FOREWORD

The man who speaks another language besides his own has "another string to his bow".

In the late war, if he knew the language of the enemy, he was able to avoid capture, or, if taken prisoner, to make his escape far more easily; he could question prisoners and obtain from them valuable information, or glean such information from their notebooks and letters; he could even derive it from a military sign-post in the enemy's language. He could communicate directly with the allies whose language he knew, make things infinitely more comfortable for himself and his unit when billeted in an allied or enemy country, give and receive directions, speak the language of friendship, of command, of common everyday needs. Striking examples of the way in which linguistic training could be put to military uses appeared in the early days of the war, when German parachutists came down in Holland equipped not only with Dutch uniforms, but also with a command of the Dutch tongue, and German motorcyclists, disguised as French soldiers, swept across Belgium and northern France spreading disorder and panic in excellent French.

Now that peace is restored to a war-weary world, the benefits of linguistic training will be equally vast and far more enduring. American soldiers, scattered throughout the four corners of the globe in the post-war days while the preliminaries of a permanent peace are being worked out, need languages. Later, when world economy is put on a far more stable footing and commercial exchanges become far more intense than ever before, men and women with linguistic training will be at a premium. The demand for diplomatic and consular representatives, for government employes, for commercial

travellers with a knowledge of foreign languages will exceed anything ever known. More foreigners will come to our shores, more Americans will travel abroad. Travelling for pleasure, in the post-war world, will no longer be restricted to a few tourists. The men who have been abroad, to a hundred different lands, on a military mission, will wish to revisit those lands, to continue and tighten the bonds of friendship and comradeship and interest formed there. American commercial and industrial enterprises in foreign countries, expanding because of the imperative needs of nations whose industries have been disrupted by war, will call for American-born, American-trained skilled workers who are conversant with the language of the country to which they are destined. Politically, as well as economically, present indications are that the world will become more closely welded together than it has been in the past. In any political arrangement in which races and nationalities are drawn closely together, the need for linguistic interchange will be more keenly felt than ever before. In the world of tomorrow, political, economic and military isolation will be things of the past. Linguistic isolationism and self-sufficiency, the sort of thing that some American educators have been preaching during the last two decades, will be regarded as something just as outmoded and ridiculous as political isolationism and economic autarchy have been proved to be.

So the study of foreign languages becomes imperative. Our immediate war need was of a military nature — to equip as many members of our fighting forces as possible with a quickly acquired, practical knowledge of a few important foreign tongues, to be used in their ordinary intercourse with allied or enemy troops and populations. Our present need is to create the world-minded attitude that will lead to the proper kind of international relations, commercial, economic, diplomatic and cultural, now that the war is over, making a recurrence of the recent conflict unlikely, and to endow a considerable segment of our population with the sort of linguistic training that will enable them, to their own personal advance-

ment and to the benefit of the Nation and the world at large, to take advantage of the innumerable opportunities that peace is bringing in its wake.

How shall we go about this? What languages are to be studied, and how? The traditional method has been one of high specialization. Most high-school and college students have normally been required to choose one of an extremely limited number of languages (French, Spanish, German, occasionally Italian), to study it for a two- or three- or four-year period, mastering every intricacy of grammar and syntax, then go on with it and imbue themselves with the literature, customs and habits of life of the particular nation speaking this particular language, more or less to the exclusion of the rest of the world. There is nothing wrong with this specializing method, save the fact that it is restrictive. Let it by all means be continued. But let us also have, for the people who do not wish to become specialists and literary and cultural experts in any one language, and for those who do, but who also want to know something about other languages, a method that will enable the individual of average linguistic ability to acquire the basic facts about the world's chief languages, where they are spoken and by whom, to identify them readily, and to handle more than just one of them in a comprehensible and acceptable fashion, even if without absolute grammatical correctness and literary style.

The purpose of the present work is to present the main facts about languages, not in the form of a philosophical or psychological or literary essay, not from the historical and scientific point of view, but as something of an immediate, practical value. The world's main languages and their geographical distribution, the linguistic families and the elementary relationships among their members, the identification of the written and possibly the spoken form of several important tongues, and lastly the description of the sounds and grammatical structure, together with a limited vocabulary, of seven of the world's most widely-spoken languages — all this will serve the purpose of giving the reader the elementary linguistic

consciousness that the soldier of yesterday needed in his military activities on foreign soil and that the man and woman of tomorrow will need in a world destined, by reason of the constant advances in our mechanical civilization and spiritual point of view, to become more and more a single political, economic and cultural unit.

CHAPTER I

**LANGUAGE TYPES AND
LANGUAGE FAMILIES**

What languages are to be studied in connection with our post-war needs? Gray's *Foundations of Language* (p. 418) tentatively places the total number of present-day spoken languages, exclusive of minor dialects, at 2,796 — a staggering total, when we consider the amount of effort required to master even one foreign tongue. Obviously, a wise choice is imperative.

But fortunately for the practical linguist, there are "key" languages, which open up to us vast areas of the earth. **THE MAN WHO HAS SOME PRACTICAL ACQUAINTANCE WITH ENGLISH, FRENCH, GERMAN, SPANISH, PORTUGUESE, ITALIAN, RUSSIAN, AND JAPANESE IS, ROUGHLY SPEAKING, IN A POSITION TO MAKE HIS WAY AROUND THE WORLD.** If to this knowledge he adds a smattering of Arabic, Chinese, Malay, and Dutch, and the ability to identify a few other tongues, so that he can distinguish between Polish and Czech, Swedish and Danish, Finnish and Hungarian, at least in their written form, his linguistic education, for purely utilitarian purposes, is completed.

Can this be demonstrated?

The impressive total of 2,796 tongues, mentioned above, includes over a thousand American Indian languages, whose present-day speakers number a few thousand or even a few hundred each. Over five hundred "languages" are spoken by African Negro tribes; nearly five hundred more by the natives of Australia, New Guinea, and the islands of the Pacific. Several hundred others are little-known tongues spoken by isolat-

ed groups in Asia. All these can safely be disregarded for the purpose on hand.

This does not mean that they are scientifically unimportant. Some of them, though spoken by small and semi-savage groups, are of the highest interest to the professional linguist by reason of their peculiar structure, and to the psychologist and anthropologist because of the mental processes they betoken. But our present aim is immediate use. Whether from a military, economic and political standpoint, or from a cultural one, we find that the world's truly significant languages now number less than one hundred.

We also find that not all of these significant languages are of equal importance. The number of speakers has something to do with this. For *practical* purposes, in spite of the civilization behind it and the contribution it has made to the vocabularies of all civilized modern tongues, Greek, with its seven or eight million present-day speakers, cannot be ranged alongside of Spanish, whose speakers number well over a hundred million. Political and cultural influence also comes into play. Dutch may be the language of only some nine million speakers in Holland, but it is current, side by side with native Malay languages, in the Dutch colonial empire (Java, Sumatra, Borneo, Celebes, etc.), with over 60,000,000 inhabitants. French is a mighty and widely spoken language in its own right (42,000,000 Frenchmen, plus about six million French speakers in Belgium and Switzerland, plus the speakers of French in Canada and in the French colonial possessions); but in addition, French is also a current tongue among the more cultured classes of numerous European countries, so that it may be, and frequently is used as a means of common intercourse between, say, an American who has learned it in the schools and a native Pole or Italian or Hollander. This matter of bilingualism (one individual speaking two languages) and polylingualism (several languages spoken by the one person) will have to be taken into account as our study proceeds, particularly when we come to countries which are or have been colonial possessions. While it is true, for instance, that In-

dia's 390,000,000 inhabitants are linguistically divided among three groups (Indo-Aryan, Dravidian and Munda), it is also true that the use of English is widespread by reason of the long British occupation of the Indian Peninsula. This leads necessarily to a certain amount of duplication in enumerating the speakers of various tongues. We can list the majority of Czecho-Slovakia's former 15,000,000 inhabitants among the speakers of Slavic tongues, but it is also true that more than half of them can be reached with German. In Budapest, the Hungarian capital, it was the writer's experience that four out of every five people approached responded to German. The bald figures of the number of native speakers of a given language, therefore, very often do not tell the whole story. Certain languages spread far beyond their national or colonial borders, and can be used, with greater or lesser effectiveness, in other lands as well.

What of the matter of facility in acquiring foreign tongues for practical purposes? Are some languages inherently "easy", others inherently "difficult"? While it is true that some tongues *seem* to possess a more simple structure than others, no language is intrinsically difficult to its own speakers, who have acquired and used it, and only it, from childhood. *Speaking* Chinese is not difficult to the Chinese speaker, though *writing* it may be. To him, the complicated tones¹ which we describe as "sing-song" and master only with the greatest difficulty are the most natural thing in the world; he has learned to produce them and use them in the proper place ever since he first began to use his vocal organs. "Ease" or "difficulty" in acquiring a language is not something intrinsic, but something which functions with reference to one's own previous linguistic habits. The more a tongue resembles our own, in sounds, in grammatical structure, in vocabulary, the "easier" it is to us; the more it diverges from our own, the "harder" it becomes. To the speaker of a language like English, the grammatical structure of a language like French is comparatively

1—Cf. p. 32.

easy ("I have laid the book on the table" can be translated absolutely word for word into French); German, which says "I have the book on the table laid", seems a little harder; Latin, requiring "Book on table laid-I", is harder still. On the other hand, German *ich habe* — *gelegt* and *das Buch* come considerably closer to English "I have laid" and "the book" than French *j'ai posé* and *le livre*, or Latin *librum* and *posui*, with the result that for the example in question, the advantage of similarity in French word-order is offset by the advantage of similarity in German vocabulary, and the beginner would be tempted to say: "French and German are about equally difficult". But the minute it is pointed out to him that French translates "of the book", "to the book" more or less literally, while German effects a change in the article and the ending of the noun, and omits "of" and "to", he will vote in favor of French as the "easier" language.

What governs similarity between two languages in sounds, grammatical structure and vocabulary? The answer to this question leads us into a discussion of linguistic classification. A few extremists among language scientists are of the opinion that all languages go back to one original common stock, which in the course of thousands of years and countless prehistoric migrations has evolved into the various language types of today. The process by which this took place would be, according to them, one of infinite differentiation and change. But the divergences and differences among the world's languages seem too radical and far-reaching to be accounted for by any such process, no matter how drastic or prolonged. On the other hand, it is undeniable that a somewhat comparable process has, so to speak, taken place under our eyes in the case of several languages whose history can be traced. This is true, for example, of French, Spanish, Portuguese and Italian, stemming from an original Latin during the course of the last two thousand years, or of English and German, originally far closer than they are today. This means that even if languages cannot be reduced to one single, common ancestry, they can at

least be grouped into large family units, the members of which bear enough of a fundamental resemblance to one another to be described as proceeding from a common ancestor, or "parent-language", frequently unknown because no written² trace of it has come down to us, but which can be hypothetically reconstructed.

This means that language goes through a constant process of change or evolution. The English of today is no longer the English of Shakespeare, which requires a certain amount of study and even the occasional help of a glossary to be fully understood; still less is it the English of Chaucer, or of the Anglo-Saxon days before the Norman conquest of England. Nor will the English of tomorrow be the English of today. New words, new expressions, even new grammatical constructions are constantly being added to the language, while old ones drop out, become "obsolete", then "archaic", and finally require the aid of a dictionary to be understood. The slang of today may become the colloquialism of tomorrow and the correct literary form of a hundred years hence. As the present-

2. Language, be it noted, comes in two forms, the spoken and the written. The former, of course, invariably precedes the other. People learn to speak before they learn to write, and spoken languages antedate their written counterparts. The latter assume varied forms. The alphabet we use in English is current in a great many languages (French, Spanish, Italian, etc.); in others it diverges slightly (German); the divergence is still greater in others (Greek, Russian); while in Hebrew and Arabic the alphabetic kinship is almost completely disguised. The writing of languages like Chinese and Japanese not only bears no resemblance to, but has no kinship with our own. Note also the different values of the same alphabetic symbol in different languages, or even in the same language (Eng. *far*, *bat*, *fare*, *all*, etc.). Occasionally, the same language is written in different alphabets, according to the religious or cultural background of its speakers; such is the case with Serbo-Croatian, written in Roman characters by the Catholic Croats and in Cyrillic characters by the Greek Orthodox Serbs; or with Hindustani, written in Devanagari characters (derived from Sanskrit) by its speakers of the Hindu faith (in which case it is also called Hindi), and in Arabic script by its Muhammadan speakers (in which case it is also called Urdu).

day speaker delves back into his own language of past centuries, it becomes increasingly more difficult to him, until the point is reached where it is a "foreign" tongue. The cultured English speaker can struggle backwards as far as the English of Chaucer, but when he comes to "Beowulf" he needs a course in Anglo-Saxon. The cultured French speaker can make his way back with ease to the fifteenth-century French of Villon, and with considerable difficulty to the eleventh-century "Song of Roland"; but if he goes back beyond the ninth century he finds himself in a Latin atmosphere, and has to study the language once spoken on his own soil, and from which his own language proceeds, just as he would a foreign, though related, tongue.

The present-day geographical aspect of languages within the same family bears some similarity to the historical picture of a single language throughout its evolution. Starting with English, we find sufficient striking resemblances in German, Dutch and Scandinavian to permit even the layman to classify these tongues as closely related. The resemblances are almost equally striking when we come to French, Spanish, Italian, Portuguese. As we wander further afield, into Greek, Russian, and some of the languages of India, we can, if properly trained, still detect a sufficient number of similarities to enable us to class these languages as originally akin to our own.

On the other hand, we come across a certain number of languages which differ so radically in structure and vocabulary that we can safely decide they do not belong to our group. Yet some of these languages show the same striking similarities among themselves that are shown by English and German, or by French and Spanish. Such is the case, for instance, with Finnish and Hungarian, or with Hebrew and Arabic. The result is that languages have been classified into families and sub-families. The classification is imperfect, particularly in the case of the less known and less important languages. It is fairly exact for languages which have been and are the vehicles of important civilizations.

The linguistic family to which English, French, German,

Spanish, Italian, Portuguese and Russian belong is called Indo-European, by reason of the fact that its members stretch across all of Europe and west central Asia to northern India. The term "Indo-Germanic" is preferred by the Germans, ostensibly because Icelandic, the westernmost member of the family, belongs to the Germanic subdivision. The term "Aryan" has also been used, but here we run into a major difficulty. "Aryan" is also used in referring to a somewhat hypothetical race: the race which, it is supposed, originally spoke the "Aryan" parent-language. Such a race, speaking such a language, may have existed, though the evidence is far from absolute. But if there is one thing of which we are mathematically sure in the field of language, it is that race and language do not necessarily coincide; a Negro whose ancestors came from Africa, a Jew whose forebears spoke a Semitic language, can (and do) today speak perfect Indo-European English and have no recollection of their ancestral tongues; an Aztec Indian of Mexico may speak Indo-European Spanish with no memory or trace of his ancestral American Indian language. The nations or groups that today speak Indo-European languages are not at all necessarily of "Aryan" stock. The description of the ideal "Aryan" (tall, blond, long-skulled) certainly does not fit the majority of the peoples living in central or southern Europe, who nevertheless speak pure Indo-European languages. The fact of the matter seems to be that races have an inherent tendency to become mixed, and languages to be borrowed, assimilated and appropriated by people who originally did not speak them. "Aryan", therefore, is best discarded,³ and Indo-European is best taken as a purely linguistic term, with no racial connotation.

It is undeniable, on the other hand, that the greatest contributions to civilization, both ancient and modern, have been

3. Save in one legitimate linguistic connection: the Indo-European languages of northern India are often described, as a group, as "Indo-Aryan". But even this term is becoming obsolete.

made by peoples speaking Indo-European tongues, with Semitic speakers as closest rivals. It is also true that of all the language-families the Indo-European is the one which has received the most careful scrutiny at the hands of linguists, and concerning the classification and subdivisions of which we are most certain. Lastly, it is true that an absolute majority of the world's chief present-day languages, both from the standpoint of number of speakers and that of cultural, political and economic importance, belongs to this group.

English is, in many ways, a fair representative of Indo-European. Its numerical strength and power of expansion, its influence upon civilization and the destinies of the world, are characteristic. Its vocabulary, which represents an almost equal blending of the two greatest Indo-European subdivisions, the Germanic and the Latin-Romance (with considerable additions from Greek and other sources), tends to make it international in scope. Its rich variety of sounds is such that its speakers can adapt themselves with comparative ease to the sounds of many foreign tongues. On the other hand, its alphabetic notation is far from perfect, and very distressing to the foreigner, and even to the native (the process of learning to "spell" goes on through grammar school, high school and college, and is often not quite completed by the time the student emerges with a university degree). On the structural side, modern English displays a process of simplification⁴ of orig-

4. The process is perhaps better described as one of analysis (breaking up a thought-concept into several words representing its component parts: "I" "have" "ended") versus the old Indo-European system of synthesis (gathering together the complete concept into a single word: Latin *fini-v-i*). It means, in the case of nouns, using position ("Peter sees the boy"; "The boy sees Peter") and prepositions ("to the boy", "of the boy") instead of case-endings indicating subject, object, "of", "to", etc. (as with Latin *puer, puerum, pueri, puero*); in the case of verbs, using pronouns ("I", "you", "he", etc.) and auxiliaries ("shall", "will", "have", etc.) in the place of suffixes carrying those meanings (Latin *fini-v-i*). Note that even in modern English the two systems, synthetic and analytic, occasionally appear side by side ("the boys' books", or "the books of the boys").

inal Indo-European grammatical forms which sets it rather far away from the original Indo-European type (much farther away, for instance, than modern Russian, or even German); in this, it is accompanied, though not all the way, by the major Romance tongues.

The original Indo-European type is described as "inflectional", which means that it indicates grammatical relations by means of endings, or "suffixes", which are added on to the "roots" of words. Latin, for example, takes a root *mur-*, "wall", and indicates that it is the subject of the sentence by adding *-us* (*murus*), or that it is the object by adding *-um* (*murum*); "of the wall" is indicated by the ending *-i* (*muri*); "to the wall" by *-o* (*muro*). In the case of verbs, Latin uses a root like *fini-*, "end", adding an ending *-o* (*fini-o*) which at the same time marks the present tense and the first person singular ("I end"); for the future ("I shall love"), Latin adds to the root *ama-* a suffix *-b-*, indicating futurity, and another suffix *-o*, indicating "I" (*amabo*); while for the past tense ("I ended") the root *fini-* receives the suffixes *-v-* and *-i* (*finivi*); different personal suffixes are used throughout, eliminating the need for subject pronouns ("you ended", *fini-v-isti*; "he ended", *fini-v-it*; "we ended", *fini-v-imus*; "they ended", *fini-v-erunt*). Old English (or Anglo-Saxon) had a very similar structure, but modern English has largely discarded it ('s in the possessive case, -s in the third person singular of the present tense, -d in the past tense of verbs, are vestiges of the older system). This process of simplification has gone on, to some extent, in all Indo-European languages, but in some to a far greater degree than in others. The Romance languages, for example, have simplified their structure even more than English for what concerns the noun, but practically not at all for what concerns the verb. The Slavic languages, on the other hand, have a comparatively simplified verb, but retain a full "inflectional" system for the noun. German effects a minor degree of simplification in both, but still retains a good deal of the original inflectional structure.

From a practical standpoint, this means that the English speaker will encounter little difficulty with the Romance noun ("dog", Spanish *perro*; "of the dog", *del perro*; "to the dog", *al perro*; "dogs", *perros*; "of the dogs", *de los perros*; "to the dogs", *a los perros*); but he will meet considerable hardship with the Romance verb ("I loved", Spanish *amé*; "you loved", *amaste*; "he loved", *amó*; "we loved", *amamos*; "they loved", *amaron*). He will experience trouble with the Slavic noun ("dog", Russian *pyos*; "of the dog", *psa*; "to the dog", *psu*); but he will breathe more easily when he sees: "I loved", *ya lyubil*; "you loved", *ty lyubil*; "he loved", *on lyubil*. German *der Hund* ("dog", subject); *den Hund* ("dog", object); *des Hundes* ("of the dog"); *dem Hunde* ("to the dog"); and *ich liebte, du liebtest, er liebte* for "I", "you", "he", "loved", will prove moderate stumbling-blocks.

When we come to other linguistic families, the difficulties encountered will be much greater. In the first place, the vocabulary resemblances to which we are accustomed in German, French, Spanish, Italian, and, to a lesser degree, in Russian or Greek, are largely, almost totally, absent. Secondly, we meet a grammatical structure which bears no resemblance to ours. Japanese, for instance, utterly fails to recognize our concept of gender (masculine, feminine, neuter), and has very vague notions about number (singular, plural). It does not care much for our "personal" verb ("I", "you", "we" do something), but prefers to use a different verb altogether, according as the subject is the speaker (in which case the verb is a "humble" verb), or the person addressed (in which case it is a "polite" or "respectful" verb). Hungarian attaches prepositions and possessive adjectives to the noun ("house", *ház*; "in the house", *ház-ban*; "arm", *kar*; "my arm", *kar-om*).

But here, our process of choice and elimination comes to our rescue. Of the world's chief languages, only a few that are not Indo-European combine numerical strength, cultural importance, and practical value. Very few of them are "irreplaceable", in the sense that a good many of their speakers

cannot be reached through the medium of another, more accessible tongue. The chapter on geographical distribution will tell us which they are, and why they are irreplaceable.

Meanwhile, for the sake of curiosity, we present a table of the world's chief linguistic families with their main subdivisions. This table is not exact, and it is far from complete. Nevertheless, it is imposing. Read it, but do not attempt to memorize it.

I — INDO-EUROPEAN.

Location: nearly all of Europe; southwestern Asia as far as northeastern India, inclusive; the entire western hemisphere; Australia, New Zealand, Tasmania; South Africa; spoken in the form of superimposed languages of colonization (English, French, Dutch, Portuguese, Italian, Spanish) throughout Africa, India, southeastern Asia, the islands of the Pacific.

Number of speakers: nearly 1,000,000,000.

Structure: originally inflectional and synthetic; modified to varying degrees in the direction of simplification (analysis; cf. p. 20), with the loss of inflectional endings, and the use of word-order to indicate grammatical relations.

Main branches:

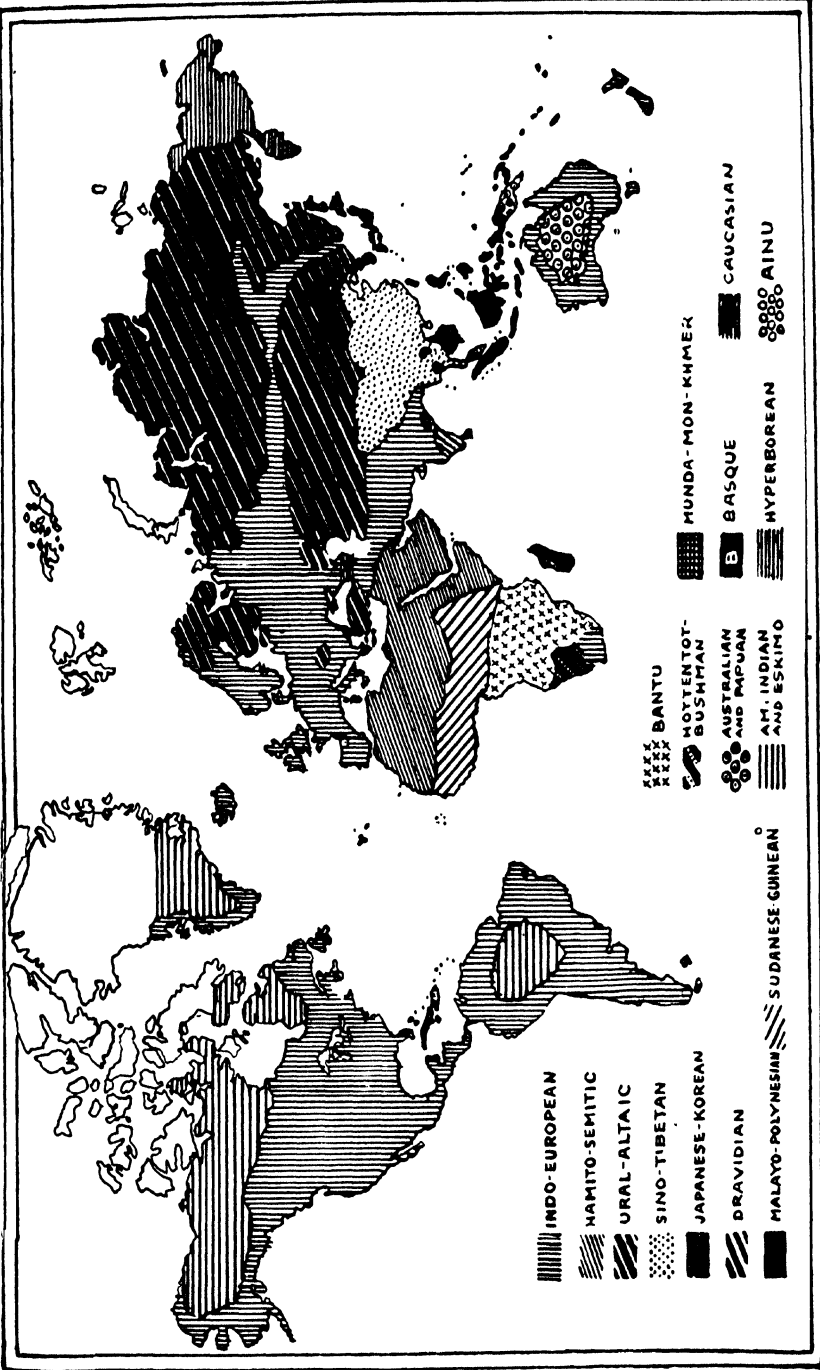

a) Germanic:⁵ Northern (or Scandinavian): Icelandic, Dano-Norwegian, Swedish.

Western: English, High and Low German,⁶ Dutch-Flemish.

5. A third branch of Germanic, the Eastern, represented by ancient Gothic, has disappeared.

6. Yiddish, which has no national territory, is fourteenth-century German adopted by the northern Jews (Ashkenazim) in the course of their migrations; it is written with a modified Hebrew alphabet and mingled with words borrowed from Hebrew, Slavic, English, etc.

THE WORLD'S GREAT LANGUAGE FAMILIES AND THEIR GEOGRAPHICAL DISTRIBUTION

- b) Romance:⁷ Hispanic: Spanish,⁸ Portuguese, Catalan.⁸
 French: French, Provençal.
 Italian.
 Roumanian.
- c) Celtic: Goidelic: Scots Gaelic, Irish Gaelic (Erse), Manx.
 Brythonic: Welsh, Breton.
- d) Balto-Slavic: Baltic: Lithuanian, Lettish.
 Slavic: Eastern: Russian, Ukrainian, White Russian.
 Western: Polish, Czech, Slovak.
 Southern: Serbo-Croatian, Slovene, Bulgarian.
- e) Greek.
- f) Albanian.
- g) Armenian.
- h) Iranian: Persian, Kurdish, Balochi, Afghan (or Pushtu).
- i) Indo-Aryan languages of northern India and southern Ceylon; among the better known are: Hindi, Urdu, Bengali, Panjabi, Rajasthani, Marathi, Gujarati, Singhalese. The language of the Gypsies also belongs to this group.

7. Or Italic. Latin is the direct ancestor of all the languages of this branch; in ancient times, there was another Italic subdivision, the Oscan-Umbrian, which Latin absorbed. Additional minor Romance branches are the Rhetian (Rumansh, Ladin) of southeastern Switzerland, the Italian Tyrol and Friuli, and the Logudorese-Campidanese of Sardinia.

8. Judaeo-Spanish, also called Sephardic, Sephardi or Ladino (do not confuse with Ladin, above), is the Romance counterpart of Germanic Yiddish; it is a medieval Spanish retained by migrating southern Jews (Sephardim) after their expulsion from Spain, and carried to various localities along the Mediterranean coast, notably Salonika, Monastir and Constantinople; its borrowed elements are mainly Turkish, Greek and Hebrew; it also is written with a modified Hebrew alphabet. Some doubt exists whether Catalan should be classed with the Hispanic languages or with Provençal.

A glance at this chart shows us the varying practical importance of these branches and their languages, both from the standpoint of number of speakers and from that of political, economic and cultural worth. The total number of Armenian speakers does not exceed 4,000,000, that of Albanian speakers 2,000,000. Greek, despite its tremendous contribution to civilization in ancient times, has today perhaps 8,000,000 speakers. The Celtic languages taken together do not exceed 4,000,000 speakers, though an attempt is being made at the present time by the Irish Free State Government to reintroduce Irish Gaelic (*Erse*) as the spoken language of *Eire*. The Baltic tongues (Lithuanian and Lettish) count approximately 4,000,000 speakers, the Iranian tongues of Iran, Afghanistan and Baluchistan perhaps 30,000,000.

On the other hand, the Indo-Aryan vernaculars of India are estimated to be spoken by some 250,000,000 people, and their cultural background runs back to the Sanskrit of the sacred Vedic writings; but the colonial status of India, and the existence of an extremely large number of diverging dialects robs them of much of the importance to which their numerical strength would otherwise entitle them.

The Slavic languages number nearly 200,000,000 speakers, of whom nearly 150,000,000 are located on Soviet soil. The Romance languages with their Latin background and, approximately, 100,000,000 Spanish speakers, 70,000,000 French speakers, 50,000,000 Portuguese speakers, 50,000,000 Italian speakers, share with the Germanic branch the distinction of being, *par excellence*, the tongues of modern culture, civilization, and political and economic expansion. Among the Germanic tongues, English, with over 200,000,000 speakers and vast colonial and commercial influence, and German, with approximately 100,000,000 speakers, are the leaders, though Dutch, with its colonial empire of 60,000,000 and some 9,000,000 native speakers in Holland, is a tongue of considerable

importance.⁹ The total number of Scandinavian speakers is about 15,000,000.

II — SEMITO-HAMITIC.

Location: the peninsula of Arabia; Iraq, Palestine and Syria; northern Africa (Egypt, Libya, Algeria, Tunisia, Morocco, the Sahara); Ethiopia, Eritrea and Somaliland; Zanzibar and Madagascar; Malta.

Number of speakers: approximately 75,000,000.

Structure: the main characteristic of this family is the word-root consisting of three consonants, with shifting vowels to carry accessory meanings; e. g., Arabic root *k-t-b*, "write"; *kataba*, "he has written"; *kutiba*, "it has been written"; *yak-tubu*, "he will write"; *yuktabu*, "it will be written"; *'aktaba*, "he has made someone write"; *kūtābun*, "writing", "book"; *kātībun*, "writer"; *katbun*, "act of writing".

Main branches:

a) Semitic:¹⁰ Northern: Hebrew.

Southern: Arabic, Ethiopian (Tigre, Amharic, etc.).

b) Hamitic: Libyco-Berber (Kabyle, Shilh, Tuareg, etc.).

Kushitic (Somali, Galla, etc.).

Coptic.¹¹

9. Flemish, a variant of Dutch, is spoken in Belgium by perhaps 5,000,000 people, most of whom, however, can also be reached through French. Afrikaans, the language of the South African Boers, is a dialect of Dutch. It is still used by some 3,000,000 people.

10. An Eastern branch, represented by ancient Akkadian (Assyrian, Babylonian) has become extinct. The northern branch, of which Hebrew is the modern representative, formerly comprised several important tongues which have disappeared in the course of history; among the better known are: Canaanite, Moabite, Phoenician (with a variant, Punic, spoken by the Carthaginians), Aramaic, Syriac (the last still spoken by about 100,000 people). Phoenician speakers seem to have been the initiators of the alphabet which, with considerable modifications and in different forms, is in use among most Indo-European and Semitic languages today.

11. The ancestor of medieval Coptic, still used as a liturgical language in parts of Egypt, is the ancient Egyptian of the hieroglyphic inscriptions.

Arabic, which spreads across northern Africa and the Arabian peninsula, is by far the most important of these languages, both from the standpoint of number of speakers and that of expansional power and influence. As the sacred language of Muhammadanism, it influences, linguistically and psychologically, hundreds of millions. Palestinian Hebrew is in the nature of a rejuvenated artificial language, with perhaps 1,000,000 speakers. The other tongues of this group are relatively unimportant and can, to varying degrees, be replaced by the languages of colonization (English in Egypt, Italian in Eritrea and Somaliland, etc.).

III — URAL-ALTAIC.

Location: Finland, Karelia, Estonia; northern Norway and Sweden; Hungary; eastern European Russia; Turkey; Soviet Asia, Mongolia, Chinese Turkestan, Manchukuo.

Number of speakers: about 60,000,000.

Structure: "agglutinative"; this means that the process of adding endings to a word-root, which appears in Indo-European, is carried on to a far greater degree, suffix upon suffix being attached to the root to carry a variety of meanings: Turkish *at*, "horse"; *at-ım*, "my horse"; *at-lar-ım*, "my horses"; *sev*, root carrying general meaning of "love"; *sev-mek*, "to love"; *sev-dir-mek*, "to make to love"; *sev-me-mek*, "not to love"; *sev-il-eme-mek*, "to be impossible to be loved"; *sev-il-dir-eme-mek*, "to be impossible to be made to be loved". Another interesting characteristic of this group is "vowel harmony"; this means that if the root word contains a "front vowel",¹² all added suffixes must also contain front vowels; but if the root has a "back vowel",¹² the suffixes must do likewise: Hungarian *kéz*, "hand" (with the front vowel *e*); *ház*, "house"

12. The "front vowels" are the ones pronounced in the front part of the mouth; in most languages of this group, *e*, *i*, *ä*, *ö*, *ü*, are considered front vowels; the "back vowels" are the ones pronounced in the back part of the mouth: they are *a*, *o*, *u*, and Turkish *ı*.

(with the back vowel *a*); “in the hand” is *kéz-ben* (with the suffix *ben* containing the front vowel *e*); but “in the house” is *ház-ban* (with suffix changed to contain the back vowel *a*). A third widespread feature of this group is the absence of the concept of gender (masculine, feminine, neuter).

Main branches:

- a) Uralic (or Finno-Ugric): Finnish (with Karelian and Estonian).
Lapp (with some languages of northeastern European Russia, such as Mordvinian, Cheremiss, Votyak).
Hungarian (or Magyar),
Ostyak.
Samoyed.
- b) Altaic: Turkish (allied to Turkish are various languages of the Tatars, Turcomans, and Kirghiz).
Mongol (Kalmuk, Buryat, etc.).
Tungus (Manchu).

★ ★ ★

The geographical extent of this group is imposing, since it stretches from northern and central Europe, across northern Asia, to the shores of the Pacific. But its speakers are not numerous, nor do they have great cultural, political, or economic importance. Finnish, Hungarian and Turkish are the only languages of this group to have attained statehood or cultural prestige. The Asiatic members of the group, being for the most part located on Soviet soil, are replaceable by Russian, while Manchu, the tongue of Manchukuo, is replaceable by Chinese and¹ Japanese.

IV — JAPANESE-KOREAN.

Location: Japan, Korea. Japanese is also current in Formosa, Manchukuo, the Caroline and Marshall Islands, large sections of formerly occupied China, and, to a certain extent, in

those territories which Japan recently held (Dutch East Indies, French Indo-China, Thailand, Malaya, Burma, Philippines).

Number of speakers: over 100,000,000.

Structure: agglutinative (but to a lesser degree than the Ural-Altai languages); no distinction of gender or number; "impersonal" verb, different terms being used in the same meaning to convey shades of respect, humility, etc. Despite similarities of structure, many linguists doubt the connection between Japanese and Korean.

Main branches:

- a) Japanese.
- b) Korean.

★ ★ ★

The former military, political and economic status of Japan, added to the imposing number of Japanese speakers and the areas where Japanese is current, makes this language one of primary importance.

V — SINO-TIBETAN.

Location: China; Tibet; Burma; Thailand (Siam); northern Indo-China; Manchukuo; Sinkiang.

Number of speakers: nearly 500,000,000.

Structure: monosyllabic (words of one syllable, which are invariable and do not add on endings; grammatical relations are generally indicated by the position of the word in the sentence (cf. English "give me the *jack*", where "jack" is understood to be a noun; "we must *jack* up this car", where "jack" is understood as a verb; "this is a *jack-knife*", where "jack" is an adjective); in addition, these languages make use of *tone* (the pitch, or the rising and falling inflection of the voice) to distinguish among different meanings of what would otherwise be the same word: Chinese *fu*, pronounced with a high, even pitch, means "man"; with a slight and quickly rising pitch, "fortune"; with a slowly falling and

then rising inflection, "prefecture"; with an abruptly falling inflection, "rich".

Main branches:

- a) Chinese.
- b) Tibetan-Burmese.
- c) Siamese (or Thai).

★ ★ ★

Chinese, with some 450,000,000 speakers and a rich background of ancient civilization, is probably destined to become one of the world's most important languages. The difficulties that strew the path of the student of Chinese are: 1. the extremely large number of dialects, many of them mutually incomprehensible; 2. the tone system, which runs contrary to our linguistic habits; we are accustomed to using high, low, rising and falling inflections of the voice to express emphasis and different feelings ("I have seen John"; "I *have* seen John"; "I have *seen* John"; "I have seen *John*"; "Jo-/^{ohn,} where are you?" "Jo- How could you?"), and find it \ohn!

very difficult to use them otherwise; 3. the complicated system of writing, with no less than 3,000 commonly used characters, which are combined to represent not *sounds*, but individual *words*. This system, with modifications, has been borrowed by the Japanese.

VI — DRAVIDIAN.

Location: southern India, northern Ceylon.

Number of speakers: nearly 100,000,000.

Structure: moderately agglutinative (e. g., noun-root, plus sign of plural, plus case-ending, which is the same for the plural as for the singular); gender not by sex, but by caste ("superior" and "inferior" beings, with women, and even goddesses, often ranged among the latter, in the same classification with inanimate objects).

- Main branches: a) Tamil.
 b) Telugu.
 c) Brahui.
 d) Canarese.
 e) Gond.
 f) Bhil.
 g) Malayalam (do not confuse with Malay).

★ ★ ★

These languages, which share with the Indo-European tongues of northern India major control over the Peninsula's 390,000,000 speakers, are relatively unimportant. English is superimposed as a language of colonization.

VII — MALAYO-POLYNESIAN.

Location: Malay Peninsula; East Indies (Java, Sumatra, Borneo, Celebes, Bali, etc.); Philippines; Madagascar; New Zealand (Maori); Samoa, Hawaii, Tahiti, and, generally, the islands of the Pacific.

Number of speakers: about 90,000,000.

Structure: two-syllable root; no endings attached to nouns; concept of gender and number generally absent.

Main branches:.

- a) Indonesian: Dutch East Indies; Malaya; Madagascar; Philippines (Tagalog, Bisaya, etc.).
- b) Melanesian: New Hebrides; Fiji Islands; Solomon Islands; etc.
- c) Micronesian: Gilbert, Marshall, Caroline Islands, etc.
- d) Polynesian: Samoa, New Zealand, Tahiti, Hawaii, etc.

★ ★ ★

The extremely large number of separate languages in this family makes any kind of systematic study for practical purposes difficult. Javanese, Malayan and Hawaiian can, to some

extent, be reduced to a systematic arrangement. The languages of colonization (English, Dutch, Japanese, French, etc.) are everywhere superimposed.

VIII — AFRICAN NEGRO.

Location: Africa, south of the Sahara and west of Ethiopia.

Number of speakers: about 100,000,000.

Structure: no definite classification can be given. Some of these languages are characterized by the placing of nouns into distinct classes (man, tree, water, etc.), each of which receives a special distinguishing syllable or sound which is prefixed to nouns of that class and to adjectives associated with them, with a change of prefix to indicate the plural: Swahili *m-thu m-zuri*, "handsome man"; *wa-thu wa-zuri*, "handsome men"; *n-iumba n-zuri*, "pretty house"; *ma-niumba ma-zuri*, "pretty houses". Adverbs often take the same prefix as the verbs they modify: *ku-fa ku-zuri*, "to die beautifully".

Main groups:

- a) Sudanese-Guinean (Nubian, Masai, Hausa, Yoruba, Mandingo, etc. Many linguists reject Sudanese-Guinean unity).
- b) Bantu (Ruanda, Swahili, Zulu, Herero, Umbundu, etc.).
- c) Hottentot-Bushman.

★ ★ ★

Because of their great variety and low cultural, political and economic status, these tongues are relatively unimportant (though two of them, Swahili and Hausa, with 8,000,000 and 13,000,000 speakers, respectively, are worthy of some attention). They are everywhere in the process of being superseded by the languages of colonization (English, French, Portuguese, etc.).

IX — AMERICAN INDIAN.

Location: Western Hemisphere.

Number of speakers: undetermined, but probably does not exceed 10,000,000 at the present time, many of whom are

bilingual (English in Canada and U. S. A., Spanish or Portuguese in Latin America).

Structure: enormous variations, but in the case of a large number of these languages it is characterized by "polysynthetism" ("polysynthetic"); this means that words seldom have individual status, but become significant only when placed in a sentence; or, to put it another way, the entire sentence forms one word-unit, with none of its component parts enjoying true separate existence: Oneida *g-nagla-sl-i-zak-s*, "I am looking for a village"; *g-* carries the meaning of "I"; *nagla* conveys the idea of "living"; *sl* is a suffix giving *nagla* the force of a noun (therefore, *nagla* plus *sl* convey the idea of "village"); *i* is a verbal prefix, indicating that *zak* is to convey a verbal idea; *zak* carries the meaning of "looking for"; *s* is the sign of continued action. None of these parts would convey any very definite meaning if used by itself.

Main groups: classification is almost impossible; among the better known linguistic tribes of North America are the Eskimo, the Algonquian (Blackfoot, Cheyenne, Arapahoe, Cree, Ojibwa, Delaware, etc.), the Iroquois (Huron, Wyandot, Cherokee, etc.), and the Uto-Aztec; Central America has, among others, the Mayan, Mixtec and Zapotec; South America, the Arawak, Araucanian, Carib, Chibcha, Quechua, Tupi-Guaraní, etc.

The practical and cultural importance of the American Indian languages is small, and they are everywhere superseded by Indo-European tongues of colonization which have become the national languages of the overwhelming majority of the inhabitants (English, Spanish, Portuguese, etc.).

X — OTHER GROUPS.

The *Ainu* of northern Japan (20,000 speakers, who belong to a mysterious white race); the *Hyperborean* tongues of northeastern Siberia (a few thousand speakers); the *Basque* of northeastern Spain and southwestern France (less than

1,000,000); the *Caucasian* group of the Caucasus region in the Soviet Union (Georgian, Lesghian, Avar, Circassian, etc.; perhaps 2,000,000); the *Mon-Khmer*, *Annamese* and *Munda* tongues of southeastern Asia (perhaps 20,000,000 or 30,000,000, most of them in eastern India and French Indo-China); the native tongues of Australia and New Guinea (*Papuan*), with a few hundred thousand apiece, all form separate linguistic groups, but have little practical importance.

Ainu has a curious duplication of the French-Celtic expression for "eighty" ("four twenties"); Basque has a structure somewhat reminiscent of the polysynthetism of some American Indian languages (*ponet-ekila-ko-are-kin*, "with the one who has the cap", literally: "cap-with-the-of-with"); the Caucasian tongues enjoy an unparalleled richness of consonant sounds and grammatical genders, together with a peculiar structure ("I make my father happy" has to be translated by "through me — contented — makes — self — father"); some native Australian tongues can count only up to three, with the result that "seven" has to be rendered by "pair-pair-pair-one", and "fifteen" by "hand-side-side-and-foot-half".

But while these tongues are an object of great curiosity to the scientist, their political, economic and cultural value is so small, and they are so encroached upon by neighboring and colonizing languages (Japanese for Ainu; Russian for the Hyperborean and Caucasian tongues; Spanish and French for Basque; English and French for Mon-Khmer, Annamese and Munda; English for Australian) that they can safely be disregarded by the practical linguist.

SUMMARY

Our analysis of the world's linguistic picture for practical purposes has considerably narrowed down our search for the important languages. While it is conceivable that a situation may arise in which there is a need for Ainu, or a native Australian tongue, or an African Negro dialect, or an American Indian language, we find that the practically significant lan-

guages can be determined and isolated. "Practical significance" hinges on a number of factors; numerical strength is important, but only if accompanied by continued cultural and economic development and political unity, so that the language becomes standardized and assumes a definite current and literary form; otherwise, the rise of infinite dialects renders the language difficult of access, while political instability leads to the superimposition of another conquering or colonizing tongue. Such is the case with India's Indo-Aryan and Dravidian languages, and, to a far lesser degree, with Chinese. Culture, civilization, literature are of importance, but they must be accompanied by expansive power in the political and economic fields, or the number of speakers will remain small, and the practical importance of the language low; Greek is a good example of this. Political unity and power, force of expansion and commercial and economic penetration, when accompanied by the numerical factor and a cultural background, lead to practical importance.

The languages that combine all these factors, though to varying degrees, in the Indo-European group, are "Germanic" English and German; "Romance" Spanish, French, Portuguese and Italian; "Slavic" Russian. In the Semitic group, Arabic is the only tongue that can at the present time lay claim to a first-class position; but the fact that it has been partly replaced by European languages of colonization robs it of the dominant position it has held in the past. Among the Asiatic groups, Japanese and Chinese combine the various factors that appear significant.

In a second division, we may place Dutch and, perhaps, Polish; while a third group might include, for Indo-European, the Scandinavian tongues (Dano-Norwegian, Swedish, Icelandic), Roumanian, the minor Slavic languages (Czech, Serbo-Croatian, Bulgarian), Greek, and Lithuanian; for Ural-Altai, Finnish, Hungarian and Turkish; for the languages of the Far East, Malay.

Tongues like Albanian, Armenian, the Celtic languages,

Persian, a few vernaculars of India, Palestinian Hebrew, Siamese, Burmese, are linguistic stragglers from the standpoint of practical importance.

The key position of certain languages is now clear. English, German, French, Spanish, Portuguese, Italian, Russian and Japanese occupy these key posts. Arabic, Chinese, Malay, and Dutch, even if acquired in the form of a smattering, help to fill the gaps. The ability to identify forty or fifty of the remaining languages, so that we can distinguish between Bulgarian and Serbian, Greek and Albanian, Turkish and Persian, at least in written form, completes all that is needed for a utilitarian linguistic education.

THE LANGUAGES OF NORTH AND CENTRAL AMERICA

CHAPTER II

GEOGRAPHY AND LANGUAGES

So far we have grouped languages by family units. Geographical distribution now claims our attention. What languages are current in each of the political divisions of the various continents? What secondary, auxiliary or colonial languages may we expect to be able to use, if a country's primary national tongue is not available to us? In dealing with the geographical problem, we shall find it convenient to take the world's pre-war political arrangement, regardless of military occupations, even those that occurred prior to the actual outbreak of hostilities, such as Germany's seizure of Czechoslovakia.

1. NORTH AMERICA

Country	Approximate Population	Language(s)
Alaska	70,000	English.
Bermudas	30,000	English.
Canada (including Labrador and Newfoundland)	12,000,000	English, with perhaps 3,000,000 French speakers located primarily in the Province of Quebec, and to some extent in Ontario; many of them can be reached with English.
Greenland	20,000	Danish.
Mexico	20,000,000	Spanish.
U. S. A.	132,000,000	English.

English serves the purpose practically everywhere in North America, save in Greenland (Danish), Mexico (Spanish),

and French-speaking sections of Canada. Foreign-speech groups in the U. S. A. and Canada are picturesque and interesting, but inconsequential for practical purposes. English can to some extent be used in Mexico and Greenland, and largely in French-speaking Canada. For North America, as well as for Central and South America, little mention need be made of Eskimo or American Indian languages, the importance of which is extremely limited.

2. CENTRAL AMERICA AND WEST INDIES.

Country	Approximate Population	Language(s)
Bahamas	70,000	English.
British Honduras	60,000	English and Spanish.
Canal Zone	50,000	English and Spanish.
Costa Rica	600,000	Spanish.
Cuba	4,200,000	Spanish.
Dominican Republic	1,600,000	Spanish.
Guadeloupe and Martinique	600,000	French.
Guatemala	3,000,000	Spanish.
Haiti	3,200,000	French.
Honduras	1,000,000	Spanish.
Jamaica	1,200,000	English.
Leeward Islands	100,000	English.
Nicaragua	1,100,000	Spanish.
Panama	700,000	Spanish.
Puerto Rico	2,000,000	Spanish and English.
Salvador	1,700,000	Spanish.
Virgin Islands	25,000	English and Danish.
Windward Islands	300,000	English.

★ ★ ★

Spanish, English and French, in the order mentioned, are the essential languages in this area. English can to some extent be used in all Spanish and French-speaking sections.

3. SOUTH AMERICA.

Country	Approximate Population	Language(s)
Argentina	13,000,000	Spanish
Bolivia	3,300,000	Spanish.
Brazil	44,000,000	Portuguese.
Chile	4,600,000	Spanish.
Colombia	8,700,000	Spanish.
Ecuador	3,000,000	Spanish.
Guiana, British	350,000	English.
Guiana, Dutch	200,000	Dutch.
Guiana, French	50,000	French.
Paraguay	1,000,000	Spanish.
Peru	6,800,000	Spanish.
Uruguay	2,100,000	Spanish.
Venezuela	3,500,000	Spanish.

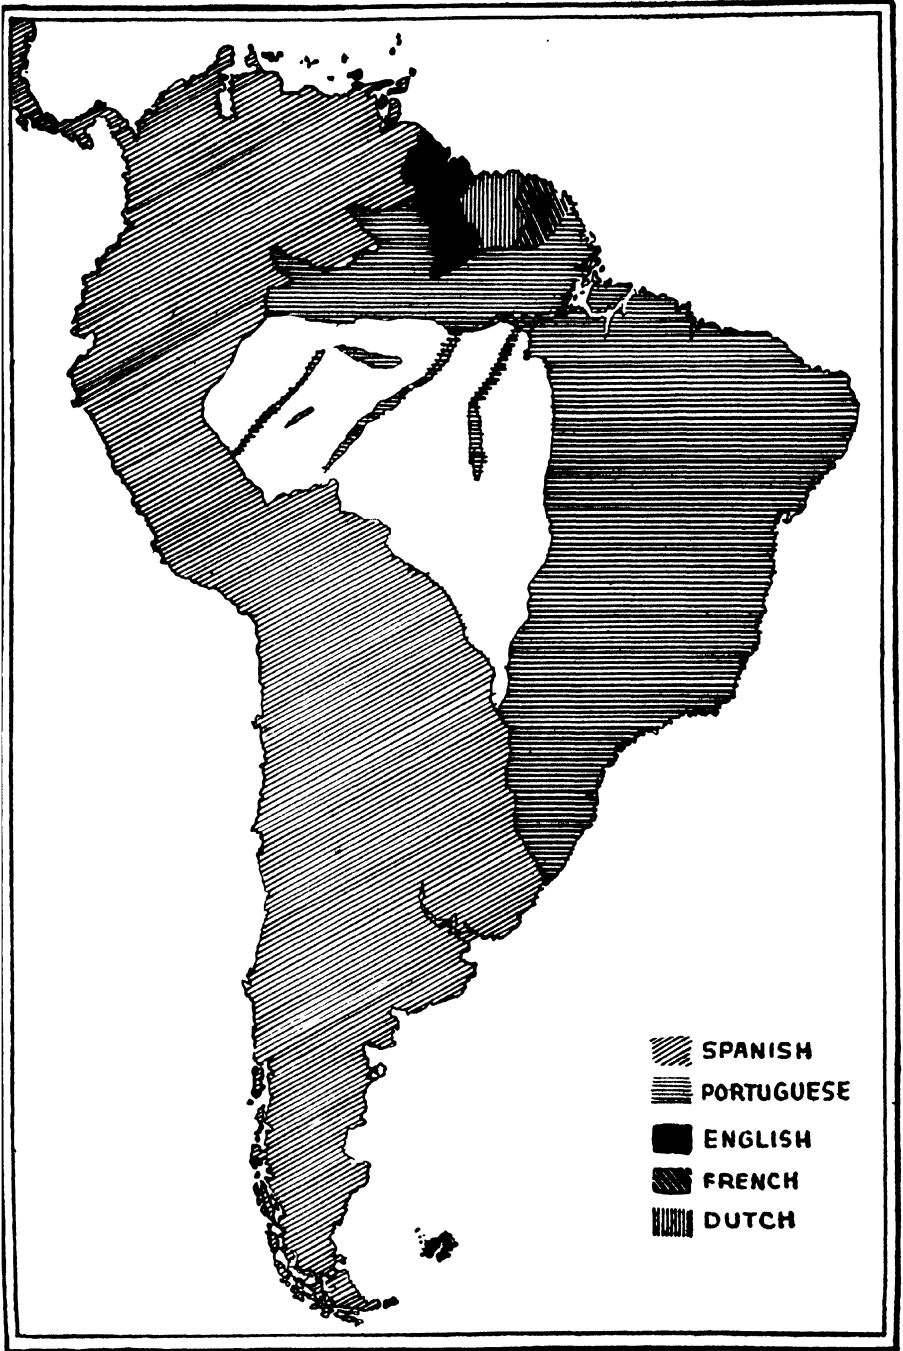

★ ★ ★

The South American picture is one of division between Spanish (roughly 46,000,000 speakers) and Portuguese (44,000,000), with the latter concentrated in a single country, Brazil. The American Indian languages, which are on their way to complete extinction in North America, are perhaps a little more alive here (Quechua, for example, has nearly 4,000,000 speakers); but their extreme diversity and the fact that many of their speakers can be approached through the medium of the official tongue renders them of scant practical importance. English and French are current among the higher ranks of society in all Latin-American countries; Italian and German are fairly current in some sections of Brazil (São Paulo, Rio Grande do Sul); Italian to some extent in Argentina.

★ ★ ★

The Western Hemisphere as a whole shows a preponderance of English (about 145,000,000 speakers), followed by Spanish (83,000,000) and Portuguese (44,000,000). French

THE LANGUAGES OF SOUTH AMERICA

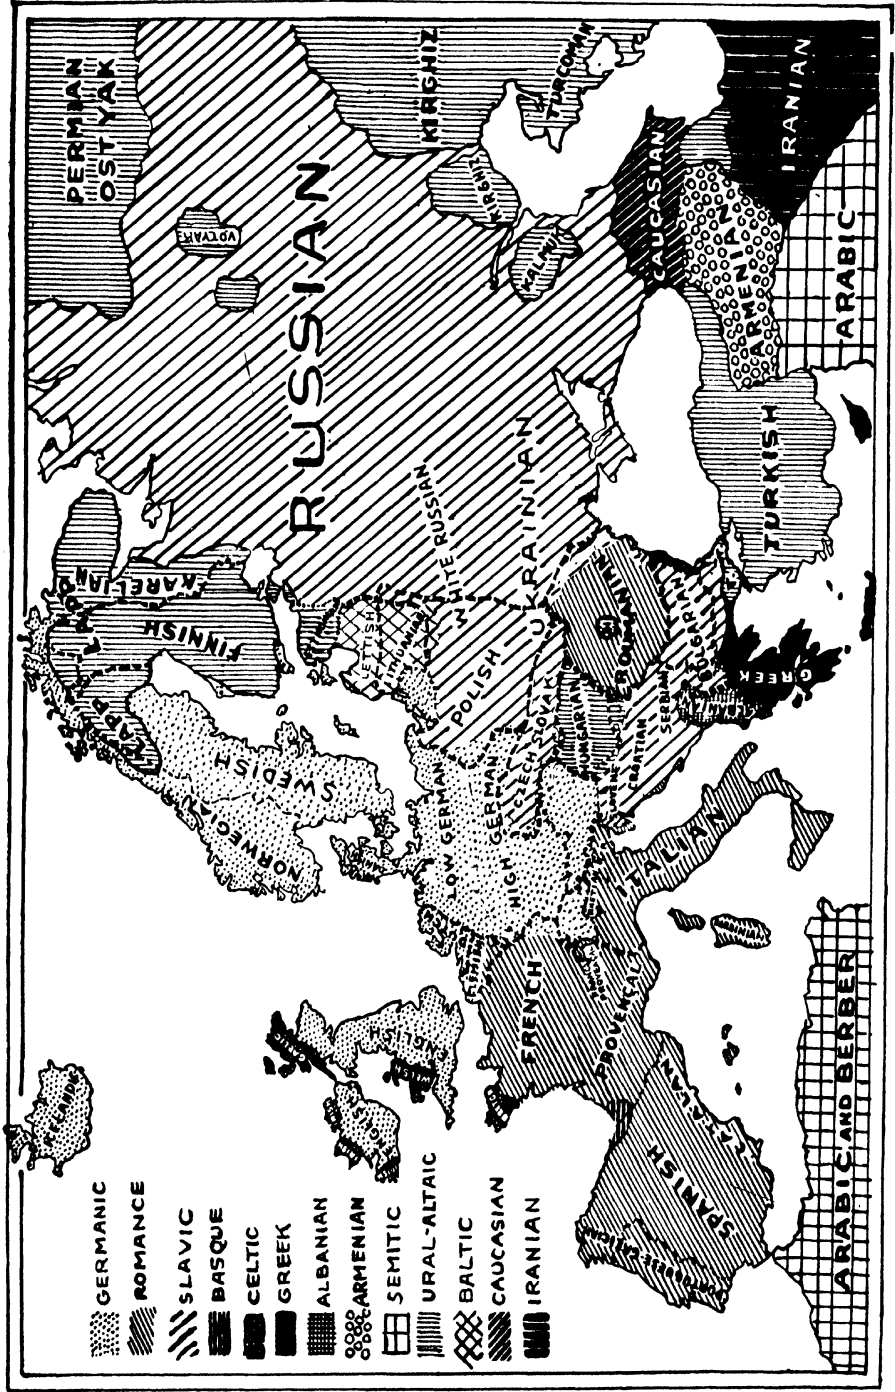

(8,000,000), Dutch (about 200,000) and Danish (less than 50,000) constitute hemispheric linguistic minorities.

4. EUROPE

Country ¹	Approximate Population	Language(s)
Albania	1,100,000	Albanian (with Italian, Greek, Turkish, Serbo-Croatian to some extent current).
Belgium	8,500,000	French and Flemish (over one-half of the population has Flemish for its native tongue, but French is everywhere current).
Bulgaria	6,500,000	Bulgarian (with Turkish along Black Sea coast).
Czechoslovakia	15,000,000	Czech (of which Slovak is a variant; German everywhere current, particularly in Sudeten areas; Hungarian in southern section, and Ukrainian in extreme east).
Denmark	4,000,000	Danish (German fairly current, especially in southern section, Schleswig).
Estonia	1,000,000	Estonian (with Russian and German fairly widespread).
Finland	4,000,000	Finnish (with Swedish, Russian and German fairly current).
France	42,000,000	French (linguistic minorities, Bretons, Basques, Catalans, Alsacians, Italians, etc., normally speak French as well).

1. Such small political units as Andorra (6,000: Spanish, French, Catalan); Danzig (400,000: German and Polish); Gibraltar (21,000: Spanish and English); Liechtenstein (10,000: German); Monaco (24,000: French and Italian); San Marino (14,000: Italian), need not be discussed.

Germany (including Austria)	76,000,000	German (small linguistic minorities in East Prussia, Silesia, etc., normally speak German as well).
Great Britain and Northern Ireland	47,000,000	English (Welsh and Gaelic speakers normally speak English as well).
Greece	7,500,000	Greek (small Turkish, Albanian, Bulgarian minorities).
Hungary	9,500,000	Hungarian (Slovak, German and Roumanian minorities; German quite current).
Iceland	120,000	Icelandic, Danish.
Ireland (Eire)	3,000,000	English, Erse (or Irish Gaelic; very few inhabitants of Eire fail to speak and understand English).
Italy	45,000,000	Italian (linguistic minorities, Germans in Alto Adige, Slovenes in Istria, Croatians in Zara, etc., normally speak Italian as well).
Latvia	2,000,000	Latvian (or Lettish; Russian and German fairly current).
Lithuania	3,000,000	Lithuanian (Russian, German, Polish current).
Luxembourg	300,000	German, French (population fairly bilingual).
Netherlands	9,000,000	Dutch (a large number of Hollanders are equipped with German, French, or English).
Norway	3,000,000	Norwegian (a variant of Danish); Lapp in the far north; German and English have some currency).
Poland	35,000,000	Polish (linguistic minorities very large: German in Polish Corridor and western provinces; Lithuanian, White Russian and Ukrainian in eastern sections; German and Russian current among a good many Poles; about 3,000,000 Yiddish speakers).

Portugal (including Azores)	8,000,000	Portuguese (Spanish generally understood).
Roumania	20,000,000	Roumanian (linguistic minorities very large: Hungarian and German in Transylvania; Ukrainian in Bessarabia; Bulgarian in Dobruja and Bessarabia, etc.).
Soviet Union (in Europe)	130,000,000	Russian (linguistic minorities heavy, but scattered; Caucasian and Armenian in Caucasus; Ural-Altai in Karelia, north and northeast, etc.; generally accessible through Russian; Russian's kindred tongues, Ukrainian and White Russian, number 28,000,000 and 5,000,000 speakers, respectively).
Spain	25,500,000	Spanish (Catalan speakers in east, Basques in northeast, normally accessible through Spanish; Galicians in northwest through Spanish or Portuguese).
Sweden	6,500,000	Swedish (Lapp in extreme north; German has a certain amount of currency).
Switzerland	4,500,000	German, French, Italian, Rumansh (all four languages are official; over 3,000,000 Swiss speak German; French speakers number over 2,000,000, Italian and Rumansh speakers nearly 1,000,000).
Yugoslavia ²	16,000,000	Serbo-Croatian, Slovene (very large linguistic minorities, consisting of German, Bulgarian, Hungarian, Albanian, Turkish, Roumanian and Italian speakers; German is quite current in areas formerly forming part of Austro-Hungarian Empire).

A linguistic survey of Europe shows English to be officially current among some 50,000,000 speakers, and widely spoken and understood outside of its own territory. German includes over 80,000,000 native speakers, and gives access to at least 20,000,000 or 30,000,000 more, in addition to being a "cultural" language (though to a lesser degree than French). French, with some 50,000,000 speakers in France, Belgium and Switzerland, pervades the upper and middle classes of most European countries. Italian gives access to some 50,000,000 European speakers; Russian to over 100,000,000; Spanish to about 25,000,000; while perhaps 30,000,000 can be reached with Polish.

Among the minor European tongues that do not have much European currency outside of their own national territory are Hungarian (13,000,000); Dutch-Flemish (13,000,000); Serbo-Croatian and Slovene (16,000,000); Roumanian (16,000,000); Czech and Slovak (12,000,000); Swedish (7,000,000); Dano-Norwegian, Portuguese, Bulgarian and Greek, with about 7,000,000 each; and Finnish (4,000,000). But some of these languages, notably Portuguese and Dutch, have vast non-European ramifications in colonial or former colonial territories.

Europe is one of the most polylingual of continents. Outside of the general knowledge of French, German, and/or English possessed by most people of culture, many border areas are bilingual, trilingual, even quadrilingual, while the everyday necessities of peoples living together in a crowded area have led to the speaking of one or two additional languages by large segments even of uneducated people in many European countries. If you do not know the national language of the country you are in, don't give up hope; try the languages you do know; they very often work successfully.

THE LANGUAGES OF ASIA

5. ASIA.

Country	Approximate Population	Language(s)
Afghanistan	12,000,000	Pushtu and Persian.
Burma	16,000,000	Burmese (with English superimposed).
Ceylon	6,000,000	Singhalese (Indo-Aryan) in south; Tamil (Dravidian) in north; English superimposed.
China	425,000,000	Chinese (Ural-Altaiic dialects in Chinese Turkestan and Mongolia; Tibetan in Tibet; Thai dialects in southeastern sections and Hainan; Japanese to some extent current in Japanese-seized territory; European languages, especially English, in foreign concessions and coastal cities). The principal Chinese dialects (Mandarin, now the official tongue, or Kuo-yü: 280,000,000; Cantonese: 38,000,000; Wu of Shanghai: 34,000,000; Min of Fukien: 30,000,000) are not mutually intelligible.
Cyprus	400,000	Greek (Turkish, English superimposed).
Malaya (including Straits Settlements)	5,500,000	Malayan (Indonesian), Chinese, and Mon-Khmer dialects (English superimposed).
French Indo-China	24,500,000	Annamese and Mon-Khmer dialects (French superimposed).
Hong Kong	1,500,000	Chinese (English, Japanese superimposed).
India	390,000,000	Indo-Aryan tongues (Panjabi, Bengali, Hindi, Urdu, etc.) in north; Dravidian languages (Tamil, Telugu, Canarese, etc.) in south; scattered Munda groups, mostly in northeast; English superimposed.

Iran	15,000,000	Persian, Kurdish. French is current among the upper classes.
Iraq	4,500,000	Arabic, Kurdish, Turkish.
Japan (including Karafuto)	73,000,000	Japanese (Ainu in Yezo and Karafuto, the southern part of Sakhalin Island).
Korea	25,000,000	Korean (Japanese superimposed).
Manchukuo	43,000,000	Manchu (of the Ural-Altai family; less than 500,000); Chinese (about 40,000,000); Japanese superimposed.
Nepal and Bhutan	6,000,000	Indo-Aryan and Tibetan dialects.
Oman	500,000	Arabic.
Palestine	1,500,000	Arabic (Hebrew and English superimposed).
Portuguese Asia	1,000,000	Indo-Aryan dialects in Goa, Damau and Diu; Chinese in Macau (Portuguese superimposed).
Saudi Arabia (including Hejaz)	5,500,000	Arabic.
Soviet Union in Asia	41,000,000	Ural-Altai and Hyperborean dialects (Ostyak, Samoyed, Turcoman, Kirghiz, Mongol, Tungus, Yukagir, etc.; Russian everywhere superimposed).
Syria and Lebanon	4,000,000	Arabic (French superimposed).
Taiwan (Formosa)	5,500,000	Indonesian dialects and Chinese (Japanese superimposed).
Thailand (Siam)	16,500,000	Siamese (Thai) and Mon-Khmer dialects.
Transjordan	500,000	Arabic (English superimposed).
Turkey (including European Turkey)	18,000,000	Turkish (a Ural-Altai language; Indo-European Armenian and Kurdish in the eastern sections).
Yemen ³	3,500,000	Arabic.

3. British possessions in and near Arabia (Aden, Bahrein Island, Kuwait) have a total of some 300,000 Arabic speakers, with English superimposed.

The linguistic picture of Asia is at least as involved as that of Europe. Northern Asia (Siberia, Union of Soviet Republics) is almost solidly Ural-Altaiic, but with a strong Russian infiltration which is particularly noticeable along the courses of the great rivers (Ob, Lena, Yenisei), and in the larger cities and towns. The Ural-Altaiic tongues extend down into Chinese Turkestan, Mongolia and Manchuria.

Chinese, with its mighty mass of speakers, predominates in most of east central continental Asia. But politically Chinese territory is abundantly strewn with other linguistic groups; the Ural-Altaiic dialects mentioned above, and Chinese's kindred tongues, Tibetan and Thai, in southwestern and southeastern China, respectively.

The Indo-Aryan and Dravidian languages of India and Ceylon account for most of India's 390,000,000 speakers, but colonizing English forms a strong super-layer, as it does also in Burma and Malaya.

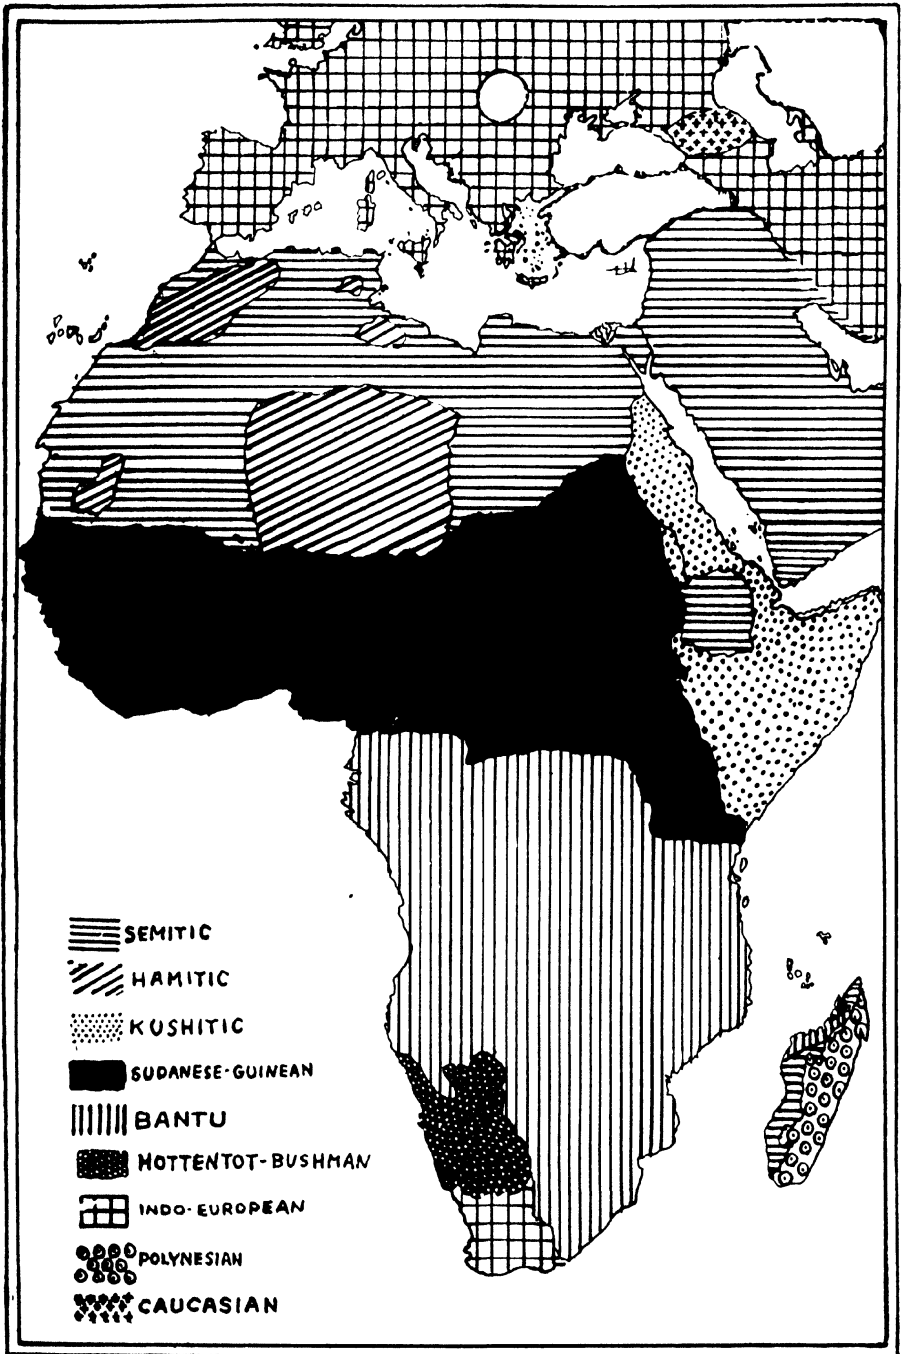

Japanese, with over 70,000,000 native speakers, also permeates Korea, Formosa, Manchukuo and, to a lesser degree, other lands of former Japanese occupation.

Arabic is current in the entire Arabian Peninsula, Iraq, Syria, Palestine and Transjordan, with English in the last two countries, French in Syria, and Hebrew in Palestine as super-imposed tongues. The influence of Arabic is also strongly felt in Indo-European Afghanistan, Iran, and northern India, and, in fact, wherever the Muhammadan faith has followers.

Ural-Altaiic Turkish, with Indo-European Armenian and Kurdish spoken on its national territory; Sino-Tibetan Thai, current in Siam and parts of southeastern China; Annamese in French Indo-China; Mon-Khmer dialects in Indo-China, Thailand and Malaya; Munda dialects in India; Indonesian Malay-ian in Malaya; Indo-European Persian and Pushtu, may be said to constitute a secondary group of Asiatic tongues.

Among the languages of colonization, first place belongs to English, which pervades India, Ceylon, Burma, Malaya, Cyprus, Hong Kong, Palestine, Transjordan and sections of

THE NATIVE LANGUAGES OF AFRICA

Arabia (Aden, Bahrein, Kuwait). French appears in Indo-China, Syria, and one or two cities of India (Pondichéry) and China (Kwangchowan); Portuguese in Goa, Damau and Diu, on the western coast of India, and in Chinese Macau; Russian throughout the Asiatic territory of the Soviet Union, and, to some extent, in Mongolia.

6. AFRICA

Country	Approximate Population	Language(s)
Algeria	8,000,000	Arabic and Berber (French superimposed).
Anglo-Egyptian Sudan	6,500,000	Arabic, Kushitic (Beja, etc.), and Sudanese-Guinean dialects, especially Nubian.
Angola	3,500,000	Bantu (Portuguese superimposed).
Basutoland	600,000	Bantu (English superimposed).
Bechuanaland	300,000	Bantu (English superimposed).
Belgian Congo	14,000,000	Bantu, Sudanese-Guinean (French superimposed).
Cameroons	2,600,000	Sudanese-Guinean and Bantu dialects (French superimposed).
Egypt	17,000,000	Arabic and Kushitic dialects (English, French, Greek, Italian superimposed). Nubian (Sudanese-Guinean) in Upper Egypt.
Ethiopia (including Eritrea and Italian Somaliland)	12,000,000	Ethiopian (Amharic, Tigre, etc.); Kushitic dialects (Galla, Somali, etc.); Sudanese-Guinean dialects in extreme west; Italian superimposed.
French Equatorial Africa	3,500,000	Sudanese-Guinean; Arabic in north; Bantu in extreme south (French superimposed).
French West Africa (Dahomey, Fr. Sudan, Fr. Guinea, Ivory Coast, Niger, Togo, Senegal)	16,000,000	Arabic, Berber, Sudanese-Guinean (French superimposed).
Gambia	200,000	Sudanese-Guinean (English superimposed).

Gold Coast	4,000,000	Sudanese-Guinean (English superimposed).
Guinea, Portuguese	400,000	Sudanese-Guinean (Portuguese superimposed).
Guinea, Spanish	150,000	Bantu (Spanish superimposed).
Ifni	20,000	Berber and Arabic (Spanish superimposed).
Kenya	3,500,000	Bantu (English superimposed).
Liberia	2,000,000	Sudanese-Guinean (English superimposed).
Libya	1,000,000	Arabic, Berber (Italian superimposed).
Madagascar	3,800,000	Malagasy (Indonesian); French superimposed.
Morocco	7,000,000	Arabic, Berber (French superimposed).
Mozambique	4,500,000	Bantu (Portuguese superimposed).
Nigeria	22,000,000	Sudanese-Guinean (English superimposed).
Nyasaland	1,600,000	Bantu (English, Afrikaans, superimposed).
Rhodesia	3,000,000	Bantu (English, Afrikaans, superimposed).
Rio de Oro	30,000	Arabic (Spanish superimposed).
Sierra Leone	2,000,000	Sudanese-Guinean (English superimposed).
Somaliland, British	350,000	Kushitic (English superimposed).
Somaliland, French	50,000	Kushitic (French superimposed).
Southwest Africa	300,000	Bantu, Hottentot-Bushman (English, German superimposed).
Spanish Morocco	800,000	Arabic, Berber (Spanish superimposed).
Swaziland	150,000	Bantu (English superimposed).
Tanganyika	5,300,000	Bantu (English superimposed).
Tunisia	3,000,000	Arabic, Berber (French, Italian superimposed).
Uganda	3,800,000	Sudanese-Guinean, Bantu (English superimposed).
Union of South Africa	10,700,000	Bantu, Hottentot-Bushman (English, Afrikaans superimposed).

Linguistically, northern Africa, as far as the Tropic of Cancer and beyond, is solidly Semito-Hamitic, with Semitic Arabic stretching from the Sinai Peninsula to the Atlantic coast, and Hamitic Berber intermingled with it in the interior, particularly in the Sahara, in Algeria and Morocco. Hamitic Kuschitic and Semitic Ethiopian languages appear in the area east of the Nile and extend down to the southern borders of Ethiopia and Italian Somaliland and beyond. The rest of the continent is divided between two great African Negro groups, the Sudanese-Guinean and the Bantu, with the dividing line between them a little to the north of the Equator on the western coast and a little to the south of it on the eastern. Hottentot-Bushman appears only in a restricted section of Southwest Africa.

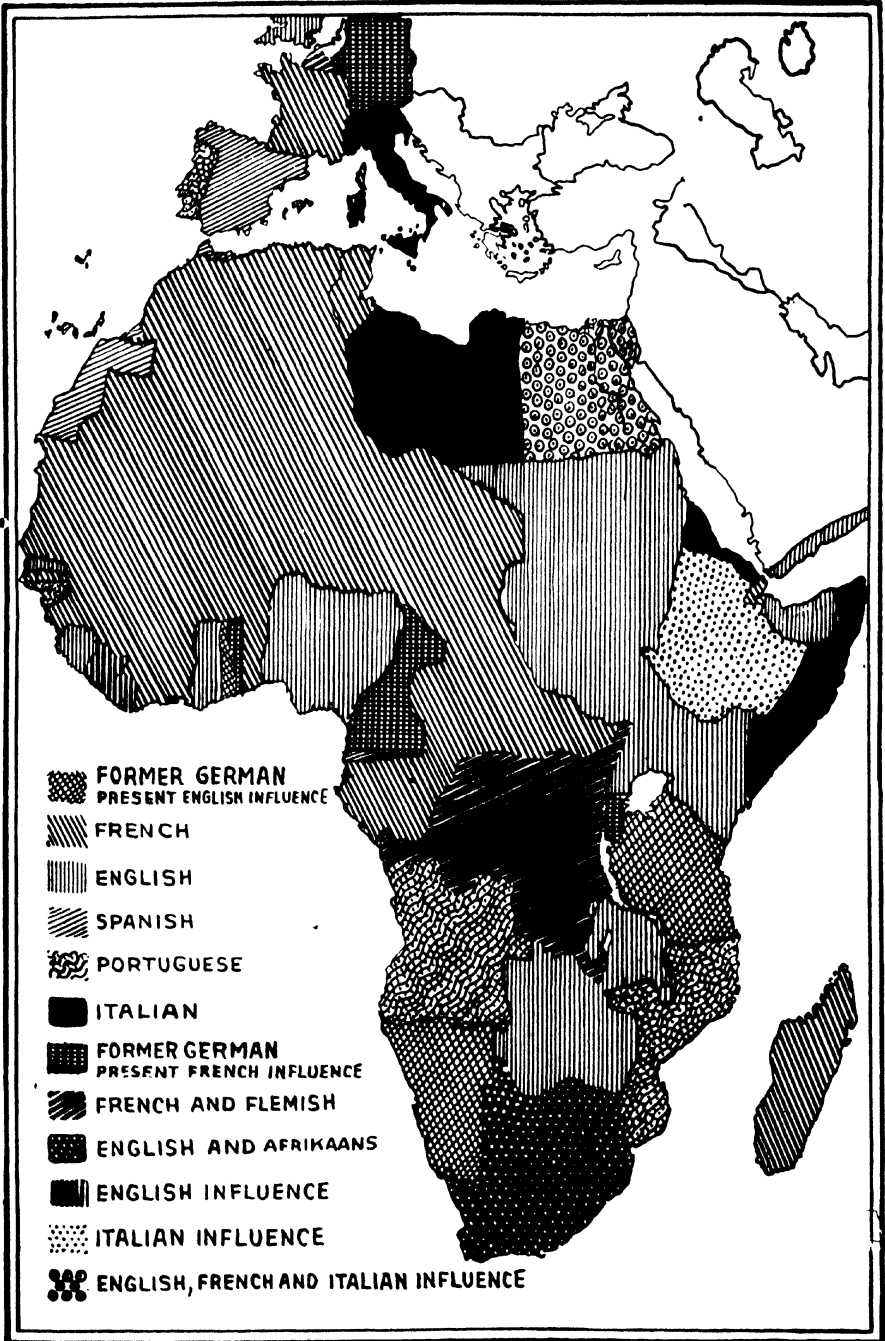

The languages of colonization are of particular importance in this continent. They are not everywhere equally widespread, however, ranging from the strong position which English holds in South Africa to the very thin veneer of French and Flemish in the Belgian Congo, and from the native-tongue status of French and Italian among a quarter of Tunisia's inhabitants to the military outpost and trading-post function of English in Uganda, Kenya and Tanganyika.

English appears in the Anglo Egyptian Sudan, Gambia, the Gold Coast, Kenya, Liberia, Nigeria, Nyasaland, Sierra Leone, British Somaliland, Tanganyika, Uganda, and all of South Africa (the Union of South Africa, including the Transvaal, the Cape of Good Hope, the Orange Free State and Natal; Rhodesia, Swaziland, Bechuanaland, Basutoland, and Southwest Africa). In South African territory, English shares with a variant of Dutch (Afrikaans) the honor of having become a national language by virtue of white settlers who now number over one-fourth of the total population.

French is current in Algeria, the Cameroons, French Equatorial and West Africa, Madagascar, French Morocco, French Somaliland and Tunisia; in the Belgian Congo, it forms, with Flemish, the language of colonization.

Italian appears in Libya, Eritrea, Italian Somaliland, and, to some extent, in Ethiopia and Tunisia.

THE COLONIAL LANGUAGES OF AFRICA

Portuguese appears in Angola, Portuguese Guinea and Mozambique, and is the national language in the Cape Verde and Madeira Islands (about 250,000 inhabitants each).

Spanish is current in Spanish Morocco, the Canary Islands, Ifni, Rio de Oro and Spanish Guinea.

Lastly, German very occasionally appears in Germany's former colonial possessions of the days prior to the first world war: the Cameroons, Togoland (now divided between French West Africa and British Gold Coast), Southwest Africa, Nyasaland and Tanganyika.

Egypt (predominantly Arabic in speech) is a land where English, French, Greek and Italian are fairly current.

7. OCEANIA.

Country	Approximate Population	Language(s)
Australia	7,000,000	English (with native Australian languages approaching extinction).
Bismarck Archipelago	250,000	Melanesian (English and German superimposed).
British North Borneo	300,000	Indonesian (English superimposed).
Brunei	40,000	Indonesian (English superimposed).
Caroline Islands	40,000	Micronesian (Japanese superimposed).
Cook Islands	15,000	Polynesian (English superimposed).
Dutch East Indies (Java, Sumatra, Borneo, Celebes, Neth. New Guinea, Bali, Madura, Flores, western Timor, Amboina, etc.)	60,000,000	Indonesian languages and dialects (save for the interior of New Guinea, where Papuan is spoken); these are Javanese (over 20,000,000) and Sundanese (6,000,000) in Java; Balinese (3,000,000) in Bali; Madurese (3,000,000) in Madura; Dayak in Borneo; Atchin, Minangkabau and Batak in Sumatra; Macassar, etc., in Celebes; Dutch and Malay everywhere superimposed).

Fiji Islands	200,000	Melanesian and Hindustani (English superimposed).
French Oceania	45,000	Polynesian (French superimposed).
Gilbert and Ellice Islands	35,000	Micronesian and Polynesian (English superimposed).
Guam	25,000	Micronesian (English superimposed).
Hawaiian Islands	500,000	Polynesian (English, Japanese, Chinese, Korean superimposed).
Labuan	10,000	Indonesian (English superimposed).
Marianas Islands	70,000	Micronesian (Japanese superimposed).
Marshall Islands	10,000	Micronesian (Japanese superimposed).
New Caledonia	65,000	Melanesian (French and English superimposed).
New Guinea	750,000	Papuan (English superimposed).
New Hebrides	45,000	Melanesian (English and French superimposed).
New Zealand	1,600,000	English (Polynesian Maori on the way to extinction).
Palau	6,000	Micronesian (Japanese and German superimposed).
Papua	275,000	Papuan (English superimposed).
Philippine Islands	16,000,000	Indonesian (about 50 different dialects: Bisaya - about 7,000,000; Tagalog - about 4,000,000; Ilocano - about 2,300,000; etc. English and Spanish superimposed).
Samoa	13,000	Polynesian (English and German superimposed).
West Samoa	60,000	Polynesian (French superimposed).
Sarawak	450,000	Indonesian (English superimposed).
Solomon Islands	140,000	Melanesian (English superimposed).
Timor (Portuguese)	500,000	Indonesian (Portuguese superimposed).
Tonga	35,000	Polynesian (English superimposed).

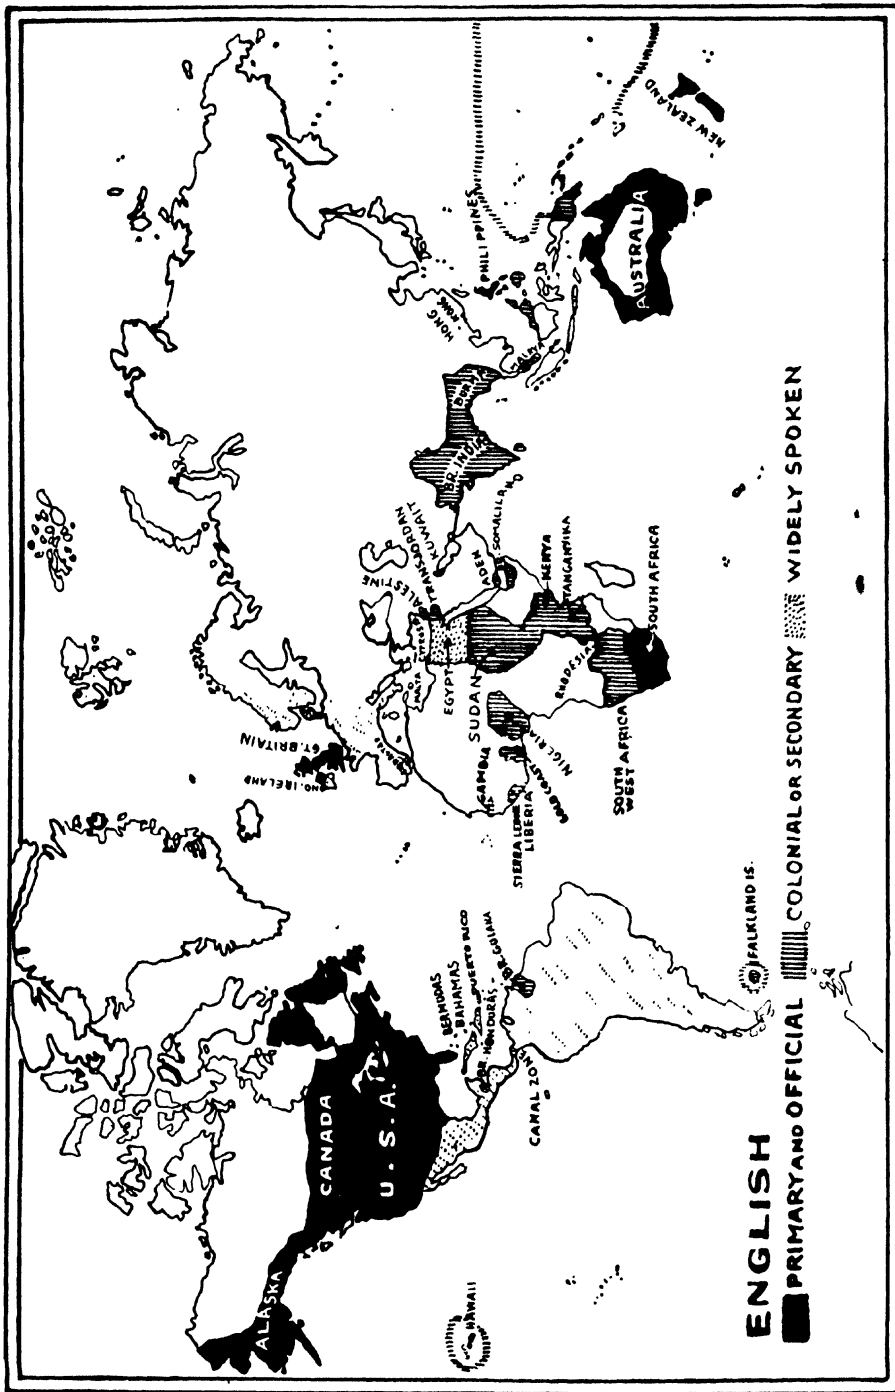

Oceania shows a predominance of Malayo-Polynesian, indigenous to all the Oceanic Islands with the exception of Australia (native Australian languages) and New Guinea (Papuan). The division of the Malayo-Polynesian tongues into Indonesian; Melanesian, Micronesian and Polynesian is somewhat arbitrary (being to some extent geographical and racial rather than linguistic), and not very important, in view of the innumerable diverging dialects. Indonesian Javanese, accounting for some 20,000,000 people, is the most important of these languages.

Among the languages of colonization, English is by far the most widespread, having become the language of the majority of the inhabitants in Australia and New Zealand, where colonists originally from Britain and their descendants far outstrip the native populations in number. It also forms a superimposed layer in Hawaii, the Philippines, the northern sections of the island of Borneo (Sarawak, British North Borneo), eastern Papua (New Guinea and Papua Territories), and about half of the minor islands and groups.

Dutch, current in the Dutch East Indies (Java, Sumatra, Celebes, southern Borneo, western Papua, Bali, Madura, western Timor, Amboina, etc.) is second only to English in importance.

Japanese, current in all the Japanese-mandated islands (Caroline, Marianas, Marshalls, etc.) and, to some extent, in seized territory, runs third.

French appears in Tahiti, New Caledonia, parts of the New Hebrides and Samoa, etc.; Portuguese in the eastern section of Timor. Vestiges of former colonial occupations appear in the half million Spanish speakers of the Philippines and the occasional traces of German in former German colonial possessions (Bismarck, Caroline, Marianas, Marshall Islands, Samoa, New Guinea, etc.).

CHAPTER III

LANGUAGES OF THE GERMANIC GROUP

Of the three leading Indo-European divisions (Germanic, Romance, Slavic), the Germanic holds first place in point of numbers and political and commercial importance, vying for cultural first honors with the Romance group. Its main modern subdivisions are English, German, Dutch-Flemish, Dano-Norwegian, Swedish and Icelandic. Of these, the first three belong to the West Germanic family, while the others are of the Scandinavian, or North Germanic variety.

English, with over 200,000,000 native speakers, located principally on the North American continent, the British Isles, South Africa, Australia and New Zealand, is also by far the most important and far-reaching among the tongues of colonization in Asia, Africa and Oceania. It is, furthermore, the language of commercial intercourse *par excellence*. During its past history, it differentiated itself from its sister Germanic tongues by the inclusion of larger numbers of borrowed words, especially from the Latin-Romance languages, and this mixture gives it a distinctive international flavor that makes it ideal for general use throughout the world.

German, with over 80,000,000 native speakers in the Reich and Switzerland, serves also as a tongue of international exchange throughout Central Europe, being used as a secondary language by large sections of the populations of countries that formerly formed part of the Austro-Hungarian Empire (Hungary, Czechoslovakia, Yugoslavia), and, to a lesser degree, of Poland, the Netherlands, Denmark, Norway, Sweden, Finland, Lithuania, Latvia, Estonia, etc. As a "cultural" language, German is current among large segments

of the more learned classes of other European countries and of North and South America, while German emigration to the New World and former colonization of African and Oceanic territories account for additional millions of people who can be reached with German.

Dutch, with its Belgian variant, Flemish, is the native tongue of some 13,000,000 people in Europe, while the Dutch colonial empire and the Belgian Congo comprise some 80,000,000 people in part accessible through Dutch and Flemish. Afrikaans, the South African variety of Dutch, is still in fairly general use throughout the Union of South Africa, Rhodesia and neighboring territories, side by side with English.

As compared with the West Germanic languages, the tongues of the Scandinavian group have relatively few speakers. Swedish is the native tongue of about 6,500,000, and is used by considerable segments of the population of western and southern Finland and the Aaland Islands. Danish and Norwegian have a joint speaking population of some 7,000,000, and Danish is, in addition, used to some extent in Greenland, Iceland and the Virgin Islands. Icelandic is the tongue of only 100,000 people in Iceland. The Faroe Islands, north of Scotland, use a dialect intermediate between Danish and Icelandic.

ENGLISH — DISTRIBUTION AND VARIETIES

English, the mother-tongue of over 200,000,000 people scattered all over the six continents, displays local differences which, while not so radical as those appearing in other languages concentrated in much smaller areas, nevertheless render mutual understanding difficult at times. These differences appear, for the most part, in the fields of pronunciation and vocabulary, with grammar more generally standardized in countries settled by people of Anglo-Saxon blood. Grammatical standardization does not hold, however, for lands where English has become a secondary tongue, acquired by the native populations in "Pidgin" forms.

U. S. A.

For practical purposes, it may be said that American Indian languages have disappeared from United States soil.

It is estimated that less than a quarter of a million American Indians now exist in the U. S., and a considerable number of them are acquainted only with English).

The English of America's 140,000,000 inhabitants, despite local features of intonation and pronunciation (Southern "drawl"; New England "twang"; Middle Western strongly marked *r*; New York *thoity-thoid* for "thirty-third"; "Bostonese"; "Brooklynite"; etc.), and occasional vocabulary and semantic divergences,¹ has become one of the world's most standardized tongues, by reason of generally high levels of communications, transportation and education. Many of its current slang expressions and colloquialisms are unintelligible or only semi-intelligible to inhabitants of other parts of the English-speaking world.²

1. E. g., Southern "to carry" for "to take" ("he carried me to the dance"; "carry me back to Old Virginny"); "falling weather" for "rainy weather"; "you-all" for a plural "you"; East Texas "gallery" for "porch"; Mid-Western "get shut of" for "get rid of" and "to jin" for "to do odd jobs"; New England's "tonic" for "soft drink"; New York's "stoop" for "porch". Among rapidly disappearing local forms may be cited the picturesque expressions for "small portion" current in the Cumberlands, Great Smokies and Ozarks, respectively: *smidgen*, *canch*, *tiddy-bit*; while "cow" is *cow-beast*, *cow-brute* and *she-cow*. *To lollygag* for "to make love", *bumbershoot* for "umbrella" and *schnicklefritz* for "German" are reported from the Ohio Valley.

2. A few examples of words and expressions for which the average non-American English speaker needs a glossary are: *ballyhoo*, *bell-hop*, *co-ed*, *bughouse*, *slivver*, *flop-house*, *four-flusher*, *go-getter*, *goo* and *goeey*, *hayseed*, *joint*, *lobbying*, *sissey*, *smart Aleck*, *sorehead*, *traffic jam*, *wisecrack*, *wiseguy*; *to be* (two dollars) *shy*, *to bump off*, *to discombobulate*, *to get a line on*, *to get a load of*, *to get next to*, *to get stuck with*, *to get the drop on*, *to gouge*, *to hornswoggle*, *to monkey with*, *to pitch woo*, *to shoot craps*, *to smooch*, *to soak* (somebody), *to spoof*, *to stay put*, *to whoop things up*; *fresh* ("he's a fresh

GREAT BRITAIN

The population of Great Britain, including Scotland, Wales and Northern Ireland, is about 47,000,000. Practically all of these people, to whom may be added Eire's 3,000,000, speak English.³ However, on its far more limited territory, the English of Britain displays far greater local divergences than does the English of America. The English dialects are powerful realities, based on strong features of individual pronunciation, grammar and vocabulary divergence. The following are only a few scattered examples:

The Shetland Islands pronounce "shall" and "should" as *sall* and *soud*. The western part of Scotland has *ba'el* for "battle" and *be'er* for "better". The Braid Scots dialect uses *lippen* for "believe", *aboon* for "above" and *till* for "to". Cornwall has *dafter* for "daughter". In Ulster, the demonstratives "that", "those" appear as *yon*, *thon*; in northern England, "these" and "those" are *thee*, *thir*, and in Wexford "this" or "that" is *thik*; the English Midlands use *chilt*, *ged*, *wod* for "child", "get", "what"; Yorkshire has *hoo* for "she" and *han*, *liven*, *shan* for "have", "live", "shall"; Gloucestershire has *her* for "she" and *thak* for "that", while the southwest of England turns "parlor" into *palder*. The pronunciation of a Yorkshireman is normally totally incomprehensible to the average American. We are somewhat more familiar with the Scottish "burr", the Irish "brogue", and the "Cockney" of London. From the standpoint of syntax, dialectal English occasionally produces a somewhat weird effect. The following signalled conversation between two Brit-

guy"), *hard-boiled*, *no-account*, *ornery*, *pesky*, *rambunctious*, *swelegant*.

3. Celtic speakers (Irish, Welsh and Scots) in the British Isles are normally bilingual, and to a majority of them, English is more familiar than their own Celtic tongues. See p. 446-450 for the Celtic languages of the British Isles.

ish naval officers, both from Somersetshire, as their ships were about to go into action, is reported from the Mediterranean: "I be relying on you". — "Doan 'ee worry; we got them in the bag."

Outside of dialectal forms and intonations, the "King's English" itself will occasionally disturb the American speaker of English. First and foremost, there is the matter of enunciation, which in British English is normally more clipped, incisive and staccato than in its American counterpart, with far more modulation of tone and rise and fall in the pitch of the voice. The pronunciation of individual words and groups of sounds diverges (*laugh, branch, bath, vase*, etc., pronounced in Britain with the *a* of "father"). Note also the British pronunciation of "clerk" (*clark*), "Derby" (*Darby*), "schedule" (*shedule*), "lieutenant" (*leftenant*; but a pronunciation similar to our own prevails for the rank in the British Navy), "figure" (*figger*), etc. Many words are differently stressed (British *nécess'ry, papá, mammá, primarily, témporarily, fináncier*). Many spelling divergences occur (British *labour, favour, honour, connexion, inflexion, gaol, waggon, kerb, programme, jewellery, tyre, grey, cheque*). In grammar, such expressions as "His Majesty's Government *are* in favour of this measure" occasionally come up to make us realize that there is a difference.

Of far greater interest and importance, however, are the numerous semantic⁴ differences between the two chief varieties of English. Most of these have fortunately been codified. Only a few of the most significant and important appear here.⁵

4. *Semantic* — pertaining to the meanings of words.

5. For a fairly complete discussion, cf. H. W. Horwell, *An Anglo-American Interpreter*, Oxford, 1939.

AUSTRALIA

Australia's 7,000,000 people are almost completely of British stock and English speech (the native population is estimated at less than 100,000, and speaks a multitude of imperfectly known Australian languages). In pronunciation, intonation and vocabulary, the English of Australia is distinctive-

ly individual, but comes closer to that of the British Isles than to that of America. An entire series of localisms, mainly of the slang variety, appears. Some of the interesting expressions from the "Land Down Under", recently codified in magazine and newspaper articles, are the following (where possible, the American slang equivalent is given):

<i>American</i>	<i>Australian</i>
frontier, wilderness,	<i>outback, back-blocks, never-never country</i>
bush-hut,	<i>humpy</i>
hobo,	<i>swagman</i>
hobo's bundle,	<i>Waltzing Matilda, bluey</i>
riverbed pool or offshoot,	<i>billabong</i>
food,	<i>tucker</i>
knapsack,	<i>tuckerbag</i>
canned meat,	<i>tinned dog</i>
swimming-suit,	<i>cossie</i>
lamb, sheep,	<i>jumbuck</i>
"rookie",	<i>drogo</i>
inferior,	<i>sprog</i>
"babe", "gal", "dame", "jane",	<i>sheila, cliner, sninny</i>
delectable femininity,	<i>nice bit of skirt</i>
crazy about,	<i>shook on</i>
"to smooch",	<i>to smooge</i>
high-powered lover, "yes- man",	<i>smooger</i>
jilted "jane",	<i>battered bun</i>
party, "blowout".	<i>shivoo</i>
"spread",	<i>beano</i>
wine,	<i>plonk</i>
beer glass,	<i>butcher</i>
drunk, "plastered",	<i>shikkered</i>
in the D. T.'s,	<i>in the rats</i>
speakeasy,	<i>sly grog shop</i>
to go on a spree,	<i>to go on a larrikin</i>

Chinaman’s chance,	<i>Buckley’s chance</i>
Jap,	<i>Nip</i>
Italian, “Wop”,	<i>Dingbat</i>
Englishman,	<i>Pommy</i>
Scotchman,	<i>Geordie</i>
Chinese,	<i>Chow</i>
Anzac,	<i>Digger</i>
New Zealander,	<i>Enzedder</i>

To all of this may be added a wealth of terms which Australia shares with Britain: *bloke* for “guy”, *dinkie* for “cute,” *ta-ta* for “bye-bye” are typical of these.

NEW ZEALAND

Of New Zealand's 1,600,000 inhabitants, less than 100,000 are of native (Maori) stock. Their speech belongs to the Polynesian variety of Malayo-Polynesian. The remaining million and a half are of British stock and English speech. Intonation and pronunciation, while distinctive, are closer to American than to British (*dance, path*, with the *a* of *bat*, not of *father*). The vocabulary often coincides with America's rather than with Britain's (*radio, pack of cigarettes, to mail*, in preference to *wireless, packet, to post*). Localisms generally coincide with those of Australia (*bosker* and *dinkum* for "swell", *cobber* for "side-kick", *wowser* for "blue nose" or "stuffed shirt", *cow* for "lousy", etc.). The following list seems to have originated with New Zealand. Items marked with an asterisk are common to Australia as well, and subsequent research may reveal that this is also true of others of the terms listed:

<i>American</i>	<i>New Zealand</i>
hut,	<i>whare</i>
lost, strayed,	<i>bushed</i>
to go native,	<i>to go back to nature</i>

money,	<i>hoot</i>
to be good at,	<i>to be pie on</i>
good luck!,	<i>kia ora!</i>
G. I., doughboy,	<i>kiwi</i>

SOUTH AFRICA

The South African racial and linguistic situation is not quite so favorable to English as is the case with the other British Dominions. Out of a total of nearly 11,000,000 inhabitants of the Union of South Africa, it is estimated that about 2,500,000 are whites, about equally divided between the descendants of the Dutch-speaking Boers, who still use Afrikaans, and settlers of British origin. Probably a majority of white South Africans are bilingual. Naturally enough, a great many words and expressions have crept into the English of South Africa from Afrikaans, Bantu and other sources. The following "Afrikanerisms" are of interest:

*American**South African*

there is a flood,	<i>the river is down</i>
town-lots,	<i>stands</i>
to steal,	<i>to jump</i>
I. O. U.,	<i>good-for</i>
he threw a rock at me,	<i>he threw me with a rock</i>

to run over,	<i>to tramp</i>
in the house,	<i>by the house</i>
snooper, stool-pigeon,	<i>trap</i>
thief,	<i>goniv</i>
loot,	<i>goniva</i>
G. I., doughboy,	<i>springbok</i>

(of Dutch origin)

American

South African

early dawn,	<i>schimmel day</i>
farmyard,	<i>erf</i>
armed camp,	<i>lager</i>
rascal,	<i>schelm, skelm</i>
to travel,	<i>to trek</i>
gully,	<i>sloot, sluit</i>
land measure,	<i>morgen</i>
depression between hills,	<i>kloof</i>
pound (for animals)	<i>schut, skit</i>

sour milk,	<i>amasi</i>
thanks,	<i>inkosi⁶</i>

6. This Zulu word, meaning "chief", "bestower of benefits", ultimately has become an acknowledgement of a benefit received.

(of Portuguese origin)

nursemaid,	<i>ayah</i>
girl,	<i>nooi</i>
straw hat, .	<i>sambriero</i>

(of Malay origin)

pickles, chutney,	<i>atjar, blatjang</i>
stamp,	<i>tjap, chop</i>
jacket,	<i>baatje</i>
all-leather whip,	<i>sjambok</i>
hut,	<i>pondok, pondhock</i>

CANADA

Of Canada's 12,000,000 people, some 3,000,000 are of French speech, and they are located for the most part in the provinces of Quebec and Ontario. Native American Indian and Eskimo languages account for a little over 100,000 speakers. The remaining population is of English speech, and the brand of English is so close to that of the United States that in a British-compiled dictionary of Canadianisms containing approximately one thousand terms, only some three dozen are found which are not common to both countries (subsequent research may reveal that even a few of these are):

<i>American</i>	<i>Canadian</i>
commercial traveller, drummer,	<i>bagman</i>
gin,	<i>blue ruin</i>
pig,	<i>Cincinnati olive</i>
pig's feet,	<i>Cincinnati oysters</i>
Newfoundland,	<i>Codland</i>
third-class coach,	<i>colonist car</i>
farmer, "hick",	<i>corn-tossle</i>
parson, "sky pilot",	<i>devil-dodger</i>
beer and gin mixed,	<i>dog's nose</i>

church,	<i>doxology works, gospel</i>
	<i>factory</i>
strong whiskey,	<i>forty-rod</i>
spoon, fork,	<i>gob-stick</i>
millionaire,	<i>gold-bug</i>
American flag, "Old Glory",	<i>gridiron</i>

to be under the influence of	
liquor,	
dollar bill,	<i>toadskin</i>
colored man,	<i>unbleached American</i>

ANGLO-INDIAN (HOBSON-JOBSON)⁷

In the course of their long occupation of British India, British soldiers, officials and residents have developed a series

7. The origin of this term used to describe the slang of India is said to be the Muhammadan rallying-cry: *Ya Hassan! Ya Hussein!*

of words and expressions, mostly drawn from the native languages and dialects, a few of which have found their way into the English of other lands; among colloquial expressions claimed to be of Indian origin are: *cheese*, in the expression "he's the big cheese" (the *cheese* represents Hindustani *chīz*, "thing"); *dam* in "I don't give a dam" (the *dām* is an Indian coin); *grass widow*, a term said to have been coined by British officers to designate those military wives who sojourned in the cool, grassy hill-country while their husbands sweltered in the dusty plains. *Betel*, *bungalow*, *mango*, *cheroot*, *pariah*, *curry*, *tiffin* (lunch), *griffin* (newcomer, "greenhorn") are among the words which have passed from native languages or officers' slang into Anglo-Indian, and thence into common English.

Among expressions which have remained local are: *to dumb-cow*, "to browbeat" (Hindustani *dam khānā*, "to eat one's breath", "to be silent", probably crossed with the English "cow"); *to foozilow*, "to flatter"; *to puckerow*, "to lay hold of"; *bahadur*, "stuffed shirt"; *bobachu*, "kitchen"; *mort-de-chien*, "cholera" (despite its French appearance, this comes from Portuguese *mordexim*, borrowed from Marathi *modwashī*); *outcry*, "auction"; *summer-heat*, "hat" (borrowed from Portuguese *sombrero*); *goddess*, "girl", (borrowed from Malay *gādīs*); *gym-khana*, "athletic meet"; *country* in the sense of "local".

Anglo-Indianisms are exceedingly numerous by reason of the fact that they vary from locality to locality, as do the native languages.

ENGLISH AS A COLONIAL, SECONDARY AND CULTURAL LANGUAGE

The total populations of American Western Hemisphere possessions outside of U. S. soil (Alaska, Canal Zone, Puerto Rico, Virgin Islands) amount to over 2,000,000. Approximately the same figure applies to British possessions in the Western Hemisphere outside of Canada and Newfoundland

(Bahamas, Bermudas, British Guiana, British Honduras, Jamaica, Leeward and Windward Islands, etc.).

In Asia, the total populations of British dominions, colonies and dependencies run to about 430,000,000 (Burma, Ceylon, Cyprus, Malaya and Straits Settlements, Hong Kong, British India, Nepal, Bhutan, Palestine, etc.).

British African possessions and Egypt account for some 70,000,000, while in Oceania, exclusive of the white populations of Australia and New Zealand, there is a total of about 3,000,000. In our own Pacific possessions (Guam, Hawaii, Philippines, Samoa, etc.) there is a total population of about 17,000,000

This makes English by far the most widespread of the world's colonial languages, since it affects, by reason of their colonial or semi-colonial status, a total of some 520,000,000 people. How many of these people can actually be reached with English is a matter which varies widely according to locality. A large majority of the 4,000,000 people listed for the Western Hemisphere use English as a primary or secondary language. In Cyprus, Hong Kong and Palestine, the use of English is widespread. In British India, Ceylon, Malaya and Burma, only a small fraction of the native populations has English even as a secondary tongue; but the point has been made that this small fraction includes practically all the people who are instrumental in determining their countries' policies, or who have any degree of international cultural, economic or political standing. The situation in Africa and Oceania is somewhat similar. A larger proportion of the native population in Egypt and the Union of South Africa can be reached with English than is the case in such colonies as Nigeria and Kenya. In our own Pacific possessions the use of English is quite widespread; this is particularly true of Hawaii.

For the use of English as a secondary or cultural language outside of British and American territory, no precise figures are available; but it is probable that English is at least on a

par with French and German. Considerable segments of the more cultured classes in the countries of continental Europe, Latin America and Asia are accessible by means of it.

“PIDGIN” ENGLISH

The word “pidgin” is a Cantonese corruption of the English “business”, and the term seems to have originated in the South China trade ports, where a compromise language between the natives and the English-speaking traders was deemed necessary. Broadly speaking, Pidgin is English adapted to native habits of thought, syntax, and pronunciation; but these are far from the same everywhere, and so, correspondingly, is Pidgin.⁸

Chinese-English Pidgin abounds in picturesque expressions, many of which reflect Chinese syntax as applied to English words; among them are: *all-same*, *blongey* (belong), *catchee* (to have), *chin-chin* (worship), *numpa one first chop* (super-

8. It may be noted that there are not only numerous varieties of Pidgin English, but also Pidgins of other tongues. The most important of these is Pidgin Malay, called by the Dutch *pasar* (or *bazaar*) *Malay*, a compromise form of various Malayo-Polynesian dialects, which extends throughout British Malaya, the Dutch East Indies, and is understood as far as the Philippines. A *petit nègre* (French pidgin) appears in the French West African colonies. Several forms of Portuguese Pidgin are in existence, in Senegambia, São Tomé, Cochim, Diu, Mangalore, etc. A Tagalog-Spanish pidgin appears in the Philippines. The Negro-English of Dutch Guiana, interspersed with Dutch and Portuguese words, also falls under the Pidgin classification, as does a variety of English Pidgin current along the entire West African coast from the Union of South Africa to the Equator. (A few typical expressions from this area are: *Who dat man?* for “Who goes there?”; *to dash* for “to tip somebody”; *chop-chop* for “meal”; and *one-time* for “hurry up”). *Papiamentu* is a picturesque Spanish Pidgin used by the native population of Curaçao, Dutch West Indies. The French Creole of Haiti and Mauritius, the Dutch Creole of Georgetown and the former Danish West Indies, the Portuguese Creole of the Cape Verde Islands, may all be said to some extent to fall under the Pidgin classification.

fine), *chop-chop* (quickly), *bull-chilo* (boy), *cow-chilo* (girl), *dlinkee* (drink), *flower-flag-man* (American), *fo what?* (why), *have got wata top-side* (crazy), *larn-pidgin* (apprentice); *long-side* (with); *one piecee* (one, referring to objects); *one fella* (one, referring to persons); *what side?* (where?); *top-side piecee Heaven-pidgin man* (bishop); *ah say* (Englishman: "I say"); *ah kee* (Portuguese; "aqui", "here").

The Pidgin *par excellence* is the English variety current in the Melanesian Islands (Solomons, Fiji, New Hebrides, etc.). This linguistic form, which has in some localities become fully standardized and has even been reduced to rules of grammar and syntax, has forms fully as picturesque as those of China. A few of these are: *put clothes belong-a table* (set the table); *water he kai-kai him* (the water ate him up; he drowned); *man belong bullamacow him stop* (the butcher is here); *this fellow hat belong you?* (is this your hat?); *what for you kinkenau knife belong me?* (why did you swipe my knife?). A physician sent by the Rockefeller Foundation to the Melanesian Islands to eradicate the hookworm, quotes his own Pidgin description of his employer and mission as he gave it *verbatim* to the natives: "Master belong me him make im altogether kerosene, him make im altogether benzine. Now he old feller. He got im plenty too much belong money. Money belong him allesame dirt. Now he old feller, close up him he die finish. He look about. Him he tink, 'Me like make im one feller something, he good feller belong altogether boy he buy im kerosene blonga me.' Now gubment he talk along master belonga me. Master belonga me him he talk, 'You, you go killim altogether senake (snake) belong bell' (belly) belong boy belong island.' "

From New Guinea come other interesting samples: *cut 'im grass belong head belong me* (cut my hair); *capsize 'im coffee 'long cup* (pour the coffee); *new fellow moon he come up* (it's the first of the month); *skin belong you 'im stink* (you need a bath); *make 'im die machine* (stop the machine); *two clock he go finish, three clock he no come up yet* (it's half

past two); *shoot 'im kaikai* (serve the dinner); *me cross too much along you* (I'm very angry with you). Among quaint and suggestive individual expressions, we find: *time belong lim-limbu* (holiday); *kiranki* (irritable); *cus-cus* (office worker); *dim-dim* (white man); *lap-lap* (calico waistcloth); *make 'im paper* (contract); *clothes-sleep* (pajamas); *long long along drink* (drunk); *machine belong talk* (typewriter); *cow oil* (butter); *turn 'im neck belong 'im* (change one's mind); *handkerchief* (or *pants*) *belong letter* (envelope); *screw belong leg* (knee); *pull pull* (flower).

The Australian blackfellows use a variety of Pidgin that largely coincides with the Melanesian and New Guinea brands, but sometimes contributes its own special expressions: *sing 'im longa dark fella* (mosquito); *paper-yabber longa big fella hawk* (air-mail); *kill 'im stink fella* (disinfectant); *think fella too much* (intellectual); *eat 'im wind cart* (automobile); *big fella fire snake* (train); *big fella talk talk watch 'im that one* (high-pressure salesman).

Beche la Mer, or "Sandalwood English", is the form taken by Pidgin in the southern islands of Polynesia (Samoa, Tahiti, etc.). The addition of *-um* to verbs is characteristic (*eatum, callum, catchum*). So are expressions such as: *water belong stink* (perfume); *apple belong stink* (onion); *'im fellow coconut 'im bad* (he has a headache); *belly belong me walk about too much* (I have a stomach-ache).

One of the favorite processes of Pidgin is that of repetition to express intensity or thoroughness: *you go go go* (keep on going); *bamboo belong look-look* (spyglass); *wash-wash* (to bathe, in contradistinction to *wash*); *talk-talk* (long palaver, as against mere *talk*). This is reminiscent of what goes on in many more cultured tongues (Italian *gli ho parlato piano piano*, "I spoke to him very softly"; *un uomo alto alto*, "a very tall man").

Other curious parallels appear: *me-fellow, you-fellow, 'em-all* ("we", "you" plural, "they"; cf. Southern *you-all*, French *nous autres*, Spanish *vosotros*, etc.); *how much clock?*

(“what time is it?”; cf. German *wie viel Uhr?*); the Pidgin use of *bel’* (*belly*) to denote the seat of the emotions corresponds to the ancient Greek belief that the stomach was the place where emotions were born and bred; while the use of *bone* to indicate courage (*’im got plenty bone*), or the lack of it (*bone belong ’im allesame water*, “he’s scared to death”), has a curious correspondence in our own use of *backbone* and *spineless*, as well as in slang *tough guy*.

The Islands, moreover, have received contributions to their Pidgin from non-English sources. A Frenchman is variously described as *man-a-wiwi* (man of “oui, oui”), *montour* (“bonjour”), *montwar* (“bonsoir”); in Java, he is known as *orang deedong* (*orang* is Malay for “man”, and *deedong* is the French *dites donc*). Local variations of Pidgin include such different forms as *kai-kai*, *chow-chow*, *kau-kau*, *fu-fu*, used on different islands with the meaning of “to eat”.

Hawaii supplies us with what may be described as our own American variety of Pidgin. The Hawaiian language does not permit two consonants to follow each other unless a vowel intervenes, and many consonants, including b, d, f, g, j, r, s, t, v, do not appear in the language. The result is that when a Hawaiian attempts to say “Merry Christmas!” his rendition is *Mele Kalikimaka*. The names of the months, all of which are borrowed from English, appear as follows: *Ianuali*, *Pepeluai*, *Malaki*, *Apelila*, *Mei*, *Iune*, *Iulae*, *Aukake*, *Kemakemapa*, *Okakopa*, *Nowemapa*, *Kekemapa*. Among native words and expressions that have crept into the English of American residents are the following:

how are you?,	<i>pehea oe?</i>
clever, smart,	<i>akamai</i>
beautiful,	<i>nani</i>
old-timer,	<i>kamaaina</i>
angry,	<i>huhu</i>
greenhorn,	<i>malihini</i>
trouble,	<i>pilikia</i>
woman,	<i>wahini</i>

man,	<i>kane</i>
come in and eat!,	<i>hele mai e ai!</i>

food,	<i>kaukau</i>
stomach,	<i>opu</i>
boy,	<i>keikikane</i>
hat,	<i>papale</i>
quick,	<i>wikiwiki</i>

IMMIGRANT DIALECTS

These partake of the nature of Pidgin, since they represent a compromise between two languages. The infiltration of words generally runs, however, from English to the immigrant's native tongue, which in the course of time becomes honey-combed with English words and expressions. A few infiltrations run the other way,⁹ but they are comparatively insignificant. With the restriction of immigration, the immigrant dialects of the United States are in the process of extinction, since they are for the most part a first-generation phenomenon. Similar unstable immigrant dialects appear in other countries to which large numbers of immigrants have gone in the past (South America, particularly Argentina; France, etc.).

9. *Kibitzer, hamburger, frankfurter, spiel, hoosegow, pickaninny, spaghetti, broccoli* are a few examples. The infiltrations lead even to the coining of new words, as when English *talk* or *gab* is combined with German *Fest*, or English *tender* with the suffix of Italian *maccheroni*, already anglicized to *macaroni (tenderoni)*.

THE SCANDINAVIAN TONGUES DANISH, NORWEGIAN,¹⁰ SWEDISH, ICELANDIC

General Characteristics.

While the close relationship among these three languages is evident, considerable divergences appear between Icelandic, which is extremely archaic and conservative of ancient speech-forms, and the other three. To cite a few examples:

1. In the matter of gender, Swedish, Danish and Norwegian combine masculine, feminine and common nouns into a single "gender" form, which is opposed to "neuter" nouns;¹¹ Icelandic preserves the three grammatical genders, masculine, feminine and neuter, and these fall into distinct declensional schemes, with appropriate endings.

2. In the matter of declension, Swedish, Danish and Norwegian have no true declensional scheme, save for the addition of *-s* for the possessive and of a plural ending (*-or*, *-ar*, *-er*, *-n* in Swedish; *-r*, *-er*, *-e* in Dano-Norwegian; with or without "umlaut")¹²; Icelandic has a full-fledged declensional

10. Danish was at one time the official and literary language of Norway; but popular spoken Norwegian (Landsmål) diverged considerably. The present day literary Norwegian language is largely a compromise between the former official Danish and the popular spoken tongue.

11. The distinction is based mainly on natural gender; but the "gender" class may include animals and things, such as "fish" or "book", while the "neuter" class sometimes includes persons and animals, such as "child" and "sheep". Modern Norwegian has re-established a separate feminine form, which had always been in popular use.

12. By "umlaut" is meant a change in the vowel of the root, such as appears in Eng. *mouse*, *mice*, or in German *Hand*, *Hände*, or in Swed. *son*, *söner* (son, sons), or in Danish *Fod*, *Födder* (foot, feet), or in Icelandic *hjarta*, *hjórtu* (heart, hearts). The umlaut change is said to be caused by the influence of a following front vowel, belonging to an inflectional ending or some other suffix (this vowel often disappears after causing the change of the root-vowel, as has occurred in Eng. *foot*, *feet*); it is also described as a phenomenon of "anticipation", whereby the vocal organs begin to prepare themselves for the

system, with four cases (nominative, genitive, dative, accusative) and separate endings; compare:

Swedish: *dag*, "day"; possessive *dags*; plural *dagar* ; possessive pl. *dagars* ; Danish: *Dag*; possessive *Dags*; plural *Dage*; possessive pl. *Dages*;

Icelandic:	Singular	Plural
Nominative	<i>dagur</i>	<i> dagar </i>
Genitive	<i>dags</i>	<i> daga </i>
Dative	<i>degi</i>	<i>dögum</i>
Accusative	<i>dag</i>	<i>daga</i>

On the other hand, all the Scandinavian languages agree in having a *suffixed* definite article, which in Swedish, Danish and Norwegian is *-en* (or *-n*) for "gender" nouns, *-et* (or *-t*) for "neuter" nouns in the singular; in the plural, *-ena* (or *-na*) in Swedish, *-ene* (or *-ne*) in Danish and Norwegian (e. g., Swed. *stol*, "chair"; *stolen*, "the chair"; *bord*, "table", *bordet*, "the table"). Icelandic has a *fully inflected* definite article, which is added on to the *fully inflected* noun; e. g.:

	Singular
Nominative	<i>heimur-inn</i> , "the world"
Genitive	<i>heims-ins</i> , "of the world"
Dative	<i>heimi-num</i> , "to the world"
Accusative	<i>heim-inn</i> , "the world" (obj.)
	Plural
Nominative	<i>heimar-nir</i> , "the worlds"
Genitive	<i>heima-nna</i> , "of the worlds"
Dative	<i>heimu-num</i> , "to the worlds"
Accusative	<i>heima-na</i> , "the worlds" (obj.)

Another general characteristic of the Scandinavian languages is a passive voice formed by changing the *-r* of the active

sound of the vowel of the ending while they are still engaged in pronouncing the vowel of the root.

to *-s* (*-st* in Icelandic): Swed. *jag kallar*, "I call"; *jag kallas*, "I am called"; Danish *jeg kalder*, "I call"; *jeg kaldes*, "I am called"; Icel. *elskar*, "he loves"; *elskast*, "he is loved".

Accentuation generally on the initial syllable (save in borrowed words and in verbs compounded with a prefixed preposition; but in Icelandic even the latter are stressed on the first syllable), and "strong" and "weak" verbs (as in Eng. *break, broke, broken* vs. *love, loved, loved*), being common to all the Germanic tongues, are also characteristic of the Scandinavian group.

Other points of similarity and divergence will be noted in the discussion of the individual languages. Some idea of the resemblances and differences among these tongues, and of their relationship to other Germanic languages, may be noted from the following list:

English	Dutch	German	Dano-Nor. ¹		
friend	<i>vriend</i>	<i>Freund</i>	<i>Ven (venn)</i>	<i>vän</i>	<i>vinur</i>
dog	<i>hond</i>	<i>Hund</i>	<i>Hund</i>	<i>hund</i>	<i>hundur</i>
girl	<i>meisje</i>	<i>Mädchen</i>	<i>Pige (pike)</i>	<i>flicka</i>	<i>stúlka</i>
mother	<i>moeder</i>	<i>Mutter</i>	<i>Moder (mor)</i>	<i>moder (mor)</i>	<i>módir</i>
father	<i>vader</i>	<i>Vater</i>	<i>Fader (far)</i>	<i>fader (far)</i>	<i>faðir</i>
daughter	<i>dochter</i>	<i>Tochter</i>	<i>Datter</i>	<i>dotter</i>	<i>dóttir</i>
foot	<i>voet</i>	<i>Fuss</i>	<i>Fod (fot)</i>	<i>fot</i>	<i>fótur</i>
night	<i>nacht</i>	<i>Nacht</i>	<i>Nat (natt)</i>	<i>natt</i>	<i>nótt</i>
cold	<i>koud</i>	<i>kalt</i>	<i>kold (kald)</i>	<i>kall</i>	<i>kaldur</i>
large	<i>groot</i>	<i>gross</i>	<i>stor</i>	<i>stor</i>	<i>stór</i>
good	<i>goed</i>	<i>gut</i>	<i>god</i>	<i>god</i>	<i>góður</i>
break	<i>breken</i>	<i>brechen</i>	<i>bryde (bryte)</i>	<i>bryta</i>	<i>brjóta</i>
find	<i>vinden</i>	<i>finden</i>	<i>finde (finne)</i>	<i>finna</i>	<i>finna</i>
run	<i>loopen</i>	<i>laufen</i>	<i>löbe (löpe)</i>	<i>springa, löpa</i>	<i>hlaupa</i>
fall	<i>vallen</i>	<i>fallen</i>	<i>falde (falle)</i>	<i>falla</i>	<i>falla</i>
die	<i>sterven</i>	<i>sterben</i>	<i>dö</i>	<i>dö</i>	<i>deyja</i>
one	<i>een</i>	<i>ein</i>	<i>een (en)</i>	<i>en</i>	<i>einn</i>
two	<i>twee</i>	<i>zwei</i>	<i>to</i>	<i>två</i>	<i>tveir</i>
three	<i>drie</i>	<i>drei</i>	<i>tre</i>	<i>tre</i>	<i>þrír</i>
four	<i>vier</i>	<i>vier</i>	<i>fire</i>	<i>fyra</i>	<i>fjórir</i>
five	<i>vijf</i>	<i>fünf</i>	<i>fem</i>	<i>fem</i>	<i>fimm</i>
six	<i>zes</i>	<i>sechs</i>	<i>sex (seks)</i>	<i>sex</i>	<i>sex</i>
seven	<i>zeven</i>	<i>sieben</i>	<i>syv (sju)</i>	<i>sju</i>	<i>sjö</i>
eight	<i>acht</i>	<i>acht</i>	<i>otte (ätte)</i>	<i>átta</i>	<i>átta</i>
nine	<i>negen</i>	<i>neun</i>	<i>ni</i>	<i>nio</i>	<i>níu</i>
ten	<i>tien</i>	<i>zehn</i>	<i>ti</i>	<i>tio</i>	<i>tíu</i>
eleven	<i>elf</i>	<i>elf</i>	<i>elleve</i>	<i>elva</i>	<i>ellefu</i>
twelve	<i>twalf</i>	<i>zwölf</i>	<i>tolv</i>	<i>tolv</i>	<i>tólf</i>
thirteen	<i>dertien</i>	<i>dreizehn</i>	<i>tretten</i>	<i>tretton</i>	<i>þrettán</i>
twenty	<i>twintig</i>	<i>zwanzig</i>	<i>tyve (tjue)</i>	<i>tjugo</i>	<i>tuttugu</i>
hundred	<i>honderd</i>	<i>hundert</i>	<i>hundrede</i> (<i>hundre</i>)	<i>hundra</i>	<i>hundrað</i>
thousand	<i>duizend</i>	<i>tausend</i>	<i>tusind</i> (<i>tusen</i>)	<i>tusen</i>	<i>þúsund</i>

13. The Norwegian form appears in parentheses only where it diverges from the Danish.

SWEDISH

ALPHABETIC NOTATION — as in English, but with the following added symbols: å (= hope or oho); ä (= care or bet); ö (= French eu or German ö, long or short):

Notes on Sounds.

All Swedish vowels, including å, ä, ö, may be long (especially in stressed, open syllables) or short; o often = stool or wood; u often = French nuit.

Swedish y = French u, long or short.

g before e, i, y, ä, ö, and gj in all positions = Eng. y (*göra*, “do”, pronounced “yöra”; *gjort*, “done”, pron. “yurt”).

h is silent before j (*hjul*, “wheel”, pron. “yul”).

j = Eng. y.

k before e, i, y, ä, ö, and kj in all positions = t + German *ich* (*köpa*, “buy”, pron. tchöpa”; *kjol*, “skirt”, pron. “tchul”).

r is trilled.

sk before e, i, y, ä, ö, and sj, skj, stj in all positions = Eng. sh (*skön*, “beautiful”, pron. “shön”; *sju*, “seven”, pron. “shu”; *skjuta*, “shoot”, pron. “shuta”).

w appears only in proper names, where it is pronounced as v.

z = Eng. so.

ACCENTUATION — The stress is normally on the first syllable of the word, but in words of more than one syllable there is also a musical “pitch”, with complicated rules; e. g., *flicka*,

“girl”, is pronounced *fli* ^{*cka.*} *i*

GRAMMATICAL SURVEY

Articles.

Indefinite (Eng. “a”, “an”) - *en* for “gender” nouns (masc., fem., common); *ett* for “neuter” nouns: *en gosse*, “a boy”; *en flicka*, “a girl”; *en stol*, “a chair”; *ett barn*, “a child”; *ett brev*, “a letter”.

Definite (Eng. “the”) - add *-en* (or *-n*) for singular gender

nouns; *-et* (or *-t*) for singular neuter nouns; *-na* (*-a*, *-ena*, *-en*) for plural nouns:

stolen (stol-en), "the chair"; *gossen* (gosse-n), "the boy"; *flickan* (flicka-n), "the girl"; *barnet* (barn-et), "the child"; *arbetet* (arbete-t), "the work"; *stolarna* (stolar-na), "the chairs"; *flickorna* (flickor-na), "the girls".

If an adjective precedes the noun, use the "prepositive" form of the definite article (*den*, *det*, pl. *de*) before the adjective, as well as the suffixed article after the noun: *den dåliga gossen*, "the bad boy"; *det snälla barnet*, "the good child".

Nouns.

The plural is formed generally by the addition of *-or*, *-ar*, *-er*, or *-r*.¹⁴ To this ending, *-na* is generally added to supply the article: *flicka*, "girl"; *flickan*, "the girl"; *flickor*, "girls"; *flickorna*, "the girls"; *gosse*, "boy"; *gossen*, "the boy"; *gossar*, "boys"; *gossarna*, "the boys".

The possessive case is formed by adding *-s* (no apostrophe) to the nouns, singular or plural: *gossens syster*, "the boy's sister"; *flickornas moder*, "the girls' mother".

Adjectives.

The adjective normally precedes the noun it modifies. When the definite article is *not* used, or when the adjective is a *predicate* adjective (i. e., follows the verb "to be"), it takes the following endings:

	Singular	Plural
"Gender"	-	-a
"Neuter"	-t	-a

en varm dag, "a warm day"; *ett stort* (stor-t) *bord*, "a big table"; *varma dagar*, "warm days"; *stora bord*, "big tables"; *dagen är varm*, "the day is warm"; *dagarna äro varma*, "the days are warm".

14. Neuter nouns ending in consonants and some gender nouns take no ending in the plural; *bord*, "table"; *bord*, "tables"; the suffixed article for these nouns is *-en* in the plural: *bordet*, "the table"; *borden*, "the tables". A very limited number of nouns take *-n*.

When the noun has the definite article, the prepositive form of the article is also used before the adjective, and the adjective has an invariable form ending in *-a*:

den varma dagen, "the warm day"; *de varma dagarna*, "the warm days".

The neuter form of the adjective, ending in *-t*, usually serves also as an adverb: *dålig*, "bad", *dåligt*, "badly".

The comparative and superlative are generally formed by adding *-are* and *-ast*, respectively: *rik*, "rich"; *rikare*, "richer"; *rikast*, "richest"; *mera*, "more", and *mest*, "most", are also used: *älskad*, "beloved"; *mera älskad*, "more beloved"; *mest älskad*, "most beloved".

Pronouns.

Personal:

<i>jag</i> , "I"	<i>mig</i> , "me"
<i>du</i> , "you" (sub.) ¹⁵	<i>dig</i> , "you" (obj.) ¹⁵
<i>han</i> , "he"	<i>honom</i> , "him"
<i>hon</i> , "she"	<i>henne</i> , "her"
<i>den, det</i> , "it" ¹⁶	
<i>vi</i> , "we"	<i>oss</i> , "us"
<i>ni</i> , "you" (sub. pl.) ¹⁵	<i>er</i> , "you" (obj. pl.)
<i>de</i> , "they"	<i>dem</i> , "them"

Possessive:

Gender Sg. Neuter Sg. Plural Meaning

<i>min</i>	<i>mitt</i>	<i>mina</i>	"my"
<i>din</i>	<i>ditt</i>	<i>dina</i>	"your" (familiar sg.)
<i>hans</i>	<i>hans</i>	<i>hans</i>	"his", "of him"
<i>hennes</i>	<i>hennes</i>	<i>hennes</i>	"her", "hers", "of her"

15. The plural forms *Ni*, *Er* replace the singular *du*, *dig* in polite conversation. They may or may not be capitalized.

16. Use *den* for singular "gender" nouns referring to inanimate objects, *det* for singular neuter nouns; as in Eng., there is no distinction between subject and object "it".

<i>dess</i>	<i>dess</i>	<i>dess</i>	“its”
<i>vår</i>	<i>vårt</i>	<i>våra</i>	“our”
<i>er</i> (<i>Eder</i>)	<i>ert</i> (<i>Edert</i>)	<i>era</i> (<i>Edra</i>)	“your”, plur. and polite sing.
<i>deras</i>	<i>deras</i>	<i>deras</i>	“their”, “of them”
<i>sin</i>	<i>sitt</i>	<i>sina</i>	“his”, “her”, “their” ¹⁷

Demonstrative:

denna (or *den här*), “this” (with gender nouns); *detta* (or *det här*), with neuter nouns.

dessa (or *de här*), “these”.

den (or *den där*), “that” (with gender nouns); *det* (or *det där*), with neuters.

de (or *de där*), “those”.

Relative and Interrogative.

som, “who”, “which”, “that”

vars, “whose”, “of which”

vad, “what”, “that”

vem?, “who?”, “whom?”

vems?, *vilkas?*, “whose?”, “of whom?”

vad?, “what?”

vilken?, (neuter *vilket?*, plural

vilka?), “which?”

Verbs.

“to be”-Present: *jag, du* (*Ni*), *han är*, “I, you, he” “am, are, is”.
vi, ni, de äro, “we, you, they are”.

Past: *jag, du* (*Ni*), *han var*, “I, you, he” “was, were”.
vi, ni, de voro, “we, you, they were”.

“to have” -Present: *jag, du* (*Ni*), *han har*, “I, you, he had”.
vi, ni, de ha, “we, you, they had”.

Past: *jag, du, han, vi, ni, de hade*, “I, you, he,
we, you, they had”.

17. These forms appear only when the possessor is the subject of the clause, but cannot be used to modify the subject: *hennes far har gått ut*, “her father has gone out”; *hon har sett sin far*, “she has seen her (own) father”; *hon träffade hennes far*, “she met her (someone else’s) father”.

The negative is expressed by using *inte* (or *icke*) after the simple verb (*jag har inte*, "I have not"; *jag talar icke*, "I do not speak"); or after "to have" in a compound tense (*jag har icke talat*, "I have not spoken").

For the interrogative form, invert subject and verb: *har jag?*, "have I?"; "do I have?"; "am I having?".

The infinitive usually ends in *-a*; "to" is expressed by *att*: *att tala*, "to speak"; *att resa*, "to travel".

The present indicative singular usually ends in *-ar* or *-er*; the plural in *-a*: *jag, du, han talar, reser*, "I, you, he speak(s), travel(s)"; *vi, ni, de tala, resa*, "we, you, they speak, travel". The use of the singular form of the verb with plural subject pronouns is frequent in the spoken tongue.

The past indicative usually ends in *-ade, -de, or -te*:¹⁸ *jag, du, han, vi, ni, de talade, hörde, reste*, "I, you, he, we, you, they spoke, heard, travelled".

The supine (roughly corresponding to Eng. past participle) usually ends in *-at, -t, -tt*:¹⁹ *talat, rest, sett*, "spoken", "travelled", "seen".

Compound tenses are formed, as in Eng., by combining "to have" with the supine: *jag har talat*, "I have spoken"; *jag hade talat*, "I had spoken".

The future is formed by using *komma att* or *skola* followed by the infinitive: *jag kommer att tala*, or *jag skall tala*, "I shall speak"; *vi komma att resa*, or *vi skola resa*, "we shall travel".

18. As in all Germanic languages, many verbs have a "strong" past; this means that instead of adding an ending, they change the vowel of the root; note Eng. *take, took*; *write, wrote*; *hold, held*; and compare the Swedish equivalents: *taga, tog*; *skriva, skrev*; *hålla, höll*.

19. The supine of "strong" verbs usually ends in *-it*: *tagit, skrivit, hållit*, "taken", "written", "held"; such verbs, however, also have a past participle ending in *-en* (neuter *-et*; plural *-na*): *tagen, skriven, hållen*; the supine, which is invariable, is mainly used to form compound tenses with *att ha*, "to have"; the past participle, which is declined and agrees with the subject, is mainly used with *att bliva*, "to become", to form the passive.

The imperative ends in *-a*, or has no ending: *tala!*, "speak!"; *hör!* "listen!"; *låt oss tala*, "let us speak".

To form the passive, add *-s* to active forms, dropping the *-r* of the present: *jag kallar*, "I call"; *jag kallas*, "I am called"; *jag kallade*, "I called"; *jag kallades*, "I was called"; *jag kommer att kalla*, "I shall call"; *jag kommer att kallas*, "I shall be called".

The passive may also be formed by using *att bliva*, "to become", with the past participle, which agrees with the subject: *gossen blir funnen*, "the boy is found"; *barnet blev funnet*, "the child was found".

Man with the active is often used in a passive sense: *man talar svenska* (or *svenska talas*), "Swedish is spoken".

"By" with the passive is expressed by *av*: *saken ordnas nu av honom*, "the matter is now being arranged by him".

DANISH AND NORWEGIAN

ALPHABETIC NOTATION — as in Swedish, but with the following divergences:²⁰ aa corresponds to Swedish å; æ corresponds to Swed. ä; both ö and ø correspond to Swed. ö.

SOUNDS

For the vowels, cf. Swedish (p. 92). There are, however, numerous minor variations.

Among consonant groups, gj is generally pronounced as a hard g by the Danes, but as y (as it is in Swedish), by the Norwegians.

In the groups eg, egl, egn, the eg is usually pronounced ai.

skj = sk, not sh, in Danish (but = sh in Norwegian). Danish often drops the j even in writing (Danish *skælde*, “to scold”, Nor. *skjelle*, pron. *shelle*).

kj usually = k, in Danish (but like German *ich* in Norwegian).

sj = sh, as in Swedish.

The musical pitch of Swedish appears also in Dano-Norwegian, to a greater extent in Norwegian than in Danish, where it has practically disappeared, save dialectally.

GRAMMATICAL SURVEY

Nouns and Articles.

The gender system and the articles are generally as in Swedish. Indefinite article - *en* for “gender” nouns; *et* for “neuter” nouns: *en Pige*,²¹ “a girl”; *et Bord*, “a table”.

20. Modern Norwegian regularly uses å, æ, ø, though aa and ö may be found in earlier writings. Danish capitalizes common nouns, and is more prone than Norwegian to use Gothic instead of Roman script.

21. Forms given as examples are in Danish orthography. Norwegian does not capitalize nouns; *en Pige* would appear in Nor. as *en pike*, *Flaade* as *flåte*, *Tand* as *tann*, *Stole* as *stoler*, etc.

Definite article (suffixed) - *-en* (*-n*) for "gender"; *-et* (*-t*) for "neuter" nouns; *-ne* (*-ene*) for plural nouns: *Stolen*, "the chair"; *Stolene*, "the chairs"; *Brevet*, "the letter"; *Breve*, "the letters".

The plural is formed by the addition of *-r*, *-er*, *-e* (with or without umlaut), or by leaving the singular form unchanged: *Flaade*,²¹ "fleet"; *Flaader*, "fleets"; *Flaaden*, "the fleet"; *Flaaderne*, "the fleets"; *Stol*, "chair"; *Stole*, "chairs"; *Stolen*, "the chair"; *Stolene*, "the chairs"; *Tand*,²¹ "tooth"; *Tænder*, "teeth"; *Tanden*, "the tooth"; *Tænderne*, "the teeth"; *Ord*, "word"; *Ord*, "words"; *Ordet*, "the word"; *Ordene*, "the words".

The possessive is formed, as in Swedish, by adding *-s*: *Hus*, "house", *Huset*, "the house"; *Husets*, "the house's"; *Husene*, "the houses"; *Husenes*, "of the houses" (Norwegian often dispenses with the possessive, replacing it by a preposition: *taket på huset*, "the roof of the house", rather than *husets tak*, "the house's roof").

Adjectives

Generally as in Swedish. When the article is not used, or when the adjective is a predicate adjective, the endings are:

	Singular	Plural
Gender	-	-e
Neuter	-t	-e

en lang Dag, "a long day"; *et langt Bord*, "a long table"; *lange Dage*, "long days"; *lange Borde*, "long tables".

When the modified noun is to be used with the definite article, the prepositive form of the article (*den*, *det*, *de*) is used before the adjective, which is then invariable and ends in *-e*. In these cases, Danish prefers to omit the suffixed article, while Norwegian prefers the Swedish custom of using a double article: Danish *den store Mand*; Norwegian *den store mannen*, "the big man".

Comparative and superlative are usually formed by the addition of *-ere* (*-re*) and *-est* (*-st*): *sød*, "sweet"; *sødere*,

The supine ends in *-et*: *elsket*, "loved".

Compound tenses are formed by using "to have" with the supine: *jeg har elsket*, "I have loved"; *jeg havde elsket*, "I had loved".

The future is formed by using *skal* (plural *skal* or *skulle*) or *vil* (plural *vil* or *ville*) with the infinitive: *jeg skal elske*, or *jeg vil elske*, "I shall love"

The imperative usually has no ending in the singular: *tal!*, "speak!"

The passive adds *-s* or *-es* to active forms, dropping *-r* of the present: *jeg kaldes*, "I am called"; *jeg kaldedes*, "I was called"; *der skrives meget i vor Tid*, "much is written in our time".

Or it may be formed by using *bliver* (N. *blir*; past *blev*), or *være* ("to be"), with the past participle: *jeg bliver elsket*, *jeg er elsket*, "I am loved". "By" is expressed by *af*: *Brevet blev sendt af Soldaten*, "the letter was sent by the soldier".

IDENTIFICATION OF SWEDISH, DANISH AND NORWEGIAN

Swedish is more apt to use å, ä, ö; Danish aa, æ, ø; a mixture of the two series of symbols (å, æ, ø) usually indicates a Norwegian written document.

Swedish often uses *-a* endings where Danish and Norwegian use *-e*; this is particularly the case with the plural of nouns and adjectives, and in many verb-forms; Swedish and Norwegian often use final double consonants which in Danish regularly appear as single consonants.

Musical patterns distinguishing otherwise identical words are found in Swedish and, to a lesser degree, in Norwegian, but not in Danish, which uses a glottal stop instead.

Note the different written form of these extremely common words, with Swedish and Norwegian using a final double consonant where Danish uses a single:

English	Swedish	Danish	Norwegian (where it diverges from Danish)
and	<i>och</i>	<i>og</i>	
a (neuter)	<i>ett</i>	<i>et</i>	<i>ett</i>
not	<i>icke</i>	<i>ikke</i>	
I	<i>jag</i>	<i>jeg</i>	
	<i>av</i>	<i>af</i>	<i>av</i>
up	<i>upp</i>	<i>op</i>	<i>opp</i>
to	<i>till</i>	<i>til</i>	
to	<i>att</i>	<i>at</i>	<i>å</i>

your health!	<i>skål!</i>	<i>skål!</i>

ICELANDIC

ALPHABETIC NOTATION — as in English, but *c*, *q*, *w* do not appear in native words. Additional symbols: *á*, *é*, *í*, *ó*, *ú*, *ý*, *æ*, *ö*, *ð*, *þ*.

SOUNDS.

Vowels bearing the accent mark are often long, or pronounced as diphthongs (e. g., *á* = Eng. *cow*). Vowels not bearing the accent mark may be long or short.

Long *é* = *yes* (it is often spelled *je*: *mér* or *mjer*).

Short *u* = (approximately) French *feu*; long *ú* = Eng. *moon*.

Y, *ý* = Eng. *pín*, *machine*, not French *u*, as in Swedish.

æ = *five*; *ö* as in German.

ð = Eng. *bathe*; *þ* = Eng. *thin*.

g after a vowel and before *i* or *j* = Eng. *y* (*kragi*, “collar”, pronounced “krayi”).

g at the beginning of a word and followed by *e* or *i* = *gy* (*gefa*, “to give”, pronounced “gyefa”).

j = Eng. *y*.

r is trilled.

z = Eng. *son*.

A noteworthy feature of Icelandic pronunciation is the “interrupted” vowel; before *kk*, *pp*, *tt*, *kl*, *kn*, vowels are followed by an *h*-sound (*rjetta*, “to hand”, pronounced “ryeh-ta”; *uppi*, “up”, pron. “uh-pi”).

GRAMMATICAL SURVEY

Articles and Nouns.

No indefinite article is used: *bátur*, “boat”, “a boat”.

The definite article is fully declined, whether it precedes or is suffixed to the noun. The latter is also fully declined. The four cases are: nominative, genitive, dative, accusative. Masculine, feminine and neuter gender appears. For the declension of a noun with suffixed article, cf. p. 89. The full declension of the prefixed article used if an adjective precedes the noun, is as follows:

	Singular			Plural		
	Masc.	Fem.	Neut.	Masc.	Fem.	Neuter
Nom.	<i>hinn</i>	<i>hin</i>	<i>hið</i>	<i>hinir</i>	<i>hinar</i>	<i>hin</i>
Gen.	<i>hins</i>	<i>hinnar</i>	<i>hins</i>	<i>hinna</i>	<i>hinna</i>	<i>hinna</i>
Dat.	<i>hinum</i>	<i>hinni</i>	<i>hinu</i>	<i>hinum</i>	<i>hinum</i>	<i>hinum</i>
Acc.	<i>hunn</i>	<i>hina</i>	<i>hið</i>	<i>hinu</i>	<i>hinar</i>	<i>hin</i>

If the article is suffixed, its initial *h*- invariably drops out; also the *i* if the noun ends in a vowel, or after the *-r* of a nominative or accusative plural. The article is prefixed when an adjective stands before the noun, suffixed otherwise: *faðir*, "father"; *faðirinn*, "the father"; *hinn ríki faðir*, "the rich father".

Nouns of the three genders fall into various declensional schemes, of which the following are typical (the endings are given in the following order: Singular: nom., gen., dat., acc.; Plural: nom., gen., dat., acc.):

Generally for nouns ending in vowels:

Masculine: *tími*, "time" - *tím-i*, *-a*, *-a*, *-a*; *tím-ar*, *-a*, *-um*, *-a*;

Feminine: *tunga*, "tongue" - *tung-a*, *-u*, *-u*, *-u*; *tung-ur*, *-na*, *-um*, *-ur*;

Neuter: *auga*, "eye" - *aug-a*, *-a*, *-a*, *-a*; *aug-u*, *-na*, *-um*, *-u*.

Generally for nouns ending in consonants:

Masculine: *heimur*, "world" - *heim-ur*, *-s*, *-i*, *-;*; *heim-ar*, *-a*, *-um*, *-a* (but many such nouns have *-ar* in the genitive singular, *-ir* or *-ur* in the nominative plural);

Feminine: *tíð*, "time" - *tíð*, *-ar*, *-;*, *-;*; *tíð-ir*, *-a*, *-um*, *-ir* (many have *-ar* or *-ur* in the nominative plural);

Neuter: *skip*, "ship" - *skip*, *-s*, *-i*, *-;*; *skip*, *-a*, *-um*, *-;*.

There are numerous deviations from these schemes.

Adjectives.

These normally precede and agree with the noun they modify. They have a "strong" and a "weak" declension, according as they are used without or with the article. The "strong" declension employs different series of endings somewhat akin to those of the nouns, while the weak, which is more commonly used, generally follows this scheme:

	Singular			Plural
	Mas.	Fem.	Neut.	
Nom.	-i	-a	-a	
Gen.	-a	-u	-a	
Dat.	-a	-u	-a	-u for all genders and
Acc.	-a	-u	-a	cases.

The comparative is formed by the addition of *-ri* or *-ari* (*-ra* or *-ara* in the neuter singular); the superlative by the addition of *-stur* or *-astur*, feminine *-st* or *-ust*, neuter *-st* or *-ast*; *ríkur*, “rich”; *ríkari* (neuter singular *ríkara*), “richer”; *ríkastur* (fem. *ríkust*, neut. *ríkast*; fully declined, with a “strong” and a “weak” scheme), “richest”.

The adverb usually ends in *-a*: *víður*, “wide”, *víða*, “widely”.

Pronouns.

Personal.

	First Person			Second Person		
	Singular	Dual ²⁵	Plural	Singular	Dual	Plural
Nom.	<i>ieg</i>	<i>við</i>	<i>vjer</i>	<i>þú</i>	<i>þið</i>	<i>þjer</i>
Gen.	<i>mín</i>	<i>okkar</i>	<i>vor</i>	<i>þín</i>	<i>ykkar</i>	<i>yður</i>
Dat.	<i>mjer</i>	<i>okkur</i>	<i>oss</i>	<i>þjer</i>	<i>ykkur</i>	<i>yður</i>
Acc.	<i>mig</i>	<i>okkur</i>	<i>oss</i>	<i>þig</i>	<i>ykkur</i>	<i>yður</i>

Third Person

	Masc.	Fem.	Neuter	Masc.	Fem.	Neuter
	Singular			Plural		
Nom.	<i>hann</i>	<i>hún</i>	<i>það</i>	<i>þeir</i>	<i>þær</i>	<i>þau</i>
Gen.	<i>hans</i>	<i>hennar</i>	<i>þess</i>	<i>þeirra</i>	<i>þeirra</i>	<i>þeirra</i>
Dat.	<i>honum</i>	<i>henni</i>	<i> því </i>	<i>þeim</i>	<i>þeim</i>	<i>þeim</i>
Acc.	<i>hann</i>	<i>hana</i>	<i>það</i>	<i>þá</i>	<i>þær</i>	<i>þau</i>

25. The “dual” number refers to two: “we two”, “you two”.

Possessive.

<i>minn</i> , ²⁶ "my", "mine"	<i>okkar</i> , "our", "ours"
<i>þinn</i> , ²⁶ "your", "yours"	<i>ykkar</i> , <i>yðar</i> , "your", "yours"
<i>hans</i> , "his"	
<i>hennar</i> , "her", "hers"	<i>þeirra</i> , "their", "theirs"
<i>þess</i> , "its"	
<i>sinn</i> , ²⁶ "his", "her", "their" (own)	

Demonstrative.

þessi, *þessi*, *þetta*, "this"; plural: *þessir*, *þessar*, *þessi*, "these"; *sá*, *sú*, *það*, "that"; plural: *þeir*, *þær*, *þau*, "those". These demonstratives are fully declined; only the nominative forms are given here, in the masculine, feminine and neuter.

Relative.

sem (indeclinable), "who", "which", "that"

Interrogative.

hver?, or *hvor?*, "who?", "whom?"

hvað? (indeclinable), "what?"

hvaða? (indeclinable), "which?"

Verbs.

"to be": Present - *er*, *ert*, *er*, *erum*, *erud*, *eru*.

Past - *var*, *varst*, *var*, *vorum*, *vorud*, *voru*.

"to have": Present - *hefi*, *hefir*, *hefir*, *höfum*, *hafid*, *hafa*.

Past - *hafði*, *hafðir*, *hafði*, *höfðum*, *höfðud*, *höfðu*.

The infinitive usually ends in *-a* or *-ja*: *elska*, "to

love":

Present: *elsk-a*, *-ar*, *-ar*, *-um*, *-id*, *-a*.

Past: *elsk-adi*, *-adir*, *-adi*, *'unpn-* ₁₂ *'npn-* *'pnpn-*

26. Fully declined; only the nominative masculine singular form is given here. The other possessives are invariable.

27. Strong verbs change the root vowel and add no ending: *finn*, *fann*, "find, found"; *gef*, *gaf*, "give, gave". Note that there are many other patterns besides the conjugational scheme outlined above.

Compound tenses are formed by combining *hafa*, "to have", with the supine, which frequently ends in *-að*: *hefi kallað*, "I have called"; *hafði elskað*, "I had loved".

The future is formed by combining *munu* or *skulu* with the infinitive: *mun kalla* or *skal kalla*, "I shall call".

The imperative singular adds *-a* or has no ending; the imperative plural adds *-ið*.

The passive is formed by adding *-st*, dropping the *-r* of active forms; *kallast*, "I am called". It may also be formed by using *vera*, "to be", or *verða*, "to become", with the past participle.

IDENTIFICATION

Written Icelandic is easily identified by its symbols *ð*, *þ*, which do not appear in any other modern language; also by the typical *-ur* ending of many masculine nouns and adjectives.

SAMPLES OF THE

WRITTEN SCANDINAVIAN LANGUAGES — John 3.16

Swedish: Ty så älskade Gud världen, att han utgav sin enfödde Son, på det att var och en som tror på honom skall icke förgås, utan hava evigt liv.

Danish: Thi saaledes elskede Gud Verden, at han gav sin Søn den enbaarne, for at hver den, som tror paa ham, ikke skal fortabes, men have et evigt Liv.

Norwegian: For så har Gud elsket verden at han gav sin Sønn, den enbårne, forat hver den som tror på ham, ikke skal for- tapes, men ha evig liv.

Icelandic: Því að svo elskaði Guð heiminn, að hann gaf son sinn eingetinn, til þess að hver, sem á hann trúir, glattist ekki, heldur hafi eilíft líf.

("For God so loved the world that he gave his only-begotten Son, that whosoever believeth in him may not perish, but may have everlasting life.")

DUTCH

ALPHABETIC NOTATION — as in English; q, x, y appear only in foreign words. Vowel *quality* (not length) is indicated by doubled vowels (*maan*, “moon”, vs. *man*, “man”).

SOUNDS

All vowels are short, save occasionally before r.

aa and a²⁸ = father (*raad*, “advice”);

ee and e²⁸ = fate (*heet*, “hot”);

oo and o²⁸ = over (*over*);

ie and i²⁸ = machine (*ziek*, “ill”);

uu and u²⁸ = French *tu* (*uren*, “hours”);

a²⁹ = cot (*kat*, “cat”).

e²⁹ = neck (*nek*)³⁰.

o²⁹ = coffee (*koffie*).

i²⁹ = pit (*pit*).

u²⁹ = buck (*stuk*, “piece”).

oe = book (*boek*).

eu = French *eu* or German *ö* (*deur*, “door”).

au, ou, auw, ouw = how (*paus*, “pope”; *oud*, “old”; *gauw*, “quick”; *vrouw*, “woman”).

ei, ij = pain (*hij zei*, “he said”).

ui = Fr. *deuil*.

28. The double vowel always has the value described above. For the single vowel, the value described normally occurs when the vowel is followed by a consonant which is followed by another vowel (*ra-men*, *gelo-ven*). There is no difference of sound between the *aa* of *raam* and the *a* of *ramen*, or between the *oo* of *kool* and the *o* of *kolen*. See also spelling rules on p. 111.

29. The second value described for the single vowel normally occurs when the following consonant is final in the word (*gek*), or when the vowel is followed by a double consonant (*gek-ken*) or by two different consonants (*straf-te*).

30. e = bacon, in prefixes (*be-*, *ge-*, *ver-*); in suffixes and inflectional endings (*-en*, *-de*, *-ten*, etc.); and in articles (*de*, *het*, *een*).

ieuw = leeway (*nieuw*, "new").

eeuw = wayward (*leeuw*, "lion").

g and ch = German *ach*, but more quickly and energetically pronounced (*gebracht*, "brought").

sch = s + Dutch ch; (*schip*, "ship"); but in final position, = Eng. *hiss* (*flesch*, "bottle").

j = yes (*jullie*, "you").

sj = sure (*alsjeblijft*, "please").

th = t (only in foreign words and contractions: *thee*, "tea"; *thuis*, contraction for *te huis*, "at home").

v = sound intermediate between v and f (*vol*, "full").

w = vine (*wijn*, "wine").

A double vowel before a final consonant is usually spelt single when an ending beginning with a vowel is added (*raam*, "window", plural *ramen*); this does not reflect any change of sound.

A single final consonant following a single vowel as described in n. 29 is spelt double when an ending beginning with a vowel is added (*gek*, "crazy", plural *gekken*); this does not reflect any change of sound.

Final f and s usually change to v and z, respectively, when an ending beginning with a vowel is added, and this change in spelling does reflect a change in sound (*huis*, "house", plur. *huizen*; *duif*, "dove", plur. *duiven*). Final -b and -d are sounded as -p and -t, respectively.

The stress is usually on the first syllable (save for words with the prefixes *be-*, *ge-*, *er-*, *her-*, *on-*, *ont-*, *ver-*, which are never stressed).

GRAMMATICAL SURVEY

Articles and Nouns.

There are three genders, masculine, feminine and neuter; but many inanimate objects are masculine or feminine. The spoken language makes no distinction between masculine and feminine, the definite article *de* being used for both and remaining uninflected in speech. The written language displays

traces of a case-system similar to that of German, with so-called "nominative", "genitive", "dative" and "accusative"; the spoken tongue, however, has reduced these forms to a state very similar to that of English.

The definite article is *de* for masculine and feminine singular nouns and for all plural nouns, *het* ('t) for neuter singulars.

The indefinite article is *een* (pronounced *the new*) for all nouns.

Proper names and some other nouns denoting persons have a genitive (or possessive) form ending in *-s* or *-es*; this is often replaced by the uninflected noun preceded by *van* (the father's daughter, the daughter of the father: *de vaders dochter* or *de dochter van de vader* (colloquially, a form like *de man z'n dochter*, the man his daughter, is sometimes heard).

While the written language has traces of an old dative, the spoken tongue indicates the indirect object exactly as English does, either by placing it before the direct object (I have written Uncle John a letter, *ik heb Oom Jan een brief geschreven*; note the position of the participle); or by using the preposition *aan* (I have written a letter to Uncle John, *ik heb een brief aan Oom Jan geschreven*).

The plural is formed in most cases by the addition of *-en*, less frequently by that of *-s* (*-s* appears in the plural of nouns ending in *-je*³¹, *-el*, *-em*, *-en*, *-aar*, *-ier*, *-er*, *-erd*, *-aard*).

Adjectives.

The only inflectional ending of the adjective is *-e*: good, *goed*; the good man, *de goede man*.

An adjective used with a neuter singular noun does not take the *-e* unless the definite article or a demonstrative precede: *een groot huis*, "a large house"; *het groote huis*, "the large house".

If the adjective is used as a predicate it takes no ending:

31. *-je* is a diminutive suffix, conferring neuter gender upon all words to which it is added. Note also that in the word-list (pp. 119-121) neuter nouns are indicated thus: (n.).

het huis is groot, "the house is large"; *de huizen zijn groot*, "the houses are large".

Comparative and superlative are formed by adding *-r* (or *-er*) and *-st*, respectively: *warm*, *warmer*, *warmst*, "warm, warmer, warmest"; *meer* ("more") and *meest* ("most") may also be used.

The adjective without an ending is often used as an adverb: *zij is mooi*, "she is beautiful"; *zij zingt mooi*, "she sings beautifully". Note *- zoo - als*, "as - as"; *niet zoo - als*, "not so - as"; *dan*, "than". See page 91 for Numerals (note: 14 — *veertien*; 40 — *veertig*; 80 — *tachtig*), and note the following: *drie paar handschoenen*, "three pairs of gloves"; *vijf en dertig huizen*, "35 houses"; (lit. "five and thirty"); *zes voet hoog*, "six feet high"; (lit. "six foot"); *hoe laat is het?*, "what time is it?"; (lit. "how late is it?"); *het is zes uur*, "it is 6 o'clock"; (lit. "it is six hour"); *het is tien minuten voor (over) zeven*, "it is ten to (past) seven"; *het is half zes*, "it is 5:30"; (lit. "it is half six").

Pronouns.

Personal.

ik, 'k, "I"

jij, *je*, *U*, "you"³²

hij, "he"

mij, *me*, "me"

jou, *je*, *U*, "you" (obj.)

hem, "him"

32. Where alternative forms in *-ij*, *-e* appear (*wij*, *we*), the first is more, the second less emphatic. For the second person "you", *jij*, *je* are used as familiar forms in the singular (*je bent*, "you are"; a singular "you", familiarly addressed); *jullie* and *jelui* are plural familiar forms, and take the verb in the second or *third person plural* (*jullie hebt* or *hebben*, "you have"; more than one person addressed, familiarly); the polite form of address is *U* with the second or third person singular of the verb, and no distinction between singular and plural (*U bent* or *U is*, "you are"; one or more people, politely addressed); if a distinction between singular and plural is desired, use *de dames*, "the ladies" or *de heeren*, "the gentlemen", with the third plural verb: *de heeren hebben*, "you gentlemen have".

<i>zij, ze</i> , "she"	<i>haar</i> , "her"
<i>het, 't</i> , "it"	<i>het, 't</i> , "it"
<i>wij, we</i> , "we"	<i>ons</i> , "us"
<i>jullie, jelui, U</i> , "you"	<i>jullie, jelui, je, U</i> , "you" (obj.)
<i>zij, ze</i> , "they"	<i>hen</i> , "them"; <i>hun</i> , "to them"

Possessive.

<i>mijn</i> , "my", "mine"	<i>onze, ons</i> , "our", "ours"
<i>jouw</i> , "your", "yours"	<i>uw</i> , "your", "yours" (plural possessor)
<i>zijn</i> , "his"	<i>hun</i> , "their", "theirs"
<i>haar</i> , "her", "hers"	

These appear without the article if they are used as adjectives, with the article if they are used as pronouns:

mijn zusters en de uwe, "my sisters and yours"; *dit boek is het mijne*, "this book is mine".

Demonstrative.

deze, (neut. sg. *dit*), "this", "these"
die, (neut sing. *dat*), "that", "those"

Interrogative and Relative.

welke?, "which?" (neut. sg. *welk?*)
wat voor een?, "what kind of?"
wie?, "who?"
wiens?, "whose?"
wat?, "what?"
die, (neut. sg. *dat*), "which", "that", "who", "whom"
wiens, "whose" (fem. and plural *wier*)
wie, "he who"
wat, "that which"

Note that *wat* changes to *waar* when used with a preposition, and that the latter is suffixed: *waarin*, "in which", "wherein".

Note also: *elkander*, "each other"; *zelf*, "self"; *dezelfde* (neuter *hetzelfde*), "the same"; *zulk* or *zoo een* (often contract-

ed to *zoo'n*), "such", "such a"; *zich*, "himself"; "themselves"; *iemand*, "somebody"; *iets*, "something"; *niets*, "nothing"; *wen*, "one", "they"; *elk*, "each"; *ieder*, "every"; *iedereen*, "everybody"; *niemand*, "nobody".

Verbs.

zijn or *wezen*, "to be": Present: *ik ben*, "I am"; *jij bent* (fam.), *U is* (polite), "you are"; *hij, zij, het is*, "he, she, it is"; *wij, jullie, zij zijn*, "we, you, they are". Past: singular *was*, plural *waren*.

hebben, "to have": Present: *ik heb, jij hebt (U heeft), hij (zij, het) heeft; wij, jullie, zij hebben*. Past: singular *had*, plural *hadden*.

The infinitive normally ends in *-en*: *voeren*, "to lead".

The present indicative normally has no ending in the first person singular, *-t* in the second and third singular, *-en* in the plural: *ik voer*, "I lead", *U voert*, "you lead", *hij voert*, "he leads"; *wij, jullie, zij voeren*, "we, you, they lead".

The past has the endings *-de* (sg.), *-den* (plural): *ik voerde, hij voerde, wij voerden*, "I", "he", "we" "led". The *d* of the past ending becomes *t* if the root of the verb ends in *-ch, -f, -k, -p, -t, -s* or *-sch*: *straffen*, "to punish"; *ik strafte*, "I punished".³³

The past participle normally ends in *-d* or *-t* (see above; also note 33), with the prefix *ge-*: *voeren*, "to lead", *gevoerd*, "led"; *straffen*, "to punish", *gestraft*, "punished".

Compound tenses are formed, as in English, by combining the verb "to have" with the past participle: *hij heeft gebroken*, "he has broken". But many intransitive verbs use "to be" as an auxiliary: *hij is gestorven*, "he has died"; *ik ben geweest*, "I have been".

33. Strong verbs change the root vowel and add no ending in the singular of the past; they also add *-en* in the past participle instead of *-d* or *-t*: *breken*, "to break", *brak*, "broke", *gebroken*, "broken"; *drinken*, "to drink", *dronk*, "drank", *gedronken*, "drunk"; *geven*, "to give", *gaf*, "gave", *gegeven*, "given".

The future is formed by using *zal* (plural *zullen*) with the infinitive: *ik zal voeren*, "I shall lead". The conditional is formed by using *zou* (plural *zouden*) with the infinitive: *ik zou voeren*, "I should lead".

The imperative singular consists of the simple root of the verb: *voer!*, "lead!"; for the plural, add *-t* (*voert!*).

The passive is formed by using *worden*, "to become", with the past participle; the present of *worden* is *word* (plural *worden*); the past is *werd* (plural *werden*): *ik word gestraft*, "I am punished"; *zij werden door mij gestraft*, "they were punished by me".

The negative is formed by using *niet* after the verb. Note the position of *niet* in the following examples: *ik leer mijn les niet*, "I do not learn my lesson"; *ik heb mijn les niet geleerd*, "I haven't learnt my lesson".

IDENTIFICATION

Written Dutch is easily identified by its use of certain vowel groups: *aai*, *ooi*, *oei*, *eeuw*, *uw*, *auw*, *ouw*, *ieuw*, *ij*. Note that no accent marks or diacritic signs appear in standard modern Dutch. In the spoken language, perhaps the most characteristic trait is the guttural sound of *g* and of *ch* in the *sch* group; the latter is similar to a quick clearing of the throat immediately following an *s*-sound.

SAMPLES OF WRITTEN DUTCH AND AFRIKAANS

Dutch: Want alzo lief heeft God de wereld gehad, dat Hij zijn eengeboren Zoon gegeven heeft, opdat een ieder, die in hem gelooft, niet verloren ga, doch eeuwig leven hebbe.

Afrikaans: Want so lief het God die wêreld gehad, dat Hy sy eniggebore Seun gegee het, sodat elkeen wat in Hom glo, nie verlore mag gaan nie, maar die ewige lewe kan hê.

WRITTEN AND SPOKEN DUTCH EXPRESSIONS AND WORDS

Dutch shows a very pronounced difference between "written language" and "spoken language".³⁴ The latter is not to be confused with slang; it is perfectly legitimate Dutch, spoken by well-educated people, who would feel silly or pedantic expressing themselves in the words of the written tongue (to cite an example from English, the literary "the fire was extinguished" would normally appear in speech as "the fire was put out"). Similarly, Dutch has two expressions for each of thousands of meanings. A few striking ones follow:

English	Written Dutch	Spoken Dutch
good morning	<i>goeden morgen</i>	<i>goeiemorgen</i>
good afternoon	<i>goeden middag</i>	<i>goeiemiddag</i>
good evening	<i>goeden avond</i>	<i>goeienavond</i>
good night	<i>goede nacht</i>	<i>goeienacht</i>
good-bye	<i>vaarwel</i>	<i>dag</i>
thank you	<i>ik dank U</i>	<i>dank U wel</i>
you're welcome	<i>tot Uw dienst</i>	<i>niet te danken</i>
please	<i>als het U belieft</i>	<i>alsjeblijft</i>
very gladly	<i>zeer gaarne</i>	<i>heel graag</i>
perhaps	<i>wellicht</i>	<i>misschien</i>
here is	<i>althier is</i>	<i>hier is</i>
there is	<i>aldaar is, er is</i>	<i>daar is, er is</i>
where is?	<i>waar is?</i>	<i>waar is?</i>
how do I go to - ?	<i>hoe ga ik naar - ?</i>	<i>hoe kom ik naar - ?</i>

34. The root of this difference lies in the fact that the written language has its roots in the Flemish of Flanders and Brabant, which, down to the sixteenth century, were economically and politically, as well as culturally, on a higher plane than the provinces that today constitute Holland; but it is the dialects of the latter that gave rise to spoken Dutch. Reference has already been made to the declensional scheme of written Dutch, which resembles German, while spoken Dutch has discarded it, and achieved a grammatical structure somewhat similar to that of English. In vocabulary, the differences are even more glaring. The formal expressions of the written tongue are jokingly referred to as *stadhuiswoorden*, "city hall words", or what Americans would describe as "three-dollar words".

yes	<i>ja, jawel</i>	<i>ja</i>
no	<i>neen</i>	<i>nee</i>
how are you?	<i>hoe gaat het met U?</i>	<i>hoe gaat 't ermee?</i>
very well	<i>zeer wel</i>	<i>heel goed</i>
how much is it?	<i>wat is de prijs?</i>	<i>wat kost 't?</i>
why?	<i>waarom, weshalve?</i>	<i>waarom?</i>
when?	<i>wanneer?</i>	<i>wanneer?</i>
where?	<i>waar?</i>	<i>waar?</i>
because	<i>daar</i>	<i>omdat</i>
today	<i>heden</i>	<i>vandaag</i>
tomorrow	<i>morgen</i>	<i>morgen (silent -n)</i>
yesterday	<i>gisteren</i>	<i>gisteren (silent -n)</i>
now	<i>thans</i>	<i>nu, nou</i>
on the right	<i>aan de rechterzijde</i>	<i>aan de rechterkant</i>
to the right	<i>naar rechts</i>	<i>rechtsaf</i>
on the left	<i>aan de linkerzijde</i>	<i>aan de linkerkant</i>
to the left	<i>naar links</i>	<i>linksaf</i>
straight ahead	<i>rechtuit</i>	<i>rechtuit</i>
what time is it?	<i>hoe laat is het?</i>	<i>hoe laat is 't?</i>
it is now - o'clock	<i>het is thans - uur</i>	<i>'t is nu - uur</i>
I'm hungry	<i>ik heb honger</i>	<i>'k heb honger</i>
I'm thirsty	<i>ik heb dorst</i>	<i>'k heb dorst</i>
I'm cold	<i>ik ben koud</i>	<i>'k heb 't koud</i>
I'm warm	<i>ik ben warm</i>	<i>'k heb 't warm</i>
I'm ill	<i>ik ben ziek (ongesteld)</i>	<i>'k ben ziek</i>
what's your name?	<i>hoe is Uw naam?</i>	<i>hoe heet U?</i>
my name is -	<i>mijn naam is -</i>	<i>'k heet -</i>
do you speak - ?	<i>spreekt U - ?</i>	<i>spreekt U - ?</i>
certainly	<i>welzeker, zeker</i>	<i>zeker, en of! (and how!)</i>
give me	<i>geef mij</i>	<i>geef me</i>
let me see	<i>toon mij</i>	<i>laat me - zien</i>
tell me	<i>zeg mij</i>	<i>vertel me</i>
do you understand?	<i>verstaat U?</i>	<i>begrijpt U?</i>
I don't understand	<i>ik versta (het) niet</i>	<i>ik begrijp 't niet</i>
do you know?	<i>weet U?</i>	<i>weet U?</i>
I don't know (it)	<i>ik weet (het) niet</i>	<i>'k weet ('t) niet</i>
very little	<i>zeer gering</i>	<i>heel weinig</i>
excuse me	<i>verschoon mij</i>	<i>pardon, neem me niet kwalijk</i>
don't mention it	<i>het beteekent niets</i>	<i>'t beteekent niets</i>
what do you want?	<i>wat is er van Uw dienst?, wat wenscht U?</i>	<i>wat wilt U?, wat blijft U?</i>

it's fine weather	<i>het is schoon weder</i>	<i>lekker weertje</i>
never mind	<i>het komt er niet op aan</i>	<i>'t komt er niet op aan</i>
I'm sorry	<i>ik betreur het</i>	<i>'t spijt me</i>
I'm glad	<i>het verheugt mij</i>	<i>'k ben blij</i>
too bad!	<i>ocharme!</i>	<i>o jee!, 't is me toch wat!, 't is zonde!</i>
what's the matter?	<i>wat is er aan de hand?</i>	<i>wat scheelt eraan?</i>
already	<i>reeds</i>	<i>al</i>
home	<i>woning</i>	<i>huis (n)</i>
wheel	<i>rad (n)</i>	<i>wiel (n)</i>
kiss	<i>kus</i>	<i>zoen</i>
brother	<i>broeder</i>	<i>broer</i>
to turn	<i>wenden</i>	<i>draaien</i>
face	<i>gelaat (n)</i>	<i>gezicht (n)</i>
to think	<i>meenen</i>	<i>denken</i>
you	<i>gij</i>	<i>jij, je</i>
to marry	<i>huwen</i>	<i>trouwen</i>
food	<i>spijs</i>	<i>eten (n)</i>
gladly	<i>gaarne</i>	<i>graag</i>
to die	<i>sterven, overlijden</i>	<i>doodgaan</i>
beautiful	<i>schoon³⁵</i>	<i>mooi</i>
but	<i>doch</i>	<i>maar</i>
to throw	<i>werpen</i>	<i>gooien</i>
entirely	<i>geheel</i>	<i>heelemaal</i>
to get	<i>ontvangen</i>	<i>krijgen</i>
quickly	<i>snel, vlug</i>	<i>gauw</i>
soon	<i>weldra</i>	<i>gauw</i>
to try	<i>pogen</i>	<i>probeeren</i>
to leave	<i>vertrekken</i>	<i>weggaan</i>
to send	<i>zenden</i>	<i>sturen</i>
profession	<i>heroep (n)</i>	<i>vak (n)</i>
to show	<i>toonen</i>	<i>laten zien</i>
often	<i>vaak</i>	<i>dikwijls</i>
to weep	<i>weenen</i>	<i>huilen</i>
bicycle	<i>rijwiel (n)</i>	<i>fiets</i>

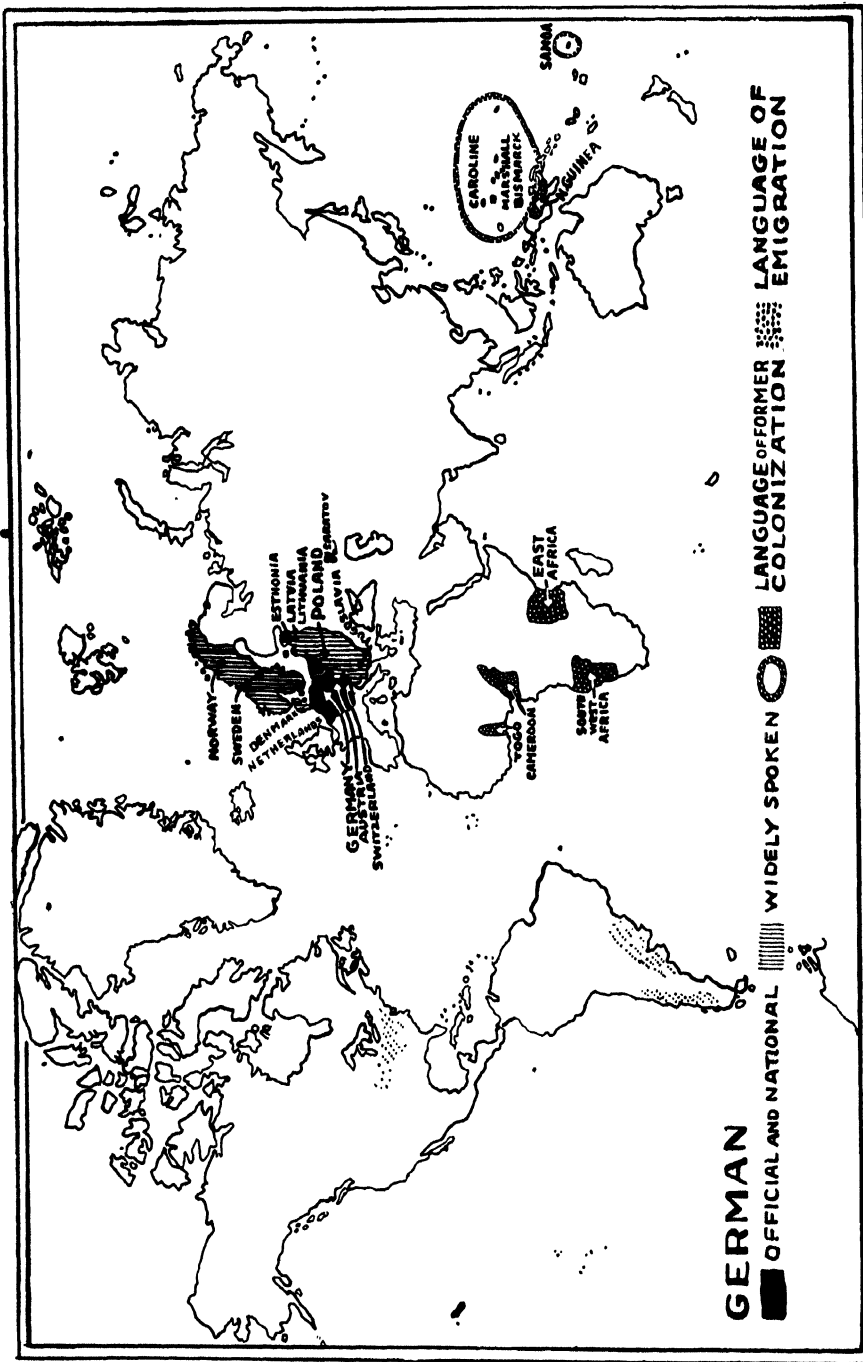

ADDITIONAL WORDS AND PHRASES

waiter!, <i>aannemen!</i>	a cup of coffee,
there's a wind blowing, <i>'t waait</i>	<i>'n kop (kopje) koffie</i>
it's raining, <i>het regent</i>	come in!, <i>binnen!</i>

35. In spoken Dutch, this word means "clean".

knife, <i>mes</i> (n.)	hat, <i>hoed</i>
spoon, <i>lepel</i>	coat, <i>jas</i>
fork, <i>vork</i>	handkerchief, <i>zakdoek</i>
napkin, <i>servet</i> (n.)	shoe, <i>schoen</i>

CHAPTER IV

GERMAN

SPEAKERS AND LOCATION

(All population figures are approximate)

Europe — Germany (including Austria and Sudeten areas) — 80,000,000; Switzerland — 3,000,000; scattered groups in Luxembourg, Belgium (Eupen and Malmedy), France (Alsace-Lorraine), Italy (Alto Adige, Asiago), Polish Corridor, Danzig, Russia (Saratov region and Ukraine), Roumania (Transylvania), Hungary, Yugoslavia — perhaps a total of 5,000,000.

Used widely as a secondary language in the Netherlands, Denmark, Norway, Sweden, Finland, Estonia, Latvia, Lithuania, Poland, Czechoslovakia, Hungary, Yugoslavia.

As a cultural and commercial language, widely spoken and understood throughout Europe.

Africa — Language of former colonization in Togoland, Cameroon, Southwest Africa, Tanganyika.

Oceania — Language of former colonization in Bismarck, Caroline, Marianas, Marshall, Solomon Islands, Palau, New Guinea, Samoa.

Western Hemisphere — Spoken by several millions of German immigrants and their descendants in North and South America, particularly the U. S. A., Brazil (São Paulo, Rio Grande do Sul), Argentina, Chile.

As a cultural language, spoken and understood by some millions of people in North and South America.

ALPHABET AND SCRIPT

A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z, a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z, ä, ö, ü, ss (sz), ch, ck, tz.

a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z, ä, ö, ü, ß, ch, ck, tz.

a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z, ä, ö, ü, ss (sz), ch, ck, tz.

<i>A A a a</i>	a	<i>N N n</i>	n
<i>L b</i>	b	<i>O O o o</i>	o
<i>L c</i>	c	<i>P p p p</i>	p
<i>D d d</i>	d	<i>Q q q q</i>	q
<i>E e e</i>	e	<i>R R r</i>	r
<i>F f f</i>	f	<i>S s s s</i>	s
<i>G g g g</i>	g	<i>T t</i>	t
<i>H h h</i>	h	<i>U u</i>	u
<i>I i i</i>	i	<i>V v</i>	v
<i>J j j</i>	j	<i>W w w</i>	w
<i>K k k</i>	k	<i>X x x</i>	x
<i>L l</i>	l	<i>Y y</i>	y
<i>M M m m</i>	m	<i>Z z</i>	z

Notes on f, s, ff, ß, k.

s is used at the end of a word or stem-syllable; f in all other cases: es, was, auslachen, hinausgehen: but bist, sehen, Unsinn, Hofe, stehen.

ß is regularly used for ss; it is however, changed to ff inside the word after a short vowel when an ending beginning with a vowel is added: Schloss, castle, pl. Schlösser (short ö); but Fuß, foot, pl. Füße (long ü); stoßen, to push (long o), but lassen, to let (short a).

t and z are always joined together (tz): jetzt, now; trotzdem, although.

SOUNDS

Vowel sounds: usually short when followed by a double consonant: Wasser, Bett, Sand; otherwise long, especially if doubled or followed by h: Vater, Boot, wohl.

Long	Short
a = father (Vater)	= aha (Wasser)
e = they (sie)	= met (Fenster) ¹
i = machine (ihnen)	= pin (bin)
o = bore (lohen)	= son (voll)
u = rule (gut)	= put (Mutter)
ä = there (wählen)	= met (Männer)
ö = sound intermediate between German o and German e; like French eu	
(Söhle)	(öffnen)
ü = sound intermediate between German u and German i; like French u	
(Hüte)	(Hütte)

1. Final unstressed e = bacon (Ecke).

äu, eu = *toil* (Häußer, treu)
 ei = *mine* (ein)
 ie = *machine* (viel)

Consonant sounds: b, d, f, h, l, m, n, p, q, t, z, approximately as in English.

c: before a, o, u, or consonant, = k (Cafe, Creme),
 before e, i, ä, ö = ts (Cicero, Cäsar).

ch: after a, o, u = Scots loch (Nacht, juchten); harsh guttural sound; after e, i, or consonant = sound intermediate between k and sh (nicht, manch); the nearest English equivalent is *huge*.

g: when final, especially after e or i, pronounce like German ch as above; otherwise, like Eng. *go*.

j: = Eng. yet (ja).

c: guttural, as in French, or trilled, as in Italian.

z: at beginning of words, or between vowels = zeal (sehen, Rose); before t and p at beginning of syllable = Eng. shore, sure (stehen, sprechen); elsewhere, = Eng. sit (was).

sch: = Eng. shore (Schiff).

ti before vowels, = Eng. tsy (Nation).

v: = Eng. f (Vogel).

w: = Eng. v (wir).

z: = Eng. ts in hearts (Herz).

Sounds not appearing in native German words: all English vowel sounds outside of the above listed; *chair, jest, pleasure, thin, this, water*, American r. German sounds not appearing in English: ö, ü, ach, ich, German r.

CAPITALIZATION, SYLLABIFICATION, ACCENTUATION, PUNCTUATION.

Use capitals for *all* nouns, proper or common (der Vater; das Bett); also for Sie (polite "you") Ihr (polite "your"). Do not use capitals for ich ("I"), or for adjectives of nationali-

ty, unless used as nouns (ein Deutscher, "a German"; ein deutscher Knabe, "a German boy").

Divide compound words according to their component parts (hin-aus, Dienſ-tag); otherwise, a single consonant sound between two vowels goes with the following vowel, not with the preceding (Bü-cher, ei-nen).

The accent regularly falls on the first syllable of the word, save in words having as a prefix be-, emp-ent-, er-, ge-, miß-, ver-, zer- (anfangen, arbeiten, Buchſtabe; but bekannt, Entwicklung, gehört, zerbrechen).

Use commas to set off subordinate clauses: der Mann, der diesen Brief geſchrieben hat, iſt angekommen, "the man who wrote this letter has arrived".

Use exclamation mark in imperative sentences and at the beginning of letters: Kommen Sie her!, "Come here"; Lieber Karl!, "Dear Charles,".

SAMPLE OF WRITTEN GERMAN; USE FOR PRACTICE READING.

Ja, es war wirklich ſo. Der General mußte es denn auch bereits ſeit zwei Tagen: es waren drei Fälle von Influenza unter den Soldaten ausgebrochen. Man hatte erſt an Grippeſchlag gedacht; die Leute waren in einem Manöver geweſen, die Sonne hatte heiß gebrannt, als ſchöſſe ſie mit mörderiſchen Pfeilen. Aber nun ſchüttelten die Ärzte die Köpfe: wo hatten ſich die Keils nur die Krankheit geholt? Jedenfalls außerhalb des Lagers. Die ſtrengſten Abſperrungsmaßregeln wurden auf der Stelle durchgeführt. Urlaub gab's nicht mehr; kein Soldat durfte das Lager verlaſſen; die Poſten wurden verdoppelt; keinem Fremden wurde es erlaubt, einen Soldaten zu beſuchen. Auf dieſe Weiſe ſuchte man, die Verbreitung der Peſt zu verhindern.

GRAMMATICAL SURVEY

1. *Nouns and Articles.*

German has three genders, masculine, feminine and neuter. Nouns denoting males are usually masculine, those denoting females feminine. Nouns which in English are neuter, however, may be masculine or feminine in German (*der Löffel*, "the spoon", masculine; *die Gabel*, "the fork", feminine; *das Messer*, "the knife", neuter). Nouns with the diminutive suffixes *-chen* and *-lein* must be neuter even if they indicate persons (*das Mädchen*, "the girl"; *das Fräulein*, "the miss", "the young lady", both neuter). Abstract nouns are usually feminine (*die Liebe*, "love"; *die Freiheit*, "freedom", both feminine). Learn nouns with their respective articles, *der* for masculines, *die* for feminines, *das* for neuters.

There are four cases in German, nominative, genitive, dative and accusative. The nominative and the accusative correspond, respectively, to the English subjective and objective; the genitive indicates possession and often translates the English "of", while the dative translates "to" with verbs of saying, giving, etc.²

Definite Article ("the")

	Masc. Sg.	Fem. Sg.	Neut. Sg.	Pl.
Nom.	<i>der</i>	<i>die</i>	<i>das</i>	<i>die</i>
Gen.	<i>des</i>	<i>der</i>	<i>des</i>	<i>der</i>
Dat.	<i>dem</i>	<i>der</i>	<i>dem</i>	<i>den</i>
Acc.	<i>den</i>	<i>die</i>	<i>das</i>	<i>die</i>

2. "To" indicating motion towards, however, is usually translated by a preposition (*nach* with the dative, *auf* with the accusative, etc.), while "to" meaning "in order to" is translated by *um...zu*: *ich gehe nach Hause, in die Schule, auf das Land*, "I am going home, to school, to the country"; *ich bin gekommen, um den Brief zu schreiben*, "I came to write the letter". Note also: *meines Vaters Geld*, "my father's money", or *das Geld meines Vaters*, "the money of my father"; *ich gab dem Knaben (dat.) einen Pfennig (acc.)*, "I gave the boy a penny".

Indefinite Article ("a", "an")

	Masc.	Fem.	Neut.
Nom.	ein	eine	ein
Gen.	eines	einer	eines
Dat.	einem	einer	einem
Acc.	einen	eine	ein

Declension of Nouns.

In the genitive singular, most masculine and neuter nouns add *-s* (*-es* if monosyllabic; a few masculines ending in *-e* add *-n*), while feminine nouns remain unchanged: *der Bruder*, "the brother", *des Bruders*, "of the brother", "the brother's"; *der Mann*, "the man", *des Mannes*, "of the man", "the man's"; *der Knabe*, "the boy", *des Knaben*, "of the boy", "the boy's"; *die Tochter*, "the daughter"; *der Tochter*, "of the daughter"; *die Frau*, "the woman", *der Frau*, "of the woman".

The dative and accusative singular usually have the same form as the nominative:³ *dem Bruder*, "to the brother", *den Bruder*, "the brother" (obj.); *dem Mann(e)*, "to the man", *den Mann*, "the man" (obj.); *der Tochter*, "to the daughter", *die Tochter*, "the daughter".

Plural endings are: nothing or *-e* (with or without umlaut); *-er* (with umlaut if the vowel permits); *-en* (without umlaut). Nouns that have the first three plural endings take on an additional *-n* in the dative plural: *Bruder*, plural nom. *die Brüder*, gen. *der Brüder*, dat. *den Brüdern*, acc. *die Brüder*; *Mann*, pl. nom. *die Männer*, gen. *der Männer*, dat. *den Männern*, acc. *die Männer*; *Tochter*, plural nom. *die Töchter*, gen. *der Töchter*, dat. *den Töchtern*, acc. *die Töchter*; *Bank*, plural *Bänke* in nom., gen.

3. In nouns of one syllable, addition of *-e* is customary in the dative: *dem Mann* or *dem Manne*, "to the man". Nouns that add *-n* in the genitive do so also in the dative and accusative: *dem Knaben*, "to the boy"; *den Knaben*, "the boy" (obj.).

and acc., *Bänken* in dat.; *Boot*, plural *Boote*, with *Booten* in the dat.; *Frau*, plural *Frauen*; *Bett*, plural *Betten*.⁴

2. Adjectives and Adverbs.

The adjective usually precedes the noun, and is declined. The ending of the adjective is determined by the presence or absence of a declensional ending on a *preceding* word, such as the definite or indefinite article, the demonstrative and possessive adjectives. If such preceding word has no ending, or if there is no preceding word, the adjective takes an ending in accordance with the following scheme:⁵

	Masc. Sg.	Fem. Sg.	Neut. Sg.	Plural (all genders)
Nom.	-er	-e	-es	-e
Gen.	-en	-er	-en	-er
Dat.	-em	-er	-em	-en
Acc.	-en	-e	-es	-e

Manch guter *Mann*, "many a good man" (*manch* is indeclinable in this use, and has no ending; hence the adjective *gut* takes on the masc. sg. -er ending); *welch* gutes *Kind!* "what a good child!" (*welch* has no ending, hence *gut* takes on the neuter sg. -es); *ein* junges *Mädchen*, "a young girl" (*ein*, in the neuter singular form, has no ending; hence *junges*); *die* *Eide*

4. Nouns given in the vocabulary appear, with their article, in the nominative singular form; the genitive singular ending, if any, follows; then the nominative plural ending, if any, with indication of umlaut where the latter occurs; from these key forms, the entire declension of the noun can be determined; thus *der Bruder*, -s, "—"; this indicates -s in the genitive singular, no plural ending, save the universal -n in the dative plural, but umlaut throughout the plural; *die Uhr*, —, -en; this indicates a single form throughout the singular, -en and no umlaut throughout the plural.

For *practical* purposes, don't be too terrified about making a mistake in an ending or gender; the chances are you will still be understood, and probably corrected; the Germans themselves occasionally make a slip of this kind.

5. This set of endings, characteristic of adjectives and most pronouns, is worth memorizing.

guter Männer, “the oaths of good men” (there is no article or pronoun preceding **guter**, which therefore takes the **-er** genitive plural ending).

If the preceding word has a declensional ending, the ending of the adjective is **-e** in the nominative singular masculine, feminine and neuter, and in the accusative singular feminine and neuter, **-en** in all other cases: **der gute Mann**, “the good man” (**der** has characteristic masc. sg. nom. ending, hence the weak **-e** instead of the strong **-er** is used for **gut**); **jedes deutsche Mädchen**, “every German girl” (**-es** on **jedes**; therefore only **-e** for the adjective); **jenes gute Kind**, “that good child”; **meines guten Bruders**, “of my good brother” (**-es** on the possessive, therefore **-en** on the adjective); **einer schönen Frau**, “of” or “to a beautiful woman” (**-er** of article causes the adjective to take weak **-en** instead of strong **-er** ending); **die Worte der tapferen Soldaten**, “the words of the brave soldiers” (**der** causes “brave” to take on **-en**; if the expression were “the words of brave soldiers”, **der** would disappear, and **tapferen** would change to **tapferer**). Remember again that for practical purposes an error of ending is usually inconsequential.

The predicate adjective is invariable, and takes no ending: **die Männer sind gut**, “the men are good”; **die Mädchen sind schön**, “the girls are pretty”.

The invariable adjective without any ending is generally used as an adverb: **er ist gut**, “he is good”; **er lernt gut**, “he learns well”.

The comparative and superlative are formed by adding **-er** (**-r**) and **-est** (**-ft**), respectively, usually with umlaut: **alt**, “old”, **älter**, “older”, **ältest**, “oldest”; **kurz**, “short”; **kürzer**, “shorter”; **kürzest**, “shortest”; **frei**, “free”, **freier**, “freer”, **freiest**, “freest”. Comparative and superlative adjectives are regularly declined: **ein kürzeres Buch**, “a shorter book”; **des freiesten Staates**, “of the freest state”.⁶

6. When used after the verb “to be”, without a clause or phrase following, the superlative is preceded by **am** instead of the definite article, and takes the ending **-en**: **dieses Haus ist am höchsten**, “this

3. Numerals.

a) Cardinal (indeclinable outside of **ein** (for which see p. 129), and **Million**)

1 — ein (eins when not followed by noun)	13 — dreizehn
2 — zwei	14 — vierzehn
3 — drei	15 — fünfzehn
4 — vier	16 — sechzehn
5 — fünf	17 — siebzehn
6 — sechs	18 — achtzehn
7 — sieben	19 — neunzehn
8 — acht	20 — zwanzig
9 — neun	21 — einundzwanzig
10 — zehn	22 — zweiundzwanzig
11 — elf	30 — dreißig
12 — zwölf	40 — vierzig
	50 — fünfzig
	60 — sechzig
	70 — siebzig
	80 — achtzig
	90 — neunzig
	100 — hundert
	200 — zweihundert
	1000 — tausend
	5000 — fünftausend
	1,000,000 — eine Million
	3,000,000 — drei Millionen

house is the highest"; but **dieses Haus ist das höchste in der Stadt**, "this house is the highest in the city".

Note: ebenso . . . wie. "as . . . as"; als, "than"; diese Arbeit ist ebenso schwer wie die deine, "this work is as hard as yours"; meine Arbeit ist schwerer als die deine, "my work is harder than yours".

b) Ordinal (add *-te* to cardinal up to 20th, save for exceptions below; *-ste* from 20th on ordinal numerals are declined like adjectives).

1st — der erste	8th — der achte
2nd — der zweite	10th — der zehnte
3rd — der dritte	12th — der zwölfte
4th — der vierte	20th — der zwanzigste
5th — der fünfte	100th — der hundertste

c) Others.

die Hälfte (noun), halb (adjective), “half”: die Hälfte des Buches, “half of the book”; eine halbe Seite, “half a page”
 einmal, “once”; zweimal, “twice”; dreimal, “three times”;
 hundertmal, “a hundred times”; das erste Mal, “the first time”;
 zuweilen, “sometimes”; anderthalb, “one and a half”; dreieinhalb,
 “three and a half”.

ein Glas Wasser, “a glass of water”; eine Tasse Kaffee, “a cup of coffee”; sieben Pfund Fleisch, “seven pounds of meat”;
 zwei Duzend Eier, “two dozen eggs”; drei Fuß hoch, “three feet high”; voll Kartoffeln, “full of potatoes”.

4. Pronouns.

a) Personal.

Singular

Nom. ich, “I”; du, “you”⁷; er, “he”⁸; sie, “she”⁸; es, “it”⁸
 Dat.⁹ mir, “to me”; dir, “to you”; ihm, “to him”; ihr, “to her”;
 ihm, “to it”
 Acc. mich, “me”; dich, “you”; ihn, “him”; sie, “her”; es, “it”

7. In polite address, singular or plural, use Sie (nom. and acc.), Ihnen (dat.), with the *third person plural* of the verb: du bist gut, “you are good”, familiar singular; ihr seid gut, “you are good”, familiar plural; Sie sind gut, “you are good”, polite singular or plural.

8. The German pronoun must be of the same gender as the noun it stands for: ich habe den Fisch gegessen; er ist gut, “I have eaten the fish; it (lit. “he”; Fisch is masculine in German) is good.

9. The genitive is omitted, as it is usually supplied by the possessive adjective-pronoun.

Plural

Nom. wir, "we"; ihr, "you"; sie, "they" (all genders)
 Dat. uns, "to us"; euch, "to you"; ihnen, "to them"
 Acc. uns, "us"; euch, "you"; sie, "them"

An object pronoun, dative or accusative, follows the verb; in compound tenses, it is placed immediately after the auxiliary; if two object pronouns are used together, the accusative comes before the dative: er zeigt es, "he shows it"; er hat es mir nicht gezeigt, "he did not show it to me".

If the pronoun in English is the object of a preposition and refers to things (not to persons), omit it altogether in German and use instead *da(r)* combined with the preposition: darauf, "on it"; daraus, "out of it"; damit, "with it"; but mit ihm, "with him".

b) Possessive.

mein,	"my", "mine"	unser,	"our", "ours"
dein,	"your", "yours"	euer,	"your", "yours"
sein,	"his", "its"	ihr,	"their", "theirs"
ihr,	"her", "hers"	Ihr,	"your", "yours" (polite, singular or plural)

When used as adjectives before the noun, these possessives are declined like *ein* (p. 129): ich habe meinen Hut nicht, "I haven't my hat"; ich habe es meinem Vater gegeben, "I gave it to my father".

When used as pronouns, they usually take the definite article and are declined like adjectives in a "weak" position (p. 131); that is to say, they take *-en* throughout, save in the nominative singular of the three genders and in the accusative feminine and neuter, where the ending is *-e*. They may also insert *-ig-* before these endings: diese Bücher und die deinen (or die deinigen) "these books and yours"; hier ist mein Hut, aber den Ihren (or den Ihrigen) kann ich nicht finden, "here's my hat, but I can't find yours".

c) Demonstrative.

dieser, "this", "these"; **jener**, "that", "those". They are declined like the definite article **der** (p. 128), save that the neuter singular nominative and accusative has **-es** instead of **-as** (**dieses**, **jenes**).

derselbe, "the same", **derjenige**, "the one", are declined as though article and adjective were separate: **demselben Manne**, "to the same man"; **diejenigen auf dem Tische**, "the ones on the table". "The one" may also be expressed by **der**, **die**, **das**, but in this meaning the genitive forms are **dessen** (masc. and neut. sg.), **deren** (fem. sg.), **derer** (plural), and the dative plural is **denen**. **der** or **welcher**, "who", "which", "that".

d) Relative.

The relative **der** is declined like the definite article, but with a genitive **dessen** for masc. and neut. sg., and **deren** for fem. sg. and all plurals, and a dat. plural **denen**. **Welcher** is declined like the definite article, but with **-es** in neuter nom. and acc. (**welches**): **das Haus, das (or welches) ich gekauft habe**, "the house I bought"; **die Frau, die (or welche) ich sah**, "the woman I saw"; **der Knabe, dessen Hut ich fand**, "the boy whose hat I found"; **der Held, den (or welchen) ich kenne**, "the hero whom I know". Note that the relative pronoun must be used in German, even where it is understood in English.

was, "what", "that" (the latter meaning only after neuter adjectives and pronouns): **ich sah, was du getan hast**, "I saw what you did"; **das Beste, was ich habe**, "the best I have". It is also used after **etwas** (something), **alles** (everything), **nichts** (nothing): **alles, was du hast**, "all that you have".

When the English relative pronoun follows a preposition and refers to objects (not to persons), it is customary to omit the relative and use instead **wo(r)**, combining it with the preposition: **das Haus, worin ich wohne**, "the house in which I live" (**das Haus, in dem ich wohne** is permissible).

e) Interrogative.

wer (gen. **wessen**, dat. **wem**, acc. **wen**), "who?", "whose?", "whom?"; **wer hat es getan?**, "who did it?"; **wem hast du meinen**

Ĝut gegeben?, "to whom did you give my hat?; wen hast du gesehen?, "whom did you see?"; wessen Ĝut ist das?, "whose hat is that?"

was, "what": was hast du gesehen? "what did you see?" (as object of preposition, referring to things, use *wu(r)*: womit hast du es getan?, "with what did you do it?")

welcher (declined like the relative *welcher*), "which?": welches Buch meinen Sie?, "which book do you mean?"

was für ein, "what kind of?": was für einen Ĝut trug er? "what kind of a hat was he wearing?" (omit *ein* in the plural: was für Waffen sind das? "what kind of weapons are those?")

5. Verbs.

German verbs fall into two categories, "weak" and "strong". The weak verbs form their past tense by the addition of endings and effect no change in the root vowel, while the strong generally add no ending in the first and third persons singular, and regularly change the vowel of the root. In the past participle, weak verbs add *-(e)t*, strong verbs *-en*. Some strong verbs also effect a change in the root vowel of the present tense, in the second and third persons singular. Verbs appearing in the vocabulary are given only in the infinitive form if weak (e. g. *lieben*); if strong, the third person singular of the present is given, if a root-vowel change appears in the second and third singular (remember that whatever root-vowel change appears in the third singular appears also in the second singular); also the past, first person singular, and the past participle (e. g. *sprechen, spricht, sprach, gesprochen*); if no root-vowel change occurs in the present, only the infinitive, past and past participle are given (e. g. *bringen, brachte, gebracht; finden, fand, gefunden*).

The infinitive regularly ends in *-en*: *lieben*, "to love"; *sehen*, "to see"; *sprechen*, "to speak".

The present participle regularly ends in *-end*: *liebend*, "loving"; *gehend*, "going". It is most frequently used as an adjective, and agrees with the noun it modifies: *ein durch die Stadt fließender Fluß*, "a river flowing through the city". It

is *never* used with the verb "to be", as in Eng. "I am going", "I was going"; translate such expressions by the ordinary present or past: *ich gehe, ich ging*. The Eng. "do" of questions is likewise omitted: *sehe ich?*, "do I see?"

1. Present Indicative (meaning: I love, am loving, do love)

Weak: <i>lieben</i> , "to love"		Strong: <i>sehen</i> , "to see"	
<i>ich lieb-e,</i>	I love	<i>ich seh-e,</i>	I see
<i>du lieb-st,</i> ¹⁰	you love (fam. sg.)	<i>du sieh-st,</i>	you see
<i>er lieb-t,</i> ¹⁰	he loves	<i>er sieh-t,</i>	he sees
<i>wir lieb-en,</i>	we love	<i>wir seh-en,</i>	we see
<i>ihr lieb-t,</i> ¹⁰	you love (fam. pl.)	<i>ihr seh-t,</i>	you see
<i>sie lieb-en,</i>	they love	<i>sie seh-en,</i>	they see
<i>Sie lieb-en,</i> you love (pol. sg. or pl.)		<i>Sie seh-en,</i> you see (pol. sg. or pl.).	

Irregular: ¹¹ <i>sein</i> , "to be"		<i>haben</i> , "to have"	
<i>ich bin,</i>	I am	<i>ich habe,</i>	I have
<i>du bist,</i>	you are (fam. sg.)	<i>du hast,</i>	you have (fam. sg.)
<i>er ist,</i>	he is	<i>er hat,</i>	he has
<i>wir sind,</i>	we are	<i>wir haben,</i>	we have
<i>ihr seid,</i>	you are (fam. pl.)	<i>ihr habt,</i>	you have (fam. pl.)
<i>sie sind,</i>	they are	<i>sie haben,</i>	they have

10. A few verbs the stem of which ends in a cluster of consonants require the insertion of *-t-* before the *-st* of the second singular and the *-t* of the third singular and second plural: *warten, du wartest, er wartet, ihr wartet*.

11. The so-called modal auxiliaries (for the use of which see p. 142) *dürfen*, "may", "be permitted"; *können*, "can", "be able"; *mögen*, "may", "like to"; *müssen*, "must", "have to"; *sollen*, "shall", "to be to"; *wollen*, "will", "want to" are conjugated like regular weak verbs in the plural of the present indicative and throughout the past; in the singular of the present they take the following forms: *dürfen - darf, darfst, darf; können - kann, kannst, kann; mögen - mag, magst, mag; müssen - muß, mußt, muß; sollen - soll, sollst, soll; wollen - will, willst, will*.

Werden, "to become", used as an auxiliary in the formation of the future and of the passive, has *werde, wirst, wird*, with a past *wurde*.

2. Past Indicative¹² (meaning: I was seeing, used to see)

Weak: lieben

ich lieb-te,	I used to love
du lieb-test,	you used to love
er lieb-te,	he used to love
wir lieb-ten,	we used to love
ihr lieb-tet,	you used to love
sie lieb-ten,	they used to love
Sie lieb-ten,	you used to love (polite)

Strong, sehen

ich sah,	I was seeing, used to see
du sahst,	you were seeing
er sah,	he was seeing
wir sahen,	we were seeing
ihr saht,	you were seeing
sie sahen,	they were seeing
Sie sahen,	you were seeing (pol.)

Irregular: sein

haben

ich war,	I was, used to be	ich hatte,	I had, used to have
du warst,	you were (fam. sg.)	du hattest,	you had
er war,	he was	er hatte,	he had
wir waren,	we were	wir hatten,	we had
ihr wart,	you were (fam. pl.)	ihr hattet,	you had
sie waren,	they were	sie hatten,	they had

3. Future (meaning: I shall speak) and Conditional (meaning: I should speak)

The future is formed by combining the present of *werden*, "to become", with the infinitive; the conditional by the past

12. The German past (*ich liebte*, *ich sah*) generally indicates the sort of continued or repeated past action that English normally indicates by using "used to" or "was" with the present participle. The normal English past ("I loved", "I saw") is best translated by the German present perfect, which translates also the English present perfect: *ich habe geliebt*, "I loved" or "I have loved"; *ich habe gesehen*, "I saw" or "I have seen".

subjunctive of *werden* with the infinitive. The infinitive stands at the end of the clause: *ich werde dieses Buch nicht lesen*, "I shall not read this book"; *ich würde Deutsch sprechen, wenn es leichter wäre*, "I should speak German if it were easier".

Future

<i>ich werde sprechen,</i>	I shall speak
<i>du wirst sprechen,</i>	you will speak
<i>er wird sprechen,</i>	he will speak
<i>wir werden sprechen,</i>	we shall speak
<i>ihr werdet sprechen,</i>	you will speak
<i>sie werden sprechen,</i>	they will speak

Conditional

<i>ich würde sprechen,</i>	I should speak
<i>du würdest sprechen,</i>	you would speak
<i>er würde sprechen,</i>	he would speak
<i>wir würden sprechen,</i>	we should speak
<i>ihr würdet sprechen,</i>	you would speak
<i>sie würden sprechen,</i>	they would speak

4. Compound Tenses (meaning: I have, had, shall have, should have spoken)

These are formed, as in English, by using the auxiliary *haben* ("to have") with the past participle; the latter stands at the end of the clause or sentence: *ich habe deinen Bruder nicht gesehen*, "I didn't see your brother". Many intransitive verbs indicating motion (*gehen*, "to go", *kommen*, "to come", etc.) and change of state (*sterben*, "to die", *werden*, "to become"), also *sein*, "to be" and *bleiben*, "to remain", use *sein*, ("to be") as an auxiliary instead of *haben*: *ich bin gegangen*, "I went"; *er war gekommen*, "he had come"; *sie ist geworden*, "she has become"; *sind Sie gewesen?*, "have you been?"; such verbs are indicated in the vocabulary thus: *kommen*, *kam*, *gekommen* (*sein*).

The past participle ends in *-(e)t* in the case of weak verbs, *-en* in the case of strong verbs; with *ge-* prefixed in both cases unless the accent fails to fall on the initial syllable (see page 127): *lieben*, p. p. *geliebt*; *haben*, p. p. *gehabt*; *sehen*, p. p.

gesehen; **sein**, p. p. **gewesen**. The past participle used with an auxiliary is invariable, but if it is used as an adjective, it agrees with its noun: **ein gut geschriebenes Buch**, "a well written book". Present Perfect: **ich habe geliebt**, "I have loved", "I loved"; **ich habe gesehen**, "I have seen", "I saw"; **ich bin gegangen**, "I have gone", "I went"; **ich bin gewesen**, "I have been", "I was". Past Perfect: **ich hatte gesprochen**, "I had spoken"; **ich hatte gelobt**, "I had praised"; **ich war gewesen**, "I had been"; **ich war gegangen**, "I had gone".

Future Perfect: **ich werde geliebt haben**, "I shall have loved"; **ich werde gewesen sein**, "I shall have been".

Perfect Conditional: **ich würde gesehen haben**, "I should have seen"; **ich würde gegangen sein**, "I should have gone".

5. Imperative (meaning: see!)

The second singular (familiar singular) normally is the same as the second singular of the present with the final **-st** removed:¹³ **höre!** or **hör!** (from **hören**), "listen!"; **sieh!**, "see!" (second singular present of **sehen** is **siehist**).

The second plural (familiar plural), and the polite form with **Sie** have the same form as the corresponding persons in the present: **liebt!**, **lieben Sie!**, "love!"; **seht!**, **sehen Sie!**, "see!"

"Let us" is translated by **laß** (fam. sg.), **laßt** (fam. pl.) or **lassen Sie**, followed by **uns** and the infinitive: **laß uns gehen**, "let us go"; **lassen Sie uns sprechen**, "let us speak".

6. Reflexive verbs.

The reflexive is more extensively used in German than in English.¹⁴ The reflexive pronouns are the same as the

13. Exceptional is **sei!**, "be!", from **sein** (2nd sg. present **bist**).

14. E. g., **sich freuen**, "to rejoice": **ich freue mich**, **du freust dich**, **er freut sich**, etc. The reflexive is also generally used in expressions referring to parts of the body, which take the definite article instead of the possessive, and a dative reflexive pronoun with the verb; **ich habe mir das Bein gebrochen**, "I broke my leg" (lit. "I broke the leg to myself").

accusative pronouns (*ich, dich, uns, euch*), save in the third person, where *sich* is used for both numbers and all genders. The dative pronoun is occasionally called for by the sense of the expression (*sich denken*, "to imagine"; literally, "to think to oneself"), and in this case the dative pronouns are used (*mir, dir, uns, euch*), but *sich* is still used in the third person.

7. Passive.

The passive voice is formed by using *werden* ("to become") with the past participle;¹⁵ *ich werde geliebt*, "I am loved"; *ich wurde geliebt*, "I was loved"; *ich werde geliebt werden*, "I shall be loved"; *ich bin geliebt worden*,¹⁶ "I have been loved"; *ich war geliebt worden*, "I had been loved"; *ich werde geliebt worden sein*, "I shall have been loved".

"By" is normally translated in the passive by *von* with the dative: *ich werde von meiner Mutter geliebt*, "I am loved by my mother".

Man ("one", "somebody") with the active often replaces the passive when the doer of the action is not expressed: *man fragte dich*, "you were asked"; *hier spricht man Deutsch*, "German is spoken here".

8. Subjunctive.

The German subjunctive has six tenses, one corresponding to each tense of the indicative. Its forms frequently coincide with those of the indicative; in the present tense and past tense the endings are normally *-e, -est, -e, -en, -et, -en*, and in the past tense of strong verbs there is a tendency to take umlaut wherever possible (Pres. Subj. of *sehen*: *seh-e, -est, -e, -en, -et, -en*; Past Subj. *säh-e -est, -e, -en, -et, -en*). The subjunctive is often

15. Distinguish carefully between the two uses of *werden* as an auxiliary: with the *infinitive* to form the future (*ich werde sehen*, "I shall see"), and with the *past participle* to form the passive (*ich werde gesehen*, "I am seen"). In the future passive, both uses appear (*ich werde gesehen werden*, "I shall be seen").

16. The normal past participle of *werden* is *geworden*, but the form *worden* is used instead in the formation of the passive.

used in subordinate clauses, especially after verbs of saying, thinking, asking, and the like: *er glaubte, daß ich krank sei*, "he thought I was ill"; *er sagte, daß ich kein Geld hätte*, "he said I had no money". Using the indicative instead of the subjunctive form is not an unforgivable crime.¹⁷

9. Modal Auxiliaries.

See note 11 for the conjugation of these verbs. In their compound tenses, these verbs use a form which resembles the infinitive instead of the past participle: *ich werde sprechen dürfen* (instead of *gedurft*), "I shall be allowed to speak"; *ich habe schreiben können* (instead of *gekonnt*), "I have been able to write".

In translating the English "will", *wollen* normally indicates willingness, *werden* simple futurity: *er wird morgen schreiben*, "he will write tomorrow"; but *willst du für mich arbeiten?* "will you work for me?"; *wollen wir jetzt nach Hause gehen?*, "shall we go home now?"

Mögen, especially with *gern*, has the meaning of "to be glad to, happy to": *ich mag gern mit Ihnen gehen*, "I'll gladly go with you".

10. Prefixes.

Verbs compounded with the prefixes *be-*, *emp-*, *ent-*, *er-*, *ge-*, *miß-*, *ver-*, *zer-*, (the same ones that do not take the accent; see p. 127) normally do not take *ge-* before the past participle: *verstehen*, "to understand", past participle *verstanden*, "understood"; *erzählen*, "to tell", p. p. *erzählt*, "told".

Verbs compounded with all other prefixes separate the prefix from the verb in the simple tenses, and place it at the end of the clause; *anfangen*, "to begin": present, *ich fange an*,

17. Note that the *würde* used to form the conditional (*ich würde sehen*, "I should see") is the past subjunctive of *werden*.

The present subjunctive of *sein* is irregular: *sei, seiest, sei, seien seiet, seien*. The past subjunctive is regular: *wäre*. *haben* has *hob* and *hätte*, both regular.

“I begin”; past, *ich fang an*, “I began”; *ich fange heute diese Arbeit an*, “I am beginning this work today”.

In the past participle, these verbs insert *-ge-* between the prefix and the verb (*angefangen*, “begun”), while if the infinitive is used in a construction requiring *zu*, the latter is also inserted between the prefix and the verb: *er wünscht heute anzufangen*, “he wishes to begin today”.

11. Word Order.

If the subject does not begin the sentence, the subject and verb are usually inverted (save after *aber*, *und*, and relative pronouns): *jetzt bin ich fertig*, “now I am ready”; *einen guten Hut suche ich*, “I’m looking for a good hat”.

In dependent clauses, the verb usually comes at the end of the clause: *ich weiß nicht, wo Sie Ihren Hut gekauft haben*, “I don’t know where you bought your hat”.

If the dependent clause precedes the main clause, both the above rules normally apply: *als ich ihn sah, ging er nach Hause*, “when I saw him, he was going home”.

VOCABULARY

Nouns are given with their respective article (indicating gender) in their nominative singular form, followed by the genitive ending (if any), followed by the plural ending (if any), with indication of umlaut change where this occurs.

Verbs are given in the infinitive form alone, if they are “weak”; thus, to love, *lieben*, indicates a past *liebte* and a past participle *geliebt*. If the verb is “strong”, the third person singular of the present indicative appears (indicating that the same change takes place in the second singular), provided there is a change of root vowel in those two forms; the past and past participle are then given; if the verb is conjugated with *sein*, the latter appears in parentheses at the close; thus, to fall, *fallen, fällt, fiel, gefallen (sein)*.

1. *World, Elements, Nature, Weather, Time.*

world, *die Welt*, -, -en
 earth, *die Erde*, -
 air, *die Luft*, -, -e
 water, *das Wasser*, -s, -
 fire, *das Feuer*, -s, -

light, *das Licht*, -es, -er
 sea, *das Meer*, -es, -e
 sun, *die Sonne*, -, -n
 moon, *der Mond*, -es, -e
 star, *der Stern*, -es, -e

.ky, heaven, der Himmel, -s, -
 wind, der Wind, -es, -e
 weather, das Wetter, -s, -
 snow, der Schnee, -s
 to snow, schneien
 rain, der Regen, -s, -
 to rain, regnen
 cloud, die Wolke, -, -n
 cloudy, bewölkt
 fog, der Nebel, -s, -
 ice, das Eis, -es
 mud, der Schlamm, -es
 time, die Zeit, -, -en
 year, das Jahr, -es, -e
 month, der Monat, -s, -e
 week, die Woche, -, -n
 day, der Tag, -es, -e
 hour, die Stunde, -, -n
 minute, die Minute, -, -n
 morning, der Morgen, -s, -
 noon, der Mittag, -es, -e
 afternoon, der Nachmittag, -es, -e
 evening, der Abend, -s, -e
 night, die Nacht, -, -e
 midnight, die Mitternacht, -, -e
 Sunday, der Sonntag
 Monday, der Montag

Tuesday, der Dienstag
 Wednesday, der Mittwoch
 Thursday, der Donnerstag
 Friday, der Freitag
 Saturday, der Samstag,
 der Sonnabend
 January, der Januar, -s
 February, der Februar, -s
 March, der März, -es
 April, der April, -s
 May, der Mai, -es
 June, der Juni, -s
 July, der Juli, -s
 August, der August, -s
 September, der September, -s
 October, der Oktober, -s
 November, der November, -s
 December, der Dezember, -s
 Spring, der Frühling, -s, -e
 Summer, der Sommer, -s, -
 Fall, der Herbst, -es, -e
 Winter, der Winter, -s, -
 North, der Norden, -s
 South, der Süden, -s
 East, der Osten, -s
 West, der Westen, -s

“It is warm”, “it is cold”, etc. are literally translated: es ist warm, es ist kalt.

(On) Monday we went home, (am) Montag gingen wir nach Hause; (on) the first of January, 1943, den (or am) ersten Januar neunzehnhundertdreißig.

The genitive form of days of the week, ending in -s, indicates customary action: Montags kommt er hierher, he comes here Mondays.

2. Family, Friendship, Love.

family, die Familie, -, -n
 husband, der Gatte, -n, -n; der
 Mann, -es, -er
 wife, die Gattin, -, -nen; die Frau,
 -, -en
 parents, die Eltern
 father, der Vater, -s, -

mother, die Mutter, -, -en
 son, der Sohn, -es, -e
 daughter, die Tochter, -, -en
 brother, der Bruder, -s, -en
 sister, die Schwester, -, -en
 uncle, der Onkel, -s, -en
 aunt, die Tante, -, -en

nephew, der Neffe, -n, -n
 niece, die Nichte, -, -n
 cousin, der Vetter, -s, -n; die
 Cousine, -, -n
 grandfather, der Großvater, -s, ``
 grandmother, die Großmutter, -, ``
 grandson, der Enkel, -s, -
 granddaughter, die Enkelin, -, -nen
 father-in-law, der Schwiegervater,
 -s, ``
 mother-in-law, die Schwieger-
 mutter, -, ``
 son-in-law, der Schwiegersohn,
 -es, ``
 daughter-in-law, die Schwiegertoch-
 ter, -, ``
 brother-in-law, der Schwager, -s, ``
 sister-in-law, die Schwägerin, -,
 -nen
 man, der Mann, -es, ``-er
 woman, die Frau, -, -en; das
 Weib, -es, -er
 child, das Kind, -es, -er
 boy, der Knabe, -n, -n; der Junge,
 -n, -n
 girl, das Mädchen, -s, -
 sir, Mr., der Herr, -n, -en (in

direct address, unless name
 follows, mein Herr)
 lady, Madam, Mrs., die Dame, -,
 -n; die Frau, -, -en (in direct
 address, unless name follows,
 gnädige Frau)
 Miss, young lady, das Fräulein,
 -s, - (in direct address, unless
 name follows, gnädiges Fräu-
 lein)
 friend, der Freund, -es, -e; die
 Freundin, -, -nen
 servant, der Diener, -s, -; der Be-
 diente, -n, -n; das Dienstmädchen,
 -s, -
 to introduce, vorstellen
 to visit, besuchen
 love, die Liebe, -
 to love, lieben
 to fall in love with, sich verlieben
 in (acc.)
 to marry, heiraten
 sweetheart, darling, der Schatz,
 -es, ``-e; das Liebchen, -s, -;
 der Liebling, -s, -e
 kiss, der Kuss, -es, ``-e
 to kiss, küssen

3. Speaking Activities.

word, das Wort, -es, ``-er (-e)
 language, die Sprache, -, -n
 to speak, sprechen, spricht, sprach,
 gesprochen
 to say, sagen
 to tell, relate, erzählen
 to inform, berichten; sagen
 to call, rufen, rief, gerufen
 to be called, one's name is, heißen,
 hieß, geheißten. (my name is
 William, ich heiße Wilhelm)
 to greet, grüßen
 to name, nennen, nannte, genannt
 to listen to, zuhören (fol. by

dative)
 to hear, hören
 to understand, verstehen, verstand,
 verstanden
 to mean, meinen, bedeuten
 to ask (for something), bitten, bat,
 gebeten (um etwas)
 to answer, antworten; erwidern
 to thank, danken (I thank you for
 that, ich danke Ihnen dafür)
 to complain (about), sich beklagen
 über
 to cry, shout, schreien, schrie, ge-
 schrien

4. *Materials.*

gold, das Gold, -es
 silver, das Silber, -s
 iron, das Eisen, -s
 steel, der Stahl, -es
 copper, das Kupfer, -s
 lead, das Blei, -es
 tin, der Zinn, -es
 oil, das Öl, -es
 gasoline, das Benzin, -s
 coal, die Kohle, -, -n
 fuel, der Brennstoff, -es, -e
 wood, das Holz, -es, ``-er

silk, die Seide, -, -n
 cotton, die Baumwolle,
 wool, die Wolle, -
 cloth, das Tuch, -es, ``-er
 to cut, schneiden, schnitt, geschnit-
 ten
 to dig, graben, gräbt, grub,
 gegraben
 to sew, nähen
 to mend, flicken
 to darn, stopfen

5. *Animals.*

animal, das Tier, -es, -e
 horse, das Pferd, -es, -e
 dog, der Hund, -es, -e
 cat, die Katze, -, -n
 bird, der Vogel, -s, ``-er
 donkey, der Esel, -s, -e
 mule, das Maultier, -es, -e; der
 Maulesel, -s, -e
 cow, die Kuh, -, ``-e
 ox, der Ochse, -n, -n
 pig, das Schwein, -es, -e
 chicken, das Huhn, -es, ``-er
 hen, die Henne, -, -n
 rooster, der Hahn, -es, ``-e

sheep, das Schaf, -es, -e
 goat, die Ziege, -, -n; die Geiß,
 -, -e
 mouse, die Maus, -, ``-e
 snake, die Schlange, -, -n
 fly, die Fliege, -, -n
 bee, die Biene, -, -n
 mosquito, gnat, die Schnake, -, -n;
 die Mücke, -, en; der Moskito,
 -s, -s
 spider, die Spinne, -, -n
 louse, die Laus, -, ``-e
 flea, der Floh, -es, ``-e
 bedbug, die Wanze, -, -n

6. *Money, Buying and Selling.*

money, das Geld, -es, -er
 coin, die Münze, -, -n; das Geld-
 stück, -es, -e
 dollar, der Dollar, -s, -e
 cent, der Cent, -s, -e
 mark, die Mark, -, -n
 pfennig, der Pfennig, -s, -e
 bank, die Bank, -, -en
 check, der Scheck, -es, -s; die
 Bankanweisung, -, -en

money order, die Postanweisung,
 -, -en
 to earn, verdienen
 to gain, to win, gewinnen, gewann,
 gewonnen
 to lose, verlieren, verlor, verloren
 to spend, ausgeben, gibt aus, gab
 aus, ausgegeben
 to lend, leihen, lieh, geliehen
 to owe, schulden; schuldig sein

to pay, zahlen; bezahlen
 to borrow, borgen (he borrowed two marks from me, er hat zwei Mark von mir geborgt)
 change, das Kleingeld, -es
 to change, exchange, tauschen; umtauschen; wechseln
 to return, give back, zurückgeben, gibt zurück, gab zurück, zurückgegeben
 price, der Preis, -es, -e
 expensive, dear, teuer; kostspielig
 cheap, billig
 store, shop, der Laden, -s, '-; das Geschäft, -es, -e
 piece, das Stück, -es, -e (a piece of bread, ein Stück Brot)
 slice, die Scheibe, -, -n; das Stück
 pound, das Pfund, -es, -e
 package, das Paket, -es, -e; das Bündel, -s, -; das Päckchen, -s, -
 bag, der Sack, -es, '-e

7. Eating and Drinking.

to eat, essen, ißt, aß, gegessen
 breakfast, das Frühstück, -s, -e
 to eat breakfast, frühstücken
 lunch, dinner, das Mittagessen, -s, -
 to eat lunch, to dine, zu Mittag essen
 supper, das Abendbrot, -es, -e
 to eat supper, Abendbrot essen; zu Abend essen
 meal, die Mahlzeit, -, -en
 dining-room, das Esszimmer, -s, -; der Speisesaal, -s, -säle
 menu, die Speisekarte, -, -n
 waiter, der Kellner, -s, -
 waitress, die Kellnerin, -, -nen
 restaurant, das Restaurant, -s, -e; das Gasthaus, -es, '-er

box, die Schachtel, -, -n; die Dose, -, -en
 basket, der Korb, -es, '-e
 goods, die Ware, -, -n
 to go shopping, einkaufen gehen
 to sell, verkaufen
 to buy, kaufen (- a ticket, eine Fahrkarte lösen)
 cost, die Kosten (pl.); der Preis
 to cost, kosten
 to be worth, wert sein; gelten.
 gift, galt, gegolten
 to rent, hire, mieten, vermieten
 to choose, wählen
 thief, robber, der Dieb, -es, -e; der Räuber, -s, -
 to steal, stehlen, stiehlt, stahl, gestohlen
 police, die Polizei, -
 policeman, der Polizist, -en, -en; der Schupo, -s
 honest, redlich; ehrlich; zuverlässig
 dishonest, unehrlich

bill, die Rechnung, -, -en
 to pass, reichen
 tip, das Trinkgeld, -es, -er
 to drink, trinken, trank, getrunken
 water, das Wasser, -s, -
 wine, der Wein, -es, -e
 beer, das Bier, -es, -e
 coffee, der Kaffee, -s
 tea, der Tee, -s, -e
 milk, die Milch, -
 bottle, die Flasche, -, -n
 spoon, der Löffel, -s, -
 teaspoon, der Teelöffel, -s, -
 knife, das Messer, -s, -
 fork, die Gabel, -, -n
 glass, das Glas, -es, '-er
 cup, die Tasse, -, -n
 napkin, die Serviette, -, -n

salt, das Salz, -es, -e
 pepper, der Pfeffer, -s, -
 plate, dish, der Teller, -s, -
 bread, das Brot, -es, -e
 butter, die Butter, -
 roll, das Brötchen, -s, -
 sugar, der Zucker, -s, -
 soup, die Suppe, -, -n
 rice, der Reis, -fes
 potato, die Kartoffel, -, -n
 vegetables, das Gemüse, -s, -
 meat, das Fleisch, -es
 beef, das Rindfleisch, -es
 steak, das Rumpfstück, -es, -e
 chicken, das Huhn, -es, -er
 chop, das Kotlett, -s, -e
 mutton, das Hammelfleisch, -es
 lamb, das Lammfleisch, -es
 veal, das Kalbfleisch, -es
 pork, das Schweinefleisch, -es
 sausage, die Wurst, -, -e
 ham, der Schinken, -s,
 bacon, der Speck, -es
 egg, das Ei, -es, -er

fish, der Fisch, -es, -e
 fried, gebraten
 cooked, gekocht
 boiled, gedämpft
 roast, geröstet
 baked, gebacken
 sauce, die Soße, -, -n (die Sauce)
 salad, der Salat, -es, -e
 cheese, der Käse, -s, -
 fruit, das Obst, -es
 apple, der Apfel, -s, -e
 pear, die Birne, -, -n
 grapes, die Weintrauben
 peach, der Pfirsich, -es, -e
 strawberry, die Erdbeere, -, -n
 nut, die Nuß, -, -e
 orange, die Apfelsine, -, -n
 lemon, die Zitrone, -, -n
 juice, der Saft, -es, -e
 cherry, die Kirche, -, -n
 dessert, der Nachtisch, -es, -e; die
 Nachspeise, -, -n
 pastry, das Gebäck, -es; das Back-
 werk, -es
 cake, der Kuchen, -s, -

8. Hygiene and Attire.

bath, das Bad, -es, -er
 to bathe, baden
 shower, das Sturzbad, -es, -er;
 das Brausebad, -es, -er; die
 Dusche, -, -n
 to wash, (sich) waschen, wäscht,
 wusch, gewaschen (I wash my
 hands, ich wasche mir die Hände)
 to shave, (sich) rasieren
 barber, der Friseur, -s, -e
 mirror, der Spiegel, -s, -
 soap, die Seife, -, -n
 razor, das Rasiermesser, -s, -

 Dutch, holländiſch; der Holländer, -ſ, -; die Holländerin
 Norwegian, norwegiſch; der Norweger, -ſ, -; die Norwegerin
 Swedish, ſchwediſch; der Schwede, -n, -n; die Schwedin
 Finnish, finniſch; der Finnländer, -ſ, -; die Finnländerin
 Belgian, belgiſch; der Belgier, -ſ, -; die Belgierin
 Polish, polniſch; der Pole, -n, -n; die Polin
 Danish, däniſch; der Däne, -n, -n; die Dänin
 Swiss, ſchweizeriſch; der Schweizer, -ſ, -; die Schweizerin
 Portuguese, portugieſiſch; der Portugieſe, -n, -n; die Portugieſin
 Yugoslav, jugoſlawiſch; der Jugoſlawe, -n, -n; die Jugoſlawin

19. The adjective is given first, then the noun, in masculine and feminine form (all feminines in -in form their plural in -innen). Note the difference in the use of these forms: the American Navy, die amerikaniſche Flotte; I am an American, ich bin Amerikaner. Note also the fact that the noun is capitalized, while the adjective is not. For names of languages, use the adjective form as a noun, capitalizing it save after the preposition auf, "in": English (the English language), das Engliſch(e); to speak German, Deutſch ſprechen; in German, auf deutſch; into German, ins Deutſche.

Bulgarian, bulgarisch; der Bulgare, -n, -n; die Bulgarin
 Czech, tschechisch; der Tscheche, -n, -n; die Tschechin
 Greek, griechisch; der Grieche, -n, -n; die Griechin
 Turkish, türkisch; der Türke, -n, -n; die Türkin
 Roumanian, rumänisch; der Rumäne, -n, -n; die Rumänin
 Hungarian, ungarisch; der Ungar, -s, -en; die Ungarin
 Austrian, österreichisch; der Österreicher, -s, -; die Österreicherin
 Malay, malaiisch; der Malaye, -n, -n; die Malain
 Persian, persisch; der Perser, -s, -; die Perserin
 Arabian, Arab, Arabic, arabisch; der Araber, -s, -; die Araberin
 Jewish, Hebrew, jüdisch; hebräisch; der Jude, -n, -n; die Jüdin; der
 Hebräer, -s, -; die Hebräerin
 Australian, australisch; der Australier, -s, -; die Australierin
 African, afrikanisch; der Afrikaner, -s, -; die Afrikanerin
 Canadian, kanadisch; der Kanadier, -s, -; die Kanadierin
 Mexican, mexikanisch; der Mexikaner, -s, -; die Mexikanerin
 Cuban, kubanisch; der Kubaner, -s, -; die Kubanerin
 Brazilian, brasilianisch; der Brasilianer, -s, -; die Brasilianerin
 Argentinian, argentinisch; der Argentinier, -s, -; die Argentinierin
 Chilean, chilenisch; der Chilene, -n, -n; die Chilenin
 Peruvian, peruanisch; der Peruaner, -s, -; die Peruanerin
 Puerto Rican, portorikanisch; der Portorikaner, -s, -; die Portorikanerin

25. Adverbs and Adverbial Expressions.

today, heute	early, früh
yesterday, gestern	late, spät
tomorrow, morgen	already, schon
day before yesterday, vorgestern	no longer, nicht mehr
day after tomorrow, übermorgen	yet, still, noch (one more, noch ein; something more, noch etwas; many more, noch viele)
tonight, heute Abend; heute Nacht	not yet, noch nicht
last night, gestern Abend (Nacht)	now, jetzt
this morning, heute Morgen	then, dann; da
in the morning, morgens; am Morgen	afterwards, nachher
in the afternoon, nachmittags; am Nachmittag	just now, soeben
in the evening, abends; am Abend	before, earlier, vorher
in the night, nachts; in der Nacht	never, nie, niemals (never again, nimmermehr)
this afternoon, heute Nachmittag	always, immer
tomorrow morning, morgen früh	forever, (auf) ewig
tomorrow night, morgen Abend (Nacht)	soon, bald
	often, oft

sometimes, manchmal
 seldom, selten
 usually, gewöhnlich; meistens
 from time to time,
 von Zeit zu Zeit; ab und zu
 occasionally, gelegentlich
 fast, quickly, schnell
 slowly, langsam
 long ago, längst
 here, hier; her
 there, da
 over there, dort; da drüben
 down there, drunten
 here and there, hier und da:
 hin und wieder
 to and fro, hin und her
 near by, in der Nähe; nah
 far away, in der Ferne; weit
 entfernt
 up (stairs), oben
 down (stairs), unten
 ahead, in front, vorne
 behind, in back, hinten
 forward, vorwärts
 back, backward, rückwärts
 outside, draußen
 inside, drinnen
 everywhere, überall
 also, too, auch
 therefore, also; folglich
 yes, ja
 no, nein
 not, nicht
 very, much, sehr
 little, not much, wenig
 well, gut
 badly, schlecht
 better, besser

worse, schlimmer
 only, nur
 more, mehr
 less, weniger
 as - as, so - wie
 as much (many) - as, so viel(e)
 - wie
 how much?, wieviel?
 how many? wie viele?
 how?, wie?
 too much (many), zu viel(e)
 really, truly, wirklich
 about, approximately, ungefähr
 rather, ziemlich
 somewhat, etwas
 so much (many), so viel(e)
 as, like, wie
 besides, außerdem
 finally, in short, endlich; kurz
 almost, fast; beinahe(e)
 quite, altogether, ganz
 gladly, gern(e)
 certainly, gewiß; sicher(lich)
 at once, gleich; sofort
 at all, irgend (anything at all.
 irgend etwas; not at all, gar
 nicht)
 hardly, kaum
 aloud, laut
 of course, natürlich
 suddenly, plötzlich
 perhaps, maybe, vielleicht
 a little, ein wenig
 together, zusammen
 again, wieder (again and again
 repeatedly, immer wieder)
 at least, wenigstens
 for lack of, aus Mangel an

26. *Conjunctions.*²⁰

and, **und**
 but, **aber**
 or, **oder**
 why?, **warum?**
 why!, **na!** (**doch!** to refute a negative statement)
 because, **weil; da**
 if, **wenn**²¹ (as if, **als wenn, als ob**)
 whether, **ob**²²
 before, **ehe; bevor**
 when, as, than, **als**
 as long as, **so lange (wie)**

where, **wo** (whence, **woher; whither, wohin**)
 until, **bis**
 although, **obgleich; obwohl; obgleich**
 unless, **wenn nicht; ausgenommen; es sei denn daß**
 while, **indem; während**
 when?, **wann?**
 that, **daß**²²
 for, **denn; weil**
 after, **nachdem**
 as soon as, **sobald**

27. *Indefinite Pronouns and Adjectives.*

such, **solch** (such a soldier, **solch ein Soldat**)
 all kinds of, **allerlei**
 all, everything, **all; alles** (everything good, **alles Gute**)
 all, whole, entire, **ganz** (all the world, **die ganze Welt**)
 everyone, **alle** (all the men, **all die Leute**)
 something, **etwas** (something bad, **etwas Schlechtes**)
 someone, **jemand**
 nothing, **nichts** (nothing new, **nichts Neues**)
 no one, **niemand**
 no (adjective), **kein**

either - or, **entweder - oder**
 neither - nor, **weder - noch**
 each, every, **jeder (jede, jedes)**
 (an)other, (ein) **anderer**
 much, lots of, **viel** (lots of good, **viel Gutes**)
 some, **einige**
 few, **wenige**
 many, **viele** (many a soldier, **manch ein Soldat**)
 several, a few, **mehrere**
 little, not much, **wenig** (not much new, **wenig Neues**)
 both, **beide** (both the men, **die beiden Männer**)
 enough, **genug**

20. Note that in all dependent clauses the verb is placed at the end of the clause, and if a compound tense is used, the auxiliary follows the participle: he must come, because I'm going home, **er muß kommen, weil ich nach Hause gehe**; I came before he went home, **ich bin angekommen, ehe er nach Hause gegangen ist**.

21. Usually takes the subjunctive when English uses "should" or "would": if I had time, I should do it, **wenn ich Zeit hätte, so täte ich es (so würde ich es tun)**.

22. Usually takes the subjunctive after verbs of saying, thinking, asking: he thought that I was sick, **er glaubte, daß ich krank sei**; he asked me whether I was sick, **er fragte mich, ob ich krank sei**.

28. *Prepositions.*²³

- of (use the genitive case); *von* is occasionally used: the streets of Paris, *die Straßen von Paris* from, out of; *von* (d.); *aus* (d.) to (use the dative case, unless motion is implied); *zu* (d.); *an* (d. or a.); *nach* (d.): I go to him, *ich gehe zu ihm*; I go to the window, *ich gehe an das Fenster*; I go to Berlin, *ich gehe nach Berlin*; I go home, *ich gehe nach Hause*; to school, in *die Schule*.
- at, *an* (d. or a.); at the window, *am Fenster*; at school, in *der Schule*; at the post-office, *auf der Post*; at home, *zu Hause*.
- with, *mit* (d.)
without, *ohne* (a.)
- in, in (d. or a.); in the country, *auf dem Lande*; in the streets, *auf den Straßen*; in German, *auf deutsch*
- on, upon, *auf* (d. or a.); on Sunday, *am Sonntag*; on foot, *zu Fuß*
- over, above, across, *über* (d. or a.)
- for, *für* (a.)
- until, up to, as far as, *bis* (a.); *bis zu* (d.); until four o'clock, *bis vier Uhr*; as far as the school, *bis zur Schule*
- since, *seit* (d.)
- toward, *zu*; *an*; *bis*; *bis an*; *bis zu*; *wider* (a.)
- between, *zwischen* (d. or a.)
- among, *unter* (d. or a.)
- near, *nahe* (d.); *bei* (d.); he stands near me, *er steht nahe bei mir*
- by, *von* (d.); it was done by him, *es wurde von ihm getan*
- far from, *weit von*
- before, in front of, *vor* (d. or a.)
- after, *nach* (d.)
- opposite, *gegenüber*; opposite me, *mir gegenüber*
- back of, behind, *hinter* (d. or a.)
- under(neath), below, *unter* (d. or a.)
- instead of, (an) *statt* (g.)
- beside, next to, *neben* (d. or a.); *bei* (d.)
- inside of, *innerhalb* (g.)
- outside of, *außerhalb* (g.)
- at the house of, *bei* (d.)
- on account of, because of, *wegen* (g.)
- through, by means of, *durch* (a.)
- against, *gegen* (a.); *wider* (a.)
- on the other side of, *jenseits* (g.)
- on this side of, *diesseits* (g.)
- in spite of, *trotz* (g.)
- about, around, *um* (a.)
- concerning, *von* (d.); *über* (a.)
- in order to, *um - zu*
- during, *während* (g.)

23. The case required by each preposition (genitive, dative or accusative) is indicated thus: (g.), (d.), (a.). Prepositions taking either the dative or the accusative are used with the former when place where, but no motion, is implied, the latter when there is motion: he stood in the room, *er stand im Zimmer*; he was going into the room, *er ging in das Zimmer*. Note *am* for *an dem*, *im* for *in dem*, *ins* for *in das*, *aufs* for *auf das*, etc.; these combinations are optional.

29. *Special Expressions and Idioms.*

good morning, guten Morgen!

good day, guten Tag!

good evening, guten Abend!

good night, gute Nacht!

good-bye, auf Wiedersehen!

I'll see you later, bis auf Weiteres!

I'll see you tomorrow, bis (auf) Morgen!

I'll see you tonight, bis zum Abend!; bis heute Abend!

just now, gerade jetzt

hello, hallo! (on the telephone - hier Herr followed by speaker's name)

how are you?, wie geht's?

I'm (very) well, es geht mir (sehr; ganz) gut

I'm (much) better, es geht mir (viel) besser

what time is it?, wieviel Uhr ist es?; wie spät ist es?

it's six o'clock, es ist sechs Uhr

at six o'clock, um sechs (Uhr)

at about six, ungefähr um sechs (Uhr); um sechs Uhr ungefähr

at half past six, um halb sieben

at a quarter to six, um drei viertel sechs; um viertel vor sechs

at a quarter past six, um viertel sieben; um viertel nach sechs

last year, letztes Jahr

next year, nächstes Jahr

every day, jeden Tag; täglich

all (the whole) day, den ganzen Tag

please, bitte!

tell me, sagen Sie mir!

bring me, bringen Sie mir!

show me, zeigen Sie mir!

thank you, danke (schön)

don't mention it, bitte schön; bitte sehr; nichts zu danken; gern geschehn

will you give me?, wollen (würden) Sie mir -(bitte) geben?

pardon me, entschuldigen Sie (bitte)!; verzeihen Sie!

it doesn't matter, es macht nichts aus

never mind, lassen Sie es gut sein!

I'm sorry, es tut mir leid

I can't help it, ich kann mir nicht helfen (I can't help doing it, ich kann nicht umhin es zu tun)

it's nothing, es ist ja wirklich gar nichts

what a pity!, wie schade!

it's too bad, das ist schade

I'm glad, es freut mich; ich freue mich

I have to, ich muß

I agree (all right; O. K.), das ist mir recht; (ich bin) einverstanden
 where is (are)?, wo ist (find)?
 there is (are) (pointing out), da ist (find)
 there is (are) (stating), es gibt; es ist (find)
 where are you going?, wohin gehen Sie?
 which way? (direction), wo?; wohin?; (fashion), wie?; auf welche
 Weise?
 this (that) way (direction), in dieser (jener) Richtung; hierher; da
 drüben
 this (that) way (fashion), auf diese (jene) Weise; so
 to the right, nach Rechts
 to the left, nach Links
 straight ahead, gerade aus
 come with me, kommen Sie mit (mir) !
 what can I do for you?, womit kann ich dienen?; wie kann ich Ihnen
 behilflich sein?
 what is it?, what is the matter?, was ist los?; was geht denn da vor?
 what is the matter with you?, was fehlt Ihnen?
 what do you want?, was wünschen (wollen) Sie?
 what are you talking about?, wovon reden Sie?; was erzählen Sie
 denn da?: worum handelt es sich eigentlich?
 what does that mean?, was heißt das?
 what do you mean?, was wollen Sie damit sagen? ; wie meinen Sie?
 how much is it?, wieviel (kostet es)?
 anything else?. what else?, noch etwas?, was noch?
 nothing else, nichts mehr
 do you speak German?, sprechen Sie Deutsch?
 a little, ein wenig
 do you understand, verstehen Sie?
 I don't understand, ich verstehe nicht
 speak more slowly. sprechen Sie langsamer!
 do you know?, wissen Sie?
 I don't know, ich weiß nicht
 I can't, ich kann nicht
 what do you call this in German?. wie heißt das auf deutsch?
 I'm an American, ich bin Amerikaner
 I'm (very) hungry, ich bin (sehr) hungrig; ich habe (großen) Hunger
 I'm (very) thirsty, ich bin (sehr) durstig; ich habe (großen) Durst
 I'm sleepy. ich bin schläfrig
 I'm warm, mir ist warm (I'm cold, mir ist kalt)
 it's warm (cold, windy, sunny, fine weather, bad weather). es ist
 warm (kalt, windig, sonnig, schönes Wetter, schlechtes Wetter)
 it's forbidden, es ist verboten (untersagt); no smoking, Rauchen
 verboten

luckily, fortunately, glücklicherweise
 unfortunately, unglücklicherweise; leider
 is it not so?, nicht wahr? (use this invariable expression wherever

English repeats the question: you are going, aren't you?; he is, isn't he?)

not at all, gar nicht; nicht im geringsten
 how old are you?, wie alt sind Sie?

I'm twenty years old, ich bin zwanzig Jahre alt

how long have you been here?, wie lange sind Sie (schon) hier?

how long have you been waiting?, wie lange warten Sie schon?

as soon as possible, so bald wie möglich

come here, kommen Sie (hier) her!

come in! eintreten!; herein!

look!, sehen Sie!

look out!, careful!, Vorsicht!; Achtung!

just a moment!, einen Augenblick!

darn it!, verdamnit!; verflucht!

darn the luck!, zum Teufel noch mal!

for heaven's sake!, um Gottes Willen!

gangway!; one side!, aufpassen, bitte!; passen Sie auf!; Achtung!;

Vorsicht!

as you please, wie es Ihnen beliebt

listen!, hören Sie mal!

look here!, say!, sagen Sie mal!

may I introduce my friend?, darf ich meinen Freund vorstellen (bekannt machen?)

glad to meet you, es freut mich Sie kennen zu lernen; sehr angenehm

no admittance, kein Eingang!; Eintritt verboten!

notice!, Bekanntmachung!

nonsense!, Unsinn!

to your health!, profit!; prost!

I should like to, ich möchte (gern)

as quickly as possible, so schnell wie möglich

stop!, halt!

keep right (left), rechts (links) fahren!

entrance, Eingang

exit, Ausgang

hurry!, beeilen Sie sich!

warning!, Achtung!; Vorsicht!

CHAPTER V

LANGUAGES OF THE ROMANCE GROUP

This large and important language group, vying with the Germanic for first place in number of speakers and cultural importance among the Indo-European families, is characterized by descent from a common and almost fully known ancestor, Latin, in its Classical and Vulgar varieties. Of the five national languages of this group (French, Spanish, Portuguese, Italian, Roumanian) the first four are numerically and culturally of somewhat comparable importance, each within its own sphere.

French, the native tongue of nearly 60,000,000 people in France, Belgium, Switzerland, Canada and Haiti, is also an extremely widespread cultural and secondary tongue (it has been estimated that perhaps 50,000,000 additional people throughout the world can be reached with it), and a language of colonization second only to English in importance (the colonial populations under French rule amount to over 80,000,000 people).

Spanish, the national tongue of Spain (over 25,000,000) and the official tongue of the Spanish colonies (about 1,000,000), is also the primary language of Mexico, most of Central America and the Antilles, and of South America outside of Brazil and the Guianas. The total number of Spanish speakers in the Western Hemisphere is over 80,000,000.

Portuguese serves Portugal (about 8,000,000) and the Portuguese colonies (nearly 11,000,000). As the national tongue of Brazil (44,000,000), Portuguese reaches a total population of over 60,000,000.

Italian, the national tongue of Italy (45,000,000), is usable in Italy's colonial empire (Dodecanese, Libya, Italian

East Africa, etc. — about 13,000,000), and is current among large immigrant groups in North and South America, totalling perhaps 10,000,000.

The rich cultural background of all these languages gives them added importance.

Roumanian, the fifth tongue of the group, serves perhaps 16,000,000 of pre-war Roumania's 20,000,000 inhabitants, with additional small and isolated groups on Russian, Yugoslav, Hungarian, Greek and Italian territory.

Rumansh (Ladin, Rhetian), in its Engadine-Grisons variety, may be termed a sixth national tongue, its use having recently been made official in Switzerland. Swiss native speakers of Rumansh, however, number less than 50,000, and a far larger number of Rumansh speakers (about 1,000,000) is located on Italian soil, in the plain of Friuli and the valleys of the Trentino.

Among non-national Romance varieties which nevertheless possess a cultural and literary background are Provençal (once a fairly unified, literary language spoken throughout southern France; today only a series of local dialects); Catalan (spoken in Catalonia, Andorra, the southeastern Pyrenean region of France, the Balearic Islands, and extending, with slight variations, into the Spanish region of Valencia); Sardinian (spoken in central and southern Sardinia, and differing so radically from Italian that it can in no way be classed as an Italian dialect); Galician (used in the extreme northwest of Spain and forming part of the Portuguese rather than of the Spanish dialectal system). Some dialects of French (Picard, Norman, Walloon, Lorrain, etc.) and of Italian (Sicilian-Calabrian, Neapolitan-Abruzzese, Venetian, and the so-called Gallo-Italian dialects — Piedmontese, Lombard, Emilian and Ligurian) display such strong divergences from the national tongues that one may safely assert that political circumstances alone have prevented them from developing into national languages.

The following series of words will serve to illustrate the

major points of similarity and divergence among the national Romance languages, and their relationship to the original Latin and to one another. Other resemblances and differences will become evident in the course of the discussion of the individual languages.

English	Latin	French	Spanish	Portuguese	Italian	Roumanian
all	<i>totus</i>	<i>tout</i>	<i>todo</i>	<i>todo</i>	<i>tutto</i>	<i>tot</i>
arm	<i>brachium</i>	<i>bras</i>	<i>brazo</i>	<i>braço</i>	<i>braccio</i>	<i>braț</i>
black	<i>niger</i>	<i>noir</i>	<i>negro</i>	<i>negro</i>	<i>nero</i>	<i>negru</i>
bread	<i>panis</i>	<i>pain</i>	<i>pan</i>	<i>pão</i>	<i>pane</i>	<i>pâine</i>
breast	<i>pectus</i>	<i>poitrine</i>	<i>pecho</i>	<i>peito</i>	<i>petto</i>	<i>piept</i>
cold	<i>frigidus</i>	<i>froid</i>	<i>frío</i>	<i>frio</i>	<i>freddo</i>	<i>frig</i>
come	<i>venire</i>	<i>venir</i>	<i>venir</i>	<i>vir</i>	<i>venire</i>	<i>veni</i>
daughter	<i>filia</i>	<i>fille</i>	<i>hija</i>	<i>filha</i>	<i>figlia</i>	<i>fiică</i>
do	<i>facere</i>	<i>faire</i>	<i>hacer</i>	<i>fazer</i>	<i>fare</i>	<i>face</i>
dog	<i>canis</i>	<i>chien</i>	<i>perro</i>	<i>cão</i>	<i>cane</i>	<i>câine</i>
drink	<i>bibere</i>	<i>boire</i>	<i>beber</i>	<i>beber</i>	<i>bere</i>	<i>bea</i>
ear	<i>auricula</i>	<i>oreille</i>	<i>oreja</i>	<i>orelha</i>	<i>orecchia</i>	<i>ureche</i>
earth	<i>terra</i>	<i>terre</i>	<i>tierra</i>	<i>terra</i>	<i>terra</i>	<i>pământ</i>
eye	<i>oculus</i>	<i>oeil</i>	<i>ojo</i>	<i>olho</i>	<i>occhio</i>	<i>ochiu</i>
father	<i>pater</i>	<i>père</i>	<i>padre</i>	<i>pai</i>	<i>padre</i>	<i>tată</i>
foot	<i>pes</i>	<i>pied</i>	<i>pie</i>	<i>pé</i>	<i>piede</i>	<i>picioar</i>
full	<i>plenus</i>	<i>plein</i>	<i>lleno</i>	<i>cheio</i>	<i>pieno</i>	<i>plin</i>
gold	<i>aurum</i>	<i>or</i>	<i>oro</i>	<i>ouro</i>	<i>oro</i>	<i>aur</i>
good	<i>bonus</i>	<i>bon</i>	<i>bueno</i>	<i>bom</i>	<i>buono</i>	<i>bun</i>

man	<i>homo</i>	<i>homme</i>	<i>hombre</i>	<i>homem</i>	<i>uomo</i>	<i>om</i>
milk	<i>lac</i>	<i>lait</i>	<i>leche</i>	<i>leite</i>	<i>latte</i>	<i>lapte</i>
night	<i>nox</i>	<i>nuit</i>	<i>noche</i>	<i>noite</i>	<i>notte</i>	<i>noapte</i>

English	Latin	French	Spanish	Portuguese	Italian	Roumanian
ox	<i>bos</i>	<i>boeuf</i>	<i>buey</i>	<i>boi</i>	<i>bue</i>	<i>bou</i>
one	<i>unus</i>	<i>un</i>	<i>uno</i>	<i>um</i>	<i>uno</i>	<i>un</i>
two	<i>duo</i>	<i>deux</i>	<i>dos</i>	<i>dois</i>	<i>due</i>	<i>doi</i>
three	<i>tres</i>	<i>trois</i>	<i>tres</i>	<i>três</i>	<i>tre</i>	<i>trei</i>
four	<i>quattuor</i>	<i>quatre</i>	<i>cuatro</i>	<i>quatro</i>	<i>quattro</i>	<i>patru</i>
five	<i>quinque</i>	<i>cinq</i>	<i>cinco</i>	<i>cinco</i>	<i>cinque</i>	<i>cinci</i>
six	<i>sex</i>	<i>six</i>	<i>seis</i>	<i>seis</i>	<i>sei</i>	<i>șase</i>
seven	<i>septem</i>	<i>sept</i>	<i>siete</i>	<i>sete</i>	<i>sette</i>	<i>șapte</i>
eight	<i>octo</i>	<i>huit</i>	<i>ocho</i>	<i>oito</i>	<i>otto</i>	<i>opt</i>
nine	<i>novem</i>	<i>neuf</i>	<i>nueve</i>	<i>nove</i>	<i>nove</i>	<i>nouă</i>
ten	<i>decem</i>	<i>dix</i>	<i>diez</i>	<i>dez</i>	<i>dieci</i>	<i>zece</i>
hundred	<i>centum</i>	<i>cent</i>	<i>ciento</i>	<i>cento</i>	<i>cento</i>	<i>sută</i>
thousand	<i>mille</i>	<i>mille</i>	<i>mil</i>	<i>mil</i>	<i>mille</i>	<i>mie</i>

Additional points of resemblance and difference may be gathered from the following translations of John 3.16 (*For God so loved the world that He gave His only begotten Son, that whosoever believeth in Him should not perish, but have everlasting life*):

Latin: *Sic enim Deus dilexit mundum, ut Filium suum unigenitum daret, ut omnis, qui credit in eum, non pereat, sed habeat vitam aeternam.*

French: *Car Dieu a tellement aimé le monde, qu'il a donné son Fils unique, afin que quiconque croit en lui ne périsse point, mais qu'il ait la vie éternelle.*

Provençal (modern; Grasse): *Car Diéu a tant ama lou mounde que i'a douna soun Fiéu soulet, per que tout ome que crèi en éu noun perigue, mai ague la vido eternalo.*

Catalan: *Car talment ha estimat Déu el món, que donà son Fill unigènit, a fi que tot el qui creu en ell no es perdi, ans tingui vida eterna.*

Spanish: *Porque de tal manera amó Dios al mundo, que dió a su Hijo unigénito, para que todo aquel que cree en él, no perezca, mas tenga vida eterna.*

Portuguese: *Porque assim amou Deus ao mundo, que lhe*

deu seu Filho unigénito, para que todo o que crê nêle não pereça, mas tenha a vida eterna.

Italian: *Infatti Dio ha talmente amato il mondo da dare il suo Figliuolo unigenito, affinché chiunque crede in Lui non perisca, ma abbia la vita eterna.*

Roumanian: *Fiindcă atât de mult a iubit Dumnezeu lumăa, că a dat pe singurul Lui Fiu, pentru că oricine crede în El, să nu piară, ci să aibă viața vecinică.*

Rumansh (Lower Engadine): *Perche cha Deis ha tant smâ il muond, ch'el ha dat seis unigenit figl, acio cha scodün chi craja in el non gaja a perder, ma haja la vita eterna.*

Among grammatical characteristics common to all the Romance languages may be mentioned: a) the reduction of grammatical genders to a masculine-feminine system, with the old Latin neuter gender generally discarded, and Latin neuter nouns becoming either masculine or feminine;¹ b) the disappearance of the Latin inflectional system for nouns and adjectives, so that there are today no separate "cases" for nouns in the Romance languages, which indicate case-relations, even more exclusively than English, by means of word-order and prepositions;² c) retention of the inflectional system for verbs, which are generally used (save in French) without the subject pronoun, since distinctive endings for persons and numbers still appear.

1. A few traces of the Latin neuter appear today, in some Italian and Roumanian irregular plurals (It. *il braccio, le braccia*; Roum. *brațul, brațele*); in the Spanish "neuter" article *lo* and the Spanish and Portuguese "neuter" demonstrative pronouns (*esto, eso, aquello; isto, isso, aquilo*); in a few French forms like *ceci* and *cela*; etc. But for practical purposes, it may be asserted that the neuter gender has disappeared from the Romance tongues.

2. Roumanian is an exception to this, having retained a separate nominative-accusative and genitive-dative, as well as occasional vocative forms. Roumanian also distinguishes itself from its sister Romance tongues by using a definite article which is added on to the noun, instead of being used before the noun. Considerable trace of the Latin inflectional system still appears in Romance personal pronouns (e. g., French *il, le, la, lui; ils, les, leur, eux, elles*).

In syntax, word-arrangement within the sentence, use of verb-tenses and moods, the Romance languages, possessing a common point of departure and having enjoyed very close cultural relations throughout their history (with the exception of Roumanian), are fairly close to one another, so that literal word-for-word translation from one to another is usually possible; this applies more to the literary and cultivated than to the lower-class language.

Vocabulary resemblances are fairly common, as may be seen from the list of words in ordinary use given above. Striking divergences also appear, however.³ The vocabularies of Spanish and Portuguese have borrowed extensively from Arabic, those of French and Italian from Germanic, and that of Roumanian from Slavic.

Some degree of mutual comprehensibility, especially among the more cultured classes, is fairly general for Spanish, Portuguese and Italian, but does not extend to French and Roumanian without special study.

Distinctive of the written languages are the symbols ç in Portuguese and French; ñ in Spanish; ã, õ, lh, nh in Portuguese; ă, ș, ț in Roumanian.

Distinctive of the spoken tongues are the nasal sounds of French and Portuguese; the middle vowels (represented in writing by *u, eu, oeu*) of French; the *â, î* of Roumanian (a sound which Roumanian shares with Russian, and the closest English approximation to which is the *γ* of "rhythm"); the clearly audible double consonant sounds of Italian; the guttural *j* of Spanish; the uvular *r* of Parisian French, in contrast to the trilled *r* of the other languages (the trilled *r* is quite common in provincial French).

3. The word for "bat", for instance, is *chauve-souris* in French, *murciélago* in Spanish, *pipistrello* in Italian; while *negro* may be used for "black" in Portuguese, the more common word is *prêto*, which would be incomprehensible elsewhere save in Spanish (*prieto*), where it is far less commonly used.

ROUMANIAN

ALPHABETIC NOTATION — as in English; **k, q, w, y** appear only in foreign words. Additional symbols: **ă, â, î, ș, ț**.

SOUNDS

a = father; **ă** = bacon; both **â** and **î** = sound somewhat similar to Eng. rhythm; there is no difference between **â** and **î**; **î** is used initially (*în*); **â** generally within the word (*cânta*).

e initially often = yes; elsewhere, = met; **i** = machine; **o** = or; **u** = food.

c before a, o, u or consonant (and also **ch** before e, i) = cold.

c before e, i = chill.

g before a, o, u or consonant (and also **gh** before e, i) = go.

g before e, i = gin.

j = pleasure.

s = so, never rose.

ș = sure.

ț = hearts.

There is no definite rule of accentuation; the accent generally falls on the last, second from last, or third from last syllable; words of two syllables are generally accented on the first; words ending in -ar, -at, -el, -esc, -et, -ent, -ez, -os, are generally stressed on the last syllable. The only written accent is ` , used on the final vowel of verb-forms when no other diacritic mark appears (*cântă*, "to sing").

GRAMMATICAL SURVEY

Articles and nouns.

There are in Roumanian two cases, a nominative-accusative and a genitive-dative (separate vocative forms also appear).

There are only two genders, masculine and feminine.⁴ Outside of natural gender, nouns ending in consonants are generally masculine, those in *-ă* generally feminine. The indefinite article is *un* (gen.-dat. *unui*) for the masculine; *o* (gen.-dat. *unei*) for the feminine: *un amic*, "a friend"; *unui amic*, "to, of a friend"; *o mamă*, "a mother"; *unei mame*, "to, of a mother".

The definite article is added on to the noun. Masculine nouns ending in *-e* add *le* (*rege*, "king"; *regele*, "the king"); masculine nouns ending in consonants add *-ul* (*domn*, "gentleman"; *domnul*, "the gentleman"; *cal*, "horse"; *calul*, "the horse"). Feminine nouns ending in *-ă* change *-ă* to *-a* (*mamă*, "mother"; *mama*, "the mother"; *soră*, "sister"; *sora*, "the sister"); feminine nouns ending in *-e* add *-a* (*carne*, "meat"; *carnea*, "the meat"; *servitoare*, "maid"; *servitoarea*, "the maid").

The genitive-dative case is indicated in the masculine by adding the article *-lui* if the noun ends in a vowel, *-ului* if it ends in a consonant (*regelui*, "of, to the king"; *domnului*, "of, to the gentleman"; *calului*, "of, to the horse"). In the feminine, it is indicated by changing *-ă* or *-e* to *-ei* (*mamei*, "of, to the mother"; *sorei*, "of, to the sister"; *servitoarei*, "of, to the maid").

In the plural, masculine nouns ending in *-e* change *-e* to *-i*, while those ending in consonants add *-i* (*domn*, pl. *domni*, "gentlemen"; *rege*, pl. *regi*, "kings"). To this *-i*, another *-i* is added for the article (*domnii*, "the gentlemen"; *regii*, "the kings"); but to form the genitive-dative, the second *-i* is replaced by *-lor* (*domnilor*, "of, to the gentlemen"; *regilor*, "of, to the kings"). Feminine nouns in *-ă* change to *-e* in the plural (*mamă*, pl. *mame*, "mothers"; those in *-e* remain for the most part unchanged: *servitoare*, pl. *servitoare*); the definite article is then suffixed by adding *-le* (*mamele*, "the mothers"; *servitoarele*, "the maids"), or *-lor* if the genitive-dative form

4. But see end of n. 5.

is desired (*mamelor*, "of, to the mothers"; *servitoarelor*, "of, to the maids").⁵

Adjectives.

These agree with their nouns, both in the attributive and in the predicate position (*caii sunt buni*, "the horses are good"). In the attributive position, the adjective may precede or follow the noun; if the adjective precedes, it takes the definite article instead of the noun: *fratele bun* or *bunul frate*, "the good brother"; *fratelui bun* or *bunului frate*, "of or to the good brother"; *mama bună* or *buna mamă*, "the good mother"; *mamelor bune* or *bunelor mame*, "of or to the good mothers".

The comparative is formed by prefixing *mai* to the positive (*mai bun*, "more good", "better"); the superlative by using *cel* (fem. *cea*, masc. pl. *cei*, fem. pl. *cele*) before the comparative: *cel mai bun*, "best".

așa de . . . ca, "as . . . as": *boul este tot așa de tare ca și calul*, "the ox is as strong as the horse".

de cât, "than": *boul este mai tare de cât calul*, "the ox is stronger than the horse".

The adjective without an ending is generally used as an adverb: *el scrie grozav*, "he writes horribly".

Numerals.

1 — <i>un</i> (fem. <i>una</i>)	5 — <i>cinci</i>
2 — <i>doi</i> (fem. <i>două</i>)	6 — <i>șase</i>
3 — <i>trei</i>	7 — <i>șapte</i>
4 — <i>patru</i>	8 — <i>opt</i>

5. There are many exceptions to the above rules (e. g., *soră*, "sister", pl. *surori*; *carne*, "meat", pl. *cărnuri*; *cal*, "horse", pl. *cai*). The rules are further complicated in the case of many nouns by the change of final *-t*, *-d*, *-s* to *-ț*, *-z*, *-ș*, respectively, before the plural *-i* (*frate*, "brother", pl. *frați*; *urs*, "bear", pl. *urși*). Several nouns that are masculine in the singular become feminine in the plural (*brațul*, "the arm"; *brațele*, "the arms"; and since these are derived mainly from Latin neuters, some Roumanian grammarians choose to describe them as forming a third, "ambigen", or "neuter" gender.

9 — <i>nouă</i>	30 — <i>trei-zeci</i>
10 — <i>zece</i>	40 — <i>patru-zeci</i>
11 — <i>un-spre-zece</i>	100 — <i>o sută</i>
12 — <i>doi-spre-zece</i>	200 — <i>două sute</i>
20 — <i>două-zeci</i>	1000 — <i>o mie</i>
23 — <i>două-zeci și trei</i>	2000 — <i>două mii</i>
1,000,000 — <i>un milion</i>	

Pronouns.**Personal.****Singular****First Person****Second Person**

Nom.	<i>eu</i> , "I"	<i>tu</i> , "you"
Dat.	<i>mie</i> , "to me" (<i>mi</i> , <i>îmi</i>)	<i>ție</i> , "to you" (<i>ți</i> , <i>îți</i>)
Acc.	<i>mine</i> , <i>pe mine</i> (<i>mă</i>), "me"	<i>tine</i> , <i>pe tine</i> (<i>te</i>), "you"

Third Person

<i>el</i> , "he"	<i>ea</i> , "she"
<i>lui</i> , "to him" (<i>'i</i> , <i>îi</i>)	<i>ei</i> , "to her" (<i>'i</i> , <i>îi</i>)
<i>pe el</i> , "him" (<i>îl</i>)	<i>pe ea</i> , "her" (<i>o</i>)

Plural**First Person****Second Person**

Nom.	<i>noi</i> , "we"	<i>voi</i> , "you"
Dat.	<i>nouă</i> , "to us" (<i>ni</i>)	<i>vouă</i> , "to you" (<i>vi</i>)
Acc.	<i>pe noi</i> , "us" (<i>ne</i>)	<i>pe voi</i> , "you" (<i>vă</i>)

Third Person

<i>ei</i> , "they", m. <i>lor</i> , "to them" (<i>li</i>)	<i>ele</i> , "they", f. <i>lor</i> , "to them" (<i>li</i>)
<i>pe ei</i> , "them", m. (<i>'i</i> , <i>îi</i>)	<i>pe ele</i> , "them" f. (<i>le</i>)

The subject pronouns may be omitted: *el a auzit*, or *auzit*, "he has heard". The forms given above in parentheses are used as direct or indirect objects with verb-forms, which they normally precede, save in the imperative. Often both the prepositive object pronoun and the longer form following the verb are used: *Dumnea-Voastră nu m'ați văzut pe mine*, "you didn't see me". *Dumnea-Voastră* ("Your Lordship") with the second person plural of the verb is generally used in polite address. In writing, it is generally abbreviated to *Dv.* or *Dvs.*

Possessive.

	Mas. Sg.	Fem. Sg.	Mas. Pl.	Fem. Pl.
"my", "mine"	<i>meu</i>	<i>mea</i>	<i>mei</i>	<i>mele</i>
"your", "yours"	<i>tău</i>	<i>ta</i>	<i>tăi</i>	<i>tale</i>
"his", "her"	<i>său</i>	<i>sa</i>	<i>săi</i>	<i>sale</i>
"our", "ours"	<i>nostru</i>	<i>noastră</i>	<i>noștri</i>	<i>noastre</i>
"your", "yours"	<i>vostru</i>	<i>voastră</i>	<i>voștri</i>	<i>voastre</i>
"their", "theirs"	<i>lor</i>	<i>lor</i>	<i>lor</i>	<i>lor</i>

The article is used with the noun when the possessives are used as adjectives: *amicul tău*, "your friend". When they are used as pronouns, prefix *al*, *a*, *ai*, *ale*: *calul vecinului vostru și al meu*, "your neighbor's horse and mine".

Demonstrative.

	Mas. Sg.	Fem. Sg.	Mas. Pl.	Fem. Pl.
"this", "these"	<i>acest</i>	<i>această</i>	<i>acești</i>	<i>aceste</i>
"that", "those"	<i>acel</i>	<i>acea</i>	<i>acei</i>	<i>acele</i>

Relative and Interrogative.

care or *ce*, "who", which", "that": *cine?*, "who?"; *pe cine?*, "whom?"; *cui?*, "to whom?"; *a cui?* "whose?"; *ce?*, "what?"; *care?*, "which?".

Verbs.

a fi, "to be": Present: *sunt, ești, este, suntem, sunteți, sunt*
 Imperfect: *eram, erai, eră, eram, erați, erau*
a avea, "to have": Present: *am, ai, a (or are), avem, aveți, au.*
 Imperfect: *aveam, aveai, aveau, aveau, aveau,*
aveau.

There are four conjugations, ending respectively in *-ă, -i, -eă, -e*: *cântă*, "to sing"; *dormi*, "to sleep"; *tăcea*, "to be silent"; *vinde*, "to sell".

The present indicative normally has no ending in the first singular and third plural (*dorm*, "I or they sleep"); *-i* in the second singular (*dormi, taci*); *-ă* for *-ă* verbs, *-e* for others in the third singular (*cântă, tace, vinde*); *-ăm* for *-ă* verbs, *-im* for *-i* verbs, *-em* for others in the first plural (*cântăm, dormim, vindem*); *-ați, -iți, -eți* in the second plural (*cântați, dormiți, vindeți*).

Other tenses include an imperfect; a past; a future (which is formed with "to want": *voi, vei, va, vom, veți, vor*, followed by the infinitive: *voi cântă*, "I shall sing"); compound tenses formed with *avea*, "to have", followed by the past participle (*am cântat*, "I have sung"; *am dormit*, "I have slept"; *am tăcut*, "I have kept silent"); subjunctives, regularly preceded by *să* (*să aud*, "that I hear"); and conditionals (*aș, ai, ar, am, ați, ar*-followed by the infinitive: *aș cântă*, "I should sing"). The passive is formed by "to be" with the past participle (*sunt lăudat*, "I am praised"; *fui lăudat*, "I was praised"). A reflexive conjugation appears, similar to that of other Romance languages, with dative or accusative pronouns (see pages 176-7) and *se* in the third person: *se spală*, "he washes himself"; *pentru ce nu te speli?*, "why don't you wash yourself?"; *spală-te!*, "wash yourself!"

IDENTIFICATION

The symbols *ă, ș, ț* are characteristic of Roumanian. Typical are also the *-ul, -lui, -lor* endings of nouns.

SAMPLE OF WRITTEN ROUMANIAN

Limba Românească

Mult e dulce și frumoasă
Limba, ce vorbim!
Altă limbă armonioasă
Ca ea nu găsim!
Saltă inima 'n plăcere,
Când o ascultăm,
Și pe buze aduce miere,
Când o cuvântăm.
Românașul o iubește
Ca sufletul său,
O! vorbiți, scriți românește,
Pentru Dumnezeu!

The Roumanian Language

Very sweet and beautiful is
 the language that we speak!
 Another harmonious language
 like it we do not find!
 The heart leaps up in pleasure
 when we listen to it,
 And to the mouths it brings honey,
 when we speak it.
 The Roumanian loves it
 as his own breath (of life),
 Oh! speak, write Roumanian,
 for (the love of) God!

VOCABULARY

(Mainly of Latin origin, but with strong Slavic infiltrations; note synonyms from two sources: *față* or *obraz*, "face"; *timp* or *vreme*, "time").

și, "and"
că, "that"
sau, "or"
când, "when"
pentru ce?, "why?"
pentru că, "because"
despre, "about"
bucuros, "gladly"
astăzi, "today"
ieri, "yesterday"
mâine, "tomorrow"
acolo, "there"
aproape, "near"
a da, "to give"
cât?, "how much?"
mult, "much"
foarte, "very"
da, "yes"
nu, "not", "no"
nimic, "nothing"

bine, "well"
acum, "now"
la dreapta, "to the right"
la stânga, "to the left"
jos, "down"
acasă, "at home"
apă, "water"
cuțit, "knife"
ou, "egg"
vin, "wine"
ceaiu, "tea"
furculiță, "fork"
pâine, "bread"
poame, "fruit"
bere, "beer"
lingură, "spoon"
ceașcă, "cup"
unt, "butter"
lapte, "milk"
cafea, "coffee"

a sta, "to stand"
poate, "perhaps"
cu, "with"
fără, "without"
în, "in"
în loc de, "instead of"
sub, "under"
rău, "bad", "badly"
unde?, "where?"
aci, "here"
sus, "up"
afară, "out"
a mânca, "to eat"
a se jucă, "to play"
îmi place, "I like"
mi-e frig, "I'm cold"
mi-e cald, "I'm warm"
mi-e somn, "I'm sleepy"
mi-e bine, "I'm well"
mi-e foame, "I'm hungry"
vă rog, "please"
cât e ceasul? "what time is it?"
ce seară frumoasă! "what a
 beautiful evening!"
totdeauna, "always"
niciodată, "never"
înainte de, "before"
în fața, "in front of"
în dosul, "behind"
albastru, "blue"
roșu, "red"
alb, "white"
galben, "yellow"
bună dimineața, "good morning"
bună ziua, "good day"
bună seara, "good evening",
 "good night"
la revedere, "good-bye"

ce mai faceți?, "how are you?"
mulțumesc, "thank you"
noroc!, "your health!", "good
 luck!"
scuzați-mă, "excuse me"
cât costă?, "how much is it?"
prea scump, "too much"
vorbiți englezește?, "do you speak
 English?"
îmi pare rău, "I'm sorry"
ați înțeles?, *înțelegeți?*, "do
 you understand?"
nu înțeleg, "I don't understand"
vorbiți mai încet, "speak more
 slowly"
cum vă numiți?, "what is your
 name?"
mă numesc —, "my name is —"
adu-mi, "bring me"
puteți să-mi dați?, "can you give
 me?"
cât timp?, "how long?"
la șase și jumătate, "at half past
 six"
la șase fără un sfert, "at a quarter
 to six"
sunt bolnav, "I am ill"
care este drumul spre —?, "which
 is the way to —?"
nu e așa?, "isn't it so?"
unde este?, "where is?"
pe aici, "this way"
poștiți înăuntru!, "come in!"
domnule, "sir"
domnișoară, "miss", "young
 lady"
destul!, "enough!"

CHAPTER VI

FRENCH

SPEAKERS AND LOCATION

(All population figures are approximate)

Europe — France — 42,000,000; Belgium — 4,500,000; Switzerland — 2,000,000; scattered groups of French speakers in extreme northwestern Italy (Val d'Aosta, Pinerolo); spoken side by side with German, but not so extensively, in Luxembourg. Widely used as a secondary, cultural, diplomatic and commercial language throughout continental Europe, particularly in Italy, the Netherlands, Portugal, Spain, Poland, Russia.

Africa — Language of colonization in the following countries: Algeria (8,000,000); Belgian Congo (14,000,000); Cameroon (2,500,000); French Equatorial Africa (3,500,000); French West Africa (16,000,000); Madagascar (4,000,000); Morocco (7,000,000); Tunisia (3,000,000); French Somaliland (50,000). Widely used as a secondary and cultural language in Egypt.

Asia — Tongue of colonization in French Indo-China (24,500,000); Syria and Lebanon (4,000,000); French cities on the coasts of India and China (Pondichéry, Kwangchow, etc. — about 500,000). Used as cultural language in other Asiatic countries, notably Turkey, Iran, Japan, China.

Oceania — Tongue of colonization in French Pacific possessions (French Oceania, New Caledonia, New Hebrides, West Samoa, etc. — about 250,000).

Western Hemisphere — Canada (Quebec and Ontario) —

3,000,000 (an additional 1,000,000 in New England); Haiti — 3,000,000. Tongue of colonization in French American possessions (Guadaloupe, Martinique, French Guiana — about 750,000). Widely used as a cultural, secondary and diplomatic tongue in all countries of Latin America, especially Argentina and Mexico, and as a cultural language in the U. S. A. and English-speaking Canada.

ALPHABET AND SOUNDS

a, b, c, d, e, f, g, h, i, j, l, m, n, o, p, q, r, s, t, u, v, x, y, z (k and w appear only in a few words of foreign origin: *képi, kilo, wagon*).

Vowel sounds: usually short (never as short as English short vowels), but occasionally prolonged in stressed syllable; length is to be learned by observation.

- a = hat (this is the more usual value: *là*); or
= father (this is less frequent: *pas*; but it is normal when the vowel bears the circumflex accent: *âge*).
- e = met, when the vowel bears the grave or circumflex accent (*père, fenêtre*), also when it does not come at the end of the syllable (cf. Syllabification, p. 187: *let-tre, intéres-sant, aler-te, a-mer*);
= first part of *a* in Eng. *gate* when the vowel bears the acute accent (*fermé*); also in final *-er* and *-ez* of verb forms (*aimer, aimez*);
is completely silent in *-e* and *-es* endings of words of more than one syllable (*amie, balle, portes*); also in the third plural endings of verbs (*portent*);
= the (with a slight projection of the lips) in most other positions (*le, remettre*).
- i = machine (*vie, il*).
- o = bought (*mode*); or
= first part of *o* in Eng. *go* (*nos*; the latter value is rarer, but always appears when the vowel is the last *sound* in the word, or bears the circumflex accent:

nôtre, with closed sound, as opposed to notre, with open sound).

u = sound intermediate between *feed* and *food* (*mur, tu*). Place tongue in position for *feed*, lips in position for *food*.

ai, at the end of a verb-form = first part of *gate* (*j'aurai*).

ai, in other positions, and ei in all positions = *met* (*faire, avait, neige*).

au, eau = first part of *go* (*aussi, beau*).

ou = *food* (*oublier*).

eu, oeu = sounds intermediate between *gate* and *go*, or between *met* and *mud*; the first sound (*gate*, with projected lips) occurs more frequently when it is the final sound in a word (*peu, voeu*); the latter (*met*, with projected lips) when another sound follows in the same word (*heure, seul*).

oi = *wasp* (*moi*); *went* if nasalized (*moins*).

Nasal Vowels: these occur, usually, when the vowel is followed by *m* or *n* in the same syllable (*bon, in-téressant*; cf. Syllabification, p. 187); but not if the *m* or *n* is doubled (*bonne, homme*), in which cases the vowel is pronounced by itself, at the close of the syllable, and the double *m* or *n* is joined to the next vowel (*bo-nne, ho-mme*). To produce the nasal vowel sound, shut off partly the passage between nose and mouth as the vowel is uttered, and refrain completely from pronouncing the *n* or *m*:

an, am, en, em = *father*, with nasal connection partly shut off (*an-glais, champ, en-core, em-bêter*).

on, om = *go*, with nasal connection partly shut off (*on, ombre*).

in, im, ain, aim, ein = *hat*, with nasal connection partly shut off (*fin, im-possible, main, sein*).

un, um = *met*, with projected lips, and with nasal connection partly shut off (*un, lun-di, par-fum*).

Consonant sounds: *b, d, f, l, m, n, p, s, t, v, x, y, z*, approx-

imately as in English;¹ (d and t, however, are pronounced with tip of tongue touching back of upper teeth, not the palate).

c: before a, o, u or consonant, = cold (*comment*).

c: before e, i = ice (*ici*); ç always = ice (*ça*).

ch: = sure (*charbon*).

g: before a, o, u or consonant, = go (*garçon*).

g: before e or i, = pleasure (*gilet*).

gn: = canyon (*agneau*).

h: is normally silent (*homme*).

j: = pleasure (*jeune*).

ill, and final -il preceded by a vowel = machine quickly followed by you (*fille, travail*).²

r: is rolled, with the uvula vibrating toward the palate, like a gentle clearing of the throat in its upper part: *rare*.

q: as in English, but a following u is normally silent (*qui* pron. kee; *quatre* pron. katr); u is also generally silent after g (*guerre*).

th: = tea (*thé*).

1. The final consonant of a word is generally silent (*finit*, pron. fini), but final c, f, l, r are usually sounded (*lac, neuf, tel, par*); -r, however, is silent in the infinitive ending -er (*parler*, pron. parlé) and in the ending -ier; the addition of -s does not change the sound of the final consonant (*petit* or *petits*, both pron. peti); but the addition of an -e does, causing an otherwise silent final consonant to be pronounced (*petite* or *petites*, both pron. petit); laid (ugly) and its masc. pl. form *laid*s are both pronounced lè; but the fem. sg. and pl., *laide, laides*, are both pronounced lèd.

A final consonant, which would otherwise be silent in accordance with the above, is often carried over to the next word if the latter begins with a vowel or h and forms part of the same thought-unit; *les hommes avaient pris cette énorme table* is pronounced lé zom zavè pri sè ténorme table. In such linking, final s and x are pronounced as z when carried over, d is pronounced as t, f occasionally as v (*les* by itself is lé, but *les hommes* is lé zom; *grand* by itself is grā, but *grand homme* is grā tom; *neuf* is nōf; but *neuf hommes* is nō vom).

2. Important exceptions, in which the ill is sounded like machine followed by lamb, are: *mille* (one thousand); *tranquille* (quiet); *ville* (city); *village* (village).

CAPITALIZATION, SYLLABIFICATION, ACCENTUATION

Do not capitalize *je* (I), names of days and months (*lundi, janvier*); adjectives of nationality (*français*), even if used as names of languages (*le français; il parle français*); but capitalize if the adjective of nationality refers to people: *le Français*, the Frenchman; *les Français*, the French.

In dividing a word into syllables, make sure that a single consonant between two vowels goes with the *following*, not with the preceding vowel (*gé né ral*, as against Eng. gen er al); this rule, of great importance in all Romance languages, is doubly important in French, because upon it often depends the nasalization or non-nasalization of the preceding vowel: *main*, with nasalized ai, and silent n; but *lai-ne*, with no nasalization and n fully pronounced; *in-té-res-sant*, with nasalized i and a, and neither n pronounced, but *i-nu-ti-le*, with no nasalization of i and n fully pronounced with the following u.

French stresses all syllables of a word about equally; this means more emphasis on the final syllable than appears in English, and gives the impression that French stresses the last pronounced syllable in the word. The accent marks of French have already been described (acute: ´; grave: `; circumflex: ^). They do not indicate stress on the vowel over which they appear, but serve only to differentiate among the various possible sounds for that vowel. The circumflex may appear on any vowel, which is then often long. The acute and the grave usually appear over the vowel e; but the grave is also occasionally used on other vowels to distinguish between two words having the same pronunciation but different meanings: *où*, where; *ou*, or; *là*, there; *la*, the.

The cedilla (ç) appears only with c and indicates that the c is sounded like s before a, o or u (*reçu*).

The diaeresis (¨) is used over a vowel to prevent it from combining with the preceding vowel (*Noël*, pron. No el, not Nöl).

The apostrophe indicates that a vowel has been dropped

before another vowel or an h (*l'assiette* for *la assiette*; *l'homme* for *le homme*).

English sounds not appearing in French: all vowels save above; *church*; *gin*; *thin*; *this*; American r.

French sounds not appearing in English: *èu*, *oen*; *u*; nasalized vowels; French r.

SAMPLE OF WRITTEN FRENCH; USE FOR PRACTICE READING.

Coûte que coûte, il fallait donner le signal aux avions anglais, qui ne pouvaient pas tarder à apparaître dans le ciel sombre et orageux de la nuit. Le tas de bois était là. tel que l'avait soigneusement arrangé la mère François avant la tombée du soleil. Mais comment s'en approcher? Comment y mettre le feu avec ces précieuses allumettes qu'on avait si longtemps conservées pour la besogne? Cette sentinelle allemande, placée à cet endroit où l'on n'avait jamais placé de sentinelle auparavant, restait là, debout, immobile. Pierrot prit une résolution soudaine. La main droite dans la poche de son pantalon, les doigts crispés autour du manche du couteau, il se dirigea lentement, en sifflant, vers le Boche, qui, sans ouvrir la bouche, sans faire un mouvement, le regardait venir. — Bonsoir, monsieur, — lui dit Pierrot, — Est-ce qu'il me serait permis de ramasser quelques morceaux de ce bois? On a froid là-bas. — L'autre fit un vague geste de consentement, lui tourna le dos, et se mit à regarder attentivement du côté de la mer. On connaissait bien Pierrot, depuis les premiers jours de l'occupation; et d'ailleurs, ce n'était qu'un garçon de quinze ans.

GRAMMATICAL SURVEY

1. *Nouns and articles.*

French has only two genders, masculine and feminine. Nouns denoting males are normally masculine, those denoting females feminine. For nouns which in English are neuter, the

article, definite or indefinite, indicates the French gender. The definite article is *le* for masculine singular nouns, *la* for feminine singulars; both masculine and feminine singular nouns beginning with vowels and (usually) *h* take *l'*; the plural of the definite article is *les*, used without exception for all plural nouns.³ The indefinite article is *un* for masculine nouns, *une* for feminine nouns. Most French nouns form their plural by the addition of a silent *-s*.⁴

<i>le livre</i> , the book	<i>les livres</i> , the books	<i>un livre</i> , a book
<i>la porte</i> , the door	<i>les portes</i> , the doors	<i>une porte</i> , a door
<i>l'homme</i> , the man	<i>les hommes</i> , the men	<i>un homme</i> , a man
<i>l'eau</i> , the water	<i>les eaux</i> , the waters	<i>une eau</i> , a water

2. Adjectives and Adverbs.

French adjectives take the same gender and number as the nouns they modify, regardless of position. Normally, the adjective adds *-e* for the feminine singular (unless it already

3. *Le* and *les* (but not *la* or *l'*) combine with the prepositions *de*, "of", and *à*, "to", in the following forms: *de le* become *du*; *de les* become *des*; *à le* become *au*; *à les* become *aux* (*du père*, of the father; *des hommes*, of the men; *de la mère*, of the mother; *des femmes*, of the women; *au colonel*, to the colonel; *aux officiers*, to the officers).

Du, *de la*, *de l'*, *des* are used with the meaning of "some", "any": *donnez-moi de l'eau*, give me (some) water; *avez-vous du vin?*, have you (any) wine?; *il a vu des hommes*, he saw some men. If the sentence is negative, however, *de* alone, without the article, is used to express "some", "any": *je n'ai pas de vin*, I haven't any wine, I have no wine; *nous n'avons pas de lait*, we haven't any milk, we have no milk.

4. Nouns ending in *-s*, *-x*, *-z* remain unchanged in the plural (*le nez*, the nose; *les nez*, the noses; *la voix*, the voice, *les voix*, the voices). Most nouns ending in *-al* change *-al* to *-aux*: *le cheval*, the horse, *les chevaux*, the horses. Most nouns ending in *-au*, *-eu*, *-ou*, add *-x* instead of *-s* to form the plural: *le bateau*, the boat; *les bateaux*, the boats; *le feu*, the fire; *les feux*, the fires; *le bijou*, the jewel; *les bijoux*, the jewels.

ends in *-e*, like *triste*; fem. same); silent *-s* for the masculine plural,⁵ *-es* for the feminine plural.

le grand homme, the great man

les grands hommes, the great men

la grande femme, the great woman

les grandes femmes, the great women

la femme est grande, the woman is great

les hommes sont grands, the men are great

Adjectives usually follow the noun, but a few commonly used ones precede (*bon*, good; *mauvais*, bad; *petit*, small, *grand*, large, great, tall).

The comparative is generally formed by placing *plus* (more) before the adjective; the superlative by using the definite article before the comparative: *un gros livre*, a big book; *un plus gros livre*, a bigger book; *le plus gros livre*, the biggest book; *un garçon intelligent*, an intelligent boy; *un garçon plus intelligent*, a more intelligent boy; *le garçon le plus intelligent de la classe*, the most intelligent boy in the class.⁶

The adverb is generally formed by adding *-ment* to the feminine singular form of the adjective: *grand*, great; fem. sg. *grande*; adverb *grandement*, greatly; *facile*, easy, fem. sg. the same; adverb *facilement*, easily.

3. Numerals.

a) Cardinal.⁷

1 — *un, une*

2 — *deux*

3 — *trois*

4 — *quatre*

5. But the same rules that apply to the plural of nouns generally apply to the plural of adjectives (see note 4). Remember that the addition of *-s* does not change the sound of the preceding consonant, that of *-e* does: *laid, laids*, pron. *lè*; *laide, laides*, pron. *lèd*.

6. Note the double use of the definite article, also the use of *de* for "in" after a superlative.

7. Use these in dates, save for "the first": *le premier juin*, June 1st; *le vingt-cinq juin*, June 25th.

5 — <i>cing</i> ^s	17 — <i>dix-sept</i>
6 — <i>six</i> ^s	18 — <i>dix-huit</i> ^s
7 — <i>sept</i>	19 — <i>dix-neuf</i>
8 — <i>huit</i> ^s	20 — <i>vingt</i>
9 — <i>neuf</i>	21 — <i>vingt et un</i> ^s
10 — <i>dix</i> ^s	22 — <i>vingt-deux</i>
11 — <i>onze</i>	30 — <i>trente</i>
12 — <i>douze</i>	40 — <i>quarante</i>
13 — <i>treize</i>	50 — <i>cinquante</i>
14 — <i>quatorze</i>	60 — <i>soixante</i>
15 — <i>quinze</i>	70 — <i>soixante-dix</i> ^s
16 — <i>seize</i>	71 — <i>soixante et onze</i>
	72 — <i>soixante-douze</i>
	80 — <i>quatre-vingts</i> ^s
	81 — <i>quatre-vingt-un</i> ^s
	90 — <i>quatre-vingt-dix</i> ^s
	91 — <i>quatre-vingt-onze</i>
	92 — <i>quatre-vingt-douze</i>
	100 — <i>cent</i> ^s
	101 — <i>cent un</i>
	200 — <i>deux cents</i> ^s
	205 — <i>deux cent cinq</i> ^s
	1000 — <i>mille (mil in dates)</i>
	5000 — <i>cing mille</i>
	1,000,000 — <i>un million (de)</i>
	1,000,000,000 — <i>un milliard (de)</i>

8. *Et* connects the two parts of 21, 31, 41, 51, 61, 71; hyphens connect the two parts of other compound numerals. Use *-s* in 80 and plural hundreds unless other numerals follow. The final *-q* of *cing* and the final *-t* of *huit* are usually sounded. The *-x* of *six* and *dix* is silent when a following noun begins with a consonant; sounded like *-z* when the following noun begins with vowel or *h*; sounded like hard *-s* when there is no following noun.

b) Ordinal.

1st — <i>premier</i> (fem. <i>première</i>)	9th — <i>neuvième</i>
2nd — <i>second</i> or <i>deuxième</i>	10th — <i>dixième</i>
3rd — <i>troisième</i>	11th — <i>onzième</i>
4th — <i>quatrième</i>	19th — <i>dix-neuvième</i>
5th — <i>cinquième</i>	21st — <i>vingt et unième</i>
7th — <i>septième</i>	22nd — <i>vingt-deuxième</i>

(Drop final vowel of cardinal and add *-ième*, changing *f* of *neuf* to *v*, and *q* of *cing* to *qu*; use *second* for the second of two, *deuxième* where more than two are involved).

c) Others.

half — *la moitié* (noun): *la moitié de ma classe*, half of my class;

half — *demi* (adjective); invariable before the noun, and attached by a hyphen: *une demi-heure*, half an hour; adds *-e* if it follows a feminine noun: *une heure et demie*, an hour and a half.

a pair of — *une paire de*; a dozen eggs — *une douzaine d'œufs*; a score of men — *une vingtaine d'hommes*;

once — *une fois*; twice — *deux fois*; three times — *trois fois*; the first (last) time — *la première (dernière) fois*.

4 Pronouns.

a) Personal — Subject.

I, <i>je</i>	we, <i>nous</i>
you, <i>tu</i> ⁹	you, <i>vous</i> ⁹
he, it, <i>il</i> ⁹	they (masc.), <i>ils</i>
she, it, <i>elle</i> ⁹	they, (fem.), <i>elles</i>

These are regularly used with the verb: *il parle*, he speaks.

9. Use *tu* with the second singular of the verb only in familiar conversation; *vous* with the second plural of the verb is the general polite way of addressing either one or more people. *Il* translates "it" when the noun is masculine in French, *elle* when it is feminine: *voyez-vous le livre? Il est sur la table*, do you see the book? It is on the table; *où est la table? Elle est dans la salle*, where is the table? It is in the room.

b) Personal; Direct and Indirect Object.

me, to me, <i>me</i>	us, to us, <i>nous</i>
you, to you, <i>te</i>	you, to you, <i>vous</i>
him, it, <i>le</i>	them, <i>les</i>
her, it, <i>la</i>	to them, <i>leur</i>
to him, to her, <i>lui</i>	

These precede the verb (*je le vois*, I see him; *il me donne le livre*, he gives me the book), save in the imperative *affirmative*, where the object pronouns are attached to the verb by a hyphen, and *moi* and *toi* replace *me* and *te* (*prenez-le*, take it; *donnez-moi le livre*, give me the book). In the imperative *negative*, the general rule holds (*ne le prenez pas*, don't take it; *ne me donnez pas le livre*, don't give me the book). If the direct and indirect object pronoun are used together, put the indirect before the direct (*il me le donne*, he gives it to me; *je vous les donne*, I give them to you), unless both are third person (*je le lui donne*, I give it to him; *vous les leur donnez*, you give them to them), or the imperative *affirmative* is used (*donnez-les-nous*, give them to us; but *ne nous les donnez pas*, don't give them to us).

Y, "there", "in that place", "to that place", and *en* "of it". "of them", "some", "any" (the latter meanings when the noun does not appear), follow the same rules of position, being placed after all other pronouns: *je l'y ai vu*, I saw him there; *il m'en a donné*, he gave me some. *Y* also means "to it", "to them", referring to inanimate objects: I am going to it, *j'y vais*.

c) Personal (with prepositions or alone).

I, me, <i>moi</i>	we, us, <i>nous</i>
you, <i>toi</i>	you, <i>vous</i>
he, him, <i>lui</i>	they, them (masc.), <i>eux</i>
she, her, <i>elle</i>	they, them (fem.), <i>elles</i>

avec moi, with me; *sans toi*, without you; *pour eux*, for them; *qui avez-vous vu?* *Eux*, whom did you see? Them; *qui est là?* *Moi*, who is there? I.

d) Possessive.

1. *With the noun (adjectives):*

	<i>Masc. Sg.</i>	<i>Fem. Sg.</i>	<i>Plural</i>		<i>Singular</i>	<i>Plural</i>
my,	<i>mon</i>	<i>ma</i>	<i>mes</i>	our,	<i>notre</i>	<i>nos</i>
your,	<i>ton</i>	<i>ta</i>	<i>tes</i>	your,	<i>votre</i>	<i>vos</i>
his,						
her,	<i>son</i>	<i>sa</i>	<i>ses</i>	their,	<i>leur</i>	<i>leurs</i>
its,						

mon frère, my brother; *ses soeurs*, his sisters; *nos parents*, our parents; *leurs livres*, their books; *leur soeur*, their sister; *ma mère*, my mother.

2. *Without the noun (pronouns):*

	<i>Masc. Sg.</i>	<i>Fem. Sing.</i>	<i>Masc. Pl.</i>	<i>Fem. Pl.</i>
mine,	<i>le mien</i>	<i>la mienne</i>	<i>les miens</i>	<i>les miennes</i>
yours,	<i>le tien</i>	<i>la tienne</i>	<i>les tiens</i>	<i>les tiennes</i>
his,				
hers,	<i>le sien</i>	<i>la sienne</i>	<i>les siens</i>	<i>les siennes</i>
its,				
ours,	<i>le nôtre</i>	<i>la nôtre</i>	<i>les nôtres</i>	<i>les nôtres</i>
yours,	<i>le vôtre</i>	<i>la vôtre</i>	<i>les vôtres</i>	<i>les vôtres</i>
theirs,	<i>le leur</i>	<i>la leur</i>	<i>les leurs</i>	<i>les leurs</i>

mon frère et le tien, my brother and yours; *ses livres et les vôtres*, his books and yours.

e) Demonstrative.

1. *With noun (adjectives):*

this, that,¹⁰ *ce*, *cet* (both forms are masc. sg.; use *ce* before a consonant, *cet* before a vowel or (usually) h: *ce livre*, this or that book; *cet homme*, this or that man;

10. Differentiate between "this" and "that", "these" and "those", by using *-ci* (here) or *-là* (there) after the noun, if such differentiation is really required: *ce livre-ci*, this book; *ce livre-là*, that book.

cette (fem. sg.): *cette femme*, this woman, that woman;

these, those,¹⁰ *ces*: *ces hommes*, these or those men; *ces femmes*, these or those women.

2. *Without noun (pronouns)*:

this, that, this one, that one, the one,¹¹ *celui* (masc.), *celle* (fem.);

these, those, the ones,¹¹ *ceux* (masc.), *celles* (fem.).

mon livre et celui qui est sur la table, my book and the one which is on the table; *tes soeurs et celles de ton ami*, your sisters and those of your friend (your friend's).

this (referring not to a specific person or thing, but to a general situation or idea), *ceci*: *ceci ne me plaît pas*, this does not please me;

that (general situation or idea), *cela* or *ça*: *cela va bien*, that's all right.

f) *Relative*.

who, which, that (subject), *qui*: *l'homme qui est arrivé*, the man who came; *le livre qui est sur la table*, the book which is on the table.

whom, which, that (object), *que*: *l'homme que vous avez vu*, the man (whom) you saw; *le livre que vous avez pris*, the book (which) you took.¹²

whose, of which, of whom, *dont*: *l'homme dont vous avez parlé*, the man of whom you spoke; *l'homme dont vous avez pris le livre*, the man whose book you took (note that the word-order calls for a shift from "whose" to "of whom": the man of whom you took the book).

11. Append *-ci* or *-là* to these forms unless a preposition or relative pronoun follows: *tes livres et ceux-ci*, your books and these.

12. Note that the relative pronoun cannot be omitted in French.

which (generally used after prepositions, referring to things; use *qui* after prepositions referring to persons), *lequel, laquelle, lesquels, lesquelles*: *la maison dans laquelle je demeure*, the house in which I live (observe that the *le-* and *les-* of these forms combine with a preceding *de* and *à*: *duquel, desquels, auquel, auxquelles*, etc.).

g) Interrogative.

who?, *qui?* or *qui est-ce qui?*: *qui (est-ce qui) est arrivé?*, who arrived?

whom?, *qui?* or *qui est-ce que?*: *qui avez-vous vu?* or *qui est-ce que vous avez vu?*, whom did you see?

what? (subject), *qu'est-ce qui?*: *qu'est-ce qui s'est passé?*, what happened?

what? (object), *que?* or *qu'est-ce que?*: *qu'avez-vous vu?* or *qu'est-ce que vous avez vu?*, what did you see?

which?, which one?, which ones?, *lequel, laquelle, lesquels, lesquelles?*: *laquelle de ses soeurs connaissez-vous?*, which one of his sisters do you know?

5. Verbs.

French verbs fall into four main classes, distinguished by the infinitive endings *-er, -ir, -re, -oir*, respectively (*parler, finir, vendre, recevoir*). The infinitive is the form generally used after prepositions (*pour parler*, in order to speak; *sans finir*, without finishing). A present participle, ending in *-ant* (*-issant* for *-ir* verbs) is used after the preposition *en* with the meaning of "by", "while" (*en vendant*, by or while selling). This form cannot be used with "to be" in the English sense of "I am speaking", which is translated by the simple present (*je parle*). The subject pronoun is normally used in French.

1. Present Indicative (meaning: I speak, am speaking. do speak).

to speak, *parler*

I speak, *je parle*
 you speak, *tu parl-es*
 he speaks, *il parl-e*
 we speak, *nous parl-ons*
 you speak, *vous parl-ez*
 they speak, *ils parl-ent*

to sell, *vend-re*

I sell, *je vend-s*
 you sell, *tu vend-s*
 he sells, *il vend*
 we sell, *nous vend-ons*
 you sell, *vous vend-ez*
 they sell, *ils vend-ent*

to finish, *fin-ir*

I finish, *je fin-is*
 you finish, *tu fin-is*
 he finishes, *il fin-it*
 we finish, *nous fin-issons*
 you finish, *vous fin-issez*
 they finish, *ils fin-issent*

to receive, *rec-ev-oir*

I receive, *je reç-ois*
 you receive, *tu reç-ois*
 he receives, *il reç-oit*
 we receive, *nous rec-evons*
 you receive, *vous rec-erez*
 they receive, *ils reç-oient*

to be, *être*: *je suis, tu es, il est, nous sommes, vous êtes, ils sont.*
 to have, *avoir*: *j'ai, tu as, il a, nous avons, vous avez, ils ont.*
 to go, *aller*: *je vais, tu vas, il va, nous allons, vous allez, ils vont.*
 to know, *savoir*: *je sais, tu sais, il sait, nous savons, vous savez, ils savent.*

to say, *dire*: *je dis, tu dis, il dit, nous disons, vous dites, ils disent.*

to do (make), *faire*: *je fais, tu fais, il fait, nous faisons, vous faites, ils font.*

2. Negative and Interrogative Forms.

The negative is normally formed by placing *ne* before the verb and *pas* after it: *je ne parle pas*, I don't speak. If a compound tense is used, *pas* is placed between the auxiliary and the past participle: *je n'ai pas parlé*, I haven't spoken. Other negative particles (*point*, at all; *jamais*, never; *personne*, nobody; *rien*, nothing) may replace *pas*: *je ne parle point*. I'm not speaking at all; *je ne l'ai jamais vu*, I have never seen him;

je n'ai rien vu, I have seen nothing; but *personne* follows the past participle: *je n'ai vu personne*, I have seen no one.

The interrogative may be formed by inverting subject and verb, if the subject is a *pronoun*: *vous parlez*, you are speaking; *parlez-vous?*, are you speaking?¹³ If the subject is a *noun*, this is usually isolated by a comma at the beginning of the sentence, and the question is then formed with the appropriate pronoun: *votre frère, parle-t-il français?*, does your brother speak French? An alternative method, which works for both noun and pronoun subjects, is to prefix *est-ce que* (literally, "is it that?") to the declarative form: *est-ce qu'il est ici?*, is he here (lit. is it that he is here?); *est-ce que votre frère parle français?*, does your brother speak French? (lit. is it that your brother speaks French?).

3. Imperfect (meaning: I was speaking, used to speak).

The endings, for all verbs, are *-ais, -ais, -ait, -ions, -iez, -aient* (*je parl-ais, tu parl-ais*, etc.; *je vend-ais, tu vend-ais*, etc.); *-ir* verbs insert *-iss-* throughout before the ending (*je fin-iss-ais, tu fin-iss-ais*, etc.); *-oir* verbs use the full stem (*je rec-ev-ais, tu rec-ev-ais*, etc.). *Etre* has *j'étais*, etc.; *dire* has *je dis-ais*; *faire* has *fais-ais*.

4. Past (meaning: I spoke).

This tense seldom appears save in books, being replaced in conversation by the present perfect. Its forms are:

parl-er: *je parl-ai, tu parl-as, il parl-a, nous parl-âmes, vous parl-âtes, ils parl-èrent.*

fin-ir: *je fin-is, tu fin-is, il fin-it, nous fin-îmes, vous fin-îtes, ils fin-irent.*

vend-re: *je vend-is, tu vend-is, il vend-ît, nous vend-îmes, vous vend-îtes, ils vend-irent.*

13. Note the hyphen used in these cases of inversion, also the letter *-t-*, inserted between the verb and the pronoun when the former ends and the latter begins with a vowel: *a-t-il?*, has he?; *parle-t-il?*, does he speak?

rec-ev-oir: *je reç-us, tu reç-us, il reç-ut, nous reç-ûmes, vous reç-ûtes, ils reç-urent.*

être has *je fus*; *avoir* has *j'eus*; *savoir* has *je sus*; *dire* has *je dis*; *faire* has *je fis*; *aller* is regular (*j'allai*).

5. Future and Conditional (meaning: I shall speak, I should speak).

The future endings are: *-ai, -as, -a, -ons, -ez, -ont*. These are added not to the stem, but to the *full infinitive* (*je parler-ai*, I shall speak; *tu finir-as*, you will finish); *-re* verbs, however, lose the final *e* (*je vendr-ai*, I shall sell), while *-oir* verbs lose the *oi* (*je recev-r-ai*, I shall receive).

The conditional endings are precisely the same as those of the imperfect: *-ais, -ais, -ait, -ions, -iez, -aient*; but they are added to the *full infinitive* instead of to the stem, with loss of *e* for *-re* verbs and loss of *oi* for *-oir* verbs; whatever irregularities appear in the future will also appear in the conditional: *je parler-ais*, I should speak; *tu finir-ais*, you would finish; *il vendr-ait*, he would sell; *nous recev-r-ions*, we should receive.

The future and conditional of *être* are *je serai* and *je serais*; of *avoir*, *j'aurai* and *j'aurais*; of *aller*, *j'irai* and *j'irais*; of *savoir*, *je saurai* and *je saurais*; of *faire*, *je ferai* and *je ferais*; of *dire*, *je dirai* and *je dirais*.

6. Compound Tenses.

These are formed, as in English, by using *avoir*, "to have", with the past participle. The latter ends in *-é* for *-er* verbs, (*parl-é*, spoken), in *-i* for *-ir* verbs (*fin-i*, finished), in *-u* for *-re* and *-oir* verbs (the latter, however, drop *-ev-*: *vend-u*, sold; *reç-u*, received).

A certain number of intransitive verbs denoting motion (*aller*, to go, *venir*, to come, etc.), change of state (*devenir*, to become; *mourir*, to die, etc.), also *rester*, "to remain", "to

stay", and *tomber*, "to fall", (but not *être*, "to be") take *être* as an auxiliary instead of *avoir*.¹⁴

Present Perfect: I have spoken, I spoke, *j'ai parlé*, *tu as parlé*, *il a parlé*, *nous avons parlé*, *vous avez parlé*, *ils ont parlé*; I have come, *je suis venu*, *tu es venu*, *il est venu*, *nous sommes venus*, *vous êtes venus*, *ils sont venus* (and note *elle est venue*, *elles sont venues*; *je suis venue* if a woman is writing).

Past Perfect: I had spoken, *j'avais parlé*, etc.; I had come, *j'étais venu*, etc.

Future Perfect: I shall have spoken, *j'aurai parlé*; I shall have come, *je serai venu*.

Conditional Perfect: I should have spoken, *j'aurais parlé*; I should have come, *je serais venu*.

7. Imperative.¹⁵ (meaning: speak!; let us speak).

	<i>Familiar</i>	<i>Plural and</i>	
	<i>Singular</i>	<i>Polite Sg.</i>	"let us"
-er verbs:	<i>parl-e</i>	<i>parl-ez</i>	<i>parl-ons</i>
-ir verbs:	<i>fin-is</i>	<i>fin-issez</i>	<i>fin-issons</i>
-re verbs:	<i>vend-s</i>	<i>vend-ez</i>	<i>vend-ons</i>
-oir verbs:	<i>reç-ois</i>	<i>rec-ev-ez</i>	<i>rec-ev-ons</i>

14. The past participle conjugated with *avoir* is invariable if the direct object follows, but agrees with the direct object if the latter precedes: *j'ai vu les hommes*, I saw the men; but *je les ai vus*, I saw them; *les hommes que j'ai vus*, the men I saw. When *être* is used, the past participle agrees with the subject: *elle est arrivée*, she arrived; *ils sont sortis*, they went out. Incorrect agreement of the past participle is not an unforgivable crime, particularly since the agreement appears in writing, but not in speech, the endings being normally silent.

15. Remember: 1. that object pronouns *follow* the imperative affirmative and are attached by hyphens, with *moi* and *toi* replacing *me* and *te*: *parle-moi*, speak to me; *donnez-moi*, give me; *lave-toi*, wash yourself; 2. that the direct object always precedes the indirect object pronoun in the imperative affirmative: *vendez-le-moi*, sell it to me; *vendons-les-leur*, let us sell them to them; 3. that in the negative imperative object pronouns precede the verb in the more customary indirect-direct order (unless both are third person): *ne me le donnez pas*, don't give it to me; *ne le lui donnez pas*, don't give it to him.

<i>être:</i>	<i>sois</i>	<i>soyez</i>	<i>soyons</i>
<i>avoir:</i>	<i>aie</i>	<i>ayez</i>	<i>ayons</i>
<i>savoir:</i>	<i>sache</i>	<i>sachez</i>	<i>sachons</i>
<i>aller:</i>	<i>va</i>	<i>allez</i>	<i>allons</i>
<i>dire:</i>	<i>dis</i>	<i>dites</i>	<i>disons</i>
<i>faire:</i>	<i>fais</i>	<i>faites</i>	<i>faisons</i>

8. Reflexive.

French uses many verbs reflexively which are not so used in English (*je me suis levé ce matin*, I got up this morning; *se lever*, to get up, lit. to get oneself up). The reflexive pronouns are:

myself, to myself, *me*

yourself, to yourself, *te*

ourselves, to ourselves, *nous*

yourselves, to yourselves, *vous*

himself, herself, itself, themselves, to himself, to herself, to itself, to themselves, *se*

These pronouns may be direct or indirect: *je me lave*, I wash myself; but *je me lave les mains*, I wash to myself the hands (I wash my hands).

The auxiliary used with reflexive verbs is *être*, but the past participle agrees as though *avoir* were used; that is, agreement is not with the subject, but with the preceding direct object, which may or may not be the reflexive pronoun: *elle s'est lavée*, she washed herself; *elle s'est lavé les mains*, she washed her hands (no preceding direct object; *se* is indirect); *les mains qu'elle s'est lavées étaient couvertes de sang*, the hands she washed were covered with blood (agreement not with *elle*, subject; nor with *se*, indirect object, but with *que*, direct object, which refers to "hands", feminine plural).

In the plural, reflexive forms may have a reciprocal meaning (each other, to each other, one another, to one another): they saw each other, *ils se sont vus*; they shook hands, *ils se sont serré la main*.

9. Passive.

This is formed, as in English, by *être*, "to be" with the past participle. The latter agrees with the subject: *il est puni*, he is punished; *elle sera punie*, she will be punished; *elles ont été punies par leur père*, they have been punished by their father. The passive is often avoided, however, especially when "by" does not appear, by using: 1. *on* ("one", "man", "somebody") with the active: *ici on parle français*, French is spoken here (lit. one speaks French here); 2. the reflexive: *ces choses ne se font pas*, these things aren't done (lit. these things don't do themselves).

10. Subjunctive.

The French subjunctive has four tenses, and is frequently used in subordinate clauses. For the present subjunctive, the endings are: *-e, -es, -e, -ions, -iez, -ent* (*-ir* verbs insert *-iss-* throughout; *-oir* verbs have *-oiv-* in the singular and third plural, *-ev-* in first and second plural): that I speak, *que je parle*, *que tu parles*, *qu'il parle*, *que nous parlions*, *que vous parliez*, *qu'ils parlent*; that I finish, *que je finisse*; that I sell, *que je vende*; that I receive, *que je reçoive*.

The present perfect subjunctive is formed with the present subjunctive of *avoir* (or *être*) and the past participle: that I have spoken, *que j'aie* (*tu aies, il ait, nous ayons, vous ayez, ils aient*) *parlé*; that I have come, *que je sois* (*tu sois, il soit, nous soyons, vous soyez, ils soient*) *venu* (*venue, venus, venues*). The other two tenses are normally avoided in conversation and ordinary writing.

VOCABULARY 16

16. The gender of nouns is indicated by the article (*le, la*); nouns beginning with vowels or *h* and taking the article *l'* are *masculine* unless otherwise indicated.

Note that nouns and *masculine* adjectives ending in *-s, -x, -z*, remain unchanged in the plural (*la voix, les voix*); that most nouns and masculine adjectives ending in *-au* and *-al* change to *-aux* in the plural (*beau, beaux; le cheval, les chevaux*); that nouns and masculine adjectives ending in *-eu* add *-x* in the plural (*le feu, les feux*).

Note that adjectives ending in *-e* remain unchanged in the feminine (*triste*); that adjectives ending in *-x* change to *-se* in the feminine (*heureux, heureuse*); *-en* to *-enne* (*italien, italienne*); *-el* to *-elle* (*naturel, naturelle*); *-ier* to *-ière* (*premier, première*); *-f* to *-ve* (*neuf, neuve*). The plurals are then independently formed (*heureux, plu. heureux; heureuse, plu. heureuses*).

Other exceptional irregularities in feminine and plural formation are separately given in the vocabulary.

Verbs ending in *-er* which have *e*-mute as the last vowel in the stem change it to *è* whenever another *e*-mute appears in the ending (*mener; Pres. mène, mènes, mène, menons, menez, mènent; Fut. mènerai*). Verbs ending in *-eler* and *-eter*, however, more generally double the *l* or *t* under the same circumstances (*appeler; Pres. appelle, appelles, appelle, appelons, appelez, appellent; Fut. appellerai*).

Verbs ending in *-er* which have *é* as the last vowel in the stem also change it to *è* when *e*-mute appears in the ending, but not in the future and conditional (*espérer; Pres. espère, espères, espère. espérons, espérez, espèrent; but Fut. espérerai*).

Verbs ending in *-cer* change *c* to *ç* when *a* or *o* follows (*avancer; 1st pl. nous avançons; Impf. j'avançais; etc.*).

Verbs ending in *-ger* insert *-e-* when *a* or *o* follows (*manger; 1st pl. nous mangeons; Impf. je mangeais; etc.*).

Most verbs ending in *-yer* change *y* to *i* before *e*-mute (*ennuyer; Pres. ennuie, ennuies, ennuie, ennuyons, ennuyez, ennuiënt; etc.*).

Other important verbal irregularities are given in the vocabulary; note that the conditional *always* follows the future, so that a future *ferai* for the verb *faire* implies a conditional *ferais*. There is never any irregularity in the *endings* of these two tenses.

If a verb is conjugated with *être*, the latter appears in parentheses; thus, to stay, *rester (être)*. This indication is not given in the case of reflexive verbs, which are *always* conjugated with *être*.

1. *World, Elements, Nature, Weather, Time, Directions.*

world, <i>le monde</i>	East, <i>l'est</i>
earth, <i>la terre</i>	West, <i>l'ouest</i>
air, <i>l'air</i>	year, <i>l'an</i>
water, <i>l'eau</i> (fem.)	month, <i>le mois</i>
fire, <i>le feu</i>	week, <i>la semaine</i>
light, <i>la lumière</i>	day, <i>le jour, la journée</i>
sea, <i>la mer</i>	hour, <i>l'heure</i> (fem.)
sun, <i>le soleil</i>	minute, <i>la minute</i>
moon, <i>la lune</i>	Sunday, <i>le dimanche</i>
star, <i>l'étoile</i> (fem.)	Monday, <i>le lundi</i>
sky, <i>le ciel</i>	Tuesday, <i>le mardi</i>
wind, <i>le vent</i>	Wednesday, <i>le mercredi</i>
weather. time, <i>le temps</i>	Thursday, <i>le jeudi</i>
snow, <i>la neige</i>	Friday, <i>le vendredi</i>
to snow, <i>neiger</i>	Saturday, <i>le samedi</i>
rain, <i>la pluie</i>	January, <i>janvier</i>
to rain, <i>pleuvoir</i> (Pres. <i>pleut</i> ; Fut. <i>pleuvra</i> ; P. p. <i>plu</i>)	February, <i>février</i>
cloud, <i>le nuage</i>	March, <i>mars</i>
cloudy, <i>nuageux, couvert</i>	April, <i>avril</i>
fog, <i>le brouillard</i>	May, <i>mai</i>
ice, <i>la glace</i>	June, <i>juin</i>
mud, <i>la boue</i>	July, <i>juillet</i>
morning, <i>le matin, la matinée</i>	August, <i>août</i>
noon, <i>midi</i>	September, <i>septembre</i>
afternoon, <i>l'après-midi</i>	October, <i>octobre</i>
evening, <i>le soir</i>	November, <i>novembre</i>
night, <i>la nuit</i>	December, <i>décembre</i>
midnight, <i>minuit</i>	Spring, <i>le printemps</i>
North, <i>le nord</i>	Summer, <i>l'été</i>
South, <i>le sud, le midi</i>	Fall, <i>l'automne</i>
	Winter, <i>l'hiver</i>

For "it is warm", "it is cold", etc., see p. 224.

No capitals for seasons, months, days of week.

I shall see him *on Monday, je le verrai lundi*; last Monday, *lundi dernier*; next Monday, *lundi prochain*; every Monday, *tous les lundis*; on May 5th, 1943. *le cinq mai dix-neuf cent quarante-trois*.

2. *Family, Friendship, Love.*

family, <i>la famille</i>	parents, <i>les parents</i>
husband, <i>le mari</i>	father, <i>le père</i>
wife, <i>la femme</i>	mother, <i>la mère</i>

son, *le fils*
 daughter, *la fille*
 brother, *le frère*
 sister, *la soeur*
 uncle, *l'oncle*
 aunt, *la tante*
 nephew, *le neveu*
 niece, *la nièce*
 cousin, *le cousin* (fem. *la cousine*)
 grandfather, *le grand-père*
 grandmother, *la grand-mère*
 grandson, *le petit-fils*
 granddaughter, *la petite-fille*
 father-in-law, *le beau-père*
 mother-in-law, *la belle-mère*
 son-in-law, *le beau-fils*, *le gendre*
 daughter-in-law, *la belle-fille*, *la bru*
 brother-in-law, *le beau-frère*
 sister-in-law, *la belle-soeur*
 man, *l'homme*
 woman, *la femme*
 child, *l'enfant*
 boy, *le (petit) garçon*

3. Speaking Activities.

word, *le mot*, *la parole*
 language, *la langue*
 to speak, *parler*
 to say, *dire* (Pres. *dis*, *dis*, *dit*,
disons, *dites*, *disent*; Impf.
disais; P. p. *dit*; Impv. *dis*,
dites)
 to tell, *dire*, *raconter*, *conter* (I
 told him, *je lui ai dit*)
 to inform, *communiquer à*, *rensei-*
gner
 to call, *appeler*
 to be called, one's name is, *s'ap-*

girl, *la jeune fille*, *la (petite) fille*
 lady, *la dame*
 young lady, *la demoiselle*
 sir, Mr., gentleman, *monsieur*¹⁷
 madam, Mrs., *madame*¹⁷
 Miss, *mademoiselle*¹⁷
 friend, *l'ami* (fem. *l'amie*)
 servant, *le or la domestique*, *la*
servante, *la bonne*
 to introduce, *présenter*
 to visit, *visiter*, *faire une visite*
 love, *l'amour*

to ask for, *demander* (he asked me for a pencil, *il m'a demandé un crayon*)

4. Materials.

gold, *l'or*
silver, *l'argent*
iron, *le fer*
steel, *l'acier*
copper, *le cuivre*
tin, *l'étain, le fer-blanc*
lead, *le plomb*
oil, *l'huile* (fem.)
gasoline, *l'essence* (fem.)
coal, *le charbon*

5. Animals.

animal, *l'animal*
horse, *le cheval*
dog, *le chien*
cat, *le chat*
bird, *l'oiseau*
donkey, *l'âne*
mule, *le mulet*
cow, *la vache*
ox, *le boeuf*
pig, *le cochon*
chicken, *le poulet*
rooster, *le coq*

6. Money, Buying and Selling.

money, *l'argent*
coin, *la pièce* (de monnaie)
dollar, *le dollar*
cent, *le sou*
bank, *la banque*

to answer, *répondre* (I answered my brother, *j'ai répondu à mon frère*)

to thank, *remercier* (I thanked him for the book, *je l'ai remercié du livre*)

to complain, *se plaindre* (Pres. *plains, plains, plaint, plaignons, plaignez, plaignent*; Impf. *plaignais*; P. p. *plaint*)

wood, *le bois*
silk, *la soie*
cotton, *le coton*
wool, *la laine*
cloth, *l'étoffe* (fem.), *le drap*
to cut, *couper*
to dig, *creuser*
to sew, *coudre*
to mend, *raccommoder*

hen, *la poule*
sheep, *le mouton, la brebis*
goat, *la chèvre*
mouse, *la souris*
snake, *le serpent*
fly, *la mouche*
bee, *l'abeille* (fem.)
mosquito, *le moustique*
spider, *l'araignée* (fem.)
louse, *le pou*
flea, *la puce*
bedbug, *la punaise*

check, *le chèque*
money order, *le mandat* (de poste), *le mandat-poste*
to earn, to gain, to win, *gagner*
to lose, *perdre*

to spend, *dépenser*
 to lend, *prêter*
 to borrow, *emprunter* (I borrowed
 10 francs from him, *je lui ai
 emprunté dix francs*)
 to owe, *devoir* (Pres. *dois, dois,
 doit, devons, devez, doivent*;
 Impf., *devais*; P. p. *dû*)
 to pay, *payer*
 to give back, *rendre*
 exchange, *le change* (exchange
 office, *bureau de change*)
 to change, exchange, *changer*
 change, small change, *la monnaie*
 (change me a dollar, *faites-moi
 la monnaie d'un dollar*)
 honest, *honnête*
 dishonest, *pas honnête, voleur*
 price, cost, *le prix*
 to cost, *coûter*
 expensive, *cher*
 cheap, *bon marché*
 store, *le magasin, la boutique*
 (department store, *grand
 magasin*)

7. Eating and Drinking.

to eat, *manger*
 to eat breakfast, to eat lunch,
déjeuner
 breakfast, *le petit déjeuner*
 lunch, *le déjeuner*
 supper, *le souper*
 to eat supper, *souper*
 dinner, *le dîner*
 to dine, *dîner*
 meal, *le repas*
 dining-room, *la salle à manger*
 waiter, *le garçon*
 waitress, *la servante, la serveuse*
 restaurant, *le restaurant*
 menu, *le menu*
 bill, check, *l'addition* (fem.)
 to pass (a dish), *passer*

piece, *le morceau*
 slice, *la tranche*
 pound, *la livre*
 package, *le paquet*
 basket, *le panier*
 box, *la boîte*
 bag, *le sac*
 goods, *la marchandise*
 to go shopping, *faire des achats*
 (*emplettes*)
 to sell, *vendre*
 to buy, *acheter*
 to rent, *louer*
 to be worth, *valoir* (Pres. *vaut,
 vaut, valons, valez, valent*;

 much money, *il a trop d'argent*)
 too many, *trop (de)*; (she has too
 many friends, *elle a trop d'a-*
mis)
 so much, so many, *tant (de)*
 as, like, *comme*
 so, *ainsi*
 besides, furthermore, *d'ailleurs*, *de*
plus, *en outre*
 finally, *enfin*
 only, *seulement*
 almost, *presque* (but when some-
 thing almost happened, *man-*
quer; *il a manqué de tomber*,
 he almost fell)
 gladly, *volontiers*

certainly, *certainement, sans doute*
 at once, *tout de suite, immédiatement*
 at all, *du tout*
 hardly, *à peine*
 aloud, *à haute voix, tout haut*
 of course, *naturellement, bien entendu*
 suddenly, *tout à coup*
 about, *vers, à peu près* (with
 numerals: about ten, *à peu près dix*;
 with time: about six o'clock, *vers six heures*)
 perhaps, maybe, *peut-être*

a little, *un peu*
 again, *encore* (once again. *encore une fois*)
 really, truly, *vraiment*
 together, *ensemble*
 at least, *au moins*
 for lack of, *faute de*
 a long time ago, *il y a longtemps*
 repeatedly, *maintes fois*
 therefore, *par conséquent, donc*
 farther away, *plus loin*
 occasionally, *de temps en temps*
 entirely, altogether, *tout à fait*

26. Conjunctions.

and, *et*
 but, *mais*
 if, *si*
 or, *ou*
 why, *pourquoi*
 because, *parce que*
 why! *par exemple!, comment!*
 before, *avant que*¹⁸
 when, *quand*¹⁹, *lorsque*¹⁹
 than, *que* (use *de* before numbers)
 where, *où*¹⁹
 until, till, *jusqu'à ce que*¹⁸
 although, *bien que*,¹⁸ *quoique*¹⁸

unless, *à moins que*¹⁸
 while, *pendant que*¹⁹
 that, *que*
 for, since, because, *puisque*
 after, *après que*¹⁹
 as soon as, *aussitôt que*,¹⁹ *dès que*¹⁹
 as long as, *pendant que*,¹⁹ *tandis que*¹⁹
 provided that, *pourvu que*¹⁸
 so that, *pour que*,¹⁸ *afin que*¹⁸
 without, *sans que*¹⁸

27. Indefinite Pronouns and Adjectives.

such a, *un tel*
 all kinds of, *toutes sortes de*
 everything, *tout*
 everyone, *tout le monde*
 all, *tout, tous*
 each, every, (adj. *chaque*, pron. *chacun*)

something, (*quelque chose*)
 (something interesting to read, *quelque chose d'intéressant à lire*)

here is, here are, *voici*

there is, there are, *il y a* (use *voilà* if pointing out)

which way?, *par où?, par quel chemin?, de quel côté?*

to the right, *à (la) droite*

to the left, *à (la) gauche*

straight ahead, *tout droit*

this way, (direction), *par ici, de ce côté*

this way, (manner), *de cette façon*

that way, (direction), *par là*

come with me, *venez avec moi, accompagnez-moi* (follow me, *suivez-moi*)

what can I do for you?, *que désirez-vous?, que puis-je faire pour vous?*

what is it?, *qu'est-ce que c'est?* (what is the matter?, *qu'est-ce qu'il y a?*)

what is the matter with you?, *qu'avez-vous?*

what do you want?, *que voulez-vous?, que désirez-vous?*

how much is it?, *combien?*

anything else?, *rien d'autre?, encore quelque chose?, c'est tout?*

nothing else, *rien d'autre, c'est tout*

do you speak French?, *parlez-vous français?*

a little, *un peu*

speak (more) slowly, *parlez (plus) lentement, s'il vous plaît*

do you understand?, *comprenez-vous?*

I don't understand, *je ne comprends pas*

do you know?, *savez-vous?*

I can't, *je ne peux pas* (I don't know (how), *je ne sais pas*)

what do you call this in French?, *comment s'appelle ceci en français?*

how do you say . . . in French?, *comment dit-on . . . en français?*

what does that mean?, *qu'est-ce que ça veut dire?*

what do you mean?, *que voulez-vous dire?*

what are you talking about?, *de quoi parlez-vous?*

I am an American, *je suis Américain*

I'm (very) hungry (thirsty, sleepy, warm, cold), *j'ai (bien) faim (soif, sommeil, chaud, froid)*

it's warm (cold, windy, sunny, fine weather, bad weather), *il fait chaud (froid, du vent, du soleil, beau temps, mauvais temps)*

it's forbidden, *c'est (il est) défendu* (no smoking, *défense de fumer*)

luckily, *heureusement*

unfortunately, *malheureusement*

is it not so?, *n'est-ce pas?* (use this invariable phrase wherever English repeats the verb: you went, *didn't you?*; he is here, *isn't he?*)

not at all, *pas du tout*

how old are you?, *quel âge avez-vous?*

I'm twenty years old, *j'ai vingt ans*

how long have you been here?, *depuis quand (combien de temps) êtes-vous ici?*

how long have you been waiting? *depuis combien de temps (quand) attendez-vous?*

as soon (quickly) as possible, *le plus tôt possible, au plus tôt*

come here!, *venez ici!*

come in!, *entrez!* (stop!, *arrêtez!*)

look!, *regardez!*

careful!, look out!, *prenez garde!, attention!, gare!*

for heaven's sake!, *par exemple!*

in any case. *en tout cas*

let me hear from you. *donnez-moi de vos nouvelles*

glad to meet you. *enchanté (de faire votre connaissance)*

no admittance! *défense d'entrer!*

notice!. *avis (au public)!*

nonsense!, *allons donc!*

it was in fun. *c'était pour rire*

I'm in a bath of perspiration. *je suis en nage*

I have no change. *je n'ai pas la (petite) monnaie*

what else?, *quoi encore?*

you don't say so!. *pas possible!. sans blague!*

listen!. look here!. say!. *dites donc!*

just a second!, *un instant!*

gangway!. one side!, *circule. attention!, laissez passer!*

your health!. *à votre santé!* (reply: *à la vôtre!*)

I should like to, *je voudrais*

hurry!, *dépêchez-vous!*

keep right (left), *tenez la droite (gauche)*

entrance, *entrée* (exit, *sortie*)

30. Slang Words and Expressions.

fellow, "guy", *type* ("nice guy", *bon type, bon zig*; "awful guy", *sale type, sale zig*; "what a guy!", *quel type!*)

nerve, "crust", *culot, toupet* ("what a nerve!", *quel culot!*)

scoundrel, "louse", *canaille, salaud, saligaud*

greenhorn, "sucker", "dumb-bell", *cornichon, veau*

old fogey, *vieille momie*

soldier, doughboy, *poilu; pioupiou* (infantry only)

fatty, "greaseball", *gros patapouf, boule-de-suij*

captain, "boss", "old man", *vieux, capiston*

joint, "dump", *campuse, boîte* ("what an awful dump!", *quelle sale boîte!*)

drunkard, "boozehound", *biberon, soulot, souillard*

to have a "swell" time, to "get plastered", *faire la bombe*

substitute, "sub", *bouche-trou*

"jalopy", *bagnole, vieux clou*

"bike", *bécane*

"gadget", *machin*

money, "dough", *pognon, du pèse*

tobacco, *perlot*

cigarette, "butt", *sèche, mégot*

pay-day, *sainte touche*

luck, *veine, filon*

noise, quarrel, *potin, tapage*

coffee, *cahoua* (bad coffee, *bain de pied, lavasse*)

smart, *calé*

funny, *rigolo*

wonderful, "swell", *épatant, formidable*

to have the blues, *avoir le cafard* (moon, *la cafarde*)

don't bother me!, "scram!", *fiche-moi la paix!*

get the dev'il out of here!, *fiche le camp!*

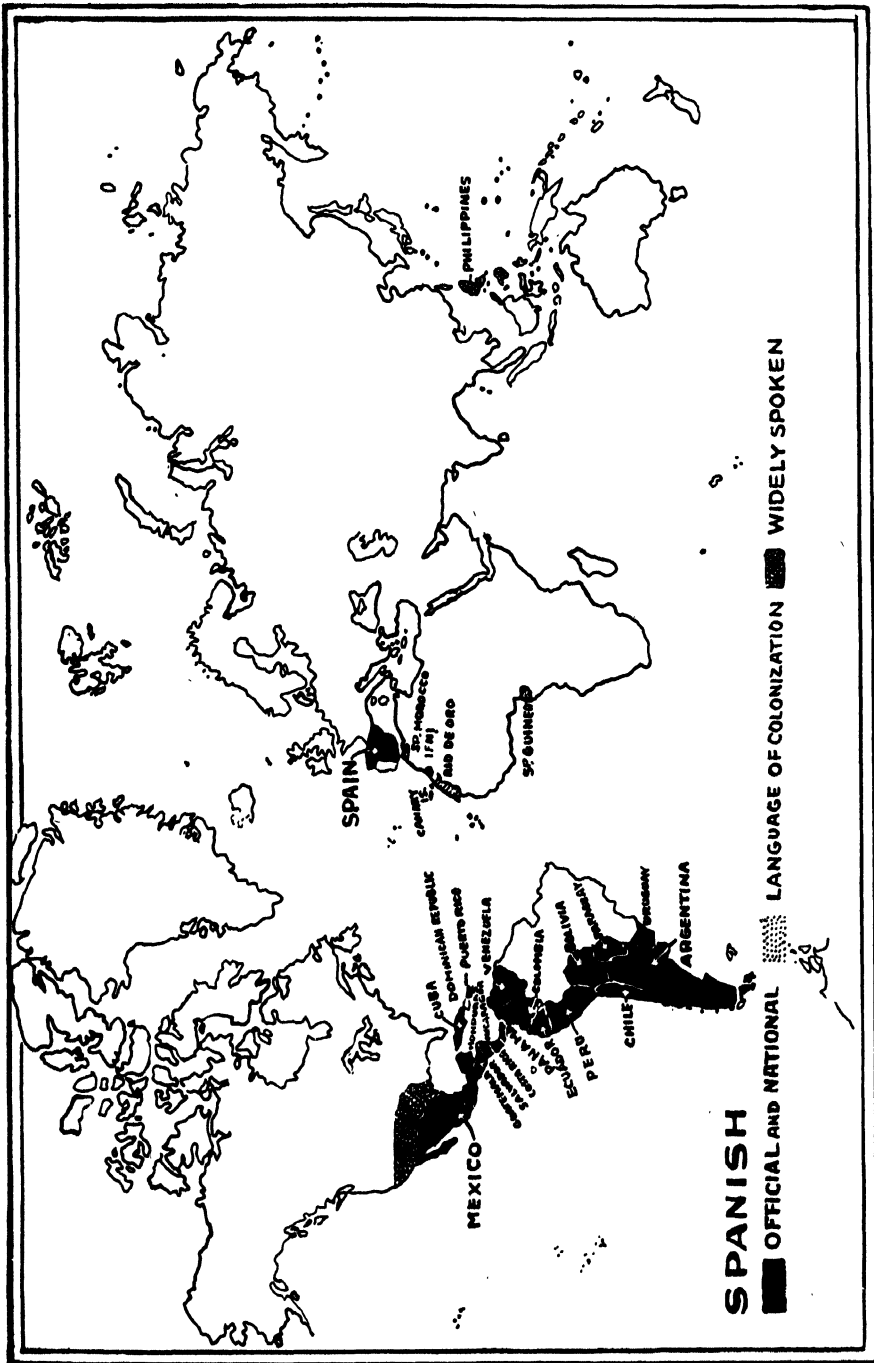

it's all the same to me, *c'est kif-kif*

to crack a smile, *faire risette*

cheese it, the cops!, *vingt-deux les flics!*

hell!, *zut!*

give me a ring, *donnez-moi un coup de téléphone*

SPEAKERS AND LOCATION

(All population figures are approximate)

Europe — Spain (25,500,000).

Africa — Canary Islands (650,000); Rio de Oro (30,000); Spanish Guinea (150,000); Spanish Morocco (800,000).

North America — Mexico (20,000,000).

Central America — Canal Zone (50,000); Costa Rica (600,000); Guatemala (3,000,000); Honduras (1,000,000); Nicaragua (1,100,000); Panama (700,000); Salvador (1,700,000).

West Indies — Cuba (4,200,000); Dominican Republic (1,600,000); Puerto Rico (2,000,000).

South America — Argentina (13,000,000); Bolivia (3,300,000); Chile (4,600,000); Colombia (8,700,000); Ecuador (3,000,000); Paraguay (1,000,000); Peru (6,800,000); Uruguay (2,100,000); Venezuela (3,500,000).

Current to some degree in other areas, including Philippine Islands and southwestern U. S. (New Mexico, Texas, Arizona, California).

ALPHABET AND SOUNDS

a, b, c, ch, d, e, f, g, h, i, j, l, ll, m, n, ñ, o, p, q, r, rr, s, t, u, v, x, y, z (k and w do not appear in native Spanish words).

Vowel sounds: a=far; e=first part of a in gate; i, y=machine; o=or; u=food.

Consonant sounds: ch, f, l, m, n, p, x, y, approximately as in English.

- b** or **v**: at beginning of word (*bien, vaca*), or after a consonant (*corbata, enviar*)=strongly pronounced *b*;
between vowels (*caballo, bravo*)=*v*, pronounced not by placing lower lip in contact with upper teeth, but by placing lips almost together, as for Eng. *w*; lips are held back, however, not protruded. Note that in words beginning with *b* or *v*, the sound may vary accordingly as the word is preceded or not by another word ending in vowel: *vaca*=*baca*, but *la vaca*=*lavaca*.
- c**: before a, o, u or consonant,=*k* (*caballo, cosa, criado*); before e or i,=*thin* (*cielo*).
- d**: between vowels,=*this* (*amado*); elsewhere, as in Eng., but with tip of tongue touching back of upper teeth, not palate (*bondad*).
- g**: before a, o, u or consonant,=*go* (*gabán, lago, gritar*); before e or i,=*strongly aspirated house* (*general, giro*).
- h**: is always silent, as in *honest* (*hierro*).
- j**: =*house*, strongly aspirated (*jinete, joven*).
- ll**: =*million* (*lleno, caballo*).
- ñ**: =*onion* (*año*).
- q**: as in Eng.; used only before *ue, ui*, in which groups the *u* is silent (*que, quien*=*ke, kyen*), as it is also in the groups *gue, gui* (*guerra, guisar*).
- r**: trilled, as in British *very* (*caro*).
- rr**: more strongly trilled, as in Irish *begorra* (*carro*).
- s**: always as in this, never as in *rose*.
- t**: as in Eng., but tip of tongue touches back of upper teeth, not palate (*tengo, matar*).
- z**: =*thin*.

Sounds not appearing in Spanish: all Eng. vowel sounds outside of five listed above; *shame, pleasure, jest, rose, vat, American r*.

Spanish sounds not appearing in English: *b* or *v* between vowels; note differences between Sp. and Eng. *t, d, r, rr*.

SPELLING, SYLLABIFICATION, ACCENTUATION, PUNCTUATION

No double consonants appear in Sp., save ll, rr (special sounds); nn (rare), cc (first *c*=*k*, second *c*=*th*; acción = *akthyon*).

In dividing a word into syllables, a single consonant between two vowels goes with the following vowel, not with the preceding; pronounce Sp. *general* as *ge ne ral*, not *gen er al*, as in Eng.

The only written accent of Sp. is the acute: ' . If a word ends in a vowel, in *n* or in *s*, the stress is on the next to the last syllable, and the accent is *not* written: *caballo*, *tienen*, *pesos*. If a word ends in any consonant but *n* or *s*, the stress is on the last syllable, and the accent is *not* written: *azul*, *primer*. If a word is stressed otherwise than in accordance with the above two rules, the accent is written: *pidió*, *carbón*, *francés*, *dólar*, *cárcel*, *último*, *dólares*.¹

Punctuate as in Eng., save that Sp. uses *inverted* question and exclamation marks at beginning of interrogative or exclamatory sentences: *¿Cómo está usted?*; *¡Cómo me gusta!*

SAMPLE OF WRITTEN SPANISH; USE FOR PRACTICE READING

¡Buenos días, Don José! ¿Cómo está usted?—¡Hola, Manuel! ¿Cómo estás?—Muy bien, gracias; ¿y su señora esposa?—Está en Guatemala con mis dos hijos, pero escribe que todos, gracias a Dios, están bien. ¿Qué tal en tu casa?—Bastante bien. Pero, dígame, ¿ha leído usted esto? Es un artículo en el periódico de hoy, la última edición de esta ma-

1. The accent mark appears on a few words to distinguish them from other words similar in appearance and pronunciation, but different in meaning: *sé* (I know), *se* (self); *este* (this, adjective). *éste* (this one, pronoun); also to separate two vowels that would otherwise combine into a diphthong (*vacío*, empty, would without the accent mark be pronounced *vacio* = *bathyo*).

ñana, anunciando que ha estallado la guerra en Europa.—Pero, ¿tú crees² todo lo que lees² en los periódicos?—Esta vez parece que dicen la verdad. Las tropas alemanas ya están invadiendo a Polonia. Francia e Inglaterra amenazan con declararle la guerra a Alemania. Todavía no se sabe lo que van a hacer las demás naciones.—Pero, ¡parece mentira! ¿Cómo es posible? ¿Para esto van a servir los adelantos de nuestra civilización?—Pues, ¡así es! Ya no hay remedio.

GRAMMATICAL SURVEY

1. *Nouns and Articles.*

Sp. has only two genders, masculine and feminine. Nouns denoting males are masculine, those denoting females feminine. For nouns which in Eng. are neuter, the Sp. ending often helps to determine the gender. Nouns ending in *-o* (plural *-os*) are usually masculine, those in *-a* (plural *-as*) feminine. The gender of nouns ending in *-e* (plural *-es*), and of those ending in consonants (plural formed by adding *-es* to the final consonant) will be determined by observation.³

The definite article is *el* (plural *los*) for masculine nouns, *la* (plural *las*) for feminines. The indefinite article is *un* (masculine), *una* (feminine). *Unos*, *unas* may be used to mean "some".

la casa, the house
el libro, the book
el hijo, the son
la hija, the daughter
el padre, the father
la madre, the mother
el general, the general
la mujer, the woman

los libros, the books
las casas, the houses
los hijos, the sons
las hijas, the daughters
los padres, the fathers
las madres, the mothers
los generales, the generals
las mujeres, the women

2. Pronounce both *e*'s separately: *cre es*, *le es*.

3. Nouns ending in *-ión*, *-d* or *-z* are usually feminine. Nouns ending in *-z* change to *-c* before adding *-es* for the plural: *vez*, plural, *veces*.

un libro, a book
una casa, a house
unos hijos, some sons
unas hijas, some daughters
un padre, a father
una madre, a mother
unos generales, some generals
unas mujeres, some women

2. Adjectives and Adverbs.

Adjectives agree with the nouns they modify. Like nouns, they have the endings *-o* (fem. *-a*; masc. plur. *-os*; fem. plur. *-as*); or *-e* (no difference between masc. and fem.; plur. *-es*); or consonant (plur. *-es*). Agreement with the noun does not necessarily mean identical endings; the adjective may be of the *-e* (plur. *-es*) type, while the noun is of the *-o* (plur. *-os*) type. Adjectives usually follow the noun, though a few common ones precede:

el libro rojo (red); *los libros rojos*
la casa roja; *las casas rojas*
el libro verde (green); *los libros verdes*
la casa azul (blue); *las casas azules*

To form the comparative degree, Sp. usually places *más* (more) before the adjective; to form the superlative, the definite article is placed before the comparative; *un libro claro* (a clear book); *un libro más claro* (a clearer book); *el libro más claro* (the clearest book).

The adverb is generally formed by adding *-mente* to the feminine singular form of the adjective: *claro*; adverb: *claramente* (clearly). If two or more adverbs appear together, *-mente* is added only to the last one, while the others retain the form of the feminine singular adjective: he spoke clearly and distinctly, *habló clara y distintamente*.

3. Numerals.

a) Cardinal⁴.

1— <i>uno</i> ⁵ (fem. <i>una</i>)	22— <i>veinte y dos</i> (or <i>veintidós</i>)
2— <i>dos</i>	30— <i>treinta</i>
3— <i>tres</i>	40— <i>cuarenta</i>
4— <i>cuatro</i>	50— <i>cincuenta</i>
5— <i>cinco</i>	60— <i>sesenta</i>
6— <i>seis</i>	70— <i>setenta</i>
7— <i>siete</i>	80— <i>ochenta</i>
8— <i>ocho</i>	90— <i>noventa</i>
9— <i>nueve</i>	100— <i>ciento</i> ⁶
10— <i>diez</i>	200— <i>doscientos</i> ⁷
11— <i>once</i>	300— <i>trescientos</i>
12— <i>doce</i>	400— <i>cuatrocientos</i>
13— <i>trece</i>	500— <i>quinientos</i>
14— <i>catorce</i>	600— <i>seiscientos</i>
15— <i>quince</i>	700— <i>setecientos</i>
16— <i>diez y seis</i> (or <i>dieciséis</i>)	800— <i>ochocientos</i>
17— <i>diez y siete</i>	900— <i>novecientos</i>
18— <i>diez y ocho</i>	1000— <i>mil</i>
19— <i>diez y nueve</i>	2000— <i>dos mil</i>
20— <i>veinte</i>	100,000— <i>cien mil</i>
21— <i>veinte y uno</i> (or <i>veintiuno</i>)	1,000,000— <i>un millón (de)</i> ⁸

4. Use these in dates, save for “the first”: *el primero de mayo*, May first; *el dos de mayo*, May 2nd; also generally instead of ordinals beyond 10th: *calle cincuenta y tres*, fifty-third street.

5. Use *un* before a masc. sing. noun: *tengo un libro*, I have one book; there is no distinction between “one book” and “a book”.

6. *Cien* if used immediately before the noun: *cien dólares*, \$100; but *ciento sesenta dólares*, \$160.

7. Plural hundreds change *-os* to *-as* if used with feminine nouns: *doscientas mujeres*.

8. *Un millón de dólares*, \$1,000,000; *dos millones de dólares*, \$2,000,000.

b) Ordinal.

1st— <i>primero</i> ^o	5th— <i>quinto</i>	8th— <i>octavo</i>
2nd— <i>segundo</i>	6th— <i>sexto</i>	9th— <i>noveno</i>
3rd— <i>tercero</i> ^o	7th— <i>séptimo</i>	10th— <i>décimo</i>
4th— <i>cuarto</i>		

c) Others.

half—*mitad* (noun), or *medio* (adjective): *media naranja*, half an orange; *la mitad de mi clase*, half of my class.

a pair of—*un par de* a dozen—*una docena de*
 once—*una vez* twice—*dos veces* three times—*tres veces*
 the first time—*la primera vez* sometimes—*algunas veces*
 next time—*la próxima vez* again—*otra vez*

4. Verbs.

Sp. verbs fall into three main classes, with the infinitive ending respectively in *-ar*, *-er*, *-ir* (to take, *tomar*; to sell, *vender*; to live, *vivir*).

Only the most frequently used tenses are given below. In the present indicative (“I take, am taking, do take”), present subjunctive (“I may take”) and singular imperative (“Take!”) of a large number of verbs, there is a change in the last vowel of the root¹⁰ whenever that vowel is stressed (this happens in the first, second and third persons singular and third person plural of the present indicative and present subjunctive, and in the singular imperative); such verbs are called *radical-changing*. They are otherwise regular, save that a few of them effect a change in a few other forms (3rd sing. and 3rd plur. of the past tense, etc.). Radical-changing verbs appearing in the vocabulary are indicated by the changed vowel in parentheses: to count, *contar* (*ue*); this means that whenever the *o* is stressed,

9. Use *primer*, *tercer*, before masculine singular noun: *el primer libro* or *el libro primero*.

10. Root - what is left of the verb when the infinitive ending is removed: the root of *sentir* is *sent-*.

it changes to *ue*, and that the first singular present indicative, consequently, is *cuento*. Other important irregularities are also noted in the vocabulary.

1. Present Indicative (meaning: I take, am taking, do take)

Regular:

to take, *tomar*

I take,	<i>tom-o</i> ¹¹
you take	<i>tom-as</i> ¹⁸
he, she takes, (you take)	<i>tom-a</i> ¹⁸
we take,	<i>tom-amos</i>
you take,	<i>tom-áis</i> ¹⁸
they (you) take,	<i>tom-an</i> ¹⁸

Radical-Changing:

to count, *contar (ue)*

I count,	<i>cuent-o</i>
you count,	<i>cuent-as</i>
he, she counts, (you count)	<i>cuent-a</i>
we count,	<i>cont-amos</i>
you count,	<i>cont-áis</i>
they (you) count,	<i>cuent-an</i>

Regular:

to sell, *vender*

I sell (am selling),	<i>vend-o</i>
you (familiar) sell,	<i>vend-es</i>
he, she sells, you (polite) sell,	<i>vend-e</i>
we sell,	<i>vend-emos</i>
you (plur. fam.) sell,	<i>vend-éis</i>
they, you sell,	<i>vend-en</i>

Radical-Changing:

to lose, *perder (ie)*

I lose, am losing,	<i>pierd-o</i>
you (fam.) lose	<i>pierd-es</i>
he, she loses, you (polite) lose,	<i>pierd-e</i>
we lose,	<i>perd-emos</i>
you lose,	<i>perd-éis</i>
they, you lose,	<i>pierd-en</i>

11. Ordinarily Sp. makes no use of subject pronouns (cf. p. 241), since the endings supply the meaning "I", "he", etc. The pronouns may be used for stress (*yo tomo, I am taking*), or for clearness (*ella toma, "she is taking,"* as against "he is taking"). The Sp. present may have the meaning "I take", "I am taking", "I do take".

12. The second person singular is used in addressing intimate friends, relatives, children, inferiors, animals. The more normal way of addressing people with whom one is not on an extremely familiar basis is to use the *third* singular of the verb with *usted* (abbreviated in writing to *Ud., Vd.*). The same remark applies to the plural, where the second person is even more generally avoided: you (several persons) are taking, *ustedes toman*; in preference to *tomáis*.

Regular:		Radical-changing:			
to live,		to feel,	to sleep,	to ask for,	
<i>vivir</i>		<i>sentir (ie)</i>	<i>dormir (ue)</i>	<i>pedir (i)</i>	
<i>viv-o</i>		<i>sient-o</i>	<i>duerm-o</i>	<i>pid-o</i>	
<i>viv-es</i>		<i>sient-es</i>	<i>duerm-es</i>	<i>pid-es</i>	
<i>viv-e</i>		<i>sient-e</i>	<i>duerm-e</i>	<i>pid-e</i>	
<i>viv-imos</i>		<i>sent-imos</i>	<i>dorm-imos</i>	<i>ped-imos</i>	
<i>viv-ís</i>		<i>sent-ís</i>	<i>dorm-ís</i>	<i>ped-ís</i>	
<i>viv-en</i>		<i>sient-en</i>	<i>duerm-en</i>	<i>pid-en</i>	
to be,	<i>ser</i> ¹³	<i>estar</i> ¹³	to have,	<i>tener</i> ¹⁴	<i>haber</i> ¹⁴
I am,	<i>soy</i>	<i>estoy</i>	I have,	<i>tengo</i>	<i>he</i>
you are,	<i>eres</i>	<i>estás</i>	you have,	<i>tienes</i>	<i>has</i>
he, she is,	<i>es</i>	<i>está</i>	he, she has,	<i>tiene</i>	<i>ha</i>
we are,	<i>somos</i>	<i>estamos</i>	we have,	<i>tenemos</i>	<i>hemos</i>
you are,	<i>sois</i>	<i>estáis</i>	you have,	<i>tenéis</i>	<i>habéis</i>
they are,	<i>son</i>	<i>están</i>	they have,	<i>tienen</i>	<i>han</i>

13. *Ser* must be used to translate "to be" whenever:

- a predicate *noun* follows: he is a general, *es general*;
- material or origin is indicated: the watch is of gold, *el reloj es de oro*;
- time is expressed: it is one, it is two, *es la una, son las dos*.

Estar must be used to translate "to be" whenever:

- health is involved: he is well, *está bien*;
- location is expressed: he is here, *está aquí*.

If a predicate *adjective* follows, *ser* expresses a more permanent or inherent, *estar* a more temporary or occasional quality; she is pretty, *es bonita*; she is young, *es joven*; she is merry, *está alegre*; the milk is hot, *la leche está caliente*. Hence, either verb may be used with certain adjectives: ice is cold, *el hielo es frío*; the water is cold, *el agua está fría*.

14. *Haber* is "to have" used as an auxiliary: I have slept, *he dormido*. *Tener* indicates possession: I have a book, *tengo un libro*; it also has a variety of idiomatic uses (cf. p. 266): I am hungry, *tengo hambre* (literally, I have hunger); I am 20 years old, *tengo veinte años* (literally, I have 20 years).

2. Imperfect Indicative¹⁵ (meaning: I was taking, I used to take).

	-ar verbs	-er and -ir verbs	ser ¹⁶
I was taking, used to take,	<i>tom-aba</i>	<i>vend-</i> or <i>viv-ía</i>	<i>era</i> (I was, used to be)
you were taking, used to take,	<i>tom-abas</i>	<i>vend-</i> or <i>viv-ías</i>	<i>eras</i>
he, she was taking, used to take,	<i>tom-aba</i>	<i>vend-</i> or <i>viv-ía</i>	<i>era</i>
we were taking, used to take,	<i>tom-ábamos</i>	<i>vend-</i> or <i>viv-íamos</i>	<i>éramos</i>
you used to take,	<i>tom-abais</i>	<i>vend-</i> or <i>viv-íais</i>	<i>erais</i>
they used to take,	<i>tom-aban</i>	<i>vend-</i> or <i>viv-ían</i>	<i>eran</i>

3. Past Indicative (meaning: I took).

	-ar verbs	-er and -ir verbs	radical changing ¹⁷
I took,	<i>tom-é</i>	<i>vend-</i> or <i>viv-í</i>	<i>ped-i</i>
you took,	<i>tom-aste</i>	<i>vend-</i> or <i>viv-iste</i>	<i>ped-iste</i>
he, she took,	<i>tóm-ó</i>	<i>vend-</i> or <i>viv-ió</i>	<i>pid-ió</i>
we took,	<i>tom-amos</i>	<i>vend-</i> or <i>viv-imos</i>	<i>ped-imos</i>
you took,	<i>tom-asteis</i>	<i>vend-</i> or <i>viv-isteis</i>	<i>ped-isteis</i>
they took,	<i>tom-aron</i>	<i>vend-</i> or <i>viv-ieron</i>	<i>pid-ieron</i>

15. In the imperfect, future and conditional, radical-changing verbs never have the radical change.

16. *Estar, tener, haber* are regular: *estaba, tenía, había*. Only three verbs have irregular imperfects: *ir*, to go, *iba*; *ser*, to be, *era*; *ver*, to see, *veía*.

17. *-ir* radical-changing verbs which change *e* to *ie* when stressed also have *i* instead of *e* in the third singular and third plural of the past: *sentí*, but *sintió, sintieron*; *-ir* verbs which change *o* to *ue* have *u* in the same forms: *dormí*, but *durmió, durmieron*; *-ar* and *-er* radical-changing verbs are regular in the past tense.

	<i>ser</i>	<i>estar</i>		<i>tener</i>	<i>haber</i>
I was ¹⁸	<i>fui</i>	<i>estuve</i> ¹⁹	I had,	<i>tuve</i> ¹⁹	<i>hube</i> ¹⁹
you were,	<i>fuiste</i>	<i>estuviste</i>	you had,	<i>tuviste</i>	<i>hubiste</i>
he, she was,	<i>fué</i>	<i>estuvo</i>	he, she had,	<i>tuvo</i>	<i>hubo</i>
we were,	<i>fuimos</i>	<i>estuvimos</i>	we had,	<i>tuvimos</i>	<i>hubimos</i>
you were,	<i>fuisteis</i>	<i>estuvisteis</i>	you had,	<i>tuvisteis</i>	<i>hubisteis</i>
they were,	<i>fueron</i>	<i>estuvieron</i>	they had,	<i>tuvieron</i>	<i>hubieron</i>

4. Future (meaning: I shall take), and Conditional (meaning: I should take).²⁰

<i>Future</i>		<i>Conditional</i>	
I shall take,	<i>tomar-é</i>	I should (would) take,	<i>tomar-ía</i>
(sell, live),	<i>(vender)-é</i>	(sell, live),	<i>(vender)-ía</i>
	<i>(vivir)-é</i>		<i>(vivir)-ía</i>
you will take,	<i>tomar-ás</i>	you would take,	<i>tomar-ías</i>
he, she will take,	<i>tomar-á</i>	he, she would take,	<i>tomar-ía</i>
we shall take,	<i>tomar-emos</i>	we should(would) take,	<i>tomar-íamos</i>
you will take,	<i>tomar-éis</i>	you would take,	<i>tomar-íais</i>
they will take,	<i>tomar-án</i>	they would take,	<i>tomar-ían</i>

5. Compound Tenses (meaning: I have, had, shall have, should have taken).

Compound tenses are formed by using *haber* with the past participle of the verb (ending in *-ado* for *-ar* verbs, *-ido* for others: taken, *tomado*; sold, *vendido*; lived, *vivido*); thus:

Present Perfect: I have taken, *he tomado*; you have taken, *has tomado*, etc.

Past Perfect: I had taken, *había tomado*; you had taken, *habías tomado*, etc.

18. For "I was" and "I had", the imperfects *era*, *estaba*, *tenía*, which indicate *continued* action in the past, occur more frequently than the pasts *fui*, *estuve*, *tuve*. *Fui* is also used as the past tense of *ir*, "to go".

19. Nearly all irregular pasts ending in unaccented *-e* have this set of endings: *-e*, *-iste*, *-o*, *-imos*, *-isteis*, *-ieron*.

20. Note that future and conditional endings are added to the *entire* infinitive, not to the stem alone. Radical-changing verbs are quite regular in these tenses. *Ser* and *estar* are regular (*seré*, *estaré*; *sería*, *estaría*); *haber* has *habré*, *habría*; *tener* has *tendré*, *tendría*.

Future Perfect: I shall have taken, *habré tomado*, etc.

Conditional Past: I should (would) have taken, *habría tomado*, etc.

Many past participles are irregular; some will be given in the vocabulary; none of the verbs given so far has an irregular past participle.

6. Imperative (meaning: take!).

Regular

	-ar	-er	-ir
Familiar Singular	— <i>tom-a</i>	<i>vend-e</i>	<i>viv-e</i>
Familiar Plural	— <i>tom-ad</i>	<i>vend-ed</i>	<i>viv-id</i>
Polite Singular	— <i>tom-e</i>	<i>vend-a</i>	<i>viv-a</i>

(Polite imperative forms are normally followed by *usted*)

Polite Plural —*tom-en vend-an viv-an*

(Polite plural forms are normally followed by *ustedes*)

Radical-Changing

	-ar	-er	-ir	
Familiar Singular	<i>cuent-a</i>	<i>pierd-e</i>	<i>sient-e</i>	<i>pid-e</i>
Familiar Plural	<i>cont-ad</i>	<i>perd-ed</i>	<i>sent-id</i>	<i>ped-id</i>
Polite Singular	<i>cuent-e</i>	<i>pierd-a</i>	<i>sient-a</i>	<i>pid-a</i>

(Polite singular forms are normally followed by *usted*)

Polite Plural *cuent-en pierd-an sient-an pid-an*

(Polite plural forms are normally followed by *ustedes*)

7. Negative.

This is regularly formed by prefixing *no* (not) to the verb: *tomo*, I take; *no tomo*, I do not take; *tome Ud.*, take (imperative); *no tome Ud.*, do not take.

8. Reflexive verbs.

Eng. uses some verbs reflexively (I see myself, I speak to myself). In Sp., the number of reflexive verbs is much larger (Eng. I bathe, but Sp. *me baño*, lit. I bathe myself).

Reflexive forms, in the plural, are often used with a reciprocal meaning (each other, one another, to each other, to one another).

The reflexive pronouns are:

<i>me</i> , myself, to myself	<i>nos</i> , ourselves, to ourselves
<i>te</i> , yourself, to yourself	<i>os</i> , yourselves, to yourselves
<i>se</i> , himself, herself, themselves, yourself, yourselves (polite); to himself, etc.	

Reflexive pronouns, like all object pronouns (cf. p. 241), come directly before the verb (I bathe, *me baño*), except in the infinitive (to bathe, *bañarse*), gerund (bathing, *bañándose*)*, and imperative affirmative, both familiar and polite (bathe!, *báñate*, fam.; *báñese Ud.*, pol.); but not imperative negative (do not bathe! *no te bañes*, *no se bañe Ud.*).

I see myself,	<i>me veo</i>
you see yourself,	<i>te ves</i>
he (she) sees himself (herself),	<i>se ve</i>
we see ourselves, or each other,	<i>nos vemos</i>
you see yourselves, or each other,	<i>os veis</i>
they see themselves, or each other,	<i>se ven</i>
I do not speak to myself,	<i>no me hablo</i>
you do not speak to yourself	<i>no te hablas</i>
he (she) does not speak to himself (herself)	<i>no se habla</i>
we do not speak to ourselves, or each other,	<i>no nos hablamos</i>
you do not speak to yourselves, or each other,	<i>no os habláis</i>
they do not speak to themselves, or each other,	<i>no se hablan</i>

21. The gerund (or present participle) is formed by adding *-ando* to the root of *-ar* verbs, *-iendo* to that of *-er* and *-ir* verbs: taking, *tomando*; selling, *vendiendo*; living, *viviendo*. It may be used alone, with the meaning of "by" or "while" (by taking, while taking, *tomando*), or

9. Passive.

The reflexive is often used in Sp. where a passive would appear in Eng. This is particularly true when the subject of the Eng. passive verb is a thing: books are sold here, *aquí se venden libros* (lit. books sell themselves here). Otherwise, the passive is generally formed with the verb "to be" (*ser*), and the past participle, *being* used as a predicate adjective, agrees with the subject: my parents were killed by the robbers, *mis padres fueron matados por los ladrones*.

10. Subjunctive.

The Sp. subjunctive has four tenses, and is frequently used in subordinate clauses. For the present subjunctive, the ending are normally:

for *-ar* verbs: *-e, -es, -e, -emos, -éis, -en*; I may take, *tome, etc.*²²
 for *-er* and *-ir* verbs: *-a, -as, -a, -amos, -áis, -an*; I may sell, *venda, etc.*

The imperfect subjunctive ends in *-ase* or *-ara* for *-ar* verbs, *-iese* or *-iera* for the others: I might take, *tomase* or *tomara*. The present perfect subjunctive uses the present subjunctive of *haber* (*haya*), with the past participle (*haya tomado*, I may have taken); the past perfect subjunctive has the imperfect subjunctive of *haber* (*hubiese* or *hubiera*) with the past participle (I might have taken, *hubiese tomado* or *hubiera tomado*).

with the verb *estar* to form a progressive conjugation (I am taking, *estoy tomando*); but the progressive meaning can also be rendered by the plain verb (*tomo*, I am taking).

22. Note that it is really the third person singular and plural of the present subjunctive that are used as polite imperatives: *tome Ud., tomen Uds.* The second person singular and plural of the subjunctive are used as familiar imperatives in the negative: do not take, *no tomes*.

5. *Pronouns.*

a) Personal Pronouns (Subject).

I, <i>yo</i>	we, <i>nosotros</i>
you (fam.), <i>tú</i>	you (fam. plur.), <i>vosotros</i>
he, <i>él</i>	they (masc.), <i>ellos</i>
she, <i>ella</i>	they (fem.), <i>ellas</i>
you (pol.), <i>usted</i>	you (pol. plur.), <i>ustedes</i>

These are generally used only for emphasis or clarification: I take, *tomo*; I take, *yo tomo*; she takes (in opposition to "he takes"), *ella toma*.

b) Personal Pronouns (Direct Object).

me, <i>me</i>	us, <i>nos</i>
you (fam.), <i>te</i>	you, (fam. plur.), <i>os</i>
him, you (pol.), <i>le</i>	them, you (pol.), <i>les</i>
her, <i>la</i> ³³	them (fem.), <i>las</i> ³³
it, <i>lo</i>	them (plural of <i>lo</i>), <i>los</i>

Indirect object pronouns are the same as the direct (to me, *me*, etc.), save that *le* is generally used with the meanings of "to him", "to her", "to it", "to you" (pol.), and *les* with the meaning of "to them" in all connections and "to you" (pol. plur.).

Direct and indirect object pronouns precede the verb, save in the infinitive, gerund and imperative affirmative: *me ve*, he sees me; *lo tiene*, he has it; *le da el libro*, he gives him the book; but *quiero tomarlo*, I wish to take it; *¡tómalo!*, take it!; *estoy tomándolo*, I am taking it. If a direct and an indirect object pronoun are used together, the indirect normally precedes the direct (he gives it to me, *me lo da*; he wishes to give it to me, *quiere dármelo*); and if the indirect is *le* or *les*, it is changed to *se* (he gives it to him, *se lo da*, instead of *le lo da*).

23. Use *la* and *las* referring to nouns which in Sp. are feminine; I see it (the house), *la veo*; I see it (the book), *lo veo*.

c) Personal Pronouns with Prepositions.

These are the same as the subject pronouns, save that *mí* replaces *yo*, and *ti* replaces *tú*; for me, *para mí*; for you, *para ti*; for him, *para él*; for her, *para ella*; etc.

d) Possessive Adjectives and Pronouns.

Adjectives.

my, *mi*, plur. *mis*: (*mi libro, mi casa, mis libros, mis casas*)

your (fam.), *tu*, plur. *tus*: (*tu libro, tus casas*)

his, her, your, their²⁴: *su*, plur. *sus*

our, *nuestro* (*nuestra, nuestros, nuestras*): (*nuestra casa*)

your, *vuestro* (*vuestra, etc.*): (*vuestras casas*)

Pronouns.

mine, *el mío, la mía, los míos, las mías*: (your books and mine, *tus libros y los míos*)

yours, *el tuyo, la tuya, los tuyos, las tuyas*.

his, hers, theirs, yours (pol.), *el suyo, la suya, los suyos, las suyas*²⁵

ours, *el nuestro, la nuestra, los nuestros, las nuestras*

yours, *el vuestro, la vuestra, los vuestros, las vuestras*

The article is usually omitted after the verb *ser*: *el libro es mío*.

e) Demonstrative Adjectives and Pronouns.

Adjectives.

this, these, *este, esta, estos, estas*: (this book, *este libro*, these houses, *estas casas*)

that, those (near you), *ese, esa, esos, esas*: (that house of yours, that house near you, *esa casa*)

24. Distinguish by using *de él, de ella, de Ud., de ellos, de ellas, de Uds.*, if necessary: her book, *su libro* or *el libro de ella*; their books, *sus libros* or *los libros de ellos*.

25. Distinguish by using *de él, etc.*; my books and hers, *mis libros y los suyos* or *mis libros y los de ella*.

that, those (yonder), *aquel, aquella, aquellos, aquellas*: (those men over there, *aquellos hombres*)

Pronouns.

this one, these, *éste, ésta, éstos, éstas*: (your book and this one, *tu libro y éste*)

that one, those (near you), *ése, ésa, esos, esas*: (my book and that one by you, *mi libro y ése*)

that one, those (yonder), *aqué, aquélla, aquéllos, aquéllas*: (our books and those over there, *nuestros libros y aquéllos*)

“Neuter” pronouns, *esto, eso, aquello* are used to refer not to specific objects, but to a general situation or state of affairs: this pleases me, I like this, *esto me gusta*; I don't like that (what you have said), *eso no me gusta*.

To translate “the one”, “the ones”, Sp. generally uses the definite article (*el, la, los, las*): my book and the one which is on the table, *mi libro y el que está en la mesa*; my book and my brother's (the one of my brother), *mi libro y el de mi hermano*.

f) Relative and Interrogative Pronouns.

who, whom, that, which, *que²⁶*; the man who is here, *el hombre que está aquí*; the letter you wrote, *la carta que Ud. escribió.*²⁷

whom (after prepositions), *quien*: the man to whom I spoke, *el hombre a quien hablé.*

whose, *cuyo, cuya, cuyos, cuyas*: the man whose house I saw, *el hombre cuya casa he visto.*

who?, *¿quién?* (plur. *¿quiénes?*): who is here? *¿Quién está aquí?*; who are those men? *¿Quiénes son aquellos hombres?*

whom?, *¿a quién?* (pl. *¿a quiénes?*): whom did you see? *¿A quién vió Ud.?*

what?, *¿qué?*: what did you write?, *¿Qué escribió Ud.?*

26. *El cual, la cual, los cuales, las cuales*, or *el que, la que, los que, las que*, are occasionally used instead of *que* to refer to the more distant of two possible antecedents: I spoke to the boy's mother, who came to see me, *hablé con la madre del muchacho, la cual vino a verme.*

27. Note that the relative pronoun cannot be omitted in Sp.

which?, which one?, which ones?, *¿cuál?* (plur. *¿cuáles?*): to which one of my friends did you give the book? *¿A cuál de mis amigos dió Ud. el libro?*

whose?, *¿de quién?*: whose house is that? (whose is that house?), *¿De quién es aquella casa?*

AMERICAN VARIETIES OF SPANISH

The Spanish used in the various countries of Spanish America has local peculiarities of pronunciation, grammar and vocabulary. These differences, while interesting and striking, are not so fundamental as those found in some other languages (e.g., Italian, with its numerous dialects, many of which are mutually incomprehensible). Several of the Spanish-American peculiarities of pronunciation are current in Spain itself, notably the southern part of the country (Andalusia), and seem to have been imported by original Spanish settlers coming to America from various sections of Spain.²⁸ Only a few major peculiarities of Spanish-American speech are listed, and many of them are common to the vulgar pronunciation of Spain as well.

PRONUNCIATION.

Spanish America generally discards the Castilian sound of *th* in *thin* (represented by *z*, or by *c* before *e* and *i*), and replaces it with the sound of *s* (*cielo*; Castilian *thyelo*; Sp. Am. *syelo*). This leads to occasional confusion of words which in Castilian would be differentiated by sound (*casa*, "house"; *caza*, "hunt"), and to the replacement of one member of the pair by another word (*cacería*, "hunt", in Sp. Am.)

28. In Spain, local dialects (Andalusian, Asturian, Aragonese, etc.) do not diverge from standard Castilian any more than do our southern, middle western or New England forms of speech from standard "American" English. Galician, Catalan and Basque are notable exceptions; but Galician (spoken in the northwestern corner of Spain) is really a dialect of Portuguese, not of Spanish; Catalan (eastern Spain) is rated as a separate Romance language; Basque (north-eastern corner of Spain, southwestern corner of France) not only is not a Romance language, but does not even belong to the Indo-European family.

2. The Castilian sound of *ll* is usually *y* in Sp. Am. (*caballo*; Cast. *kavallyo*; Sp. Am. *kavayo*). In sections of Argentina, etc., this sound further changes to that of *s* in "pleasure", or even to that of *g* in "gin" (*kavazho*, *kavajo*).

3. The sound of *g* before *e* or *i*, or of *j*, which is in Castilian a harsher guttural than English *h*, is in most Spanish American countries pronounced more weakly, so as to be very similar to Eng. *h* (*general*: Cast. *kheneral*, Sp. Am. *heneral*). The *j* of *reloj* ("watch", "clock") is often silent in Sp. Am., so that the word sounds as though spelled *reló*.

4. At the end of a word, *s*, which is strongly pronounced in Castilian, either becomes *h* or disappears in most Sp. Am. countries (*dos pesos* sounds like *doh pesos* or *doh pesoh*).

5. Between vowels, *d*, which in Castilian sounds like *th* of "this", often disappears altogether in Sp. Am. and Spain (*amado* pronounced *amao*).

6. *Pa* for *para* (*pa nada* or *pa naa* instead of *para nada*); *gwenó* for *bueno*; *gwevo* for *huevo*, etc. are occasionally heard in Sp. Am. as well as in Spain.

7. Sections of Argentina have a habit of stressing object pronouns which are added on to verbs: *vamonós*, *digalé* for *vámonos* ("let's go", "let's get out"), *dícale* ("tell him").

Other sections of South America, and even of Spain, share this peculiarity.

GRAMMAR.

1. Considerable confusion appears in forms of address in various Sp. Am. countries. While *vosotros* with the second person plural of the verb is generally avoided, so that a mother who would address one of her children as *tú* (with the second singular verb) addresses more than one of them as *ustedes* (with the third plural), Argentina prefers *vos* in addressing one person, *ustedes* more than one.

2. *Mosotros*, *mos*, are sometimes heard in the place of *nosotros*, *nos* ("we", "us"). The uneducated of Spain, however, often use these same forms.

3. Argentina tends to avoid the future (*tomaré*, "I shall take"), using in its place *voy a tomar* ("I am going to take"). Colombia prefers *voy y tomo* ("I go and take"), or *voy ir tomando* ("I am going to go taking").

4. While Castilian uses the *-se* and *-ra* forms of the past subjunctive (cf. p. 240) about equally, Sp. Am. normally prefers the *-ra* form.

VOCABULARY.

Local words (frequently of Indian origin) are current in one country and not in others; many of them designate local objects. Only a few examples can be given. An illiterate farm hand is a *peón* in Mexico, but a *guasó* or *roto* in Chile, a *guajiro* in Cuba, a *jíbaro* in Puerto Rico. "Dairy" (Spain *lechería*) is *tambo* in Argentina. Chile uses *donde* ("where") in the sense of "at the house of", and goes so far as to combine, in the same meaning, *donde está*, *donde estaba* (literally "where was") into *ontá*, *ontaba*. Colombia has *desecho* for *senda* ("jungle trail"). Cuba uses *tabaco* ("tobacco") in the sense of "cigar" (Spain *cigarro*), and *cigarro* in the sense of "cigarette" (Spain *cigarrillo*). *Monte*, which in Spain has rather the meaning of "mountain", is used in Sp. Am. in the sense of "jungle", "wild country", while Chile uses *cerro* (Spain "hill") for mountain (Spain *montaña*, *monte*). *Papa* for *patata* ("potato"), *manteca* (which in Spain would mean "fat", "grease") for *mantequilla* ("butter") are in general use. *A la pampa*, "in the open"; *es muerto*, *es nacido*, instead of *ha muerto*, *ha nacido* ("he died", "he was born"); *achicar* ("to kill", slang for *matar*); *cada nada* ("every little trifle"); *hasta cada rato* ("in a little while", instead of Castilian *en un rato*, *dentro de un rato*); *pararse* (literally "to stop") used for *levantarse* ("to get up"); *truje* for *traje* ("I brought"; past tense of *traer*, "to bring"); *vido* for *vió* ("he saw"; third singular past tense of *ver*), are among forms frequently used in Spanish America. A few of them (*cigarro*, *monte*, *papa*, *manteca*, *truje*, *vido*, *es nacido*, *ontaba*) occasionally appear also in the speech of the illiterate in Spain.

VOCABULARY 20

1. *World, Elements, Nature, Weather, Time, Directions.*

world, <i>el mundo</i>	West, <i>el oeste</i>
earth, <i>la tierra</i>	year, <i>el año</i>
air, <i>el aire</i>	month, <i>el mes</i>
water, <i>el agua</i> (fem.; <i>el</i> used for euphony before stressed <i>a</i>)	week, <i>la semana</i>
fire, <i>el fuego</i>	day, <i>el día</i> (masc.)
light, <i>la luz</i> (pl. <i>luces</i>)	hour, <i>la hora</i>
sea, <i>el (la) mar</i> (masc. or fem.)	minute, <i>el minuto</i>
sun, <i>el sol</i>	Sunday, <i>el domingo</i>
moon, <i>la luna</i>	Monday, <i>el lunes</i> (pl. <i>los lunes</i>)
star, <i>la estrella</i>	Tuesday, <i>el martes</i> (<i>los -</i>)
sky, <i>el cielo</i>	Wednesday, <i>el miércoles</i> (<i>los -</i>)
wind, <i>el viento</i>	Thursday, <i>el jueves</i> (<i>los -</i>)
weather, time, <i>el tiempo</i>	Friday, <i>el viernes</i> (<i>los -</i>)
snow, <i>la nieve</i>	Saturday, <i>el sábado</i>
to snow, <i>nevar</i> (<i>ie</i>)	January, <i>enero</i>
rain, <i>la lluvia</i>	February, <i>febrero</i>
to rain, <i>llover</i> (<i>ue</i>)	March, <i>marzo</i>
cloud, <i>la nube</i>	April, <i>abril</i>
cloudy, <i>nublado</i>	May, <i>mayo</i>
fog, <i>la niebla</i>	June, <i>junio</i>
ice, <i>el hielo</i>	July, <i>julio</i>
mud, <i>el barro, el fango, el lodo</i>	August, <i>agosto</i>
morning, <i>la mañana</i>	September, <i>septiembre</i>
noon, <i>el mediodía</i>	October, <i>octubre</i>
afternoon, evening, <i>la tarde</i>	November, <i>noviembre</i>
night, <i>la noche</i>	December, <i>diciembre</i>
midnight, <i>la medianoche</i>	Spring, <i>la primavera</i>
North, <i>el norte</i>	Summer, <i>el verano</i>
South, <i>el sur</i>	Fall, <i>el otoño</i>
East, <i>el este</i>	Winter, <i>el invierno</i>

29. Irregularities in the plural of nouns are indicated: *la luz* (pl. *luces*). Radical-changing verbs are indicated by (*ue*), (*ie*), (*i*), according to the nature of the change. Important verbal irregularities are given in parentheses.

Note that verbs ending in *-car* change *c* to *qu* before *e*-endings (*buscar*, Past 1st sg. *busqué*, Polite Imperative *busque*); verbs ending in *-gar* insert *u* after *g* before *e*-endings (*entregar*, Past *entregué*, Pol. Impv. *entregue*); verbs ending in *-zar* change *z* to *c* before *e*-endings (*empezar*, Past *empecé*, Pol. Impv. *empiece*).

For "it is warm", "it is cold", etc., see p. 266.

No capitals for seasons, months, days of week.

I shall see him *on* Monday, *le verá el lunes*; last Monday, *el lunes pasado*; next Monday, *el lunes que viene*; Monday morning, *el lunes por la mañana*; every Monday, *todos los lunes*; on May 5th, 1943, *el cinco de mayo de mil novecientos cuarenta y tres*.

2. Family, Friendship, Love.

family, <i>la familia</i>	<i>mano político</i>
husband, <i>el marido</i>	sister-in-law, <i>la cuñada</i>
wife, <i>la mujer, la esposa</i>	man, <i>el hombre</i>
parents, <i>los padres</i>	woman, <i>la mujer</i>
father, <i>el padre</i>	child, <i>el niño</i>
mother, <i>la madre</i>	boy, <i>el muchacho</i>
son, <i>el hijo</i>	girl, <i>la muchacha</i>
daughter, <i>la hija</i>	sir, Mr., <i>el señor</i> ³⁰
brother, <i>el hermano</i>	madam, Mrs., <i>la señora</i> ³⁰
sister, <i>la hermana</i>	Miss, young lady, <i>la señorita</i> ³⁰
uncle, <i>el tío</i>	friend, <i>el amigo, la amiga</i>
aunt, <i>la tía</i>	servant, <i>el criado, la criada</i>
nephew, <i>el sobrino</i>	to introduce, <i>presentar</i>
niece, <i>la sobrina</i>	to visit, <i>visitar</i>
cousin, <i>el primo, la prima</i>	love, <i>el amor</i>
grandfather, <i>el abuelo</i>	to love, <i>amar, querer (ie)</i> (Past,
grandmother, <i>la abuela</i>	<i>quise; Fut. querré</i>) ³¹
grandson, <i>el nieto</i>	to fall in love with, <i>enamorarse de</i>
granddaughter, <i>la nieta</i>	to marry, <i>casarse con</i> (he married
father-in-law, <i>el suegro</i>	her: <i>se casó con ella</i>)
mother-in-law, <i>la suegra</i>	sweetheart, <i>el novio, la novia</i>
son-in-law, <i>el yerno</i>	kiss, <i>el beso</i>
daughter-in-law, <i>la nuera</i>	to kiss, <i>besar</i>
brother-in-law, <i>el cuñado, el her-</i>	dear, beloved, <i>querido; amado</i>

30. Use the definite article with *señor, señora, señorita*, save in speaking directly to the person: Mr. Lopez has a book, *el señor López tiene un libro*; Mr. Lopez, have you a book?—*Señor López, ¿tiene Ud. un libro?*

31. Whenever there is an irregularity in the future, the same irregularity appears in the conditional: *querer*, Fut. *querré*, Cond. *querría*.

3. Speaking Activities.

word, *la palabra*
 language, *la lengua; el idioma*
 to speak, *hablar*
 to say, *decir* (Pres., *digo, dices, dice, decimos, decis, dicen*;
 Past, *dij-e, -iste, -o, -imos, -isteis, -eron*; Fut., *diré*; Impv., *di, diga*)
 to tell, *decir, contar (ue)*
 to inform, *informar; comunicar*
 (see n. 29)
 to call, *llamar*
 to be called, one's name is, *llamarse*
 (my name is John, *me llamo Juan*)
 to greet, *saludar*
 to name, *nombrar*
 to cry, shout, *gritar*
 to listen to, *escuchar* (I listen to her, *la escucho*)

4. Materials.

gold, *el oro*
 silver, *la plata*
 iron, *el hierro*
 steel, *el acero*
 copper, *el cobre*
 tin, *el estaño*
 lead, *el plomo*
 oil, *el aceite, el petróleo*
 gasoline, *la gasolina, la bencina, la nafta*

5. Animals.

animal, *el animal*
 horse, *el caballo*
 dog, *el perro*
 cat, *el gato*
 bird, *el pájaro*
 donkey, *el burro, el asno*
 mule, *el mulo*

to hear, *oir* (Pres., *oigo, oyes, oye, oímos, oís, oyen*; Impv., *oye, oiga*)
 to understand, *comprender, entender (ie)*
 to mean, *querer decir* (see p. 257 for *querer*; I don't know what you mean, *no sé lo que Vd. quiere decir*), *significar* (see note 29; do not use when the subject is a person)
 to ask for, *pedir (i)*, (He asked me for a pencil, *me pidió un lápiz*)
 to ask (a question), *preguntar*
 to answer, *responder, contestar*
 to thank, *dar las gracias* (I thanked him for the book, *le di las gracias por el libro*)
 to complain, *lamentarse, quejarse*

coal, *el carbón*
 wood, *la madera, la leña*
 silk, *la seda*
 cotton, *el algodón*
 wool, *la lana*
 cloth, *el paño*
 to cut, *cortar*
 to dig, *cavar*
 to sew, *coser*
 to mend, *remendar*

cow, *la vaca*
 ox, *el buey*
 pig, *el cerdo, el puerco, el cochino*
 chicken, *el pollo*
 hen, *la gallina*
 rooster, *el gallo*
 sheep, *la oveja*

goat, *la cabra*
 mouse, *el ratón*
 snake, *la culebra*
 fly, *la mosca*
 bee, *la abeja*

mosquito, *el mosquito*
 spider, *la araña*
 louse, *el piojo*
 flea, *la pulga*
 bedbug, *la chinche*

6. Money, Buying and Selling.

money, *el dinero*
 coin, *la moneda*
 dollar, *el dólar, el peso, el duro*
 (Spain, 5 pesetas make 1 duro)
 cent, *el centavo, el céntimo*
 bank, *el banco*
 check, *el cheque*
 money order, *el giro postal*
 to earn, to gain, to win, *ganar*
 to lose, *perder (ie)*
 to spend, *gastar*
 to lend, *prestar*
 to borrow, *pedir (i) prestado* (he
 borrowed \$2 from me, *me pi-
 dió dos dólares prestados*)
 to owe, *deber*
 to pay, *pagar* (see n. 29)
 to give back, *devolver (ue)*; P. p.
devuelto
 change, *la vuelta*
 to change, exchange, *cambiar*
 honest, *honrado, sincero*
 dishonest, *poco honrado, falso*
 price, *el precio*
 cost, *el coste, el costo*
 to cost, *costar, (ue)*

expensive, *caro, costoso*
 cheap, *barato*
 store, *la tienda*
 piece, *el pedazo, el trozo*
 slice, *la tajada, la rebanada*
 pound, *la libra*
 package, *el paquete, el bulto*
 basket, *la canasta, la cesta*
 box, *la caja*
 bag, *el saco*
 goods, *las mercancías*
 to go shopping, *ir de compras, ir
 de tiendas*
 to sell, *vender*
 to buy, *comprar*
 to rent, to hire, *alquilar, arrendar*
 to be worth, *valer* (Pres. *valgo,*
vales, etc.; Fut. *valdré*)
 to choose, *escoger* (Pres. *escojo,*
escoges, etc.; Pol. Impv. *esco-
 ja*)
 thief, robber, *el ladrón*
 to steal, *robar*
 police, *la policía*
 policeman, *el agente de policía,*
el policía, el guardia

7. Eating and Drinking.

to eat, *comer*
 breakfast, *el desayuno*
 to eat breakfast, *desayunarse*
 lunch, *el almuerzo*
 to eat lunch, *almorzar (ue and*
 see n. 29)
 supper, *la cena*

25. Adverbs and Adverbial Expressions.

today, *hoy*
 yesterday, *ayer*
 tomorrow, *mañana*
 day before yesterday, *antes de*
ayer
 day after tomorrow, *pasado ma-*
ñana
 tonight, *esta noche*
 last night, *anoche*
 this morning, *esta mañana*
 in the morning, *por la mañana*
 in the afternoon, *por la tarde*
 in the evening, in the night, *por*
la noche
 tomorrow morning, *mañana por*
la mañana
 tomorrow afternoon, *mañana por*
la tarde
 tomorrow evening, *mañana por*
la noche
 early, *temprano, pronto*

on time, *a tiempo*
 late, *tarde*
 already, *ya*
 no longer, *ya no* (he is no longer
 here, *ya no está aquí*)
 yet, still, *todavía*
 not yet, *todavía no*
 now, *ahora*
 afterwards, then, *después, enton-*
ces
 never, *nunca, jamás* (use *no* be-
 fore verb: he never comes, *no*
viene nunca)
 always, *siempre*
 forever, *para siempre*
 soon, *pronto*
 often, *a menudo*
 seldom, *rara vez, raramente*
 usually, *comúnmente, general-*
mente
 fast, *de prisa*

slowly, *despacio*
 here, *aquí*
 there, *allí, allá, ahí*
 over there, *allá, por allí, allá abajo*
 near by, *cerca* (near here, *aquí*
cerca, cerca de aquí)
 far away, *a lo lejos, lejos*
 up, *arriba*
 down, *abajo*
 ahead, in front, *por delante*
 behind, in back, *por detrás*
 forward, *adelante*
 back, *para atrás* (go back, ¡*vuelva*
Ud. para atrás!)
 outside, *fuera, afuera*
 inside, *dentro*
 opposite, *enfrente*
 here and there, *aquí y allá*
 everywhere, *en todas partes, por*
todas partes
 where?, *¿dónde?, ¿a dónde?*
 (use “*¿a dónde?*” if there is
 motion)
 where, *donde, adonde*, (use *adonde*
de for motion)
 also, *también*

26. *Conjunctions.*

and, <i>y</i>	although, <i>aunque</i> ³³
but, <i>pero</i>	unless, <i>a menos que</i> ³³ , <i>a no ser que</i> ³³
if, <i>si</i>	
or, <i>o</i>	while, <i>mientras (que)</i> ³³
why?, <i>¿por qué?</i>	that, <i>que</i>
because, <i>porque</i>	for, since, <i>pues</i>
why!, <i>¿cómo!</i> , <i>¡qué!</i> , <i>pues</i>	after, <i>después de que</i> ³³
before, <i>antes que</i> ³³	as soon as, <i>luego que</i> ³³
when, <i>cuando</i> ³³	as long as, <i>mientras (que)</i> ³³
than, <i>que</i> (before number use <i>de</i>)	provided that, <i>con tal que</i> ³³
where, <i>donde</i> , <i>adonde</i>	in order that, <i>para que</i> ³³
until, till, <i>hasta que</i> ³³	so that, <i>de manera que</i> ³³
	without, <i>sin que</i> ³³

27. *Indefinite Pronouns and Adjectives.*

everything, <i>todo</i>	someone, <i>alguien</i>
everyone, <i>todos</i>	nothing, <i>nada</i> ³⁴
all, <i>todo</i>	no one, <i>nadie</i> ³⁴
each, every, <i>cada uno</i> , <i>todos</i>	no. . (adj), <i>ninguno</i> ³⁴ (<i>ningún</i> be- fore masc. sg. noun)
something, <i>algo</i> , <i>alguna cosa</i>	neither - nor, <i>ni - ni</i> ³⁴
some, <i>algunos</i> , <i>unos</i>	(an) other, <i>otro</i>
little (not much), <i>poco</i>	much, (lots of), <i>mucho</i> , <i>muchos</i>
few, <i>pocos</i>	many, <i>muchos</i>
a few, <i>unos cuantos</i>	several, <i>varios</i> , <i>diversos</i>
enough, <i>bastante</i> , <i>suficiente</i>	both, <i>ambos</i> , <i>los dos</i> (fem. <i>las dos</i>)
enough!, <i>¡basta!</i> , <i>¡no más!</i>	
such a, <i>tal</i>	
all kinds of, <i>toda clase de</i>	

28. *Prepositions.*

of, from, <i>de</i> (with masc. sg. article <i>el</i> contracts to <i>del</i>)	give John the book, <i>doy el libro a Juan</i> ; also with a noun direct object if it is a person: I see John, <i>veo a Juan</i> ; but not with <i>tener</i> : I have two brothers,
to, at, <i>a</i> (with masc. sg. article contracts to <i>al</i> ; <i>must</i> be used with a noun indirect object: I	

33. The subjunctive is used after these conjunctions *if* they express purpose, condition, supposition, concession or indefinite future time.

34. If these expressions appear *after* the verb, *no* is required before the verb: no one came, *no vino nadie* or *nadie vino*.

tengo dos hermanos)
 with, *con*, (with me, *conmigo*;
 with you, *contigo*)
 in, on, at, *en*
 over, above, *sobre*
 for, *por*, *para* (use *para* to indicate purpose or destination.
por for exchange: I paid \$2 for this book; it's for you, *pagué dos pesos por este libro*; *es para Ud.*)
 by, *por*
 without, *sin*
 until, up to, *hasta*
 since, *desde*
 toward, *hacia*
 between, among, *entre*
 near, *cerca de*

far from, *lejos de*
 before, *antes de*
 after, *después de*
 in front of, opposite, *delante de*
frente a
 in back of, behind, *detrás de*
 under (neath), *bajo*
 through, across, *por*, *a través de*
 against, *contra*
 by means of, *por medio de*
 in spite of, *a pesar de*, *no obstante*
 about, around, *alrededor de*
 because of, on account of, *por*,
a (or *por*) *causa de*
 during, *durante*
 instead of, *en lugar de*, *en vez de*
 beside, *al lado de*, *junto a*
 on the other side of, *del otro lado de*

29. Special Expressions and Idioms.

good morning, good day, *buenos días*
 good afternoon, good evening, *buenas tardes*
 good night, *buenas noches*
 good-bye, *adiós*, *hasta la vista*
 see you later, *hasta luego*
 see you tomorrow, *hasta mañana*
 just now, *ahora mismo* (just a moment ago, *hace poco*)
 hello!, *¡hola!* (on the telephone, *¿qué hay?*, *¡diga!*, *¡al aparato!*)
 how are you?, *¿cómo está Ud.?*
 how goes it?, *¿qué tal?*
 I'm well, *estoy bien*
 I'm (much) better, *estoy (mucho) mejor*
 what time is it?, *¿qué hora es?*
 it's six o'clock, *son las seis*
 at six o'clock, *a las seis*
 at about six, *a eso de las seis*
 at half past six, *a las seis y media*
 at a quarter past (to) six, *a las seis y (menos) cuarto*
 at ten minutes past (to) six, *a las seis y (menos) diez*
 last year, *el año pasado*
 next year, *el año que viene*, *el año próximo*
 every day, *todos los días*

each day, *cada día*

the whole day, *todo el día*

please, will you?, *hágame Ud. el favor (de), sírvase, tenga la bondad (de)*

tell me, *dígame* (please tell me, *hágame Ud. el favor de decirme*)

will you give me?, *¿quiere Ud. darme?*

bring (to) me, *traígame*

show (to) me, *muéstreme, indíqueme*

thank you, *gracias*

don't mention it, *no hay de que, de nada*

pardon me, *dispense Ud., perdone Ud.*

it doesn't matter, never mind, *no importa*

I'm sorry, *lo siento*

I can't help, *no puedo menos de* (I can't help saying, *no puedo menos de decir*)

it's nothing, *no es nada*

what a pity!, it's too bad!, *¡qué lástima!, ¡es lástima!*

I'm glad, *me alegro, tengo mucho gusto* (to, *en plus infinitive*)

I have to, *tengo que*

I agree (all right, O. K.), (*estoy*) *de acuerdo, estoy conforme*

where are you going?, *¿a dónde va?*

here is (are), *aquí tiene Ud.*

there is, there are, *hay* (use *ahí está, ahí están*, if pointing out)

which way?, *¿por dónde?*

where is?, *¿dónde está?*

this way, (direction), *por aquí* (that way, *por allá*)

this way (in this fashion), *de este modo, de esta manera*

to the right, *a la derecha*

to the left, *a la izquierda*

straight ahead, *adelante*

come with me, *venga conmigo*

what can I do for you?, *¿en qué puedo servirle?*

what is happening?, *¿qué pasa?, ¿qué ocurre?, ¿qué sucede?*

what is it?, what is the matter?, *¿qué hay?, ¿qué pasa?*

what is the matter with you?, *¿qué tiene Ud.?, ¿qué le pasa a Ud.?*

what do you want?, *¿qué desea Ud.?*

how much is it?, *¿cuánto?, ¿cuánto cuesta?*

anything else?, *¿algo más?*

nothing else, *nada más*

do you speak Spanish?, *¿habla Ud. español?*

a little, *un poco*

speak (more) slowly, *hable Ud. (más) despacio*

do you understand?, *¿comprende Ud.?*

I don't understand, *no comprendo, no entiendo*
do you know?, *¿sabe Ud.?*

I don't know, *no sé*

I can't, *no puedo*

what do you call this in Spanish?, *¿cómo se llama esto en español?*

how do you say - in Spanish?, *¿cómo se dice - en español?*

what does that mean?, *¿qué quiere decir eso?*

what do you mean?, *¿qué quiere Ud. decir?*

what are you talking about?, *¿de qué habla Ud.?*

I'm an American, *soy norteamericano*

I'm hungry (thirsty, sleepy, warm, cold), *tengo hambre (sed, sueño, calor, frío)*³⁵

It's warm (cold, windy, fine weather, bad weather), *hace calor (frío, viento, buen tiempo, mal tiempo)*³⁵

It's forbidden, *prohibido* (no smoking, *prohibido fumar*)

luckily, *afortunadamente, por fortuna, por suerte*

is it not so?, *¿no es verdad?, ¿verdad?* (use this invariable phrase
wherever English repeats the verb: you went, *didn't you?*; he is
here, *isn't he?*)

not at all, *de nada*

how old are you?, *¿cuántos años tiene Ud.?*

I'm twenty years old, *tengo veinte años*

how long have you been waiting?, *¿desde cuándo espera Ud.?*

how long have you been here?, *¿desde cuándo está Ud. aquí?*

as soon as possible, *lo más pronto posible, cuanto antes*

come here!, *¡venga acá (aquí)!*

come in!, *¡pase adelante!, ¡adelante!, ¡entre Ud.!*

look!, *¡mire!, ¡vea!*

careful!, *¡con cuidado!*

look out!, *¡cuidado!, ¡tenga cuidado!*

for heaven's sake!, *¡por Dios!*

neck!, darn it!, *¡caramba!*

as you please, *como Ud. quiera, como Ud. guste*

listen!, look here!, say!, *¡oiga!*

just a second!, *¡un momento!*

what kind of?, *¿qué clase de?*

gangway!, by your leave!, *¡con permiso de Ud.!, ¡paso!, ¡allá voy!*

in any case, at any rate, *en cualquier caso*

glad to meet you, *¡muchísimo gusto!*

you don't say so!, *¡parece mentira!*

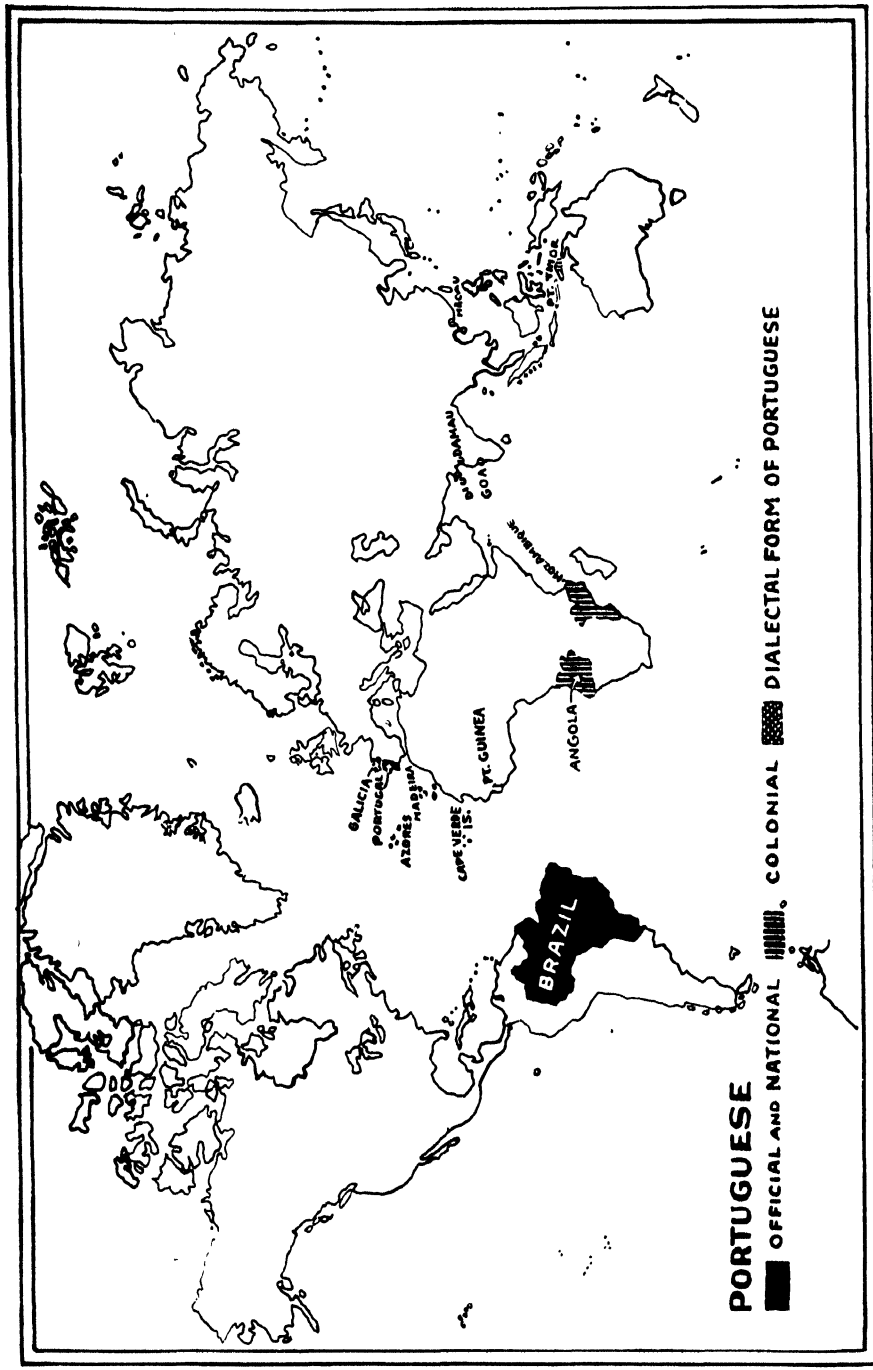

notice!, *¡aviso!*

35. With these expressions, translate "very" by *mucho* (*mucha* with *hambre* and *sed*, *muy* with *buen tiempo* and *mal tiempo*).

to your health!, *¡a su salud!*
 I should like, *quisiera*
 stop!, *¡pare!*
 hurry!, *¡apresúrese (usted)!*
 keep to the right, *guardar la derecha*
 entrance, *entrada* (exit, *salida*)
 right now, *ahora mismo*
 there it (he, she) goes!, *¡ahí va!*
 good luck to you!, *¡que lo pase usted bien!*, *¡buena suerte!*
 he was successful, *le salió bien*, *tuvo éxito*
 of course!, you bet!, *¡claro!*, *¿cómo no?*, *¡ya lo creo!*
 don't worry!, *¡pierda usted cuidado!*
 stop your fooling! quit your kidding!, *¡déjese de bromas!*
 really?, honest?, *¿de veras?*
 what nonsense!, *¡qué tontería!*
 man, you don't say so!, *¡hombre! ¡no me diga!*
 it's all the same to me, *lo mismo me da*
 what a disappointment!, what a break! (ironical), *¡qué chasco!*
 there is no doubt, *no cabe duda* (I have no doubt, *no me cabe duda*)
 what do you think?, *¿qué le parece?* (how do you like this, *¿qué le parece a usted esto?*)
 of course I did it!, you bet I did it!, *¡sí que lo hice!*
 to get angry, *enfadarse*; Spanish America: *ponerse bravo* (he got sore, *se puso bravo*)

30. Slang Words and Expressions.

to die, to "kick the bucket", <i>espichar</i> , <i>estirar la pata</i>	
to kid one along, <i>tomar el pelo a uno</i>	
to have pull, <i>tener buenas aldabas</i>	
to get drunk, <i>coger un tablón</i>	
to sleep like a log, <i>dormir a pierna suelta</i>	
pal, <i>compinche</i>	policeman, "cop", <i>guindilla</i>
joint, dive, <i>garito</i>	annoying person, "pest", <i>calamidad</i>
fatty, <i>gordiflón</i>	quack, <i>matasanos</i>
colored man, <i>morenito</i>	money, <i>parné</i>
wishful thinker, <i>ojalatero</i>	wild time, <i>parranda</i>
"dumb", <i>pelmazo</i>	greenhorn, <i>pipiolo</i>
"sissy", <i>marica</i>	nerve, "gall", <i>tupé</i>
face, "mug", <i>jeta</i>	bully, <i>matón</i>

PORTUGUESE

■ OFFICIAL AND NATIONAL

▨ COLONIAL

▤ DIALECTAL FORM OF PORTUGUESE

CHAPTER VIII

PORTUGUESE

SPEAKERS AND LOCATION

(All population figures are approximate)

Europe -- Portugal (including Azores) — 8,000,000; Galician, a dialect of northwestern Spain, spoken by some 3,000,000 people, is closer to Portuguese than it is to Spanish.

Asia — Goa, Damão and Diu, on the western coast of India; Macau, in southeastern China — total population, 900,000.

Africa — Angola — 4,500,000; Portuguese Guinea — 400,000; Mozambique — 4,500,000; Cape Verde and Madeira Islands, São Tomé and Príncipe, off the western coast of Africa — total population, 500,000.

Oceania — Portuguese Timor — 500,000.

South America — Brazil — 44,000,000.

North America — nearly a quarter of a million Portuguese immigrants and their descendants in the U. S. A., located mainly in California and Massachusetts.

Portuguese is also spoken in “Pidgin” or “Creole” varieties in Zanzibar, Mombasa and Melinde, on the eastern coast of Africa; in Ceylon, Mangalore, Cochin, Coromandel and other localities, in India; a Malay-Portuguese pidgin appears in Java, Malaya and Singapore.

ALPHABET AND SOUNDS

a, b, c, d, e, f, g, h, i, j, l, m, n, o, p, q, r, s, t, u, v, x, z, *ã*, *õ*, *ç*; (k, w and y do not appear in native Portuguese words).

Vowel sounds: there is a tendency, more noticeable in Portugal than in Brazil, to prolong stressed vowels somewhat and to pronounce unstressed vowels indistinctly.

a: = father (unstressed, it tends toward the e of the) (*água*);

e: = met (terra), or the first part of a in *gate* (mesa);

initial and followed by s plus consonant, it is almost silent (*escudo*, pron. 'shkudu); final, even though followed by s, = pin in Brazil, the in Portugal (*dente*, *dentes*);

i: = machine (*filho*);

o: = *cup* (*nove*), or the first part of o in *go* (*novo*); final, even though followed by s, = look (*amigo*, *amigos*);

u: = pool (*muro*);

ã: = father, but followed immediately by closure of the passage between nose and mouth (*irmã*);

õ: = *cup*, but followed immediately by closure as above (*botões*);

ou: = *go*; but in certain words it is pronounced and even spelt oi (*dous* or *dois*);

ei: = late (*leite*);

Consonant sounds: b, d, f, l, m, n, p, t, v, z, approximately as in English. (Note, however, that a final -m nasalizes a preceding vowel, and is not itself pronounced: *bom*, *bem*, *fim*, *algun*).

c = before a, o, u, or consonant, = cat (*casa*);

before e, i, = lace (*cidade*);

ç = (used only before a, o, u) = lace (*caçador*);

ch and x: usually = sure (*chamar*, *caixa*);

g: = before a, o, u, or consonant, = go (*gula*, *grande*);

before e, i, = measure (*geral*);

h: always silent (*hora*, pronounced *ora*);

j: = measure (*janela*);

- lh: = million (*filho*);
 nh: = onion (*ninho*);
 q: appears only before u, and = Engl. q, but the u is silent if e or i follow; the same applies to the gue, gui groups (*quadro*, pron. *kwadru*, but *querela* pron. *kerela*);
 r: trilled, as in British very;
 s: = sure when final or followed by a consonant (*escala*, pron. 'shkala; *dedos*, pron. dedush);¹
 = present when between two vowels (*presente*);¹
 = sun elsewhere (*sol*).

Sounds not appearing in Portuguese: all English vowel sounds outside of the ones mentioned above; *church*; *jest*; American r, *thin*, *this* (but d between vowels (*dado*) comes close to *this*).

Portuguese sounds not appearing in English: ã, õ, Portuguese r.

SPELLING, SYLLABIFICATION, ACCENTUATION

The spelling of Portuguese is now fully standardized (at least in theory), both in Portugal and Brazil, by mutual agreement between the two countries (1943). Alternative spellings, however, occur in such words as *quási*, *quáse* (almost), *ouro*, *oiro* (gold), and especially in words containing *cç* (*dire(c)ção*, address), where the first *c* (= k) is not pronounced, or its pronunciation is optional, depending on local variations. Older printed works deviate considerably from the 1943 rules, especially in the matter of accents and double consonants (*sahir* for *sair*; *secco* for the modern *sêco*; *janella* for *janela*). The only double consonants permitted in the modern orthography are: -ss- between vowels, indicating the sound of sun (*nosso*), whereas single -s- = rose (*desejo*); -rr- and -nn- (the latter only in a few compounds: *connosco*).

1. Note the double pronunciation of a final -s, according as a consonant or a vowel begins the next word: as *casas*, pron. ash kazash; but as *amigas*, pron. az amigash.

A single consonant between two vowels goes with the *following*, not with the *preceding* vowel: pronounce *geral* as *ge ral*; *reparar* as *re pa rar*; *primeiro* as *pri mei ro*.

The accent regularly falls on the *next to the last* syllable in words ending in vowels (except *-ã*, which is usually stressed when final: *irmã*), *-m* or *-s* (*amigo*, *viagem*, *mulheres*); otherwise, on the last syllable (*jantar*). Deviations from these rules require written accents. The acute (´) is used if the vowel has an *open* sound (*o* = *cup*, *e* = *met*, etc.); the circumflex (^) if the vowel has a *closed* sound (*o* = *go*, *e* = *gate*, etc.); thus, in *café*, the acute accent indicates not only that the stress falls on the last syllable, but also that the *e* has the sound of *met*; while in *Você*, the circumflex accent shows the place of the stress and also the fact that the *e* has the sound of the first part of *gate*. The accent marks, acute and circumflex, are also used to distinguish between two words that would otherwise have the same spelling (*pôr*, "to put"; *por*, "for", "by"; *e*, "and"; *é*, "is"). The grave accent (`) is always used on an *unstressed* syllable, serving merely to indicate that the open sound of a vowel is kept in compound words in one of the main elements of which the acute accent appears (adverbs, augmentatives, diminutives, etc.): *má*, *mãzinha*; *café*, *cafézinho*; *pálido*, *pàlidamente*. It is also used to show the combination of the preposition *a* (to) with the definite article or a demonstrative pronoun (*a*, "to" plus *as*, feminine plural article, contract to *às*; *a* plus *aquê*le, "that", contract to *àquê*le).

The diaeresis is used to show that the *u* of the groups *qu*, *gu* before *e* or *i* is to be sounded, not silent (*conseqüência*, *tranqüilo*); it is also *optionally* used to separate two unstressed vowels that would otherwise form a diphthong (*saüdar* or *saudar*; *proïbido* or *proibido*). If one of the two vowels that are to be separated is *stressed*, the *acute accent* must be used (*saúde*, *baía*).

SAMPLE OF WRITTEN PORTUGUESE;
USE FOR PRACTICE READING.

“Senhor, pode dizer-me se esta rua conduz à praça do comércio?” — “Não, senhor. O senhor afastou-se do verdadeiro caminho; a praça acha-se no centro da cidade, numa das ruas principais, e esta estrada, em que estamos, conduz numa direcção inteiramente oposta.” — “Que caminho é preciso então que eu tome?” — “Vá todo direito até à primeira ruazinha à esquerda, siga-a, ela o conduzirá a uma grande praça; quando o senhor lá tiver chegado, volte à direita e achar-se-á em face de uma grande rua ao fim da qual verá um magnífico edifício; este é o palácio da praça do comércio; o senhor não pode errar.” — “Que distância pode haver daqui?” — “Pouco mais ou menos meia hora de marcha, pois eu indiquei-lhe o caminho mais curto.” — “Fico-lhe muito obrigado, senhor.” — “Não há de quê.”

GRAMMATICAL SURVEY

1. *Nouns and Articles.*

There are only two genders in Portuguese, masculine and feminine. Nouns denoting males are masculine, those denoting females are feminine. For nouns which in English are neuter, the ending *-o* usually denotes masculine gender, *-a* feminine gender. The gender of nouns ending in *-e* or consonants must be determined by observation; learn these nouns with their definite articles. The plural of nouns is generally formed by adding *-s* to the singular if the latter ends in a vowel, *-es* if it ends in a consonant.²

The definite article is *o* (plural *os*) for masculine nouns, *a* (plural *as*) for feminine nouns.³ The indefinite article is *um* for masculine nouns, *uma* for feminines.

2. Nouns ending in *-l* usually change *-l* to *-s* or *-is*: *animal*, pl. *animais*; *fuzil* ("rifle"), pl. *fuzis*; nouns ending in *-m* generally change *-m* to *-ns*: *homem*, "man", pl. *homens*; nouns ending in *-ão* usually change *-ão* to *-ães* or *-ões*: *capitão*, pl. *capitães*; *coração*, pl. *corações*; note in this connection that *-ão*, pl. *-ães* usually corresponds to a Spanish *-án*, pl. *-anes*, while *-ão*, pl. *-ões* normally corresponds to a Spanish *-ón*, pl. *-ones*; the Spanish for "nation" being *nación* (pl. *naciones*), what is the plural of Portuguese *nação*?

3. The definite article combines with certain prepositions: *de* (of, from) in combination with *o*, *a*, *os*, *as*, becomes *do*, *da*, *dos*, *das*; *a* (to) in the same combinations becomes *ao*, *à*, *aos*, *às*; *em* (in) becomes *no*, *na*, *nos*, *nas*; *por* (for) becomes *pelo*, *pela*, *pelos*, *pelas*; the woman's house, the house of the woman, *a casa da mulher*; the women's houses, *as casas das mulheres*; I am speaking to the man's daughter, *falo à filha do homem*; he went into the house, *entrou na casa*; by the fruit one knows the tree, *pelos frutos se conhece a árvore*.

The indefinite article combines only with *em* (*num*, *numa*): in a house, *numa casa*. This combination is optional (*em uma casa*).

o filho, the son
a filha, the daughter
o capote, the overcoat
o rapaz, the boy
a mulher, the woman

os filhos, the sons
as filhas, the daughters
os capotes, the overcoats
os rapazes, the boys
as mulheres, the women

um filho, a son
uma filha, a daughter
um capote, an overcoat
um rapaz, a boy
uma mulher, a woman

2. Adjectives and Adverbs.

The Portuguese adjective, whether attributive or predicate, agrees with the noun that it modifies; this does not necessarily mean identical endings (*o homem cruel*, the cruel man; *os homens cruéis*, the cruel men; *a mulher bonita*, the pretty woman; *as mulheres bonitas*, the pretty women). Adjectives usually follow the nouns they modify.

Adjectives ending in *-o* change *-o* to *-a* in the feminine singular, to *-os* in the masculine plural, to *-as* in the feminine plural (*novo, nova, novos, novas*); those ending in *-ão* normally change to *-ã* in the fem. sg., to *-ãos* in the masc. pl., to *-ãs* in the fem. pl. (*temporão, temporã, temporãos, temporãs*); those ending in *-e* or consonant usually remain unchanged in the feminine; in the plural, *-e* adjectives add *-s* for both genders, consonant adjectives add *-s* or *-es* (*breve, breve, breves, breves; jovem, jovem, jovens, jovens; feliz, feliz, felizes, felizes*).⁴

4. Adjectives ending in *-ês, -ol, -or, -um, -u* usually add *-a* in the feminine, especially if they denote nationality: *português, portuguesa, portuguesas, portuguesas; espanhol, espanhola, espanholas, espanholas*; while adjectives ending in *-l* normally change *-l* to *-s, -is, -es* or *-eis* in the plural: *fácil, pl. fáceis; azul, pl. azues; civil, pl. civis*; while adjectives ending in *-m* form their plural in *-ns*. Note the combination of these two exceptional formations in several adjectives: *espanhol, espanhola, espanhóis, espanholas; algum, alguma, alguns, algumas*.

The comparative is usually formed by prefixing *mais* (more) to the positive: *esta rapariga é mais bonita que aquela*, this girl is prettier than that one. The superlative is formed by using the definite article before the noun or before *mais*: *é a mais bela*, she is the most beautiful; *ela é a moça mais bela que eu conheço*, she is the most beautiful girl I know.

tão - como, as - as; *tanto* (*tanta*) - como, as much - as; *tantos* (*tantas*) - como, as many - as; *menos que* - less than.

The adverb is generally formed by adding *-mente* to the feminine singular form of the adjective: *justo*, just, fem. *justa*, adverb *justamente*, justly.

3. Numerals.

Cardinal⁵

1 — <i>um, uma</i>	15 — <i>quinze</i>
2 — <i>dous (dois), duas</i>	16 — <i>dezasseis (dezesseis)</i>
3 — <i>três</i>	17 — <i>dezassete (dezesete)</i>
4 — <i>quatro</i>	18 — <i>dezoito</i>
5 — <i>cinco</i>	19 — <i>dezanove (dezenove)</i>
6 — <i>seis</i>	20 — <i>vinte</i>
7 — <i>sete</i>	21 — <i>vinte-e-um(a)</i>
8 — <i>oito</i>	22 — <i>vinte-e-dois (duas)</i>
9 — <i>nove</i>	23 — <i>vinte-e-três</i>
10 — <i>dez</i>	30 — <i>trinta</i>
11 — <i>onze</i>	40 — <i>quarenta</i>
12 — <i>doze</i>	50 — <i>cinquenta (cincoenta)</i>
13 — <i>treze</i>	60 — <i>sessenta</i>
14 — <i>catorze (quatorze)</i>	70 — <i>setenta</i>
	80 — <i>oitenta</i>
	90 — <i>noventa</i>

5. Use these in dates, save for "the first": *o primeiro de maio*, May 1st; *o cinco de maio*, May 5th.

100	—	<i>cem (cento)</i> ⁶
200	—	<i>duzentos</i> ⁷
300	—	<i>trezentos</i>
400	—	<i>quatrocentos</i>
500	—	<i>quinhentos</i>
600	—	<i>seiscentos</i>
700	—	<i>setecentos</i>
800	—	<i>oitocentos</i>
900	—	<i>novecentos</i>
1000	—	<i>mil</i>
2000	—	<i>dois mil</i>
1,000,000	—	<i>um milhão (de)</i>

Ordinal.

1st - *primeiro*; 2nd - *segundo*; 3rd - *terceiro*; 4th - *quarto*;
 5th - *quinto*; 6th - *sexto*; 7th - *sétimo*; 8th - *oitavo*; 9th - *nono*;
 10th - *décimo*; 11th - *décimo primeiro*; 12th - *décimo segundo*;
 20th - *vigésimo*; 30th - *trigésimo*; 40th - *quadragésimo*; 50th -
quingagésimo; 60th - *sexagésimo*; 70th - *septuagésimo*; 80th -
octogésimo; 90th - *nonagésimo*; 100th - *centésimo*; 1000th -
milésimo.

Others.

half - *a metade* (noun), or *um meio* (adjective): *a metade da classe*, half of the class; *meia hora*, half an hour.

um par de - a pair of; *uma dúzia de* - a dozen; *uma vez* - once;
duas vezes - twice; *a primeira vez* - the first time.

6. Use *cem* immediately before the noun, or if *mil* or *milhão* follows: *cem homens*, 100 men; *cem mil*, 100,000; use *cento* if a numeral smaller than 100 follows: *cento e doze homens*, 112 men.

7. Plural hundreds change *-os* to *-as* if used with feminine nouns: *duzentas mulheres*, 200 women.

4. *Pronouns.*a) Personal (Subject)⁸

I, <i>eu</i>	we, <i>nós</i>
you (fam.), <i>tu</i> ⁹	you (fam. pl.), <i>vós</i> ⁹
he, <i>ê</i> <i>le</i>	they (masc.), <i>ê</i> <i>les</i>
she, <i>ela</i>	they (fem.), <i>elas</i>
you (polite), <i>Você</i> ⁹	you (pol. pl.), <i>Vocês</i> ⁹

b) Personal (Direct and Indirect Object).

me, to me, <i>me</i>	us, to us, <i>nos</i>
you, to you, <i>te</i>	you, to you, <i>vos</i>
him, it, <i>o</i>	them (masc.), <i>os</i>
her, it, <i>a</i>	them (fem.), <i>as</i>
to him, to her, to it, to you (pol.), <i>lhe</i>	to them, to you (pol. pl.), <i>lhes</i>

These normally precede the verb:¹⁰ *ê**le me conhece, he*

8. These are used especially for emphasis or clarification: I speak, *falo*; I speak, *eu falo*; I should speak, *eu falaria*; he would speak, *ê**le falaria*.

9. *Tu* and *vós*, with the second singular and second plural of the verb, respectively, are used only in familiar conversation. One polite form of address, especially in Brazil, is *Você*, with the *third* singular of the verb, for a single person addressed, and *Vocês* with the third plural, for more than one person. The written abbreviation for the singular form is *V*. An even more common form of address, especially in Portugal, is *o senhor* (*a senhora, os senhores, as senhoras*) likewise with the third persons of the verb: *o senhor tem o livro?*, have you the book?; *os senhores falam português?*, do you (pl.) speak Portuguese?

10. But usage varies considerably in this respect: *digo-lhe a verdade*, I tell him the truth; *Você enganou-o*, you deceived him. In the future and conditional tenses, the pronoun is often inserted between the infinitive root and the ending: *chamarei*, I shall call; *chamá-lo-ei*, I shall call him. The negative always requires the pronoun *before* the verb: *não se deve fazer*, it must not be done. The use of the object pronoun at the very outset of the sentence is generally avoided: *vendo-lho* or *eu lho vendo*, I sell it to him (not *lho vendo*).

knows me; *eu lhe falo*, I am speaking to him. The negative *não* ("not") may appear before or after the object pronoun: *êle não me quer pagar* or *êle me não quer pagar*, he does not want to pay me. With the infinitive, the object pronoun regularly follows, and is attached by a hyphen: *tenho uma graça a pedir-lhe*, I have a favor to ask you; if the object pronoun is *o*, *a*, *os*, or *as*, the *-r* of the infinitive is dropped, *-l* is prefixed to the pronoun, and the final vowel of the infinitive takes a circumflex accent for *-er* verbs, an acute for *-ar* and *-ir* verbs: *quero vender o livro*, I want to sell the book; *quero vendê-lo*, I want to sell it; *quero comprá-lo*, I want to buy it.

c) Compound (Direct and Indirect Combined; see p. 288, no. 3).

it to me, them to me, *mo*, *ma*, *mos*, *mas*: *êles mo darão*, they will give it to me.

it to you, them to you, *to*, *ta*, *tos*, *tas*: *quem to prometeu?* who promised it to you?

it to him, it to her, it to you (pol.), it to them,¹¹ *lho*, *lha*: *quero lho dar*, I want to give it to him.

it to us, them to us, *no-lo*, *no-la*, *no-los*, *no-las*: *êles no-las darão*, they will give them to us.

it to you, them to you, *vo-lo*, *vo-la*, *vo-los*, *vo-las*: *posso vo-lo escrever*, I can write it to you.

them to him, them to her, them to you (pol.), *lhos*, *lhas*: *quero lhos dar*, I want to give them to him.¹¹

While a single object pronoun normally follows the infinitive (*quero vendê-lo*), a compound one more usually precedes: *quer mo dar?* *Não, quero vo-lo emprestar*, do you want to give it to me? No, I want to lend it to you.

d) Personal Pronouns with Prepositions.

11. Distinguish by adding *a êle*, *a ela*, *a V.*, *a êles*, *a elas*: *vendo-lho a V.*, or *vendo-o a V.*, I sell it to you; *vendo-lho a êle* or *vendo-o a êle*, I sell it to him. This is done only when necessary.

These are the same as the subject pronouns, save that *mim* replaces *eu*, and *ti* replaces *tu*: *fala de mim*, he is speaking about me; *lembravam-se de ti*, they remembered you. With the preposition *com* (with), the forms *migo*, *tigo*, *nosco*, *vosco* are used instead of *mim*, *ti*, *nos*, *vos*: *fala comigo*, he is speaking with me; *vai connosco*, he is going with us.

e) Possessive.

my, mine, (o) *meu*, (a) *minha*, (os) *meus*, (as) *minhas*
 your, yours, (o) *teu*, (a) *tua*, (os) *teus*, (as) *tuas*
 his, her, hers, its, their, theirs, your, yours (pol.),¹² (o) *seu*,
 (a) *sua*, (os) *seus*, (as) *suas*
 our, ours, (o) *nosso*, (a) *nosssa*, (os) *nostros*, (as) *nostras*
 your, yours, (o) *vosso*, (a) *vossa*, (os) *vossos*, (as) *vossas*

These forms are used both as adjectives and as pronouns. The definite article may be used, but is more often omitted, when the possessive is an adjective: (o) *meu relógio*, my watch; it is regularly used when the possessive is a pronoun, save after the verb "to be": *meu relógio é melhor que o vosso*, my watch is better than yours; *esta casa é minha*, this house is mine.

f) Demonstrative. .

this, these, *êste*, *esta*, *êstes*, *estas*: *êste livro*, this book; *que flor é esta?*, what flower is this?
 that, those (near you), *êsse*, *essa*, *êsses*, *essas*: *essa casa*, that house of yours; *que casa é essa?* what house is that?
 that, those (yonder), *aquêle*, *aquela*, *aquêles*, *aquelas*: *quer o senhor aquele vinho?* do you want that wine?

"Neuter" pronouns, *isto*, *isso*, *aquilo*, refer to a general situation or state of affairs: *isto não é possível*, this is not possible; *isso não pode ser*, that can't be.

"The one", "the ones" are usually translated by the de-

12. Clarify, if necessary, by adding *de êle*, *de ela*, *de V.*, *de êles*, *de elas*: *suas filhas de êle*, his daughters; *suas filhas de V.*, your daughters; or *as filhas de êle*, *as filhas de V.*

finite article (*o, a, os, as*), referring to persons, by *aquê* referring to things: *o que fala é meu tio*, the one who is speaking is my uncle; *êste vinho é bom, mas aquele que lhe dei ontem é melhor*, this wine is good, but the one I gave you yesterday is better.

g) Relative and Interrogative.

who, whom, that, which, *que*¹³: *a mulher que canta*, the woman who is singing; *a mulher que êle ama*, the woman he loves;¹⁴ *o navio que sai*, the ship that is leaving; *o navio que V. comanda*, the ship you command.

whom (after prepositions), *quem*: *diz-me com quem andas*, tell me with whom you go.

whose, *cujo* (*cuja, cujos, cujas*): *o rapaz cujo pai é capitão*, the boy whose father is a captain.

who?, whom?, *quem?*: *quem fala português?*, who speaks Portuguese?; *a quem havemos de falar?*, to whom are we to speak?

whose?, *de quem?*: *de quem é êste livro?*, whose book is this? what?, *que?*: *que quer o senhor?*, what do you want?; *que lições tem aprendido?*, what lessons have you learned?

which? which one? which ones?, *qual? quais?*: *qual dos irmãos morreu?* which of the brothers died?

5. Verbs.

Portuguese verbs fall into three main classes, with the infinitive ending respectively in *-ar, -er,* and *-ir* (to love, *amar*; to yield, *ceder*; to leave, *partir*). A considerable number of *-ir* verbs undergo changes in the vowel of the root (*u* changing to *o* when the ending has an *e*: *subir*, 3rd sg. *sobe*; *e* changing

13. *o qual, a qual, os quais, as quais,* or *o que, a que, os que, as que,* are occasionally used to refer to the more distant of two possible antecedents: *são os amigos de seu pai os quais saem para o Brasil*, they are his father's friends, who are leaving for Brazil.

14. Note that the relative pronoun cannot be omitted.

to *i* when the ending has *a* or *o*: *servir*, 1st sg. *sirvo*; etc.). Numerous other irregularities appear, some of which are given in the vocabulary.

1. Present Indicative (meaning: I love, am loving, do love)

to love, <i>am-ar</i>	to yield, <i>ced-er</i>	to leave, <i>part-ir</i>	
I love, <i>am-o</i>	I yield, <i>ced-o</i>	I leave, <i>part-o</i>	
you love, <i>am-as</i>	you yield, <i>ced-es</i>	you leave, <i>part-es</i>	
he loves, <i>am-a</i>	he yields, <i>ced-e</i>	he leaves, <i>part-e</i>	
we love, <i>am-amos</i>	we yield, <i>ced-emos</i>	we leave, <i>part-imos</i>	
you love, <i>am-ais</i>	you yield, <i>ced-eis</i>	you leave, <i>part-ís</i>	
they love, <i>am-am</i>	they yield, <i>ced-em</i>	they leave, <i>part-em</i>	
to be, <i>ser</i> ¹⁵	to be, <i>estar</i> ¹⁵	to have, <i>ter</i> ¹⁶	to have, <i>haver</i> ¹⁶
I am, <i>sou</i>	<i>estou</i>	I have, <i>tenho</i>	<i>hei</i>
you are, <i>és</i>	<i>estás</i>	you have, <i>tens</i>	<i>hás</i>
he is, <i>é</i>	<i>está</i>	he has, <i>tem</i>	<i>há</i>
we are, <i>somos</i>	<i>estamos</i>	we have, <i>temos</i>	<i>havemos</i> (<i>hemos</i>)
you are, <i>sois</i>	<i>estais</i>	you have, <i>tendes</i>	<i>haveis</i> (<i>heis</i>)
they are, <i>são</i>	<i>estão</i>	they have, <i>têm</i>	<i>hão</i>

15. *Ser* indicates a permanent or inherent quality, and must be used when a predicate *noun* follows; *é homem*, he is a man; *é Brasileiro*, he is a Brazilian. *Estar* indicates a temporary quality, location or state of health: *está triste*, he is sad; *está cansado*, he is tired; *está no Rio*, he is in Rio. *Ser* is used with the past participle to form the passive: *é louvado*, he is praised; *estar* is used with the gerund to form the progressive: *está falando*, he is speaking. Note that the ordinary present indicative also expresses the progressive idea, however. The gerund is formed by adding *-ando* to the root of *-ar* verbs (*amar*, *amando*); *-endo* to the root of *-er* verbs (*ceder*, *cedendo*); *-indo* to the root of *-ir* verbs (*partir*, *partindo*).

16. *Ter* is used with the past participle to form compound tenses; this applies to all verbs, including intransitive and reflexive forms,

2. Imperfect (meaning: I was loving, used to love)

	-ar verbs	-er verbs	-ir verbs
I used to love,	<i>am-ava</i>	<i>ced-ia</i>	<i>part-ia</i>
you used to love,	<i>am-avas</i>	<i>ced-ias</i>	<i>part-ias</i>
he used to love,	<i>am-ava</i>	<i>ced-ia</i>	<i>part-ia</i>
we used to love,	<i>am-ávamos</i>	<i>ced-íamos</i>	<i>part-íamos</i>
you used to love,	<i>am-áveis</i>	<i>ced-íeis</i>	<i>part-íeis</i>
they used to love,	<i>am-avam</i>	<i>ced-iam</i>	<i>part-iam</i>

ser: *era, eras, era, éramos, éreis, eram*;

estar: regular (*estava, etc.*);

ter: *tinha, tinha, tinha, tínhamos, tínheis, tinham*;

haver: regular (*havia, etc.*).

3. Past (meaning: I loved)

	-ar verbs	-er verbs	-ir verbs
I loved,	<i>am-ei</i>	<i>ced-i</i>	<i>part-i</i>
you loved,	<i>am-aste</i>	<i>ced-este</i>	<i>part-iste</i>
he loved,	<i>am-ou</i>	<i>ced-eu</i>	<i>part-iu</i>

and the past participle so used is invariable: *tenho sido*, I have been; *êle os tem tido*, he has had them; *ela tem chegado*, she has arrived; *temos falado*, we have spoken; *os meninos se têm divertido*, the children have had a good time. *Ter* is also used to indicate possession (*tenho um bom amigo*, I have a good friend); with *que* and the infinitive to indicate necessity (have to): *tenho que sair*, I have to go out; and in expressions of physical feelings (*tenho fome e frio*, I am hungry and cold).

Haver is restricted in use to *haver de* followed by the infinitive (*hei de falar*, I am to speak), and impersonally in the sense of "there to be" or "ago": *havia momentos terríveis*, there were terrible moments; *haverá cem vapores no pôrto*, there will be (or must be) a hundred steamers in the harbor; *há mais de quatro meses*, more than four months ago.

we loved,	<i>am-ámos</i>	<i>ced-emos</i>	<i>part-ímos</i>
you loved,	<i>am-astes</i>	<i>ced-estes</i>	<i>part-istes</i>
they loved,	<i>am-aram</i>	<i>ced-eram</i>	<i>part-iram</i>

ser: fui, foste, foi, fomos, fostes, foram;

estar: estive, estiveste, esteve, estivemos, estivestes, estiveram;

ter: tive, tiveste, teve, tivemos, tivestes, tiveram;

haver: houve, houveste, houve, houvermos, houverstes, houveram.

4. Future (meaning: I shall love), and Conditional (meaning: I should love).

The endings of these tenses are added to the entire infinitive, not to the stem:

amar- (*ceder-*, *partir-*) *-ei, -ás, -á, -emos, -eis, -ão* (*amarei*, I shall love);

amar- (*ceder-*, *partir-*) *-ia, -ias, -ia, -íamos, -íeis, -iam* (*amaria*, I should love).

ser, estar, ter and *haver* are regular in these tenses (*serei, estarei*, I shall be; *seria, estaria*, I should be; *terei, haveréi*, I shall have; *teria, haveria*, I should have).

5. "Personal" infinitive.

This is a form peculiar to Portuguese, and consists of the infinitive to which are added the following personal endings: nothing in the first and third singular, *-es* in the second singular, *-mos* in the first plural, *-des* in the second plural, *-em* in the third plural: *ser, seres, ser, sermos, serdes, serem; amar, amares, amar, amamos, amardes, amarem*. Its chief uses are: 1. in exclamations: *sermos nós ricos!*, for us to be rich! (if we only were rich!); 2. after prepositions where English would use a gerund: *foram castigados por serem travêssos*, they were punished for being naughty; 3. after a conjunction, to replace a clause: *parti depois de terem falado*, I left after they had spoken.

6. Compound Tenses.

These are formed by combining *ter* with the past participle of the verb (ending in *-ado* for *-ar* verbs, *-ido* for the others); the past participle is invariable.

Present Perfect: I have loved, *tenho amado*; I have arrived, *tenho chegado*;

Past Perfect: I had spoken, *tinha falado*; they had left, *tinham partido*;

Future Perfect: I shall have yielded, *terei cedido*;

Conditional Perfect: they would have gone, *teriam ido*.

7. Imperative.

	<i>-ar</i> verbs	<i>-er</i> verbs
Familiar Singular:	<i>am-a</i>	<i>ced-e</i>
First Person Plural (let us)	<i>am-emos</i>	<i>ced-amos</i>
Familiar Plural:	<i>am-ai</i>	<i>ced-ei</i>
Polite Singular:	<i>am-e V.</i>	<i>ced-a V.</i>
Polite Plural:	<i>am-em Vocês</i>	<i>ced-am Vocês</i>

-ir verbs

Fam. Sg.:	<i>part-e</i>
1st Pl.:	<i>part-amos</i>
Fam. Pl.:	<i>part-í</i>
Pol. Sg.:	<i>part-a V.</i>
Pol. Pl.:	<i>part-am Vocês</i>

In the negative, the familiar singular and familiar plural are replaced by corresponding present subjunctive forms: *não ames, não cedas, não partas; não ameis, não cedais, não partais*.

8. Reflexive verbs.

These are conjugated with *ter*; the participle is invari-

able; the reflexive pronouns used are *me, te, se, nos, vos, se: êle se queixa* or *queixa-se*, he complains (*queixar-se*, to complain, lit. to bemoan oneself); *os meninos se têm divertido*, the children had a good time (amused themselves).

9. Passive.

The passive is formed with the verb *ser* combined with the past participle, which agrees with the subject. "By" is translated by *de* if the action is predominantly mental, by *por* if physical: *o rapaz foi castigado de seu mestre e batido por seu pai*, the boy was punished by his teacher and beaten by his father.

10. Subjunctive.

The Portuguese subjunctive has six tenses, and is frequently used in subordinate clauses. For the present subjunctive, the endings normally are: for *-ar* verbs: *-e, -es, -e, -emos, -eis, -em*: *que eu ame*, that I love; for *-er* and *-ir* verbs: *-a, -as, -a, -amos, -ais, -am*: *que eu ceda*, that I yield.

The imperfect subjunctive ends in *-asse* for *-ar* verbs, *-esse* for *-er* verbs, *-isse* for *-ir* verbs: *que eu amasse*, that I should love.

The present perfect subjunctive is formed by combining the present subjunctive of *ter* (*tenha*) with the past participle: *que eu tenha amado*, that I may have loved; the past perfect subjunctive combines the imperfect subjunctive of *ter* (*tivesse*) with the past participle: *que eu tivesse chegado*, that I might have arrived.

The future corresponds in form to the personal infinitive in regular verbs, and is formed by adding *-r* to the past in others; it is used for the most part after *se* (if) and *quando* (when), to refer to a future possibility: *se eu partir, o diria*, if I were to leave, I should say so.

BRAZILIAN VARIETIES OF PORTUGUESE

The Portuguese of Brazil not only differs from that of Portugal in certain points of pronunciation, grammar and vocabulary, but has local varieties of its own. Two main Brazilian varieties are recognized, the Carioca (indigenous to Rio de Janeiro) and the Paulista, current in the south of the country. In the matter of pronunciation, Brazilian appears to be more conservative of older speech-forms than Portuguese, and is characterized by a clearer, slower, and more harmonious enunciation, due in large part to the conservation of the timbre of unstressed vowels, which Portugal tends to slur and even drop (*m'nino* for *menino*; *poni'* for *ponte*; *ad'vinha* for *adivinha*). In vocabulary, on the other hand, Brazilian is distinguished not merely by archaic words, but also by numerous words borrowed from the languages of the Tupi-Guaraní Indians and the African slaves. Only a few of the major differences between Portuguese and Brazilian are listed.

PRONUNCIATION.

1. Brazilian retains the *e* in the diphthong *ei* and in the nasal diphthong *em*, while in Portugal *ei* tends toward *âi* and final *em* toward *âi*. Brazilian, however, tends to drop the *i* of the *ei* (*beijo*, pron. *bâijo* in Portugal, *bejo* in Brazil; *também*, pron. *tambeim* in Brazil, *tambâi* in Portugal).
2. Brazilian tends to add an *i*-sound to a final stressed vowel followed by *-s* or *-z* (*voz*, pron. *voiz*; *gás*, pron. *gáis*).
3. The normal Portuguese diphthongs *ai*, *ei*, *ou*, tend to lose their final element in Brazilian pronunciation (*baixo*, pron. *baxo*; *primeiro*, pron. *primero*; *tirou*, pron. *tiró*).
4. In Portugal, a stressed *e* followed by *nh*, *lh*, *j*, *ch*, *x* tends to take the sound of *a*; this does not occur in Brazil (*tenho*, pron. *tanho* in Portugal; *espelho*, pron. *espalho*).

5. Brazilian tends to drop a final *-r*, while Portugal tends to add an *-i*, thus forming an extra syllable (*falar*, pron. *falari* in Portugal, *falá* in Brazil; *doutor*, pron. *doutori* in Portugal, *doutó* in Brazil).
6. In the Carioca (Rio), but not the Paulista pronunciation of Brazil, *te*, *ti* tend to be pronounced *che*, *chi*, and *de*, *di* tend to be pronounced *je*, *ji* (*antes*, pron. *anches*; *tio*, pron. *chio*; *dia*, pron. *jia*).

GRAMMAR.

1. The position of the object pronoun is more flexible in Brazil than in Portugal, with a greater tendency on the part of Brazilian speakers to place the pronoun before the verb (Portugal *o Senhor deve-me dinheiro*, Brazil *o Senhor me deve dinheiro*).
2. Brazil uses *ê*, *ela*, *êles*, *elas*, *lhe*, *lhes* as direct object pronouns (*vi êle*, or *eu o vi*; *eu lhe vi ontem na avenida*; *conheço ela*, or *eu a conheço*).
3. The combination pronouns *mo*, *to*, *lho*, etc. (it to me, it to you) are avoided in Brazil (*eu lhe dei isso*, or *eu lho dei*). The direct pronoun is often altogether omitted in these cases (*quer dar-me a bola?* *Quero dar-lhe* instead of *quero dar-lha*).
4. The preposition *em* is often colloquially used for *a* in Brazil with verbs of motion (*eu ia na cidade*, or *eu ia à cidade*).
5. In several other cases, *a* is avoided by the use of other prepositions (*consente com muita pena*; *pescavam de linha*; *tenho medo de pobreza*; *responda palavra por palavra*). But many of these forms are common to Portugal as well.
6. The preposition *para* tends to govern an object pronoun instead of a subject pronoun as subject of a following infinitive (*é muito para mim fazer* instead of *é muito para eu fazer*).
7. The progressive form with *estar* is more frequently used in Brazil than in Portugal, which prefers *estar* with *a* and the infinitive (*estou lendo* in Brazil, *estou a ler* in Portugal).
8. In Brazil, *ter* and *haver* are used interchangeably in the

impersonal construction "there to be" (*não tem alunos*. or *não há alunos*).

9. In Brazil, *mais* occasionally replaces *já* in negative use (*não quero mais*, or *já não quero*). Brazil also tends to double negatives (*não tem nada não*).

10. In a relative clause, Brazil often shifts the preposition to the end of the clause and adds a personal pronoun (*o livro que falei dêle*, or *o livro de que falei*).

VOCABULARY.

1. Many words in common use in Brazil are of Tupi-Guarani origin. A few of the most common ones are: *mandioca* (a vegetable); *abacaxi* (pineapple); *sabiá*, *urubu* (birds); *ipé* (a tree); *jacá* (basket); *caipora* (an unlucky person); *caipira* (a "hick"); *carioca* (pertaining to Rio); *estar na pindaíba* (to "be broke").

2. Words of African Negro origin are also numerous in the tongue of Brazil: *senzala* (slave quarters); *quilombo* (communities of Negroes); *maxixe* (a dance); *samba* (a dance); *zumbi* (ghost).

3. A few archaic Portuguese forms survive in Brazil: *mas porem*, or *mas* or *porem*; *pro mó de*, or *por amor de*; *depois* for *depois*.

4. Brazilian has a particular fondness for diminutive forms, especially the ones formed with the suffix *-inho*: *doentinho* (sick); *agorinha* (right now); *pertinho* (quite close); *até loguinho* (see you later); *fique quietinho* (keep quiet); *está dormidinho* (he is asleep).

5. Among words which differ in Portugal and Brazil, the following are of interest:

English	Portugal	Brazil
girl	<i>rapariga</i>	<i>moça</i>
trolley	<i>carro elétrico</i>	<i>bonde</i>
motor-man	<i>guarda-freio</i>	<i>motorneiro</i>

police station
grocery store

esquadra
mercearia

delegacia

The *moço* which means “young man” in Brazil has rather the meaning of “waiter” in Portugal; while the *fumo* which in Portugal means “smoke” has in Brazil the meaning of “tobacco”, and “smoke” is *fumaça*.

It may be emphasized that a good many of the so-called “characteristics” of Brazilian appear also in Portugal, though locally and to a lesser degree.

VOCABULARY 17

1. *World, Elements, Nature, Weather, Time, Directions.*

world, <i>o mundo</i>	West, <i>o Oéste</i>
earth, <i>a terra</i>	year, <i>o ano</i>

nephew, <i>o sobrinho</i>	child, <i>a criança</i>
niece, <i>a sobrinha</i>	boy, <i>o rapaz</i> (Port.), <i>o moço</i>
cousin, <i>o primo, a prima</i>	(Brazil)

ending in *-l* preceded by an *unstressed* vowel normally change *-el* or *-il* to *-eis* (*automôvel, automôveis; projétil, projéteis; fácil, fáceis*). Other important irregularities in the formation of the plural are individually noted.

Important verbal irregularities are noted. Remember that the conditional *always* follows the future, so that a future *farei* for a verb *fazer* implies a conditional *faria*; there is never any irregularity in the *endings* of these two tenses.

Verbs ending in *-car* change *c* to *qu* before *e* (*ficar, to remain; Past fiquei Pol. Impv. fique*). Verbs ending in *-gar* change *g* to *gu* before *e* (*pagar, to pay; Past paguei, Pol. Impv. pague*). Verbs ending in *-cer* change *c* to *ç* before *a* and *o* (*conhecer, to know; Pres. 1st sg. conheço, Pol. Impv. conheça*). Verbs ending in *-ear* usually change *e* to *ei* when the stress falls upon it (*cear, to dine; Pres. ceio, ceias, ceia, ceamos, ceais, ceiam; Impv. ceia (familiar), ceie (polite)*). Verbs ending in *-ir* which have *u* as the last vowel of the stem change *u* to *o* when there is an *e* in the ending (*cubrir, to cover; Pres. cubro, cobres, cobre, cubrimos, cubris, cobrem; Impv. cobre, cubra*). Verbs ending in *-ir* which have *o* as the last vowel in the stem change *o* to *u* when there is an *a* or an *o* in the ending (*dormir, to sleep; Pres. durmo, dormes, dorme, etc.; Impv. dorme, durma*). Verbs ending in *-ir* which have *e* as the last vowel in the stem change *e* to *i* when there is an *a* or an *o* in the ending (*seguir, to follow; Pres. sigo, segues, segue, etc.; Impv. segue, siga*).

girl, *a rapariga* (Port.), *a moça*

weak, <i>fraco</i>	dead, <i>morto</i>

23. *Colors.*

white, *branco*
 black, *prêto*
 red, *vermelho*
 green, *verde*
 blue, *azul* (pl. *azuis*)

yellow, *amarelo*
 gray, *cinzento*
 brown, *castanho*
 pink, *côr de rosa*
 purple, *roxo*

24. *Nationalities.*²¹

American, *americano*
 English, *inglês*
 French, *francês*
 German, *alemão* (fem. *alemã*;
 mas. pl. *alemães*; fem. pl.
alemãs)
 Spanish, *espanhol* (*espanhola*,
espanhóis, *espanholas*)
 Russian, *russo*
 Italian, *italiano*
 Japanese, *japonês*
 Chinese, *chinês*
 Dutch, *neerlandês*, *holandês*
 Norwegian, *noruego*
 Swedish, *sueco*
 Finnish, *finlandês*
 Belgian, *belga* (fem. same; pl.
belgas)
 Polish, *polonês*, *polaco*
 Danish, *dinamarquês*
 Swiss, *suisso* (*suiço*)
 Portuguese, *português*
 Yugoslav, *iugoslavo*

Bulgarian, *búlgaro*
 Czech, *checo-eslovaco*
 Greek, *grego*
 Turkish, *turco*
 Roumanian, *rumeno*
 Hungarian, *húngaro*
 Austrian, *austriaco*
 Malay, *malaio*
 Persian, *persa*
 Arabian, Arab, Arabic, *árabe*
 Jewish, Hebrew, *hebreu* (fem.
hebreia), *judéu* (fem. *judia*)
 Australian, *australiano*
 African, *africano*
 Canadian, *canadiano*
 Mexican, *mexicano*

 Brazilian, *brasileiro*
 Argentinian, *argentino*
 Porto Rican, *portorriquenho*
 Chilean, *chileno*
 Peruvian, *peruano*

21. Adjectives of nationality ending in a consonant add *-a* (*-ês* loses the accent) in the feminine: *inglês*, fem. *inglesa*, masc. plur. *ingleses*, fem. plur. *inglesas*. No capital is used, unless "Englishman" is meant. For names of languages, use no capital, and use the definite article except after *em* (in), and, usually, *falar* (to speak), *entender* (to understand), *traduzir* (to translate): *o português é uma língua fácil*; *eu falo português*; *êle responde em português*.

25. *Adverbs and Adverbial Expressions.*

today, <i>hoje</i>	there, <i>acolá, lá</i>
yesterday, <i>ontem</i>	over (down) there, <i>lá-baixo</i>
tomorrow, <i>amanhã</i>	near by, <i>perto</i>
day before yesterday, <i>ante-ontem</i>	far away, <i>longe</i>
day after tomorrow, <i>depois de amanhã</i>	up (stairs), <i>para cima, em cima</i>
tonight, <i>esta noite</i>	down (stairs), <i>em baixo</i>
last night, <i>a noite passada</i>	ahead, in front, <i>adiante</i>
this morning, <i>esta manhã</i>	behind, in back, <i>atrás</i>
in the morning, <i>de manhã</i>	forward, <i>para diante, em diante</i>
in the afternoon (evening), <i>de tarde</i>	back, backward, <i>atrás, para trás</i>
in the night, <i>de noite</i>	outside, <i>fóra, para fóra</i>
this afternoon, <i>esta tarde</i>	inside, <i>dentro</i>
tomorrow morning, <i>amanhã de manhã</i>	opposite, in front, <i>oposto, em frente</i>
tomorrow afternoon, <i>amanhã à tarde</i>	here and there, <i>aqui e acolá</i>
tomorrow night, <i>amanhã à noite</i>	everywhere, <i>em toda a parte</i>
early, <i>cêdo</i>	where, <i>onde</i>
late, <i>tarde</i>	also, too, <i>também</i>
already, <i>já</i>	yes, <i>sim</i>
no longer, <i>já não</i> (he is no longer here, <i>êle já não está aqui</i>)	no, not, <i>não</i>
yet, still, <i>ainda</i>	very, much, <i>muito</i>
not yet, <i>ainda não</i>	little, not much, <i>pouco</i>
now, <i>agora</i>	well, <i>bem</i>
then, <i>então</i>	badly, <i>mal</i>
afterwards, <i>depois</i>	better, <i>melhor</i>
never, <i>nunca, jamais</i> (he never comes, <i>nunca vem</i> or <i>não vem nunca</i>)	worse, <i>pior</i>
always, <i>sempre</i>	more, <i>mais</i>
forever, <i>para sempre</i>	less, <i>menos</i>
soon, <i>em breve</i>	so, <i>tão</i>
only, <i>sòmente, só</i>	as - as, <i>tão - quanto (como)</i>
often, <i>muitas vezes, a miúdo</i>	as much - as, <i>tanto - como</i>
usually, <i>usualmente</i>	as many - as, <i>tantos - como</i>
fast, <i>depressa</i>	how much?, <i>quanto?</i>
slowly, <i>vagarosamente</i>	how many?, <i>quantos?</i>
here, <i>aqui</i>	how?, <i>como?</i>
	too much, <i>demasiado</i>
	too many, <i>demasiados</i>
	so much, <i>tanto</i>
	so many, <i>tantos</i>
	as, like, <i>como</i>
	besides, <i>além disso</i>

finally, in short, *finalmente, em fim, por fim*
 almost, *quási (quáse)*
 gladly, *de boa vontade*
 certainly, of course, *certamente*
 unfortunately, *infelizmente*
 at once, *de repente, já*
 at all, *de todo, absolutamente*
 hardly, *apenas*
 aloud, *em voz alta*
 suddenly, *repentinamente, de repente*
 about, *àcerca de, cerca de*
 perhaps, maybe, *talvez, acaso*

a little, *um pouco*
 again, *outra vez*
 really, truly, *realmente*
 together, *juntos*
 at least, *pelo menos*
 again and again, *a miúdo, repetidas vezes*
 occasionally, *casualmente*
 from time to time, *de quando em quando, de vez em quando*
 therefore, *portanto*
 for lack of, *por falta de*
 long ago, *há muito tempo*
 entirely, altogether, *inteiramente*

26. *Conjunctions.*

and, *e*
 but, *mas*
 or, *ou*
 why?, *porque?* (*porquê?* if not followed by clause)
 why!, *pois!*
 because, *porque*
 that, *que*
 where, *onde*
 than, *que, de que, de* (before numerals)
 since, *pois que, desde*
 so that, *de maneira que*
 for, *pois*
 if, provided that, *se*²²

while, as long as, *enquanto*²²
 as soon as, *logo que, assim que*²²
 when, *quando*²²
 unless, *a menos que, a não ser que*²³
 provided that, *contanto que, desde que*²³
 without, *sem que*²³
 in order that, *para que,*²³ *para*²⁴
 until, *até que,*²³ *até*²⁴
 although, *ainda que,*²³ *a pesar de*²⁴
 before, *antes de*²⁴
 after, *depois de*²⁴

22. These call for the future subjunctive if future time is implied: if he doesn't come, I won't go, *se êle não vier eu não irei*; as long as he stays here, I shall stay, *enquanto êle aqui estiver, também estarei*; I shall see him when he comes, *hei-de vê-lo quando êle vier*.

23. These normally take the subjunctive: although he may do it, I shall not be angry, *ainda que o faça, não ficarei zangado*; unless he comes, I shall not go, *a não ser que êle venha eu não irei*; I did it so that he might read the letter, *fi-lo para que êle pudesse ler a carta*; he came without my seeing him, *êle veio sem que eu o tivesse visto*.

24. These are *prepositions* in Pt., and call for the personalized infinitive: I shall see him before they come, *hei-de vê-lo antes de êles*

27. Indefinite Pronouns and Adjectives.

such, *tal* (pl. *tais*)
 all kinds of, *toda a qualidade de*
 everything, *tudo*
 everyone, *todo o mundo, toda a gente, todos*
 something, *qualquer coisa*
 someone, *alguém*
 nothing, *nada*²⁵
 no one, *ninguém*²⁵
 no (adj.), *nenhum*²⁵
 neither - nor, *nem - nem*²⁵
 several, *vários*

each, every, *cada, todo*
 all, *todo, todos*
 (an) other, *outro*
 much, lots of, *muito*
 few, *poucos, uns* (fem. *umas*)
 many, *muitos*
 little (not much), *pouco*
 both, *ambos*
 enough, *bastante, suficiente*
 some, *algum* (fem. *alguma*, pl. *alguns, algumas*)

28. Prepositions.

of, from, *de* (contracts with articles; see p. 274, n. 3)
 out of, *fóra de*
 to, at, *a* (contracts with articles; see p. 274; must be used with a noun indirect object: I give John the book, *dou o livro a João*)
 with, *com*
 in, *em* (p. 274)
 without, *sem*
 on, *sobre, em*
 over, *em cima de*
 above, *acima de*
 for, *por* (for the sake of, on account of, in exchange for; p. 274); *para* (purpose, destination)

until, up to, *até*
 since, *desde*
 toward, *para*
 between, among, *entre*
 near, *perto de*
 far from, *longe de*
 before, *antes de*
 by, *por, de* (*por* if action is physical, *de* if mental)
 after, *depois de*
 opposite, in front of, *em frente de*
 in back of, behind, *atrás de*
 under (neath), *debaixo de*
 instead of, *em vez de, em lugar de*
 beside, *além de*
 at the house of, *em casa de*
 through, *através, por*

chegarem; I saw him before they came, *vi-o antes de eles virem*; although he did it, I wasn't angry, *a pesar de êle o fazer, não fiquei zangado*; I saw him after we came, *vi-o depois de chegarmos*. Note cases where both subjunctive and infinitive may be used: I shall wait until he comes, *esperarei até que êle venha* or *esperarei até êle vir*.

25. If these are used *after* the verb, use *não* before the verb: I see nothing, *nada vejo* or *não vejo nada*.

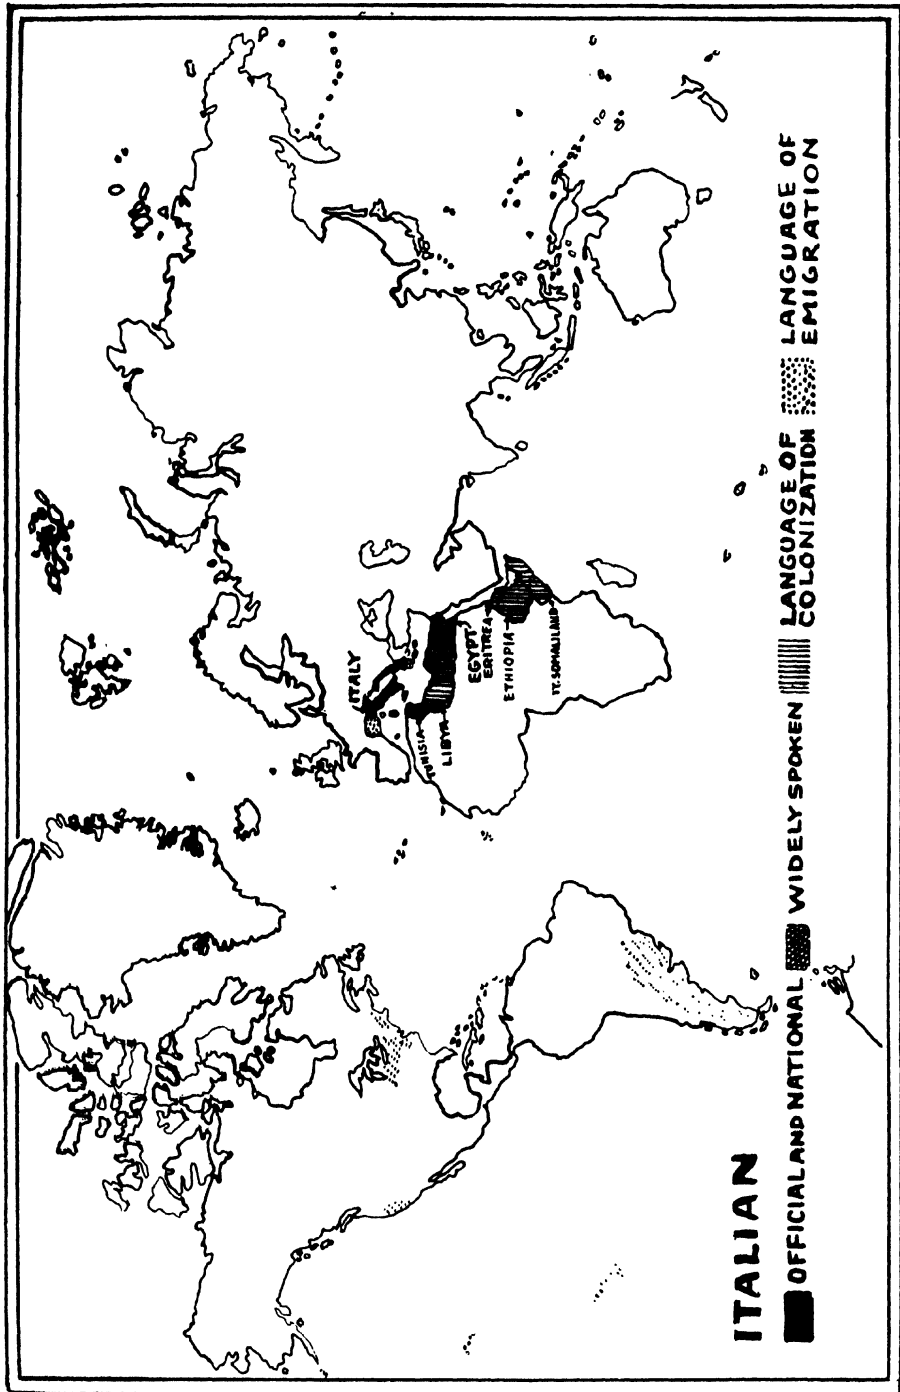

by means of, <i>por meio de</i>	about, <i>à cerca de, cerca de</i>
against, <i>contra</i>	around, <i>à (em) volta de, ao redor de</i>
across, <i>através</i>	during, <i>durante</i>
on the other side of, <i>no outro lado de</i>	because of, on account of, <i>por causa de</i>
in spite of, <i>a pesar de</i>	

29. Special Expressions and Idioms.

good morning, <i>bom dia, bons dias</i>
good afternoon (evening), <i>boa tarde</i>
good night, <i>boa noite, boas noites</i>
good-bye, <i>adeus</i>
I'll see you later, <i>até logo, até mais tarde</i>
I'll see you tomorrow, <i>até amanhã</i>

CHAPTER IX

ITALIAN

SPEAKERS AND LOCATION

(All population figures are approximate)

Europe — Italy (45,000,000); Switzerland (southern section: about 300,000); also spoken in Corsica and in extreme southeastern section of France, up to, but not including, Nice; widely spoken and understood, as a secondary and cultural language, along the eastern Adriatic coast (Yugoslavia, Albania, Greece), in Malta, and in the Dodecanese Islands.

Africa — colonial language of Libya (1,000,000); of Eritrea, Italian Somaliland, and, to a more limited extent, of Ethiopia (total native populations about 12,000,000); widely spoken and understood, as a secondary and cultural language, in Tunisia, Egypt, and, generally, along the European, African and Asiatic Mediterranean coast.

Western Hemisphere — spoken by large Italian immigrant groups in United States, Argentina, Brazil and Chile, amounting, with their descendants, to a total of perhaps 10,000,000.

ALPHABET AND SOUNDS

a, b, c, d, e, f, g, h, i, l, m, n, o, p, q, r, s, t, u, v, z.
(The symbol j is very occasionally used with the value of y, and is generally replaced by i; the symbols k, w, x, y occur only in foreign words).

Vowel sounds: Italian vowels have, whether stressed or unstressed, equal length.

a: = father (*padre, donna*)

e: = met (*ferro, bene*); or = initial part of *a* in Eng. *gate* (*freddo, bene*)¹

i: = machine (*birra*)

o: = *cup* (*forte, donna*); or = initial part of *o* in Eng. *go* (*mondo*)¹

u: = food (*luna*)

Consonant sounds: b, d, f, l, m, n, p, q, s, t, v, approximately as in English.

c: before a, o, u or consonant, and ch before e, i = cat (*caro, credo, chi*).

c: before e, i = church (in the groups *cia, cie, cio, ciu*, the i is almost silent: *ciascuno*, pronounced *chaskuno*).

g: before a, o, u or consonant, and gh before e, i = go (*gusto, lagrima, larghi*);

g: before e, i = gin (in the groups *gia, gie, gio, giu*, the i is almost silent: *già*, pronounced *ja*).

gn: = onion (*agnello*, pronounced *annyello*).

gl: = million (*meglio*, pronounced *mellyo*).

h: is completely silent (*hanno*, pronounced *anno*); but note its uses in the ch and gh combinations above.

r: is trilled as in British *very*.

sc: before e, i = sure (in the groups *scia, scio, sciu*, the i is almost silent: *sciacallo*, pronounced *shakallo*). Before a, o, u or consonant, sc = Eng. *scone*.

z: = dz or ts (*mezzo*, pronounced *medzo*; *pezzo*, pronounced *petso*). Learn by observation; the ts pronunciation generally prevails in groups of zi followed by another vowel (*giustizia*, pronounced *justitsya*).

1. The closed pronunciation (initial part of *gate* and of *go*) is always used for e and o, respectively, when unstressed. Either the open or the closed pronunciation may appear when the vowel is stressed. Learn by observation and remember that if an error is made, you will probably still be understood.

Double consonants are more strongly pronounced than single consonants: note distinction between *fato* (pron. *fa-to*) and *fatto* (pron. *fat-to*); between *aceto* (pron. *a-che-to*) and *acetto* (pron. *at-chet-to*).

English sounds not appearing in Italian: all vowel sounds save the ones described above; *h*; pleasure; *thin*; *this*; *w*; American *r*.

Italian sounds not appearing in English: closed sounds of *e* and *o*; Italian *r*; all double consonants.

CAPITALIZATION, SYLLABIFICATION, ACCENTUATION

Do not capitalize *io* ("I"); capitalize *Lei*, *Ella*, *Loro*, when they mean "you" (polite), *Suo* and *Loro* when they mean "your" (polite). Do not capitalize adjectives of nationality (*inglese*, "English") even when used as the name of a language (*parlo inglese*, "I speak English"); to indicate people, use your own choice (*gli americani* or *gli Americani*, "the Americans").

In dividing words into syllables, a single consonant between two vowels goes with the *following*, not with the preceding vowel: *generale* is to be divided and pronounced *ge ne ra le*.

The only written accent is the grave (`); this appears whenever a word of more than one syllable ending in a vowel is stressed on the final vowel: *città*, *perchè*, *tornerò*. The accent mark is also occasionally used on words of a single syllable to distinguish them from similar words having different meanings: *e*, "and"; *è*, "is"; *da*, "from"; *dà*, "gives". Otherwise, no written accent appears, and words are generally stressed on the next to the last or third from the last syllable; in these cases, the place of the accent is to be determined by observation. For the convenience of the student, the accent will be indicated when it falls elsewhere than on the second syllable from the end.

The apostrophe is used to indicate the fall of a vowel before another vowel: *l'uomo* (for *lo uomo*); *t'amo* (for *ti amo*).

SAMPLE OF WRITTEN ITALIAN;
USE FOR PRACTICE READING.

Dopo aver esaminato attentamente col canocchiale la costa della montagna, il tenente si rivolse al capitano. "Ci sono lassù almeno due posti d'osservazione nemici; poi, tra gli àlberi, trincee e camminamenti. Non si nascòndono troppo bene. Guardi Lei." Il capitano prese il canocchiale, guardò, poi scosse la testa. "Ha ragione. Si vedòno persino i reticolati. Telèfoni sùbito al comando. Dica che ci màndino due compagnie di rincalzo e una batteria di artiglieria da montagna. Intanto non possiamo muòverci. Di quante mitragliatrici disponiamo?" "Sei". "Son poche. Faccia distribuire le granate a mano, e mandi due plotoni d'esplorazione a rastrellare la vallata." In questo istante, un sibilo acuto fendè l'aria. La granata nemica esplose a cinquanta passi dai due ufficiali. "Accidenti! Ci hanno visti!" brontolò il capitano. Poi, volgendosi alla colonna, gridò: "Òrdine sparso!"

GRAMMATICAL SURVEY

1. *Nouns and Articles.*

Italian has only two genders, masculine and feminine. Nouns denoting males are usually masculine, those denoting females feminine. For nouns which in English are neuter, the ending often helps to determine the gender. Nouns ending in *-o* (plural changes *-o* to *-i*) are usually masculine;² those ending in *-a* (plural changes *-a* to *-e*) normally feminine; the gender of nouns ending in *-e* (plural changes *-e* to *-i*) must be determined by observation.

The indefinite article is *un* (*uno* before *s* followed by

2. A considerable number of nouns which in the singular are masculine and end in *-o* become feminine in the plural, with change from *-o* to *-a*: *il labbro*, "the lip", pl. *le labbra*; *il dito*, "the finger", pl. *le dita*; such nouns are indicated in the vocabulary thus: arm, *il braccio* (pl. *le braccia*).

consonant and before *z*) for the masculine; *una* (*un'* before vowels) for the feminine:

a brother, *un fratello*; a man, *un uomo*; a father, *un padre*; a mirror, *uno specchio*; an uncle, *uno zio*;

a woman, *una donna*; a mother, *una madre*; an idea, *un'idea*.

The definite article takes the following forms:³

Masculine singular: *l'* before vowels: the man, *l'uomo*;

lo before *s* plus consonant, or *z*: the mirror,

lo specchio; the uncle, *lo zio*.

il in all other cases: the brother, *il fratello*; the father, *il padre*.

3. This system applies also to *quello*, 'that', 'those', and to *bello*, 'beautiful', 'fine', when used as adjectives before the noun: that father, *quel padre*; those fathers, *quei padri*; that mirror, *quello specchio*; those mirrors, *quegli specchi*; that idea, *quell'idea*; that man, *quell'uomo*; a fine boy, *un bel ragazzo*; fine boys, *bei ragazzi*; fine men, *begli uòmini*; a fine mirror, *un bello specchio*; fine idea, *bell'idea*; fine man, *bell'uomo*.

It applies also to the article when combined with the prepositions *di*, 'of'; *a*, 'to'; *da*, 'from', 'by', 'at the house of'; *in* (changed to *ne-* in combination), 'in'; *su*, 'on'; *con* (changed to *co-* in combination), 'with'; *per* (changed to *pe-* in combination), 'for', 'by'. This combination is compulsory with the first five prepositions mentioned, optional with the last two:

of the father, *del padre*; of the man, *dell'uomo*; of the uncle, *dello zio*; of the woman, *della donna*; of the idea, *dell'idea*; of the fathers, *dei padri*; of the men, *degli uòmini*; of the women, *delle donne*;

to the brother, *al fratello*; to the mirror, *allo specchio*; to the mirrors, *agli specchi*; to the uncle, *allo zio*;

from the son, *dal figlio*; from the daughter, *dalla figlia*; from the sons, *dai figli*; from the men, *dagli uòmini*;

in the wall, *nel muro*; in the soul, *nell'anima*; in the trees, *negli àlberi*;

on the tree, *sull'àlbero*; on the trees, *sugli àlberi*; on the walls, *sulle mura*;

with the relatives, *coi parenti* or *con i parenti*;

for the children, *pei figli*, or *per i figli*.

Del, *della*, *dei*, etc. also translate 'some' or 'any', save in negative sentences: I have *some* bread, *ho del pane*; I have no bread, *non ho pane*.

Feminine singular: *l'* before vowels: the idea, *l'idea*.

la before consonants: the woman, *la donna*; the mother, *la madre*.

Masculine plural: *gli* before vowels, *s* plus consonant, or *z*: the men, *gli uòmini*; the mirrors, *gli specchi*; the uncles, *gli zii*.

i in all other cases: the brothers, *i fratelli*; the fathers, *i padri*.

Feminine plural: *le*: the mothers, *le madri*; the women, *le donne*; the ideas, *le idee*.

2. Adjectives and Adverbs.

Adjectives agree with the nouns they modify. Like nouns, they have the endings *-o* (feminine *-a*, masc. pl. *-i*, fem. pl. *-e*); or *-e* (no difference between masculine and feminine; plural *-i*); agreement with the noun does not necessarily mean identical endings; the noun may be of the *-a* (pl. *-e*) variety, while the adjective is of the *-e* (pl. *-i*) type: the strong woman, *la donna forte*; the strong women, *le donne forti*. Adjectives usually follow the noun, though a few common ones precede:

the red book, *il libro rosso*
 the red house, *la casa rossa*
 the green tree, *l'álbero verde*
 the green house, *la casa verde*

the red books, *i libri rossi*
 the red houses, *le case rosse*
 the green trees, *gli àlberi verdi*
 the green houses, *le case verdi*

The comparative degree is formed by prefixing *più*, "more", to the positive; for the superlative, the definite article is placed before *più* or the noun: an easy book, *un libro fàcile*; an easier book, *un libro più fàcile*; the easiest book, *il libro più fàcile*; the greatest general, *il più grande generale*. "Than" is usually translated by *di*: an easier book than this, *un libro più fàcile di questo*.

The adverb is generally formed by adding *-mente* to the feminine singular of the adjective: clear, *chiaro*; clearly, *chiaramente*; strong, *forte*: strongly, *fortemente*.

3. Numerals.

a) Cardinal⁴

1 — <i>uno, una</i>	14 — <i>quattòrdici</i>	40 — <i>quaranta</i>
2 — <i>due</i>	15 — <i>quìndici</i>	50 — <i>cinquanta</i>
3 — <i>tre</i>	16 — <i>sèdici</i>	60 — <i>sessanta</i>
4 — <i>quattro</i>	17 — <i>diciassette</i>	70 — <i>settanta</i>
5 — <i>cinque</i>	18 — <i>diciotto</i>	80 — <i>ottanta</i>
6 — <i>sei</i>	19 — <i>diciannove</i>	90 — <i>novanta</i>
7 — <i>sette</i>	20 — <i>venti</i>	100 — <i>cento</i>
8 — <i>otto</i>	21 — <i>ventuno</i> ⁵	200 — <i>duecento</i>
9 — <i>nove</i>	22 — <i>ventidue</i>	300 — <i>trecento</i>
10 — <i>dieci</i>	23 — <i>ventitrè</i>	1000 — <i>mille</i>
11 — <i>ùndici</i>	28 — <i>ventotto</i> ⁵	2000 — <i>duemila</i>
12 — <i>dòdici</i>	29 — <i>ventinove</i>	1,000,000 — <i>un milione (di)</i>
13 — <i>trèdici</i>	30 — <i>trenta</i>	

b) Ordinal.

1st — <i>primo</i>	7th — <i>sèttime</i>
2nd — <i>secondo</i>	8th — <i>ottavo</i>
3rd — <i>terzo</i>	9th — <i>nono</i>
4th — <i>quarto</i>	10th — <i>dècimo</i>
5th — <i>quinto</i>	11th — <i>undècimo</i> or <i>undicèsimo</i>
6th — <i>sesto</i>	20th — <i>ventèsimo</i>

Beyond 11th, ordinals are formed by dropping the final vowel of the cardinal and adding *-èsimo*: 34th, *trentaquattresimo*.

c) Others.

half -- *la metà* (noun), or *mezzo* (adjective): *mezza mela*, half an apple; *la metà della compagnia*, half the company.

4. Use these in dates, save for "the first": May first, *il primo maggio*; May 10th, *il dieci maggio*.

5. Note the fall of the final vowel of *venti*, *trenta*, etc. in *ventuno*, *ventotto*, *trentuno*, *trentotto*.

a pair of — *un paio di* a dozen — *una dozzina di*
 once - *una volta* twice - *due volte* three times - *tre volte*
 the first time — *la prima volta* sometimes — *qualche volta*

4. Pronouns.

a) Personal (Subject).⁶

I, <i>io</i>	we, <i>noi, noi altri</i>
you (familiar), <i>tu</i>	you (fam. pl.), <i>voi, voi altri</i>
he, <i>egli</i> or <i>lui</i>	they (masc.), <i>essi, loro</i>
she, <i>ella</i> or <i>essa</i> or <i>lei</i>	they (fem.), <i>esse, loro</i>
you (polite), <i>Ella</i> or <i>Lei</i> ⁷	you (pol. pl.), <i>Loro</i> ⁷

b) Personal (Direct Object)

me, <i>mi</i>	us, <i>ci</i>
you (fam.), <i>ti</i>	you (fam. pl.), <i>vi</i>
him, it (standing for an It. masc. noun), <i>lo, l'</i>	them (It. masc.), <i>li</i>
her, it (It. fem. noun), <i>la, l'</i>	them (It. fem.), <i>le</i>
you (pol. sg.), <i>La</i>	you (pol. pl.), <i>Li, Le</i>

c) Personal (Indirect Object)

to me, <i>mi (me)</i> ⁸	to us, <i>ci (ce)</i>
to you, <i>ti (te)</i>	to you, <i>vi (ve)</i>

6. Generally used only for emphasis or clarification: you don't know how to do it, *non sai farlo*; you don't know how to do it, *tu non sai farlo*.

7. In polite address, use *Ella* or *Lei* with the *third* person singular of the verb for a single person, *Loro* with the third plural of the verb for more than one person: *tu sei forte*, you (fam. sg.) are strong; *Lei è forte*, you (pol. sg.) are strong; *voi siete forti*, you (fam. pl.) are strong; *Loro sono forti*, you (pol. pl.) are strong.

8. If two object pronouns appear together, the indirect pronoun precedes the direct, and the form in parentheses ending in *-e* is used for the indirect instead of the form ending in *-i*: he gives me the book, *mi dà il libro*; but "he gives it to me", *me lo dà*; give him the book, *dagli il libro*; give it to him, *dàglielo*.

to him, *gli (glie)* ⁹
 to her, *le (glie)* ⁹
 to you (pol.), *Le (glie)* ⁹

to them, *loro* ¹⁰
 to you (pol. pl.) *Loro* ¹⁰

Direct and indirect object pronouns *precede* the verb (he sees me, *mi vede*; I give him the book, *gli do il libro*), save with the *familiar affirmative* forms of the imperative (take it!, *prèndilo!*); the infinitive (I want to see him, *voglio vederlo* or *lo voglio vedere*); and the gerund (I am speaking to him, *sto parlàndogli* or *gli sto parlando*), to all of which forms they are appended (note the double possibility when the infinitive or gerund depend on another verb). With the imperative polite or negative, the pronoun precedes: take it! (pol.), *lo prenda!*; don't take it! (fam.), *non lo prendere!*; (pol.), *non lo prenda!*

"Of it", "of them", "some" or "any" as a pronoun are expressed by *ne*, which follows other object pronouns and conforms to all the above rules: he gives me two of them, *me ne dà due*; I spoke to him of it, *gliene ho parlato*.

d) Personal (after a preposition)

me, <i>me</i>	us, <i>noi</i>
you, <i>te</i>	you, <i>voi</i>
him, <i>lui</i>	them, <i>loro, essi, esse</i>
her, <i>lei</i>	you (pol. pl.), <i>Loro</i>
it, <i>esso, essa</i>	
you (pol.), <i>Lei</i>	

With me, *con me*; for him, *per lui*; before them, *prima di loro*.

9. *Glie*, in writing, is always joined to a following direct object pronoun: I give it to him, *glielo do*.

10. *Loro* is an exception to all rules of position; it always follows the verb, and is never joined to anything else: I give them the book, *do loro il libro*; I give it to them, *lo do loro*.

e) Possessive.

my, mine, *il mio; la mia; i miei; le mie*
 your, yours (fam. sg.), *il tuo; la tua; i tuoi; le tue*
 his, her, hers, its, *il suo; la sua; i suoi; le sue*
 our, ours, *il nostro; la nostra; i nostri; le nostre*
 your, yours, *il vostro; la vostra; i vostri; le vostre*
 their, theirs, *il loro; la loro; i loro; le loro*
 your, yours (pol. sg.), *il Suo; la Sua; i Suoi; le Sue*
 your, yours (pol. pl.), *il Loro; la Loro; i Loro; le Loro*

These agree with the noun they modify or replace, and regularly appear with the article, whether used as adjectives or pronouns: my book, *il mio libro*; I want mine, *voglio il mio*. The article is, however generally omitted after the verb "to be" (this book is mine, *questo libro è mio*); and before nouns of relationship in the singular, but not in the plural (my sister, *mia sorella*; my sisters, *le mie sorelle*); also in direct address (my friend!, *amico mio!*).

f) Demonstrative.

this, these, *questo (-a, -i, -e)*: this woman, *questa donna*; here are your books; I want these, *ecco i Suoi libri; voglio questi*.

that, those, the one, the ones, *quello*; see note 3 for its forms when used as an adjective (that book, *quel libro*; those books, *quei libri*; those mirrors, *quegli specchi*); when used as a pronoun, the scheme is regular (*quello-a-i-e*): my books and the ones on the table, *i miei libri e quelli sulla tavola*.

g) Relative and Interrogative.

who, whom, which, that, *che*: the man I saw, *l'uomo che ho visto* (note that the relative cannot be omitted); the woman who came, *la donna che è venuta*. *Il quale (la quale, i quali, le quali)*, and *cui* are generally used after prepositions: the gentleman with whom I dined, *il signore con cui (or col quale) ho pranzato*.

whose, *di cui*; *il (la, i, le) cui*; *del (della) quale* (pl. *dei* or *delle quali*): the man whose sister I saw yesterday, *l'uomo di cui ho visto ieri la sorella*; *l'uomo la cui sorella ho visto ieri*; *l'uomo del quale ho visto ieri la sorella*; *l'uomo la sorella del quale ho visto ieri* (note the different word-orders used with each expression).

who?, whom?, *chi?*: who came?, *chi è venuto?*; whom did you see? *chi hai visto?*

what?, *che?* or *che cosa?*: what happened?, *che (or che cosa) è successo?*; what did you do?, *che (or che cosa) hai fatto?*

which?, which one?, which ones?, *quale* (pl. *quali*)?: which books do you want?, *quali libri vuoi?*

whose?, *di chi?*: whose house is that?, *di chi è quella casa?*

5. Verbs.

Italian verbs fall into three main classes, with the infinitive ending respectively in *-are*, *-ere*,¹¹ and *-ire*¹¹.

1. Present Indicative.

to speak, *parl-are*

I speak (am speaking, do
speak),¹² *parl-o*

you speak, *parl-i*

11. *-are* and *-ire* verbs have the stress on the *-a* and *-i*, respectively; some *-ere* verbs have the stress on the first *e* of the ending (*godere*), others have it on the preceding vowel of the stem (*ricèvere*), but no difference appears outside of the infinitive. A considerable number of *-ire* verbs have the following scheme of present indicative endings: *fin-isco*, *-isci*, *-isce*, *-iamo*, *-ite*, *-iscono*. The inserted *-isc-* reappears in the subjunctive and imperative singular and third plural. They are otherwise regular, and appear in the vocabulary thus: *finire* (*-isc-*).

12. A progressive conjugation, formed with *stare*, "to stand", "to be", followed by the gerund, corresponds in use to the English "I am speaking", "I was speaking", etc. The gerund is formed by adding *-ando* to the stem of *-are* verbs, *-endo* to the stem of other verbs, and is

he, she speaks,	<i>parl-a</i>
we speak,	<i>parl-iamo</i>
you speak,	<i>parl-ate</i>
they speak,	<i>parl-ano</i>

to receive,	<i>ricèv-ere</i>
-------------	------------------

I receive,	<i>ricev-o</i>
you receive,	<i>ricev-i</i>
he, she receives,	<i>ricev-e</i>
we receive,	<i>ricev-iamo</i>
you receive,	<i>ricev-ete</i>
they receive,	<i>ricèv-ono</i>

to sleep,	<i>dorm-ire</i>
-----------	-----------------

I sleep,	<i>dorm-o</i>
you sleep,	<i>dorm-i</i>
he, she sleeps,	<i>dorm-e</i>
we sleep,	<i>dorm-iamo</i>
you sleep,	<i>dorm-ite</i>
they sleep,	<i>dòrm-ono</i>

to be, *èssere*: *sono, sei, è, siamo, siete, sono.*

to have: *avere*: *ho, hai, ha, abbiamo, avete, hanno.*

to know (a fact), to know how, *sapere*: *so, sai, sa, sappiamo, sapete, sanno.*

invariable; used by itself, it carries the meaning of "by", or "while" (by speaking, one learns, *parlando, s'impara*; while speaking, we left the house, *parlando, siamo usciti dalla casa*). The present of *stare* is: *sto, stai, sta, stiamo, state, stanno*; imperfect, future and conditional are regular (*stavo; starò; starei*). *Parlo* and *sto parlando* are interchangeable in the sense of "I am speaking"; *parlavo* and *stavo parlando* in the sense of "I was speaking".

to go, *andare*: *vado, vai, va, andiamo, andate, vanno.*

to give, *dare*: *do, dai, dà, diamo, date, danno.*

to do, to make, *fare*: *faccio, fai, fa, facciamo, fate, fanno.*

to come, *venire*: *vengo, vieni, viene, veniamo, venite, vengono.*

to want, *volere*: *voglio, vuoi, vuole, vogliamo, volete, vogliono.*

2. Imperfect Indicative (meaning: I was speaking, used to speak):

parl-avo, -avi, -ava, -avamo, -avate, -avano, I was speaking, used to speak

ricev-evo, -evi, -eva, -evamo, -evate, -evano, I was receiving, used to receive

dorm-ivo, -ivi, -iva, -ivamo, -ivate, -ivano, I was sleeping, used to sleep

“to be”, *èssere*: *ero, eri, era, eravamo, eravate, erano*, I was, etc.

“to have”, *avere*, is regular: *av-evo*, etc.; so are other verbs with an irregular present: *sapevo, andavo, davo, venivo, volevo*; but *fare* has *fac-evo*.

3. Past Indicative (meaning: I spoke):

parl-ai, parl-asti, parl-ò, parl-ammo, parl-aste, parl-arono, I spoke, etc.

ricev-ei, ricev-esti, ricev-è (or ricev-ette), ricev-emmo, ricev-este, ricev-èrono (or ricev-èttero), I received, etc.

dorm-ii, dorm-isti, dorm-ì, dorm-immo, dorm-iste, dorm-irono, I slept, etc.

èssere: *fui, fosti, fu, fummo, foste, fùrono*, I was, etc.

avere: *ebbi, avesti, ebbe, avemmo, aveste, ebbero*, I had, etc. ¹⁸

13. Note carefully the irregular scheme of the past of *avere*; most verbs with an irregular past follow the same scheme; the irregular forms are the first singular, third singular and third plural, while the remaining three forms are quite regular; thus: to write, *scriv-ere*; I wrote, *scrissi*; he wrote, *scrisse*; they wrote, *scrissero*; but you wrote (sg.) *scriv-esti*, (pl.) *scriv-este*; we wrote, *scriv-emmo*. Whenever a past is irregular according to this scheme, only the first singular appears in the vocabulary (to write, *scrivere*; Past, *scrissi*).

4. Future and Conditional (I shall write; I should write).
parl-erò, -erai, -erà, -eremo, -erete, -eranno, I shall speak, etc.
ricev-erò, -erai, -erà, -eremo, -erete, -eranno, I shall receive, etc.
dorm-irò, -irai, -irà, -iremo, -irete, -iranno, I shall sleep, etc.
èssere: sarò, sarai, sarà, saremo, sarete, saranno, I shall be, etc.
avere: avrò, avrai, avrà, avremo, avrete, avranno, I shall have, etc.

For the conditional of *any* verb, retain the form of the future down to the *-r-* and add: *-ei, -esti, -ebbe, -emmo, -este, -ebbero*; thus:

I should speak, *parler-ei*; he would speak, *parler-ebbe*; we would sleep, *dormir-emmo*; they would be, *sar-ebbero*. It being understood that the conditional invariably follows the future in any irregularity the latter may have, the first person of the future alone in the vocabulary indicates that both tenses are irregular; thus: to come, *venire* (Fut. *verrò*); this indicates that the conditional is *verrei*.

5. Compound Tenses.

These are formed as in English, by using the auxiliary "to have" (*avere*) with the past participle. ¹⁴ Many intransitive

14. The past participle ends in *-ato* for *-are* verbs, *-uto* for *-ere* verbs, *-ito* for *-ire* verbs (spoken, *parl-ato*; received, *ricev-uto*; slept, *dorm-i-to*). Many past participles are irregular, and individually given in the vocabulary. The past participle is normally invariable (we have spoken, *abbiamo parlato*), but changes its endings like an adjective in the following cases:

1. when used as an adjective: the spoken tongue, *la lingua parlata*;
2. when used with the auxiliary "to be", in which case it must agree with the subject; this occurs: a) with intransitive verbs of motion, etc. as described above: the men have come, *gli uomini sono venuti*;
- b) in the passive: we are loved by our parents, *noi siamo amati dai nostri genitori*;
- c) in the reflexive: they got up, *si sono alzati*;
3. when used with "to have", to agree with the *direct* object; this agreement is compulsory if the object is a *personal direct* object *pronoun*: I have seen them, *li ho visti*; optional in all other cases: the women we saw, *le donne che abbiamo viste* (or *visto*); we saw those women, *abbiamo visto* (or *viste*) *quelle donne*.

verbs of motion (to go, *andare*; to come, *venire*), change of state (to become, *divenire*; to die, *morire*) and *essere* itself use *essere* as an auxiliary instead of *avere*; in this case, the past participle changes its ending to agree with the subject, just as though it were an adjective: he went, *è andato*; she went, *è andata*; we went, *siamo andati*; the ladies went, *le signore sono andate*.

Present Perfect: *ho parlato, hai parlato, etc.*, I have spoken, I spoke;
sono andato (-a), I went; *siamo andati (-e)*, we went;

Past Perfect: *avevo ricevuto*, I had received; *avevi dormito*, you had slept; *ero stato*, I had been; *eravamo tornati*, we had come back;

Future Perfect: *avrò scritto*, I shall have written; *sarà partito*, he will have left;

Past Conditional: *avrei perduto*, I would have lost; *sarebbe andato*, he would have gone.

6. Imperative. (meaning: speak!; let us speak)

	-are	-ere	-ire	<i>essere</i>	<i>avere</i>
Fam. Sg. ¹⁵	<i>parl-a</i>	<i>ricev-i</i>	<i>dorm-i</i>	<i>sii</i>	<i>abbi</i>
Fam. Pl.	<i>parl-ate</i>	<i>ricev-ete</i>	<i>dorm-ite</i>	<i>siate</i>	<i>abbiate</i>
Pol. Sg.	<i>parl-i</i>	<i>ricev-a</i>	<i>dorm-a</i>	<i>sia</i>	<i>abbia</i>
Pol. P.	<i>pàrl-ino</i>	<i>ricèv-ano</i>	<i>dòrm-ano</i>	<i>siano</i>	<i>abbiano</i>
"let us"	<i>parl-iamo</i>	<i>ricev-iamo</i>	<i>dorm-iamo</i>	<i>siamo</i>	<i>abbiamo</i>

15. The familiar singular form is never used in the negative, being replaced by the infinitive: don't speak!, *non parlare!*; don't sleep, *non dormire!* Object pronouns are attached to the familiar imperatives in the affirmative (speak to him! *pàrlagli!*; *parlàtegli!*; let us speak to him, *parliamogli*); but precede the polite forms (speak to him!, *gli parli*; *gli pàrlino*), and all negative forms, familiar or polite (don't speak to him!; *non gli parlare*; *non gli parlate*; *non gli parli*; *non gli pàrlino!*; let us not speak to him!, *non gli parliamo!*)

7. Reflexive Verbs.

The reflexive is more extensively used in Italian than in English. Reflexive pronouns are: *mi, ti, si, ci, vi, si*.¹⁶ The auxiliary used in compound tenses is *essere*, and the past participle agrees with the subject: they saw each other, *si sono visti*.¹⁷

I wash myself, *mi lavo* we wash ourselves, *ci laviamo*
 you wash yourself, *ti lavi* you wash yourselves, *vi lavate*
 he washes himself, *si lava* they wash themselves, *si lavano*

I washed myself, *mi sono lavato (-a)*; we washed ourselves,
ci siamo lavati (-e)
 you washed yourself, *ti sei lavato (-a)*; you washed yourselves,
vi siete lavati (-e)
 he washed himself, *si è lavato*; she washed herself, *si è lavata*;
 they washed themselves, *si sono lavati (-e)*

8. Passive.

This is formed as in English, by using "to be" with the past participle; the latter agrees with the subject: we are loved by our parents, *noi siamo amati dai nostri genitori*; I was punished, *fui punito*.

A second passive form with *venire* instead of *essere* indicates more intensive and immediate action: the sentinels were killed, *le sentinelle vennero uccise*.

The reflexive often replaces the passive, especially when the subject is a thing: Italian is spoken here, *qui si parla italiano*; these books are sold at two dollars apiece, *questi libri si vendono a due dollari l'uno*.

16. Note that the *-i* of all these forms changes to *-e* if another object pronoun follows: *se lo mette*, he puts it on (himself).

17. Note that in the plural, the reflexive may mean not only "ourselves", "yourselves", "themselves", but also "each other", "one another".

9. Subjunctive.

The Italian subjunctive has four tenses, and is frequently used in subordinate clauses. The endings of the present subjunctive are:

-are verbs: *parl-i, -i, -i, -iamo, -iate, 'ino*

-ere and *-ire* verbs: *ricev- or dorm-a, -a, -a, -iamo, -iate, 'ano.*

The imperfect subjunctive ends in *-ssi, -ssi, -sse, 'ssimo, -ste, 'ssero*, with a preceding *-a-* for *-are* verbs (*parl-assi*), *-e-* for *-ere* verbs (*ricev-essi*), *-i-* for *-ire* verbs (*dorm-issi*).

The present perfect subjunctive uses the present subjunctive of "to have" (*abbia, abbia, abbia, abbiamo, abbiate, abbiano*) or "to be" (*sia, sia, sia, siamo, siate, siano*), with the past participle (*abbia parlato, sia venuto*); while the past perfect subjunctive uses the imperfect subjunctive of *avere* (*avessi*) or *essere* (*fossi*), with the past participle (*avessi parlato, fossi venuto*).

I think he is speaking (will speak), *credo che parli*;

I think he spoke, *credo che abbia parlato*;

I thought he was speaking, (would speak), *credevo che parlasse*;

I thought he had spoken, *credevo che avesse parlato*.

DIALECTS

Italian has an extremely large number of widely diverging dialects, many of them mutually incomprehensible. Generally speaking, however, the standard literary speech has currency everywhere, and can be used with reasonable assurance.

The northern Italian dialects are generally identifiable by their lack of the characteristic Italian double consonant sounds and by the fall of many vowel endings (*fatto*, for example, may appear as *fato, fat, fait*). A clear, staccato pronunciation is usually indicative of northern origin. Piedmontese, Genoese, Venetian and Emilian are among the best-known dialects of this group.

The dialects south of Rome, down to the heel and toe of the boot (Neapolitan, Abruzzese, etc.) are characterized by heavy stress and prolongation of accented vowels and a general

deadening of final vowels to the sound of *e* in *the* (*beelle* for Italian *bello, bella, belli, belle*). A sing-song cadence is also fairly general.

Calabria and Sicily change most *o*-sounds to *u*, and most *e*-sounds to *i* (*prufissuri* for *professore*); and change *ll* to a sound resembling Engl. *drink* (*bedru* for *bello*). A sharp, explosive pronunciation is also fairly general.

The central section of the country (Florence, Rome, etc.) generally approaches the literary standard.

VOCABULARY ¹⁸

1. *World, Elements, Nature, Weather, Time, Directions.*

world, <i>il mondo</i>	star, <i>la stella</i>
earth, <i>la terra</i>	sky, <i>il cielo</i>
air, <i>l'aria</i>	wind, <i>il vento</i>
water, <i>l'acqua</i>	weather, time, <i>il tempo</i>
fire, <i>il fuoco</i> (pl. <i>fuochi</i>)	snow, <i>la neve</i>
light, <i>la luce</i>	to snow, <i>nevicare</i>
sea, <i>il mare</i>	rain, <i>la pioggia</i>
sun, <i>il sole</i>	to rain, <i>piòvere</i> ¹⁹ (Past <i>piovve</i>)
moon, <i>la luna</i>	cloud, <i>la nùvola</i> , ¹⁹ <i>la nube</i>

18. Irregularities in the plural of nouns are indicated thus: *il braccio* (pl. *le braccia*); this means that the plural is feminine and takes an *-a* instead of an *-i* ending. Spelling changes are also noted: *fuoco* (pl. *fuochi*).

Verbs of the *-ire* type that take *-isc-* between the root and the ending are indicated thus: to finish, *finire* (*-isc-*). Other important irregularities are also noted in parentheses. An irregular first singular in the past tense implies the same irregularity in the third singular and third plural, with the other persons regular; thus *scrivere* Past *scrissi* indicates the scheme: *scrissi, scrivesti, scrisse, scrivemmo scriveste, scrissero* (cf. note 13). Verbs requiring *èssere* as an active auxiliary appear thus: to become, *divenire* (*èssere*). This indication is not given in the case of reflexive verbs, which are *all* conjugated with *èssere*.

19. In words of more than two syllables, if the accent falls elsewhere than on the next to the last syllable, its place is indicated thus *piòvere, nùvola*. A few other irregular accents are also indicated (*polizia*). Note, however, that this is done only for the convenience of the student, and that Italian does not indicate the place of the accent in writing save when it falls on a final vowel (*metà, città*).

cloudy, *nuvoloso, coperto*
 fog, *la nebbia*
 ice, *il ghiaccio*
 mud, *il fango*
 morning, *il mattino, la mattina*
 noon, *il mezzogiorno*
 afternoon, *il dopopranzo, il pomeriggio*
 evening, *la sera*
 night, *la notte*
 midnight, *la mezzanotte*
 North, *nord, settentrione*
 South, *sud, mezzogiorno*
 East, *est, levante, oriente*
 West, *ovest, ponente, occidente*
 year, *l'anno*
 month, *il mese*
 week, *la settimana*
 day, *il giorno*
 hour, *l'ora*
 minute, *il minuto*
 Sunday, *la domenica*

Monday, *il lunedì*
 Tuesday, *il martedì*
 Wednesday, *il mercoledì*
 Thursday, *il giovedì*
 Friday, *il venerdì*
 Saturday, *il sabato*
 January, *gennaio*
 February, *febbraio*
 March, *marzo*
 April, *aprile*
 May, *maggio*
 June, *giugno*
 July, *luglio*
 August, *agosto*
 September, *settembre*
 October, *ottobre*
 November, *novembre*
 December, *dicembre*
 Spring, *la primavera*
 Summer, *l'estate (fem.)*
 Fall, *l'autunno*
 Winter, *l'inverno*

For "it is warm", "it is cold", etc. cf. p. 350.

No capitals for seasons, months, days of week.

I shall see him *on Monday, lo vedrò lunedì*; last Monday, *lunedì scorso*; next Monday, *lunedì prossimo*; every Monday, *tutti i lunedì* (nouns ending in stressed vowels usually do not change in the plural: the city, *la città*; the cities, *le città*); *on May 5th, 1943, il cinque maggio mille novecento quarantatrè.*

2. Family, Friendship, Love.

family, *la famiglia*
 husband, *il marito*
 wife, *la moglie* (pl. *mogli*)
 parents, *i genitori*
 father, *il padre*
 mother, *la madre*
 son, *il figlio* (pl. *figli*)
 daughter, *la figlia*
 brother, *il fratello*
 sister, *la sorella*

uncle, *lo zio*
 aunt, *la zia*
 nephew, grandson, *il nipote*
 niece, granddaughter, *la nipote*
 cousin, *il cugino, la cugina*
 grandfather, *il nonno*
 grandmother, *la nonna*
 father-in-law, *il suocero*
 mother-in-law, *la suocera*
 son-in-law, *il gènero*

daughter-in-law, *la nuora*
 brother-in-law, *il cognato*
 sister-in-law, *la cognata*
 man, *l'uomo* (pl. *gli uòmini*)
 woman, *la donna*
 child, *il bambino, la bambina*
 boy, *il ragazzo, il fanciullo*
 girl, *la ragazza, la fanciulla*
 sir, Mr., *il signore*²⁰
 madam, Mrs., *la signora*
 Miss, young lady, *la signorina*
 friend, *l'amico, l'amica* (pl. *gli amici, le amiche*)
 servant, *il servo, la serva*
 to introduce, *presentare*

3. Speaking Activities.

word, *la parola*
 language, *la lingua*
 to speak, *parlare*
 to say, *dire* (Pres. *dico, dici, dice, diciamo, dite, dicono*; Impf. *dicevo, dite, dicono*; Fut. *dirò*; Past *dissi*; P. p. *detto*; Impv. *di, dite, dica*)
 to tell, relate, *dire, raccontare*
 to inform, *informare*
 to call, *chiamare*
 to be called, one's name is, *chiamarsi* (my name is John, *mi chiamo Giovanni*)
 to greet, *salutare*
 to name, *nominare*
 to cry, shout, *gridare*
 to listen to, *ascoltare* (I listen to

to visit, *visitare*
 love, *l'amore* (masc.)
 to love, *amare, voler*²¹ *bene a* (she loves him, *lo ama, gli vuol bene*)
 to fall in love with, *innamorarsi di*
 to marry, *sposare*
 to get married, *sposarsi*
 sweetheart, *il fidanzato, la fidanzata*
 kiss, *il bacio* (pl. *baci*)
 to kiss, *baciare*
 dear, beloved, *caro*

him, *lo ascolto*)
 to hear, *sentire, udire* (Pres. *odo, odi, ode, udiamo, udite, odono*)
 to understand, *capire* (-isc-), *comprendere* (Past *compresi*, P. p. *compreso*)
 to mean, *voler dire* (cf. p. 342 for *volere*)
 to ask (for), *domandare, chiedere* (Past *chiesi*, P. p. *chiesto*); the person asked is an indirect object, the thing asked for is direct: I asked him for a pencil, *gli ho domandato (chiesto) un lapis*
 to answer, *rispondere* (Past *risposi*, P. p. *risposto*); the person

20. Use the definite article with *signore, signora, signorina*, save in speaking directly to the person; *signore* usually becomes *signor* when the name follows: Mr. Bianchi has a book, *il signor Bianchi ha un libro*; Mr. Bianchi, have you a book?, *signor Bianchi, ha un libro?*; sir, have you a book?, *signore, ha un libro?*

21. Cf. p. 342 for *volere*.

answered is an indirect object:
I answered him, *gli ho risposto*
to thank, *ringraziare* (I thanked

him for the book, *l'ho ringraziato del libro*)
to complain, *lagnarsi, lamentarsi*

4. Materials.

gold, *l'oro*
silver, *l'argento*
iron, *il ferro*
steel, *l'acciaio*
copper, *il rame*
tin, *lo stagno, la latta*
lead, *il piombo*
oil, *il petrolio*
gasoline, *la benzina*
coal, *il carbone*

wood, *il legno*
silk, *la seta*
cotton, *il cotone*
wool, *la lana*
cloth, *la tela, il panno*
to cut, *tagliare*
to dig, *scavare*
to sew, *cucire*
to mend, *rammendare*

5. Animals.

animal, *l'animale* (masc.), *la bestia*
horse, *il cavallo*
dog, *il cane*
cat, *il gatto*
bird, *l'uccello*
donkey, *l'asino*
mule, *il mulo*
cow, *la vacca* (pl. *vacche*)
ox, *il bue* (pl. *buoi*)
pig, *il porco, il maiale*
chicken, *il pollo*
hen, *la gallina*

rooster, *il gallo*
sheep, *la pecora*
goat, *la capra*
mouse, *il topo*
snake, *il serpente*
fly, *la mosca* (pl. *mosche*)
bee, *l'ape* (fem.)
mosquito, *la zanzara*
spider, *il ragno*
louse, *il pidocchio* (pl. *pidocchi*)
flea, *la pulce*
bedbug, *la cimice*

6. Money; Buying and Selling.

money, *il danaro*
coin, *la moneta*
dollar, *il dollaro*
cent, *il soldo*
lira (ab. 1 cent), *la lira*
centesimo (1-100th of a *lira*), *il centesimo*
bank, *la banca, il banco* (pl. *-che, -chi*)
check, *l'assegno*

money order, *il vaglia* (pl. *i vaglia*)
to earn, gain, *guadagnare*
to win, *vincere* (Past *vinsi*, P. p. *vinto*)
to lose, *perdere* (Past *persi*, P. p. *perso*; or regular, *perdei, perduto*)
to spend, *spendere* (Past *spesi*, P. p. *speso*)

to lend, *prestare*
 to borrow, *chiedere* (*prendere*) in
préstito: I borrowed \$2 from
 him, *gli ho preso in préstito*
due dollari
 to owe, *dovere* (Pres. *debbo* or
devo, *devi*, *deve*, *dobbiamo*, *do-*
vete, *dèbbono* or *dèvono*; Fut.
dovrò)
 to pay, *pagare*
 to give back, *restituire* (-isc-)
rendere (Past *resi*, P. p. *reso*)
 to change, exchange, *cambiare*
 (small) change, *gli spiccioli*
 change (of a bill), *il resto*
 honest, *onesto*
 dishonest, *disonesto*
 price, *il prezzo*
 cost, *il costo*
 to cost, *costare* (*èssere*)
 expensive, dear, *caro*
 cheap, *ragionevole*, *a buon mer-*
cato
 store, shop, *negozio*, *bottega* (pl.
-ghe)
 piece, *il pezzo*

7. Eating and Drinking.

to eat, *mangiare*

 because of, on account of, *a causa di, per causa di*
 opposite, in front of, *davanti a, di fronte a*
 back of, behind, *dietro* ²⁵

29. Special Expressions and Idioms.

good morning, good afternoon, good day, *buon giorno*
 good evening, *buona sera*
 good night, *buona notte*
 good-bye, *arrivederci, addio, ciao* (the latter is also used for "hello!")
 I'll see you later, *a più tardi*
 I'll see you tomorrow, *a domani*
 I'll see you tonight, *a stasera*
 just now, *proprio adesso, proprio ora*
 hello! (on the telephone), *pronto!*
 how are you?, *come sta?*
 how goes it?, *come va?*
 I'm well, *sto bene*
 I'm (much) better, *sto (molto) meglio*
 what time is it?, *che or'è?, che ore sono?*
 It's six o'clock, *sono le sei*
 at six o'clock, *alle sei*
 at about six, *verso le sei*
 at half past six, *alle sei e mezzo*
 at a quarter past (to) six, *alle sei e (meno) un quarto*
 at ten minutes past (to) six, *alle sei e (meno) dieci*
 last year, *l'anno scorso (passato)*
 next year, *l'anno venturo (pròssimo, che viene)*
 every day, *ogni giorno, tutti i giorni*
 the whole day, *tutto il giorno, tutta la giornata*
 please, *per favore, per piacere, La prego*
 tell me, *mi dica*

²⁵. These require *di* after them if their object is a personal pronoun: without my brother, *senza mio fratello*; without him, *senza di lui*.

bring me, *mi porti*
 show me, *mi faccia vedere*
 thank you, *grazie*
 don't mention it, *prego, non c'è di che, niente*
 will you give me?, *vuol darmi?*
 pardon me, *scusi*
 it doesn't matter, never mind, *non importa, non fa niente*
 I'm sorry, *mi dispiace, mi rincresce*
 I can't help, *non posso fare a meno di*
 it's nothing, *non è niente*
 what a pity!, it's too bad!, *che peccato!*
 I'm glad, *mi fa piacere*
 I have to, *debbo*
 I agree (all right, O. K.), (sono) *d'accordo; siamo intesi*
 where is (are)?, *dov'è (dove sono)?*
 where are you going?, *dove va?*
 there is (are), *ecco* (if pointing out), *c'è (ci sono)*
 which way?, *da che parte?*
 to the right, *a destra*
 to the left, *a sinistra*
 straight ahead, *dritto*
 this (that) way (direction), *di qua (là), da questa (quella) parte*
 this (that) way (fashion), *così, in questo (quel) modo*
 come with me, *venga con me*
 what can I do for you?, *in che posso servirla?*
 what is it?, what is the matter?, *che c'è?*
 what is the matter with you?, *che ha?*
 what is happening?, *che succede?*
 what do you want?, *che (cosa) vuole (desidera)?*
 what are you talking about?, *di che parla?*
 what does that mean?, what do you mean?, *cosa vuol dire?*
 how much is it?, *quanto costa?*
 anything else?, *altro?*
 nothing else, *nient'altro*
 do you speak Italian?, *parla italiano?*
 a little, *un pò*
 speak (more) slowly, *parli (più) piano (lentamente)*
 do you understand?, *capisce?, comprende?*
 I don't understand, *non capisco (comprendo)*
 do you know?, *sa?*
 I don't know, *non so*
 I can't, *non posso*
 what do you call this in Italian?, *come si chiama questo in italiano?*

how do you say — in Italian?, *come si dice — in italiano?*

I'm an American, *sono americano*

I'm hungry (thirsty, sleepy, warm, cold), *ho fame (sete, sonno, caldo, freddo)*²⁶

it's warm (cold, sunny, fine weather, bad weather), *fa caldo (freddo, sole, bel tempo, cattivo tempo)*²⁶; it's windy, *tira vento*

it's forbidden, *è proibito (vietato)*; no smoking, *vietato fumare*

luckily, *per fortuna*

unfortunately, *per disgrazia*

is it not so?, *non è vero?* (use this invariable phrase wherever English repeats the verb: you went, *didn't you?*; he is here, *isn't he?*)

not at all, *niente affatto*

how old are you?, *quanti anni ha?*

I'm twenty years old, *ho venti anni*

how long have you been here?, *da quanto tempo si trova qui?*

how long have you been waiting?, *da quanto tempo aspetta?*

as soon as possible, *al più presto*

come here!, *venga qua!*

come in!, *avanti!*

look!, *guardi!*

look out! careful!, *attenzione!, attento!*

for heaven's sake!, *per carità!*

darn it!, *accidenti!* (darn the luck!, *accidenti alla fortuna!*)

gangway!, by your leave!, *permesso?*

as you wish, *come vuole*

listen!, look here!, say!, *senta! stia a sentire!, dica!*

just a minute!, *un momento!*

in any case, at any rate, *in ogni caso*

may I introduce?, *permette che Le presenti?*

glad to meet you, *fortunatissimo, piacere*

no admittance!, *vietato l'ingresso*

notice!, *avviso!*

you don't say so!, *possibile?*

to your health!, *salute!*

I should like to, *vorrei*

as quickly as possible, *al più presto possibile*

stop!, *ferma!*

hurry!, (*faccia*) *presto, si sbrighi*

keep right (left), *tenere la destra (sinistra)*

entrance, *entrata*

exit, *uscita*

26. With all these expressions, translate "very" by *molto*, save with *fame* and *sete* (*molta*): *ho molta sete, ho molto sonno*.

CHAPTER X

LANGUAGES OF THE SLAVIC GROUP

This imposing group, extending from the shores of the Baltic and the Adriatic, across central and eastern Europe and all of northern Asia, to Kamchatka, Behring Strait and Vladivostok on the Pacific coast, comprises Russian, with its kindred East Slavic tongues, Ukrainian and White Russian; a Northwestern group that takes in Polish, Czech, Slovak, and a few minor languages (Wend or Lusatian, Kashub); and a Southern division which includes Serbo-Croatian, Slovenian and Bulgarian. The distinction among the three Slavic groups (eastern, northwestern and southern) is perhaps more geographical than linguistic.

Russian (or Great Russian) is the official and principal language of the Soviet Union, with its 130,000,000 inhabitants in Europe and 41,000,000 more in Asia. While not all of these 171,000,000 people speak Russian as a primary language, the majority of them can be reached with it. The actual number of Great Russian speakers is estimated at over 100,000,000. Ukrainian (also called Ruthenian or Carpatho-Russian in its westernmost varieties) is the tongue of some 35,000,000 more people located in southeastern Poland (formerly Galicia), the Carpathian section of Czechoslovakia, and the Russian Ukraine, as far east as the Kuban Valley and the Caucasus. About 8,000,000 more, situated in west central Russia and eastern Poland, speak White Russian. The remaining populations of the Soviet Union speak a multitude of tongues, mostly of the Ural-Altai variety, but Russian has imposed itself as a colonizing tongue across all of Siberia, particularly along the

upper courses of the great rivers and on the Pacific coast, in Transcaucasia, and in Turkestan.

Polish is the official tongue of Poland, with its 35,000,000 inhabitants, to about 25,000,000 of whom the Polish tongue is native and primary (the remainder of Poland's population speaks White Russian, Ukrainian, German, Yiddish, Lithuanian and Kashub). Some 3,000,000 Polish speakers and their descendants, incidentally, are located in the U. S. A., mostly in the mining and industrial districts of Pennsylvania, Ohio, Illinois and Michigan.

Czech, the official tongue of Czechoslovakia, is native to over 7,000,000 inhabitants of Bohemia and Moravia, while its variant, Slovak, is spoken by about 3,000,000 (the rest of Czechoslovakia's 15,000,000 inhabitants have German, Hungarian, Ruthenian and Yiddish as primary tongues). Nearly 2,000,000 Czechs and Slovaks have come to the U. S. A.

Wend (or Lusatian) is spoken by perhaps 150,000 people entirely surrounded by German speakers in the heart of the Reich, at Cottbus and Bautzen.

Approximately 12,000,000 of Yugoslavia's 16,000,000 people speak Serbo-Croatian, while 1,500,000 more use Slovene (or Slovenian), which appears also in the extreme northeast of Italy (Istria, Gorizia, Carso Plateau, Venetia northeast of Udine) and the border districts of Austria. Linguistic minorities in Yugoslavia consist of German, Hungarian, Albanian, Roumanian and Italian speakers.

Bulgarian is the language of Bulgaria's 6,500,000 inhabitants, and crosses the political borders into Yugoslav and Greek Macedonia, Roumanian Dobrudja and southern Bessarabia.

The distributional aspects of the Slavic tongues point to Russian as of primary importance, numerically, politically, economically and culturally. Polish is a somewhat distant second, while Czech and the South Slavic languages are of tertiary rank.

GENERAL CHARACTERISTICS, COMMON FEATURES, AND OUTSTANDING DIFFERENCES.

By comparison with the Germanic and Romance groups, the Slavic tongues present an archaic and conservative aspect, much closer than either of the other major groups to what must have been the original Indo-European state of affairs. Most of the Slavic languages are distinguished by a full-bodied richness of consonant sounds, with practically all consonants appearing in a double series, non-palatal and palatal (e. g., Polish *t, ł*; Serbo-Croatian *n, nj*; Czech *t, ě*). Often the palatal series is used before front vowels, the non-palatal before back vowels or where no vowel follows (e. g., Czech *druh*, comrade, but *druzi*, comrades; *voják*, soldier, but *vojáci*, soldiers). In grammar, the Slavic languages, with one exception, Bulgarian, have retained almost all of the original Indo-European system of noun declension, which means that nouns must often be learned in as many as seven cases (nominative, genitive, dative, accusative, instrumental, locative or prepositional, and vocative). The three grammatical genders, masculine, feminine and neuter, appear, but the majority of inanimate objects are masculine or feminine. The verb-system is relatively simple, only three true tenses (present, past and future) appearing in most cases, but this apparent simplicity is counterbalanced by the fact that many verbs appear in complicated double "aspects", "imperfective", to denote the action as occurring repeatedly or continually, and "perfective", to indicate that it occurs only once (e. g., Russian *стучать (stučat')*, to knock repeatedly, continually; *постучать (postučat')*, to knock once; to translate "he knocked on the door", the past of the compounded verb must be used; to translate "he was knocking when I came in", the past of the uncompounded verb appears). The Slavic languages also make abundant use of gerunds and participles, active and passive, present and past, which are often used where Germanic or Romance languages would use clauses (e. g., "he resembled a man who was losing his last hope and had left everything behind" may be translated into Russian by

changing the construction to "he resembled a man losing his last hope and having left everything behind").

In sounds, in grammatical structure, and especially in vocabulary, the Slavic languages are far closer to one another than are the tongues of the Germanic or Romance groups. This similarity, in the spoken languages, is often so striking that they are to a considerable degree mutually comprehensible, and that it takes a trained ear to tell them apart. Accentuation is perhaps the best norm of general distinction. While Czech and Slovak normally accentuate on the first syllable of the word, the Polish stress regularly falls on the next to the last; the other languages, notably Russian, have a free accent, which means that words may be stressed, more or less unpredictably, on any syllable, and that the place of the accent for every given word must be individually learned. Serbo-Croatian tends to avoid final accentuation, distinguishes between long and short vowels, and has a certain amount of musical pitch; Czech and Slovak distinguish with extreme care between long and short vowels, and it is perfectly possible to have a short accented vowel and a long unaccented vowel in the same word; Polish, Bulgarian and Russian make no particular distinction between long and short vowels, but in Russian unstressed vowels tend to have a slurred and indistinct pronunciation. Polish preserves nasal vowels (ą, ę) which the other Slavic languages have changed to non-nasal sounds. Polish and Czech have a palatalized *r* (*rz*, *ř*) which does not appear in the other tongues.

The comparative similarity of the spoken Slavic tongues is offset by striking differences in their written appearance. Those Slavic nations which received Christianity, directly or indirectly, from Byzantium (Russians, Ukrainians, Serbs, Bulgars) have adopted a modified form of the Greek alphabet called Cyrillic, while the others (Czechs, Slovaks, Poles, Croats, Slovenes), who became Roman Catholics, use the Roman alphabet. This leads to such anomalies as a single, fairly unified spoken tongue like Serbo-Croatian appearing in written form in two alphabets (Yugoslav railway stations and postage stamps bear the identical names and inscriptions, first in

Cyrillic, then in Roman characters). The situation is further complicated by the fact that the peoples using either set of characters have devised entirely different arrangements to represent identical sounds; thus, the *ch* of *church* is represented by *cz* in Polish, by *č* in Czech and Croatian; the *ny* of *canyon* is *nj* in Croatian, *ň* in Czech, *ń* in Polish. There is a little more uniformity among the nations using the Cyrillic characters, but here too striking discrepancies appear (Russian **НЬ**, Serbian **Њ**, to represent *ny*; Russian **ТЬ**, Serbian **Ћ**, to represent a palatalized *t*; while **Щ**, appearing in both Russian and Bulgarian, has the value of *Ashchurch* in the former, of *Ashton* in the latter).

THE CYRILLIC ALPHABETS

The letters R, S, B, in parentheses indicate that the character in question appears in Russian, Serbian, or Bulgarian; thus, **Б, б** (RSB) indicates that all three languages make use of the symbol; **Я, я** (RB) shows that the symbol is used in Russian and Bulgarian, but not in Serbian; **Љ** (S), that it appears only in Serbian. OR indicates that the symbol was in use in Russian prior to the Soviet orthographical reform, and that it may be encountered in pre-Soviet writings, or occasionally even today, in the writings of conservatives. Ukrainian uses Russian orthography, with **Є** replacing **Ә**, and **ї** used to soften a preceding consonant. The values given are the more usual ones; other values will be presented under the headings of the individual languages.

Symbol	Languages using it	Customary Value
A a		
Б б	(RSB)	father (R unstressed the)
В в	(RSB)	but
Г г	(RSB)	voice
Д д	(RSB)	good
Ђ ђ	(RSB)	dear
Е е	(S)	did you?
	(RSB)	yet (R); met (SB)

Ё ё	(R)	yore
Ж ж	(RSB)	pleasure
З з	(RSB)	zealous
И и	(RSB)	machine
Й й	(RB)	boy
І і	(OR, Ukr)	machine
Ј ј	(S)	young
К к	(RSB)	kiss
Л л	(RSB)	leave
ль ль	(S)	million
М м	(RSB)	man
Н н	(RSB)	not
Ъ ъ	(S)	canyon
О о	(RSB)	or (R unstressed the)
П п	(RSB)	peel
Р р	(RSB)	British very
С с	(RSB)	soon
Т т	(RSB)	take
Ѡ ѡ	(S)	hit you
У у	(RSB)	pool
Ф ф	(RSB)	father
Х х	(RSB)	German <i>ach</i>
Ц ц	(RSB)	its
Ч ч	(RSB)	church
Ѳ ѳ	(S)	John
Ш ш	(RSB)	sure
Щ щ	(RB)	Ashchurch (R); Ashton (B)
Ъ ъ	(OR, B)	silent (R); but (B); silent when final
Ы ы	(R)	rhythm
Ь ь	(RB)	silent, but palatalizes preceding consonant.
Ѣ ѣ	(OR, B)	yet (R); yet, met, yard (B)
Э э	(R)	met
Ю ю	(RB)	use
Я я	(RB)	yard

Ж ж	(B)	but
Θ θ	(OR)	father
V v	(OR)	machine

It will be noted that Serbian uses the single characters ђ, љ, њ, ћ, where Russian uses the combinations дѣ, лѣ, нѣ, тѣ. Croatian uses the following combinations dj, (or đ), lj, nj, é.

★ ★ ★

Points of similarity and divergence will be noted in the discussion of the individual languages. Some of the resemblances and differences among the major national Slavic tongues may be gathered from the following list (Russian and Bulgarian are given in Cyrillic characters; Serbo-Croatian is given in the Croatian form (Roman alphabet); Polish and Czech appear in their respective Roman alphabets).

English	Russian	Polish	Czech	Serbo-Croatian	Bulgarian
bird	птица	<i>ptak</i>	<i>pták</i>	<i>ptica</i>	птица
black	чёрный	<i>czarny</i>	<i>černý</i>	<i>crn</i>	черень
bread	хлеб	<i>chleb</i>	<i>chléb</i>	<i>hljeb</i>	хлѣбъ
bring	носить	<i>nosić</i>	<i>nositi</i>	<i>nositi</i>	нося
brother	брат	<i>brat</i>	<i>bratr</i>	<i>brat</i>	братъ
bull	бык	<i>byk</i>	<i>býk</i>	<i>bik</i>	бикъ
clean	чистый	<i>czysty</i>	<i>čistý</i>	<i>čist</i>	чистъ
day	день	<i>dzień</i>	<i>den</i>	<i>dan</i>	день
death	смерть	<i>śmierć</i>	<i>smrt</i>	<i>smrt</i>	смъртъ
dog	пёс	<i>pies</i>	<i>pes</i>	<i>pas</i>	куче
drink	пить	<i>pić</i>	<i>píti</i>	<i>piti</i>	пия
eagle	орёл	<i>orzeł</i>	<i>orel</i>	<i>orao</i>	орель
ear	ухо	<i>ucho</i>	<i>ucho</i>	<i>uho (uvo)</i>	ухо
earth	земля	<i>ziemia</i>	<i>země</i>	<i>zemlja</i>	земя
field	поле	<i>pole</i>	<i>pole</i>	<i>polje</i>	поле
fire	огонь	<i>ogień</i>	<i>ohěň</i>	<i>oganj</i>	огънь
foot	нога	<i>noga</i>	<i>noha</i>	<i>noga</i>	нога
free	свободный	<i>swobodny</i>	<i>svobodný</i>	<i>slobodan</i>	свободень
gold	золото	<i>złoto</i>	<i>zlato</i>	<i>zlato</i>	злато
good	добрый	<i>dobry</i>	<i>dobry</i>	<i>dobar</i>	добъръ
grass	трава	<i>trawa</i>	<i>tráva</i>	<i>trava</i>	трѣва

green	зелёный	<i>zielony</i>	<i>zelený</i>	<i>zelen</i>	зелень
hand	рука	<i>ręka</i>	<i>ruka</i>	<i>ruka</i>	ржка
hard	твёрдый	<i>twardy</i>	<i>tvrdý</i>	<i>tvrd</i>	твърдь
head	голова	<i>głowa</i>	<i>hlava</i>	<i>glava</i>	глава
heart	сердце	<i>serce</i>	<i>srdce</i>	<i>srce</i>	сърдце
horse	конь	<i>koń</i>	<i>kůň</i>	<i>konj</i>	конь
hunger	голод	<i>głód</i>	<i>hlad</i>	<i>glad</i>	гладь
husband	муж	<i>mąż</i>	<i>muž</i>	<i>muž</i>	мжжъ
iron	железо	<i>żelazo</i>	<i>železo</i>	<i>željezo</i>	желѣзо
king	король	<i>król</i>	<i>král</i>	<i>kralj</i>	краль
knife	нож	<i>nóż</i>	<i>nůž</i>	<i>nož</i>	ножь
know	знать	<i>znać</i>	<i>znáti</i>	<i>znati</i>	зная
leaf	лист	<i>liść</i>	<i>list</i>	<i>list</i>	листь
learn	учиться	<i>uczyć się</i>	<i>učiti se</i>	<i>učiti se</i>	уча се
man	человек	<i>człowiek</i>	<i>člověk</i>	<i>čovjek</i>	човѣкъ
meat	мясо	<i>mięso</i>	<i>maso</i>	<i>meso</i>	месо
milk	молоко	<i>mleko</i>	<i>mléko</i>	<i>mlijeko</i>	млѣко
night	ночь	<i>noc</i>	<i>noc</i>	<i>noć</i>	нощь
nose	нос	<i>nos</i>	<i>nos</i>	<i>nos</i>	нось
old	старый	<i>stary</i>	<i>starý</i>	<i>stari</i>	старъ
play	играть	<i>grać</i>	<i>hráti</i>	<i>igrati</i>	играя
read	читать	<i>czytać</i>	<i>čísti</i>	<i>čitati</i>	чета
rich	богатый	<i>bogaty</i>	<i>bohatý</i>	<i>bogat</i>	богаты
sea	море	<i>morze</i>	<i>moře</i>	<i>more</i>	море
see	видеть	<i>widzieć</i>	<i>viděti</i>	<i>vidjeti</i>	виждамъ
sister	сестра	<i>siostra</i>	<i>sestra</i>	<i>sestra</i>	сестра
sky	небо	<i>niebo</i>	<i>nebe</i>	<i>nebo</i>	небе
small	малый	<i>mały</i>	<i>malý</i>	<i>mali</i>	малтъкъ
son	сын	<i>syn</i>	<i>syn</i>	<i>sin</i>	синъ
tree	дерево	<i>drzewo</i>	<i>strom</i>	<i>drvo</i>	дърво
truth	правда	<i>prawda</i>	<i>pravda</i>	<i>istina</i>	истинна
water	вода	<i>woda</i>	<i>voda</i>	<i>voda</i>	вода
one	один	<i>jeden</i>	<i>jeden</i>	<i>jedan</i>	единъ
two	два	<i>dwa</i>	<i>dva</i>	<i>dva</i>	два
three	три	<i>trzy</i>	<i>tři</i>	<i>tri</i>	три
four	четыре	<i>cztery</i>	<i>čtyři</i>	<i>četiri</i>	четири
five	пять	<i>pięć</i>	<i>pět</i>	<i>pet</i>	петъ
six	шесть	<i>sześć</i>	<i>šest</i>	<i>šest</i>	шесть
seven	семь	<i>siedem</i>	<i>sedm</i>	<i>sedam</i>	седемъ

ten	десять	<i>dziesięć</i>	<i>deset</i>	<i>deset</i>	десеть
eleven	одиннадцать	<i>jedenaście</i>	<i>jedenáct</i>	<i>jedanaest</i>	единадесеть

twenty	двадцать	<i>dwadzieścia</i>	<i>dvacet</i>	<i>dvadeset</i>	двайцетъ
hundred	сто	<i>sto</i>	<i>sto</i>	<i>sto</i>	СТО
thousand	тысяч	<i>tysiąc</i>	<i>tisíc</i>	<i>hiljada</i>	хиляда

SAMPLES OF THE WRITTEN SLAVIC LANGUAGES (RUSSIAN, WHITE RUSSIAN, UKRAINIAN, BULGARIAN ARE GIVEN IN CYRILLIC CHARACTERS; SERBO-CROATIAN IS GIVEN IN THE CROATIAN VERSION, IN ROMAN CHARACTERS; POLISH, CZECH, SLOVAK, SLOVENIAN, WENDISH APPEAR IN THEIR RESPECTIVE ROMAN ORTHOGRAPHS).

John 3.16: "For God so loved the world that He gave His only-begotten Son, that whosoever believeth in Him may not perish, but may have everlasting life"

RUSSIAN: Ибо так возлюбил Бог мир, что отдал Сына Своего единородного, дабы всякий, верующий в Него, не погиб, но имел жизнь вечную.

WHITE RUSSIAN: Бо так палюбіў Бог сьвѣт, што аддаў Сына Свайго Адзінароднага, каб усякі, хто веруе ў Яго, ня згінуў, але меў жыцьцё вечнае.

UKRAINIAN: Так бо полюбив Бог сьвіт, що Сина свого Єдинородного дав, щоб кожен, віруючий в Него, не погиб, а мав життє вічне.

POLISH: Albowiem tak Bóg umiłował świat, że Syna swego jednorodzonego dał, aby każdy, kto weń wierzy, nie zginął, ale miał żywot wieczny.

CZECH: Nebo tak Bůh miloval svět, že Syna svého jednorozeného dal, aby každý, kdož věří v něho, nezahynul, ale měl život věčný.

SLOVAK: Lebo tak miloval Bôh svet, že svojho jednorodeného Syna dal, aby každý, kto verí v neho, nezahynul, ale mal večný život.

WEND (or LUSATIAN): Pschetož tak je Boh ton Sswjet lubowal, so won sswojeho jenicžkeho narodženeho Ssyna dal je, so bychu schitzy, kiž do njeho wjerja, shubeni nebyli, ale wjeczne žiwenje mjeli.

SERBO-CROATIAN (in Croatian orthography): Jer Bog toliko ljubi svet, da je i Sina svoga jedinorodjenoga dao, da ni jedan koji u njega veruje ne propadne, nego da ima život vječni.

SLOVENIAN: Kajti tako je Bog ljubil svet, da je dal Sina svojega edinorojenega, da se ne pogubi, kdorkoli veruje vanj, temuč da ima večno žvljenje.

BULGARIAN: Защото Богъ толкозъ обикна свѣта, че отдаде Своя Единороденъ Синъ, та всѣкой, който вѣрва въ Него, да не погине, а да има животъ вѣченъ.

POLISH

ALPHABETIC NOTATION — a, ą, b, c, ć, d, e, ę, f, g, h, i, j, k, l, ł, m, n, ó, o, ó, p, r, s, ś, t, u, w, y, z, ź, ż, ch, cz, dz, dź, dż, sz, rz, szcz.

NOTES ON SOUNDS — Vowels are of approximately equal length; a, e, i, o, u (ó) = respectively *father, met, machine, or, moon*. ą = nasalized or; ę = nasalized met (shut passage between nose and mouth at the same time that vowel is pronounced).

c = *its*;

ć, ci, cz = *church* (there are differences; *church* is only an approximation);

g = *go*;

j = *yes*;

l = *million*;

ł = *milk*; in sections of Poland, = *war*;

ń = *canyon*;

w = *vain*;

y = *pin*;

ź (zi), ż = *measure* (two variants of approximately same sound);

ch = German *ach*, but less guttural;

dź (dzi), dż = *jump* (two variants of approximately same sound);

rz = *s* in *measure*;

ś (si), sz = *ash* (two variants of approximately same sound);

szcz = *Ashchurch*.

The Polish stress normally falls on the *next to the last* syllable.

GRAMMATICAL SURVEY.

Nouns.

As in all Slavic languages there are three genders, masculine, feminine and neuter; but many inanimate objects are masculine or feminine. There is no article, definite or

indefinite¹: *król* may mean “king”, “a king”, “the king”. Generally, nouns ending in consonants are masculine, those ending in *-a* feminine, those ending in *-o* or *-e* neuter.

Polish has seven cases (nominative, genitive, dative, accusative, vocative, instrumental and locative). These cases appear in nouns, adjectives and pronouns, and there is no way of avoiding them. Polish nouns fall into several distinct declensional schemes, of which only a few samples can be given.²

Example of the declension of a masculine noun: *wuj*, “uncle”: *wuj*, *-a*, *-owi*, *-a*, *-u*, *-em*, *-u*; plural: *wuj-owie*, *-ów*, *-om*, *-ów*, *-owie*, *-ami*, *-ach*.³

1. *ten* (fem. *ta*, neut. *to*) is sometimes used with the value of “the”, but it is more often translated by “this”.

2. The endings of the seven cases will be given in the following order: nominative (case of subject); genitive (or possessive; translated into English by “of” or ‘s); dative (translated into English by “to”); accusative (case of the direct object); vocative (used in direct address: “Oh, my friend!”); instrumental (used with a variety of prepositions, especially “by”, “by means of”); locative (used to denote place where, “in”, “at”). These seven cases appear in all Slavic languages, with the exception of Bulgarian. The vocative for the most part has the same form as the nominative, while the accusative normally has the same form as the genitive in the case of *animate* persons or animals, as the nominative in the case of *inanimate* things. Cases are very much alive in the Slavic languages, and while an occasional slip may be forgiven, complete ignorance of case-endings is not tolerated.

3. Note that in this noun, denoting an *animate* person, the accusative has the same form as the genitive; if the noun denoted an *inanimate* object, even though masculine in gender, the accusative would have the same form as the nominative: e. g. *piec* (masc.) “stove”, acc. *piec*, not *pieca*. Note also that in Polish, when case endings are added the accent may shift from the root to the ending: thus, *wuja*, but *wujowie* (italics indicate syllable to be accented). This is due to the fact that the Polish rule of accentuation is to stress the next to the last syllable, regardless whether it is part of the root or of the ending.

Example of the declension of a feminine noun: *baba*, "old woman".

bab-a, -*y*, -*ie*, -*e*, -*o*, -*q*, -*ie*; plural: *bab-y*, - , -*om*, -*y*, -*y*, -*ami*, -*ach*.

Example of the declension of a neuter noun: *pole*, "field":

pol-e, -*a*, -*u*, -*e*, -*e*, -*em*, -*u*; plural: *pol-a*, *pól*, *pol-om*, -*a*, -*a*, -*ami*, -*ach*.

Adjectives.

These agree in gender, number, and *case* with the noun to which they refer. They also fall into distinct declensional schemes, of which only one type can be given here: *dobry*, "good":

			Animate	Inanimate	Masc. Pl.;
Masc. Sg.	Fem. Sg.	Neut. Sg.	Masc. Pl.	Fem. and Neut. Pl.	

<i>dobry</i>	-a	-e	-zy	-e
- <i>ego</i>	- <i>ej</i>	- <i>ego</i>	- <i>ych</i>	- <i>ych</i>
- <i>emu</i>	- <i>ej</i>	- <i>emu</i>	- <i>ym</i>	- <i>ym</i>
- <i>ego</i> (- <i>y</i>)	- <i>q</i>	- <i>e</i>	- <i>ych</i>	- <i>e</i>
- <i>y</i>	- <i>a</i>	- <i>e</i>	- <i>zy</i>	- <i>e</i>
- <i>ym</i>	- <i>q</i>	- <i>ym</i>	- <i>ymi</i>	- <i>ymi</i>
- <i>ym</i>	- <i>ej</i>	- <i>ym</i>	- <i>ych</i>	- <i>ych</i>

Comparative and superlative forms of the adjectives are also fully declined. The comparative usually inserts -*sz*- between the root and the ending, while the superlative normally prefixes *naj-* to the comparative: *star-y*, "old"; *star-sz-y*, "older"; *naj-star-sz-y*, "oldest".

The adverb is generally formed by replacing the -*y* or -*i* of the masculine singular nominative adjective ending by -*o* or -*e*, respectively: *wolny*, "slow"; *wolno*, "slowly".

Pronouns.

These are all fully declined, in seven cases. Where the declension is given, the order of the cases is the same as for nouns

Personal.

"I", "of me", "to me", "me", etc.: *ja, mnie, mnie, mię* or
mnie, - , mną, mnie;

"we", "of us", etc.: *my, nas, nam, nas, - , nami, nas;*

"you" (familiar singular): *ty, ciebie, tobie, ciebie* or *cię, ty,*
tobą, tobie;

"you" (fam. pl. and polite sg.): *wy, was, wam, was, wy, wami,*
was;

"he", "his", "to him", etc.: *on, jego, jemu, jego, - , nim, nim;*

"she", "her", "to her", etc.: *ona, jej, jej, ją, - , nią, niej;*

"it", "its", "to it", etc.: *ono, jego, jemu, je, - , nim, nim;*

"they", "of them", etc. (masc. and fem.): *oni, ich, im, ich, - ,*
nimi, nich;

"they", etc. (neuter): *one, ich, im, je, - , nimi, nich.*

Possessive (fully declined, in seven cases).

"my": *mój, fem. moja, neut. moje;*

"your" (fam. sg.): *twój, twoja, twoje;*

"his", "her", "its", "their": *swój, swoja, swoje;*

"our": *nasz, nasza, nasze;*

"your" (plural and polite singular): *wasz, wasza, wasze.*

Demonstrative (fully declined, in seven cases).

"this", "these": *ten, ta, to;* plural: *ci, te, te;*

"that", "those": *tamten, tamta, tamto;* plural: *tamci, tamte,*
tamte.

Relative and Interrogative (fully declined).

"who", "whose", "whom": *kto* (gen. *kogo*, dat. *komu*, acc.
kogo, instr. and loc. *kim*);

"what", "which", "that": *co* (gen. *czego*, dat. *czemu*, acc. *co*,
instr. and loc. *czym*).

Verbs.

These display the customary Slavic poverty of tenses, coupled with the complication of "aspects". The infinitive usually ends in *-ć*: *kochać*, to love.

The present indicative generally adds the endings *-m*, *-sz*, *-*, *-my*, *-cie*, *-(j)ą* to the root, which is found by dropping the *-ć* of the infinitive: *kocham*, *kochasz*, *kocha*, *kochamy*, *kochacie*, *kochają*, I love, you love, etc. The present of *być*, "to be", is: *jestem*, *jestes*, *jest*, *jestemy*, *jesteście*, *są*.

The past participle is formed by adding to the stem the suffixes *-ł* (masc.), *-ła* (fem.), *-ło* (neut.), *-li* (masc. plural), *-ły* (fem. and neut. pl.): *kochał*, *kochała*, *kochało*, *kochali*, *kochały*, loved.

The past tense is formed by adding the suffixes *-m*, *-ś*, *-*, *-śmy*, *-ście*, *-*, to the past participle in the appropriate form: thus, I loved (masculine "I"), *kochałem*; (feminine "I"), *kochałam*; he loved, *kochał* (past part. without ending); she loved, *kochała*; it loved, *kochało*; we loved, *kochaliśmy* (fem. *kochałyśmy*); they loved, *kochali* or *kochały*.

The past tense of *być* is: *byłem* (fem. *byłam*); *byłeś* (f. *byłaś*); *był* (f. *była*, neut. *było*); *byliśmy* (neut. *byłyśmy*); *byliście* (*byłyście*); *byli* (*były*).

A present perfect tense is formed by combining the past of the verb with the past of *być*: *kochałem był* (fem. *kochałam była*), I have loved.

The future of *być* is: *będę*, *będziesz*, *będzie*, *będziemy*, *będziecie*, *będa*. Other verbs form their future by combining this future of *być* with their past participle or infinitive (both forms are current): I shall love, *będę kochał* (*kochała*), or *będę kochać*.

Other tenses include a present and a past conditional (the former is formed by inserting *-by-* between the participle and the personal ending: *kochał-by-m*, I should love; the latter by adding to the present conditional the past of *być*: *kochałbym był*, I should have loved); an imperative (*kochaj*, love thou!; *kochajcie*, love ye!, *kochajmy*, let us love); and several participles (*kochając*, loving; *kochał*, loved; *kochawszy*, having loved; *kochany*, being loved; *mając kochać*, about to love); and a gerund (*kochanie*, loving).

A complete passive voice appears, formed by means of

the verb *być* combined with the passive past participle, which ends in *-ny* or *-ty*: *jestem kochany*, I am loved; *byłem bity*, I was beaten; *będę chwalony*, I shall be praised.

IDENTIFICATION

In spoken form, Polish can be isolated from its kindred Slavic languages by reason of its constant accent on the next to the last syllable, as well as by its nasal sounds (ą, ę), which appear in no other modern language of the group. In written form, Polish is distinguished: 1. by the fact that it uses the Roman alphabet; this distinguishes it at once from Russian, Ukrainian, Serbian, Bulgarian, and restricts the possibility of confusion to Czech, Slovak, Croatian or Slovenian; 2. by its distinctive characters, ą, ę, ł, which appear in no other Slavic tongue; other fairly distinctive symbols of Polish are ń, ś, ź, ż; 3. by certain fairly distinctive consonant combinations: *dz, dź, dż, rz, szcz.* Polish alone, among the national Slavic tongues, uses *w*.

WORDS AND PHRASES

pan, pani, panna, "sir" (Mr.), "madam" (Mrs.), "Miss"
czy Pan mówi po polsku?, "do you speak Polish?"
rozumiem trochę, "I understand a little"
tak, "yes" *nie*, "no", "not" *proszę*, "please"
dziękuję, "thank you"
dzień dobry, "good morning"
dobranoc, "good night"
jak się Pan ma?, "how are you?"
jak się Pan nazywa?, "what is your name?"
przepraszam, "excuse me"
dobry wieczór, "good evening"
do widzenia, "good-bye"
kto tam jest? "who is there?"
która godzina teraz?, "what time is it?"
jest trzecia godzina, "it is three o'clock"

niema za co, "don't mention it"
czy pan rozumie?, "do you understand?"
nie rozumiem, "I don't understand"
ile (to kosztuje)?, "how much?"
to za drogo, "too much"
bardzo, "very much"
jak się idzie do —?, "which is the way to —?"
gdzie jest —?, "where is —?"
na zdrowie!, "to your health!"
przynies mi, "bring me"
mów powoli, łaskawie mówić powoli, "speak more slowly"
dobrze, "all right"
jestem chory, "I am ill"

SAMPLE OF WRITTEN POLISH; USE FOR PRACTICE READING

"Kelner, proszę mi dać kartę; jestem bardzo głodny."
 — "Zaraz ją przyniosę, proszę Pana." — "Proszę mi przynieść kapuśniak i sztukę mięsa; chcę wołowinę smażoną."
 — "Mięso jest twarde dzisiaj, proszę Pana." — "Czy ma Pan pieczoną kurę?" — "Tak, Panie, mamy." — "A teraz przynieś mi Pan piwa." — "Proszę zrobić rachunek. Ile się należy?" — "Dziewięćdziesiąt centów." — "Tu jest coś dla was." — "Dziękuję Panu."

TRANSLATION

"Waiter, please give me the bill of fare; I am very hungry." — "I'll bring it at once, (please) Sir." — "Please bring me some cabbage soup and boiled beef; I want the beef well done." — "The meat is tough today, (please) Sir." — "Have you roast chicken?" — "Yes, Sir, we have." — "And now bring me some beer." — "Please make out the bill. How much is it?" — "Ninety cents." — "Here is something for you." — "Thank you, Sir."

CZECH

ALPHABETIC NOTATION — a, á, b, c, č, d, ḍ, e, ě, f, g, h, ch, i, í, j, k, l, m, n, ň, o, ó, p, r, ř, s, š, t, ť, u, ú, ů, v, y, ý, z, ž.

NOTES ON SOUNDS — Vowels bearing the accent mark are definitely long; the others are definitely short. There is not much difference in *quality* between any long vowel and its corresponding short; sound a, e, i, o, u as *father, met, machine, obey, pool*, prolonged or shortened, according as they bear or do not bear the accent mark.

c = *its*;

č = *church*;

ḍ = *did you*;

ě = *yes*;

g = *go*;

ch = German *ach*;

j = *year*;

ň = *canyon*;

ř = r combined with s in measure;

š = *sure*;

ť = *hit you*;

ú, ů = *food*;

y = rhythm, long or short, according as it bears or does not bear accent mark;

ž = measure.

The Czech accent is normally on the *initial* syllable of the word. The accent mark indicates length of a vowel, not the place where the stress falls.

GRAMMATICAL SURVEY.

The grammatical structure is very similar to that of Polish. The same seven cases appear, for nouns, adjectives and pronouns, and they very frequently correspond to the Polish forms. The same holds true for verb-forms.

There is no article, definite or indefinite.

Example of the declension of a masculine noun: *had*, "snake": *had*, -*a*, -*ovi* (or -*u*), -*a*, -*e*, -*em*, -*ovi* (or -*u*); plural: *had-i* (or -*ové*), -*ů*, -*ům*, -*y*, -*i* (or -*ové*), -*y*, -*ech*.

Example of the declension of a feminine noun: *ryba*, "fish": *ryb-a*, -*y*, -*ě*, -*u*, -*o*, -*ou*, -*ě*; plural: *ryb-y*, - , -*ám*, -*y*, -*y*, -*ami*, -*ách*.

Example of the declension of a neuter noun: *město*, "town": *měst-o*, -*a*, -*u*, -*o*, -*o*, -*em*, -*u*; plural: *měst-a*, - , -*ům*, -*a*, -*a*, -*y*, -*ech*.

Example of the declension of an adjective: *dobrý*, "good":

Mas. Sg.	Fem. Sg.	Neut. Sg.	Mas. Pl.	Fem. Pl.	Neut. Pl.
<i>dobr-ý</i>	- <i>á</i>	- <i>é</i>	<i>dobř-i</i>	<i>dobr-é</i>	<i>dobr-á</i>
- <i>ého</i>	- <i>é</i>	- <i>ého</i>	<i>dobr-ých</i>	- <i>ých</i>	- <i>ých</i>
- <i>ému</i>	- <i>é</i>	- <i>ému</i>	- <i>ým</i>	- <i>ým</i>	- <i>ým</i>
- <i>ého</i>	- <i>ou</i>	- <i>é</i>	- <i>é</i>	- <i>é</i>	- <i>á</i>
- <i>ý</i>	- <i>á</i>	- <i>é</i>	<i>dobř-i</i>	<i>dobr-é</i>	<i>dobr-á</i>
- <i>ým</i>	- <i>ou</i>	- <i>ým</i>	<i>dobr-ými</i>	- <i>ými</i>	- <i>ými</i>
- <i>ém</i>	- <i>é</i>	- <i>ém</i>	- <i>ých</i>	- <i>ých</i>	- <i>ých</i>

The verb *býti*, "to be":

Present: *jsem*, *jsi*, *jest* (*je*), *jsme*, *jste*, *jsou*;

Past Participle: *byl* (fem. *byla*, neut. *bylo*; mas. pl. *byli*, fem. pl. *byly*);

Past: *byl jsem*, *byl jsi*, *byl* (*byla*, *bylo*); *byli jsme*; *byli jste*, *byli* (*byly*);

Future: *budu*, *budeš*, *bude*, *budeme*, *budete*, *buďou*;
mluviti, "to speak":

Present: *mluví-m*, -*š*, - , -*me*, -*te*, -;

Past: *mluvil jsem*; Future: *budu mluvit*.

IDENTIFICATION

In spoken form, Czech is identified by its initial stress and by long but unaccented vowel-sounds. In written form, Czech is distinguished: 1. by the fact that it uses the Roman

alphabet; 2. by its distinctive characters *ě, ů, ř*, which do not appear in Polish or Croatian; 3. by the large number of characters with hooks over them; Croatian shares this characteristic (*č, š, ž*), but note that Czech has *ď, ň, ť*, while Croatian has *dj* (or *đ*) *nj, ć*. It is easy to distinguish Czech from Polish by the distinctive characters of the two languages (Polish *ą, ę, ł, ź*; Czech *ě, ů, ř*); by the fact that Polish uses accents over consonants (*ć, ń, ś, ź*), while Czech uses hooks (*č, ň, š, ž*); by the fact that Polish uses consonant *combinations* (*cz, dz, sz, rz, szcz*) which never appear in Czech; and by the Polish use of *w* as against the Czech use of *v*.

WORDS AND PHRASES

dobrý den, "good day"; *dobré ráno*, "good morning"
dobrou noc, "good night"; *dobrý večer*, "good evening"
nazdar, "to your health, good luck"
mám hlad, "I am hungry"
kolik je hodin?, "what time is it?"
jest šest hodin, "it is six o'clock"
děkuji, "thank you"; *buď te vítán*, "you're welcome"
prosím, "please"
pán, "sir"; *paní*, "madam"; *slečna*, "miss"
jak se máte?, "how are you?"; *velmi dobře*, "very well"
sbohem, (or *s Bohem*) "good-bye"
dovolte, promiňte, "excuse me"
rozumíte?, "do you understand?"
nerozumím, "I don't understand"
ano, "yes" *ne*, "no"
kolik?, "how much?"
kudy se jde do —?, "which is the way to —?"
kde je —?, "where is —?"
mluvíte anglicky?, "do you speak English?"
mluvte pomaleji, "speak more slowly"

SERBO-CROATIAN

ALPHABETIC NOTATION⁴ — a, b, v, g, d, dj (đ), e, ž, z, i, j, k, l, lj, m, n, nj, o, p, r, s, t, ć, u, f, h, c, č, dž, š.

NOTES ON SOUNDS — Vowels in Serbo-Croatian are long or short, but the fact is not usually indicated in writing. The following accent marks are occasionally used to indicate two degrees of length plus a rising or falling intonation: ` , ` , ´ , ˘. g = go; dj = did you; ž = measure; j = yes; lj = million; nj = onion; ć = hit you; c = its; č = church; dž = John; š = sure.

There is no definite rule of accentuation in Serbo-Croatian, but in words of more than one syllable the stress never falls on the last, although the vowel of the last syllable may be quite long, especially in genitive plural endings and in certain verb-forms.

GRAMMATICAL SURVEY.

The general structure is similar to that indicated for Polish. The cases of nouns, adjectives and pronouns often correspond in form and use, as also do verb-forms.

Example of the declension of a masculine noun: *jelen*, "deer": *jelen*, -a, -u, -a, -e, -om, -u; plural: *jelen-i*, -a, -ima, -e, -i, -ima, -ima.

Example of the declension of a feminine noun: *žena*, "woman": *žen-a*, -e, -i, -u, -o, -om, -i; plural: *žen-e*, -a, -ama, -e, -e, -ama, -ama.

Example of the declension of a neuter noun: *polje*, "field": *polj-e*, -a, -u, -e, -e, -em, -u; plural: *polj-a*, -a, -ima, -a, -a, -ima, -ima.

4. This is given in the Croatian version (Roman alphabet); Serbian uses Cyrillic characters, as follows: а, б, в, г, д, ђ, е, ж, з, и, ј, к, л, љ, м, н, њ, о, п, р, с, т, ћ, у, ф, х, ц, ч, џ, ш.

Example of the declension of an adjective: *dobri*, "good":

	Mas. Sg.	Fem. Sg.	Neut. Sg.	Mas. Pl.	Fem. Pl.	Neut. Pl.
<i>dobr-i (dobar)</i>	<i>-a</i>	<i>-o</i>	<i>-ī</i>	<i>-e</i>	<i>-a</i>	
<i>-oga</i>	<i>-e</i>	<i>-oga</i>	<i>-ih</i>	<i>-ih</i>	<i>-ih</i>	
<i>-ome</i>	<i>-oj</i>	<i>-ome</i>	<i>-im</i>	<i>-im</i>	<i>-im</i>	
<i>-oga</i>	<i>-u</i>	<i>-o</i>	<i>-e</i>	<i>-e</i>	<i>-a</i>	
<i>-i</i>	<i>-a</i>	<i>-o</i>	<i>-i</i>	<i>-e</i>	<i>-a</i>	
<i>-im</i>	<i>-om</i>	<i>-im</i>	<i>-im</i>	<i>-im</i>	<i>-im</i>	
<i>-om</i>	<i>-oj</i>	<i>-om</i>	<i>-im</i>	<i>-im</i>	<i>-im</i>	

The verb *biti*, "to be":

Present: (*je*)*sam*, (*je*)*si*, *je* (or *jest*), (*je*)*smo*, (*je*)*ste*, (*je*)*su*.

Past: *beh*, *beše*, *beše*, *besmo*, *beste*, *behu*; or *sam bio* (*bila*), *si bio*, etc.

Future: *biću*, *bićeš*, *biće*, *bićemo*, *bićete*, *biće*.

The verb *čitati*, "to read":

Present: *čita-m*, *-š*, *-*, *-mo*, *-te*, *-ju*.

Past: *čita-h*, *-še*, *-še*, *-smo*, *-ste*, *-hu*.

Present Perfect: *sam*, *si*, *je čitao* (*čitala*); *smo*, *ste*, *su čitali* (*čitale*).

Future: *ću*, *ćeš*, *će*, *ćemo*, *ćete*, *će čitati*; or *čitaću*, *čitaćeš*, *čitaće*, etc.

IDENTIFICATION

A more melodious intonation than appears in other Slavic languages is noticeable in Serbo-Croatian. An accentuation which is never final, often (but not exclusively) initial, never exclusively penultimate, also serves to identify the spoken form. In writing, Croatian uses the Roman alphabet; it may be distinguished from Polish and Czech by its use of the combinations *dj*, *lj*, *nj*. Serbian uses the Cyrillic alphabet, and can be distinguished from Russian and Bulgarian by its use of the symbols *ђ*, *ћ*, *ѣ*, *љ*, *џ*, *ј*.

WORDS AND PHRASES

govorite li srpski?, "do you speak Serbian?"
dobar dan, "good day"
ne govorite tako brzo, "don't speak so fast"
dobro jutro, "good morning"
kako ste, gospodjice?, "how are you, young lady?"
vrlo dobro, "quite well"
lijepo je vrijeme, "it's fine weather"
dobra večer, "good evening"
imate li dobrog vina?, "have you some good wine?"
laku noć, "good night"
ručak je gotov, "dinner is ready"
u vaše zdravlje, "to your health"
koliko je sati?, "what time is it?"
sad je osam sati, "it is 8 o'clock".
izvinite, "excuse me"
z Bogom, "good-bye"
molim vas, "please"
hvala, "thank you"
nema zašto, "don't mention it"
koliko ovo iznosi?, "how much is this?"
to je i suviše, "it's too much"
razumete li?, "do you understand?"
ne razumem, "I don't understand"
da (ne), gospodine, "yes (no), sir"
kuda se ide ka —?, "which is the way to —?"
gde je —?, "where is —?"
donesite mi, "bring me"
zar ne?, "isn't it so?"
govorite polako, "speak more slowly"
slobodno, "come in"
žao mi je, "I'm sorry"
možda, "maybe"
bolestan sam, "I'm ill"

BULGARIAN

ALPHABETIC NOTATION (in Cyrillic script; see Cyrillic chart, p. 355-357):

а, б, в, г, д, е, ж, з, и, й, к, л, м, н, о, п, р, с, т, у, ф, х, ц, ч, ш, щ, ъ, ь, ѳ, ю, я, ж.

NOTES ON SOUNDS — Vowels have no distinctive length or shortness.

г = go; ж = measure; е = there; ц = its; ч = church; ш = sure; щ = Ashton; ъ = but; however, it is silent at the end of a word; ь is always silent; ѳ = yes (occasionally yard); я = yard; ю = you; ж = but.

There is no special rule of accentuation, but, unlike Serbo-Croatian a word may have the accent on the last syllable. The syllable on which the accent falls is not indicated in writing, and must be learned for each separate word.

GRAMMATICAL SURVEY.

Bulgarian differs radically from all other Slavic tongues: 1. in having a full-fledged definite article; 2. in having reduced all case-forms to a single form (with, often, a separate vocative, and a few traces of other old cases).

The Bulgarian article is placed *after* the noun, and is attached to it. Its forms are: masc. sg., тѣ; fem. sg., та; neut. sg., то; plural: masc., тѣ; fem., тѣ; neut. та.

приятель, friend, a friend; приятельтъ, the friend; приятели, friends; приятелитѣ, the friends;

глава, head, a head; главата, the head; глави, heads; главитѣ, the heads;

село, village, a village; селото, the village; села, villages; селата, the villages.

Adjectives follow these schemes, and if they precede the noun, the article is attached to them: добриятъ братъ, the good brother; братътъ е добъръ, the brother is good; добрата майка, the good mother; майката е добра,

the mother is good; ДОБРОТО ВИНО, the good wine; ВИНОТО е добро, the wine is good; in the plural a single form is used for all genders, even the article assuming a single form: ДОБРИТЪ ПРИЯТЕЛИ, the good friends; ДОБРИТЪ МАЙКИ, the good mothers; ДОБРИТЪ ВИНА, the good wines.

The Bulgarian verb has all the complications that appear in other Slavic tongues, plus a number of tenses, both simple and compound, which no longer appear in the others (Imperfect, Pluperfect, Future Perfect, etc.). The verb "to be" has the following present tense:

СЪМЪ, СИ, Е, СМЕ, СТЕ, СЖ

The verb "to call" has the following present:

ВИКАМЪ, ВИКАШЪ, ВИКА, ВИКАМЕ, ВИКАТЕ, ВИКАТЬ

IDENTIFICATION

Bulgarian appears in Cyrillic characters. It may be distinguished from Russian by the presence of the symbols Ъ, Ь, which modern Russian has discarded, and, particularly, of the symbol Ж. The constant appearance of the endings -ТЪ, -ТА, -ТО, -ТЪ, -ТА (suffixated definite articles) also serves to inform the reader or hearer that he is dealing with Bulgarian. In speech, the fairly frequent final stress of Bulgarian will serve to distinguish it from Polish, Czech and Serbo-Croatian, though not from Russian.

WORDS AND PHRASES

азъ говоря български, "I speak Bulgarian"

все едно, "it's all the same to me"

колко е часътъ, "what is the time?"

часътъ е три, "it's 3 o'clock"

кажи де, "tell me"

внимавай!, "look out!"

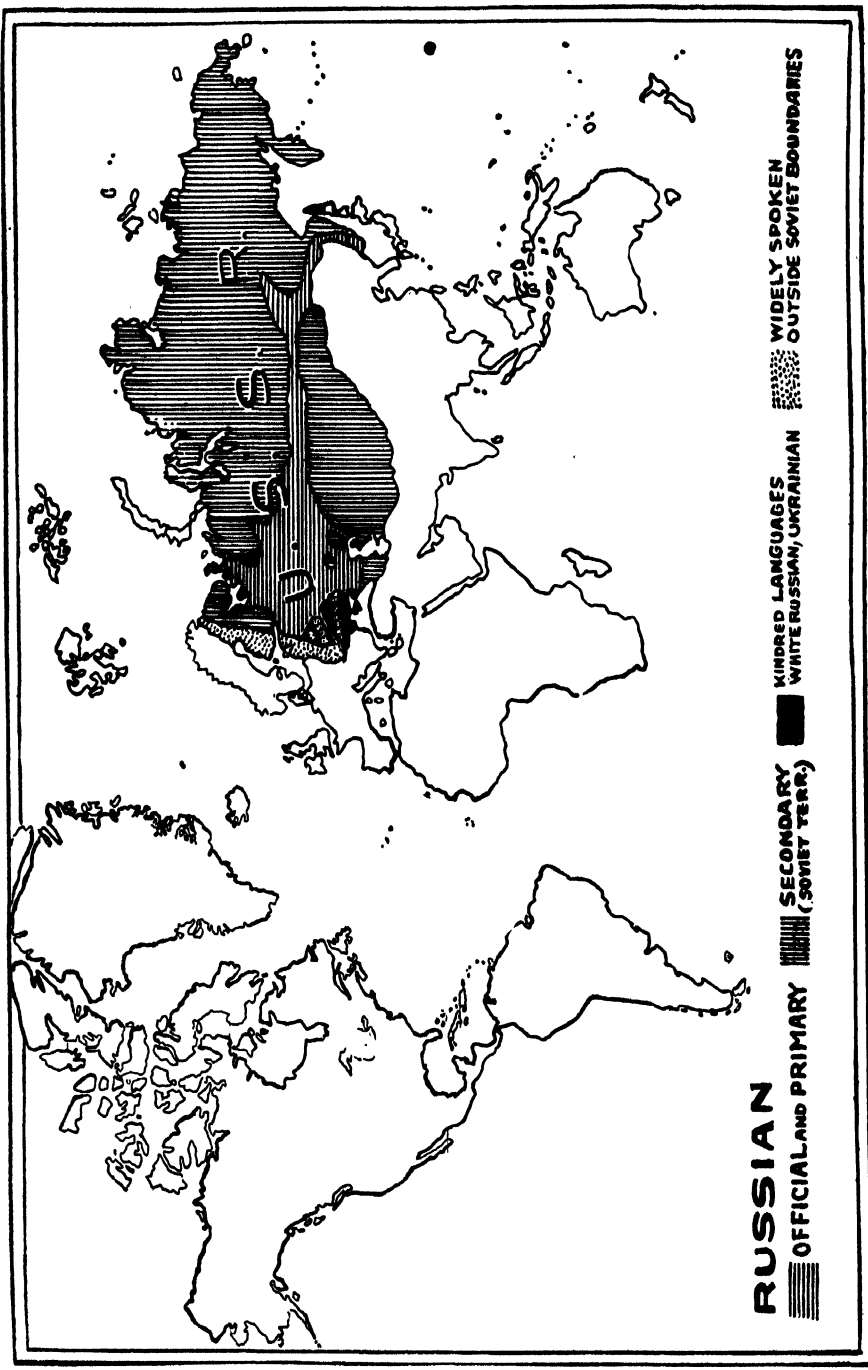

сбогомъ, "good-bye"

добъръ день, "good day"

добро утро, "good morning"

добра вечеръ, "good evening"

лека нощъ, "good night".

 OFFICIAL AND PRIMARY

SECONDARY
 (SOVIET TERR.)

KINDRED LANGUAGES
 WHITE RUSSIAN, UKRAINIAN

WIDELY SPOKEN
 OUTSIDE SOVIET BOUNDARIES

CHAPTER XI

RUSSIAN

SPEAKERS AND LOCATION

(All Population Figures Are Approximate)

Russian is the chief language of the Soviet Union, with a population of 171,000,000 (131,000,000 in Europe, 40,000,000 in Asia). Russian proper (or Great Russian) is spoken as a primary language by about 100,000,000, and if its kindred tongues, Ukrainian and White Russian, are included, by over 130,000,000. It is spoken as a secondary language by over half of the remaining population of the Soviet Union, and by large numbers of people in territories once subject to Russia (Finland, Estonia, Latvia, Lithuania, Poland, Bessarabia). The liberal linguistic and cultural policy of the Soviet Union has made many lesser tongues of the Union co-official with Russian (Ukrainian, White Russian, Georgian, Armenian, etc.). Russian settlers have, however, spread the use of Russian throughout Asiatic Russia, particularly along central Siberia, to the far eastern provinces and Vladivostok. The number of nationalities in the Soviet Union is listed at 49 basic ones (over 20,000 members), and 100 smaller ones (less than 20,000). Ukrainian speakers account for some 28,000,000; White Russian speakers are about 5,000,000. Both these languages are at least partly comprehensible to Russian speakers. The number of Russian speakers outside of Europe and Asia is not considerable, though some millions of people of Russian origin have settled in the Western Hemisphere (they come, however, largely from territories where Great Russian is not the primary tongue).

Щщ Ээ Юю Яя ь ы й ъ
Щщ Ээ Юю Яя ь ы й ъ

1. The older Russian alphabet, used under the Tsars, contained also: the letter *i*, interchangeable in value, but not in use, with *и*; *i* was used regularly in connection with another vowel (Россія, today spelled Россия); the letter *ѣ*, which was silent, but served to indicate a "hard", or non-palatal pronunciation of the preceding consonant; it appeared for the most part at the end of words, very seldom within the word; in the latter position, which is exceedingly rare, it has been retained; the letter *ѥ*, interchangeable in value, but not in use, with *е*; the letters *ѵ* and *ѥ*, interchangeable in value, respectively, with *и* and *ф*, and used in religious words borrowed from the Greek (сѵнод, synod; каѣдра, pulpit). See also Cyrillic alphabet, p. 355-357.

Vowel Sounds.

a = father (stressed); bacon, (unstressed): карандаш,² pencil;

e = yes (more or less distinct, according as it is stressed or unstressed): ЕСТЬ, to eat; еда, food;

ë = Yorick³: МЁД, honey;

и = machine: ИМЯ, name;

й = May (this character is never used after a consonant).
Май, May;

o = or (stressed); bacon (unstressed): хорошО, well:

y = food: ухО, ear;

ы = rhythm (this sound has no exact equivalent in English; it is best described as an attempt to pronounce feed with the front part of the mouth and food with the back of the tongue, at the same time): быЛ, was;

э = met: этОТ, this;

ь has no value of its own, but serves to palatalize the preceding consonant: говОРИТЬ, to speak;

ю = you: люблю, I love;

я = yard: ярмарка, village fair; язык, tongue.

It is to be noted that all Russian vowels tend to have a less distinct enunciation when unstressed than when stressed; this is particularly noticeable in the case of **a** and **o**, which have practically the sound of the when unstressed (they are clearer in the syllable immediately preceding the stressed syllable).

2. The position of the accent does not appear in written Russian; the stressed vowel, in words of more than one syllable, is indicated throughout this chapter, for the convenience of the reader, by the use of heavy type.

3. **ë** is always stressed; the stress will therefore not be indicated on words containing **ë**; written Russian (save in children's books) does not generally use the double dot on **ë**, with the result that beginners are often left in doubt whether **ë** or **e** is indicated.

Consonant Sounds.

б, в, д, з, к, л, м, н, п, т, ф, approximately like English b, v, d, z, k, l, m, n, p, t, f, respectively.⁴

г = *go*: МНОГО, much, many;⁵

ж = *measure*: жена, wife;

р = British *very*: Россия, Russia;

с = *so*, in *all* positions: союз, union, alliance;

х = German *ach*: храбрый, brave; худой, bad;

ц = *its*: церковь, church;

ч = *chill*: чёрный, black;

ш = *sure*: шесть, six;

щ = *Ashchurch*; борщ, beet soup; щека, cheek; женщина, woman.

There is no rule for Russian accentuation, and the place of the accent is not ordinarily indicated in writing. The stress may fall on *any* syllable, and each word must be learned with its own stress; furthermore, the stress *in the same word* often changes position according to the case-form used (мужик, peasant; but мужика, of the peasant), and from the singular

4. Russian consonants, however, tend to become palatalized when followed by vowels containing the *y*-sound as their first element (е, ё, и, ь, ю, я). In many cases the palatalization is instinctive for an English speaker; thus, в followed by a "hard" vowel (а, о, у, ы, э) will naturally assume the sound of *invoke*, while if it is followed by a "soft" vowel (е, ё, и, ь, ю, я) it will naturally assume the sound of *view*; б will be pronounced as in *booty* or as in *beauty*, respectively; п as in *pat* or in *pure*, etc. In the case of т, д, л, н, the "soft" pronunciation, when one of the "soft" vowels follows, will go as far as *hit you*, *did you*, *million*, *onion*, respectively (теперь, now; делать, to do; любовь, love; день, day).

5. Final *voiced* consonants (б, в, г, д, з, ж) tend to assume the corresponding *unvoiced* pronunciation (р, ф, к, т, с, ш); thus, зуб, tooth, is pronounced *zoop*; Романов (a family name), *Románof*; друг, friend, *drook*; дед, grandfather, *dyet*; раз, time, *ras*; муж, husband, *moosh*.

to the plural (вода, water, but воды, waters). While a misplaced accent is not an unforgivable crime, some care should be taken to avoid too many wrong accentuations.

SAMPLE OF WRITTEN RUSSIAN; USE FOR PRACTICE READING.

Мальчик рано начал учиться и с ранних лет полюбил книги, в которых описывались войны и походы. Пятнадцати лет молодой Суворов поступил на военную службу, и девять лет прослужил простым солдатом. Не было солдата исправнее его: он вставал раньше других, сам чистил себе сапоги и платье и стоял на часах во всякую погоду. Жил он вместе с простыми солдатами и ел солдатские щи и кашу; был всегда смел и весел и смешил своих товарищей весёлыми шутками и рассказами. Все любили его. Когда он стал офицером и начал командовать солдатами, всюду на войне он побеждал неприятеля. “Ребята,” говорил Суворов солдатам, “всегда идите вперёд на врага. Не беспокойтесь о том, сколько перед вами неприятелей. Вы ведь пришли бить их, а не считать.”

GRAMMATICAL SURVEY

1. — *Nouns.*

Russian has no article, definite or indefinite; друг means “friend”, “a friend”, “the friend”.

There are three genders, masculine, feminine and neuter; but inanimate objects are often masculine or feminine. The ending generally helps to determine the gender of a noun. Nouns ending in consonants or -й are generally masculine, those ending in -а or -я (and most of those ending in -ь) feminine, those in -о, -е or -мя neuter.

Russian has six cases: nominative, genitive, dative, accusative, instrumental, and locative or prepositional (a separate vocative appears in a few words only, and need not be considered). These cases and their endings are alive, and have to be reckoned with; while an occasional error in case or ending is forgivable, too many such errors will make the language incomprehensible to the native.

There are numerous declensional schemes, but the following are the most common. The endings are given in the order indicated above.

Masculine Nouns.

Singular: —, -а, -у, -а or —,⁵ -ом, -е;

Plural: -ы, -ов, -ам, -ов or -ы,⁶ -ами, -ах.

(Decline thus: офицер, офицера, etc., officer; стол, стола, etc., table; отец, отца, etc., father).

Singular: -й, -я, -ю, -я or -й, -ем, -е;

Plural: -и, -ев, -ям, -ев or -и, -ями, -ях.

(Decline thus: герой, героя, etc., hero).

Singular: -ь, -я, -ю, -я or -ь, -ем, -е;

Plural: -и, -ей, -ям, -ей or -и, -ями, -ях.

(Decline thus: приятель, приятеля, etc., friend; рубль, рубля, etc., rouble).

Feminine Nouns.

Singular: -а, -ы, -е, -у, -ою (-ой), -е;

Plural: -ы, —, -ам, — or -ы, -ами, -ах.

(Decline thus: женщина, женщины, etc. woman; война, войны, etc.; plural войны, etc., war).

6. Masculine nouns in both singular and plural, and feminine nouns in the *plural only* make their accusative form coincide with the genitive if a living person or animal is denoted, with the nominative if an inanimate object appears; thus, the accusative of офицер and отец is офицера and отца, respectively; but the accusative of стол is стол.

Singular: -я, -и, -е, -ю, -ею (-ей), -е (if nominative has и before я, dative and prepositional have -и instead of -е);

Plural: -и, -ь, -ям, -ь or -и, -ями, -ях.

(Decline thus: пустыня, пустыни, etc., desert; Россия, Russia).

Singular: -ь, -и, -и, -ь, -ью, -и;

Plural: -и, -ей, -ям, -ей or -и, -ями, -ях.

(Decline thus: постель, постели, etc., bed; дверь, двери, etc.; plural двери, but дверей, дверям, etc., door).

Neuter Nouns.

Singular: -о, -а, -у, -о, -ом, -е;

Plural: -а, —, -ам, -а, -ами, -ах.

(Decline thus: масло, масла, etc., butter; место, места, etc., plural места, etc., place; село, села, etc., plural сёла, etc., village).

Singular: -е, -я, -ю, -е, -ем, -е (-и if nom. ends in -ие);

Plural: -я, -ей (-ий if nom. sg. ends in -ие), -ям, -я, -ями, -ях.

(Decline thus: море, моря, etc., plural моря, etc., sea; поле, поля, etc.; plural поля, etc., field; здание, здания, etc., building).

Singular: -мя, -мени, -мени, -мя, -менем, -мени;

Plural: -мена, -мен, -менам, -мена, -менами, -менах.

(Decline thus: время, времени, etc.; plural времена, времён, etc., time; имя, имени etc.; plural имена, имён, etc., name).

These schemes are perhaps less complicated than they appear at first glance. Note that in neuter nouns, and in masculine nouns denoting inanimate objects, the accusative has the same form as the nominative, while in masculine nouns denoting living things it has the same form as the genitive; note also the almost invariable -ом, -ем of the instrumental singular, the -е of the prepositional singular, the -ам or -ям of the dative plural, the -ами or -ями of the instrumental plural, and the -ах or -ях of the prepositional plural. Note

also that in neuter nouns the accent of the plural is usually on a different syllable from that of the singular.

2. — *Adjectives and Adverbs.*

Adjectives agree in number, gender and case with the nouns they modify. The following is the most common scheme of adjective declension:

	Singular			Plural
	Masc.	Fem.	Neut.	(all genders)
Nom.	-ЫЙ	-ая	-ое	-ЫЕ
Gen.	-ОГО ⁷	-ОЙ	-ОГО	-ЫХ
Dat.	-ОМУ	-ОЙ	-ОМУ	-ЫМ
Acc.	-ОГО	-ЮЮ	-ое	Genitive or Nominative, according as the noun is living or inanimate
or	-ЫЙ			
Instr.	-ЫМ	-ОЙ (-ОЮ)	-ЫМ	-ЫМИ
Loc.	-ОМ	-ОЙ	-ОМ	-ЫХ

(Decline thus: *старый*, old; *трудный*, difficult).

Two common variants of this scheme are: -ИЙ, -ЯЯ, -ЕЕ (the "hard" vowel changes to the corresponding "soft" one throughout: а becomes я, ы becomes и, о becomes ё, у becomes ю; decline thus: *ранний*, early); and -ОЙ, -АЯ, -ОЕ, genitive -ОГО, -ОЙ, -ОГО, etc., like the -ЫЙ type, save that the stress is on the ending (decline thus: *простой*, simple).⁸

If the adjective is used after the verb "to be", it assumes the following forms: masc. sg., —; fem. sg. -а; neut. sg., -о; plural (all genders), -ы: стар, стара, старо, plural стары, old; труден, трудна, трудно, plural трудны, difficult;

7. In the genitive endings -го, -его, -оро of adjectives and pronouns, the г is always pronounced as *v*.

8. If the adjective root ends in г, ж, к, х, ч, ш, щ, the following replacements must be made: и for ы, а for я, у for ю; if it ends in ц, я and ю must be replaced by а, у; if it ends in ж, ц, ч, ш, щ, о must be replaced by е; thus, великий, великая, великое, great; горячий, горячая, горячее, hot. These replacements appear not only in adjectives, but in nouns, pronouns and verbs as well.

прост, проста, просто, plural просты, simple. The verb “to be” in the present tense is omitted: она—стара, she is old.

The comparative degree is generally formed by changing the ending of the adjective to -ее, which is not declined: красивый, beautiful; красивее, more beautiful; умный, intelligent; умнее, more intelligent. “Than” is expressed by чем with the nominative, or by the genitive without чем: он умнее чем я, or он умнее меня, he is more intelligent than I; железо полезнее чем серебро, or железо полезнее серебра, iron is more useful than silver. If the verb “to be” is not involved, the comparative is more usually formed by prefixing более (more) to the positive: более красивый стул, a more beautiful chair.

The superlative, both relative and absolute, is usually formed by prefixing самый to the positive: самый умный the most intelligent, extremely intelligent.

The adverb generally consists of the neuter predicate form of the adjective: хороший, good; хорошо, well; умный, intelligent; умно, intelligently; жаркий, warm; жарко, warmly.

3. — Numerals.

a) — Cardinal.

Outside of один, one, these are treated as nouns, are fully declined, and are followed by the *genitive* of the noun to which they refer (*genitive singular* after 2, 3, 4; *genitive plural* after all others): один дом one house; два дома, two houses; пять домов, five houses. Один, одна, одно, plural одни (meaning “alone”, “some”), is otherwise declined like этот (see p. 388), but with the accent on the ending. Два, fem. две, has gen. двух, dat. двум, instr. двумя, loc. двух; три has трёх, трёх, тремя, трёх; четыре has -ёх, -ём, -ья, -ёх. Numerals ending in -ь are declined like feminine nouns in -ь; others are declined like nouns of the corresponding classes, according to their endings.

1	один (одна, одно)	30	= тридцать
2	= два (две, два)	40	= сорок
3	= три	50	= пятьдесят
4	= четыре	60	= шестьдесят
5	= пять	70	= семьдесят
6	= шесть	80	= восемьдесят
7	= семь	90	= девяносто
8	= восемь	100	= сто
9	= девять	200	= двести
10	= десять	300	= триста
11	= одиннадцать	400	= четыреста
12	= двенадцать	500	= пятьсот
13	= тринадцать	600	= шестьсот
14	= четырнадцать	1000	= тысяча
15	= пятнадцать	2000	= две тысячи
16	= шестнадцать	5000	= пять тысяч
17	= семнадцать	1,000,000	= миллион
18	= восемнадцать	7635	= семь тысяч
19	= девятнадцать		шестьсот тридцать
20	= двадцать		пять
21	= двадцать один		

b) — Ordinal (declined like ordinary adjectives).

1st	= первый	20th	= двадцатый
2nd	= второй	21st	= двадцать первый
3rd	= третий	30th	= тридцатый
4th	= четвёртый	40th	= сороковой
5th	= пятый	50th	= пятидесятый
6th	= шестой	60th	= шестидесятый
7th	= седьмой	70th	= семидесятый
8th	= восьмой	80th	= восьмидесятый
9th	= девятый	90th	= девяностый
10th	= десятый	100th	= сотый
11th	= одиннадцатый	145th	= сто сорок пятый

Use these in dates, either in the genitive, or in the neuter nominative: **десятого мая** or **десятое мая**, May 10th.

once - раз twice - два раза five times - пять раз
 the first time - первый раз every time - всякий раз
 the last time - последний раз

4. — Pronouns.

a) — Personal.

“I”, “of me”, “to me”, etc. - я, меня, мне, меня, мною or
 мной, мне.

“you” (familiar), “of you”, etc. - ты, тебя, тебе, тебя,
 тобой or тобой, тебе.

“he”, “his”, etc. - он, (н)его, (н)ему, (н)его, (н)им,
 нѐм.⁹

“she”, “her”, etc. - она, (н)ея, (н)ей, (н)еѐ, (н)ею, ней.

“it”, “its”, etc. - оно, (н)его, (н)ему, (н)его, (н)им,
 нѐм.

“we”, “of us”, “to us”, etc. - мы, нас, нам, нас, нами, нас.

“you” (fam. pl. and polite sg. or pl.) - вы, вас, вам, вас,
 вами, вас.

“they” - они, (н)их, (н)им, (н)их, (н)ими, (н)их.

“self”, “oneself” - (no nom.), себя, себе, себя, собою
 or собой, себе.

b) — Possessive.

“my”, “mine” (masc. and neut.) - мой (neut. моѐ), моего,
 моему, nom. or gen., моим, моѐм; (fem.) -
 моя, моей, моей, мою, моею or моей, моей;
 (plural, all genders) - мои, моих, моим, мои or
 моих, моими, моих.

Твой, “your”, “yours” (fam.), and свой, one’s own,
 are declined in the same fashion. Наш (наша, наше),
 “our”, “ours”, and ваш (ваша, ваше), “your”, “yours”,
 are similarly declined, but with the accent always on the root.
 For “his”, “her”, “its”, “their”, use the genitive of the per-

9. The forms его, него; ему, нему, etc., are *not* interchangeable;
 use forms with н- when the pronoun is governed by a preposition:
 у него хлеб, he has bread; but у его отца хлеб, his father has bread.

sonal pronoun: **ЕГО**, of him (his); **ЕЁ**, of her (her, hers); **ЕГО**, of it, (its); **ИХ**, of them (their, theirs).

c) — Demonstrative.

this, these - **ЭТОТ** (neut. **ЭТО**), **ЭТОГО**, **ЭТОМУ**, (gen. or nom.), **ЭТИМ**, **ЭТОМ**; Fem. - **ЭТА**, **ЭТОЙ**, **ЭТОЙ**, **ЭТУ**, **ЭТОЙ**, **ЭТОЙ**; Plural - **ЭТИ**, **ЭТИХ**, **ЭТИМ**, **ЭТИ** or **ЭТИХ**, **ЭТИМИ**, **ЭТИХ**.

that, those - **ТОТ** (neut. **ТО**), **ТОГО**, **ТОМУ**, (nom. or gen.), **ТЕМ**, **ТОМ**; Fem. - **ТА**, **ТОЙ**, **ТОЙ**, **ТУ**, **ТОЙ**, **ТОЙ**; Plural - **ТЕ**, **ТЕХ**, **ТЕМ**, **ТЕ** or **ТЕХ**, **ТЕМИ**, **ТЕХ**.

d) — Relative and Interrogative.

who, which, that - **КОТОРЫЙ** (fully declined as a regular adjective; may also be used as an interrogative);

who?, whose?, to whom?, whom? - **КТО**, **КОГО**, **КОМУ**, **КОГО**, **КЕМ**, **КОМ** (may also be used as a relative);

what?, which? - **ЧТО**, **ЧЕГО**, **ЧЕМУ**, **ЧТО**, **ЧЕМ**, **ЧЁМ** (may also be used as a relative);

whose? - **ЧЕЙ** (fem. **ЧЬЯ**; neut. **ЧЬЁ**; declined like **МОЙ**);

what sort of? - **КАКОЙ** (declined as a regular adjective).

NOTES ON THE USE OF THE CASES.

The nominative is the case of the subject; it is also used in the predicate nominative, after the verb “to be” (the latter is generally understood, not expressed, in the present tense): **ВАШ СЫН—НЕ МАЛЕНЬКИЙ МАЛЬЧИК**, your son is not a young boy; **ГДЕ ВАШ ОТЕЦ?**, where is your father?

The genitive expresses possession: **ДОМ МОЕГО БРАТА**, the house of my brother, my brother’s house. To translate the English “to have” in the sense of “to own”, Russian generally uses the preposition **У** with the genitive case: **У МЕНЯ БОЛЬШОЙ ДОМ**, I have a large house (literally, to me (is) a large house); **ЕСТЬ ЛИ У МУЖИКА ХЛЕБ?**, has the peasant the bread? (literally, is to the peasant the bread?; **ЛИ** is an untranslatable interrogative particle used in questions when

no other interrogative word appears). The genitive is regularly used in negative sentences, replacing the accusative: **я не знал дома**, I didn't know the house; **у меня - нет хлеба**, I have no bread (literally, to me (is) not of bread). It is used to translate "some", "any" (**дайте мне хлеба**, give me bread, some bread; as against **дайте мне хлеб**, give me *the* bread); and after adverbs of quantity (**много хлеба**, lots of bread, literally, much of bread). It appears with several prepositions, chief among them the *у* mentioned above; **без**, without (**без книги**, without a book); **для**, for, for the sake of (**для меня**, for me, for my sake); **из**, from, out of (**из России**, out of Russia); **от**, away from (especially a person: **от моего друга**, from my friend).

The dative indicates the indirect object after verbs of saying, giving, etc.: **я дал мужику хлеб**, I gave the peasant the bread. It is also used after certain prepositions, chief among them **к** (**ко** before troublesome consonant groups), toward: **к мужику**, toward the peasant; **ко мне**, toward me, to my house.

The accusative is the case of the direct object. Note that a separate accusative form appears only in the feminine singular; in the masculine and neuter singular, and in all plurals, the accusative takes the form of the nominative for inanimate objects, of the genitive for living persons and animals. It is also used with certain prepositions after verbs of motion, particularly **в** (**во**), in, into; **на**, on, onto, upon; **за**, behind. Note that several of these prepositions take the accusative if motion is involved, but the locative or instrumental if no idea of motion appears: **он пошёл в огород**, (acc.), he went into the garden; but **он был в огороде** (loc.), he was in the garden; **он сел на стул**, he sat down on the chair (acc.), but **он сидел на стуле**, he was sitting on the chair (loc.).

The instrumental denotes means or instrument (with, by means of): **он писал карандашом**, he was writing with a pencil. It is used with several prepositions, notably **с** (**со**), with, in company with: **с офицером**, with the officer; **со**

МНОЮ, with me; **за**, behind; **перед**, in front of. It also appears idiomatically in certain expressions of time: **завтра утром**, tomorrow morning.

The locative or prepositional is *always* used with prepositions, and frequently denotes place where or in which (*not* place to which; the accusative denotes that): **о** (**об**, **обо**), about: **о тебе**, about you; **об офицере**, about the officer; **обо мне**, about me; **на**, on, upon: **на столе**, on the table; **в** (**во**), in: **в городе**, in the city; **во мне**, within me.

5. — Verbs.

The Russian verb has only three tenses: present, past and future. On the other hand, most verbs have a double "aspect": the "imperfective", indicating an action that is, was, or will be going on, and the "perfective", denoting an action that happened once and was completed, or that will be begun and completed; the imperfective verb is usually a simple verb, the perfective verb often (but not always) has a preposition prefixed to it (**писать**, to be writing; **написать**, to write once). The perfective verb, by its nature, cannot have a present tense, but only a past (action that was begun and finished) and a future (action that will be begun and finished); and while the past of a perfective verb is quite similar in form to the past of an imperfective verb, the perfective *future* has a set of endings similar to those of the *present* of an imperfective verb; or, to word it differently, the present *form* of the perfective verb has a future *meaning*. Thus, **писать**, to be writing, has a present, **пишу** (I am writing); a past, **писал** (I was writing, I used to write); and a future, **буду писать** (I shall be writing); but **написать**, the perfective counterpart of the imperfective **писать**, has only a past, **написал** (I wrote once, and finished writing); and a future with present form, **напишу** (I shall write once, and be finished).

The infinitive of Russian verbs usually ends in **-ть** (a certain number of verbs have **-чь** or **-ти**): **делать**, to do; **говорить**, to speak; **жечь**, to burn; **нести**, to carry. Its

use is similar to that of the English infinitive: **Я ХОЧУ, ГОВОРИТЬ**, I wish to speak.

1. — Present Indicative.

The normal endings are: **-у (or -ю), -ешь, -ет, -ем, -ете, -ут (or -ют)**; or: **-у (-ю), -ишь, -ит, -им, -ите, -ат (-ят)**.

I do, дела-ю	I speak, говор-ю
you do, дела-ешь ¹⁰	you speak, говор-ишь ¹⁰
he does, дела-ет	he speaks, говор-ит
we do, дела-ем	we speak, говор-им
you do, дела-ете ¹⁰	you speak, говор-ите ¹⁰
they do, дела-ют	they speak, говор-ят

There are many deviations from these two fundamental schemes; **НЕСТИ** and verbs of its type have: **несу, несёшь, несёт**, etc.; several verbs in **-ТЬ**, with stress on the last vowel, follow this scheme (**ЖИТЬ**, to live, has **живу, живёшь, живёт**, etc.).

Note carefully that the *future* of perfective verbs has precisely the same form and endings as the *present* of imperfective verbs; thus, **написать** to write (once, and be through writing), has no present, while its future (I shall write once, and be through) runs: **напишу, напишешь, напишет**, etc.

The verb “to be”, **БЫТЬ**, has a present as follows: **есмь, еси, есть, есмы, есте, суть**. These forms, however, are generally understood, not expressed (**я—болен**, I am ill); the third person singular only is regularly used in interrogative sentences expressing possession: **есть ли у вас рубль?**, have you a ruble? (lit. is there to you a ruble?).

10. The second person singular is used only in intimate conversation; the second plural is regularly used in addressing a single person politely, and in addressing more than one person, familiarly or politely. The subject pronoun is generally used, but is sometimes omitted.

2. — Past Indicative.

This tense is formed by adding to the stem of the verb the endings -л, -ла, -ло, according to the *gender* of the subject (-ли in the plural, for all genders). This so-called past tense is really only a past participle, with predicate adjective endings, and agreement in gender and number with the subject.

I spoke, я говори-л (fem. говори-ла)
 you spoke, ты говори-л (fem. говори-ла)
 he spoke, он говорил
 she spoke, она говори-ла
 we spoke, мы говори-ли
 you spoke, вы говори-ли
 they spoke, они говори-ли

Note that this tense functions as an imperfect (I was doing, used to do) in the case of imperfective verbs; but as a past, present perfect or past perfect in the case of perfective verbs: я писал, I was writing, used to write; я написал, I wrote, have written, had written.

The past tense of **БЫТЬ** is **БЫЛ** (**БЫЛА**, **БЫЛО**, plural **БЫЛИ**). It is regularly used, not omitted as is the case with the present: я был болен, I was ill.

3. — Future.

For the future of perfective verbs, see under Present Tense. The future of imperfective verbs is formed by using the future of **БЫТЬ** (to be), followed by the infinitive:

I shall speak, я буду говорить
 you will speak, ты будешь говорить
 he will speak, он будет говорить
 she will speak, она будет говорить
 we shall speak, мы будем говорить
 you will speak, вы будете говорить
 they will speak, они будут говорить

The future of perfective verbs does service for our future perfect.

4. — Conditional and Subjunctive.

The conditional idea (should, would) is normally expressed by the past tense of the verb followed by the particle **БЫ**: **ОН ДЕЛАЛ БЫ**, he would do, he would have done.

The subjunctive idea is generally rendered by the past tense introduced by **ЧТОБЫ**: **ОН НАПИСАЛ, ЧТОБЫ ОН КУПИЛ САД**, he wrote in order that he might buy the garden.

5. — Imperative.

The imperative generally ends in **-й, -и, -ь** (singular), and **-йте, -ите, -ьте** (plural): **сделай, сделайте**, do!; **говори, говорите**, speak!; **неси, несите**, carry!; **будь, будьте**, be!

6. — Participles and Gerunds.

Russian has two indeclinable gerunds, present and past: **говоря**, by or while speaking; **поговорив**, or **поговоривши**, having spoken.

There are four participles declined like adjectives: present active, **говорящий**, speaking; present passive, **делаемый**, being done; past active, **говоривший**, having spoken; past passive, **читанный**, having been read.

The use of gerunds and participles is quite complicated, and all the forms given above do not appear for all verbs. Generally speaking, they are very frequently used where other languages would use a subordinate clause (**сказанное слово**, the word that was spoken).

7. — Passive and Reflexive.

There is no true passive in Russian, save for the participial forms above indicated. The passive concept is generally rendered: 1. by a passive participle; 2. by an indefinite third person plural active (**мне сказали**, I was told; lit. they told me); 3. by the reflexive (**это делается**, this is being done, lit. this does itself).

Reflexive verbs are quite numerous. They are formed,

for all persons, by the addition of -ся (an abbreviated form of себя; -сь after vowels, except Ъ): УМЫВАТЬСЯ, to wash oneself: я умываюсь, ты умываешься, он умывается, мы умываемся, вы умываетесь, они умываются; past: я умывался (fem. я умывалась; pl. мы умывались); fut.: я буду умываться.

VOCABULARY

Nouns are generally given in their *nominative singular* form, with the root¹¹ separated from the ending (if any); the *genitive singular* ending follows, then the *nominative plural* ending (where a plural form is in common use); thus, ЯЗЫК, -а, -и, indicates a declensional scheme: -, -а, -у, -, -ом, -е; plural, ЯЗЫК-и, -ов, -ам, -и, -ами, -ах; мор-е, -я, -я indicates a declensional scheme мор-е, -я, -ю, -е, -ем, -е; plural, мор-я, -ей, -ям, -я, -ями, -ях. See regular declensional tables, p. 382-383.

Adjectives are given only in their *attributive nominative singular masculine* form. For declensional schemes, see p. 384. For the formation of the *predicate* forms, where these are commonly used, (1) after the adjective indicates regular formation and accentuation (thus, здоровый (1), indicates the following predicate forms: здоров, здорова, здорово, plural здоровы); (2) after the adjective indicates shift of stress from the *root* of the attributive adjective to the *ending* of the predicate adjective (thus, добрый (2) indicates the following predicate forms: добр, добра, добро, plural добры); (3) after the adjective indicates stress on the *root* in the masculine singular, neuter singular, and plural predicate

11. The term "root" as applied to both nouns and verbs in this vocabulary, is practically, not scientifically used; the true etymological root of ветер, for example, is ветр-, not вет-; but the latter supplies a convenient makeshift for appending genitive and plural endings -ра, -ры; the true root of the verb приходитъ is приход-, not прихо-; but the latter permits us to append the endings -жу, -дшь, without entering into complicated explanations.

forms, on the *ending* in the feminine singular predicate form (thus, **НОВЫЙ** (3) indicates **НОВ, НОВА, НОВО**, plural **НОВЫ**; **МОЛОДОЙ** (3) indicates **МОЛОД, МОЛОДА, МОЛОДО**, plural **МОЛОДЫ**. Exceptional insertion of a vowel in the masculine singular predicate form is indicated thus: **БЕДНЫЙ** (-ен; 3); this means that the predicate forms are **БЕДЕН, бедна, бедно**, plural **бедны**.

Verbs are given, in a few cases, in whichever aspect (perfective or imperfective) better suits the English translation, or is in common use. For most verbs, however, both aspects are necessary to render the English meanings. In such cases, the imperfective aspect appears first, the perfective follows. Where the perfective aspect simply involves the addition of a prefix, with no difference in the conjugational forms of the two verbs, only the prefix is given; otherwise, all significant forms for both verbs appear. Remember that the imperfective infinitive normally means "to do something repeatedly, continually, or without reference to time"; the perfective infinitive "to do something once, at a given moment". The imperfective present is a true present, in meaning as well as in form; the perfective present has a future meaning, with reference to a particular point of future time; the imperfective future, formed by means of **БУДУ** with the infinitive, refers to future action without a definite point of time; the imperfective past is an imperfect, usually meaning "I was doing, used to do" something; the perfective past is an absolute past, meaning "I did, have done, had done" (see p. 392). The forms given are the infinitive, with the root¹¹ indicated; and the first and second person singular present endings, which are to be attached to the root. Formation and accentuation of the other forms of the present normally follow those of the *second* singular, not those of the first singular (note that the *third* plural normally ends in -УТ (-ЮТ), if the second singular ends in -ЕШЬ or -ЁШЬ; in -АТ (-ЯТ), if the second singular ends in -ИШЬ): thus, to come, **ПРИХО-ДИТЬ** (-ЖУ, '-ДИШЬ) indicates that endings on the basis of '-ДИШЬ are to be attached to the working-root **ПРИХО-**,

and that the full present is: **прихо-жу, прихо-дишь, прихо-дит, прихо-дим, прихо-дите, прихо-дят.**

The accented vowel is indicated throughout by heavy type (**ЯЗЫК**), save in cases where **ë** appears (**ë** is *always* stressed). Watch for shifting accents on different forms of the same word!

1. *World, Elements, Nature, Weather, Time, Directions.*

world, свет, -а; мир, -а
 earth, земл-я, -и, 'и
 air, воздух, -а
 water, вод-а, -ы, 'ы
 fire, ог-онь, -ня, -ни
 light, свет, -а
 sea, мор-е, -я, -я
 sun, солнц-е, -а
 moon, лун-а, -ы; месяц, -а
 star, звезд-а, -ы, 'ы
 sky, неб-о, -а (pl. неб-еса, -ес)
 wind, вет-ер, -ра, -ры
 weather, погод-а, -ы
 snow, снег, -а, -а
 it is snowing, снег идёт
 rain, дожд-ь, -я, -и
 it is raining, дождь идёт
 cloud, облак-о, -а, -а
 cloudy, облачный (it's cloudy
 today, облачно сегодня)
 fog, туман, -а, -ы
 ice, лёд (льда, льд-ы)
 mud, гряз-ь, -и, -и
 morning, утр-о, -а, -а
 noon, полд-ень, -ня, -ни
 evening, вечер, -а, -а
 afternoon, день (дня, дни) (in
 the afternoon, днём; попо-
 лудни)
 night, ноч-ь, -и, -и
 midnight, полноч-ь, -и
 North, север, -а
 South, юг, -а
 East, восток, -а
 West, запад, -а

time, врем-я, -ени, -ена
 year, год, -а, -ы
 month, месяц, -а, -ы
 week, недел-я, -и, -и
 day, день (дня, дни)
 hour, час, -а, -ы
 minute, минут-а, -ы, -ы

 dishonest, нечестный (-тен, 1)

to pass, перед-ать (-аю, -аешь)
 tip, на-ча-й
 to drink, п-ить (-ью, -ѣшь);
 perf. вып-ить (-ью, -ьешь)
 water, вод-а, -ы, 'ы
 wine, вин-о, -а, 'а
 beer, пив-о, -а
 coffee, коф-е, -я
 tea, ча-й, -я, -и
 milk, молок-о, -а
 bottle, бутылк-а, -и, -и
 spoon, лож-ка, -ки, -ки (gen. pl.
 -ек)
 teaspoon, чайная ложка
 knife, нож, -а, -и
 fork, вил-ка, -ки, -ки (gen. pl.
 -ок)
 glass, стакан, -а, -ы
 cup, чаш-ка, -ки, -ки (gen. pl.
 -ек)

napkin, салфетк-а, -и, -и
 salt, сол-ь, -и
 pepper, пер-ец, -ца
 plate, dish, блюд-о, -а, -а
 bread, хлеб, -а, -а
 butter, масл-о, -а, -а
 roll, булк-а, -и, -и
 sugar, сахар, -а
 soup, суп, -а, -ы
 rice, рис, -а
 potatoes, картофел-ь, -я
 vegetables, овощ-и, -ей (pl.)
 meat, мяс-о, -а
 beef, говядин-а, -ы
 steak, бифштекс, -а, -ы
 chicken, цыпл-ёнок, -ёнка, -ята
 chop, отбивная котлет-а, -ы, -ы
 lamb, баранин-а, -ы
 veal, телятин-а, -ы
 pork, свинин-а, -ы
 sausage, колбас-а, -ы, 'ы
 ham, ветчин-а, -ы
 bacon, сал-о, -а

8. *Hygiene and Attire.*

bath, ванн-а, -ы, -ы
 to bathe, куп-аться (-аюсь, -аешься); perf. вы -
 shower, душ, -а, -и
 to wash, м-ыться (-оюсь, -оешься); perf. у -
 to shave, бр-иться (-еюсь, -еешься); perf. по -
 barber, hairdresser, парикмахер, -а, -ы
 mirror, зеркал-о, -а, -а

 (I'm right, я прав)
 wrong, неправый (3)
 (I'm wrong, я неправ)

23. *Colors.*

white, белый (3)	yellow, жёлтый (2)
black, чёрный (-ен, 3)	gray, серый (3)
red, красный (-ен, 2)	brown, коричневый
green, зелёный (3)	pink, розовый
blue, синий (light blue, голубой)	purple, пурпуровый; лиловый

24. *Nationalities.*¹⁴

American, американский; американ-ец, -ка, -цы
English, английский; англичан-ин, -ка, -е
French, французский; францу-з, -женка, -зы
German, немецкий; нем-ец, -ка, -цы
Spanish, испанский; испан-ец, -ка, -цы
Russian, русский; русск-ий, -ая, -ие; советский (pertaining to the Soviet Union; not interchangeable with русский, and never applied to the language)
Italian, итальянский; итальян-ец, -ка, -цы
Japanese, японский; япон-ец, -ка, -цы
Chinese, китайский; кита-ец, -янка, -йцы
Dutch, голландский; голланд-ец, -ка, -цы
Norwegian, норвежский; норвеж-ец, -ка, -цы
Swedish, шведский; швед, -ка, -ы
Finnish, финский; финн, -ка, -ы
Belgian, бельгийский; бельги-ец, -йка, -йцы
Polish, польский; пол-як, 'ька, -яки
Danish, датский; датчан-ин, -ка, -е
Swiss, швейцарский; швейцар-ец, -ка, -цы
Portuguese, португальский; португал-ец, -ка, -ьцы
Yugoslav, югославянский; югославян-ин, 'ка, -е

14. The first form given is the adjective, to be declined as such, and to be used in connection with a noun: the American Navy, американский флот. The second form is the noun, meaning a person of the stated nationality: he is an American, он — американец; she is an American, она — американка; they are Americans, они — американцы. The name of the language is indicated by the adjective with язык: the Russian language, русский язык; after the verb "to speak", however, the masculine singular form of the adjective, preceded by по and minus the -й of the ending, is used: I speak Russian, я говорю по-русски; do you speak French? говорите ли Вы по-французски? Nouns and adjectives of nationality are not usually capitalized, though names of countries are.

Bulgarian, болгарский; болгар-ин, -ка, -ы
 Czech, чешский; че-х, -шка, -хи
 Greek, греческий; гре-к, -чанка, '-ки
 Turkish, турецкий; тур-ок, -чанка, '-ки
 Roumanian, румынский; румын, -ка, -ы
 Hungarian, венгерский; венгер-ец, -ка, -цы
 Austrian, австрийский; австри-ец, -ячка, -цы
 Malay, малайский; мала-ец, -йка, -цы
 Persian, персидский; перс, -иянка, -ы
 Arabian, Arab, Arabic, арабский; араб, -ка, -ы
 Jewish, Hebrew, еврейский; евре-й, -йка, -и
 Australian, австралийский; австрали-ец, -йка, -йцы
 African, африканский; африкан-ец, -ка, -цы
 Canadian, канадский; канад-ец, -ка, -цы
 Mexican, мексиканский; мексикан-ец, -ка, -цы
 Cuban, кубанский; кубан-ец, -ка, -цы
 Brazilian, бразильянский; бразильян-ец, -ка, -цы
 Argentinian, аргентинский; аргентин-ец, -ка, -цы
 Porto Rican, порториканский; порторикан-ец, -ка, -цы

25. *Adverbs and Adverbial Expressions.*

today, сегодня	every night, каждую ночь
yesterday, вчера	early, рано
tomorrow, завтра	late, поздно
day before yesterday, третьего дня	already, уже
day after tomorrow, послезавтра	yet, still, ещё
tonight, сегодня вечером	no longer, больше не
last night, вчера вечером	not yet, нет ещё
this morning, сегодня утром	now, теперь
in the morning, утром	then, тогда
in the afternoon, днём	afterwards, после
in the evening, вечером	never, никогда
in the night, ночью	always, всегда
this afternoon, сегодня днём	forever, навсегда
tomorrow morning, завтра утром	soon, скоро
tomorrow afternoon, завтра днём	often, часто
tomorrow night, завтра вечером	seldom, редко
all day, весь день	usually, обыкновенно
all morning, всё утро	fast, быстро
all night, всю ночь	slowly, медленно
every day, каждый день	here, здесь
every morning, всякое (каждое) утро	there, там
	near by, близко
	far away, далеко

up (stairs), наверху; наверх
(motion)
down (stairs), внизу; вниз
(motion)
ahead, in front, впереди; вперёд
(motion)
forward, вперёд
behind, in back, сзади
back, backward, назад (motion)
outside, снаружи; наружу
(motion)
inside, внутри; внутрь (motion)
opposite, in front, напротив
here and there, тут и там
everywhere, всюду, везде
where, где; куда (motion)
also, too, также; тоже
yes, да
no, нет
not, не
very, much, очень
little, not much, мало; не очень
well, хорошо
badly, плохо
better, лучше
worse, хуже
only, только
more (than), более (чем),
больше
less, менее, меньше
as - as, так - как
as much - as, столько же -
сколько (with genitive sg.)
as many - as, столько же -
сколько (with gen. pl.)
how much?, сколько (with gen.
sg.)?
how many?, сколько (with gen.

26. Conjunctions.

and, и
but, но; а
if, provided that, если
(if with conditional usually =

pl.)?
how?, как?
too much, слишком много
(with gen. sg.)
too many, слишком много
(with gen. pl.)
really, truly, действительно
so much, столько (with gen. sg.)
so many, столько (with gen. pl.)
as, like, как
besides, кроме того
finally, in short, наконец;
в конце концов
almost, почти
gladly, с удовольствием
certainly, непременно
at once, сразу
at all, вовсе
hardly, с трудом, едва не
aloud, вслух
of course, конечно
suddenly, внезапно; вдруг
about, около
perhaps, maybe, может-быть
a little, немножко; немного
(with gen.)
again, опять
together, вместе
at least, по крайней мере
for lack of, за недостатком
(with gen.)
long ago, давным давно
repeatedly, часто; неодно-
кратно; повторно
therefore, поэтому
occasionally, случайно; иногда
entirely, altogether, слишком;
совсем

если бы with past)
or, или
why?, почему?
why!, ну что!; ну да!; что же!

because, for, потому что
 before, прежде чем; до того как
 when, when?, while, когда
 than, чем; лучше чем; genitive
 case
 where, where?, где; куда
 (motion)
 whence, whence?, откуда
 until, пока не; до тех пор пока
 не

although, хотя
 unless, если только
 that, что
 after, после того как
 as soon as, как только
 as long as, пока не
 without, без того чтобы (more
 often, не with gerund: without
 knowing this, не зная этого)

27. *Indefinite pronouns and Adjectives.*

such, такой
 of all kinds, всякого рода
 everything, всё
 everyone, все
 something, что-то
 someone, кто-то
 nothing, ничто
 no one, никто
 no (adj.), нет (with gen.; I have
 no bread, у меня нет хлеба)
 some, некоторые or gen.: give
 me some bread, дайте мне
 хлеба; some men, некоторые
 люди

a few, several, несколько with
 gen.
 neither - ни, ни - ни
 each, every, каждый; всякий
 all, весь (вся, всё, pl. все)
 (an) other, другой
 much, lots of, много (with gen.)
 few, немного (with gen. pl.)
 many, много (with gen. pl.)
 little, not much, мало (with gen.)
 both, оба(обе, оба) with gen. sg.
 enough, довольно; достаточно
 (with gen.)
 not enough, недостаточно (with
 gen.)

28. *Prepositions (the cases taken by each preposition are indicated).*

of, из (gen.); or genitive alone
 from, away from, от (gen.)
 outside of, вне (gen.)
 to, dative; в (acc.); к (dat.); на
 (acc.); до (gen.)
 at, у (gen.)
 with, с (instr.)
 as far as, until, up to, до (gen.)
 without, без (gen.)
 in, в (prep.)
 into, в (acc.)
 on, на (acc. or prep.)
 over, above, над (instr.)

for, for the sake of, для (gen.)
 since, с (gen.)
 toward, к (dat.)
 between, among, среди; посреди
 (gen.)
 near, next to, близ (gen.);
 рядом с (instr.)
 below, beneath, под (instr.);
 ниже (gen.)
 by, (instrumental case)
 far from, далеко от (gen.)
 before, до (gen.)
 after, после (gen.)

opposite, in front of, **впереди**
(gen.)

back of, behind, **позади** (gen.)

under (neath), **под** (instr.)

instead of, **вместо** (gen.)

beside, **кроме** (gen.)

at the house of, **в доме** (with
gen.); **у** (gen.)

through, **сквозь** (acc.)

by means of, **инстр.**; **посредством**
(gen.)

against, **против** (gen.)

across, **через** (acc.)

on the other side of, **на другой**
стороне (with gen.)

in spite of, **несмотря на** (acc.)

about, **около** (gen.)

around, **кругом** (gen.)

during, **во время** (gen.)

because of, on account of, **из за**
(gen.); **на основании того**

что

in order to (inf.), **для того**

чтобы (past)

29. *Special Expressions and Idioms.*

good morning, **доброе утро**; **здравствуйте** (often pronounced
здрасте)

good afternoon, good day, **добрый день**; **здравствуйте**

good evening, **добрый вечер**

good night, **спокойной ночи**

good-bye, **до свиданья**; **прощайте**

I'll see you later, **до скорого свидания**

I'll see you tomorrow, **до завтра**

I'll see you tonight, **до вечера**

just now, **только - что**

hello! (on telephone), **слушаю!**; **алло!**

how are you?, **как Вы поживаете?**

I'm well, **хорошо**; **мне хорошо**

I'm (much) better, **мне (гораздо) лучше**

how goes it?, **как дела?**

what time is it?, **который час?**

it's six o'clock, **шесть часов**

at six o'clock, **в шесть часов**

at about six, **около шести**; **часов в шесть**

at half past six, **в половина седьмого**

at a quarter to six, **без четверти шесть**

at a quarter past six, **в четверть седьмого**

at ten minutes to six, **без десяти шесть**

at ten minutes past six, **в десять минут седьмого**

last year, **в прошлом году**

next year, **в будущем году**; **на будущий год** (for next year)

every day, **каждый день**

the whole day, **весь день**

please, **пожалуйста** (pronounce **пожалста**)

tell me, **скажите мне**

bring me, принесите мне
show me, покажите мне
thank you, спасибо; благодарю (Вас)
don't mention it, не за что; пожалуйста
will you give me?, дайте мне, пожалуйста
pardon me, извините; простите
it doesn't matter, never mind, ничего
I'm sorry, виноват
I can't help, ничего не могу (with inf.)
it's nothing, это ничего
what a pity!, как жаль!
it's too bad, ужасно!
I'm glad, я рад
I have to, мне надо; мне нужно; я должен
I agree (all right, O. K.), я согласен
here is (are), вот
there is (are), вот; там
where is (are)?, где?
where are you going?, куда Вы идёте?
which way?, по какой дороге?; в какую сторону?
this (that) way (fashion), этим путём
this (that) way (direction), в этом направлении; по этой стороне;
в эту сторону
to the right, направо
to the left, налево
straight ahead, прямо
come with me, идите со мной
what can I do for you?, что я могу для Вас сделать?; чем я могу
помочь?; что Вам угодно?
what is it?, что это такое?
what is the matter?, в чём дело?
what is the matter with you?, что с Вами?
what do you want?, что Вы хотите?
what are you talking about?, о чём Вы говорите?
what does that mean?, что это значит?
what do you mean?, что Вы подразумеваете?; что Вы хотите
этим сказать?
how much (is it)?, сколько (это стоит)?
anything else?, что ещё?; что больше?
nothing else, больше ничего
do you speak Russian?, говорите ли Вы по-русски?
a little, немножко; немного
speak more slowly, говорите медленнее
do you understand?, понимаете ли Вы?

I don't understand, я не понимаю; я не понял
 do you know?, знаете ли Вы?
 I don't know, я не знаю
 I can't, я не могу
 what do you call this in Russian?, как это называется по-русски?
 how do you say - in Russian?, как говорится - по-русски?
 I'm an American, я — американец (американка, fem.)
 I'm (very) hungry, я (очень) голоден
 I'm thirsty, я хочу пить
 I'm sleepy, я хочу спать
 I'm warm, мне тепло
 I'm cold, мне холодно
 it's warm, жарко
 it's cold, холодно
 it's windy, ветрено
 it's sunny, солнечно
 it's fine weather, хорошая погода
 it's bad weather, плохая погода
 it's forbidden, запрещено (no smoking, курить воспрещается)
 luckily, fortunately, к счастью
 unfortunately, к несчастью
 is it not so?, don't you?, aren't you? (etc.), не так (ли)?; не правда (ли)?
 not at all, совсем нет; совсем не так
 how old are you?, сколько Вам лет?
 I'm — years old, мне — лет (replace лет with год for "one" and compounds of "one", with года for 2, 3, 4, and compounds)
 how long have you been here?, давно ли Вы здесь?, Вы давно здесь?
 how long have you been waiting?, сколько времени Вы ждёте?
 as soon as possible, возможно скорее; поскорее
 come here!, идите сюда!
 come in!, войдите!
 look!, посмотрите!
 look out!, careful!, будьте осторожны!; осторожно!
 darn it!, чорт возьми!; это — возмутительно!
 for heaven's sake!, ради Бога!
 glad to meet you!, очень приятно!; я очень рад!
 no admittance, вход запрещён!: входить воспрещается!
 notice!, объявление!
 nonsense!, пустяки!; ерунда!
 listen!, look here!, say!, послушайте!; скажите!
 just a second!, одну минуту!
 gangway!, one side!, посторонитесь!

CHAPTER XII

OTHER EUROPEAN TONGUES

The languages of Europe that do not belong to the three major branches of Indo-European (Germanic, Romance, Slavic) are fairly numerous, but relatively unimportant, from a practical standpoint. Greek and Albanian form two separate branches of Indo-European. The former is the national tongue of some 7,000,000 people in Greece and of perhaps one or two million more, located on Turkish, Bulgarian and Albanian territory, and in the politically Italian Dodecanese Islands, while the latter is spoken by over 1,000,000 people in Albania and by scattered minorities in Yugoslavia, Greece, and even in southern Italy and Sicily. Finnish, Hungarian, Turkish and Estonian belong to the great Ural-Altai family of northern Asia, and bear some resemblance to one another in structure, though they have so diverged in vocabulary as to be mutually incomprehensible (save in the case of Finnish and Estonian). Finnish is spoken by some 4,000,000 people in Finland and by scattered minorities in Russian Karelia; Estonian by about 1,000,000 in Estonia; Hungarian, or Magyar, by over 13,000,000 people, located in Hungary and in countries bordering on Hungary (Czechoslovakia, Roumania, Yugoslavia); while Turkish is the national tongue of Turkey's 18,000,000 inhabitants, located mainly in Asia Minor, but also in European Turkey and adjacent territories (Bulgaria and Greece; Turkish linguistic minorities are to be found as far west as Albania, and as far north as Roumanian Dobrudja). The Celtic group of Indo-European appears in Ireland (**Eire**), where Irish (occasionally called "Erse", but not by the Irish themselves) is the official tongue, though more English than

Irish is spoken among Eire's 3,000,000 inhabitants; in the highlands of Scotland; in Wales; and in French Brittany; the number of people speaking Scots Gaelic does not exceed a hundred thousand; Welsh speakers may run up to 1,000,000, but English is current among them; Breton is spoken by over 1,000,000 people in Brittany, but most of them use French as well. Lithuanian and Lettish are the national tongues of two countries having populations of about 3,000,000 and 2,000,000, respectively; they belong to the Baltic branch of Indo-European, which is frequently joined to the Slavic in a Balto-Slavic classification. Basque, a language with no known affiliations, is spoken by perhaps half a million people in the extreme northeastern corner of Spain and the extreme southwestern corner of France, astride the Pyrenees; most Basque speakers can be approached with either Spanish or French.

From a practical standpoint, the majority of speakers of all these languages may be reached with other tongues. French and Italian are fairly current in Greece; Italian and Serbo-Croatian in Albania. Large numbers of Finns are acquainted with Russian, German and Swedish. Estonians, Latvians and Lithuanians are generally acquainted with Russian, German or Polish. Most Hungarians speak German. Celts and Basques can generally be reached with English, French and Spanish. Even in Turkey, the educated classes are generally acquainted with French, English and Italian.

GREEK

From a cultural standpoint, the most important of these minor European tongues is Greek, which has behind it a glorious past of civilization and tremendous contributions made to the world's progress. From a linguistic standpoint, Greek has made an equally vast contribution to all other civilized languages, whose scientific and literary vocabularies are replete with words borrowed from Greek. The modern Greek language differs far less from the ancient Greek of classical times than modern Italian differs from Latin, so that it is quite possible for one trained in ancient Greek to read modern Greek. Most of the innovations have been in the fields of pronunciation and vocabulary; but while the modern tongue has borrowed considerably from Turkish, Italian and other sources, the bulk of the Greek vocabulary still remains what it was in the days of Homer and Aristotle, and the student of modern Greek finds himself constantly faced with words in current popular use which have given rise to cultural terms in his own tongue (e.g. στρατεύμα, pron. *strátevma*, army; compare "strategy"; ἀριθμῶ, pron. *arithmó*, to count; compare "arithmetic"). There is a certain divergence between literary modern Greek, which consciously and proudly adheres to traditional forms, and the colloquial or "Demotic" variety, which introduces foreign (particularly Turkish) words, and displays a relaxation of grammatical standards and a simplification of grammatical forms (e. g. literary ποτήριον οἴνου vs. popular ποτήρι κρασί, "glass of wine").

ALPHABET AND SOUNDS

Symbol	Value
--------	-------

A α = father (ἀνά, pr. *aná*, "by", "over"; cf. analyze).

B β = vase (βλέπω, pr. *vlépo*, "I see").

Γ γ = longer, before γ, κ, ξ, χ; (ἔγγονος, pr. *éngonos*, "grandson").

= yes, before ε, η, ι, υ, αι, ει, οι, υι; (γῆ, pr. yee, "earth"; cf. geography);

= voiced German ich in all other positions; (γάτα, pr. gháta, "cat").

Δ δ = this, (ἔδῶ, pr. edhó, "here").

Ε ε = met (ἔλα, pr. éla, "come!").

Ζ ζ = zinc (ζώνη, pr. zónee, "belt"; cf. zone).

Η η = me (ἡμέρα, pr. eeméra, "day").

Θ θ = think (θέλω, pr. thélo, "I want").

Ι ι = me (δίδω, pr. dheédho, "I give").

Κ κ = king (κακός, pr. kakós, "bad"; cf. cacophony).

Λ λ = low (καλός, pr. kalós, "good"; cf. calisthenics).

Μ μ = moon (μόνος, pr. mónos, "alone"; cf. monosyllabic).

Ν ν = new (νόμος, pr. nómos, "law").

Ξ ξ = fix (ἔξω, pr. ékso, "out").

Ο ο = obey (πόλεμος, pr. pólemos, "war"; cf. polemic).

Π π = pat (πόδι, pr. pódhee, "foot"; cf. tripod).

Ρ ρ = British very (παρά, pr. pará, "than"; cf. parallel).

Σ σ = us (σῶμα, pr. sóma, "body"; cf. somatic).

(ς final)

Τ τ = tall (ποταμός, pr. potamós, "river"; cf. hippopotamus).

Υ υ = very, in diphthongs (αυ, ευ, ηυ), when a vowel or a voiced consonant follows (αὔριον, pr. ávrion, "tomorrow");

= father, in diphthongs (αυ, ευ, ηυ), when an unvoiced consonant follows (αὐτός, pr. aftós, "this");

= me, in all other positions (ὕλη, pr. eélee, "material").

Φ φ = father (φωνή, pr. foneé, "voice"; cf. telephone).

Χ χ = German ach, before α, ο, ω, or consonant (χάνω, pr. kháno, "I loose");

= German ich, before ε, η, ι, υ; (χέρι, pr. chéree, "hand"; chiropractor).

Ψ ψ = perhaps (ψυχή, pr. pseecheé, "spirit"; cf. psychology).

Ω ω = obey (ζωή, pr. zoeé, "life"; cf. zoology).

Special Groups:

αι = met (πηγαίνω, pr. peeyéno, "I go").

ει, οι, υι = me (εἶνε, pr. eéne, "is"; οἶνος, pr. eénos, "wine"; υἱός, pr. eeós, "son").

ου = food, (βουνό, pr. vounó, "mountain").

μπ = bend or ember (μπαρμπέρης, pr. *barbères*, "barber":
μπόμπα, pron. *bómba*, "bomb").
ντ = do or undo (ντόμινο, pr. *dómino*, "domino"; ξντιμος, pr.
éndeemos, "honored").

Special characters, called breathings (´, `), appearing over the initial vowel of a word, have no value in modern Greek (note, however, that the second symbol had the value of *h* in the ancient language, and that English words derived from Greek words beginning with a vowel that has this symbol over it appear with an *h*: ύπνος, pr. *eépnos*, "sleep"; cf. *hypnotism*). Three accents appear in Greek, the acute (´), the grave (`) and the circumflex (˘). All three of them indicate the position of the stress, but there is no difference among them in the modern tongue.¹ A semicolon (;) is the Greek equivalent of a question mark: είνε καχόν;, is it bad?

GRAMMATICAL SURVEY.

Nouns and Articles.

Greek has three genders, masculine, feminine and neuter (but inanimate objects are often masculine or feminine): and five cases: nominative, genitive, dative, accusative and vocative. There is no indefinite article, so that άνθρωπος may mean "man" or "a man". The definite article is:

	Singular			Plural		
	Masc.	Fem.	Neut.	Masc.	Fem.	Neut.
Nom.	ὁ	ἡ	τὸ	οἱ	αἱ	τὰ
Gen.	τοῦ	τῆς	τοῦ	τῶν	τῶν	τῶν
Dat.	τῷ	τῇ	τῷ	τοῖς	ταῖς	τοῖς
Acc.	τόν	τήν	τὸ	τούς	τάς	τά

1. In the ancient tongue, only a long vowel could bear the circumflex accent; the latter may therefore appear on η and ω (invariably long vowels in ancient Greek), but not on ε and ο (invariably short vowels); in modern Greek there is no difference of length in vowels, all vowel sounds being of medium length and clearly enunciated, whether stressed or unstressed.

There is a large number of declensional schemes, of which the following three are samples:

Masculine: λαός, "people": λα-ός, -οῦ, -ῶ, -όν, -έ; plural: λα-οί, -ῶν, -οῖς, -οὺς, -οί.

Feminine: χαρά, "joy": χαρ-ά, -ᾶς, -ᾷ, -άν, -ά; plural: χαρ-αί, -ῶν, -αῖς, -άς, -αί.

Neuter: ξύλον, "wood": ξύλ-ον, -ου, -ω, -ον, -ον; plural: ξύλ-α, -ων, -οις, -α, -α.

The nominative case is primarily the case of the subject or of the predicate nominative; the accusative the case of the direct object; the genitive indicates possession. The dative is the case of the indirect object, but there is a tendency in the spoken tongue to replace it by using the preposition εἰς ("to") with the accusative; this preposition tends to lose its initial vowel sound and to combine its final s-sound with a following definite article: δίδω στὸν (for εἰς τὸν) ἄνθρωπον, I give to the man, in substitution for a more literary δίδω τῷ ἀνθρώπῳ.

Adjectives and Adverbs.

Adjectives agree in gender, number and case with the nouns they modify, and follow complex declensional schemes similar to those of the nouns: ὁ σοφὸς ἄνθρωπος, the wise man; τοῦ σοφοῦ ἀνθρώπου, of the wise man; τῷ σοφῷ ἀνθρώπῳ (colloquial: στὸν σοφὸν ἄνθρωπον), to the wise man; etc.; ἡ σοφὴ φιλενάδα, the wise girl friend: τῆς σοφῆς φιλενάδας, etc.

The comparative is generally formed by replacing the ending of the positive with -τέρος or -ώτερος; the superlative by replacing the ending of the positive with -τατος (-ώτατος); or by prefixing the article to the comparative: σοφός, wise; σοφώτερος, wiser; σοφώτατος or ὁ σοφώτερος, wisest. In colloquial Greek, πειὸ and πειὸ preceded by the definite article are also used for the comparative and superlative, respectively; πειὸ μεγάλος, larger; ὁ πειὸ καλός, the best.

The adverb is usually derived from the adjective by changing the ending of the latter to -ως: σοφός, wise; σοφῶς, wisely. A few adjectives change -ος to -α: καλός, good; καλά, well.

Numerals.

"One", "three" and "four", their compounds and plural hundreds are declined. The others are invariable.

1—ένας (fem. μία, neut. ένα)	13—δεκατρείς (-ία)
2—δύο	20—είκοσι
3—τρεις (neut. τρία)	21—είκοσιένας
4—τέσσαρες (neut. -α)	30—τριάντα
5—πέντε	40—σαράντα
6—έξι (έξι)	50—πενήντα
7—έφτά (έπτά)	60—έξήντα
8—όκτώ	70—έβδομήντα
9—έννηα (έννέα)	100—έκατό
10—δέκα	200—διακόσιοι (-αι, -α)
11—ένδεκα	1000—χίλια
12—δώδεκα	2000—δύο χιλιάδες
	1,000,000 — έν εκατομμύριον

*Pronouns.**Personal.*

I, *έγώ*; me, to me, *έμένα* (μου); we, *έμεις*; us, to us, *έμās* (μās).
 you, *σύ*; you, to you, *έσένα* (σου); plural nom. *σεις*, acc. *έσās*
 (σās).

he, she, it, *αὐτός* (του), *αὐτή* (της), *αὐτό* (regularly declined).

(Forms in parentheses are used before a verb as direct or indirect objects; but *τόν*, *τήν*, *τό* are more commonly used as direct objects).

Possessive (follow a noun or adjective, and are unaccented).

my, mine, *μου*; our, ours, *μας*.

your, yours (sg.) , *σου*; (pl.) *σας*.

his, her, hers, its, their, theirs, *του*, *της*, *των*.

(my brother, *ό αδελφός μου*; his father, *ό πατήρ του*).

Interrogative and Relative.

who?, *τίς*; *ποιός*;

what?, *τί*; *ποιό*;

whom?, *τίνα*; *ποιόν*;

whose?, of whom?, *τίνος*;

As a relative pronoun, *πού* is generally used in all connections: *ό άνθρωπος πού είδα*, the man whom I saw.

Verbs.

The Greek verb appears in a complicated scheme of tenses and moods, with a present, an imperfect, several possible future formations, an aorist (or past), a perfect (or present perfect), and a pluperfect; the conditional is treated as a

mood rather than a tense, and appears in four possible forms; there are two forms of the subjunctive, and various forms of the imperative, infinitive and participle. A full-fledged passive appears, formed in most of its tenses by the addition of endings (τιμῶ, I honor; τιμῶμαι, I am honored). In a verb such as λύω, loose, the present indicative assumes the following forms: λύω, -εις, -ει, -ομεν, -ετε, -ουν. The imperfect is ἔλνον; the future (I shall be writing) is θὰ λύω, or (I shall write, at some specified time), θὰ λύσω; the aorist is ἔλυσα; the perfect ἔχω λύσει; the pluperfect εἶχον λύσει.

IDENTIFICATION

In written form, Greek is very easily identified by means of its distinctive alphabet. In spoken form, the distinctive sound of the Greek *s*, which is almost a sharp hiss, is of help. Distinctive words, similar to English words known to be of Greek origin, frequently appear in speech.

SAMPLE OF WRITTEN GREEK

Διότι τόσον ἠγάπησεν ὁ Θεὸς τὸν κόσμον, ὥστε ἔδωκε τὸν Υἱὸν αὐτοῦ τὸν μονογενῆ, διὰ νὰ μὴ ἀπολεσθῇ πᾶς ὁ πιστεύων εἰς αὐτόν, ἀλλὰ νὰ ἔχη ζωὴν αἰώνιον.

WORDS AND PHRASES

good morning, καλή ἡμέρα (καλημέρα)
 good evening, καλή ἑσπέρα (καλησπέρα)
 how are you? πῶς εἶσθε; τί κάνετε; very well, πολὺ καλὰ
 much better, πολὺ καλότερα good night, καλή νύκτα
 please, παρακαλῶ and, καὶ yes, ναι no, not, ὄχι
 thank you very much, εὐχαριστῶ παρὰ πολὺ
 I am very glad, χαίρω παρὰ πολὺ
 I am hungry, πεινῶ I am thirsty, διψῶ
 I am sorry, λυπούμαι to your health!, εἰς ὑγίαν σας!
 where are you going?, ποῦ πάτε;
 do you speak Greek?, ὁμιλεῖτε Ἑλληνικά;
 very little, πολὺ ὀλίγον
 I understand, ἐννοῶ I have not, δὲν ἔχω
 what time is it?, τί ὥρα εἶνε; it is 3 o'clock, εἶνε τρεῖς ἢ ὥρα
 it is bad weather, εἶνε κακὸς καιρὸς
 it is warm, κάμνει ζέσθη it is cold, κάμνει κρῖο
 it is a fine night, εἶνε ὡραία νύκτα
 give me, δόστέ μου come here, ἐλάτε ἐδῶ
 so long (lit. health to you!), γειά σου.

ALBANIAN

ALPHABET AND SOUNDS — There is little uniformity in the orthography of the various Albanian dialects, of which the principal two are Gheg, spoken in northern Albania, and Tosk, spoken in the south. In a form of standardized orthography adopted by the Albanian Committee in 1908, Roman characters are used, with an alphabet lacking the letter w. The seven vowels are: a, e, ë, i, o, u, y; these have approximately the sound of father, met, French *feu*, machine, obey, food, and French *sur*, respectively. Consonants and consonant groups are approximately as in English, with the following modifications: dh = *this*; gj = hog-yard; j = *yes*; nj = *onion*; q = stock-yard. The accent of Albanian usually falls on the next to the last syllable, but there are numerous words in which it falls on the last or third from the last.

GRAMMATICAL STRUCTURE — Albanian has two genders, masculine and feminine, with traces of a former neuter appearing only in the plural. The indefinite article is *një*, “a” or “an”: *një shtëpi*, a house. The definite article is suffixed to the noun: *mik*, friend, *miku*, the friend. The case-system of Albanian includes a nominative, a genitive-dative, and an accusative: *mik*, friend; *miku*, the friend; *mikut*, of or to the friend; *mikun* or *miknë*, the friend (object).

The adjective is normally not declined, but requires a prefixed form of the article: *një njeri i mirë*, a good man (lit. a man the good). The adjective often serves as an adverb: *unë jam mirë*, I am well.

The numerals are as follows: *një*, *dy*, *tre*, *katër*, *pesë*, *gjashhtë*, *shtatë*, *tetë*, *nëntë*, *dhjetë*; *një-mbë-dhjetë* (11); *njëzët* (20); *një-qint* (100); *një-mijë* (1000).

The verb shows considerable complexity of tenses and moods. The present indicative of a regular verb such as *hap*, to open, is as follows: *hap*, *hap*, *hap*, *hapim*, *hapni*, *hapin*. The verb “to be” has: *jam*, *je*, *është*, *jemi*, *jini*, *janë*. The verb “to have” has: *kam*, *ke*, *ka*, *kemi*, *kini*, *kanë*.

The interrogative form of the verb is formed by prefixing *a*: *a jam?*, am I?; *a íshin*, are they? The negative is formed by prefixing *s'* or *nuk*: *s'jam*, I am not; *nuk do të jem*, I shall not be.

The vocabulary of Albanian indicates considerable borrowing from neighboring tongues (Latin, Italian, Greek, Serbo-Croatian, Turkish). "Gold", for example, is *ar*, and "silver" *ergjënt*; "dog" is *qen*, and "meat" *mish* (Slavic *myaso*); "bad" is *i keq* (Greek *kakós*), along with a more indigenous *i lig*; "body" is *trup* (Slavic); "cup" is *fildxhán* (Turkish *filján*), or *kupë* (Latin *cuppa*).

SAMPLE OF WRITTEN ALBANIAN (John 3.16)

Sepse Perëndia kaq e deshi botën, sa dha Birin' e tij të-vetëmlíndurin, që të mos humbasë kushdó që t'i besojë atij, po të ketë jetë të-përvjetëshme.

WORDS AND PHRASES

greetings, hello, *t'u ngjat jeta*

good day, *mirë dita*

good evening, *mirë mbrëma*

good night, *natën e mirë*

good-bye, *lamtumirë, ditën e mirë*

thank you, *ju falem nderit*

excuse me, *më falni*

please, *ju lutem*

do you understand?, *a më kuptoni?*, *a mer vesh?*

I don't understand, *unë s'kuptoj*, *unë nuk kuptoj*

do you speak English?, *a flisni inglisht?*

yes, *po*

no, *jo*

how much?, *sá bën?*, *sá kushtón?*

**EUROPEAN LANGUAGES OF THE
URAL-ALTAIC GROUP**

Finnish, Hungarian and Turkish form the three western-most European spearheads of the great Ural-Altaiic family of northern and central Asia. Other languages of this group are spoken in northern and eastern Europe (Lapp, Estonian, Livonian, Permian, Mordvinian, Cheremiss, etc.), but they have few speakers and scant cultural or commercial importance.

While a fairly close bond exists between Finnish, Estonian and Livonian, the unity among the other members of the family is more a matter of certain peculiarities in sound and grammatical structure than of vocabulary. Indeed, some linguists reject the fundamental unity of the Ural-Altaiic family, and prefer to classify the Finno-Ugric languages separately from the Altaic. Illustrative of the vocabulary differences among the three main European tongues of the group are the following:

English	Finnish	Hungarian	Turkish
apple	<i>omena</i>	<i>alma</i>	<i>elma</i>
arm	<i>käsivarsi</i>	<i>kar</i>	<i>kol</i>
fire	<i>tuli</i>	<i>tűz</i>	<i>ateş</i>
one	<i>yksi</i>	<i>egy</i>	<i>bir</i>
two	<i>kaksi</i>	<i>kettő</i>	<i>iki</i>
three	<i>kolme</i>	<i>három</i>	<i>üç</i>
four	<i>neljä</i>	<i>négy</i>	<i>dört</i>
five	<i>viisi</i>	<i>öt</i>	<i>beş</i>
six	<i>kuusi</i>	<i>hat</i>	<i>altı</i>
seven	<i>seitsemän</i>	<i>hét</i>	<i>yedi</i>
eight	<i>kahdeksan</i>	<i>nyolc</i>	<i>sekiz</i>
nine	<i>yhdeksän</i>	<i>kilenc</i>	<i>dokuz</i>
ten	<i>kymmenen</i>	<i>tíz</i>	<i>on</i>
eleven	<i>yksitoista</i>	<i>tizenegy</i>	<i>on-bir</i>
twelve	<i>kaksitoista</i>	<i>tizenkettő</i>	<i>on-iki</i>
twenty	<i>kaksikymmentä</i>	<i>húsz</i>	<i>yirmi</i>
one hundred	<i>sata</i>	<i>száz</i>	<i>yüz</i>
one thousand	<i>tuhát</i>	<i>ezer</i>	<i>bin</i>

(Languages of this group generally agree in using the *singular* after any numeral: Finnish *kolme poikaa*, three boys; Hungarian *öt fa*, five trees).

In the matter of sounds, the languages of this group generally agree in having some measure of "vowel harmony". This means that the vowel sounds are divided into two or three classes (front, pronounced in the front part of the mouth, such as *ö* or *ü*; back, pronounced in the back part of the mouth, such as *a*, *o*, *u*; and neutral, pronounced in the middle part of the mouth, such as *e*); if the root of the word has a "back" vowel, added suffixes must also contain back vowels; if a front vowel appears in the root, the vowel of the suffix must be changed so as to conform; the "middle" or "neutral" vowels, where they exist, may work with either front or back vowels. This in turn means that practically all suffixes appear in double form, with a front or neutral vowel to conform with a front vowel of the root, and with a back or neutral vowel to conform with a back vowel of the root.

In grammatical structure, these languages generally agree in rejecting the concept of gender, and in indicating noun and verb relations by the piling on of suffix upon suffix (the so-called "agglutinative" process), to a far greater degree than is the case in the Indo-European tongues.

The following is a sample of the same Biblical passage (John 3.16) in the three main Ural-Altaic tongues, with a few minor European languages of the group added for purposes of comparison:

Finnish: *Sillä niin Jumala on rakastanut maailmaa, että hän antoi ainokaisen Poikansa, jotta kuka ikinä häneen uskoo, se ei hukkuisi, vaan saisi iankaikkisen elämän.*

Estonian: *Sest nõnda on Jumal maailma armastanud, et tema oma ainusündinud Poja on annud, et ükski, kes tema sisse usub, ei pea hukka saama, waid et igawene elu temal peab olema.*

Livonian: *Sīepierast ku Jumal um nei māilmō ārmastōn, ku um andōn āinagisyndōn Pūoga, algō amšti, kis uskōbōd tām pāl, milykš ukkō lāgō, aga amadōn volgō igani jelami.*

Lapp: *Tastko nū rakisti Ibmil mailmi, atti son addi aidnu riegadam Parnis, amas oktage, kutte sudnji osku, kađutussi šaddat, muttu vai son ožuši agalaš aellim.*

Hungarian: *Mert úgy szereté Isten e világot, hogy az ő egyetlenegy szülött Fiját adná, hogy minden, valaki hiszen ő benne, el ne vesszen, hanem örök életet vegyen.*

Turkish: *Zira Allah dünyayı öyle sevdi ki biricik Oğlunu verdi; ta ki ona her iman eden helâk olmayıp ancak ebedî hayata malik olsun.*

FINNISH

ALPHABET AND SOUNDS: a, d, e, g, h, i, j, k, l, m, n, o, p, r, s, t, u, v(w), y, ä, ö.

Vowels are short unless doubled.

a = hut; aa = father; e = met; ee = first part of late; i = bit; ii = machine; o = obey; oo = first part of hope; u = bull; uu = boot; y = Fr. tu; yy = Fr. sūr; ä = hat; ää = had (prolonged); ö = Fr. feu; öö = Fr. peur. Consonants are approximately as in English; j = yes; h = Germ. ach. All double consonants must be *sounded* double, as in Italian.

The Finnish stress is always on the first syllable of the word.

By the process of vowel harmony, the vowels are divided into: back (a, o, u); neutral (e, i); front (ä, ö, y). If the first syllable of the word has a back vowel, all other syllables must have back or neutral vowels; if a front vowel appears in the first syllable, the others must have front or neutral vowels. This means two forms to practically all endings; the ablative termination, for example is *-lta* or *-ltä*, the first reserved for words having a, o, u in their roots, the latter for words having ö, ä, y: *maa*, land; ablative *maalta*; but *työ*, work; ablative *työltä*.

GRAMMATICAL STRUCTURE.

Finnish has two numbers, but no gender distinction. Fifteen cases appear; nominative (subject); partitive (denoting "some"); genitive-accusative (denoting possession or the direct object); inessive (denoting "in"); elative (denoting "from"); illative (denoting place to which); adessive (denoting place on which, or means by which); ablative (denoting motion 'from'); allative (denoting motion towards); abessive (denoting absence of, "without"); prolativ (denoting motion along); translative (denoting a change of state); essive (denot-

ing a continued state of being); comitative (denoting accompaniment, "with"); instructive (denoting means by which). Each case has its own ending, which is the same in the singular and in the plural. The latter is formed in the nominative by adding *-t* to the root, but in all other cases by adding *-i* to the root, then adding the same ending as in the corresponding cases in the singular; thus *puu*, "tree", has a nominative plural *puut*, but in all other plural cases *pui-*, followed by the ending of the particular case; while the ablative singular is *puu-lta*, the ablative plural is *pui-lta*. The complete declension of *puu*, is as follows, with the cases appearing in the order outlined above:

puu, *-ta*, *-n*, *-ssa*, *-sta*, *-hun*, *-lla*, *-lta*, *-lle*, *-tta*, (*pui*)-*tse*, *-ksi*, *-na*, (*pui*)-*ne*, *-n*; plural: nominative, *puut*; other cases: *pui-ta*, *-tten*, *-ssa*, *-sta*, *-hin*, *-lla*, *-lta*, *-lle*, *-tta*, *-tse*, *-ksi*, *-na*, *-ne*, *-n*.

The Finnish adjective is completely declined, by a process similar to that of the noun. The comparative stem is formed by adding *-mpa* (*-mpä*) to the positive; the superlative stem by adding *-impa* (*-impä*); *huono*, bad; *huonompa-*, worse; *huonoimpa-*, worst. These comparatives and superlatives are fully declined, as are also the numerals (see p. 429).

The personal pronouns, also fully declined, are: *minä*, I; *me*, we; *sinä*, you (singular); *te*, you (plural); *hän*, he, she, it; *he*, they.

The possessive is usually expressed by suffixes added to the inflected noun; these suffixes are: *-ni*, my, mine; *-mme*, our, ours; *-si*, your, yours; *-nne*, your, yours (pl.); *-nsa* (*-nsä*), his, her, its, their; e. g. *puu*, tree; partitive plural *puita*, of the trees; *puitamme*, of our trees.

Demonstratives are *tämä* (pl. *nämät*, *näitä*, etc.; fully inflected), this, these; *tuo* (pl. *nuot*, *noita*, etc.), that, those; *se* (partitive *sitä*; plural *ne*, *niitä*, etc.), that, those.

Interrogatives are *kuka* and *ken*, "who?", *mikä*, "what?", and *kumpi*, "which?". The chief relative is *joka*, who, which, that; all are fully inflected.

The Finnish verb has several moods and tenses, with a passive which is used only impersonally, and a negative conjugation which differs completely from the affirmative (*saavat*, they receive; but *eivät saa*, they-do-not receive). The personal endings are usually as follows: *-n, -t, -, -mme, -tte, -vat (-vät)*. *Saa*, to receive, has, in the present indicative: *saan, saat, saa, saamme, saatte, saavat*; with a negative: *en saa, et saa, ei saa. emme saa, ette saa, eivät saa*.

IDENTIFICATION

Finnish is identified in written form by its double vowels and double consonants, by its unlauded vowels *ä* and *ö*, by its frequent *-en* endings, and by the *absence* of certain letters (*b, c, f, q, x, z*).

SPECIAL EXPRESSIONS

good morning, *hyvää huomenta*
 how are you?, *kuinka voitte?*
 very well, thank you, *vallan hyvin, kiitoksia kysymästä*
 good bye, *hyvästi*
 do you understand me?, *ymmärrätekö minua?*
 what did you say?, *mitä te sanoitte?*
 what do you want?, *mitä te tahdotte?*
 I beg your pardon, *minä pyydän anteeksi*
 excuse me, *suokaa anteeksi*
 don't mention it, *ei ansaitse*
 never mind, *se ei tee mitään*
 I am glad, *se ilahduttaa minua*
 I am sorry, *se pahoittaa minua*
 can you tell me?, *voitteko sanoa minulle?*
 no, *ei*
 yes, *kyllä*
 now, *nyt*
 at once, *heti* (soon, *pian*)
 always, *aina*
 enough, *riittää*

yet, *vielä*

the weather is fine, *ilma on kaunis*

it is very cold, *on kovin kylmä*

what time is it?, *mitä kello on?*

it is five o'clock, *kello on viisi*

thank you, *kiitoksia*

which is the shortest way, *mikä on lyhin tie?*

go straight, *suoraan eteenpäin*

never, *ei koskaan*

HUNGARIAN

ALPHABET AND SOUNDS — a, á, b, c, d, e, é, f, g, h, i, í, j, k, l, m, n, o, ó, ö, ő, p, r, s, t, u, ú, ü, ű, v, x, y, z, cs, cz (tz), ds (dzs), gy, ly, ny, sz, ty, zs.

Vowels bearing the accent mark are long; other vowels are short.

a = not; á = father; e = met; é = fate; i = pin; í = machine; o = obey; ó = go; ö = Fr. *feu*; ő = Fr. *peur*; u = bull; ú = food; ü = Fr. *tu*; ű = Fr. *sûr*.

c, cz, tz = *its*; g = *good*; s = *sure*; cs = *church*; ds, dzs = *gin*; gy = *did you*; ly = *million*, or, more commonly, *yard*; ny = *onion*; sz = *so*; ty = *hit you*; zs = *measure*.

Double consonants must be pronounced double, as in Italian. Long vowels must be pronounced long, even though unstressed. The Hungarian stress is always on the *first* syllable of the word. Accent marks do not indicate stress, but vowel-length.

For purposes of vowel-harmony, a, á, o, ó, u, ú, are considered back vowels; é, i, í neutral; and e, ö, ő, ü, ű front. The vowel of the root determines the nature of the vowel of the suffix: *ház*, house; *ház-ban*, in the house; but *kert*, garden; *kert-ben*, in the garden.

GRAMMATICAL STRUCTURE.

Hungarian has two numbers and no concept of gender. Unlike Finnish and Turkish, however, Hungarian has both a definite and an indefinite article; the former is *a* (before consonants), *az* (before vowels), for all nouns, singular or plural: *a ház*, the house; *a házak*, the houses. The indefinite article is *egy*, which also means "one".

The plural is generally formed by the suffix *-k*, preceded by various vowels (*-ak*, *-ok*, *-ek*, *-ök*). Officially, Hungarian has four "cases", nominative, genitive, dative, and accusative; in reality, since all ideas of place where, to which, from which, etc. are indicated not by prepositions, but by suffixes, or postpositions, the actual number of possible case-forms in Hunga-

rian equals or surpasses that of Finnish; as in Finnish, these case-endings or postpositions are added on to the plural suffix: *a ház*, the house; *a ház-ak*, the houses; *a ház-ak-nak*, to the houses; *a ház-ak-ban*, in the houses; *a ház-ak-ból*, from the houses; etc.

The adjective is invariable, unless used predicatively, in which case it takes the plural suffix, but no case-suffix: *a nagy asztal-ok*, the large tables; *az asztalok nagyok*, the tables are large. The comparative is formed by the suffix *-bb* (*-abb*, *-ebb*), added to the positive; the superlative by prefixing *leg-* to the comparative: *jó*, good; *jobb*, better; *legjobb*, best.

Personal pronouns are as follows: *én*, I; *nekem*, to me; *engem*, me; *mi*, we; *nekünk*, to us; *minket*, us; *te*, you (sg.); *neked*, to you; *téged*, you (acc.); *ti*, you (pl.); *nektek*, to you; *titeket*, you (acc.); *ő*, he or she; *neki*, to him or her; *őt*, him, her; *ők*, they; *nekik*, to them; *öket*, them.

The possessive pronoun consists of a series of suffixed endings: *könyv*, book; *könyv-em*, my book; *könyv-ünk*, our book; *könyv-eim*, my books; *könyv-eink*, our books.

The chief demonstratives (used *with* the article when they are adjectives) are *ez* (pronoun: *emez*), this, and *az* (pronoun: *amaz*) that: *ez az ember*, this man; *az az ember*, that man; *ezek az emberek*, these men.

Interrogative pronouns are: *ki*, who?; *mely*, which?, what?; *melyik*, which?; *mi*, what? These are turned into relatives by prefixing *a*: *aki*, who; *amely*, which, that, etc.

The Hungarian verb appears in numerous tenses and moods, with the object pronoun normally incorporated in the verb: thus, *verni*, to beat, has the following present indicative if no definite object pronoun is implied: *verek*, *versz*, *ver*, *verünk*, *vertek*, *vernek*, I beat, you beat, etc.; but if the meaning is "I beat it", "you beat it", etc., the forms become: *verem*, *vered*, *veri*, *verjük*, *veritek*, *verik*. Furthermore, the Hungarian verb may assume a variety of aspects: *ír*, he writes; *irat*, he causes to write; *irogat*, he writes (repeatedly); *irkál*, he scrib-

bles, plays at writing; *irhat*, he may write, etc. The negative is formed by prefixing *nem*, not, to the verb: *nem ír*, he does not write.

IDENTIFICATION

Hungarian is readily identified in written form by its long and short unlauded vowels (ö, ő, ü, ű), and, to a lesser degree, by certain consonant groups (cs, gy, zs, dzs). In spoken form, stress on the first syllable, together with long vowels further on in the word, and the abundance of middle vowel sounds (ö, ü), as well as the frequent endings in *-ak*, *-ok*, *-unk*, *-ek*, *-ik*, and the relative length of Hungarian words, caused by the piling on of suffixes, give clues to the nature of the language.

SPECIAL EXPRESSIONS

please, *legyen szives, kérem*; thank you, *köszönöm*
 you're welcome, *szivesen; kérem szépen*
 don't mention it, *szivesen; nincs mit; nem jelent semmit;*
nem baj
 yes, *igen*; no, *nem*
 excuse me, *bocsánat, bocsánatot kérek, bocsásson meg*
 give me, *adjon kérem* .
 tell me, *mondja kérem*
 do you speak Hungarian?, *beszél ön magyarul?*
 a little, *egy keveset*
 what is the matter?, *mi a baj?, mi történt?*; nothing. *semmi*
 pleased to meet you, *örvendek*
 I am sorry, *sajnálom*; I am glad, *örülök*
 how are you?, *hogyan érzi magát?, hogy van?*
 very well, thanks, and you?, *köszönöm, nagyon jól, és ön?*
 I am ill, *beteg vagyok*

 I'm thirsty, *szomjas vagyok*
 I'm cold, *fázom*; it's cold, *hideg van*
 it's warm, *meleg van*; I'm warm, *melegem van*
 what is your name?, *mi az ön neve?*
 certainly, *persze*
 show me, *mutassa nekem*
 do you understand?, *érti ön?*
 I don't understand, *nem értem*
 do you know?, *tudja ön?*
 I don't know, *nem tudom*
 very little, *nagyon kevés, nagyon keveset*
 what do you want?, *mit kíván ön?; mit parancsol?; mi tetszik?*
 too bad!, *kár; igazán sajnós; igazán sajnálom*
 it's fine weather, *szép idő*
 your health!, *egészségérc!*

TURKISH

ALPHABET AND SOUNDS — a, b, c, ç, d, e, f, g, ğ, h, i, ı, j, k, l, m, n, o, ö, p, r, s, ş, t, u, ü, v, y, z.¹

a = father; e = met or hand; i = machine; ı = Russian *ы*; o = obey; ö = Fr. *feu*; u = food; ü = Fr. *mur*; c = John; ç = church; g = good; ğ is the voiced counterpart of the unvoiced German *ach*; h = hot or German *ach*; j = measure; s = son; ş = sure; y = yes.

A circumflex accent is occasionally used on a vowel, usually to indicate palatalization of a preceding *k* or *g* (in Arabic and Persian loan-words): *kâmil*, pron. *kjamil*, "complete". The stress of Turkish is usually on the *last* syllable of the word.

GRAMMATICAL STRUCTURE

Turkish has no article, definite or indefinite, and no concept of gender. For purposes of vowel-harmony, a, o, ı, u are considered back vowels; e, i, ö, ü front vowels.

The plural suffix is *-lar* if the preceding syllable contains a back vowel, *-ler* if it contains a front vowel; *baba*, father; *babalar*, fathers; *gün*, day; *günler*, days. Officially, Turkish has six "cases" (nominative, genitive, dative, accusative, ablative, locative); but since postpositions, instead of prepositions, are used to indicate all sorts of relations (up to, with, on, without, instead of, about, etc.), and since many of these are added on to the noun in the plural as well as in the singular, it may almost be said that Turkish has as many separate cases as it has postpositions. Like Finnish and Hungarian, Turkish has identical suffixes in the singular and in the plural for its six official cases: *-n* preceded by whatever vowel may be required by vowel harmony is fairly universal in the genitive of both numbers;

1. This is the modern romanized Turkish alphabet, devised by Mustafa Kemal in 1928; before his time, Turkish was written in a modified version of the Arabic alphabet.

the dative has *-a* or *-e*, according to the nature of the root-vowel; the accusative usually ends in *i*, *i*, *u*, *ü*; while *-dan* or *-den* is universal in the ablative, and *-da* or *-de* in the locative. A typical Turkish noun, *dil*, language, has the following scheme:

Singular: *dil*, *-in*, *-e*, *-i*, *-den*, *-de*.

Plural: *dil-ler*, *-ler-in*, *-ler-e*, *-ler-i*, *-ler-den*, *-ler-de*.

The adjective is completely indeclinable: *güzel at*, a fine horse, *güzel atlar*, fine horses; *güzel atlara*, to the fine horses. The comparative is formed by placing *daha*, the superlative by placing *en*, before the positive: *güzel*, fine; *daha güzel*, finer; *en güzel*, finest.

Personal pronouns, which are declined by the same system of endings as nouns, are: *ben*, I; *biz*, we; *sen*, you (fam. sg.); *siz*, you (pl.); *o*, he, she, it; *onlar*, they.

The possessive is indicated, as customary in Ural-Altai languages, by a suffix: *baba*, father; *babam*, my father; *baban*, thy father; *babası*, his (her) father; *babamız*, our father; *babanız*, your father; *babaları*, their father. These forms are then completely declined (*babam*, my father; *babamın*, of my father; *babama*, to my father; *babalarım*, my fathers; *babalarımın*, of my fathers; *babalarımın*, to my fathers, etc.).

The chief demonstrative pronoun is *bu* (*bunun*, *buna*, *bunu*, etc.), this, that, these, those. The chief relative is *ki*, who, which, that; the chief interrogatives are *kim*, who?; *ne*, what?; *hangi*, which?

The Turkish verb has an infinitive ending in *-mek* or *-mak*. The passive is formed by means of the suffix *-l*, the negative by means of *-ma-* or *-me-* (*sevmek*, to love; *sevilmek*, to be loved; *sevmemek*, not to love; *sevilmemek*, not to be loved). Reciprocal, causative, reflexive, and many other forms of conjugations appear, including the "impossible" one (*sevememek*, to be unable to love). Numerous tenses and other forms appear, corresponding roughly to the various tenses, and to the indicatives, optatives and subjunctives of the Indo-European languages. A typical "present", that of *sevmek*, runs as follows: *sev-erim*, *-ersin*, *-er*, *-eriz*, *-ersiniz*, *-erler*.

IDENTIFICATION

Turkish, in its modern written form, may be identified by its two distinctive characters, *ı* and *ğ*. The characteristic plural in *-lar* and *-ler*, and ablatives in *-dan*, *-den* are also useful.

SPECIAL EXPRESSIONS

good morning, good afternoon, *gün aydın*
 good evening, *tün aydın*
 good night, *geceniz hayır olsun, allah rahatlık versin*
 how are you?, *nasılsınız?*; certainly, *elbet, tabii, şüpesiz*
 well, thank you, *iyiyim, teşekkür ederim*
 please, *lütfen*; you're welcome, *bir şey değil*
 here is, here are, *işte burada* (here is the book — *işte kitap burada*); there is, there are, *vardır*
 where is?, *nerededir?*; what is the matter?, *ne var?*
 how do I go to Istanbul?, *istanbul'a nasıl gidilir?*
 yes, *evet*; no, *hayır, yok*
 how much is it?, *kaç? fiyatı kaç?*
 why?, *niçin? neden?*; when?, *ne zaman?*; where, *nerede?*
 today, *bugün*; yesterday, *dün*; tomorrow, *yarın*
 to the right, *sağa*; to the left, *sola*
 straight ahead, *dos doğru, doğru*
 what time is it?, *saat kaçtır?*; it is 6 o'clock, *saat altıdır*
 I'm hungry, *açım, acıktım, karnım aç*
 I'm thirsty, *susadım*; I'm ill, *hastayım*
 do you speak Turkish?, *Türkçe konuşmuyormusunuz?*
 a little, *biraz*; very little, *çok az, pek az*
 tell me, *bana söyleyiniz*; show me, *bana gösteriniz*
 do you understand?, *anlıyorsunuz?*
 I don't understand, *anlamıyorum*
 do you know?, *biliyorsunuz?*; I don't know, *bilmiyorum*
 excuse me, *afedersiniz*; don't mention it, *birşey değil*
 what do you want?, *ne istiyorsunuz?*; never mind, *zarar yok*
 too bad!, *çok fena, çok yazık*; I'm sorry, *mütesirim*
 give me, *bana veriniz*; I want, *istiyorum*
 good bye, *allaha ısmarladık*; (reply) *güle güle*

THE BALTIC LANGUAGES — LITHUANIAN, LETTISH

From a practical standpoint, these tongues are of little importance, being spoken by about 3,000,000 and 2,000,000 people, respectively. They are often linked to the Slavic tongues, from which, however, they diverge to a considerable degree. Their relationship to each other and to the languages of the Slavic group may be inferred from the following examples:

English	Lithuanian	Lettish	(Russian)
brother	<i>brólis</i>	<i>brālis</i>	(<i>brat</i>)
house	<i>nāmas</i>	<i>nams</i>	(<i>dom</i>)
mother	<i>mótina</i>	<i>māte</i>	(<i>mat'</i>)
father	<i>tévas</i>	<i>tēvs</i>	(<i>otéts</i>)
fish	<i>žuvìs</i>	<i>zivs</i>	(<i>rýba</i>)
heart	<i>širdìs</i>	<i>sirds</i>	(<i>sérdtse</i>)
land	<i>žēmė</i>	<i>zeme</i>	(<i>zemlyá</i>)
fire	<i>ugnìs</i>	<i>uguns</i>	(<i>ogón'</i>)
man	<i>výras</i>	<i>vīrs</i>	(<i>mužčina</i>)
one	<i>vienas</i>	<i>viens</i>	(<i>odín</i>)
two	<i>dù</i>	<i>divi</i>	(<i>dva</i>)
three	<i>trīs</i>	<i>trīs</i>	(<i>tri</i>)
four	<i>keturì</i>	<i>četri</i>	(<i>četýre</i>)
five	<i>penkì</i>	<i>pieci</i>	(<i>pyat'</i>)
six	<i>šeši</i>	<i>seši</i>	(<i>šest'</i>)
seven	<i>septynì</i>	<i>septiņi</i>	(<i>sem'</i>)
eight	<i>aštuonì</i>	<i>astoņi</i>	(<i>vósem'</i>)
nine	<i>devynì</i>	<i>deviņi</i>	(<i>dévyat'</i>)
ten	<i>dėšimt</i>	<i>desmit</i>	(<i>désyat'</i>)
eleven	<i>vienúolika</i>	<i>vienpadsmit</i>	(<i>odínnadtsat'</i>)
twelve	<i>dvýlika</i>	<i>divpadsmit</i>	(<i>dvenádtsat'</i>)
twenty	<i>dvidešimt</i>	<i>divdesmit</i>	(<i>dvádtsat'</i>)
hundred	<i>šimtás</i>	<i>simts</i>	(<i>sto</i>)

Both languages are heavily inflected, with a declensional system for nouns which in Lettish includes nominative, genitive, dative, accusative and locative, and which in Lithuanian in-

cludes the same five cases with the addition of vocative and instrumental. A sample of the declensional system of the two languages is as follows:

Lithuanian: *širdis*, heart: Singular: Nom. *širdis*; Gen. *širdiės*; Dat. *širdžiai*; Acc. *širdį*; Voc. *širdiē*; Instr. *širdimi*; Loc. *širdyje*; Plural: Nom. & Voc. *širdys*; Gen. *širdžių*; Dat. *širdims*; Acc. *širdis*; Instr. *širdimis*; Loc. *širdyse*.

Lettish: *sirds*, heart: Singular: Nom. *sirds*; Gen. *sirds*; Dat. *sirdij*; Acc. *sirdi*; Loc. *sirdī*; Plural: Nom. *sirdis*; Gen. *siržu*; Lat. *sirdīm*; Acc. *sirdis*; Loc. *sirdīs*.

The verb system is fully developed in both languages, with a wealth of tenses and moods, and copious participles, gerunds, and other verbal forms.

IDENTIFICATION

Distinctive of Lithuanian are the following characters: *ą, č, ę, é, į, š, ū, ž*, in addition to the letters of the English alphabet outside of *q, w*. Lithuanian uses three accent marks to indicate an accentuation which is not merely stress, but also intonation: the grave accent (`) is used only over short vowels; the acute (´) indicates a long vowel with a *falling* tone of the voice; the circumflex (˘) indicates a long vowel with a *rising* tone of the voice. If a short vowel is followed in the same syllable by *n, m, l* or *r*, it is customary for the *consonant* to bear the circumflex accent: *dviēm pirštam*, with two fingers. While these accent marks do not usually appear in the written language, they are fully characteristic; so are the four vowels with the hook beneath, indicating a former nasalization which today no longer exists (*ą, ę, į, ū*; Polish has only two such symbols: *ą, ę*).

Distinctive of Lettish is the fact that four vowels, if long, bear the mark of length (*ā, ē, ī, ū*). The following symbols appear: *č, dz dž, ģ, ķ, ļ, ņ, ŗ, š, ž*. The spoken accent of Lettish is invariably on the first syllable of the word, unlike that of Lithuanian, which may fall anywhere.

SAMPLES OF THE WRITTEN LANGUAGES

Lithuanian (without accent marks): Taip Dievas mylėjo pasaulį, kad savo viengimusių sūnų davė, kad visi į jį tikintieji nepražūtų, bet turėtų amžinąjį gyvenimą.

Lettish: Juo tik ļuoti Dievs pasauli mīlējis, ka viņš savu vienpiedzimušuo dēlu devis, lai neviens, kas vinam tic, nepazustu, bet dabūtu mūžīguo dzīvību.

	Lithuanian	Lettish
good day, miss	<i>labá diená, panēle</i>	<i>labdien, jaunkundz</i>
good morning	<i>lábás rýtas</i>	<i>labrīt</i>

speak more slowly	<i>kalbēkit lēčiau</i>	<i>runājiet lēnāk</i>
careful!	<i>atsargiai!</i>	<i>uzmanaties!</i>

THE CELTIC LANGUAGES

These consist of Irish, the official language of Eire, with its approximately 3,000,000 inhabitants, most of whom, however, speak English as well; Scottish Gaelic, spoken by perhaps a hundred thousand people in the Highland region of Scotland; Manx, the dialect of the Isle of Man; Welsh, spoken by perhaps 1,000,000 people in Wales, who also normally speak English; and Breton, spoken in French Brittany by probably not more than 1,000,000 people most of whom also speak French. Cornish, the former Celtic tongue of Cornwall, is extinct.

While these tongues all belong to the Celtic division of Indo-European, Irish, Gaelic and Manx form part of the Goidelic group of Celtic, while Welsh, Breton, and Cornish belong to the Brythonic group. The divergences between Irish and Scottish Gaelic are less pronounced; those between Welsh and Breton more striking. In all the Celtic languages, without exception, the student is faced with exceedingly intricate rules of pronunciation, which in the Goidelic group are complicated by an orthography which is archaic and no longer corresponds to the actual pronunciation. Goidelic consonants frequently assume a double sound (described as "broad" and "slender"), according to the nature of the following vowel; all this means is that before the front-vowels, e, i, there is a tendency for the consonant to assume a palatalized sound (Irish *cailín*, girl, pronounced *kolyin*). But in addition to this, the Celtic tongues often undergo aspiration or mutation ("eclipsis" or "lenition") of initial consonants in accordance with the final sound of the preceding word (Scots Gaelic *tarbh geal*, white bull, but *bó gheal*, white cow; *teine*, fire, but *ar dteine*, pronounced *ar deine*, our fire; Irish *fuil*, blood, but *ar bhfuil*, pronounced *ar wil*, our blood; Welsh *pen*, head, but *fy mhen*, my head; Breton *kalon*, heart, but *me halon*, my heart, *é galon*, his heart; these are only a few easy examples of an extremely complicated system).

The Celtic languages share with the Romance group the feature of having only two genders, masculine and feminine,

and of having the adjective more frequently after than before the noun. But while Irish and Scots Gaelic have four distinct cases (nominative, genitive, dative, vocative), Welsh and Breton have practically reduced the noun to a single case. The verb system is elaborate, with abundant tenses and moods. The Brythonic tongues favor accentuation on the next to the last syllable, save for one dialect of Breton, which prefers final accentuation. The Irish accent is initial.

The relationship of the three major Celtic tongues to one another and to the other languages of the Indo-European family may be inferred from the following list of common words, and from the translations of John 3.16 which follow:

English	Irish	Welsh	Breton
arm	<i>brac</i>	<i>braich</i>	<i>bréac'h</i>
big	<i>mór</i>	<i>mawr</i>	<i>meûr</i>
black	<i>dubh</i>	<i>du</i>	<i>dû</i>
brother	<i>bráthair</i>	<i>brawd</i>	<i>breûr</i>
family	<i>teaghlach</i>	<i>teulu</i>	<i>tiégez</i>
fire	<i>teine</i>	<i>tân</i>	<i>tân</i>
friend	<i>cara</i>	<i>câr</i>	<i>kâr</i>
full	<i>lán</i>	<i>llawn</i>	<i>leûn</i>
one	<i>aon</i>	<i>un</i>	<i>un, an, eunn</i>
two	<i>dó (or dá-)</i>	<i>dau</i>	<i>daou</i>
three	<i>trí</i>	<i>trī</i>	<i>trī</i>
four	<i>ceathair</i>	<i>pedwar</i>	<i>péder</i>
five	<i>cúig</i>	<i>pump</i>	<i>pemp</i>
six	<i>sé</i>	<i>chwēch</i>	<i>c'houéac'h</i>
seven	<i>seacht</i>	<i>saith</i>	<i>seic'h (seiz)</i>
eight	<i>ocht</i>	<i>ŵyth</i>	<i>eiz</i>
nine	<i>naoi</i>	<i>nāw</i>	<i>naô</i>
ten	<i>deich</i>	<i>dēg</i>	<i>dég (dēk)</i>
eleven	<i>aondéag</i>	<i>un-ar-ddeg</i>	<i>unnék</i>
twelve	<i>dódhéag</i>	<i>deuddeg</i>	<i>deuzek</i>
twenty	<i>fiche</i>	<i>ugain</i>	<i>ugeñt</i>
eighty	<i>ceithre fichid</i>	<i>pedwar ugain</i>	<i>péder ugeñt</i>
hundred	<i>céad</i>	<i>cant</i>	<i>kañt</i>

Irish (in transcription): *óir do ghrádhúigh Dia an saoghal chómh mór sin, go dtug sé a Aon-Mhac féin, ionnas, gach duine creidfeadh ann, nach gcaillfidhe é, acht go mbéadh an bheatha shíorraidhe aige.*

Scots Gaelic: *Oir is ann mar sin a ghràdhaich Dia an saoghal, gu'n d'thug e 'aon-ghin Mhic féin, chum as ge b'e neach a chreideas ann, nach sgriosar e, ach gu'm bi a' bheatha shìorruidh aige.*

Manx: *Son lheid y ghraih shen hug Jee da'n theihll, dy dug eh e ynrycan Vac v'er ny gheddyn, nagh jinnagh quoi-erbee chredjagh aynsyn cherraghtyn, agh yn vea ta dy bragh farraghtyn y chosney.*

Welsh: *Canys felly y carodd Duw y byd fel y rhoddodd efe ei unig-anedig Fab, fel na choller pwy bynnag a gredo ynddo ef, ond caffael ohono fywyd tragwyddol.*

Breton: *Rag Doue hen deuz karet kement ar bed, ma hen deuz roet he Vab-unik, abalamour da biou benag a gredo ennhan na vezo ket kollet, mes ma hen devezo ar vuez eternal.*

SAMPLE OF PRINTED IRISH

Óir do ghrádhúigh Dia an saoghal cómh mór sin, go dtug sé a Aon-Mhac féin, ionnas, gach duine creidfeadh ann, nach gcaillfidhe é, acht go mbéadh an bheatha shíorraidhe aige. Óir ní cum bheiteamhar do tabairt ar an saoghal do cum Dia a Mhac uair; acht cum go saorfaide an saoghal crío. An té creidear ann ní tugtar bheic air: an té nac sgreideann acá bheic tabairt ar céana féin, toisc nár creio sé i n-aímm Aon-Mhic Dé. Agus is i seo an bheic, go dtéimís an ról ar an saoghal, agus sur annsa leis na daoine an dorcáct 'nár ról; toisc a ngníomhará beic go n-olc. Óir gach duine cleactar an t-olc bíonn fuat aise do'n trol, agus ní tís sé cum an trolair, ar easla go noctfaide a ngníomhará.

IRISH

ALPHABET — a, b, c, d, e, f, g, h, i, l, m, n, o, p, r, s, t, u.

An accent mark over a vowel indicates length: *mór*, big. A dot over a consonant indicates aspiration; this aspiration never corresponds to the sound of the original consonant followed by *h*; an aspirated *t*, for example, has the sound of ordinary *h*: *teine*, fire; but *mo theine* (pronounced *mo heine*), my fire; an aspirated *m*, due to the loss of the nasal, has the sound of *v*: *mo mháthair* (pronounced *mo vaher*, my mother). The difficulties of Irish pronunciation, with its aspirated and eclipsed consonants and broad and slender vowels, are illustrated by the Lord's Prayer, with a guide to pronunciation:

Ar n-Athair, atá ar neamh, (go) naomhthar t'ainm;

(Ar nahir, etah er nav, gu naev-har th-an-am;)

(go) *tigidh do ríoghacht;*

(gu dig-ee dhu riachth;)

(go) *n déantar do thoil ar an talamh mar do-ghnithear ar neamh.*

(gu naenthar dhu hel er an tholav mor nihar er nav.)

Tabhair dhúinn a niugh ar n-arán laetheamhail,

(Thouar ghoon inyoo ar naraun laehooil)

agus maith dhúinn ar bh-fiacha

(ogus mah ghoon or viacha)

mar mhaithmid-ne dar bh-féicheamhnaibh féin;

(mor wahamid dhar vaehooniv faen;)

agus na léig sinn a gathughadh,

(ogus nau laeg shin a gohoo)

achul saor sinn ó olc. Amen.

(ochth saer shinn o ulk. Omaen.)

GRAMMATICAL NOTES — The definite article in Irish is *an* in the singular, *na* in the plural. The plural of nouns is often formed by the addition of *-a*, *-ta*, *-e*. Four cases (nominative, genitive, dative, vocative) are still in use.

WELSH

ALPHABET — a, b, c, ch, d, dd, e, f, ff, g, ng, h, i, l, ll, m, n, o, p, ph, r, rh, s, t, th, u, w, y.

Vowels may be long or short. Welsh u = busy or me; w = good or boon; y = fur or curl; both u and y often = Fr. u. Among the consonants, c = cat; ch = German ach; dd = this; f = eve; ff = fire; = go; ll = emphatic l; rh = aspirated r; s = so.

The accent of Welsh is generally on the next to the last syllable.

GRAMMATICAL NOTES — There is no indefinite article. The definite article is *yr* before vowels, *y* before consonants, for both genders and both numbers. The most common plural endings are *-au*, *-on*, *-aid*, *-ydd*. There are no cases in Welsh.

SPECIAL EXPRESSIONS

please, *os gwelwch yn dda* (lit., if it seems good to you)

thank you, *diolch i chwi(chi)*; *diolch*

you're welcome, *croeso i chi*

yes, *ie*, *do*, *oes*

no, *na*, *nage*, *nac oes*

excuse me, *esgusodwch fi*

do you understand?, *a ddeallwch chwi?*, *a ydych yn deall?*

I don't understand, *ni ddeallaf*, *nid wyf yn deall*

do you speak Welsh?, *a siaredwch Gymraeg?*, *a ydych yn siarad Cymraeg?*

a little, *ychydig*

tell me, *dywedwch imi*

give me, *rhoddwch imi*, *rhowch imi*

too bad!, *rhy ddrwg!*, *gresyn!*

how much?, *faint?*

how are you?, *sut hwyl?*, *shwd y'ch chi?*, *sut 'dach chi?*

very well, *da iawn*, *o'r goreu*

I am ill, *yr wyf yn sal, nid wyf yn dda*
 good morning, *bore da*
 good day, *dydd da*
 good afternoon, *prynhawn da, p'nawn da*
 good evening, *dywetydd da*
 good night, *nos da; nos dawch*
 what time is it?, *beth yw'r amser?; faint o'r gloch yw hi?*
 it is five o'clock, *y mae hi'n bump o'r gloch, pump o'r gloch*
yw hi

BRETON

ALPHABET — a, b, d, e, f, g, h, i, j, k, l, m, n, ñ, o, p, r, s, t, u, ù, v, z, ch. The sounds are generally as in French (e. g. j = measure). But g = go; ñ = nasal sound of n; s = so; ù = sound intermediate between u and v.

The Breton accent is usually on the last syllable.

GRAMMATICAL NOTES — The definite article is *en*, (in Vannes; *ar* in other dialects), for both numbers and genders. The most common plural endings are *-éz*, *-en*, *-el*. There are no cases in Breton.

IDENTIFICATION OF THE CELTIC LANGUAGES.

Irish is very easily identified by its distinctive alphabet. Welsh is identified by its use of w and y as vowels and by some of its consonant groups (ch, ll, dd). Breton may be distinguished from its sister Celtic tongues by its frequent *-ek* ending, and by the fact that its aspirated consonants are not marked in writing by such combinations as mh, bh, th, etc.

BASQUE

This mysterious language of northeastern Spain and southwestern France, totally unrelated to any other European tongue, appears in several dialects, spoken by perhaps 1,000,000 people on both sides of the Pyrenees.

ALPHABET AND SOUNDS — There is a standardized alphabet for Spanish Basque, now used also by the French Basques. Roman characters are used, with the five vowels pronounced approximately as in Spanish (the Soule French Basques have a tendency to give *u* its French value); *g* = *go*; *z* = *so*; *tx* = *church*; *j* = harsh guttural *h* in Spain, *yes* in France; *k* = *cat*; *h* is generally silent in Spain, pronounced like *hot* in France. The Basque accent is extremely indefinite, and best described as evenly distributed on all syllables of the word.

GRAMMATICAL NOTES.

The definite article of Basque is *a*, suffixated to the noun: *etxe*, house; *etxea*, the house. Suffixes indicating case-relations are added on to the noun with its article: *gizon*, man; *gizona*, the man; *gizonagandik*, for the man.

The concept of gender is wanting in Basque. The plural number is generally indicated by the suffix *-k*: *gizonak*, the men.

Case relations are indicated by a large variety of suffixes, which are added on to the noun, forming a single word with it: *zaldia*, the horse; *zaldiazen*, of the horse; *zaldika*, on horseback; *gizonakaz*, with the men; *etxeetan*, in the houses.

The adjective is invariable, and follows the noun: *gizon eder bat*, a fine man (lit. man fine a). The comparative is formed by the suffix *-go* plus the preposition *baño*, the superlative by the genitive plural ending *-en* followed by the article *-a*; *handia*, great; *zu handiago baño* (*zu baño handiago*), greater than you; *handiena*, greatest.

The Basque numerals from one to thirteen are as follows: *bat, bi, hirur, laur, bortz, sei, zazpi, zortzi, bederatzi, hamar, hamaika, hamabi, hamahirur*. "Twenty" is *hogei*, "thirty" *hogeita hamar*, "forty" *berrogei*, "hundred" *ehun*.

The Basque verb, despite the fact that it has only two true tenses, present and past, is somewhat complicated by reason of the fact that it incorporates both subject and object pronoun: thus, *ekarri*, to bear, present *d-akar-t*, I bear it (lit. it bear I), *d-akar-k*, you bear it; *n-akar-zu*, you bear me.

A sample of Basque syntax will appear from the following literal translation of Luke 1.62 ("Then they made signs to his father how he would have him called"):

Orduan keinu egin ziezoten haren aitari,
Then sign making they were of him to the father,
nola nahi luen hura dei ledin.
how wish he would have he named he should be.

Two additional samples of Basque, one from the Spanish side of the Pyrenees (Guipuzcoa), the other from the French side (Labourdin) illustrate the nature of the language: (John 3.16):

Guipuzcoan: *Zergatik aiñ maite izan du Jaungoikoak mundua, non eman duen bere Seme Bakarra beragan fedea duan guzia galdu ez dedin, baizik izan dezan betiko bizia.*

Labourdin: *Ezen hala Iainkoak onhetsi ukan du mundua, non bere Semé bakoitza eman ukan baitu, hura baithan sinhesten duenik gal eztadin, baina bititze eternala duenzát.*

IDENTIFICATION

The frequent recurrence of *z* and *tz* is characteristic of Basque.

CHAPTER XIII

**LANGUAGES OF THE MIDDLE
AND FAR EAST¹**

Asia is a vast linguistic world in its own right. The tongues of this great continent are as varied and picturesque as are their speakers, and run into the number of several hundreds, distributed among most of the world's great language families: Indo-European, Semitic, Ural-Altai, Sino-Tibetan, Japanese-Korean, Dravidian, Malayo-Polynesian, Caucasian, Mon-Khmer, Hyperborean, Ainu.

Fortunately for the practical linguist, not all of these numerous tongues are of equal importance. The linguistic explorer in the Asiatic continent finds himself indeed faced with tongues of primary rank, numerically, commercially, politically and culturally. He also finds himself face to face with a myriad minor languages whose speakers are comparatively few in number, and which have never attained a very lofty cultural status.

Such is the case, for example, with the Ural-Altai tongues

1. Limitations of time and space make it impossible at the present time to give the languages of Asia the treatment which the growing practical importance of many of them warrants. It is planned in the near future to offer, in separate booklets of the "World Languages Series", a presentation of Chinese, Hindustani, Arabic and Malay which will be in all respects as thorough as is that of Japanese in the present volume. A second volume of "Languages for War and Peace" is in preparation, in which will appear a more comprehensive outline of several of the Asiatic tongues cursorily treated in this chapter (notably Palestinian Hebrew, Persian, Hindustani, Bengali, Tamil, Telugu, Siamese, Burmese and Korean), as well as of certain native African tongues of strategic and commercial importance (Amharic, Swahili, Hausa, Fanti).

of Asiatic Russia, Mongolia and Manchukuo (Bashkir, Uzbek, Turkoman, Mongol, Buryat, Yakut, Kalmuk, Manchu, Tungus, etc.). These tongues, which are members of the Altaic branch of the family, cover a tremendous extent of territory; but their speakers are relatively few, and they are divided into such a vast number of diverging and mutually incomprehensible dialects that the study of any one of them can repay only the specialist interested in their linguistic structure or in the particular area where they are spoken. Their speakers, furthermore, are partly accessible through other tongues which may be termed languages of colonization (Russian in the Soviet Union in Asia, Chinese in Mongolia and Manchukuo, Japanese in Manchukuo). Turkish, the only Asiatic tongue of this group to present a solid body of speakers and a certain amount of cultural, political and commercial importance, has already been discussed under a European heading (see p. 440).

Even less important are the mysterious Hyperborean tongues of Kamchatka and northeastern Siberia, with a few thousand speakers, and the Ainu of Japan's northern islands (Yezo and Karafuto). Here again, Russian and Japanese, respectively, supply most practical needs.

The Caucasian tongues of the Caucasus, between the Black Sea and the Caspian, are extremely picturesque and interesting from a linguistic point of view, including such languages as Georgian, Avar, Lesghian, Circassian, Mingrelian, Laz, etc. Little practical advantage is to be derived from their study, however, in view of the limited number of their speakers, their numerous dialects, and the fact that Russian may be used with comparative ease in their area.

The Mon-Khmer, Annamese and Munda groups of southeastern Asia are imperfectly known; their speakers are relatively few, while their dialectal divisions are numerous. It is even doubtful that they are related, and various linguistic affiliations are claimed for them.

Two of Asia's tongues belong to the Semitic branch of the Semito-Hamitic group, which also stretches across northern

Africa almost to the Equator on the west, slightly below it on the east. They are Hebrew, which has a rejuvenated Palestinian variety, and Arabic. Palestinian Hebrew is the ancient tongue of the Scriptures and the Mishnāh, to which the status of a living and official language has been restored by the various Jewish groups participating in the Zionist experiment, with a modernization of vocabulary, and the inclusion of such non-Biblical terms as "telephone" and "telegraph". Palestinian Hebrew is the official tongue of less than a million Jewish settlers in Palestine, and as such its practical importance is limited, particularly as many of these Jews are accessible through European tongues. It is also, however, the key to the vast treasure-house of Hebrew tradition and learning, and it may be used as a secondary cultural tongue in all Jewish communities throughout the world, particularly among the more cultured elements.

Of far greater practical importance in the Semitic group is Arabic, the sacred tongue of Islam, and the popular tongue of Morocco, Algeria, Tunisia, Libya, Egypt, Syria, Iraq and Arabia. As a religious and written language, Arabic is unified and traditional, and extends far beyond the confines of the spoken tongue, being used wherever the Muhammadan faith has followers, in the Balkans, Turkey, Iran, India, China, central and eastern Africa, Malaya and the Dutch East Indies, and even in the Philippines. As a popular spoken tongue, in the countries where it is so used, Arabic shows a series of fairly strong dialectal divergences. The spoken Arabic of Morocco, Algeria, Tunisia and Libya may be described as a western variety; Egypt and the Egyptian Sudan may be said to form a central group of spoken Arabic dialects; while Syria and Palestine, Iraq, and Arabia constitute three diverging eastern groups.

The Indo-European tongues of Asia (outside of tongues of colonization, such as Russian in Asiatic Russia, English in India, Burma and Malaya, French in Indo-China and Syria, etc.) include: 1. Armenian, the ancient and highly cultivated

language of a relatively small group of speakers located astride the Russo-Turkish frontier; 2. modern Persian, the language of some 15,000,000 speakers in Iran and Afghanistan; 3. the so-called Indo-Aryan² languages of Afghanistan (Pushtu; about 10,000,000), southern Ceylon (Singhalese, about 4,000,000), and northern and central India (Hindustani, Bengali, Punjabi, Rajasthani, Marathi, etc.). Indo-Aryan speakers are very numerous, comprising over two-thirds of India's 390,000,000 inhabitants. It is estimated, however, that India's approximately 290,000,000 Indo-Aryan speakers are divided among seventeen major languages, not to mention numerous minor dialects.

The chief of these languages, with their approximate number of speakers, are:

Hindustani (including both Hindi and Urdu; north central India)	— 130,000,000
Bengali (northeastern India: Bengal and the Calcutta region)	— 60,000,000
Bihari (northeastern India, west of Bengal)	— 30,000,000
Marathi (western India: the Bombay region)	— 20,000,000
Punjabi (northern India: Punjab region)	— 20,000,000
Rajasthani (northwestern India, south of Punjab; Rajputana)	— 15,000,000
Gujarati (western India, north of Bombay)	— 13,000,000
Oriya (eastern India, southwest of Calcutta; Orissa)	— 10,000,000

The Dravidian speakers of southern India and northern Ceylon are estimated at nearly 100,000,000, apportioned among sixteen major languages.

Chief among these are:

Tamil (southeastern India, northern Ceylon)	— 22,000,000
Telugu (southeastern India, north of Tamil; region of Madras)	— 27,000,000

2. Because of the disagreeable connotations with which "Aryan" has been invested by certain racial theories which have nothing to do with language, "Indo-Iranian" is perhaps a better term; "Indo-Iranian", however, also includes the Iranian, or Persian branch of Indo-European.

Canarese (southwestern India, south of the Bombay region) — 13,000,000

Malayalam (southwestern India, south of Canarese) — 10,000,000

The vast Sino-Tibetan linguistic world includes Chinese, Siamese (or Thai), Burmese, Tibetan and, according to some scholars, Annamese and Cambodian. Of these languages, Chinese, with its vast mass of perhaps 450,000,000 speakers (subdivided, however, into several often mutually incomprehensible dialects), its ancient culture, and its growing commercial and political worth, is by far the most important. The Tibeto-Burmese and Thai members of the family may be estimated to have some 20,000,000 to 30,000,000 speakers each. Political, economic and cultural factors all point to Chinese, in its expanding standardized national form (*Kuo-yü*), as a tongue of coming primary importance.

The Japanese-Korean group (assuming that there is a connection between Japanese and Korean, which many scholars deny) is represented by Korean, the tongue of some 25,000,000 people in Korea, who are for the most part accessible by means of Japanese; and the latter language, which has some 75,000,000 native speakers and has recently been to some degree current in territories having a total population of over 400,000,000. The future of Japanese as a world language is at present in considerable doubt; however restricted its use may be outside of Japan proper, it will still remain the tongue of a large population which has displayed great ingenuity and adaptability in assimilating the mechanical aspects of western civilization.

The Malayo-Polynesian group, subdivided into an impressive number of languages and an almost infinite variety of dialects, is represented by the Malay-speaking portion of the population of British Malaya, and by the entire vast island world that stretches from Madagascar across the Indian and Pacific Oceans to Easter Island, and from Formosa on the north to New Zealand on the south (exclusive, however, of

Australia, Tasmania, and the interior of New Guinea). The trade language known as Pidgin (or Bazaar) Malay is generally current throughout Malaya, the Dutch East Indies and, to some extent, the Philippines, and this fairly standardized *lingua franca*, which gives access to a total population of perhaps 80,000,000 (many of whom are also accessible through tongues of colonization, such as Dutch, English and Spanish) is of great practical importance in the reconquest of this section of the world from the Japanese and in the eventual reconstruction of the entire Pacific area.

In the complex linguistic picture of the Middle and Far East, four tongues stand out as of primary practical importance at the present moment: Japanese, Chinese, Arabic and Malay.

The following comparative table of a few fundamental words in some of the major Asiatic languages will be of interest in its indications of similarities and differences among and within the various groups.

	one	three	ten	hundred	foot
(Indo-European)					
Sanskrit	<i>ēkaḥ</i>	<i>trayaḥ</i>	<i>daśa</i>	<i>śatam</i>	<i>pādaḥ</i>
Hindustani	<i>ēk</i>	<i>tīn</i>	<i>das</i>	<i>sau</i>	<i>pānu</i>
Bengali	<i>ek</i>	<i>tin</i>	<i>daś</i>	<i>śo</i>	<i>pā</i>
Persian	<i>yak</i>	<i>sih</i>	<i>dah</i>	<i>sad</i>	<i>pāi</i>

Korean	ī	àpi	emi	hyen	nuōi
(Malayo-Polynesian)					
Malay	<i>gigi</i>	<i>bapa</i>	<i>amak</i>	<i>saudara</i>	<i>saudara</i>

3. It is of interest to note that in all these languages, outside of the Indo-European and Semitic ones (Sanskrit, Hindustani, Bengali, Persian, Arabic) an entirely different word is used for "brother" and "sister" according as it is an older or a younger brother or sister that is being referred to. The forms given above under Dravidian, Sino-Tibetan, Khmer, Japanese, Korean and Malay headings all indicate an older brother or sister.

THE NATIVE SCRIPTS

Asia is a land of many tongues and many writings. The two Semitic languages, Hebrew and Arabic, employ types of script which, although derived from the same original source as ours, the Phoenician alphabet, now differ widely both from ours and from each other. They both have, however, certain characteristics in common, being written from right to left and consisting of consonants only, with the vowel sounds mostly indicated by separate markings above or below the line.

The Hebrew characters, with which a good many American Jews are familiar because they are also used in printed Yiddish, are of a square type. A few letters (k, m, n, etc.) assume a different form if they occur in the final position in the word, but for the most part each letter remains uniform, while "vowel points" are optionally placed below, above, or to the left of the consonants. In Yiddish (used by Central and East European Jews, and derived for the most from medieval German), and in Ladino (used by southern or Sephardic Jews and derived from medieval Spanish) certain of the original consonants (though not the same ones in both languages) have changed their function to act as vowels, and the number of vowel-points in use has accordingly been reduced.

The Arabic script may have four separate forms for each consonant, according as it comes at the beginning, the middle or the end of a word, or is used by itself. Vowel-sounds are indicated by short oblique bars and hooks above or below the consonants, but are very frequently left out altogether, and the vowel-values are left to be supplied by the reader (this practice is also current in Hebrew texts, and is an indication of the secondary function of vowels in the Semitic languages). The Arabic script, with certain modifications, is used by a number of other tongues, and generally appears where the speakers are members of the Muhammadan faith. Among the languages often appearing in Arabic characters are the Fula, Hausa and Swahili of Central Africa; the Malay, Javanese and Sundanese of the Dutch East Indies; the Moro of the Philippines; the Urdu

variety of Hindustani; other languages of India, such as Malayalam, Brahui, Tamil and Punjabi; the Persian of Iran; the Balochi of Balochistan; and several of the Turkic (Altaic) tongues of Asiatic Russia. Turkish formerly used a modified Arabic script, but discarded it in favor of Roman characters under Mustapha Kemal Ataturk.

The languages of India make use for the most part of alphabets derived from the ancient Devanagari (or Nagari) in which Sanskrit was written. Many of these languages, in fact, still use the unmodified Devanagari characters today (Hindi, to cite one example, is the Hindu version of Hindustani, while Urdu is the Moslem version; Hindi uses Devanagari in writing, rejects Arabic and Persian loan-words and retains the more ancient Sanskrit terms, but the language is fundamentally one and the same). Bengali is not only the closest numerical rival of Hindustani, but also the language whose script, while differing, diverges least from the Devanagari. In the alphabets of southern India (Tamil, Telugu, Canarese, etc.), and even of tongues outside of India, like Siamese and Burmese, descent from the Nagari characters is largely disguised. Devanagari is read from left to right. Each consonant carries inherently with it the following sound of a short *a*, while other vowel-values are indicated by separate symbols above or below the line, or by separate characters within the line.

The Chinese characters are of the ideographic variety, and are separately described under the heading of Chinese (see p. 489-492). They have been adopted, with modifications, by the Japanese, who have in part adapted the borrowed characters to a syllabic instead of an ideographic system (see p. 526-530).

Samples of some of the languages of Asia in their own characters are presented (see pp. 463, 478, 479, 480, 481, 485, 486, 490, 504, 505, 506, 529).

THE SEMITIC LANGUAGES — ARABIC, HEBREW

The two modern Semitic languages display the typical Semitic arrangement of three-consonant roots, with the vowels relegated to an internal flexional role (see p. 29); two genders, masculine and feminine, with inanimate objects distributed between them; a dual number, indicating two objects, especially ones that naturally go in pairs (hands, feet, etc.). The verb is fully inflected, with numerous separate masculine and feminine forms, especially in the third person.

thousand	<i>'alf</i>	<i>'elef</i>

ARABIC⁴

SOUNDS AND TRANSCRIPTIONS

Vowel Sounds.

ā = father (this sound is of comparatively rare occurrence: khāliṣ, "pure"); or, much more commonly, = maḍ (māt, "he died").

a = cat (maḥ, "salt").

ē = first part of a in late (fēn, "where").

e = the man (menaggim, "astrologer"); or = met (betna, "our house").

ī = machine (mīn, "who?").

i = tin (bint, "daughter").

ō = all (kōra, "ball"); or = obey (ōda, "room").

o = going (odna, "our room"); or = got (boṭṭāl, "evil").

ū = food (šūf, "look").

u = good ('ult, "I said").

Consonant Sounds.

Approximately as in English: b, t, g (go in Egypt; general in other localities), h, z, r, s, d, f, k, l, m, n, y, w.

ṭ = t vigorously uttered, with blade of tongue pressed against palate (ṭīn, "mud").

ḍ = d, as above (ḍēf, "guest").

ṣ = s, as above (ṣūf, "wool").

ẓ = z, as above (ẓahr, "dice").

4. The form of Arabic here given is not the literary language (standardized throughout the entire Arabic world and strongly conservative), but the Egyptian spoken tongue, comprehensible, but with difficulty, in the countries to the east (Palestine, Transjordan, Iraq, Arabia) and to the west (Libya, Tunisia, Algeria, Morocco). This form has been selected because of its central position, which gives it the nature of a compromise between the eastern and the western dialects, and also because it gives direct access to more Arabic speakers than any other spoken dialect. The Arabic script, in which the literary tongue is written, is discussed elsewhere (see p. 461-462).

š = sure (šēkh, "sheik").

ḥ = h, stronger and more emphatic than h, but not rasped (ḥusan, "horse").

‘ = like ḥ, but with vibration of vocal cords ('id, "feast").

kh = guttural German *ach*-sound, or Spanish *j* (*khēr*, "good").

gh = like kh, but with vibration of vocal cords; somewhat similar to French uvular *r* (*gharb*, "west").

' = catch in voice, as between the two o's of English *cooperate*, or between the article and the noun in German *die Eier* (*su'āl*, question).

Many Arabic consonants are emphatic, or guttural, or both. No precise English equivalent appears for ṭ, ḍ, ṣ, ḏ, all of which call for an unfamiliar position of the tongue coupled with energy of articulation. Note the three guttural gradations in h (English *h*); ḥ (the same, but with greater force, and yet no rasping of the throat); and kh (vigorous and rasping); as well as in the voiced *g* (English *go*); ‘ (the voiced counterpart of ḥ); and gh (a gargling sound, with vibration of the vocal cords).

Long vowels must be pronounced long. Double consonants must be pronounced double ('*izzayyak?*, how are you?, pronounced '*iz-zay-yak*).

The accent of Arabic tends to be on the next to the last syllable; but a long vowel elsewhere in the word tends to draw accentuation to itself.

GRAMMATICAL SURVEY.

Nouns and Articles.

There are only two genders in Arabic. masculine and feminine. Nouns denoting males are usually masculine, those denoting females feminine (man, *rāgil*, masc.; girl, *bint*, fem.). Nouns denoting inanimate objects are in part masculine, in part feminine; the ending *-a* usually denotes a noun of feminine gender (table, *ṭōrōbēza*; watch, *sā'a*).

There are *three* numbers, singular, plural and *dual* (the latter denotes two objects, and is especially used for things

that normally occur in pairs, such as hands, feet, etc. The dual ending is *-ēn*: hand, *īd*; two hands, *īdēn*. Feminine nouns ending in *-a* change *-a* to *-tēn* to form the dual: table, *ṭōrōbēza*; two tables, *ṭōrōbēztēn*.

Feminine nouns in *-a* form their plural by changing *-a* to *-āt*: table, *ṭōrōbēza*; tables, *ṭōrōbēzāt*; watch, *sā'a*; watches, *sā'āt*.

Masculine nouns have so-called "broken plurals", which means that the plural form is irregular, and follows no set rules that can be easily codified; they are therefore best learned in their double form, singular and plural; there is, however, very frequent change of the internal vowels: book, *kitāb*; books, *kutub*; boy, *walad*; boys, *'awlād*; dog, *kalb*; dogs, *kilāb*.

The definite article for all nouns, masculine and feminine, singular, dual and plural, is *il*: the book, *il kitāb*; the girl, *il bint*; the books, *il kutub*; the girls, *il banāt*.

The *l* of *il* is assimilated to a following *s*, *ṣ*, *š*, *z*, *ẓ*, *t*, *ṭ*, *d*, *ḍ*, *n*, *r*; so that *il sā'a*, "the watch", becomes *is sā'a*; *il dulāb*, "the cup-board", becomes *id dulāb*.

A noun used with the definite article and placed immediately after another noun often indicates the possessor: the man's house, *bēt ir rāgil*.

There is no indefinite article, although *wāḥid*, "one", may be used with the sense of "a certain".

Adjectives and Adverbs.

The adjective follows the noun, and agrees with it in gender and number: a nice book, *kitāb gamīl*; a nice watch, *sā'a gamīla*. If the noun has the definite article, this is repeated before the adjective: the nice book, *il kitāb ig gamīl*; the nice watch, *is sā'a ig gamīla*.

The feminine singular of the adjective is formed by adding *-a*: large, great, *kibīr*; fem. singular *kibīra*. The dual does not appear in adjectives, being replaced by the plural: two good men, *rāgilēn kuwayyisīn*. The plural is formed by adding *-īn*, for both genders: good boys, *'awlād kuwayyisīn*; good girls, *banāt kuwayyisīn*. But if the noun denotes an

inanimate object, the feminine singular form of the adjective, ending in *-a*, is used with it: big books, *kutub kibīra* (or *kutub kubār*; a few adjectives, *kibīr* among them, also have broken plurals).

A predicate adjective follows the noun just like an attributive adjective, and the verb "to be" is generally understood; but in this case, only the noun has the definite article: the great man, *ir rāgil il kibīr*; the man (is) great, *ir rāgil kibīr*.

The comparative of the adjective resembles a noun plural of the "broken" type; for most adjectives, the following scheme will work: *kibīr*, big; *akbar*, bigger; *ṣaghīr*, small; *aṣghar*, smaller; *ṭawīl*, long, tall; *aṭwal*, longer, taller; the superlative is formed by placing the article before the comparative: great, *kibīr*; greater, *akbar*; greatest, *il akbar*; nice, *gamīl*; nicer, *agmal*; nicest, *il agmal*. The superlative form is seldom used colloquially, being replaced by the comparative, or by the positive with *khāliṣ*, "pure", or *'awi*, "very".

"Than" is expressed by using either the positive with *'an* (a preposition meaning "about", "over"); or the comparative with *min* (a preposition meaning "of"): greater than, *kibīr 'an* or *akbar min*.

There is no true-adverb in Arabic. Adverbial expressions are usually formed by a preposition with a noun: easily, *bir-rāha*; hardly, *biz-zūr*; quickly, *bil 'agal*.

Numerals.

Cardinal⁵

1 = <i>wāḥid</i>	5 = <i>khamṣa</i>
2 = <i>'itnēn</i>	6 = <i>sitta</i>
3 = <i>talāta</i>	7 = <i>saba'a</i>
4 = <i>'arba'a</i>	8 = <i>tamanya</i>

5. The singular form of the noun is used with "one": one book, *kitāb wāḥid* (or, more commonly, simply *kitāb*). The dual is used with "two": two books, *kitābēn 'itnēn* (or, more commonly, simply *kitābēn*). The plural appears with numbers from 3 to 10: three books,

9 = <i>tis'a</i>	40 = 'arbi'in
10 = 'ašara	50 = <i>khamsin</i>
11 = <i>hidāšer</i>	60 = <i>sittin</i>
12 = <i>itnāšer</i>	70 = <i>sab'in</i>
13 = <i>talatāšer</i>	100 = <i>miyya</i>
14 = 'arba'tāšer (etc.)	200 = <i>mitēn</i>
20 = 'išrīn	300 = <i>tultu miyya</i>
21 = <i>wāhid we 'išrīn</i>	400 = <i>rub'u miyya</i>
22 = 'itnēn we 'išrīn	1000 = 'alf
30 = <i>talatīn</i>	2000 = 'alfēn
	3000 = <i>talāt 'ālāf</i>

Ordinal.

1st = <i>il 'awwal</i>	6th = <i>is sātīt</i>
2nd = <i>it tāni</i>	7th = <i>is sābī'</i>
3rd = <i>it tālit</i>	8th = <i>it tāmin</i>
4th = <i>ir rābī'</i>	9th = <i>it tāsi'</i>
5th = <i>il khāmis</i>	10th = <i>il 'āsīr</i>

Others.

half = *nuṣṣ*one-fourth = *rub'a*once = *marra wāhda*twice = *marratēn*three times = *talāt marrāt*the first time = *il marra il 'ūla*, or *'awwil marra*the last time = *il marra il 'ākhīra*, or *'ākhīr marra*

Pronouns.

Personal, Subject.

I, *ana*you (masc. sg.), *inta*, *enta*

talāt(a) kutub; but the *singular* form of the noun is used with numbers above 10: twenty books, *'išrīn kitāb*. The final *-a* of numerals from 3 to 10 is often dropped, especially before feminine nouns and nouns beginning with vowels.

you (fem. sg.), *inti, enti*
 he, it, *huwwa*
 she, it, *hiyya*
 we, *ihna, ehna*
 you (plural), *intum, entum*
 they, *humma, hum*

These are used alone, or as subjects of verbs. The verb is generally used without the subject pronoun, however, unless emphasis is desired.

Direct Object.

me, *-ni*
 you, (masc. sg.), *-ak* (*-k* after vowels)
 you, (fem. sg.), *-ik* (*-ki* after vowels)
 him, it, *-u* (*-h* after vowels)
 her, it, *-ha*
 us, *-na*
 you, (pl.), *-kum*
 them, *-hum*

These forms are attached to verbs: he beat, *darab*: he beat me, *darab-ni*.

Possessive.

These are the same as the direct object pronoun forms given above, save that (1) they are attached to nouns; (2) *-i*, "my", replaces *-ni*, "me"; (3) attached to the preposition *li*, "to", they serve as indirect objects: *lik*, "to you"; *lihum*, "to them".

	After consonants	After vowels
my,	<i>-i</i>	<i>-ya</i>
your (masc. sg. possessor),	<i>-ak</i>	<i>-k</i>
your (fem. sg. possessor),	<i>-ik</i>	<i>-ki</i>
his,	<i>-u</i>	<i>-h</i>
her,	<i>-ha</i>	<i>-ha</i>
our,	<i>-na</i>	<i>-na</i>
your (plural possessor),	<i>-kum</i>	<i>-kum</i>
their,	<i>-hum</i>	<i>-hum</i>

Book, *kitāb*; my book, *kitāb-i*; your book, *kitāb-ak*; his book, *kitāb-u*.

Father, *āb* (in combination, *abū*); my father, *abū-ya*; your father, *abū-k*; her father, *abū-ha*.

These possessive forms are also used as object pronouns after prepositions: with, *ma'a*; with me, *ma'āya*; with you, *ma'ak*. When combined with the prepositions *li*, *ma'a* or *'and*, the possessive forms acquire the meaning of "I have", "you have", etc.: I have a book, *'andi kitāb* (lit. a book(is) at me); I have a house, *lī bēt*; have you a match?, *ma'ak kabrīt?*; she has an umbrella, *'andaha šamsīyya* (*li* is generally used for big, precious or important objects, *ma'a* for small objects).

Some common prepositions are:

of, from, <i>min</i>	for, <i>'alašān</i>
to, for, <i>li</i>	in, <i>fi</i>
with, <i>ma'a</i> , <i>'and</i> , <i>wayya</i>	over, on, <i>'ala</i>
without, <i>min ghēr</i>	

Demonstrative.

this, these, *da* (masc. sg.); *di* (fem. sg.); *dōl* (pl.)
that, those, *dukha* (masc. sg.); *dikha* (fem. sg.); *dukham* (pl.)

These normally follow the noun if used as adjectives: this house, *il bēt da*. If they precede, they are pronouns, and the verb "to be" is understood: this (is) a house, *da bēt*.

Relative.

The general relative pronoun is *illi*; the house which I saw, *il bēt illi šuftu* (lit. the house which I saw it: *šuftu* = *šuft*, I saw + *-u*, it).

If the antecedent has no definite article, *illi* is omitted: a house which I saw, *bēt šuftu* (lit. house I saw it). *Illi* may also mean "the one who": the man I saw yesterday was ill, *illi šuftu embāriḥ kān 'ayyān*.

Interrogative.

who?, whom?, whose?, *mīn*: whom did you see?, *šuft mīn?*
 (lit. you saw whom?); whose book?, *kitāb mīn?* (lit.
 book whose?)

what?, *ēh?*: what (is) this?, *ēh da?*; what did you say?, *'ult ēh?*
 which?, *anho* (masc. sg.); *anhe* (fem. sg.); *anhum* (pl.)

Verbs.

The Arabic verb is a root consisting of three consonants (*K-T-B*, write). Internal vowels, and prefixed and suffixed vowels and consonants provide the conjugational scheme. This three-consonant root is sometimes disguised by the fact that one of the three consonants is a "weak" consonant, such as *w* or *y*, which is absorbed by neighboring vowels. The verb is then called "weak", in contrast with the "strong" verb, in which the original three consonants stand out clearly.

The basic form of the verb, selected by Arabic grammarians to designate the verb itself (as we designate the infinitive, "to write") is not the infinitive, but the third singular of the past tense; thus, the verb "to write" would be designated by *katab*, "he wrote".

The three basic forms are the "imperfect" (usually translated by a present or future); the "perfect" (usually translated by a past), and the imperative. A more specific future may be formed by using the imperfect with a prefixed *ḥa-*.

Strong Conjugation: "to write", *katab* (lit. "he wrote").

	Perfect (Past)	Imperfect (Pres.)	Imperative	Future
I	<i>katab-t</i>	<i>'a-ktib</i>		<i>ḥa-'aktib</i>
you (masc. sg.)	<i>katab-t</i>	<i>ti-ktib</i>	<i>'i-ktib</i>	<i>ḥa-tiktib</i>
you (fem. sg.)	<i>katab-ti</i>	<i>ti-ktib-i</i>	<i>'i-ktib-i</i>	<i>ḥa-tiktibi</i>
he	<i>katab</i>	<i>yi-ktib</i>		etc.
she	<i>katab-it</i>	<i>ti-ktib</i>		
we	<i>katab-na</i>	<i>ni-ktib</i>		
you (plural)	<i>katab-tu</i>	<i>ti-ktib-u</i>	<i>'i-ktib-u</i>	
they	<i>katab-u</i>	<i>yi-ktib-u</i>		

An active participle, "writing"; a passive participle, "written"; and a verbal noun, "act of writing", also appear. The participles are declined like adjectives.

Active participle, "writing": masc. sg. *kātib*; fem. sg. *katb-a*; pl. *katb-īn*.

Passive participle, "written": masc. sg. *ma-ktūb*; fem. sg. *ma-ktūb-a*; pl. *ma-ktub-īn*.

Verbal noun, "act of writing": *kitāb-a*.

Weak Conjugation: "to see", *šāf* (lit. "he saw")

	Perfect (Past)	Imperfect (Pres.)	Imperative	Future
I	<i>šuf-t</i>	<i>'a-šūf</i>		<i>ḥa-'ašūf</i>
you (masc. sg.)	<i>šuf-t</i>	<i>ti-šūf</i>	<i>šūf</i>	<i>ḥa-tišūf</i>
you (fem. sg.)	<i>šuf-ti</i>	<i>ti-šūf-i</i>	<i>šūf-i</i>	etc.
he	<i>šāf</i>	<i>yi-šūf</i>		
she	<i>šāf-it</i>	<i>ti-šūf</i>		
we	<i>šuf-na</i>	<i>ni-šūf</i>		
you (plural)	<i>šuf-tu</i>	<i>ti-šūf-u</i>	<i>šūf-u</i>	
they	<i>šāf-u</i>	<i>yi-šūf-u</i>		

Active participle, "seeing": masc. sg. *šāyif*; fem. sg. *šayfa*; pl. *šayfīn*.

Passive participle, "seen": none appears in this verb.

Verbal noun, "act of seeing": *šōf*.

The role played by shifting internal vowels in the conjugation of the Arabic verb is obvious. Note the difference between the strong and the weak verb appearing in the third singular and third plural of the past, where the weak verb changes the internal vowel, while the strong verb does not.

Subject pronouns are normally omitted, but may be used for emphasis or clarity: I saw, *ana šuft*; you (masc. sg.) saw, *inta šuft*; he saw, *šāf*; he saw, *huwwa šāf*.

Object pronouns are added on to the verb (see p. 470): he saw me, *šāf-ni*; I saw him, *šuft-u*; I saw you, *šuft-ak* (*šuft-ik*, if "you" is feminine); he saw us, *šāf-na*; we saw them, *šufna-hum*.

Negative and Interrogative.

To form the negative, use *ma* before the verb and *-š* as a suffix: he did not write, *ma katab-š*; I do not see, *ma 'ašuf-š*. With the active and passive participles, a single word, *muš*, is placed before the participle: not writing, *muš kātib*; not written, *muš maktūb*.

Interrogation is usually conveyed by the tone of the voice, or by an interrogative word: where is the city?, *il balad fēn?* (lit., the city where?).

"To Be"

In simple sentences, "to be" is generally understood: this (is) a book, *da kitāb*; the man (is) great, *ir rāgil kibīr*. This is particularly the case with the participles: it (is) written, *maktūb*; I (am) not writing, *ana muš kātib*.

"To be" is also expressed, however, particularly in tenses other than the present, by the verb *kān* (lit. "was"; note the contraction of *ḥa-* with the present in the future of this verb):

	Past	Present	Imperative	Future
I	<i>kun-t</i>	<i>'a-kūn</i>		<i>ḥa-kūn</i>
you (masc. sg.)	<i>kun-t</i>	<i>ti-kūn</i>	<i>kūn</i>	<i>ḥa-tkūn</i>
you (fem. sg.)	<i>kun-ti</i>	<i>ti-kūn-i</i>	<i>kūn-i</i>	<i>ḥa-tkūni</i>
he	<i>kān</i>	<i>yi-kūn</i>		<i>ḥa-ykūn</i>
she	<i>kān-it</i>	<i>ti-kūn</i>		<i>ḥa-tkūn</i>
we	<i>kun-na</i>	<i>ni-kūn</i>		<i>ḥa-nkūn</i>
you (plural)	<i>kun-tu</i>	<i>ti-kūn-u</i>	<i>kūn-u</i>	<i>ḥa-tkūnu</i>
they	<i>kān-u</i>	<i>yi-kūn-u</i>		<i>ḥa-ykūnu</i>

"To Have".

This is generally expressed by "to be" (*kān*) with the prepositions 'and, *li* or *ma'a* (see p. 471), followed by a pronoun indicating the possessor (cf. French *un livre est à moi*): he had a book, *kān 'andu kitāb* (lit. "there was with him a book"); I had a house, *kān lī bēt*; I had a match, *kān ma'āya kabrīt*.

Progressive.

The imperfect (present) with the prefix *b-* conveys a progressive meaning: I am writing, *b-aktib*.

WORDS AND PHRASES

good morning, *ṣabāḥ il khēr*

good afternoon, *nahārak sa'īd* (to a woman, *nahārik sa'īd*)

good evening, good night, *lēltak sa'īda* (to a woman, *lēltik sa-īda*)

good-bye, *ma'a is salāma*

thank you, *kattar khērak*

you're welcome, *'ahlan wa saḥlan; marḥaba*

please, *min faḍlak*

very gladly, *bi kull surūr*

perhaps, *yimkin*

here, here is, *hina, 'aho* (here is the book, *il kitāb aho*)

there, there is, *hināk*

where?, where is?, *fēn?*

how do I go to..., *'izzāy 'arūḥ li...*

yes, *nā'am; aiwa*

no, *la*

how are you?, *'izzayyak?* (to fem. *'izzayyik?*; to pl. *'izzaykum?*)

very well, *kuwayyis*

how much is it?, *bi kām da?*

why?, *lēh?*

when?, *emta*

because, *'alašān*

today, *in naharda*

tomorrow, *bukra*

yesterday, *'imbāriḥ*

to the right, *'al yimīn*

to the left, *'aš šimāl*

straight ahead, *'ala ṭūl; dughri*

what time is it?, *is sā'a kām?*

it is now six o'clock, *dilwō'ti is sā'a sitta*

I'm hungry, *ana ga'ān*

I'm thirsty, *ana 'ōṭṣān*

I'm cold, *ana bardān*

I'm warm, *ana ḥarrān*

I'm ill, *ana 'ayyān*

what is your name?, *'ismak ēh?* (to fem. *'ismik ēh?*)

my name is..., *'ismi...*

how old are you?, *kām sana 'umrak?* (to fem. *kām sana 'umrik?*)

do you speak Arabic?, *'inta bitūkallim (il) 'arabi?*

certainly, *ṭab'an; ma'lūm*

very little, *ṣuwayya*

do you understand?, *('inta) fāhim?*

I don't understand, *ana muš fāhim*

do you know?, *('inta) 'ārif?*

I don't know, *ana muš 'ārif*

excuse me, *wala mu'akhza; matakħiznīš*

don't mention it, *il 'afw*

what do you want?, *'ihta 'āwiz ēh?*

it's fine weather, *il gaw gamīl*

never mind, *ma'lēš*

I'm sorry, *ana muta'assif; ana 'āsif*

I'm glad, *ana mabsūt*

too bad!, *zayy iz zift!; ya salām!; ya khṣāra!*

what is the matter?, *gāra eh?; ḥaṣal ēh?*

come in!, *khūš!; 'itfoḍdal!*

get out!, *imši!; iṭlā' barra! (fem. iṭlā'i barra!; pl. iṭlā'u barra!); 'ukħrug barra!*

gangway!, *riḡlak!; 'iw'a!*

PERSIAN

Persian normally makes no distinction of gender. The plural is formed by adding *-hā* to the singular (man, *mard*; men, *mardhā*). A special suffix *-ra* is used to indicate a definite direct object (the man, object, *mardra*). Possession is indicated by placing the possessor (noun or pronoun) after the thing possessed, with *-e-* or *-ye-* between (my money, *pūl-e-man*, lit. money-of-I). The same arrangement is generally used for attributive adjectives (the left hand, *dast-e-chap*, lit. hand-left). The comparative and superlative are usually formed by adding to the adjective the suffixes *-tar* and *-tarin* (cold, *sard*; colder, *sardtār*; coldest, *sardtārin*).

The Persian verb is relatively simple, the common endings being: *-am*, *-i*, *-ad*, *-im*, *-id*, *-and*. These are added to the two roots of the verb, present and past: to take, *gereft-an*; present root, *gir* (with a prefix *mi-*); past root, *gereft*; present, *mi-gir-am*, *mi-gir-i*, *mi-gir-ad*, *mi-gir-im*, *mi-gir-id*, *mi-gir-and*; past, *gereft-am*, *gereft-i*, *gereft* (*-ad* normally omitted), *gereft-im*, *gereft-id*, *gereft-and*. The prefix *mi-* used with the past turns it into an imperfect: I was taking, used to take, *mi-gereft-am*. The negative is formed by prefixing *na* (I did not take, *na gereftam*); the past participle, which is used in compound tenses, is formed by adding *-é* to the past root (taken, *gereft-é*). The verb usually comes at the end of the sentence.

WORDS AND PHRASES

good night, *shab be-khair*

what is the matter?, *ché khabar ast?*

where is?, *kujāst?*; there is, *ānjāst*; here is, *injāst*

how much?, *chagadr?*, how many?, *chand?*

I want, *mikhāham*; gangway!, *bi-zahmat rāh bedehid!*

give, *bedeh*; water, *āb*; bread, *nān*; bring, *biavar*; and, *va*

hot, *garm*; one, *yak*; two, *dō*; three, *sih*; four, *chahar*; five, *panj*

six, *shesh*; seven, *haft*; eight, *hasht*; nine, *noh*; ten, *dah*

انجیل یوحنا ۴

عیسی در جواب گفت آمین آمین بتو میگویم اگر کسی از آب و روح مولود نکرده
 ممکن نیست که داخل ملکوت خدا شود * آنچه از جسم مولود شد جسم است
 و آنچه از روح مولود گشت روح است * عجب مدار که جوگنم باید شما از سر نو
 مولود گردید * باد هر جا که بخواهد میوزد و صدای آنرا میشنوی لیکن نهدانی
 از جا میآید و بجای میروند همین است هر که از روح مولود کردد * نفوذیوس
 در جواب وی گفت چگونه ممکن است که چنین شود * عیسی در جواب وی
 گفت آیا تو معلم اسرائیل هستی و اینرا نهدانی * آمین آمین جو میگویم آنچه میمانم
 میگویم و آنچه دهن ام شهادت می دهیم و شهادت ما را قبول نمیکنید * چون
 شما را از امور زمینی سخن گفتیم بپور نگریدید پس هرگاه به امور آسمانی با شما سخن رانم
 چگونه تصدیق خواهید نمود * و کسی با همان بالا نرفت مگر آنکس که از آسمان
 پائین آید یعنی پسر انسان که در آسمانست * و همچنانکه موسی مار را در میان بلند
 نمود همین پسر انسان نیز باید بلند کرده شود * تا هر که باو ایمان آورد هلاک
 نکردد بلکه حیات جاودانی یابد * زیرا خدا جهانرا اینقدر رحمت نمود که پسر
 یگانه خود را داد تا هر که بر او ایمان آورد هلاک نکردد بلکه حیات جاودانی یابد *
 زیرا خدا پسر خود را در جهان نفرستاد تا بر جهان داور می کند بلکه تا بوسیله او
 جهان نجات یابد * آنکه باو ایمان آورد بر او حکم نشود اما هر که ایمان نیاورد آن
 بر او حکم شده است بجهت آنکه باس پسر یگانه خدا ایمان نیاورده * و حکم این
 است که نور در جهان آمد و مردم ظلمت را بیشتر از نور دوست داشتند از آنجا
 که اعمال ایشان بد است * زیرا هر که عمل بد میکند روشنی را دشمن دارد و پیش
 روشنی نمیآید مبادا اعمال او نوبخ شود * ولیکن کسیکه براسی عمل میکند پیش
 روشنی میآید تا آنکه اعمال او هویدا گردد که در خدا کرده شده است *

THE INDO-EUROPEAN LANGUAGES OF INDIA

Numerically, the most important of these are Hindustani and Bengali, spoken in northern and northeastern India, respectively. Hindustani is subdivided into Urdu and Hindi, but the differences are more a matter of script and certain sections of the vocabulary than of geographical location.

Generally speaking, the Indo-Aryan tongues of India display a tendency to reduce the ancient Indo-European cases to a single, or at most a double form (nominative and oblique), to use prepositions to replace the older case-endings, and to

merge the old grammatical genders. Similar tendencies, to an even greater degree, are displayed by Persian.

The following table is of interest as indicating a few vocabulary divergences between the Hindi and the Urdu forms of Hindustani, along with the Sanskrit forms to which Hindi is partial and the Persian and Arabic forms from which Urdu

has borrowed. It must be understood, however, that both Urdu and Hindi forms are generally comprehensible to all Hindustani speakers and are often interchangeably used. Sanskrit is the ancient sacred tongue of northern India, from which all Indo-Aryan tongues are at least partially derived. The Persian and Arabic elements in Urdu are due to the religious factor of Muhammadanism. Persian itself, though strictly an Indo-European tongue, is a very heavy borrower from Arabic.

۱۲	اسکے بعد وہ اور انکی ماں اور بھائی اور انکے شاگرد کفر ختم ہو گئے اور وہاں چند روز رہے۔	ہو سکتا ہے؟ کیا وہ دوبارہ اپنی ماں کے پیٹ میں داخل ہو کر پیدا ہو سکتا ہے؟ پتوح نے جواب دیا کہ مجھ سے
۱۳	یہودیوں کی یہ بیفح نزدیک تھی اور پتوح نے یروشلیم کو گیا۔ اُس نے یہیل میں یہیل اور بیٹرا اور کبوتر بیچنے والوں	بچ کتا ہوں جب تک کوئی آدمی پانی اور روح سے پیدا نہ ہو وہ ٹڈا کی بادشاہی میں داخل نہیں ہو سکتا۔ جو جسم سے
۱۴	گوا اور مڑتوں کو بیچنے پایا۔ اور ریشیوں کا گوا بنا کر سب کو یہی بیٹرا اور بیٹیوں کو یہیل سے نکال دیا اور مڑتوں	پیدا ہوا ہے۔ جسم ہے اور جو روح سے پیدا ہوا ہے روح ہے تنبہ نہ کر کہ میں نے تم سے کہا تمہیں نئے جسم سے پیدا ہونا
۱۵	کی نقدی بھیر دی اور انکے تختے اٹھ دئے۔ اور کبوتر فردوسوں سے کہا انکو یہاں سے لے جاؤ میرے باپ کے	مڑو ہے۔ ہوا جہر جاہتی ہے پلٹی ہے اور تو انکی گواؤں بے مگر نہیں جانتا کہ وہ کہاں سے آئی اور کہاں کو جاتی ہے۔
۱۶	گھر کو تجارت کا گھر نہ بناؤ۔ انکے شاگردوں کو یاد آنا لکھا ہے۔ تیرے گھر کی غیرت مجھے کہا جائیگی۔ پس یہودیوں نے	جو کوئی روح سے پیدا ہو اور اسبابی ہے۔ بیکلفس نے جواب سے کہا یہ بائیں کو نکرو جو کہتی ہیں۔ پتوح نے جواب
۱۷	جواب میں اس سے کہا تو جو ان کا سون کو کرتا ہے وہیں لکھا رہا۔ پتوح نے جواب میں ان سے کہا	نہیں جانتا؟ میں مجھ سے سچ کہا ہوں کہ جو جسم جلتے ہیں کہتے ہیں اور جسم ہے تم نے دیکھا ہے انکی گواہی دیتے ہیں اور تم
۱۸	اس مقدس کو ڈھا دو تو میں اُسے تین دن میں کھڑا کر ڈھکاؤ۔ یہودیوں نے کہا جیسا میں برس میں یہ مقدس بنا	بائیں کہیں اور تم نے یقین نہیں کیا تو اگر میں تم سے آسمان کی بائیں کہوں تو کہو مگر یقین کرو گے؟ اور آسمان پر کوئی نہیں
۱۹	ہے اور کیا تو اسے تین دن میں کھڑا کر دیکھا؟ مگر اُس نے اپنے بدن کے مقدس کی بابت کہا تھا۔ پس جب وہ	چڑھا ہوا انکے جو آسمان سے اترائیں ابن آدم جو آسمان میں مڑوں سے ہے جی اٹھا تو انکے شاگردوں کو یاد آیا کہ
۲۰	اُس نے یہ کہا تھا اور انہوں نے کتاب مقدس اور اُس قوا کا جو پتوح نے کہا تھا یقین کیا۔	اور جس طرح موشی نے سانپ کو کیا بان میں اونچے پر چڑھا یا اسی طرح مڑو کے کہ ابن آدم بھی اونچے پر چڑھا جائے

(Courtesy of American Bible Society)

HINDUSTANI

Hindustani (including both Urdu and Hindi) is the native language of some 65,000,000, but is used as a sort of *lingua franca* throughout India, particularly in the north; it has been estimated that nearly 140,000,000 can be more or less satisfactorily reached with it.

Hindustani has only two genders. Nouns denoting males are masculine, those denoting females feminine; names of inanimate objects are usually feminine if they end in *-ī*, *-sh*, or *-t*, otherwise masculine. The plural is regularly indicated by the suffix *-on*,¹ in all cases save the nominative plural; the latter is the same as the nominative singular for masculine nouns ending in consonants (*mard*, man; *mard*, men); changes *-ā* or *-a* to *-e* in the case of masculines ending in *-ā* or *-a* (*beṭā*, son; *beṭe*, sons); adds *-ān* for feminine nouns ending in *-ī* or *-ū* (*beṭī*, loaf; *beṭīān*, loaves); adds *-eñ* for other feminine nouns (*bāt*, word; *bāteñ*, words).

Suffixes, or postpositions, to indicate case-relations are added on to both the singular and the plural form of the noun, as follows: agent case ("by") or instrumental ("with"): *-ne*; genitive ("of"): *-kā*, *-ke*, *-kī*; dative ("to"): *-ko*; accusative (direct object): *-ko* or same as nom.; ablative ("from"): *-se*; locative: *-men* ("in") or *-par* ("on").² The declension of *mard*, "man", is as follows: Singular - Nom., *mard*: Agent or Instr., *mard-ne*; Gen., *mard-kā* (*mard-ke*, *mard-kī*)³; Dat.,

1. Masculines in *-ā* or *-a* drop this vowel before adding the *-on* plural oblique suffix (*beṭā*, son; *beṭ-on-ne*, by the sons).

2. Masculine nouns in *-ā* or *-a* change this ending to *-e* before adding the case-suffixes in the singular (*beṭā*, son; but *beṭe-ko*, to the son).

3. The noun in the genitive is treated like an adjective and must, like the adjective, precede and agree in gender and number with the noun it modifies; *-kā* is therefore used before masculine nouns in the nom. sg. (*mard-kā beṭā*, the man's son): *-ke* before all other masculine noun-forms, singular or plural (*mard-ke beṭe*, the man's sons; *mard-ke*

mard-ko; Acc., *mard-ko* or *mard*; Abl., *mard-se*; Loc., *mard-men*, *mard-par*; Plural - Nom., *mard*; Agent or Instr., *mard-oñ-ne*; Gen., *mard-oñ-kā* (-*ke*, -*kī*)³; Dat., *mard-oñ-ko*; Acc., *mard-oñ-ko* or *mard*; Abl., *mard-oñ-se*; Loc., *mard-oñ-men*, *mard-oñ-par*.

Adjectives immediately precede the noun modified, and are uninflected, unless they end in *-ā*, which then changes to *-e* and *-ī* under the same circumstances as the genitive ending *-kā* (see note 3): *khūb kitāb* (fem. nom. sg.), a fine book; *khūb kitāben* (fem. nom. pl.), fine books; *khūb laṛkā* (masc. nom. sg.), a fine boy; *khūb laṛke* (masc. nom. pl.), fine boys; *baṛā mard* (masc. nom. sg.), a great man; *baṛe mard-kā* (masc. gen. sg.), of a great man; *baṛe mard* (masc. nom. pl.), great men; *baṛī kitāben* (fem. nom. pl.), great books. There is no change in form to express degrees of comparison, but the comparative is expressed by putting the word with which the comparison is made in the ablative (by adding the postposition *-se*): *wuh baṛā hai*, he is great (lit., he great is); *wuh sultān-se baṛā hai*, he is greater than a king (lit., he king-than great is). The superlative is formed by prefixing to the adjective expressions like *sab-se*, "than all": *wuñ sab-se baṛā hai*, he is the greatest of all (lit., he all-than great is).

Verbs have only one conjugation. The infinitive always ends in *-nā* (*girnā*, to fall; root: *gir-*); the present participle in *-tā* (*girtā*, falling); the past participle in *-ā* (*girā*, fallen). An "indefinite" present (I fall, I may fall) is formed by using the present participle with the subject pronouns⁴: I may fall, *maiñ girtā* (*girtī*)⁵; you may fall, *tū girtā* (*girtī*);

beṭe-se, from the man's son); *-kī* before all feminine nouns, singular or plural (*mard-kī beṭī*, the man's daughter; *mard-kī beṭiñ*, the man's daughters).

4. These are: I, *maiñ*; you (sg.) *tū*; he, she, it, *wuh*; we, *ham*; you (pl.), *tum*; they, *wuh*.

5. Participles agree with the subject in gender and number: masc. sg., *-ā*; fem. sg., *-ī*; masc. pl., *-e*; fem. pl., *-iñ*; they (masc.) may fall, *wuh girte*; they (fem.) may fall, *wuh girtīñ*.

etc. A more definite present (I am falling) is formed by adding to the participle the present of the verb *honā*, "to be":⁶ *maiñ girtā hūñ*, I am falling. The imperfect is formed by adding *thā* (fem. sg. *thī*; masc. pl. *the*; fem. pl. *thīñ*) to the present participle: *maiñ girtā thā*, I was falling. The past is formed by using the subject pronoun with the past participle (*maiñ girā* or *maiñ girī*, I fell); the pluperfect by adding *thā* to the past participle (*maiñ girā thā*, I had fallen). The future has the following forms: *gir-ūngā*, *gir-egā*, *gir-egā*, *gir-eñge*, *gir-oge*, *gir-eñge* (change *-ā* to *-ī*, *-e* to *-īñ* for the feminine). The imperative has the endings: *-ūñ*, *-*, *-e*, *-eñ*, *-o*, *-eñ*. The verb usually comes last in the sentence, with the subject or agent first, followed by the object, each immediately preceded by its modifiers.

The numerals from one to ten are: *ek*, *do*, *tīn*, *chār*, *pāñch*, *chha*, *sāt*, *āṭh*, *nau*, *das*. 100 is *sau* or *sai*, 1000 is *hazār*.

COMMON WORDS AND EXPRESSIONS

what is your name?, *tumhārā kyā nām hai?*
 what is the matter?, *kyā hai?* what else?, *aur kyā?*
 do you speak Hindustani?, *tum Hindūstānī bolte ho?*
 a little, *wājibī* do you understand?, *tum samajhte ho?*
 to the right, *dā'eñ* to the left, *bā'eñ*
 darn it!, *balā se!* I'm hungry, *mujhe bhūk lagī hai*
 please tell me, *mihrbānī kar-ke bolo* thank you, *taslīm*
 what do you call this in Hindustani?, *is-ko Hindūstānī-men kyā kahte ho?*
 it's raining, *pāñī par̄tā hai* here, *yahāñ*
 who?, *kaun?* what?, *kyā?* where?, *kahāñ?*, *kidhar?*
 when?, *kab?*
 today, *āj* yesterday, *kal* always, *hamesha*
 quickly, *turant*, *jald* no, *nahīñ* not, *na* enough, *bas*
 more, *ziyāda* how much?, *kitnā?*

6. I am, *hūñ*; you are, *hai*; he, she, it is, *hai*; we are, *haiñ*; you are, *ho*; they are, *haiñ*.

THE DRAVIDIAN LANGUAGES OF INDIA

These languages, which predominate in southern India, with a total speaking population of approximately 100,000,000, are numerous. Chief among them are Tamil, Telugu, Canarese and Malayalam. It is believed that they are the descendants of the original languages of India, spoken throughout the Peninsula before the coming of Indo-Aryan-speaking invaders.

They are written in native alphabets which, while related to the Devanagari of the Indo-Aryan tongues, are so modified as to appear at first glance totally different.

A few of their distinctive features are: reluctance to permit consonants to appear in groups within the word (a group such as *skr* or *str*, for example, will not occur); double consonants, on the other hand, are frequent, but consonant sounds at the end of words are rare. The accent is not very well defined, but mostly initial. The root of a word normally remains unchanged, and suffixes (postpositions and detached particles) are added at the end. Distinction among the various parts of speech (nouns, adjectives, verbs) is not very well defined. Something corresponding to gender appears, but it is based on caste rather than sex, with rational beings in a "high-caste" classification and irrational beings and inanimate objects in a "casteless" one (women are sometimes regarded as irrational beings and placed in the casteless classification). Distinction between masculine and feminine appears only in third person pronouns. The plural is usually undetermined in the case of "casteless" objects. The adjective is undeclined. The pronoun displays a difference between "we" including the person addressed (Tamil *nām*) and "we" which excludes the person addressed (*nāngal*). The verb has an affirmative and a negative voice (Canarese, I did, *madid-enu*: I did not, *mad-enu*). Great use is made of participles, which normally take care of all subordinate clause functions.

LANGUAGES OF THE SINO-TIBETAN GROUP

CHINESE, THAI (SIAMESE), BURMESE, TIBETAN, ANNAMESE.

The languages of the Sino-Tibetan group are said to be monosyllabic (consisting of one-syllable words). Recent research, particularly in the Tibetan and Burmese fields, casts some doubt upon monosyllabism as the original state of these languages (there seem to be remnants of former inflectional prefixes and suffixes in both Tibetan and Burmese).

In a monosyllabic tongue, the number of possible sound-combinations is limited. If the language is rich in varied

sounds, and consonant as well as vowel-sounds are allowed to appear at the end of the word, the combinations may run into the thousands.

If the language is relatively poor in consonant sounds, and the majority of these are excluded from the final position in the word, the number of possible combinations gets to be quite limited: such is the case with North Mandarin, the dialect on which the official Chinese language is based. Only about 420 combinations of sounds are possible in monosyllabic Mandarin, with the result that the same combination must do service for many different ideas, expressed in *writing* by totally different characters.

Tones, however, add diversification to these combinations. The fact that North Mandarin has four possible tones for each of its 420 sound-combinations immediately raises the number of possible spoken "words" to 420×4 .

The additional fact that the monosyllabic tendency of these languages does not preclude them from putting together two or more monosyllabic words to form a "compound" which carries a different meaning from those of its constituent parts¹ adds greatly to the vocabulary.

Lastly, since the same word, in the same tone, may acquire several different meanings according to its position and use in the sentence, this process of multiplication of meanings is carried on to a point where the language has an adequate supply of words to express all necessary concepts.

Chinese being by far the most important of the Sino-Tibetan languages, and its tone system and grammatical arrangement being to some extent typical of the entire group, further clarification of these tongues will appear from the outline of Chinese.

1. E. g., Chinese \hsia (under) + √wu (noon) = "afternoon"; note the identical process in the structure of the English word (*after* + *noon*).

CHINESE²

THE WRITTEN LANGUAGE

Chinese writing is largely pictographic and ideographic, with symbols representing complete *objects*, *words* and *ideas*, rather than *sounds*. In their origin, the Chinese characters appear to have been pure picture-writing.³ The symbols for "sun" and "moon", for instance, were pictured representations of the objects in question ("sun" was originally a circle with a straight line in its center; "moon" was the picture of a crescent with or without a line running through it). In rapid brush-

2. Requirements of space and time preclude our giving, in this volume, the treatment that this extremely important language calls for. In the forthcoming "World Languages Series" it is planned to extend to Chinese the identical treatment that is here given to German, French, Spanish, Italian, Portuguese, Russian and Japanese.

3. The same picture-writing, though with different forms, gave rise to the ancient Egyptian hieroglyphs, the Babylonian cuneiform inscriptions, and even the Phoenician system of writing from which our own alphabet is derived, as well as to the picture-writing of the Mayas and Aztecs, which never got beyond the picture stage. People at first convey their ideas in pictorial representations of objects, and the association of a picture-symbol with the spoken sounds representing the identical object is unconscious and not at all deliberate. It is only as a certain picture-symbol gets to be constantly associated with a certain sound or set of sounds that it gets to acquire a phonetic value. In the ancient Egyptian system, for instance, the symbol for "sun" (the *spoken* word for "sun" was *ra*) got to be associated with the value of the initial *r* of *ra*, until ultimately it came to be employed whenever the sound *r* was to be represented. In Phoenician, the symbol for a house (the word for "house" was *beth*) ultimately came to have the value of the initial *b* of *beth*, and the symbol for camel (the spoken word was *gimel*) got to have the value of the initial *g* of *gimel*. The process frequently runs from a pictorial symbol representing a word to the value of a syllable (usually the initial) in that word, then to the value of the consonant in that syllable. Chinese has not advanced very far along this road, though many characters are used with a phonetic value to clarify the pronunciation of another character which might itself be ambiguous.

writing, these symbols became conventionalized in shape, "sun" assuming the form of an upended oblong with a horizontal line through it, "moon" that of the same oblong, but open at the bottom with two horizontal lines inside. The combination of these two symbols ("sun" followed by "moon") conventionally stands for the adjective "bright", which has a pronunciation totally unrelated to that of either "sun" or "moon", while "sun" shining through "tree" gives, conventionally, the character for "east", which in the spoken language has no pronunciation connection with either "sun" or "tree".

The drawbacks of such a system of writing, largely unconnected with pronunciation, are enormous. It is estimated that to read an ordinary Chinese newspaper one must be acquainted with at least 3000 separate characters, while for works of literature and philosophy the characters run into several additional thousand.

There are corresponding advantages. The *written* language (especially literary) is standardized throughout China, regardless of *spoken* dialectal variations. A document written in literary Wen-li can be read anywhere, though if it is read aloud, local pronunciations may differ to the point of being mutually incomprehensible. The symbol for "man" is the same throughout China, though it is variously pronounced *jên*, *nyin*, *nên*, *lên*, *yên* in different provinces. It is as though the western nations were to generalize their own limited system of numerical and other symbols: "1000" is "one thousand" to the English-speaker, "tysyach" to the Russian, "mille" to the Frenchman; "\$10" is "ten dollars" to the American, "diez dólares" to the Spanish speaker; "lb." is "pound" to the American, "livre" to the Frenchman; "NaCl" is "sodium chloride" to the American chemist, "cloruro di sodio" to the Italian; all who know the symbols in question understand their meaning, even though the spoken renditions of them diverge radically.

Wen-li, China's standardized, petrified literary language (which may be said to be an unspoken tongue, since its symbols carry no definite phonetic value, but only ideographic connota-

tions, differently rendered in sound in different parts of the country) is in process of replacement by Kuo-yü, the "National Tongue", which uses the written symbols of Wen-li, but assigns to each of them a definite spoken value.

KUO-YÜ AND THE DIALECTS — SPEAKERS AND LOCATION

Kuo-yü is to some extent an artificial national tongue, based primarily upon the spoken North Mandarin dialect in its Peiping variety (North Mandarin, with comparatively slight local variations, was the language of the majority of China's population even before the advent of Kuo-yü). It is now estimated to be the language of common use of some 280,000,000 of China's 425,000,000 inhabitants, and tends to encroach more and more upon the local dialects as the tendency toward national unity grows stronger.

The main Chinese dialects which diverge to such an extent from Kuo-yü as to be practically unintelligible are: Wu, around the Yang-tze delta (Shanghai, Soochow), about 34,000,000; Yüeh of Kwang-tung (Cantonese)⁴, about 38,000,000; Min of Fu-kien province, about 30,000,000. The Miao of southern China, with several million speakers, is rated as a separate dialect of the Sino-Tibetan group. Sub-dialects (Swatow, Amoy, Ning-po, etc.) are extremely numerous, but they are declining in use and importance. For practical purposes, at least two-thirds of China's population can be reached with Kuo-yü⁵.

Chinese speakers abroad are estimated at about 8,000,000, of whom about 6,500,000 (largely Min speakers) are in

4. Cantonese is of special interest to Americans because the majority of Chinese residents in the U. S. A. are from the Cantonese-speaking region. It distinguishes itself from Mandarin especially by its use of a larger number of tones, and by permitting such consonant sounds as *-t* and *-p* to stand at the end of a word.

5. The term "Chinese" as used henceforth is to be understood as referring to Kuo-yü.

other countries of Asia and in the islands of Oceania (notably Thailand, Malaya, Indo-China and the Dutch East Indies), and some 250,000 in the Western Hemisphere.

SOUNDS.⁶

Vowel sounds.

a = father
 e = met
 ê = us
 i = machine
 ĭ = pin
 o = more
 u = rude
 ü = French u
 ũ = the; is often completely
 silent

Diphthongs.

ai = aisle
 ao = how
 ei = eight
 ia = yard
 iě = yes
 iu = you
 ou = toe
 ua = quantity
 ui = we
 uo = war
 iao = yowl
 uei = way

Consonants.

ch = Italian cielo
 ch' = church
 f = four
 h = house
 hs = house quickly followed by house
 j = pleasure, with a strong mixture of r
 k = sky
 k' = cat
 l = low
 m = moon
 n = new⁷
 ng = king⁷

6. In Chinese to an even greater extent than in other tongues, the English equivalents given are only approximations to the native sounds, which can accurately be acquired only from a speaker.

p = spin

p' = pin

s = soul

sh = shore

sz = loss quickly followed by zeal

t = stem

t' = tale

ts = that's all

ts' = its

tz = store quickly followed by zeal

tz' = tale quickly followed by zeal

English consonant sounds not appearing in Chinese: b, d, g, r, v, z, *thing*, *this* (a sound approximating r appears in *\erh*, and in words containing j). Note: where consonants and combinations appear with and without the accent (ch, ch'; k, k'; p, p'; t, t', etc.), the consonant with the accent is aspirated; that is, it is given the slight puff after it which is characteristic in English when the consonant begins the word (*pin* = p + *hin*; *tale* = t + *hale*). Where the accent does not appear, the puff is missing, as is the case in English when the consonant follows an s (*spin*, *state*). Or, to put it another way, the consonants without the accent have the sounds they normally would have in Romance languages, like French or Italian (It. *cielo* vs. En. *church*; Sp. *perro* vs. En. *pet*); this softened pronunciation of the unaspirated unvoiced consonants (ch, k, p, t, ts) occasionally makes them sound to the English ear somewhat like the corresponding voiced consonants (j, g, b, d, dz).

The fact that Chinese writing has only partial phonetic value deprives spoken Chinese of a good deal of the visual support and stabilizing influence which western tongues normally derive from their written counterparts, with the result that Chinese pronunciation with respect to many consonant-sounds is somewhat vague and fluctuating. There is confusion.

7. -n and -ng are the only consonant-sounds permitted at the end of a word, save in the word *\erh* (two).

for example, among the ch, k and ts sounds, with k tending toward the sound of ch, and ch' toward the sound of ts (*Chung King* may be heard pronounced *Tsung Ching*).

TONES.

Chinese has four distinct tones. They are indicated by symbols used in front of each word:

— indicates that the vocable is to be pronounced on a fairly high, level note: $\bar{sh\check{i}}$, “to lose”;

/ indicates a rising inflection: $\nearrow sh\check{i}$, “ten”;

√ indicates a slight fall followed by an immediate rise: $\surd sh\check{i}$, “history”;

\ indicates an abrupt fall: $\searrow sh\check{i}$, “city”, “market”.

(The vocable *shī* has been selected because it has all four tones; but note that in addition to the meanings given, there are several other totally unrelated meanings for this same word in each one of the four tones, depending upon special use, position in the sentence, etc.).

Of interest is the fact that a few words in very common use change their tone if they precede another word having the same tone: the word for “I”, for example, is $\surd wo$; but “I write” is $\nearrow wo \surd hsi\check{e}$, with $\surd wo$ shifting its tone because the following word has the same tone.

Tones are, of course, best learned by contact with native speakers. Limited comprehensibility may be achieved by a foreigner even without a mastery of tones, provided there is mastery of word-order and the use of certain syntactical make-shifts, such as noun-classifiers (see p. 499).

GRAMMATICAL SURVEY.

In outlining Chinese grammar, it is necessary to eject from one's mind, to some extent, the Indo-European grammatical classifications (nouns, adjectives, adverbs, verbs, prepositions, etc.). The same Chinese word, according to its position and use, may translate an English noun, adjective, verb, or preposi-

tion; \setminus hsia, for instance, may mean “under” (preposition), “to descend” (verb), “bottom” (noun); the “down” concept, it will be noted, is common to all the translations. There is a striking similarity to the English process whereby “mail” can, according to its position and use, be a verb (“to mail a letter”), a noun (“by mail”), or an adjective (“mail-clerk”). In Chinese, as in English, words acquire their full significance only by reference to their position and function in the sentence.

An interesting theory advanced by some linguists is that at one time Chinese was a fully inflected, polysyllabic tongue, but that prehistorically it went through the same process that English has undergone during the last fifteen centuries and is still undergoing at present, the falling off of inflectional endings, the tendency to use one-syllable words (as evidenced by some of our popular newspaper headlines), and the consequent reliance upon word-order to clarify meanings. Whether this theory be true or not, the fact remains that there are remarkable points of contact between modern Chinese and modern American newspaper-headline English.

Word-order is of paramount importance in Chinese, and must be strictly observed. The modifier regularly precedes the modified word (adjective before noun; adverb before verb). The subject-verb-object order is rigidly adhered to.

Chinese compounds are numerous and varied; as many as four monosyllabic words sometimes go into the rendering of one idea. Two-word compounds are extremely frequent: \setminus k'an \setminus chien, literally “look-see”, for “to see”; $\bar{c}hin$ $\bar{t}'ien$, “now-day” for “today” (note the similarity of formation in English; “yester-day” is “past-day” in Chinese, and “tomorrow” is “next-day”).

Nouns and Articles.

Chinese has no definite article; the demonstrative \surd tzũ however, often approaches the value of “the” rather than “this”.

The numeral \bar{i} (“one”) may be used with the value of “a”, “an”.

The Chinese noun has no distinction of gender, number

or case; /jên may mean "man" or "men", according to the context.

The fact that a noun is in plural use may, if necessary, be indicated by (a) the use of a numeral; (b) the use of a plural demonstrative; (c) the use of an indefinite adjective, such as "many", "some"; (d) the plural suffix *-mên*, /*mên*: eight men, *-pa* /*jên*; these men, \ *chê* *-hsiě* /*jên*; many men, *-to* /*jên*; men, /*jên* *-mên*. The last form, however, is normally avoided (except in general statements), *-mên* being preferably reserved for personal pronouns.

-ti, placed after the noun, indicates a genitive or possessive function, and may be said to correspond to English 's, -s': the man's house(s), the men's house(s), /*jên* *-ti* /*fang* √*tzũ*.

The fact that the noun is the subject of the sentence is indicated by its position before the verb; the fact that it is the object of the verb is indicated by its position after the verb: this man sees the child, \ *chê* /*jên* \ *k'an* \ *chien* /*hai* √*tzũ* (this man look see boy the); this boy sees the man, \ *chê* /*hai* √*tzũ* \ *k'an* \ *chien* /*jên*.

Other case-relations are indicated by separate words serving as prepositions or postpositions, placed before or after the noun they govern: to the man, √*kei* /*jên*; under the bridge, /*ch'iao* \ *hsia* (lit. bridge under).

Adjectives and Adverbs.

The position of a word used as an attributive adjective is before the noun it modifies: the good man, √*hao* /*jên*.

If the adjective appears after the noun, it has the value of a predicate adjective: the man (is) good, /*jên* √*hao*. The verb "to be" is normally omitted in this construction.

The position of a word used as an adverb is usually before the verb: to write well, √*hao* √*hsiě* (lit., well; or good, to write). The same form is normally used for both adjective and adverb: slow, slowly, \ *man*.

To form the comparative of adjectives and adverbs, the prefix \ *kêng* is used: slower, more slowly, \ *kêng* \ *man*.

To form the superlative the prefix \tsui is used: slowest, most slowly, \tsui \man.

Pronouns.

Personal.

I, √wo (before verb)	me, √wo (after verb)
you (sg., subj.), √ni (bef. verb)	you (sg., object), √ni (after verb)
he, she, ʔ'a (bef. verb)	him, her, ʔ'a (after verb)
we, √wo ʔmên (bef. verb)	us, √wo ʔmên (after verb)
you (pl. subj.), √ni ʔmên (bef. verb)	you (pl. obj.), √ni ʔmên (after verb)
they, ʔ'a ʔmên (bef. verb)	them, ʔ'a ʔmên (after verb)

Possessive.

Add ʔti to personal pronoun: our, ours, √wo ʔmên ʔti.

Demonstrative.

this, \chê	these, \chê ʔhsiě
that, \na	those, \na ʔhsiě

Interrogative.

who?, whom?, /shui
whose?, /shui ʔti
which?, √na
which one?, √na ʔi ʔko

Relative.

There is no true relative pronoun in Chinese; an expression such as "the mountain which is at the center of the country" is rendered by "at country's center mountain", \tsai /kuo ʔchung ʔhsin ʔti ʔshan.

Numerals.

1 ʔi	5 √wu
2 \erh	6 \liu
3 ʔsan	7 ʔch'i
4 \szũ	8 ʔpa

9	√ <i>chiu</i>	20	∖ <i>erh</i> / <i>shǐ</i>
10	/ <i>shǐ</i>	100	√ <i>pai</i>
11	/ <i>shǐ</i> ⁻ⁱ	1000	⁻ <i>ch'ien</i>
12	/ <i>shǐ</i> ∖ <i>erh</i>	10,000	∖ <i>wan</i>

A digit before "ten" multiplies it, after "ten" is added to it: "14" is "ten four"; "40" is "four ten"; "45" is "four ten five"; "565" is "five hundred six ten five".

An ordinal numeral is, usually formed by prefixing ∖*ti* to the cardinal: fourth, ∖*ti* ∖*szǔ*.

Classifiers.

Classifying words are often prefixed to certain classes of nouns in Chinese, particularly after numerals. The classifier indicates that the noun specifically belongs to a certain class of objects, and removes whatever doubt might be caused by phonetic similarities; the entire expression is thereby made more definite (compare the English "five *head* of cattle"). In Pidgin English, the native tendency to use classifiers transpires in the constant use of such words as "fellow", "piecee" ("two fella man"; "five piecee shirt"). A few examples of classifiers are:

∖*kê* or ∖*ko* (for human beings): three men, ⁻*san* ∖*ko* ∖*jên*.
⁻*chǐ* (for animals, hands, feet, etc.): five hands, √*wu* ⁻*chǐ* √*shou*.

∖*chien* (for things, clothes, etc.): four coats, ∖*szǔ* ∖*chien* ⁻ⁱ.

If an adjective is used with the noun, it goes between the classifier and the noun: five large hands, √*wu* ⁻*chǐ* ∖*ta* √*shou*.

Somewhat similar in nature, but not in position, to the classifier is √*tzǔ*, which *follows* the noun and is an indication of a concrete object: house, /*fang*, or /*fang* √*tzǔ*. This "concretizer" has been compared to a definite article.

Verbs.

The Chinese verb has no tense, mood, person or number, and simply indicates the action: to write, √*hsiē*.

Present.

“I write”, “you write”, “he writes”, etc. are formed by prefixing the personal pronoun to the verb: /*wo* √*hsiě*; /*ni* √*hsiě*; etc.

Past.

The force of a past is often given to a verb by adding √*liao* (lit. “finish”; compare Pidgin “he die finish” for “he died”, “he is dead”): I wrote, /*wo* √*hsiě* \ *liao*.

A secondary past, corresponding in value to the present perfect, is sometimes formed by adding \ *kuo* (experience): I have written, /*wo* √*hsiě* \ *kuo*. (I have had the experience of writing).

Note, however, that even without √*liao* or \ *kuo*, a verb may receive past force from the appearance in the sentence of a word indicating past time, such as “yesterday” or “last year”. The adverbial expression of time in such cases must, in accordance with the rule for the position of adverbs, immediately precede the verb: “I wrote yesterday” becomes “I past day write”, √*wo* /*tso* *t'ien* √*hsiě*.

Future.

There is no specific future form, future force being given to the verb by the use in the sentence of some expression indicating future time: “I shall write tomorrow” becomes “I next day write”, √*wo* /*ming* *t'ien* √*hsiě*.

Conditional.

/ *ju* or \ *jo*, “if”, or / *ju* √*kuo*, “if really” are the nearest approximation to a conditional; if no subject appears, / *ju* or \ *jo* comes first in the sentence; otherwise, the subject precedes: if he does not come, *t'a* \ *jo* \ *pu* / *lai*.

Negative.

The negative form of the verb is produced by prefixing / *mei* or / *pu* to the verb: I do not eat, √*wo* / *pu* *ch'ī*.

／*mei* is especially used with the verb √*yu*, “to have”, “there to be”: ／*mei* √*yu*, there is not, there are not. ／*Pu* is never used in the past.

Interrogative.

No change in word-order occurs in an interrogative sentence, but the interrogative particle *ma* (less frequently *ni*) appears at the end: do you see?, √*ni* \ *k'an* \ *chien* *ma*.

A question may also be formed, however, by stating the verb first in the affirmative, then in the negative: √*ni* \ *k'an* \ *chien* \ *k'an* ／*pu* \ *chien*, lit. “you see not see” (do you see or don't you see?).

Reflexive.

A reflexive pronoun is formed by adding \ *tzũ* √*chi* to the personal pronoun: I see myself, √*wo* \ *k'an* \ *chien* √*wo* \ *tzũ* √*chi*.

WORDS AND PHRASES

good morning, ／*ni* √*hao*; √*tsao* *an*
 good afternoon, ／*ni* √*hao*; \ *hsia* √*wu* ／*p'ing* *an*
 good evening, good night, ／*ni* √*hao*; √*wan* *an*
 good-bye, \ *tsai* \ *chien*; \ *tsai* \ *hui*; (au revoir) \ *hui*
 t'ou \ *chien*
 thank you, \ *hsiě* \ *hsiě*
 you're welcome, \ *pu* \ *yao* \ *k'ê* \ *ch'i*
 please, √*ch'ing*
 very gladly, ／*hên* √*hsi* *huan*; √*hên* *kao* \ *hsing* *ti*
 perhaps, ／*yě* √*hsü*
 here is, \ *chê* \ *li* √*yu*
 there is, \ *na* √*li* √*yu* (pointing out); √*yu* (stating)
 where?, where is?, (subject) \ *tsai* ／*na* √*li*
 how do I go to...?, √*wo* √*tsen* *mo* \ *tao*...?
 yes, \ *shī* (in reply to “is” questions); √*yu* (in reply to
 “have” questions)

- no, /pu \shī (in reply to "is" questions); /mei √yu (in reply to "have" questions)
- how are you?, /ni √hao \pu √hao
- very well, /hên √hao
- how much is it?, \chê \kê ˘to √shao /ch'ien
- why?, \wei /shên ˘mo
- when?, /shên ˘mo /shī \hou
- because, ˘yin \wei
- today, ˘chin ˘t'ien
- tomorrow, /ming ˘t'ien
- yesterday, /tso ˘t'ien
- to the right, \yu \pien
- to the left, √tso \pien
- straight ahead, ˘i /chī ˘ti
- what time is it?, /chi √tien ˘chung; /shên ˘mo /shī \hou
- it is now six o'clock, \hsien \tsai \liu √tien
- I'm hungry, √wo \ê ˘la
- I'm thirsty, /wo √k'ê ˘la
- I'm cold, /wo √lêng
- I'm warm, /wo √nuan ˘ho
- I'm ill, √wo \ping ˘la; /wo √yu \ping
- what is your name?, √ni \kuei \hsing (very polite); √ni \hsing /shên ˘mo; √ni \chiao \shên ˘mo /ming ˘tzǔ
- my name is..., √wo \hsing...; √wo \pi \hsing; √wo /ming ˘tzǔ \shī
- do you speak...?. √ni \hui ˘shuo... ˘mo
- certainly, ˘zǔ /jan
- very little, /hên √hsiao

 don't mention it, ˊpu \yao /t'í
 what do you want?, √ni \yao /shên ˊmo
 it's fine weather, ˊt'ien ˊch'í √hao
 never mind, ˊpu \yao √chín
 I'm glad, √wo √hsi ˊhuan /chi ˊlo
 too bad!, \t'ai √k'ê ˊhsi
 what is the matter?, √tsen ˊmo ˊla

OTHER LANGUAGES OF THE SINO-TIBETAN GROUP
SIAMESE, TIBETAN, BURMESE

Siamese is a monosyllabic tongue and has five tones. Its system of writing is derived from the Devanagari of India and is quite complicated, with 44 consonants, 32 vowels, and the five tones mentioned above (the tones and some of the vowel-values are indicated above or below the written line.)

There is no gender or inflection. Possession is generally indicated by the simple expedient of placing the possessor immediately after the thing possessed (my ring, *wen k'ha*, lit. ring-me; this device appears also in Malay; see p. 511). Determinatives or classifiers are abundantly used, especially after numerals ("tiger two head" for "two tigers"; "knife three blade" for "three knives"). The adjective, which is invariable, as are all parts of speech, usually follows the noun. The numerals from one to ten are: *nung, sang, sam, si, ha, hoh, chet, pêt, kaû, sip*. Verbs have no tense or mood, such accessory

ideas being conveyed by adverbial expressions. Samples of Siamese sentence-structure are:

Rao dek-chai sam kon cha pai chap pla
 we boy three person future go catch fish
 sam-rap hai paw kin.

for-to give father eat (We three boys will go and catch fish in order to feed our father).

Me tan yu ti nai.
 Mother you live place where (Where does your mother live?).

Me pai ta-lat leao.
 Mother go bazaar finish (Mother went to the bazaar).

A very similar structure appears in Burmese and Tibetan, which are monosyllabic and make use of word-order and tones to distinguish meanings. Traces of ancient prefixes, dropped by the modern tongues, are said to be in evidence. There is in these tongues no gender (save for an added "male" or "female"

MALAY

by

Rev. William E. Lowther, Litt. D.¹

The Malay language is understood over a wider geographical extent in the Eastern Archipelago than any other language. It is used in the whole of the Malay Peninsula; Siam, in some of the southern parts; Indo-China, along some coasts and in some river valleys; the Straits Settlements; Sumatra; Java, in considerable part; Borneo; Celebes; Flores; Timor; and in islands too numerous to mention.

Whatever variations there may be in these regions, the Malay speaker masters in a short time. Some of the languages that bear other names are so nearly akin to Malay that the task of learning them is like the task of a Spaniard who undertakes to study Portuguese.

When the Malays became Muhammadans, in the thirteenth century, they adopted the Arabic alphabet with some modifications, and use it to this day, though there is an increasing amount of teaching and writing done with the Roman alphabet. The Arabic writing is such a poor guide to pronunciation that the student should not undertake it till he is using the language with some comfort.

The loan words of Malay are chiefly from Sanskrit and Arabic. The Malay language is dissyllabic. Monosyllables are few. Words of more than two syllables are also rare. A glance at a page of Malay will show many words that look as though they were polysyllables, but in the overwhelming majority of cases they are dissyllables with affixes. Malay is among the "easier" languages. The verb has few irregularities; there are no conjugations or declensions.

1. Forms in parentheses, preceded by the letters D. M., are Malay variants current in the Dutch East Indies which diverge from the Malay of British Malaya. They have been supplied by Mrs. Claire Holt, of Columbia University.

ACCENT.

The accent ordinarily falls on the syllable next to the last, but if that syllable is open and contains the vowel *ě* the accent generally falls on the last syllable. Accent is lighter in Malay than in English:

makan, eat: pronounce *má-kan*;
běsar, great: (*ě* in open syllable); pronounce *bě-sár*;
děndam, longings: (*ě* in closed syllable); pronounce *děń-dam*.

As a rule the addition of affixes to a word does not change the place of the accent:

<i>makan</i> , eat;	<i>mákanan</i> , food;
<i>běsár</i> , great;	<i>kěběsáran</i> ; greatness.

PRONUNCIATION.

Vowel Sounds.

a = father
 e = they
 i = police
 o = hope
 u = crude
 ua = wad

ě represents a sound such as the one between the k and the n in German *Knabe*, *Knecht* (*běsár*, pronounced *bsár*; *děndam*, pron. *dń-dam*; *bětúl*, pron. *btúl*).

Consonant Sounds.

Generally as in English. Final *k* is a glottal stop. *G* is always hard. *R* is trilled more than in English. *S* is always hissed, never like *Z*. *Ng* as in *singer*; *ngg* as in *finger*.

We shall now proceed to a study of the Malay language by using the Lord's Prayer as our textbook. From the fifty-nine words in it, we shall develop by far the greater part of the Malay grammar.

NOUNS.

Malay words do not always fit into our English grammatical classifications. The noun does not change form to denote number, gender or case. (44) *Orang* means man, men, people. Like our word "sheep," it depends upon the context to reveal its number. When it is necessary to indicate plurality with more exactness, the words *sĕgala* and *sĕmua*, all, and *banyak*, many, may be added to the word: *sĕmua orang*, *sĕgala orang* (compare French *tout le monde*).

Some nouns have the faculty of indicating plurality, and also variety, by reduplication:

- (44) *Orang*, man; *orang-orang*, men, mankind.
 (38) *Hutang*, debt; *hutang-hutang*, debts.
 (34) *Hari*, day; *sa-hari-hari*, every day, daily.
Kuda, horse; *kuda-kuda*, horses.
Budak, child; *budak-budak*, children.

Only observation of Malay usage will guide the student in learning the nouns that can be reduplicated. There is no rule that is fixed, other than to say that the names of living creatures may be reduplicated, and that undefined nouns standing alone may be treated as plural.

DERIVATIVE NOUNS.

The Malay system of prefixes and suffixes can change verbs and other parts of speech into nouns.

Prefix P, often with a "bridge letter," usually indicates an agent. When used with the suffix *an*, an abstract noun is formed:

Bunuh, kill; *Pĕmbunuh*, murderer; *Pĕmbunohan*, murder.
Ajar, teach; *Pĕngajar*, teacher; *Pĕngajaran*, teaching, doctrine.

- (53) *Choba*, attempt; *Pĕnchoba*, tempter; *Pĕnchobaan*, temptation.

The suffix *an* generally denotes the thing that is affected by the action expressed by the verb:

- (31) *Makan*, eat; *Makanan*, thing eaten, food.
Minum, drink; *Minuman*, thing drunk, beverage.

The Prefix K forms nouns from verbs:

- (17) *Hëndak*, wish; *Këhëndak*, will, desire.

The prefix *k* with the suffix *an* forms nouns, generally abstract, from other nouns and from other parts of speech:

- (15) *Raja*, king; *kërajaan*, kingdom.

- (59) *Jahat*, wicked; *këjahatan*, wickedness.

The suffix *an* with reduplication may express multiplicity:

- (34, 35) *Hari*, day; (*sa-*) *hari-harian*, daily.

When two nouns stand together, the second is in the possessive case:

- (31, 44) *Makanan orang*, man's food (also *orang punya makanan*).

- (5, 31) *Makanan kami*, our food (also *kami punya makanan*).

The word *punya* makes any noun a possessive. The *punya* possessive must stand before its object.

PERSONAL PRONOUNS.

There is no variation in the form of the pronouns to indicate case:

<i>sahaya, saya, aku,</i>	I, me, my (5, 27, 41, 51, 56)
<i>ëngkau,</i>	thou, thee, thine
<i>dia,</i>	he, she, it, him, her, his, its.
<i>kita, kami,</i>	we, us, our
<i>kamu,</i>	you, your
<i>dia, dia-orang,</i>	they, them, their

The personal pronouns are often shortened or changed in the possessive case.

- (12, 13) *Nama kamu*, or *nama-mu*, your name.

- (15) *Kërajaan kamu*, or *kërajaan-mu*, your kingdom.

- (17, 18) *Këhëndak kamu*, or *këhëndak-mu*, your will.

Nama aku, or *nama-ku*, my name;

- (11) *Dia* becomes *nya*;

Nama dia, or *nama-nya*, his, her, its or their name.

Kira-nya (pray, prithee), changes an imperative to a request or prayer.

RELATIVE PRONOUN.

There is only one, *yang*. It means who, which, that, what. (6, 32, 45, 58)

DEMONSTRATIVE PRONOUNS.

(30) *Ini*, this, these; *itu*, that, those.

There are no articles, a, an, or the. The demonstratives substitute for them.

INTERROGATIVE PRONOUNS.

Siapa, who? (44, 30): *Siapa orang ini?*, who is this man?

Apa macham, what kind of? (31, 30): *Apa macham makanan ini?*, what kind of food is this?

Mana, where? (interrogative adverb): (15) *Di-mana raja itu?*, where is the king?

By adding the suffix *-kah*, we make any word interrogative: *Datang-kah orang itu?*, is that man coming?

ADJECTIVES.

The adjective normally follows the noun it qualifies: (44, 59) *Orang jahat*, the wicked man.

Orang yang jahat, the man who (is) wicked.

For reasons of emphasis it may stand elsewhere.

Comparison of adjectives:

lěbeh, *lagi*, more; *kurang*, less; *dari-pada*, than, from; *sama . . . děngan*, *sěpěrti*, equally . . . with, as . . . as; *sa-kali* (one time, i. e. uniquely), most, superlative degree, frequently used with the relative *yang*.

(59, 44, 15.)

Lěbeh jahat orang ini dari-pada raja.

More evil man this than (the) king.

Kurang jahat orang ini dari-pada raja.

Less evil man this than (the) king.

(30, 44, 58, 59)

Ini-lah orang yang jahat sa-kali.

This (is the) man who(is) evil most.

<i>Orang ini</i>	<i>sama</i>	<i>jahat</i>	<i>děngan</i>	<i>raja.</i>
Man this	equally	evil	with (the)	king.
<i>Orang ini</i>	<i>sama</i>	<i>jahat</i>	<i>sěpěrti</i>	<i>raja.</i>
Man this	as	evil	as (the)	king.

ADVERBS.

Pula, again; *pun*, also; *juga*, likewise, nevertheless.

Time: *sěkarang*, now; *tadi*, just now; *kělmarin*, yesterday; *ini hari*, today; *besok*, tomorrow.

Place: *sini*, here; *sana*, *situ*, there; *luar*, outside; *dalam*, inside; (20) *atas*, on, above; *bawah*, below, under.

PREPOSITIONS.

(7) *di*-, at, in; (20) *atas*, on, on top of; *di-atas*, upon; (26) *akan*, to; (47) *pada*, to; (28) *pada*, to (time); (57) *dari-pada*, from (persons); *dari*, from (places), *ka*-, to (motion).

CONJUNCTIONS.

(54) *mělainkan*, but (German *sondern*); *tětapi*, but (German *aber*); *dan*, and; *atau*, or; *kalau*, if; *sěbab*, because; *supaya*, in order that.

PUNCTUATION WORDS.

In Malay, when written in the Arabic characters, there are no punctuation marks. Certain words help with the work of punctuation, introducing new sentences and paragraphs, and breaking into sentences themselves. They need not be translated. Yet they are carried over bodily into Romanized editions of Malay works and do double duty alongside the modern punctuation system.

(36) *maka*, may be translated, if at all, by the word "and". *bahwa* introduces narration.

ada pun, introduces a parenthetical clause, or calls the reader back to the main story after a digression.

běrmula, takes up a new subject, paragraph, chapter.

dan lagi, continues the same subject.

These and others will become familiar in reading.

INTERJECTIONS.

There are many as in all languages.

- (3) *Ya, O!*, from the Arabic, used in prayer and in addressing holy persons.

NUMERALS.

(33) *Sa-* is a shortened form of the numeral *satu* meaning one.

1 — <i>satu</i> , or <i>sa-</i>	6 — <i>enam</i>
2 — <i>dua</i>	7 — <i>tujuh</i>
3 — <i>tiga</i>	8 — <i>délapan</i>
4 — <i>empat</i>	9 — <i>sembilan</i>
5 — <i>lima</i>	10 — <i>sa-puloh</i> (<i>satu puloh</i> , one ten)

Bélas is another word for *puloh*

11 — *sa-bélas* (*satu* added to *bélas*)

12 — *dua-bélas*, and so on up to 19, when *puloh* returns.

With *puloh* the first number is a multiplier.

20 — <i>dua-puloh</i>	100 — <i>sa-ratus</i> (<i>satu ratus</i>)
21 — <i>dua-puloh-satu</i>	101 — <i>sa-ratus satu</i>
32 — <i>tiga-puloh-dua</i>	200 — <i>dua-ratus</i>
43 — <i>empat-puloh-tiga</i>	1000 — <i>sa-ribu</i>
54 — <i>lima-puloh-empat</i>	2000 — <i>dua-ribu</i>

And so on to 99.

ORDINAL NUMBERS.

Ordinal numbers are formed by adding the prefix *kě* to the cardinal numbers, and putting the relative pronoun before the new word.

3 — <i>tiga</i>	3rd — <i>yang kětiga</i>
1st — <i>yang pěrtama</i> (irregular)	
2nd — <i>yang kědua</i>	
4th — <i>yang kěempat</i>	
5th — <i>yang kělima</i>	

Without the *yang*, groups are meant. Collectives: *kědua*, both; *kětiga*, all three; *kělima*, all five, etc.

FRACTIONS.

The prefix *pěr* added to the cardinal numbers gives the corresponding fractions. Note following the two exceptions, *těngah* and *suku*.

1/2 — *sa-těngah* (*těngah* means “a half”)

2/3 — *dua pěrtiga*

3/4 — *tiga pěřempat*, or commonly *tiga-suku* (*suku* means a “quarter” in Malaya, 1/2 guilder or 35 cents in Java; D. M. 1/4 — *sa pěrapat*; 3/4 — *tiga pěrapat*).

4/5 — *ěmpat pěrlima*

6/10 — *ěnam pěrpuloh*

VERBS.

The verb is not inflected. It cannot show number, person, or tense.

Verbs are either primitive or derivative. The primitives are verbs in their original signification (14, 16, 25, 52). The derivative verbs are made from primitive verbs, nouns and adjectives and adverbs by the application of particles (37, 43, 50, 55). Transitive verbs are formed from all other parts of speech by the addition of *-kan* and *-i*.

(37) *Ampun*, pardon (noun); *ampunkan*, pardon (verb)

(55) *Lěpas*, after (preposition), free, loose; *lěpaskan*, deliver (verb)

(43) *Ampun*, pardon (noun); *měng-ampun-i*, pardon (verb)
Jalan, walk; *jalankan*, cause to walk.

THE PREFIX *M*

The Malays use the prefix *M* (with a bridge letter where needed) with transitive verbs in the active voice. Exception is made when the verb is in the imperative mood, in which case the particle of intensity *lah* is added. In communication between Malays and foreigners the prefix *M* is largely left unemployed.

(50) *Měmbawa*, bring; *bawa-lah*, bring (imperative; 14, 16, 25, 37, 49, 55)

BRIDGE LETTERS WITH THE PREFIX M

None before l, m, n, r, w, y:

Lihat, see; *mělihat*, see

Makan. eat; *měmakan*, eat, etc.

M before b and p; but the p drops out:

Bunoh, kill; *měmbunoh*, kill

Padam, extinguish; *měmadam*, extinguish

N before t, d, j, ch; but t drops out:

Dapat, *měndapat*, find.

Churi, *měnchuri*, steal

Taroh, *měnaroh*, put.

Tidor, *měnidor*, sleep.

Ng before k, g, h, or any vowel; but k drops out:

(43) *Měngampuni*, from *ampun*, pardon

kěpit, *měngěpit*, to carry under the arm
gigüt, *měnggigüt*, to bite.

Ny before s; but s drops out:

Suroh, *měnyuroh*, order

Note: it is the *unvoiced* consonant that is dropped.

Exceptions are extremely rare.

THE PASSIVE VOICE.

The passive is formed by the prefix *di-*:

(25) *Běri*, give; *di-běri*, is given.

The preposition *oleh* governs the agent:

(31, 25, 44, 26, 15) *Makanan di-běri oleh orang akan*

Food was given by the man to the
raja.

king.

A passive may also be formed by using the verb *kěna* before another verb. It also translates the English word *get*.

Dia kẽna bunoh, he was (got) killed.

Dia kẽna hukum, he was (got) punished.

Dia kẽna sakit, he got sick.

Kěna standing alone means "hit the mark".

THE PREFIX *TĒR*

This prefix provides a past participle, but its various uses cannot be gathered up in a single term.

(9) *Hormat-lah*, honor (imperative)

Tĕrhormat-lah, may be called a past participle, yet in this case it is used in the imperative mood. Hence, honored be, or hallowed be.

Buka, open; *tĕrbuka*, opened.

THE PREFIX *BĒR*

We call the forms with *bĕr* present participles, but they do not direct the thought so much to the action itself as to the state of the persons who perform the actions.

A verb with this prefix can be expressed by our present participle:

(44) *Orang bĕrlari*, the man is running.

Lari, run; *bĕrlari*, running.

A noun with this prefix has in it the idea of possession:

(44, 45, 46) *Orang yang bĕrhutang pada kami*, the man who is having a debt toward us.

Hutang, debt; *bĕrhutang*, having a debt.

(44, 15) *Orang bĕrraja*, a man who has a king.

Verbs with this prefix may be reflexive or reciprocal.

AUXILIARIES.

(42) *Sudah*. This word indicates past time. To translate it into English, the context must tell whether to use was, did, has, or had.

The verb *habis*: *Sudah* expresses completed action in the past. *Habis* expresses more emphatically that the action is finished, utterly, entirely, once for all.

Orang sudah makan, the man has eaten.

Orang sudah habis makan, the man has completely finished eating.

Following is a list of auxiliaries with a list of English

words that will translate them. The context must guide in the choice.

Ada, is, are, was, were, possess.

Tiada, is not, will not

Akan, will, shall, would, should

(17) *Hëndak*, will, shall, would, should

Mau, will, shall, would, should

Boleh, can, could, may, might

Dapat, can, could, may, might

Patut, ought

Městi, must

Nanti, will, shall

Raja ini boleh bėri makanan pada kami, this king can

15 30 25 31 47 48

give food to us.

Orang ini mau datang pada bapa, this man will come to

44 30 14 47 4

father.

Kami patut mēngampuni hutang-hutang, we ought to for-

5 43 38

give debts.

The Verb *ADA*, "to be"

Ada, to be, existence in time or place.

It asserts presence or existence:

Ada orang di-atas bumi, there are people on the earth.

44 19 20

Ada may be used as the equivalent of "to be" when adverbs of place follow or are understood. It is never the equivalent of "to be" followed by adjectives. The Malays join their adjectives to nouns without a copula.

It expresses progressive action when joined to another verb:

Orang ada makan, people are eating.

44 31

It asserts possession in the form that we call the Dative of Possession:

Pada orang ada makanan, the man has food
 47 44 31. (to the man is food).

Colloquially this *pada* is usually suppressed, and the sentence becomes: *Orang ada makanan*, the man has food.

Ada in conversation expresses our verb *to have*, (to possess). Thus the object of a preposition becomes the subject of the sentence, and the real subject becomes the object. In good writing the verb *ada* is seldom the equivalent of the English *to have*; the *pada* is not omitted.

Ada may serve as a "Punctuation Word", introducing sentences without being necessary to their meaning. It may then be ignored in translation, or translated by some English introductory word such as "now", "there", etc.

Ada-lah nama raja itu, Raja Da'ud, now the name of that king (was) Raja Da'ud.

Ada pun pada masa itu datang-lah raja itu dari Hindi,
 now at that time came the king from India.

Ada may be used to round off and close a sentence with emphasis, expressing some sentiment like, "And this is the truth", or, "And this is a fact". In this case the syllable *nya* is added, *ada-nya*.

Sĕgala pĕrbuatan-nya baik ada-nya.
 All works his good (and that is a fact).

NEGATIVE AUXILIARIES.

Tidak: Kami tidak boleh makan, we cannot eat.

Bukan: Orang ini bukan raja kami, this man is *not* our king.

Bĕlum: Not yet. Very frequently used. In a multitude of cases where we give a direct negative answer, the Malays say "not yet". Is he married? English answer: No. Malay answer, *Bĕlum*, not yet.

WORDS AND PHRASES.

Good morning, good evening, good-by, farewell, (a general greeting), *tabek*.

How do you do, how are you, how goes it, etc., *apa khabar?* (literally, what's the news?)

I am well, *khabar baik* (literally, the news is good).

What time is it?, *pukul berapa?* (literally, how many strikes?).

It is two o'clock, *pukul dua* (literally, it has struck twice).

half past two o'clock, *pukul dua sa-tengah* (lit., strikes two and a half; D. M., *sa-tengah tiga*).

Noon (midday), *tengah hari*.

Midnight, *tengah malam*.

It is five minutes to six, *kurang lima minit pukul anam*.

It is a quarter to five, *kurang suku pukul lima* (D. M., *pukul lima kurang sa-pěrapat*).

Next year, *tahun datang*.

Last year, *tahun lalu*.

Next month, *bulan datang*.

Last month, *bulan lalu*.

Every day, daily, *sa-hari-hari*.

The whole day, all day long, *sa-panjang hari*.

Please (try), *choba; minta* (more polite).

Tell me, *bilang pada sahaya* (D. M., *kasih* (or *běri*) *tahu pada saya*).

Bring, *bawa*.

Show, *tunjok*.

Thank you, *těrima kaseh*.

Pardon me, *sahaya minta ampun* (D. M., *maap; maaf*).

I am glad, *sahaya běrsuka*.

I have to, I must, *sahaya městi*.

Where are you going?, *pěrgi mana?* (D. M., *ka-mana?; pěrgi ka-mana?*).

Which way?, *jalan mana?*

To the right, *ka-sěbělah kanan*.

On the right, *di-sěbělah kanan*.

To the left, *ka-sěbělah kiri*.

Straight ahead, *maju*; *těrus*.

Here, *di-sini*.

There, *di-situ*.

In that way (manner), *bagitu*.

In this way (manner), *bagini*.

Come with me, *datang-lah sama sahaya* (D. M., *ikut saya; turut sama saya*).

What do you wish?, *apa tuan mau?*

What is that?, *apa itu?*

What is the matter with you?, *apa salah?*

What is the price?, *běrapa harga?*

Do you speak Malay?, *tuan tahu chakap Mělayu?*

A little, *sědikit*.

Speak slowly, *chakap pėlan-pėlan* (D. M., *minta bichara pėlahan-pėlahan*).

Do you understand?, *měngěrti-kah?* (D. M., *apa měngěrti?*).

I do not understand, *sahaya tidak měngěrti*.

Do you know?, *tahu-kah?* (D. M., *apa tahu?*).

I cannot, *sahaya tidak boleh* (D. M., *saya tida bisa*).

I can, *sahaya boleh* (D. M., *saya bisa*).

What is the name of that in Malay?, *apa nama itu děngan bahasa Mělayu?*

I am an American, *sahaya orang Merican*.

I am thirsty, *sahaya dahaga, sahaya haus*.

I am hungry, *sahaya lapar*.

How old are you?, *běrapa 'umur?*

I am twenty years old, *'umur sahaya dua-puloh tahun*.

How long have you lived here?, *běrapa lama-kah tuan dudok di-sini?*

Come here, *mari sini*.

Come in, *masuk*.

Look!, *tengok!*

Look out!, Be careful!, *jaga baik-baik!* (D. M., *awas!; ati-ati!*).

Don't, *jangan*.

Don't forget, *jangan lupa*.

Don't run, *jangan lari*.

Go, *pěrgi*.

Go away, *pěrgi sana* (D. M., *pěrgi-lah*).

Go quickly, *pěrgi lėkas*.

That is correct, *itu bėtul*.

There is no more, *tiada lagi*.

Where is there a restaurant?, *di-mana rumah makan?*

I do not know, *sahaya kurang pėreksa* (D. M., *tidak tahu; bėlum tahu; kurang tėrang*).

Call on me when you pass, *singguh sambil lalu*.

They are all alike, *sa-rupa sahaja sėmua-nya*.

What does it contain?, *apa isi-nya?*

Have you a room vacant?, *ada bilek kosong?* (D. M., *apa ada kamar kosong?*).

Where does this road lead?, *jalan ini sampai ka-mana?*

I feel ill, *sahaya sakit* (D. M., *saya rasa sakit*).

What are you looking for?, *apa tuan chari?*

I think it is going to rain, *sahaya fikir mau hujan*.

Close the windows and the door, *tutup jėndela dan pintu*.

I do not want to get wet, *sahaya ta'mau kėna hujan*.

You ought to, *patut ěngkau* (D. M., *patut kamu*).

What is your occupation?, *pėkėrjaan tuan?* (D. M., *pėkėrjaan tuan apa?; tuan pėkėrjaannya apa?*).

He has never seen a tiger, *dia bėlum pėrnah mėlihat harimau*.

I shall remove to Singapore next month, *sahaya mau bėrpindah ka-Singapura lain bulan*.

He is writing (continuous), *dia ada tulis, dia tėngah tulis*.

JAPANESE

■ OFFICIAL AND PRIMARY

▨ SECONDARY AND COLONIAL

⋯⋯⋯ EXTREME LIMIT OF JAPANESE CONQUEST

CHAPTER XIV

JAPANESE

BY RALPH WALKER SCOTT, PH. D.

*Professor of Romance Languages at Trinity College, Hartford, Conn.
Former Professor of Occidental Languages at Rikkyo University,
Tokyo, Japan.*

SPEAKERS AND LOCATION.

(All population figures are approximate)

Asia and Oceania — The population of the Japanese Empire prior to the seizure of Manchukuo was estimated at about 100,000,000, distributed as follows: Japan proper, 72,000,000; Korea, 25,000,000; Taiwan (Formosa), 5,500,000; Karafuto (the southern part of the island of Sakhalin), 500,000. It is fairly safe to assume that practically all of these populations may be reached with Japanese. To these may be added the mandated Bismarck, Caroline, Marianas, Gilbert and Marshall Islands, with a total population of slightly over 500,000.

The Manchukuo conquest brought about 43,000,000 people, mostly of Chinese stock and speech, under Japanese domination. The areas of China overrun and dominated by Japan (including the important cities of Peiping, Tientsin, Nanking, Hankow, Shanghai, Hangchow, Wenchow, Foochow, Amoy, Swatow, and Canton) may be estimated to have well over 100,000,000 inhabitants. Japanese was to some extent current in all this territory.

With Japan's entry into the war, Nippon's temporary territorial acquisitions included Thailand (16,000,000); French Indo-China (24,500,000); British Malaya (5,500,000);

Burma (16,000,000); Hong Kong (1,500,000); the Netherlands East Indies (60,000,000); the Philippines (16,000,000); British possessions on the islands of Borneo and New Guinea (about 2,000,000); Portuguese Timor (500,000); and various South Pacific islands (Guam, New Hebrides, northern Solomons, etc. — about 250,000). To what extent the Japanese language has penetrated these now liberated populations totaling nearly 140,000,000 is a matter of conjecture.

Japanese speakers are fairly numerous in Hawaii, while small Japanese communities exist in various parts of North and South America. Exact figures are not available, but it is unlikely that the total number of Japanese speakers outside of Japanese-held territory exceeds 2,000,000.

THE WRITTEN LANGUAGE

The Japanese language proper has no relation whatever to Chinese. They are as far apart as English and Japanese. However, many Chinese words have entered into the Japanese, just as Norman French words came into English.

Chinese literature was introduced into Japan about 300 A.D. and the Japanese adopted the Chinese system of writing. In Chinese, the written characters are symbols of ideas, or of things. In other words, the Chinese and Japanese use ideograms, or picture-words, to express ideas or concepts. There are many thousands of these ideograms, and in order to read a newspaper or non-technical book, the student must learn three or four thousand ideograms, at least. To read literature, he will need six or seven thousand ideograms. Now Japanese is an inflected language and phonetic symbols are necessary to indicate the inflections. Hence at a very early date the Japanese began to use some ideograms phonetically. These few phonetic characters are simplified forms of the ideograms from which they evolved and are known as *kana*. These *kana* characters, although phonetic, are not alphabetic, but syllabic. That is, each *kana* character represents a syllable, such as *ru*, *ju*, *mu*, *fu*, etc. There are two sets of these *kana*

characters, one known as the *kata-kana* and the other as the *hira-gana*. Each set has 48 syllabic characters in common use. The *kata-kana* is written in a square style and is now used chiefly in formal documents, in transliterating foreign names and in writing telegrams. The *hira-gana* syllabary is written cursorily and is more complicated than the *kata-kana*, but is nevertheless the syllabary most commonly used by the Japanese.

The *hira-gana* syllabary is used in two ways. First, it serves to express the inflections, that is, the changing portions of Japanese parts of speech, such as verb endings. Again, in popular publications, such as newspapers and magazines, it is printed alongside of and to the right of the Chinese ideograms, in order to aid the less educated reader in making out the pronunciation of the Chinese ideogram. An example may make this clearer.

As we have just said, the Chinese ideogram is the symbol of an idea, a word picture. For example, the character 川 means river. It was originally the picture of a river, the currents of water being pictured thus . Now the ideogram is read as "river" in English and as *kawa* in Japanese. There is no way of indicating the genitive case, "of the river" (*kawa no* in Jap.) or the accusative case (*kawa wo* in Jap.). Hence we use the *hira-gana* syllabic character の to denote "of" (*no* in Jap.) and "を" to denote *wo* the Japanese sign of the accusative case or direct object. Thus *kawa no* 川 の ; *kawa wo* 川 を . In modern, written Japanese, these *hira-gana* characters are found interspersed among the Chinese ideograms in order to indicate particles, modifiers and syntactical terminations.

As we have indicated above, the *hira-gana* may also be printed to the immediate right of a more difficult Chinese ideogram in order to indicate its correct pronunciation. Thus, we may take this same ideogram 川 , although it is not a difficult one, and write the *hira-gana* to the right of it, 川 か : か , *ka* and わ *wa*, both spelling out the word *kawa*. river.

In writing Japanese, the ideograms and accompanying *kana* symbols begin at the upper right-hand corner and run down the page. The next vertical line of writing begins to the left of the first line and runs down, and so on. Japanese is thus read from top to bottom, and from right to left.

Japanese can of course be written in the Latin alphabet. The Japanese themselves have been interested in giving up the difficult and cumbersome Chinese characters and in adopting the Latin alphabet of the west. A society known as the *Rōmajikwai* (Roman Letter Society) was organized in 1885 to encourage the use of our alphabet in the place of the Chinese characters. However, the influence of custom and history have so far proved too strong, and Japan is still far from accepting our alphabet. The military defeat of Japan may well hasten the movement, however.

SAMPLE OF PRINTED JAPANESE

(in Kana-Majiri characters: mixed Chinese characters and Hiragana)

三・三

傳 本 八 三

三・三

言ふ「いかで斯る事どものあり得べき」^{一〇} イエス答へて言ひ給ふ「なんぢはイスラエルエルの師にして猶かかかる事どもを知らぬか。^{一一} 誠にまことに汝に告ぐ、我ら知ることとを語り、また見しことを證す、然るに汝なんぢその證を受けず。^{一二} われ地のことを言ふに汝なんぢ信ぜずば、天のてんことを言はんには争て信せんや。^{一三} 天より降りし者、即ち人の子ひとこの他には、天てんに昇りしものなし。^{一四} モーセ荒野にて蛇へびを擧げしごとく、人の子ひとこもまた必ず擧げらるべし。^{一五} すべて信ずる者の彼かれによりて永遠の生命を得ん爲なり」

Mu	む	ム	N	ん	ン
U, wu	う	ウ			

This arrangement of the Japanese syllabaries is the work of a ninth-century Buddhist priest, and spells out a complete poem on the frailty of human affairs.

In the Hiragana syllabary, no distinction in common usage is made between syllables beginning with *k* and those beginning with *g*, so that the symbols given above for *ka*, *ke*, *ki*, *ko*, *ku*

may represent also the sounds *ga, ge, gi, go, gu*; the same lack of distinction appears between the *s* and the *z*-sounds, the *t* and the *d*-sounds, the *h, b* and *p*-sounds, and between the syllables *chi* and *ji, shi* and *zhi, tsu* and *dzu, fu, bu* and *pu*.

The Katakana syllabary distinguishes between unvoiced and voiced consonants by placing a double stroke, somewhat like our " ", above and to the right of the character if this is meant to designate a voiced consonant, so that the symbols for *ka, ke, ki, ko, ku*, when accompanied by this double stroke, represent *ga, ge, gi, go, gu*, etc. Furthermore, in the Katakana, the symbols for *ha, he, hi, ho, fu*, if accompanied by a small circle above and to the right, stand for *pa, pe, pi, po, pu*, respectively. With a double stroke instead of a circle, the *h* and *f*-symbols represent *b*-sounds.

PRONUNCIATION.

Vowel Sounds.

a = cot;

ā = far;

e = met;

ē (ei) = eight;

i = big (short i has a feeble sound, and tends to disappear, most frequently *within* the word, seldom at the *end* of the word; *Yamashita* is pronounced *Yamash'ta*);

ī (ii) = machine;

o = obey;

ō = holy;

u = push (short u has a feeble sound, and tends to disappear, both within and at the end of a word (*kusa*, "grass", pron. *k'sa*; *desu*, pron. *des'*; it does not disappear, however, in *-ru* verb-endings);

ū = rude.

Distinguish carefully between short and long vowels; many words are alike, save for long or short vowels (compare: *tori*, "bird"; *tōri*, "street"; *toki*, "time"; *tōki*, "registration"; *yuki*, "snow"; *yūki*, "courage"). The most frequently recurring long vowels are *ō* and *ū*. Pronounce the former like holy in an

exclamation (Holy Jiminy!); the latter like *food*, likewise in an exclamation (We want *food*!).

If two vowels appear together, pronounce them separately (*ataeru*, "to give", pron. *a-ta-e-ru*).

Consonant Sounds.

b = *bed*;

d = *debt*;

f = *food*, produced, however, by bringing the lower lip against the upper lip, not against the upper teeth, as in English;

g = *gave*; often *sing*

h = *he*; this sound in the Tōkyō dialect approaches *she* (*hito*, "human being", pron. *shito* or *sh'to*);

j = *joy*;

k = *keep*;

m = *man*;

n = *name*; before g, = *finger*; before k, = *banker*;

p = *pen*;

r = British *very*; the trill is so slight that the listener is often in doubt whether the sound is r or l;

s = *see*;

t = *tale*;

w = *wave*;

y = *yard*;

z = *zeal*;

ch = *church*;

sh = *shore*;

ts = *its*;

dz = *adze*.

Double consonants (kk, nn, pp, mm, ss, ssh, tch, tt, tts) are fully pronounced.

In compound words, the *first* consonant of the *second* half of the compound often undergoes a change, as follows:

h, f become b (*sakura*, "cherry", plus "*hana*, "blossom", to *sakurabana*, "cherr blossom"; *te*, "hand", plus *fukuro*, "bag", to *tebukuro*, "glove");

k becomes g (*ko*, “small”, plus *katana*, “sword”, to *kogatana*, “pen-knife”);
 s, ts become z (*kan*, “can”, plus *tsume* “packed”, to *kanzume*, “canned goods”);
 sh, ch become j (*chika-chika*, “soon-soon”, to *chikajika*);
 t becomes d (*Benten* plus *tōri*, “street”, to *Bentendōri*,
Benten Street”).

Accent.

The strong tonic accent of English is not found in Japanese, all the syllables of a word being stressed about equally, thus not “Yokoháma”, as in English, but *Yókóhámá*, every syllable having equal stress.

Long vowels and vowels before double consonants tend to be stressed, thus; (*jochú* “maidservant” (the *ū* being long is emphasized); *jódan* “joke” (the *ō* being long is slightly stressed); *máppira* “earnestly” (the syllable *má* is stressed as it precedes a double consonant).

When the vowels *i* or *u*, which are by nature weak, drop out entirely from a word, in pronunciation, which very frequently happens, the preceding or following vowel is stressed, in compensation for the lost vowel; thus, General Yamashita’s name is pronounced *Yamáshita*, (not *Yamashíta*) the preceding *a* being stressed in compensation for the lost *i*. *Taksán* “much” for *takusan*, the *san* being stressed in compensation for lost *u*.

Within the sentence, case particles (postpositions) are especially stressed: *Watakushi wá hon wó motte imasu*, I have a book.

GRAMMATICAL SURVEY

1. — Nouns.

a) — Number.

The Japanese mind is not so much interested in number or quantity as ours; consequently the Japanese seldom make a distinction between singular and plural. *Hana* means “flower”

or "flowers". If a distinction must be made, it is done, especially in the case of human beings, by adding *domo*, *tachi* or *gata* to the word, by repeating the noun, or by adding an auxiliary numeral to the noun, thus: *ko*, child; *kodomo*, children; *watakushi*, I; *watakushidomo*, we; *danna*, master; *dannagata*, masters; *hito*, man, *hitobito*, people, *hito sannin*, three persons.

b) — Gender.

There is no grammatical gender in Japanese, such as is found in French and German. The gender of Japanese words is determined by sex, as in English. Sex can be distinguished in three ways: by a sex prefix; by prefixing another word indicating gender; by using a quite different word, as in English.

The masculine prefix is *o-* (sometimes *on-*) thus:

<i>ushi</i> , "cow"	<i>o-ushi</i> , "bull"
<i>inu</i> , "dog"	<i>o-inu</i> , "male dog"
<i>tori</i> , "bird"	<i>ondori</i> , "cock"

The female prefix is *me-* (sometimes *men-*) thus:

<i>tori</i> , "bird"	<i>mendori</i> , "hen"
<i>inu</i> , "dog"	<i>me-inu</i> , "bitch"

One may prefix the word *otoko no*, "male" (lit., man-of), or *onna no*, "female" (lit. woman-of): *ko*, "child"; *otoko no ko*, "boy"; *onna no ko*, "girl".

Generally a different word is used as in English; thus:

<i>otoko</i> , "man"	<i>onna</i> , "woman"
<i>musuko</i> , "son"	<i>musume</i> , "daughter"
<i>chichi</i> , "father"	<i>haha</i> , "mother"
<i>oji</i> , "uncle"	<i>oba</i> , "aunt"
<i>shinshi</i> , "gentleman"	<i>shukujo</i> , "lady"
<i>otto</i> , "husband"	<i>tsuma</i> , "wife"

c) — Articles.

The Japanese language has neither a definite nor an indefinite article. *Hon* means "the book", "a book", "book", "the books", "books".

d) — Case.

Japanese may be said to have five “cases”.¹ These are not indicated by real declensional endings, but by particles placed after the noun. They are as follows:

absolute: *niwa wa*, “the garden”, “gardens”

nominative: *niwa ga*, “garden”, “gardens” (as subject of verb)

genitive: *niwa no*, “of garden”, “of gardens”

dative: *niwa ni*, “to”, “for garden”, “gardens”

accusative: *niwa o*, (often written *wo*, but always pronounced *o*), “garden”, “gardens” (object of a verb)

The case particles call for some comment. *Wa* and *ga* both may be used after the subject of a verb. *Wa* is frequently used when the verb is negative, *ga* when it is affirmative: *hon ga arimasu*, there are books, (literally, books there-are); *hon wa arimasen*, there are no books (literally, books there-are-not).

Wa emphasizes the predicate and *ga* emphasizes the subject. *Doko e ikimasu ka?*, where are you going? (*doko* = “where”; *e* = “to”; *ikimasu* = “go”; *ka* is an interrogative particle, the sign of a question; note that “you” is left to the hearer’s understanding). *Watakushi wa Yokohama e iku*, I am going to Yokohama, not to some other city. That is, the particle *wa* after *watakushi* emphasizes the predicate “to Yokohama”. *Dare ga ikimasu ka?*, who is going? (*dare* = “who”). *Watakushi ga iku*, I am going. That is, I, not some one else, am going.

Wa may also be used when the Japanese wish to isolate the subject and then ask a question about it. *Ano hito wa, dare desu ka?* As for that man, who is he? (cf. French, *cet homme-là, qui est-il?*).

No is the usual particle used to express possession, and

1. The word “case” is not scientifically used, since Japanese could be said to have as many “cases” as there are separate postpositions, and these are numerous; it is employed merely as a practical makeshift, designed to clarify unfamiliar Japanese syntax through familiar Indo-European terminology.

as such is often attached to a proper noun or a pronoun: *Brown San no*, Mr. Brown's (*San*, "Mr."); *dannasan no*, "of the master", "master's"; *watakushi no*, "my", "mine" (literally, "of me")

Ni is the case particle used to indicate the indirect object: *Hon wo Suzuki san ni yarimasu*, I give the book to Mr. Suzuki. (*hon* = "book"; *yarimasu* = "give")

The dative case may denote possession. *Watakushi ni oji ga arimasu*, I have an uncle (literally, to me uncle there-is; cf. French, *ce livre est à moi*).

With verbs of existence it denotes the locative. *Tōkyō ni takusan arimasu*, there are many at Tokyo. *Tsukue no ue ni hon ga takusan arimasu*, there are many books on the top of the table (*ue* = "top"; *tsukue* = "table"; *hon* = "books"; *takusan* = "many")

Some Japanese verbs govern the indirect object, while these same verbs in English would call for some other construction, thus — *Itsu Tanaka San ni aimashita ka?*, when did you meet Mr. Tanaka? (*itsu* = "when"; *aimashita* = past of verb *au*). *Ii* or *ī* (long *i*) *o tenki ni narimasu*, the weather is turning fine (*ii* = "fine"; *o* = "honorable"; *tenki* = "weather"; *narimasu* = "is becoming").

2. — Personal Pronouns.

There are no real personal pronouns in Japanese, but certain expressions may be used as pronouns. Even these pronominal expressions are but little used, since Japanese is an impersonal language. The meaning is made clear by the use of humble or honorific words, or by the context. Expressions which are used as personal pronouns are as follows:

Watakushi or *watashi* = I

Anata = you (singular)

Ano o kata (that honorable person); *ano hito* (that person); *ano onna* (that woman); *ano otoko* (that man) may all be used for "he" or "she".

Are = it, of a thing far off.

Watakushi-domo or *watashi-domo* = we

Anata-gata = you (plural)

Ano hito-tachi (of persons); *are* (of things) = they.

3. — *Postpositions.*

Japanese has no prepositions, but instead employs postpositions, that is, it uses particles placed AFTER the noun or pronoun. In speaking, these postpositions are commonly stressed or accentuated. Some common postpositions are —

De — denotes means, instrument, measure, value, time.

yūbin de, by post (literally, mail by).

takushi de, by taxi

pen de kaku, to write with a pen.

dāsu de kau, to buy by the dozen (*dāsu* - dozen)

go sen de katta, I bought it for five cents: (*go* = “five”; *sen* = “cents”; *katta* = past tense of *kau*, to buy)

ni fun de hachi ji, two minutes to eight (*ni* = “two”; *fun* = “minute”; *hachi* = “eight”, *ji* = “hour” or “o’clock”; hence, literally, two minute by eight o’clock).

Kara — denotes “from”, “after”, and, with the gerund of the verb, “since”.

kuni kara, from home

sore kara, after that

kore kara, after this, henceforth

Yokohama kara, from Yokohama

Tōkyō e kite kara, since coming to Tokyo (*kite* = “coming”, gerund of verb *kuru*, to come)

E — denotes “to”, “towards”, “into”.

hoteru e ikimasu, I am going to the hotel.

doko e ikimasu ka, where are you going? (literally “where to”, “whither”)

Made — denotes “up to”, “as far as”.

Yokohama kara Tōkyō made, from Yokohama to Tokyo.

doyōbi made, till Saturday

suteishon made, as far as the station

To — denotes, among other things, “with”, “in company with”,
ano hito to sampo ni ikimasu, I am going for a walk with

that person (*sampo* = "walk"; *ano* = "that"; *to* = "with", "in the company of"; *ni* = "for" or "on")

Ni — denotes "in", "into", "for" of purpose or end.

uchi ni, in the house, at home

sampo ni, for a walk

Chicago ni, in or at Chicago. Cf. *Chicago e*, to or into Chicago.

Eigo ni yakusuru, to translate into English.

Kono mono wa nani ni tsukaimasu ka?, what do you use this thing for? (Literally, as for this thing, what for do you use it? *Mono* = thing; *nani* = what; *ni* = for; *tsukaimasu* = use)

4. — *Verbs.*²

The Japanese verb is completely "impersonal". It does not indicate person or number, but only tense and mood; it does, however, include the notion of familiarity, politeness, or extreme (honorific) politeness. A so-called present indicative, such as *kakimasu*, may be translated by "I, you, he, she, we, they write or writes" (the real meaning is "there is an action of writing going on"). It is possible to "personalize" it by using a subject pronoun (*watakushi wa kakimasu*, lit. "so far as I am concerned, there is a writing"); but subject pronouns are seldom employed, it being left to the hearer or reader to figure out who does the writing from the trend of the conversation or the context. On the other hand, the use of the form *kakimasu* implies a certain amount of politeness toward the hearer; the form *kaku* has precisely the same meaning as *kakimasu*, but implies familiarity. The honorific form is seldom used (at least by foreigners), and often consists of an entirely different verb (*taberu*, "to eat", familiar; *tabemasu*, "to eat", polite; *meshiagaru*, "to eat", honorific). The familiar form would

2. The Japanese verb system is exceedingly intricate, and an extensive treatment is outside the scope of this chapter. Only those verbal forms are presented which are essential to an elementary and practical knowledge of the language.

seldom be used by a foreigner, save for the fact that it normally appears in dependent clauses, even though the verb of the main clause is polite. There is no verb form in Japanese that really corresponds to our infinitive, although for convenience's sake we shall occasionally translate the familiar present as an English infinitive.

1. — Present Tense (familiar form).

The familiar present form ends in *-u* or *-ru*. Verbs ending in *-u* have stems ending in consonants: *yob-u*, calls (stem *yob*); *ka(f)-u*³, buys; *kak-u*, writes; *nar-u*, becomes; *hanas-u*, speaks; *mats-u*⁴, waits. Most, but not all, present tense forms ending in *-eru* and *-iru* have vowel stems, the *e* or the *i* of the endings *-eru*, *-iru*, forming the vowel-stem: *mi-ru*, sees; *de-ru*, goes out; *shirase-ru*, informs. Since these forms indicate tense only, not person, they may refer to any person: *hanasu*, I, you, he, she, we, they, speaks or speak.

This familiar form is used only between members of a family or between close friends. It is given here because this familiar form of the present is the one that will always be used in a subordinate clause, even in polite conversation.

2. — Present Indicative (polite, but not honorific).

This is formed by adding *-imasu* to the stem: *kak-imasu*, I, you, we they, write; he, she writes (in polite, but not honorific speech). If subject pronouns are really needed, they may be used, with *wa* or *ga*: *watakushi wa kakimasu*, I write; *anata wa kakimasu*, you (sg.) write; *ano hito wa kakimasu*, he writes; *watakushi-domo wa kakimasu*, we write; *anata-gata wa kakimasu*, you (pl.) write; *ano hito-tachi wa kakimasu*, they write. It must again be stressed, however, that this is not the customary practice in Japanese. If the verb-stem ends in a vowel, only *-masu* is added: *mi-masu*, I, you, etc. see. If the

3. The final *-f* of verb stems is no longer pronounced, and is generally omitted in writing.

4. The real stem is *mat-*; *t* before *u* is regularly changed to *ts*.

stem of the verb ends in *t*-, this is changed to *ch*- before the *i* of *-imasu*: *matsu*, to wait (stem *mat*-), present *mach-imasu*. If the stem of the verb ends in *s*-, this is changed to *sh*- before the *i* of *-imasu*: *hanasu*, to speak (stem *hanas*-), present *hanash-imasu*.⁵

3. — Past Indicative (polite, but not honorific).

This is formed by adding *-imashita* (*-mashita* if the stem ends in a vowel): *kaku*, to write; past *kak-imashita*; *ka(f)u*, to buy; past *ka-imashita*; *yob-imashita*, called; *nar-imashita*, became; *hanash-imashita*, spoke; *mach-imashita*, waited; *mi-mashita*, saw; *de-mashita*, went out.

4. — Future.

There is no true future tense in Japanese, the present being used with a future meaning as well: *kakimasu*, I, you, etc. write or will write.

A “future of probability” is formed by adding *deshō* to the familiar present: *kaku deshō*, I, you, etc. will probably write; *ashita hon wo kau deshō*, tomorrow he will probably buy the book (books).

Another future of probability may be formed by adding *-ō* (*-yō* if the stem ends in a vowel) to the stem: *kak-ō*, will probably write; *ka-ō*, will probably buy; *mi-yō*, will probably see.

5. — Conditional.

A “present conditional” is formed by adding *-imasureba* (*-measureba* if the stem ends in a vowel), or *-eba* (*-reba* if the stem ends in a vowel). It is used with the meaning of “if” or “when” in the dependent clause, but never in the main clause: *watakushi ga kakimasureba* (*akeba*), if (when) I write (shall write); *ano hito-tachi ga hanashimasureba* (*hanaseba*), if

5. These changes of *t* to *ch* and *s* to *sh* before *i* are general, and apply to all tenses and, indeed, to all words. The same is true of the change of *t* to *ts* before *u*. See *Katakana*, p. 530-531.

(when) they speak (will speak). The main clause in these cases takes whatever tense is called for by the meaning: *Tōkyō e ikimasureba, hoteru ni tomaru*, if (when) I go to Tokyo, I shall put up at a hotel (*tomaru* is the familiar present-future, the conversation here being between intimate friends; note the complete lack of subject pronouns; the sentence could mean not only “I”, but also “you”, “he”, “she”, “we”, “they”); *Tōkyō e ikimasureba (ikeba), o miyage wo motte kitte kudasai*, when you go to Tokyo, please bring me a present (*motte kitte kudasai* being the polite imperative of *motte kuru*, “to bring”, the subject here is obviously “you”).

A “past conditional” is formed by adding *-imashitara* (*-mashitara* if the verb-stem ends in a vowel), and conveys the meaning of “if” or “when” with reference to the past: *anata ga kaimashitara*, when you bought; *anata ga machimashitara*, when (if) you waited. The past indicative usually appears in the main clause.

A more specific “if” may be formed by using the present or past with *moshi* before the verb and *nara* after it: *moshi watakushi ga kakimasu nara*, if I write, were I to write; *moshi anata ga ikimashita nara*, if you went, if you had gone.

6. — Participle.

A familiar present participle is formed by adding *-ite* (*-te* if the verb-stem ends in a vowel): *hanasu*, to speak; *hanash-ite*, speaking; *miru*, to see; *mi-te*, seeing. This familiar participle is of importance in *polite* conversation because it has two important *polite* uses: 1. with the present and past of various verbs meaning “to be”, to form progressive present and past tenses: *hanashite orimasu (oru, to be)*, am, is, are speaking; *mite orimashita*, was, were seeing; 2. with *kudasai*, “please”, to form a *polite* imperative: *hanashite kudasai*, please speak (lit. speaking, please).⁶

6. The following contractions take place in the formation of the participle:

If the verb-stem ends in (*f*)-, *r*- or *t*-, *-tte* replaces *-ite*, *-rite*, *-chite*:

7. — Imperative.

The ordinary way to express a polite command is by using the *familiar* participle with *kudasai*, “please”, as described above: *yonde kudasai*, please call (lit. calling, please); *katte kudasai*, please buy (buying, please).

“Let us” is expressed by adding *-imashō* (*-mashō* if the verb-stem ends in a vowel): *yob-imashō*, let us call; *ka-imashō*, let us buy; *kak-imashō*, let us write. With the addition of the interrogative particle *ka*, this form serves also as a first person future interrogative, singular or plural: *yobimashō ka?*, shall I (we) call?; *ikimashō ka?*, shall I (we) go?

8. — Conjugation with *suru*, “to do”.

Chinese words, which have entered the Japanese language from the fifth century on, are generally conjugated with the irregular verb *suru*, to do (make), which has the following forms:

Present, *shimasu*; Past, *shimashita*; Pres. Cond., *shimasureba*; Past Cond., *shimashitara*; Participle, *shite*.

Kenkyū suru, to study (lit. study to do); *jōdan suru*, to jest (lit. joke to make); *shūzen suru*, to repair (lit. repair to make); *sōji suru*, to clean: Pres. *sōji shimasu*, I, you, etc. clean; Past *sōji shimashita*, I, you, etc. cleaned; Pres. Cond. *sōji shimasureba*, if (when) I, you, etc. clean; Participle, *sōji shite*, cleaning; Imperative, *sōji shite kudasai*, please clean.

9. — Familiar Forms.

The polite forms so far described are the ones most commonly used. When used with reference to the first person, they

ka(f)u, to buy; *katte* (for *kaite*), buying; *naru*, to become, *natte* (for *narite*), becoming; *matsu*, to wait; *matte* (for *machite*), waiting. If the verb-stem ends in *b-*, *-nde* replaces *-bite*: *yobu*, to call; *yonde* (for *yobite*), calling. If the verb-stem ends in *k-*, *-ite* replaces *-kite*: *kaku*, to write; *kaite* (for *kakite*), writing.

do not cast honor upon the speaker, but upon the person spoken to.

The familiar form of the verb is used within the family circle or among intimate friends and children, or to inferiors. Its present and past tenses, however, are also used in *polite* conversation in dependent clauses.

The familiar present has been described (verb-stem plus *-u* or *-ru*), while the familiar past is obtained by changing the *-e* of the participle to *-a*:

	Familiar Present	Familiar Past
<i>yobu</i> , to call	<i>yobu</i> , call, calls	<i>yonda</i> , called
<i>ka(f)u</i> , to buy	<i>kau</i> , buy, buys	<i>katta</i> , bought
<i>kaku</i> , to write	<i>kaku</i> , write, writes	<i>kaita</i> , wrote
<i>naru</i> , to become	<i>naru</i> , become, becomes	<i>natta</i> , became
<i>hanasu</i> , to speak	<i>hanasu</i> , speak, speaks	<i>hanashita</i> , spoke
<i>matsu</i> , to wait	<i>matsu</i> , wait, waits	<i>matta</i> , waited
<i>miru</i> , to see	<i>miru</i> , see, sees	<i>mita</i> , saw
<i>deru</i> , to go out	<i>deru</i> , go out. goes out	<i>deta</i> , went out

Outside of their use in familiar conversation, these two familiar tenses are used in polite speech to replace relative clauses. Japanese has no relative pronoun, and no true relative clause. The present or past of the familiar is used instead like an adjective before the antecedent: *kinō mita hito*, the man I saw yesterday (lit. yesterday saw man; compare Eng. "the shipwrecked man" for "the man who was shipwrecked"); *kaita tegami*, the letter I (you, he, etc.) wrote (lit. wrote letter).⁷

Familiar forms are used whenever the verb is subordinate to the principal verb, especially in temporal or causal clauses: *ii o tenki ni natta kara, ikimashō*, since the weather has turned fine, let us go (*ii*, fine; *o*, honorable; *tenki*, weather; *ni natta*, familiar past of *ni naru*, to become; *kara*, since (conjunction); *ikimashō*, let us go, from *iku*, to go. See Imperative, p. 542);

7. This use of the past familiar could perhaps be compared to that of a past participle used as an adjective, and the expressions above be translated as "the yesterday seen man", "the written letter".

hon wo katta kara, since I (you, etc.) bought the book; *chichi ga matte imasu kara*, since my father is waiting; *sore ga okotta toki*, when that happened (*sore ga*, that, demonstrative pronoun in the nominative case; *okotta*, familiar past of *okoru*, to happen; *toki*, when, conjunction of time).

10. — The verb “to be”.

There are three verbs meaning “to be”: *aru*, *oru*, *iru*. The latter two are generally used when there is an animate subject (person or animal), *aru* when the subject is inanimate. The stem of *iru* is *i-*, that of *oru* is *or-*; both verbs are used with the familiar participle to form a progressive present and past: *yonde imasu*, I (you, etc.) am calling (*yonde*, fam. part. of *yobu*; *imasu*, present of *iru*); *matte imashita*, I (you, etc.) was waiting (*matte*, fam. part. of *matsu*; *imashita*, past of *iru*); *kaite orimasu*, I (you, etc.) am writing (*kaite*, fam. part. of *kaku*; *orimasu*, present of *oru*); *hanashite orimashita*, I (you, etc.) was speaking (*hanashite*, fam. part. of *hanasu*; *orimashita*, past of *oru*).

The verb *aru*, used for inanimate subjects, means “to be” when a predicate noun appears; all predicate nouns used with *aru* must be followed by the postposition *de*: *kore wa hon de aru*, this is a book. The meaning “to have” is implied when only the subject appears, without a predicate noun: *pen ga aru*, I (you, etc.) have a pen (pens); the literal meaning, however, is “there is (are) a pen (pens)”; *tsukue no ue ni pen ga aru*, there is (are) a pen (pens) on top of the table (lit. table-of top-on pen is; compare the use of French *avoir* in *il y a une plume sur la table*). In the sense of “to have”, *aru* may be used even with animate subjects: I have many friends, *tomodachi ga takusan arimasu*; I have children, *kodomo ga arimasu*.

The postposition *de* which must accompany predicate nouns contracts with some of the forms of *aru*. The conjugation of *aru*, with and without a preceding *de*, is:

Polite Pres.	<i>arimasu</i>	<i>desu</i>	is, are
Familiar Pres.	<i>aru</i>	<i>da</i>	is, are (which is, are)
Polite Past	<i>arimashita</i>	<i>deshita</i>	was, were
Familiar Past	<i>atta</i>	<i>datta</i>	was, were (which was, were)
Probable Future	<i>arimashō</i>	<i>deshō</i>	will probably be
Probable Past	<i>arimashita deshō</i>	<i>deshita deshō</i>	probably was, were
Present Cond.	<i>arimasureba</i>	<i>desureba</i>	if (when) is, are, will be
Past Cond.	<i>arimashitara</i>	<i>deshitara</i>	if (when) was, were
Participle	<i>atte</i>	<i>de (datte)</i>	being

11. — Interrogative.

A question is indicated by the use of *ka* following the verb: *hon ga arimasu ka?*, are there books?; *doko desu ka?*, where is it?; *ikimasu ka?*, are you going?

Ne instead of *ka* is used if an affirmative answer is expected (cf. English “isn’t it?”, “aren’t you?”, or French *n’est-ce pas?*): *ii o tenki, desu ne?*, lovely weather, isn’t it?

12. — Negative.

All Japanese verbs have special negative forms. The negative forms of *aru*, “to be”, and *de aru*, “to be” with a predicate noun, are:

Polite Pres.	<i>arimasen</i>	<i>de wa arimasen</i>	is, are not
Familiar Pres.	<i>nai</i>	<i>de wa nai</i>	(which) is, are not
Polite Past	<i>arimasen</i> <i>deshita</i>	<i>de wa arimasen</i> <i>deshita</i>	was, were not
Fam. Past	<i>nakatta</i>	<i>de wa nakatta</i>	(which) was, were not

Probable Fut.	<i>nai deshō</i>	<i>de wa nai deshō</i>	probably won't be
(Polite)	<i>arimasen deshō</i>	<i>de wa arimasumai</i>	
Probable Past	<i>nakatta deshō</i>	<i>de wa nakatta deshō</i>	probably was, were not
Present Cond.	<i>nakereba</i>	<i>de (wa) nake- reba</i>	if (when) is (are) not
Past Cond.	<i>nakattara</i>	<i>de (wa) nakat- tara</i>	if (when) was (were) not
Participle	<i>nakute</i>	<i>de (wa) nakute</i>	not being

The negative of the polite forms of other verbs is formed by adding the following suffixes to the stem (with *i* if the stem ends in a consonant, without *i* if the stem ends in a vowel) :

Present	<i>-(i)masen</i>
Past	<i>-(i)masen deshita</i>
Probable Future	<i>-(i)masen deshō</i>
Probable Past	<i>-(i)masen deshitarō</i>

Yobimasen, does not call; *machimasen deshita*, did not wait; *kakimasen deshō*, probably will not write; *mimasen*, does not see.

The negative of the familiar forms of these verbs is made by adding the familiar negative forms of *aru*, "to be", given above, with a prefixed *a*, if the stem ends in a consonant, to the stem of the verb: *yob-a-nai*, is (are) not calling; *kak-a-nai*, does (do) not write; *mi-nai*, does (do) not see; *yob-a-nakatta*, did not call; *kak-a-nakatta*, did not write; *mi-nakatta*, did not see.

The familiar negative participle is the familiar present negative plus *de* (the participle of *de aru*): *yob-a-nai de*, not calling. Another familiar negative participle is formed by adding *-(a)nakute* to the stem: *yob-a-nakute*.

13. — Passive.

The suffix *-areru* (*-rareru* if the stem ends in a vowel) forms the passive: *korosu*, to kill; *korosareru*, to be killed;

miru, to see; *mirareru*, to be seen. These passive forms are then conjugated throughout: *taberu*, to eat; *taberareru*, to be eaten, it is eaten; *miraremashita*, was (were) seen. The passive is not so frequently used in Japanese as in English.

14. — Desiderative.

The suffix *-itai* (*-tai* for verbs whose stem ends in a vowel) denotes a wish, particularly of the first person: *kakitai*, I want to write; *tegami wo kakitai*, I want to write a letter; *kaitai*, I want to buy; *mitai*, I want to see. For the negative forms, change *-(i)tai* to *-(i)taku nai*.

15. — Honorifics.

Some nouns and verbs are humble or plain in themselves, while others are honorific. In speaking of your own (and therefore humble) mother, you would use the word *haha*, but in speaking of your friend's (and therefore honorable) mother, you would use *okāsama*.

	Humble	Honorific ^s
father	<i>chichi</i>	<i>otōsama</i>
mother	<i>haha</i>	<i>okāsama</i>
husband	<i>shujin</i>	<i>dannasan</i>
wife	<i>kanai</i>	<i>okusan</i>
son	<i>segare, musuko</i>	<i>musukosan</i>
daughter	<i>musume</i>	<i>ojōsan</i>

In like manner, some verbs are honorific, such as *meshiagaru* for the usual *taberu*, to eat; *itadaku*, to receive (from honorable you), for the usual *morau*. *Gozaru* is the honorific verb meaning "to be" and takes the place of the usual *aru*. It is a combination of *go*, honorable, and *aru*, to be. This verb is often preceded by the particle *de*, as is the case with its more usual form *aru*, (*de aru, desu*, etc.): *ikaga de gozaimasu*

8. Observe the suffix *-san* or *sama* (sir, Mr., Madam, Mrs., Miss) in these words, and compare with Spanish *su señor padre*, or French *madame votre mère*.

ka?, how are you?; *bōshi wa doko de gozaimasu ka?*, where is your hat? (note that in both these sentences, “you” and “your” are to be inferred from the honorific nature of the verb).

5. — Adjectives.

In Japanese the adjective partakes of the nature of a verb; consequently all true adjectives can be conjugated. This is because the signification of “to be” or “being” is inherent in every adjective form.

Real adjectives end in *-ai*, *-ii*, *-oi* and *-ui*: *takai*, expensive; *yoroshii* (*ii*, *yoi*), good; *kuroi*, black; *samui*, cold.

These adjectives are used as attributives, just as in English: *takai uchi*, an expensive house; *yoi hito*, a good person; *kuroi hon*, a black book.

When used in the predicate with the honorific verb *gozaru*, “to be”, such adjectives take the following forms: *takō*; *yoroshiū*; *kurō*; *samū*: *samū gozaimasu*, it is cold or it is a cold day; *takō gozaimasen*, it is not expensive.

True adjectives when used as simple predicates partake of the nature of a verb and can be conjugated. The attributive form of the adjective is the present tense. Thus, *kuroi* = is black; *hana wa shiroi* = the flowers are white. Other tenses are formed by adding the following suffixes to the stem of the adjective (when one removes the final *-i* of a real adjective, one has the stem: *shiroi*, white; stem *shiro*; *samui*, cold; stem *samu*):

<i>Tense</i>	<i>Suffix</i>	<i>Example</i>
Past	<i>-katta</i>	<i>takakatta</i> , was expensive
Probable Future	<i>-karō</i>	<i>takakarō</i> , will probably be expensive
Probable Past	<i>-kattarō</i>	<i>kurokattarō</i> , was probably black
Present Cond.	<i>-kereba</i>	<i>kurokereba</i> , if it is black
Past Cond.	<i>-kattara</i>	<i>yoroshikattara</i> , if it was good

Adverbs are formed from adjectives by adding the adverbial suffix *-ku* to the stem of the adjective:

Adjective

takai
yoroshii
kuroi
samui

Adverb

takaku
yoroshiku
kuroku
samuku

The negative forms of the adjectival conjugation are made by combining the adverb formed from the adjective with the familiar negative forms of the verb *aru*, "to be", producing such forms as *takaku nai*, it is not expensive; *shiroku nai*, it is not white; *yoroshiku nakatta*, was not good; *samuku nai deshō*, it will probably not be cold; *kinō samuku nakatta*, it was not cold yesterday, yesterday was not a cold day.

Many nouns take the suffix *na* or *no* to form an adjectival phrase: *gin no*, of silver; *kin no*, of gold, golden; *ki no*, wooden; *kirei na*, of beauty, beautiful.

These phrases may be used as attributive adjectives: *gin no tokei*, a silver watch; *kirei na uchi*, a beautiful house; *ki no hako*, a wooden box.

6. — Numerals.

a) — Cardinal.

For the first ten numbers there are two sets of cardinal numerals (the short forms, *ichi*, *ni*, etc., are originally Chinese, the longer ones, *hitotsu*, *futatsu*, etc., are Japanese):

1 <i>ichi</i>	<i>hitotsu</i>	12 <i>jū-ni</i>
2 <i>ni</i>	<i>futatsu</i>	20 <i>ni-jū</i>
3 <i>san</i>	<i>mitsu</i>	21 <i>ni-jū-ichi</i>
4 <i>shi</i>	<i>yotsu</i>	22 <i>ni-jū-ni</i>
5 <i>go</i>	<i>itsutsu</i>	30 <i>san-jū</i>
6 <i>roku</i>	<i>mutsu</i>	40 <i>shi-jū (yon-jū)</i>
7 <i>shichi</i>	<i>nanatsu</i>	50 <i>go-jū</i>
8 <i>hachi</i>	<i>yatsu</i>	60 <i>roku-jū</i>
9 <i>ku</i>	<i>kokonotsu</i>	70 <i>shichi-jū</i>
10 <i>jū</i>	<i>tō</i>	100 <i>hyaku</i>
11 <i>jū-ichi</i>		200 <i>nihyaku</i>

300 <i>sambyaku</i>	2000 <i>ni-sen</i>
600 <i>roppyaku</i>	3000 <i>san-zen</i>
800 <i>happyaku</i>	10,000 <i>ichi-man</i>
1000 <i>sen</i>	1,000,000 <i>hyaku-man</i>

Japanese has an elaborate set of auxiliary numerals in addition to the cardinal numerals. Most nouns need the first set of cardinals plus the auxiliary numeral. The order is, noun, cardinal numeral, auxiliary numeral. There are many auxiliary numerals, of which a few of the most common are given here:

Hon, for round things, such as trees, cigars, pens:

1-*ippon*; 2-*nihon*; 3-*sambon*; 4-*shihon*; 5-*gohon*; 6-*roppon*; 7-*shichihon*; 8-*hachihon*; 9-*kyuhon*; 10-*jippon*, etc. *Hamaki sambon* = three cigars; *pen ippon* = one pen.

Mai, for flat things such as letters, tickets, rugs, etc.:

1-*ichimai*; 2-*nimai*; 3-*sammai*, etc. *Kippu nimai* = two tickets.

Nin, for persons: 1-*hitori*; 2-*futari*; 3-*sannin*; 4-*yottari*; 5-*gonin*; 6-*rokunin*; 7-*shichinin*, etc. *Hito gonin* = five men or persons.

Hiki, for animals, except birds: 1-*ippiki*; 2-*nihiki*; 3-*sambiki*; 4-*shihiki*; 5-*gohiki*; 6-*roppiki*; 7-*shichihiki*, etc. *Inu sambiki* = three dogs.

Wa, for birds: 1-*ichiwa*; 2-*niwa*; 3-*samba*; 4-*shiwa*; 5-*gowa*, etc. *Tori niwa* = two birds.

Soku, for pairs of shoes, boots, socks, etc.: 1-*issoku*; 2-*nisoku*; 3-*sanzoku*; 4-*shisoku*; 5-*gosoku*, etc. *Kutsu sanzoku* = three pairs of shoes.

Fuku, for sips of tea, coffee, whiffs of tobacco, doses of medicine, etc.: 1-*ippuku*; 2-*nifuku*; 3-*sambuku*; 4-*shifuku*; 5-*gofuku*, etc. *Tabako sambuku* = three whiffs of tobacco.

Dai, for carriages, rikishas, taxis, automobiles, etc.: 1-*ichidai*; 2-*nidai*; 3-*sandai*, etc. *Takushi nidai* = two taxis; *jinrikisha ichidai* = one jinrikisha.

Hai, for cupfuls, glassfuls, etc.: 1-*ippai*; 2-*nihai*; 3-*sambai*; 4-*shihai*, etc. *Chawan nihai* = two tea-cupfuls.

Satsu, for books: 1-*issatsu*; 2-*nisatsu*; 3-*sansatsu*, etc. *Hon sansatsu* = three books.

b) — Ordinal.

Use *dai* before the Chinese cardinal numeral, or *me* after the Japanese cardinal numeral: first, *dai ichi* or *hitotsu me*; second, *dai ni* or *futatsu me*; etc. The cardinals are often used instead of the ordinals.

c) — Fractional.

hambun, a half

sambun no ichi, a third (literally, one of three parts: *sam* = 3; *bun* = part; *no* = of; *ichi* = one.)

shibun no ichi, a quarter

shibun no san, three quarters.

7. — *Demonstrative Pronouns*

this, *kore*; that (by you), *sore*; that (far away), *are*

Demonstrative Adjectives

this, *kono*; that (by you), *sono*; that (far away) *ano*

Interrogative Pronouns

who, *donata?*

which, *dore?*

Interrogative Adjectives

what kind of?, *donna?*

which?, *dono?*

8. — *Adverbs of Place*

here, *koko*; there (near you), *soko*; there (far), *asoko*
where?, *doko?*, *dochira?*

VOCABULARY°

1. *World, Elements, Nature, Weather, Time, Directions*

world, *sekai*
 earth, land, *tsuchi, riku*
 air, *kūki*
 water, *mizu*
 fire, *hi*
 light, *hikari*
 sea, *umi*
 sun, *tayō*
 moon, *tsuki*
 star, *hoshi*
 sky, *sora*
 wind, *kaze*
 weather, *tenki*
 snow, *yuki*
 to snow, *yuki ga furu*
 rain, *ame*
 to rain, *ame ga furu*
 cloud, *kumo*
 cloudy, *kumotta*
 fog, *kiri*
 ice, *kōri*
 mud, *doro*
 morning, *asa*
 noon, *hiru*
 afternoon, *gogo*
 evening, *yūgata*
 night, *yoru, ban*
 midnight, *yonaka*
 North, *kita*
 South, *minami*
 East, *higashi*
 West, *nishi*

time, *jikan* (o'clock, *ji*)
 year, *toshi, nen* (in combination)
 month, *tsuki, gatsu* (in combination)
 week, *shūkan*
 day, *hi, nichi* (in combination)
 hour, *jikan*
 minute, *fun*
 Sunday, *nichiyōbi*
 Monday, *getsuyōbi*
 Tuesday, *kayōbi*
 Wednesday, *suiyōbi*
 Thursday, *mokuyōbi*
 Friday, *kinyōbi*
 Saturday, *doyōbi*
 January, *shōgatsu, ichigatsu*
 February, *nigatsu*
 March, *sangatsu*
 April, *shigatsu*
 May, *gogatsu*
 June, *rokugatsu*
 July, *shichigatsu*
 August, *hachigatsu*
 September, *kugatsu*
 October, *jūgatsu*
 November, *jūichigatsu*
 December, *jūnigatsu*
 Spring, *haru*
 Summer, *natsu*
 Fall, *aki*
 Winter, *fuyu*

9. Most, but not all, verbs ending in *-eru, -iru* are vowel-stems, and call for the shorter endings described on p. 539. In the vocabulary, these vowel-stem verbs are indicated thus: to inform, *shiraseru* (v. s.); verbs not thus marked (e. g. to relate, *kataru*) are consonant-stems, and take the longer endings.

2. Family, Friendship, Love

family, <i>kazoku</i>	brother-in-law, <i>gi-kyōdai</i> ; <i>gi-kei</i>
husband, <i>shujin</i> (humble); <i>go-shujin</i> (polite)	(older); <i>gi-tei</i> (younger)
wife, <i>tsuma</i> , <i>kanai</i> (humble); <i>okusama</i> (polite)	sister-in-law, <i>gi-kyōdai</i> ; <i>gi-shi</i>
brother, <i>niisan</i> (elder, polite)	(older), <i>gi-mai</i> (younger)
sister, <i>nēsan</i> (elder, polite); your brother, your sister (polite), <i>go kyōdai</i>	man, <i>otoko</i>
father, <i>chichi</i> (fam.); <i>otōsama</i> (pol.)	woman, <i>onna</i>
mother, <i>haha</i> (fam.); <i>okāsama</i> (pol.)	child, <i>kodomo</i>
son, <i>musuko</i> (humble); <i>musuko san</i> (polite)	boy, <i>otoko no ko</i>
daughter, <i>musume</i> (humble); <i>ojōsan</i> (polite)	girl, <i>onna no ko</i>
parents, <i>oyatachi</i>	sir, Mr., <i>sama</i> , <i>san</i> ; Mr. Tanaka, <i>Tanaka san</i>
uncle, <i>ojisan</i>	Madam, Mrs., <i>sama</i> , <i>san</i> ; Mrs. Tanaka, <i>Tanaka san no oku-sama</i> .
aunt, <i>obasan</i>	Miss, young lady, <i>sama</i> , <i>san</i> ; Miss Hanako, <i>Hanako san</i>
grandfather, <i>ojisan</i>	friend, <i>tomodachi</i>
grandmother, <i>obāsan</i>	maid-servant, <i>jochū</i>
nephew, <i>oi</i>	to introduce, <i>shōkai suru</i>
niece, <i>mei</i>	to visit, <i>hōmon suru</i>
cousin, <i>itoko</i>	love, <i>ai</i>
grandson, <i>mago</i>	to love, <i>ai suru</i>
granddaughter, <i>mago-musume</i>	to fall in love with, <i>ai suru</i>
father-in-law, <i>yōfu</i>	to marry, <i>kekkon suru</i>
mother-in-law, <i>yōbo</i>	sweetheart, <i>koibito</i>
son-in-law, <i>muko</i>	kiss, <i>seppun</i>
daughter-in-law, <i>yome</i>	to kiss, <i>seppun suru</i>
	dear, beloved, <i>sai ai no</i> followed by name of speaker; <i>ai suru</i> followed by name; <i>chan</i> (after name)

3. Speaking Activities

language, <i>kotoba</i> , <i>gen-go</i> , <i>-go</i> (in compounds); English language, <i>ei-go</i> ; Japanese language, <i>nihon-go</i>	to call, <i>yobu</i>
to speak, <i>hanasu</i>	to be called, one's name is, <i>mōshimasu</i> (my name is Suzuki. <i>watakushi wa Suzuki to mōshimasu</i> ; <i>watakushi no na wa Suzuki desu</i>)
to say, <i>yū</i>	to greet, <i>aisatsu suru</i>
to tell, relate, <i>hanasu</i> , <i>kataru</i>	to give a name to, <i>nazukeru</i> (v. s.)
to inform, <i>shiraseru</i> (v. s.)	

to name, to indicate, *nazukeru*,
shimesu

to cry, shout, *sakebu*, *donaru*

to listen to, *kiku*

to hear, *kiku*

to understand, *wakaru*, *ryōkai*
suru

to mean, *imi suru*

to ask (question), *kiite miru*
(v.s.), *kiku*

to ask for, *motomeru* (v. s.)
tazuneru (v. s.)

to answer, *kotaeru* (v. s.), *henji*
wo suru

to thank, *orei wo yū*, *kansha suru*

to complain, *fuhei wo yū*, *kujō wo*
yū

4. Materials

gold, *kin*

silver, *gin*

iron, *tetsu*

steel, *hagane*

copper, *akagane*, *dō*

lead, *namari*

tin, *suzu*

oil, *sekiyū*

gasoline, *gasorin*, *kihatsuyū*

coal, *sekitan*

wood, *ki*

silk, *kinu*

cotton, *wata*

wool, *yōmō*, *ke*

cloth, *kire*, *nuno*

to cut, *kiru*

to dig, *horu*

to sew, *nuu*

to mend, *naosu*

5. Animals

animal, *dōbutsu*

horse, *uma*

dog, *inu*

mule, *raba*

cat, *neko*

bird, *tori*

donkey, *robā*

monkey, *saru*

chicken, *niwatori*, *hiyoko*

hen, *niwatori*, *men-dori*

rooster, *niwatori*, *on-dori*

sheep, *hitsuji*

mouse, *nezumi*

snake, *hebi*

goat, *yagi*

bee, *hachi*

cow, *me-ushi*

ox, *o-ushi*

pig, *buta*

insect, *mushi*

fly, *hai*

mosquito, *ka*

spider, *kumo*

louse, *shirami*

flea, *nomi*

bedbug, *nankin mushi*

6. Money, Buying, Selling

money, *kane*

coin, *kahei*

dollar, *doru*, *dara*

vat, *sentō*

(national currency; large), *yen*

(national currency; small), *sen*

bank, *ginko*

check, *kogitte*

money order, *kawase*
 to earn, *kasegu*, *mōkeru* (v. s.)
 to gain, to win, *mōkeru* (v. s.)
eru (v. s.), *uru*
 to lose, *nakusu*, *makeru* (v. s.)
 to spend money, *kane wo tsuiyasu*
(tsukau)
 to lend, *kasu*
 to owe, *kari ga aru*
 to pay money, *kane wo harau*
 to borrow, *kariru* (v. s.)
 to change, exchange, *torikaeru*
 (v. s.)
 to give back, *kaesu*
 price, *nedan*
 expensive, dear, *takai*
 cheap, *yasui*
 change, *tsurisen*
 store. shop, *mise*
 piece. *kire*, *kake*
 slice, *kire*
 pound, *ei-kin*, *pondo*

7. Eating and Drinking

to eat. *taberu* (v. s.)
 breakfast, *asa no shokuji*, *asa no*
meshi, *asa no han*
 to eat breakfast, *asa no shokuji*
wo suru, *asa-han wo taberu*
 lunch, *hiru no shokuji*, *hiru-han*
 to eat lunch, *hiru no shokuji wo*
suru
 supper, *ban-meshi*, *yū-han*
 to eat supper, *ban-meshi wo*
taberu, *yū-han wo suru*
 dinner (in the evening), *yū-meshi*,
enkai
 to eat dinner, *yū-meshi wo suru*
(taberu)
 meal. *shokuji*, *meshi*, *han* (in
 combination)
 dining-room, *shokudō*
 menu, *kondate*

package, *tsutsumi*
 basket, *kago*
 box, *hako*
 goods, *shinamono*
 to go shopping, *kaimono ni iku*
 to sell, *uru*
 to buy, *kau*
 to buy (a ticket), *kippu wo kau*
 to rent, hire, *yatou*, *kariru* (v. s.)
 to be worth, *neuchi ga aru*
 cost, *nedan*, *genka*
 to cost, *kakaru*; *suru* (it cost \$30,
sanju doru kakarimashita, *sanju*
doru shimashita)
 to choose. *erabu*
 thief, robber, *dorobō*
 to steal, *nusumu*
 policeman, *junsa*
 police, *keisatsu*
 honest, *shōjiki*
 dishonest, *fushōjiki*

waiter, *kyūjinin*, waitress, *jokyū*
 restaurant, *ryōri-ya*
 bill, *kanjō*
 to pass something, *mawasu* (please
 pass the bread, *pan wo mawa-*
shite kudasai
 tip, *kokorozuke*, *chippu*
 to drink, *nomu*
 water, *mizu*
 wine, *budōshu*, *sake*
 beer, *biru*
 coffee, *kōht*
 tea, *cha*
 milk, *gyūnyū*
 bottle, *bin*
 spoon, *saji*
 teaspoon, *cha-saji*
 knife, *naifu*
 fork, *fōku*

glass, *koppu*
 chop-sticks, *hashi*
 cup (teacup), *chawan*
 napkin, *nafukin*
 salt, *shio*
 pepper, *koshō*
 plate, dish, *sara*
 bread, *pan*
 butter, *bata*
 roll, *chiisai pan*
 sugar, *satō*
 soup, *soppu, suimono, shiru*
 rice, *kome* (raw), *gohan, meshi*
 potatoes, *imo, jagaimo*
 vegetables, *yasai*
 meat, *niku*
 beef, *gyūniku*
 steak, *bifuteki*
 chicken, *tori*
 chop, *choppu*
 lamb, *ko-hitsuji no niku*
 veal, *koushi no niku*
 pork, *tonniku, buta-niku*
 sausage, *chōzume, soseiji*
 ham, *hamu*
 bacon, *beikon*

egg, *tamago*
 fish, *sakana*
 to fry, *furai ni suru, ageru*
 fried, *abura de ageta, furai shita*
 cooked, *ryōri shita*
 boiled, *yudeta*
 broiled, *yaita*
 roasted, roast, *yaita, rōsu*
 baked, *yaita*
 sauce, *sōsu*
 salad, *sarada*
 cheese, *chīzu, kanraku*
 fruit, *kudamono*
 apple, *ringo*
 pear, *nashi*
 grapes, *budō*
 peach, *momo*
 strawberries, *ichigo*
 walnuts, *kurumi*
 orange, *mikan*
 lemon, *remon*
 juice, *shiru, tsuyu*
 cherries, *sakurambō*
 dessert, *dezāto*
 pastry, *seiyō-gashi*
 cake, *kashi*

8. Hygiene and Attire

bath, *furo*
 shower, *shawa*
 to bathe, *yu ni hairu, furo ni hairu*
 to wash, *arau*
 to shave, *soru, hige wo soru*
 barber, *toko-ya*
 mirror, *kagami*
 soap, *shabon, sekken*
 razor, *kamisori*
 safety razor, *enzen-kamisori*
 towel, *tenugui*
 comb, *kushi*
 brush, *burashi*
 scissors, *hasami*

to wear (a hat), *kaburu*
 to wear (a coat), *kiru*
 to wear (trousers, shoes), *haku*
 to take off, *nugu*
 to change (clothes), *kikaeru*
 (v. s.)
 to put on (a hat), *kaburu*
 to put on (a coat), *kiru*
 clothes, *yōfuku* (western), *ifuku*
 (Japanese)
 hat, *bōshi*
 suit, *mitsu zoroī no yōfuku*
 coat, *uwagi*
 vest, *chokki*
 trousers, *zubon*

underwear, *shitagi*
 glove, *tebukuro*
 socks, *kutsu-shita*
 stockings, *naga-kutsu-shita*
 shirt, *shatsu*
 collar, *kara*
 tie, *neikutai, erikazari*
 overcoat, *gaitō*
 raincoat, *amagappa, ame no gaitō*
 pocket, *poketto, kakushi*
 purse, *saiju, kane-ire, kin-chaku*
 handkerchief, *hankechi*
 button, *botan*
 shoe, *kutsu*
 boot, *naga-gutsu*

9. *Parts of the Body*

head, *atama*
 forehead, *hitai*
 face, *kao*
 mouth, *kuchi*
 hair, *ke, kami*
 eye, *me*
 ear, *mimi*
 tooth, *ha*
 lip, *kuchibiru*
 nose, *hana*
 tongue, *shita*
 chin, *ago*
 cheek, *hō*
 mustache, *kuchi-hige*
 beard, *hige, ago-hige*
 neck, *kubi*
 throat, *nodo*
 stomach, *i, hara* (colloquial)

10. *Medical*

doctor, *isha*
 drug-store, *kusuri-ya*
 hospital, *byōin*
 medicine, *kusuri*
 pill, *ganyaku*

pocket-book, *satsu-ire*
 tie-pin, *nekkutai pin*
 pin, *pin, tome-bari*
 safety pin, *anzen-pin*
 needle, *hari*
 parasol, *higasa*
 umbrella, *kōmori-gasa*
 watch, *kaichū-dokei*
 wrist watch, *ude-dokei*
 chain, *kusari*
 ring, *yubiwa*
 eyeglasses, *megane*
 slippers, *uwa-gutsu, surippa*
 dressing-gown, *dotera*
 bath-robe, *yukata*
 kimono, *kimono*

arm, *ude*
 hand, *te*
 elbow, *hiji*
 wrist, *te-kubi*
 finger, *yubi*
 nail, *yubi no tsume*
 shoulder, *kata*
 leg, *ashi*
 foot, *ashi*
 knee, *hiza*
 back, *senaka*
 chest, *mune*
 ankle, *ashi-kubi*
 body, *karada*
 blood, *chi*
 skin, *hifu*
 heart, *shinzō*
 bone, *hone*

prescription, *shohōsen*
 bandage, *hōtai*
 nurse, *kangoju, kanbyōjū*
 ill, *byōki*
 fever, *netsu*

illness, *byōki*
 swollen, *hareta*
 wound, *kizu, kega*
 wounded, *kizu shita, kega shita*
 head-ache, *zutsu*
 tooth-ache, *ha no itami*
 cough, *seki*

11. Military

war, *sensō*
 peace, *heiwa*
 ally, *dōmei-koku* (nation),
 dōmei-gun (army)
 enemy, *teki, teki-gun*
 army, *guntai*
 danger, *kiken*
 dangerous, *abunai, ayauai, kiken-na*
 to win, *katsu, shōri wo eru* (v. s.)
 to surround, *kakomu, torimaku*
 to arrest, *kōin suru, tsukamaeru*
 (v. s.)
 to kill, *korosu*
 to escape, to run away, *nigeru*
 (v. s.)
 to lead, *michibiku, annai suru*
 to follow, *tsuite kuru, shitagau*
 fear, *osore*
 prison, *kangoku, keimusho*
 prisoner, *horyo*
 comrade, buddy, *un-yū, tomoda-*
 chi, doryo, nakama
 battle, *ikusa, sentō*
 to fight, *tatakau, sento suru*
 to take prisoner, *toriko ni suru,*
 horyo ni suru
 to surrender, *kōsan suru, kōfuku*
 suru
 to retreat, *taikyaku suru*
 to capture, *bundori suru* (booty),
 tsukamaeru, (v. s.), *hokaku*
 suru (gun, tank, etc.), *senryo*
 saru (city, fort)
 to bomb, shell, *bakudan wo tōka*

to cough, *seki wo suru, seki ga*
 deru (v. s.)
 lame, *bikko*
 burn, *yakedō*
 pain, *kutsū, itami*
 poison, *doku*

suru, bakugeki suru, hōgeki
 suru
 sailor, *sui fu, suihei*
 marines, *kaihei*
 warship, *gunkan*
 battleship, *sentō-kan*
 cruiser, *jun-yō-kan*
 destroyer, *kuchiku-kan*
 convoy, *gosō*
 escort, *keibo*
 weapon, *buki*
 rifle, *raifurujū*
 machine-gun, *kikanjū*
 cannon, *taihō*
 ammunition, *danyaku*
 provisions, *hyōrō*
 cartridge, *jitsudan*
 bullet, *dangan*
 belt, *obi*
 knapsack, *hainō*
 soldier, private, *heитай, heisotsu*
 corporal, *gochō*
 sergeant, *gunsō*
 lieutenant, *shō-i*
 captain, *taichō, tai-i, senchō*
 major, *shōsa*
 colonel, *taisa*
 general, *taishō*
 officer, *shikan*
 company, *chutai*
 battalion, *daitai*
 regiment, *rentai*
 troops, *heитай*
 brigade, *ryodan*

division, *shidan*
 reinforcements, *enpei, zōentai*
 fortress, *shiro, yōgai*
 sentinel, *bampeī, h shō*
 to stand guard, *hoshō ni tatsu,*
shōhei ni tatsu
 guard, *mamoru, shugo suru*
 to be on duty, *tōban de aru*
 sign post, *michishirube*
 navy, *kaigun*
 spy, *kanchō, spai*
 help (noun), *kyūyen*
 tent, *tento*
 military supplies, *gunjuhin*
 map, *chizu*
 camp, *yaei*
 rope, *tsuna*
 flag, *hata*
 helmet, *kabuto*

12. Travel

passport, *rycken*
 ship, *june*
 steamer, *kisen*
 stateroom, *senshitsu*
 berth, *shindai*
 to travel, *ryokō suru*
 trip, voyage, *ryokō, kokai*
 to leave, *dekakeru* (v. s.), *deru*
 (v. s.), *shuppatsu suru*
 to arrive, *tsuku*
 to ride (conveyance), *noru*
 railroad, *tetsudō*
 station, *teishajō, suteishon*
 platform, *purattohōmu*
 track, *senro*
 train, *kisha*
 ticket, *kippu*
 to buy (a ticket), *kippu wo kau*

13. Reading and Writing

to read, *yomu*
 newspaper, *shimbun*

bayonet, *jūken*
 uniform, *gunpuku*
 airplane, *hikoki*
 bombing plane, *bakugeki-ki*
 pursuit plane, *tsuigeki-ki*
 bomb, *bakudan*
 truck, *kamotsu-jidōsha*
 shell, *ryūdan*
 tank, *tanku, sensha*
 to load, (*tama wo*) *sōten suru*
 to fire, shoot, *hassha suru*
 to shoot (military execution),
jūsatsu suru
 fire!, *utte!*
 attention!, *kiotsuke!*
 forward!, *mae e!*, *susume!*
 halt!, *tomare!*
 air raid shelter, *bōkūgo*

compartment, *kyakusha no shiki*
tta-seki tokubetsu-seki
 all aboard!, *ohayaku negaimasu*
 dining-car, *shokudō-sha*
 sleeper, *shindai-sha*
 custom-house, *zeikan*
 car, coach, *kyakusha*
 trunk, *toranku*
 valise, *kaban*
 baggage, *nimotsu*
 taxi, *takushi*
 porter, *akabō*
 bus, *basu*
 street-car, *densha*
 automobile, *jidōsha*
 driver, *untenshu*
 to drive, *unten suru*

magazine, *zasshi*
 book, *hon, shomotsu*

to write, *kaku*
 to translate, *honyaku suru*
 pencil, *empitsu*
 chalk, *hakuboku*
 blackboard, *kokuban*
 ink, *inki*
 pen, *pen*
 fountain pen, *mannenhitsu*
 paper, *kami*

14. Amusements

to smoke, *kitsuen suru, tabako wo nomu*
 cigar, *hamaki*
 cigarette, *maki-tabako*
 tobacco, *tabako*
 match, *matchi*
 give me a light, *hi wo kudasai*
 theatre, *gekijō*
 movies, *katsudō shashin, eiga*
 dance, *odori, dansu*
 to dance, *odoru*
 to have a good time, *tanoshimu*
 ticket, *kippu*

15. Town and Country

place, spot, *tokoro, basho*
 city, *shi*
 street, *machi, chō* (in combination)
 harbor, *minato*
 block, *chō*
 sidewalk, *jindō*
 intersection, *yotsukado*
 school, *gakkō*
 church, *kyōkai*
 building, *tatemono, birujingu*
 cathedral, *dai-kaidō*
 corner, *kado*
 hotel, *hoteru, ryokan*
 office, *jimusho*
 river, *kawa*

writing paper, *hakushi, tegami no kami*
 envelope, *jūtō*
 letter, *tegami*
 post-office, *yūbin kyoku*
 stamp, *kitte*
 letter-box, *yūbin-bako*
 to mail, *yūbin wo dasu*
 address, *banchi, jūsho, atena*
 post-card, *hagaki*

pleasure, *tanoshimi*
 to play (music), *hiku*
 to play (games), *asobu*
 to sing, *utau*
 song, *uta*
 to take a walk, *sampō suru*
 ball, *tama*
 beach, *kaigan*
 to swim, *oyogu*
 game, *yūgi, asobi*
 sand, *sunā*
 refreshment, *inshoku-motsu, chaka*
 saloon, *sakaba, sakaya*
 picnic, *pikunikku, noasobi*

bridge, *hashi*
 country, *inaka*
 village, *mura*
 road, *dōro, michi*
 mountain, *yama*
 grass, *kusa*
 yard, *naka-niwa*
 hill, *oka, ko-yama*
 lake, *mizuumi, ko* (in comb.)
 forest, wood, *hayashi, mori*
 field, *hatake, nohara, hara*
 flower, *hana*
 tree, *ki*
 rock, stone, *iwa, ishi*
 jungle, *mitsurin, yabubayashi*

16. *House*

door, *to*
 to open, *akeru* (v. s.)
 to close, *shimeru* (v. s.)
 key, *kagi*
 to go in, *hairu*
 to go out, *deru* (v. s.), *dekakeru*
 (v. s.)
 house, *ie*, *uchi*
 cottage, *inaka-ya*
 hut, *koya*
 to live (in), *sumu*
 staircase, *kaidan*, *hashigodan*
 to go up, *noboru*, *agaru*
 to go down, *kudaru*, *oriru* (v. s.)
 room, *heya*
 bed-room, *nema*, *shinshitsu*
 toilet, *benjo*
 kitchen, *daidokoro*
 table, *teiburu*, *tsukuye*
 clock, *hashira-dokei*
 alarm-clock, *mezamashi-dokei*
 to get dressed, *kimono wo kiru*

chair, *isu*
 to be sitting, *suwatte iru* (v. s.)
 to sit down, *kakeru* (v. s.), *suwaru*
 to stand, *tatsu*
 wall, *kabe*
 lamp, *rampu*
 light, *akari*
 candle, *rōsoku*
 closet, *oshiire*, *todana*
 window, *mado*
 to rest, *yasumu*
 bed, *toko*
 pillow, *makura*
 to go to bed, *neru* (v. s.)

 now, *ima*
 then, *sono-toki*
 afterwards, *atokara*
 never, *kesshite*
 always, *itsu de mo*, *tsune ni*
 forever, *eikyū ni*, *itsu made mo*
 soon, *sugu ni*
 often, *shiba shiba*, *tabi tabi*
 seldom, *metta ni*, *mare ni*
 not, *nai* (see negative form of
 verb, p. 545)
 very much, *taihen ni*, *takusan*
 little, not much, *sukoshi*, *chotto*
 well, *yoku*
 badly, *waruku*
 better, *issō yoku*
 worse, *issō waruku*
 only, *wazuka ni*, *tada*, *dake*
 more, *motto*
 less, *issō sukunaku*
 as - as, he is as tall as I, *ono hito*
wa watakushi to onaji gurai
sei ga takai:
 literally, that man (*ono hito*),
 and (*to*), I (*watakushi*), same
 (*onaji*), about (*gurai*), height
 (*sei ga*), high are (*takai*)
 as much - as (as many - as)
 possible, *dekiru-dake takusan*
 how much?, *ikura*
 how many?, *ikutsu*
 how?, *donna fū ni shite*, *dō shite*
 too much, *ammari*, *ōsugiru*
 too many, *ammari takusan*
 really, truly, *hontō ni*
 usually, *futsū ni*, *taitei*
 fast, *hayai*, *hayaku*
 slowly, *osoku*, *noroku*
 here, *koko ni*
 there, *asoko ni*
 over (down) there, *mukō ni*
 near by, *chikaku ni*
 far away, *tōi*, *tōku ni*

up (stairs), *nikai ni*
 down (stairs), *kaika ni*, *shita ni*
 ahead, in front, *mae ni*, *saki ni*
 behind, in back, *ushiro ni*, *ato ni*
 forward, *zenpō e*, *mae ni*
 back, backward, *ushiro e*, *kōhō e*
 outside, *soto ni*
 inside, *naka ni*
 opposite, in front, *mae ni*, *han*
tai ni
 here and there, *koko kashi-ko*
 everywhere, *dokonni mo*
 where, *doko ni*
 also, too, *mata*, *yahari*
 yes, *sayō*, *hai*
 no, *iie*
 for lack of, (something) *ga nai*
node
 occasionally, *toki doki*
 all day, *ichinichi-jū*
 all morning, *gozen chū*
 all afternoon, *gogo jū*, *maru han*
nichi
 all night, *yo jū*
 why?, *dōshite*
 very much, *taihen*
 like, *no gotoki*, *no yōna*
 besides, *sono hoka ni*
 finally, *saigo ni*
 in short, *yōsuru ni*
 almost, *taitei*, *hotondo*
 gladly, *yorokonde*
 certainly (it is so), *tashika ni*
 at once, *sugu ni*, *tadachi ni*
 at all, *sukoshi mo*
 hardly, *hotondo . . . de nai*
 aloud, *takagoe ni*
 of course, *mochiron*
 suddenly, *kyū ni*, *totsu-zen ni*
 perhaps, maybe, *tabun*, *osoraku*
 a little, *sukoshi*
 again, *mata*, *futatabi*
 together, *issho ni*

at least, *sukunaku tomo*
long ago, *zutto mae, mukashi*
again and again, *ikudo mo,*

shiba shibu
from time to time, *tokidoki*
therefore, *yue ni, dakara*

26. Conjunctions

and, (between nouns) *to*
but, *ga*
if, *moshi* (also see conditional of
verb, p. 540)
or, *ka*
why, *naze*
because, *kara, yue ni*
before, *izen ni, mae ni*
when, *toki, sono toko ni*
than, *yorī*
where, *doko ni, doko*

whither, *doko e*
until, *made*
although, *tatoe—to iedomo, kere-
domo*
unless, *de nakereba*
while, *aida ni, uchi ni*
when, *itsu*
that, *to yū koto, to*
after, *ato ni*
as soon as, *ya ina ya, suru to
sugu ni*
as long as, *no aida, kagiri*

27. Indefinite Pronouns and Adjectives

such (adj.), *sō yū yō na, sono
yō na*
such (pron.), *konna mono, sonna
hito*
all kinds of, *iroiro na*
everything, *nan de mo*
everyone, *dare de mo*
something, *nani ka, aru mono*
someone, *dare ka, aru hito*
nothing, *nani mo* (with neg.)
no one, *dare mo* (with neg.)
no (adj.), *sukoshi mo—nai, nani
mo—nai*
some (pron.), *sukoshi, ikuraka*
neither—nor, —*mo—mo dochira-
mo nai* (I have neither fish nor

rice, *sakana mo kome mo do-
chiramo nai*)

not at all, by no means, *sukoshi mo* (with negative), *chitto mo* (with
negative)

how old are you?, *o toshi wa ikutsu desu ka?*

I'm eight years old, *toshi wa yattsu desu* (use second set of numerals:
hitotsu, futatsu, mittsu, etc.)

how long have you been here?, *dono-gurai nagaku koko ni orimashita
(oide deshita) ka?*

how long have you been waiting?, *dono-gurai nagaku matte imashita
ka?*

as soon as possible, *dekiru-dake hayaku*

come here!, *koko e oide nasai*

come in!, *o hairi nasai*

look!, *goran nasai*
 look out!, *abunai!*
 for heaven's sake!, *sore wa taihen da!*
 what is the matter with you?, *dō shita no desu ka?*
 how do you say - in Japanese?, . . . *nihon-go de nan to iimasu ka?*
 gangway!, by your leave!, *o doki nasai!*, *gomen nasai!* *doite kudasai*
 as you please, *anata no ii yō ni, gojyū ni*
 listen!, look here!, say!, *ano ne!*, *chotto!*
 hello! (at telephone), *moshi-moshi*
 just a second!, *chotto matte kure (kudasai)*
 to the right, *migi e*
 to the left, *hidari e*
 straight ahead, *massugu ni*
 what do you mean by this?, *kore wa dō iu wake desu ka?*
 speak (more) slowly, *dōzo yukkuri hanashite kudasai*
 just right, *chōdo yoi*
 here is (are), *koko ni — aru*
 there is (are), *asoko ni — aru*
 no admittance!, *iru bekarazu!*
 notice!, *chūi*
 nonsense!, *baka na, detarame*
 what else?, *sore kara, sono hoka*
 glad to meet you, *o meni kakarete saiwai (ureshii) desu*
 stop!, *tomare!*, *mate!*

SAMPLE JAPANESE SENTENCES AND PHRASES
ILLUSTRATING THE STRUCTURE OF THE JAPANESE
LANGUAGE.

1. *Anata wa ikaga de gozaimasu ka?*

1. How are you? or How do you do? *Anata wa* - you; *ikaga* - how; *de* - a particle used in conjunction with the verb *gozaimasu* (see page 547); *gozaimasu* = present tense of polite verb *gozaru*, to be; *ka* = interrogative particle.

2. *Okusan wa ikaga de gozaimasu ka?*

2. How is your wife? *Okusan* (polite) = your wife, (*kanai* humble = my wife); *wa* = a postposition meaning "as for". As for your wife, how is she?

3. *Taihen yoku narimashita.*

3. I feel very much better. *Taihen* = very; *yoku* = well (adv.); *narimashita*, past tense of *naru*, to become; literally: I have become very well.

4. *Eigo ga dekimasu ka? Sukoshi dake.*

4. Do you speak English? A little only. *Ei* = English; *go* = language; *ga* postposition, sign of subject; *dekimasu* = present of *dekiru*, to know how, to be able. Literally: Is there a knowing-how (to speak) English? *Sukoshi* = little; *dake* = only.

5. *Wakarimasu ka? Wakarimasen.*

5. Do you understand? I don't understand. *Wakarimasu* = present of *wakaru*, to understand. *Wakarimasen* = present negative of same verb.

6. *Eigo ga wakaru hito.*

6. A man who understand English, (lit. English understanding man). On this use of the plain present see pg. 544. The postposition *ga*, sign of subject, is used, since *wakaru* is not transitive in Japanese.

7. *Eigo ka Fransugo ga wakaru hito wa imasen ka?*

7. Is there anyone here who understands English or French? *Ei* = English; *go* = language; *ka* = either; *Fransu* = French; *ga* = sign of subject; *wakaru hito* = understanding person (a person who understands). See pg. 543 for the

use of the plain or familiar form of a verb as the equivalent of a relative clause in English. *Imasen* = present negative of verb *iru*, to be; *ka* = sign of interrogation; *imasen ka* = is there not present? The sentence, word for word goes thus = English language or, French language, subject sign, understanding person, as for, is there not?

8. *Eigo wa sukoshi dekimasu ga Fransugo wa dekimasen.*

8. I speak a little English, but I don't speak French. Literally = English language as for, little I speak, but (*ga*) French language as for, I speak not

9. *Nihongo benkyō shite imasu.*

9. I am studying Japanese. *Nihon* = Japanese; *go* = language; *benkyō* = a studying; *shite* = doing; *imasu* = I am. *Shite* is the present participle of *suru*, to do. *Imasu* is present of *iru*, to be. The two words together form a progressive present, I am doing. *Benkyō suru* forms a so called Chinese conjugation, (see pg. 542).

10. *Ano hito wa san-nen Nihongo benkyō shimashita.*

10. He studied Japanese three years. *Ano* = that; *hito* = person; *san* = three; *nen* = years.

11. *Ano hito wa Nihon-jin desu ka?*

11. Is he a Japanese? *Jin* = man; *desu* = is. *Desu* is one of the combinations of *de aru* (see pg. 544).

12. *Hawaii ni ni-nen sunde imashita, sorekara kochira e kimashita.*

12. I lived in Hawaii for two years and then I came here. *Ni* = in; *ni-nen* = two years; *sunde* = present participle of *sumu*, to live; *imashita* = past of *iru*, to be; *sorekara* = afterwards (*sore* = that; *kara* = after); *kochira* = here, this place; *e* = to, toward; *kimashita* = past of *kuru*, to come.

13. *Anata wa dare desu ka?*

13. Who are you? *Anata* = you; *wa* = as for; *dare* = who; *desu* = are; *ka* = question. A more polite word for "who" is *donata*.

14. *Anata no namae wa?*

14. What is your name? Literally = You of name as for? *o namae* would be a more polite word.

15. *O toshi wa ikutsu desu ka?*

15. What is your age? *O* = honorable; *toshi* = age; *ikutsu* = how many (years).

16. *Koko ni o kake kudasai.*

16. Please sit down here. *Koko* = here; *ni* = at; *o* = honorable; *kake* = sitting (stem of *kakeru*); *kudasai* = please (polite). On the use of *kudasai*, see pg. 541.

17. *Kore wo setsumei shite kudasai.*

17. Please explain this. *Kore* = this; *wo* = sign of object; *setsumei* = explanation; *shite* = making (pres. participle of *suru*, to make); *kudasai* = please (polite). The verb *setsumei-suru* means "to explain".

18. *Mado wo akete kudasai.*

18. Please open the window. *Mado* = window; *wo* = sign of object of verb; *akete* = pres. part. of *akeru*, to open.

19. *Mado wo akenaide kudasai.*

19. Please don't open the window. *Akenai de* = pres. participle negative. *Akenai de kudasai* = please do not open.

20. *Nodo ga kawakimashita.*

20. I am thirsty. *Nodo* = throat; *ga* = sign of subject of verb; *kawakimashita* = past of verb *kawaku*, to become dry.

21. *Kōhi ga aru ka?*

21. Have you any coffee? *Kōhi* = coffee; *ga* = sign of subject; *aru* = plain verb "to be" (polite verb is *gozaru*). Literally: Is there any coffee? (Addressed to a servant).

22. *Ocha ga aru ka?*

22. Have you any tea? *ocha* = tea.

23. *Motte kite kudasai.*

23. Please bring. *Motte* = pres. part. of *motsu*, to have in the hand; *kite* = pres. part. of *kuru* = to come. Literally: Please come bringing.

24. *Mizu wo motte kite kudasai.*

24. Please bring some water. *Mizu* = water.

25. *Ano hito wa nani wo motte imasu ka?*

25. What has that person (or he, or she) got? *Nani* = what. Literally: That person as for, what (sign of object of verb)

having, is he? *Motte imasu* is the present progressive form of the verb *motsu*, to have in the hand. See "Participles" pg. 541.

26. *Sandwich wo motte kimashita ka?*

26. Did you or he or she bring a sandwich? *Kimashita* = past of *kuru*, to come. Literally: Sandwich having (or bringing) came he?

27. *Kore wa Nihongo de nan to iimasu ka?*

27. What do you call this in Japanese? *Kore* = this; *wa* = as for; *Nihongo* = Japanese language; *de* = in, by; *nan* = what; *to* = as; *iimasu ka* = pres. tense of *iu*, to call.

28. *Kore wa nan de koshiraete arimasu ka?*

28. Of what is this made? *Nan* = what; *de* = of, from; *koshiraete* = pres. part. of *koshiraeru*, to make, prepare; *arimasu ka* = pres. of *aru*, to be. Literally: This as for, what of, making, is it?

29. *Motto okii no ga arimashitara, motte kite kudasai.*

29. If there should be a larger one, please bring it. *Motto* = more; *okii* = big; *no* = one; *ga* = sign of subject; *arimashitara* = past conditional of verb *aru*, to be (should there be); *motte* = bringing; *kite kudasai* = come please.

30. *Kono tegami wo yakushite kudasaimasen ka?*

30. Won't you please translate this letter for me? *Kono* = this; *tegami* = letter; *yakushite* = pres. part. of *yakusu* *u* to translate; *kudasaimasen ka* = couldn't you favor me, (present tense negative, of verb *kudasaru*). *Kudasaru*, to favor me by doing, is an honorific verb used politely of the 2nd person.

31. *Dono gurai nagaku koko ni orimashita ka?*

31. About how long have you been here? *Dono* = how; *gurai* = about; *nagaku* = long (adverb formed from adjective *nagai*, long); *koko* = here; *ni* = at; *orimashita ka* = have you been? (past tense of *oru*, to be).

32. *Tenisu wo nasaimasu ka?*

32. Do you play tennis? *Nasaimasu* = do you do, that is, do you play? (present of honorific verb *nasaru*).

33. *Hanako san wa piano wo nasaimasu ka?*

33. Does Hanako play the piano? *Hana* = flower; *ko* =

sign of feminine gender; *san* = Miss; *Hanako san* = Miss Flower (girl's name).

34. *Koto wo shite irasshaimasu ka?*

34. Do you play the *koto* (a Japanese stringed instrument)? *Shite* = pres. part. of *suru*, to do; *irasshaimasu*, present of *irassharu*, polite verb, to be. The two verb forms together mean "are you doing or playing?"

35. *Mae ni shite imashita ga ima wa shite imasen.*

35. Formerly I played it, but now I do not play it. *Mae ni* = formerly; *ga* = but; *ima wa* = as for now; *shite imasen* = present negative of *shite iru*, to be doing. Literally = Formerly I was doing it, but now I am not doing (it).

36. *Kono hen wa tori ga orimasu ka?*

36. Are there not birds around here? *Kono* = this; *hen* = region; *wa* = as for; *tori* = birds; *ga* = sign of subject; *orimasen ka* = are there not (present negative of *oru*, to be).

37. *Kono hon wo agemashō.*

37. I shall give you this book. *Hon* = book; *agemashō* = future of *ageru*, a polite verb meaning humbly to present on my part, to you, an honorable person.

38. *Ikitai desu.*

38. I want to go. *Ikitai* = a wanting to go, the desiderative form of *iku*, to go (see page 547); *desu* = there is. Literally: There is a wanting to go.

39. *Mitai desu.*

39. I want to see. *Mitai* = I want to see, desiderative of verb *miru*, to see.

40. *Dare ka yonde kudasai.*

40. Please call somebody. *Dare ka* = somebody; *yonde kudasai* = please call, imperative of *yobu*, to call.

41. *Yūbin-kyoku wa doko ni arimasu ka?*

41. Where is the post-office? *Yūbin-kyoku* = post-office; *doko ni* = where; *arimasu* = is there, present tense of *aru*, to be.

42. *Takushi wo yonde kite kure.*

42. Go and call a taxi. *Takushi* = taxi; *wo* = sign of object of verb; *yonde* = calling, pres. part. of *yobu*; *kite* = coming,

pres. part. of *kuru*, to come; *kure* = please, imperative of verb *kureru*. (*Kure* is used only to one's inferiors; cf. *kudasai*, please, the polite verb.) The combination *yonde kite kure* = to go and call (spoken to a servant).

43. *Mukō no jidōsha wa dare no desu ka?*

43. Whose automobile is that over there? *Mukō* = over there; *no* = of; *desu ka* = is it. Literally: Yonder of, auto as for, whom of, is it?

44. *Koko kara suteishon made densha ga arimasen ka?*

44. Is there not a tram-car from here to the station? *Koko* = here; *kara* = from; *suteishon* = station; *made* = toward; *densha* = tram-car (*den* = electricity, *sha* = carriage).

45. *Ano hito wa mada Kanada ni imasu ka?*

45. Is he still in Canada? *Ano* = that; *hito* = man; *mada* = still; *Kanada* = Canada; *ni* = in; *imasu* = is he; *ka* = sign of question.

46. *Ii o tenki desu ka? Warui o tenki desu.*

46. Is the weather fine? The weather is bad. *Ii* = fine; *o* = honorable; *tenki* = weather; *desu ka* = is it; *warui* = bad.

47. *Ame ga futte imashita kara, ikimasen deshita.*

47. Since it was raining, he did not go. *Ame* = rain; *ga* = sign of subject; *futte* = coming down, pres. part. of *furu*, to come down; *imashita* = was, past tense of *iru*, to be; *kara* = since; *ikimasen deshita* = he did not go, past tense negative of *iku*, to go.

48. *Myōnichi o uchi ni irasshaimasu ka?*

48. Will you be at home tomorrow? *Myōnichi* = tomorrow; *o* = honorable; *uchi* = house; *ni* = in; *irasshaimasu ka* = will you be. The verb is the present (used as the future) of the honorific verb *irassharu*, to be.

49. *Niwa ni hana ga arimasu ka? Arimasen.*

49. Have you flowers in your garden? I have none. *Niwa* = garden; *ni* = in; *hana* = flowers; *ga* = sign of subject; *arimasu ka* = are there, polite present of *aru*, to be.

50. *Motto arimashita ka?*

50. Was there any more? *Motto* = more; *arimashita* = was there, past of *aru*.

51. *Mō arimasen deshita.*

51. There was no more. *Mō* = more; *arimasen deshita* = past negative of *aru*.

52. *Misete kudasai.*

52. Show it to me. *Misete kudasci* = polite imperative of *miseru*, to show.

53. *Kore ikura desu ka?*

53. How much is this? *Kore* = this; *ikura* = how much.

54. *Pen wa teburu no ue ni arimasu.*

54. There is a pen on the table. Literally, Pen as for, table of, top on, there is. *Ue* = top.

55. *Pen ga sambon arimasu.*

55. There are three pens. *Sambon* = three (*san* is three, *bon* is for *hon*, the auxiliary numeral for long, cylindrical things; (see page 550).

56. *Kippu ga ikumai arimasu?*

56. How many tickets are there? *Kippu* = tickets; *ikumai* = how many (*iku* means "how many" and *mai* is the auxiliary numeral for flat things; see page 550).

57. *Hyakushō wa warui kodomo wo shikarimashita.*

57. The farmer scolded the bad boy. *Hyakushō* = farmer; *warui* = bad; *kodomo* = boy; *wo* = object sign; *shikarimashita* = scolded, past of *shikaru*, to scold.

58. *Warui kodomo wa hyakushō ni shikararemashita.*

58. The bad boy was scolded by the farmer. *Ni* = by, to denote agent; *shikararemashita* = was scolded, past tense passive of *shikaru*.

59. *Tōkyō ni Smith san no ie ga arimasu.*

59. Mr. Smith's house is in Tokyo. *No* = of, possessive; *ie* = house.

60. *Kesa Suzuki san ga irasshaimashita ka?*

60. Did Mr. Suzuki come this morning? *Kesa* = this morning; *irasshaimashita* = past of *irassharu*, polite verb, to come.

61. *Hon wo mi-ni ikimashita.*

61. He went to see the books. *Hon* = books; *mi-ni* = to see. *Mi* is the stem of the verb *miru*, to see. *Ni* is a postposition that denotes purpose when used as a suffix to a verb stem.

62. *Shitte imasu ka?*

62. Do you know? *Shitte* = pres. part. of *shiru*, to know.
Literally: Knowing are you?

63. *Okinodoku desu.*

63. I am sorry. *O* = honorable; *ki* = spirit; *no* = of.
doku = poison. Literally: It is honorable poison of spirit.

64. *Kamaimasen.*

64. It doesn't matter. *Kamaimasen* = pres. negative of
kamau, to matter.

APPENDIX A - ESPERANTO¹

by G. Alan Connor, Director of the Esperanto Inter-language Institute in New York, and Doris Tappan Connor, Teacher of the International Cseh Institute of Esperanto, the Hague, Netherlands.

★ ★ ★

¹ **AUTHOR'S NOTE** — In addition to the national languages, it was thought appropriate to offer the readers of the second edition of "Languages for War and Peace" a description of one *fully constructed* international language (not a national tongue adapted for international use, like Basic English). Esperanto was selected because of all the languages answering that description, it is the only one having today a world-wide body of living speakers and a world-wide press, and the only one to have been widely used in international congresses. Attention may be called to other constructed languages, such as Schleyer's *Volapük*, Peano's *Interlingua* (or *Latino sine Flexione*), Jespersen's *Novial*, and the latest comer in this field, Hogben's *Interglossa*; but with the exception of *Volapük*, which for practical purposes came to its end before the close of the last century, none of them has advanced very far beyond the blue-print stage.

Inclusion of Esperanto in this work is not to be interpreted as signifying advocacy or endorsement by the author of its principles or method of construction, but simply as an effort on his part to introduce his readers to the entrancing field of interlanguage construction and planning for the adoption of a universal means of communication for international use, as well as to supply them with the elements of a tongue which occasionally proves of very direct, practical use under the most unexpected circumstances.

Mario A. Pei.

SPEAKERS AND LOCATION

Esperanto is spoken and understood by some few millions who are scattered widely throughout the entire civilized world. Accurate estimates are extremely difficult to obtain because no census is possible in the usual sense of the term. The Esperanto movement is divided into many international, national and local groups. The two largest international organizations are the International Esperanto League, with headquarters in London, and the Universal Esperanto Association, with headquarters in Geneva, Switzerland. Besides these two general bodies, there are many sectional groups organized for special applications of the language, such as science, medicine, art, literature, religion, labor, teaching, etc. Then there are the national organizations with their metropolitan and local groups.

An estimate of speakers and users of Esperanto, based upon the best available authorities from all these organizations, places the number of Esperantists more or less accurately at anywhere from 6,000,000 to 8,000,000, although some estimates would place it at considerably higher figures.

The outstanding fact about the use of Esperanto throughout the world today, in comparison with the many international language projects which have claimed consideration in the past, is that Esperanto has steadily progressed since its construction in 1887, to where it is practically the only international language used and spoken in the world today. It is active and growing, with some millions of speakers, and has a considerable literature and press, whereas other projects remain in the realm of academic discussion, without a comparable literature or body of speakers.

Esperanto is described as an international auxiliary language, or more briefly as an *interlanguage*. It does not aim to

replace the national tongues, but only to serve as a bridge-language between language-groups, for international interchange such as commerce, tourism, short-wave radio, export films, international conferences, world government, and the like. It presents a new concept of easy, neutral inter-communication, on a basis of equal participation.

Europe — Esperanto was constructed in Poland in 1887, by Dr. L. L. Zamenhof, “from the fittest elements of occidental tongues, and with an agglutinative grammatical structure”. It is chiefly a Latin-Germanic language. From Poland and Russia it spread abroad by way of Upsala University, Sweden, first throughout Europe, then to the rest of the world.

By far the largest number of Esperanto speakers are found in Europe today. And it is the small nations, more conscious of the language barriers, which have the greatest number. The Netherlands, Czechoslovakia, Denmark, Sweden, Austria, Switzerland, Hungary, Yugoslavia, and Italy show largest percentages. Then France, Germany and Great Britain.

Greatest growth during the present war is shown in Great Britain, Sweden, Switzerland and Portugal. It is interesting to note that with the recent proposal that “Basic English” be adopted as the “international language”, Esperanto has made considerable progress in Great Britain itself, as a result of the discussion of the problem.

Africa — Esperanto comparatively little used, except in parts of South Africa and in the northern tier of Mediterranean countries.

Asia — Most remarkable development in Japan and China, where universities spread the movement, and a considerable literature and press existed before the war. Chinese Esperantists continue to use Esperanto in new ways in the war against Japan, and a Chinese Esperanto journal is regularly published in Chungking.

Australia, Oceania, etc. — Australia and the Dutch East Indies developed Esperanto movements of some importance before the war. Various south sea islands have isolated groups, and several British officials have issued small journals from these island outposts.

Western Hemisphere — By far the largest group of Esperantists are found in Brazil, and one nation-wide governmental department uses Esperanto officially. Other countries with good showings are Uruguay, Argentina, Chile and Cuba. Development to a lesser extent in the United States, Canada and Mexico.

ALPHABET AND SOUNDS

a, b, c, ĉ, d, e, f, g, ĝ, h, i, j, ĵ, k, l, m, n, o, p, r, s, ŝ, t, u, ŭ, v, z. (The symbol ĥ is also used infrequently, with the value of Scottish *ch* in *loch*. It is being generally replaced by the symbol and sound of *k*. For example: *arĥitekturo* becomes *arkitekturo*, etc.) There is no q, w, x, or y in Esperanto.

Vowel sounds: a, e, i, o, u, have the vowel sounds heard in *bar*, *bear*, *bier*, *bore*, *boor*. They are like the sounds of English ah, eh, ee, oh, oo, (the *eh* like the first part of *a* in *gate*).

Consonant sounds: Pronounced as in English, except the following:

c: is not sounded like *s* or *k*, but like *ts* in *bits*.

j: has the international phonetic sound of *y* in *yes*.

r: is slightly rolled, being stronger and clearer than in English.

ĉ, ĝ, ĵ, ŝ, and ŭ: are heard immediately following the *ee* sounds in *leech*, *liege*, *leisure*, *leash*, and *leeway*. They are like the sounds of English *ch*, *j*, *zh*, *sh*, and *w*.

SPELLING, SYLLABICATION, ACCENTUATION

Esperanto is scientifically phonetic — one letter, one sound (approximating the basic symbols of the International Phonetic

Alphabet). Every word is pronounced as it is spelled. To name the letters, simply add *o* to the consonants.

There are no double consonants and no double vowels (save in compound words, where they are separately pronounced).

Each vowel constitutes a syllable, even if two or three of them are placed together. In dividing a word into syllables, a single consonant between two vowels goes with the *following*, not the *preceding* vowel. A consonant followed by *l* or *r* goes with the *l* or *r*. Otherwise, the syllable division is made before the last consonant of the group. Examples: a-e-ro, his-to-ri-o, a-ta-ki, an-gla, fin-gro, sank-ta.

The *accent* or *stress* is always on the *next to the last* syllable. Here, as in all other rules for Esperanto, there are no irregularities and no exceptions.

SAMPLE OF WRITTEN ESPERANTO; USE FOR PRACTICE READING

Facila Paragrafo

La inteligenta persono lernas la interlingvon Esperanto rapide kaj facile. Esperanto estas la moderna, kultura, neŭtrala lingvo por ĝenerala interkomunikado. La interlingvo estas simpla, fleksebla, praktika solvo de la problemo de globa interkompreno.

Anekdoto pri Profesoro kaj Studento

La telefono de la lernejo sonoris. La profesoro iris al la telefono. (Profesoro) "Jen, Profesoro Martelo." (Telefonanto) "Mi deziras informi vin, ke Karlo ne povas viziti la lernejon hodiaŭ, ĉar li estas malsana." (Profesoro) "Tion mi tre bedaŭras, mi deziras bonan resaniĝon! — Kiu estas ĉe la telefono?" (Telefonanto) "Mia patro."

GRAMMATICAL SURVEY

The grammar of Esperanto has only sixteen fundamental rules, which have no irregularities and no exceptions.

(1) There is no indefinite article; there is only a *Definite article*, *la*, alike for all sexes, cases, and numbers.

<i>libro</i> = book or a book	<i>la libro</i> = the book
<i>pomo</i> = apple or an apple	<i>la libroj</i> = the books
<i>frato</i> = brother, a brother	<i>la fratinoj</i> = the sisters
<i>la fratoj amas la fratino</i> = the brothers love the sister.	

(2) The *Noun* ends in *o*. To form the plural *j* is added. There are only two cases: nominative and accusative; the latter is obtained from the nominative by simply adding *n*.

<i>tablo</i> = table	<i>tabloj</i> = tables	<i>la tabloj</i> = the tables
<i>ideo</i> = idea	<i>ideoj</i> = ideas	<i>la ideoj</i> = the ideas

La lernanto havas krajonon kaj plumon en la poŝo.
The pupil has a pencil and a pen in his (*the*) pocket.

(3) The *Adjective* ends in *a*. It agrees in case and number with the noun. The *comparative* is made by the word *pli*; the *superlative* by *la plej*; with the comparative the conjunction *ol* is used.

<i>bona</i> = good	<i>bela</i> = beautiful	<i>dolĉa</i> = sweet
--------------------	-------------------------	----------------------

La inteligenta studento legas bonajn librojn.
The intelligent student reads good books.

La etaj infanoj havas belan patrino.
The little children have a beautiful mother.

La pordo estas alta, la fenestro estas pli alta ol la pordo, kaj la muro estas la plej alta.

The door is high, the window is higher than the door, and the wall is the highest.

(4) The fundamental *Numerals* (not declined) are: *unu, du, tri, kvar, kvin, ses, sep, ok, naŭ, dek, cent, mil*. Tens and

hundreds are formed by simple junction of the numerals. To mark the ordinal *a* is added; for the multiple, *obl*; for the fractional, *on*; for the collective, *op*.

1 = <i>unu</i>	1st = <i>unua</i>
2 = <i>du</i>	2nd = <i>dua</i>
3 = <i>tri</i>	3rd = <i>tria</i>
10 = <i>dek</i>	15th = <i>dek-kvina</i>
14 = <i>dek-kvar</i>	36th = <i>tridek-sesa</i>
15 = <i>dek-kvin</i>	127th = <i>cent-dudek-sepa</i>
20 = <i>dudek</i>	1000th = <i>mila</i>
26 = <i>dudek ses</i>	2x2 = 4— <i>duoble du estas kvar</i>
37 = <i>tridek sep</i>	3 times = <i>triole</i>
100 = <i>cent</i>	many times = <i>multoble</i>
108 = <i>cent ok</i>	1/2 = <i>duono</i>
149 = <i>cent kvardek naŭ</i>	1/12 = <i>dekduono</i>
1000 = <i>mil</i>	1/1000 = <i>milono</i>
5000 = <i>kvinmil</i>	by two's = <i>duope</i>
100,000 = <i>centmil</i>	by 6's = <i>sesope</i>
1,000,000 = <i>miliono</i>	in pairs = <i>duope</i>

(5) *Personal Pronouns*: *mi*, I; *vi*, you; *li*, he; *ŝi*, she; *ĝi*, it (thing or animal); *si*, (reflexive pronoun of third person); *ni*, we; *vi*, you (plural); *ili*, they; *oni*, one, people, they, we (indefinite pronoun of the third person); possessives are formed by adding *a*. Declensions as for nouns.

Li amas ŝin. He loves her.

Ŝi amas lin. She loves him.

mia libro, my book

nia patro, our father

Lia patro portis liajn paperojn en sia poŝo.

His father carried his (son's) papers in his (father's) pocket.

(6) The *Verb* undergoes no change with regard to person or number. Forms of the verb: time *being* (Present) takes the termination *-as*; time *been* (Past) *-is*; time *about-to-be* (Future) *-os*; Conditional *-us*; Imperative *-u*; Infinitive *-i*. Active Participles, *-ant*, *-int*, *-ont*. Passive Participles, *-at*, *-it*, *-ot*.

estas = is, are, am
estis = was, were
estos = will be
estus = should or would be
estu = be
esti = to be
amas = loves, is loving
amis = loved
amos = will love
amus = should or would love
amu = love
ami = to love
amanta = loving
aminta = having loved
amonta = about to love

estas amanta = is (am, are) loving
estas aminta = was (were) loving
estas amonta = is (am, are) about to love
amata = (being) loved
amita = having been loved
amota = about to be loved
estas amata = is (am, are) (being) loved
estas amita = has, (have) been, was (were) loved
estas amota = is (am, are) about to be loved

The negative is formed by placing *ne* before the verb: *mi ne komprenas*, I don't understand.

The interrogative is formed by prefixing the interrogative particle *ĉu* to the affirmative statement (do not invert the subject and the verb), unless another interrogative word (such as "who?", "when?", "why?") appears: *ĉu vi komprenas?*, do you understand?; but *kion ĝi signifas?*, what does this mean?

- (7) The *Adverb* ends in *e*; comparison as for adjectives.

rapide = rapidly; *bele* = beautifully; *bone* = well; *person*e = personally, in person; *plezure* = with pleasure. *Mi kantas bone. Li kantas pli bone ol mi. Ŝi kantas la plej bone.* I sing well. He sings better than I. She sings the best.

- (8) All *Prepositions* govern the nominative.

<i>sur la arbo</i>	<i>en la ĝardeno</i>	<i>apud la domo</i>
on the tree	in the garden	beside the house

- (9) Every word is pronounced as it is spelled.

unu litero, unu sono = oo-noo lee-teh-ro, oo-noo so-no

- (10) The *Accent* or *Stress* is always on the next to the last syllable.

universo = oo-nee-VEHR-so *historio* = hees-toh-REE-o

- (11) The *Compound Words* are formed by simple junction of the words; the chief word stands at the end. Grammatical terminations are also regarded as independent words.

bonintenca = *bon-intenc-a* = well-meaning

remalsano = *re-mal-san-o* = a return of illness, a relapse

katidineto = *kat-id-in-et-o* = a tiny female kitten

kato, cat; *ido*, offspring; *ino*, female; *eta*, tiny; *o*, substantive ending.

- (12) When another *Negative Word* is present the word *ne* is left out.

Li ne havas ian sperton. = He has not any experience.

Li havas nenian sperton. = He has no experience.

- (13) In order to show *Direction* towards, words take the termination of the accusative.

Li marŝis en la ĉambro. He walked (about) in the room.

Li marŝis en la ĉambron. He walked *into* the room.

Mi iras Parizon, or *al Parizo.* I am going to Paris.

- (14) Each *Preposition* has a definite meaning; but if the direct sense does not indicate which it should be, we use the preposition *je*, which has no meaning of its own. Instead of *je* we may use the accusative without a preposition.

al la domo = to the house

apud la pordo = by the door

de la urbo = from the city

en la taso = in the cup

dum la tago = during the day

kun amiko = with a friend

je la dua de Majo = May 2nd *la duan de Majo* = May 2nd
longa je tri futoj = 3 ft. long *longa tri futojn* = 3 ft. long
dum unu horo = during 1 hour *unu horon* = during 1 hour

(15) The so-called *Foreign Words*, those which the majority of languages have taken from one source, undergo no change in Esperanto, beyond conforming to its orthography.

<i>teatro</i> = theatre	<i>ĉambro</i> ' = chamber
<i>geografio</i> = geography	<i>kemio</i> = chemistry
<i>ekonomio</i> = economy	<i>kvanto</i> = quantity

(16) The *Final Vowel* of the noun and of the article may sometimes be dropped and be replaced by an apostrophe.

Kiel ofte al stel', en la nokta ĉiel',
Sub la bril' de l' brilanta trezor'.
 How oft at a star, in the night sky,
 'Neath the brilliance of the glittering treasure.

PREFIXES AND SUFFIXES

The prefixes and suffixes provide great richness and flexibility in Esperanto. They are regarded as independent words, and they are combined with roots and other word-elements by simple junction. Try combining them with roots in the various lists of this section. They will augment your vocabulary and facility in Esperanto.

-um general suffix: *kruco*, a cross; *krucumi*, to crucify

VOCABULARY

1. *World, Elements, Nature, Weather, Time, Directions.*

world, <i>mondo</i>	year, <i>jaro</i>
earth, <i>tero</i>	month, <i>monato</i>
air, <i>aero</i>	week, <i>semajno</i>
water, <i>akvo</i>	day, <i>tago</i>
fire, <i>fajro</i>	hour, <i>horo</i>
light, <i>lumo</i>	minute, <i>minuto</i>
sea, <i>maro</i>	Sunday, <i>dimanĉo</i>
sun, <i>suno</i>	Monday, <i>lundo</i>
moon, <i>luno</i>	Tuesday, <i>mardo</i>
star, <i>stelo</i>	Wednesday, <i>merkredo</i>
sky, <i>ĉielo</i>	Thursday, <i>ĵaŭdo</i>
wind, <i>vento</i>	Friday, <i>vendredo</i>
weather, <i>vetero</i>	Saturday, <i>sabato</i>
time, <i>tempo</i>	January, <i>januaro</i>
snow, <i>neĝo</i>	February, <i>februaro</i>
to snow, <i>neĝi</i>	March, <i>marto</i>
rain, <i>pluvo</i>	April, <i>aprilo</i>
to rain, <i>pluvi</i>	May, <i>majo</i>
cloud, <i>nubo</i>	June, <i>junio</i>
cloudy, <i>nuba</i>	July, <i>julio</i>
fog, <i>nebulo</i>	August, <i>aŭgusto</i>
ice, <i>glacio</i>	September, <i>septembro</i>
mud, <i>koto</i>	October, <i>oktobro</i>
morning, <i>mateno</i>	November, <i>novembro</i>
noon, <i>tagmezo</i>	December, <i>decembro</i>
afternoon, <i>posttagmezo</i>	Spring, <i>printempo</i>
night, <i>nokto</i>	Summer, <i>somero</i>
midnight, <i>noktmezo</i>	Fall, <i>aŭtuno</i>
North, <i>nordo</i>	Winter, <i>vintro</i>
South, <i>sudo</i>	it is warm, <i>estas varme</i>
East, <i>oriento</i>	it is cold, <i>estas malvarme</i>
West, <i>okcidento</i>	

I shall see him *on* Monday, *Mi vidas lin lunde*; last Monday, *pasintan lundon*; next Monday, *sekvontan lundon*; Monday morning, *lunde matene*; every Monday, *ĉiulunde*; on May 5th, 1943, *la kvinan de majo, mil naŭcent kvardek tri*.

2. Family, Friendship, Love.

family, *familio*
 husband, *edzo*
 wife, *edzino*
 parents, *gepatroj*
 father, *patro*
 mother, *patrino*
 son, *filo*
 daughter, *filino*
 brother, *frato*
 sister, *fratino*
 uncle, *onklo*
 aunt, *onklino*
 nephew, *nevo*
 niece, *nevino*
 cousin, *kuzo, kuzino*
 grandfather, *avo*
 grandmother, *avino*
 grandson, *nepo*
 granddaughter, *nepino*
 father-in-law, *bopatro*
 mother-in-law, *bopatrino*
 son-in-law, *bofilo*
 daughter-in-law, *bofilino*

brother-in-law, *bofrato*
 sister-in-law, *bofratino*
 man, *viro*; (generic) *homo*
 woman, *virino*
 child, *infano*
 boy, *knabo*
 girl, *knabino*
 sir, Mr., gentleman, *sinjoro*
 madam, Mrs., lady, *sinjorino*
 Miss, young lady, *fraŭlino*
 friend, *amiko, amikino*
 servant, *servisto, servistino*
 to introduce, *prezenti*
 to visit, *viziti*
 love, *amo*
 to love, *ami*
 to fall in love with, *enamiĝi*
 to marry, *edziĝi*
 sweetheart, *amato, amatino*
 kiss, *kiso*
 to kiss, *kisi*
 dear, beloved, *kara*

3. Speaking Activities.

word, *vorto*
 language, *lingvo*
 to speak, *paroli*
 to say, *diri*
 to tell, *diri, rakonti*
 to inform, *informi*
 to call, *voki*
 to greet, *saluti*
 to name, *nomi*
 to cry, shout, *krii*
 to listen to, *aŭskulti*

to hear, *aŭdi*
 to understand, *kompreni*
 to mean, *voli diri*
 to ask for, *peti*
 to ask (a question), *demandi*
 to answer, *respondi*
 to thank, *danki* (I thanked him
 for the book, *mi dankis lin pro
 la libro*)
 to complain, *plendi*

4. Materials.

gold, *oro*
 silver, *argento*
 iron, *fero*

steel, *ŝtalo*
 copper, *kupro*
 tin, *stano*

lead, *plumbo*
 oil, *oleo*
 gasoline, *petrolo*
 coal, *karbo*
 wood, *ligno*
 silk, *silko*
 cotton, *kotono*

wool, *lano*
 cloth, *ŝtofo*
 to cut, *tranĉi*
 to dig, *ĵosi*
 to sew, *kudri*
 to mend, *ripari*

5. *Animals.*

animal, *besto*
 horse, *ĉevalo*
 dog, *hundo*
 cat, *kato*
 bird, *birdo*
 donkey, *azeno*
 mule, *mulo*
 cow, *bovino*
 ox, *bovo*
 pig, *porko*
 chicken, *kokido*
 hen, *kokino*

rooster, *koko*
 sheep, *ŝafo*
 goat, *kapro*
 mouse, *muso*
 snake, *serpento*
 fly, *muŝo*
 bee, *abelo*
 mosquito, *moskito*
 spider, *araneo*
 louse, *pediko*
 flea, *pulo*
 bedbug, *litcimo*

6. *Money, Buying and Selling.*

money, *mono*
 coin, *monero*
 dollar, *dolaro*
 cent, *cendo*
 bank, *banko*
 check, *ĉeko*
 money order, *mandato, poŝt-
 mandato*
 to earn, to gain, to win, *gajni*
 to lose, *perdi*
 to spend, *elspezi*
 to lend, *alprunti*
 to borrow, *deprunti*
 to owe, *ŝuldi*
 to pay, *pagi*
 to give back, *redoni*
 change, *moneto, restaĵo*
 to change, *monerigi*
 price, *prezo*

cost, *kosto*
 to cost, *kosti*
 expensive, *multekosta*
 cheap, *malmultekosta*
 store, *butiko*
 piece, *peco*
 slice, *tranĉaĵo*
 pound, *funto*
 package, *pakaĵo*
 basket, *korbo*
 box, *skatolo*
 bag, *sako*
 goods, *komercaĵoj, (wares) varoj*
 to go shopping, *iri por aĉetadi*
 to sell, *vendi*
 to buy, *aĉeti*
 to rent, to hire, *lui*
 to be worth, *valori*
 to choose, *elekti*

thief, robber, *ŝtelisto*
to steal, *ŝteli*
honest, *honesta*

dishonest, *malhonesta*
police, *polico*
policeman, *policano*

7. Eating and Drinking.

to eat, *manĝi*
breakfast, *matenmanĝo*
to eat breakfast, *matenmanĝi*
lunch, *tagmanĝo*, (small) *manĝeto*
to eat lunch, *tagmanĝi*, *manĝeti*
supper, *vespermanĝo*
to eat supper, *vespermanĝi*
dinner, *manĝo*, *ĉefmanĝo*
to dine, *manĝi*
meal, *manĝo*
dining-room, *manĝoĉambro*,
manĝejo
waiter, *kelnero*
waitress, *kelnerino*
restaurant, *restoracio*
menu, *manĝokarto*, *menuo*
bill, *kalkulo*
to pass (a dish), *doni*, *transdoni*
tip, *dankmono*, *trinkmono*
to drink, *trinki*
water, *akvo*
wine, *vino*
beer, *biero*
coffee, *kajo*
tea, *teo*
milk, *lakto*
bottle, *botelo*
spoon, *kulero*
teaspoon, *kulero*, *tekulero*
knife, *tranĉilo*
fork, *forko*
glass, *glaso*
cup, *taso*
napkin, *buŝtuko*
salt, *salo*
pepper, *pipro*
plate, dish, *plado*
bread, *pano*

roll, *bulko*
butter, *butero*
sugar, *sukero*
soup, *supo*
rice, *rizo*
potatoes, *terpomo*
vegetable, *legomo*
meat, *viando*
beef, *bovaĵo*
steak, *viandtranĉaĵo*, *bifstekoj*
chicken, *kokido*
chop, *kotletoj*
veal, *bovidaĵo*
lamb, *ŝafidaĵo*
pork, *porkaĵo*
sausage, *kolbaso*
ham, *ŝinko*
bacon, *lardo*
egg, *ovo*
fish, *fiŝo*
fried, *fritita*
to cook, *kui*
boiled, *boligita*
stewed, *stufita*
roast, *rostaĵo*
roast beef, *rostbovaĵo*
baked, *bakita*
broiled, *kradrostita*
sauce, *saŭco*
salad, *salato*
cheese, *fromaĝo*
fruit, *fruktoj*
apple, *pomo*
pear, *piro*
peach, *persiko*
grapes, *vinberoj*
strawberries, *fragoj*
nuts, *nuksoj*

orange, *oranĝo*
 lemon, *citrono*
 juice, *suko*

cherries, *ĉerizoj*
 dessert, *deserto*
 pastry, *pastajo*

8. Hygiene and Attire

bath, *bano*
 to bathe, *bani*
 shower, *ŝprucbano, duŝo*
 to wash, *lavi*
 to shave, *razi*
 barber, *razisto*
 mirror, *spegulo*
 soap, *sapo*
 razor, *razilo*
 safety razor, *sendanĝera razilo*
 towel, *tuko*
 comb, *kombilo*
 brush, *broso*
 scissors, *tondilo*
 to wear, *porti*
 to take off, *demeti*
 to change, *ŝanĝi*
 to put on, *surmeti*
 clothes, *vestaĵoj*
 hat, *ĉapelo*
 suit, *kompleto, vesto*
 coat, *jako*
 vest, *veŝto*
 pants, *pantalono*
 underwear, *subvesto*
 undershirt, *subĉemizo*
 drawers, *kalsono*

glove, *ganto*
 socks, *ŝtrumpetoj*
 stockings, *ŝtrumpoj*
 shirt, *ĉemizo*
 collar, *kolumo*
 tie, *kravato*
 overcoat, *palto*
 raincoat, *pluvpalto, pluvmantelo*
 pocket, *poŝo*
 handkerchief, *naztuko, poŝtuko*
 button, *butono*
 shoe, *ŝuo*
 boot, *boto*
 pocketbook, *manpoŝo, monujo*
 purse, *monujo*
 pin, tie pin, *pinglo, kravatopinglo*
 needle, *kudrilo*
 umbrella, *ombrelo*
 watch, *poŝhorloĝo*
 wristwatch, *manumhorloĝo*
 chain, *ĉeno*
 ring, *ringo*
 eyeglasses, *okulvitroj*
 slippers, *pantofloj*
 dressing-gown, *ĉambrorobo,*
tualet-robo
 bathrobe, *banrobo*

9. Parts of the Body.

head, *kapo*
 forehead, *frunto*
 face, *vizaĝo*
 mouth, *buŝo*
 hair, *haroj*
 eye, *okulo*
 ear, *orelo*
 tooth, *dento*
 lip, *lipo*

nose, *nazo*
 tongue, *lango*
 chin, *mentono*
 cheek, *vango*
 mustache, *lipharoj*
 beard, *barbo*
 neck, *kolo*
 throat, *gorĝo*
 arm, *brako*

hand, *mano*
 elbow, *kubuto*
 wrist, *man-radiko*
 finger, *fingero*
 nail, *ungo*
 leg, *kruro*
 foot, *piedo*
 knee, *genuo*
 back, *dorso*

chest, *brusto*
 ankle, *maleolo*
 body, *korpo*
 bone, *osto*
 skin, *haŭto*
 heart, *koro*
 stomach, *stomako*
 blood, *sango*
 shoulder, *ŝultro*

10. *Medical.*

doctor, *kuracisto*
 drug-store, *apoteko, drogejo*
 hospital, *malsanulejo, hospitalo*
 medicine, *medikamento, kuracilo*
 pill, *pilolo*
 prescription, *recepto*
 bandage, *bandaĝo*
 nurse, *flegistino, flegisto*
 ill, *malsana*
 illness, *malsano*
 swollen, *ŝvelinta*

wound, *vundo*
 wounded, *vundita*
 head-ache, *kapdoloro*
 tooth-ache, *dentdoloro*
 cough, *tuso*
 to cough, *tusi*
 lame, *lama*
 burn, *brulvundo*
 pain, *doloro*
 poison, *veneno*

11. *Military.*

war, *milito*
 peace, *paco*
 ally, *kunligano*
 enemy, *malamikio*
 army, *armeo*
 danger, *danĝero*
 dangerous, *danĝera*
 to win, *venki*
 to surround, *ĉirkaŭi*
 to arrest, *aresti, kapti*
 to kill, *mortigi*
 to escape, *liberiĝi, eviti*
 to run away, *forkuri*
 to lead, *konduki, antaŭiri*
 to follow, *sekvi*
 to surrender, *cedi*
 to retreat, *retiriĝi, returnemarŝi*
 to bomb, shell, *bombardi*
 fear, *timo*

prison, *malliberejo*
 prisoner, *militkaptito*
 to take prisoner, *kapti, ekkapti*
 to capture, *kapti*
 help, *helpo*
 comrade, buddy, *kamarado,*
kunulo
 battle, *batalo, barakto*
 to fight, *batali, barakti*
 soldier, *soldato*
 private, *soldato, simpla soldato*
 corporal, *kaporalo*
 sergeant, *serĝento*
 lieutenant, *leŭtenanto*
 captain, *kapitano*
 major, *majoro*
 colonel, *kolonelo*
 general, *generalo*
 officer, *oficiro*

company, *roto*
 battalion, *bataliono*
 regiment, *regimento*
 brigade, *brigado*
 division, *divizio*
 troops, *soldataro, trupoj*
 reinforcements, *refortigantoj,*
helptrupoj
 fortress, *fortikaĵo*
 sentinel, *gardstaranto, gardsoldato*
 to do sentry duty, *garde stari*
 to be on duty, *deĵori*
 guard, *gvardio*
 sign-post, *signa stango, vojmon-*
trilo
 navy, *militŝiparo, militmaristaro*
 sailor, *militmaristo*
 marine, *marsoldato*
 warship, *militŝipo*
 cruiser, *krozŝipo*
 destroyer, *detruoŝipo*
 convoy, *ŝirmita kunŝiparo, konvojo*
 escort, *kondukoŝipoj*
 weapon, *armilo, batalilo*
 rifle, *fusilo*
 machine-gun, *maŝinpafilo*
 cannon, *kanono*
 ammunition, *municio*
 supplies, *provizo, provizado*
 cartridge, *kartoĉo*
 bullet, *kuglo*
 belt, *zono*

12. Travel.

passport, *pasporto*
 customs, *dogano*
 ship, *ŝipo*
 steamer, *vaporŝipo*
 stateroom, *kajuto*
 berth, *ŝiplito*
 to travel, *vojaĝi*
 trip, voyage, *vojaĝo*
 to leave, depart, *foriri*

cartridge belt, *kartoĉozono*
 knapsack, *tornistro*
 tent, *tendo*
 camp, *tendaro*
 map, *karto, geografia karto,*
topografia karto
 rope, *ŝnuro*
 flag, *standardo*
 helmet, *kasko*
 bayonet, *bajoneto*
 uniform, *uniformo*
 airplane, *aeroplano*
 bombing plane, *bombardoplano,*
bombard-aeroplano
 pursuit plane, *ĉasoplano, ĉas-*
aeroplano
 shell, *obuso*
 bomb, *bombo*
 truck, *ŝargaŭto, ŝargaŭtomobilo*
 tank, *kirasveturilo*
 to load, *ŝargi*
 to fire, to shoot, *pafi*
 to shoot (military execution)
ekzekuti per pafado, fusilek-
zekuti
 spy, *spiono*
 fire! *pafu!*
 attention! *atentu!*
 forward! *antaŭen!*
 halt! *haltu!*
 air-raid shelter, *riŝuĝejo kontraŭ*
aeratako

to arrive, *alveni*
 to ride, (a conveyance), *rajdi,*
veturi
 railroad, *fervojo*
 station, *stacio*
 track, *relvojo*
 train, *vagonaro*
 platform, *perono*
 ticket, *bileto*

compartment, *kupeo*
 all aboard!, *envagoniĝu!*
 dining-car, *manĝvagono*
 sleeper, *litvagono*
 car, coach, *vagono*
 trunk, *kofro*
 valise, *valizo*
 baggage, *pakaĵoj*

porter, *portisto*
 bus, *aŭtobuso*
 street-car, *tramo*
 automobile, *aŭtomobilo*
 taxi, *fiakro, taksfiakro*
 driver, *ŝofero, veturigisto*
 to drive (car), *veturigi, aŭtomobili*

13. Reading and Writing.

to read, *legi*
 newspaper, *jurnalo*
 magazine, *gazeto, revuo*
 book, *libro*
 to write, *skribi*
 to translate, *traduki*
 pencil, *krajono*
 chalk, *kreto*
 blackboard, *nigra tabulo*
 ink, *inko*

pen, *plumo* (fountain pen, *font-plumo*)
 envelope, *koverto*
 paper, *papero*
 letter, *letero*
 post-office, *poŝtoficejo*
 stamp, *poŝtmarko*
 letter-box, *poŝtkesto*
 to mail, *enpoŝtigi*
 address, *adreso*
 post-card, *poŝtkarto*

14. Amusements.

to smoke, *fumi*
 cigar, *cigaro*
 cigarette, *cigaredo*
 tobacco, *tobako*
 match, *alumeto*
 give me a light, *donu al mi ekbruligon*
 theatre, *teatro*
 movies, *moviganta filmo, kino*
 dance, *danco, balo*
 to dance, *danci*
 to have a good time, *amuziĝi*
 ticket, *bileto*

pleasure, *plezuro*
 to play, *ludi* (music or game)
 to sing, *kanti*
 song, *kanto*
 game, *ludo*
 ball, *pilko*
 to take a walk, *promenadi*
 beach, *marbordo*
 to swim, *naĝi*
 sand, *sablo*
 refreshment, *refreŝigaĵo*
 saloon, *trinkejo*
 picnic, *pikniko, ekskurso*

15. Town and Country.

place, spot, *loko*
 city, *urbo*
 street, *strato*
 sidewalk, *trotuaro*

road, *vojo*
 intersection, *interkruciĝo*
 harbor, *haveno*
 block, *kvadrato*

school, *lernejo*
 church, *preĝejo*
 cathedral, *katedralo*
 building, *konstruo*
 corner, *angulo*
 hotel, *hotelo*
 office, *oficejo*
 river, *rivero*
 bridge, *ponto*
 country, *kamparo*
 village, *vilaĝo*

mountain, *monto*
 grass, *herbo*
 yard, *korto*
 hill, *monteto*
 lake, *lago*
 forest, *arbaro*
 field, *kampo*
 flower, *floro*
 tree, *arbo*
 rock, *roko*
 jungle, *ĵunglo*

16. *House.*

door, *pordo*
 roof, *tegmento*
 to open, *malfermi*; to close, *fermi*
 key, *ŝlosilo*
 to go in, *eniri*; to go out, *eliri*
 house, *domo* (at home, *hejme*, to
 go home, *iri hejmen*)
 cottage, *dometo*, *kabano*
 hut, *kabano*
 to live in, *loĝi en*
 staircase, *ŝtuparo*
 to go up, *supren iri*
 to go down, *malsupren iri*
 room, *ĉambro*
 toilet, *necesejo*
 kitchen, *kuirejo*
 table, *tablo*
 chair, *seĝo*
 to sit down, *sidiĝi*
 to stand, be standing, *stariĝi*, *stari*

wall, *muro*
 lamp, *lampo*
 candle, *kandelo*
 closet, *vestejo*
 window, *fenestro*
 bed, *lito*
 bedroom, *litoĉambro*
 blanket, *kovrilo*, *lankovrilo*
 sheet, *litotuko*
 mattress, *matraco*
 alarm-clock, *vekhoroĝo*
 pillow, *kapkuseno*
 to rest, *ripozi*
 to go to bed, *enlitiĝi*
 to go to sleep, fall asleep, *endor-*
migi
 to sleep, *dormi*
 to wake up, *vekigi*
 to dress, *vesti sin*
 to get up, *levi sin*

17. *Miscellaneous Nouns.*

people, *popolo*
 thing, *ajo*, *afero*
 name, *nomo*
 luck, *bonŝanco* (bad luck, *mal-*
bonŝanco)

number, *numero*
 life, *vivo*
 death, *morto*
 work, *laboro*

18. *Verbs — Coming and Going.*

to come, <i>veni</i>	to run, <i>kuri</i>
to go, <i>iri</i>	to walk, <i>marŝi</i>
to go away, <i>foriri</i>	to fall, <i>fali</i>
to stay, remain, <i>resti</i>	to follow, <i>sekvi</i>
to return, <i>reveni</i>	

19. *Verbs — Looking and Seeing.*

to see, <i>vidi</i>	to smile, <i>rideti</i>
to look at, <i>rigardi</i> (I am looking at it, <i>mi rigardas ĝin</i>)	to look, seem, <i>ŝajni</i> (it seems to me, <i>ŝajnas al mi</i>)
to look for, <i>serĉi</i>	to recognize, <i>rekonii</i>
to laugh, <i>ridi</i>	to take for, <i>supozi esti</i>

20. *Verbs — Mental.*

to make a mistake, <i>erari</i>	to forget, <i>forgesi</i>
to hope, <i>esperii</i>	to permit, allow, <i>permesi</i>
to wait (for), <i>atendi</i>	to forbid, <i>malpermesi</i>
to think, <i>pensii</i>	to promise, <i>promesi</i>
to believe, <i>kredii</i>	to learn, <i>lerni</i>
to like, <i>ŝati</i>	to feel like, <i>emi</i> (I feel like sleeping, <i>mi emas dormi, mi estas dormema</i>)
to wish, to want, <i>deziri</i>	to fear, be afraid, <i>timi</i>
to know (a person), <i>koni</i>	to be right, <i>pravi</i>
to know (a fact), <i>sci</i>	to be wrong, <i>malpravi</i>
to understand, <i>kompreni</i>	
to remember, <i>memori</i>	

21. *Verbs — Miscellaneous.*

to live, <i>vivi</i>	to lose, <i>perdi</i>
to die, <i>mortii</i>	to find, <i>trovi</i>
to work, <i>labori</i>	to leave, <i>foriri</i> (use <i>forlasi</i> for leaving objects or people)
to give, <i>doni</i>	to try, <i>peni</i>
to take, <i>preni</i>	to meet, <i>renkonti</i>
to show, <i>montri</i>	to put, place, <i>meti</i>
to begin, to start, <i>komenci</i> (transitive); <i>komenciĝi</i> (intransitive)	to do, to make, <i>fari</i>
to finish, <i>fini</i> (tr.); <i>finiĝi</i> (intr.)	to have something done, <i>igi</i> (or use suffix <i>-ig-</i> ; I had a letter written, <i>mi igis leteron skribinta</i> or <i>mi skribigis leteron</i> ; I had them sing, <i>mi igis ilin kanti, or mi kantigis ilin</i>).
to continue, <i>daŭri</i> (intr.); <i>daŭrigi</i> (tr.)	
to help, <i>helpi</i>	
to hide, <i>kaŝi</i> (tr.); <i>kaŝiĝi, sinkaŝi</i> (intr.)	

can, to be able, *povi*
 to carry, *porti*
 to stop, *halti* (use *ĉesi* for "to
 stop doing")
 to bring, *alporti*, *venigi*
 to cover, *kovri*
 to get, obtain, *akiri*
 to hold, *teni*
 to get, become, *iĝi* (he became

pale, *li iĝis pala*, *li paliĝis*)
 to break, *rompi*
 to hurry, *rapidi*
 to deliver, *liveri*
 to send, *sendi*
 to belong, *aparteni*
 to accept, *akcepti*
 to refuse, *refuzi*
 to do again, *fari denove*

22. Adjectives.

small, *malgranda*, *eta*
 large, great, *granda*
 big (bulky), *ampleksa*
 tall, high, *alta*
 short, *malalta*
 heavy, *peza*
 light (weight), *malpeza*
 long, *longa*
 wide, *larĝa*
 narrow, *mallarĝa*
 clean, *pura*
 dirty, *malpura*
 cool, *malvarmeta*
 cold, *malvarma*
 warm, hot, *varma*
 damp, *malseketa*
 wet, *malseka*
 empty, *malplena*
 dry, *seka*
 full, *plena*
 soft, *mola*
 hard, *malvola*
 quick, *rapida*
 slow, *malrapida*
 ordinary, *ordinara*
 comfortable, *komforta*
 uncomfortable, *mal komforta*
 near, *proksima*
 distant, *malproksima*
 right, *dekstra*
 left, *maldekstra*
 poor, *malriĉa*

rich, *riĉa*
 beautiful, *bela*
 pretty, *beleta*
 ugly, *malbela*
 sweet, *dolĉa*
 bitter, *amara*
 sour, *acida*
 salt, *sala*
 young, *juna*
 dark, *malhela*
 light, bright, *hela*
 clear, *klara*
 fat, *grasa*
 thick, *dika*
 thin, *maldika*
 round, *ronda*
 square, *kva* *ata*
 flat, *plata*
 deep, *profunda*
 strong, *forta*
 weak, *malforta*
 tired, *laca*
 alone, *sola*
 same, *sama*
 easy, *facila*
 hard, *malfacila*
 happy, *feliĉa*
 merry, *gaja*
 sad, *malgaja*, *malĝoja*
 free, *libera*
 crazy, *freneza*
 silly, *malsprita*, *malprudenta*

drunk, *ebria*
 polite, *gentila*
 rude, *malgentila*
 pleasant, *agrabla*
 unpleasant, *malagrabla*
 lonesome, *soleca*
 true, *vera*
 false, *malvera* (spurious, *falsa*)
 foreign, *fremda*
 old, *maljuna*
 new, *nova*
 good, *bona*
 better, *pli bona* (best, *la plej bona*)
 bad, *malbona*
 worse, *pli malbona* (worst, *la plej malbona*)
 fine, *bela, bona*
 first, *unua*

last, *lasta*
 friendly, *amika*
 hostile, *malamika*
 lucky, *bonŝanca*
 unlucky, *malbonŝanca*
 charming, *ĉarma*
 afraid, *timema*
 ready, *preta*
 hungry, *malsata*
 thirsty, *soifa*
 funny, *komika, ŝerca*
 possible, *ebla*
 impossible, *neebla*
 brave, *kuraĝa, brava*
 cowardly, *malkuraĝa*
 quiet, *kvieta, trankvila*
 noisy, *brua*
 living, *viva*
 dead, *morta*

23. Colors.

white, *blanka*
 black, *nigra*
 red, *ruĝa*
 green, *verda*
 blue, *blua*

yellow, *flava*
 gray, *griza*
 brown, *bruna*
 rose, *rozkolora, roza*
 purple, *purpura*

24. Nationalities.

Use no capital for the adjective or for the language, except in the case of *Esperanto*, which is capitalized because it originated as a pseudonym from the word *esperanto*, meaning "one who hopes".

Names of languages are used adverbially, or with the preposition: *angle* or *en la angla lingvo* — both mean "in the English language".

The forms given are nouns, indicating a person of the nationality mentioned. To form the adjective, change the ending *-o* to *-a* (French wine, *franca vino*).

U. S. A. citizen, *usonano*
 American, *amerikano, nord-amerikano, sud-amerikano*
 English, *anglo*
 French, *franco*
 German, *germano*

Spanish, *hispano*
 Russian, *ruso*
 Italian, *italo*
 Japanese, *japano*
 Chinese, *ĉino*
 Dutch, *nederlandano*

Norwegian, *norvego*
 Swedish, *svedo*
 Finnish, *finlandano*
 Belgian, *belgo*
 Polish, *polo*
 Danish, *dano*
 Swiss, *sviso*
 Portuguese, *portugalo*
 Yugoslav, *jugoslavo*
 Bulgarian, *bulgaro*
 Czech, *ĉeho*
 Greek, *greko*
 Turkish, *turko*
 Roumanian, *rumano*
 Hungarian, *hungaro*
 Austrian, *aŭstro*
 Malay, *malajano*
 Persian, *perso*
 Arabian, Arab, *arabo*
 Jewish, Hebrew, *judo, hebreo*
 Australian, *aŭstraliano*
 Canadian, *kanadano*

Mexican, *meksikano*
 Brazilian, *brazilano*
 Argentinian, *argentinano*
 Chilean, *ĉilano*
 Peruvian, *peruano*
 Cuban, *kubano*
 Puerto Rican, *portorikano*
 Colombian, *kolombiano*
 Venezuelan, *venezuelano*
 Bolivian, *boliviano*
 Uruguayan, *urugvajano*
 Paraguayan, *paragvajano*
 Ecuadorian, *ekvadorano*
 Costa Rican, *kostarikano*
 Honduran, *hondurano*
 Salvadorean, *salvadorano*
 Guatemalan, *gvatemalano*
 Dominican (of Santo Domingo)
dominikano
 Panamanian, *panamano*
 Nicaraguan, *nikaragvano*

25. *Adverbs and Adverbial Expressions.*

today, *hodiaŭ*
 yesterday, *hierau*
 tomorrow, *morgaŭ*
 day before yesterday, *antaŭ hierau*
 day after tomorrow, *post morgaŭ*
 tonight, *hodiaŭ nokte*
 last night, *hierau nokte*
 this morning, *hodiaŭ matene*
 in the morning, *matene*
 in the afternoon, *posttagmeze*
 in the evening, *vespere*
 in the night, *nokte*
 tomorrow morning, *morgaŭ matene*
ne
 tomorrow afternoon, *morgaŭ*
posttagmeze
 tomorrow evening, *morgaŭ vespere*
 tomorrow night, *morgaŭ nokte*
 early, *frue*

on time, *akurate*
 late, *malfrue*
 already, *jam*
 no longer, *ne plu*
 yet, still, *ankoraŭ*
 not yet, *ne ankoraŭ*
 now, *nun*
 afterwards, then, *poste*
 never, *neniam*
 always, *ĉiam*
 forever, *por ĉiam*
 soon, *baldaŭ*
 often, *ofte*
 seldom, *malofte*
 usually, *kutime*

 yes, *jes*
 no, not, *ne*
 very, *tre*
 much, *multe* (very much, *tre multe*)
 well, *bone*
 badly, *malbone*
 better, *pli bone*
 worse, *pli malbone*
 more, *pli* (more than, *pli ol*; but use *pli da* before quantity connotations)
 less, *malpli*
 as - as, *tiel — kiel*
 as much - as, *tiom—kiom*
 as many - as, *tiom multe—kiom*
 how much?, *kiom?*

how many?, *kiom?*, *kiom multe?*
 how?, *kiel?*
 too much, *tro multe*
 too many, *tro multe*, *tro multaj*
 so much, *tiom multe*
 so many, *tiom multe*, *tiom multaj*
 as, like, *kiel*
 so, *tiel*
 besides, furthermore, *plie*, *plue*
 finally, *fine*
 only, *sole*
 almost, *preskaŭ*
 gladly, *ĝoje*, *volonte*
 certainly, *certe*
 at once, *tuj*
 not at all, *tute ne*
 unfortunately, *bedaŭrinde*
 hardly, *apenaŭ*
 aloud, *laŭte*
 suddenly, *subite*
 about, *ĉirkaŭ*
 perhaps, maybe, *eble*
 a little, *iomete*
 again, *denove*
 really, truly, *vere*
 together, *kune*
 at least, *almenaŭ*
 for lack of, *pro manko de*
 a long time ago, *longe antaŭe*
 repeatedly, again and again, *multfoje*
 therefore, *do*, *tial*
 further away, *pli malproksime*
 of course, *komprenoble*
 occasionally, *kelkfoje*

26. Conjunctions.

and, *kaj*
 but, *sed*
 if, *se*
 or, *aŭ*
 why?, *kial?*
 because, *ĉar*

why, *tial*, *pro tio ke*
 before, *antaŭ*
 when, *kiam*
 than, *ol*
 where, *kie*
 until, till, *ĝis*

APPENDIX B

ENGLISH

SPEAKERS AND LOCATION¹

(All population figures are approximate)

Western Hemisphere — U. S. A. — 132,000,000; Canada, Newfoundland and Labrador — 12,000,000;² Alaska 70,000; Bermudas — 30,000; Bahamas — 30,000; Jamaica — 1,200,000; Leeward and Windward Islands — 400,000; British Guiana — 350,000. Official and secondary tongue in British Honduras (60,000); Canal Zone (50,000); Puerto Rico (2,000,000); Virgin Islands (25,000). Widely spoken in Mexico, Greenland, Cuba, Haiti, Dominican Republic, and Spanish and Portuguese-speaking countries of Central and South America.

Europe — Great Britain and Northern Ireland — 47,000,000; Eire — 3,000,000. Official and secondary tongue of Gibraltar (21,000); Malta (270,000). Widely spoken in Iceland and on the European continent, particularly in Belgium, Denmark, France, the Netherlands, Norway, Sweden and Switzerland. Between four and five million continental Europeans speak English.

Asia — Language of colonization in Burma (16,000,000); Ceylon (6,000,000); Cyprus (400,000); Malaya and Straits Settlements (5,500,000); Hong Kong (1,500,000); British India (390,000,000); Palestine (1,500,000);

1. See English map, p. 62.

2. Including some 3,000,000 French Canadian speakers in Quebec and Ontario, most of whom speak English as well.

Transjordan (500,000), etc. It is estimated that English is spoken by over 22,000,000 people in India and Ceylon, 1,200,000 in Burma and Malaya, 1,000,000 in Japan, 3,000,000 in China, 500,000 in the Near East.

Africa — Official, but not primary language of Liberia (2,000,000, of whom 200,000 speak English) and the Union of South Africa (10,700,000, of whom 2,150,000 speak English). Language of colonization in Anglo-Egyptian Sudan (6,500,000); Basutoland (600,000); Bechuanaland (300,000); Gambia (200,000); Gold Coast (4,000,000); Kenya (3,500,000); Nigeria (22,000,000). Nyasaland (1,600,000); Rhodesia (3,000,000); Sierra Leone (2,000,000); British Somaliland (350,000); Southwest Africa (300,000); Swaziland (150,000); Tanganyika (5,300,000); Uganda (3,800,000). Widely spoken in Egypt. The total number of English speakers throughout the African continent is estimated at over 4,170,000.

Oceania — Official and primary language of Australia (7,000,000) and New Zealand (1,600,000). Language of colonization in insular possessions of U. S. and Great Britain having total populations of 2,600,000,³ exclusive of Hawaii (500,000) and the Philippines (16,000,000); in the former, most of the population speaks English, while in the latter over one-fourth (4,260,000) of the population speaks English.

3. Including the Bismarck Archipelago, British North Borneo, Brunei, the Cook, Fiji, Gilbert and Ellice Islands, Guam, Labuan, New Guinea, some of the New Caledonia and New Hebrides Islands, Papua, Samoa, Sarawak, the Solomon Islands, Tonga, etc.

APPENDIX C

MILITARY SLANG

Words and expressions coined by men in the armed services are picturesque, but extremely unstable, being frequently recast, dropped or added to. Some of these terms, however, may easily survive in the post-war period and become part and parcel of the spoken English of one or another section of the English-speaking world. A few such terms that have recently appeared in the press are:

U. S. FORCES (MOSTLY AIR FORCE AND MARINES)

to stew in one's own juice,
to wait for food,
stupid,
object, thing,
a complete miss,
to score a hit,
field shoes.
prisoner,
cigarette makings,
O. K.,
yes-man,
girl friend,
necktie,
hand,
candy,
stop it!,
Messerschmidt,
double fighter-plane attack on
bomber,

to sweat out
to sweat out a chow line
knucklehead
gizmo
Maggie's drawers
to lay it in the black
boon dockers
brig rat
blanket and freckles
ding hau
ear banger
Fifi
field scarf
glom
pogie bait
knock it off!
tailpecker

sister act

BRITISH (MOSTLY R. A. F.)

plane,	<i>kite</i>
bomb,	<i>egg</i>
torpedo bomb,	<i>fish</i>
depth-bomb,	<i>ash-can</i>
machine-gun bullets,	<i>confetti</i>
enemy planes at 10,000 feet,	<i>bandits at ten grand</i>
non-flying airman,	<i>penguin</i>
canteen-loving flier,	<i>canteen cowboy</i>
girl friend,	<i>target for tonight</i>
two-turret tank,	<i>Mae West</i>
commando knife,	<i>smatchet</i>
target,	<i>rhubarb</i>
fed up with,	<i>browned off, brassed off</i>
	<i>cheesed off</i>
to crash,	<i>to prang</i>
here's to you!,	<i>cheers!</i>
to be skeptical,	<i>to take a dim view</i>
real truth,	<i>pukka gen</i>
wrong steer,	<i>duff gen</i>
not to have something,	<i>to have had it</i>

AUSTRALIAN

wife,	<i>trouble</i>
children,	<i>godfers</i>
walk,	<i>whisper</i>
street,	<i>field</i>
tea,	<i>rosie</i>
to play piano,	<i>to fancy fanny</i>

NEOLOGISMS

Definitely linked with the war, but of more widespread application by reason of civilian as well as military use, are terms like *G. I.* (originally "General Issue", applied to articles of military equipment, now used indifferently as a noun to apply to the soldier himself or as an adjective to describe any of his belongings or multifarious activities); *jeep* (said to be from *G. P.*, "general purpose"; this word has recently given rise to such derivatives as *jeepable*, *unjeepable*, *jeepability*, applied to roads and jungle trails); *gremlin*; *blitz* (noun, adjective and verb); *paratroops* and *paratrooper*; *fifth column*; *Quisling* (with a verb, *to quisle*); *selectee*; *war of nerves*; *black market* (with a derivative, *blacketeer*, in which the influence of *racketeer* is clearly perceptible); *flak* (an abbreviation for the German *Flugzeugabwehrkannonen*, anti-aircraft guns) and *ak-ak*. *To liaise* (from *liaison*; "to liaise between Washington and New York"), *to do a Dunkirk* (to retreat hurriedly), and *to coventrize* (from *Coventry*; to demolish completely) have also been reported. *Pill-box*, *fox-hole*, *bazooka*, *bulldozer* are well known.

The language of the underworld on the one hand, that of swing-crazy youthful generations on the other, are rich in neologisms the continued existence of most of which is extremely doubtful. Such innovations consist in part in the coining of new words, but to a much greater degree in changes in the meaning of existing words and combinations.

Three terms from the shady side of life which have recently come to the writer's attention are *mooch*, used not in its older slang acceptance of "to beg", but as a noun to replace *sucker*, the prospective victim of a swindle; *pitch*, the salestalk

of an aggressive salesman or confidence man; and *to run someone* (in the sense of "to chase someone") *with a knife*.

From the youthful and swing-loving angle there is a choicer assortment: *what gives?* ("what's up?"; "how are you?"; the influence of German *was gibt's?* seems perceptible here); *apple-polishing* (currying favor); *corny*, or *off the cob* (silly or sentimental; *to spout corn*, or *to slide one's jib*, is to sentimentalize or to talk too much); *to collapse* (to sit down); *to be cooking with gas* (or *on the front burner*: to be doing well); *to blitz the cold-storage plant* (to raid the frigidaire); *AWOL* (no longer "absent without leave", but "a wolf on the loose"; *wolf* and *wolverine* are themselves new acceptances of age-old terms to denote the more sexily inclined of the two sexes); *burnt to a crisp* (up-to-date); *gruesome twosome* (a pair keeping steady company); *to ice up* (to give the cold shoulder to); *to woof* (to kid or to tease); *to nix* (to get rid of); *do you dig me?* ("do you get me?"). Expressions of approval are legion: *on the beam*, *in the groove*, *groovy*, *hard*, *murder*, *mellow*, *on fire*, *has his boots on*, etc. etc. etc.

From the more professionally musical end of the swing movement come expressions such as *jameroo* or *barrelhouse* (swing session); *'gators* and *hepcats* (fanciers of the new vogue in music); *fave* (favorite); *jive* or *jam anthems* (pieces of swing music); *killer-diller* (musical hit); *black-stick* or *agony-pipe* (clarinet); *voodoo boilers* (drums); *woodpile* (xylophone); and *to lather the moth-box* (to play the piano).

Terms like *boondoggle* and *gobbledigook* represent the recent contribution of politics to the language.

All that can be said of the above items is that they are illustrative of the growth and decay of language. The overwhelming majority of them are destined to an ephemeral life, being replaced almost as soon as they are born by new expressions that quickly gain and lose popularity. A few will find literary favor in the eyes of newspapers and magazines, become generalized throughout the English-speaking world by reason of the press, movietone and radio, and ultimately pass into the vocabulary of the standard English of the future.

A GLOSSARY OF GRAMMATICAL AND LINGUISTIC TERMS

(with partial index)

ablative — *see case*

absolute — *see case*

abstract — *see noun*

accent — voice-stress or voice-energy bearing upon a given part of the word; in a word like "absolute", the accent falls on the first syllable; in "European", on the next to the last; in "delay", on the last. Frequently a sentence-stress appears as well as a word-stress; in the sentence "I have done it, not *you*", the words "I" and "you" bear a special stress. Some languages have more stress than others; English, for instance, has a stronger stress than French. For the accentuation of various languages, *see pp. 67, 89, 127, 173, 187, 229, 272, 315, 323, 330, 354, 361-2, 366, 368, 371-2, 374-5, 379-81, 384, 396, 423, 427, 432, 436, 438, 440, 444, 447, 451, 465, 487, 508, 533.* **Pitch**, or **pitch-accent**, is simply a musical rise in the tone of the voice, as when an Englishman says: "Did you really?" Pitch and stress are usually both present in any given tongue, but in different proportions. For the significant value of pitch in some languages, *see pp. 92, 98, 102, 354, 372, 444.* *See also tone.*

accent-mark — the written symbol used, in some languages, to indicate where the stress falls (as in Spanish *acción*, Italian *città*), or to show that the vowel over which it appears is to be given a special sound (as in French *parlé, fête, fidèle*). The more usual accent marks are the acute (´), the grave (`) and the circumflex (ˆ). For the different values of accent marks in various tongues, *see pp. 105, 173, 184, 187, 229, 272, 302, 315, 330, 361, 366, 368, 370-1, 423, 432, 436, 440, 444-5, 449, 494.* *See also diacritic.*

accusative — *see case*

active — *see voice*

address, forms of — in English, it is customary to use the same form of address in the singular and in the plural, familiarly or politely (*you have seen it*); in many languages, however, a distinction is made between a singular and a plural "you" (French *tu l'as vu; vous l'avez vu*, or archaic English *thou hast seen it; ye have seen it*); a distinction

is also made in many languages between a person or persons whom one wants to address familiarly, and a person or persons whom one wants to address politely; often the polite singular form coincides with the familiar plural (French *vous l'avez vu* can serve as a familiar plural, as when a mother addresses two of her children; as a polite singular, as when a tourist addresses a stranger; or as a polite plural, as when a tourist addresses two or more strangers); in other languages, special polite forms appear, generally with a form of the verb other than the second person (Spanish *usted lo ha visto*, for which the closest English literal equivalent would be "Your Honor, your Grace, has seen it"; or German *Sie haben es gesehen*, literally, "they have seen it"; or Italian *Lei*, or *Ella l'ha visto*, literally, "she has seen it"; the capitalization of *Sie* and *Lei* is merely a written-tongue convention). For the forms of polite address in various languages, see pp. 94, 100, 113, 133, 177, 192, 205, 234, 245, 248, 278, 391, 397, 538, 542-3. Certain languages, like Japanese, have, in addition to a familiar and a polite form of address, also an **honorific** one, reserved for cases where one wishes to be superlatively polite (see pp. 536, 538, 547). Compare with the various gradations of politeness implied in French *ton père, votre père, monsieur votre père*; in Italian *tuo padre, vostro padre, Suo padre, il Suo signor padre*; etc. The Japanese use of completely different verbs to express familiarity, politeness or special honor might be remotely compared with such English expressions as: "Buddy, did you get a look at the enemy?"; "Lieutenant, did you see the enemy?"; "Did your Excellency discern the enemy?"

adjective — a word used with a noun to describe it (in which case it is called a **descriptive** adjective: "the *large* book") or to limit it (in which case it may be **demonstrative**: "*this* book"; **possessive**: "*my* book"; **indefinite**: "*any* book"; **interrogative**: "*which* book?"). In some languages, the possessive adjective is accompanied by the definite article (Italian *il mio libro*, literally, "the my book"; see pp. 280, 322). **Numerals** ("two books") and **articles** ("a book", "the book") may also be said to fall under the heading of adjective insofar as they limit nouns. **Participles** are frequently used as adjectives ("the *speaking* man", "the *spoken* word"). For the peculiarities of adjectives in certain language-groups, see pp. 24, 35, 42.

The descriptive variety of adjective may modify its noun directly (in which case it is called **attributive**: "the *strong* man"); or indirectly, through the verb "to be" (in which case it is called **predicate**: "the man is *strong*"; see pp. 112, 131, 188, 231, 235, 384, 394, 437, 468, 497, 548). Furthermore, it may appear in three **degrees**: **positive** (strong, beautiful); **comparative** (stronger, more beautiful); **superlative** (strongest, most beautiful); for the formation of the comparative and superlative

in various tongues, see pp. 175, 276, 318, 363, 385, 424, 433, 441, 452, 468, 477, 497-8, 512.

In English, the adjective, save for the degrees of comparison described above, is **invariable**; that is, it does not change its form to conform with the gender and number of the noun (compare English *strong man, strong woman, strong men, strong women* with French *homme fort, femme forte, hommes forts, femmes fortes*). In many languages, notably of the Indo-European and Semitic groups, **agreement** prevails (see **agreement**); in some languages, the adjective **agrees** in the attributive, but not in the predicate position (German *guter Mann* vs. *der Mann ist gut*); most Germanic languages have two different forms for the attributive adjective, a "strong" and a "weak" form, according to what precedes the adjective (German *ein guter Mann* vs. *der gute Mann*; see pp. 93-4, 99, 106-7, 112, 131, 134).

For adjectives of **nationality** ("an English book"), see pp. 187, 218, 260, 305, 344, 412-3, 565.

In many languages, there is no clear-cut difference in form or use between certain adjectives and related nouns (English "put this letter in the *mail*"; "put this letter in the *mail-box*"); or even between adjectives and related verbs (pp. 496, 548).

See also: **agreement, case, classifier, declension, ending, gender, inflection, number.**

adverb — a word that modifies a verb ("he walked *slowly*"), an adjective ("a *very* good book"), or another adverb ("he walked *very* slowly"); the adverb usually shows time (tomorrow), place (here) or manner (badly). In English, many adverbs are formed from adjectives by the addition of the adverbial suffix *-ly* (slow, slowly); in other languages, similar suffixes are added (French *lent, lentement*); while others make no distinction of form between the adjective and the adverb (German *er ist langsam*, "he is slow"; *er geht langsam*, "he goes slowly"; see pp. 131, 175, 385, 427, 497); this occurs occasionally in English ("shoot straight"; "go slow"). For the formation of adverbs in various languages, see pp. 35, 190, 231, 276, 318, 363, 424, 497.

adverbial expression — a group of words fulfilling the same function as a single adverb ("from time to time" = "occasionally": "over there" = "there"; "in a poor way" = "poorly").

affiliation — see **classification**

affirmative — see **conjugation**

affix — see **prefix, suffix**, and pp. 507-8

agglutination — the process of adding suffixes to roots to indicate various relations of gender, number, case, etc. In English, this process is carried on to a moderate degree (*empr-ess-es*, where *-ess-* indicates feminine gender and *-es* plural number; or *sky-wards*, where *-wards* indicates direction). In the languages properly described as

agglutinative, the process goes much further, with the added feature that the suffixes have greater independence, individuality and mobility (Hungarian *Magyar-ország-ban*, literally "Magyar-land-in", "in Hungary"), See pp. 24, 30, 32-3, 430, 437-8, 440-1.

agreement — the process whereby one part of speech, used in conjunction with another, changes its form to conform with the other; this applies especially to adjectives which, in many languages, "agree" in number and gender with the noun they modify (French *le haut mur, la haute maison, les hauts murs, les hautes maisons*); and to verbs, which agree with the subject in number and person, occasionally in gender (Spanish *yo hablo, ellos hablan*; English *I am, you are, he is*). In English, the adjective does not agree, while the only form of the verb that normally shows a change of ending to indicate agreement is the third person singular of the present (*he comes vs. I, you, we, they, come*). In languages, like Chinese, which do not use endings, there is no agreement of any kind. For various forms of agreement, see pp. 132, 136, 190, 203, 326, 384, 424, 467-8; for non-agreement, see p. 441.

alphabet — a set of letters or symbols purporting to represent in writing the sounds of a language; an alphabet differs from a syllabary in that the symbols of the alphabet are supposed to represent single vowel and consonant sounds, while the symbols of a syllabary represent complete syllables. The ideal, or phonetic alphabet is one in which each symbol has only one possible sound, and each separate sound is represented by a symbol; some alphabets, like the Spanish and Finnish, come close to this ideal state; others, like the English or French, are far removed from it, with individual symbols having several different sound-values (English *a* in *bat, ball, fare, father*), and single sounds represented by combination of symbols (English *shoot, this*). The alphabetic notation used by most western nations is called Roman. For various alphabetic notations, see pp. 19, 25, 27, 92, 98, 105, 110, 124-5, 172-3, 184-5, 227-8, 270-1, 313-4, 354-61, 368, 371, 378, 422, 426, 432, 436, 450-2, 461-2, 479, 528, 583. For individual alphabetic system, see:

Arabic, 440, 461-2, 507, 513

Canarese, 461

Cyrillic, 354-60, 371-2, 374-5, 378

Devanagari, 19, 461-2, 485, 504

Gothic, 98, 124-5

Greek, 354, 422, 426

Hebrew, 25, 27, 461-2

Irish, 448-9

Phoenician, 461, 489

Roman, 98. 354-5, 357, 366, 369, 371-2

Romanized, 461-2, 507, 513, 528

Tamil, 461, 485-6

Telugu, 461, 485

See also **picture-writing**, **syllabary**.

analysis — see **simplification**

animate — see **noun**

antecedent — see **pronoun (relative)**, and pp. 243, 471, 543

aorist — see **tense**

apostrophe — a mark indicating, usually, the omission of a letter (English *môther o' mine*; French *l'homme*); see pp. 187, 315.

apposition — see **noun**

archaic (obsolete) — ancient or antiquated; no longer in use; as applied to a word or form, it means that the latter was once in current use, but has now dropped from the language (English *loveth* for *loves*; forms like *'sblood!*, *'sdeath!*). An **obsolescent** form is one which is not yet obsolete, but is falling into disuse (English *graveyard*, generally replaced by *cemetery*). See pp. 19, 287, 289, 353, 446.

article — a form used with a noun, to give it a **definite** or an **indefinite** value (*the man*, *a man*); in English, *the* is the definite, *a* or *an* the indefinite article. Most western languages have the equivalents of both, though the rules for their use are far from uniform (English, "liberty is precious"; French, "la liberté est précieuse"; English, "Spanish is an easy language"; Spanish, "el español es una lengua fácil"; English, "he is a doctor"; Italian, "è medico"). Some languages, like Russian, dispense with both; others, like Greek, have a definite, but no indefinite article (see pp. 361, 368, 381, 423, 440, 450, 496, 534). In several languages (Swedish, Roumanian, Bulgarian, etc.), the definite article, instead of coming before the noun, follows it and is attached or "suffixed" to it in writing (Roumanian *cal-ul*, literally "horse-the"; see pp. 89, 170, 174, 374-5, 427, 452, 467). In many languages, the article combines with certain preceding prepositions (French *du livre*, "of the book", with *du* representing a contraction of *de le*, "of the"; see pp. 163, 188, 221, 272, 274, 317). In some languages, the article is used before the possessive adjective or pronoun (Italian *il mio libro*, lit. "the my book"; *voglio il mio*, lit. "I want the mine"; see pp. 134, 280, 322).

aspect — in several languages, notably the Slavic, verbs are divided into two classes: **perfective** (indicating an action as completed) and **imperfective** (indicating an action as uncompleted). This may be somewhat remotely compared to English "I *spoke* to him yesterday" (where it is implied that the action of speaking was finished at the time mentioned) vs. "I *was speaking* to him when you came in" (where the action of speaking was left suspended). See pp. 353, 364, 390, 395, 437.

aspiration — the pronouncing of a consonant with a puff of breath immediately following it, as in English *pin* (*p* + *hin*) as against *spin*; see pp. 446, 449–51, 494.

assimilation — the change whereby one sound becomes identical with another; especially in the case of a consonant preceding another, and changing so as to conform with the other, as happened when Latin *septem*, *octo* became Italian *sette*, *otto*; see p. 467.

attributive — see **adjective**

auxiliary — a “helping” word, usually a verb, which helps another verb to show time, mood, etc. (English *have* in “I have spoken”, *will* in “he will go”, *be* in “to be heard”; see pp. 22, 139, 235, 517–8). **Modal auxiliary** is a term used especially in the grammar of the Germanic tongues to indicate all the verbs used to show the manner of the action shown by the main verb (English *can*, *may*, *ought*, *must*; German *dürfen*, *sollen*, *wollen*, *werden*, etc.; see pp. 137, 142). For **auxiliary numeral**, see **classifier**.

back vowel — see **vowel**

bilingual — speaking two languages, as a French Canadian who speaks English in addition to his native French, or a Belgian speaking both French and Flemish, or a South African speaking both English and Afrikaans; see pp. 16, 47, 49, 77.

borrowed words — see **loan-words**

breathings — special marks used in ancient Greek to indicate the aspiration or non-aspiration of certain vowels and consonants; see p. 422.

capital — while capitals exist in all languages using the Roman or similar alphabets (Cyrillic, Greek, Gothic, etc.), and are generally used at the beginning of the sentence, they are not always used identically in other connections; German, for instance, capitalizes all nouns, common as well as proper (*der Hund*, “the dog”); French does not capitalize adjectives of nationality (*un livre français*, “a French book”). For the different use of capitals in various languages, see pp. 98, 124, 159, 187, 218, 248, 260, 305, 331, 344, 412–3.

cardinal — see **numeral**

case — broadly, the grammatical function of a noun or pronoun in the sentence, as when we say that in the sentence “the boy is here”, “boy” is in the nominative or subjective case, while in “I see the boy”, “boy” is in the accusative or objective case. But often the distinction is one of form as well as of function or use; a **case-form** is a specific variant of the noun, adjective or pronoun, specifically indicating by its appearance (usually by its ending) the function which it is supposed to have in a sentence (subject, direct object, indirect object, etc.). English has no separate case-forms for adjectives; only two forms for nouns that differ from the general form (the possessive,

or genitive, singular and plural: "the *boy's* book", "the *boys'* books", as against the general forms *boy*, *boys*); and as many as three for some pronouns (nominative or subjective, *I*, *who*; genitive or possessive, *my*, *whose*; accusative or objective, *me*, *whom*). Certain languages, particularly of the Indo-European group, have numerous case-forms for nouns and adjectives; where these exist, the following are the most common:

nominative (or **subjective**) — usually indicates that the noun or pronoun is the subject or a predicate nominative; Latin "*puer est bonus*", "*Romulus est puer*"; see pp. 23, 128, 388, 479-80.

genitive (or **possessive**) — indicates, among other things, ownership; English "the *boy's* house"; Latin "*domus pueri*"

dative — generally indicates that the noun or pronoun is an indirect object; English "I give *the boy* the book" (but note that in this sentence it is the position of "the boy", not its form, that tells us it is an indirect object); English often marks the dative by the preposition *to* ("I give the book *to the boy*"); Latin "*puero librum do*".

accusative (or **objective**) — indicates, usually, the direct object; in English "I see the boy", it is only the position of "the boy" that tells us it is a direct object, but in "I see him" we have the specific accusative form *him*, as well as the position; Latin "*puerum video*".

vocative — the form used in direct address; Latin "*quid agis, Petre?*" ("what are you doing Peter?"); see pp. 362, 374.

ablative, **instrumental** and **locative** indicate a variety of functions which English generally expresses by the use of prepositions; the ablative, originally, indicated *removal from*, or *direction away from* ("I took the book *from the boy*"); the instrumental, means by which ("I write *with a pencil*"); the locative, place where ("he is *in the city*"). These functions are merged in many languages (Latin, where the ablative takes over both instrumental and locative functions). The use of case-endings originally permitted Indo-European speakers to dispense with prepositions, but in many languages today both case-endings and prepositions are used.

The **prepositional** case of the Slavic languages is another term for the locative, used because, while prepositions appear in connection with other cases, the locative is the only one which cannot be used without a preposition.

The **absolute** case of Japanese (see p. 535) isolates the noun grammatically from the rest of the sentence (English "your brother, did he come today?").

The **oblique** case, in certain languages, represents a merger or falling together of the former cases outside of the nominative, which remains distinct in form (see pp. 479-80).

When the terms case and case-forms are applied to languages

outside of the Indo-European group, they are generally loosely used to indicate something analogous or similar, but not quite identical (*see* pp. 432-3, 436, 535).

See also pp. 89, 128, 170, 173-4, 353, 362, 369, 374, 382, 388-90, 423-4, 427, 432, 436, 440, 443-4, 447, 449-51, 479-80, 497, 510, 527, 535; and **declension, ending, inflection**.

caste — a hereditary social class; for the influence of the caste-system on language, *see* pp. 33, 487.

causative — *see* **conjugation**

cedilla — a mark placed under the letter c (ç) to indicate that it is to be given a special sound, usually that of s (pp. 187, 270), but occasionally another (p. 440). For the use of the cedilla under letters other than c, *see* pp. 173, 440. It is a curious fact that the cedilla was first used in Spanish, which later dropped it.

classification (or **affiliation**) of languages — the process of establishing the family relationship of a language, the larger group to which it belongs; *see* pp. 18-39, 455.

classifier (or **determinative**) — in certain languages, notably Chinese, a word which accompanies other words for the purpose of clarifying their meaning and identifying them as belonging to certain groups, like English "head" in "fifty head of cattle"; *see* pp. 495, 499, 504, 550-1.

clause — a simple sentence which serves as part of another, longer sentence; in a sentence such as "I spoke to the man whom I met yesterday", "I spoke to the man" is the **main** or **principal clause**, "whom I met yesterday" the **subordinate clause**, while the sentence as a whole is described as **complex**. Occasionally the two clauses are not one subordinate to the other, but equally independent; they can be detached from each other and each used separately as a complete **simple sentence**, as in "I met the man yesterday and I spoke to him". In this case, the sentence is called **compound** and the two clauses are described as **co-ordinate**; *see* pp. 127, 203, 220, 240, 263, 286, 329, 347, 353, 540-1, 543.

collective — *see* **numeral**

colloquialism — *see* **slang**

colonizing language (or **language of colonization**) — the tongue of a colonizing nation, which implants itself in another country, and is spoken by a minority composed of officials, soldiers, traders, missionaries, etc. Where the native population is sparse, and the colonizing tide heavy, the colonizing language may become the tongue of the majority of the inhabitants, as is the case with English in the United States, Australia, New Zealand and Canada. Elsewhere, it may remain a minority language, as is the case with English in

British India. See pp. 25, 35-9, 40, 43, 49, 51, 53, 55-64, 81-7, 122-3, 167, 182-3, 226-7, 244-6, 268-9, 312-3, 351, 376-7, 455-6, 459, 524-6, 609, 610.

common — see **gender, noun**

comparative — see **adjective**

complex — see **clause, sentence**

compound forms — words like *steam-boat, railroad, upgrade, etc.*, where two separate elements enter into the composition of the one word; see pp. 353, 487-8, 496, 532.

compound object pronoun — see **pronoun**

compound sentence — see **clause, sentence**

compound tense — see **tense**

concrete — see **noun**

conditional — see **tense**

conjugation — either an arrangement of the forms of a verb, or a set of verbs having the same inflections. English has only two conjugational types, the **strong** and the **weak** (see **verb**); in other languages, notably the Romance, verbs are divided up among several distinct conjugational types (Spanish *-ar, -er, -ir*; see pp. 178, 196, 233, 281, 323, 425, 472, 507). In addition to conjugational types, we may speak of a verb as being conjugated, or presented, in many ways:

affirmative (states) — *I see, you see, he sees, etc.*; see p. 487.

negative (denies) — *I do not see, you do not see, etc.*; see pp. 434, 441, 545-6, 549.

interrogative (questions) — *do I see?, do you see?, etc.*; see pp. 428, 474, 501, 512, 535, 545.

progressive (indicates an action going on) — *I am speaking, I was speaking, I shall be speaking, etc.*; see pp. 137, 239, 282, 288, 323, 475, 518, 541.

reflexive (indicates that the subject acts on himself) — *I see myself, etc.*; see pp. 178, 201, 239, 285-6, 328, 335, 393, 441, 501.

reciprocal (two or more subjects acting on each other, therefore can be used only in the plural) — *we see each other, etc.*; see p. 441.

causative (indicates that the subject causes something to be done, or somebody to do something) — see p. 441.

conjunction — a word which connects other words or clauses, like English *and, but, if, since, though*; see p. 513.

consonant — a sound characterized by friction, squeezing, or stoppage of breath in some part of the mouth, or a letter representing such a sound; 21 of the 26 letters of the English alphabet (omitting *a, e, i, o, u*) are loosely described as consonants; see pp. 29, 37, 86, 126, 186, 228, 353, 361, 380, 461-2, 487-8. For **aspirated consonants**, see **aspiration**, and p. 494; for **broad and slender consonants**, in Irish, see pp. 446, 449; for **emphatic consonants**, in Arabic, see pp. 465-6; for **palatal consonants**, see pp. 353-4, 380, 446. For **double consonants**, see

pp. 172, 270, 315, 329, 432, 434, 436, 466, 487, 532 (note that in some languages the written double consonant is pronounced single, as in English *butter*; in others, it is definitely given a double, or "long" pronunciation, as in Italian *otto*). For **voiced** and **unvoiced** consonants, see pp. 380, 494, 531 (the voiced consonant is pronounced with, the unvoiced without vibration of the vocal cords; there is no difference between *t* and *d*, *p* and *b*, *k* and *g*, save that the first member of each pair has no vibration of the vocal cords, while the second has).

coordinate — see **clause, sentence**

copulative — see **verb**

cultural language — see **secondary language**

cunelform — wedge-shaped; the type of writing used by the Babylonians, Assyrians and ancient Persians, who pressed wedge-shaped writing instruments into wet clay; see p. 489.

dative — see **case**

declension — the various forms taken by a noun, adjective or pronoun to indicate case, number, gender, etc.; see pp. 88, 353, 362, 369, 382, 394, 423-4, 443-4, 507; see also **case, ending, gender, inflection, number**.

definite article — see **article**

demonstrative — a form that indicates or points out, like *this, that*; see **adjective, pronoun**.

derivative — a word that comes from another, as *undo* from *do*, *machinist* from *machine*, etc.; see p. 515.

descriptive — see **adjective**

desiderative — see **voice**

determinative — see **classifier**

diacritic mark — a mark accompanying a letter of the alphabet to indicate that it is to be given a special pronunciation. The **accent marks** (*q. v.*) are diacritics; so is the **tilde** of Spanish appearing over the *n* (*ñ*), the **hook** appearing under *a* and *e* in Polish to indicate nasalization (*ą, ę*), etc.; see pp. 366, 370, 440, 444, 531, 583.

diaeresis — two dots over a vowel to indicate that it is to be separated from the preceding or following vowel, and not to form a diphthong with it, as in French *naïf*, *Noël*, Spanish *averigüe*, English *zoölogy*, etc.; see p. 187.

dialect — a local form of speech, differing to a greater or lesser degree from the standard national or literary language; see pp. 33, 38, 51, 61, 64-7, 85-6, 168, 170, 172, 244-6, 268-70, 329-30, 427, 451-2, 455-8, 465, 488, 491-3, 507, 532. See also **standardization**.

diminutive — a derivative form indicating, usually by means of a special suffix, a small or dear variant of the object in question, as English *lambkin* (from *lamb*), *eaglet* (from *eagle*), *kitten* (from *cat*), or Spanish *cigarrillo* (from *cigarro*). Some languages, like Dutch,

Spanish and Italian, are more prone to use diminutives than others; within the same language, some sections are occasionally more prone to use diminutives (Mexico, for example, uses more than Spain). See pp. 128, 289.

diphthong — “two vowels pronounced as one”, either for what concerns sound (as in French *ai*, which is equivalent in sound sometimes to *è*, sometimes to *é*; but this is more exactly described as a **digraph**); or for what concerns the combination of the two vowel-sounds in the same impulse of the voice (as in Spanish *híerro*, where there are two separate sounds, but pronounced in one syllable). See pp. 184, 287, 493. See also **syllable**.

direct object — see **object**

dissyllabic — consisting of two syllables, like English *pretty*; see p. 507.

dual — see **number**

eclipsis — a phenomenon appearing especially in the Celtic tongues, whereby an initial consonant changes by reason of the original final sound of the preceding word, which is generally lost; see pp. 446, 449. See also **lenition**.

emigrant language (or **language of emigration**) — the tongue carried by emigrants from one country to another, and continuing to be spoken in communities made up of emigrants, like Italian in New York's Little Italy. See pp. 122-3, 312-3, 352, 377, 492, 526.

ending — that part of the word which does not belong to the root, but indicates gender, number, case, person, tense, mood, etc., like the *-s* in “he takes”, the *-d* in “I loved”, the *-en* in “oxen”, French *-es* in *grandes*; see pp. 18, 30, 32, 88, 131, 170, 381, 394, 426, 434, 451, 496. **Case-endings** appear in languages where a case-system is used, like Latin *murus, muri, muro, murum, mure, muro*; see pp. 22, 33, 89, 362, 382, 479-80, 535; see also **case, conjugation, declension, gender, inflection, number, possession, suffix, tense, voice**.

familiar form of address — see **address**

feminine — see **gender**

fraction, fractional — see **numeral**

front vowel — see **vowel**

future, future anterior, future perfect — see **tense**

gender — the classification of nouns according to sex, real or fancied, or according to their denoting animate or inanimate objects, or according to other concepts, such as that of caste. English has a “natural” system of gender (male beings are **masculine**, female beings **feminine**, inanimate objects **neuter**, while the common gender is a rather vague entity including animate beings whose sex is unknown to the speaker). Some languages (Latin, German, Russian) have “grammatical” gender, whereby, even though a masculine-feminine-

neuter classification exists, inanimate objects may be masculine or feminine as well as neuter (note a survival of this in English when a ship is referred to as "she"); other languages (Romance, Celtic, Semitic) have reduced their gender system to a masculine-feminine classification, with inanimate objects divided up between those two genders; others (Dutch, Scandinavian) make, in practice, only a division of animate (common) and inanimate (neuter), but with numerous animate objects in the "neuter" gender and inanimate objects in the common gender; others (Hungarian, Japanese) make no distinction of gender whatsoever; while others (Dravidian) have a gender system based on social caste (pp. 33, 487). See pp. 24, 31-3, 37, 88, 128, 170-1, 173, 175, 188, 230, 274, 316, 353, 361-2, 381, 423-4, 427, 430, 432, 436, 440, 446, 452, 463, 466, 477, 480, 487, 496, 504-5, 510, 534.

genitive — see case

gerund — a form of the verb used as a noun. In English the gerund ends in *-ing*, and there is no distinction in form between the gerund (*walking is good exercise, I like walking*) and the present participle (*he is walking, the walking man*), though the functions are quite distinct (the gerund is used as a noun, the present participle as an adjective). Other languages use distinct forms (Italian *parlando, siamo usciti*, "while speaking, we went out"; but *l'uomo è un animale parlante*, "man is a speaking animal"). The English gerund may be used alone, as subject or object (*walking is good; I like walking*) or after prepositions (*without walking*); in many languages, notably of the Romance group, these functions are taken over by the infinitive (Spanish *el hablar me gusta; sin hablar*); and the only function left for the gerund is to translate "by" or "while" doing something, as in the Italian example above. See pp. 239, 282, 321, 323, 353, 393, 444.

glottal stop — a "catch in the voice", or a complete shutting off of the breath-stream, usually before a vowel (German *die Eier, der Arme*). The glottal stop appears as a regular sound (phoneme) in Arabic and Malay (pp. 466, 508). It appears occasionally and accidentally in English (*coöperate*).

grammatical structure — the sum total of the features of a language (other than its sounds and its vocabulary), such as the way in which it forms and arranges its parts of speech, etc. See pp. 64, 67, 245, 353-4, 419, 429-30, 495.

hieroglyphic — the system of picture-writing of the ancient Egyptians. See pp. 29, 489, and **picture-writing**.

hiragana — one of the two Japanese syllabaries; see pp. 527-31, 539.

honorific — see address

identification of languages — the process of determining with what language, spoken or written, we are faced; see pp. 13, 15, 67, 72-3, 76,

102, 109, 116, 172, 178, 366, 369-70, 372, 375, 426, 434, 438, 442, 444, 451, 453.

ideograph — see **picture-writing**

idiom (or **idiomatic expression**) — a construction peculiar to one language, which cannot be directly or literally translated into another, and the meaning of which cannot be gathered from its component parts; e. g., English “look out” in the sense of “be careful”; literally translated into most other languages, it will convey only its primary meaning of “look outside”.

imperative — see **mood**

imperfect — see **tense**

imperfective — see **aspect**

impersonal — see **verb**

inanimate — see **noun**

indeclinable — see **invariable**

indefinite — see **article, adjective, pronoun**

indicative — see **mood**

indirect object — see **object**

infinitive — the form of the verb which indicates the action without reference to a subject. In English, the infinitive consists of the verb-root preceded by *to* (“to go”; *to* is omitted after certain verbs, like *can, may*). Other languages use a specific ending (French *aimer, finir, vendre*); others do not have a specific infinitive, but make use of other forms of the verb when they want to indicate the action in general (pp. 472, 539). For certain constructions with the infinitive, see pp. 233, 279, 321. Portuguese has a “personal” infinitive, with personal endings, corresponding roughly to such expressions as “for me to do”, “for you to do”, etc.; see pp. 284, 307. For the use of the infinitive in many languages as the equivalent of the English gerund, see **gerund**.

inflection — the process of change of endings in those forms (nouns, adjectives, pronouns, verbs, adverbs) which are composed of a root and an ending. English, for instance, inflects a noun like *boy* by adding *'s* for the possessive, *-s* for the plural, *-s'* for the possessive plural; it inflects a pronoun like *I* by changing it to *my* or *mine* in the possessive, *me* in the objective, *we* in the subjective plural, *our* or *ours* in the possessive plural, *us* in the objective plural; it inflects an adjective like *strong* by adding *-er* for the comparative, *-est* for the superlative; it inflects a verb like *love* by adding *-s* in the third person singular present, *-d* in the past, *-ing* in the present participle. Some languages, like Latin or Russian, inflect the noun, adjective and pronoun to a far greater degree than does English; others, like Chinese, have no inflection at all, but indicate all relations by separate words; such languages are called *isolating*, since no two meanings are combined

in any single word, but each meaning is "isolated" in a separate word; compare the English isolating "I" "shall" "love" with the Spanish inflected *amaré*. See pp. 23, 25, 89, 170, 353, 463, 487-8, 496, 504, 507, 526-7. For various types and forms of inflection, see also **adjective, case, conjugation, declension, ending, gender, mood, noun, number, possession, pronoun, tense, verb**. For the change from inflection to isolation, see **simplification**.

Instrumental — see **case**

interjection — a word isolated from the rest of the sentence, and used as an exclamation, like English "ah!", "oh!", "golly!", etc. See p. 514.

international language — either a language deliberately built for international use (like Esperanto, Volapük, Interglossa, etc.) or a national language adapted for international use (like Basic English or Interlingua); see p. 580.

interrogative — see **adjective, conjugation, pronoun**. Interrogation or inquiry is indicated in English by an interrogative word ("who did it?"); by an inversion of verb and subject ("is it?"); by the use of *do* as an interrogative auxiliary ("do you see it?"); or simply by a note of the voice ("you went there yesterday?"). Many languages use the first two and the last of these devices (the use of *do* as an auxiliary is typically English). For the written languages, note the Spanish use of an inverted question mark at the beginning of an interrogation (*¿lo vió Ud.?*), and its use of a written accent on many interrogative words (*¿cuándo lo vió?*). Some languages, like Chinese and Japanese, use special interrogative words and constructions (see pp. 501, 545).

intonation — see **pronunciation**

intransitive — see **verb**

invariable (or **indeclinable**) — unchanging in form. The adjective in English is invariable for what concerns gender and number (but not for what concerns degree), whereas in French it is variable, or inflected (*haut, haute, hauts, hautes*). In isolating languages, like Chinese, all words are invariable. See pp. 437, 441, 452, 504.

isolating — a type of language, like the Chinese, consisting exclusively of roots to which no suffixes or endings are added, so that each word is "isolated" and depends for its meaning on its position in the sentence.

kana — the Japanese system of writing, particularly the syllabaries (*hiragana, katakana*). **Kana majiri** is the full system of writing, combining Chinese ideographs and the syllabaries. See pp. 526-31.

katakana — one of the two Japanese syllabaries; see pp. 527-31, 540.

lenition (or **mutation**) — changes undergone by consonants,

particularly in Celtic, by reason of position between vowels. See p. 446. See also *eclipsis*. For another meaning of *mutation*, see *umlaut*.

liaison — see *linking*

lingua franca — in the Middle Ages, a term describing a language spoken in the Mediterranean basin, consisting of Italian, with additions from other sources (Arabic, French, Greek, etc.), and serving as a tongue of general intercourse for the peoples in that area, especially traders and soldiers. Today the term is applied to any language of general intercourse serving a wide multilingual area (Pidgin English, Malay, etc.). See p. 459 and *trade language*.

linguistic minorities — groups of speakers of one tongue, living in a political subdivision in which another tongue has more speakers. The tongue of the linguistic minority may, however, be co-official with the majority language, as is the case with Rumansh in Switzerland, French in Canada, and Spanish in New Mexico; or it may be spoken in a section of the country, without official recognition, like Slovenian in northeastern Italy; see pp. 47-8, 122-3, 352, 376-7, 419.

linking (or *liaison*) — the carrying over of the final consonant of one word to the initial vowel-sound of the next, as in French *les amours*, or Italian *con essi*; the two words are thereby pronounced as a single word, with syllabic division accordingly (*lé za mour; co nes si*). Linking occurs most frequently in the Romance languages, with the added feature in French that it causes a final consonant to be pronounced that would otherwise be silent (see p. 186). In German, linking is normally prevented by the *glottal stop* (*q. v.*); in English, incorrect linking is occasionally heard (*Long Island*, pronounced *Long Gisland*).

literal translation — a word-for-word rendering of one language into another; often possible, in simple constructions and in related languages; generally more difficult as the construction becomes longer and more involved, and as the languages diverge; see pp. 18, 172.

literary language — see *written language*

liturgical — pertaining to religious service. Latin is used as a liturgical language in the Roman Catholic Church, regardless of the country's spoken tongue; classical Arabic is similarly used among Moslems; Sanskrit among Buddhists, even in Japan. See p. 29.

loan-word (or *borrowed word*) — a word which one language has taken from another. Some languages are relatively free of loan-words; others, like English, Persian, Albanian, Armenian, have borrowed over 50% of their total vocabulary. Depending on the time and circumstances of the borrowing, the loan-word assumes a more or less native appearance in the borrowing tongue; English, borrowing Italian *balcone* in the Renaissance, turned it into *balcony*, and the memory of the borrowing is popularly lost; *spaghetti* and *broccoli*, on the other hand,

are recent arrivals, and their foreign, unmodified form easily identifies them as loan-words; the same word is sometimes borrowed twice, at different periods, like *macaroon* and *macaroni* (Italian *maccheroni*), or *saloon* and *salon* (French *salon*). See pp. 63, 77-9, 80-87, 90, 172, 378, 421, 426, 428, 440, 456, 462, 480-1, 507, 526, 542, 549-50.

locative — see **case**

main clause — see **clause**

masculine — see **gender**

middle vowel — see **vowel**

military influence — the coming into the language of words having their origin in warfare and soldiers' slang, like English *G. I.*, *jeep*, *bazooka*, or French *poilu*; see pp. 225, 528, 611.

modal auxiliary — see **auxiliary**

monogenesis — the theory that all the world's languages go back to a single common ancestor; originally embodied in the Biblical account of the Tower of Babel, it was popularly held for a long time, with Hebrew as the supposed original language, and led to very strange etymologies and derivations of words and grammatical forms on the part of medieval and Renaissance linguistic scholars; discarded in the 19th century, it has recently reappeared in the writings of a few linguists, notably A. Trombetti, but has not met with much favor in linguistic circles. See p. 18.

monosyllabic — consisting of a single syllable, like English *do*, *go*, *for*, *what*. Some languages, like Chinese, in their present state, consist exclusively of monosyllabic roots (which may, however, be combined into two, three and even four-word compounds having a single meaning). See pp. 32, 129, 487-8, 504-5, 507.

mood (or mode) — distinction of form or meaning in a verb to express the manner in which the action denoted is thought of (see pp. 172, 425-6, 434, 437, 499, 538). In English, we speak of an **indicative mood** (representing the action as a definite fact: "I am", "he loves"); a **subjunctive mood** (representing the action as hypothetical or subordinated to another action: "whether he be", "if I were"); and an **imperative mood** (expressing a command or an exhortation: "write to him", "let us go"). The subjunctive mood in English is to a large degree a grammatical name rather than an actuality, because outside of the verb *to be*, the overwhelming majority of subjunctive forms coincide with their indicative counterparts; this is not true of many other languages (see pp. 141, 203, 220, 240, 263, 286, 329, 347, 393). For the imperative, see pp. 127, 472, 542. Some languages boast of an **optative mood**, used primarily to express a wish ("would that he were here!" see p. 441). It may be added that in the case of languages having **desiderative**, **causative** and other similar forms, the **assigning**

of such forms to mood, voice or conjugation is not always easy (*see conjugation, voice*).

mutation — *see lenition, umlaut*

nasal sounds — sounds appearing in practically all languages, in the production of which the connection between mouth and nose is wholly or partly shut off, with the soft palate lowered and the voice resounding in the nose; for some special nasal sounds of French, Portuguese, Polish, etc., *see pp.* 172, 184, 187, 270, 354, 361, 366, 444.

negation — denial; in simplest form, "no"; in connection with other words, represented in English by "not" and other devices (note the characteristic English use of *do* as a negative auxiliary for verbs: "I do not write"). Other languages use a variety of negative devices which do not always correspond to ours (*e. g.*, the French double negative particle in *je ne vois pas*); *see pp.* 278, 289, 321, 327, 428, 474, 477, 487, 500-1, 518, 535). Some languages, like Finnish and Japanese, instead of using negative particles with affirmative verbs, use a negative conjugation, which differs in form from the affirmative (*see conjugation*).

neuter — *see gender*

neuter article and pronoun — forms peculiar to some Romance languages, which have in other respects given up the neuter gender (Spanish *lo hermoso*, "that which is beautiful"; French *je n'aime pas cela*, "I don't like that"); *see pp.* 170, 280.

neutral vowel — *see vowel*

nominative — *see case*

noun — the name of a person, place, thing or quality (*John, France, bread, beauty*). In English, nouns are divided into **proper** (the name of a specific person or locality; these are capitalized: *Roosevelt, Rome*), and **common** (names of things and qualities: *iron, intelligence*). Common nouns may further be subdivided into **concrete** (denoting tangible, material things: *bread, iron*), and **abstract** (denoting intangible concepts and qualities: *freedom, beauty*; *see p.* 128).

From the standpoint of use in the sentence, a noun may be used as **subject** ("*John is here*"; **direct object** ("I see *John*"); **indirect object** ("I give *John* the book"); **object of a preposition** ("I went with *John*"); **in apposition** (describing another noun directly: "*John the apostle*"); or as a **predicate noun** (describing the subject through the verb to be: "*John is an apostle*").

From the standpoint of structure, a noun has **gender, number and case**, which means that in languages with full declensional systems, like Sanskrit, Greek, Latin and Russian, we may get as many as 24 different forms for the same noun, each marked by a different **ending** (*see pp.* 32, 170). Note the distinction made in some languages (Slavic, *pp.* 362, 382-3) between **animate** nouns (denoting a living person or

animal) and **inanimate** nouns (denoting lifeless things or abstract qualities). *See also case, declension, ending, gender, inflection, number, object, possession, predicate, subject.*

number — the distinction in form or meaning of a noun, adjective, pronoun or verb to denote "one" or "more than one" of the objects named (*see pp. 24, 32, 88, 188-9, 230-1, 247, 274, 463, 466-7, 496, 499, 506, 510, 533, 538*). English has two numbers, **singular** (denoting one) and **plural** (denoting more than one). The more ancient Indo-European languages and the Semitic tongues also have a **dual** number (indicating two; Latin *duo, ambo* are survivals of the ancient Indo-European dual form; *see pp. 463, 466-7*). Certain Melanesian languages are said to have separate forms, especially for the pronouns, to indicate three and four of the objects in question ("we-three", "you-four"). Some tongues, like Chinese and Japanese, indicate the difference between singular and plural only when strictly necessary (*see pp. 497, 510, 533-4*). For the formation of the plural, regular and irregular, in various languages, *see pp. 23-4, 33, 35, 88, 170, 189, 230-1, 247, 274, 449-50, 452, 477, 487, 497, 510, 533-4* (in English a "regular" plural would be one formed by the addition of *-s*, such as *boys, girls*; an "irregular" plural, one formed by other devices, such as *oxen, children, men, women, sheep, deer, mice*). For the "broken" plural forms of Arabic, *see pp. 467-8*.

numeral — a word indicating a number, like *three, third*, etc. The **cardinal** numeral is the primary number itself (*one, two, three*; it may be used as an adjective or as a noun). The **ordinal** numeral shows the order or numerical position of the noun it defines (*first, second, third*), and is used primarily as an adjective. A **collective** numeral indicates a round number, like *dozen, score* (*see p. 514*). A **fractional** numeral indicates a part of one, like *half, third, quarter*. *See pp. 37, 132, 169-70, 175, 190, 232-3, 276-7, 319-20, 358-9, 385-6, 424-5, 427, 429-30, 433, 447, 452, 464, 468-9, 498-9, 504, 514, 549*. For **auxiliary numerals**, *see p. 550* and **classifier**.

object — the recipient of the action shown by the verb. In "I struck the man", "the man" directly receives the action of my striking, and is the **direct object**. In "I gave the man the book", there are two recipients involved, "the book" being primary or **direct** (what is given), "the man" being secondary or **indirect** (to whom is given). An easy way of distinguishing the indirect object from the direct is to determine before which of the two objects the preposition *to* may be correctly used ("I give the book *to* the man", "I give the book *to* him"). Different languages use different devices to mark the direct and the indirect object (position in the sentence, case-endings, prepositions, postpositions, etc.; *see pp. 22, 23, 536*).

object pronoun — see **pronoun**

objective — see **case**

oblique — see **case**

obsolete — see **archaic**

optative — see **mood**

ordinal — see **numeral**

orthography — see **spelling**

orthographical reform — a change in the system of spelling or writing of a language, usually aimed at obtaining a closer correspondence between symbol and sound. Turkish (see p. 440) and Russian (see pp. 355, 378, 462) have recently undergone official orthographic reforms which have made both languages far more accessible to foreign learners and far easier to their own school-children. Similar reforms have been advocated for English (notably, in recent times, by G. B. Shaw in England and former Senator R. L. Owen in the U. S.), but without success thus far. For a similar attempt in Japanese, see p. 528.

parent language — the language from which other tongues are descended; Latin is, for example, the parent language of the Romance tongues. In the case of many groups, a parent language, though unknown because no direct record of it has come down to us, can be more or less hypothetically reconstructed from a comparison of the known members of the group; see pp. 19, 27.

participle — a form of the verb used as an adjective. English has a **present active** participle (ending in *-ing*) which coincides in form with the **gerund** (see **gerund**) and a **passive** (incorrectly called **past**) participle which in weak verbs has the ending *-d* (*loved*), in strong verbs a variety of forms (the ending *-en* often appears: *written, spoken, broken*, but *bound, found, swum, sung*, etc.). Many languages have similar forms; others have additional ones (Latin, **future active** participle, *amaturus*, "about to love"). See pp. 353, 393, 444, 473, 487, 516-7, 541.

particle — a subordinate word, not inflected (such as a **preposition**, **conjunction** or **interjection**). Interrogative, negative, emphatic and other particles appear in many languages: see pp. 487, 501, 527, 533, 535.

passive — see **voice**

past, past absolute, past definite, past indefinite, past perfect — see **tense**

perfect — see **tense**

perfective — see **aspect**

person — the distinction between speaker (**first person**: "I", "we"); person addressed (**second person**: "you"); and person or thing spoken of (**third person**: "he", "she", "it", "they"). In many languages, the distinction of person appears in the form of the verb (then called a **personal verb**), being conveyed by a special suffix (Spanish *amo, amas,*

ama); in others, it is primarily conveyed by a subject pronoun, as happens for the most part in English, where only the third singular present (loves) carries a personal suffix ("I love", "you love", "they love"). Some languages, like Japanese, generally leave the person to be inferred from the context (the Japanese verb is described as **im-personal**; see p. 538). Other languages, like the Dravidian, distinguish between **inclusive** and **exclusive** first person plural ("we" meaning "you and I", and "we" meaning "I and he, but not you"; see p. 487). See also pp. 23, 499, 515.

personal verb — see **person, verb**

personal infinitive — see **infinitive**

personal pronoun — see **pronoun**

phonetic writing — see **orthographic reform, spelling**

pictograph — see **picture-writing**

picture-writing — a writing system whereby objects have a pictorial representation, like a round disk for "sun", a crescent for "moon", etc. This seems to be the original form of all writing-systems (see p. 489). A **pictograph** is a symbol denoting a definite object, as described above; an **ideograph** is a conventional symbol representing something not so obvious, as when Chinese combines pictographs representing "sun" and "tree" into an ideograph representing "east" ("the sun shining through trees"), or when we use the symbol \$ to represent "dollars". See pp. 19, 33, 461-2, 488-92, 526-7.

pitch — see **accent**

pluperfect — see **tense**

plural — see **number**

polite address — see **address**

polylingual — speaking many tongues, like a Swiss speaking all four of the official languages of Switzerland (German, French, Italian, Rumansh); see pp. 16, 49.

polysyllabic — consisting of more than one syllable, such as the word *in-tel-li-gent*; see pp. 496, 507.

polysynthetic — a type of language characterized by the fusion of many semi-independent elements into a single word; see pp. 36-7.

positive — see **adjective**

possessive — see **case, adjective, pronoun**

possession — ownership, or the denoting of ownership, as in "John's hat". For the denotation of possession in various languages, see pp. 23, 88, 467, 470-1, 477, 497-8, 504, 511, 518, 535-6.

postposition — a particle placed *after* a noun to indicate a case relation, like the Japanese *wo* denoting that the preceding noun is a direct object. See pp. 436, 440, 487, 497, 533, 535, 537. A postposition differs from a **case-ending** in that it is a completely separate and independent word.

predicate — what is said about the subject, including the verb and any complements (such as objects). A noun, pronoun or adjective describing the subject through the verb *to be* (or another copulative verb: *to seem*, *to become*, etc.) is said to be a **predicate noun**, **predicate pronoun**, or **predicate adjective** (“he is a general”; “it is I”; “he is good”; see **noun**, **adjective**). The case of a noun in the predicate after a copulative verb is said to be the **predicate nominative** (see p. 424).

prefix — an element placed before the root of a word to modify its meaning, like in “in-”, in “invoice”, or the “re-” in “regain”; see pp. 35-6, 127, 142, 395, 477, 487, 505, 510-1, 515-7, 534, 589-90.

preposition — a particle showing the relation of a noun or pronoun to another element in the sentence, and indicating a relation of position, direction, time, means, etc., like *in*, *of*, *to*, *from*, *by*; see pp. 22, 24, 170, 288, 424, 471, 479, 497, 513; see also **case**.

prepositional — see **case**

present — see **tense**

present perfect — see **tense**

principal clause — see **clause**

progressive — see **conjugation**

pronoun — a word used instead of a noun. The various classes of pronouns are:

personal (standing for the name of a person or thing, as *I*, *you*, *it*);

possessive (indicating ownership, as *mine*, *yours*);

demonstrative (pointing out, as *these*, *those*);

relative (referring to some person or thing previously mentioned, as *who*, *which*, *that*; the person or thing referred to is called the **antecedent**; in “I saw the man who came yesterday”, “man” is the antecedent of “who”);

interrogative (asking a question, as “who” in “who did it?”);

indefinite (like *someone*, *anyone*);

reflexive (like *myself*, *themselves* in “I see myself”, “they speak to themselves”).

From the standpoint of use in the sentence, the pronoun has the same functions as the noun (*q. v.*); a personal pronoun especially may be used as **subject** (“I am here”); **direct** or **indirect object** (“he sees me”; “he gives me the book”); **object of a preposition** (“he comes with me”); **predicate nominative** (“it is I”), etc. While practically all languages have subject personal pronouns, many often dispense with them, because the form of the verb makes it clear who the subject is (Spanish “quiero” vs. English “I love”; see pp. 22, 170, 177, 192, 234, 241, 278, 320, 391, 473, 538). With object personal pronouns, usage is still more varied; many languages customarily place the object pronoun **before** the verb (French “il me voit” vs. English “he sees me”; see pp.

177, 193, 200, 241, 278). At times the object pronoun is attached to the verb-form (Spanish "quiere verme", "he wants to see *me*"; see pp. 470, 473, 477). In some languages, notably Portuguese, two object pronouns (direct and indirect) are compounded, thereby appearing as a single form (see pp. 279, 288, 320-1). Other languages "incorporate" the object pronoun in the verb (see pp. 437, 453). For the "inclusive" and "exclusive" pronouns of Dravidian, see p. 487.

Note that many pronouns, particularly demonstrative and interrogative, may also be used as adjectives ("I want *these*", "I want *these* books"; "what do you want?", "what books do you want?"); in some languages this double use of a single form extends also to the possessives (Italian "voglio il *mio*", "I want *mine*"; "voglio il *mio* libro", "I want *my* book").

See also **case, declension, ending, gender, inflection, number, object, possession, predicate, subject.**

pronunciation (or **enunciation**) — articulate utterance, with the proper sound and accent. **Intonation** is pronunciation with reference to the pitch or modulation of the voice. See pp. 65-7, 72-3, 76, 83, 287, 329-30, 379, 421, 423, 446.

proper — see **noun**

punctuation — the use of periods, commas, etc. The rules of punctuation are not identical in all languages using our own or a similar alphabet; for some outstanding differences, see pp. 229, 423.

punctuating words — particles used in some languages to express a break in the meaning; see pp. 513, 518.

race — the anthropological affiliation of human beings, as distinct from their linguistic affiliations. Despite certain politically inspired beliefs to the contrary, it is a universally recognized scientific fact that there is no connection between the two; see pp. 21, 36, 457.

reciprocal — see **conjugation**

reduplication — in certain Indo-European languages, a device for forming tenses by doubling the first consonant or syllable of the root of the verb; this occurs most frequently in the formation of the perfect tense (Latin *cu-curri*, perfect of *curro*; *de-di*, perfect of *do*). The term is also applied, however, to the doubling of any word (usually a noun) to indicate plural number or frequent occurrence; see pp. 85, 510-1, 534.

reflexive — see **conjugation, pronoun**

relative — see **pronoun**

religion — the influence which religious beliefs exert on language, particularly in its written form, is sometimes far-reaching; see pp. 19, 30, 53, 80, 354, 456, 461-2, 480, 507, 530.

root (or **stem**) — a primitive word-form, without prefix, suffix, or inflectional element, as *go, wall, good*. In inflected languages, the root

is frequently accompanied by an inflectional **ending** (as *aim-s*, *aim-ing*, *aim-ed*); **isolating** languages, like the Chinese, permit no inflectional endings, and every word consists of a pure root (roots may, however, be combined into groups). The roots of Indo-European languages normally consist of both consonants and vowels, and the vowels are especially subject to modification (see pp. 88, 136, 143, 233, 430, 432, 436). Semitic languages have, generally, roots consisting of three consonants, with the vowels consigned to a secondary role (see pp. 29, 463, 472). See also pp. 23, 30, 33, 394, 477, 487, 539-40, 552.

secondary (or **cultural**) language — an acquired tongue, gained either through a cultural medium, such as a school, or through intercourse with the speakers; German, for example, is a widespread secondary and cultural tongue in countries like Czechoslovakia (where it is spoken by nearly 40% of the population), the Netherlands (20%), Hungary (15%), Sweden and Denmark (over 10%), etc. See pp. 41, 43, 45, 47-9, 52, 62-3, 81-7, 122-3, 167, 182-3, 312-3, 352, 376-7, 420, 456, 507.

semantic — pertaining to meaning; a **semantic change** in a word is a change in its meaning, as when Latin *mittere*, "to send", became French *mettre*, "to put". Words like English *knave* and German *Knabe* ("boy"), English *knight* and German *Knecht* ("serf"), English *rent* and French *rente* ("income") are illustrative of **semantic differentiation** of what was originally one and the same word in different languages; English *dame* (feminine of *sir*) and American slang *dame* illustrate semantic differentiation within the same language. See pp. 65, 67, 290.

sentence — a combination of words expressing a complete thought, as "I am here". For the various types of sentence, see **clause**.

simple sentence — see **clause**

simplification (or **analysis**) — the process whereby a language replaces inflectional endings with separate words conveying the meanings previously conveyed by the inflectional suffixes, as when Vulgar Latin replaces Classical genitive *muri* ("of the wall") with *de illo muro*, which later becomes Italian *de lo muro*, *del muro*. The opposite of analysis is **synthesis** (q. v.), whereby several concepts are gathered into a single word by the use of endings. The utmost in simplification is achieved by "isolating" languages, like Chinese, where every word is an unchanging, uninflected root. See pp. 22-3, 25, 421, 479-80.

singular — see **number**

slang — the jargon of a particular class, comprehensible only to members of that class; the use of new words and phrases, or of old words and phrases in a new and arbitrary, or figurative sense. **Colloquialisms** differ from slang only in degree, being more widely current and more acceptable to the more cultured speakers of a language, at least in spoken form. The dividing line between slang,

colloquialism, and literary language is invariably vague and shadowy, since the slang and colloquialisms of today often supply the material for the literary language of tomorrow. Slang appears in practically all languages that boast of a literary or even a written form, though to varying degrees. *See* pp. 19, 65-6, 72-87, 225, 246, 267, 611, 613.

spelling (or **orthography**) — the *written* form of a *spoken* word (*see* **alphabet**). The spelling of some languages, like English and French, is quite complicated, in the sense that there is only a partial correspondence of written symbol and spoken sound (note the different sounds that the symbol *a* has in *father*, *all*, *bat*, *fare*, or the symbol *s* in *silly*, *rose*, *measure*; the fact that often a single symbol represents a double sound, like the *u* in *unite* (*yu-nite*); and the fact that often a single sound is represented by a double symbol, as is the case with the *th* of *this* or the *sh* of *shore*). Other languages, like Spanish, have a more "simple" spelling; that is, there is a closer approach to symbol-for-sound correspondence. Several languages have deliberately gone about securing a closer correspondence of this type, though no language has completely achieved it (*see* **orthographic reform**). Most languages are said to have **phonetic writing**, that is, writing which to a greater or lesser degree represents sounds (for non-phonetic writing *see* pp. 491, 493, 526, and **picture-writing**), but true phonetic writing, with absolute symbol-for-sound correspondence, has so far been achieved only through the International Phonetic Alphabet, and even there with qualifications and room for discussion. *See* pp. 22, 67, 103, 229, 271, 314, 446, 583.

standardization of language — the process whereby local and dialectal varieties of a language are done away with, usually through conscious governmental effort, and a uniform language, at least in written form, is imposed upon the population of a given area; *see* pp. 65, 465, 491

stem — *see* **root**

strong — *see* **adjective, verb**

subject — the word, or group of words, about which something is said; in the sentence "I am here", "I" is the subject; in "to run fast is good exercise", "to run fast" is the subject. In languages having declensional forms, the noun or pronoun which is the subject goes into the nominative case (*see* **case, declension**); where declensional forms are wanting, position before the verb usually indicates the subject; in "the boy sees the man", the only thing that indicates that "the boy" is the subject and "the man" the object of the action of seeing is their relative position before and after "sees"; but in Latin the words may be arranged in any order (*virum videt puer*), since *puer* definitely informs us by its form that it is the subject, and *virum* that it is the object. *See* pp. 22-3.

subject pronoun — see pronoun

subjective — see case

subjunctive — see mood

subordinate — see clause

suffix — a letter or syllable added to the end of a word to modify its meaning; in “boys”, *s* is a plural suffix; in “boy’s”, *’s* is a possessive suffix; in “warmly”, *ly* is an adverbial suffix. See pp. 22-3, 30-1, 36, 85, 88, 128, 430, 432-3, 436-7, 440, 452, 470, 477, 487, 497, 510-1, 539, 549, 589-90. See also ending.

superlative — see adjective

supine — a verbal noun, or uninflected adjective, which does not exist in English. In the modern languages, like the Scandinavian, where the supine appears, it acts as a secondary past participle to form compound tenses in the active (“I have spoken”), while the past participle is used with a verb corresponding to *to be* to form the passive (“I am seen”); see pp. 96, 102.

syllable — a combination of sounds uttered with a single impulse of the voice, like each of the four voice-groups in *in-tel-li-gent*. In some languages, all words are **monosyllabic** (*q. v.*). In **polysyllabic** languages, **syllabification**, or **syllabic division**, is the dividing of words into syllables. This process, though unconscious in the spoken tongue, gives the language an individual flavor, marking it predominantly as a “vocalic” or “vowel” language, in which most syllables end in vowels (**open syllables**), or “consonantal”, where most of the syllables end in consonants (**closed syllables**). English definitely belongs to the latter type, while Spanish and Italian just as definitely belong to the former. A good deal of the pronunciation difficulty which the English-speaking student encounters in connection with foreign languages is due to his instinctive incorrect syllabic division, which he carries over unconsciously from his native tongue; dividing the Spanish *ge-ne-ral* as we divide the English *gen-er-al*, we are bound to get incorrect vowel-sounds. A useful exercise in this connection is to take long foreign words, divide them correctly into syllables according to the rules of syllabification of the language in question, pronounce the syllables separately, at first very slowly, with a distinct break between each syllable, then faster and faster till the breaks are eliminated, but the correct tonality of the vowels remains. See pp. 35, 127, 187, 229, 272, 315, 462, 489, 508, 526-32.

syllabary — a table of indivisible syllabic characters, such as appears in Japanese; see pp. 462, 489, 527-32; see also *kana*. In many western languages of a predominantly “open-syllable” nature (see above), children are taught to *syllabify* rather than to *spell* (*a, e, i, o, u; ba, be, bi, bo, bu; da, de, di, do, du; etc.*).

synonym — a word having the same meaning as another word;

shun, for example, is a synonym of *avoid* ("I avoid his company", "I shun his company"). Languages whose vocabulary is made up from various sources (like English, which is composed of Anglo-Saxon, Norman-French, Latin, Greek, etc.), are particularly rich in synonyms (Spanish *escorpión*, from the Latin; *alacrán*, from the Arabic; both meaning "scorpion"). See p. 179.

syntax — the structure of the sentence, or the arranging of words in their proper relation; the placing of the subject before, and of the object after the verb, is a matter of syntax. See pp. 83-4, 172, 495-7, 527.

synthesis — combining, or putting together, numerous subsidiary meanings in one word; opposed to **analysis** or **simplification** (q. v.); see pp. 22, 25.

tense — the modification of verb-forms to express time. The fundamental divisions of time are **present** ("I do", "I am doing"); **past** ("I did"); and **future** ("I shall do"); and many languages, like Russian, go no farther; some even combine the future with the present ("I *am going* there tomorrow"); while others dispense with tenses altogether, save where a special word (*yesterday, now, next year*) conveys the time of the action. In the modern western languages, tense-forms are generally covered by the following scheme, with some tenses lacking in some tongues:

present (indicates what happens habitually, or what is happening now: "I go there every day"; "I *am going* there now");

imperfect (indicates what was happening, or used to happen: French "j'y *allais* quand vous êtes entré"). There is no specific form for the imperfect in English, but the meaning is conveyed by the **past progressive** ("I *was going*"), or by a circumlocution like "I *used to go*";

past (indicates what happened: "I *went* there yesterday"). This tense goes by many different names in the grammars of various languages. The German past corresponds in form to the English, but is often used as an imperfect; the French past is called "**past definite**", and is used for the most part in book narration, being replaced in conversation by the **present perfect** or "**past indefinite**" ("I have done"); the Spanish past, called "**past absolute**", and the Italian past ("**passato remoto**") are similar to the English in use. Latin called this tense "**perfect**", and Greek "**aorist**" (see p. 425);

future (indicates what will take place: "I *shall go* there tomorrow"). In English and German, the future is formed by means of an auxiliary verb (*shall, will, werden* + infinitive); this makes it, in a broad sense, an analytical, or "compound" tense, since it consists of two combined, but independent elements; in the Romance languages, the future is a simple, or synthetic tense (*je ferai, haré, farò*); see pp. 23, 178, 245, 390-1, 472, 500, 540;

Compound Tenses (see pp. 178, 282) are generally formed by means of an **auxiliary** (to *have*, to *be*; see **auxiliary**) + the **past participle** (**supine** in some languages; see **supine**); in English they are:

present perfect (indicating what has happened: "I *have done it*"). French calls this tense the "**past indefinite**", and both French and German use it colloquially to translate both the English present perfect and the English past; in Spanish and Italian its use is very similar to English;

past perfect (indicating what had happened prior to something else that took place: "I *had seen* him before he went out"). It is often called "**pluperfect**". The Romance languages have two past perfect tenses, one formed with the imperfect, the other with the past of the auxiliary (French pluperfect *j'avais parlé*; past anterior *j'eus parlé*; both mean "I had spoken", but the second is used primarily in a subordinate clause when there is a past in the main clause).

future perfect (indicating what will have taken place: "I *shall have finished* the work by tomorrow"). Sometimes called "**future anterior**".

There is some dispute as to whether the **conditional present** ("he *would go* if I asked him") and the **conditional past** ("he *would have gone* if I had asked him") are to be considered as tenses of the indicative or as a separate mood. They appear in most western languages, being analytical forms in the Germanic, synthetic forms in the Romance tongues (see pp. 393, 425, 500, 540-1).

The tenses of the indicative, outlined above, are largely duplicated in the subjunctive, where the latter exists. German and Portuguese have six subjunctive tenses; French, Spanish and Italian have four (the future and future perfect subjunctive having disappeared from modern Spanish).

A tense distinction may also appear in the **infinitive** ("to do"; "to have done"; "to be about to do"); and in the participles ("doing"; "having done", "being about to do"; "done", "having been done", "being about to be done").

See pp. 23, 172, 353, 364, 375, 425-6, 499, 515, 538; see also **conjugation, mood, voice, verb**.

tilde — the sign used in Spanish over *n* (\tilde{n}) to indicate its palatal pronunciation; the same symbol is used by other languages over various letters to indicate various modifications of sound; see pp. 228, 270.

tone — the intonation or pitch of the voice; in certain languages, notably Chinese, tone serves to distinguish meaning; see pp. 17, 32-3, 459-60, 487-8, 492, 495-505. See also **accent**.

trade language — a tongue used as a medium of common intercourse among speakers of various languages in multilingual areas, like German in Central Europe, Malay in the Dutch East Indies, Pidgin in

the Melanesian Islands, Hausa and Swahili in sections of Africa, etc. See pp. 65, 83-7, 268-9, 454, 459; see also *lingua franca*.

transitive — see **verb**

umlaut — the change of a root vowel under the influence of the vowel in the final syllable, which later often disappears; the term **mutation** is also used for this phenomenon, but lends itself to another meaning (see **lenition**). The phenomenon is particularly apparent in the languages of the Germanic group (English *mouse, mice; foot, feet*). The double dot over the unlauded vowel is often called the umlaut, particularly by students of German; it is, however, properly speaking, only an orthographical indication of the phenomenon itself. See pp. 88, 99, 130, 280-1, 292, 434, 438.

unvoiced — see **consonant**

verb — a word expressing an action (like *see, hear, go*), or a mode of being (like *be, seem, become*). In some languages, like Chinese, the verb is not particularly segregated from other parts of speech (this often happens in English, where the verb *to mail*, for example, is distinguished from the noun *mail* only by its use in the sentence). In other languages, the verb assumes an unequivocal form, with specialized endings (Latin *amare*, French *finir*, German *sprechen*). Verbs may be classified as **transitive** (where the action can be carried over to a recipient, or **object**: "I see *him*"); **intransitive** (where the action cannot be carried over to an object: "we have succeeded"); and **copulative** (where the verb simply links the subject to a modifier: "he is (seems, becomes) a soldier"). Note that in English many verbs may be used transitively or intransitively ("he has just passed", intransitive; "he has just passed me", transitive; "the swallow flies". intransitive: "he flies a plane", transitive). In some languages (French, German, Italian) many intransitive and copulative verbs form their compound tenses with "to be" instead of "to have" (*il est allé, er ist gegangen, è andato*; see **auxiliary**; see also pp. 139, 199, 326).

Verbs, in English and most Indo-European languages, have **person**, **number**, **tense**, **voice** and **mood** (see each item); a form like "he goes", for instance, would be described as third person, singular number, present tense, indicative mood, active voice. But in many non-Indo-European tongues, all or some of these distinctions are missing; the Japanese verb, for instance, has tense, voice and mood, but no person or number (see pp. 24, 32, 536, 538); the Chinese "verb" is an uninflected root having none of these distinctions, and can generally be used also as a noun, adjective, or other part of speech (see pp. 495-6, 499-501).

Many languages divide their verbs into classes according to forms and endings (see **conjugation**). The English (and, in general, the Germanic) division is into two classes, **weak** and **strong**; the weak

verbs are characterized by the addition of a suffix (-d, -ed) in the past and passive participle (*love, loved, loved*); the strong by a change in the root vowel in these two forms (*write, wrote, written; speak, spoke, spoken*); see pp. 90, 101, 108, 115, 136). The Semitic languages have a similar classification, though different in form (see pp. 472-3). It is interesting to note that in English all the separate verb-forms that need be learned are four in the case of weak verbs (*love, loves, loving, loved*), five in the case of strong verbs (*speak, speaks, speaking, spoke, spoken*), all other forms being obtained by combining these with a few unchanging auxiliaries (*have, had, will, etc.*). See pp. 22-3, 32, 353, 463, 538. For the **polite, familiar, and honorific** verbs of Japanese, see pp. 24, 536, 538, 542-4, 547-8; see also **address**. See also **aspect, conjugation, ending, inflection, mood, tense, voice**.

verbal noun — a form of the verb syntactically used as a noun; that is, as subject ("to walk is good"; "walking is good"); direct object ("I like to walk"; "I like walking"); etc. See **gerund, infinitive, supine**; see also p. 473.

verbal adjective — a form of the verb syntactically used as an adjective, like "the singing man", "the written word"; see **participle**.

vernacular — the current spoken language of a given area, as opposed to its **written or literary** tongue. The vernacular is frequently characterized by **colloquialisms** and **slang** (q. v.).

vocabulary — the total stock of words in a language, or within the range of a given speaker. There is extreme variation in the vocabulary range of speakers of the same tongue. See pp. 24, 65-87, 172, 179-80, 246, 289-90, 354, 419, 421, 428-9, 456, 479, 487-8; see also **loan-word**.

vocative — see **case**

voice — a modification in the form of the verb to indicate whether the subject *does* the action (**active voice**: "I strike"), or *receives* it (**passive voice**: "I am struck"). In some languages, this is indicated by an inflectional ending (Latin *timeo*, active, "I fear"; *timeor*, passive, "I am feared"); in other languages, like English or German, by the use of an **auxiliary** (*to be, werden*) combined with the past participle. Some languages, particularly the Romance, tend to avoid the use of the passive by replacing it with an active equivalent (French *on le fera*, "it will be done") or by using the **reflexive** (Spanish *aquí se habla español*, "Spanish is spoken here"). In some languages the passive is completely wanting. The **middle voice**, which appeared in some of the older Indo-European languages, notably Greek, represents the subject as acting on or for himself, a function which has generally been taken over by the reflexive. Certain forms of the verb appearing in some languages (like the **desiderative**; see p. 546) may be described as voices, or as conjugations. For the **impersonal passive** of Finnish,

see p. 434. See pp. 89, 141, 178, 202, 240, 286, 328, 353, 366, 393, 425-6, 434, 441, 516, 546-7. See also **verb**.

voiced consonant — see **consonant**

vowel — a sound produced without friction or stoppage; or a letter purporting to represent such a sound. The written vowels of English are *a, e, i, o, u*; but the number of spoken vowels is much greater (*a* of *father, bat, all, fare*, etc.; *e* of *let, her, even*, etc.; *i* of *it, machine*, etc.; *o* of *not, orb*, etc.; *u* of *cut, rude*, etc.). Note also that many so-called vowel-sounds are **diphthongs** (q. v.: *a* of *fate*; *i* of *tide*; *o* of *note*; *u* of *unity*). Many vowel-sounds that appear in English do not appear in other tongues, and *vice-versa* (see pp. 29, 86, 184-5, 227, 314, 361, 461-3). For the **middle** (or **front rounded**) vowels of French, German, etc., see pp. 172, 185, 437. Vowels may be **stressed** or **unstressed** (see pp. 268-9, 287, 314, 329-30, 354, 379), and modify their sound accordingly. They may be **long** or **short** (though some languages minimize this difference); see pp. 125, 354, 368, 371, 423, 436, 444, 450, 466, 531, 533. For the **vowel-harmony** of the Ural-Altaiic tongues, whereby the vowel of the ending changes to harmonize with that of the root, see pp. 30-1, 430, 432, 436, 440; for the division of vowels in such languages into **front, back** and "**neutral**" (the last-named appearing only occasionally and functionally), see pp. 30-1, 430, 432, 436, 440. For the influx of front and back vowels in other language-groups, see pp. 88, 353. For the Indo-European (particularly Germanic) **umlaut** change, whereby the vowel of the root is modified by the influence of the vowel of the ending, see **umlaut**. For the **vowel-points** of the Semitic languages, see p. 461.

weak — see **adjective, verb**

word-order — the arrangement of words in the sentence (see **syntax**). In some languages with scanty or non-existent flec-tional endings (English, Chinese) word-order is of paramount importance for intelligibility. Where flec-tional endings are more abundant, the im-portance of word-order is usually secondary. See pp. 18, 22, 25, 32, 141-3, 162, 170, 172, 193, 200, 278-9, 288, 320-1, 447, 467, 488; 495-501, 505.

written (or **literary**) **language** — the inscribed, legible form assumed by a tongue which has achieved a certain cultural level. Many languages of primitive groups are unwritten, and consequently highly fluctuating both in time and space, with numerous dialectal variations, a rapid rate of change, and an undetermined standard form. Where a written form, particularly of the semi-phonetic type, is achieved, the result is generally a greater stability in the spoken language, although the process of change never comes to a full stop. When the language becomes a vehicle for literature, the process of standardization, unification and stabilization goes even farther. The

written tongue is, in due course of time, modified by spoken-language changes; on the other hand, the spoken tongue is often influenced by the written form. See **picture-writing**, **spelling**, and pp. 19, 29, 117, 127, 172, 180, 421, 424, 427, 444, 446, 456, 461-2, 465, 487-93; 504-7, 526-31.

ACKNOWLEDGMENTS

The list of those to whom the author is deeply indebted is long. The Japanese chapter is the personal offering of Professor Ralph Walker Scott, of Trinity College. The Malay section is the work of Dr. William Lowther. To both these sections the author's contribution was limited to details of revision and arrangement. In addition, it was deemed advisable to have most languages carefully checked by at least one cultivated native speaker, with general topics checked by scholars in the individual fields. (Many of these experts sat in as informants on the author's courses, and to them he is doubly grateful). Furthermore, the basic vocabularies of six out of the seven major languages treated were constructed, on a model prepared by the author, with the assistance of willing collaborators, who gave unstintingly of their time and labor to the success of this enterprise.

It is the author's desire, nevertheless, to assume personal responsibility for any errors or inaccuracies that may appear in the work; this owing to the fact that space limitations and the method that necessarily had to be followed made it impossible to accept many of the excellent suggestions offered by the experts, which would have contributed enormously to the completeness of the work, but would also have lengthened it beyond the bounds deemed practical.

Major Joseph B. Costanzo, M. I., U. S. A.; Professor Horatio Smith, of Columbia University; and Professor Harry Morgan Ayres, of Columbia, were of invaluable assistance to the author in the conception and planning of the entire work.

The first two chapters, dealing with linguistic families and the geography of language, were painstakingly examined and revised by Professor Louis H. Gray, of Columbia's Depart-

ment of Comparative Linguistics, and Mr. Duncan MacDougald, Jr., author of "The Languages and Press of Africa".

In Chapter III, the general Germanic material was examined by Professor Carl Bayerschmidt, of Columbia, and Professor Margaret Schlauch, of New York University. The English section was accurately gone over by Professor Harry Morgan Ayres, Professor William Cabell Greet, and Professor Elliott V. K. Dobbie, all of the English Department of Columbia, while much of the material on the English of New Zealand was supplied by Miss Henrietta R. Mason, of the Columbia University Extension. Australian and Pidgin English sections were examined and revised by Mr. Edgar Sheppard Sayer, author of "Pidgin English", and the South African section by Professor C. W. de Kiewiet, of Cornell University. The Swedish material was checked by Mrs. Birgit Olson Wagner, formerly of the Swedish Consulate General, and Mr. Gunnar Hök; the Norwegian by Mr. Joseph Mendelsohn and Mr. Kurt Valner; the Danish by Dr. Viggo C. Mengers; the Icelandic by Professor Margaret Schlauch, of New York University. The Dutch section was carefully examined and revised by Professor Adriaan Barnouw, of Columbia, and Mr. Martin Zwart. Mrs. Wagner, Mr. Mendelsohn and Mr. Zwart supplied most of the material appearing in the Swedish, Norwegian and Dutch word-lists, respectively. The Scandinavian material has been revised in accordance with suggestions offered in a review by Professor Einar Haugen, of the University of Wisconsin.

The German chapter and vocabulary were examined by Professor Carl Bayerschmidt of Columbia, Dr. Frederick Rex of the Lincoln School, and Miss Rosa Hettwer of the Milwaukee High School system, with Professor Frederick Heuser, of Columbia, contributing the solution of several controversial points. The German vocabulary was constructed, on the author's model, by Private Robert L. Politzer, U. S. A., and Mr. Herbert S. Ruhé, of St. Louis, Mo.

The general Romance material in Chapter V was examined by Professor Henri F. Muller, of Columbia's Department of Romance Philology. The Roumanian section was checked and

revised by Professor Leon Feraru, of Long Island University and Columbia, and Mr. A. Manoil, of the Language Units of the War Department.

The French chapter and vocabulary were examined by Professor Henri F. Muller and Professor Jeanne Vidon-Varney, of Columbia, and Miss Dorothy Rothschild of Hunter College, while the French vocabulary was constructed, on the author's model, by Dr. Nicholas J. Milella, of Cornell University's Foreign Area and Language Study Curriculum.

The Spanish chapter and vocabulary were examined by Professor Angel del Río, of Columbia, and Professor José Martel, of the College of the City of New York, while the Spanish vocabulary was constructed by Dr. Milella.

The Portuguese chapter and vocabulary were examined and extensively revised by Mr. Alexander da Rocha Prista, of Columbia, and Dr. Afranio Coutinho, editor of the Portuguese version (*Seleções*) of the "Reader's Digest"; most of the material on the Brazilian varieties of Portuguese was supplied by Mr. Antonio Cuffari, of the Foreign Area and Language Study Curriculum of Clark University, while the Portuguese vocabulary was constructed by Private Vincent Livelli, U. S. A.

The Italian chapter and vocabulary were examined by Mr. Gino Bigongiari, of Columbia, and Dr. Nicholas J. Milella, of Cornell.

The entire Slavic chapter was examined by Professor Clarence A. Manning and Dr. Arthur Coleman, both of Columbia, and Professor Roman Jakobson, of the University of Oslo and Columbia; the Polish section by Miss Christina Tolczynska, of the Bridgeport High Schools; the Czech section by Dr. Jaroslav Brož, of the Czechoslovak Consulate General; the Serbo-Croatian section by Mr. Alexander Trbović and Mr. Vlaho Vlahović, editor of "Slavonic Monthly"; and the Bulgarian section by Dr. Victor Sharenkoff, of the Research Department of the New York Public Library.

The Russian chapter and vocabulary were examined by Professor Clarence A. Manning of Columbia and Professor Paul Haensel of Northwestern University and Mary Washing-

ton College, as well as by Mrs. Elena Mogilat, of Columbia's Russian Department, and Mrs. Catherine Pastuhova, of the Foreign Area and Language Study Curriculum of Syracuse University. The Russian vocabulary was constructed, on the author's model, by Mrs. Pastuhova.

In Chapter XII, the Greek material was examined by Mr. Emanuel Athanas, of Columbia, and Mr. George Vanson; the Albanian by Mr. Nelo Drizari of Columbia; all of the Ural-Altaic material in Chapter I, II and XII, as well as the Turkish, Finnish and Hungarian sections, were examined and revised by **Dr. Karl Heinrich Menges of Columbia**; the Finnish section by Dr. John B. Olli of the College of the City of New York and Columbia; the Hungarian section by Mr. Elmer Sixay Dorsay, formerly of C. C. N. Y. and Columbia, and Dr. Lewis L. Sell; the Turkish section by Mr. Assim Yegenoglu, of the Language Units of the War Department. The Lithuanian and Lettish sections were examined by Professor Alfred Senn, of the University of Pennsylvania; the Celtic and Basque sections by Professor John L. Gerig of Columbia; the Welsh material by the Rev. Cynolwyn Pugh; the Basque by Mr. Juan Manuel Bilbao.

In Chapter XIII, the Arabic section was constructed with the very able assistance of Dr. Ibrahim Mansoury, of Columbia, and checked and revised by Professor Arthur Jeffery, of Columbia's Department of Semitic Languages, who also examined all the Semito-Hamitic material in Chapter I and II. Hebrew forms were checked by Professor Jeffery and Dr. Abraham Halkin, of Columbia, as well as by Rabbi Abraham Jacobson, of Temple Emanu-El, Haverhill, Mass., and Cantor Harold Greenblatt. The Persian and Indo-Aryan sections were examined by Mr. Anthony Paura, of Columbia's Department of Indo-Iranian. The Chinese section was examined and revised by Professor Luther Carrington Goodrich, of Columbia, who also supplied most of the Chinese phrase-list and examined the Sino-Tibetan material in Chapters I and II; and by Mr. Charles Wan, of the Chinese Ministry of Information in Chung King. Tibetan forms were checked by Dr. Theos Bernard. The

Malay section, as previously stated, is the work of Dr. William Lowther, of the Methodist Episcopal Church of Norwich, Conn., who spent ten years as a missionary in British Malaya; it was edited by the author, and examined by Mrs. Claire Holt, of Columbia University's Foreign Area and Language Study Curriculum, who supplied Dutch East Indies variants for British Malayan forms wherever such variants appear.

The Japanese chapter is the work of Professor Ralph Walker Scott, of Trinity College, who spent ten years as Professor of Occidental Languages in Rikkyō University in Tōkyō. It was edited by the author and examined and revised by Dr. Hachiro Yuasa, of the New York Japanese Methodist Church.

Appendix A (Esperanto) is the work of Mr. and Mrs. G. Alan Connor, respectively Director of the Esperanto Inter-language Institute in New York and Teacher of the International Cseh Institute of Esperanto of the Hague.

The Glossary was carefully examined by Professor Elliott V. K. Dobbie, of Columbia's English Department.

Lastly, the passages chosen for illustrative and comparative purposes throughout are official translations of John 3.16, appearing in the American Bible Society's splendid publication "The Book of a Thousand Tongues". To this choice, the objection may be offered that by reason of the subject-matter, the language is stereotyped and, in some cases, archaic. While this may be true in a few instances, it may be replied that nowhere else was it possible to obtain, for an entire series of languages, so homogeneous and accurate a set of individual translations. But of far greater importance is the fact that the Word of God, with its message of deathless hope to suffering humanity, seemed peculiarly fitted for a work of this kind, since it transcends national boundaries and finds an echo in the hearts of all men, irrespective of race, color, creed, speech or political belief. May this Word point to a solution of mankind's material, as well as spiritual, problems!

July 1, 1946.

Mario A. Pei
