etc.

animism (*an'-im-izm*) [*anima*, soul]. Stahl's theory of life and disease, namely, that the soul is the source of both normal and pathological activities.

aniodol (*an-i'-o-dol*). A glycerol solution of trioxymethylene, useful as an antiseptic in 1 % solution.

anion (*an'-i-on*) [*ἀνα*, up; *ἰών*, going]. In electrolysis, an electronegative element or ion.

anios (*an'-e-os*). Trade name of an antiseptic, containing formaldehyde and phenol.

aniridia (*an-i-rid'-e-ah*) [*ἀν*, priv.; *ἶρις*, the rainbow]. Absence or defect of the iris.

aniridism, aniridismus (*an-ir'-id-izm, -iz'-mus*). See *anirsdia*.

anisalol (*an-is'-al-ol*), $C_6H_4(OCH_3)CO_2C_6H_5$. The phenyl ester of anisic acid, forming colorless crystals. It is antirheumatic and analgesic. Dose 8–15 gr. (0.52–1.0 Gm).

anisalyl (*an-is'-al-il*) [*anise; alcohol*], C_8H_9O. The univalent radical of anisic alcohol. **a. hydrate,** anisic alcohol.

anisamide (*an-is'-am-id*), $C_8H_9NO_2$. The amide of anisic acid; anisyl amide.

anisate (*an'-is-āt*) [*anisum*, anise]. A salt of anisic acid.

anisated (*an'-is-a-ted*) [*anisum*, anise]. Containing anise.

anischuria (*an-is-kū'-re-ah*) [*ἀν*, priv.; *ἰσχουρία*, retention of urine]. Enuresis *q. v.*

anise (*an'-is*). See *anisum*.

aniseed (*an'-is-ēd*). Anise-seed. The seed of *Pimpinella anisum*. See *anisum*.

anisette (*an'-is-et*) [*anisum*, anise]. A liqueur prepared by the distillation of the seeds of star anise, fennel, and coriander with water and alcohol and the addition of sugar.

anisic acid. See *acid, anisic*.

anisidin (*an-is'-id-in*), $N(C_7H_7O)H_2$. A base obtained from nitranisol by action of ammonium sulphide in alcoholic solution; with acids it forms crystalline compounds. Syn., *Methylphenidin; Methylamidophenol*. **a. citrate,** an analgesic similar to phenetidin citrate.

anisine (*an'-is-in*) [*anisum*, anise], $C_{22}H_{24}N_2O_2$. A crystalline alkaloid, a derivative of anise.

aniso- (*an'-is-o*) [*ἄνισος*, unequal]. In combination, unequal, unsymmetrical.

anisochromatic (*an-is-o-kro-mat'-ik*) [*aniso-; χρῶμα*, color]. Not having the same color throughout; said of solutions containing two pigments used in testing for color-blindness.

anisocoria (*an-is-o-ko'-re-ah*) [*aniso-; κορή*, pupil]. Inequality of the diameter of the pupils.

anisocytosis (*an-i-so-si-to'-sis*) [*aniso-; κύτος*, cell]. Abnormal inequality in the size of the red blood-corpuscles.

anisodactylus (*an-is-o-dak'-til-us*) [*aniso-; δάκτυλος*, a finger]. With unequal digits.

anisodont (*an-i'-so-dont*) [*aniso-; ὀδούς*, tooth]. Having irregular teeth of unequal length.

anisogamy (*an-is-og'-am-e*) [*aniso; γαμος*, marriage]. Fusion of two gametes of unequal form or size.

anisognathous (*an-is-og'-na-thus*) [*aniso-; γνάθος*, jaw]. Having the two jaws unlike as to the molar teeth.

anisohypercytosis (*an-is-o-hi-per-si-to'-sis*) [*aniso-; ὑπερ*, above; *κύτος*, cell]. Condition in which there is a leucocytosis accompanied by disturbance in the normal proportions of the different kinds of leucocytes.

anisohypocytosis (*an-is-o-hi-po-si-to'-sis*) [*aniso-, ὑπο*, under; *κύτος*, cell]. Condition in which the leucocytes are diminished in number, and the normal proportion of the different kinds of leucocytes is also disturbed.

anisol (*an'-is-ol*) [see *anisine*], C_7H_8O. Methylphenyl ether, produced by heating phenol with potassium and methyl iodide or potassium methyl sulphate in alcoholic solution. It is an ethereal-smelling liquid, boiling at 152°; its sp. gr. at 15° is 0.991.

anisoleucocytosis (*an-is-o-lū-ko-si-to'-sis*) [*aniso-; λεύκος*, white; *κύτος*, cell]. Same as *anisonormocytosis, q. v.*

anisomelia (*an-is-o-me'-le-ah*) [*aniso-; μέλος*, limb]. An inequality between corresponding limbs.

anisomelous (*an-is-om'-el-us*) [*aniso-; μέλος*, a limb]. Having limbs of unequal length.

anisomeria (*an-is-o-me'-re-ah*) [*aniso-; μέρος*, part]. The condition of having unequal organs or parts in successive series.

anisometrope (*an-is'-o-me-trōp*). A person with dissimilar refractive power of the two eyes.

anisometropia (*an-is-o-met-ro'-pe-ah*) [*aniso-; μέτρον*, a measure; *ὤψ*, the eye]. A difference in the refraction of the two eyes.

anisometropic (*an-is-o-met-rop'-ik*) [see *anisometropia*]. Affected with anisometropia.

anisonormocytosis (*an-is-o-nor-mo-si-to'-sis*) [*aniso; norma* a rule; *κύτος*, cell]. The presence in the blood of the normal number of leukocytes, but with an abnormal proportion of the various kinds of leukocytes among themselves.

anisopia (*an-is-o'-pe-ah*) [*aniso-; ὤψ*, eye]. Inequality of visual power in the two eyes.

anisosthenic (*an-is-o-sthen'-ik*) [*aniso-; σθενός*, strength]. Not of equal power; used of pairs of muscles.

anisotachys (*an-is-ot'-a-kis*) [*aniso-; ταχύς*, quick]. Applied to an accelerated pulse of varying rapidity.

anisotonic (*an-ı-so-ton'-ık*) [*anısso-*, *τόνος*, tone] Denoting unequal osmotic pressure

anisotropal, anisotropic, anisotropous (*an-ıs-o-trop'-al, an-ıs-o-trop'-ık, an-ıs-ot'-ro pus*) [*anısso-*; *τρόπος*, turning] Not possessing the same light-refracting properties in all directions, a term applied to doubly refracting bodies In biology, varying in irritability in different parts or organs

anisotrophy (*an-ıs ot'-ro fē*) [see *anisotropal*] The quality of being doubly refractive or unequally refractive in different directions, or of being unequally responsive to external influences

anisum (*an' ıs-um*) [L] Anise The fruit of *Pımpınella anisum* Its properties are due to a volatile oil It is slightly stimulant to the heart action It liquefies bronchial secretions and is therefore a favorite ingredient in cough-mixtures Dose 10–20 gr (0 65–1 3 Gm) **anisi, aqua** (U S P), oil of anise, 1, water 500 parts Dose indefinite **anisi, essentia** (B P) Dose 10–20 min (0 6–1 2 Cc) **anisi, oleum** (U S P), an ingredient in tinctura opii camphorata Dose 1–5 min (0 06–0 3 Gm) **anisi, spiritus** (U S P), a 10 % solution of the oil in alcohol Dose 1–2 dr (4–8 Cc)

anisuria (*an-ıs u' re-ah*) [*anısso-, urine*] A condition characterized by alternate polyuria and oliguria

anisyl (*an'-ıs-ıl*) [*anisum*] $C_8H_7O_2$ A hypothetic radical supposed to be found in anise and its derivatives

anitin (*an' ıt-ın*) A brownish powder obtained from ichthyol In 33 % aqueous solution it combines with phenols etc , to form anitols Syn , *ichthyosulphonic acid*

anitol (*an'-ıt ol*) Any one of the soluble compounds formed by anitin with phenols, cresols, etc , they possess germicidal properties

anitrogenous (*ah nı troj' en us*) [*a*, priv , *nitrogen*] Nonnitrogenous

ankle (*an'-kl*) [ME , *ancle*] The joint between the leg and the foot It is a ginglymus joint, with four ligaments, the anterior, posterior, internal, and external **a.-bone,** the astragalus **a.-clonus,** the succession of a number of rhythmic muscular contractions in the calf of the leg when the foot is suddenly flexed by pressure upon the sole It is a symptom of various diseases of the spinal cord especially those involving the lateral pyramidal tracts **a -jerk,** see *a -clonus* **a.-joint,** see *ankle* **a reflex,** see *a -clonus* **a., tailors',** a ganglion or synovial sac over the external malleolus in tailors, due to their constrained posture when at work **a. valgus,** a debilitated condition of the ankle joint due to laxity of the internal lateral ligament, permitting the foot to act as in talipes valgus

ankola (*an-ko'-lah*) [Hind] The bitter, emetic root-bark of *Alangium lamarkii*, a tree of tropical Asia and Africa It is used in India in skin diseases and leprosy

ankyla, ankyle (*an'-kıl ah, -e*) [*ἀγκύλη*, anything bent] 1 An angular part, particularly the elbow 2 Ankylosis of a joint with flexion 3 Abnormal adhesion of parts

ankylenteron (*an-kıl-en'-ter-on*) [*ἀγκύλη*, a coil, *ἔντερον*, an intestine] An adhesion between intestinal coils

ankyloblepharon (*an-kıl o-blef'-ar-on*) [*ankyle; βλέφαρον*, the eyelid] The adhesion of the ciliary edges of the eyelids

ankylocheilia, ankylochilia (*an-kıl-o-kı'-le-ah*) [*ankyle, χεῖλος* lip] Adhesion of the lips

ankylocolpos (*an-kıl o-kol'-pos*) [*ankyle, κόλπος*, the vagina] Atresia of the vagina or vulva

ankylodactylia (*an-kıl-o-dak tıl'-e-ah*) [*ankyle, δάκτυλος*, finger] Adhesion of fingers or toes to one another

ankylodeire, ankylodere, ankyloderis (*an-kıl-o-dı'-re, -de'-re, an-kıl-od'-er ıs*) [*ankyle, δειρη*, the neck] Wry-neck, torticollis

ankylodontia (*an-kıl-o-don'-she-ah*) [*ankyle, ὀδόυς*, a tooth] Irregularity in the position of the teeth

ankyloglossia, ankyloglossum (*an-kıl o-glos'-e-ah, an kıl o glos'-um*) [*ankyle, γλῶσσα*, the tongue] Tongue-tie

ankylomele (*an-kıl-om'-el-e*) [*ankyle, μέλος*, a limb] 1 The abnormal growing together of limbs (as of the fingers or toes) 2 [*μήλη*, a probe] A curved probe

ankylomerism (*an kıl om' er-ızm*) [*ankyle, μέρος*, a part] Abnormal adherence of parts to each other

ankylopodia (*an-kıl-o-po'-de-ah*) [*ankyle, πούς*, a foot] Ankylosis of the ankle-joint.

ankyloproctia (*an kıl o prok'-te-ah*) [*ankyle, πρωκτός*, the anus] Atresia of the anus

ankylorrhinia (*an-kıl-o-rın'-e-ah*) [*ankyle, ῥις*, the nose] Marked adhesion between the walls of a nostril.

ankylose (*an'-kıl-ōz*) [*ankyle*] To be, or to become, consolidated or firmly united

ankylosed (*an'-kıl ōzd*) Fixed by ankylosis

ankylosis (*an kıl o' sıs*) [see *ankylose*] Union of the bones forming an articulation, resulting in a stiff joint **a , capsular,** that due to cicatricial shrinking of the joint capsule **a., cartilaginous,** a form observed as a sequel of subacute coxitis in the young, marked with great muscle tension and absence of suppuration, the cartilages may remain intact for a long time, although the shrunken synovial membrane has ceased to secrete **a., central,** that due to causes present within the joint **a , extracapsular,** that due to rigidity of the parts external to the joint **a., false, a., spurious,** that due to the rigidity of surrounding parts **a., generalized,** ankylosis affecting many joints, or a tendency toward it **a , intracapsular,** that due to rigidity of the structures within a joint **a , ligamentous,** when the medium is fibrous **a., muscular,** that due to muscular contraction **a , true, a , bony,** that in which the connecting material is bone

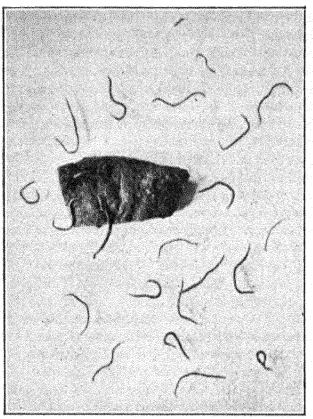
Ankylostoma, Ankylostomum (*an kıl os'-to-mah, -mum*) [*ἀγκυλος* crooked, *στόμα*, a mouth] A genus of nematode worms, one species of which, *A duodenale* (hook-worm), is sometimes found in the human intestine It produces a condition analogous to pernicious anemia See *uncinariasis* **a. anemia,** anemia of those affected with ankylostomiasis

ankylostoma (*an-kıl-os'-to mah*) [*ἀγκύλος*, crooked, *στόμα*, mouth] Lockjaw, trismus

ankylostomiasis (*an-kıl-os-to-mı'-as-ıs*) [see *Ankylostoma*] The morbid condition produced by the presence of the parasite *Ankylostoma duodenale* in the human intestine It is especially prevalent among brickmakers and other workmen in Europe Syn , *dochmiasis, brickmakers' anemia; tunnel anemia, miners cachexia; Egyptian chlorosis, uncinariasis, hookworm disease*

ankylotia (*an-kıl-o'-she-ah*) [*ankyle; οὖς*, ear]. Union of the walls of the meatus auditorius.

ankylotome (*an'-kil-o-tōm*) [*ankyle; τόμη*, a cut]. 1. A knife for operating on tongue-tie. 2. Any curved knife.



ANKYLOSTOMA DUODENALE (LIFE SIZE). SHOWS SOME WORMS ADHERENT TO THE INTESTINAL MUCOSA AND SOME FREE. (*From Jefferys and Maxwell.*)

ankylotomy (*an-kil-ot'-o-me*) [*ankyle; τόμη*, cut.] A cutting operation for the relief of tongue-tie.

ankylourethria (*an-kil-o-ū-re'-thre-ah*). See *ankylurethra*.

ankylurethra, ankylurethria (*an-kil-ū-re'-thrah, -re'-thre-ah*) [*ankyle; urethra*]. Urethral stricture or atresia.

ankyrism (*an'-kir-izm*) [*ἀγκύρισμα*, a hooking]. Articulation or suture by one bone hooking upon another.

ankyroid (*an'-kir-oid*) [*ἄγκυρα*, a hook]. Hook-shaped. **a. cavity,** in the brain, the posterior or descending cornu of the lateral ventricle. **a. process,** the coracoid process.

anlage (*ahn-lahg-eh*) [German]. Pl. *anlagen* or *anlages*. 1. The primitive undifferentiated mass of cells or rudiment of a part in a developing embryo. 2. The place in the embryo where differentiation first appears.

Annam ulcer. See *Anam ulcer.*

Annandale's operation (*an'-an-dāl*) [Thomas *Annandale*, Scotch surgeon, 1838–1907]. 1. For *dislocated cartilages;* incision into the knee-joint and stitching of the dislocated cartilages into their proper position. 2. For *genu valgum;* partial excision of both condyles of the femur. 3. For *nasopharyngeal polypus;* division of the alveolar margin and palatal portions of the upper jaw along their center, from before backward, and perforation of the bony septum of the nose, thus permitting separation of the two portions of the bone and exposure of the polypus. 4. For *varicocele;* a modification of Lee's operation, the veins only being excised, the scrotum being left intact. 5. For *webbed-fingers;* the longitudinal incisions are made along the sides of each finger. **A.'s triangle,** the space bounded in front by the patella, above by the articular surface of the femur, and below by the margin of the tibia.

annatto (*an-at'-o*). See *annotto.*

anneal (*an-ēl*) [Saxon, *annelan*, to heat]. To heat and cool slowly, as gold or other metals.

annectant (*an-ek'-tant*) [*ad*, to; *nectere*, to bind]. Linking or binding together. **a. convolutions,** see *convolution.*

annelid (*an'-el-id*) [*annulus*, a ring; *εἶδος*, form]. (1) Constructed of ring-like segments (2) name of a class of worms.

annelism (*an'-el-izm*) [*anellus*, dim. of *annulus*, a ring]. Possessing a ringed structure.

annexa (*an-neks'-ah*). See *adnexa.*

annexitis (*an-neks-i'-tis*) [*annexa; ἴτις*, inflammation]. Inflammation of the uterine appendages.

annexopexy (*an-neks'-o-peks-e*). See *adnexopexy.*

annidalin (*an-id'-al-in*). Dithymoltriiodide. A substitute for iodoform and aristol, *q. v.*

annotto (*an-ot'-o*) [native American]. A coloring-matter obtained from the pellicles of the seeds of *Bixa orellana*. It is used to color plasters and butter. Syn., *annatto; arnotto.*

annuens (*an'-ū-enz*) [*annuere*, to nod]. **The rectus capitis anticus minor muscle.**

annular (*an'-ū-lar*) [*annulus*, a ring]. Ring-like. **a. cartilage,** the cricoid cartilage. **a. finger,** the ring-finger. **a. ligament,** the ligament surrounding the wrist and the ankle. **a. muscle of Mueller,** the circular fibers of the ciliary muscle. **a. process, a. protuberance,** the pons Varolii. **a. reflex,** a ring-like reflection sometimes seen with the ophthalmoscope around the macula.

annulate (*an'-ū-lāt*). Characterized by, made up of, or surrounded by rings.

annulorrhaphy (*an-ū-lor'-af-e*) [*annulus*, ring; *ῥαφή*, suture]. Closure of a hernial ring or sac by suture.

annulose (*an'-ū-lōs*) [*annulus*, a ring]. Possessing rings.

annulus (*an'-ū-lus*) [see *annular*]. A ring-shaped or circular opening. **a. abdominalis,** the external or internal abdominal ring. **a. abdominis,** the inguinal ring. **a. ciliaris,** the boundary between the iris and the choroid. **a., cruralis, femoralis,** femoral ring (O. T. crural ring). **a., fibrocartilagineus,** fibrocartilaginous ring. **a. fibrosus.** 1. The external part of the intervertebral discs. 2. Firm connective tissue containing elastic fibers surrounding the auriculoventricular openings of the heart. Syn., *annulus fibrosus atrioventricularis.* 3. The circular fibrous attachment of the tympanic membrane to the tympanic plate. **a., hæmorrhoidalis,** hemorrhoidal ring. **a., inguinalis abdominalis,** abdominal inguinal ring (O. T. internal abdominal ring). **a. inguinalis cutaneus,** the external abdominal ring. **a., inguinalis subcutaneus,** subcutaneous inguinal ring (O. T. external abdominal ring). **a., iridis major,** greater ring of iris. **a., iridis minor,** lesser ring of iris. **a. membranæ tympani,** an incomplete bony ring that forms the fetal auditory process of the temporal bone. **a. migrans,** a disease of the tongue marked by crescentic bands of a light-colored rash which spread over its dorsal surface and sometimes over the sides and under surface. Syn., *annulus errans.* **a. osseus,** the tympanic plate. **a. ovalis,** the rounded or oval margin of the foramen ovale. **a., tendineus communis (Zinni),** common tendinous ring of Zinn. **a. tracheæ,** a tracheal ring. **a., tympanicus,** tympanic ring. **a. umbilicus,** the umbilical ring. **a., urethralis,** urethral ring. **a. ventriculi,** the pylorus.

AnOC. Abbreviation for anodal opening contraction.

anocathartic (*an-o-kath-ar'-tik*) [*ἄνω*, upward; *καθαρτικός*, purging]. Emetic.

anocavernosus (*an-o-kav-ur-no'-sus*). See *bulbocavernosus.*

anocelia, anocœlia (*an-o-se'-le-ah*) [ἄνω, upward; κοιλία, a cavity]. The thorax.

anoceliadelphous (*an-o-se-le-ah-del'-fus*) [ἄνω, upward; κοιλία, a cavity; ἀδελφος, a brother]. United by the thorax or upper part of the abdomen.

anochilon, anocheilon, anochilos (*an-o-ki'-lon, -los*) [ἄνω, upward; χεῖλος, a lip]. 1. The upper lip. 2. An individual having a large upper lip.

anochiloschisis, anocheiloschisis (*an-o-ki-los'-kis-is*) [ἄνω, upward; χεῖλος, a lip; σχίζειν, to split]. An operation of splitting the upper lip for reducing its size.

anochlesia (*an-ok-le-ze-ah*) [ἀν, priv.; ὀχλήσις, disturbance]. 1. Mental quietude. 2. Catalepsy.

anoci-association (*ah-no'-se-as-o-se-a'-shun*). The condition in which pain, fear, shock, and neuroses are blocked, and so excluded, in surgical cases. See *noci-association.*

anociation (*ah-no-se-a'-shun*). Anoci-association.

anocithesia (*ah no-sith-e'-ze-ah*). Anoci-association.

anococcygeal (*an-o-kok-siy'-e-al*) [*anus*, the fundament, κόκκυξ, the coccyx]. Pertaining to the anus and the coccyx. **a. body,** the structures lying between the anus and the coccyx. **a. ligament,** a ligament that connects the tip of the coccyx with the external sphincter ani muscle.

anodal (*an'-o-dal*) [ἀνά, up; ὁδός, a way]. Relating to the anode; electropositive. **a. closure,** the closure of an electric circuit with the anode placed in relation to the muscle or nerve which is to be affected. **a. closure clonus, a. closure contraction,** see *contraction, anodal closure* **a. diffusion,** same as *cataphoresis.* **a. duration,** the duration of an anodal closure contraction. **a. opening contraction,** see *contraction.*

anode (*an'-ōd*) [see *anodal*]. The positive pole of a galvanic battery. **a., soluble,** Sprague's term for an anode formed of the metal which is deposited.

anodermous (*an-o-der'-mus*) [ἀ, priv.; δέρμα, the skin]. Without the appearance of an epidermis

anodic (*an-od'-ik*) [ἄνω, upward; ὁδος, way]. 1. In biology, applied to the upper edges of leaves arranged in ascending spirals. 2. Ascending 3. Anodal

anodinia (*an-o-din'-e-ah*) [ἀ, priv ; ὠδίς, the pain of childbirth]. Absence of labor-pains.

anodinous (*an-od'-in-us*). Without labor pains.

anodmia (*an-od'-me-ah*) [ἀν, priv.; ὀδμή, smell]. Absence of the sense of smell.

anodont, anodontous, anodous (*an'-o-dont, an-o-dont'-us, an'-od-us*) [ἀν, priv.; ὀδούς, a tooth]. Toothless.

anodontia (*an-o-don'-she-ah*) [ἀν, priv.; ὀδεύς, tooth]. Absence of the teeth.

anodyne (*an'-o-din*) [ἀν, priv ; ὀδύνη, pain]. 1. A medicine that gives relief from pain 2. Relieving pain. **a., Hoffman's,** compound spirit of ether.

anodynia (*an-o-din'-e-ah*) [see *anodyne*]. 1. Freedom from pain. 2. Loss of sensation. Cf. *anodinia.*

anœdochium (*an-e-o-do'-ke-um*) [ἄνοος, without understanding; δοχός, a receptacle] A lunatic asylum.

anoesia (*an-o-e'-se-ah*) [ἀνοησία, a want of sense]. Want of understanding.

anogon (*an'-o-gon*). The mercurous salt of diiodoparaphenolsulphonic acid. It is said to contain nearly 50 % of mercury and 30 % of iodine. It is insoluble in the ordinary solvents, and is used in the treatment of syphilis.

anoia (*an-oi'-ah*) [ἄνοια, idiocy]. Synonym of *idiocy.*

anomalism (*an-om'-al-izm*) [ἀνώμαλος, strange] Deviation from the normal order or standard.

anomalology (*an-om-al-ol'-o-je*) [ἀνώμαλος, strange; λόγος, science]. The science of anomalies.

anomalonomy (*an-om-al-on'-o-me*) [ἀνωμαλία, irregularity; νόμος, a law]. The science of the laws governing anomalism.

anomaloscope (*an-om'-al-o-skōp*) [ἀνομαλος, irregular; σκοπεῖν, to examine]. An instrument used for the detection of color blindness.

anomalotrophy (*an-om-al-ot'-ro-fe*). An anomaly of nutrition.

anomalous (*an-om'-al-us*) [see *anomaly*]. Irregular; characterized by deviation from the common or normal order.

anomalus (*an-om'-al-us*) [ἀνώμαλος, not ordinary] A muscle or muscular slip sometimes occurring beneath the levator labii superioris alæque nasi.

anomaly (*an-om'-al-e*) [ἀνωμαλία, irregularity] A marked deviation from the normal; an abnormal thing or occurrence.

anomia (*an-o'-me-ah*). 1. See *anomaly.* 2. [ἀ, priv.; ὄνομα, name]. Loss of ability to name objects or to recognize names.

anomous (*an-o'-mus*) [ἀ, priv., ὦμος, the shoulder]. Without shoulders

Anona (*an-o'-nah*) [Malay, *menona*]. A genus of shrubs and trees of the order *Anonaceæ*, native of tropical America. *A. ambotay* is a native of French Guiana. The bark is applied to malignant ulcers. *A. glabra* is a West Indian species. The juice of the unripe fruit is applied to ulcers. *A. muricata*, sour-sop, rough anona, is an American tree, but cultivated in all tropical countries, where the ripe fruit is a favorite food and used in a cooling drink for fevers The astringent unripe fruit is used in intestinal atony. The bark is astringent and irritant; the root-bark is used in cases of disease resulting from ingestion of poisonous fish, the leaf is anthelmintic and externally a suppurant. The edible fruit of *A. obtusifolia* is used in South America and in the West Indies by the natives as a narcotic *A. reticulata*, custard-apple, is a West Indian tree, but cultivated throughout the tropics. The unripe dried fruit and seeds are used as an intestinal astringent; the kernels of the seeds are very poisonous; the leaves are anthelmintic. *A. spinescens*, of Brazil; the seeds are used to poison vermin; the fruit as a poultice. *A. squamosa*, sweet-sop, bullock's-heart, is an American tree cultivated throughout the tropics for its fruit, which is used medicinally as is *A. muricata.* The seeds are used to destroy insects; the bark is employed by the Malays and Chinese as a tonic.

anonychia (*an-o-nik'-e-ah*) [ἀν, priv.; ὄνυξ, nail]. Absence of the nails.

anonyma (*an-on'-im-ah*) [ἀν, priv.; ὄνυμα, name]. The innominate artery.

anonymos (*an-on'-im-us*) [see *anonyma*] The cricoid cartilage.

anonymous (*an-on'-im-us*) [see *anonyma*]. Nameless. **a. bone,** see *innominatum.*

anoopsia (*an-o-op'-se-ah*) [ἀνώ, upward; ὄψις, vision]. Strabismus in which the eye is turned upward.

anoperineal (*a-no-per-in-e'-al*). Relating to the anus and the perineum.

Anopheles (*an-of'-el-ēz*) [ἀνωφελής, harmful]. A genus of dipterous insects (mosquitoes), belonging to the family *Culicidæ*. **A. christophersé,** of India, harbors sporozoits, and in districts where present the endemic index of malaria varies from 40 to 72 %. **A. maculipennis,** is the common form of northern and central Europe and America, and the common agent in the transmission of the malaria parasite. Syn., *Anopheles quadrimaculatus*. **A. punctipennis,** a species which is believed not to transmit the malarial germ. **A. rossii,** the most widely distributed species in India, breeding in foul water; does not carry the parasite of benign nor of malignant tertian fever, and in Calcutta, where this is the prevalent species, the endemic index of malaria is zero.

anophelicide (*an-of-el'-is-īd*) [*anopheles; cædere* to kill]. An agent which is destructive to anopheles.

anophelifuge (*an-of-el'-if-ūj*) [*anopheles; fugare*, to put to flight]. An agent which prevents the bite or attack of anopheles.

anophelism (*an-of'-el-izm*). Infestation of any region, with anopheles.

anophoria (*an-o-fo'-re-ah*) [ἀνώ, upward; φέρειν, to bear]. See *anotropia*.

anophthalmia (*an-of-thal'-me-ah*) [ἀν, priv.; ὀφθαλμός, eye]. Congenital absence of the eyes. **a. cyclopica,** a congenital malformation in which the eye-socket is very ill-developed and the orbit rudimentary or altogether absent

anophthalmos (*an-off-thal'-mus*)[ἀν, priv.; ὀφθαλμός, eye]. 1. Congenital absence of the eyes. 2. A person born without eyes.

anophthalmus (*an-of-thal'-mus*). See *anophthalmos*.

anopia (*an-o'-pe-ah*) [ἀν, priv.; ὤψ, the eye]. Absence of sight, especially that due to defect of the eyes.

anopsia (*an-op'-se-ah*) [ἀν, priv.; ὄψις vision]. See *amblyopia*.

anopubic (*a-no-pu'-bik*). Relating to the anus and the pubes.

anorchia (*an-or'-ke-ah*). See *anorchism*.

anorchism (*an'-or-kizm*) [ἀν, priv.; ὄρχις, the testicle]. Absence of the testicles.

anorchous (*an-or'-kus*) [ἀν, priv.; ὄρχις, the testicle]. Without testicles.

anorchus (*an-or'-kus*) [ἀν, priv.; ὄρχις, the testicle]. A person in whom the testicles are absent or not descended.

anorectal (*a-no-rek'-tal*). Pertaining to the anus and the rectum.

anoretic, anorectous (*an-o-rek'-tik, an-o-rek'-tus*) [ἀν, priv.; ὄρεξις, appetite]. Without an appetite.

anorexia (*an-or-ek'-se-ah*) [ἀν, priv.; ὄρεξις, appetite]. Absence of appetite. **a. nervosa,** an hysterical affection occurring chiefly in young neurotic females, and characterized by a great aversion to food.

anoria (*an-or'-e-ah*) [ἀνωρία, untimeliness]. Immaturity.

anormal (*ah-nor'-mal*) [ἀν, priv.; *norma*, a rule]. Abnormal.

anorrhorrhea (*an-or-or-e'-ah*) [ἀν, priv.; ὀρρός, serum; ῥοία, a flow]. A diminished or defective secretion of serous substance.

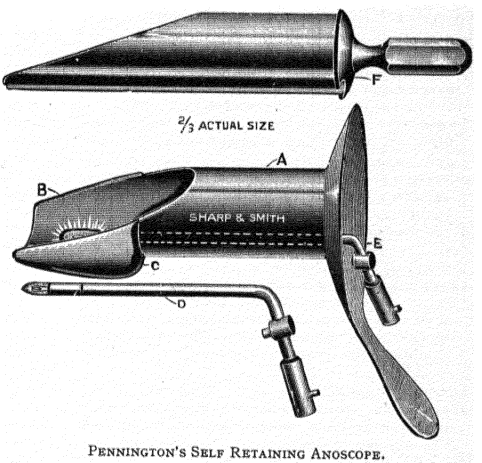
anorthography (*an-or-thog'-ra-fe*) [ἀν, priv.; ὀρθός, straight; γράφειν, to write]. Incapacity to write correctly; motor agraphia.

anorthopia (*an-or-tho'-pe-ah*) [ἀν, priv.; ὀρθός, straight; ὄψις, vision]. 1. A defect in vision in which straight lines do not seem straight, and parallelism or symmetry is not properly perceived. 2. Squinting; obliquity of vision

anorthoscope (*an-or-tho'-skōp*) [ἀν, priv.; ὀρθός, straight; σκοπεῖν, to look]. An apparatus for connecting in one perfect visual image disconnected and incomplete pictures.

anorthosis (*an-or-tho'-sis*) [ἀν, priv.; ὄρθωσις, a making straight]. Absence or defect of erectility.

anoscope (*a'-no-skōp*) [*anus;* σκοπεῖν, to look]. An instrument for examining the rectum.



PENNINGTON'S SELF RETAINING ANOSCOPE.

anoscopy (*an-os'-kop-e*). Inspection of the anus by means of the anoscope.

anosia (*an-o'-se-ah*) [ἀ, priv.; νόσος, disease]. Without disease; normal health.

anosmabic (*an-ōz-mab'-ik*). See *anosmatic*.

anosmatic (*an-ōz-mat'-ik*) [ἀν, priv.; ὀσμή, smell]. 1. With small olfactory lobes. 2. Not having a keen sense of smell.

anosmia (*an-ōz'-me-ah*) [ἀν, priv.; ὀσμή, smell]. Absence of the sense of smell. **a., afferent,** that due to the loss of the conductivity of the olfactory nerves. **a., central,** that due to cerebral disease. **a., organic,** that due to disease of the nasal pituitary membrane. **a., peripheral,** that due to disease of the peripheral ends of the olfactory nerves.

anosmic, anosmous (*an-ōz'-mik, -mus*). 1. Without odor. 2. Having no sense of smell.

anosodiaphoria (*an-o-so-di-af-or'-e-ah*) [ἀ, priv.; νόσος, disease; διαφορά, difference]. Indifference (real or pretended) with regard to the presence of disease, especially of paralysis.

anosognosia (*an-o-sog-no'-ze-ah*) [ἀ, priv.; νόσος, disease; γνῶσις, knowledge]. Ignorance (real or pretended) of the presence of disease, especially of paralysis; the opposite of pathodixia.

anosphrasia (*an-os-fra'-ze-ah*). Defect or absence of the sense of smell.

anosphresis (*an-os-fre'-sis*) [ἀν, priv.; ὄσφρησις, odor]. Same as *anosphrasia.*

anospinal (*a-no-spi'-nal*) [*anus; spine*]. Relating to the anus and the spinal cord. **a. center,** a center that controls the anal sphincters. It is situated in the lumbar portion of the spinal cord.

anostomosis (*an-os-tom-o'-sis*). See *anastomosis.*

anostosis (*an-os-to'-sis*) [ἀν, priv.; ὀστέον, bone]. Defective development of bone.

anotia (*an-o'-she-ah*) [see *anotous*]. Congenital absence of the ears.

anotous (*an-o'-tus*) [ἀ, priv.; οὖς, ear]. Devoid of ears; earless.

anotropia (*an-o-tro'-pe-ah*) [ἄνω, upward; τρέπειν, to turn]. A condition in which the visual axes tend to rise above the object looked at.

anotus (*an-o'-tus*) [ἀν, priv.; οὖς, the ear] Destitute of ears.

anovarism (*an-o'-var-izm*) [ἀ, priv; *ovary*]. Absence of ovaries.

anovarthyroid serum (*an-o-var-thi'-royd*) [ἀν, priv.; *ovum; thyroid*]. A serum from sheep whose ovaries and thyroid gland have been removed. It has been used in osteomalacia.

anovesical (*a-no-ves'-ik-al*) [*anus; vesica,* the bladder]. Pertaining conjointly to the anus and urinary bladder.

anoxemia anoxæmia, anoxyemia (*an-oks-e'-me-ah, an-oks-e-e'-me-ah*) [ἀν, priv.; *oxygen;* αἷμα, blood]. 1. A lack of oxygen in the blood. 2. An abnormal condition due to the breathing of an insufficient amount of oxygen; mountain sickness; balloon sickness.

anoxoluin, anoxolyin (*an-oks-ol'-ū-in, -i-in*) [ἀν, priv.; ὀξύς, sharp; λύειν, to dissolve] The substance opposed to oxolyin, which, according to Le Conte, exists with it in fibrin, albumin, globulin, and casein, and which is not soluble in glacial acetic acid.

anoxybiosis (*an-oks-e-bi-o'-sis*) Anaerobiosis

anoxycausis (*an-oks-e-kaw'-sis*) [ἀν, priv.; ὀξύς, sharp; καῦσις, a burning]. Combustion without the presence of oxygen

anozol (*an'-o-zol*). A combination of iodoform and thymol; deodorous iodoform.

ansa (*an'-sah*) [L., "a handle"]. A loop. **a. atlantis,** the uppermost cervical ansa **a. capitis,** the zygomatic arch. **a., cervical,** one of the intercommunicating branches of the anterior cervical nerves. **a., coccygeal.** See *A. sacralis.* **a., galvanocaustic,** the wire loop of a galvanic cautery. Syn., *ligatura candens* **a., Haller's,** the loop formed by the nerve joining the facial and glossopharyngeal nerves. **a., Henle's,** a part of the uriniferous tubule. **a. hypoglossi,** a loop formed at the side of the neck by the junction of the descendens noni nerve, with branches of the second and third cervical nerves. **a., intergenicularis,** fibers connecting the geniculate bodies. **a., intestinalis,** any loop of the small intestine. **a. lenticularis,** a bundle of fibers proceeding from the neural laminæ between the divisions of the lenticular nucleus. Syn., *ansa lentiformis; lenticular loop.* **a. lumbalis, a. lumbaris,** one of the connecting ramifications between the branches of the lumbar nerves. **a., peduncularis,** the ventral stalk of the thalamus. **a. sacralis,** loop joining the ganglion impar with the sympathetic trunks of the two sides. **a., sternal,** the interclavicular notch. **a. subclavialis, a., subclavian,** see *a. of Vieussens.* **a. supramaxillaris,** one of communication between the ventral and dorsal superior dental nerves. **a. of Vieussens,** a loop extending from the third cervical ganglion and surrounding the subclavian artery. **a. of Wrisberg,** the nerve joining the right great splanchnic and right pneumogastric nerves.

Anschuetz's chloroform. See *chloroform.*

anserine (*an'-ser-ēn*) [*anser,* a goose]. Resembling a goose. **a. disease,** a wasting of the muscles of the hands, rendering the tendons unduly prominent, and suggesting the appearance of a goose's foot. **a. skin,** goose-skin.

ansiform (*an'-si-form*) [*ansa,* a handle; *forma,* shape]. Loop-shaped.

Anstie's rule (*an'-ste*) [Francis Edmund *Anstie,* English physician, 1833–1874]. No healthy man can take without injury more than the equivalent of 1½ ounces of absolute alcohol *per diem.* **A.'s test for alcohol in urine,** a mixture of potassium bichromate 1, and strong sulphuric acid 300 is added drop by drop to the urine; an emerald green color denotes the presence of a toxic amount of alcohol.

ant-, anti- (*ant-,* or *an'-te*) [ἀντί, against]. Prefixes to compound words signifying opposed to, against, counteracting, etc.

antacid (*ant-as'-id*) [*anti,* against; *acidus,* acid]. 1. Neutralizing acidity. 2. A substance counteracting or neutralizing acidity. An alkali

antacidin (*ant-as'-id-in*). Saccharate of lime

antacrid (*ant-ak'-rid*) [*anti-; acer,* sharp]. Correcting acridity in the secretions. **a. tincture,** see *guaiac mixture, Fenner's.*

antagonism (*an-tag'-on-izm*) [see *antagonist*]. Opposition; opposed action, as of two sets of muscles or of two remedial agents.

antagonist (*an-tag'-o-nist*) [ἀνταγωνιστής, counteracting]. A term applied to a drug that neutralizes the therapeutic effects of another. In anatomy, a muscle that acts in opposition to another. **a., associated,** a name given to that muscle of a healthy eye that turns the globe in the same direction as the affected muscle of the opposite eye would, if normal, turn the eye to which it belongs.

antagonistic (*an-tag-o-nis'-tik*) [see *antagonist*]. Opposing.

antagonize (*an-tag'-on-īz*) [see *antagonist*]. To neutralize

antalgesic (*ant-al-je'-sik*) [see *antalgic*]. Antalgic.

antalgic (*ant-al'-jik*) [*anti-;* ἄλγος, pain]. 1. Relieving pain. 2. A remedy that relieves pain.

antalkaline (*ant-al'-kal-in*) [*anti-; alkali*]. 1. Neutralizing alkalies. 2. An agent neutralizing alkalies, as acids.

antanacathartic (*ant-an-ah-kath-ar'-tik*) [*anti-;* ἀνά, up; κάθαρσις, purgation]. 1. Checking expectoration. 2. An agent which checks expectoration.

antanemic (*ant-an-e'-mik*) [*anti-; anemic*]. 1. Correcting anemia. 2. A remedy efficient in anemia.

antaphrodisiac (*ant-af-ro-diz'-e-ak*) [*ant-; -ἀφροδίσια,* sexual desire]. 1. Lessening the venereal desires. 2. An agent that lessens the venereal impulse; an anaphrodisiac.

antaphroditic (*ant-af-ro-dit'-ik*)]. See *antaphrodisiac.*

antapoplectic (*ant-ap-o-plek'-tik*) [*anti-;* ἀποπληξία, apoplexy]. Efficient in preventing or treating apoplexy.

antarthritic (*ant-ar-thrit'-ik*) [*anti-;* ἀρθριτικός, gouty]. 1. Relieving gout. 2. A medicine for the relief of gout.

antasphyctic (*ant-as-fik'-tik*) [*anti-*; ἄσφυκτος, pulseless]. 1. Efficient in preventing asphyxia. 2. An agent efficacious in preventing asphyxia.

antasthenic (*ant-as-then'-ik*) [*anti-*; ἀσθένεια, weakness]. Tending to correct debility and restore the strength.

antasthmatic (*ant-az-mat'-ik*) [*anti-*; ἆσθμα, short-drawn breath]. 1. Relieving asthma. 2. A medicine serving for the relief of asthma.

antatrophic (*ant-at-rof'-ik*) [*ant-*; ἀτροφία, wasting]. 1. Preventing atrophy. 2. A drug that will prevent wasting or atrophy.

antebrachial (*an-te-bra'-ke-al*). Pertaining to the forearm.

antebrachium (*an-te-bra'-ke-um*). See *antibrachium*.

antecardium (*an-te-kar'-de-um*) [*anti-*; καρδία, the heart] The scrobiculus cordis, or pit of the stomach; the infrasternal depression; the precordium.

ante cibum (*ante si'-bum*). Latin for "before a meal."

antecornu (*an-te-kor'-nu*). See *precornu*.

antecubital (*an-te-ku'-bit-al*) [*ante*, before; *cubitum*, the elbow]. Situated in front of the elbow.

antecurvature (*an-te-kur'-va-tūr*) [*ante*, forward; *curvatus*, bent]. A forward curvature.

antedisplacement (*an-te-dis-plās'-ment*) [*ante*, forward; O. F., *desplacer*, to put out of place]. Forward displacement of a part or organ.

antefebrile (*an-te-feb-ril*) [*ante*, before; *febris*, fever]. The period before a fever.

antefixatio uteri (*an-te-fiks-a'-she-o u'-ter-i*). The operative suturing of the uterus in retroflexion.

anteflect (*an'-te-flekt*) (See *anteflexion*]. To bend forward.

anteflexion (*an-te-flek'-shun*) [*ante*, before, *flectere*, to bend]. A bending forward. **a. of uterus**, a condition in which the fundus of the uterus is bent forward

antehelix (*an-te-he'-liks*). See *anthelix*.

antelocation (*an-te-lo-ka -shun*) [*ante*, before; *locus*, a place]. The forward displacement of an organ or viscus.

antemetic (*ant-em-et'-ik*). See *antiemetic*.

antemortem (*an'-te-mor'-tem*) [L.] Before death.

antenarial (*an-te-na'-re-al*) [*ante*, before; *nares*, the nostrils] Situated in front of the nostrils

antenatal (*an-te-na'-tal*) [*ante*, before; *natus*, born]. Occurring or existing before birth.

anteneasmum, anteneasmus (*an-ten-e-az'-mum, -mus*). P. Zacchias' term for a form of dementia marked by restlessness and a suicidal tendency.

ante partum (*an'-te par'-tum*) [L.]. Before delivery.

antepileptic (*ant-ep-il-ep'-tik*) [*anti-*; ἐπίληψις, epilepsy]. Relieving epilepsy.

anteprostate (*an-te-pros'-tāt*) [See *anteprostatic*]. Cowper's glands.

anteprostatic (*an-te-pros-tat'-ik*) [*ante*, before; προστάτης, one who stands before]. Situated before the prostate. **a. glands.** 1. Cowper's glands. 2. Certain small accessory glands sometimes found between Cowper's gland and the prostate.

antepyretic (*an-te-pi-ret'-ik*) [*ante*; πυρετός, fever]. Prior to the development of fever.

antereisis (*ant-er-i'-sis*) [ἀντέρεισις, resistance]. The resistance opposed by a dislocation during its reduction.

anterethic (*an-ter-eth'-ik*) [*anti-*; ἐρεθισμός, irritation]. Soothing; allaying irritation.

anterior (*an-te'-re-or*) [L., "before"]. Situated before or in front of; pertaining to the part or organ situated toward the ventral aspect of the body. **a. poliomyelitis**, inflammation of the anterior horns of the spinal cord, giving rise to a characteristic paralysis, common in children. **a. rotation**, the forward turning of the presenting part in labor.

antero- (*an'-te-ro-*) [*anterior*, before]. A prefix signifying position in front.

anterodorsal (*an-te-ro-dor'-sal*) [*antero-*; *dorsum*, the back]. Pertaining to the ventral aspect of the dorsum.

antero-external (*an-te-ro-eks-ter'-nal*). Situated in front to the outer side.

anterograde (*an'-te-ro-grād*) [*antero-*; *gredi*, to go]. Proceeding forwards.

anteroinferior (*an-te-ro-in-fe'-re-or*) [*antero-*; *inferior*, lower]. Situated in front and below.

anterointerior (*an-te-ro-in-te'-re-or*). Located ventrally and internally.

anterointernal (*an-te-ro-in-tur'-nal*). Situated in front to the inner side.

anterolateral (*an-te-ro-lat'-er-al*) [*antero-*; *latus*, a side]. In front and to or on one side; from the front to one side.

anteromedian (*an-te-ro-me'-de-an*) [*antero-*; *medius*, the middle]. In front and toward the middle.

anteroparietal (*an-te-ro-par-i'-et-al*) [*antero-*; *parietal*]. Anterior and also parietal. **a. area**, the anterior part of the parietal area of the cranium.

anteroposterior (*an-te-ro-pos-te'-re-or*) [*antero-*; *posterior*, backward]. Extending from before backward.

anterosuperior (*an-te-ro-su-pe'-re-or*) [*antero-*; *superior*, upper] Situated in front and above.

anterotic (*ant-e-rot'-ik*) [*anti-*; ἐρωτικός, pertaining to love]. Anaphrodisiac

anteversion (*an-te-ver'-shun*) [*ante*, forward; *vertere*, to turn]. A turning forward. **a. of uterus**, a tilting forward of the uterus.

antevert (*an-te-vert'*) [*ante*, before; *vertere*, to turn]. To turn forward.

anthectic (*an-thek'-tik*) [*anti-*; ἑκτικός, hectic]. 1. Efficacious against tuberculosis. 2. An agent or remedy efficient against tuberculosis.

anthelicine (*an-thel'-is-in*) [ἀνθέλιξ, the inner curvature of the ear]. Pertaining to the anthelix.

anthelix (*an'-the-liks*) [ἀνθέλιξ, the inner curvature of the ear]. The ridge surrounding the concha of the external ear posteriorly.

anthelmintic (*an-thel-min'-tik*) [*anti-*; ἕλμινς, a worm]. 1. Efficacious against worms. 2. A vermicide.

anthema (*an'-the-mah*) [ἀνθεῖν, to bloom]. An exanthem; a skin eruption.

anthemis (*an'-them-is*) [ἄνθεμις, a flower]. Camomile. The flower-heads of *A. nobilis*, the properties of which are due to a volatile oil, a camphor, and a bitter principle. It is useful in coughs and spasmodic infantile complaints, and is an excellent stomachic tonic. Infusion of 4 dr. to 1 pint, given in doses of 1–2 oz. (30–60 Cc.). **anthemidis, extractum** (B. P.). Dose 2–10 gr. (0.13–0.65 Gm.). **anthemidis, infusum** (B. P.). Dose 1–4 oz. (30–120 Cc.). **anthemidis, oleum**, the volatile oil of camomile Dose 2–10 min. (0.12–0.6 Cc.).

anthemorrhagic (*ant-hem-or-raj'-ik*) [*anti-*; αἷμα, blood; ῥαγία, a bursting]. Checking or preventing hemorrhage.

anther (*an'-ther*) [ἀνθηρός, in full bloom]. In biology, the male sexual organ in plants; the summit and essential part of the stamen. It contains the pollen or fecundating substance of the flower.

antherpetic (*ant-her-pet'-ik*) [*anti-; herpes*]. 1. Efficient against herpes. 2. An efficacious remedy for herpes.

anthocephalous, anthocephalus (*an-tho-sef'-al-us*) [*ἄνθος*, a flower; *κεφαλή*, a head]. Having a flower-shaped head, *e. g.*, *tænia anthocephala*

anthocyanin (*an-tho-si'-an-in*). A pigment occurring in beets

anthocyaninemia (*an-tho-si-an-in-e'-me-ah*) [*anthocyanin; αἷμα*, blood] The presence of anthocyanin in the blood serum.

anthocyaninuria (*an-tho-si-an-in-ū'-re-ah*) [*anthocyanin, οὖρον*, urine] The presence of anthocyanin in the urine when voided.

Anthony's fire, St. See *erysipelas.*

anthorism, anthorisma (*an'-thor-izm, an-thor-iz'-mah*) [*anti-; ὁρισμα*, a boundary]. A diffuse swelling

anthracemia (*an-thras-e'-me-ah*) [*anthrax; αἷμα*, blood]. 1. Woolsorter's disease; splenic fever of animals, a disease due to the presence in the blood of *Bacillus anthracis*. 2. Asphyxia due to carbon monoxide poisoning.

anthracene (*an'-thra-sēn*) [*anthrax*], $C_{14}H_{10}$ A hydrocarbon formed from many carbon compounds when they are exposed to a high heat; also from coal-tar.

anthracia (*an-thra'-se-ah*) [*anthrax*]. Any disease characterized by the formation of carbuncles. **a. pestis,** the plague **a. rubula,** synonym of *frambesia.*

anthracic (*an'-thras-ik*) [*anthrax*] Pertaining to or of the nature of anthrax

anthracin (*an'-thras-in*) [*anthrax*]. A toxic ptomaine derived from pure cultures of the bacillus of anthrax.

anthracina (*an-thras-e'-nah*). Melanotic carcinoma

anthracite (*an'-thras-īt*) [*ἄνθραξ*, a coal]. A variety of mineral coal containing but little hydrogen, and therefore burning almost without flame

anthracnosis (*an-thrak-no'-sis*) [*ἄνθραξ*, a coal; *νόσος*, disease] Black rot, a fungus disease of vines, caused by the *Phoma uvicola*, or *Sphaceloma ampelinum.*

anthracoid (*an'-thrak-oid*) [*anthrax; εἶδος*, likeness]. Resembling carbon, anthrax, or the gem carbuncle.

anthracolemus, anthracolœmus (*an-thra-kol-e'-mus*) [*anthrax; λοιμός*, a plague]. Contagious anthrax.

anthracoma (*an-thrak-o'-mah*) [*anthrax*] A carbuncle.

anthracometer (*an-thrak-om'-et-er*) [*anthrax; μέτρον*, a measure] An instrument for estimating the amount of carbon dioxide in the air.

anthracometry (*an-thrak-om'-et-re*) [*ἄνθραξ*, carbon; *μέτρον*, a measure] The determination of the amount of carbon dioxide in air.

anthraconecrosis (*an-thrak-o-ne-kro'-sis*) [*anthrax; νέκρωσις*, death]. The necrotic transformation of a tissue into a black mass, as in dry gangrene.

anthracopestis (*an-thrak-o-pes'-tis*) [*anthrax, pestis*, a plague] Malignant anthrax.

anthracophlyctis (*an-thrak-o-flik'-tis*) [*anthrax; φλυκτίς*, a pustule] The same as *anthracopestis*

anthracosis (*an-thrak-o'-sis*) [*anthrax; νόσος*, disease]. 1. "Miners' lung." A diseased condition of the lung produced by the inhalation of coal-dust. 2 A malignant or corroding ulcer; a carbuncle.

anthraflavon (*an-thra-flav'-on*) [*anthracene; flavus*, yellow], $C_{14}H_8O_4$ A substance acting as a dibasic acid, forming yellow needles subliming without fusion at temperatures above 300° C.

anthragallol (*an-thra-gal'-ol*), $C_{14}H_8O_5$. A reaction-product of benzoic, gallic, and sulphuric acids. It occurs as a dark-brown paste or orange-red acicular crystals, soluble in alcohol; melts at 310° C. Sublimes at 290° C. It is used in dyeing. Syn., *trioxyanthraquinone.*

anthraglucorhamnin (*an-thra-gloo-ko-ram'-nin*). A glucoside found in *Rhamnus frangula*, used as a cathartic.

anthraglucorhein (*an-thra-gloo-ko'-re-in*). A glucoside found in rhubarb, used as a cathartic.

anthrapurpurin (*an-thra-pur'-pu-rin*) [*anthracene; purpurin*], $C_{14}H_8O_5$. A derivative of anthraflavic acid and an isomer of purpurin and of flavopurpurin, almost identical with the latter; it forms orange-colored needles **a. acetate, a. diacetate,** a fine yellow, tasteless powder, freely soluble in glacial acetic acid and xylol, sparingly so in alcohol, insoluble in water. It is used as an aperient and laxative (it colors the urine red). Dose 7½ gr. (0.5 Gm.). Syn., *purgatin; purgatol.*

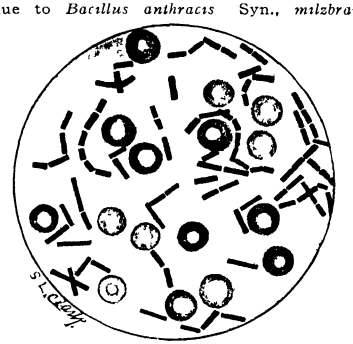
anthraquinolin (*an-thra-kwin'-ol-in*) [*anthracene; quina*, bark]. $C_{17}H_{11}N$ A crystalline substance melting at 170° C., boiling at 446° C.; its solutions exhibit an intensely blue fluorescence.

anthraquinone (*an-thra-kwin'-on*) [*anthracene; quinone*], $C_{14}H_8O_2$. A substance produced by oxidizing anthracene with HNO_3. It sublimes in yellow needles, melting at 277° C., and is soluble in hot benzene and HNO_3

anthrarobin (*an-thra-ro'-bin*), $C_{14}H_{10}O_3$ A derivative of alizarin, similar to chrysarobin It is a yellowish-white powder, insoluble in water, but soluble in alcohol and dilute alkaline solutions It is useful in psoriasis, herpes, pityriasis versicolor

anthrasol (*an'-thra-sol*) A proprietary coal-tar preparation; used in the form of an ointment for pruritus and for skin affections

anthrax (*an'-thraks*) [*ἄνθραξ*, a coal or a carbuncle] 1. A carbuncle. 2 An acute infectious disease due to *Bacillus anthracis* Syn., *milzbrand,*



BACILLUS ANTHRACIS IN BLOOD OF RABBIT. (*Coplin.*

charbon; woolsorter's disease; splenic fever; splenic apoplexy; Siberian cattle plague; plaga ignis; acacanthrax; mal de Chabert; abscessus gangrœnescens; abscessus gangrœnosus. **a., apoplectic,** a very acute and virulent form of malignant anthrax coming on without premonitory symptoms and chiefly affecting horses and cattle. **a., contagious,** malignant anthrax **a., hemorrhoidal,** a contagious form affecting the rectum of animals and marked by evacua-

tions of dark-colored blood. **a., malignant,** see *anthrax* (*2*). **a., pulmonary,** gangrene of the lungs. **a., symptomatic,** see *black-leg.*

anthrobroma (*an-thro-bro'-mah*). A food beverage suggested for use in cases of nervous and mental exhaustion.

anthropo- (*an-thro-po-*) [*ἄνθρωπος*, a man; a human being]. A prefix signifying relating to man or to the human race.

anthropogenesis (*an-thro-po-jen'-es-is*) [*anthropo-; γένεσις*, generation]. The development of man, as a race (*phylogenesis*) and as an individual (*ontogenesis*).

anthropogeny (*an-thro-poj'-en-e*) [*anthropo-; γεννᾶν*, to produce]. The study or science of the descent of man.

anthropoglot (*an'-thro-po-glot*) [*anthropo-; γλῶσσα*, the tongue]. Human-tongued, as a parrot.

anthropography (*an-thro-pog'-ra-fe*) [*anthropo-; γράφειν*, to write]. A treatise upon the human structure or organism.

anthropoid (*an'-thro-poid*) [*anthropo-; εἶδος*, form] Man-like.

Anthropoidea (*an-thro-po-id'-e-ah*) [*ἄνθρωπος*, man; *εἶδος*, form]. A suborder of *Primates*, including man, ape, and monkeys.

anthropology (*an-thro-pol'-o-je*) [*anthropo-; λόγος*, discourse]. The science of man. The study of the natural history of mankind. **a. criminal,** see *Bertillonage.*

anthropometallism (*an-thro-po-met'-al-izm*) [*anthropo-; metal*]. Hypnotism or the like condition, induced by looking at a metallic disc.

anthropometer (*an-thro-pom'-et-er*) [*anthropo-; μέτρον*, a measure]. An instrument used in anthropometry.

anthropometry (*an-thro-pom'-et-re*) [*anthropo-; μέτρον*, a measure]. 1 Measuring the anatomical structures of man. 2. Identifying racial differences by such measurements.

anthropomorphic (*an-thro-po-mor'-fik*) [*anthropo-; μορφή*, form] Man-like.

anthropomorphism (*an-thro-po-mor'-fizm*) [*anthropo-; μορφή*, form]. 1. Anthropomorphosis (*q. v.*). 2. The theory which ascribes human attributes to the Deity.

anthropomorphosis (*an-thro-po-mor-fo'-sis*) [*anthropo-; μορφή*, form]. The development of the human figure; a change into the shape of a man.

anthropomorphous (*an-thro-po-mor'-fus*) [*anthropo-; μορφή*, form]. Resembling a man in shape or character.

anthroponomy (*an-thro-pon'-om-e*) [*anthropo-;* man; *νόμος*, a law]. The sum of what is known concerning the laws which control the formation and functions of the human body.

anthropophagy (*an-thro-pof'-a-je*) [*anthropo-; φαγεῖν*, to devour]. 1. Cannibalism. 2. Sexual perversion leading to rape, mutilation, and cannibalism.

anthropophobia (*an-thro-po-fo'-be-ah*) [*anthropo-; φόβος*, fear]. A symptom of mental disease consisting in fear of society.

anthroposomatology (*an-thro-po-so-mat-ol'-o-je*) [*anthropo-; σῶμα*, body; *λόγος*, science]. The sum of what is known about the human body.

anthropotomy (*an-thro-pot'-o-me*) [*anthropo-; τομή*, section]. Human anatomy, or dissection of the human body.

anthropotoxin (*an-thro-po-toks'-in*) [*anthropo-; τοξικόν*, poison]. The toxic substance supposed to be excreted by the lungs of human beings; crowd poison.

anthydropic (*ant-hi-drop'-ik*) [*anti-; ὕδρωψ*, dropsy]. Effective against dropsy.

anthypnotic (*ant-hip-not'-ik*) [*anti-; ὕπνος*, sleep]. 1. Preventive of sleep. 2. An agent that tends to induce wakefulness.

anthypochondriac (*ant-hip-o-kon'-dre-ak*) [*anti-; hypochondriac*]. Efficient in overcoming hypochondriasis.

anthysteric (*ant-his-ter'-ik*) [*anti-; ὑστέρα*, the uterus]. 1. Overcoming hysteria. 2. A remedy against hysteria.

anti- (*an-ti*) [*ἀντί*, against]. A prefix meaning against.

antiabrin (*an-ti-a'-brin*) [*anti-; abrin*]. Ehrlich's term for a hypothetic alexin in the blood of animals rendered immune against abrin.

antiacid (*an-te-as'-id*). Antacid.

antiades (*an-ti'-ad-ēz*) [pl. of *ἀντιάς*, tonsil]. The tonsils.

antiaditis (*an-ti-ad-i'-tis*) [*ἀντιάς*, tonsil; *ιτις*, inflammation]. Tonsilitis.

antiadoncus (*an-ti-ad-ong'-kus*) [*ἀντιάς*, a swollen tonsil; *ὄγκος* a heap]. Any tumor or swelling of the tonsils.

antiagglutinin (*an-te-ag-lu'-tin-in*). A substance having the power of neutralizing the corresponding agglutinin. *q v.*

antiaggressin (*an-te-ah-gres'-in*) [*anti-; aggressin*]. A substance having the power of neutralizing the corresponding aggressin.

antialbumate, antialbuminate (*an-te-al'-bū-māt, an-te-al-bū'-min-āt*) [*anti-; albumen*, white of egg]. Parapeptone; a product of the imperfect digestion of albumin. It is changed by the pancreatic ferment into antipeptone.

antialbumid (*an-te-al'-bū-mid*). See *antialbumate.*

antialbumin (*an-te-al'-bū-min*) [see *antialbumate*]. One of the products of the action of the digestion of albumin; it is probably one of the preformed substances existing in the proteid molecule.

antialbumose (*an-te-al'-bū-mōs*) [see *antialbumate*]. One of the albumoses produced by the action of pancreatic juice on albumin. It resembles syntonin or acidalbumin, and is convertible into antipeptone

antialexin (*an-te-al-ek'-sin*). A substance which has the power of neutralizing the corresponding alexin.

antiamboceptor (*an-te-am-bo-sep'-tor*). A substance which inhibits the action of an amboceptor.

antiamylase (*an-te-am'-il-ās*) [*anti-; amylase*]. A substance which neutralizes the action of amylase.

antianaphylactin (*an-te-an-ah-fi-lak'-tin*). A substance which inhibits the action of an anaphylactin.

antianaphylaxis (*an-te-an-ah-fi-lak'-sis*). A condition neutralizing anaphylaxis: a state of absolute insusceptibility; see *ananaphylaxis.*

antiantibody (*an-te-an'-te-bod-e*). An antibody to an antibody.

antiantitoxin (*an-te-an-te-toks'-in*). An antibody which is formed in immunization with an antitoxin and which inhibits its action.

antiaphrodisiac (*an-te-af-ro-diz'-e-ak*). See *anaphrodisiac.*

antiapoplectic (*an-te-ap-op-lek'-tik*). An agent which affords relief in, or prevents apoplexy.

antiar (*an'-te-ar*). See *antiarin.*

antiarachnolysin (*an-te-ar-ak-nol'-is-in*) [*anti-; ἀράχνη*, spider; *lysin*]. An antivenin counteracting the venom of the spider.

antiarin (*an-te'-ar-in*) [Javanese, *antiar* or *antjar*], $C_{14}H_{20}O_6 + 2H_2O$. The active principle of

Antiaris toxicaria or *Upas antiar*, Javanese poison-tree. Intensely poisonous and used as an arrow-poison. Is a cardiac depressant. Dose $\frac{1}{100}$ gr. (0.00065 Gm.).

antiarsenin (*an-te-ar'-sen-in*). An antitoxin produced as the result of the administration of arsenic.

antiarthrin (*an-te-ar'-thrin*). The commercial name for a preparation said to consist chiefly of the extractives of horse chestnut, with salicin, saligenin, dextrose, and hydrochloric acid. It is said to be a specific for gout. Dose, 1 Gm.

antiarthritic (*an-te-ar-thrit'-ik*) [*anti-*; *arthritis*]. A remedy against gout.

antiasthmatic (*an-te-az-mat'-ik*). See *antiasthmatic*.

antiautolysin (*an-te-aw-tol'-is-in*) [*anti-*; *αὐτός*, self; *λύσις*, solution]. A substance developed in the blood having the power to restrain the solvent action of autolysin.

antibacterial (*an-te-bak-te'-re-al*) [*anti-*; *bacterial*]. 1. Opposed to the germ theory of disease. 2. Opposed to or restraining bacterial action.

antibacterin (*an-te-bak'-ter-in*). 1. A pale yellow fluid said to consist of boric acid, 6.25 parts; iron chloride solution, 1.5 parts; chloric ether, to make 100 parts. It is used by inhalation in tuberculosis, beginning with 150 gr. (10 Gm.) daily, and increasing to 10 times that quantity. 2. Crude aluminum sulphate mixed with soot.

antibechic (*an-te-bek'-ik*) [*anti-*; *βήξ*, a cough]. 1. Alleviating or curing cough. 2. A remedy for cough or hoarseness

antibilious (*an-te-bil'-yus*) [*anti-*; *bilious*]. Effective against bilious disorders.

antibiosis (*an-te-bi-o'-sis*) [*anti-*; *βίος*, life]. An association between two or more organisms which is harmful to one of them. It is the opposite of *symbiosis*

antibiotic (*an-te-bi-ot'-ik*) [*anti-*; *βίος*, life]. 1. Pertaining to antibiosis. 2. Tending to destroy life.

antiblennorrhagic (*an-te-blen-or-aj'-ik*) [*anti-*; *βλέννα*, mucus; *ῥήγνυναι*, to burst]. Efficient in preventing or curing gonorrhea.

antibodies (*an-te-bod'-ēz*). Characteristic constituents of the blood and fluids of the immune animal; antagonistic to the harmful action of bacteria; *e. g.*, antitoxins, agglutinins, precipitins, etc. Cf. *antitoxin*

antibrachial (*an-te-bra'-ke-al*) [*anti-*; *βραχίων*, the arm]. Pertaining to the forearm.

antibrachium (*an-te-bra'-ke-um*). The forearm.

antibromic (*an-te-bro'-mik*) [*anti-*; *βρῶμος*, a stench]. 1. Deodorant. 2. A drug that destroys offensive smells. A deodorizer.

antibrule (*an'-ti-brūl*). A proprietary analgesic, antiseptic, and keratoplastic.

anticachectic (*an-te-kak-ek'-tik*) [*anti-*; *κακός*, bad; *ἕξις*, habit]. Effective in destroying cachexia. 2. A remedial agent against cachexia.

anticacochymic (*an-te-kak-o-kim'-ik*) [*anti-*; *κακός*, bad; *χυμός*, juice]. Anticachectic.

anticalculous (*an-te-kal'-ku-lus*) [*anti-*; *calculus*]. Good against calculus; antilithic.

anticancrin (*an-te-kang'-krin*). See *cancrosin*.

anticarcinomatous (*an-te-kar-sin-o'-mat-us*) [*anti-*; *καρκίνωμα*, cancer]. Preventing carcinoma.

anticardium (*an-te-kar'-de-um*) [*anti-*; *καρδία*, the heart]. The scrobiculus cordis, or pit of the stomach; the infrasternal depression.

anticarious (*an-te-ka'-re-us*) [*anti-*; *caries*, decay]. Preventing decay, as of the teeth.

anticataphylaxis (*an-te-kat-ah-fi-laks'-is*) [*ἀντί*, against; *φύλαξ*, a guardian]. Interference with cataphylaxis

anticatarrhal (*an-te-kat-ar'-al*) [*anti-*; *catarrh*]. Counteracting catarrh. **a. salts**, a combination containing phenol, camphor, ammoniated alcohol, eucalyptus oil, pumilio pine oil, strong iodine solution, and pine sawdust.

anticathode (*an-te-kath'-ōd*). The part of a Crookes' tube opposite the cathode; it is that part on which the cathode rays impinge.

anticaustic (*an-te-kaws'-tik*). Arresting the action of a caustic agent.

anticausticon (*an-te-kaws'-tik-on*) [*anti-*; *καυστικός*, burning]. A preparation of soluble water glass.

antichirotonus, anticheirotonus (*an-te-ki-rot'-o-nus*) [*anti-*; *χείρ*, hand; *τόνος*, tension]. Forcible and steady inflection of the thumb, seen at times in or before attacks of epilepsy.

antichlor (*an'-te-klor*). 1. Sodium thiosulphate. 2. Potassium sulphate.

antichlorin (*an-te-klor'-in*). A preparation used in anemia and said to consist of glucose, basic bismuth formate, and sodium bicarbonate.

antichlorotic (*an-te-klo-rot'-ik*) [*anti-*; *χλωρότης*, greenness] Counteracting chlorosis.

antincholerin (*an-te-kol'-er-in*) [*anti-*; *χολέρα*, cholera]. A product isolated from cultures of cholera bacilli, and used in the treatment of cholera.

anticipating (*an-tis'-ip-a-ting*) [*anticipare*, to take before]. Occurring before the regular or expected time, as an *anticipating* intermittent fever, one in which the paroxysms occur earlier on successive days.

anticlinal (*an-te-kli'-nal*) [*anti-*; *κλίνειν*, to slope]. Sloping in opposite directions. **a. vertebra**, in man, the tenth thoracic vertebra, where the thoracic vertebræ begin to assume the characters of the lumbar.

anticloudine (*an-te-klow'-din*). Trade name of a paste for preventing moisture from precipitating on eyeglasses, mirrors, or glass or nickel instruments.

anticnemion (*an-tik-ne'-me-on*) [*anti-*; *κνήμη*, leg]. The shin or front of the leg.

anticnesmatic (*an-tik-nes-mat'-ik*) [*anti-*; *κνησμός*, itching]. 1. Efficient against itching. 2. A remedy for itching.

anticoagulant (*an-te-ko-ag'-u-lant*) [*anti-*; *coagulum*]. 1. Opposed to or preventive of coagulation. 2. A substance preventing coagulation

anticoagulin (*an-te-ko-ag'-u-lin*). A substance formed in the body antagonistic in its action to that of a coagulin (*q. v.*).

anticomplement (*an-te-kom'-ple-ment*) [*anti-*; *complement*]. A substance held by Ehrlich in his lateral-chain theory to enter into the composition of an antihemolysin (*q. v.*). It is capable of neutralizing the action of a complement. Cf. *antisimmune body* under *body*.

anticomplementary (*an-te-kom-ple-men'-tar-e*). Capable of lessening of abolishing the action of a complement.

anticoncipiens (*an-te-con-sip'-e-ens*) [*anti-*; *concipere*, to conceive]. An agent used to prevent conception.

anticontagious (*an-te-kon-ta'-jus*). Counteracting contagion.

anticonvulsive (*an-te-kon-vul'-siv*). Effective against convulsions.

anticope (*an-tik'-op-e*) [*ἀντικοπή*, a beating back]. Resonance; reaction; repercussion; counterstroke.

anticornutin (*an-te-kor-nū'-tin*). 1. Topasol G. II, an antiseptic combination of zinc and copper ferrosulphates. 2. Topasol G. IV, a combination of iron, zinc, and calcium sulphate.

anticoroin (*an-te-ko'-ro-in*). Topasol G. V, an antiseptic combination of zinc, and magnesium sulphates.

anticreatinine (*an-te-kre-at'-in-in*). A leukomaine derived from creatinine.

anticrisis (*an-te-kri'-sis*) [*anti-*; *crisis*]. An agent or phenomenon preventing a crisis

anticritical (*an-te-krit'-ik-al*) [*anti-*; κρίσις, a crisis]. Preventing the crisis of a disease.

anticteric (*ant-ik'-tur-ik*) [*anti-*; *icterus*]. 1. Efficient against jaundice. 2. An efficient agent against jaundice.

anticus (*an-ti'-kus*) [*anticus*, that in front]. Anterior; in front of.

anticyclic acid. See *acid, anticyclic.*

anticytolysin (*an-te-si-tol'-is-in*). A substance opposing a cytolysin.

anticytotoxin (*an-te-si-to-toks'-in*). A substance antagonistic in its action to a cytotoxin.

antidiabetic (*an-te-di-ab-et'-ik*) [*anti; diabetes*]. 1. Efficient against diabetes. 2. A remedy for diabetes.

antidiabeticum (*an-te-di-a-bet'-ik-um*) A preparation recommended for diabetes, said to consist of wheat starch, sugar of milk, sulphur, powdered senna leaves, and fennel. Syn, *glycosolveol; glycosolvol.*

antidiabetin (*an-te-di-ab-e'-tin*). A mixture of saccharin and mannite, used instead of sugar by diabetics.

antidiarrheal (*an-te-di-ar-e'-al*) [*anti-*; *diarrhea*]. Preventing or overcoming diarrhea.

antidiastase (*an-te-di'-as-tās*). An antibody to diastase.

antidiastole (*an-te-di-as'-to-le*) [*ἀντιδιαστολή*, distinction]. Differential diagnosis.

antidigestive (*an-te-di-jes'-tiv*) [*anti-*; *digestion*]. Preventing the proper digestion of the food.

antidinic (*an-te-din'-ik*) [*anti-*; δῖνος, a whirl]. Relieving or preventing vertigo.

antidiphtherin (*an-te-dif'-ther-in*). A solution containing cultures of *Bacillus diphtheriæ*, used against diphtheria. **a., Klebs',** a preparation obtained by precipitation with alcohol from the culture-fluid of *Bacillus diphtheriæ* after removal of the bacilli.

antidolorin (*an-te-do'-lor-in*) [*anti-*; *dolor*, pain]. A proprietary preparation of ethyl chloride, used for the relief of superficial pain.

antidotal (*an-te-do'-tal*) [*anti-*; δοτός, given]. Having the nature of an antidote

antidote (*an'-te-dōt*) [see *antidotal*]. An agent preventing or counteracting the action of a poison. **a., arsenical,** is prepared by dissolving 100 parts of the hydrated sulphate of iron in 250 parts of water, to which 15 parts of burnt magnesia and 250 parts of water are added. **a., chemical,** one that changes the chemical nature of the poison so that it becomes insoluble or harmless **a., mechanical,** one that prevents absorption by holding the poison in mechanical suspension or by coating the stomach. **a., physiological,** one that counteracts the physiological effects of a poison. **a., universal,** a mixture of 1 part of dissolved iron sulphate in 2 parts of magnesia water.

antidotism (*an'-te-do-tizm*) [see *antidotal*]. Therapeutic or physiologic antagonism; the possession of antidotal properties; the act of giving antidotes.

antidotum (*an-te-do'-tum*). Antidote.

antidromic nerve impulses (*an-te-drom'-ik*) [*anti-*; δρόμος, a running]. Nerve impulses passing in the opposite direction to the normal, such as occurs when vasodilatation follows peripheral stimulation of an afferent nerve.

antidynamic (*an-te-di-nam'-ik*) [*anti-*; δύναμις, force]. Weakening, depressing.

antidyne, antidynous (*an'-te-dīn, an-tid'-in-us*) [*anti-*; ὀδύνη, pain]. Anodyne.

antidyscratic (*an-te-dis-krat'-ik*) [*anti-*; δυσκρασία, bad temperament]. Tending to overcome, as a dyscrasia.

antidysenteric (*an-te-dis-en-ter'-ik*) [*anti-*; *dysentery*]. 1. Serviceable against dysentery. 2. A remedy for dysentery.

antidysentericum (*an-te-dis-en-ter'-ik-um*). A proprietary remedy for dysentery and chronic diarrhea, said to consist of myrobalans, pelletierine, extract of rose and gum arabic.

antidysuric (*an-te-dis-ū'-rik*) [*anti-*; δυσουρία, difficult micturition]. Relieving dysuria.

antiemetic (*an-te-em-et'-ik*) [*anti-*; *emetic*]. Preventing emesis; relieving nausea.

antiendotoxic (*an-te-en-do-toks'-ik*). Preventing or counteracting the effect of endotoxins.

antiendotoxin (*an-te-en-do-toks'-in*). An antibody which counteracts a bacterial endotoxin

antienzyme (*an-te-en'-zim*) [*anti-*; *enzyme*]. An agent which neutralizes the action of an enzyme.

antiephialtic (*an-ti-ef-e-al'-tik*). See *antephialtic.*

antiepileptic (*an-te-ep-il-ek'-tik*). See *antepileptic.*

antifebrile (*an-te-feb'-ril*) [*anti-*; *febris*, a fever]. An agent reducing a fever; a febrifuge.

antifebrin (*an-te-feb'-rin*) [*anti-*; *febris*, a fever], $C_6H_5.C_2H_3O.NH$. The proprietary name of acetanilide or phenylacetamide. A white, crystalline powder, insoluble in water, freely soluble in alcohol, ether, and chloroform. It is antipyretic and analgesic. The drug's official name is *acetanilidum.* Dose 5–10 gr. (0.3–0.6 Gm)

antiferment (*an-te-fer'-ment*) [*anti-*; *fermentum*, leaven]. An agent that prevents fermentation.

antifermentative (*an-te-fer-men'-ta-tiv*) [*antiferment*]. Preventing fermentation.

antiflatulent (*an-te-flat'-u-lent*). 1. Efficient against flatulence. 2. A remedy for flatulence.

antiformin (*an-te-for'-min*). Trade name of a disinfectant preparation containing solution of potassium or sodium hypochlorite and of sodium hydrate. It has a powerful solvent action on certain organic substances; and is used in the laboratory for the separation of tubercle bacilli from sputum, urine, and other pathological products which contain these bacilli.

antifungin (*an-te-fun'-jin*). Magnesium borate, used as a gargle.

antigalactagogue (*an-te-gal-ak'-ta-gog*) [*anti-*; γάλα, milk, ἀγωγός, leading]. Same as antigalactic.

antigalactic (*an-te-gal-ak'-tik*) [*anti-*; γάλα, milk]. 1. Lessening the secretion of milk. 2. A drug that lessens the flow of milk.

antigen (*an'-te-jen*) [*anti-*; γεννᾶν, to produce]. Any bacterium or substance which, when injected into an organism, is capable of causing the formation of an antibody.

antigermin (*an-te-jer'-min*). A compound of copper and an acid, forming a yellowish-green, tenacious mass, soluble in 200 parts of water. It is said to be disinfectant, deodorant, and bactericidal.

antigerminal (*an-te-jer'-min-al*) [*anti-*; *germ*]. Relating to the pole of the ovum opposed to the germinal pole.

antigonorrheic (*an-te-gon-o-re'-ik*). A substance which is capable of aiding in the cure of gonorrhea.

antihelix (*an-te-he'-liks*). See *anthelix.*

antihemagglutinin (*an-te-hem-ag-glū'-tin-in*). A substance opposed in action to the hemagglutinins (*q. v.*).

antihemolysin (*an-te-he-mol'-is-in*) [*anti-*; αἷμα, blood; λύσις, solution]. A complex substance in the blood-serum developed by inoculations with hemolysins. It is an antibody to hemolysin; and is composed of anticomplements and antiimmune bodies.

antihemolytic (*an-te-hem-o-lit'-ik*). Relating to an antihemolysin; not capable of dissolving blood-corpuscles. Preventing hemolysis.

antihemorrhoidal (*an-te-hem-or-oid'-al*). 1. Effective against hemorrhoids. 2. A remedy for hemorrhoids.

antiherpetic (*an-te-her-pet'-ik*). Preventing herpes.

antihidrotic (*an-te-hi-drot'-ik*) [*anti-*; ἱδρώς, sweat]. 1. Diminishing the secretion of sweat. 2. An agent that lessens perspiration.

antihormone (*an-te-hor'-mōn*) [*anti-*; *hormone*] A hormone which counteracts another hormone; an antagonistic hormone; a chalone.

antihydropic (*an-te-hi-drop'-ik*). See *anthydropic.*

antihydropin (*an-te-hi'-dro-pin*) [*anti-*; ὕδωρ, water]. A crystalline principle obtainable from the cockroach, *Blatta* (*Periplaneta*) *orientalis*, said to be diuretic. Dose 10–20 gr. (0 6–1.3 Gm.).

antihysterical (*an-te-his-ter'-ik-al*). Relieving or inhibiting hysteria.

antiicteric (*an-te-ik-ter'-ik*) [*anti-*; *icterus*]. Serviceable against jaundice.

antiimmune bodies. See under *body.*

antiintermediary body (*an-te-in-ter-me'-de-ar-e*). Antiamboceptor.

antiisolysin (*an-te-i-sol'-is-in*). A substance which is capable of counteracting the action of an isolysin.

antikamnia (*an-te-kam'-ne-ah*) [*anti-*; κάμνειν, to suffer pain]. A proprietary remedy said to be composed of sodium bicarbonate, acetanilide, and caffeine. It is used as an analgesic in doses of 5–10 gr. (0 32–0.65 Gm.).

antikathode (*an-te-kath'-ōd*) [*anti-*; *kathode*]. A piece of platinum foil so placed in a Crookes tube as to intercept the kathode rays; being thus rendered fluorescent, it becomes a source of roentgen-rays.

antiketogen (*an-te-ke'-to-jen*) [*anti-*; *ketogen*]. A substance which produces antiketogenesis.

antiketogenesis (*an-te-ke-to-jen'-es-is*) [*anti-*; *ketone* (acetone); *genesis*]. The diminution of acidosis by the oxidation of sugar and allied substances in the body.

antiketogenic (*an-te-ke-to-jen'-ik*) [*anti-*; *ketone* (acetone); γεννᾶν, to produce]. 1. Pertaining to antiketogenesis. 2. Preventing the formation of acetone, or of acidosis. **a. substances,** substances which when ingested are antagonistic to the production of ketone bodies, or acidosis.

antiketoplastic (*an-te-ke-to-plas'-tik*) [*anti-*; *ketone*; πλασσεῖν, to form]. Denoting an agent which will reduce the amount of acetone (ketone) compounds excreted in the urine or in the breath.

antikinase (*an-te-ki'-nās*). An antibody to kinase.

antikol (*an'-tik-ol*). A proprietary antipyretic mixture said to contain acetanilide, sodium bicarbonate, and tartaric acid.

antilabium (*an-te-la'-be-um*). See *antelabium.*

antilactase (*an-te-lak'-tās*). Antibody which counteracts lactase.

antilactic (*an-te-lak'-tik*). See *antigalactic.*

antilactoserum (*an-te-lak-to-se'-rum*). A substance antagonistic in its action to lactoserum (*q. v.*).

antilemic, antilœmic, antiloimic (*an-te-le'-mik, an-te-los'-mik*) [*anti-*; λοιμός, the plague]. Efficacious against the plague or other pestilence.

antileprol (*an-te-lep'-rol*). The ethyl ester of chaulmoogra acid, recommended in place of chaulmoogra oil in treatment of leprosy.

antilepsis (*an-til-ep'-sis*) [ἀντιλῆψις, a receiving in return]. 1. The treatment of disease by the application of the remedy to a healthy part; revulsive treatment. 2. A taking root. 3. A taking effect. 4. A seizure; an attack. 5. The support of a bandage.

antileptic (*an-til-ep'-tik*) [ἀντιλῆψις, a receiving in return]. 1. Revulsive. 2. Supporting, assisting.

antilethargic (*an-te-leth-ar'-jik*). 1. Arresting lethargy; hindering sleep. 2. An agent efficacious against lethargy.

antileukocidin (*an-te-lu-ko'-si-din*). The antibody for the leukocytic poison of the streptococcus.

antileukotoxin (*an-te-lu-ko-tok'-sin*). The antibody to a leukotoxin.

antilipase (*an-te-lip'-ās*). A substance inhibiting or counteracting a lipase.

antilithemic (*an-te-lith-e'-mik*) [*anti-*; *lithemia*]. Correcting lithemia.

antilithic (*an-te-lith'-ik*) [*anti-*; λίθος, a stone]. 1. Efficacious against calculus. 2 An agent preventing the deposit of urinary sediment.

antilobium (*an-te-lo'-be-um*) [*anti-*; λοβός, the lobe of the ear]. The tragus or part of the ear opposite the lobe.

antilœmic (*an-ti-le'-mik*). See *antilemic.*

antiluetic (*an-te-lu-et'-ik*) [*anti-*; *lues*, the plague; syphilis]. Efficacious against syphilis.

antiluetin (*an-te-lu'-et-in*). Synonym of antimony ammonium potassium tartrate.

antilusin (*an-te-loo'-sin*). Trade name of normal horse serum.

antilypyrin (*an-te-le-pi'-rin*). An antipyretic and analgesic substance obtained by heating acetanilide, 1 part, with antipyrine, 2 parts. Dose 7–8 gr. (0.45–0.52 Gm.).

antilysin (*an-til'-is-in*) [*anti-*; λύσις, a loosing] A substance opposed to the activity of a lysin.

antilysis (*an-til'-is-is*). The condition due to the activity of antilysins.

antilyssic (*an-te-lis'-ik*) [*anti-*; λύσσα, rabies]. 1. Tending to cure rabies. 2. A remedy for rabies.

antilytic. Relating to the action of an antilysin.

antimalarial (*an-te-mal-a'-re-al*). Preventing or curing malaria.

antimaniacal (*an-te-ma-ni'-ak-al*) [*anti-*; μανία, madness]. Overcoming insanity

antimellin (*an-te-mel'-in*). A remedy employed in diabetes purporting to be a glucoside separated from the fruit of *Eugenia jambolana.*

antimephitic (*an-te-mef-it'-ik*) [*anti-*; *mephitis*, a pestilential exhalation]. Efficacious against foul exhalations or their effects.

antimere (*an'-te-mēr*) [*anti-*; μέρος, a part]. 1. Any one of the segments of the body that are bounded by planes typically at right angles to the long axis of the body. 2. A homotype.

antimeristem (*an-te-mer-is'-tem*) [*anti-*; see *meristem*]. A vaccine which is claimed to produce in the body a protective force against carcinoma.

antimerology (*an-te-mer-ol'-o-je*) [*anti-*; μέρος, a part; λόγος, science]. The science of homotypic parts.

antimetropia (*an-te-met-ro'-pe-ah*) [*anti-; metropia*]. A condition characterized by opposing states of refraction in the two eyes, as, for example, the existence of myopia in one eye and of hyperopia in the other.

antimiasmatic (*an-te-mi-as-mat'-ik*) [*anti-; μίασμα*, exhalation]. Preventive of malaria.

antimicrobic (*an-te-mi-kro'-bik*) [*anti-; microbe*]. Arresting the development of microbes; antibacterial.

antimicrophyte (*an-te-mik'-ro-fīt*) [*ἀντί*, against; *μικρός*, small; *φυτόν*, plant]. A germicide.

antimigraine (*an-te-mig'-rān*). A proprietary preparation said to consist of caffeine, antipyrine and sugar. Dose, 1.5 Gm. Syn., *antihemicranin*

antimonial (*an-te-mo'-ne-al*) [*antimonium*, antimony]. Containing antimony.

antimonic (*an-te-mon'-ik*) [see *antimonial*]. A term applied to those compounds of antimony that correspond to its higher oxide.

antimonide (*an'-te-mo-nid*). Any binary combination of antimony.

antimonious (*an-te-mo'-ne-us*) [see *antimonial*]. A term denoting those compounds of antimony that correspond to its lower oxide.

antimonium (*an-te-mo'-ne-um*). See *antimony*.

antimony (*an'-te-mo-ne*) [L., *antimonium*]. Sb = 120.2; quantivalence III and V. A metallic, crystalline element possessing a bluish-white luster. The symbol Sb is derived from the old name, *stibium*. Antimony is found native, as the sulphide, Sb_2S_3, as the oxide, and is a constituent of many minerals. It is used commercially chiefly for making alloys. Type-metal, Britannia metal, and Babbitt antifriction metal are alloys of antimony. In medicine salts of antimony are used less frequently than formerly. The salts are cardiac and arterial depressants, diaphoretic and emetic, and in large doses powerful gastrointestinal irritants, producing symptoms resembling those of Asiatic cholera. Antimony has been used as an antiphlogistic in sthenic inflammation, as a diaphoretic and expectorant, and as an emetic. **a. arsenate,** a heavy white powder; it is used in syphilitic affections of the skin Dose $\frac{1}{10}$ gr. (0.001 Gm.) 4 times daily. **a. arsenite,** a fine white powder; it is used in skin diseases. **a., black,** purified antimony sulphide, Sb_2S_3 **a., butter of,** antimony chloride, $SbCl_3$. **a. chloride,** $SbCl_3$, the "butter" of antimony; a strong caustic. **a. iodide,** SbI_3, red crystals, decomposed by water, soluble in carbon disulphide; melts at 167° C. It is alterative. Dose $\frac{1}{4}$–1 gr. (0.016–0.065 Gm.) in pills. **a. oxychloride,** the "powder of algaroth"; now little used. **a. pentoxide,** Sb_2O_5, antimonic acid, combines with bases to form antimoniates. **a., pills of, compound** (*pilulæ antimonii compositæ*, B. P.), Plummer's pills, contain calomel and sulphureted antimony, of each, $\frac{1}{2}$ gr. (0.032 Gm.). **a. and potassium tartrate** (*antimonii et potassii tartras*, U. S. P.; *antimonium tartaratum*, B. P.), $2KSbOC_4H_4O_6 \cdot H_2O$, "tartar emetic." Dose $\frac{1}{15}$–$\frac{1}{4}$ gr. (0.004–0.016 Gm.). **a., powder of** (*pulvis antimonialis*, B. P.), antimonial powder, James' powder, consists of antimonious oxide 33, and calcium phosphate 67 parts, and is diaphoretic; in large doses, emetic and cathartic. Dose 3–8 gr. (0.2–0.5 Gm.). **a. sulphide,** Sb_2S_3, black sulphide of antimony. Dose $\frac{1}{4}$–1 gr. (0.016–0.065 Gm.). **a. sulphide, golden,** Sb_2S_5, a fine, odorless, orange-yellow powder, soluble in alkaline solutions. It is alterative, diaphoretic, emetic, and expectorant. Dose $\frac{1}{4}$–1½ gr. (0.01–0.1 Gm.) several times daily. **a., sulphureted** (*antimonium sulphuratum*, B. P.), the sulphide with a small but indefinite amount of the oxide. Dose 1–5 gr. (0.065–0.32 Gm.). **a. tartrate,** $(SbO)_2C_4H_4O_6 + H_2O$, a white, crystalline powder. Used internally as a substitute for arsenic in affections of the skin. Dose $\frac{1}{15}$ gr. (0.0065 Gm.) 3 to 5 times daily. **a. trioxide,** antimonious acid, Sb_2O_3; soluble in hydrochloric and tartaric acids. Dose 1–2 gr. (0.065–0.13 Gm.). It is an ingredient of James' powder. **a., vegetable,** boneset. **a., wine of** (*vinum antimonii*, U. S. P.), boiling water, 60; tartar emetic, 4; stronger white wine, 1000 parts. It contains about 2 gr. of tartar emetic to the ounce. Dose 5–15 min. (0.3–1.0 Cc.).

antimonyl (*an'-tim-on-il*). SbO. The univalent radical of antimonous compounds.

antimucorin (*an-te-mū'-kor-in*). Topasol G. III, an antiseptic preparation of iron and zinc sulphate.

antimycetic (*an-te-mi-se'-tik*) [*anti-; μύκης*, fungus]. 1. See actinomycotic. 2. A fungicide.

antimycotic (*an-te-mi-kot'-ik*) [*anti-; μύκης*, a fungus]. Destructive to microorganisms.

antimydriatic (*an-te-mid-re-at'-ik*) [*anti-, μυδρίασις*, mydriasis]. 1. Opposed to or arresting dilatation of the pupils. 2. A drug efficacious against mydriasis.

antinarcotic (*an-te-nar-kot'-ik*) [*anti-; νάρκωσις*, a benumbing]. Preventing narcosis.

antinausea (*an-te-naw'-se-ah*). A remedy for seasickness, said to consist of cocaine and antipyrine.

antinephritic (*an-te-nef-rit'-ik*) [*anti-; νεφρός*, the kidney; *ῖτις*, inflammation]. Preventing or curative of renal disease.

antinervin (*an-te-ner'-vin*) [*anti-; nervus*, a tendon or nerve]. Salbromalide, a mixture of bromacetanilide and salicylanilide; used for the relief of neuralgia.

antineuralgic (*an-te-nū-ral'-jik*) [*anti-; νεῦρον*, a nerve; *ἄλγος*, pain]. Overcoming neuralgia.

antineuritic (*an-te-nū-rit'-ik*). 1. Efficient in neuritis. 2. A remedy against neuritis. **a. vitamin,** soluble B. *q. v.*

antineuropathic (*an-te-nū-ro-path'-ik*) [*anti-; νεῦρον*, nerve; *πάθος*, a disease]. 1. Efficient against nervous disorders. 2. A remedy efficient in nervous diseases.

antineurotic (*an-te-nū-rot'-ik*) [*anti-; νεῦρον*, a nerve]. A remedy of service in nervous diseases.

antineurotoxin (*an-te-nū-ro-tok'-sin*). A substance which inhibits or counteracts a neurotoxin.

antiniad (*an-tin'-e-ad*) [*anti-; ἰνίον*, the nape of the neck]. Toward the antinion; glabellad.

antinial (*an-tin'-e-al*) [*anti-; ἰνίον*, the nape of the neck]. Pertaining to the antinion.

antinien (*an-tin'-e-en*) [*anti-; ἰνίον*, the nape of the neck]. Belonging to the antinion in itself.

antinion (*an-tsn'-e-on*) [*anti-; ἰνίον*, the nape of the neck]. See *craniometrical points*.

antinonnin (*an-te-non'-in*), $C_6H_2.(NO_2)_2.CH_2OK$, potassium orthodinitrocresylate. See *dinitrocresol*.

antinosin (*an-te-no'-sin*) [*anti-; νόσος*, disease]. Tetraiodophenolphthalein, the soluble sodium salt of nosophen; it is a greenish-blue antiseptic powder, used in powder or in solutions of 1:1000, for irrigations or gargle.

antiobesic (*an-te-o-be'-sik*) [*anti-; obesity*]. 1. Efficient against corpulence. 2. A remedy for corpulence.

antiodontalgic (*an-te-o-don-tal'-jik*) [*anti-*; *ὀδούς*, tooth; *ἄλγος*, pain]. Curative of toothache.

antiopsonin (*an-te-op'-son-in*). A substance retarding or destroying the action of an opsonin.

antiorgastic (*an-te-or-gas'-tik*) [*anti-*; *ὀργασμός*, swelling, excitement]. Anaphrodisiac.

antiotomia, antiotomy (*an-te-o-to'-me-ah, an-te-ot'-om-e*) [*ἀντιάς*, a tonsil; *τέμνειν*, to cut]. Excision of the tonsils.

antipaludean (*an-te-pal-ū'-de-an*) [*anti-*; *palus*, a marsh]. Efficient against malarial diseases.

antiparalytic (*an-te-par-al-it'-ik*) [*anti-*; *paralysis*]. 1. Efficient against paralysis. An agent or remedy efficacious in paralysis.

antiparasitic (*an-te-par as-it'-ik*) [*anti-*; *παράσιτος*, a parasite]. 1. Destroying parasites. 2. An agent destroying parasites.

antiparasitin (*an-te-par'-as-ĭ-tin*). Potassium dinitrocresylate; used as an antiseptic and antiparasitic.

antiparastata (*an-te-par-as'-tat-ah*) [*anti-*; *παραστάτης*, testicle]. Cowper's glands.

antiparastatitis (*an-te-par-as-tat-i'-tis*) [*anti-*; *παραστάτης*, a testicle]. Inflammation of Cowper's glands.

antipathic (*an-te-path'-ik*) [*anti-*; *πάθος*, disease]. 1. A synonym of *allopathic*, both terms alike being rejected by the advocates of rational medicine. 2. Producing contrary symptoms 3. Antagonistic. 4. Anodyne.

antipathy (*an-tip'-a-the*) [*anti-*; *πάθος*, affection]. 1. Aversion; an opposing property or quality. 2. Morbid disgust or repugnance for particular objects. 3. Allopathy (*q. v.*). 4. An object exciting morbid dislike or aversion. 5. Chemical incompatibility. **a., insensile,** morbid repugnance excited by the presence of some object which was not perceived by any of the senses. **a., sensile,** morbid aversion aroused by some appreciable quality of the exciting object.

antipeptone (*an-te-pep'-tōn*) [*anti-*; *πέπτειν*, to cook; digest]. A variety of peptone not acted upon by trypsin.

antiperiodic (*an-te-pe-ri-od'-ik*) [*anti-*; *περίοδος*, a going round]. 1. Preventing periodic attacks of a disease 2. A remedy against periodic disease. **a. tincture,** see *Warburg's tincture.*

antiperistalsis (*an-te-per-is-tal'-sis*) [*anti-*; *περί*, around, *στάλσις*, compression]. Reversed peristalsis; inverted or upward peristaltic action.

antiperistaltic (*an-te-per-is-tal'-tik*) [see *antiperistalsis*]. Relating to antiperistalsis.

antiperonosporin (*an-te-per-o-nos'-por-in*). Topasol G. I, an antiseptic preparation of zinc and copper sulphates.

antiphagin (*an-tif'-a-jin*) [*anti-*; *phagocyte*]. A substance formed in virulent bacteria which protects them against phagocytosis.

antiphagocytic (*an-te-fag-o-sit'-ik*). Protecting against or preventing phagocytosis.

antiphialtic (*ant-if-e-al'-tik*) [*anti-*; *ἐφιάλτης*, nightmare]. Preventive of nightmare.

antiphlogistic (*an-te-flo-jis'-tik*) [*anti-*; *φλόγωσις*, inflammatory heat]. 1. Counteracting fever. 2. An agent subduing or reducing inflammation or fever. 3. Applied to the pneumatic theory of Lavoisier as having supplanted Stahl's phlogistic theory. **a. treatment,** bloodletting, the application of cold, the administration of antipyretics, etc.

antiphlogistin (*an-te-flo-jis'-tin*) [see *antiphlogistic*]. Trade name of a paste said to consist of kaolin or purified clay, glycerol, and antiseptics; it is a substitute for poultices.

antiphlogosis (*an-te-flo-go'-sis*) [see *antiphlogistic*]. 1. The reduction of inflammation 2. Inflammation purposely excited to counteract other inflammation.

antiphone (*an'-te-fōn*) [*anti-*; *φωνή*, sound]. An appliance worn in the auditory meatus, and intended to protect the wearer from noises.

antiphthiriac, antiphtheiriac (*an-te-thi'-re-ak*) [*anti-*; *φθείρ*, a louse]. 1. Efficient against lice or the condition caused by them. 2 An agent effective against lice

antiphthisic (*an-te-tiz'-ik*) [*anti-*; *φθίσις*, a wasting]. Efficient against phthisis. An agent checking in phthisis.

antiphthisin (*an-te-ti'-sin*). A modified tuberculin, made from the slight residue after precipitation with sodium bismuth iodide.

antiphymin (*an-te-fi'-min*) [*anti-*; *φύμα*, a tubercle]. Trade name of a preparation used in tuberculosis. It is said to consist of formaldehyde, ozone, sulphur dioxide. Used by inhalation in tuberculosis.

antiphytosin (*an-te-fi-to'-sin*). A preparation resembling tuberculin.

antipilus (*an-te-pi'-lus*) [*anti-*; *pilus*, a hair]. Trade name of a preparation for removing hair.

antiplasis (*an-te-pla'-sis*). See *antiplasm.*

antiplasm (*an'-te-plasm*) [*anti-*; *πλάσμα*, a thing molded]. 1. Formation according to a pattern. 2. Remolding into the normal form.

antiplastic (*an-te-plas'-tik*) [*anti-*; *πλάσσειν*, to form]. 1. Unfavorable to granulation or to the healing process. 2 An agent impoverishing the blood. 3 Preventing or checking plastic exudation.

antipleuritic (*an-te-plu-rit'-ik*) [*anti-*; *πλευρίτης*, pleurisy] Overcoming pleurisy.

antipneumococcic (*an-te-nū-mo-kok'-sik*). Destructive to the growth of the pneumococcus. **a. serum,** a bactericidal serum used in the treatment of lobar pneumonia.

antipneumonic (*an-te-nū-mon'-ik*) [*anti-*; *pneumonia*]. Of value in treating pneumonia.

antipneumotoxin (*an-te-nū-mo-toks'-in*). An antitoxin opposing pneumotoxin.

antipodagric (*an-te-po-dag'-rik*) [*anti-*; *ποδαγρά*, gout]. Efficacious against gout.

antipodal (*an-tip'-od-al*) [*anti-*; *πούς*, a foot]. Situated directly opposite. **a. cells,** a term applied to a group of four cells formed in the lower end of the embryo-sac opposite to the cells constituting the egg-apparatus. **a. cone,** the cone of astral rays opposite to the spindle-fibers.

antipraxia (*an-te-praks'-e-ah*) [*anti-*; *πράσσειν*, to do]. Antagonism of functions or of symptoms.

antipraxy (*an'-te-prak-se*). The theory that large and small doses of drugs exert a precisely opposite effect.

antiprecipitin (*an-te-pre-sip'-it-in*). A substance antagonistic to a precipitin (*q. v.*).

antiprostate (*an-te-pros'-tāt*). See *anteprostate.*

antipruritic (*an-te-pru-rit'-ik*) [*anti-*; *pruritus*, itching]. 1. Relieving the sensation of itching. 2. A drug that relieves the sensation of itching.

antipsoric (*an-tip-so'-rik*) [*anti-*; *ψώρα*, the itch]. Effective against itching or the itch.

antiputrefactive (*an-te-pū-tre-fak'-tiv*). See *antiseptic.*

antipyic (*an-te-pi'-ik*) [*anti-*; *πύον*, pus]. Checking or restraining suppuration.

antipyogenic (*an-te-pi-o-jen'-ik*) [*anti-*; *πύον*, pus; *γεννᾶν*, to form]. Preventing or counteracting suppuration.

antipyonin (*an-te-pi'-on-in*). Sodium tetraborate.

antipyresis (*an-te-pi-re'-sis*) [*anti-*; *πυρετός*, fever]. The reduction of fever by means of antipyretics.

antipyretic (*an-te-pi-ret'-ik*) [see *antipyresis*]. 1. Cooling; lowering the temperature. 2. An agent reducing temperature. The most important antipyretic agents are cold, diaphoretics, and the newer remedies, many of which are coal-tar products, such as antipyrine, acetanilide, phenacetin, etc.

antipyrine, antipyrin (*an-te-pi'-rin*) [*anti-*; *πῦρ*, fever heat], $C_{11}H_{12}N_2O$. Phenazone. The scientific name is dimethyloxychinicin-phenyldimethylpyrazolon, or dihydrodimethylphenylpyrazine. An alkaloidal product of the destructive distillation of coal-tar. It may be produced by heating acetoacetic ester with methylphenylhydrazine. It is a grayish or reddish-white, crystalline powder, slightly bitter, soluble in water, alcohol, and chloroform, and crystallizes from an ethereal solution in shining leaflets melting at 113°. It reduces temperature, causes sweating, at times vomiting, peculiar eruptions, pruritus, coryza, etc Not rarely a cyanotic condition of the face and hands is produced. Antipyrine is incompatible with nitrous compounds. It is a powerful antipyretic and analgesic. Dose 5–15 gr. (0.3–1.0 Gm.). **a. bichloral,** a trituration-product of 94 parts of antipyrine with 165.5 parts of chloral hydrate; it is hypnotic and analgesic. Maximum dose 45 gr. (3 Gm.). Syn., *dichloralantipyrine*. **a. mandelate,** a crystalline compound of antipyrine and amygdalic acid, used as a remedy for whooping-cough. Dose ¾–8 gr. (0.05–0.5 Gm.). Syn., *tussol; phenylglycollate*. **a. salicylate, a. salol,** a brown liquid obtained by fusing together equal parts of phenyl salicylate and antipyrine. It is recommended as an antiseptic, and as a hemostatic in uterine hemorrhage, applied by means of cotton tampons. Syn., *salipyrine*. **a., test for,** see *Frœux*.

antipyrinomania (*an-te-pi-rin-o-ma'-ne-ah*) [*anti-*; *πυρετός*, fever, *μανία*, madness] A condition similar to morphinism, due to excessive use of antipyrine. It is marked by nervous excitement.

antipyrotic (*an-te-pi-rot'-ik*) [*anti-*; *πύρωσις*, a burning]. 1. Efficacious against burns. 2. An agent curative of burns.

antirabic (*an-te-ra'-bik*) [*anti-*; *rabies*, madness]. Preventing or curing rabies.

antirachitic vitamin. Vitamin D, *q. v.*

antirennene (*an-te-ren'-ēn*). Morgenroth's name for the principle which appears in the blood of an animal following the introduction of rennet. It has the power of impeding the action of rennet on milk.

antirennet (*an-te-ren'-et*) [*anti-*; *rennin*]. *Antirennin, q. v.*

antirennin (*an-te-ren'-ēn*) [*anti-*; *rennin*]. An antibody which is capable of neutralizing the milk-curdling action of rennin.

antirheumatic (*an-te-ru-mat'-ik*) [*anti-*; *rheumatism*]. Preventing or curing rheumatism.

antirheumaticum (*an-te-ru-mat'-ik-um*). A compound of sodium salicylate and methylene-blue. It occurs in blue, prismatic crystals, soluble in water and alcohol. Dose 1–1½ gr. (0.06–0.09 Gm.).

antirheumatin (*an-te-ru'-mat-in*). An ointment used in treatment of rheumatism, and said to contain fluorphenetol, 1 part; difluordiphenyl, 4 parts; vaselin, 10 parts; wool-fat, 85 parts.

antirheumol (*an-te-ru'-mol*). A solution of the glycerin ester of salicylic acid in glycerin and alcohol. It is used as a liniment in rheumatism.

antiricin (*an-te-ris'-in*). The antibody to ricin. Its action is inhibited by cold and accelerated by heat.

antirhachitic (*an-te-rak-it'-ik*) [*anti-*; *ῥάχις*, the spine]. Serviceable against rickets.

antirheoscope (*an-te-re'-o-skōp*) [*ἀντιῤῥοια*, a flowing back; *σκοπεῖν*, to view]. J. J. Oppel's device for observing the manifestations of visual vertigo.

Antirhinum (*an-te-ri'-num*) [L.]. A genus of scrophulariaceous plants. *A. linaria*, called also *Linaria vulgaris*, toadflax, ramsted, "butter-and-eggs," is a herbaceous plant of Europe and North America, diuretic, cathartic, and irritant; used as a poultice and fomentation.

antiscabin (*an-te-ska'-bin*). A preparation said to consist of beta-naphthol, balsam of Peru, soap, glycerin, boric acid, and alcohol. It is used in the treatment of scabies.

antiscabious (*an-te-ska'-be-us*) [*anti*, against; *scabies*]. Effective against the itch.

antiscarlatinal (*an-te-skar-lat'-in-al*) [*anti*, against; *scarlatina*]. Efficient against scarlet fever.

antiscirrhous (*an-te-skir'-us*). Efficient against scirrhus.

antisclerosin (*an-te-skle-ro'-sin*). Trade name of a preparation of various inorganic salts, similar to Trunecek's serum, used in arteriosclerosis to lessen the intra-arterial pressure.

anticolic (*an-te-skol'-ik*) [*ἀντί*, against; *σκώληξ*, a worm]. Vermifuge. See *anthelmintic*.

antiscorbutic (*an-te-skor-bū'-tik*) [*anti-*; *scorbutus*, scurvy]. 1. Effective against scurvy. 2. A remedy useful in scurvy.

antisecosis (*an-te-sek-o'-sis*) [*anti-*; *σηκόειν*, to weigh, balance]. 1. A restoration of health, strength, etc. 2. Regulation of the food.

antisensibilisin (*an-te-sen-sib-il'-is-in*). One of the substances in an antigen.

antisensitizer (*an-te-sen'-sit-i-zer*). In Ehrlich's side-chain theory, a substance antagonistic in its action to that of the intermediary body or sensitizer

antisepsin (*an-te-sep'-sin*) [*anti-*; *σήψις*, putrefaction], $C_6H_4BrNHC_2H_3O$. Asepsin; bromated acetanilide; soluble in alcohol and ether, insoluble in water. It is antipyretic, analgesic, and antiseptic. Dose 6–7 gr. (0.39–0.45 Gm.).

antisepsis (*an-te-sep'-sis*) [see *antisepsin*]. Exclusion of the germs that cause putrefaction.

antiseptic (*an-te-sep'-tik*) [see *antisepsin*]. 1. Having power to prevent the growth of the bacteria upon which putrefaction depends. 2. An agent that prevents development of bacteria. Among the principal antiseptics are mercuric chloride, phenol, iodoform, thymol, salicylic acid, boric acid, formaldehyde, and potassium permanganate and others. **a. gauze,** open cotton cloth charged with an antiseptic. **a. ligature,** catgut or other material rendered aseptic by soaking in antiseptic solutions. **a. treatment of wounds,** this looks to thorough antisepsis as regards the wound, the instruments, the operator's hands, the dressings, etc.

antisepticin (*an-te-sep'-tis-in*). Trade name of an antiseptic mixture containing benzoic and boric acids, thymol and eucalyptol.

antisepticism (*an-te-sep'-tis-izm*) [see *antisepsin*]. The theory or systematic employment of antiseptic methods.

antisepticize (*an-te-sep'-tis-īz*) [see *antisepsin*]. To render antiseptic; to treat with antiseptics.

antisepticol (*an-te-sep'-tik-ol*). Trade name of a liquid antiseptic said to contain boric acid, sodium borate, benzoic acid, thymol, eucalyptol, menthol and oil wintergreen.

antiseptin (*an-te-sep'-tin*) [see *antisepsin*]. 1. Zinc borothymoliodide. It consists of 85 parts zinc sulphate, 2.5 parts each of zinc iodide and thymol, and 10 parts boric acid. It is an antiseptic. 2. A proprietary preparation said to consist of sodium or potassium silicate, 2 parts, and a 0.1% solution of mercuric chloride, 1 part.

antiseptol (*an-te-sep'-tol*) [see *antisepsin*]. Cinchonine iodosulphate, an odorless and fairly effective substitute for iodoform

antiserum (*an-te-se'-rum*). A serum having the power of agglutinating and precipitating another serum. **a. method**, a method of differentiating human from other blood; modified Uhlenhuth's antiserum method. Human blood serum is injected into the peritoneal cavity of rabbits in doses of 10 Cc. every 8 or 10 days. After 6 injections their blood is collected and preserved on ice; the serum is pipeted off after 24 hours Some rabbits, as control-animals, are not injected The blood to be tested is, if dried, first dissolved, and then, as is fluid blood, diluted with ordinary water and salt solution. Several drops of the test-serum are added and the tubes placed at a temperature of 35°. If the blood to be tested is human, a turbidity appears invariably; if not human, it remains clear.

antisialagogue, antisialagog (*an-te-si-al'-a-gog*) [*anti-*; σίαλον, saliva; ἀγωγός, leading]. 1. Preventing or checking salivation. 2. A remedy that is effective against salivation.

antisialic (*an-te-si-al'-ik*) [*anti-*; σίαλον, saliva]. 1. Checking the flow of saliva. 2. An agent that checks the secretion of saliva.

antisideric (*an-te-sid-er'-ik*) [*anti-*; σίδερος, iron]. 1. Incompatible with iron and counteracting its effects; impoverishing the blood. 2. An agent or drug opposed to the action of iron; one which impoverishes the blood.

antispasmin (*an-te-spaz'-min*), $C_{22}H_{26}NO_8Na + 3NaC_7H_6O_2$. A compound of 1 molecule of narceine sodium united with 3 molecules of sodium salicylate, occurring as a white, slightly hygroscopic powder containing about 50% of narceine. It is sedative and hypnotic. Dose ½–1½ gr. (0.01–0.1 Gm.).

antispasmodic (*an-te-spaz-mod'-ik*) [*anti-*; σπασμός, a spasm]. 1. Tending to relieve spasm. 2. An agent relieving convulsions or spasmodic pains, as the narcotics, the nitrites, etc.

antispastic (*an-te-spas'-tik*) [*anti-*; σπαστικός, drawing]. 1. Revulsive; counterirritant. 2. Antispasmodic. 3. A revulsive agent. 4. An antispasmodic.

antispermotoxin (*an-te-spur-mo-toks'-in*). A substance opposed in its action to spermotoxin.

antispirochetic (*an-te-spi ro-ke'-tik*) [*anti-*; *spirochæte*, a genus of bacteria]. 1. Arresting the action of spirochetes. 2. An agent having this power.

antisplenetic (*an-te-splen-et'-ik*) [*anti-*; *splen*, the spleen]. Remedial in diseases of the spleen.

antistaphylolysin (*an-te-staf-il-ol'-is-in*) [*anti-*; *staphylococci*, a genus of bacteria; λύσις, a loosing]. A substance antagonistic to the toxic products of staphylococci, contained in healthy blood-serum.

antistasis (*an-tis'-tas-is*) [*anti-*; στάσις, a standing]. Opposition; opposing effect.

antistatic (*an-tis-tat'-ik*). Antagonistic.

antisternum (*an-te-stur'-num*). The part of the back opposite the breast.

antistreptococcic (*an-te-strep-to-kok'-sik*) [*anti-*; *streptococci*, a genus of bacteria]. Antagonistic to or preventing the action of streptococci.

antistreptoccin (*an-te-strep-to-kok'-sin*). 1. The streptococcus-antitoxin. 2. A serum used in erysipelas.

antistrumous (*an-te-stru'-mus*) [*anti-*; *struma*, a scrofulous tumor]. Effective against struma or scrofula.

antisubstance (*an'-te-sub-stans*). Antibody, *q. v.*

antisudoral (*an-te-sū'-dor-al*) [*anti-*; *sudor*, sweat]. Checking the secretion of sweat.

antisudorific (*an-te-sū-dor-if'-ik*) [*anti-*; against; *sudor*, sweat; *facere*, to make]. Checking the excretion of sweat.

antisudorin (*an-te-sū'-dor-in*) [*anti-*; *sudor*, sweat]. A proprietary mixture said to consist of boric, citric, and salicylic acids, borax, glycerin, alcohol, distilled water, and several ethers; it is used to diminish sweating of the feet.

antisyphilitic (*an-te-sif-il-it'-ik*) [*anti-*; *syphilis*]. 1. Effective against syphilis. 2 A remedy used in the treatment of syphilis

antitabetic. An agent used to mitigate or aid in the cure of tabes dorsalis.

antitetanic (*an-te-tet-an'-ik*). Noting an agent used to mitigate or aid in the cure of tetanus.

antithenar (*an-te-the'-nar*) [*anti-*; θέναρ, the flat of the hand or the sole of the foot] 1. Opposite to thenar. 2. A muscle that extends the thumb or opposes it to the hand; an antithenar muscle. **a. eminence,** the border of the palm of the hand from the base of the little finger to the wrist. **a. muscles,** of the toe and of the thumb; the abductor pollicis pedis and the flexor brevis pollicis manus; also, the first dorsal interosseous muscle.

antithermic (*an-te-ther'-mik*) [*anti-*; θέρμη, heat]. Cooling, antipyretic.

antithermin (*an-te-ther'-min*) [see *antithermic*], $C_{11}H_{14}O_2N_2$. Phenylhydrazinlevulinic acid, a coal-tar derivative used as an antipyretic, analgesic, and antiseptic. Dose 5 gr. (0.3 Gm.).

antithermolin (*an-te-ther'-mo-lin*). Trade name of clay preparation used as an anodyne and antiphlogistic.

antithrombin (*an-te-throm'-bin*). A substance of the nature of a ferment, having the power of retarding or preventing coagulation.

antithyroidin (*an-te-thi-roid'-in*). See *serum, thyroid.*

antitonic (*an-te-ton'-ik*). 1. Counteracting the effects of a tonic. 2. A drug having opposite effects to those of a tonic. 3. Diminishing tone or tonicity.

antitussina (*an-te-tus'-in-a*) [*anti-*; *tussis*, cough]. An autogenous vaccine used in cases of whooping cough; it is made from the sputum of a patient who has not been previously treated by this preparation.

antitoxic (*an-te-toks'-ik*) [*anti-*; τοξικόν, poison]. Antidotal; counteracting poisons.

antitoxigen (*an-te-tok'-si-en*) [*antitoxin*; γεννάν, to produce]. Any substance which induces the production or increase of antitoxin in the blood.

antitoxin (*an-te-toks'-in*) [see *antitoxic*]. 1. A counterpoison or antidote elaborated by the body to counteract the toxins of bacteria. According to some authorities, antitoxins are, like the toxins, bacterial products. Antitoxins are used in the treatment of certain infectious diseases and also to confer immunity against these

diseases. 2. The commercial name for a fine white powder said to be a coal-tar product and used as an analgesic and antipyretic. Dose 10–15 gr. (0.65–1.0 Gm.) in from 1 to 4 hours. **a., artificial,** an antitoxin prepared by passing an electric current through a toxic bouillon. **a., diphtheria,** one prepared from the blood-serum of an animal inoculated with *Bacillus diphtheriæ*. **a., tetanus,** one prepared from the blood-serum of an animal inoculated with *Bacillus tetani*. **a. unit,** 10 times the amount of serum requisite to neutralize completely 10 times the minimum fatal dose of diphtheria toxin in a half-grown guinea-pig; or the amount of antitoxin which, when inoculated into a guinea-pig of 250 Gm. weight, will neutralize 100 times the minimum fatal dose of toxin of standard weight.

antitragic (*an-te-traj'-ik*) [*anti-; τράγος*, the tragus] Pertaining to the antitragus **a. muscle,** a mere rudiment in man; it arises from the antitragus, and extends to the cauda of the helix.

antitragus (*an-te-tra'-gus*) An eminence of the external ear opposite the tragus.

antitrismus (*an-te-triss'-mus*) [*anti-; τρισμός*, a creaking]. A condition of tonic spasm in which the open mouth cannot be closed.

antitrope (*an'-te-trōp*) [*anti-; τρέπειν*, to turn]. Organs arranged to form a symmetrical pair. Thus the right eye is an antitrope to the left. 2. An antibody.

antitropin (*an-te-tro'-pin*). An antibody

antitrypsin (*an-te-trip'-sin*). An antibody inhibiting the action of trypsin

antitryptic (*an-te-trip'-tik*). 1. A ferment inimical to bacteria 2. Antagonistic to proteolysis.

antitryptic index. The power of any given serum to inhibit tryptic digestion as compared with that possessed by a normal standard serum. It is said to be raised in cancerous conditions, and it is used to differentiate gastric cancer from gastric ulcer.

antituberculin (*an-te-tū-ber'-kū-lin*). Antibodies found in the sera of individuals who have been treated with tuberculin

antituberculotic (*an-te-tū-ber-kū-lot'-ik*) [*anti-; tuberculum*, a tubercle]. Good against tuberculosis.

antitulase (*an-te-tū'-lās*). An immunizing serum for tuberculosis obtained from animals which have been injected with tulase.

antituman (*an-te-tū'-man*) Trade name of a cancer remedy containing sodium chondroitin sulphate. Dose 1 to 2 gr.

antitussin (*an-te-tus'-in*) [*anti-; tussis*, cough]. An ointment consisting of difluordiphenyl 5 parts; vaselin, 10 parts, and lanolin, 85 parts; used as an application in catarrh.

antitussive (*an-te-tus'-iv*) [*anti-; tussis*, cough]. 1. Relieving or preventing cough. 2. A remedy for cough.

antityphoid (*an-te-ti'-foid*). Opposed to typhoid. **a. extract,** a preparation obtained by injecting repeatedly cultures of typhoid bacilli of increasing virulence into the peritoneal cavity of rabbits. The animals are killed as soon as they do not react to poisonous doses, and extracts are made of the thymus, spleen, bone-marrow, brain, and spinal cord, by soaking these organs in a solution of salt, glycerol, and alcohol, with the addition of some pepsin. The filtrate is injected in typhoid cases.

antitypic (*an-te-tip'-ik*) [*anti-; τύπος*, a type]. 1. Efficient against the periodic recurrence of a paroxysm or fever. 2. Irregular; not conformable to a type. 3. An antiperiodic.

antiuratic (*an-te-ū-rat'-ik*). 1. Efficacious against the deposition of urates. 2. An agent that prevents the deposit of urates.

antiurease (*an-ti-ū'-re-ās*). An antibody to urease

antivaccination (*an-te-vak-sin-a'-shun*). Opposition to the practice of compulsory vaccination.

antivenene, antivenin (*an-te-ven'-ēn, -in*) [*anti-; venenum*, poison]. A serum perfected by Calmette by injecting cobra venom mixed with solutions of calcium hypochlorite into horses. It is used in doses of 2½–5 dr. (10–20 Cc.) in bites of venomous serpents.

antivenereal (*an-te-ven-e'-re-al*) [*anti-; venereus*, pertaining to Venus, or to sexual intercourse]. Antisyphilitic; anaphrodisiac.

antivenin (*an-te-ven'-in*) The active ingredient in an antiserum against a venom of an animal or insect.

antivenomous (*an-te-ven'-om-us*). Antagonistic to venom, a term applied to immunized animals, to certain serums, and to antitoxins.

antivermicular (*an-te-vur-mik'-ū-lar*) [*anti-; vermis*, a worm]. Anthelmintic.

antiverminous (*an-te-vur'-min-us*). See *antivermicular*.

antivirulent (*an-te-vir'-ū-lent*) [*anti-; virus*, a poison]. Effective against viruses.

antivivisection (*an-te-viv-is-ek'-shun*). Opposition to vivisection or animal experimentation.

antivivisectionist (*an-te-viv-is-ek'-shun-ist*) [*anti-; vivus*, living; *sectio*, a cutting]. One who opposes the practice of vivisection.

antixenic (*an-te-zen'-ik*) [*anti-; ξένος*, strange]. Pertaining to the reaction of the tissues to foreign matter.

antizymotic (*an-te-zi-mot'-ik*) [*anti-; ζύμωσις*, fermentation]. 1. Preventing or checking fermentation. 2. An agent preventing the process of fermentation; an antiferment.

antlia (*ant'-le-ah*) [*ἀνά*, up; *τλαεῖν*, to lift]. A syringe or pump **a. gastrica,** a stomach pump. **a. lactea,** a pump for drawing milk from the breast. **a. mammaria,** same as *a lactea*.

antocular (*ant-ok'-u-lar*) [*ante*, before; *oculus*, the eye]. Situated in front of the eye.

antodontalgic (*an-to-don-tal'-jik*). See *antiodontalgic*.

antodyne (*an'-to-dīn*). Trade name of an analgesic and sedative, derived from phenol. Dose 7½ gr. (0.5 Gm.).

antophthalmic (*ant-off-thal'-mik*) [*anti-; ὀφθαλμία*, ophthalmia]. Preventive or curative of ophthalmia.

antorbital (*ant-orb'-it-al*) [*ante*, before; *orbita*, the orbit]. Located in front of the orbit.

antorgastic (*ant-or-gas'-tik*). See *antiorgastic*.

antozenic (*ant-o-ze'-nik*) [*anti-; ὄζειν*, to smell]. Curative of ozena.

antozone (*ant-o-zōn*) [*anti-; ὄζειν*, to smell]. An imaginary allotropic modification of oxygen, now known to be only hydrogen dioxide.

antozostomatic (*ant-o-zos-to-mat'-ik*) [*anti-; ὀζόστομος*, having a foul breath]. Corrective of a foul breath.

antra (*an'-trah*). Plural of *antrum*, *q. v.*

antracele (*an'-tra-sēl*) [*antrum; κήλη*, a tumor]. Dropsy of the antrum; an accumulation of fluid in the maxillary sinus.

antral (*an'-tral*) [*antrum*]. Relating to an antrum.

antrectomy (*an-trek'-to-me*) [*antrum; ἐκτομή*, excision]. Surgical removal of the walls of an antrum, especially the mastoid antrum.

antritis (*an-tri'-tis*) [*antrum; itis*, inflammation]. Inflammation of an antrum, especially the antrum of Highmore.

antroatticotomy (*an-tro-at-ik-ot'-o-me*). The operation of opening the mastoid antrum and the attic of the tympanum.

antrocele (*an'-tro-sēl*). See *antracele*.

antronalgia (*an-tron-al'-je-ah*) [*antrum; ἄλγος*, pain]. Pain in the antrum.

antronasal (*an-tro'-na-zal*). Pertaining to the antrum of Highmore and the nasal fossa.

antrophore (*an'-tro-for*). Cacao-butter bougies, containing tannin, 5 %; resorcinol, 5 %; thallin sulphate, 2 to 5 %; zinc sulphate, 0.5 %.

antrophose (*an'-tro-fōz*) [*ἄντρον*, a cavity; *φῶς*, light]. A phose having its origin in the central ocular mechanism.

antrorse (*an-trōrs'*) [*ante*, before; *versus*, turned]. In biology, directed upward or forward.

antroscope (*an'-tro-skōp*) [*antrum; σκοπεῖν*, to look] An instrument for examining the antrum.

antroscopy (*an-tros'-ko-pe*). Inspection of the antrum by means of an antroscope.

antrotome (*an'-tro-tōm*). An instrument for the performance of mastoid antrotomy

antrotomy (*an-trot'-o-me*). Incision of an antrum.

antrotympanic (*an-tro-tim-pan'-ik*) [*antrum, τύμπανον*, a drum]. Relating to the cavity of the tympanum and to the tympanic antrum.

antrotympanitis (*an-tro-tim-pan-i'-tis*) [*ἄντρον*, a cave; *τύμπανον*, a drum]. Chronic purulent otitis media

antrum (*an'-trum*) [L.]. 1. A cavity or hollow space, especially in a bone. 2 The antrum of Highmore. **a., cardiac,** Luschka's name for a dilatation sometimes found in the esophagus immediately above its passage through the diaphragm. **a., dental,** pulp-cavity of a tooth. **a., duodenal,** the normal dilatation presented by the duodenum near its origin. **a. ethmoidal,** the ethmoid sinus. **a. of Highmore,** a cavity in the superior maxillary bone. Syn., *antrum genæ*. **a. Highmori testis,** see *mediastinum testis* **a., mastoid,** the hollow space beneath the roof of the mastoid process. **a., maxillary,** see *a. of Highmore*. **a. pyloricum Willisii,** the cavity of the pylorus. **a. tubæ,** a sac-like dilatation of the Fallopian tube about an inch from the fimbriated extremity, regarded by some as occurring only in pregnancy. **a. tympanicum,** the mastoid antrum.

antrumectomy (*an-trum-ek'-to-me*). See *antrectomy*

antuitrin (*an-tū'-it-rin*). Trade name of an extract of the anterior lobe of the pituitary body.

Antyllus' method for aneurysm [Antyllus, a Greek physician of the third century A. D.]. It consists in ligation above and below the sac, followed by opening of the aneurysm and evacuation of its contents. See *ligation*.

anuresis (*an-ū-re'-sis*) [*ἀν*, priv.; *οὖρον*, urine]. Anuria.

anuretic (*an-ū-ret'-ik*) [see *anuresis*]. Pertaining to or affected with anuria.

anuria (*an-ū'-re-ah*) [see *anuresis*]. Suppression of the urine.

anuric (*an-ū'-rik*) [see *anuresis*]. Pertaining to anuria.

anurous (*an-ū'-rus*) [*ἀν*, priv.; *οὐρά*, a tail]. Without a tail.

anus (*a'-nus*) [L., "the fundament"]. The extremity of the rectum; the lower opening of the alimentary canal. **a., artificial,** an opening established from the bowel to the exterior at a point above the normal anus, most commonly from the colon, either in the lumbar or in the iliac region. **a., fissure of,** a slight tear in the mucous membrane at the anus, usually due to passage of hardened feces. It is very painful. **a., fistula of,** fistula in ano, a sinus opening from the rectum into the connective tissue about the rectum or discharging externally. **a., imperforate,** absence of the anus, the natural opening being closed by a membranous septum. **a., infundibuliform,** a relaxed condition of the anus with destruction of the natural folds. **a., preternatural,** an abnormal aperture serving as an anus, whether congenital, made by operation, or due to disease or injury. Syn., *fecal fistula; anus præternaturalis*. **a., preternatural ileovaginal, a., preternatural vaginal, a præternaturalis vestibularis,** the rare abnormity of the rectum opening through the vulva **a., Rusconi's,** the blastopore. **a., umbilical** a preternatural anus located in the umbilical region. **a. vulvovaginalis,** an anal opening communicating with the vulva.

anusol (*an'-us-ol*). Trade mark for suppositories of bismuth iodoresorcinsulphonate, used in the treatment of hemorrhoids, etc.

anvil (*an'-vil*). See *incus*.

anxietas (*ang-zi'-et-as*). See *anxiety*. **a. tibiæ, a. tibiarum.** 1. An annoying sensation of restlessness in the muscles of the legs noted in neurasthenia. 2. An irregular movement of the legs. Syn., *fidgets*.

anxiety (*ang-zi'-et-e*) [*anxius*, anxious]. Restlessness, agitation and general malaise, or distress, often attended with precordial pain, and a noticeable appearance of apprehension or worry.

anydremia, anydræmia (*an-id-re'-me-ah*). See *anhydremia*.

anypnia (*an-ip'-ne-ah*) [*ἀν*, priv.; *ὕπνος*, sleep]. Sleeplessness.

anytin (*an'-it-in*) See *anitin*.

anytol. See *anitol*.

A. O. C. Abbr. of anodic opening contraction.

aochlesia (*ah-ok-le'-ze-ah*) [*ἀ*, priv.; *ὄχλησις*, disturbance]. Rest, tranquillity, catalepsy.

aol (*a'-ol*). Trade name of a derivative of santalum album.

aolan (*a'-o-lan*). A trade preparation of sterile milk, used in protein therapy

A. O. M. Abbr for *Artium Obstetricus Magister*, i. e., Master of Obstetric Art.

aorta (*a-ort'-ah*) [*ἀορτή*, aorta]. The large vessel arising from the left ventricle and distributing, by its branches, arterial blood to every part of the body. It ends by bifurcating into the common iliacs at the fourth lumbar vertebra. The *arch*, that extending from the heart to the third dorsal vertebra, is divided into an *ascending*, a *transverse*, and a *descending* part. The *thoracic* portion extends to the diaphragm, the *abdominal*, to the bifurcation. **a., cardiac,** that part of the embryonic vascular system giving rise to the aortic arches. **a. chlorotica,** a narrowing of the aorta, sometimes found in chlorotic patients. **a., dorsal.** 1. The embryonic vessel formed by the junction of the two primitive aortas. Syn., *primordial aorta; subvertebral aorta*. 2. The thoracic aorta. **a., inferior,** the abdominal aorta. **a., left,** the embryonic division of the vascular system which finally becomes the aorta. **a., main,** the embryonic vessel formed by the junction of the two primitive aortas. **a., pectoral,** the thoracic aorta.

a., pelvic, the middle sacral artery **a., pericardiac,** the part of the aorta within the pericardial cavity **a., primitive.** 1 That part of the aorta extending from its origin to the point where it first branches 2 Two embryonic branches of the cardiac aorta extending through the first visceral arch and uniting to form the dorsal aorta **a., right,** the embryonic division of the aortic bulb which finally forms the pulmonary artery **a, root of,** the origin of the aorta at the heart Syn, *radix aortæ* **a., superior,** the thoracic aorta **a., systemic,** see *a, left* **a., thoracic,** see under *aorta*

aortal (*a ort' al*) [see *aorta*] Relating to the aorta.

aortarctia (*a-ort-ark'-she-ah*) [ἀορτη aorta, *arctare*, to constrict] A constriction or stenosis of the aorta

aortectasia (*a-ort-ek-ta'-ze-ah*) [ἀορτή, aorta, ἐκ, out, τάσις, a stretching] Aortic dilatation

aorteurysma (*a-ort-ū-riz'-mah*) [ἀορτη, aorta, εὐρύσμα a widening, *pl*, *aorteurysmata*] Aortic aneurysm or dilatation

aortic (*a ort' ik*) [see *aorta*] Pertaining to the aorta **a arch,** see *aorta* and *arch* **a area,** the part of the thorax about the second right costal cartilage, where the aortic murmurs and sounds are best heard **a foramen,** see *a opening of diaphragm* **a. murmur,** a murmur produced by disease of the aortic valves **a. opening of diaphragm,** the aperture in, or really behind, the diaphragm, through which the aorta passes **a. opening of heart,** the opening between the heart and the aorta **a. plexus,** the plexus of sympathetic nerves situated on the front and sides of the aorta, between the origins of the superior and inferior mesenteric arteries **a sinus,** a deep depression between the leaflets of the aortic valve and the aortic wall **a. valve,** the three semilunar valves closing the aortic opening during the cardiac diastole

aortism (*a or'-izm*) A liability to aortic disease

aortitis (*a ort i'-tis*) [*aorta*, ιτις, inflammation] Inflammation of aorta **a, nummular,** that characterized by white, circular patches in the inner coat

aortoclasia, aortoclasis (*a-or-to-kla' ze-ah, -sis*) [*aorta*, κλάσις a breaking] Rupture of the aorta

aortolith, aortolite (*a or' to-lith, -lit*) [*aorta*, λίθος, a stone] A calculus formed in the aorta

aortolithia (*a-or to-lith'-e ah*) A calcareous deposition in the aorta

aortomalacia, aortomalaxia (*a-ort-o-mal-a'-se-ah, -aks'-e-ah*) [*aorta*, μαλακία, softening] Softening of the aorta

aortopathy (*a-ort-op'-ath-e*) [*aorta*, πάθος, disease] Any disease of the aorta

aortoptosis, aortoptosia (*a or-top-to' sis, -to'-ze-ah*) [*aorta*, πτωσις, a falling] A drooping of the abdominal aorta associated with visceroptosis

aortosclerosis (*a-ort o-skle-ro'-sis*) [*aorta*, σκληρός, hard] Induration of the aorta

aortostenosis (*a-ort-o-sten-o'-sis*) [*aorta*, στενός, narrow] Stenosis or narrowing of the aorta

aosmic (*a-oz'-mik*) [ἀ, priv, ὀσμη, smell] Having no odor

apaconitine (*ap-ak-on'-it-in*). See *apoaconitine*

apagma (*ap-ag'-mah*) [ἀπδ, from, ἀγνύμαι, to break, *pl*, *apagmata*] 1 Separation, as of a fractured bone 2 The part separated

apallagin (*ap-al'-aj-in*) [ἀπαλλαγη, deliverance] An antiseptic mercury salt of nosophen (*q v*)

apallesthesia (*ah-pal-es-the'-ze-ah*) [ἀ, priv, πάλλειν, to quiver, sway, αἴσθησις, feeling]. Loss of sense of vibration, shown by lack of perception of the vibrations of a tuning fork applied to the skin

apandria (*ap-an'-dre-ah*) [ἀπό, from, ἀνήρ, a man]. Morbid dislike of the male sex

apanthropia (*ap-an-thro'-pe-ah*) See *apanthropy*,

apanthropy (*ap an'-thro-pe*) [ἀπό, from, ἀνθρωπος, man] Aversion to society, morbid desire for solitude

aparathyroidism (*ah-par-ah-thi'-roid-izm*) Condition in which the parathyroid glands are inactive.

aparathyrosis (*ah-par-a-thi-ro'-sis*) Excessive hypoparathyrosis, *q v*

apareunia (*ah-par-oo'-ne-ah*) [ἀ, priv, εὐνη, a bed] Absence, or impossibility of coitus.

aparthrosis (*ap ar thro'-sis*) [ἀπό, from, ἀρθρον, a joint] 1 Dislocation, luxation of a joint 2 In anatomy, diarthrosis

apastia (*ap-as'-te-ah*) [ἀπαστία, fasting] Abstinence from food, seen in mental disorder

apathetic (*ap-ath et'-ik*) [ἀ, priv, παθος, feeling] Affected with apathy, listless, without emotion.

apathism (*ap'-ath-izm*) Slowness to reaction (in opposition to *erethism*)

apathy (*ap'-ath-e*) [ἀ priv, πάθος, feeling] Insensibility, want of passion or feeling

apatropine (*ap-at'-ro-pen*) $C_{17}H_{21}NO_3$ A compound derived from atropine by the action of nitric acid It is said to produce peculiar convulsions

ape(*āp*) [ME.] A man-like monkey **a. fissures,** those fissures of the human brain that are also found in apes **a.-hand,** a peculiar shape of the hand produced by the wasting of the thumb-muscles, it is seen in some cases of progressive muscular atrophy

apella (*ap el'-lah*) [ἀ, priv, πελλα, skin] A circumcised person, one with a short prepuce

apellous (*ah-pel'-us*) [ἀ, priv, πελλα, skin] 1. Skinless 2 Without a prepuce, circumcised.

apenta (*ah-pen'-tah*) A Hungarian aperient water

apenteric (*ap-en-ter'-ik*) [ἀπό, from, ἐντέρον, intestine] Away from the intestine

apepsia (*ah-pep'-se-ah*) [ἀ priv, πέπτειν, to digest] Cessation or absence of the digestive function. **a, hysterical,** apepsia due to hysteria Syn, *hysterical anorexia* **a nervosa,** see *anorexia nervosa*

apepsinia (*ah pep-sin'-e ah*) [ἀ, priv, *pepsin*] Absence of pepsin or pepsinogen from the gastric juice

apeptic (*ah-pep'-tik*) [see *apepsia*] Affected with apepsia

apeptous (*ah-pep'-tus*) [ἀ, priv, πέπτειν, to digest]. 1 Crude, indigestible, uncooked 2 Apeptic.

aperception (*ap-ur-sep'-shun*) See *apperception*.

apergol (*ap-er'-gol*) A preparation containing apiol, ergotin, oil of savine, and aloin

aperient (*ap-e'-ri-ent*) [*aperire*, to open] 1 Laxative, mildly purgative 2 A mild purgative, a laxative.

aperiodic (*ah-pe-re-od'-ik*) [ἀ, priv, περιόδος, a circuit] Not periodic **a., galvanometer,** see *galvanometer*

aperistalsis (*ah-per-is-tal'-sis*) [ἀ, priv; περί, around, στάλσις, constriction] Cessation of the peristaltic movements of the intestine

aperitive (*ap-er'-it-iv*) [*aperire*, to open]. 1 Aperient 2 Deobstruent. 3 Stimulating the appetite, an appetizer **a., hygienic,** hygienic measures for stimulating the appetite

aperitol (*ap-er'-it-ol*). A proprietary purgative consisting of the acetate and valerate of phenolphthalein Dose 6 gr (0 4 Gm).

apertometer (*ap-ur-tom'-et-er*) [*aperture*; μέτρον, a measure]. An optic device for determining the angle of aperture of microscopic objectives.

apertor (*ap-er'-tor*) [L., an opener or beginner]. In anatomy, anything that opens. **a. oculi,** the levator palpebræ muscle.

apertura (*ap-er-tu'-rah*). An opening. **a. anterior ventriculi tertii cerebri,** the vulva cerebri. **a. aquæductus cochleæ,** opening of aqueduct of cochlea on the petrous bone. **a. chordæ,** the internal opening of the canal for the chorda tympani nerve. **a. canalis inguinalis,** the inguinal ring. **a. declivis,** the anus. **a. externa aquæductus vestibuli,** external opening of the aqueduct of the vestibule. **a. externa canaliculi cochleæ,** external opening of the canaliculus of the cochlea. **a. inferior canaliculi tympanici,** inferior opening of tympanic canaliculus. **a. lateralis ventriculi quarti,** the foramen of Key and Retzius. **a. medialis ventriculi quarti,** the foramen of Magendie. **a. narium,** same as nares. **a. pelvis (minoris) inferior,** lower opening of lesser pelvis (O. T. pelvic outlet). **a. pelvis (minoris) superior,** upper opening of lesser pelvis (O. T. pelvic inlet). **a. pelvis superior,** the superior strait of the pelvis. **a. piriformis,** piriform opening (O. T. anterior nares). **a. scalæ vestibuli cochleæ,** an opening between the vestibule and the scala vestibuli of the cochlea **a. sinus sphenoidalis,** opening of sphenoidal sinus. **a. spinalis,** the vertebral foramen. **a. superior canaliculi tympanici,** opening for the smaller petrosal nerve. **a. thoracis inferior,** lower thoracic opening. **a. thoracis superior,** upper thoracic opening. **a. tympanica canaliculi chordæ,** opening of the iter chordæ posterius into the tympanum. **a. uterina,** opening of the Fallopian tube into the uterus.

aperture (*ap'-er-chūr*) [*apertura*, an opening]. An opening. **a., angular,** in the microscope, the angle formed between a luminous point placed in focus and the most divergent rays that are capable of passing though the entire system of an objective. **a., numerical,** the capacity of an objective for admitting rays from the object and transmitting them to the image.

apex (*a'-peks*) [L., "the extreme end of a thing;" pl., *apices*]. The summit or top of anything; the point or extremity of a cone. **a. auriculæ** (Darwini), tip of the auricle of the ear. **a.-beat,** the impulse of the heart felt in the fifth intercostal space, about 3½ inches from the middle of the sternum. **a. capituli fibulæ,** apex of the head of the fibula; the styloid process of the fibula. **a. cartilaginis arytænoideæ,** tip of the arteniod cartilage. **a. columnæ posterioris,** apex of the posterior column. **a. cordis,** the apex of the heart. **a. linguæ,** tip of the tongue. **a. of the lung,** the upper extremity of the lung behind the border of the first rib. **a. murmur,** a murmur heard over the apex of the heart. **a. nasi,** the tip of the nose. **a. radicis dentis,** apex of the root of a tooth.

aphacia (*ah-fa'-se-ah*). See *aphakia*.

aphacic (*ah-fa'-sik*). See *aphakic*.

aphagia (*ah-fa'-je-ah*) [ἀ, priv.; φαγεῖν, to eat]. Inability to eat or swallow.

aphakia (*ah-fa'-ke-ah*) [ἀ, priv.; φακός, a lentil; the crystalline lens]. The condition of an eye without the lens.

aphakic (*ah-fa'-kik*) [see *aphakia*]. Not possessing a crystalline lens.

aphalangiasis (*ah-fa-lan-ii'-as-is* [ἀ, priv.; φάλαγξ, phalanx]. The loss or absence of fingers and toes, as in leprosy. Cf. *asinhum*.

aphantobiant (*af-an-to-bi'-ant*) [ἄφαντος, made invisible; βιον, living]. An invisible organism; Ultramicroscopic. A filtrable virus.

aphasia (*ah-fa'-ze-ah*) [ἀ, priv.; φάσις, speech]. Partial or complete loss of the power of expressing ideas by means of speech or writing. Aphasia may be either motor or sensory. *Motor* or *ataxic aphasia* consists in a loss of speech owing to inability to execute the various movements of the mouth necessary to speech, the muscles not being properly coordinated, owing to disease of the cortical center. It is usually associated with *agraphia*, "aphasia of the hand," inability to write, and right-sided hemiplegia. Some aphasiacs can write, but are unable to articulate words or sentences, this variety is variously named *aphemia*, *alalia*, or *anarthria*, according as the impairment of speech is more or less marked. Charcot supposes the center for articulate language divided into 4 subcenters—a visual center for words, an auditory center for words, a motor center of articulate language, and a motor center of written language. Lesions of one or more of these centers produce the characteristic forms of aphasia, all of which have clinical exemplifications. *Sensory aphasia*, or *amnesia*, is the loss of memory for words, and may exist alone or in association with motor aphasia Amnesia appears clinically in 3 distinct forms· 1. Simple loss of memory of words. 2. *Word-deafness*, or inability to understand spoken words (there is usually some paraphasia connected with this form) 3. *Word-blindness*, or inability to understand written or printed words **a., Broca's,** motor aphasia. **a., conduction,** such as is due to defect in some commissural connection between centers. **a., cortical, a., pictorial, a., true,** destruction of the function of the auditory speech-center. **a., functional,** that in which there is no manifest lesion, but it occurs as a result of excitement in hysteria or in severe constitutional disorders **a., gibberish,** a form of transcortical aphasia in which the speech is confused, words or syllables being transposed or jumbled together, due to disruption of the tracts associating cortical speech-centers. Syn., *jargon aphasia*. **a., Kussmaul's,** see *Kussmaul*. **a., mixed,** combined motor and sensory aphasia. **a., optic,** inability to give the names for objects seen, due to interrupted connection between the centers for vision and speech. **a., pure, a., isolated, a., subcortical, a., subpictorial,** aphasia arising from a lesion interrupting impulses toward the afferent tracts proceeding to the auditory speech-center. **a., supracortical, a., suprapictorial,** that form of lesion completely serving the connection of the auditory center with the cortical center, but not destroying the auditory speech-center, the afferent tracts proceeding to it or the efferent tracts passing from it to the motor speech-center. **a., tactile,** inability to recognize objects by the sense of touch, due to lesion in the central parietal lobule. **a., total, a., universalis,** inability to utter a single word. **a., Wernicke's,** cortical sensory aphasia.

aphasiac, aphasic (*ah-fa'-ze-ak, ah-fa'-zik*) [see *aphasia*]. Relating to or affected with aphasia.

aphelexia (*af-el-eks'-e-ah*). An incorrect form of the word *aphelxia*, *q. v.*

aphelotic (*af-el-ot'-ik*) [ἀφέλκειν, to draw away]. Absent-minded; lost in reverie.

aphelxia (*af-elks'-e-ah*) [ἀφέλκειν, to draw away]. Absence of mind; inattention to external impressions.

aphemesthesia (*ah-fem-es-the'-ze-ah*) [ἀ, priv.; φήμη, voice; αἴσθησις, sensation]. Word-blindness; word-deafness.

aphemia (*ah-fe'-me-ah*) [ἀ, priv.; φήμη, voice]. Motor aphasia; inability to articulate words or sentences from centric and not from peripheral disease. See *aphasia*.

aphemic (*ah-fe'-mik*) [see *aphemia*]. Relating to or affected with aphemia.

aphephobia (*af-e-fo'-be-ah*) [ἀφή, touch; φόβος, fear]. Hyperesthetic dread of contact with other persons.

apheter (*af'-et-er*) [ἀφέτηρ, one who lets go or sends away]. A supposed impulse-carrying, or trigger-material, probably a catastate, which communicates to the inogen the nerve impulse that causes its destruction, and the consequent muscular contraction. In a larger sense, any trigger-material that takes part in any functional process may be called an apheter.

aphilanthropy (*ah-fil-an'-thro-pe*) [ἀ, priv; φιλεῖν, to love; ἄνθρωπος, man]. Absence of social feeling; a frequent sign of approaching melancholia.

aphlogistic (*ah-flo-jist'-ik*) [ἀ, priv.; φλόξ, a flame]. 1. Noninflammable. 2 Burning without flame.

aphonia (*ah-fo'-ne-ah*) [ἀ, priv.; φωνή, voice] 1. Loss of speech, due to some peripheral lesion. 2. Hysterical, or paralytic absence of the power of speech. 3. Voicelessness. **a. clericorum**, clergyman's sore-throat. **a., paralytic**, see *paralysis, phonetic*. **a. paranoica**, stubborn silence in the insane. **a., spastic**, see *dysphonia spastica*.

aphonic (*ah-fon'-ik*) [see *aphonia*]. Speechless; voiceless.

aphorama, aphorema (*af-o-ra'-mah, -re'-mah*) [ἀφορᾶν, to have in full view]. The state of having projecting eyes, enabling one to see at a distance on each side without moving the head.

aphoresis (*ah-for-e'-sis*) [ἀ, priv.; φόκησις, bearing]. 1. Separation or ablation of a part, either by excision or amputation. 2. Lack of the power of endurance, as of pain

aphoria (*ah-fo'-re-ah*) [ἀ, priv.; φέρειν, to bear]. Sterility of the female; unfruitfulness. **a. impercita**, that attributed to aversion. **a. impotens**, that due to impairment of conceptive power. **a. incongrua**, that attributed to nonresponsive condition of the conceptive power to the seminal fluid. **a. paramenica**, that due to menstrual disorder. **a. polyposa**, that attributed to the existence of a uterine polyp.

aphoric, aphorous (*af'-or-ik, af'-or-us*) [ἄφορος, sterile]. 1. Relating to, causing, caused by, or affected with, sterility. 2. Unbearable, insufferable.

aphose (*ah'-fōz*) [ἀ, priv.; φῶς, light]. A subjective sensation of shadow or darkness. Cf. *phose*.

aphrasia (*ah-fra'-ze-ah*) [ἀ, priv.; φράζειν, to utter]. Absence of the power to utter connected phrases. **a., paralytic**, that due to paralysis of the ideation faculty. **a., superstitious**, the voluntary avoidance of certain words from scruples of nicety or religion

aphrenia (*ah-fre'-ne-ah*) [See *aphrenic*]. 1. Insanity. 2. Unconsciousness.

aphrenic, aphrenous, aphrænous (*ah-fren'-ik, ah'-fren-us, ah-fre'-nus*) [ἀ, priv.; φρήν, the mind]. Insane.

aphrodescin, aphrodæscin (*af-ro-des'-in*) [ἀφρώδης, foamy], $C_{52}H_{82}O_{22}$. A glucoside constituent of the cotyledons of horse-chestnut. It is a colorless, amorphous powder, soluble in alcohol and water, its watery solution frothing like soap.

aphrodine (*af'-ro-dēn*). Trade name of a preparation containing yohimbine; used for stud purposes.

aphrodisia (*af-ro-diz'-e-ah*) ['Αφροδίτη, Venus]. Sexual desire, especially when morbid or immoderate; sexual congress.

aphrodisiac (*af-ro-diz'-e-ak*) [see *aphrodisia*]. 1. Stimulating the sexual appetite; erotic. 2. An agent stimulating the sexual passion.

aphronesia, aphronesis (*ah-fro-ne'-ze-ah, ah-fro-ne'-sis*) [ἀ, priv.; φρόνησις, good sense]. Foolishness, silliness, madness.

aphronia (*ah-fro'-ne-ah*) [ἀ, priv.; φρήν, the mind]. Apoplexy.

aphtha (*af'-tha*) [ἄφθα, an eruption; pl., *aphthæ*]. A form of stomatitis characterized by the presence of small white vesicles in the mouth, occurring chiefly in children under 3 years, and supposed to be due to a special microorganism. Syn., *acacos; acacus; ophlyctis; morbus aphthosus; thrush; sprue; angina aphthosa; aphthous stomatitis*. **a. anginosa**, a form of sore throat attended by slight fever, redness, and enlargement of the fauces, with the formation of small whitish specks on the tongue and mucosa of the throat. It usually occurs in cold, damp weather and in women and children. **aphthæ, Bednar's**, two symmetrically placed ulcers seen at times on the hard palate of cachectic infants, one on each side of the mesial line. **aphthæ, cachectic**, those appearing beneath the tongue, and associated with grave constitutional symptoms; Riga's disease. Syn., *Cardarelli's aphthæ*. **a. epizootica**, see *foot-and-mouth disease*. **a. febrilis**, ulceration of the mouth, extending to the esophagus and stomach, and accompanied by fever. **a. serpens, aphthæ serpentes**, see *cancrum oris*. **aphthæ tropicæ**, a disease of the tropics marked by epigastric fulness, pain, vomiting, diarrhea, and redness of the tongue, with the formation of small, white, painful spots on it. Syn., *tropical sprue; pssilosis; gastroenteritis aphthosa indica; phlegmasia membranæ mucosæ gastropulmonalis*. **aphthæ, Valleix's**, see *aphthæ, Bednar's*.

aphthæ (*af'-the*). Plural of *aphtha*, *q. v.*

aphthenxia (*af-thengks'-e-ah*) [ἀ, priv.; φθέγξις, utterance]. A form of aphasia with impaired expression of articulate sounds.

aphthoid (*af'-thoid*) [see *aphtha*]. Resembling aphthæ.

aphthongia (*af-thon'-ge-ah*) [ἀ, priv.; φθόγγος, a sound]. A peculiar form of aphasia due to spasm of the muscles supplied by the hypoglossal nerve.

aphthous (*af'-thus*) [see *aphtha*]. 1. Pertaining to or affected with aphthæ. 2. Presenting the appearance of a surface covered with little ulcers.

aphylaxis (*ah-fi-laks'-is*) [ἀ, priv.; φύλαξις, a guarding]. Absence of immunity or of protection against disease.

aphytria retinæ (*af-i'-tre-ah ret'-in-e*). Loss of pigment in the retina, attributed to toxemia of infectious disease.

apical (*a'-pik-al*) [*apex*, the top]. Pertaining to the apex.

apicectomy (*ap-e-sek-to-me*) [*apex*, the top; ἐκτομή, excision]. Amputation of the root of a tooth

and extirpation of the inflammatory granulation tissue.

apiceotomy (*ap-is-e-ot'-o-me*). Same as apicotomy.

apices (*a'-pis-ez*) [L.]. Plural of *apex*. Summits.

apicifixed (*a-pis'-e-fikt*). Attached by the apex.

apiciform (*a-pis'-e-form*) [*apex*, the top; *forma*, form]. Sharp-pointed.

apicilar (*a-pis'-il-ar*) [*apex*, the top]. Attached to or located upon an apex.

apicoectomy (*ap-e-ko-ek'-to-me*) [*apex*; ἐκτομή, excision]. Excision of the apex of the root of a tooth.

apicolysis (*ap-e-kol'-is-is*) [*apex*; λύσις a solution]. Collapse of the apex of a lung brought about by an opening in the anterior chest wall.

apicotomy (*ap-e-kot'-o-me*) [*apex*; τόμη, a cutting]. Apicoectomy, amputation of any apex.

apiin (*ap'-e-in*) [*apium*, parsley], $C_{27}H_{32}O_{16}$. A glucoside obtained from the leaves, stems, and seeds of parsley, *Apium petroselinum*. A yellowish-white, crystalline powder, soluble in hot water and alcohol, slightly soluble in cold water, insoluble in ether.

apilocator (*a-pe-lō'-a-ter*). [*apex*; *locus*, place]. An instrument for locating the apex of the root of a tooth.

apinealism (*ah-pin'-e-al-izm*). [ἀ, priv.; *pineal*]. The symptoms and condition caused by absence of the pineal gland.

apinoid (*ah'-pin-oid*) [ἀ, priv.; πίνος, dirt; εἶδος, form]. Clean; not foul. **a. cancer,** scirrhus; so called from its cleanly section.

apinol (*ap'-in-ol*). A product obtained in the destructive distillation of the wood of the pine; it is said to be antiseptic and expectorant.

apiol (*ap'-e-ol*) [*apium*, parsley; *oleum*, oil], $C_{12}H_{14}O_4$. A principle occurring in parsley-seeds, it crystallizes in long white needles, with a slight odor of parsley; melts at 30° C. and boils at 294° C. It is used in dysmenorrhea and in malaria. In large doses it produces ringing in the ears and frontal headache. Syn., *parsley-camphor*. Dose 10–15 gr (0.65–1.0 Gm.). **a., green,** crude ethereal oil from seeds of parsley, *Apium petroselinum*. It is used as an emmenagogue and antiperiodic. Dose, in dysmenorrhea, 5–10 min. (0.3–0.6 Cc.) 2 or 3 times daily; in malaria, 15–30 min. (1–2 Cc.). **a., liquid,** an alcoholic extract of parsley-seeds.

apiolin (*ap'-e-ol-in*). Rectified essential oil of parsley, a yellow neutral liquid boiling at about 300° C., soluble in alcohol. It is used as an emmenagogue. Dose, 0.2 Gm. 2 or 3 times daily.

apion (*ap'-e-on*) [*apium*, parsley]. A substance obtained from apiolic acid by heating with dilute sulphuric acid; melts at 69° C.

apiosoma (*ap-e-o-so'-mah*). A protozoon said to be found in the blood of patients suffering from typhus fever; it is related to *Piroplasma bigonicum*.

apiphobia (*ap-e-fo'-be-ah*) [*apis*, a bee; φόβος, fear]. Morbid terror of bees and of being stung.

Apis (*a'-pis*) [L., a bee]. A genus of hymenopterous insects. **A. mellifica,** a honey-bee; in homeopathy the poison of the honey-bee's sting, or a preparation thereof.

apisin (*ap'-is-in*) [*apis*, a bee]. Bee-poison.

apisination (*ap-is-in-a'-shun*). Poisoning by bees.

apituitarism (*ah-pit-ū'-it-ar-izm*). The condition of absence of the function of the pituitary body, owing to removal of that body.

Apium (*a'-pe-um*) [L.]. A genus of umbelliferous plants. **A. graveolens,** see *celery*. **A. petroselinum,** is the common garden parsley; aperient, diuretic, somewhat antiperiodic; useful in dysmenorrhea. Dose of the fluidextract (of the root) gtt. xv–ʒj.

A-P-L. The anterior-pituitary-like principle or substance. It is derived from the placenta (Collip). See *prolan*.

aplacental (*ah-plas-en'-tal*) [ἀ, priv.; *placenta*]. Destitute of placenta.

aplanasia (*ah-plan-a'-ze-ah*) [ἀ, priv.; πλανᾶν, to wander]. Entire or nearly entire absence of spherical aberration.

aplanatic (*ah-plan-at'-ik*) [see *aplanasia*]. Not wandering; rectilinear. **a. focus,** that focus of a lens the rays from which do not undergo spherical aberration in their passage through the lens. **a. lens,** a lens corrected for aberration of light and color, a rectilinear lens.

aplanatism (*ah-plan'-at-izm*). See *aplanasia*.

aplasia (*ah-pla'-ze-ah*) [ἀ, priv.; πλάσσειν, to form]. Defective development. Syn., *agenesis*.

aplastic (*ah-plas'-tik*) [see *aplasia*]. 1. Structureless; formless. 2. Incapable of forming new tissue. 3. Relating to aplasia. 4. Defective in fibrin. 5. Applied to inflammations unattended with organizable exudation. **a. anemia,** that in which the formative processes in the bone marrow do not take place. **a. lymph,** a nonfibrinous material incapable of coagulation or organization.

aplestia (*ah-ples'-te-ah*) [ἀπλήστια, insatiate desire]. Insatiable hunger; acoria.

apleuria (*ah-ploo'-re-ah*) [ἀ, priv.; πλευρά, a rib]. Congenital absence of the ribs

apnea, apnœa (*ap-ne'-ah*) [ἀ, priv.; πνεῖν, to breathe]. 1. A transient cessation of respiration from an overabundance of oxygen, as, *e. g.*, after forcible respiration. 2. Asphyxia. **a., cardiac,** the period of apnea in Cheyne-Stokes respiration. **a., nervous,** that due to disorders of the centers of respiration. **a., placental,** placental tuberculosis. **a., uterine,** a form of dyspnea observed in hysterical patients, due to no manifest disease. Syn., *uterine asthma*.

apneumatic (*ap-nū-mat'-ik*) [ἀ, priv., πνεῦμα, breath]. 1. Collapsed; uninflated, not inflatable; said of parts of the lung. 2. Carried on with the exclusion of air, as an apneumatic operation or process.

apneumatosis (*ah-nū-mat-o'-sis*) [ἀ, priv.; πνευμάτωσις, inflation]. Collapse or noninflation of air-cells.

apneumia (*ap-nū'-me-ah*) [ἀ, priv.; πνεύμων, lung]. Congenital absence of the lungs.

apnœa (*ap-ne'-ah*). See *apnea*.

apo- (*ap'-o*) [ἀπό, from]. A prefix denoting *from, away, separation*.

apoaconitine (*ap-o-ak-on'-it-ēn*) [ἀπό, from; *aconitum*, aconite], $C_{31}H_{41}NO_{11}$. An alkaloid prepared from aconitine by dehydration.

apoatropine (*ap-o-at'-ro-pēn*) [ἀπό, from; *atropine*], $C_{17}H_{21}NO_2$. An alkaloid obtained by the action of HNO_3 on atropine.

apobiosis (*ap-o-bi-o'-sis*) [ἀπό, from; βίος, life]. Local death of a part.

apoblema (*ap-o-ble'-mah*) [ἀπόβλημα; ἀπό, away; βάλλειν, to throw]. The product of abortion.

apobole (*ap-ob'-o-le*) [ἀποβόλη, a throwing away]. Expulsion; abortion.

apocamnosis (*ap-o-kam-no'-sis*) [ἀποκάμνειν, to grow utterly weary]. Intense and readily induced fatigue.

apocatastasis (*ap-o-kat-as'-tas-is*) [ἀποκατάστασις, restoration]. 1. Return to a previous condition. 2. The subsidence of an abscess or tumor.

apocatharsis (*ap-o-kath-ar'-sis*) [ἀπό, away, καθαρσις, purgation] Purgation, abevacuation.

apocathartic (*ap o-kath-ar'-tik*) Same as *cathartic*

apocenosis (*ap-o-sen-o'-sis*) [ἀποκενόειν, to drain] 1 An increased flow or evacuation of blood or other humors 2 A partial evacuation In the plural, *apocenoses*, Cullen and Swediaur's term for afebrile diseases marked by fluxes.

apochromatic (*ap-o-kro-mat'-ik*) [ἀπό, away, χρῶμα, color] Without color **a lens**, a lens of a special variety of glass, corrected for spherical and chromatic aberration

apocodeine (*ap o ko'-de in*) [ἀπό, from, *codeine*], $C_{18}H_{19}NO_2$ An alkaloid prepared from codeine by dehydration It is emetic and expectorant, with other qualities much like those of codeine, The hydrochloride is generally used in bronchitis Dose 3–4 gr (0 2–0 25 Gm.)

apocope (*ap ok' o-pe*) [ἀπό, from, κοπή, a cutting] Amputation or abscission, an operation or a wound that results in loss of substance

apocopous (*ap-ok' o pus*) [ἀπόκοπος, cut off] Castrated

apocoptic (*ap-o kop'-tik*) [ἀποκόπτειν, to cut off] Affected by or occurring from removal of a part

apocrine (*ap -o krēn*) [ἀωό from κρίνειν I separate] ptyocrine Said of glands that resemble sweat glands but are larger in diameter They open into the lumen of hair follicles never to the external surface of the body, found in the pubis anus, and mammary regions See *exocrine*

apocrustic (*ap-o krus'-tik*) [ἀποκρούειν, to beat off] Repellent defensive astringent

apocynamarin (*ap o-syn-am'-ar-in*) The active principles of apocynum cannabinum, it is crystalline, and is said not to be a glucoside

apocynein (*ap o syn'-e in*) A glucoside from *Apocynum cannabinum* similar to digitalein

apocynin (*ap os'-in in*) [see *apocynum*] The precipitate from a tincture of *Apocynum cannabinum*, tonic, alterative, and cathartic Dose ½–1 gr (0 016–0 065 Gm)

apocynum (*ap os' in um*) [*apocynon*, dogbane] Canadian hemp The root of *A cannabinum*, the properties of which are due to *apocynin* It is a good expectorant, in full doses it is emetic and cathartic Dose 5–20 gr (0 3–1 2 Gm), of *tincture* 5–40 min (0 3–2 5 Cc) Another American species, *A androsæmifolium*, has similar properties **a , fluidextract of** Dose 5–20 min (0 3–1 2 Cc)

apodal (*ap' od-al*) See *apodous*

apodemialgia (*ap-o-de me al' je ah*) [ἀποδημία, journey ἄλγειν, to grieve] A morbid dislike of homelife with a desire for wandering

apodia (*ah po' de-ah*) [ἀ, priv , πούς, a foot] Congenital absence of feet

apodous (*ap' o-dus*) [ἀ, priv , πούς a foot] Footless, characterized by apodia

apogamy (*ap-og'-am-e*) [ἀπό, away from, γάμος, marriage] In biology, 1 Asexual reproduction where the opposite usually occurs 2 Total normal absence of sexual reproductive power

apogee (*ap'-o-jee*). The stage of greatest acuity of a disease

apokenosis (*ap-o-ken-o'-sis*) See *apocenosis*

apolar (*ah-po'-lar*) [ἀ, priv., πόλος, the end of an axis] Not possessing a pole **a. cells**, nerve-cells without processes

apolepsis (*ap-o-lep'-sis*) [ἀπόλημψις, a leaving off] Suppression or retention of a secretion or excretion, cessation of a function.

apolexis (*ap-o-leks'-is*) [ἀπόληξις, a declining] The decline of life; the stage of catabolism or decay.

Apollinaris water (*ap-ol-in-a'-ris*) A German alkaline mineral water, highly charged with carbonic acid, and largely used as a diluent in gout, rheumatism, etc

apolysin (*ap-ol'-is-in*), $C_6H_4(OC_2H_5)NH_3C_6O_8$ A compound of citric acid and phenetidin. It is antipyretic and analgesic Dose 8–90 gr (0 5–5 0 Gm) daily Syn , *monophenetidin citric acid*

apomorphine (*ap o-mor' fen*) [ἀπό, from, *morphine*], $C_{17}H_{18}NO_2$ An artificial alkaloid, derived from morphine by the abstraction of a molecule of water **a. hydrochloride** (*apomorphinæ hydrochloridum*, U S P), is the salt used, and is a grayish, crystalline powder It acts as a centric emetic Dose $\frac{1}{30}$–$\frac{1}{15}$ gr (0 003–0 0065 Gm), hypodermatically, or $\frac{1}{10}$–$\frac{1}{4}$ gr (0 0065–0 01 Gm) by the mouth It is expectorant in small doses

apomorphosis (*ap o-mor-fo'-sis*) [ἀπομορφοῦν, to change the form] A chemical change by which one substance acting upon another takes something away from it

apomyelin (*ap-o-mi'-el-in*) [ἀπό, from, μυελός, marrow] A peculiar phosphatized principle reported to exist in the brain tissue and containing no glycerol

apomyttosis (*ap-o-mit-o'-sis*) [ἀπομύσσειν, to blow the nose] Any disease marked by stertor, a sneezing

aponal (*ap' o-nal*) The carbamic acid ester of tertiary amyl alcohol, it is used as a hypnotic in doses of 15 to 30 gr (1–2 Gm)

apone (*ap on'*) [Fr *à* priv , πόνος, pain] An anodyne, especially the concentrated tincture of capsicum, used externally for the relief of pain, and internally in small doses, diluted, for hemorrhoids dyspepsia and mania Dose gtt. iij–x

aponeurography (*ap o-nu-rog'-ra fe*) [ἀπονεύρωσις, aponeurosis, γράφη, a writing] A description of the fasciæ, or aponeuroses

aponeurology (*ap-o nu-rol'-o-je*) [ἀπονεύρωσις, aponeurosis, λόγος, an account] The science of the fasciæ or aponeuroses

aponeurosis (*ap-o nu-ro'-sis*) [ἀπό, from, νευρον, a tendon] A fibrous, membranous expansion of a tendon giving attachment to muscles or serving to inclose and bind down muscles **a. of occipitofrontalis muscle**, the aponeurosis that separates the two slips of the occipitofrontalis muscle **a. of soft palate**, a thin, firm, fibrous layer, attached above to the hard palate, and becoming thinner toward the free margin of the velum **a., subscapular**, a thin membrane attached to the entire circumference of the subscapular fossa, and affording attachment by its inner surface to some of the fibers of the subscapularis muscle **a., supraspinous**, a thick and dense membranous layer that completes the osseofibrous case in which the supraspinatus muscle is contained, affording attachment by its inner surface to some of the fibers of the muscle **a., vertebral**, a thin aponeurotic lamina extending along the whole length of the back part of the thoracic region, serving to bind down the erector spinæ, and separating it from those muscles that unite the spine to the upper extremity

aponeurositis (*ap-on-ū-ro-si'-tis*) [*aponeurosis*, itis, inflammation] Inflammation of an aponeurosis

aponeurotic (*ap-on-ū-rot'-ik*) [*aponeurosis*] Pertaining to an aponeurosis. **a. fascia**, a deep fascia

aponeurotome (*ap-on-ū'-ro-tōm*) [*απονεύρωσις*, aponeurosis; *τόμη*, cutting]. An instrument for dividing fasciæ.

aponeurotomy (*ap-on-ū-rot'-o-me*) [*απονεύρωσις*, aponeurosis; *τόμη*, cutting]. The incision, dissection, or anatomy of the fasciæ; fasciotomy.

aponia (*ah-pon'-e-ah*) [*ἀ*, priv.; *πόνος*, toil, pain]. Absence of toil or pain, non-exertion.

apophlegmatic (*ap-o-fleg-mat'-ik*) [*ἀπό*, away; *φλέγμα*, phlegm]. Promoting the expulsion of mucus from the air passages.

apophlegmatisant (*ap-o-fleg-mat'-iz-ant*). [See *apophlegmatic*]. A drug or agent to facilitate the discharge of mucus from the air passages.

apophylaxis (*ap-o-ĥ-laks'-is*). [*ἀπό*, away from; *φυλάξις*, a guarding]. A diminution of the protective power of the blood.

apophysary (*ap-off'-is-a-re*) [*apophysis*] Pertaining to or of the nature of an apophysis.

apophysate (*ap-off'-is-āt*) [*ἀπό*, from; *φύσις*, growth]. Furnished with an apophysis.

apophyseal, apophysial (*ap-o-fiz'-e-al*). Same as apophysary.

apophyseopathia (*ap-of-iz-e-o-path'-e-ah*) [*apophysis; πάθος*, disease] Schlatter's disease, *q. v.*

apophysis (*ap-off'-is-is*) [*ἀπό*, from; *φύσις*, growth; pl. *apophyses*]. A process, outgrowth, or swelling of some part or organ, as of a bone. **a., basilar**, the basilar process of the occipital bone. **a., cerebral**, the pineal body. **apophyses, false**, see *epiphyses*. **a. lenticularis**, the orbicular process of the temporal bone. **a. raviana**, the processus gracilis of the malleus. **apophyses, true**, those which have never been epiphyses

apophysitis (*ap-of-is-ī'-tis*) [see *apophysis; ιτις*, inflammation]. 1. Inflammation of an apophysis. 2. Appendicitis

apoplasmia (*ap-o-plaz'-me-ah*) [*ἀπό*, away; *πλάσμα*, plasm] Deficiency of the blood-plasm.

apoplectic (*ap-o-plek'-tik*) [*apoplexy*]. Pertaining to or affected with apoplexy. **a. equivalents**, a name given to the premonitory symptoms of apoplexy, indicating that the brain is subject to alterations in blood-pressure.

apoplectiform (*ap-o-plek'-tif-orm*) [*apoplexy; forma*, form] Resembling apoplexy.

apoplectigenous (*ap-o-plek-tij'-en-us*) [*apoplexy; γεννᾶν*, to produce]. Producing apoplexy or cerebral hemorrhage.

apoplectoid (*ap-o-plek'-toid*). *Apoplectiform, q. v.*

apoplexy (*ap'-o-pleks-e*) [*ἀποπλήσσειν*, to strike down, to stun]. The symptom-complex resulting from hemorrhage or the plugging of a vessel in the brain or spinal cord. The term is sometimes also applied to the bursting of a vessel in the lungs, liver, etc. **a., asthenic**, that due to vital depression. **a., atonic**, that which comes on gradually and does not attain a high degree of development. Syn., *imperfect apoplexy*. **a., atrabilious**, deep melancholy attributed to resorption of bile. **a., bulbar**, that due to hemorrhage into the substance of the oblongata, causing paralysis of one or both sides of the body, inability to swallow, difficulty in protruding the tongue, dyspnea, gastric disorders, and tumultuous action of the heart. **a., capillary**, one resulting from rupture of capillaries. **a., consecutive**, that due to the arrest of some habitual discharge or eruption. **a., cutaneous.** 1. See *purpura hæmorrhagica*. 2. A sudden effusion of blood to the skin and subcutaneous tissue. **a., dysarthritic**, a form accompanying arthritic diseases, in which the pain disappears from the joints, and vertigo, pain in the head, etc., appear. **a., epileptic**, coma with epileptoid symptoms, sometimes observed in cerebral and acute inflammatory diseases. **a., febrile**, paroxysmal fever attended with deep sleep and stertor. Syn., *apoplexia febricosa*. **a., fulminant**, a sudden and fatal apoplexy. **a., ingravescent**, a term applied to a form of apoplexy in which there is a slowly progressive loss of consciousness, due to a gradual leakage of blood from a ruptured vessel. **a., muscular**, an escape of blood into the muscular tissue. **a., nervous**, 1. Acute anemia of the brain. 2. A condition marked by symptoms of cerebral congestion and hemorrhage which are due to functional disturbances of the nervous system. **a. of the ovary, a., ovarian**, hemorrhage into the stroma of the ovary, through the rupture of a follicle, converting the organ into a cyst or hematoma. The blood is gradually absorbed, though it gives rise to great pain; the cause is unknown. **a., phlegmonous**, a condition attributed to inflammation of the brain and its membranes; it is marked by delirium, fever, severe headache, conjunctival injection, lacrimation, and hard pulse. **a., pituitous**, serous apoplexy. **a., placental, a., placentary**, escape of blood into the placental substance **a., pontile**, apoplexy due to a rupture of a blood-vessel in the pons Varolii **a., progressive**, that in which there is a very gradual increase of the paralysis and other symptoms. **a., pulmonary**, escape of blood into the pulmonary parenchyma **a., pulmonary, vascular**, very acute and extensive congestion of the lungs, leading to apoplectic symptoms and a fatal termination. **a., sanguineous**, hemorrhage into or upon the brain. **a., serous**, that due to an effusion of serous matter into or upon the brain. **a., simple**, the name given to those cases of death from coma in which no cerebral lesion is found. **a., spinal**, rupture of a blood-vessel of the spinal cord. **a., splenic**, (1) flow of blood into the splenic substance, (2) contagious anthrax. **a., suppurative**, that due to purulent processes and fever. **a., symptomatic**, that attributed to another disease or to the arrest of some habitual evacuation. **a., uterine**, escape of blood into the muscular tissue of the uterus. **a., venous**, that due to congestion of the veins.

apopsychia (*ap-op-sik'-e-ah*) [*ἀπό*, away; *ψυχή*, spirit] Syncope; fainting; a faint.

apoptosis (*ap-op-to'-sis*) [*ἀπό*, away, *πτῶσις*, a falling]. A falling off, as of a crust, or of the hair; loosening of a scab or crust.

apoquinamine (*ap-o-kwin'-am-ēn*), $C_{19}H_{22}N_2O$. An artificial alkaloid occurring as a white, amorphous substance derived from quinamine, conquinamine, or quinamidine by action of hydrochloric acid.

aporetin (*ap-o-re'-tin*) [*ἀπό*, from; *ῥητίνη*, a resin]. A purgative resin derived from rhubarb.

aporioneurosis (*ap-or-e-o-nū-ro'-sis*) [*ἀπορία*, embarrassment, hesitation]. Anxiety neurosis.

aporocephalous (*ap-o-ro-sef'-al-us*) [*ἄπορος*, difficult to distinguish; *κεφαλή*, the head]. Having a head scarcely distinguishable.

aporrhegma (*ap-o-reg'-mah*) [*apo-; ῥηγνύναι*, to break in pieces]. A substance split off from another substance by biological action.

aporrhinosis (*ap-or-in-o'-sis*) [*ἀπό*, from; *ῥις*, nose]. A discharge from the nostril.

aporrhipsis (*ap-or-ip'-sis*) [*ἀπό*, away from; *ῥίπτειν*, to throw]. The throwing off of the

clothes or the bed clothes; a symptom seen in some cases of insanity and in delirium.

aposepsis (*ap-o-sep'-sis*) [*ἀπόσηψις*, putrefaction; see *sepsis*]. Complete putrefaction.

aposia (*ah-po'-ze-ah*) [*ἀ*, priv.; *πόσις*, drinking]. Absence of thirst; adipsia.

apositia (*ap-o-sit'-e-ah*) [*ἀπό*, from; *σῖτος*, food]. Aversion to or loathing of food.

apositic (*ap-o-sit'-ik*) [*ἀπό*, from; *σῖτος*, food]. Impairing the appetite; affected with apositia.

apostasis (*ap-os'-tas-is*) [*ἀπόστασις*, a standing away from]. 1. An abscess. 2. The end or the crisis of an attack of disease; termination by crisis. 3. An exfoliation.

apostatic (*ap-os-tat'-ik*) [*ἀπόστασις*, a standing away from]. Relating to or of the nature of an apostasis.

apostaxis (*ap-o-staks'-is*) [*ἀπό*, from; *στάξις*, a dropping]. A discharge of fluid by drops; epistaxis.

apostem (*ap'-o-stem*), or **apostema** (*ap-o-ste'-mah*) *ἀπόστημα*, an abscess]. An abscess.

apostematic (*ap-os-tem-at'-ik*) [*ἀπόστημα*, an abscess]. Relating to or of the nature of an abscess.

apostemation (*ap-os-tem-a'-shun*) [*apostematio*, abscess formation]. The formation of an apostem or abscess.

aposthia (*ah-pos'-the-ah*) [*ἀ*, priv.; *πόσθη*, prepuce; penis]. Congenital absence of the prepuce or penis.

Apostoli's method [Georges *Apostoli*, French physician, 1847–1900]. The use of strong electrolytic or chemical galvanocaustic currents in the treatment of diseases of the female generative organs, especially uterine fibroids.

apostrophe (*ap-os'-tro-fe*) [*ἀπό*, away; *στρέφειν*, to turn]. The arrangement of chlorophyll bodies along the side walls of the cells as a result of excess or deficiency of light. Cf. *epistrophe* and *dystrophe*

apothecaries' weight. A system of weights and measures used in compounding medicines. The troy pound of 5760 gr is the standard. It is subdivided into 12 ounces. The ounce is subdivided into 8 drams, the dram into 3 scruples, and the scruple into 20 gr. For fluid measure the quart of 32 fluidounces is subdivided into 2 pints, the pint into 16 fluidounces, the ounce into 8 fluidrams, and the fluidram into 60 minims. The following symbols and abbreviations are used:

♏, *minim.*	℥, *uncia*, an ounce (480 gr).
℈, *scrupulus*, a scruple (20 gr).	lb, *libra*, a pound.
ʒ, *drachma*, a dram (60 gr).	O., *octarius*, a pint.
	gr., *granum*, a grain.
	ss., *semissis*, one-half.

See *Weights and Measures*.

apothecary (*ap-oth'-e-ka-re*) [*ἀποθήκη*, a storehouse]. 1. A druggist or pharmaceutical chemist, one who prepares and sells drugs, fills prescriptions, etc. 2. In Great Britain a physician filling his own prescriptions; especially one licensed by the Society of Apothecaries of London, or by the Apothecaries' Hall of Ireland.

apothem, apothema (*ap'-o-them, ap-oth'-em-ah*) [*ἀπό*, from; *θέμα*, a deposit]. A brown powder deposited from vegetable infusions or decoctions exposed to the air.

apothesine (*ap-oth'-es-in*). Trade name of the cinnamic ester of diethylaminopropyl alcohol hydrochloride; used as a local anesthetic.

apothesis (*ap-oth'-es-is*) [*ἀπόθεσις*, a putting back]. The reduction of a fracture or luxation. **a. funculi umbilicalis**, the reposition of an abnormally protruded umbilical cord.

apotheter (*ap-oth'-et-er*). A navel-string repositor devised by Braun, consisting of a staff with a sling attached in which the prolapsed funis is placed and carried up into the uterine cavity.

apous (*ah'-pus*). See *apodous*.

apoxemena (*ap-oks-e'-men-ah*), [*ἀποξεῖν*, to shave away]. The group of substances to be removed from a pocket in the treatment of pericementoclasia.

apoxesis (*ap-oks-e'-sis*) [See *apoxemena*]. The act of removing apoxemena from the periclasial pocket, and rendering the denuded cementum smooth.

apozem, apozema (*ap'-o-zem, ap-oz'-em-ah*) [*ἀπό*, away; *ζεῖν*, to boil]. A decoction, especially one to which medicines are added.

apparatotherapy (*ap-ar-at-o-ther'-ap-e*). Treatment by mechanical apparatus.

apparatus (*ap-ar-a'-tus*) [*apparatus*, preparation]. 1. A collection of instruments or devices used for a special purpose. 2. Anatomically the word is used to designate collectively the organs performing a certain function. 3. A collection of pathological phenomena 4 Cystotomy. **a., absorbent**, the blood-vessels and lymphatics. **a., acoustic, a., auditory**, the external and internal ear, the auditory canal, the tympanum, and the Eustachian tube. **a., chirurgicus**, surgical apparatus, **a., digestorius**, digestive apparatus. **a., lacrimalis**, lacrimal apparatus. **a. ligamentosus colli**, the occipitoaxoid ligament, a broad band at the front surface of the spinal canal that covers the odontoid process. **a. magnus, a. major**, median cystotomy. **a. minor**, lateral lithotomy. **a. respiratorius**, respiratory system. **a., segmental**, see *nephridia*. **a., sound-conducting**, a collective term for the auricle, external auditory canal, tympanum, Eustachian tube, and mastoid cells. **a., sound-perceiving**, that part of the organism concerned in the perception of sound consisting of the auditory nerve, and its center of origin and peripheral distribution, or the organs of the labyrinth. **a., urinary**, the kidneys, ureters, bladder, and urethra **a. urogenitalis**, urogenital system. **a., uropoietic**, the kidneys.

apparent (*ap-a'-rent*) [*apparere*, to appear]. Seeming; appearing to be like. **a. death**, see *death*.

apparition (*ap-ar-ish'-un*) [*apparitio*, an appearance]. 1. A visual delusion or hallucination. 2. The sudden aggregation of scattered principles into an element or corpuscle.

appendage (*ap-en'-dāj*) [*appendere*, to weigh; hang]. Anything appended, usually of minor importance. **a., auricular.** 1. The projecting part of the cardiac auricle. 2. Virchow's name for a round or elongated cartilaginous prominence in front of the tragus. **a. cecal**, the appendix vermiformis. **a.s, cutaneous, a.s, dermal**, the nails, hair, sebaceous glands, and sweat-glands. **a.s, epiploic**, see *appendices epiploicæ* under *appendix*. **a.s of the eye**, the eye-lashes, eyebrows, lacrimal gland, lacrimal sac and ducts, and conjunctiva. **a.s, fetal**, the placenta, amnion, chorion, and umbilical cord. **a.s, moss-like**, short processes seen on some nerve fibres in the granular layers of the cerebellum. **a., ovarian**, the parovarium. **a., pineal**, the epiphysis. **a., pituitary**, the hypophysis. **a.s, uterine**, the ovaries and oviducts.

appendalgia (*ap-end-al'-je-ah*) [*appendix; ἄλγος*, pain]. Pain in the appendicular region.

appendectomy (*ap-en-dek'-to-me*). See *appendicectomy*.

appendiceal, appendical (*ap-en-di-se'-al, ap-en'-di-kal*). See *appendicular*.

appendicectomy (*ap-en-dis-ek'-to-me*) [*appendix; ἐκτομή*, excision]. Excision of the vermiform appendix

appendices epiploicæ (*ap-en'-dis-ēz ep-ip-lo'-is-e*). See *appendix*.

appendicitis (*ap-en-dis-i'-tis*) [*appendix; ιτις*, inflammation] Inflammation of the vermiform appendix. Syn., *paratyphlitis; epityphlitis; abscess of iliac form*. **a., gangrenous,** that in which the vermiform appendix is found gangrenous and sloughing, usually with one or more perforations and free leakage, a large section of the right groin full of lemon-colored, septic fluid, a puddle of filth underneath the cecum and ileum, the omentum fixed with a cluster of bowel adhesions beneath. Syn., *green groin*. **a. larvata,** an incipient or latent form of appendicitis **a. obliterans,** an inflammation characterized by the progressive obliteration of the lumen of the appendix, by the disappearance of the epithelial lining and glandular structure. The symptoms are acute attacks of brief duration, moderate swelling at the seat of disease, and persistent tenderness in the region of the appendix during the intermissions.

appendico-enterostomy (*ap-en-dik-o-en-ter-os'-to-me*). 1 Appendicostomy. 2. The establishment of an artificial connection between the vermiform appendix and the small intestine.

appendicosis (*ap-en-dik-o'-sis*) [*appendix*]. A non-inflammatory condition of continual discomfort, dull pain, little nausea, no fever, but local soreness from onset. Treatment, appendicectomy

appendicostomy (*ap-en-dik-os'-to-me*). The operation of opening the vermiform appendix, previously anchored in an incision in the anterior abdominal wall, for the purpose of irrigating the cecum and colon; used in amebic dysentery and constipation Syn., *Weir's operation*.

appendicular (*ap-en-dik'-u-lar*) [*appendicula*, a small appendix]. 1. Pertaining to the vermiform appendix. 2. Pertaining to the limbs. **a. colic,** a spasmodic colicky pain originating in the appendix.

appendiculate (*ap-en-dik'-u-lāt*). Having appendages or protruding accessory parts.

appendix (*ap-en'-diks*) [pl. *appendices; appendere*, to hang upon or to]. An appendage. **a. auricularis,** see *appendage, auricular* (1). **a. cerebri,** the pituitary body. **a., ensiform,** see *x.phoid*. **a. epididymidis,** the vas aberrans. **appendices epiploicæ,** fatty projections of the serous coat of the large intestine. **a. lobularis,** the flocculus. **a., suprasphenoid, a. ventriculi,** the hypophysis. **a., vermiform, a. vermiformis,** the small, blind gut projecting from the cecum. **a., xiphoid,** see *xiphoid*.

apperception (*ap-er-sep'-shun*) [*appercipere*, to perceive]. The conscious reception of a sensory impression; the power of receiving and appreciating sensory impressions.

appetence, appetency (*ap'-e-tens, ap'-e-ten-se*) [*appetentia*, appetite]. Appetite; desire. The longing by tissue for materials that nourish them.

appetite (*ap'-e-tīt*) [*appetere*, to desire]. The desire for food; also any natural desire; lust. **a.-breakfast,** more tasty and desirable than the ordinary test meal, and calculated to excite a more natural flow of gastric juice. **a.-juice,** flow of gastric juice provoked by the mere sight and taste of food (without swallowing it). **a., perverted,** that for unnatural and indigestible things, frequent in disease and in pregnancy.

appetizer (*ap-e-ti'-zer*) [*appetere*, to desire]. A medicine or dose, taken to stimulate the appetite.

applanate (*ap'-lan-āt*) [*ad*, to; *planus*, flat]. Horizontally flattened.

applanatio, applanation (*ap-lan-a'-she-o, ap-lan-a'-shun*) [L.] A flattening. **a. corneæ,** flattening of the entire surface of the cornea from disease.

apple (*ap'-l*) [AS., *æppel*, an apple]. The fruit of the tree, *Pyrus malus*. **a., Adam's,** see *pomum Adami*. **a.-brandy,** an alcoholic spirit distilled from cider; cider-brandy. **a. extract,** see *extractum ferri pomatum* under *extract*. **a. eye,** synonym of *exophthalmos*. **a head,** the broad thick skull of dwarfs. **a. oil,** amyl valerate.

applicator (*ap'-lik-a-tor*) [L.]. An instrument used in making applications

Appolito's operation (*ap-ol-e'-to*). Enterorrhaphy by a form of right-angle continuous suture.

apposition (*ap-o-zish'-un*) [*apponere*, to apply to]. 1. The act of fitting together; the state of being fitted together. 2. An addition of parts. 3. Development by accretion.

approximal (*ap-roks'-im-al*) [*ad*, to; *proximus*, next] Next to; contiguous. In dentistry, pertaining to contiguous surfaces, as approximal fillings.

apraxia (*ah-praks'-e-ah*) [*ἀ*, priv., *πράσσειν*, to do]. Soul-blindness; mind-blindness; object-blindness; an affection in which the memory for the uses of things is lost, as well as the understanding of the signs by which the things are expressed.

aprication (*ap-re-ka'-shun*) [*aprication*, a basking in the sun]. The sun-bath; sun-stroke.

aproctia (*ah-prok'-she-ah*) [*ἀ*, priv.; *πρωκτός*, anus]. Absence or imperforation of the anus.

aproctous (*ah-prok'-tus*) [*ἀ*, priv.; *πρωκτός*, the anus]. Having imperforation of the anus.

apron (*a'-pron*) [O. F., *naperon*]. 1. A cloth or rubber covering to prevent the clothing from becoming soiled. 2. The omentum. **a., Hottentot,** artificially or abnormally elongated labia minora. Syn., *pudendal apron*. **a., masonic,** a name sometimes given to a support, attached to the waist, for the penis and testicles in gonorrheal cases. **a. of succor,** a canvas stretcher for carrying the wounded.

aprosexia (*ah-pro-seks'-e-ah*) [*ἀπροσεξία*, want of attention]. A mental disturbance consisting in inability to fix the attention upon a subject. An inability to think clearly and to comprehend readily what is read or heard; a condition sometimes observed in the course of chronic catarrh of the nose or of the nose and pharynx.

aprosopia (*ah-pro-so'-pe-ah*) [*ἀ*, priv.; *πρόσωπον*, the face]. A form of fetal monstrosity with absence of part or all of the face.

aprosopous (*ap-ros'-o-pus*) [*ἀ*, priv.; *πρόσωπον*, the face]. Exhibiting aprosopia.

aprosopus (*ap-ros'-o-pus*) [*ἀ*, priv.; *πρόσωπον*, the face. An aprosopous fetus.

apselaphesia (*ap-sel-af-e'-ze-ah*) [*ἀ*, priv.; *ψηλάφησις*, touch]. Loss of the tactile sense.

apsithyria, apsithurea (*ah-psith-i'-re-ah, -ü'-re-ah*) [*ἀ*, priv.; *ψιθυρίζειν*, to whisper]. Hysterical aphonia, in which the patient loses the voice and is also unable to whisper.

apsychia (*ah-si'-ke-ah*) [*ἀ*, priv.; *ψυχή*, spirit]. Unconsciousness; a faint or swoon.

apsychosis (*ah-si-ko'-sis*) [*ἀ*, priv.; *ψυχή*, spirit]. Inability to think.

aptyalia, aptyalism (*ap-ti-a'-le-ah, ap-ti'-al-izm*) [ἀ, priv.; πτυαλίζειν, to spit]. 1. Deficiency or absence of saliva. 2. Psychic salivation; debility and general disorder from loss of oxydases due to excessive expectoration.

apulosis (*ap-ū-lo'-sis*) [οὐλειν, to cicatrize]. Cicatrization, or a cicatrix.

apulotic (*ap-ū-lot'-ik*) [οὐλειν, to cicatrize]. Promoting cicatrization, or apulosis.

apus (*a'-pus*) [ἀ, priv.; πούς, foot]. 1. A monstrosity consisting in absence of the lower limbs, or feet. 2. An apodous fetus.

apyknomorphous (*ah-pik-no-morf'-us*) [ἀ, priv.; πυκνός, compact; μορφή, form]. Applied by Nissl to feebly staining cells, or those in which the stainable portions are not arranged in close proximity.

apyonin (*ah-pi'-on-in*) [ἀ, priv.; πῦον, pus]. A remedy introduced as a substitute for pyoktanin in ophthalmic practice. It is said to be identical with yellow pyoktanin.

apyous (*ah-pi'-us*). Having no pus.

apyretic (*ah-pi-ret'-ik*) [ἀ, priv.; πυρετός, fever]. Without fever.

apyrexia (*ah-pi-reks'-e-ah*) [ἀ, priv.; πυρετός, fever]. The non-febrile stage of an intermittent fever, intermission or absence of fever.

apyrexial (*ah-pi-rek'-se-al*) [see *apyrexia*]. Pertaining to, or the nature of, or characterized by, apyrexia.

aq. Abbreviation for *aqua* [L.], water; also for water of crystallization.

aqua (*ak'-wah*) [L., gen. and pl., *aquæ*]. Water. An oxide of hydrogen, having the composition H_2O. It is a solid below 32°, a liquid between 32° and 212°, vaporizes at 212° at the sea-level (bar. 760 mm.), giving off vapor of tension equal to that of the air. Water is an essential constituent of all animal and vegetable tissues. In the human body it forms 2% of the enamel of the teeth, 77% of the tissues, 78% of the blood, and 93% of the urine. Water is a valuable antipyretic; internally, it is diuretic. It is the most useful of all the solvents. *Aquæ*, in pharmacy, designates various medicated waters. **a. ammoniæ** (U. S. P.), ammonia-water. Dose 10–30 min. (0.6–2.0 Cc.). **a. ammoniæ fortior** (U. S. P.), stronger ammonia-water, used externally. **a. amygdalæ amaræ** (U. S. P.), bitter almond water. Dose 2 dr. (8 Cc.). **a. anethi** (B. P.), dill-water. Dose ½–2 oz. (15–60 Cc.). **a. anisi** (U. S. P.), anise water. Dose ½–2 oz. (15–60 Cc.). **a. aurantii florum** (U. S. P.), orange-flower water. Dose ½–2 oz. (15–60 Cc.). **a. aurantii florum fortior** (U. S. P.), triple orange-flower water. **a. bulliens**, boiling water. **a. calcis**, lime water. **a. camphoræ** (U. S. P.), camphor-water. Dose ½–1 oz. (15–30 Cc.). **a. carbolisata**, 22 parts of liquefied phenol in 978 parts of distilled water. Dose 1 dr.–½ oz. (4–16 Cc.). **a. chlori** (*liquor chlori compositus*, U. S. P.), chlorine water. Dose 1–4 dr. (3.7–15.0 Cc.). **a. chloroformi** (U. S. P.), chloroform-water. Dose ½–2 oz. (15–60 Cc.). **a. cinnamomi** (U. S. P.), cinnamon-water. Dose ½–2 oz. (15–60 Cc.). **a. communis**, common water. **a. creosoti** (U. S. P.), creosote-water Dose 1–4 dr. (3.7–15.0 Cc.). **a. destillata** (U. S. P.), distilled water. **a. ferrata**, a chalybeate water. **a. fervens**, hot water. **a. fluvialis**, river-water. **a. fœniculi** (U. S. P.), fennel-water. Dose 1–2 oz. (30–60 Cc.). **a. fontana**, well- or spring-water. **a. fortis**, see *acid, nitric*. **a. hamamelidis** (U. S. P.), hamamelis water. Dose 2 dr. (8 Cc.). **a. hydrogenii dioxidi** (U. S. P.), solution of hydrogen dioxide used chiefly locally. **a. labyrinthi**, the clear fluid existing in the labyrinth of the ear. **a. laurocerasi** (B. P.), cherry-laurel water. Dose 5–30 min. (0.3–2.0 Cc.). **a. Levico**, water from springs at Levico in the Tyrol, containing arsenic, iron, and copper. **a. marina**, sea water. **a. menthæ piperitæ** (U. S P.), peppermint-water Dose 1–2 oz. (30–60 Cc.). **a. menthæ viridis** (U. S. P.), spearmint water. Dose 1–2 oz (30–60 Cc.). **a. oculi**, the aqueous humor. **a. omnium florum**, a liquid distillation-product of cow-dung collected during the month of May; formerly used in pulmonary tuberculosis. **a. pimentæ** (B. P.), allspice water. Dose ½–2 oz. (15–60 Cc.). **a. pluvialis**, rain-water. **a. putealis**, **a. puteana**, well-water. **a. regia**, see *acid, nitrohydrochloric*. **a. rosæ** (U S. P.), rose-water. Dose 1–2 oz. (30–60 Cc.). **a. rosæ fortior** (U. S. P.), used for making rose-water. **a. vitæ**, brandy or spirit.

aquacapsulitis (*ak'-wah-kap-sū-li'-tis*) [*aqua; capsula*; ἰτις, inflammation]. Inflammation of the membrane of Descemet; serous iritis.

aquæ (*ak'-we*) [*pl.* of *aqua*]. Waters; medicated waters.

aquæductus (*ak-we-duk'-tus*), see *aqueduct*

aquaphone (*ak-wah-fōn*) [*aqua*; φωνή, sound]. An instrument like a large stethoscope, used to detect the leakage of water from pipes.

aquapuncture (*ak'-wah-pungk'-chūr*) [*aqua; punctura*, a puncture]. 1. Counterirritation by means of a very fine jet of water impinging upon the skin, it is useful in neuralgic disorders. 2. The hypodermatic injection of water as a placebo.

aquatic (*a-kwat'-ik*) [*aqua*]. Pertaining to water. **a. cancer**, synonym of *cancrum oris*.

aqueduct, aquæductus (*ak'-we-dukt, ak-we-duk'-tus*) [*aqua, ductus*, a leading]. A canal for the passage of fluid; any canal. **aquæductus cerebri**, see *a. Sylvii*. **aquæductus cochleæ**, aqueduct of the cochlea. **a., communicating, aquæductus communicationis**, a small canal sometimes found at the junction of the mastoid part of the temporal bone with the petrosa, which transmits a venous branch to the end of the transverse sinus. **a. of Cotunnius**, the aqueduct of the vestibule, extending from the utricle to the posterior wall of the pyramid in the brain. **aquæductus Fallopii**, see under *Fallopian*. **aquæductus Sylvii**, the aqueduct of Sylvius, the passageway from the third to the fourth ventricle, the *iter a tertio ad quartum ventriculum*. Syn., *ventricular aqueduct*. **a., temporal**, an inconstant canal at the dorsal part of the superior angle of the petrosa, for passage of the superior petrosal sinus. **aquæductus vestibuli**, the aqueduct of the vestibule of the ear.

aqueous (*a'-kwe-us*) [*aqua*]. Watery. **a. chamber of the eye**, the space between the cornea and the lens; the iris divides it into an anterior and a posterior chamber. **a. extract**, a solid preparation of a drug made by evaporation of its aqueous solution. **a. humor**, the fluid filling the anterior chamber of the eye.

aquiducous (*a-kwe-dū'-kus*) [*aquiducus; aqua*, water; *ducere*, to lead]. Hydragogue.

aquiferous (*ak-wif'-ur-us*) [*aqua*, water; *ferre*, to bear]. Carrying water or lymph.

aquiparous (*ak-wip'-ur-us*) [*aqua; parere*, to bring forth]. Secreting or excreting water or lymph.

aquocapsulitis (*ak-wo-kap-sū-lī'-tis*). See *aquacapsulitis.*

aquosity (*a-kwos'-it-e*) [*aquositas*, watery]. The state or condition of being watery; moisture.

aquozon (*ak'-wo-zŏn*). Ozonized, distilled, and sterilized water, containing 3% by volume of ozone.

aquula externa (*ak'-woo-lah*) [*aquula*, a little water]. The perilymph. **a. interna**, the endolymph.

arabate (*ar'-ab-āt*). A salt of arabic acid.

arabic acid (*ar'-ab-ik*). See *arabin.* **a., gum-**, see *acacia.*

arabin (*ar'-ab-in*) [*arabic*], $(C_6H_{10}O_5)_2 + H_2O$. Arabic acid. A transparent, glassy, amorphous mass, an exudate from many plants. It is soluble in water, and is the principal constituent of gum-arabic.

arabinose (*ar'-ab-in-ōs*) [*arabic*], $C_5H_{12}O_6$. One of the glucoses made from gum-arabic on boiling with dilute H_2SO_4. It crystallizes in shining prisms that melt at 100°; is slightly soluble in cold water, has a sweet taste, and reduces Fehling's solution, but is not fermented by yeast.

arabite (*ar'-ab-īt*) [*arabinose*], $C_5H_{12}O_5$. A substance formed from arabinose by the action of sodium amalgam. It crystallizes from hot alcohol in shining needles, melting at 102°. It has a sweet taste, but does not reduce Fehling's solution.

arabitol (*ar-ab'-it-ol*). An alcohol, corresponding to the pentose arabinose.

Arachis (*ar'-ak-is*) [ἄραχος, a leguminous plant]. A genus of leguminous plants. **A. hypogæa**, see *ground nut.* **a. oil**, peanut oil.

arachnida (*ar-ak'-nid-ah*) [ἀράχνης, a spider]. A class of arthropods to which belong ticks mites, spiders and scorpions

arachnidism (*ar-ak'-nid-izm*). *Arachnoidism, q. v.*

arachnitis (*ar-ak-nī'-tis*) [*arachnoid*; ιτις, inflammation] Inflammation of the arachnoid membrane of the brain. Syn., *leptomeningitis externa; arachnodeuitis; arachnoiditis; arachnoideitis; arachnoitis.* **a., rhachidian, a., spinal**, spinal meningitis.

arachnodactylia (*ar-ak-no-dak-til'-e-ah*). Same as *arachnodactyly, q. v*

arachnodactyly (*ar-ak-no-dak'-til-e*) [ἀράχνη, a spider; δάκτυλος, a finger]. Spider fingers; a condition characterized by abnormally long fingers, and sometimes, similar toes.

arachnoid (*ar-ak'-noid*) [ἀράχνη, a spider's web; εἶδος, form]. 1. Resembling a web. 2. The arachnoid membrane. Syn., *membrana media cerebri; meningion; meningium; meninx arachnoidea; meninx media; meninx serosa.* 3. Pertaining to a membrane. 4. Thready; feeble; said of the pulse. **a. cavity**, the space between the arachnoid and dura mater. **a. membrane**, the delicate membrane of the brain and cord between the dura and pia mater.

arachnoidal (*ar-ak-noid'-al*) [see *arachnoid*]. Pertaining to the arachnoid membrane.

arachnoidea (*ar-ak-noid'-e-ah*) [see *arachnoid*]. The arachnoid membrane; see *arachnoid.* **a. encephali**, arachnoid of brain. **a. oculi**, outer layer of choroid. **a. spinalis**, arachnoid of spine.

arachnoidism (*ar-ak'-noi-dizm*) [ἀράχνης, spider]. The condition produced by the bite of poisonous spiders.

arachnoiditis (*ar-ak-noid-ī'-tis*). See *arachnitis.*

arachnolysin (*ar-ak-nol'-is-in*) [ἀράχνης, a spider; λύσις, a loosing]. A very active hemolytic substance extracted from spiders.

arachnopia (*ar-ak'-no-pī'-ah*) [*arachnoid*; *pia*]. The arachnoid and the pia considered together.

arachnorrhinitis (*ar-ak-no-rin-ī'-tis*) [ἀράχνης, spider; ῥίς, nose; ιτις, inflammation]. A disease of the nasal passages supposed to be due to the presence of a spider.

arachnotitis (*ar-ak-no-tī'-tis*) [ἀράχνη, spider; οὖς, ear, ιτις, inflammation]. A condition said to be caused by a spider in the auditory canal.

arack (*ar'-ak*). See *arrack*

aræometer (*ar-e-om'-et-er*). See *areometer.*

araiocardia (*ar-ī-o-kar'-de-ah*) [ἀραιός, thin; καρδία, heart]. Brachycardia.

Aralia (*ar-a'-le-ah*) [L.]. A genus of plants, order *Araliaceæ*, embracing several species, having aromatic, diaphoretic, and resolvent properties Ginseng, wild sarsaparilla, petty-morrel, and other plants esteemed in popular medicine belong here; few have active qualities of high value in any disease.

Aran's green cancer (*ar-ahn'*) [François Amilcar *Aran*, French physician, 1817–1861]. Chloroma; malignant lymphoma of the orbital cavity associated with grave leukemia, and tending to form metastases through the lymphatic system. Syn., *cancer vert d'Aran.* **A.'s law**, fractures of the base of the skull are the result of injury to the vault, the extension taking place by irradiation along the line of the shortest circle. The fractures of the base which occur by *contre-coup* are exceptions to this law.

Aran-Duchenne's disease (*ar-ahn'-doo-shen'*) [see *Aran;* Guillaume Benjamin Amand *Duchenne* de Boulogne, French physician, 1806–1875]. Progressive muscular atrophy.

araneous (*ar-a'-ne-us*) [*aranea*, a spider's web]. 1. Full of webs; resembling a cobweb. 2. Applied to a thready, feeble pulse. 3. Consisting of separate filaments. **a. membrane**, the arachnoid membrane.

Arantius, bodies of (*ar-an'-she-us*) [Julius Cæsar *Arantius* (*Arantio*, or *Aranzio*), Italian anatomist, 1530–1589]. The fibrous tubercles in the center of each segment of the semilunar valves. **A., canal of, A., duct of**, the ductus venosus. The smaller of the two branches into which the umbilical vein divides after entering the abdomen; it empties into the ascending vena cava and becomes obliterated after birth. **A., ligament of**, the obliterated ductus venosus of Arantius. **A., ventricle of**, a small culdesac in the medulla oblongata, forming the lower termination of the fourth ventricle.

araroba (*ar-ar-o'-bah*) [Brazil]. Goa powder. An oxidation-product of the resin found deposited in the wood of the trunk of *A. andira*, of Brazil. Its active principle is *chrysarobin* or *chrysophanic acid.* It is used in skin affections.

arbacion (*ar-ba'-se-on*). A histon from the testicles of the sea-urchin.

arbor (*ar'-bor*) [L.]. A tree. A name for the arbor vitæ of the cerebellum. **a. vitæ** [tree of life]. 1. A term applied to the arborescent appearance of a section of the cerebellum, and also to a similar appearance of the folds of the interior of the cervix uteri. 2. The *Thuja occidentalis.*

arborescent (*ar-bor-es'-ent*) [*arbor*]. Branching like a tree.

arborization (*ar-bor-iz-a'-shun*) [*arbor*]. 1. The mode of termination of certain nerve fibers when they end in a muscle 2. A group of tree-like crystals. **a. block**, impaired intraventricular conduction; supposed to be present in dis-

eased conditions of the subendocardial myocardium. **a., terminal.** 1. branched end of a sensory nerve. 2. A motor end-plate. **a., vascular,** a tree-like branching of blood-vessels.

arbulith (*ar'-bū-lith*). Trade name of a mixture of lithium benzoate and arbutin; it is used as a urinary antiseptic and antilithemic.

arbutin (*ar'-bū-tin*) [*arbutus*], $C_{12}H_{16}O_7$. A bitter glucoside from the *Arctostaphylos uvaursi*, or bearberry. It is neutral, crystalline, and resolvable into glucose and hydroquinone. A diuretic. Dose 15–30 gr. (1–2 Gm.). See *Uva ursi*.

Arbutus (*ar'-bū-tus*) [L.]. A genus of ericaceous plants. *A. menziesii*, the madroño of California, has an astringent bark, useful in diarrhea. *A. unedo*, the European arbutus, is astringent and narcotic. **A., trailing,** see *Epigæa*.

arc (*ark*) [*arcus*, a bow]. A part of the circumference of a circle; a more or less curved passageway. **a., bigonial** (of lower jaw), a measurement around the anterior margin of the jaw. **a., binauricular,** a measurement from the center of one auditory meatus to the other, directly upward across the top of the head. **a., bregmatolambdoid,** a measurement along the sagittal suture. **a., diastaltic nervous,** Marshall Hall's term for the nerves concerned in a reflex action. **a., frontal,** the measurement from the nasion to the bregma. **a., maximum transverse,** the measurement across the face from a point on each side just anterior to the external auditory meatus. **a., nasobregmatic,** a line measured from the root of the nose to the bregma. **a., nasomalar,** measurement between the outer margins of the orbits over the nasion. **a., nasooccipital,** measurement from the root of the nose to the lowest occipital protuberance. **a., occipital,** measurement from the lambda to the opisthion. **a., parietal,** measurement from the bregma to the lambda. **a., reflex,** the pathway for a reflex act, comprising the center, the afferent and efferent nerve. **a., voltaic,** the band of light formed by the strong electric current between two adjacent carbon points.

arcade (*ar-kād'*) [see *arc*]. 1. A series of arches; an arch. 2. The bow of a pair of spectacles. **a., crural,** Poupart's ligament. **a., Flint's,** the arterio-venous arch about the base of the renal pyramids. **a., temporal, a., temporal, inferior,** the zygoma. **a., temporal, superior,** the orbital arch.

arcanol (*ar'-kan-ol*). Trade name of a preparation containing atophan and acetyl-salicylic acid.

arcanum (*ar-ka'-num*) [L., "a secret"]. A secret medicine.

arcate (*ar'-kāt*) [*arcatus*, bow-shaped]. Bow-shaped; curved; arcuate.

arcatura (*ar-ka-tū'-rah*) [*arcus*, a bow]. A condition of horses marked by the undue outward curvature of the forelegs.

arcein (*ar'-se-in*). Arecolin hydrobromide; it is an active miotic.

arcesis (*ar-se'-sis*) [ἄρκεσις, a warding off (ἀρκέω, to ward off; to be of help; to be sufficient)]. A defence; any food or drug that wards off disease or death by strengthening or sustaining.

arcetic (*ar-se'-tik*) [ἄρκεσις, a defence] acting in defence, not as a prophylactic, but by sustaining, or by increasing body resistance to disease or death.

arch (*arch*) [*arcus*, a bow]. 1. A structure having a curved outline resembling that of an arc or a bow. 2. A part of a circle. **a., abdominothoracic,** the lower boundary of the front of the thorax. **a., alveolar,** that marking the outlines of the alveolar processes of the jaw. **a., anastomotic,** one uniting two veins or arteries. **a., anterior hyoid,** a general term which includes the tympanohyal, epihyal, stylohyal, and ceratohyal arches. **a., aortic,** see *aorta*. **a.s, aortic,** five pairs of vascular arches existing in the fetus. **a.s, axillary,** twigs of the latissimus dorsi, sometimes passing over the vessels and nerves to the anterior part of the axilla, where they disappear in the tissues. **a.s, branchial,** the cartilaginous arches that support the gills of fishes. They are also present in the human fetus. **a.s, cervical,** the fourth and fifth postoral arches. **a., cortical,** that portion of the renal substance which stretches from one column to another and surrounds the base of the pyramids. **a., costal,** the arch of the ribs. **a., cotylosacral,** one formed by the sacrum and the osseous structures extending to the coxofemoral joints. Syn., *standing arch*. **a., crural,** Poupart's ligament. **a., dental.** 1. The parabolic curve formed by the cutting-edges and masticating surfaces of the teeth. 2. The alveolar arch. **a., epencephalic,** the bones lying over the epencephalon, uniting in man to form the occipital bone. Syn., *neurooccipital arch*. **a., facial,** the first postoral arch. **a., femoral,** same as *a., crural*. **a., femoral, deep,** a band of fibers originating apparently in the transverse fascia, arching across the crural sheath and attached to the middle of Poupart's ligament and the pectineal line. Syn., *deep crural arch*. **a.s, of the foot,** certain arches formed by the bones of the foot; the most distinct is the transverse in the line of the tarsometatarsal articulations. The inner longitudinal is composed of the os calcis, the astragalus, the navicular, the 3 cuneiforms, and the first 3 toes, and the outer longitudinal is made up of the os calcis, the cuboid, and the fourth and fifth toes **a., gluteal,** an opening in the gluteal fascia transmitting the gluteal vessels and nerves. **a., hemal,** Owen's term for the inferior loop of the typical vertebra. It is so called because it surrounds the essential portion of the vascular system. It is formed dorsally by the centrum, laterally by the pleurapophyses and hemapophyses, and inferiorly by the hemal spine. Syn., *infravertebral arch; subcentral arch; vertebral ventral arch*. **a., hyoid,** the second branchial arch of vertebrates. Syn., *lingual arch; arch of tongue; parietohemal arch* **a., inguinal,** Poupart's ligament. **a., ischiopubic,** that formed by the pubis and the ischiopubic branches. **a., ischiosacral,** one formed by the sacrum, the descending branches of the ischia, and the ilia lying between. Syn., *sitting arch*. **a., laryngeal,** Callender's term for one in the embryo composed of a membranous plate extending from the lower portion of the skull and developing into the inferior constrictor muscle, the cartilages of the larynx, the superior portion of the trachea, and the thyroid body. **a.s, lateral inferior** (of the skull), the bones encircling the mouth, nose, and larynx. **a.s, lateral superior,** the bones encircling the cerebrum, the cerebellum, and the oblongata **a., mandibular,** the first branchial arch, developing into the lower jaw. Syn., *maxillary arch*. **a., maxillary.** 1. See *a., mandibular*. 2. See *a., palatomaxillary*. **a., mesencephalic,** one formed by the basisphenoid, alisphenoid, parietal, and mastoid bones. Syn., *neuro-*

parsetal arch. **a., nasal,** one uniting the two frontal veins. **a., neural,** the superior loop of the typical vertebra inclosing the neural canal. Syn., *dorsal vertebral arch; supravertebral arch.* **a., occipitohemal.** See *girdle, shoulder-.* Syn., *pectoral arch; scapular arch; scapuloclavicular arch; scapulocoracoid arch.* **a., osteoblastic,** those formed imperfectly or completely by the osteoblasts, arising from the bony trabeculæ, already developed and finally becoming bony. **a., palatal,** the concavity of the hard palate when seen in transverse section. **a. of the palate, posterior,** that formed by the posterior pillars of the fauces. Syn., *palatopharyngeal arch.* **a., palatine,** that formed by the anterior pillars of the fauces. Syn., *anterior arch of the palate.* **a., palatomaxillary,** one formed by the palatine, maxillary, and premaxillary bones or their analogue; it is looked upon as the hemal arch of the nasal vertebra. Syn. *maxillary arch.* **a., palmar,** the arch formed by the radial artery and ulnar arteries in the palm of the hand; there are two—a superficial and a deep. Syn., *radial arch.* **a., palmar, superficial,** the continuation of the ulnar artery across the palm. **a., pelvic,** the bones of the pelvis considered as the hemal arches of the sacral vertebræ. **a., pharyngeal,** the fifth pair of branchial arches. **a., plantar,** the arch made by the external plantar artery. **a.s, postoral,** arches in the fetus, five in number, that develop into the lower jaw and throat. See *a., branchial.* Syn., *cephalic, poststernal, skeletal, subaxial, vascular, visceral arches.* **a., prosencephalic,** one considered as the neural arch of the frontomandibular vertebra; it is formed by the frontal, presphenoid, and orbitosphenoid bones. Syn., *neurofrontal arch.* **a. of pubes,** that part of the pelvis formed by the convergence of the rami of the ischium and pubis on each side. Syn., *subpubic arch.* **a., radial.** See *a., palmar.* **a., rhinencephalic,** the neural arch of the nasal vertebra, formed by the vomer and the prefrontal and nasal bones. Syn., *neuronasal arch.* **a., Riolan's,** the arch of the mesentery which is attached to the transverse mesocolon. **a., stylohyoid,** the hemal arch of the parietal vertebra formed by the stylohyal, epihyal, ceratohyal, basihyal, glossohyal, and urohyal bones. **a., supraorbital,** the curved and prominent margin of the frontal bone that forms the upper boundary of the orbit. **a.s, tarsal,** the arches of the palpebral arteries. **a., thyrocartilaginous,** a communicating branch between the superior thyroid arteries of the two sides, lying at about the level of the angle of the thyroid cartilage. **a., thyrohyal, a., thyrohyoid,** the third of the postoral arches; it develops into the hyoid body and the greater cornua of the hyoid bone. **a., tonsillar.** See *isthmus of the fauces.* **a., trabecular,** one formed by the junction of the middle trabeculæ of the skull, containing the hypophysis and the infundibulum. **a. of a vertebra,** the part of a vertebra, formed of two pedicles and two laminæ, inclosing the spinal foramen. **a., vertebral.** 1. A neural arch. 2. A hemal arch. **a., zygomatic,** the **arch** formed by the malar and temporal bones. **Syn.,** ***subocular arch; suborbital arch; temporal arch.***

arch-, archi [ἀρχή, primitive]. Prefixes denoting first, chief, or principal.

archæocyte (*ar-ke'-o-sīt*) [ἀρχαῖος, ancient; κύτος, a cell]. A wandering or free ameboid cell.

archæus (*ar-ke'-us*) [ἀρχαῖος, ancient]. In spagiric medicine, the invisible counterpart of the visible body; solar heat as a source of life. 2. v. Helmont's name for the vital principle of an organism.

archameba (*ark-am-e'-bah*) [*arch-*; ἀμοιβή, change]. Haeckel's hypothetic progenitor of all amebas and of all higher forms of life.

archamphiaster, archiamphiaster (*ark-am-fe-as'-ter, ar-ke-am-fe-as'-ter*) [*arch-*; ἀμφί, around; ἀστήρ, star]. In biology; those amphiasters concerned in the production of the polar globules.

Archangelica (*ark-an-jel'-ik-ah*) [ἀρχάγγελος, archangel]. A genus of umbelliferous plants. See *Angelica.*

archebiosis (*ark-e-bi-o'-sis*) [*arch-*; βίος, life]. Spontaneous generation.

archegenesis (*ark-e-jen'-es-is*). The same as *archebiosis.*

archegonium (*ark-e-go'-ne-um*) [ἀρχή, beginning; γόνος, race]. The female reproductive organ of the higher cryptogams.

archegony (*ar-keg'-o-ne*) [ἀρχέγονος, first of a race]. The doctrine of spontaneous generation.

archelogy (*ar-kel-o'-je*) [ἀρχή, a beginning; λόγος, science]. The study of the foundation principles of anthropology.

archenteric (*ark-en-ter'-ik*). Relating to the archenteron.

archenteron (*ark-en'-ter-on*) [*arch-*; ἔντερον, intestine]. The embryonic alimentary cavity.

archeocyte (*ar'-ke-o-sīt*). Same as archæocyte.

archepyon (*ar-ke-pi'-on*) [ἀρχή, a beginning; πύον, pus]. Pus that has become caseated, or so thick that it does not flow.

archespore, archesporium (*ar'-ke-spōr, -e-um*) [ἀρχή, a beginning; σπορά, a seed]. In biology, the cells that give rise to the lining of the anther-cell and to the mother-cells of the pollen.

archetype (*ar'-ke-tīp*) [*arch-*; τύπος, a type]. In comparative anatomy, an ideal type or form with which the individuals or classes may be compared. A standard type; original type; prototype.

archi-. See *arch-.*

archiater (*ar-ke-a'-ter*) [ἀρχιατρός, a chief physician]. 1. The head physician in a court. 2 The chief physician of an institution.

Archibald's fever (*ar'-ishe-bawld*) [Robert George *Archibald,* English Surgeon, 1880–]. An African fever caused by a microorganism of the *B. cloacæ* group; it is characterized by extreme drowsiness.

archiblast (*ar'-ke-blast*) [*archi-*; βλαστός, germ]. In embryology, the granular areola surrounding the germinal vesicle. In pathology, the important tissues of the body as contrasted with the *parablast,* or connective tissues.

archiblastic (*ar-ke-blas'-tik*) [see *archiblast*]. Derived from the archiblast. The parenchymatous tissues are regarded as archiblastic.

archiblastoma (*ar-ke-blas-to'-mah*) [*archiblast; ὄμα,* a tumor]. A tumor composed of archiblastic tissue, such as myoma, neuroma, papilloma, adenoma, carcinoma, etc.

archiblastula (*ar-ke-blas'-tu-lah*) [see *archiblast*]. In embryology, a ciliated, vesicular morula, resulting from complete and regular yelk-division and by invagination forming the archigastrula.

archicytula (*ar-ke-sit'-u-lah*) [*archi-*; κύτος, a cell]. A fertilized egg-cell in which the nucleus is discernible.

archigaster (*ar-ke-gas'-ter*) [*archi-*; γαστήρ, belly]. The primitive, perfectly simple intestine; archenteron.

archigastrula (*ar-ke-gas'-tru-lah*) [see *archigaster*]. The gastrula as it is observed in the most primitive types of animal development; called also bell-gastrula, from its shape.

archigenesis (*ar-ke-jen'-es-is*). See *archebiosis*.

archil (*ar'-kil*) [ME., *orchell*]. A violet coloring-matter similar to litmus, chiefly obtained from the lichen, *Roccella tinctoria;* used for staining animal tissues.

archimonerula (*ar-ke-mon-er'-ū-lah*) [*archi-*; μονήρης, single; solitary]. In embryology, a special name given by Haeckel to the monerula stage of an egg undergoing primitive and total cleavage.

archimroula (*ar-ke-mor'-ū-lah*) [*archi-*; μόρον, a mulberry]. In embryology, the solid mass of cleavage cells, or mulberry mass, arising from the segmentation of an archicytula, and preceding the archiblastula and archigastrula.

archinephric (*ar-ke-nef'-rik*) [ἀρχή, first; νεφρός, the kidney]. Pertaining to the archinephron.

archinephron (*ar-ke-nef'-ron*) [*archi-*; νεφρός, kidney]. The primitive or embryonic stage of the kidney or renal apparatus. The Wolffian body.

archineuron (*ar-ke-nū'-ron*) [*archi-*; νεῦρον, a nerve]. 1. A primitive neuron. 2. The neuron at which the impulse starts in any physiological act involving the nervous system

archipallium (*ar-ke-pal'-e-um*) [*archi-*; *pallium*, a cloak]. The olfactory pallium, the rhinencephalon.

archiplasm (*ar'-ke-plazm*) [*archi-*; πλάσμα, a thing molded]. Same as *archoplasm, q. v.*

archisome (*ar'-ke-sōm*) [*archi-*; σῶμα, body]. Same as *archoplasm, q. v.*

archistome (*ar'-kis-tōm*). See *blastopore*.

architis (*ar-ki'-tis*) [ἀρχός, anus; ιτις, inflammation]. Proctitis; inflammation of the anus.

archocele (*ar'-ko-sēl*) [ἀρχός, anus; κήλη, hernia]. Rectal hernia.

archocystocolposyrinx, or **archocolpocystosyrinx** (*ar-ko-sis-to-kol-po-sir'-ingks*, or *ar-ko-kol-po-sis-to-sir'-ingks*) [ἀρχός, anus; κύστις, bladder; κόλπος vagina; σῦριγξ, fistula]. Recto-vesico-vaginal fistula.

archocystosyrinx (*ar-ko-sist-o-sir'-ingks*) [ἀρχός, anus; κύστις, bladder; σῦριγξ, fistula]. A recto-vesical fistula.

archometrum (*ar-ko-met'-rum*) [ἀρχός, anus; μέτρον, measure]. A device for ascertaining the caliber of the anus, or for dilating its sphincters.

archoplasm, archoplasma (*ar'-ko-plasm, ar-ko-plaz'-mah*) [ἄρχων, a ruler; πλάσμα, a thing formed]. Boveri's term for the substance from which the attraction-sphere, the astral rays, and the spindle-fibers of mitosis are derived and of which they consist. Syn., *kinoplasm*.

archoptoma (*ar-kop-to'-mah*) [ἀρχός, anus; πτῶμα, a fall.] A prolapse of the rectum.

archoptosis (*ar-kop-to'-sis*) [ἀρχός, anus; πτῶσις, a falling]. Rectal prolapse.

archoptotic (*ar-kop-tot'-ik*) [ἀρχός anus; πτῶσις, a falling]. Relating to archoptoma or archoptosis

archorrhagia (*ar-ko-ra'-je-ah*) [ἀρχός, anus; ῥήγνυναι, to break out]. Rectal hemorrhage.

archorrhea (*ar-ko-re'-ah*) [ἀρχός, anus; ῥεῖν, to flow]. A discharge of blood or of any pathological fluid from the anus.

archos (*ar'-kos*) [ἀρχός, the anus].The anus.

archostegnoma (*ar-ko-steg-no'-mah*) [ἀρχός, anus; στεγνόειν, to consolidate]. Archostenosis; rectal stricture.

archostegnosis (*ar-ko-steg-no'-sis*) [ἀρχός, anus; στέγνωσις, a stopping]. A rectal stricture.

archostegnotic (*ar-ko-steg-not'-ik*) [ἀρχός, anus; στέγνωσις, a stopping]. Relating to a rectal stricture.

archostenosis (*ar-ko-sten-o'-sis*) [ἀρχός, anus; στενός, narrow]. Stricture of the rectum.

archostenotic (*ar-ko-sten-ot'-ik*) [ἀρχός, anus; στενός, narrow]. Relating to rectal stricture.

archosyrinx (*ar-ko-sir'-ingks*) [ἀρχός, anus, σῦριγξ, a pipe]. 1. A syringe for the rectum. 2 Fistula in ano.

archyle (*ar-ki'-le*) [ἀρχή, a beginning; ὕλη, matter]. See *protyle*.

arciform (*ar'-se-form*) [*arcus*, bow; arch; *forma*, form]. Arcuate, bowshaped; especially used to designate certain sets of fibers in the medulla oblongata.

arctation (*ark-ta'-shun*) [*arctatio*, to draw close together]. Contraction of an opening or canal.

Arctium (*ark'-te-um*) [L.]. Burdock. See *Lappa*.

arctostaphylos (*ark-to-staf'-il-os*). See *Uva ursi* and *Manzanita*.

arcual (*ar'-kū-al*) [*arcualis*, arched]. Arched; bent or curved.

arcuate (*ar'-kū-āt*) [*arcuatio*, a bowing]. Arched; curved; bow-shaped. **a. fibers of the cerebellum,** associating fibers connecting one lamina with another. **a. fibers of the cerebrum,** associating fibers connecting adjacent convolutions.

arcuation (*ar-kū-a'-shun*) [*arcuatio*, a bowing]. Curvature, especially of a bone.

arcula (*ark'-ū-lah*) [*arcula*, a casket]. The orbit. **a. cordis,** the pericardium.

arculus (*ar'-kū-lus*) [dim. of *arcus*, a bow]. An arching support for bed-clothes.

arcus (*ar'-kus*) [L., "a bow"]. A bow or arch. **a. aortæ,** the arch of the aorta, or transverse aorta. **a. arteriarum,** the arteriæ arciformes of the kidney. **a. arteriosus manus,** the palmar arch. **a. arteriosus palpebræ,** an arterial arch along the edge of the eye-lid. **a. arteriosus pedis,** the plantar arch. **a. atlantis,** the arch of the atlas. **a. axillaris,** arch formed by the axillary artery. **a. carpidorsalis,** the posterior carpal arch. **a. cartilaginis cricoideæ,** arch of the cricoid cartilage. **a. coli intestini,** the transverse colon **a. corneæ,** see *a. senilis*. **a. costarum,** arch of the ribs. **a., cruralis,** Poupart's ligament. **a. cruralis profundus,** the deep crural arch. **a. dentalis,** the dental arch. **a. faucium,** the palatine arch. **a. glossopalatinus,** the anterior pillar of the fauces. **a. jugalis,** the zygomatic arch. **a. juvenalis,** a white ring around the cornea occurring in young individuals and resembling the arcus senilis. **a. lumbocostalis lateralis (Halleri),** ligamentum arcuatum externum. **a. lumbocostalis medialis (Halleri),** ligamentum arcuatum internum. **a. major ventriculi,** the great curvature of the stomach. **a. medullaris,** the fornix. **a. minor ventriculi,** the lesser curvature of the stomach. **a. occipitoparietalis,** an annectant gyrus between the superior parietal lobule and the occipital lobe. **a. palatini,** the pillars of the fauces. **a. palatoglossus.** Same as *a. glossopalatinus*. **a. palatopharyngeus,** the posterior pillar of the fauces. **a. palmaris,** the palmar arch. **a. pharyngoepiglotticus,** folds of mucous membrane passing from the pharynx to the epiglottis. **a. pharyngopalatinus,** posterior pil-

lar of fauces. **a. plantaris,** the plantar arch. **a. popliteus,** the arcuate popliteal ligament. **a. senilis,** a ring of opacity at the edge of the cornea seen in the aged. **a. senilis lentis,** an opaque ring in the equator of the crystalline lens; it sometimes occurs in the aged. **a. spiralis,** the zona arcuata in the organ of Corti. **a. subpubicus,** the pubic arch. **a. superficialis volæ,** the superficial palmar arch. **a. supraorbitalis,** the supraorbital arch. **a. tarseus,** the tarsal arch. **a. tarsi oculi.** Same as *a. arteriosus palpebræ.* **a. thyrocartilagineus,** the arch formed by the superior thyroid arteries and the thyroid cartilage. **a. trachealis anterior,** the arch formed by the inferior thyroid arteries in passing over the trachea. **a. unguium.** See *lunula.* **a. vasculosi,** arches formed by branches of the renal artery in the kidney. **a. vasculosi renales,** arches at the bases of the Malpighian pyramids, formed by anastomoses of tiny ramifications of the renal artery. They give off vessels supplying the cortex of the kidneys, the Malpighian corpuscles, and the capillary plexuses about the uriniferous tubules. Syn., *fornices vasculosi renum.* **a. venosus,** (1) an arch joining the anterior jugular veins; (2) the venous arch in the palm of the hand; (3) a venous arch on the back of the fingers. **a. vertebralis,** a vertebral arch. **a. volaris,** the palmar arch. **a. zygomaticus,** the zygomatic arch.

ardent (*ar'-dent*) [*ardere, ardens,* to burn]. Burning, fiery; glowing, accompanied by a sensation of burning. **a. fever,** heat fever or thermal fever. **a. spirits,** alcoholic liquors.

ardor (*ar'-dor*) [L., "heat"]. Violent heat; burning **a. urinæ,** burning pain in the inflamed urethra during micturition. **a. venereus,** sexual desire. **a. ventriculi,** pyrosis, heart-burn.

are (*ar*). French metric unit of square measure; it is a square whose side is 10 metres.

area (*a'-re-ah*) [L., "an open space"]. A limited extent of surface. **a. acustica,** or **a. auditory,** (1) the receptive center for audition in the superior temporal gyrus; (2) an area in the lateral angle of the floor of the fourth ventricle. **a., Broca's.** Same as *a. parolfactoria.* **a. Celsi,** alopecia areata. **a., cord,** that part of the cortex in which lesions would produce degeneration of the spinal cord. **a. cribrosa,** small perforated space in the internal auditory meatus through which pass filaments of the auditory nerve. **a., crural,** a space at the base of the brain included between the pons and chiasm. **a. diffluens,** alopecia areata. **a., diffraction,** a clear area seen in the microscopic image around all bodies of greater or less refractive power. **a. embryonalis.** Same as *a. germinativa.* **a. germinativa,** or embryonic spot, the oval germinating spot of the embryo. **a. hypoglossi.** Same as *Trigonum hypoglossi.* **a. intercruralis,** or **interpeduncularis,** an area at the base of the brain between the crura cerebri. **a.s, motor,** the convolutions in front of the Rolandic fissure, containing the centers for voluntary motion. **a., non-nucleated,** one of the clear spaces found at times between the endothelial cells of blood-vessels; they have no nuclei, are smaller than endothelial cells, and are considered to be due to the removal of parts of the surrounding endothelium. **a., occipital,** (1) that part of the occipital bone above the superior curved line; (2) the portion of the brain beneath the occipital bone. **a. opaca,** the opaque circle about the *a. pellucida.* **a. paraterminalis,** a space on the mesial aspect of the embryonic cerebral hemisphere. **a. parolfactoria** (Brocæ), a small vertical gyrus beneath the corpus callosum and continuous with the gyrus cinguli. **a. pellucida,** the light central portion of the *a. germinativa.* **a., postpontile,** that of the metencephalon comprising the olivary bodies and the lower lateral portion of the cerebellum. **a. postrema,** on the floor of the fourth ventricle between the ala cinerea and the tænia ventriculi quarti. **a., Rolandic,** the excitomotor area of the cerebral hemispheres, comprising the ascending frontal and ascending parietal convolutions. **a., sensor, sensory,** or **sensorial,** the general area of the cerebral cortex in which sensation is perceived. **a., septal,** the inner surface of each of the laminæ which make up the septum lucidum. **a., somesthetic,** the area for body feelings or tactile sensation in the postcentral convolution; the entire receptive and psychic sensory area. **a. vagi,** the trigonum vagi or ala cinerea. **a. vasculosa,** the space in the area opaca where blood-vessels first develop. **a.s, viscerocutaneous,** areas of skin and viscera corresponding to different spinal segments. **a., visual,** the area of the cortex cerebri, *viz.,* the cuneus and superior occipital gyrus, where vision is perceived. **a. vitellina,** yolk-area outside the area vasculosa in mesoblastic eggs. **a., vocal,** the portion of the glottis lying between the vocal bands.

areatus (*ar-e-a'-tus*). Circumscribed, occurring in patches.

Areca (*ar-e'-kah*). A genus of East Indian palms. **A. catechu** is extensively distributed throughout the tropics of Asia, where it has been cultivated from the earliest times. It furnishes the betel-nut (*q. v.*), the powdered nut is used as a vermifuge.

arecaidin (*ar-e-ka'-id-in*), $C_7H_{11}NO_2$ An acid contained in areca-nut, of which arecoline is its methyl ether.

arecaine (*ar-e'-ka-ēn*), $C_7H_{11}NO_2 + H_2O$ A poisonous teniacidal alkaloid obtained from areca-nut, forming colorless crystals soluble in water, insoluble in alcohol, in ether, and in benzol.

arecane, arekane (*ar'-ek-ān*). An oily and volatile basic substance obtainable from areca-nut; said to be a purgative and sialagogue, and to slow the pulse

areca-nut (*a-re'-kah-nut*). See *betel.*

arecin (*ar'-es-in*) [Sp., *areca*], $C_{28}H_{26}N_2O$. 1. An organic base isomeric with brucine, derived from cinchona-bark. 2. A brown-red coloring-matter obtained from areca-nuts. Syn., *areca red.*

arecoline (*ar-e'-ko-lēn*) [*areca*], $C_8H_{13}NO_2$. A liquid alkaloid isolated from the seeds of *areca catechu.* It is a powerful poison, affecting the heart similarly to muscarine. It has anthelmintic properties. Dose $\frac{1}{15}$–$\frac{1}{10}$ gr. (0.004–0.006 Gm.). **a. hydrobromide,** is used as a miotic, applied in 1 % solution, and in the treatment of glaucoma. In veterinary practice it is used as a cathartic and anthelmintic. Injection for horse, ½–1 gr. (0 032–0 065 Gm.).

arefaction (*ar-e-fak'-shun*) [*arefactio; arefacere,* to make dry]. 1. Exsiccation or desiccation. The removal of the structural or constitutional water from a substance. 2. The drying of drugs before powdering them. 3. Dryness, as of the skin. 4. Withering, as of a paralyzed limb.

areflexia (*ar-e-fleks'-e-ah*) [ἀ, priv.; *reflectere*, to bend back]. The failure of a reflex; areflexion.

areflexion. See *areflexia*.

arena (*ar-e'-nah*) [*arena*, sand]. 1. Brick-dust deposit from urine; gravel. 2. Sabulous matter; brain-sand.

arenaceous (*ar-e-na'-se-us*) [*arenaceus; arena*, sand]. Of the nature of sand or gravel; sabulous.

arenation (*ar-e-na'-shun*) [*arena*, sand]. A sand-bath. The application of hot sand to a limb or part of the body. See *ammotherapy*.

areocardia (*ar-e-o-kar'-de-ah*) [ἀραιός, thin, rare; καρδία, heart]. Bradycardia.

areola (*ar-e'-o-lah*) [dim. of *area*, an open space]. 1. The brownish space surrounding the nipple of the breast. This is sometimes called *areola papillaris*. A *second areola*, surrounding this, occurs during pregnancy. The pigmentation about the umbilicus is called the *umbilical areola*. 2. Any interstice or minute space in a tissue. **a., primary,** cell-spaces still containing cartilage-cells in the matrix of ossifying cartilage-bone. Syn., *primary marrow cavities; medullary spaces*.

areolar (*ar-e'-o-lar*) [see *areola*]. Relating to or characterized by areolæ. **a. tissue,** cellular tissue; loose connective tissue.

areolate, or **areolated** (*ar-e'-o-lāt*, or *ar-e'-o-la-ted*) [*areola*, dim. of *area*, an open space]. Marked or characterized by areolæ

areometer (*ar-e-om'-et-er*) [ἀραιός, rare, thin; μέτρον, a measure]. An instrument for measuring the specific gravity of liquids.

areosis, aræosis (*ar-e-o'-sis*). The process of becoming less compact; dilution.

arevareva (*ar-a-var-a'-vah*) [Tahitian]. A scaly skin-disease said to be caused by the habitual use of the drug *Kava*, *q. v* It is accompanied by eye-disease, with dimness of vision.

argal (*ar'-gal*). See *argol*.

argamblyopia (*ar-gam-ble-o'-pe-ah*) [ἀργός, idle, disused; *amblyopia*]. Amblyopia due to disuse of the eye.

Argand burner (*ar'-gand*) [Ami *Argand*]. A burner that uses gas or oil, and contains an inner tube for supplying the flame with air.

argas (*ar'-gas*). The dove-tick. Found in dovecots and pigeon roosts; it may give rise to edema or urticaria in man. **a. persicus,** a tick, the bite of which is supposed to be a cause of tick fever.

Argasidæ (*ar-gas'-e-de*). A family of ticks, practically all members of which are pathogenic to man.

argein (*ar'-je-in*). Trade name of a protein preparation containing silver.

argema (*ar'-jem-ah*) [ἄργεμα, an ulcer; pl., *argemata*]. A white ulcer of the margin of the cornea, following phlyctenula.

argentamid (*ar-jen'-tam-id*). An antiseptic liquid preparation of silver.

argentamine (*ar-jen'-tam-ēn*). A colorless alkaline liquid consisting of an 8% solution of silver phosphate in a 15% aqueous solution of ethylenediamide. It is applied in gonorrhea and conjunctivitis in 1:4000 solution. Syn., *ethylenediamide silver phosphate*.

argentation (*ar-jen-ta'-shun*) [*argentum*]. 1. Staining with a preparation of silver. 2. The act of silvering. 3. The process of injecting mercury into the vessels of an anatomic specimen. 4. Argyria.

argenti (*ar-jen'-ti*). Genitive of *argentum*, Latin for silver.

argentic (*ar-jen'-tik*). Containing silver.

argentide (*ar-jen'-tīd*). Trade name of a preparation containing silver iodide; used locally as an astringent and as a germicide.

argentine (*ar'-jen-tēn*). Containing or like silver.

argentol (*ar'-jen-tol*), $C_9H_8N.OH.SO_4Ag$ Silver quinaseptol, a yellow powder, sparingly soluble in water; used as a surgical antiseptic and astringent in ointment 1.100 or 2:100, in solution 1:1000 to 3.1000.

argentose (*ar-jen'-tōs*). A preparation containing 30% of silver with nucleoprotein; used locally as an astringent and germicide.

argentous (*ar-jen'-tus*). Containing silver; applied to a compound containing a relatively larger amount of silver than an ordinary silver compound (argentic compound).

argentum (*ar-jen'-tum*) [L]. Silver. Ag = 107.88; quantivalence, 1; spec grav , 10.5. A malleable and ductile metal of brilliant white luster. It tarnishes only in free sulphur, sulphur gases, and phosphorus. **argenti cyanidum** (U. S. P.), AgCN, silver cyanide, is used in making diluted hydrocyanic acid. **a. io'didum** AgI. A yellowish hexagonal crystalline powder, insoluble in water. Used externally in conjunctivitis and urethritis, formerly in syphilis **argenti nitras** (U. S. P.), $AgNO_3$, silver nitrate, argentic nitrate, "lunar caustic," a powerful astringent and an escharotic of moderate strength. It stains skin and other tissues black. If used too long, it leaves a slate-colored, insoluble deposit of silver under the skin (*argyria*). It is used in gastric catarrh, in gastric ulcer, in intestinal ulceration, and as an alterative in scleroses of the nervous system. Dose ½–½ gr. (0.01–0.032 Gm.). **argenti nitras fusus** (U. S P.), 'stick caustic," contains 4% of silver chloride. It is used locally. **argenti nitras mitigatus** (U. S. P.), the mitigated caustic, or diluted stick, is fused with an equal amount of potassium nitrate **argenti oxidum** (U. S. P.), Ag_2O, explosive when treated with ammonia. Used internally for the same conditions in which the nitrate is used. Dose ½–2 gr. (0.032–0.13 Gm.). **argentum vivum,** an old name for mercury or quicksilver

argiamblyopia (*ar-je-am-ble-o'-pe-ah*) [ἀργία, disuse; *amblyopia*]. See *argamblyopia*.

argilla (*ar-jil'-ah*) [ἄργιλλος, potter's clay]. White or potter's clay; alumina.

argillaceous (*ar-jil-a'-shus*) [ἄργιλλος, white clay]. Clay-like; composed of clay.

arginase (*ar'-jin-ās*). A ferment which splits arginin into urea and ornithin.

arginin (*ar'-jin-in*), $C_6H_{14}N_4O_2$. Guanidin diamino-valeric acid, a substance formed in the cleavage of the protein molecule. It is hydrolyzed to urea and ornithin.

argochrom (*ar'-go-krōm*) [*argentum*, silver; χρῶμα, color]. A colloidal preparation of methylene-blue and silver, used in septicemic conditions and gonorrhea.

argol (*ar'-gol*) [ἀργός, white]. The impure **tartar** derived from wine; crude potassium bitartrate. See *tartar*.

argon (*ar'-gon*) [ἀργός, idle; inactive]. An inert gaseous element present in the atmosphere. Its symbol is A; atomic weight, 39 88. Argon may be obtained by freeing air, which has been deprived of its carbon dioxide and water, from oxygen by means of red-hot copper, and then absorbing the nitrogen by means of metallic magnesium. The residual gas, the passage of the gases being repeated a number of times, is

argon Chemically, it is the most inert element known

argonin (*ar'-go-nin*) Silver casein, a soluble, antiseptic silver salt

Argyll Robertson pupil (*ar'-gil*) [Douglas *Argyll Robertson*, Scotch physician 1837–1909] A pupil that acts to accommodation but not to light, it is seen in tabes dorsalis paretic dementia, in some cases of encephalomalacia, senile brain atrophy, syphilis hydrocephalus, etc

argyn (*ar' jin*) A colloidal compound of silver oxide and serum albumin, it is a brand of protargin

argyria (*ar-ji'-re-ah*) [*argentum*] A form of discoloration of the skin and mucous membranes produced by the prolonged administration of silver, the granules of silver being deposited in much the same position as those of the natural pigment of the skin

argyriasis (*ar-jir-i'-as-is*) See *argyria*.

argyric (*ar ji'-rik*) [*argentum*] Containing silver

argyrism (*ar' jir izm*) Argyria

argyritis (*ar-jir-i' tis*) Yellow or silver litharge, lead monoxide of a yellow color

argyrol (*ar jir ol*) A brand of soluble silver protein or vitellin antiseptic containing about 20% silver Used for inflamed mucous membranes in gonorrhea

argyrosis (*ar-ji-ro'-sis*) Same as *argyria* (*q v*)

arheol (*ar'-e ol*) A sesquiterpenic alcohol the main constituent of sandalwood oil, santalol *q. v*

arhinencephalia See *arrhinencephalia*

arhinia (*ah-rin'-e-ah*) [*a*, priv , *ρίς*, nose] Congenital absence of the nose

arhovin (*ar o vin*) Trade mark identifying a solution of diphenylamine and thymol benzoate in ethyl benzoate

arhythmia (*ar-ith'-me-ah*) See *arrhythmia*.

Arica bark Calisaya bark exported from Arica, Chili It contains the alkaloid, aricine

aricine (*ar'-is ēn*) [*Arica*], $C_{28}H_{26}N_2O_4$. An alkaloid obtained from several varieties of cinchona bark

aridura (*ar-id-ū'-rah*) [L] Dryness, a drying up, withering or wasting of a part or of the organism as a whole 2 Hectic fever

aristocardia (*ar is to-kar'-de ah*) [*ἀριστερός*, left, *καρδία*, heart] Deviation of the heart to the left side

aristochin (*ar-is' to kin*) The ester of diquinine carbonic acid, it is a white, tasteless powder containing 96% of quinine

aristol (*ar' is-tol*) [*αριστος*, best], $(C_6H_1CH_3OI\text{-}C_3H_7)_2$ Dithymoliodide It is also called annidalin, although this is dithymoltriiodide An iodine compound used as a substitute for iodoform as an antiseptic dressing It has the advantage of being odorless, and is used either in the powder form or as a 5 to 10% ointment with vaselin or lanolin

Aristolochia (*ar is-to-lo'-ke-ah*) [*ἄριστος*, best, *λοχεία*, the lochia] A genus of exogenous herbs, many species of which have active medicinal qualities *A clematitis*, of Europe, has been used as a tonic, stimulant, and diaphoretic *A cymbifera*, of South America, furnishes a part of the drug called *guaco*, and is a good tonic and stimulant *A rotunda*, a species of southern Europe, with offensive odor and bitter taste, is employed as an emmenagogue and in gout *A serpentaria*, Virginia snakeroot, is at present more used in medicine than any other species See *serpentaria*

aristolochic (*ar-is-to-lo'-kik*) [*ἄριστος*, best, *λοχεία*, the lochia] 1 Having the property of expelling the placenta or of exciting or promoting the lochial discharge 2 A medicine used for expelling the secundines or for exciting the lochial flow

aristolochin (*ar-is-tol'-o kin*) [see *Aristolochia*]. A bitter principle found in Virginia snakeroot See *serpentaria*

aristoquin (*ar-is' to kwin*) Same as *aristochin*

Aristotle's experiment [*Aristotle*, Greek philosopher, 384–322 B. C] The eyes being closed when a small spherical object is placed between two crossed fingers of one hand so that it touches the radial side of one and the ulnar side of the other, the sensation produced is that of two objects

arithmomania (*ar-ith-mo ma'-ne-ah*) [*ἀριθμός*, a number, *μανία*, madness] An insane anxiety with regard to the number of things that fall under the observation Sometimes it consists in constant or uncalled for counting of objects, sometimes in the mere repeating of consecutive numbers

arkyochrome (*ar' ke o krōm*) [*ἄρκυς* a net, *χρωμα*, a color] A somatochrome nervé cell in which the stainable portion of the cell-body appears in the form of network

arkyostichochrome (*ar-ke-o-stik'-o-krom*) [*ὄρκυς*, a net *στίχος*, a row or rank, *χρωμα* a color] Applied by Nissl to a nerve cell in which the chromophilic particles of its cell body present a combination of both the striated (stichochrome) and network (arkyochrome) arrangements, so that it is difficult to decide which dominates, *e. g.*, the Purkinje cells of the cerebral cortex

arlco-urease (*arl'-ko-u' re-ās*) A preparation of the urealytic enzyme obtained from the soy bean, *Soja hispida* It decomposes urea into ammonia and carbon dioxide, and is used to determine the amount of urea in the urine, blood and other body fluids

Arlt's ointment [Carl Ferdinand Ritter von *Arlt*, Austrian physician, 1812–1887] An ointment containing 7½ gr (0 5 Gm) of belladonna to 1½ dr (5 Gm) of blue ointment **A.'s recess, A 's sinus**, a small depression, directed forward and outward in the lower portion of the lacrimal sac, it is not constant **A 's trachoma**, granular conjunctivitis, trachoma

Arlt-Jaesche's operation [see *Arlt s ointment*] *For distichiasis* the edge of the lid and the contained ciliary bulbs are dissected from the tarsus, a crescent shaped piece of skin is removed from the lid above the flap, and the edges of the wound are united, thus transplanting the ciliary bulbs farther away from the edge of the lids

arm. 1 The upper extremity from the shoulder to the elbow 2 The upper extremity from the shoulder to the wrist 3 That portion of the stand connecting the body or tube of a microscope with the pillar **a. center**, the cortical center for the movement of the arm, it is situated in the middle third of the ascending frontal and ascending parietal convolutions **a., milk**, phlegmasia alba dolens in the arm

armamentarium (*ar-mah-men-ta'-re-um*) [L , an arsenal] The outfit of medicines or instruments of the physician or surgeon **a. chirurgicum**, surgical instruments and appliances **a. lucinæ**, an outfit of obstetrical instruments.

Armanni-Ehrlich's degeneration. Hyaline degeneration of the epithelial cells of Henle s looped tubes in diabetes.

armarium (*ar-ma'-re-um*) [L.]. 1. Same as *armamentarium*. 2. The literary outfit of a physician or surgeon, his library.

armature (*ar'-mat-chŭr*) [*armatura*, equipment]. 1. A mass of soft iron at the extremity of a magnet. Also, the core of iron around which coils of insulated wire are wound. 2. Any protective investment of an organism. 3 A condenser.

Armenian (*ar-me'-ne-an*) [Armenia]. Of or belonging to Armenia. **A. blue.** Same as *ultramarine*. **A. bole,** a reddish, unctuous earth or clay formerly much used in medicine, now used in tooth-powders and in veterinary practice. It is absorbent and astringent.

armilla (*ar-mil'-ah*) [*armilla*, a bracelet, ring]. 1. The annular ligament of the wrist. 2. The Gasserian ganglion.

armpit (*arm'-pit*) [*armus*, shoulder, *puteus*, a well]. The axilla.

army itch. A distressing, chronic form of itch prevalent in the United States at the close of the civil war. The itching was intense. The eruption was seen especially on the arms, forearms, chest, abdomen, and lower extremities, particularly on the ulnar side of the forearm and inner aspect of the thigh It resembled prurigo associated with vesicles, pustules, and eczema.

Arneth's classification of neutrophiles (*ar'-nāt*) [Joseph *Arneth*, German physician, 1873–]. The polynuclear neutrophiles are classified according to the number of nuclear lobes which they contain. The normal is said to be. 1 lobe, 5%; 2 lobes, 35%; 3 lobes, 41%; 4 lobes, 17%; and 5 lobes, 2%.

Arneth's method of leucocyte counting (*ar'-nāt*) [Joseph *Arneth*, German physician, 1873–] The polyneuclears are classified according to the number of their nuclei (from 1 to 5). The percentage of those with 3 or more nuclei constitutes the *phagocytic index*

Arnica (*ar'-nik-ah*) [L.]. A genus of composite-flowered plants. The *arnica* of the U. S. P. is the dried flower-heads of the plant commonly known as "leopardsbane," *A. montana* The root (*arnicæ radix*) is official in the B. P. Its properties are probably due to an alkaloid, *trimethylamine*, C_3H_9N. In small doses it is a cardiac stimulant; in larger doses, a depressant. It is a popular remedy, when locally applied, for sprains, bruises, and surface wounds. Dose 15 gr (1 Gm.). **a., infusion of** (20 parts flowers, 100 parts water), superior to the tincture for local use **a. plaster,** contains extract of root, 33; lead-plaster, 67 parts **a. root, extract of.** Dose 3–5 gr. (0.2–0.3 Gm.). **a. root fluidextract of.** Dose 5–10 min. (0 3–0.065 Cc.). **a. root, tincture of,** 10 %. Dose 5–30 min. (0.3–2 0 Cc.). **a., tincture of** (*tinctura arnicæ*, U. S. P.), 20 %. Dose 15–30 min. (1–2 Cc.).

arnicin (*ar'-nis-in*) [*arnica*], $C_{20}H_{30}O_4$. A brownish, bitter neutral principle extracted from the root of *Arnica montana*.

Arnold's bodies [Julius *Arnold*, German pathologist, 1835–1915]. Broken bits of red blood corpuscles mistaken for blood-platelets

Arnold's bundle [Friedrich Arnold, German anatomist, 1803–1890]. The fibers which form the inner third of the crusta of the cerebral peduncles. **A.'s canal,** a small canal in the petrous portion of the temporal bone, transmitting Arnold's nerve. **A.'s fold.** See *Béraud's valve*. **A.'s ganglion,** the otic ganglion. **A.'s ground plexus,** a plexus formed by the axis-cylinders of nonmedullated nerve-fibers in smooth muscular tissue. **A.'s innominate canal,** a nonconstant canal in the base of the skull, internally to the foramen rotundum; it transmits the superficial and deep petrosal branches that have become fused into one nerve. **A.'s ligament,** the ligament connecting the body of the incus with the roof of the tympanic cavity. **A.'s membrane,** the pigmentary layer of the iris. **A.'s nerve,** the auricular branch of the pneumogastric nerve. **A.'s operculum,** the operculum of the island of Reil. **A.'s recurrent nerve,** a sensory branch of the ophthalmic division of the trigeminus that anastomoses with the trochlear nerve and is distributed to the tentorium cerebelli and the posterior part of the falx cerebri. **A.'s stratum reticulatum,** the network formed by the fibers connecting the occipital lobe with the optic thalamus before they enter the latter.

Arnold's test [V. *Arnold*, Austrian physician]. *For diacetic acid.* Two reagents are required: (1) a solution consisting of 1 Gm. of paraamidoacetphenone, 100 Cc. of distilled water, and 2 Cc. of concentrated hydrochloric acid; (2) 1% solution of sodium nitrate. Fifteen Cc. of urine are treated with 10 Cc. of solution 1 and 5 Cc. of solution 2, and one drop of concentrated ammonia is added. A brownish-red coloration is observed, which changes to purple in the presence of diacetic acid.

Arnott's bed (*ar'-not*) [Neil *Arnott*, Scotch physician, 1788–1874] A rubber mattress filled with water, designed to prevent bedsores.

Arnoux's sign (*ar-noo'*). In case of twins, a stethescope on the mother's abdomen at a point about midway between the two fetal hearts will sometimes enable the physician to hear an apparent unison, and at other times a distinct rhythm of four beats; the double and quadruple rhythm alternate with great regularity.

Arnt-Schulz Law (*arnt-shoolz*). Every drug has a stimulating action in small doses, while larger doses inhibit, and much larger doses kill.

arnusit (*ar'-nu-sit*). Bier's pure solution of arnica in ampoules, used for treating carbuncles.

aroma (*ar-o'-mah*) [*ἀρωμα*, spice] The fragrance or odor emanating from certain vegetable substances, especially those used for food and drink.

aromatic (*ar-o-mat'-ik*) [see *aroma*]. 1. Having a spicy odor. 2. Characterized by a fragrant, spicy taste and odor, as cinnamon, ginger, the essential oils, etc. 3. A qualification applied to any carbon compound originating from benzene, C_6H_6. Their stability is relatively great as compared with that of the fatty bodies. **a. acids,** those from the benzene group of hydrocarbons **a. compound,** any benzyl derivative. **a. fluidextract,** aromatic powder, 100; alcohol, sufficient to make 100 Cc. **a. powder.** See *cinnamomum*. **a. series,** the closed chain series of compounds. **a. sulphuric acid.** See *acid, sulphuric*. **a. tincture,** an alcoholic solution of aromatic powder. **a. vinegar,** any mixture of aromatic oils in vinegar **a. wine,** one having in each 100 parts 1 part each of lavender, origanum, peppermint, rosemary, sage, and wormwood.

aromatin (*ar-o'-mat-in*). A succedaneum for hops.

aromatize (*ar-o'-mat-iz*) [*ἀρωμα*, spice]. To make aromatic; to spice.

aromin (*ar-o'-min*) [see *aroma*]. A substance derived from urine. When heated, it emits a fragrant odor.

Aronson's serum (*ar'-on-sun*) [Hans *Aronson*, German bacteriologist, 1865–1919]. An anti-

streptococcus serum obtained from horses that have been treated with highly virulent cultures.

arophene (*ar'-o-fēn*). A proprietary dental anesthetic.

arphoaline (*ar-fo'-al-ēn*). A preparation containing arsenic, phosphorus and albumin; it is used as a local application for cancers and ulcers.

arrachement (*ar-ash-mon(g)'*) [Fr., a tearing out]. Tearing out; extraction.

arrack (*ar'-ak*) [Ind.]. A liquor distilled from malted rice. Any alcoholic liquor is called arrack in the East.

arrector (*ar-ek'-tor*) [L., "an erector"]. An erector. **a. pili,** a fan-like arrangement of a layer of smooth muscular fibers surrounding the hair-follicle, the contraction of which erects the follicle and produces *cutis anserina*, or "goose-skin."

arrectores pilorum (*ar-ek-to'-rēz pī-lo'-rum*) [L.]. Plural of *arrector pili*, *q. v.*

arrest (*ar-est'*) [*ad*, to; *restare*, to withstand]. 1. Stoppage, detention. 2. A disease of a mangy character affecting the hind leg of horses between the ham and postern. **a., action of,** inhibition (*q. v.*). **arrested development,** is when an organ or organism fails in its normal evolution, stopping at the initial or intermediate stages of the process **arrested head,** when in parturition the child's head is hindered but not impacted in the pelvic cavity

arrhea (*ah-re'-ah*) [*ἀ*, priv.; *ῥοία*, a flow]. The cessation or suppression of any discharge.

arrhenal (*ar'-en-al*). A monomethyl sodium arsenate, recommended in treatment of tuberculosis. Dose ½ gr. (0.05 Gm.) daily.

arrhenic (*ah-ren'-ik*). Pertaining to arsenic. **a. medication,** treatment of disease by the organic arsenic preparations, such as the cacodylate and methylarsenates.

Arrhenius' law (*ah-ra'-ne-oos*) [Svante August *Arrhenius*, Swedish chemist, 1859–1927]. A solution must have a high osmotic pressure in order to be electrically conductive.

Arrhenius's viscosity formula

$$\log x = \theta c$$

where x is the viscosity of the solution, relative to that of the liquid medium of suspension, c the percentage of volume occupied by the suspended particles, and θ a constant.

arrhinencephalia (*ar-in-en-sef-al'-e-ah*) [*ἀ*, priv.; *ῥίς*, nose; *ἐγκέφαλον*, the brain]. A form of partial anencephalia in which there is malformation of the nose.

arrhinia (*ah-rin'-e-ah*). Congenital absence of the nose.

arrhythmia (*ah-rith'-me-ah*) [*ἀ*, priv.; *ῥυθμός*, rhythm]. Absence of rhythm.

arrhythmic (*ah-rith'-mik*) [see *arrhythmia*]. Without rhythm; irregular.

arrosion (*ar-o'-zhun*) [*arrodere*, to gnaw]. The gnawing or destruction of vessel-walls by ulcerous processes.

arrow-poison (*ar-o-poi'-zun*). See *curara*.

arrowroot (*ar'-o-root*) [ME., *arow; roote*]. A variety of starch derived from *Maranta arundinacea* of the West Indies, southern United States, etc. It is a popular remedy for diarrhea, and is widely used as a food. Many other starchy preparations are sold as arrow-root.

arsacetin (*ars-as'-et-in*). Sodium acetyl arsanilate; acetyl atoxyl. It is an organic arsenic compound used in sleeping-sickness, syphilis, and skin diseases.

arsamine (*ars'-am-ēn*). Same as *atoxyl*.

arsan (*ar'-san*). An organic arsenic preparation consisting of vegetable protein with about 4% of arsenic.

arsanilate (*ar-san'-il-āt*) A salt of arsanilic acid.

arsenate, arseniate (*ar'-sen-āt, ar-se'-ne-āt*) [*arsenic*]. Any salt of arsenic acid. **a., acid,** a monohydric or dihydric arsenate. **a., basic,** an arsenate combined with the oxide or hydrate of a base. **a., dihydric.** 1. An acid arsenate containing two atoms of hydrogen. 2. See *pyroarsenic acid*. **a., monohydric.** 1. An acid arsenate containing one atom of hydrogen. 2. Metarsenic acid, $HAsO_3$, a crystalline substance obtained from arsenic trioxide by heating above 200° C. **a., neutral.** 1. A normal arsenate. 2. A pyroarsenate.

arsenauro (*ar-sen-aw'-ro*). A double bromide of gold and arsenic; 10 min. contain $\frac{1}{12}$ gr. each of gold and arsenic bromides. It is an alterative and a tonic Dose 5–15 min. (0.3–1.0 Cc.) in water three times daily.

arsenglidin (*ar-sen-gli'-din*). Same as *arsan*.

arsenhemol (*ar-sen-hem'-ol*). A compound of hemol and 1% of arsenic trioxide, forming a brown powder. It is used as a substitute for arsenic as an alterative and hematinic. Dose 2 gr. (0.1 Gm.) 3 times daily

arseni (*ar-se'-ni*). Genitive of *arsenum*, *q. v.*

arseniasis (*ar-sen-i'-as-is*). Same as *arsenism*.

arsenic, arsenicum, arsenum (*ar'-sen-ik, ar-sen'-i-kum, ar-se'-num*). 1. As = 74.96; quantivalence III, V. A brittle, crystalline metal, of a steel-gray color, tarnishing on exposure to the air. Sp. gr. 5.73. It sublimes at 180° C., and gives off a garlicky odor. In medicine arsenic is used as an alterative in anemia, chronic malaria, asthma, pulmonary tuberculosis, as a gastric sedative, and in chorea 2. Arsenic trioxide. 3. Pertaining to arsenic. **a. bromide,** $AsBr_3$, is used in diabetes. Dose $\frac{1}{10}$ gr. (0.001 Gm.) **a. bromide, solution of** (*liquor arseni bromidi*), Clemens' solution, a 1% solution of arsenic bromide. Dose 1–4 min. (0.06–0.24 Cc.). **a., butter of.** See *a. chloride*. **a. caseinate,** a soluble arsenic compound for internal administration. **a. chloride,** $AsCl_3$, a colorless, oily liquid decomposed by water. Dose $\frac{1}{60}$–$\frac{1}{15}$ gr. (0.001–0.004 Gm.). Syn., *butter of arsenic; chloride of caustic arsenic*. **a. disulphide,** As_2S_2, occurs native as realgar. Syn., *sandaraca; red sulphide of arsenic; red arsenic*. An artificial disulphide of arsenic is prepared in the arsenic works and contains about 15% of arsenic and 27% of sulphur. Syn., *red arsenic glass; ruby sulphur; red orpiment*. **a., flowers of,** a fine white powder, formed by the sublimation of arsenic trioxide. **a. glass,** a term applied to the vitreous mass obtained either by heating arsenic pyrites with sulphurous ores, or by the resublimation of the "flowers of arsenic" obtained by subliming arsenic pyrites. Syn., *white arsenic glass*. **a. iodide** (*arseni iodidum*, U. S. P.), arsenous iodide, AsI_3. Dose $\frac{1}{20}$–$\frac{1}{4}$ gr. (0.003–0.008 Gm.). **a. iodide, solution of mercuric and of** (*liquor arseni et hydrargyri iodidi*, U. S. P.), Donovan's solution; contains arsenous iodide, 10 Gm.; red mercuric iodide, 10 Gm.; distilled water, q. s. to make 1000 Gm. **a., test for.** See *Bettendorf, Marsh, Reinsch*. **a. trioxide** (*arseni trioxidum*, U. S. P.), As_2O_3, arsenous acid; "ratsbane." Dose $\frac{1}{80}$–$\frac{1}{10}$ gr. (0.002–0.006 Gm.). Syn., *white arsenic*. **a. trioxide, solution of** (*liquor acidi arsenosi*, U. S. P.; *liquor arsenici hydrochloricus*, B. P.), a

1% solution of the trioxide in hydrochloric acid and distilled water. Dose 2–5 min. (0.12–0.3 Cc.). **a. trisulphide**, As_2S_3, translucent, lemon-colored, rhombic prisms, occurring in nature; sp. gr. 3.46; a corrosive and depilating agent recommended for removal of warts. Syn., *orpiment; yellow sulphide of arsenic; arsenicum* (Pliny); *arsenii sulphidum citrinum; King's yellow.* **a., white.** See *a. trioxide.*

arsenical (*ar-sen'-ik-al*) [*arsenum*, arsenic]. Pertaining to arsenic.

arsenicalism (*ar-sen'-ik-al-izm*) [*arsenic*]. Chronic arsenic poisoning.

arsenicate (*ar-sen'-ik-āt*). To impregnate with arsenic.

arsenicophagy (*ar-sen-ik-off'-a-je*) [*arsenum*, arsenic; φαγεῖν, to eat]. The habitual eating of arsenic.

arsenicum. See *arsenum.*

arsenide (*ar'-sen-īd*). A compound of arsenic with another element.

arsenionization (*ar-sen-i-on-i-za'-shun*). The electrical administration of arsenic ions into the tissues.

arseniophosphate (*ar-sen-e-o-fos'-fāt*). A compound of a base with both arsenic and phosphoric acids.

arsenism (*ar'-sen-izm*) [*arsenum*, arsenic]. Chronic arsenical poisoning; arsenicalism.

arsenite (*ar'-sen-īt*) [*arsenic*]. Any salt of arsenous acid.

arseniureted (*ar-sēn'-yu-ret-ed*). Combined with arsenic so as to form an arsenide. **a. hydrogen** arsine, AsH_3.

arsenization (*ar-sen-iz-a'-shun*) [*arsenum*, arsenic]. Treatment with arsenical remedies.

arseno- (*ar'-se-no*). Arsenic combined in the form $-As = As-$. Thus arsenobenzol is $C_6H_5 - As = As - C_6H_5$.

arsenobenzol (*ar-sen-o-ben'-zol*). 1. See *arseno-*. 2. See *salvarsan.*

arsenobillon (*ar-sen-o-bil'-on*). Trade name of arsphenamine.

arsenoblast (*ar-sen'-o-blast*) [ἄρσην, male; βλαστός, germ]. In biology, the male element of the sexual cell, capable of multiplication by division; the opposite of the *thelyblast* or female element.

arsenocerebrin (*ar-sen-o-ser'-e-brin*). A proprietary preparation said to contain cerebrin and sodium cacodylate; it is suggested for use in epilepsy.

arsenofagy (*ar-sen-off'-a-je*). Arsenicophagy, *q. v.*

arsenophenylglycin (*ar-sen-o-fen-il-gli'-sin*). A synthetic arsenic compound, a substitution-product of atoxyl, used in syphilis, trypanosomiasis and protozoan diseases in general.

arsenous (*ar-se'-nus*) [*arsenic*]. Containing arsenic. **a. acid.** See *arsenic trioxide.*

arsen-phenolamine (*ar-sen-fen-ol-am'-in*). Trade name of arsphenamine.

arsenregenerin (*ar-sen-re-jen'-er-in*). Regenerin (*q. v.*) with nitrate of arsenic and lithium cacodylate.

arsine (*ar'-sin*). Arseniureted hydrogen, AsH_3.

arsins (*ar'-sinz*). Peculiar volatile arsenic bases found by Selmi to be produced by the contact of arsenic trioxide and albuminous substances.

arsinyl (*ar'-sin-il*). Proprietary name for disodium-methylarsenate, nontoxic substance allied to cacodyl and free from its garlicky odor. Said to be a powerful tonic. Dose ½ gr. (0.03 Gm.) twice daily.

arsonate (*ar'-so-nāt*). A salt of arsonic acid.

arsonic acid (*ar-son'-ik*). An acid derived from arsenic acid by the substitution of an organic radical, for one of the hydroxyl groups.

arsonium (*ar-so'-ne-um*) [*arsenic; ammonium*], AsH_4. A univalent radical in which arsenic replaces the nitrogen of ammonium.

Arsonvalization (*ar-son-val-iz-a'-shun*) [*d' Arsonval*, French physiologist and physicist, 1851–]. The therapeutic application of Tesla currents.

arsphenamine (*ars-fen'-am-in*). Preferred name for Salvarsan.

arsycodile (*ar-sik'-od-il*). 1. A chemically pure cacodylate of sodium, a nontoxic salt used in emaciation. Dose ½ gr. (0.03 Gm.) 4 times daily. 2. The trade name of a number of preparations containing sodium cacodylate.

artarine (*ar'-tar-ēn*). An alkaloid, $C_{20}H_{17}NO_4$, from artar root; it is a cardiac stimulant, with action similar to veratrine.

artar root (*ar'-tar-root*). A drug from West Africa, probably the root of *Xanthoxylum senegalense.*

artefact (*ar'-te-fakt*) [*arte*, by art. *factum*, made]. In microscopy and histology, a structure that has been produced by mechanical, chemical, or other artificial means; a structure or tissue that has been changed from its natural state

Artemisia (*ar-tem-iz'-e-ah*) ["Αρτεμις, the goddess Diana]. A genus of plants of the order *Compositæ.* **A. abrotanum,** southern-wood, is stimulant, tonic, and vermifuge, and is popularly used as a vulnerary. It is similar in properties to wormwood. Dose of *fluidextract* 10–20 min. (0.6–1.2 Cc.). **A. absinthium.** See *absinthium.* **A. abyssinica,** an African species yielding the drug *zerechtit,* applied to relieve cramps in the final stages of malaria. **A. arborescens,** of southern Europe, is stomachic and tonic, and is used as is *A. absinthium.* **A. chinensis,** of Asia, is employed by the Chinese as a tonic and emmenagogue, and the down covering the leaf-surface in the preparation of moxa. **A. frigida,** wild sage, mountain sage, sierra salvia. An herb of western United States, introduced as a substitute for quinine in the treatment of periodic fevers. Also of service in diphtheria, rheumatism, and scarlatina. Dose of the *fluidextract* 1–2 dr. (4–8 Cc.). **A. maritima,** affords pure wormseed. **A. mexicana,** an American species, is said to be a stimulant, emmenagogue, and anthelmintic. **A. pontica,** Roman wormwood; it grows in Europe and Asia, has a pleasant odor and taste, and is used as a tonic and stimulant; it is burned in Egypt during the plague to ward off contagion. **A. santonica,** a species of Persia and Tartary, a variety of wormseed sometimes imported from Russia. **A. spicata,** an Alpine species with strong aromatic properties. **A. tridentata,** sagebrush, a shrub of the elevated portion of western North America, containing a pungent volatile oil. It is diaphoretic and stimulant. The Indians use an infusion of the plant as remedial for colds and headache and as a vermifuge. **A. trifida,** is found in the valleys of Utah and Wyoming, and has properties similar to *A. tridentata.* **A. vulgaris,** mugwort, a popular remedy in various diseases.

arterenol (*ar-te-re'-nol*). A proprietary drug, said to have an action similar to suprarenal preparations.

arteria (*ar-te'-re-ah*) [ἀρτηρία, trachea; artery]. A hollow tube. See *artery.* **a. acetabuli,** artery of the acetabulum. **a. alveolaris inferior,** inferior dental artery. **a. alveolaris superior**

anterior, anterior superior dental artery. **a. alveolaris superior posterior,** posterior dental artery. **a. angularis,** angular artery. **a. anonyma,** innominate artery. **a. appendicularis,** appendicular artery. **a. arcuata,** arcuate or metatarsal artery. **a. auditiva interna,** auditory artery. **a. auricularis posterior,** posterior auricular artery. **a. auricularis profunda,** deep auricular artery. **a. axillaris,** axillary artery. **a. basilaris,** basilar artery. **a. brachialis,** brachial artery. **a. bronchialis,** bronchial artery. **a. buccinatoria,** buccal artery **a. bulbi urethræ,** artery of the bulb of the urethra. **a. bulbi vestibuli (vaginæ),** artery of the vestibular bulb of the vagina. **a. canalis pterygoidei (Vidii),** Vidian artery. **a. carotis communis,** common carotid artery. **a. carotis externa,** external carotid artery. **a. carotis interna,** internal carotid artery. **a. centralis retinæ,** central artery of the retina. **a. cerebelli, inferior anterior,** anterior inferior cerebellar artery. **a. cerebelli inferior posterior,** posterior inferior cerebellar artery. **a. cerebelli superior,** superior cerebellar artery. **a. cerebri anterior,** anterior cerebral artery. **a. cerebri media,** middle cerebral artery. **a. cerebri posterior,** posterior cerebral artery. **a. cervicalis ascendens,** ascending cervical artery **a. cervicalis profunda,** deep cervical artery. **a. cervicalis superficialis,** superficial cervical artery. **a. chorioidea,** anterior choroidal artery. **a. ciliaris anterior,** anterior ciliary artery. **a. ciliaris posterior brevis,** short posterior ciliary artery **a. ciliaris posterior longa,** long posterior ciliary artery. **a. circumflexa femoris lateralis,** external circumflex artery. **a. circumflexa femoris medialis,** internal circumflex artery. **a. circumflexa humeri anterior,** anterior circumflex artery. **a. circumflexa humeri posterior,** posterior circumflex artery. **a. circumflexa ilium profunda,** deep circumflex iliac artery. **a. circumflexa ilium superficialis,** superficial circumflex iliac artery. **a. circumflexa scapulæ,** dorsalis scapulæ artery. **a. clitoridis,** artery of the clitoris. **a. cœliaca,** celiac artery or axis. **a. colica dextra,** right colic artery. **a. colica media,** middle colic artery. **a. colica sinistra,** left colic artery. **a. collateralis media,** middle collateral artery. **a. collateralis radialis,** articular branch of superior profunda artery. **a. collateralis ulnaris inferior,** anastomotica magna artery. **a. collateralis ulnaris superior,** inferior profunda artery. **a. comitans nervi ischiadici,** comes nervi ischiadici, or companion artery of the sciatic artery. **a. communicans anterior,** anterior communicating artery. **a. communicans posterior,** posterior communicating artery. **a. conjunctivalis anterior,** anterior conjunctival artery. **a. conjunctivalis posterior,** posterior conjunctival artery. **a. coronaria (cordis) dextra,** right coronary artery. **a. coronaria (cordis) sinistra,** left coronary artery. **a. cystica,** cystic artery. **a. deferentialis,** deferential artery. **a. digitalis dorsalis,** dorsal digital artery. **a. digitalis plantaris,** collateral digital branch artery. **a. digitalis volaris communis,** palmar digital artery, or collateral digital artery. **a. dorsalis clitoridis,** dorsal artery of the clitoris **a. dorsalis nasi,** dorsal artery of the nose. **a. dorsalis pedis,** dorsal artery of the foot. **a. dorsalis penis,** dorsal artery of the penis. **a. epigastrica inferior,** deep epigastric artery. **a. epigastrica superficialis,** superficial epigastric artery. **a. epigastrica superior,** superior epigastric artery. **a. episcleralis,** episcleral artery **a. ethmoidalis anterior,** anterior ethmoidal artery. **a. ethmoidalis posterior,** posterior ethmoidal artery. **a. femoralis,** femoral artery. **a. frontalis,** frontal artery. **a. gastrica dextra,** pyloric artery. **a. gastrica sinistra,** gastric or coronary artery **a. gastroduodenalis,** gastroduodenal artery. **a. gastroepiploica dextra,** right gastro-epiploic artery. **a. gastroepiploica sinistra,** left gastro-epiploic artery. **a. genu inferior lateralis,** inferior external articular artery. **a. genu inferior medialis,** inferior internal articular artery. **a. genu media,** azygos articular artery. **a. genu superior lateralis,** superior external articular artery. **a. genu superior medialis,** superior internal articular artery. **a. genu suprema,** anastomotica magna (of knee). **a. glutæa inferior,** sciatic artery. **a. glutæa superior,** (superior) gluteal artery. **a. hæmorrhoidalis inferior,** inferior hemorrhoidal artery. **a. hæmorrhoidalis inferior,** inferior hemorrhoidal artery. **a. hæmorrhoidalis media,** middle hemorrhoidal artery **a. hæmorrhoidalis superior,** superior hemorrhoidal artery. **a. helicina,** a spiral artery. **a. hepatica,** hepatic artery. **a. hyaloidea,** hyaloid artery. **a. hypogastrica,** internal iliac artery. **a. ilea,** ileal artery, one of the rami intestini tenuis arteries. **a. ileocolica,** ileocolic artery. **a. iliaca communis,** common iliac artery. **a. iliaca externa,** external iliac artery. **a. iliolumbalis,** iliolumbar artery. **a. infraorbitalis,** infraorbital artery. **a. intercostalis,** intercostal artery. **a. intercostalis suprema,** superior intercostal artery **a. interlobaris renis,** interlobar artery of kidney. **a. interossea communis,** common interosseous artery **a. interossea dorsalis,** posterior interosseous artery **a. interossea recurrens,** posterior interosseous artery. **a. interossea volaris,** anterior interosseous artery. **a. jejunalis,** jejunal artery. **a. labialis anterior,** anterior scrotal or labial artery. **a. labialis inferior,** inferior labial or coronary artery. **a. labialis posterior,** posterior labial artery. **a. labialis superior,** superior labial or coronary artery. **a. lacrimalis,** lacrimal artery. **a. laryngea inferior,** inferior laryngeal artery. **a. laryngea superior,** superior laryngeal artery. **a. lienalis,** splenic artery **a. ligamenti teretis uteri,** artery of the round ligament of the uterus. **a. lingualis,** lingual artery. **a. lumbalis,** lumbar artery. **a. lumbalis ima,** lowest lumbar artery. **a. malleolaris anterior lateralis,** external malleolar artery. **a. malleolaris anterior medialis,** internal malleolar artery. **a. malleolaris posterior lateralis,** posterior peroneal artery. **a. malleolaris posterior medialis,** internal malleolar artery. **a. mammaria interna,** internal mammary artery. **a. masseterica,** masseteric artery. **a. maxillaris externa,** facial artery. **a. maxillaris interna,** internal maxillary artery. **a. mediana,** median artery. **a. mediastinalis anterior,** anterior mediastinal artery. **a. meningea anterior,** anterior meningeal artery. **a. meningea media,** middle meningeal artery. **a. meningea posterior,** posterior meningeal artery. **a. mentalis,** mental artery. **a. mesenterica inferior,** inferior mesenteric artery. **a. mesenterica superior,** superior mesenteric artery. **a. musculophrenica,** musculophrenic artery. **a. nutritia femoris inferior,** inferior nutrient artery of femur. **a. nutritia femoris superior,** superior nutrient artery of femur. **a. nutritia**

fibulæ, nutrient artery of fibula. **a. nutritia humeri**, nutrient artery of the humerus. **a. nutritia pelvis renalis**, nutrient artery of renal pelvis. **a. nutritia tibiæ**, nutrient artery of tibia. **a. obturatoria**, obturator artery. **a. occipitalis**, occipital artery. **a. œsophagea**, esophageal artery. **a. ophthalmica**, ophthalmic artery. **a. ovarica**, ovarian artery. **a. palatina ascendens**, ascending palatine artery. **a. palatina descendens**, descending palatine artery. **a. palatina minor**, lesser palatine artery. **a. palpebralis lateralis**, lateral palpebral artery. **a. palpebralis medialis**, middle or internal palpebral artery. **a. pancreaticoduodenalis inferior**, inferior pancreaticoduodenal artery. **a. pancreaticoduodenalis superior**, superior pancreaticoduodenal artery. **a. penis**, artery of penis. **a. perforans prima**, first perforating artery. **a. perforans secunda**, second perforating artery. **a. perforans tertia**, third perforating artery. **a. pericardiacophrenica**, the comes nervi phrenici. **a. perinei**, superficial perineal artery. **a. peronæa**, peroneal artery. **a. phrenica inferior**, inferior phrenic artery. **a. phrenica superior**, superior phrenic artery. **a. plantaris lateralis**, external plantar artery. **a. plantaris medialis**, internal plantar artery. **a. poplitea**, popliteal artery. **a. princeps pollicis**, principal artery of thumb. **a. profunda brachii**, superior profunda artery. **a. profunda clitoridis**, deep artery of clitoris. **a. profunda femoris**, deep femoral artery. **a. profunda linguæ**, ranine artery. **a. profunda penis**, artery to the corpus cavernosum **a. pudenda externa**, external pudic artery. **a. pudenda interna**, internal pudic artery. **a. pulmonalis**, pulmonary artery. **a. radialis**, radial artery. **a. recurrens radialis**, radial recurrent artery. **a. recurrens tibialis posterior**, posterior recurrent tibial artery. **a. renalis**, renal artery. **a. recurrens ulnaris**, recurrent ulnar artery. **a. sacralis lateralis**, lateral sacral artery. **a. sacralis media**, middle sacral artery **a. scrotalis anterior**, anterior scrotal artery. **a. sigmoidea**, sigmoid artery. **a. spermatica externa**, cremasteric artery. **a. spermatica interna**, (internal) spermatic artery. **a. sphenopalatina**, sphenopalatine or nasopalatine artery. **a. spinalis anterior**, anterior or ventral spinal artery. **a. spinalis posterior**, posterior or dorsal spinal artery. **a. sternocleidomastoidea**, sternomastoid artery. **a. stylomastoidea**, stylomastoid artery. **a. subclavia**, subclavian artery. **a. sublingualis**, sublingual artery. **a. submentalis**, submental artery. **a. subscapularis**, subscapular artery. **a. supraorbitalis**, supraorbital artery. **a. suprarenalis inferior**, inferior suprarenal artery. **a. suprarenalis media**, middle capsular artery. **a. tarsea lateralis**, lateral tarsal artery. **a. tarsea medialis**, medial tarsal artery. **a. temporalis media**, middle temporal artery. **a. temporalis profunda anterior**, anterior deep temporal artery. **a. temporalis profunda posterior**, posterior deep temporal artery. **a. temporalis superficialis**, superficial temporal artery. **a. testicularis**, testicular artery. **a. thoracalis lateralis**, long thoracic artery. **a. thoracalis suprema**, superior thoracic artery. **a. thoracoacromialis**, acromiothoracic artery or thoracic axis. **a. thoracodorsalis**, thoracodorsal artery. **a. thymica**, thymic artery. **a. thyreoidea ima**, lowest thyroid artery. **a. thyreoidea inferior**, inferior thyroid artery. **a. thyreoidea superior**, superior thyroid artery. **a. tibialis anterior**, anterior tibial artery. **a. tibialis posterior**, posterior tibial artery. **a. transversa colli**, transversalis colli. **a. transversa faciei**, transverse artery of face. **a. transversa scapulæ**, suprascapular artery **a. tympanica anterior**, anterior tympanic artery. **a. tympanica inferior**, inferior tympanic artery. **a. tympanica posterior**, posterior tympanic artery. **a. tympanica superior**, superior tympanic artery. **a. ulnaris**, ulnar artery. **a. umbilicalis**, umbilical artery. **a. urethralis**, urethral artery. **a. uterina**, uterine artery. **a. vaginalis**, vaginal artery. **a. vertebralis**, vertebral artery. **a. vesicalis inferior**, inferior vesical artery. **a. vesicalis superior**, superior vesical artery. **a. volaris indicis radialis**, radialis indicis artery. **a. zygomaticoorbitalis**, zygomatico-orbital artery.

arteriac (*ar-te'-re-ak*) [*arteria*]. 1. Pertaining to the trachea, or to the arteries. 2. A remedy used in diseases of the trachea or of the arteries.

arteriæ (*ar-te'-re-e*) [L., plural of *arteria*]. Arteries. **a. arciformes**, arciform arteries of renal arches. **a. gastricæ breves**, the vasa brevia. **a. interlobulares**, interlobular arteries. **a. intestinales**, intestinal arteries or vasa intestini tenuis. **a. metacarpeæ dorsales**, dorsal interosseous arteries. **a. renis**, renal arteries. **a. metacarpeæ volares**, volar or palmar interosseous arteries. **a. metatarseæ dorsales**, dorsal interosseous arteries. **a. metatarseæ plantares**, digital branches of the plantar arch. **a. scrotales posteriores**, superficial perineal arteries. **a. surales**, inferior muscular arteries.

arteriagra (*ar-ter-e-a'-grah*) [*arteria*; ἄγρα, a seizure]. Neuralgia of an artery.

arterial [see *arteria*]. Pertaining to an artery.

arterialization (*ar-te-re-al-iz-a'-shun*) [see *arteria*]. 1. The process of making or becoming arterial; the change from venous blood into arterial. 2. Vascularization.

arteriarctia (*ar-te-re-ark'-te-ah*) [*arteria*; *arctus*, bound]. Constriction or stenosis of an artery.

arteriasis (*ar-te-ri'-as-is*) [see *arteria*]. Degeneration of an artery; it may be either calcareous or fatty.

arteriectasis, arteriectasia (*ar-te-re-ek'-tas-is, ar-te-re-ek-ta'-ze-ah*) [*arteria*; ἔκτασις, a stretching out]. Arterial dilatation.

arteriectopia (*ar-te-re-ek-to'-pe-ah*) [*arteria*; ἐκτοπος, out of place]. Displacement or abnormality in the course of an artery.

arteritis (*ar-te-re-i'-tis*). See *arteritis*.

arterin (*ar'-ter-in*) [see *arteria*]. Hoppe-Seyler's term for the arterial blood-pigment contained in the red corpuscles.

arterioarctia (*ar-te-re-o-ark'-te-ah*). See *arteriarctia*.

arteriocapillary (*ar-te-re-o-kap'-il-a-re*) [*arteria*; *capillary*]. Pertaining to arteries and capillaries. **a. fibrosis**, a chronic inflammatory process characterized by an overgrowth of connective tissue in the walls of the blood-vessels. It is known also as arteriocapillary fibrosis of Gull and Sutton.

arteriochalasis (*ar-te-re-o-kal'-as-is*) [*arteria*; χάλασις, a slackening]. Arterial atony.

arteriococcygeal gland (*ar-te-re-o-kok-sij'-e-al*) Luschka's gland.

arteriodialysis (*ar-te-re-o-di-al'-is-is*) [*arteria*; διάλυσις, dissolution]. Attenuation of the arterial walls with or without rupture.

arteriodiastasis (*ar-te-re-o-di-as'-tas-is*) [*arteria*; διάστασις, separation]. 1. The retraction of the

two ends of a divided artery. 2. See *arterioectopia*. 3. The divergence of two arteries that lie near each other normally.

arteriodiplopiesmus (*ar-te-re-o-dip-lo-pi-ez'-mus*) [*arteria*; διπλοός, twofold; πιεσμός, pressure]. D'Etiolles' procedure for obtaining rapid coagulation of the blood in that part of an artery lying between two points upon which simultaneous pressure is made.

arteriofibrosis (*ar-te-re-o-fi-bro'-sis*). See *arteriocapillary fibrosis*.

arteriogram (*ar-te'-re-o-gram*). See *sphygmogram*.

arteriograph (*ar-te'-re-o-graf*) [*arteria*; γράφειν, to record]. A form of sphygmograph.

arteriography (*ar-te-re-og'-ra-fe*) [*arteria*; γράφη, a writing]. 1. A description of the arteries. 2. The graphic representation of the pulse-waves.

arteriola (*ar-te-re-o'-lah*) [L.: *pl.*, *arteriolæ*]. An arteriole. **a. recta**, one of the arterioles going to the pyramids in the cortex of the kidney.

arteriolæ (*ar-te-re-o'-le*) [L.]. Arterioles. **a. auricularis cordis**, coronary arteries of the heart. **a. rectæ**, vasa recta of the kidney.

arteriole (*ar-te'-re-ōl*) [*arteriola*]. A very small artery. **a., straight**, one of the small blood-vessels supplying the medullary pyramids of the kidneys.

arteriolith (*ar-te'-re-o-lith*) [*arteria*; λίθος, a stone]. A calculus in an artery from calcification of a thrombus.

arteriology (*ar-te-re-ol'-o-je*) [*arteria*; λόγος, science]. The science of the arteries; the anatomy, physiology, and pathology of the arteries.

arteriomalacia (*ar-te-re-o-mal-a'-se-ah*) [*arteria*; μαλακία, softness]. Softening of an artery wall.

arteriomalacosis (*ar-te-re-o-mal-ak-o'-sis*). See *arteriomalacia*.

arteriometer (*ar-te-re-om'-et-er*) [*arteria*; μέτρον, measure]. An instrument for measuring the changes in the caliber of a pulsating artery.

arterionecrosis (*ar-te-re-o-ne-kro'-sis*) [*arteria*; *necrosis*]. Necrosis of an artery or arteries

arteriopalmus (*ar-te-re-o-pal'-mus*) [*arteria*; παλμός, palpitation]. Throbbing of the arteries.

arteriopathy (*ar-te-re-op'-a-the*) [*arteria*; πάθος, illness]. Any disease of an artery or of arteries.

arterioperissia, arterioperittia (*ar-te-re-o-per-is'-e-ah, -it'-e-ah*) [*arteria*; περισσός, excessive]. Abnormal or excessive arterial development. Syn., *perittarteria*; *perissoarteria*.

arteriophlebotomy (*ar-te-re-o-fle-bot'-o-me*) [*arteria*; φλέψ, a vein; τέμνειν, to cut]. Local bloodletting.

arteriopituitous (*ar-te-re-o-pit-ū'-it-us*) [*arteria*; *pituita*, mucus]. Applied to the blood-vessels of the nasal passages.

arterioplania (*ar-te-re-o-pla'-ne-ah*) [*arteria*; πλανᾶσθαι, to wander]. Deviation or tortuousness in the course of an artery.

arterioplasty (*ar-te'-re-o-plas-te*) [*arteria*; πλάσσειν, to form]. Matas' operation for aneurysm.

arterioplegmus (*ar-te-re-o-pleg'-mus*) [*arteria*; πλεγμα, anything twined or plaited]. Perplication. Syn., *arteriopleoce*.

arteriopressor (*ar-te-re-o-pres'-or*) [*arteria*; *pressor*]. Causing increase of blood-pressure in the arteries.

arteriorenal (*ar-te-re-o-re'-nal*) [*arteria*; *ren*, the kidney]. Pertaining to the renal blood-vessels.

arteriorrhagia (*ar-te-re-or-a'-je-ah*) [*arteria*; ῥήγνυναι, to break forth]. Arterial hemorrhage.

arteriorrhaphy (*ar-te-re-or'-af-e*) [*arteria*; ῥαφή, suture]. Suture of an artery.

arteriorrhexis (*ar-te-re-or-eks'-is*) [*arteria*; ῥῆξις, a bursting]. Rupture of an artery.

arteriosclerosis (*ar-te-re-o-skle-ro'-sis*) [*arteria*; σκληρός, hard]. A chronic inflammation of the arterial walls, especially of the intima.

arteriosclerotic (*ar-te-re-o-skle-rot'-ik*) [see *arteriosclerosis*] Pertaining to arteriosclerosis. **a. kidney**, one, the seat of chronic interstitial inflammation that affects, chiefly, the blood vessels.

arteriosity (*ar-te-re-os'-it-e*) [*arteria*]. The quality of being arterial.

arteriostenosis (*ar-te-re-o-ste-no'-sis*) [*arteria*; στενός, narrow]. The narrowing of the caliber of an artery in any part.

arteriosteogenesis (*ar-te-re-os-te-o-jen'-e-sis*) [*arteria*; ὀστέον, a bone; γένεσις, production]. Calcification of an artery.

arteriosteosis, arteriostosis (*ar-te-re-os-te-o'-sis, ar-te-re-os-to'-sis*). See *arteriosteogenesis*.

arteriostrepsis (*ar-te-re-o-strep'-sis*) [*arteria*; στρέψις, a twisting]. The twisting of an artery for the purpose of staying a hemorrhage.

arteriotome (*ar-te'-re-o-tōm*) [*arteria*; τέμνειν, to cut]. A knife for use in arteriotomy.

arteriotomy (*ar-te-re-ot'-o-me*) [*arteria*; τέμνειν, to cut] 1. The cutting or opening of an artery for the purpose of bloodletting. 2. Dissection or anatomy of the arteries.

arteriotrepsis (*ar-te-re-o-trep'-sis*) [*arteria*; στρέψις, torsion]. See *arteriostrepsis*.

arterious (*ar-te'-re-us*) [*arteria*]. Relating to the arteries; arterial.

arteriovenous (*ar-te-re-o-ve'-nus*) [*arteria*; *vena*, vein] Both arterial and venous; involving an artery and vein, as an *arteriovenous* aneurysm.

arterioversion (*ar-te-re-o-ver'-shun*) [*arteria*; *vertere*, to turn]. Weber's method of arresting hemorrhage by turning vessels inside out by means of an instrument called the arterioverter.

arterioverter (*ar-te-re-o-ver'-ter*). An instrument for performing arterioversion.

arteritis (*ar-te-ri'-tis*) [*arteria*, ιτις, inflammation]. Inflammation of an artery or of the external coat of an artery. **a. deformans.** See *endarteritis, chronic*. **a. obliterans.** See *endarteritis obliterans*. **a. syphilitica**, endarteritis deformans caused by syphilis. **a. umbilicalis**, septic inflammation of the umbilical arteries in the newborn.

artery (*ar'-ter-e*) [see *arteria*]. A vessel that conveys the blood from the heart See *table of arteries*. **a. constrictor.** An instrument for compressing an artery. An artery forceps.

arthragra (*ar-thra'-grah*) [*arthron*, ἄγρα, seizure]. Gout. **a. anomala**, gout in internal organs.

arthragrosis (*ar-thrag-ro'-sis*) [*arthron*; ἄγρα, seizure (pl., *arthragroses*)]. Gout. In the plural, gouty disorders affecting the skin.

arthral (*ar'-thral*) [*arthron*]. Articular; relating to an arthron.

arthralgia (*ar-thral'-je-ah*) [*arthron*; ἄλγος, pain]. Neuralgic pain in a joint. Syn., *arthroneuralgia*; *articular neuralgia*. **a. saturnina**, painful joints with rigidity and cramps in approximate muscles; it is symptomatic of plumbism

arthralgic (*ar-thral'-jik*) [see *arthralgia*]. Relating to arthralgia.

arthrectasia, arthrectasis (*ar-threk-ta'-ze-ah, ar-threk'-ta-sis*) [*arthron*; ἔκτασις, dilation]. Dilation of a joint-cavity.

arthrectomy (*ar-threk'-to-me*) [*arthron*; ἐκτομή, a cutting-out]. Excision of a joint.

arthredema, arthrœdema (*ar-thred-e'-mah*) [*arthron*; οἴδημα, a swelling, tumor]. Edema affecting a joint.

TABLE OF ARTERIES

Name	*Origin*	*Distribution*	*Branches*
Aberrant (from brachial or axillary)	Connect the brachial or axillary with the radial usually at times with the ulnar or interosseous		
Acromial	Acromio-thoracic	Deltoid muscle (in part) assists in the formation of the acromial rete	
Acromial	Suprascapular	Acromial rete	
Acromio thoracic (thoracic axis)	Second branch of first part of axillary	Shoulder arm upper anterior part of chest and mammary gland	Acromial humeral pectoral clavicular
Adipose	Thoracic aorta	Adipose tissue of heart	
Afferent	Interlobular of kidneys	Glomeruli	
Alar thoracic	Second part of axillary	Lymphatic glands in axilla	
Alveolar (gingival)	Posterior dental	The gums	
Anastomotic (of external plantar)	External plantar	Outer border of foot	Anastomoses with the tarsal and metatarsal branches of the dorsalis pedis
Anastomotic (of internal plantar)	Internal plantar	Inner side of foot	Anastomoses with internal tarsal branch of the dorsalis pedis
Anastomotic (of middle meningeal) also called *perforating*	Middle meningeal	Around greater wing of sphenoid	Anastomose with deep temporal
Anastomotic (of sciatic)	Sciatic	External rotator muscles of thigh	Assists in the formation of the crucial anastomosis
Anastomotica magna (of brachial)	Brachial	Elbow	Posterior and anterior
Anastomotica magna (of superficial femoral)	Superficial femoral (in Hunter's canal)	Knee	Superficial and deep
Angular	The termination of the facial	Lachrymal sac and lower part of orbicularis palpebrarum	Anastomoses with infraorbital
Anterior (of corpora quadrigemina)	Posterior cerebral	Anterior portion of corpora quadrigemina	
Anterior (of receptacle)	Internal carotid	Dura mater of cavernous sinus and adjacent parts	
Antral	Posterior dental	Antrum of Highmore	
Aorta abdominal	Thoracic aorta	Two common iliacs	Phrenic (right and left) celiac axis suprarenal or capsular (right and left) superior mesenteric lumbar (four pairs) renal (right and left) spermatic (right and left) inferior mesenteric right and left common iliac middle sacral
Aorta arch	Left ventricle of heart	Thoracic aorta	Two coronary innominate left common carotid left subclavian
Aorta primitive	That portion from the origin to the point at which the first branch is given off		
Aorta thoracic	Arch of aorta	Abdominal aorta	Two or three pericardiac three bronchial four or five esophageal twenty intercostal subcostal (or twelfth dorsal) diaphragmatic aberrans

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Aortæ, primitive (*2*).	Cardiac (in the embryo)	Pass through the first visceral arch	Unite to form the dorsal.
Appendicular.	Ilio-colic.	Mesentery of vermiform appendix.	
Articular, middle (of knee).	Popliteal	Crucial ligaments and joint.	
Articular, superior external (of knee)	Popliteal	Crureus and knee	
Articular, superior, internal	Popliteal.	Knee	
Ascending.	External circumflex	Deep structures of gluteal region and hip-joint.	
Asternal	Internal mammary	Inner surface of costal cartilages	
Atrabiliary See *Capsular*.			
Auditory internal	Basilar	Internal ear	
Auricular	Occipital	Pinna and concha	
Auricular anterior, inferior.	Superficial temporal.	Auricle and external auditory meatus.	
Auricular, anterior, superior.	Superficial temporal	Auricle and external meatus	
Auricular, deep	Internal maxillary (first part).	Membrana tympani and skin of external auditory meatus.	
Auricular, left	Left coronary artery	Left auricle, pulmonary artery, and commencement of aorta	
Auricular, posterior	Fifth branch of external carotid	Back of auricle, scalp, and part of neck	Parotid, muscular, stylo-mastoid, anterior terminal or auricular, and posterior terminal or mastoid.
Auricular, right.	Right coronary artery	Right auricle, aorta, auricular septum	
Axillary.	Subclavian.	Brachial and seven branches.	Superior thoracic, acromio-thoracic, long thoracic, alar thoracic, subscapular, anterior and posterior circumflex.
Azygos (articular, of external plantar).	External plantar.	Articulations of tarsus.	
Azygos (articular, of internal plantar).	Internal plantar.	Articulations on inner side of foot	Anastomoses with branches of external plantar
Azygos (articular, of popliteal).	Popliteal	Knee.	
Azygos (articular, of sciatic).	Sciatic	Posterior part of capsule of hip-joint.	
Azygos (articular, of superior profunda)	Superior profunda	Elbow-joint, posterior part.	Anastomoses with anastomotica magna and interosseous recurrent.
Azygos (articular, of suprascapular)	Suprascapular	The acromio-clavicular and shoulder joints.	
Azygos (articular, of temporal).	Temporal	Temporo-maxillary joint	
Basilar.	By confluence of right and left vertebral.	Brain.	Transverse (or pontile), internal auditory anterior cerebellar, superior cerebellar, two posterior cerebral.
Bicipital (or ascending)	Anterior circumflex	Long tendon of biceps and shoulder-joint.	

TABLE OF ARTERIES —(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Brachial	Axillary	Arm and forearm	Superior and inferior profunda, anastomotica magna, nutrient, muscular radial and ulnar
Brachio-cephalic	See *Innominate*		
Bronchial (inferior)	Thoracic aorta	Bronchi and parenchyma of the lungs	
Bronchial (superior)	Arch of aorta	Bronchi	
Buccal	Facial	Muscles of cheek	Anastomoses with buccal branch of internal maxillary the transverse facial and infraorbital
Buccal	Internal maxillary	Buccinator muscle and mucous membrane of mouth	Anastomoses with the buccal branch of the facial the transverse facial and infraorbital
Buccal	Posterior dental	Buccinator muscle	
Of the bulb	First part of internal pudic	Erectile tissue of the bulb and the corpus spongiosum	
Calcanean external and internal	Peroneal	Over the os calcis and surrounding soft parts	
Calcanean inferior (of external plantar)	External plantar	Over inner surface of os calcis	Anastomoses with internal calcanean of peroneal
Calcanean middle	Posterior tibial	Os calcis	
Callosal	See *Calloso marginal*		
Calloso marginal	Anterior cerebral	Callosal and upper part of marginal convolutions	
Capsular (or atrabiliary)	Abdominal aorta	Suprarenal capsule	
Capsular	See *Perirenal*		
Cardiac	Gastric	Cardiac end of stomach	
Cardiac right See *Coronary right (of heart)*			
Carotid common	*Right side* innominate *left side* arch	External and internal carotid	External and internal carotid
Carotid external	Common carotid	Anterior part of neck face side of head integuments and dura mater	Ascending pharyngeal superior thyroid lingual facial occipital posterior auricular temporal internal maxillary
Carotid internal	Common carotid	Greater part of brain the orbit, internal ear forehead and nose	Tympanic vidian arteria receptaculi pituitary gasserian meningeal ophthalmic posterior communicating anterior choroid anterior cerebral middle cerebral
Carotid primitive See *Carotid common*			
Carotid superficial See *Carotid external*			
Carpal	Radial	Branches to lower end of radius wrist and carpal joints	Enters into formation of anterior carpal rete
Carpal	Ulnar	Carpus	Enters into formation of the posterior carpal rete
Caudate	Middle cerebral	Head of caudate nucleus	
Caval	Right phrenic	Vena cava	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Cecal, anterior.	Inferior mesenteric	Anterior surface of cecum.	
Cecal, posterior.	Posterior mesenteric.	Posterior part of cecum.	
Celiac.	Abdominal aorta.	Stomach, duodenum, spleen, pancreas, liver and gall-bladder.	Gastric, hepatic, splenic
Central (of retina).	Ophthalmic.	Retina.	
Central, of Zinn See *Central (of retina).*			
Cerebellar, anterior.	Basilar.	Anterior inferior surface of cerebellum	
Cerebellar, inferior.	Vertebral.	Vermiform process, and cortex of cerebellum.	Inferior vermiform and the hemispheral.
Cerebellar, superior	Basilar.	Superior vermiform process and circumference of cerebellum	Superior vermiform and hemispheral
Cerebral, anterior.	Internal carotid	Anterior portion of cerebrum.	Anterior communicating, ganglionic (or central), commissural, hemispheral (or cortical)
Cerebral, inferior.	See *Cerebral, posterior*		
Cerebral, middle.	Internal carotid.	Middle portion of cerebrum	Ganglionic (or central), hemispheral (or cortical).
Cerebral, posterior	Basilar.	Temporo-sphenoidal and occipital lobes	Ganglionic (or central), and hemispheral (or cortical)
Cervical.	Uterine.	Cervix uteri	
Cervical, anterior See *Thyroid, anterior.*			
Cervical, ascending.	Inferior thyroid.	Deep muscles of neck and spinal canal.	Muscular, spinal and phrenic.
Cervical, deep	Superior intercostal.	Deep muscles of neck and spinal canal	Muscular, anastomotic, vertebral (or spinal)
Cervical, descending.	Deep cervical.	Tissues of neck.	
Cervical, superficial.	Transverse cervical.	Trapezius, levator anguli scapulæ, splenius muscles and posterior chain of lymphatic glands	
Cervical, transverse (transversalis colli).	Thyroid axis.	Posterior cervical and scapular regions.	Posterior scapular and superficial cervical
Chiasmic.	Anterior cerebral.	First portion of optic nerve.	
Choroid, anterior.	Internal carotid.	Hippocampus major and corpus fimbriatum.	
Choroid, posterior.	Posterior cerebral.	Velum interpositum and joins the choroid plexus.	
Ciliary, short and long, posterior and anterior	Ophthalmic.	The eye.	
Circular, of uterus.	Uterine	Cervix uteri.	
Circumflex, anterior (of axillary).	Axillary.	Pectoralis major, biceps, and shoulder-joint	Bicipital and pectoral.
Circumflex, external.	Profunda femoris.	Muscles of thigh.	Ascending, transverse, and descending.
Circumflex iliac, deep.	External iliac.	Upper part of thigh and lower par of abdomen	Muscular and cutaneous.
Circumflex iliac, superficial.	Common femoral.	Iliacus and sartorius muscles, inguinal glands, and skin of thigh.	

TABLE OF ARTERIES —(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Circumflex, internal.	Profunda femoris.	Muscles of thigh.	
Circumflex, posterior (of axillary).	Axillary.	Deltoid, teres minor, triceps, and shoulder-joint.	Nutrient, articular, acromial, muscular.
Clavicular.	Acromio-thoracic.	Subclavius muscle.	
Of the clitoris, cavernous.	Internal pudic (in the female).	Corpus cavernosum of clitoris.	
Of the clitoris, profunda.	See *A., of the clitoris (cavernous).*		
Coccygeal.	Sciatic.	Integument over lower part of sacrum and coccyx	
Cochlear.	Internal auditory.	Cochlea.	
Colic, left.	Inferior mesenteric.	Colon, descending.	
Colic, middle.	Superior mesenteric.	Transverse colon.	
Colic, right	Superior mesenteric.	Colon, ascending.	
Colic, transverse	Colic, middle.	Transverse colon.	
Comes nervi phrenici See *Phrenic, superior.*			
Commissural	Anterior cerebral	Callosum.	
Communicating	Dorsalis pedis.	Enters into formation of plantar arch	The fifth plantar digital, or princeps hallucis.
Communicating	Occipital.	Muscles of posterior part of neck	Anastomoses with branches of the vertebral.
Communicating (or perforating).	Deep palmar arch	Join proximal ends of metacarpal and second and third dorsal interosseous arteries.	
Communicating.	Peroneal.	Anastomoses with communicating branch of posterior tibial	
Communicating.	Posterior tibial.	Anastomoses with communicating of peroneal.	
Communicating, anterior.	Anterior cerebral	Assists in formation of anterior boundary of circle of Willis; sends branches to caudate nucleus.	
Communicating, posterior.	Posterior carotid.	Enters into formation of circle of Willis; uncinate convolution and optic thalamus.	Uncinate, middle thalamic.
Coronary. See *Gastric.*			
Coronary, inferior.	Facial.	Lower lip.	
Coronary, left.	Left anterior sinus of Valsalva.	Heart.	Left auricular, anterior interventricular, left marginal, terminal.
Coronary, right.	Right anterior sinus of Valsalva.	Heart.	Right auricular, preventricular, right marginal, posterior interventricular, transverse.
Coronary, right, of stomach. See *Pyloric.*			
Coronary, superior.	Facial.	Upper lip.	Arteria septum narium.
Of the corpus cavernosum	Dorsal artery of the penis.	Corpus cavernosum.	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Costo-cervical.	That part of superior intercostal between its origin and first branch.		
Cremasteric.	Deep epigastric.	Cremaster muscle.	
Cremasteric.	Spermatic.	Cremaster muscle.	Anastomoses with cremasteric from deep epigastric.
Cremasteric. See *Spermatic, external.*			
Crico-thyroid.	See *Laryngeal, inferior.*		
Crural, see *Femoral.*			
Cubital, see *Ulnar.*			
Cubital recurrent, anterior See *Ulnar recurrent, anterior.*			
Cubital recurrent, posterior. See *Ulnar recurrent, posterior.*			
Cystic.	Hepatic.	Gall-bladder.	
Deferential.	Superior vesical.	Vas deferens.	
Dental, anterior.	Infraorbital.	Incisor and canine teeth, and mucous membrane of antrum.	
Dental, inferior.	See *Mandibular.*		
Dental, posterior (or alveolar)	Internal maxillary.	Antrum, teeth, gums, and cheek.	Antral, dental, alveolar, buccal.
Dental, superior.	Posterior dental.	Molar and bicuspid teeth of superior maxilla.	
Descending	External circumflex	Muscles of thigh	
Descending, superficial	External carotid.	Neck.	
Diaphragmatic.	Thoracic aorta.	Diaphragm.	
Digital.	External plantar.	Outer side of the 2d and 3d, 4th and 5th toes.	
Digital, palmar.	Superficial palmar arch.	Both sides of little, ring, and middle finger and ulnar side of index finger.	
Digital, plantar. See *Communicating, of dorsalis pedis.*			
Digital, superficial.	Internal plantar	Toes.	
Diploic.	Supraorbital.	Diploë of frontal sinuses	
Dorsal.	Intercostal.	Spine and muscles of throat.	Spinal and muscular.
Dorsal.	Lumbar.	Muscles of back.	
Dorsal, interosseous.	Radial.	Contiguous of 2d, 3d, 4th, and 5th toes	
Dorsal (of penis).	Termination of pudic.	Penis.	
Dorsal (scapular).	Subscapular.	Muscles of scapula and shoulder-joint.	Infrascapular.
Dorsal of tongue.	Lingual.	Dorsum of tongue, tonsils, and epiglottis.	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Dorsal (12th). See *Subcostal.*			
Dorsalis hallucis.	Continuation of dorsalis pedis.	Great and second toe.	
Dorsalis indicis.	Radial.	Index finger.	
Dorsalis linguæ.	Lingual.	Mucous membrane of tongue, pillars of fauces and tonsils.	
Dorsalis pedis.	Continuation of anterior tibial.	Assists to form plantar arch.	Tarsal, metatarsal, dorsalis hallucis, communicating.
Dorsalis pollicis.	Radial.	Thumb.	
Dorso-scapular.	See *Scapular, superior.*		
Duodenal, superior, right. See *Pancreatico-duodenal, superior.*			
Duodeno-gastric.	See *Gastro-duodenal.*		
Dural.	See *Meningeal.*		
Emulgent.	See *Renal.*		
Epicondyloid. See *Ulnar.*			
Epididymal.	Spermatic.	Epididymis.	
Epigastric, deep (or inferior).	External iliac.	Abdominal wall.	Cremasteric, pubic, muscular, cutaneous, terminal.
Epigastric, superficial.	Common femoral.	Inguinal glands, skin, superficial fascia, and abdominal wall.	
Epigastric, superior.	Internal mammary.	Abdominal wall and diaphragm, liver and peritoneum.	Phrenic, xiphoid, cutaneous, muscular, hepatic and peritoneal.
Epiploic.	Right and left gastro-epiploic.	Omentum.	
Epiploic See *Omental.*			
Esophageal.	Gastric.	Esophagus.	
Esophageal.	Inferior thyroid.	Esophagus.	
Esophageal.	Left phrenic.	Esophagus.	
Esophageal (4 or 5).	Thoracic aorta.	Esophagus.	
Esophageal, inferior.	Coronary (of stomach)	Esophagus.	
Ethmoidal, anterior.	Ophthalmic.	Part of anterior portion of brain, nose, frontal sinuses and skin of face.	Ethmoidal, meningeal, nasal, frontal, cutaneous.
Ethmoidal, posterior.	Ophthalmic.	Posterior ethmoidal cells, dura mater, nose.	Ethmoidal, meningeal, nasal.
Eustachian.	Pterygo-palatine.	Eustachian tube.	
Facial.	Third branch external carotid.	Pharynx and face.	Ascending, or inferior palatine, tonsillar, glandular, muscular, submental, masseteric, buccal, inferior labial, inferior and superior coronary, lateralis nasi, angular.
Facial, transverse.	Temporal.	Parotid gland, masseter muscle, skin of face.	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Fallopian.	Ovarian.	Isthmus, ampulla and fimbriated extremity of fallopian tube.	
Femoral, common.	Continuation of external iliac.	Lower part of abdominal wall, upper part of thigh and genitalia.	Superficial epigastric, superficial circumflex iliac, superficial external pudic, deep external pudic, profunda.
Femoral, deep. See *Femoral, profunda.*			
Femoral, profunda.	Common femoral.	Muscles of thigh	External circumflex, internal circumflex and three perforating.
Femoral, superficial.	Continuation of common femoral.	Muscles of thigh and knee-joint	Muscular, saphenous, anastomotica magna.
Fibular, superior.	Anterior or posterior tibial or popliteal.	Soleus and peroneus tertius muscles and integument.	
Of the frenum linguæ.	Sublingual.	Frenum of tongue.	
Frontal, anterior.	Anterior cerebral.	Inferior frontal convolutions.	
Frontal, ascending.	Middle cerebral.	Lower part of ascending frontal convolution	
Frontal, internal.	Anterior cerebral.	Inferior frontal convolutions.	
Frontal, middle.	See *Medifrontal.*		
Funicular.	Superior vesical.	Round ligament.	
Gasserian.	Internal carotid.	Gasserian ganglion.	
Gasserian.	Middle meningeal.	Gasserian ganglion, and Meckel's space	
Gastric (or coronary).	Celiac axis.	Stomach, liver, and esophagus.	Esophageal, cardiac, gastric, and hepatic
Gastric, right. See *Gastro-epiploic, right.*			
Gastro-duodenal.	Hepatic.	Stomach and duodenum.	Right gastro-epiploic and superior pancreatico-duodenal.
Gastro-epiploic, left.	Splenic.	Stomach and omentum.	
Gastro-epiploic, right.	Gastro-duodenal.	Stomach and omentum.	
Gastro-hepatic.	See *Coronary, of stomach.*		
Geniculate	Posterior cerebral	Geniculate convolution.	
Genital.	See *Pudic, internal.*		
Gingival. See *Alveolar.*			
Glandular.	Facial.	Submaxillary gland.	
Glaserian (or tympanic).	Internal maxillary	Lining membrane of tympanum and laxator tympani muscle.	
Gluteal.	Internal iliac, posterior division	Pelvic and glutei muscles, etc.	Muscular, superficial and deep.
Gluteal, deep.	Gluteal.	Deep muscles of posterior gluteal region.	
Gluteal, inferior.	Sciatic.	Gluteus maximus.	
Gluteal, superficial.	Gluteal.	Gluteus maximus and integument over sacrum.	
Gluteal, superior.	Deep gluteal.	Muscles adjacent.	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Gustatory (or lingual).	Inferior dental.	Lingual nerve.	
Guttural, superior. See *Thyroid, superior.*			
Gutturo-maxillary. See *Maxillary, internal.*			
Helicine.		The arteries found in cavernous tissue, as in the uterus, ovary, etc.	
Hemispheral.	Inferior cerebellar.	Cortex of cerebellum.	
Hemispheral.	Superior cerebellar.	Cortex of cerebellum.	
Hemorrhoidal inferior (or external).	Pudic	Sphincter muscle, levator ani.	
Hemorrhoidal, internal. See *Hemorrhoidal, superior.*			
Hemorrhoidal, middle (rectal, middle).	Internal iliac, anterior division.	Middle part of rectum.	
Hemorrhoidal, superior.	Inferior mesenteric.	Upper part of rectum.	
Hepatic.	Celiac axis.	Liver, pancreas, part of duodenum, and stomach.	Pancreatic, sub-pyloric, gastro-duodenal, right and left terminal.
Hepatic.	Gastric.	Left lobe of liver.	
Hepatic.	Right phrenic.	Liver	
Hepatic.	Superior epigastric.	Liver	
Hepatic, right.	Hepatic.	Liver substance.	Cystic
Humeral. See *Brachial.*			
Humeral, thoracic.	Acromio-thoracic.	Pectoralis major, deltoid and adjacent integuments.	Anastomoses with anterior and posterior circumflex.
Humeral, transverse See *Suprascapular.*			
Hyaloid. Central artery of retina	Crystalline lens.		
Hyoid. See *Infra-hyoid* and *Supra-hyoid.*			
Hypogastric	Continuation of anterior branch of internal iliac.	Vesical branches, impervious in the adult.	
Ileo-colic.	Superior mesenteric.	Cecum and adjacent bowel.	
Iliac	Ilio-lumbar.	Iliac fossa and ilium.	
Iliac.	Obturator.	Ilium.	
Iliac, circumflex deep. See *Circumflex iliac, deep.*			
Iliac, circumflex, superficial.	See *Circumflex iliac, superficial.*		
Iliac, common.	Terminal branch of abdominal aorta.	Peritoneum, subperitoneal fat, ureter, and terminates in external and internal iliac.	Peritoneal, subperitoneal, ureteric, external and internal iliac.

TABLE OF ARTERIES.—*(Continued)*

Name	*Origin*	*Distribution*	*Branches*
Iliac, external.	Common iliac.	Lower limb.	Deep epigastric, deep circumflex iliac, muscular, and continues as femoral.
Iliac, external, small. See *Circumflex iliac, external*			
Iliac, internal.	Common iliac.	Pelvic and generative organs, and inner side of thigh.	Anterior and posterior trunk.
Iliac, internal, anterior trunk.	Internal iliac.	Pelvic and generative organs and thigh.	Hypogastric, superior middle and vesical, middle hemorrhoidal, uterine, vaginal, obturator, sciatic, internal pudic.
Iliac, internal, posterior trunk.	Internal iliac.	Muscles of hip and sacrum.	Ilio-lumbar, lateral sacral and gluteal.
Iliac, primary. See *Iliac, common*			
Iliac, primitive See *Iliac, common.*			
Ilio-lumbar	Internal iliac, posterior trunk.	Muscles of pelvis and pelvic bones	Iliac and lumbar.
Incisive	Mandibular.	Incisor teeth	
Infracostal, labial.	Internal mammary.	Ribs.	
Infrahyoid.	Superior thyroid.	Infrahyoid bursa and thyro-hyoid muscle.	
Infraorbital.	Internal maxillary.	Upper lip, lower eye-lid, lachrymal sac, side of nose.	Orbital, anterior dental, nasal.
Infrascapular.	Dorsal scapular.	Subscapularis, scapula, and shoulder-joint.	
Infraspinous.	Posterior scapular.	Infraspinous fossa	
Infraspinous	Suprascapular.	Infraspinous fossa	
Innominate.	Arch of aorta.	Right side of head and right arm.	Right common carotid, right subclavian, occasionally thyroidea ima.
Intercostal, anterior.	Internal mammary.	Intercostal muscles, ribs (upper 5 or 6), and pectoralis major.	
Intercostal, anterior.	Musculo-phrenic.	Lower 5 or 6 intercostal spaces.	
Intercostal, aortic 10 pairs	Thoracic aorta.	Lower intercostal spaces.	Dorsal, intercostal collateral, pleural, muscular, lateral cutaneous, mammary glandular.
Intercostal, first.	Superior intercostal	First intercostal space.	
Intercostal, superior.	Subclavian.	Neck and upper part of thorax.	Deep cervical, first intercostal, arteria aberrans.
Interlobular (of kidney).	Renal.	Malpighian bodies and uriniferous tubules	
Interosseous, anterior	Interosseous (common).	Muscles of forearm.	
Interosseous, common	Ulnar.	Interosseous membrane and deep muscles of the forearm	Anterior and posterior interosseous.
Interosseous, dorsal (3).	Metatarsal.	Contiguous sides of 2d and 3d, and 4th and 5th toes.	
Interosseous, dorsal.	Posterior radial carpal.	Dorsal aspect of fingers.	

TABLE OF ARTERIES —(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Interosseous, palmar (3).	Deep palmar arch.	Interosseous muscles, bones, and 2d, 3d, and 4th lumbricales.	
Interosseous, plantar.	Plantar arch.	Toes.	
Interosseous, posterior (forearm).	Common interosseous	Muscles, back of forearm.	Posterior interosseous recurrent.
Interosseous, posterior, recurrent. See *Radial recurrent, posterior.*			
Interosseous, recurrent.	Interosseous, posterior.	Elbow-joint.	
Interpeduncular.	Posterior cerebral.	Posterior perforated space and lower part of peduncles.	
Interventricular, anterior.	Left coronary.	Both ventricles and interventricular septum.	
Interventricular, posterior.	Right coronary.	Both ventricles and interventricular septum.	
Intestinal (vasa intestini tenuis), 12 to 16	Superior mesenteric.	Mesentery.	
Ischiadic See *Gluteal, inferior*			
Labial, inferior.	Facial.	Muscles and integuments of lower lip	
Labial, superior	See *Coronary, superior.*		
Lachrymal (or orbital).	Middle meningeal.	Orbit.	
Lachrymal.	Nasal	Lachrymal sac	
Lachrymal.	Ophthalmic.	Lachrymal gland, muscles of eye and cheek, and upper and lower eye-lids.	Recurrent lachrymal, muscular, palpebral, malar, ciliary.
Lachrymal, recurrent.	Lachrymal.	Lachrymal sac.	
Laryngeal, inferior.	Inferior thyroid.	Larynx	
Laryngeal, inferior (or crico-thyroid)	Superior thyroid.	Crico-thyroid membrane and larynx.	
Laryngeal, internal See *Laryngeal, superior.*			
Laryngeal, superior.	Superior thyroid.	Intrinsic muscles and mucous membrane of larynx.	
Lenticular.	Middle cerebral.	Lenticular nucleus.	
Lenticulo-optic.	Middle cerebral	Posterior part internal capsule and anterior part of optic thalamus.	
Lenticulo-striate.	Middle cerebral.	Lenticular and caudate nuclei.	
Lenticulo-thalamic.	Posterior cerebral	Posterior extremity of lenticular nucleus and the thalamus	
Ligamentous.	Ovarian.	Round ligament.	
Lingual. See *Gustatory.*			
Lingual.	External carotid.	Tongue	Hyoid, dorsalis linguæ, sublingual, ranine.
Lingual	Mandibular.	Lingual nerve.	

TABLE OF ARTERIES.—*(Continued)*

Name	*Origin*	*Distribution*	*Branches*
Lumbar (4 pairs).	Abdominal aorta.	Bodies and ligaments of vertebræ. lumbar muscles, and capsules of kidneys.	Vertebral, muscular, dorsal, renal.
Lumbar.	Ilio-lumbar.	Psoas muscle, quadratus lumborum, and spinal canal.	
Malar.	Lachrymal.	Temporal fossa.	
Malleolar, external.	Anterior tibial.	External portion of ankle.	
Malleolar, internal.	Anterior tibial.	Internal portion of ankle	
Malleolar, internal.	Posterior tibial.	Internal malleolus.	
Mammary, external. See *Thoracic, long.*			
Mammary glandular.	Dorsal branch of aortic intercostal	Mammary gland.	
Mammary, internal.	Subclavian.	Structures of thorax.	Superior phrenic, mediastinal (or thymic), pericardiac, sternal, anterior intercostals, perforating, lateral infracostal, superior epigastric.
Mandibular	Internal maxillary.	Teeth of lower jaw.	Incisive and mental.
Marginal.	Left coronary.	Walls of ventricle.	
Marginal.	Right coronary.	Right ventricle	
Margino-frontal.	Anterior cerebral.	Marginal and frontal convolutions.	
Masseteric.	Facial.	Masseter	
Masseteric	Internal maxillary.	Masseter.	
Masseteric	Temporal.	Masseter	
Mastoid.	Occipital.	Dura, diploë, walls of lateral sinus, mastoid cells.	
Mastoid.	Posterior auricular.	Occipito-frontalis muscle (posterior belly).	
Mastoid.	Stylo-mastoid.	Mastoid cells and mastoid antrum.	
Mastoid, middle See *Sterno-mastoid.*			
Maxillary, external. See *Facial*			
Maxillary, inferior See *Dental, inferior.*			
Maxillary, internal (maxillary group).	External carotid.	Structures indicated by names of branches.	Deep auricular, tympanic, middle meningeal, mandibular, small meningeal.
Maxillary, internal (pterygoid group)	External carotid.	Structures indicated by names of branches.	Masseteric, posterior deep temporal, internal and external pterygoid, buccal, anterior deep temporal.
Maxillary, internal (spheno-maxillary group).	External carotid.	Structures indicated by names of branches.	Posterior dental (or alveolar), infraorbital, posterior (or descending) palatine, vidian, pterygo-palatine, nasal, or spheno-palatine.
Meatal.	Stylo-mastoid.	External auditory meatus.	
Median (arteria comes nervi mediani).	Anterior interosseous.	Median nerve and superficial palmar arch.	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Median anterior (of spinal cord).	Formed by union of the anterior spinal arteries.	Spinal cord.	
Mediastinal, anterior (or thymic).	Internal mammary.	Connective tissue, fat and lymphatics, in superior and anterior mediastina, thymus gland.	
Mediastinal, posterior (several).	Thoracic aorta.	Glands and loose areolar tissue in mediastinum.	
Medicerebellar.	Cerebellar, anterior, inferior.	Middle cerebellar crus.	
Medicerebral. See *Cerebral, middle.*			
Medichoroid.	See *Choroid, posterior.*		
Medidural. See *Meningeal, middle.*			
Medifrontal.	Anterior cerebral.	Callosal convolution and paracentral lobule.	
Medioptic (or median quadrigeminal).	Posterior cerebral.	Crus cerebri and optic lobes.	
Medullary.	Peroneal.	Fibula.	
Medullary.	Posterior tibial.	Tibia.	Ascending and descending.
Medullary.	Renal.	Malpighian pyramids	
Meningeal.	Ascending pharyngeal.	Membranes of brain.	
Meningeal	Posterior ethmoidal.	Dura mater.	
Meningeal, anterior.	Internal carotid.	Dura mater	
Meningeal, inferior. See *Meningeal (of ascending pharyngeal).*			
Meningeal, middle or great.	Internal maxillary	Cranium and dura mater	Anterior and posterior
Meningeal, posterior	Occipital	Dura mater.	
Meningeal, posterior.	Vertebral.	Dura mater.	
Meningeal, small.	Internal maxillary.	Gasserian ganglion, walls of cavernous sinus and dura mater.	
Mental.	Facial.	Muscles of chin and lower lip.	
Mental.	Mandibular	Muscles of chin and under lip	Lingual and mylo-hyoidean.
Mesenteric accedens, præcipua. See *Mesenteric, superior.*			
Mesenteric, inferior.	Abdominal aorta.	Lower half of large intestine.	Left colic, sigmoid, superior hemorrhoidal.
Mesenteric, middle.	Common iliac (occasional branch).	Transverse and descending colon	
Mesenteric, superior.	Abdominal aorta.	Whole of small intestine and upper half of large.	Inferior pancreatico-duodenal, middle right and ilio-colic, vasa intestina tenuis.
Meso-lobar. See *Cerebral, anterior.*			
Metacarpal (1st dorsal interosseous).	Radial.	Sides of fingers on dorsal aspect	

TABLE OF ARTERIES —(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Metatarsal.	Dorsalis pedis.	Toes.	Third dorsal interosseous.
Middle (of corpora quadrigemina).	Posterior cerebral.	Space between the corpora quadrigemina.	
Muscular, deep. See *Femoral, deep*			
Musculo-phrenic.	Internal mammary.	Diaphragm, fifth or sixth lower intercostal spaces, oblique muscles of abdomen.	Phrenic, anterior intercostals, muscular.
Mylo-hyoidean	Mental	Mylo-hyoid muscle.	
Nasal.	Infraorbital.	Nose	
Nasal	Ophthalmic.	Lachrymal sac and integuments of nose	Lachrymal, and transverse nasal.
Nasal.	Spheno-palatine.	Turbinated bones, lateral walls of nose, ethmoidal and frontal sinuses and lining membrane of antrum	
Nasal, anterior.	Anterior ethmoidal.	Nose	
Nasal, lateral.	Facial.	Integuments, muscles and cartilage of nose.	
Nasal, middle. See *Nasal, anterior.*			
Nasal, transverse.	Nasal.	Integuments of nose.	
Naso-palatine. See *Spheno-palatine.*			
Navel. See *Umbilical*			
Neubauer's.	See *Thyroid, deep.*		
Nutrient.	Brachial.	Humerus	
Nutrient.	Interosseous, anterior.	Radius.	
Nutrient	Interosseous, anterior	Ulna.	
Nutrient	Middle perforating branch of profunda femoris.	Femur.	
Nutrient.	Obturator.	Ilium.	
Nutrient (of peroneal). See *Medullary*			
Nutrient.	Posterior tibial.	Tibia	
Nutrient.	Suprascapular.	Clavicle.	
Obturator.	Anterior division, internal iliac.	Pelvis and thigh.	Iliac (or nutrient), vesical, pubic, external and internal pelvic.
Obturator, external.	Obturator.	Muscles about obturator foramen	
Obturator, internal.	Obturator.	Muscles about obturator foramen.	
Occipital.	Fourth branch of external carotid.	Muscles of neck, and scalp.	Sterno-mastoid, posterior, meningeal, auricular, mastoid, princeps cervicis, communicating, muscular, terminal.
Occipito-meningeal.	Vertebral.	Dura mater.	
Omental (or epiploic).	Hepatic.	Omentum.	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Omphalo-mesenteric.	Primitive aorta.	Subsequently becomes the umbilical	
Ophthalmic.	Internal carotid.	The eye, adjacent structures, portion of face.	Lachrymal, supraorbital, central artery of retina, muscular, ciliary, posterior and anterior ethmoidal, palpebral, frontal nasal.
Optic, internal and anterior.	Posterior communicating.	Optic thalamus.	
Optic, posterior, internal	Posterior communicating or posterior cerebral	Optic thalamus.	
Orbital. See *Lachrymal.*			
Orbital (three or four).	Anterior cerebral.	First frontal convolution and olfactory bulb.	
Orbital.	Infraorbital.	Fat of orbit; inferior rectus and inferior oblique muscles.	
Orbital.	Temporal.	Orbicularis palpebrarum and orbit.	
Orbito-frontal.	Middle cerebral	Inferior frontal convolutions.	
Ovarian	Abdominal aorta.	Ovary, ureter, fallopian tube, uterus	Ureteral, fallopian, uterine, ligamentous.
Palatine.	Ascending pharyngeal	Soft palate and its muscles.	
Palatine, ascending (or inferior).	First branch of facial.	Upper part of pharynx, palate and tonsils.	Palatine, tonsillar.
Palatine, descending.	Internal maxillary.	To soft and hard palate	Anterior and posterior.
Palatine, inferior. See *Palatine, ascending*			
Palatine, posterior or descending.	Internal maxillary.	Hard palate	Anterior and posterior.
Palatine, superior. See *Palatine descending.*			
Palato-maxillary.	See *Palatine, descending*		
Palmar, digital See *Digital, palmar.*			
Palmar, interosseous. See *Interosseous, palmar.*			
Palmar arch, deep.	Radial and communicating of ulna.	Palm and fingers.	Princeps pollicis, radialis indicis, palmar interosseous (3), recurrent carpal, posterior perforating.
Palmar arch, superficial.	Ulnar and superficialis volæ.	Palm and fingers.	Digital (4), muscular, cutaneous.
Palpebral.	Lachrymal.	Eye-lids and conjunctivæ.	
Palpebral.	Supraorbital.	Upper eye-lid.	
Palpebral, external.	Ophthalmic.	Eye-lid.	
Palpebral, inferior.	Ophthalmic.	Conjunctiva, lachrymal sac, caruncle and lower lid.	
Palpebral, superior.	Ophthalmic.	Upper eye-lid.	
Pancreatic.	Hepatic.	Pancreas.	

TABLE OF ARTERIES —(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Pancreatic.	Splenic.	Pancreas.	
Pancreatico-duodenal, inferior.	Superior mesenteric.	Pancreas and duodenum.	
Pancreatico-duodenal, superior.	Gastro-duodenal.	Duodenum and pancreas.	
Parietal.	Middle cerebral	Inferior and ascending parietal convolutions.	
Parietal, anterior.	Middle cerebral	Second frontal convolution.	
Parietal, ascending.	Middle cerebral.	Ascending parietal convolution and superior parietal lobule.	
Parieto-sphenoidal.	Middle cerebral.	Inferior parietal lobule, angular gyrus, cortex of sphenoidal lobe.	
Parieto-temporal	Middle cerebral.	Convolutions around posterior limb of fissure of Sylvius.	
Parotid.	Posterior auricular.	Parotid gland.	
Parotid.	Temporal	Parotid gland	
Parvidural See *Meningeal, small.*			
Pectoral.	Acromio-thoracic.	Pectoral muscles and mammary gland	
Pectoral	Anterior circumflex	Pectoralis major	
Pedal. See *Dorsal of foot.*			
Peduncular, anterior	Posterior cerebral	Internal surface of peduncle.	
Peduncular, external.	Posterior, communicating.	Peduncles of the cerebellum	
Peduncular, internal	Posterior cerebral.	Internal surface of peduncle.	
Of the penis, perforating See *A., of the corpus cavernosum.*			
Perforans stapedis branch of internal (carotid or stylo-mastoid).	Tympanum.	No branches.	
Perforating (or posterior communicating), (3).	Deep palmar arch.	Interosseous spaces.	
Perforating.	Middle meningeal.	Sphenoid.	
Perforating.	Profunda femoris.	Hamstring muscles	
Perforating.	Spheno-palatine.	Ethmoidal cells.	Anastomoses with ethmoidal arteries
Perforating.	Submental.	Mylo-hyoid	
Perforating, anterior (5 or 6).	Internal mammary.	Pectoralis major and integument, and mammary gland	
Perforating, posterior.	External plantar.	Dorsal interosseous muscles.	
Pericardiac.	Internal mammary.	Anterior surface of pericardium.	
Pericardiac.	Right and left phrenic.	Pericardium.	
Pericardiac.	Thoracic aorta.	Pericardium.	
Pericephalic. See *Carotid, external.*			

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Perineal, superficial.	Pudic.	Muscles of perineum and integuments of scrotum.	Transverse perineal.
Perineal, transverse.	Perineal, superficial.	Muscles and integuments of perineum.	
Perirenal (or capsular)	Renal.	Capsule of kidney and perirenal fat	
Peritoneal.	Iliac, common.	Peritoneum.	
Peritoneal.	Superior epigastric	Peritoneum.	
Peroneal	Posterior tibial.	Muscles and integument of leg and foot.	Anterior peroneal, muscular, medullary, communicating, cutaneous, external calcanean terminal (or posterior peroneal).
Peroneal, anterior	Peroneal	Peroneus tertius and inferior tibio-fibular joint	
Peroneal, posterior.	Peroneal	External malleolus and heel.	
Petrosal.	Middle meningeal.	Tympanum.	
Pharyngeal	Pterygo-palatine.	Roof of pharynx	
Pharyngeal.	Spheno-palatine.	Roof and contiguous portions of pharynx	
Pharyngeal.	Vidian	Roof of pharynx.	
Pharyngeal, ascending	First branch external carotid.	Pharynx, soft palate, tympanum, posterior part of neck, and membranes of brain	Prevertebral, pharyngeal palatine, tympanic, meningeal.
Pharyngeal, descending.	Spheno-palatine	Roof of mouth and of pharynx.	
Pharyngeal, inferior See *Pharyngeal, ascending.*			
Pharyngeal, superior See *Pterygo-palatine*			
Phrenic	Ascending cervical.	Phrenic nerve	
Phrenic	Musculo-phrenic.	Diaphragm.	
Phrenic	Superior epigastric.	Diaphragm	
Phrenic, inferior, left	Aorta, abdominal.	Diaphragm and structures indicated by names of branches	Esophageal, left superior suprarenal, splenic, pericardiac, terminal.
Phrenic, inferior right.	Aorta, abdominal.	Diaphragm and structures indicated by names of branches.	Right superior suprarenal, caval, hepatic, pericardiac, and terminal.
Phrenic, superior (or comes nervi phrenici).	Internal mammary.	Pleura, pericardium and diaphragm	
Pituitary.	Internal carotid	Pituitary body.	
Plantar arch.	External plantar artery.	Anterior part of foot and toes.	Articular and plantar digital.
Plantar, deep	Metatarsal.	Assists in formation of plantar arch	
Plantar, digital (4).	Plantar arch.	Third, fourth, and fifth toes, and outer side of second.	
Plantar, external.	External, tibial.	Sole and toes.	Muscular, calcaneal, cutaneous, anastomotic, posterior perforating, plantar arch.

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Plantar, internal.	Posterior tibial.	Inner side of foot.	Muscular, cutaneous, articular, anastomotic, superficial digital
Plantar, interosseous See *Interosseous, plantar.*			
Plantar, metatarsal. See *Interosseous, plantar.*			
Plantar, pollicar	Anterior tibial, or external plantar.	Great toe	
Pleural.	Intercostal.	Pleura.	
Pontal.	Basilar.	Pons.	
Popliteal.	Continuation of femoral	Knee and leg.	Cutaneous, muscular (superior and inferior) or sural, articular, superior and inferior external, superior and inferior internal and azygos, terminal (anterior and posterior tibial).
Post-cerebellar. See *Cerebellar, posterior.*			
Post-cerebral. See *Cerebral, posterior.*			
Post choroid. See *Choroid Posterior.*			
Post-communicant, See *Communicating posterior.*			
Post-dural. See *Meningeal, posterior.*			
Postero-lateral.	Posterior cerebral.	Hind part of optic thalamus, crus and optic lobes	
Postero-median.	Posterior central.	Inner part of thalamus, neighboring wall of third ventricle.	
Post-frontal.	Anterior meningeal.	Precuneus and part of occipital fissure.	
Post-temporal.	Posterior cerebral	Basal surface of occipital lobe.	
Post-thalamic.	Posterior cerebral.	Thalamus	
Precerebellar. See *Cerebellar, superior.*			
Precerebral. See *Cerebral, anterior.*			
Prechoroid. See *Choroid, anterior.*			
Precommunicant. See *Communicating, anterior.*			
Predural. See *Meningeal, anterior.*			
Prefrontal.	Anterior cerebral.	Mesal and convex surfaces of super-frontal and part of medi-frontal convolutions.	
Preoptic (or anterior quadrigeminal).	Posterior cerebral.	Optic lobe.	
Preperforant.	Anterior cerebral.	Caudate nucleus.	

TABLE OF ARTERIES—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Pretemporal.	Posterior cerebral.	Uncinate and basal surface of temporal lobe.	
Prethalamic.	Posterior communicating.	Thalamus.	
Preventricular (2).	Right and left coronaries.	Walls of ventricle, heart.	
Primitive. See *Aorta, primitive.*			
Princeps cervicis	Occipital.	Muscles of neck.	Superficial and deep
Princeps hallucis.	Communicating (of dorsalis pedis).	First and second toes.	
Princeps pollicis.	Radial.	Thumb.	
Profunda (or deep femoral).	Femoral.	Thigh.	External and internal circumflex, three perforating.
Profunda, inferior.	Brachial	Triceps, elbow-joint	
Profunda, superior.	Brachial	Humerus, muscles and skin of arm.	Ascending, cutaneous, articular, nutrient, muscular.
Pterygoid, external	Internal maxillary.	External pterygoid muscle.	
Pterygoid, internal	Internal maxillary.	Internal pterygoid muscle.	
Pterygo-palatine (or pterygo-pharyngeal).	Internal maxillary.	Pharynx, Eustachian tubes and sphenoidal cells.	Pharyngeal, Eustachian, sphenoidal.
Pterygo-pharyngeal. See *Pterygo-palatine.*			
Pubic.	Epigastric, deep.	Pubic region.	
Pubic.	Obturator.	Pubic region	
Pudic, accessory.	Inferior vesical.	When large, supplies the parts normally supplied by the internal pudic, prostate	
Pudic, external, deep, (or inferior).	Femoral, common	Skin of scrotum (or labia in female).	
Pudic, external, superficial (or superior).	Common, femoral	Integument above pubes and external genitalia.	
Pudic, internal.	Iliac, anterior division of internal branch.	Generative organs.	External (or inferior) hemorrhoidal, superficial perineal, muscular, arteries of bulb, crus, and dorsal of penis.
Pulmonary.	Right ventricle.	Lungs.	Right and left.
Pyloric, inferior.	Gastro-duodenal or right gastro-epiploic.	Pyloric end of stomach.	
Pyloric, superior.	Hepatic.	Pyloric end of stomach.	
Quadrate.	Anterior cerebral.	Quadrate convolution of brain	
Quadrigeminal, anterior. See *Preoptic.*			
Quadrigeminal, median. See *Medioptic.*			
Radial.	Brachial.	Forearm, wrist, hand.	Radial recurrent, muscular, anterior and posterior radial carpal, superficial volar, metacarpal, dorsalis pollicis, dorsalis indicis deep palmar arch.

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Radial carpal, anterior and posterior.	Radial	Wrist and carpal joints.	
Radial, profunda.	Superior profunda of arm	Back of elbow.	
Radial recurrent, anterior.	Radial	Elbow-joint and muscles of forearm	
Radial recurrent, posterior.	Posterior interosseous (forearm)	Elbow.	
Radialis indicis.	Radial.	Index finger.	
Radio-carpal, palmar transverse.	See *Radial carpal, anterior.*		
Radio-palmar. See *Volar, superficial.*			
Ranine.	Lingual.	Tongue and mucous membrane of mouth.	
Rectal.	Lateral sacral.	Rectum.	
Rectal	Middle sacral.	Rectum	
Rectal, middle. See *Hemorrhoidal, middle*			
Recurrent.	Deep palmar arch.	Carpal joints.	
Recurrent, posterior interosseous.	Posterior interosseous	Elbow	
Recurrent, radial See *Radial, recurrent.*			
Recurrent, tibial, anterior and posterior	Anterior tibial	Popliteus and ligaments of knee.	
Recurrent, ulnar, anterior and posterior.	Ulna.	Elbow-joint and contiguous structures.	
Renal.	Abdominal aorta.	Kidney.	Inferior suprarenal, capsular (or perirenal), ureteral
Rhachidian. See *Spinal.*			
Sacra media. See *Sacral, middle*			
Sacral, lateral (1 or 2).	Internal iliac, posterior division.	Structures about sacrum.	Spinal, rectal, muscular
Sacral, middle.	Continuation of aorta	Sacrum and coccyx.	
Saphenous (occasional branch of common femoral).	Accompanies saphenous vein		
Saphenous, small.	Popliteal (occasional)	External malleolus.	
Scapular, dorsal	Subscapular.	Muscles of infraspinous fossa.	Infrascapular
Scapular, external. See *Acromial.*			
Scapular, inferior. See *Subscapular.*			
Scapular, internal. See *Subscapular.*			
Scapular, posterior.	Continuation of transverse cervical.	Muscles of scapular region.	Supra-spinous and infra-spinous, subscapular, muscular.

TABLE OF ARTERIES —(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Scapular superficial See *Suprascapular*			
Scapular superior See *Suprascapular*			
Scapular transverse See *Suprascapular*			
Scapulo humeral See *Circumflex posterior*			
Sciatic	Internal iliac anterior division	Pelvic muscles and viscera and branches	Coccygeal inferior gluteal muscular anastomotic articular cutaneous comes nervi ischiadici vesical rectal prostatic etc
Scrotal anterior	Inferior external pudic	Anterior portion of scrotum	
Scrotal posterior	Internal pudic	Posterior part of scrotum	
Septal ascending	Spheno palatine	Upper part of mucous membrane of nasal septum	
Sigmoid	Inferior mesenteric	Sigmoid flexure	
Spermatic	Abdominal aorta	Scrotum and testis	Ureteral cremasteric epididymal testicular
Spermatic external	Deep epigastric	Cremaster muscle and spermatic cord	
Sphenoidal	Middle cerebral	Sphenoidal lobe lower part of cortex	
Sphenoidal	Pterygo palatine	Sphenoidal cells	
Sphenoidal	Spheno palatine	Sphenoidal cells	
Spheno palatine (or naso palatine)	Internal maxillary	Pharynx, nose and sphenoidal cells	Pharyngeal sphenoidal nasal ascending septal
Spheno spinous See *Meningeal middle*			
Spinal	Ascending cervical	Spinal canal	
Spinal	Intercostals	Spinal canal and spine	
Spinal	Lateral sacral	Spinal membranes and muscles and skin over sacrum	
Spinal anterior	Vertebral	Spinal cord	
Spinal lateral	Vertebral	Vertebræ and spinal canal	
Spinal posterior	Vertebral	Spine	
Splenic	Celiac axis	Spleen pancreas part of stomach omentum	Small and large pancreatic left gastro-epiploic vasa brevia terminal
Splenic	Left phrenic	Spleen	
Splenico pancreatic	Splenic	Spleen	
Stapedic	Stylo mastoid	Stapedius muscle	
Staphylini	See *Palatine posterior*		
Sternal	Internal mammary	Sternum and triangularis sterni	
Sterno mastoid	Occipital	Sterno-mastoid muscle	
Sterno mastoid (or middle mastoid)	Superior thyroid	Sterno mastoid and other muscles of neck	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Sterno-mastoid, inferior.	Suprascapular.	Sterno-mastoid muscle.	
Stylo-mastoid.	Posterior auricular.	Mastoid cells, tympanic cavity, etc.	Meatal, mastoid, stapedic, tympanic, vestibular, terminal.
Subcerebellar.	Basilar.	Inferior and anterior portion of cerebellum	
Subclavian	Right, innominate Left, arch of aorta.	Neck, thorax, arms, brain, meninges, etc.	Vertebral, thyroid axis, internal mammary, superior intercostal.
Subclavian	Suprascapular	Subclavius muscle	
Subclavian, right A term sometimes given to the innominate.			
Subcostal (or 12th dorsal).	Thoracic aorta	Intercostal space.	
Subdural. See *Meningeal (of ascending pharyngeal)*			
Subfrontal	Anterior cerebral.	Olfactory groove.	
Sublingual.	Lingual.	Sublingual gland, side of tongue, and floor of mouth	Artery of frenum
Submaxillary. See *Glandular.*			
Submental.	Facial.	Tissues under jaw.	Muscular, perforating, cutaneous, mental
Suborbital. See *Infra-orbital.*			
Subsacral. See *Sacral, lateral.*			
Subscapular	Axillary	Subscapularis teres major, latissimus dorsi, serratus magnus, axillary glands.	Dorsal and infrascapular
Subscapular	Posterior scapular	Subscapular fossa.	
Subscapular.	Suprascapular	Subscapular fossa.	
Super-cerebellar. See *Cerebellar, superior*			
Supermaxillodental. See *Dental, superior.*			
Superscapular. See *Suprascapular.*			
Supra-acromial.	Suprascapular.	Acromial region	
Supra-dural	External carotid.	Meninges.	
Supra-hyoid (or hyoid).	Lingual.	Muscles above hyoid bone.	
Supramaxillary. See *Dental, superior.*			
Supraorbital.	Ophthalmic.	Orbit, frontal sinuses, diploë and upper eye-lid.	Periosteal, muscular, diploic, trochlear, palpebral.
Supra renal, inferior.	Renal.	Supra-renal body.	
Supra-renal, middle (or supra-renal).	Aorta.	Supra-renal bodies.	
Supra-renal, superior.	Phrenic.	Supra-renal bodies.	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Suprascapular (or transversalis humeri).	Thyroid axis.	Muscles of shoulder.	Inferior sterno-mastoid, subclavian, nutrient, supra-sternal acromial, articular, subscapular, supraspinous and infraspinous.
Supraspinous.	Posterior scapular.	Supraspinous muscles and trapezius.	
Supraspinous.	Suprascapular.	Supraspinatus muscle.	
Suprasternal.	Suprascapular.	Skin of upper part of chest.	
Sural (or muscular).	Popliteal.	Muscles of popliteal space and calf.	
Tarsal, external and internal.	Dorsalis pedis.	Skin and joints, etc., of foot	
Temporal.	External carotid.	Forehead, parotid gland, masseter, ear.	Parotid, articular, masseteric, anterior auricular, transverse facial, middle, temporal, and anterior and posterior terminal.
Temporal.	Posterior cerebral.	Inferior part of temporal lobe of brain.	
Temporal, deep, anterior.	Internal maxillary.	Anterior part of temporal fossa.	
Temporal, deep, external See *Temporal, deep, anterior.*			
Temporal, deep, internal.	See *Temporal, deep, posterior.*		
Temporal, deep, posterior.	Internal maxillary, pterygoid portion.	Temporal fossa	
Temporal, frontal. See *Temporal, anterior.*			
Temporal, middle.	Temporal.	Squamous portion temporal lobe.	
Temporal, posterior.	Superficial temporal	Side of head and vertex.	
Temporal, superficial	See *Temporal*		
Temporo-occipital.	Posterior cerebral.	Cuneus, lingual, convolution and exterior of occipital lobe.	
Termatic.	Anterior communicating.	Cinerea and callosum.	
Testicular	Spermatic.	Testicle.	
Testicular, great See *Spermatic, internal.*			
Testicular, small. See *Spermatic, external.*			
Thalamic, middle.	Posterior communicating	Optic thalamus.	
Thoracic, acromial (thoracic axis)	Axillary.	Muscles of shoulder, arm and chest.	Acromial, humeral, pectoral, clavicular.
Thoracic, alar.	Axillary	Axillary glands.	
Thoracic axis. See *Thoracic, acromial.*			
Thoracic, external See *Mammary, external.*			

TABLE OF ARTERIES —(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Thoracic inferior See *Mammary external*			
Thoracic internal See *Mammary internal*			
Thoracic long (external mammary)	Axillary	Pectoral muscles serratus magnus mammary and axillary glands	
Thoracic short (or superior)	Axillary	Intercostal muscles serratus magnus	
Thoracic twelfth See *Subcostal*			
Thymic	Internal mammary	Connective tissue fat and lymphatics or mediastinum and thymus	
Thymic See *Mediastinal*			
Thyroid ascending See *Thyroid inferior*			
Thyroid axis	Subclavian	Shoulder neck thorax spine cord	Inferior thyroid suprascapular and transverse cervical
Thyroid deep	Arch of aorta innominate (occasional branch)	Same as inferior thyroid	
Thyroid descending See *Thyroid superior*			
Thyroid inferior	Thyroid axis	Larynx esophagus and muscles of neck	Muscular ascending cervical esophageal tracheal and inferior laryngeal
Thyroid middle See *Thyroideal ima*			
Thyroid superior	External carotid	Omo hyoid sterno hyoid sterno thyroid thyroid gland	Hyoid sterno mastoid superior laryngeal crico thyroid
Thyroidea ima	Innominate (usually)	Thyroid body	
Thyro laryngeal	Thyroid superior	Larynx and thyroid body	
Tibial anterior	Popliteal	Leg	Posterior and anterior tibial recurrent muscular internal and external malleolar
Tibial anterior recurrent	Anterior tibial	Tibialis anticus muscle	
Tibial posterior	Popliteal	Leg heel and foot	Peroneal muscular medullary cutaneous communicating malleolar calcanean internal and external plantar
Tibial profunda (of foot)	Internal plantar (innermost branch)	Abductor pollicis muscle	Unites with the plantar pollicar
Tibial recurrent posterior	Anterior tibial	Back of knee joint	Anastomoses with the inferior articular arteries of knee
Tonsillar	Ascending palatine	Tonsil and Eustachian tube	
Tonsillar	Facial	Tonsil and root of tongue	
Tracheal	Inferior thyroid	Trachea	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Trachelo-muscular. See *Cervical, inferior.*			
Transversalis colli.	Thyroid axis.	Neck and scapular region	Superficial cervical and posterior scapular.
Transversalis humeri. See *Suprascapular.*			
Transverse.	External circumflex.	Muscles of upper part of thigh.	
Transverse. See *Pontal.*			
Transverse	Right coronary.	Heart muscle.	
Transverse humeral See *Suprascapular*			
Transverse nasal.	Nasal (of ophthalmic).	Root of nose.	
Transverse perineal.	Superficial perineal.	Muscles and integuments of perineum.	
Tricipital.	Posterior circumflex.	Triceps muscle (of arm).	
Tympanic. See *Glaserian*			
Tympanic.	Ascending pharyngeal.	Tympanum.	
Tympanic	Middle meningeal	Tensor tympani.	
Tympanic.	Stylo-mastoid	Membrana tympani	
Tympanic.	Vidian	Tympanum.	
Tubal.	Ovarian	Fallopian tube	
Ulnar.	Brachial.	Forearm, wrist, and hand.	Anterior and posterior ulnar recurrent, common interosseous, muscular, nutrient, anterior and posterior ulnar carpal, palmar arch.
Ulnar carpal, anterior and posterior	Ulnar.	Carpal region.	
Ulnar, recurrent, anterior and posterior.	Ulnar.	Muscles of arm and elbow-joint.	
Ulno-carpal, anterior.	Ulnar	Muscles of hand.	
Umbilical	Hypogastric	Chorionic villi.	
Uncinate.	Posterior cerebral	Uncinate convolution	
Uracheric	Superior vesical.	Urachus.	
Ureteral.	Ovarian	Ureter.	
Ureteral.	Renal.	Ureter.	
Ureteral.	Spermatic.	Ureter.	
Ureteric.	Common iliac.	Ureter.	
Ureteric, inferior	Superior vesical (or uterine).	Ureter and bladder.	
Ureteric, middle.	Of aorta, common iliac, or internal spermatic.	Middle part of ureter.	
Ureteric, superior.	Renal.	Upper part of ureter.	

TABLE OF ARTERIES.—(*Continued*)

Name	*Origin*	*Distribution*	*Branches*
Urethro-bulbar.	See *Perineal, transverse.*		
Uterine.	Internal iliac, anterior branch.	Uterus.	Cervical, vaginal, azygos.
Uterine.	Ovarian	Uterus.	
Utero-placental.	Uterine.	Gravid uterus and placenta	
Uveal. See *Ciliary, posterior and short.*			
Vaginal (2 or 3).	Internal iliac, anterior division.	Vagina.	
Vaginal azygos.	Uterine.	Vagina.	
Vasa brevia	Splenic.	Stomach	
Vermiform, inferior.	Cerebellar, posterior inferior.	Vermiform process of cerebellum.	
Vermiform, superior.	Superior cerebellar.	Superior vermiform process of cerebellum.	
Vertebral.	Subclavian.	Neck of cerebrum.	Lateral spinal, muscular, anastomotic, posterior meningeal, posterior and anterior spinal, posterior cerebellar
Vertebral, posterior. See *aortæ, primitive.*			
Vesical, inferior	Internal iliac, anterior division.	Bladder, prostate, seminal vesicles, and vagina (in female)	
Vesical, middle.	Superior vesical.	Bladder.	
Vesical, superior.	Internal iliac, anterior division	Bladder.	Deferential, uracheric, ureteric, middle vesical (occasionally).
Vesicoprostatic.	Middle hemorrhoidal.	Prostate and seminal vesicles.	
Vesico-vaginal. See *Vaginal.*			
Vestibular.	Internal auditory.	Membranous labyrinth.	
Vestibular	Stylo-mastoid.	Vestibule and semicircular canals.	
Vidian.	Internal maxillary.	Roof of pharynx, Eustachian tube, and tympanum.	Pharyngeal, Eustachian, tympanic.
Vitelline. See *Omphalo-mesenteric.*			
Volar, superficial.	Radial.	Ball of thumb.	Enters into formation of superficial palmar arch.
Volar, superior. See *Volar, superficial.*			
Xiphoid.	Superior epigastric.	Ensiform cartilage.	
Zygomatico-orbital See *Orbital (of temporal).*			

arthrelcosis (*ar-threl-ko'-sis*) [*arthron;* ἕλκωσις, ulceration]. Ulceration of a joint.

arthremia (*ar-thre'-me-ah*) [*arthron;* αἷμα, blood]. A congested condition of a joint.

arthrempyema (*ar-threm-pi'-e-mah*) [*arthron-;* ἔμπυημα, suppuration]. Suppuration or abscess of a joint.

arthrempyesis (*ar-threm-pi-e'-sis*). Suppuration in a joint.

arthrentasis (*ar-thren'-ta-sis*) [*arthron;* ἔντασις, distortion]. Distortion of the limbs due to gout.

arthresthesia (*ar-thres-the'-ze-ah*) [*arthron;* αἴσθησις, sensation]. Sensibility in or referring to a joint.

arthric (*ar-thrik*). See *arthritic* (2).

arthrifluent (*ar-thrif'-lu-ent*) [*arthron; fluere*, to flow]. Applied to abscesses proceeding from a diseased joint.

arthrifuge (*ar'-thrif-ūj*) [*arthron; fugare* to put to flight]. A remedy for gout.

arthritic (*ar-thrit'-ik*) [*arthritis*]. Relating—1. To arthritis or to gout. 2. To a joint.

arthritide (*ar'-thrit-īd*). A skin lesion or eruption of supposed gouty or rheumatic origin.

arthritis (*ar-thri'-tis*) [*arthron; ιτις*, inflammation]. Inflammation of a joint. **a., acute,** acute joint-inflammation, particularly that due to gout. Syn., *arthritis vera.* **a., acute serous,** acute synovitis. **a. arthrodynia,** gout. **a. asthmatica,** a form observed in elderly persons subject to asthma, and mitigated by an attack of the latter. **a., atrophic.** Synonym of *Charcot's joint disease.* **a., blennorrhagic,** gonorrheal rheumatism. **a., chronic,** a form in which the joints are not so much affected as are other parts of the body. **a. deformans,** chronic inflammation of a joint with deformity; rheumatoid arthritis. **a., diaphragmatic,** angina pectoris. **a., erratic,** retrocedent or metastatic gout. **a. fungosa,** tuberculous disease of the joints; white swelling. **a., gonorrheal,** gonorrheal synovitis. **a., gouty,** that due to gout. **a. hiemalis,** winter gout, a form occurring less frequently in summer than in other seasons. **a., internal.** See *a., visceral.* **a., intervertebral.** See *spondylarthritis.* **a. ischias,** gout in the hip. **a. larvata, a., latent,** a masked form not manifested by the usual symptoms. **a. maxillaris,** rheumatoid arthritis of the temporomaxillary joint. **a. nodosa.** See *osteoarthritis.* **a. pauperum.** Synonym of *a., rheumatoid.* **a. podagra,** gout in the feet. **a., proliferating.** See *a. deformans.* **a., retrograde,** suppressed gout. **a., rheumatoid,** a chronic joint affection characterized by inflammatory overgrowth of the articular cartilages and synovial membranes, with destruction of those parts of the cartilages subject to intraarticular pressure; there is progressive deformity. Syn., *chronic rheumatoid arthritis; osteoarthritis; rheumatic gout; nodular rheumatism; arthritis deformans.* **a. sicca,** rheumatoid arthritis. **a., strumous.** See *a. fungosa.* **a., subdiarthrodial,** a form of fungous arthritis in which fleshy granulations occur between the bone and the cartilage of the joint. **a. syphilitica,** gonorrheal rheumatism; also the nocturnal pains of syphilis. **a. typica,** acute arthritis. **a., urethral,** gonorrheal rheumatism. **a. urica,** gout attributed to excessive formation of uric acid. Syn., *arthritis uratica; panarthritis urica; uarthritis.* **a. vertebralis,** a breakdown of the intervertebral discs. **a., visceral,** gout affecting an internal organ, with alternating attacks in the joints

ARTHITIS DEFORMANS.

arthritism (*ar'-thrit-izm*) [*arthron*]. Gout or the gouty diathesis.

arthritolith (*ar-thrit'-o-lith*) [*arthron; λιθος*, a stone]. Gouty calcareous deposit of concretion in or around a joint.

arthro- (*ar-thro-*) [*arthron*]. A prefix denoting relating to the joints.

arthrobacterium (*ar-thro-bak-te'-re-um*) [*arthro-; bacterium*]. A bacterium forming arthrospores.

arthrocace (*ar-throk'-as-e*) [*arthro-; κακός*, ill]. Fungous, strumous, or tuberculous arthritis; caries of a joint. **a. coxarum,** see *coxalgia.* **a., senile,** changes in the joints occurring in the aged.

arthrocarcinoma (*ar-thro-kar-sin-o'-mah*) [*arthro-; carcinoma*]. Carcinoma affecting a joint.

arthrocele (*ar'-thro-sel*) [*arthro-; κήλη*, a tumor]. Swelling of a joint.

arthrocenchriasis (*ar-thro-sen-kri'-as-is*) [*arthro-κεγχρίας*, like a grain of millet]. A miliary eruption occurring about a joint.

arthrochondritis (*ar-thro-kon-dri'-tis*) [*arthro-; χόνδρος*, a cartilage; *ιτις*, inflammation]. Inflammation of the cartilaginous parts of a joint.

arthroclasia (*ar-thro-kla'-se-ah*) [*arthro-; κλάειν*, to break]. The breaking-down of ankyloses in order to produce free movement of a joint.

arthroclasis (*ar-thro-kla'-sis*). *Arthroclasia, q. v.*

arthrocleisis (*ar-thro-kli'-sis*) [*arthro-; κλείειν*, to shut]. See *arthrodesis.*

arthrodesis (*ar-throd'-es-is*) [*arthro-; δέσις*, a binding]. Surgical fixation of paralyzed joints.

arthrodia (*ar-thro'-de-ah*) [*ἀρθρωδία*, a kind of articulation]. A form of joint admitting of a gliding movement.

arthrodial (*ar-thro'-de-al*) [*arthrodia*]. Pertaining to or of the nature of arthrodia.

arthrodynia (*ar-thro-din'-e-ah*) [*arthro-; ὀδύνη*, pain]. Pain in a joint; arthralgia.

arthrodynic (*ar-thro-din'-ik*) [*arthro-; ὀδύνη*, pain]. Relating to or affected by arthrodynia.

arthroempyesis (*ar-thro-em-pi-e'-sis*) [*arthro-; ἐμπύησις*, suppuration]. Suppuration in a joint.

arthro-endoscopy (*ar-thro-en-dos'-ko-pe*) [*arthro-; endoscopy*]. Examination of the interior of a joint by means of an endoscope.

arthrogenous (*ar-throj'-en-us*) [*arthro-; γεννᾶν*, to produce]. Forming an articulation. **a. spore,** an arthrospore.

arthrography (*ar-throg'-ra-fe*) [*arthro-; γράφειν*, to write]. A description of the joints.

arthrogryposis (*ar-thro-grip-o'-sis*) [*arthro-; γρύπωσις*, flexure]. 1. Permanent flexure of a joint; ankylosis. 2. Persistent idiopathic contracture of a joint. 3. Tetany or tetanilla.

arthrokleisis. See *arthrocleisis.*

arthrolith (*ar'-thro-lith*) [*arthro-; λίθος*, a stone]. One of the free bodies which occur in joints, arising from outgrowths of joint cartilage or of synovial membrane. Syn., *arthrophyte; arthremphyte; joint-bodies; joint-mice; mures articulares; corpora mobilia articulorum; corpora libera articulorum; tophus arthriticus; arthrotophus.*

arthrolithiasis (*ar-thro-lith-i'-as-is*) [see *arthrolith*]. Gout.

arthrology (*ar-throl'-o-je*) [*arthro-; λόγος*, science]. The science of joints.

arthrolysis (*ar-throl'-is-is*) [*arthro-; λύσις*, a solution]. The division or removal of adhesions and bone from an ankylosed joint.

arthromeningitis (*ar-thro-men-in-ji'-tis*) [*arthro-; meningitis*]. Synovitis.

arthrometer (*ar-throm'-et-ur*) [*arthro-; μέτρον*, a measure]. An instrument for measuring and recording the extent of movement in a joint.

arthron (*ar'-thron*) [*ἄρθρον*, a joint]. A joint or an articulation.

arthronalgia (*ar-thron-al'-je-ah*). See *arthralgia.*

arthroncus (*ar-throng'-kus*) [*arthro-; ὄγκος*, a swelling]. 1. A cartilaginous body such as occasionally forms within the knee-joint. 2 Swelling of a joint.

arthroneuralgia (*ar-thro-nū-ral'-je-ah*) [*arthro-; νεῦρον*, nerve; *ἄλγος*, pain]. Neuralgic pain in a joint.

arthropathology (*ar-thro-path-ol'-o-je*) [*arthro-*; πάθος, disease; λόγος, science]. The branch of pathology dealing with joint-diseases.

arthropathy (*ar-throp'-a-thē*) [*arthro-*; πάθος, disease]. 1. Any joint disease. 2 A peculiar trophic disease of the joints, sometimes occurring in locomotor ataxia and syringomyelia; rarely in general paralysis of the insane and in disseminated sclerosis. Syn., *Charcot's joint*. **a., Charcot's**, see *arthropathy* (2). **a. osteopulmonary**, Marie's disease, an enlargement of the ends of long bones in long standing pulmonary disease. **a., tabetic**, Charcot's disease. **a., vertebral**, arthropathy with depressions and rugosities of the vertebræ.

arthrophlogosis (*ar-thro-flo-go'-sis*) [*arthro-*; φλέγειν, to burn]. Inflammation of a joint.

arthrophlysis (*ar-throf'-lis-is*) [*arthro-*; φλύσις, an eruption]. Gout accompanied with a cutaneous eruption. **a. cardiaca.** See *miliaria arthritica*. **a. vulgaris.** See *eczema arthriticum*.

arthrophyma (*ar-thro-fi'-mah*) [*arthro-*; φῦμα, a swelling]. Swelling of a joint.

arthrophyte (*ar'-thro-fīt*) [*arthro-*; φύτον, a growth]. A growth in a joint.

arthroplasty (*ar'-thro-plas-te*) [*arthro-*; πλάσσειν, to form]. 1. The making of an artificial joint. 2. Reconstruction of a new joint from an ankylosed joint.

Arthropod (*ar'-thro-pod*) [*arthro-*; πούς, foot]. A member of the phylum arthropoda which embraces crustaceans, insects and spiders.

arthropodous (*ar-throp'-o-dus*) [*arthro-*; πούς, a foot]. In biology, having jointed legs

arthropyosis (*ar-thro-pi-o'-sis*) [*arthro-*; πύωσις, suppuration]. Pus-formation in a joint.

arthrorheumatism (*ar-thro-ru'-mat-izm*) [*arthro-*, *rheumatism*]. Articular rheumatism.

arthrorrhagia (*ar-thro-ra'-je-ah*) [*arthro-*; ῥηγνύναι, to burst forth]. Hemorrhage into a joint.

arthrosclerosis (*ar-thro-skle-ro'-sis*) [*arthro-*; σκλήρωσις, a hardening]. Stiffness of the joints.

arthrosia (*ar-thro'-ze-ah*) [*arthron*] Painful inflammatory or other affection of a joint.

arthrosis (*ar-hro'-sis*) [ἀρθρόειν, to fasten by a joint]. 1. Articulation or jointing, a suture. 2. Degenerative process in a joint. **a. deformans**, same as *arthritis deformans*, *q. v.*

arthrospore (*ar'-thro-spōr*) [*arthro-*; σπόρος, a seed]. A spore formed by fission

arthrosteitis (*ar-thro-ste-i'-tis*) [*arthro-*; ὀστέον, bone; ῖτις, inflammation]. Inflammation of the bony parts of a joint.

arthrostenosis (*ar-thro-sten-o'-sis*) [*arthro-*; στένωσις, a narrowing]. Contraction of a joint.

arthrosteophyma (*ar-thro-ste-o-fi'-mah*) [*arthro-*; ὀστέον, bone; φῦμα, tumor]. A tumor of the bone in a joint.

arthrosyrinx (*ar-thro-sir'-ingks*) [*arthro-*; σῦριγξ, a pipe]. A fistulous opening into a joint.

arthrotome (*ar'-thro-tōm*) [*arthro-*; τόμη, a cutting]. A stout knife used in joint surgery.

arthrotomy (*ar-throt'-o-me*) [*arthro-*; τέμνειν, to cut]. Incision of a joint.

arthrotrauma (*ar-thro-traw'-mah*) [*arthro-*; τραῦμα, an injury]. An injury to a joint.

arthrotropia (*ar-thro-tro'-pe-ah*) [*arthro-*; τροπή, a turning]. Torsion of a limb.

arthrotyphoid (*ar-thro-ti'-foid*). Typhoid fever with articular involvement.

arthrous (*ar'-thrus*) [*arthron*]. Pertaining to a joint or joints; jointed.

arthroxerosis (*ar-thro-zer-o'-sis*) [*arthro-*; ξέρωσις, a dry state] Chronic osteoarthritis.

arthroxesis (*ar-throks'-es-is*) [*arthro-*; ξέσις, a scraping]. The surgical treatment of an articular surface by scraping

Arthus phenomenon (*ar'-tŏos*) [Maurice *Arthus*, French bacteriologist]. A rabbit treated with horse's serum at intervals of six days shows a soft infiltrate after the fourth injection, a hard infiltrate after the fifth injection, and gangrene after the sixth or seventh injection; this last is followed by death.

artiad (*ar'-te-ad*) [ἄρτιος, even]. In chemistry, a term designating an element or radical having an even quantivalence.

article (*art'-ikl*) [*articulus*, a little joint]. A joint; a segment of a jointed series.

articular (*ar-tik'-ū-lar*) [*articularis*, of the joints]. Pertaining to an articulation or joint.

articularis (*ar-tik-ū-la'-ris*). Articular. **a. genu.** See *subcrureus*, in *table of muscles*.

articulate (*ar-tik'-ū-lāt*) [*articulare*, to divide in joints]. 1. Divided into joints. 2 Distinct, clear. 3. To adjust artificial teeth. **a. speech**, the communication of ideas by spoken words.

articulated (*ar-tik-ū-la'-ted*). Jointed. **a. skeleton**, prepared and mounted skeleton so arranged as to allow of free movement of the joints.

articulatio (*ar-tik-ū-la'-she-o*) [L., a joint]. A joint; see *articulation* **a. acromioclavicularis**, acromioclavicular joint. **a. atlantoepistrophica**, joint between atlas and epistropheus or axis **a. atlantooccipitalis**, joint between atlas and occipital bone. **a. carpometacarpea pollicis**, carpometacarpal joint of the thumb **a. calcaneocuboidea**, calcaneocuboid joint. **a. cochlearis**, spiral joint. **a. composita**, compound joint **a. coxæ**, hip-joint. **a. cricoarytænoidea**, arycorniculate synchondrosis. **a. cricothyreoidea**, cricothyreoid articulation. **a. cubiti**, elbow-joint. **a. cuneonavicularis**, cuneonavicular joint. **a. ellipsoidea**, elliptical joint. **a. genu**, knee joint. **a. humeri**, shoulder-joint. **a. humeroradialis**, humeroradial articulation. **a. humeroulnaris**, humero-ulnar articulation. **a. incudomalleolaris**, joint between anvil and hammer. **a. incudostapedia**, joint between anvil and stirrup **a. intercarpea**, intercarpal articulation, carpal joints **a. mandibularis**, jaw-joint **a. manus**, joint of the hand. **a. ossis pisoformis**, joint of the pisiform bone **a. radioulnaris distalis**, inferior radio-ulnar joint **a. radioulnaris proximalis**, superior radio-ulnar joint. **a. sacroiliaca**, sacro-iliac joint **a. sellaris**, saddle joint **a. simplex**, simple joint. **a. sphæroidea**, spherical joint. **a. sternoclavicularis**, sternoclavicular joint. **a. talocalcanea**, talocalcanean joint. **a. talocalcaneonavicularis**, talocalcaneonavicular joint. **a. talocruralis**, ankle-joint. **a. talonavicularis**, talonavicular joint **a. tarsi transversa (Choparti)**, Chopart's transverse articulation of the tarsus **a. tibiofibularis**, superior tibiofibular articulation. **a. trochoidea**, trochoid or pivot joint

articulation (*ar-tik-ū-la'-shun*) [*articulus*, a joint]. 1. A joint; a connection between two or more bones, whether or not allowing movement between them. The articulations are divided into: (1) *Synarthroses*, immovable, subdivided into *schindyleses*, or grooved joints; *gomphoses*, in sockets, as the teeth; and *suturæ*, as in the bones of the skull; (2) *diarthroses*, or movable joints, subdivided into the *arthrodia*, or gliding joints; the *ginglymus*, or hinge-like; the *enarthroses*, or ball-and-socket joints; (3) *amphiarthroses*,

or those of a mixed type 2. The enunciation of spoken speech 3 The articulating contact of the cusps in the positions of mastication **a., false,** one formed between the end of a dislocated bone and the contiguous parts or between the parts of a broken bone Syn , *pseudarthrosis* **a , supplementary,** a false articulation in which the ends of the fragments become rounded and covered with a fibrous capsule

articulationes (*ar-tik-u-la-she-o'-nēz*) [L *pl* , of *articulatio*] Joints **a. capitulorum,** capitular joints or articulations between the heads of the ribs and the vertebræ **a. carpometacarpeæ,** carpometacarpal joints **a. costotransversariæ,** costotransverse joints **a. costovertebrales,** joints between ribs and vertebræ **a. digitorum manus,** joints of the fingers **a. digitorum pedis,** joints of the toes **a. interchondrales,** interchondral joints **a. intermetacarpeæ,** intermetacarpal joints **a. intermetatarseæ,** intermetatarsal joints **a intertarseæ,** intertarsal joints **a. metacarpophalangeæ,** metacarpophalangeal joints **a metatarsophalangeæ,** metatarsophalangeal joints **a. ossiculorum auditus,** joints of the auditory ossicles **a. manus,** joints of the hand **a. pedis,** joints of the foot **a. sternocostales,** sternocostal joints

articulator (*ar tik' u la tor*) [*articulus,* a joint] An instrument used in mechanical dentistry for holding the models in position while the artificial teeth are being arranged and antagonized upon the plates

articulatory (*ar tik'-u la-tor e*) Relating to articulation

articulo mortis, in (*ar-tik'-ū lo mor'-tis*) [L] At the moment of death In the act of dying

articulus (*ar tik' u lus*) [dim of *artus,* a joint, pl and gen *articuli*] 1 A joint, a knuckle 2 A segment, a part, a limb 3 A moment of time

artifact (*ar' te fakt*) See *artefact*

artificial (*ar-te fish -al*) [*artificialis*] Imitated by art **a. anus,** an opening in the abdomen or loin to give exit to the feces **a eye,** a film of glass celluloid rubber, etc , made in imitation of the front part of the eye and worn in the socket or over a blind eye for cosmetic reasons **a feeding,** feeding an infant by other means than mother's milk **a leech** See *leech artificial* **a lung,** a device to keep alive those whose breathing muscles are paralized by infantile paralysis **a palate** See *palate, artificial* **a. pupil,** the result of removal of a piece of the iris (*iridectomy iridodialysis,* etc) to allow light to pass through the opening **a respiration,** the aeration of blood by artificial means—a method of inducing normal function of respiration, as in asphyxia neonatorum, drowning, etc For methods see —*Bain s, Byrd s, Callisano s Dew s, Forest s, Hall s, Howard s, Laborde s, Pacini s, Rosenthal s, Satterthwaite s, Schafer's, Schroeder s, Schultze s,* and *Sylvester's, q v*

artistomia (*ar-te-sto'-me ah*) [*ἄρτι,* exactly, *στόμα,* a mouth] 1 Distinctness in utterance 2 The condition of an aperture, especially in surgical incisions, in which the size is perfectly adapted to the purpose

artiyls (*ar'-te-ils*) [*ἄρτιος,* complete] Loewig's name for hydrocarbons of the general formula C_nH_{2n}

Artocarpus (*ar-to-kar'-pus*) [*ἄρτος,* bread, *καρπός,* a fruit]. A genus of trees of the order *Urticaceæ,* including the breadfruit-tree, *A incisa A. blumei* is an East Indian species with an edible fruit, the oil of which is used in diarrhea, an ointment from the buds and leaves is applied to buboes *A. integrifolia,* native in India, is prized for its wood, the root is used in diarrhea and as an external application in leprosy, the root-bark is used as a vermifuge

artus (*ar'-tus*) [L *pl* , *artus*] A joint, a limb, the joints collectively

aryepiglottic (*ar-e-ep-e-glot'-ik*) Same as *arytenoepiglottic*

aryl (*ar'-il*) A chemical prefix denoting an organic radical belonging to the aromatic series

arylarsonates (*ar-il-ar'-so nāts*) Aromatic organic salts of arsenic, such as *atoxyl, soamin* and *six hundred and six*

arytenectomy (*ar-e-ten ek'-to-me*) See *arytenoidectomy*

arytenoepiglottic (*ar it-en-o-ep-e-glot'-ik*) [*ἀρύταινα,* a pitcher, *εἶδος* likeness, *ἐπί,* upon, *γλωττίς,* glottis] Relating to an arytenoid cartilage and to the epiglottis, as the *arytenoepiglottic* fold (or folds), consisting of a fold of mucous membrane that extends from each arytenoid cartilage to the epiglottis

arytenoid (*ar it'-en oid*) [*ἀρύταινα,* a pitcher, *εἶδος* likeness] 1 Resembling the mouth of a pitcher 2 Pertaining to the arytenoid cartilages **a. cartilages,** two cartilages of the larynx regulating, by means of the attached muscles, the tension of the vocal bands **a. glands,** muciparous glands found in large numbers along the posterior margin of the arytenoepiglottic fold in front of the arytenoid cartilages **a muscle,** a muscle arising from the posterior surface of one arytenoid cartilage and inserted into the corresponding parts of the other It is composed of three planes of fibers, two oblique and one transverse It draws the arytenoid cartilages together

arytenoidectomy (*ar-e-ten-oid-ek' to-me*) [*arytenoid ἐκτομή,* a cutting-out] Removal of an arytenoid cartilage

arytenoiditis (*ar-e ten oid i'-tis*) Inflammation of the arytenoid cartilage or muscles

arythmia (*ar-ith'-me-ah*) See *arrhythmia*

arythmic (*ar-ith'-mik*) See *arrhythmic*

Arzberger's pear. A hollow oval shaped ball through which water runs to keep the rectum cool

A S Abbr for *auris sinistra* the left ear

As. 1 Chemical symbol for arsenic 2 Abbreviation for astigmatism

asa (*a'-sah*) [Pers , *āza,* mastic] A gum **a. dulcis,** benzoin, also the drug called *laser*

asab [Ar] An African venereal disease said to differ from syphilis

asafetida, asafœtida (*as-a-fet' id-ah*) [*asa,* gum, *fœtida,* stinking] A gum resin obtained from the root of *Ferula fœtida* It is slightly soluble in alcohol and forms an emulsion with water. Its properties are due to a light volatile oil It is antispasmodic, stimulating, expectorant, and is used in hysteria and in bronchial affections Dose 5–20 gr (0 32–1 3 Gm) **a., emulsion of** (*emulsum asafœtidæ,* U S P.), a 4% emulsion of asafetida Dose ½–2 oz. (15–60 Cc) Syn , *milk of asafetida* **a., pills of** (*pilulæ asafœtidæ,* U S P), composed of asafetida, soap, and water Dose 1–3. **a., tincture of** (*tinctura asafœtidæ,* U. S P), strength, 20% Dose 10–30 min (0 6–2 0 Cc) Dewees' carminative (*mistura magnesiæ et asafœtidæ*) is an unofficial preparation composed of magnesium carbonate 5, tinct of asafetida, 7, tinct of opium, 1, sugar, 10, distilled water, sufficient to make 100 parts Dose ½ dr–1 oz (1–15 Cc).

asaphia (*as-a'-fe-ah*) [ἀ, priv.; σαφής, clear]. Indistinct speech, especially that due to cleft palate.

asaprol (*as'-ap-rōl*). $CaC_{20}H_{14}S_2O_8 + 3H_2O$. Calcium betanaphthol-α-monosulphonate, a substance readily soluble in water and alcohol. For asthma, tonsillitis, and acute articular rheumatism, dose from 15–60 gr. (1–4 Gm.).

asarcia (*ah-sar'-se-ah*) [ἀ, priv.; σάρξ, flesh]. Emaciation; leanness.

asarin (*as'-ar-in*). Same as *asarone*.

asarol (*as'-ar-ol*) [*asarum; oleum*, oil]. $C_{10}H_{18}O$. A camphor-like body derived from asarum.

asarone (*as'-ar-ōn*) [ἄσαρον, asarabacca]. $C_{20}H_{28}O_8$. Asarin. The solid component of the oil from *Asarum europæum*. It forms monoclinic prisms, has an aromatic taste, and smells like camphor.

Asarum (*as'-ar-um*) [ἄσαρον, asarabacca]. A genus of aristolochiaceous plants. *A. canadense*, called wild ginger, Canada snakeroot, with other North American species. It is a fragrant, aromatic stimulant. Dose of *fluidextract* 15 min.–½ dr (1–2 Cc.). *A. europæum*; is diaphoretic, emetic, purgative, and diuretic. Used mainly in veterinary practice.

asbestiform (*as-best'-e-form*) [*asbestos*]. Fibrous in structure.

asbestos (*as-bes'-tos*) [ἄσβεστος, unquenchable]. A soft fibrous mineral of flexible or elastic fibers: the best nonconductor of heat. Mixed with plaster it is used in dentistry as a substitute for sand to form the investment preparatory to soldering. It has a limited use in surgery.

asbestosis (*as-bes-to'-sis*) [*asbestos*]. Pneumonoconiosis of asbestos workers.

asbolic, asbolicous, asbolicus (*as-bol'-ik, -us*) [ἄσβολος, soot]. Sooty; due to soot; *e. g.*, *carcinoma scroti asbolicum*.

asbolin (*as'-bol-in*) [see *asbolic*]. A bitter, acrid, yellow oil from soot; used in tuberculosis.

ascariasis (*as-kar-i'-as-is*) [*ascaris*]. The symptoms produced by the presence of ascarides in the gastrointestinal canal.

ascaricide (*as-kar'-is-id*) [*ascaris; cædere*, to kill]. A medicine that kills ascarides.

Ascaridæ (*as-kar'-e-de*) [*ascaris*] A family of nematode worms, to which belongs the roundworm (*Ascaris lumbricoides*) and the threadworm (*Oxyuris vermicularis*).

ascarides (*as-kar'-id-ēz*). Plural of *ascaris*.

ascaridiasis (*as-kar-id-i'-as-is*). The presence of ascarides in the intestine.

Ascaris (*as'-kar-is*) [ἀσκαρίς, a species of intestinal worm; pl. *ascarides*]. A genus of parasitic worms in the intestine of most animals. **A. alata**, a variety rarely found in man. **A. lumbricoides**, a variety in the ox, hog, and man. Found in the small intestine, especially of children. **A. mystax**, roundworm of the cat, rarely found in man. **A. trichiuris**, the whip-worm **A. vermicularis**. Syn. of *Oxyuris vermicularis*.

ascending (*as-end'-ing*) [*ascendere*, to rise]. Taking an upward course; rising (as parts of the aorta and colon, and as one of the venæ cavæ). **a. aorta**, the first part of the aorta. **a. colon**, the first part of the colon. **a. current**, in electricity, one going from the periphery to a nerve-center. **a. degeneration**, a degeneration of the nerve-fibers extending from the periphery to the center, or, in the spinal cord, from below upward toward the brain. **a. metamorphosis**, same as *anabolism*. **a. paralysis**. See *paralysis, ascending*. **a. tracts**, the centripetal tracts of the spinal cord, carrying afferent impulses.

Asch's operation (*ash*) [Morris J. *Asch*, American physician, 1833–1902]. For deviation of nasal septum; it consists in a crucial incision over the deflection, taking up the segments, reduction of the deflection, and insertion of a tube to hold the segments in place.

Aschheim-Zondek test. The urine of a pregnant woman is surcharged with protein (q.v.). This urine is injected into mice and after 100 hours the mice are killed If one blood point, or one *corpora lutea*, or *corpora lutea atrusica* is seen in the uterus, pregnancy in the woman is indicated.

Ascherson's vesicles (*ash'-er-sun*) [Ferdinand Moritz *Ascherson*, German physician, 1798–1879]. The peculiar small globules formed when oil and an albuminous fluid are agitated together; formerly thought to be cells.

ascheturesis (*as-ket-ū-re'-sis*) [ἄσχετος, resistless; οὔρησις, urination]. An uncontrollable desire to urinate; irrepressible urination.

aschistodactylism (*as-kis-to-dak'-til-izm*) [ἀσχίστος, uncloven; δάκτυλος, finger]. A synonym of *syndactylism*.

aschistodactylous (*as-kis-to-dak' til-us*). Affected with syndactylism.

Aschner's phenomenon (*ash'-ner*). Pressure on the eyeball produces a slowing of the pulse.

Aschoff bodies (*ah'-shoff*) [Ludwig *Aschoff*, German pathologist, 1866–] Nodular bodies found in the myocardium in patients who have suffered from rheumatism **A's node**, the auriculoventricular node

ascia (*ah'-se-ah* or *as'-ke-ah*) [ἀ, priv.; σκιά, shadow]. A spiral bandage without reverses, each turn overlaps the preceding for about one-third of its width. *Dolabra repens*, the same as the preceding, but the spirals are more oblique and do not overlap each other, but are separated by a greater or less interval. Syn., *dolabra currens, fascia spiralis*.

ascites (*as-si'-tēz*) [ἀσκίτης, a kind of dropsy; from ἀσκός, a bag]. An abnormal collection of serous fluid in the peritoneal cavity; dropsy of the peritoneum. It is either local in origin or part of a general dropsy The ascitic fluid is usually clear, yellow, and coagulates on standing. It may be turbid, blood-stained, and contain lymph-particles or shreds. There are uniform enlargement of the abdomen, fluctuation, percussion-dulness Its usual cause is cirrhosis of the liver. Syn., *abdominal dropsy; hydroperitoneum; hydrops peritonæi*. See *Duparque's method for detecting ascites* **a., active, a., acute**, that in which there is a sudden large effusion due to exposure or cold. **a. adiposus**, ascites characterized by a fluid, milky appearance, due to the presence in it of numerous cells that have undergone fatty degeneration and solution. It is seen in certain cases of carcinoma, tuberculosis, and other chronic inflammations of the peritoneum. Syn., *ascites oleosus*. **a. chylosus**, the presence of chyle in the peritoneal cavity. It follows rupture of a chyle-duct. **a. intercus**, an effusion occurring between the skin and the peritoneum. **a. intermuscularis**, edema of the abdominal muscles. **a., mechanical, a., passive**, that due to diseases which retard the blood-current in the portal vein. **a. saccatus.** 1. A form in which the effusion is prevented by adhesions or inflammatory exudate from entering the general peritoneal cavity. Syn., *encysted dropsy of the peritoneum*. 2. An ovarian cystoma. **a., sanguineous**, a bloody form affecting sheep and lambs. Syn., *diarrhemia*. **a. vaginalis**, a col

lection of liquid within the sheath of the rectus abdominis muscle. **a. vulgatior,** a form apparently due to diseased kidneys, and preceded by scanty, highly colored urine.

ascitic (*as-it'-ik*) [see *ascites*]. Pertaining to or affected with ascites.

asclepiadin (*as-kle-pi'-ad-in*) [*asclepias*]. A bitter glucoside obtainable from various species of *Asclepias*. It is poisonous, and has emetic, purgative, and sudorific properties.

Asclepias (*as-kle'-pe-as*) [ἀσκληπιάς]. 1. Pleurisy-root. The root of *Asclepias tuberosa*. A popular remedy in the Southern States for pleurisy. It is diaphoretic, emetic, and cathartic. The infusion recommended has a strength of 1 oz. of the powdered root to 32 oz. of water. Dose a teacupful every 3 or 4 hours. 2. A genus of plants of the order *Asclepiadaceæ*. *A. curassavica*, blood-flower, is an herb common to tropical America; astringent, styptic, and anthelmintic against the tape-worm. Dose of *fluidextract* 20 min.–1 dr. (1.3–4.0 Cc.). *A. longifolia*, of the western states, is diaphoretic.

asclepin (*as'-kle-pin*) [*asclepias*]. 1. A poisonous principle obtainable from asclepiadin by the separation of glucose from the latter. 2. The precipitate from a tincture of *Asclepias tuberosa;* alterative, evacuant, tonic, sedative. Dose 2–4 gr. (0.13–0.26 Gm.).

asclepion (*as-kle'-pe-on*). A resinous substance, $C_{20}H_{14}O_3$, obtained from *Asclepias syriaca*.

Ascococcus (*as-ko-kok'-us*) [*ascus;* κοκκός, a kernel]. A genus of the family of *Schizomycetes*. The Ascococci are made up of round or ovoid cells, united in massive colonies, and surrounded by tough, thick, gelatinous envelopes. **a Billrothii,** a form found in putrid meat; its natural habitat is the air; it is probably not pathogenic.

ascogonidia (*as-ko-gon-id'-e-ah*) [*ascus,* γονή, seed] gonidia found throughout a rod-bacterium.

Ascoidium (*as-ko-id'-e-um*) [*ascus;* εἶδός, likeness]. A genus of *Infusoria* found in the urine and feces of typhoid fever patients, in sewage, in the excrement of cattle, and in the cecum of swine.

Ascoli reaction (*as-ko'-le*) [Albert *Ascoli*]. Same as *meiostagmin reaction, q. v.*

Ascomycetes (*as-ko-mi-se'-tēz*). A group of fungi, including *aspergillus* and *oidium*.

ascospore (*as'-ko-spōr*) [*ascus;* σπόρος, spore]. A spore produced by or in an ascus.

ascotrophosome (*as-ko-trof'-o-sōm*) [*ascus:*—τροφή, nourishment]. A trophosome situated anywhere in a rod-bacterium except at the ends. See *teletrophosome*.

ascus (*as'-kus*) [ἀσκός, a bag or bladder]. The characteristic spore-case of some fungi and lichens, usually consisting of a single terminal cell containing eight spores.

-ase (*ās*). A termination denoting an enzyme; thus *lipase*, a fat-splitting enzyme.

asecretory (*ah-se'-kret-o-re*) [ἀ, priv.; *secretus,* separate]. Dry; without secretion.

Aselli's glands or **pancrease** [Gaspar *Aselli*, Italian anatomist, 1581–1626]. A group of lymphatic glands situated at the root of the mesentery.

aselline (*as-el'-ēn*). A poisonous leukomaine found in cod-liver oil.

asemasia (*ah-sem-a'-ze-ah*) [ἀ, priv.; σημασία, a signaling]. Absence of the power to communicate either by signs or by language.

asemia (*ah-se'-me-ah*) [ἀ, priv.; σῆμα, sign]. Inability to form, express, or understand any sign, token, or symbol of thought or feeling, whether speech, writing or gesture. **a. mimica.** See *amimia*. **a. spuria.** See *parasemia*.

asepsin (*ah-sep'-sin*). See *antisepsin*.

asepsis (*ah-sep'-sis*) [ἀ, priv.; σῆψις, putrefaction]. Absence of pathogenic microorganisms.

aseptafilm (*ah-sep'-ta-film*). A form of cotton wool (gossypium) which is colorless, transparent, and sterilizable.

aseptic (*ah-sep'-tik*) [ἀ, priv.; σηπτός, septic]. Free from pathogenic bacteria, as *aseptic* wounds. **a. surgery,** the mode of surgical practice in which everything that is used, as well as the wound, is in a germ-free condition.

asepticism (*ah-sep'-tis-izm*) [see *aseptic*]. The doctrine or principles of aseptic surgery.

asepticize (*ah-sep'-tis-iz*) [see *aseptic*]. To render aseptic.

aseptin (*ah-sep'-tin*) [see *aseptic*]. A proprietary food preserver containing boric acid.

aseptol (*ah-sep'-tol*) [see *aseptic*], $C_6H_5SO_4$. A reddish liquid, with an odor of phenol, recommended as a disinfectant and antiseptic. It is used externally (1 to 10% solution) and internally in about the same dose as phenol.

aseptolin (*ah-sep'-tol-in*). A preparation of pilocarpine (0.018%) in an aqueous solution of phenol (2.74%); it is used in tuberculosis and in malaria. Dose 50–70 min. (3–4 Cc.) daily, injected subcutaneously.

asexual (*ah-seks'-ū-al*) [ἀ, priv.; *sexus,* sex]. Without sex; nonsexual.

asexualization (*ah-seks-ū-al-iz-a'-shun*). Removal of the testicles, or of the ovaries.

As. H. Abbreviation for *hyperoptic astigmatism*.

ash [ME., *asch*]. 1. The incombustible mineral residue that remains when a substance is incinerated. 2. See *manna*. **a. manna.** See *manna*. **a., prickly.** See *xanthoxylum*.

AsH_3. Arsenic hydride, arsin.

asialia (*as-e-a'-le-ah*) [ἀ, priv.; σίαλον, spittle]. Deficiency or failure of the secretion of saliva.

Asiatic (*a-zhe-at'-ik*) [*Asia*]. Pertaining or belonging to Asia. **A. cholera.** See *cholera, Asiatic*. **A. pill,** a pill composed of arsenic trioxide, black pepper, powdered licorice, and mucilage.

Asimina (*as-im-e'-nah*) [L.]. A genus of trees. *A. triloba* is the papaw tree of North America.

asitia (*ah-sit'-e-ah*) [ἀ, priv.; σῖτος, food]. The want of food; also a loathing for food.

askelia (*ah-skel'-e-ah*) [ἀ, priv.; σκέλος, leg]. Nondevelopment of the legs.

As. M. Abbreviation for *myopic astigmatism*.

As_2O_3. Arsenic trioxide.

asoma (*ah-so'-mah*) [ἀ, priv.; σῶμα, body]. A species of omphalositic monster characterized by an absence of the trunk. The head is never well formed, and the vessels run from it to the placenta in the membranes. Beneath the head is a sac in which rudiments of body-organs may be found. This is the rarest form of omphalosites.

asomus (*ah-so-mus*) [ἀ, priv.; σῶμα, body]. A monster with only a rudimentary body.

asonia (*ah-so'-ne-ah*) [ἀ, priv.; *sonus,* a sound]. Tone-deafness.

aspalasoma (*as-pal-as-o'-mah*) [ἀσπάλαξ, mole σῶμα, body]. A variety of single autositic monsters of the species *Celosoma*, in which there is a lateral or median eventration principally at the lower portion of the abdomen, with the urinary and genital apparatus, and the rectum opening externally by three distinct orifices.

asparagine (*as-par'-aj-ēn*) [*asparagus*], $C_4H_8N_2O_3$. An alkaloid found in the seeds of many plants, in asparagus, beet-root, peas, and beans. It forms shining, four-sided, rhombic prisms,

readily soluble in hot water, but not in alcohol or ether. It is an amide of aspartic acid, and forms compounds with both acids and bases. It is diuretic. Asparagine hydrargyrate has been used as an antisyphilitic, in doses of ⅛ gr. (0.01 Gm.) hypodermatically.

asparaginic acid. See *acid, asparaginic.*

Asparagus (*as-par'-ag-us*) [ἀσπάραγος, asparagus]. 1 The green root of *Asparagus officinalis*, a mild diuretic. Dose of *fluidextract* ½–1 dr. (2–4 Cc.). Unof. 2. A genus of plants belonging to the order *Liliaceæ*. *A. acutifolius*, a species of southern Europe, is said to be better medicinally than *A. officinalis*. *A. racemosus* and *A. sarmentosus*, of the old world tropics, are used in the same manner as salep; an infusion of the root of *A. sarmentosus* prevents the confluence of small-pox pustules

asparamide (*as-par'-am-id*). See *asparagine.*

asparolin (*as-par'-ol-in*). A brown liquid said to consist of guaiac, asparagus, parsley, black haw, and henbane. It is an antispasmodic uterine tonic. Dose, 2–4 drams in hot water.

aspartic acid (*as-par'-tik*). See *acid, aspartic.*

aspastic (*ah-spas'-tik*). Not spastic.

aspergillin (*as-per-jil'-in*) [*aspergillus*] A pigment obtained from the spores of *Aspergillus niger*. Syn., *vegetable hematin.*

aspergillosis (*as-per-jil-o'-sis*). Pseudotuberculosis; morbid lesions due to some species of *Aspergillus.*

Aspergillus (*as-per-jil'-us*) [*aspergere*, to sprinkle]. A genus of fungi. **A. auricularis,** a fungus found in the wax of the ear. **A. fumigatus,** found in the ear, nose, and lungs. **A. glaucus,** the bluish mold found upon dried fruit. **A.-keratitis,** corneal inflammation due to invasion by a fungus belonging to the genus *Aspergillus.* Syn., *Keratomycosis aspergillina.* **A. mucoroides,** a species found in tuberculous or gangrenous lung tissue. **A.-mycosis.** See *otomycosis.*

aspermatic (*ah-sper-mat'-ik*) [ἀ, priv.; σπέρμα, seed]. Relating to aspermatism.

aspermatism (*ah-sper'-mat-izm*) [ἀ, priv.; σπέρμα, seed]. 1. Non-emission of semen, whether owing to non-secretion or non-ejaculation. 2. Defective secretion of semen or lack of formation of spermatozoa.

aspermia (*ah-sper'-me-ah*). Same as *aspermatism.*

aspermous (*ah-sper'-mus*) [see *aspermatic*]. Without seed.

asperous (*as'-per-us*) [*asper*, rough]. Uneven; having a surface with distinct minute elevations.

aspersion (*as-per'-shun*) [*aspergere*, to sprinkle]. Treatment of disease by sprinkling the body or the affected part with a medicinal agent.

aspersus (*as-per'-sus*) [see *aspersion*]. Covered with scattered dots or punctures

asphalgesia (*as-fal-je'-ze-ah*) [ἄσφι, their own; ἄλγησις, pain]. Pitres' term for a condition observed in hypnotism, in which intense pain follows the touching of certain articles, and prolonged contact produces convulsions

asphyctic, asphyctous (*as-fik'-tik, -tus*) [*asphyxia*]. 1. Affected with asphyxia. 2. Pulseless.

asphyxia (*as-fiks'-e-ah*) [ἀ, priv.; σφύξις, the pulse]. Suffocation; the suspension of vital phenomena resulting when the lungs are deprived of oxygen. The excess of carbon dioxide in the blood at first stimulates, then paralyzes, the respiratory center of the medulla Artificial respiration is therefore required in cases of asphyxia **a. cataphora,** that with brief incomplete remissions. **a., lethargic,** deep sleep accompanying mental and physical torpor. **a., local,** that stage of Raynaud's disease in which the affected parts are dusky red from intense congestion. **a. neonatorum,** the asphyxia of the newborn from any cause. **a. sideratorum,** loss of consciousness from lightning-stroke. **a., solar, a. solaris,** sunstroke. **a., syncopal,** a form of asphyxia in which the heart-cavities are found vacant. **a. valsalviana,** syncope due to disturbance of cardiac functions.

asphyxial (*as-fik'-se-al*). Relating to or characterized by asphyxia

asphyxiant (*as-fiks'-e-ant*) [see *asphyctic*] 1. Producing asphyxia. 2. An agent capable of producing asphyxia.

asphyxiate (*as-fiks'-e-āt*) [see *asphyctic*]. To produce or cause asphyxia.

aspic (*as'-pik*) [*a* and *spic*, lavender spike]. The great lavender, or spike lavender, *Lavandula spica* Its oil is at present used in veterinary practice and occasionally in liniments.

aspidin (*as'-pid-in*) [*Aspidium*, a genus of ferns], $C_{28}H_{27}O_7$. An active principle obtained from malefern.

aspidiosoriasis (*as-pid-e-o-so-ri'-as-is*) [ἀσπίδιον, a little shield; *psoriasis*]. A form of psoriasis marked by the formation of scutiform scales.

Aspidium (*as-pid'-e-um*) [L ; gen , *aspidii*]. 1. A genus of ferns known as shield-ferns. 2. The rhizome of *Aspidium filix-mas* and of *A. marginale*, or male-fern Its properties are due to a resin containing filicic acid It is valuable chiefly against tape-worm. Dose ½ dr.–½ oz. (2–15 Cc.). **a., liquid extract of** (*extractum filicis liquidum*, B P.). Dose 15 min.–1 dr. (1–4 Cc). **a., oleoresin of** (*oleoresina aspidii*, U S. P), an ethereal extract. Dose ½–1 dr. (2–4 Cc.).

aspidol (*as'-pid-ol*) [*Aspidium*, a genus of ferns]. $C_{20}H_{34}O$. A substance isolated from malefern

aspidosamin (*as-pid-os'-am-in*), $C_{22}H_{28}N_2O_2$ A basic principle from quebracho bark It is emetic.

Aspidosperma (*as-pid-o-sper'-mah*) [ἀσπίς, a shield; σπέρμα, a seed] A genus of apocynaceous trees, of which the quebracho is the most important.

aspidospermatin (*as-pid-o-sper'-mat-in*) [ἀσπίς, a shield; σπέρμα, seed]. A basic substance, from quebracho bark, said to be isomeric with aspidosamine and to depress the temperature when administered.

aspidospermine (*as-pid-o-sper'-mēn*) [see *aspidosperma*], $C_{22}H_{30}N_2O_2$. An alkaloid extracted from quebracho (*Aspidosperma quebracho*). It is a respiratory stimulant and antispasmodic. Dose 1–2 gr. (0.065–0.13 Gm.).

aspirate (*as'-pir-āt*). To remove by aspiration.

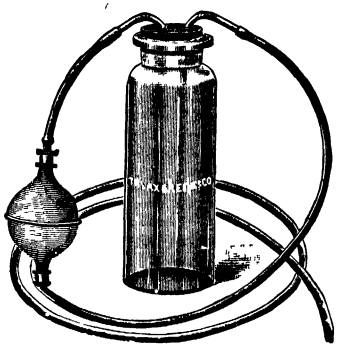
aspiration (*as-pir-a'-shun*) [*ad*, to; *spirare*, to breathe] 1. The act of sucking up or sucking in; inspiration; imbibition. 2. The act of using the aspirator. 3. A method of withdrawing the fluids and gases from a cavity. **a. pneumonia.** See *pneumonia, aspiration.*

aspirator (*as'-pir-a-tor*) [see *aspiration*]. An apparatus for withdrawing liquids from cavities by means of suction.

aspirin (*as'-pir-in*). The acetic-acid ester of salicylic acid; small needles without color or taste, used as an antipyretic and analgesic, as is sodium salicylate. Dose 15 gr. (1 Gm.). Syn., *acetyl salicylic acid.*

aspirinoids (*as-pir'-in-oydz*). Same as aspirin, *q. v.*

aspirolithin (*as-pir-o-lith'-in*). A proprietary combination of aspirin and lithium.



TURCK'S ASPIRATION APPARATUS.

aspirophen (*as-pi'-ro-fen*). A mixture containing salicylic acid and monacetyl phenocoll; it is said to be antirheumatic and antipyratic. Dose 10–15 gr. (0 6–1.0 Gm.).

Asplenium (*as-ple'-ne-um*). A genus of ferns called spleen-worts, or miltwastes.

asporogenic (*ah-spor-o-jen'-ik*) [ἀ, priv.; σπόρος, seed; γενής, producing]. Not reproducing by means of spores; not producing spores.

asporogenous (*as-por-oj'-en-us*). Same as *asporogenic*.

asporous (*ah-spo'-rus*) [ἀ, priv.; σπόρος, seed]. Without spores.

assafetida (*as-a-fet'-id-ah*). See *asafetida*.

assanation (*as-an-a'-shun*) [*ad*, to; *sanare*, to make sound] The improvement of sanitary conditions.

assault (*as-awlt'*) [*assalire*, to assail]. An attack. **a., criminal,** in medical jurisprudence, the touching or attempting to touch, on the part of a male, any of the sexual organs (the breasts included) of a female against her will, even though they be covered by clothing.

assay (*as-a'*) [Fr., *assayer*]. 1 The testing or analysis of a metal or drug to determine the relative proportion of its constituents. 2. The substance thus tested. 3. The process of assaying.

Assègat, triangle of. See under Assézat.

asselline (*as-el'-ēn*). A poisonous leukomaine obtained from cod-liver-oil.

Assèzat, triangle of, (*ah-sa-zah'*) [Jules *Assézat*, French anthropologist, 1832–1876]. A triangle formed by lines uniting the projection of the nasion on the alveolo-condylar plane and the alveolar and nasal points and one uniting the two latter

assident (*as'-id-ent*) [*assidere*, to sit by]. Usually, but not always, accompanying a disease; as, *assident symptoms*. Opposed to pathognomonic.

assideration (*as-id-er-a'-shun*) [*ad*, intensive; *sideratio*, an evil influence]. In forensic medicine, infanticide by immersing in ice-cold water.

assimilable (*as-im'-il-a-bl*) [*assimulare*, to make like]. Capable of being assimilated; nutritious.

assimilation (*as-im-il-a'-shun*) [see *assimilable*]. The process of transforming food into so nutrient a condition that it is taken up by the circulatory system, to form an integral part of the economy; synthetic or constructive metabolism; anabolism. **a.-limit,** the amount of starchy or saccharine food which a person can ingest without the appearance of glycosuria. **a., mental,** the mental reception of impressions and their assignment by the consciousness to their proper place. **a., primary,** that concerned in the conversion of food into chyle and blood. **a., secondary,** that relating to the formation of the organized tissues of the body.

associated (*as-o'-se-a-ted*) [*associatus*, united]. Joined. **a. movements,** coincident or consensual movements of muscles other than the leading one, and which, by habit or unity of purpose, are involuntarily connected with its action· both eyeballs move alike in reading, though one be a blind eye Movement of the normal arm will sometimes produce slight motion of the opposite paralyzed arm. Uniformity of innervation is usually the cause of these movements. **a. paralysis, a. spasm,** a common paralysis or spasm of associated muscles.

associated paralysis of larynx. Paralysis of the recurrent laryngeal nerve (involving the vocal cords) complicated by paralysis of the pneumogastric, spinal accessory or hypoglossal nerves

association center (*as-so-se-a'-shun*). The center controlling associated movements. **a. c., anterior,** that part of the frontal cortex anterior to the motor area. **a. c., middle,** the island of Reil. **a. c., posterior,** that part of the cortex situated between the sensory area at the equator and the area for vision in the occipital lobe.

association test. A word is mentioned to the patient, and the physician observes what other words the patient will give as the ones suggested to him by the first word The time consumed in this process is also noted.

assonance (*as'-o-nans*) [*assonare*, to respond to]. A morbid tendency to employ alliteration.

assuetude (*as'-sū-e-tūd*). Habituation to disturbing influences; the condition of the organism in which it has acquired such tolerance for a drug or poison that the effect it once had is lost.

assurin (*as -u-rin*), $C_{46}H_{97}N_2P_2O_9$. A name given by Thudichum to a complex substance occurring in brain tissue.

astasia (*ah-sta'-se-ah*) [ἀ, priv.; στάσις, standing]. Motor incoordination for standing. **a.-abasia,** a symptom consisting in inability to stand or walk in a normal manner. The person affected seems to collapse when attempting to walk.

astatic (*ah-stat'-ik*). Having no directive tendency. **a. needle,** an apparatus consisting of two needles of equal magnetic moments and exactly reversed in direction.

asteatosis (*as-te-at-o'-sis*) [ἀ, priv.; στέαρ, tallow; ὠδης, fulness]. 1. A deficiency or absence of the sebaceous secretion 2. Any skin disease (as xeroderma) characterized by scantiness or lack of the sebaceous secretion **a. cutis,** a condition of diminished sebaceous secretion, as the result of which the skin becomes dry, scaly, and often fissured.

aster (*as'-ter*) [ἀστήρ, a star]. 1. The stellate structure surrounding the centrosome. 2. The stellar group of chromosomes during karyokinesis.

astereognosis (*ah-ste-re-og-no'-sis*) [ἀ, priv.; στερεός, solid; γνῶσις, knowledge]. Inability to

recognize objects by the sense of touch, due to lesion in the central parietal lobule. Syn., *stereoagnosis*. Cf., *aphasia, tactile*.

asterion (*as-te -re-on*) [*aster*]. A point on the skull corresponding to the junction of the occipital, parietal, and temporal bones.

asternal (*ah-ster'-nal*) [ἀ, priv.; στέρνον, the breast-bone]. 1. Without a sternum. 2. Not connected with the sternum. **a. ribs,** the five lower pairs, because not joined directly to the sternum.

asternia (*ah ster'-ne-ah*) [see *asternal*] Absence of the sternum.

asteroid (*as'-ter-oid*) [*aster; εἶδος*, likeness]. 1. Stellate. 2. See *astrocyte*.

asterol (*as'-ter-ol*). Trade name of a preparation of paraphenolsulphonate of mercury and ammonium tartrate; it is used as a surgical antiseptic and bactericide.

asthenia (*ah-sthe'-ne-ah*) [ἀ, priv.; σθένος, strength]. Absence of strength; adynamia. Syn., *hypopsychia*. **a. pigmentosa,** Addison's disease.

asthenic (*ah-sthen'-ik*) [see *asthenia*]. Characterized by asthenia.

asthenogenia, asthenogenesis (*ah-sthen-o-je'-ne-ah, ah-sthen-o-jen'-es-is*) [*asthenia; γεννᾶν*, to produce]. The production of asthenia.

asthenometer (*ah-sthen-om'-et-er*) [*asthenia; μέτρον*, a measure]. An instrument for detecting and measuring asthenia; especially, a device for measuring muscular asthenopia.

asthenope (*as'-then-ōp*). A person suffering from asthenopia.

asthenopia (*ah-sthen-o'-pe-ah*) [*asthenia; ὤψ*, eye] Weakness of the ocular muscles or of visual power, due to errors of refraction, heterophoria, overuse, anemia, etc. **a., accommodative,** that due to hyperopia, astigmatism, or a combination of the two, producing strain of the ciliary muscle. **a., muscular,** that due to weakness, incoordination (heterophoria), or strain of the external ocular muscles. **a., nervous, a., retinal,** a rare variety, caused by retinal hyperesthesia, anesthesia, or other abnormity, or by general nervous affections. **a. tarsal,** that due to pressure of the eyelids on the cornea.

asthenopic (*ah-sthen-op'-ik*) [see *asthenopia*]. Characterized by asthenopia

asthenoxia (*as-then-ok'-se-ah*) [*asthenia; oxygen*]. Insufficient oxidation of the waste products of metabolism.

asthma (*as'-mah*) [*ἅσθμα*, panting]. A paroxysmal affection of the bronchial tubes characterized by dyspnea, cough, and a feeling of constriction and suffocation. The disease is probably a neurosis, and is due to hyperemia and swelling of the bronchial mucous membrane, with a peculiar secretion of a mucin-like substance. The attacks may be caused by direct irritation of the bronchial mucous membrane or by indirect or reflex irritation, as from the nose, the stomach, the uterus. When dependent upon disease of the heart, the kidneys, stomach, thymus, etc., it has been designated *cardiac, renal, peptic, thymic*, etc. **a., arthritic.** 1. That due to gout. 2. Angina pectoris. **a., bronchial.** Same as *asthma*. **a., cardiac,** paroxysmal dyspnea due to heart disease. **a. convulsivum.** Synonym of *asthma*. **a. crystals,** acicular crystals (Charcot-Leyden crystals) contained in the sputum of asthmatic patients. They are generally associated with eosinophil cells. **a. cultrariorum.** See *fibroid phthisis*. **a. dyspepticum,** asthma due to nervous reflexes through the vagus. **a., fuller's, a. fullorum,** a pulmonary affection due to inhaling particles of wool and dust in the manufacture of cloth. **a., grinders'.** See *fibroid phthisis*. **a., hay-.** See *hay-fever*. **a., intrinsic,** that due to direct irritation of the lungs. **a., marine.** See *beriberi*. **a., miller's.** See *laryngismus stridulus*. **a., miner's.** See *anthracosis*. **a. nervosum.** Synonym of *asthma* **a., organic,** asthma of cardiac origin. **a.-paper,** niter-paper. **a., paralytic bronchial,** a rare form attributed to a relaxed condition of the bronchioles **a., pneumobulbar,** See's term for a form attributed to pulmonary irritation transmitted to the bronchioles by reflexes through the vagus. **a. purulentum,** that due to an abscess in the respiratory passages. **a., renal,** a paroxysmal dyspnea sometimes occurring in the course of Bright's disease. **a., spasmodic.** See *asthma*. **a., thymic.** Synonym of *laryngismus stridulus*. **a. weed,** lobelia.

asthmatic (*az-mat'-ik*) [see *asthma*]. Relating to or affected with asthma

asthmaticoscorbutic (*az-mat-ik-o-skor-bū'-tik*) Relating to asthma and scurvy.

asthmatoid wheeze (*az'-mat-oyd hwēz'*). When there is a foreign body in the trachea or bronchus, if the physician places his ear in front of the patient's mouth during expiration a sound will be heard which resembles the wheezing of an asthmatic patient; it is said to be diagnostic of a foreign body in trachea or bronchus.

asthmatophthisis (*as-mat-o-tis'-is*) Pulmonary tuberculosis attended with asthma. Syn., *asthmatic phthisis*.

asthmatorthopnea, asthmorthopnea (*az-mat-or-thop'-ne-ah, az-mor-thop'-ne-ah*) [*asthma; orthopnea*]. Orthopnea due to asthma or respiratory obstruction located in the chest.

asthma-weed. Lobelia inflata.

asthmogenic (*az-mo-jen'-ik*) [*asthma; γεννᾶν*, to produce] Causing asthma.

asthmolysin (*az-mol'-is-in*) A mixture of the extracts of the suprarenal glands and of the hypophysis with some preservative; said to be serviceable in asthma. It is administered by hypodermic injection.

astigmagraph (*as-tig'-ma-graf*) [α, priv.; στίγμα, a point; γράφειν, to write]. An instrument for illustrating the phenomena of astigmatism.

astigmatic (*ah-stig-mat'-ik*) [*astigmatism*]. Pertaining to or affected with astigmatism.

astigmatism (*ah-stig'-mat-izm*) [ἀ, priv.; στίγμα, a point, because rays of light from a point are not brought to a point by the refractive media of the eye]. That condition of the eye in which rays of light from a point do not converge to a point on the retina. It is usually due to inequality of curvature of the different meridians of the cornea (*corneal astigmatism*), but may be caused by imperfections of the lens (*lenticular astigmatism*), unequal contraction of the ciliary muscle, or may perhaps be due to retinal imperfection. It may be *acquired* or *congenital*, and may complicate hyperopia or myopia, producing either *simple hyperopic astigmatism*, in which one principal meridian is emmetropic, the other hyperopic, or *compound hyperopic astigmatism*, in which both meridians are hyperopic, but one more so than the other. Complicating myopia we may in the same way have *simple myopic* or *compound myopic astigmatism*. In *mixed astigmatism* one principal meridian is

myopic, the other hyperopic. *Regular astigmatism* is when the two principal meridians are at right angles to each other; *irregular astigmatism* when different parts of a meridian have different refracting powers.

astigmatometer (*ah-stig-mat-om'-et-er*) [*astigmatism; μέτρον*, a measure]. An instrument for measuring the degree of astigmatism.

astigmia (*ah-stig'-me-ah*) See *astigmatism.*

astigmic (*ah-stig'mik*). See *astigmatic.*

astigmometer (*ah-stig-mom'-et-er*). See *astigmatometer*

astigmometry (*ah-stig-mom'-et-re*). The measurement of astigmatism.

astigmoscope (*ah-stig'-mo-skōp*). An instrument for measuring astigmatism.

astigmoscopy (*ah-stig-mos'-kop-e*). The measurement of astigmatism by the astigmoscope; the use of the astigmoscope.

astomatous (*ah-sto-mat-us*) [*ἀ*, priv.; *στόμα*, mouth]. In biology, without a mouth or aperture.

astomia (*ah-sto'-me-ah*) [*ἀ*, priv ; *στόμα*, a mouth]. The condition of having no mouth.

astomous (*ah-sto'-mus*). See *astomatous.*

astragalar (*as-trag'-al-ar*). Relating to the astragalus.

astragalectomy (*as-trag-al-ek'-to-me*) [*astragalus; ἐκτόμη*, excision]. Excision of the astragalus.

astragalocalcanean (*as-trag-al-o-kal-ka'-ne-an*). Relating to the astragalus and calcaneum.

astragalofibular (*as-trag-al-o-fib'-ū-lar*). Relating to the astragalus and the fibula.

astragaloscaphoid (*as-trag-al-o-skaf'-oid*). Relating to the astragalus and the scaphoid bone.

astragalotibial (*as-trag-al-o-tib'-e-al*). Relating to the astragalus and the tibia.

astragalus (*as-trag'-al-us*) [*ἀστραγάλος*, a die; the analogous bones of the sheep were used by the ancients as dice]. The ankle-bone, upon which the tibia rests.

Astragalus. A genus of leguminous plants from some varieties of which gum tragacanth is derived. *A mollissimus* is the loco-plant. The active principle of this plant has mydriatic properties.

astral (*as'-tral*). Pertaining to an aster.

astraphobia, astrapaphobia (*as-traf-fo'-be-ah, as-trap-af-o'-be-ah*) [*ἀστραπή*, lightning; *φόβος*, fear] Morbid fear of lightning.

astrict (*as-trikt'*) [see *astriction*]. To constrict or compress.

astriction (*as-trik'-shun*) [*astrictio; ad*, to; *stringere*, to bind]. Constipation or any condition resulting from the use of astringents.

astringency (*as-trin'-jen-se*) [*ad*, to; *stringere*, to bind] The quality of being astringent.

astringent (*as-trin'-jent*) [*ad*, to; *stringere*, to bind]. 1. Causing contraction; binding. 2. An agent producing contraction of organic tissues, or that arrests hemorrhages, diarrhea, etc.

astro- (*as-tro-*) [*ἄστρον*, a star]. A prefix meaning star or star-shaped.

astroblast (*as'-tro-blast*) [*astro-; βλαστός*, a germ]. A variety of glia-cell less differentiated than the endymal cell and astrocytes.

astrocyte (*as'-tro-sīt*) [*astro-; κύτος*, cell]. 1. One of the cells derived from the endyma of the embryonic cerebrospinal canal that, in the course of development, wander toward the periphery, undergo modification, and form one of the two chief divisions of glia-cells, the other divisions being the original endymal cells. Syn., *Deiters' cells.* 2. A stellate bone-corpuscle.

astroid (*as'-troid*) [*ἄστρον*, a star; *εἶδος*, resemblance]. 1. Star-shaped. 2. An astrocyte.

astrokinetic (*as-tro-kin-et'-ik*) [*astro-; κινεῖν*, to move] Applied to the phenomena of motion as exhibited by the centrosomes of cells.

astrophobia (*as-tro-fo'-be-ah*) [*ἄστρον*, a star; *φόβος*, fear]. Fear of the stars and celestial space.

astrophorous (*as-trof'-or-us*) [*ἄστρον*, a star; *φερεῖν*, to bear]. Having stellate processes.

astrosphere (*as'-tro-sfēr*) [*astro-; σφαῖρα*, sphere]. 1. The radially arranged protoplasmic filaments surrounding the centrosome in a dividing cell. 2. The central mass of the aster, exclusive of the filaments or rays, in which the centrosome lies. 3. The entire aster exclusive of the centrosome. See *centrosphere* and *sphere of attraction.*

astrostatic (*as-tro-stat'-ik*) [*astro-; ἱστάναι*, to stand]. Applied to the resting condition of the centrosomes of cells.

Asturian (*as-tū'-re-an*). Relating to Asturia, an old province of Spain. **A. rose.** 1. Pellagra. Syn , *rosa asturica, rosa asturiensis.* 2. Leprosy.

astyclinic (*as-ti-klin'-ik*) [*ἄστυ*, city; *clinic*]. Same as *polyclinic.*

astysia (*ah-stiz'-e-ah*) [*ἀ*, priv.; *στύειν*, to make erect]. Incomplete power to erect the penis.

asurol (*as'-u-rol*). A preparation containing mercury and sodium amido-oxybutyrate; it is used in syphilis.

asyllabia (*ah-sil-a'-be-ah*) [*ἀ*, priv.; *συλλαβή*, a syllable] A condition in which individual letters are recognized, but the formation of syllables and words is impossible.

asylum (*as-ī'-lum*) [L., "a place of refuge"]. An institution for the support, safe-keeping, cure, or education of those incapable of caring for themselves, such as the insane, the blind, etc. **a. ear.** See *hæmatoma auris* under *hematoma.*

asymbolia (*ah-sim-bo'-le-ah*) [*ἀ*, priv.; *σύμβολον*, symbol]. The loss of all power of communication, even by signs or symbols.

asymmetric carbon atom (*as-im-et'-rik*). In stereochemistry, a carbon atom to which four different univalents are attached.

asymmetry (*ah-sim'-et-re*) [*ἀ*, priv.; *σύμμετρία*, symmetry]. 1. Unlikeness of corresponding organs or parts of opposite sides of the body that are normally of the same size, etc., *e. g., asymmetry* of the two halves of the skull or brain. 2. The linking of carbon atoms to four different groups; the combination of carbon atoms with different atoms or atomic groups **a., meridional.** See under *astigmatism.* **a., unilateral.** See *hemihypertrophy.*

asymphytous (*ah-sim'-fit-us*). Distinct; not grown together.

asynchronism (*ah-sin'-kron-izm*) [*ἀ*, priv.; *σύν*, with; *χρόνος*, time]. Absence of synchronism.

asynclitism (*ah-sin'-klit-izm*) [*ἀ*, priv.; *σύν*, together; *κλίσις*, an inclination]. The condition of obliquity of two or more objects to each other; *e. g.*, an oblique presentation of the fetal head at the superior strait of the pelvis.

asynechia (*ah-si-ne'-ke-ah*) [*ἀ*, priv.; *συνέχειν*, to hold together]. Absence of continuity in structure.

asynergia (*ah-sin-er'-je-ah*). Same as *asynergy.*

asynergic (*ah-sin-ur'-jik*). Not acting simultaneously or in harmony.

asynergy (*ah-sin'-er-jē*) [*ἀ*, priv.; *συνεργία*, cooperation]. Faulty coordination of the different organs or muscles normally acting in unison. **a., progressive locomotor, a., motorial.** See

ataxia, locomotor. **a., verbal,** defective coordination of speech, as in aphasia. **a., vocal,** faulty coordination of the muscles of the larynx due to chorea.

asynesia (*ah-sin-e'-ze-ah*) [ἀσυνεσία, stupidity]. Stupidity; loss or disorder of mental power.

asynetic, asynetous (*ah-sin-et'-ik, ah-sin'-et-us*). Affected with asynesia.

asynodia (*ah-sin-o'-de-ah*) [ἀ, priv.; συνοδία, a traveling together]. Sexual impotence.

asynovia (*ah-sin-o'-ve-ah*) [ἀ, priv.; *synovia*]. A deficiency of the synovial fluid

asynthesis (*ah-sin'-the-sis*) [ἀ, priv.; σύνθεσις, a putting together]. A faulty connection of parts.

asyntrophy (*ah-sin'-tro-fe*) [ἀ, priv.; συντροφία, a growing up together]. Absence of symmetry in growth and development.

asyphil (*as'-if-il*). Mercury atoxilate or arsanilate; used as an antisyphilitic

asystematic (*ah-sis-tem-at'-ik*) [ἀ, priv.; συστήμα, system]. Diffuse; not restricted to any one or several systems of nerve fibers; applied to nervous diseases that are general.

asystole, asystolia (*ah-sis'-to-le, ah-sis-to'-le-ah*) [ἀ, priv.; συστολή, a shortening] Imperfect contraction of the ventricles of the heart. **a., cardiataxic,** transitory asystole due to accelerated heart-action. **a., cardioplegic.** See *amyocardia.*

asystolic (*ah-sis-tol'-ik*) [see *asystole*]. Characterized by asystole.

asystolism (*ah-sis'-tol-izm*) [ἀ, priv.; συστολή, a shortening]. Inability of the right ventricle of the heart to empty itself of its contents, a condition encountered in the last stages of mitral incompetence. See *asystole.*

atactic (*at-ak'-tik*) [ἄτακτος, irregular]. Irregular; incoordinate. Pertaining to muscular incoordination, especially in aphasia

atactilia (*ah-tak-til'-e-ah*). Inability to recognize tactile impressions.

atavic (*at'-av-ik*) [*atavus,* a forefather]. Relating to or characterized by atavism.

atavism (*at'-av-izm*) [see *atavic*]. The reappearance of a peculiarity in an individual whose more or less remote progenitors possessed the same peculiarity but whose immediate ancestors did not present it.

atavistic (*at-av-is'-tik*). Same as *atavic.*

ataxaphasia (*at-aks-a-fa'-ze-ah*). Inability to arrange words synthetically into sentences.

ataxia (*at-aks'-e-ah*) [ἀταξία, want of order]. Incoordination of muscular action. **a., bulbar,** tabes due to a lesion in the pons or oblongata. **a., cerebellar, a., cerebral, a., spinal,** that due to disease of the cerebellum of the brain or of the spinal cord. **a. cordis.** See *delirium cordis.* **a., diphtheritic,** a sequel of diphtheria preceding diphtheritic paralysis, and in which the chief phenomena of locomotor ataxia are present. **a., family, a., Friedreich's, a., hereditary.** See *Friedreich's disease.* **a., hereditary cerebellar** (of Marie), a form of ataxia that resembles Friedreich's disease in being hereditary, occurring in families; the gait, however, is not the staggering gait of tabes, but the reeling gait of cerebellar disease; the knee-jerk is increased instead of being diminished, and there are no deformities. **a., locomotor,** a disease of the posterior columns of the spinal cord, characterized by static and motor ataxia, by fulgurant pains, girdle-sensation, Argyll Robertson pupil, disturbances of sensation and of the sphincters, and loss of the patellar reflex. Syn., *posterior spinal sclerosis; tabes dorsalis.* **a., moral,** the inconstancy of ideas and will, attended with convulsions and pain, observed in hysterical subjects. **a., motor,** inability to coordinate the muscles in walking. **a., paralytic, of the heart,** a condition marked by dyspnea, weakness of cardiac sounds, palpitation, edema, and dropsy, without any organic heart disease. **a., sensory,** a form regarded as due to disturbance of the nerve-tracts lying between the periphery and the centers of coordination; its existence is denied by some authorities. **a., spinal.** See *a., cerebellar.* **a., static,** the failure of muscular coordination in standing still, or in fixed positions of the limbs. **a., thermal,** peculiar large and irregular fluctuations of the body-temperature, due to a condition of incoordination or a disordered or weakened thermotaxic mechanism. This may give rise to the so-called *paradoxic* or *hysterical temperatures,* rising occasionally to 108° or 110° F., without grave or permanent injury. **a., vasomotor.** See *vasomotor ataxia.*

ataxiadynamia (*at-aks-e-ah-di-nam'-e-ah*) [*ataxia;* δύναμις, power]. Combined weakness and incoordination of muscles.

ataxiagram (*at-aks'-e-a-gram*) [*ataxia;* γράμμα, a marking] 1 A line drawn by a patient suffering with an ataxial disease. The patient's eyes are open or closed and he attempts to make a straight line. The character of the deviations from a straight line that result are conceived to have a certain diagnostic value. 2. The record made by an ataxiagraph.

ataxiagraph (*at-aks'-e-a-graf*) [*ataxia;* γράφειν, to write] A device for photographing tremors

ataxiamensia (*at-aks-e-am-ne'-ze-ah*) [*ataxia; amnesia*]. Muscular ataxia with loss of or impairment of memory.

ataxiameter (*at-aks-e-am'-et-er*) [*ataxia;* μέτρον, measure] An instrument for recording the swaying in ataxia, or postural sway.

ataxiamnesic (*at-aks-e-am-ne'-zik*). Affected with ataxia and amnesia.

ataxic (*at-aks'-ik*) [see *ataxia*]. 1. Pertaining to or affected with ataxia. 2. A person affected with ataxia. **a. aphasia.** See under *aphasia.* **a. fever.** See *typhus*

ataxoadynamia (*at-aks-o-ah-di-nam'-e-ah*). Adynamia combined with ataxia.

ataxodynamy (*at-aks-o-din'-am-e*) [*ataxia;* δύναμις, power] Abnormity in the movements of a part or organ.

ataxophemia (*at-aks-o-fe'-me-ah*) [*ataxia;* φήμι, to speak]. Lack of coordination in speech

ataxophobia (*at-aks-o-fo'-be-ah*) [ἀταξία, want of order; φόβος, fear]. 1. Excessive dread of disorder 2. Morbid dread of suffering from locomotor ataxia.

ataxospasmodic (*at-aks-o-spas-mod'-ik*). Affected with choreic ataxia or relating to it

ataxy (*at-aks'-e*). See *ataxia.*

-ate. A suffix to nouns in chemistry signifying any salt of an oxyacid having the termination *-ic;* as, *sulphate, phosphate.*

atelectasis (*at-el-ek'-tas-is*) [ἀτελής, imperfect; ἔκτασις, expansion]. Imperfect expansion or collapse of the air-vesicles of the lung. It may be present at birth, or may be acquired from diseases of the bronchi or lungs. **a., absorption,** acquired atelactasis in which the air has been removed by absorption from within, resulting from the plugging of the bronchial tubes. **a., compression,** acquired atelectasis due to pres-

sure. **a., obstructive,** that due to obstruction of a bronchial tube. See *a., absorption.*

atelectatic (*at-el-ek-tat'-ik*) [see *atelectasis*]. Relating to or characterized by atelectasis.

ateleiosis (*at-el-i-o'-sis*) [ἀτελείωσις, not arriving at perfection]. A disease characterized by abrupt onset, the absence of any perceptible cause, conspicuous infantilism with retention of unimpaired intelligence, and marked tardiness in development of the sexual system. Cf. *progeria.*

atelencephaly (*at-el-en-sef'-al-e*) [ἀτελής, incomplete; ἐγκέφαλος, brain]. Imperfect development of the brain.

atelia, ateleiosis (*at-e'-le-ah, at-e-li-o'-sis*) [ἀτέλεια, imperfection]. Persistence of the child's characteristics in the adult. Imperfect development. The word is compounded with others to designate the part affected, as *atelocardia,* etc., imperfect development of the heart, etc. **a., asexual,** that type in which the sexual organs are implicated. **a., sexual,** that type in which the sexual organs develop normally.

atelic (*at'-el-ik*) [ἀτελής, incomplete]. Functionless.

atelo- (*at-el-o-*). A prefix signifying imperfect development.

atelocardia (*at-el-o-kar'-de-ah*) [*atelo-*; καρδία, heart]. An imperfect or undeveloped state of the heart.

atelocephalous (*at-el-o-sef'-al-us*) [*atelo-*; κεφαλή, head]. Having the skull or head more or less incomplete.

atelocheilia (*at-el-o-ki'-le-ah*) [*atelo-*; χεῖλος, lip]. Defective development of a lip.

atelocheiria (*at-el-o-ki'-re-ah*) [*atelo-*; χείρ, hand] Defective development of the hand.

ateloencephalia (*at-el-o-en-sef-a'-le-ah*) [*atelo-*; ἐγκέφαλος, brain]. Incomplete development of the brain.

ateloglossia (*at-el-o-glos'-e-ah*) [*atelo-*; γλῶσσα, tongue]. Congenital defect in the tongue.

atelognathia (*at-el-og-na'-the-ah*) [*atelo-*; γνάθος, jaw]. Imperfect development of a jaw, especially of the lower jaw.

atelomyelia (*at-el-o-mi-e'-le-ah*) [*atelo-*; μυελός, marrow]. Congenital defect of the spinal cord.

atelopodia (*at-el-o-po'-de-ah*) [*atelo-*; πούς, foot]. Defective development of the foot.

ateloprosopia (*at-el-o-pro-so'-pe-ah*) [*atelo-*; πρόσωπον, face]. Incomplete facial development.

atelorrhachidia (*at-el-o-rak-id'-e-ah*) [*atelo-*; ῥάχις, spine]. Imperfect development of the spinal column, as in spina bifida.

atelostomia (*at-el-o-sto'-me-ah*) [*atelo-*; στόμα, mouth]. Incomplete development of the mouth.

athelasmus (*ah-thel-az'-mus*) [ἀ, priv.; θηλασμός, a suckling]. Inability to suckle, from defect or want of the nipples.

athelia (*ah-the'-le-ah*) [ἀ, priv.; θηλή, a nipple]. Absence of a nipple.

athermal (*ah-thur'-mal*) [ἀ, priv.; θέρμη, heat]. Cool; applied to spring-water of a temperature below 15° C.

athermancy (*ah-thur'-man-se*) [ἀθέρμαντος, not heated]. The state of being impervious to radiant heat.

athermanous (*ah-ther'-man-us*). Impervious to radiant heat.

athermic, athermous (*ah-ther'-mik, -mus*). 1. Without fever. 2. See *athermanous.*

athermosystaltic (*ah-ther-mo-sist-al'-tik*) [ἀ, priv.; θέρμη, heat; συσταλτικός, drawing together]. Applied to muscles which do not contract under the influence of heat.

atheroma (*ath-er-o'-mah*) [ἀθήρη, gruel; ὄμα, tumor]. 1. A sebaceous cyst containing a cheesy material. Syn., *acne sebacea molluscum; sebaceous cyst; steatoma.* 2. The fatty degeneration of the walls of the arteries in arteriosclerosis; by common usage the word is also applied to the whole process of arteriosclerosis. Arterial atheroma is also termed *atherosis.* **a., capillary,** the formation of fatty granules in the walls of the capillaries.

atheromasia (*ath-er-o-ma'-ze-ah*) [see *atheroma*]. Atheromatous degeneration; the condition of atheroma.

atheromatosis. A more or less generalized atheromatous condition of the arteries.

atheromatous (*ath-er-o'-mat-us*) [see *atheroma*]. Characterized by or affected with atheroma. **a. abscess.** See *abscess, atheromatous.* **a. ulcer,** an ulcer formed by the abscess breaking through the intima.

atherosclerosis (*ath-er-o-skle-ro'-sis*) [*atheroma; sclerosis*]. A form of arteriosclerosis with hyperplasia of the outer layers of the involved arteries and degeneration of the elastic layer.

atherosis (*ath-er-o'-sis*) [ἀθήρη, gruel]. A synonym of *atheroma* (2).

athetoid (*ath'-et-oid*) [*athetosis*]. Pertaining to or affected with athetosis. **a. spasm,** a spasm in which the affected member performs athetoid movements.

athetosis (*ath-et-o'-sis*) [ἀθετος, unfixed; changeable]. A condition most frequently occurring in children, and characterized by continual slow change of position of the fingers and toes. It is usually due to a lesion of the brain. It is also called "posthemiplegic chorea," from its occurrence after hemiplegia **a., double congenital.** See *paraplegia, infantile spasmodic.*

athlete's heart (ἀθλεῖν, to contend with]. A slight incompetency of the aortic valves, a condition sometimes found in athletes

athletic foot (*ath-let'-ik*) [*athlete*]. Ringworm of the foot

athrepsia, athrepsy (*ah-threps'-e-ah, ah'-threps-e*) [ἀ, priv.; τρέφειν, to nourish]. Malnutrition.

athreptic (*ah-threp'-tik*). Relating to athrepsia.

athymia (*ah-thi'-me-ah*) [ἀ, priv.; θυμός, spirit]. 1. Despondency. 2. Loss of consciousness. 3. Insanity. 4. Absence of the thymus gland.

athymic (*ah-thi'-mik*) [ἀ, priv.; θυμός, mind]. Affected with athymia.

athyrea, athyria (*ah-thi'-re-ah*) [ἀ, priv.; *thyroid*]. The condition arising from absence of the thyroid gland or suppression of its function. Syn., *myxedema.* Cf. *thyreoprivus.*

athyreosis (*ah-thi-re-o'-sis*). Atrophy or absence of the thyroid gland and the pathological condition consequent upon elimination of its function.

athyria. Same as *athyrea.*

athyroidea (*ah-thi-roid'-e-ah*). Absence of the thyroid gland.

athyroidation. Same as *athyrea, q. v*

athyroidea. Same as *athyrea, q. v.*

athyroidemia (*ah-thi-roid-e'-me-ah*). Myxedema.

athyroidism (*ah-thi'-roy-dism*). Same as *athyreosis* or *athyrea.*

athyrosis (*ah-thi-ro'-sis*). See *athyreosis.*

atlantad (*at-lan'-tad*) [See *atlas*]. Toward the atlas in situation or direction.

atlantal (*at-lan'-tal*) [See *atlas*]. Relating to the atlas.

atlanten (*at-lan'-ten*) [See *atlas*]. Belonging to the atlas in itself.

atlanto- (*at-lan'-to*) [See *atlas*]. A prefix signifying relation to the atlas; seen in the words atlanto-axial (relating to the atlas and the axis), atlanto-occipital, atlanto-odontoid, etc.

atlantoaxial (*at-lant-o-aks'-e-al*). See *atloaxoid.*

atlas (*at'-las*) ["Ατλας, a mythological Greek hero who was supposed to carry the earth on his shoulders]. The first of the cervical vertebræ It articulates with the occipital bone of the skull and with the axis.

atloaxoid (*at-lo-aks'-oid*). Relating to the bones termed the atlas and the axis.

atlodidymus (*at-lo-did'-im-us*). See *atlodymus.*

atlodymus (*at-lod'-im-us*) [See *atlas;* δίδυμος, double] A monstrosity with two heads on one neck and a single body

atloido- (*at-loi'-do*). In composition, the same as *atlanto;* seen in such examples as atloido-axoid, atloido-odontoid, etc.

atmiatria, atmiatrics. See *atmiatry.*

atmiatrics (*at-mi-at'-riks*) [see *atmiatry*]. Same as atmiatry, *q. v.*

atmiatry (*at-mi'-at-re*) [ἀτμίς, vapor, ἰατρεία, medical treatment]. Treatment of diseases of the lungs or mucous membranes by inhalation, fumigation, or by directing a current of vapor or gas upon the part.

atmic (*at'-mik*) [ἀτμίς, vapor]. Relating to, due to, or consisting of vapor.

atmidalbumin (*at-mid-al-bū'-min*) A substance standing between the albuminates and the albumoses, obtained by Neumeister at the same time with atmidalbumose

atmidalbumose (*at-mid-al-bū'-mōs*). Neumeister's name for a body obtained by the action of superheated steam on fibrin.

atmidiatrics (*at-mid-re-at'-riks*). Treatment of disease by vapor.

atmidometer (*at-mid-om'-et-er*). See *atmometer.*

atmidometrograph (*at-mid-o-met'-ro-graf*) [ἀτμός, vapor; μέτρον, a measure; γράφειν, to write]. A self-registering atmidometer.

atmidoscope (*at-mid'-o-skōp*) [ἀτμός, vapor; σκοπεῖν, to view]. See *atmometer.*

atmiometer (*at-mi-om'-et-er*). A closed cabinet with means for treating diseases by atmiatry.

atmismometer (*at-mis-mom'-et-ur*). See *atmometer.*

atmisterion (*at-mis-te'-re-on*). See *vaporarium.*

atmo- (*at-mo*) [ἀτμός, vapor; breath]. A prefix meaning vapor or breath.

atmocausia, atmocausis (*at-mo-kaw -se-ah, -sis*) [*atmo-;* καῦσις, a burning]. Therapeutic cauterization with steam by means of an atmocautery.

atmocautery (*at-mo-kaw'-ter-e*). An apparatus used in practising atmocausis.

atmograph (*at'-mo-graf*) [*atmo-;* γράφειν, to record]. A form of self-registering respirometer.

atmography (*at-mog'-raf-e*) [ἀτμός, vapor; γράφειν, to write]. A description of vapors and evaporation

atmokausis (*at-mo-kaw -sis*). See *atmocausis.*

atmology (*at-mol'-oj-e*) [ἀτμός, vapor; λόγος, science]. Science of vapors and evaporation.

atmolysis (*at-mol'-is-is*) [*atmo-;* λύσις, loosing]. A method of separating the ingredients of mixed gases or vapors by means of their different diffusibility through a porous substance

atmolyzer (*at-mol-i'-zur*). An apparatus for separating gases by diffusion.

atmometer, atmidometer (*at-mom'-et-er, at-mid-om'-et-er*) [*atmo-;* μέτρον, a measure]. An instrument for measuring the amount of water exhaled by evaporation from a given surface in a given time, in order to determine the humidity of the atmosphere.

atmos (*at'-mos*) [abbreviation of atmosphere]. A proposed unit of air pressure, being the pressure of one dyne on one square centimeter.

atmosphere (*at'-mos-fēr*) [*atmo-;* σφαῖρα, a sphere]. 1. The mixture of gases surrounding the earth to the height of about 200 miles. 2. The pressure exerted by the atmosphere at the level of the sea; it is about 15 pounds to the square inch, or 1 kilogram to the square centimeter. 3. In chemistry, any special gaseous medium encircling a body. 4 The climatic state of a locality.

atmospheric (*at-mos-fer'-ik*) [see *atmosphere*] Pertaining to the atmosphere. **a. moisture,** the vapor of water mingled with the atmosphere. It varies in quantity according to the temperature. **a. tension,** the pressure of the air per square inch on the surface of a body. Normally, at the sea-level, it is about 15 pounds per square inch, or equal to that of a column of mercury about 30 inches in height. It decreases about $\frac{1}{10}$ inch or $\frac{1}{20}$ pound per square inch for every 90 feet of altitude. Above 10,000 feet the rarity of the atmosphere is usually noticeable in quickened breathing and pulserate.

atmospherization (*at-mos-fer-iz-a'-shun*). The conversion of venous into arterial blood by the absorption of oxygen. Cf. *dearterialization*

atmotherapy (*at-mo-ther'-ap-e*) [*atmo-;* θεραπεία, therapy] 1 Pitres' name for the treatment of certain tics by methodic reduction of respiration. 2. The treatment of disease by vapor

atocia (*at-o'-se-ah*) [ἄτοκος, barren]. Sterility of the female.

atolin (*at'-ol-in*). Trade name of a preparation of liquid petrolatum.

atom (*at'-om*) [ἀ, priv., τέμνειν, to cut]. The ultimate unit of an element; that part of an element incapable of further division, or the smallest part capable of entering into the formation of a chemical compound, or uniting with another to form a molecule—which last is the smallest quantity of a substance that can exist free or uncombined. **a., primary,** electron.

atomic (*at-om'-ik*) [see *atom*]. Pertaining to atoms. **a. heat,** the specific heat of an atom of an element multiplied by its atomic weight. **a. number** of an element is the position or place number occupied by that element in the periodic table. **a. theory,** the theory of Dalton that all matter is composed of atoms, the weight of each atom differing for the different elements. **a. valence,** the saturating power of the atom of an element as compared with an atom of hydrogen. Syn., *equivalence.* **a. volume,** the atomic weight of an element divided by the density; it represents the volume in Cc. which would be occupied by the atomic weight of the element taken in Gm. **a. weight,** the weight of an atom of an element as compared with the weight of an atom of hydrogen.

atomicity (*at-om-is'-it-e*) [see *atom*]. 1. Chemical valence; quantivalence. 2. The number of OH groups is an alcohol or a base.

atomidine (*at-om'-id-ēn*) [*atomic; iodine*]. Trade name of an iodine compound said to "liberate iodine in an atomic state upon contact with the fluids of the body.

atomism (*at'-om-izm*) [ἀ, priv.; τέμνειν, to cut]. 1. The science of atoms. 2. The theory that the universe is composed of atoms.

atomist (*at'-om-ist*). One who believes in atomism.

atomistic (*at-om-is'-tik*). 1. Relating to or consisting of an atom. 2. Relating to atomism.

atomization (*at-om-iz-a'-shun*) [see *atom*]. The mechanical process of breaking up a liquid into fine spray.

atomizer (*at'-om-i-zer*) [see *atom*]. An instrument for transforming a liquid into a spray.

atomology (*at-om-ol'-o-je*) [*atom*; λόγος, science]. The science of atoms; atomism.

atomy (*at'-om-e*) [from *anatomy*, *an* being regarded as an article]. A skeleton.

atonia (*at-o'-ne-ah*) [ἀτονία, want of tone]. Atony.

atonic (*at-on'-ik*) [*atony*]. Relating to or characterized by atony.

atonicity (*at-on-is'-it-e*). Lack of tone, atony.

atony (*at'-o-ne*) [ἀ, priv.; τόνος, tone]. Want of tone. Debility. Loss or diminution of muscular or vital energy.

atopen (*at'-o-pen*). An allergen.

atophan (*at'-o-fan*). Trade mark identifying the original phenylcinchoninic acid, or 2-phenylquinolin-4-carboxylic acid. Said to increase elimination of uric acid in gout and rheumatism.

atopic (*ah-top'-ik*) [ἀ, priv.; τόπος, place]. Out of place

atopognosia (*at-o-pog-no'-ze-ah*) [ἀ, priv; τοπος, place; γνῶσις, knowledge]. Lack of ability to accurately locate a sensation or stimulus.

atopomenorrhea (*at-o-po-men-or-e'-ah*) [ἄτοπος, out of plate; μήν, month; ῥέειν, to flow]. Vicarious menstruation.

atopy (*at'-o-pe*). The condition of being sensitive to an allergen.

atoxic (*ah-toks'-ik*) [ἀ, priv; τόξικον, poison]. Not venomous; not poisonous.

atoxifil (*at-oks'-if-il*). An organic compound containing arsenic and mercury.

atoxogen (*ah-toks'-o-jen*) [ἀ, priv.; τόξικον, poison; γεννᾶν, to produce] A defensive substance resembling the enzymes and chemically allied to toxins and antitoxins prepared from the adrenals and spleen of the horse

atoxyl (*at-oks'-il*), $C_6H_4 NH_2 AsO(OH)_2$, a compound of arsenic acid and aniline, used in skin-diseases and in sleeping-sickness.

atrabiliary (*at-rah-bil'-e-a-re*) [*atra*, black; *bilis*, bile]. Pertaining to black bile, gloomy, melancholic. **a. capsules**, an old name for the suprarenal capsules.

atrabilin (*at-rah-bil'-in*). A preparation of suprarenal capsule; it has a hemostatic and vasoconstrictor action.

atrachelia (*ah-trak-e'-le-ah*) [ἀ, priv.; τράχηλος, the neck]. Having little or no neck.

atrachelocephalus (*ah-trak-el-o-sef'-al-us*) [ἀτράχηλος, without a neck; κεφαλή, the head]. 1. Affected with atrachelia. 2. A monster with no neck or an abnormally short one.

atrachelous (*ah-trak'-el-us*). Having no neck or only a very short one; also, beheaded.

atractenchyma (*ah-trakt-en'-ki-mah*) [ἄτρακτος, a spindle; ἐγχεῖν, to pour in]. Spindle-cell tissue.

atractoid (*ah-trakt'-oid*). Spindle-shaped.

atramental (*at-ram-en'-tal*) [*atramentum*, ink]. Of an inky-black color.

atremia (*ah-tre'-me-ah*) [ἀ, priv.; τρέμειν, to tremble]. 1. An absence of tremor. 2. Hysterical inability to walk, stand, or sit without general discomfort and paresthesia of the head and back, all movements being readily executed in the recumbent posture. Syn., *Neftel's disease*.

atrepsy (*ah'-trep-se*) [ἀ, priv.; τρέφειν, to nourish]. Ehrlich's term for immunity to tumor cells produced by the absence of the particular nourishment needed for the growth of tumors.

atreptic (*ah-trep'-tik*) [see *atrepsy*]. Pertaining to atrepsy.

atresia (*ah-tre'-ze-ah*) [ἀ, priv., τρῆσις, perforation]. Imperforation or closure of a normal opening or canal, as of the anus, vagina, meatus auditorius, pupil, etc.

atresic (*ah-tre'-zik*) [see *atresia*]. Characterized by atresia.

atretic (*ah-tret'-ik*). Same as *atresic*.

atreto- (*ah-tre-to-*) [ἄτρητος, imperforate]. A prefix meaning imperforate.

atretoblepharia (*at-ret-o-blef-a'-re-ah*) [*atreto-*; βλέφαρον, eye-lid]. Symblepharon, *q. v.*

atretocephalus (*ah-tret-o-sef'-al-us*) [*atreto-*; κεφαλή, the head]. A monster with imperforate nostrils or mouth.

atretocormus (*ah-tret-o-kormus*) [*atreto-*; κορμός, the trunk]. A monster having one or more imperforate openings on the trunk.

atretocystia (*at-ret-o-sis'-te-ah*) [*atreto-*; κύστις, bladder]. Atresia of the bladder.

atretogastria (*ah-tret-o-gas'-tre-ah*) [*atreto-*; γαστήρ, stomach]. Imperforation of the cardiac or pyloric orifice of the stomach

atretolemia (*ah-tret-o-le'-me-ah*) [*atreto-*; λαιμός, the gullet]. Imperforation of the esophagus or pharynx.

atretometria (*at-ret-o-me'-tre-ah*) [*atreto-*; μήτρα, womb]. Atresia of the uterus.

atretopsia (*at-ret-op'-se-ah*) [ἄτρητος, imperforate; ὤψ, eye]. Imperforation of the pupil.

atretorrhinia (*ah-tret-or-rin'-e-ah*) [*atreto-*; ῥις, the nose]. Nasal atresia.

atretostomia (*ah-tret-o-sto'-me-ah*) [*atreto-*; στόμα, the mouth]. Imperforation of the mouth.

atreturethria (*ah-tret-u-re'-thre-ah*) [*atreto-*; οὐρήθρα, the urethra]. Imperforate urethra.

atria. Plural of *atrium*. **a. mortis**, the halls of death (*i. e.*, the heart, lungs, and brain).

atrial (*a'-tre-al*) [*atrium*, the fore-court, or hall]. Relating to an atrium.

atricha (*ah'-trik-ah*) [ἀ, priv.; θρίξ, hair]. A group of bacteria having no flagella.

atrichia, atrichiasis (*ah-trik'-e-ah, ah-trik-i'-as-is*) [ἀ, priv.; θρίξ, hair]. Absence of the hair.

atrichosis (*ah-trik-o'-sis*) [see *atrichia*]. A condition characterized by absence of hair.

atrioventricular (*a-tre-o-ven-trik'-u-lar*) [*atrium*, hall, *ventriculus*, ventricle]. Relating both to the atrium (or auricle) and to the ventricle of the heart.

atriplicism (*at-rip'-lis-izm*) [*Atriplex*, a genus of plants]. A form of poisoning from eating uncooked spinach, *Atriplex littoralis*. It is characterized by painful infiltration of the backs of the hands and forearms and a sensitiveness to light.

atrium (*a'-tre-um*) [L., "the forecourt or hall"]. 1. The auricle of the heart. 2. The part of the tympanic cavity of the ear below the head of the malleus. **a. anterius**, the right auricle of the heart. **a. cordis**, the auricle of the heart. **a. cordis dextrum**, the right auricle of the heart. **a. cordis posterius**, the left auricle of the heart. **a., infection-**, the point of entrance of the bacteria in an infectious disease. **a. vaginæ**, the vestibule of the vulva.

atrolactyl (*at-ro-lak'-til*), $C_9H_{10}O_2$. The radical of atrolactic acid. **a.-tropein.** See *aconitine*. *British*.

Atropa (*at'-ro-pah*) ["Ατροπος, "she who turns not;" undeviating; one of the three Fates who cut the thread of life—in allusion to the poisonous effects of the plant]. A genus of the natural order *Solanaceæ*. See *belladonna* and *atropine*.

atrophia (*at-ro'-fe-ah*). See *atrophy*.

atrophic (*at-ro'-fik*) [*atrophy*]. Pertaining to or affected with atrophy.

atrophied (*at'-ro-fid*) [ἀ, priv ; τροφή, nourishment]. Wasted; affected with atrophy.

atrophite (*at'-ro-fīt*) [ἀ, priv.; τροφή, nourishment]. A cell without any reserve food-substance.

atrophoderma (*at-ro-fo-der'-mah*). See *atrophy of the skin*. **a. pigmentosum.** See *xeroderma pigmentosum*.

atrophodermatosis (*at-ro-fo-der-mat-o'-sis*) [*atrophy;* δέρμα, the skin]. A class of skin diseases, including atrophoderma, ulodermitis, and scleroderma, characterized by atrophy of the cutis.

atrophodermia. Atrophoderma.

atropholysis (*at-ro-fol'-is-is*) [*atrophy;* λύσις, a loosing]. A flabby, weak, or ulcerated condition due to insufficient nutrition

atrophy, atrophia (*at'-ro-fe, at-ro'-fe-ah*) [ἀτροφία, atrophy]. 1. Diminution in the size of a tissue, organ, or part, the result of degeneration of the cells or a decrease in the size of the cells 2 To become atrophied. **a., accidental,** that of a part from compression or cutting off its blood-supply. **a., acute yellow.** See *icterus gravis*. **a., angibromic,** decrease in the size of the lumen of the alimentary canal **a., brown,** a form of atrophy in which the normal pigment of the organ is retained, and in which there is also frequently the addition of new pigment. It occurs most frequently in the heart, muscles, and liver, and is caused by chronic congestion. Syn., *pigmented atrophy*. **atrophia cachochymica,** that due to indigestible food **a., cardiac,** atrophy of the heart following senile changes, or occurring in cachectic conditions, or as a result of pressure exerted by mediastinal tumors, etc. Syn , *atrophia cordis*. **a., chronic spinal muscular.** See *a., progressive muscular*. **a. compression,** atrophy of a part from constant compression. **a., concentric,** that proceeding from without inward and tending to lessen the capacity of a hollow organ. **a., correlated,** an atrophy of certain portions of the body following the removal or destruction of other portions. Thus, amputation of an arm will be followed by an atrophy of the scapula; of a leg, by atrophy of the corresponding os innominatum. **a., cyanotic** (of the liver), atrophy of the parenchyma of the hepatic lobules due to stasis in the venous circulation, causing dilatation and congestion of the central veins and adjacent capillaries. **a., degenerative,** that due to degeneration of the cells. **a., eccentric,** that proceeding from within toward the periphery. **a., granular,** a form observed in the liver and kidneys, causing diminution in size and attended with excess in formation of connective tissue, with copious supply of granular matter. **a., granuloproteic,** that due to replacement of proper cell-structure with fine granular masses. **a., gray,** a degenerative change in the optic disc in which the latter assumes a grayish color **a., halisteretic,** atrophy of bone manifested only by gradual thinning of the lamellæ of the spongy tissue. **a., idiopathic muscular,** muscular wasting, beginning in various groups of muscles, usually progressive in character, and dependent on primary changes in the muscles themselves. There is a strong hereditary predisposition to the disease. **a., inanition,** emaciation from diarrhea. **a., individual,** Charcot's name for atrophy of individual muscles in different parts, the proximate muscles not being affected **a., infantile,** tabes mesenterica (*q. v*). Syn., *atrophia infantum; atrophia mesenterica*. **a., muscular,** atrophy affecting muscles; it may be hereditary or acquired, idiopathic, myelopathic, myopathic, neuropathic, primary, secondary, simple, or progressive. **a. of the nails,** onychatrophia. Syn., *atrophia unguis*. **a., necrobiotic, a., numerical,** atrophy of a part with destruction of some of its elements. **atrophia nervea,** atrophy of the nerves. **atrophia nervosa,** gradual emaciation, with loss of appetite, due to unwholesome and depressing environment. **a., pigmentary, a., pigmented,** a form of atrophy so called from a deposit of pigment (yellow or yellowish-brown) in the atrophied cells. **atrophia pilorum propria,** atrophy of the hair, either symptomatic or idiopathic in origin **a., progressive facial,** a condition characterized by progressive wasting of the skin of the face. Syn., *atrophia nova facialis*. **a., progressive muscular,** a chronic disease characterized by progressive wasting of individual muscles or physiological groups of muscles, and by an associated and proportional amount of paralysis. It is due to a degeneration and atrophy of the multipolar cells in the anterior gray horns of the cord, with consecutive degeneration of the anterior nerve-roots and muscles. The right hand is usually the part first attacked, and takes on a peculiar claw-like form (*main-en-griffe*). The disease is most frequent in males of adult life, and follows excessive muscular exertion Syn., *chronic anterior poliomyelitis; wasting palsy* **a., progressive nervous,** Jaccoud's name for atrophy of the spinal nerve-roots due to pressure from a deposit of fibrous substance on the spinal arachnoid **a., progressive unilateral facial,** a disease characterized by progressive wasting of the skin, connective tissue, fat, bone, and more rarely the muscles of one side of the face. It is most common in females; its course is slow and generally progressive **a., qualitative,** degeneration. **a., quantitative.** See *a., simple*. **a., red,** a form of atrophy due to chronic congestion, as seen in the liver in mitral and tricuspid valvular lesions. **a., sclerotic,** a name for connective tissue found at times deposited in the heart-substance after myocarditis. **a., senile,** the physiological atrophy of advanced life. It affects the lungs, the sexual and other organs. **a., senile, of the skin,** an atrophy of the skin usually associated with general signs of senile degeneration. Syn., *atrophia cutis senilis; senile atrophoderma*. **a., serous,** atrophy associated with an infiltration of fluid into the atrophic tissues. **a., simple,** that due to a decrease in the size of individual cells. **a., simple brown,** a condition of the heart in which the muscle-fibers retain their striated appearance, but the muscle-cells are small and contain yellow granules of pigment. **a. of the skin,** atrophy characterized by diminution or disappearance of certain of the elements of the skin: especially seen in advanced age. The skin becomes thin, loose, wrinkled, and discolored. Syn., *atrophia cutis; atrophoderma*. **a., sympathetic,** atrophy of the second member of a pair

of organs, following that of the first. **a., trophoneurotic,** that dependent upon abnormality of the nervous supply of an organ or tissue, best illustrated in muscular atrophy from disease of the anterior horns of the spinal cord. **atrophia verminosa,** emaciation due to intestinal worms. **a., white,** nerve atrophy, leaving only white connective tissue.

atropia (*at-ro'-pe-ah*). See *atropine.*

atropic (*at-rop'-ik*). Relating to the genus *Atropa* or to atropine.

atropine, atropina (*at'-ro-pēn, at-ro-pi'-nah*) ["Ατροπος, one of the Fates who cut the thread of life], $C_{17}H_{23}NO_3$. The *atropina* of the U. S. P. is a crystalline alkaloid derived from *Atropa belladonna.* It is a mydriatic, antispasmodic, and anodyne; in small doses a cardiac, respiratory, and spinal stimulant; in large doses a paralyzant of the cardiac and respiratory centers, the spinal cord, motor nerves, and involuntary and voluntary muscles It lessens all the secretions except the urine. In full doses it produces dryness of the throat, flushing of the face, dilatation of the pupils, a rise of temperature, and sometimes an erythematous rash. It is extensively used in ophthalmic practice to dilate the pupil, to paralyze accommodation, and also in various corneal, irritic, and other ocular diseases. Its therapeutic use in general medicine is also manifold; *e. g.*, in inflammatory affections and the pain of cerebral and spinal hyperemia, atonic constipation, cardiac failure, hypersecretions, especially of the sweat, to relieve local spasms, as in intestinal and biliary colic, in asthma, whooping-cough, etc., and as a physiological antagonist in opium-poisoning. **a. borate,** $(C_{17}H_{23}NO_3)_2B_4O_7$, is used in ophthalmic practice **a. hydrobromide,** $C_{17}H_{23}NO_3HBr$, white crystals, soluble in water and in alcohol. It is used as is atropine. **a. hydrochloride,** $C_{17}H_{23}NO_3HCl$, white crystals, soluble in water and alcohol, slightly in ether. Used in the same manner as atropine. Dose $\frac{1}{100}$–$\frac{1}{64}$ gr. (0 0006–0 001 Gm.). **a., lamellæ of** (*lamellæ atropinæ,* B P), each contains $\frac{1}{5000}$ gr. (0 000013 Gm) atropine. **a. oleate** (*oleatum atropinæ,* U. S. P.), a 2 % solution of atropine in oleic acid; it is a mydriatic, sedative, and anodyne, and is used as an inunction in cases in which remedies cannot be administered by the mouth. **a. salicylate,** $C_{17}H_{23}NO_3C_7H_6O_3$, a colloidal mass, used as is atropine. **a. santonate,** a compound of atropine and santonic acid, recommended as a mydriatic. **a. santoninate,** $C_{17}H_{23}O_3C_{15}H_{20}O_4$, is used in ophthalmic practice **a. stearate,** $C_{17}H_{23}NO_3C_{17}H_{35}CO.OH$, fine white needles, greasy to the touch, melting at 120° C., beginning to decompose at 170° C., and containing 50 43 % of atropine. It is soluble in ether and in alcohol. Applied in 1:500 oily solution as a substitute for oil of belladonna or oil of hyoscyamus. **a. sulphate** (*atropinæ sulphas,* U. S. P.), the most frequently used preparation of atropine, is a white powder, of bitter taste and neutral reaction, and is soluble in water. Dose $\frac{1}{120}$–$\frac{1}{60}$ gr. (0 00036–0 008 Gm.) **a. sulphate, solution of** (*liquor atropinæ sulphatis,* B. P.). Dose 1–6 min. (0.065–0.4 Cc.). **a. tartrate,** $(C_{17}H_{23}NO_3)_2C_4H_6O_6$, is used as is atropine.

atropinism (*at'-ro-pin-izm*). See *atropism.*

atropinization (*at-ro-pin-i-za'-shun*). The production of the physiological effect of belladonna.

atropinize (*at'-ro-pin-īz*) [*atropine*]. To bring under the influence of, or to treat with, atropine.

atropism (*at'-ro-pizm*). Poisoning with, or the morbid condition induced by, atropine.

atroscine (*at'-ros-ēn*), $C_{17}H_{21}NO_4$. An alkaloid isomeric with hyoscine, obtained from *Scopolia carniolica.* It has a higher rotatory power than hyoscine, and is from 2 to 4 times stronger in mydriatic action Syn., *atrosia.*

attaint (*at-aint'*) [*attingere,* to touch by striking]. An injury to a horse's leg caused by overreaching

attar (*at'-ar*) [Ar., *'atar,* perfume]. A general name for any of the volatile oils. **a. of rose,** oil of rose. The volatile oil distilled from the fresh flowers of the Damascene rose. It comes mainly from eastern Rumelia, and is generally adulterated with other volatile oils. It is used as a perfume.

attendant (*at-en'-dant*) [*attendere,* to wait upon]. A nonprofessional attaché of an asylum or hospital.

attention (*at-ten'-shun*). The direction of the will or thought upon an object or to a particular sensation. **a., central,** the "imagination" or mental remaking of the image by the mind when the peripheral visual attention is abrogated **a., compound synchronous,** in this the consciousness recognizes and correlates or combines multiple streams of synchronous and diverse stimuli, visual, auditory, etc. **a., multiple synchronous auditory,** two or more synchronous tones or sounds or lines of such tones or sounds are recognized by consciousness. **a., multiple synchronous central visual,** the imagining or mental reproduction of multiple synchronous visual trains without the objectively formed images. **a., multiple synchronous visual,** that when the attention recognizes two or more discrete sets of retinal images at the same time. **a., single-stream auditory,** that when a monotone, a sound, or series of single notes or sounds, is listened to, exclusive of others. **a., single-stream central,** that when the central visual attention, without objectively forming images, follows the passing of imagined single or unitary images in single file. **a., single-stream central auditory,** that without the objective audition. **a., single-stream visual,** that form of visual attention existing when the eyes follow a linear concatenation of single or unitary macular images to the exclusion of all others **a., visual,** that existing when the eyes, consciously, observe a fixed or moving object.

attenuant (*at-en -ū-ant*) [*attenuare,* to make thin]. 1. A medicine or agent increasing the fluidity or thinness of the blood or other secretion. 2. A diluent. 3. Lessening the effect of an agent.

attenuated (*at-en'-ū-a-ted*). Wasted; thinned. **a. virus,** a weakened virus.

attenuating (*at-en'-u-a-ting*) [see *attenuant*]. Making thin.

attenuation (*at-en-u-a'-shun*) [see *attenuant*]. The act of making thin; a thinning, narrowing, or reduction of the strength or size of a substance, especially the weakening of the pathogenic virulence of microorganisms by successive cultivation, by exposure to light, air, heat, or other agency, or by passing through certain animals, so that they may be used as a vaccine to confer immunity from future attacks of the disease. **a., Sanderson's method of,** the passing of virus through the system of another animal (*e. g.,* the guinea-pig, in anthrax) so that it becomes modified in virulency.

attic (*at'-ik*). Part of the tympanic cavity situated above the atrium. **a. disease,** chronic suppurative inflammation of the attic of the tympanum.

atticoantrotomy (*at-ik-o-an-trot'-o-me*) [*attic; antrum; τέμνειν*, to cut]. The opening of the attic and mastoid process.

atticomastoid (*at-ik-o-mas'-toid*). Relating to the attic and the mastoid.

atticotomy (*at-ik-ot'-om-e*) [*attic; τέμνειν*, to cut]. Surgical incision of the attic.

attitude (*at'-e-tūd*). See *posture.* **a., crucifixion,** in hysteroepilepsy, a rigid state of the body, the arms stretched out at right angles. **a. of fetus,** the relation of its parts to one another. **a., frozen,** a peculiar stiffness of the gait characteristic of disease of the spinal cord, especially of amyotrophic lateral sclerosis. **a., passionate,** the assumption of a dramatic or theatrical expression, a position assumed by some hysterical patients

attollens (*at-ol'-enz*) [*attollere*, to rise up]. Raising. **a. aurem,** a muscle raising the external ear.

attraction (*at-rak'-shun*) [*attrahere*, to draw to]. The tendency of one particle of matter to approach another; affinity. As existing between masses, it is termed *gravitation*, while *molecular attraction* or *cohesion* expresses the force aggregating molecules. **a., capillary,** the force that causes liquids to rise in fine tubes or between two closely approximated surfaces, or on the sides of the containing vessel. **a., chemical,** the attraction of affinity, relates to the attraction of atoms of one element to those of others, resulting in chemical compounds. **a., electric,** the tendency of bodies toward each other when charged with opposite electricities. **a., magnetic,** the influence of a magnet upon certain metallic substances, chiefly iron. **a. sphere,** the central mass of the aster in karyokinesis.

attrahens (*at'-ra-henz*) [L., "drawing"]. Drawing forward, as *attrahens aurem*, a muscle drawing the ear forward and upward.

attrahent (*at'-ra-hent*) [*attrahens*, drawing]. 1. Drawing to; adducent. 2 A drawing application; an epispastic or rubefacient.

attrition (*at-rish'-un*) [*atterere*, to rub against]. 1. An abrasion or chafing of the skin. 2. Any rubbing or friction that breaks or wears the surface.

attritin (*at'-rit-in*). Trade name of a 17.5% solution of sodium salicylate, used in rheumatic affections of joints and muscles.

at. wt. Abbreviation of *atomic weight.*

atypical (*ah-tip'-ik-al*) [*ἀ*, priv.; *τύπος*, a type]. Irregular; not conformable to the type. **a. fever,** an intermittent fever with irregularity of the paroxysm.

A. u. Abbreviation of *Ångstrom's unit.*

Au. Chemical symbol of the element gold. See *aurum.*

auante (*aw-an'-te*) [*αὐαλνειν*, to dry]. A wasting or atrophy.

auantic (*aw-an'-tik*) [*αὐαντικός*, wasted]. Characterized by wasting; atrophic.

Aubert's phenomenon (*o-bair'*). An optical illusion by which, when the head is inclined to one side, a vertical line is made to appear oblique toward the opposite side.

auchen (*aw -ken*) [*αὐχήν*, the neck]. The neck or throat, or the constricted part of any organ.

aucheniatria (*aw-ken-e-at'-re-ah*) [*αὐχήν*, the throat; *ἰατρεία*, a healing]. The therapy of throat diseases.

AuCl₃. Auric chloride.

audiclave (*aw'-dik-lav*). An instrument for aiding hearing

audiometer (*aw-de-om'-et-er*) [*audire*, to hear; *μέτρον*, a measure]. An instrument for measuring the acuteness of hearing.

audiometry (*aw-de-om'-et-re*) [*audire*, to hear; *μέτρον*, a measure]. The measurement, or testing, of the sense of hearing.

audiphone (*aw'-dif-ōn*) [*audire*, to hear; *φωνή*, a sound]. An instrument for improving the power of hearing by conveying sounds through the bones of the head to the labyrinth.

audition (*aw-dish'-un*) [*audire*, to hear]. The act of hearing. Syn., *acoesis; acousia; acusis.* **a. colorée,** color-hearing, a peculiar association between the auditory and optic nerves, by which a certain sound or musical note will give rise to a subjective sensation of color, the same note in the same person being always associated with the same color. Syn., *chromatic audition.* **a. contre,** the perception by one ear of the vibrations of a tuning-fork placed on the mastoid process on the other side.

auditory (*aw'-dit-or-e*) [see *audition*]. Pertaining to the act or the organs of hearing. **a. aftersensations,** the sensations of sounds continuing or occurring after the cessation of the stimulus. **a. amnesia.** See *mind-deafness.* **a. area,** the cerebral center for hearing, probably located in the temporosphenoidal lobe. **a. aura,** an auditory sensation preceding an attack of epilepsy. **a. capsule,** the primitive auditory organ, formed by the invagination of the nervous stratum of the epiblast. **a. center.** Same as *a. area.* **a. dysesthesia.** Same as *dysacusis, q. v* **a. eminence,** the prominent part of the floor of the fourth ventricle, lying between the inferior and superior fovea. **a. field,** the area within which a sound may be heard **a. hairs,** the processes of the crista acustica. **a. meatus** (external and internal), the external and internal canals or openings of the ear. **a. nerve,** the eighth cranial nerve, supplying the internal ear; formerly the *portio mollis* of the seventh pair of cranial nerves. **a. nuclei,** the nuclei in the oblongata giving rise to the auditory nerves. **a. ossicles,** the chain of small bones of the middle ear **a. pit,** the depression in the epiblast on both sides of the embryonic after-brain, destined to form the labyrinth of the ear. **a. teeth,** tooth-like tubercles in the cochlea of the ear. **a. vertigo,** dizziness due to pathological conditions of the ear. See *Ménière's disease.* **a. vesicle,** the ectodermal sac from which is developed the membranous labyrinth.

auditus (*aw-di'-tus*) [L.]. Hearing; the sense or power of hearing.

Auenbrugger's sign (*ow'-en-broog-er*) [Leopold *Auenbrugger*, Austrian physician, 1722–1809]. Bulging of the epigastric region in cases of extensive pericardial effusion.

Auer's bodies (*ow'-er*) [John *Auer*, American physician, 1875–]. Rod-like bodies seen in the lymphocytes in leukemia.

Auerbach's ganglia (*ow'-er-bakh*) [Leopold *Auerbach*, German anatomist, 1828–1897]. The ganglionic nodes in Auerbach's plexus. **A.'s plexus,** plexus myentericus, a nerve-plexus found between the circular and longitudinal muscular coats of the stomach and intestine, and consisting of a network of pale nerve-fibers, at the nodal points of which minute ganglia exist.

Aufrecht's disease (*ow'-frekht*) [Emanuel *Aufrecht*, German physician, 1844–]. Infectious

jaundice with lesions in liver and kidneys. **A.'s sign,** short and feeble breathing heard just above the jugular fossa on placing the stethoscope over the trachea; it is noted in tracheal stenosis.

augment (*awg'-ment*) [*augmentum*, increase]. The increasing stage of a fever or other acute disease.

augmentation (*awg-men-ta'-shun*) [*augmentatio*, an increasing]. 1. Same as *augment*. 2. Increase in the violence of symptoms.

augmentor (*awg-men'-tor*). An agent which increases or accelerates the action of auxetics; by itself it is unable to produce cell division. See *auxetic*.

augnathus (*awg-nā'-thus*) [*ἀύ*, besides; *γνάθος*, the jaw]. A monster with two lower jaws.

aula (*aw'-lah*) [*αὐλη*, a hall or open court]. The common mesal cavity of the cerebrum, it being also the anterior portion of the third ventricle.

aulatela (*aw-lat-e'-lah*) [*aula*, a hall; *tela*, a web]. The roof or covering membrane of the aula.

aulic (*aw'-lik*) [*aula*, a hall]. Belonging or pertaining to the aula. **a. recess,** a triangular depression between the precommissure and the two fornicolumns of the brain.

auliplexus (*aw-le-pleks'-us*) [*aula*, hall; *plexus*, a network]. The choroid plexus of the aula.

aulix (*aw'-liks*) [*aulix*, a furrow]. The sulcus of Monro, a groove on the mesal surface of the thalamus just ventrad of the medicommissure.

aulophyte (*aw-lo-fit*) [*αὐλός*, pipe or tube; *φυτόν*, a plant]. A symbiotic plant; one that lives within another, but not as a parasite.

aura (*aw'-rah*) [*αὔρα*, a breath]. A breath of wind; a soft vapor. The phenomenon preceding an attack of epilepsy. It may be motor, sensory, vasomotor, secretory, or psychic. It is also applied to the symptoms preceding an attack of any disease or paroxysm, as the *aura hysterica*, *aura vertiginosa*, etc. **a., electric,** the current of air that attends the discharge of electricity from a point **a., epigastric,** a localized epileptic aura.

aurade, auradin (*aw'-rād, aw'-rad-in*). A fatty body obtained from oil of orange-flowers. It crystallizes in tasteless, pearly, odorless scales, melting at 131° F.; soluble in water, insoluble in alcohol. Syn., *Neroli camphor*.

aural (*aw'-ral*) [*auris*, the ear]. 1. Relating to the ear or to hearing. 2 [*aura*.] Relating to the air or to an aura. **a. vertigo.** See *Ménière's disease*.

auramine (*aw'-ram-ēn*) [*aurum*, gold; *amine*]. Yellow pyoktanin, a yellow aniline color used to some extent as an antiseptic.

aurantia (*aw-ran'-she-ah*) [*aurantium*]. 1. An orange coal-tar dye; an ammonium salt of hexanitrodiphenylamine. 2. An orange or oranges.

aurantiamarin (*aw-ran-te-am'-ar-in*). A bitter glucoside obtained from orange peel.

aurantiasis cutis (*aw-ran-ti'-as-is kū'-tis*) [*aurantium; cutis*, the skin]. A yellow discoloration of the skin, caused by eating an excessive number of oranges.

aurantin (*aw-ran'-tin*). See *heptane*.

aurantium (*aw-ran'-she-um*) [L.; gen., *aurantii*]. Orange. The fruit of *Citrus vulgaris* and *C. aurantium*. Both the flowers and the rind of the fruit are employed in medicine. **aurantii amari cortex** (U. S. P.), bitter orange-peel. **aurantii amari, fluid-extractum** (U. S. P.), bitter orange-peel, alcohol, and water. It is used as a flavor. Dose ½–1 dr. (2–4 Cc.). **aurantii amari, tinctura** (U. S. P.), bitter orange-peel, 20; dilute alcohol, q. s. ad 100. Dose 1–2 dr. (4–8 Cc.). **aurantii corticis, oleum** (U. S. P.), the volatile oil expressed from the rind of the orange; it is aromatic and a mild tonic, but is used mainly as a flavor. Dose 1–5 drops. **aurantii dulcis cortex** (U. S. P.), sweet orange-peel. **aurantii dulcis, tinctura** (U S. P.), sweet orange-peel, 20; dilute alcohol, q. s. ad 100. Dose 1–2 dr. (4–8 Cc.). **aurantii, elixir,** oil of orange-peel, 1; sugar, 100; alcohol and water, q. s. ad 300. **aurantii florum, aqua** (U. S. P.), stronger orange-flower water and distilled water, of each, 1 volume, **aurantii florum fortior, aqua** (U. S. P.), water saturated with the volatile oil of fresh orange-flowers. **aurantii florum, oleum,** oil of neroli, a volatile oil distilled from fresh orange-flowers. Dose 1–5 drops. **aurantii florum, syrupus** (U. S. P.), sugar, 85; orange-flower water, sufficient to make 100 parts. A common flavoring agent. **aurantii, infusum** (B. P.). Dose 1–2 oz. (30–60 Cc.). **aurantii, infusum, compositum** (B. P.). Dose 1–2 oz. (30–60 Cc.). **aurantii, spiritus,** oil of orange-peel, 5; deodorized alcohol, 95. Dose according to quantity of alcohol desired. **aurantii, spiritus, compositus** (U. S. P.), oil of orange-peel, 20; oil of lemon, 5; oil of coriander, 2; oil of anise, 5; deodorized alcohol, sufficient to make 100 parts. **aurantii, syrupus** (U. S. P.), tincture of sweet orange-peel, 5; citric acid, 0.5; magnesium carbonate, 1; sugar, 82; water sufficient to make 100 parts. **aurantii, tinctura** (B. P.). Dose 1–2 dr. (4–8 Cc.). **aurantii, tinctura, recentis** (B. P.), tincture of fresh orange-peel. Dose 1–2 dr. (4–8 Cc.). **aurantii vinum,** (B. P.), contains 12 % of alcohol.

aureol (*aw-re'-ol*). The commercial name of a hair-dye said to contain menthol, 1 %; amidophenolchlorhydrate, 0.3 %; monoamido-diphenylamine, 0.6 %; dissolved in 50 % alcohol which contains 0.5 % sodium sulphite.

aureola (*aw-re'-o-lah*). See *areola* (1).

aureolin (*aw-re'-o-lin*) [*aurum*, gold]. A yellow pigment obtained by heating paratoluidin with sulphur and treating with fuming sulphuric acid. Syn., *carnoline; polychromin; primulin yellow; sulphine; thiochromogen*.

aureolien (*aw-re'-o-lēn*). A more or less diluted solution of hydrogen dioxide, used as a hair bleach.

auric (*aw'-rik*) [*aurum*, gold]. 1. Pertaining to aurum or gold. 2. Referring to gold in chemical combination as a triad. **a. acid.** See *acid, auric*.

auricle (*aw'-rik-l*) [*auricula*, the ear]. 1. The expanded portion or pinna of the ear. 2. One of the upper chambers of the heart receiving the blood from the lungs (*left auricle*) or from the general circulation (*right auricle*). 3. An ear-shaped appendage. 4. A kind of ear-trumpet. 5. **a., cervical,** congenital cartilaginous remains of the neck, arising about the middle of the sternomastoid as symmetrical bodies, occurring in man occasionally and almost constantly present in the goat. 5. Same as auricular appendix.

auricoammonic (*aw-rik-o-am-on'-ik*). Containing gold and ammonium.

auricobarytic (*aw-rik-o-bar-it'-ik*). Containing gold and barium.

auricula (*aw-rik'-ū-lah*) [dim. of *auris*, ear]. 1. *Auricle, q. v.* 2. The auricular appendix, a pouch-like appendage to the auricles of the heart.

auricular (*aw-rik'-ū-lar*) [see *auricle*]. 1. Relating to the auricle of the ear. 2. Pertaining to the

auricles of the heart, as *auricular* appendix, 3. Relating to the auricular nerve, arteries, veins, etc. **a. appendix,** the anterior prolongation of the cardiac auricle. **a. fibrillation,** a condition of cardiac irregularity, in which the individual muscle fibers of the auricle contract independently and rapidly. **a. finger,** the little finger. **a. point,** the central point of the external auricular meatus.

auriculare (*aw-rik-ū-la'-re*) [*auricularis*, pertaining to the ear]. The *auricular point*, *q. v.*

auricularis (*aw-rik-ū-la'-ris*) [see *auricle*]. 1. Auricular. 2. The extensor minimi digiti. See under *muscle*. **a. magnus,** a branch of the cervical plexus of nerves.

auriculate, auriculated (*aw-rik'-ū-lat, -ed*). Furnished with ears or ear-like appendages; auricled.

auriculocranial (*aw-rik-ū-lo-kra'-ne-al*). Pertaining to both the auricle and the cranium.

auriculooccipital (*aw-rik-ū-lo-ok-sip'-it-al*) [*auricula*, the ear; *occiput*, the back of the head]. Pertaining both to the ear and the back of the head **a., triangle.** See *triangle*.

auriculotemporal (*aw-rik-ū-lo-tem'-po-ral*) [*auricle; tempus*, the temple] Relating to the auricle and to the temporal region. **a. nerve,** a branch of the inferior maxillary, supplying superficial parts about the auricle and temple.

auriculoventricular (*aw-rik-ū-lo-ven-trik'-ū-lar*) [*auricle; ventriculus*, the ventricle]. Relating to an auricle and a ventricle of the heart. **a. bundle,** the bundle of His. **a. opening,** the opening between the auricles and the ventricles of the heart.

auriform (*aw'-rif-orm*) [*auris*, the ear; *forma*, shape] Ear-shaped.

auriginous (*aw-rij'-in-us*). 1. Having the color of gold. 2. Relating to jaundice.

aurilave (*aw'-ril-av*) [*auris*, the ear; *lavare*, to wash]. An appliance for cleansing the ears. An ear-brush or ear-sponge

aurin, aurine (*aw'-rin, aw'-rēn*). Rosolic acid

aurinasal (*aw-re-na'-sal*) [*auris; nasus*, nose]. Pertaining to the ear and the nose.

au ripigmentum (*aw-re-pig-men'-tum*) [*aurum*, gold; *pigmentum*, pigment]. Orpiment; arsenic trisulphide.

auripuncture (*aw'-re-punk-chur*) [*auris; puncture*]. Puncture of the membrana tympani.

auris (*aw'-ris*) [L.]. The ear. **a. externa,** the outer ear, auricle, pinna. **a. interna, a. intima,** the internal ear, labyrinth. **a. media,** the middle ear, tympanum.

auriscalp (*aw'-ris-kalp*) [*auris*, the ear; *scalpare*, to scrape]. An instrument for cleansing the ear. An ear-pick, or probe for the ear.

auriscope (*aw'-ris-kōp*) [*auris; σκοπεῖν*, to examine]. An instrument for examining the ear, and especially the Eustachian passage; an otoscope.

aurist (*aw'-rist*) [*auris*]. A specialist in diseases of the ear.

aurobromide (*aw-ro-bro'-mīd*). Gold and potassium bromide.

aurometer (*aw-rom'-et-ur*) [*auris*, hearing; *μέτρον*, a measure]. An instrument for the exact recording of hearing (and deafness).

aurous (*aw'-rus*) [*aurum*, gold]. 1. Pertaining to gold and its compounds. 2. Referring to gold in chemical combination as a monad.

aurum (*aw'-rum*) [L.; gen., *auri*]. Gold. Au = 197.2; quantivalence III. A brilliant yellow metal, having a specific gravity of 19.3. It is soluble in a mixture of nitric and hydrochloric acids. **auri bromidum,** $AuBr_3$, used in epilepsy and migraine. Dose $\frac{1}{20}$–$\frac{1}{8}$ gr. (0.003–0.01 Gm.). **auri chloridum,** gold chloride. Dose $\frac{1}{100}$–$\frac{1}{50}$ gr. (0.001–0.002 Gm.). Also used as a stain for nerve tissue. **auri et sodii chloridum** (U. S. P.), the double chloride of gold and sodium. It is used as an alterative in chronic inflammations, diabetes, in the treatment of the alcohol habit, etc. Dose $\frac{1}{100}$–$\frac{1}{10}$ gr. (0.002–0.006 Gm.). **a. vegetabile,** saffron.

auscult, auscultate (*aws-kult', aws'-kul-tāt*) [*auscultare*, to listen to]. To perform or practise auscultation; to examine by auscultation.

auscultation (*aws-kul-ta'-shun*) [see *auscult*]. A method of investigation of the functions and conditions of the respiratory, circulatory, digestive, and other organs by the sounds they themselves give out or that are elicited by percussion. It is called *immediate*, when the ear is directly applied to the part, and *mediate*, if practised by the aid of the stethoscope. *Obstetric auscultation* is practised in pregnancy to detect or study the fetal heart-sounds or the placental murmur. **a.-tube,** in otology, an instrument for listening to the forced passage of air through the ear of another.

auscultatory (*aws-kul'-ta-to-re*) [see *auscult*]. Relating to auscultation. **a. percussion,** the practice of listening with the stethoscope to the sounds produced by percussing a part.

auscultoscope (*aws-kult'-o-skōp*). Stethoscope, or phonendoscope.

Auspitz's dermatosis (*ows'-pits*) [Heinrich *Auspitz*, German physician, 1835–1886]. Granuloma fungoides.

Australian blight. Angioneurotic edema.

autacoid (*aw'-tak-oid*) [*auto-; ἄκος*, remedy]. (1) A general term for internal secretions, (2) An unusual internal secretion which is carried by the blood from the organ producing it to another, on which it acts remedically like a drug *Hormones*, *chalones*, *q. v.*

autan (*aw'-tan*). Trade name of a preparation said to be a mixture of paraformaldehyde and barium dioxide Used to disinfect rooms.

autechoscope (*aw-tek'-o-skōp*) [*αὐτός*, self, *ἦχος*, sound; *σκοπεῖν*, to inspect]. A device for enabling a person to listen to sounds produced within his own body.

autecic, autœcic (*aw-te'-sik*). See *autecious*

autecious, autœcious (*aw-te'-shus*) [*αὐτός*, self; *οἶκος*, dwelling]. Applied to parasitic fungi that pass through all the stages of their existence in the same host.

autemesia (*aw-tem-e'-zhe-ah*) [*αὐτός*, self; *ἐμεῖν*, to vomit]. Vomiting without manifest cause.

autism (*aw'-tizm*) [*auto-*]. A tendency to morbid concentration on oneself; morbid dreaming.

auto- (*aw-to-*) [*αὐτός*, self]. A prefix meaning self, of itself.

autoactivation (*aw-to-ak-tiv-a'-shun*) [*auto-; activate*]. The activation of a gland by an enzyme or hormone derived from itself.

autoagglutination (*aw-to-ag-gloo-tin-a'-shun*). Agglutination which occurs without the addition of a serum; also called *spontaneous agglutination.*

autoanticomplement (*aw-to-an-te-kom'-ple-ment*). An anticomplement, formed in the body and capable of neutralizing its own complements.

autoaudible (*aw-to-awd'-i-bl*) [*auto-; audire*, to hear]. Applied to cardiac sounds audible to the patient.

autoblast (*aw'-to-blast*) [*auto-; βλαστός*, a germ]. An independent bioblast.

autocatalysis (*aw-to-kat-al'-is-is*) [*auto-; catalysis*]. The process by which enzymes produce substances which increase their own activity.

autocatheterism (*aw-to-kath'-et-er-izm*) [*auto-; catheter*]. Self catheterization.

autochthon (*aw-tok'-thon*) [αὐτόχθων, sprung from the land]. An aboriginal inhabitant.

autochthonous (*aw-tok'-thon-us*) [see *autochthon*]. Aboriginal; formed (as, *e. g.*, a clot) in the place where it is found.

autocinesis (*aw-to-sin-e'-sis*). See *autokinesis*.

autocinetic (*aw-to-sin-et'-ik*). See *autokinetic*.

autoclasis (*aw-tok'-la-sis*) [*auto-;* κλασις, breaking]. A breaking up of a part due to causes developed within itself.

autoclave (*aw'-to-klāv*) [*auto-; clavis*, a key]. 1. Self-fastening; closing itself. 2. An apparatus for sterilizing objects by steam-heat at high pressure. 3. To sterilize in an autoclave.

autoconduction (*aw-to-kon-duk'-shun*) [*auto-; conduction*]. A term used in electrotherapy for a method of using high-frequency currents. The patient or part to be acted upon is placed inside the solenoid, without any direct connection with any part of the circuit.

autocystoplasty (*aw-to-sis'-to-plas-te*) [*auto-;* κύστις, bladder; πλάσσειν, to form]. Plastic surgery of the bladder with grafts from the patient's body.

autocytolysin (*aw-to-si-tol'-is-in*). *Autolysin, q. v.*

autocytolysis (*aw-to-si-tol'-is-is*). Autolysis, *q. v.*

autocytotoxins (*aw-to-si-to-toks'-ins*) [*auto-; cytotoxin*]. Cytotoxins produced in the body of a person by abnormal retention and absorption of the products of degenerated and dead cells.

autodidact (*aw'-to-di-dakt*) [*auto-;* διδακτός, taught] One who is self-taught

autodigestion (*aw-to-di-jes'-chun*) [*auto-; digerere*, to digest]. Digestion of the stomach walls by gastric juice, in disease of the stomach.

auto-erotism (*aw'-to-er'-ot-izm*) [*auto-; erotism*] 1. A combination of sexual emotion and self-admiration. 2 Self gratification of sexual instinct.

autofundoscope (*aw-to-fun'-do-skōp*) [*auto-; fundus*, the bottom; σκοπεῖν, to look]. An instrument for self-examination of the vessels about the macular region of the eye.

autogamous (*aw-tog'-am-us*) [*auto-;* γάμος, marriage]. In botany, a name applied to flowers that are habitually self-fertilizing.

autogamy (*aw-tog'-am-e*). [see *autogamous*]. Self-fertilization.

autogenesis (*aw-to-jen'-es-is*) [*auto-;* γένεσις, production]. Spontaneous generation.

autogenetic (*aw-to-jen-et'-ik*) [see *autogenesis*]. Produced within the organism.

autogenous (*aw-toj'-en-us*) [see *autogenesis*]. 1. Pertaining to diseases or conditions self-produced within the body and not derived from external sources: applied to poisons generated in the body by its inherent processes. 2. Having a distinct center of development, as parts of bones. **a. hemorrhage**, hemorrhage due to causes residing within the body; not traumatic. **a. vaccine**, one derived from the microorganism infecting the person to be immunized, as opposed to *stock vaccines* which are made from standard cultures.

autognosis (*aw-tog-no'-sis*) [*auto-;* γνῶσις, knowledge]. Knowledge obtained by self-observation.

autogony (*aw-tog'-o-ne*) [αὐτόγονος, self-produced]. The rise of the simplest protoplasmic substance in a formative fluid.

autograft (*aw'-to-graft*) [*auto-; -graft*]. A skin graft taken from the same person who is being operated on.

autographic (*aw-to-graf'-ik*) [*auto-;* γράφειν, to write] Self-registering. **a. skin**, a condition of vasomotor paralysis, usually in hysterical patients, in which markings made upon the skin form quite persistent red traces. **a. woman**, one with an autographic skin.

autographism (*aw-tog'-raf-izm*) [*auto-;* γράφειν, to write]. The condition seen in the so-called autographic skin. See *urticaria factitia*.

autohemotherapy (*aw-to-hem-o-ther'-ap-e*) [*auto-; hematotherapy*] Treatment of disease by means of the blood of the patient

autohydrolysis (*aw-to-hi-drol'-is-is*). Spontaneous hydrolysis.

autohypnotic (*aw-to-hip-not'-ik*). 1. Relating to autohypnotism. 2. An individual who can put himself into a hypnotic state.

autohypnotism (*aw-to-hip'-not-izm*) [*auto-;* ὕπνος, sleep] Mental stupor induced by dwelling intensely upon some all-absorbing thought.

autoimmunization (*aw-to-im-u-ni-za'-shun*) [*auto-; immunization*]. Immunization obtained by natural processes at work within the body.

autoinfection (*aw-to-in-fek'-shun*). Infection by virus originating within the body or transferred from one part of the body to another.

autoinfusion (*aw-to-in-fu'-shun*) [*auto-; infundere*, to pour in]. Compulsion of the blood to the heart by bandaging the extremities, compression of the abdominal aorta, etc.

autoinoculable (*aw-to-in-ok'-u-la-bl*) [*auto-; inoculare*, to implant]. Capable of being inoculated upon the person already infected.

autoinoculation (*aw-to-in-ok-u-la'-shun*) [see *autoinoculable*]. Inoculation in one part of the body by virus present in another part; self-inoculation.

autointoxication (*aw-to-in-toks-ik-a'-shun*) [*auto-;* τοξικόν, a poison]. Poisoning by faulty metabolic products elaborated within the body; autoinfection. **a., endogenous**, that due to the action of excessive unneutralized or modified discharges from the cells of any tissue acting upon the other tissues without previous discharge from the body; or that due to the action of products of decomposition and necrosis of any tissue acting in a similar manner; or that due to microendoparasites or macroendoparasites. **a., exogenous**, that due to the action of poisons entering the system from without, through the skin, the digestive, the respiratory or genitourinary tract, as by the absorption of retained excreta, or of decomposition- and fermentation-products developed in the external secretions through the action of those secretions **a., indirect**, that caused by the absorption of retained excrements.

autoisolysin (*aw-to-is-ol'-is-in*) [*auto-;* ἴσος, equal; λύσις, a loosing]. A serum which dissolves the corpuscles of the individual from which it was obtained and also those of another individual of the same species.

autokinesis (*aw-to-kin-e'-sis*) [*auto-;* κίνησις, movement]. Voluntary movement.

autokinetic (*aw-to-kin-et'-ik*) [see *autokinesis*]. Pertaining to, or of the nature of, autokinesis.

autolaryngoscopy (*aw-to-lar-ing-gos'-ko-pe*) [*auto-;* λάρυγξ, the larynx; σκοπεῖν, to examine]. The examination of one's own larynx.

autolavage (*aw-to-lav'-ahj*) [*auto-; lavage*]. The washing out of one's own stomach.

autolysate (*aw-tol'-is-āt*) [see *autolysin*]. That which results from or is produced by autolysis.

autolysin (*aw-tol'-is-in*) [*auto-*; λύσις, a loosing] A lysin that dissolves the erythrocytes of the animal in the serum of which it circulates.

autolysis (*aw-tol'-is-is*) [see *autolysin*]. 1. Self-digestion of tissues within the living body. 2. The chemical splitting-up of the tissue of an organ by the action of an enzyme peculiar to it. 3. The hemolytic action of the blood-serum of an animal upon its own corpuscles.

autolytic (*aw-to-lit'-ik*). Relating to autolysis.

automatic (*aw-to-mat'-ik*) [αὐτοματίζειν, to act spontaneously]. Performed without the influence of the will.

automatism (*aw-tom'-at-izm*) [see *automatic*]. The performance of acts without apparent volition, as seen in certain somnambulists and in some hysterical and epileptic patients.

automatograph (*aw-to-mat'-o-graf*) [*automatic*; γραφεῖν, to record]. An instrument for registering involuntary movements.

automaton (*aw-tom'-at-on*) [αὐτόματος, spontaneous]. One who acts in an involuntary or mechanical manner.

automixis (*aw-to-miks'-is*) [*auto-*; μίξις, *mixture*]. Same as *autogamy*.

automysophobia (*aw-to-mis-o-fo'-be-ah*) [*auto-*; μύσος, filth; φόβος, fear]. Insane dread of personal uncleanliness.

autonephrectomy (*aw-to-nef-rek'-to-me*) [*auto*; νέφρος, kidney; ἐκτομή, excision]. Complete stricture of the ureter so that no urine flows from the kidney to the bladder.

autonomic, autonomous (*aw-ton-om'-ik, -ton'-om-us*) [*auto-*; νόμος, law]. Independent in origin, action, or function; self-governing **a. nervous system,** the sympathetic nervous system supplying involuntary muscle fibers, secreting glands, and arterioles

autonomine (*aw-ton'-o-mēn*). A hypothetical substance supposed to be a secretion of the endocrine glands and to be circulating in the blood and stimulating the autonomic nervous system

autonomy (*aw-ton'-o-me*) [see *autonomous*]. Independence.

autoophthalmoscope (*aw-to-of-thal'-mo-skōp*). See *autophthalmoscope*.

autopathic (*aw-to-path'-ik*) [*auto-*; πάθος, suffering]. The same as endopathic or idiopathic.

autopepsia (*aw-to-pep'-se-ah*) [*auto-*; πέπτειν, to digest]. Autodigestion

autophagia (*aw-to-fa'-je-ah*) [*auto-*; φαγεῖν, to eat]. 1. Self-consumption; emaciation. 2. The biting of one's own flesh.

autophagy (*aw-tof'-a-je*). See *autophagia*.

autophilia (*aw-to-fil'-e-ah*) [*auto-*; φιλεῖν, to love]. Morbid self-esteem.

autophobia (*aw-to-fo'-be-ah*) [*auto-*; φόβος, fear]. A morbid dread of one's self or of solitude.

autophonia (*aw-to-fo'-ne-ah*). 1. See *autophony*. 2. [*auto-*; φόνος, murder]. Suicide

autophonomania (*aw-to-fo-no-ma'-ne-ah*) [αὐτοφονία, suicide; μανία, madness]. Suicidal mania.

autophonous (*aw-tof'-on-us*) [*auto-*; φωνή, voice]. Having the character of autophony.

autophony (*aw-tof'-o-ne*) [see *autophonous*]. 1. The auscultation of the physician's own voice through the patient's chest. 2. The condition in which one's own voice appears changed.

autophthalmoscope (*aw-toff-thal'-mo-skōp*). An ophthalmoscope for examining one's own eye.

autophthalmoscopy (*aw-tof-thal-mos'-ko-pe*) [*auto-*; ὀφθαλμός, the eye; σκοπεῖν, to see]. Examination of one's own eye with the ophthalmoscope.

autoplasty (*aw'-to-plas-te*) [*auto-*; πλάσσειν, to form]. A method of repairing the effects of a wound or lesion involving loss of tissue by grafting or implanting fresh parts taken from other portions of the patient's body.

autopsy (*aw'-top-se*) [*auto-*; ὄψις, a seeing] The postmortem examination.

autopsychorrhythmia (*aw-to-si-kor-rith'-me-ah*) [*auto-*; ψυχή, mind; ῥυθμός, rhythm]. A morbid rhythmic activity of the brain; it is a symptom of grave insanity.

autopyotherapy (*aw-to-pi-o-ther'-ap-e*) [*auto-*; πύον, pus; θεραπεία, treatment]. Treatment of suppuration by injecting into the patient pus from his own abscess.

autoreinfusion (*aw-to-re-in-fū'-zhun*). Infusing into a patient his own blood or serum after it has been poured out into his body cavities

autoscope (*aw'-to-skōp*) [*auto-*; σκοπεῖν, to see]. An instrument arranged for the examination of one's own organs by one's self.

autoscopy (*aw-tos'-ko-pe*) [see *autoscope*]. The examination of one's own organs by an autoscope.

autoserotherapy (*aw-to-se-ro-ther'-ap-e*) [*auto-*; *serum*; *therapy*]. Treatment of a disease (such as pleurisy) by means of a serum obtained from the patient himself.

autoserum (*aw-to-se'-rum*) [*auto-*; *serum*]. A therapeutic serum which is obtained from the patient on whom it is used.

autosite (*aw'-to-sīt*) [*auto-*; σῖτος, food]. 1. A monster capable of an independent existence after birth. 2. That member of a double fetal monstrosity that nourishes itself by its own organs and also the other member, which is called the parasite.

autositic (*aw-to-sit'-ik*) [see *autosite*]. Of the nature of an autosite.

autospermotoxin (*aw-to-spurm-o-toks'-in*) [*auto-*; σπέρμα, seed; τοξικόν, poison]. A specific substance produced in the blood-serum of an animal by intravenous injection of spermatozoa of another animal, and which renders the serum of the treated animal toxic for the spermatozoa of both.

autosterilization (*aw-to-ster-il-iz-a'-shun*) [*auto-*; *sterilization*]. Sterilization effected by the normal fluids of the body.

autostethoscope (*aw-to-steth'-o-skōp*) [*auto-*; στῆθος, the chest; σκοπεῖν, to examine]. A stethoscope that enables one of hear his own chest-sounds.

autosuggestibility (*aw-to-suj-es-tib-il'-it-e*) That mental state with loss of will, in which auto suggestion easily occurs.

autosuggestion (*aw-to-suj-es'-chun*) [*auto-*; *suggestio*, an intimation]. A peculiar mental condition, often developing after accidents, especially railway accidents; it is intimately associated with the hypnotic state. In both of these conditions the mental spontaneity, the will, or the judgment is more or less suppressed or obscured, and suggestions become easy. Thus the slightest traumatic action directed to any member may become the occasion of a paralysis, of a contracture, or of an arthralgia Syn., *traumatic suggestion*

autosynnoia (*aw-to-sin-noy'-ah*) [*auto-*; σύν, with; νοῦς, mind]. A state of introversion in which the subject is so concentrated in his thoughts or hallucinations that he loses all interest in the outside world.

autotemnous (*aw-to-tem'-nus*) [*auto-*; self; τέμνειν, to cut]. Capable of spontaneous division.

autotherapy (*aw-to-ther'-a-pe*) [*auto-; θεραπεία*, treatment]. 1. Spontaneous or self-cure of a disease. 2. Treatment. 3. Autoserotherapy.

autotomy (*aw-tot'-o-me*) [*auto-; τομή*, a cutting] 1. Self-division; as ability of organisms to discard legs, etc; fission. 2. The performance of a surgical operation upon one's own body.

autotopnosia (*aw-to-top-no'-ze-ah*) [*αὐτός*, self; *τόπος*, place, *γνῶσις*, knowledge]. Lack of ability to orient parts of the body.

autotoxemia (*aw-to-toks-e'-me-ah*) [*auto-; τοξικόν*, a poison; *αἷμα*, blood]. Toxemia from poisons derived from the organism itself.

autotoxicosis (*aw-to-toks-ik-o'-sis*) [*auto-; τοξικόν*, poison]. The symptoms due to autotoxemia.

autotoxin (*aw-to-toks'-in*) [*auto-; τοξικόν*, a poison]. Any poisonous product of tissue-metamorphosis.

autotoxis (*aw-to-toks'-is*) [*auto-; τοξικόν*, poison]. Self-poisoning through the absorption of noxious products of katabolism, as in uremia. Cf. *autointoxication*.

autotransfusion (*aw-to-trans-fū'-zhun*) [*auto-; transfusio*, a pouring-out or forth]. The transfer of the blood to the brain and other central organs by elevating the hips and legs and by the use of elastic bandages compressing the limbs.

autotransplantation (*aw-to-trans-plan-ta'-shun*) [*auto-; transplantation*]. The operation of transplanting to a part of the body tissue taken from another part of the same body.

autotrophic (*aw-to-trof'-ik*) [*αὐτός*, self; *τροφή*, nutrition]. Self-nourishing. A term applied to those forms of bacteria which do not require organic carbon and nitrogen, but are able to form carbohydrates and protein out of carbon dioxide and inorganic salts.

autotuberculin (*au-to-tū'-ber'-kū-lin*). Tuberculin prepared from a patient's own sputum.

autotyphization (*aw-to-ti-fiz-a'-shun*) [*auto-; typhoid*] The production of a condition resembling typhoid fever from faulty elimination of waste-material.

autovaccination (*aw-to-vaks-in-a'-shun*) [*auto-; vaccinare*, to vaccinate]. The reinsertion of fresh vaccine lymph upon the same person from whom it is taken.

autumn catarrh. Synonym of *hay-fever*, since it is apt to occur in the autumn or the fall of the year

autumnal (*aw-tum'-nal*) [*autumn*]. Pertaining to the fall of the year. **a. fever.** Synonym of *typhoid fever*.

auxanogram (*awks-an'-o-gram*) [*αὐξανειν*, to grow; *γράφειν*, to write]. A pure plate culture of microbes which has been prepared by Beyerinck,s auxanographic method in which the colonies indicate which one of several nutrient media is best suited to their growth.

auxanographic (*awks-an-o-graf'-ik*) Pertaining to auxanography.

auxanography (*awks-an-og'-ra-fe*). A method devised by Beyerinck for ascertaining the nutrient mediums suitable for a growing microbe. Plate cultures of poor mediums (*e. g.*, 10 % gelatin or 2 % agar in distilled water) are stippled with drops of solutions the nutrient properties of which are to be tested. The species of microbe under examination will then develop strong colonies only on those spots where the requisite pabulum is present.

auxanology (*awks-an-ol'-o-je*) [*αὔξανειν*, to grow; *λόγος*, science]. The study of growth.

auxanometer (*awks-an-om'-et-er*) [*αὐξάνειν*, to grow; *μέτρον*, a measure]. An instrument used in biological study for measuring the growth of young organisms.

auxe (*awks'-e*) [*αὔξη*, increase]. Enlargement in bulk or volume.

auxesis (*awks-e'-sis*) [*αὔξησις*, enlargement]. Increase in size or bulk. Hypertrophy is a word often incorrectly used where auxesis is meant.

auxetic (*awks-et'-ik*). [See *auxesis*]. 1. Characterized by auxesis. 2. Increase in size or bulk. 3. An exciter of reproduction; an agent which causes proliferation of human cells, especially leukocytes. See *in vitro*.

auxiliary (*awks-il'-e-a-re*) [*auxilium*]. 1. Aiding. 2. An adjuvant. **auxiliaries of respiration,** those muscles brought into action in difficult respiration.

auxilium (*awks-il'-e-um*) [L., "help"]. A wheeled vehicle or ambulance with couch and mattresses, for use in the service of field military hospitals.

auxilytic (*awks-il-it'-ik*) [*αὔξειν*, to increase; *lysis*]. Increasing or favoring lysis.

auximones (*awks'-im-ōnz*). Vitamin-like bodies found in the soil.

auxocardia (*awks-o-kar'-de-ah*) [*αὔξη*, an increase, *καρδία*, the heart]. The normal increase of the volume of the heart during diastole, in distinction from *mesocardia*, the diminution during systole.

auxochrome (*awks'-o-krōm*) [*αὔξειν*, increase; *χρῶμα*, color]. 1. That which increases color. 2 A term applied to a chemical group which, if added to a chromophore group will produce a dye.

auxocyte (*awks'-o-sīt*) [*αὔξειν*, to increase; *κύτος*, a cell]. A cell which is concerned in growth or reproduction.

auxometer (*awks-om'-et-er*) [*αὔξειν*, to grow; *μέτρον*, a measure]. 1. A device for estimating the magnifying power of lenses. 2. See *auxanometer*. 3. A dynamometer. Syn., *auxemeter; auxenometer; auxesimeter; auxiometer; auxometer*.

auxospore (*awks'-o-spōr*) [*αὔξειν*, to grow; *σπόρος*, seed, offspring] A large spore produced, either asexually, or by conjugation, in the *Diatomaceæ*.

auxotonic (*awks-o-ton'-ik*) [*αὔξειν*, to grow; *τόνος*, tension]. Determined by growth. **a. movements,** movements due to growth rather than to stimulation.

auxometer (*aw-zom'-et-ur*). See *auxometer*.

Av. Abbreviation for avoirdupois weight; see *weights and measures*.

ava, ava-kava (*ah'-vah, ah-vah-kah'-vah*). See *kava-kava*.

avaism (*ah'-vah-izm*). A malady from abuse of kava, resembling absinthism.

avalanche theory. Pflüger's theory that nerve-energy gathers intensity as it passes toward the muscles.

avalent (*ah-va'-lent*) [*a*, priv.; *valence*]. Without valency.

avalvular (*ah-val'-vū-lar*) [*a*, priv.; *valvula*, a valve]. Lacking valves.

avarin (*av'-ar-in*). A carbohydrate for use in diabetes; it is a starch-free agar preparation.

avascular (*ah-vas'-kū-lar*) [*a*, priv.; *vas*, a vessel]. Without blood; not possessing blood-vessels.

avascularization (*ah-vas-kū-lar-iz-a'-shun*). The act of rendering a part bloodless, as by compression or bandaging.

avascularize (*ah-vas'-kū-lar-īz*). To render bloodless.

Avellis' symptom-complex (*ah-vel'-lis*) [Georg *Avellis*, German laryngologist, 1864–].

Paralysis of one-half of the soft palate, associated with a recurrent paralysis on the same side.

Avellis' syndrome. Palato-laryngeal hemiplegia in cases of associated paralysis of the larynx.

Avena (*av-e'-nah*) [L.]. A genus of plants. Oats. **Avena farina,** oatmeal. **A. sativa,** the embryo of the seed of the common oat-plant. It contains starch, gluten, a ferment called diastase, and a small amount of alkaline phosphates, and is a nutritious food. Dose of the concentrated *tincture* or *fluidextract* 10 min.–2 dr. (0 65–8.0 Cc.). The pericarp contains an alkaloid possessed of slight narcotic powers.

avenin (*av-e'-nin*) [*avena*]. 1. A precipitate from a tincture of *Avena sativa,* or the oat. It is a nerve-stimulant and tonic. 2. A nitrogenous principle obtained from oats and nearly identical with legumin; the gluten-casein of oats.

avenious, avenous (*ah-ve'-ne-us, ah-ve'-nus*) [*ἀ,* priv.; *vena,* vein]. Lacking veins.

avenolith (*av-en'-o-lith*) [*avena;* λίθος, stone]. An intestinal calculus formed around a grain of oats.

aversion (*av-ur'-shun*) [*avertere,* to turn aside]. 1. A turning aside, as in the displacement of an organ or in metastasis. 2. Nausea.

avertin (*av-ur'-tin*). An anesthetic which is said to be devoid of many of the undesirable features of other anesthetics

a'viator's dazzling. A form of asthenopia probably due to the glare met with in aviation. The eyes are painful, and injected; the lids burn; retinal hyperemia and ciliary spasm are also present.

avidity (*av-id'-it-e*) [*avidus,* greedy]. In chemistry, the tendency of certain weak acids, in suitable conditions, to dispossess even the strongest acids and to unite with their bases.

avirulent (*ah-vir'-ū-lent*) [*ἀ,* priv.; *virus,* a poison]. Without virulence.

avitaminosis (*ah-vi-tam-in-o'-sis*) [*ἀ,* priv.; *vitamin*]. A disease resulting from deficiency of vitamins in the diet.

Avogadro's law [Amadeo *Avogadro,* Italian physicist, 1776–1856]. Equal volumes of all gases and vapors, at like temperature and pressure, contain an equal number of molecules

avoirdupois weight (*av-or-du-pois'*). See *weights and measures.*

avulsio, avulsion (*av-ul'-se-o, -shun*) [*avellere,* to tear away]. A tearing or wrenching away of a part, as a polyp, a limb, etc. **a. bulbi, avulsion of the bulb,** separation of the pupil from its attachments in consequence of complete or almost complete rupture of the tendons of the optic muscles and nerves.

axanthopsia (*ah-zan-thop'-se-ah*) [*ἀ,* priv.; *ξάνθος,* yellow; *ὄψις,* vision]. Yellow-blindness.

Axenfeld's test for albumin in urine (*ahks'-en-felt*) [David *Axenfeld,* German physiologist]. Acidulate with formic acid and add. drop by drop, a 0 1 % solution of gold chloride, and warm If albumin is present, the solution becomes red, then purplish, and on the addition of more gold chloride, blue. The blue is also produced by glucose, starch, tyrosin, uric acid, urea, leucin, etc., but the red is characteristic of albumin.

axial (*aks'-e-al*) [*axis*]. Pertaining to or situated in an axis. **a. current,** the column of red corpuscles which, by reason of the weight of the cells, occupies the center or axis of the bloodstream. **a. hyperopia.** See *hyperopia, axial.* **a. neuritis,** inflammation of a nerve axis. **a. skeleton,** the skeleton of the head and trunk (in opposition to the skeleton of the limbs). **a. stream.** See *a. current.*

axifugal (*aks-if'-ū-gal*) [*axis; fugere,* to flee]. Centrifugal.

axil (*aks'-il*). The axilla.

axilemma (*aks-il-em'-ah*) [*axis;* λέμμα, husk; skin.] An elastic sheath composed of neurokeratin, inclosing the axis-cylinder of medullated nerve-fibers.

axilla (*aks-il'-ah*) [L.]. 1. The armpit. 2. The prominence of the shoulder.

axillary (*aks'-il-a-re*) [*axilla*]. Pertaining to the axilla. **a. artery,** the continuation of the subclavian artery, extending from the lower border of the first rib to the insertion of the pectoralis major muscle, where it becomes the brachial. See under *artery.* **a. glands,** the lymphatic glands in the axilla. **a. plexus,** the brachial plexus, formed by the last three cervical and the first dorsal nerves. **a. region, a. space,** the irregular conical space of the axilla. **a. vein,** a continuation of the brachial vein, corresponding with the artery and terminating in the subclavian vein.

axin (*aks'-in*) [*axinus*]. A fatty and varnish-like substance produced in Mexico by an insect, *Coccus axinus.* It is used in the arts and locally in medicine, being regarded as a good vulnerary and resolvent.

axioplasm (*aks'-e-o-plazm*). See *axoplasm.*

axipetal (*aks-ip'-et-al*) [*axis; petere,* to seek]. Centripetal; applied to the transmission of impulses toward an axone.

axis (*aks'-is*) [L., "axletree"]. 1. An imaginary line passing through the center of a body. 2. The second cervical vertebra. 3. A short artery which breaks up into several branches, *e. g.,* thyroid *axis,* celiac *axis.* See under *artery.* **a., basicranial,** in craniometry, a line drawn from the basion to the middle of the anterior border of the cerebral surface of the sphenoid bone. **a., basifacial,** in craniometry, a line drawn from the anterior border of the cerebral surface of the sphenoid to the alveolar point. **a., binauricular,** in craniometry, the imaginary line joining the two auricular points. **a., brain,** the isthmus **a. celiac,** same as *celiac artery;* see table of *arteries.* **a., cerebrospinal,** the central nervous system. **a.-cord.** See *primitive streak.* **a.-corpuscle.** See *corpuscle, axile.* **a., craniofacial,** in comparative anatomy the bones making the floor of the cranial cavity. **a.-cylinder,** the conducting or essential part of a nerve. Syn., *axis-cylinder of Purkinje.* **a.-cylinder process,** that one of the protoplasmic processes of a nerve-cell which becomes an axis-cylinder. **a., electric,** a line connecting the two poles of an electric body. **a., frontal** (of the eye), an imaginary line running through the eyeball from right to left, and corresponding with the movements of elevation and depression of the eyeball. **a., hemal,** the aorta. **a., magnetic,** a line connecting the two poles of a magnet. **a. neural,** the cerebrospinal axis. **a., optic.** 1. The line from the center of the cornea to the macula lutea. 2. An imaginary line passing from the center of the eye-piece of a microscope through the body, objective, stage, and substage, to the mirror. **a., pelvic,** an imaginary line passing through all the median anteroposterior diameters of the pelvic canal at their centers. **a., sagittal** (of the eye), an imaginary line running through the eyeball from before backward, and coinciding with the line of vision. **a.-traction,** traction on the fetus in the axis of the pelvis. **a.-traction forceps,**

a forceps for performing axis-traction. **a. uteri.** 1. The long diameter of the uterus. 2. A line imagined to pass transversely through the uterus near its junction with the cervix, on which it is said to turn in retroversion. **a., visual,** the line from the object through the nodal point to the macula.

axite (*aks'-it*) [*axis*]. Gowers' name for the terminal filaments of the axis-cylinder.

axle teeth (*aks'-l tēth*). See *azzle teeth.*

axo- (*aks-o-*) [*axis*]. A prefix meaning axis.

axodendrite (*aks-o-den'-drīt*) [*axo-; δένδρον,* a tree]. Lenhossek's term for a nonmedullated, axopetally conducting side fibril on the axons, as distinguished from a cytodendrite or one of the true medullated, cellulifugal collaterals.

axofugal (*ak-so-fu'-gal*) [*axo-; fugere,* to flee from]. Directed away from an axis cylinder process.

axoid (*aks'-oid*) [*axo-; εἶδος,* likeness] 1. Pivot shaped. 2 Relating to second cervical joint.

axolemma. See *axilemma.*

axolysis (*aks-ol'-is-is*) [*axon; λύσις,* solution]. Destruction of an axis cylinder.

axometer (*aks-om'-et-ur*) [*axo-; μέτρον,* measure]. An instrument used to adjust properly the axes of spectacles to the eyes.

axon, axone (*aks'-on*) [*axis*]. 1. The body-axis. 2. An unbranched nerve-cell process of the second order. See *dendrite.* 3. The cerebrospinal axis. 4. Kölliker's term for neurite. **a. degeneration,** disintegration and loss of function of the axis-cylinder. **a. hillock,** the pyramidal projection of the nerve-cell protoplasm from which the axon issues.

axoneuron (*aks-o-nū'-ron*) [*axo-; νεῦρον,* nerve]. A neuron the cell-body (nerve-cell) of which lies in the interior of the brain or the spinal cord. The axoneurons are classified as rhizoneurons and the endaxoneurons.

axonometer (*aks-o-nom'-et-er*) [*axo-; μέτρον,* a measure]. 1. An instrument used for locating the axis of astigmatism. 2. An apparatus for determining the axis of a cylinder.

axopetal (*aks-op'-et-al*). See *axipetal*

axoplasm (*aks'-o-plazm*) [*axis; πλάσμα,* a thing molded]. Waldeyer's term for the delicate stroma of reticular substance holding together the fine fibrillæ of the axis-cylinder. Syn., *neuroplasm.*

axospongium (*aks-o-spun'-je-um*) [*axo-; σπόγγος,* a sponge]. Held's term for the reticular structure of the axis-cylinder.

axungia (*aks-un'-je-ah*) [L.]. Fat; lard; adeps. **axungiæ lunæ,** a variety of calcium carbonate. **axungiæ vitri,** salt of glass; a scum forming on the surface of molten glass. It is applied as a desiccative and detergent.

ayapana, ayapano. The South American name for the leaves of the herb *Eupatorium triplinerve,* of tropical America. It is stimulant, diaphoretic, and tonic, and is used in infusion externally for wounds and abscesses, internally for gastric disorders. A substitute for tea, coffee, and cocoa.

Ayerza's disease (*ah-yer'-sah*). Is characterized by chronic cyanosis, dyspnea, enlargement of liver and spleen, erythemia, and hyperplasia of bone marrow; it resembles Osler's disease.

ayurvedism (*a-yoor-va'-dism*). A system of treatment by plants and drugs indigenous to India. Native Indian materia medica.

ayurvedist (*a-yoor-va'-dist*). One who prescribes only native Indian plants and drugs.

azalein (*az-a'-le-in*). See *fuchsin.*

azedarach (*az-ed'-ar-ak*) [Pers., *āzād,* free; *dirakht,* a tree]. Pride of China, the bark of *Melia azedarach,* an Asiatic tree naturalized in the southern United States. It occurs in curved pieces or quills, having a sweetish taste. A decoction, ½ oz. to 1 pint, is used as an anthelmintic against the roundworm. Dose ½–1 oz. (15–30 Cc.). Dose of the *fluidextract* 1 dr. (4 Gm.); of the *tincture,* 1 to 8, ½–2 dr. (2–8 Cc.).

azerin (*az'-er-in*) [*ἀ,* priv.; *ξηρός,* dry]. A ferment analogous to ptyalin and found in the digestive secretions of *Drosera, Nepenthes,* and probably all other insectivorous plants.

azoamyly (*ah-zo-am'-il-e*) [*ἀ,* priv.; *ζῷον,* animal; *ἄμυλον,* starch]. The inability of the cell (hepatic) to store up the normal amount of glycogen.

azobenzene (*az-o-ben'-zēn*) [*azote,* nitrogen; *benzene*], $C_{12}H_{10}N_2$. A compound formed by the action of sodium amalgam upon the alcoholic solution of nitrobenzene. It forms orange-red, rhombic crystals, readily soluble in alcohol and ether, but sparingly soluble in water. It melts at 68° and distils at 293°.

azobenzoid (*az-o-ben'-zo-id*). An amorphous white powder derived from oil of bitter almonds by action of ammonia.

azochloramid (*az-o-klor-am'-id*) N-N-dichloroazodicarbonamidine. A tasteless and odorless germicide that is not weakened by living tissue. It is markedly active with mixed groups of organisms

azo-compound. In chemistry, a compound containing the group $-N=N-$ united to two hydrocarbon groups; a compound intermediate between the nitro-compounds and the amido-compounds, and made from the former by partial reduction, or from the latter by partial oxidation.

azoic (*ah-zo'-ik*) [*ἀ,* priv.; *ζωή,* life]. 1. Destitute of living organisms. 2. Relating to nitrogen; azotic; nitric.

Azo-itch (*az'-o-ich*). A dermatitis occurring among workers with azo dyes.

azolitmin (*az-o-lit'-min*) [*ἀ,* priv ; *ζωή,* life; *litmus*], $C_7H_7NO_4$. A deep blood-red coloring-matter obtained from litmus.

azomethane (*as-o-meth-ān'*). Hydrocyanic acid.

azoospermia (*ah-zo-o-sper'-me-ah*) [*ἀ,* priv.; *ζωή,* life; *σπέρμα,* seed]. Absence of, or deficient vitality of, the spermatozoa.

azoresorcin (*az-o-rez-or'-sin*) [*ἀ,* priv.; *ζωή,* life; *resorcinol*], $C_{12}H_8NO_4$. Dark-red and greenish crystals which are derived from resorcinol.

azorubin (*az-o-roo'-bin*). A dark red dye used in testing the functional activity of the liver and biliary tract.

azotation (*az-o-ta'-shun*). The assimilation of nitrogen from the air by organisms.

azote (*as'-ōt*) [*ἀ,* priv.; *ζωή,* life]. A synonym of *nitrogen.*

azotemia (*az-o-te'-me-ah*) [*azote; αἷμα,* blood]. The presence of nitrogenous compounds in the blood; uremia.

azotenesis (*az-o-ten-e'-sis*) [*azote*]. Any one of a class of diseases said to be due to a superabundance of nitrogen in the system, such as scurvy

azotic acid. Nitric acid.

azotiodic (*az-ot-i-o'-dik*). Containing nitrogen and iodine.

azotized (*az'-ot-izd*) [*azote*]. Nitrogenized; containing nitrogen.

azotobacter (*az-o'-to-bak-ter*). A class of large aerobic bacteria, capable of fixing free nitrogen from the air. They are found in the soil.

azotometer (*az-o-tom'-et-er*) [*azote*; μέτρον, a measure]. A device for the measurement of nitrogen.

azotorrhea (*az-o-to-re'-ah*) [*azote*; ῥοία, flow]. Excess of nitrogenous matter in the urine or feces.

azoturia (*az-o-tū'-re-ah*) [*azote*; οὖρον, urine]. An increase of the urea and urates in the urine.

azoturic (*az-o-tū'-rik*) [*azoturia*]. Pertaining to the urinary excretion of nitrogen

azoxybenzene (*az-oks-e-ben'-zēn*) [*azote*; ὀξύς, sharp; *benzene*], $C_{12}H_{10}N_2O$. A compound obtained by the reduction of nitrobenzene. It forms long yellow needles, easily soluble in alcohol and ether, but not in water.

azulene (*az'-ū-lēn*). Same as *cerulein*.

azurin (*az'-ū-rin*). Sodium-theobromine acetate, used as a diuretic.

azurophile, azurophil (*az-ū'-ro-fil*) [*azure*; φιλεῖν, to love]. Staining promptly with an azure dye.

azyges (*az'-ij-ēz*) [ἄζυγής, unwedded]. The sphenoid bone.

azygos (*az'-ig-os*) [ἀ, priv.; ζυγόν, a yoke]. Applied to parts that are single, not in pairs. **a. uvulæ**, a small muscle of the uvula. **a. veins.** See *veins*.

azygous (*az'-ig-us*) [see *azygos*]. Not paired.

azymia (*ah-zi'-me-ah*) [ἀ, priv.; ζύμη, a ferment]. Absence of ferment.

azymic (*ah-zi'-mik*) [ἀ, priv.; ζύμη, a ferment]. Not giving rise to fermentation.

azymous (*az'-i-mus*) [ἀ, priv.; ζύμη, a ferment]. Unfermented.

azzle teeth (*az'-l*) [E. dial., *assal teeth*]. A name given to the molar teeth.

B. 1 The chemical symbol of *boron* 2 Abbreviation for Beaumé s hydrometer, also of *Bacillus*, and *Bacterium*

Ba. The chemical symbol of *barium*

B.A. Abbreviation of Bachelor of Arts

Babbit metal (*bab' it*) An antifriction alloy composed of 8 parts of tin 2 of antimony, and 1 of copper Also used occasionally in dentistry

Babès stain (*bah-bas*) [Victor *Babè s*, Roumanian bacteriologist, 1854–1926] Water 100, aniline oil 2, excess of safranin concentrated aqueous solution

Babes-Ernst's bodies [Victor *Babes*, Paul *Ernst*, German pathologist, 1859–] Bodies found in bacteria, especially those derived from animal bodies or secretions, they stain more deeply than the rest of the cytoplasm

Babesia (*ba be'-ze-ah*) [Victor *Babès*, Roumanian bacteriologist, 1854–1926] See *Piroplasma*

babesiosis (*ba-be-se-o'-sis*) Infection with babesia Same as *piroplasmosis*

Babinski's phenomenon, B 's reflex (*ba bin'-ske*) [Jules *Babinski*, French neurologist, 1857–] Extension of great toe with flexion of other toes on exciting the sole, it is connected with a lesion of the pyramidal tract, and is found in organic, but not in hysterical, hemiplegia Syn , *phénomène des orteils* **B 's sign,** diminution or absence of the Achilles tendon reflex in true sciatica as distinguished from hysterical sciatica

bablabs, bablah (*bab'-labz, lah*) The pods of *Acacia arabica* and some other species, used for coughs, the seeds contain 20 % of tannin

babool, babul bark (*ba bool'*) The astringent, tonic bark of the babul tree, *Acacia arabica*

baby (*ba'-be*) An infant, a newborn child **b., blue,** a baby who is cyanotic owing to non-closure of the foramen ovale **b -farm.** An institution for raising orphan and pauper infants **b.-farming,** the business of caring for the infants of those who may be unable or unwilling to bring up their own children

bacca (*bak'-ka*) [L] A berry

Baccelli's method (*bat-chel' le*) [Guido *Baccelli*, Italian physician, 1832–1916] 1 In echinococcus cysts of the liver aspiration is done on several consecutive days, and washings made with a 1 1000 solution of mercury bichloride and a 1 100 salt solution 2 In tetanus hypodermatic injection of a solution of phenol **B 's sign,** aphonic pectoriloquy The whispered voice is transmitted through a serous, but not through a purulent, pleuritic exudate

baccharine (*bak'-ar in*) A poisonous alkaloid obtained from *Baccharis coridifolia*

Baccharis (*bak'-ar-is*) [*βάκκαρις*, a fragrant herb] A genus of composite trees *B halimifolia*, the groundsel-tree, is a shrub of North America A decoction of the leaves and bark is a popular demulcent and pectoral medicine *B pilularis*, kidney plant, a native of the Pacific coast of the United States, is used in cystitis

bacchia (*bak'-e-ah*, or *bak-i'-ah*) [*Bacchus*, the god of wine] A synonym of *acne rosacea* **b rosacea.** Synonym of *acne rosacea*, *q v.*

bacciform (*bak'-si form*) [*bacca*, *forma*, form] Berry-shaped

Bach's reagent for hydrogen dioxide. This consists of two solutions (*a*) 0 03 potassium dichromate and 5 drops of aniline in 1 liter of water, (*b*) 5 % oxalic acid solution Shake 5 Cc of the solution to be tested with 5 Cc of solution *a* and 1 drop of solution *b*, in the presence of hydrogen dioxide a violet red color results

bacid (*bas' id*) Trade preparations containing the bacillus acidophilus

bacillac (*bas' il ak*) Trade name of a preparation of milk which has been soured by the lactobacillus

Bacillaceæ (*bas il-a'-se-e*) [see *bacillus*] A family of *Schizomycetes* or bacteria consisting of rod-shaped forms, most of which produce endospores See *table* p 830

bacillar, or **bacillary** (*bas'-il-ar, bas'-il-a re*) [*bacillus*] 1 Relating to bacilli or to a bacillus 2. Consisting of or containing rods

bacillemia, bacillæmia (*bas-il-e'-me-ah*) [*bacillus*, *αἷμα* blood] Presence of bacilli in the blood.

bacilli (*bas-il' i*) [*bacillus*] 1 Plural of *bacillus*, *q v* 2 In pharmacy, cylindrical lozenges

bacilli-carrier A person who is apparently in good health but who has pathogenic bacteria (such as typhoid) in his tissues or secretions and so is able to spread the disease

bacillicidal (*bas il is i' dal*) [*bacillus*, a rod, *cædere*, to kill] Destructive to bacilli

bacillicide (*bas il' is id*) [*bacillus*, a rod, *cædere*, to kill] 1 Destructive to bacilli 2 An agent that destroys bacilli

bacilliculture (*bas il e kul'-chur*) [*bacillus*, a rod, *cultura* cultivation] 1 The artificial culture of bacilli for the purpose of studying their nature and life 2 A culture containing bacilli.

bacilliform (*bas il' if orm*) [*bacillus*, *forma*, form]. Having the shape or appearance of a bacillus.

bacilliparous (*bas il ip' ar-us*) [*bacillus*, *parere*, to produce] Producing bacilli

bacillogenous (*bas il-oj'-en-us*) [*bacillus*, *generare*, to beget] Due to bacilli, producing bacilli

bacillol (*bas' il-ol*) A coal-tar distillation-product resembling lysol, its active property being due to cresols of which it contains 52 % It is an oily fluid, of faint alkaline reaction, dark-brown color, and odor of pitch, readily soluble in water, with sp gr of 1 100, and bactericidal in dilute solution In veterinary practice it is use i in 2 % solution

bacillophobia (*bas-il-o-fo'-be-ah*) [*bacillus*, *φόβος*, fear] Morbid fear of microbes

bacillosis (*bas il-o'-sis*) [*bacillus*] The condition caused by infection with bacilli

bacilluria (*bas-il-ū'-re-ah*) [*bacillus*, *οὖρον*, urine] The discharge of urine containing bacilli

bacillus (*bas-il'-us*) [dim of *baculus*, a rod, pl , *bacilli*] 1 A genus of the *Schizomycetes* comprising the rod-shaped forms of bacteria 2 One of the genus *Bacillus* See *table of Bacillaceæ*, page 830 3 A medicated rod or bougie 4. Any rod like body, or, specifically, one of the retinal rods See *alcaligenes fæcalis*

bacillus carrier. See *bacillus-carrier.*

back (*bak*) [ME., *bak*]. Dorsum; posterior aspect. **b.-airing,** a term used in hygiene to designate the admission of fresh air to traps by means of a separate ventilating pipe of small diameter. **b.-rest,** a cloth-covered frame adjusted to any height by means of braces and ratchets, designed to relieve bedridden patients. **b., trench,** a condition characterized by pain and stiffness in the dorsal and lumbar regions as a result of hardships undergone in the trenches.

backbone (*bak'-bōn*). The vertebral column.

backset. A relapse of a disease.

$BaCl_2$. Barium chloride.

bacony infiltration (*ba'-kon-e in-fil-tra'-shun*). Same as *amyloid degeneration.*

bacteria (*bak-te'-re-ah*). Plural of bacterium (*q. v.*).

Bacteriaceæ (*bak-te-re-a'-se-e*) [*bacterıa*]. The *Schizomycetes* which form the class of microorganisms (fungi; bacteria) that multiply by fission. See *table of microorganisms,* p. 799.

bacterial (*bak-te'-re-al*). Resembling, of the nature of, or derived from bacteria **b. vaccine.** See *bacterine.*

bactericidal (*bak-te-rıs-ıd'-al*) [*bacteria; cædere,* to kill]. Destructive to bacteria.

bactericide (*bak-te'-rıs-īd*) [*bacterıa; cædere,* to kill]. 1. Destructive to bacteria. 2. An agent that destroys bacteria.

bacteridium (*bak-ter-ıd'-e-um*) [*βακτήριον,* a little stick]. A genus of *Bacteriaceæ* characterized by immobility at all periods of their existence (Davaine). The distinction no longer obtains.

Bacterieæ (*bak-ter-ı'-e-e*) A tribe of the *Bacteriaceæ.*

bacteriemia (*bak-te-re-e'-me-ah*). The presence of bacteria in the blood.

bacteriform (*bak-te'-re-form*) [*bacterium; forma,* form]. Shaped like a bacterium.

bacterination (*bak-ter-ın-a'-shun*). Inoculation with bacterial vaccines.

bacterine (*bak'-ter-ēn*). Any vaccine prepared from a specific bacterium; a bacterial vaccine. See *vaccine, bacterial.* It is a preparation of killed bacteria suspended in a normal saline solution. **b., autogenous,** one prepared from bacteria obtained from the patient. **b., polyvalent,** one containing bacteria of the same species but derived from many different sources. **b., stock,** one made from bacteria not obtained from the patient.

bacterio- (*bak-te-re-o*) [*bacterium*]. A prefix meaning relating to bacteria.

bacteriocidin (*bak-te-re-o-sı'-dın*) [*bacterio-; cædere,* to kill]. Any substance in the blood which is capable of destroying bacteria.

bacteriofluorescin (*bak-te-re-o-flu-o-res'-ın*). A fluorescent coloring-matter produced by the action of certain bacteria.

bacteriogenic (*bak-te-re-o-jen'-ik*) [*bacterio-; generare,* to produce]. Caused by bacteria.

bacteriogenous (*bak-te-re-oj'-en-us*). 1. Producing bacteria. 2. Bacteriogenic.

bacteriohemagglutinin (*bak-te-re-o-hem-ag-lu'-tın-ın*). A hemagglutinin produced in the body by the action of bacteria; it is very unstable, being destroyed at 58° C.

bacteriohemolysin (*bak-te-re-o-hem-ol'-ıs-ın*). A very unstable hemolysin formed in the body by bacteria; it is destroyed at 58° C.

bacterioid (*bak-te'-re-oıd*) [*bacterio-; εἶδος,* form]. Resembling bacteria; bacteriform.

bacteriologic, bacteriological (*bak-te-re-o-loj'-ik, bak-te-re-o-loj'-ik-al*). Pertaining to bacteriology.

bacteriologist (*bak-te-re-ol'-o-jist*) [*bacterıology*]. One versed in bacteriology.

bacteriology (*bak-te-re-ol'-o-je*) [*bacterio-; λόγος,* science]. The science and study of bacteria.

bacteriolysin (*bak-te-re-ol'-ıs-ın*). A specific anti-body developed in the blood by the action of any one bacterium and capable of causing the disintegration of the same bacterium.

bacteriolysis (*bak-te-re-ol'-ıs-ıs*) [*bacterio-; λύσις* a loosing]. The disintegration of bacteria, usually by means of a specific antibody

bacteriolytic (*bak-te-re-o-lit' ık*). Possessing a disintegrating action upon living bacteria. Pertaining to bacteriolysis

bacteriopathology (*bak-te-re-o-path-ol'-o-je*) [*bacterıo-; pathology*]. The science of diseases due to bacteria

bacteriophage (*bak-te'-re-o-faj*) [*bacterıa; φαγεῖν,* to eat]. An agent which destroys microorganisms, supposed to be caused by a parasite of parasites See *protobe*

bacteriophobia (*bak-te-re-o-fo'-be-ah*) [*bacterio-; φόβος,* fear] A morbid dread of bacteria or other microorganisms.

bacteriophytoma (*bak-te-re-o-fi-to'-mah*) [*bacterio-; φυτόν,* a growth]. A newgrowth caused by bacteria.

bacterioplasmin (*bak-te-re-o-plaz'-mın*) [*bacterıo-; πλάσμα,* anything formed or molded]. One of several toxic principles or toxalbumins extracted from pathogenic organisms, as of cholera or typhoid fever, by pressure.

bacterioprotein (*bak-te-re-o-pro'-te-ın*) [*bacterio-πρῶτος,* first]. A protein contained in bacteria A toxalbumin.

bacteriopsonin (*bak-te-re-op'-son-ın*) [*bacterio-opsonin*]. An opsonin which acts upon bacteria and not upon blood corpuscles.

bacteriopurpurin (*bak-te-re-o-pur'-pu-rin*) [*bacterio-; purpura,* purple]. A peach-colored pigment found in the protoplasm of *Beggiatoa roseopersicina.*

bacterioscopic (*bak-te-re-o-skop'-ik*) [*bacterio-; σκοπεῖν,* to view]. Pertaining to bacterioscopy

bacterioscopist (*bak-te-re-os'-ko-pıst*) [*bacterıo-; σκοπεῖν,* to look]. A person devoted to the investigation of bacteria.

bacterioscopy (*bak-te-re-os'-ko-pe*) [*bacterio-; σκοπεῖν,* to inspect]. The microscopic study of bacteria.

bacteriosis (*bak-te-re-o'-sıs*) [*bacterium*]. The action of bacteria in the system; infection by bacteria.

bacteriostasis (*bak-te-re-os'-tas-ıs*) [*bacterio-στάσις,* a standing still]. Arrest or hindrance of the growth of bacteria.

bacteriostat (*bak-te'-re-o-stat*) [*bacterio-; στάσις,* a standing still]. Any agent which arrests or hinders the growth of bacteria.

bacteriotherapeutic (*bak-te-re-o-ther-ap-ū'-tik*) [*bacterio-; therapeutic*]. Relating to bacteriotherapy.

bacteriotherapy (*bak-te-re-o-ther'-ap-e*) [*bacterio-; therapy*]. The treatment of disease by the introduction of bacteria or their products into the system.

bacteriotoxin (*bak-te-re-o-toks'-ın*). A specific substance poisonous to bacteria.

bacteriotropic (*bak-te-re-o-trop'-ik*) [*bacterio-; τροπή,* a turning]. A generic term used by Wright to denote all substances in the blood which turn toward or are attracted to bacteria. Said of agglutinins.

bacteriotropin (*bak-te-re-ot'-ro-pin*) [*bacterio-*; *τροπή*, a turning]. Immune opsonin. A principle in the blood which, by its action on bacteria, aids the phagocytic action of the leukocytes.

bacteritic (*bak-ter-it'-ik*). Relating to or due to bacteria.

Bacterium (*bak-te'-re-um*) [*βακτήριον*, a little stick; pl., *bacteria*]. 1. A synonym of *Schizomyces* or *Microorganism*. 2. The word was formerly restricted to a genus of schizomycetous fungi established by Ehrenberg (1838) and Dujardin (1841), characterized by short, linear, inflexible, rod-like forms, without tendency to unite into chains or filaments. Morphologically, bacteria are spherical (*cocci*); in the form of straight rods (*bacilli*); or of twisted rods (*spirilla*). Bacteria are either *aerobic*, requiring free oxygen or *anaerobic*, not requiring free oxygen. Again, certain forms appear to possess the ability to flourish in either condition, and are known as *facultative aerobic* or *facultative anaerobic*. Bacteria are either motile or nonmotile; they may exist as *saprophytes*, *facultative parasites*, *strict*, *obligate*, or *true parasites*. Those that produce pigment are known as *chromogenic*; those that produce fermentation, as *zymogenic*; those that affect adversely the health of plants or animals, as *pathogenic*. See special terms under appropriate headings, also *table of Bacteriaceæ*, p. 799, and *Pathogenic Bacteria* p 1496

bacteriuria (*bak-te-re-ū'-re-ah*) [*bacterium*; *οὖρον*, urine]. The discharge of urine containing bacteria.

bacteroid (*bak'-ter-oid*) [*bacteria*; *εἶδος*, form]. Resembling bacteria.

bacterol (*bak'-ter-ol*). Trade name of an antiseptic preparation containing formaldehyde, iodine, eucalyptus, and peppermint.

baculiform (*bak-ū'-le-form*) [*baculum*, a stick; *forma*, form]. Rod-shaped

Badal's operation (*bad-al'*) [Antoine Jules *Badal*, French ophthalmologist, 1840–]. Rupture of the infratrochlear nerve for the relief of pain in glaucoma.

badex (*ba'-deks*). A mixture used by bakers as a substitute for wheat flour.

bael (*ba'-el*). See *bel*.

Baelz's disease (*baelts*) [Erwin *Baelz*, German physician, 1845–1913]. Progressive ulceration and destruction of the mucous glands of the lips.

(von) Baer's cavity [Carl Ernst von *Baer*, Russian embryologist, 1792–1876]. The segmentation cavity of the blastula. **B.'s law**, the more special forms of structure arise out of the more general, and that by a gradual change. **B.'s vesicle**, the ovule.

Baer's method [William Stevenson *Baer*, American orthopedic surgeon, 1872–]. In an ankylosed joint, the adhesions are broken and sterile oil is then injected to prevent the reforming of the adhesions.

Baerensprung's erythrasma (*bār'-en-sproong*) [Friedrich von *Baerensprung*, German physician, 1822–1865]. Eczema marginatum of the thighs.

Baeyer's reaction for glucose. Indigo is formed on boiling a glucose solution with orthonitrophenylpropionic acid and sodium carbonate. When the glucose is in excess, this blue is converted into indigo white. **B.'s reaction for indol**, a watery solution of indol to which have been added 2 or 3 drops of fuming nitric acid and then a 2% solution of potassium nitrite drop by drop, yields a red liquid and then a red precipitate of nitrosoindol nitrate, $C_{16}H_{18}(NO)N_{21}HNO_2$.

bag [AS., *bælg*]. 1. A sac. 2. The scrotum. **b., intragastric**, an elastic rubber bag which, when folded over a tube which runs through it, occupies less space than in ordinary stomach-tube, and which has the exact shape of the stomach when it is inflated within that organ. It is employed to obtain the contents of the duodenum. **b. of waters**, the fetal membranes inclosing the liquor amnii and projecting through the os uteri early in labor. The sac usually ruptures when the cervix is dilated.

Bagdad boil. *Furunculus orientalis*, *q. v.*

bagnio (*ban'-yo*) [It., *bagno*, from Latin *balneum*, a bath]. 1. A bath-house. 2. A house of prostitution.

Bagot's local anesthesia mixture. Cocaine hydrochloride, 0.04 Gm. and sparteine sulphate, 0.05 Gm.; this is dissolved in 1 or 2 Cc. of boiled water.

Baillarger's outer band, line, or layer (*bī'-yar-gha*) [Jules Gabriel François *Baillarger*, French neurologist, 1806–1891]. A white band in the layer of large pyramidal cells of the cortex cerebri. See also *Gennari* and *Vicq d'Azyr*. **B.'s internal band or line**, a white band between the layer of large pyramidal cells and the polymorphous layers of the cortex. **B.'s sign**, difference in the size of the pupils in paralytic dementia.

Baillie's pill (*ba'-le*) [Matthew *Baillie*, English physician, 1761–1823]. A pill composed of one gr. each of powdered digitalis leaves, powdered squill and mercury pill.

bain-marie (*ban-mah-re'*) [Fr.]. An instrument for immersing solutions, microorganisms, etc., in water or chemical solutions, thus keeping them at a desired temperature.

Bain's method of artificial respiration. A modification of Sylvester's method (*q. v.*); the structures surrounding the axilla are seized so that traction is made directly upon the pectoral muscles.

Baker's cysts [William Morrant *Baker*, English surgeon, 1839–1896]. Hernial protrusions of the synovial membrane of the joints through the fibrous capsule.

bakers' itch. An eczematous affection of the hands, caused by the irritation of the yeast. **b.'s leg**, knock-knee, or genu valgum. **b.'s salt.** A synonym of *smelling-salts* or *ammonium bicarbonate*; it is sometimes used by bakers in leavening cakes. **b.'s stigmata**, corns on the fingers from kneading dough.

bakkola (*bak'-o-lah*). A fungus which grows on birch trees in Finland; it is used in the form of a decoction as a cancer-cure.

balance (*bal'-ans*) [L., *bilanx*, having two scales]. 1. An instrument for weighing. 2. The harmonious adjustment of related parts. **b., electromagnetic**, an apparatus for estimating the intensity of electric currents. **b., thermic.** See *bolometer*. **b., torsion**, an instrument for estimating magnetic attraction and repulsion.

balanic (*bal'-an-ik*) [*βάλανος*, the glans penis]. Pertaining to the glans of the penis or of the clitoris.

balanism (*bal'-an-izm*) [*βάλανος*, acorn; pessary; the glans penis]. The application of a pessary or suppository.

balanitis (*bal-an-ī'-tis*) [*βάλανος*, the glans penis; *-itis*, inflammation]. Inflammation of the glans penis.

balano- (*bal-an-o-*) [βάλανος, the glans penis]. A prefix meaning relating to the glans penis.

balanoblennorrhea (*bal-an-o-blen-or-e'-ah*) [*balano-*; βλέννα, mucus; ῥοία, a flow]. Gonorrheal balanitis.

balanocele (*bal-an'-o-sēl*) [*balano-*; κήλη, a hernia]. The protrusion of the glans through an opening in the prepuce, as occurs in gangrenous phimosis.

balanochlamyditis (*bal-an-o-klam-id-i'-tis*) [*balano-*; χλαμύς, cloak; ῑτις, inflammation] Inflammation of the glans and prepuce of the clitoris.

balanoplasty (*bal'-an-o-plas-te*) [*balano-*; πλάσσειν, to form] Plastic surgery of the glans penis.

balanoposthitis (*bal-an-o-pos-thi'-tis*) [*balano-*; πόσθη, prepuce; ῑτις, inflammation]. Inflammation of the glans penis and of the prepuce.

balanopreputial (*bal-an-o-pre-pu'-she-al*) [*balano-*; *præputium*, prepuce]. Relating to the glans penis and the prepuce.

balanorrhagia (*bal-an-or-a'-je-ah*) [*balano-*; ῥήγνυναι, to burst out]. Gonorrheal balanitis, with copious discharge of pus.

balanorrhea (*bal-an-or-e'-ah*) [*balano-*; ῥοία, a flow]. Purulent balanitis.

balantidiosis (*bal-an-tid-e-o'-sis*). Infestation by a species of *Balantidium*.

Balantidium (*bal-an-tid'-e-um*) [βαλαντίδιον, dim. of βαλάντιον, a bag]. A genus of protozoa. **B. coli,** a protozoan parasite found in the intestine of man and other vertebrates. **B. minutum,** a protozoan found in the feces, smaller than the *B. coli*.

balanus (*bal'-an-us*) [βάλανος, an acorn] 1. The glans of the prepuce or of the clitoris. 2. A pledget, suppository, or pessary.

balata (*bal-at'-ah*) [native Guiana]. The dried milky juice of the bully-tree, *Mimusops balata*, and of several other sapotaceous trees of Guiana. It is intermediate between caoutchouc and guttapercha, and is used chiefly in England as a substitute for these.

balatin (*bal'-at-in*). The creamy sap from a South American tree, *Mimusops kauki;* it is used as a varnish and vehicle in skin diseases.

Balbiani, body of (*bal-be-ah'-ne*) [*Balbiani*, Italian physician, 1825–]. The yolk-nucleus or idiosome, a small body seen near the nucleus of the oocyte.

balbucinate (*bal-bu'-sin-āt*) [*balbutire*, to stammer]. To stammer.

balbuties (*bal-bū'-she-ēz*) [*balbutire*, to stammer]. Stammering.

bald (*bawld*) [ME., balde, bald]. Wanting hair. A term applied to one who has lost the hair of the scalp. **b. ringworm.** See *tinea tonsurans*.

baldness (*bawld'-nes*). Loss of hair; alopecia.

Baldy's operation (*bawl'-de*) [John Montgomery *Baldy*, American gynecologist, 1860–]. *For prolapse of the uterus.* The uterus is removed at the internal os, and the cervical stump is fixed to the abdominal wall at the lower end of the incision by means of two silkworm-gut sutures; these latter are made to transfix the cervical stump from side to side and the free ends are brought through the peritoneum, muscles, and deep fascia. They are then securely tied and cut off short and the knots are buried, and the abdominal incision is closed.

Balfour's disease [George William *Balfour*, English physician, 1822–1903]. A fatal disease of childhood, with postmortem findings of greenish-yellow or greenish-gray fibrosarcoma in various parts of the body, especially the periosteum. Syn., *chloroma; chlorosarcoma.*

Balkan frame (*bawl'-kan*). Four upright rods fixed to bed-posts, connected at top and ends by adjustable slats

ball (*bawl*) [ME., *ball*]. 1. An object having a round or spherical shape. 2. In anatomy, any globular part. 3. In veterinary medicine a pill or bolus. **b. of foot,** the rounded part at the base of the great toe. **b. of thumb,** the rounded part at the base of the thumb **b., martial,** balls made of 2 parts of cream of tartar and 1 part of iron filings; they were used in the preparation of ferruginous baths. Syn., *boli martis; globuli martis.* **b.-and-socket joint.** See *diarthrosis* and *enarthrosis.* **b.-thrombus,** a non-attached antemortem clot in the heart.

Ball's operation. 1. *Iliac colotomy,* in which the incision is made in the left semilunar line, and the bowel secured above and below the future artificial opening by means of two special clamps, which are removed after suturing and opening of the bowel. 2. *For inguinal hernia;* the sac is separated up to the abdominal portion of the neck, and then twisted around its own axis, after which the fundus is cut away and the stump is secured in the ring. 3 *For pruritusani;* section of the sensory nerve trunks of the anus.

ballet-dancer's cramp. See *cramp.*

Ballet's disease (*bal-la'*) [Gilbert *Ballet*, French ophthalmologist, 1853–1916]. Ophthalmoplegia externa. **B.'s sign,** the loss of all voluntary movements of the eyeball, with preservation of the automatic movements and integrity of the movements of the pupil. It is seen in B.'s disease, hysteria and exophthalmic goiter.

Ballingal's disease (*bal'-ing-awl*) [Sir George *Ballingall*, British surgeon, 1780–1855] Mycetoma

ballismus (*bal-iz'-mus*) [βαλλισμός, a leaping]. 1. Chorea. 2. Paralysis agitans.

ballistics (*bal-is'-tiks*) [βαλλεῖν, to throw, hurl]. The science of the trajectory of projectiles.

ballistophobia (*bal-is-to-fo'-be-ah*) [βαλλεῖν, to hurl; φόβος, fear] Morbid fear of projectiles.

ballonnement (*bal-lōn-mahn'*) [Fr.]. The ballooning or distending of a part for operative or diagnostic purposes

balloon (*bal-oon'*) [Mod. E., *baloon*, a large bag]. 1. In chemistry, a spherical glass receiver with a short neck. 2. To distend a body-cavity by means of air-bags or water-bags. **b. sickness,** an abnormal condition due to the breathing of an insufficient amount of oxygen.

ballooning (*bal-oon'-ing*). Surgical distention of the vagina or other cavity, by air- or water-bags.

ballottable (*bal-ot'-abl*) [see *ballottement*]. Capable of exhibiting ballottement.

ballottement (*bal-ot-mon(g)*) [Fr., *ballottement*, tossing; shaking about]. A method of diagnosing pregnancy from the fourth to the eighth month. A push is given the uterus by the finger inserted into the vagina, and if the fetus is present, it will rise and fall again like a heavy body in water. **b., cephalic,** the rebound of the fetal head against the hand when depressed through the abdominal wall. **b., ocular,** the falling of opaque particles in a fluid vitreous humor after movements of the eyeball.

balm (*bahm*) [*balsamum*, a balsam]. 1. A popular synonym of *balsam.* 2. Any soothing application or ointment. See *melissa.* **b. of Gilead,** an oleoresin from the *Balsamodendron gileadense.*

balmony (*bal'-mo-ne*) [origin uncertain]. The herb *Chelone glabra;* cathartic and anthelmintic.

Dose of the fldext ʒ ss-ʒ *Chelonin*, the concentrated ext Dose gr ʃ iv

balmosa (*bal-mo'-sah*) Trade name of a combination of methyl salicylate with sorbefacients, it has a non-greasy basis, and is used in rheumatism, sciatica, etc

Balne's cough (*bal'-ne*) A cough occurring when the patient lies down, it occurs in obstruction of the nasopharynx

balneal (*bal'-ne al*) Relating to baths

balneation (*bal ne-a'-shun*) [*balneum*, a bath] 1. The act of bathing 2 Balneotherapy

balneography (*bal-ne-og'-ra-fe*) [*balneum*, γράφη, a writing] A treatise on bathing, baths, and mineral springs

balneology (*bal-ne-ol'-o je*) [*balneum*, λόγος, science] The science of baths and mineral waters, and their effects upon the system

balneophysiology (*bal-ne-o-fiz-e-ol'-o-je*) [*balneum, physiology*] The physiology of bathing, the science of the effects of baths upon the system

balneotechnics (*bal-ne-o tek' niks*) [*balneum*, a bath, τεχνη an art] The art of properly preparing baths as to constituents and temperature and the administration of them

balneotherapeutics (*bal-ne o ther ap u'-tiks*) See *balneotherapy*

balneotherapy (*bal ne o ther' ap e*) [*balneum*, θεραπεία, treatment] Systematic bathing for therapeutic purposes, or the treatment of disease by baths

balneum (*bal'-ne um*) [L] A bath See *bath* **b arenæ**, a sand bath See *ammotherapy* **b lacteum**, a milk bath **b luteum**, a mud bath **b pneumaticum**, an air-bath

balsam (*bawl' sam*) [βάλσαμον the resin of the balsam-tree] The resinous volatile, aromatic substance, liquid or solid obtained from certain trees by natural exudation or by artificial extraction Balsams are divided into two classes—those with, and those without benzoic and cinnamic acids In general they are mixtures of various essential oils resins and acids **b.-apple**, the plant *Momordica balsamina* and its warty, gourd-like fruit It is purgative but its tincture is used in domestic medicine chiefly as a vulnerary **b.-bog**, a singular stone-like, woody, umbelliferous plant *Bolax*, or *Azorella glebaria* of the Falkland Islands and Patagonia Its aromatic gum is locally prized as a vulnerary, desiccative and antigonorrheal remedy **b , Canada**, a turpentine gathered from the natural blisters of the bark of *Abies balsamea* It is used as a mounting medium by microscopists See under *turpentine* **b of copaiba.** See *copaiba* **b. of fir** Same as *b , Canada* **b , friars'.** See *benzoin* **b , Houmiri, b , Humiri**, the fragrant exudate from the trees *Humiria balsamifera* and *H. floribunda*, natives of South America It is used as an expectorant and vermifuge Syn , *Umire* **b. of Peru** (*balsamum peruvianum*, U S P), the balsam obtained from *Toluifera pereirae*, antiseptic, stimulant to the circulation, and sedative to the nervous system, tonic and expectorant Applied locally, it is useful in chronic inflammatory skin diseases Dose of the *emulsion* 10–25 min (0 6–1 5 Cc) **b.-root**, a popular name for certain composite flowered plants of the genus *Balsamorrhiza B hookeri, B macrophylla*, and *B sagittata* are common in the Pacific States and abound in a resinous balsam **b., Samaritan**, a mixture of equal parts of oil and wine, heated together, and a tenth part of rosemary leaves **b., stimulant**, a mixture of 8 parts of turpentine and 1 part of mustard flour **b , sulphur**, a mixture of 8 parts of olive oil and 1 part of sublimed sulphur heated together **b , tagulaway, b , tagulavay**, a yellow oil prepared in the Philippines by boiling the bark and twigs of the cebu, *Parameria vulneraria*, in cocoanut oil, it is used as a vulnerary and in skin diseases Syn , *cebur, Jagulaway balsam* **b of Tolu, b of Tolutan** (*balsamum tolutanum*, U S P), obtained from *Toluifera balsamum* Its properties are due to a volatile oil, *toluene* It possesses an agreeable odor, and is a basis for many cough mixtures It is expectorant See also *Tolu*

balsamation (*bawl-sam-a'-shun*) [see *balsam*] 1. Embalmment with balsamic or aromatic spices. 2 The act of rendering balsamic

balsamic (*bawl-sam'-ik*) Pertaining to or having the nature or qualities of a balsam **b tincture**, compound tincture of benzoin

balsamodendron (*bawl sam o den' dron*) See *bdellium* and *myrrh*

balsamum (*bawl' sam-um*) [*balsam*] A balsam. **b. dipterocarpi.** See *Gurjun balsam*

Balser's fat-necrosis (*bol'-ser*) [August *Balser*, German surgeon] An acute disease of the pancreas with areas of fat-necrosis in the interlobular tissue of that organ, in the omentum and mesentery at times also in the pericardial fat and bone-marrow

balteum venereum (*bal'-te-um ve-ne'-re-um*) [*balteum*, belt, *venereum* relating to Venus] Venus s girdle, a mercurial plaster used in the treatment of syphilis

bamber oil (*bam'-ber*) A culicide made of citronella oil 1½ kerosine oil 1, cocoanut oil 2, and 1 % of phenol, used as a preventive against malaria when mosquito nets are not procurable

Bamberger's bulbar pulse (*bahm'-ber-ger*) [Heinrich von *Bamberger*, Austrian physician, 1822–1888] Pulsation of the jugular vein,—the bulbus venæ jugularis —synchronous with the systole, in tricuspid insufficiency **B 's disease,** saltatory spasm **B.'s fluid,** an albuminous mercuric compound used in the treatment of syphilis It is made as follows To 100 Cc of a filtered solution of white of egg (containing 40 Cc of albumin and 60 Cc of water) there are added 60 Cc of a solution of mercuric chloride (containing 5%, or 3 Gm , of mercuric chloride and 60 Cc of a solution of sodium chloride (containing 20%), finally, 80 Cc of distilled water is added, which brings the bulk of the solution up to 300 containing 0 010 mercuric chloride in every cubic centimeter **B 's hematogenic albuminuria,** albuminuria occurring during the later stages of severe anemia **B 's sign,** allocheiria, perception of a stimulus applied to the skin of one extremity at the corresponding place on the other extremity. **B 's type of hypertrophic pulmonary osteopathy,** a form in which painful thickenings of the long bones, especially of the forearm and leg, are a prominent symptom

Bamberger-Marie disease (*bahm'-ber-ger-mar-ee'*) [Heinrich von *Bamberger*, Austrian physician, 1822–1888, Pierre *Marie*, French physician, 1853–] Hypertrophic pulmonary osteo-arthropathy

bamboo (*bam-boo'*) [E Ind , *bambu*] A popular name for many tree-like, woody-stemmed grasses, especially those of the genus *Bambusa*. *Bambusa arundinacea* is employed as an altera-

tive, anthelmintic, and depurative. **b.-brier,** the root of *Smilax sarsaparilla*, habitat, southern United States. Its properties are identical with those of sarsaparilla. Dose of the *fluidextract* ½–2 dr. (2–8 Cc).

banana (*ban-an'-ah*) [Sp.]. The fruit of the common banana, *Musa sapientsum*, said to be a valuable alterative, and useful in strumous affections. Dose of the *fluidextract* 10–30 min. (0.6-2.0 Cc.).

bananina (*ban-an-in'-ah*). Banana flour, plantain flour; the fruit of *Musa sapientsum*, dried and pulverized.

banausea (*ban-aw'-shur*) [βαναυσία, handicraft]. Mechanical work as opposed to mental achievement; Hippocrates' term for the practice of medicine regarded from a commercial standpoint rather than as an art; quackery.

band [ME., *bande*]. That which binds. A stripe. A ligament. **b.s., amniotic,** bands formed by drawn-out adhesions between the fetus and the amnion where the cavity has become distended through the accumulation of fluid. Syn., *Simonart's bands*. **b., anogenital,** the rudiment of the perineum, a transverse band of integument completing the division of the cloaca in the embryo. **b. auriculoventricular,** the bundle of His **b., axis,** the primitive streak. **b., belly-,** a flannel band wound around the abdomen. **b. of the colon, inner,** a band-like thickening of the muscular coat running along the inner surface of the ascending and descending colon and the inferior aspect of the transverse colon. **b.s., fetoamniotic,** amniotic bands producing deformities or intrauterine amputation. **b., furrowed,** a small band of cinerea uniting the uvula cerebelli with the cerebellar tonsils. **b., head-,** a strap for securing a mirror to the forehead. **b., horny (of Tarinus),** the fore part of the tænia semicircularis. **b., mesoblastic,** a band of mesoblastic cells which extends the entire length of the embryo. **b., moderator,** a fibromuscular fillet that frequently extends across the right ventricle of the heart. Syn., *Moderator band*. **b. of Remak.** See *fiber, axial;* also *Purkinje, axis-cylinder of*. **b.s., supraorbital,** the embryonal thickenings above the eyes and to the outer side of them.

bandage (*ban'-dāj*) [Fr., *bande*, a strip]. Bandages are usually strips of muslin or other material, of varying widths and lengths, used in surgery for the purpose of protecting, compressing, etc., a part, or for the retention of dressings and applications. A *simple bandage* or *roller* consists of one piece; a *compound*, of two or more pieces. *Starch, plaster-of-paris, silica, dextrin, tripolith*, etc., are used for making stiff and *immovable dressings or bandages*. According to their direction, bandages are classed as: 1. *Circular*, circular turns about the part. 2. *Figure-of-8*, the turns crossing one another like the figure 8. 3. *Oblique*, covering the part by oblique turns. 4. *Recurrent*, the turns returning successively to the point of origin. 5. *Spica*, the turns resembling the arrangement of the husks of an ear of corn. 6. *Spiral*, each turn covering one-half of the preceding. 7. *Spiral reverse*, the bandage is reversed in order better to adapt it to the part. Bandages are also classed according to the part to which they are applied. (*See illustrations on pp.* 181, 182.) **b., abdominal.** See *binder*. **b., recurrent,** a bandage used after amputation, to support the flaps of the stump. **b.s., T-,** bandages shaped like the letter T.

bandager (*ban'-da-jer*). One skilled in the application of bandages. See *dresser*.

bandagist (*ban'-da-jist*). A maker of trusses, bandages, and other surgical appliances to be worn upon the person.

bandelette (*ban-dl-let'*). A small bundle.

Bandelour's bed (*band-loo*). An air-bed furnished with a vessel for urine and surmounted with a gauze-covered cradle.

Bandl's ring [Ludwig *Bandl*, German obstetrician, 1842–1892]. The line of depression sometimes felt on digital pressure just above the pubes during labor-pains; it corresponds to the site of the internal os uteri.

bandolin (*ban'-do-lin*) [origin uncertain]. A mucilage made usually of quince-seeds, or of gum-tragacanth, used mainly as a paste for confining the hair and making it lustrous; it is called also *fixature*. See *cydonium*.

bandy leg (*ban'-de leg*). Bow-leg, genu valgum.

baneberry (*bān'-ber-e*). See *Actæa*.

bang, bhang, bangue (*bang*). See *cannabis indica*.

Bang's bacillus [Bernhard L. F. *Bang*, Danish physician, 1848–]. The *Bacillus abortus*.

Bang's method [Iyar *Bang*, Swedish chemist, 1869–1918]. Estimating the amount of constituents of normal or abnormal blood by examination of only one or a few drops of blood.

banian (*ban'-yan*) [Ar., *banyān*, a trader]. A South Asiatic fig-tree, *Ficus bengalensis*, remarkable for the development of roots and secondary trunks from its branches. The bark and seeds are tonic, diuretic, and antipyretic

Bannister's disease (*ban'-is-ter*) [H. M. *Bannister*, American Physician]. Angioneurotic edema; better known as Quincke's disease.

bant [see *Banting treatment*]. To try the Banting treatment.

Banti's disease (*ban'-te*) [Guido *Banti*, Italian physician, 1852–1925]. Enlargement of the spleen with progressive anemia, followed by hepatic cirrhosis.

Banting treatment (*ban'-ting*) [William *Banting*. English undertaker, 1797–1878]. A treatment of obesity; the withdrawal of carbohydrates, and the use of a diet of nitrogenous food

Banting's diabetic method (*ban'-ting*) [Frederick Grant *Banting*, Canadian physician, 1892–]. Method of treating diabetes by the administration of insulin, *q v*.

Bantingism (*ban'-ting-izm*). *Banting treatment*.

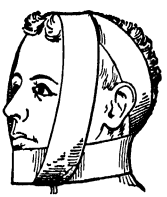
banyan (*ban'-yan*). See *banian*.

B. A. O. Abbreviation for *Bachelor of the Art of Obstetrics*.

baobab tree (*ba'-o-bab*). See *Adansonia digitata*.

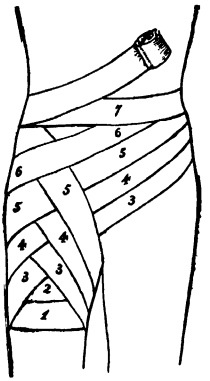
baptin (*bap'-tin*) [*baptisia*]. A purgative glucoside obtainable from *Baptisia tinctoria*.

baptisia (*bap-tiz'-e-ah*) [βάπτισις, a dipping]. Wild indigo. The root-bark of *B. tinctoria*, the properties of which are due to an impure glucoside, the socalled *baptisin*. It is laxative and stimulant in moderate doses, emetic and cathartic in large doses, and is used in amenorrhea, typhus and typhoid fevers, and as a local application to indolent ulcers and gangrenous sores. Dose of the *resin* 1–5 gr. (0 065–0.32 Gm.). **b., extract of.** Dose 1–10 gr. (0.065–0.65 Gm.). **b., fluidextract of.** Dose 2–20 min. (0.13–1.3 Cc.). **b., tincture of.** Dose 5–30 min. (0.32–2.0 Cc.).

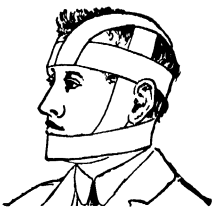


BARTON'S BANDAGE.

RECURRENT OF HEAD.

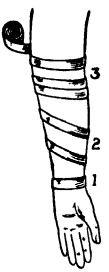


SPICA OF GROIN



GIBSON'S BANDAGE.

BORSCH'S EYE BANDAGE.



1. CIRCULAR TURNS.
2. OBLIQUE TURNS.
3. SPIRAL TURNS.

SPIRAL REVERSED OF THE FOREARM.

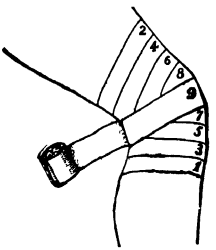


FIGURE OF 8 OF KNEE.

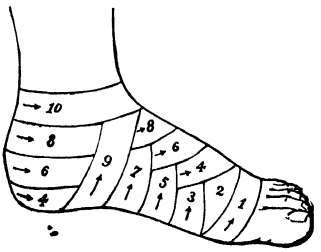
SPIRAL REVERSED BANDAGE.



SPICA OF FOOT.

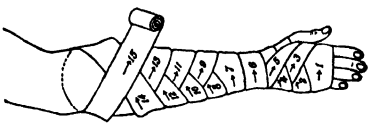


FIGURE OF 8 OF UPPER EXTREMITY.

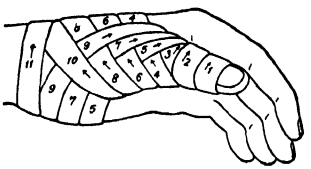
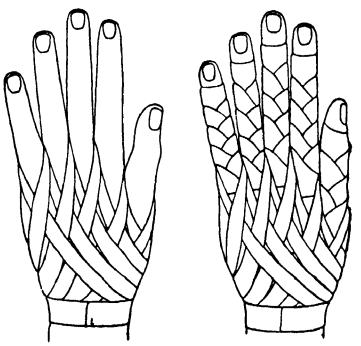
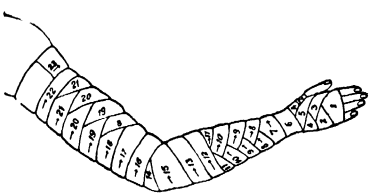


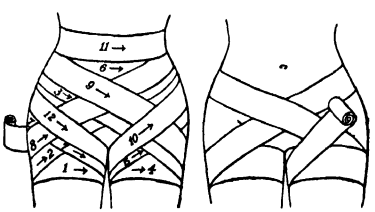
SPICA OF THE THUMB



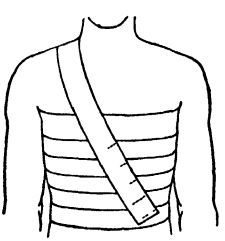
DEMI-GAUNTLET GAUNTLET.



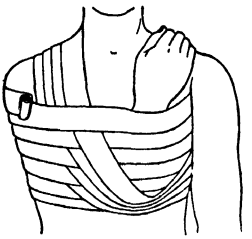
SPIRAL REVERSED OF UPPER EXTREMITY.



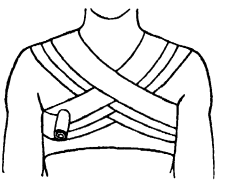
DOUBLE SPICA OF THE GROIN.



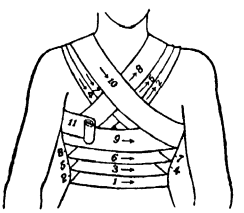
SPIRAL OF THE CHEST.



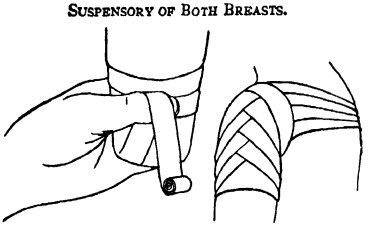
VELPEAU'S BANDAGE.



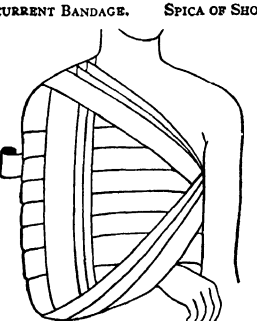
ANTERIOR FIGURE 8 OF CHEST AND SHOULDERS.



SUSPENSORY OF BOTH BREASTS.



RECURRENT BANDAGE. SPICA OF SHOULDER.



DESAULT S BANDAGE.

baptisin (*bap'-tiz-in*) [*baptisia*]. 1. A precipitate from the tincture of *Baptisia tinctoria;* antiseptic, purgative, ecbolic, resolvent. Dose 1–3 gr. (0.065–0.2 Gm.). 2. A bitter glucoside obtainable from the plant *Baptisia tinctoria;* it has little medicinal activity.

baptitoxine (*bap-tit-oks'-in*) [*baptisia;* τοξικόν, a poison]. A poisonous alkaloid obtained from *Baptisia tinctoria.* It hastens respiration and exaggerates vasomotor activity.

baptorrhea (*bap-tor-e'-ah*) [βάπτος, infected; ῥέειν, to flow]. Any infectious discharge from a mucous surface, as gonorrhea.

baptothecorrhea (*bap-to-the-kor-e'-ah*) [βάπτος, infected; θήκη, vagina; ῥέειν, to flow]. Gonorrhea in women.

bapturethrorrhea (*bap-tū-reth-ro-re'-ah*) [βάπτος, infected; *urethra;* ῥέειν, to flow]. Urethral gonorrhea; gonorrhea of men.

bar [OF., *barre*]. 1. A band or stripe. 2. The part of the upper jaw of a horse destitute of teeth. 3. An arch. 4. A prominence of the symphysis pubis projecting into the pelvic cavity. 5. A unit of atmospheric pressure representing one megadyne per square centimeter. **b.s., hyoid,** the pair of cartilaginous plates forming the second visceral arch **b., interureteric,** same as *b. of bladder.* **b. of bladder,** the transverse curved ridge joining the openings of the ureters on the inner surface of the bladder; it forms the posterior boundary of the trigone. Syn., *bar of the bladder; interureteric bar; plica ureterica.*

Bar's incision [Paul *Bar,* French obstetrician] In cesarean section, the abdominal incision is in the median line above the umbilicus; in the uterus the incision extends from the fundus to Bandl's ring.

Bárány's sign, B.'s nystagmus (*bah'-rah-ne*) [Robert *Bárány,* Austrian otologist, 1876–]. If the labyrinth of the ear is diseased injection of water into the external auditory canal causes no nystagmus; if the labyrinth is not diseased, similar injection of water causes nystagmus, such nystagmus being towards the same side if the temperature of the water is above that of the body, and towards the opposite side if the temperature of the water is below that of the body. See *Past pointing*

barba (*bar'-bah*) [L.]. 1. The beard. 2. A hair of the beard.

Barbados aloes (*bar-ba'-dōz al'-ōz*) [*Barbados,* an island in the West Indies]. See *aloes.* **B. distemper.** Synonym of *yellow fever.* **B. leg.** See *elephantiasis arabum.* **B. nut.** See *purging nut*

barbaloin (*bar-bal'-o-in*) [*Barbados;* ἀλόη, aloe], $C_{17}H_{20}O_7$. The aloin derived from Barbados aloes.

barbel (*bar'-bel*) [*barba,* a beard]. The fish *Cyprinus barbus;* the roe is used as a purgative in some countries, and causes vomiting and purging if eaten to excess. **b. cholera,** an epidemic of fish-poisoning from eating diseased barbels. The symptoms are identical with those of cholera nostras, and are due to a ptomaine. Syn., *gastric ichthyotoxism.*

barberry (*bar'-ber-e*). See *berberis.* **b. gum,** a commercial name of certain varieties of gum-arabic.

barber's itch. Sycosis parasitaria.

Barberio's test for semen (*bar-ba'-re-o*). A drop of spermatic fluid or an aqueous extract of a spermatic stain when treated with a saturated aqueous solution of picric acid, shows a precipitate of yellow refractile cystals which increase in size.

barbiers (*bar'-bērz*) [E. Ind.]. A paralytic affection common in India, and probably a myelitis. It is often confounded with beriberi.

barbital (*bar'-bit-al*). Preferred name for veronal.

barbitone (*bar'-bit-ōn*) Barbital, veronal.

barcoo (*bar'-koo*) [Australian]. A peculiar disease, marked by nausea and vomiting, common in Australia. Cause unknown. Also called "Fly-sickness."

Bard's sign [Louis *Bard,* Swiss physician, 1857–1930]. To differentiate between organic and congenital nystagmus. In the former the oscillations of the eyeball increase when the patient follows the physician's finger, moved before his eye alternately from right to left and from left to right. In the latter the oscillations disappear under these conditions.

bardana (*bar-da'-nah*) [L.]. The burdock. See *lappa.*

Bardel's serum (*bar'-del*). An inorganic serum containing sodium chloride 1, sodium sulphate 2, sodium phosphate 3, and phenol 0.5 in 100 parts of water.

Bardinet's ligament (*bar-de-na*) [Barthélemy Alphonse *Bardinet,* French physician, 1809–1874]. The posterior fasciculus of the internal lateral ligament of the elbow-joint; attached above to the postero-inferior portion of the internal condyle, and below to the inner side of the olecranon process

Bareggi's reaction or sign (*bar-ej'-e*). Twenty or 30 drops of blood collected in a small test-tube and allowed to stand for 24 hours will show a nonretracted clot and a small amount of serum if the blood has been taken from a typhoid-fever patient. In tuberculosis, on the other hand, the clot will retract and an abundance of serum will be formed.

baregin (*bar-a'-zhin*). See *glasrin.*

baresthesia (*bar-es-the'-ze-ah*) [βάρος, weight; αἴσθησις, perception]. Perception of weight or pressure.

baresthesiometer (*bar-es-the-ze-om'-et-er*) [βάρος, weight; αἴσθησις, perception; μέτρον, a measure]. An instrument for estimating the sense of weight or pressure.

baresthesiometric (*bar-es-the-ze-o-met'-rik*). Relating to the baresthesiometer.

Barety's method (*bar-a-te'*) [Jean Paul *Barety,* French surgeon, 1887–1912]. An extension method used for the treatment of fracture of the femur and of hip disease.

Barfoed's reagent for dextrose (*bar'-fēd*) [Christen Thomsen *Barfoed,* Swedish physician, 1815–1889]. One part copper acetate dissolved in 15 parts of water; 5 Cc. of acetic acid containing 38% of glacial acetic acid, added to 200 Cc. of this solution. Heat this reagent with a dextrose solution, and a reduction of copper suboxide is produced, but not when heated with lactose or maltose.

baric (*ba'-rik*) [*barium*]. Pertaining to or containing barium.

barilla (*bar-il'-ah*) [Fr., *barille,* impure soda]. Impure sodium carbonate; being ashes obtained by burning various chenopodiaceous plants

barium (*ba'-re-um*) [βάρος, weight]. Ba = 137.-37; quantivalence II. A metal of the group of alkaline earths, of pale yellow color, characterized by a strong affinity for oxygen. The salts are poisonous. **b. arsenate,** $Ba_3(AsO_4)_2$, a white powder, almost insoluble in water. It

is used in tuberculosis and in skin diseases. Dose $\frac{1}{8}$–$\frac{1}{2}$ gr. (0.004–0.016 Gm.). **b. benzoate,** $Ba(C_7H_5O_2)_2 + 2H_2O$, small, colorless plates; it is used instead of digitalis as a heart-stimulant. **b. carbonate,** $BaCO_3$, used in the preparation of the chloride. **b. chloride,** $BaCl_2.2H_2O$, soluble, used as a test for sulphates, which it precipitates as barium sulphate, and also as a cardiac and vasomotor stimulant. Dose $\frac{1}{2}$–5 gr. (0.032–0.32 Gm.). **b. chromate,** $BaCrO_4$, yellow crystals, insoluble in water; it is used as a pigment. Syn., *yellow ultramarine.* **b. hydrate, b. hydroxide,** $Ba(OH)_2$, caustic baryta; a crystalline substance, soluble in water, and used as a test for sulphates, which it precipitates as barium sulphate **b. iodide,** formerly used as an alterative. Dose $\frac{1}{2}$ gr. (0.008 Gm.). It is employed in ointments. **b. manganate,** $BaMnO_3$, emerald-green powder of microscopic prisms or six-sided plates; it has been used as a pigment. **b. meconate,** a compound of barium and meconic acid; it is used as an anthelmintic. **b. oxide,** BaO, baryta. **b. sulphate,** $BaSO_4$. **b. sulphide,** BaS, a white, phosphorescent powder, soluble in water; it is used as an alterant. Dose $\frac{1}{2}$–1 gr. (0.032–0.065 Gm.) in keratin-coated pills. **b. sulphocarbolate,** $Ba(C_6H_5SO_4)_2$, colorless crystals, soluble in water; it is antiseptic

bark [ME., *barke*]. 1. The cortex or covering surrounding the wood of exogenous trees. 2. Synonym of *Cinchona* or *Calisaya bark.* **b., Jesuits',** cinchona. **b., Peruvian.** See *cinchona.* (For other barks, see the names of the plants or trees that produce them)

Barker's operation (*bar'-ker*) [Arthur Edward James *Barker*, English surgeon, 1850–]. 1. *For excision of the astragalus;* the incision runs from just above the tip of the external malleolus forward and a little inward, curving toward the dorsum of the foot. 2. *For excision of the hip;* by an anterior incision, commencing on the front of the thigh, one-half inch below the anterior superior iliac spine, and running downward and inward for three inches.

Barker's post-partum pill (*bar'-ker*) [Fordyce *Barker*, American obstetrician, 1817–1891]. A laxative pill recommended for use during the puerperium. It contains compound extract of colocynth. 1$\frac{2}{3}$ gr., purified aloes $\frac{2}{3}$ gr., extract nux vomica $\frac{1}{12}$ gr, resin of podophyllum $\frac{1}{12}$ gr., ipecac $\frac{1}{12}$ gr., extract of hyoscyamus 1$\frac{1}{2}$ gr.

Barker's solution (*bar'-ker*). A solution of stovaine and glucose, 5% of each; 1 Cc. of this is used for intraspinal anesthesia.

Barkow's ligament (*bar'-ko*) [Hans Carl Leopold *Barkow*, German anatomist, 1798–1873] Ligamentous bundles lying in the fatty tissue of the olecranon fossa; they pass from the upper border of the fossa vertically downward to join the deeper fibers of the posterior ligament of the elbow-joint.

barley (*bar'-le*) [ME., *barly*]. A cereal belonging to the order *Gramineæ;* the most common variety, *Hordeum distichon,* is used as a food, and also in the preparation of malt. **b., decoction of.** See *b.-water.* **b., pearl-,** the decorticated grain, rounded and polished. **b.-water** (*decoctum hordei,* B. P.), a decoction consisting of 2 ounces of pearl-barley boiled in 1$\frac{1}{2}$ pints of water and afterward strained. It is used as a demulcent and food in the diarrheas of children. Dose 1–4 oz. (30–120 Cc.).

Barlow's disease (*bar'-lo*) [Sir Thomas *Barlow*, English physician, 1845–]. Infantile scurvy, generally associated with rickets, and characterized by subperiosteal hemorrhages, especially of the long bones, with painful swellings.

barm (*barm*). Yeast.

Barnes' cervical zone (*barns*) [Robert *Barnes*, English obstetrician, 1817–1907]. The lowest fourth of the internal surface of the uterus. **B.'s curve,** in obstetrics, the segment of a circle, having for its center the sacral promontory, its concavity looking backward. **B.'s dilators,** or **bags,** graduated rubber bags used for dilating the cervix uteri in the induction of abortion or premature labor.

baro- (*bar'-o-*) [*βάρος*, weight]. A prefix implying heaviness.

baroelectroesthesiometer (*bar-o-e-lek-tro-es-the-ze-om'-et-er*) [*baro-; electric; αἰσθησις*, perception; *μέτρον*, a measure] An apparatus to determine the amount of pressure when electric sensibility to pain is felt.

barognosis (*bar-og'-no-sis*) [*baro-; γνῶσις*, knowledge]. Recognition and estimation of the sense of weight.

barograph (*bar'-o-graf*) [*baro-; γράφειν*, to record]. A self-registering barometer.

barology (*bar-ol'-o-je*) [*baro-; λόγος*, science] The branch of physics dealing with gravitation.

baromacrometer (*bar-o-mak-rom'-et-er*) [*baro-; μακρός*, long; *μέτρον*, measure]. An apparatus for ascertaining the weight and length of newborn infants.

barometer (*bar-om'-et-er*) [*baro-; μέτρον*, a measure] An instrument for determining the weight and tension of the atmosphere. It consists essentially of a glass tube, about 36 inches long, closed at one end, filled with mercury, and inverted in a basin of mercury. The mercury will sink in the tube until it rests at a height of about 30 inches (760 mm.) at the sea-level, the height varying as the atmospheric pressure increases or diminishes. **b., air,** a barometer with air or gas imprisoned above the column of liquid; the variations of atmospheric pressure are indicated by the changes in the volume of this air. **b., aneroid,** a metallic box from which the air has been exhausted, the tension being indicated by the collapsing or bulging of the thin, corrugated cover, which is connected with a movable index. **b., boiling-point,** an instrument for determining the atmospheric pressure through observation of the boiling-point of water. Syn., *barothermometer; hypsometer; thermobarometer.* **b.-maker's disease,** a form of chronic mercurial poisoning among the workmen who make barometers. It is due to the inhalation of the fumes of mercury.

barometric (*bar-o-met'-rik*). Relating to atmospheric pressure, to a barometer, or to barometry. **b. light,** the glow produced by the mercury in a barometer tube when shaken.

barometrograph (*bar-o-met'-ro-graf*). See *barograph.*

barometry (*bar-om'-et-re*). The science of atmospheric pressure and the use of the barometer.

baroscope (*bar'-o-skōp*) [*baro-; σκοπεῖν*, to observe]. An instrument used for determining the loss of weight of a body in air, compared with its weight in a vacuum. A form of baroscope has been invented by Esbach for the quantitative determination of urea.

Barosma (*bar-os'-mah*) [*baro-; ὀσμή*, smell]. A genus of plants of the order *Rutaceæ,* native to the Cape of Good Hope and vicinity, several species of which yield the buchu of commerce.

barosmin (*bar-os'-min*) [*barosma*]. A precipitate from the tincture of *Barosma crenulata*. Dose 2–3 gr. (0.13–0.2 Gm.).

barotaxis (*bar-o-taks'-is*) [*baro-*; τάξις, orderly arrangement]. Reaction of living matter to changes in pressure.

barotropism (*bar-ot-ro-pizm*) [*baro-*; τροπή, turning] See *barotaxis*.

Barral's test for albumin and bile-pigments. Cover the urine in a test-tube with a layer of 20% solution of aseptol (orthophenolsulphonic acid), and in the presence of albumin a white ring will form at the zone of contact of the two fluids; ½ of a grain of albumin in 1 liter of urine may be thus detected. Mucin causes a similar appearance, but it disappears on boiling. A green ring will indicate the presence of bile-pigments. This is much more sensitive than the color test with fuming nitric acid.

barrenness (*bar'-en-nes*). Sterility in the female.

Barrier's vacuoles (*bar-re-a'*) [François Marguerite *Barrier*, French physician, 1813–1870]. Peribronchitic abscesses.

Barringtonia (*bar-ing-to'-ne-ah*) [D. *Barrington*, an English naturalist]. A genus of plants of the order *Myrtaceæ*. *B. acutangula* is a tree growing in Australia and India. The juice from the leaves mixed with oil is used in skin diseases; the root is bitter, cooling, and aperient, and is said to be similar to cinchona; the seeds, prepared with sago and butter, are used in diarrhea. *B. butonica* is a tree of Australia and India. The outer portion of the fruit is used to stupefy fish. *B. racemosa* has properties similar to *B. acutangula*.

Barry, retinacula of (*bar'-e*) [Martin *Barry*, English scientist, 1802–1855] Tense filaments running from the thickened portion of the cellular membrane lining the Graafian follicle to other parts of the membrane.

barsati (*bar-sat-e'*). A disease affecting horses, considered analogous to cancer. Syn., *atrophic carcinoma*.

Bartholin, duct of (*bar'-tho-lin*) [Caspar *Bartholin*, Danish anatomist, 1655–1738]. The larger and longer of the sublingual ducts, opening into the mouth near to, or in common with, Wharton's duct. **B., foramen of,** the obturator foramen. **B., glands of,** the vulvovaginal glands, a pair of glands situated at the entrance of the vagina, one on each side, and corresponding to Cowper's glands in the male.

Bartholinian abscess. An abscess of Bartholin's glands.

bartholinitis (*bar-to-lin-i'-tis*). Inflammation of Bartholin's glands.

Barton's bandage [John Rhea *Barton*, American surgeon, 1794–1871]. A bandage for the lower jaw. **B.'s fracture,** the separation of the posterior portion of the lower articular surface of the radius.

Baruch's hydrotherapeutic law (*bar'-ook*) [Simon *Baruch*, American physician, 1840–1921]. The effect of a hydrotherapeutic procedure is in proportion to the difference of temperature between that of the skin (93° F.) and that of the water. **B.'s sign,** the resistance of the rectal temperature to a bath of 75° for 15 minutes, with friction; it is pathognomonic of typhoid fever.

baruria (*bah-roo'-re-ah*) [βαρύς, heavy; οὖρον, urine]. The passage of urine having a high specific gravity; also the condition of the body associated therewith.

Barwell's operation (*bar'-wel*). [Richard *Barwell*, English surgeon, 1826–1916]. Osteotomy for genu valgum: division of the lower and upper end of the tibia above and below their respective epiphyses.

bary- (*bar-e-*) [βαρύς, heavy]. A prefix meaning heavy, dull, or hard.

baryecoia (*bar-e-ek-oi'-ah*) [βαρυηκολα, hardness of hearing]. Hardness of hearing; partial deafness.

baryencephalia (*bar-e-en-sef-a'-le-ah*) [*bary-*; ἐγκέφαλος, brain]. Dulness of intellect.

baryencephalus (*bar-e-en-sef'-al-us*) [see *baryencephalia*]. A person with dull intellect.

baryglossia (*bar-e-glos'-e-ah*) [*bary-*; γλῶσσα, tongue]. Thick, slow utterance.

baryglossus (*bar-e-glos'-us*) [*bary-*; γλῶσσα, the tongue]. An individual suffering from baryglossia.

baryglottic, baryglotticus (*bar-e-glot'-ik, -us*). 1. Relating to baryglossia. 2. A person affected with baryglossia.

barylalia (*bar-e-la'-le-ah*) [*bary-*; λαλιά, speech]. Thickness of speech.

barymastia (*bar-e-mas'-te-ah*) [*bary-*; μαρτός, breast]. Same as *barymazia*.

barymazia (*bar-e-ma'-ze-ah*) [*bary-*; μαζός, breast]. Heaviness or large size of the mammæ.

baryodmia (*bar-e-od'-me-ah*) [*bary-*; ὀδμή, odor]. A heavy, disagreeable odor; also a subjective sensation as of a disagreeable smell.

baryodynia (*bar-e-o-din'-e-ah*) [*bary-*; ὀδύνη, pain]. Severe pain.

baryphonia (*bar-e-fo'-ne-ah*) [*bary-*; φωνή, a voice] A heaviness or difficulty of speech.

barysomatia (*bar-e-so-ma'-she-ah*) [*bary-*; σῶμα, body] Excess in the weight of the body.

baryta, barytes (*bar-i'-tah, bar-i'-tes*) [*barium*]. Barium oxide. **b., caustic.** See *barium hydrate*. **b., synthetic.** See *barium sulphate*.

barythymia (*bar-e-thi'-me-ah*) [*bary-*; θύμος, mind]. A melancholy, gloomy, or sullen state of mind.

baryticoargentic (*bar-it-ik-o-ar-jen'-tik*) [*baryta; argentum*] Containing baryta and silver.

baryticosodic (*bar-it-ik-o-so'-dik*) [*baryta; sodium*]. Containing baryta and sodium.

barytin (*bar'-it-in*). Native barium sulphate.

basad (*ba'-sad*) [βάσις, a foundation]. Toward the basal aspect.

basal (*ba'-sal*) [βάσις, a foundation]. Pertaining to or located at the base. **b. ganglia,** the optic thalamus and corpus striatum of the brain. **b. metabolism,** see under *metabolism*.

basalia (*ba-sa'-le-ah*) [*basis*]. Huxley's term for the metacarpal bones.

basculation (*bas-kū-la'-shun*) [Fr., *basculer*, to swing]. 1. The movement by which retroversion of the uterus is corrected when the fundus is pressed upward and the cervix drawn downward. 2. See *bascule movement*.

bascule movement (*bas'-kūl*) [Fr., *bascule*, a swing]. The recoil of the heart in its systolic motion.

base (*bās*) [*basis*]. The lowest part of a body or the foundation upon which anything rests. In chemistry, an element or radical that combines with an acid to form a salt. The electropositive molecule or radical of a compound. In pharmacy, the most important part of a prescription. In dentistry, the support for the teeth in an artificial denture. **b., acid-forming, b., acidifiable,** one which forms an acid by uniting with water. **b., aldehyde.** See *aldin*. **b., alloxur,** xanthine bases. **b., animal,** a ptomaine. **b., purine,** xanthine bases.

base-ball pitcher's arm, a peculiar condition of the arm arising from over-use, characterized by loss of strength, tenderness, neuralgic pains, and inflammation and hypertrophy of the bone.

Basedow's disease (*bas'-e-do*) [Karl Adolphus von *Basedow*, German physician, 1799–1854]. Exophthalmic goiter or Graves' disease. See *goiter, exophthalmic.* **B.'s syndrome,** tachycardia, flashes of heat, and sweating crises.

Basella (*bas-el'-ah*) [Malabar name]. A genus of plants of the order *Chenopodiaceæ. B. rubra,* Malabar nightshade, is an esculent herb cultivated throughout India, where the juice of the leaves is given in infantile catarrh and an infusion of the leaves is used as tea.

basement (*bās'-ment*) [Fr., *bassement*]. The fundamental portion. **b.-membrane.** See *membrane, basement-.*

bas-fond (*bah-fon(g)*) [Fr.]. The floor or lowest portion of the urinary bladder.

Basham's mixture (*bash'-am*) [William Richard *Basham*, English physician, 1804–1877]. A mixture of iron and ammonium acetate; liquor ferri et ammonii acetatis.

basi- (*ba-si-*) [*basis*]. A prefix meaning basis or base.

basial (*ba'-se-al*) [*basis*]. Relating to a base or to the basion.

basialveolar (*ba-se-al-ve'-o-lar*) [*basi-; alveolus*]. Relating to the basion and the alveolar point.

basiarachnitis (*ba-se-ar-ak-ni'-tis*) [*basi-; ἀράχνης*, a spider; *ῑτις*, inflammation]. Inflammation of that part of the arachnoid that corresponds to the base of the skull.

basiator (*ba-se-a'-tor*) [*basiare*, to kiss]. The orbicularis oris muscle. See *muscles, table of.*

basic (*ba'-sik*). 1. Having properties of a base; *i. e.*, capable of neutralizing acids. 2. Basal or basilar. **b. salt,** a salt in which part of the hydroxyl of the base is retained.

basichromatin (*bas-e-kro'-mat-in*) [*basi-; χρῶμα*, color]. According to Heidenhain, that portion of the nuclear reticulum stained by basic aniline dyes.

basicity (*bas-is'-it-e*). 1. The quality of being basic. 2. The combining power of an acid.

basicranial (*ba-se-kra'-ne-al*) [*basi-; κρανίον*, the skull]. Relating to the base of the skull. **b. axis,** a line running from a point midway between the occipital condyles through the median plane to the junction of the ethmoid and presphenoid.

basidigital (*ba-se-dij'-it-al*) [*basi-; digitus*, a finger]. Pertaining to the bases of the digits. **b. bone,** any metacarpal, or metatarsal bone.

basidiogenetic (*bas-id-e-o-jen-et'-ik*) [*basidium*, a spore-producing cell; *γένεσις*, origin]. In biology, produced on a basidium.

basidiomycetes (*bas-id-e-o-mi-se'-tēz*) [*basidium; μύκης*, a fungus]. A division of fungi comprising genera which produce spores upon basidia.

basidiophore (*bas-id'-e-o-fōr*) [*basidium*, a spore-producing cell; *φερεῖν* to bear]. Furnished with basidia.

basidiospore (*bas-id'-e-o-spōr*) [*basidium*, a spore-producing cell; *σπορά*, seed]. One of the spores produced upon a basidium.

basidium (*bas-id'-e-um*) [dim. of *βάσις*, a base; pl., *basidia*]. In biology, a large cell in the higher fungi, borne on the hymenium and producing spores at its free end.

basifacial (*ba-se-fa'-shal*) [*basi-; facies*, face]. Pertaining to the lower portion of the face. **b. axis,** in craniometry, a line from the anterior point of the premaxilla to the anterior point of the basicranial axis.

basifier (*ba'-sif-i-er*) [*basi-; facere*, to make]. A substance capable of converting a body into a base.

basifugal (*bas-if'-u-gal*) [*basi-; fugere*, to flee]. In biology, derived from, or proceeding away from the base, acropetal; centrifugal.

basigenic (*ba-se-jen'-ik*) [*basi-; γεννᾶν*, to produce]. Producing bases

basihyal (*ba-se-hi'-al*) [*basi-; ὑοειδής*, shaped like the letter *υ*, upsilon]. Either one of the two bones, one on each side, that form the principal part of the body of the hyoid arch.

basihyoid (*ba-se-hi'-oid*). See *basihyal.*

basilad (*bas'-il-ad*) [*βάσις*, foundation]. Toward or to the base or basilar aspect.

basilar (*bas'-il-ar*) [*basis*]. Pertaining to the base. **b. artery.** See under *artery.* **b. membrane,** a membranous division-wall separating the scala vestibuli from the scala tympani, extending from the base to the apex of the cochlea and supporting the organ of Corti **b. process,** a strong quadrilateral plate of bone forming the anterior portion of the occipital bone, in front of the foramen magnum. **b. suture,** the suture formed by the junction of the basilar process of the occipital bone with the posterior surface of the body of the sphenoid.

basilateral (*bas-e-lat'-er-al*) [*basi-; latus*, side]. Both basilar and lateral.

basilemma (*bas-il-em'-ah*) [*basi-; λέμμα*, a husk]. A basement-membrane.

basilen (*bas'-il-en*) [*basis*, base]. Belonging to the basilar portion in itself.

basilic (*ba-sil'-ik*) [*βασιλικός*, royal]. Important; prominent; said of a structure or a drug. **b. vein,** a large vein of the arm on the inner side of the biceps.

basilicon ointment (*bas-il'-ik-on oint'-ment*). Rosin cerate. It consists of rosin, 35 Gm., yellow wax, 15 Gm.; lard, 50 Gm

basilobregmatic (*bas-il-o-breg-mat'-ik*) Pertaining to the base of the skull and the bregma.

basilomental (*bas-il-o-men'-tal*). Pertaining to the base of the skull and to the chin.

basilopharyngeal (*bas-il-o-far-in'-je-al*). Relating to the basilar process of the occipital bone and to the pharynx.

basilosubnasal (*bas-il-o-sub-na'-zal*). Relating to the basion and the nasion.

basilysis (*bas-il'-is-is*) [*basi-; λύσις*, a loosening] The breaking-up of the fetal skull in craniotomy.

basilyst (*bas'-il-ist*) [see *basilysis*]. An instrument for use in perforating the cranial vault and breaking up the base of the skull.

basin (*ba'-sin*) [ME]. 1. The third ventricle of the brain. 2. The pelvis. **b.-trap,** a trap or seat in the outlet of the basin of a water-closet, placed there to prevent the escape into the apartment of noxious and offensive vapors and gases.

basinasal (*bas-e-na'-sal*) [*basion; nasus*, the nose]. Relating to the basion and the nasion.

basioalveolar (*bas-e-o-al-ve'-o-lar*). Relating to the basion and to the alveolar point.

basioccipital (*bas-e-ok-sip'-it-al*) [*basi-; occiput*, the back of the head]. A bone, separate in many of the lower vertebrate animals, forming the central axis of the skull. In adult human life it is the basilar process of the occipital bone.

basioccipitosphenoidal (*bas-e-ok-sip-it-o-sfe-noid'-al*). 1. Relating to the basioccipital bone and the sphenoid.

basioglossus (*bas-e-o-glos'-us*) [*basi-*; γλῶσσα, the tongue]. That part of the hyoglossus muscle that is attached to the base of the hyoid bone.

basion (*ba'-se-on*) [*basis*]. A point located at the middle of the anterior margin of the foramen magnum.

basiotic (*bas-e-ot-ik*) [*basi-*; οὖς, ear]. Relating to the base of the ear.

basiotribe (*bas'-e-o-trib*) [*basion*; τρίβειν, to grind or crush]. An instrument used for perforating or crushing the fetal head.

basiotripsy (*bas-e-o-trip'-se*) [see *basiotribe*]. The operation of crushing the fetal head.

basipetal (*bas-ip'-et-al*) [*basis*, a base; *petere*, to seek]. In biology, applied to growth in plants from the apex toward the base.

basiphobia (*ba-se-fo'-be-ah*) [βάσις, a step; φόβος, fear]. An insane fear of walking.

basipresphenoid (*bas-e-pre-sfe'-noid*). 1. Relating to the basisphenoid and presphenoid bones. 2. The basipresphenoid bone.

basirrhinal (*bas-e-ri'-nal*) [*basi-*; ῥίς, nose]. Relating to the base of the brain and to the nose. Applied to a cerebral fissure located at the base of the olfactory lobe.

basis (*ba'-sis*) [βάσις, foundation]. Base. **b. cranii**, the base of the skull **b. pedunculi**, the base of the peduncle, the crusta or pes.

basisphenoid (*bas-e-sfe'-noid*) [*basi-*, σφήν, wedge; εἶδος, form]. The lower part of the sphenoid bone

basisylvian (*bas-e-sil'-ve-an*) [*basi-*; *Sylvian*]. Applied to the transverse basilar portion or stem of the Sylvian fissure.

basitemporal (*bas-e-tem'-po-ral*) [*basi-*; *tempora*, the temples]. Relating to the base or lower part of the temporal bone

basivertebral (*bas-e-ver'-te-bral*) [*basi-*; *vertebra*, a joint]. Relating to the basis or centrum of a vertebra.

basket cell. A cell surrounded by a network of fibrils derived from the axis cylinder process of another cell.

Basle anatomical nomenclature. A list of anatomical terms (in Latin) adopted by the German Anatomical Society in Basle, in 1895. Generally abbreviated to B.N.A.

basophil, basophile (*bas'-o-fil*) [*basis*; φιλεῖν, to love]. Cells and tissue elements showing an affinity for basic rather than for acid dyes.

basophilia (*bas-o-fil'-e-ah*) [*basophile*]. Increase in the number of basophiles in the circulating blood

basophilic (*bas-o-fil'-ik*) [*basophile*]. 1. Combining readily with bases; stainable by means of basic dyes. 2. Any histological structure which stains with basic dyes.

basophilous (*bas-of'-il-us*) [*basophile*]. Stained by basic rather than by acid dyes.

basophobia (*bas-o-fo'-be-ah*) [*basis*; φόβος, fear]. Complete inability to walk or stand erect, due to emotional causes. The muscles concerned are not appreciably impaired.

basophobiac (*bas-o-fo'-be-ak*). 1. A person affected with basophobia. 2. Relating to or affected with basophobia.

bass-deafness (*bās'-def-nes*). Deafness to certain bass-notes, the higher notes being heard.

Bassini's operation (*bah-se'-ne*) [Edoardo *Bassini*, Italian surgeon, 1847–1924]. For the radical cure of inguinal hernia: the sac is exposed, twisted, and the neck ligated and removed; the spermatic cord is lifted, and the border of the rectus is stitched to the edge of the internal oblique, the transversalis muscle, and the transversalis fascia to Poupart's ligament under the cord. The cord is placed upon this layer and the border of the external oblique is stitched to Poupart's ligament over the cord.

bassora gum (*bas'-o-rah-gum*). An inferior gum, much used in adulterating tragacanth.

bassorin (*bas'-o-rin*) [*Bassora*, an Asiatic town], $C_6H_{10}O_5$, or $2C_6H_{10}O_5$. 1. A tasteless, odorless, vegetable mucilage, insoluble in cold water, but rendered soluble by alkalies; it is found in gum tragacanth (of Bassora) and in cherry and plum gums. 2. A term for all vegetable mucilages.

bast. The inner bark of exogenous plants. The fibrous parts of the bark are used in making cordage, and have a limited use in surgery.

bastard (*bas'-tard*) [OF., *fils de bas*, son of a bast or of a pack-saddle]. 1. An illegitimate child. 2 Illegitimate. 3. A hybrid species. 4. See *bastards*.

bastards (*bas'-tardz*) [*bastard*]. The name given to an impure sugar procured by concentrating molasses and allowing it to crystallize slowly in moulds.

Bastedo's sign (*bas-te'-do*) [Walter Arthur *Bastedo*, American physician, 1873–] If the colon is distended with air there will be pain and tenderness at McBurney's point in cases of chronic appendicitis.

Bastian's law, B.-Brun's law [Henry Charlton *Bastian*, English scientist, 1837–1915; Ludwig *Bruns*, German neurologist, 1858–]. When there exists a complete transverse lesion of the spinal cord above the lumbar enlargement, the tendon reflexes of the lower extremities are abolished.

basyl (*ba'-sil*) [βάσις, foundation]. 1. The electropositive constituent of a compound. 2. A body which unites with oxygen to form a base.

basylous (*bas'-il-us*). See *basigenic*.

Bateman's disease [Thomas *Bateman*, English physician, 1778–1831]. Molluscum contagiosum. **B.'s drops**, the tinctura pectoralis, a weak tincture of opium, camphor, and catechu; a popular remedy in coughs.

bath [AS., *bæth*]. 1. A bathing-place or room. 2. The medium in which the body is wholly or partly immersed As therapeutic agents, baths are classified according as water, vapor, air, etc., is used; according to the temperature, as hot, temperate, cold, etc.; according to the end desired, as nutritional, medicinal, stimulant, etc. Special forms of bath are the moor, peat, mud-, slime, pine-leaf, herb (hay, gentian, camomile, juniper, marjoram, etc.), brine, sand, tan, bran, malt, glue, soup, milk, whey, blood, wine, guano, starch, soap, acid, iron, sulphur, carbonic acid, compressed air, mustard, electric, etc. 3. A medium, such as sand, water, oil, or other substance, interposed between the fire and the vessel to be heated, in chemical manipulations. **b., acid,** add 1½ oz. of nitric acid and 1 to 3 oz. of hydrochloric acid to 30 gallons of warm water in a wooden or earthenware vessel, and immerse the patient in this for from 10 to 20 minutes. For a foot-bath, add ½ oz. of nitric acid and 1 oz. of hydrochloric acid to 4 gallons of warm water. This is said to be useful in cases of dyspepsia with sluggish liver and constipation. **b.s., acratothermal,** baths prepared from natural mineral waters of high temperature, but in which the gaseous and saline constituents are small in quantity and of feeble

therapeutic action. Syn, *indifferent thermal baths, simple thermal baths; unmixed thermal baths.* **b., air-,** a bath in which but little water is employed, the body being exposed freely to the air. It is employed in those cases in which there is a tendency to catch cold on slight exposure. **b., alcohol,** one in dilute alcohol, used to reduce temperature in fever. **b., alkaline,** add 3 oz. of potassium carbonate, or 6 of sodium carbonate, to 25 or 30 gallons of hot water. It is used in chronic squamous skin diseases, chronic rheumatism, and lithemia It should be taken in a wooden, earthenware, or enameled tub. **b., animal.** 1. One prepared from dung of cattle or the contents of the first stomach of a freshly slaughtered ox 2. The introduction of the whole body or the part affected with rheumatism into the body-cavity of an animal just slaughtered. **b., antimonial,** one containing 1–2 oz. of tartar emetic; it is used in skin diseases **b., antirheumatic,** one containing, in sufficient water for the purpose, 100 Gm. of oil of turpentine, 10 Gm. of oil of rosemary, 50 Gm. of sodium carbonate. **b., antisyphilitic,** a solution of 15 Gm. of mercury bichloride in 500 Gm. of water, to be added to the bath at the time of using. **b., astringent,** one prepared with tannin or other astringents, to control sweating or in the treatment of skin diseases. **b., astringent, Most's,** a bath for extensive burns, consisting of a solution of 200 Gm. of alum in 6 to 8 pailfuls of cold water and 1 pailful of curdled milk. **b., balsamic,** one containing tar, turpentine, or the buds and bark of terebinthaceous plants. **b., bog-,** a bath made by mixing bog-earth (produced by the decomposition of plants in the presence of water and found at iron and sulphur springs) with warm water to form a pulpy or mushy consistence. This is used as a mud-bath. **b., borax,** borax, 4 oz.; glycerol, 3 oz.; water, 30 gallons It is used in the same class of cases as the bran-bath. **b., bran-,** boil 1 pound of bran in 1 gallon of water, strain, and add 30 gallons of water. This is a soothing and emollient bath, and is of service in squamous and irritable conditions of the skin. **b. Brand,** see *Brand.* **b., buff-,** one in which the bather is nude **b.-chair** [*Bath*, town in England, where the inventor James Heath, lived]. A vehicle for the conveyance of invalids and others; it is mounted on three or four wheels, and may be pushed by hand or drawn by pony or donkey. **b., chemical,** in chemistry, an apparatus for regulating the temperature of chemical processes by surrounding the substance with water, sand, oil, or mercury, through which the heat is communicated. **b., cold,** a bath of cold water, the temperature of the latter varying from 32°–70° F. (0°–21° C.). It is used to reduce fever and as a general stimulant. **b., dipolar,** a hydroelectric bath in which the patient does not come in contact with either of the electrodes, but these are immersed in the water at each end of the tub. **b., effervescent,** a liquid bath containing a free gas, which is given off with effervescence. **b., Egyptian,** a modification of the Turkish bath, with rise of temperature to the maximum point, followed by lowering of temperature to the initial point. **b., electric.** 1. One in which the medium of the bath and the bather's person are included in the circuit of a galvanic current. 2. A bath in which an electric current is generated by the decomposition of the chemical constituents of the medium. **b., electrothermal,** a hot bath combined with exposure to the influence of electricity. **b., foot-,** a bath for the feet, used as a derivative agent in cases of cold, etc. **b., fucus-,** one containing seaweed, or a decoction of it, imparting sodium chloride and a small percentage of iodine. **b., full,** one in which the patient's body is entirely covered by water, so that his chin just clears it. **b., gas-,** one in which a gas is applied to the entire body or an affected part by means of a closed cabinet. **b., graduated,** one in which the temperature of the water is gradually lowered by the addition of cold or iced water. **b., herb-,** made by using the extract of pine-needles or of some aromatic herbs used as a tonic **b., hip-.** See *b., sitz-.* **b., hot,** one in which the temperature of the water ranges from 104° to 110° F. (40°–43.3° C.). It acts upon the skin, producing free perspiration, and accelerates the pulse and respiration. **b., hot-air,** a Turkish bath. A bath in hot air. It is useful as a diaphoretic, and in catarrhal, neuralgic, and rheumatic conditions, but is contraindicated in fatty degeneration of the heart **b., hydroelectric,** a water-bath charged with electricity. **b., hydrostatic,** a variety of permanent water-bath in which the patient is supported without total immersion **b., Indian,** massage in combination with a Turkish bath. **b., internal,** lavage of the stomach or rectum. **b., iodine-,** one to which is added a solution of 8 Gm. of iodine and 16 Gm. of potassium iodide in 600 Gm of water. **b., kinetotherapeutic,** a water-bath in which specified movements are carried out. **b., light-.** 1. See *b., sun-.* 2. Exposure of affected parts to rays of light by means of various apparatus; also of the whole body for inducing perspiration. **b., lime-,** a bath to which slaked lime is added at the time of using; it is used in gout and in treatment of itch. **b., medicated,** a bath in which medicinal substances, as mineral salts, sulphur, etc , are dissolved or held in suspension. **b., mercurial,** a bath for the treatment of syphilis, given in the vapor of mercury, usually prepared by vaporizing calomel over an alcohol lamp. **b., milk-,** a bath in milk, given for nutritive purposes. **b., mineral.** 1. The water of a mineral spring used as the medium. 2. One to which a solution of mineral substances has been added. **b., monopolar,** a hydroelectric bath in which the wall of the metal tub is utilized as a large electrode. The current entering here is conducted to the entire surface of the body in contact with the water, and passes out by means of a large metal electrode the edges of which are covered by a rubber pillow so placed that the patient can lie upon it without coming in contact with the metal. Cf. *b., dipolar.* **b., moor-,** a bath in water mixed with the earth of moors. **b., mud-,** a bath prepared by mixing well-seasoned earths, containing more or less mineral matter, with water containing the same substances. It is useful in chronic rheumatism. **b., mustard-,** made by inclosing from 2 to 4 oz. of ordinary mustard in a piece of muslin or thin linen and hanging it in about four gallons of hot water until the latter becomes yellow, or simply by adding mustard to water. It is used as a general bath for infants in collapse, convulsions, or severe bronchitis, the child being left in until the skin becomes distinctly reddened. It is also used as is the foot-bath or sitz-bath in amenorrhea. **b., Nauheim,** a natural thermal

effervescent (gaseous muriated) bath. **b., needle.** See *b., rain-*. **b., nutritive,** one containing wine, milk, or any nutritive ingredient. **b., oxygen-,** an inhalation of oxygen to correct inadequate aeration of the blood; also a local application of oxygen gas to gangrenous ulcers. **b., ozone-.** See *b., fucus-*. **b., pack-,** one in which the body is wrapped in wet cloths. See *b., sheet-*. **b., peat-,** an application of bog-earth containing much vegetable matter and used in gout and rheumatism. **b., pine-,** prepared by adding a decoction of pine-needles, or some pine-extract, to hot water. It is mildly stimulating, and is employed in hysteria, gout, and rheumatism. **b. of Plombières,** a bath to which a solution of 100 Gm. of powdered gelatin in hot water is first added and afterward a mixture of 100 Gm. of sodium carbonate, 20 Gm. each of sodium chloride and sodium bicarbonate, and 60 Gm. of sodium sulphate. **b., plunge-,** a bath, hot or cold, into which the patient plunges. **b., rain-,** consists of from four to six three-fourths circles of pipes secured together at a distance of 2 to 3 inches. Each pipe has three lines of fine perforations, from which the stream issues under pressure, striking the body of the patient at all points with considerable force. **b., Russian,** a vapor-bath, the vapor being generated by throwing water upon heated mineral or metallic substances. Syn., *vapor-bath*. **b., sand-.** 1. One in which the body of the patient is placed in a layer of dry sand that has been heated. 2. In chemistry, the immersion of a crucible, etc., containing a chemical compound, in a vessel containing fine sand, the latter being heated gradually to a high temperature. **b., seaweed.** See *b., fucus-*. **b., sheet-,** the application of cold water to the body through the medium of a wet sheet or towel placed upon the skin. It is used to reduce temperature. **b., shower-** a douche in which the water is delivered against the body from a nozzle with numerous perforations. **b., sitz-,** one in which only the buttocks and hips are immersed in water. It is useful in pelvic inflammations, amenorrhea, and retention of urine. **b., slime-,** a bath in water mixed with the slimy deposit of organic matter found in rivers and ponds. **b., sponge-,** one in which the patient's body is rubbed with a wet sponge. It is used to reduce temperature. **b., sulphur,** potassium sulphide 4 to 8 oz. in 30 gallons of water; a little sulphuric acid may be added. It is used in certain skin diseases, scabies, lead colic, and lead palsy. **b., sun-,** the exposure of the naked body to the sun's rays. **b., sweat-, b., sweating,** a bath to induce a free flow of perspiration; *e. g.*, a Turkish bath. **b., tepid,** the temperature of the water ranges from 85°–95° F. (29.4°–35° C.). It acts as a sedative, cleansing, and detergent agent; the pulse, respiration, excretion, secretion, and temperature are practically unaffected. **b., Turkish,** one in which the bather is placed successively in rooms of higher temperature, then shampooed or rubbed, and finally stimulated by a douche of cold water. See *b., hot-air*. **b., vacuum,** the treatment of parts by subjecting them to a partial vacuum. **b., vapor-.** See *b., Russian*. **b., warm,** a bath in water having a temperature of from 90°–100° F. (32.2°–38.5° C.) It is used to calm the nervous system, produce sleep, and allay reflex irritability. **b., water-.** 1. A bath of water. 2. In chemistry, a bath of water for immersing vessels containing substances that must not be heated above the boiling-point of water. **b., zinc-chloride,** a chemical bath of molten zinc chloride for immersion of substances not to be heated beyond 700° C.

bathmic (*bath'-mik*) [βαθμός, a threshold]. Relating to bathmism.

bathmism (*bath'-mizm*) [βαθμός, a threshold]. That supposed modification of chemical force which is active in the processes of nutrition.

bathmos (*bath'-mos*) [βαθμός, a little fossa]. A shallow depression or fosset.

bathmotropic (*bath-mo-trop'-ik*) [βαθμός, threshold; τρέπειν, to turn]. Applied by T. W. Engelmann to a supposed set of fibers in the cardiac nerves which affect the excitability of the cardiac muscle. Cf. *dromotropic; inotropic*.

bathycardia (*bath-e-kar'-de-ah*) [βαθύς, deep; καρδια, heart]. A condition in which the heart is in a lower position than normal; the condition is an anatomical one, and is not the result of disease.

bathycentesis (*bath-e-sen-te'-sis*) [βαθύς, deep; κέντησις, puncture]. A deep surgical puncture; deep acupuncture.

bathyesthesia (*bath-e-es-the'-ze-ah*) [βαθύς, deep; αἴσθησις, sensation]. Oppenheim's term for the muscle-sensations.

bathymetry (*bath-im'-et-re*) [βαθύς, deep; μέτρον, a measure]. The measurement of the depths of the sea or of any body-cavity, natural or abnormal.

bathystixis (*bath-e-stiks'-is*) [βαθύς, deep; στίξις, puncture]. Deep acupuncture.

batonoma (*bat-on-o'-mah*) [βάτος, height; ωμα, tumor]. Tumor supposed to be due to vegetable organisms of higher grade than bacteria.

batophobia (*bat-o-fo'-be-ah*) [βατός, a height; φόβος, fear]. 1. Acrophobia; dread of being at a great height. 2. Dread of high objects; fear of passing near a high building or of going through a deep valley.

batrachocephalus (*bat-rak-o-sef'-al-us*) [βάτραχος, a frog; κεφαλή, the head]. Having a frog-like head.

batrachoid (*bat'-rak-oid*) [βάτραχος, a frog; εἶδος, form]. Frog-like.

batrachoplasty (*bat'-rak-o-plas-te*) [βάτραχος, a frog; ranula; πλάσσειν, to mold]. Plastic surgical operation for the cure of ranula.

batracin (*bat'-ra-sin*) [βάτραχος, a frog]. A poisonous secretion obtained from the cutaneous pustules of toads. According to Calmeil, the poison of toads contains methyl-carbylamine and isocyanacetic acid.

battalism (*bat'-al-izm*). See *battarism*.

battarism (*bat'-ar-izm*) [βατταρισμός, a stuttering] Stuttering or stammering.

battery (*bat'-er-e*) [*batteria*, a beating; battery]. A series of two or more pieces of apparatus arranged to produce increased effect, as *battery* of boilers, prisms, lenses, galvanic cells. It is usually applied to a series of cells producing electricity (voltaic or galvanic battery); also, frequently, to a single cell. **b., cautery,** a galvanic battery with high electromotive force for heating a wire used as a cautery. **b., faradic, b., faradaic,** one giving an induced or faradic current. **b., galvanic,** one giving a galvanic or chemical current. **b., Hare's,** a battery of cells marked by low resistance. Two large plates of zinc and copper, separated from each other by cloth or some indifferent substance, are rolled on a wooden cylinder and immersed

in acidulated water. See *deflagrator*. **b., primary,** the combination of a number of primary cells so as to form a single battery. **b., secondary,** the combination of a number of storage-cells to form a single electric source. **b. storage,** an apparatus consisting of a secondary battery for storing electricity.

Battey's operation (*bat'-e*) [Robert *Battey*, American surgeon, 1828–1895]. Removal of the ovaries in order to eliminate their physiological influence and so produce the menopause.

Battle's incision (*bat'-l*). An incision to the right or left of the median line of the abdomen down to the rectus; the inner edge of this muscle is then retracted and the posterior layer of its sheath incised as well as the peritoneum. **B.'s sign,** in fracture at the base of the skull there may be subconjunctival and postauricular ecchymosis.

battledore (*bat'-el-dōr*) [ME., *batyldoure*, a bat for beating clothes]. An instrument shaped like a racket. **b. placenta,** one in which there is a marginal insertion of the cord.

Battley's sedative drops (*bat'-le*) [Richard *Battley*, English pharmacist, 1770–1856]. A preparation consisting of opium 3, water 30, alcohol 6; dose ♏. 5–15 (0.3–1.0).

B. A. U. Abbreviation of British Association Unit.

Baudelocque's diameter (*bōd'-lok*) [Jean Louis *Baudelocque*, French obstetrician, 1746–1810]. In obstetrics, the external conjugate diameter of the pelvis. **B.'s uterine circle,** Bandl's contraction ring.

Baudelocque's operation (*bōd'-lok*) [Louis Auguste *Baudelocque*, French obstetrician, 1800–1864]. An incision through the posterior cul-de-sac of the vagina for delivery in extra-uterine pregnancy.

Bauer's qualimeter (*bow'-erz kwol-im'-et-ur*). A static electrometer with pendulum and an index, used to indicate the quality of the x-rays issuing from a Roentgen tube.

CASPAR BAUHIN.

Bauhin, gland of (*bo'-hin*) [Caspar *Bauhin*, Swiss anatomist, 1560–1624]. See *Blandin's gland*. **B. valve of,** the ileocecal valve.

Bauhinia (*bo-hin'-e-ah*). A genus of plants of the order *Leguminosæ*. *B. variegata* is a tree of India; the bark is astringent and used as a tonic in fevers; the buds are used in diarrhea and as a vermifuge.

Baumann's coefficient. The ratio existing between the total sulphuric acid and the ether sulphuric acids of the urine; it amounts to 10 %. **B.'s reaction for dextrose,** to an aqueous solution of grape-sugar add benzoyl chloride and an excess of sodium hydroxide and shake until the odor of benzoyl chloride disappears. A precipitate of benzoic-acid ester of dextrose will be produced which is insoluble in water and alkalies.

Baumann and Goldmann's test for cystin. If a solution of cystin is shaken in caustic soda with benzoyl chloride, a voluminous precipitate of benzoyl cystin will be produced. The sodium salt occurs as silky plates, readily soluble in water, but nearly insoluble in an excess of caustic soda.

baumanometer (*bo-man-om'-et-er*) [William Anthony *Baum*, 1890–]. An instrument for the determination of blood pressure.

Baumé (*bo-ma'*) [Antoine *Baumé*, French chemist, 1728–1804]. Abbreviation for Baumé's hydrometer.

baume analgésique (*bōm an-al-ja-zeek'*). A preparation containing methyl salicylate and menthol; used for its analgesic effect.

Baumes' law (*bo-mes'*) [Jean Baptiste Timothée *Baumes*, French physician, 1756–1828]. Same as *Colles's law*. **B.'s sign** or **symptom,** retrosternal pain in angina pectoris

Baunscheidtism (*bown'-shi-tizm*) [Carl *Baunscheidt*, a German mechanic]. A mode of treating rheumatism and chronic neuralgias by counterirritation, the latter being produced by pricking the exterior of the part affected with fine needles dipped in oil of mustard, formic acid, or other irritant.

Bavarian dressing, B. splint. A variety of immovable dressing in which the plaster is applied between two flannel cloths.

bavarol (*bav'-ar-ol*). A proprietary aromatic liquid used in 5% solution as a disinfectant.

bawchan, bauchee. Names given in India to the seeds of *Psoralea corylifolia*, used as a tonic and in skin diseases. Syn., *bauchan; bawchwan*.

bay, lacrimal. The depression at the inner canthus of the eye, holding the lacrimal canaliculi. **b., oil of.** See *myrcia*. **b.-rum.** See *myrcia*. **b.-tree,** the *Laurus nobilis;* also *Prunus laurocerasus,* commonly called the laurel or the cherry-laurel.

Bayard's ecchymoses [Henri Louis *Bayard*, French physician, 1812–1852]. Small capillary hemorrhages found in the pleura and pericardium of infants who, as the result of asphyxia, have made efforts at breathing in the uterus.

bayberry (*ba'-ber-e*) [ME., *bay; bery*]. 1. The berry of *Laurus nobilis*, bay, or noble laurel. 2. The wax-myrtle *Myrica cerifera*, and its fruit. 3. The pimenta, or allspice.

baycuru (*bi-koo-roo'*) [native S. A.]. The root of a S. American plant, *Statice braziliensis*, one of the most powerful astringents known. It is used for ulcers of the mouth and for glandular enlargements. Dose of fluidextract ♏. v–xxx.

Bayer's 205 (*ba'-er*) Trade name of a synthetic preparation related to a dyestuff, and said to be of service in the chemotherapy of trypanosomiasis

Bayle's disease [Gaspard Laurent *Bayle*, French physician, 1774–1816] Progressive general paralysis of the insane **B 's granulations,** miliary tubercles

bayonet-leg (*ba'-on-et leg*) A backward displacement of the leg-bones

bazin (*ba'-zin*) Synonym of *molluscum contagiosum*

Bazin's disease (*baz-an'*) [Pierre Antoine Ernest *Bazin*, French dermatologist, 1807–1878] 1 Psoriasis buccalis 2 Scrofulous ulcer of the leg **B 's erythema,** erythema induratum scrofulosorum, a form most commonly seen in strumous individuals, it generally attacks the back of the leg occurring in diffuse ill defined patches or in nodules, bright red at first then assuming a violet hue The nodules may be superficial or deep, a quarter of an inch to an inch or more in diameter, and may be slowly absorbed, and necrose or slough out leaving a very indolent ulcer **B.'s ointment,** unguentum hydrargyri sulphatis flavi

B. B culture. A pure culture of *Bacillus bulgaricus*

B C Abbreviation for Bachelor of Chemistry Also for *Baccalaureus Chirurgiæ*, Bachelor of Surgery Abbreviation of bone conduction

B. Ch. Abbreviation for *Baccalaureus Chirurgiæ*, Bachelor of Surgery

B. C. G. Abbr for Bacillus Calmette Guérin Bovine bacilli attenuated by 230 passages during 13 years on potato glycerin and bile an immunizer against tuberculosis

B C L Abbreviation for Bachelor of Civil Law

B D Abbreviation of base (of prism) down

bdella (*del' ah*) [*βδέλλα*, a leech] 1 A leech 2 A varicose vein

bdellatomy (*del-at'-o-me*) See *bdellotomy*

bdellepithecium (*del-ep e the'-se um*) [*bdella*, *ἐπιτιθέναι*, to put on] A tube for applying leeches

bdellium (*del'-e um*) [Heb , *d'bōlakh*] A resinous gum exuding from various species of *Balsamodendron* It resembles myrrh **b , Indian,** has been recommended as an emmenagogue

bdellometer (*del om'-et-er*) [*βδέλλα*, a leech, *μέτρον*, a measure] A mechanical substitute for the leech, consisting of cupping glass, scarificator, and exhausting syringe

bdellotomy (*del-ot'-o-me*) [*βδέλλα*, a leech, *τομή*, a cut] Cutting open the body of a leech that is drawing blood, by this means the activity of the leech may be considerably prolonged

Bé. Abbreviation for Baumé, *q v*

Be. Symbol of *beryllium*, formerly called *glucinum.*

B. E. Bacillary emulsion See under *tuberculin*

beaded (*be' ded*) In bacteriology denoting disjointed semi confluent colonies along the line of inoculation in a stab culture

beads, rhachitic "Rhachitic rosary", the so-called ' beading of the ribs" in rickets, a succession of visible and palpable swellings at the points where the ribs join their cartilages

beak (*bēk*) [ME , *beeke*] 1 The mandibular portion of a forceps 2 The lower end of the calamus scriptorius 3 The pad or splenium of the corpus callosum **b , coracoid,** the beak of the coracoid process of the scapula **b. of the encephalon.** See *beak* (3) **b. of the sphenoid bone.** See *rostrum sphenoidale*

beaker (*be'-ker*) [Germ *becher*, a cup, bowl] A wide-mouthed glass vessel used in chemical laboratories **b.-cell,** the goblet-cell found in mucous membranes

Beale's fiber (*bel*) [Lionel Smith *Beale*, English physician, 1828–1906] The fine spiral fiber surrounding the process of some of the sympathetic ganglion-cells of the frog

bean (*ben*) [ME , *bene*] The seeds of several plants, mostly *Leguminosæ*, especially that of the common bean, *Faba vulgaris* **b , Calabar,** See *physostigma* **b., castor** See *ricinus* **b of St Ignatius.** See *ignatia*

bearberry See *Uva ursi*

Beard's disease [George Miller *Beard*, American physician, 1839–1883] Nervous exhaustion, neurasthenia

Beard-Valleix's points. See *Valleix s points douloureux*

bearing-down The feeling of weight or pressure in the pelvis in certain diseases **b -d pains,** uterine pains in labor

bear's-foot Leafcup A composite flowered plant, *Polymnia uvedalia*, of North America A popular remedy for enlargement of the spleen or the ague cake ' of malarious regions

bear's weed. Eriodictyon

beat (*bet*) [ME , *beten*] The pulsation of the arteries or the impulse of the heart **b , apex-,** the stroke of the heart apex against the chest-wall **b , ectopic,** a cardiac systole which does not originate at the sinoauricular node **b., heart-,** a pulsation of the heart **b , pulse-,** an arterial pulsation which can be felt

Beatty-Bright's friction-sound. The friction-sound produced by inflammation of the pleura

Beau's disease (*bo*) [Joseph Honoré Simon *Beau*, French physician 1806–1865] Asystole, cardiac insufficiency **B.'s lines,** the transverse rings seen on the finger nails after convalescence from exhausting diseases

Beaumès' sign (*bo'-ma*) See *Baumes' sign*

Beaumès-Colles' law See *Colles' law*

Beauperthuy's method (*bo'-per thwē*) [Louis Daniel *Beauperthuy*] A method of treating leprosy by good hygiene bathing with olive oil, the internal administration of mercury bichloride, and abstinence from salted meats

Beauvais' disease (*bo'-va*) Chronic articular rheumatism

bebeerine (*beb'-e rēn*) See *nectandra* **b hydrochloride,** $C_{19}H_{21}NO_3HCl$, reddish brown scales, soluble in alcohol and water, and used as an antipyretic and tonic Dose ½–1½ gr (0 005–0 097 Gm) 3 or 4 times daily **b. sulphate,** $(C_{19}H_{21}NO_3)_2H_2SO_4$, reddish brown scales, soluble in water and alcohol, uses and dose as in *b hydrochloride*

bebeeru bark (*be-be'-roo*) See *nectandra*

Beccaria's sign (*bak-kah'-re-ah*) Painful pulsating sensations in the occipital region during pregnancy

bechesthesis (*bek es'-thes-is*) [*βήξ*, cough, *αἴσθησις*, sensation] The sensation in the throat or air-passages that prompts one to cough

bechic (*bek'-ik*) [*βήξ*, a cough] Relieving cough, a remedy against cough

Bechterew's disease (*bek'-ter-oo*) [Vladimir Mikhailovich von *Bechterew*, Russian neurologist, 1857–1927] Ankylosis of the vertebral column, associated, as a rule, with muscular atrophy and sensory symptoms, spondylitis deformans **B.'s layer,** the layer of fibers between and parallel to the tangential fibers and Baillarger's layer in the cerebral cortex **B.'s nucleus,** the nucleus of the vestibular portion of the auditory

nerve; an ill-defined group of ganglion-cells lying dorsad of Deiters' nucleus. **B.'s reaction,** the minimum strength of the electric current necessary to provoke muscular contraction requires a gradual diminution at every interruption of the current or change in density, to prevent tetanic contraction which will occur if the inital strength is maintained. It is observed in tetany. **B.'s sign,** anesthesia of the popliteal space in tabes dorsalis. **B.'s tract,** the central tract of the tegmentum that passes between the mesial side of the superior olivary body and the fillet

Beck's method [Emil G. *Beck*, American surgeon, 1866–]. Tuberculous cavities in bone are curetted and then filled with a paste containing 30% of bismuth subnitrate.

Beck's operation. To cure epilepsy due to adhesions resulting from fracture or operations on the skull. The skull defect is plugged with temporal fascia and muscle.

Becker's reaction for picrotoxin. Picrotoxin reduces Fehling's solution upon the application of gentle heat. **B.'s sign** [Otto Heinrich Enoch *Becker*, German ophthalmologist, 1828–1890]. Spontaneous pulsation of the retinal arteries in exophthalmic goiter. **B.'s test,** a test for astigmatism made by means of a set of parallel lines in triplets placed in various meridians.

Becker's solution, solution of hypochlorite of sodium and potassium; used (by injections under the skin) in cases of inoperable cancer.

Béclard's hernia (*ba'-klar*) [Pierre Augustin *Béclard*, French anatomist, 1785–1825]. Hernia occurring through the saphenous opening. **B.'s nucleus,** a vascular, bony nucleus, of lenticular shape, appearing in the cartilage of the lower epiphysis of the femur during the thirty-seventh week of fetal life.

Becquerel's disc (*bek'-er-el*) [Antoine Henri *Becquerel*, French physicist, 1852–1908]. An apparatus for estimating the difference in temperature between a sound limb and a paralyzed one. **B.'s pills,** pills containing quinine, extract of digitalis, and colchicum seeds; they are used in gout. **B.'s rays,** invisible radiations of electrified particles or ions projected from radioactive bodies such as uranium, radium, polonium, or their salts, without evident cause, and persisting over long periods

bed [AS., *bedd*]. The couch or support on which the body may rest in sleep or in sickness; usually a mattress of straw, hair, or similar substance. **b., air-,** a mattress of rubber or leather that can be inflated with air. **b.-case,** a form of hysteria in which the patient persistently lies in bed. **b.. fracture-,** an especial device for the use of a patient confined with a fracture, composed of sections forming a double or triple inclined plane with an aperture to allow of the ejection of urine and feces. **b.-hoist,** a device for lifting a patient from bed. **b.-pan,** a large shallow vessel for receiving the alvine discharges of bedridden patients. **b., protection-,** a bed arranged for the confinement of maniacs in a recumbent posture. **b.-rest,** an apparatus for propping up patients in bed. **b.-sore,** a sore produced on any part of the body by prolonged pressure against the bed or by trophic changes in paralyzed parts. **b.-swing,** an appliance like a hammock for swinging a patient clear of the bed. **b., water-,** a rubber mattress containing water; it is used to prevent the formation of bed-sores.

bedbug (*bed'-bug*). An apterous insect, *Cimex lectularius*, that infests bedsteads, and at times is parasitic upon the human body.

bedlam (*bed'-lam*) [ME., *bedlem*, a corruption of *Bethlehem*]. An insane asylum.

bedlamism (*bed'-lam-izm*) [*bedlam*]. Insanity.

bedlamite (*bed'-lam-it*) [*bedlam*]. A madman; an insane person.

Bednar's aphthæ [Alois *Bednar*, Austrian physician]. Two symmetrically placed ulcers seen at times on the hard palate of cachectic infants, one on each side of the mesial line.

bedouin itch. A synonym of the vesicular variety of *lichen tropicus*.

bedridden (*bed'-rid-n*). Confined to bed; applied especially to those who seem permanently so affected.

bed-wetting. Nocturnal enuresis.

Beebe's serum (*be'-be*) [Silas Palmer *Beebe*, American physician]. A serum obtained from the blood of thyroidectomized animals, used in cases of hyperthyroidism.

Beecham's pills (*be'-cham*) [James *Beecham*, English maker of pills]. Laxative pills said to contain aloes, ginger and soap.

beef (*bēf*) [ME., *befe*]. The flesh of domestic cattle. It consists of water, 73; fibrin, 15; gelatin, 4; albumin, 3; fat and other substances, 5%. **b.-extract,** the soluble fibrin of lean meat partly desiccated. **b.-measles.** See *Cysticercus bovis*. **b.-tea,** the soluble extractive matter of beef, made by steeping finely cut lean beef in its weight of water and straining.

Beeley's square and plumb-line. An instrument to measure degrees of deformity.

beer (*bēr*). See *malt liquors*.

Beer's cataract knife (*bēr*) [Georg Joseph *Beer*, Austrian ophthalmologist]. A knife with a triangular-shaped blade, for making section of the cornea in the removal of the crystalline lens. **B.'s operation,** extraction of cataract by the flap method.

beestings (*bēst'-ings*). First milk after parturition; colostrum.

beeswax (*bēz'-waks*). *Cera flava* (U. S. P.), wax secreted by bees, of which their cells are constructed It is used in making candles, ointments, and pomades.

beet (*bēt*). The genus *Beta*, especially *B. vulgaris*, the common beet.

Begbie's disease (*beg'-be*) [James *Begbie*, Scotch physician, 1798–1869]. 1. Exophthalmic goiter, 2. Localized rhythmic chorea.

Beggiatoa (*bej-e-at-o'-ah*) [J. *Beggiato*, Italian botanist]. A genus of *Schizomycetes*, consisting of swinging or gliding, milk-white, gray, rosy, or violet threads. They decompose sulphur compounds and store up sulphur granules in their protoplasm. They are found in stagnant, fresh, or salt water, particularly in that contaminated with sewage or factory waste.

Beggiatoaceæ (*bej-e-at-o-a'-se-e*) [see *Beggiatoa*]. A family of *Schizomycetes* or bacteria in which the cells appear united in the form of a thread, but without a sheath. See *table* p. 843

begma (*beg'-mah*) [*βῆγμα*, a cough; pl., *begmata*]. A cough; the matter expectorated by coughing.

behaviorism (*be-ha'-ve-or-izm*). The psychology of behavior.

behen, behmen, behn, ben. Arabian names for roots of various plants.

behenic (*be-hen'-ik*). Derived from behen.

behen-nut (*be'-hen-nut*). The seed of *Moringa pterygosperma*, and *M. aptera*, trees of tropical

countries. They afford *oil of behen*, or *oil of ben*.

Béhier-Hardy's symptom (*ba'-he-a*) [Louis Jules *Béhier*, French physician, 1813–1876]. Aphonia, an early symptom in pulmonary gangrene.

Behring's law (*ba'-rıng*) [Emil Adolph *Behring*, German physician, 1854–1917]. The blood and blood-serum of an individual who has been artificially rendered immune against a certain infectious disease may be transferred to another individual with the effect of rendering the other also immune. **B.'s serum**, serum containing diphtheria-antitoxin. **B.'s tulase**, an immunizing remedy against tuberculosis.

Beigel's disease (*bı'-gel*) [Hermann *Beigel*, German physician, 1829–1870]. Trichorrhexis nodosa.

Beissenhirtz's reaction for aniline (*bı'-sen-hairts*). On the addition of a grain of potassium dichromate to a solution of aniline in concentrated sulphuric acid the solution becomes first red, then blue, the color gradually disappearing.

bel, bela (*be'-lah*) [Hind.]. The dried, half-ripe fruit of *Ægle marmelos*, or Bengal quince. It is recommended as a remedy for chronic diarrhea and dysentery. The ripe fruit is slightly laxative. Dose ½–1 dr. (2–4 Gm.). **b., liquid extract of** (*extractum belæ liquidum*, B. P.). Dose 1–2 dr. (4–8 Cc.).

belæ fructus (*be-le fruk-tus*) [L.]. Bael-fruit; see *bel*.

belching (*belch'-ing*) [ME, *belchen*] Expulsion of gas from stomach through mouth; eructation.

belemnoid (*bel-em'-noid*) [*βέλεμνον*, a dart; *εἶδος*, form]. 1. Dart-shaped; styloid. 2. The styloid process of the ulna or of the temporal bone.

Belfield's operation (*bel'-fēld*) [William Thomas *Belfield*, American surgeon, 1856–]. Making an artificial opening into the vas deferens.

bell (*bel*) [ME., *bel*] A hollow, metallic, sounding instrument **b.-gastrula.** See *archigastrula*. **b. sound, b tympany**, the sound produced in pneumothorax by striking a coin, placed flat upon the chest, with another coin. It can be heard through the stethoscope placed over affected side.

bell-crowned (*bel'-krownd*). Applied to a tooth-crown which is largest at the occlusal surface and tapers to the gum.

Bell's disease [1. Sir Charles *Bell*, Scotch physiologist, 1774–1842; 2 John *Bell*, Scotch anatomist, 1763–1820]. 1. See *Bell's mania*. 2. See *Bell's paralysis*. **B.'s law**, [1]. the anterior spinal nerve-roots are motor, the posterior, sensory. **B.'s mania**, [1]. acute delirium; acute periencephalitis. **B.'s muscle**, [2] The short muscular ridge on the inner surface of the bladder, passing forward from the ureteral openings and ending in the uvula vesicæ. **B.'s nerves**, [2]. The external and internal respiratory nerves—*i. e.*, the posterior thoracic and phrenic nerves. **B.'s palsy, B.'s paralysis**, [1], peripheral paralysis of the facial nerve. **B.'s phenomenon**, [1]. upward and outward rolling of the eyeball when an attempt is made to close the eye of the affected side in peripheral facial paralysis. **B.'s respiratory nerve**, [2]. The long thoracic nerve. **B.'s spasm**, [1]. convulsive facial tic.

belladonna (*bel-ah-don'-ah*) [It., *bella donna*, beautiful lady]. Deadly nightshade. A perennial plant of the order *Solanaceæ*, indigenous to southern Europe and Asia, and cultivated in the United States. Its properties are due to the alkaloids *atropine* and *belladonnine*, the latter thought to be identical with hyoscyamine. Both leaves and root are employed. It is used as an antispasmodic, as a cardiac and respiratory stimulant, and to check secretions, as those of the sweat and milk. **b. leaves** (*belladonnæ folia*, U. S. P.), the dried leaves of *Atropa belladonna*. **b. leaves, extract of** (*extractum belladonnæ foliorum*, U. S. P.). Dose ½ gr. (0.01 Gm.). **b. leaves, tincture of** (*tinctura belladonnæ foliorum*, U. S. P.), 15 %. Dose 1–30 min. (0.06–2.0 Cc.). **b. liniment** (*linimentum belladonnæ*, U. S. P.), made of camphor, 5; fluidextract of belladonna root, 95. **b. ointment** (*unguentum belladonnæ*, U. S. P.), contains extract of belladonna leaves, 10; diluted alcohol, 6; benzoinated lard, 65; hydrous wool-fat, 20. **b. plaster** (*emplastrum belladonnæ*, U. S. P.), made of adhesive plaster and extract of belladonna leaves. **b. root** (*belladonnæ radix*, U. S. P.), the dried root of *Atropa belladonna*. **b. root, fluidextract of** (*fluidextractum belladonnæ radicis*, U. S. P.). Dose 1–5 min. (0.065–0.3 Cc.).

belladonnine (*bel-ah-don'-in*) [see *belladonna*], $C_{17}H_{21}NO_3$. An alkaloid found in belladonna. It resembles atropine, hyoscyamine, and hyoscine. It occurs with atropine, and is likewise decomposed into tropic acid and oxytropine, $C_8H_{13}NO_2$. See *belladonna*.

Bell-Bernhardt's phenomenon. See *Bell's phenomenon*

Bellini's duct (*bel-e'-ne*) [Lorenzo *Bellini*, Italian anatomist, 1643–1704] One of the excretory ducts of the kidney. **B.'s ligament**, a ligamentous band extending from the capsule of the hip-joint to the greater trochanter of the femur. **B.'s tubes**, the straight uriniferous tubules.

bellite (*bel'-it*) [*bellum*, war]. A blasting and war explosive. A principal element in its manufacture is nitrobenzol. The most prominent symptoms induced by its inhalation and absorption are headache, mental confusion, dyspnea, pallor, blueness of the lips, general lividity, coma, insensibility.

Bell-Magendie's law. See *Bell's law*.

Bellocq's cannula (*bel'-oks*) [Jean Jacques *Bellocq*, French surgeon, 1732–1807]. An instrument used in plugging the nares.

Bellonia (*bel-o'-ne-ah*) [Peter *Belon*, a French naturalist, 1499–1564]. A genus of plants of the order *Gesneraceæ*. *B. aspera* is a West Indian shrub; the bark is used in intermittent fever and in dysentery.

bellows (*bel'-ōz*) [ME., *belowes*]. An instrument for propelling air through a tube or small orifice. **b. sound,** the *bruit de souffle*, *q. v.*

belly (*bel'-e*) [ME., *bely*]. 1. The anterior abdominal wall. See *abdomen*. 2. Any belly-like enlargement of a part. **b.-bound,** constipated. **b.-button,** the navel. **b. of a muscle,** the fleshy part of a muscle.

bellyache (*bel-e-āk*). See *colic*.

beloid (*bel'-oid*) [*βέλος*, an arrow]. Arrow-shaped or styloid.

belonephobia (*bel-o-ne-fo'-be-ah*) [*βέλονη*, a pin; *φόβος*, fear]. A morbid dread of pins and needles, and of sharp-pointed objects in general.

belonoid (*bel'-on-oid*) [*βέλονη*, a needle, bodkin]. Styloid; needle-shaped.

belonospasis (*bel-on-os'-pa-sis*) [*βέλονη*, a point; *σπάσις*, a drawing]. Irritation by means of needles or metallic tractors.

belt (*belt*). **abdominal,** a broad, elastic belt worn about the abdomen as a support during pregnancy. **b., magnetic,** a belt consisting of plates of metal fastened upon a strip of felt moistened with dilute acid. It is a cure-all largely sold by

empirics. **b., test,** a patient suffering from enteroptosis experiences a sensation of relief when firm upward pressure is made on the lower part of the abdomen.

ben, oil of, benne oil (*ben, ben'-e*). Oleum balatinum; it is obtained by expression from the seeds of the several species of *Moringa*. It is used for extracting odors and for lubricating clocks and light machinery.

Benario's method (*ben-ar'-e-o*). For the fixation of blood-films. It consists in the use of a 1% alcoholic solution of formalin for one minute.

Bence-Jones' bodies [Henry *Bence-Jones*, English physician, 1814–1873]. Peculiar bodies, consisting of albumose, found in the urine in certain affections of the bone-marrow, especially neoplasms. **B.-J.'s cylinders,** long cylindrical formations derived from the seminiferous tubules, sometimes seen in the urine. **B.-J.'s reaction,** the urine is acidified with acetic acid and gently heated, in the presence of albumose a precipitate is formed, which is dissolved on boiling and reappears on cooling.

bends (*bendz*) [ME., *bend*]. A term used by miners and caisson-laborers for a condition produced by too sudden reduction of the high air-pressure; it is indicated by swellings or small bubbles under the skin; see *caisson disease*.

beneceptor (*be-ne-sep'-tor*) [*bene*, well; *capere*, to take]. A nervous mechanism for the appreciation and transmission of beneficial stimuli.

Benedict's test for glucose in urine [S. R. *Benedict*. American physiological chemist] To 5 c.c. of Benedict's reagent ($CuSO_4$ crystals 17.3, Na or K citrate 173, Na_2CO_3 crystals 200, distilled water 1000) add 8 to 10 drops of urine, boil vigorously for 2 minutes, and allow to cool; a red, yellow, or green color indicates the presence of glucose.

Benedict's test for HCl in the stomach [A. L. *Benedict*, American physician, 1865–]. This consists in auscultation over the stomach after the patient has swallowed a small quantity of saturated solution of sodium bicarbonate. Normal hydrochloric acidity is indicated by a fine crepitation, superacidity by an earlier and louder sound, and in anacidity the crepitation is absent.

benedictine (*ben-e-dik'-tin*) [*benedicere*, to bless]. A liqueur or cordial originally prepared by Benedictine monks. It resembles chartreuse.

Benedikt's syndrome (*ben'-e-dikt*) [Moritz *Benedikt*, Austrian physician, 1835–]. Paralysis of the motor oculi of one side and tremor of the arm of the opposite side; attributed by Charcot to a lesion in the ventrointernal part of the crura cerebri.

beng (*beng*). See *cannabis indica*.

bengalin (*ben'-gawl-in*) [Hind., *Bengāl*]. A blue pigment derived from the benzene colors.

Benger's food. A mixture of wheat-flour and pancreatic extract. When prepared according to directions most of the starch is converted into soluble forms. The protein and milk are partially digested.

Bengue's anodyne balsam (*ben'-ga*). A compound consisting of menthol, ʒ2½; methyl salicylate, ʒ2½; wool-fat, ʒ3.

benign, benignant (*be-nīn', be-nig'-nant*) *benignus*, kind]. Not endangering health or life; not malignant, applied to certain tumors.

Benincasa (*ben-in-ka'-sah*) [*Benincasa*, an Italian nobleman]. A genus of plants of the order *Cucurbitaceæ*.

Béniqué's sound (*ba-ne-ka'*) [Pierre Jules *Béniqué*, French physician, 1806–1851]. A urethral sound with a wide curve

benne, oil of (*ben'-e*). Oil of sesame seeds.

Bennett's corpuscles [James Henry *Bennett*, English obstetrician, 1816–1891]. Large epithelial cells filled with fatty detritus found in the contents of some ovarian cysts

Bennett's disease [John Hughes *Bennett*, English physician, 1812–1876] Leukemia.

Bennett's fracture [Edward Hallaran *Bennett*, Irish surgeon, 1837–1907]. A longitudinal fracture of the first metacarpal bone, extending into the carpometacarpal joint and complicated by subluxation.

benzacetin (*ben-zas'-et-in*), $C_6H_4(OC_2H_5)(NH.CH_3CO)COOH$. Colorless crystals, soluble in alcohol, slightly soluble in water; melt at 205° C. It is used in neuralgia. Dose 8–15 gr. (0.52–0.97 Gm.). Syn., *acetamidomethyl-salicylic acid*.

benzaconine (*ben-zak'-on-ēn*). An alkaloid from aconite with action similar to aconitine, except that it lacks its antipyretic power and has little effect on the sensory nerves, while it depresses the motor group and also the muscle-fibers.

benzaldehyde (*ben-zal'-de-hīd*) [*benzoin; aldehyde*]. C_7H_6O, *benzaldehydum* (U. S. P.) Bitter-almond oil; a compound that results from the oxidation of benzyl alcohol.

benzamide (*ben'-zam-id*) [*benzoin; amide*], C_7H_7NO. A compound resulting from the action of benzoyl chloride upon alcoholic ammonia

benzamil (*ben'-zam-il*), $C_{28}H_{10}NO_2$. A distillation-product of oil of bitter almonds.

benzamine (*ben-zam'-ēn*). Betaeucaine.

benzanalgen (*ben-zan-al'-jen*), $C_9H_8OC_2H_5.HN.CO_6CH_5N$. A derivative of chinolin. It is antiseptic, antipyretic, and antineuralgic, and has the power of dissolving uric acid. It is used in rheumatism, tabes dorsalis, and chronic gout. Dose 7½–45 gr. (0.5–3.0 Gm.).

benzanilide (*ben-zan'-il-id*) [*benzoin; aniline*], $C_{13}H_{11}NO$ Benzoyl anilide, prepared by the action of benzoyl chloride on aniline. It is used as an antipyretic in children in doses of 3–8 gr. (0.2–0.5 Gm.).

benzaurin (*ben-zaw'-rin*), $C_{19}H_{18}O_3$. Red crystals melting at 100° C. Syn., *Phenyldiphenolcarbinol*. **b. anhydride,** a colorless substance dissolving in alkaline solutions with a violet color.

benzene (*ben'-zēn*), C_6H_6. A hydrocarbon contained in coal-tar. It is formed by the dry distillation of all benzene acids. It is a mobile, ethereal-smelling liquid, of specific gravity 0.899 at 0°. It solidifies at about 0°, melts at +6°, boils at 580°, and burns with a luminous flame. It readily dissolves resins, fats, sulphur, iodine, and phosphorus. Aniline and the aniline colors are derived from it. Syn., *benzol; phene; phenyl hydrid*. **b.-sulphonic acid,** $C_6H_5.SO_3H$, is prepared by boiling together equal parts of benzene and H_2SO_4. It occurs in small plates, readily soluble in alcohol and water, and which deliquesce in the air.

benzenyl (*ben'-zen-il*). See *phenyl*. **b.-amidothiophenol,** $C_{13}H_9NS$, acicular crystals with fragrance of roses, obtained from amidophenylmercaptan by benzoic aldehyde and heat; it is soluble in alcohol, ether carbon disulphide, and dilute hydrochloric acid. Syn., *benzenylamidophenylmercaptan*.

benzhydrol (*benz-hi'-dr* $C_6H_5-CH(OH)-C_6H_5$. An alcohol occurring as silky, acicular

crystals, slightly soluble in water, obtained from an alcoholic solution of benzophenone by action of sodium amalgam. Syn., *diphenylcarbinol.* **b. acetate,** a thick liquid obtained by heating benzhydrol with acetic acid.

benzidine (*ben'-zid-ēn*). Diaminobiphenyl, $NH_2.C_6H_4.C_6H_4.NH_2$. A colorless, crystalline substance, formed by reaction of acids upon hydrazobenzene. Used in test for blood. See *Adler's benzidine reaction for blood.*

benzil (*benz'-il*), $C_{14}H_{10}O_2$. A compound produced by the action of nitric acid on benzoin.

benzilimide (*ben-zil'-im-id*), $C_{28}H_{22}N_2O_2$. White silky needles obtained from an alcoholic solution of benzil by action of dry ammoniacal gas.

benzimide (*ben'-zim-id*) [*benzoyl; amide*], $C_{21}H_{15}N_3O_3$. A compound formed by the action of hydrocyanic acid on benzoyl hydrate. It occurs also in the resinous residue of the rectification of the oil of bitter almonds.

benzin, benzinum, benzine (*ben'-zin, -zi'-num, ben'-zēn*). Petroleum ether. The *benzinum* of the U. S. P. is a purified distillate from American petroleum, having a specific gravity of 0.77 to 0.79, boiling at 80° to 90° C., colorless, of ethereal odor, and a slightly peppermint-like taste. It is a valuable solvent for oils, fats, resins, caoutchouc, and some alkaloids. It has been used against tape-worm. It should be distinguished from *benzene.* Dose 5–10 min. (0.33–0 66 Cc) on sugar or in mucilage. **b., coal-tar,** benzin obtained as a by-product in preparing benzene and toluene from coal-tar oil by action of acids and alkalies. It differs chemically and physically from petroleum benzin, and is used as a cleansing fluid and as a solvent for resin, caoutchouc, etc.

benzinin (*ben'-zin-in*) A toxin extracted by Auclair from tubercle bacilli Syn., *benzinobacillin.*

benzinobacillin (*ben-zin-o-bas'-il-in*). See *benzinin.*

benzinomania (*ben-zin-o-ma'-ne-ah*). The habit of taking benzin, by inhalation. And see *benzolism.*

benzite (*ben'-zīt*). A solution of sulphur in two or three parts of hot coal-tar

benzoate (*ben'-zo-āt*) [*benzoin*]. Any salt of benzoic acid. **b., naphthol.** See *benzonaphthol.*

benzoated (*ben'-zo-a-ted*) [*benzoin*]. Impregnated with benzoin or with benzoic acid or a benzoate.

benzobis (*ben-zo'-bis*). Same as *mesurol, q. v.*

benzocaine (*ben'-zo-kān*). Ethyl amidobenzoate; anesthesin, *q. v.*

benzodiureid (*ben-zo-di-u'-re-id*), $C_9H_{12}N_4O_2$. Tiny needles obtained from benzoic aldehyde by action of urea.

benzoglycollate (*ben-zo-gli'-kol-āt*). A salt of benzoglycollic acid.

benzohelicin (*ben-zo-hel'-is-in*), $C_{26}H_{30}O_8$. A combination of benzoyl and helicin. Syn., *benzoyl helicin.*

benzoic (*ben-zo'-ik*) [*benzoin*]. Pertaining to or derived from benzoin. **b. acid.** See *acid: benzoic.*

benzoin (*ben'-zoin* or *-zo-in*) [origin obscure]. 1. *Benzoinum* (U. S. P.), a resin obtained from *Styrax benzoin,* a tree native to Sumatra and Siam. It is a ketone alcohol, $C_{14}H_{12}O_2$, and may be produced by oxidizing hydrobenzoin with concentrated HNO_3. It is antiseptic and disinfectant, and is used mainly as a stimulant expectorant in chronic bronchitis. 2. $C_{14}H_{12}O_2$, a reaction-product of an alcoholic solution of potassium cyanide on benzoic aldehyde, forming yellowish, fragrant prisms, soluble in hot alcohol, melting at 135°–137° C. It is used as an external antiseptic, 1 part in 5 of lard. Syn., *bitter-almond oil camphor; phenylbenzoyl carbinol.* **b., flowers of,** benzoic acid obtained by the sublimation of benzoin. **b., tincture of** (*tinctura benzoini,* U. S. P.), 20% of the resin in alcohol. Dose ½–1 dr. (2–4 Cc.). **b., tincture of, compound** (*tinctura benzoini composita,* U. S. P.), friars' balsam; Turlington's balsam; it consists of benzoin, 12; aloes, 2; storax, 8, balsam of tolu, 4; alcohol, sufficient to make 100 parts. Dose ½–2 dr. (2–8 Cc.).

benzoinam (*ben-zo'-in-am*), $C_{28}H_{24}N_2O$. A crystalline powder derived from benzoin by action of alcoholic solution of ammonia with heat.

benzoinated (*ben-zo'-in-a-ted*). Combined or prepared with benzoin.

benzoinol (*ben-zo'-in-ol*). An oily liquid, said to consist of albolene with gum benzoin in solution; it is used as an excipient for menthol, camphor, etc., in diseases of the nose and throat.

benzoinum. See *benzoin.*

benzoiodohydrin (*ben-zo-i-o-do-hī'-drin*), $(C_9H_8)ClI(C_7H_8O_2)$. A brownish-yellow, oily mass, soluble in alcohol, ether, and petroleum ether, insoluble in glycerol. It decomposes at 100° C., iodine being liberated. It is a succedaneum for potassium iodide, and is given in the same doses. Syn., *chloroiodo-benzoic-glycerinester; glyceryl-chloriodobenzoate.*

benzol, benzole, benzoleum (*ben'-zol, ben'-zōl, ben-zōl-e'-um*). See *benzene.*

benzolguaiacol (*ben-zol-gwi'-ak-ol*). See *benzosol.*

benzoline (*ben'-zol-ēn*). Impure benzene, used for removing grease.

benzolism (*ben'-zol-izm*). Benzol-poisoning, from inhaling the vapor or swallowing it. It is marked in light cases by dizziness, loss of consciousness, and anesthesia; in severer cases by hallucination, epileptic paroxysms, and coma.

benzonaphthol (*ben-zo-naf'-thol*) [*benzoin; naphthol*], $C_{19}H_{14}O(C_7H_8O)$. The benzoate of beta-naphthol, used as an intestinal antiseptic in typhoid fever and other intestinal diseases. Dose 2–8 gr. (0.13–0 52 Gm.).

benzonitrile (*ben-zo-ni'-tril*) [*benzoin; nitrum,* niter], C_7H_5N. An oil obtained from benzenesulphonic acid by distillation with potassium cyanide. It has an odor resembling that of oil of bitter almonds, and boils at 191° C.; its specific gravity is 1 023 at 0° C.

benzoparacresol (*ben-zo-par-ah-kre'-sol*). An intestinal septic, insoluble in water. Dose, 4 gr. (0 25 Gm.).

benzophenid (*ben-zo-fen'-id*). Phenyl benzoate.

benzophenoneid (*ben-zo-fe-no'-ne-id*). An antiseptic and germicidal compound.

benzopyrine (*ben-zo-pi'-rin*). Antipyrine benzoate.

benzosalicin (*ben-zo-sal'-is-in*). See *populin.*

benzosalin (*ben-zo-sa'-lin*). Trade name for the methyl ester of benzosalicylic acid; used in rheumatism, sciatica, neuralgia. Dose, 20–40 gr. (1–2 Gm.).

benzosol (*ben'-zo-sol*) [*benzoin*], $C_{14}H_{12}O_2$. The benzoate of guaiacol; it contains 54% of guaiacol. Its chief uses are as an intestinal antiseptic and in pulmonary tuberculosis. Dose 3–12 gr. (0.2–0.8 Gm.).

benzosulphate (*ben-zo-sul'-fāt*). A salt of benzosulphuric acid.

benzosulphinide (*ben-zo-sul'-fin-id*). *Benzosulphinidum* (U. S. P.); saccharin.

benzotrichloride (*ben-zo-tri-klo'-rid*), $C_7H_5Cl_3$. A colorless, transparent, highly refractive liquid, with penetrating odor, obtained from boiling toluene by action of chlorine; sp. gr. 1.38 at 14° C.; boils at 213°–214° C. Syn., *benzenyl trichloride.*

benzoyl (*ben'-zo-il*) [*benzoin*], C_6H_5CO. The radical of benzoic acid, of oil of bitter almonds, and of an extensive series of compounds derived from this oil, or connected with it by certain relations. **b.-acetylperoxide**, $C_9H_8O_4$, an oxidized product of the mixed anhydride of acetic and benzoic acids, a crystalline body, slightly soluble in water and very unstable. To prevent explosion by sudden heating or grinding it is diluted with an equal quantity of inert absorbent powder and called *acetozone.* It is used as an intestinal antiseptic. Dose 4–5 gr. (0.26–0.32 Gm.) 3 times daily. Syn., *acetylbenzoyl peroxide.* **b. chloride**, C_7H_5OCl, a transparent, colorless, pungent oil with a specific gravity of 1 21 at 19° C.; it boils at 194°–195° C. When acted on by alcoholic ammonia it gives dibenzylamine It is used as a reagent in organic analysis and synthesis. Syn., *chlorobenzoyl chloride.* **b.-ecgonin**, $C_{16}H_{18}NO_4H$, a substance intermediate in composition between cocaine and ecgonin. **b.-eugenol**, $C_{17}H_{16}O_3$, a substance forming large, transparent, colorless prisms or small white crystals, soluble in alcohol, ether, chloroform, and acetone; melts at 69°–70.5° C. It is used in tuberculosis Dose 7½–15 gr. (0.5–1 0 Gm.). **b.-glycocin, b.-glycocoll,** hippuric acid. **b.-guaiacol.** See *bensosol* **b. hydrate,** benzoic acid, also improperly applied to benzoic aldehyde. **b. peroxide,** a bactericide and disinfectant substance. **b.-phenylhydrazin,** $C_{13}H_{12}N_2O$, an antiseptic. **b. pseudotropein,** a local anesthetic **b. salicin,** see *populin* **b.-tropein,** $C_6H_{14}(C_6H_5CO)NO$, silky, acicular needles, it is a local anesthetic.

benzyl (*ben'-zil*) [*benzoin*], C_7H_7. A univalent hydrocarbon radical that does not exist in the free state, but in combination forms a considerable number of compounds. **b. alcohol.** See *alcohol, benzyl*

benzyl benzoate. The benzyl alcohol ester of benzoic acid; it is said to be antispasmodic, and beneficial in biliary, renal or uterine colic.

benzyl succinate. The dibenzyl ester of succinic acid; it is said to be antispasmodic, and beneficial in biliary, renal, or uterine colic.

benzylets (*ben'-zil-ets*). Trade name of a soluble gelatin globule containing benzyl benzoate.

benzylic (*ben-zil'-ik*). Relating to or prepared with benzyl.

benzylidene (*ben-zil'-id-ēn*) [*benzoin*], C_7H_6. A bivalent hydrocarbon radical derived from benzoin compounds.

Beral's apparatus. In pharmacy, an apparatus for effecting lixiviation.

Béraneck's tuberculin (*ba-ran-ek'*) [Edmond *Béraneck*, Swiss bacteriologist, 1859–]. A tuberculin made from two filtrates of tubercle bacilli, one extracted with lime, the other with phosphoric acid.

Bérard's aneurysm (*ba-rar'*) [Auguste *Bérard*, French surgeon, 1802–1846]. A varicose aneurysm having its sac in the tissue immediately surrounding the vein.

Béraud's ligament (*ba-ro'*) [Bruno Jean Jacques *Béraud*, French surgeon, 1825–1865]. The suspensory ligament of the pericardium that is attached to the third and fourth dorsal vertebræ. **B.'s valve,** a fold of mucous membrane found occasionally in the lacrimal sac, which it separates from the nasal duct.

berberine (*ber'-ber-ēn*) [*berberis*], $C_{20}H_{17}NO_4$. An alkaloid found in the bark of *Berberis* and in many other plants. It is recommended as a tonic and antiperiodic, and is an ingredient of various lotions for mucous membranes; it is useful in nasal catarrh, etc. Dose 1–10 gr. (0.065–0.65 Gm.). **b. carbonate,** $C_{41}H_{34}NO_{11}$, crystalline powder, soluble in hot water; it is antiperiodic, stomachic, and tonic. Dose, antiperiodic, 8–15 gr. (0.52–1.0 Gm.); stomachic and tonic, ½–1 gr. (0.032–0.065 Gm.) 3 times daily. **b. hydrochloride,** is used locally in gonorrhea.

berberis (*ber'-ber-is*) [L.]. Barberry. The berberis of the U. S. P. is the root of *Berberis aquifolium* and other species. Its properties are due to an alkaloid, *berberine,* $C_{20}H_{17}NO_4$. It is an astringent, bitter tonic; in large doses, a cathartic. It has been used locally in conjunctivitis, and internally in malarial and typhoid fevers. **b., fluidextract of** (*fluidextractum berberidis*, U. S. P.). Dose 5–30 min. (0 32–2 0 Cc.). **b., tincture of.** Dose 10 min – 1 dr. (0.65–4.0 Cc.).

bergamot, oil of (*bur'-gam-ot*) [*Bergamo*, a town in Italy], $C_{10}H_{16}$. A volatile oil derived from the rind of the *Citrus bergamia.* It is used mainly as a perfume and as a clearing-agent in histological work.

bergapten (*bur-gap'-ten*), $C_{12}H_8O_4$. A solid, greasy compound obtained from bergamot oil, being the lactone of burgaptenic acid. It melts at 188° C Syn., *bergamilene; bergamot camphor.*

Bergenhem's operation (*bār'-gen-hem*) [B. *Bergenhem*, Swedish surgeon]. An implantation of the ureter into the rectum.

bergenin (*bur'-jen-in*) [*Bergenia*, a genus of plants], $C_8H_8O_5H_2O$. A bitter, crystalline substance, obtained from various species of saxifrage, melting at 140° C. It is said to be a nerve tonic, with action intermediate between that of salicylic acid and of quinine

Berger's method (*bār'-zher*) [Paul *Berger*, French surgeon, 1845–]. Suture of the fragment in cases of transverse fracture of the patella.

Berger's paresthesia (*bār'-ja*) [Emil *Berger*, Austrian physician]. Paresthesia in youthful subjects, of one or both lower extremities, without objective symptoms, accompanied by weakness. **B.'s sign,** an elliptical or irregular shape of the pupil sometimes seen in the early stage of tabes and paralytic dementia and in paralysis of the third cranial nerve.

Bergeron's disease (*bār-ja-ron*) [Étienne Jules *Bergeron*, French physician, 1817–1900]. An affection characterized by abrupt, lightning-like, muscular contractions, independent of the will and limited ordinarily to the head and arms, involving at times the two extremities of one side. Like Dubini's disease, it is also known as "electric chorea."

Bergeron-Henoch's chorea. See *Bergeron's disease.*

Bergmann's fibers. B.-Deiters' fibers (*bārg'-man*) [Ernst von *Bergmann*, German surgeon, 1836–1907]. The processes of certain superficial neuroglia cells of the cerebellum which radiate toward the surface and are connected with the pia. **B. incision.** An oblique incision

to expose kidney. From outer edge of the erector spinæ at level of 12th rib downward and outward toward the junction of the outer and middle third of Poupart's ligament.

Bergonié's method (*bār-gon-e-a'*) [French physician]. General faradization in obesity.

beriberi (*ber'-e-ber-e*) [Singhalese, *bers*, weakness]. An infectious disease, endemic in various countries of Asia (Ceylon, India, China, Japan), Africa, and Australia, and presenting the features of a multiple neuritis. Bad food and defective hygienic conditions are predisposing causes; the true etiological factor is probably a microorganism. Syn., *kakké; myelopathia tropica; panneuritis epidemica.* **b., dropsical.** See *uncinariasis.* **b., pseudo-,** Gibbs' name for a disease endemic in the Singapore Lunatic Asylum, which prevails during the wet season and attacks Asiatics only. It is not contagious, is marked by slight anemia, considerable soft anasarca, and tendency to sudden death from shock. The softness of the edema, lack of spastic and paralytic conditions, and rapidity of recovery distinguish it from beriberi. Incubation is from one to two days. **b., web,** that marked by anemia and dropsy without paralysis.

Berkefeld filter (*berk'-felt*). A filter of diatomaceous earth used to filter out bacteria and so obtain a sterile filtrate.

Berlin's disease [Rudolf *Berlin*, German ophthalmologist, 1833–1907]. Commotio retinæ; traumatic edema of the retina.

Bernard's canal or **duct** (*bur-nar'*) [Claude *Bernard*, French physiologist, 1813–1878]. The supplementary duct of the pancreas. **B.'s center,** the "diabetic center" in the floor of the fourth ventricle. **B.'s granular layer,** the deep layer of cells lining the acini of the pancreas. It looks granular and stains but slightly with carmine. **B.'s puncture,** the puncture of a definite spot in the floor of the fourth cerebral ventricle for the production of artificial diabetes

Bernays' aseptic sponge (*bur'-nay*) [Augustus Charles *Bernays*, American surgeon, 1854–1907] Small discs of cotton fiber which have been subjected to great pressure; when placed in water, they enlarge 12 to 15 times. Employed as controlling agents in nasal hemorrhage.

Bernhardt's paresthesia (*burn'-hart*) [Martin *Bernhardt*, German neurologist, 1844–]. Abnormal sensations, especially of numbness, with hyperesthesia and pain on exertion, in the region supplied by the external cutaneous nerve of the thigh.

Bernhardt-Roth's symptom-complex. See *Bernhardt's paresthesia.*

Bernheimer's fibers (*burn'-hi-mer*) [Stefan *Bernheimer*, Austrian ophthalmologist, 1861–]. A tract of nerve-fibers extending from the optic tract to Luys' body.

berry (*ber'-e*). An indehiscent fruit with a succulent pericarp, as the grape and gooseberry.

Berthelot's test for phenol (*bur-thel-o'*) [Marcellin Pierre Eugène *Berthelot*, French chemist, 1827–1907]. An ammoniacal solution of phenol treated with sodium hypochlorite produces a beautiful blue coloration.

Berthollet's fluid (*bur-tol-a'*) [Claude Louis *Berthollet*, French chemist, 1748–1822]. A mixture of sodium chloride solution and sodium hypochlorite solution. **B.'s law,** when two salts in solution can, by double decomposition, produce a salt less soluble than either, this salt will be produced.

bertillonage (*ber-til-lon-a(h)j*) [Alphonse *Bertillon*, French anthropologist, 1853–1914]. A system of carefully recorded measurements and descriptions of criminals, for the purpose of future identification, adopted by the police of many countries.

Bertin, bones of (*bur-tan'*) [Exupère Joseph *Bertin*, French anatomist, 1712–1781]. The sphenoid turbinated bones, partly closing the sphenoid sinuses. **B., column of,** a cortical column of the kidney; the part separating the medullary pyramids. **B., ligament of,** the iliofemoral ligament.

beryllium (*ber-il'-e-um*) [βήρυλλος, beryl]. A bivalent metal obtained from the beryl, whence its name. Syn., *glucinum.* See *elements,* p. 452.

Berzelius' test for albumin (*bur-ze'-le-us*) [Johan Jacob *Berzelius*, Swedish chemist, 1779–1848]. All albuminous substances (except peptone) are precipitated from their aqueous solutions by metaphosphoric acid in freshly prepared concentrated solution.

besetment (*be-set'-ment*). An obsession.

besiclometer (*bes-ik-lom'-et-er*) [Fr., *besicles*, spectacle's; μέτρον, measure]. An instrument used by opticians for measuring the forehead to obtain the proper width for spectacle frames.

Besnier's rheumatism (*ba-ne-a'*) [Jules *Besnier*, French physician]. Simple chronic articular rheumatism; chronic arthrosynovitis.

Best's operation [Vans *Best*, Scotch surgeon, 1836–1875]. Subcutaneous suture of the abdominal ring in cases of hernia.

bestiality (*bes-te-al'-it-e*) [*bestia*, a beast]. Sexual intercourse with an animal.

Bestucheff's mixture, B.'s tincture (*bes'-tu-shef*) [Alexei Petrovich *Bestucheff*, Russian general, 1693–1766]. The ethereal tincture of iron chloride, used in erysipelas. It is made as follows. Tincture of iron chloride, 1 part; spirit of nitrous ether, 4 parts. Mix and expose to the rays of the sun in well-closed bottles until the brownish color disappears. The dose is from 1 to 2 teaspoonfuls every 3 hours.

beta (*be'-tah*) [L.] 1. The beet. 2. The second letter of the Greek alphabet, used in chemical nomenclature to indicate the second of two isomeric compounds.

betacaine (*be'-tah-kān*). Same as eucaine hydrochloride, *q. v.*

betacism (*be'-tas-izm*) [*beta*, β, second letter of Greek alphabet] Over-use of the *b*-sound in speech, or conversion of other sounds into it.

beta-eucaine (*be-tah-u'-kān*). A local anesthetic used in place of cocaine.

beta-hypophamine (*hi-pof'-am-in*). Same as *vasopressin.*

betaine (*be'-ta-in*). A ptomaine, $C_5H_{11}NO_2$, obtained from certain animal and vegetable substances, including the beet.

betaines (*bet'-ānz*). Amino-acids in which the nitrogen atom is united to methyl group in place of hydrogen groups.

betanaphthol (*be-tah-naf'-thol*). See *naphthol.* **b. bismuth,** a preparation containing 80% of bismuth oxide and 20% of betanaphthol. It is a brown powder, insoluble in water, and decomposed into its component parts in the intestine, the betanaphthol being absorbed and discharged with the urine, while the bismuth is evacuated with the stools. It is an intestinal antiseptic. Dose 15–45 gr. (1–3 Gm.). **b. benzoate,** the benzoic ester of betanaphthol; used internally as an intestinal antiseptic, and externally as a parasiticide. **b. carbonate,** $CO(OC_{10}H_7)_2$, a dinaphthyl ester of carbonic acid obtained by the action of phosgene on betanaphthol sodium.

It is used as an intestinal antiseptic. **b. lactate,** lactol. **b. salicylate,** the salicylic acid ester of betanaphthol; used as an internal antiseptic.

betanaphthyl, same as *betanaphthol, q. v.*

betel (*be'-tel*) [E. Ind.]. A masticatory used in the East. A few grains of the nut of the catechu palm. *Areca catechu,* are rolled up with a small amount of quicklime in a leaf of *Piper betel,* and chewed. It is tonic, astringent, stimulant, and aphrodisiac, and seems to increase the powers of endurance. Dose of *fluidextract* 1–3 dr. (4–12 Cc.)

Bethea's sign (*beth-ay'*) [Oscar W. *Bethea,* American physician, contemporary]. "When the examiner standing back of the patient places his fingers so that the tips rest on the upper surfaces of corresponding ribs high up in the patient's axillae, unilateral impairment of expansion is accurately indicated by the lessened degree of respiratory movement of the rib on the side affected."

bethroot (*beth-root'*). The rhizome of *Trillium erecta,* astringent and tonic. Dose of *fluidextract* ♏ xxx–℥j. *Trilisin,* a concentrated ext. Dose gr. ij–iv

betin (*be'-tin*) [*beta,* a beet]. A precipitate prepared from a tincture of the common beet. It has been proposed as a substitute for ergot

betol (*be'-tol*), $C_{11}H_{7}O.C_{7}H_{6}O_{2}$. A salicylic ether of naphthol, used in rheumatism and cystitis. It resembles salicylic acid in its properties Dose 10–15 gr. (0.65–1 0 Gm.). Syn , *naphthalol, salinaphthol.*

betony (*bet'-on-e*). The leaves of *Stachys betonica,* formerly used as an emetic, expectorant, cathartic and for various other purposes.

Bettendorff's test for arsenic (*bet'-en-dorf*) [Anton Joseph Hubert Maria *Bettendorff,* German chemist, 1839–] On heating a solution of stannous chloride in concentrated hydrochloric acid, specific gravity 1.19, with a solution of arsenic or arsenous acids in strong hydrochloric acid, a brownish turbidity or precipitate of metallic arsenic and tin is yielded.

Bettmann's test. Same as *Bettendorff's test.*

betula (*bet'-ū-lah*) [*betula,* birch]. See *birch.*

betulase (*bet'-ū-lās*). See *gaultherase.*

betulin (*bet'-ū-lin*) [*betula,* birch], $C_{36}H_{60}O_{3}$. Birch-resin, or birch-camphor, derived from the bark of the white birch.

betulol (*bet'-u-lol*). An application for the treatment of rheumatism, said to be more quickly absorbed than oil of wintergreen. Syn., *methyl-oleo-salicylate.*

between-brain. The interbrain; also the midbrain; the diencephalon.

Betz, giant cells of (*bets*) [Philipp Friedrich *Betz,* German physician, 1819–]. Large ganglion-cells found in the deeper layers of the cortex, especially in the ascending frontal convolution and the paracentral lobule. They are usually arranged in small groups of from three to five that are known as *Betz's nests.*

Bevan's incision. To expose the gall-bladder. A vertical incision along the outer border of right rectus muscle.

bex (*beks*) [βήξ, a cough]. A cough, or disease characterized by coughing. **b. convulsiva,** whooping-cough. **b. theriodes,** synonym of *whooping-cough.*

bezoar (*be'-zo-ar*) [Pers., *pādzahr,* the bezoar-stone, supposed antidote for poison]. A concretion found in the stomach or intestine of some animals (especially ruminants), formerly believed to be efficacious in preventing the fatal effects of poison. **b., oriental,** a hard, round concretion obtained from the intestine of the gazelle and other ruminants. It consists of concentric layers of resinous matter which burn with an agreeable odor; it is valued in the East for supposed medicinal properties.

Bezold's ganglion (*be'-zölt*) [Friedrich *Bezold,* German otologist, 1842–1908]. A ganglion in the interauricular septum of the frog's heart. **B.'s mastoiditis,** destruction of the apex of the mastoid process with a tendency to the formation of an abscess in the neck. **B.'s perforation,** perforation on the inner surface of the mastoid, with formation of an abscess under the sterno-mastoid. **B.'s symptom,** the appearance of an inflammatory swelling a short distance below the apex of the mastoid process is evidence of mastoid suppuration. See *Bezold's mastoiditis, B.'s perforation.* **B.'s triad,** diminished or delayed bone conduction, diminished appreciation of low tones, and negative Rinne's test, all together indicating otosclerosis.

BF. [Fr. *bouillon filtré,* filtered broth or bouillon]. Same as *Denys' tuberculin.*

B. H. Abbreviation of Board of Health.

bhang (*bang*). See *cannabis indica.*

bhel (*bel*). See *bel.*

B. Hy. Abbreviation for Bachelor of Hygiene.

B. I. Abbreviation for base (of prism) in.

Bi. Chemical symbol of *bismuth.*

bi- [*bis,* twice] A prefix meaning two, twice, double.

biacuminate (*bi-ak-ū'-min-āt*) [*bi-; acuminatus,* pointed]. Having two diverging pointed ends.

bialate (*bi-a'-lāt*) [*bi-; ala,* a wing]. Having two wings or wing-like appendages.

Bial's test for pentose (*be'-al*). Reagent· To 500 Cc. of 30% HCl add 1 Gm. of orcin and 25 drops of 10% ferric chloride solution. Four to 5 Cc. of this reagent are heated to the boiling point and withdrawn from the flame. Add the suspected urine drop by drop, up to 1 Cc. or less; a green color will appear if pentose be present. If dextrose be present in the urine it should first be removed by fermentation with a pure culture of yeast.

bialuminate (*bi-al-ū'-min-āt*) [*bi-; aluminum*]. A salt of aluminum containing two equivalents of aluminum combined with one of acid.

Bianchi's nodules (*be-ahn'-ke*) [Giovanni Batista *Bianchi,* Italian anatomist, 1681–1761]. Same as corpora Arantii; see under *Arantius*

biangulate (*bi-ang'-ū-lāt*) [*bi-; angulus,* an angle]. With two angles.

biapiculate (*bi-ap-ik'-ū-lāt*) [*bi-; apex,* the summit]. With two summits.

biarsenate (*bi-ar'-sen-āt*) [*bi-; arsenic.*] An acid arsenate containing two atoms of hydrogen.

biarticulate (*bi-ar-tik'-ū-lāt*) [*bi-; articulus,* a joint]. Having a double joint.

biasteriac, biasterial, biasteric (*bi-as-ter'-e-ak, bi-as-te'-re-al, bi-as-ter'-ik*) [*bi-; asterion,* a craniometric point]. Relating to the asterion on each side of the skull; extending between the two asterions.

biauricular (*bi-aw-rik'-ū-lar*) [*bi-; auricula,* the ear]. Relating to two auricles or to two corresponding auricular points.

biaurite (*bi-aw'-rīt*) [*bi-; auris,* the ear]. Furnished with two ears or ear-like projections.

biaxial (*bi-aks'-e-al*) [*bis,* twice; *axis*]. Furnished with two axes.

bib. A portion of a red blood-corpuscle adherent to the crescent bodies of the blood, observed in malaria.

bibasic (*bi-ba'-sik*) [*bi-; basis*, a base]. Having two hydrogen atoms replaceable by bases, as certain acids; dibasic

biberin (*bib'-ur-in*). Same as *bebeerin*.

bibiru bark (*bib-e'-roo*). See *bebeeru*.

bibliography (*bib-le-og'-ra-fe*) [*βιβλιον*, a book; *γραφειν*, to write]. A classified list of references, books, or authorities on any subject.

bibliophobia (*bib-le-o-fo'-be-ah*) [*βιβλιον*, a book; *φόβος*, dread]. Morbid dislike of books.

biborate (*bi-bo'-rāt*). See *pyroborate*.

$BiBr_3$. Bismuth bromide.

bibromide (*bi-bro'-mid*). A compound of bromine with a radical or element containing twice as much bromine as another similar compound.

bibulous (*bib'-ū-lus*) [*bibere*, to drink]. Having the property of absorbing moisture. **b. paper**, blotting paper

bicalcarate (*bi-kal'-kar-āt*) [*bi-; calcar*, a spur] Furnished with two spurs or spur-like projections.

bicameral (*bi-kam'-er-al*) [*bi-; camera*, a vault]. Having two compartments.

bicapitate (*bi-kap'-it-āt*) [*bi-; caput*, a head]. Having two heads; bicephalous, dicephalous.

bicapsular (*bi-kap'-sū-lar*) [*bi-; capsula*, a capsule]. Having two capsules.

bicarbonate (*bi-kar'-bon-āt*) [*bi-; carbonate*]. Any salt of carbonic acid in which only one of the hydrogen atoms has been replaced by a base.

bicaudal, bicaudate (*bi-kaw'dal, bi-kaw'-dāt*) [*bi-; cauda*, tail]. Having two tails or appendages.

bicavitary (*bi-kav'-it-a-re*) [*bi-; cavitas*, a cavity]. Having two cavities

bicellular (*bi-sel'-ū-lar*) [*bi-; cella*, a cell]. Composed of two cells.

bicephalic, bicephalous (*bi-sef-al'-ik, bi-sef'-al-us*). See *dicephalous*.

bicephalus. See *dicephalus*.

biceps (*bi'-seps*) [*bi-; caput*, head]. Having two heads, a term applied to several muscles, as *b. brachii*, *b. flexor cruris*.

biceptor (*bi-sep'-tor*) [*bi-; receptor*]. A receptor having two complementophile groups.

Bichat, canal of (*be'-shah*) [Marie François Xavier *Bichat*, French anatomist, 1771–1802]. A canal which was supposed by Bichat to exist between the subarachnoid space and the third ventricle. **B., fat-ball of,** the buccal fat-pad, a mass of fat lying in the space between the buccinator and the anterior border of the masseter; it is especially well developed in infants. **B., fissure of,** the transverse curved fissure passing below the splenium; its extremities correspond to the beginning of the Sylvian fissure. It affords passage to the pia, which forms within the hemispheres the tela choroidea and choroid plexus. **B., foramen of,** one connecting the subarachnoid space and third ventricle; it transmits the cerebrospinal fluid. **B., membrane of,** the subendothelial fibroelastic layer of the tunica intima of an artery. **B., tunic of,** the intima of the blood-vessels.

bichlorid. See *bichloride*.

bichloride (*bi-klo'-rid*) [*bi-; chlorine*]. A salt containing two equivalents of chlorine.

bicho (*be'-cho*). Epidemic gangrenous inflammation of the rectum.

bichromate (*bi-kro'-māt*) [*bi-; chromium*]. A salt containing two equivalents of chromium.

biciliate (*bi-sil'-e-āt*) [*bi-; cilia*]. Having two cilia.

bicinctus, bicingulatus (*bi-sink'-tus, bi-sin-gū-la'-tus*) [*bi-; cingere*, to gird]. Having two zones or belts.

bicipital, bicipitous (*bi-sip'-it-al, -us*) [*biceps* double-headed]. 1. With two heads. 2. Relating to one of the biceps muscles.

$BiCl_3$. Bismuth chloride

biclavate (*bi-klā'-vāt*) [*bi-; clava*, a club]. Clubbed at each end. **b.-bihamate,** with the two club-shaped ends bent toward each other. **b.-cylindrical,** cylindrical and with clubbed ends.

$Bi_2(CO_3)_3$. Bismuth carbonate.

biconcave (*bi-kon'-kāv*). Hollow on both surfaces.

biconvex (*bi-kon'-veks*). Rounded on both surfaces.

bicornuate (*bi-kor'-nū-āt*) [*bicornutus*, with two horns]. Having two horns, as a *bicornuate* uterus.

bicorporal, bicorporate, bicorporated (*bi-kor'-por-al, -āt, -ā-ted*) [*bi-; corpus*, a body]. Consisting of two bodies.

bicrescentic (*bi-kres-en'-tik*) [*bis*, twice; *crescere*, to grow]. Applied to a tooth having two ridges in the form of a double crescent.

bicrural (*bi-kru'-ral*) [*bi-; crus*, a leg]. Having two legs or leg-like processes.

bicuspid (*bi-kus'-pid*) [*bi-; cuspis*, the point of a spear] Having two cusps, as *bicuspid* teeth. **b. valve,** the mitral valve of the heart.

bicyanate (*bi-si'-an-āt*) [*bi-; cyanogen*]. A salt having two equivalents of cyanic acid and one of a base.

b. i. d. Abbreviation of the Latin *bis in die*, twice daily.

bidacryc (*bi-dak'-rik*) [*bi-; dacryon*]. In craniometry, relating to the two dacryons.

Bidder, ganglion of (*bid'-er*) [Friedrich Heinrich *Bidder*, German anatomist, 1810–1894]. An accumulation of ganglion-cells in the interauricular septum and the auriculoventricular groove of the frog's heart.

bidental (*bi-den'-tal*) [*bi-; dens*, a tooth]. Having two teeth or tooth-like prominences.

bidet (*be-det'* or *be'-da*) [Fr., "pony"]. A tub or basin with fixed attachments for the administering of injections, also for use as a sitz-bath or hip-bath.

bidigital (*bi-dij'-it-al*) [*bi-; digitus*, a finger]. Referring to the tip of a finger of each hand.

Bieber's reagent. Equal volumes concentrated sulphuric acid, red nitric acid, and water.

Biebrich scarlet (*be-brik*). Scarlet red, *q. v.*

Biedert's cream mixture (*be'-dārt*). An infant's food made by mixing 4 oz. of cream with 12 oz. of warm water, and adding ½ oz. of milk-sugar. It contains 1% of casein, 2.5% of fat, and 3.8% of sugar. As the child grows older a larger proportion of milk is added.

Bieg's entotic test (*bēg*). When words are audible only on being spoken into an ear-trumpet connected with a catheter placed in the Eustachian tube, but not through the ear-trumpet as ordinarily applied, there is a probable lesion of the malleus or incus which interferes with conduction.

bielectrolysis (*bi-e-lek-trol'-is-is*) [*bi; ἠλεκτρον*, amber; *λυσις*, resolution]. The electrolysis of two substances at the same time.

biennial (*bi-en'-e-al*) [*bi; annus*, a year] Every two years. In botany, plants that produce foliage and a root-stalk the first year, flowering and maturing the second.

Biermer's anemia (*bēr'-mer*) [Anton *Biermer*, German physician, 1827–1892]. Pernicious an-

emia. B.'s change of pitch, in hydropneumothorax the tympanitic sound is lower in pitch when patient sits than when lying down.

Biermerin (*bēr'-mer-in*). A hematopoietic hormone in normal gastric juice. Injected, it stimulates the bone marrow

Biernacki's symptom (*bēr'-nak-e*) [Edmond Adolfovich *Biernacki*, Russian pathologist, 1866–1912] Analgesia of the ulnar nerve at the elbow; it is observed in tabes dorsalis and paretic dementia.

Bier's cups (*bēr*) [August Karl Gustav *Bier*, German surgeon, 1861–]. Glass appliances used to produce Bier's hyperemia. **B.'s hyperemia.** A method of treatment by artificial production of passive congestion in the part diseased. **B.'s local anesthesia.** 1. Anesthesia in a limb produced by intravenous injections of ½% cocaine after the part has been rendered bloodless by elevation and constriction. 2. Anesthesia of the lower part of the body produced by the injection of an anesthetic agent into the spinal membranes.

Biesiadecki's fossa (*be-es-e-ah-dek'-e*) [Alfred von *Biesiadecki*, Russian physician, 1839–1888]. A peritoneal recess which is bounded in front by a more or less well-defined fold, the inner surface of which looks upward over the psoas toward the root of the mesentery, the outer extending toward the crest of the ilium. Syn , *fossa iliacosubfascialis*.

Biett's collar (*be-et'-*) [Laurent Theodore *Biett*, Swiss physician, 1781–1840]. A zone of lenticulopapular syphilide on the neck.

bifacial (*bi-fa'-shal*) [*bi-; facies*, a face]. Having the opposite surfaces similar.

bifarious (*bi-fa'-re-us*) [*bifarius*]. Twofold; arranged in two more or less regular series or rows.

Biffi's test for bile. Acidify 150 to 200 Cc. of urine with sulphuric acid; add drop by drop a 5% barium chloride solution, using about 30 drops to every 100 Cc. of urine. Pour off the liquid and collect the soft precipitate on absorbent cotton and spread evenly. Place a crystal of potassium dichromate upon the surface of the precipitate, and in the presence of bile a green ring will form around the crystal, changing to blue and then to red. A small amount of albumin will not interfere with the test, but if much is present, the use of a saturated solution of sodium sulphate is recommended instead of the sulphuric acid.

bifid (*bi'-fid*) [*bi-; findere*, to cleave]. Divided into two parts; cleft, as *bifid* uvula. **b. spine,** spina bifida **b. tongue,** one cleft longitudinally.

bifissile (*bi-fis'-il*) [*bi-; findere*, to split]. Parting naturally into halves.

bifistular, bifistulous (*bi-fis'-tu-lar, -lus*) [*bi-; fistula*, a pipe]. With two tubes.

biflagellate (*bi-flaj'-el-āt*) [*bi-; flagellum*, a whip]. Furnished with two flagella.

bifocal (*bi-fo'-kal*) [*bi-; focus*, a point]. Having a double focus. Applied to a system of lenses or spectacle-glasses with two foci, chiefly used for the correction of presbyopia, when there is at the same time an error of refraction for distant vision. The distance lens is above that for near-work. These are sometimes called *pantoscopic lenses*, and also *Franklin spectacles*, because the device was first made by Benjamin Franklin. They are also called *cement lenses*, because now made by cementing the lower segment to the distance lens.

biforate (*bi-fo'-rāt*) [*bi-; foratus*, perforated]. Having two foramina.

biformity (*bi-form'-it-e*). The condition of being dimorphous.

biforous (*bi'-for-us*). 1. See *biforate*. 2. Having two valves.

bifurcate (*bi-fur'-kāt*) [*bi-; furca*, a fork]. Divided into two, like a fork.

bifurcation (*bi-fur-ka'-shun*) [see *bifurcate*]. Division into two branches, as of the trachea for the aorta.

bigaster (*bi-gas'-ter*). See *biventer*.

Bigelovia (*big-lo'-ve-ah*) [Jacob *Bigelow*, American botanist, 1787–1879]. A genus of compositeflowered plants. See *Damiana*.

Bigelow's ligament (*big'-el-o*) [Henry Jacob *Bigelow*, American surgeon, 1816–1890]. The Y-ligament of the hip-joint; iliofemoral ligament **B.'s operation,** lithotripsy. **B.'s septum,** the calcar femorale, a nearly vertical spur of compact tissue in the neck of the femur, a little in front of the lesser trochanter.

bigeminal, bigeminous (*bi-jem'-in-al, -us*) [*bi-; geminare*, to double]. Occurring in two pairs. **b. bodies,** the anterior pair of the corpora quadrigemina of the brain.

bigeminum (*bi-jem'-in-um*) [*bi*, two; *geminus*, a twin]. One of the corpora bigemina of the brain.

bihastate, bihastatus (*bi-has'-tāt, bi-has-ta'-tus*) [*bi-; hasta*, a lance] With two lance-shaped processes.

bilabe (*bi'-lāb*) [*bi-; labium*, lip]. A surgical instrument for removing foreign bodies from the bladder through the urethra.

bilamellar, bilamellate, bilamellated (*bi-lam-el'-ar, -āt, -el-a'-ted*) [*bi-; lamella*, a plate] Consisting of two thin plates.

bilaminar, bilaminate (*bi-lam'-in-ar, -āt*) [*bi-; lamina*, a sheet]. Composed of two layers.

bilateral (*bi-lat'-er-al*) [*bi-; latus*, a side] Relating to two sides; pertaining to or affecting both sides of the body. **b. symmetry,** the symmetry of right and left halves

bilateralism (*bi-lat'-er-al-izm*) [see *bilateral*]. Bilateral symmetry

bile (*bīl*) [*bilis*, the bile]. The substance secreted by the liver. It is mucilaginous, golden-brown, and is composed of biliary salts, cholesterin, mucus, and certain pigments. The principal salts are the sodium salts of taurocholic acid and glycocholic acid The taste of bile is intensely bitter, its reaction feebly alkaline, and its density from 1026 to 1032. **b. acids, tests for.** See *Drechsel, Mylius, Pettenkofer, Strassburg, v Udransky*. **b., crystallized,** Plattner's name for sodium taurocholate. **b., cystic,** bile contained in the gall-bladder as distinguished from that which is transmitted directly from the liver to the duodenum. **b., glastine,** that of a bluish color, so called from *glastum*, or woad (*Isatis tinctoria*), used for dyeing blue **b., hepatic,** that which is transmitted directly from the liver to the duodenum without entering the gall-bladder. **b.-pigments,** the coloring-matters of the bile. For tests see *Barral, Capranica, Cunisset, Dragendorff, Dumontpallier, Fleischl, Gluzinski, Gmelin, Huppert, Jolles, Maréchal, Le Nobel, Rosenbach, Smith, Stokvis, Trousseau, Ultzmann, Vitalli*.

bilein (*bil'-e-in*). A mixture of the essential salts of the bile.

Bilharzia (*bil-har'-ze-ah*) [Theodor *Bilhars*, German physician, 1825–1862]. A genus of trematode worms, established by Cobbold, characterized by having the sexes separate. **B. hæmatobia.** See *distoma hæmatobium*.

bilharziasis, bilharziosis (*bil-har-zi'-as-is, bil-har-ze-o'-sis*) [*Bilharzia*]. The group of symptoms produced by the presence in the intestine of worms of the genus *Bilharzia*.

bili- (*bil'-e*). A prefix denoting relating to the bile.

biliary (*bil'-e-a-re*) [*bile*]. Pertaining to the bile; conveying the bile. **b. acids,** glycocholic and taurocholic acids. **b. calculus,** a gall-stone. **b. colic,** colic produced by the passage of gall-stones. **b., diabetes,** Hanot's disease, or hypertrophic cirrhosis of the liver with icterus. **b. ducts,** the hepatic and cystic ducts and the ductus communis choledochus, together with the small ducts in the liver itself.

biliation (*bil-e-a'-shun*) [*bile*]. The secretion or excretion of bile.

bilicyanin (*bil-e-si'-an-in*) [*bili-; κυάνεος*, blue]. A blue pigment obtained from biliverdin. Syn., *cholecyanin; choleverdin*.

bilification (*bil-if-ik-a'-shun*) [*bili-; facere*, to make]. The formation of bile.

biliflavin (*bil-e-fla'-vin*) [*bili-; flavus*, yellow]. A yellow coloring-matter derivable from biliverdin.

bilifulvin (*bil-e-ful'-vin*) [*bili-; fulvus*, reddish yellow]. An impure form of bilirubin; also a yellow bile color from ox-gall, not normally present in human bile.

bilifuscin (*bil-e-fus'-in*) [*bili-; fuscus*, bronw]. $C_{16}H_{20}N_2O_4$. A pigment occurring in bile and in gall-stones.

biligulate, biligulatus (*bi-lig'-ū-lāt, bi-lig-ū-lā'-tus*) [*bi-; ligula*, a little tongue]. Formed like two tongues or having two tongue-like processes.

bilihumin (*bil-e-hū'-min*) [*bili-; humus*, earth]. An insoluble residue left after treating gall-stones with various solvents.

bilin (*bi'-lin*) [*bile*]. A mixture of sodium taurocholate and glycocholate, forming a constituent of the bile.

bilineurin (*bil-e-nū'-rin*). Cholin.

bilious (*bil'-yus*) [*biliosus*, full of bile]. 1. Pertaining to bile. 2. A term popularly applied to disorders supposed to arise from a too free secretion of bile. **b. fever,** a remittent fever characterized by the vomiting of bile.

biliousness (*bil'-yus-nes*) [*bilious*]. A popular name for a condition characterized by anorexia, constipation, coated tongue, lassitude, and headache, and supposed to be due to disorders in the secretion and flow of bile.

biliphein (*bil-e-fe'-in*) [*bilis*, bile; *φαλος*, gray]. A supposed bile-color, now regarded as an impure bilirubin; called also *cholophein*.

biliprasin (*bil-e-pra'-sin*) [*bili-; πράσινος*, leek-green], $C_{16}H_{22}N_2O_6$. A pigment occurring in gall-stones, icteric urine, and bile.

bilipurpin, or **pilipurpurin** (*bil-e-per'-pin, bil-e-per'-pū-rin*) [*bilis*, bile; *purpura*, purple]. A purple coloring-matter derivable from biliverdin.

bilipyrrhin (*bil-e-pir'-in*). See *cholepyrrhin*.

bilirubin (*bil-e-roo'-bin*) [*bili-; ruber*, red], $C_{16}H_{20}N_2O_3$. A red coloring-matter, the chief pigment of the bile, and also found in the urine in jaundice. It is insoluble in water, and almost so in ether and alcohol, but it is readily soluble in alkaline solutions. It crystallizes in rhombic plates or prisms.

bilirubinemia (*bil-e-roo-bin-e'-me-ah*) [*bilirubin; αἷμα*, blood]. The presence of bilirubin in the blood

bilirubinuria (*bil-e-roo-bin-ū'-re-ah*) [*bilirubin; urine*]. Presence of bilirubin in the urine.

bilis (*bi'-lis*). Bile, gall. **b. bubula,** ox-gall.

biliverdin (*bil-e-ver'-din*) [*bili-; viridis*, green], $C_{32}H_{20}N_2O_8$, or $C_8N_2NO_2$. A green pigment, the first product of the oxidation of bilirubin. It gives the characteristic color to the bile of herbivora, and occurs in the urine in jaundice and in gall-stones.

bilixanthin (*bil-e-zan'-thin*). See *choletelin*.

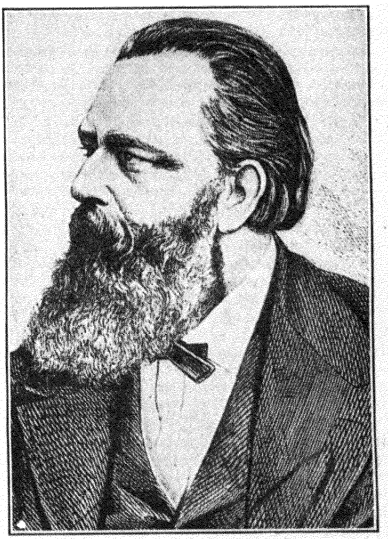
Billroth's anesthetic (*bil'-rōt*) [Christian Albert Theodor *Billroth*, Austrian surgeon, 1829–1894]. A mixture containing chloroform 3 parts, and alcohol and ether, each 1 part. **B.'s cambric,** a cotton fabric so prepared that it can replace the gutta percha tissue and oiled silk formerly used in dressing wounds. **B.'s disease.** 1. Spurious meningocele. 2. Malignant lymphoma. **B.'s mixture,** see *B.'s anesthetic*. **B.'s operation,** pylorectomy: a parietal incision is made in almost a transverse direction; the divided walls of the stomach and bowel are brought together and united by sutures on the side of the greater curvature of the stomach. **B.'s suture,** the button hole stitch.

bilobate (*bi-lo'-bāt*) [*bi-; λοβός*, a lobe]. With two lobes; divided into two lobes.

bilobular (*bi-lob'-ū-lar*) [*bi.* two; *lobulus*, lobule]. Having two lobules.

bilocular (*bi-lok'-ū-lar*) [*bi-; loculus*, a little place]. Having two cells; divided into two compartments; biloculate.

bimaculate (*bi-mak'-ū-lāt*) [*bi-; macula*, a spot]. Marked with two spots.



CHRISTIAN ALBERT THEODOR BILLROTH.

bimalar (*bi-ma'-lar*). Extending between the two malar bones.

bimalate (*bi-mal'-āt*). In a series of malates, that one which contains twice the amount of malic acid that the first one of the series does.

bimanous (*bi-ma'-nus*) [*bi-; manus*, a hand]. Having two hands.

bimanual (*bi-man'-ū-al*) [*bi-; manus*, a hand]. With both hands; two-handed. **b. palpation,** palpation by means of both hands.

bimastoid (*bi-mas'-toid*). Relating to the two mastoid eminences.

bimaxillary (*bi-maks'-il-a-re*). Extending between the two maxillæ.

bimembral (*bi-mem'-bral*) [*bi-; membrum*, a member]. With two limbs.

bimestral (*bi-mes'-tral*) [*bi-; mensis*, month]. Two months old, continuing two months.

bimolybdate (*bi-mol'-ib-dāt*). A molybdate containing twice as much molybdic acid as the corresponding normal molybdate.

bimucous (*bi-mū'-kus*) [*bi-; mucus*, mucus]. Relating to two mucous surfaces.

bimuscular (*bi-mus'-kū-lar*). Having two muscles. Syn., *dimyarious*.

binary (*bi'-nar-e*) [*binus*, a couple]. In chemistry, compounded of two elements. In anatomy, separating into two branches.

binaural (*bin-aw'-ral*) [*bi-; auris*, ear]. Pertaining to or having two ears, used for both ears. **b. stethoscope**, a stethoscope with two tubes, one for each ear.

binauricular (*bin-aw-rik'-u-lar*). See *binaural*.

binder (*bīnd'-er*) [ME., *byndere*]. A wide bandage about the abdomen, worn by women after labor or after celiotomy, to support the abdominal walls **b., mammary**, a sling or suspensory for the mamma

bindweb (*bīnd'-web*). The neuroglia.

Binet's formula (*be-na'*) [Alfred *Binet*, French psychologist 1857–1911]. [Children who are under nine years of age and show a backwardness of more than two years, are probably mental defectives to the extent of being actually feeble-minded; those who are nine years or more and show a backwardness of more than three years are also feeble-minded]

Bing's test [Albert *Bing*, German otologist, 1844–1922]. Let a vibrating tuning-fork be held on the vertex until it has ceased to be audible; then close either ear, and the fork will be heard again for a certain period. If this period of secondary perception is shortened, there exists a lesion of the sound-conducting apparatus, if normal and yet deafness is present, the perceptive apparatus is involved.

biniodide, biniodid (*bin-i'-o-did*). 1. Having two atoms of iodine in the molecule. 2. A binary salt having twice as many atoms of iodine as it has of the other element.

$Bi(NO_3)_3$. Bismuth nitrate.

binocular (*bin-ok'-ū-lar*) [*bi-; oculus*, an eye]. Pertaining to both eyes. In optics, an instrument with two eyepieces for use with both eyes at once. **b. vision**, the faculty of using both eyes synchronously and without diplopia.

binotic (*bin-o'-tik*). See *binaural*.

binovular (*bin-ov'-ū-lar*) [*bi-; ovum*, an egg]. Pertaining to or derived from two ova.

binoxide (*bin-oks'-īd*). See *dioxide*.

binuclear (*bi-nū'-kle-ar*) [*bi-; nucleus*, a kernel]. Having two nuclei.

binucleate (*bi-nū-kle-āt*). Having two nuclei.

binucleolate (*bi-nū-kle'-o-lāt*) [*bi-; nucleolus*, a little kernel]. Having two nucleoli.

Binz's test for quinine in the urine (*bints*) [Karl *Binz*, German chemist, 1832–1912]. The reagent consists of 2 parts of iodine, 1 part of potassium iodide, and 40 parts of water; on being added to the urine, a precipitate is thrown down if quinine is present.

bio- [*βios*, life]. A prefix meaning life.

BiO. Bismuthyl

bio-assay (*bi-o-as-sa'*) [*bio-; assay*]. Estimation of the strength of a drug as compared with a standard sample.

bioblast (*bi'-o-blast*) [*bio-; βλαστός*, a germ]. A plastidule or formative cell; a corpuscle that has not yet become a cell.

bioblastic (*bi-o-blast'-ik*). Relating to bioblasts. **b. theory, Altmann's:** leukocyte granules are considered as definite biological entities, which affect, through oxygen-transmission, both reduction and oxygenation, and thus accomplish the disunions and the syntheses of the economy without sacrificing their own individuality. Cf. *color-analysis*.

(BiO)Br. Bismuthyl bromide.

biocatalyst (*bi-o-kat'-al-ist*) [*bio-; catalyst*]. A name for enzyme.

biochemical (*bi-o-kem'-ik-al*) [see *biochemics*] Pertaining to biological chemistry.

biochemics (*bi-o-kem'-iks*) [*bio-; χημεία*, chemistry]. The chemistry of life. See *biochemy*.

biochemistry (*bi-o-kem'-is-tre*) [see *biochemics*]. The chemistry of the living tissues or of life; physiological chemistry.

biochemy (*bi'-o-kem-e*) [see *biochemics*]. Chemical force as exhibited in living organisms.

biocitin (*bi-os'-it-in*). A preparation of casein and milk sugar with lecithin.

(BiO)Cl. Bismuthyl chloride

$(BiO)_2CO_3$. Bismuthyl carbonate, bismuth subcarbonate

biocolloid (*bi-o-kol'-oyd*) [*bio-; colloid*]. A colloid occurring in plants and animals, and necessary to their continued existence.

bioculate, bioculatus (*bi-ok'-u-lāt, b -ok-u-la'-tus*) [see *binocular*]. Marked by two spots of color different from the chief color.

biod (*bi'-od*) [*βios*, life] 1 Animal magnetism. 2 See *protyl*. 3 Vital force

biodesmus (*bi-od-ez'-mus*) [*bio-; δεσμός*, a bond]. The vital principle regarded as a bond between organisms.

biodynamics (*bi-o-di-nam'-iks*) [*bio-; δύναμις*, power]. The dynamics of life; dynamic biology. See *bionomy*.

biogen (*bi'-o-jen*) [*bio-; γεννᾶν*, to produce]. 1. See *protyl*. 2. See *bioplasm*. 3. See *magnesium dioxide*.

biogene (*bi'-o-jēn*). A soluble casein containing a small amount of phosphates; used as a substitute for bread, in diabetes.

biogenesis (*bi-o-jen'-es-is*) [*bio-; γένεσις*, origin]. The doctrine that living things are produced only from living things—the reverse of abiogenesis.

biogenetic (*bi-o-jen-et'-ik*) [see *biogenesis*]. Pertaining to biogenesis. **b. law**, the fact that a certain tendency directs the drift or trend of development of a being along a line parallel with that of the series of forms ancestral to it. The being in the course of its development briefly recapitulates that of the ancestral series to which it belongs. Syn., *Mueller's law*.

biogeny (*bi-oj'-en-e*) [see *biogenesis*]. In biology, the evolution of organic forms, either considered individually (*ontogeny*) or tribally (*phylogeny*).

biognosis (*bi-og-no'-sis*) [*bio-; γνώσις*, knowledge]. The study of life and its phenomena; biology.

biograph (*bi'-o-graf*) [*bio-; γράφειν*, to write]. An apparatus for securing photographs of animals in motion. Syn., *kinematograph*.

biokinetics (*bi-o-kin-et'-iks*) [*bio-; κίνησις*, motion]. The kinetics of life; the science of the movements of living organisms. See *karyokinesis*.

biolactyl (*bī-o lak'-tĭl*) A commercial preparation of lactic acid bacilli

biologic, biological (*bī o loj'-ĭk -al*) [see *biology*] Pertaining or belonging to biology

biologicals (*bī o loj ĭk als*) Medicinal preparations made from animal tissues juices or serums, they are generally employed hypodermically

biologist (*bī-ol' o jĭst*) [see *biology*] One who is a student of biology

biologos (*bī-ol'-o-gos*) [see *biology*] A name for the intelligent living power displayed in cellular and organic action and reaction

biology (*bī ol' o je*) [*bio-*, λόγος, science] The science of life and living things, it embraces the structure, function, and organization of living forms Syn , *organology, organomy, somiology, zoonomy* **b , dynamic.** See *bionomy* **b , static** See *biostatics*

bioluminescence (*bī-o lu-mĭn-es'-ens*) [*bio-*, *luminescence*] Luminescence caused by living organisms phosphorescence

biolysis (*bī-ol'-ĭs-ĭs*) [*bio-*, λύειν, to loosen] The destruction of life The devitalization of living tissue by the action of living organisms

biolytic (*bī o lĭt'-ĭk*) [*bio* , λύειν to loosen] Destructive to life relating to biolysis

biomagnetism (*bī o mag net ĭzm*) [*bio-*, *magnetism*] Animal magnetism

biomedicine (*bī o med'-ĭs-ĭn*) [*bio-*; *medicine*] Medicine (See *Medicine* 2) based on the study of physiology and physiological chemistry.

biometer (*bī om' et er*) [*bio* μετρον a measure] 1 A table of life expectancy etc upon which the science of life insurance is based 2 An instrument, of the nature of a tuning fork, invented by Dr Collongues for the reproduction and increase of sounds of the body ordinarily perceived by auscultation

biometrics (*bī-o met' rĭks*) [see *biometer*] The science of the body-sounds perceived by auscultation

biometry (*bī-om' et re*) [see *biometer*] Life-measurement, the estimation of the probable duration of any given life form—in the past or future

bion (*bī' on*) [βίος life] A definite physiological individual element or organism Cf *morphon*

Biondi's fluid. A staining medium used in histologic laboratories It is a mixture of orange G, methyl green, and acid fuchsin

bionergy (*bī-on'-er-je*) [*bio-*, ἔργον, work] Life-force, force exercised in the living organism

$(BiO)NO_3$ Bismuthyl nitrate, bismuth subnitrate

bionomics (*bī-o nom'-ĭks*) [*bio-*, νόμος, law] That branch of natural history which treats of the relations of organisms among themselves and to their environment

bionomy (*bī-on'-o-me*) [see *bionomics*] Dynamic biology, biodynamics, the science of the laws and functions of life

bionosis (*bī-o no'-sĭs*) [*bio-*, νόσος, disease] A disease caused by a living agent, such as a bacterial disease

biontic (*bī-on'-tĭk*) [*bios*] Individual as opposed to phyletic

bionuclein (*bī-o nū'-kle-ĭn*) [*bio-*, *nuclein*] A term suggested by Sacharoff (1902) for the hypothetical substance composed of a combination of iron and nuclein which exists in all enzymes, holding that all vital processes depend upon decomposition of living substance set up by them

biophagism, biophagy (*bī-off'-aj-ĭzm,-e*) [*bio-*, φαγεῖν, to eat] The capacity of absorbing living matter

biophagous (*bī-of'-ag-us*) [*bio-*, φαγεῖν, to eat]. Feeding upon living organisms or upon living tissue as insectivorous plants

biophilia (*bī-o fil'-e-ah*) [*bio-*, φιλεῖν, to love] The instinct for self-preservation

biophore (*bī'-o fōr*) [*bio-*, φερειν, to bear] One of Weismann s hypothetical ' bearers of vitality," corresponding to the "plasomes" of Wiesner and Brucke and to the ' pangenes ' of de Vries, the smallest units that exhibit the primary vital forces, the bearers of the cell-qualities

biophthorous (*bī-off'-thor us*) [*bio* , φθόρα, destruction] Ruinous to life

biophysics (*bī o fiz ĭks*) [*bio* , φύσις, nature] The physics of life processes

biophysiography (*bī o fiz-e-og'-ra fe*) [*bio-*, φύσις, nature, γράφειν, to write] Descriptive or structural biology, organography, as distinguished from biophysiology

biophysiology (*bī o-fiz-e ol'-o je*) [*bio-*, φύσις, nature, λόγος science] In biology study of organogenesis, morphology, and physiology

Biophytum (*bī-off'-ĭt-um*) [*bio-*, φύτον, plant] A genus of plants of the order *Geraniaceæ B sensitivum* is a native of the East Indies, where the root is used in inflammations, in gonorrhea, and in pulmonary affections

bioplasm (*bī'-o plazm*) [*bio* πλάσμα, form] Any living matter, especially germinal or forming matter matter possessing reproductive vitality

bioplasmic (*bī o plaz'-mĭk*) [*bio* , πλάσμα, form] Relating to or of the nature of bioplasm

bioplasmin (*bī o plas'-mĭn*) A hypothetical substance supposed to exist in all living cells and believed to be essential to their life and functional activity

bioplasson (*bī-o plas'-on*) [*bio* , πλάσσων forming] Elsberg s term for living matter A synonym of protoplasm or bioplasm

bioplast (*bī' o-plast*) [*bioplasm*] A mass or cell of bioplasm that is a unit of living matter

bioplastic (*bī-o-plas'-tĭk*) [*bio-*, πλαστός, formed] Relating to or of the nature of a bioplast or of bioplasm

biopsia, biopsy (*bī-op'-se ah, bī' op se*) [*bio-*, ὄψις, vision] 1 Observation of the living subject, opposed to necropsy 2 A name coined by Besnier for the excision, during life, of an eruptive lesion or fragment of a newgrowth to establish the diagnosis by means of an examination of the excised piece

biopsic (*bī-op'-sĭk*) [*bio* ὄψις vision] Pertaining to biopsy.

biopsychic, biopsychical (*bī-o-sī'-kĭk -al*) Pertaining to psychic phenomena regarded from the biological point of view

biopyoculture (*bī-o-pī'-o-kul-chur*) [*bio-*, πύον, pus, *culture*] A culture made from pus containing living phagocytes

biorbital (*bī-or'-bĭt-al*) [*bi-*, *orbita*, a circle] Relating to both orbits

bios (*bī'-os*) [βίος, life] Life

bioscope (*bī'-o-skōp*) [*bio-*, σκοπεῖν, to view] An instrument used in bioscopy

bioscopy (*bī os'-ko-pe*) [see *bioscope*] Examination of the body to ascertain whether life is present **b , electro-,** examination by the aid of the electric current In about two hours after death the muscular reaction is lost to faradic stimulation in the tongue, after three or four hours in the extremities, after five or six hours in the trunk The reaction to galvanism persists somewhat longer

biose (*bī'-ōs*) A disaccharide

biosis (*bi-o'-sis*) [βίος, life]. Life; vitality.

$(BiO)_3SO_4$. Bismuthyl sulphate, bismuth subsulphate.

biosol (*bi'-os-ol*). A food preparation claimed to contain all the elements found in the human body.

biostatics (*bi-o-stat'-iks*) [*bio-*; στατικός, causing to stand]. 1. Static biology; the science of the determinate parts of biology, including anatomy and the physics of the living body. 2. Vital statistics.

Biot's respiration (*be'-o*) [Camille *Biot*, French physician]. Meningitic respiration, rapid, short breathing, interrupted by pauses lasting from several seconds to half a minute, sometimes observed in healthy subjects during sleep; most frequently in meningitis, in which it is an unfavorable prognostic sign.

biotaxis, biotaxy (*bi-o-taks'-is, bi'-o-taks-e*) [*bio-*; τάξις, arrangement]. 1. The selective and arranging function or activity of life, or of living cells. 2. Systematic biology; the classification of living organisms.

biothalmy (*bi'-o-thal-me*) [*bio-*; θάλλειν, to be vigorous]. The art of living long and well.

biotic (*bi-ot'-ik*) [see *biotics*]. Pertaining to life or to the laws of animal and vegetable progress and evolution; physiologic.

biotics (*bi-ot'-iks*) [βιοτικός, vital]. The science of vital functions and manifestations.

biotomy (*bi-ot'-o-me*) [*bio-*; τέμνειν, to cut]. Vivisection.

biotoxin (*bi-o-toks'-in*) [*bio-*; *toxin*]. A poisonous substance found in living tissues and juices (including urine).

biotype (*bi'-o-tip*). A group of individuals all of which have the same genotype (Johannsen).

bipalatinoid (*bi-pal-at'-in-oid*). A gelatin capsule with two compartments.

bipara (*bip'-ar-ah*) [*bi-*; *parere*, to bring forth]. A woman who has borne two children at different labors.

biparasitic (*bi-par-as-it'-ik*) [*bi-*; παράσιτος, a parasite]. Parasitic upon a parasite.

biparietal (*bi-par-i'-et-al*). Relating to both parietal bones. **b. diameter,** the distance from one parietal eminence of the cranium to the other.

biparous (*bip'-ar-us*) [*bi-*; *parere*, to bring forth]. Producing two at a birth.

bipartite (*bi-par'-tit*) [*bi-*; *pars*, a part]. In biology, composed of two parts or divisions.

bipartition (*bi-par-tish'-un*) [see *bipartite*]. Separation into two parts.

biped (*bi'-ped*) [*bi-*; *pes*, a foot]. 1. Having two feet. 2. An animal with two feet.

biperforate (*bi-per'-fo-rāt*). Having two perforations; as a biperforate hymen.

biplumbic (*bi-plum'-bik*) [*bi-*; *plumbum*, lead]. Containing two atoms of lead.

bipocillated (*bi-pos'-il-a-ted*) [*bi-*; *pocillum*, a little cup]. Having two cup-like appendages.

bipolar (*bi-po'-lar*) [*bi-*; *polus*, a pole]. Having two poles or extremities. **b. nerve-cells,** nerve-cells that have two prolongations of the cell-matter.

bipolarity (*bi-po-lar'-it-e*) [see *bipolar*]. The condition of having two processes from opposite poles, as a nerve-cell; or of having different electric properties existing at the two poles.

bipotassic (*bi-po-tas'-ik*). Having two atoms of potassium.

bipp (*bip*). Dressing for wounds, composed of bismuth, 1 part; iodoform, 2 parts; petrolatum, 1 part.

bipubiotomy (*bi-pū-be-ot'-o-me*) [*bi*, double; *pubes*, pubes; τέμνειν, to cut]. Double pubiotomy; an obsolete operation in which the pubic bones were both divided. See *ischiopubiotomy*.

bipunctate (*bi-punk'-tāt*) [*bi-*; *punctum*, a point]. Having two dots or points.

bipupillate (*bi-pū'-pil-āt*) [*bi-*; *pupilla*, pupil of the eye]. Marked with spots which contain two pupil-like dots.

biramose, biramous (*bi-ram'-ōs, -us*) [*bi-*; *ramus* a branch]. Having two branches.

birch (*berch*) [AS., *birce*]. Any tree of the genus *Betula*. Birch-tar, or the tarry oil of *Betula alba*, is useful in certain skin diseases. The bark of *B. lenta*, the American black birch, yields a fragrant volatile oil, identical with that of *Gaultheria procumbens*, for which it is extensively substituted. **b. camphor.** Same as *b.-resin*. **b. resin.** see *betulin*.

Bird's formula. [(1) Golding *Bird*, English physician, 1815–1854; (2) Samuel Dougan *Bird*, Australian physician]. (1) The last two figures of the specific gravity of the urine roughly indicate the number of grains of solids to the ounce of urine. The same two figures multiplied by 2 (*Trapp's factor*) give parts per 1000. **B.'s sign,** (2) well-defined zone of dullness with absence of respiratory sound in hydatid cyst of lung.

bird-lime. A viscous vegetable substance used in Japan as a local dressing for wounds.

bird's nest bodies, or **cells.** The cells of certain forms of carcinoma, distinguished by the concentric arrangement of their cell-walls. See also *cancer nests*. **b., edible,** the nest of certain species of swift, used by the Chinese as food. It consists of marine algæ, *Gelidium*, cemented by the salivary mucus of the bird. **b. sternum,** a deformity of the sternum found in lateral curvature of the spine.

birefractive, birefringent (*bi-re-frak'-tiv, bi-re-frin'-jent*) [*bis*, twice; *refringere*, to break back]. Doubly refractive; anisotropic.

birhinia (*bi-rin'-e-ah*) [*bi*, two; ῥίς, the nose]. A congenital defect in which there is the formation of two noses.

birimose (*bi-ri'-mōs*) [*bis*, twice; *rima*, cleft]. Having two clefts or slits.

Birkett's hernia [John *Birkett*, English surgeon]. Intraperitoneal inguinal hernia; hernia into the vaginal process of the peritoneum.

birth (*berth*) [ME., *byrth*]. 1. The delivery of a child; parturition. 2. That which is brought forth in parturition. **b., cross.** See *transverse presentation* **b.-mark.** See *nævus pigmentosus*. **b.-palsy,** any paralytic affection due to an injury received at birth; less correctly, a congenital paralytic affection due to a lesion that existed in the fetal state **b., partial,** the incomplete expulsion of a child in labor; of legal value in lawsuits for property. **b., plural,** the birth of more than a single child. **b., posthumous,** the birth of a child after the death of its father. **b., precocious,** the occurrence of natural labor after a shorter pregnancy than is usual. **b., premature.** See *labor*. **b.-rate,** the proportion of births per thousand. **b.-root.** See *beth root*. **b.-wort,** the plant *Aristolochia clematitis* (see *Aristolochia*), so called from its former employment as a depurant after childbirth. **b., still.** See *still-born*. **b., virgin-.** See *parthenogenesis*.

bisacromial (*bis-ak-ro'-me-al*) [*bis*, two; *acromion*]. Relating to the two acromial processes.

bisalt (*bi'-salt*). See *salt, acid*.

bisaxillary (*bis-ak'-sil-a-re*) [*bis; axilla*]. Pertaining to both axillæ.

bische (*bish*) [East Indian]. Endemic dysentery.

Bischoff's operation (*bish'-of*) [Johann Jacob *Bischoff*, German gynecologist, 1841–]. Abdominal section with extirpation of the gravid uterus.

Bischoff's test for biliary acids (*bish'-of*) [Carl Adam *Bischoff*, German chemist, 1855–]. A red coloration results upon heating biliary acids with dilute sulphuric acid and cane sugar.

bisection (*bi-sek'-shun*) [*bi*, two; *sectio*, a cutting]. Division into two parts; embryotomy.

bisexual (*bi-seks'-ū-al*) [*bi-; sexus*, sex]. Having male and female sex organs; hermaphroditic.

bisferious (*bis-fer'-e-us*) [*bis; ferire*, to strike] Having two beats; dicrotic.

Bishop's sphygmoscope [Louis Fauguères *Bishop*, American physician, 1864–]. An apparatus for determining blood pressure, particularly the diastolic pressure.

bisiliac (*bis-il'-e-ak*) [*bis; ilium*]. Relating to the two most distant points of the two iliac crests.

bisischiadic, bisichiatic (*bis-is-ke-ad'-ik, bis-is-ke-at'-ik*) [*bis*, two, ἰσχιαδικός, relating to the hip]. Relating to both ischia, or to corresponding points on the two ischia.

Biskra boil, B. button (*bisk'-rah*) [*Biskra*, a town in Algeria]. See *furunculus orientalis*.

bismal (*biz'-mal*). Trade name for the bismuth salt of methylene digallic acid; used as intestinal antiseptic and astringent.

Bismarck-brown. A brown, basic aniline dye, extensively used as a stain and counterstain in histology; also called vesuvine.

bismoid (*biz'-moid*). Trade name of a suspension of colloidal bismuth in a sterile glucose solution.

bismon (*biz'-mon*). Colloidal bismuth oxide, containing 20 % of bismuth, and used like the subnitrate.

bismosol (*biz'-mo-sol*). Trade name of a preparation of potassium sodium bismuthotartrate, piperazine and glucose. It is employed intramuscularly, in treatment of syphilis.

bismutal, bismuthol (*biz'-mu-tal, -thol*). Bismuth and sodium phosphosalicylate.

bismutan (*biz'-mu-tan*). A yellow, insoluble powder, said to be a mixture of bismuth, resorcin, and tannin; used in the diarrhea of children.

bismuth, bismuthum (*biz'-muth, biz-mu'-thum*) [L.]. Bi = 208; quantivalence I, III, V. A pinkish-white, crystalline metal. Its commercial salts often contain arsenic. The derivatives of bismuth are chiefly employed as astringents and sedatives to mucous membranes and as gastrointestinal antiseptics. **b. albuminate,** a powder containing 9 % of bismuth; it is used in stomachic or intestinal cramp. Dose 5–15 gr. (0.32–0.97 Gm.) 3 or 4 times daily. **b. and ammonium citrate** (*bismuthi et ammonii citras*, U. S. P.), soluble in water. Dose 1–5 gr. (0.065–0.32 Gm.). **b. and ammonium citrate, solution of** (*liquor bismuthi et ammoniæ citratis*, B. P.). Dose ½–1 dr. (2–4 Cc.). **b. benzoate,** $Bi(C_7H_5O_2)_3$, a white powder containing 27 % of benzoic acid. It is an internal and external antiseptic. Dose 5–15 gr. (0.32–0.97 Gm.). **b. betanaphtholate,** $2Bi(C_{10}H_7O)_3 + Bi_2O_3$ a light brown, odorless, insoluble powder, containing 80 % bismuth trioxide. It is an intestinal antiseptic. Dose 15–30 gr. (0.97–1.94 Gm.). Syn., *betanaphtholate; naphthol bismuth; orphol*. **b. bilactomonotannate,** an odorless yellow powder, used in the diarrhea of infants. Dose 30–45 gr. (2–3 Gm.). Syn., *lactanin*. **b. borate,** $BiBO_3$, an intestinal antiseptic. Dose 5–40 gr. (0.32–2.6 Gm.). **b. borophenate,** $Bi_2O_3B(C_6H_5)(CO_3) + 3H_2O$. It is recommended as a surgical dressing used as a dusting-powder, or in burns or scalds applied as a paste (25 to 50 % in glycerol) on lint. Syn., *markasol*. **b. carbolate,** $Bi(OH)_2 \cdot C_6H_5O$, a grayish-white powder containing 80 % of bismuth oxide and 18 to 19 % of phenol. It is an intestinal antiseptic and is used externally as a substitute for iodoform. Dose 5–15 gr. (0.32–0.97 Gm.). Syn., *bismuth phenate; bismuth phenylate; phenol bismuth*. **b. carbonate** (*bismuthi carbonas*, B. P.), $(Bi_2O_2CO_3)_2 \cdot H_2O$. Dose 5–20 gr. (0.32–1.3 Gm.). **b. and cerium salicylate,** an antirheumatic and intestinal antiseptic. Dose 5–15 gr. (0.32–0.97 Gm.). **b. chrysophanate,** $Bi(C_{15}H_9O_4)_2Bi_2O_3$, a yellow, amorphous powder, insoluble in ordinary solvents, but soluble in nitric or sulphuric acid; it is used as a siccative in psoriasis. Application, 5 to 20 % ointment. Syn., *dermol*. **b. citrate** (*bismuthi citras*, U. S. P.), $BiC_6H_5O_7$, soluble in water of ammonia. Dose 2–5 gr. (0.13–0.32 Gm.). **b. cresolate,** an odorless, tasteless, grayish-white powder, insoluble in water and alcohol; it is an internal and external antiseptic. **b. dithiosalicylate,** a bulky yellow powder without odor. used as a wound antiseptic and in ophthalmic practice, in diseases of the nose and throat, and in dentistry. Syn., *thioform*. **b. iodosubgallate,** $C_6H_2(OH)_4 \cdot COOBiI$, an antiseptic used as a dusting-powder on wounds. Syn., *asrol; bismuth oxyiodogallate*. **b. lactate,** $BiH(C_3H_4O_3)_2$, an internal and external antiseptic. Dose 5–15 gr. (0.32–0 97 Gm.). **b. loretinate,** a combination of bismuth and loretin, used as a surgical and intestinal antiseptic and also in ophthalmology. Dose 7½ gr. (0.5 Gm.). **b., magistery of,** same as *b. subnitrate* **b. metacresol,** an intestinal antiseptic consisting of a combination of 75 % of bismuth with 17 5 % of metacresol. **b. methylene-digallate,** $4C_{15}H_{12}O_{10} + 3Bi(OH)_3$, an internal astringent. Dose 3–5 gr. (0.1–0.3 Gm) every 3 hours Syn., *bismal*. **b.-naphthalin benzoate,** an intestinal antiseptic. Dose 8–15 gr. (0.5–1.0 Gm.). Syn., *intestin*. **b. naphthoglycerite,** a remedy for gonorrhea. **b. nitrate,** $Bi(NO_3)_3 + 5H_2O$, an astringent and antiseptic. Dose 5–10 gr. (0.32–0.65 Gm.). **b. oxide** (*bismuthi oxidi*, B. P.), Bi_2O_3. Dose 5–15 gr. (0.32–1.0 Gm.). **b. oxybromide,** BiOBr. It is recommended in the treatment of nervous dyspepsia and hysteria accompanied by gastric pains and vomiting. Dose 5–6 gr. (0.3–0.4 Gm.) several times daily. **b. oxychloride,** pearl white. It is used as a cosmetic. **b. oxyiodide.** See *b. subiodide*. **b. oxyiodomethylgallol,** $C_6H_2COOCH_3(OH)_3O.BiOH.I$, a dark-gray powder containing 23.6 % of iodine and 38.4 % of bismuth, used as a surgical antiseptic. Syn., *iodogallicin*. **b. oxyiodopyrogallate, b. oxyiodopyrogallol,** a combination of bismuth subiodide with pyrogallol. It is recommended as a surgical antiseptic. **b. oxyiodotannate,** a wound antiseptic. Syn., *ibit*. **b., pancreatinized,** used in dyspepsia. Dose 15–75 gr. (1–5 Gm.). **b. peptonate, b., peptonized,** used in dyspepsia and gastralgia. Dose 15–75 gr. (1–5 Gm.). Syn., *bismuthated peptone*. **b. permanganate,** $Bi(MnO_4)_3$, a dry dusting-

powder for wounds and ulcers. **b. phenate, b. phenylate.** See *b. carbolate.* **b., phenol-,** a compound of bismuth, 27.5 %, with phenol, 22 %; it is used as an intestinal antiseptic. **b. phosphate,** $BiPO_4$, an intestinal disinfectant. Dose 3–8 gr. (0.2–0.5 Gm.). **b. powder, compound,** Ferrier's snuff, contains 2 gr. of morphine hydrochloride in 1 ounce, with bismuth and acacia. It is used in the treatment of coryza. **b. pyrogallate,** $(C_6H_2[OH_2]O)_2BiOH$, an internal antiseptic in doses of 5–15 gr. (0.32–0.97 Gm.). Applied in skin diseases in 10 to 20 % ointment or dusting-powder. Syn., *helcosol.* **b. resorcinate,** a yellowish-brown powder containing about 4 % of bismuth trioxide. It is used in catarrh of the stomach. **b. salicylate,** $(C_7H_6O_3)_3Bi_2O_3$, a salt obtained by Thibault from bismuth oxide, instead of the hydroxide, as is customary It is used as an external and internal antiseptic. Dose 5–15 gr. (0.32–0.97 Gm.). **b. subbenzoate,** basic benzoate of bismuth; used as a wound antiseptic **b. subcarbonate** (*bismuthi subcarbonas*, U. S. P.), $(BiO)_2CO_3\,H_2O$, insoluble. Dose 10 gr.–1 dr. (0.65–4.0 Cc.); feebly astringent and sedative. **b. subgallate** (*bismuthi subgallas*, U. S. P.). See *dermatol.* **b. subiodide,** BiOI, used as an antiseptic dusting-powder, like iodoform **b. subnitrate** (*bismuthi subnitras*, U. S. P.), $BiONO_3\,H_2O$, the salt chiefly used in medicine as a sedative astringent to the gastro-intestinal mucous membrane. Dose 10 gr.–1 dr (0.65–4.0 Cc.). **b. subsalicylate** (*bismuthi subsalicylas*, U. S. P.), a white, amorphous powder. Dose 4 gr. (0.25 Gm.). **b. sulphite,** a combination of sodium sulphite and bismuth nitrate. It is an intestinal antiseptic. Dose 5–40 gr. (0.32–2.6 Gm.). **b. sulphophenylate,** a general intestinal disinfectant. Dose 3½–8 gr. (0.2–0.5 Gm.) 3 or 4 times daily **b. tannate,** an intestinal antiseptic. Dose 10–30 gr. (0.65–1.94 Gm.). **b. tribromcarbolate, b. tribromphenate,** $Bi_2O_3(C_6H_2Br_3OH)$, an insoluble powder containing about 60 % of Bi_2O_3. It is used as an antiseptic in cholera and intestinal disorders. Dose 8–15 gr. (0.52–0.97 Gm.); maximum dose a day 90 gr. (5.85 Gm.). Syn., *xeroform.* **b. trioxide,** Bi_2O_3. It is incompatible with alkalies and water in excess. It is antiseptic and astringent. Dose 5–40 gr. (0.32–2.6 Gm.). Syn., *bismuthous oxide.* **b. troches** (*trochisci bismuthi*, B. P.), each contains 2 gr. (0.13 Gm.). **b. valerate,** a white powder with the odor of valeric acid, soluble in dilute hydrochloric or nitric acid, insoluble in water or alcohol; it is used as a sedative and antispasmodic in neuralgia, chorea, epilepsy, etc. Dose 1–3 gr. (0.065–0.194 Gm.)

bismuthal (*biz'-mū-thal*). Containing bismuth.

bismuthate (*biz'-mū-thāt*). A salt of bismuthic acid

bismuthic (*biz'-mū-thik*). Relating to bismuth; containing bismuth in its higher valency.

bismuthol. See *bismutal.*

bismuthosis (*biz-mū-tho'-sis*). Chronic bismuth-poisoning; it may follow the use of the soluble salts.

bismuthous (*bis'-mū-thus*). Containing bismuth as a trivalent radicle.

bismuthum (*bis-mū'-thum*). Bismuth.

bismuthyl (*biz'-mū-thil*), BiO. A univalent radical. **b. bromide.** See *bismuth oxybromide.* **b. chloride.** See *bismuth oxychloride.* **b. iodide.** See *bismuth subiodide.* **b. nitrate.** See *bismuth subnitrate.*

bismutol (*biz'-mū-tol*). A compound of sodium salicylate and soluble bismuth phosphate.

bismutose (*biz'-mū-tōs*). A bismuth and albumin compound, equivalent in action to bismuth subnitrate. Useful in gastrointestinal affections of infectious character. For children under six months the dose is 15–30 gr. (1–2 Gm.), for those over six months it may be given in 60 gr. (1 dr.) doses.

$Bi_2(SO_4)_3$. Bismuth sulphate.

bisodol (*bi-so'-dol*). Trade name of a preparation containing bismuth subnitrate, magnesium carbonate, sodium bicarbonate, carica papaya, diastase, and oil of peppermint; it is said to be an antacid digestant.

bisol (*bi'-sol*). Soluble bismuth phosphate containing about 20 % of bismuth oxide. It is used in gastralgia. Dose 3–7½ gr. (0.19–0.5 Gm.).

bispep (*biz'-pep*). A proprietary preparation containing bismuth, pepsin, ammonium carbonate, and aromatics.

bissa (*bis'-ah*) [native African]. An affection of man and sheep, common in Egypt, and characterized by the production of edema. **b. bol,** a kind of myrrh, from *Balsamodendron Kafal,* a tree of E. Africa. It is used largely in adulterating the finer grades of myrrn, and is said to stimulate powerfully the flow of milk in cows.

bistellate (*bi-stel'-āt*) [*bi,* two; *stella,* a star]. Shaped like a double star.

bistephanic (*bi-ste-fan'-ik*) [*bi,* two; στεφάνιον, dim. of στέφανος, a wreath]. Relating to the two stephanions

bistort (*bis'-tort*) [*bis,* twice; *tortus,* twisted]. Snake-weed, adder's wort. The rhizome of *Polygonum bistorta,* an astringent. Dose of fluid-extract ♏ xx–xl.

bistoury (*bis'-too-re*) [Fr. *bistouri*] A long, slender (straight or curved) knife used in surgery. **b.-caché,** one that has the blade concealed for passing to the point to be incised, and by pressure on the handle the blade is exposed and the incision made.

bistratal (*bi-stra'-tal*) [*bis; stratum,* layer]. Arranged in two layers.

bistriate (*bi-stri'-āt*) [*bis; stria,* a furrow]. Marked with two lines or streaks.

bisulcate (*bi-sul'-kāt*) [*bi,* two; *sulcus,* a furrow]. Having two furrows or grooves

bisulphate (*bi-sul'-fāt*) [*bi-; sulphur*] A sulphate in which the base replaces but one of the two hydrogen atoms of the acid.

bisulphide (*bi-sul'-fid*) [*bi,* two; *sulphur*]. In chemistry, a sulphur compound in which there are two atoms of sulphur to one atom of the other substance of the compound.

bisulphite (*bi-sul'-fit*) [*bi,* two; *sulphur*]. A sulphite in which the base replaces but one of the two hydrogen atoms of the acid.

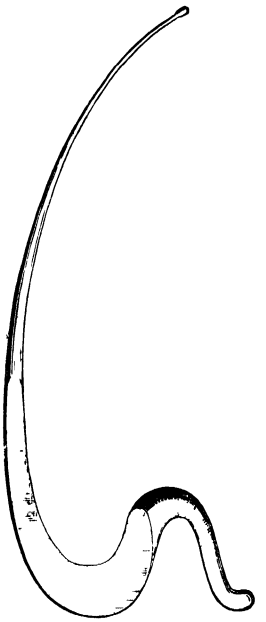
bisurated magnesia (*bis-ū'-ra-ted*). Trade name of a so-called antacid preparation.

bitartrate (*bi-tar'-trāt*) [*bi-; τάρταρον,* tartar]. Any tartrate in which only one replaceable hydrogen atom has been replaced by a base.

bite (*bīt*) [AS., *bītan*]. 1. The corrosion of a substance with an acid. 2. The more or less perfect coaptation of the upper and lower teeth. **b., open,** that in which the upper and lower incisors do not close together. **b., underhung,** that in which the upper incisors overreach the lower.

bitemporal (*bi-tem'-por-al*) [*bi-*; *tempora*, the temples]. Pertaining to the two temples.

bitnoben (*bit-no'-ben*) [Hind. for "black salt"]. An East Indian polychrest remedy composed of salt, myrobalan and iron.



THE "ROYAL BISTOURY" USED BY FELIX ON KING LOUIS XIV.

bitonal (*bi-to'-nal*) [*bis*, twice; *tonus*, a tone]. Double-toned.

Bitot's spots (*be'-tō*). Xerosis conjunctivæ. Silver-gray, shiny, triangular spots on both sides of the cornea, within the region of the palpebral aperture, consisting of dried epithelium, flaky masses, and microorganisms. Observed in some cases of hemeralopia.

bitrochanteric (*bi-tro-kan-ter'-ik*) [*bi-*, two; *trochanter*]. Belonging to the two trochanters.

bitter (*bit'-er*) [AS, *bītan*, to bite]. A peculiar, acrid, biting taste, of which that of quinin is an example; unpalatable. **b. almond,** the nut of *Amygdalum amarum*. It contains hydrocyanic acid. **b.-almond oil,** oleum amygdalæ amaræ. See *benzaldehyde*. **b. apple,** the fruit of the colocynth, a purgative remedy. **b.-blain,** a West Indian herb, *Vandellia diffusa*, employed in fevers and in hepatic disorders. **b. bugle-weed,** the herb *Lycopus europæus*, alterative and tonic. Dose of *fluidextract* ½–1 oz. (16–32 Cc.). **b. cucumber,** colocynth. **b. cup.** See *cup, bitter*. **Epsom purging salt,** magnesium sulphate. **b.-root,** the root of *Gentiana lutea*, a tonic. **b. salts,** magnesium sulphate. **b. tincture,** the *tinctura amara* (N. F.), prescribed also in the German pharmacopœia; it is a tincture of gentian, centaury, bitter orange-peel, orange-berries, and zedoary. Syn., *stomach-drops*. **b. water,** a water containing magnesium sulphate. **b. wine of iron,** a solution of white wine, syrup, iron citrate, and quinine.

bitters (*bit'-ers*) [see *bitter*]. 1. Medicines characterized by a bitter taste. 2. An alcoholic drink, an appetizer. **b., aromatic,** medicines that unite the properties of aromatics with those of simple bitters. **b., simple,** medicines that stimulate the gastrointestinal tract without influencing the general system. **b., styptic,** medicines that add styptic and astringent properties to those of bitterness.

bittersweet (*bit'-er-swēt*). See *dulcamara*.

Bittorf's reaction (*bit'-orf*) [Alexander *Bittorf*, German physician]. Pressure on the ovary or testicle produces a pain which radiates to the kidney in cases of renal colic.

bitumen (*bit-ū'-men*) [L.]. Mineral pitch or oil, composed of various hydrocarbons. In the solid form it is *asphalt;* in the liquid form, *petroleum*. An intermediate form is known as mineral tar or *maltha*. By distillation, bitumen yields benzol, naphtha, paraffin, and various other hydrocarbons, liquid and gaseous

bituminization (*bi-tū-min-iz-a'-shun*). A conversion into bitumen.

biurate (*bi-ū'-rāt*). An acid urate; a urate containing twice as much of the uric-acid constituent as an ordinary urate.

biuret (*bi'-ū-ret*) [*bi-*; urea], $C_2H_4N_4O_2 + H_2O$. A compound formed by exposing urea to a high temperature for a long time. It is readily soluble in water and in alcohol; it crystallizes with one molecule of water into warts and needles. When anhydrous, biuret melts at 190° C. with decomposition. **b. reaction for proteins.** Add a drop of copper sulfate solution and potassium hydroxide a violet color denotes the presence of biuret. **b. reaction for urea,** melt urea completely in a dry test-tube and continue the heat for some time. When cold, dissolve in water, add abundant caustic soda and a dilute solution of copper sulphate drop by drop. The solution becomes pink, then reddish-violet, and, finally, bluish-violet, according to the amount of copper sulphate added.

bivalence (*biv'-al-ens*) [*bi-*; *valens*, having power]. In chemistry, a valence or saturating power double that of the hydrogen atom.

bivalent (*biv'-al-ent*) [see *bivalence*]. In chemistry, an element whose atom can replace two atoms of hydrogen or other univalent element; a radical with the same valence as such an element. Homologous chromosomes that are associated in pairs.

bivalve (*bi'-valv*) [*bi-*; *valva*, a valve]. Having two valves or shells, as a speculum.

biventer (*bi-ven'-ter*) [*bi-*; *venter*, a belly]. 1. Having two bellies, as a muscle. 2. A digastric muscle. **b. cervicis,** inner portion of the complexus muscle. **b. maxillæ,** digastric muscle.

biventral (*bi-ven'-tral*) [see *biventer*]. Having two stomachs; having two bellies, as the digastric muscle.

bivittate (*bi-vit'-āt*) [*bi-*; *vitta*, a fillet]. Marked by two longitudinal stripes.

bivo (*be'-vo*). Trade name of a beef and iron wine.

Bixa (*biks'-ah*) [*biché*, Brazilian name]. A genus of plants of the order *Bixaceæ*. *B. orellana* is the annotto-tree, a native of South America and now dispersed throughout the tropics, furnishing from the pulp surrounding the seeds the annotto of commerce. The pulp is used as a remedy for dysentery and the seeds are said to be astringent and antipyretic.

bixin (*biks'-in*) [*bixa*], $C_{16}H_{28}O_2$. An orange-red coloring-matter found in annotto.

bizincic (*bi-sink'-ik*). Containing two atoms of zinc.

bizygomatic (*bi-zi-go-mat'-ik*). Relating to both zygomas, or to the most prominent points on the two zygomatic arches.

Bizzozero's blood-platelets (*bit-sot'-ser-o*) [Giulio *Bizzozero*, Italian physician, 1846–1901]. Small, round or elliptical, nonnucleated bodies found in the blood of mammals, including man. **B.'s corpuscles.** See *Neumann's corpuscles*. **B.'s crystals.** See *Charcot's crystals*.

black (*blak*) [AS., *blæc*]. Characterized by an absence of color. The appearance of an object from the surface of which none of the spectrum colors is reflected. **b. alder.** See *Prinos*. **b. antimony,** antimony tersulphide, Sb_2S_3. **b. ash.** 1. The bark of *Fraxinus sambucifolia*, a mild tonic and astringent. Dose of *fluidextract* ½–1 dr. (2–4 Cc.). 2. Impure sodium carbonate Na_2CO_3 mixed with carbon. **b. blood,** venous blood. **b. cancer.** See *melanosis*. **b. cohosh.** See *cimicifuga*. **b.-damp,** carbon dioxide gas, which is found in greater or less quantity in all collieries, being given off by many coals, either mixed with fire-damp or separately, or produced in various other ways, as by the exhalations of the miners, by fires, and by explosions of firedamp. Syn., *choke-damp*. **b. death.** See *plague*. **b. disease,** a disease of malarial origin and pernicious course, characterized by extreme darkening of the skin, which may be brown or black in color It occurs in the Garo Hills in Assam. **b. draught.** See *senna*. **b.-drop.** See *opium*. **b. erysipelas.** Synonym of *anthrax*. **b. eye,** livor (or sugillatio) oculi; ecchymosis of the tissues about the eye, usually from injury. **b. haw.** See *viburnum*. **b. hellebore.** See *hellebore*. **b. jaundice,** an excessive jaundice arising from obstruction of the gall-ducts. The color of the skin is greenish-black. **b.-lead,** a form of carbon properly known as the mineral graphite. **b. measles,** rubeola nigra, a grave or malignant form of measles. **b. pepper.** See *piper nigrum*. **b. phthisis.** A synonym of *miner's phthisis*. **b. sickness,** cerebrospinal fever. **b. snakeroot.** See *cimicifuga*. **b. spit.** See *miner's phthisis*. **b. tongue.** 1 A name given to a condition characterized by the formation, upon the dorsum of the tongue, of a hair-like deposit that passes through various stages of coloration from yellow to brown and finally black, ultimately disappearing by desquamation as gradually as it came. Repeated recurrence is the rule. It is probably an undue proliferation of the epithelium, the result of irritation. 2. A term applied to erysipelatous glossitis. **b. vomit,** the coffee-ground vomit of yellow fever, etc. **b. walnut,** the leaves of *Juglans nigra*, a tonic, alterative, and deobstruent. Dose of *fluidextract* 20–30 min. (1.3–2 0 Cc.). **b.-wash,** *lotio hydrargyri nigra* (B. P.). **b. willow,** the buds of *Salix nigra*, a bitter tonic with aphrodisiac properties. Dose of *fluidextract* 15 min.–1 dr. (1–4 Cc.)

Black's formula [J. A. *Black*, English surgeon]. An adaptation of Pignet's formula to British units. $F = (W + C) - H$; where F is the empirical factor, W the weight in pounds, C chest measurement in inches at deep inspiration, and H the height in inches. When F is over 120 a man is said to be *very strong*, between 110 and 120 he is *strong*, between 100 and 110 he is *good*, between 90 and 100 *fair*, between 80 and 90 *weak*, and under 80 *very weak*. See *Pignet's formula*.

blackbain [OE.]. Synonym of *anthrax*.

blackberry (*blak'-ber-e*). See *rubus*. **b. cordial,** the *cordiale rubi fructus* (N. F.). Its formula is: blackberry juice, 3 pints; cinnamon, in coarse powder, 2 troy oz.; cloves and nutmeg, in coarse powder, each, ½ troy oz.; dilute alcohol, 2 pints; syrup, 3 pints.

blackhead (*blak'-hed*). See *comedo*.

blackleg (*blak'-leg*). A febrile, generally fatal, disease, chiefly affecting cattle and sheep, which is characterized by the rapid appearance of irregular nodules in the skin and muscular tissues, that are at first tense and very painful, but rapidly become painless and crepitating. It is caused by *Bacillus chauvæi*, or the bacillus of symptomatic anthrax. Syn., *symptomatic anthrax*.

blackwater fever. A very fatal infectious disease occurring especially on the low coasts of tropical Africa, but also in Sicily, Greece, Central and South America, Java, New Guinea, and the southern portions of the United States The disease is almost exclusively confined to the white race, and is characterized by a chill, an irregular intermittent or remittent fever, vomiting, dyspnea, jaundice, and hemoglobinuria. An almost invariable complication is nephritis. Studies of the blood have revealed the presence of a small, annular, nonpigmented, intracellular parasite; also forms having a roset or crescent shape.

bladder (*blad'-er*) [AS., *blæddre*, a blister]. 1. A membranous sac serving for the reception of fluids or gases. 2. The hollow organ which serves as a reservoir for the urine. **b., atony of,** inability to expel the urine, from deficient muscular power. **b., bilobed, b., biocular,** a sacculated bladder having two pouches. **b., brain-,** a cerebral vesicle. **b., catarrh of.** See *cystitis*. **b., encysted,** a urinary bladder with communicating cysts connected with it. **b., exstrophy of, b., extroversion of.** See *exstrophy of bladder*. **b., gall-.** See *gall-bladder*. **b.-germ.** See *blastula*. **b., irritable,** a condition characterized by constant desire to urinate. **b., multilocular,** a sacculated bladder having many pouches. **b., neck of,** the constricted portion continuous with the urethra in front. **b., nervous,** a condition in which there is a frequent desire to urinate, with inability at the same time to perform the act perfectly, and consequent slight dribbling at its close. **b., pathologic triangle of,** the triangular surface of the bladder, the angles of which are represented by the openings of the ureters and the urethra. **b., sacculated,** a condition due to overextension, in which pouches are formed by the forcing out of its mucous coat between the hypertrophied muscular fibers, and in which urine may be held and become decomposed, and in which calculi may be retained. **b.-stammering,** Sir James Paget's name for that condition observed in young males who are unable to micturate when under observation or surrounded by unusual conditions or objects. It is due to spasm of the compressor urethræ muscle. **b.-stammering, false,** a condition in which there is some mechanical or pathological interference with urination. **b., sterile,** a hydatid cyst without secondary cysts, heads, or broad capsules. **b., supplementary,** a diverticulum

caused by sacculation of the urinary bladder. Syn., *parurocystis*, **b.-worm.** See *worm-bladder-*. **b. wrack.** See *Fucus vesiculosus*.

blade-bone (*blād-bōn*). The scapula or shoulder-blade.

blain (*blān*) [ME., *blane*, a blister]. 1. A blister; a pustule; a blotch. 2. Synonym of *anthrax*.

Blainville's ears (*blan-vēl'*) [Henri Marie Ducrotay de *Blainville*, French anthropologist, 1777–1850]. Congenital asymmetry of the ears.

Blancard's pills (*blang'-kard*) [Stephen *Blancard*, Dutch physician, 1650–1702]. Pills of iron iodide.

Blanchard's method (*blan'-tshard*) [Wallace *Blanchard*, American surgeon, 1857–]. Plugging tuberculous cavities in bones with a mixture of white wax 1 with vaseline 8 parts.

bland (*bland*) [*blandus*, mild]. Mild; soothing.

Blandin's ganglion [Philippe Frédéric *Blandin* French surgeon, 1798–1849]. The sublingual ganglion, a small gangliform enlargement lying between the lingual nerve and the sublingual gland. **B.'s gland,** a muciparous gland situated near the tip of the tongue in the median line and opening by several ducts on the lower surface of the tongue.

Blandin-Nuhn's gland. See *Blandin's gland*.

Blasius' (Blaes') duct. [Gerard *Blasius*, Dutch anatomist]. See *Stenson's duct*.

blast (*blast*) [AS., *blæst*]. 1. See *exotospore*. 2. See *blight* (2). 3. Inflammation. 4. A disease of sheep.

blastema (*blas-te'-mah*) [βλάστημα, from βλαστάνειν, to germinate]. 1. The formative lymph or rudimentary tissue, from which, by differentiation, tissues and organs are developed. A synonym of protoplasm. 2. An undifferentiated protoplasmic layer in certain eggs or embryos. **b., ossific, b., ossifying, b., subperiosteal.** See *osteogenetic layer*. **b. pili,** a hair-papilla.

blastemic (*blas-tem'-ik*) [βλαστάνειν, to germinate]. Relating to blastema; rudimentary; bioplasmic.

blasticle (*blas'-tik-l*). The vitelline nucleus.

blastid (*blas'-tid*) [βλαστός, a germ]. A very small clear spot on the fecundated ovum marking the place of the nucleus or cytoblast.

blastidium (*blas-tid'-e-um*) [βλαστός, a germ]. An endospore or cell of endogenous origin.

blastin (*blas'-tin*) [see *blastema*]. A substance which stimulates cell growth and activity.

blasto- (*blas-to-*) [βλαστός, a germ]. A prefix meaning germ or bud.

blastocardia (*blas-to-kar'-de-ah*) [*blasto-*; καρδία, the heart]. The germinal spot.

blastocele, blastoceloma (*blas'-to-sēl, -ō-ma*) [*blasto*; κοίλος, hollow]. The central cavity of the blastula or vesicular morula. The nucleolus of the ovum.

blastocelis (*blas-to-se'-lis*) [*blasto-*; κηλίς, a spot]. Wagner's name for the germinal spot.

blastochyle (*blas'-to-kīl*) [*blasto-*; χυλός, juice]. The colorless fluid in the blastodermic vesicles.

blastocœlum, blastocœloma (*blas-to-se'-lom, blas-to-se-lo'-mah*). Same as *blastocele*.

blastocolysis (*blas-to-kol'-is-is*) [*blasto-*; κόλουσις, a cutting off]. The arrest of a developmental process.

blastocyst, blastocystinx (*blas'-to-sist, blas-to-sist'-inks*) [*blasto-*; κύστις, a bladder]. The germinal vesicle.

blastocyte (*blas'-to-sīt*) [*blasto-*; κυτός, a cell]. An undifferentiated embryonic cell capable of giving rise to daughter cells of varying characters.

blastocytoma (*blas-to-si-to'-ma*) [*blasto-*; κυτός, a cell; ὄμα, a tumor]. A tumor in which the elements are blastocytes, or undifferentiated cells.

blastoderm (*blas'-to-derm*) [*blasto-*; δέρμα, the skin]. In embryology, the germinal membrane formed by the cells of the morula, lying on the internal surface of the vitelline membrane of the impregnated ovum. The whole hollow sphere, with its surrounding cells, is called the *blastodermic vesicle*, and is formed about the tenth day. The *ectoderm* (or *epiblast*) and the *endoderm* (*entoderm* or *hypoblast*) layers are simply due to a proliferation of the blastodermic cells about the *germinal area*, whereby the blastoderm is doubled, thus forming these outer and inner layers. The *mesoblast* or middle layer is developed after the others, and probably from the hypoblast. Syn., *blastodermic membrane; germ membrane; germinal membrane*. **b., bilaminar,** the blastoderm when it consists only of the ectoderm and endoderm. **b., trilaminar,** the blastoderm after formation of the mesoblast.

blastodermal (*blas-to-der'-mal*). Same as blastodermic, *q. v.*

blastodermic (*blas-to-der'-mik*) [see *blastoderm*]. Relating to the blastoderm. **b. vesicle,** see *blastoderm*.

blastodisc (*blas'-to-disk*) [*blasto-*; δίσκος, disc]. A blastodermic disc; a mass or disc capping one pole of the yolk.

blastogenesis (*blas-to-jen'-es-is*) [*blasto-*; γένεσις, generation]. 1. In biology, Weismann's theory of origin from germ-plasm, in contradistinction to Darwin's theory of pangenesis. 2. Reproduction by buds.

blastogeny (*blas-toj'-en-e*) [see *blastogenesis*]. Haeckel's term for the germ-history of an individual organism; a division of ontogeny.

blastolysis (*blas-tol'-is-is*) [*blasto-*; λύσις, solution]. Destruction of a blastoderm or germ cell.

blastoma (*blas-to'-mah*) [*blasto-*; ὄμα, a tumor]. 1. A granular growth due to the presence of a germ or microorganism. 2. One of a peculiar group of true tumors which originate from embryonic cell-nests; *e.g.*, chrondroma, glioma, etc. Syn., *enblastoma*.

blastomere (*blas'-to-mēr*) [*blasto-*; μέρος, a part]. Any one of the nucleated cells or segments into which the fecundated vitellus divides.

blastomyces (*blas-to-mi'-sēz*) [*blasto-*; μύκης, a fungus; pl., *blastomycetes*]. A genus of budding fungi usually referred to *Torula* or *Saccharomycetes*. Single-celled thallophytes, destitute of chlorophyl, which reproduce by yeast-like buds or by endogenous cell-formation. **b. dermatidis** (Gilchrist, 1894), a yeast-like organism producing a scrofuloderma in man. See *dermatitis, blastomycetic*.

blastomycetic (*blast-o-mi-se'-tik*). Pertaining to or caused by budding fungi (*blastomycetes*). **b. dermatitis.** See under *dermatitis*.

blastomycosis (*blas-to-mi-ko'-sis*). An affection due to budding fungi (*blastomycetes*). Cf. *blastomyces; saccharomyces; torula*.

blastoneuropore (*blas-to-nū'-ro-pōr*) [*blasto-*; νεῦρον, a nerve; πόρος, a pore]. In biology, the temporary aperture in certain embryos formed by the coalescence of the *blastopore* and *neuropore*.

blastophore (*blas'-to-fōr*) [*blasto-*; φέρειν, to bear]. That part of a sperm-cell that does not become converted into spermatozoa.

Blastophthoria (*blas-tof-tho'-re-ah*) [*blasto-*; φθορά, corruption]. Germ cell degeneration from poisoning by opium, lead, syphilis, etc.

blastophyllum (*blast-to-fil'-um*) [*blasto-*; *φύλλον*, a leaf]. The endoderm or ectoderm; a primitive germ-layer.

blastophyly (*blas-tof'-il-e*) [*blasto-*; *φυλή*, a tribe]. The tribal history of individual organisms.

blastopore (*blas'-to-pōr*) [*blasto-*; *πόρος*, passage; pore]. The small opening leading into the notochordal canal, or, after the canal has fused with the yolk-cavity, leading into the archenteron. It is situated at the hind end of the primitive axis and is a small portion of the gastrula mouth.

blastoprolepsis (*blast-o-pro-lēp'-sis*) [*βλαστός*, a germ; *πρόληψις*, an anticipating]. Hastening of development.

blastosphere (*blas'-to-sfēr*) [*βλαστός*, a germ; *σφαῖρα*, a sphere]. In biology, the "blastula," "germinal vesicle," or "vesicular germ." A hollow sphere composed of a single, simple layer of germinal cells. A vesicular morula.

blastostroma (*blas-to-stro'-mah*). See *embryonic area*.

blastous (*blast'-us*). Relating to a blastema.

blastula (*blast'-ū-lah*) [dim. of *βλαστός*, a germ]. The blastodermic vesicle; see *blastoderm*.

blastulation (*blas-ū-la'-shon*) [dim. of *βλαστός*, a germ]. In embryology, the conversion of morula or mulberry-germ into a blastula or vesicular germ.

blastzellen (*blast'-tsel-en*) [Ger.]. Primitive cells from which are developed all other kinds of cells. They are seen in the embryo before any beginning of differentiation, and are characterized by their large size, richness in cytoplasm, and large nuclei.

Blatin's suture, a modification of Gely's suture in which one needle and two threads of different colors are used.

Blatta (*blat'-ah*) [L., "blood-colored"]. 1. A genus of *Blattidæ*. 2. A clot of blood. **B. (Periplaneta) orientalis,** the cockroach; the powdered body is a popular remedy for dropsy among the Russian peasants. *Tinctura blattarum orientalium* is used in whooping-cough. Dose, 1 or 2 drops in water at intervals of 2 hours.

Blaud's pill (*blo*) [*P. Blaud*, French physician 1774–1858]. A pill containing equal parts iron sulphate and potassium carbonate; for use in anemia, etc.

bleach (*blēch*) [ME., *blechen*, to make white]. To make white or pale.

bleacher's eczema (*blēch'-erz ek'-zem-ah*). Eczema of the hands of bleachers, due to the use of hot water and strong lye.

bleaching fluid. A fluid obtained by passing chlorine gas into an emulsion of calcium hydrate. Syn., *Eau de Javelle; Javelle water.* **b. powder,** chlorinated lime, a mixture of calcium chloride and calcium hypochlorite, containing free chlorine gas. It is used as a disinfectant.

blear eye (*blēr'-i*). See *blepharitis ulcerosa*.

bleb (*bleb*). See *bulla*.

bleeders (*blē'-derz*) [AS., *blēdan*, to bleed]. 1. A popular term for those who are subjects of the hemorrhagic diathesis. Syn., *hemophilsacs*. 2. One who practises venesection. **b.'s disease.** See *hemophilia*.

bleeding (*blē'-ding*). See *bloodletting* and *hemorrhage*.

blemmatrope (*blem'-at-rōp*) [*βλέμμα*, a glance; *τρέπειν*, to turn]. An apparatus for showing the various positions of the eye in its orbit.

blenal (*blen'-al*). Sanatol carbonate, a yellow, oily liquid, used in gonorrhea.

blenna (*blen'-er*) [*βλέννα*, mucus]. Mucus. **b. narium,** mucus from the nose.

blennadenitis (*blen-ad-en-ī'-tis*) [*blenna-*; *ἀδήν*, gland; *ῖτις*, inflammation]. Inflammation of the mucous glands and follicles.

blennelytria (*blen-el-it'-re-ah*) [*blenna-*; *ἔλυτρον*, sheath, vagina]. Vaginal catarrh, leucorrhea.

blennemesis (*blen-em'-es-is*) [*blenna-*; *ἐμέειν*, to vomit]. The vomiting of mucus.

blennenteria (*blen-en-tē'-re-ah*) [*blenna-*; *ἔντερον*, intestine]. A mucous diarrhea or dysentery.

blennenteritis (*blen-en-ter-ī'-tis*) [*blenna-*; *ἔντερον*, intestine; *ῖτις*, inflammation]. 1. Enteritis with a copious discharge of mucus. 2. Inflammation of the mucous membrane of the bowel.

blennisthmia (*blen-isth'-me-ah*) [*βλέννα*, mucus, *ἰσθμια*, a throat]. Pharyngeal catarrh.

blenno- (*blen-o-*) [*βλέννα*, mucus]. A prefix meaning mucus.

blennocele (*blen'-o-sēl*) [*blenno-*; *κήλη*, a tumor]. Gonorrheal epididymitis.

blennochesia, blennochezia (*blen-o-ke'-ze-ah*) [*blenno-*; *χέσειν*, to want to go to stool]. See *blennenteria*.

blennocystitis (*blen-o-sis-ti'-tis*) [*blenno-*; *κύστις*, bladder; *ῖτις*, inflammation]. Catarrh of the urinary bladder.

blennogenic, or **blennogenous** (*blen-o-jen'-ik*, or *blen-oj'-en-us*) [*blenno-*; *γένεσις*, production]. Producing or secreting mucus; muciparous.

blennoid (*blen'-oid*) [*blenno-*; *εἶδος*, form]. Resembling mucus; myxoid; muciform; mucoid.

blennoma (*blen-o'-mah*) [*blenno-*; *ὄμα*, a tumor; *pl., blennomata*]. 1. A mucous polypus. 2. A myxoma.

blennometritis (*blen-o-me-trī'-tis*) [*blenno-*; *μήτρα*, the uterus; *ῖτις*, inflammation]. Catarrhal metritis.

blennometrorrhea, blennometrorrhœa (*blen-o-metror-e'-ah*). See *metroblennorrhea*

blennophlogisma, blennophlogosis (*blen-o-flo-jis'-mah, blen-o-flo-go'-sis*) [*blenno-*; *φλόγωσις*, inflammation]. Inflammation of a mucosa.

blennophthalmia (*blen-off-thal'-me-ah*) [*blenno-*; *ὀφθαλμία*, a disease of the eyes]. Catarrhal conjunctivitis.

blennoptysis (*blen-op'-tis-is*) [*blenno-*; *πτύσις*, a spitting]. Bronchial mucous expectoration.

blennorrhagia (*blen-or-a'-je-ah*) [*blenno-*; *ῥηγνύναι*, to burst forth]. 1. An excessive mucous discharge. 2. Gonorrhea.

blennorrhagic (*blen-or-aj'-ik*) [see *blennorrhagia*]. Relating to blennorrhagia.

blennorrhea (*blen-or-e'-ah*) [*blenno-*; *ῥοή*, a flow] Same as *blennorrhagia*.

blennorrheal, blennorrhoic (*blen-or-e'-al, -o'-ik*) [see *blennorrhea*]. Relating to blennorrhea

blennorrhinia (*blen-or-in'-e-ah*) [*blenno-*; *ῥίς*, the nose]. Coryza; nasal catarrh.

blennosis (*blen-o'-sis*) [*blenno-*; *νόσος*, disease; *pl., blennoses*]. Any disease of a mucous membrane.

blennostasin (*blen-os'-tas-in*). The proprietary name for a yellow solid body said to be cinchonidine hydrobromide, $C_{19}H_{22}N_2O(HBr)_2$, a non-toxic vasomotor constrictor and blennostatic. It is used in influenza, colds, night-sweats, etc. Dose 15–60 gr. (1–4 Gm.) hourly.

blennostasis (*blen-os'-tas-is*) [*blenno-*; *στάσις*, a staying]. The checking or suppression of any mucous discharge.

blennostatic (*blen-os-tat'-ik*) [*blenno-*; *στάσις*, a staying]. 1. Checking or suppressing mucous discharges. 2. An agent capable of suppressing mucous discharges.

blennostrumous (*blen-o-stru'-mus*). Relating to gonorrhea and to scrofula.

blennothorax (*blen-o-tho'-raks*) [*blenno-*; *θώραξ*, the thorax]. Pulmonary catarrh.

blennotorrhea (*blen-ot-or-e'-ah*) [*blenno-*; *οὖς*, ear; *ῥοία*, a flow]. A mucous discharge from the ear.

blennurethria (*blen-ū-re'-thre-ah*) [*blenno-*; *οὐρήθρα*, the urethra]. Urethral gonorrhea.

blennuria (*blen-ū'-re-ah*) [*blenno-*; *οὖρον*, urine]. The discharge of mucus in the urine.

blennymenerysipelas (*blen-e-men-er-e-sip'-e-las*) [*blenno-*; *ὑμήν*, membrane; *erysipelas*]. Erysipelas attacking a mucosa.

blennymenitis (*blen-im-en-i'-tis*) [*blenno-*; *ὑμήν*, membrane]. Inflammation of any mucous surface.

blenosan (*blen'-os-an*). Trade name of a capsule containing a preparation of santal and kava.

blephara (*blef'-ar-ah*). Plural of *blepharon*, *q. v.*

blepharadenitis (*blef-ar-ad-en-i'-tis*) [*blepharon*; *ἀδήν*, a gland; *ιτις*, inflammation]. Inflammation of the Meibomian glands. **b. tarsalis.** See *hordeolum*.

blepharal (*blef'-ar-al*) [*βλέφαρον*, the eyelid]. Relating to an eyelid or to the eyelids.

blepharanthracosis (*blef-ar-an-thrak-o'-sis*) [*βλέφαρον*, the eyelid; *ἀνθράκωσις*, a charring; carbunculization]. Carbuncular inflammation of the eyelid.

blepharedema (*blef-ar-e-de'-mah*) [*βλέφαρον*, the eyelid; *οἴδημα*, a swelling]. Swelling or edema of the eyelids

blepharelosis (*blef-ar-el-o'-sis*) [*βλέφαρον*, the eyelid; *εἵλειν*, to roll]. Synonym of *entropion*.

blepharemphysema (*blef-ar-em-fis-e'-mah*) [*βλέφαρον*, eyelid; *ἐμφύσημα*, an inflation]. Emphysema of an eyelid.

blepharides (*blef-ar'-id-ēz*). Plural of *blepharis*.

blepharis (*blef'-ar-is*) [*βλεφαρίς*, an eyelash]. 1. An eyelash. 2. A genus of plants of the order *Acanthaceæ*. *B. capensis* is a plant of South Africa used in blood-poisoning from anthrax and in treatment of snake-bites. Dose 3–4 oz. (90–118 Cc.) of a 1:100 decoction.

blepharism (*blef'-ar-izm*) [*βλεφαρίζειν*, to wink]. Rapid involuntary winking; morbidly excessive nictitation.

blepharitic (*blef-ar-it'-ik*) [*βλέφαρον*, the eyelid; *ιτις*, inflammation]. Relating to or affected with blepharitis.

blepharitis (*blef-ar-i'-tis*) [*blepharon*; *ιτις*, inflammation]. Inflammation of the eyelids. **b. acarica,** marginal blepharitis in which the *Demodex folliculorum* is present upon or about the eyelashes. **b. ciliaris, b. marginalis,** inflammation of the ciliary or marginal border of the lids. **b. gangrænosa,** carbuncle of the eyelids. **b. glandularis, b. glandulosa,** inflammation of the Meibomian glands. **b. internus,** palpebral conjunctivitis. **b. phlegmonosa,** inflammation of the cellular tissue of the eyelid. **b. scrofulosa.** See *b. simplex*. **b. simplex,** mild inflammation of the borders of the eyelids with formation of moist yellow crusts on the ciliary margins, gluing together the eyelids. **b. squamosa,** that attended with the formation of scabs. **b. ulcerosa,** an ulcerative inflammation of the eyelids.

blepharo- (*blef-ar-o*) [*blepharon*]. A prefix meaning relating to the eyelid.

blepharoadenitis (*blef-ar-o-ad-en-i'-tis*). See *blepharadenitis*.

blepharoadenoma (*blef-ar-o-ad-en-o'-mah*) [*blepharo-*; *ἀδήν*, a gland; *ὄμα*, a tumor]. An adenoma of the eyelid.

blepharoatheroma (*blef-ar-o-ath-er-o'-mah*) [*blepharo-*; *atheroma*]. A sebaceous cyst of the eyelid.

blepharoblennorrhea (*blef-ar-o-blen-or-e'-ah*). See *ophthalmia, purulent.* **blepharoblennorrhœa gonorrhoica, b. maligna,** gonorrheal ophthalmia. **blepharoblennorrhœa neonatorum,** ophthalmia neonatorum. **blepharoblennorrhœa urethritica,** gonorrheal ophthalmia.

blepharocarcinoma (*blef-ar-o-kar-sin o'-mah*) [*blepharo-*; *carcinoma*]. Carcinoma affecting the eyelid.

blepharochalasis (*blef-ar-o-kal'-as-is*) [*blepharo-*; *χάλασις*, a slackening]. Hypertrophy of the skin of the eyelids which causes the skin to fold over and hang down. In some persons it hides the tarsal margin when the lids are open.

blepharochromidrosis (*blef-ar-o-kro-mid-ro'-sis* [*blepharo-*; *χρῶμα*, color; *ἱδρώς*, sweat]. Colored sweat of the eyelids, usually of a bluish tint.

blepharocleisis (*blef-ar-o-kli'-sis*) [*blepharo-*; *κλεῖσις*, closure]. Ankyloblepharon; abnormal closure of the eyelids

blepharoclonus (*blef-ar-ok'-lon-us*) [*blepharo-*; *κλόνος*, commotion]. Spasm of the orbicularis palpebrarum muscle.

blepharocoloboma (*blef-ar-o-kol-o-bo'-mah*). See *coloboma palpebræ*.

blepharoconjunctivitis (*blef-ar-o-kon-junk-tiv-i'-tis*) See *conjunctivitis, palpebral.*

blepharodiastasis (*blef-ar-o-di-as'-tas-is*) [*blepharo-*; *διαστάσις*, separation] Excessive separation of the eyelids; or inability to close the eyelids completely.

blepharodyschrea (*blef-ar-o-dis-kre'-ah*), or **blepharodyschroia** (*blef-ar-o-dis-kroi'-ah*) [*blepharo-*; *δυς*, bad; *χροία*, color]. Discoloration of the eyelid from nevus or from any other cause.

blepharoedema (*blef-ar-o-e-de'-mah*). See *blepharedema*

blepharoemphysema. See *blepharemphysema*.

blepharohematidrosis (*blef-ar-o-hem-at-id-ro'-sis*) [*blepharo-*; *αἷμα*, blood; *ἱδρώς*, sweat] The rare occurrence of sweating blood from the skin of the eyelid.

blepharolithiasis (*blef-ar-o-lith-i'-as-is*) [*blepharo-*; *λίθος*, a stone]. The formation of marginal concretions within the eyelid.

blepharomelasma (*blef-ar-o-mel-as'-mah*) [*blepharo-*; *μέλας*, black]. Seborrhœa nigricans occurring on the eyelid.

blepharomelena (*blef-ar-o-mel-e'-nah*). See *blepharochromidrosis*.

blepharon (*blef'-ar-on*) [*βλέφαρον*, the eyelid; pl., *blephara*]. The eyelid; palpebra.

blepharoncosis (*blef-ar-ong-ko'-sis*) [*blepharoncus*]. The formation of a blepharoncus, or the condition of suffering due to such a growth.

blepharoncus (*blef-ar-ong'-kus*) [*blepharo-*; *ὄγκος*, an enlargement]. A tumor or swelling of the eyelid.

blepharonysis (*blef-ar-on-i'-sis*) [*blepharo-*; *νύσσειν*, to prick]. Operation for entropion by means of Gaillard's suture.

blepharopachynsis (*blef-ar-o-pak-in'-sis*) [*blepharo-*; *παχύς*, thick]. Morbid thickening of the eyelid.

blepharophimosis (*blef-ar-o-fi-mo'-sis*) [*blepharo-*; *φίμωσις*, a shutting-up]. Abnormal smallness of the palpebral aperture.

blepharophryplastic (*blef-ar-o-frip-las'-tik*) [*blepharo-*; *ὀφρύς*, brow; *πλαστικός*, plastic]. Pertaining to the plastic surgery of the lid and eyebrow.

blepharophryplasty (*blef-ar-off'-re-plas-te*) [*blepharo-*; *ὀφρύς*, eyebrow; *πλάσσειν*, to form]. Plastic surgery of the eyebrow and eyelid.

blepharophthalmia (*blef-ar-of-thal'-me-ah*) [*blepharo-* *ὀφθαλμός*, eye]. Combined palpebral and ocular conjunctivitis.

blepharophthalmic (*blef-ar-of-thal'-mik*). Relating to the eyelids and the globe of the eye, or to blepharophthalmia.

blepharophthalmostat (*blef-ar-of-thal'-mo-stat*). See *blepharostat*.

blepharophyma (*blef-ar-o-fi'-mah*) [*blepharo-*; *φύμα*, a growth; *pl.*, *blepharophymata*]. A tumor of, or outgrowth from, the eyelid.

blepharoplast (*blef'-ar-o-plast*) [*blepharo-*; *πλάσσειν*, to form]. 1. An individualized centrosome, found in certain protozoa, such as trypanosoma. 2. A nucleolus of a nucleus.

blepharoplastic (*blef-ar-o-plas'-tik*) [*blepharo-*; *πλαστικός*, plastic]. Pertaining to blepharoplasty.

blepharoplasty (*blef'-ar-o-plas-te*) [see *blepharoplast*]. An operation for the restoration of any part of the eyelid.

blepharoplegia (*blef-ar-o-ple'-je-ah*) [*blepharo-*; *πληγή*, a stroke]. Paralysis of an eyelid.

blepharoptosis (*blef-ar-op-to'-sis*) [*blepharo-*; *πτῶσις*, a fall]. Drooping of the upper eyelid.

blepharopyorrhea (*blef-ar-o-pi-or-e'-ah*) [*blepharo-*; *πύον*, pus; *ῥέειν*, to flow]. A flow of pus from the eyelid.

blepharorrhaphy (*blef-ar-or'-a-fe*) [*blepharo-*; *ῥαφή*, a seam]. The stitching together of a portion of the edges of the lids.

blepharorrhea (*blef-ar-or-e'-ah*) [*blepharo-*; *ῥοία*, a flow]. A discharge from the eyelid.

blepharospasm (*blef'-ar-o-spasm*) [*blepharo-*; *σπασμός*, a spasm]. Spasm of the orbicularis palpebrarum muscle; excessive winking.

blepharospath (*blef'-ar-o-spath*) [*blepharo-*; *σπάθη*, a blade]. A forceps for taking up or holding an artery; for use in operations on the eyelid.

blepharosphincterectomy (*blef-ar-o-sfink-ter-ek'-to-me*) [*blepharo-*; *σφιγκτήρ*, sphincter; *ἐκτομή*, incision]. An operation to lessen the pressure of the upper lid upon the cornea; it consists in making an incision the entire length of the lid, about 2 mm. above the lid-border; by a second incision a small oval flap of skin, 2–4 mm. broad, is removed along with all the underlying muscle-fibers. The wound is closed with two or three sutures.

blepharostat (*blef'-ar-o-stat*) [*blepharo-*; *στατικός*, causing to stand]. An instrument for holding the eyelids apart while performing operations upon the eyes or lids.

blepharostenosis (*blef-ar-o-ste-no'-sis*) [*blepharo-*; *στενός*, narrow]. Diminution of the space between the eyelids.

blepharosymphysis (*blef-ar-o-sim'-fis-is*). See *blepharosynechia*.

blepharosyndesmitis (*blef-ar-o-sin-des-mi'-tis*) [*blepharo-*; *σύνδεσμος*, a bond]. See *conjunctivitis, palpebral*.

blepharosynechia (*blef-ar-o-si-nek'-e-ah*) [*blepharo-*; *συνέχεια*, a holding together]. The adhesion or growing together of the eyelids.

blepharotomy (*blef-ar-ot'-o-me*) [*blepharo-*; *τέμνειν*, to cut]. Incision into the eyelid.

blepharydatis (*blef-ar-id'-at-is*) [*blepharo-*; *ὐδατίς*, a vesicle]. A hydatid affecting the eyelid.

blepsopathia (*blep-so-path'-e-ah*) [*βλέψις*, sight; *πάθος*, suffering]. Eyestrain.

blessed thistle. See *Carduus*.

Blessig's groove [Robert *Blessig*, Russian physician, 1830–1878]. The slight groove in the embryonic eye that marks off the fundus of the optic cup from the zone that surrounds the periphery of the lens and corresponds in position with the future ora serrata.

blight (*blīt*). 1. A partial paralysis of certain facial nerves, arising from sudden or extreme cold. 2. A fungus-disease of plants. **b. of the eye,** an extravasation of blood within the conjunctiva. **b., sandy,** a form of ophthalmia attended with photophobia and a sensation of grittiness, due to the formation of pus in the openings of the Meibomian glands.

blighted (*blī'-ted*). Withered, blasted; affected with blight.

blind (*blīnd*) [AS]. Without sight; deprived of sight. **b. gut,** the cecum. **b. spot,** that part of the fundus of the eye where the optic nerve enters.

blindness (*blīnd'-nes*). Want of vision. **b., Bright's.** See *Bright's blindness*. **b., color-,** imperfect color-perception. This condition is found in about 4% of persons, is more frequent in men than in women, and is probably due to nonexercise of the color-sense. *Complete color-blindness* is very rare, the different colors probably appearing as different intensities or shades of white light. In *partial color-blindness* defective perception of red is the most frequent, green, blue, and yellow, respectively, being next in order. *Tests for color-blindness* usually consist in matching and classifying colored yarns. **b., cortical,** blindness due to lesion of the cortical center of vision. **b., day-.** See *nyctalopia*. **b., electric-light,** a condition similar to snow-blindness, due to exposure of the eyes to intense and prolonged electric illumination. **b., gold,** a form of retinal asthenopia at times affecting dentists, owing to which there is inability to distinguish the filling from the tooth. **b., intellectual, b., mental.** See *b., psychic*. **b., moon-,** a rare condition of retinal anesthesia said to be due to exposure of the eyes to the moon's rays in sleeping. **b., nervous.** See *amaurosis*. **b., night-.** See *hemeralopia*. **b., object-.** See *apraxia*. **b., psychic,** loss of conscious visual sensation from destruction of the cerebral visual center; there is sight but not recognition. **b., snow-,** photophobia and conjunctivitis due to exposure of the eyes to the glare of sunlight upon snow. **b., soul.** See *b. psychic*. **b., word-.** See *aphasia*.

blinking (*blink'-ing*). An involuntary winking.

blister (*blis'-ter*) [ME.]. A vesicle resulting from the exudation of serous fluid between the epidermis and true skin; also the agent by which the blister is produced. **b., blood-,** a blister which contains blood. **b., fly-,** a blister of cantharides. See *cantharides*. **b., flying,** a blister that remains long enough to produce redness of the skin and not vesication.

blistering (*blis'-ter-ing*). Forming a vesicle upon the skin. **b. collodion,** a solution of cantharidin in collodion. **b. liquid.** Same as *b. collodion*. **b. paper,** paper saturated with cantharides; used for producing vesication.

bloat (*blōt*) [ME., *blote*, swelling]. 1. Puffiness; edema; turgidity from any cause, as from anasarca. 2. A form of colic in the horse produced by tympanitic distention of the intestines. Also called *wind colic*.

block (*blok*) [ME., *blok*, a piece of wood]. 1. In dentistry a mass of gold-foil for filling teeth, made by folding a tape of foil upon itself several times by means of pliers. 2. To obstruct the path of all sensory impressions in the nerve-

trunks and roots in the spinal cord which connect the area of surgical operation with the sensorium. **b. heart.** See *heart.*

blocking (*blok'-ing*). F. Franck's term for the transitory sensory paralysis of the entire peripheral distribution of a nerve by the infiltration of the sectional area of a nerve-trunk in any part of its course with cocaine or a similar analgesic.

Blocq's disease [Paul Oscar *Blocq*, French physician, 1860–1896]. See *Briquet's ataxia.*

blondine (*blon'-dēn*) [Fr., *blonde*, light, fair]. A preparation of hydrogen dioxide, used for bleaching the hair.

blood (*blud*) [AS., *blōd*]. The fluid that circulates through the heart, arteries, and veins, supplying nutritive material to all parts of the body. In the human being the blood of the arteries is bright red and dichroic; that of the veins, dark red and monochroic. Blood consists of plasma and corpuscular elements, the latter being the red corpuscles, the white corpuscles, and the blood-plaques. In a cubic millimeter there are about 5,000,000 red and 10,000 white corpuscles. The red color of the blood is due to the hemoglobin contained in the red corpuscles. The total amount of blood was formerly estimated at $\frac{1}{13}$ of the body-weight, but now $\frac{1}{13}$ of the body-weight is believed to be a more correct figure. When exposed to the air, blood coagulates, forming a red clot and a yellowish fluid called serum. Healthy blood consists of 78% of water and 22% of solids. See *Almén, Bremer, Hayem, Hoppe-Seyler, Kobert, Ladendorff, Pacini, Rubner, Salkowski, Siruve, Van Deen, Wetzel, v. Zaleski.* **b.-casts,** tube casts to which red blood-corpuscles are attached **b.-cell,** a blood corpuscle. **b.-coagulation.** See *Hammarsten, Lilienfeld, Pekelharing, Schmidt.* **b.-corpuscles, red,** circular, biconcave discs floating in the blood. Red corpuscles are circular in mammals (except the camel) and elliptical in birds and reptiles. In man they are about $\frac{1}{3200}$ inch (7μ) in diameter and $\frac{1}{12000}$ inch thick. **b.-corpuscles, granular,** bodies described by Erb in blood of mammals and supposed to be transitional blood-corpuscles. **b.-corpuscles white,** *colorless corpuscles,* about one-third larger in diameter than the red—$\frac{1}{3200}$ inch (10μ). They exhibit movements similar to those of the ameba. **b.-crasis,** the mixture of the constituents of the blood. When the blood-crasis is diseased or disordered, the condition is known as dyscrasia. **b.-crystals,** crystals of hematoidin. **b., defibrinated,** blood from which the fibrin has been removed by agitating it with twigs. **b.-disease.** A synonym of *dyscrasia.* **b.-dust.** A synonym of *hemokonia.* **b.-fluke.** See *Bilharzia hæmatobia.* **b.-islands,** a term applied to the groups of corpuscles developed during the first days of embryonic life, within the large branched cells of the mesoblast. **b.-pigments.** See *hemoglobin, hematin,* and *hematocyanin.* **b.-plaque.** See *b.-platelets.* **b.-plasma,** the *liquor sanguinis,* or fluid part of the blood. **b. plastid,** a red blood cell which has been affected by a salt solution of too great concentration. **b.-platelets,** circular or oval, light-gray bodies found in the blood. They are from 1 to 1.3μ in size, and number from 18,000 to 300,000 in the cubic millimeter. Their function is not definitely known; they are an important factor in thrombosis. **b.-poisoning,** a morbid state due to the circulation of bacteria or their products, or both, in the blood, as the result of a local infection. **b.-pressure,** the tension of the blood in the arteries. **b.-root.** See *sanguinaria.* **b.-shot,** redness due to turgescence of blood-vessels; ecchymosed,—*e. g.*, the eye. **b.-stroke,** apoplexy. **b. transfusion.** The blood of donor and recipient must be of like types. See *typing.* **b.-tumor.** See *hematoma.* **b. types.** See typing. **b.-vessel,** an artery or a vein.

bloodless (*blud'-les*) [*blood*]. Without blood. **b. operations,** surgical amputations, in which the member is so bandaged by compresses apd elastic bands that the blood is expelled and kept from the field of operation.

bloodletting (*blud-let'-ing*). The artificial abstraction of blood from the body. **b., general,** venesection or phlebotomy, *q.v.*. **b., local, b., topical,** the removal of a small quantity of blood by cupping, leeching, or scarification. **b., revulsive,** that performed for arresting internal hemorrhage. **b., spoliative,** bleeding to reduce the number of blood-corpuscles.

bloody (*blud'-e*). Of the nature of, or filled with blood. **b. flux,** dysentery. **b. sweat,** ephidrosis.

Blot's scissors (*blo*) [Claude Philibert Hippolyte *Blot*, French obstetrician, 1822–1888]. Scissors specially designed for use in craniotomy.

blotch. A pimple or blain; a small discolored patch of skin; a group of small pustules.

blow-pipe (*blo'-pīp*). A cylindrical tube, from twelve to eighteen inches long, about half an inch in diameter at one end, and gradually tapering to a fine point or nozzle, which may be straight or bent at a right angle; it is used in directing the flame of a lamp in a fine conical tongue, for the purpose of producing a high temperature by hastening the combustion.

blucaloids (*bloo'-kal-oids*). Methylene-blue and oil of eucalyptus in capsules; useful in malaria.

blue [ME., *blew*]. One of the colors of the spectrum. **b. baby,** a child with congenital cyanosis. **b.-blindness,** defective color-perception for blue. **b. cardinal-flower.** Synonym of *Lobelia syphilitica.* **b. cohosh.** See *Caulophyllum.* **b. disease,** cyanosis of the newborn, usually due to congenital disease of the heart. **b. edema,** a puffed and bluish appearance of the limb sometimes seen in hysterical paralysis. **b.-flag.** See *Iris.* **b. gentian,** the root of *Gentiana catesbæi,* tonic and stomachic. Dose of *fluidextract* 10–40 min. (0.65–2.65 Cc.). **b.-gum tree.** See *Eucalyptus.* **b.-mass.** See *mercury mass.* **b., methylene-.** See *methylene-blue.* **b. ointment,** *unguentum hydrargyri dilutum* (U. S. P.). **b. pill,** a pill made from blue-mass. **b., Prussian,** ferric ferrocyanide, $(Fe_2)_3(FeC_6N_6)_2$. **b. stick.** Same as *b.-stone.* **b.-stone,** copper sulphate. **b., Turnbull's,** ferrous ferrocyanide, $Fe_3Fe_2(C_3N_3)_4$. **b. vision,** cyanopsia. **b. vitriol,** copper sulphate.

bluebottle (*bloo' bot-l*). See *Carduus.*

blues (*bloos*). A popular name for short periods of mental depression; they are usually associated with indigestion.

Blumberg's sign (*bloom'-berg*). In active peritonitis, pressure of the hand on the abdomen causes less pain than sudden removal of the pressure; during convalescence, pressure causes greater pain than sudden removal of the pressure.

Blumenau's nucleus (*bloo'-men-ow*) [Leonid *Blumenau*, Russian neurologist, 1862–]. The lateral nucleus of the cuneate nucleus.

Blumenbach's clivus (*bloo'-men-bakh*) [Johann Friedrich *Blumenbach*, German physiologist, 1752–1840]. The inclined surface of the sphenoid bone which lies behind the posterior clinoid processes and is continuous with the basilar process of the occipital bone. **B.'s process,** the uncinate process of the ethmoid bone.

blunt-hook (*blunt'-hook*). An obstetrical instrument, used mainly in embryotomy.

blush, systolic. Proposed name for capillary pulse. See under *pulse*.

blushing (*blush'-ing*) [ME., *blushen*, to glow]. The sudden and temporary reddening of the face due to vasomotor action caused by shame, modesty, or confusion. See *rubor*.

Blyth's test for lead in potable water [Alexander Wynter *Blyth*, English chemist]. On the addition of a 1% alcoholic tincture of cochineal a precipitate is formed.

B. M. S. Abbreviation of Bachelor of Medical Science

BNA. Abbreviation for *Basle nomina anatomica*, Basle anatomical nomenclature.

Boas' point (*bo'-as*) [Ismar *Boas*, German physician, 1858–]. In cases of gastric ulcer there is a tender spot to the left of the twelfth dorsal vertebra. **B.'s reagent,** a solution of tropeolin or paper saturated with such a solution. **B.'s sign,** the presence of lactic acid in the gastric contents in cases of cancer of the stomach. **B.'s test,** in cases of intestinal atony a splashing sound can be obtained on pressure upon the abdominal wall after the injection of a small quantity (200–300 Cc.) of water into the bowel. **B.'s test for hydrochloric acid in the contents of the stomach,** in 100 Gm. dilute alcohol dissolve 5 Gm. pure resorcinol and 5 Gm. white sugar. Spread a few drops of this reagent in a thin layer upon a porcelain dish and heat gently. If a glass rod dipped in the solution is applied to a drop of the filtrate from the stomach, a deep scarlet streak is produced. **B.'s treatment of hemorrhoids,** after extrusion of the hemorrhoids they are treated by Bier's suction until an edematous ring appears; later, they drop off.

Boas-Oppler bacillus (*bo'-as op'-ler*) [Ismar *Boas*, German physician, 1858– ; Bruno *Oppler*, German physician]. A strepto-bacillus sometimes found in the gastric contents when present in large numbers it is said to indicate carcinoma of the stomach.

boat-belly (*bōt'-bel-e*). See *scaphoid abdomen*.

bocaral (*bo'-kar-al*). An antiseptic preparation containing boric acid, carbolic acid, and alum.

Bocconia (*bok-o'-ne-ah*) [Paolo, *Boccone*, Italian botanist, 1633–1704]. A genus of plants of the order *Papaveraceæ*. *B. frutescens* is a native of the West Indies; the juice is purgative and anthelmintic.

Bochdalek's canal or duct (*bok-dal-ek'*) [*Bochdalek*, Austrian anatomist, –1883]. A minute canal passing obliquely downward and outward through the membrana tympani from the upper edge of the inner surface of the latter to the umbo, where it opens on the outer surface. **B.'s ganglion,** the supramaxillary ganglion; a small gangliform enlargement at the junction of the anterior and middle dental branches of the superior maxillary nerve. **B.'s gap,** the interval existing in the diaphragm between the costal and lumbar attachments of this muscle. **B.'s glands,** cysts developed in the tongue derived from the primitive thyroglossal duct. **B.'s muscle,** the triticeoglossus muscle, a small muscle extending from the cartilago triticea in the thyrohyoid ligament upward and forward to the tongue, which it enters, together with the posterior part of the hyoglossus **B.'s tubes,** round or tubular cavities opening into the posterior portion of the thyroglossal duct; like the latter, they are inconstant after birth. **B.'s valve,** a small fold of the lining membrane of the lacrimal duct, near the punctum lacrimale.

Bock's pharyngeal nerve [August Carl *Bock*, German anatomist, 1782–1833]. The posterior efferent (pterygopalatine) branch of the sphenopalatine ganglion.

Bockhart's impetigo [Max *Bockhart*, German physician]. Epidermic abscesses caused by pyogenic micrococci.

Bodal's test (*bo'-dal*). A test for color perception by means of colored blocks.

bodik. A Malay liquor made from rice.

Bodo (*bo'-do*) [L.]. A genus of flagellate protozoa. **B. saltans** reported as living in great numbers in unhealthy ulcerations. **B. urinarius** has been found in the urine of cholera-patients.

body (*bod'-e*) [AS., *bodig*]. 1. The animal frame with its organs. 2. A cadaver or corpse. 3. The important and largest part of an organ, as the body of the uterus. See also *corpus* and *corpora*. 4. A mass of matter. **b., alloxur.** See *alloxur*. **bodies, amylaceous, b., amyloid,** a term applied by Virchow (1856) to bodies found in the central nervous system of adults and young persons dying of various diseases (not alone of diseases of the nervous system). They are concentrically striated, stain deep brown with Lugol's solution, blue with iodine and sulphuric acid, and give the characteristic amyloid color with the aniline stains. **b., antiimmune,** a substance held by Ehrlich in his lateral-chain theory to enter into the composition of an antihemolysin (*q. v.*) Cf. *anticomplement*. **bodies, bigeminal.** See *corpora quadrigemina*. **b.-cavity,** the space contained within the thoracic and abdominal walls. **b., central.** 1. The nucleus. 2. In the plural, peculiar corpuscles which are permanently present near the nucleus in protoplasm during cell-division. **bodies, chromatin,** bodies of various forms found in the reticulum of a cell undergoing mitosis. **bodies, direction, b., directive,** the minute abortive cells extruded by the egg-cell as the final phenomenon in the process of maturation; polar bodies. **bodies, globoid,** micro-organisms found in poliomyelitis, and supposed to be the cause of that disease. **b., immune,** a name given by Pfeiffer to one of the two substances of a hemolytic serum. It is thermostabile and has two affinities, a stronger one for the red blood-cell and a weaker one for the complement. Having two uniting processes, it is an amboceptor. **b., inclusion,** a nucleoid. **b., intermediary, b., intermediate.** See *b., immune* and *amboceptor*. **bodies, katalytic,** the ferments. **b.-louse.** See under *pediculus*. **bodies, melonseed,** bits of fibrin, cartilage, or of tuberculous or syphilitic granulation tissue, found in enlarged bursæ and ganglia. **bodies, metachromatic,** small granules in bacterial cells staining differently from the surrounding cytoplasm. **bodies, parenchymal,** the lobules of the

lacrimal gland. **b., perineal,** the tissues between the vulva and anus. **b., pituitary.** See *pituitary*. **b.-sarcode,** the protoplasm of the cell-body. **bodies, semilunar.** See *cells, demilune*.

Boeck's disease (*bek*) [Carl Wilhelm *Boeck*, Norwegian physician, 1808–1875]. Sarcoid tumor of the skin. **B.'s lotion,** for dry, itching, inflammatory diseases. Talc and starch, each, 50; glycerol, 20; lead-water, 100. The bottle to be well shaken; the lotion diluted with twice the volume of water and applied with a brush. **B.'s scabies,** scabies crustosa; Norwegian itch.

Boedeker's reaction for albumin (*bo'-dek-er*). [Carl Heinrich Detlef *Boedeker*, German chemist, 1815–1895]. Treat the liquid with acetic acid and add a solution of potassium ferrocyanide drop by drop. White precipitate of albumin will be formed.

Boerhaave's glands (*bor'-hāv*) [Hermann *Boerhaave*, Dutch physician, 1668–1738]. The sudoriparous glands. The convoluted glands in the skin that secrete the sweat.

Boernstein's test for saccharin. Extract the substance to be tested with ether; remove the ether and heat with resorcinol and sulphuric acid and add an excess of soda solution. In the presence of saccharin a strong fluorescence is produced. According to Hooker, other substances, *e. g.*, succinic acid, also produce this reaction.

Boettcher's canal (*bet'-kher*) [Arthur *Boettcher*, German anatomist, 1831–1889]. A canal between the utricle and saccule of the internal ear. **B.'s cells,** dark-colored cells, with a basally situated nucleus, found between Claudius' cells **B.'s crystals.** See *crystals, spermin*.

Boettcher-Cotugno's space (*ko-tūn'-yo*). The endolymphatic sac of the internal ear.

Boettger's test for dextrose (*bet'-ger*) [Wilhelm Carl *Boettger*, German chemist, 1871–]. Take 5 Gm. of basic bismuth nitrate, 5 Gm. of tartaric acid, and 30 Cc. of distilled water. Add to this slowly a strong solution of sodium hydroxide, stirring continually until a clear solution is obtained. To a small quantity of this add some solution of dextrose and boil. A black precipitate of metallic bismuth is formed. Or the test may be performed in this way: Add some solid bismuth subnitrate to the liquid already rendered alkaline with sodium carbonate or potassium and boil. The existence of dextrose will be evinced by the darkening of the bismuth salt or a black precipitate.

Bogg's sign. In hypertrophy of the thymus: an upward shifting of the lower level of percussion dulness when the "seated" subject's head is extended backwards towards the spine.

Bogros' space (*bog'-ro*) [Jean Annet *Bogros*, French anatomist, 1786–1825]. A space between the peritoneum above and the fascia transversalis below, in which the lower portion of the external iliac artery can be reached without wounding the peritoneum.

Bogrow's fibers (*bog'-ro*). A tract of nerve-fibers passing from the optic tract to the optic thalamus.

boil (*boil*) [Mod. E., *boile*]. A furuncle; a localized inflammation of the skin and subcutaneous connective tissue attended by the formation of pus. See *furunculus*. **b., Aleppo, b., Delhi,** a peculiar ulcerative affection endemic in India, due to a specific microorganism. See *furunculus orientalis*. **b., blind,** one of brief continuance and not attended by the formation of a core

boiled oil. Linseed oil that has been heated to a high temperature (130° C. and upward), while a current of air is passed through or over the oil, and the temperature increased until the oil begins to effervesce from evolution of products of decomposition.

boiling [ME., *boilen*, to stir]. The vaporization of a liquid when it gives off vapor having the same tension as the surrounding air. **b. point,** the temperature at which a liquid begins to boil.

bolbomelanosis (*bol-bo-mel-an-o'-sis*) [βολβός, a bulb; μελάνωμα, blackness]. The process of formation of a melanoma.

boldin (*bol'-din*). A glucoside found in boldus; boldoglucin.

boldine (*bōl'-din*). See under *boldus*.

boldo (*bol'-do*). See *boldus*.

boldoglucin. An aromatic glucoside obtained from *Peumus boldus* and other species. It is a hypnotic in doses of 20 gr.–1 dr. (1.3–4.0 Gm.).

boldus (*bol'-dus*) [L.]. Boldo. The leaves and stems of an evergreen, *Peumus boldus*, native to Chili, sometimes used in anemia and general debility as a substitute for quinine. It contains a bitter alkaloid, *boldine*, a hypnotic in doses of 3 gr. (0.2 Gm.). Dose of the *fluid-extract*, 1–4 min. (0.065–0.26 Cc.); of the *tincture*, which contains 20% of the drug, 5–8 min. (0.32–0.52 Cc.).

bole (*bōl*) [βῶλος, a clod of earth]. A translucent, soft variety of clay formerly much used in medicine—internally as an astringent, externally as an absorbent. Several varieties are used, as the *Armenian bole*, the *Lemnian*, and the *French bole*.

boletiform (*bo-let'-e-form*). Shaped like a mushroom.

Boletus (*bo-le'-tus*). A genus of fungi, some species of which are edible while others are highly poisonous.

Bolognini's sign (*bo-lon-ye'-ne*). On pressing with the tips of the fingers of both hands alternately upon the right and left of the abdomen of a patient who is lying on his back and whose abdominal muscles are relaxed by flexion of the thighs, a sensation of friction within the abdomen is perceived; it is noticed in the early stages of measles.

bolometer (*bo-lom'-et-er*) [βολή, a ray, a throw; μέτρον, a measure]. A device for measuring minute differences in radiant heat. Syn., *thermic balance*.

bolus (*bo'-lus*) [L.]. 1. A large pill. 2. The rounded mass of food prepared by the mouth for swallowing. 3. See *bole*.

bombus (*bom'-bus*) [βόμβος, a humming sound]. A ringing or buzzing sound in the ears; tinnitus. Also a sonorous movement or rumbling flatus of the intestines: borborygmus.

Bond's splint. *For fracture of the lower end of th radius:*—A thin, wooden splint, with sole-leather edges an inch high, and a curved block to rest in the palm of the hand. A pasteboard splint is used on the back of the forearm, both reaching from below the elbow to almost the distal ends of the metacarpal bones.

bonducin (*bon'-dū-sin*), $C_{14}H_{18}O_8$. A bitter principle from bonducella; a white powder, soluble in alcohol, chloroform, fats, and oils, used as a febrifuge. Dose 1½–3 gr. (0.1–0.3 Gm.).

bonduk, bonducella (*bon'-dūk, bon-dū-sel'-ah*) [L.]. Bonduc-seeds. The seeds of *Cæsalpinia bonducella*, a tropical plant. It is a bitter tonic

and antiperiodic in intermittent fevers. Dose 10–15 gr. (0.65–0.97 Gm.)

bone (*bōn*) [AS., *bān*]. A hard tissue that constitutes the framework or skeleton of the body. Bone usually consists of a compact outer mass covered with periosteum, surrounding a reticulated inner structure that incloses a central cavity filled with marrow. A transverse section of a long bone shows bone-tissue to be composed of a number of nearly circular zones, each having a central tube, the Haversian canal, through which the blood circulates. Surrounding the Haversian canal are concentrically arranged laminæ, or layers of bone, between which are found irregular spaces called lacunæ, containing bone-corpuscles and communicating with the Haversian canal and each other by means of canaliculi, through which the nutrition is conveyed to all parts of the bone. **b.-ache**, osteocopic pain. **b., ankle-**, the talus or astragalus. **b., articular**, that element of the mandible or lower jaw which is formed from the condylar portion of the cartilaginous rudiment in Meckel's cartilage. Syn., *os articulare; os condyloideum maxillæ inferioris*. **b.-ash**, the calcic phosphate remaining after bones have been incinerated. **b., basilar.** 1. The sphenoid and occipital bones regarded as one. 2. The sacrum. 3. The last lumbar vertebra. 4. The basioccipital bone. 5. The basisphenoid bone in birds. **b., cancellated, b., cancellous**, bone consisting chiefly of spongy tissue. **b.-cartilage.** See *ossein*. **b.-cell**, an osteoblast. **b., cheek-**, the malar bone. **b.-chips.** See *Senn's bone-plates*. **b., collar-**, the clavicle. **b.-conduction**, the transmission of sound-waves to the auditory nerve by means of sonorous vibrations communicated to the bones of the skull. **b.-cyst**, a tumor distending and thinning bone, and filled with serum or bloody fluid; in rare cases bone-cysts contain hydatids. **b.s., elongated**, long bones, like the ribs, devoid of a medullary cavity. **b., endochondral**, such true bone as originates from osteoblastic centers in fetal cartilage, and not from periosteum. **b., epipteric**, a small Wormian bone sometimes found between the great wing of the sphenoid and the anterior inferior angle of the parietal bone. **b., exercise**, an ossification in the left arm of soldiers due to constant pressure of a musket. **b., flat**, a bone more or less in the form of a plate. **b.-gelatin.** See *gelatin, bone-*. **b., intermaxillary.** See *mesognathion*. **b., long**, one consisting of a narrow shaft and two expanded ends. **b.s, pneumatic**, those containing many air-cells or air-sacs. **b., puboischiadic, b., pubolschiatic**, the os pubis and the ischium taken as one. **b., rider's**, an ossification of the lower tendon of the adductor longus or magnus from pressure. **b., sesamoid.** See *sesamoid bone*. **b.-setter**, a specialist at setting bones; usually an uneducated empiric, and often a pretender to hereditary skill in the business. **b., short**, one the three dimensions of which are approximately equal. **b., stirrup.** See *stapes*. **b.s, sutural**, the Wormian bones of the skull. **b.s, Wormian**, small bones in the sutures of the skull. See *bones, table of*, page 217.

bonelet (*bōn'-let*). See *ossicle*.

bone-oil. Dippel's animal oil, *q. v.*

boneset. See *Eupatorium*.

Bonfils' disease [Emile Adolphe *Bonfils*, French physician]. See *Hodgkin's disease*.

Bonnaire method (*bon-air'*) [— *Bonnaire*, French obstetrician]. A method of bimanual dilatation of the cervix for rapid artificial delivery.

Bonnet's capsule (*bon-a'*) [Amadée *Bonnet*, French surgeon, 1809–1858]. The posterior portion of the sheath of the eyeball; Tenon's capsule. **B.'s operation**, enucleation of the eyeball. **B.'s position**, the position assumed by the thigh in coxitis: flexion, abduction, and outward rotation.

boohoo (*boo-hoo'*) [native S. Pacific]. A kind of gastritis with slight fever and with great nostalgia and depression of spirits. It attacks strangers in some of the Pacific Islands.

Boophilus (*bo-off'-il-us*) [βους, ox; φιλεῖν, to love]. A genus of cattle-ticks. **B. annulatus**, the cattle-tick which carries the piroplasma responsible for Texas fever (a disease of cattle).

boopia (*bo-o'-pe-ah*) [βοῦς, ox; ὤψ, eye]. Ox-eyes, observed in cases of hysteria.

boot, Junod's. See *Junod's boot*.

boracic acid (*bo-ras'-ik*). See under *boron*.

boracil (*bo'-ras-il*). A preparation composed of boric acid, benzoic acid, acetanilide, and resorcinol. It is used as an antiseptic dusting powder.

boracite (*bo'-ras-īt*). 1. Native magnesium borate. 2. A preparation consisting of borocitrate of magnesium, and sugar.

borage (*bo'-raj*). The plant *Borago officinalis*, a demulcent, mild refrigerant and diaphoretic. Dose of fluidextract, ʒi.

boral (*bo'-ral*). See *aluminum borotartrate*.

boralide (*bo'-ral-id*). A proprietary wound-antiseptic said to contain equal parts of boric acid and acetanilide.

borate (*bo'-rāt*) [Ar., *būraq*, borax]. Any salt of boric acid.

borated (*bo'-ra-ted*). Containing or combined with borax or boric acid.

borax (*bo'-raks*) See *boron*.

borborygmus (*bor-bor-ig'-mus*) [βορβορυγμός, a rumbling: *pl.*, *borborygmi*]. A rumbling of the bowels.

Bordeaux emulsion (*bor-do*). A preparation containing lime 0.3, copper sulphate 1.6, liquid petrolatum 6.0, and water to 100.

border (*bord'-er*) [ME.]. In anatomy, the boundary of an area or surface. **b., basal, b., cuticular, b., striated.** See *layer, cuticular*. **b., bright**, the margin of a ciliated cell. **b., vermilion**, the line of union of the mucosa of the lip with the skin.

Bordet's phenomenon (*bor'-dā*) [J. *Bordet*, Belgian bacteriologist]. See *Pfeiffer's reaction*, from which it differs only in the use of a small quantity of normal serum instead of fresh peritoneal fluid. **B.'s specific test**, for human blood: it is based upon the fact that the blood-serum of an animal subcutaneously injected with the blood of another animal of a different species rapidly develops the property of agglutinating and dissolving the erythrocytes similar to those injected, but has no effect upon blood derived from any other source.

Bordier-Fraenkel's sign. See *Bell's phenomenon*.

boric (*bo'-rik*). Relating to boron; containing boron. **b. acid.** See under *boron*.

boricin (*bo'-ris-in*). A proprietary mixture of borax and boric acid used as an antiseptic.

boride (*bo'-rīd*). A compound of boron with a radical or element.

borine (*bo'-rēn*). 1. A compound of 1 atom of boron and 3 atoms or 3 molecules of a univalent

TABLE OF BONES

Name	*Principal Features*	*Articulations and Variety*	*Muscular and Ligamentous Attachments*
Anvil.	See *Incus*.		
Astragalus.	See *Talus*.		
Atlas [BNA].*	First cervical vertebra, ring-like; anterior and posterior arches and tubercles; articular surfaces.	Occipital bone—*double arthrodia*. Epistropheus, four joints—*diarthrodia rotatoria and double arthrodia*.	Longus colli (*tubercle*), rectus capitis posticus minor (*spinous process*).
Axis.	See *Epistropheus*.		
Cacaneus [BNA] (calcaneum) (os calcis).	The heel bone; irregularly cuboid; lesser process [sustentaculum tali], greater process, peroneal ridge or spine, superior groove articular surfaces.	Astragalus, Cuboid, Scaphoid, } *arthrodia*.	Tibialis posticus, tendo Achillis, plantaris, abductor pollicis, abductor minimi digiti, flexor brevis digitorum, flexor accessorius, extensor brevis digitorum.
Capitatum (os) [BNA] (os magnum).	Largest bone of carpus; occupies center of wrist; head, neck, body; short bone.	Scaphoid, Semilunar, } *enarthrodia*. Second, Third, Fourth } Metacarpal—*arthrodia*. Trapezoid, Unciform, } *arthrodia*.	Flexor brevis pollicis (part).
Carpus [BNA] (ossa carpi).	Consists of os naviculare manus, os lunatum, os triquetrum, os pisiforme, os multangulum majus, os multangulum minus, os capitatum, os hamatum. See *individual bones*.		
Clavicula [BNA] (clavicle).	Collar-bone, resembles the italic "*f*;" conoid tubercle, deltoid tubercle, oblique line.	Sternum, Scapula, Cartilage of first rib, } *arthrodia*.	Sternomastoid, trapezius, pectoralis major, deltoid, subclavius, sternohyoid, platysma.
Coccygis (os) [BNA] (coccyx).	The last bone of the vertebral column; resembles a cuckoo's beak; usually composed of four small segments: base, apex, cornua.	Sacrum—*amphiarthrodia*.	Coccygeus, gluteus maximus, extensor coccygis, sphincter ani, levator ani.
Concha nasalis inferior [BNA] (inferior turbinate bone).	Situated on the outer wall of the nasal fossa; irregular bone.	Ethmoid, Maxilla, Lacrimal, Os palatinum, } *synarthrodia*.	None.
Costæ [BNA] (ribs).	Twelve in number on each side; shaft, head, neck, tuberosity, angle (anterior and posterior), anterior or sternal extremity; first, second, tenth, eleventh and twelfth are peculiar; flat bones.	Vertebræ—*arthrodia*. Sternum, { First rib—*synarthrodia*. Others—*arthrodia*	Internal and external intercostals, scalenus anticus, medius and posticus, pectoralis minor, serratus magnus obliquus externus, transversalis, quadratus lumborum, diaphragm, latissimus dorsi, serratus posticus superior and inferior sacrolumbalis, musculus accessorius ad sacrolumbalem, longissimus dorsi, cervicalis ascendens, levatores costarum, infracostales.
Coxæ (os) [BNA] (innominate bone, os innominatum).	Large, 3 parts; flat bone; with its fellow and sacrum and coccyx forms pelvis.	{ With its fellow of opposite side, Sacrum, Femur—*enarthrodia*. } *synarthrodia*.	
	Ilium—superior broad expanded portion, crest, superior, middle, and inferior curved lines iliopectineal line, venter, auricular surface, anterior and posterior, superior and inferior spinous processes, 5 (about) of acetabulum.		*Ilium*—tensor vaginæ femoris, external oblique, latissimus dorsi, iliacus, transversalis, quadratus lumborum, erector spinæ, internal oblique, gluteus maximus, medius, and minimus, rectus, pyriformis multifidus spinæ, sartorius.

* The abbreviation [BNA] used throughout this table indicates that the term is in accordance with the Basle anatomical nomenclature.

TABLE OF BONES.—(*Continued*)

Name	*Principal Features*	*Articulations and Variety*	*Muscular and Ligamentous Attachments*
	Ischium—lower and back portion body, tuberosity and ramus, spine, greater and lesser sacrosciatic notches external and internal lips of tuberosity, lower boundary of obturator foramen $\frac{2}{5}$ (about) of acetabulum		*Ischium*—obturator externus and internus, gracilis, levator ani, gemelli superior and inferior coccygeus, biceps semitendinosus, semimembranosus, quadratus femoris, adductor magnus, transversus perinei, erector penis.
Coxæ (*continued*).	*Pubis*—body, horizontal ramus, descending ramus, spine, iliopectineal line, angle, symphysis obturator foramen (upper boundary), $\frac{1}{5}$ of acetabulum		*Pubis*—internal and external oblique, transversalis, rectus, pyramidalis psoas parvus, pectineus adductor magnus, longus, and brevis gracilis, external and internal obturator levator ani compressor urethræ, accelerator urinæ
Cranium [BNA].	Occipital, parietal (two), frontal, temporal (two), sphenoid ethmoid. See *individual bones*		
Cuboideum (os) [BNA] (cuboid)	Somewhat pyramidal, tuberosity	Os calcis, External cuneiform, Fourth and fifth metatarsal bones, — *arthrodia*	Flexor brevis pollicis
Cuneiform (of carpus)	See *Triquetrum (os)*		
Cuneiforme (os) primum [BNA] (internal cuneiform)	Irregularly wedge-shaped, the largest of the three	Os naviculare pedis Cuneiforme secundum, First and second metatarsal bones, — *arthrodia*	Tibialis anticus and posticus.
Cuneiforme (os) secundum [BNA] (middle cuneiform)	Wedge-shaped, smallest of the three.	Os naviculare pedis, Cuneiforme primum, Cuneiforme tertium, Second metatarsal, — *arthrodia*	Tibialis posticus
Cuneiforme (os) tertium [BNA] (external cuneiform)	Wedge-shaped	Os naviculare pedis, Cuneiforme secundum Os cuboideum, Second third, and fourth metatarsal bones — *arthrodia*	Tibialis posticus, flexor brevis pollicis
Epistropheus [BNA] (axis)	Second cervical vertebra, body odontoid process pedicles, laminæ, spinous process, transverse processes, articular surfaces	First cervical vertebra—*diarthrodia rotatoria and double arthrodia* Third cervical vertebra—*double arthrodia*	Longus colli, check ligaments
Ethmoidale (os) [BNA] (ethmoid).	Irregularly cubic, situated at anterior part of base of skull, horizontal or cribriform plate perpendicular plate two lateral masses, crista galli	Os sphenoidale Two sphenoid—turbinated, Frontal, Two nasal, Two maxillary, Two lacrimal, Ossa palatinum, Conchæ nasalis inferior, Vomer — *synarthrodia*	None
Femur [BNA].	Cylindrical, longest, largest, and strongest bone in the body, shaft and two extremities head, neck, greater and lesser trochanters, linea aspera, condyles, a long bone.	Os coxæ—*enarthrodia* Tibia—*ginglymus* Patella—*arthrodia*	Gluteus medius, gluteus minimus pyriformis, obturator internus, obturator externus, gemellus superior, gemellus inferior, quadratus femoris, psoas magnus, iliacus vastus externus, gluteus maximus, short head of the biceps, vastus internus, adductor magnus, pectineus, adductor brevis, adductor longus, crureus, subcrureus, gastrocnemius, plantaris, popliteus.

TABLE OF BONES.—(*Continued*)

Name	*Principal Features*	*Articulations and Variety*	*Muscular and Ligamentous Attachments*
Fibula [BNA].	Long bone; shaft, upper extremity or head, lower extremity or external malleolus.	Tibia—*arthrodia*. Talus, with the tibia and fibula—*ginglymus*.	Biceps, soleus, peroneus longus, extensor longus digitorum, peroneus tertius, extensor proprius pollicis, tibialis posticus, flexor longus pollicis, peroneus brevis.
Foot.	Composed of tarsus metatarsus and phalanges (*q. v.*).		
Frontale (os) [BNA] (frontal)	The forehead bone; a flat bone, a frontal portion and an orbitonasal portion, frontal eminences, superciliary ridges, supraorbital arches, supraorbital notches or foramina internal and external angular processes, temporal ridges, nasal notch, nasal spine, nasal eminence or glabella	Two parietal, Sphenoid, Ethmoid, Two nasal, Two maxillary, Two lacrimal, Ossa zygomatica, } *synarthrodia*	Corrugator supercilii, orbicularis palpebrarum, and temporal on each side
Hamatum (os) [BNA] (unciform).	Wedge-shaped, hook-like process, in lower row of carpus, short bone	Os lunatum, Fourth and fifth metacarpal, Os triquetrum, Os capitatum, } *arthrodia*	Flexor brevis minimi digiti flexor ossis metacarpi minimi digiti, anterior annular ligament
Hand.	Composed of carpus metacarpus, and phalanges (*q. v.*).		
Humerus [BNA]	Largest bone of upper extremity, long bone, a shaft and two extremities. Upper extremity presents a head neck and greater and lesser tuberosities Lower extremity, trochlea olecranon fossa, coronoid fossa external and internal condyles, supratrochlear foramen, supracondyloid ridges	Scapula (glenoid cavity)—*enarthrodia* Ulna, Radius, } *ginglymus*	Supraspinatus, infraspinatus, teres minor, subscapularis, pectoralis major, latissimus dorsi, deltoid coracobrachialis, brachialis anticus, triceps, subanconeus, pronator radii teres, flexor carpi radialis, palmaris longus, flexor digitorum sublimis, flexor carpi ulnaris, supinator longus, extensor carpi radialis longior, extensor carpi radialis brevior, extensor communis digitorum, extensor minimi digiti, extensor carpi ulnaris, supinator brevis, and anconeus
Hyoideum (os) [BNA] (hyoid)	A bony arch, irregular bone, a body, two greater and two lesser cornua	None	Sternohyoid, thyrohyoid, omohyoid, digastricus, stylohyoid, mylohyoid, geniohyoid, geniohyoglossus, hyoglossus, middle constrictor of the pharynx
Ilium (os) [BNA] (ilium).	See *Coxæ (os)*		
Incus [BNA] (anvil).	Resembles a bicuspid tooth with two roots body, and two processes The largest bone in the ear	Malleus—*arthrodia* (*trigger-joint*) Stapes—*arthrodia*	None
Inferior maxillary	See *Mandibula*		
Inferior turbinated	See *Concha nasalis inferior*		
Innominate	See *Coxæ (os)*		
Ischii (os) [BNA] (ischium).	See *Coxæ (os)*		
Lacrimale (os) [BNA] (lacrimal).	Small, situated at front part of inner wall of orbit, resembles finger nail, crest lacrimal groove, flat bone	Frontal, Ethmoid, Superior maxillary, Inferior turbinated, } *synarthrodia*	Tensor tarsi
Lingual.	See *Hyoideum (os)*.		
Lunatum (os) [BNA] (semilunar).	Upper row of carpus, four surfaces, crescentic outline.	Radius—*condyloid*. Os capitatum, Os hamatum, Os triquetrum, Os naviculare manus, } *arthrodia*	
Magnum (os).	See *Capitatum (os)*.		
Malar	See *Zygomaticum (os)*.		

TABLE OF BONES —(*Continued*)

Name	*Principal Features*	*Articulations and Variety*	*Muscular and Ligamentous Attachments*
Malleus	Resembles a hammer, head neck, handle or manubrium processus gracilis, processus brevis, irregular The second largest bone of the ear	Incus—*arthrodia* (*trigger-joint*)	Tensor tympani
Mandibula [BNA] (inferior maxillary, mandible)	Body and two rami, contains the teeth of the lower jaw, symphysis mental process mental foramen, coronoid and condyloid process, head neck sigmoid notch, irregular bone	The two temporal bones—*bilateral condyloid*—*diarthrodia*	Levator menti, depressor labii inferioris, depressor anguli oris, platysma myoides buccinator, masseter orbicularis oris, geniohyoglossus, geniohyoideus, mylohyoideus, digastric, superior constrictor, temporal internal pterygoid, external pterygoid
Maxilla [BNA] (superior maxillary).	Forms with its fellow the whole of the upper jaw, somewhat cuboidal, body and malar, nasal alveolar and palatine processes, hollow (the antrum of Highmore or maxillary sinus), incisive or myrtiform fossa canine fossa, canine eminence, infraorbital foramen, posterior dental canals maxillary tuberosity, posterior palatine canal, infraorbital groove, irregular bone	Frontal Ethmoid, Nasal, Os zygomaticum, Lacrimal, Concha nasalis inferior, Palate, Vomer Fellow of opposite side, } *synarthrodia*	Orbicularis palpebrarum obliquus inferior oculi, levator labii superioris alæque nasi, levator labii superioris proprius, levator anguli oris, compressor nasi depressor alæ nasi dilator naris posterior masseter, buccinator, internal pterygoid orbicularis oris
Metacarpalia (ossa) [BNA] (metacarpal)	Five in number, shaft base and head, long bones	Second row of carpus—*arthrodia* Phalanges—*condyloid*	To the *thumb*—flexor and extensor ossis metacarpi pollicis first dorsal interosseous *Second metacarpal bone*—flexor carpi radialis extensor carpi radialis longior first and second dorsal interosseous first palmar interosseous flexor brevis pollicis (frequently) *Third metacarpal*—extensor carpi radialis brevior flexor brevis pollicis adductor pollicis second and third dorsal interosseous *Fourth metacarpal*—third and fourth dorsal and second palmar interosseous *Fifth metacarpal*—extensor carpi ulnaris flexor carpi ulnaris flexor ossis metacarpi minimi digiti, fourth dorsal and third palmar interosseous
Metatarsalia (ossa) [BNA] (metatarsal).	Five in number shaft base, and head, long bones.	Tarsus—*arthrodia* Phalanges—*condyloid*	*First*—tibialis anticus (part), peroneus longus first dorsal interosseous *Second*—adductor pollicis first and second dorsal interosseous tibialis posticus (part) *Third*—adductor pollicis second and third dorsal and first plantar interosseous tibialis posticus (part) *Fourth*—adductor pollicis, third and fourth dorsal and second plantar interosseous, tibialis posticus (part) *Fifth*—peroneus brevis, peroneus tertius, flexor brevis minimi digiti, transversus pedis, fourth dorsal, and third plantar interosseous
Multangulum majus [BNA] (trapezium)	In lower row of carpus, very irregular, six surfaces, groove, short bone	Os naviculare manus, Multangulum minus, First and second metacarpal, } *arthrodia*	Adductor pollicis, flexor ossis metacarpi pollicis, flexor brevis pollicis (part)

TABLE OF BONES.—(*Continued*)

Name	*Principal Features*	*Articulations and Variety*	*Muscular and Ligamentous Attachments*
Multangulum minus [BNA] (trapezoid).	Smallest bone in second row of carpus; wedge-shaped; six surfaces; short bone.	Os naviculare manus, Second metacarpal, Multangulum majus, Os capitatum, — *arthrodia.*	Flexor brevis pollicis (part).
Nasale (os) [BNA] (nasal).	Oblong; forms with its fellow the bridge of the nose; nasal foramen, spine, crest; flat bone.	Frontal, Ethmoid, Nasal (opposite). Maxillary, — *synarthrodia.*	
Naviculare (os) manus [BNA] (scaphoid of wrist).	Largest bone of first row; boat-shaped; upper and outer part of carpus; four surfaces; tubercle; short bone.	Radius—*condyloid.* Multangulum majus, Multangulum minus. Os capitatum, Os lunatum, — *arthrodia.*	External lateral ligament of wrist.
Naviculare (os) pedis [BNA] (scaphoid of ankle).	Or navicular bone; boat-shaped; inner side of tarsus, four surfaces, tuberosity; short bone.	Talus, Cuneiform (three), Cuboid (occasionally), — *arthrodia.*	Tibialis posticus (part).
Occipitale (os) [BNA] (occipital).	Back part and base of cranium; trapezoid in shape; outer and inner tables external protuberance, external occipital crest, superior and inferior curved lines, foramen magnum, condyles, jugular process, anterior and posterior condyloid foramina, basilar process, pharyngeal spine, 4 sfossæ on internal surface, internal occipital protuberance and crest, grooves for the cerebral sinuses, torcular herophili, jugular foramen; flat bone.	Parietal (two), Temporal (two), Sphenoid, — *synarthrodia.* Atlas—*double arthrodia.*	Twelve pairs—occipitofrontalis, trapezius, sternomastoid, complexus, biventer cervicis, splenius capitis, superior oblique, rectus capitis posticus, major and minor, rectus lateralis, rectus capitis anticus, major and minor, superior constrictor of the pharynx.
Palatinum (os) [BNA] (palate).	Back part of nasal fossa; helps to form floor and outer wall of nose, the roof of mouth and floor of orbit, also sphenomaxillary and pterygoid fossæ and the sphenomaxillary fissure, L-shaped; inferior or horizontal plate, superior or vertical plate, posterior palatine canal, posterior spine, inferior and superior turbinated crests, maxillary process, pterygoid process, accessory descending palatine canals, orbital process, sphenoid process, sphenopalatine foramen.	Sphenoid, Ethmoid, Maxillary, Concha nasalis inferior, Vomer, Opposite palate, — *synarthrodia.*	Tensor palati, azygos uvulæ, internal and external pterygoid, superior constrictor of pharynx.
Parietale (os) [BNA] (parietal).	Form sides and roof of skull; irregular, quadrilateral, two surfaces, four borders, four angles, parietal eminence, temporal ridge, parietal foramen, furrows for cerebral sinuses, depressions for Pacchionian bodies; flat bone.	Opposite parietal, Occipital, Frontal, Temporal, Sphenoid, — *synarthrodia*	Temporal
Patella [BNA].	Flat; triangular sesamoid; anterior part of knee-joint; two surfaces, three borders, apex; flat bone.	Condyles of femur—*partly arthrodial.*	Rectus, crureus, vastus internus, vastus externus.
Pelvis	Composed of two ossa coxæ, os sacrum, and os coccygis (*q. v.*).		

TABLE OF BONES.—(*Continued*)

Name	*Principal Features*	*Articulations and Variety*	*Muscular and Ligamentous Attachments*
Phalanges digitorum pedis [BNA] (phalanges of foot).	Two of great toe, three of each of the others, shaft, base, head, long bones.	First row with metatarsal and second phalanges—*condyloid* Second of great toe with first phalanx; of other toes, with first and third phalanges, } *ginglymus* Third row with second row, } *ginglymus*	*First—great toe*—inner tendon extensor brevis digitorum, abductor pollicis, adductor pollicis, flexor brevis pollicis, transversus pedis. *Second toe*—first and second dorsal interosseous, first lumbrical. *Third toe*—third dorsal and first plantar interosseous, second lumbrical *Fourth toe*—fourth dorsal and second plantar interosseous, third lumbrical. *Fifth toe*—flexor brevis minimi digiti, abductor minimi digiti, third plantar interosseous, fourth lumbrical. *Second—great toe*—extensor longus pollicis, flexor longus pollicis. *Other toes*—flexor brevis digitorum, one slip of common tendon of extensor longus and brevis digitorum *Third*—two slips from the common tendon of the extensor longus and extensor brevis digitorum, and flexor longus digitorum.
Phalanges digitorum manus [BNA] (phalanges of hand)	Fourteen in number, three for each finger and two for thumb, shaft, head, base, long bones.	First row with metacarpal bones and second row of phalanges—*condyloid* Second row with first and third rows, } *ginglymus* Third row with second row, } *ginglymus*	*Thumb*—extensor primi internodii pollicis, flexor brevis pollicis abductor pollicis, adductor pollicis, flexor longus pollicis extensor secundi internodii. *First—index-finger*—first dorsal and first palmar interosseous. *Middle finger*—second and third dorsal interosseous *Ring finger*—fourth dorsal and second palmar interosseous. *Little finger*—third palmar interosseous flexor brevis minimi digiti, abductor minimi digiti *Second—to all*—flexor sublimis digitorum and extensor communis digitorum, in addition *To index-finger*—extensor indicis. *To little finger*—extensor minimi digiti *Third*—flexor profundus digitorum, extensor communis digitorum
Pisiforme (os) [BNA] (pisiform).	Anterior and inner side of carpus, small; spherical, one articular facet; short bone	Os triquetrum—*arthrodia*	Flexor carpi ulnaris, abductor minimi digiti, anterior annular ligament
Pubis.	See *Coxæ* (*os*).		
Pyramidale (os).	See *Triquetrum* (*os*).		
Radius [BNA].	Outer side of forearm, shaft, head, neck, tuberosity, lower extremity oblique line, sigmoid cavity, styloid process	Humerus—*ginglymus* Ulna, superior—*diarthrodia rotatoria* Ulna, middle—*membranous.* Ulna, inferior—*diarthrodia rotatoria* Os lunatum—*condyloid*	Biceps supinator brevis, flexor sublimis digitorum, flexor longus pollicis, pronator quadratus, extensor ossis metacarpi pollicis, extensor primi internodii pollicis, pronator radii teres, supinator longus.
Ribs	See *Costæ*.		

TABLE OF BONES —(*Continued*)

Name	*Principal Features*	*Articulations and Variety*	*Muscular and Ligamentous Attachments*
Sacrum (os) [BNA].	Large triangular bone at lower part of vertebral column and upper and back part of pelvic cavity, composed of five vertebræ, base, promontory, four surfaces, apex central canal, anterior and posterior sacral foramina, lateral masses, laminæ, articular processes, sacral cornua transverse processes, sacral groove, ala, irregular bone	Last lumbar vertebra, Coccyx, Ossa coxæ (two), } *amphiarthrodia*	Pyriformis, coccygeus, iliacus, gluteus maximus, latissimus dorsi, multifidus spinæ, erector spinæ, extensor coccygis.
Scaphoid of carpus.	See *Navicular* (*os*) *manus*		
Scaphoid of tarsus.	See *Navicular* (*os*) *pedis*		
Scapula [BNA].	Back part of shoulder, triangular; posterior aspect and side of thorax, two surfaces, three borders, three angles, subscapular fossa, subscapular angle, dorsum spine supraspinous and infraspinous fossæ, acromion process glenoid cavity, neck, head, coracoid process, flat bone	Humerus—*enarthrodia*. Clavicle—*arthrodia*	Subscapularis, supraspinatus, infraspinatus, trapezius, deltoid, omohyoid, serratus magnus, levator anguli scapulæ, rhomboideus major and minor, triceps, teres major and minor, biceps, coracobrachialis, pectoralis minor, platysma, latissimus dorsi
Semilunar.	See *Lunatum* (*os*)		
Sesamoid [BNA]	Small, rounded masses, cartilaginous in early life osseous in the adult, developed in tendons, inconstant, except patellæ		
Sphenoidale (os) [BNA] (sphenoid)	Anterior part of base of skull, bat-shaped, with wings extended, body two greater and two lesser wings, two pterygoid processes, ethmoid spine, optic groove, optic foramen, olivary process, pituitary fossa anterior, middle, and posterior clinoid processes, sella turcica, carotid or cavernous groove lingula, ethmoid crest, sphenoid cells or sinuses, sphenoid turbinated bones, rostrum, vaginal processes, pterygopalatine canal, spinous processes, round foramen, oval foramen foramen Vesalii, foramen spinosum pterygoid ridge, external orbital foramens Vidian canal, pterygoid fossa, internal and external pterygoid plates, hamular process, scaphoid fossa.	All the bones of cranium, Malar (two), Palate (two), Vomer } *synarthrodia*.	Temporal, external and internal pterygoids, superior constrictor, tensor palati, levator tympani, levator palpebræ, obliquus superior, superior, inferior, internal and external recti.
Sphenoid turbinated or sphenoid spongy bones.	Situated at anterior and inferior part of body of sphenoid, exist as separate pieces until puberty and occasionally are not joined in the adult	Ethmoid, Palate, } *synarthrodia*	None
Stapes [BNA]	Resembles a stirrup, one of the ossicles of the tympanum, head, neck, two branches (crura) base; irregular bone.	Incus—*arthrodia*.	Stapedius

TABLE OF BONES.—(*Continued*)

Name	*Principal Features*	*Articulations and Variety*	*Muscular and Ligamentous Attachments*
Sternum [BNA].	The breast-bone, manubrium, gladiolus, ensiform cartilage, or first, second, and third pieces, anterior and posterior surface, borders	Clavicles (two)—*arthrodia* Costal cartilages (seven on each side) first—*synarthrodia*, others, *arthrodia*.	Pectoralis major, sternomastoid, sternohyoid, sternothyroid, triangularis sterni, aponeuroses of the obliquus externus and internus and transversalis muscles rectus, diaphragm.
Superior maxillary.	See *Maxilla*.		
Talus [BNA] (astragalus).	Irregularly cubic; forms the keystone of arch of foot, head, neck six articular surfaces	Tibia, Fibula, } *ginglymus*. Calcaneus, Os naviculare pedis, } *arthrodia*	Internal and external lateral ligaments
Tarsus [BNA] (ankle).	Consist of calcaneus, or os calcis, talus, cuboid, navicular, internal, middle, and external cuneiform See *individual bones*		
Temporale (os) [BNA] (temporal)	Situated at side and base of skull, squamous, mastoid and petrous portions, temporal ridge, zygoma or zygomatic process, eminentia articularis, glaserian fissure tubercle, glenoid fossa postglenoid process, tympanic plate, mastoid foramen, digastric fossa, occipital groove, sigmoid fossa, mastoid cells, meatus auditorius externus hiatus Fallopii, meatus auditorius internus, lamina cribrosa, aquæductus vestibuli, styloid process, stylomastoid foramen, auricular fissure, irregular bone.	Occipital, Parietal, Sphenoid, Inferior maxillary, Malar, } *synarthrodia*	Temporal, masseter, occipitofrontalis, sternomastoid, splenius capitis, trachelomastoid, digastricus, retrahens aurem, stylopharyngeus, stylohyoideus, styloglossus, levator palati, tensor tympani, tensor palati, stapedius.
Tibia [BNA]	At front and inner side of leg, next to femur in length and size; prismoid in form, upper extremity or head, tuberosities, spinous process, tubercle, popliteal notch, shaft, crest (the shin), oblique line, internal malleolus; long bone.	Femur—*ginglymus* Fibula, superior—*arthrodia*. middle—*membranous* inferior—*arthrodia*. Talus with fibula—*ginglymus*	Semimembranosus, tibialis anticus, extensor longus digitorum, biceps, sartorius, gracilis, semitendinosus, tibialis anticus popliteus, soleus flexor longus digitorum, tibialis posticus, ligamentum patellæ.
Trapezium.	See *Multangulum majus*.		
Trapezoid.	See *Multangulum minus*.		
Triquetral.	See *Wormian*		
Triquetrum (os) [BNA] (cuneiform of carpus)	Pyramidal	Os lunatum, Pisiform, Os hamatum, Interarticular fibrocartilage, } *arthrodia*.	
Turbinate, inferior	See *Concha nasalis inferior*		
Turbinate, middle.	The free convoluted margin of the thin lamella that descends from the under surface of the cribriform plate of the ethmoid bone.		
Turbinate, superior.	The thin curved plate of the ethmoid that bounds the superior meatus of the nose above.		
Tympanic.	Includes the *incus*, *malleus*, and *stapes* (*q v*).		

TABLE OF BONES —(*Continued*)

Name	*Principal Features*	*Articulations and Varsety*	*Muscular and Ligamentous Attachments*
Ulna [BNA].	Inner side of forearm, parallel with radius, prismatic, shaft and two extremities, olecranon process coronoid process, greater and lesser sigmoid cavities oblique ridge perpendicular line head or lower extremity, styloid process, long bone	Humerus—*ginglymus* Radius, superior—*diarthrodia rotatoria* middle—*membranous* inferior—*diarthrodia rotatoria*	Triceps, anconeus flexor carpi ulnaris, brachialis anticus, pronator radii teres, flexor sublimis digitorum, flexor profundus digitorum, flexor longus pollicis (occasionally), pronator quadratus, supinator brevis extensor ossis metacarpi pollicis, extensor secundi internodii pollicis, extensor indicis, extensor carpi ulnaris
Unciform	See *Hamatum* (*os*)		
Vertebra [BNA]	Twenty-six, cervical seven, dorsal twelve, lumbar five sacrum (composed of five), coccyx (composed of four), each has a body and an arch, latter has two pedicles, two laminæ, and seven processes viz four articular, two transverse, one spinous) Peculiar vertebræ first, second and seventh cervical, first, ninth, tenth, eleventh and twelfth dorsal sacrum coccyx, irregular bones	Articulate with each other, and with occipital and innominate bones and ribs (♀ ♀). Intervertebral articulations, between the bodies—*amphiarthrodia* Between articular processes—*arthrodia*	Attachment of muscles —*To the atlas* are attached nine pairs the longus colli, rectus anticus minor, rectus lateralis, rectus posticus minor, obliquus superior and inferior, splenius colli levator anguli scapulæ and first intertransverse. *To the axis* are attached eleven pairs the longus colli, obliquus inferior, rectus posticus major, semispinalis colli, multifidus spinæ levator angulıscapulæ splenius colli, scalenus medius transversalis colli, intertransversales, interspinales *To the remaining vertebræ* generally are attached thirty-five pairs and a single muscle anteriorly, the rectus anticus major, longus colli, scalenus anticus, medius, and posticus, psoas magnus psoas parvus, quadratus lumborum diaphragm, obliquus internus and transversalis, posteriorly, the trapezius, latissimus dorsi, levator anguli scapulæ, rhomboideus major and minor serratus posticus superior and inferior, splenius, erector spinæ, sacrolumbalis, longissimus dorsi spinalis dorsi, cervicalis ascendens, transversalis colli, trachelomastoid complexus, biventer cervicis, semispinalis dorsi and colli, multifidus spinæ, rotatores spinæ interspinales, supraspinales, intertransversales levatores costarum.
Vomer [BNA].	Situated vertically at back part of nasal fossæ, forms part of septum of nose, somewhat like a plowshare, two surfaces and four borders	Sphenoid, Ethmoid, Superior maxillary (two), Palate (two), Cartilage of the septum — *synarthrodia.*	
Wormian.	Supernumerary bones, irregular, inconstant, isolated, interposed between the cranial bones most frequently in the lambdoid suture		
Zygomaticum (os) [BNA] (os malæ, the malar or cheek bone).	Small, quadrangular, at upper and outer part of face, forms prominence of cheek, part of outer wall and floor of orbit, part of temporal and zygomatic fossæ, frontal, orbital, maxillary and zygomatic processes, malar foramen, four borders, irregular bone.	Frontal, Sphenoid, Temporal, Maxillary. — *synarthrodia.*	Levator labii superioris proprius, zygomaticus major and minor, masseter, temporal.

radical. 2. A proprietary antiseptic said to contain boric acid and aromatic stearoptens.

borism (*bo'-rizm*). Boric acid or borax poisoning.

Borna disease (*bor'-nah*). Encephalomyelitis in sheep, cattle, and horses.

borneene (*bor'-ne-ēn*). $C_{10}H_{16}$. A peculiar volatile oil, the chief constituent of oil of camphor. It is isomeric with oil of turpentine and holds in solution borneol and rosin.

Borneo camphor (*bor'-ne-o-kam'-for*). See *borneol.*

borneol (*bor'-ne-ol*) [*Borneo*], $C_{10}H_{18}O$. Borneo camphor; a substance that occurs in *Dryobalanops camphora*, a tree growing in Borneo and Sumatra. It is artificially prepared by treating the alcoholic solution of common camphor with sodium.

borneyl (*bor'-ne-il*), $C_{10}H_{17}$. The radical of borneol.

bornyval (*bor'-ne-val*). Isovalerate of borneol; an aromatic liquid used as a nerve sedative and antispasmodic. Dose 6 minims.

boroborax (*bo-ro-bo'-raks*). A crystalline combination of borax and boric acid. It is used as an antiseptic.

borocaine (*bo'-ro-kān*). Procaine borate, used as a local anesthetic.

borocalcite (*bo-ro-kal'-sīt*). Native calcium borate.

borocarbide (*bo-ro-kar'-bid*). A compound of borax and carbon.

borochloretone (*bo-ro-klor'-et-ōn*). A combination of boric acid and chloretone; used as an antiseptic dusting powder.

borocitrate (*bo-ro-sit'-rāt*). A compound of both citric and boric acid with an element or radical.

borofax (*bo'-ro-fax*). Trade name of an emollient and sedative preparation containing boric acid.

borofluorin (*bo-ro-flu'-or-in*). A proprietary antiseptic and germicide said to contain boric acid, sodium fluoride, benzoic acid, and formaldehyde.

boroform (*bo'-ro-form*). A condensation product of boroglycerin and formaldehyde, used as an antiseptic.

boroformal, boroformalin (*bo-ro-form'-al, bo-ro-form'-al-in*). A trade antiseptic said to consist of borosalicylic glycerol, benzoresorcinol, menthol, thymol, eucalyptol, and formalin.

borogen (*bo'-ro-jen*). Boric-acid ethyl ester. It is used by inhalation in diseases of the air-passages.

boroglyceride (*bo-ro-glis'-er-īd*). See *boroglycerin.*

boroglycerin (*bo-ro-glis'-er-in*). A mixture of boric acid with glycerol. **b., glycerite of** (*glycerinum boroglycerini*, U. S. P.), boroglycerin dissolved in glycerol by heating. Syn., *solution of boroglycerin.*

boroglycerol (*bo-ro-glis'-er-ol*). Boroglycerin.

borol (*bo'-rol*). Borosulphate of sodium or potassium.

borolyptol (*bo-ro-lip'-tol*). A proprietary internal and external antiseptic said to contain acetoboroglyceride, formaldehyde and the antiseptic constituents of *Pinus pumilio*, eucalyptus, myrrh, storax, and benzoin.

boron (*bo'-ron*) [Ar., *būraq*, borax]. B = 11; quantivalence III, V. A nonmetallic element occurring in two allotropic forms—as a powder and as a crystalline substance. It is the base of boric acid and of the mineral borax. *Boracic* or, more properly, *boric acid*, H_3BO_3, is a crystalline substance, found native in the volcanic lagoons of Tuscany. It occurs in white, transparent crystals, soluble in water and alcohol; it is antiseptic. Dose 5–20 gr. (0.32–1.3 Gm.). *Unguentum acidi borici* (U. S. P., B. P.) contains hard paraffin, 2; soft paraffin, 4; boric acid, 1; it is used as an antiseptic and in dermatology. *Borax*, $Na_2B_4O_7 + 10H_2O$, sodium borate (more correctly, disodic tetraborate), occurs as white, transparent crystals, soluble in water, alcohol, and glycerol; it is used as an antiseptic. Dose 5–40 gr. (0.32–2.6 Gm.). *Glycerinum boracis* (B. P.) contains borax, glycerol, and distilled water; used as a local application. *Mel boracis* (B. P.), borax honey contains borax, clarified honey, and glycerol (about 1 in 7); used as a local application.

borophenol (*bo-ro-fe'-nol*). A soluble disinfectant compound of borax and phenol.

borosalicyl, borsalyl (*bo-ro-sal'-is-il, bor'-sal-il*). Sodium borosalicylate.

borosalicylic acid (*bo-ro-sal-is-il'-ik*). An antiseptic solution containing 4 % each of boric acid and salicylic acid.

borosol (*bo'-ro-sol*). A proprietary liquid used as a wash for perspiring feet and said to contain aluminum tartrate, boric and salicylic acids, glycerin, and free tartaric acid.

borotartrate (*bo-ro-tar'-trāt*). A combination of boric and tartaric acids with a base.

borotartrol (*bo-ro-tar'-trol*). A mixture of neutral sodium tartrate and boric acid.

borovertin (*bor-o-ver'-tin*). Trade name of hexamine triborate.

borsal (*bor'-sal*). A powder consisting of equal parts of boric acid and salicylic acid, used as an antiseptic dressing for wounds.

Borsch's bandage (*borsh*). A bandage specially arranged to cover one eye only. See page 193.

Borsieri's line (*bor-se-a'-re*). In the early stage of scarlatina, a line drawn on the skin with the finger-nail leaves a white mark which quickly turns red and becomes smaller in size.

borsyl (*bor'-sil*). A proprietary dusting-powder for perspiring feet, said to consist of borax, boric acid, talcum, and spermaceti.

Borthen's operation (*bor'-ten*) [Johan *Borthen*, Norwegian ophthalmologist]. Iridotasis.

boss (*bos*) [ME., *boce*]. A wide, more or less circular protuberance, as on the skull or on a tumor. **b., parietal.** See *eminence, parietal.* **b., Pott's.** See *Pott's curvature.* **b., sanguineous.** 1 A swelling due to a contusion and containing extravasated blood. 2. See *caput succedaneum.*

bossed (*bosd*). Having a prominent center on a circular flat surface.

bosselated (*bos'-el-a-ted*) [*boss*]. Covered with bosses or small nodules.

Bossi's dilator (*bos'-se*) [Luigi Maria *Bossi*, Italian obstetrician –1919]. A steel dilator for rapid dilatation of the parturient cervix uteri; it has three or four blunt points which can be separated.

Bostock's catarrh (*bos'-tok*) [John *Bostock*, English physician, 1773–1846]. Hay-fever.

Boston's reaction for Bence-Jones' albumose. It depends upon the presence in the albumose of loosely combined sulphur: (1) 15 to 20 Cc. of filtered urine are placed in a test-tube and to it an equal quantity of saturated solution of sodium chloride is added, and the whole shaken; (2) 2 or 3 Cc. of a 30 % solution of caustic soda are now added and shaken vigorously; (3) the upper one-fourth of the column of liquid is gradually heated over the flame of a Bunsen burner to the boiling-point, whereupon a solution of lead acetate (10 %) is added, drop by drop, boiling the upper previously heated stratum of liquid after each additional drop;

(4) when the drop of lead acetate comes in contact with the liquid, a copious pearly or cream-colored cloud appears at the surface, which becomes less dense as the boiling-point is reached; and when boiling is prolonged for one-half to one minute, the upper stratum shows a slight browning, which deepens to a dull black. This lessens in intensity toward the bottom of the tube. After standing the reaction becomes intensified, and a black precipitate falls through the clear liquid and collects at the bottom of the tube.

Boston's sign [Leonard Napoleon *Boston*, American physician, 1871–]. In exophthalmic goiter: (1) Arrest of the descending eyelid, (2) Spasm, and (3) Continued descent as the eyeball is rotated downward, are confirmatory signs.

bostryx (*bos'-triks*) [βόστρυχος, a curl]. In biology, a helicoid cyme.

bot (*bot*) [*botus*, a belly-worm]. The larva of certain species of flies of the genus *Œstrus*, which are conveyed into the stomach of man, where they hatch. Also the threadworm, *Oxyuris vermicularis*

Botal's duct, Botallo, duct of (*bo'-tal, bo-tal'-o*) [Leonardo *Botallo*, Italian anatomist, 1530–]. Ductus arteriosus Botalli A short vessel in the fetus between the main pulmonary artery and the aorta. **B., foramen of,** the foramen ovale in the interauricular septum of the fetal heart. **B., ligament of,** the remains of Botal's duct.

botalismus (*bot-al-iz'-mus*). See *botulism.*

botanic (*bo-tan'-ik*) [βοτάνη, an herb]. Pertaining to botany. **b. physician,** a title assumed by certain persons who profess to use only vegetable remedies See *eclectic.*

botany (*bot'-an-e*) [βοτάνη, an herb]. The science of plants—their classification and structure.

bothrenchyma (*both-ren'-ke-mah*) [βοθρίον, a pit; ἐγχέειν, to pour in] Pitted tissue.

bothria (*both'-re-ah*) [L.]. Plural of *bothrion*, or of *bothrium.*

Bothriocephalus (*both-re-o-sef'-al-us*) [*bothrion*; κεφαλή, a head]. A genus of tape-worms. **B. latus,** the fish tape-worm, a common parasite of man in certain European localities. It may reach 25 feet in length, with a breadth of three-fourths of an inch Syn., *Dibothrium latum; Tænia lata.*

bothrioid (*both'-re-oid*) [*bothrion*; εἶδος, likeness]. Pitted; foveolated; covered with pit-like markings.

bothrion (*both'-re-on*) [βοθρίον, a pit]. 1. A small cavity; the socket of a tooth. 2. A facet, or fosset, such as is seen upon the head of most of the tape-worms. 3. A deep corneal ulcer.

bothrium (*both'-re-um*). See *bothrion.*

botyroid (*bot'-re-oid*) [βότρυς, a bunch of grapes; εἶδος, likeness]. Resembling in shape a bunch of grapes.

Botyromyces (*bot-re-o-mi'-sēz*) [βότρυς, a bunch of grapes; μύκης, a fungus; pl., *botryomycetes*]. A general term for those fungi which occur in grape-like clusters. **B. equi,** the specific microorganisms of botriomycosis.

botryomycoma (*bot-re-o-mi-ko'-mah*) [βότρυς, a bunch of grapes; μύκης, a fungus]. A tumor occurring in animals or persons affected with botryomycosis.

botryomycosis (*bot-re-o-mi-ko'-sis*) [see *Botryomyces*]. A disease of horses in which fibromatous nodules form in the lungs. It is supposed to be caused by a microorganism called *Botryomyces;* it is communicable to man.

botryomycotic (*bot-re-o-mi-kot'-ik*) Relating to or affected with botryomycosis.

botryophyma (*bot-re-o-fi'-mah*) [βότρυς, a bunch of grapes; φῦμα, a growth]. A vascular, fungus-like growth from the skin. **b. cæruleum,** a form having a blue coloration. **b. rubrum,** a form having a red color.

botryotherapy (*bot-re-o-ther'-a-pe*) [βότρυς, a bunch of grapes, θεραπεύειν, to heal] The grape-cure; treatment by an almost exclusive diet of grapes.

Botrytis (*bot-ri'-tis*) [βότρυς, a bunch of grapes]. A genus of fungi. **B. bassiane,** a mold causing muscardine, a disease of silkworms.

Böttcher's cells, B.'s crystals. See under *Boettcher.*

Böttger's test. See *Boettger's test.*

Bottini's operation (*bot-te'-ne*) [Enrico *Bottini*, Italian surgeon, 1837–1903]. See under *operations.*

bottle (*bot'-l*) [ME., *botel*; Fr., *bouteille*]. A vessel usually of glass, with a narrow neck. **b., feeding,** a flat flask with a nipple of India-rubber attached, used for feeding infants. **b. nose,** a common name for *Acne rosacea* **b., operation,** an operation for hydrocele, in which the sac is everted. **b., specific gravity,** a Florence flask graduated to contain 500–1000 gr of water, with the weight of which an equal volume of any other liquid may be compared. **b.-stoop,** in pharmacy, a block so grooved that it serves to hold a wide-mouthed bottle in an oblique position while a powder is being dispensed from it. **b.-wax,** a hard, stiff variety of wax used in sealing bottles.

botulin (*bot'-ū-lin*). See *botulismotoxin.*

botulism, botulismus (*bot'-ū-lizm, bot-ū-liz'-mus*) [*botulus*, a sausage]. Sausage-poisoning.

botulismotoxin (*bot-ū-liz-mo-toks'-in*). A toxic albumose of poisonous meat produced by *Bacillus botulinum*, van Ermengem. Syn , *botulin; botulinic acid.*

boubas (*boo'-bahs*). Yaws.

Bouchard's coefficient (*boo-shar*) [Charles Jacques *Bouchard*, French physician, 1837–1915]. The ratio existing between the amount of urea and the sum-total of the solids in the urine—approximately 50. **B.'s disease,** dilation of the stomach due to deficient function of the gastric muscular fibers. **B.'s nodosities,** enlargement of the second phalangeal joints of the fingers, associated with dilation of the stomach. **B.'s treatment of obesity,** a daily diet of 1250 Gm. of milk and 5 eggs divided into 5 meals.

Bouchardat's test (*boo-shar-dah'*) [Apollinaire *Bouchardat*, French chemist, 1806–1886]. *For alkaloids* —When potassium triiodide is added to any alkaloid in solution a brown precipitate results; this latter is soluble in alcohol.

Bouchut's method (*boo-shoo'*) [Jean Eugene *Bouchut*, French physician, 1818–1891]. Intubation. **B.'s tubes,** a variety of tubes for intubation of the larynx.

Boudin's law (*boo-dan'*) [Jean Christian Marc François Joseph *Boudin*, French physician, 1806–1867]. The poisons of malaria and tuberculosis are antagonistic. This law is not founded upon fact.

Bougard's paste (*boo-gar'*) [Jean Joseph *Bougard*, French physician, 1815–1884]. A caustic paste containing mercury bichloride, zinc chloride, arsenic, cinnabar, starch, and wheat-flour.

bougie (*boo-she'*) [Fr., "a candle"]. 1. A slender cylindric instrument made of waxed silk, catgut, etc., for introduction into the urethra or other passage, for the purpose of dilation, explora-

tion, etc. 2. A suppository. **b. à boule.** See *b., bulbous:* **b. à empreinte,** one with a waxy substance adherent to its point, by means of which an impression of the stricture may be taken. **b., armed,** a bougie with a piece of silver nitrate or other caustic attached to its extremity. **b., bellied,** a fusiform bougie. **b., bulbous,** a bougie with a bulbous tip. **b., caustic, b., cauterizant.** See *b., armed.* **b., cylindrical,** one which is circular on section. **b., elastic,** are made of same elastic material, such as India rubber. **b., emplastic.** 1. See *b. à empreinte.* 2. A flexible bougie coated with a mixture of wax, diachylon, and olive-oil. **b., exploring,** a bougie to be used as a probe. **b., filiform,** a whalebone or other bougie of very small diameter. **b., fusiform,** one with a spindle-shaped shaft. **b., Gruber's,** a bougie made of medicated gelatin, for insertion into the external ear. **b., medicated.** 1. A bougie charged with some medicament. 2. A medicated suppository. **b., rosary,** a beaded bougie used in a strictured urethra. **b., soluble,** a suppository composed of substances dissolving at body-temperature. **b., wax,** a bougie made of linen or gauze dipped in melted wax. **b., whip-,** one with filiform end gradually increasing in thickness.

bouginage (*boo-she-nahzh'*). Dilatation with a bougie.

bouhou (*boo-hoo'*). See *boohoo.*

Bouillaud's disease (*boo-e-yo'*) [Jean Baptiste *Bouillaud,* French physician, 1796–1881]. Infective endocarditis. **B.'s metallic tinkling,** a peculiar clink sometimes heard to the right of the apex-beat in cardiac hypertrophy.

bouillon (*boo-e-yon(g)*) [Fr.]. 1. A broth made by boiling meat, usually beef, in water. 2. A liquid nutritive medium for the culture of microorganisms, prepared from finely chopped beef or beef-extract.

Bouilly's operation (*boo-ye'*) [Georges *Bouilly,* French surgeon –1848]. Removal of *part* of the mucous membrane of the cervix uteri; a piece is left on each side to avoid subsequent atresia.

boulimia (*boo-lim'-e-ah*). See *bulimia.*

Boulton's solution. A compound tincture of iodine, phenol, glycerol, and distilled water; it is used for spraying in rhinitis.

bouquet (*boo-ka'*) [Fr.]. 1. In anatomy, a cluster of nerves, blood-vessels, or muscles. 2. The delicate perfume and flavor of good wine. 3. The odor characteristic of a disease.

Bourdin's paste (*boor-dan'*) [Claude Etienne *Bourdin,* French physician, 1815–]. An escharotic mixture of nitric acid with flowers of sulphur.

bourdonet (*boor-don-a'*). An ovoid mass of lint.

bourdonnement (*boor-dun-mon(g)*) [Fr., *bourdonner,* to buzz]. Any buzzing sound. The murmur that is heard when the stethoscope is applied to any part of the body. It is thought to result from contraction of the muscular fibrils.

Bourget's test (*boor-zha'*) [Louis *Bourget,* Swiss chemist, 1856–1913]. *For iodine or iodides.*— Filter paper is impregnated with starch solution and then moistened with a 5% solution of ammonium sulphate; on being subsequently made wet with a solution containing iodine, it strikes a deep blue color.

boutonnière (*boo-ton-ne-air'*) [Fr., buttonhole]. 1. A buttonhole-like incision. 2. External urethrotomy.

boutons terminals (*boo'-ton(g) ter-me-nal*). Small terminal enlargements or tactile-cells of sensory nerves, as in the nose of the guinea pig and mole.

Bouveret's disease (*boo'-ver-a*). Paroxysmal tachycardia. **B.'s sign in intestinal obstruction,** this sign is applicable only to the large gut: great distention of the cecum and a large elevation in the right iliac fossa.

bovillæ (*bo-vil'-e*) [L.]. Measles.

bovin (*bo'-vin*) [*bos,* ox]. A modified virus derived from the tubercle bacillus, of greater virulence than bovovaccine.

bovine (*bo'-vin*) [*bovinus,* of an ox]. 1. Ox-like 2. Relating to, or derived from a cow or ox or heifer. **b. heart,** the immensely hypertrophied heart of aortic valvular disease. **b. hunger,** bulimia. **b. lymph,** vaccine virus from cows.

bovinine (*bo'-vin-in*) [see *bovine*]. A proprietary preparation of beef used as a food for invalids and convalescents.

Bovista (*bo-vis'-tah*) [L.]. 1. A genus of fungi closely allied to *Lycoperdon,* some of the species are edible. 2. The *Lycoperdon bovista,* a fungus or puffball. When dry it is a good styptic, and its tincture has been used in nervous diseases.

bovovaccine (*bo-vo-vak'-sin*) [*bovine; vaccine*]. An extract of tubercle bacilli used for protection against bovine tuberculosis.

bovox (*bo'-vox*). A proprietary essence or extract of beef.

bovril (*bov'-ril*). Trade name of a preparation containing extract of beef, peptone, albumin, and fibrin.

Bowdichia (*bo-dich'-e-ah*) [Edward *Bowdich,* an English naturalist]. A genus of plants of the order *Leguminosæ. B. virgilioides* is a South American tree, of which the bark (alchornoque or alcornoque bark) is diaphoretic, roborant, and antisyphilitic.

Bowditch's law (*bo'-ditch*) [Henry Pickering *Bowditch,* American physiologist, 1840–1911]. Any stimulus which is capable of exciting the heart at all will produce as great a response as the strongest stimulus.

bowel (*bow'-el*) [OF., *boel,* from L., *botellus,* a sausage]. The intestine. **b.-complaint,** diarrhea. **b., lower,** the rectum.

Bowen's disease (*bo'-en*) [John T. *Bowen,* American physician, 1857–]. An overgrowth of the epithelium in which are found pinkish papules with a horny layer; it is probably a precancerous dermatitis.

bow-leg [ME., *bowe*]. An arching outward of the lower limbs. See *genu varum.*

Bowman's capsule (*bo'-man*) [Sir William *Bowman,* English anatomist and ophthalmologist, 1816–1892]. The expanded portion forming the beginning of a uriniferous tubule. **B.'s discs,** the products of a breaking up of muscle-fibers in the direction of the transverse striations. **B.'s glands,** glands found in the olfactory mucous membrane. **B.'s membrane,** a thin, homogeneous membrane representing the upper-

most layer of the stroma of the cornea, with which it is intimately connected. **B.'s muscle,** *origin;* 1. *Longitudinal portion* (Brucke's muscle). junction of cornea and sclera; 2. *Circular portion* (Mueller's muscle): the fibers form a circle; *insertion;* 1. Outer layers of choroid. 2. Ciliary processes; *innervation,* ciliary; it is the muscle of visual accommodation. **B.'s probe,** a probe used in dilating strictures of the lacrimal duct. **B.'s sarcous elements,** muscle-caskets; the small elongated prisms of contractile substance that produce the appearance of dark stripes in voluntary muscle. **B.'s tubes,** artificial tubes formed between the lamellæ of the cornea by the injection of air or colored fluid.

Bowman-Mueller's capsule. See *Bowman's capsule.*

box, boxwood (*boks, boks'-wood*). See *buxus.*

Boyer's bursa (*bwoi-ya'*) [Alexis *Boyer,* French surgeon, 1757–1833]. The subhyoid bursa. **B.'s cyst,** cystic enlargement of the subhyoid bursa.

ALEXIS BOYER.

Boyle's law (*boil*) [Robert *Boyle,* English physicist, 1627–1691]. At any given temperature the volume of a given mass of gas varies inversely as the pressure it bears. Syn., *Mariotte's law.*

Bozeman's catheter (*bōz'-man*) [Nathan *Bozeman,* American surgeon, 1825–1905]. A double-current catheter.

Bozzi's foramen (*bot'-tze*). See *Soemmering's yellow spot.*

Bozzolo's sign (*bot-tzo'-lo*) [Camillo *Bozzolo,* Italian physician, 1845–]. Visible pulsation of the arteries of the nares, said to occur in some cases of aneurysm of the thoracic aorta.

B. p. Abbreviation for boiling point.

B. P. or **B. Ph.** Abbreviation for *British Pharmacopœia.*

B. P. C. Abbreviation for British Pharmaceutical Codex.

Br. Chemical symbol of *bromine.*

bracelets (*brās'-lets*). Transverse lines across the anterior aspect of the wrist.

Brachet, mesolateral fold of (*brash-a'*). The right lamella of the primitive mesentery which passes to the dorsal aspect of the right lobe of the liver and whose free edge bounds the foramen of Winslow.

brachia (*bra'-ke-ah*). Plural of *brachium.*

brachia conjunctiva. White fibers passing from the cerebellum towards the corpora quadrigemina and the cerebral hemispheres.

brachial (*bra'-ke-al*) [*brachium*]. Pertaining to the arm. **b. artery,** the continuation of the axillary artery, extending along the inner side of the arm. See under *artery.* **b. glands,** the lymphatic glands of the arm. **b. plexus,** the plexus of the fifth, sixth, seventh, and eighth cervical and the first dorsal nerves. **b. veins,** the veins of the arm that accompany the brachial artery.

brachialgia (*bra-ke-al'-je-ah*) [*brachium;* ἄλγος, pain]. Pain or neuralgia in the arm or in the brachial plexus.

brachialis anticus (*bra-ke-a'-lis an'-tik-us*). See *muscles, table of.*

brachiform (*bra'-ke-form*) [*brachium; forma,* form]. Arm-shaped.

brachinin (*brak'-in-in*). A substance obtained from the bombardier-beetle, *Brachinus crepitans,* of Europe. It is said to be efficacious against rheumatism.

brachio- (*bra-ke-o-*) [*brachium*]. A prefix meaning pertaining to the brachium.

brachiocephalic (*bra-ke-o-sef-al'-ik*) [*brachio-;* κεφαλή, head]. Pertaining to the arm and the head. **b. artery, b. vein,** the innominate artery and vein.

brachiocrural (*bra-ke-o-kru'-ral*) [*brachio-; crus,* the leg]. Pertaining to or affecting the arm and leg.

brachiocubital (*bra-ke-o-kū'-bit-al*) [*brachio-, cubitus,* forearm]. Relating to the arm and forearm, as, the *brachiocubital* ligament.

brachiocyllosis (*bra-ke-o-sil-o'-sis*) [*brachio-;* κύλλωσις, a bending]. A crookedness of the arm; also the paralysis that may accompany it.

brachiofacial (*bra-ke-o-fa'-shal*). Pertaining to both arm and face.

brachiofascialis (*bra-ke-o-fas-e-a'-lis*) [*brachio-; fascia,* a bundle]. See under *muscles.*

brachioncus (*bra-ke-ong'-kus*) [*brachio-;* ὄγκος, a swelling]. Any hard and chronic swelling of the arm.

brachioradial (*bra-ke-o-ra'-de-al*) [*brachio-; radius*]. The supinator longus muscle. See *muscles, table of.*

brachiorrhachidian, brachiorachidian (*brak-e-o-rak-id'-e-an*) [*brachio-;* ῥάχις, the spinal column]. Relating to the arm and the spinal cord.

brachiorrheuma (*bra-ke-o-ru'-mah*) [*brachio-;* ῥεῦμα, a flux]. Rheumatism of the arm.

brachiostrophosis (*bra-ke-o-stro-fo'-sis*) [*brachio-;* στρέφειν, to turn]. A twist or twisted deformity of the arm.

brachiotomy (*bra-ke-ot'-o-me*) [*brachio-;* τομή, a section]. The surgical or obstetrical removal of an arm.

brachiplex (*bra'-ke-pleks*) [βραχίων, the arm; *plexus,* a twining]. The brachial plexus.

brachistocephalic, or **brachistocephalous** (*bra-kis-to-sef-al'-ik,* or *bra-kis-to-sef'-al-us*) [βράχιστος, shortness; κεφαλή, head]. Having an extremely short and very broad head.

brachium (*bra'-ke-um*) [βραχίων, the arm; pl., *brachia*]. The arm, especially the upper arm

also, any arm-like object or structure. **brachia cerebelli,** the peduncles of the cerebellum. **brachia cerebri, b. of optic lobes,** the bands connecting the nates and testes with the optic thalamus. **b. conjunctivum cerebelli,** same as *b. copulativum.* **b. copulativum,** the superior peduncle of the cerebellum. **b. pontis,** the brachium of the pons, being also the middle peduncle of the cerebellum. **b. quadrigeminum inferius,** the postbrachium, a white band connecting the postgeniculum to the postgeminum. **b. quadrigeminum superius,** the prebrachium, a white band between the pregeminum and the thalamus.

Brach-Romberg's sign. See *Romberg's sign.*

brachy- (*brak-e-*) [βραχύς, short]. A prefix meaning short.

brachycardia (*brak-e-kar'-de-ah*). See *bradycardia.*

brachycephalia (*brak-e-sef-a'-le-ah*) [*brachy-*; κεφαλή, a head]. The quality of being brachycephalic.

brachycephalic, brachycephalous (*brak-e-sef-al'-ik, brak-e-sef'-al-us*) [*brachy-*; κεφαλή, a head]. Having a skull with the transverse diameter more than eight-tenths of the long diameter.

brachycephalism (*brak-e-sef'-al-izm*). See *brachycephalia.*

brachycephaly (*brak-e-sef'-a-le*). See *brachycephalia.*

brachycheirous, brachychirous (*brak-e-ki'-rus*) [*brachy-*; χείρ, the hand]. Having short hands.

brachycnemic, brachyknemic (*brak-e-ne'-mik*) [*brachy-*; κνήμη, the leg]. A term applied by Sir W. Turner to a leg proportionately shorter than the thigh.

brachydactylia (*brak-e-dak-til'-e-ah*) [*brachy-*; δάκτυλος, a digit]. Abnormal shortness of the fingers or toes.

brachydactylous (*brak-e-dak'-til-us*) [*brachy-*; δάκτυλος, a finger]. Pertaining to an abnormal shortness of the fingers or toes.

brachyglossal (*brak-e-glos'-al*) [*brachy-*; γλῶσσα, tongue]. Having a short tongue.

brachygnathous, brachygnathus (*brak-e-na'-thus*) [*brachy-*; γνάθος, a jaw]. Having short jaws.

brachyhieric (*brak-e-hi'-e-rik*) [*brachy-*; ἱερόν, sacrum]. Having a short sacrum.

brachykerkic (*brak-e-kerk'-ik*) [*brachy-*; κερκίς, a shuttle]. Having the forearm disproportionately short as compared with the upper arm.

brachymetropia (*brak-e-me-tro'-pe-ah*) [*brachy-*; μέτρον, a measure; ὤψ, the eye]. Nearsightedness or myopia, *q. v.*

brachymetropic (*brak-e-me-trop'-ik*) [*brachy-*; μέτρον, a measure; ὤψ, the eye]. Nearsighted, or myopic.

brachynosis, brachynsis (*brak-in-o'-sis, brak-in'-sis*) [*brachy-*; νόσος, disease]. The contraction or shortening of an organ or part by disease.

brachyntic (*brak-in'-tik*). Related to or affected with brachynosis.

brachyotus (*brak-e-o'-tus*) [*brachy-*; οὖς, the ear]. Short-eared.

brachyphalangia (*brak-e-fal-an'-je-ah*) [*brachy-*; *phalanx*]. A condition in which the phalanges are abnormally short.

brachypnea (*brak-ip-ne'-ah*) [*brachy-*: πνοή, breath]. Abnormal shortness of breath.

brachypodous (*brak-ip'-o-dus*) [**brachy-**; πούς, foot]. In biology, possessing a short **foot or stalk.**

brachyprosopic (*brak-e-pros-o'-pik*) [*brachy-*; πρόσωπον, face]. Having a short **face.**

brachyrrhinia (*brak-e-rin'-e-ah*) [*brachy-*; ῥίς, a nose]. Abnormal shortness of the nose.

brachystaphylic (*brak-e-staf'-il-ik*) [*brachy-*; σταφυλή, the palate]. Having a short alveolar arch.

bracket (*brak'-et*) [OF., *braguette*]. An apparatus for supporting a joint or rendering it immovable.

bradesthesia (*brad-es-the'-ze-ah*). See *bradyesthesia.*

brady- (*brad-e-*) [βραδύς, slow]. A prefix meaning slow.

bradyacusia (*brad-e-ak-oo'-se-ah*) [*brady-*; ἀκοῦειν, to hear]. Hardness of hearing.

bradyarthria (*brad-e-ar'-thre-ah*) [*brady-*; ἄρθρον, articulation]. Abnormally slow articulation of words: bradylalia.

bradybolism (*brad-ib'-o-lizm*) [*brady-*; βάλλειν, to throw]. Same as *bradyspermatism.*

bradycardia (*brad-e-kar'-de-ah*) [*brady-*; καρδία, heart]. Slowness of the heart-beat—the opposite of *tachycardia.*

bradycauma (*brad-e-kaw'-mah*) [*brady-*; καῦμα, burn: *pl., bradycaumata*]. Slow cautery, as with the moxa.

bradycausis (*brad-e-kaw'-sis*) [*brady-*; καῦσις, a burning]. A slow burning; the application of a slow caustic.

bradycinesia (*brad-e-sin-e'-se-ah*) [*brady-*; κινήσις, movement]. Extreme slowness of movement.

bradycrote (*brad'-e-krōt*) [*brady-*; κρότος, beating]. Marked by or relating to slowness of the pulse.

bradycrotic (*brad-e-krot'-ik*) [*brady-*; κρότος, a beating]. Bradycrote.

bradydiastole (*brad-e-di-as'-to-lē*) [*brady-*; διαστολή, a drawing apart]. A prolongation of the diastolic pause; it is generally associated with myocardial lesions. Syn., *bradydiastolia*

bradyecoia (*brad-e-ek-oi'-ah*) [*brady-*; ἀκοῦειν, to hear]. Hardness of hearing.

bradyesthesia, bradyæsthesia (*brad-e-es-the'-ze-ah*) [*brady-*; αἴσθησις, perception]. Dulness of perception.

bradyglossia (*brad-e-glos'-e-ah*). See *bradylalia.*

bradylalia (*brad-e-la'-le-ah*) [*brady-*; λαλεῖν, to talk]. A slowness of utterance.

bradylexia (*brad-e-leks'-e-ah*) [*brady-*; λέξις, word]. Abnormal slowness in reading.

bradylogia (*brad-e-lo'-je-ah*) [*brady-*; λόγος, discourse]. Bradylalia.

bradypepsia (*brad-e-pep'-se-ah*) [*brady-*; πέψις, digestion]. Slow digestion.

bradyphagia (*brad-e-fa'-je-ah*) [*brady-*; φάγειν, to eat]. Slowness in eating.

bradyphasia (*brad-e-fa'-ze-ah*). See *bradylalia.*

bradyphemia (*brad-e-fe'-me-ah*) [*brady-*; φήμη, speech]. Abnormally slow articulation of words; bradylalia.

bradyphrasia (*brad-e-fra'-ze-ah*) [*brady-*; φράσις, utterance]. Slowness of speech; it occurs in some types of mental disease.

bradypnea, bradypnœa (*brad-ip-ne'-ah*) [*brady-*; πνέειν, to breathe]. Abnormal slowness of breathing.

bradyspermatism (*brad-e-sper'-mat-izm*) [*brady-*; σπέρμα, seed]. Abnormally slow emission of semen.

bradysphygmia (*brad-e-sfig'-me-ah*) [*brady-*; σφυγμός, pulse]. Abnormal slowness of the pulse.

bradytocia (*brad-e-to'-se-ah*) [*brady-*; τόκος, birth]. Abnormally slow or protracted parturition.

bradytrophic (*brad-e-trof'-ik*) [*brady-*; τροφή, nutrition]. Characterized by slowness of trophic changes.

bradyuria (*brad-e-u'-re-ah*) [*brady-*; οὖρον, urine]. Slow passage of urine.

Braidism (*brād'-izm*) [James *Braid*, English physician, 1795–1860]. The hypnotic state produced by looking fixedly upon a shining object.

Brailey's operation (*bra'-lee*) [William Arthur *Brailey*, English ophthalmologist, 1845–1915]. Stretching of the supratrochlear nerve for the relief of pain in glaucoma; a modification of Badal's operation, *q. v.*

brain (*brān*) [AS., *brægen*]. That part of the central nervous system contained in the cranial cavity, and consisting of the cerebrum, the cerebellum, the pons, and the medulla oblongata. **b., abdominal,** the solar plexus. **b., after-.** See *metencephalon*. **b.-axis,** that portion of the brain-substance including the island of Reil, the basal ganglia, the crura, pons, medulla, and cerebellum. **b.-bladder,** a cerebral vesicle of the embryo. **b., end-,** see *telencephalon*. **b. fag,** brain tire. **b.-fever.** See *meningitis*. **b., fore-.** See *prosencephalon*. **b., great,** the cerebrum. **b., hind-.** See *epencephalon*. **b., mid-.** See *mesencephalon*. **b. pan,** the cranium. **b., railway-,** a condition analogous to railway spine, and characterized by cerebral disturbance. See *Erichsen's disease*. **b.-salt,** an effervescent salt whose chief ingredients are ammonium bromide and caffeine. **b.-sand.** See *acervulus*. **b. stem,** the brain axis. **b. storm,** sudden and severe phenomena due to cerebral causes. **b.-tire,** a condition of brain exhaustion due to excessive functional activity. **b., 'twixt-.** See *diencephalon* and *thalamencephalon*. **b., wet,** the cerebral edema caused by alcoholism.

bran (*bran*) [Breton, *brenn*]. The epidermis or outer covering of the seeds of most cereals. **b.-bath.** See *bath, bran*. **b. dressing,** a dressing formerly used for compound fracture of the leg The leg was placed in a fracture-box and surrounded with clean bran

branch (*branch*). 1 A name given to the divisions of offshoots of blood-vessels, lymphatics, or nerves, from the trunk or main stem. 2. A primary division of the animal kingdom.

branchia (*brang'-ke-ah*) [βράγχια, gills]. The gills of fishes.

branchial (*brung'-ke-al*) Pertaining to the branchia. **b. arches.** See *arches, branchial*. **b. cyst,** a cyst formed of embryonic structures in a branchial arch or cleft. **b. fistula,** a congenital fistula in the neck, in connection with the branchial openings **b. glands,** the parathyroid glands. **b. openings.** See *clefts, visceral*.

branchiogenic (*brang-ke-o-jen'-ik*). Same as *branchiogenous*.

branchiogenous (*brang-ke-oj'-en-us*) [*branchia*; γεννᾶν, to produce]. Produced or developed from a branchial cleft.

branchioma (*brang-ke-o'-mah*) [*branchia*; ὄμα, a tumor] A tumor developed from remains of the branchial arches.

branchiomere (*brang'-ke-o-mēr*) [*branchia*; μέρος, a part]. The segment of the lateral mesoderm between each two branchial (gill) clefts.

Brand method [Ernst *Brand*, German physician, 1827–1897]. A system of baths employed in the treatment of typhoid fever.

Brandt's method [Thure *Brandt*, 1809–1895]. Treatment of affections of the Fallopian tubes by massage in an endeavor to force out their contents into the uterus.

brandy (*bran'-de*). See *Spiritus vini gallici*.

branks (*brangks*). The mumps.

Brasdor's method (*bras'-dor*) [Pierre *Brasdor*, French surgeon, 1721–1797]. Treatment of aneurysm by ligation of the artery immediately beyond the aneurysm. See *ligation*

brash (*brash*) [Dutch, *braaken*, to vomit]. A common name indicating almost any disorder of the digestive system; any rash, or eruption; a short fit of illness. **b.,** water. See *pyrosis*.

brass (*bras*). An alloy of copper with 25–40% of zinc. **b.-founder's ague.** See *ague*.

brassard (*bras-sard'*). 1. A band worn on the sleeve. 2. A Red Cross insignia.

Brassica (*bras'-ik-ah*) [AS.]. A genus of plants of the order *Cruciferæ*, including the common cabbage. **B. alba,** white mustard; the powdered seeds a condiment and rubefacient. **B. nigra,** black mustard.

brassicon (*bras'-ik-on*). A proprietary local application for headache, said to consist of 2 gm. oil of peppermint, 6 Gm. camphor, 4 Gm. ether, 12 Gm. alcohol, 6 drops mustard oil.

brassy body. An erythrocyte which has become shrivelled and darkened as the result of being attacked by the *plasmodium malariæ*.

brassy-eye. See *chalcitis*.

Brauer's method (*brow'-er*). [L. *Brauer*, German physician]. The cure of pulmonary tuberculosis by the making of an artificial pneumothorax.

Braun's hook (*brown*) [Gustav von *Braun*, Austrian obstetrician, 1829–1911]. A hook used for decapitation of the fetus.

Braun's reaction for glucose (*brown*) [Christopher Heinrich *Braun*, German physician, 1847–]. Treat the glucose solution with caustic soda, and warm until it is yellow; then add a dilute solution of picric acid and heat to boiling. A deep red color will be produced. Creatinin gives the same reaction, even in the cold, and acetone also, though slightly.

Braune's canal (*brow'-neh*) [Christian Wilhelm *Braune*, German anatomist, 1831–1892]. The continuous passage formed by the uterine cavity and the vagina during labor, after full dilation of the os **B.'s os internum.** See *Bandl's ring*.

Braun-Fernwald's sign (*brown-fairn'-volt*) [Karl von *Braun*, Austrian obstetrician, 1823–1891]. An early sign of pregnancy consisting in an increased thickness of one-half of the body of the uterus and in the presence of a longitudinal median groove, these changes being dependent upon unequal consistence of that organ.

Bravais-Jackson's epilepsy (*brav'-a*). See *Jacksonian epilepsy*.

brawn (*brawn*) [OF., *braon*, flesh]. The flesh of a muscle; well-developed muscles.

brawny (*brawn'-e*) [see *brawn*]. Fleshy; muscular. **b. induration,** pathological hardening and thickening of the tissues.

Braxton Hicks' sign. See *Hicks*.

braxy (*braks'-e*). Anthrax in sheep.

brayera (*bra-ye'-rah*). See *cusso*.

brayerin. A resinous principle found in brayera or cusso.

bread (*bred*) [AS., *brĕad*]. A mixture of flour and water rendered porous by carbon dioxide, and baked. The flour may be of wheat, corn, oat, or rye. The carbon dioxide may be introduced by fermenting the starch with yeast. **b., brown,** a kind of bread made from a mixture of corn, rye, and wheat flour. **b., Graham, bread** made from unbolted wheat flour; it contains more gluten, diastase, and mineral phosphates than ordinary bread. **b.-paste,** a culture-medium

for bacteria and molds. Stale, coarse bread is dried, ground to powder, and made into a paste with water. **b.-poultice**, bread-crumbs steeped in hot water. **b., pulled**, fresh bread pulled apart longitudinally and rebaked until brittle. **b., white**, bread made from bolted wheat flour, and therefore deficient in diastase, gluten, and mineral phosphates. Other kinds, such as rye (or black), corn, bran, barley, etc., indicate their composition by their name.

break (*brāk*) [AS., *brecan*]. 1. In electricity, to open the circuit of a battery. 2. In surgery, a fracture. 3. To change suddenly and involuntarily from the natural voice to a shrill one or to a whisper, as with boys at puberty, or with adults under strong emotion. **b. shock**, a term sometimes employed in electrotherapeutics for the physiological shock produced on the opening or breaking of an electric circuit.

breakbone fever. See *dengue*.

breast (*brest*) [ME., *brest*]. 1. The anterior part of the chest. 2. The mamma. **b.-bone**, the sternum. **b., broken**, abscess of the mammary gland. **b., chicken-**, a deformity marked by prominence of the sternal portion of the chest. Syn., *pectus carinatum*. **b., funnel-**, a depression of the chest-walls at the sternum resembling the bowl of a funnel; it is like shoemaker's breast, only it may occur at any point. Syn., *funnel-chest*. **b., gathered**, mammary abscess. **b., hysterical**, a form of mastodynia due to hysteria. **b., irritable tumor of**, a name given by Astley Cooper to peculiar, sharply defined fibromatous or neuromatous tumors of small size and extreme tenderness. **b.-pang**, angina pectoris. **b., pigeon-**. Same as *b., chicken-*. **b.-pump**, a suction-apparatus for removing the milk from the breast. **b., shoemaker's**, a depression of the sternum in shoemakers due to the pressure of tools against it and the xiphoid cartilage.

breath (*breth*) [AS., *bræth*]. The air exhaled from the lungs. **b.-sounds**, the respiratory sounds heard upon auscultation. See *Table* page 245.

breathing. See *respiration*. **b., abdominal**, breathing in which the abdominal walls move decidedly and in which the diaphragm is actively engaged. **b., Cheyne-Stokes'**. See *Cheyne-Stokes' respiration*. **b., interrupted**, **b., cog-wheel**, **b., wavy**, a broken or interrupted inspiratory sound produced by nervousness, irregular contraction of the muscles of respiration, or irregular expansion of the lung from disease. **b., mouth-**, habitual respiration through the mouth. **b., puerile**, the breathing normally heard in children, and heard in adults when the respiratory murmur is exaggerated. **b., suppressed**, entire absence of breath-sounds, as in pleuritic effusion and certain solid conditions of the lung. **b., thoracic**, respiration in which the thoracic walls actively move.

Brecht's cartilages (*brekt*). The ossa suprasternalia, two small cartilaginous or bony nodules near each sternoclavicular joint, above the sternum. They are regarded as the rudiments of the episternal bone that is well developed in some animals.

Breda's disease (*bra'-dah*) [Achille *Breda*, Italian dermatologist]. Same as *espundia*, *q. v.*

breech (*brēch*) [ME., *breech*]. The buttocks. **b., frank**, a breech presentation in which the thighs are flexed and the legs extended on the anterior surface of the fetus. **b. presentation**, presentation of the buttocks of the child at the os uteri during labor.

breeches splint. A splint that surrounds the leg; oftenest made of woven wire.

breeze, electric. See *static breeze*.

bregenin (*breg'-en-in*) [Low Ger., *bregen*, brain], $C_{46}H_{87}NO_8$. A name given by Thudichum to a viscous principle, soluble in and crystallizable from alcohol, by means of which it has been extracted from brain-tissue. It is fusible like a fat, but is miscible with water.

bregma (*breg'-mah*) [βρέγμα, the sinciput]. 1. The part of the skull corresponding to the anterior fontanel. 2. The junction of the coronal and sagittal sutures.

bregmatic (*breg-mat'-ik*). Relating to the bregma.

bregmatodymia (*breg-mat-o-dim'-e-ah*) [βρέγμα, the sinciput; δίδυμος, twin]. Teratic union of twins by the bregmata.

brein (*bre'-in*). A glucoside isolated from *Bryonia alba*. It is a powerful stimulant to the arterioles and useful in the treatment of post-partum hemorrhage and other forms of metrorrhagia.

Breisky's disease (*bri'-ske*) [August *Breisky*, German gynecologist, 1832–1889]. Kraurosis vulvæ. **B.'s method**, of measuring the dimensions of the pelvis at its outlet: Measure externally the distance between the tuberosities of the ischia, and the distance from the junction of the sacrum and coccyx to the lower border of the arcuate ligament.

Bremer's reaction for diabetic blood (*brem'-ur*) [Ludwig *Bremer*, American physician, 1844–1914]. The blood is prepared as in ordinary staining methods, and, after drying in a hot-air sterilizer, stained with methylene-blue and eosin. The erythrocytes of diabetic blood are stained greenish-yellow, whereas in normal blood they appear brownish.

Brenner's formula (*bren'-nur*) [Rudolf *Brenner*, German physician, 1821–1884]. 1. With the same current strength the kathodal closing contraction is four times as strong as the kathodal opening contraction. 2. The normal auditory nerve reacts to the kathodal closure by a sound sensation which immediately attains its maximum and then gradually diminishes; the anodal opening causes with the same current strength a somewhat weaker sound that is of short duration.

brenzcain (*brenz'-ka-in*). See *guaiacolbenzyl ester*.

brenzkatechinuria (*brenz-kat-e-kin-ū'-re-ah*). See *alkaptonuria*.

brephopolysarcia (*bref-o-pol-e-sar'-se-ah*) [βρέφος, an infant; πολύς, much; σάρξ, flesh] Excess of flesh in an infant.

brephotrophium (*bref-o-tro'-fe-um*) βρέφος, infant; τρέφειν, to nourish]. An infant-asylum; a foundling-hospital.

brephydrocephalus (*bref-id-ro-sef'-al-us*) [βρέφος an infant; *hydrocephalus*]. Hydrocephalus in infants.

Breschet's canal, B.'s veins (*bresh'-a*) [Gilbert *Breschet*, French anatomist, 1784–1845]. The canals and veins of the diploe. **B.'s helicotrema**, the helicotrema, the foramen of communication between the scala vestibuli and the scala tympani. **B.'s sinus**, the sphenoparietal sinus.

Bretonneau's diphtheria (*bret'-on-o*) Pierre *Bretonneau*, French physician, 1778–1862]. Diphtheria of the pharynx. **B.'s method**, the administration of quinine in one single large dose in malaria, after the paroxysm.

TABLE OF BREATH-SOUNDS IN HEALTH AND DISEASE

(Altered and enlarged from J. K. Fowler)

Variety of Breathing	*Period*	*Pitch*	*Quality*	*Interval*	*Duration*	*Intensity*	*Where Heard*	*Condition in Which Heard*
Vesicular.	1. Inspiration.	Low	Vesicular.	None.	. . . . .	Variable.	Over the lungs in health.	In health.
	2. Expiration.	Lower.	Blowing.	. . . .	Shorter than inspiration or absent.	Faint or absent.		
Bronchial.	1. Inspiration.	High.	Tracheal.	Distinct.	. . . . .	Variable.	In *health*, in regions of seventh cervical spine. In *disease*, over areas of consolidation.	In health; pulmonary tuberculosis, lobar pneumonia, large pleuritic effusions, thoracic aneurysm, mediastinal tumors.
	2. Expiration.	Higher.	Tracheal.	. . . . .	Equal to or longer than inspiration.	Greater.		
Broncho-vesicular.	1. Inspiration.	Higher than in vesicular breathing.	More or less tracheal.	Slight.		Variable.	In *health*, *ant.*, over sternal portion of infraclavicular region; *post.*, upper part of interscapular region. In *disease*, over slight consolidation.	In health; pneumonia, pulmonary tuberculosis.
	2. Expiration.	Higher than in vesicular breathing.	More or less tracheal.		About equal to inspiration.	Greater.		
Amphoric.	1. Inspiration.	Low.	Hollow and metallic.	Distinct.	. . . . .	Variable.	Over a large cavity communicating with an open bronchus.	Pulmonary tuberculosis
	2. Expiration.	Lower.	Both characters more marked.	. . . . .	Longer than inspiration.	Greater.		
Cavernous.	1. Inspiration.	Low	Blowing and hollow	Distinct.	.	Variable	Over a cavity communicating with an open bronchus.	Pulmonary tuberculosis
	2. Expiration.	Lower.	Both characters more marked.		Longer than inspiration.	Greater		
Tubular.	1. Inspiration.	Higher than in bronchial breathing.	Laryngeal or whiffing.	Distinct.		Variable	Over consolidated areas.	Lobar pneumonia, pulmonary tuberculosis.
	2. Expiration.	Higher.	Laryngeal or whiffing.	. .	Equal to or longer than inspiration.	Greater.		

breviductor (*brev-e-duk'-tor*) [L.]. The adductor brevis muscle of the thigh. See *muscles, table of*.

breviflexor (*brev-e-fleks'-or*) [L.]. Any short, flexor muscle.

brevissimus oculi (*brev-is'-im-us ok'-ū-li*) [L.]. The shortest muscle of the eye; the obliquus inferior. See *muscles, table of*.

brevium (*brev'-e-um*). A disintegration product of uranium; it is radioactive and only lasts for a short time.

Brewer's operation (*broo'-er*) [George Emerson *Brewer*, American Surgeon, 1861–]. Closure of wounds of arteries with rubber plates.

B.'s point, the costovertebral angle, which is tender in cases of infection of the kidney.

Brewster's law (*broo'-ster*) [Sir David *Brewster*, Scotch physicist, 1781–1868]. The polarizing angle has such a value that the reflected and the refracted rays are at right angles to each other.

brick-dust deposit. A reddish sediment in the urine, consisting of urates.

bricklayer's itch. Eczema due to irritation of lime-mortar.

brickmakers' anemia. See *ankylostomiasis, dochmiasis*.

bridge (*brij*). 1. The upper ridge of the nose formed by the union of the two nasal bones. 2. In electricity, an apparatus for measuring the resistance of a conductor. **b. coloboma.** See *coloboma*. **b., herpetic**, a term for *fascicular keratitis, q. v.* **b., intercellular**, slender protoplasmic processes connecting proximate cells. Syn., *internuclear bundles*. **b., jugal.** See *arch, zygomatic*. **b. of nose**, the prominent ridge formed by the nasal bones. **b. of Varolius**, the *pons Varolii*. **b.-work**, in dentistry, the adaptation of artificial crowns of teeth to and over spaces made by the loss of natural teeth, by connecting such crowns to natural teeth or roots

for anchorage by means of a bridge, and thereby dispensing with plates covering more or less of the roof of the mouth and the alveolar ridge.

bridle (*brī-dl*) [AS., *bridel*]. 1. A band or filament stretching across the lumen of a passage, or from side to side of an ulcer, scar, abscess, etc. 2. A frenum. **b. stricture,** a stricture due to the presence of a delicate band stretched across the lumen of the urethra.

Brieger, bacillus of (*bre'-ger*) [Ludwig *Brieger*, German physician, 1849–]. *Bacillus cavicidus*. **B.'s method,** a method of separating ptomaines from a putrefying mass. **B.'s reaction,** a method for calculating the antitryptic index.

Bright's blindness (*brīt*) [Richard *Bright*, English physician, 1789–1858]. Partial or complete loss

FACIES IN BRIGHT'S DISEASE. WRINKLED LIDS.

of sight, which may be temporary, independent of any change in the optic disc or retina; it occurs in uremia. **B.'s disease,** a generic term for acute and chronic diffuse disease of the kidneys, usually associated with dropsy and albuminuria. **B.'s disease, acute,** an acute inflammation of the kidney; it may be parenchymatous, interstitial, or diffuse. **B.'s disease, chronic,** a chronic inflammation of the kidney, affecting the parenchyma, the connective tissue, or both. Amyloid degeneration is also considered a chronic form of Bright's disease. **B.'s friction-sound.** See *Beatty-Bright's friction-sound*. **B.'s granulations,** the granulations of the large white kidney.

brightic (*brīt'-ik*). A person suffering from Bright's disease.

brightism (*brīt'-izm*). Chronic nephritis.

Brill's disease [Nathan E. *Brill*, American physician, 1860–]. A mild, atypical form of typhus fever. The Widal test is negative.

brilliant green. See under green.

brim (*brim*) [ME.]. The upper edge or margin, as the *brim* of the pelvis.

brimstone (*brim'-stōn*). See *sulphur*. **b., cane,** sublimed sulphur molded into the form of solid cylinders about an inch in diameter. Syn., *roll-sulphur*. **b., vegetable,** the spores of *Lycopodium clavatum*.

Brinton's disease (*brin'-tun*) [William *Brinton*, English physician, 1823–1867]. 1. Linitis plastica; hypertrophy and sclerosis of the submucous connective tissue of the stomach. 2. Infantile scurvy.

Briquet's ataxia (*bre-ka'*) [Paul *Briquet*, French physician, 1796–1881]. Hysteric ataxia; astasia-abasia. **B.'s syndrome,** shortness of breath, and aphonia in hysterical paralysis of the diaphragm.

brisement (*brēz-mon(g)*) [Fr.]. A breaking or rupture. **b. forcé,** the forcible breaking up of structures causing ankylosis of a joint.

brise-pierre (*brēz'-pe-ār'*) [Fr., "stone-crusher"]. An old form of lithotrite.

Brissaud-Marie's syndrome (*bre-so-mar-e'*) [Edouard *Brissaud*, French physician, 1852–1909; Pierre *Marie*, French neurologist, 1853–]. Hysterical glossolabial hemispasm.

bristle-cell. Any one of the ciliated cells at the termination of the auditory nerve-filaments.

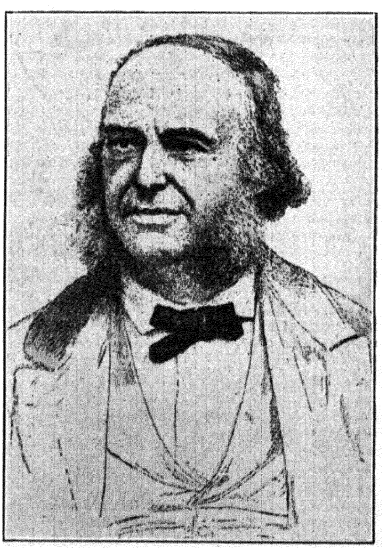
British gum. See *dextrin*.

broach (*brōch*), A five-sided steel instrument used by dentists for enlarging the canal in the root, and the opening into a decayed cavity in the crown of a tooth.

broad. Wide; extensive. **b. ligament.** See *ligament, broad*. **b. tapeworm.** See *Bothriocephalus latus*.

Broadbent's sign (*brawd'-bent*) [Sir William Henry *Broadbent*, English physician, 1835–1907]. A visible retraction, synchronous with the cardiac systole, of the left side and back in the region of the eleventh and twelfth ribs, in adherent pericardium.

Broca's angle (*bro'-kah*) [Paul *Broca*, French surgeon and anthropologist, 1824–1880]. The basilar angle. **B.'s aphasia,** cortical motor aphasia. **B.'s area,** the medial portion of the anterior, olfactory lobe. Syn., *area parolfactoria; gyrus olfactorius medialis*. **B.'s cap,** the dividing point of the fossa Sylvii. **B.'s center,** the posterior part of the left third frontal convolution; it is the center of speech. **B.'s convolution,** the third frontal convolution of the left hemisphere. **B.'s diagonal band,** a band of gray matter forming the posterior part of the anterior perforated space and extending from the gyrus subcallosus to the anterior end of the gyrus hippocampi. **B.'s fissure,** the fissure surrounding Broca's lobe. **B.'s olfactory area,** trigonum olfactorium; the posterior end of the gyrus rectus, lying anteriorly to the mesial root of the olfactory tract. **B.'s parietal angle,** in craniometry, that included between two lines joining the auricular point and the bregma and lambda. **B.'s point,** the auricular point, the center of the external auditory meatus. **B.'s pouch,** a pear-shaped sac lying in the tissues of the labia majora; it is analogous in structure to the dartos, but contains no muscular fibers.



PAUL BROCA.

B.'s visual plane, a plane drawn through the axes of the two orbits.

Brocq's disease (*brok*) [Anne Jean Louis *Brocq*. French dermatologist, 1856–]. A form of parakeratosis. **B.'s syndrome,** subacute malignant pemphigus.

Brödel's white line of kidney (*bro-del'*). A longitudinal white line found on the anterior surface of the kidney near the convex border; it is formed by the fusion of the whitish lines denoting the columns of Bertini.

Brodie's abscess (*bro'-de*) [Sir Benjamin Collins *Brodie*, English surgeon, 1783–1862]. Chronic abscess of bone, of tuberculous character, most frequently of the head of the tibia. **B.'s bursa,** a bursa beneath the inner head of the gastrocnemius. **B.'s disease,** pulpy disease of a joint, more especially the knee-joint; also spinal neuralgia following trauma, and often hysterical. **B.'s joint,** hysterical arthroneuralgia. **B.'s pain,** the pain caused by lifting a fold of the skin in the neighborhood of a joint in articular neuralgia.

Brodie's ligament (*bro'-de*) [J. Gordon *Brodie*, Scotch anatomist, 1786–1818]. The transverse humeral ligament.

Broesike's fossa (*bre'-sik-eh*) [Gustav *Broesike*, German anatomist, 1853–]. The parajejunal fossa, a recess in the peritoneal cavity which is situated in the first part of the mesojejunum and behind the superior mesenteric artery.

Brokaw ring (*brok'-aw*). A ring used in intestinal anastomosis, made of segments of rubber drainage-tubing and threaded with catgut strands.

brom-, bromo-. A prefix denoting the presence of bromine in a substance.

bromal (*bro'-mal*) [*brom-; aldehyde*], $CBr_3.CHO$. Tribromaldehyde, analogous to chloral, and produced by the action of bromine on alcohol. It is a colorless, oily fluid, of a penetrating odor and sharp, burning taste, boiling at 172°–173° C.; it has been used in medicine, having properties similar to those of chloral. **b. hydrate,** $CBr_3.CHO + H_2O$, a fluid of oily consistence, having a structure similar to that of chloral hydrate, but more irritating and narcotic than the latter. It is used as a hypnotic and in epilepsy. Dose 1–5 gr. (0.065–0.32 Gm.).

bromalbacid (*bro-mal'-bas-id*). A compound of bromine and albumin used as a sedative. Dose 15–30 gr. (1–2 Gm.).

bromalbumin (*bro-mal'-bū-min*). See *bromoalbumin*.

bromaldehyde (*bro-mal'-de-hīd*). A compound of bromine and aldehyde.

bromalin (*bro'-mal-in*), $C_6H_{12}N_4C_7H_5Br$. A substance occurring as a white, crystalline powder, soluble in water, melting at 200° C. It is a nerve-sedative and antiepileptic, used as a substitute for potassium bromide. Dose 30–60 gr. (2–4 Gm.) several times a day. Syn., *bromethylformin; hexamethylenetetraminebromethylate.*

bromalium (*bro-ma'-le-um*). Bromalin.

bromaloin (*bro-mal'-o-in*), $C_{17}H_{18}Br_2O_7$. A derivative of barbaloin by the action of bromine. Syn., *tribromaloin.*

bromamide (*bro'-mam-id*) [*brom-; amide*]. A bromine compound of the anilin group, with the formula $C_6H_2Br_3NH.HBr$. It contains 75% of bromine, and is used as an antipyretin doses of 10–15 gr. (0.65–1.0 Gm.).

bromargyrite (*bro-mar'-jir-īt*). Native silver bromide.

bromate (*bro-māt*) [*bromin*]. A salt of bromic acid.

bromatecrisis (*bro-mat-ek'-ris-is*) [*βρῶμα*, food; *ἔκκρισις*, excrement]. The passage of undigested food.

bromated (*bro'-ma-ted*). Mixed with bromine or any compound containing bromine.

bromatography (*bro-mat-og'-ra-fe*) [*βρῶμα*, food; *γράφη*, a writing]. A description of or treatise on foods.

bromatology (*bro-mat-ol'-o-je*) [*βρῶμα*, food; *λόγος*, a science]. The science of foods.

bromatometer (*bro-mat-om'-et-ur*) [*βρῶμα*, food; *μέτρον*, measure]. An instrument used in bromatometry.

bromatometry (*bro-mat-om'-et-re*). The estimation of the daily amount of food requisite for an individual.

bromatotherapy (*bro-mat-o-ther'-ap-e*) [*βρῶμα*, food; *θεραπεύειν*, to heal]. Treatment of diseased conditions by regulation of the diet.

bromatotoxicon (*bro-mat-o-toks'-ik-on*). A general term for the active agent in food-poisoning.

bromatotoxin (*bro-mat-o-toks'-in*) [*βρῶμα*, food; *τοξικόν*, poison]. A basic poison generated in food by the growth of microorganisms.

bromatotoxism (*bro-mat-o-toks'-izm*) [*βρῶμα*, food; *τοξικόν*, poison]. Poisoning with infected food.

brombenzoyl (*brom-ben'-zo-il*), $C_7H_4O.Br$. A crystalline substance obtained from oil of bitter almonds by action of bromine; it is soluble in alcohol and ether. Syn., *brombenzoylic acid.*

bromcaffeine (*brom-kaf-e'-in*), $C_8H_9BrN_4O_2$. A compound obtained by mixing 1 part of caffeine with 5 parts of bromine; melts at 206° C.

bromeigon (*bro-mi'-gon*). An insoluble compound of bromine and a proteid.

bromelin (*bro'-mel-in*) [*Bromelia*, a genus of plants]. A digestive principle, allied to trypsin, found in the juice of pineapples. It will digest 1500 times its weight of proteids.

bromethyl (*brōm'-eth-il*). See *ethyl bromide* under *bromine.* **b. formin.** See *bromalin.*

brometone (*bro-met-ōn*) [*brom-; acetone*]. A bromine derivative of acetone, analogous to chloretone. It is used as a nerve sedative instead of the bromides

bromgelatin (*brom-jel'-at-in*). A liquid containing a chemical combination of bromine and gelatin, dissolved in glycerin, potassium iodide, and water; it contains 2 % of bromine.

bromglidin (*brom-gli'-din*). A proprietary organic bromine compound: used as a nerve sedative.

bromhemol (*brōm'-he-mol*). A compound of hemol and 2.7% of bromine It is used when continued effect of bromine is desired. Dose 15–30 gr. (1–2 Gm.). Syn., *bromohemol.*

bromhidrosis. See *bromidrosis.*

bromhydrate (*brōm-hi'-drāt*). See *hydrobromate.*

bromhydric (*brōm-hi'-drik*). See *hydrobromic.* **b. ether,** hydrobromic ether.

bromic (*bro'-mik*). Containing or compounded with bromine.

bromide, bromid (*bro'-mīd, bro'-mid*). A salt of hydrobromic acid; the bromides of calcium, iron, ammonium, potassium, and sodium are used in medicine. They allay nervous excitement and are employed as sedatives. **b., basic,** a compound of a bromide with the oxide of the same base. **b. of ethyl.** See *ethyl bromide* under *bromine.*

bromidia (*bro-mid'-e-ah*). A proprietary hypnotic and anodyne.

bromidrosiphobia (*bro-mid-ros-e-fo'-be-ah*) [*βρῶμος*, a stench; *ἱδρώς*, sweat; *φόβος*, fear]. In-

sane dread of offensive personal smells, with hallucinations as to the perception of them.

bromidrosis (*bro-mid-ro'-sis*) [βρῶμος, a stench; ἱδρώς, sweat]. Osmidrosis; an affection of the sweat-glands in which the sweat has an offensive odor.

bromidum (*bro'-mid-um*). Bromide; a salt of bromine.

brominated, brominized (*bro'-min-a-ted, -īzd*). Combined with bromine.

bromine, bromum (*bro'-men, -mum*) [βρῶμος, a stench]. Br = 79.92 quantivalence I. A reddish-brown liquid which, at ordinary temperatures, gives off a heavy, suffocating vapor. It is a very active escharotic and disinfectant and internally violent poison. The salts of bromine are cerebrospinal and cardiac depressants, and are employed as sedatives, particularly in epilepsy, eclampsia, spasmodic affections, insomnia, hysteria, migraine, etc. The salts of the alkaline metals are those most commonly used. **bromidum ammonii** (U. S. P.), NH_4Br. Dose 5–20 gr. (0.32–1.3 Gm.). **b. blocks,** porous blocks of diatomaceous earth incinerated with calcium saccharate and impregnated with three times their weight of bromine, which is gradually given off by them. They are used as disinfectants. **bromidum calcii** (U. S. P.), $CaBr_2$. Dose 5 gr.–1 dr. (0.32–4.0 Gm.). **b. chloride,** BrCl (below 10° C.), a reddish-yellow, mobile, very volatile liquid. It is used as an internal and external caustic in cancer. **bromide, ethyl,** C_2H_5Br, useful in spasmodic coughs. Dose 10 min.–1 dr. (0.65–4.0 Cc.). **bromidi, ferri, syrupus,** contains 10% of the salt. Dose ½–1 dr. (2–4 Cc.). **b. iodide,** IBr_3, a dark-brown liquid, soluble in water; it is used as a gargle in diphtheria, in 0.1% solution. **bromidum lithii** (U. S. P.), LiBr. Dose 5–20 gr. (0.32–1.3 Gm.). **bromidum, nickel.** See *nickel.* **b. pentachloride,** $BrCl_5$, a caustic liquid. **bromidum potassii** (U. S. P.), KBr. Dose 5 gr.–1 dr. (0.32–4.0 Gm.). **bromidum sodii** (U. S. P.), NaBr. Dose 5 gr.–1 dr. (0.32–4.0 Gm.). **bromidum strontii** (U. S. P.), $SrBr_2$. Dose 15–20 gr. (1.0–1.3 Gm.). **bromidum, zinci** (U. S. P.), $ZnBr_2$. Dose ½–2 gr. (0.032–0.13 Gm.).

brominism. See *bromism.*

brominol (*bro'-min-ol*). A compound of bromine and sesame oil, containing 33% of bromine; another preparation contains only 10% of bromine.

bromiodide (*bro-mi-od-īd*). A compound formed from the bromide and the iodide of the same base.

bromiodoform (*bro-mi-o'-do-form*), $CHBr_2I$. A substitution-compound of bromine and iodoform

bromipin (*bro'-mip-in*). A liquid compound of bromine and sesame oil containing 10% of bromine. It is used as a sedative in epilepsy. Dose 1–3 teaspoonfuls daily.

bromism, brominism (*bro'-mizm, bro'-min-izm*) [*bromine*]. Certain peculiar phenomena produced by the prolonged administration of the bromides The most marked symptoms are headache, coldness of the extremities, feebleness of the heart's action, somnolence, apathy, anesthesia of the soft palate and pharynx, pallor of the skin, and a peculiar eruption of acne which is one of the earliest and most constant symptoms. There is also anorexia, and at times there are loss of sexual power and atrophy of the testes or mammæ.

bromite (*bro'-mīt*). 1. Native silver bromide. 2. A salt of bromous acid.

bromium (*bro'-me-um*). Bromine.

bromoalbumin (*bro-mo-al'-bū-min*). A compound of bromine (10%) and albumin; it is used in epilepsy. Syn., *bromalbumin; bromosin.*

bromocaffeine (*bro-mo-kaf'-e-in*) [*bromine; caffeine*]. A proprietary effervescing preparation containing caffeine. It is used for the relief of headaches.

bromocamphor (*bro-mo-kam'-for*). See *camphor, monobromated.*

bromocarpin (*bro-mo-kar'-pin*). Syrup of pilocarpine and potassium bromide, with orange syrup and glycerin.

bromochloralum (*bro-mo-klo-ral'-um*) [*bromo-; chloral*]. A proprietary antiseptic and disinfecting compound, containing the bromine and chloride of aluminum.

bromocoll (*bro'-mo-kol*) [*bromo-; κόλλα, glue*]. A product of the condensation of bromine, tannin, and gelatin; a light-brown, odorless, almost tasteless powder, containing 20% of bromine, soluble in alcoholic fluids. It is indicated when other bromides are not well borne. Dose 15–75 gr. (1–5 Gm.) a day; in epilepsy, 123 gr. (8 Gm.). Syn., *dibromotannic glue.*

bromoderma (*bro-mo-der'-mah*) [*bromo-; δέρμα, skin*]. A skin eruption due to ingestion of bromides.

bromodiethylacetylurea (*bro-mo-dī-eth-il-as-e-til-ū-re'-ah*). A new hypnotic; it is a white, tasteless, crystalline powder, slightly soluble in water.

bromoform (*bro'-mo-form*), $CHBr_3$. A bromide having a structure like that of chloroform, $CHCl_3$; it is sedative and anesthetic and is used in whooping-cough and in seasickness in doses of 2–5 min. (0.13–0.32 Cc.). Syn., *formobromide; formylbromide; methenyl tribromide; tribrommethane.*

bromoformin (*bro-mo-for'-min*). Bromethylate of hexamethylene tetramine; it is used as a sedative.

bromoformism (*bro-mo-form'-izm*) Poisoning with bromoform.

bromography (*bro-mog'-ra-fe*). Same as *bromatography.*

bromohematin (*bro-mo-hem'-at-in*). Hematin hydrobromide.

bromohemol. See *bromhemol.*

bromohydrate. See *hydrobromate.*

bromohydric. See *hydrobromic.*

bromohyperidrosis (*bro-mo-hi-per-id-ro'-sis*) [*bromo-; ὑπέρ, over; ἵδρωσις, a perspiring*]. A condition marked by excessive and offensive perspiration.

bromoiodism (*bro-mo-i'-o-dizm*) [*bromism; iodism*]. Poisoning by bromine and iodine compounds together.

bromol (*bro'-mol*), $C_6H_2Br_3OH$. Tribromophenol; an antiseptic substance used in the form of a powder, solution (1:30 olive oil), or ointment (1:10). Internally it is used in cholera infantum and typhoid fever. Dose $\frac{1}{10}$–½ gr. (0.006–0.02 Gm.).

bromolecithin (*bro-mo-les'-e-thin*). An organic compound containing 22 % of bromine.

bromolein (*brom-o'-le-in*). A combination of bromine (20%) and unsaturated oil of almonds.

bromolithia (*bro-mo-lith'-e-ah*). A proprietary remedy for gout.

bromomania (*bro-mo-ma'-ne-ah*). Insanity from excessive use of bromides.

bromomenorrhea (*bro-mo-men-or-e'-ah*) [βρῶμος, stench; μήν, month; ῥεῖν, to flow]. Disordered menstruation marked by offensiveness of the flow

bromophenol (*bro-mo-fe'-nol*). 1. See *bromol*. 2. C_6H_4BrOH. A violet-colored liquid obtained from phenol by action of bromine. It is used in a 1 to 2% ointment in treatment of erysipelas. Syn., *orthobromphenol*.

bromopnea, bromopnœa (*brom-op-ne'-ah*) [βρῶμος, stench; πνοία, breath]. Fetid breath.

bromopropylene (*bro-mo-pro'-pil-ēn*). See *allyl bromide*.

bromopyrine (*bro-mo-pi'-rin*). 1. $C_{11}H_{11}BrN_2O$, a substance used as is antipyrine, occurring in white needles, soluble in alcohol, chloroform, and hot water, melting at 114° C. Dose 5–15 gr. (0.3–1.0 Gm.). Syn., *monobromoantipyrin*. 2. A proprietary mixture said to consist of antipyrine, caffeine, and sodium bromides.

bromoseltzer (*bro-mo-selt'-zer*). A proprietary headache remedy.

bromoserum (*bro-mo-se'-rum*). A solution of 6 parts of sodium bromide and 1.5 parts of sodium chloride in 1000 parts of water. It is used by injection as a substitute for bromides.

bromosin (*bro'-mo-sin*). See *bromoalbumin*.

bromosoda (*bro-mo-so'-da*). A proprietary remedy for dyspepsia.

bromous (*bro'-mus*). Containing bromine united with oxygen in the same proportion as in the chlorous compounds.

bromphenols (*brom-fe'-nolz*). A series of bromated phenols occurring at times in the precipitates of tested urine.

bromum (*bro'-mum*). See *bromine*.

bromural (*bro'-mū-ral*). Monobrom-iso-valeryl-urea; a white crystalline powder, soluble in hot water; it contains about 35% of bromine, and is used as a hypnotic. Dose gr. 5–10 (0.3–0.6).

bromurated (*bro'-mū-ra-ted*). Containing bromine or a bromine salt.

bromuret (*bro'-mū-ret*). Any bromide.

bronchadenitis (*brongk-ad-en-i'-tis*) [*broncho-*; ἀδήν, gland; ῖτις, inflammation] Inflammation of the bronchial lymphatic glands.

broncheopyra (*brong-ke-o-pi'-rah*) [*bronchus*; πῦρ, fire]. A suffocating cough.

bronchi (*brong-ki*) [L.]. The plural of bronchus. The two tubes into which the trachea divides opposite the third dorsal vertebra, called respectively the right and the left bronchus.

bronchia (*brong'-ke-ah*) [βρόγχος, the windpipe]. The bronchial tubes, especially those that are smaller than the two bronchi.

bronchiadenoscirrhus (*brong-ke-ad-en-o-skir'-us*) [*bronchus*; ἀδήν, a gland; σκιῤῥός, hard]. Scirrhus of the bronchial glands.

bronchial (*brong'-ke-al*) [*bronchus*]. Relating to the bronchi. **b. arteries.** See under *artery*. **b. crises,** dyspneic paroxysms occurring in locomotor ataxia. **b. fluke.** See *Distoma Ringeri*. **b. glands,** the chain of lymphatic glands running beside the bronchi. **b. tube,** a bronchus, or one of its subdivisions.

bronchiarctia (*brong-ke-ark'-she-ah*). See *bronchostenosis*.

bronchiectasis (*brong-ke-ek'-tas-is*) [*bronchus*; ἔκτασις, dilatation]. Dilatation of the walls of the bronchi. It occurs in chronic bronchitis, in fibroid pneumonia, and in tuberculosis of the lung. It may involve a tube uniformly, producing the *cylindrical* form; or it may occur irregularly in sacs or pockets—the *sacculated* form. The characteristic symptom of bronchiectasis is paroxysmal coughing, with the expectoration of large quantities of mucopurulent, often fetid, matter. Cavernous breathing may be heard over the dilated tubes.

bronchiectatic (*brong-ke-ek-tat'-ik*). Pertaining to or affected with bronchiectasis.

bronchiloquy (*brong-ki'-lo-kwe*) [*bronchus*; *loqui*, to speak]. Bronchophony.

bronchiocele (*brong'-ke-o-sēl*) [*bronchiolus*, a little air passage; κήλη, tumor]. A swelling or dilatation of a bronchiole.

bronchiocrisis (*brong-ke-o-kri'-sis*) [*bronchus*; *crisis*]. Paroxysmal coughing in tabes dorsalis.

bronchiogenic (*brong-ke-o-jen'-ik*) [*bronchus*; γένεσις, origin]. Arising in the bronchi.

bronchiole (*brong'-ke-ōl*) [dim. of *bronchus*]. One of the smallest subdivisions of the bronchi.

bronchiolectasis (*brong-ke-o-lek'-ta-sis*) [*bronchiole*; ἔκτασις, dilation]. A rare form of bronchiectisis diffused to all parts of the lung, making a appear as if riddled with small cavities.

bronchioli (*brong'-ke-o-li*). Bronchioles

bronchiolitis (*brong-ke-o-li'-tis*) [*bronchiole*, ῖτις, inflammation]. Inflammation of the bronchioles. **b., asthmatic.** See *b., exudative*. **b., exudative, b. exudativa,** an inflammation of the bronchioles, with exudation, a condition by some held to be the cause of bronchial asthma. **b. fibrosa obliterans, b. obliterans, b., o literating fibrous,** bronchiolitis resulting in obliteration of the finest bronchioles by connective-tissue plugs.

bronchiolus (*brong-ki-o'-lus*) [*dim. of bronchus*, pl. *bronchioli*]. A bronchiole.

bronchiospasmus (*brong-ke-o-spaz'-mus*) [*bronchus*; *spasm*]. Spasm of the bronchi.

bronchiostenosis (*brong-ke-o-ste-no'-sis*) [*bronchus*; στένος, narrow]. Contraction of a bronchus or of any one or more of the bronchial tubes.

bronchismus (*brong-kis'-mus*). Suffocative bronchial spasm due to spinal paralysis.

bronchitic (*brong-kit'-ik*) [*bronchitis*]. Relating to, of the nature, or affected with, bronchitis.

bronchitis (*brong-ki'-tis*) [*bronchus*; ῖτις, inflammation]. Inflammation of the mucous membrane of the bronchial tubes. Syn., *pleuritis bronchialis*. **b., acute,** is due to exposure to cold, to the inhalation of irritant vapors, to certain infectious agents, etc. It is characterized by fever, cough, substernal pain, and by dry rales in the early, and moist rales in the later, stages. **b., capillary,** an acute bronchitis of the finer bronchioles; it is generally the result of a downward extension of an acute bronchitis. Children are most frequently affected. Dyspnea, nervous depression, and cyanosis are prominent symptoms. Catarrhal pneumonia is a common complication. **b., catarrhal,** a form attended with profuse mucopurulent discharges. **b., chronic,** a form of bronchitis usually occurring in middle or advanced life, characterized by cough and by dry and moist rales. It may be due to repeated attacks of acute bronchitis, to gout, rheumatism, or tuberculosis, or it may be secondary to cardiac and renal disease. **b. convulsiva,** whooping cough. **b., croupous, b., fibrinous, b., plastic,** a rare variety attended with the expectoration of casts of the bronchial tubes, containing Charcot-Leyden crystals and eosinophile cells, after a paroxysm of dyspnea and violent coughing. **b., dry,** that unattended by expectoration. **b., mechanical,** a form caused by the inhalation of dust, etc. **b.,**

phthinoid, a consumptive form with purulent sputum. **b. potter's.** Same as *b., mechanical.* **b., putrid, b., fetid,** a variety of chronic bronchitis characterized by the discharge of a copious, half-liquid, extremely offensive sputum. **b., secondary,** one which develops as a complication of some preceding disease. **b., suffocative, b. suffocans,** acute capillary bronchitis. **b., summer,** hay-fever.

bronchium (*brong'-ke-um*) [L.; *pl. bronchia*]. A bronchial tube.

bronchlemmitis (*brong-klem-i'-tis*) [*bronchus; λέμμα*, a skin]. Croupous bronchitis.

broncho- (*brong-ko*) [*bronchus*]. A prefix meaning relating to the bronchi.

bronchoægophony (*brong-ko-e-goff'-o-ne*). See *bronchoegophony.*

bronchoalveolar (*brong-ko-al-ve'-o-lar*). Same as *bronchovesicular*

bronchocavernous (*brong-ko-kav'-er-nus*). Both bronchial and cavernous; applied to respiration.

bronchocele (*brong'-ko-sēl*) [*broncho-; κήλη*, a tumor]. Really a tumor of a bronchus, but generally meaning goiter. **b., aerial.** See *aerocele.*

bronchocephalitis (*brong-ko-sef-al-i'-tis*). Synonym of *whooping-cough.*

bronchoconstriction (*brong-ko-kon-strik'-shun*). The narrowing of the caliber of the pulmonary air-passages.

bronchoconstrictor (*brong-ko-kon-strik'-tor*). Constricting the caliber of the air-passages of the lungs.

bronchodilatation (*brong-ko-dil-at-a'-shun*) [*broncho-; dilatation*]. Dilatation of the bronchi or bronchioles; bronchiectasis.

bronchodilator (*brong-ko-di-la'-tor*). Dilating the caliber of the air-passages of the lungs.

bronchoegophony (*brong-ko-e-goff'-o-ne*) [*broncho-; αἴξ*, a goat; *φωνή*, a voice, sound]. Bronchophony combined with egophony.

bronchoesophagoscopy (*brong-ko-e-sof-ag-os'-ko-pe*) [*broncho-; esophagus; σκοπεῖν*, to view]. Inspection of the interior of the bronchi and esophagus.

bronchohemorrhagia (*brong-ko-hem-or-a'-je-ah*). Extravasation of blood from the lining membrane of the bronchial tubes.

broncholemmitis (*brong-ko-lem-i'-tis*). See *bronchlemmitis.*

broncholith, broncholite (*brong'-ko-lith, brong'-ko-lit*) [*broncho-; λίθος*, a stone]. A calculus or concretion formed in a bronchial tube.

broncholithiasis (*brong-ko-lith-i'-a-sis*) [*broncho-; lithiasis*]. The formation of calculi in the bronchial apparatus.

Bronchomoniliasis (*brong-ko-mo-nil-i'-as-is*). Invasion of the bronchi by Monilia.

bronchomotor (*brong-ko mo'-tor*). Affecting the caliber of the bronchial apparatus.

bronchomycosis (*brong-ko-mi-ko'-sis*) [*broncho-; mycosis*]. The growth or presence of fungi in a bronchial tube.

bronchopathy (*brong-kop'-a-the*) [*broncho-; πάθος*, disease]. Any disease of a bronchus.

bronchophonic (*brong-ko-fon'-ik*) [*broncho-; φωνή*, a voice]. Relating to bronchophony.

bronchophony (*brong-kof'-o-ne*) [*broncho-; φωνή*, the voice]. The resonance of the voice within the bronchi as heard on auscultating the chest. It is normally present over the lower cervical spines, in the upper interscapular region, and over the sternal portion of the infraclavicular regions. The most frequent pathological cause is consolidation of the lung. **b., accidental,** that due to disease. **b., pectoriloquous.** See *pectoriloquy.* **b., whispered,** bronchophony elicited by causing the patient to whisper.

bronchophthisis (*brong-ko-thi'-sis*) [*broncho-; φθίσις*, a wasting]. Pulmonary tuberculosis marked by extensive lesions of the bronchial tubes.

bronchophyma (*brong-ko-fi'-mah*) [*broncho-; φύμα*, a growth]. Any growth, as a tubercle, in a bronchial tube.

bronchoplasty (*brong'-ko-plas-te*) [*broncho-; πλάσσειν*, to form]. The closure of a tracheal or bronchial fistula by operation.

bronchoplegia (*brong-ko-ple'-je-ah*) [*broncho-; πλήγή*, a blow]. Paralysis of the bronchial tubes.

bronchopleurisy (*brong-ko-plu'-ris-e*). Bronchitis existing with pleurisy.

bronchopleuropneumonia (*brong-ko-plu-ro-nū-mo'-ne-ah*). Coexistent bronchitis, pleurisy, and pneumonia.

bronchopneumonia (*brong-ko-nū-mo'-ne-ah*) [*broncho-; pneumonia*]. Lobular pneumonia, a term applied to inflammation of the lungs, which, beginning in the bronchi, finally involves the parenchyma of the lungs. This disease is most frequently encountered in children, but may occur in old age, and may be a simple catarrhal or a tuberculous process. Syn., *bronchiopneumonia; bronchoalveolitis; bronchopneumonitis; catarrhal pneumonia; microbronchitis.*

bronchopneumonitis (*brong-ko-nū-mon-i'-tis*). Bronchopneumonia.

bronchopulmonary (*brong-ko-pul'-mon-a-re*). Relating to the bronchi and lungs.

bronchorrhagia (*brong-kor-a'-je-ah*) [*broncho-; ῥηγνύναι*, to burst forth]. Hemorrhage from the bronchial tubes.

bronchorrhaphy (*brong-kor'-af-e*) [*broncho-; ῥάφειν*, to sew]. Suturing a bronchus.

bronchorrhea, bronchorrhœa (*brong-kor-e'-ah*) [*broncho-; ῥεῖν*, to flow]. A form of bronchitis attended with profuse expectoration. Syn., *blennorrhagia pulmonum; bronchoblennorrhea* **b., serous,** a form in which the sputum is serous.

bronchorrhoncus (*brong-kor-ong'-kus*). A bronchial rale.

bronchoscope (*brong'-ko-skōp*) [*broncho-; σκοπεῖν*, to look]. An instrument employed for the direct inspection of the interior of a bronchus.

bronchoscopy (*brong-kos'-ko-pe*). Inspection of the interior of the bronchial tubes.

bronchospasm (*brong'-ko-spazm*) [*broncho-; spasm*]. Bronchial spasm.

bronchostenosis (*brong-ko-ste-no'-sis*) [*broncho-; στενός*, narrow]. Contraction of a bronchus.

bronchostomy (*brong-kos'-to-me*) [*bronchus; στόμα*, mouth] The making of an opening through the chest-wall into a bronchus.

bronchotetany (*brong-ko-tet'-an-e*) [*broncho-; tetany*]. A condition characterized by extreme dyspnea caused by spasm of the muscles in the bronchi preventing the access of air to the lungs.

bronchotome (*brong'-ko-tōm*) [*broncho-; τέμνειν*, to cut]. An instrument for cutting the trachea or a bronchus in the operation of bronchotomy.

bronchotomy (*brong-kot'-o-me*) [see *bronchotome*]. Incision into the trachea, or bronchus.

bronchotracheal (*brong-ko-tra'-ke-al*) [*broncho-; τραχεῖα*, the windpipe]. Relating to a bronchus (or to both bronchi) and to the trachea.

bronchovesicular (*brong-ko-ves-ik'-ū-lar*) [*broncho-; vesicula*, a vesicle]. Both bronchial and vesicular. See *breath-sounds, table of.*

bronchus (*brong'-kus*) [*βρόγχος*, bronchus; pl., *bronchi*]. One of the primary divisions of the trachea. **b., eparterial,** the first branch of the

right bronchus situated above the right pulmonary artery. **b., hyparterial,** the left bronchus and the remaining branches of the right bronchus, situated below the pulmonary artery.

bronzed (*bronzd*). Tanned; of a bronzed color. **b. skin,** a symptom of Addison's disease. **b.-skin disease.** See *Addison's disease.*

brood-cells, in cell-division, the mother-cells inclosing the daughter-cells.

Brooke's ointment. An ointment containing mercuric oleate ointment (5 %) and compound zinc paste, 41 parts of each; salicylic acid, 6; and ichthyol, 12 parts.

broom. See *Scoparius.*

brossage (*bro-sazh*) [Fr. "brushing"]. Treating granulations with a stiff brush, as in trachoma.

Brossard's type of progressive muscular atrophy (*bros-ar'*). "Femoral type with a claw-like appearance of the toes." See *Eichhorst's type.*

broth. See *bouillon.*

broussaisism (*broo-sa-izm*) [François Joseph Victor *Broussais,* French physician, 1772–1838]. The opinion that gastro-intestinal irritation is the prime cause of disease.

brovalol (*bro'-val-ol*). Trade mark identifying a bromisovaleric acid ester of borneol, said to contain 25% of bromine.

brow (*brow*) [AS., *brū*]. The forehead; the supercilliary ridge; the eyebrow; the upper anterior portion of the head. **b.-ache, b.-ague,** neuralgia of the first division of the fifth cranial nerve, generally due to malaria. **b.-pang.** Synonym of *hemicrania.* **b. presentation,** presentation of the fetal brow in labor.

brown (*broun*) [AS., *brūn*]. Having a dark color inclining toward red or yellow. **b. atrophy,** an atrophy of a tissue associated with a deposit therein of a brown or yellow pigment. **b., Bismarck-** See *Bismarck-brown.* **b. induration of lung,** a state of the lung due to long-continued congestion, usually arising from valvular heart disease. It is characterized by an increase in connective tissue and an excess of pigment. **b. mixture,** mistura glycyrrhizæ composita. **b. ointment,** the unguentum fuscum (N. F); called also unguentum matris, or "mother's salve." It is composed of "brown plaster," 2 parts; oil, 1 part; suet, 1 part. **b. plaster,** the emplastrum fuscum camphoratum (N. F.); called also emplastrum matris camphoratum, or "camphorated mother's plaster;" official in German pharmacy. It is made of red oxide of lead, 30 parts; olive-oil, 60 parts; yellow wax, 15 parts; camphor, 1 part.

Brown's phenomenon. See *Brownian movement.*

Browne's (Crichton) sign. Tremor of the labial commissures and outer angles of the eyes in the early stage of paralytic dementia.

Brownian movement [Robert *Brown,* English botanist, 1773–1858]. An oscillatory movement observed under the microscope in very fine granules, drops, etc., when suspended in a liquid. The movement is not locomotion, and is to be distinguished from that of the self-motility of living microorganisms. Its cause is not definitely known, but it may be due to heat, light, electricity, osmosis, etc. Same as *pedesis.*

Brownism (*brown-izm*). See *brunonian theory.*

Brown-Séquard's paralysis (*sa-kar'*) [Charles Edouard *Brown-Séquard,* French physiologist and neurologist, 1817–1897]. Paralysis and hyperesthesia of one side and anesthesia of the other side of the body. **B.-S.'s syndrome.** See *B.-S.'s paralysis.*

Bruce and Muir, septomarginal tract of. A part of the descending posteromedial tract of the spinal cord.

Bruce's nodes. Small bony or calcified nodules at the margins of the joints, observed in chronic gout and septic arthritis.

Bruce's septicemia [David *Bruce,* English surgeon]. Malta fever.

Brucea (*broo-se'-ah*) [*Bruce,* the Abyssinian explorer (1730–1794)]. A genus of plants of the order *Simarubeæ. B. ferruginea* is an Abyssinian species. *B. sumatrana* is a species of the Asiatic tropics and of Australia; all parts of the plant are bitter, tonic, febrifuge, vermifuge, and antidysenteric.

Bruch's glands (*brook*) [Carl Wilhelm Ludwig *Bruch,* German anatomist, 1819–1884]. Lymph-follicles found in the conjunctiva about the inner canthus of ruminants. **B.'s layer, B.'s membrane,** the lamina basalis which forms the inner boundary of the choroid.

brucine (*broo'-sēn*) [*Brucea*], $C_{23}H_{26}N_2O_4$. A poisonous alkaloid found in *Strychnos nux-vomica* and in *Strychnos ignatia.* It crystallizes in prisms containing $4H_2O$, and melts at 178°. Its taste is exceedingly bitter and acrid. Its action on the animal economy is similar to, but much less powerful than, that of strychnine. Dose $\frac{1}{12}$–$\frac{1}{4}$ gr. (0.005–0.03 Gm.); maximum dose $\frac{1}{4}$ gr. (0.05 Gm.), single; 3 gr. (0.2 Gm.) a day. Antidotes: chloral, chloroform, tannic acid. Syn., *brucia; brucinum; brucium; pseudo-angustin; vomicine.* **b. hydrobromide,** $C_{23}H_{26}N_2O_4.HBr$, a substitute for strychnine in ophthalmic surgery; it is 40 times less poisonous. **b. hydrochloride,** $C_{23}H_{26}N_2O_4.HCl$, small white crystals, soluble in water; used as is brucine. **b. nitrate,** $C_{23}H_{26}N_2O_4.HNO_3 + 3H_2O$, white crystalline powder, soluble in water; used as is brucine. **b. phosphate,** $(C_{23}H_{26}N_2O_4).H_3PO_4$, white, crystalline powder, soluble in water; use and dose the same as those of brucine. **b. sulphate,** $(C_{23}H_{26}N_2O_4)_2HS_2O_4 + 3\frac{1}{2}H_2O$, white, microscopic crystals, soluble in water and alcohol; use and dosage the same as those of brucine.

Bruck's disease. A syndrome described by Bruck as consisting of multiple fractures and marked deformity of bones, ankylosis of most of the joints, and muscular atrophy.

Brudzinski's signs (*brood-sin'-ske*). [J. *Brudzinski,* Polish physician, 1874–1917]. 1. In meningitis, if the neck of the patient is bent forwards, flexion occurs at the hip, knee and ankle. 2. In meningitis, when forcible flexion of the lower limb on one side is made, flexion or extension will be observed in the opposite limb; this is also called *contralateral reflex.*

Bruecke's lines (*brook'-eh*) [Ernst Wilhelm *Bruecke,* Austrian physiologist, 1819–1892]. The broad bands which alternate with Krause's membranes in the fibrils of striated muscles. **B.'s muscle.** 1. See *Bowman's muscle.* 2. The muscularis mucosæ of the small and large intestine. **B.'s reagent for proteids,** saturate a boiling 10% solution of potassium iodide with freshly precipitated mercuric iodide. Filter when cool; the filtrate is used with hydrochloric acid as a precipitant for the proteids. **B.'s tunica nervea,** the layers of the retina, exclusive of the rods and cones.

Bruenninghausen's method (*broo'-ning-how-sen*) [Herman Joseph *Bruenninghausen,* German phy-

sician, 1761–1834]. The induction of premature labor by dilating the cervix uteri.

Bruggiser's hernia. See *Kroenlein's hernia.*

Bruhl's disease (*brool*). Splenic anemia accompanied with fever.

bruise (*brooz*). See *contusion.*

bruissement (*broo-e-smahn'*) [Fr.]. A purring sound heard on auscultation.

bruit (*broo-e'* [Fr., "a noise or report"]. An adventitious sound heard on auscultation. For kinds—*amphoric, rotatory,* etc.—see *murmur.* **b., aneurysmal,** the blowing murmur heard over an aneurysm. **b. d'airain,** the ringing note heard through the stethoscope applied to the chest-wall when a coin is struck against another pressed against the surface of the chest on the opposite side. It is pathognomonic of a collection of gas in the pleural cavity. **b. de clapôtement,** a splashing sound often heard in cases of well-marked dilatation of the stomach when pressure is made upon the abdominal walls. **b. de craquement, b. de cuir neuf,** the creaking sound, like that of new leather, sometimes heard in pericarditis. **b. de diable,** a humming, rushing sound heard in the veins in anemia. **b. de drapeau,** a rustling murmur heard in croup and laryngitis. **b. de froissement,** a clashing sound of the lungs or heart. **b. de galop,** a cantering rhythm of the heart-sounds, in which, owing to a reduplication of the second sound, three sounds are heard. It occurs most frequently in mitral stenosis. **b. de lime,** a cardiac sound as if made by a file or saw. **b. de. moulin,** the water-wheel sound. **b. de pot fêlé,** the cracked-pot sound. **b. de rappel,** a sound resembling the double beat upon a drum. **b. de scie.** Same as *b. de lime.* **b. de souffiet,** the bellows-murmur. **b., placental,** the uterine souffle, a blowing sound heard over the uterus in pregnancy.

Brun's law (*broon*). Same as *Bastian's law, q. v.*

Brun's test for uric acid in minute particles. Examine the particle in naphthalin monobromide, the index of refraction of which is 1.66. Compare this with indexes of refraction of uric acid, 1.73; calcium oxalate, 1.60; calcium phosphate, 1.63. If on raising the tube of the microscope the crystal becomes brilliant, the substance under the microscope has a higher index than the fluid in which it is immersed; it becomes darker if the substance has a lower index than the fluid.

brunet, or **brunette** (*broo-net'*) [Fr.]. 1. Of a dark complexion. 2. One with a dark complexion.

Brunfelsia (*brun-fel'-se-ah*) [O. *Brunfels,* a botanist of Metz, 1464–1534]. A genus of plants of the order *Saponaceæ.* A syrup made from the fruit of *B. americana,* a West Indian species, is used as a tonic in recovery from diarrhea. *B. uniflora,* of Brazil, is purgative, emetic, and emmenagogue. Syn., *mercurio vegetal.*

Brunn's cell-nests, B.'s epithelial nests (*broon*) [Albert von *Brunn,* German anatomist, 1849–1895]. Branched or solid groups of flat epithelial cells occurring in all normal bladders. **B.'s glands.** See *Brunner's glands.* **B.'s layer, B.'s membrane,** the stratum of more or less pyramidal epithelial cells forming the deep layer of the nasal mucous membrane.

Brunner's glands (*broo'-ner*) [Johann Conrad *Brunner,* Swiss anatomist, 1653–1727]. The racemose glands found in the wall of the duodenum

brunol (*broon'-ol*). Butyl salicylate, a local application for burns.

Brunonian movement. See *Brownian movement.* **B. theory,** Brownism; a doctrine, taught by Dr. John Brown (1735–88), that both physiological and pathological phenomena are due to variations in a natural stimulus, its excess causing sthenic, and its deficiency producing asthenic, diseases.

Bruns's disease [John Dickson *Bruns,* American physician, 1836–1883]. Chronic malaria complicated with consolidation of the apices of the lungs; pneumonopaludism.

Bruns's symptom. A sudden change in the position of the head causes vertigo, vomiting, and falling to the ground; observed in cysticercus and tumors of the fourth ventricle of the brain.

brush [OF., *broce*]. An instrument consisting of a collection of some flexible material fastened to a handle. In medicine various forms of brushes are employed, as the *acid brush,* of glass threads; the *electric brush,* an electrode in the form of a brush; the *laryngeal brush;* the *nasal, pharyngeal,* and *stomach brush.* **b.-burn,** the injury produced by violent friction and the resulting heat; it often resembles a burn or scald **b., terminal.** See *motorial end-plate.*

Bryant's ampulla (*bri'-ant*) [Thomas *Bryant,* English surgeon]. The apparent distention of an artery immediately above a ligature, due to the contraction of the vessel above the ampulla, where it is not completely filled by the clot. **B.'s iliofemoral triangle,** the rectangle formed by a vertical line dropped from the anterior superior iliac spine to the horizontal plane of the body; by a second line drawn from the anterior superior iliac spine to the tip of the trochanter, and by a third, the "test-line," which joins the two at a right angle to the vertical line. Shortening of the neck of the femur will be indicated by a shortening of the test-line. **B.'s line,** the vertical line forming one of the boundaries of the iliofemoral triangle. **B.'s operation,** for *lumbar colotomy;* an oblique incision is made midway between the last rib and the iliac crest. The bowel is fixed in position and opened

THOMAS BRYANT.

Bryce's test [James *Bryce,* Scotch physician]. For vaccinal infection: the inoculation is repeated at a certain period in the evolution of vaccinia, upon the theory that systemic infection does not take place at once, but only after the

lapse of a number of days from the time of inoculation.

brygmus (*brig'-mus*) [*βρυγμός*, biting]. Same as *odontioprisis*.

bryology (*bri-ol'-o-je*) [*βρύον*, a moss; *λόγος*, a science]. The science of mosses.

bryonia (*bri-o'-ne-ah*) [*βρυωνία*, bryony]. Bryony. The root of *B. alba* and *B. dioica*, indigenous to Europe. Its properties are due to an intensely bitter glucoside, *bryonin*, $C_{48}H_{80}O_{19}$, which is a strong irritant when applied to the skin or mucous membrane, often producing vesication. It is used in pleurisy, pleuropneumonia, rheumatic fever, and colds. Dose of the *powdered root* 10–30 gr. (0.65–2.0 Gm.); of the *infusion* (1:16) ½–2 oz. (15–60 Cc.); of the *tincture*, a 10% solution of the root in alcohol, 1–2 dr. (4–8 Cc.).

bryonidin (*bri-on'-id-in*). A glucoside isolated from *Bryonia alba*, more active than bryonin.

bryonin (*bri'-o-nin*). See under *bryonia*.

bryony (*bri-o'-nē*). See *bryonia*.

bryoplastic (*bri-o-plas'-tik*) [*βρύον*, moss; *πλάσσειν*, to form]. A descriptive term loosely applied to such abnormal growths of tissue as resemble vegetable forms.

Bryson's sign (*bri'-sun*) [Alexander *Bryson*, English physician, 1802–1860]. In exophthalmic goiter there is a diminution in the inspiratory enlargement of the thorax.

B. S. Abbreviation for (1) Bachelor of Science and (2) Bachelor of Surgery.

B. Sc. Abbreviation for Bachelor of Science.

B. T. U. Abbreviation for Board of Trade Unit; it = 1000 watt-hours.

bubas (*boo'bahs*). Yaws. **b. braziliana**, espundia.

bubo (*bū'-bo*) [*βουβών*, the groin]. Inflammation and swelling of a lymphatic gland, particularly of the groin, and usually following chancroid, gonorrhea, or syphilitic infection. Syn., *adin, inguinal adenitis; sympathetic abscess.* **b., absorption.** See *b., virulent* **b., indolent**, one with enlargement and hyperplasia without the formation of pus or any tendency to break down. Syn., *adenitis e blennorrhœa; adenitis e sclerosi.* **b., parotid.** See *parotitis.* **b., pestilential**, that associated with the plague. **b., primary**, a slight adenitis of the groin due to mechanical irritation or other cause; formerly supposed to be due to syphilis without a chancre having preceded. **b., rheumatic**, a hard lump, occurring oftenest on the back of the neck, as a sequel of acute articular rheumatism. **b., serpiginous**, an ulcerated bubo which changes its seat or in which the ulceration extends in one direction while healing in another. **b., simple.** See *b., sympathetic.* **b., strumous**, hypertrophied glands forming a large indolent swelling in a scrofulous subject. **b., sympathetic**, one caused by irritation, friction, injury, etc., and not arising from an infectious disease. **b., syphilitic**, that which appears in syphilis a few days after the primary lesion. It runs a slow course of six months or more. Syn., *primitive syphilitic adenitis.* **b., venereal**, that due to venereal disease. **b., virulent**, an ulcerated, suppurating bubo due to absorption of the virus of a chancre. Syn., *chancrous adenitis.*

bubon d'emblée [Fr.]. See *bubo, primary.*

bubonadenitis (*bū-bon-ad-en-i'-tis*) [*bubo; ἀδήν*, a gland; *ῖτις*, inflammation]. Inflammation of an inguinal gland.

bubonalgia (*bū-bon-al'-je-ah*) [*bubo; ἄλγος*, pain]. Pain in the inguinal region.

bubonic (*bū-bon'-ik*) [see *bubo*]. Relating to a bubo. **b. plague.** Synonym of *plague.*

bubonocele (*bū-bon'-o-sēl*) [*βουβών*, the groin; *κήλη*, hernia]. Inguinal hernia when the gut does not extend beyond the inguinal canal.

bubononcus (*bū-bon-ong'-kus*) [*bubo; ὄγκος*, a tumor]. A swelling in the groin

bubonopanus (*bū-bon-o-pa'-nus*) [*bubo; πῶνος*, torch]. An inguinal bubo.

bubonulus (*bū-bon'-ū-lus*) [L., dim. of *bubo*]. Lymphangitis of the dorsum of the penis, often with abscesses; due to chancroidal virus.

bubophthalmia (*bū-bof-thal'-me-ah*). See *keratoglobus.*

bucardia (*bū-kar'-de-ah*) [*βοῦς*, ox; *καρδία*, heart]. Cor bovinum; see *bovine heart.*

bucca (*buk'-ah*) [L. *gen.* and *pl.*, *buccæ*]. 1. The cheek; the hollow of the cheek, or its inner surface. 2. The mouth.

buccal (*buk'-al*) [*bucca*, the cheek]. Pertaining to the cheek or mouth. **b. coitus**, sexual perversion where gratification is found by mouth.

buccellation (*buk-sel-a'-shun*) [*bucella*, a morsel]. Hemostasis by a lint compress.

buccilingual (*buk-se-ling'-wal*) [*bucca; lingua*, the tongue]. Relating to the cheek and the tongue.

buccinatolabialis (*buk-sin-at-o-la-be-a'-lis*). The buccinator and orbicularis oris regarded as one.

buccinator (*buk'-sin-a-tor*) [L., "a trumpeter"]. The thin, flat muscle of the cheek. See *muscles, table of.*

buccobranchial (*buk-o-brang'-ke-al*). Relating to the mouth and the branchial cavity.

buccocervical (*buk-o-ser'-vik-al*) [*bucca*, cheek; *cervix*, neck]. Pertaining to the cheek and the neck.

buccogingival (*buk-o-jin'-jiv-al*). Pertaining to the cheek and the gums.

buccolabial (*buk-o-la'-be-al*) [*bucca*, cheek; *labium*, lip] Pertaining to the cheek and the lip.

buccolingually (*buk-o-lin'-gwal-e*). From the cheek toward the tongue.

buccopharyngeal (*buk-o-far-in'-je-al*) [*bucca*, the mouth; *pharynx*]. Relating to the mouth and to the pharynx.

buccula (*buk'-ū-lah*) [L., dim. of *bucca*]. The fleshy fold seen beneath the chin, and forming what is called a double chin.

Buchner's albuminoid bodies (*bookh'-ner*). Defensive proteids. **B.'s humoral theory of immunity.** This supposes that a reactive change has been brought about in the integral cells of the body by the primary affection from which there has been recovery, and this change is protective against similar invasions of the same organism.

buchu (*bū'-kū*) [native African]. The leaves of several species of *Barosma*, yielding a volatile oil, to which its properties are probably due, and a bitter extractive, barosmin. Dose 1–5 gr. (0.065–0.32 Gm.). It causes a sensation of glowing warmth over the body, stimulates the appetite, and increases the circulation. It is useful in cystitis and other affections of the genitourinary mucous membrane. Dose of the *leaves* 15–30 gr. (1–2 Gm.). **b., fluidextract of** (*fluidextractum buchu*, U. S. P.). Dose 10 min.–1 dr. (0.65–4.0 Cc.). **b., infusion of** (*infusum buchu*, B. P.). Dose 1–4 oz. (30–120 Cc.). **b. resin**, barosma. **b., tincture of** (*tinctura buchu*, B. P.). Dose 1–2 dr. (4–8 Cc.).

Buchwald's atrophy (*buk-volt*). Idiopathic, diffuse, progressive atrophy of the skin.

Buck's extension [Gurdon *Buck*, American surgeon, 1807–1877]. An apparatus consisting of a weight and pulley for applying extension to a limb. **B.'s fascia**, the sheath of the corpora cavernosa and the corpus spongiosum, which arises from the symphysis pubis by the suspensory ligament of the penis and is continuous with the deep layer of the superficial perineal fascia.

buck-bean (*buk'-bēn*). Bog-bean. The rhizome of *Menyanthes trifoliata*, tonic, antiscorbutic, and emmenagogue. It has been recommended as a vermifuge, and has been used in functional amenorrhea. Dose of *fluidextract* 5–30 min. (0.32–2.0 Cc.).

bucket fever. *Dengue, q. v.*

buckeye bark (*buk'-i bark*). The bark of *Æsculus glabra*, astringent and tonic, used in rectal irritation, prolapse, and various uterine derangements. Dose of *fluidextract* 3–5 min. (0.2–0.32 Cc.).

buckling (*buk'-ling*). The disintegration of the surface of the plates of a storage battery.

buckthorn (*buk'-thorn*). See *frangula* and *rhamnus*. **b., California.** See *cascara sagrada*.

bucnemia (*buk-ne'-me-ah*) [βοῦς, an ox; κνήμη, the leg]. Inflammation of the leg, characterized by tenseness and swelling; elephantiasis; also phlegmasia dolens. **b. tropica**, elephantiasis arabum.

Budd's cirrhosis [William *Budd*, English physician, 1811–1880]. Hepatic cirrhosis due to autointoxication from the gastrointestinal tract. **B.'s jaundice.** See *Rokitansky's disease*.

Budde's method (*bood'-deh*) [G. *Budde*, Danish chemist]. A method of preserving milk. To a quart of fresh milk 12 Cc. of a 3% solution of peroxide of hydrogen is added; the mixture is heated to 124° F., for a few hours, and is then rapidly cooled, when it is supposed to be sterilized.

buddeise (*bood'-de-īz*). To treat by Budde's method.

budding (*bud'-ing*) [ME., *budden*]. In biology, a form of reproduction or cell-division, occurring among the polyps and infusorians, in which a bud is given off by the parent and comes to resemble the latter. The process is also called gemmation.

Budge's center (*bood'-geh*) [Julius Ludwig *Budge*, German physiologist, 1811–1888]. 1. The ciliospinal center in the cervical spinal cord. 2. The genitospinal center in the lumbar spinal cord.

Budin, obstetrical hinge joint of (*boo-dan'*) [Pierre Constant *Budin*, French obstetrician, 1846–]. A cartilaginous band existing at birth between the squamous or tabular portion of the occipital bone and the two condylar portions.

Buehlmann's fibers (*bēl-man*). Certain lines on decayed teeth.

Buelau's method (*bū'-lo*) [Gotthard *Buelau*, German surgeon, 1835–1900]. Treatment of empyema by means of syphon drainage.

Buerger's disease (*bur'-ger*) [Leo *Burger*, American physician, 1879–]. Thrombo-angiitis obliterans, *q. v.*

Buetschili's nuclear spindle (*bet'-she-lē*). The spindle-shaped figure observed during karyokinesis.

bufagin (*boo'-faj-in*). A substance found in the poison glands of a toad (*bufo agua*), containing properties similar to those of digitalis.

buffer solution. Any solution to which an acid or an alkali may be added without producing much change in the acidity or alkalinity; *e. g.*, sodium phosphate.

buffers' consumption (*buf'-ers con-sump'-shun*). The phthisis occurring among metal-polishers.

buffy coat (*buf'-e*). A grayish or buff-colored crust or layer sometimes seen upon a blood-clot, after phlebotomy, and once looked upon as a sign of inflammation. It is caused by the partial subsidence of the red blood-corpuscles.

bufidine (*bū'-fid-ēn*) [*bufo*, the toad]. Phrynine, a poisonous alkaloid from the venom of the toad.

bufotalin (*bū-fo'-tal-in*), $C_{119}H_{171}O_{28}$. A toxic substance isolated by Phisalix and Bertrand from the parotid gland and skin of the common toad, *Bufo vulgaris;* it is a transparent resin, soluble in chloroform, alcohol, and acetone. It acts on the heart and does not affect the nervous centers

bufotenin (*bū-fo'-ten-in*). A toxic body found with bufotalin (*q. v.*); it exerts a powerfully paralyzing action on the nervous centers.

bugantia (*bū-gan'-she-ah*) [L.]. A chilblain

buggery (*bug'-er-e*) [OF., *bougre*, an heretic]. Sodomy; bestiality.

buginarium (*boo-jin-a'-re-um*) [*bougie; naris*, a nostril]. A medical preparation used as a nasal bougie.

bugleweed (*bū'-gl-wēd*). The herb, *Lycopus virginicus*, narcotic and astringent. Dose of fidext. ℥ ss–ij. *Lycopin*, concentrated extract. Dose gr. j–iv.

Buhl's desquamative pneumonia (*bool*) [Ludwig von *Buhl*, German physician, 1816–1880]. Caseous pneumonia, in which the exudate consists chiefly of desquamated alveolar epithelium. **B.'s disease**, acute fatty degeneration of the viscera of the newborn, with hemorrhages in various parts of the body.

Buhl-Dittrich's law. In every case of acute general miliary tuberculosis an old focus of caseation is to be found somewhere in the body. This law, being based upon the belief in the etiologic nonidentity of diffuse caseous and miliary tuberculosis, is not in conformity with modern views.

bukardia (*bū-kar'-de-ah*) [βουκαρδία, ox-heart]. Hypertrophy of the heart.

Bulam, or **Bulama boil** (*bū-lam* or *bū-lam'-ah*). A boil occurring on the African island of Bulam; probably caused by a burrowing-worm or insect-larva. **B. fever,** a West-Africa coast fever, said to be identical with yellow fever.

bulb [L., *bulbus*]. 1. An oval or circular expansion of a cylinder or tube. 2. The medulla oblongata. **b., arterial,** the anterior part of the embryonic heart from the division of which the aortic and pulmonary stems have their origin **b., brachial, b., brachiorhachidian,** the expansion of the spinal cord at the place of distribution of the nerves forming the brachial plexus. **b. of the corpus cavernosum** the swelling at the junction of the corpora cavernosa. **b., crural,** the dilatation of the spinal cord in the lumbar region. **b., dental,** dental papilla. **b. of the eye,** the eyeball. **b.s, four,** the corpora quadrigemina. **b., gustatory.** See *taste-bulbs*. **b., hair-,** the swelling at the root of a hair. **b., nerve-.** See *end-bud* and *motorial end-plate*. **b., olfactory,** one of the two bulbs of the olfactory nerve situated on each side of the longitudinal fissure upon the under surface of each anterior lobe of the cerebrum.

b., rhachidian, the oblongata. **b. of spinal cord, b. of spinal marrow,** the oblongata. **b.s, tonsillar,** the lobules of the cerebellum. Syn., *bulbi tonsillares.* **b. of urethra,** the posterior expanded part of the corpus spongiosum. **b. of vagina,** a small body of erectile tissue on each side of the vestibule of the vagina, homologous to the bulb of the urethra of the male. **b. of vena jugularis,** the dilatation at the termination of the external jugular vein.

bulbar (*bul'-bar*). Bulbous Pertaining to the medulla. **b. disease, b. paralysis,** a term applied to the progressive and symmetrical paralysis of the muscles of the mouth, tongue, pharynx, and sometimes those of the larynx. This paralysis is due to a disease of the motor nuclei in the medulla oblongata; an acute and a chronic form are met. The acute form is due to hemorrhage or softening; the chronic, to degeneration. There is also a pseudobulbar paralysis, due to symmetrical lesions of the motor cerebral cortex. Syn., *labioglossolaryngeal paralysis.*

bulbi vestibuli (*bul'-bi ves-tib'-ū-lī*) [L.]. A name sometimes given to the glands of Bartholin.

bulbitis (*bul-bi'-tis*) [*bulb*; ιτις, inflammation]. Inflammation of the bulbous portion of the urethra.

bulbocavernosus (*bul-bo-kav-ern-o'-sus*) [*bulb; caverna,* a cavern]. The accelerator urinæ muscle, corresponding to the sphincter vaginæ of the female.

bulboid (*bul'-boyd*) [*bulb;* εἶδος, form]. Resembling a bulb, bulb-shaped.

bulbonuclear (*bul-bo-nū'-kle-ar*). Relating to the oblongata and its nerve-nuclei.

bulbopetal (*bul-bop'-et-al*) [*bulb; petere,* to seek]. Moving toward the bulb; said of nerve-impulses

bulbourethral (*bul-bo-ū-re'-thral*) [*bulb;* οὐρήθρα, the urethra]. Relating to the bulb of the urethra.

bulbous [*bulb*] Terminating in a bulb.

bulbus (*bul'-bus*) [L.]. A bulb. **b. arteriosus,** at a certain stage in the development of the heart the upper aortic enlargement is so called. **b. cinereus.** See *bulb, olfactory.* **b. crinis,** a hair-bulb **b. oculi,** the globe of the eye. **b. pili.** Same as *b. crinis.* **b. rhachidicus,** the oblongata. **b. urethræ.** See *urethra.* **b. venæ jugularis internæ inferior,** an enlargement of the jugular vein immediately above its union with the subclavian vein. **b. venæ jugularis internæ superior,** an enlargement of the internal jugular vein at the point of exit from the jugular foramen. **b. vestibuli,** the bulb of the vagina; *q. v.*

bulesis (*bū-le'-sis*) [βούλησις, the will]. The will, or an act of the will.

bulimia (*bū-lim'-e-ah*) [βοῦς, an ox; λιμός, hunger]. Excessive, morbic hunger; it sometimes occurs in idiots and insane persons, and it is also a symptom of diabetes mellitus and of certain cerebral lesions Syn., *bulimiasis; bulimy.*

bulimic (*bū-lim'-ik*). See *bulimia.*

bulla (*bul'-ah*) [L., "a bubble"]. A bleb or blister, consisting of a portion of the epidermis detached from the skin by the infiltration beneath it of watery fluid, the result of a liquefaction-necrosis. **b. dolentissima,** a small, very painful cutaneous ulcer, which persists for a long time. **b. ethmoidalis,** a rounded projection into the middle meatus of the nose, due to an enlarged ethmoid cell. **b. a frigore,** a blister from the effect of cold. **bullæ gangrænosæ,** those occurring in moist gangrene of the skin. **b. ossea,** the inflated or dilated part of the bony external meatus of the ear.

bullate (*bul'-āt*) [*bulla,* a bubble]. 1. Inflated; fornicated and with thin walls; blistered; marked by bullæ 2. Of bacterial cultures, a growth rising in convex prominences, like a blistered surface.

bullation (*bul-a'-shun*) [*bullare,* to bubble]. 1. Inflation. 2. Division into small compartments.

bull-dog forceps. Forceps with strong teeth and a clasp to prevent slipping.

Buller's shield. A watch-glass in a frame of adhesive plaster or rubber worn in front of the sound eye to protect it from an infected eye.

bullet forceps. For extracting bullets.

bulletin (*bul'-let-in*) [*bulla,* a seal]. A brief, official statement of a patient's condition.

bullet-probe. An instrument for locating bullets.

bullous (*bul'-us*) [*bulla*]. Marked by bullæ; of the nature of a bulla.

Bumke's pupil (*boom'-keh*) [Oswald Conrad Edward *Bumke,* German neurologist, 1877–]. Dilatation of the pupil caused by psychic stimuli; not present in dementia præcox.

bumping (*bump'-ing*). Certain explosions which occur in a liquid when it is being boiled.

bundle (*bun'-dl*) [AS., *byndan,* to bind]. In biology, a fascicular grouping of elementary tissues, as nerve-fibers or muscle-fibers. **b., aberrant,** a band of nerve-fibers in the isthmus of the gyrus fornicatus. **b., anterior marginal,** the ventral part of the descending cerebellar tract in the spinal cord. **b., atrioventricular,** the bundle of His. **b., ground, anterior,** the anterior root zone in the white matter of the spinal cord. **b., ground, lateral,** a part of the lateral column of the cord extending from the ventral to the dorsal horn. **b., hemispheral,** the posterior one of the two bundles composing the anterior commissure. It originates in the pyramidal cells of the temporal lobe and amygdaloid nucleus, passes through the external capsule and lenticula, unites with the mesial part of the commissure at the point of the decussation of its fibers, and radiates to the opposite temporal lobe. **b., longitudinal,** a bundle of fibers outside of the optic radiation, passing from the occipital to the temporal lobe. **b., marginal,** a small fasciculus at the end of the dorsal cornu of the spinal cord. **b., primitive, b., Schwann's primitive,** a muscular fiber. **b., respiratory,** the solitary fasciculus. **b., solitary, b., trineural.** See under *solitary.* See also *Helweg, His, Krause, Lenhossèk, Meynert, Spitzka, Stilling, Turck, Vicq d'Azyr, Weissmann.*

Bunge's law. The epithelial cells of the mammary gland (of the rabbit, cat, and dog) select from the mineral salts of the blood-plasma all the inorganic substances exactly in the proportion in which they are necessary for the development of the offspring and for the building-up of the latter's organism.

bunioid (*boo'-ne-oid*) [βουνός, a hill; εἶδος, likeness]. Having a round form; applied to tumors.

bunion (*bun'-yun*) [origin uncertain]. A swelling of a bursa of the foot, especially of the metatarsophalangeal joint of the great toe.

bunodont (*bū'-no-dont*) [βουνος, a mound; ὀδούς, a tooth]. Having the molar teeth with rounded or conical cusps; opposed to *lophodont.*

bunogaster (*bū-no-gas'-ter*) [βουνός, a little hill; γαστήρ, stomach]. A protruding abdomen.

Bunsen burner [Robert Wilhelm *Bunsen*, German chemist and physicist, 1811–1899]. A form of burner in which, before ignition, the gas is mixed with a sufficient quantity of air to produce complete oxidation. **B. cell.** In this the positive element is zinc; the negative element, carbon; exciting agent, dilute sulphuric acid; depolarizing agent, nitric acid; E.M.F., 1.75–1.96 volts.

Buphane (*bu'-fan-e*) [L.]. A genus of plants of the order *Amaryllidea*. *B. disticha* is a native of the Cape of Good Hope; the juice of the bulb is used as an arrow-poison by the Hottentots.

buphthalmia, buphthalmos (*būf-thal'-me-ah, -mos*). See *keratoglobus*.

bur, burr [ME., *burre*]. 1. In botany, a rough, prickly shell or case. 2. The lobe of the ear. 3. In dentistry, an instrument with a rounded, pointed, cylindrical or ovoid head and a cutting blade, used in the dental engine for excavating carious dentine and for other purposes. **b., surgical,** an instrument similar in form to a dental bur, but larger, designed for surgical operations upon the bones.

Burckhardt's corpuscles, peculiar angular or roundish bodies of a yellowish color found in the secretion of trachoma.

burcquism (*boork'-izm*). See *metallotherapy*.

Burdach's column (*boor'-dakh*) [Karl Friedrich *Burdach*, German physiologist, 1776–1847]. The posteroexternal column of the spinal cord. **B.'s fissure,** a small fissure between the insula and the operculum. **B.'s nucleus,** the cuneate nucleus, a small nucleus of gray matter in the funiculus cuneatus of the oblongata, forming the termination of the long fibers of Burdach's column. **B.'s operculum.** See *Arnold's operculum*.

burdock (*ber'-dok*). See *Lappa*.

Burdwan fever (*ber'-dwan*). Same as kala-azar, *q. v.*

burette, buret (*bu-ret'*) [Fr.]. A graduated tube designed for measuring small quantities of a fluid. It is usually held vertically in a stand and is provided with a stopcock.

Burgundy pitch. See under *pix*.

burking [*Burke*, a noted criminal]. Suffocation produced by a combination of pressure on the chest with closure of the mouth and nostrils. This was the method employed by Burke.

Burma boil. A form of endemic ulcer common in Burma. **B. head,** a disease of the Burmese territory marked by loss of memory, idiocy, homicidal mania, and inability to walk.

burn. 1. To become inflamed. 2. To char or scorch. 3. To have the sensation of heat. 4. An injury caused by fire or dry heat. 5. A disease in vegetables. 6. In chemistry, to oxygenize. 7. In surgery, to cauterize. **b. brush-.** See *brush-burn*.

Burnam's test for formaldehyde (*bur'-nam*) [Curtis Field *Burnam*, American surgeon]. Same as Rimini's test, *q. v.*

burner [see *burn*]. A common name for a lamp or heating apparatus used in laboratories for chemical and pharmaceutical purposes. See *Argand, Bunsen*.

Burnett's disinfecting fluid (*bur-net'*) [Sir William *Burnett*, English surgeon, 1779–1861]. A strong solution of zinc chloride with a little iron chloride.

burning (*burn'-ing*) [ME., *bernen*, to burn]. Consuming with heat or fire. **b. bush,** euonymus. **b. glass,** a convex lens or concave mirror causing a sufficient concentration of the sun's rays to ignite an object placed at the focus. **b. of the feet,** a neurotic affection of the soles of the feet, common in India. **b. oil,** kerosene. **b. point,** in testing petroleum oils, the temperature at which a spark or lighted jet will ignite the liquid itself, which then continues to burn. This point is usually 6° to 20° C. higher than the flash-point, but there is no fixed relation between the two.

Burns' amaurosis [John *Burns*, Scotch physician, 1774–1850]. Postmarital amblyopia. Impaired vision caused by sexual excess. **B.'s ligament** [Alan *Burns*, Scotch anatomist, 1781–1813]. See *Hey's ligament*.

Burow's liquor, or solution (*boo'-ro*) [Karl August *Burow*, German surgeon, 1809–1874]. A solution consisting of alum, 5 parts; lead acetate, 25 parts; in 500 parts of water; used to wash old ulcers. **B.'s vein.** An inconstant venous trunk formed by branches of the inferior epigastric veins and joining the umbilical vein.

burquism (*berk'-izm*). Same as *burcquism*.

burr. See *bur*.

Burri's method (*boor'-e*) [Robert *Burri*, Swiss bacteriologist]. A method of staining and examining for microorganisms, especially treponemata; arsenic and India ink are used.

burring (*bur'-ing*) [ME., *borre*, a harshness in the throat]. Rhotacism; in stammering, the mispronunciation of the letter r. **b. engine,** a dental appliance for the use of burs, etc., in forming cavities, etc. See *dental engine*.

burrow (*bur'-o*) [ME., *borow*, a hole]. 1. To make a hole or furrow, as in the skin; said of the itch insect. 2. To force a way through, as pus through the tissues.

burrowing (*bur'-o-ing*). The term given to the passage of pus through the tissues after the formation of an abscess.

bursa (*bur'-sah*) [L., "a purse"]. A small sac interposed between parts that move upon one another. **b., accidental, b., adventitious,** one resembling a bursa mucosa, but due to friction or pressure. **b., acromial, external,** one beneath the acromion, between the coracoid process, the deltoid muscle, and the capsular ligament. **b., acromial, internal,** one lying above the acromion, between the tendon of the infraspinatus and the teres major. **b. anserina,** one under the insertion of the gracilis and sartorius muscles. **b. cordis,** the pericardium. **b., gluteal.** One or more lying under the gluteus maximus. **b., gluteofascial, b., gluteotrochanteric,** one lying between the trochanter major and the gluteus maximus. **b., iliac.** 1. One lying between the tendon of the iliacus muscle and the trochanter minor. 2. One between the pelvic brim and the iliopsoas muscle. **b. mucosa,** a membranous sac secreting synovial fluid. **b., obturator,** one under the tendon of the obturator internus. **b., omental, b. omentalis,** a large cavity formed by the peritoneum back of the stomach and in the great omentum. The lesser peritoneal sac. **b. patellæ, b. patellaris,** one lying between the patella and the skin. **b. patellæ amplificata,** housemaids' knee. **b. patellaris lateralis externa,** one lying between the patella and the external lateral dilatation of the tendon of the quadriceps extensor cruris; it is rarely found. **b. patellaris lateralis interna,** one between the patella and the inner lateral dilatation of the quadriceps extensor cruris; it may be either deep

or superficial. **b. pharyngea,** a blind pouch projecting upward from the pharynx toward the occipital bone. **b., plantar,** one over the instep either above or below a tendon. **b., popliteal,** a bursa situated in the popliteal space between the tendon of the semimembranosus and the tendon of the inner head of the gastrocnemius, where they rub against each other. **b., prepatellar,** a bursa situated over the patella and the upper part of the patellar ligament. **b., riders',** an enlarged bursa due to excessive horseback riding. **b. sacralis,** one found in the aged over the sacrococcygeal articulation or over the spine of the fourth or fifth sacral vertebra. **b., subhyoid.** See *subhyoid bursa.* **b., synovial,** one found between tendons and bony surfaces. **b. testium,** the scrotum.

bursal (*bur'-sal*). Pertaining to a bursa, or sac.

bursalis (*bur-sa'-lis*). The obturator internus muscle.

bursalogy (*bur-sal'-o-je*). Science or study of bursæ; anatomy, physiology, and pathology of bursæ.

Bursera (*bur'-ser-ah*) [*Burser,* German botanist]. A genus of tropical trees, several species of which afford resinous gums. *B. gummifera* is a native of South America; the resin, chibou or cachibou, is used in plasters and salves and internally in diseases of the lungs and kidney. The leaves are vulnerary, the bark is anthelmintic and antigonorrheic, and the root is used in diarrhea.

burserin (*bur'-ser-in*) [see *Bursera*]. A resinous constituent of opobalsamum.

bursiform (*bur'-sif-orm*) [*bursa,* a purse; *forma,* form]. Resembling a bursa.

bursine (*bur'-sēn*). An alkaloid isolated from *Capsella bursa-pastoris.* It is a yellow, deliquescent powder, used as an astringent, tonic, and styptic instead of ergot, and hypodermatically in aqueous solution.

bursitis (*bur-si'-tis*) [*bursa,* a purse; *itis,* inflammation]. Inflammation of a bursa. **b., omental,** inflammation of the omental bursa. **b., prepatellaris,** housemaid's knee. **b., retrocalcaneal.** See *achillodynia.* **b., Thornwaldt's,** catarrhal inflammation of the anterior portion of the median recess of the nasopharynx.

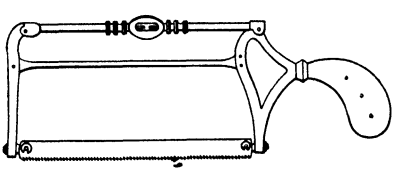
bursopathy (*bur-sop'-ath-e*) [*bursa; πάθος,* suffering]. Any disease of the bursa, particularly dropsy due to some general disease.

bursula (*bur'-sū-lah*) [dim. of *bursa,* a purse]. A small bursa; the scrotum.

Burton's line [Henry *Burton,* English physician, 19th cent.]. A blue line along the margins of the gums in chronic lead-poisoning.

butane (*bū'-tan*), C_4H_{10}. An anesthetic substance isolated from petroleum. Syn., *butyl hydride.*

Butcher's saw [Richard G. *Butcher,* Irish surgeon]. A saw used in amputations and excisions;



Butcher's Saw.

It has a narrow blade that can be adjusted at any angle, so that it runs easily and in any direction.

butesin (*bū'-tes-in*). The normal butyl ester of amino-benzoic acid; used as a local anesthetic and as a dusting powder. **b. picrate,** a local anesthetic combining the properties of butesin and picric acid.

butter (*but'-er*) [*butyrum,* butter]. 1. The fatty part of the milk obtained by rupturing the cells of the fat-globules by "churning" or mechanical agitation. 2. Various vegetable fats having the consistency of butter. 3. Certain chemical products having the appearance or consistence of butter. **b. of antimony,** chloride of antimony. **b. of cacao.** See *cacao butter.* **b. of tin,** chloride of tin. **b. of zinc,** zinc chloride.

Butter's cancer (*but'-erz*). Cancer of the hepatic flexure of the colon.

butterfly patch. A patch of lupus erythematosus on the cheeks and nose.

butterine (*but'-er-ēn*) [*butter*]. An artificial substitute for butter, made principally of beef-fat. Oleomargarine.

buttermilk (*but'-er-milk*). The liquid left after extracting the butter from cream. **b.-belly,** a distended abdomen; pot-belly.

butternut (*but'-er-nut*). See *juglans.*

buttocks (*but'-uks*) [dim. of *butt.* an end]. The nates. The fleshy part of the body posterior to the hip-joints, formed by the masses of the gluteı muscles.

button (*but'-un*). See *furunculus orientalis.* **b. Amboyna.** See *frambesia.* **b. anastomosis,** anastomosis by means of a Murphy button. **b., belly-,** the navel. **b., Biskra.** See *furunculus orientalis.* **b.-bush,** the bark of *Cephalanthus accidentalis,* a tonic, febrifuge, and diuretic. Dose of *fluidextract* ½–1 dr. (2–4 Cc.). **b., Chlumsky's,** an intestinal button made of pure magnesium after the pattern of the Murphy button. It remains undissolved for four weeks, only the outer part becoming softer. **b., Corrigan's,** a steel, button-shaped cautery-iron, introduced by Sir J. C. Corrigan (1802–80). **b.-makers' chorea.** See *chorea, buttonmaker's.* **b., Murphy,** a device used in gastroenterostomy or intestinal anastomosis. **b.-snakeroot,** the root of *Liatris spicata* and of *Eryngium yuccæfolium;* a stimulant, tonic, diuretic, and emmenagogue. Dose of *fluidextract* ½–1 dr. (2–4 Cc.). See *Chlumsky, Corrigan, Murphy.*

buttonhole fracture. One in which a missile has perforated the bone. **b., mitral,** an advanced degree of constriction of the mitral orifice of the heart. **b. operation,** boutonnière operation, *q. v.*

butyl (*bū'-til*) [*butyrum,* butter], C_4H_9. A hydrocarbon alcohol radical. **b.-chloral, b.-chloral hydrate.** See *chloral butylicum.* **b. hydride.** See *butane.* **b.-hypnal,** a combination of butylchloral and antipyrine. It is hypnotic and antipyretic.

butylamine (*bū-til'-am-in*) [*butyl; amine*], $C_4H_9NH_2$. A substance contained in codliver oil, possessing diuretic and diaphoretic properties.

butylene (*bū'-til-ēn*) [*butyrum*], C_4H_8. A hydrocarbon belonging to the olefin series. It exists in three isomeric forms, all of which are gases at ordinary temperatures.

butyn (*bū'-tin*). Trade name of a local anesthetic, proposed as a substitute for cocaine.

butyphus (*bū-ti'-fus*) [*βοῦς,* an ox; *τῦφος,* stupor]. The cattle-plague. Syn., *rin erpest.*

butyraceous (*bu-tir-a'-se-us*) [*butyrum*]. Resembling or containing butter.

butyrate (*bū'-tir-āt*) [*butyrum,* butter]. A salt of butyric acid.

butyric (*bū-tir'-ik*). Contained in butter; derived from butter. **b. acid.** See *acid, butyric.*

butyrin (*bū'-tir-in*) [*butyrum*]. $C_3H_5(C_4H_7O_2)_3$. A constant constituent of butter, together with olein, stearin, and other glycerids. It is a neutral, yellowish, liquid fat, having a sharp, bitter taste.

butyroid (*bū'-tir-oid*) [*butyrum*]. Buttery; having the consistence of butter.

butyromel (*bū-tir'-o-mel*). The proprietary name for a mixture of 2 parts of fresh butter and 1 part of honey, rubbed together until a clear yellow mixture is obtained. It is used in preparing palatable preparations of codliver oil and other nauseous oleaginous substances.

butyrometer (*bū-tir-om'-et-ur*) [*butyrum*, butter; *μέτρον*, measure]. An apparatus for determining the proportion of fatty matter in milk.

butyroscope (*bū-tir'-o-skōp*) [*butyrum*, butter; *σκοπεῖν*, to look]. An instrument for estimating the proportion of fat in milk.

buvo (*bū'-vo*). Trade name of a tablet containing extract of beef and vegetable juices.

buxine (*buks'-in*) [*buxus*, the box-tree]. Berberine, the alkaloid of *Buxus sempervirens*. It is a white, amorphous powder with a persistent bitter taste; very insoluble in water, but easily soluble in alcohol and chloroform. It is used as a febrifuge; dose gr. 3–6.

buxus (*buks'-us*) [L., the box-tree]. A genus of trees affording boxwood. **b. sempervirens,** the common box or box-tree of Europe and Asia. Its leaves, wood, and oil have been employed in medicine.

buyo cheek cancer (*bu'-yo*) [Tagalog term]. A cancer of the cheek found in natives of the Philippine Islands; it is associated with the chewing of a mass made up of buyo leaves, betel-nut, slaked lime and tobacco.

Buzzard's maneuver (*buz'-ardz*) [Thomas *Buzzard*, English physician 1831–1919]. In eliciting the patellar reflex the sitting patient is required to make firm pressure on the floor with his toes.

Bychowski's test for albumin. Put a drop or two of the urine into a test-tube filled with hot water and shake it; in the presence of albumin a whitish cloud is formed and is diffused through the liquid. Phosphates give the same result, but the cloud disappears on addition of a drop of acetic acid.

bynin (*bi'-nin*) [*βύνη*, malt]. 1. A proteid, insoluble in water, found in malt. 2. A proprietary liquid extract of malt made in England. **b. amara,** a combination of bynin (2) with the phosphates of iron, quinine, and strychnine.

bynol (*bi'-nol*). A combination of malt extract and cod-liver oil.

Byrd's method (*bird*) [Harvey Leonidas *Byrd*, American physician, 1820–1884]. *For artificial respiration in asphyxia neonatorum:* The physician's hands are placed under the middle portion of the child's back, with their ulnar borders in contact and at right angles to the spine. With the thumbs extended, the two extremities of the trunk are carried forward by gentle but firm pressure, so that they form an angle of 45 degrees with each other in the diaphragmatic region. Then the angle is reversed by carrying backward the shoulders and the nates.

byrolin (*bir'-ol-in*). A proprietary remedy said to be a combination of boric acid, glycerol, and lanolin, and recommended for use in skin diseases.

bysma (*biz'-mah*) [*βύσμα*, a stopper; plug: *pl.*, *bysmata*]. A plug or tampon.

byssinosis (*bis-in-o'-sis*). A pulmonary affection due to the inhalation of cotton-dust.

byssocausis (*bis-o-kaw'-sis*) [*βύσσος*, cotton; *καῦσις*, a burning]. Cauterization by the moxa; moxibustion.

byssoid (*bis'-oid*). Consisting of a filamentous fringe of which the strands are of unequal length.

byssophthisis (*bis-o-tis'-is*). See *byssinosis.*

byssus (*bis'-us*) [*βύσσος*, cotton, flax]. 1. Charpie, lint, or cotton. 2. The hairy growth of the pubic region. 3. In biology, a bunch of silky filaments secreted by the foot, in several molluscs. A name formerly given to the mycelium of large fungi.

bythium (*bith'-e-um*) [*βύθος*, depth]. A supposed new chemical element said to have been obtained from sulphur. The claim has not been accepted.

Abbreviation for *cum*, with.

C. 1. The chemical symbol of *carbon*. 2. The abbreviation of *centigrade*, *congius*, *closure*, *contraction*, *cylinder*, or *cylindrical lens*.

Ca. 1. Chemical symbol of *calcium*. 2. Abbreviation for *cathode*.

caballine aloes (*kab'-al-in al'-ōz*). An inferior quality of aloes, known also as fetid or horse aloes.

Cabanis' pallet. A shovel-shaped instrument consisting of two plates of perforated silver, jointed and movable on each other; it is used to seize the extremity of the nasal probe in Méjean's operation for lacrimal fistula.

cabbage (*kab'-āj*). See *brassica*. **c.-rose.** See *rose, pale*. **c., skunk-,** a fetid plant of North America, *Symplocarpus fœtidus*. Its tincture and fluidextract are prescribed as antispasmodics and antasthmatics.

Cabot's ring bodies (*cab'-ot*) [Richard Clarke *Cabot*, American physician, 1868–]. Intra- and extra-cellular bodies having the general shape of a ring and found in the blood in severe anemia.

CaC_2. Calcium carbide.

cacaerometer (*kak-a-er-om'-e-tur*) [κακός, bad; ἀήρ, air; μέτρον, measure]. An apparatus for determining the impurity of the air.

cacaine (*kak-a'-ēn*) [Nahuatl, *cacauatl*, cacao]. Theobromine, *q. v.*

cacanthrax (*kak-an'-thraks*) [κακός, bad; ἄνθραξ, a coal]. Contagious anthrax. See *anthrax*.

cacao(*kak-a'-o*). See *theobroma*. **c.-butter** (*oleum theobromatis*, U. S. P.), is obtained from seeds or nibs of *theobroma cacao*. It is a pure white fat, with a pleasant odor and taste; it fuses at 86° F. (30° C.); its specific gravity is from 0.945 to 0.952. It is used in cosmetics and for pharmaceutical preparations See also *theobroma*.

cacaphthæ (*kak-aff'-the*) [κακός, bad; ἄφθα, an eruption]. Malignant or cachectic aphthæ. See *aphthæ*.

cacation (*kak-a'-shun*) [*cacatio*, a going to stool]. Defecation; alvine discharge.

cacatory (*kak'-at-o-re*) [*cacatio*, a going to stool]. Attended with diarrhea; as a cacatory fever.

CaCC. Abbreviation for cathodal closure contraction; also written **CCC.**

caccagogue (*kak'-a-gog*) [κάκκη, dung; ἀγωγός, leading]. 1. Aperient; laxative. 2. An aperient, especially an ointment or suppository that induces gentle purgation.

cacemia (*kas-e'-me-ah*, or *kak-e'-me-ah*) [κακός, bad; αἷμα, blood]. An ill-condition of the blood; depravity of the blood.

cacesthesis (*kak-es-the'-sis*) [κακός, bad; αἴσθησις, sensation]. Morbid sensation.

cachectic (*kak-ek'-tik*) [see *cachexia*]. Characterized by cachexia.

cachelcoma (*kak-el-kō'-mah*) [κακός, ill; ἕλκωμα, ulcer; pl., *cachelcomata*]. A malignant or foul ulcer.

cachet (*kash-a*) [Fr.]. A pharmaceutical preparation consisting of two concave pieces of wafer, varying in size from ½ to 1½ inches in diameter, round or oblong in shape, in one of which the powder to be administered is placed, and the other, having previously been moistened, is then laid over the powder and the two margins are pressed together, when they adhere and completely inclose the powder.

cachexia, cachexy (*kak-eks'-e-ah, kak-eks'-e*) [κακός, bad; ἕξις, a habit]. A depraved condition of general nutrition, due to some serious disease, as syphilis, tuberculosis, carcinoma, etc. **c., African,** earth eating. **c., aphthous,** sprue. **c. aquosa.** See *Griesinger's disease*. **c., cancerous, c., carcinomatous,** a condition marked by weakness, emaciation, and a muddy or brownish complexion, due to carcinomatous disease. Syn., *cachexia canceratica; cancerous diathesis*. **c. hypophysial.** Atrophy of the hypophysis through premature senility. **c., lymphatic.** Synonym of *Hodgkin's disease*. **c., miner's.** See *uncinariasis*. **c., negro,** earth eating. **c., osteal,** profound cachexia seen in children and accompanied by painful swelling of one of the long bones, with hematinuria or extravasation of blood into a tissue, and often by rachitic phenomena. **c., pachydermic.** See *myxedema*. **c., paludal.** See *malarial cachexia*. **c., periosteal.** See *c., osteal*. **c. splenetica,** that associated with splenic enlargement. **c. strumipriva, c., thyreopriva,** the condition allied to, if not identical with, myxedema, following the extirpation of the thyroid gland. **c., thyroid** exophthalmic goitre. **c. venerea,** syphilis. **c., virginum,** chlorosis.

cachexy (*kak-eks'-e*). See *cachexia*.

cachibou (*kash-i-boo'*). See under *bursera*.

cachinnation (*katsh-in-a'-shun*) [*cachinnare*, to laugh loudly]. Immoderate laughter, as in the insane.

cachou (*kash-oo'*) [Fr. for "*catechu*"]. An aromatic pill or tablet for deodorizing the breath.

$CaCl_2$. Calcium chloride.

$Ca(ClO_3)_2$. Calcium chlorate.

$CaCO_3$. Calcium carbonate.

CaC_2O_4. Calcium oxalate.

caco- (*kak-o-*) [κακός, bad]. A prefix meaning bad or diseased.

cacocholia (*kak-o-ko'-le-ah*) [*caco-*; χολή, bile]. A morbid condition of the bile.

cacochroia, cacochrœa (*kak-o-kroi'-ah, kak-o-kre'-ah*) [*caco-*; χροία, color]. A bad complexion; unnatural color of the skin.

cacochylia (*kak-o-ki'-le-ah*) [*caco-*; χυλός, juice]. Imperfect or disordered digestion.

cacochymia (*kak-o-ki'-me-ah*) [*caco-*; χυμός, juice]. A morbid state of the fluids, humors, blood, or secretions; faulty stomachic digestion.

cacocnemia (*kak-ok-ne'-me-ah*) [*caco-*; κνήμη, leg]. Thinness or ill-condition of the leg or shin.

cacocolpia (*kak-o-kol'-pe-ah*) [*caco-*; κόλπος, vagina]. A diseased state of the vagina; gangrene of the vulva.

cacodes (*kak-o'-dēz*) [κακωδής, ill smelling]. Having a foul, offensive odor.

cacodiacol (*kak-o-di'-ak-ol*). Guaiacol cacodylate.

cacodontia (*kak-o-don'-she-ah*) [*caco-*; ὀδοῦς, tooth]. A bad condition of the teeth.

cacodyl (*kak'-o-dil*) [κακώδης, ill-smelling; ὕλη, matter]. As$(CH_3)_2$. Dimethylarsine; a radical containing arsenic, hydrogen, and carbon. It is a colorless, heavy liquid, with an extremely offensive odor; it is inflammable when exposed to air. Its protoxide is called alkarsine (*q. v.*).

cacodylate (*kak-od'-il-āt*). A salt of cacodylic acid. The sodium, calcium, and the iron salts are used in medicine.

cacodyliacol (*kak-o-dil-i'-ak-ol*). Guaiacol cacodylate: used in tuberculosis; dose, 2 gr. (0.04 Gm.).

cacodylic (*kak-o-dil'-ik*) [see *cacodyl*]. Pertaining to cacodyl. **c. acid**, dimethyl arsenic acid.

cacoethes (*kak-o-e'-thēz*) [*caco-*; ἦθος, a habit]. 1. Any bad habit, disposition, propensity, or disorder. 2. A malignant ulcer. **c. operandi**, an excessive desire to perform operations

cacoethic (*kak-o-eth'-ik*) [*caco-*; ἦθος, habit]. Malignant.

cacogalactia (*kak-o-gal-ak'-te-ah*) [*caco-*; γάλα, milk]. A bad or abnormal condition of the milk.

cacogastric (*kak-o-gas'-trik*) [*caco-*; γαστήρ, the stomach]. Dyspeptic.

cacogenesis (*kak-o-jen'-es-is*) [*caco-*; γένεσις, formation]. Any morbid, monstrous, or pathological growth or product.

cacogenic (*kak-o-jen'-ik*). Pertaining to cacogenesis.

cacogenics (*kak-o-jen'-iks*) [κακογενής, ill-born]. The opposite of eugenics. The sum total of the conditions which tend to the deterioration of the human race.

cacogeusia (*kak-o-gu'-se-ah*) [*caco-*; γεῦσις, taste]. A bad taste.

cacoglossia (*kak-o-glos'-e-ah*) [*caco-*; γλῶσσα, the tongue]. Gangrene of the tongue.

cacolet (*kak'-o-la*) [Fr.]. A mule-chair or horse-pannier for the transportation of the wounded.

cacomelia (*kak-o-me'-le-ah*) [*caco-*; μέλος, limb] A congenital pathological condition or deformity of a limb.

cacomorphia (*kak-o-mor'-fe-ah*) [*caco-*; μορφή, form]. Malformation; deformity.

caconychia (*kak-o-nik'-e-ah*) [*caco-*; ὄνυξ, nail]. Disease or defect of a nail or of the nails.

cacopathy, or **cacopathia** (*kak-op'-a-the* or *kak-o-path'-e-ah*) [*caco-*; πάθος, illness]. Any severe, malignant, or untoward condition or disease.

cacopharyngia (*kak-o-far-in'-je-ah*) [*caco-*; φάρυγξ, the pharynx]. Gangrene of the pharynx.

cacophonia (*kak-o-fo'-ne-ah*) [*caco-*; φωνή, voice]. An altered, depraved, or abnormal voice.

cacophonic (*kak-o-fon'-ik*). Affected with cacophonia.

cacophthalmia (*kak-off-thal'-me-ah*) [*caco-*; *opthalmia*]. A malignant inflammation of the eye.

cacoplasia (*kak-o-pla'-ze-ah*) [*caco-*; πλάσσειν, to form]. The formation of diseased structures.

cacoplastic (*kak-o-plas'-tik*) [see *cacoplasia*]. 1. Characterized by a low degree of organization. 2. Relating to cacoplasia.

cacopragia (*kak-o-pra'-je-ah*) [*caco-*; πρᾶσσειν, to do]. Functional derangement, as of nutritive processes, or of organs.

cacoproctia (*kak-o-prok'-te-ah*) [*caco-*; πρωκτός, anus]. A gangrenous state of the rectum.

cacorrhachis (*ka-kor'-rak-is*) [*caco-*; ῥάχις, spine]. A diseased state of the vertebral column.

cacorrhinia (*kak-or-in'-e-ah*) [*caco-*; ῥίς, nose]. Any diseased condition of the nose.

cacosmia (*kak-oz'-me-ah*) [*caco-*; ὀσμή, smell]. A disgusting smell.

cacosomium (*kak-o-so'-me-um*) [*caco-*; σῶμα, body]. A hospital for leprosy and other incurable diseases.

cacospermia (*kak-o-sper'-me-ah*) [*caco-*; σπέρμα, seed]. Any diseased state of the semen.

cacosphyxia (*kak-o-sfiks'-e-ah*) [*caco-*; σφύξις, pulse]. A disordered state of the pulse.

cacosplanchnia (*kak-o-splangk'-ne-ah*) [*caco-*; σπλάγχνα, the viscera]. Diseased condition of the digestive tract and resulting emaciation.

cacostomia (*kak-o-sto'-me-ah*) [*caco-*; στόμα, mouth]. 1. Any diseased or gangrenous state of the mouth. 2. Noma.

cacothanasia (*kak-o-than-a'-ze-ah*) [*caco-*; θάνατος, death]. A painful or miserable death.

cacotheline (*kak-oth'-el-ēn*), $C_{42}H_{22}NO_{20}$. An alkaloid produced from brucine by the action of HNO_3.

cacothenics (*kak-o-then'-iks*). The opposite of euthenics, *q. v.*

cacothesis (*kak-oth'-es-is*) [*caco-*; θέσις, a placing]. A faulty position of a part or of the entire organism.

cacothymia (*kak-o-thim'-e-ah*) [*caco-*; θυμός, mind]. A disordered state of the mind or disposition; mental disorder with moral depravity; insane malignity of temper.

cacotrichia (*kak-o-trik'-e-ah*) [*caco-*; θρίξ, hair] A diseased condition of the hair.

cacotrophia (*kak-o-tro'-fe-ah*). Same as *cacotrophy*.

cacotrophy (*kak-ot'-ro-fe*) [*caco-*; τροφή, nourishment]. Disordered or defective nutrition.

cacozyme (*kak'-o-zīm*) [*caco-*; ζυμή, a ferment] A disorganizing, putrefactive, fermentative, or pathogenic microorganism.

cactin (*kak'-tin*). An acrid resinous glucoside obtained from *Cereus grandiflorus*

cactina (*kak-ti'-nah*) [κάκτος, a prickly plant]. A proprietary preparation said to be a proximate principle derived from night-blooming cereus (*Cactus grandiflorus* and *C. mexicana*) It is a cardiac stimulant, recommended as a substitute for digitalis

cactus (*kak'-tus*) [κάκτος, a prickly plant]. A genus of plants. **c. grandiflorus**, a plant indigenous to the West Indies and cultivated in North America and Europe. It bears large white or straw-colored flowers which bloom only at night. The preparations of cactus are stimulant to the spinal cord, the vasomotor center, and the cardiac ganglia. They have been used as substitutes for digitalis. Dose of *tincture* 15–20 min. (1 0–1 3 Cc); of *fluidextract* 5–10 min. (0.32–0.65 Cc.). Syn., *night-blooming cereus; Cereus grandiflorus*.

cacumen (*kak-ū'-men*) [L.; pl., *cacumina*] 1 The top, as of a plant. 2. The culmen of the vermis superior of the cerebellum.

cacuminal (*kak-ū'-min-al*) [see *cacumen*]. Pertaining to the top of anything or to the culmen of the vermis of the cerebellum.

cadaver (*kad-av'-er* or *kad-a'-ver*) [*cadere*, to fall, *pl.*, *cadavera*]. A dead body, especially that of a human being.

cadaveric (*kad-av'-er-ik*) [*cadaver*]. Pertaining to the cadaver. **c. alkaloids**, ptomaines. **c. ecchymoses**, **c. lividity**, certain postmortem stains, closely resembling in their general appearance the effects of bruises or contusions. They occur on the lowest and most dependent parts of the body. **c. rigidity**, rigor mortis.

c. spasm, the early, at times instantaneous, appearance of rigor mortis, seen after death from certain causes. It is also called instantaneous rigor and tetanic rigidity.

cadaverine (*kad-av'-er-ĕn*) [*cadaver*], $C_5H_{14}N_2$. A ptomaine, occurring very frequently in decomposing animal tissues. It is a thick, clear, syrupy liquid, having an exceedingly unpleasant odor. An auxetic in cancer.

cadaverization (*kad-av-er-iz-a'-shun*) [*cadere,* to fall]. The passage of a living body to the state of a cadaver. Applied to the algid and cyanotic stage of cholera.

cadaverous (*kad-av'-er-us*) [*cadere,* to fall]. Resembling a cadaver; ghastly; of a deathly pallor.

cade (*kād*) [a Languedoc name]. See *juniper.*

c., oil of (*oleum cadinum,* U. S. P.), a tarry oil from the wood of *Juniperus oxycedrus;* it is used in skin diseases.

caderas (*kad-e'-ras*). See *mal de caderas.*

Cadet's fuming liquid (*kad-a'*) [Louis Claude *Cadet* de Gassicourt, French chemist, 1731–1799]. See *alkarsin.*

cadinene (*kad'-in-ĕn*), $C_{15}H_{24}$. A sesquiterpene boiling at 274° C.

cadmium (*kad'-me-um*) [καδμια, calamine]. Cd = 112.40 quantivalence II; sp. gr. 8 60–8.69. A bluish-white metal resembling zinc in its general properties. In its physiological action it is escharotic and astringent; internally, in large doses, it produces emesis and violent gastritis

c. iodide, CdI_2, used as an ointment. 1 to 8 of lard. **c. salicylate,** $Cd(C_7H_5O_3)_2$, white needles, soluble in water and alcohol. It is used in purulent ophthalmia, etc., and is said to be a more active antiseptic than other cadmium salts **c. sulphate,** $CdSO_4$ $4H_2O$, an astringent in gonorrhea and in corneal opacities; used as a lotion in strength of ½ gr or 4 to 1 oz. of water, or as an ointment in 1 : 40 of fresh lard. **c. sulphocarbolate,** $Cd(C_6H_5SO_4)_2$. white crystals, soluble in water; it is antiseptic and astringent.

caduca (*kad-dū'-kah*) [*cadere,* to fall]. Thickened mucous membrane of uterus in pregnancy. See *decidua.*

caducity (*kad-dū'-sit-e*) [*caducitas,* senility]. Senility; the feebleness of advanced age.

caducous (*kad-ū'-kus*) [*caducus,* falling off]. Dropping off very early, as compared with other parts Deciduous. **c. morbus.** Falling sickness; an old name for epilepsy.

cæcal (*se'-kal*). See *cecal.*

cæcitas (*se'-sit-as*) [L.]. Blindness **c. diurna,** day-blindness. **c. nocturna,** night-blindness. **c. verbalis,** word-blindness.

cæcitis (*se-si'-tis*). See *cecitis.*

cæcum (*se'-kum*). See *cecum.*

cænæsthesis (*cen-es-the'-sis*). See *cenesthesis.*

cæruleus (*se-ru'-le-us*) [*l.*]. Sky-blue. **c. morbus,** blue disease. See *cyanosis.*

cærulosis (*se-ru-lo'-sis*). See *cyanosis.*

Cæsalpinia (*ses-al-pin'-e-ah*) [L.]. A genus of tropical leguminous trees. *C. bonducella* is a prickly, trailing shrub of most tropical coasts. The seeds, Molucca beans, and the whole plant are anthelmintic and emmenagogue; the oil of the seeds is used in rheumatism. It contains bonducin. *C. coriaria,* American sumac, divi-divi, is a South American shrub cultivated in India, where the dried powdered pods are used as an antiperiodic. Dose 40–60 gr. (2.6–4.0 Gm.). A decoction of the pods is used as an injection in the treatment of bleeding piles. *C. echinata,* a tree of Brazil, furnishes Brazilwood; the bark, rich in tannin, is used as an astringent, roborant, and febrifuge. *C. sappanis,* a tree of India; the brownish-red wood, sappan-wood, contains sappanin and is used as an astringent; it furnishes a red dye and the root a yellow dye.

cæsarean operation or section. See *cesarean section.*

cæsium (*se'-se-um*). See *cesium.*

cafard (*kaf'-ar*). A subacute melancholia, characterized by attacks of the "blues," depression, worry, and grouch; observed in soldiers.

caffea (*kaf'-e-ah*) [L.]. The seeds of *Coffea arabica.* The dried and roasted seeds are almost universally used in infusion as a beverage, forming a cerebral stimulant and stomachic tonic. They are valuable in promoting digestion and allaying hunger and fatigue. The properties are due to an alkaloid, *caffeine,* identical with *theine.* See *thea* and *caffeine.* The fluidextract of *Caffea viridis* is intended as a substitute for the fluidextract of guarana. Dose ½–2 dr. (2–8 Cc.). See *Guarana.*

caffeic acid (*kaf-e'-ik*). See *acid, caffeic.*

caffeine (*kaf'-e-in* or *kaf'-ēn*) [*caffea*], $C_8H_{10}N_4O_2$ + H_2O. See under *caffea.* An alkaloid found in the leaves and beans of the coffee-tree, in tea, in Paraguay tea, and in guarana, the roasted pulp of the fruit of *Paullinia sorbilis.* It occurs in long, silky needles, slightly soluble in cold water and alcohol, with a feebly bitter taste. It is a cerebrospinal, circulatory, and renal stimulant. Dose 1–3 gr. (0.06–0.2 Gm.). Syn., *guaranine; methyltheobromine; psoraline; theine; trimethylxanthine.* **c. borocitrate,** $(C_8H_{10}N_4O_2)_2BO_3$, a white, crystalline powder, soluble in water, alcohol, and chloroform; it decomposes in water. It has the effect of caffeine combined with the antiseptic action of boric acid. **c. bromide.** See *c. hydrobromide.* **c. carbolate,** $C_8H_{10}N_4O_2$. HOC_6H_5, a white, crystalline mass, soluble in alcohol and water with decomposition. It is an antiseptic, diuretic, and stimulant, having the combined action of caffeine and phenol, and is used subcutaneously. **c. chloral,** $C_8H_{10}N_4O_2$ – CCl_3-COH, a molecular combination of caffeine and chloral, occurring in soluble crystals. It is sedative and analgesic. Dose 3–5 gr. (0.2–0.3 Gm.). **c. citrate,** (*caffeina citrata,* U. S. P.), $(C_8H_{10}N_4O_2)_3C_6H_8O_7$, a true salt, forming a white, crystalline powder, used in the same manner as caffeine. It is soluble in water and alcohol with decomposition. Dose 1–5 gr. (0.065–0 32 Gm.). **c., citrated,** this is improperly called caffeine citrate and is prepared by dissolving equal weights of caffeine and citric acid in double the quantity of hot distilled water. Dose 3–8 gr. (0.2–0.52 Gm.). **c., citrated, effervescent** (*caffeina citrata effervescens,* U. S. P.). Dose 60 gr. (4 Gm.). **c. citrosalicylate,** $(C_8H_{10}N_4O_2)_3C_6H_8O_7$ + $(C_8H_{10}N_4O_2.C_7H_6O_3)_2$, a true salt occurring as a white, crystalline powder, decomposing in water. It is antiseptic and is used as is caffeine. **c. dijodide.** See *c. triiodide.* **c. hydrobromide,** caffeine bromide, a true salt, $C_8H_{10}N_4O_2HBr$, occurring as large crystals, reddish or greenish on exposure, soluble in water on decomposition. It is used as a diuretic in injections of 4–10 min. of a solution of 10 parts caffeine hydrobromide, 1 part hydrobromic acid, and 3 parts distilled water **caffeinæ, injectio, hypodermatica,** 1 gr. of caffeine in 3 minims. Dose 1–6 min (0.065

0.39 Cc.). **c. salicylate,** $C_8H_{10}N_4O_2.C_7H_6O_3$, a true salt occurring as white, crystalline masses, soluble in water and alcohol with decomposition. It is used instead of caffeine with salicylic acid. Dose as caffeine. **c. and sodium benzoate,** a white powder containing 45.8 % of caffeine, soluble in 2 parts of water. It is used instead of caffeine by subcutaneous injection. Dose about double that of caffeine. Syn., *caffeinum natriobenzoicum.* **c. and sodium salicylate,** a white powder, soluble in 2 parts of water, and containing 62.5 % of caffeine. It is used in rheumatism, etc., instead of caffeine, by subcutaneous injection. Dose about double that of caffeine. Syn., *caffeinum natriosalicylicum.* **c. and sodium sulphonate,** a diuretic. Dose 15 gr. (1 Gm.). Syn., *symphoral.* **c. tannate,** a yellow powder, more astringent than caffeine; uses and dosage as caffeine. **c. triiodide,** $(C_8H_{10}N_4O_2I_2\ HI)_2 + 3H_2O$, dark-green prisms, of a metallic luster, soluble in alcohol. It is a diuretic and alterative, used instead of potassium iodide, and said to be nondepressing. Dose 2–4 gr. (0.13–0.26 Gm.). Syn., *diiodocaffeine hydriodate.* **c. valerate,** $C_8H_{10}N_4O_2.C_5H_{10}O_2$, small lustrous needles, soluble in alcohol with decomposition. It is used in nervous headache, whooping-cough, etc. Dose 2–5 gr. (0.13–0.3 Gm.) several times a day.

caffeinism (*kaf'-e-in-izm* or *kaf-ēn'-izm*) [*caffeine*]. Chronic coffee-poisoning; a train of morbid symptoms due to excess in the use of coffee.

caffeism (*kaf'-e-izm*). See *caffeinism.*

caffeol (*kaf'-e-ol*). See *caffeone.*

caffeone (*kaf'-e-ōn*) [*caffea*], $C_8H_{10}O_2$. A volatile aromatic oily principle (empyreumatic oil) produced by the roasting of coffee. Syn., *caffeol.*

Cagot (*kag-o*) [Fr.]. 1. A member of an outcast race or clan in the S. W. of France; formerly regarded as lepers. 2. (By error) a cretin. **C. ear.** This is an ear with no lower lobe; but it is asserted that this is a peculiarity of the Lapps, and not of the Cagots.

cahinca, or **cainca** (*kah-hing'-kah*) [native S. American]. The diuretic root of *Chiococca racemosa, C. densifolia,* or *C. anguifuga,* rubiaceous shrubs of tropical America.

cahincin (*kah-hin'-sin*) [*cainca* or *cahinca,* the South American name for several species of *Chiococca*], $C_{40}H_{64}O_{18}$. A glucoside from *Chiococca racemosa* and *C. brachiata.* In small doses it is diuretic and cathartic and in large doses emetic. It is used in dropsy. Dose, diuretic and cathartic, 2–4 gr. (0.13–0.26 Gm.); emetic, 8–15 gr. (0.5–1.0 Gm.); maximum dose 15 gr. (1 Gm.). Syn., *cainic acid.*

caisson-disease (*kā'-son-diz-ēz*). Diver's disease, tunnel disease, or the bends, a morbid condition due to increased atmospheric pressure, sometimes occurring in divers, caisson-workers, etc. Paraplegia, hemiplegia, anesthesia, and apoplectic attacks are common, coming on only after a return to the normal atmosphere. The nature of the lesion is obscure.

Cajal's (Ramón y) cells (*kah'-hal*) [Santiago Ramón y *Cajal,* Spanish histologist, 1852–]. Fusiform or triangular ganglion cells lying near the surface of the cerebral cortex and giving off branched processes parallel to it. **C.'s moss-like appendages.** See *appendage.* **C.'s tassel-cells,** pyramidal cells of the cortex cerebri having a large number of dendritic processes hanging from their base.

cajuput oil, cajeput oil (*kaj'-u-put*) [Malay, *caju-puti,* white wood]. A volatile oil (*oleum cajuputi,* U. S. P.), distilled from the leaves of *Melaleuca cajuputi.* It resembles oil of turpentine. It is used in flatulent colic, hysteria, cutaneous disorders, and toothache. Dose 1–5 min. (0.065–0.32 Cc.). **c. spirit** (*spiritus cajuputi,* B. P.), contains 2 % of the oil. Dose ½–1 dr. (2–4 Cc.).

cajuputene, cajeputene (*caj-u-pū-tēn', caj-e-pū-tēn'*) [Malay], $C_{10}H_{18}$. The principal constituent of cajuput oil; it is a liquid of an agreeable odor.

cajuputol, cajeputol (*kaj-u-pū'-tol*) [see *cajuput oil*]. The more limpid part of cajeput oil; it is found also in some other fragrant volatile oils.

caked (*kākd*). Compressed or hardened into a solid mass. **c. bag,** in cows, an inflammation of the mammary gland. **c. breast,** a breast in a puerperal woman in which the milk has become hardened and inspissated.

cakesthesia (*kak-es-the'-ze-ah*) [*caco-*; *αἰσθησις,* feeling]. Malaise.

cal. Abbreviation of *small calory.*

Cal Abbreviation of *large or great calory.*

Calabar bean (*kal'-ab-ar-bēn*) [*Calabar,* a region of West Africa]. See *physostigma.* **C. swellings,** an edematous enlargement occurring in the natives of Calabar and other parts of West Africa. It is thought to be produced by the action of *Filaria loa* in the subcutaneous tissues.

calabarine (*kal-ab'-ar-ēn*). An alkaloid from Calabar bean.

calabarization (*kal-a-bar-iz-a'-shun*). The act of bringing a person under the effects of calabarine.

calage (*kal-ahzh'*) [Fr., wedging]. A method of prophylaxis or treatment of sea-sickness by fixation of the viscera by pillows placed between the abdomen and the wall of the cabin and between the back and edge of the berth, the patient lying upon the side.

Calaguala (*kah-lah-gwah'-la*) [Peruvian] The commercial name for several ferns of the order *Polypodiaceæ,* especially *Polypodium calaguala,* of Peru, which is esteemed an excellent resolvent and diaphoretic. It is used in chronic affections of the air-passages and in whooping-cough in doses of 30–60 gr. (2–4 Gm.) daily. A decoction is used externally as a dressing for wounds.

calamine (*kal'-am-in*) [*calamina,* a corruption of *cadmia*]. Native zinc carbonate. *Calamina præparata,* the prepared calamine, washed and pulverized, is used mainly as an external exsiccant and astringent.

calamus (*kal'-am-us*) [L., "a reed"]. Sweet-flag. The rhizome of *Acorus calamus.* It contains a volatile oil and *acorin,* a bitter nitrogenous principle. The root is an aromatic, stomachic tonic, and a common ingredient of many popular "bitters." *C draco* is a species of ratan palm that affords a part of the so-called dragon's-blood of commerce. **c., fluidextract of** (*fluidextractum calami,* U. S. P.). Dose 15 min.–1 dr. (1–4 Cc.). **c. scriptorius** [a writing-pen or reed], the groove on the floor of the lower extremity of the fourth ventricle, at the end of which is the ventricle of Arantius.

calaya (*kal-a'-yah*). A fluidextract of the fruit of *Anneslea febrifuga* (?), used in malaria. Dose 30 gr. (2 Gm.) every 2 hours.

calbroben (*kal-bro'-ben*). Same as *sabromin, q. v.*

calcalith (*kal'-kal-ith*). A proprietary preparation said to be a rheumatism remedy and uric-acid

solvent. It consists of calcium carbonate, lithia and colchicine.

calcaneal (*kal-ka'-ne-al*) [*calcaneum*, the heel]. Relating to the heel-bone, or calcaneum, or to a tuberosity in birds, resembling the calcaneum.

calcaneo-astragalar (*kal-ka'-ne-o-as-trag'-al-ar*). See *calcaneoastragaloid*. **c.-astragaloid**, relating to the calcaneum and the astragalus. **c.-cavus**, a club-foot that combines the characters of calcaneus and cavus. **c.-cuboid**, belonging to the calcaneum and the cuboid. **c.-navicular**. Relating to the calcaneum and the scaphoid bone, or os naviculare. **c.-scaphoid**, belonging to the calcaneum and the scaphoid bone. **c.-talar** (*kal-ka-ne-o-ta'-lar*). See *calcaneo-astragalar*. **c.-tibial** (*kal-ka-ne-o-tib'-e-al*) [*calcaneum; tibia*]. Relating to the calcaneum and tibia. **c.-valgo-cavus**, club-foot combining the features of calcaneus, valgus and cavus.

calcaneum, calcaneus (*kal-ka'-ne-um, -us*). The os calcis or heel bone. See *bones, table of*.

calcaneus (*kal-ka'-ne-us*) [*calcaneum*, the heel]. 1. See *calcaneum*. 2. Club-foot in which the heel alone touches the ground, the instep being drawn up toward the shin See *Talipes*.

calcanodynia (*kal-kan-o-din'-e-ah*) [*calcaneum*, the heel; ὀδύνη, pain]. Pain in the heel when walking or standing.

calcar (*kal'-kar*) [L., "a spur"]. 1. Any spur or spur-like point, as the hippocampus minor. 2. Ergot of rye. 3. The calcaneum. 4. The styloid process of the temporal bone. **c. avis**, the hippocampus minor. **c. femorale**, a plate of hard tissue around the neck of the femur. **c. pedis**, the heel bone.

calcarate (*kal' kar-āt*) [*calcar*]. Spurred; furnished with spurs or spur-like processes.

calcarea, calcaria (*kal-ka'-re-ah*) [*calx*, limestone]. Lime, calx. **c. usta**, calcium oxide, quicklime.

calcareous (*kal-ka'-re-us*) [*calcarea*]. 1 Pertaining to or of the nature of limestone. 2 Chalky appearance or consistence. 3 Growing in chalk.

calcariform (*kal-kar'-e-form*). Spur-shaped.

calcarine (*kal'-kar-ēn*) [*calcar*]. Spur-shaped; relating to the hippocampus minor. **c. fissure**. See *fissure, calcarine*.

calcariuria (*kal-kar-e-ū'-re-ah*) [*calcarea; urine*]. The excretion of calcium salts in the urine.

calcemia, calcæmia (*kal-se'-me-ah*) [*calcium; αἷμα*, blood]. The presence of an excessive amount of calcium in the blood.

calcic (*kal'-sik*) [*calx*, lime]. Of or pertaining to lime or calcium. **c. inflammation of gums and peridental membrane**, inflammation caused by deposits of calculus on the necks of the teeth.

calcicosis (*kal-sik-o'-sis*) [*calx*]. Marble-cutter's phthisis, a chronic inflammation of the lung due to the inhalation of marble-dust.

calcidine (*kal'-sid-ēn*). Trade name of a preparation containing calcium and iodine; used in catarrhal laryngitis; dose gr. ½–1 (0.02–0.06).

calciferol (*kal-sif'-er-ol*). A pure white crystalline substance known as vitamin D.

calciferous (*kal-sif'-er-us*). Containing lime, chalk, or calcium.

calcific (*kal-sif'-ik*) [*calx*]. Forming lime.

calcification (*kal-sif-ik-a'-shun*) [*calx; fieri*, to become]. The deposit of calcareous matter within the tissues of the body. **c., metastatic**, that resulting from an excess of lime-salts in the blood, as occurs in the rapid breaking down of bones from osteomalacia.

calcigerous (*kal-sij'-er-us*) [*calx*, lime; *gerere*, to bear]. Containing lime or a lime-salt; as the calcigerous cells of the dentine, or calcigerous tubules in bone.

calcigrade (*kal'-sig-rād*) [*calx*, heel; *gredi*, to walk]. Walking on the heels.

calcimeter (*kal-sim'-et-er*) [*calx; μέτρον*, measure]. An apparatus for calculating the amount of calcium in the blood.

calcination (*kal-sin-a'-shun*) [*calcinare*, to calcine]. The process of driving off the volatile chemical constituents from inorganic compounds. The expulsion of carbon dioxide from carbonates.

calcine (*kal'-sin* or *kal-sin'*) [*calcinare*, to calcine]. To separate the inorganic elements of a substance by subjecting it to an intense heat.

calcinol (*kal'-sin-ol*). Trade name of calcium iodate.

calcipexy (*kal'-se-pek-se*) [*calcium; πῆξις*, a fixing]. Fixation of calcium within the body during the processes of metabolism.

calciprivic (*kal-se-priv'-ik*). Denoting absence or deficiency of calcium.

calcis, os. The heel bone.

calcium (*kal'-se-um*) [*calx*]. Ca = 40.07; quantivalence II. A brilliant, silver-white metal, the basis of limestone, characterized by strong affinity for oxygen, and isolated with great difficulty. It is best known in the form of *calcium oxide*, quicklime; *calcium hydroxide*, slaked lime; and *calcium carbonate*, limestone or chalk. **c. acetate**, $Ca(C_2H_3O_2)_2$, a white, amorphous powder, soluble in water. It is used in tuberculosis and psoriasis. **c. albuminate**, an alterative and nutrient used in rhachitis. **c. benzoate**, $Ca(C_7H_5O_2)_2$, used in nephritis and albuminuria of pregnancy. Dose 5–10 gr. (0.32–0.65 Gm.). **c. bisulphite, liquid**, a solution of calcium sulphite ($CaSO_3$) in an aqueous solution of sulphurous acid. It is used, when diluted with 4 to 8 times its amount of water, as an antiseptic gargle or wash. **c. borate**, a very light white powder. It is used as an antiseptic and astringent, internally in children's diarrhea and externally in fetid perspiration and weeping eczema. Dose 1–5 gr. (0.06–0.32 Gm.) 3 times daily. Application, 10 to 20% ointment or dusting-powder. **c. boroglyceride**, an antiseptic substance prepared by heating together calcium borate and glycerol. It forms a transparent, hygroscopic mass, soluble in water and alcohol. **c. bromide** (*calcii bromidum*, U. S. P.), a nerve sedative. Dose 10–30 gr. (0.65–2.0 Gm.) twice daily. **c. bromoiodide**, $CaI_2 + CaBr_2$, a mixture of calcium iodide and bromide in molecular proportions, forming a yellow powder soluble in water. It is alterative and sedative. Dose 5–10 gr. (0.32–0.65 Gm.) 3 times daily. **c. carbide**, CaC_2, obtained from lime with carbon, by the electric furnace. It occurs in gray to bluish-black irregular lumps, decomposing with water, evolving acetylene, and leaving a residue of slaked lime; sp. gr. 2.22. It is used in the palliative treatment of cancer of the vagina and uterus. **c. carbolate**, $Ca(OC_6H_5)_2$, a reddish, antiseptic powder, used as a disinfectant and internal and external antiseptic. Dose 2–5 gr. (0.13–0.32 Gm.). **c. carbonate**, $Ca(OC_6H_5)_2$, a reddish powder used as an internal and external antiseptic. Dose 2–5 gr. (0.13–0.32 Gm.). **c. carbonate, precipitated** (*calcii carbonas præcipitatus*, U. S. P.), $CaCO_3$, a fine white powder, without odor or taste Dose 15 gr. (1 Gm.). **c. chloride** (*calcii chloridum*, U. S. P.), $CaCl_2$, soluble in water; used internally

to increase the coagulability of the blood. Dose 10–20 gr. (0.65–1.3 Gm.). **c. citrate,** $Ca_3(C_6H_5O_7)_2 + 4H_2O$, a crystalline powder, soluble in 1730 parts of water at 90° C; more soluble in cold water. A solution is recommended for the treatment of burns. **c. cresylate,** a syrupy fluid obtained by treating calcium hydroxide with cresol. It is used as a disinfectant instead of phenol. **c. eosolate,** $Ca_3(C_9H_7S_2O_{12})_2$, a sulphosalt of aliphatic creasote esters containing 25% of creasote and occurring as a gray powder soluble in 10 parts of water. Dose 4–10 gr. (0.26–0.65 Gm.) 4 or 5 times daily. **c. ferrophospholactate,** used in the treatment of tuberculosis and rhachitis. Dose 3–7½ gr. (0.2–0.5 Gm.). **c. glyceroarsenate,** a crumbling white powder, insoluble in water and alcohol, freely soluble in mineral and organic acids, especially in dilute citric acid. It is used in treatment of tuberculosis. Daily dose ½ gr. (0.01 Gm.). **c. glyceroborate,** an antiseptic compound of equal parts of calcium borate and glycerol. **c. glycerophosphate,** $CaC_3H_7PO_6$, a white, crystalline powder, soluble in cold water, almost insoluble in boiling water; it is a nerve tonic. Dose 2–5 gr (0.13–0.32 Gm.) 3 times daily. In treatment of enuresis, dose, for adults, 8 gr. (0.5 Gm.) twice daily. **c. hippurate,** $Ca(C_9H_8NO_3)_2$, a white, crystalline powder, slightly soluble in hot water. It is alterative. Dose 5–15 gr. (0.32–1.0 Gm.). **c. hydrate.** See *c. hydroxide.* **c. hydroxide,** slaked lime. **c. hypochlorite,** $Ca(ClO)_2$, white cubes decomposing readily. It is an antiseptic and is used as a disinfectant and strong bleaching agent. **c. hypophosphite** (*calcis hypophosphis*, U. S. P.), $Ca(PH_2O_2)_2$, a white, crystalline powder, lustrous scales, or transparent crystals, soluble in 7 parts of water, decomposing and giving out inflammable gas above 300° C. It is used in tuberculosis, chlorosis, etc. Dose 10–30 gr. (0.65–2.0 Gm.). Syn., *calcium hypophosphorosum.* **c. hyposulphite.** See *c. thiosulphate.* **c. iodate,** $Ca(IO_3)_2 + 6H_2O$, a white, crystalline powder, soluble in 400 parts of water, insoluble in alcohol. It is used internally in doses of 4–5 gr. (0.26–0.32 Gm.) to check fermentation and also as a succedaneum for iodoform. Syn., *calcinol.* **c. iodide,** CaI_2, a white powder or yellowish-white hygroscopic mass, soluble in water and alcohol. It is an alterative used instead of potassium iodide. Dose 2–5 gr. (0.13–0.32 Gm.) 3 times daily in syrup. Maximum dose, daily, 15 gr. (1 Gm.). **c. iodobehenate,** same as sajodin, *q. v.* **c. and iron lactophosphate,** a yellowish powder used in treatment of rhachitis and tuberculosis. Dose 3–8 gr. (0.19–0.52 Gm.) several times daily. **c. lactate,** $Ca(C_3H_5O_3)_2 + 5H_2O$, white, opaque, granular masses, soluble in water and hot alcohol. It is used in treatment of rhachitis and tuberculosis of children. Dose 3–10 gr. (0.19–0.65 Gm.) in syrup. **c. lactophosphate,** a crystalline compound of calcium lactate and calcium phosphate containing 1% of phosphorus; soluble in water. It is stimulant and nutrient. Dose 3–10 gr. (0.19–0.65 Gm.) 3 times daily. **c. oxide** (calx, U. S. P.), CaO, quicklime. **c. oxide, chlorinated.** See *lime, chlorinated.* **c. oxysulphide,** a compound of calcium, oxygen, and sulphur, forming a yellowish powder; used in washing scrofulous ulcers. **c. permanganate,** $Ca(MnO_4)_2 + 5H_2O$, deliquescent, brown crystals with violet luster, soluble in water. It is used internally in diarrhea of children and externally as a mouth lotion. Dose ½–2 gr. (0.05–0.13 Gm.). **c. peroxide,** $CaO_2 + 4H_2O$, an antiseptic, used in acid dyspepsia and summer diarrhea. Dose (children) ½–2 gr. (0.05–0.13 Gm.). **c. phosphate, antimoniated,** a mixture of precipitated calcium phosphate (67 parts) and antimony oxide (33 parts), occurring as a dull white, gritty powder, without odor or taste, soluble in boiling water. It is alterative, purgative, and emetic, and is used in acute rheumatism and febrile diseases. Dose 3–8 gr. (0.19–0.52 Gm.) 4 to 6 times daily. Syn., *antimonial powder; James' febrile powder.* **c. phosphate, dibasic,** $CaH_2(PO_4)_2$ or $CaHPO_4$, a white powder, soluble in acids, insoluble in water. It is used in diseases of bone, chlorosis, etc. Dose 8–20 gr. (0.52–1.3 Gm.). Syn., *bicalcic phosphate, secondary calcium phosphate.* **c. phosphate, monobasic,** $CaH_4(PO_4)_2 + H_2O$, the chief constituent of the so-called "superphosphate of lime," a decomposition-product of tricalcic or dicalcic phosphate and sulphuric acid, occurring as white, deliquescent, strongly acid crystals. **c. phosphate, precipitated** (*calcii phosphas præcipitatus*, U. S. P.), $Ca_3(PO_4)_2$, a bulky white powder, odorless and tasteless. Dose 15 gr. (1 Gm.). **c. phosphate, tribasic,** $Ca_3(PO_4)_2$, a light, white, amorphous powder without odor or taste, soluble in acids, insoluble in water. It is used as is the dibasic. **c. propionate,** $Ca(C_3H_5O_2)_2$, a white powder, soluble in water. **c. quinovate,** a compound of calcium and quinovic acid used in malarial fever and dysentery as a tonic. Dose ½–½ gr. (0.013–0.032 Gm.). **c. salicylate,** $CaC_7H_4O_3 + H_2O$, a white, crystalline powder with alkaline reaction, soluble with difficulty in water. It is used in intestinal diseases. Dose 8–20 gr. 0.52–1.3 Gm.). **c. santonate, c. santoninate,** $Ca(C_{15}H_{19}O_4)_2$, a white, odorless, insipid powder, insoluble in water or chloroform. It is anthelmintic. Dose ½–1½ gr. (0.03–0.1 Gm.). **c. sulphate,** $2CaSO_4 + H_2O$, a fine white, odorless and tasteless powder, used in making plaster bandages for fractures. Syn., *gypsum; plaster-of-Paris.* **c. sulphate, dried** (*calcii sulphas exsiccatus*, U. S. P.), a fine white powder without odor or taste. **c. sulphydrate,** $CaS.H_2S$, transparent crystals decomposing in the air; it is used as a depilatory. **c. sulphide,** CaS, a compound of calcium and sulphur, a yellow-white substance with odor of hydrogen sulphide and forming a large percentage of calx sulphurata. It is recommended in treatment of influenza (dose 1 gr. (0.06 Gm.) 4 times hourly) and in treatment of diphtheria (dose ½ gr. (0.01 Gm.) every hour, under 1 year of age, every ½ hour between the ages of 1 and 3, and every 15 minutes between the ages of 3 and 5). Syn., *calcium monosulphide.* **c. sulphide, hydrated,** CaS; it is used as a depilatory. **c. sulphite,** $CaSO_3$, a white powder, soluble in sulphurous acid and in 800 parts of water. It is antiseptic and is used in flatulent diarrhea. Dose $\frac{1}{10}$–5 gr. (0.0065–0.32 Gm.). **c. sulphocarbolate,** $Ca(C_6H_5SO_4)_2 + 6H_2O$, a white, odorless, astringent powder or scales, soluble in water. It is an internal antiseptic and astringent. Dose 5–15 gr. (0.32–1.0 Gm.) in 1% solution. **c. sulphophenate.** See *c. sulphocarbolate.* **c. thiosulphate,** CaS_2O_3, white antiseptic crystals, soluble in water; it is an

internal antiseptic. Dose 3–10 gr. (0.194–0.65 Gm.).

calcoglobulin (*kal-ko-glob'-ū-lin*). A combination of soluble calcium salts with an albuminous base. It has a distinct and definite form and is probably the basis of all the calcic tissues of the body.

calcoid (*kal'-koid*) [*calx*, lime; *εἶδος*, resemblance]. A neoplasm of the tooth-pulp.

calcophorous (*kal-kof'-or-us*) [*calx*, lime; *φερεῖν*, to bear]. Same as calcigerous, *q. v.*

calcospherites, calcosphærites (*kal-ko-sfe-rītz*) [*calx*, lime; *sphæra*, a sphere]. Hartig's term for the granules or globules formed in embryological dental pulp and in tissues like bone and shell by calcium salts brought by the blood into loose proteid combination and modified by the cytoplasm.

calcreose (*kal'-kre-ōz*). Trade name of calcium creosotate; said to have the same action and uses as creosote.

calcspar (*kalk'-spar*). Calcium carbonate, $CaCO_3$.

calculary (*kal'-kū-la-re*) [*calculus*, a stone]. Relating to or of the nature of a calculus.

calculifragous (*kal-kū-lif'-rag-us*) [*calculus*, a stone, *frangere*, to break]. Lithotritic; breaking or reducing a stone in the bladder.

calculoid (*kal'-ku-loid*). Resembling a calculus; a concretion

calculous (*kal'-kū-lus*) [*calculus*]. Of the nature of a calculus.

calculus (*kal'-kū-lus*) [dim. of *calx*, chalk]. A calcareous or stone-like concretion found in the body, particularly in cavities. **c., alternating,** one composed of alternate layers of the substances of which it is made up. **c., arthritic,** a gouty concretion. **c., articular.** See *c., arthritic.* **c., aural,** hardened cerumen in the external auditory canal. **c., biliary,** a gall-stone **c., blood,** a fibrinous calculus containing remains of blood-corpuscles. **c., bronchial,** a concretion in an air-passage. **c., chalky,** one made up mainly of calcium carbonate and calcium phosphate with small amounts of magnesium carbonate, water, and organic matter, and frequently having a foreign body as a nucleus. **c., cutaneous.** See *milium.* **c., cystic.** 1. A vesical calculus. 2. A gall-stone. 3 One composed of cystin. **c., cystic-oxide, c., cystin,** a urinary calculus, rarely found, and composed largely of cystin. **c., dental,** tartar on the teeth or gums. **c., encysted,** a vesical calculus which has become invested in a pouch springing from the wall of the bladder. **c., essential,** one having its origin within the tissue of an organ and not due to a foreign body. **c., fatty,** a vesical calculus having a nucleus of fat or saponeceous matter. **c. felleus,** a gallstone. **c., fibrinous,** a vesical calculus made up of dried coagulated albumin. **c., fusible,** a urinary calculus composed of phosphates of ammonium, calcium, and magnesium. **c., hemic,** a concretion of coagulated blood. **c., incarcerated.** See *c., encysted.* **c., intestinal.** Same as *enterolith.* **c., lacteal.** Same as *c. mammary.* **c., laminated,** one made up of layers of different materials. **c., mammary,** a calcareous nodule sometimes obstructing the lactiferous ducts. **c., mulberry,** the oxalate-of-lime variety, resembling a mulberry in shape and color. **c., nasal,** one found in the nasal cavities. **c., organic,** one with a nucleus formed of epithelium, blood, etc. **c., pineal,** brain-sand. See *acervulus.* **c., podagric.** See *c., arthritic.* **c. prostatic,** one in the prostate gland. **c., renal,** a calculus found in the kidney. **c., salivary.** 1. One formed in the ducts of the salivary glands. 2. The tartar deposited on teeth. **c., scrotal.** 1. A vesical or prostatic calculus which has made its way to the scrotum. 2. One formed in the scrotum from calcareous degeneration. **c., secondary,** a vesical calculus formed in consequence of a diseased condition of the mucosa of the urinary tract. **c. serumal,** tartar on the teeth from exudation of diseased gums. **c., urinary,** a concretion composed of concentric layers of crystallized substance cemented together by mucus or other organic material, occurring in the bladder. Urinary calculi (sand, gravel, or stones, according to size) may be classified as follows: (1) Those containing a mixture of uric acid with urates, with either little or no phosphates; (2) mixed calculi, those containing more phosphates than uric acid; (3) calcium-oxalate calculi; (4) phosphatic calculi—composed of calcium phosphate, triple phosphate, or a combination of calcium and magnesium phosphates; (5) calcium-carbonate calculi; (6) cystin calculi; (7) xanthin calculi; (8) fibrinous calculi, consisting of fibrin or inspissated albumin. **c., uterine,** an intrauterine concretion; a womb-stone; formed mainly by calcareous degeneration of a tumor. **c., vesical,** a calculus found in the urinary bladder. **c. xanthic,** a urinary calculus of xanthic oxide.

calcusol (*kal'-kū-sol*). A proprietary remedy for gout, said to consist of piperidine parasulphaminebenzoate and potassium bicarbonate.

Caldani's ligament (*kal-dah'-ne*) [Leopoldo Marco Antonio *Caldani*, Italian anatomist, 1725–1813]. A fibrous band extending from the inner border of the coracoid process to the lower border of the clavicle and upper border of the first rib, where it unites with the tendon of the subclavius muscle.

caldarium (*kal-da'-re-um*). A hot bath, or a room used for the administration of a hot bath.

Caldwell-Luc operation (*kawld'-wel-lūk*). Entering the antrum of Highmore through an incision in the supradental fossa between the second and third upper molar teeth.

calefacient (*kal-e-fa'-she-ent*) [*calidus*, warm; *facere*, to make]. 1 Warming, producing a sensation of heat. 2. A medicine, externally applied, that causes a sensation of warmth.

calefactor (*kal-e-fak'-tor*) [*calidus*, warm; *facere*, to make]. A warmer; a little, portable stove; a pocket stove; a chafing-dish.

calendula (*kal-en'-dū-lah*) [*calendæ*, the first day of the month]. Marigold. The flowering plant known as the garden-marigold, *C officinalis.* **c., tincture of** (*tinctura calendulæ*, U. S. P.), contains 20 % of the leaves and stems. It is used as a local application to wounds, bruises, and ulcers, and has been vaunted as a cure for carcinoma.

calendulin (*kal-en'-dū-lin*) [*calendula*]. An amorphous principle obtainable from calendula.

calentura (*kal-en-tu'-rah*). 1. See *calenture* (1). 2. Applied to an epidemic disease of horses in the Philippines. It is caused by a species of *Spirillum.* **c. amarilla, c. vomito negro,** yellow fever.

calenture (*kal'-en-tūr*) [Sp., *calentura*, heat; L., *calere*, to be hot]. 1. A tropical remittent fever with delirium; formerly, a supposed fever of this kind that attacked mariners, leading them to leap into the sea. 2. Sunstroke.

calf (*kahf*) [Icel., *kālfr*]. The thick, fleshy part of the back of the leg, formed by the gastrocnemius and soleus muscles. **c.-bone,** the fibula.

calibrate (*kal'-ib-rāt*) [Fr., *calibre*, the bore of a gun]. 1. To estimate the exact size of an opening, as of intestines to be united by anastomosis. 2. To graduate the tubes of a thermometer so that it will indicate the temperature correctly, or to determine the errors of the gradation when made; also, to determine the indication of the reading after the correction of the errors. 3. To determine the values of the scale divisions on an electrical instrument.

calibration (*kal-e-bra'-shun*). The act, process, or result of calibrating

calibrator (*kal'-e-bra-tor*). An instrument for determining the exact diameter of the lumen of an opening, as of the urethra. It may consist of a truncated cone supplied with a scale or some form of dilating blades.

caliche (*kah-le'-che*) [S. A., "a flake of lime from a wall"]. The South American name for crude sodium nitrate; Chili saltpeter.

California buckthorn. See *cascara sagrada.*

California disease (*cal-if-or'-ne-ah*). Coccidoidal granuloma.

caligation, caliginosity (*kal-ig-a'-shun, kal-ij-in-os'-it-e*). See *caligo.*

caliginous (*kal-ij'-in-us*). Relating to or affected with caligo.

caligo (*kal-i'-go*) [L.]. Dimness of vision; an opacity of the cornea, lens, or vitreous humor.

calioben (*kal-e-o'-ben*). Same as *sajodin, q. v.*

calipers (*kal'-ip-erz*) [corruption of *caliber*]. Compasses with curved legs.

calisaya (*kal-is-a'-yah*) [S. A.]. Cinchona bark, especially that of *cinchona calisaya.* See *cinchona.*

calisayin (*kal-e-sa'-yin*). An amorphous base consisting mostly of quinine obtained from cinchona bark.

calisthenics, callisthenics (*kal-is-then'-iks*), [καλός, beautiful; σθένος, strength]. The practice of various rhythmical movements of the body, intended to develop the muscles and produce gracefulness of carriage; light gymnastics, especially designed for the use of girls and young women.

calix (*ka'-liks*). See *calyx.*

Callaway's test (*kal'-la-way*) [Thomas *Callaway*, English surgeon, 19th century]. In dislocation of the humerus the circumference of the affected shoulder, measured over the acromion and through the axilla, is greater than that of the sound side.

Calleja's olfactory islets. Nests of large stellate cells interspersed with small nests of minute pyramidal cells, found in the cortex of the hippocampal gyrus.

Calliano's method of artificial respiration. A modification of Sylvester's: the arms are drawn up so as to expand the thorax, and then fixed above and behind the head by fastening the wrists together; pressing with the hands upon the thorax some 18 to 20 times a minute to induce respiration.

callisection (*kal-e-sek'-shun*) [*callus*, insensitive; *sectio*, a cutting]. Vivisection of anesthetized animals.

Callisen's operation (*kal'-is-en*) [Heinrich *Callisen*, Danish surgeon, 1740–1824]. *For lumbar colotomy;* a vertical incision is made following the line of the descending colon.

callomania (*kal-lo-ma'-ne-ah*) [καλός, beautiful; *mania*]. Delusion in which the patient believes herself endowed with beauty.

callosal (*kal-o'-sal*) [*callosum*]. Pertaining to the corpus callosum.

HEINRICH CALLISEN.

callositas (*kal-os'-it-as*). See *callosity.*

callosity (*kal-os'-it-e*) [*callus*]. A hard, thickened patch on the skin produced by excessive accumulation of the thorny layers. Syn., *callositas; keratoma; tyloma; tylosis.*

callosomarginal (*kal-o-so-mar'-jin-al*) [*callosum; margo*, margin]. Relating to the callosal and marginal gyri of the brain

callososerrate (*kal-o-so-ser'-āt*) [*callus; serratus*, saw-shaped]. Serrated callous projections.

callosum (*kal-o'-sum*). See *corpus callosum.*

callous (*kal'-us*) [*callus*]. Hard. See *callus.*

callus (*kal -us*) [L.]. 1. A callosity; hardened and thickened skin. 2. The new growth of incomplete osseous tissue that surrounds the ends of a fractured bone during the process of repair. **c., definitive,** the callus (in a fractured bone) which becomes bone tissue. **c., interior, c., internal,** provisional callus of a fractured bone deposited in its medullary canal. **c., permanent,** the permanent bond of bony union after reabsorption of the *provisional callus,* or cartilage-like, plastic material first thrown out. **c. of skin,** induration and thickening of the skin.

calmant (*kahm'-ant*) [ME., *calme*]. A calmative medicine.

calmative (*ka(h)l'-mat-iv*). 1. Calming; sedative. 2. A calming or sedative agent.

Calmette's reaction or **ophthalmo-tuberculin test** (*kal-met'*) [Albert *Calmette*, French bacteriologist, 1863–]. A diagnostic measure to detect the presence or absence of tuberculosis. It consists in the instillation into the eye of a drop of a 1% aqueous solution of an alcoholic precipitate of Koch's old tuberculin. In a positive reaction the conjunctiva becomes congested and a fibrinous exudate forms in the lower conjunctival sac and at the inner canthus.

calmin (*kal'-min*). A compound of antipyrine and heroine; it is used in asthma.

calmine (*kal'-min*). Trade name of the sodium salt of diethyl-barbituric acid.

calmopyrine (*kal'-mo-pi-rēn*). Trade name of the calcium salt of acetylsalicylic acid; used as an antipyretic.

calolactose (*cal-o-lak'-tōs*). Trade name of an intestinal disinfectant said to consist of calomel, 1 part; bismuth subnitrate, 1 part; lactose, 8 parts.

calomel (*kal'-o-mel*) [καλός, fair; μέλας, black]. Mercurous chloride. **c., colloidal.** Same as *calomelol*.

calomelol (*kal'-o-mel-ol*). Colloidal calomel; a proprietary preparation containing calomel and albuminoids; used as a dusting-powder or in ointment.

calor (*ka'-lor*) [L.]. 1. Heat. 2. Moderate fever-heat; less than *fervor* and *ardor*. **c. animalis,** animal heat. **c. febrilis,** fever-heat. **c. fervens,** boiling heat. **c. innatus,** natural or normal heat. **c. internus,** inward fever; fever not appreciable on the surface of the body. **c. mordax, c. mordicans,** biting or pungent heat. **c. nativus,** native or animal heat; blood-heat; normal heat.

calorescence (*kal-or-es'-ens*). Tyndall's name for the conversion of rays of heat into rays of light.

Calori's bursa (*ka-lor'-e*) [Luigi *Calori*, Italian anatomist, 1807–1896]. A bursa between the arch of the aorta and the trachea.

caloric (*ka-lor'-ik*) [*calor*]. 1. Pertaining to a calory or to heat. 2. Heat.

caloricity (*kal-or-is'-it-e*) [*calor*, heat]. The heat-producing power of the living animal body.

calorie (*kal'-or-e*). See *calory*.

calorifacient (*kal-or-if-a'-she-ent*) [*calor; facere*, to make]. Heat-producing (applied to certain foods)

calorific (*kal-or-if'-ik*) [*calor*, heat; *facere*, to make]. Heat-producing. **c. center,** heat-producing center. **c. fluid,** a local anesthetic for dental use, containing cocaine hydrochloride 1, camphor 10, oil of clove 4, ether 25, chloroform 30, and absolute alcohol 30 parts. **c. wool,** same as capsicum wool, *q. v.*

calorimeter (*kal-or-im'-et-er*) [*calor; μέτρον*, a measure]. An instrument for measuring the heat that bodies produce or absorb. **c., respiration** (Atwater's), an apparatus used to determine the caloric values of various foods and their effect on metabolism.

calorimetric equivalent. The amount of heat necessary to raise the temperature of the calorimeter 1° C.

calorimetry (*kal-or-im'-et-re*). The estimation of the heat-units by the calorimeter. **c., direct,** a method of estimating the amount of heat produced and given off by an animal incased in a ventilated cabinet, and inclosed in another cabinet filled with air or water by gaging the amount imparted to the air or water in the second cabinet. **c., indirect,** that arrived at by an estimation of the calorific value of a known quantity of food ingested by an animal in a given time.

calorimotor (*kal-or-im-o'-tor*) [*calor*, heat; *motor*, mover]. A galvanic battery that produces heating-effects, generating electricity in large quantity, but not necessarily with a high electro-motive force.

calorinesis (*kal-or-in'-es-is*) [*calor*, heat; *pl., calorineses*]. Any disease characterized by an alteration in the quantity of animal heat.

calorose (*kal'-or-ōs*). An invert sugar derived from saccharose, used in place of glucose in enemas and infusions.

calory (*kal'-or-e*) [Fr., *calorie*]. A heat-unit; the amount of heat required to raise the temperature of one kilogram of water from 0° to 1° C. This is also known as a *great calory*. **c., great.** See *calory*. **c., rational,** the amount of heat required to raise the temperature of 1 Gm. of water from 0° to 100° C., and is approximately equal to 100 small calories. **c., small,** the amount of heat required to raise the temperature of 1 Gm. of water 1° C.

Calot's method (*kal'-o*) [Francois *Calot*, French surgeon, 1861–]. Forcible reduction of angular deformity of the spine

calox. A proprietary preparation, containing calcium peroxide; used as a dentifrice.

calsa (*kal'-seh*). Trade name of a preparation of agar-agar; used in treatment of constipation.

calumba (*kal-um'-bah*) [native Mozambique, *kalumb*]. Columbo. The root of *Jateorrhiza calumba*, native to South Africa and parts of the East Indies. It is an excellent example of a simple bitter, and contains a bitter principle, *calumbin*, $C_{21}H_{22}O_7$, of which the dose is 1–3 gr. (0.065–0.2 Gm.). It is not astringent, and may be prescribed with salts of iron. It is useful in atonic dyspepsia, and as a mild, appetizing tonic in convalescence. **c., extract of** (*extractum calumbæ*, B. P.). Dose 2–10 gr (0.13–0.65 Gm.) **c., fluidextract of** (*fluidextractum calumbæ*, U. S. P.). Dose 5–30 min (0.32–2.0 Cc.). **c., infusion of** (*infusum colombæ*, B. P.). Dose 1–2 oz. (30–60 Cc.). **c., tincture of** (*tinctura calumbæ*, U. S. P.), contains 10% of calumba. Dose ½–2 dr. (2–8 Cc.).

calumbin (*kal-um'-bin*). A bitter principle found in *calumba, q. v.*

calvaria, calvarium (*kal-va'-re-ah, -um*) [*calva*, the scalp]. The upper part of the skull; the skull-cap.

calvarian (*kal-va'-re-an*) [*calva*, the scalp]. Relating to the calvaria.

calvities (*kal-vish'-e-ēz*) [*calvus*, bald]. Baldness.

calvitium (*kal-vish'-e-um*). See *calvities*.

calvous (*kal'-vus*) [*calvus*]. Bald.

calx (*kalks*) [L.]. 1. The heel. 2. Calcium oxide. **c. chlorinata** (U. S. P., B. P.), chlorinated lime. **c. iodata,** trade name of a loose compound of iodine and lime. **c. sulphurata** (U. S. P., B. P.), consists largely of calcium sulphide; used externally and internally in skin diseases. Dose 1/10 gr. (0.006 Gm.). **c. usta, c. viva,** burnt lime, unslaked lime, quick lime.

calyces of the kidneys (*kal'-is-ēz*) [plural of *calyx*]. The cup-like tubes of the ureter that encircle the apices of the Malpighian pyramids of the kidneys.

calyciform (*kal-is'-e-form*) [*calyx; forma*, shape]. Cup-shaped; resembling a calyx.

calycine (*kal'-is-in*) [*calyx*, calyx]. In biology, pertaining to or resembling a calyx.

calycle (*kal'-ik-l*) [*calyculus*, a little calyx]. In biology, applied to parts that resemble a calyx, as the bracts or leaflets of certain plants, or the cup-cells of zoophytes.

calyculus (*kal-ik'-ū-lus*) [pl., *calyculi*]. See *calycle*

calyculi gustatorii. See *taste-buds*.

calyx (*ka'-liks*) [L., pl., *calyces*]. A cup; especially one of the cup-like divisions of the pelvis of the kidney into which the pyramids project. **c. of ovum,** the wall of the Graafian follicle from which the ovum has escaped.

camara (*kam'-ar-ah*). 1. An arched or vaulted chamber. 2. The fornix of the brain. 3 The hollow of the external ear.

cambium (*kam'-be-um*) [L.]. A layer of tissue formed between the wood and the bark of exogenous plants.

cambodia (*kam-bo'-de-ah*). See *cambogia.*

cambogia (*kam-bo'-je-ah*) [*Camboja*, or *Cambodia*, in Siam]. Gamboge. A resinous gum from *Garcinia hanburii*, a tree native to southern Asia. Its properties are due to gambogic acid. It is a drastic, hydragogue cathartic, decidedly diuretic. **c., compound pill of** (*pilula cambogia composita*, B. P.), contains cambogia, aloes, hard soap, compound powder of cinnamon, and syrup. Dose 5–10 gr. (0.32–0.65 Gm.). It is also officially a constituent of compound cathartic pills.

camenthol (*kam-en'-thol*). Trade name of a mixture of camphor and menthol; used by inhalation in catarrhal conditions of nose and throat.

camera (*kam'-er-ah*) [κάμάρα, an arched roof or chamber]. 1. See *camara.* 2. In optics, the apparatus used for photography. **c. aquosa,** the anterior aqueous chamber of the eye. **c. cordis,** the enveloping membrane of the heart, the pericardium. **c., lucida,** a prism device which depicts distant objects on a horizontal surface in a dark room, invented by the chemist, Wollaston. **c. oculi,** the chamber of the eye. **c. septi lucidi,** the fifth ventricle of the brain

Camerer's law (*kam'er-er*). The food requirements of a child depend upon its weight rather than its age.

camiofen ointment (*kam-i'-o-fen*). The trade mark identifying an ointment of equal parts of *iocamfen* and an emollient base.

camisia fœtus (*kam-is'-e-ah*). The chorion.

camisole (*kam-is-ōl'*) [Fr.]. The strait-jacket, used for the restraint of the violently insane.

Cammidge's test [Percy John *Cammidge*, English physician]. A test for the detection of pancreatic disease by examination of the urine for a substance, probably pentose.

camomile, chamomile (*kam'-o-mīl*). See *anthemis* and *matricaria.*

Campani's test (*kam-pah'-ne*). *For glucose:* If a concentrated solution of lead subacetate mixed with a dilute solution of copper acetate is added to urine containing glucose a yellow to orange-red precipitate results.

camp cure. Life in camp and in the open air, adopted as a therapeutic measure. **c. fever,** synonym of *typhus fever.* **c. measles,** an epidemic of measles among soldiers.

Camper's angle (*kam'-per*) [Peter *Camper*, Dutch anatomist, 1722–1789]. See *facial angle.* **C.'s chiasm,** the crossing of the inner fibers of the tendons of the flexor sublimis digitorum (see under *muscle*) after they have separated to give passage to the tendons of the deep flexor. **C.'s fascia,** the superficial layer of the lower part of the superficial fascia of the abdomen. **C.'s ligament,** triangular ligament; the deep perineal fascia. **C.'s line,** a line running from the external auditory meatus to a point just below the nasal spine.

camphacol (*kam'-fak-ol*). A proprietary preparation said to contain camphoric acid, formaldehyde and guaiacol; used in catarrhal conditions of the respiratory and urinary tract. Dose gr. 5–20 (0.3–1.2 Gm).

camphene (*kam'-fēn*) [*camphor*]. 1. Any one of the volatile oils or hydrocarbons having the general formula $C_{10}H_{16}$, isomeric with oil of turpentine. Many camphenes, as oil of cloves, etc., exist ready formed in plants. They are liquid at ordinary temperatures. 2. Purified oil of turpentine.

camphenol (*kam-fe'-nol*). A compound of camphor cresols, and phenols; it is a disinfectant.

camphin (*kam'-fin*). $C_{10}H_8$. A colorless oil obtained by the distillation of camphor with iodine.

camphoid (*kam'-foid*) [*camphor*]. A substitute for collodion. It is a solution, one in 40, of pyroxylin, in equal parts by weight of camphor and absolute alcohol.

camphol (*kam'-fol*). See *borneol.*

campholyptus (*kam-fo-lip'-tus*). A proprietary external anodyne said to consist of eucalyptol, camphor and chloral.

camphomenthol (*kam-fo-men'-thol*). Camphorated menthol.

camphophenique (*kam-fo-fen-ēk'*) [Fr.]. A proprietary preparation combining camphor and phenol; it is recommended as an antiseptic and local stimulant.

camphor (*kam'-for*) [*camphora*, camphor], $C_{10}H_{16}O$. A solid, volatile oil obtained from *Cinnamomum camphora*, a tree indigenous to eastern Asia. It yields camphoric and camphonic acids, also camphor cymol when exposed to a high heat in closed vessels. It is antispasmodic, anodyne, diaphoretic, and stimulant. Applied locally, it is rubefacient. It is used in cholera, vomiting, the typhoid state, headache, diarrhea with pain, etc., cardiac depression, and affections requiring an antispasmodic **c., artificial,** $C_{10}H_{16}HCl$, a terpene hydrochloride obtained from oil of turpentine by action of hydrochloric acid; it is a solid very similar to camphor. **c.-ball,** an English preparation used as an application to, chapped skin. Its composition is spermaceti, 4; white wax, 12; oil of almonds, 5; melt in a water-bath, and add flowers of camphor, 4; dissolve, and when nearly cold pour into boxes or mold in gallipots. **c., Borneo.** See *borneol.* **c., carbolated,** a mixture of 2½ parts of camphor with 1 each of phenol and alcohol; it is a good antiseptic dressing for wounds. **c. cerate** (*ceratum camphoræ*, U. S. P.), consists of camphor liniment, 3; olive-oil, 12; simple cerate, 85. It is used for itching skin affections. **c., chloral,** a fluid prepared by mixing equal parts of camphor and chloral. It is an excellent solvent for many alkaloids, and is used externally as a sedative application. **c., citrated,** a compound of citric acid and camphor; a white powder antiseptic, antispasmodic, and stimulant. Dose 3–10 gr. (0.2–0.65 Gm.) several times daily. **c., flowers of,** powdered camphor obtained by condensing sublimed camphor. **c -ice,** a cosmetic preparation made by melting 16 parts of white wax with 48 parts of benzoated suet, and then adding 8 parts of camphor and 1 part of oil of lavender. **c., Japan,** the commercial variety brought from Japan; it is also called *tub camphor*, from the receptacle in which it comes, or *Dutch camphor*, from its introduction into the market by that people. **c. liniment** (*linimentum camphoræ*, U. S. P.), a preparation consisting of camphor, 20 parts; cotton-seed oil, 80 parts. **c. liniment, compound** (*linimentum camphoræ compositum*, B. P.), contains camphor and oil of lavender dissolved in rectified spirit, and strong

solution of ammonia added. **c., liquid,** oil of camphor. **c., liquid artificial,** $C_{10}H_{16}HCl$, a liquid isomere of solid artificial camphor obtained from oil of turpentine by action of gaseous hydrochloric acid at high temperatures. **c., monobromated** (*camphora monobromata*, U. S. P.), $C_{10}H_{15}BrO$, camphor in which one atom of hydrogen has been replaced by an atom of bromine. It resembles the bromides in therapeutic action. Dose 1–10 gr. (0.065–0.65 Gm.). **c., Neroli.** See *aurade*. **c.-resin,** $C_{20}H_{30}O_2$, a yellow, resinous body obtained from camphor by heating it with an alcoholic solution of caustic potash. **c. salicylate,** prepared by heating together 14 parts of camphor and 11 of salicylic acid. It is used as an ointment. **c., spirit of** (*spiritus camphoræ*, U. S. P.), contains camphor, 10; alcohol, 90 parts Dose 5–20 min. (0.3–1.2 Cc.). **c., tincture of, compound** (*tinctura camphoræ composita*, B. P.), contains opium, benzoic acid, camphor, oil of anise, and proof spirit. Dose 15 min–1 dr. (1–4 Cc.). **c., tincture of, Rubini's,** a saturated solution of camphor in alcohol. Dose 2–5 min. (0.12–0.3 Cc.). **c.-water** (*aqua camphoræ*, U. S. P.), consists of camphor, 8, alcohol, 5; distilled water, sufficient to make 1000 parts. Dose 1–4 dr. (4–16 Cc.).

camphora (*kam-fo'-rah*). See *camphor*.

camphoraceous (*kam-for-a'-shus*). Resembling or containing camphor. Syn., *camphoroid; camphorous*.

camphorate (*kam'-for-āt*). A salt of camphoric acid.

camphorated (*kam'-for-a-ted*) [*camphor*]. Impregnated with camphor. **c. oil,** camphor liniment (camphor 20, cotton-seed oil 80).

camphoric (*kam-for'-ik*). Relating to camphor. **c. acid.** See *acid, camphoric*. **c.-acid phenetidin,** a compound of camphoric acid and paraphenetidin. **c. anhydride,** $C_{11}H_{14}O_3$, the anhydride of camphoric acid, a sticky mass obtained by heating crude acid.

camphorism (*kam'-for-izm*). Camphor-poisoning; a condition marked by gastritis, coma, and convulsions, due to excessive ingestion of camphor and its preparations.

camphorogenol (*kam-for-oj'-en-ol*), $C_{10}H_{18}O_2$. Constituent of camphor occurring as tolerably heavy oil with smell like camphor

camphoromania (*kam-for-o-ma'-ne-a*) [*camphor; μάνια*, frenzy]. The camphor habit; a morbid craving for camphor.

camphoroxol (*kam-for-oks'-ol*). A 3 % solution of hydrogen dioxide containing 32 % of alcohol and 1 % of camphor.

camphrene (*kam'-frēn*), $C_9H_{14}O$. A volatile product of camphor and sulphuric acid.

camphyl (*kam'-fil*). The hypothetical radical of borneol, $C_{10}H_{17}$. **c. alcohol,** borneol.

campimeter (*kam-pim'-et-er*). See *perimeter*.

campiodol (*kam-pi'-o-dol*). Oil of rape seed, *Brassica napus*, iodized. Used in x-ray examination.

campsis (*kamp'-sis*) [*κάμψις*, a curving]. Any abnormal curvature or flexion.

camptocormia (*kamp-to-kor'-me-ah*) [*καμπτός*, flexible, *κορμός*, trunk]. (1) A condition in which the body is abnormally flexed. (2) Any static deformity produced in modern warfare.

camptodactylia (*kamp-to-dak-til'-e-ah*) [*καμπτός*, bent; *δάκτυλος*, finger]. Permanent flexion of one or more fingers.

campylochirus (*kam-pil-o-ki'-rus*) [*καμπύλος*, crooked; *χείρ*, hand]. Having distorted hands.

campylorrhachis (*kam-pil-or'-a-kis*) [*καμπύλος*, crooked; *ῥάχις*, backbone]. A fetus with spinal deformity.

campylorrhinus (*kam-pil-o-ri'-nus*) [*καμπύλος*, crooked; *ῥίς*, nose]. A monstrosity with a deformity of the nose.

Canada balsam (*kan'-a-dah*). See *balsam, Canada*. **C. fleabane.** See *erigeron*. **C. hemp.** See *apocynum*. **C. pitch.** See *pix canadensis*.

canadine (*kan'-ad-ēn*), $C_{21}H_{21}NO_4$. An alkaloid from the rhizome of *Hydrastis canadensis*, occurring in pure white needles, soluble in alcohol and melting at 132°–135° C.

canadol (*kan'-ad-ol*). A transparent volatile liquid resembling benzene in smell. It is a local anesthetic used in minor surgical operations.

canal, canalis (*kan-al', kan-a'-lis*) [L., *canalis*]. A tubular channel or passage. **c., abdominal.** See *c., inguinal*. **c., adductor.** See *Hunter's canal*. **c., Alcock's.** See *Alcock's canal*. **c., alimentary,** the whole digestive tube from the mouth to the anus. **c., alisphenoid,** in comparative anatomy, a canal in the alisphenoid bone, opening anteriorly into the foramen rotundum, and transmitting the external carotid artery. **c., alveolar, anterior,** one located in the superior maxilla; it transmits the anterior superior dental nerve. **c., alveolar, inferior,** the inferior dental canal. **c., alveolar, median,** one located in the superior maxilla and transmitting the middle superior dental nerve. **c., alveolar, posterior,** one situated in the superior maxilla; it transmits the posterior superior dental nerve. **c., alveolodental,** any of the dental canals. **c., anal,** the third part of the rectum or space between the rectum proper and the anus. **c., arachnoid,** a space formed beneath the arachnoid membrane of the brain; it transmits the venæ magnæ Galeni. **c. of Arantius,** the ductus venosus. **c., archinephric,** the duct of the archinephron or primitive kidney. **c., Arnold's innominate.** See *Arnold's canal*. **c., arterial.** See *ductus arteriosus*. **c., atrial,** the cavity of the atrium. **c., auditory, external,** that from the auricle to the tympanic membrane. **c., auditory, internal,** that beginning on the posterior surface of the petrous bone, and extending outward and backward for a distance of about four lines; it transmits the auditory and facial nerves and the auditory artery. **c., auricular.** 1. See *c., auditory, external*. 2. The constriction between the auricular and ventricular portions of the fetal heart. **c., avant-,** the anterior portion of the male urethra. **c., Bartholin's,** the duct of Bartholin's gland. **c., Bernard's.** See *Bernard's canal*. **c., Bichat's.** See *Bichat's canal*. **c., biliary.** See *c., hepatic*. **c., blastoporic.** See *c., neurenteric*. **c., Bochdalek's.** See *Bochdalek's canal*. **c. of bone,** a canaliculus of bone. **c., Braun's.** See *c., neurenteric*. **c., Braune's.** See *Braune's canal*. **c., Breschet's.** See *c.s of diploe*. **c., bullular.** See *c. of Petit*. **c., carotic tympanic,** two or three short canals extending from the carotid canal to the tympanum; they transmit branches of the carotid plexus. **c., carotid,** one in the petrous portion of the temporal bone; it transmits the internal carotid artery. **c.s of cartilage,** the canals in ossifying cartilage during its vascularization, intended to receive prolongations of the osteogenetic layer of the periosteum. They radiate in all directions from the center of ossification. **c., central (of the modiolus),** a canal running

from the base to the apex of the cochlea. **c., central (of spinal cord)**, the small canal that extends through the center of the spinal cord from the conus medullaris to the lower part of the fourth ventricle. It represents the embryonic ectodermal canal. **c., cerebrospinal.** 1. The neural or craniovertebral canal formed by the skull and the spine, and containing the brain and spinal marrow. 2. The primitive continuous cavity of the brain and spinal cord, not infrequently more or less extensively obliterated in the cord, but in the brain modified in the form of the several ventricles and other cavities. **c., cervical.** See *c. of cervix uteri*. **c., cervicouterine.** See *c., uterine*. **c. of cervix uteri**, that portion of the uterine canal that extends between the internal and the external os. **canalis choledochus**, the common bile-duct. **c. of chorda tympani**, a small canal in the temporal bone, between its squamous and petrous portions, parallel with the Glaserian fissure; it transmits the chorda tympani nerve. **c., ciliary.** See *c. of Fontana*. **c., circumpeduncular**, the lateral ventricles of the brain. **c. of Cloquet.** See *c., hyaloid*. **c., cochlear**, the spiral and snail-like cavity of the cochlea, 28 to 30 mm. long. The base is turned inward toward the internal auditory meatus, and the apex outward toward the tympanum. **c., connecting**, the arched or coiled portion of a uriniferous tubule, joining with a collecting tubule. **c. of Corti.** See *Corti's canal*. **c., Cotugno's, c. of Cotunnius.** See *aqueduct of Cotunnius*. **c., craniopharyngeal**, a fetal canal perforating the posterior part of the sphenoid bone and extending from the pharynx to the hypophysis and the epiphysis; it sometimes persists in infancy. **c., craniovertebral.** See *c., cerebrospinal*, and *c., vertebral*. **c., crural.** See *c., femoral*. **c.s. of Cuvier.** See *Cuvier's canals*. **c., cystic**, the cystic duct. **c., deferent**, the vas deferens. **c.s, demicircular.** See *c.s, semicircular*. **c., dental, anterior**, one extending into the facial portion of the superior maxilla; it transmits the anterior dental vessels and nerves. **c., dental, inferior**, the dental canal of the inferior maxilla; it transmits the inferior dental nerve and vessels **c.s, dental, posterior**, two canals in the superior maxilla. They transmit the superior posterior dental vessels and nerves. **c.s, dentinal**, the minute canals in dentine, extending approximately at right angles to the surface of a tooth from the pulp-cavity, into which they open, to the cementum and enamel. **c.s of derivation**, anastomotic venous branches extending from deep to superficial veins. **c., digestive.** See *c., alimentary*. **c.s of diploe**, canals in the diploe of the cranium transmitting Breschet's veins. **c., ejaculatory.** See *duct, ejaculatory*. **c. of epididymis**, a convoluted tube, about 20 feet long when straightened, forming the epididymis and continuous with the vas deferens. **c., ethmoid, anterior**, one between the ethmoid and frontal bones; it transmits the nasal branch of the ophthalmic nerve and the anterior ethmoid vessels. **c., ethmoid, posterior.** See *c., orbital, posterior internal*. **c., Eustachian.** See *Eustachian canal*. **c., facial**, the aqueduct of Fallopius; it transmits the facial nerve. **c., Fallopian.** See *c., facial*. **c. of the Fallopian tube.** See *aquæductus Fallopii*. **c., femoral.** 1. The inner compartment of the sheath of the femoral vessels behind Poupart's ligament. 2. See *c., Hunter's*. **c. of Ferrein.** See *Ferrein's canal*. **c. of Fontana**, a series of small spaces formed by the interlacing of the connective-tissue fibers of the framework of the peripheral processes of the iris, situated in the angle of the anterior chamber, and serving as a medium for the transudation of the aqueous humor from the posterior to the anterior chamber of the eye. Syn., *canal of Hovius; ciliary canal; Fontana's spaces*. **c.s, galactophorous**, the lactiferous tubules of the mammary gland. **canalis ganglionaris**, the spinal canal of the modiolus. **c. of Gartner.** See *Gartner's canal*. **c., genital**, in comparative anatomy, any canal designed for copulation or for the discharge of ova. **c. of Guidi.** See *c., Vidian*. **c., Hannover's.** See *Hannover's canal*. **c.s of Havers.** See *Haversian canals* **c., hemal**, the ventral of the two canals, of which, according to R. Owen, the vertebrate animal is composed. It contains the heart and the other viscera, while the neural canal incloses the central nervous system **c. of Henle.** See *Henle's canal*. **c., Hensen's.** See *Hensen's canal* **c., hepatic.** 1. The excretory duct of the liver. 2. The radicles of the hepatic duct. **c., hernial**, one transmitting a hernia. **c., His'**, the thyroglossal duct of the fetus, of which the cecal foramen of the tongue is the vestige and which may persist during postnatal life. **c. of Hovius.** See *c. of Fontana*. **c. of Huguier.** See *c of chorda tympani*. **c., Hunter's.** See *Hunter's canal*. **c. of Huschke.** See *Huschke's canal*. **c., hyaloid**, a canal running anteroposteriorly through the vitreous body, through which, in the fetus, the hyaloid artery passes, to ramify on the posterior surface of the crystalline lens. **c. of the hypoglossus**, the anterior condylar foramen. **c., incisor**, a canal that opens into the mouth by an aperture just behind the incisor teeth of the upper jaw; it is formed by a groove on the adjoining surfaces of the superior maxillæ, and has two branches that open into the nasal fossæ. **c., infraorbital**, a small canal running obliquely through the bony floor of the orbit; it transmits the infraorbital artery and nerve. **c., inguinal**, a canal about 1½ inches long, running obliquely downward and inward from the internal to the external abdominal ring, and constituting the channel through which an inguinal hernia descends; it transmits the spermatic cord in the male and the round ligament of the uterus in the female. **c., innominate.** See *Arnold's innominate canal*. **c., intestinal**, that portion of the alimentary canal that is included between the pylorus and the anus. **c., intralobular, biliary**, the radicals of the bile-ducts, forming a fine network in and around the hepatic cells, and communicating with vacuoles in the cells. **c. of Jacobson.** See *c., tympanic*. **c. of Kowalewsky.** See *c., neurenteric*. **c., lacrimal.** 1. The bony canal that lodges the nasal duct. 2. One of the lacrimal canaliculi. **c., Landzert's.** See *c., craniopharyngeal*. **c., Lauth's.** See *c. of Schlemm*. **c. of Loewenberg.** See *Loewenberg's canal*. **c., malar**, one in the malar bone transmitting the malar division of the temporomalar branch of the superior maxillary nerve. **c.s, mandibular.** See *c., dental, inferior*. **c., mastoid**, one opening just above the stylomastoid foramen and transmitting the auricular branch of the vagus nerve. **c., maxillary.** See *c., dental*. **c., median.** 1. The central canal of the

spinal cord. 2. The aqueduct of Sylvius. **c., medullary.** 1. The hollow cavity of a long bone, containing the marrow. 2. See *c., vertebral.* 3. The central canal of the spinal cord. 4 A Haversian canal. 5 In embryology, the medullary tube. **c., medullary, cerebrospinal,** the central canal of the spinal cord. **c., membranous, of the cochlea,** a canal in the cochlea, following the turns of the lamina spiralis; it is bounded by the basilar membrane, the membrane of Reissner, and the wall of the cochlea **c.s, membranous, semicircular.** See *c.s, semicircular.* **c. of modiolus.** See *c., spiral, of the modiolus.* **c., myelonal,** the central canal of the spinal cord. **c., nasal.** 1. See *c., lacrimal* (1). 2. An occasional canal found in the posterior portion of the nasal bone; it transmits the nasal nerves. **c., nasolacrimal.** See *c., lacrimal* (1). **c., nasopalatine.** See *c., incisor.* **canalis nervi petrosi profundi minoris,** one in the petrosa transmitting the deep petrosal nerve. **canalis nervi petrosi superficialis majoris,** one opening into the Fallopian aqueduct and transmitting the great superficial nerve. **c., neural.** See *c., vertebral.* **c., neurenteric** (of Kowalewsky), also called blastoporic canal, in the embryo, a passage leading from the posterior part of the medullary tube into the archenteron. **c., neurocentral.** See *c., vertebral.* **c. of Nuck.** See *Nuck, canal of.* **c.s, nutritive.** See *c.s, Haversian.* **c., obstetric.** See *c., parturient.* **c., obturator,** a canal in the ilium transmitting the obturator nerve and vessels. **c.s, olfactory,** in the embryo, the nasal fossæ at an early period of development **c., omphalomesenteric,** in the embryo, a canal that connects the cavity of the intestine with the umbilical vesicle. **c., orbital, anterior internal.** See *c., ethmoid, anterior.* **c., orbital, posterior internal,** the posterior of two canals formed by the ethmoid bone and the orbital plate of the frontal bone. It transmits the posterior ethmoid vessels. **c., palatine, accessory posterior,** one or two canals in the horizontal plate of the palate bone, near the groove entering into the formation of the posterior palatine canal. **c., palatine, anterior,** formed by the union of the incisive canals; it opens on the palate behind the incisor teeth. **c., palatine, descending.** See *c. palatomaxillary.* **c., palatine, external, small,** a small canal in the pyramidal process of the palate bone, close to its connection with the horizontal plate. It transmits the external palatine nerve. **c., palatine, posterior, c., palatine, smaller.** See *c., palatomaxillary.* **c., palatine, superior,** one formed by the palate bone and the superior maxilla, transmitting the large palatine nerve and blood-vessels. **c., palatomaxillary,** one formed by the outer surface of the palate bone and the adjoining surface of the superior maxilla. It transmits the large palatine nerve and blood-vessel. **c., parturient,** the channel through which the fetus passes in parturition, comprising the cavity formed by the uterus and vagina considered as a single canal **c., pelvic,** the canal of the pelvis from the superior to the inferior strait. **c., perivascular,** the lymph-spaces about the blood-vessels. **c. of Petit.** See *Petit's canal.* **c., petromastoid,** a small canal, not always present, situated at the angle of union between the mastoid and petrous bones. It transmits a small vein from the middle fossa of the skull to the transverse sinus. **c.s, petrosal,** two canals on the upper surface of the petrous portion of the temporal bone, transmitting the large and small superficial petrosal nerves. **c., pharyngotympanic,** one in the embryo developing into the Eustachian canal and the tympanum. **c., plasmatic,** a Haversian canal. **c., pore.** See *c., porous.* **c., porous,** a canal in the ovule, supposed to serve for the entrance of the spermatozoids in fecundation. **c., portal,** the space in the capsule of Glisson of the liver, in which the portal vein, hepatic artery, and bile-duct lie. **c., primitive,** the vertebral canal of the embryo. **c.s, pseudostomatous,** the processes of branched cells that extend from a subepithelial or endothelial layer to the free surface, their free ends forming the pseudostomata. **c., pterygoid.** See *c., Vidian.* **c., pterygopalatine,** one formed by the root of the internal pterygoid plate of the sphenoid bone and the sphenoid process of the palate bone. It transmits the pterygopalatine vessels and nerve. **c., pulmoaortic.** See *ductus arteriosus.* **c. of the quadrigemina,** the Sylvian aqueduct. **canalis radicis,** one in the root of a tooth. **c.s of Recklinghausen.** See *Recklinghausen's canals.* **c., recurrent, canalis recurrens.** See *c., Vidian.* **c., Reichert's.** See *c., Hensen's.* **c. of Reissner.** See *c., membranous, of the cochlea.* **c. of Rivinus,** the duct of the sublingual gland. **c. of Rosenthal.** See *c., spiral, of the modiolus.* **c., sacculocochlear,** one connecting the sacculus and the cochlea. **c., sacculoutricular,** one connecting the sacculus and the utricle. **c., sacral,** the continuation of the vertebral canal in the sacrum. **c.s, Saviotti's.** See *Saviotti's canals.* **c. of Schlemm.** See *Schlemm's canal.* **c.s, semicircular,** bony canals of the labyrinth of the internal ear. They are three in number,—the external, superior, and posterior,—and contain the membranous semicircular canals. **c., semicircular, anterior, c., semicircular, anterior vertical.** See *c., semicircular, superior.* **c., semicircular, external,** that one of the semicircular canals of the labyrinth having its plane horizontal and its convexity directed backward. **c., semicircular, frontal.** See *c., semicircular, superior.* **c., semicircular, horizontal.** See *c., semicircular, external.* **c., semicircular, inferior, c., semicircular inner, c., semicircular, internal.** See *c., semicircular, posterior.* **c., semicircular, lateral.** See *c., semicircular, external.* **c., semicircular, osseous.** See *c.s, semicircular.* **c., semicircular, posterior,** that one of the semicircular canals having its convexity directed backward and its plane almost parallel to the posterior wall of the pyramid. **c., semicircular, posterior vertical, c., semicircular, sagittal.** See *c., semicircular, posterior.* **c., semicircular, superior,** that one of the semicircular canals having its convexity directed toward the upper surface of the pyramid. **c.s, seminal,** the seminiferous tubules. **c., serous,** any minute canal connected with the lymph-vessels and supposed to be filled with lymph. **c., sheathing,** the communication between the cavity of the tunica vaginalis of the testicle and the general peritoneal cavity. It soon closes in man, leaving the tunica vaginalis a closed sac. **c., spermatic.** 1. The vas deferens. 2. The inguinal canal in the male. **c., sphenopalatine.** See *c., pterygopalatine.* **c., spinal.** See *c., vertebral.* **c., spiral, of the cochlea,** one that runs spirally around

the modiolus, taking two turns and a half, diminishing in size from the base to the apex, and terminating in the cupola. **c., spiral, of the modiolus,** a small canal winding around the modiolus at the base of the lamina spiralis. **c., spiroid, of the temporal bone.** See *c., facial.* **c., of Steno,** the duct of the parotid gland. **c. of Stilling.** See *c., hyaloid,* and *c., central, of spinal cord.* **c., suborbital.** See *c., infraorbital.* **c., supraorbital,** one at the upper margin of the orbit. It transmits the supraorbital artery and nerve. **c., tarsal,** one between and below the heads of the abductor hallucis, transmitting the vessels and nerves to the sole of the foot. **c., temporal, c., temporomalar.** See *c., zygomaticotemporal.* **c., thoracic,** the thoracic duct. **canales tubæformes,** the semicircular canals. **canalis tuberculorum quadrigeminorum,** the aqueduct of Sylvius. **c., tuboovarian,** the oviduct. **c., tubotympanal,** the inner division of the first gill cleft in the embryo. **c., tympanic,** one that opens on the lower surface of the petrous bone, between the carotid canal and the groove for the internal jugular vein. It transmits Jacobson's nerve. **c., uterine,** the cavity of the uterus, including the body and neck. **c., uterocervical,** the cavity of the cervix uteri. **c., uterovaginal.** 1. The common canal formed by the uterus and vagina. 2. In embryology, the duct of Mueller. **c., vaginal,** the canal of the vagina **c., vaginoperitoneal,** the inguinal canal. **c., vascular.** See *c.s, Haversian.* **c., vector,** the oviduct. **c., venous,** the ductus venosus. **c., vertebral,** the canal formed by the vertebræ; it contains the spinal cord and its membranes. **c., Vidian.** See *Vidian canal.* **c.s, Volkmann's.** See *Volkmann's canals.* **canalis vomeris,** one lying between the vomer and the lower surface of the sphenoid, and transmitting blood-vessels to the nose. **c.s, vomerobasilar, c.s, vomerosphenoid, lateral,** small lateral canals lying between the vomer and the sphenoid, transmitting blood-vessels. **c., vulvar,** the vestibule of the vagina. **c., vulvouterine,** the vagina. **c., vulvovaginal.** 1. The vagina and the vulva considered as a single canal. 2. The orifice of the hymen. **c. of Wirsung,** the pancreatic duct. **c. of Wolff.** See *Wolffian duct.* **c., zygomatic.** See *c., zygomaticotemporal.* **c., zygomaticofacial.** See *c., malar.* **c., zygomaticotemporal,** the temporal canal of the malar bone, running from its orbital to its temporal surface. It transmits a branch of the superior maxillary nerve.

canalicular (*kan-al-ik'-ū-lar*) [*canal*]. Canal-shaped; relating to a canaliculus.

canaliculization (*kan-al-ik-ū-liz-a'-shun*) [*canaliculus*, a little canal]. The formation of canaliculi, as in bone, or as in calcified cartilage.

canaliculus (*kan-al-ik'-ū-lus*) [L.]. 1. A small canal; especially that leading from the punctum to the lacrimal sac of the eye. 2. Any one of the minute canals opening into the lacunæ of bone. **canaliculi accessorii,** inconstant canals at the outer edge of the anterior condylar foramen, for the transmission of veins. **c. of communication, c. communicationis,** a canal at the junction of the petrosa and the mastoid portion of the temporal bone, transmitting a vein from the middle fossa of the skull to the transverse sinus. Syn., *aquæductus communicationis.* **c. laqueiformis.** See *Henle's loop.* **c. mastoideus,** canal for the auricular branch of the vagus nerve. **canaliculi medullares.** See *canals, Haversian.* **c. pharyngeus.** See *canal, pterygopalatine.* **canaliculi, serous.** See *canals of Recklinghausen.* **c. tympanicus,** canal for the tympanic branch of the glossopharyngeal nerve. **canaliculi vasculosi,** Haversian canals.

canalis (*kan-a'-lis*). Same as *canal.*

canalization (*kan-al-iz-a'-shun*) [*canal*]. 1. The formation of canals, as in tissues, etc. 2. A system of wound-drainage without tubes.

canary-seed (*kan-a'-re-sēd*). The hulled seeds of *Phalaris canariensis;* used in emollient poultices.

cancellate, cancellated (*kan'-sel-āt, -a'-ted*) [*cancellare,* to provide with a lattice]. Reticulated, or characterized by latticed lines, as the spongy tissue of bones, or certain leaves consisting entirely of veins.

cancellation (*kan-sel-a'-shun*) [*cancelli,* latticework]. The quality of being cancellate; cancellous structure.

cancelli (*kan-sel'-li*) [L. *pl.* of *cancellus,* a lattice]. See *cancellus.*

cancellous (*kan'-sel-us*) [*cancellus,* latticework]. Resembling latticework, as the tissue in the articular ends of long bones.

cancellus (*kan-sel'-us*) [L.; *pl., cancelli,* latticework]. A space, or unit of structure, in cancellous bone, any of the minute divisions in spongy bone. The spongy, lattice texture of bone.

cancer (*kan'-ser*). 1. See *carcinoma.* 2. Any kind of malignant growth. Syn., *malignant disease.* **c., acinous, c., acute,** medullary carcinoma or medullary sarcoma. **c., adenoid,** a malignant form chiefly composed of tubules lined with epithelium; adenocarcinoma. **c. à deux,** cancer attacking both husband and wife, or successively a man's first and his second wife. **c. albus.** See *cancrum oris* and *noma.* **c. anthracinus,** one beginning as a black speck and developing into a mulberry-like growth **c., apinoid,** a hard cancer, so called because of the cleanness of its section. **c., apioid,** a hard cancer resembling an immature pear in section. **c. aquaticus.** Syn. of *gangrenous stomatitis.* **c., Aran's green.** See *Aran's green cancer.* **c., areolar.** See *carcinoma, colloid.* **c.-bandage,** a crab-shaped bandage; one with eight tails. **c., black,** melanotic cancer. **c. of the blood,** leukocythemia. **c., cavernous,** a colloid carcinoma in which the alveoli have become absorbed. **c.-cell,** an epithelial cell of peculiar, distorted shape, found in the interior of cancer-nests. It is an ordinary epithelial cell altered in outline by pressure. **c., cellular, c., cerebriform.** See *carcinoma, soft,* and *sarcoma, encephaloid.* **c., chimney-sweep's.** See *carcinoma, chimney-sweep's.* **c., chondroid,** a hard cancer, which on section exhibits a shining, bluish-white appearance. **c., chronic,** a scirrhous cancer. **c., cicatrizing,** a form of hard cancer marked by atrophy and shrinking. **c., claypipe.** See *c., smoker's.* **c., Cohnheim's theory of the embryonic origin of.** See *Cohnheim's theory.* **c., colloid.** See *carcinoma, colloid.* **c., conjugal.** See cancer à deux. **c., connective-tissue. c., contact,** a cancer on one surface (lip) after contact with one on the other lip See *c., hard.* **c., dendritic,** a papilloma. **c., duct,** a form of columnar epithelioma. **c., eburneous.** See *scleroderma.* **c., embolic,** one due to embolic infection. **c., encephaloid.** See *carcinoma, encephaloid.* **c. en cuirasse,** disseminated cancer of the skin of the thorax **c., epithelial,** epithelioma. **c., fasciculated,** a spindle-celled sarcoma. **c., fungoid, c., fungous, c., hematoid.**

See *sarcoma, encephaloid; angioma, cavernous;* and *angiomyces.* **c., gelatiniform, c., gelatinous,** a colloid cancer. **c., glaucoid, c., green.** See *Aran's green cancer.* **c., hard,** one containing an excess of fibrous tissue. **c., inclusion theory of.** See *Cohnheim's theory of the embryonic origin of cancer.* **c., jacket,** a continuously spreading cancerous infiltration of the superficial tissues. **c.-juice,** the milky fluid yielded by the cut surface of a cancer on scraping. **c., lipomatous,** one marked by many fat-cells in the stroma **c., mammary.** 1. One affecting a mammary gland. 2. See *c., mastoid.* **c., mastoid,** a form of medullary sarcoma presenting on section the appearance of boiled cow's udder. **c., medullary.** See *c., soft.* **c., melanotic,** a pigmented form. **c. mollis,** soft cancer. **c., nephroid,** a form of encephaloid sarcoma having the appearance of a kidney in section. **c.-nest,** a mass of cancer-cells. **c. occultus,** latent cancer. **c., osteoid.** 1. One containing a deposition of osseous material. 2. See *osteosarcoma.* 3. See *osteochondroma.* **c., osteolytic,** carcinomatous infiltration of bone without distinct tumor-formation. **c., primary, c., primitive,** one not due to infection from some preceding cancerous manifestation. **c. pullulans,** an ulcerating cancer which forms granulations. **c., pulpy, c., pultaceous.** See *c., colloid.* **c., ramose,** a form of hard cancer which branches. **c., rodent.** 1. Lupus. 2. Rodent ulcer. **c., scirrhous.** See *c., hard.* **c., smoker's,** epithelioma of the lip or mouth attributed to tobacco smoke or the irritation of a pipe. **c.,** soft, one in which the cells predominate, the connective tissue being very small in amount. **c., salonoid,** one having the appearance of a potato in section. **c., soot.** See *carcinoma, chimney-sweep's* **c., stone,** scirrhous carcinoma. **c. terebrans,** an epithelioma. **c., tubular epithelial.** See *cylindroma.* **c. verrucosus,** epithelioma with wart-like epithelial hypertrophy. **c., villous.** See *papilloma.* **c. xanthosus.** See *Aran's green cancer.*

cancerate (*kan'-ser-āt*). To become cancerous; to be developed into a cancer.

canceration (*kan-ser-a'-shun*). Development into a cancer; the assumption of malignant qualities by a tumor.

cancerine (*kan'-ser-ēn*) [*cancer*]. The name given to a ptomaine obtained from the urine in cases of carcinoma of the uterus. It is a white substance, crystallizing in fine needles and soluble in alkaline solutions. Its formula is $C_9H_{11}NO_2$.

cancerism (*kan'-ser-izm*). The tendency to cancerous formation.

canceroderm (*kan'-ser-o-derm*). A. T. Brand's name for angiomata, conspicuous in size and number, which appear in certain people who are not aged, and which he believes bear a relation to malignant growths.

canceromyces (*kan-ser-o-mi'-sēz*). See *cladosporium cancerogenes.*

cancerophobia (*kan-ser-o-fo'-be-ah*) [*cancer; φόβος*, fear]. Morbid fear of acquiring a cancer.

cancerous (*kan'-ser-us*). Having the qualities of a cancer, malignant.

cancer-serum. A therapeutic serum said to have a curative action in cases of cancer.

canchasmus (*kan-kaz'-mus*) [*καγκασμός*, loud laughter]. Hysterical or immoderate laughter.

Cancriamœba macroglossia (*kang-kre-ah-me'-bah mak-ro-glos'-e-ah*). An organism claimed to have been found in epithelial carcinoma, and of which the spores are identical with Plimmer's bodies.

cancriform (*kang'-krif-orm*) [*cancer*, a crab, *forma*, form]. Resembling a cancer in appearance.

cacrine (*kang'-krēn*). Cancerous.

cancroid (*kang'-kroid*) [*cancer*]. 1. Cancer-like. 2. An epithelioma. 3. A variety of keloid. **c. corpuscles.** See *corpuscles, cancroid.* **c., dermic,** epithelioma attacking all the layers of the skin. **c., follicular,** epithelioma arising in the hair-follicles or in the glands of the skin. **c., papillary,** epithelioma affecting the papillary layer and subsequently the other layers of the skin. **c. ulcer.** See *rodent ulcer.*

cancroin (*kang'-kro-in*) [*cancer*]. A substance (said to be identical with neurin) introduced by Adamkiewicz as a material for hypodermatic injection in cases of malignant disease, it being regarded by him as an alexin destructive of cancer tissue.

cancrum (*kang'-krum*) [*cancer*]. A cancer or rapidly spreading ulcer. **c. nasi,** gangrenous rhinitis of children. **c. oris,** a disease of childhood between the ages of one and five, characterized by the formation of foul, deep ulcers of the buccal surfaces of the cheeks or lips. There is but slight pain, but the prostration is great, and death usually results from exhaustion or blood-poisoning. The disease is bacterial, poor hygienic surroundings and a debilitated system being predisposing causes. Syn., *canker of the mouth; gangrenous stomatitis; noma; gangrenous ulceration of the mouth.* **c. pudendi,** ulceration of the vulva.

candela (*kan-de'-lah*) [*candere*, to glow]. 1. A medicated candle for fumigation. 2. A wax bougie.

candicans (*kan'-de-kanz*) [*candicans*, whitish]. One of the corpora albicantia.

canella (*kan-el'-ah*) [dim. of *canna*, a reed]. The bark of *C. alba* deprived of its corky layer and dried. It is a native of the West Indies, and is an aromatic tonic and bitter stomachic Dose of the *powdered bark* 15–30 gr. (1–2 Gm.). It is official in the B. P.

cane sugar. See *saccharose* (1).

canicaceous (*kan-e-ka'-shus*) [*canicæ*, a kind of bran]. Furfuraceous.

canine (*ka'-nīn*) [*canis*, a dog]. Partaking of the nature of, relating to, or resembling a dog or the sharp tearing-teeth of mammals, located between the incisors and the molars. **c. appetite,** bulimia. **c. eminence,** a prominence on the outer side of the maxilla **c. fossa.** See *fossa, canine* **c. laugh,** a sardonic smile or grin. **c. madness,** rabies; hydrophobia. **c. muscle,** the levator anguloris. **c. teeth,** the cuspid teeth next to the lateral incisors; so called from their resemblance to a dog's teeth. Syn., *conoides; cuspidati; cynodontes; dentes angulares; dentes canini; dentes lanarii; eye-teeth.*

caniniform (*kan-in'-if-orm*) [*caninus*, pertaining to the dog, *forma*, shape]. Applied to teeth resembling canines.

canities (*kan-ish'-e-ēz*) [L.]. Poliosis; hoariness; blanching of the hair.

canker (*kang'-ker*) [*cancer*, a crab]. An ulceration of the mouth, or any ulcerous or gangrenous sore; cancrum oris; in farriery, a fetid abscess of the horse's foot See *cancrum oris.* **c.-rash.** Synonym of *scarlatina.* **c.-root,** coptis.

Canna (*kan'-ah*) [*κάννα*, a cane]. A genus of large-leaved marantaceous plants. *C. indica* has an acrid and stimulant root; it is alterative,

diuretic, and diaphoretic. The rhizome of *C. speciosa* affords canna-starch, a substitute for arrowroot.

cannabene (*kan'-ab-ēn*). See under *cannabis*.

cannabin (*kan'-ab-in*). A crystalline resin from Indian hemp; it is hypnotic. Dose 1½–4 gr. (0.097–0.26 Gm.). **c. tannate,** a yellow, astringent powder, soluble in alkaline water or alcohol; it is hypnotic and sedative. Dose 2–10 gr. (0.13–0.6 Gm.).

cannabindon (*kan-a-bin'-don*), $C_8H_{12}O$. A dark, cherry-red syrup obtained from Indian hemp; soluble in alcohol, ether, and oils. It is hypnotic and narcotic. Dose ½–2 gr. (0.03–0.13 Gm.).

cannabinine (*kan-ab'-in-ēn*) [*cannabis*]. A volatile alkaloid from Indian hemp.

cannabinol (*kan-ab'-in-ol*), $C_{18}H_{24}O_2$. A red oil obtained by fractional distillation from Indian hemp, and supposed to be its most active ingredient.

cannabinon, cannabinone (*kan-ab'-in-ōn*) [*cannabis*]. An amorphous bitter resinoid from Indian hemp, used as a hypnotic. Dose 1–3 gr. (0.065–0.2 Gm.)

Cannabis (*kan'-ab-is*) [L.]. Hemp. Indian hemp. The flowering tops of *C. sativa*, of which there are two varieties, *C. indica* and *C. americana*, the former, being the more potent; they contain a resin, cannabin, and a volatile oil, from which are obtained *cannabene*, $C_{18}H_{20}$, a light hydrocarbon, and *cannabene hydride*, a crystalline body It is antispasmodic, narcotic, and aphrodisiac. In large doses it produces mental exaltation, intoxication, and a sensation of double consciousness. It is used in migraine, in paralysis agitans, in spasm of the bladder, in sexual impotence, in whooping-cough, in asthma, and in other spasmodic affections. *Bang*, *bhang*, *cunjah*, *churrus*, and *hashish* are the various Indian names by which the drug is known. **C. indica** (U. S. P.), Indian cannabis. Dose 1 gr. (0.065 Gm.). **C. indica, extract of** (*extractum cannabis indicæ*, U. S. P.). Dose ⅛–1 gr. (0.01–0.065 Gm.). **C. indica, fluid-extract of** (*fluidextractum cannabis indicæ*, U. S. P.), an alcoholic preparation. Dose 1–5 min. (0.06–0.3 Cc.). **C. indica, tincture of** (*tinctura cannabis indicæ*, U. S. P.), contains 10% of the drug. Dose 20 min.–1 dr. (1.3–4.ϙ Cc.).

cannabism (*kan'-ab-izm*) [*cannabis*, hemp]. The habitual use of Cannabis indica; ill-health caused by the misuse of Cannabis indica.

cannabist (*kan'-ab-ist*) [*cannabis*, hemp]. A devotee to the use of Cannabis indica.

Cannon's ring (*kan'-on*) [Walter Bradford *Cannon*, American physiologist, 1871–]. A ring of muscular tissue at the commencement of the transverse colon.

cannon-bone, canon-bone (*kan'-on bōn*). One of the functional and complete metacarpal or metatarsal bones of a hoofed quadruped, supporting the weight of the body upon the feet

cannula (*kan'-ū-lah*) [dim. of *canna*, a tube]. A tube used for withdrawing fluids from the body. It is generally fitted with a pointed rod for puncturing the integument. **c., perfusion,** a double cannula, one tube of which is used for the inflow of a fluid and the other tube for the outflow; it is employed in the irrigation of a cavity.

cannular, cannulate (*kan'-ū-lar, -lāt*) [*cannula*]. Tubular; channeled.

canor (*ka'-nor*) [L.; pl., *canores*]. A musical sound. **c. stethoscopicus.** See *metallic tinkling*.

Canquoin's paste (*kan-kwan'*) [Alexandre *Canquoin*, French physician, 1823–]. A paste of flour, water, and zinc chloride; it is a powerful escharotic.

Cantani's diet (*kan-tah'-ne*) [Arnoldo *Cantani*, Italian physician, 1837–1893]. An exclusive meat-diet in diabetes. **C.'s treatment,** a method of treating cholera by high enemata of large quantities of water containing tincture of opium and tannic acid at a temperature of from 100° to 104° F.

cantering rhythm (*kan'-ter-ing rithm*). See *bruit de galop*.

canthal (*kan'-thal*) [κανθός, a canthus]. Relating to a canthus.

cantharene (*kan'-thar-ēn*), $C_{10}N_{12}I_2O_2$. A compound obtained from cantharidin by action of hydriodic acid.

cantheriasis (*kan-thar-i'-as-is*) [*cantharis*]. A term proposed by Hope for the diseases that originate from the presence in the body of coleopterous insects or their larvæ

cantharidal (*kan-thar'-id-al*) [*cantharides*]. Relating to or containing cantharides. **c. collodion** (*collodium cantharidatum*, U. S. P.). See *collodion, cantharidal*.

cantharidated (*kan-thar'-id-a-ted*). Containing cantharides.

cantharides (*kan-thar'-id-ēz*) [καν θαρίς, a blistering Spanish fly]. The dried body of a species of beetle, *C. vesicatoria* (nat. ord. *Coleoptera*). It contains a powerful poisonous principle, cantharidin (*q. v.*). Locally applied, cantharidis is a rubefacient and vesicant; internally it is an irritant, causing pain and vomiting In toxic doses it produces severe gastroenteritis, strangury, and priapism. It is used as an external counterirritant in the form of "blisters." Internally it is employed as a stimulant to the genitourinary mucous membrane, especially in cystitis, atony of the bladder, amenorrhea, etc ; also in skin diseases. **c. cerate** (*ceratum cantharidis*, U. S. P.), cantharides, 35; rosin, 20; yellow wax 20; lard, 35 parts, liquid petrolatum, q. s. **c. liniment,** cantharides, 15 parts; oil of turpentine, q. s. ad 100. **c. ointment** (*unguentum cantharidis*, B. P.), cantharides, yellow wax, olive-oil. **c. paper** (*charta epispastica*, B. P.), blistering paper, contains cantharides, 1; Canada turpentine, 1; 10 olive-oil, 4; spermaceti, 3; white wax, 8; water, 10 parts, spread on paper. **c. plaster** (*emplastrum cantharidis*, B. P.), cantharides, yellow wax, prepared suet, prepared lard, rosin. **c., tincture of** (*tinctura cantharidis*, U. S. P.), contains 10% of the drug. Dose 3–10 min. (0.09–0.3 Cc.) **c., vinegar of** (*acetum cantharidis*, B. P.), of the strength of 1 to 8.

cantharidic (*kan-thar-id'-ik*). Relating to or obtained from cantharides. **c. acid,** an acid derived from cantharides. **c. anhydride.** Synonym of *cantharidin*.

cantharidin (*kan-thar'-id-in*) [*cantharides*], $C_{10}H_{12}O_4$. The bitter principle contained in Spanish flies and other insects; it crystallizes in prisms or leaflets, and melts at 218°. It has an extremely bitter taste, and produces blisters on the skin. See *cantharis*.

cantharidism (*kan-thar'-id-izm*) [*cantharides*]. Cantharidal poisoning. **c., external,** poisoning by absorption from a cantharidal blister.

cantharis (*kan'-thar-is*). See *cantharides*.

canthectomy (*kan-thek'-to-me*) [*canthus*; ἐκτομή, a cutting out]. Excision of a canthus.

canthitis (*kan-thi'-tis*) [*canthus*; ιτις, inflammation]. Inflammation of a canthus.

cantholysis (*kan-thol'-is-is*) [*canthus*; λύσις, a loosening]. Canthotomy with section of the external canthal ligament.

canthoplastic (*kan-tho-plas'-tik*) [*canthus*; πλάσσειν, to form]. Relating to canthoplasty.

canthoplasty (*kan'-tho-plas-te*) [*canthus*; πλάσσειν, to form]. Increasing the length the palpebral fissure by slitting the outer canthus.

canthorrhaphy (*kan-thor'-a-fe*) [*canthus*; ῥαφή, a seam]. An operation to shorten the palpebral fissure by suture of the canthus.

canthotomy (*kan-thot'-o-me*) [*canthus*; τομή, a cutting] Surgical division of a canthus.

canthus (*kan'-thus*) [κανθός, canthus]. The angle (palpebral angle) formed by the junction of the eye-lids.

cantus galli (*kant'-us gal'-i*) [L., "cock-crowing"]. Same as *child-crowing*.

canula (*kan'-ū-lah*). See *cannula*.

CaO. Calcium monoxide.

CaOC. Abbreviation for cathodal opening contraction.

Ca(OH)$_2$. Calcium hydroxide.

caoutchouc (*koo'-tshook*) [S. A.]. Rubber. The chief substance contained in the milky juice that exudes upon incision of a number of tropical trees belonging to the natural orders *Euphorbiaceæ*, *Artocarpaceæ*, and *Apocynaceæ*. The juice is a vegetable emulsion, the caoutchouc being suspended in it in the form of minute transparent globules. When pure, caoutchouc is nearly white, soft, elastic, and glutinous; it swells up in water without dissolving; the best solvents are carbon disulphide and chloroform. It melts at about 150° C. and decomposes at 200° C.

cap., abbreviation for *capiat* [L.], let him take.

cap (*kap*) [AS., *cappe*]. 1 See *tegmentum*. 2. The tissue covering the conical end of a lymph-follicle 3. The first portion of the duodenum. **c., enamel**, the concave enamel-organ covering the top of the growing tooth-papilla. **c., nuclear**, a collection of chromophilic substance on one side of the nucleus of a cell.

capacity (*kap-as'-it-e*) [*capacitas*, capacity]. 1. The power of holding or containing; mental or physical ability. 2. Cubic extent. **c. of condenser**, the quantity of electricity which a condenser can hold in coulombs when charged to a pressure of one volt. **c. respiratory**, same *vital capacity*. **c., testamentary**, a legal term signifying the degree of mental ability requisite for making a valid will. **c., thermal**, the amount of heat absorbed by a body in being raised 1° C. in temperature. **c., vital**, the total amount of air that can be expelled by the most forcible expiration after the deepest inspiration.

capeline (*kap'-el-ēn*). A bandage applied to the head or to an amputation stump.

capiat (*ka'-pe-at*) [L., "let it take"]. An instrument intended for use in removing remnants of the placenta, polypi, or the like, from the uterus.

capillaire (*kap-il-ār'*) [Fr.]. The plant *Adiantum capillus veneris*, a species of maiden-hair fern; also a cough-syrup prepared from the same. See *adiantum*.

capillaraneurysm (*kap-il-ar-an'-ū-rism*) [*capillus*; ἀνεύρυσμα, a widening]. Excessive capillarectasia.

capillarectasia (*kap-il-ar-ek-ta'-ze-ah*) [*capillus*; ἔκτασις, a stretching-out]. Dilation of the capillaries.

capillarimeter (*cap-il-ar-im'-et-ur*) [*capillus*, a hair; μέτρον, a measure]. A device for estimating the diameter of capillary tubes.

capillariomotor (*kap-il-ar-e-o-mo'-tor*). Vasomotor, in reference to the capillaries.

capillaritis (*kap-il-ar-i'-tis*). Inflammation of the capillaries.

capillarity (*kap-il-ar'-it-e*) [*capillary*]. 1. Capillary attraction; the force that causes fluids to rise in fine tubes or bores. 2. The condition of being capillary.

capillaroscopy (*kap-il-ar-os'-ko-pe*) [*capillary*; σκοπεῖν, to view]. Examination of capillaries.

capillary (*kap'-il-a-re*) [*capillus*]. 1. Hair-like; relating to a hair, to a hair-like filament, or to a tube with a hair-like bore. 2. A minute blood-vessel connecting the smallest ramifications of the arteries with those of the veins. **c. attraction.** See *capillarity*. **c. bronchitis.** See *bronchitis, capillary*. **c. drainage.** See *drainage*. **c. fissure, c. fracture**, a linear fracture, without displacement. **capillaries, Meigs'**, the branching capillaries discovered by A. V. Meigs between the muscular fibers of the human heart. **c. nevus.** See *nevus* (2). **c. pulse**, pulsation of the capillaries sometimes seen in aortic regurgitation. **c. vessels**, the capillaries.

capilliculture (*kap-il'-e-kul-chur*) [*capillus*, hair; *cultura*, culture]. Systematic treatment for the improvement or restoration of the hair.

capillitium (*kap-il-ish'-e-um*) [L.]. The hair of the head, or the portion of the scalp thus covered.

capillose (*kap'-il-ōs*) [*capillosus*]. Hairy.

capillurgy (*kap'-il-ur-je*) [*capillus*, a hair; ἔργον, work]. The art of destroying superfluous hair.

capillus (*kap-il'-us*) [L.; *pl.*, *capilli*]. 1. A hair; specifically a hair of the head. 2. A hair-like filament. 3. A hair's breadth (1-10 to 1-12 of a line).

capistration (*kap-is-tra'-shun*) [*capistrum*, a halter]. See *phimosis*; also *trismus*.

capistrum (*kap-is'-trum*) [L., "a muzzle or halter;" pl., *capistra*]. 1. A bandage for the head or lower jaw. Syn., *capelina*. 2. Trismus.

capital (*kap'-it-al*) [*caput*]. 1. Pertaining to the head, or to the summit of a body or object. 2. Of great importance, as a *capital* operation in surgery.

capitalis reflexa (*kap-it-a'-lis re-fleks'-ah*). A recurrent bandage for a stump.

capitate (*kap'-it-āt*) [*caput*, head]. In biology, having a head or a head-like termination.

capitatum (*kap-it-a'-tum*). The large bone of the carpus, the os magnum.

capitellum (*kap-it-el'-um*) [dim. of *caput*]. 1. A small head or rounded process of bone. 2. The rounded, external surface of the lower end of the humerus. 3. The bulb of a hair.

capitiluvium (*kap-it-el-u'-ve-um*) [*caput*, head; *luere*, to wash]. A washing or bathing of the head; a wash for the head.

capitium (*kap-ish'-e-um*) [L.]. A bandage for the head; it may be triangular or four-cornered. **c. magnum, c. quadrangulare, c. quadratum**, a four-cornered head bandage. **c. minus, c. triangulare**, a three-cornered head bandage.

capitones (*kap'-it-ōn-ez*) [L.]. Fetuses with heads too large for unassisted delivery.

capitopedal (*kap-it-o-ped'-al*) [*caput*, a head; *pes*, foot]. In biology, pertaining to or near the junction of the head and foot.

capitular (*kap-it'-ū-lar*) [*caput*, head]. Pertaining to a capitulum or head. **c. process of a ver-**

tebra, one with which the head of a rib articulates.

capitulum (*kap-it'-ū-lum*) [L., "a small head"]. A little head. **c. of Santorini,** a small elevation on the apex of the arytenoid cartilage, corresponding in position to the posterior extremity of the vocal band.

capizmus (*kap'-iz-mus*) A form of neurosis that responds to treatment with paprika.

capnomor (*kap'-no-mor*) [*καπνός,* smoke; *μοῖρα,* a part], $C_{20}H_{22}O_2$. A transparent, colorless, oily fluid, a constituent of smoke obtained from the heavy oil of tar. It dissolves caoutchouc.

$Ca_3(PO_4)_2$. Tricalcic phosphate.

cappa (*kap'-ah*). The ectocinereal lamina of the mesencephal.

Capparis (*kap'-ar-is*) [L., "the caper-bush"]. A genus of shrubs including the caper-bush, *C spinosa.* Its flower-buds (*capers*) are pickled or made into sauce. The bark of the root and the flowers are official remedies in some countries. It is diuretic, cathartic, depurative, stimulant. *C. aphylla,* a shrub of India, is esteemed in the treatment of boils and affections of the joints. *C. corisacea* is a native of Peru; the fruit is antiepileptic and antihysteric. The root-bark of *C. jamaicensis,* of South America, is rubefacient, the root diuretic, the leaves and flowers antispasmodic.

capped hock (*kapd' hok*). In farriery; a bruise at the point of the hock of a horse, with the formation of a hygroma, the result of rubbing or striking that part against the partition of the stall **c.-knee,** a dropsical collection in the bursa in front of the knee-joint of the horse.

Capranica's reaction for bile-pigments. Add to the solution chloroform containing some bromine, and shake; it becomes first green, blue-violet, yellowish red, and finally colorless. If the green or blue solution is shaken with HCl, the color is destroyed by the acid **C.'s reaction for guanin.** 1. A warm solution of guanin hydrochloride with a cold saturated solution of picric acid gives a yellow precipitate occurring as silky needles. 2. Add to a guanin solution a concentrated solution of potassium ferricyanide; a yellowish-brown prismatic precipitate is formed. 3. On the addition of a concentrated solution of potassium chromate to guanin solutions an orange-red crystalline precipitate is formed It is insoluble in water.

caprate (*kap'-rāt*). A salt of capric acid.

caprenalin (*kap-ren'-al-in*). Trade preparation from suprarenal capsules; used as a vasoconstrictor, hemostatic, and cardiac stimulant.

capreolar (*kap-re'-o-lar*), **capreolary** (*kap'-re-o-la-re*), **capreolate** (*kap'-re-o-lāt*) [*capreolus,* a tendril]. In biology, climbing, furnished with tendrils; in anatomy resembling tendrils, as the spermatic vessels, *vasa capreolaria.* **c. vessels,** the spermatic vessels, from their twined and twisted appearance.

capric (*kap'-rik*) [*caper,* a goat]. Relating or belonging to, or having the odor of, a goat. **c. acid.** See *acid, capric.*

capriloquium (*kap-ril-o'-kwe-um*) [*caper,* a goat; *loqui,* to speak]. Same as *egophony.*

caprin (*kap'-rin*) [see *capric*]. An oily and flavoring constituent of butter; glycerol caprate.

caprinate (*kap'-rin-āt*). See *caprate.*

caprinic (*kap-rin'-ik*). See *capric.*

caprizant (*kap'-ri-zant*) [see *capric*]. Leaping; of irregular motion, applied to the pulse.

caproate (*kap'-ro-āt*). A salt of normal caproic acid.

caproic (*kap-ro'-ik*). See *capric.* **c. acid.** See *acid, caproic.* **c. anhydride,** $C_{12}H_{22}O_3$, a neutral oily liquid.

caproin (*kap'-ro-in*) A fat, resembling caprin, found in goat's butter.

caprone (*kap'-rōn*) [see *capric*], $C_{11}H_{22}O$. Caproic ketone; a clear, volatile oil found in butter, and forming the larger part of the oil of rue.

caproyl (*kap'-ro il*). 1. $C_6H_{11}O$. A hypothetical radical. Syn., *hexoyl.* 2. C_6H_{13}, a radical. Syn., *hexyl.*

caproylamine (*kap-ro-il'-am-in*) [*caproyl; amine*], $C_6H_{15}N$. Hexylamine. A ptomaine formed in the putrefaction of yeast.

caprylate (*kap'-ril-āt*). A salt of caprylic acid.

caprylic acid (*kap-ril'-ik*). See *acid, caprylic.*

caprylin (*kap'-ril-in*). Glyceryl caprylate.

capsaicin (*kap-sa'-is-in*). See *capsicin.*

capsanthinose (*kap-san'-thin-ōz*). Skin discoloration due to ingestion of too much paprika.

capsella (*kap-sel'-ah*) [dim. of *capsa,* a box]. The leaves and stems of *C. bursa pastoris,* common in temperate climates **C. bursa pastoris,** shepherd's purse; the leaves are hemostatic and antiscorbutic.

capsicin (*kap'-sis-in*). 1. $C_9H_{14}O_2$. The active principle of Cayenne pepper, found in the pericarp and placenta of *Capsicum fastigiatum,* and soluble in alcohol, ether, benzene, and fixed oils. It is a thick, yellowish-red substance, and its vapors are intensely acrid. Dose $\frac{1}{10}$–$\frac{1}{4}$ gr. (0.006–0.016 Gm.). 2 An oleoresin from capsicum; an oily liquid devoid of pungency.

capsicol (*kap'-sik-ol*) [*capsicum; oleum,* oil]. A red oil obtainable from the oleoresin of capsicum.

capsicum (*kap'-sik-um*) [*capsa,* a box]. Cayenne pepper. The fruit of *C. fastigiatum,* native to tropical Africa and America. Its odor and hot taste are due to a volatile oil, *capsicin,* $C_9H_{14}O_2$, which is irritant to the skin and mucous membranes. Internally it is a stomachic, tonic, diuretic, and aphrodisiac. It is useful in atonic dyspepsia, flatulent colic, and intermittent fever. *C. annuum* is the common red pepper of the garden. **c., fluidextract of** (*fluidextractum capsici,* U. S. P.). Dose 5 min.–1 dr. (0.3–4.0 Cc.). **c. liniment,** 1 in 10, for chest affections, rheumatism, etc. **c., oleoresin of** (*oleoresina capsici,* U. S P.). Dose ½ gr. (0.03 Gm.). **c. plaster** (*emplastrum capsici,* U. S. P.), prepared from the oleoresin and adhesive plaster. **c., tincture of** (*tinctura capsici,* U. S. P.), contains 10 % of capsicum. Dose 5–30 min. (0.3–2.0 Cc.). **c. wool,** a preparation of absorbent cotton, saturated with oleoresin of capsicum 1 part and ether 30 parts to 19 parts of the cotton.

capsitis (*kap-sit'-tis*). Same as *capsulitis.*

capsogen (*kap'-so-jen*). Trade name of capsicum wool, *q. v.*

capsotherm (*kap'-so-thurm*). Trade name of a capsicum wool with an impermeable backing.

capsotomy (*kap-sot'-o-me*). See *capsulotomy.*

capsula (*kap'-sū-lah*) [L., "a small box"] 1. The internal capsule of the brain; it is the thick layer of fibers between the caudatum and thalamus mesad and the lenticula laterad; it is continuous with the crura caudad, and its expansion is called the *corona* 2. See *capsule.* **c. articularis,** capsular ligament. **c. glomeruli.** See *Bowman's capsule*

capsular (*kap'-su-lar*) [*capsule*]. Pertaining to a capsule. **c. artery,** the middle suprarenal

artery, see *arteries, table of.* **c. cataract,** an opacity of the capsule of the crystalline lens. **c. hemiplegia,** a hemiplegia due to a lesion in the internal capsule. **c. ligament,** the sac or membranous bag that surrounds every movable joint or articulation. It contains the synovial fluid. **c. vein,** the suprarenal vein, see *vein.*

capsulation (*kap-su-la'-shun*) [*capsule*]. The act or process of inclosing in capsules.

capsule (*kap'-sūl*) [dim. of *capsa*, a chest]. 1. A membranous sac inclosing a part. 2. An envelope surrounding certain organisms. 3. A soluble shell for administering medicines. **c., atrabiliary.** Same as *c., suprarenal.* **c., acoustic.** See *c., auditory.* **c., adipose.** See *c. of the kidney.* **c., aqueous, c. of the aqueous humor,** Descemet's membrane. **c., articular.** See *capsular ligament.* **c., auditory,** the primitive auditory organ, formed by the invagination of the nervous stratum of the epiblast. See also *vesicle, auditory.* **c., Bonnet's.** See *Bonnet's capsule.* **c., Bowman's.** See *Bowman's capsule.* **c., Bowman-Mueller's.** See *Bowman's capsule* **c., brain.** See *capsula* (1). **c., cartilage, c. of a cartilage-cell,** the lining of cartilage-cavities containing the cartilage-cells. **c., crystalline.** See *c. of the lens.* **c., external,** a layer of white nerve-fibers forming part of the external boundary of the lenticular nucleus. **c., fibrous.** See *ligament, capsular.* **c. of Glisson.** See *Glisson's capsule.* **c.s, glutoid,** gelatin capsules treated with formaldehyde. **c., hemorrhoidal,** a metal, capsule-shaped device for applying Vienna paste to a hemorrhoid. **c., hyaloid.** See *membrana limitans.* **c., internal,** a layer of nerve-fibers on the outer side of the optic thalamus and caudate nucleus, which it separates from the lenticular nucleus, and containing the continuation upward of the crus cerebri. **c. of the kidney,** the fat-containing connective tissue encircling the kidney. **c. of the lens,** a transparent, structureless membrane inclosing the lens of the eye. **c., Malpighian,** the commencement of the uriniferous tubules. See *Bowman's capsule.* **c. Mueller's.** See *Bowman's capsule.* **c., nasal,** the embryonic cartilage which becomes the nose. **c. of a nerve-cell,** that portion of the neurilemma which covers a ganglion-cell. **c., optic,** the embryonic structure forming the sclera. **c., periotic,** the structure surrounding the internal ear. **c., renal.** See *c., suprarenal.* **c.s, seminal,** expansions of the vasa deferentia near the seminal vesicles; applied by some authorities to the seminal vesicles. Syn., *capsulares seminales.* **c.s, sense,** the cartilaginous or bony cavities containing the organs of sense. **c., suprarenal,** the ductless, glandular body at the apex of each kidney. **c., suprarenal accessory,** an additional capsule attaining the size of a pea and sometimes attached to the suprarenal capsule by connective tissue **c., synovial.** See *membrane, synovial.* **c. of Tenon,** the tunica vaginalis of the eye.

capsulectomy (*kap-sū-lek'-to-me*) [*capsule; ἐκτόμη*, excision]. Excision of a capsule.

capsulitis (*kap-sū-lī'-tis*) [*capsule; ῖτις*, inflammation]. Inflammation of the capsule of the lens or of the fibrous capsule of the eyeball.

capsulociliary (*kap-sū-lo-sil'-e-a-re*) [*capsule; cilium*, an eyelid]. Relating to the capsule of the lens and to the ciliary organ.

capsulolenticular (*kap-sū-lo-len-tik'-ū-lar*) [*capsule; lenticula*, a lentil]. Relating to the lens and to its capsule.

capsulopupillary (*kap-sū-lo-pū'-pil-a-re*) [*capsule; pupilla*, the pupil of the eye]. Relating to the capsule of the lens and to the pupil.

capsulorrhaphy (*kap-sū-lor'-af-e*) [*capsule; ῥάφη*, a suture]. Suture of a capsule, to repair a rent or to prevent dislocation.

capsulotome (*kap'-sū-lo-tōm*). 1. See *cystotome.* 2. An instrument used by Buller in capsulotomy to steady the capsule; it consists of two fine needles fixed parallel to each other in a handle.

capsulotomy (*kap-sū-lot'-o-me*) [*capsule; τέμνειν*, to cut]. The operation of rupturing the capsule of the crystalline lens in cataract-operations.

captation (*kap-ta'-shun*) [*captare*, to desire]. The first or opening stage of the hypnotic trance.

captol (*kap'-tol*). A product of the condensation of tannin and chloral; it is used in 1 to 2 % solution as an antiseborrheal agent and lotion for the hair. Syn., *tannochloral.*

Capuron's cardinal points. Four fixed points of the pelvic inlet, the two iliopectineal eminences anteriorly, and the two sacroiliac joints posteriorly.

caput (*kap'-ut*) [L.; pl., *capita*]. The head; also the chief part or beginning of an organ. **c. breve,** the transversus pedis muscle. **c cæcum coli,** the cecum. **c. caudati,** the base of the corpus striatum. **c. coli,** the head of the colon; the cecum. **c. cordis,** the base of the heart. **c. cornu posterioris.** Same as *c. gelatinosum.* **c. epididymidis,** head of the epididymis, the globus major. **c. galeatum,** a child's head emerging at birth covered with the caul. **c. gallinaginis.** See *verumontanum.* **c. gelatinosum,** the name given to the translucent gray matter covering the dorsomesal periphery of the dorsal horn of the spinal cord. It is a peculiar, striated substance composed of numerous closely crowded cellular elements, in part connective-tissue cells, in part nerve-cells. **c. humerale,** the humeral head. **c. medullæ, c. medullæ oblongatæ,** Bartholin's name for the cerebrum as distinguished from the oblongata. **capita medullæ oblongatæ,** the thalami. **c. Medusæ,** the peculiar plexus of veins surrounding the umbilicus in periportal cirrhosis of the liver. It represents collateral paths for the return of the venous blood from the abdominal viscera. **c. obstipum.** Synonym of *wry-neck.* **c. penis,** the glans penis. **c. quadratum,** the rectangular head of rickets, flattened upon the top and at the sides, with projecting occiput and prominent frontal bosses. **c. succedaneum,** a tumor composed of a serosanguineous infiltration of the connective tissue situated upon the presenting part of the fetus. **c. tali,** the head of the astragalus. **c. testis,** the epididymis. **c. transversum.** The same as *c. breve.*

caputin (*kap'-ū-lin*). A proprietary preparation containing acetanilide.

caraate (*kah-rah-aht'-a*). Mal de los pintos.

carageen, caragheen. See *carrageen.*

caramel (*kar'-am-el*) [Fr., "burnt sugar"]. Cane-sugar deprived of two molecules of water. It is a viscid, brown-colored liquid.

Carapa (*kar'-ap-ah*) [*carapi*, the Guiana name]. A genus of tropical meliaceous trees. *C. guianensis* has an antispasmodic and febrifuge bark, and its seeds afford *carap-oil,* a protective against insects and vermin. *C. moluccensis* is an East Indian tree; the bitter bark is used in diarrhea and the seeds in colic. The fruit and bark of *C. procera,* of the tropics of Asia and Africa, are antiperiodic; the oil from the seeds is anthelmintic and expectorant.

carapine (*kar'-ap-ēn*). An alkaloid from the bark of *Carapa guianensis*.

caraway (*kar'-ah-wā*). See *carum*.

carbamate (*kar'-bam-āt*). A salt of carbamic acid.

carbamic (*kar-bam'-ik*). Obtained from carbamide. **c. acid.** See *acid, carbamic*.

carbamide (*kar'-bam-id*) [*carbo*, a coal; *amide*], CH_4N_2O. Urea

carbamin (*kar-bam'-in*). See *acetonitril*.

carbasus (*kar'-bas-us*) [κάρβασα, fine flax]. Gauze; thin muslin used in surgery. **c. carbolata** (N. F.), carbolized gauze. **c. iodoformata** (N. F.), iodoform gauze.

carbazotate (*kar-baz-o'-tāt*) [*carbo*, a coal; *azotum*, nitrogen]. Same as *picrate*.

carbazotic acid (*kar-baz-ot'-ik*). See *acid, picric*.

carbenzyme (*kar'-ben-zīm*). Trade name of a preparation containing trypsin and charcoal, used in the treatment of tuberculous fistulæ and other tuberculous lesions; it is said to digest dead and disintegrating tissues

carbide (*kar'-bīd*). A compound formed by the direct union of carbon with some radical or element

carbimids (*kar'-bim-idz*). Bodies isomeric with cyanates, but distinguished from true cyanates in that alkalies decompose them into carbon dioxide and amine. Syn, *carbonylamines*.

carbinol (*kar'-bin-ol*) [*carbo*]. Methyl-alcohol, CH_3OH. Also a generic term for the alcohols formed by substituting hydrocarbon radicals for the hydrogen in the methyl radical of carbinol.

carbo (*kar'-bo*) [L.]. A coal; charcoal. **c. animalis** (U. S. P.), animal charcoal; bone-black; it is used in pharmacy and in manufacturing chemistry largely as a decolorizing agent and as a filter. **c. animalis purificatus** (U. S. P.), purified animal charcoal. Dose 20 gr.-1 dr. (1.3-4.0 Gm.). **c. ligni** (U. S. P.), wood-charcoal; an absorbent, disinfectant, and deodorizer, used in poulticing wounds and dressing ulcers. It is used internally in gastrointestinal irritation.

carbocyclic compounds (*kar'-bo-si-klik*). Organic compounds of the closed chain series in which the rings consist of carbon atoms exclusively.

carboformal (*kar-bo-form'-al*). A combination of carbon and paraformaldehyde in the form of blocks (Glüh blocks) for purposes of disinfection, the formaldehyde being liberated by the burning of the carbon.

carbohemia (*kar-bo-he'-me-ah*) [*carbo*; αἷμα, blood]. Imperfect oxidation of the blood.

carbohemoglobin (*kar-bo-hem-o-glo'-bin*). Hemoglobin united with carbon dioxide.

carbohydrate (*kar-bo-hi'-drāt*) [*carbo*; ὕδωρ, water]. An organic substance belonging to the class of compounds represented by the sugars, starches and celluloses; and containing carbon, hydrogen and oxygen. The carbohydrates form a large class of organic compounds; and may be arranged into three groups: the glucoses (monosaccharids), the disaccharids, or sugars; and the polysaccharids. The glucoses are the aldehyde derivatives or ketone derivatives of the hexahydric alcohols, into which they may be converted by the absorption of two hydrogen atoms. They are mostly crystalline substances, very soluble in water, but dissolving with difficulty in alcohol. They possess a sweet taste. The disaccharids and polysaccharids are ethereal anhydrides of the glucoses. They may all be converted into the glucoses by hydrolytic decomposition. The disaccharids are ether-like anhydrides of the hexoses.

carbohydraturia (*kar-bo-hi-drat-ū'-re-ah*) [*carbohydrate*; οὖρον, urine]. The presence of an abnormally large proportion of carbohydrates in the urine; glycosuria.

carbolate (*kar'-bol-āt*). 1. A salt of phenol. 2. To impregnate with phenol.

carbolfuchsin (*kar-bol-fook'-sin*) [*carbo*; *fuchsin*]. A staining fluid consisting of 90 parts of a 5 % aqueous solution of phenol and 1 part of fuchsin dissolved in 10 parts of alcohol.

carbolic (*kar-bol'-ik*) [*carbo*; *oleum*, oil]. Containing or derived from coal-tar oil. **c. acid.** See *acid, carbolic*, and *phenol*.

carbolism (*kar'-bol-izm*) [see *carbolic*]. Phenol poisoning; a diseased state induced by the misuse or maladministration of phenol. **c., cutaneous,** dry gangrene due to the action of liquid phenol or to prolonged application of a solution of it upon the skin.

carbolize (*kar'-bol-īz*) [see *carbolic*]. To impregnate with carbolic acid. To render aseptic or antiseptic by the use of carbolic acid.

carbol-lysoform (*kar-bol-li'-so-form*). A 3 % solution of phenol in lysoform.

carbolmarasmus (*kar-bol-mar-az'-mus*) [*carbolic*; μαρασμός, decay]. Chronic carbolism: a condition marked by vomiting, vertigo, headache, salivation, nephritis, and general marasmus.

carboluria (*kar-bol-ū'-re-ah*) [*carbo*, a coal; *oleum*, oil; οὖρον, urine]. The presence of carbolic acid in the urine, producing a dark discoloration. It is one of the signs of carbolic-acid poisoning.

carbolxylene (*kar-bol-zi'-lēn*). A clearing mixture composed of phenol, 1 part, and xylene, 3 parts; used for clearing microscopic sections which are to be mounted in Canada balsam or other resinous medium.

carbometer. See *carbonometer*.

carbon (*kar'-bon*) [*carbo*]. Charcoal. C = 12; quantivalence II, IV. A nonmetallic element occurring in the various forms of diamond, graphite or "black lead," charcoal, and lampblack. It is the central or characteristic element of organic compounds. **c. dioxide,** the acid, gaseous product, having the composition of CO_2, commonly known as "carbonic-acid gas" or carbonic acid. It is a colorless gas, having a sp. gr. of 1.52, soluble in cold water, and possessing a pungent smell and an acid taste. Inhaled, it destroys animal life by asphyxiation. **c. dioxide snow,** frozen CO_2 used in the treatment of certain skin affections. **c. disulphide** (*carbonei disulphidum*, U. S. P.), carbon bisulphide, CS_2, a colorless, transparent liquid, of offensive odor, highly inflammable, very poisonous. It is used as a solvent for caoutchouc and as a reagent. **c. monoxide,** CO, carbonic oxide, a colorless, tasteless, and inodorous gas, one of the products of imperfect combustion. It is actively poisonous. **c. nitride,** CN, cyanogen. **c. oxysulphide,** a body, COS, formed by conducting sulphur-vapor and carbon monoxide through red-hot tubes; it is a colorless gas, with a faint and peculiar odor. It unites readily with air, forming an explosive mixture, and is soluble in an equal volume of water. It is present in the waters of some mineral springs. **c. tetrachloride,** CCl_4, anesthetic, used in asthma by inhalation.

carbona (*kar-bo'-nah*). A substance containing essentially carbon tetrachloride, and also (often) carbon disulphide.

carbonate [*carbon*]. A salt of carbonic acid. **c., acid,** a substitution-compound of carbonic

acid in which there is replacement of but one of its hydrogen atoms with a base. **c., basic,** a compound of a carbonate with the oxide of the same base. **c., hydric.** See *c., acid.* **c., hydrogen.** 1. Carbonic acid. 2. Acid carbonate. **c., neutral, c., normal,** a substitution-compound of carbonic acid in which a base replaces all its hydrogen.

carbonated (*kar'-bo-na-ted*). 1. Containing carbonic acid or carbon dioxide. 2. Changed into a carbonate

carbone (*kar'-bōn*). A carbuncle.

carbonei disulphidum (*kar-bo'-nē-ī di-sul'-fid-um*). Carbon disulphide; see under *carbon.*

carbonemia (*kar-bon-e'-me-ah*) [*carbo;* αἷμα, blood]. An accumulation of carbon dioxide in the blood.

carboneum (*kar-bon'-e-um*). Carbon.

carbonic (*kar-bon'-ik*). Relating to, obtained from, or containing carbon. **c. acid.** See *carbon dioxide.* **c. anhydride,** carbon dioxide. **c. oxide,** carbon monoxide. **c. snow,** carbon dioxide in crystal form.

carbonide (*kar'-bon-īd*). 1. See *carbide.* 2. A mineral which contains carbon. 3. An oxalate freed from its hydrogen by heat.

carbonite (*kar'-bon-īt*). An oxalate.

carbonization (*kar-bon-iz-a'-shun*) [*carbon*]. The process of decomposing organic substances by heat without air, until the volatile products are driven off with the carbon remains.

carbonize (*kar'-bon-īz*). To char.

carbonometer (*kar-bon-om'-et-er*) [*carbon;* τρον, a measure]. An apparatus for indicating the degree to which the air of a room is vitiated by carbon dioxide.

carbonometry (*kar-bon-om'-et-re*). The determination of the amount of carbon dioxide present in air, by the aid of the carbonometer.

carbonous (*kar'-bon-us*). Containing carbon.

carbonyl (*kar'-bon-il*) [*carbon*]. A hypothetic organic radical having the formula CO.

carbonylamines (*kar-bon-il'-am-ēns*). *Carbimides.* q v.

carborundum (*kar-bo-run'-dum*). A registered trade name for silicon carbide, SiC, a substance of extreme hardness

carbosapol (*kar-bo-sa'-pol*) [*carbo; sapo,* soap]. A clear disinfectant solution obtained by warming together phenol, 50 parts; yellow soda-soap, 25 parts; and soft potash-soap, 25 parts.

carbostyril (*kar-bo-stir'-il*) [*carbo,* charcoal; *styrax,* storax], C_9H_7NO. Oxyquinoline; a compound prepared by digesting quinoline with a bleaching-lime solution.

carbosulphide, carbosulphuret (*kar-bo-sul'-fid, -fur-et*). A compound of carbon and sulphur with a radical

carbothialdin (*kar-bo-thī-al'-din*), $C_4H_{10}N_2S_2$. White crystals obtained on evaporating carbon sulphide with an alcoholic solution of aldehyde ammonia. It is soluble in acids.

carbovinate (*kar-bo-vīn'-āt*). An ethyl carbonate.

carboxyhemoglobin (*kar-boks-e-hem-o-glo'-bin*) [*carboxyl; hemoglobin*]. The compound of carbon monoxide and hemoglobin formed when CO is present in the blood. The carbon monoxide displaces the oxygen and checks the respiratory function of the red corpuscles.

carboxyl (*kar-boks'-il*) [*carbo;* ὀξύς, sharp]. 1. The group, CO.OH, characteristic of the organic acids The hydrogen of this can be replaced by metals, forming salts. 2. Same as *carbonyl.*

carboxylase (*kar-boks'-il-ās*) [*carboxyl; -ase*]. An enzyme existing in yeast which has the power of splitting off CO_2 from the carboxyl group of amino- and other aliphatic acids.

carboy (*kar'-boi*) [Turk., *karaboya*]. A large bottle protected by wickerwork and a wooden box, used in the transportation of corrosive and other liquids.

carbromal (*kar-bro'-mal*). Same as adalin, *q. v.*

carbuncle, carbunculus (*kar'-bung-kl, kar-bung'-kū-lus*) [*carbo*]. A hard, circumscribed, deep-seated, painful suppurative inflammation of the subcutaneous tissue. It differs from a boil in being of greater size, having a flat top, and several points of suppuration. It is erroneously called anthrax.

carbunculosis (*kar-bung-kū-lo'-sis*). A condition characterized by the formation of carbuncles.

carburet (*kar'-bū-ret*). Carbide.

Carcassonne's ligament (*kar-kas-on'*) [Bernard Ganderic *Carcasonne.* French surgeon, 1728–]. See *Colles' fascia.*

carceag. A disease of sheep described by Babes in Rumania; it is probably a form of trypanosomiasis

carcinelcosis (*kar-sin-el-ko'-sis*) [*carcinoma;* ἕλκωσις, ulceration]. A cancerous ulcer. **c. fungosa.** See *cancer verrucosus.*

carcinogenesis (*kar-sin-o-jen'-es-is*) [*carcinoma;* γένεσις, origin]. The origin or production of cancer.

carcinolytic (*kar-sin-o-lit'-ik*) [*carcinoma;* λύσις, solution]. Said of a substance which is destructive to cancer cells.

carcinoma (*kar-sin-o'-mah*) [καρκίνωμα; καρκίνος, a crab; ὄμα, tumor]. Cancer. A malignant epithelial tumor composed of a connective-tissue stroma surrounding groups or nests of epithelial cells. Three varieties are generally described—the squamous, the cylindrical, and the glandular. See *Boas' sign; de Morgan's spots; Semon's symptom; Spiegelberg's sign.* **c., acinous.** See *cancer, acinous.* **c., adenoid, c. adenodes, c. adenoides.** See *cancer, adenoid.* **c. alveolare,** colloid cancer. **c. asbolicum.** See *c., chimney-sweep's.* **c., chimney-sweep's,** epithelioma of the scrotum, occurring among chimney-sweepers, and supposed to be caused by the irritant action of soot. Syn., *soot cancer.* **c., colloid,** one in which the delicate connective-tissue stroma is filled with colloid matter, the result of a colloid degeneration of the epithelial cells. In some cases the degeneration is mucoid instead of colloid. It affects chiefly the alimentary canal, uterus, etc. **c. cutaneum,** epithelioma, or rodent ulcer. **c., cylindrical,** one in which the cells tend to assume a cylindrical or columnar shape. This shape is best seen in the cells nearest the periphery of the nests. **c. durum,** a hard cancer. **c., encephaloid,** one of rapid growth, with a small amount of stroma, large alveoli, and greater amount of cells and blood-vessels. **c., fibromedullary,** one containing about an equal portion of cells and stroma. **c. fibrosum, c., fibrous.** See *c., scirrhous.* **c. glandular,** a carcinoma in which the cells are of the glandular or secreting type; adenocarcinoma. **c., hyaline.** See *c., colloid.* **c., lenticular,** a form of scirrhous cancer. **c. melanodes,** a pigmented cancer. **c. molle,** a soft or a medullary cancer. **c. mucosum,** colloid cancer. **c. nigrum.** See *melanocarcinoma.* **c. psammosum,** one in which stratified calcareous concretions differing from those found in psammomata have replaced the epithelial elements. **c., reticulated,** one which has undergone fatty metamorphosis and exhibits its stroma more

distinctly. **c. sarcomatodes, c., sarcomatous,** an adenocarcinoma which has undergone sarcomatous degeneration of the connective tissue **c., scirrhous,** a form which occurs most commonly in the breast; it has a stout, fibrillated stroma, closely packed with large nucleated cells. Syn., *hard carcinoma.* **c. scroti, c. scroti asbolicum.** See *c., chimney-sweep's.* **c., squamous,** one derived from squamous epithelium; the cells are cuboid in shape **c. ventriculi,** cancer of the stomach. **c., villous.** See *papilloma.*

carcinomatoid (*kar-sin-o'-mat-oid*) [*carcinoma; εἶδος*, appearance]. Resembling a carcinoma.

carcinomatophobia (*kar-sin-o-mat-o-fo'-be-ah*) [*carcinoma; φόβος*, fear]. Fear of acquiring cancer.

carcinomatosis (*kar-sin-o-mat-o'-sis*). The pathological condition giving rise to carcinomata.

carcinomatous (*kar-sin-o'-mat-us*) [*carcinoma*]. Relating to or affected with carcinoma.

carcinomelcosis (*kar-sin-om-el-ko'-sis*). See *carcinelcosis.*

carcinopolypus (*kar-sin-o-pol'-e-pus*). A cancerous polyp.

carcinosarcoma (*kar-sin-o-sar-ko'-mah*) [*carcinoma; sarcoma*] A mixed tumor having the characters of carcinoma and sarcoma; it usually affects the thyroid gland.

carcinosis (*kar-sin-o'-sis*) [*carcinoma*]. 1. A carcinomatous cachexia; a tendency to the development of malignant disease. 2. A form of carcinoma, usually fatal, beginning generally in the uterus or the stomach and spreading to the peritoneum. **c., acute,** rapidly fatal carcinosis. **c., miliary,** one in which there are many secondary nodules the size of miliary tubercles. **c., miliary, acute,** the rapid formation of minute cancerous nodules, either primary or secondary, within an internal organ or upon its surface.

carcinous (*kar'-sin-us*). Cancerous

carcinus (*kar'-sin-us*) [*καρκίνος*, crab]. Same as cancer, or carcinoma.

carcoma (*kar-ko'-mah*) [Spanish]. 1. A disease caused by luminous radium paint. 2. Mahogany colored granules found in the feces in tropical countries

cardamom, cardamomum (*kar'-dam-om, kar-dam-o'-mum*) [L.]. The fruit of *Elettaria cardamomum,* cultivated in Malabar. Its properties are due to a volatile oil, $C_{10}H_{16}$. It is an aromatic, carminative stomachic, used as an ingredient of several "bitters." When combined with purgatives it is useful to prevent griping. **c., infusion of.** Dose 2 oz. (64 Cc.). **c., tincture of** (*tinctura cardamomi,* U. S. P.), 20 % strength. Dose ½–2 dr. (2–8 Cc.). **c., tincture of, compound** (*tinctura cardamomi composita,* U. S. P.), cardamom, 20; cinnamon, 20; caraway, 10; cochineal, 5; glycerol, 60; dilute alcohol, q. s. ad 1000 parts. Dose ½–2 dr. (2–8 Cc.).

Cardarelli's symptom (Antonio *Cardarelli,* Italian physician, 19th century). See *Oliver's symptom.*

Carden's amputation (*kar'-den*) [Henry Douglas *Carden,* English surgeon, –1872]. Amputation through the condyles of the femur just above the articular surface; a single rounded flap is removed from the front of the joint, and the operation is completed by a circular incision.

cardia (*kar'-de-ah*). 1. The heart. 2. The esophageal orifice of the stomach. 3. The fundus of the stomach.

cardiac (*kar'-de-ak*) [*cardia*]. 1. Pertaining to the heart. 2. Pertaining to the cardia of the stomach 3. A drug acting especially on the heart. **c. cycle,** the period included between the beginning of one heart-beat and the beginning of another. **c. dropsy,** a dropsical effusion due to heart disease with loss of compensation. **c. ganglia,** ganglia lying in the grooves and substance of the heart—the principal ones are Remak's and Bidder's, the first on the surface of the sinus venosus, and the latter (2) at the auriculoventricular groove. **c. impulse,** the elevation caused by the movement of the heart, usually seen in the fifth left intercostal space. **c. murmur.** See *murmur, cardiac.* **c. orifice** (of the stomach), the esophageal orifice. **c. passion.** See *cardialgia.* **c. plexus.** See *plexus, cardiac.* **c. rhythm,** the term given to the normal regularity in the force and volume of the individual heart-beats. **c. sign,** with the patient in the recumbent position the area of cardiac dulness is diminished; found in cases of carcinoma.

cardiactia (*kar-de-ak'-te-ah*) [*καρδία*, heart; *arctus,* bound]. Cardiac stenosis.

cardiagra (*kar-de-a'-grah*) [*καρδία*, heart; *ἄγρα*, seizure]. 1. Gouty attack of the heart. 2. Angina pectoris

cardiagraphy (*kar-de-ag'-raf-e*). See *cardiography* (2).

cardialgia (*kar-de-al'-je-ah*) [*cardia; ἄλγος*, pain]. Pain in the region of the heart, usually due to gaseous distention of the stomach; heartburn. Syn., *morbus cardiacus; morsus stomachi; morsus ventriculi.* **c. icterica,** heartburn with jaundice. **c. inflammatoria,** gastritis. **c. sputatoria,** pyrosis.

cardiameter (*kar-de-am'-et-er*) [*cardia, μέτρον*, measure]. An apparatus for determining the position of the cardiac orifice of the stomach.

cardiamorphia (*kar-de-am-or'-fe-ah*) [*καρδία*, heart; *ἀ*, priv.; *μορφή*, form]. Deformity or malformation of the heart.

cardianastrophe (*kar-de-an-as'-tro-fe*) [*καρδία*, heart; *ἀναστροφή*, a turning back] Congenital displacement of the heart to the right side of the chest.

cardianesthesia (*kar-de-an-es-the'-ze-ah*) [*cardia; ἀναισθησία*, want of feeling]. A condition of the heart marked by lack of sensation.

cardianeuria (*kar-de-ah-nū'-re-ah*) [*καρδία*, heart; *ἀ*, priv.; *νεῦρον*, a nerve]. Lack of nerve-stimulus to the heart.

cardianeurysma (*kar-de-an-ū-riz'-mah*) [*cardia; ἀνεύρυσμα*, a widening]. Aneurysm of the heart.

cardiant (*kar'-de-ant*) [*cardia*] 1. Affecting the heart. 2 A remedy that affects the heart. 3 A cardiac stimulant.

cardiaortic (*kar-de-ah-or'-tik*). Relating to the heart and the aorta.

cardiaplegia (*kar-de-ah-ple'-je-ah*). See *cardioplegia.*

cardiasthenia (*kar-de-as-the'-ne-ah*) [*cardia; ἀσθένεια*, weakness]. A peculiar weakness of the heart due to neurasthenic conditions.

cardiasthma (*kar-de-az'-mah*) [*καρδία*, heart; *ἆσθμα*, asthma]. Dyspnea or so-called asthma due to heart disease.

cardiataxia (*kar-de-at-ak'-se-ah*) [*καρδία*, heart; *ataxia*]. Incoördination of the contractions of the heart.

cardiatelia (*kar-de-ah-te'-le-ah*). See *atelocardia*

cardiatomy. See *cardiotomy.*

cardiatrophia (*kar-de-at-ro'-fe-ah*) [*καρδία*, heart; *ἀτροφία*, wasting]. Atrophy of the heart.

cardiauxe (*kar-de-awks'-e*) [*καρδία*, heart; *αὔξη*, increase]. Enlargement of the heart.

cardicentesis (*kar-de-sen-te'-sis*). See *cardiocentesis.*

cardiechema (*kar-de-ek-e'-mah*) [*καρδία*, heart; *ἦχημα*, sound; *pl., cardiechemata*]. A sound produced in or by the heart.

cardiectasis (*kar-de-ek'-tas-is*) [*καρδία*, heart; *ἔκτασις*, a stretching out]. Dilatation of the heart.

cardiectomy (*kar-de-ek'-to-me*) [*cardia; ἐκτομή*, cutting out]. Excision of the cardiac end of the stomach.

cardielcosis (*kar-de-el-ko'-sis*) [*cardia; ἕλκωσις*, ulceration] Ulceration of the heart.

cardiemphraxia (*kar-de-em-fraks'-e-ah*) [*καρδία*, heart; *ἔμφραξις*, obstruction]. Obstruction to the blood-current in the heart.

cardiethmoliposis (*kar-de-eth-mo-lip-o'-sis*) [*cardia; ἠθμός*, a sieve, *λίπος*, fat] A deposit of fat in the connective tissue of the heart.

cardieurysma (*kar-de-u-ris'-mah*) [*καρδία*, heart; *εὐρύς*, wide]. Dilatation of the heart

cardin (*kar'-din*). A fluid preparation of sheep-hearts digested in glycerol and boric acid, used subcutaneously as a heart-tonic and diuretic. Dose 50 min.–1½ dr. (3–5 Cc.).

cardinal (*kar'-din-al*) [*cardo*, a hinge]. Important; preeminent. **c.-flower,** a common name for several species of *Lobelia*, chiefly *Lobelia cardinalis*. **c. points of Capuron.** See *Capuron's cardinal points*. **c. veins,** the venous trunks which, in the embryonic stage, form the primitive jugular veins.

cardio- (*kar-de-o-*) [*cardia*]. A prefix meaning relating to the cardia.

cardioaccelerator (*kar-de-o-ak-sel'-er-a-tor*). Hastening the action of the heart. **c. center.** See *center, cardioaccelerator*.

cardioaortic (*kar-de-o-a-or'-tik*). Relating to the heart and the aorta. **c. interval,** the interval between the apex beat and the arterial pulse.

cardioarterial (*kar-de-o-ar-te'-re-al*). Pertaining to the heart and the arteries.

cardioaugmentor (*kar-de-o-aug-men'-tor*). Increasing the vigor or force of the heart-beat.

cardiocele (*kar'-de-o-sēl*) [*cardio-; κήλη*, hernia]. Hernia of the heart **c. abdominalis,** hernial protrusion of the heart into the abdomen.

cardiocentesis (*kar-de-o-sen-te'-sis*) [*cardio-; κέντησις*, puncture]. Puncture of one of the chambers of the heart to relieve engorgement.

cardiocinetic. See *cardiokinetic*.

cardiocirrhosis (*kar-de-o-sir-o'-sis*) [*cardia; cirrhosis*]. Heart disease in association with cirrhosis of the liver.

cardioclasia (*kar-de-o-kla'-ze-ah*) [*cardio-; κλάσις*, rupture]. Rupture of the heart.

cardiodemia (*kar-de-o-de'-me-ah*) [*cardio-; δημός*, fat] Fatty heart; fatty degeneration of the heart.

cardiodilator (*kar-de-o-di-la'-tor*). An instrument for dilating the cardia.

cardiodynia (*kar-de-o-din'-e-ah*) [*cardio-; ὀδύνη*, pain]. Pain in or about the heart.

cardiodysesthesia, (*kar-de-o-dis-es-the'-ze-ah*) [*cardia; δυς*, bad; *αἰσθησις*, perception]. Defective innervation of the heart.

cardiodysneuria (*kar-de-o-dis-nū'-re-ah*). See *cardiodysesthesia*.

cardiogmus (*kar-de-og'-mus*) [*cardio-; ὄγμος*, a furrow]. 1. Cardialgia. 2. Aneurysm of the heart. 3. Angina pectoris. **c. strumosus,** synonym of exophthalmic goiter.

cardiogram (*kar'-de-o-gram*) [*cardio-; γράμμα*, a writing]. The tracing of the cardiac impulse made by the cardiograph.

cardiograph (*kar'-de-o-graf*) [*cardio-; γράφειν*, to write]. An instrument for registering graphically the modifications of the pulsations of the heart.

cardiographer (*kar-de-og'-ra-fer*) [see *cardiograph*]. An authority upon diseases of the heart.

cardiographic (*kar-de-o-graf'-ik*) [*cardio-; γράφειν*, to write]. Pertaining to or recorded by the cardiograph

cardiography (*kar-de-og'-ra-fe*) [*cardio-; γράφειν*, to write]. 1. The use of the cardiograph. 2. A description of the anatomy of the heart.

cardiohepatic (*kar-de-o-hep-at'-ik*) [*cardio-; ἧπαρ*, liver]. Pertaining to the heart and the liver.

cardioid (*kar'-de-oid*) [*cardio-; εἶδος*, likeness]. Like a heart.

cardioinhibitory (*kar-de-o-in-hib'-it-o-re*) [*cardio-; inhibere*, to restrain]. Inhibiting or diminishing the heart's action. The cardioinhibitory fibers pass to the heart through the pneumogastric nerves.

cardiokinetic (*kar-de-o-kin-et'-ik*) [*cardio-; κινεῖν*, to move]. 1. Exciting the heart-action. 2. An agent which excites the action of the heart

cardiolith (*kar'-de-o-lith*) [*cardio-; λίθος*, a stone] A cardiac concretion.

cardiologist (*kar-de-ol'-o-jist*) [see *cardiology*]. A specialist in disorders of the heart.

cardiology (*kar-de-ol'-o-je*) [*cardio-; λόγος*, discourse]. The anatomy, physiology, and pathology of the heart.

cardiolysis (*kar-de-ol'-is-is*) [*cardio-; λύσις*, loosening]. Resection of the ribs and sternum over the pericardium to free the latter from its adhesions to the anterior chest-wall in adhesive mediastinopericarditis.

cardiomalacia (*kar-de-o-mal-a'-she-ah*) [*cardio-; μαλακία*, softness]. Softening of the heart.

cardiomegalia (*kar-de-o-meg-a'-le-ah*) [*cardio-; μέγας*, large]. Cardiac enlargement.

cardiomelanosis (*kar-de-o-mel-an-o'-sis*) [*cardio-; melanosis*]. Melanosis of the heart.

cardiometer (*kar-de-om'-et-er*) [*cardio-; μέτρον*, a measure]. An instrument for estimating the force of the heart's action.

cardiometry (*kar-de-om'-et-re*) [*cardio-; μέτρον*, a measure]. The estimation of the size and dimensions of the heart (as by means of auscultation and percussion).

cardiomyoliposis (*kar-de-o-mi-o-lip-o'-sis*) [*cardio-; μῦς*, muscle, *λίπος*, fat]. Fatty degeneration of the heart-muscle.

cardiomyomalacia (*kar-de-o-mi-o-mal-a'-she-ah*). See *cardiomalacia*.

cardioncus (*kar-de-ong'-kus*) [*cardio-; ὄγκος*, a tumor]. An aneurysm in the heart or one in the aorta close to the heart.

cardionecrosis (*kar-de-o-nek-ro'-sis*) [*cardio-; νέκρωσις*, a killing]. Gangrene of the heart.

cardionephric (*kar-de-o-nef'-rik*) [*cardio-; νέφρος*, kidney]. Pertaining to the heart and the kidneys.

cardionosos, cardionosus (*kar-de-on-o'-sos, -sus*) [*cardio-; νόσος*, disease]. Any pathological affection of the heart.

cardiopalmus (*kar-de-o-pal'-mus*) [*cardio-; παλμός*, palpitation]. Palpitation of the heart.

cardioparaplasis, cardioparaplasmus (*kar-de-o-par-a-pla'-sis, -plaz'-mus*) [*cardio-; παραπλάζειν*, to wander from the right way]. Cardiac malformation.

cardiopath (*kar'-de-o-path*) [*cardio-; πάθος*, disease]. A sufferer from heart disease.

cardiopathy (*kar-de-op'-a-thē*) [*cardio-*; *πάθος*, disease]. Any disease of the heart.

cardiopericarditis (*kar-de-o-per-e-kar-dī'-tis*) [*cardio-*; *pericardium*; *ιτις*, inflammation]. Associated carditis and pericarditis; inflammation of the heart tissues and of the pericardium.

cardiophone (*kar'-de-o-fōn*) [*cardio-*; *φωνή*, voice]. An instrument for hearing the heart sounds.

cardiophtharsis (*kar-de-of-thar'-sis*) [*cardio-*; *φθείρειν*, to corrupt]. Any affection of the heart causing destruction of its substance.

cardioplegia (*kar-de-o-ple'-je-ah*) [*cardio-*; *πληγή*, a stroke]. Paralysis of the heart.

cardiopneumatic (*kar-de-o-nū-mat'-ik*); [*cardio-*; *πνεῦμα*, breath]. Pertaining to the heart and respiration. **c. movements**, those movements of the air in the lungs that are caused by the pulsations of the heart and larger vessels

cardiopneumograph (*kar-de-o-nū'-mo-graf*) [*cardio-*; *πνεῦμα*, breath; *γράφειν*, to write]. An instrument designed for graphically recording cardiopneumatic movements.

cardioptosis (*kar-de-op-to'-sis*) [*cardio-*; *πτῶσις*, falling]. Prolapse of heart. *Rummo's disease.*

cardiopulmonary (*kar-de-o-pul'-mon-a-re*). Relating to the heart and lungs, cardiopulmonic.

cardiopuncture (*kar-de-o-punk'-chūr*) [*cardio-*; *punctura*, a puncture]. 1. Cardiocentesis. 2. Any surgical or vivisectional puncture of the heart.

cardiopyloric (*kar-de-o-pi-lor'-ik*) [*cardio-*; *pyloric*]. Referring to both the cardiac and pyloric portions of the stomach.

cardiorenal (*kar-de-o-re'-nal*) [*cardio-*; *ren*, kidney]. Relating to the heart and the kidneys.

cardiorrhaphy (*kar-de-or'-af-e*). Heart suturing.

cardiorrheuma (*kar-de-or-u'-mah*) [*cardio-*; *rheumatism*]. Rheumatism of the heart.

cardiorrhexis (*kar-de-or-eks'-is*) [*cardio-*; *ῥῆξις*, a tearing]. Rupture of the heart.

cardioschisis (*kar-de-os'-kis-is*). [*cardio-*; *σχίσις*, a cleaving. The tearing apart of adhesions which exist between the heart and the chest-wall in adhesive pericarditis.

cardiosclerosis (*kar-de-o-skle-ro'-sis*) [*cardio-*; *σκληροῦν*, to harden]. Induration of the tissues of the heart. See *fibroid heart.*

cardioscope (*kar'-de-o-skōp*) [*cardio-*; *σκοπεῖν*, to view]. An instrument for the observation of the movements or of lesions of the heart.

cardiospasm (*kar'-de-o-spasm*) [*cardio-*; *σπασμός*, a drawing]. 1. A spasm of the heart. 2. Spasmodic contraction of the esophageal opening of the stomach.

Cardiospermum (*kar-de-o-sper'-mum*) [*cardio-*; *σπέρμα*, seed]. A genus of plants of the order *Sapindaceæ*. *C. halicacabum* is a climbing tropical annual; the leaves and mucilaginous root are diuretic and diaphoretic.

cardiosphygmograph (*kar-de-o-sfig'-mo-graf*). An instrument for the simultaneous recording of the heart and pulse movements

cardiostenosis (*kar-de-o-ste-no'-sis*) [*cardio-*; *στένωσις*, narrowing]. Constriction of the heart, especially of the *conus arteriosus*; also the development of such a constriction.

Cardiotachometer (*kar-de-o-tak-om'-et-er*) [*cardio-*; *τάχος*, speed; *μέτρον*, measure]. An instrument by means of which the total number of heart-beats may be counted over long periods of time while the subject of the test is actively moving about.

cardiotomy (*kar-de-ot'-o-me*) [*cardio-*; *τομή*, cutting]. 1. The anatomy or dissection of the heart. 2. Incision of the heart. 3. Incision of the cardiac end of the stomach.

cardiotopography (*kar-de-o-to-pog'-ra-fe*) [*cardio-*; *τόπος*, place; *γράφειν*, to write]. The topography or topographic anatomy of the heart and the cardiac area.

cardiotoxic (*kar-de-o-toks'-ik*) [*cardio-*; *τόξικον*, poison]. Having a poisonous effect upon or through the heart.

cardiotrauma (*kar-de-o-traw'-mah*) [*cardio-*; *τραῦμα*, a wound]. Heart traumatism or wound.

cardiotromus (*kar-de-ot'-ro-mus*) [*cardio-*; *tremere*, to tremble] Fluttering of the heart.

cardiotrophe, cardiotrophia (*kar-de-ot'-ro-fe, kar-de-ot-ro'-fe-ah*) [*cardio-*; *τροφή*, nourishment]. 1. Heart-nutrition. 2. The volume of the heart.

cardiovalvulotome (*kar-de-o-val'-vū-lo-tōm*) [*cardio-*; *valve*; *τόμη*, a cutting]. An instrument for excising part of a valve (mitral) of the heart.

cardiovascular (*kar-de-o-vas'-kū-lar*) [*cardio-*; *vasculum*, a small vessel]. Pertaining to the heart and the blood-vessels

cardipaludism (*kar-de-pal'-u-dizm*) [*καρδία*, heart; *paludism*]. Malarial disturbance of the heart.

cardipericarditis (*kar-de-per-e-kar-dī'-tis*). See *cardiopericarditis.*

carditic (*kar-dit'-ik*) [*καρδία*, the heart; *ιτις*, inflammation]. Relating to carditis *q. v.*

carditis (*kar-dī'-tis*) [*cardia*; *ιτις*, inflammation]. Inflammation of the heart. **c., internal.** Synonym of *endocarditis.*

cardivalvulitis (*kar-de-val-vū-lī'-tis*) Endocarditis confined to the valves.

cardol (*kar'-dol*). See *anacardium.*

Carduus (*kar'-du-us*) [L., "a thistle"]. The seeds of *C. marianus*, St. Mary's-thistle, and *C. benedictus*, blessed thistle. The latter is used mainly as a tonic bitter. Dose of *decoction* 1 dr.–½ oz. (4–16 Cc.); of *tincture* 10–20 min. (0.6–1.2 Cc.).

cargel (*kar'-jel*). Trade name of an emulsion of lanolin in an aqueous solution of mild silver protein and casein.

cargentos (*kar-jen-tos*). Colloidal silver oxide containing about 50% of silver, and used similarly to silver nitrate.

Cargile membrane (*kar'-gīl*) [Charles H. *Cargile*, American surgeon, 1853–]. A membrane like gold-beaters' foil, from the peritoneum of the ox: used in surgery for packing and to prevent adhesions; it adheres to the raw surface of the bowel without stitches and forms an artificial peritoneum. Syn., *animal velum.*

carinated (*kar'-re-a-ted*). Carious.

caribi (*kah-re'-be*). Epidemic gangrenous proctitis.

carica (*kar'-ik-ah*) [*carica*, a dry fig]. A genus of plants; order, *Papayaceæ*. *C. papaya*, the papaw-tree of tropical America, contains in its leaves and fruit the alkaloid carpaine, besides the ferment papain or papayotin; the leaves also contain the glucoside carposid. The milky juice and the seeds are anthelmintic. **c.-coca**, a preparation of cocoa and papain.

caricin (*kar'-is-in*). See *papain.*

caricous (*kar'-ik-us*) [*carica*, a fig]. Fig-shaped, as a carcous tumor.

caries (*ka'-re-ēz*) [L., "rottenness"]. A molecular death of bone or teeth, corresponding to ulceration in the soft tissues. See *Rust's sign.* **c. articulorum.** 1. Caries of a joint. 2. See *c. fungosa.* **c., atonic**, a form described by Billroth, attended with but little swelling and a thin, fetid discharge. **c. callosa**, syphilitic chancre. **c. carnosa**, fungous caries, marked by large granulation-masses. **c. centralis**, circumscribed chronic osteomyelitis, which, working from with-

in, causes disease of the cortical substances. Syn., *osteitis interna*. **c. dentis, c. dentium.** See *c. of teeth*. **c. fungosa,** tuberculosis of a bone with attached sequestrum, the meshes of the latter being filled with granulations growing into them from the inner surface of the cavity **c. gallica,** syphilitic chancre. **c. granulosa.** See *c. fungosa*. **c. humida,** a form in which suppuration is present. **c. interna.** See *c. centralis*. **c., lacunar,** a form in which the undermined bone is full of lacunæ. **c. mollis.** See *c. fungosa*. **c., necrotic,** a form in which portions of the bone lie in a suppurating cavity. **c. nongallica,** simple chancre. **c. profunda.** See *c. centralis*. **c. sicca,** a form of tuberculous caries characterized by absence of suppuration, obliteration of the cavity of the joint, and sclerosis and concentric atrophy of the articular extremity of the bone. **c. of spine,** tuberculous osteitis of the bodies of the vertebræ and intervertebral fibrocartilage, producing curvature of the spine. Syn., *Pott's disease*. **c. strumosa,** tuberculous caries. **c. of teeth,** a chemical decomposition of the earthy part or any portion of a tooth, accompanied by partial or complete disorganization of the animal framework of the affected part. Syn., *odontonecrosis*. **c. tuberculosa,** tuberculous caries.

cariesin (*ka-ri-es'-in*). A medical preparation of carious bone.

carina (*kar-i'-nah*) [L., "the keel"]. 1. Any keel-like structure. 2. A mesial ridge on the lower surface of the fornix cerebi. 3. The spinal column. **c. aquæductus Sylvii,** the carinate inferior margin of the Sylvian aqueduct. **c. tracheæ,** a ridge across the bottom of the trachea between the origin of the two bronchi. **c. vaginæ,** the anterior column of the vagina.

carinal (*kar'-in-al*). Carinate.

carinate (*kar'-in-āt*) [*carina*]. Keeled.

cariosity (*kar-e-os'-it-e*). See *caries*.

carious (*ka'-re-us*) [*caries*]. 1. Pertaining to or affected with caries. 2. Marked by irregular pits or perforations so as to present the appearance of carious bone.

Carissa (*kar-is'-ah*) [L.]. A genus of shrubs. See *ouabain*

carissin (*kar-is'-in*). According to Bancroft, a glucoside from the bark of *Carissa ovata*, resembling ouabain in action.

Carleton's spots (*karl'-ton*) [Bukk G. *Carleton*, American physician, 1856–]. Areas of sclerotic tissue in the long bones in cases of gonorrheal infection.

Carlsbad salt (*kahrlz'-bahd*) A salt supposed to be prepared from Carlsbad water. **C. water.** A famous mineral water used largely for chronic affections of the gastrointestinal tract, obesity, gout, and diabetes.

carmalum, Mayer's. A stain consisting of carminic acid, 1; alum, 10; water, 200 parts It is well adapted for sections cut on the freezing microtome.

carmin (*kar'-min*), $C_{17}H_{18}O_{10}$. A coloring-matter extracted from cochineal.

carminant (*kar'-min-ant*) [*carmen*, a charm]. 1. Carminative. 2. A carminative agent or medicine.

carminative (*kar-min'-at-iv*) [*carminare*, to card; hence, to cleanse]. Having the power to cure flatulence and colic. Carminatives are generally aromatics.

carminophile (*kar-min'-o-fil*) [*carmin; φιλεῖν*, to love]. Readily stainable with carmin.

carnal (*kar'-nal*) [*carnalis*, fleshly]. Pertaining to flesh. **c. knowledge,** sexual intercourse.

carnallite (*kar'-nal-īt*) [v. *Carnall*, Prussian mineralogist 1804–1874]. Potassium-magnesium chloride.

carnation (*kar-na'-shun*) [*carnatio*]. The natural color of flesh.

carnauba (*kar-na-oo'-bah*) [Braz.]. 1. The root of *Copernicia cerifera*, a wax-producing palm-tree of tropical America. It is used in Brazil as an alternative and resembles sarsaparilla in its properties. Dose of the *fluidextract* 30 min.–1 dr. (2–4 Cc.). 2. See *C. wax*. **c. wax,** the wax obtained from *Copernicia cerifera*.

carneoaponeurotic (*kar-ne-o-ap-on-ū-rot'-ik*). Fleshy and pertaining to an aponeurosis.

carneopapillosus (*kar-ne-o-pap-il-o'-sus*). Composed of fleshy papillæ, as the columns of the vagina.

carneotendinous (*kar-ne-o-ten'-din-us*). Both muscular and tendinous.

carneous (*kar'-ne-us*) [*carneus*, of flesh]. Fleshy. **c. columns.** See *columnæ carneæ*.

carniferrin (*kar-ne-fer'-in*). A tasteless meat preparation containing phosphocarnic acid and 30% of iron. Dose for adults 8 gr. (0.52 Gm.). Syn., *iron phosphosarcolactate*.

carniferrol (*kar-nif'-er-ol*). A preparation of meat-peptone with iron; it is used as a stimulant dietetic. Syn., *liquor carnis ferropeptonatus*

carnification (*kar-nif-ik-a'-shun*) [*caro, carnis*, flesh; *facere*, to make]. A term indicating the alteration of tissue, especially the lung, to a dense, fleshy appearance. **c. of bone.** See *osteosarcosis*. **c. of the lung, congestive,** brown induration of the lung. **c. of the lungs, c., pulmonary.** 1. The change of the parenchyma of the lungs into a red material resembling muscle. 2. A consolidation of the lung from action of inflammation

carniformis (*kar-ne-form'-is*) [see *carnification*]. Having a flesh-like appearance, *e. g.*, *abscessus carniformis*.

carnigen (*kar'-ne-jen*). A dietetic albumose.

carnine (*kar'-nen*) [*caro, carnis*, flesh], $C_7H_8N_4O_3$. A leukomaine isolated from American meat-extract, but not from muscle tissue itself; also obtained from yeast and wine.

carnitine (*kar'-nit-ēn*) [*caro, carnis*, flesh]. A nitrogenous base found in muscle tissue; it has but little physiological action.

carnivorous (*kar-niv'-o-rus*) [*caro, carnis*, flesh; *vorare*, to devour]. Flesh-eating.

Carnochan's operation (*kar'-no-kan*) [John Murray *Carnochan*, American surgeon, 1817–1887]. 1. *For elephantiasis:* ligation of the main artery of the limb 2. *For neuralgia:* removal of the second division of the fifth nerve, together with the sphenopalatine ganglion as far back as the foramen rotundum.

carnogen (*kar'-no-jen*) [*caro, carnis*, flesh; *generare*, to produce]. Glycerite of bone-marrow, containing 60% of red marrow and 25% of unaltered fibrin of ox-blood, with albumin, suspended in glycerol It is a hematinic and used chiefly in pernicious anemia. Dose 1–2 tablespoonfuls 3 times daily.

carnolin (*kar'-nol-in*). A solution of 1.5% of formaldehyde; it is a food-preservative and disinfectant.

carnose (*kar'-nōs*) [*carnosus*, fleshy]. Resembling or having the consistence of flesh.

carnosin (*kar'-no-sin*), $C_9H_{14}N_4O_3$. A base, soluble in water, related from Liebig's meat-

extract; it melts with decomposition at 239°C.

carnosity (*kar-nos'-si-e*) [*carnosus*, fleshy]. A fleshy growth or excrescence.

Carnot's solution (*kar'-no*). A sol. of gelatin, 5 to 10 %, in normal saline A local hemostatic.

carnotite (*kar-no-tīt*). Hydrated potassium-uranium vanadate; said to be a source of radium.

caro (*ka'-ro*) [L. *gen.*, *carnis*]. Flesh. **c. luxurians**, exuberant granulation

Caroba (*kar-o'-bah*) [L] The leaflets of *Jacaranda procera* and of *Cybistax antisyphilitica*. It is a popular Brazilian remedy as an emetocathartic, alterative, and tonic in syphilis and in yaws. Dose of the *fluidextract* 15 min.–1 dr. (1–4 Cc.).

carobin (*kar'-o-bin*). A crystalline body obtained from *Jacaranda procera*.

caroid (*kar'-oid*). A digestive ferment obtained from *Carica papaya;* a pale-yellow powder. Dose 1–3 gr. (0.065–0.2 Gm.).

carolinium (*kar-o-lin'-e-um*). The name, given by Baskerville to a supposed new element.

carolone (*kar'-o-lōn*). A mixture of skimmed milk and nut oil; used as a food product.

carone (*kar'-ōn*). A substance obtained from dihydrocarvone by action of hydrobromic acid

Carony bark (*kar-o'-ne*) [*Caroni*, a river in Venezuela]. Angustura bark.

carotene (*kar'-o-tēn*) [L *carota*]. See *carotin*

carotic (*kar-ot'-ik*) [*κάρος*, stupor]. 1. Carotid. 2. Stupefying; or of the nature of stupor. 3. A drug to produce sleep.

caroticoclinoid (*kar-ot-ik-o-kli'-noid*). Relating to a carotid artery and a clinoid process of the sphenoid bone.

caroticotympanic (*kar-ot-ik-o-tim-pan'-ik*). Relating to the carotid canal and the tympanum.

carotid (*kar-ot'-id*) [*καρόειν*, to produce sleep]. 1 The carotid artery, the principal large artery on each side of the neck. See under *artery*. 2. Of or relating to the carotid artery. **c. gland.** See under *gland*. **c. plexus,** the nerve-plexus around the carotid artery. **c. tubercle,** the anterior tubercle of the transverse process of the sixth cervical vertebra.

carotidaneurysma (*kar-o-tid-an-ū-riz'-mah*). Aneurysm of the carotid artery.

carotidin (*kar-ot'-id-in*) [*carotid*] Extract of the carotid gland. A blood-pressure depressant

carotin (*kar'-o-tin*). The yellow pigment in carrots and other food-stuffs, corpus luteum, etc , it contains vitamin A. See *carotene*.

carotinemia (*kar-o-tin-ē-me-ah*). The presence of carotin in the circulating blood.

carotinoid (*kar-o'-tin-oid*) [*carotin*]. 1. Possessing a yellow color similar to carotin. 2. A member of the group of chromolipoids which includes carotins and xanthophyls.

carotis (*kar-ot'-is*) [L.]. The carotid artery. **c. cephalica, c. cerebralis,** the internal carotid artery. **c communis,** the common carotid artery. **c. externa, c. facialis,** the external carotid artery. **c. interna,** the internal carotid artery. **c. primitiva,** the common carotid artery.

carpagra (*kar-pag'-rah*) [*carpus; ἄγρα*, a seizure]. A sudden attack of pain at the wrist.

carpaine (*kar-pa'-ēn*), $C_{14}H_{21}NO_3$. An alkaloid from the leaves of *Carica papaya* It is used for treatment of heart disease. Dose $\frac{1}{10}$–$\frac{1}{4}$ gr. (0.006–0.01 Gm.) subcutaneously, every day or every second day. **c. hydrochloride,** $C_{14}H_{21}NO_3HCl$, bitter white crystals, soluble in water. Used in mitral insufficiency and aortic stenosis. Dose $\frac{1}{4}$–$\frac{1}{2}$ gr. (0 013–0.022 Gm.) daily. Injection $\frac{1}{10}$–$\frac{1}{8}$ gr. (0 0065–0 011 Gm.) daily.

carpal (*kar'-pal*) [*καρπός*, the wrist]. Pertaining to the carpus or wrist.

carpale (*kar-pa'-le*) [*carpus*]. Any wrist-bone.

carpectomy (*kar-pek'-to-me*) [*carpus; ἐκτομή*, excision]. Excision of carpal bone or bones.

carpen (*karp'-en*) [*carpus*]. Belonging to the carpus in itself.

carphologia (*kar-fol-o'-je-ah*). See *carphology*.

carphology (*kar-fol'-o-je*) [*κάρφος*, chaff; *λέγειν*, to collect]. Aimless picking at bedclothes, seen in grave fevers, particularly the typhoid state.

carpitis (*kar-pi'-tis*) [*carpus; ιτις*, inflammation]. Inflammation of one or more of the carpal joints.

carpo- (*kar-po-*) [*carpus*]. A prefix meaning relating to the carpus

carpocace (*kar-pok'-as-e*) [*carpus; κακός*, bad] A diseased condition of the wrist.

carpocarpal (*kar-po-kar'-pal*). The articulation between the two rows of carpal bones; also parts of the carpus in relation to each other.

carpocervical (*kar-po-ser'-vik-al*). Relating to the wrist and the neck.

carpogenic (*kar-po-jen'-ik*) [*καρπός*, fruit; *γένης*, producing]. Applied to the fruit-producing cell or system of cells in certain algæ

carpogenous (*kar-poj'-en-us*) [*καρπός*, a fruit; *γεννᾶν*, to produce]. Fertile; fruit-producing.

carpogonium (*kar-po-go'-ne-um*) [*καρπός*, fruit; *γόνος*, producing]. In biology, the unfertilized female reproductive organ of certain thallophytes.

carpokyphosis (*kar-po-ki-fo'-sis*) [*carpus, κύφωσις*, humpbacked] Madelung's deformity, *q.v.*

carpolith (*kar'-po-lith*) [*καρπός*, fruit; *λίθος*, a stone]. 1. A hard concretion formed in a fruit 2. A petrified fruit.

carpometacarpal (*kar-po-met-a-kar'-pal*) [*carpo-; metacarpus*]. Relating to the carpus and metacarpus

carpo-olecranal (*kar-po-o-le-kra'-nal*) [*carpo-; olecranon*] Relating to the wrist and the lower portion of the upper arm.

carpopedal (*kar-po-pe'-dal*) [*carpo-; pes, pedis*, a foot]. Affecting the wrists and feet, or the fingers and toes. **c. contraction.** See *contraction, carpopedal*. **c. spasm,** a spasm of the hands and feet, or of the thumbs and great toes, associated with laryngismus stridulus of children.

carpophalangeal (*kar-po-fa-lan'-je-al*). Pertaining to the wrist and the phalanges

carpophalangeus, carpophalanginus (*kar-po-fal-an'je-us, kar-po-fal-an-ji'-nus*). 1. Relating to the wrist and to a phalanx. 2 See under *muscle*.

carpophilous (*kar-pof'-il-us*) [*καρπός*, fruit; *φιλεῖν*, to love]. Parasitic upon fruit.

carpoptosis (*kar-pop-to'-sis*) [*carpus; πτῶσις*, a fall]. Wrist-drop.

carposid (*kar'-po-sid*). A crystalline glucoside from *Carica papaya*.

carpozyma (*kar-po-zi'-mah*) [*καρπός*, fruit; *ζύμη*, ferment]. A genus of microorganisms producing fermentation.

carp's-tongue (*karps'-tung*). An elevator used in the extraction of roots of teeth.

Carpue's method of rhinoplasty (*kar'-poo*) [Joseph Constantine *Carpue*, English surgeon, 1764–1846]. A repair of the nose by taking a heart-shaped flap from the forehead.

carpule (*kar'-pūl*). A glass cartridge containing a sterile solution of a drug which is loaded into a specially contrived syringe, and is ready for hypodermic injection.

carpus (*kar'-pus*) [L]. The eight wrist bones.

carrageen, carragheen (*kar'-ag-ēn*) [*Carragheen* in Ireland]. Irish moss. See *chondrus*.

Carrasquilla's serum (*kah-rahs-kēl'-yah*). A serum said to cure leprosy.

carreau (*kar'-o*) Scrofulosis and tuberculosis of the digestive organs

carrefour sensitif (*kar-foor' son-set-eef'*) [Fr., sensory crossway]. The posterior part of the posterior limb of the internal capsule of the cerebrum.

Carrel-Dakin treatment of wounds. [Alexis *Carrel*, French pathologist, 1873– ; Henry Drysdale *Dakin*, English chemist 1880–]. The wound is opened and gradually and completely sterilized by intermittent saturation of the dressing in contact with the injured surfaces by means of the Dakin solution (*q. v.*). The solution is carried from an irrigating bottle to the site of the wound by a rubber tube; from this to the surfaces of the wound by smaller rubber distributing tubes, the distal ends of which have fine holes. The wound is saturated with the solution about every two hours.

Carrick bend (*kar -ik bend*). A form of knot for fastening together two ligatures. The merit of the knot consists in the free end being held firmly between the two long portions.

carriers (*kar'-e-ers*). Convalescents from an infectious disease who while showing no signs or symptoms of the disease, harbor and eliminate the microorganism, and so spread the disease. **c., chronic,** carriers who eliminate the microorganisms for an indefinite period. **c., temporary** or **transitory,** convalescents who eliminate the microorganisms only for a short time after recovery.

Carrion's disease [Daniel E. *Carrion*, Peruvian student, 19th century]. Verruga peruviana; Peruvian wart

Carron oil (*kar'-on*). Consists of about equal parts of linseed-oil and lime-water. It is used as an application to burns, and is named after the Carron iron-works in Scotland, where it was first employed.

carrotin (*kar'-o-tin*) [*carota*, carrot]. $C_{18}H_{24}O$. A lipochrome, the coloring-matter of carrots and tomatoes

car-sickness. The symptoms similar to those of sea-sickness produced by riding in railway cars.

Carswell's grapes [Sir Robert *Carswell*, English physician, 1793–1857]. Pulmonary tubercles when they occur in a racemose distribution at the extremities of several adjacent bronchioles.

Carter's operation (*kar'-ter*) [William Wesley *Carter*, American laryngologist, 1869–]. Transplanting bone from rib to make a new bridge for nose.

Carthagena bark. Cinchona from Carthagena.

carthamin (*karth'-am-in*) [Ar., *qartama*, paint], $C_{14}H_{16}O_7$. The coloring-matter in safflower, the blossoms of *Carthamus tinctorius*.

carthamus (*karth'-am-us*) [Ar., *qartama*, paint]. American or bastard saffron or safflower. The flowers of *C. tinctorius*. An infusion, "Saffron tea," is a popular domestic remedy as a diuretic in measles and other exanthematqus affections.

cartilage (*kar'-til-āj*) [*cartilago*, gristle]. Gristle; a white, semiopaque, nonvascular connective tissue composed of a matrix containing nucleated cells which lie in cavities or lacunas of the matrix. When boiled, cartilage yields a substance called chondrin. **c., annular.** 1. Any ring-shaped cartilage. 2. The cricoid cartilage. **c., anonymous,** the cricoid cartilage. **c., aortic,** the second costal cartilage on the right side. **c., arthrodic, c., arthrodial.** See *c., articular.* **c., articular,** that lining the articular surfaces of bones. **c., arytenoid.** See *arytenoid cartilage.* **c., asternal,** the costal cartilages which are detached from the sternum. **c.-bone.** 1. See *ossein.* 2. See *c., calcified.* **c.s, Brecht's.** See *Brecht's cartilage.* **c., bronchial,** plates of cartilage, in some instances very minute, found in the bronchial tubes. **c., calcified,** that in which a calcareous deposit is contained in the matrix. Syn., *cartilage-bone; crusted cartilage; primary bone.* **c. cells** or **corpuscles,** connective-tissue cells in matrix of cartilage. **c., cellular.** See *c., parenchymatous.* **c., ciliary.** See *c., palpebral.* **c. corniculate.** See *Santorini's cartilage.* **c., costal,** that occupying the interval between the true ribs and the sternum or adjacent cartilages. **c., cricoid.** See *cricoid cartilage.* **c.s, cuneiform.** See *Wrisberg's cartilages.* **c., dentinal.** See *ossein.* **c., diarthrodial.** See *c., articular.* **c., embryonal.** See *c., parenchymatous.* **c., ensiform,** the third piece of the sternum. Syn., *xiphoid appendix; xiphoid cartilage.* **c.s, epactal,** small cartilaginous nodules on the upper edge of the alar cartilages of the nose. **c., epiphyseal.** See *c., intermediary* (2) **c., fetal.** See *c., temporary.* **c., fibro-.** See *fibrocartilage.* **c., floating.** See *arthrolith.* **c., Huschke's.** See *Jacobson's cartilage.* **c., hyaline,** is distinguished by a finely granular or homogeneous matrix. **c., innominate,** the cricoid cartilage. **c.s, interarticular,** flat fibrocartilages situated between the articulating surfaces of some of the joints. Syn., *interarticular fibrocartilages.* **c., interarytenoid,** an inconstant cartilage found between the arytenoid cartilages. **c.s, interhemal,** nodules of cartilage which aid in the formation of the hemal arch of a vertebra **c., intermediary.** 1. Cartilage-bone in process of transformation into true bone. 2. That interposed between the epiphysis and diaphysis of a bone. **c.s, interneural,** nodules of cartilage which aid in the formation of the neural arch of a vertebra. **c.s, intervertebral.** See *intervertebral discs.* **c., investing.** See *c., articular.* **c., Jacobson's.** See *Jacobson's cartilage.* **c., Luschka's.** See *Luschka's cartilage.* **c., Luschka's subpharyngeal.** See under *Luschka.* **c., Meckel's** See *Meckel's cartilage.* **c.s, Morgagni's.** See *Wrisberg's cartilages.* **c., palpebral,** the connective tissue forming the framework of the eyelids. **c., parachordal.** See *parachordal cartilage* **c., parenchymatous,** that in which cells form the main part of the tissue. **c.s, pyramidal,** the arytenoid cartilages. **c s, quadrate,** several small cartilages passing out from the alar cartilages in the external part of the nostril. **c., reticular,** a peculiar cartilage found in the auricle of the ear, the epiglottis, and Eustachian tubes. Its peculiarity consists in a network of yellow elastic fibers pervading the matrix in all directions. **c., retiform.** See *c., reticular.* **c. of Santorini.** See *Santorini's cartilage.* **c., Seiler's.** See *Seiler's cartilage.* **c.s, semilunar,** two interarticulating cartilages of the knee. **c., sesamoid.** See *sesamoid bone.* **c., sesamoid (of the larynx),** Luschka's cartilage. **c.s, sesamoid (of the nose).** See *c.s, epactal.* **c.s, sigmoid.** See *c.s, semilunar.* **c., synarthrodial,** that of any fixed or slightly movable articulation. **c., tarsal.** See *c., palpebral.* **c., temporary,** that which is ultimately replaced by bone. **c., tubal,** a rolled triangular cartilage

running from the osseous part of the Eustachian tube to the pharynx. **c. of Weitbrecht.** See *Weitbrecht's cartilage.* **c.s of Wrisberg.** See *Wrisberg's cartilage.* **c., xiphoid.** See *c., ensiform.* **c., yellow.** See *c., reticular.*

cartilagin (*kar-tĭl'-aj-in*) [*cartĭlago*, cartilage]. A characteristic principle of hyaline cartilage. Boiling changes it into chondrin.

cartilagines (*kar-tĭl-aj'-in-ēz*) [plural of *cartĭlago*]. Cartilages. **c. alares minores,** lesser alar cartilages, sesamoid cartilages. **c. corniculatæ,** corniculate cartilages, cartilages of Santorini. **c. cuneiformes,** cuneiform cartilages, cartilages of Wrisberg.

cartilaginification (*kar-tĭl-aj-in-ĭf-ik-a'-shun*) [*cartĭlago*, cartilage; *facere*, to make]. A change into cartilage

cartilaginiform (*kar-tĭl-aj-in'-if-orm*) [*cartĭlago*, cartilage; *forma*, form]. Resembling cartilage.

cartilaginoid (*kar-tĭl-aj'-in-oid*) [*cartĭlago*, cartilage; *εἶδος*, form] Resembling cartilage.

cartilaginous (*kar-tĭl-aj'-in-us*) [*cartĭlage*]. Made up of or resembling cartilage.

cartilago (*kar-tĭl-a'-go*) [L.]. See *cartĭlage.* **c. alaris major,** the lower lateral cartilage of the nose. **c. alaris minor,** one of the lesser alar cartilages of the nose. **c. auriculæ** or **auris,** the cartilage of the pinna of the ear. **c. basilaris,** the cricoid cartilage; the fibrocartilage in the foramen lacerum medium. **c. corniculata,** the corniculum laryngis. **c. cricoidea,** the cricoid cartilage. **c. cuneiformis,** the cuneiform cartilage of the larynx. **c. ensiformis,** the xiphoid cartilage. **c. epiglottica,** the cartilage of the epiglottis. **c. nasi lateralis,** the upper lateral cartilage of the nose. **c. ossescens,** cartilage destined to become bone **c. septi nasi,** cartilage of the nasal septum. **c. thyreoidea,** the thyroid cartilage. **c. triticea,** a small oblong cartilaginous nodule often found in the lateral thyrohyoid ligament. **c. tubæ auditivæ,** the cartilage forming part of the Eustachian tube **c. vomeronasalis,** the vomerine cartilage or cartilage of Jacobson. **c. Wrisbergii.** Same as *c. cuneiformis.* **c. xiphoidea,** the xiphoid or ensiform process.

carum (*ka'-rum*) [*κάρον*, caraway]. Caraway. It is official in the U. S. P. in the form of the dried fruit of *C. carvi*, indigenous to Europe, and an allied species native to the Pacific coast of America. Its odor and taste are due to a volatile oil. It is used chiefly as a flavor. *C. petroselinum*, parsley, is diuretic and sedative. **carui, aqua** (B. P.), caraway water. Dose 1–2 oz. (30–60 Cc.). **carui, infusum,** 2 dr. to 1 pint. Dose ½–2 oz. (15–60 Cc.) **carui, oleum** (U. S. P.), oil of caraway. Dose 1–5 min. (0.06–0.3 Cc.).

caruncle (*kar'-ung-kl*) [*caruncula*]. A small, fleshy growth. **c., lacrimal,** one upon the conjunctiva near the inner canthus. **c., urethral,** a small, bright-red growth situated on the posterior lip of the meatus urinarius· a frequent condition in women. The caruncle varies in size from a hempseed to a filbert; it is very painful, especially during micturtion and coitus, and bleeds readily.

caruncula (*kar-ung'-kū-lah*) [dim. of *caro*, flesh; pl., *carunculæ*]. A caruncle. **carunculæ cuticulares,** the nymphæ. **c. innominata,** the lacrimal gland. **c. major,** a caruncle marking the common orifice of the common bile-duct and the pancreatic duct. **c. mammillaris.** 1. The olfactory tubercle, between the roots of the olfactory nerves. 2. The enlarged ends of the galactophorous ducts in the nipple. **c. minor,** one in the duodenum in the center of which a supplementary pancreatic duct occasionally opens. **c. Morgagnii,** the middle lobe of the prostate. **carunculæ myrtiformes,** the projections of membrane near the orifice of the vagina, thought to be the remains of the hymen after its rupture. **carunculæ papillares.** See *papilla, renal.* **c. salivalis.** See *c. sublingualis.* **c. sublingualis,** one marking the orifice of Wharton's duct. Syn., *papilla salivalis inferior.* **c. urethræ.** See *caruncle, urethral.*

caruncular (*kar-ung'-kū-lar*) [*caruncula*, a caruncle]. Like or pertaining to a caruncle.

carunculate, carunculated (*kar-ung'-kū-lāt, -ed*]. Furnished with a caruncle.

carus (*ka'-rus*) [*κάρος*, stupor]. Deep, lethargic sleep. **c. cataleptica,** catalepsy. **c. ecstasis,** trance, or catalepsy. **c. lethargus,** lethargy.

Carus' curve (*ka'-rus*) [Karl Gustav *Carus*, German obstetrician, 1789–1869]. The longitudinal axis of the pelvic canal, which forms a curved line, having the symphysis pubis as its center

carvacrol (*karv'-ak-rol*) [Ital., *carvi*, caraway; *ἄκρος*, sharp], $C_{10}H_{13}.OH$. A liquid body occurring in the oil of certain varieties of satureja. Syn., *cymic phenol; cymophenol; metaisocymophenol; oxycymol.* **c. iodide,** $C_{10}H_{11}OI$, a brown powder, slightly soluble in alcohol, readily soluble in olive-oil, ether, and chloroform, melting at 90° C.; it is used as a substitute for iodoform. Syn., *iodocrol.*

carvene (*karv'-ēn*) [It., *carvi*, caraway]. $C_{10}H_{16}$. A hydrocarbon contained in caraway. It is a light terpene. See also *citrene.*

carvol (*karv'-ol*) [It., *carvi*, caraway; *oleum*, oil], $C_{10}H_{14}O$. An aromatic alcohol isomeric with carvacrol, and obtained from oil of cumin. It is an oil with a pleasant odor, boiling at 225° C.

carvone (*kar'-vōn*). Same as *carvol.*

Carya (*kar'-e-ah*) [*καρύα*, the walnut-tree]. Hickory; a genus of trees of the order *Juglandaceæ*, indigenous to North America. *C. tomentosa* yields a crystalline principle, *caryin*, believed to be identical with quercitrin The leaves of most of the species are aromatic and astringent and the bark bitter and astringent. The inner bark is used in dyspepsia and intermittent fever.

caryenchyma (*kar-e-en'-ki-mah*) [*κάρυον*, nut (nucleus); *ἐν*, in; *χυμός*, juice]. The more fluid part of the protoplasm of a nucleus.

caryin (*kar'-e-in*). See under *Carya.*

caryinum (*kar-e-in'-um*). Nut-oil.

caryoblast (*kar'-e-o-blast*) [*κάρυον*, nucleus; *βλαστός*, a germ]. Any nucleated plastidule.

caryochrome (*kar'-e-o-krōm*). See *karyochrome.*

caryocinesis (*kar-e-o-sin-e'-sis*). See *karyokinesis*

caryocinetic (*kar-e-o-sin-et'-ik*). 1. See *karyokinetic.* 2. Ameboid.

caryoclasis (*kar-e-ok'-las-is*). Same as karyorrhexis, *q. v.*

caryolysis (*kar-e-ol'-is-is*). See *karyolysis.*

caryomitosis (*kar-e-o-mi-to'-sis*). See *karyomitosis.*

caryophyllin (*kar-e-o-fil'-in*) [*caryophyllus*], $C_{10}H_{16}O$ or $C_{20}H_{32}O_2$. The neutral crystalline principle of cloves.

caryophyllus (*kar-e-o-fil'-us*) [*κάρυον*, a nut; *φύλλον*, a leaf]. Clove. The unexpanded flowers of *Eugenia aromatica*, distinguished by their pungent, spicy taste. Its properties are

due to a volatile oil, which is antiseptic, stimulant, and irritant. It also contains a crystalline body, *eugenin*, $C_{10}H_{12}O_2$, and a camphor, *caryophyllin*, $C_{10}H_{16}O$. It is useful as a stomachic and to prevent "griping" when combined with purgatives. **caryophylli, infusum** (B. P.), a strength of 1 to 40 is recommended. Dose 1–2 oz. (30–60 Cc.). **caryophylli, oleum** (U. S. P.), oil of cloves, contains an acid and a phenol compound. Dose 1–4 min. (0.06–0.24 Cc.). It is used also by microscopists to clarify preparations and tissues for mounting.

caryoplasm (*kar'-e-o-plasm*). See *karyoplasm*.

caryorrhexis. See *karyorrhexis*.

casanthrol (*kas-an'-throl*). A mixture of casein ointment with a coal-tar product; it is used as a varnish in skin diseases.

casca-bark (*kas'-kah*). Sassy-bark; ordeal-bark. The bark of *Erythrophlæum guineense*, a tree native to Africa. Its properties are due to an alkaloid. It is valuable in intermittent fevers and as a heart-tonic; in over-doses it produces nausea and vomiting. *Erythrophleine*, the active alkaloid, is a local anesthetic. Dose of the *aqueous extract* 1 gr. (0.065 Gm.); of the *fluidextract* 5–15 min. (0.3–0.9 Cc.); of the *tincture* (25% strength) 10 min. (0.6 Cc.).

cascador (*kas'-ka-dor*) [*casca*, bark]. A gatherer of cinchona bark

cascagar (*kas-ka'-gar*). A preparation of flaked agar with extract of cascara, and flavored with lemon. It increases the volume and moisture of the feces.

cascanata (*kas-kan-at'-ah*). A proprietary laxative and alterative said to consist of the active principles of cascara sagrada, gentian, rhubarb, and other herbs, holding in solution phosphate of sodium and magnesium

cascara (*kas'-kar-ah*). Spanish for "bark." **c. amarga**, Honduras bark. The bark of a tree native in Mexico, much used as an alterative tonic in syphilis and skin affections. **c. cordial**, a trade preparation. Dose 15 min.–2 dr. (1–8 Cc.). **c. sagrada** (*rhamnus purshiana*, U. S. P.), the bark of *Rhamnus purshiana*, or California buckthorn. Its properties are due to a volatile oil. It is useful in chronic constipation. Syn., *chittem bark; sacred bark*. **c. sagrada, extract of** (*extractum rhamni purshianæ*, U. S. P.). Dose ½–1 dr. (2–4 Cc.). **c. sagrada, fluidextract of** (*fluidextractum rhamni purshianæ*, U. S. P.). Dose 15 min. (1 Cc.). **c. sagrada, fluidextract of, aromatic** (*fluidextractum rhamni purshianæ aromaticum*, U. S. P.). Dose 15 min. (1 Cc.).

cascarilla (*kas-kar-il'-ah*) [Sp., dim. of *casca*, bark]. The bark of *Croton eluteria*, native to the Bahama Islands, an aromatic bitter, increasing the natural secretions of the digestive organs. **cascarillæ, infusum** (B. P.). Dose 1–2 oz. (30–60 Cc.). **cascarillæ, tinctura** (B. P.). Dose ½–2 dr. (2–8 Cc.).

cascarillin (*kas-kar-il'-in*) [*cascarilla*], $C_6H_9O_2$. The active principle of cascarilla; a white, crystalline, bitter substance, scarcely soluble in water.

cascarin (*kas'-kar-in*), $C_{14}H_{16}O_{10}$. A substance isolated by Leprince from the bark of *Rhamnus purshiana* (cascara sagrada), and believed by him to contain the active tonic and laxative principles of that bark; it occurs in granular masses or prisms. Dose 1½–3 gr. (0.099–0.198 Gm.). According to Phipson, this is identical with rhamnotoxin.

case (*kās*) [*cadere*, to happen]. 1. A single instance or example of a disease. 2. A covering, or box-like structure. **c., brain-**, the calvaria. **c. fatality rate**, the percentage of cases of sickness which terminate fatally. **c., missed**, a mild or atypical case of a disease, which misses clinical recognition. **c., muscle-**, see *muscle*. **c.-taking**, the collection of memoranda and notes of an individual case for service in diagnosis or prognosis, or for use in a medico-legal inquiry. **c., trial-**, in ophthalmology, a case containing various lenses for refracting the eye, etc. **c. worm**, echinococcus.

Casearia (*kas-e-a'-re-ah* [J. *Casearius*, Dutch botanist]. A genus of tropical trees of the order *Samydaceæ*. *C esculenta* is a native of the Asiatic tropics and Australia; its bitter roots are said to be a valuable remedy in hepatic torpor. *C. ovata*, the *anavingah* of the Malays, is a large tree, bitter in all its parts The fruit is diuretic. *C. tomentosa* is a tree of India; the bitter leaves are used by the natives in medicated baths and the fruit is diuretic.

casease (*ka'-se-ās*). An enzyme which digests casein, found by Duclaux and produced by bacteria, notably *Tyrothrix tenuis*.

caseate (*ka'-se-āt*). 1. A lactate. 2. To undergo cheesy degeneration.

caseation (*ka-se-a'-shun*) [*casein*]. The precipitation of casein during the coagulation of milk. Also a form of degeneration which changes the structure into a soft, cheese-like substance.

casec (*ka'-sek*). Trade name of a brand of calcium caseinate.

caseiform (*ka'-se-if-orm*) Like cheese or casein.

casein (*ka'-se-in*) [*caseus*, cheese] A derived albumin, the chief proteid of milk, precipitated by acids and by rennet. It is closely allied to alkali-albumin, but contains more nitrogen and a large amount of phosphorus. It constitutes most of the curd of milk. Syn., *caseum; lacterin* **c. dyspepton**, an insoluble, semigelatinous substance, separated in the first stages of gastric digestion. **c., gluten.** See *c., vegetable*. **c.-mercury**, a compound of casein and mercury bichloride, soluble in water with a trace of ammonia added; it is antiseptic. **c. ointment**, an ointment-base consisting of casein, 14 parts; potassium hydroxide and sodium hydroxide, each, 0.43 part; glycerol, 7 parts; vaselin, 21 parts; borax, 1 part; water, 56 or 57 parts. **c.-peptone**, a light-brown, soluble powder used as a nutrient. **c. saccharide**, a compound of dry casein, 1 part; cane-sugar, 9 parts, and sodium bicarbonate enough to render it slightly alkaline. It is useful in preparing emulsions of oils, balsams, terpenes, resins, or gum-resins. **c. of the saliva**, ptyalin. **c.-sodium**, a compound of casein and sodium hydroxide, used as a nutrient. **c., vegetable**, a nitrogenous substance resembling the casein of milk; two varieties have been described—*legumin*, in peas, beans, etc., and *conglutin*, in hops and almonds.

caseinogen (*ka-se-in'-o-jen*) [*caseum*, cheese; γεννᾶν, to produce]. A peculiar substance occurring in milk, neither an alkali-albumin nor a globulin, but occupying a distinct position among proteids. When acted upon by a digestive ferment it produces casein, or the curd of milk. Caseinogen is a proteid analogous to fibrinogen, myosinogen, etc.

caseoiodine (*ka-se-o-i'-o-din*). A compound of casein and iodine (8 or 9%) forming a white

powder, soluble in dilute hot alcohol and in hot alkalies. It is used in myxedema.

caseose (*ka'-se-ōs*) [*caseum*, cheese]. A product of the gastric digestion of casein.

caseous (*ka'-se-us*) [*caseus*, cheese]. Having the nature or consistence of cheese.

cashew (*kash-oo'*). The cashew-nut, the product of *Anacardium occidentale*. See *Anacardium*.

Casimiroa (*kas-im-ir-o'-ah*) [after *Casimiro Gomez*]. A genus of plants belonging to the order *Rutaceæ*. *C. edulis* is the *zapote blanco* of Mexico; the edible fruit is anthelmintic; the bitter bark with the leaves and seeds are incinerated and used medicinally.

$CaSO_4$. Calcium sulphate.

casogen (*ka'-so-jen*). Trade name of a milk food said to contain 95% of milk protein, 4% glycerophosphates, and 1% ovolecithin; used in neurasthenia, anaemia and dyspepsia

casoid bread (*ka'-soyd*). A bread made of a meal prepared from casein; used in diabetes.

casona cheese (*kas-o'-nah*). A soft cheese combined with agar-agar to prevent constipating action.

cassareep, cassaripe (*kas'-a-rēp*) [South American name]. The concentrated juice of the cassava, the root of *Jatropha manihot*, made innocuous by boiling; it is a condiment, and as an ointment (10%) is recommended in the treatment of purulent conjunctivitis, corneal ulcers, and other diseases of the eye.

cassava (*kas-ah'-vah*) [Sp., *casabe*]. 1. The manioc plant (*Jatropha manihot* and other species of *Jatropha*). 2 Tapioca.

Casselberry position (*kas'-el-ber-re*) [William Evans Casselberry, American laryngologist, 1858–] The patient after an intubation lies with his face downward while drinking so that the fluid may not enter the tube.

Casser's (Casserius') fontanel [Giulio *Casserio*, Italian anatomist, 1545–1616] The fontanel formed by the temporal, occipital, and parietal bones **C.'s ganglion,** the Gasserian ganglion. **C.'s muscle.** 1. Ligamentous fibers attached to the malleus and formerly described as the laxator tympani minor muscle. 2. The coracobrachialis. **C.'s perforating nerve,** the external cutaneous nerve of the arm.

Casserian (*kas-e'-re-an*). See *Gasserian*.

cassette (*kas-et'*). A screen or plate holder.

Cassia (*cash'-e-ah*) [*κασία*, a perfume]. 1. A genus of leguminous plants, several species of which afford senna. 2. An old name, still used commercially, for the coarser varieties of cinnamon. See *Cinnamon*. *C alata*, the ringworm-shrub, is a widely diffused tropical shrub. The juice of the leaves mixed with lime-juice is used in the treatment of ringworm, and the wood and bark are alterant. *C. beareana* is a species of East Africa. A decoction of the root is highly recommended in black-water fever, and the powdered bark is applied as a dressing to ulcers. *C. marilandica*, of North America, produces the leaves called American senna, which are less active as a cathartic than the true senna. **C.-bark,** cassia-lignea. See *cinnamon*. **C.-buds,** the immature fruit of Chinese cinnamon; used chiefly as a spice. **C., oil of,** a variety of oil of cinnamon, used in pharmacy and in perfumery. **C., purging** (*cassia fistula*, U. S. P.), the dried fruit of a tree growing in tropical regions. The pulp (*cassiæ pulpa*, B. P.) is a mild laxative. Dose 1–2 dr. (4–8 Gm.)

cast (*kast*) [ME., *casten*, to throw]. 1. A mass of fibrous or plastic material that has taken the form of some cavity in which it has been molded. From their source, casts may be classified as bronchial, intestinal, nasal, esophageal, renal, tracheal, urethral, vaginal, etc. Of these, the renal casts, by reason of their significance in diseases of the kidney, are the most important. Classed according to their constitution, casts are epithelial, fatty, fibrinous, granular, hyaline, mucous, sanguineous, waxy, etc See *tube-casts*. 2. Strabismus. **c.s, Kuelz's.** See *Kuelz's casts*. **c.s, tubular exudation** (of the intestine) a pathognomonic symptom of mucous colitis.

castanea (*kas-ta'-ne-ah*) [L.]. Chestnut. The leaves of *C. vesca*. They contain tannic and gallic acids and other principles the value of which is not known. They are used in infusion or decoction as a remedy for whooping-cough. Dose of the *fluidextract* 5–60 min. (0.3–3.8 Cc.).

Castellani's test (*kas-tel-ah'-ne*) [Aldo *Castellani*, Italian physician 1876–]. If an immune serum is mixed with its corresponding bacteria, the agglutinins for these bacteria are absorbed, as are also the partial agglutinins for the heterologous bacteria.

Castellino's sign. See *Oliver's symptom*.

castor (*kas'-tor*). See *castoreum*. **c.-bean, c.-oil.** See under *ricinus*. **c.-xylene,** a mixture composed of castor-oil, 1 part, and xylene, 3 parts, used for clearing or clarifying the collodion or celloidin of objects embedded in collodion.

castoreum (*kas-to'-re-um*) [*κάστωρ*, the beaver]. The dried preputial follicles and their secretion, obtained from the beaver, *Castor fiber*. It is a reddish-brown substance with a strong odor It is antispasmodic and stimulant, its action resembling that of musk. Dose of the *tincture* ½–1 dr. (2–4 Cc.).

castoria (*kas-to'-re-ah*) [*κάστωρ*, the beaver]. A proprietary medicine recommended as a substitute for castor oil.

castorin (*kas'-to-rin*). A neutral principle obtainable from castoreum.

castrate (*kas'-trāt*) [*castrare*, to cut]. 1. To excise the testicles or ovaries. 2. A person whose testicles or ovaries have been excised.

castration (*kas-tra'-shun*) [*castrare*, to cut]. Orchidectomy; the excision of one or both testicles. **c., female,** removal of the ovaries; oophorectomy; spaying.

castrensis (*kas-tren'-sis*) [*castra*, a camp]. 1. Relating to camps. 2. Camp-fever or dysentery due to unsanitary living in camps.

casual (*kaz'-ū-al*) [*casus*, chance]. 1. Fitted or set apart for the treatment of accidental injuries, as a casual ward in a hospital. 2. An occupant of a casual ward in a hospital.

casualty (*kaz'-ū-al-te*) [*casus*, chance]. An accidental injury; a wound, or loss of life, accidentally incurred; an injury in a battle.

Casuarina (*kas-ū-ar-e'-nah*) [*casuarius*, the cassowary, from the resemblance of the stems to the heavy feathers of this bird]. A genus of plants of the order *Casuarinaceæ*. The tonic and styptic bark of *C. equisetifolia*, of Malaya, is used in the treatment of beriberi. *C. montana* is a native of Malaya; the bark is used in beriberi; the leaves in colic; the seeds in a salve in the treatment of headache.

casuistics (*kaz-ū-is'-tiks*) [*casus*, a case]. The study of individual pathologic cases as a means of arriving at the general history of a disease.

casumen (*kas'-ū-men*). A proprietary dietetic said to contain 93 % of proteid.

cata-. A prefix denoting downward, or according to, or against.

catabasial (*kat-ah-ba'-se-al*) [κατά, down; *basion*]. Applied to skulls having the basion lower than the opisthion.

catabasis (*kat-ab'-as-is*) [καταβασις, a descent]. The decline of a disease.

catabatic (*kat-ah-bat'-ik*). Pertaining to catabasis.

catabiotic (*kat-ah-bi-ot'-ik*) [κατά, intensive; βιός, life]. Applied to the power of growing structures which causes the development of approximate cells to be harmonious with the primary structure.

catabolergy (*kat-ab-ol'-er-je*) [κατά, down; βάλλειν, to throw; ἔργον, work]. Energy expended in catabolic processes.

catabolic (*kat-ab-ol'-ik*) [κατά, down; βάλλειν, to throw]. Of the nature of, or pertaining to, catabolism.

catabolin, catabolite (*kat-ab'-o-lin, -līte*) [κατά, down; βάλλειν, to throw] Any product of catabolism.

catabolism (*kat-ab'-ol-izm*) [κατά, down; βάλλειν, to throw]. Destructive metamorphosis; disassimilation; physiological disintegration; movement toward a cata-state.

catabolite (*kat-ab'-o-līt*). Same as *catabolin*

catabythismomania (*kat-ab-ith-iz-mo-ma'-ne-ah*) [καταβυθισμός, submergence; μανία, madness]. Insane impulse to suicide by drowning.

catabythismus (*kat-ab-ith-iz'-mus*) [καταβυθισμός, submergence]. Drowning; especially suicidal drowning

catacausis (*kat-ak-aw'-sis*) [κατά, down; καίειν, to burn]. Spontaneous combustion.

cataclasis (*kat-ak'-las-is*) [κατά, down; κλάσειν, to break]. 1. A fracture. 2. See *cataclеisis*.

catacleisis (*kat-ak-li'-sis*) [κατάκλεισις, a locking]. Closure of the eyelids by adhesion or by spasm.

cataclysm (*kat'-ak-lizm*) [κατακλυσμός, a deluge]. 1. An effusion 2. A sudden shock.

catacoustics (*kat-ah-koos'-tiks*) [κατά, after; ἀκούειν, to hear]. The science of reflected sound.

catacrotic (*kat-ak-rot'-ik*) [κατά, down; κρότος, a striking]. Interrupting the line of descent in a sphygmogram.

catacrotism (*kat-ak'-rot-izm*) [κατά, down; κρότος, a striking]. An interruption or oscillation of the line of descent in a sphygmogram; the quality of being catacrotic or of being marked by oscillation in the sphygmographic line of descent.

catadicrotic (*kat-ah-di-krot'-ik*). Having one or more secondary expansions, as a pulse.

catadicrotism (*kat-ad-ik'-rot-izm*) [κατά, down; δίκροτος, double beating]. The occurrence of a divided or double pulsation in the downward stroke of the sphygmograph.

catadidymous (*kat-ad-id'-im-us*) [κατά, down; δίδυμος, twin]. Joined into one, as a twin monstrosity, but with downward cleavage, so that the upper parts are double.

catadidymus (*kat-ad-id'-im-us*) [κατά, down; δίδυμος, twin]. A catadidymous monstrosity.

catadioptric (*kat-ah-di-op'-trik*) [κατά, over against; *dioptric*]. Applied to optical instruments which have the power of reflecting and refracting light at the same time.

catadrome (*kat'-ad-rōm*) [καταρρέχειν, to run at or over]. 1. The onset of a disease. 2. The decline of a disease.

catagenesis (*kat-aj-en'-es-is*) [κατά, down; γένεσις, generation]. The process of creation by retrograde metamorphosis of energy, or by the specialization of energy.

catagma (*kat-ag'-mah*) [κάταλμα, a fracture; *pl.*, *catagmata*]. A fracture.

catagmatic (*kat-ag-mat'-ik*) [κάταγμα, a fracture]. 1. Relating to or serviceable in cases of fracture. 2. A remedy that promotes the union of broken parts.

catalase (*kat'-al-ās*). See *milk-catalase*.

catalepsy (*kat'-al-ep-se*) [κατά, down; λαμβάνειν, to seize]. A condition of morbid sleep, associated with a loss of voluntary motion and a peculiar plastic rigidity of the muscles, by reason of which they take any position in which they are placed and preserve it for an indefinite time. The condition is associated with hysteria, with forms of insanity, and is a stage of the hypnotic sleep. **c., local,** that affecting a single organ or group of muscles.

cataleptic (*kat-al-ep'-tik*) [see *catalepsy*]. 1. Relating to, affected with, or of the nature of, catalepsy. 2. A person affected with catalepsy.

cataleptiform (*kat-al-ep'-tif-orm*) [*catalepsy; forma*, form]. Resembling catalepsy.

cataleptize (*kat-al-ep'-tīz*). To reduce to a state of catalepsy.

cataleptoid (*kat-al-ep'-toid*) [*catalepsy*; εἶδος, likeness]. Like catalepsy. **c. state,** a condition due to neuromuscular excitability and differing from true catalepsy in that the limbs must be held in fixed attitudes for a few seconds before they maintain themselves and friction causes them to become limp.

cataleptolethargic (*kat-al-ep-to-leth-ar'-jik*). Having the nature of catalepsy and lethargy.

Catalpa (*kat-al'-pah*) [native Am. Indian]. A genus of American and Asiatic bignoniaceous trees. **A. bignoniodes** and **A. speciosa,** of North America, have astringent, anthelmintic, and tonic qualities; the leaves and pods are reputed anodyne, emollient, and antasthmatic.

catalysin (*kat-al'-is-in*). Trade name of a preparation of lecithin said to increase the resistance in infectious diseases.

catalysis (*kat-al'-is-is*) [καταλύειν, to dissolve]. In chemistry, a reaction that appears to take place owing to the mere presence of another body that apparently undergoes no change.

catalyst (*kat'-al-ist*). 1. A substance having the power to produce catalysis. 2. A substance which alters the velocity of a chemical reaction without undergoing any apparent physical or chemical change itself, and without becoming a part of the product formed

catalytic (*kat-al-it'-ik*) [καταλύειν, to dissolve]. 1. Of the nature of, or characterized by, catalysis. 2. Any medicine that is supposed to break down, destroy, or counteract morbid agencies existing within the economy. See *alterative*. 3. A retrogressive change.

catalyzation (*kat-al-i-za'-shun*). The act or process of catalysis.

catalyzer (*kat-a-lī'-zur*). Any substance that accelerates chemical or physical processes which would occur without it.

catamenia (*kat-am-e'-ne-ah*) [κατά, concerning, according to; μήν, month]. The recurrent monthly discharge of blood during sexual life from the genital canal of the female.

catamenial (*kat-am-e'-ne-al*) [*catamenia*]. Pertaining to the catamenia.

catapasm (*kat'-ap-azm*) [κατάπασμα, powder]. A dry powder to be sprinkled upon the skin or upon a sore.

cataphasia (*kat-af-a'-ze-ah*) [κατάφασις, assent]. A condition of imperfect consciousness, in which the patient repeatedly utters the same word or words spontaneously, or in reply to a question.

cataphonics (*kat-ah-fon'-iks*) [κατά, after; φώνη, sound]. That branch of physics treating of reflected sounds.

cataphora (*kat-af'-o-rah*) [καταφορά, to fall]. Lethargy; imperfect or restless coma, with intervals of coma-vigil.

cataphoresis (*kat-af-or-e'-sis*) [κατά, down; φέρειν, to carry]. The introduction of drugs into the system through the skin by means of ointments or solutions applied by the electrode of a battery. **c., anemic,** the application of cataphoresis upon a part from which the blood-supply has previously been cut off by an Esmarch bandage or a rubber ring. **c., static,** a method of introducing into the body gaseous medicaments that have been inclosed within a bell-jar or tube into which enters a brush electrode connected with the positive pole of an influence machine.

cataphoretic (*kat-af-o-ret'-ik*). Pertaining to cataphoresis.

cataphoria (*kat-af-o'-re-ah*) [κατά, down; φορός, tending]. A tendency of both eyes to assume too low a plane.

cataphoric (*kat-af-or'-ik*) [*cataphoresis*] 1. Passing, or causing a passage, from the anode to the cathode, through a diaphragm or septum. 2. Relating to lethargy or to apoplexy.

cataphylaxis (*kat-ah-fi-laks'-is*) [κατά, down; φύλαξ, guard]. The directing and carrying by the body of phylactic agents (leucocytes, anti-bodies, etc.) to the seat of an infection.

cataplasis (*kat-ap'-las-is*) [κατα, down; πλάσις, formation]. 1. The stage of decline in the individual life. 2. The application of a plaster or coating.

cataplasm, cataplasma (*kat'-ap-lazm, kat-ap-laz'-mah*) [κατάπλασμα, a poultice]. A poultice (*q. v.*). **cataplasma carbonis** (B. P.), a poultice made of wood-charcoal, 1; bread-crumb, 1; linseed-meal, 3; boiling water, 20 parts. **cataplasma fermenti** (B. P.), a mixture of beer, yeast, wheat-flour, water at 100° F. It is a stimulant and antiseptic for indolent ulcers. **cataplasma kaolini** (U. S. P.), a mixture of kaolin, boric acid, thymol, methyl salicylate, oil of peppermint, and glycerol.

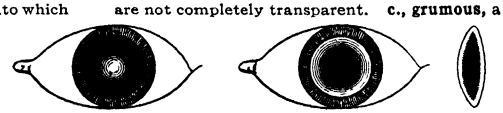
cataplectic (*kat-ap-lek'-tik*) [κατάπληξις, a striking down]. Fulminant; sudden and overwhelming.

cataplexis (*kat-ap-leks'-is*) [κατάπληξις, a striking down]. 1. A sudden and overwhelming shock or attack of disease; prostration by the onset of disease or by shock. 2. Hypnotic sleep.

cataplexy (*kat'-ap-leks-e*). Cataplexis.

cataptosis (*kat-ap-to'-sis*) [κατά, down; πτῶσις, a falling]. Apoplexy; epilepsy; paralysis; ptosis.

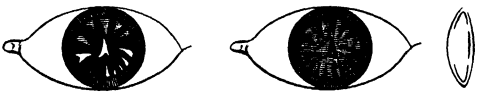
cataract (*kat'-ar-akt*) [καταρράκτης, a water-fall]. Partial or complete opacity of the crystalline lens or its capsule. **c., adherent,** opacity of the lens, due to disturbed nutrition, in which it is attached by exudates to the adjacent parts, as in cyclitis. **c., aridosiliquose,** an overripe cataract with a dry, wrinkled capsule. **c., capsular,** cataract due to opacity of the capsule. **c., capsulolenticular,** one involving both the capsule and the lens. **c., chalky.** See *c., aridosiliquose.* **c., cholesterin,** one containing what are apparently crystals of cholesterin. **c., concussion,** a soft cataract due to an explosion or some other concussion. **c., cortical,** one due to loss of transparency of the outer layers of the lens. **c., cystic.** See *c., Morgagnian.* **c., diabetic,** a form associated with diabetes. **c.-discission,** an operation preliminary to absorption, or extraction by suction, consisting in rupturing the capsule, so that the aqueous humor gains access to the lens. **c.-extraction,** removal of the cataractous lens by surgical operation. **c., fibrinous,** a false cataract consisting of an effusion of plastic lymph on the capsule and into the field of vision. **c., fibroid,** a false cataract consisting of an opacity in the axis of the visual rays though not in the lens. **c., fluid,** the breaking-up of an opaque lens into a milky fluid. **c., green,** a name given to a grayish-green reflex seen in glaucoma; it is also seen when the pupil is dilated and the media are not completely transparent. **c., grumous,** a spurious cataract from hemorrhage into the cornea or into the vitreous. **c., gypseous,** an overripe cataract presenting a white appearance from having undergone degeneration. **c., hard** See *c., senile.* **c., hyaloid,** a spurious cataract attributed to opacity of the anterior part of the vitreous. **c., immature,** one in which only a part of the lens-substance is cataractous. **c., incipient,** forked linear opacities in the equatorial region of the lens seen in middle-aged persons and sometimes remaining unchanged for years. Syn., *arcus senilis lentis; gerontoxon lentis.* **c., interstitial.** See *c., lenticular.* **c., lacteal.** See *c., fluid.* **c., lamellar,** one due to opacity of certain layers between the cortex and nucleus, the remaining layers being transparent. **c., lenticular,** one occurring in the lens proper. **c., lymph, c., lymphatic.** See *c., Morgagnian.* **c., mature,** one in which the whole lens-substance is cataractous. **c., membranous,** a fibrinous deposit from the iris upon the capsule, which becomes opaque. **c., mixed,** one which ultimately affects the whole lens, but begins as a cortical opacity in sharply demarcated streaks or triangular patches. **c., Morgagnian,** one in which an overripe cataract shrinks and leaves a nucleus floating in the dissolved outer layers. **c., myelin,** one containing a semitransparent, yellowish, friable substance. **c., nuclear,** one of moderate extent beginning in the nucleus. **c., pigmented, c., pigmentous,** a spurious cataract due to an injury by which the pigment from the posterior surface of the iris has been detached, forming a tree-like appearance. **c., polar** (anterior or posterior), a form



1 2 3

NUCLEAR CATARACT.

1. Section of lens; central position of opacity. 2. Appearance by ophthalmoscope. 3. Appearance by oblique illumination.



1 2 3

CORTICAL CATARACT.

1. Section of lens; opacities beneath the capsule. 2. Opacities as seen by the ophthalmoscope. 3. Opacities as seen by oblique illumination.

in which the opacity is confined to one pole of the lens. **c., pseudomembranous,** a condition marked by white spots on the lens due to iritis. **c., pupillary,** congenital closure of the pupil. **c. pyramidal,** one in which the opacity is at the anterior pole and is conoid, the apex extending forward. **c., recurrent capsular, c., secondary,** capsular cataract appearing after the extraction of the lens. **c., ripe.** See *c., mature.* **c., senile,** the cataract of old persons, the most frequent form, and that understood when not specified as *congenital, juvenile, traumatic, soft,* etc. **c., siliculose, c., siliquose.** See *c., arido-siliquose.* **c., soft,** a form occurring especially in the young; the lens-matter is of soft consistence and milky appearance. **c., spontaneous,** one not dependent upon some other lesion or disease. **c., stony,** one that has undergone degeneration and become of stony hardness. **c. spoon,** a spoon-shaped instrument used for removing a cataractous lens. **c., tremulous, c., vacillating,** one associated with laceration of the zonule of Zinn, causing trembling of the iris and of the cataract on movement of the eyeball. **c., true,** lenticular cataract. **c., unripe.** See *c., immature.* **c., zonular.** See *c., lamellar.*

cataractopiesis (*kat-a-rak-to-pi-e'-sis*). See *couching.*

cataractous (*kat-ar-ak'-tus*) [*cataract*]. Of the nature of or affected with cataract.

cataria (*kat-a'-re-ah*). See *catnep.*

catarrh (*kat'-ahr'*) [καταρρεῖν, to flow down]. Inflammation of a mucous membrane. The term is also applied to certain inflammations of the tubules of the kidney and the air-vesicles of the lung. **c., alveolar,** a condition occurring in bronchopneumonia in which the alveoli of the lungs contain a granular liquid exudate holding modified epithelial cells and blood-corpuscles. **c., atrophic nasal,** chronic nasal catarrh resulting in dryness and atrophy of the membrane. **c., dry,** bronchitis in which there are frequent, severe attacks of coughing, with pain and but little expectoration. **c., epidemic.** See *influenza.* **c., gastric,** gastritis. **c., hemorrhagic,** bronchial catarrh attended with a superficial extravasation of blood into the mucous tissue. **c., infectious,** that caused by pathogenic microorganisms either by direct invasion or by the effect of toxins generated by them. **c., intestinal,** enteritis. **c., intoxication,** that caused by chemical poison—(*a*) introduced with the ingesta; (*b*) developed from the ingesta through putrefaction; (*c*) that developed from the blood. **c., Laennec's.** 1. See *c., dry.* 2. See *c., pituitous.* **c., membranous nasal,** a form of nasal catarrh marked by the formation of a thick pseudomembrane. **c., mycotic,** that caused by a fungus. **c., nasal,** coryza. **c., papillary,** catarrh of the renal papillæ. **c., pituitous** (of Laennec), chronic serous bronchorrhea attended with copious secretion discharged by severe paroxysms of coughing. **c., pulmonary,** bronchitis. **c., rarefying dry** (of the nasopharynx), a state of malnutrition marked by pale, dry mucosa and at times the occurrence of varicose veins in the pharyngeal wall and about the orifices of the Eustachian tubes. **c., rose-,** hay-fever. **c., Russian,** influenza. **c., serous,** that marked by secretion consisting chiefly of a serous fluid. **c., suffocative.** Synonym of *capillary bronchitis.* **c., summer-,** hay-fever. **c., uterine,** endometritis. **c., vasomotor,** hay-fever. **c., vernal.** See *conjunctivitis, vernal.* **c., venereal.** Synonym of *gonorrhea.* **c., vesical,** cystitis.

catarrhal (*kat-ahr'-al*) [*catarrh*]. Of the nature of, affected with, or relating to catarrh. **c. fever.** Synonym of *influenza.* **c. inflammation,** an inflammation of an archiblastic surface, characterized by proliferation and desquamation of the epithelium.

catarrhectic (*kat-ar-ek'-tik*) [καταρρηκτικός] Purgative.

catastalsis (*kat-as-tal'-sis*). A term suggested by Cannon for the downward moving wave of contraction occurring in the stomach, during digestion. There is no preceding wave of inhibition.

catastaltic (*kat-as-tal'-tik*) [καταστέλλειν, to check, to send downward]. 1. Astringent. 2. Passing from above downward (as a nerve-impulse). 3. An inhibitory or sedative agent.

catastasis (*kat-as'-tas-is*) [κατάστασις, a settling]. Condition, state, habit; a decline, or quieting of symptoms; restitution, as of a displaced part.

catastate (*kat'-as-tāt*) [κατάστασις, settling down]. Any one of a series of successive catabolic states, substances, or conditions, each one of which is less complex, more stable, and exhibits less functional activity than its predecessor.

catastatic (*kat-as-tat'-ik*) [κατάστασις, a settling down]. Relating to catastasis, or a catastate.

catatonia (*kat-at-o'-ne-ah*) [κατά, down; τόνος, tension] A form of mental derangement progressing from melancholia successively through mania and stupidity to imbecility and tonic convulsions.

catatony (*kat-at'-o-ne*). See *catatonia.*

catatricrotism (*kat-ah-tri'-krot-izm*) [κατά, down; τρεῖς, three; κρότος, a striking]. The occurrence of a third pulsation in the downward stroke of the sphygmograph.

catatropia (*kat-ah-tro'-pe-ah*) [*kata-*; τρόπος, a turn]. An actual turning of both eyes downward.

catavertebral (*kat-ah-ver'-te-bral*) [κατα, down; *vertebral*]. Located on the side of the centrum of a vertebra next to the blood-vessels.

catching (*katsh'-ing*). Contagious, in the popular sense, *i. e.,* directly from one person to another, as scabies, ringworm, syphilis, gonorrhea, typhus, variola, diphtheria, and scarlatina.

catechin (*kat'-e-kin*) [*catechu*], $C_{31}H_{30}O_8 + 5H_2O$. Catechinic acid, the active principle of catechu. It crystallizes in snow-white, silky, shining needles.

catechol (*kat'-e-kol*). See *pyrocatechin.* **c. dimethylate, c. dimethyl-ether.** See *veratrol.* **c. monomethylate, c. monomethyl-ether.** See *guaiacol.*

catechu (*kat'-e-kū*) [E. Ind.]. An extract prepared from the wood of *Acacia catechu,* a native of the East Indies. It contains 50 % of tannic acid, and hence is a powerful astringent. It is used in the diarrhea of children and as a gargle and mouth-wash. Dose of the *powdered extract* 10 gr.–½ dr. (0.65–2.0 Gm.). The *catechu* of the Pharmacopeia of 1890 has been replaced by *gambir* (*q. v.*). **c., infusum** (B. P.). Dose 1–1½ oz. (30–45 Cc.). **c., pulvis, compositus** (B. P.), contains catechu, kino, and rhatany. Dose 20–40 gr. (1.3–2.6 Gm.).

catelectrode (*kat-el-ek'-trōd*). See *cathode.*

catelectrotonus (*kat-el-ek-trot'-o-nus*) [κατά, down; ἤλεκτρον, amber; τόνος, tension]. The state of increased irritability of a nerve near the cathode. See *anelectrotonus.*

catenating (*kat'-en-a-ting*) [*catenare,* to chain together]. Connecting; linking; *e. g., catenating* ague, ague associated with another disease.

catenoid (*kat'-en-oid*) [*catena*, chain; εἶδος, resemblance]. Resembling a chain.

catgut (*kat'-gut*). The intestine of various animals, particularly sheep, treated to make ligatures. **c., carbolized,** that made aseptic by soaking in phenol. **c., chromicized,** gut treated with chromium trioxide. **c.-plate,** a device for uniting intestinal edges in intestinal anastomosis. It is a solid catgut sheet, is thin, large, and flat, and resembles Senn's decalcified bone-plates.

catharma (*kath-ar'-mah*) [κάθαρμα, refuse; *pl.*, *catharmata*]. Excrement removed by purging.

catharsis (*kath-ar'-sis*) [καθαίρειν, to purge]. 1. Purgation. 2. Freud's term for a purging of a mental trauma by *abreaction*, *q. v.*

cathartate (*kath-ar'-tāt*). A salt of cathartic acid.

cathartic (*kath-ar'-tik*) [*see catharsis*]. 1. Purgative. 2 A medicine used to produce evacuations of the bowels; a purgative. **c. acid.** See *senna*. **c. pill, compound.** See under *compound*.

cathartin (*kath-ar'-tin*). A bitter principle found in rhubarb, senna and jalap.

cathartogenin (*kath-ar-toj'-en-in*). A substance got from cathartic acid by decomposition with hydrochloric acid. Syn , *cathartogenic acid*

cathartomannite (*kath-ar-to-man'-īt*). See *sennit*.

cat-head (*kat'-hed*). A term applied by Rosch to certain skulls the bones of which are too thin, the form rotund, with the occiput markedly projecting, while all prominences and muscular impressions are inconspicuous Cf. *apple head*

cathelectrotonus. See *catelectrotonus*.

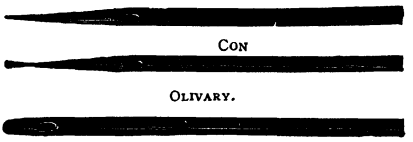
Cathelin's vesical divisor (*kat-lan'*) [Fernand *Cathelin*, French urologist]. An appliance for introduction into the bladder, which divides the bladder into two parts and separates the portion of urine coming from each kidney.

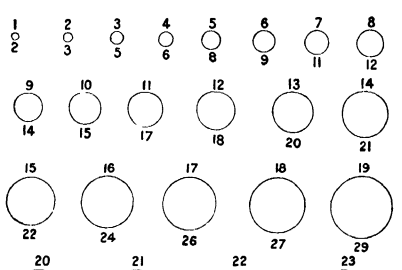
Cathelineau's sign. See *Tourette's disease*.

catheresis, cathæresis (*kath-er-e'-sis*) [καθαίρειν, to reduce]. 1. Prostration or weakness induced by medication. 2. Caustic action; it often designates a feebly caustic action.

catheretic (*kath-er-et'-ik*) [καθαίρειν, to reduce]. 1. Reducing; weakening; prostrating. 2. Caustic. 3. A reducing or caustic agent.

catheter (*kath'-et-er*) [καθετήρ, a thing put down]. 1. A hollow tube for introduction into a cavity through a narrow canal. 2. Specifically, one intended to be passed through the urethra into the bladder. **c. à demeure,** one which is retained in the urethra for a longer or shorter time. **c., Bozeman's,** a double-current uterine catheter. **c., Eustachian,** an instrument for examining, distending, or making applications to the Eustachian tube. **c. fever,** systemic disturbance with fever, following the introduction of a catheter into the urethra. **c. gauge,** a plate with holes used to estimate the size of a catheter. **c., Gouley's.** See *Gouley's catheter*. **c.-life,** life-long use of the catheter for emptying the bladder. **c., lung,** a soft-rubber tube that may be passed down the trachea. **c., Schroetter's.** See *Schroetter's catheter* **c., self-retaining,** one that will hold itself within the bladder without other appliances to assist it





The upper number indicates the sizes of American catheters: the lower, the French.

catheterism, catheterization (*kath'-et-er-izm, kath-et-er-iz-a'-shun*) [*catheter*]. To catheterize

catheterize (*kath'-et-er-iz*). To insert a catheter.

catheterostat (*kath'-et-er-o-stat*) [*catheter; στατός*, standing]. Stand for holding sterilized catheters.

cathion. Cation.

cathodal (*kath'-o-dal*) [κατά, down; ὁδος, way]. Relating to a cathode

cathode (*kath'-ōd*) [κατά, down; ὁδος, way]. The negative electrode or pole of an electric circuit.

cathodic (*kath-od'-ik*) [κατά, down; ὁδος, way]. 1. Relating to a cathode. 2. Proceeding downward; efferent or centrifugal (applied to a nerve-current or nerve-impulse).

catholicon (*kath-ol'-ik-on*) [καθολικόν, universal]. A universal remedy; a cure-all.

cathypnosis (*kath-ip-no'-sis*) [καθύπνωσις, a falling asleep]. Syn of *African lethargy*.

cation (*kat'-e-on*) [κατιόν, going down]. An electropositive element, *i. e.*, one which passes to or is evolved at the cathode in electrolysis

cativi, cativia [Carib for manihot-root]. A skin disease of Central America said to be caused by an animal parasite, and resembling in its lesions grated manihot-root.

catlin, catling (*kat'-lin, kat'-ling*) [dim of *cat*]. A long, pointed, two-edged amputating knife

catnep, catnip (*kat'-nep, kat'-nip*) [corruption of *catmint*]. The leaves and tops of the herb *Nepeta cataria*, a stimulant and tonic; a popular remedy for chlorosis, hysteria, etc. Dose of *fluidextract* 1–2 dr. (4–8 Cc.).

catochus (*kat'-o-kus*) [κάτοχος, a holding down]. 1. Catalepsy, coma-vigil. 2 death-like, trance.

catodont (*kat'-o-dont*) [κατά, down; ὀδόντ, tooth]. Possessing teeth only in the lower jaw

catoptric test. The diagnosis of cataract by means of the reflection of images from the cornea and lens-capsules

catoptrics (*kat-op'-triks*) [κάτοπτρον, a mirror] The laws of the reflection of light

catoptroscope (*kat-op'-tro-skōp*) [κάτοπτρον, a mirror; σκοπεῖν, to examine]. An instrument for examining objects by reflected light.

catoteric (*kat-o-ter'-ik*) [κατωτερικός, a carrying downward]. A purgative or cathartic.

catramin (*kat'-ram-in*). A turpentine obtained from *Tsuga canadensis* and other conifers. It is recommended as a stimulant, diuretic, and expectorant in chronic respiratory troubles, and

is used in tuberculosis and lupus subcutaneously and as an embrocation.

cat's ear. A deformed ear similar to that of a cat. **c.'s eye,** a morbid yellowish appearance of the fundus of the eye. **c.'s-eye pupils,** an elongated pupil.

cat's-purr. A peculiar purring bruit heard on auscultation, due to a defect of the mitral valve. Syn., *Frèmissement cataire.*

Cattani's serum (*kah-tah'-ne*) [Giuseppi *Cattani*, Italian pathologist, –1915]. A solution of sodium carbonate 3, and sodium chloride 4, in water up to 100.

cattle-plague. See *Rinderpest.*

catulotic (*kat-ul-ot'-ik*) [κατουλυέιν, to cause to cicatrize]. Promoting cicatrization.

cauda (*kaw'-dah*) [L.]. 1. A tail. 2. The part of a muscle forming its insertion. **c. cerebelli,** the vermiform process. **c. epididymidis,** the inferior part of the epididymis. **c. equina,** a term applied collectively to the roots of the sacral and coccygeal nerves, from their resemblance to a horse's tail. **c. helicis,** an appendage of the cartilage of the ear at the union of the helix and antihelix. **c. medullæ** (of Bartholin), a collective term for the oblongata and spinal cord. **c. muliebris,** the clitoris. **c. salax,** the penis. **c. striati,** the narrow posterior portion of the caudate nucleus.

caudad (*kaw'-dad*) [*cauda; ad,* to]. Toward the tail or cauda; opposed to cephalad; in man, downward.

caudal (*kaw'-dal*) [*cauda*]. 1. Pertaining to a cauda or tail. 2. Referring to a position near the tail end of the long axis of the body.

caudate (*kaw'-dāt*) [*cauda*] Having or resembling a tail. **c. lobe of liver,** a small lobe of the liver. **c. nucleus,** the intraventricular portion of the corpus striatum.

caudation (*kaw-da'-shun*) [*cauda*] 1. The condition of being furnished with a tail. 2. Elongation of the clitoris.

caudatolenticular, caudolenticular (*kaw-dat-o-lentik'-ū-lar, kaw-do-len-tik'-ū-lar*). Pertaining to both the caudate and the lenticular nuclei.

caudatum (*kaw-da'-tum*). See *corpus striatum.*

caudex (*kaw'-deks*) [L., "a tree-stem"]. 1. In biology, applied to the scaly, unbranching trunk of a palm-tree or tree-fern. 2. The main portion of the brain-stem, the fibers running from the spinal cord to the hemispheres of the brain **c. cerebri.** See *caudex* (2). **c. dorsalis.** 1. The spinal cord. 2. The oblongata. **c. encephali,** the cerebral peduncle. **c. encephali communis,** the oblongata and crus cerebri. **c. encephali pontilis,** the pons **c. medullaris,** the cerebral peduncle.

caudiduct (*kaw'-de-dukt*) [*cauda,* tail; *ducere,* to draw]. In biology, to draw or carry backward toward the tail.

caudiferous (*kaw-dif'-er-us*) [*cauda; ferre,* to bear]. Having a tail or tail-like appendage.

caudle (*kaw'-dl*) [ME., *caudel,* a warm drink]. A nutritious food for invalids. It is made as follows: Beat up an egg to a froth; add a glass of sherry and half a pint of gruel. Flavor with lemon-peel, nut-meg, and sugar.

caudocephalad (*kaw-do-sef'-al-ad*) [*cauda;* κεφαλή, the head]. In the direction from the tail towards the head.

caul (*kawl*) [ME., *calle,* a hood]. 1. A portion or all of the fetal membranes covering the head and carried out in advance of it in labor. 2. The great omentum.

cauliflower ear. Hematoma auris.

cauliflower excrescence. A tumor with an irregular surface resembling the cauliflower.

cauline (*kaw'-lin*) [καυλός, a stalk]. In biology, of or pertaining to the stem.

caulophyllin (*kaw-lo-fil'-in*) [καυλός, a stalk; φύλλον, a leaf]. A resinoid precipitate from the tincture of caulophyllum. See *caulophyllum.*

caulophyllum (*kaw-lo-fil'-um*) [καυλός, stalk; φύλλον, leaf]. Blue cohosh; "squaw-root," the rhizome and rootlets of *C. thalictroides,* growing in Canada and the northern United States. It contains a glucoside, *saponin,* and two resins, one of which is *caulophyllin.* It produces intermittent contractions of the gravid uterus, and possesses diuretic, emmenagogue, and antispasmodic powers. There are no official preparations. Dose of the *powdered drug* 5–20 gr. (0.32–1.3 Gm.); of *caulophyllin* 2–5 gr. (0.13–0.32 Gm.).

cauloplegia (*kaw-lo-ple'-je-ah*) [καυλός, a stalk; πληγή, a stroke]. Paralysis affecting the penis.

caulosterin (*kaw-los'-ter-in*) [καυλός, a stalk; στερέος, solid], $C_{28}H_{44}O$. An aromatic compound occurring in the root and stem of seedlings of the yellow lupine which have grown in the dark. It is levorotary, forming lustrous plates which melt at 158°–159° C.

cauma (*kaw'-mah*) [καύμα, a burning, *pl., caumata*]. Fever; heat; pyresis; an inflammatory fever; a burn. **c. enteritis,** synonym of intestinal catarrh, acute.

caumatic (*kaw-mat'-ik*) [καύμα, a burning]. Pertaining to cauma.

caumesthesia (*kaw-mes-the'-ze-ah*) [καύμα, heat; αἴσθησις, sensation]. A condition in which a person experiences a sense of heat, when the temperature is not high.

causalgia (*kaw-sal'-je-ah*) [καυσός, a burning; ἄλγος, pain]. The burning pain that is sometimes present in injuries of the nerves.

cause (*kawz*) [*causa,* a cause]. The sources, conditions and origins of a result. The preceding factors that unite to produce a given condition. Causes are spoken of as efficient, instrumental, final, primary, secondary, predisposing, controlling, determining, ultimate, exciting, etc. **c., antecedent.** See *c., predisposing.* **c., determining,** a cause that precipitates the action of another or other causes. **c., efficient, c., essential,** one that secures the effect independent of the action of other causes. **c., endopathic,** see *c., internal.* **c., exciting,** the immediately preceding and conditioning factor. **c., exopathic, c., external,** one that acts external to the organism **c., immediate,** see *c , proximate.* **c., internal,** a cause acting within the organism. **c., negative,** one consisting in the absence of some prophylactic condition. **c., predisponent, c., procatarctic,** see *c., predisposing.* **c., predisposing,** that which tends to the development of a condition. **c., primary, c., proximate,** that one of several causes which takes effect last and acts with rapidity. **c., remote, c., secondary,** an ultimate cause. **c., ultimate,** one that eventually comes into play aided by a proximate cause. **c., vital,** a specific pathogenic microorganism.

causoma (*kaw-so'-mah*) [καύσωμα; καίειν, to burn; *pl., causomata*]. A burning; usually an inflammation.

caustic (*kaws'-tik*) [*causticum,* caustic]. 1. Very irritant; burning; capable of destroying tissue. 2. A substance that destroys tissue. **c. alkali,** a pure alkaline hydrate or oxide. **c. arrows,**

conical sticks charged with caustic material. **c., lunar** (*argenti nitras fusus*, U. S. P.), silver nitrate. **c., metallic**, one containing a metal or a metallic salt. **c., mitigated** (*argenti nitras mitigatus*, U. S. P.), silver nitrate made less active by fusion with potassium nitrate or argentic chloride. **c., perpetual**, fused silver nitrate. **c. potash**, potassium hydroxide. **c. soda**, sodium hydroxide.

causticity (*kaws-tis'-it-e*) [*καίειν*, to burn]. Caustic quality; corrosiveness.

cauter (*kaw'-ter*) [*καυτήρ*, a burner]. A searing-iron or cautery-iron; any caustic application.

cauterant (*kaw'-ter-ant*) [*καυτήρ*, a burner]. 1. Caustic; escharotic. 2. A caustic substance.

cauterism (*kaw'-ter-izm*). See *cauterization*.

cauterization (*kaw-ter-iz-a'-shun*) [see *cautery*] The application of a cautery; the effect of such an application. **c., distant**, that performed by holding the cautery at some distance from the surface to be cauterized. **c., galvanochemical** (Apostoli's), the destruction of the mucosa by means of electrolytic action. **c., inherent**, deep cauterization by means of the actual cautery. **c., Neapolitan**, deep cauterization through an incision. **c., objective**. See *c., distant*. **c. by points, c., punctate**, deep cauterization with a pointed cautery. **c., slow**, that performed with moxa. **c., subcutaneous**, deep cauterization by injection of caustics or by inclosing the cautery in a tube so as not to affect the superficial parts. **c., tubular**, Tripier's operation of charring the walls of an opening made into a cyst by means of an instrument connected with the negative pole of a battery.

cauterize (*kaw'-ter-iz*) [see *cautery*]. To sear or burn with a cautery or a caustic.

cautery (*kaw'-ter-e*) [*καυτήριον*, a branding iron]. A metal instrument heated by the electric current or in a flame, used to destroy tissue or for producing counterirritation. Syn., *instorium*. **c., actual**, the white-hot iron. **c., button-**, an iron heated in hot water. **c., galvanic**, a platinum wire heated by electricity. **c., nummular**, a cautery iron fitted with a coin-shaped disc. **c., Paquelin's**. See *Paquelin's cautery*. **c., potential, c., virtual**, the application of caustic substances. **c., solar**, a lens for concentrating the rays of the sun upon a part to be cauterized. **c., steam**. See *atmocausis*. **c., thermo-**. See *thermocautery*.

cava (*ka'-vah*) [L.]. 1. A vena cava. 2. Any external cavity or hollow of the body.

caval (*ka'-val*) [*cava*]. 1. Relating to a vena cava. 2 Hollow.

cavalry-bone (*kav'-al-re-bōn*). A bony deposit in the adductor muscles of the thigh.

cavascope (*kav'-a-skōp*) [*cava; σκοπεῖν*, to view]. An apparatus for illuminating a cavity.

cavern (*kav'-ern*) [*caverna*, a hollow]. A cavity in the lung due to necrosis of the parenchyma; also the cavity of a dilated bronchus. **c., brand**, one due to gangrenous destruction of a circumscribed segment of the lung parenchyma.

cavernitis (*kav-er-ni'-tis*). Inflammation of the corpora cavernosa.

cavernoma (*kav-ern-o'-mah*) [*cavern; ὄμα*, a tumor]. A cavernous tumor; a cavernous angioma.

cavernosa (*kav-ur-no'-sah*). Plural of *cavernosum*, *q. v.*

cavernosum (*kav-ur-no'-sum*). The corpus cavernosum

cavernous (*kav'-er-nus*) [*cavern*]. Having hollow spaces. **c. angioma**, an angioma filled with blood-spaces. **c. bodies**, the corpora cavernosa of the penis. **c. breathing**, the breath-sounds heard over a pulmonary cavity. **c. groove**. the carotid groove. **c. plexus**. See *plexus, cavernous*. **c. rale**, See *rale, cavernous*. **c. sinus**, a venous sinus situated at the side of the body of the sphenoid. **c. tissue**, erectile tissue. **c. tumor**, a cavernous angioma.

caviar, or caviare (*kav-e-ar'*) [Fr.]. The salted hard roe of the sturgeon and other large fish.

cavitary (*kav'-it-a-re*) [*cavitarius*, hollow]. Hollow; having, or forming cavities. Applied to any nematode worm; any intestinal worm that has a body-cavity; a worm that is not anenterous.

cavitas (*kav'-it-as*) [L.]. A hollow, a cavity. **c. cochleata**. See *duct, spiral*. **c. glenoidalis**, the glenoid cavity. **c. pulpæ**, the pulp-cavity of a tooth. See *dental cavity*.

Cavité fever (*kah-ve-ta'*) [*Cavité*, a town in the Philippines]. An acute contagious disease confined almost exclusively to Cavité naval station in the Philippines. It is marked by sudden onset, high temperature, severe muscular pain, and extremely tender and painful eyeballs, the incubation period varying from two days to two weeks.

cavitis (*ka-vi'-tis*) [*cava; itis*, inflammation]. Inflammation of a vena cava.

cavity (*kav'-it-e*) [*cavum*]. A hollow. See under *abdominal, amniotic, cotyloid, glenoid, pulp*, and *serous*. **c., ankyroid**, the descending cornu of the lateral ventricle. **cavities, cerebral**, the ventricles of the brain. **c., cotyloid**, the acetabulum. **c., cranial**, the hollow of the skull. **c., epiploic**, the omentum. **c., nasal**, the nasal fossa. **c., oral**, that of the mouth. Syn., *cavum oris; spatium oris*. **c., pleural**, the closed space of the pleura included between its parietal and visceral layers. **c., pleuroperitoneal**, the celom or body-cavity. **c., preperitoneal**. See *Retzius' space*. **c., sigmoid**, one of two depressions on the head of the ulna for articulation with the radius and humerus.

cavo-valgus (*ka-vo-val'-gus*) [*cavus*, hollow; *valgus*, bow-legged]. Cavus combined with valgus. See *clubfoot*.

cavum (*ka'-vum*) [L.]. Any hollow or cavity, normal or pathological. **c. abdominis**, the cavity of the abdomen. **c. articulare**, joint cavity. **c. conchæ**, the deepest part of the concave surface of the concha. **c. dentis**, the pulp-cavity of a tooth. **c. epidurale**, epidural cavity. **c. laryngis**, cavity of larynx. **c. Meckelii**. See *Meckel's cavity*. **c. mediastinale anterius**, anterior mediastinal cavity. **c. mediastinale posterius**, posterior mediastinal cavity. **c. medullare**, the medullary canal of bones. **c. nasi**, nasal cavity. **c. oris proprius**, the cavity of the mouth proper. **c. pelvis**, pelvic cavity. **c. pericardii**, the pericardial cavity. **c. peritonæi**, the peritoneal cavity. **c. pharyngis**, cavity of pharynx. **c. pleuræ**, the pleural cavity. **c. Retzii**. See *Retzius's space*. **c. septi**, the embryonal fifth ventricle of the brain. **c. septi pellucidi**, cavity of septum pellucidum, the fifth ventricle **c. subarachnoideale**, the subarachnoid space. **c. thoracis**, thoracic cavity. **c. subdurale**, the subdural space, the interval between the dura mater and the arachnoid. **c. thoracis**, thoracic cavity. **c. tympani**, the tympanic cavity. **c. uteri**, the cavity of the uterus.

cavus (*ka'-vus*) [L.]. 1. A hollow; a cavity. 2. Talipes arcuatus; hollow-foot.

cayaponine (*ka-ap'-o-nēn*) [*Cayaponia*, Brazilian name]. An alkaloid extracted from *Cayaponia globosa*, a cucurbitaceous plant of Brazil. It is said to purge without griping. Dose 1 gr. (0.06 Gm.).

Cayenne pepper (*ki'-en*). See *capsicum*.

Cazenave's lupus (*kaz-nāv'*) [P. L. A. *Cazenave*, French dermatologist, 1795–1877]. Lupus erythematosus. **C.'s vitiligo.** See *Celsus' area*.

Cb. Chemical symbol of *columbium*.

C. C. C. Abbreviation of cathodal closure contraction; also written CaCC.

Cc., c.c. Abbreviations of *cubic centimeter*.

$CCl_3.CHO . H_2O$. Chloral hydrate.

$CCl_3.COOH$. Trichloracetic acid.

c. cm. Abbreviation for cubic centimeter; more frequently written c.c.

C. C. S. Abbreviation of Casualty Clearing Station.

CCTe. Abbreviation for cathodal closure tetanus.

Cd. Chemical symbol of *cadmium*.

Ce. Chemical symbol of *cerium*.

C. E. mixture. A mixture of 2 parts of chloroform with 3 parts of ether; used as a general anesthetic, and said to be preferable to the A. C. E. mixture in cases of thyroid enlargement, Ludwig's angina, sublingual abscess, and where the respiratory tract is encroached upon.

ceanothin (*se-an-o'-thin*). 1. A brown powder obtained from *Ceanothus americanus*. It is purgative and alterative, and is used in syphilis, dysentery, and sore throat. Dose 1–2 gr. (0.065–0.13 Gm.) 2. A resinoid isolated from *Ceanothus americanus;* slightly soluble in alcohol and ether.

cearin (*se'-ar-in*). An ointment-base consisting of carnauba wax, 1 part; paraffin, 3 parts, melted together and mixed with 4 times its weight of liquid petrolatum.

ceasma (*se-az'-mah*) [κέασμα, a chip; pl., *ceasmata*]. A splinter; a fissured state.

ceasmic (*se-az'-mik*) [κέασμα, a chip] Fissured; remaining in the primitive fissured state of the embryo

cebocephalia (*se-bo-sef-a'-le-ah*) [κήβος, a kind of monkey, κεφαλή, the head]. The condition of being cebocephalic.

cebocephalic (*se-bo-sef-al'-ik*) [κήβος, a kind of monkey, κεφαλή, the head]. Of the nature or appearance of a cebocephalus.

cebocephalus (*se-bo-sef'-al-us*) [κήβος, a monkey; κεφαλή, head]. A variety of single autositic monsters of the species *Cyclocephalus*, in which there is entire absence of the nose, with, however, two orbital cavities and two eyes, the region between the eyes being narrow and perfectly flat.

cebur (*se'-bur*). See *balsam, Tagulaway*

cecal (*se'-kal*) [*cecum*]. 1. Pertaining to the cecum. 2. Ending in a cul-de-sac.

cecectomy (*se-sek'-tom-e*) [*cecum;* τομή, a cutting]. Excision of the cecum.

cecitas (*se'-sit-as*) [L.]. Blindness.

cecitis (*se-si'-tis*) [*cecum;* ιτις, inflammation]. Inflammation of the cecum; typhlitis.

cecity (*ses'-it-e*) [*cæcus*, blind]. Blindness.

cecocele (*se'-ko-sēl*) [*cecum;* κήλη, hernia]. A hernia into the cecum. Syn., *typhlocele*.

cecograph (*se'-ko-graf*) [*cæcus*, blind; γράφειν, to write]. A writing-machine for the use of the blind.

cecopexy (*se'-ko-peks-e*) [*cecum;* πῆξις, fixation]. Fixation of the cecum by a surgical operation.

cecoplication (*se-ko-pli-ka'-shun*). An operation for the relief of dilated cecum, consisting in taking folds in its wall.

cecoptosis (*se-kop-to'-sis*) [*cecum;* πτῶσις, a falling]. A downward displacement of the cecum.

cecosigmoidostomy (*se-ko-sig-moid-os'-to-me*) [*cecum; sigmoid;* στόμα, a mouth]. The making of an anastomosis between the cecum and sigmoid.

cecostomy (*se-kos'-to-me*) [*cecum;* στόμα, a mouth]. The formation of an artificial anus in the cecum.

cecum, cæcum (*se'-kum*) [*cæcus*, blind]. The large blind pouch or culdesac in which the large intestine begins. **c. mobile,** abnormal mobility of the cecum, so that it can be pushed up out of its normal situation.

cecutiency (*se-ku'-shen-se*) [*cæcutire*, to become blind]. Tendency to, or the commencement of, blindness.

cedar (*se'-dar*) [*cedrus*, cedar]. One of the genus of coniferous trees, *Cedrus*. **c.-oil,** a transparent oil obtained from *Juniperus virginiana*, and used as a clearing agent in histology and for oil-immersion lenses.

Cedrela (*sed'-re-lah*) [κεδρελάτη, a cedar-fir tree]. A genus of trees found in tropical regions and allied to mahogany. **c. febrifuga,** of Southern Asia; **c. odorata,** bastard cedar, of tropical America (see *Cailcedra*). **c. rosmarinus,** of Indo-China, and **c. toona,** of India, are among the species that afford active medicines.

cedrene (*se'-drēn*) [*cedrus*, cedar], $C_{15}H_{24}$. A volatile liquid hydrocarbon found in oil of red cedar (see *Juniperus virginiana*), oil of cloves and oil of cubebs. **c. camphor,** $C_{15}H_{26}O$, a camphor that separates from the oil of red cedar.

cedrin (*se'-drin*) [*cedrus*, cedar]. A bitter crystalline substance obtained from cedron.

cedron (*se'-dron*) [*cedrus*, cedar]. The seeds of *C. simaba*, a popular external remedy in tropical America for the bites of venomous insects and serpents, and of reputed value in malarial fevers. Dose of the fluidextract ♏ j–viij.

cehasol. A preparation like ichthyol, produced by fractional distillation from fossil fish; it is used in various strengths in vaseline for skin diseases.

ceke (*the'-ke*). A Fiji term for elephantiasis of the scrotum.

Cel. Abbreviation for Celsius, scale of thermometer.

celandine (*sel'-an-dēn*). See *chelidonium*.

celarium, cœlarium (*se-la'-re-um*). The epithelium of the celom.

celastrine (*se-las'-trēn*). 1. Mosso's name for a poisonous alkaloid obtained from the leaves of *Catha edulis;* it resembles caffeine physiologically, though more energetic and differing essentially from it. Syn., *kathine*. 2. A bitter principle found by Dragendorff in the leaves of *Celastrus serratus*. 3. A substance forming minute white crystals found by Wayne in *Celastrus scandens*.

Celastrus (*sel-as'-trus*) [κήλαστρος, an evergreen tree]. A genus of trees and shrubs, nearly allied to *Euonymus*. *C. paniculatus* is a climbing shrub of India; the oil from the seeds (oleum nigrum) is a powerful stimulant and diaphoretic in gout and fever. *C. scandens*, of North America, is cathartic, diuretic, and alterative. *C. serratus* is a native of Abyssinia; the leaves are used in malaria; they contain tannin, a bitter principle, *celastrin*, and a volatile oil.

celation (*sel-a'-shun*) [*celatio*, a hiding]. The concealment of illness, of a birth, or of pregnancy.

cele (*sēl*) [κοιλία, cavity]. An encephalic cavity; used instead of ventricle.

-cele (*sēl*) [κήλη, a tumor]. A suffix denoting a tumor, or swelling, or hernia.

celectome (*se-lek'-tōm*) [*-cele*; ἐκτομή, excision]. An instrument for obtaining a piece of tissue from the interior of a tumor, for microscopical examinations.

celenteron (*se-len'-ter-on*). Same as *archenteron*, *q. v.*

celerina (*sel-e-rī'-nah*). A proprietary remedy said to contain celery, black haw, coca and kola.

celery (*sel'-er-e*) [σέλινον, a kind of parsley]. The stalk of *Apium graveolens*, or common garden celery. It contains *apiol*, *q. v.* It is reputed to be antispasmodic and nervine. Dose indefinite. **c. seed,** used to cover the taste of other drugs.

celia (*se'-le-ah*) [κοιλία, belly]. 1. The belly; the stomach. 2. A ventricle of the brain.

celiac (*se'-le-ak*) [*celia*]. Abdominal; pertaining to the belly. **c. artery.** Same as *c. axis.* **c. axis,** a branch of the abdominal aorta; it divides into the gastric, hepatic, and splenic arteries. See under *artery.* **c. disease,** a form of chronic indigestion generally occurring in children under five years of age, and characterized by offensive diarrhea. **c. ganglion.** See *ganglion, semilunar.* **c. passion,** painful diarrhea, or dysentery. **c. plexus,** a sympathetic nerve-plexus situated about the origin of the celiac axis.

celiaca (*se-lī'-ak-ah*) [κοιλία, the abdomen]. Diseases of the abdominal organs.

celiacomesenteric (*se-le-ak-o-mez-en-ter'-ik*). Relating to the celiac and mesenteric regions.

celiadelphus (*se-le-ad-el'-fus*) [κοιλία, belly; ἀδελφός, brother]. A monstrosity having two bodies joined at the abdomen.

celiagra (*se-le-ag'-rah*) [κοιλία, belly; ἄγρα, seizure]. Abdominal gout.

celialgia (*se-le-al'-je-ah*) [*celia*; ἄλγος, pain]. Pain in the abdomen.

celian, celine (*se'-le-an, se'-lin*). Same as *celiac.*

celianeurysm (*se-le-an'-ū-rizm*) [*celia*; ἀνεύρυσμα, a widening]. An abdominal aneurysm.

celiectasia (*se-le-ek-ta'-ze-ah*) [*celia*, ἔκτασις, a stretching-out]. Abnormal distention of the abdominal cavity.

celiectomy (*se-le-ek'-to-me*) [*celia*; ἐκτομή, a cutting]. Excision of an abdominal organ.

celiemia (*se-le-e'-me-ah*) [*celia*; αἷμα, blood]. Hyperemia of the abdominal viscera.

celiitis, cœliitis (*se-le-ī'-tis*) [*celia*; ιτις, inflammation] Inflammation of the abdominal organs.

celiocele, cœliocele (*se'-le-o-sēl*) [*celia*; κήλη, a hernia]. Abdominal hernia.

celiocentesis, cœliocentesis (*se-le-o-sen-te'-sis*) [κοιλία, belly; κεντήσις, puncture]. Puncture of the abdomen.

celiocolpotomy (*se-le-o-kol-pot'-o-me*) [κοιλία, the belly; κόλπος, vagina; τομή, incision]. Opening the abdomen through the vagina, for the removal of a tumor or other body.

celiocyesis (*se-le-o-sī-e'-sis*) [κοιλία, belly; κύησις, pregnancy]. Abdominal extra-uterine gestation.

celiodynia, cœliodynia (*se-le-o-din'-e-ah*) [*celia*; ὀδύνη, pain]. Pain in the abdomen.

celioelytrotomy (*se-le-o-el-e-trot'-o-me*) [κοιλία, the belly; ἐλύτρον, vagina; τομή, incision]. Same as celiocolpotomy, *q. v.*

celioenterotomy (*se-le-o-en-ter-ot'-o-me*) [κοιλία, the belly, ἔντερον, intestine; τομή, incision]. Opening the intestine through an incision in the abdominal wall.

celiogastrotomy (*se-le-o-gas-trot'-o-me*) [*celia*; γαστήρ, stomach; τομή, cutting]. The opening of the stomach through abdominal incision.

celiohemia, cœliohæmia. See *celiemia.*

celiohysterectomy (*se-le-o-his-ter-ek'-to-me*) [*celia*; ὑστέρα, womb; ἐκτομή, a cutting out]. 1. Excision of the uterus through an abdominal cut. 2. Porro-cesarean section

celiohysterotomy (*se-le-o-his-ter-ot'-o-me*). 1. Same as *cesarean section, q. v.* 2. Incision of the uterus through an abdominal cut

celiolymph (*se'-le-o-limf*) [κοιλία, a cavity; *lympha*, water]. The cerebro-spinal fluid.

celiomyalgia (*se-le-o-mī-al'-je-ah*) [κοιλία, belly; μῦς, muscle; ἄλγος, pain]. Pain in the abdominal muscles.

celiomyitis, cœliomyitis (*se-le-o-mī-ī'-tis*) [*celia*; μῦς, muscle; ιτις, inflammation]. Inflammation of the muscles of the abdomen.

celiomyodynia, cœliomyodynia (*se-le-o-mī-o-din'-e-ah*). See *celiomyalgia.*

celiomyomectomy (*se-le-o-mi-o-mek'-tom-e*) [κοιλία, the belly; *myoma*; ἐκτομή, excision]. Removal of a myoma (of the uterus) through an abdominal incision.

celioncus (*se-le-ong'-kus*) [κοιλία, the belly; ὄγκος, a swelling]. A tumor of the abdomen.

celioparacentesis (*se-le-o-par-ah-sen-te'-sis*) [κοιλία, belly; *paracentesis*]. Tapping, or paracentesis of the abdomen.

celiopyosis (*se-le-o-pī-o'-sis*) [κοιλία, belly; πίωσις, a suppuration]. Suppuration in the abdominal cavity.

celiorrhaphy (*se-le-or'-a-fe*) [κοιλία, the belly; ῥάφη, a seam]. Suture of the abdominal wall.

celiorrhea (*se-le-or-e'-ah*) [κοιλία, the belly; ῥέειν, to flow] Diarrhea.

celioschisis (*se-le-os'-kis-is*). [*celia*; σχίσις, fissure]. Congenital abdominal fissure.

celioscope (*se'-le-o-skōp*) [κοῖλος, a hollow; σκοπεῖν, to examine]. An apparatus for illuminating and inspecting body-cavities.

celioscopy, cœlioscopy (*se-le-os'-ko-pe*). Kelling's method of examining the peritoneal cavity by filling it with sterile filtered air through a hollow needle, plunging a trocar through the distended abdominal wall, and passing through the trocar a cystoscope by means of which the adjacent peritoneal surface may be inspected.

celiotomy (*se-le-ot'-o-me*) [*celia*; τομή, a cutting]. Surgical opening of the abdominal cavity

celitis (*se-lī'-tis*) [κοιλία, belly; ιτις, inflammation] Inflammation of the abdominal organs.

cell (*sel*) [*cella*, a small, hollow cavity]. 1. A granular mass of protoplasm containing a nucleus. The typical adult cell consists of protoplasm or cell-contents, a nucleus, and, within the latter, one or more nucleoli. The cell may or may not have a cell-wall. The *protoplasm* consists of two parts—the *spongioplasm* and the *hyaloplasm.* The *nucleus* is made up of a nuclear membrane, nuclear fibrils (*chromatin*), and nuclear matrix (*achromatin*). The *nucleolus* is a highly refracting body the function of which is not known. 2. A galvanic element or single member of a galvanic battery without the connecting wire between the metals. **c., acid.** Same as *c., delomorphous.* **c., acidophil,** one which attracts acid dyes. Syn., *oxyphil cell.* **c.s, adelomorphous,** epithelial cells composing the chief part of the lining of the glands of the stomach, particularly the pyloric region. They are supposed to secrete pepsinogen. Syn., *central cell; peptic cell.*

c., adventitial. 1. A branched cell peculiar to the perithelium. 2. A stellate cell of the membrana propria of glands. **c., air-.** See *air-cell.* **c.s, amacrine,** spongioblasts of the inner nuclear layer of the retina; they lack long processes, though sometimes axis-cylinder processes are given off which may extend into the nerve-fiber layer. The bodies of these cells are often partly in the inner molecular layer. **c., ameboid,** a cell capable of changing its form and of moving about like an ameba. **c., apolar,** a nerve-cell without processes. **c. basket,** a neuron from whose axis cylinder there project fibrils which surround another cell. **c., beaker-.** See *c. goblet-.* **c., binary nerve-,** two pyriform nerve-cells contained in a single sheath and each provided at its pointed end with a single nerve-fiber; these radiate in opposite directions **c.-body,** the mass of a cell. **c., bone-.** See *osteoblast.* **c., brush-.** See *Deiters' cells.* **c.s, calcigerous.** 1. Cells containing earthy salts found in dentine. 2. Mueller and Henle's name for the lacunæ of bone and their canaliculi. **c.-capsule,** a thick or unusually strong cell-wall. **c., central.** Same as *c., adelomorphous.* **c.s, centroacinar, c.s, centroacinous,** little cellular masses found in the interstitial connective tissue of the pancreas. Syn., *Langerhans' islets; Renaut's follicular points* **c., chromatophore,** a cavity directly beneath the epidermis containing pigment and changing its shape and color by means of attached radiating muscular bands **c., ciliated,** one provided with cilia **c., cleavage,** a segmentation-cell. **c., columnar,** one of the elongated cells forming columnar epithelium. **c.s., commissural.** See *c., heteromeral.* **c.-cones,** the cancernests of a squamous epithelioma—so called from their conical shape **c. cornocyte** (botany) A common cell. **c., constant,** the galvanic element of a constant battery **c. of Corti.** See *Corti's cell* **c.-cover,** the cuticular layer. **c., cover-.** See *c., tegmental* **c., cylindrical,** a variety of epithelial cell shaped like a miniature cylinder **c., cytochrome,** a nerve-cell having a cell-body very small in proportion to its nucleus **c., daughter-,** a cell originating from the division of the protoplasm of a mother-cell **c.s., decidual,** a proliferation of young connective-tissue cells above the uterine glands taking place after the ovum is impregnated. **c. of Deiters.** See *Deiters' cells.* **c.s., delomorphous,** Rollet's name for granular cells which stain deeply, occurring next the basement-membrane in the glands of the stomach in the cardiac region They are supposed to secrete acid. **c.s., demilune,** granular protoplasmic cells found in mucous glands, lying between the mucous cells and the basement-membrane. Syn., *cells of Gianuzzi.* **c., dentine, c., dentinal.** 1. An odontoblast. 2. One of the lacunæ in dentine similar to those in bone. 3. One of the bodies forming the matrix in dentine **c.-division.** See *karyokinesis* **c.-doctrine,** the theory that the cell is the unit of organic structure, and that cell-formation is the essential process of life and its phenomena. **c., elementary,** an embryonic cell; also a leukocyte. **c., embryo, c., embryonic,** one arising from the division of the ovum. Syn., *elementary cell; formative cell; primary cell; primitive cell, primordial cell.* **c.s, embryoplastic,** cells originating from the mesoblast and becoming stellate or fusiform; they comprise the fixed connective-tissue corpuscles in developing connective tissue. Syn., *fibroplastic bodies* or *cells.* **c.s, endothelial,** flat cells found on the inner surface of vessels and spaces that do not communicate directly with the external air. **c., epidermic, c., epithelial.** See *epithelium.* **c., epithelioid,** one of the flattened cells forming an epithelial or endothelial covering in forms of membranous connective tissue. **c.s, ethmoid,** the cellular cavities of the lateral masses of the ethmoid bone. Syn., *ethmoid sinuses.* **c., external ciliated.** See *Corti's cell.* **c., fiber-,** a cell elongated into a fiber. **c., fibrillated.** 1. See *Heidenhain's rods.* 2. One of the fibrillated cells lining the interlobular ducts of the salivary glands. **c.-fission,** cell-division. **c.s, follicular.** 1. Those of which the membrana granulosa is composed. 2. See *Sertoli's columns.* **c., formative.** Same as *c., embryonic.* **c.s, Foule's.** See *Foule's cells.* **c., fusiform,** a spindle-cell. **c., ganglion-,** a large nerve-cell, especially that found in the spinal ganglia. **c., germinal,** an epiblastic cell from which a neurone is derived **c., giant-,** large multinuclear cells occurring in tuberculosis and other infectious granulomata, in bone, in giant-cell tumors, etc. **c. of Gianuzzi.** See *c.s, demilune.* **c.s, glia-,** neuroglia. **c.-globulins,** Halliburton's name for forms of globulin that occur in lymph-corpuscles and can be extracted from them by solutions of sodium chloride. **c., goblet-,** an epithelial cell that has been bulged out like a goblet by the presence of mucin. **c.s, Golgi's.** See *Golgi's cells.* **c., Grove.** See *Grove's cell.* **c., guard.** See *guard.* **c., gustatory,** a taste cell. **c., hair.** See *hair.* **c., hecateromeric, c., hecatomeral,** a nerve-cell of the cinerea of the spinal cord whose processes divide into two, one going to each side of the cord. **c., heckle,** a prickle-cell. **c.s, Heidenhain's.** 1. See *c.s, delomorphous.* 2. See *c.s, adelomorphous.* **c., heteromeral, c., heteromeric,** a nerve-cell in the cinerea of the spinal cord, the axons of which pass through one of the commissures and enter the white matter of the other side of the cord. Syn., *commissural cell.* **c., histogenetic wandering,** a migratory connective-tissue cell or glandular cell; a wandering cell that is not a leukocyte. **c.s, horn-, c.s, horny,** those comprising the stratum corneum of the epidermis; they are homogeneous cells containing keratin, and are modified to form nails, hoofs, hair, etc. **c.s, imbricated,** those overlapping like roof-tiles. **c., indifferent,** a cell found in the walls the neural tube. **c.-islets,** the centers of most active growth in young cellular tissues. They contain the stores of nutriment that are gradually dissolved and digested. **c.s, v. Koelliker's.** See *v. Koelliker's cell.* **c.s, v. Koelliker's tract-.** See *v. Koelliker's tract-cells.* **c.s, liver-,** nucleated polyhedral or spheroidal cells containing granules of glycogen and pigment and more or less fat, forming the glandular substance of the liver. **c., locomotive** one endowed with power of movement, especially a ciliated cell. **c., lymphoid,** a small, round, connective-tissue cell containing a relatively large nucleus. **c., marrow,** an osteoblast. **c.s, mast-,** leukocytes containing coarse basophile granules. They are occasionally present in the peripheral circulation as the result of certain pathological influences, but are totally foreign to the normal blood of man. They are commonly found in the splenomedul-

lary type of leukemia. The granules of the mast-cell show an intense affinity for basic aniline dyes, toward which they react metachromatically. In view of their distinctive behavior toward selective stains for mucin, Harris suggests for the mast-cell the term *mucinoblast.* **c., mastoid,** one of the hollow air-spaces in the structure of the mastoid process. **c.s, medullary.** 1. Marrow-cells. 2. The ameboid cells of cartilage-bone. **c., mother-,** a cell that divides its protoplasm and gives each part a new cell-wall. **c., motor,** a nerve-cell generating impulses. **c., mucin-, c., mucous, c., mucus-,** a cell which secretes mucus, particularly a kind of salivary cell secreting mucus, but no albumin. **c.-multiplication,** cytogenesis, a name given to the process of reproduction of cells. It may be *direct,* as when a cell constricts and cuts off a part of itself, or *indirect,* when the division is preceded by the cycle of nuclear changes known as karyokinesis. **c.s, muscle-,** a general term for cells the substance of which is contractile. **c., myeloid.** 1. See *myeloplax.* 2. Applied, from its resemblance to a cell of the red marrow of bone, to one of the oval multinuclear cells of myeloid tumors. **c., naked,** one unprovided with a cell-wall. **c.-nests,** a collection of epithelial cells closely packed together and surrounded by a connective-tissue stroma. Cell-nests are found in carcinoma. **c., neuroglia,** one of the cells of the neuroglia; flat, round cells, especially numerous about blood-vessels and the pia mater. **c., neutrophil.** See *c., acidophil.* **c., nuclear,** a nucleated dendritic nerve-cell. **c., nucleated,** a cell containing one or more nuclei. Syn., *karyota.* **c.-nucleus,** the cytoblast; the areola. **c.s, oxyntic.** See *c.s, delomorphous.* **c., oxyphil.** See *c., acidophil.* **c.s, palatine,** the cells formed by the junction of the palatine and ethmoid bones. **c., parietal.** Same as *c., delmorphous.* **c., peptic.** Same as *c., adelomorphous.* **c., pigmented,** one containing granules of pigment. **c., pillar,** a peculiar S-shaped cell with a striated body, found in the organ of Corti. **c.s, plasma-.** 1. (Of Unna.) Cubic or rhombic cells, the protoplasm of which stains deeply with methylene-blue, while the nucleus, which has usually an eccentric situation, is readily decolorized (by creosote or styrone) They are probably derived from lymphocytes, and play an important part in inflammatory reactions, especially in granulomatous processes 2. (Of Waldeyer.) Nucleated cells of varying size and shape, with voluminous, coarsely granular protoplasm, found in connective tissue, especially about the blood-vessels. **c.-plate.** 1. The equatorial plate in which division of the nucleus occurs during karyokinesis. 2. (Of Strasburger.) The equatorial thickening of the spindle-fibers from which the septum arises during the mitosis of plant-cells. **c.-plate, subendothelial,** a small granular cell of unknown function occurring in the intima of blood-vessels. **c., polar.** See under *polar.* **c., porous.** 1. One containing an opening in the side. 2. A porous jar containing one of the liquids of a galvanic battery. **c., prickle-.** See *prickle-cell.* **c., primary.** 1. An embryonic cell. 2. Any undifferentiated cell. **c., protective.** See *c., tegmental.* **c.s, pseudoplasma,** cells found in normal human spleen and differing from plasma-cells in that they are larger, and possess twisted nuclei which do not present the characteristic chromatin arrangement. They appear to be a variety of large mononuclear leukocyte, the protoplasm of which has become basophilic. **c.s, Ranvier's.** See *Ranvier's cells.* **c., rhagiocrine.** Same as *macrophage.* **c., roof.** 1. See *c., tegmental.* 2. One found on the convexity formed by the junction of the two rows of arches in the organ of Corti. **c., salivary,** one of those forming the lining of the alveoli of the salivary glands. **c.-sap,** the more fluid part of the cell-contents. **c., sarcogenic,** an embryonic cell which develops into a muscular fiber. **c., segmentation.** See *blastomere.* **c.s, sense-, c.s, sensory,** those adapted for the reception and transmission of sensory impressions. **c.s, sensory epithelial,** modified epithelial cells in an organ of sense connected with the fibrils of the nerves of that organ. **c., sensory nerve-,** a nerve-cell the axis-cylinder process of which is supposed to be continued as a sensory nerve. **c., septate,** one with a septum across its lumen. **c., serous fat-,** a fat-cell occurring in emaciated individuals, in which the fat is reduced to a few small globules and in its place there is a pale protoplasm mixed with a mucoid fluid; the cell is no longer spherical. **c., simple,** one which has not undergone differentiation. **c., sister-,** one formed simultaneously with another in the division of a mother-cell. **c., Sorby tubercular.** See *Sorby's cell.* **c.-spaces.** See *Recklinghausen's canals.* **c., sperm,** a spermatozoon; a spermatoblast. **c., spider-.** See *Desters' cells.* **c., spindle-,** a cell having a fusiform shape. **c., spiral fiber-,** a motor cell of the heart, having a spiral fiber coiled around a larger straight one. The cell constantly disengages the excitation which the spiral fiber transmits to the heart-muscle. Syn., *Beale's cell; spiral fiber ganglion-cell.* **c.s, splanchnic,** those of the splanchnic layer of the mesoderm. **c.s, squamous,** a variety of epithelial cells found on the surface of the skin and certain mucous membranes and characterized by their scale-like flatness. **c.-stations,** cells in the sympathetic ganglion around which the nerve-fibers arborize. **c., sterile,** one occurring in a reproductive organ, but not participating in reproductive processes. **c.s, Stilling's.** See *Stilling's cells.* **c.s, stroma,** those forming the mass of an organ. **c., swarm,** a naked ciliated cell. **c., sympathetic,** a nerve-cell of the sympathetic nervous system as distinguished from one of the cerebrospinal system. **c., tapetal, c., tapetum,** one which forms or aids others in forming an investment over an organ. **c., taste,** a spindle-shaped cell in taste-buds. **c., tegmental,** one covering and protecting another cell of special function, as, *e. g.,* those forming the outer layer of the taste-buds. Syn., *cover-cell* **c.-theory,** the doctrine that cell-formation is the essential biogenetic element. **c., twin,** a single cell resulting from the fusion of two cells. **c., two-fluid,** a galvanic element in which two fluids are used. **c., vasofactive, c., vasoformative,** a cell that anastomoses with other similar cells so as to form blood-vessels. **c.s, vortex,** Meyer's term for cortex cells which show a peculiar whorl-like and very regular arrangement of the chromophilic material. **c.-wall,** the membrane surrounding a cell. **c., wandering,** a leukocyte. **c., whip-,** a cell furnished with flagella. **c., zinc-carbon,** a galvanic cell in which zinc and carbon are the two elements

employed. **c., zinc-copper,** a galvanic cell in which zinc and copper are the elements employed.

cella (*sel'-ah*) [L.]. 1. A cell. 2. A portion of the paracele extending caudad from the porta. **c. lateralis,** the lateral ventricle of the brain, or one of its cornua. **c. media,** the central cornu of the lateral ventricle, or that part of the ventricle whence the cornua extend. **c., turcica.** See *sella turcica*. **c. of Wilder.** Same as *c. media*.

cellase (*sel'-ās*). A ferment which acts on cellose.

cellasin (*sel'-as-in*). Trade name of a ferment which is said to split sugar, starch, fat and peptone.

cell-color ratio. The result of dividing the percentage of erythrocytes by the percentage of hemoglobin.

celliferous (*sel-if'-er-us*) [*cella*, cell; *ferre*, to bear]. Producing, forming, or bearing cells.

celloid (*sel'-oid*) [*cella*, a cell; εἶδος, form]. Resembling a cell.

celloidin (*sel-oid'-in*) [*cell; εἶδος*, form]. A concentrated form of collodion for use in embedding objects for histological purposes.

cellon (*sel'-on*). Tetrachlorethane, used as a solvent for cellulose; its fumes cause malaise, drowsiness, and jaundice.

cellose (*sel'-ōs*). A substance derived from cellulose by hydrolysis.

cellotropin (*sel-ot'-ro-pin*). Monobenzoyl arbutin, obtained from the action of benzoyl chloride upon arbutin in neutral solution. Used in the treatment of tuberculosis and scrofula.

cellu flour (*sel'-ū*). Trade name of a cellulose flour, said to be a commercially pure cellulose in the form of flour.

cellula (*sel'-ū-lah*). See *cellule*.

cellular (*sel'-ū-lar*) [*cella*, cell]. Relating to or composed of cells. **c. cartilage,** cartilage composed mainly of large cells, with but little intercellular substance. **c. membrane, c. tissue,** areolar tissue; bony connective tissue; cancellous tissue. **c. pathology.** See *pathology, cellular* **c. therapy,** the name applied by Aulde to the method in therapeutics of exhibiting properly-selected medicaments with a view to restoration of cell-function. It aims to apply scientifically those remedies that experience has shown to possess special curative properties in the restoration of disordered functions.

cellule (*sel'-ūl*) [*cellula*, a small cell]. A small cell.

cellulic (*sel'-ū-lik*). Relating to cells; derived from cell-walls by action of acid or alkalies.

cellulicidal (*sel-ū-lis'-id-al*) [*cellule; cædere*, to kill]. Destructive to cells.

celluliferous (*sel-ū-lif'-er-us*) [*cellula*, a little cell; *ferre*, to bear]. In biology, producing small cells.

cellulifugal (*sel-ū-lif'-ū-gal*) [*cellule; fugere*, to flee]. Pertaining to the transmission of impulses from a nerve-cell.

cellulin (*sel'-u-lin*). Same as cellulose, *q. v.*

cellulipetal (*sel-ū-lip'-e-tal*) [*cellule; petere*, to *seek*]. Relating to the transmission of impulses toward a nerve-cell.

cellulitis (*sel-ū-lī'-tis*) [*cellule; ιτις*, inflammation]. A diffuse inflammation of cellular tissue. Syn., *ethmyphytis*. **c., ischiorectal,** inflammation of the cellular tissue lying below the anal levator muscle or anal fascia. **c., pelvic.** See *parametritis*. **c., pneumococcous,** that due to the invasion of pneumococci.

celluloadipose (*sel-ū-lo-ad'-ip-ōs*). Relating to loose connective tissue containing fat-cells.

cellulocutaneous (*sel-ū-lo-ku-ta'-ne-us*) [*cellule; cutis*, skin]. Relating to cellular tissue and the skin.

cellulofibrinous (*sel-ū-lo-fī'-brin-us*). Both cellular and fibrinous.

celluloid (*sel'-ū-loid*) [*cellula*, a little cell; *εἶδος*, form]. A product of the action of camphor upon pyroxylin.

celluloneuritis (*sel-ū-lo-nū-rī'-tis*). Inflammation of nerve cells.

cellulosa (*sel-ū-lo'-sah*) [L.]. A cellular coat. **c. chorioideæ,** the external layer of the choroid coat of the eye.

cellulose (*sel'-ū-lōs*) [*cellule*]. $C_{12}H_{20}O_{10}$. Woodfiber; lignose, the principal ingredient of the cell-membranes of all plants. It is a white, amorphous mass, insoluble in most of the usual solvents. **c., reagent for.** See *Schultze, Schweitzer*.

cellulosity (*sel-ū-los'-e-te*). The condition of being cellular.

celology (*sel-ol'-o-je*) [*κήλη*, hernia; *λόγος*, science]. That branch of surgical science that treats of hernia.

celom, celoma (*se'-lom, se-lo'-mah*) [*κοίλωμα*, a cavity]. The embryonic body-cavity.

celophlebitis (*se-lo-fle-bi'-tis*) [*κοῖλος*, hollow; *φλεψ*, vein; *ιτις*, inflammation]. Inflammation of a vena cava.

celophthalmia (*se-loff-thal'-me-ah*) [*κοῖλος*, hollow; *ὀφθαλμός*, eye]. Hollowness of the eyes.

celoscope (*se'-lo-skōp*) [*κοῖλος*, hollow; *σκοπεῖν*, to observe]. An instrument for examining a cavity of the body by means of the electric light, enclosed in a flask and mounted upon a glass shank.

celosis (*se-lo'-sis*) [*κοῖλος*, hollow] The formation of any cavity. **c., endocytic,** the formation of a cavity within a cell. **c., paracytic,** the formation of a cavity between cells.

celosoma (*se-lo-so'-mah*) [*κοῖλος*, hollow; *σῶμα*, the body]. A species of single autositic monsters characterized by more or less extensive body-cleft, with eventration, associated with various anomalies of the extremities, of the genitourinary apparatus, of the intestinal tract, and even of the whole trunk.

celosomia (*se-lo-so'-me-ah*) [*κήλη*, hernia; *σῶμα*, body]. Congenital protrusion of the viscera, with defect of the thoracic or abdominal walls.

celosomus (*se-lo-so'-mus*) [*κήλη*, a hernia; *σῶμα*, the body]. A monster with fissure or absence of the sternum and hernia of the thoracic or abdominal organ.

celostomia (*se-lo-sto'-me-ah*) [*κοῖλος*, hollow; *στόμα*, mouth]. Hollowness of the voice.

celotome (*se'-lo-tōm*) [*κήλη*, hernia; *τέμνειν*, to cut] A hernia-knife.

celotomy (*se-lot'-o-me*) [*κήλη*, hernia; *τέμνειν*, to cut]. The operation for strangulated hernia by incision of the stricture.

Cels. Abbreviation for *Celsius;* the Celsius scale of the thermometer.

Celsius scale [Anders *Celsius*, Swedish astronomer, 1701–1744]. A term sometimes (but erroneously) employed for the centigrade scale on the thermometer. It is the reverse of the centigrade scale, having the freezing-point at 100° and the boiling point at 0°.

Celsus' area (*sel'-sus*) [Aulus Cornelius *Celsus*, Roman physician and writer, 1st century, A.D.]. Alopecia areata. **C.'s chancre,** the

soft chancre or chancroid. **C.'s kerion,** suppurating ringworm, a pustular inflammation of the hair-follicles of the scalp in tinea tonsurans. **C.'s papules,** a form of acute papular eczema.

celtium-hafnium. See *hafnium.*

CELSUS, 1ST CENTURY A. D.

cement (*se-ment'*) [*cæmentum,* a rough stone]. 1. Any plastic material capable of becoming hard and of binding together the objects that are contiguous to it. 2. Filling-material for the teeth. 3. The crusta petrosa of the teeth. **c.-substance,** the substance holding together the endothelial cells of the intima of blood-vessels

cementation (*sem-en-ta'-shun*) [*cement*]. 1. A process of causing a chemical change in a substance by surrounding it with the powder of other substances and exposing the whole to red heat in a closed vessel for a length of time. 2. In biology, the concrescence of hyphæ.

cementinification (*se-men-tin-e-fik-a'-shun*). The formation of cementum about the dental root.

cementoblast (*se-ment'-o-blast*) [*cæmentum,* cement; βλαστός, germ]. A cement-corpuscle in tooth-tissue; more correctly, an osteoblast that takes part in the development of the dental cement.

cementodentinary (*se-ment'-o-den'-tin-a-re*) [*cæmentum,* cement; *dens, dentis,* a tooth]. Relating to the cement and dentine of a tooth.

cementoma (*se-ment-o'-mah*) [*cæmentum,* cement; ὄμα, tumor; *pl., cementomata*]. A tumor thrown out by the irritated alveolar periosteum.

cementoperiostitis (*se-men-to-per-e-os-ti'-tis*). Same as *pyorrhœa alveolaris.*

cementosis (*sem-en-to'-sis*). The development of a cementoma.

cementum (*se-ment'-um*). A layer of bone developed by ossification of the dental follicle over the root of the tooth. It differs from ordinary bone by the greater number of Sharpey's fibers in it. Its development begins on the milk-teeth during the fifth month.

cenadelphus, cœnadelphus (*sen-a-del'-fus*) [κοινός, common; ἀδελφός, a brother]. A double monster with the halves equally developed or having one or more vital organs in common.

cenencephalocele (*sen-en-sef-al'-o-sēl*) [κενος, empty; ἐγκέφαλος, brain; κήλη, tumor]. A protrusion of pure brain substance through a cranial fissure.

cenesthesia, cenæsthesia (*sen-es-the'-ze-ah*) [κενός, destitute; αἴσθησια, perception]. Hysterical loss of consciousness of identity.

cenesthesis (*sen-es-the'-sis*) [κοινός, common; αἴσθησις, feeling]. A sense of existence, either painful or pleasurable. It is the prevailing conscious state of feeling either of depression or of exaltation, which is the resultant of the subconscious organic sympathies of the whole organism. It does not exceed physiological limits so long as it does not exclude the normal exercise of mental functions.

cenesthetic, cœnesthetic (*sen-es-thet'-ik*). Relating to cenesthesis.

cenogenesis, cenogeny. See *kenogenesis.*

cenophobia. See *kenophobia.*

cenosis (*sen-o'-sis*) [κένωσις, a draining]. 1. Evacuation; apocenosis. 2. Inanition.

cenotic (*sen-ot'-ik*) [κένωσις, a draining]. 1. Causing cenosis; drastic; purgative. 2. A drastic drug or agent.

Cent. Abbreviation for *centigrade* and *centimeter.*

Centaurea (*sen-taw'-re-ah*) [κένταυρος, centaur]. A genus of composite-flowered herbs. See *carduus.*

centaury (*sen'-taw-re*) [*centaurea*]. A popular name for various plants of the genera *Centaurea. Erythræa, Sabbatia, Chlora,* etc., especially *Erythræa centaurium,* which is used as a simple, bitter tonic. Dose ½–1 dr. (2–4 Cc.) in decoction several times a day.

center (*sen'-ter*) [*centrum,* the center]. 1. The middle point of any surface or of a body. 2. The ganglion or plexus whence issue the nerves controlling a function. **c., accelerating,** a center in the medulla sending accelerating fibers to the heart. These leave the cord through the branches of communication of the lower cervical and upper six dorsal nerves, passing thence into the sympathetic. **c., anovesical,** one in the spinal cord near the point of origin of the third and fourth sacral nerves. Incontinence of urine and feces is due to paralysis of this center. **c., arm,** the cortical center controlling the movement of the arm, supposed to be in the cortex occupying the middle third of the anterior central gyrus as well as the base of the superior and middle frontal gyri. **c., articulate language,** the speech-coordinating center, which is supposed to include Broca's gyrus, the anterior gyri of the insular, the intervening cortical area, the supramarginal gyrus, the first temporal gyrus, and the angular gyrus. **c., association.** See *association.* **c., auditory,** a center in the first temporosphenoid convolution upon each side. **c., Broca's.** See *c., speech.* **c., cardiac.** 1. One in the lower cervical and upper dorsal portions of the spinal cord which controls the movements of the heart. 2. That portion of the oblongata embracing the cardio-accelerator and cardioinhibitory centers. **c., cardio-accelerator,** that of the spinal cord which through the cardiac nerves and plexus sends impulses to the heart, causing it to beat more rapidly. These impulses are not constantly emitted, as are the inhibitory

impulses which travel by the pneumo-gastric. **c., cardioinhibitory,** in the medulla, efferent impulses being carried by the vagus. **c., cerebral inspiratory,** one said to exist in the thalamus, which by direct stimulation causes deeper and more rapid inspirations. **c., cerebrospinal,** the cerebrospinal axis. **c., ciliospinal,** connected with the dilatation of the pupil, it is in the lower cervical part of the cord, and extends downward, from the first to the third dorsal. **c., color,** a center for perception of colors, said to be situated in the occipital cortex anterior to the apical region. **c., convulsional,** a hypothetical center said to lie in the floor of the fourth ventricle. **c., coordinating,** the cerebellum, the ganglia at the base of the brain, and in some degree the cinerea of the spinal cord, are regarded as controlling coordination. **c., cortical,** the parts of the cerebral cortex concerned in motor, sensory, and psychic functions. **c., coughing,** in the medulla, above the inspiratory center. **c., deglutition.** See *c., swallowing.* **c., deputy,** a secondary ganglion-cell in the spinal cord; also a nucleus of one of the cranial nerves. **c., diabetic,** in the posterior part of the anterior half of the floor of the fourth ventricle, in the median line. **c., epiotic,** the ossification center of the mastoid portion of the temporal bone. **c., erection.** See *c., genitourinary.* **c., excitomotor,** the sensitive centers of the brain considered as one; these are the crura, the pons, the oblongata, the deeper parts of the cerebellum, and the corpora quadrigemina. **c.s, facial movement,** one in the ascending frontal gyrus and one in the angular gyrus. **c., genitourinary,** one in the lumbar portion of the spinal cord, but controlled from the medulla, controlling erection of the penis and emission of semen. **c., glycogenic,** the diabetic center. **c., half-vision,** one in the apex of the occipital lobe, receiving impressions from corresponding halves of the two retinæ. **c., head and neck movement,** one in the posterior end of the second frontal gyrus and in the corresponding part of the first frontal gyrus. **c., heat-regulating, c., temperature,** the center for the control of body-temperature. See *c., thermotaxic.* **c., higher visual,** one regarded as lying in the angular gyrus, in which there is effected a combination of the impressions received from the half-vision centers, making a complete image. **c., Hitzig's.** See *Hitzig's center.* **c.s of inhibition, c., inhibitory.** See *c.s of moderation.* **c., inspiratory.** 1. A reflex center in the oblongata forming part of the respiratory center. 2 See *c., cerebral inspiratory.* 3. A reflex center in the post-geminum. **c., intracardiac,** three small nerve-ganglia connected with the cardiac plexus, to which is due the automatic beating of the heart after separation from the body **c., kinesthetic,** one in the third left frontal convolution presiding over the motor element in speech. **c., laryngeal cortical,** one in the posterior end of the inferior frontal gyrus. **c., leg,** one in the upper portion of the ascending frontal convolution. **c. for mastication and sucking,** one in the medulla. **c., median** (of Luys). See *Luys, nucleus of.* **c., medullary.** 1. The interior white matter of the cerebral hemispheres. 2. See *c., neural.* **c.s of moderation, c.s, moderator,** nervous centers in the spinal cord and the cerebral peduncle which restrain, generally by reflex action, various functions of the body. **c., motor,** a nervous center controlling motion. **c., musculotonic,** that which is continually discharging impulses which keep the muscular system in a condition of slight contraction. It is regarded by some as a special center of the cord, but it is questionable whether this condition is attributable to any special center rather than to the action of all those cells whose function it is to send out motor impulses **c., nerve-, c., nervous,** any group of nerve-cells acting in unison for the performance of some function **c., neural,** in the embryo, that part of the epiblast ultimately developing into the brain and spinal cord. **c., nutrition.** See *c., trophic.* **c., olfactory,** probably in the hippocampal region of the temporal lobe. **c., opisthotic,** the center of ossification of petrous bone. Huxley's name for the part of the periotic cartilage surrounding the fenestra rotunda and the cochlea. **c. of ossification,** the place in bones at which ossification begins. **c., parenchymatous nerve-,** Körner's name for a nerve-cell existing in the substance of an organ and controlling its action. **c., parturition,** in the spinal cord, at the level of the first and second lumbar vertebræ. **c., peristaltic,** one in the oblongata controlling peristalsis. **c., phonation.** See *c., laryngeal cortical.* **c., psychomotor,** that portion of the cortex from which motor impulses originate. **c., psychosmic,** the olfactory center. **c., reflex,** any nerve-cell of group of cells in the brain, cord, or ganglionic system which receives an impression through centripetal nerve-fibers and transforms it into an impulse which is transmitted through centrifugal nerve-fibers. **c., respiratory,** in the medulla, between the nuclei of the vagus and accessorius. **c. for secretion of saliva,** on the floor of the fourth ventricle. **c., Setschenow's.** See *Setschsenow's center.* **c., sneezing,** in the medulla **c., spasm,** in the medulla, at its junction with the pons. **c., speech,** in the third left frontal convolution in right-handed people; probably the island of Reil has some influence also. **c., sudoral.** See *c., sweat.* **c., supreme,** Spitzka's name for the cortical centers of the brain as a whole. **c., swallowing,** on the floor of the fourth ventricle. **c., sweat,** the dominating center is in the medulla, with subordinate centers in the spinal cord. **c., tactile,** one for the sense of touch, located by Ferrier in the hippocampus and the gyrus hippocampus. **c., thermal cortical,** one discovered in the cerebral cortex of the dog, stimulation of which caused a change in the temperature of the opposite limbs. **c., thermo-excito-, c., thermogenic.** 1. A hypothetical center of the cord concerned in the changes in body-temperature. 2. The mesial portion of the striatum and the parts directly beneath it. **c., thermotaxic,** six heat-regulating cerebral centers; of the four principal centers, one is located in the caudatum, one in the subjacent cinerea, one in the cinerea surrounding the most anterior portion of the third ventricle, and one at the anterior inner extremity of the thalamus. **c., trophic,** a nerve-center regulating nutrition. **c., upper, for dilator pupillæ,** in the medulla. **c.s, vascular, c.s, vaso constrictor,** centers in the cord controlling the contractility of the smaller blood-vessels. **c., vaso dilator,** in the medulla. **c., vasomotor,** in the medulla. **c., visual,** in the occipital lobe, especially in the cuneus. **c., vomiting,** an area in the oblongata concerned in the reflex act of vomiting; stimulation of the terminal filaments of the vagi excites

its action. **c., winking,** the reflex center concerned in winking, situated in the oblongata. **c.s, word-.** 1. One in the left superior temporosphenoid gyrus controlling the perception of words heard. 2. A center in the posterior part of the left parietal lobe and one in the second left frontal gyrus governing the perception of printed or written words.

centering (*sen'-ter-ing*) [*center*]. In microscopy, the arrangement of an object or an accessory so that its center coincides with the optical axis of the microscope. In optics, having the pupil and the optic center of the refracting lens in the same axis.

centesimal (*sen-tes'-im-al*) [*centum*, a hundred]. In the proportion of 1 to 100.

centesis (*sen-te'-sis*) [κέντησις, a pricking]. Puncture; perforation.

centi- (*sen-ti-*) [*centum*]. A prefix meaning one hundred.

centibar (*sen'-te-bar*). A unit of atmospheric pressure; it is the one-hundredth part of a bar.

centifidous (*sen-tif'-id-us*) [*centi-; findere*, to split]. Cleft into many or 100 parts.

centigrade (*sen'-te-grād*, [*centi-; gradus*, a step]. Having 100 divisions or degrees. Abbreviation, C. **c. thermometer,** a thermometer with zero as the freezing-point and 100° as the boiling-point of water. See under *thermometer*.

centigram, centigramme (*sen'-te-gram*) [*centi-; γράμμα*, a small weight]. The hundredth part of a gram, equal to 0.154328 gr. troy.

centiliter (*sen'-til-e-ter*) [*centi-; λίτρα*, a pound]. The hundredth part of a liter, equal to 0 6102 of a cubic inch.

centimeter (*sen'-tim-e-ter*) [*centi-; μέτρον*, a measure]. The hundredth part of a meter, equal to 0.3937 (or about $\frac{2}{5}$) of an inch.

centinormal (*sen-te-nor'-mal*) [*centi-; norma*, normal]. The $\frac{1}{100}$ of the normal; applied to a solution the $\frac{1}{100}$ of the strength of a normal solution.

centrad (*sen'-trad*) [*centrum; ad*, to]. 1. Toward the center, or toward the median line. 2. An angular measure, one hundredth of a radian; about 0.57°.

centradian (*sen-tra'-de-an*). The one-hundredth part of a radian.

central (*sen'-tral*) [*centrum*]. Relating to the center; passing through the center. **c. artery,** an artery in the optic nerve and retina; it passes to the optic papilla and then divides. See under *artery*. **c. fissure,** the fissure of Rolando. **c. ganglia,** the corpora striata and optic thalami **c. ligament,** the terminal filum of the spinal cord. **c. lobe,** the island of Reil.

centrality (*sen-tral'-it-e*). Applied to the condition of nervous phenomena originating in the central nervous system and not in the peripheral nerves.

centraphose, centrophose (*sen'-trah-fōz, sen'-tro-fōz*). See under *phose*.

centraxonial (*sen-traks-o'-ne-al*) [*κέντρον*, center; *ξάων*, axis]. In biology, having a central axial line.

centre (*sen'-ter*). See *center*.

centren (*sen'-tren*) [*centrum*, a center]. Belonging solely to a center.

centric (*sen'-trik*) [*centrum*]. Relating to a center, especially to a nerve-center.

centricipital (*sen-tris-ip'-it-al*) [*centrum*, center; *caput*, a head]. Relating to the centriciput; parietal. **c. vertebra,** the second or more central of the three principal cranial vertebræ.

centriciput (*sen-tris'-ip-ut*) [*centrum*, center; *caput*, head]. The mid-head; the second cranial segment situated between the sinciput and occiput.

centrifugal (*sen-trif'-ū-gal*) [*centrum; fugere*, to flee]. Receding from the center to the periphery. **c. force,** the force by which a revolving body tends to fly off at the periphery. **c. machine,** one by which tubes of liquid are rapidly revolved for the purpose of driving particles floating in the liquid to the distal ends of the tubes.

centrifugalization (*sen-trif-ū-gal-iz-a'-shun*) [see *centrifugal*]. The use of a centrifuge.

centrifugalized milk. Milk from which the cream has been separated by whirling it in a centrifugal machine.

centrifuge (*sen'-trif-ūj*) [see *centrifugal*]. 1. A centrifugal machine; an apparatus for separating substances by centrifugal force. 2. To submit to the action of a centrifuge.

centriole (*sen'-tre-ōl*) [*centrum*]. Boveri's term for a minute body, central horn, contained within the centrosome; in some cases it is not distinguishable from the latter.

centripetal (*sen-trip'-et-al*) [*centrum; petere*, to seek]. Traveling toward the center from the periphery.

centro- (*sen-tro-*) [*centrum*]. A prefix meaning central.

centroacinal, or **centroacinar** (*sen-tro-as'-in-al*, or *cen-tro-as'-in-ar*) [*centrum*, center; *acinus*, a grape]. Belonging to the center of an acinus. **c. cells** are found in the acini of the pancreas, etc.

centrodesmus (*sen-tro-des'-mus*) [*centro-; δεσμός*, a band]. Heidenhain's term for the band primarily connecting the centrosomes and giving rise to the central spindle.

centrodontous (*sen-tro-don'-tus*) [*κέντρον*, a sharp point; *ὀδούς*, a tooth]. Furnished with sharp-pointed teeth.

centrodorsal (*sen-tro-dor'-sal*). Pertaining to the central dorsal region.

centrolecithal (*sen-tro-les'-ith-al*) [*centro-; λέκιθος*, yolk]. In embryology, having the food-yolk located centrally.

centronucleus (*sen-tro-nū'-kle-us*). Same as *amphinucleus*.

centrophose (*sen'-tro-fōz*) [*κέντρον*, center; *φῶς*, light]. See under *phose*.

centroplasm (*sen'-tro-plasm*). The protoplasm of the centrosphere; the archoplasm

centrosclerosis, centro-osteosclerosis (*sen-tro-skler-o'-sis, sen-tro-os-te-o-skler-o'-sis*) [*centro-; sclerosis*]. Osteosclerosis of the central cavities of bones.

centrosome (*sen'-tro-sōm*) [*centro-; σῶμα*, body]. 1. A highly refractive body lying in the protoplasm of the ovum and other cells, and taking an active part in cell-division. Syn., *polecapsule*. 2. An organ of the cell, usually diminutive, lying within the nucleus or near by in the cytoreticulum. It is regarded as the especial organ of cell-division, and in this sense as the dynamic center of the cell. Syn., *attraction-particle; daughter-persplast; polar corpuscle*. **c. s., quadrille of,** the conjugation of paternal with material centrosomes, based upon the view that each germ-cell contributes a centrosome that divides into two daughter-centrosomes. Syn., *quadrille of centers*.

centrosphere (*sen'-tro-sfēr*). See *sphere of attraction*.

centrostaltic (*sen-tro-stal'-tik*) [*centro-; στάλσις*, constriction]. Relating to the action of nervous

force in a spinal center. **c. motion,** the motion of nervous force in the spinal center.

centrostigma (*sen-tro-stig'-mah*) [κέντρον, center; στίγμα, a point]. In morphology, having all the axes converging to a central point.

centrum (*sen'-trum*) [L.]. 1. The center or middle part; the body of a vertebra, exclusive of the bases of the neural arches. 2. A spine; a pointed projection. **c. cinereum,** the gray commissure of the spinal cord **c. commune,** the solar plexus. **c. geminum,** the capsula. **c. ovale majus,** the large mass of white matter appearing when either of the cerebral hemispheres is cut down to the level of the corpus callosum. **c. ovale minus,** the white matter appearing when the upper part of a hemisphere of the brain is removed. **c. ovale Vieussenii,** the central white matter seen on making a section of the brain at the level of the upper surface of the callosum. Syn., *centrum medullare; centrum ovale majus et minus; centrum seminovale Vieussenii; centrum ovale of Vicq d' Azyr; medulla; tegmentum ventriculorum.* **c. rubrum.** See *nucleus tegmenti.* **c. semiovale,** same as *centrum ovale, q. v.* **c. tendineum,** the central tendon of the diaphragm.

cephaeline (*sef-a'-el-in*). See *emetine*

cephaelis (*sef-a'-el-is*). See *ipecacuanha.*

cephal- (*sef-al-*). See *cephalo-.*

cephalad (*sef'-al-ad*) [*cephal-; ad,* to]. Toward the head.

cephalagra (*sef-al-ag'-rah*) [κεφαλή, head; ἄγρα, seizure]. Gouty headache.

cephalalgia (*sef-al-al'-je-ah*) [*cephal-;* ἄλγος, pain]. Headache.

cephalalgic (*sef-al-al'-jik*) [κεφαλή, head; ἄλγος, pain]. Relating to headache.

cephalanthin (*sef-al-an'-thin*). See *cephalanthus.*

Cephalanthus (*sef-al-an'-thus*) [*cephal-;* ἄνθος, a flower]. A genus of rubiaceous plants. *C. occidentalis* is the button-bush or crane-willow of North America; its bitter bark is laxative and tonic and is used in periodic fevers and paralysis. The bark contains cephalin, cephaletin, and a toxic principle cephalanthin, which, according to Mohrberg, causes destruction of the red blood-corpuscles, vomiting, convulsions, and paralysis.

cephalea (*sef-al-e'-ah*) [κεφαλαία, headache]. Headache; especially severe or chronic headache, with intolerance of light and sound.

cephaledema, cephalœdema (*sef-al-e-de'-mah*) [*cephal-;* οἰδεῖν, to swell]. Edema of the head; cerebral edema.

cephalemia (*sef-al-e'-me-ah*) [κεφαλή, head αἷμα, blood] Congestion of the brain.

cephalhematocele (*sef-al-hem-at'-o-sēl*) [*cephal-; hematocele*]. A hematocele beneath the scalp, and communicating with a dural sinus. **c., Stromeyer's.** See *Stromeyer's cephalhematocele.*

cephalhematoma (*sef-al-hem-at-o'-mah*) [*cephal-; hematoma*]. 1. A collection of blood beneath the pericranium, forming a tumor-like swelling. 2. Caput succedaneum. **c., external,** an effusion between the pericranium and the skull. **c., internal,** an effusion between the dura and the skull.

cephalhematometer (*sef-al-hem-at-om'-et-ur*) [κεφαλή, the head; αἷμα, blood; μετρον, a measure]. An apparatus for the estimation of the increase or diminishment of the amount of blood within an animal's head.

cephalhydrocele (*sef-al-hi'-dro-sēl*) [κεφαλή, head; ὕδωρ, water; κήλη, tumor]. Effusion of cerebral fluid beneath the occipito-frontal aponeuroses in fractures of the skull.

cephalic (*sef-al'-ik*) [κεφαλή, head]. 1. Pertaining to the head. 2. Any remedy for headache. **c. index.** See *index, cephalic.* **c. vein,** a vein of the upper arm. **c. version.** See *version, cephalic.*

cephalin (*sef'-al-in*) [κεφαλή, the head]. An unstable phosphatic substance obtained from brain-substance; it is allied to lecithin; it is called also *kephalin.*

cephaline (*sef'-al-ēn*). A proprietary headache remedy said to consist of antipyrine and pulverized coffee, each 5 parts, and caffeine and sodium salicylate, each 2 parts. Dose, 4 gr.

cephalitis (*sef-al-i'-tis*). See *encephalitis.* **c. Ægyptiaca,** an epidemic form of encephalitis occurring in Egypt during the hot winds of early summer. **c. littriana,** inflammation of the epiphyses. **c. meningica,** meningitis. **c. nervosa,** pertussis.

cephality (*sef-al'-e-te*) [κεφαλή, the head]. Agassiz's term for the preponderance of the head over the remainder of the organism.

cephalization (*sef-al-iz-a'-shun*) [κεφαλή, the head]. In biology, Dana's term for that specialization the tendency of which is to concentrate important parts and organs at the head region of the trunk.

cephalize (*sef'-al-īz*) [κεφαλή, head]. To develop head-organs.

cephalo- (*sef-al-o-*) [κεφαλή, head]. A prefix denoting relating to the head.

cephalocathartic (*sef-al-o-kath-ar'-tik*) [*cephalo-;* καθαρτικός, purging]. 1. Purging or relieving the head. 2. A medicine that relieves the head.

cephalocaudal (*sef-al-o-kaw'-dal*) [*cephalo-; cauda,* tail]. Same as cephalocercal, *q. v.*

cephalocele (*sef'-al-o-sēl*) [*cephalo-;* κήλη, tumor]. Hernia of the brain; protrusion of a mass of the cranial contents.

cephalocentesis (*sef-al-o-sen-te'-sis*) [*cephalo-;* κέντησις, puncture] Surgical puncture of the cranium.

cephalocercal (*sef-al-o-ser'-kal*) [*cephalo-;* κέρκος, tail]. In anatomy, from head to tail.

cephalochord (*sef'-al-o-kord*) [*cephalo-;* χορδή, cord]. The cephalic portion of the chorda dorsalis in embryonic life.

cephaloclasia (*sef-al-o-kla'-ze-ah*). See *cephalotripsy*

cephaloclast (*sef'-al-o-klast*). See *cephalotribe.*

cephalodymia (*sef-al-o-dim'-e-ah*) [*cephalo-;* δύμεναι, to enter]. Teratologic union of twins by the merging of their heads together.

cephalodynia (*sef-al-o-din'-e-ah*) [*cephalo-;* ὀδύνη, pain]. Rheumatism affecting the occipito-frontalis muscle, the pain being chiefly experienced in the forehead or occiput, and at times involving the eye-balls.

cephalofacial (*sef-al-o-fa'-shal*). Relating to the skull and to the face.

cephalogaster (*sef-al-o-gas'-ter*) [*cephalo-;* γαστήρ, stomach]. The anterior division of the enteric canal, as in certain parasitic worms, where it is continued into a second division, the typhlosole.

cephalogenesis (*sef-al-o-jen'-es-is*) [*cephalo-;* γένεσις, reproduction]. That branch of embryology which deals with the origin of the anlage of the head.

cephalograph (*sef'-al-o-graf*) [*cephalo-;* γράφειν, to write]. An instrument for recording the contours of the head.

cephalography (*sef-al-og'-ra-fe*) [*cephalo-;* γράφειν, to write]. A description of the head.

cephalohemometer (*sef-al-o-hem-om'-et-er*) [*cephalo-*; *αἷμα*, blood; *μέτρον*, a measure]. An instrument for noting changes in the intracranial blood-pressure.

cephaloid (*sef'-al-oid*) [*cephalo-*; *εἶδος*, likeness]. Resembling the head.

cephalology (*sef-al-ol'-o-je*) [*cephalo-*; *λόγος*, science]. The science of cranial measurements and indications.

cephaloma (*sef-al-o'-mah*) [*cephalo-*; *ὄμα*, tumor; *pl.*, *cephalomata*]. Encephaloid carcinoma; soft carcinoma.

cephalomelus (*sef-al-om'-el-us*) [*cephalo-*; *μέλος*, a limb]. A form of double monster in which there is a supernumerary limb attached to the head.

cephalomenia (*sef-al-o-me'-ne-ah*) [*cephalo-*; *μήν*, a month]. Vicarious menstruation through the nose.

cephalomeningitis (*sef-al-o-men-in-ji'-tis*) [*cephalo-*; *μῆνιγξ*, a membrane; *ῖτις*, inflammation]. Cephalic meningitis; inflammation of the cephalic meninges.

cephalometer (*sef-al-om'-et-er*) [*cephalo-*; *μέτρον*, a measure]. An instrument for measuring the head.

cephalometry (*sef-al-om'-et-re*) [*cephalo-*; *μέτρον*, a measure]. 1. The use of the cephalometer, craniometry. 2. The art of taking measurements of the head to determine the position of the fissures and convolutions of the brain.

cephalomyitis (*sef-al-o-mi-i'-tis*) [*cephalo-*; *μῦς*, a muscle, *ῖτις*, inflammation]. Inflammation of the muscles of the head.

cephalonasal (*sef-al-o-na'-sal*) Relating to the skull and the nose.

cephalonia (*sef-al-o'-ne-ah*) [*κεφαλή*, head]. Macrocephaly with hypertrophy of the brain

cephalo-orbital (*sef-al-o-or'-bit-al*) [*cephalo-*; *orbita*, an orbit]. Relating to the cranium and orbits. **c. index.** See *index*.

cephalo-orbitonasal (*sef-al-o-or-bit-o-na'-zal*) [*cephalo-*; *orbita*, an orbit; *nasalis*, of the nose]. Relating to cranium, orbits, and nose.

cephalopagus (*sef-al-op'-ag-us*) [*cephalopagy*]. A double monstrosity having the heads united at the top

cephalopagy (*sef-al-op'-ath-e*) [*cephalo-*; *πηγνύναι*, to join]. That form of monstrosity marked by the development of two individuals having heads united at the top.

cephalopathic (*sef-al-o-path'-ik*) [*cephalo-*; *πάθος*, disease]. Pertaining or belonging to a disease of the head

cephalopathy (*sef-al-op'-ath-e*) [*cephalo-*; *πάθος*, disease]. Any disease of the head.

cephalopharyngeus (*sef-al-o-far-in'-je-us*). 1. Relating to the head and pharynx. 2. See under *muscle*.

cephalophyma (*sef-al-o-fi'-mah*). Synonym of *cephalhematoma*.

cephaloplegia (*sef-al-o-ple'-je-ah*) [*cephalo-*; *πληγή*, a stroke]. Paralysis of the muscles about the head and face.

cephalorrhachidian (*sef-al-o-rak-id'-e-an*) [*cephalo-*; *ῥάχις*, spine]. Same as *cerebro-spinal*.

cephaloscope (*sef'-al-o-skōp*) [*cephalo-*; *σκοπεῖν*, to examine]. A stethoscope for use in auscultation of the head or the ear.

cephaloscopy (*sef-al-os'-ko-pe*) [*cephalo-*; *σκοπεῖν*, to examine]. 1. Auscultation of the head. 2. Examination of the head with a view to ascertaining the condition of the mental faculties.

cephalostat (*sef'-al-o-stat*) [*cephalo-*; *ἱστάναι*, to cause to stand]. A vise or clamp for holding a patient's head; a head-rest.

cephalothoracic (*sef-al-o-tho-ras'-ik*) [see *cephalothorax*]. Pertaining to the head and the chest.

cephalothoracopagus (*sef-al-o-tho-rak-op'-ag-us*) [*cephalo-*; *θώραξ*, thorax; *παγείς*, joined]. A double-headed monster with united thoraces and necks. Those monsters are divided by Veit into *prosopothoracopagus* and *syncephalus*.

cephalothorax (*sef-al-o-tho'-raks*) [*cephalo-*; *θώραξ*, a breastplate]. In biology, the anterior portion of the body of an arthropod formed by the union of the head and thorax.

cephalotome (*sef'-al-o-tōm*) [*cephalo-*; *τέμνειν*, to cut]. The instrument used in performing cephalotomy.

cephalotomy (*sef-al-ot'-o-me*) [*cephalo-*; *τόμη*, section]. The opening or division of the head of the fetus to facilitate labor.

cephalotractor (*sef-al-o-trak'-tor*) [*cephalo-*; *tractor*] Obstetric forceps.

cephalotribe (*sef'-al-o-trīb*) [*cephalo-*; *τρίβειν*, to crush]. An instrument for crushing the fetal head.

cephalotridymus (*sef-al-o-trid'-im-us*) [*cephalo-*; *τρίδυμος*, triple]. A three-headed monster.

cephalotripsy (*sef'-al-o-trip-se*) [*cephalo-*; *τρῖψις*, a crushing]. The operation of crushing the fetal head when delivery is otherwise impossible.

cephalotriptor (*sef-al-o-trip'-tor*). See *cephalotribe*.

cephalotrypesis (*sef-al-o-tri-pe'-sis*) [*cephalo-*; *τρύπησις*, a boring]. A trephining of the skull.

cephaloxia (*sef-al-oks'-e-ah*). Synonym of *torticollis*.

ceptor (*sep'-tor*) [*capere*, to take]. A term suggested by Ehrlich in place of intermediary body. According to the manner of action he distinguishes *uniceptors* and *amboceptors*.

cera (*se'-rah*) [L.]. Wax. A mixture of cerotic acid, cerolein, and myricin, gathered by the honey-bee from the pollen of flowers and the leaves of plants. **c. alba** (U. S. P.), white wax, prepared by bleaching yellow wax. It is valuable as an ingredient of cerates and ointments. **c. flava** (U. S. P.), yellow wax; it possesses an agreeable balsamic odor, and is soluble in ether, in hot alcohol, and in chloroform.

ceraceous (*se-ra'-se-us*) [*cera*, wax]. Waxy. Resembling wax.

ceral (*se'-ral*). Pasta cerata, a proprietary vehicle for application of medicaments, said to consist of wax, potash, and water

ceramuria (*ser-am-u'-re-ah*) [*κέραμος*, potter's earth; *οὖρον*, urine]. Phosphaturia.

cerasin (*ser'-as-in*) [*cerasus*, a cherry-tree]. 1. An ingredient of the gum of cherry-, peach-, and plum-trees, apparently identical with bassorin. 2. A crude precipitate from tincture of chokecherry. 3. A cerebroside which yields lignoceric acid.

cerasinose (*ser-as'-in-ōs*). A carbohydrate found in the gum of the cherry tree.

cerate (*se'-rāt*) [*cera*]. In pharmacy, an unctuous preparation consisting of wax mixed with oils, fatty substances, or resins, and of such a consistence that at ordinary temperatures it can be readily spread upon linen or muslin, and yet is so firm that it will not melt or run when applied to the skin. **c., camphor.** See *camphor cerate*. **c., cantharides.** See *cantharides cerate*. **c., Goulard's.** See *Goulard's cerate*. **c. of lead subacetate.** See *Goulard's cerate*. **c., rosin.** See *rosin cerate*. **c., rosin, compound.** See *rosin cerate, compound*. **c., touch,** a lubricant used in vaginal inspection, consisting of spermaceti, white wax, and caustic soda, each.

1 part; olive-oil, 16 parts. Syn., *ceratum protactu*

cerated (*se'-ra-ted*) [*cera*]. Coated with wax.

ceratiasis (*ser-at-ı'-as-ıs*). See *keratiasis*.

ceratin (*ser'-at-ın*). See *keratın*.

ceratitis (*ser-at-ı'-tis*). See *keratıtıs*.

cerato- (*ser'-a-to*). See *kerato-*.

ceratocele (*ser'-at-o-sēl*). See *keratocele*.

ceratocentesis. See *keratocentesıs*.

ceratoconus. See *keratoconus*.

ceratocricoid. See *keratocricoid*.

ceratodermatitis. See *keratodermatıtis*.

ceratogenous. See *keratogenous*.

ceratoglossus (*ser-at-o-glos'-us*). See *keratoglossus*, in *muscles, table of*.

ceratohyal (*ser-at-o-hi'-al*). See *keratohyal*.

ceratohyalin. See *keratohyalın*.

ceratomalacia. See *keratomalacıa*.

Ceratonia (*ser-at-o'-ne-ah*) [κερατωνία]. 1. A genus of leguminous trees. 2. The fruit of *C. sılıqua*, the carob-tree, a native of the regions about the Mediterranean. The falcate, fleshy pods, called carob-pods, sugar-pods, and St. John's bread, are demulcent and pectoral and contain, carobın, carobone, and carobic acid. They are used as food and form the chief constituent of much of the patented food for cattle. The seeds are used as a substitute for coffee.

ceratonosus. See *keratonosus*.

ceratonyxis (L.). See *keratonyxis*.

ceratoplasty (*ser'-at-o-plas-te*). See *keratoplasty*.

ceratorrhexis (*ser-at-o-reks'-ıs*). See *keratorrhexis*.

ceratoscope (*ser'-at-o-skōp*). See *keratoscope*.

ceratose (*ser'-at-ōs*). See *keratose*.

ceratosis (*ser-at-o'-sis*). See *keratosis*.

ceratotomy (*ser-at-ot'-o-me*). See *keratotomy*.

ceratum (*se-ra'-tum*). Cerate, *q. v.*

ceraunics (*ser-aw'-nıks*). See *keraunıcs*

cercaria (*ser-ka'-re-ah*) [κέρκος, tail]. Any trematode worm (fluke) in its second (or tailed) stage of larval life.

cercarian (*ser-ka'-re-an*) [κέρκος, a tail]. Any trematode, or fluke-worm, in the *cercarıa* stage.

cerchnus (*serk'-nus*) [κέρχνος, rough, hoarse]. Hoarseness; noisy respiration.

cerclage (*sair-klahzj'*) [Fr. *cerclage*, hooping]. Binding the parts of a fractured bone by an encircling loop of wire.

cercomonad (*ser-ko-mo'-nad*). A member of the genus *cercomonas*.

Cercomonas (*ser-ko-mo'-nas*) [κέρκος, tail; μονάς, monad]. A genus of flagellate infusorians. **C. intestinalis**, a protozoon, occasionally found in the fecal discharges of patients suffering with typhoid fever, chronic diarrhea, or cholera. Its pathological significance has not yet been ascertained.

cerea flexibilitas (*se'-re-ah fleks-ib-ıl'-ıt-as*). That condition of muscular tension in the insane in which the limbs may be molded into any position.

cereal (*se'-re-al*) [*Ceres*, the goddess of agriculture]. 1. Relating to edible grains. 2. Any edible grain.

cerealin (*se-re'-al-in*). An enzyme converting starch into glucose, isolated from bran-extract.

cerebellar (*ser-e-bel'-ar*) [*cerebellum*] Relating to the cerebellum. **c. ataxia**, ataxia due to some cerebellar lesion. **c. tonsil.** See *amygdala* (2).

cerebellic (*ser-e-bel'-ik*). See *cerebellar*.

cerebellifugal (*ser-e-bel-if'-ū-gal*) [*cerebellum; fugere*, to flee]. Tending from the cerebellum.

cerebellipetal (*ser-e-bel-ip'-e-tal*) [*cerebellum; petere*, to seek]. Tending toward the cerebellum.

cerebellitis (*ser-e-bel-ı'-tis*) [*cerebellum*; ιτις, inflammation]. Inflammation of the cerebellum.

cerebellocortex (*ser-e-bel-o-kor'-teks*) [*cerebellum, cortex*, bark]. The cortex of the cerebellum.

cerebellorubral (*ser-e-bel-o-roo'-bral*). Pertaining to the cerebellum and the red nucleus.

cerebellorubrospinal (*ser-e-bel-o-roo-bro-spi'-nal*). Pertaining to the cerebellum, the red nucleus, and the spinal cord.

cerebellospinal (*ser-e-bel-o-spı'-nal*) [*cerebellum, spına*, the spine]. Relating to the cerebellum and the spinal cord.

cerebellum (*ser-e-bel'-um*) [dim. of *cerebrum*] The inferior part of the brain lying below the cerebrum and above the pons and medulla. It consists of two lateral lobes and a middle lobe

cerebos salt (*ser'-e-bos*). Sodium chloride to which 4 % of phosphates has been added; it is intended to replace the phosphates removed in the cooking of food.

cerebral (*ser'-e-bral*) [*cerebrum*]. Relating to the cerebrum. **c. apoplexy.** See *apoplexy*. **c. arteries.** See *arterıes, table of*. **c. fornix.** See *fornix, cerebral* **c. gyri**, the convolutions of the brain. **c hemiplegia**, hemiplegia due to cerebral apoplexy. **c. index.** See *ındex, cerebral*. **c. maculæ**, spots on the skin caused by slight irritation, and abnormally persistent. They may indicate disorder of the vaso-motor mechanism. **c. nerves.** See *nerves, table of*. **c. pneumonia.** See *pneumonıa, cerebral* **c. surprise**, the speedy, but not long-persistent stupor that often follows sudden mental shock or grave lesion or injury of the brain. **c. vesicles**, the embryonic vesicles from which the brain is developed. See *brain-bladder*.

cerebralgia (*ser-e-bral'-je-ah*) [*cerebrum*, the brain; ἄλγος, pain]. Pain in the head.

cerebralism (*ser'-e-bral-izm*) [*cerebrum*, the brain]. The theory that mental operations are due to the activity of the brain; or that thought is a function of the brain.

cerebrasthenia (*ser-e-bras-the'-ne-ah*) [*cerebrum; asthenıa*]. Cerebral asthenia; cerebral neurasthenia; phrenasthenia.

cerebrasthenic (*ser-e-bras-then'-ik*) [*cerebrum*, the brain; ἀσθενής, without strength]. Characterized by, or pertaining to, cerebrasthenia.

cerebration (*ser-e-bra'-shun*) [*cerebrum*]. Mental activity. **c., unconscious**, mental activity of which the subject is not conscious.

cerebriform (*ser-e'-bre-form*). See *cerebroid*.

cerebrifugal (*ser-e-brıf'-ū-gal*) [*cerebrum*, the brain; *fugere*, to flee]. Centrifugal; efferent; transmitting or transmitted from the brain to the periphery.

cerebrin (*ser'-e-brin*) [*cerebrum*]. 1. $C_{17}H_{33}NO_3$. A nitrogenous glucoside obtained from brain-tissue, nerves, and pus-corpuscles. It is a light, colorless, exceedingly hygroscopic powder. 2. A preparation from the gray matter of the brain of sheep and calves, made with equal parts of glycerol an ' 0.5 % of phenol solution. It has been used in chorea. Dose 5–10 min. (0.3–0.6 Cc.). Syn., *cerebrın-alpha; cerebrının*. 3. A proprietary antineuralgic elixir, said to contain analgesin, ether, caffeine and cocaine.

cerebrinacide (*ser-e-brın'-as-id*) [*cerebrum*, the brain]. One of certain substances found in brain-tissue, and capable of combining with metallic oxides.

cerebrinin (*se-reb'-rin-in*). See *cerebrin* (2).

cerebripetal (*ser-e-brip'-et-al*) [*cerebrum*, the brain; *petere*, to seek]. Centripetal; afferent; transmitting or transmitted from the periphery to the brain.

cerebritis (*ser-e-bri'-tis*) [*cerebrum*; ιτις, inflammation]. Inflammation of the proper substance of the cerebrum. **c., local,** softening of the brain.

cerebro- (*se-re-bro-*) [*cerebrum*]. A prefix denoting relating to the cerebrum.

cerebrocardiac (*ser-e-bro-kar'-de-ak*) [*cerebro-*; καρδία, the heart]. Applied to diseases characterized by both cerebral and cardiac symptoms.

cerebrogalactose (*ser-e-bro-gal-ak'-tōs*). Same as *cerebrose*.

cerebrohyphoid (*ser-e-bro-hi'-foid*) [*cerebro-*; ὑφή, tissue; εἶδος, likeness]. Resembling the substance of the brain.

cerebroid (*ser'-e-broid*) [*cerebro-*; εἶδος, likeness]. Resembling brain-substance.

cerebrol (*ser'-e-brol*) [*cerebrum*, brain; *oleum*, oil]. An oily, reddish fluid obtainable from brain-tissue.

cerebrology (*ser-e-brol'-o-je*) [*cerebro-*; λόγος, science]. The science of the brain; encephalology.

cerebroma (*ser-e-bro'-mah*) [*cerebrum*, the brain; ὅμα, a tumor; *pl., cerebromata*]. A growth, outside the cranium, that contains cerebral tissue.

cerebromalacia (*ser-e-bro-mal-a'-se-ah*) [*cerebro-*; μαλακία, softness]. Softening of the brain tissue.

cerebromedullary (*ser-e-bro-med-ŭl'-ar-e*) [*cerebro-*; *medulla*, marrow]. Relating to the brain and spinal cord.

cerebrometer (*ser-e-brom'-et-er*) [*cerebro-*; μέτρον, a measure]. An instrument for recording cerebral impulses.

cerebroolein (*ser-e-bro-o'-le-in*). A compound of olein and lecithin forming a yellow oil; it is obtained from brain tissue.

cerebropathy (*ser-e-brop'-a-the*) [*cerebro-*; πάθος, illness]. 1. A train of symptoms following overwork, and approaching the character of insanity. 2. Cerebral disease in general. **c., psychic,** mental disease resulting from primary lesion of the brain or spinal cord, but presenting distinct symptoms of its own.

cerebrophysiology (*ser-e-bro-fiz-e-ol'-o-je*). The physiology of the brain.

cerebropontile (*ser-e-bro-pon'-til*). Relating to the cerebrum and pons.

cerebropsychosis (*ser-e-bro-sik-o'-sis*) [*cerebro-*; ψυχωσις, animating]. Mental disturbance due to a disease of the psychic centers.

cerebrorrhachidian (*ser-e-bro-ra-kid'-i-an*) [*cerebro-*; ῥάχις, spine]. Cerebrospinal.

cerebrosclerosis (*cer-e-bro-skle-ro'-sis*) [*cerebro-*; σκληρός, hard]. Sclerosis of cerebral tissue.

cerebroscope (*ser-e'-bro-skōp*). An ophthalmoscope used in the diagnosis of brain disease.

cerebroscopy (*ser-e-bros'-ko-pe*) [*cerebro-*; σκοπεῖν, to inspect]. 1. Ophthalmoscopy in the diagnosis of brain-disease. 2. Encephaloscopy. 3. The post-mortem examination of the brain.

cerebrose (*ser'-e-brōs*) [*cerebrum*], $C_6H_{12}O_5$. A crystallized sugar isomeric with glucose, occurring in brain tissue.

cerebrosensorial (*ser-e-brō-sen-so'-re-al*) [*cerebro-*; *sensorium*, the organ of sensation]. Pertaining to the cerebral sensorium.

cerebroside (*ser'-e-bro-sid*) [*cerebrum*]. One of a class of substances occurring in brain tissue, containing cerebrose, just as glucosides contain glucose.

cerebrosis (*ser-e-bro'-sis*) [*cerebrum*, the brain.] Any cerebral disorder.

cerebrospinal (*ser-e-bro-spi'-nal*) [*cerebro-*; *spina*, the spine]. Pertaining to the brain and spinal cord. **c. axis.** See *axis, cerebrospinal.* **c. fever.** See under *fever.* **c. fluid,** the fluid between the arachnoid membrane and the pia mater **c. meningitis.** See *fever, cerebrospinal.* **c. sclerosis,** sclerosis of the brain and spinal cord. **c. system,** the brain, spinal cord, and nerves.

cerebrospinant (*ser-e-bro-spi'-nant*) [*cerebro-*; *spina*, the spine]. A medicine that acts upon the brain and spinal cord.

cerebrosuria (*ser-e-bro-sū'-re-ah*). The presence of cerebrose in the urine; cerebral diabetes.

cerebrotomy (*ser-e-brot'-o-me*) [*cerebro-*; τέμνειν, to cut]. Surgical or anatomical section of brain-tissue.

cerebrum (*ser'-e-brum*) [L.]. The chief portion of the brain, occupying the whole upper part of the cranium, and consisting of the right and left hemispheres. **c. abdominale,** the solar plexus. **c. exsiccatum,** the dried and powdered gray substance of the brain of calves; one part represents five parts of the fresh organ. Dose 30–60 gr. (2–4 Gm.) a day. **c. posterius,** the cerebellum.

cerecloth (*sēr'-kloth*) [*cera*] Cloth impregnated with wax and rendered antiseptic; used as a dressing for wounds

cerectomy (*ser-ek'-to-me*). See *kerectomy.*

ceregen (*se'-re-jen*). Trade name of a food containing over 85 % of protein combined with assimilable phosphates.

cereiform (*se-re'-e-form*) [*cereus*, a wax taper; *forma*, form]. Shaped like a wax taper.

cereolus (*se-re-o'-lus*). A urethral bougie used for the application of medicine to the uretha.

cereometer (*se-re-om'-et-ur*) [*cera*, wax; μέτρον, a measure]. An apparatus for the estimation of the quantity of wax in a given mixture by determining the specific gravity.

cereous (*se'-re-us*) [*cereus*]. Made of wax.

ceresin (*ser'-es-in*) [*cera*, wax]. Ozokerite that has been bleached without distillation; it is used as a substitute for beeswax.

cerette (*se-ret'*). Trade name of a gelatin capsule in which ointments are dispensed.

cereus (*se'-re-us*) ["L., a wax candle"]. A genus of cataceous plants. **c. grandiflorus.** See *cactus grandiflorus.*

cerevisia (*ser-e-vis'-e-ah*). See *cervisia.*

cerevisin (*ser-e-vis'-in*). Dried yeast used internally in furunculosis (dose 1 teaspoonful before each meal) and for application in leukorrhea and gonorrheal vaginitis (15–30 gr. (1–2 Gm.) in suppository of cacao-butter).

ceric (*se'-rik*) [*cera*]. 1. Relating to wax. 2. Containing cerium as a quadrivalent radical.

ceridin (*se'-rid-in*). Cerolin. A fatty substance obtained from yeast; used in the treatment of acne.

cerin (*se'-rin*) [*cera*]. 1. An ether of cerotic acid; one of the substances found in wax. 2. (Of Chevreul.) A crystalline precipitate from an aqueous extract of cork by action of hot alcohol.

cerite (*se'-rīt*). A Swedish mineral formerly called the heavy stone of Bastnas, from which cerium is obtained.

cerium (*se'-re-um*) [named from the planet *Ceres*]. Ce = 140.25; quantivalence II, IV. One of the rarer metals. It forms two series of salts (*cerous* and *ceric* salts) corresponding to the two

oxides. See *elements, table of chemical.* **c. nitrate.** 1. $Ce_2(NO_3)_6.12H_2O$, white crystals, soluble in water; an antiseptic used in solutions of 1:1000. Syn., *cerous nitrate.* 2. $Ce(NO_3)_4$, a reddish-yellow mass of crystals, soluble in water and alcohol. It is used as a nerve-tonic in irritable dyspepsia and chronic vomiting. Dose 1–3 gr. (0.065–0.2 Gm.). Syn., *ceric nitrate.* **c. oxalate** (*cerii oxalas*, U. S. P.), $Ce_2(C_2O_4)_3.9H_2O$, a white, granular powder, insoluble in water or alcohol, but soluble in hydrochloric acid. It is useful in the vomiting of pregnancy. Dose 1–10 gr. (0.065–0.65 Gm.) in pill. **c. valerate,** has been used in the same class of cases as the oxalate. Dose 1½ gr. (0.1 Gm.).

cerolein (*se-ro'-le-in*) [*cera*, wax]. A substance found in beeswax, soluble in alcohol; probably a mixture of fatty acids.

cerolin (*se'-ro-lin*). A preparation said to be the active principle of yeast. It consists of the glycerides of fatty acids with cholesterins, lecithin and ethereal oil. It is said to be useful in furunculosis, acne, sycosis and skin affections.

cerolysin (*se-rol'-is-in*) [*cera*, wax; *lysin*]. A lysin capable of decomposing wax.

ceroma (*se-ro'-mah*) [*cera*; ὄμα, a tumor]. A cystic tumor the tissue of which has undergone fatty degeneration.

ceromel (*se'-ro-mel*) [*cera*, wax; *mel*, honey]. Honey cerate; wax, one part; honey, two or four parts. It is applied to wounds and ulcers, chiefly in Asiatic countries

ceroplastic (*se-ro-plas'-tik*) [*cera*, wax; πλάσσειν, to mould] Modeled, or as if modeled, in wax. **c. catalepsy.** See *catalepsy.*

ceroplasty (*se'-ro-plas-te*) [*cera*, wax; πλάσσειν, to mould]. The modeling of anatomical preparations in wax.

cerosate (*se'-ro-sāt*). A salt of cerosic acid.

cerosic (*se-ro'-sik*). Relating to cerosin.

cerosin (*se'-ro-sin*) [*cera*, wax]. A wax-like substance forming a white or grayish-green coating on some species of sugar-cane. When purified, it yields fine, light pearly scales.

cerosis (*ser-o'-sis*) [*cera*, wax]. That morbid condition of a membrane in which it seems to consist of waxlike scales.

cerostroma, cerostrosis (*ser-o-stro'-mah, -sis*). See *ichthyosis hystrix.*

cerotate (*se'-ro-tāt*). A salt of cerotic acid.

cerotic (*se-ro'-tik*). Derived from wax. **c. acid.** See *acid, cerotic.*

cerous (*se'-rus*). Containing cerium as a bivalent radical.

certifiable (*ser-te-fi'-abl*) [see *certificate*]. A term applied to certain infectious diseases which should be reported to the health authorities.

certificate (*ser-tif'-ik-āt*) [*certificare*, to certify]. A written statement, as for insurance, or in case of birth or death.

cerumen (*ser-u'-men*) [*cera*]. The wax of the ear.

ceruminal (*ser-u'-min-al*). Pertaining to cerumen.

ceruminosis (*ser-u-min-o'-sis*). An excessive secretion of cerumen.

ceruminous (*ser-u'-min-us*) [*cera*]. Pertaining to cerumen. **c. glands,** glands secreting cerumen.

ceruse (*se'-rūs*) [L., *cerussa*]. 1. White lead: basic carbonate and hydrate of lead. 2. A white face-powder. **c., antimony,** white oxide of antimony; also antimonic acid.

cerussa (*se-rus'-ah*). See *ceruse.*

cervical (*ser'-vik-al*) [*cervix*, the neck]. Pertaining to the neck or to the cervix uteri. **c. carcinoma,** carcinoma of the neck of the uterus. **c. endometritis.** See *endocervicitis.* **c. pregnancy,** a rare condition in which, from atrophy of the decidual membranes, the impregnated ovum is not properly held in place, and, dropping, lodges in the cervical canal, where it develops until the uterus expels it.

cervicalis (*ser-vik-a'-lis*) [*cervix*]. 1. Cervical. 2. A cervical artery, muscle, nerve, or vein.

cervicectomy (*ser-ve-sek'-to-me*) [*cervico-*; ἐκτομή, excision]. Excision of the cervix uteri.

cervicen (*ser'-vis-en*) [*cervix*, the neck]. Belonging solely to the cervix.

cervicicardiac (*ser-vis-ik-ar'-de-ak*) [*cervix*, the neck; καρδία, the heart]. Relating to the neck and the heart, as the cervicicardiac nerves, branches of the vagus.

cerviciplex (*ser-vis'-ip-leks*) [*cervix*, the neck; *plexus*, a network]. The cervical plexus.

cervicispinal (*ser-vis-e-spi'-nal*). Relating to the neck and spinal cord.

cervicitis (*ser-vis-i'-tis*) [*cervix*; ιτις, inflammation]. Inflammation of the cervix uteri.

cervico- (*ser'-vik-o*). Prefix denoting relation to the neck or to the cervix of an organ.

cervicoauricular (*ser-vik-o-aw-rik'-ū-lar*). Relating to the back of the neck and the outer ear.

cervicobasilar (*ser-vik-o-bas'-il-ar*). Pertaining to the neck and the basilar region.

cervicobrachial (*ser-vik-o-bra'-ke-al*) [*cervico-*; *brachium*, the arm]. Relating to the neck and the arm.

cervicobregmatic (*ser-vik-o-breg-mat'-ik*) [*cervico-*; βρέγμα, the sinciput]. Relating to the cervix or nucha and the bregma.

cervicobuccal (*ser-vik-o-buk'-al*) [*cervico-*; *bucca*, the cheek]. Pertaining to the buccal surface of the neck of a molar or premolar tooth.

cervicodynia (*ser-vik-o-din'-e-ah*) [*cervico-*; ὀδύνη, pain] Cramp or neuralgia of the neck.

cervicofacial (*ser-vik-o-fa'-shal*) [*cervico-*; *facies*, face]. Relating to the neck and the face.

cervicohumeral (*ser-vik-o-hū'-mer-al*). Relating to the neck and the upper arm.

cervicolabial (*ser-vik-o-la'-be-al*) [*cervico-*; *labium*, lip]. Pertaining to the labial surface of the neck of an incisor or canine tooth.

cervicolingual (*ser-vik-o-ling'-wal*) [*cervico-*; *lingua*, tongue]. Pertaining to the lingual surface of the neck of a tooth.

cervicomuscular (*ser-vik-o-mus'-kū-lar*). Relating to the muscles of the neck

cerviconasal (*ser-vik-o-na'-zal*). Running from the back of the neck to the nose.

cervico-occipital (*ser-vik-o-ok-sip'-it-al*) [*cervico-*; *occiput*, the back of the head]. Relating to the neck and the back of the head.

cervico-orbicular (*ser-vik-o-or-bik'-ū-lar*) [*cervico-*; *orbicularis*, circular]. Relating to the neck and the orbicular muscle.

cervicoscapular (*ser-vik-o-skap'-ū-lar*). 1. Relating to the back of the neck and the scapula. 2. The transverse artery or vein of the neck.

cervicovaginal (*ser-vik-o-vaj'-in-al*) [*cervico-*; *vagina*]. Relating to the cervix uteri and the vagina.

cervicovesical (*ser-vik-o-ves'-ik-al*). Pertaining to the bladder and the cervix uteri.

cervimeter (*ser-vim'-et-er*) [*cervix*; μέτρον, a measure]. An instrument for measuring the cervix uteri.

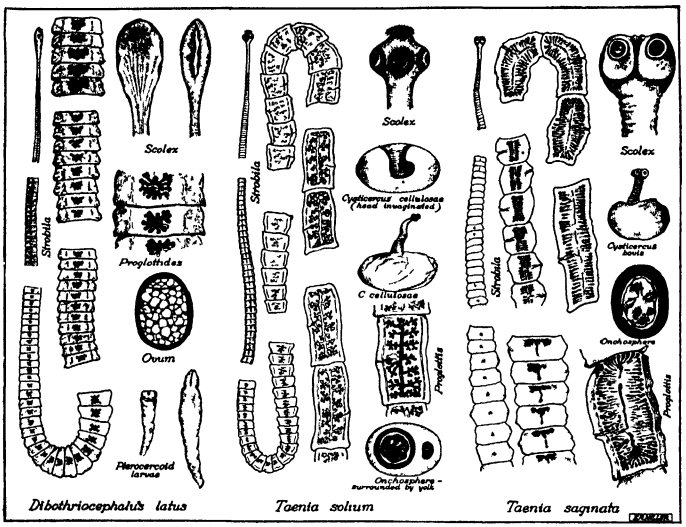
cervisia (*ser-vis'-e-ah*) [L.]. Ale or beer. **cervisiæ fermentum,** beer-yeast. The ferment obtained

in brewing beer, and produced by *Saccharomyces cerevisiæ*.

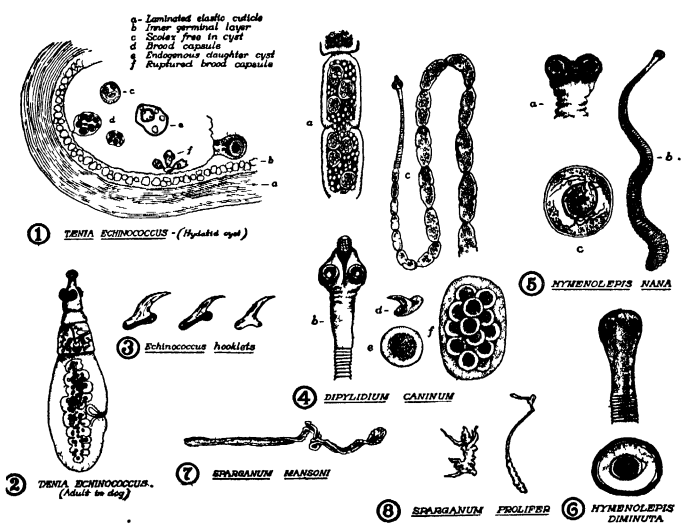
cervix (*ser'-viks*) [L.]. A constricted portion or neck. **c. conical, c., conoid, c., conoidal,** malformation of the cervix uteri marked by a conical shape and elongation, with constriction of the os externum. **c. cornu,** the constricted portion of the cornu dorsale **c. obstipa, c. rigida,** wry-neck. **c. tapiroid,** a cervix uteri with a very elongated anterior lip. **c. uteri,** the neck of the uterus. **c. vesicæ,** the neck of the bladder.

ceryl (*se'-ril*) [*cera*, wax], $C_{27}H_{55}$. An organic radical found in combination in beeswax.

cesarean section, or **operation** [*cædere*, to cut]. Extraction of the fetus through an incision made in the abdomen. **c. section, postmortem,** extraction of the child after the mother's death.



ADULT AND LARVAL STAGE OF CESTODA OF MAN. (*Stitt.*)



OTHER CESTODES OF MAN. (*Stitt.*)

cesarotomy (*se-zar-ot'-om-e*). Cesarean section

cesium, cæsium (*se'-ze-um*) [L., "bluish-gray"], Cs = 132.81; quantivalence I. A rare alkaline metal resembling potassium in physical and chemical properties **c. and ammonium bro-**

mide, $CsBr\,3NH_4Cl$, sedative used n epilepsy. Dose 15–45 gr. (1–3 Gm.); maximum dose 90 gr. (6 Gm.). **c. bitartrate,** $CsHC_4H_4O_6$, used in nervous heart-palpitation. Dose 3–5 gr. (0.18–0.3 Gm.). **c. bromide,** is a good sedative, but its cost is very great. **c. carbonate,** Cs_2CO_3; used in epilepsy. **c. chloride,** lowers the pulse-rate and raises arterial pressure. Dose 2–5 gr. (0.13–0.32 Gm). **c. hydrate, c. hydroxide,** CsOH, is used in epilepsy. **c. and rubidium and ammonium bromide,** CsBr.RbBr 6(NH_4Br), a nervine. Dose 15–45 gr. (1–3 Gm.) once or twice daily; maximum dose 90 gr. (6 Gm.). **c. sulphate,** Cs_2SO_4, used as an antiepileptic.

cestode, cestoid (*ses'-tōd, ses'-toid*) [κεστός, a girdle; εἶδος, likeness]. Shaped like a girdle or ribbon; applied to worms, of which *Tænia* is a type.

cestus (*ses'-tus*) [L., a girdle]. The fold of the metatela encircling the dorsal part of the brain-tube.

cetacea (*se-ta'-se-ah*) [κῆτος, a whale]. An order of mammals living in the sea, as the whale, dolphin, etc.

cetaceum (*se-ta'-se-um*) [see *cetacea*]. Spermaceti. A fatty substance somewhat resembling paraffin in its physical properties. It is obtained from the head of the sperm-whale, *Physeter macrocephalus*. It is soluble in ether, in chloroform, and in boiling alcohol, and is employed as an emollient. **Cetacei, ceratum,** contains spermaceti, 10; white wax, 35; olive-oil, 55 parts. **Cetacei, unguentum** (B. P.), contains spermaceti, white wax, almond-oil, and benzoin.

cetic, cetinic (*se'-tik, se-tin'-ik*). Pertaining to cetin or to the whale.

cetin (*se'-tin*) [*see cetacea*], $C_{32}H_{64}O_2$ The chief constituent of commercial purified spermaceti. It is a fatty, crystalline substance, soluble in alcohol and ether, insoluble in water, melting at 49° C., and volatilizing at 360° C. Syn., *cetinum*.

Cetraria (*se-tra'-re-ah*) [*cætra*, a short Spanish shield]. 1. A genus of lichens. 2. Iceland moss —a lichen, *C. islandica*, found in Iceland and other northern countries It contains a form of starch, *lichenin*, that gelatinizes when boiled with water. It is a feebly tonic demulcent, sometimes used in pulmonary affections. **Cetrariæ, decoctum** (B. P.), contains 5 % of the lichen. Dose 2–4 oz. (60–120 Cc.).

cetrarin (*se-tra'-rin*) [*cætra*, a short Spanish shield]. The bitter principle of Iceland moss, crystallizing in fine needles, and nearly insoluble in water.

cetyl (*se'-til*) [*cetus*, a whale], $C_{16}H_{33}$. An alcoholic radical existing in beeswax, and spermaceti.

cevadilla (*sev-ad-il'-ah*). See *sabadilla*.

cevadine (*sev'-ad-ēn*), $C_{32}H_{49}NO_9$. A crystalline alkaloid of cevadilla. See *veratrine*.

Ceylon sickness. Beriberi.

ceyssatite (*ses'-a-īt*) [*Ceyssat*, a village of Puy-de-Dôme, France]. A fossil earth from the village of Ceyssat, France, composed almost entirely of pure silica. It is used as an absorbent dusting-powder.

C. F. Abbreviation for Canadian Formulary of Unofficial Preparations.

Cg. Abbreviation for centigram.

C. G. S. Abbreviation for *centimeter, gram, second;* denoting that system of scientific measurements which takes the *centimeter*, the *gram*, and the *second* as the units respectively of distance, mass (or weight), and time.

C_2H_2. Acetylene.

C_6H_6. Benzene.

CH_4. Methane.

Chabert's disease (*shab-air'*) [Philibert *Chabert*, French veterinarian, 1737–1814]. Symptomatic anthrax; black-leg. **C.'s oil,** a mixture of crude animal oil and oil of turpentine.

Chaddock's external malleolar sign (*chad'-ock*) [Charles Gilbert *Chaddock*, American physician]. Extension of one or more of the toes when the external inframalleolar skin area is irritated; it is found in organic disease of the spino-cortical reflex paths.

Chadwick's sign [James Read *Chadwick*, American gynecologist, 1844–1905]. Same as *Jacquemier's sign*.

chæraphrosyne (*ke-raf-ros'-in-e*) [χαίρειν, to rejoice; ἀφροσύνη, senselessness]. Amenomania.

chæromania (*ke-ro-ma'-ne-ah*) [χαίρειν, to rejoice; μανία, madness]. Amenomania.

chaffbone (*chaf'-bōn*). A name for the inferior maxilla.

Chagas' disease (*chah'-gahs*) [Carlos *Chagas*, Spanish physician]. Parasitic thyroiditis.

Chagres fever (*shag'-ras*) [*Chagres*, a river on the isthmus of Panama]. A malignant form of malaria, endemic on the isthmus of Panama.

chain (*chān*). 1. A series of connected links of metal, etc. 2. In (organic) chemistry (a series of atoms linked together by one or more bonds). **c. écraseur,** an écraseur of which a chain forms the cutting part. **c.-saw,** a surgeon's saw, the teeth of which are linked together like a chain.

chalastic (*kal-as'-tik*) [χαλαστικός, making supple]. 1. Emollient, softening. 2. An emollient or laxative medicine.

chalastodermia (*kal-as-to-der'-me-ah*). Synonym of *dermatolysis*.

chalaza (*kal-a'-zah*) [*chalazion*]. One of the twisted cords binding the yolk-bag of an egg to the lining membrane of the shell; or that part of a seed where its coats unite with each other and the nucleus.

chalazia (*kal-a'-ze-ah*) [*chalazion*]. 1. The socalled hailstone sputa. 2. A chalazion.

chalazion (*kal-a'-ze-on*) [χαλάζιον, a small hailstone]. A tumor of the eyelid from retained secretion of the Meibomian glands, a Meibomian cyst. Syn., *porosis palpebræ*. **c. terreum,** one in which there is degeneration of the contents and change to calcium carbonate and cholesterin. Syn., *lithiasis palpebralis*.

chalazonephritis (*kal-a-zo-nef-ri'-tis*) [*chalazion; nephritis*]. Granular nephritis.

chalcitis (*kal-si'-tis*) [χαλκός, anything made of metal]. A severe inflammation of the eyes, marked at first by excessive lacrimation and sensitiveness to light, resulting in blurred vision and continued flow of mucus. It is due to rubbing the eyes after the hands have been used on brass, as is done by trolley-car conductors and workmen. Syn., *brassy eye; chalkitis*.

chalcosis (*kal-ko'-sis*) [χαλκός, copper]. A deposit of copper particles in the tissues.

chalice-cell (*chal'-is*). Goblet cell.

chalicosis (*kal ik-o'-sis*) [χάλιξ, gravel]. A disease of the lungs caused by the inhalation of dust or sand.

chalinoplasty (*kal-in-o-plas'-te*) [χαλινός, a bridle or rein; πλάσσειν, to form]. An operation to form a new frenum of the tongue.

chalk (*chawk*) [*calx*, limestone]. Calcium carbonate. See *calcium*. **c.-stone,** gout-stone—a deposit beneath the skin in gouty patients.

chalkitis (*kal-ki'-tis*). See *chalcitis*.

chalodermia (*kal-o-dur'-me-ah*) [χαλασις, a slackening; δέρμα, the skin] Dermatolysis. *q. v.*

chalone (*kal'-ōn*) [χαλᾶν, to loosen]. An inhibitory antacoid. See *hormone.*

chalonic (*kal-on'-ik*). Pertaining to chalone.

chalybeate (*ka-lib'-e-āt*) [χάλυψ, steel]. 1. Containing iron. 2. Having the color or taste of iron. 3. A substance or medicine containing iron.

Chamælirium (*kam-e-lir'-e-um*) [χαμαί, on the earth; λείριον, a lily]. A genus of plants of the order *Liliaceæ.* The rhizome of *C. luteum,* devil's-bit, of the United States and Canada, is a uterine tonic, anthelmintic, diuretic, and febrifuge. Dose of *aqueous infusion* (1 oz. to 1 pint) a wineglassful.

chamber (*tchām'-ber*) [*camera,* a chamber] A cavity or space. **c., anterior** (of the eye), the space between the cornea and the iris. **c., aqueous** (of the eye), the space between the cornea and lens. **c., posterior** (of the eye), the space between the iris and the lens. The chambers of the eye contain the aqueous humor. **c., resonance,** resonant chamber attached to a tuning-fork for acoustic investigation.

Chamberland filter (*shahm-ber-lahn'*)[Charles Edouard *Chamberland,* French bacteriologist, 1851–1908]. A filter made of unglazed porcelain; only ultramicroscopic microorganisms pass through it.

Chamberlen forceps (*tchām'-ber-len*) [Peter *Chamberlen,* English accoucheur, 1664–1728] The first used in obstetrics.

chamecephalic (*kam-e-sef-al'-ik*) [χαμαί, low; κεφαλή, head]. Characterized by chamecephaly.

chamecephalous (*kam-e-sef'-al-us*). See *chamecephalic.*

chamecephaly (*kam-e-sef'-al-e*) [χαμαί, low; κεφαλή, head]. In craniometry, that condition of the skull in which the cephalic index is 70° or less. A flat and receding skull.

chameconcha (*kam-e-kong'-kah*) [χαμαί, low; κόγχή, orbit]. In craniometry, an orbital index below 80.01°.

chameconchous (*kam-e-cong'-kus*) [χαμαί, low; κόγχή, concha]. In craniometry, having an orbital index of not more than 80°.

chamecranious (*kam-e-kra'-ne-us*) [χαμαί, low; κρανιόν, skull]. In craniometry, having the greatest length of the skull proportioned to its height.

chameleon-phenomenon (*kam-e'-le-on-fen-om'-e-non*). A peculiar reaction shown by *Bacillus pyocyaneus;* when grown on agar, a light-green color is imparted to the medium, which after 48 hours turns very dark green. On potato a yellowish-brown growth is formed, which turns green when the superficial portion is removed by scraping, but it soon resumes its brown color.

chameprosopic (*kam-e-pro-so'-pik*) [χαμαί, low; πρόσωπον, face]. Low-faced; having the zygomatic facial index below 90°.

chamocephalic (*kam-o-sef-al'-ik*) [χαμαί, on the ground, low; κεφαλή, head]. See *chamecephalic.*

chamois-skin (*sham'-wah-,* or *sham'-e-skin*). Properly the skin or tanned leather of the chamois; now prepared from split sheep-skin. It is used in surgery and for underclothing.

chamomile (*kam'-o-mil*). See *anthemis* and *matricaria.*

chamoprosopic (*kam-o-pro-so'-pik*) [χαμαί, on the ground; πρόσωπον, face]. See *chameprosopic.*

champacol (*sham'-pa-kol*) [*champaka,* Bengalese]. A camphor, $C_{17}H_{10}O$, from the champak-tree, *Michelia champaca.* Syn., *Champaca camphor.*

champagne (*sham-pān*) [Fr.]. An effervescent wine useful as a remedy for nausea and vomiting.

Champetier de Ribes bag. See *Ribes' bag.*

champignon (*shawm-pin-e-on(g)'*). A suppurative inflammation of the spermatic cord of a horse, developing sometimes after castration.

Championnière's disease. See *Lucas-Championnière.*

chancebone (*chans'-bōn*). A name for the ischium.

chancre (*shang-ker*) [Fr.]. A term formerly used indiscriminately for any primary venereal ulcer, but now generally applied to the initial lesion of syphilis (*q. v.*). **c., arsenical,** ulceration resembling a syphilitic chancre, but due to arsenic. **c., hard, c., Hunterian, c., indurated, c., infecting, c., non-suppurating, c., true,** the ulcer of syphilitic origin, which is followed by constitutional syphilis. **c., nonincubatory, c., noninfecting, c., simple, c., soft,** a contagious, suppurating, nonsyphilitic venereal ulcer, properly called *chancroid.* **c., Sahara,** the Aleppo boil.

chancriform (*shang'-kre-form*) [*chancre; forma,* form]. Like a chancre in appearance.

chancroid (*shang'-kroid*) [*chancre; εἶδος,* form]. A local, infective process, transmitted by sexual intercourse, and characterized by ulceration, local glandular involvement, and often suppuration It has been variously termed the soft, nonindurated, simple, or nonsyphilitic chancre. See *chancre.* **c., phagedenic,** chancroid with a tendency to slough. **c., serpiginous,** phagedenic chancroid that spreads superficially in curved lines.

chancroidal (*shang-kroi'-dal*). Pertaining to or of the nature of a chancroid.

chancrous (*shang'-krus*). Chancre-like.

change (*chānj*). The word is colloquially used for either the establishment or the cessation of the menstrual function. **c. of life,** the menopause.

channel (*chan'-el*) [ME., *chanel*]. See *canal* **c.s, intercellular.** 1. Irregular canals of communication between the intercellular spaces interposed between prickle-cells, and thought to be connected with the lymph-capillaries. 2. Tiny canals between gland-cells. **c.s, intracellular,** the minute canals which connect vacuoles in the cell-body of liver-cells with the biliary canaliculi or intercellular channels. **c., lymphatic, c., plasmatic.** See *Recklinghausen's canal,* and *canal, serous.*

channel-bone (*chan'-el-bōn*). The clavicle.

Channing's solution [William *Channing,* American physician]. Liquor hydrargyri et potassii iodidi.

Chantemesse reaction (*shahnt-eh-mes'*) [André *Chantemesse,* French bacteriologist, 1815–1919]. Same as ophthalmoreaction, *q. v.*

Chantreuil's method (*shang-treel'*). In pelvimetry, a method of ascertaining the distance between the tuberosities of the ischia (11 cm.) in estimating the size of the pelvic outlet. The two thumbs are placed upon the tuberosities, while an assistant measures the distance between them.

chap [ME., *chappen,* to cleave]. A slight or superficial fissure of the skin, usually upon the lips, hands, or nipples.

chaparra amargosa. A plant growing in Mexico and Texas; the infusion and the fluid extract are used in amebic dysentery.

chapasgar (*chap-as'-gar*). A culture medium made up of 1 part of ascitic fluid and 2 parts of 3 % agar with Chapoteau's peptone. The names of the ingredients (*Chap*oteau, *as*cites and *agar*) are mutilated to make the title.

Chapoteau's peptone (*shap-o-to'*). Trade name of a particular make of peptones; see *chapasgar.*

chappa (*chap'-ah*). The name among the Popo people in the colony of Lagos for a disease believed to be neither tuberculous nor syphilitic, marked by severe initial pains in muscles and joints, followed by swelling and the formation of round multiple nodules the size of a pigeon's egg; without forming abscesses these are exposed by ulceration of the skin. The disease finally attacks the bones.

characterizing group. A group of atoms in the molecule of a compound which distinguishes that class of compound from all other classes.

characterology (*kar-ak-ter-ol'-o-je*). The study of personality.

charbon (*shar'-bon*) [Fr., charcoal]. Anthrax (*q. v.*).

charcoal (*char'-kōl*) [ME., *charren*, to turn; *col*, coal]. Coal made by subjecting wood to a process of smothered combustion. See under *carbo.*

Charcot's artery (*shar-ko'*) [Jean Martin *Charcot*, French physician, 1825–1893]. The "artery of cerebral hemorrhage," one of the lenticulostriate arteries that passes through the outer part of the putamen **C.'s cirrhosis.** See *Hanot's disease.* **C.'s crystals,** octahedral crystals of the phosphate of Schreiner's base (spermin), found in the sputum of asthma, in seminal fluid, leukemic blood, and feces. **C.'s disease.** 1. Amyotrophic lateral sclerosis. 2. Arthropathy of tabes dorsalis 3. Multiple cerebrospinal sclerosis **C.'s fever,** a septic fever occurring in cases of jaundice due to impacted gall stones. **C.'s gait,** the gait of Freidreich's ataxia **C.'s intermittent claudication,** intermittent paresthesia of the legs attended with pain, tremor, and excessive perspiration due to arteriosclerosis; a condition first noted by French writers in apparently healthy horses and afterward observed in man. Syn., *angina cruris; angiosclerotic paroxysmal myasthenia; intermittent lameness; intermittent limping* **C.'s joint.** See *C.'s disease* (2). **C.'s method.** See *hypnotism.* **C.'s pain,** hysterical pain in the ovarian region **C.'s posterior root-zone.** See *Burdach's column.* **C.'s sensory crossway,** the posterior third of the posterior limb of the internal capsule. Syn., *carrefour sensitif.* **C.'s sign,** in facial paralysis the eyebrow is raised; in facial contracture it is lowered. Syn., *signe du sourcil.* **C.'s syndrome,** intermittent claudication, an affection connected with arteriosclerosis of the lower extremities **C.'s zones,** the hyterogenic zones

Charcot-Guinon's disease (*shar-ko'-gwe-nyong'*). Dementia complicating some cases of progressive muscular dystrophy.

Charcot-Leyden's crystals (*shar-ko-li'-den*). See *Charcot's crystals.*

Charcot-Marie's symptom. See *Marie's symptom.* **C.-M.'s type of progressive muscular atrophy,** the neurotic type of progressive muscular atrophy; progressive neural muscular atrophy, commencing in the muscles of the feet and the peroneal group. **C.-M.-Tooth's type of progressive muscular atrophy.** See *C.-M.'s type of progressive muscular atrophy.*

Charcot-Neumann's crystals. See *Charcot's crystals.*

Charcot-Robin's crystals. See *Charcot's crystals.*

Charcot-Vigouroux's sign. See *Vigouroux's sign.*

chariot (*char'-e-ot*). The movable coil of an induction apparatus.

charlatan (*shar'-lat-an*) [Ital., *ciarlatano*, quack]. A quack; a pretender to medical skill; an advertising doctor.

charlatanism, charlatanry (*shar'-lat-an-izm, -re*). 1. Quackery, *q. v.* 2. The practices of a quack.

Charles' law (*charlz*) [Jacques Alexander Cæsar *Charles*, French physicist, 1746–1823]. Equal increments of temperature add equal amounts to the product of the volume and pressure of a given mass of gas. The increase is $\frac{1}{273}$ of its volume measured at −273° C., which is the zero of absolute temperature.

charleyhorse (*char'-le-hors*). A rupture or strain of muscle or tendon fibers generally resulting from athletic efforts.

charpie (*shar'-pe*) [*carpere*, to pluck]. Picked or shredded lint; linen shreds for dressing wounds.

Charrière's guillotine (*shar-re-ār'*) [Joseph François Benoit *Charrière*, French instrument maker, 1803–1876]. An instrument for excising tonsils. **C.'s scale,** the French scale for measuring the size of urethral sounds or catheters; the consecutive numbers differ by $\frac{1}{3}$ mm.

charta (*kar'-tah*) [χάρτης, paper]. A paper. In pharmacy, a strip of paper the fibers of which are impregnated with a medicinal substance. Also a wrapper for holding powders. **c. cantharidis, c. epispastica,** blistering-paper. **c. emporetica,** porous or bibulous paper. **c. exploratoria,** test-paper. **c. sinapis** (U. S. P.), mustard-paper.

chartreuse (*shar-trooz'*) [Fr.]. A tonic cordial, obtained by distillation from various plants growing on the Alps.

chartula (*kart'-u-lah*) [dim. of *charta*]. A little paper, especially a paper containing a single dose of a medicinal powder.

chasma, chasmus (*kaz'-mah, kaz-mus*) [χασμός, a gaping]. A yawn.

Chassaignac's axillary muscle (*shas-a-nyak'*) [Edouard Pierre Marie *Chassaignac*, French surgeon, 1804–1879]. A nonconstant muscle that extends across the axilla from the lower border of the latissimus dorsi to the lower border of the pectoralis minor or to the brachial fascia. **C.'s tubercle,** the carotid tubercle on the transverse process of the sixth cervical vertebra.

chaudepisse (*shōd-pēs*) [Fr. "hot urine"]. The scalding and painful urination of the acute stage of gonorrhea.

chauffeur's fracture (*sho-fer*). Same as Colles' fracture; caused by "back fire" of the motor which suddenly jerks the crank handle in the opposite direction from which it is being turned.

chaulmestrol (*chawl-mes'-trol*). A mixture of the ethyl esters of the unsaturated fatty acids of chaulmoogra oil.

chaulmoogra, or **chaulmugra oil** (*chawl-moog'-rah*) [E. Ind.]. A fixed oil expressed from the seeds of *Gynocardia odorata*, a tree native to the East Indies. It is soluble in alcohol, and its properties are due to gynocardic acid. It is used in leprosy, in scaly eczema, psoriasis, and syphilitic skin affections. For external use, 1 part of the acid to 24 of petroleum. Internally, 5–10 min. (0.32–0.65 Cc.) of the oil or $\frac{1}{2}$–3 gr. (0.032–0.2 Gm.) of the acid, in capsules.

Chaussier's areola (*sho-se-a'*) [François *Chaussier*, French physician, 1746–1828]. The areola of inflammatory induration of a malignant pustule. **C.'s line,** the raphe of the corpus callosum.

Chautard's test for acetone (*sho-tar'*). Allow sulphurous acid to pass through a solution of 0.25 Gm. of fuchsin in 500 Cc. of water until the solution becomes yellow. On the addition of a portion of this to the liquid to be tested for ace-

tone it will assume a violet color if acetone is present.

Chauveau's retention theory (*sho-vo'*) [Auguste *Chauveau*, French veterinarian, 1827–1917]. See under *immunity*.

chawstick (*chaw'stik*). See *chewstik*.

chaya, c.-root (*chi'-ah*). The plant, *Aerva lanata*. Syn., *shaya-root*.

Ch. B. Abbreviation for *Chirurgiæ Baccalaureus*, Bachelor of Surgery.

$CH_2.CH_2$. Ethylene.

CH_3CH_2OH. Ethyl alcohol.

$CHCl_3$. Chloroform.

$CH_3.COOH$. Acetic acid.

Ch. D. Abbreviation for *Chirurgiæ Doctor*, Doctor of Surgery.

Cheadle-Barlow's disease [Walter Butler *Cheadle*, English physician]. See *Barlow's disease*.

check (*chek*) [OF., *eschec*, from Pers. *shāh*, a king]. A sudden stop. **c.-experiment.** See *control experiment*. **c.-ligament.** See *ligament, check-*.

checkerberry (*chek'-er-ber-e*). A popular name for *Gaultheria procumbens*.

cheek (*chēk*) [AS., *ceáce*]. The side of the face; it is composed of fat, areolar tissue, muscles, etc. **c. bone,** the malar bone. **c. teeth,** the molar teeth.

cheese (*chēz*) [AS., *cēse*]. A food prepared from the casein of skimmed or unskimmed milk.

cheesy (*chēz-e*) [*cheese*]. Of the nature of cheese. **c. degeneration, c. necrosis,** caseous degeneration or caseation; the conversion of the tissues into a substance resembling cheese. **c. tubercle,** a tubercle that has undergone cheesy necrosis.

cheil-, cheilo- (*kīl-, ki-lo-*). For words thus beginning see *chil-* or *chilo-*.

cheiranthin (*ki-ran'-thin*). A glucoside from the leaves and seeds of *Cheiranthus cheiri*, with action similar to that of digitalis.

cheiro- (*ki-ro-*). For words thus beginning see *chiro-*.

chekan, cheken (*chek'-en*) [Chilian]. 1. The leaves of *Eugenia cheken*, a South American shrub. It is diuretic and expectorant and similar in action to eucalyptus. It is used in chronic pharyngitis, laryngitis, etc. Dose of the *fluidextract* ½–1 dr. (2–4 Cc.). 2. The crude resin obtained from *Cannabis indica*.

chelafrin (*kel'-af-rin*). Same as adrenalin or epinephrin.

chelate (*ke'-lāt*) [χηλή, a claw]. 1. Claw-shaped. 2. Having claw-shaped appendages or processes.

chelen (*ke'-len*). Ethyl chloride.

chelerythrine (*kel-er'-ith-rēn*), $C_{19}H_{17}NO_4$. A poisonous alkaloid obtained from *Chelidonium*.

chelidon (*kel'-id-on*). The cubital fossa; bend of the elbow.

chelidonine (*kel-id'-o-nēn*) [*chelidonium*)], $C_{19}H_{17}N_3O_3 + H_2O$, or $C_{19}H_{17}NO_4$. A crystalline alkaloid of celandine (*Chelidonium majus*). **c. phosphate,** a white, crystalline powder, soluble in water; it is used as an analgesic. **c. sulphate,** $(C_{20}H_{19}NO_5)_2H_2SO_4$, a white crystalline substance, soluble in water; it is a narcotic like morphine, but less toxic. Dose 1½–3 gr. (0.1–0.2 Gm.).

chelidonism (*kel-id'-on-izm*). Poisoning by *Chelidonium majus;* it is marked by inflammation of the mouth and gastrointestinal tract and hematuria. It is due to the action of chelerythrine.

chelidonium (*kel-id-ō-ne-um*) [χελιδόνιον. celandine]. Celandine. The leaves and stems of *C. majus*, with properties due to a number of alkaloids and acids. It is a drastic cathartic and externally an irritant, and has been used in jaundice, whooping-cough, and catarrhal pneumonia. Dose of the *plant* 10–30 gr. (0.65–2.0 Gm.); of the *juice* 5–20 min. (0.32–1.3 Cc.). Unof.

chelidoxanthin (*kel-id-o-zan'-thin*) [*chelidonium*]. One of the bitter, crystalline constituents of celandine.

chelinisal (*kel-in'-is-al*). A suspension in physiological salt solution of turtle bacilli rendered avirulent by repeated passage through animals; it is given intramuscularly for cure and immunizing of tuberculous subjects.

cheloid (*ke'-loid*). See *keloid*.

cheloma (*ke-lo'-mah*). Same as *keloid*.

chelone (*kel'-on-e*). Balmony.

chelonin (*kel'-on-in*). See *balmony*.

chelotomy (*ke-lot'-o-me*). See *kelotomy*.

Chelsea pensioner (*chel'-se*) [*Chelsea*, town in England]. Compound confection of guaiacum; it contains guaiacum resin, 1; rhubarb, 2; acid potassium tartrate, 7 5; nutmeg, 1; sublimed sulphur, 14.5; and clarified honey, 74. It is a popular remedy (in England) for rheumatism and gout.

chematropism (*kem-at'-ro-pizm*). See *chemotropism*, and *chemotaxis*.

chemic, chemical (*kem'-ik-al, kem'-ik*) [*chemistry*.] Of or pertaining to chemistry. **c. antidote,** an antidote which decomposes a poison. **c. equation,** the formula representing a chemical reaction. **c. food,** compound syrup of phosphates. **c. messenger,** a hormone or chalone **c. reflex.** Same as *humoral reflex, q. v.*

chemicity (*kem-is'-it-e*). The state of having chemical properites.

chemicoanalytic (*kem-ik-o-an-al-it'-ik*). Relating to chemical analysis.

chemicocautery (*kem-ik-o-kaw'-ter-e*). Cauterization by means of chemical agents.

cheminosis (*kem-in-o'-sis*) [*chemistry; νόσος*, disease]. Any disease caused by chemical agents.

chemiotaxis, chimiotaxis (*kem-e-o-taks'-is, kim-e-o-taks'-is*). See *chemotaxis*.

chemise (*she-mēz'*). A form of surgical dressing made of muslin and applied after operations upon the rectum or bladder to control or prevent hemorrhage.

chemism (*kem'-izm*) [χημεία, chemistry]. 1. Chemical force. 2. Iatrochemistry or chemiatry. See *spagirism*. 3. The theory that assumes the development of the universe to be due to chemical processes.

chemist (*kem'-ist*). 1. One skilled in chemistry. 2. A druggist. **c. pharmaceutical,** a druggist.

chemistry (*kem'-is-tre*) [χημεία, chemistry]. The science of the molecular and atomic structure of bodies. **c., actinic, c., actino-,** that treating of decomposition of light. **c., analytic,** that concerned in the determination of the constituents and decomposition-products of substances; also in the estimation of the relative proportion of their elements and the number and interrelation of the atoms contained in a molecule. **c., animal,** that dealing with animal substances. **c., atomic,** that concerned in the structure of molecules, the relations of their contained atoms, and the laws governing their combination. **c., colloidal,** the study of the colloid state of materials; it is *not* the study of colloids **c., electro-.** See *electrochemistry* **c., empirical, c., experimental.** 1. The sum of chemical knowledge established by experiments. 2. The car-

rying on of experiments for determining chemical laws and knowledge. **c., forensic,** that concerned in legal investigations. **c., galvano-.** See *galvano-chemistry*. **c., inorganic,** the chemistry of substances which do not contain carbon. **c., organic,** the chemistry of organic substances, or of the carbon compounds. **c., physiological,** the chemistry of the vital processes of animals and plants. **c., pneumatic,** the chemistry of vapors and gases. **c., stœchiometric.** See *c., atomic*. **c., synthetic,** the building-up of compounds from their elements.

chemocephalus (*kem-o-sef'-al-us*) [χαμαί, low; κεφαλή head]. A person with a flat head.

chemoceptor (*kem-o-sep'-tor*). One of the side chains or receptors in a living cell, having the power of fixing chemical substances in the same way that bacterial toxins are fixed.

chemoimmunity (*kem-o-im-u'-nit-e*). Immunochemistry.

chemoimmunology (*kem-o-im-u-nol'-o-je*). The study of the chemical processes concerned with the problem of immunity.

chemolysis (*kem-ol'-is-is*). Chemical decay.

chemoreceptor (*kem-o-re-sep'-tor*) See *chemoceptor*.

chemoreflex (*kem-o-re'-fleks*) [*chemistry; reflex*]. A reflex produced by a chemical stimulus.

chemosis (*ke-mo'-sis*) [χήμωσις, a gaping]. Swelling of the conjunctiva.

chemosmosis (*kem-os-mo'-sis*) [*chemistry;* ὠσμός, an impulse]. Chemical action from osmosis.

chemosmotic (*kem-os-mot'-ik*). Relating to or due to chemosmosis.

chemosynthesis (*kem-o-sin'-thes-is*). The building up of compounds by chemical action.

chemotactic (*kem-o-tak'-tik*) [*chemotaxis*]. Pertaining or relating to chemotaxis.

chemotaxis (*kem-o-taks'-is*) [*chemistry;* τάσσειν, to order, arrange]. Cellular attraction and repulsion. It is displayed by the protein constituents of the protoplasm of various species of bacteria, as well as by proteins from a great variety of sources. The qualifications positive and negative are added according as the phenomenon is one of attraction or repulsion.

chemotherapeutic index (*kem-o-ther-ap-u'-tik*). Ehrlich's term for the relationship which exists between organotropism and parasitotropism, or between the toxicity of a compound for the body and the toxicity for the parasites. Kolmer represents it as follows C.I. =

$$\frac{\text{maximal tolerated dose per kg of body weight}}{\text{minimal curative dose per kg. of body weight}}$$

chemotherapy (*kem-o-ther'-ap-e*). 1 Treatment based on the affinity supposed to exist between various chemical agents and the body tissues or invading microorganisms. 2. "The prevention or treatment of disease by chemical disinfection or inhibition of the parasitic causes without marked or serious toxic effects." (Kolmer).

chemotic (*ke-mot'-ik*) [*chemosis*]. Pertaining to or marked by chemosis.

chemotropism (*kem-ot'-ro-pism*) [*chemistry;* τροκή, a turning]. The destruction of bacteria by phagocytes; or of the phagocytes by bacteria. In biology, the attraction of leukocytes by certain chemical substances held in solution in the blood. Cf. *chemotaxis*.

chenopodium (*ken-o-po'-de-um*) [χήν, a goose; πόδιον, a little foot]. American wormseed; the fruit of *C. ambrosioides*, or *anthelminticum*, a plant native to the United States, with properties due to a volatile oil, which is the only preparation used. It is an efficient anthelmintic against the roundworm. **c., oil of** (*oleum chenopodii*, U. S. P.). Dose 5–15 min. (0.32–1.0 Cc.).

cheoplastic (*ke-o-plas'-tik*) [χέειν, to pour; πλαστικός, plastic]. Made soft and yielding by heat. **c. metal,** an alloy composed of tin, silver, and bismuth, with a small trace of antimony.

Cherchewsky's disease (*sher-shef'-ske*) [Michael *Cherchewsky*, Russian physician]. Nervous ileus. An affection, simulating intestinal obstruction; it has been noted in neurasthenia.

cheromania, chæromania (*ker-o-ma'-ne-ah*). See *amenomania*.

Cheron's serum. Sodium chloride 2, phenol 1, disodic phosphate 4, sodium sulphate 8, in distilled water to 100.

cherophobia (*ker-o-fo'-be-ah*) [χαιρεῖν, to rejoice; φόβος, fear]. Fear of gaiety, or of happiness.

cherry (*cher'-e*) [κεράσος, cherry-tree]. Bark of the cherry, *Prunus serotina*, a mild bitter and tonic containing tannin. Dose of *fluidextract* ½–1 dr. (2–4 Cc.). *Prunin*, a concentrated extract; dose 1–3 gr. (0.065–0.2 Gm.). See *choke-cherry* and *Prunus virginiana*. **c.-laurel,** European evergreen cherry, *Prunus laurocerasus*. Water distilled from its leaves is used in the same way as dilute hydrocyanic acid. Dose 30 min–1 dr (2–4 Cc.). **c., wild.** See *prunus*.

chervil (*shur'-vil*) [AS., *cerfille*]. The European potherb *Anthriscus cerefolium*. It is said to be deobstruent, diuretic, and emmenagog.

Chervin's method (*sher'-van*) [Claudius *Chervin*, French teacher, 1824–1896]. A method of treating stuttering.

chest. See *thorax*. **c., alar, c., paralytic, c., phthisical, c., pterygoid,** a narrow thorax having a winged appearance from abnormal projection of the wings of the scapula. **c., barrel-,** a peculiar formation of the chest observed in cases of long-standing emphysema of the lungs; it is round, like a barrel, and in respiration is lifted vertically instead of being expanded laterally. **c., emphysematous.** See *c., barrel-*.

chestnut. See *castanea*.

chewstick (*chu'-stik*). The bark of *Gonania domingensis*, a popular aromatic bitter in the West Indies. It is also used as a dentifrice and masticatory. Dose of the fluidextract j–ij.

Cheyne's operation (*chān*) [William Watson *Cheyne*, English surgeon]. *For the radical cure of femoral hernia;* after reducing the hernia, a flap of the pectineus muscle is raised and made to cover the hernial orifice.

Cheyne-Stokes' asthma (*chān-stōks*) [John *Cheyne*, Scotch physician, 1777–1836; William *Stokes*, Irish physician, 1804–1878]. Dyspnea due to pulmonary congestion in advanced chronic myocarditis. **C.-S.'s nystagmus,** nystagmus in which the oscillations of the eyeball have a rhythmic variation similar to the rhythm of Cheyne-Stokes' respiration. **C.-S.'s phenomenon, C.-S.'s respiration, C.-S.'s symptom,** a peculiar type of breathing in which there is a rhythmic increase of the respirations up to a certain degree of rapidity, then gradually decreasing again to temporary cessation. It occurs in certain grave affections of the central nervous system, heart, and lungs, and in intoxications.

CHI$_3$. Iodoform.

Chian (*ki'-an*) Pertaining to Chios, an island in the Ægean Sea. **C. turpentine.** See *terebinthina*.

chiasm, chiasma (*ki'-asm, ki-as'-mah*) [χιάζειν, to make a cross, as an ×]. 1. The optic commis-

sure. 2. A crossing **c., Camper's.** See *Camper's chiasm.*

chiasmal (*ki'-az-mal*). Pertaining to the optic chiasm.

chiasmatic (*ki-az-mat'-ik*). Pertaining to the optic chiasm.

chiastometer (*ki-as-tom'-et-er*) [χιαστός, crossed; μέτρον, a measure]. An instrument for measuring any deviation of the optic axes from parallelism

Chiazzi's operation (*ke-at'-se*). Epiplopexy.

chibou (*see-boo'*) [Fr.]. The resin or gum of *Bursera gummifera*, a tree in Florida and tropical America; it is locally valued in diseases of the lung and kidneys, and is used in various plasters and ointments; it is called also *cachibou* and *archipin.*

chickahominy fever (*chik-a-hom'-in-e*). A synonym of *Typhomalarial fever.*

chicken (*chik'-en*) [AS., *cicen*] The domestic fowl. **c.-breast,** an abnormally prominent condition of the sternum and of the sternal region; pigeon-breast; it is seen in rhachitic persons, etc. **c. cholera.** See *cholera, chicken.* **c.-fat clot,** a clot of blood, yellowish in color, consisting largely of fibrin, and containing but few red cells. **c.-pox.** See *varicella.*

chicle. See *balata.*

chicory (*chik'-or-e*). *Cichorium intybus*, a composite plant of Europe and Asia, naturalized and growing in the United States. Its ground root is used to adulterate coffee.

chielin (*ki'-el-in*). A thick, nontoxic, brown, viscous substance isolated from the bulb of the tulip. It is recommended in eczema and in skin diseases in veterinary practice.

Chiene's lines [John *Chiene*, Scotch surgeon, 19th cent.]. Imaginary lines designed to aid in localizing the cerebral centers in operations upon the brain.

chignon fungus (*shēn-yon(g)*) [Fr.]. A fungoid disease of the hair in which oval or roundish masses surround the hair-shaft at irregular intervals. It is also miscalled *chignon gregarine.*

chigoe (*chig'-o*) [Fr., *chique*]. Sand-flea; *sarcopsylla penetrans*, a small parasite of the skin, affecting usually that portion between the toes and fingers; also the red harvest mite, leptus irritans. It is also written *chigo, chegoe, chigga, chiggre, chigger, jigger.*

chilalgia (*kil-al'-je-ah*) [χεῖλος, lip; ἄλγος, pain]. Neuralgia affecting the lips.

chilblain (*chil'-blān*) [AS., *cēle*, cold; *blēgen*, a boil]. A congestion and swelling of the skin, due to cold, and attended with severe itching or burning; vesicles and bullæ may form, and these may lead to ulceration. Syn., *erythema pernio; pernio.*

childbed. The popular term for the puerperal state. **c. fever,** puerperal fever.

childbirth. Parturition.

child-crowing. The crowing sound of the respiration that characterizes laryngismus stridulus.

chilectropion (*ki-lek-tro'-pe-on*) [χεῖλος, lip; *ectropion*]. Eversion of the lip.

Chili saltpeter. Sodium nitrate.

chilitis (*ki-li'-tis*) [χεῖλος, **lip**; ιτις, inflammation]. Inflammation of the **lip.**.

chill (*chil*) [AS., *cēle*, **chilliness**]. A sensation of cold accompanied **by shivering**, usually appearing shortly **after** exposure to cold or wet. It is frequently the initial symptom of acute disorders, as pneumonia, etc. It **is a** prominent symptom of various forms of malarial fever.

chills and fever. A term for intermittent fever.

chilo- (*ki-lo-*) [χεῖλος, lip]. A prefix meaning relating to the lips.

chiloangioscope (*ki-lo-an'-je-o-skōp*) [χεῖλος, lip; ἀγγεῖον, vessel; σκοπεῖν, to look]. An apparatus for observing the circulation of the blood in the human lip.

chiloangioscopy (*ki-lo-an-je-os'-ko-pe*) [χεῖλος, lip; ἀγγεῖον, vessel; σκοπεῖν, to look]. The use of the cheiloangioscope.

chilocace (*kil-ok'-as-e*) [χεῖλος, lip; κακός, evil]. A firm, reddish swelling of the lip in scrofulous children.

chilognathopalatoschisis (*ki-log-nath-o-pal-at-os'-kis-is*) [χεῖλος, lip; γνάθος, jaw; *palatum*, the palate; σχίσις, a splitting]. Marchand's term for a malformation marked by fissure of the lip, alveolar process, and palate.

chilognathoprosoposchisis (*ki-log-nath-o-pros-o-pos'-kis-is*) [χεῖλος, lip; γνάθος, jaw; πρόσωπος, face; σχίσις, fissure]. Persistence of primary lateral facial cleft.

chilognathouranoschisis (*ki-log-nath-o-u-ran-os'-kis-is*) [χεῖλος, lip; γνάθος, jaw; οὖρανος, palate; σχίσις, fissure]. Hare lip and cleft palate.

chilognathus (*ki-log'-na-thus*) [χεῖλος, lip; γνάθος, jaw]. Harelip.

chilogramma (*ki-lo-gram'-mah*) [χεῖλος, lip; γράμμα, a mark; *pl., cheilogrammata*]. Jadelot's labial line.

Chilomastix (*ki-lo-mas'-tiks*) [χεῖλος, lip; μάστιξ, whip]. Cercomonas, *q. v.*

chiloncus (*ki-long'-kus*) [χεῖλος, lip; ὄγκος, tumor]. Tumor of the lip.

chiloplasty (*ki'-lo-plas-te*) [χεῖλος, lip; πλάσσειν, to form] Any plastic operation upon the lip.

chilorrhagia (*ki-lor-a'-je-ah*) [χεῖλος, lip; ῥήγνυναι, to burst forth]. Hemorrhage from the lips.

chiloschisis (*ki-los'-kis-is*) [χεῖλος, lip; σχίσις, a split]. Harelip. **c. complicated,** harelip attended with fissure of the palate or of the alveolar arch.

chilostomatoplasty (*ki-lo-sto-mat-o-plas'-te*) [χεῖλος, lip; στόμα, mouth; πλάσσειν, to form]. Chiloplasty including restoration of the mouth.

chilotomy (*ki-lot'-o-me*) [χεῖλος, lip; τόμη, incision] Excision of a part of the lip.

chimaphila (*ki-maf'-il-ah*) [χεῖμα, winter; φίλος, loving]. Pipsissewa; prince's-pine; the leaves of *C. umbellata*, an evergreen found in the United States, an astringent tonic and excellent diuretic. The bruised leaves are used as a rubefacient. It is valuable in dropsy, in renal disease, and in affections of the urinary passages. **c., decoction of** (*decoctum chimaphilæ*, B. P.). Dose 1–3 oz. (30–90 Cc.). **c., fluidextract of** (*fluidextractum chimaphilæ*, U. S. P.). Dose ½–2 dr. (2–8 Cc.).

chimaphilin (*ki-maf'-il-in*). A resinoid from the leaves of *Chimaphila umbellata;* diuretic in dose of from one to four grains (0.065 to 0.26 Gm.)

chimney-sweep's cancer. See *carcinoma, chimney sweep's.*

chimogene (*ki'-mo-jēn*) [χειμών, cold winter weather; γεννᾶν, to produce]. A highly volatile liquid proposed by Vanderweyde as a substitute for rhigolene, ether, etc., producing cold in local anesthesia.

chin [AS., *cin*]. The mentum; the lower part of the face, at or near the symphysis of the lower jaw. **c.-cough,** whooping cough. **c., double,** a fleshy puffiness under the chin; buccula, *q. v.* **c.-jerk, c.-reflex.** See *jaw-jerk* and *reflex.*

china (*kin'-ah* or *ke'-nah*). Same as *cinchona.*

chinaphenin (*ki-nah-fen'-in*). Phenetidin quinine carbonic acid ester; used in whooping cough, and as an antipyretic.

chinaphthol (*kin-af'-thol*). A yellow, bitter, insoluble powder, used as an intestinal antiseptic. Dose 7½–75 gr. (0.5–5.0 Gm.) daily. Syn., *quinine betanaphthol-α-monosulphate.*

chinaseptol (*kin-a-sep'-tol*). See *diaphtol.*

chineonal (*kin'-e-on-al*). A chemical combination of quinine and veronal; quinine diethyl barbiturate. It is said to produce less disagreeable after effects than quinine.

chinine, chininum (*kin'ĕn, kin-in'-um*). See *quinine.*

chiniofon (*kin'-e-o-fon*). Iodohydroxy-quinoline sulphonate. Used in amebic dysentry.

chinoform (*kin'-o-form*). A compound of formaldehyde with cinchotannin. Syn., *quinoform.*

chinoidine, chinoidinum (*kin-oi'-dĕn, kin-oi-di'-num*) [Sp., *china*]. Quinoidine. A mixture of amorphous alkaloids obtained in the manufacture of quinine. It has the therapeutic properties of quinine. Dose 1–20 gr. (0.065–1.3 Gm.). **c., animal,** a substance giving, like quinine, a blue fluorescence in solutions of dilute acids, first obtained by Bence-Jones from the liver, but found in all the organs and tissues of the body, especially in the nerves. **c. borate,** yellowish scales, soluble in water and alcohol, used as is chinoidine. Dose 8–15 gr. (0.5–1.0 Gm.). **c. citrate,** reddish scales, soluble in water and alcohol. Dose 5–25 gr. (0.32–1.6 Gm.). **c. tannate,** a yellow or brown powder, slightly soluble in alcohol; antipyretic, astringent, and tonic. Dose 2–12 gr. (0.13–0 8 Gm.). In veterinary practice it is given in hog-cholera in 24 gr. (1.5 Gm.) doses 3 times daily.

chinol (*kin'-ol*). Quinoline monohypochlorite, $C_9H_6N.ClO$, a white, crystalline, odorless powder, with a pungent taste; soluble in alcohol, almost insoluble in cold or hot water. It is antipyretic and analgesic. Dose 3–5 gr. (0.19–0.32 Gm.).

chinoline, chinolina (*kin'-o-len, kin-o-li'-nah*). See *quinoline.*

chinone (*kin'-ōn*). See *quinone.*

chinopyrin (*kin-o-pi'-rin*). See *quinopyrine.*

chinoral (*kin'-or-al*). An oily, bitter liquid containing quinine and chloral; antiseptic and hypnotic. Dose 1–15 gr. (0 06–1.0 Gm.).

chinosol (*kin'-o-sol*). See *quinosol.*

chinotoxin (*kin-o-toks'-in*). A synthetic compound said to possess properties similar to those of curare. Syn., *disquinolin dimethyl sulphate.*

chinotropin (*ki-no-tro'-pin*). Quinate of urotropin; used as a urinary antiseptic and uric acid solvent; dose, gr. 5–15 (0.3–10 Gm.).

chinovin (*kin'-o-vin*) [*china*, quinine], $C_{30}H_{38}O_8$. A glucoside obtained from cinchona.

chiolin (*ki'-ol-in*). A proprietary skin remedy.

chionablepsia, chionablepsy (*ki-on-ab-lep'-se-ah, ki-on-ab-lep'-se*) [χώv, snow; ἀβλεψία, without sight]. Loss of sensibility of the retina resulting from the exposure of the eyes to reflection of the sunlight upon snow; snow-blindness.

chionanthin (*ki-o-nan'-thin*) [χώv, snow; ἄνθος, a flower]. A precipitate from the tincture of the rootbark of *Chionanthus virginiana;* it is an aperient, diuretic, tonic, and narcotic. Dose 1 to 3 grains.

Chionanthus (*ki-o-nan'-thus*) [χώv, snow; ἄνθος, a flower]. A genus of oleaceous trees and shrubs. **C. virginiana,** fringe-tree or poison-ash. The root is used as a vulnerary.

chionyphe (*ki-on'-if-e*) [χώv, snow; ὑφή, a texture]. 1. See *mycetoma.* 2. A genus of fungi. **c. Carteri,** a parasitic fungus, apparently the cause of the disease known as *fungus foot,* or *madura foot, q. v.*

chiragra (*ki-rag'-rah*) [χείρ, the hand; ἄγρα, a seizure]. Gout in the hand.

chiralgia (*ki-ral'-je-ah*). See *chiragra.*

chiralkol (*ki-ral'-kol*) [χείρ, hand; *alcohol*]. Trade name of a soap, containing alcohol combined with a fat; used as a disinfectant.

chirapsia (*ki-rap'-se-ah*) [χείρ, hand; ἅψις, touching]. Friction with the hand; massage.

chirarthritis (*ki-rar-thri'-tis*) [χείρ, hand; ἄρθρον, a joint; ῖτις, inflammation]. Rheumatism or arthritis of the hand.

chirata, chiretta (*ke-ra'-tah, ke-re'-tah*) [Hind., *chirāetā,* a species of gentian]. The dried plant of *Swertia chirayta.* It resembles gentian in its therapeutic properties, and is an excellent tonic. It does not contain tannin. Dose of the *powdered plant* 15–30 gr. (1–2 Gm.). **c., fluidextract of** (*fluidextractum chiratæ,* U. S. P.). Dose 15–30 min. (1–2 Cc.). **c., infusion of** (*infusum chiratæ,* B. P.). Dose 2 oz. (64 Cc.). **c., tincture of** (*tinctura chiratæ,* B. P.) (10% strength). Dose ½–2 dr. (2–8 Cc.).

chiratin, chirettin (*kir-at'-in, ki-ret'-in*) [Hind., *chirāetā,* a species of gentian], $C_{28}H_{48}O_{18}$. A light-yellow, crystalline, bitter glucoside, obtained from chirata.

chiretta (*kir-et'-ah*). See *chirata.*

chirismus (*ki-riz'-mus*) [χειρισμός, a handling]. 1. Manipulation; a kind of massage. 2. Spasm of the hand.

chiro-, cheiro- (*ki-ro-*) [χείρ, the hand]. A prefix meaning hand.

chirocinesthetic. See *chirokinesthetic.*

chirognomy (*ki-rog'-no-me*) [χείρ, hand; γνώμων, judge]. Physiognomy of the hand.

chirokinesthetic (*ki-ro-kin-es-thet'-ik*) [χείρ, hand; *kinesthetic*]. Relating to the subjective perception of the motions of the hand, particularly in writing.

chirol (*ki'-rol*). A solution of resins and fatty oils in a mixture of ethers and alcohols, used as a protective varnish for the hands in surgery.

chirology (*ki-rol'-o-je*) [χείρ, hand; λόγος, science]. A method of communicating with deaf-mutes by means of the hands; it is distinct from dactylology.

chiromancy (*ki-ro-man'-se*). See *palmistry.*

chiromania (*ki-ro-ma'-ne-ah*) [χείρ, hand; μανία, insane desire]. Masturbation.

chiromegaly (*ki-ro-meg'-al-e*) [χείρ, hand; μέγαλη, large] Enlargement of one, or both hands, but not of akromegalic nature. Syn., *pseudoakromegaly.*

chirometer (*ki-rom'-et-ur*) [χείρ, hand; μέτρον, measure]. Osiander's instrument for measuring a distance on the finger in manual pelvimetry.

chiropelvimeter (*ki-ro-pel-vim'-et-er*) [*chiro-; pelvis;* μέτρον, a measure]. In manual pelvimetry, an instrument for measuring the hand.

chiroplasty (*ki'-ro-plas-te*) [χείρ, hand; πλάσσειν, to form]. A plastic operation on the hand.

chiropodalgia (*ki-ro-pod-al'-je-ah*). See *acrodynia.*

chiropodist (*ki-rop'-o-dist*) [*chiro-;* πούς, foot]. A surgeon or person who professionally treats diseases of the hands and feet, especially corns, bunions, and affections of the nails.

chiropody (*ki-rop'-od-e*) [χείρ, hand; πούς, foot]. The business or profession of a chiropodist.

chiropompholyx (*ki-ro-pom-fo'-liks*) [χείρ, hand; πόμφολυξ, blister]. Dysidrosis; pompholyx; an ill-defined, inflammatory skin-disease confined to the hands and feet, characterized by peculiar vesicles or blebs, arranged in groups.

chiropractic (*ki-ro-prak'-tik*) [χείρ, the hand; πράσσειν, to do]. A method of restoring health by palpating the spinal column for subluxations or misplaced vertebra and adjusting them by hand without other aids or adjuncts.

chiropractor (*ki-ro-prak'-tor*) [see *chiropractic*]. One who practises chiropractic.

chiroscope (*ki'-ro-skōp*) [χείρ, hand; σκοπεῖν, to see]. A device for correcting strabismus, by Ernest E.] Maddox, contemporary English physician.

chirospasm (*ki-ro-spazm*) [χείρ, the hand, σπασμός, a drawing]. Writer's cramp.

chirotheca, cheirotheca (*ki-ro-the'-ka*) [*chiro-*; θήκη, case]. A long, narrow roller bandage for wrapping the fingers. **c. completa,** one for all the fingers of a hand. **c. incompleta,** one for a single finger only.

chirurgeon (*ki-rur'-jon*) [χειρουργός, a surgeon]. A surgeon.

chirurgery (*ki-rur'-jer-e*) [*chirurgia*, from χείρ, hand; ἔργον, work]. Same as *surgery*.

chirurgia (*ki-rur'-je-ah*) [see *chirurgeon*]. Surgery

chirurgic, chirurgical (*ki-rur'-jak-al*) [χειρ-ουργία, surgery]. Pertaining to surgery.

chirurgicogynecological (*ki-rur-je-ko-jin-e-kol-oj'-ik-al*). Pertaining to surgical operations for gynecological conditions.

chitin (*ki'-tin*) [χιτών, a tunic], $C_{18}H_{28}N_2O_{10}$. A colorless skeleton; the animal analogue of the cellulose of plants.

chitinization (*kit-in-iz-a'-shun*). Transformation into chitin.

chitinous (*ki'-tin-us*). Resembling chitin. **c. degeneration,** amyloid degeneration.

chitonitis (*ki-ton-i'-tis*) [χιτών, a tunic; ιτις, inflammation]. Inflammation of any investing membrane.

chitosan (*kit'-o-san*), $C_{14}H_{28}N_2O_{10}$. A cleavage-product of chitin heated to 180° C. with alkali and a little water; it is soluble in dilute acids.

chittim-bark (*chit'-im-bark*). See *cascara sagrada*.

chlamydobacteria (*klam-id-o-bak-te'-re-ah*) [χλαμύς, mantle; *bacteria*]. Bacteria surrounded by a thick capsule or sheath See *table* p. 856.

chlamydospore (*klam'-id-o-spor*) [χλαμύς, mantle; σπόρα, seed]. In biology, applied to a spore having its own protective envelope.

chlamydozoa (*klam-id-o-zo'-ah*) [χλαμύς, cloak; ζῷον, animal]. Protozoa consisting of a cell or cells surrounded by a capsule.

chliasma (*kli-az'-mah*) [χλιαίνειν, to make warm]. A fomentation, a poultice.

chloasma (*klo-az'-mah*) [χλοάζειν, to be pale green]. A deposit of pigment in the skin, occurring in patches of various sizes and shapes, and of a yellow, brown, or black color. Syn., *discolorations; melanoderma; melasma*. **c. hepaticum,** liver-spots; a form following dyspepsia and popularly associated with hepatic disturbance. **c. phthisicorum,** the brown patches upon the skin of the forehead or upper portions of the cheeks in tuberculous patients. **c. uterinum,** chiefly located on the forehead, temples, cheeks, nipples, and median line of abdomen. They are marked during pregnancy, and often during menstruation.

chloracetic acid (*klor-as-e'-tik*). See *acid, chloracetic*.

chloracetization (*klor-as-et-iz-a'-shun*). The production of local anesthesia by chloroform and glacial acetic acid.

chloracetyl (*klor-as'-et-il*). 1. C_2Cl_2. A radical formed from acetyl by the replacement of hydrogen with chlorine. 2. Acetyl chloride.

chloracne (*klor-ak'-ne*) [*chlorine; acne*]. An acneiform eruption of the face, chest and back, of workers in chlorine, and the chlorides.

chloral (*klō'-ral*) [*chlorine; aldehyde*], C_2Cl_3HO. A pungent, colorless, mobile liquid The name is often misapplied to chloral hydrate. Syn., *acetochloral; trichlorated* or *trichloracetic aldehyde*. **c., anhydroglyco-,** chloralose. **c., anhydrous,** chloral as distinguished from chloral hydrate. **c. antipyrine.** See *hypnal*. **c., butyl-** (*butyl-chloral hydras*, B. P.), croton-chloral, $C_4H_5Cl_3 + OH_2O$, a solid occurring in crystalline scales, resembling chloral hydrate, but made with butyl, C_4H_9, as a base, instead of ethyl, C_2H_5. Its properties are similar to those of chloral, but are much feebler. Dose 5–20 gr. (0.32–1.3 Gm.) in syrup. **c.-caffeine,** the residue upon evaporation of a concentrated aqueous or alcoholic solution of chloral hydrate 7.8 parts and caffeine 10 parts; hypnotic, sedative, and analgesic. Injection, 3–6 gr. (0.2–0.4 Gm.) 2 or 3 times daily. **c., camphorated,** a liquid made by triturating equal parts of chloral hydrate and camphor; it is an anodyne. **c hydrate** (*chloralum hydratum*, U. S. P.), a colorless, crystalline solid having the composition $C_2HCl_3(HO)_2$; the hydrate of chloral. It is a powerful hypnotic, antispasmodic, and depressant to the cerebral, medullary, and spinal centers, and to a limited extent is an anesthetic. It is serviceable in fevers accompanied by cerebral excitement, in chorea, convulsions, and in delirium tremens, but should be used with great caution. Dose 5–20 gr. (0.32–1.3 Gm.). **c., syrup of** (B. P.). Dose ½–2 dr. (2–8 Cc.). **c. urethane.** See *uralium*.

chloralacetaldoxime (*klo-ral-as-et-al-doks'-im*), $C_4H_6NO_2Cl_3$. A white, crystalline powder, soluble in alcohol and ether, melting at 74° C. It is hypnotic.

chloralacetophenonoxime (*klo-ral-as-e-to-fe-n o n-oks'-im*), $C_6H_5.CH_3C$. Colorless prisms, soluble in alcohol and ether, melting at 81° C. It is used in tetanus and epilepsy.

chloralacetoxime (*klo-ral-as-et-oks'-im*), $C_4H_8N_2O_2Cl_3$. A white, crystalline powder, soluble in alcohol and ether, and melting at 72° C. It is hypnotic.

chloralamide (*klo-ral-am'-id*). See *chloralformamide*.

chloralbacid (*klo-ral-bas'-id*). A compound of chlorin and albumin. It is used as a tonic in gastric disorders Dose 7½–15 gr (0.5–1.0 Gm.). **c. sodium,** a compound of chloralbacid and sodium; it is used in gastric and intestinal affections. Dose 15–30 gr. (1–2 Gm.) before meals.

chloralbenzaldoxime (*klo-ral-ben-zal-doks'-im*), $C_9H_8NO_2Cl_3$. A white, crystalline powder, soluble in alcohol and ether, melting at 62° C. It is, hypnotic and antiseptic.

chloralcamphoroxime (*klo-ral-kam-for-oks'-im*) $C_{12}H_{18}NO_2Cl_3$. A white, crystalline powder, soluble in alcohol and ether, melting at 98° C. It is hypnotic, stimulant, and antiseptic.

chloralformamide (*klo-ral-form'-am-id*). A crystalline solid (*chloralformamidum*, U. S. P.), $C_3H_4Cl_3NO_2$. Used as a hypnotic. Dose 30–45 gr. (2–3 Gm.).

chloralic (*klo-ral'ik*). Relating to chloral.

chloralid (*klo'-ral-id*) [*chloral*], $C_8H_3Cl_9O_2$. A substance obtained when trichlorlactic acid is heated to 150°, with an excess of chloral; it crystallizes from alcohol and ether in large prisms, and is insoluble in water.

chloralimide (*klo-ral'-im-id*) [*chloral; imide*], $CCl_3.CH.NH$. A hypnotic allied to chloral, soluble in alcohol. The dose is the same as that of chloral hydrate.

chloralin (*klo'-ral-in*). An antiseptic fluid containing monochlorphenol and bichlorphenol. It is used in 2 to 3 % solution; as a gargle, in 0.5 to 1% solution.

chloralism (*klo'-ral-izm*) [*chloral*]. 1. Chloral-poisoning, the morbid state caused by the injudicious use of chloral. 2. The habit of using chloral.

chloralization (*klo-ral-iz-a'-shun*). 1. See *chloralism*. 2. Anesthesia by means of hydrated chloral.

chloralize (*klo-ral-īz*) [*chloral*]. To put under influence of chloral.

chloralorthoform (*klor'-al-or'-tho-form*). Trade name of a combination of chloral and orthoform recommended as a local anæsthetic.

chloralose (*klo'-ral-ōs*) [*chloral; glucose*], $C_8H_{11}Cl_3O_6$. Anhydroglyco-chloral; a product of the action of anhydrous chloral upon glucose. It is used as a hypnotic. Dose 3–14 gr. (0.2–0.9 Gm.).

chloraloximes (*klo-ral-oks'-ims*). A series of chemical compounds the physiological activities of which are claimed to be due to their splitting up in the system into chloral hydrate and their respective oximes. See *chloralacetoxime*, *chloralbenzaldoxime*, etc.

chloraloxylose (*klo-ral-o-zi'-lōs*) [*chloral; xylose*]. A combination of hydrated chloral and xylose. A convulsivant.

chloralum (*klo'-ral-um*). 1. Chloral. 2. Crude aluminum chloride mixed with various sodium and calcium salts; a disinfectant. **c. hydratum**, the official name of chloral hydrate in the U. S. P.

chloralurethane (*klo-ral-ū'-re-thān*). Same as *ural*.

chloramide (*klo'-ram-id*). Same as *chloralamide*.

chloramine (*klor'-am-ēn*). Same as chloramine-T, *q. v.*

chloramine-T. An antiseptic solution used in the treatment of wounds. Chemically, it is sodium paratoluene-sulphochloramine.

chloranemia, chloranæmia (*klor-an-e'-me-ah*). Synonym of **chlorosis.**

chloranodyne (*klor-an'-o-din*) [*chlorine; anodyne*]. A proprietary remedy, introduced as an improvement on chlorodyne. It contains morphine hydrochloride, tincture of cannabis indica, chloroform, dilute hydrocyanic acid, and aromatics. Dose for an adult 15 min. (1 Cc.).

chlorargentate (*klor-ar'-jen-tāt*). A combination of silver chloride with the chloride of some other radical or element.

chlorarsenous (*klor-ar-se'-nus*). Arsenous and also containing chlorine.

chlorate (*klo'-rāt*). A salt of chloric acid.

chlorated (*klo'-ra-ted*). Containing, combined with, or charged with chlorine.

chloratrifice (*klor-at'-rif-is*). A tooth paste containing potassium chlorate, borax, sodium bicarbonate, and sugar.

chlorax (*klor'-aks*). Trade name of an antiseptic said to contain chlorine in a stable solution.

crahlone ze(*klor'-az-ēn*). Same as *chloramine*-T.

chlorazoi (*klo'-raz-ol*) A highly toxic, oily liquid, obtained from albumin, glutin, or dried muscle by action of strong nitric and hydrochloric acids.

chlorbenzoyl (*klōr-ben'-zo-il*). See *benzoyl chloride*.

chlorbromide (*klōr-bro'-mid*). A combination of a radical with chlorine and bromine.

chlorbutanol (*klor-bū'-tan-ol*). Same as chloretone; the latter is a proprietary name.

chlorbutol (*klor'-bū-tol*). Same as chloretone, *q. v.*

chlorcamphor (*klōr-kam'-for*). A name for several compounds of chlorine and camphor.

chlorcosane (*klor'-ko-sān*). Trade name of a liquid used as a solvent for dichloramine-T.; it is a chlorinated paraffin containing its chlorine in stable or non-active combination.

chloremia, chloræmia (*klo-re'-me-ah*)[χλωρός, green; αἷμα, blood]. A blood-disorder, either idiopathic or associated with other ailments, consisting in a diminution of the percentage of the hemoglobin and a decrease in the number of red corpuscles.

chlorepatitis (*klōr-ep-at-i'-tis*) [*chlorine; hepatitis*]. Chronic hepatitis combined with chlorosis.

chlorephidrosis (*klōr-ef-id-ro'-sis*) [*chlorine*; ἐφίδρωσις, perspiration]. A condition characterized by greenish perspiration.

chlorethyl (*klo-reth'-il*). See *ethyl chloride*.

chlorethylene (*klōr-eth'-il-ēn*). A substance formed from ethylene by replacement of one or more atoms of hydrogen with chlorine. **c. chloride, c. dichloride,** $C_2H_2Cl_2$, an oil with odor like that of ethene chloride, boiling at 115° C., employed as an anesthetic.

chlorethylidene (*klōr-eth'-il-id-ēn*). Chlorine substitution compound of ethylidene. **c. chloride, c. dichloride,** $C_2H_4Cl_2$, liquid used as anesthetic. Syn. *chlorinated ethyl chloride: monochlorethylidene dichloride.*

chloretone (*klōr'-et-ōn*). See *acetone chloroform*.

chlorhematin (*klōr-hem'-a-tin*). See *hemin*.

chlorhydria (*klōr-hi'-dre-ah*). An excess of hydrochloric acid in the stomach.

chlorhydric (*klōr-hi'-drik*). Composed of chlorine and hydrogen; hydrochloric.

chloric (*klo'-rik*). Pertaining to or containing chlorine. **c. acid.** See *acid chloric*. **c. ether.** 1. See *ethyl chloride*. 2. See *chloroform, spirit of*.

chloride, chlorid (*klo'-rid*) [*chlorine*]. A binary compound one of the elements of which is chlorine. **c., methyl-.** See under *anesthetic, local*.

chloridimetry (*klor-id-im'-et-re*) [*chloride; μέτρον*, measure]. Estimating the amount of chlorides in the urine (or other fluid).

chloridrometer (*klor-id-rom'-et-ur*) [*chloride; μέτρον*, measure]. An apparatus for the estimation of chlorides in the urine.

chloriduria (*klor-id-ū'-re-ah*). Presence of excess of chlorides in the urine.

chlorimetry (*klor-im'-et-re*) [*chlorine; μέτρον*, a measure]. The estimation of the amount of available chlorine in a compound.

chlorine, chlorin (*klo'-rin*) [χλωρός, green]. Chlorum. Cl =35.46; quantivalence I. A greenish-yellow gas, prepared by decomposing sodium chloride, NaCl. It is highly irritative to the skin and mucous membranes, producing spasmodic closure of the glottis. It is a valuable disinfectant. The *liquor calcis chloridi* (B. P.) contains 1 pound of the salt to a gallon of water. Chloride of lime (*calx chlorinata*, U. S. P.), a hypochlorite of calcium, contains free chlorine and is a valuable disinfectant. Dose, internally, 3–6 gr. (0.2–0.4 Gm.). **c.-hunger, the condi-**

tion of the body when chlorine (usually in the form of common salt) is lacking. Among the immediate results of this deficiency are indigestion and albuminuria. **c.-vapor** (B. P.), used for inhalation. **c.-water** (*liquor chlori compositus*, U. S. P.), contains 4 % of the gas in solution. It is a good antiseptic wash. Dose internally 10–30 min. (0.65–2.0 Cc.).

chlorinated (*klo'-rin-a-ted*). Containing chlorine or combined with it. **c. soda, surgical solution of,** same as Dakin's solution, *q. v.*

chloriodoform (*klo-ri-o'-do-form*), $CHCl_2I$. A yellow oil obtained from chloroform by replacement of one atom of chlorine by an atom of iodine; it boils at 131° C. and does not solidify.

chloriodolipol (*klo-ri-o-do-lip'-ol*). A combination of creosote and chlorinated phenols, a disinfectant and antiseptic; in surgery, 2 to 3 % solution is employed; for inhalation in diseases of the air-passages, 5 % solution.

chlorite (*klo'-rīt*). Any one of the salts of chlorous acid; they are used as bleaching and oxidizing agents.

chlormethyl (*klor-meth'-il*). Methyl chloride.

chloroalbumin (*klo-ro-al'-bū-min*). A derivative of peptone, protogen, or albumoses by action of chlorine.

chloroanemia, chloroanæmia (*klo-ro-an-e'-me-ah*) Same as chloranemia.

chloroblast (*klor'-o-blast-*) [χλωρός, green; βλάστος germ]. Erythroblast.

chlorobrom (*klo'-ro-brōm*) [*chlorine; bromine*]. A solution each ounce of which contains 30 gr. of chloralamide and of potassium bromide. It is hypnotic and useful in sea-sickness.

chlorobromhydrin (*klo-ro-brom-hi'-drin*). A substance formed from glycerol by replacement of two molecules of hydroxyl with one atom of chlorine and one of bromine. Syn., *Allyl chlorobromhydrin.*

chlorodyne (*klo'-ro-dīn*) [*chlorine;* οδύνη, pain]. An English proprietary remedy supposed to contain chloroform, ether, morphine, cannabis indica, hydrocyanic acid, and capsicum. It is anodyne and narcotic. Dose 10–30 min. (0.65–2.0 Cc.).

chloroform (*klo'-ro-form*) [χλωρός, green; *formyl*]. Methyl trichloride, $CHCl_3$. A heavy, colorless liquid obtained by the action of chlorinated lime on methyl-alcohol. The commercial article, *chloroformum venale*, contains 2 % of impurities. Administered internally in large doses, chloroform produces narcosis and violent gastro-enteritis. In small doses it is antispasmodic and carminative. Chloroform has an agreeable odor and a sweetish taste. It solidifies in the cold, boils at 62° C., and has a specific gravity at 15° C. of 1.502. Externally it is much employed as an ingredient of rubefacient and anodyne liniments. Mixed with a large percentage of air and inhaled, it is one of the most valuable of general anesthetics, but occasionally (1 3000) causes death by cardiac paralysis. See under *anesthetic.* Deep injections of chloroform in the vicinity of the sciatic nerve have been recommended in sciatica. Syn., *chlorotormum; chloroformyl.* **c., alcoholized,** a mixture of chloroform and alcohol. **c., ammoniated,** equal parts of ammonia in alcohol and chloroform; antipyretic and anodyne. **c., Anschuetz's,**

$$(C_6H_4{<}^{CO}_{O})_4.2CHCl_3,$$

a crystalline substance which liberates pure chloroform on application of gentle heat. Syn., *salicylid chloroform.* **c., emulsion of** (*emulsum chloroformi*, U. S. P.), chloroform, 4; expressed oil of almond, 6; tragacanth, 1.5; water sufficient to make 100 parts. **c., gelatinized,** equal parts of chloroform and white of egg shaken together. **c. liniment** (*linimentum chloroformi*, U. S. P.), chloroform, 300 Cc.; soap liniment, 700 Cc. **c. and morphine, tincture of** (B. P.), a substitute for chlorodyne. Each dose of 10 min. (0.65 Cc.) contains chloroform, 1½ min.; ether, ½ min.; alcohol, 1½ min.; morphine hydrochloride, ⅛ gr.; dilute hydrocyanic acid, ½ min.; oil of peppermint, $\frac{1}{80}$ min.; fluidextract of licorice, 1½ min.; treacle and syrup q. s. **c., Pictet's,** chloroform obtained in a pure state by crystallizing at a low temperature. **c., spirit of** (*spiritus chloroformi*, U. S. P.), pure chloroform, 10; alcohol, 90 parts. Dose 10 min.–1 dr. (0.65–4.0 Cc.). **c., tincture of, compound** (*tinctura chloroformi composita*, B P.), chloroform, 2; alcohol, 8; compound tincture of cardamom, 10 Dose 20 min.–1 dr. (1.3–4.0 Cc.). **c.-water** (*aqua chloroformi*, U S. P., B. P.). Dose ½–2 oz. (15–60 Cc.).

chloroformin (*klo-ro-form'-in*). A poison extracted by Auclair from tubercle bacilli by means of chloroform. Syn., *chloroformobacillin.*

chloroformism (*klo'-ro-form-izm*) [*chloroform*]. 1. The use of chloroform to excess for its narcotic effect. 2. The symptoms produced by this use of the drug.

chloroformization (*klo-ro-form-i-za'-shun*). 1. The act of administering chloroform as an anesthetic. 2. The anesthetic results from the inhalation of chloroform.

chloroformum (*klo-ro-for'-mum*). Chloroform.

chlorogenine (*klo-roj'-en-ēn*). See *alstonin* (2).

chlorol (*klo'-rol*). A solution of sodium chloride, mercury bichloride, and hydrochloric acid, each, 1 part, and 3 % of copper sulphate in 100 parts of water; it is disinfectant and antiseptic.

chloroleukemia (*klo-ro-lū-ke'-me-ah*). Leukemia combined with chlorosis.

chlorolin (*klo'-ro-lin*). A solution said to consist mainly of the chlorphenols; recommended as a disinfectant and as an antiseptic wash in 2 to 3 % solution.

chlorolymphoma (*klo-ro-limf-o'-mah*) [χλωρός, green; *lympha*, water; δμα, a tumor]. Another name for chloroma, it is thought by some to be a variety of lymphoma, from its containing lymphocytes.

chloroma (*klo-ro'-mah*) [χλωρός, green; δμα, a tumor: *pl., chloromata*]. "Green cancer;" a rare variety of sarcoma, of a greenish tint, usually seated upon the periosteum of the bones of the head.

chlorometer (*klo-rom'-et-ur*) [χλωρός, green; μέτρον, a measure]. An apparatus for the estimation of the amount of chlorine in a compound.

chloromorphine (*klo-ro-mor'-fēn*) An intermediate product between morphine and apomorphine.

chloronaphthol (*klo-ro-naf'-thol*) A disinfectant, non-poisonous substitute for carbolic acid; said to be a combination of creosote with an alkali. It is used as a dip for cattle to destroy ticks.

chloropercha (*klo-ro-purch'-ah*). A solution of guttapercha in chloroform It is used in dentistry as nonconducting cavity linings, pulp-cappings, and for filling the roots of pulpless teeth.

chlorophane (*klo'-ro-fān*) [χλωρός, green; φαίνειν, to show]. A yellowish-green chromophane. See *chromophane*.

chlorophenol (*klor-o-fe'-nol*). A substitution product formed by the action of chlorine on phenol; used as an antiseptic.

chlorophthisis (*klo-ro-ti'-sis*). Pulmonary tuberculosis associated with chlorosis.

chlorophyl, chlorophyll (*klo'-ro-fil*) [χλωρός, green; φύλλον, leaf]. The green coloring-matter of plants. It decomposes carbon dioxide, setting free oxygen and forming new organic compounds. This decomposition takes place only or chiefly in the presence of sunlight. The chlorophyl is contained in certain parts of the protoplasm of the plant. It is the substance by the agency of which carbohydrates are formed in green plants.

chloropia, chloropsia (*klo-ro'-pe-ah, klo-rop'-se-ah*) [χλωρός, green; ὄψις, vision]. Disordered or defective vision in which all objects appear green.

chloroplastid (*klo-ro-plas'-tid*) [χλωρός, green; πλασσεῖν, to form or mould]. In biology, a chlorophyl-granule.

chloroplastin (*klo-ro-plas'-tin*) [χλωρός, green; πλαστός, formed]. Schwartz's name for the protoplasm in chlorophyl grains.

chloroquinone (*klo-ro-kwin'-ōn*). Any chlorine substitution-compound of quinone.

chlorosalol (*klo-ro-sal'-ol*). See *chlorphenyl salicylate*.

chlorosarcoma (*klo-ro-sar-ko'-mah*). See *chloroma*.

chlorosin (*klo'-ro-sin*). A compound of albumin and chlorine, used in gastric catarrh.

chlorosis (*klo-ro'-sis*) [χλωρός, green]. The "green sickness." A form of anemia, most common in young women, and characterized by a marked reduction of hemoglobin in the blood, with but a slight diminution of red corpuscles. In some cases there is a hyperplasia of the sexual organs and the heart and large blood-vessels. The symptoms are those of anemia—a greenish color of the skin, gastric and menstrual disturbances. Syn., *chloranemia; chloremia; green sickness; morbus virgineus; pallor luteus; pallor virginum; parthenosis*. **c. adultarum**, that occurring between 30 and 40 years of age. Syn., *acmæochlorosis; chlorosis tarda*. **c. ægyptiaca, c. æthiopum, c., Egyptian**, uncinariasis. **c. florida**, a rare form of chlorosis in which the color is high. **c. pituitosa**. Synonym of *mucous colitis*. **c. tarda**. See *c. adultarum*. **c., tropical, c. tropica**, uncinariasis.

chlorosonin (*klo-ro'-son-in*). A compound of chloral and hydroxylamine; it is hypnotic.

Chlorostigma (*klo-ro-stig'-mah*) [χλωρός, green; στίγμα, stigma]. A genus of plants of the order *Asclepiadaceæ*. *C. stuckertianum* is a plant of South America; the root, stem, and leaves are said to possess powerful galactagogic properties. An alkaloid, *chlorostigmine*, has been extracted.

chlorotic (*klo-rot'-ik*) [*chlorosis*]. 1. Relating to chlorosis. 2. A person affected with chlorosis.

chlorous (*klor'-us*). Containing or combined with chlorine; generally restricted to compounds containing chlorine combined with oxygen, but containing less oxygen than the chloric compounds.

chloroxyl (*klor-oks'-il*). Trade name of the hydrochloride of phenylcinchoninic acid; used in the same way as cinchophen.

chlorozone (*klo'-ro-zōn*) [*chlorine; ozone*]. A yellow liquid assumed to be a mixture of chlorine and ozone; it is formed by passing nascent chlorine through caustic soda; its composition is not known. It is a strong bleaching-agent and disinfectant.

chlorphenol (*klōr-fe'-nol*) [*chlorin; phenol*], $C_6H_4Cl.OH$. Monochlorphenol, a substance possessed of antiseptic properties. It is recommended for inhalation in diseases of the respiratory passages.

chlorphenyl (*klōr-fen'-il*). A substance obtained from trichlorphenic acid by action of nitric acid. **c. salicylate**, $C_6H_4(OH)CO.OC_6H_4Cl$, a crystalline substance obtained from a mixture of orthochlorphenol and parachlorphenol by action of phosphorus pentachloride. The ortho-compound, *chlorsalol*, is used as a surgical antiseptic; the para-compound, as a substitute for phenyl salicylate. Dose 60–90 gr. (4–6 Gm.) daily. Syn., *salicylic chlorphenol ester*.

chlorpicrin (*klor-pik'-rin*). Chloropicrin.

chlorsalol (*klor-sa'-lol*). See under *chlorpheny salicylate*.

chlorum (*klo'-rum*) [*chlorin*]. The official pharmaceutical name of chlorine. See *chlorine*.

chluruemia (*klor-ū-re'-me-ah*) [*chloride; αἷμα*, blood]. Retention of urinary chlorides in the blood.

chloruret (*klor'-ū-ret*). The same as *chloride*.

chloryl (*klo'-ril*). A mixture of ethyl and methyl chlorides; an anesthetic. Syn., *coryl*.

Chlumsky's button (*klum'-ske*). An intestinal button made of pure magnesium after the pattern of the Murphy button. It remains undissolved for four weeks, only the outer part becoming softer.

Ch. M. Abbreviation for *Chirurgiæ Magister*, Master of Surgery.

$C_6H_5(NH_2)$. Phenyl amine.

$C_5H_{11}NO_2$. Amyl nitrite.

$C_3H_5(NO_3)_3$. Trinitroglycerol.

$C_5H_4N_4O_3$. Uric acid.

$C_{12}H_{22}O_{11}$. Cane sugar.

$(C_2H_5)_2O$. Ethyl oxide, ether.

$C_6H_{12}O_6$. Grape sugar.

$C_6H_{10}O_5$. Starch.

choana (*ko'-an-ah*) [χοάνη, a funnel; *pl.*, *choanæ*]. 1. A funnel-like opening. 2. A name applied to the posterior nasal orifices.

choanoid (*ko'-an-oid*) [*choana; εἶδος*, likeness]. Funnel-shaped; infundibuliform.

chocolate (*chok'-ol-āt*) [Mex., *chocolatl*, chocolate]. A dried paste prepared from the powder of cacaoseeds (see *Cacao*) with various mucilaginous and amylaceous ingredients. It is used to prepare a beverage, and also as a vehicle, especially for quinine. **c., acorn-**, a mixture of ground acorns with pure chocolate, prepared according to the formula of Liebreich by Stollwerk, of Cologne. It contains nearly 2 % of tannic acid and is used in the dietetic management of diarrhea in enteritis.

chœradology (*ker-ad-ol'-o-je*) [χοιράς, scrofula; λόγος, science]. The science of scrofula.

C_2H_5OH. Ethyl alcohol.

$C_3H_5(OH)_3$. Glycerol.

C_6H_5OH. Phenol.

choke (*chōk*) [ME., *choken*, to choke]. To suffocate; to prevent access of air to the lungs by compression of or by obstructing the trachea. **c.-cherry**, the fruit of *Prunus virginiana* (not of the Pharmacopeia), common in the United States. It is antispasmodic, tonic, and slightly

astringent. c. damp, a name given by miners to carbon dioxide gas; called also *black-damp.*

choked disc (*chōkd*). See *papillitis.*

chokes (*chōks*). The same as caisson disease, *q. v.*

choking (*chōk'-ing*). Partial of complete suffocation, whether by the lodgment of food, or any foreign body in the larynx, trachea, pharynx, or esophagus, or by the inhalation of any irrespirable gas or vapor.

chol-, cholo- [χολή, bile]. Prefixes meaning bile.

cholæmia. Same as *cholemia.*

cholagogic (*kol-ag-oj'-ik*) [*cholagogue*]. 1. Stimulating the flow of bile. 2. A cholagogue.

cholagogue, cholagog (*kol'-ag-og*) [*chol-; ἀγωγός*, leading]. 1. Stimulating the flow or the secretion of bile. 2. Any agent that promotes the flow of bile.

cholalic acid (*kol-a'-lik*). See *acid, cholic.*

cholangeitis (*kol-an'-je-i'-tis*). *Cholangitis, q. v.*

cholangiostomy (*kol-an-je-os'-to-me*) [*chol-; ἀγγεῖον*, vessel; *στόμα*, mouth]. The formation of a fistula into the gall-bladder.

cholangiotomy (*kol-an-je-ot'-o-me*) [*chol-; ἀγγεῖον*, vessel; *τομή*, a cutting]. Incision of an intrahepatic bile-duct for removal of a calculus.

cholangitis (*kol-an-ji'-tis*) [*chol-; ἀγγεῖον*, vessel; *ιτις*, inflammation]. Inflammation of a bile-duct. **c., obliterative,** closure of the bile-ducts the result of inflammation.

cholate (*kōl'-āt*). Any salt of cholic acid.

cholecyanin (*kol-e-si-an'-in*). Synonym of *bilicyanin.*

cholecyst, cholecystis (*kol'-e-sist, kol-e-sis'-tis*) [*chol-; κύστις* a bladder]. The gall-bladder.

cholecystalgia (*kol-e-sis-tal'-je-ah*) [*cholecyst, ἄλγος*] Biliary colic.

cholecystectasia (*kol-e-sis-tek-ta'-se-ah*) [*cholecyst; ἔκτασις*, a distention]. Distention or dilatation of the gall-bladder.

cholecystectomy (*kol-e-sis-tek'-to-me*) [*cholecyst; ἐκτομή*, a cutting out]. Excision of the gall-bladder.

cholecystendesis. See *cholecystendysis.*

cholecystendysis (*kol-e-sis-ten'-dis-is*) [*cholecyst; ἔνδυσις*, an entering]. Cholecystotomy.

cholecystenteroanastomosis (*kol-e-sis-ten'-ter-o-an-as-to-mo'-sis*). Same as *cholecystenterostomy.*

cholecystenterorrhaphy (*kol-e-sist-en-ter-or'-af-e*) [*cholecyst; enterorrhaphy*]. The operation of suturing the gall-bladder to the small intestine.

cholecystenterostomy (*kol-e-sist-en-ter-os'-to-me*) [*cholecyst; enterostomy*]. The artificial establishment of a communication between the gall-bladder and the intestine.

cholecystic (*kol-e-sis'-tik*) [*cholecyst*]. Relating to the gall-bladder.

cholecystis (*kol-e-sis'-tis*). See *cholecyst.*

cholecystitis (*kol-e-sis-ti'-tis*) [*cholecyst; ιτις*, inflammation]. Inflammation of the gall-bladder. **c., Eberth's,** that due to *Bacillus typhi abdominalis.*

cholecystocolostomy (*kol-e-sis-to-ko-los'-to-me*) [*cholecyst; colostomy*] The surgical establishment of a passage between the gall-bladder and the colon.

cholecystocolotomy (*kol-e-sis-to-ko-lot'-o-me* [*cholecyst; colotomy*]. Incision into the gall-bladder and colon.

cholecystoduodenostomy (*kol-e-sis-to-du-od-en-os'-to-me*) [*cholecyst; duodenostomy*]. The establishment of an artificial communication between the gall-bladder and the duodenum.

cholecystogastrostomy (*kol-e-sis-to-gas-tros'-to-me*) [*cholecyst; gastrostomy*]. Making an opening between the gall-bladder and the stomach.

cholecystogram (*kol-e-sis'-to-gram*) [*cholecyst-; γράφειν*, to write]. A roentgen ray picture of the gall-bladder.

cholecystography (*kol-e-sis-tog'-ra-fe*) [*cholecyst-; γράφειν*, to write]. Depicting the gall-bladder after it has been made opaque to the x-rays.

cholecystoileostomy (*kol-e-sis-to-il-e-os'-to-me*) [*cholecyst; ileostomy*]. The formation of an opening between the gall-bladder and the ileum.

cholecystojejunostomy (*kol-e-sis-to-je-jun-os'-to-me*) [*cholecyst; jejunostomy*]. The establishment of a communication between the gall-bladder and the jejunum.

cholecystokinin (*kol-e-sis-tok'-in-in*) [*cholecyst; κινεῖν*, to move]. An endocrine principle from an extract of the upper intestinal mucosa, which, injected into the blood, causes the gall bladder to contract and evacuate.

cholecystolithiasis (*kol-e-sis-to-lith-i'-as-is*) [*cholecyst; λίθος*, stone]. The presence of one or more gallstones in the gall bladder.

cholecystolithotripsy (*kol-e-sis-to-lith'-ot-rip-se*) [*cholecyst; λίθος* a stone; *τρίβειν* to crush]. The crushing of gall-stones in the gall-bladder.

cholecystoncus (*kol-e-sis-tong'-kus*) [*cholecyst; ὄγκος*, a tumor] A swelling on the gall-bladder.

cholecystopexy (*kol-e-sis'-to-pek-se*) [*cholecyst; πήξις*, fixation]. Suture of the gall-bladder to the abdominal wall.

cholecystorrhaphy (*kol-e-sist-or'-af-e*) [*cholecyst; ῥαφή*, a seam]. Suture of the gall-bladder, especially suture to the abdominal wall.

cholecystostomy (*kol-e-sist-os'-to-me*) [*cholecyst; στόμα*, mouth]. The establishment of an opening into the gall-bladder.

cholecystotomy (*kol-e-sist-ot'-o-me*) [*cholecyst; τέμνειν*, to cut]. Incision of the gall-bladder to remove gall-stones, etc.

choledoch (*kol'-e-dok*) [*choledochus*] 1 Conducting bile. 2. A bile-duct. 3. The common bile-duct.

choledochectasia (*kol-ed-o-kek-ta'-ze-ah*) [*choledochus; ἐκτάσις*, a sketching]. Dilatation of the common bile duct.

choledochectomy (*kol-ed-o-kek'-to-me*) [*choledochus; ἐκτομή*, excision]. Excision of a part of the common bile-duct.

choledochendysis (*kol-ed-ok-en'-dis-is*) [*choledochus; ἔνδυσις*, an entry]. See *choledochotomy.*

choledochitis (*kol-ed-o-ki'-tis*) [*choledochus; ιτις*, inflammation]. Inflammation of the common bile-duct.

choledochoduodenostomy (*kol-ed-o-ko-dū-od-en-os'-to-me*) [*choledochus; duodenum; στόμα*, mouth]. The surgical establishment of a passage between the common bile-duct and the duodenum.

choledochoenterostomy (*kol-ed-o-ko-en-ter-os'-to-me*) [*choledochus; ἔντερον*, bowel; *στόμα*, mouth]. The surgical establishment of a passage between the common bile-duct and the small intestine.

choledocholithiasis (*kol-ed-ok-o-lith-i'-as-is*) [*choledochus; lithiasis*]. The formation of a calculus in the common bile-duct.

choledocholithotomy (*kol-ed-ok-o-lith-ot'-o-me*) [*choledochus; lithotomy*]. The incision of the common bile-duct for the removal of gall-stones.

choledocholithotripsy (*kol-ed-o-ko-lith'-o-trip-se*) [*choledochus; λίθος*, a stone; *τρίβειν*, to rub]. The crushing of a gall-stone in the common bile-duct, without opening the duct.

choledocholithotrity (*kol-ed-o-ko-lith-ot'-rit-e*) [*choledochus; λίθος*, a stone; *terere*, to rub]. The crushing of a gall-stone in the common bile-duct.

choledochoplasty (*kol-ed-o-ko-plas'-te*) [*choledochus; πλάσσειν*, to form]. A plastic operation on the common bile duct.

choledochostomy (*kol-ed-o-kos'-to-me*) [*chol-*; δέχεσθαι, to receive; στόμα, mouth]. The formation of a fistula in the common bile-duct through the abdominal wall.

choledochotomy (*kol-ed-o-kot'-o-me*) [*choledochus*; τομή, section]. An incision into the common bile-duct.

choledochus (*kol-ed'-o-kus*) [χολή, bile; δέχεσθαι, to receive]. Receiving or holding bile. **c., ductus communis**, the common excretory duct of the liver and gall-bladder.

choleglobin (*kol-e-glo'-bin*) [χολή, bile; *globin*]. Latschenberger's name for the antecedent of bile-pigment, resulting, in his estimation, from the decomposition of the coloring-matter of blood.

cholehemia, cholehæmia (*kol-e-hem'-e-ah, -he'-me-ah*) See *cholemia*.

choleic (*kol-e'-ik*) [χολή, bile]. Pertaining to the bile.

cholein (*kol'-e-in*) [χολή, bile]. A mixture of several principles of the bile; a fatty principle found in bile.

cholelith (*kol'-e-lith*) [*chol-*; λίθος, a stone]. A biliary calculus or gall-stone.

cholelithiasis (*kol-e-lith-i'-as-is*) χολή, bile, *lithiasis*]. The presence of, or a condition associated with, calculi in the gall-bladder or in a gall-duct.

cholelithotomy (*kol-e-lith-ot'-o-me*) [*cholelithiasis*; τέμνειν, to cut]. An incision for the removal of gall-stones.

cholelithotripsy (*kol-e-lith-ot-rip'-se*) [*cholelithiasis*; τρῖψις, a rubbing]. The operation of crushing a gall-stone.

cholelithotrity (*kol-e-lith-ot'-re-te*). See *cholelithotripsy*.

cholemesis (*kol-em'-es-is*) [*chol-*; ἔμεσις, vomiting]. The vomiting of bile.

cholemia, cholæmia (*kol-e'-me-ah*) [χολή, bile; αἷμα, blood]. The presence of bile in the blood.

cholemic (*ko-le'-mik*) [*chol-*; αἷμα, blood]. Relating to cholemia; marked or caused by cholemia.

choleokinase (*kol-e-o-kin-ās'*). A proprietary capsule containing bile principles and duodenal ferment

choleplania (*kol-e-pla'-ne-ah*) [χολή, bile; πλάνη, a wandering]. Jaundice.

choleprasin (*ko-le-pra'-zin*). A bile-pigment.

cholepyrrhin (*kol-e-pir'-in*) [χολή, bile; πυρρός, orange-colored]. 1. The brown coloring-matter of bile. Syn., *bilepyrrhin*. 2. Bilirubin.

cholera (*kol'-er-ah*) [χολή, bile, ῥοία, a flow]. 1. A name given to a number of acute diseases characterized mainly by large discharges of fluid material from the bowels, vomiting, and collapse. 2. A synonym of *Asiatic cholera*. **c., Asiatic, c., algid**, an acute, specific, highly malignant disease, existing in India and the tropics of Asia during the entire year, and occasionally spreading as an epidemic over large areas. It is characterized by vomiting, alvine discharges resembling flocculent rice-water, severe cramps, and collapse. The rate of mortality varies from 10 to 66 %, the average being over 50 %. The cause is the comma bacillus of Koch, which is always found in the rice-water discharges. The germs commonly gain entrance into the system by means of the drinking-water. **c. asphyctica**, Asiatic cholera marked by early collapse and speedy death **c., barbel.** See under *barbel*. **c., bilious**, a form of the disease attended with excessive discharge of bile. **c.-blue.** See under *pigment*. **c.-cells, c.-corpuscles**, fungi found in dejecta of cholera patients. **c., chicken**, a very fatal epidemic disease of fowls, marked by tumefaction of the lymphatic glands, with inflammation and ulceration of the digestive organs. **c., English.** See *c. morbus* **c., epidemic.** Synonym of *Asiatic cholera*. **c.-fever.** 1. Cholera-typhoid. 2. Intermittent cholera. **c., hog**, an infectious disease attacking swine and characterized by a patchy redness of the skin, with inflammation and ulceration of the bowels, enlargement of the abdominal glands, and congestion of the lungs. **c. infantum**, the "summer complaint" of infants and young children; an acute disease occurring in warm weather, and characterized by pain, vomiting, purgation, fever, and prostration. The disease is supposed to be caused by the bacillus of Shiga, and is favored by the prolonged action of heat, together with errors in diet and hygiene. It is most common among the poor and in hand-fed babes. The disease is of short duration, death frequently ensuing in from 3 to 5 days. **c., intermittent**, a form of simple cholera sometimes accompanying the onset of tertian fevers. **c., malignant**, Asiatic cholera. **c. morbus**, an acute catarrhal inflammation of the mucous membrane of the stomach and intestine, with pain, purging, vomiting, spasmodic contractions of the muscles, etc. It is a disease of the heated term and is very similar to Asiatic cholera in its symptomatology. **c. nostras.** Same as *c morbus*. **c. orientalis**, Asiatic cholera. **c.-red.** See under *pigment*. **c. sicca**, a term applied to those cases of Asiatic cholera in which rice-water liquid is found in the intestine after death, though none had been voided during life. **c., sporadic.** See *c. morbus*. **c. suppressa.** See *c. sicca*. **c.-typhoid**, a soporific condition resembling typhus, lasting from 2 to 7 days, and attributed to uremia resulting from acute nephritis. It frequently follows Asiatic cholera.

choleragenic (*kol-er-a-jen'-ik*) [*cholera*; γεννᾶν, to produce]. Tending to produce, or to spread, cholera.

choleraic (*kol-er-a'-ik*) [*cholera*]. Pertaining to or resembling cholera **c. diarrhea**, diarrhea characterized by a profuse, exhausting discharge of watery material.

cholerase (*kol'-er-ās*). The special bacteriolytic enzyme of the cholera vibrio. Cf. *pyocyanase* and *typhase*.

choleresis (*kol-er-e'-sis*) χολή, bile]. Secretion of bile.

choleretic (*kol-er-et'-ik*). 1. Pertaining to choleresis. 2. Referring to any agent which will increase the flow of bile.

choleric (*kol'-er-ik*). 1. Having abundant bile. 2. Applied to a temperament easily excited to anger. 3. Choleraic.

choleriform (*kol-er'-if-orm*) [*cholera*; *forma*, form]. Resembling or appearing like cholera.

cholerigenous (*kol-er-ij'-en-us*) [*cholera*; γένεσις, production]. Giving origin to cholera.

cholerine (*kol-er-ēn'*) [dim. of *cholera*]. A mild form of Asiatic cholera, or the initial stage of a more severe form.

cholerization (*kol-er-i-za'-shun*). Inoculation with cholera as a measure of protection against the disease.

choleroid (*kol'-er-oid*) [*cholera*, εἶδος like]. Resembling cholera; choleriform.

choleromania (*kol-er-o-ma'-ne-ah*). See *cholerophobia.*

cholerophobia (*kol-er-o-fo'-be-ah*) [*cholera; φόβος*, fear]. Morbid dread of cholera.

cholerotyphus (*kol-er-o-ti'-fus*). 1. See *cholera-typhoid.* 2. The most malignant type of Asiatic cholera.

cholerrhagia (*kol-er-aj'-e-ah*) [*chole-; ῥηγνύναι*, to burst forth]. 1. Synonym of cholera morbus. 2. A flow of bile.

cholerythrin (*kol-er'-ith-rin*). See *bilirubin.*

cholestearin (*kol-es-te'-ar-in*). See *cholesterin.*

cholesteatoma (*kol-es-te-at-o'-mah*) [*cholesterin; στεάτωμα*, a sebaceous tumor: *pl.*, *cholesteatomata*]. A teratoid tumor containing plates of cholesterin, epithelial cells, hair, and other dermal structures, and occurring most frequently in the brain.

cholesteatomatous (*kol-es-te-at-om'-at-us*) [*chole-; στεάτωμα*, a sebaceous tumor]. Of the nature of, pertaining to, or affected with, cholesteatoma.

cholestegnosis (*kol-e-steg-no'-sis*) [χολή, bile; *στέγνωσις*, a making close]. Thickening of the bile.

cholesteremia, cholesteræmia, cholesterinemia, cholesterinæmia (*kol-es-ter-e'-me-ah, kol-es-ter-in-e'-me-ah*) [*cholesterin; αἷμα*, blood]. The morbid state resulting from the retention of cholesterin in the blood. The condition is probably due to the retention of the bile acids.

cholesterilins (*kol-es-ter'-il-ins*). Hydrocarbons formed from cholesterin by action of concentrated sulphuric acid, and supposed to stand in close relationship to the terpene group.

cholesterin (*kol-es'-ter-in*) [χολή, bile; *στέαρ*, fat], $C_{27}H_{45}OH$. A monatomic alcohol, a constituent of bile, gall stones, nervous tissue, egg yolk, and blood, and sometimes found in foci of fatty degeneration. It is a glistening, white, crystalline substance, soapy to the touch, crystallizing in fine needles and rhombic plates. It is insoluble in water, soluble in hot alcohol, ether, or chloroform. It is held in solution in the bile by the bile salts; it is levorotatory. The power of immunizing against and neutralizing snake-venom is attributed to it. **c., tests for.** See *Liebermann-Burchard, Obermueller, Salkowski, Schiff, Schultze.*

cholesterinuria (*ko-les-ter-in-ū'-re-ah*) [*cholesterin; οὖρον*, urine]. The presence of cholesterin in the urine.

cholesterol (*kol-es'-ter-ol*). Same as *cholesterin.*

cholesteryl (*kol-es'-ter-il*), $C_{26}N_{45}$. The radical of cholesterin.

choletelin (*kol-et'-el-in*), $C_{16}H_{18}N_2O_6$. An amorphous, soluble, yellow pigment derived from bilirubin. It is the final product of the oxidation of bile pigments. It is readily soluble in alkalies, alcohol, and chloroform.

cholетherapy (*kol-e-ther'-ap-e*) [χολή, bile; *therapy*]. The remedial use of bile.

choleuria (*kol-e-ū'-re-ah*) [χολή, bile; *οὖρον*, urine]. The presence of bile in the urine.

choleval (*ko'-le-val*). A preparation containing colloidal silver and sodium choleinate; used in gonorrhea and in skin diseases.

choleverdin (*kol-e-ver'-din*) [χολή, bile; *viridis*, green]. See *bilicyanin*

cholic (*kol'-ik*) [χολή, bile]. Pertaining to the bile. **c. acid.** See *acid, cholic.*

cholicele (*kol'-is-el*) [χολή, bile; *κήλη*, a tumor]. A tumor of the gall bladder, due to accumulation of bile.

choline, (*kol'-in*) χολή, bile], $C_5H_{15}NO_2$. A ptomaine occurring in bile, and elsewhere. It is also found in the extracts of the suprarenals, and is a product of the decomposition of lecithin. An auxetic in cancer.

cholocele (*kol'-o-sēl*). See *cholicele.*

cholochrome ((*kol'-o-krōm*) [χολή, bile; *χρῶμα*, color]. Any bile pigment.

cholocyanin (*kol-o-si'-an-in*). Synonym of *bilicyanin.*

cholocyst (*kol'-o-sist*). See *cholecyst.*

chologen (*kol'-o-jen*). Tablets containing calomel and podophyllin; they are said to prevent the formation of gall stones, and also to dissolve them

chologestin (*kol-o-jes'-tin*). A proprietary cholagogue said to contain sodium glycocholate, sodium salicylate, sodium bicarbonate, and pancreatin.

cholohematin (*kol-o-hem'-at-in*) [χολή, bile; *αἷμα*, blood]. A pigment found in the bile of the ox and sheep. It is probably a derivative of hematin.

choloidinic acid (*kol-oi-din'-ik*), $C_{24}H_{38}O_4$. A decomposition product of cholic acid.

chololith (*kol'-o-lith*) [χολή, bile; *λίθος*, stone]. A gall stone.

chololithiasis (*kol-o-lith-i'-as-is*). See *cholelithiasis.*

chololithic (*kol-o-lith'-ik*) [χολή, bile; *λίθος*, a stone]. Pertaining to a cholelith.

choloplania. See *choleplania.*

cholopoiesis (*kol-o-poi-e'-sis*) [χολή, bile; *ποίησις*, a making]. The formation of bile.

cholorrhagia (*kol-or-a'-je-ah*) [χολή, bile; *ῥηγνύναι*, to burst forth]. A sudden flow of bile.

cholorrhea (*kol-or-e'-ah*) [χολή, bile; *ῥοία*, a flow]. Any excessive discharge of bile.

cholosis (*kol-o'-sis*) [χολή, bile]. 1. Any disease caused by or associated with a perversion of the biliary secretion. 2. Lameness. **c. americana,** yellow fever.

cholostegnosis. See *cholestegnosis.*

cholotic (*kol-ot'-ik*) [*chol-*]. Due to or associated with a cholosis.

choluria (*kol-ū'-re-ah*) [*chol-; οὖρον*, urine]. The presence of bile, bile-salts, or bile-pigments in the urine. Also, the greenish coloration of the urine.

chondral (*kon'-dral*) [*chondrus*]. Cartilaginous; relating to or composed of cartilage

chondralgia (*kon-dral'-je-ah*) [*chrondro-; ἄλγος*, pain]. Pain in or about a cartilage.

chondralloplasia (*kon-dral-o-pla'-se-ah*) [*chondro-; ἄλλος*, other; *πλάσσειν*, to form]. The formation of cartilage in unusual places in the skeleton.

chondrectomy (*kon-drek'-to-me*) [*chondro-; ἐκτομή*, a cutting out]. Surgical excision of a cartilage, or of a part of one.

chondren (*kon'-dren*) [*chondro-*]. Belonging to a cartilage in itself.

chondric (*kon'-drik*). See *chondral.*

chondrification (*kon-drif-ik-a'-shun*) [*chondrus; facere*, to make]. The process of being converted into cartilage.

chondrify (*kon'-drif-i*) [*chondro-; fieri*, to become]. To convert into cartilage; to become cartilaginous.

chondrigen (*kon'-drij-en*) [*chondrin; γεννᾶν*, to produce]. That material of the hyaline cartilage which on boiling with water becomes chondrin.

chondrigenous (*kon-drij'-en-us*) [*chondrin; γεννᾶν*, to produce]. Producing chondrin; relating to cartilage that has not hardened.

chondriglucose (*kon-dre-glu'-kōs*) [*chondrin-*; γλυκύς, sweet]. A material formed by boiling cartilage with mineral acids. It has a sweet taste and the properties of glucose.

chondrin (*kon'-drin*) [*chondrus*]. A substance obtained from the matrix of hyaline cartilage by boiling. It resembles gelatin in general properties, but differs from it in not being precipitated by tannic acid. **c. balls,** a substance found in cartilage and composed of chondromucoid and chondroitic acid.

chondriomite (*kon'-dre-o-mīt*) [*chondro-*; μίτος, thread]. A chain of mitochondria.

chondriosome (*kon'-dre-o-sōm*) [*chondro*; σῶμα, body]. Any one of the minute bodies in the cytoplasm.

chondritis (*kon-drī'-tis*) [*chondro-*; ιτις, inflammation]. Inflammation of a cartilage.

chondro- (*kon-dro-*) [*chondrus*]. A prefix meaning relating to cartilage.

chondroarthritis (*kon-dro-ar-thrī'-tis*). An inflammation of the cartilaginous parts of a joint.

chondroblast (*kon'-dro-blast*) [*chondro-*; βλαστός, germ]. A cell of developing cartilage

chondroblastoma (*kon-dro-blas-to'-mah*). Same as chondroma.

chondrocarcinoma (*kon-dro-kar-sin-o'-mah*). A carcinoma containing cartilaginous tissue.

chondrocele(*kon'-dro-sēl*)[*chondro-*; κήλη, a tumor] A sarcocele containing masses resembling cartilage.

chondroclasis (*kon-drok'-las-is*) [*chondro-*; κλάσις, fracture] The crushing of a cartilage.

chondroclast (*kon'-dro-klast*) [*chondro-*; κλάειν, to break]. A cell supposed to be concerned in the absorption of cartilage.

chondroconia (*kon-dro-ko'-ne-ah*) [*chondro-*; κόνια, dust]. Granules found in myelocytes.

chondrocoracoid (*kon-dro-kor'-ak-oid*). Relating to a costal cartilage and to the coracoid process of the scapula

chondrocostal (*kon-dro-kos'-tal*) [*chondro-*; *costa*, a rib]. Relating to the ribs and their cartilages.

chondrocranium (*kon-dro-kra'-ne-um*) [*chondro-*; *cranium*]. The cartilaginous cranium, as of the embryo.

chondrocyte (*kon'-dro-sīt*) [*chondro-*; κύτος, cell]. A cartilage cell.

chondrodendron (*kon-dro-den'-dron*) [*chondro-*; δένδρον, a tree]. A genus of South American menispermaceous climbing plants. *C. glaberrimum* and *C. tomentosum* are among the plants that furnish pareira.

chondrodialysis (*kon-dro-di-al'-is-is*) [*chondro-*; *dialysis*]. The decomposition of cartilage.

chondrodynia (*kon-dro-din'-e-ah*) [*chondro-*; ὀδύνη, pain]. Pain in a cartilage.

chondrodysplasia (*kon-dro-dis-pla'-ze-ah*) [*chondro-*; δύς, bad; πλάσσειν, to form]. Same as chondralloplasia, *q. v.*

chondrodystrophia (*kon-dro-dis-tro'-fe-ah*) [*chondro-*; δύς, bad; τρέφειν, to nourish]. Fetal rhachitis. **c. fœtalis.** See *achondroplasia* and *achondroplasty*.

chondroepiphysis (*kon-dro-ep-if'-is-is*) [*chondro-*; *epiphysis*]. A cartilage which later develops into a bony epiphysis.

chondrofetal (*kon-dro-fe'-tal*). Relating to fetal cartilage.

chondrofibroma (*kon-dro-fi-bro'-mah*) [*chondro-*; *fibra*, a fiber; ὄμα, a tumor; *pl.*, *chondrofibromata*]. Chondroma with fibromatous elements.

chondrofibromatous (*kon-dro-fi-bro'-mat-us*) [*chondro-*; *fibra*, a fiber; ὄμα, a tumor]. Of the nature of chondrofibroma.

chondroform (*kon'-dro-form*) [*chondrus*]. Trade lubricant from seaweed; said to be antiseptic.

chondrogen (*kon'-dro-jen*) [*chondro-*; γεννᾶν, to produce]. 1. See *chondrogen.* 2. A substance found in fetal and early life, forming a part of the tissue of imperfectly developed cartilage.

chondrogenesis (*kon-dro-jen'-es-is*) [*chondro-*; γένεσις, formation]. The formation of cartilage.

chondrogenetic (*kon-dro-jen-et'-ik*) [*chondro-*; γένεσις, formation]. Forming cartilage; relating to chondrogenesis.

chondrogenous (*kon-droj'-en-us*) [*chondro-*; γένεσις, production]. Of the nature of chondrogen; producing cartilage.

chondroglossus (*kon-dro-glos'-us*). See *muscles.*

chondroglucose (*kon-dro-glu'-kōs*) [*chondro-*; γλυκύς, sweet]. A glucose obtained from cartilage.

chondrography (*kon-drog'-ra-fe*) [*chondro-*; γράφειν, to write]. An anatomical description of the cartilages.

chondroid (*kon'-droid*) [*chondro-*; εἶδος, form]. Resembling cartilage.

chondroitic acid (*kon-dro-it'-ik*). A complex organic acid found in small quantities in normal urine. It is chondroitin-sulphuric acid, and is found in chondromucoid.

chondrology (*kon-drol'-o-je*) [*chondro-*; λόγος, science]. The science of cartilages.

chondroma (*kon-dro'-mah*) [*chondro-*; ὄμα, tumor]. A cartilaginous tumor.

chondromalacia (*kon-dro-mal-a'-se-ah*) [*chondro-*; μαλακία, softening]. Softening of a cartilage. **c. auris.** Same as *hæmatoma auris.*

chondromatous (*kon-drōm'-at-us*) [*chondro-*; ὄμα, a tumor]. Relating to or of the nature of cartilage.

chondromucoid (*kon-dro-mū'-koid*). A mucin found in cartilage.

chondromyoma (*kon-dro-mi-o'-mah*) [*chondro-*; *myoma*]. A neoplasm presenting the characteristics of both chondroma and myoma.

chondromyxoma (*kon-dro-miks-o'-mah*) [*chondro-*; μύξα, mucus; ὄμα, a tumor]. A chondroma with myxomatous elements.

chondrophyma (*kon-dro-fī'-mah*) [*chondro-*; φῦμα, a growth]. 1. A tumor of a cartilage. 2. A neoplasm with cartilaginous elements. 3. See *chondrophyte.*

chondrophyte (*kon'-dro-fīt*) [*chondro-*; φυτόν, a plant]. A fungous neoplasm springing from a cartilage.

chondroplast (*kon'-dro-plast*). See *chondroblast.*

chondroplasty (*kon'-dro-plas-te*) [*chondro-*; πλάσσειν, to mold]. Plastic operation on cartilage.

chondroporosis (*kon-dro-por-o'-sis*) [*chondro-*; πόρος, a passage]. The thinning of cartilage by the formation of spaces, occurring during the process of ossification.

chondroprotein (*kon-dro-pro'-te-in*). A protein occurring normally in cartilage.

chondrosarcoma (*kon-dro-sar-ko'-mah*) [*chondro-*; *sarcoma*]. A tumor composed of cartilaginous and sarcomatous tissue.

chondrosarcomatous (*kon-dro-sar-kōm'-at-us*). Relating to chondrosarcoma.

chondrosidin (*kon-dros'-id-in*). The hyalin obtained from chondrosin.

chondrosin (*kon'-dro-sin*) [*chondrosia*, a genus of sponges]. A hyalogen obtained from the sponge, *chondrosia reniformis.*

chondrosis (*kon-dro'-sis*) [*chondrus*]. 1. Formation of cartilage. 2. A cartilaginous tumor.

chondrosteous (*kon-dros'-te-us*) [*chondro-*; ὀστέον, bone]. In biology, having a cartilaginous skeleton.

chondrosternal (*kon-dro-ster'-nal*). Pertaining to the sternum and costal cartilages.

chondrosyndesmus (*kon-dro-sin-des'-mus*). See *synchondrosis*.

chondrotome (*kon'-dro-tōm*) [*chondro-*; τέμνειν, to cut]. An instrument for cutting cartilage.

chondrotomy (*kon-drot'-o-me*) [*see chondrotome*]. The division of a cartilage.

chondroxiphoid (*kon-dro-zif'-oid*). Pertaining to the costal cartilages and the ensiform cartilage.

chondrus (*kon'-drus*) [χόνδρος, a grain; cartilage]. 1. Irish moss. The substance of the algæ *C. crispus* and *C. mammillosus*. These yield, on boiling with water, a soluble colloid consisting mainly of mucilage. This is demulcent and somewhat nutrient. Dose indefinite. 2. A cartilage; the ensiform cartilage.

Chopart's amputation (*sho-par*) [François *Chopart*, French surgeon, 1734–1795]. An amputation of the foot consisting of a disarticulation through the tarsal bones, leaving only the os calcis and the astragalus. **C.'s joint,** the mediotarsal articulation; the line of articulation which separates the astragalus and os calcis from the remaining tarsal bones.

chord. See *cord.*

chorda (*kor'-dah* [L.]. A cord, tendon, or nerve-filament. That part of a vertebrate embryo which, later, becomes the backbone. **chordæ arteriarum umbilicalium,** the lateral ligaments of the bladder. **c. dorsalis.** See *notochord.* **c. magna,** tendo Achillis. **c. obliqua,** the oblique ligament of the superior radio-ulnar articulation. **c. saliva,** saliva produced by stimulation of the chorda tympani nerve. **c. spermatica,** the spermatic cord. **c. tendinea,** any one of the tendinous strings connecting the papillary muscles of the heart with the auriculoventricular valves. **c. tympani.** See under *nerve.* **c. umbilicalis,** the umbilical cord. **c. venæ umbilicalis,** the round ligament of the liver. **c. vertebralis.** See notochord. **c. vocalis,** a vocal band.

chordal (*kor'-dal*) [*chorda*, a cord]. Relating to a chorda, especially to the notochord.

chordapsus (*kor-dap'-sus*) [χορδή, a chord, ἅπτειν, to tie up]. Synonym of *acute intestinal catarrh.*

chordate (*kor'-dāt*). Possessing a chorda, or notochord, or backbone.

chordee (*kor-de'*) [*chorda*]. A painful curved erection of the penis with concavity downward. The corpus spongiosum being infiltrated from urethral inflammation, does not fill with blood during erection, and so acts like a bow-string.

chorditis (*kor-di'-tis*) [χορδή, a cord; ιτις, inflammation]. Inflammation of the vocal bands. **c. tuberosa,** a localized thickening on the vocal bands, often bilateral and situated at the junction of the posterior two-thirds with the anterior third.

chordoma (*kor-do'-mah*) [*chorda*, a cord]. 1. Virchow's name for the upper part of a persistent notochord. 2. A tumor composed of tissue of the same nature as that of the notochord. 3. A small tumor occurring in the median line of the clivus, near the articulation of the sphenoid with the occipital bone.

chordoskeleton (*kor-do-skel'-et-on*). The portion of the skeleton surrounding the notochord.

chordotomy (*kor-dot'-o-me*) [*chorda*; τομή, a cutting]. Division of an anterolateral column of the spinal cord.

chordotonal (*kor-do-to'-nal*) [χορδή, chord; τόνος, tone]. In biology, applied to sense-organs or parts of arthropods that are responsive to sound-vibrations.

chordurethritis (*kor-dū-re- thri'-tis*). See *chordee.*

chorea (*ko-re'-ah*) [χορεία, dancing]. St. Vitus' dance. A functional nervous disorder, usually occurring in youth, characterized by irregular and involuntary action of the muscles of the extremities, face, etc., with general muscular weakness. Frequently a mitral systolic murmur is heard, often hemic, but in a large proportion of cases due to endocarditis, and there seems to be a close relation between the two diseases. Rheumatism often coexists Chorea may be caused by a number of conditions, among which are fright and reflex irritation. It affects girls about three times as frequently as boys. Occasionally a form of chorea is seen in the adult, and may become a serious complication of pregnancy, resulting in the death of both fetus and mother. When it occurs late in life, it generally resists treatment. Syn., *chorea anglorum; chorea sancti Viti; epilepsia saltatoris; St John's dance.* **c., bilateral,** that due to cerebral lesions causing development of choreic symptoms on both sides of the body. **c., buttonmaker's,** a form of chorea occurring in persons employed in making buttons. **c., cardiac,** a form marked by palpitation and other cardiac disorders. **c., chronic progressive,** Hoffmann's name for *Huntington's chorea.* **c., congenital.** Synonym of *birth-palsy.* **c. cordis.** See *c., cardiac.* **c.-corpuscles** (Elischer), peculiar cells found in the brain in cases of chorea and regarded as pathognomonic; they have, however, been found in the brains of those who have never had the disease. **c., dancing,** hysterical chorea marked by rhythmic dancing movements **c.-demonomania,** epidemic chorea. **c., diaphragmatic,** spasm of the diaphragm **c. dimidiata,** hemichorea. **c., electric.** See *Dubini's disease.* **c., epidemic.** See *choromania.* **c., essential,** that occurring independently and not as a symptom of some other disease. **c., facial,** convulsive tic. **c., false.** See *c., symptomatic.* **c., general,** a form of chorea in which all or almost all of the voluntary muscles are subject to irregular contractions. **c. gravidarum,** intractable chorea occurring during pregnancy, toward its close sometimes aggravated and attended with fever. **c. gravis,** severe and dangerous cases of chorea. **c., habit-.** See *habit-spasm.* **c., hammering,** a form marked by coordinated rhythmic spasm in consequence of which persistent hammering with the fist upon some object will be indulged in. **c., hereditary.** See *Huntington's chorea.* **c., Huntingdon's.** See *Huntingdon's chorea.* **c., hysterical.** See *c. major.* **c., imaginative,** choromania. **c., imitative,** choreic movements developed in children from association with choreic subjects. **c., infantile.** See *c. minor.* **c. insaniens,** maniacal chorea; a grave form of chorea usually seen in women, and associated with mania, and generally ending fatally. It may develop during pregnancy. **c. laryngea, c., laryngeal, c. laryngis.** 1. A condition attended with clonic spasm of the laryngeal muscles and marked by inability to sustain coordinate action. 2. A condition marked by spasmodic motions of some of the muscles of expiration, causing a cry. **c., limp,** West's name for a sequel of motor paralysis in children marked by very slight choreic movements. **c. major,** a form of hysteria in which there are continual regular oscil-

latory movements. **c., maniacal.** See *c. insaniens.* **c., metaparalytic, c., methemiplegic.** See *c., postparalytic.* **c., methodic.** See *c. major.* **c., mimetic.** See *c., imitative.* **c. minor,** simple chorea. **c. mollis.** See *hemiplegia, choreic.* **c., Morvan's.** See *Morvan's chorea.* **c. neuralgica,** convulsive tic. **c. nutans** that attended with nodding motions. **c. oculi,** choreic movements of the eyes due to cerebral lesions. **c. pandemica.** See *Dubini's disease.* **c., paralytic** (Gowers). See *hemiplegia, choreic.* **c., partial,** imperfect choreic movements associated with contractures, due to cerebral lesion. **c., posthemiplegic, c., postparalytic,** a form of involuntary movement seen in patients after an attack of hemiplegia. **c., prehemiplegic, c., prohemiplegic,** choreic spasms of the hands or feet forerunning hemiplegia. **c. procursiva.** Synonym of *paralysis agitans.* **c. rhythmic.** See *c. major.* **c., school-made,** chorea resulting from overstimulation of children at school. **c., secondary.** See *c., symptomatic.* **c. semilateralis,** hemichorea. **c. senilis.** 1. Paralysis agitans. 2. The trembling incident to age. **c., Sydenham's.** See *Sydenham's chorea.* **c., symptomatic,** that dependent upon some organic disease. **c., unilateral.** See *hemichorea.*

choreal (*ko-re'-al*). Pertaining to chorea; choreic.

choreic (*ko-re'-ik*) [*chorea*]. Relating to, of the nature of, or affected with chorea.

choreiform (*ko-re'-if-orm*) [*chorea; forma,* form]. Resembling chorea.

choremania, choreomania (*ko-re-ma'-ne-ah, ko-re-o-ma'-ne-ah*) [*chorea; μανία,* madness]. Synonym of *choromania.*

choreoathetoid (*ko-re-o-ath'-et-oyd*). Referring to both chorea and athetosis.

choreoid (*ko'-re-oid*) [χορεία, dancing; εἶδος, like] Pertaining or similar to chorea.

chorial (*ko'-re-al*) [χόριον, skin]. Chorionic.

chorioblastosis (*ko-re-o-blas-to'-sis*) [χόριον, skin; βλαστάνειν, to germinate]. Any anomaly of growth of the corium and subcutaneous connective tissue.

choriocapillaris (*ko-re-o-kap-il-a'-ris*) [*chorion; capillus,* a hair]. The network of capillaries over the inner portion of the choroid coat of the eye.

choriocele (*ko'-re-o-sēl*) [χόριον, a skin; κήλη, hernia]. A hernial protrusion of the choroid coat of the eye.

chorioepithelioma (*ko-re-o-ep-e-the-le-o'-mah*). A neoplasm apparently due to excessive proliferation of chorionic epithelium; see *decidуoma.* **c. benignum,** degenerated relics of fetal epithelium or epiblast in the maternal tissues. **c. malignum,** Marchand's (1895) name for an epithelioma due to malignant degeneration of fetal epiblast left in the maternal tissues. Syn., *deciduoma malignum; sarcoma deciduocellulare; syncytioma malignum.*

chorioid (*ko'-re-oid*). See *choroid.*

chorioidal (*ko-re-oid'-al*). See *choroid* (2).

chorioideal tubercle (*ko-re-oid'-e-al tū'-ber-kl*). See *choroid tubercle.*

chorioideremia (*ko-re-oid-er-e'-me-ah*). See *choroideremia.*

chorioiditis (*ko-re-oid-i'-tis*). See *choroiditis.*

chorioidoretinitis (*ko-re-oid-o-ret-in-i'-tis*). See *choroidoretinitis.*

chorioma (*ko-re-o'-mah*) [*chorion;* ὄμα, tumor]. A neoplasm developed from the chorion. See *chorioepithelioma.*

chorion (*ko'-re-on*) [χόριον, skin; fetal membrane]. The outermost of the fetal membranes, formed from the vitelline membrane, the false amnion, and the allantois. The chorion lies between the amnion and the decidua reflexa and vera. **c., cystic degeneration of,** a myxoma of the chorion, producing the socalled "hydatid mold." It is characterized by rapid increase in the size of the uterus, hemorrhage, often profuse, beginning during the second month of pregnancy, and the discharge of small cysts, whitish in appearance, surrounded by bloody clots. These cysts vary in size from a pinhead to a filbert. **c. frondosum, c., shaggy,** the part covered by villi. It helps to form the placenta. **c. læve,** the membranous portion of the chorion.

chorionic (*ko-re-on'-ik*) [*chorion*]. Relating to the chorion.

chorionin (*ko-re-on'-in*). A name given by Bronchacourt (1902) to a preparation made from sheep's placenta by submitting it to pressure without heat. The juice thus expressed is made palatable with syrup after being sterilized with ammonium fluoride; employed as a galactagogue.

chorionitis (*ko-re-on-i'-tis*). 1. See *scleroderma.* 2. Placentitis.

chorioretinal (*ko-re-o-ret'-in-al*). Pertaining to the choroid and retina.

chorioretinitis (*ko-re-o-ret-in-i'-tis*). Inflammation of the choroid and retina.

chorisis (*ko-ri'-sis*) [χώρισις, a separation]. In biology, the development of two or more members when but one is expected; a doubling.

choristoblastoma (*ko-ris-to-blas-to'-mah*) [*choristoma; blastoma*]. An autonomous tumor originating in a choristoma.

choristoma (*ko-ris-to'-mah*) [χωρίστος, separated]. A tumor due to hyperplasia of an aberrant primordium.

choroid (*ko'-roid*) [*chorion;* εἶδος, likeness]. 1. The vascular tunic of the eye, continuous with the iris in front, and lying between the sclerotic and the retina. 2. Pertaining to the choroid; choroidal. **c. membrane,** the choroid. **c. plexus,** a vascular plexus in the ventricles of the brain. **c. tubercle,** a diagnostic sign of tuberculous meningitis found by ophthalmoscopic investigation.

choroidal (*ko-roid'-al*). Pertaining to the choroid.

choroideremia (*ko-roid-er-e'-me-ah*) [*choroid;* ἐρημία, desolation]. Absence of the choroid.

choroiditis (*ko-roid-i'-tis*) [*choroid;* ῖτις, inflammation]. Inflammation of the choroid coat of the eye. It may be anterior, the foci of exudation being at the periphery of the choroid; or central, the exudate being in the region of the macula lutea; diffuse or disseminated, characterized by numerous round or irregular spots scattered over the fundus; exudative or nonsuppurative, when there are isolated foci of inflammation scattered over the choroid; metastatic, when due to embolism; and suppurative, when proceeding to suppuration. **c., areolar, c. areolaris,** that in which the first foci occur near the fovea and extend toward the periphery in constantly increasing distances. **c. guttata senilis.** See *Tay's choroiditis.* **c. serosa.** Synonym of *glaucoma.*

choroidocyclitis (*ko-roid-o-si-kli-tis*) [*choroid;* κύκλος, a circle; ῖτις, inflammation]. Inflammation of the choroid and of the ciliary body.

choroidoiritis (*ko-roid-o-i-ri'-tis*) [*choroid; iritis*]. Inflammation of the choroid and the iris.

choroidoretinitis (*ko-roid-o-ret-in-i'-tis*) [*choroid; retinitis*]. Choroiditis associated with retinitis. **c., ametropic,** that caused by ametropia.

chorology (*ko-rol'-o-je*) [χώρος, a place; ιτις, science]. The science of the geographic distribution of animals and plants.

choromania (*kor-o-ma'-ne-ah*) [χορός, a dance; μανία, madness]. A nervous disorder characterized by dancing or other rhythmic movements; epidemic chorea; dancing mania.

choronosologia, choronosology (*ko-ro-no-sol-o-je-ah, ko-ro-no-sol'-o-je*) [χώρος, a region; νόσος, a disease; λόγος, science]. The science of the geographic distribution of diseases or of endemic diseases of some region.

chrismaline (*kris-mal-ēn*). Liquid paraffin.

chrismol (*kris'-mol*). Trade name of a tasteless, liquid paraffin; used in constipation and intestinal inflammation.

Christian Science. A system of therapy; a form of faith-cure; Eddyism.

Christison's formula (*kris'-tis-on*) [Sir Robert *Christison*, Scotch physician, 1797–1882] A formula for estimating the amount of solids in the urine: multiply the last two figures of the specific gravity expressed in four figures by 2.33 (or by 2, *Trapp;* or by 2.2, *Loebisch*). This gives the amount of solids in every 1000 parts. It is the same as Haeser's formula

christopathy (*kris-top'-ath-e*). Christian science.

chroatol (*kro'-at-ol*), $C_{10}H_{16}.2HI$. A greenish-yellow, crystalline substance obtained by action of turpentine on iodine; used in powder or ointment in skin diseases. Syn., *terpinsiodohydrate.*

chroma-, chromato- [χρῶμα, color]. Prefixes meaning colored.

chromaffin cells (*kro'-maf-fin*) [*chroma-; affinis,* akin to]. Cells that have an affinity for chromium and its salts, which makes them yellow; the term is applied to the adrenal system. Syn., *phaochrome, paraganglia.* **c. hormone,** epinephrine.

chromaffinopathy (*kro-maf-in-op'-a-the*) [*chromaffin;* πάθος, suffering]. Any diseased or pathologic condition in chromaffin tissue (in the adrenals or elsewhere).

chromate (*kro'-māt*) [χρῶμα, color]. Any salt of chromic acid.

chromatelopsia, chromatelopsis (*kro-mat-e-lop'-se-ah, -sis*) [*chroma-;* ἀτελής, imperfect; ὄψις, vision]. Color-blindness.

chromatic (*kro-mat'-ik*) [χρῶμα, color]. Relating to or possessing color. **c. aberration.** See *aberration, chromatic.* **c. audition,** luminous sensations aroused by sound.

chromatid (*kro'-mat-id*). Chromosomes often indicate future longitudinal division by resembling two parallel threads. These threads are the chromatids.

chromatidrosis. See *chromidrosis.*

chromatin (*kro'-mat-in*) [see *chromatic*]. The portion of the protoplasm of a cell that takes the stain, forming a delicate reticular network or plexus of fibrils permeating the achromatin of a cell. Syn., *karyomitome.*

chromatism (*kro'-mat-izm*) [χρωματισμός, coloring]. 1. Abnormal coloration of any tissue. 2. Chromatic aberration.

chromatoblast (*kro'-mat-o-blast*) [*chromato-;* βλαστός, a germ]. Same as *chromatophore.*

chromatodermatosis. See *chromodermatosis.*

chromatodysopia (*kro-mat-o-dis-o'-pe-ah*) [*chromato-;* δύς, ill; ὄψις, vision]. Color-blindness.

chromatogenous (*kro-mat-oj'-en-us*) [*chromato-;* γεννᾶν, to beget]. Producing color.

chromatology (*kro-mat-ol'-o-je*) [*chromato-;* λόγος, science]. The science of colors. Also the spectroscopic investigation of colors.

chromatolysis (*kro-mat-ol'-is-is*) [*chromato-;* λύσις a loosing]. 1. Flemming's term for the breaking-down of the nucleus at the death of the cell. Syn., *karyolysis.* 2. Disintegration and disappearance of the Nissl granules from nerve-cells.

chromatometer (*kro-mat-om'-et-ur*) [*chromato-;* μέτρον, a measure]. An instrument for measuring color-perception or the intensity of colors.

chromatometry (*kro-mat-om'-et-re*). 1. See *chromatoptometry.* 2. The estimation of the coloring power of a substance.

chromatopathia (*kro-mat-o-path'-e-ah*) [*chromato-;* πάθος, disease]. Any pigmentary skin-disease; a chromatosis.

chromatopathy (*kro-mat-op'-a-the*). See *chromatopathia.*

chromatophile (*kro'-mat-o-fil*). Same as *chromophilous.*

chromatophobia (*kro-mat-o-fo'-be-ah*) [*chromato-;* φόβος, dread]. Abnormal fear of colors.

chromatophore (*kro'-mat-o-fōr*) [*chromato-;* φόρος, bearing]. Any colored cell-plastid.

chromatophoroma (*kro-mat-o-for-o'-mah*) [χρώμα, color]. An overgrowth of the pigmented cells of the skin or choroid coat of the eye; melanoma.

chromatophorous (*kro-mat-off'-or-us*) [*chromato-;* φέρειν, to bear]. Containing pigment or pigment-cells.

chromatoplasm (*kro'-mat-o-plazm*) [*chromato-;* πλάσμα, anything formed]. The substance of the chromatoplasts as distinguished from the other cell-substances, karyoplasm, cytoplasm, metaplasm, paraplasm, etc.

chromatoplast (*kro'-mat-o-plast*). See *chromatophore.*

chromatopseudopsis (*kro-mat-o-sū-dop'-sis*) [*chromato-;* ψευδής, false; ὄψις, sight]. Color-blind.

chromatopsia (*kro-mat-op'-se-ah*) [*chromato-;* ὄψις, vision]. A disorder of vision in which color-impressions arise subjectively. It may be due to disturbance of the optic centers, or to drugs, especially santonin.

chromatopsy (*kro'-mat-op-se*). See *chromatopsia.*

chromatoptometry (*kro-mat-op-tom'-et-re*) [*chromato-;* ὄψις, vision; μέτρον, a measure]. The testing of the sensibility of the eye with respect to color-perception.

chromatoscope (*kro'-mat-o-skōp*) [*chromato-;* σκοπεῖν, to observe]. An instrument for determining the refractive index of colored light.

chromatoscopy (*kro-mat-os'-ko-pe*) [*chromato-;* σκοπεῖν, to observe]. The determination of the color of objects.

chromatosis (*kro-mat-o'-sis*) [χρῶμα, color]. Pigmentation; a pathological process or pigmentary disease consisting in a deposit of coloring-matter in a locality where it is usually not present, or in excessive quantity in regions where pigment normally exists.

chromatoskiameter (*kro-mat-o-ski-am'-et-er*) [*chromato-;* σκία, a shadow; μέτρον, a measure]. Holmgren's apparatus for testing color-sense, consisting of a lamp and a white screen, on which is cast the shadow of a pencil placed in front of different colored glasses. A scale indicates when the shadows are of equal brightness.

chromatosome (*kro'-mat-o-sōm*) [*chromato-;* σῶμα, body]. In biology, the "nuclear rods" of the nucleus.

chromaturia (*kro-mat-û'-re-ah*) [*chromato-; οὖρον*, urine]. Abnormal coloration of the urine.

chrome (*krōm*). See *chromium*. **c.-alum**, $CrK_2(SO_4)_2 + 12H_2O$. A compound of chromium and potassium sulphate, forming large, dark-violet crystals soluble in five parts of water, the solution turning green when heated; used as a pigment. **c. red**, basic lead chromate, $PbCrO_4.PbO$. **c. yellow**, lead chromate, $PbCrO_4$.

chromesthesia (*krom-es-the'-ze-ah*) [*χρῶμα*, color; *αἰσθησις*, perception by the senses]. The association of colors with words, letters, and sounds.

chromhidrosis (*krōm-hid-ro'-sis*). Same as *chromidrosis*.

chromic (*kro'-mik*) [*chromium*]. Pertaining to or made from chromium. **c. acid**, **c. anhydride**, chromium trioxide.

chromicize (*kro'-mis-īz*). To impregnate with chromic acid or a chromium salt.

chromidia (*kro-mid'-e-ah*). Plural of *chromidium*, *q. v.*

chromidium (*kro-mid'-e-um*). Any one of the granules of nuclear substance found in the cytoplasm.

chromidrosis (*kro-mid-ro'-sis*) [*χρῶμα*, color; *ἱδρώς*, sweat]. A rare condition of the sweat in which it may be colored bluish, blackish, reddish, greenish, or yellowish. *Black sweat* (*seborrhœa nigricans*) occurs usually in hysterical women, the face being most often affected. It is associated with chronic constipation and is due to the presence of indican in the sweat. *Red sweat* (*hematidrosis*) may be due to an exudation of blood into the sweat-glands, or to the presence of a microorganism in the sweat.

chromism (*kro'-mizm*). Excessive or abnormal coloration.

chromite (*kro'-mīt*). 1. A combination of chromium sesquioxide with the oxide of some other metal. 2. Any organic pigment.

chromium (*kro'-me-um*) [*χρῶμα*, color]. Cr = 52.0; quantivalence II and IV. One of the elements of the iron group. The various salts of chromium, especially the derivatives of chromium trioxide, CrO_3, are much used in the manufacture of pigments and as a caustic. All are poisonous. **c. and potassium sulphate**. See *chrome-alum*. **c. sesquioxide**, Cr_2O_3, a green pigment occurring in nature as chrome-ochre; it can be prepared artificially. **c. trioxide**. See *acid, chromic*.

chromo- (*kro-mo-*) [*χρῶμα*, color]. A prefix meaning colored.

chromoaromatic (*kro-mo-ar-o-mat'-ik*). Applied to microorganisms that are colored and aromatic.

chromoblast (*kro'-mo-blast*). See *chromatophore*.

chromocrinia (*kro-mo-krin'-e-ah*) [*chromo-; κρίνειν*, to separate]. The secretion of coloring-matter, as in the sweat, etc.

chromocystoscopy (*kro-mo-sis-tos'-ko-pe*) [*chromo-; cystoscopy*]. Cystoscopy and inspection of the orifices of the ureters after the administration of a substance that will stain the urine.

chromocyte (*kro'-mo-sīt*) [*chromo-; κύτος*, a cell]. Any colored cell.

chromocytometer (*kro-mo-si-tom'-et-er*) [*chromocyte; μέτρον*, a measure]. An instrument for estimating the proportion of hemoglobin present in the blood.

chromocytometry (*kro-mo-si-tom'-et-re*) [*chromo-; κύτος*, cell; *μέτρον*, a measure]. The estimation of hemoglobin by means of the chromocytometer.

chromodermatosis (*kro-mo-der-mat-o'-sis*) [*chromo-; dermatosis*]. A skin disease characterized by discoloration of the surface.

chromodiagnosis (*kro-mo-di-ag-no'-sis*) [*chromo-; diagnosis*] The diagnosis of hemorrhages of the neuraxis by yellow discoloration of the cephalorhachidian fluid (xanthochromia), due, according to Tuffier, to the normal lutein of the serum.

chromogen (*kro'-mo-jen*) [*chromo-; γεννᾶν*, to produce]. Any principle of the animal or vegetable economy which is susceptible, under suitable circumstances, of being changed into a coloring-matter.

chromogenesis (*kro-mo-jen'-es-is*) [*chromo-; γεννᾶν*, to produce]. The production of pigments or coloring matter, as by bacterial action.

chromogenic (*kro-mo-jen'-ik*) [*see chromogen*]. 1. Producing color or pigment, *e.g.*, pigment-producing bacteria. 2. Relating to chromogen.

chromoleucite (*kro-mo-lu'-sit*). See *chromoplastid*.

chromolume (*kro'-mo-lūm*) [*chromo-; lumen*, light]. An apparatus for the production of colored rays for therapeutic purposes. **c., electro-arc**, a special device for solarization by means of the arc light.

chromolysis (*kro-mol'-is-is*). See *chromatolysis*.

chromomere (*kro'-mo-mēr*) [*chromo-; μέρος*, a part]. One of the minute granules composing the chromosomes. Syn., *id.*

chromometer (*kro-mom'-et-ur*) See *chromatometer* (2).

chromometry (*kro-mom'-et-re*). See *chromatometry* (2).

chromoparic, chromoparous (*kro-mo-par'-ik, kromop'-ar-us*) [*chromo-; parere*, to furnish]. Excreting a colored transformation-product which is diffused out upon and into the surrounding medium. It is said of certain bacteria.

chromopexic (*kro-mo-pek'-sik*) [*χρῶμα*, color; *πῆξις*, fixation]. Fixation of pigment; applied to the function of the liver in forming bile pigment.

chromophane (*kro'-mo-fan*) [*chromo-; φαίνειν*, to appear]. The pigment of the inner segments of the retinal cones of certain animals. There are at least three varieties, chlorophane, rhodophane, xanthophane.

chromophile (*kro'-mo-fil*). Same as *chromophilous*.

chromophilous (*kro-mof'-il-us*) [*chromo-; φίλος*, loving]. Readily stained.

chromophobic (*kro'-mo-fo-bik*) [*chromo-; φόβος*, fear]. Not stainable; not readily absorbing color. Cf. *chromophilous*.

chromophore (*kro'-mo-for*) [*chromo-; φέρειν*, to bear]. 1. Those chromogenic bacteria that possess pigment as an integral part of their organism. 2. The chemical group in an anilin dye which gives the color.

chromophoric, chromophorous (*kro-mo-for'-ik, kromof'-or-us*). Applied to chromogenic bacteria in which the pigment is stored in the cell-protoplasm of the organism.

chromophose (*kro' mo-fōz*) [*chromo-; φῶς*, light]. A subjective sensation of color. See *phose*.

chromophyl (*kro'-mo-fil*) [*chromo-; φύλλον*, a leaf]. A comprehensive term for the coloring-matter of plant cells, including chlorophyl, xanthophyl, erythrophyl, cyanophyl, pheophyl, the various phycochromes, etc.

chromophytosis (*kro-mo-fi-to'-sis*) [*chromo-; φυτόν*, a plant]. 1. Any microscopic plant-growth that produces a discoloration of the skin in which it grows, any pigmentary skin disease caused by a vegetable parasite. 2. A synonym of *tinea versicolor or Eichstedt's disease*.

chromoplasm (*kro'-mo-plazm*) [*chromo-*; πλάσμα, anything formed]. The network of a nucleus, so called because it stains readily.

chromoplastid, or chromoplastidule (*kro-mo-plas'-tid*, or *kro-mo-plas'-tid-ūl*) [*chromo-*; πλάσσειν, to form]. A pigment-granule imbedded in the protoplasm of a plant or animal.

chromoprotein (*kro-mo-pro'-te-in*) [*chromo-*; *protein*]. Any protein capable of being broken up into albumin and a coloring-matter.

chromopsia (*kro-mop'-se-ah*). See *chromatopsia*.

chromoptometer (*kro-mop-tom'-et-er*) [*chromo-*; μέτρον, a measure]. A contrivance for determining the extent of development of color-vision.

chromoradiometer (*kro-mo-ra-de-om'-et-ur*) [*chromo-*; *radius*, ray; μέτρον, measure]. An instrument for measuring the penetrative power of the Roentgen rays.

chromorhinorrhea (*kro-mo-rin-or-e'-ah*) [*chromo-*; ῥίς, nose; ῥοία, a flow]. The discharge of a colored secretion from the nose.

chromoscope (*kro'-mo-skōp*). See *chromatoscope*.

chromosochromic (*kro-mo-so-kro'-mik*). Containing chromium both as a trivalent and as a bivalent radical.

chromosome (*kro'-mo-sōm*) [*chromo-*; σῶμα, body]. Tiny dark-staining bodies seen in the nucleus at cell-division. They are usually constant in number and carry the genes, linearly arranged, which control the development of Mendelian characters Syn., *karyomita* **c., accessory,** an odd chromosome found in half of the spermatozoa of certain animals, and see **c., sex. c., bivalent,** one representing two chromosomes joined end to end. Cf. *c.s., pseudoreduction of.* **c. granules,** granules of lymphocytes seen in the *in vitro* examination of living cells. **c., pluri-valent,** one having the value of two or more chromosomes. Cf. *c s, pseudoreduction of.* **c.s., pseudoreduction of,** apparent reduction of the number of chromosomes through increase of bivalent or plurivalent chromosomes. **c.s., reduction of,** the halving of the number of chromosomes in the germ-nuclei during maturation. **c., sex,** the odd, or accessory, chromosome which is supposed to determine sex

chromosot (*kro'-mo-sōt*). A disinfectant consisting mainly of sulphate and sulphite of sodium.

chromospermism (*kro-mo-sperm'-izm*) [*chromo-*; σπέρμα, seed]. A condition in which the semen is colored. Cf. *cyanospermia*.

chromostroboscope (*kro-mo-stro'-bo-skōp*) [*chromo-*; στρόβος, a twisting; σκοπεῖν, to inspect]. A device for showing the persistence of visual impressions of color.

chromotherapy (*kro-mo-ther'-ap-e*) [*chromo-*; θεραπεία, treatment]. The treatment of disease by colored light.

chromoureteroscopy (*kro-mo-ū-ret-er-os'-ko-pe*). See *chromocystoscopy*.

chromule (*kro'-mūl*) [*chromo-*; ὕλη, matter]. Coloring-matter in plants, especially when not green, or when liquid.

chronaxia (*kron-ak'-se-ah*) [χρόνος, time]. The constant or reciprocal of the rate of movement of ions in nerves electrically excited. This rate varies with the diameter; the larger the fiber the faster the rate. (Lapicque.)

chronic (*kron'-ik*) [χρόνος, time]. Long-continued; of long duration; opposed to acute.

chronicity (*kron-is'-it-e*) [*chronic*]. The state of being chronic or long-continued.

chronograph (*kron'-o-graf*) [χρόνος, time; γράφειν, to write]. An instrument for graphically recording intervals of time in physiological and psychophysical experiments.

chronoscope (*kron'-o-skōp*) [χρόνος, time; σκοπεῖν, to inspect]. An instrument for measuring extremely short intervals of time.

chronothermal (*kron-o-ther'-mal*) [χρόνος, time; θέρμη, heat]. Pertaining to the theory that all diseases are characterized by periods of intermitting chill and heat; relating to periodicity in changes of bodily temperature.

chronotropic (*kron-o-trop'-ik*) [χρόνος, time; τρέπειν, to turn]. Pertaining to influences which modify the rate of a periodically recurring phenomenon (heart-beat).

chrotoplast (*kro'-to-plast* [χρώς, skin; πλασρεῖν, to form]. A skin-cell; a dermal or epithelial cell.

chrotopsia, chrupsia (*kro-top'-se-ah, krup'-se-ah*). See *chromatopsia*.

chrysarobin, chrysarobinum (*kris-ar-o'-bin, kris-ar-o-bi'-num*) [χρυσός, gold; *araroba* (nat. East Ind.), bark of a leguminous tree], $C_{30}H_{26}O_7$. A reduction-product of crysophanic acid. It occurs in Goa powder and araroba powder. It is a yellow-colored powder, the product of the decay of *Vouacapoua araroba*, a Brazilian tree. It is a gastrointestinal irritant; locally and internally it is useful in psoriasis, but stains the skin a dark yellowish-brown color. Dose, internally, ¼–½ gr. (0.008-0.032 Gm.). **c. ointment** (*unguentum chrysarobini*, U. S. P.), contains 10% of the drug with 90% benzoinated lard. **c. oxide,** a brownish-black powder obtained from chrysarobin in boiling water by the action of sodium peroxide. It is recommended in treatment of eczema and acne rosacea in 5 to 10% ointment.

chrysitis (*kris-i'-tis*) [χρύσος, gold]. Red or gold litharge; reddish lead monoxide. Cf. argyritis.

chrysoidin (*krsis-oi'-din*) [χρυσός, gold; εἶδος, like]. 1. $C_{12}H_3N_4Cl$. A coal-tar dyeing color. It is the hydrochloride of diamidoazobenzene, dark-violet crystals soluble in water., It dyes bright-yellow on silk and cotton. 2. $C_7H_{22}O_4$. A yellow coloring-substance in asparagus berries.

chrysolein (*kris-o'-le-in*). Sodium fluoride.

chrysophan (*krsis'-o-fan*) [χρυσός, gold; φαίνειν, to show], $C_{16}H_{18}O_8$. A glucoside found in rhubarb.

chrysophanic acid (*kris-o-fan'-ik*). See *acid, chrysophanic*.

chrysophyl (*kris'-o-fil*) [χρυσός, gold; φύλλον, a leaf]. Xanthophyl; a bright golden-yellow crystalline pigment derived from leaves.

chrysoretin, chrysorrhetin (*krsis-o-ret'-in*). A yellow pigment found in senna and identical with chrysophan.

chrysotoxin (*krsis-o-toks'-in*). A constituent of ergot consisting of a small amount of ergotoxine with inactive, yellow, coloring matter. See *sphacelotoxin*.

chthonophagia, or **chthonophagy** (*thon-o-fa'-je-ah*, or *thon-off'-a-je*) [χθών, earth; φαγεῖν, to eat]. Dirt-eating; geophagy.

chuchuarine (*chu-chu'-ar-in*) [*Chuchuara*, Indian name], $C_{20}H_{15}N_{13}O_3$. An alkaloid obtained from the seeds and wood of *Semecarpus anacardium*, an anacardiaceous aphrodisiac plant of the East Indies. It is extremely poisonous, acting somewhat like strychnine.

Churchill's tincture of iodine. Iodine 16.5, potassium iodide 3.3, water 25, 95% alcohol (95%) 55.2.

churning sound (*churn'-ing*). A peculiar splashing-sound like that made by a churn, heard in the chest in some cases of pleural effusion.

Chvostek's symptom (*vos'-tek*) [Franz *Chvostek*, Austrian surgeon, 1835–1884]. Increase of the mechanical irritability of the motor nerves, especially the facial, in post operative tetany. A sudden local spasm is elicited by a slight tap on one side of the face. See also *Weiss' sign*.

chylaceous (*ki-la'-se-us*). Composed of chyle

chylangioma (*ki-lan-je-o'-mah*) [*chyle;* ἀγγεῖον, a vessel]. 1. Retention of chyle in lymphatic vessels with dilatation of the latter. 2. A tumor of lymph-vessels containing chyle.

chylaqueous (*ki-la'-kwe-us*) [*chyle; aqua*, water]. Like water and chyle. **c. fluid**, the digested food or nutritive fluid in the somatic or perigastric cavity of invertebrates; it represents the blood of higher animals.

chyle (*kīl*) [χυλός, juice]. The milk-white fluid absorbed by the lacteals during digestion. On standing, it separates into a thin, jelly-like clot and a substance identical with serum. **c.-corpuscle**, any floating cell of the chyle. These cells resemble, and are probably identical with, the colorless blood-corpuscles. **c., granular, c., molecular base of**, the minute particles of fat which give the milky appearance to chyle.

chylemia (*ki-le'-me-ah*) [*chyle;* αἷμα, blood]. The presence of chyle in the blood.

chylidrosis (*ki-lid-ro'-sis*) [*chyle;* ἱδρωσις, a sweating]. Milkiness of the sweat

chylifaction (*ki-le-fak'-shun*) [*chyle; facere*, to make] The forming of chyle from food.

chylifactive (*ki-le-fak'-tiv*) [*chyle; facere*, to make]. Chyle-forming.

chyliferous (*ki-lif'-er-us*) [*chyle; ferre*, to carry]. Containing or carrying chyle.

chylific (*ki-lif'-ik*) [*chyle; facere*, to make]. Making chyle, pertaining to chylifaction

chylification (*ki-le-fik-a'-shun*) [*chyle; facere*, to make]. The process by which chyle is formed, separated, and absorbed by the villi.

chylificatory (*ki-lif'-ik-at-o-re*) Chyle-making.

chylivorous (*ki-liv'-or-us*) [*chyle; vorare*, to devour]. Applied to parasitic organisms subsisting on chyle.

chylocele (*ki'-lo-sēl*) [*chyle;* κήλη, a tumor]. An effusion of chyle into the tunica vaginalis testis. **c. parasitic.** See *filaria sanguinis hominis*.

chylocyst (*ki'-lo-sist*) [*chyle;* κύστις, bladder]. The chyle-bladder; the reservoir of Pecquet.

chylocystic (*ki-lo-sis'-tik*) [*chyle;* κύστις, bladder]. Relating to the chylocyst.

chyloderma (*ki-lo-der'-mah*) [*chyle;* δέρμα, skin]. Scrotal elephantiasis, with accumulation of lymph in the thickened skin and in the enlarged lymphatic vessels; lymph-scrotum.

chylodochium (*ki-lo-do'-ke-um*) [*chyle;* δοχεῖον, receptacle]. The receptaculum chyli.

chylogaster (*ki-lo-gas'-ter*) [*chyle;* γαστήρ, the stomach]. The duodenum, so-called because of its being the chief seat of chylous digestion.

chylogastric (*ki-lo-gas'-trik*). Pertaining to the chylogaster.

chylomicron (*ki-lo-mi'-kron*) [*chyle;* μικρον, small]. 1. A small particle of chyle or fat. 2. Blood dust.

chylopericardium (*ki-lo-per-ik-ar'-de-um*) [*chyle;* περί, around; καρδία, the heart]. A rare condition, in which chyle is present in the pericardium, as a consequence of the formation of a channel of communication between a chyle-duct and the cavity of the heart-sac.

chyloperitoneum (*ki-lo-per-it-on-e'-um*). A condition marked by an effusion of chyle in the peritoneum.

chylopleura (*ki-lo-ploo'-rah*). Milky fluid in the pleural cavity.

chylopoiesis (*ki-lo-poi-e'-sis*) [*chyle;* ποιεῖν, to make]. Chylification.

chylopoietic (*ki-lo-poi-et'-ik*) [see *chylopoiesis*]. Making or forming chyle.

chyloptyalism (*ki-lop-ti'-al-izm*) [*chyle;* πτυαλιζεῖν, to spit]. Milkiness of the saliva.

chylorrhea (*ki-lor-e'-ah*) [*chyle;* ῥεῖν, to flow]. An excessive flow of chyle; also, a diarrhea characterized by a milky color of the feces.

chylosis (*ki-lo'-sis*) [χύλωσις, a converting into juice]. Chylification.

chylothorax (*ki-lo-tho'-raks*) [*chyle;* θώραξ, the chest]. The presence of chyle in the pleural cavity.

chylous (*ki'-lus*) [*chyle*]. Relating to or resembling chyle.

chyluria (*ki-lū'-re-ah*) [*chyle;* οὖρον, urine]. The passage of chyle in the urine. It is thought to be caused by a disordered condition of the lacteals, and is also connected with the presence in the blood of *Filaria sanguinis hominis*, which blocks up the lymph-channels.

chyme (*kīm*) [χυμός, chyme]. Food that has undergone gastric digestion and has not yet been acted upon by the biliary, pancreatic, and intestinal secretions.

chymiferous (*ki-mif'-er-us*) [*chyme; ferre*, to bear]. Capable of producing chyme.

chymification (*ki-me-fik-a'-shun*) [*chyme; facere*, to make]. The change of food into chyme by the digestive process.

chymorrhea (*kim-or-e'-ah*) [*chyme;* ῥεῖν, to flow]. A discharge of chyme.

chymosin (*ki'-mo-sin*) [*chyme*]. Rennin; the rennet ferment.

chymosinogen (*ki-mo-sin'-o-jen*). The antecedent body from which chymosin is developed.

C. I. Abbreviation of color-index.

Ciaglinski's sensory tract (*se-a-glin'-ske*). A tract of ascending fibers in the posterior gray commissure of the thoracic part of the spinal cord

Ciamician and Magnanini's test for skatol. Skatol warmed with sulphuric acid produces a purple-red color.

cibarian (*sib-a'-re-an*) [*cibus*, food]. Relating to food and the organs concerned in mastication and deglutition.

cibarious (*sib-a'-re-us*) [*cibus*, food]. Serving as food; nutritious; edible.

cibation (*si-ba'-shun*) [*cibus*, food]. 1. The act of receiving nourishment. 2. The process of condensing a liquid.

cibisotome (*si-bis'-ot-ōm*) [κίβισις, pouch; τομή, cut]. An instrument for opening the capsule of the lens.

cibophobia (*si-bo-fo'-be-ah*) [*cibus*, food; φόβος, fear]. Morbid aversion to food.

cibrola (*sib-ro'-lah*). Trade name of a food product-containing casein and glycerophosphates.

cicatricial (*sik-at-rish'-al*) [*cicatrix*]. Pertaining to or of the nature of a cicatrix. **c. deformities**, abnormal contractions caused by cicatrices. **c. tissue**, a form of dense connective tissue seen in cicatrices.

cicatricine (*sik-at'-ris-ēn*). Trade name of a compound of thiosinamine and antipyrine, put up in ampoules for injection.

cicatricose, cicatrisate (*sik-at'-re-kōs, sik-at'-ris-āt*). Marked with cicatrices or cicatricial impressions.

cicatrisotomy (*sik-a-tris-ot'om-e*) [*cicatrix;* τομή, cutting]. Excision of scar tissue; uleotomy.

cicatrix (*sik-a'-triks*) [L.: *pl.*, *cicatrices*]. A scar. The connective tissue which replaces a localized loss of substance. Its color is usually whitish and glistening when old, red or purple when newly developed. **c., exuberant, c., hypertrophic, c., keloid,** one that hypertrophies after the healing of a wound and becomes red and prominent. **c., vicious,** one that impairs the function of a part.

cicatrizant (*sik'-at-ri-zant*) [*cicatrix*, a scar]. 1. Tending to cicatrize or heal. 2. A medicine that aids the formation of a cicatrix.

cicatrization (*sik-at-riz-a'-shun*) [*cicatrix*]. The process of healing of a wound.

cicatrize (*sik'-at-riz*). To heal.

cicatrose (*sik'-at-rōs*). See *cicatricose*.

Cichorium (*sik-o'-re-um*) [κιχώριον]. A genus of plants of the order *Compositæ*. *C. intybus*, chicory, succory, bunk, is a hardy perennial of Europe; the root of the wild plant is said to be a powerful alterative. **C. glucoside,** $C_{32}H_{54}O_{19} + 4\frac{1}{2}H_2O$ (?), a bitter glucoside obtained from the flowers of *C. intybus*.

Cicuta (*sik-u'-tah*) [L., "hemlock"]. A genus of umbelliferous plants. *C. virosa* is a poisonous species of northern Europe. It is never used internally, but has been applied externally in rheumatism.

cicutine (*sik'-ū-tēn*) [*cicuta*, hemlock]. 1. An alkaloid obtained from *Cicuta virosa*. 2. The same as coniine.

cicutism (*sik'-ū-tizm*) [*Cicuta*]. Poisoning with water-hemlock, *Cicuta virosa*. It is marked by epileptiform convulsions, dilatation of the pupils, cyanosis of the face, and coma.

cicutoxin (*sik-ū-toks'-in*) [*cicuta*, hemlock; τοξικόν, poison]. The poisonous active principle of *Cicuta virosa*. It is a viscid, non-crystallizable liquid of unpleasant taste and acid reaction.

cilia (*sil'-e-ah*) [pl. of *cilium*, the eyelid or eyelash]. 1. The eyelashes. 2. The locomotor and prehensile organs of certain microorganisms. 3 The hair-like appendages of certain epithelial cells the function of which is to propel fluid or, particles.

ciliariscope (*sil-e-ar'-is-kōp*) [*cilium*, eyelid; σκοπεῖν, to look at] An instrument (essentially a prism) for examining the ciliary region of the eye.

ciliarotomy (*sil-e-ar-ot'-o-me*) [*cilia*; τέμνειν, to cut]. Surgical section of the ciliary zone for glaucoma.

ciliary (*sil'-e-a-re*) [*cilia*]. 1. Pertaining to the eyelid or eyelash. 2. Relating to ciliary movement. 3. Pertaining to the ciliary apparatus. **c. apparatus,** the structure related to the mechanism of accommodation. **c. arteries,** anterior, posterior long, and posterior short, branches of the ophthalmic artery, supplying the recti muscles, the ciliary apparatus, and the posterior structures of the eye, with the exception of the retina. **c. body,** the ciliary muscle and processes. **c. canal,** the canal of Fontana. **c., ganglion,** the ganglion at the apex of the orbit, supplying the ciliary muscle and iris. **c. ligament.** See *ligamentum pectinatum*. **c. movement,** movement by means of vibratory cilia. **c. muscle,** the muscle of accommodation, the contraction of which lessens the tension upon the suspensory ligament of the lens. **c. nerves,** branches of the ophthalmic ganglion supplying the anterior structures of the eyeball and the accommodative apparatus. **c. neuralgia,** neuralgic pain of the eye, brow, temple, etc. **c. processes,** circularly arranged choroid foldings continuous with the iris in front. **c. region,** the pericorneal or "danger zone," corresponding to the position of the ciliary body. **c. zone,** the ciliary processes collectively.

ciliata (*sil-e-ah'-tah*). A class of protozoa characterized by the presence of cilia.

ciliated (*sil'-e-a-ted*) [*cilia*]. 1. Having cilia. 2. Of bacteria, having fine hair-like processes, like cilia.

ciliation (*sil-e-a'-shun*) [*cilium*, an eyelash]. The condition of having cilia.

ciliograde (*sil'-e-o-grād*) [*cilia; gradus*, a step]. Progressing by ciliary motion.

ciliosclera (*sil-e-o-skle'-ral*) [*cilia; sclera*]. Pertaining to the ciliary body and the sclera.

ciliospinal (*sil-e-o-spi'-nal*) [*cilia; spina*, the spine]. Relating to the ciliary zone and the spine. **c. center.** See *center, ciliospinal*.

cilium (*sil'-e-um*). See *cilia*.

cillo (*sil'-o*), or **cillosis** (*sil-o'-sis*) [*cilium*, an eyelash]. A spasmodic trembling of the eyelid.

cillotic (*sil-ot'-ik*) [*cilium*, an eyelash]. Pertaining to or affected with cillo.

cimatoxyl (*si-mat-oks'-il*). A combination of atoxyl with an aromatic compound.

cimbia (*sim'-be-ah*) [L.]. The white band seen upon the ventral aspect of the crus cerebri, the tractus pedunculi transversus of Gudden.

cimbial (*sim'-be-al*) [*cimbia*, a cincture]. Relating to the cimbia.

cimex (*si'-meks*) [L., "a bug"]. A genus of hemipterous insects. **c. lectularius,** the common bedbug.

cimicifuga (*sim-is-if'-ū-gah*) [*cimex; fugare*, to drive away]. Black snakeroot, black cohosh. The root of *C. racemosa*, ord. *Ranunculaceæ*. A stomachic, antispasmodic, aphrodisiac, expectorant, and diuretic. Its action on the heart is similar to that of digitalis. It has been used in cardiac diseases, functional impotence, chorea, and ovarian neuralgia. **c., extract of** (*extractum cimicifugæ*, U. S. P.). Dose 4 gr. (0 25 Gm.). **c., fluidextract of** (*fluidextractum cimicifugæ*, U. S. P.). Dose 5–30 min. (0 32–2 0 Cc.). **c., liquid extract of** (*extractum cimicifugæ liquidum*, B. P.). Dose 3–30 min. (0.2–2.0 Cc.). **c., tincture of** (*tinctura cimicifugæ*, U S. P.) (20 % strength). Dose 15 min –1 dr. (1–4 Cc.).

cimicifugin (*sim-is-if'-u-jin*) [*cimex*, a bug; *fugare*, to drive away]. The precipitate from a tincture of the root of *Cimicifuga racemosa*, it is an antispasmodic, diaphoretic, nervine, emmenagogue, parturient, and narcotic. Dose 1 to 2 gr.

cimmol (*sim'-ol*). See *aldehyde, cinnamic*.

cimolite (*si'-mol-it*). A preparation of kaolin (aluminum silicate).

cina (*si'-nah*) [L.]. The plant *Artemisia santonica*. See *santonica*.

cinchamidine (*sin-kam'-id-ēn*) [*cinchona; amidin*], $C_{32}H_{22}N_2O_2$. An alkaloid found in the mother-liquor from which cinchonidine has been extracted.

cincholine (*sin'-ko-lēn*) [*cinchona*]. A pale yellow liquid alkaloid isolated from the mother-liquors of quinine

cinchona (*sin-ko'-nah*) [Countess *Chinchon*, 17th century]. Peruvian bark. The bark of several varieties of cinchona, a tree native to the eastern slopes of the Andes, the most valuable being *C. calisaya*. Other varieties are *C. condaminea*, pale bark, *C. ptayensis*, Pitayo bark, and *C. micrantha*. Cinchona bark contains 21 alka-

loids, of which four—quinine, cinchonine, quinidine, and cinchonidine—are the most important. Cinchona has the same physiological action and therapeutic uses as its chief alkaloid, quinine. See *quinine*. It is also an astringent, bitter, and stomachic tonic, stimulating appetite and promoting digestion, beneficial in atonic dyspepsia and adynamia, but especially useful in malarial affections. **c., decoction of** (*decoctum cinchonæ*, B. P.). Dose 1–2 oz. (30–60 Cc.). **c., fluidextract of** (*fluidextractum cinchonæ*, U. S. P.). Dose 10 min.–1 dr. (0.65–4.0 Cc.). **c., infusion of** (*infusum cinchonæ*, B. P.). Dose 1 dr.–1 oz. (4–30 Cc.). **c., liquid extract of** (*extractum cinchonæ liquidum*, B. P.). Dose 5–10 min. (0.3–0.6 Cc.). **c., red** (*cinchona rubra*, U. S. P.), the dried bark of *C. succirubra*. Dose 15 gr. (1 Gm.). **c., tincture of** (*tinctura cinchonæ*, U. S. P.) (20 % of bark). Dose ½–2 dr. (2–8 Cc.). **c., tincture of, compound** (*tinctura cinchonæ composita*, U. S. P.), Huxham's tincture. Dose 1 dr.–½ oz. (4–16 Cc.).

cinchonamine (*sin-kon'-am-ēn*) [*cinchona; amine*], $C_{19}H_{24}N_2O$. An alkaloid of cuprea bark. It occurs in glistening, colorless crystals that are nearly insoluble in water and but slightly soluble in ether.

cinchonate (*sin'-ko-nāt*). A salt of cinchonic acid.

cinchonic (*sin-kon'-ik*). Pertaining to cinchona.

cinchonicine (*sin-kon'-is-ēn*) [*cinchonin*], $C_{19}H_{22}N_2O$. An artificial alkaloid derived from cinchonine.

cinchonidine (*sin-kon'-id-ēn*), $C_{19}H_{22}N_2O$. An alkaloid derived from cinchona. It is a crystalline substance resembling quinine in general properties. **c. bisulphate, c. disulphate,** $C_{19}H_{22}N_2O.H_2SO_4 + 5H_2O$, prisms soluble in water and alcohol; antiperiodic. Dose 15–30 gr. (0.97–1.94 Gm.). Syn., *acid cinchonidine sulphate*. **c. salicylate,** has decided antiperiodic properties. **c. sulphate** (*cinchonidinæ sulphas*, U. S. P.), $(C_{19}H_{22}N_2O)_2.H_2SO_4 + 3H_2O$, less bitter than quinine, and valuable as an antipyretic. Dose 1–20 gr. (0.065–1.3 Gm.) or more. **c. tannate,** a tasteless, yellow, amorphous powder, soluble in alcohol; it is used in intermittent fevers. Dose 8–16 gr. (0.52–1.04 Gm.).

cinchonine (*sin'-ko-nēn*) [*cinchona*], $C_{19}H_{22}N_2O$. An alkaloid derived from cinchona. It is a colorless, crystalline body, similar to quinine in therapeutic effects, but less active. **c. bisulphate,** $C_{19}H_{22}N_2O\ H_2SO_4$, used as a cinchonine. **c. dihydrochloride,** is said to contain 60 % of cinchonine; antipyretic and antiseptic. **c. herapathite, c. iodosulphate.** See *antiseptol*. **c. hydrochloride,** used as is cinchonine. **c. nitrate,** $C_{19}H_{22}N_2O.HNO_3 + H_2O$, used as is cinchonine. **c. salicylate,** $C_{19}H_{22}N_2.C_7H_6O_3$; used in rheumatism in malarial regions. Dose 5–20 gr. (0.32–1.3 Gm.). **c. sulphate** (*cinchoninæ sulphas*, U. S. P.), $(C_{19}H_{22}N_2O)_2.H_2SO_4 + 2H_2O$. It is soluble with difficulty in water, but soluble in adiculated water. Dose 5–30 gr. (0.32–2.0 Gm.). **c. tannate,** yellow powder, soluble in alcohol; used in the same manner as is cinchonine.

cinchonism (*sin'-ko-nism*) [*cinchona*]. The systemic effect of cinchona or its alkaloids when given in full doses. The symptoms produced are a ringing in the ears, with deafness, headache, giddiness, dimness of sight, and a weakening of the heart's action.

cinchonize (*sin'-ko-nīz*) [*cinchona*]. To bring under the influence of cinchona or its alkaloids.

cinchonology (*sin-ko-nol'-o-je*) [*cinchona; λόγος*, science]. The science of the derivatives of cinchona.

cinchophen (*sin-'ko-fen*). Preferred term for phenylcinchoninic acid or atophan.

cinchotannic acid (*sin-ko-tan'-ik*). A tannic acid derived from cinchona bark.

cinchotannin (*sin-ko-tan'-in*), $C_{14}H_{16}O_9$. A glucoside existing in cinchona bark in the proportion of 3 to 4 %; a brownish-red substance, soluble in water and alcohol, and forming white precipitates with tartar emetic and gelatin. Syn., *cinchotannic acid; quinotannic acid*.

cinchotoxin (*sin-ko-toks'-in*). A poisonous isomere of cinchonine.

cinclisis (*sin'-klis-is*) [*κίγκλισις*, any quick, repeated motion]. Quick, spasmodic movement of any part of the body, but particularly rapid winking. Hippocrates' term for quick motion of the chest, as in dyspnea. Syn., *cinclesmus*.

cincophen (*sin'-ko-fen*). Preferred term for phenylcinchoninic acid or atophan.

cincture (*singk'-tūr*) [*cinctura*, a girdle]. A belt or girdle. **c.-feeling,** a sensation as if the waist were encircled by a tight girdle. See *girdle-pain*.

cine- for words beginning thus, see also *kine*.

cinemadiog'raphy. See *kinemadiography*.

cinematics (*sin-e-mat'-iks*). See *kinetics*.

cinematograph. See *kinematograph*.

cineol (*sin'-e-ol*) [*cina*, wormseed; *oleum*, oil], $C_{10}H_{18}O$. The principle constituent of wormseed, cajuput, and eucalyptus oils

cineplastics (*sin-e-plas'-tiks*). Same as kineplasty, *q. v.*

cineraceous (*sin-er-a'-shus*) [*cinerea*]. Ash-gray in color.

Cineraria (*sin-er-a'-re-ah*) [*cinerarius*, pertaining to ashes]. A genus of composite plants. **C. maritima,** the juice of this plant has been used in Venezuela in the belief that, dropped in the eye, it would cause the absorption of cataract.

cinerea (*sin-e'-re-ah*) [*cinereus*, ashen]. The gray substance of the brain, spinal cord, and ganglia. **c., lamina,** a thin layer of gray substance extending backward above the optic commissure from the termination of the corpus callosum to the tuber cinereum.

cinereal (*sin-e'-re-al*). Ashy.

cineritious (*sin-er-ish'-us*) [*cineres*, ashes]. Ash-like or pertaining to ashes. **c. substance,** the cortex of the brain, from the color of the same. **c. tubercle,** the tuber cinereum.

cinesalgia. See *kinesalgia*.

cinesia (*sin-e'-se-ah*). See *kinesis*.

cinesiatrics. See *kinesiatrics*.

cinesiology (*sin-es-e-ol'-o-je*). See *kinesiology*.

cinesis (*sin-e'-sis*). See *kinesis*.

cinesitherapy (*sin-es-e-ther'-a-pe*). See *kinesitherapy*.

cinetica (*sin-et'-ik-ah*) [*κινεῖν*, to move]. Medicines or diseases that affect the motor apparatus.

cingula (*sin'-gū-lah*). 1. A band, girdle, or zone. 2. Burdach's name for the upper part of the fornicate gyrus.

cingule (*sin'-gūl*) [*cingulum*]. The groove separating the primitive cusp or tubercle frequently found on the lingual face of the upper incisor teeth. Syn., *cingulum; cingulus*.

cingulum (*sin'-gū-lum*) [*cingere*, to gird]. 1. A girdle or zone; the waist. 2. Herpes zoster or shingles. 3. See *cingule*. 4. A fibrous bundle in the fornicate gyrus of the brain. Syn., *bundle*

of the gyrus fornicatus; fasciculus arcuatus. **c. extremitatis inferioris,** the pelvic girdle. **c. extremitatis superioris,** the shoulder girdle. **c. Halleri,** the abdominal muscles. **c. veneris.** See *corona veneris.*

Ciniselli's method (*che-ne-sel'-le*) [Luigi *Ciniselli,* Italian surgeon, 1803–1878]. Galvanopuncture in treatment of aneurysm.

cinnabar (*sin'-ab-ar*) [κιννάβαρι, a pigment]. Mercuric sulphide, HgS.

cinnabarsana (*sin-ab-ar-san'-ah*). A preparation said to consist of arsenic trioxide, cinnabar, charcoal, and water; it has been used as a cancer remedy.

cinnamein (*sin-am-e'-in*), $CHO_2(CH)$. A constituent of balsams of Peru and Tolu, and is obtained from sodium cinnamate by heating with benzyl chloride. Syn., *benzyl cinnamate.*

cinnamene (*sin-am'-ēn*). See *styrol.*

cinnamic (*sin-am'-ik*) [*cinnamon*]. Pertaining to or derived from cinnamon. **c. acid.** See *acid, cinnamic.* **c. aldehyde** (*cinnaldehydum,* U. S. P.). See *aldehyde, cinnamic.*

cinnamol (*sin'-am-ol*). 1. See *styrol.* 2. See *aldehyde, cinnamic.*

cinnamomum (*sin-am-o'-mum*). See *cinnamon.*

cinnamon (*sin'-am-on*). The inner bark of the shoots of several species of *Cinnamomum,* native to Ceylon and China, the latter variety being known in commerce under the name of *cassia.* Two varieties are official: *Cinnamomum saigonicum,* Saigon cinnamon, and *C. zeylanicum,* Ceylon cinnamon. Its properties are due to a volatile oil. It is an agreeable carminative and aromatic stimulant, used in flatulence, colic, enteralgia, etc. **c., aromatic, fluidextract of,** contains aromatic powder, 10; alcohol, 8 parts. Dose 10–30 min. (0.65–2.0 Cc.). **c., aromatic, powder of,** made up of aromatic powder, cinnamon, of each, 35; cardamom, nutmeg, of each, 15. Dose 10–30 gr. (0.65–2.0 Gm.). **c., compound powder of** (*pulvis cinnamomi compositus,* B. P.), cinnamon-bark, cardamom-seeds, and ginger. Dose 3–10 gr. (0.2–0.5 Gm.). **c., oil of** (*oleum cinnamomi,* U. S. P.), the volatile oil of cinnamon Dose 1–5 min. (0.065–0.32 Cc.). **c., spirit of** (*spiritus cinnamomi,* U. S. P.), 10% of the oil in spirit. Dose 5–30 min. (0.32–2.0 Cc.). **c., tincture of** (*tinctura cinnamomi,* U. S P.), 20% of powdered Saigon cinnamon in glycerol, alcohol, and water. Dose ½–2 dr. (2–8 Cc.). **c. water** (*aqua cinnamomi,* U. S. P.), 2 parts of oil in 1000 of water. Dose 1–2 oz. (30–60 Cc.).

cinnamyl (*sin'-am-il*) [*cinnamon*], C_9H_7O. The radical believed to exist in cinnamic acid. **c. cinnamate.** See *styracin.* **c.-eugenol,** $C_{19}H_{18}O_2$. It is antiseptic and is used hypodermatically instead of eugenol in tuberculosis. Injection, 2–8 min. (0.12–0.5 Cc.) of olive-oil solution. **c. hydrate,** cinnamic acid. **c. hydride,** cinnamic aldehyde. **c.-metacresol,** the metacresol ester of cinnamic acid; a nontoxic, nonirritating antiseptic substance recommended in treatment of tuberculosis. Syn., *hetocresol.*

cion (*si'-on*) [κίων, the uvula]. The uvula.

cionectomy (*si-on-ek'-to-me*) [κίων, the uvula. ἐκτομή, a cutting out]. Ablation of the uvula.

cionitis (*si-on-i'-tis*) [κίων, the uvula; ῖτις, inflammation]. Inflammation of the uvula

cionoptosis (*si-on-op-to'-sis*) [κίων, uvula; πτῶσις a falling]. Prolapse of the uvula.

cionorrhaphia (*si-on-or-af'-e-ah*) [κίων, the uvula; ῥαφή, a suture]. See *staphylorrhaphy.*

cionotome (*si-on'-o-tōm*) [κίων, the uvula; τομή, a cutting]. An instrument for cutting off the uvula.

cionotomy (*si-on-ot'-o-me*) [κίων, uvula; τομή, a section]. Incision of the uvula.

ciose (*si'-ōs*). Trade name of a dry preparation containing the protein substance of lean beef in a soluble form.

Cipollina's test for glucose (*sip-ol-e'-nah*). Mix 4 Cc. of dextrose solution (or urine), 5 drops of phenylhydrazine (base), and ½ Cc. of glacial acetic acid in a test-tube. Heat over a low flame for one minute. Add 4 or 5 drops of sodium hydroxide (sp. gr. 1.16) taking care that the fluid remains acid. Heat the mixture again for a moment and then cool. Crystals of glucosazone usually form at once. If they do not, allow test-tube to stand at least twenty minutes before final decision is reached

circellus (*ser-sel'-us*) [L.; pl., *circelli*]. A small circle. **circelli cerebelli,** the laminæ of the cerebellum. **c. venosus hypoglossi,** a venous plexus encircling the hypoglossal nerve in the anterior condylar foramen; it communicates with the occipital sinus and with the jugular vein.

circinate (*sir'-sin-āt*) [*circinatus,* circular]. Having a circular outline or a ring formation. **c. eruption,** see *wandering rash.*

circinus (*sir'-sin-us*) [κίρκινος, circle]. Herpes zoster; zona.

circle (*ser'-kl*) [κίρκος, a circle]. A ring; a line, every point of which is equidistant from a point called the center. **c., ciliary,** the ciliary ligament. **c. of diffusion.** See *diffusion-circle.* **c. of Haller.** See *Haller, circle.* **c. Huguier's.** See *Huguier, circle.* **c. of Willis.** See *Willis, circle.* **c. of Zinn.** See *Haller, circle of* (1).

circocele (*sur'-ko-sēl*). See *cirsocele.*

circuit (*ser'-kit*) [*circuitus,* a going round] The course of an electric current. **c.-breaker,** an apparatus for interrupting the circuit of an electric current.

circular (*ser'-kū-lar*). 1. Ring-shaped 2 Pertaining to a circle. 3. Marked by alternations of despondency and excitation, as in circular insanity. **c. amputation,** amputation with an incision surrounding the limb. **c. insanity.** See *insanity, circular.* **c. sinus.** See *sinus, circular.*

circulation (*ser-kū-la'-shun*) [*circulatio,* a circular course]. Passage in a circle, as the *circulation* of the blood. **c., collateral,** that taking place through branches and secondary channels after stoppage of the principal route. **c., fetal,** that of the fetus, including the circulation through the placenta and umbilical cord. **c., first, c., primitive,** that of the embryo, a closed system, carrying nutriment and oxygen to the embryo. **c., placental,** the fetal circulation. **c., portal,** the passage of the blood from the gastrointestinal tract and spleen through the liver, and its exit by the hepatic vein. **c., pulmonary,** the circulation of blood through the lungs by means of the pulmonary artery and veins, for the purpose of oxygenation and purification. **c., second,** the fetal circulation, replacing the omphalomesenteric system. **c., systemic,** the general circulation, as distinct from the pulmonary circulation. **c., third,** that of the adult. **c., vitelline,** first or primitive circulation.

circulatory (*ser'-kū-la-to-re*). Pertaining to the circulation.

circulus (*ser'-kū-lus*) [L.]. 1. A circle. 2. See *Willis, circle of.* **c. arteriosus Halleri, c Zinnii,**

the circle of Haller. **c. arteriosus iridis major,** an arterial circle around the circumference of the iris. **c. arteriosus iridis minor,** one around the free margin of the iris. **c. articuli vasculosus,** that formed by the blood-vessels in the synovial membrane about the cartilages of a joint. **c. arteriosus Willisii,** the circle of Willis, an arterial circle at the base of the brain. **c. gangliosus ciliaris,** a circular nerve-plexus in the ciliary muscle. Syn., *orbiculus ganglıosus.* **c. osseus,** the tympanic ring. **c. venosus Halleri, c. venosus mammæ,** an anastomosis of veins around the nipple. **c. venosus Ridleyi,** a venous anastomosis around the sella turcica of the sphenoid bone.

circum- (*ser-kum-*) [L.]. A prefix meaning around, about

circumagentes (*sir-kum-aj-en'-tēz*) [L., "causing to revolve"]. 1. The oblique muscles of the eye. 2. The infraspinatus and supraspinatus muscle that revolve the arm.

circumanal (*sır-kum-a'-nal*) [*cırcum; anus*, the fundament] Periproctous; surrounding the anus.

circumarticular (*sir-kum-ar-tik'-ū-lar*) [*circum-; artıculus*, a joint]. Around a joint.

circumaxile (*ser-kum-aks'-ıl*) [*cırcum-; axis*]. Encircling an axis.

circumaxillary (*sir-kum-aks'-il-ar-e*) [*cırcum-; axilla*]. Surrounding the axilla.

circumbuccal (*sır-kum-buk'-al*) [*cırcum-; bucca*, the cheek] Surrounding the mouth.

circumbulbar (*sir-kum-bul'-bar*). Surrounding a bulb, especially the eyeball.

circumcision (*sır-kum-sızh'-un*) [*cırcum-; cædere*, to cut]. The removal of the foreskin; excision of a circular piece of the prepuce.

circumclusion (*sır-kum-klu'-zhun*) [*circum-; cludere*, to close]. A form of acupressure in which the pin is passed beneath the vessel, a wire loop placed over its point, and its ends brought over the artery and made fast.

circumcorneal (*sır-kum-kor'-ne-al*) [*circum-; corneus*, horny]. Around or about the cornea.

circumduction (*sir-kum-duk'-shun*) [*circum-; ducere*, to lead]. The movement of a limb in such a manner that its distal part describes a circle, the proximal end being fixed.

circumference (*sir-kum'-fer-ens*) [*circumferre*, to carry around]. The distance around a part.

circumferential (*sur-kum-fer-en'shal*). Pertaining to a circumference; peripheral.

circumflex (*sır'-kum-fleks*) [*cırcum-; flectere*, to bend]. Winding around. The name given to a number of arteries, veins, and nerves, on account of their course.

circumgyration (*sir-kum-ji-ra'-shun*) [*circum-; gyrare*, to turn]. See *vertıgo.*

circuminsular (*sir-kum-in'-sū-lar*) [*circum-; insula*, island]. Surrounding the island of Reil.

circumlental (*sir-kum-len'-tal*) [*circum-; lens*, a lentil; lens]. Surrounding the lens. **c. space.** See *space.*

circumnuclear (*sir-kum-nū'-kle-ar*) [*circum-; nucleus*, kernel]. Surrounding the nucleus.

circumnutation (*sır-kum-nū-ta'-shun*) [*cırcum-; nutare*, to nod]. A bending successively toward all points of the compass. Applied to the movements of young and growing organs.

circumocular (*sir-kum-ok'-ū-lar*) [*circum-; oculus*, eye]. Surrounding the eye.

circumoral (*sır-kum-o'-ral*) [*circum-; os*, mouth]. Surrounding the mouth.

circumorbital (*sir-kum-or'-bit-al*) [*circum-; orbita*, orbit]. Around the orbit.

circumpolarization (*sir-kum-po-lar-i-za'-shun*) [*circum-; polus*, pole]. 1. The rotation of a ray of polarized light. 2. The quantitative estimation of sugar in a suspected liquid by the degree of the rotation of polarized light, sugar rotating the ray to the right, albumin to the left.

circumrenal (*sir-kum-re'-nal*) [*circum-; ren*, the kidney]. Around or about the kidney.

circumscribed (*sir'-kum-skrībd*) [*circum-; scribere*, to write]. Strictly limited or marked off; well defined; distinct from surrounding parts, as a *circumscribed* inflammation or tumor.

circumtonsillar (*sır-kum-tons-ıl'-lar*) [*circum-; tonsil*]. Surrounding the tonsil.

circumvallate (*sir-kum-val'-āt*) [*circum-; vallum*, wall]. Surrounded by a wall or prominence. **c. papillæ,** certain papillæ at the base of the tongue.

circumvascular (*sır-kum-vas'-kū-lar*) [*circum-; vasculum*, vessel]. Surrounding a blood vessel, or other vessel.

cirrholysin (*sır-ol'-ıs-in*). See *fibrolysin.*

cirrhonosus (*sir-on'-o-sus*) [*κιῤῥός*, yellow; *νόσος*, disease]. 1. A fetal disorder, marked by yellowness of the serous membranes. 2. Abnormal post-mortem yellowness of any surface or tissue.

cirrhose (*sır-ōs'*) [*cirrus*, a tendril]. In biology, provided with tendrils.

cirrhosis (*sir-o'-sis*) [*κιῤῥός*, reddish-yellow from the color of the cirrhotic liver] Chronic inflammation of an organ, characterized by hardening due to an overgrowth of the connective tissue. **c., alcoholic.** See *c., atrophic.* **c., annular.** See *c., multilobular.* **c, atrophic,** a form of cirrhosis of the liver occurring in hard drinkers, characterized by great over-growth of the interstitial substance, with atrophy of the parenchyma. **c., biliary,** a form of cirrhosis of the liver due to chronic retention of bile from long-continued obstruction of the bile-ducts. **c., Budd's.** See *Budd's cirrhosis.* **c., cardiac, c. cordis,** hypertrophy of the connective tissue between the muscular fibers of the heart. **c. cardiotuberculous,** that accompanied by the tuberculosis and symptoms of cardiac disease. **c., Charcot's.** See *Hanot's disease.* **c., fatty,** that in which the hepatic or other cells become infiltrated with fat. **c., Glissonian,** perihepatitis. **c., Hanot's.** See *Hanot's disease.* **c. hepatis,** interstitial hepatitis. **c., hypertrophic,** a form of cirrhosis in which the liver is permanently enlarged. The disease is probably infectious, and is characterized by an overgrowth of the connective tissue which has no tendency to contract. **c., irritative,** interstitial hepatitis due to irritation by some toxic substance which has been carried to the liver by the hepatic or portal veins. **c., Laennec's.** See *Laennec's disease.* **c. of the lung,** interstitial pneumonia. **c. mammæ,** chronic interstitial mastitis. **c., mixed,** that presenting features of both the atrophic and the hypertrophic form. **c., multilobular,** a form of interstitial hepatitis in which many lobules are surrounded by a fibrous ring. **c., muscular,** the induration of connective tissue, fatty degeneration, and atrophy of the muscular fibers which take place in muscular contracture. **c., obstructive,** cirrhosis of the liver due to the obstruction of the passage of blood or bile from the liver. **c., periportal,** atrophic cirrhosis, so called because the hyperplasia of the connective tissue follows the portal vessels. **c., pigmentary diabetic,** cirrhosis of the liver with pigmentation of the skin. **c., pulmonary, c. pulmonum,** interstitial pneumonia. **c., renal, c. renum,**

interstitial nephritis. **c. of the spleen,** chronic hypertrophy and induration of the spleen, with thickening of the capsule. **c. of the stomach,** chronic interstitial gastritis. **c., Todd's.** See *Todd's cirrhosis.* **c., tuberculous,** cirrhosis of the liver due to tuberculosis. It is rare; the majority of cases have occurred in children. **c., turbinated,** defective turbinated bodies due to disappearance or diminishment of the erectile structure in cases of atrophic rhinitis. **c. ventriculi.** See *c. of the stomach.*

cirrhotic (*sir-ot'-ik*) [*cirrhosis*]. Affected with, or relating to, cirrhosis. **c. kidney,** chronic interstitial nephritis.

cirrus (*sir'-us*) [L.]. 1. A lock or tuft of hair. 2. The male genital organ of *Cestodes,* usually adherent to the anterior end of the cirrus-pouch. **c.-pouch,** a structure made up of muscle and connective tissue attached to the male genital aperture of the *Cestodes* and serving to protrude the cirrus.

cirsaneurysma (*sirs-an-ū-riz'-mah*). See *aneurysm, cirsoid.*

cirsectomy (*sur-sek'-to-me*) [κιρσός, a varix; ἐκτομή, a cutting out]. Excision of a piece of a varicose vein.

cirsocele (*sir'-so-sēl*) [*cirsoid;* κήλη, tumor]. A varicose tumor, especially of the spermatic cord.

cirsoid (*sir'-soid*) [κιρσός, a varix; εἶδος, form]. Resembling a varix or dilated vein.

cirsomphalos (*sir-som'-fal-os*) [*cirsoid;* ὀμφαλός, navel]. A varicose condition of the navel.

cirsophthalmia (*sir-soff-thal'-me-ah*) [κιρσός, varix; ὀφθαλνός, the eye]. 1. Ophthalmia, with an apparent varicose condition of the conjunctival vessels. 2. Corneal staphyloma, with an appearance of varicosity of the surface.

cirsotome (*sir'-so-tōm*) [κιρσός, a varix; τομή, a cutting]. A cutting instrument for the operation of cirsotomy.

cirsotomy (*sir-sot'-o-me*) [*cirsoid;* τέμνειν, to cut]. Excision of a varix.

cis-. A prefix used to designate relative asymmetry in unsaturated carbon compounds.

cissa (*sis-ah*) [L.]. See *pica.*

cissampeline (*sis-am'-pel-ēn*). An alkaloid from pareira root, identical with beberine.

Cissampelos (*sis-am'-pel-os*) [κισλός, ivy; ἀμπέλος, a vine]. A genus of climbing menispermaceous plants. The root of **C. capensis,** of South America, is cathartic and emetic. **C. pareira,** of tropical America, false pareira brava (*q. v.*), is tonic and diuretic.

cistern (*sis'-tern*) [*cisterna,* a vessel; receptacle]. 1. A reservoir. 2. Any dilatation of the space between the pia and arachnoid. **c. of Pecquet,** the receptaculum chyli. **c., seminal,** the posterior culdesac of the vagina. Syn., *receptaculum seminis.*

cisterna (*sis-ter'-nah*) [L.]. Same as *cistern.* In the plural, *cisternæ,* the subarachnoid spaces. **c. ambiens.** 1. One of the pockets situated over the optic lobes. 2. See *canal, arachnoid.* **c. basilis,** that part of the anterior subarachnoid space holding the circle of Willis; it is divided by the chiasm into two parts, the *cisterna anterior* and the *cisterna inferior.* **c. cerebellaris, c. cerebellomedullaris,** cerebellomedullary cistern, or *cisterna magna;* see *post-cisterna.* **c. chiasmatis,** the interpeduncular space **c. chyli,** see *receptaculum chyli.* **c. corporis callosi,** the third ventricle. **c. fossæ lateralis cerebri, c. fossæ Sylvii,** cistern of the lateral fossa of the cerebrum; see *c. Sylviana.* **c. intercruralis, c. interpeduncularis,** the anterior subarachnoid space at the base of the brain. **c. intercruralis profunda,** that part of the subarachnoid space lying directly above the space included between the crura cerebri. **c. intercruralis superficialis,** that part of the subarachnoid space included between the pons and the chiasm. **c. lateralis pontis,** a small space extending along the outer edge of the pons. **c. lumbaris,** see *receptaculum chyli.* **c. magna.** 1. A large cisterna where the arachnoid spreads across from the caudad border of the cerebellum to the oblongata. 2. The fourth ventricle. **c. perilymphatica,** in the ear, a large space adjacent to the foot-plate of the stapes. **c. pontis,** the anterior subarachnoid space. **cisternæ subarachnoidealæ,** the subarachnoid spaces. **c., superior,** that included in the angle between the splenium, the superior surface of the cerebellum, and the posterior aspect of the quadrigeminum. **c. Sylviana,** the part of the subarachnoid space lying immediately above the Sylvian fissure. Syn., *c. fossæ lateralis cerebir.* **c. venæ magnæ cerebri,** see *canal, arachnoid.*

Cistus (*sis'-tus*) [κίστος, the rock-rose]. A genus of plants of the order *Cistaceæ,* growing in the old world. **C. areticus, C. cyprius, C. ladaniferus,** and **C. ledon,** afford the resinous substance labdanum, or ladanum.

citarin (*sit'-ar-in*). Trade name of sodium anhydromethylenecitrate. Used in the treatment of gout.

Citelli's syndrome (*sit-el'-le*). Mental backwardness, poor memory, drowsiness or insomnia, and lack of power of concentration, observed in persons with adenoids, or nasal or sphenoidal sinus affections.

citraconic acid (*sit-ra-kon'-ik*). Pyrocitric acid, $C_5H_6O_4$, derived from citric acid by distillation.

citral (*sit'-ral*) [*citrus,* a lemon], $C_{10}H_{16}O$. An aldehyde found in oil of lemon and many of the essential oils; a golden-yellow liquid giving aroma and value to oil of lemon.

citrate (*sit'-rāt*). Any salt of citric acid.

citrated (*sit'-ra-ted*). 1. Containing a citrate or prepared from a citrate. 2. Referring to a blood serum (or other fluid) to which has been added a solution of potassium citrate.

citresia (*sit-re'-se-ah*). Magnesium acid citrate, the hydrated acid magnesium salt of citric acid. Dose 6 to 12 drams.

citric (*sit'-rik*) [*citrus*]. Pertaining to or derived from lemons or citrons. **c. acid.** See *acid, citric.*

citrine (*sit'-rēn*) [*citrus*]. Yellow; of a lemon-color. **c. ointment** (*unguentum hydrargyri nitratis,* U. S. P.), a preparation consisting of mercury dissolved in nitric acid and mixed with some fatty substance. It is made by adding 7 parts of nitric acid to 76 parts of warmed lard oil, and then mixing it with 7 parts of mercury dissolved in 10 parts of nitric acid.

citrocoll (*sit'-ro-kol*). Phenocoll citrate: used as an antipyretic and antineuralgic.

citrol (*sit'-rol*). Itrol citrate, a silver preparation used in gonorrhea.

citronella (*sit-ron-el'-ah*) [dim. of κίτρον, the citron-tree]. A fragrant grass. **c. oil,** the essential oil of various grasses, mostly of the genus *andropogon;* used chiefly as a perfume, and as a protection against insects; antirheumatic.

citronellol (*sit-ron-el'-ol*), $C_{10}H_{18}O$. A body isomeric with borneol, obtained from oil of citronella.

citrophen (*sit'-ro-fen*), $C_2H_4OH—CONH—OC_7H_3C_6H_4$. Paraphenetidin citrate. It is antipyretic and antineuralgic. Dose 3–15 gr. (0.2–1.0 Gm.).

citrospirine (*sit-ro-spi'-rēn*). A compound of acetyl-salicylic acid and citrated caffeine.

citrullin (*sit-rul'-in*). A resinoid from *Citrullus colocynthis*. It is a cathartic extensively used in veterinary practice. Syn., *amorphous colocynthidin*.

citrullus (*sit-rul'-lus*) [L.]. A genus of the *Cucurbitaceæ*, comprising but two species, indigenous to tropical Asia and southern Africa. **C. colocynthis**, the bitter cucumber or gourd, furnishes colocynth.

citrurea (*sit-ru'-re-ah*). A combination of citric acid, urea, and lithium.

Citrus (*sit'-rus*) [L.]. A genus of aurantiaceous trees. See *aurantium*, *bergamot*, *lime*, *limo*.

cittosis (*sit-to'-sis*) [κίττα, κίσσα, pica]. Pica; a longing for strange or improper food.

civet (*siv'-et*). A semi-liquid, unctuous secretion, from the anal glands of *Viverra civetta*, *V. zibetha*, and *V. rasse*, carnivorous old-world animals, themselves called civets. It is now used as a perfume; formerly as an antispasmodic and stimulant, like musk.

Civinini's spine. A small spine on the outer border of the external pterygoid plate, giving attachment to the pterygospinous ligament.

Cl. Chemical symbol for chlorine.

cl. Abbreviation for *centiliter*.

Clado's band (*klah'-do*). The suspensory ligament of the ovary with its peritoneal covering. **C.'s ligament**, a fold of mesentery extending from the broad ligament of the uterus on the right side to the appendix.

cladode (*klad'-ōd*) [κλάδος, a branch; εἶδος, form]. In biology, branch-like.

Cladonia (*klad-o'-ne-ah*) [κλάδος, a branch]. A genus of lichens. **C. rangiferina**, the reindeer-moss; a lichen that grows extensively in Asia, Europe and N. America. It is used as a food in famine-seasons, and is locally distilled, affording an alcoholic spirit

cladosporium cancerogenes (*klad-o-spo'-re-um kanser-oj'-en-ēz*). A fungus said to be the cause of carcinoma. Syn., *canceromyces*.

Cladothrix (*klad'-o-thriks*) [κλάδος, branch; θρίξ, a hair]. A genus of *Schizomycetes* having long, apparently branching filaments.

clairaudience (*klār-aw'-de-ens*) [Fr. *clair*, clear; *audience*, hearing]. The alleged telepathic hearing of sounds uttered at a great distance.

clairvoyance (*klār-voi'-ans*) [Fr. *clair*, clear; *voir*, to see]. The alleged ability (in certain states), to see things not normally visible; the pretended ability to see the internal organs of a patient, and thus diagnosticate his ailments.

clamp (*klamp*) [Ger., *Klampe*]. 1. An instrument for compressing the parts in surgical operations to prevent hemorrhage, etc. 2. A metal appliance for fastening an artificial tooth to a natural one.

clang (*klang*). A sharp metallic sound; a hoarse voice. **c.-deafness**, a defect of hearing in which sounds are heard, but their more delicate qualities are not perceived. **c.-tint**, the timbre, or delicate shading of a tone. See *timbre*.

clap (*klap*). Gonorrhea. **c.-threads**, slimy threads consisting of mucus and pus-cells in the urine of gonorrheal patients.

clapotage, clapotement (*klap-ot-ahzh'*, *klap-ōt-mon(g)'*) [Fr.]. The splashing sound of a liquid in succussion.

Clapton's line. Greenish discoloration of the gums and teeth, especially the incisors, in chronic copper-poisoning

claquement (*klahk'-mon(g)*) [Fr., clapping, slapping]. 1. In massage, percussion with the flat of the hand. 2. The clack or flapping sound caused by sudden closure of the heart-valves.

claret (*klar'-et*) [*clarus*, clear]. A light wine of a red color.

clarificant (*klar'-if-ik-ant*) [*clarus*, clear; *facere*, to make]. A substance used for the purpose of clearing solutions turbid from insoluble matter.

clarification (*klar-if-ik-a'-shun*) [*clarus*, clear; *facere*, to make]. The operation of removing the turbidity of a liquid or naturally transparent substance. It may be accomplished by allowing the suspended matter to subside, by the addition of a clarificant or substance that precipitates suspended matters, or by moderate heating.

clarify (*klar'-if-i*) [*clarus; facere*, to make]. To free a liquid or solution from insoluble substances; to make clear.

clarifying (*klar-if-i'-ing*) [*clarus*, clear; *facere*, to make]. Clearing; purifying. **c. reagent**, any preparation used for purifying microscopical and anatomical preparations that have been mounted in gummy media. Oil of cloves, turpentine, creosote, xylol, and oil of bergamot are the chief.

Clarke's corroding ulcer [Sir Charles Mansfield *Clarke*, English physician, 1782–1857]. Progressive ulcer of the cervix uteri. **C.'s tongue**, the hard, fissured, and nodular tongue of syphilitic glossitis sclerosa.

Clark's sign [Alonzo *Clark*, American physician, 1807–1887]. A tympanitic sound over the hepatic region in tympanties due to perforative peritoneal inflammation.

Clarke's vesicular column [Jacob Augustus Lockhart *Clarke*, English physician, 1817–1880]. A column of gray substance occupying the region to the outer and posterior side of the central canal of the spinal cord, at the inner part of the base of the posterior cornu, it contains fusiform cells, and is the trophic center for the direct cerebellar tract.

clasmacytosis (*klas-mah-si-to'-sis*). Same as *clasmatocytosis*.

clasmatoblast (*klas-mat'-o-blast*). Mast cell; see *cell*.

clasmatocyte (*klas-mat'-o-sīt*) [κλάσμα, fragment; κύτος, cell]. A form of very large connective-tissue corpuscles that tend to break up into granules or pieces.

clasmatocytosis (*klas-mat-o-si-to'-sis*) [κλάσμα, fragment; κύτος, a cell]. The breaking up of clasmatocytes, and the formation of islands of granules from their debris.

clasmatosis (*klas-mat-o'-sis*). See *clasmatocytosis*.

clasp (*klasp*) [ME., *claspen*, to grasp firmly]. **c.-knife rigidity**, a spastic condition of a limb, as a result of which extension is completed with a "spring," as in a knife-blade. It is met in the cerebral palsies of children.

classification (*klas-if-ik-a'-shun*) [*classis*, a class; *facere*, to make]. An orderly arrangement of names, objects, diseases, etc., according to their properties and peculiarities.

clastic (*klas'-tik*) [κλαστός, broken]. Breaking up into fragments; causing division

clastothrix (*klas'-to-thriks*). Synonym of *Trichorrhexis nodosa*.

Clathrocystis (*klath-ro-sis'-tis*) [κλῆθρα, a trellis; κύστις, pouch]. A genus of microorganisms with

round or ovpl cells, forming zoogleæ in the form of circular layers

claudication (*klaw-dik-a'-shun*) [*claudicare*, to limp] 1 Lameness 2 An obstruction c, **Charcot's intermittent, c, intermittent,** intermittent paresthesia of the legs attended with pain, tremor, and excessive perspiration due to arteriosclerosis, a condition first noted by French writers in apparently healthy horses and afterward observed in man Syn, *angina cruris, angiosclerotic paroxysmal myasthenia, intermittent lameness, intermittent limping* **c., spontaneous,** the lameness that occurs as an early symptom of coxarthrocace in children

Claudius' cells [Friedrich Matthias *Claudius*, German anatomist, 1822–1869] Polyhedral or conoidal cells lining the outer angle of the scala media of the cochlea **C.'s fossa,** the ovarian fossa, a triangular space containing the ovary, it is bounded anteriorly by the round ligament, above by the external iliac vein, and below by the ureter

claustral (*klaws'-tral*). Pertaining to the claustrum

claustrophilia (*klaws-tro-fil'-e-ah*) [*claustrum*, φιλεῖν, to love] A morbid dread of open places, it is noted in neurasthenia

claustrophobia (*klaws-tro-fo'-be-ah*) [*claustrum*, φόβος, fear] Morbid distress at being in a room or confined space

claustrum (*klaws'-trum*) [*claudere*, to shut, pl, *claustra*] A barrier, applied to several apertures that may be closed against entrance Also, a layer of cinerea (gray nervous matter) between the insula and the lenticula c **gutturis,** the opening of the pharynx c **oris,** see *velum palati* **c. virginale, c. virginitatis,** the hymen

clausura (*klaw-sū'-rah*) [L] Closure, atresia, as of a passage c **tubalis,** closure of a Fallopian tube **c. uteri,** an imperforate state of the uterine cervix

clava (*kla'-vah*) [L, a club'] An enlargement of the funiculus gracilis

claval (*kla'-val*) Pertaining to the clava

clavate (*klav' āt*) [*clava*] Club-shaped or becoming gradually thicker toward one end **c. nucleus,** a collection of nerve cells within the clava

clavation (*klav a'-shun*) [*clavatio, clavus*, a nail] Same as *gomphosis*

clavelization (*klav-el-iz-a'-shun*) [Fr, *clavelée*, sheep-pox] Inoculation with sheep pox virus, ovination

claven, or **claviculen** (*kla'-ven, kla-vik'-ū-len*) [*clavis*, clavicle] Belonging to the clavicle in itself

Claviceps (*klav'-is-eps*) [*clava, caput*, head] A genus of fungi **C. purpurea,** the fungus producing the ergot of rye

clavicle (*klav'-ik l*) [*clavicula, clavus*, a key] The collar-bone **c.-crutch,** Cole's device for supporting a broken clavicle, it is so furnished with pads and adjustments as to render bandaging unnecessary

clavicotomy (*klav-ik-ot'-o-me*) [*clavicle, τομή*, a cutting] Surgical section of the clavicle

clavicula (*klav-ik'-ū-lah*) The clavicle **c. capitis,** the projection formed by the pterygoid and entopterygoid bones on the pleurapophysis of the hemal arch of the nasal vertebra

clavicular (*kla-vik'-ū-lar*) [*clavicle*]. Relating to the clavicle

claviculate (*klav-ik'-ū-lāt*) 1 Having a clavicle. 2. Wrinkled; corrugated

claviculus (*kla-vik'-ū-lus*) [dim of *clavus*, a nail; *pl*, *claviculi*] One of Sharpey's fibers, *q v.*

claviform (*klav'-e form*) See *clavate*

clavin (*kla'-vin*), $C_{11}H_{12}N_2O_4$ One of the active principles of ergot, it is said to be nontoxic

clavine (*kla'-vēn*). A constituent of ergot, said to be a mixture of leucin and aspartic acid, and to be physiologically inert

clavipes (*klav'-e-pēz*) [*clava, pes*, a foot] Having club-shaped feet

clavis uteri (*kla'-vis u'-ter-i*) Womb-key, an electrotherapeutic intrauterine device, designed for the application of electricity in certain pathological conditions of the uterus and adnexa

clavus (*kla'-vus*) [L, 'a nail, a wart, a corn'] Corn, a hyperplasia of the horny layer of the epidermis, in which there is an ingrowth as well as an outgrowth of horny substance, forming circumscribed epidermal thickenings, chiefly about the toes **c. hystericus,** a pain in the head, as if a nail were being driven in

claw-foot. A form of talipes due to depression of the heads of the metatarsal bones, with forced extension of the first phalanges and flexion of the last, it is a result of paralysis of the interossei and lumbricales muscles and of those inserted into the sesamoid bone of the great toe

claw-hand. A condition of the hand characterized by overextension of the first phalanges and extreme flexion of the others The condition is a result of atrophy of the interosseous muscles, with contraction of the tendons of the common extensor and long flexor Syn, *main en griffe*

Clayton gas (*kla'-tun*) A gas used to kill vermin on board ship, it consists of sulphur dioxide, and the higher oxides of sulphur

clean, cleaning (*klen klen ing*) A word used in practical anatomy to denote the complete removal (during the process of dissection) of the fat or connective tissue, from the surface of any structure

cleansings (*klen'-zingz*) The lochia

clearing agent. One used in microscopy to render tissues transparent for mounting

cleavage (*kle'-vāj*) [AS *cleófan*, to split asunder] 1 The linear clefts in the skin indicating the general direction of the fibers They govern to a certain extent the arrangement of the lesions in skin diseases The lines of cleavage run, for the most part, obliquely to the axis of the trunk, sloping from the spine downward and forward, in the limbs they are mostly transverse to their longitudinal axis 2 A mode of cell division **c., egg-.** See *segmentation* **c -nucleus,** the nucleus which in the fertilized egg results from the union of the male and female nuclei

Cleemann's sign, C.'s test. In fracture of the femur with shortening there is a wrinkle above the ligamentum patellæ, which disappears when the shortening is corrected by extension

cleft (*kleft*) Divided A fissure **c., branchial.** See *c, visceral.* **c., genital,** a depression in the genital region of the embryo from which the cloaca is developed. **c.-hand,** a congenital deformity in which some finger or fingers are widely separated from the others **c. internatal,** the cleft of the buttocks, in which is the anus **c. palate,** a congenital fissure of the palate **c. sternum,** congenital fissure of the sternum **c. tongue,** furrowed tongue **c, visceral,** the four slit-like openings on each side in the cervical region in the fetus, sometimes called the branchial openings The slits close (in the human fetus), except the upper, from which are devel-

oped the auditory meatus, tympanic cavity, and Eustachian tube.

cleidagra, cleisagra (*klī-dag'-rah, kli-sag'-rah*) [κλείς, clavicle; ἄγρα, seizure]. Gouty pain in the clavicle.

cleidal (*klī'-dal*) [κλείς, clavicle]. Relating to the clavicle; clavicular.

cleidarthritis (*klī-dar-thrī'-tis*) [κλείς, clavicle; *arthritis*]. Inflammation of the sternoclavicular articulation.

cleido- (*klī-do-*) [κλείς, clavicle]. A prefix meaning pertaining to the clavicle.

cleidocostal (*klī-do-kos'-tal*). Pertaining to the ribs and the clavicle.

cleidocranial (*klī-do-kra'-ne-al*) [*cleido-; cranium*]. Relating to the clavicles and head. **c. dysostosis.** See *dysostosis*.

cleidohyoid (*klī-do-hī'-oid*). Relating to the clavicle and the hyoid.

cleidomastoid (*klī'-do-mas'-toid*). Pertaining to the clavicle and to the mastoid process.

cleido-occipital (*klī-do-ok-sip'-it-al*). Relating to the clavicle and occiput. **c. muscle.** See *muscle*.

cleidorrhexis (*klī-do-reks'-is*) [*cleido-;* ῥῆξις, a breaking]. Rupture of the clavicles of a fetus in order to facilitate delivery by reducing the width of the shoulders.

cleidoscapular (*klī-do-skap'-ū-lar*). Relating to the clavicle and the scapula.

cleidosternal (*klī-do-stur'-nal*). Sternoclavicular

cleidotomy (*klī-dot'-o-me*) [*cleido-;* τέμνειν, to cut]. The operation of dividing the clavicles in cases of difficult labor due to the broad shoulders of the child

cleidotripsy (*klī-do-trip'-se*). The operative crushing of the clavicle

cleithrophobia (*klīth-ro-fo'-be-ah*) [κλειθρόν, a bolt, φόβος, fear]. Morbid fear of being locked in

clematine (*klem'-at-in*). An alkaloid from *Clematis vitalba*.

Clematis (*klem'-at-is*). A genus of ranunculaceous plants of many species, most of which are acrid or poisonous. **C. corymbosa** is powerfully irritant and resistant. **C. crispa** and **C. erecta** are diuretic and diaphoretic, and are said to be antisyphilitic. **C. viorna, C. virginica,** and **C. vitalba** are similar in properties to **C. erecta.**

Clemens' solution (*klem'-enz*). Liquor potassii arsenatis et bromidi.

cleoid (*kle'-oyd*) [*claw;* εἶδος, resemblance]. A claw-like instrument used by dentists in excavating cavities in the teeth.

cleptomania (*klep-to-ma'-ne-ah*). See *kleptomania.*

cleptophobia (*klep-to-fo'-be-ah*). See *kleptophobia*

clergyman's sore throat. A chronic hypertrophic form of pharyngitis, with more or less enlargement of the tonsils and lymph-follicles of the posterior wall, due to excessive or improper use of the voice.

Clerodendron (*kler-o-den'-dron*) [κλῆρος, a lot; δένδρον, tree]. A genus of tropical shrubs and trees of the order *Verbenaceæ*. *C. infortunatum* is a species indigenous to India and Malaya; it is used as a substitute for chirata; the juice of the leaves is a tonic, febrifuge, and vermifuge. *C. nereifolium* is a species found in Malaya; the root and leaves are antisyphilitic, tonic, and vulnerary; the root and fruit are used to stupefy fish. *C. serratum* is indigenous to India; the root is tonic and stomachic; the fruit, purgative and diuretic. The leaves and an insect larva found on the branches of *C. trichotomum* are used as an ascaricide. *C. villosum* is a species from Malaya; the root is stomachic, the sap vermifugal.

Clevenger's fissure (*klev'-en-jer*). The inferior occipital fissure; a small fissure between the second and third occipital convolutions.

clicking sounds (*klik'-ing sounds*). Peculiar sharp sounds heard in auscultating the apex of a tuberculous lung. They indicate the commencement of softening in a tuberculous deposit. See *rale.*

clidagra. See *cleidagra.*

clidarthritis. 1. See *cleidagra.* 2. See *cleidarthritis.*

clidocostal. See *cleidocostal.*

clidorrhexis. See *cleidorrhexis.*

clidotomy. See *cleidotomy.*

clidotripsy. See *cleidotripsy.*

climacter (*kli-mak'-tur*). See *climacteric.*

climacteric (*klī-mak'-ter-ik*) [κλιμακτήρ, the round of a ladder]. A period of life at which the system was believed to undergo marked changes. These periods were thought to occur every seven years. The word is now generally applied to the menopause. **c. age,** puberty; also in women the time of cessation of the catamenia. **c. epoch.** Same as *c. age.* **c., grand,** the sixty-third year.

climate (*klī'-mat*) [κλίμα, a region, or zone, of the earth]. The sum of those conditions in any region or country that relate to the air, the temperature, moisture, sunshine, winds, etc., especially in so far as they concern the health or comfort of mankind.

climatic (*klī-mat'-ik*) [κλίμα, a region or zone of the earth]. Pertaining to climate.

climatology (*klī-mat-ol'-o-je*) [κλίμα, climate; λόγος, science]. The science of climate.

climatotherapy (*klī-mat-o-ther'-a-pe*) [κλίμα, clime; θεραπεῖα, a waiting on]. The employment of climatic measures in the treatment of disease.

climax (*klī'-maks*) [κλῖμαξ, ladder]. The acme, or height of a disease; the period of greatest intensity.

clinic (*klin'-ik*) [κλίνη, a bed]. 1. Medical instruction given at the bedside, or in the presence of the patient whose symptoms are studied and whose treatment is considered. 2. A place where such instruction is given. 3. A gathering of instructors, students, and patients for the study and treatment of disease.

clinical (*klin'-ik-al*) [*clinic*]. 1. Relating to bedside treatment or to a clinic. 2. Pertaining to the symptoms and course of a disease as observed by the physician, in opposition to the anatomical changes found by the pathologist. **c. thermometer.** See *thermometer.*

clinician (*klin-ish'-an*) [*clinic*]. A physician whose opinions, teachings, and treatment are based upon experience at the bedside; a clinical instructor; one who practises medicine.

clinicist (*klin'-is-ist*) [*clinic*]. A clinician.

clinicopathology (*klin-ik-o-path-ol'-o-je*) [*clinic; pathology*]. Pathological conditions as open to clinical observation.

clino- (*klino-*) [κλίνειν, to incline]. A prefix denoting inclination or declination.

clinocephalia (*klin-o-sef-a'-le-ah*) [*clino-;* κεφαλή, head]. Abnormal flatness of the top of the head.

clinocephalous (*klin-o-sef'-al-us*) [*clino-;* κεφαλή, head]. Having top of head abnormally flat.

clinocephalus (*klin-o-sef'-al-us*) [*clino-;* κεφαλή, the head]. A variety of dolichocephalus occurring through synostosis of the sphenoparietal suture and resulting in a saddle-formed depression of the skull. Syn., *saddle-head.*

clinodactylous (*klin-o-dak'-til-us*) [*clino;* δάκτυλος, finger]. Pertaining to an abnormal flexure,

deviation or curvature of the fingers or toes.

clinodiagonal (*klin-o-di-ag'-on-al*) [*clino-; diagonal*]. Inclined and diagonal; obliquely transverse.

clinoid (*klin'-oid*) [κλίνη, a bed; εἶδος, likeness]. Resembling a bed; applied to sundry bony structures of the body, as the *clinoid* processes. **c. processes.** See under *process*.

clinology (*klin-ol-o-je*) [*clino-*; λόγος, science]. 1. The science of the decline of animal life after it has reached the meridian. 2. [κλίνη, a bed]. The study of beds for the sick.

clinometer (*klin-om'-et-er*) [*clino-*; μέτρον, a measure]. An apparatus to estimate the rotational capacity of the ocular muscles. **c., Duane's.** See *Duane's test*.

clinoscope (*klin'-o-skōp*) [*clino-*; σκοπεῖν, to view]. An instrument for measuring the torsion of the eyes when gazing at a fixed object with the axes of vision presumably parallel.

clinostat (*klin'-o-stat*) [*clino-*; στατός, placed]. An apparatus for regulating the exposure of plants to the sunlight.
